RIVERSIDE, CAMBRIDGE:
STEREOTYPED AND PRINTED BY
H. O. HOUGHTON AND COMPANY.
PREFACE TO THE AMERICAN EDITION.

The reputation of Dr. William Smith's "Dictionary of the Bible" is now too well established to need any special commendation. It contains, by universal consent, the fruit of the ripest Biblical scholarship of England, and constitutes a library of itself (superseding the use of many books otherwise necessary) for the study and illustration of the Scriptures. As a whole, it is unquestionably superior to any similar Lexicon in our language, and cannot fail to maintain this rank for a long period to come. In this American edition, the Publishers reprint the entire work, without abridgment or change, except the correction of typographical errors, or an occasional verbal inaccuracy, and of mistakes in quotation and reference.

At the same time, the reprinting of this Dictionary, after the lapse of several years since its first publication, and of a still longer time since the preparation of many of the articles, affords an opportunity to give to it some new features, required by the progressive nature of Biblical science, and adapting it more perfectly to the wants of students of the Bible in our own country. Among the characteristics in which the American edition differs from the English, are the following:—

1. The contents of the Appendix, embracing one hundred and sixteen pages, and treating of subjects overlooked or imperfectly handled in the first volume, have been inserted in their proper places in the body of the work.

2. The numerous Scripture references, on the accuracy of which the value of a Bible Dictionary so much depends, have all been verified anew. The corrections found necessary in these references, and silently made, amount to more than a thousand. Many other mistakes in quotation and reference have been corrected during the revision of the work.

3. The system of cross-references from one article to another, so indispensable for enabling us to know what the Dictionary contains on related but separated subjects, has been carried much further in this edition than in the English.

4. The signification of the Hebrew and, to some extent, of the Greek names of persons and places has been given in English, according to the best authorities (Simonis, Gesenius, Dietrich, Fürst, Pape) on this intricate subject. We have such definitions occasionally in the original work, but on no consistent plan. The Scripture names reveal to us a striking peculiarity of the oriental mind, and often throw light on the personal history and the geography of the Bible.

5. The accentuation of proper names has required adjustment. Dr. Smith's "Concise Dictionary of the Bible" differs here widely from the larger work; and in both, forms perfectly analogous are differently accented, in many instances, without apparent reason. In the present edition, this subject has received careful attention; and in respect to that large class of names whose pronunciation cannot be regarded as settled by usage, an attempt has been made to secure greater consistency by the application of fixed principles.

6. The English edition, at the beginning of each article devoted to a proper name, professes to give "the corresponding forms in the Hebrew, Greek, and Vulgate, together with the variations in the two great manuscripts of the Septuagint, which are often curious and worthy of notice." But this plan has been very imperfectly carried out so far as relates to the forms in the Septuagint and Vulgate, especially in the first volume. The readings of the Vatican manuscript are very
rarely given where they differ from those of the Roman edition of 1587, — a case which frequently occurs, though this edition is, to a great extent, founded on that manuscript; and those of the Alexandrine manuscript are often ignored. The present edition of the Dictionary seeks to supply these defects; and not only have the readings of the Roman text (as given by Tischendorf) been carefully noted, with the variations of the Vatican and Alexandrine manuscripts as edited by Mai and Baber, but also those of the two other leading editions of the Septuagint, the Complutensian and the Aldine, and of the Codex Sinaiticus, whenever the forms given in them accord more nearly with the Hebrew, or on other accounts seem worthy of notice. To these last two editions, in the Apocrypha especially, we must often look for the explanation of the peculiar spelling of many proper names in the common English version. Many deviations of the later editions of this version from the first edition (1611), important as affecting the orthography of Hebrew proper names, have also been detected and pointed out.

7. The amount of Scripture illustration derived from a knowledge of Eastern customs and traditions, as made known to us so much more fully at the present day by missionaries and travellers in the lands of the Bible, has been largely increased. More frequent remarks also have been made on difficult texts of Scripture, for the most part in connection with some leading word in them, with which the texts are naturally associated.

8. The obsolete words and phrases in the language of the English Bible, or those which, though not obsolete, have changed their meaning, have been explained, so as to supply, to some extent, the place of a glossary on that subject. Such explanations will be found under the head of such words, or in connection with the subjects to which they relate.

9. On various topics omitted in the English work, but required by Dr. Smith's plan, new articles have been inserted in the American edition, with additions to others which seem not fully to represent our present knowledge or the state of critical opinion on the subjects discussed. The bibliographical references have been greatly increased, and care has been taken to mention the new works of value, or new editions of works in geography, philology, history, and exegesis, in our own or other languages, which have appeared since the original articles were written. Further, all the new wood-cuts in the Abridged English edition, illustrating some of the most important subjects in geography and archaeology, but not contained in the Unabridged edition, are inserted in the present work. Many additional views of Scripture scenes and places have been introduced from other more recent publications, or engraved from photographs.

10. Fuller recognition has been made of the names and works of American scholars, both as an act of justice to them as co-workers with those of other lands in this department of study, and still more as due to American readers. It must be useful certainly to our own students to be referred to books within their reach, as well as to those which they are unable to consult, and to books also which more justly represent our own tendencies of thought and modes of statement, than can be true of those prepared for other and foreign communities. References are made not only to books of American writers, but to valuable articles in our Periodicals, which discuss questions of theological and Biblical interest.

In addition to the aid of Mr. Abbot (who has had special charge of the proof-reading, the orthoepy, and the verification of references to the original texts and ancient versions of the Bible, and has also given particular attention to the bibliography), the editor has had the cooperation of eminent American scholars, as will be seen by the list of names subjoined to that of the writers in the English edition. It is proper to add that the Arabic words in the Dictionary have been revised by the Rev. Dr. Van Dyck, one of the translators of the modern Arabic Bible, or by Professor Salisbury, of Yale College.

Newton Centre, December 20, 1864.

H. B. HACKETT.
PREFACE TO THE ENGLISH EDITION.

The present work is designed to render the same service in the study of the Bible as the Dictionaries of Greek and Roman Antiquities, Biography, and Geography have done in the study of the classical writers of antiquity. Within the last few years Biblical studies have received a fresh impulse; and the researches of modern scholars, as well as the discoveries of modern travellers, have thrown new and unexpected light upon the history and geography of the East. It has, therefore, been thought that a new Dictionary of the Bible, founded on a fresh examination of the original documents, and embodying the results of the most recent researches and discoveries, would prove a valuable addition to the literature of the country. It has been the aim of the Editor and Contributors to present the information in such a form as to meet the wants, not only of theological students, but also of that larger class of persons who, without pursuing theology as a profession, are anxious to study the Bible with the aid of the latest investigations of the best scholars. Accordingly, while the requirements of the learned have always been kept in view, quotations from the ancient languages have been sparingly introduced, and generally in parentheses, so as not to interrupt the continuous perusal of the work. It is confidently believed that the articles will be found both intelligible and interesting even to those who have no knowledge of the learned languages; and that such persons will experience no difficulty in reading the book through from beginning to end.

The scope and object of the work may be briefly defined. It is a Dictionary of the Bible, and not of Theology. It is intended to elucidate the antiques, biography, geography, and natural history of the Old Testament, New Testament, and Apocrypha; but not to explain systems of theology, or discuss points of controversial divinity. It has seemed, however, necessary in a “Dictionary of the Bible,” to give a full account of the Book, both as a whole and in its separate parts. Accordingly, articles are inserted not only upon the general subject, such as “Bible,” “Apocrypha,” and “Canon,” and upon the chief ancient versions, as “Septuagint” and “Vulgate,” but also upon each of the separate books. These articles are naturally some of the most important in the work, and occupy considerable space, as will be seen by referring to “Genesis,” “Isaiah,” and “Job.”

The Editor believes that the work will be found, upon examination, to be far more complete in the subjects which it professes to treat than any of its predecessors. No other dictionary has yet attempted to give a complete list of the proper names occurring in the Old and New Testaments, to say nothing of those in the Apocrypha. The present work is intended to contain every name, and, in the case of minor names, references to every passage in the Bible in which each occurs. It is true that many of the names are those of comparatively obscure persons and places; but this is no reason for their omission. On the contrary, it is precisely for such articles that a dictionary is most needed. An account of the more important persons and places occupies a prominent position in historical and geographical works; but of the less conspicuous names no information can be obtained in ordinary books of reference. Accordingly many names, which have been either entirely omitted or cursorily treated in other dictionaries, have had considerable space devoted to them; the result being that much curious and sometimes important knowl-
edge has been elicited respecting subjects of which little or nothing was previously known. Instances may be seen by referring to the articles "Ishmael, son of Nethaniah," "Jarchi," "Jedidiah," "Jehosheba."

In the alphabetical arrangement the orthography of the Authorized Version has been invariably followed. Indeed the work might be described as a Dictionary of the Bible, according to the Authorized Version. But at the commencement of each article devoted to a proper name, the corresponding forms in the Hebrew, Greek, and Vulgate are given, together with the variations in the two great manuscripts of the Septuagint, which are often curious and well worthy of notice. All inaccuracies in the Authorized Version are likewise carefully noted.

In the composition and distribution of the articles three points have been especially kept in view — the insertion of copious references to the ancient writers and to the best modern authorities, as much brevity as was consistent with the proper elucidation of the subjects, and facility of reference. To attain the latter object an explanation is given, even at the risk of some repetition, under every word to which a reader is likely to refer, since it is one of the great drawbacks in the use of a dictionary to be referred constantly from one heading to another, and frequently not to find at last the information that is wanted.

Many names in the Bible occur also in the classical writers, and are therefore included in the Classical Dictionaries already published. But they have in all cases been written anew for this work, and from a Biblical point of view. No one would expect in a Dictionary of the Bible a complete history of Alexandria, or a detailed life of Alexander the Great, simply because they are mentioned in a few passages of the Sacred Writers. Such subjects properly belong to Dictionaries of Classical Geography and Biography, and are only introduced here so far as they throw light upon Jewish history, and the Jewish character and faith. The same remark applies to all similar articles, which, far from being a repetition of those contained in the preceding dictionaries, are supplementary to them, affording the Biblical information which they did not profess to give. In like manner it would obviously be out of place to present such an account of the plants and animals mentioned in the Scriptures, as would be appropriate in systematic treatises on Botany or Zoology. All that can be reasonably required, or indeed is of any real service, is to identify the plants and animals with known species or varieties, to discuss the difficulties which occur in each subject, and to explain all allusions to it by the aid of modern science.

In a work written by various persons, each responsible for his own contributions, differences of opinion must naturally occur. Such differences, however, are both fewer and of less importance than might have been expected from the nature of the subject; and in some difficult questions — such, for instance, as that of the "Brethren of our Lord" — the Editor, instead of endeavoring to obtain uniformity, has considered it an advantage to the reader to have the arguments stated from different points of view.

An attempt has been made to insure, as far as practicable, uniformity of reference to the most important books. In the case of two works of constant occurrence in the geographical articles, it may be convenient to mention that all references to Dr. Robinson's "Biblical Researches" and to Professor Stanley's "Sinai and Palestine," have been uniformly made to the second edition of the former work (London, 1856, 3 vols.), and to the fourth edition of the latter (London, 1857).

The Editor cannot conclude this brief explanation without expressing his obligations to the writers of the various articles. Their names are a sufficient guarantee for the value of their contributions; but the warm interest they have taken in the book, and the unwearying pains they have bestowed upon their separate departments, demand from the Editor his grateful thanks. There is, however, one writer to whom he owes a more special acknowledgment. Mr. George Grove of Sydenham, besides contributing the articles to which his initial is attached, has rendered the Editor important assistance in writing the majority of the articles on the more ob
secure ones in the first volume, in the correction of the proofs, and in the revision of the whole book. The Editor has also to express his obligations to Mr. William Aldis Wright, Librarian of Trinity College, Cambridge, and to the Rev. Charles P. Phinn of Chichester, for their valuable assistance in the correction of the proofs, as well as to Mr. E. Stanley Poole, for the revision of the Arabic words. Mr. Aldis Wright has likewise written in the second and third volumes the more obscure names to which no initials are attached.

It is intended to publish shortly an Atlas of Biblical Geography, which, it is believed, will form a valuable supplement to the Dictionary.

LONDON, November, 1853.

* * * The new portions in the present edition are indicated by a star (*), the editorial additions being distinguished by the initials H. and A. Whatever is enclosed in brackets is also, with unimportant exceptions, editorial. This remark, however, does not apply to the cross-references in brackets, most of which belong to the original work, though a large number have been added to this edition.

ABBREVIATIONS.

Abl. The Abline edition of the Septuagint, 1518.
Alex. The Codex Alexandrinus (5th cent.), edited by Baber, 1816-28
A. V. The authorized (common) English version of the Bible.
Comp. The Septuagint as printed in the Complutensian Polyglott, 1514-17, published 1522.
FA. The Codex Friderico-Augustanus (4th cent.); published by Tischendorf in 1846.
Rom. The Roman edition of the Septuagint, 1587. The readings of the Septuagint for which no authority is specified are also from this source.
Sin. The Codex Sinaiticus (4th cent.), published by Tischendorf in 1862. This and FA. are parts of the same manuscript.
Vat. The Codex Vaticanus 1299 (4th cent.), according to Mai’s edition, published by Vercellone in 1857. “Vat. II.” denotes readings of the MS. (differing from Mai), given in Holmes and Parsons’s edition of the Septuagint, 1798-1827. “Vat. 3” distinguishes the primary reading of the MS. from “Vat. 2,” or “2 m.,” the alteration of a later reviser.
DICTIONARY

OF

BIBLICAL ANTIQUITIES, BIOGRAPHY, GEOGRAPHY, AND NATURAL HISTORY.

A

A'ALAR. [Addan.]

AARON (א‎ר‎ו‎ן‎, moun-
taneer, Ge.; or from א‎ר‎ו‎ן‎, enlightened, First; a

Aapóv;; Aaron), the son of Amram (א‎ר‎ו‎ן‎א‎ר‎ם‎, kindred of the Highest) and Jochebed (יו‎כ‎ב‎ד‎ו‎ה‎, whose glory is Jehovah), and the elder brother of

Moses and Miriam (Num. xxvi. 59, xxxii. 39). He was a Levite, and, as the first-born, would naturally be the priest of the household, even before any special appointment by God. Of his early history we know nothing; although, by the way in which he is first mentioned in Ex. iv. 14, as "Aaron the Levite;" it would seem as if he had been already to some extent a leader in his tribe. All that is definitely recorded of him at this time is, that, in the same passage, he is described as one "who could speak well." Judging from the acts of his life, we should suppose him to have been, like many eloquent men, a man of impulsive and comparatively unstable character, leaping almost wholly on his brother; incapable of that endurance of loneliness and temptation, which is an element of real greatness; but at the same time earnest in his devotion to God and man, and therefore capable of sacrifice and of discipline by trial.

His first office was to be the "Prophet," i.e. (according to the proper meaning of the word), the interpreter and "Month" (Ex. iv. 16) of his brother, who was "slow of speech;" and accordingly he was not only the organ of communication with the Israelites and with Pharaoh (Ex. iv. 20, vii. 2), but also the actual instrument of working most of the miracles of the Exodus. (See Ex. vii. 19, &c.) Thus also on the way to Mount Sinai, during the battle with Amalek, Aaron is mentioned with Hur, as staying up the weary hands of Moses, when they were lifted up for the victory of Israel (not in prayer, as is sometimes explained, but) to bear the rod of God (see Ex. xvii. 9). Through all this period, he is only mentioned as dependent upon his brother, and deriving all his authority from him. The contrast between them is even more strongly marked on the arrival at Sinai. Moses at once acts as the mediator (Gal. iii. 19) for the people, to come near to God for them, and to

speak His words to them. Aaron only approaches with Nadab, and Abihu, and the seventy elders of Israel, by special command, near enough to see God's glory, but not so as to enter His immediate presence. Left then, on Moses' departure, to guide the people, he is tried for a moment on his own responsibility and he fails, not from any direct unbelief on his own part, but from a weak inability to withstand the demand of the people for visible - gods to go before them." Possibly it seemed to him prudent to make an image of Jehovah, in the well-known form of Egyptian idolatry (Apis or Mnevis), rather than to risk the total alienation of the people to false gods; and his weakness was rewarded by seeing a "fear of the Lord" (Ex. xxxii. 5) degraded to the lowest form of heathenish sensuality, and knowing, from Moses' words and deeds, that the covenant with the Lord was utterly broken. There can hardly be a stronger contrast with this weakness, and the self-condemned shame of his excise, than the burning indignation of Moses, and his stern decisive measures of vengeance; although beneath these there lay an ardent affection, which went almost to the verge of presumption in prayer for the people (Ex. xxxii. 19-34), and gained forgiveness for Aaron himself (Deut. ix. 20).

It is not a little remarkable, that immediately after this great sin, and almost as though it had not occurred, God's fore-ordained purposes were carried out in Aaron's consecration to the new office of the high-priesthood. Probably the fall and the repentance from it may have made him one "who could have compassion on the ignorant, and them who are out of the way, as being himself also compassed with infirmity." The order of God for the consecration is found in Ex. xxix., and the record of its execution in Lev. viii.; and the delegated character of the Aaronic priesthood is clearly seen by the fact, that, in this its inauguration, the priestly office is borne by Moses, as God's truer representative (see Heb. vii.).

The form of consecration resembled other sacrificial ceremonies in containing, first, a sin-offering, the form of cleansing from sin and reconciliation [Sin-offering]; a burnt-offering, the symbol of entire devotion to God of the nature so purified [Burnt-offering]; and a meat-offering, the thankful acknowledgment and sanctifying of God's natural blessings [Meat-offering]. It had, however, besides these, the solemn assumption of the
it from Abishar, and restored it to Zadok (of the house of Eleazar), so fulfilling the prophecy of 1 Sam. vii. 90.

A. B.

N. B. In 1 Chr. xxvii. 17, "Aaron" (יוסף ארון) is counted as one of the "tribes of Israel."

AARONITES, THE (יוסףים, יוסף: 'Aṣop); the Levites, descendants of Aaron, and therefore priests, who, to the number of 3,700 fighting men, with Jeshaniah the father of Benaiah at their head, joined David at Hebron (1 Chr. xxi. 27). Later on in the history (1 Chr. xxvii. 17) we find their chief was Zadok, who in the earlier narrative was distinguished as "a young man mighty of valor." They must have been an important family in the reign of David to be reckoned among the tribes of Israel.

A. B.

AB (אב, father), an element in the composition of many proper names, of which Abba is a Chaldaic form, the syllable aflatx giving the emphatic force of the definite article. Applied to God by Jesus Christ (Mark xiv. 36), and by St. Paul (Rom. viii. 15; Gal. iv. 6.) [Abbâ]. K. W. B.

AB [Montiss].

AB'ACUC, 2 Esdr. i. 40. [Habarukk].

ABAD'DON, Rev. ix. 11. [Apollyon].

ABAD'IAS (Aaron, Abaias); Ab'ina, the son of Jehiel (1 Esdr. viii. 35).

A. B.

ABAGTHA (אבגדה, Zabađēth, Zabādā; Alex. F.A. Zabaδatha; Comp. 'Abaγatha; Abagaδath), one of the seven envoys in the Persian court of Abasurus (Esth. i. 10). In the LXX, the names of these envoys are different. The word contains the same root which we find in the Persian names Bigthah (Esth. i. 10), Bigthan (Esth. vi. 21), and Bignath, which explains it from the Sanscrit bégānāthu, "given by fortune," in bagei, fortune, the sun.

AB'ANA (אהבנה; 'Abarāh; [Yat. ii. (Yat. 2 Mai) Apē'bara; Alex. Nas'βara; Comp. 'A'awār]; "Aaron"), one of the "rivers (יוסף יתנ של ממונק) of Damascus (2 K. v. 12). The Barada (Ἀπεραδάς) of the Greeks and the Ar'ayj are now the chief streams of Damascus, and there can be little doubt that the former of these represents the Alman and the latter the Pharpar of the text. As far back as the days of Eliezer and Strabo the Barada was, as it now is, the chief river of the city (Rob. iii. 446), flowing through it, and supplying most of its dwellings with water. The Ar'ayj is further from Damascus, and a native of the place, if speaking of the two together, would certainly, with Naxman, name the Barada first (Porter, i. 276). To this may be added the fact that in the Arabic version of the passage — the date of which has been fixed by Kidger as the 11th century — Alman is rendered by Barrud, الربد. Further, it seems to have escaped notice that one branch of the Ar'ayj — if Kiepert's map (in Rob. 1856) is to be trusted — now bears the name of Wadi Baradar. There is however no reference to this in Robinson or Porter. The Barada rises in the Anti-Libanus near Zebdiyyah, at about 23 miles from the city, and 1149

A. B.

The Kert, with the Turgut Jonathan and the Syriac version, has Aasmah. See margin of A. V.
feet above it. In its course it passes the site of the ancient Abila, and receives the waters of Ain-Fijeh, one of the largest springs in Syria. This was long believed to be the real source of the Barada, according to the popular usage of the country, which regards the most copious fountain, not the most distant head, as the source of a river. We meet with other instances of the same mistake in the case of the Jordan and the Orontes [Alt]; it is to Dr. Robinson that we are indebted for its discovery in the present case (Rob. iii. 477). After flowing through Damascus the Barada runs across the plains, leaving the remarkable Assyrian ruin Tell es-Saltikeh on its left bank, till it loses itself in the lake or marsh Boiret el-Kibliyeh. Mr. Porter calculates that 14 villages and 150,000 souls are dependent on this important river. For the course of the Barada see Porter, vol. i. chap. v. Journ. of the L. S. N. S. viii. Rob. iii. 446. 7. Light-foot (Cent. Chor. iv.) and Gesenius (Thes. 116) quote the name 'Abilley as applied in the Lexicon Arisch to the Amama.

* G. * G. Gesenius (Thes. p. 116) supposes Alana to be a commutation for Amama by an interchange of the initials א and ר: it may be a dialectic or a provincial difference. See also Keil's BS. der Könige, p. 398. Amama or Alana means "perennial" (comp. נָּרִים) as said of water in Is. xxiii. 16 and Jer. xv. 18) and is especially appropriate to this everflowing stream. The only biblical allusion to the name is in Naaman's sorrowful interrogation in 2 Kings v. 12: "Are not Alana and Pharpar, rivers of Damascus, better than all the waters of Israel?" There may be something more than pride of country in this; for the waters of Alana (Riwardo), especially after the confluence of the stream from Fijeh, its most copious fountain, are remarkably fresh and sparkling, and at the present day proverbially salubrious, while those of the Jordan are mixed with clay and tepid, though not unfit for drinking (Kleider's Wallfahrten, p. 157; Rob. Phys. Geog. p. 163.

AB'ARIM (so Milton acccents the word), the "mount," or "mountains of (always with the def. article, נָּרִים נָּרִים נָּרִים) or נָּרִים, or נָּרִים נָּרִים נָּרִים נָּרִים נָּרִים, [etc.] or וּבְגֶלֶפֶּדַּו וּבְגֶלֶפֶּדַּו וּבְגֶלֶפֶּדַּו וּבְגֶלֶפֶּדַּו וּבְגֶלֶפֶּדַּו, = the mountains of the further parts, or possibly of the fords), a mountain or range of highlands on the east of the Jordan, in the land of Moab (Dent. xxxii. 49), facing Jericho, and forming the eastern wall of the Jordan valley at that part. Its most elevated spot was the "Mount Nebo, "head of the Pisgah," from which Moses viewed the Promised Land before his death. There is nothing to prove that the Abarim were a range or tract of any length, unless the J.ei-Abarim ("heaps of A.") named in Num. xxxii. 44, and which were on the south frontier of Moab, are to be taken as belonging to them. But it must be remembered that a word derived from the same root as Abaraim, namely, נָּרִים, is the term commonly applied to the whole of the country on the east of the Jordan.

These mountains are mentioned in Num. xxii. 12, xxxii. 47, 48, and Deut. xxxii. 49; also probably in Jer. xxii. 20, where the word is rendered in the A. V. "passages.

In the absence of research on the east of the Jordan and of the Dead Sea, the topography of those regions must remain to a great degree obscure. *

*ABBA. The Chaldee or Aramonic appends the article instead of prefixing it as in Hebrew; and hence when Abba (ס'א) occurs the exact כ'פ'א"poccurs for the sake of Greek readers. See Winer's Epist. ad Gals. p. 96. Abba, as the vernacular term (a vox solennis from childhood), was of course more expressive than any foreign word could be, and came, as it were, first to the lips as the writer or speaker thought of God in the filial relation, which the word designated with such fullness of meaning. See Usteri's 'Com. über d. Brief an die Gal.' vol. v. p. 98. The transla- "Abba" into the mouth of Jesus as he prayed in the garden in anticipation of a usage which began to exist at a later period.

AB'DA (שֶׁפֶר) [servant, a Chaldee form]: Ab'doa; [Vat. Ephr.]: Alex. Αβδοά; Comp. 'Ab'død (-). 1. Father of Adoniram (1 K. iv. 6.)
 2. [Ab'død: Comp. 'Abd'siz] Son of Shammua (Neh. xi. 17), called Obediah in 1 Chr. ix. 15.

AB'DEEL (שֶׁפֶר) [com. Abd. Rom. Alex. FA.]: Comp. 'Ab'δês; Alex. Αβδῆς; Ab'deel, father of Shele- mish (Jer. xxxvi. 29). [A. V. ed. 1611 reads Ab'del.]

AB'DDI (שֶׁפֶר) [my servant]: Ab'dî; [Vat. Αβδη; Αβδη]; Alex. Αβδη; Ab'dil. 1. A Merarite [Mas-狂欢, and ancestor of Ethan the singer (1 Chr. vi. 44).
 2. (Ab'dî). The father of Kish, a Merarite Le- tile in the reign of Hezekiah (2 Chr. xxix. 12). From a comparison of this passage with 1 Chr. iv. 44 it would appear either that ancestral names were repeated in Levitical families, or that they be- came themselves the names of families, and not of individuals.

3. [Ab'dîa]: F. Αβδηα. One of the Bene- Elam [sons of Elam] in the time of Ezra who had married a foreign wife (Ezr. x. 26). W. A. W.

AB'DI'AS (Ab'divas). The prophet Obediah (2 Esdr. i. 20).

W. A. W.

AB'DIEL (שֶׁפֶר) [servant of God]: Αβ' δηάς; [Vat. Αβδηάς; Αβδηάς] Αβδηλ, son of Gunî (1 Chr. v. 13).

* The casual notice here is all that is known to us of this Abielid from the Bible. The celebrity which the name has acquired arises chiefly from Milton's use of it as applied to that only one among the hosts of Satan, of whom he could say:——

* Among the faithful, faithful only he; 

* For a concise statement of the somewhat per- plexed relation of Abilael, Nebo, and Pisgah to each other, the reader may consult Dr. Robinson's Arabic Geography of Palestine, p. 92. Kurta (Gesch. des A. B.) has a section (ii. p. 88) on the "Gelirge Abarim." See also Ramser's Palestina, and Ritter's Enzyklopa die auf Abarim. Additional information, the result of later discoveries, will be found under Nemo.
and whom (referring to the etymology) he represents as receiving the lofty praise —

"Servant of God, well done; well hast thou fought." 

**ABDON** (אבדון [ser:ik]) 'Αβδών; [in Judg., Alex. Ἀβδών, Ἀβδώνι] Abdon). 1. A judge of Israel (Judg. xii. 13, 15), perhaps the same person as Reuben in 1 Sam. xii. 11.

2. [Vat. Ἀβδώνι] Son of Shashak (1 Chr. viii. 23).

3. First-born son of Jehiel, son of Gibeon [rather, father of Gibeon, i.e. the city or people of Gibeon] (1 Chr. viii. 29, ix. 35, 36).

4. [Aḇḏōn] Vat. Ἀβδώνι; Alex. Ἀβδών. Son of Micah, a contemporary of Josiah (2 Chr. xxxix. 20), called Achbor in 2 Kings xii. 12.

**ABDON** (אבדון [ser:ik]), ᾿Αβδών, Αβδών, Παγαδών, a city in the tribe of Asher, given to the Gershonites (Jesh. xxi. 30; 1 Chr. vi. 74). No place of this name appears in the list of the towns of Asher (Jesh. xiii. 24-31); but instead we find (28) יַכְּרִי, "Hebron," a which is the same word, with the change frequent in Hebrew of יַכְּרִי for יַכְּרִי. Indeed many MSS. have Abdon in Jesh. xix. 28 (Gen. p. 980: Winer, s. r.); but, on the other hand, all the ancient versions retain the R. except the Vatican LXX. which has Ἐλπάδων (Alex. Ἀχραῖαν) and (so Comp.; 17 MSS. have Ἐβραῖον).

**ABED NEGO** (אבדנגו, Ἀβδένγκο, Αβδένγκο, i.e. servant of Nego) perhaps the same as נְגוּ, which was the Chaldean name of the planet Mercury, worshipped as the scribe and interpreter of the gods (Gesen). Abednego was the Chaldean name given to Azariah, one of the three friends of Daniel, miraculously saved from the burning fiery furnace (Dan. iii.).

[AΣΧΑΗΗ, No. 24.]

**A'bel** (אֵיבֵל) אֵיבֵל, אֶוַ́ל = membræ, according to Genesis, which derives it from a root signifying moisture like that of grass; see, however, in favor of a different meaning [בֵּיתאות], the arguments of Lengerke, Kuran, i. 358, and Hengstenberg, P.ii. ii. 319); the name of several places in Palestine:

1. **A'HEL-TH'AY'AH** (אֵהלַת-תַּיָּהָא) אֵהלַת-תַּיָּהָא; [house of oppression; 2 S. ᾿Αβελ καὶ Βεθαδα podría] Abela et Bethadumea; 1 K. ν' ᾿Αβελ ᾿Αβελ καὶ Μααχ: Αβελδονα Μααχα; 2 K. ν' ᾿Αβελ καὶ Θαμασονία καὶ Μααχα: Αβελδονα Μααχα Μααχα; H. e. a town of some importance πόλις καὶ μητρόπολις, "a city and a mother in Israel," 2 Sam. xx. 196), in the extreme north of Palestine; named with Dan, Cinnereth, Keveh; and as such filling an early place to the invading kings of Syria (1 K. xv. 20) and Assyria (2 K. xx. 29). In the parallel passage, 2 Chr. xvi. 4, the name is changed to Abel Maim, כָּלֶּל נַחַל = Abel on the waters. Here Sheba was overtaken and besieged by Joab (2 Sam. xx. 14, 15); and the city was saved by the exercise on the part of one of its inhabitants of that sagacity for which it was proverbial (18). In verses 14 and 15 it is simply Abel, and in 14 Abel is apparently distinguished from Beth-maachah. If the derivation of Gennesim be the correct one, the situation of Abel was probably in the Abel el-Helah, the marshy meadow country which drains into the Sen of Meron, whether at Abel (Robinson, iii. 372), or more to the south (Stanley, S. and P., p. 390, note). Eusebius and Jerome place it between Paneas and Damascus; but this has not been identified.

2. **A'HELMAYIM** (אֵיהָלִמְּיִם) אֵיהָלִמְּיִם = A'בֵלמַיִּם —Abelmaita), 2 Chr. xxvi. 4. ([AEL, 1.]

3. **A'HEL-MIZRAHIM** (אֵיהָל-מִצְרָיִם) אֵיהָל-מִצְרָיִם, according to the etymology of the text, the mourning of Egypt, πέντε Αἰγύπτου [Pentecos / Egyptos], this meaning, however, requires a different pointing, כָּלָל סי for כָּלָל סי; the name given by the Canaanites to the floor of Atad, at which Joseph, his brothers, and the Egyptians made their mourning for Jacob (Gen. i. 11). It was beyond (כָּלָל סי = on the east of) Jordan, though placed by Jerome at Beth-Hogla (now Ain-Hajra), near the river, on its west bank. [ΑΤΑΛ.]

4. **A'HEL-SHTTİM** (with the article כָּלָל סי) כָּלָל סי; [Bela; Alex. Βελστηττα; Comp. Βελστηττια: Belstion], the mound of the ancients, in the "plains" (כָּלָל סי) the deserts of Moab: on the low level of the Jordan valley, as contrasted with the cultivated "fields" on the upper level of the table-land. Here — their last resting-place before crossing the Jordan — Israel pitched their tent from Beth-Maachah unto Kadesh-barnea, i.e. till Shittim (Num. xxxviii. 40). The place is most frequently mentioned by its shorter name of Shittim. [SHTT.] In the days of Josephus it was still known as Abila, — the town besieged in palms, (ὅποιον τοις πάλαις εἶναι Ἀβίλα, δουκεφόρον δ' ἐστὶ τῷ χειρόν, Ant. iv. 8, § 11, 60) stadia from the river (v. i, § 1). The town and the palms have disappeared; but the acacia-graves, denoted by the name Sthitt, still remain, "marking with a line of verdure

* It is certain from 2 Sam. xx. 11, that they were different, and no doubt the fuller name signifies Abel near Beth-Machir and Hengstenberg. [B. ii. 319; Robinson, iii. 372]. See Ges. Heb. Gr. § 156, 5, a, in this mode of expressing local proximity. See Thomson's Land and Book, i. 327, for a description of Abel.

* The Biblical text knows nothing of any connection between Abelmairin and Beth-Maachah. Whether "behind the Jordan" denotes the east or the west side, depends on the position of the speaker, like our Trans-atlantic, whether used on one side of the water or the other. Against the supposition of Ritto and others, that Joseph's自如 escort, with the body of Jacob, travelled through the Great Desert, by the way of the Dead Sea and Moab, in going to Canaan, instead of the direct course through Philistia, see Thomson's Land and Book. ii. 385.

It was amongst these palms, according to Josephus, that Deuteronomy was delivered by Moses. See the passage above cited.
the upper terraces of the Jordan valley." (Stamly, S. and P. p. 298).

5. "A'bel-meh-o'lah (Mechemlah, "Αβέλμηλα, membra of the dance: [Αβέλμηλα, Alex. Βεθσελαθά, Abolamela], named with Beth-shean (Scythopolis) and Jokneam (1 K. 18. 12), and therefore in the northern part of the Jordan valley (Eus. ναὸς Αβελ). The route Deoboum host ibid from Gideon (Judg. vii. 22) to "the border (the "lip" or "brink") of Abel-meholah," and to Beth-shittah (the "house of the acacia"), both places being evidently down in the Jordan valley. Here Elisha was found at his plough by Elijah returning up the valley from Horeb (1 K. xix. 19-16). In Jerome's time the name had dwindled to "A'bel melah."

6. "A'bel-ker-'nim (א'בלי-קרניימ, [Εβελεχρηστιον, Alex. Abel επικεφαλον, Abel qui est vinctus consuli], in the A. V. rendered "the plain [wary]'Abel'] of the vineyards," a place eastward of Jordan, beyond Aroer; named as the point to which Jephthah's pursuit of the Ben-Ammen [sons of A.] extended (Judg. vii. 32). A κατά αποτελεσματικά 'Abel is mentioned by Enesiis at 6 (Deo-

7. "The great 'A'bel," [wary, or stone], in the field of Joshua the Bethsheimithe" (1 Sam. vi. 18). By comparison with 14 and 15, it would seem that J has been here exchanged for י, and that for ינש should be read ינש as stone. So the LXX. and the Chaldee Targum. Our trans-

8. "A'bel, i. e. breath, vigor, transitoriness, probably so called from the shortness of his life," the second son of Adam, murdered by his brother Cain (Gen. iv. 1-16). Jehovah showed respect for Abel's offering, but not for that of Cain, because, according to the Epistle to the Hebrews (xi. 4), Abel by faith offered a more excellent sacrifice than Cain. The expression "sin," i. e. a sin-offering, "at the door" (Gen. iv. 7), seems to imply that the need of sacrifices of blood to obtain forgiveness was already revealed. On account of Abel's faith, St. Augustine makes Abel the type of the new regenerate man; Cain that of the natural man (de Civ. Del. x. 1). St. Chrysostom observes that Abel offered the best of his flock — Cain that which was most readily procurable (Hom. in Gen. xviii. 5). Jesus Christ spoke of him as the first martyr (Matt. xxii. 35): so did the early church sub-

"Or, it may be from the mother's impression of the brevity and frailty of human life, which she had now begun to understand; and in that case the child could have been so named at his birth."

menger, Eulobel. Jul. i. 462, 832; Hottinger, Hist. Or. 24; Ezech & Gruber, Faeckley, s. c.; and the Kur-ssia V. The place of his murder and his grave are pointed out near Damascus (Voeoek, b. ii. 168): and the neighboring peasants tell a curious tradition respecting his burial (Stamly, S. and P. p. 415).

The Oriental Gnosticism of the Sabaeans made Abel an incarnate man, and Augustinian or Mar-

rionian sect of the Abalite in North Africa in the time of Augustine (de Heeres, 85), so called themselves from a tradition that Abel, though married, lived in continence. In order to avoid perpetuating original sin, they followed his example, but in order to keep up their sect, each married pair adopted a male and female child, who in their turn vowed to marry under the same conditions."

R. W. B.

A'BEZ (אבעז), in pass.Paused, be distinguished: [Alb. Alex. Αμαζ, Comp. 'Αμαζός, A'maz), a town in the possession of Issachar, named between Kishion and Keneath, in Josh. xix. 20, only. Gemusen mentions it as a possible derivation of the name, that the Chaldee for tin is נון: [but Fürst thinks it may be from בַּש בַּשׁ, and hence height]. Possibly, however, the word is a corruption of בַּש נון.

Thebes [which see], now Tabo, a town situated not far from Engannim and Sheminem, (both towns of Issachar), and which otherwise has entirely escaped mention in the list in Joshua."

"A' BI ['ב], A'BI'AH, or A'BIAH (א'ביה = נוןสถาבתו), whose father is Jehovah; 'A'bi'd, mother of king Hezekiah (2 K. vii. 2). The name is written Abiah (נשתנתו) in 2 Chr. xxix. 1. Her father's name was Zechariah, who was, perhaps, the Zechariah mentioned by Isaiah (viii. 2). R. W. B.

with reference to the death of Korah, as related in Num. xvi.; but according to Furst and Gesenius, father of gathering, i.e. the gatherer; compare ¶; Azaph, 1 Chr. vi. 39). He was the head of one of the families of the Korhites (a house of the Kohathites), but his precise genealogy is somewhat uncertain. In Ex. vi. 24, he appears at first sight to be represented as one of the sons of Korah, and as the brother of Assir and Elkanah. But in 1 Chr. vi. he appears as the son of Elkanah, the son of Assir, the son of Korah. The natural inference from this would be that in Ex. vi. 24 the expression "the sons of Korah" merely means the families into which the house of the Korhites was subdivided. But if so, the verse in Exodus must be a later insertion than the time of Moses, as in Moses' lifetime the great-grandson of Korah could not have been the head of a family. And it is remarkable that the verse is quite out of its place, and appears improperly to separate ver. 25 and ver. 23, which both relate to the house of Aaron. If, however, this inference is not correct, then the Eliashaph of 1 Chr. vi. is a different person from the Eliashaph of Ex. vi., namely, his great-nephew. But this does not seem probable. It appears from 1 Chr. ix. 19, that that branch of the descendants of Abiathar of which Shallum was chief were porters, "keepers of the gates of the tabernacle"; and from ver. 31 that Mattithiah, "the first-born of Shallum the Korhite, had the set office over the things that were made in the pews," apparently in the time of David. From Neh. xii. 25 we learn that Abiathar's family was not extinct in the days of Nehemiah; for the family of Meshullam (which is the same as Shallum), with Tamon and Akub, still filled the office of porters, "keeping the ward at the threshold of the gate." Other remarkable descendants of Abiashaph, according to the text of 1 Chr. vi. 33-37, were Sanball the prophet and Elkanah his father (1 Sam. i. 1), and Heman the singer; but Eliashaph seems to be improperly inserted in ver. 35. The possessions of those Kohathites who were not descended from Aaron, consisting of ten cities, lay in the tribe of Ephraim, the hill-tribe of Manasseh, and the tribe of Dan (Josh. xxii. 20-26; 1 Chr. vii. 61). The family of Elkanah the Kohathite resided in Mount Ephraim (1 Sam. i. 1).

ABIAHAR (עִבְיָהָר; 'Abi'ahar; Abi'ahar; but the version of Sept. Pagninus has Ebi'ahar, according to the Hebrew points. In Mark ii. 26, it is 'Abi'ahar. According to Simonis, the name means "a man with a space in his mouth, mouth wide open," but according to Furst and Gesenius, father of gathering, or abhorrence). Abiahar was that one of all the sons of Ahimelech the high-priest who escaped the slaughter inflicted upon his father's house by Saul, at the instigation of Doeg the Edomite (see title to Ps. liii., and the psalm itself), in revenge for his having inquired of the Lord for David, and given him the shew-bread to eat, and the sword of Goliath the Philistine, as is related in 1 Sam. xxii. 3, 9-16. We are told that when Doeg slew in Nob on that day fourscore and five persons that did wear a linen ephod, "one of the sons of Ahimelech the son of Abitub, named Abiahar, escaped and fled after David;" and it is

\[ \text{**ABIAHAR** (עִבְיָהָר; 'Abi'ahar; Abi'ahar; but the version of Sept. Pagninus has Ebi'ahar, according to the Hebrew points. In Mark ii. 26, it is 'Abi'ahar. According to Simonis, the name means "a man with a space in his mouth, mouth wide open," but according to Furst and Gesenius, father of gathering, or abhorrence). Abiahar was that one of all the sons of Ahimelech the high-priest who escaped the slaughter inflicted upon his father's house by Saul, at the instigation of Doeg the Edomite (see title to Ps. liii., and the psalm itself), in revenge for his having inquired of the Lord for David, and given him the shew-bread to eat, and the sword of Goliath the Philistine, as is related in 1 Sam. xxii. 3, 9-16. We are told that when Doeg slew in Nob on that day fourscore and five persons that did wear a linen ephod, "one of the sons of Ahimelech the son of Abitub, named Abiahar, escaped and fled after David;" and it is added in xxiii. 6, that when he did so "he came down with an ephod in his hand," and was thus enabled to inquire of the Lord for David (1 Sam. xxiii. 3, xxx. 7; 2 Sam. ii. i, v. 19, etc.). The fact of his having escaped the punishment of the death of all Abiahar's kindred, coupled with his gratitude to his father Ahimelech for his kindness to him, made him a firm and steadfast friend to Abiahar all his life. Abiahar on his part was firmly attached to David. He adhered to him in his wanderings while pursued by Saul; he was with him while he reigned in Hebron (2 Sam. ii. i-2), the city of the house of Aosh (Josh. xxi. 10-13); he carried the ark before him when David brought it up to Jerusalem (1 Chr. xv. 11; 1 K. i. 26); he continued faithful to him in Absalom's rebellion (2 Sam. xv. 24, 29, 35, 36, xvii. 15-17, xix. 11); and was afflicted in all wherein David was afflicted." He was also one of David's chief counsellors (1 Chr. xxvii. 34). When, however, Adonijah set himself up for David's successor on the throne in opposition to Solomon, Abiahar, either on account of his age, or in rivalry with Absalom, or under some influence which cannot now be discovered, sided with him, and was one of his chief partisans, while Zadok was on Solomon's side. For this Abiahar was banished to his native village, Anathoth, in the tribe of Benjamin (Josh. xxi. 18), and narrowly escaped with his life, which was spared by Solomon only on the strength of his long and faithful service to David his father. He was no longer permitted to perform the functions or enjoy the prerogatives of the high-priesthood. For we are distinctly told that "Solomon thrust out Abiahar from being priest to the Lord;" and that "Zadok the priest did the king put in the room of Abiahar" (1 K. ii. 27, 35). So that it is difficult to understand the assertion in 1 K. iv. 4, that in Solomon's reign "Zadok and Abiahar were the priests;" and still more difficult in connection with ver. 2, which tells us that "Azariah the son of Zadok," was "the priest;" a declaration confirmed by 1 Chr. i. 10. It is probable that Abiahar did not long survive David. He is not mentioned again, and he must have been far advanced in years at Solomon's accession to the throne.

There are one or two other difficulties connected with Abiahar, to which a brief reference must be made before we conclude this article. (1.) In 2 Sam. xxvii. 17, and in the duplicate passage 1 Chr. xviii. 16, and in 1 Chr. xxiv. 3, 6, 31, we have Ahimelech substituted for Abiathar, and Abimelech the son of Abiathar, instead of Abiathar the son of Ahimelech. Whereas in 2 Sam. xxvii. 25, and in every other passage in the O. T., we are uniformly told that it was Abiathar who was priest with Zadok in David's reign, and that he was the son of Ahimelech, and that Abimelech was the son of Abitub. The difficulty is increased by finding Abiathar speaking of as the high-priest in whose time David ate the shew-bread, in Mark ii. 26. (See Alford, ad loc.). However, the evidence in favor of David's friend being Abiathar the son of Ahimelech preponderates so strongly, and the impossibility of any rational reconciliation is so clear, that one can only suppose, with Pusey of Gaza, that the error was a clerical one originally, and was propagated in August. (2.) The mention of Abiahar by our Lord, in Mark ii. 26, might perhaps be accounted for, if Abiathar was the person who
**Abiathar**

persuaded his father to allow David to have the bread, and if, as is probable, the loaves were Abiathar's (Lev. xxiv. 9), and given by him with his own hand to David. It may also be remarked that our Lord doubtless spoke of Abiathar as "the priest," the designation applied to Abimelech throughout 1 Sam. xxi., and equally applicable to Abiathar. The expression ἱερεύς is the Greek translation of our Lord's words.

(2.) Another difficulty concerning Abiathar is to determine his position relatively to Zadok, and to account for the double high-priesthood, and for the advancement of the line of Heli to that of Eleazar. A theory has been invented that Abiathar was David's, and Zadok Saul's high-priest, but it seems to rest on no solid ground. The facts of the case are these:—Abimelech, the son of Abihit, the son of Eli, was high-priest in the reign of Saul. On his death his son Abiathar became high-priest. The first mention of Zadok is in 1 Chr. xii. 28, where he is described as "a young man mighty of valor," and is said to have joined David while he was in Hebron, in company with Jehoiada, "the leader of the Aaronites." From this time we read, both in the books of Samuel and Chronicles, of "Zadok and Abiathar the priests," Zadok being always named first. And yet we are told that Solomon on his accession put Zadok in the room of Abiathar. Perhaps the true state of the case was, that Abiathar was the first, and Zadok the second priest; but that from the superior strength of the house of Eleazar (of which Zadok was head), which enabled it to furnish 16 out of the 24 courses (1 Chr. xxiv.), Zadok acquired considerable influence with David; and that this, added to his being the heir of the elder line, and perhaps also to some of the passages being written after the line of Zadok were established in the high-priesthood, led to the precedence given him over Abiathar. We have already suggested the possibility of jealousy of Zadok being one of the motives which inclined Abiathar to join Adonijah's faction. It is most remarkable how, first, Saul's cruel slaughter of the priests at Nob, and then the political error of the wise Abiathar, led to the fulfillment of God's denunciation against the house of Eli, as the writer of 1 K. ii. 27 leads us to observe when he says that "Solomon thrust out Abiathar from being priest unto the Lord, that he might fulfill the word of the Lord which He spake concerning the house of Eli in Shiloh." See also Joseph. Ant. viii. 1, §§ 3, 4.

A. C. H.

* Some adhere to the text, without resorting to the supposition of a clerical error. It is deemed possible that Abimelech and Abiathar were hereditary names in the family, and hence, that the father and the son could have borne these names respectively. It would thus be accounted for that Abiathar is called the son of Abimelech in 1 Sam. xxii. 30, and that Abimelech is called the son of Abiathar in 2 Sam. viii. 17. The same person of the tribe consequently could be meant in Mark ii. 26, whether the one name was applied to him or the other; and the reason why the father is mentioned by his name Abiathar, and not that of Abimelech may be that the former had become, historically, more familiar in consequence of the subsequent friendship between Abiathar, the son, and David. Another explanation is, that Abiathar was for some unknown reason acting as the father's vice at the time of this transaction with David, and that the citation in Mark follows a tradition of that fact, not transmitted in the O. T. history. We have other instances of a similar recognition of events or opinions not recorded in the O. T., to which the S. T. writers refer apparently well known among the Jews; such as e. g. Abraham's first call in Lc of the Chaldees (Acts vii. 3, compared with Gen. xii. 1); the tomb of the patriarchs at Shechem, (Acts vii. 16); the giving of the law by the agency of angels (Gal. iii. 19, Heb. ii. 2), and others. Lange's note on Mark ii. 26 (Biblecirk, ii. 28), deserves to be read. For some very just and thoughtful remarks on the proper mode of dealing with such apparent contradictions of Scripture, see Commentary on Mark (p. 59), by Dr. J. A. Alexander.

**Abib.** [Months.]

**Abi'dah and Abida** (אּבֶּדֹא [father of knowledge, i. e. wise]: אֹבֶּדֹא, [Abi'dah; Alex. Abi'd; R. Abi'd]; Abidah; [as Zadok], a son of Midian [and grandson of Abraham through his wife or concubine Ketura]; Gen. xxv. 1, 1 Chr. i. 33).

Abi'dan (אֵבִדֶן [father of the judge, i. e. wise]: אֶבַדֶן, [Alex. twice Abi'dan]: Abidan), chief of the tribe of Benjamin at the time of the Exodus (Num. i. 11, ii. 22, vii. 60, 65, x. 24).

**Abiel** as a Christian name in English commonly pronounced Abi'del (אֵבְיֵל [father of strength, i. e. strong]: אָבִּיֵל; Abiel). 1. The father of Kish, and consequently grandfather of Saul (1 Sam. ix. 1), as well as of Abner, Saul's commander-in-chief (1 Sam. xiv. 51.) In the genealogy in 1 Chr. vii. 33, iii. 39, Ner is made the father of Kish, and the name of Abiel is omitted, but the correct genealogy according to Samuel is:

<table>
<thead>
<tr>
<th>Kish</th>
<th>Ner</th>
<th>Saul</th>
<th>Abner</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. One of David's 30 "mighty men" (1 Chr. xi. 32); called in 2 Sam. xxii. 31, Abi-albon, a name which has the same meaning R. W. B.

Abi'zer (אַבִּיְזֶר, father of help: אַבִּיְזֶר, [Alex. in Josh., *Abi zer (?) dabus Abi'zer].) 1. Eldest son of Gilead, and descendant of Machir and Manasseh, and apparently at one time the leading family of the tribe (Josh. vii. 5; Num. xxvi. 30, where the name is given in the contracted form of אַבִּיְזֶר, Jezer). In the genealogies of Chronicles, Abi'zer is, in the present state of the text, said to have sprung from the sister of Gilead (1 Chr. vii. 18). Originally, therefore, the family was with the rest of the house of Gilead on the east of Jordan; but when first met with in the history, some part at least of it had crossed the Jordan and established itself at Ophrah, a place which, though not yet identified, must have been on the hills which overlook from the south the wide plain of Esdraelon, the field of so many of the battles of Palestine (Stanley, pp. 246-7; Judg. vi. 34). Here, when the fortunes of his family

* A. V. ed. 1611, and in other early editions, read Abibe in both passages. D.
were at the lowest — my 'thousand' is the poor one in Manasseh" (vi. 15) — was born the great judge Gideon, destined to raise his own house to almost royal dignity (Stanley, p. 229) and to achieve for his country one of the most signal distinctions recorded in their whole history. [C A N O N ; O v i n e . ]

The name occurs, in addition to the passages above quoted, in Judg. vi. 34, viii. 2.

2. One of David's "mighty men" (2 Sam. xxiii. 27; 1 Chr. xi. 28, xxvii. 12).

ABIZERITE [h d a i r (the father of help); pi r y p a v E a s o t i j in Judg. vi.; d i t t E a s o t i j in Judg. viii.; A x l a r a p A b i e z r i t e. p. i o a y (p. 356. 22; p. 357. 2).] [Josiah, the father of Gideon, is so termed], a descendant of Abiezer, or Jezre, the son of Gilad (Judg. vi. 11, 24, viii. 32), and thence also called JIZEEXTZ (Num. xxvi. 30). The Peshito-Syriac and Targum both render the first part of the word "Abi" as an appellative, "father of," as in the LXX. and Vulgate.

W. A. W.

3. Abitezrites (A. V.) in Judg. vi. 24, and viii. 32, stands for the collective "Abiezrite," which does not occur as plural in the Hebrew.

H.

ABIGAIL [3 syl., Heb. Abigail], [y i e n o j , or ye e i t s (father of exaltation, or, whose father rejoiced); A b i g a i l, Abijah]. 1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slain by Nabal, Abigail took the blame upon herself, supplied David and his followers with provisions, and succeeded in appeasing his anger. Ten days after this Nabal died, and David sent for Abigail and fetched her to him (1 Sam. xxv. 4, seq.). By her he had a son, called Chileab in 2 Sam. iii. 3; but David, in 1 Chr. iii. 1. For Daniel's T

nus proposes to read x i e n o j , suggested to him by the LXX. Δ ἅλονα (Then. Lexy. Hands, ed ber.).

2. A sister of David, married to Jether the Ishmaelite, and mother, by him, of Amasa (1 Chr. ii. 17). In 2 Sam. xvii. 27, she is described as the daughter of Nahash, sister to Zeruiah, Joel's mother, and as marrying Abra (another form of Jether) an Ishmaelite.

The statement in Samuel that the mother of Amasa was an Ishmaelite is doubtless a transcription of Jether's error. There could be no reason for recording this circumstance; but the circumstance of David's sister marrying a heathen Ishmaelite deserved mention (Thenius, Lexy. Hands, S. i. c.).

K. W. B.

ABJAH [h i a (father of might, i. e. mighty); A b i j a h, Abijah]. 1. Father of Zuriel, chief of the Levitical family of Merari, a contemporary of Moses (Num. iii. 35),

2. Wife of Abishur (1 Chr. ii. 29).

3. [Abijah: Hebrew Abijah; Comp. Abijah.]

Son of Hur, of the tribe of Judah (1 Chr. v. 14).

4. Wife of Rekoham (2 Chr. xi. 18). She is called the daughter, i. e., a descendant, of Eliah, the elder brother of David.

5. [Amathath; Comp. Abijah.] Father of Abijah and uncle of Mephibosheth (1 Sam. xv. 15, ix. 29).

a "Mother" must be an indelicacy here for "father of Amas." The correction Familia for Familis is suggested in the margin in later editions of the A. V.

b In such combinations, says First (Handb. i. 219), SNN, he himself, refers to God, as expressive of the utmost reverence, like his among the Persians and here, socrに対し, among the Greeks. II.

The names of No. 2 and 4 are written in some MSS. Ω/Ω (Abikola, [Abd. Alex. Abikola Comp. Abikola], 1 Chr. ii. 29; Abijah, Alex. Abikola, Comp. Abikola], 2 Chr. iii. 18), which Gesenius conjectures to be a corruption of Ω, but which Simonis derives from a root ΩΩ, and interprets "father of light, or splendor." R. W. B.

ABIHU (h h h , he is found); b Abiho (Comp. in Num. iii. 1 and 1 Chr. iv. Abihui) Abihui, the second son (Num. iii. 2) of Aaron by Elisheba (Ex. vi. 23), who with his father and his elder brother Nadab and 70 elders of Israel accompanied Moses to the summit of Sinai (Ex. xxiv. 1). Being together with Nadab guilty of offering strange fire (Lev. x. 1) to the Lord, i. e. not the holy fire which burnt continually upon the altar of burnt-offering (Lev. vi. 9, 12); they were both consumed by fire from heaven, and Aaron and his surviving sons were forbidden to enter for them. [Occurs also Ex. xxiv. 9, xxviii. 1: Num. iii. 4, xxvi. 60, 61; 1 Chr. vi. 3, xxiv. 1, 2.]

R. W. B.

ABIJAH [h y a h (whose father is Jehovah); or, is renown); Abioth: Abiah], son of Beja and grandson of Bejaiah (1 Chr. viii. 2).

ABIJAM or ABIJAM. 1. [y a h (will of Jehovah); Abia, Abi'o, LXX. Abias, Joseph: Abian, Abiah], the son and successor of Rehoboam on the throne of Judah (1 K. xiv. 31; 2 Chr. xii. 16). He is called Abijah in Chronicles. Abijah in Kings; the latter name being probably an error in the MSS., since the LXX. leave nothing corresponding to it, and their form, "Abioth," seems taken from Abijah, which occurs 2 Chr. xii. 20, 21. Indeed Gesenius says that some MSS. read Abijah in 1 K. xiv. 31. The supposition, therefore, of Lightfoot (Horae. O. T. p. 206, Fittam's edition), that the writer in Kings, who takes a much worse view of Abijah's character than we find in Chronicles, altered the last syllable to avoid introducing the holy Jah into the name of a bad man, is unnecessary. But it is not fanciful or absurd, for chances of the kind were not unusual: for example, after the Samaritan schism, the Jews altered the name of Shechem into Sychar (chekwn), as we have it in John iv. 5; and Hosea (iv. 15) changes Bethel, house of God, into Bethaven, house of naught. (See Stanley, S. F. p. 222.)

From the first book of Kings we learn that Abijah endeavored to recover the kingdom of the Ten Tribes, and made war on Jeroboam. No details are given, but we are also informed that he walked in all the sins of Rehoboam (idolatry and its attendant immoralities, 1 K. xiv. 24, 24), and that his heart was not perfect before God, as the heart of David his father. 7 In the second book of Chronicles his war against Jeroboam is more minutely described, and he makes a speech to the men of Israel, reproaching them for breaking their allegiance to the house of David, for worshipping the images of Jeroboam.}
golden calves, and substituting unauthorized priests for the sons of Aaron and the Levites. He was successful in battle against Jeroboam, and took the cities of Bethel, Jeshanah, and Ephraim, with their dependent villages. It is also said that his army consisted of 400,000 men, and Jeroboam's of 800,000, of whom 500,000 fell in the action: but Kenicott (The Hebrew Text of the Old Testament Considered, p. 532) shows that our MSS. are frequently incorrect as to numbers, and gives reasons for reducing these to 40,000, 80,000, and 50,000, as we actually find in the Vulgate printed at Venice in 1483, and in the old Latin version of Josephus; while there is perhaps some reason to think that the smaller numbers were in his original Greek text also. Nothing is said by the writer in Chronicles of the sins of Abijah, but we are told that after his victory he " waxed mighty, and married fourteen wives," whence we may well infer that he was elated with prosperity, and like his grandfather Solomon, fell, during the last two years of his life, into wickedness, as described in Kings. Both records inform us that he reigned three years. His mother was called either Maachah or Michiahah, which are mere variations of the same name, and in some places (1 K. xv. 2; 2 Chr. xi. 23) she is said to be the daughter of Absalom or Abishalom (again the same name); in one (2 Chr. xiii. 2) of Uriel of Gibeah. But it is so common for the word מַעֲשִׂית, daughter, to be used in the sense of granddaughter or descendant, that we need not hesitate to assume that Uriel married Absalom's daughter, and that thus Maachah was daughter of Uriel and granddaughter of Absalom. Abijah therefore was descended from David, both on his father's and mother's side. According to Ewald's chronology the date of Abijah's accession was B.C. 908; Clinton places it in B.C. 909. The 18th year of Jeroboam coincides with the 1st and 24th of Abijah.

2. The second son of Samuel, called Abiah in our version ("عبد الله, LX.). [Abia, Abiah, No. 3.]

3. The son of Jeroboam I. king of Israel, in whom alone, of all the house of Jeroboam, was found "some good thing toward the Lord God of Israel," and who was therefore the only one of his family that was spared to see his nation in the grave in peace. He died in his childhood, just after Jeroboam's wife had been sent in disguise to seek help for him in his sickness from the prophet Abijah, who gave her the above answer. (1 K. xiv.)

4. A descendant of Eleazar, who gave his name to the eighth of the twenty-four courses into which the priests were divided by David (1 Chr. xxiv. 10; 2 Chr. viii. 14). To the course of Abijah or Abia, belonged Zacharias the father of John the Baptist (Luke i. 5).

5. A contemporary of Nehemiah (Neh. v. 7). [Abii, Abia, No. 5.]

6. A priest who returned with Zerubbabel from Babylon (Neh. xii. 4, 17).

A. ABIJAM. [Abijah, No. 1.]

ABITLA. [Abilene.]

ABILENE (אֲבִילָן, Luke iii. 1), a tetrapy of which Abila was the capital. This Abila must not be confounded with Abila in Peræa, and other Syriæ. It was the one so frequently situated on the eastern slope of Antilibanus, in a district fertilized by the river Barada. It is distinctly associated with Lebanon by Josephus (Ant. xvi. 6, § 19, xiv. 5, § 1, xx. 7, § 1; B. J. ii. 11, § 5). Its name probably arose from the green luxuriance of its situation, "Abel" perhaps denoting "a grassy meadow." [See p. 4, a.] The name thus derived is quite sufficient to account for the traditions of the death of Abel, which are associated with the spot, and which are beclouded by the tomb called Nêbi Hîdol, on a height above the ruins of the city. The position of the city is very clearly designated by the itineraries as 18 miles from Damascus, and 35 or 32 miles from Heliodorus or Basileus (His. Ant. and Tit., Pent.).

It is impossible to fix the limits of the Abilene which is mentioned by St. Luke as the tetrarchy of Lysanias. [LYSANIAS.] Like other districts of the East, it doubtless underwent many changes both of masters and of extent, before it was finally absorbed in the province of Syria. Josephus associates this neighborhood with the name of Lysanias both before and after the time referred to by the evangelist. For the latter notice see the passages just cited. We there find "Abila of Lysanias;" and "the tetrarchy of Lysanias," distinctly mentioned in the reigns of Claudius and Caligula. We find also the phrase ᾳβιλὴν Λυσανίου in Ptolemy (v. 15, § 22). The natural conclusion appears to be that this was the Lysanias of St. Luke. It is true that a chiasm bearing the same name is mentioned by Josephus in the time of Antony and Cleopatra, as ruling in the same neighborhood (Ant. xiv. 3, §§ 3, 4, § 1; B. J. i. 13, § 1; and Dio Cass. xiii. 32); and from the close connection of this man's father with Lebanon and Damascus (Ant. xiii. 16, §§ 3, 4, § 1; B. J. i. 9, § 2) it is probable that Abilene was part of his territory, and that the Lysanias of St. Luke was the son or grandson of the former. Even if we assume (as many writers too readily assume) that the tetrapy mentioned in the time of Claudius and Caligula is to be identified, not with the Lysanias of St. Luke but with the earlier Lysanias (never called tetrach), and never positively connected with Abila) in the times of Antony and Cleopatra, as ruling in the same neighborhood (Ant. xiv. 3, §§ 3, 4, § 1; B. J. i. 13, § 1; and Dio Cass. xiii. 32); and from the close connection of this man's father with Lebanon and Damascus (Ant. xiii. 16, §§ 3, 4, § 1; B. J. i. 9, § 2) it is probable that Abilene was part of his territory, and that the Lysanias of St. Luke was the son or grandson of the former. Even if we assume (as many writers too readily assume) that the tetrapy mentioned in the time of Claudius and Caligula is to be identified, not with the Lysanias of St. Luke, but with the earlier Lysanias (never called tetrach), and never positively connected with Abila (the times of Antony and Cleopatra, there is no difficulty in believing that a prince bearing this name ruled over a tetrarchy having Abila for its capital, in the 15th year of Tiberius. (See Wieseler, Chronologische Synopse der vier Evangelien, pp. 174-185.)

The site of the chief city of Abilene has been universally doubtfully identified where the plain of Damascus lies, and its remains have been described of late years by many travellers. It stood in a remarkable gorge called the Sök Wady Barada, where the river breaks down through the mountain towards the plain of Damascus. Among the remains the inscriptions are most to our purpose. One containing the words Λυσανίου Τετράπυρου is cited by Poole, but has not been seen by any subsequent traveller. Two Latin inscriptions on the face of a rock above a fragment of Roman road (first noticed in the Quarterly Review for 1832, No. 52) were first published by Letronne (Journal des Savans, 1827), and afterwards by Orelli (Inscr. Lat. 4997, 4988). One relates to some repairs of the road at the expense of the Abilene; the other associates the 16th Legion with the place. (See Hogg in the Trans. of the Royal Geog. Soc., for 1851; Porter, in the Journal of Sacred Literature for July, 1854, and especially his Damascus, pp. 473-487; and Robinson, Letter Bib. Res. pp. 478-484.)

J. S. H.
should be said to have died by a woman, he bid his arm-bearer slay him. Thus God avenged the murder of his brethren, and fulfilled the curse of Jotham.

4. [Aaron:] F. A. A. 

5. Ps. xxiii. title. [Abimelech 2. A.]

6. ABINADAB [2323292529 [a father noble or princely]; 'Abi-adab; [Comp. often 'Abiraad:] Abinadab]. 1. A Levite, a native of Kirjathjearim, in whose house the ark remained 20 years (1 Sam. vii. 1; 2 (2 Sam. vi. 3, 4) 1 Chr. xii. 7). 2. Second son of Jesse, who followed Saul to his war against the Philistines (1 Sam. xvi. 8, xvii. 13; [1 Chr. ii. 13]). 3. A son of Saul, who was slain with his brothers at the fatal battle on Mount Gilboa (1 Sam. xxxii. 2; [1 Chr. viii. 33, ix. 30, x. 2]). 4. Father of one of the 12 chief officers of Solomon (1 K. iv. 14).

7. ABINADAB [2323292529 [a father noble or princely]; 'Abiraad; [father, Argob], [Abi-abad]; Abner]. This form of the name Abner is given in the margin of 1 Sam. xvii. 50. It corresponds with the Hebrew. W. A. W.

8. ABINAAM [Ueh., Abinoam] (2323292529 [a father gracious]; 'Abina'ad; [Ab., Comp. sometimes 'Abirad:] Abinom). The father of Barak (Judg. iv. 6, 12; v. 1, 12).

9. ABIRAM (2323292529 [father exalted]; 'Abi- 

A. 1. A Benenite, son of Libiah, who with Jotham and On, men of the same tribe, and Korah a Levite, organized a conspiracy against Moses and Aaron (Num. xvi.). [For details, see Korah.]

10. [Abirat; Ab.] A. 1. The wife of Abraham. 2. The wife of Balaam (Deut. xii. 11, 12). 3. The wife of Deborah, the Belithee, who died when his father hid the foundations of Jericho (1 K. xvi. 34), and thus accomplished the first part of the curse of Joshua (Josh. vi. 26). W. K. B.

11. ABIRUTH (2323292529 [Abiruth]: Abiron). ABIRUTH (Exek. xlv. 18). W. A. W.

12. ABISEI (Abi'te). ABISEI, the son of Phinehas (2 Esdr. ii. 2). W. A. W.

13. Fruit. This view is now regarded by the best scholars as erroneous. In early English, as in Anglo-Saxon, it was in common use as an intensifying prefix to verbs and verbal nouns, somewhat like be in modern English, but stronger. Thus,

14. "The wicked man's wife; whenever he (2) break."

Wycliffe, Ps. civ. 41.

"What I did wickedly neke he to brake."

Chaucer. Cant. Tales, 558.

We have it in Shakespeare's 'to pinch the unclean knight. (Shylock, iv. 1, 2); and perhaps the best example in Milton's "ill refined" (Comus, 390). "All" is often used to strengthen the expression, but is not essential. See Bocher's Glossary, art. All, and Taylor's note: the Glossary to Foshall and Madden's ed. of Wycliffe's Bible; Eastwood and Wright's Bible Word-Book, pp. 21, 22; and especially Corson's

ABIMELECH [Hebrew Abimelech]

(2323292529; father of the king, or father-king; 'Abi-melek; Abimelech), the name of several Philistine kings. It is supposed by many to have been a common title of their kings, like that of Pharaoh among the Egyptians, and that of Caesar and Augustus among the Romans. The name Father of the King, or Father King, corresponds to Panidek (Father King), the title of the Persian kings, and Atith (Father, or paternity), the title of the Khans of Basharia (Gesen. Thes.). An argument to the same effect is drawn from the title of Ps. xxxiv. in which the name of Abimelech is given to the king, who is called Abish in 1 Sam. xxxi. 11; but perhaps we ought not to attach too much historical value to the inscription of the Psalm.

1. A Philistine, king of Gerar (Gen. xx., xxvi.), who, exercising the right claimed by Eastern princes, of collecting all the beautiful women of their dominions into their harems (Gen. xii. 15; Esth. ii. 3), sent for and took Sarah. A similar account is given of Abraham's conduct on this occasion, to that of his behavior towards Pharaoh [Abraham].

2. Another king of Gerar in the time of Isaac, of whom a similar narrative is recorded in relation to Kebekah (Gen. xxxi. 1, seq.).

3. Son of the judge Gilboa by his Shechemite concubine (Judg. viii. 31). After his father's death he murdered all his brethren, 70 in number, with the exception of Jotham, the youngest, who concealed himself; and he then persuaded the Shechemites, through the influence of his mother's brethren, to elect him king. It is evident from this narrative that Shechem now became an independent state, and threw off the yoke of the conquering Canaanites (I. Makketh, Gesch. ii. 444). When Jotham heard that Abimelech was made king, he addressed to the Shechemites his fable of the trees choosing a king (Judg. ix. 1, seq.; cf. Joseph. Ant. v. 7, § 2), which may be compared with the well-known fable of Menenius Agrippa (Livy ii. 22). After he had reigned two years, the citizens of Shechem rebelled. He was absent at the time, but he returned and quelled the insurrection. Shortly after he stormed and took Thebez, but was struck on the head by a woman with the fragment of a mill-stone (comp. 2 Sam. xi. 21); and lest he

*The expression used in relation to this in A. V. (v. 7, 11) in the Hebrew Bible is "all to brake his will," i.e. "brake completely," or "all to pieces." In many later citations "brake" has been changed to "break," giving the false meaning "and all this in order to break." "All to" has been explained and written by some as a compounded adverb, "all-to-"... “al other together" (see Robinson in Eld. Secta, vi. 69),
ABISHAG (אֶבִישָׁג [father i. e. author of error, mischief, and hence said of man or woman] ׳Aḇīṣārāy: Abishai), a beautiful Shunammite, taken into David's harem to comfort him in his extreme old age (1 K. i. 1-4). After David's death Adonijah induced Bathsheba, the queen-mother, to ask Solomon to give him Abishag in marriage; but this imprudent petition cost Adoni- 

jah his life (1 K. ii. 13, seq.). [AABONAH.]

ABISHAI b [3 syll. (אֶבִישָׁי [and אַבִישָׁי, father of a gift, Gen.; or Father, i. e. God, who cried, 1 Pet. iv. 13]: ʾAḇīṣārāy: [also ʾAḇīṣād, ʾAbīṣa, etc.] and ʾAḇīṣārāy: Abishai), the eldest of the three sons of Zeruiah, David's sister, and brother to Joab and Asahel (1 Chr. ii. 16). It may be owing to his seniority of birth that Abishai, first of the three brothers, appears as the devoted follower of David. Long before Joab appears on the stage Abishai had attached himself to the fortunes of David. He was his companion in the desperate night expedition to the camp of Saul and would at once have avenged and terminated his uncle's quarrel by stabbing the sleeping king with his own spear. But David in- 

dignantly restrained him, and the adventurous war- 

riors left the camp as stealthily as they had come, carrying with them Saul's spear and the cruse of water which stood at his head (1 Sam. xxvi. 6-9). During David's outlaw life among the Philistines, Abishai was probably by his side, though nothing more is heard of him till he appears with Joab and Asahel in hot pursuit of Abner, who was beaten in the bloody fight by the hand of Gibeon. Asahel fell by Abner's hand; at sunset the survivors re- 

turned, buried his brother by night in the sepul- 

chre of their father at Bethlehem, and with revenge in their hearts marched on to Hebron by break of day (2 Sam. ii. 18, 24, 32). In the prosecution of their vengeance, though Joab's hand struck the deadly-blow, Abishai was associated with him in the treachery, and "Joab and Abishai killed Ab- 

ner" (2 Sam. iii. 30, 31). In the war against Hanun, undertaken by David as a punishment for the insult to his messengers, Abishai, as second in command, was opposed to the army of the Ammonites before the gates of Rabbah, and drove them headlong before him into the city, while Joab defeated the Syrians who attempted to raise the siege (2 Sam. x. 10, 14; 1 Chr. xix. 11, 15). The defeat of the Enomites in the valley of salt (1 Chr. xviii. 12), which brought them to a state of vassalage, was due to Abishai, acting perhaps under the immediate orders of the king (see 2 Sam. 

viii. 13), or of Joab (Ps. cx. title). On the out- 

break of Absalom's rebellion and the consequent flight of David, Abishai remained true to the king; and the old warrior showed a gleam of his ancient spirit, as fierce and relentless as in the camp of Saul, when he offered to avenge the taints of Shimel, and urged his subsequent execution (2 Sam. xvi. 9; xix. 21). — In the battle in the wood of Ephraim Abishai commanded a third part of the army (2 Sam. xvii. 2, 9, 12), and in the absence of Amasa was summoned to assemble the troops in Jerusalem and pursue after the rebel Sheba, Joab, being apparently in disgrace for the slaughter of Absalom (2 Sam. xx. 6, 10). — The last act of serv- 

ice which is recorded of Abishai is his timely rescue of David from the hands of a gigantic Philis- 

tine, Ishbi-benob (2 Sam. xxi. 17). His personal prowess on this, as on another occasion, when he 

sought single-handed against three hundred, won for him a place as captain of the second three of David's mighty men (2 Sam. xxiii. 13; 1 Chr. xi. 20). But in all probability this act of daring was achieved while he was the companion of David's wanderings as an outlaw among the Philistines. Of the end of his chequered life we have no record.

ABISHAI (אֶבִישָׁי [father of light?]. ʾAḇīṣārovāy: Abi- 

siova], ʾAḇēšāvoāy: Abishai). According to Simonis, patris salus: 1. q. Σωσίσταρος, and Σώσισταρος. According to First, father or lord of happiness. Pater solutus, iucundus. 1. Son of Delaught, of the tribe of Judah (1 K. viii. 4). 2. Son of Phinehas, the son of Eleazar, and the father of Buki, in the genealogy of the high- 

priests (1 Chr. vi. 4, 5, 50, 51; Ezr. vii. 4, 5). According to Josephus (Ant. viii. 1, § 3) he executed the office of high-priest after his father Phine- 

has, and was succeeded by Eli; his descendants, till Zadok, falling into the rank of private persons (Σωσίσταρος). His name is corrupted into Ἰαίρους. Nothing is known of him. A. C. H. 

ABISHUR (אֶבִישָׁע [father of the will or uprightness]. ʾAḇēšōwāy: Abisai), son of Shammuel (1 Chr. ii. 28).

ABITSUM (אֶבֱיָתָם [Abishai: Abi- 

tumu]; ʾAbiṣṭām: Abitsam). ʾAḇiṣṭām: Abishai, the son of Phine- 

has (1 Esdr. viii. 2). Called also Ṣibari. W. A. W.

ABITAL (אֶבַיָל [whose father is dew or protection]. ʾAḇīṭālāy: Abidah), one of David's wives (2 Sam. iii. 4; 1 Chr. iii. 3).

ABITUB (אֶבַיָע [father of goodness]). ʾAḇĪṭū: [Alex. ʾAbīṭūb; Abib], son of Shaba- rain by Husham (1 Chr. viii. 11).

ABIU (אֶביוו [Abiah]). Descendant of Zorobabel, in the genealogy of Jesus Christ (Matt. i. 13). Lord A. Hervey identifies him with Ho- 

dale (1 Chr. iii. 24) and Juda (Luke iii. 26), and supposes him to have been the grandson of Zerubabel through his daughter Sheizonith.

W. A. W.

ABLUITION. [PURIFICATIONS.]

ABNER (אֶבָנֶר, once אֶבָנֶר, father of light]. ʾAḇēnāvāy: Abenyav; [Alex. often ʾAḇēnāv or ʾAḇēnāv]: Abner). 1. Son of Ner, who was the brother of Kish (1 Chr. ix. 36) the father of Saul. Abner therefore, was Saul's first cousin, and was made by 

him commander-in-chief of his army (1 Sam. xiv. 51). He was the person who conducted David into 

Saul's presence after the death of Goliath (xvii. 57); and afterwards accompanied his master when he...
sought David's life at Haiah (xxvi. 3-14). From this time we hear no more of him till after the death of Saul, when he rises into importance as the mainstay of his family. It would seem that, immediately after the disastrous battle of Mount Gilboa, David was proclaimed king of Judah in Hebron, the old capital of that tribe, but that the rest of the country was altogether in the hands of the Philistines, and that five years passed before any native prince ventured to oppose his claims to their power. During that time the Israelites were gradually recovering their territory, and at length Abner proclaimed the weak and unfortunate Ishboseth, Saul's son, as king of Israel in Mahanaim, beyond Jordan—at first no doubt as a place of security against the Philistines, though all serious apprehension of danger from them must have soon passed away—and Ishboseth was generally recognized except by Judah. This view of the order of events is necessary to reconcile 2 Sam. ii. 10, where Ishboseth is said to have reigned over Israel for two years, with ver. 11, in which we read that David was at Hebron for seven years and six months. It is confirmed by vers. 5, 6, 7, in which David's message of thanks to the men of Jabesh-gilead for burying Saul and his sons implies that no prince of Saul's house had as yet claimed the throne, but that David hoped that his title would be soon acknowledged by all Israel; while the exhortation "to be valiant" probably refers to the struggle with the Philistines, who placed the only apparent impediment in the way of his recognition. War soon broke out between the two rival kings, and a "very sore battle" was fought at Gilboa between the men of Israel under Abner, and the men of Judah under Joab, son of Zeruiah, David's sister (1 Chr. ii. 16). When the army of Ishboseth was defeated, Joab's youngest brother Asahel, who is said to have been "as light of foot as a wild roe," pursued Abner, and in spite of warning refused to leave him, so that Abner in self-defence was forced to kill him. After this the war continued, success inclining more and more to the side of David, till at last the imprudence of Ishboseth deprived him of the counsel and generalship of the hero, who was in truth the only support of his tottering throne. Abner had married Rizah, Saul's concubine, and this, according to the views of Oriental courts, might be so interpreted as to imply a design upon the throne. Thus we read of a certain Armaeus, who, while left viceroy of Egypt in the absence of the king, his brother, "used violence to the queen and concubines, and put on the diadem, and set up to oppose his brother" (Manetho, quoted by Joseph. c. Apion, i. 15). Cf. also 2 Sam. vi. 21, xx. 3, 1 K. ii. 13-25, and the case of the Psæudomero, Herod. iii. 68. [ABHASHEM; ABONOMAH.] Ehrlich very wrongly, Ishboseth so understood it, though Abner might seem to have given sufficient proof of his loyalty, and he even ventured to reproach him with it. Abner incensed at his ingratitude, after an indignant reply, opened negotiations with David, by whom he was most favorably received at Hebron. He then undertook to procure his recognition throughout Israel; but after leaving his court the purpose was frustrated back by Joab, and treacherously murdered by him and his brother Absalai, at the gate of the city, partly because Joab showed afterwards in the death of Amasa, from fear lest so distinguished a convert to his cause should gain too high a place in David's favor (Joseph. Ant. vii. 1, § 5), but especially in retaliation for the death of Asahel. For this there was indeed some pretext, insomuch as it was thought dishonorable even in battle to kill a more stripling like Asahel, and Joab and Absalai were in their turn the victors of Abner (Num. xxxv. 19), but it is also plain that Abner only killed the youth to save his own life. This murder caused the greatest sorrow and indignation to David; but as the assassins were too powerful to be punished, he contented himself with showing every public token of respect to Abner's memory, by following the bier and pouring forth a simple dirge over the shroud, which is thus translated by Ewald (Dichter des Alten Bundes, ii. 403). As a villain doeth, ought Abner to die? Thy hands, not fettered; Thy feet, not bound with chains; As one falls before the melodious, fittest thou:

—i. e. "Thou diest not fall as a prisoner taken in battle, with hands and feet fettered, but by secret assassination, such as a villain meets at the hands of villains." (2 Sam. iii. 33, 34). See also Louth, Lectures on Hebrew Poetry, xxii. G. E. L. C.

2. Father of Assael, chief of the Benjamites in David's reign (1 Chr. xxix. 21): probably the same as ABNER I.

W. A. W.

ABOMINATION (τὸ βιδέλμα τῆς ἐρμηκήσεως), mentioned by our Saviour as a sign of the approaching destruction of Jerusalem, with reference to Dan. ix. 27, xi. 31, xii. 11. The Hebrew words in these passages are respectively, בִּדְלָמָם and בִּדְלָמָא. In the LXX. translate the first word uniformly βιδέλμα, and the second ἐρμηκήσεως (ii. 27) and ἐρμηκήσεως (xi. 31, xii. 11): many MSS. however have ἡρμηκήσεις in xi. 31. The meaning of the first of these words is clear: ἐρμηκήσεως expresses any religious impurity, and in the plural number especially idols. Suidas defines βιδέλμα as used by the Jews πῶν εὐθαλὸν καὶ πῶν εὐκτίσμαν ἀνθρώπων. It is important to observe that the expression is not used of idolatry in the abstract, but of idolatry adopted by the Jews themselves (2 K. xxiv. 4. 13). In our text we must look for the fulfilment of the prophecy in some act of apostasy on their part; and so the Jews themselves appear to have understood it, according to the traditional feeling referred to by Josephus (B. J. iv. 6, § 3), that the temple would be destroyed εἰσίν ἐπιφανές προμαχών τῷ τεῖναι. With regard to the second word — which has been variously translated of abomination, of the abomination, that desolateth (Marginal transl. xi. 31, xii. 11) it is a participation substantively and placed in immediate apposition with the previous noun, qualifying it with an expressive sense abominable, horrid ( 전체. a. v. οὐδῆς) —and thus the whole expression signifies a horrid abomination. What the object referred to was, is a matter of doubt; it should be observed, however, that in the passages in Daniel the setting up of the abomination was to be consequent upon the cessation of the sacrifice. The Jews considered the proffered sacrifice as fulfilling the prophecy of the Temple under Antiochus Epiphanes, when the Israelites themselves erected an idolatrous altar (Βαρνον, Joseph. Ant. xii. 5, § 4); upon the sacred altar, and offered sacrifice thereon this altar is described as βιδέλμα τῆς ἐρμηκήσεως.
ABRAHAM
(1 Mac. i. 54, vi. 7). The prophecy, however, referred ultimately (as Josephus himself perceived, Ant. x. 11, § 7) to the destruction of Jerusalem by the Romans, and consequently the Βῆθελγυμα must describe some occurrence connected with that event. But it is not easy to find which needs all the requisites of the case: the introduction of the Roman standards into the Temple would not be a Βῆθελγυμα, properly speaking, unless it could be shown that the Jews themselves participated in the worship of them; moreover, this event, as well as several others which have been proposed, such as the erection of the statue of Hadrian, fall in regard to the time of their occurrence, being subsequent to the destruction of the city. It appears most probable that the prophecy of the Zealots constituted the abomination which was the sign of impending ruin.† (Joseph. B. J. iv. 3, § 7.)

W. L. B.

ABRAHAM (אבראה, father of a multitude; אבּרַם: Abraham; originally ABRAM, אבּראָם, father of election: אבּרַמְא: Abram), the son of Terah, and brother of Nahor and Haran; and the progenitor, not only of the Hebrew nation, but of several cognate tribes. His history is recorded to us with much detail in Scripture, as the very type of a true patriarchal life—a life which is, in which all authority is paternal, derived ultimately from God the Father of all, and religion, imperfect as yet in revelation and ritual, is based entirely on that same Fatherly relation of God to man. The natural tendency of such a religion is to the worship of tutelary gods of the family or of the tribe; traces of such a tendency on the part of the patriarchs are found in the Scriptural History itself; and the declaration of God to Moses (Ex. vi. 3) plainly reaches that the full sense of the unity and eternity of Jehovah was not yet unfolded to them. But yet the revelation of the Lord, as the "Almighty God" (Gen. xvii. i, xxviii. 3, xxxv. 11), and the "Judge of all the earth" (Gen. xviii. 25), the knowledge of His intercourse with kings of other tribes (Gen. xx. 3-7), and His judgment on Sodom and Gomorrah (to say nothing of the promise which extended to "all nations") must have raised the patriarchal religion far above this narrow idea of God, and given it the germs, at least, of future exaltation. The character of Abraham is that which is formed by such a religion, and by the influence of a nomad pastoral life; free, simple, and manly; full of hospitality and family affection; truthful to all such as were bound to him by their ties, though not untainted with Eastern craft to those considered as aliens; ready for war, but not a professed warrior, or one who lived by plunder; free and childlike in religion, and gradually educated by God's hand to a continually deepening sense of its all-absorbing claims. It stands remarkably contrasted with those of Isaac and Jacob.

The Scriptural history of Abraham is mainly limited, as usual, to the evolution of the Great Covenant in his life; it is the history of the man himself rather than of the external events of his life; and, except in one or two instances (Gen. xii. 10-20, xiv., xx., xxii. 22-34), it does not refer to his relation with the rest of the world. To them how may have appeared as a chief of the harder Chaldean race, disdaining the settled life of the more luxurious Canaanites, and fit to be hired by plunder as a protector against the invaders of the North (see Gen. xiv. 21-23). Nor is it unlikely, though we have no historical evidence of it, that his passage into Canaan may have been a sign or a cause of a greater migration from Haran, and that he may have been looked upon (e. g. by Abimelech, Gen. xxi. 22-32) as one who, from his position as well as his high character, would be able to guide such a migration for evil or for good (Ewald, Gesch. i. 409-413).

The traditions which Josephus adds to the Scriptural narrative, are merely such as, after his manner and in accordance with the spirit of his writings—exalt the knowledge and wisdom of Abraham, making him the teacher of monotheism to the Chaldeans, and of astronomy and mathematics to the Egyptians. He quotes however Nicolaus of Damascus,§ as ascertaining to him the conquest and government of Damascus on his way to Canaan, and stating that the tradition of his habitation was still preserved there (Joseph. Ant. i. c. 7, § 2; see Gen. xv. 3).

The Arab traditions are partly ante-Mohammedan, relating mainly to the Kaabah (or sacred house) of Mecca, which Abraham and his son "Isma'il" are said to have rebuilt for the fourth time over the sacred black stone. But in great measure they are taken from the Koran, which has itself borrowed from the O. T. and from the Rabbinical traditions. Of the latter the most remarkable is the story of his having destroyed the idols (see Jud. vi. 6-8) which Terah not only worshipped (as declared in Jeds. xxiv. 2), but also manufactured, and having been cast by Nimrod into a fiery furnace, which turned into a pleasant meadow. The legend is generally traced to the word עֵיר (עֵיר), Abraham's birth-place, which has also the sense of "light" or "fire." But the name of Abraham appears to be commonly remembered in tradition through a very large portion of Asia, and the title א'ל-קֵקִי (א'ל-קֵקִי) "the Friend" (of God) (see 2 Chr. xxvii. 7; Is. xliii. 10; Jer. ii. 23) is that by which he is usually spoken of by the Arabs.

The Scriptural history of Abraham is divided into various periods, by the various and progressive revelations of God, which he received through his father Terah, his wife Sarai, and nephew Lot. Abram left Ur for Haran (Charran), in obedience to a call of God (alluded to in Acts vii. 2-4). Haran, apparently the eldest brother—since Nahor, and probably also Abram, married his daughter—was dead already; and Nahor remained behind (Gen. xi. 31). In Haran Terah died; and Abram, now the head of the family, received a second call, and with it the promise.‡ His promise

* Lange's note (Bibelauswek, i. 312), especially as enlarged by Dr. Schaff (Con. on Matt. p. 424), enumerates the principal explanations of this difficult expression.

† H. B.
was two-fold, containing both a temporal and spiritual blessing, the one of which was the type and earnest of the other. The temporal promise was, that he should become a great and prosperous nation; the spiritual, that in him should all families of the earth be blessed" (Gen. xii. 2).

Abram appears to have entered Canaan, as Jacob afterwards did, along the valley of the Jabbok; for he crossed it once into the rich plain of Moreh, near Shechem, and under Elod and Gerizim. There, in one of the most fertile spots of the land, he received the first distinct promise of his future inheritance (Gen. xiii. 7), and built his first altar to God. "The Canaanite" (it is noticed) "was then in the land," and probably would view the strangers of the warlike north with no friendly eyes. Accordingly Abram made his second resting-place in the strong mountain-country, the key of the various passes, between Bethel and Ai. There he would dwell securely, till famine drove him into the richer and more cultivated land of Egypt.

That his history is no ideal or heroic legend, is very clearly shown, not merely by the record of his death as to Sarai, practised in Egypt and repeated afterwards, but much more by the clear description of its utter failure, and the humiliating position in which that place in comparison with Pharaoh, and still more with Abimelech. That he should have felt afraid of such a civilized and imposing power as Egypt even at that time evidently was, is consistent enough with the Arab nature as it is now; that he should have sought to guard himself by deceit, especially of that kind which is true in word and false in effect, is unfortunately not at all incompatible with a generally religious character; that such a story should have been framed in an ideal description of a saint or hero is inconceivable.

The period of his stay in Egypt is not recorded, but it is from this time that his wealth and power appear to have begun (Gen. xiii. 2). If the dominion of the Hyskos in Memphis is to be referred to this epoch, as seems not improbable [Egyptian], then, since they were akin to the Hebrews, it is not impossible that Abram may have taken part in their war of conquest, and so have had another recommendation to the favor of Pharaoh.

On his return, the very fact of this growing wealth and importance caused the separation of Lot and his portion of the tribe from Abram. Lot's departure to the rich country of Sodom implied a wish to quit the nomadic life and settle at once: Abram, on the contrary, was content still to "wander in tents" and wait for the promised time (Heb. xii. 9). Probably till now he had looked on Lot as his heir, and his separation from him was a providential preparation for the future. From this time he took up his third resting-place at Mamre, or Hebron, the future capital of Judah, situated in the direct line of communication with Egypt, and opening down to the wilderness and pasture land of Hebron. This very position, so different from the mountain-fastness of Ai, marks the change in the numbers and powers of his tribe.

The history of his attack on 4 kings from Amor, which from Haran in his father's lifetime, Various explanations have been given of this difficulty; the most probable of these, is that statement in Gen. xiv. 28, that Terah was 70 years old when he begat his three children, applies only to the eldest, Abram, and that the deaths of his two younger children belong to a subsequent period (Num. xxvi. 1).

follows, gives us a specimen of the view which would be taken of him by the external world. By the way in which it speaks of him as "Abraham the Hebrew," it would seem to be an older document, a fragment of Covenant-history (as Ewald calls it), preserved and sanctified by Moses. The invasion was clearly another northern immigration or foray, for the chiefs or kings were of Shinar (Babylonian), Elam (Persia), i.e., that it was not the first, is evident from the vassalage of the kings of the cities of the plain; and it extended (see Gen. xiv. 5-7) far to the south over a wide tract of country. Abram appears here as the head of a small confederacy of chiefs, powerful enough to venture on a long pursuit to the head of the valley of the Jordan, to attack with success a large force, and not only to rescue Lot, but to roll back for a time the stream of northern immigration. His high position is seen in the gratitude of the people, and the dignity with which he refuses the character of a heralding; that it did not elevate him above measure, is evident from his reverence to Melchizedek, in whom he recognized one whose call was equal and consecrated rank superior to his own [Melchizedek].

The second period of Abram's life is marked by his sojourn in Egypt, which without in the prompt unfolding the spiritual promise, completes the temporal one, already in course of fulfillment. It first announced to him that a child of his own should inherit the promise, and that his seed should be as the "stars of heaven." This promise, unlike the other, appeared at his age contrary to nature, and therefore it is on this occasion that his faith is specially noted as seconded and "counted for righteousness." Accordingly, he now passed into a new position, for not only is a fuller revelation given as to the captivity of his seed in Egypt, the time of their deliverance, and their conquest of the land, when the iniquity of the Amorites was full; but after his solemn burnt-offering the visible appearance of God in fire was vouchsafed to him as a sign, and he enters into covenant with the Lord (Gen. xv. 8). This covenant, like the earlier one with Noah, (Gen. vii. 17), is one of free promise from God, faith only in that promise being required from man.

The immediate consequence was the taking of Hagar, Sarai's maid, to be a concubine of Abram (as a means for the fulfillment of the promise of seed), and the conception of Ishmael.

For fourteen years after, no more is recorded of Abram, who seems during all that period to have dwelt at Mamre. After that time, in Abram's 99th year, the last step in the revelation of the promise is made, by the declaration that it should be given to a son of Sarai; and at the time the temporal and spiritual elements are distinguished: Ishmael can share only the one, Isaac is to enjoy the other. The covenant, which before was only for temporal inheritance (Gen. xv. 18), is now made everlasting, and sealed by circumcision. This new state is marked by the change of Abram's name to "Abraham," and Sarai's to "Sarah," and it was one of far greater acquaintance.

a) "O perpetua, Ixx. If this sense of the word be taken, it strengthens the supposition noticed. In any case, the name is that applied to the beneficent by for eigiers, or used by them of themselves only in speaking to foreigners; see Hager.

b) The original name is uncertain in deriv.
nace and intercourse with God. For, immediately after, we read of the Lord's appearance to Abraham in human form, attended by two angels, the ministers of His wrath against Sodom, of His announcement of the coming judgment to Abraham, and acceptance of his intercession for the condemned cities. 7 The whole record stands alone in Scripture for the simple and familiar intercourse of God with him, contrasting strongly with the vaguer and more awful descriptions of previous appearances (see e. g. xv. 12), and with those of later times (Gen. xxviii. 17, xxxii. 30; Ex. iii. 6, &c.). And corresponding with this there is a perfect absence of all on Abraham's part, and a cordial and reverent joy, which, more than anything else, recalls the time past when "the voice of the Lord God was heard, walking in the garden in the cool of the day."

Strangely unworthy of this exalted position as the "Friend" and intercessor with God, is the repetition of the falsehood as to Sarah in the land of the Philistines (Gen. xx.). It was the first time he had come in contact with that tribe or collection of tribes, which stretched along the coast almost to the borders of Egypt; a race apparently of lords ruling over a conquered population, and another example of that series of migrations which appear to have taken place at this time. It seems, from Abraham's excuse for his deceit on this occasion, as if there had been the idea in his mind that all arms may be used against unbelievers, who, it is assumed, have no "fear of God," or sense of right. If so, the rebuke of Abimelech, by its dignity and its clear recognition of a God of justice, must have put him to manifest shame, and taught him that others also were servants of the Lord.

This period again, like that of the sojourn in Egypt, was one of growth in power and wealth, as the respect of Abimelech and his alarm for the future, so natural in the chief of a race of conquering invaders, very clearly shows. Abraham's settlement at Beerseba, on the borders of the desert, near the Amalekite plunderers, shows both that he needed room, and was able to protect himself and his flocks.

The birth of Isaac crowns his happiness, and fulfils the first great promise of God; and the expulsion of Ishmael, painful as it was to him, and vindictive as it seems to have been on Sarah's part, was yet a step in the education which was to teach him to give up all for the one great object. The symbolic meaning of the act (drawn out in Gal. vi. 21-31) could not have been wholly unfit e for the patriarch himself, so far as it involved the sense of the spiritual nature of the promise, and carried out the fore-ordained will of God.

(IV.) Again for a long period (25 years, Joseph. Ant. i. 13, § 2) the history is silent; then comes the final trial and perfection of his faith in the command to offer up the child of his affections and of God's promise. The trial lay, first, in the preciousness of the sacrifice, and the perplexity in which the command involved the fulfilment of the promise; secondly, in the strangeness of the command to violate the human ties of which the sacredness had been enforced by God's special command (Gen. ix. 5, 6), as well as by the feelings of a father. To these trials he rose superior by faith, that "God was able to raise Isaac even from the dead" (Heb. xi. 19), probably through the same faith to which our Lord refers, that God had promised to be the "God of Isaac" (Gen. xvii. 19), and that he was not "a God of the dead, but of the living." 9

It is remarkable that, in the blessing given to him now, the original spiritual promise is repeated for the first time since his earliest call, and in the same words then used. But the promise that "in his seed all nations should be blessed" would be now understood very differently, and felt to be far above the temporal promise, in which, perhaps, at first it seemed to be absorbed. It can hardly be wrong to refer preeminently to this epoch the declaration, that Abraham "saw the day of the Lord and was glad" (John viii. 50).

The history of Abraham is now all but over, though his life was prolonged for nearly 50 years. The only other incidents are the death and burial of Sarah, the marriage of Isaac with Rebekah, and that of Abraham with Keturah.

The death of Sarah took place at Kirjath Arba, i. e. Hebron, so that Abraham must have returned from Beerseba to his old and more peaceful home. In the history of her burial, the most notable points are the respect paid to the power and character of Abraham, as a mighty prince, and the exceeding modesty and courtesy of his demeanour. It is sufficiently striking that the only inheritance of his family in the land of promise should be a tomb. The sepulchral cave of Machpeleh is now said to be concealed under the Mosque of Hebron (see Stanley, S. & P. p. 101). [Hebron.]

The marriage of Isaac, so far as Abraham is concerned, marks his utter refusal to ally his son with the polluted and condemned blood of the Canaanites.

The marriage with Keturah is the strangest and most unexpected event recorded in his life, Abraham having long ago been spoken of as an old man; but his youth having been restored before the birth of Isaac, must have remained to him, and Isaac's

7 The scene of the sacrifice is, according to our present text, and to Josephus, the land of "Moriah," or Ἀμελεχ, chosen by Jehovah, Geis. (comp. the name "Jehovah-Jireh"). The Samaritan Pentateuch has "Moreh," Ἀμελεχ; the LXX. render the word here by οἰκήματα, the phrase used for what is undoubtedly "Moreh" in xii. 6, whereas in 2 Chr. iii. iii. they render "Morah" by Ἀμελεχ: they therefore probably read "Moreh" also. The fact of the three days' journey from Beerseba suits Moreh better (see Stanley's S. & P. p. 251); other considerations seem in favor of Moriah. [Morath.]
ABRAHAM'S BOSOM

Abraham marriage having taken his son comparatively away, may have induced him to seek a wife to be the support of his old age. Keturah held a lower rank than Sarah, and her children were sent away, lest they should dispute the inheritance of Isaac. Abraham having learnt to do voluntarily in their case what had been forced upon him in the case of Isaac.

Abraham died at the age of 175 years, and his sons, the heir Isaac, and the outcast Ishmael, united to lay him in the cave of Machpelah by the side of Sarah.

His descendants were (1) the Israelites; (2) a branch of the Arab tribes through Ishmael; (3) the children of the East, of whom the Moabites were the chief; (4) perhaps (as vague tribes), the nations of Ammon and Moab (see these names); and through their various branches his name is known all over Asia.

A. B.

On Abraham, see particularly Ewald, Gesch. i. 409-439, 2e Aufl.: Kuczyn, Gesch. des A. Bandes, 2e Aufl., i. 160-215; and Stanley, Lect. on the Hist. of the Jewish Church, Part I., Lect. i., ii., iii., iv., v., vi., vii., viii.

The Jewish legends respecting him have been collected by Leen, Leben, Buchner, etc. (Auflassungen der jüdischen Sage, Leipzig, 1859); see also Eisenmenger's Teutsche Judenlehre.

ABRAHAM'S BOSOM

During the Roman occupation of Judaea, at least, the practice of reclining on couches at meals was customary among the Jews. As each guest leaned upon his left arm, his neighbor next below him would naturally be described as lying in his bosom; and such a position with respect to the master of the house was of especial honor, and only occupied by his nearest friends (John i. 18, xii. 23). To lie in Abraham's bosom, then, was a metaphor in use among the Jews to denote a condition after death of perfect happiness and rest, and a position of friendliness and nearness to the great founder of their race, when they shall lie down on his right hand at the banquet of Paradise, "with Abraham, and Isaac, and Jacob, in the kingdom of heaven" (Matt. viii. 11). That the expression was in use among the Jews is shown by Lightfoot (Hor. Heb. in loc., xii. 22), who quotes a passage from the Talmud (Kiddushin, fol. 72), according to whose interpretation, represents Levi as saying in reference to the death of Rabbi Judah, "to-day he dwelleth in Abraham's bosom." The future blessedness of the just was represented under the figure of a banquet, "the banquet of the garden of Eden or Paradise." See Schottgen, Hor. Heb. in Matt. viii. 11, [Lazarus].

W. A. W.

ABRAM. [Abraham.]

ABRONKH (אָבְרֹקָח) [passage], from פְּרֹקָח (p'rokach), to pass over, one of the halting-places in the Israelites in the desert, immediately preceding Ezion geber, and therefore, looking to the east, the name may possibly retain the trace of a ford across the head of the Elanitic Gulf. In the A. V. it is given as Etham (Ethamethos; [Vat. 2: β'ροχα] Αθηνος) (Num. xxxiii. 31, 35).

ABRONXAS (אֱבְרֵנִס) [Comp. 'Abronx: Heb. 'Abronx: Mevrim], a torrent (γυαλόμα), apparently near Cilicia (Jud. ii. 21 compared with 21): it is possible it be the Nahr Abanim, or Korish, the ancient Avonis, which rises in the Lebanon at Afzon, and falls into the sea at Adonis (Rhodos).

It has, however, been conjectured (Mo-

VERS, Bonner Zeit. xiii. 18) that the word is a corruption of מָרְאַנָה מָרְאַנָה [maranah maranah] = beyond the river (Euphrates), which has just been before mentioned; a corruption not more inconceivable than many which actually exist in the LXX. The A. V. has An

woni (Jud. ii. 24).

G.

AB'SALOM (אֶבְרָסַלְמָם) father of peace: 'Abesdalya : Absalom", third son of David by Maachah, daughter of Talmi king of Geshur, a Syrian district adjoining the north-eastern frontier of the Holy Land near the Lake of Mecon. He is scarcely mentioned till after David had committed the great crime which by its consequences emblazoned his old age, and then appears as the instrument by whom was fulfilled God's threat against the sinful king, that "evil should be raised up against him out of his own house, and that his neighbor should lie with his wives in the sight of the sun." In the latter part of David's reign, polygamy bore its ordinary fruits. Not only is his sin in the case of Bathsheba traceable to it, since it naturally suggests the unlimited indulgence of the passions, but it also brought about the downfall of that sin, by leading up to jealousies and conflicting claims between the sons of different mothers, each apparently living with a separate house and establishment (2 Sam. xiii. 8, xiv. 21; cf. I K. vii. 8, &c.).

Absalom had a sister Tamar, who was violated by her half-brother Amnon, David's eldest son by Ahinose, the Jedidilees. The king, though indulgent at so great a crime, would not punish Amnon because he was his first-born, as we learn from the words אָבְרָסַלְמָם וַאֲכֵפְרָבֹא (Evesal'ma va'kipra'ov), "the same (i.e., David) and his brother Absalom," which are found in the LXX. (2 Sam. xiii. 21), though wanting in the Hebrew. The natural anger of such an outrage would be Tamar's full brother Absalom, just as the sons of Jacob took bloody vengeance for their sister Dinah (Gen. xxviii.). He brooded over the wrong for two years, and then invited all the princes to a sheep-shearing feast at his house, perhaps an old divinatory rite which was used in the recesses of the religious sanctuary (as we infer from the prefix γυς), on the borders of Ephraim and Benjamin. Here he ordered his servants to murder Amnon, and then fled for safety to his father-in-law's court at Geshur, where he remained for three years. David was overwrought by this accumulation of family sorrows, thus completed by separation from his favorite son, whom he thought it impossible to pardon or recall. But he was brought back by an artifice of Joab, who sent a woman of Tekoa (afterwards known as the birthplace of the prophet Amos) to entreat the king's interference in a suit instituted case similar to Absalom's. Having persuaded David to prevent the avenger of blood from pursuing a young man, who, she said, had slain his brother, she adroitly applied his absence to the recall of Absalom, and urged him, as he had thus yielded the general principle, to "etch house his banished." David did so, but would not see Absalom for two more years, though he allowed him to live in Jerusalem. At last wearied with delay, perceiving that his triumph was only half complete, and that his exclusion from court interfered with the ambitious schemes which he was forming, fancying too that sufficient exactions were not made in his favor, the impetuous young man sent his servants to his own camp and lamenting to Josah, that doing as Samson had done (Judg. xv. 4). There-
upon Joab, probably dreading some further outrage from his violence, brought him to his father, from whom he received the kiss of reconciliation. Absalom now began at once to prepare for rebellion, urged to it partly by his own restless wickedness, partly perhaps by the fear lest Bathsheba's child should supplant him in the succession, to which he would feel himself entitled as of royal birth on his mother's side as well as his father's, and as being now David's eldest surviving son, since we may infer that the second son Chileab was dead, from no mention being made of him after 2 Sam. iii. 3. It is harder to account for his temporary success, and the imminent danger which befell so powerful a government as his father's. The sin with Bathsheba had probably weakened David's moral and religious hold upon the people; and as he grew older he may have become less attentive to individual complaints, and that personal administration of justice which was one of an eastern king's chief duties. For Absalom tried to supplant his father by courting popularity, standing in the state, concurring with every snare, luring the ill-feeling which he would find in getting a hearing, "putting forth his hand and kissing any man who came nigh to do him obeisance." He also maintained a splendid retinue (xx 1), and was admired for his personal beauty and the luxuriant growth of his hair, on grounds similar to those which had made Saul acceptable (1 Sam. x. 23). It is probable, too, that the great tribe of Judah had taken some offense at David's government, perhaps from finding themselves completely merged in one united Israel; and that they hoped securely for preeminence under the less wise and liberal rule of his son. Thus Absalom seizes Hebron, the old capital of Judah (now supplanting by Jerusalem), as the scene of the outbreak; Amasa his chief captain, and Ahithophel of Gihon his principal counsellor, are both of Judah, and after the rebellion was crushed we see signs of ill-feeling between Judah and the other tribes (xxx. 41). But whatever the causes may have been, Absalom raised the standard of revolt at Hebron after forty years, as we now read in 2 Sam. xv. 7, which it seems better to consider a false reading for four (the number actually given by Josephus), than to interpret of the fortieth year of David's reign (see Gerlach, in loco, and Ewald, Geschichte, iii. 217).

The revolt was at first completely successful; David fled from his capital over the Jordan to Mahanaim in Gilead, where Jacob had seen the "Two Hosts" of the angelic vision, and where Absalom had rallied the Israelites round Saul's dynasty in the person of the unfortunate Ishbosheth. Absalom occupied Jerusalem, and by the advice of Ahithophel, who saw that for such an unnatural rebellion war to the knife was the best security, took possession of David's harem, in which he had left ten concubines. This was considered to imply a formal assumption of all his father's royal rights (cf. the conduct of Absihay, 1 K. ii. 11 ff., and of Smerdis the Magian, Herod. iii. 68), and was also a fulfillment of Nathan's prophecy (2 Sam. xii. 11). But David had left friends who watched over his interests. The vigorous counsels of Ahithophel were afterwards rejected through the crafty advice of Hushai, who insinuated himself into Absalom's confidence to work his ruin, and Ahithophel himself, seeing his ambitions hopes frustrated, and another preferred in the time of his horns whose sake his heart's desire went home to Gihon and committed suicide. At last, after being solemnly anointed king at Jerusalem (xix. 10), and lingering there far longer than was expedient, Absalom crossed the Jordan to attack his father, who by this time had rallied round him a considerable force, whereas had Ahithophel's advice been followed, he would probably have been crushed at once. A decisive battle was fought in Gilead, in the wood of Ephraim, so called, according to Gerlach (Comm. in loco), from the great defeat of the Ephraimites (Judg. xii. 4), or perhaps from the connection of Ephraim with the trans-Jordanic half-tribe of Manasseh (Stanley, S. and P. p. 325). Here Absalom's forces were totally defeated, and as he himself was escaping, his long hair was entangled in the branches of a terebinth, where he was left hanging while the nude on which he was riding ran away from under him. Here he was dispatched by Joab, in spite of the prohibition of David, who, loving him to the last, had desired that his life might be spared, and when he heard of his death, lamented over him in the pathetic words, 

O my son Absalom! would God I had died for thee! O Absalom, my son, my son! He was buried in a great pit in the forest, and the conquerors threw stones over his grave, an old proof of bitter hostility (Josh. vii. 20). The sacred historian contrasts this dishonored burial with the tomb which Absalom had raised in the King's Dale (comp. Gen. xiv. 17) for the three sons whom he had lost (comp. 2 Sam. xviii. 18, with xiv. 27), and where he probably had intended that his own remains should be laid. Josephus (Ant. vii. 16, § 4) mentions the pillar of Absalom as situate 2 stadia from Jerusalem. An existing monument in the valley of Jehoshaphat just outside Jerusalem bears the name of the Tomb of Absalom; but the Ionic pillars which surround its base show that it belongs to a much later period, even if it be a tomb at all.

G. E. L. C.

The so-called Tomb of Absalom.
whole sea-board of Palestine — which is formed by the bold promontory of Carmel on the opposite side. This bay, though spacious (the distance from Acre to Carmel being about 8 miles), is shallow and exposed, and hence Acre itself does not offer safe harborage: on the opposite side of the bay, however, the roadstead of H[e]fuj, immediately under Carmel, supplies this deficiency. Inland the hills, which from Tyre southwards press close upon the sea-shore, gradually recede, leaving in the immediate neighborhood of Acre a plain of remarkable fertility about six miles broad, and watered by the small river Helus (Nader Namin), which discharges itself into the sea close under the walls of the town. To the S. E. the still receding heights afford access to the interior in the direction of Sepharis. Acre, thus favorably placed in command of the approaches from the north, both by sea and land, has been justly termed the "key of Palestine."

In the division of Canaan among the tribes, A[b](e)cha fell to the lot of Asher, but was never regarded as an original tribe (Josh. xiii. 31); and hence it is reckoned among the cities of Phoenicia (Strab. ii. 134; Plin. v. 17; Itol. v. 15). No further mention is made of it in the O. T. history, nor does it appear to have risen to much importance until after the dismemberment of the Macedonian empire, when its proximity to the frontier of Syria made it an object of frequent contention. Along with the rest of Phoenicia it fell to the lot of Egypt, and was named Ptolemais, after one of the Ptolemies, probably Soter, who could not have failed to see its importance to his dominions in a military point of view. In the wars that ensued between Syria and Egypt, it was taken by Antiochus the Great (Itol. v. 62), and attached to his kingdom. When the Macedeans established themselves in Judaea, it became the base of operations against them. Simon drove his encampment back within its walls, but did not take it (1 Mac. v. 22). Subsequently, when Alexander Jaxetus set up his claim to the Syrian throne, he might offer no more tempting bait to secure the cooperation of Jonathan than the possession of Ptolemais and its district (1 Mac. x. 39). On the decay of the Syrian power it was one of the few cities of Judaea which established its independence. Alexander Jannaeus attacked it without success. Cleopatra, whom he had summoned to his assistance, took it, and transferred it, with her daughter Selene, to the Syrian monarchy: under her rule it was besieged and taken by Tigranes (Joseph. Ant. xiii. 12, § 2; 13, § 2; 16, § 4). Ultimately it passed into the hands of the Romans, who constructed a military road along the coast, from Bybys to Sepharis, passing through it, and elevated it to the rank of a colony, with the title Colonia Claudii Cesaris (Plin. v. 17). The only notice of it in the N. T. is in connection with St. Paul's passage from Tyre to Caesarea (Acts xxi. 7). Few remains of antiquity are to be found in the modern town. The original name has alone survived all the changes to which the place has been exposed.

W. L. B.

ACCOZ [Koz.]

ACELDAMA (Acts 1:19; Lachmus [and...
ACEDALMA

[Isch.] (Sim.) B' Ακεδαλίμα: Ποαεδαλίμα); χω-  

νοίοι αἷμαρ, "the field of blood," (Chald. אֶ  

רִבָּנָן, נָפָן), the name given by the Jews of Jerusalem so a field (χαώριον) near Jerusalem purchased by Judas of the money paid for the betrayal of Christ, and so called from his violent death therein (Acts i. 19). This is at variance with the account of St. Matthew (xxix. 8), according to which the field of blood (ἀγρός αἷμαρ) was purchased by the priests with the 30 pieces of silver after they had been cast down by Judas, as a burial-place for strangers, the locality being well known at the time as the field of the Potter’s (τὸν ἀγρόν τοῦ ποταμίου). See Alford’s Notes to Acts i. 19. And accordingly ecclesiastical tradition appears from the earliest times to have pointed out two distinct (though not mutually) spots as referred to in the two accounts. In Jerome’s time (Omn. Achelambus) the “ager sanguinis” was shown “ad australem a plagam montis Sion.” Art-  

culius (p. 4) saw the “large fig-tree where Judas hanged himself,” certainly in a different place from that of the “small field (Acedalma) of the bodies of the pilgrims were buried” (p. 5). Saewulf (p. 42) was shown Aceldama “next” to Getseman-  

e, “at the foot of Olivet, near the sepulchres of Simeon and Joseph” (Jacob and Zacharias). In the “Citez de Jherusalem” (Roh. i. 560) the place of the suicide of Judas was shown as a stone arch, apparently inside the city, and giving its name to a street. Sir John Maundeville (p. 175) found the ceder-tree of Judas “fast by the image of Achilles;” but the Aceldama “on the other side of Mount Sion towards the south.” Maundrell’s account (p. 468-9) agrees with this, and so does the large map of Schultz, on which both sites are marked. The Aceldama still retains its ancient position, but the tree of Judas has been transferred to the “Hill of Evil Counsel” (Stanley, S. Π. P. pp. 163, 186; and Iarchay’s Jfrp. 1857, and “City,” &c. pp. 73, 208).

The "field of blood" is now shown on the steep southern face of the valley or ravine of Hinnom, near its eastern end; on a narrow plateau (Salz-  

mann, EtwK, p. 22), more than half way up the hillside. Its modern name is Hekt el-Manna. It is separated by no enclosure; a few venerable olive-  

trees (see Salzmann’s photograph, "Champ du sang") occupy part of it, and the rest is covered by a ruined square edifice—half built, half excavated—which, perhaps originally a church (Paulin, in Ritter, Pol. p. 454), was in Maundrell’s time (p. 468) in use as a charnel-house, and which the latest conjectures (Schultz, Williams, and Barclay, p. 207) propose to identify with the tomb of Amanus (Joseph. B. J. v. 12, § 2). It was believed in the middle ages that the soil of this place had the power of very rapidly consuming bodies buried in it (Saudys, p. 187), and in consequence either of this or of the sanctity of the spot, great quantities of the earth were taken away; amongst others by the Pisan Crus-  

saders in 1218 for their Campo Santo at Pisa, and by the Empress Helena for that at Rome (Koh. i. 355; Ruummer, p. 270). Besides the charnel-house above mentioned, there are several large tombs in the ground in this immediate neighborhood which may have been caused by such excavations. The formation of the hill is cretaceous, and it is well known that chalk is always favorable to the rapid decay of animal matter. The assertion (Krafft, p. 193; Ritter, Pol. p. 465) that a potter’s still exists near this spot does not seem to be borne out by other testimony.* 

* There is another view on some of the points embraced in this article, which deserve to be mentioned. The contradiction said to exist between Matt. xxvii. 8 and Acts i. 19 is justly qualified in the Concise Dictionary as "apparent," and hence not necessarily actual. The difficulty turns wholly upon a single word, namely, εκτίθατο, in Acts i. 18; and that being susceptible of a twofold sense, we are at liberty certainly to choose the one which agrees with Matthew’s statement, instead of the one contrasting with it. Many under-  

stand εκτίθατο in Acts as having a Hiphil or causative sense, as Greek verbs, especially in the middle voice, often have (Win. Y. T. Gr. § 38, 3; Schen. Syg. p. 228). With this meaning, Luke in the Acts (or Peter, since it may be the latter’s remark) states that Judas by his treachery gave occasion for the purchase of “the potter’s field” and that is precisely what Matthew is saying that the priests purchased the field, since they did it with the money furnished to them by the traitor. In like manner we read in the Gospels that Jesus when crucified was put to death by the Roman soldiers; but in Acts v. 30, Peter says to the members of the Jewish Council:—Whom Jesus (ye) slew, hanging on a tree"; * which all accept as meaning that the Jewish rulers were the means of procuring the Saviour’s death. For other examples of this causative sense of verbs, comp. Matt. ii. 16, xxvii. 60; John iv. 1; Acts vii. 21, xvi. 21; 1 Cor. vii. 16; 1 Tim. iv. 16, etc. As explaining, perhaps, why Peter chose this concise mode of expression, Fritzsche’s remark may be quoted:—The man (a sort of acerba invasio) thought to enrich himself by his crime, but only got by it a field where blood was shed for punishment (Eng. Matt. p. 799). Many of the best critics, as Kühnel, Althusan, Thielke (Lex. s. v. Jesus, Ewald (Wissensch. Kritik, p. 543), Baumgarten (Apokryphes, p. 31), Lange (Bibellex., i. 490), Deech (Der Apost. Gesch, p. 14), Robinson (Homo-  

gony, p. 227), Andrews (Life of our Lord, p. 511), and others, adopt this explanation.

It does not affect the accuracy of Matthew or Luke whether "the field of blood" which they mentioned was the present Aceldama or not; for they affirm nothing as to its position beyond implying that it was a “potter’s field” near Jerusalem.

* Krafft’s statement is (Topographie Jerusalem, p. 139) that he saw people cutting or digging up clay there (Erde stechen), and not that they worked it up on the ground. Schwit, the Prussian consul (Jerusa-  

lem, eine Vorlesung, p. 20), and Porter (Giant Cities, p. 147), speak of a bed of clay in that place. See, also, Williams’s Holy City, ii. 495. There is a potter at Jerusalem at present, for which the clay is obtained from the hill over the valley of Hinnom. H.  

* The V. strangely misrepresents the case here, as if the putting to death of Jesus was prior to the crucifixion.

---

a The prophecy referred to by St. Matthew, Zechari-  

as notJeremiah (13. 12, 13), does not present the precise state of the Hebrew text agrees with the quotation of the Evangelist. The Syriac Version omits the name sitogether.

b Eusebius, from whom Jerome translated, has here in Boponen. This may be a clerical error, or it may also be an instance existing of the change of a traditional site to meet circumstances.
Nor does the existence of traditions which point out different spots as "the field," prove that the first Christians recognized two different accounts, i.e. a contradiction in the statements of Matthew and Luke; for the variant traditions are not old enough (that of Arculf A.D. 700) to be traced to any such source. Yet it is not impossible that the potter's field which the Jews purchased may actually be the present Achelema, which overlooks the valley of Hinnom. The receptacles for the dead which appear in the rocks in that quarter show that the ancient Jews were accustomed to bury their dead there.

It is usually assumed that Judas came to his miserable end on the very field which had been bought with his 30 pieces of silver. It was for a twofold reason, says Lightfoot (I Hebr. p. 630), that the field was called Achelema; first, because, as stated in Matt. xxvii. 7, it had been bought with the price of blood; and, secondly, because it was sprinkled with the man's blood who took that price. Such congruities often mark the retributions of guilt. Yet it should be noted that Luke does not say in so many words that Judas "fell headlong and burst asunder" on the field purchased with his "reward of iniquity"; but may mean that the field was called Achelema because the foot of the traitor's bloody end, whether it occurred in one place or another, was so notorious (ἀκρατήρια... αὔτῃ κηρυγμα). In either case there is no inconsistency between the two reasons assigned by Matthew and Luke for the appellation; the field could be called Achelema with a double emphasis, both because it was "the price of blood," and because the guilty man's blood was shed there by his own hand.

Further, the giving of the 30 pieces of silver, "the price of him that was valued," for the "potter's field," fulfilled an O.T. prophecy. But why the evangelist (Matt. xxvii. 9) should refer this prophecy to Jeremiah, and not Zechariah (Zech. xi. 12, 13), in whom the words are found, is a question not easy to answer. Possibly as the Jews (according to the Talmudic order) placed Jeremiah at the head of the prophets, his name is cited merely as a general title of the prophetic writings. See Davidson's Biblical Criticism, i. 330. Dr. E. Robinson (Harmony, p. 237) agrees with those who think διὰ τοῦ προφητῆτος may be the true reading, but certainly against the external testimony. The view of Hengstenberg is that though Zechariah's prophecy was directly Messianic and that of Jeremiah ante-Messianic and national, yet they both really prophesy one truth (namely, that the people who spurn God's mercies, be they his prophets and their warnings or Christ and his Gospel, shall be themselves spurned); and hence Matthew in effect quotes them both, but names Jeremiah only because he was better known, and because Zechariah incorporates the older prophecy with his own so as to give to the latter the effect of a previous fulfilment as a pledge for the future: the common truth taught in the two passages, and the part of the "potter" so conspicuous in them, being supposed insufficient to achieve the removal of this relation of the prophecies to each other. See his Christology of the O. T. ii. 187 ff., § 9 (Keith's trans.). So free a critic as Groitsch (Anm. ad loc.) takes nearly the same view: "Cum autem hoc dictum Jeremie per Zach. repetitum hic recipit Matt., simul ostendit "acate, ec semper inimicis Judaeis, quae idem prophetae olim et temporis hominibus praedix- nam.

For other opinions, which may be thought, however, to illustrate rather than solve the difficult question, see Dr. Schaff's edition of Lange's Commentary, i. 505.

II.

ACHAIA (Ἀχαΐα) signifies in the N. T. a Roman province, which included the whole of the Peloponnesus and the greater part of Hellas proper, with the adjacent islands. This province, with that of Macedonia, comprehended the whole of Greece: hence Achaia and Macedonia are frequently mentioned together in the N. T. to indicate all Greece (Acts xviii. 27, xix. 21; Rom. xv. 26, xvi. 11; Eph. v. 4). Achaia is the term used by ancient writers: 1 Cor. xvi. 15; 2 Cor. i. 1, iv. 1, xi. 10; 1 Thess. i. 7, 8). A narrow slip of country upon the northern coast of Peloponnesus was originally called Achaia, the cities of which were celebrated in an ancient League, which was renewed in n.c. 280 for the purpose of resisting the Macedonians. This League subsequently included several of the other Greek states, and became the most powerful political body in Greece; and hence it was natural for the Romans to apply the name of Achaia to the Peloponnesus and the south of Greece, when they took Corinth and destroyed the League in n.c. 146. (Βασιλεύς δι' οὖν ἕλκατο ἀλλ' Ἀχαϊά ἤγειμον ἤ διδοὺ ἐλεφαντάζον "Ελληνες δι' Ἀχαιῶν πότε τοῦ Ἑλληνικοῦ προετοιμάστων, Pans. vii. 16, § 10). Whether the Roman province of Achaia was established immediately after the conquest of the League, or not till a later period, need not be discussed here (see Dict. of Greek, i. 17).

In the division of the provinces by Augustus between the emperor and the senate in n.c. 27, Achaia was one of the provinces assigned to the Senate, and was governed by a proconsul (Strab. xvii. p. 840: Dion. Cass. liv. 12). Titurius in the second year of his reign (A.D. 16) took it away from the Senate, and made it an imperial province governed by a procurator (Tac. Ann. i. 70); but Claudius restored it to the Senate (Suet. Claud. 25). This was its condition when Paul was brought before Gallio, who is therefore (Acts xviii. 12) correctly called the "proconsul" (ἀρχηγός) of Achaia, which is translated in the A. V. "deputy" of Achaia. (For the relation of Achaia to Helles, see GRIEVE, ad fin.)

ACHAEUS (Ἀχαίος), name of a Christian (1 Cor. xvi. 17, subscription No. 25).

ACHAN (ἄχαν, trouble; written ἄχαν in 1 Chr. ii. 7: "Ἀχαῖος or Ἄχαιος: Acham or Achhar"), an Israelite of the tribe of Judah, who, when Jericho and all that it contained were accursed and devoted to destruction, secretly a portion of the spoil in his tent. For this sin Jehovah punished Israel by their defeat in their attack upon Ai. When Achan confessed his guilt, and the booty was discovered, he was stoned to death with his whole family by the people, in a valley situated between Ai and Jericho, and their remains, together with his property, were burnt. From this event the valley received the name of Acher (Lu. vii. 22) (See ACHAR). From the similarity of the name Achan to Acher, Joshua said to Achan, "Why hast thou troubled us? the Lord shall trouble thee this day" (Josh. xix.). In order to account for the terrible vengeance executed upon the family of Achan, it is quite unnecessary to resort to the hypothesis that they were accomplices in his act of military insubordination. The extraordinary severity of Oriental nations, from which the Jewish people were by n
neus free, has in all ages involved the children in the punishment of the father.

The name occurs Josh. vii. 1, 18, 19, 20, 24, xxii. 20.

A. "ACHAR (אָCarthy : Achar). A variation of the name of Achan which seems to have arisen from the play upon it given in 1 Chr. ii. 7; "Achar, the trouble maker (רֶוֶזֶנ) of Israel." W. A. W.

ACHBOR (אָCarthy : Achar). Chief minister, "cupbearer, and keeper of the signet, and steward, and overseer of the accounts." at the court of Sarchon or Esarhaddon, king of Nineveh, in the Apocryphal story of Tobit (Tob. i. 21; 22. ii. 10, xiv. 10). He was nephew to Tobit, being the son of his brother Anan, and supported him in his blindness till he left Nineveh. From the occurrence of the name of Anan in xiv. 10, it has been conjectured that Achcharus is but the Jewish name for Mordecai, whose history suggested some points which the author of the book of Tobit worked up into his narrative; but there is no reason to have recourse to such a supposition, as the discrepancies are much more strongly marked than the resemblances. W. A. W.

Achias (Achias). Son of Pheineas; high-priest and progenitor of Esdras (2 Esdr. i. 2), but omitted both in the genealogies of Ezra and 1 Esdras. He is probably conformed with Ahijah, the son of Ahitub and grandson of Eli. W. A. W.

ACHIM (אָCarthy : Achar), Matt. i. 14, son of Sadoc, and father of Eliud, in our Lord's genealogy; the fifth in succession before Joseph the husband of Mary. The Hebrew form of the name would be יֶּהֶנֶּס, Jachin (Gen. xxxvi. 10; 1 Chr. xxiv. 17), which in the latter place the LXX. render Ἀχίας, [Horn. ed.], or Ἀκίας [Vat.]; Alex. Ἀκίας, Comp. Iaκίας, Ab. Ἀκίας. It is a short form of Jehohachin, the Lord will establish. The name, perhaps, indicates him as successor to Jehoiachin's throne, and expresses his parents' faith that God would, in due time, establish the kingdom of David, according to the promise in Is. ix. 7 (6 in the Hsb. Bibh.) and elsewhere. A. C. H.

ACHIOR (אָCarthy : Achar, the brother of light; comp. Num. xxxvii. 27: Achior: conformed with Ἀκίας, Tob. xi. 18), a general of the Ammonites in the army of Holofernes, who is afterwards represented as becoming a proselyte to Judaism (Jud. v. vi., xiv.). B. F. W.

Achish (אָCarthy : Achez: [Alex. in 1 K. Ἀκίας: Comp. Ἀχίας, in 1 K. Ἀχίας: Acheis), a Philistine king at Gath, son of Mnaoch, who in the title to the 34th Psalm is called Abimelech (possibly corrupted from Ἰσσύ Ἐφραί). David twice found a refuge with him when he fled from Saul. On the first occasion, being recognized by the servants of Achish as one celebrated for his victories over the Philistines, he was alarmed for his safety, and feigned madness (1 Sam. xxi. 10-13). [DAVID.] From Achish he fled to the cave of Adullam. On the second occasion, David fled to Abimelech with 600 men (1 Sam. xxvii. ii.), and remained at Gath a year and four months. Whether the Achish [son of Maachah] to whom Shimei went in disobedience to the commands of Solomon (1 K. ii. [89] 40), be the same person is uncertain. R. W. B.

In the title of the 34th Psalm, Abimelech (which see) may be the royal title, and Achish in the history the personal name, as Hengstenberg, De Wette, Lengerke remark. Fürst (Handb. s. v.) regards Achish as Philistine and probably = serpent-charmer. The name occurs also 1 Sam. xxix. 3-12, xvii. 1, xxix. 2-9. H.

ACHITOB (אָCarthy : Achitob). Ahiotus, the high-priest (1 Esdr. viii. 2; 2 Esdr. i. 1), in the genealogy of Esdras. W. A. W.

ACHITOF [Echatax.] ACHOR, VALLEY OF, (אָCarthy : אִיךְ : Achor), valley of trouble, according to the etymology of the text; the spot at which Acham, the "trouble maker of Israel," was stoned (Josh. vii. 24, 29). On the N. boundary of Judah (xxv. 7; also Is. xix. 10; Hos. ii. 15). It was known in the time of Jerome (Onom. s. v.), who describes it as north of Jericho; but this is at variance with the course of the boundary in Joshua (Kell's Joshua, p. 131).

G.

No trace of the name is found any longer. Yet Achor "was stoned at all events near Gilgal and the West-Jordan heights " (Knoch, Joscr. p. 118). It is a valley "that runs up from Gilgal toward Bethel" (Thomson's Land and Book, ii. 185). The prophet's allusion in Hos. ii. 15 is not so much to the place as to the meaning of the name. "And I will give her . . . . the valley of Achor for a door of hope," i. e. through "trouble," through affliction and discipline, God will prepare His people for greater blessings than they would otherwise be fitted to bestow on them.

ACHSAH (אָCarthy : Acsah: Alex. Ἀκσάς; [Comp. Οὐάδ] Acsa). Daughter of Caleb, or Chelaibai, the son of Hezron (1 Chr. ii. 49)." Caleb.

ACHSAH (אָCarthy : Acsah)." Comp. in Josh., Ἀκσάς: Acsa), daughter of Caleb, the son of Jephunneh, the Kenazite. Her father promised her in marriage to whoever should take Debir, the ancient name of which (according to the analogy of KIRJAT-t-AHIA, the ancient name of Hebron) was Krigath-Hebrom (or as in Josh. xxv. 14), the city of the book. Othniel, her father's younger brother, took the city, and according received the hand of Achsa as his reward. Caleb at his daughter's request added to her dowry the upper and lower springs, which she had pleaded for as peculiarly suitable to her inheritance in a south country (Josh. xv. 15-19). See

A. Achsa is merely an incorrect form which in modern editions of A. V. has been substituted for Acksah, the reading of the first and other early editions. A.
ACHSHAPH

Stanley’s S. of P. p. 161). [GULLOTT.] The story is repeated in Judg. i. 11-15. Acsah is mentioned again, as being the daughter of Caleb, in 1 Chr. ii. 43. But there is much confusion in the genealogy of Caleb there given. [ACHUSA; CALER.]

A.C.H.

ACTS OF THE APOSTLES

will not stand the test of searching inquiry. They will be found enumerated in Davidson’s Introd. to the N. T. vol. ii., and Alford’s prolegomena to vol. ii. of his edition of the Greek Testament. It must be confessed to be, at first sight, somewhat surprising that notices of the author are so entirely wanting, not only in the book itself, but also, generally, in the Epistles of St. Paul, whom he must have accompanied for some years on his travels. But our surprise is removed when we notice the habit of the Apostle with regard to mentioning his companions to have been very various and uncertain, and remember that no Epistles were, strictly speaking, written by him while our writer was in his company, before his Roman imprisonment; for he does not seem to have joined him at Corinth (Acts xxi.), where the two Epps. to the Thess., were written, nor to have been with him at Ephesus, ch. xiii., whence, perhaps, the Epp. to the Gal. was written; nor again to have wintered with him at Corinth, ch. xx. 3, at the time of his writing the Epp. to the Rom. and, perhaps, that to the Gal.

The book commences with an inscription to one Theophilus, who, from bearing the appellation ἐπισκόπος, was probably a man of birth and station. But its design must not be supposed to be limited to the edification of Theophilus, whose name prefixed only, as was customary then as now, by way of dedication. The readers were evidently intended to be the members of the Christian Church, whether Jews or Gentiles; for its contents are such as are of the utmost consequence to the whole church. They are The fulfillment of the promise of the Father by the descent of the Holy Spirit, and the beginning of those continuing, by the dispersion of the Gospel among Jews and Gentiles. Under these leading heads all the personal and subordinate details may be ranged. Immediately after the Ascension, St. Peter, the first of the Twelve, designated by our Lord as the Rock on whom the Church was to be built, the holder of the keys of the kingdom, becomes the prime actor under God in the founding of the Church. He is the centre of the first great group of savings and doings, as the opening of the door to the Christian Church for Jews and Gentiles (ch. x.), is his office, and by him, in good time, is accomplished. But none of the existing twelve Apostles were, humanly speaking, fitted to preach the Gospel to the cultivated Gentile world. To be by divine grace the spiritual conqueror of Asia and Europe, God raised up an other instrument, from among the highly-educated and zealous Pharisees. The preparation of Saul of Tarsus for the work to be done, the progress, in his hand, of that work, his journeys, preachings, and perils, his stripes and imprisonments, his testifying in Jerusalem and being brought to testify in Rome,—these are the subjects of the latter half of the book, of which the great central figure is the Apostle Paul.

Any view which attributes to the writer as his chief design some collateral purpose which is supposed by the book, as it stands, or, indeed, any purpose beyond that of writing a faithful history of such facts as seem important in the spread of the Gospel, is now generally and very properly treated as erroneous. Such a view has become celebrated in modern times, as held by Baur;—that the purpose of the writer was to compare the two great Apostles, to show that St. Paul did not depart from the principles which regulated St. Peter, and to extol him at every opportunity by comparison with St. Peter.
The reader need hardly be reminded how little any such purpose is borne out by the contents of the book itself; naq, how naturally they would follow their present sequence, without any such thought having been in the writer's mind. Doubtless many ends are answered and many results brought out by the book as its narrative proceeds: as e. g. the rejection of the Gospel by the Jewish people everywhere, and its gradual transference to the Gentiles; and others which might be easily gathered up, and made by ingenious hypothesizers, such as Baur, to appear as if the writer were bent on each one in its turn as the chief object of his work.

As to the time and place at which the book was written, we are left to gather them entirely from indirect notices. It seems most probable that the place of writing was Rome, and the time about two years from the date of St. Paul's arrival there, as related in ch. xxviii., sub fin. Had any considerable alternation in the Apostles' circumstances taken place before the publication, there can be no reason why it should not have been noticed. And on other accounts also, this time was by far the most likely for the publication of the book.

The arrival in Rome was an important period in the Apostles' life; the quiet which succeeded it seemed to promise no immediate determination of his cause. A large amount of historic material had been collected in Judea, and during the various missionary journeys; or, taking another and not less probable view, Nero was beginning to undergo that change for the worse which disgraced the latter portion of his reign: none could tell how soon the whole outward repose of Roman society might be shaken, and the tacit toleration which the Apostles enjoyed, might be exchanged for bitter persecution. If such terrors were imminent, there would surely be in the Roman Church prophets and teachers who might tell them of the storm which was gathering, and warn them that the records lying ready for publication must be given to the faithful before its outbreak or event.

Such a priori considerations would, it is true, weigh but little against presumptive evidence furnished by the book itself; but arriving there as the result of such evidence, they carry some weight, when we find that the time naturally and fairly indicated in the book itself for its publication is that of one of all others when we should conceive that publication most likely.

This would give us for the publication the year 63 A. D., according to the most probable assignment of the date of the arrival of St. Paul at Rome.

The genuineness of the Acts of the Apostles has ever been recognized in the Church. It is mentioned by Eusebius (H. E. iii. 25) among the διαλογογουμενα θεω γραπαι. It is first directly quoted in the epistle of the churches of Lyons and Vienne to those of Asia and Phrygia (A. D. 177); then repeatedly and expressly by Irenaeus, Clement of Alexandria, Tertullian, and so onwards. It was rejected by the Marcionites (cent. iii.) and Manicheans (cent. iv.) as contradicting some of their notions of the history of the church; but still others have attempted to throw discredit on it, and fix its publication in the second century, mainly by assuming the hypothesis impugned above, that it is an apology for St. Paul. But the view has found no favor, and would, ere this, have been forgotten, had it not been for the ability and subtlety of its chief supporter.

The text of the Acts of the Apostles is very full of various readings; more so than any other book of the N. T. To this several reasons may have contributed. In the many backward references to Gospel history, and the many anticipations of statements and expressions occurring in the Epistles, temptations abounded for a corrector to try his hand at assimilating, and, as he thought, reorganizing the various accounts. In places where a chronological order or usage was in question, insertions or omissions were made to suit the habits and views of the Church in aftertimes. Where the narrative simply related facts, any act or word apparently unworthy of the apostolic age was modified for the sake of decorum. Where St. Paul repeats to different audiences, or the writer himself narrates the details of his miraculous conversion, the one passage was pieced from the other, so as to produce verbal accordance. There are in this book an unusual number of those remarkable interpolations of considerable length, which are found in the Codex Beza (D) and its cognates. A critique of some emendations, Bornemann, believes that the text of the Acts originally contained them all, and has been abbreviated by correctors; and he has published an edition in which they are inserted in full. But, while some of them bear an appearance of genuineness (as e. g. that in ch. xii. 10, where, after εξελθόντες, is added κατατέθησαν τοις έτταθαθούν, καὶ) the greater part are unmeaning and absurd (e. g. that in ch. xvi. 39, where we read after εξελθείν, εις είποντες, Ηροσθεμάους τά καθών δι’ οτε δέπε δεικνοι καὶ εξεγάγωντες περικέλασαν αυτούς λέγοντες Εκ τις πόλεως ταύτης εξελθοντες μήποτε πάλιν συντράφωμεν ήμις επιπρόκειτον καθω διάων). The new remarkable exegetical works and monographs on the Acts, besides commentaries on the whole N. T. [Alford, Wordsworth, De Wette, Meyer, Lechler in Lange's Bibelwerk], are Baugarten, Apostelgeschichte, oder der Entwicklungsgang der Kirche von Jerusalem bis Rom, Halle, 1852 [2d ed. 1859, Eng. trans. Edibn. 1854; Zeller, Die Apostelgeschichte nach ihrem Inhalt u. Ursprung krit. untersucht, Stuttgart, 1854, first pub. in the Zeitschr. für Theol. Wiss. u. Krit. 1849-51; and] Lehmann, Die Compositions- und Entstehung der Apostelgeschichte von Neuem untersucht, Gotha, 1854.

The former of these works is a very complete treatise on the Christian-historical development of the Church as related in the book: the latter is of more value as a critical examination of the various theories as to its composition and authorship. [Zeller's is the ablest attack on its genuineness and authenticity.]

ACTS OF THE APOSTLES

Some additional remarks will be need to be made upon the theory of the Tubingen school respecting the authorship of the book of Acts. This theory proceeds upon the assumption that Peter and the rest of the original disciples of Christ were Judaizers; i. e., that they insisted upon the circumcision of the Gentile converts to Christianity, as an indispensable condition of fellowship. Consequently, according to Dr. Baarr, Peter and Paul and the two branches of the church of which they were respectively the leaders were placed in a relation of hostility to one another. After the death of these Apostles, various attempts were made to produce a reconciliation between the opposing parties. The book of Acts, it is claimed, is the product of one of these irremedial or compromising efforts. A Pauline Christian in the earlier part of the second century composes a half-fictional history, with the design to present Paul in a favorable light to the Judaizing and Peter in an equally favorable light to the adherents of Paul. Paul is represented as hav- ing circumcised Timothy, and as having in other points conformed to the Judaizing principles; whilst Peter, on the other hand, in the affair of Cornelius and on other occasions, and the Jerusalem Church (in the narrative of Apostolic convention, for example), are made out to agree almost with the tenets of Paul. One feature of Dr. Baarr's system was the rejection of the genuineness of all the Pauline Epistles, save the two Epistles to the Corinthians, the Epistle to the Romans and that to the Galatians. The following remarks form the heads of a conclusive argument against the Tubingen theory.

1. Paul's general style of reference to the other Apostles, in the Epistles acknowledged to be genuine, is inconsistent with that theory. He and the other Apostles, and are parties of common affiliations. See 1 Cor. iv. 9 sqq., 1 Cor. xv. 5 sqq. In the last passage (ver. 9) he styles himself "the least of the Apostles." When both Epistles were written, he was engaged in collecting contribution for "the saints" at Jerusalem. The last two chapters of the Epistle to the Romans, which show the friendship of Paul for the Jewish Christians, are, on quite insufficient grounds, de-
ACUA

AW are declared to be "many thousands" (μεταχειρίζεται). See also Paul's denunciation of the Jews, Acts xxvii. 25 seq.

The historical discrepancies which the critics find in Acts are such as, if they were made out to exist, prove no "tendency" or partisan purpose in the work, but only show that the author, like other credible historians, is not free from inaccuracies. The speeches are doubtless given or reproduced in the language of Luke himself. Their historical credibility is shown by Tholuck (Theol. Studien u. Kritiken, 1839, II.

In the defence of the Tübinger hypothesis, see Baur, Die Christentum u. die christliche Kirche der drei ersten Jahrhunderte, 2d Ausg., 1860: also, his Prælus; and Zeller, Die Apostelgeschichte. From this hypothesis, see Eduard Lekelous, Die Composition u. Entwicklung der Apostelgeschichte, 1884; Professor Hackett, Commentary on the Acts, revised ed. 1880 (both in the introduction and in the excisions of the passages pertaining to the controversy); Meyer, Apostelgeschichte: Lightfoot, Ep. to the Galatians, Camb. Diss. iii. St. Paul and the Thieves, pp. 276-346; and Fisher's Essays on the Supernatural Origin of Christianity, New York, 1865.

AD'ADAH (אָדָדָה [festal]; Ἀδοτά). [Ald. Comp. Ald. Ἀδαθά; Ἀδάθα], one of the cities in the extreme south of Judah named with Dinannah and Kedesh (Josh. xv. 22). It is not mentioned in the Onomasticon of Eusebius, nor has any trace of it been yet discovered.

AD'ADAH (אָדָדָה; ornament, beauty; 'Ađádá: 'Ađá). 1. The first of the two wives of Lamech, fifth in descent from Cain, by whom were born to him Jabal and Jubal (Gen. iv. 19, [20, 21]).

2. A Hittite, daughter of Ethon, one (probably the first) of the three wives of Esau, mother of his first-born son Eliphaz, and so the ancestress of six (or seven) of the tribes of the Edomites (Gen. xxxvi. 2, [4], 10 ff. 1.5 ff.). In Gen. xxxvi. 34, she is called BASHEMATH.

W. F. G.

AD'ATAH [3 syll.] (אָדָת [whom Jehovah adorns]; 'Eḏētā; [Vat. Ǝd̂ētā; Ǝd̂ētā: Ǝd̂ētā; Ἀδατά]. 1. The maternal grandfather of King Josiah, and native of Boscath in the lowlands of Judah (2 K. xxii. 1).

2. (A'dāţā; [Vat. A'ētā; Alex. Ἀδατά: Ἀδατά], a Levite, of the Gershonite branch, and ancestor of Asaph (1 Chr. vi. 41). In ver. 21 he is called DADūN.

3. (A'dāţā; [Vat. A'ētā; Alex. Ἀδατά: Ἀδατά], a Benjamite, son of Shimhi (1 Chr. viii. 21), who is apparently the same as She'ma in ver. 13.

4. (Alex. Ἀδατάς, ᾿Αδάτας; Ἀδάτας, Ἀδάτα), a priest, son of Jeroham (1 Chr. ix. 12; Neh. xi. 21), who returned with 242 of his brethren from Babylon (1 Chr. xii. 40).

5. (A'dāţā; Ἀδατά). One of the descendants of Band, who had married a foreign wife after the return from Babylon (Ezr. x. 29). He is called 1 EDELA in 1 Esdr. i. 30.

6. (A'dāţā; Alex. Ἀδάτας; FA. Ἀδατάς, Ἀδάτας). The descendant of another Bani, who had also taken a foreign wife (Ezr. x. 39).

7. (Alex. A'dāţā; [Vat.] FA. Ἀδατάς; Ἀδατάς). A man of Judah of the line of Pharez (Neh. xi. 5).

8. (A'dāţā; [Vat. 'Aētā; 2. m. ᾿Αδάτας; Alex. ᾿Αδατάς: Ἀδατάς). Ancestor of Maselah, one of the captains who supported Jehoiada (2 Chr. xxiii. 1).

W. A. W.

AD'A' LA (אָדָלָה; ᾿Αδαλά; [Vat. Ἀδαλᾶ; Bâr. Alex. FA. Bârê; Comp. ᾿Αδαλά; Ὁδαλά], a son of Hanan (Esth. ix. 8).

* He was massacred by the Jews, together with nine other sons of Hanan, in the palace of the Persian king at Shushan, on Hanan's downfall and the elevation of Mordecai to his place as chief minister of state (Esth. ix. 6-10). The name is Persian, though the father was probably an Amalekite.

H.

AD' ĀM (אָדָם; Ἀδάμ), the name which is given in Scripture to the first man. The term apparently has reference to the ground from which he was formed, which is called ADA'NAT (אָדָנָת Gen. ii. 7). The idea of redness of color seems to be inherent in either word. (Cf. AD'NAT, Lam. iv. 7; ᾿Αδανάς, Rev. xii. 3, 14: Edon, Gen. xxxv. 30; בּדנָת, a ruby; Arab. ٍمُذل, coloquus fuscus, ruber luteus, etc.). The generic term Adan, man, becomes, in the case of the first man, a denominative. Supposing the Hebrew language to represent accurately the primary idea connected with the formation of man, it would seem that the appellation bestowed by God was given to keep alive in Adan the memory of his earthly and mortal nature; whereas the name by which he preferred to designate himself was Ish, 'a man of substance or worth, Gen. ii. 23.

The creation of man was the work of the sixth day. His formation was the ultimate object of the Creator. It was with reference to him that all things were designed. He was to be the "roof and crown" of the whole fabric of the world. In the first nine chapters of Genesis there appear to be three distinct histories relating more or less to the life of Adam. The first extends from Gen. i. 1 to ii. 3, the second from ii. 4 to iv. 26, the third from i. 1 to the end of ix. The word at the commencement of the two latter narratives, which is rendered there and elsewhere generations, may also be rendered history. The style of the second of these records differs very considerably from that of the first. In the first the Deity is designated by the word Elohîn; in the second He is generally spoken of as Elohîm. The object of the first of these narratives is to record the creation; that of the second to give an account of paradise, the original sin of man and the immediate posterity of Adam; the third contains mainly the history of Noah, referring, it would seem, to Adan and his descendants, principally in relation to that patriarch.

The Mosaic accounts furnish us with very few materials from which to form any adequate conception of the first man. He is said to have been created in the image and likeness of God, and this
ADAM

is commonly interpreted to mean some super-excellant and divine condition which was lost at the Fall: apparently, however, without sufficient reason, as the continuance of this condition is implied in the time of Noah, subsequent to the flood (Gen. ix. 6), and is asserted as a fact by St. James (iii. 9), and by St. Paul (1 Cor. xi. 7). It probably points to the Divine pattern and archetype after which man's intelligent nature was fashioned; reason, understanding, imagination, volition, &c. being attributes of God; and man alone of the animals of the earth being possessed of a spiritual nature which resembled God's nature. Man, in short, was a spirit created to reflect God's righteousness and truth and love, and capable of holding direct intercourse and communion with Him. As long as his will moved in harmony with God's will, he fulfilled the purpose of his creator. When he refused submission to God, he broke the law of his existence and fell, introducing confusion and disorder into the economy of his nature. As much as this we may learn from what St. Paul says of "the new man being renewed in knowledge after the image of Him that created him" (Col. iii. 10), the restoration to such a condition being the very work of the Holy Spirit of God. The name Adam was not confined to the father of the human race, but like house was applicable to evemus as well as meta, so that we find it is said in (Gen. 1, 2, 3) "This is the book of the history of Adam in the day that God created Adam in the likeness of God made Him, male and female created He them, and called their name Adam in the day when they were created."

The man Adam was placed in a garden which the Lord God had planted "eastward in Eden," for the purpose of dressing it and keeping it. It is of course hopeless to attempt to identify the situation of Eden with that of any district familiar to modern geography. There seems good ground for supposing it to have been an actual locality. It was probably near the source of a river which subsequently divided into four streams. These are mentioned by name: Pison is supposed by some to be the Indus, Gihon is taken for the Nile, Hiddekel is called by the LXX. here, and at Dan. x. 4, Tigris, and the fourth is Euphrates; but hose they should have been originally united is unim-possible. Adam was permitted to eat of the fruit of every tree in the garden but one, which was called "the tree of the knowledge of good and evil." What this was it is also impossible to say. Its name would seem to indicate that it had the power of bestowing the consciousness of the difference between good and evil; in the ignorance of which man's innocence and happiness consisted. The prohibition to taste the fruit of this tree was enforced by the menace of death. There was also another tree which was called "the tree of life." Some suppose it to have acted as a kind of medicine, and that by the continued use of it one's parents, not created immortal, were preserved from death. (Mpp. Whately.) While Adam was in the garden of Eden the beasts of the field and the fowls of the air were brought to him to be named, and whatever he called every living creature that was the name thereof. Thus the power of "my designating objects of sense was possessed by the mind only." (Burckhardt) which is generally considered as indicating nature and extensive intellectual resources. Upon the failure of a companion suitable for Adam among the creatures thus brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which He fashioned into a woman and brought her to the man. Prof. S. Lee supposed the account of the creation of Eve to have been revealed to Adam in his deep sleep (Lee's Job, Introd. p. 16). This is agreeable with the analogy of similar passages, as Ax. x. 10, xi. 5, xxii. 17. At this time they are both described as being naked without the consciousness of shame.

Such is the Scripture account of Adam prior to the Fall. There is no narrative of any condition superhuman or contrary to the ordinary laws of humanity. The first man is a true man, with the powers of a man and the innocence of a child. He is moreover spoken of by St. Paul as being "the figure, τύπος, of Him that was to come," the second Adam, Christ Jesus (Rom. v. 14). His human excellence, therefore, cannot have been superior to that of the Son of Mary, who was Himself the Pattern and Perfect Man. By the sublity of the serpent, the woman who was given to be with Adam, was beguiled into a violation of one command which had been imposed upon them. She took of the fruit of the forbidden tree and gave it to her husband. The propriety of its name was immediately shown in the results which followed: self-consciousness was the first fruits of sin; their eyes were opened and they knew that they were naked. The subsequent conduct of Adam would seem to militate against the notion that he was in himself the perfection of moral excellence. His cowardly attempt to clear himself by the inculcation of his helpless wife bears no marks of a high moral nature even though fallen; it was conduct unworthy of his sons, and such as many of them would have scorned to adopt. Though the curse of Adam's rebellion of necessity fell upon him, yet the very prohibition to eat of the tree of life after his transgression, was probably a manifestation of Divine mercy, because the greatest malignant of all would have been to have the gift of indestructible life superadded to a state of wretchedness and sin. When moreover we find in Prov. iii. 18, that wisdom is declared to be a tree of life to them that lay hold upon her, and in Rev. ii. 7, xii. 14, that the same expression is applied to the grace of Christ, we are led to conclude that this was merely a temporary prohibition imposed till the Gospel dispensation should be brought in. Upon this supposition the good condition of Christians now is as favorable as that of Adam before the Fall, and their spiritual state the same, with the

a. For an analysis of this first sin of the race, the nature of the temptation, and its effects on the mind and spirit of Adam, the student will find Auerler's remarks instructive (Die wissenschaftliche Offenbarung, i. 154 ff., translated in the Bibl. Sacra, xxii. 439 6). H.

b. The better view of interpreters is that Adam meant to cast the blame of his sin not so much on Eve as on his Maker for having given to a woman whom example had led him into transgression. And in that disposition certainly he manifested only a trait of human character that has ever distinguished his descendants, namely, a proneness to find the cause of sin not in their own hearts, but in God's relations to them, having ordained the circumstances in which they act, and given to them the moral nature which they possess. In that remembrance of the Apostle James (vi. 13-15) against this self-exculpatory spirit, "Let no man say when he is tempted, I am tempted of God," he has but rest again the echo of Adam's defence in the garden, "The woman whom thou gavest to be with me" (Gen. iii. 12). H.
ADAM

single exception of the consciousness of sin and the knowledge of good and evil.

Till a recent period it has been generally believed that the Scriptural narrative supposes the whole human race to have sprung from one pair. It is maintained that the O. T. assumes it in the reason assigned for the name which Adam gave his wife after the Fall, namely, Eve, or Chavvah, i. e. a living woman, "because she was the mother of all living;" and that St. Paul assumes it in his sermon at Athens when he declares that God hath made one blood all nations of men: and in the Epistle to the Romans, and first Epistle to the Corinthians, when he opposes Christ as the representative of redeemed humanity, to Adam as the representative of natural, fallen, and sinful humanity. But the full consideration of this important subject will come more appropriately under the article MAX.

In the middle ages discussions were raised as to the period which Adam remained in Paradise in a sinless state. To these Bantu refers in the Paradise, xxvi. 130—142—

"Nel monte, che si leva più dall'onda,
Fu' io, con vita pura e disonesta,
Dalla prim' ona quell' età seconda,
Come il Sol muta quadra, all' ona sesta."

I ante therefore did not suppose Adam to have been more than seven hours in the earthly paradise. Adam is stated to have lived 930 years: so it would seem that the death which resulted from his sin was the spiritual death of alienation from God. "In the day that thou estest thereof thou shalt surely die:" and accordingly we find that this spiritual death began to work immediately. The sons of Adam mentioned in Scripture are Cain, Abel and Seth. It is implied, however, that he had others.

ADAM (אָדָם) = earth: a [Comp. Abd. 'Ad-]
Adom], a city on the Jordan "beside (גָּוֹר) "Zarthan," in the time of Joshua (Josh. iii. 16). It is not elsewhere mentioned, nor is there any reference to it in Josephus. The LXX. (E. MS.) [both in the Iom. ed. and the Alex. MS.] has χάρμος Καραθαυρίου [Var. Καραθωρίου], a curious variation, in which it has been suggested (Stanley, S. v. P. App. § 80, note) that a trace of Adam appears in αρμ, D being changed to K according to the frequent custom of the LXX.

Note.—The A. V. here follows the Keri, which for אדָם = "by Adam," the reading in the Hebrew text or Chetib, has דָּם = "from Adam," an alteration which is a questionable improvement (Keil, p. 51). The accurate rendering of the text is "rose up upon a heap, very far off, by Adam, the city that is beside Zarthan" (Stanley, S. v. P. p. 304, note).

ADAMAH (אֲדָם) = earth: "Armuid;" [Alex. Comp. Abd. 'Adom;] "Edom," one of the "southern cities" of Nahashil, named between Chinnereth and the Ramah (Josh. xix. 36). It was probably situated to the N. W. of the Sea of Galilee, but no trace of it has yet been discovered.

ADAMANT (דָּמוֹן) = Shemor, שֵׁמֶור: דָּמוֹנְתָּו.

Can the place have derived its name from the "fat ground" (אֶדְמָנְתָּו) which was in this very neighborhood — "between Succoth and Zarthan" (J. K. vii. 49)?

adomas). The word Shemor occurs as a common noun eleven times in the O. T. In eight of these passages it evidently stands for some prickly plant, and accordingly it is rendered "lieris" by the A. V. In the three remaining passages (Jer. xvii. 1; Ez. iii. 9; Zech. vii. 12) it is the representative of some stone of excessive hardness, and is used in each of these last instances metaphorically. In Jer. xvii. 1, Shemor = "diamond" in the text of the A. V. "The sin of Judah is written with a pen of iron and with the point of a diamond," i. e. the people's idolatry is indelibly fixed in their affections, engraved as it were on the tablets of their hearts. In Ez. iii. 9, Shemor = "adaman." "As an adaman harder than flint have I made thy forehead, fear them not." Here the word is intended to signify that firmness of purpose with which the prophet should resist the sin of the rebellious house of Israel. In Zech. vii. 12, the Hebrew word = "adaman-stone" — "Yea, they made their hearts as an adaman-stone, lest they should hear the law," — and is used to express the hardness of the hearts of the Jews in resisting truth.

The LXX. afford us but little clue whereby to identify the mineral here spoken of, for in Ez. iii. 9 and in Zech. vii. 12 they have not rendered the Hebrew word at all, while the whole passage in Jer. xvii. 1-5 is altogether omitted in the Vatican MS.; the Alexandrine MS. however has the passage, and reads, with the versions of Aquila, Theodotion, and Symmachus, "with a nail of adaman." "Adaman" occurs in the Apocalypse, in Ecleus. xvi. 16.

Our English "Adaman" is derived from the Greek, αδάμαντος, and signifies "the unconquerable," in allusion, perhaps, to the hard nature of the substance, or, according to 1 Thess. (xxvii. 13), because it was supposed to be intractable by fire. The Greek writers generally apply the word to some very hard metal, perhaps steel, though they do also use it for a mineral. 1 Thess. in the chapter referred to above, enumerates six varieties of Adamos. Dana (Syst. Mineral. art. Diamond) says that the word "Adamas was applied by the ancients to several minerals differing much in their physical properties. A few of these are quartz, specularium from ore, emery, and other substances of rather high degrees of hardness, which cannot now be identified." Nor does the English language attach any one definite meaning to Adaman; sometimes indeed we understand the diamond by it, but it is often used vaguely to express any substance of im-
ADAMANT

penetrable hardness. Chaucer, Bacon, Shakespeare, use it in some instances for the |ebestone. In modern mineralogy the simple term Adament has no technical signification, but Adamantine Spat |is a mineral well known, and is closely allied to that |which we have good reason for identifying with the |Shamir or Adament of the Bible.

That some hard cutting stone is intended can be shown from the passage in Jeremih quoted above. Moreover the Hebrew root שָׁמִיָּר |b (Shamir, "to cut," "to pierce"), from which the word is derived, reveals the nature of the stone, the sharpness of |which, moreover, is proved by the identity of the |original word with a breve or thorn. Now since, in |the opinion of those who have given much atten- |tion to the subject, the Hebrews appear to have |been acquainted with the true diamond, it is |very probable, from the expression in Ez. iii. 9, of |"an adamanth breve than that," that by Shamir |is intended some variety of Corundum, a mineral |interior only to the diamond in hardness. Of this |mineral there are two principal groups; one is crys- |talline, the other granular; to the crystalline va- |rieties belong the indigo-blue sapphire, the red |oriental ruby, the yellow oriental spair, the green |oriental emerald, the violet oriental amethyst, the |brown adamanth spar. But it is to the granular |or massive variety that the Shamir may with most |probability be assigned. This is the modern Emery, |extensively used in the arts for polishing and cutting |gems and other hard substances; it is found in |Saxony, Italy, Asia Minor, the East Indies, &c., |and occurs in boulders or nodules in mica slate, |in talcose rock, or in granular limestone, associated |with oxide of iron; the color is smoky-gray or |blackish-gray; fracture imperfect. The best kinds |are those which have a blue tint; but many sub- |stances now sold under the name of emery contain |no corundum. The Greek name for the emery is |Σιζορίς or Σιρίς, and the Hebrew lexic- |graphers derive this word from the Hebrew שָׁמִיר. |There seems to be no doubt whatever that the two |words are identical, and that by Adament we are |to understand the emery-stone, or the uncrystal- |line variety of the Corundum.

The word Shamir occurs in the O.T. three |times as a proper name—once as the name of a |man (I Chr. xxiv. 24), and twice as the name of |a town. The name of the town may have reference |to the rocky nature of the situation, or to breics |and thorns abundant in the neighborhood. |W. I.

AD'AMIM (אַדָּם יִם [human], human, or |Adamite) "Adam" [Alex. Abd. Appa]: Comp., "Ada- |mik." A place on the border of Naphtali, |named after Alon Bezemannim (Josh. xix. 32). |By some it is taken in connection with the next |name, ham-Nebok, but see Israk, p. 545. In |the post-biblical times Adami bore the name of |Damai.

AD'AR (accurately Addar, אָדָר [height]: |Σάραμας [Alex. Abd. Comp. Ada/ama]: Addar), |a place on the south boundary of Palestine and of |Judah (Josh. xv. 3) which in the parallel list is |called HAZAR-ADDAR.

AD'AR [Mel. [Months].]

AD'ASA (אָדָסָה, I.XX.: τὰ Ἀδάσα, Jos.: |Aders, Adder). A place in Judah, a day's journey |from Gaza, and 30 stadia from Bethhoron (Jos. |Ant. xii. 10, § 5). Here Judas Macabæus encamped |before the battle in which Nicanor was |killed. Nicanor having pitched at Bethhoron (1 |Macc. iv. 49, 46). In the Omission it is men- |tioned as near Gupmus [the Roman Gaphna |and present Jaffa], 2 miles north-west of |Bethel. See ORTHES.

AD'BEEL (אָדָבֶאֵל [salt]: Na'bab): [in 1 Chr. |Vat. Na'abana]: Comp., "AdoBâhâh": Adol: |'Adôbâhâ, Joseph; "perhaps_miracle |or show of God," from מירכ אל, miracle," Gesen. s. r.) a |son of Islamut (Gen. xxv. 13; 1 Chr. i. 29), |and probably the progenitor of an Arab tribe. |No satisfactory identification of this name with that of |any people or place mentioned by the Greek geog- |raphers, or by the Arabs themselves, has yet been |discovered. The latter have lost most of the names |of Islamut's descendants between that patriarch |and Adam (who is said to be of the 21st genera- |tion before Mohammad), and this could scarcely |have been the case if tribes, or places named after |them, existed in the times of Arabian historians |or relaters of traditions: it is therefore unlikely that |statements are correct: the one refers to the powder, |the other to the stone. The German Schmirtl, or |Schmarotl, is evidently alluded to the Hebrew or |greek words. Bdden considers the Hebrew word to be of |Indian origin, comparing asmara, a stone which eats |away iron. Doubtless all these words have a common |origin.

This is probably the same stone which Herodotus |vii. 42 [49] says the Egyptians in the army of Xenex |used instead of iron to point their arrows with, |and by means of which they engraved seals.

b In the Keri. The Uebrith has "זע' ימ": Schmar |It will be enough merely to allude to the Rabbin|cal cabal false about Solomon, the Hoph, and the |wares Schmir. See Böttcher's Herzoguon, vol. iii. p. 812, |ed. Rosenmuller, and Buttoft, Lex. Talmai, col. 244.
ADDAN (ｱﾙｻ, LXX.; 'Ałaa, Vat. Alia, Alex. Aāa); Apoc. 1 Esdr. A'dar, Vulg.), one of the places from which some of the captivity returned with Zerubbabel to Judea who could not show their pedigree as Israelites (Esdr. ii. 30). In the parallel lists of Nehemiah (vii. 61) and Esdras the name is Addon and Aalar.

G.

*Perhaps the name Aalar in 1 Esdr. v. 36 corresponds to Immer in Ezra and Nehemiah. It appears in Esdras as the name of a man. See Charaxathalaah.

ADDAR (ｱﾙｻ : 'Aši; Vat. Āāa; Alex. Aīā); Comp. 'Aādār (Ādār), son of Beh (1 Chr. viii. 3), called Ār̄d in Num. xxvi. 40.

ADDER. This word in the text of the A. V. is the representative of four distinct Hebrew names, mentioned below. It occurs in Gen. xlhi. 17 (margin, arros-snake); Ps. viii. 4 (margin, agup); xcl. 13 (margin, asp); Prov. xxii. 32 (margin, cockatrice); and in Is. xi. 8, xiv. 29, lx. 5, the margin has adder, where the text has cockatrice. Our English word adder is used for any poisonous snake, and is applied in this general sense by the translators of the A. V. But they use in a similar way the synonymous term assp.

1. Acrhis (Ἀκρίτης: arabis: aspis) is found only in Ps. cxli. 3: "They have sharpened their tongues like a serpent, adder's poison is under their lips." The latter half of this verse is quoted by St. Paul from the LXX. in Rom. iii. 13. The poison of venomous serpents is often employed by the sacred writers in a figurative sense to express the evil tempters of ungodly men—that malignity which, as Bishop Horne says, is "the venom and poison of the intellectual world" (comp. Deut. xxxii. 33; Job xx. 14, 16). It is not possible to say with any degree of certainty what particular species of serpent is intended by the Hebrew word; the ancient versions do not help us at all, although nearly all agree in some kind of serpent, with the exception of the Chaldee paraphrase, which understands a spider by Acrhis, interpreting this Hebrew word by one of somewhat similar form. The etymology of the term is not ascertained with sufficient precision to enable us to refer the animal to any determinate species. Gene- nius derives it from two Hebrew roots, the combined meaning of which is "rolled in a spire and lying in ambush;" a description which would apply to almost any kind of serpent.

The number of poisonous serpents with which the Jews were acquainted was in all probability limited to some five or six species [Serpents], and as there are reasonable grounds for identifying Pethen and Shepophinon with two well known species, viz. the Egyptian Cobra and the Horned Viper, it is not improbable that the Acrhis may be represented by the Toxocin of Egypt and North Africa.

a Adder, in systematic zoology, is generally applied to those genera which form the family Viperidae: — Asp, to the Vipera Aspis of the Amph.

b אכרִית, Acrhis. The adder in the Bible, is usually applied to those genera which form the family Viperidae. It is generally said to be one of the most venomous of snakes, but this is not necessarily so.

At any rate it is unlikely that the Jews were unacquainted with this kind, which is common in Egypt and probably in Syria: the Echis arenicola, therefore, for such is this adder's scientific name, may be identified in name and reality with the animal signified by the Hebrew Acrhis.

Toxocin, of Egypt.

Colonel Hamilton Smith suggests that the Acrhis may be the puff or spool-adder of the Dutch colonists at the Cape of Good Hope, or that of Western Africa; but it has never been shown that the Echis species (Echis arenicola) or the W. African species (Chelota lateriterige), the only two hitherto known, are either of them inhabitants of a district so far north and east as Egypt.

2. Pethen (Pēthēn). [Ār̄d.]

3. Tsophon, or Vhiphoni (ㄒòpōn, ㄒòphōnī: e¢kōnā àpplidów, keparrès: regularus) occurs five times in the Hebrew Bible. In Prov. xxiii. 32 it is translated adder, and in the three passages of Isaiah quoted above, as well as in Jer. viii. 17, it is rendered cockatrice. The derivation of the word from a root which means "to hiss" does not help us at all to identify the animal. From Jeremiah we learn that it was of a hostile nature, and from the parallelism of Is. xi. 8, it appears that the Tsophoni was considered even more dreadful than the Pethen. Bochart, in his Hierozonion (iii. 182, ed. Rosenmüller), has endeavored to prove that the Tsophoni is the Basilisk of the Greeks (whence Jerome in Vulg. reads Regulus), which was then supposed to destroy life, burn up grass, and break stones by the pernicious influence of its breath (comp. Plin. H. N. viii. c. 33); but this is explaining an "ignotum per ignotius."

The whole story of the Basilisk is in vogue in fable, and it is in vain to attempt to discover the animal to which the ancients attributed such terrible power. It is curious to observe, however, that Forskål (Deser. Anim. p. 15) speaks of a kind of serpent (Coluber Bolivis) which is no doubt what he means when he says produces irritation on the spot touched by its breath; he is quoting, no doubt, the

c Thes. sub voc.: — موظ, retroversum ex fissir, and ｾﾒ, instilitus est. All Arab. kahera (impetum facere), vil etiam gusub (venenum) conferunt (Fist.).
ADDER

4. *Shekhiphon* (in Juxta Eusebii: ἐργαθευματος: cerastes t e) occurs only in Gen. xlix. 17, where it is used to characterize the tribe of Judah: "Dan shall be a serpent by the way, an adder in the path, that biteth the horse's heels, so that his rider shall fall backward." Various are the readings of the old versions in this passage: the Samaritan interprets *Shekhiphon* by "lying in wait;" the Targums of Jonathan, of Onkelos, and of Jersalem, with the Syriac, "a basilik." b The Arabic interpreters *Epeninus* [i. e. the anonymous version edited by *Erpenius*] and Sandias have "the horned snake;" and so the Vulg. *Cerastes*. The LXX., like the Samaritan, must have connected the Hebrew term with a word which expresses the idea of "sitting in ambush." The original word comes from a root which signifies "to prick," "pierce," or "bite." a

The habit of the *Shekhiphon*, alluded to in Jacob's prophecy, namely, that of lurking in the sand and biting at the horse's heels, suits the character of a well-known species of venomous snake, the celebrated horned viper, the asp of Cleopatra (*Cerastes [Cerastes] Heuglini*), which is found abundantly in the sandy deserts of Egypt, Syria, and Arabia. The Hebrew word *Shekhiphon* is no doubt identical with the Arabic *Sifim*. If the translation of this Arabic word by Gallus be compared with the description of the *Cerastes* in the British Museum, there will appear good reason for identifying the *Shekhiphon* of Genesis with the *Cerastes* of naturalists. "Sifim, serpents genus, heve, punctis nunculsique distinctum"—"a small kind of serpent marked with dots and spots" (Gallus, Arb. Lex. s. v.). *The Cerastes* (*Cerastes Heuglini*), brownish white with pale brown irregular unguent spots" (*Cot. of Snakes in Brit. M. pt. i. 29*). It is not pretended that the mere fact of these two animals being spotted affords sufficient ground, when taken alone, for asserting that they are identical, for many serpents have this character in common; but, when taken in connection with what has been adduced above, coupled with the fact that this spotted character belongs only to a very few kinds common in the localities in question, it does at least form strong presumptive evidence in favor of the identity of the *Shekhiphon* with the *Cerastes*. The name of *Cerastes* is derived from a curious hornlike process above each eye in the male, which gives it a formidable appearance. Bruce, in his *Travels in Abyssinia*, has given a very accurate and detailed account of these animals. He observes that he found them in greatest numbers in those parts which were frequented by the jerysa, and that it, the stomach of a *Cerastes* he discovered the remains of a jerysa. He kept two of these snakes in a glass vessel for two years without any food. Another circumstance mentioned by Bruce throws some light on the assertions of ancient authors as to the movement of this snake. *Elam* is Isidorus,

---

a The British of naturalists is a most forbidding-bogging yet harmless beast of the family *Ceradinae*, order *Sauria*. In using the term, therefore, care must be taken not to confound the mythical serpent with the veritable Saurian.

b "[is translated by] (Harman), preniciosus, from βέλος, "to destroy." *Ha R. Salom. Chaldeeum explicit, Onkelos autem redigit, Sacra seque Harman, quod est assim serpentis cyaussam, cuvo morsus est insalubris: is autem est basiliscus ὑπόθεσιν. (Orit. Sacri. i. 1114.)

c [This is not the rendering of the versions referred to, which have ὑπάτη ἐπισκέφος.] A)

d From ἐπαρεξία, punere, mordere, according to Furst and A. Schleiden; but Gesenius denies this meaning, and compares the Syr. " to gibe." " to creep."

"H καὶ ἁμαρτογερμή κατὰ σπίνην διδαχή αὐτής..." *Nieander, Thesaur. 233.*

f The female, however, is supposed sometimes to possess these horns. Hasselquist (*liner. pp. 241, 365*) has thus described them: "... Tienhuiha duo, utroque umbra ad laterum vertice, in margine superiore orbicul oblong, erecta, parte aversa paras umbram, cadentque parte parasum canaliculata, sub-dura, membra tenui vestiti, basi quadraturi minimis, una serie crenet, cineta, bravia, orbiculo ecuorum dimidia longitudine..."

With this description that of Geoffrey St. Hilaire may be compared: "Au dessus des yeux nait de chaque côté une petite éminence, comme on a une coutou-"
ADDI

Astius, all recorded of the Cerastes that, whereas other serpents creep along in a straight direction, this one and the Hemovorous a (no doubt the same animal under another name) move sideways, stumbling as it were on either side (and comp. Bochart). b Let this be compared with what Bruce says: "The Cerastes moves with great rapidity and in all directions, forwards, backwards, sideways; when he inclines to surprise any one who is too far from him, he creeps with his side towards the person," &c., &c. The words of Ibn Sina, or Avicenna, are to the same effect. It is right, however, to state that nothing unusual has been observed in the mode of progression of the Cerastes now in the gardens of the Zoological Society; but of course negative evidence in the instance of a specimen not in a state of nature does not invalidate the statement of so accurate an observer as Bruce.

The Horned Cerastes. (From specimen in British Museum.)

The Cerastes is extremely venomous; Bruce compelled one to scratch eighteen pigeons upon the thigh as quickly as possible, and they all died nearly in the same interval of time. It averages 2 to 15 inches in length, but is occasionally found larger. It belongs to the family Viperidae, order Viperida. [Serpent.]

From the root Shuphaba are possibly derived the proper names of Shupham, whence the family of the Shuphamites, Shuphiman, and Shupham.

W. H.

ADDI (Aâdî) [Tisch. Treg. 'A'dêî]. 1. Son of Cosam, and father of Melchi, in our Lord's genealogy (Luke iii. 28): the third above Sahthiel. The etymology and Hebrew form of the name are doubtful, as it does not occur in the LXX., but it probably represents the Hebrew יִדִּית, an ornament, and is a short form of Adiel, or Adahia. The latter name in 1 Chr. vi. 41 (26 in Heb. Bib.) is rendered in the [Roman edition of the] Septuagint Ἀδηίας, which is very close to Adhî. A. C. H.

2. (A'Adî; [Vat. A'däe'â;] A'dîln). This name occurs in a very corrupt verse (1 Esdr. ii. 31), apparently for Adîna (Ezra x. 30). W. A. W.

ADDÔ (A'dô; [Vat. E'dô] A'dôln). Indô, the grandfather of the prophet Zechariah (1 Esdr. vi. 1). W. A. W.

AD DON. [Addan.]

* This varied orthography, says Fürst (Hannah p. 17) is owing to a dialectic difference which pronounced Α as o.

AD DUS (A'dûsî): Addus. 1. The sons of Addus are enumerated among the children of Solomon's servants who returned with Zorobabel (1 Esdr. v. 14); but the name does not occur in the parallel lists of Ezra or Nehemiah.

2. (A'dûsî; [Vat. ldûsî]; Alex. 1ldûsî; [Akk. A'dûsî;] A'dônîn.). A priest whose descendants, according to 1 Esdr., were unable to establish their genealogy in the time of Ezra, and were re-emoted from their priesthood (1 Esdr. v. 38). He is said to have married Aniga, the daughter of Barzillai. In Ezra and Nehemiah he is called by his adopted name Barzillai, and it is not clear whether Addus represents his original name or is a mere corruption. W. A. W.

ADER (אדר) [in pause אדר, a flock]: "EŠep; [Vat. dô'î;] Alex. dô'î: Hedera. A Benjamite, son of Ithah, chief of the inhabitants of Aijalon (1 Chr. viii. 15). The name is, more correctly, Edôr. W. A. W.

ADIDA (A'dîdâ; [Sin. A'dîdâ, A'dûdâ or vav;] Joseph. A'dûdâ; A'dûdô; A'dûônô), a town on an eminence (Ant. xiii. 6, § 4) overlooking the low country of Judah ('A. v. câr ΢εφᾶίαες; fortified by Simon Macabaeus in his wars with Tryphon (1 Macc. xii. 38, xiii. 13). Alexander was here defeated by Arctas (Ant. xii. 15, § 2); and Vespasian used it as one of his outposts in the siege of Jerusalem (B. J. iv. 9, § 1). Probably identical with Ḥappîn and Additham (which see) G.

ADIEL (אַדִּ֙ל) [ornament of God]: 'Edzi- ųâlî; [Vat. corrupt.;] Alex. E'dziâlî; [Comp. A'dîdâ;] A'dîlî. 1. Prince of the tribe of Simeon, descended from the prosperous family of Shimeî (1 Chr. iv. 36). He took part in the murderous raid made by his tribe upon the peaceful Hamite shepherds in the valley of Gedor, in the reign of Heze- kiah.

2. (A'dîlîl). A priest, ancestor of Maasi (1 Chr. ix. 12).

3. (O'dôî; [Vat. Comp.;] Alex. O'dôîlî). An- cestor of Aza'maveth, David's treasurer (1 Chr. xxvii. 25). W. A. W.

ADIN (אוגין) [delicate]: A'dôînî, A'dînî [Vat. A'dûnî, A'dûmî in Exr., A'dûnî, A'dûnî in 1 Esdr.]: H'ôîn [Vat. Hôînî in Neh.: Hôîn, Jônîn in Ezr. viii. 6). Ancestor of a family who returned with Zerubbabel to the number of 434 (Exr. ii. 15 [1 Esr. v. 12]), or 655, according to the parallel list in Neh. vii. 20. Fifty-one more [251 according to 1 Esr. viii. 32] accompanied Ezra in the second caravan from Babylon (Exr. viii. 6). They joined with Nehemiah in a covenant to separate themselves from the heathen (Neh. x. 10). W. A. W.

ADINA (אַדִּ֙יה) [pliant]: 'Adô; [Comp. Vat. F., 'A'dônî;] A'dônî. The son of Shizaz, one of David's captains beyond the Jordan, and chief of the Reubenites (1 Chr. xii. 42). According to the A. V. and the Syriac, he had the command of thirty men; but the passage should be rendered "and of him were thirty," that is, the thirty before enumerated were his superiors, just as Denaiah was "above the thirty" (1 Chr. xxvii. 6). W. A. W.
ADINO. *ADINO, THE EZNITE, 2 Sam. xxvii. 8. See JASHOREM.

ADINUS (Ἰάνους; [Vat. Ἰανους; Abr. Ἀδινος; Jud. 11]; James the Levite (1 Esdr. ix. 48; comp. Neh. viii. 7). W. A. W.

ADITHAIM (with the article, Ἀδιθαίμ [the double booted]; Comp. Αἰθαίας; Abr. Ἀδιθαίας: Adithiain), a town belonging to Judah, lying in the low country (Shefelah), and named, between Saron and Gedera (with the articles in Josh. xv. 36 only. It is entirely omitted by the [Vat. and Alex. MSS. of] the 1 LXX. At a later time the name appears to have been changed to Hadid (τ Ἡαδιδ) and Adida. For the dual termination, comp. the two names occurring in the same verse; also Eglaim, Horonaim, etc.

ADJURATION. *ADJURATION. [EXORCISM.]

ADLAI [disyll.] (Ἄδλαι, Justice of Judah): Ἀδαλ [Vat. Alex. Adam]; Comp. 'Adam: Adon. Ancestor of Shaphat, the overstep of David's herds that fed in the broad valleys (1 Chr. xxvii. 20).

ADMAH (أجر: fortress, Furst): 'Αμα: Adam; one of the cities of the plain, always coupled with Zebaim (Gen. x. 19, xiv. 2; Dent. xxix. 23; Hos. xi. 8). It had a king of its own.

ADMATHA (Ἄδμα: compact, [MalaiGer: Vat. Alex. F. Malager; Comp. 'Admados; Adumatha], one of the seven princes of Persia (Esth. i. 14).

ADNA (Ἄδνα; pleasant): Εδρίτ; [Vat. II. Edon: Mai Adonae]. 1. One of the family of Pahath-Moab, who returned with Ezra, and married a foreign wife (Ezr. x. 30).

2. [Mavdai; Vat. Alex. Man; Comp. Edon]. A priest, descended of Harim, in the days of Josiah, the son of Jehu (Neh. xii. 14).

ADNAYAH (አንን: pleasant): Ebon; Edon. 1. A Manasite who deserted from Saul and joined the fortunes of David on his road to Ziklag (from the camp of the Philistines (1 Chr. xii. 29).

2. [Edoni; Vat. Alex. Edons]. The commander-in-chief of 300,000 men of Judah, who were in Jehoshaphat's army (2 Chr. xvii. 14).

W. A. W.

ADOI-NEBEZ (Ἅδωιν: lord of Bezak: Ἀδωνιβής: Adonibi, king of Bezak, a city of the Canaanites. [BEZEK.] This chieftain was vanquished by the tribe of Judah (Judg. i. 3-7), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had inflicted the same cruelty upon 70 petty kings whom he had conquered.

R. W. B.

* Exeget in his note on Judg. i. 6 ([Richard Bruth, p. 63] mentions some parallels to this barbarity, which show that it was not uncommon in ancient times. The form of the mutilation was not arbitrary, but chosen in order to render those who suffered it unfit for warlike service; henceforth they could neither wield the bow, nor stand firm in battle, or escape by flight. When the inhabitants of

* If so, it is an instance of Aim changing to Eth (see Gez p. 490).

ADONIJAH. *ADONIJAH, my Lord is Jehovah: 'Abouras; Adonites). 1. The fourth son of David by Haggith, born at Hebron, while his father was king of Judah (2 Sam. iii. 4). After the death of his three brothers, Amnon, Chileab, and Absalom, he became eldest son; and, when his father's strength was visibly declining, put forward his pretensions to the crown, by equipping himself in royal state, with chariots and horses, and fifty men to run before him, in imitation of Absalom (2 Sam. xv. 1) whom he also resembled in personal beauty, and apparently also in character, as indeed Josephus says (Ant. vii. 14, § 4). For this reason he was plainly unfit to be king, and David proved to Adonijah that his son Solomon should inherit the crown (1 K. i. 39), for there was no absolute claim of princenouge in these Eastern monarchies. Solomon's cause was espoused by the best of David's counsellors, the illustrious prophet Nathan; Zadok, the descendant of Eleazar, and representative of the elder line of priesthood; Benaiah, the captain of the king's body-guard; together with Shimeai and Icri, whom Evi (Geschichte, iii. 295) conjectures to be David's two surviving brothers, comparing 1 Chr. ii. 13, and identifying אֲמוֹת with אֲמוֹת (Shimamow in our version), and כֹּל with כֹּל (our Rabba). From 1 K. ii. 8, it is unlikely that the Shime of 2 Sam. xvi. 5 could have actively espoused Solomon's cause. On the side of Adonijah, who when he made his attempt on the kingdom was about 35 years old (2 Sam. v. 5), were Abiathar, the representative of the tribe of Levi, i. e., the junior line of the priesthood (descended from Ithamar, Aaron's fourth son), and Joab, the famous commander of David's army; the latter of whom, always audacious and self-willed, probably expected to find more congenial elements in Adonijah's court than in Solomon's. His name and influence secured a large number of followers among the captains of the royal army belonging to the tribe of Judah (comp. 1 K. i. 3 and 25); and these, together with all the princes except Solomon, sought of Adonijah at a great solemn feast held "by the stone Zohleth, which is by Enrogel." The meaning of the stone Zohleth is very doubtful, being translated rock of the watercourse in the t'khudhe: great rock, Sth. and Arab.; and explained rock of the stream of water" by R. Kimchi. Enrogel is mentioned in Josh. xv. 7, as a spring on the border of Judah and Benjamin,

ADONIJAH. *ADONIJAH (Ἅδωνις, my Lord is Jehovah: 'Abouras; Adonites). 1. The fourth son of David by Haggith, born at Hebron, while his father was king of Judah (2 Sam. iii. 4). After the death of his three brothers, Amnon, Chileab, and Absalom, he became eldest son; and, when his father's strength was visibly declining, put forward his pretensions to the crown, by equipping himself in royal state, with chariots and horses, and fifty men to run before him, in imitation of Absalom (2 Sam. xv. 1) whom he also resembled in personal beauty, and apparently also in character, as indeed Josephus says (Ant. vii. 14, § 4). For this reason he was plainly unfit to be king, and David proved to Adonijah that his son Solomon should inherit the crown (1 K. i. 39), for there was no absolute claim of princenouge in these Eastern monarchies. Solomon's cause was espoused by the best of David's counsellors, the illustrious prophet Nathan; Zadok, the descendant of Eleazar, and representative of the elder line of priesthood; Benaiah, the captain of the king's body-guard; together with Shimeai and Icri, whom Evi (Geschichte, iii. 295) conjectures to be David's two surviving brothers, comparing 1 Chr. ii. 13, and identifying אֲמוֹת with אֲמוֹת (Shimamow in our version), and כֹּל with כֹּל (our Rabba). From 1 K. ii. 8, it is unlikely that the Shime of 2 Sam. xvi. 5 could have actively espoused Solomon's cause. On the side of Adonijah, who when he made his attempt on the kingdom was about 35 years old (2 Sam. v. 5), were Abiathar, the representative of the tribe of Levi, i. e., the junior line of the priesthood (descended from Ithamar, Aaron's fourth son), and Joab, the famous commander of David's army; the latter of whom, always audacious and self-willed, probably expected to find more congenial elements in Adonijah's court than in Solomon's. His name and influence secured a large number of followers among the captains of the royal army belonging to the tribe of Judah (comp. 1 K. i. 3 and 25); and these, together with all the princes except Solomon, sought of Adonijah at a great solemn feast held "by the stone Zohleth, which is by Enrogel." The meaning of the stone Zohleth is very doubtful, being translated rock of the watercourse in the t'khudhe: great rock, Sth. and Arab.; and explained rock of the stream of water" by R. Kimchi. Enrogel is mentioned in Josh. xv. 7, as a spring on the border of Judah and Benjamin,
S. of Jerusalem, and may be the same as that
afterwards called the Well of Job or Job (Job 1.
25: 31). It is explained spring of the fuller by the
Chaldee Paraphrast, perhaps because he treats his
clothes with his feet (גוז), see Gesen. s. v.); but
comp. Deut. xi. 10, where “watering with the feet”
refers to machines trodden with the foot, and
such possibly the spring of Rogel supplied. [En-
rogel.] A meeting for a religious purpose would
be held near a spring, just as in later times sites
for processing were chosen by the watershed (Acts
xi. 13).

Nathan and Bathsheba, now thoroughly alarmed, apprised David of these proceedings, who immedi-
ately gave orders that Solomon should be conducted
on the royal mule in solemn procession to Gilbon,
a spring on the west of Jerusalem (2 Chr. xxxii.
30). [Gigon.] Here he was anointed and pro-
claimed king by Zadok, and joyfully recognized by
the people. This decisive measure struck terror into
the opposite party, and Adonijah fled to the
sanctuary, but was pardoned by Solomon on condi-
tion that he should “show himself a worthy
man,” with the threat that if wickedness were
found in him he should die” (i. 52).

The death of David quickly followed on these
events; and Adonijah begged Bathsheba, who as
“king’s mother” would now have special dignity and
influence [AsA], to procure Solomon’s consent
to his marriage with Abishag, who had been the
wife of David in his old age (1 K. i. 3). This
was regarded as equivalent to a fresh attempt on
the throne [AbSaLOm: Abner]; and therefore Sol-
omon ordered him to be put to death by Benail, in
accordance with the terms of his previous pardon.
Far from looking upon this as the most flagrant
act of despotism since David massacred the priests
at Saul’s command “(Newman, Hebrew Monarchy,
ch. iv.), we must consider that the clemency of
Solomon in sparing Adonijah till he thus again re-
vealed a treasonable purpose, stands in remarkable
contrast with the almost universal practice of
Eastern sovereigns. Any one of these, situated like
Solomon, would probably have secured his
throne by putting all his brothers to death, but we
have no reason to think that any of David’s
sons suffered except the open pretender Adonijah,
though all seem to have opposed Solomon’s claims;
and if his execution he thought an act of severity,
we must remember that we cannot expect to
find the principles of the Gospel acted upon a thou-
sand years before Christ came, and that it is hard
for us, in this nineteenth century, altogether to
realize the position of an oriental king in that remote
age.

2. [Ahd. Vale. Alex. ‘Adoniar.] A Levite in
the reign of Jehoshaphat (2 Chr. xvii. 8).

3. [Ahia: Alex. Anan; Vat. P.乳腺: Ahd. ‘Ania;
Comp. ‘Ahd. ‘Adoniar.] One of the Jewish chiefs in the
time of Nehemiah (x. 16). He is called Adonikum
Neh. vii. 18. G. E. L. C.

ADORIAM [בִּדְבֵד, lit. king of the
enemy, Ges.; or lord who assists, Forst.]. ‘Adoniam
[or אדוניאמ; Vat. varies in each place]: Adoniam.
The sons of Adonikum, 606 in number, were among
those who returned from Babylon with Zerubbabel
(Ezr. ii. 19; Neh. vii. 18: 1 Esdr. v. 14). In the
list these passages the number is 607. The remain-
der of the family returned with Ezra (Ezr. viii. 13.
1 Esdr. vii. 39). The name is given as Adoni-
jah in Neh. x. 16. [In 1 Esdr. v. 14, A. V. ed.
1011, etc. reads Adoniram, and vii. 39, Adoniram
—A.]

ADORIAM (בִּדְבֵד) lord of exalt-
tion, 1 K. iv. 6; by an unusual contraction Ado-
riam, בִּדְבֵד, 2 Sam. xx. 24, and 1 K. xii. 18;
also hadoram, בִּדְבֵד, 2 Chr. x. 18: Ahabvah:
[Vat. —ser. in 1 K. xii. 18. Ahabvah:]
Adoriam, Adouram. Chief receiver of the tribute during
the reigns of David (2 Sam. xx. 24), Solomon (1 K.
iv. 9) and Rehoboam (1 K. xii. 18). This last
monarch sent him to collect the tribute from the
rebels.Ismaelites, by whom he was stoned to
death. [See also 1 K. iv. 14—]

ADONIZEDEC (בִּדְבֵד, lord of jus-
tice: ‘Ahabvamëkëq: [Comp. ‘Ahabvamëkëq:]
Adonizedek), the Amorite king of Jerusalem who orga-
nized a league with four other Amorite princes
against Joshua. The critical word is usually
having had siege to Gilonomía, Joshua marched to the relief of
his new allies and put the besiegers to flight.
The five kings took refuge in a cave at Makkedah,
whence they were taken and slain, their bodies
hung on trees and then buried in the place of their
concealment (Josh. x. 1-27). [Joshua.]

I. W. B.

ADONIZEDEC (בִּדְבֵד, lord of jus-
tice: ‘Ahabvëmëkëq: [Comp. ‘Ahabvëmëkëq:] Ado-
')

II. ADOPTION (אָדָptive), an expression meta-
 aphorically used by St. Paul in reference to the
present and prospective privileges of Christians (Rom
viii. 15, 23; Gal. iv. 5; Eph. i. 5). He probably
alludes to the Roman custom of adoption, by which
a person not having children of his own might
adopt as his son one born of other parents. It was
a formal act, either by the process named
adoptive, when the person to be adopted was in-
dependent of his parent, or by adoptio, specifically
so called, when in the power of his parent. (See
Dict. of Gk. and Rom. Ant. art. Adoption.]
The effect of it was that the adopted child was entitled
to the name and secta privata of his new father,
and ranked as his heir-at-law; while the father on
his part was entitled to the property of the son,
and exercised towards him all the rights and priv-
ileges of a father. In short the relationship was to
all intents and purposes the same as existed between
a natural father and son. The selection of a
person to be adopted implied a decided preference
and love on the part of the adoptor; and St. Paul aply
transfers the well-known feelings and customs con-
ected with the act to illustrate the position of the
Christianized Jew or Gentile. The Jews them-

 selves were unequipped with the process of adop-
tion's in their country would have been relieved
with the regulations of the Mosaic law affecting the
inheritance of property. The instances occasion-
ally adduced as referring to the custom (Gen. xv.
3, xvi. 2, xxx. 5-9) are evidently not cases of
adoption proper. 

W. L. B.
ADORAM

ADRAMYTTUM

ADORAM, a fortified city built by Rehabe-
am (2 Chr. xi. 9), in Judah (Jos. Ant. viii. 10, § 1), apparently in or near the Shephelah, since, although omitted from the lists in Josh. xv, it is by Josephus (Ant. iii. 9, § 1, 15, § 4; B. J. i. 2, § 6, i. 8, § 4) almost uniformly coupled with Marshab, which was certainly situated there. For the dual termination compare Michin, Gedeolinath, etc. By Josephus it is given as "Ahabon, Ahabeppe," and in Ant. xiii. 6, § 5, he calls it a city of Ilumasa," under which name it was included, in the later times of Jewish history, the southern parts of Judaea itself (Rechab, p. 48; Robinson, ii. 69). Adoraim is probably the same place with "Ahadon (1 Macc. xiii. 29), unless that be Dor, on the sea-coast below Carmel. Robinson identifies it with Dora, a large village on a rising ground west of Hebron (ib. 215).

* Dora is one of the largest villages in the district of Hebron, and is properly the chief place* (Reb. ii. 214). The name (from "Ahab, to be great") intimates that Adoraim had a similar importance; and the dual (First, b. 22) implies that there was an upper and lower town, as there might so easily be, since the top of the hill overlooks the present Dora on its slope.

ADORAM. [ADORAMAH.]

ADORATION. The acts and postures by which the Hebrews expressed adoration bear a great similarity to those still in use among Oriental nations. To rise up and suddenly prostrate the body, was the most simple method; but generally speaking, the prostration was conducted in a more formal manner, the person falling upon the knee and then gradually inclining the body until the forehead touched the ground. The various expressions in

ADRAMYTTUM (occasionally Atramytum; and some curious MSS. have Agramytio, instead of Adramytoo) in Acts xxvii. 7, a seaport in the province of Asia (Asia), situated in the district anciently called Eleda, and also Musia (see Acts xvii. 7). Adramyttum gave, and still gives its name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos (Mytilene). St. Paul was never at Adramyttum, except, perhaps, during his second missionary journey, on his way from Galatia to Tarsus (Acts xix. 22), and it has no Biblical interest, except as illustrating his voyage from Caesarea in a ship belonging to

form of expression for the new kingdom, and that none of the towns named are necessarily in the limits of Benjamin proper.
ADRIA

This place (Acts xxvii. 2). The reason is given in what follows, namely, that the centurion and his prisoners would thus be brought to the coasts of Asia, and therefore some distance on their way towards Rome, to places where some other ship bound for the west would probably be found. Ships of Adranytum must have been frequent on this coast, for this was a place of considerable traffic. It lay on the great Roman road between Assos, Troas, and the Hellespont on one side, and Pergamus, Ephesus, and Miletus on the other, and was connected by similar roads with the interior of the country. According to tradition, Adranytum was a settlement of the Lydians in the time of Croesus. It was afterwards an Athenian colony. Under the kingdom of Pergamus it became a seaport of some consequence; and in the time of St. Paul Phily mentions it as a Roman assize-town. The modern Adventi is a poor village, but it is still a place of some trade and shipbuilding. It is described in the travels of Pococke, Turner, and Fellows. It is hardly worth while to notice the mistaken opinion of Grotius, Hammond, and others, that Hadrumetum on the coast of Africa is meant in this passage of the Acts.

J. S. H.

ADRIA, more properly ADRIAS (Δρᾶιας; [Adria]). It is important to fix the meaning of this word as used in Acts xxvii. 27. The word seems to have been derived from the town of Adria, near the Po; and at first it denoted that part of the gulf of Venice which is in that neighbourhood. Afterwards the signification of the name was extended so as to embrace the whole of that gulf. Subsequently it obtained a much wider extension, and in the apostolic age denoted that natural division of the Mediterranean, which Humboldt names the Syrtic basin (see Acts xxvii. 17), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by almost a contemporary of St. Paul, the geographer Ptolemy, who also says that Crete is bounded on the west by Adrias.Later writers state that Malta divides the Adriatic sea from the Tyrrhenian sea, and the Istiums of Corinth the Aegean from the Adriatic. Thus the ship in which Josephus started for Italy about the time of St. Paul’s voyage, founded in Adrias (Eph. 2, 9), and there he was picked up by a ship from Tyre and taken to Puteoli (see Acts xxvii. 13). It is through ignorance of these facts, or through the want of attending to them, that writers have drawn an argument from this geographical term in favor of the false view which places the Apostle’s shipwreck in the Gulf of Venice. [Melita.] (Smith’s Voy. and Shipwreck of St. Paul. Dars. on the Island Melita.) J. S. H.

ADRIEL (אדריאל; [Rock of God]; [Comp.] אדריאל; [Rom. Ἱδραίλ, Vat. Σερηί, om. in 1 Sam.]; Alex. Ἱορακι, Ἰαὰρικ; Ald. Ἰορακι, Ἰαὰρις; Hobley, a son of Zairiiah the Mahodathite, to whom Saul gave his daughter Merab, although he had previously promised her to David (1 Sam. xviii. 19). His five sons were amongst the seven descendants of Saul whom David killed at the Gibeonites (2 Sam. xxii. 8, 9) in satisfaction for the meedows of Saul to extirpate the latter, although the Israelites had originally made a league with them (Josh. ix. 15). In 2 Sam. xxii. they are called the sons of Michal (the daughter of Saul and wife of David); but as Michal had no children (2 Sam. b 23), the A. V., in order to surmount the difficulty, erroneously translates 7777, “brought up,” instead of “bare.” This accords with the opinion of the Targum and Jewish authorities. The marg. gives “Michal’s sister,” for “Michal.” Probably the error is due to some early transcriber.

ADUEL (Αὐδέα [Alex. FA. Ναυή]); i. e. ΝΕυΤ, 1 Chr. iv. 36 (1εντηλά; ix. 12) (Αὐδέα), the ornament of God. A Naadhalite, ancestor of Tobit (Tob. i. 1). B. F. W. and W. A. W.

ADULLAM (Apoor. Οδωλάμ, Οδωλάμ; [Justice of the people; Ges.; but according to Simonis from 777; and 777, hence hiding-place]: Οδωλῶμα; [Odhullam, Oddulam, Adullam]), a city of Judah in the lowland of the Shefelah, Josh. xv. 35 (comp. Gen. xxxviii. 1, “Judah went down,” and Micah i. 15, where it is named with Mareschal and Achsah); the seat of a Canaanite king (Josh. xii. 15), and evidently a place of great antiquity (Gen. xxxviii. i. 12, 20). Fortified by Rehoboam (2 Chr. xi. 7), one of the towns recouped by the Jews after their return from Babylon (Neh. xi. 30), and still a city (Q. πόλις) in the times of the Maccebes (2 Mac. xxii. 38). The site of Adullam has not yet been identified, but from the mention of it in the passages quoted above in proximity with other known towns of the Shefelah, it is likely that it was near Pithol, 5 or 6 miles N. of Eleutheropolis. (Byeus's and Jerome, and apparently by the LXX, it is confounded with Eleusin: see that name.) The limestone cliffs of the whole of that locality are pierced with extensive excavations (Robinson, ii. 23, 51-53), some one of which is possibly the cave of Adulam;” the refuge of David (1 Sam. xxix. 1; 2 Sam. xxii. 16; 1 Chr. xi. 15; Stanley, S. P. F. p. 259). Monastic tradition places the cave at Khirbet el, at the south end of the Wady Urain, between Bethel and the Dead Sea (Robinson, i. 481).

* No one who has seen the cave at Khirbet el can have any doubt of its fitness to be such a place of refuge as the cave of Adullam evidently was to David and his followers. For a description of this cavern see Tekoa. Dr. Thomson (Land and Book, i. 124 & c.) pleads still for the correctness of the popular opinion. David, who lived in the neighboring Bethlehem and had often driven his flocks over those hills, must have known of the existence of the cave and been familiar with the entrances to it. It was in a desert remote from the haunts of Saul, or if approached by him was incapable of any effectual assault. It was in the direction of Moab, whither David, shortly before betaking himself to this retreat, had sent his parents and the women of his train. Stanley decides (S. & P. p. 254, note) that the cave must have been in the Shefelah, because the family of David “went down” to him there from Bethlehem (1 Sam. xxii. 1); but the expression may be used also of Khirbet el, which is nearly 2 hours S. E. of Bethlehem and over a path which descends rapidly almost the entire distance. That the town and the cave of Adullam are not near each other would be only an instance of the fact that the same name is often applied to different localities.

* So also Thukus (Die Bucher Samuel, p. 229), accounts for the inconsistancy. See further under Merab.
David was certainly in the cave of Adullam when the "three chiefs" brought water to him from Bethlehem; and as it is said that the Philistines, through whom they forced their way for that purpose, encountered at the time near Bethlehem (2 Sam. xxiii. 13, 14), we must infer that the cave itself was near Bethlehem, and not so far off as the border of the plain of Philistia.a

ADULLAMITE (אדיללמאתי; see ADULLAM: אדיללמאתי: Αδύλλαματης; Adullamite). A native of Adullam: applied to Hirah, the friend (or "shepherd") as the Vulgate has it, reading עֶבְרָי for עֶבְרַי of Judah (Gen. xxxviii. 1, 12, 29). W. A. W.

ADULTERY. The parties to this crime were a married woman and a man who was not her husband. The ordinance of polygamy, indeed, renders it nearly impossible to make criminal a similar offence committed by a married man with a woman not his wife. In the patriarchal period the sanctity of marriage is noticeable from the history of Abraham, who fears, not that his wife will be seduced from him, but that he may be killed for her sake, and especially from the scruples ascribed to Pharaoh and Abimelech (Gen. xxii., xxxi.). The women of Canaan were, as amongst all eastern nations, no doubt, capital, and probably, as in the case of Tamar's unchastity, death by fire (xxxviii. 24). The Mosaic penalty was that both the guilty parties should be stoned, and it applied as well to the betrayer as to the married woman, provided she were free (Deut. xxii. 22-24). A bondwoman so offending was to be scourged, and the man was to make a trespass offering (Lev. xix. 20-22). The system of inheritances, on which the penalty of Moses was based, was threatened with confusion by the doubtful offspring caused by this crime, and this secured popular sympathy on the side of morality until a far advanced stage of corruption was reached. Yet from stoning being made the penalty we may suppose that the exclusion of private revenge was intended. It is probable that, when that territorial basis of policy passed away — as it did, after the captivity — and when, owing to Gentile example, the marriage tie became a lesser bond of union, public feeling in regard to adultery changed, and the penalty of death was seldom or never inflicted. Thus in the case of the woman brought under our Lord's notice (John viii.), it is likely that no one then thought of stoning her in fact, but there remained the written law ready for the purpose of the casuist. It is likely, also, that a divorce in which the adulteress lost her dowry and rights of maintenance, &c., (Genesis thirty-eight, sec. vii. 6), was the usual remedy suggested by a wish to avoid scandal and the excitement of commeration for crime. The word παραπετασματιαν | ιογεναλατιαν Λακημ, Thes., Trea. Mass. lit. 182, probably means to bring the case before the local Sanhedrin, which was the usual course, but which Joseph did not propose to take, preferring repudiation (Baxter, de Spons. et Divert. iii. 1, 4), because that could be managed privately (Adýma).

Concerning the famous trial by the waters of jealousy (Num. x. 11-29), it has been questioned

---
a. Since writing the above note, we find that Dr. Stanley is either not consistent with himself or has changed his opinion. In his article on David in this whether a husband was, in case of certain facts, bound to adopt it. The more likely view is, that it was meant as a relief to the reformation of impra- visible jealousy to which temptations appear prone, but which was not consistent with the laxity of the mupidal tie prevalent in the period of the New Testament. The ancient strictness of that tie gave room for a more intense feeling, and in that intensity probably arose this strange custom, which, no doubt, Moses found prevailing and deeply seated; and which is said to be paralleled by a form of ordeal called the "red water" in Western Africa (Kittel, Cyclop. x. 4). The forms of Hebrew justice all tended to limit the application of this test.

1. By prescribing certain facts presumptive of guilt, to be established on oath by two witnesses, or a preponderating but not conclusive testimony to the fact of the woman's adultery. 2. By technical rules of evidence which made proof of those presumptive facts difficult (Suetb. vi. 2-5). 3. By exempting certain large classes of women (all indeed, except a pure Israelite married to a pure Israelite, and some even of them) from the liability. 4. By providing that the trial could only be before the great Sanhedrin (Suetb. i. 4). 5. By investing it with a ceremonial at once humiliating and intimidating, yet which still harmonized with the spirit of the whole code as recorded in Num. v.; but 6. Above all, by the conventional and even mercenary light in which the mupidal contract was latterly regarded.

When adultery ceased to be capital, as no doubt it did, and divorce became a matter of mere convenience, it would be absurd to suppose that this trial was continued. And when adultery became common, as the Jews themselves confess, it would have been impious to expect the miracle which it supposed. If ever the Sanhedrin were driven by force of circumstances to adopt this trial, no doubt every effort was used, may, was prescribed (Suetb. i. 5, 6) to override the culprit and induce confession. Nay, even if she submitted to the trial and was really guilty, some rabbis held that the effect on her might be suspended for years through the merit of some good deed (Suetb. ii. 4-6). Besides, however, the intimidation of the woman, the man was likely to feel the public exposure of his suspicions odious and repulsive. Divorce was a ready and quiet remedy; and the only question was, whether she divorce should carry full penalty, and the property which she had brought; which was decided by the slight or grave character of the suspicions against her (Suetb. vi. 1; Genera Chowthoth, vii. 6; Ged. for Heb. c. vii.). If the husband were incapacitated through derangement, imprisonment, &c., of acting on his own behalf in the matter, the Sanhedrin proceeded in his name as concerned the dowry, but not as concerned the trial by the water of jealousy (Suetb. iv. 6). W. A. W.

ADUMMIM, "THE GOING UP TO" or "OF" (אָדֻםמִים; אדום מים). The "passage of the red sea," "one of the landmarks of the boundary of Benjamin, a rising ground or pass over against Gilgal," and "on the south side of the torrent" (Josh. xv. 7, xvii. 17), which is

Dictionary (s. b. 3), and in his Lectures on the Jewish Church (ii. 180), he speaks without hesitation of the cave near Kedeeson as David's of Adullam II.
Of the position still occupied by the road leading up from Jericho and the Jordan valley to Jerusalem (Rob. i. 5589), on the south face of the gorge of the Wady Kelt. Jerome (Onom. Adonain) ascribes the name to the blood shed there by the robbers who infested the place in his day, as they still do now (Stanley, pp. 314, 424; Martineau, p. 481; Stewart) continue to infest it, as they did in the middle ages, when the order of Knights Templars arose out of an association for the guarding of this road, and as they did in the days of our Lord, of whose parable of the Good Samaritan this is the scene. But the name is doubtless of a date and significance far more remote, and is probably derived from some tribe of the "red men" of the earliest inhabitants of the country (Stuart, 424, note). The suggestion of Keil that it refers to the "wöthlichen Farbe des Felsen," is the conjecture of a man who has never been on the spot, the whole pass being of the whitest limestone. [First derives the name in the first instance from the color (red-brown) of the earth in the hills.]

G. AÉDIAS: [Aédis: [Vat. Αέδιας; Ald. Alex. Α'έδιας; Helias,] 1 Esdr. ix. 27. Probably a corruption of EPHIA.

ΑΕΥΓΥΠΤ. [ΕΥΓΥΠΤ.]

ΑΕΝΕΑΣ (so, correctly, A. V. ed. 1611, etc.; Ennas, later eds.) [Aéiaus: Αένας,] a paralytic at Lydda, healed by St. Peter (Acts iv. 33, 34).

* The name shows that he was either a Greek or a Hellenistic Jew. It is uncertain whether he was a believer or not (ἀνυμνιά των); but it was usual to require faith of those who received such benefits.

ΑΕΝΟΝ (Αῦνον), a place "near to Salim," at which John baptized (John iii. 23). It was evidently west of the Jordan (comp. ii. 22 with 26, and with i. 28), and abounded in water. This is indicated by the name, which is merely a Greek version of the Chaldee үүүү, which Ἐνον is given in the Onomasticon as a 8 miles south of Syraphopolis, "luxia Slama et Jordanum." Dr. Robinson's most careful search, on his second visit, however, failed to discover any trace of either name or remains in that locality (iii. 333). But a Sélém has been found by him to the east of and close to Násulas, where there are two very copious springs (ii. 279; iii. 280). This is confirmed with the testimony of Gen. xxxiii. 18. [Σιλόμονας.] In favor of its distance from the Jordan is the consideration that, if close by the river, the Evangelist would hardly have drawn attention to the "much water" there.

The latest writer on Jerusalem, Dr. Bardsley (1858), reports the discovery of Ὑνων at Wady Farah, a sequestered valley about 5 miles to the N. E. of Jerusalem, running into the great Wady Farea immediately above Jericho. The grounds of this novel identification are the very copious springs and pools in which W. Farah abounds, and also the presence of the name Sélém or Sélcin, the appellation of another Wady close by. But it requires more examination than it has yet received. (Bardsley, City of the Great King, pp. 558-570.) See the curious speculations of Lightfoot (Chorog. Inquiry, ch. iii. §§ 1, 2, 3, 4).

AGABUS 37

* The later observations tend to narrow the limits of the question: they indicate at least the region if they do not fix the site of Ὑνων. Jerome's testimony (Rebain's Palestine, p. 480) that it was 8 miles south of Scythopolis (still shown there in his day, (Onom. Adonain) name) was made with the ascertained condition of that neighborhood. Dr. Thomson (Land and Book, ii. 176), who visited Beisain (Syraphopolis) and the neighborhood, represents the valley there as abounding in fountains and brooks, which make it one of the most fertile places in Palestine. Though finding no traces of the names still current, he says that Ὑνων and Sélén were no doubt in this chor Beisain. Dr. Robinson's Sélun lies too far inward to agree with the "luxia Jordanum" of Eusebius and Jerome; indeed, he gives up that position and fixes on a different one. The name merely of Sélum would not be decisive, as it seems to have been, and is still, not uncommon in Palestine. [Sali.] We have the reason for adhering to the traditional site, that Mr. Van de Velde reports his finding a Musulman oratory (Wady) called Sładgh Sélun near a heap of ruins, about six English miles south of Sélém, and two west of the Jordan (Syr. and Pol. ii. 346). Beek (Brief an die Hebr. vol. ii. pt. 2, p. 283 ff) maintains that this Sélun was not only the one where John baptized, but of which Melchizedek was king (Gen. xiv. 18). As to Ὑνων, which is descriptive rather than local, the existence itself of fountains, "deep water" (ὕδατα τολαί), is all the identification that the term requires.

*ÆTHIOPIAN VERSION. [Versions, Ancient.]

AFFINITY. [Marriage.]

AGABUS (Ἀγάβος: [Vat. marc. Ἀγαβᾶς; Alex. τὰβα: Ald: Ἀγαβᾶ;] Agab,] 1 Esdr. v. 30. [Hagab.]

AGABUS b (Ἀγάβος: Agabas), a Christian prophet in the apostolic age, mentioned in Acts xi. 28 and xxi. 10. The same person must be meant in both places; for not only the name, but the office (προφήτης) and residence (ἵππον τεσσαράκοντα, ἀπὸ τῆς ἱεροσολύμων), are the same in both instances. He probably was the man of Acts xi. 28) that a famine will take place in the reign of Claudius "throughout the whole world" (ἐκ δια τῆς ἡμερήσιος ἡμέρας. This exression may take a narrower or a wider sense, either of which confirms the prediction. As Greek and Roman writers used οἱ ἐνοχοὶ of the Greek and the Roman world, so a Jewish writer could use it naturally of the Jewish world or Palestine. Josephus certainly so uses it (Ant. viii. 19, § 4) when speaking of the efforts of Abah to discover the prophet Elijah, he says that the king sought him κατὰ πᾶσαν τὴν ὅμορφων, i. e. throughout Palestine and its borders. (See Anger, De Tempora in Acta App. ratione, p. 42.) Ancient writers give no account of any universal famine in the reign of Claudius, but they speak of several local famines which were severe in particular countries. Josephus (Ant. xx. 2, § 6; ib. 5, § 2) mentions one which prevailed at that time in Judea, and swept away many of the inhabitants. Helena, queen of Adiabene, a Jewish proselyte who was then at Je-
AGAG

uselam, imported provisions from Egypt and Cyprus, which she distributed among the people to save them from starvation. This, in all probability, is the famine to which Agabus refers in Acts xi. 28. The chronology admits of this supposition.

According to Josephus, the famine which he describes took place when Quaestor Claudius and Tiberius Alexander were procurators; i.e. as Lardner computes the time (Credibility, i. 1. i. c. xi.), it may have begun about the close of A. D. 44, and lasted three or four years. Fadus was sent into Judea on the death of Agrippa, which occurred in August of the year A. D. 44; and it was about the time of the death of Agrippa (Acts xii. 1) that Paul and Barnabas carried the alms of the Christians at Antioch to Jerusalem. If we attach the wider sense to exouyasted, the prediction may import that a famine should take place throughout the Roman empire during the reign of Claudius (the year is not specified), and not that it should prevail in all parts at the same time. We find mention of three other famines during the reign of Claudius, one in Greece (Euseb. Chron. i. 79), and two in Rome (Buon Case, i. 11; Tac. Ann. xii. 43). For the facts concerning these famines, see Walch, De Agaro corte (Disert. ad Acta Apost. ii. 131 ff.).

At Cesarea, Agabus foretold to Paul, who was then going up to Jerusalem for the last time, that the Jews there would cast him into prison and bind him hand and foot. The prophet accompanied this prediction with a symbolic act (that of binding his own hands and feet with Paul's girdle), which served to place the event foretold more vividly before them. The scene, being thus acted out before their eyes, was rendered present, real, beyond what any mere verbal declaration could possibly have made it.

"Segnus irritans animo densissis per auran Quam qua sunt oscula subjecta foliis, et quae Ipsa sibi tradit spectorum."

Instances of such symbolism, though rare in the N. T., are frequent in the O. T. See 1 K. xxii. 11; Is. xx. 1 ff.; Jer. xxiii. 1 ff.; Ezek. iv. 1 ff., etc.

The name Agabus is variously derived: by Drusius, from by one; by Grothus, Witzian, and Wolf, from as he bore. See Wolf's Carol Philologus, ii. 195. Walch (ut supra) adopts the latter derivation, and compares the name with the Greek Agaia, Agapeia, Agapis, and the like; in, in his Dissertation, treats (a) of the name of Agabus; (b) of his office as prophet; (c) of his prophecies; and (d) of their fulfillment. He illustrates these topics fully, but adds nothing important to the results stated in this article. The incidents in which Agabus appears are noticed at length in Kuhnau's Apostolische Nachrich., iii. 270 ff. and iv. 116 ff.

AGAG (אַגָּג), from an Arab root to burn; Gen. iv. 4: "Agayd and Evay: Agayd," possibly the title of the kings of Amalek, like Pharaoh of Egypt. One king of this name is mentioned in Num. xxiv. 7, and another in 1 Sam. xv. 8, 9, 20, 32. The latter was the king of the Amalekites, whom Saul spared together with the rest of the spoil, although it was the well-known will of Jehovah that the Amalekites should be extirpated (Ex. xvii. 14; Deut. xxv. 17). For this act of disobedience Samuel pronounced a solemn curse and declared to Saul his rejection, and he himself sent for Agag and cut him in pieces. [SAMUEL.]

Haman is called the AGAGITE in Esther (Bou- quáios, ii. 10, viii. 3, 5, [Maxeckx, ix. 21]). The Jews consider Haman a descendant of Agag, the Amalekite, and hence account for the hatred with which he pursued their race (Joseph. Ant. xi. 6, § 5; Targ. Esth.). R. W. B.

AGAH; [AGAH.]

AGARENES (אַגָּרֶנים, shēbē: 7575, wahrith;) is mentioned four times in the text of the A. V.: viz. in Ex. xxviii. 19, xxix. 12; Is. xix. 12; Ez. xxvi. 16. In the two former passages, where it is represented by the Hebrew word shēbē, it is spoken of as forming the second stone in the third row of the high-priest's breast-plate; in each of the two latter places the original word is caphet, by which no doubt is intended a different stone. [RHYM.] In Ez. xxvi. 16, where the text has aga, the margin has chrysoprase, whereas in the very next chapter, Ex. xxviii. 13, chrysoprase occurs in the margin instead of men- rcalb, which is in the text, as the translation of an entirely different Hebrew word, wark;* this will show how much our translators were perplexed as to the meanings of the minerals and precious stones mentioned in the sacred volume.* This uncertainty which belongs to the mineralogy of the Bible, and indeed in numerous instances to its botany and zoology, is by no means a matter of surprise when we consider how often there is no collateral evidence of any kind that might possibly help us, and that the derivations of the Hebrew words have generally and necessarily a very extensive signification; identification, therefore, in many cases becomes a difficult and uncertain matter.

With regard to the meaning of the Hebrew word shēbē have been given by the learned, but nothing definite can be deduced from any one of them. "Gesenius places the word under the root shalāb, to take prisoner," but allows that nothing at all can be learned from such an etymology. Forthwith many probability assigns to the name an Arabic origin, shābah, to glitter."

Again, we find sufficiently enough an interpretation which derives it from another Arabic root, which has precisely the opposite meaning, viz. to be dull and obscure." Another derivation traces the word to the proper name Shabat, whence precious stones were exported for the Tyrian merchants. Of these derivations, it is difficult to see any meaning at all in the first, while a contrary
Agriculture 39

One to which we should expect is given to the third, for a dull-looking stone is surely out of place among the glittering specimens with which adorned the splendid brecciate. The derivation adopt by
Furz is perhaps the most probable, yet there is nothing even in it which will indicate the stone intended. That sheb, however, does stand for some variety of agate seems generally agreed upon by commentators, for, as Rossmiller has observed (Sedl. in Exod. xxxvii. 19), there is a wonderful agreement amongst interpreters, who all understand an agate by the term.

Our English agate, or ochBei, derives its name from the Achates, the modern Dirillo, in the Val di Noto, in Sicily, on the banks of which, according to Theophrastus and Pliny, it was first found; but as agates are met with in almost every country, this stone was doubtless from the earliest times known to the Orientals. It is a silicious stone of the quartz family, and is met with generally in rounded nodules, or in veins in trap-rocks; specimens are often found on the sea-shore, and in the beds of streams, the rocks in which they had been imbedded having been decomposed by the elements, when the agates have dropped out. Some of the principal varieties are called chalcedony, from Chalcedon in Asia Minor, where it is found, cornelian, chrysoprase, an apple-green variety colored by oxide of nickel, mocha-stones, or moss agate, which owe their denticrue or tree-like markings to the imperfect crystallization of the coloring salts of magnesium or iron, onyx-stones, blood-stones, &c. &c. Beautiful specimens of the art of engraving on chalcedony are still found among the tombs of Egypt, Assyria, Etruria, &c.

W. H.

Age, OLD. In early stages of civilization, when experience is the only source of practical knowledge, old age has its special value, and consequently its special honors. The Spartans, the Athenians, and the Romans were particular in showing respect to the aged, and the Egyptians had a regulation which has its exact parallel in the Bible (Job xii. 20; Deut. xxxii. 32). Under a triarchial form of government such a feeling was still more deeply implanted. A further motive was superadded in the case of the Jew, who was taught to consider old age as a reward for piety, and a signal token of God's favor. For these reasons the aged occupied a prominent place in the social and political system of the Jews. In private life they were looked up to as the depositaries of knowledge (Job xv. 10); the young were ordered to rise up in their presence (Lev. xix. 32); they allowed them to give their opinion first (Job xxxii. 4); they were taught to regard grey hairs as a "crown of glory" and as the "beauty of old men" (Prov. xxxi. 2). The attainment of old age was regarded as a special blessing (Job v. 29), not only on account of the prolonged enjoyment of life to the individual, but also because it indicated peaceful and prosperous times (Zech. viii. 4; 1 Mac. xiv. 9; Is. xxv. 20). In public affairs age carried weight with

it, especially in the infancy of the state: it formed under Moses the main qualification of those who acted as the representatives of the people in all matters of diligence and deliberation. The old men or Elders thus became a class, and the title gradually ceased to convey the notion of age, and was used in an official sense, like Patres, Senators, and other similar terms. [Elders.] Still it would be but natural that such an office was generally held by men of advanced age (1 K. xii. 8).

W. L. B.

The distinction between θροπόβιστα and προπόβιστα should be remarked. Though the for mer refers always to age, the latter refers occasionally to age (Acts ii. 17; 1 Tim. v. 1; 1 Pet. v. 5), but usually to rank or office. The point is of some interest as regards the age of Paul at the time of his Roman captivity. In Phil. en. 9, the apostle alludes to himself "as an old man" (θροπόβιστα) for the purpose of giving effect by that reminiscence to his entreaty in behalf of Onesimus. Paul is supposed to have been, at the time of writing to Philemon (converted about 30 A.D., at the age of 30, and at Rome 62-4 A.D.), about 60 years old. According to Hippocrates, a man was called προπόβιστα from 49 to 56, and after that was called γέρων. But there was another estimate among the Greeks which fixed the later period (γέρων) at 69. Corey's treatment of this question in his Συναγερμος Περιτομος, p. 157 (Paris, 1581),

"The most impressive image of old age in the N. T., as represented by its appropriate word, is that which occurs in the Savior's touching description of what was to befall the energetic Peter in his last days (5ευρισκόντας). See John xxi. 18. The term applied to Zacchaeus (Luke i. 18) is προπόβιστα. The patriarch Jacob's characterization of a long life, as he looked back upon it from the verge of the grave, has hardly its parallel for truthfulness and pathos in all extant literature. See Gen. xlviii. 8, 9.

2. A'GEE [dissyll.] [Α'ΓΕΕ] [afterlit.]: "Αγε: Alex. Agge; [Comp. Αγεδ: Age]. A Harirate, father of Shammah, one of David's three mightiest heroes (2 Sam. xxiii. 11). In the Pesaita-Syriac he is called "Age of the king's mountain." A'GEEUS (Α'ΓΕΙΟΣ: Aggeus), [1 Esdr. vi. 1; 3 Esdr. i. 49]. [HAGGI].

Agriculture. This, though prominent in the Scriptural narrative concerning Adam, Cain, and Noah, was little cared for by the patriarchs; more so, however, by Isaac and Jacob than by Abraham (Gen. xxv. 12, xxxviii. 7), in whose time, probably, if we except the lower Jordan valley (xiii. 10), there was little regular culture in Canaan Thus Gerar and Shechem seem to have been cities where pastoral wealth predominated. The Hebrews strove with Isaac about his wells; about his cattle there was no contention (xx. 14, xxiv. 28). In Joshua's time, as shown by the story of the "Escoho" (Num. xiii. 24), Canaan was found in an engraver and a cunning workman; and ch. xxxix. 8: "And he made the brecciate of cunning work." Occasionally specimens of agate occur along the coast north of Tortosa, and it is very abundant near Antioch (Antakia), Rob. Phys. Geogr. p. 356. H.

"On the single word "aged" in Phil. ver. 9, the celebrated Laverter preached two of his 32 sermons on the Epistle to Philemon (Prebent ser. 6 Eng. of d. Priest on d. Priest, St. Galen, 1765-6). H.
Agriculture

Agriculture is a much more advanced agricultural state than Jacob had left it in (Deut. viii. 8), resulting probably from the severe experience of famines, and the example of Egypt, to which its people were thus led. The pastoral life was the means of keeping the sacred race, whilst yet a family, distinct from surrounding heathen, locally attached, especially whilst in Egypt. When, grown into a nation, they conquered their future seats, agriculture supplied a similar check on the foreign intercourse and speedy demoralization, especially as regards idolatry, which commerce would have caused. Thus agriculture became the basis of the Mosanic commonwealth (Michaelis, xxviii.-xxi.). It tended to check also the free-living and nomad life, and made a numerous offspring profitable, as it was already honorable by natural sentiment and by law. Thus, too, it indirectly discouraged slavery, or, if, where it existed, made the slave somewhat like a son, though it made the son also somewhat of a slave. Taken in connection with the inalienable character of inheritances, it gave each man and each family a stake in the soil and nurtured a hardy patriotism.

"The land is Mine" (Lev. xxv. 32) was a dictum which made agriculture likewise the basis of the theocratic relation. Thus every family felt its own life with intense keenness, and had its divine tenure which it was to guard from alienation. The prohibition of cultivation in the sabbatical year formed, under this aspect, a kind of rent reserved by the Divine Owner. Landmarks were deemed sacred (Deut. xix. 14), and the inalienability of the heritage was ensured by its reversion to the owner in the year of jubilee; so that only so many years of occupancy could be had (Lev. xxxv. 8-16, 22-25). The prophet Isaiah (v. 8) denounces the contempt of such restrictions by wealthy grantees who sought to "add field to field," erasing families and depopulating districts.

A change in the climate of Palestine, caused by increase of population and the clearance of trees, must have taken place before the period of the X. T. A further change caused by the decrease of skilled agricultural labor, e.g., in irrigation and terrace-making, has since ensued. Not only this, but the great variety of elevation and local character in so small a compass of country necessitates a partial and guarded application of general remarks (Robinson, i. 507, 555, 554, iii. 556; Stanley, 8, 6 P., pp. 119, 124-6). Yet wherever industry is secure, the soil still assert its old fertility. The "Horusin (Terra) is as fertile as Damascus, and its local enjoys the highest reputation. The black and silt, but light, soil about Gaza is said to hold so much moisture as to be very fertile with little rain. Here, as in the neighborhood of Tyre, is a vast olive-ground, and the very sand of the shore is said to be fertile it watered. The Israelites probably found in Canaan a fair proportion of woodland, which their necessities, owing to the discouragement of commerce, must have led them to reduce (Josh. xvii. 18). But even in early times timber seems to have been far less used for building material than among western nations; the Israelites were not skillful hewers, and imported both the timber and the workmen (1 K. vi. 8, 8). No store of wood fuel seems to have been kept; ovens were heated with such things as dung and hay (Lev. x. 12, 15; Mal. iv. 1); and, in any case of sacrifice in an emergency, some, as we should think, manual source of supply is constantly mentioned for he wood (1 Sam. vi. 14; 2 Sam. xiv. 22: 1 K. xix. 21; comp. Gen. xxiii. 3, 6, 7). All this indicates a non-abundance of timber.

Its plenty of water from natural sources made Canaan a contrast to rainless Egypt (Deut. vii. 7 xi. 8-12). Nor was the peculiar Egyptian method alluded to in Deut. xi. 10 unknown, though less prevalent in Palestine. That peculiarity seems to have been restricted in making the fields shallow boxes, like our salt-jeans, surrounded by a raised border of earth to keep in the water, which was then turned from one square to another by pushing aside the mud to open one and close the next with the foot. A very similar method is apparently described by Robinson as used, especially for garden vegetables, in Pal-time. There irrigation (including under the term all appliances for making the water available) was as essential as drainage in our region; and for this the large extent of rocky surface, easily excavated for cisterns and ducts, was most useful. Even the plain of Jericho is watered not by canals from the Jordan, since the river lies below the land, but by rills converging from the mountains. In these features of the country lay its extensive resources to meet the wants of a multiplying population. The lightness of agricultural labor in the plains set free an abundance of hands for the task of terracing and watering; and the result gave the highest stimulus to industry.

The cereal crops of constant mention are wheat and barley, and more rarely rye and millet (?). Of the two former, together with the vine, olive, and fig, the use of irrigation, the plough and the harrow, mention is found in the book of Job (xxvi. 40, xv. 33, xxiv. 6, xxix. 9, xxxix. 10). Two kinds of common in the black variety called "itches," i.e., xxvii. 25, and such pooled plants as beans and lentils, may be named among the staple produce. To these later writers add a great variety of garden plants, c. g., kidney-beans, peas, lettuce, endive, leek, garlic, onion, melon, cucumber, cabbage, etc. (Mechon, Tobit, i. 1, 2). The produce which formed Jacob's present was of such kinds as would keep, and had kept during the famine (Gen. xlviii. 11).

The Jewish calendar, as fixed by the three great festivals, turned on the seasons of green, ripe, and fully-gathered produce. Hence, if the season was backward, or, owing to the imperfections of a non-astronomical reckoning, seemed to be so, a month was intercalated. This rade system was finally retained long after mental progress and foreign intercourse placed a correct calendar within their power; so that notice of a Yomah, etc., second or intercalated Adar, on account of the lands being not yet of caspal size, and the barley not forward enough for the Adil (green sheaf), was sent to the Jews of Babylonia and Egypt (Ugil. de Re Rust, v. 22) early in the season.

The year ordinarily consisting of 12 months was divided into 6 agricultural periods as follows (Tosephita Taanith, ch. 1):

1. SOWING TIME

   Ti'er, latter half

   Tiber. (beginning about)

   Autumnal

   Equinox

   Early racd due

   Marcheswan

   Kishon, former half

   11. UNRIP'T TIME

   Kishon, latter half

   Tebeth

   Shebat, former half.
The produce of the land besides fruit from trees, was technically distinguished as רעננים, including apparently all cereal plants, רדנין (quicquior in silvis siccator, Bux. Lxx.). nearly equivalent to the Latin legumen, and בְּרֵירִים or בְּרֵירָּה, semina hortensia, (since the former word alone was used also generically for all seed, including all else which was liable to tithe, for which purpose the distinction seems to have existed. The plough probably was like the Egyptian, and the process of ploughing mostly very light, like that called scorticato by the Romans ("Syria tenui sudeo arat." Plin. xviii. 47), one yoke of oxen mostly sufficing to draw it. Such is still used in Asia Minor, and its parts are shown in the accompanying drawing: a is the yoke to which the cross beam with yokes, b, is attached; c, the share; d, the handle; e represents three modes of arming the share, and f is a goad with a scraper at the other end, probably for cleansing the share. Mountains and steep places were hoed (Is. vii. 25; Maon. ad Hik. vi. 2; Robinson, iii. 505, 602-3). The breaking up of new land was performed as with the Romans engineered. Such new ground and follow, the use of which latter was familiar to the Jews (Jer. iv. 3; Hos. x. 12), were cleared of stones and of thorns (Is. v. 2; Genara Hierael. ad loc.) early in the year. Sowing or gathering from among thorns" be a proverb for slovenly husbandry (Job v. 5; Prov. xxiv. 29, 31; Robinson, ii. 127). Virgin land was ploughed a second time. The proper words are רכשין, prosceindere, and הָעַֽשָּׁה, offendere, i. e., iterare ut frangantur gloria (by cross ploughing), Varr. de R. R. i. 32; both are distinctively used Is. xxviii. 24. Land already tilled was ploughed before the rains, that the moisture might the better penetrate (Maon. ap. Ugod. de Re Rust. v. 11). Rain, however, or irrigation (Is. xxxii. 20) prepared the soil for the sowing, as may be inferred from the prohibition to irrigate till the gleaning was over, lest the poor should suffer (Pech, v. 2); and such sowing often took place without previous ploughing, the seed, as in the parch
table of the sower, being scattered broadcast, and ploughed in afterwards, the roots of the late crop being so far decayed as to serve for manure (Fol-
AGRICULTURE

Fig. 3 — Goats treading in the grain, when sown in the field, after the water has subsided. — (Wilkinson, Tomba, near the Pyramids.)

Fig. 4. — Corn growing in patches. — (Surenhusius.)

the ploughing was best done dry ("dam sieca tellece fitet," Virg. Georg. i. 214); and there, though not generally, the serratio (יוֹרֵר, der. יְרָרָה, to cleanse), and even the leuto of Roman husbandry, performed with tubaha affixed to the sides of the share, might be useful. But the more formal routine of heavy western soils must not be made the standard of such a naturally fine tilth as that of Palestine generally. "Sunt enim regionum proprius numerus, sicut Egypti et Africa, in quibus agricola post semem ante messem semem non attigit . . . . . in his autem locis ubi daciescentur serrito," f. Columella, ii. 12. During the rains, if not too heavy, or between their two periods, would be the best time for these operations; thus 70 days before the passover was the time prescribed for sowing for the "wave-sheaf," and, probably, therefore, for that of barley generally. The oven were urged on by a goad like a spear (Judg. iii. 31). The custom of watching ripening crops and thrashing floors against theft or damage (Robinson, i. 400, ii. 18, 81, 109) is probably ancient. Thus Bezale slept on the floor (Ruth iii. 4, 7).* Barley ripened a week or two before wheat, and as fine harvest weather was certain (Prov. xxvi. 1; 1 Sam. xii. 17; Am. iv. 7), the crop chiefly varied with the quantity of timely rain. The period of harvest must always have differed according to elevation, aspect, &c. (Robinson, i. 430, 551.) The proportion of harvest gathered to seed sown was often vast; a hundred-fold is mentioned, but in such a way as to signify that it was a limit rarely attained (Gen. xxi. 12, Matt. xiii. 8).

Fig. 5. — Sowing. — (Surenhusius.)

Fig. 6. — Sowing. — (Surenhusius.)

Fig. 7. — Sowing. — (Surenhusius.)

* This practice continues to the present day. Speaking of a night spent near Hbron, Robinson (ii. 446, ed. 1841) says: "The owners of the crops came every night and slept upon the" threshing floors to guard them; and this we had found to be universal in all the region of Gaza." Thomson (Land and Book, ii. 518) refers to the same custom. See RUTH, Notes II.
AGRICULTURE

(Wilkinson, ii. p. 4), can hardly have been unknown to the Hebrews. Sowing a field with divers seeds was forbidden (Deut. xxii. 9), and minute directions are given by the rabbis for arranging a seeded surface with great variety, yet avoiding juxtaposition of heterogenea Such arrangements are shown in the annexed drawings. Three furrows' interval was the prescribed margin (Colenso, ii. 6). The blank spaces in fig. 5, a and b, represent such margins, tapering to save ground. In a vineyard wide spaces were often left between the vines, for whose roots a radius of 4 cubits was allowed, and the rest of the space cropped: so herb-gardens stood in the midst of vineyards (Pethah, v. 5). Fig. 9 shows a corn-field with olives about and amidst it.

Fig. 8.—Sowing. — (Surenhusius.)

Fig. 9.—Corn-field with Olives. — (Surenhusius.)

in Jer. and Joel, either the ears merely in the "Piscian" method (Varr. de Re Rast. i. 50), or stalk and all, or it was pulled by the roots (Pethah, v. 10). It was bound in sheaves—a process prominent in Scripture, and described by a peculiar word, נֵטֵל, in the form of a helmet, נֵטֶלְהֵם of a turban (of which, however, see another explanation, Buxt. Lex. v. נֵטֵלֶה, or נֵטֶלֶה of a cake. The sheaves or heaps were carted (Am. ii. 13) to the floor—a circular spot of hard ground, probably, as now, from 50 to 80 or 100 feet in diameter. Such floors were probably permanent, and became well known spots (Gen. i. 10, 11; 2 Sam. xxiv. 16, 18). On these the oxen, &c., forbidden to be muzzled (Deut. xxv. 4), trampled out the grain, as we find represented in the Egyptian monuments. At a later time the Jews used a threshing sledge called מִנֶּרֶג (1 Sam. xi. 15: 2 Sam. xxiv. 22: 1 Chr. xvi. 29), probably resembling the מִנֶּרֶג, still employed

Fig. 10.—Reaping wheat. — (Wilkinson, Tomb of the Kings — Thebes.)

The wheat, &c., was reaped by the sickle (the word for which is רֵכֶשׁ in Deut., and רֶכֶשׁ in)

\]

well as cut or tore the straw, which thus became fit for fodder. It appears to have been similar to the Roman tribulum and the phatellum Panicum (Varr. de R. R. ii. i. 52). Lighter grains were beaten out with a stick (Is. xxviii. 27). Barley was sometimes soaked and then parceled before treading out, which got rid of the pellicle of the grain. See further the Antiquitates Tiburtina, Ugolini, vol. 29.

The use of animal manure is proved frequent by such recurring expressions as “dung on the face of the earth, field,” &c. (Ps. lxxiii. 10; 2 K. ix. 37; Jer. viii. 2, &c.). A rabbi limits the quantity to three heaps of ten half-cor. or about 380 gallons, to each (\(\frac{1}{3}\) of a sphen of grain. Gem.).

The great usefulness of sheep to the soil unrecognized (ibid. 4), though, owing to the general distinctness of the pastoral life, there was less scope for it. Vegetable ashes, burnt stable, &c. were also used.

\[\text{Fig. 16. — Treading out the grain by oxen, and winnowing. 1. Raking up the ears to the centre. 2. The}
\]

driver. 3. Winnowing, with wooden shovels. — (Wilkinson, Tiberi.)

The "shovel" and "fan" (Fig. 16 and Fig. 16) were, as xxx. 24, but their precise difference is very doubtful, indicate the process of winnowing — a conspicuous part of ancient husbandry (Ps. xxxv. 5; Job. xxi. 18; Is. xvi. 13), and important owing to the slowly threshing. Levitizing was the favorite (Ruth iii. 2) when there was mostly a breeze. The (\(\pi\)\(\nu\)\(\pi\)\(\varphi\)) to scatter = (\(\pi\)\(\nu\)\(\pi\)\(\omega\)). (Matt. iii. 12; Hom. Riol. xiii. 588), was perhaps a broad shovel which threw the grain up against the wind; while the (\(\pi\)\(\nu\)\(\pi\)\(\varphi\)\(\tau\)) (shovel to (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\))? may have been a fork (still used in Palestine for the same purpose), or a broad basket in which it was tossed. The heap of produce gathered in rent was sometimes customarily so large as to cover the (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)) (Horae Maior. ix. 2). This favors the latter view. So the (\(\pi\)\(\nu\)\(\pi\)\(\omega\)) was a corn-measure in Cynus, and the (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)) a (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)). (Liddell and Scott, &c. s. v. (\(\pi\)\(\nu\)\(\pi\)\(\omega\)). The last process was the shaking in a sieve, (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)), a (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)), to separate dirt and refuse (Am. ix. 9). [See Luke xxi. 31.]

Fields and groves were not commonly enclosed; vineyards mostly were, with a tower and other buildings (Num. xxiii. 24; Ps. lxxv. 12; Is. v. 5; Matt. xxi. 31; comp. Judg. vi. 11). Banks of mud from ditches were also used.

With regard to occupancy a tenant might pay a fixed money rent (Cant. viii. 11) — in which case he was called (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)), and was compellable to keep the ground in good order for a stipulated share of the fruits (2 Sam. ix. 10; Matt. xxi. 34), often a half or a third; but local custom was the only rule: in this case he was called (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)), and was more protected, the owner sharing the loss of a part of spoil or crop; so, in case of locusts, blight, &c., the year’s rent was to be abated; or he might receive such share as a salary — an inferior position — when the term which described him was (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)) (\(\pi\)\(\tau\)\(\nu\)\(\rho\)\(\varepsilon\)). It was forbidden to sow the during a short occupancy these leases for terms of years would seem to have been common), lest the soil should be un lucrably exhausted (comp. Geo. v. 77). A passer-by might eat any quantity of corn or grapes, but not reap or carry off fruit (Pent. xxi. 24-25; Matt. xvi. 11).

The rights of the corner to be left, and of gleanings (GLEANING), formed the poor man’s claim on the soil for support. For his benefit, too a sheaf forgotten in carrying to the floor was to be left; so also with regard to the vineyard and the olive grove (Lev. xiv. 9, 10; Pent. xxiv. 19, 21).
AGrippa

Besides there seems a probability that every third year a second title, besides the priests', was paid for the poor (Deut. xiv. 28, xxvi. 12; Am. iv. 4; Tob. i. 7; Joseph. Ant. iv. 8). On this doubtful point of the poor man's title (§ 27 אַנְוָה) see a learned note by Surenhusius, ad Deus, viii. 2. These rights, in case two poor men were partners in occupancy, might be conveyed by each to the other for half the field, and thus retained between them (Mainon, ad Deus, v. 9). Sometimes a charitable owner declared his ground common, when its fruits were to be the subsistence of the poor. For three years the fruit of newly-planted trees was deemed unincumbered and forbidden; in the 4th it was holy, as first-fruits; in 5th it might be ordinarily eaten (Midr. on Or. beh. pru'in). For the various classical analogies, see Dict. of Ge. and Rom. Antiq. s. v. H. H.

AGrippa. [Herod.]

A'Gur (אָגוּר [collector]; Congregans). The son of Jakeh, an unknown Hebrew sage, who uttered or collected the sayings of wisdom recorded in Prov. xxx. Ewald attributes to him the authorship of Prov. xxx. 1-xxxi. 9, in consequence of the similarity of style exhibited in the three sections therein contained; and assigns as his date a period not earlier than the end of the 7th or beginning of the 6th cent. B. C. The Rabbins, according to Rashi, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" (fromג פאוש, he gathered), and is elsewhere called "Kohledeth." Bunsen (Bibehcer-k, p. exxviii.) contends that Agur an inhabitant of Massa, and probably a descendant of one of the 50 Simeonites, who, in the reign of Hezekiah, adorned the Amalekites from Mount Seir. Hitzig goes further, and makes him the son of the queen of Massa and brother of Lemuel (Die Sprache Sol. p. 311, ed. 1858). [Massa.] In Castell's Lex. Heptag. we find the Syriac word ܐܓܘܪ, āqūr, defined as signifying "one who applies himself to the studies of wisdom." There is no authority given for this but the Lexicon of Bar Bohad, and it may have been derived from some traditional interpretation of the proper name Agur.

W. A. W.

Ahab (אָהָב [father's brother]; Ἄχαδῆ; Achab), son of Omri, seventh king of the separate kingdom of Israel, and second of his dynasty. The great lesson which we learn from his life is the depth of wickedness into which a weak man may fall, even though not devoid of good feelings and amiable impulses, when he abandons himself to the guidance of another person, resolute, unscrupulous and depraved. The cause of his ruin was his marriage with Jezebel, daughter of Ethbaal, or Ethbal, king of Tyre, who had been priest of Astarte, but had usurped the throne of his brother Hazili (compare Joseph. Ant. viii. 13, 2, with c. Apion. i. 18). If she resembles the Lady Macheth of our great dramatist, Ahab has hardly Macheth's energy and determination, though he was probably by nature a better man. We have a comparatively full account of Ahab's reign, because it was distinguished by the ministry of the great prophet Elijah, who was brought into direct collision with Jezebel, when she ventured to introduce into Israel the impure worship of Baal and her father's goddess Astarte. In obedience to her wishes, Ahab caused a temple to be built at Baal in Samaria itself, and an ornamental grove to be consecrated to Astarte. With a fixed determination to extirpate the true religion, Jezebel hunted down and put to death God's prophets, some of whom were concealed in caves by Obadiah, the governor of Ahab's household from whose hand the Fanatici's were carried on with such splendor that we read of 450 prophets of Baal, and 400 of Asherah. (See 1 K. xviii. 19, where our version follows the LXX. in erroneously substituting "the groves" for the proper name Asherah, as again in 2 K. xxi. 7, xxiii. 6.) [Asaph.] How the worship of God was restored, and the idolatrous priests slain, in consequence of "a sore famine in Samaria," will be more properly related under the article Elisha. But heathenism and persecution were not the only crimes into which Jezebel led her yielding husband. One of his chief tastes was for splendid architecture, which he showed by building an ivory house and several cities, and also by ordering the restoration and fortification of Jericho, which seems to have belonged to Israel, and not to Judah, as it is said to have been rebuilt in the days of Ahab, rather than in those of the contemporary king of Judah, Jehoshaphat (1 K. xvi. 44). But the place in which he chiefly indulged this passion was the beautiful city of Jezeel (now Sara), in the plain of Esdraelon, which he adorned with a palace and park for his own residence, though Samaria remained the capital of his kingdom. Jezeel standing in the same relation to it as the Versailles of the old French monarchy to Paris (Stanley, § t. p. 244). Desiring to add to his pleasure-grounds there the vegetation of his neighboring Naboth, he proposed to buy it or give land in exchange for it; and when this was refused by Naboth, in accordance with the Mosaic law, on the ground that the vineyard was "the inheritance of his fathers" (Lev. xxv. 23), a false accusation of blasphemy was brought against him, and not only was he himself stoned to death, but his sons also, as we learn from 2 K. ix. 29. Elijah, already the great indicator of religion, now appeared as the ascender of morality, and declared that the entire extirpation of Ahab's house was the penalty appointed for his long course of wickedness, now crowned by this atrocious crime. The execution, however, of this sentence was delayed in consequence of Ahab's deep repentance. The remaining part of the first book of Kings is occupied by an account of the Syrian wars, which originally seems to have been contained in the last two chapters. It is much more natural to place the 20th chapter after the 21st, and so bring the whole history of these wars together, than to interrupt the narrative by interposing the story of Naboth between the 20th and 22d, especially as the beginning of the 22d seems to follow naturally from the end of the 20th. And this arrangement is actually found in the LXX. and confirmed by the narrative of Josephus. We read of three campaigns which Ahab undertook against Benhadad, king of Damascus, two defensive and one offensive. In the first, Benhadad laid siege to Samaria, and Ahab, encouraged by the patriotic counsels of God's prophets, who, next to the true religion, valued most deeply the independence of His chosen people, made a sudden attack on him whilst in the plentitude of arrogant confidence he was banquetting in his tent with his 32 vassal kings. The Syrians were totally routed, and fled to Damascus.
Next year Benhadad, believing that his failure was owing to some peculiar power which the god of Israel exercised over the hills, invaded Israel by way of Aphek, on the E. of Jordan (Stanley, S. of P. App. § 6). Yet Ahab's victory was so complete that Benhadad himself fell into his hands: but was released (contrary to the will of God) and was not punished by the capture of garrison towns in the kingdom of Syria, which the treaty of peace provided for the recovery of. But as Benhadad was one of the cities which Benhadad agreed to restore, why did Ahab wait for three years to enforce the fulfillment of the treaty? From this difficulty, and the extreme bitterness shown by Benhadad against Ahab personally (1 K. xxii. 31), it seems probable that this was not the case (or at all events that the Syrians did not so understand the treaty), but that Ahab, now strengthened by Jehoshaphat, who must have felt keenly the paramount importance of crippling the power of Syria, originated the war by assaulting Ramoth without any immediate expectation. In any case, God's blessing did not rest on the expedition, and Ahab was told by the prophet Micah that it would fail, and that the prophets who advised it were murdering him to his ruin. For giving this warning Micah was imprisoned; but Ahab was so far roused by it as to take the precaution of disguising himself, so as not to offer a conspicuous mark to the archers of Benhadad. But he was slain by a certain man who drew a bow at a venture: and the king died up in his chariot for a time, yet he died towards evening, and his army dispersed. When he was brought to be buried in Samaria, the dogs licked up his blood as a servant was washing his chariot: a partial fulfillment of Elijah's prediction (1 K. xii. 19), which was more literally accomplished in the case of his son (2 K. ii. 26). Josaphat, however, substitutes Josiah for Samaria in the former passage (2 K. xii. 6), the date of Ahab's succession is 9th b.c., of his death, b.c. 897.

2. [Aχαβας: Heb. in Jtr. xxix. 22, Ἱαβαθ]. A lying prophet, who deceived the captive Israelites in Babylon, and was buried to death by Nebuchadnezzar, Jtr. xxix. 22. G. E. C.

AHAUSHAR (Avic. § 'Aharah) [after the brother, but uncertain]: Ἰαβαθ [Vat. 1. 'Aharah]. The third son of Benjamin (1 Chr. viii. 1). See AHER, AIVRAIM.

AHAUSHAR (Avic. § 'Aharah) [after the son of Sem], a name occurring in an obscure fragment of the genealogies of Judah, "the families of Aharah", apparently traced their descent through Ozi to Ashur, the posthumous son of Hemam. The tomb of R. Joseph on Chronicles identifies him with Hur the firstborn of Miriam." (1 Chr. iv. 8)

The LXX. appear to have read Ἰαβαθ, "brother of Rechab," or according to the Compl. ed. 98, "brother of Rechab." W. A. W.

AHA'SAI (3 syl.) [Avic. § 'Ahasai]: om. in LXX. [but Comp. Σωσαῖ]: Ahazi. A priest, ancestor of Maasiai or Ahasai ( Neh. xii. 13). He is called JAHZEAI in 1 Chr. ix. 12. W. A. W.

AHA'SAI (3 syl.) [Avic. § 'Ahasai]: or Ἰαβαθ [Vat. -Bar]; Alex. ὁ ἄρωτος [Comp. Ἰαβαθ]: Ahasai. The father of Eliphlet, one of David's thirty-seven captains (2 Sam. xxiii. 34). In the corrupt list in 1 Chr. xii. 35, Eliphelet appears as "Eliphal the son of Ur." The LXX. regarded the name Ahasai as denoting not the father but the family of Eliphlet. [According to Genesis the name signifies "I have taken refuge in Jehovah."] W. A. W.

ASHASHYVAROSH. Noted in Ezra iv. 6 in the margin of the A. V., as the Hebrew form of Ahasai.

AHA'SAI (Avic. § 'Ahasai): Ακσαομογος [Vat. 1. 'Aharaios]; LXX. [in Ezra iv. 6]; but Ακσαομογος [Alex. Ακσαομογος, Comp. Aδι Ακσαομογος]. Tob. xiv. 15: Ahasai, Α. V. [in Tob.], Vulg., the name of one Median and two Persian kings mentioned in the Old Testament. It may be desirable to prefix to this article a chronological table of the Medo-Persian kings from Cyaxares to Artaxerxes Longimanus, according to their ordinary classical names. The Scriptural names conjectured to correspond to them in this article and A Toilet are added in italics.

1. Cyaxares, king of Media, son of Phraortes, grandson of Belesus and conqueror of Nineveh, began to reign 6 b.c. 634. Ahasaius.

2. Astyages his last king of Media, b.c. 294. Durian the Mede.

3. Cyrus, son of his daughter Mandane and Cambyses, a Persian noble, first king of Persia, 539.

5. A Median usurper, who personates Smerdis, the younger son of Cyrus, 521. Ahasiurus.

6. Darius Hystaspis, raised to the throne on the overthrow of the Magi, 521. Durian.

The name Ahasaius or Ashashyvarosh is the same as the Sanscrit Ashas, a king, which appears as Ashas in the arrow-headed inscriptions of Persepolis, and to this in its Hebrew form: see this form in its Greek forms is Xerxes, explained by Herod. vi. 58) to mean άρωτος, a signification sufficiently near that of king.

1. In Dan. iv. 1, Ahasaius (LXX. Χαραθος, Thesb. Ακσαομογος) is said to be the father of Cyrus the Mede. Now it is almost certain that Cyaxares is a form of Ahasaius, greaved into other contexts.

* This form in A. V. 7, ch. 10 may have been intended to be read Ahasaius, a being used elsewhere.

AHA'SAI (Avic. § 'Ahasai): אחשיאס [Comp. אחשא]: Ahasai. A phrase occurring in an obscure fragment of the genealogies of Judah, "the families of Aharah," apparently traced their descent through Ozi to Ashur, the posthumous son of Hemam. The tomb of R. Joseph on Chronicles identifies him with Hur the firstborn of Miriam." (1 Chr. iv. 8)
AHASUERUS

Ahaz with the prefix Cy- or Kai, common to the
Kabirian dynasty of kings (Malcolm Persis, ch. iii.), with which may be compared Kai Khosro of the
Persian kings.

The son of this Cyaxares was Astyages, and it is no improbable conjecture that Darius the Mede was Astyages, set over Babylon
as viceroy by his grandson Cyrus, and allowed to
live there in royal state. (See Rawlinson's Herodotus, vol. i. Essay iii. § 11.) [Darius.] This first Ahasuerus, then, is Cyaxares, the con-
queror of Nineveh. And in accordance with this
view, we read in Tobit, xiv. 15, that Nineveh was
taken by Nabuchodonosor and Assuerus, i. e. Cy-
axares.

2. In Ezra iv. 6, the enemies of the Jews, after
the death of Cyrus, desirous to frustrate the build-
ing of Jerusalem, send accusations against them to
Ahasuerus, king of Persia. This must be Camb-
yxes. For we read (v. 5) that their opposition con-
tinued from the time of Cyrus to that of Darius, and Ahasuerus and Artaxerxes, i. e. Cambyses and the Perso-Smerdils, are mentioned as reigning be-
tween them. [Artaxerxes.] Xenophon (Cyr. viii.) calls the brother of Cambyses, Tanyoxares, i. e. the younger Oxares, whence we infer that the elder Oxares or Ahaseris, or Ahasuerus, was Camb-
yxes. His constant wars probably prevented him
from interfering in the concems of the Jews. He
was chiefly called after his grandfather, who was
not of royal race, and therefore it is very likely that
he also assumed the king's name or title of Oxares
or Cyaxares which had been borne by his most illust-
rious ancestor.

3. The third is the Ahasuerus of the book of
Esther. It is needless to give more than the heads of
the well-known story. Having divorced his
queen Vashti for refusing to appear in public at
a banquet, he married four years afterwards the Jewess Esther, cousin and ward of Mordecai. Five years
after this, Haman, one of his counsellors, having
been slighted by Mordecai, prevailed upon him to
order the destruction of all the Jews in the empire.
But before the day appointed for the massacre,
Esther and Mordecai overthrew the influence which
Haman had exercised, and so completely changed
his feelings in the matter, that they induced him to
put Haman to death, and to give the Jews the right
of self-defense. This they used so vigorously that
the Jews of all the four hundred and twenty
provinces.

New from the extent assigned to the Persian em-
pire (Esth. i. 1), "from India even unto Ethiopia," it
is proved that Darius Hystaspis is the earliest
possible king to whom this history can apply, and it is
hardly worth while to consider the claims of any
after Artaxerxes Longimanus. But Ahasuerus
cannot be identical with Darius, whose wives were
the daughters of Cyrus and Otanes, and who in
name and character equally differs from that So
dish tyrant. Neither can he be Artaxerxes Longimanus.
Although as Artaxerxes is a compound of Xerxes,
there is less difficulty here as to the name. But
in the first place the character of Artaxerxes, as given
by the Htarch and by Diodorus (xiv. 71), is also very
unlike that of Ahasuerus. Besides this, in Ezra
vii. 1–7, 11–26, Artaxerxes, in the seventh year of
his reign, issues a decree very favorable to the Jews,
and it is unlikely, therefore, that in the twelfth
(Earth. iii. 7) Haman could speak to him of them
as if he knew nothing about them, and persuade
him to sentence them to an indiscriminate mas-
acre. We are therefore reduced to the belief that
Ahasuerus is Xerxes (the names being, as we have
seen, identical); and this conclusion is fortified by
the resemblance of character, and by certain chron-
ological indications. As Xerxes scourged the sea,
and put to death the engineers of his bridge be-
cause their work was injured by a storm, so Ahas-
uerus repudiated his queen Vashti because she
would not violate the decorum of her sex, and
ordered the massacre of the whole Jewish people to
gratify the malice of Haman. In the third year
of the reign of Xerxes was held an assembly to ar-
range the Grecian war (Herod. vii. 7 4). In the
third year of Ahasuerus was held a great feast and
assembly in Shushan the palace (Esth. i. 3). In the
seventh year of his reign Xerxes returned de-
feated from Greece, and consigned himself by the
pleasures of the harem (Herod. ix. 108). In the
seventh year of his reign "fair young virgins were
sought" for Ahasuerus, and he replaced Vashti by
marrying Esther. The tribute he "laid upon the
land and upon the isles of the sea (Esth. x. 1) may
well have been the result of the expenditure and
ruin of the Grecian expedition. Throughout the
book of Esther in the LXX, "Αραχαριθέων is writ-
ten for Ahasuerus, but on this no argument of any
weight can be founded.

AHAVA (אוהה [water, Gen.]: Εὐδί [Vat. Ewvi, Alex. Ewv]; [in Ezrrv. viii. 21, 31] δ' Αυστ [Vat. Ousv, Alex. Aôs], a place (Ezrrv. viii.
15), or a river (ר̣ח̣), (vii. 21, 31), on the banks of which Ezra collected the second expedition which returned with him from Babylon to Jerusalem.

Various have been the conjectures as to its locality; e. g. Adontes (Le Clerc and Mauzret), or perhaps Aveli (Hâvrecr-n, see Winet); the Great Zab
(Europ) or Diusa (Mand. xvi. 15), the spring of bitumen. But see Rawlinson's Herodotus, i. 316, note.

In the apocryphal Esdras [1 Esdr. viii. 41, 61]
the name is given θεσσάρης. Josephus (Ant. xi. 5, §
merely says εϊς το πνευμα του Ευρυστέρου. G.

AHAZ (אָחוֹז, possessor: "Aχεψ: Joseph.
[Achzq: Achaz].) 1. Ahas, eleventh (twelfth?)
king of Judah, son of Jotham, ascended the throne
in the 20th year of his age, according to 2 K. xvi. 2.

But this must be a transcriber's error for the 25th,
which number is found in one Hebrew MS., the
LXX, the Peshito, and Arabic version of 2 Chr.
xxvii. 1; for otherwise, his son Hezekiah was born
when he was eleven years old (so Clinton, Festi
Heli, vol. i. p. 318). At the time of his accession,
Rezin king of Damascus and Pekah king of Israel
had recently formed a league against Judah, and
they proceeded to lay siege to Jerusalem, intending
to place on the throne Ben Tabeal, who was not a
prince of the royal family of Judah, but probably
a Syrian noble. Upon this the great prophet
Isaiah, full of zeal for God and patriotic loyalty to
the house of David, hastened to give advice and
encouragement to Ahaz, and it was probably owing
to the spirit of energy and religious devotion which
he poured into his counsels, that the allies failed
in their attack on Jerusalem. Thus much, together
with anticipations of danger from the Assyrians,
and a general picture of weakness and unfaithful-
ness both in the king and the people, we find in

AHASUERUS

see
AHAZIAH

the famous prophecies of the 7th, 8th, and 9th chapters of Isaiah, in which he seeks to animate and support them by the promise of the Messiah. From 2 K. xvi. and 2 Chr. xxviii. we learn that the allies took a vast number of captives, who, however, were restored in virtue of the remonstrances of the prophet Obed, and that they also inflicted a most severe injury on Jehu by the capture of Elath, a flourishing port on the Red Sea, in which, after expelling the Jews, they reestablished the Edonites (according to the true reading of 2 K. xvi. 6, הַֽשִּׁלָּה for הַשָּׁלָה). He purchased this help at a costly price. He became tributary to Tidht-pileser, sent him all the treasures of the Temple and his own palace, and even appeared before him in Damascus as a vassal. He also ventured to seek for safety in heathen ceremonies; making his son pass through the fire to Moloch, consulting wizards and necromancers (Is. viii. 19), sacrificing to the Syrian gods, introducing a foreign altar from Damascus, and probably the worship of the heavenly bodies from Assyria and Babylon, as he would seem to have set up the houses of the sun mentioned in 2 K. xxii. 11 (cf. 2 Macc. vii. 13); and the altar on the top (or roof) of the upper chamber of Ahaz" (2 K. xxiii. 12) were connected with the adoration of the stars. We see another and blameless result of this intercourse with an astronomical people in the "sundial of Ahaz." Is. xxxviii. 8. 9. He died after a reign of 16 years, lasting c. 740-724. G. E. L. C.

2. (Ahaz). A son of Micah, the grandson of Jonathan through Mehemal or Mephibosheth (1 Chr. xxii. 35, 36, ix. 42). W. A. W.

AHAZIAH (אַחָזִיָּה, Ἀχαζιάς, whom Jeh- horah sanctified: ὁ Ἰεχωρά, ἀπὸ ὑποτελεῖς, 1). Son of Ahaz and Jeroboam, and eighth king of Israel. After the battle of Ramoth in Gilead [AHAE] the Syrians had the command of the country along the east of Jordan, and they cut off all communication between the Israelites and Moab- ites, so that the vassal king of Moab refused his yearly tribute of 100,000 dollars and 100,000 rams with their wool (comp. Is. xvi. 1). Be're Ahaziah could take measures for enforcing his claim, he was severely injured by a fall through a lattice in his palace at Samaria. In his health he had worshipped his mother's gods, and now he sent to inquire of the oracle of Baalzabub in the Philistine city of Ekron whether he should recover his health. But Elijah, who now for the last time exercised the prophetical office, rebuked him for this impiety, and unannealed to him his approaching death. He reigned two years (c. 836, 835). The only other recorded transaction of his reign, his endeavor to join the king of Judah in trading to Typhir, is more likely related under Jehoshaphat (2 K. xxii. 50 ff.: 2 K. i. 24 Chr. xx. 35 ff.).

2. Fifth [sixth] king of Judah, son of Jehoram and Athaliah, daughter of Ahah, and therefore nephew of the preceding Ahaziah. He is called

AHAZIAH, 2 Chr. xxi. 6, probably by a copyist's error, and Jehoahaz, 2 Chr. xxi. 17. Ewald (Geschichte des Volkes Israel, iii. 525) thinks that his name was changed to Ahaziah on his accession, but the LXX. read ὁ Ἰεχωρά for Jehoahaz, and with this agree the Pesebi, Chalde, and Arab. So too, while writing in the 10th month of his 22 years old reign, we find in 2 Chr. xxii. 2, that his age at that time was 42. The former number is certainly right, as in 2 Chr. xxi. 5, 20, we see that his father Jehoram was 40 when he died, which would make him younger than his own son, so that a transcriber must have conflated 22 (22) and 22 (42). Ahaziah was an idler, "walking in all the ways of the house of Ahah, and he allied himself with his uncle Jehoram king of Israel, brother and successor of the preceding Ahaziah, against Hazael, the new king of Syria. The two kings were, however, feasted at Ramoth, where Jehoram was so severely wounded that he retired to his mother's palace at Jezreel to be healed. The union between the uncle and nephew was so close that there was great danger lest heathenism should entirely overspread both the 10th new kingdoms, but this was prevented by the great revolution carried out in Israel by Jehu under the guidance of Elisha, which invaded the house of David and elsewhere only less severe than those which exterminated the house of Omri. It broke out while Ahaziah was visiting his uncle at Jezreel. As Jehu approached the town, Jehoram and Ahaziah went out to meet him, either from not suspecting his designs, or to prevent them. The former was shot through the heart by Jehu; Ahaziah was pursued as far as the pass of Gur, near the city of Ibleam, and there mortally wounded. He died when he reached Megiddo. But in 2 Chr. xxii. 9, it is said that Ahaziah was found hidden in Samaria after the death of Jehoram, brought to Jehu, and killed by his orders. Attempts to reconcile these accounts may be found in Pole's Synopsis, in Lightfoot's Horae, of Old Testament. (in loc.), and in Davidson's Text of the Old Testament, part ii. book li. chapter xiv. Ahaziah reigned one year, c. 851, called the 12th of Jehoram, king of Israel, 2 K. vii. 25, the 11th of 2 K. i. 29. His father therefore must have died before the 11th year of Jehoram was concluded (2 K. xxiv. 1. 32). G. E. L. C.

* It being possible that the two accounts, taken singly, are fragmentary, they may supplement each other. Ahaziah escaping "by the way of the garden house," Jehu ordered his men to pursue and slay him in his chariot (2 K. ix. 27): but being too swift for his pursuers, he reached Samaria and there concealed himself for a time, till Jehu, "executing judgment upon the house of Ahah," sought him out, and had him put to death (2 Chr. xxii. 8, 9). For the fuller circumstances of the death we turn to 2 K. ix. 27. Jehu ordered his captive to be taken (perhaps under some pretense of a friendly object) "to the going up (ascent) to Gur near Ibleam," and there he was slain in his chariot (i.e. received the deadly blow there, though he escaped and actually died at Megiddo). According to another slightly varied combination, Ahaziah may have managed, after being brought before Jehu from his place of concealment, to escape again at the expense of being decoyed to Gur for execution, may have been overtaken there as he fled in his chariot, and put to death as before stated. It is worth
noticing (see the Hebrew text and the italics in the A. V.; "And they did so") that the slaying of Abiazah at Gush (2 K. ix. 27) stands loosely related to what precedes, as if his being slain there was the final execution of John's order after various delays had intervened. See Keil, Comm. ab, die Bücher der Könige, p. 402; and Zeller's Bold. Weis., p. 42. [Azariah 12.] H.

AHIBAN (גַּיֶּם), [brother of the wise, or brotherly: ] "Aχιβάτρι. Alex. Οὐγα [Abl. Οὐγά; Comp. Αἴβατρ] Meibom.). Son of Abishur, by his wife Abihail (1 Chr. li. 29). He was of the tribe of Judah. W. A. W.

ACHER (גַּיֶּם [another]: ] "Αψ [Vat. M. Ἀψ; Comp. Ἀχέρ]:) Ancestor of Hushim, or rather "the Hushim," as the plural form seems to indicate a family rather than an individual. The name occurs in an obscure passage in the genealogy of Benjamin (1 Chr. vii. 12). Some translators consider it as not a proper name at all, and render it literally "another," because, as Rashi says, Ezra, who compiled the genealogy, was uncertain whether the families belonged to the tribe of Benjamin or not. It is not improbable that Acher and Ahiram (Num. xxvi. 38) are the same: unless the former belonged to the tribe of Dan, whose genealogy is omitted in 1 Chr. vii. Hushim being a Danite as well as a Benjamite name.

AHIIH (גַּיֶּם, brother: ἀδελφὸς: friend). 1. A Gadite, chief of a family who lived in Gilgal in Bashan (1 Chr. v. 13), in the days of Judah, king of Israel. By the LXX. and Vulgate the word was not considered a proper name. [But for Βοίδ ἀδελφὸς of the Roman edition, Vat. M. has Ζαβουχαυα (H. Ζαβουχαυα), and Alex. with 7 other MSS. Αχιεβοι = Α.]

2. (Αχιε': [Vat. M. Αχιεων, Η. Αχιεων; Ἀκί]:) A descendant of Shamer, of the tribe of Asher (1 Chr. vii. 34). The name, according to Gesenius, is a contraction of AHIJAH.

AHIIAH. [ΑΗΙΑΗ.]

AHIIAM (גַּיֶּם, for גַּיֶּם, father's brother). Gesen.: [in 2 S.] "Aχιεων: [Abl. Αχιεων; Comp. Αχιεων: in 1 Chr. Αχιεων: Vat. Αχιους; Comp. Alex. Αχιευς: Αχιεον], son of Sharrar the Hararite (or of Saar, 1 Chr. xi. 35), one of David's 30 mighty men (2 Sam. xxiii. 33).

AHIIAN (גַּיֶּם: ] "Ακι: [Vat. Αιαοι: Alex. Αιαοι; Ἀκι]:) A Manasseh of the family of Shemida (1 Chr. vii. 19). W. A. W.

AHIIEZER (גַּיֶּם, [brother of help, or God is help]: ] "Αχιεζηρ: Ahiiezer). 1. Son of Ammishaddai, hereditary chieftain of the tribe of Dan under the administration of Moses (Num. i. 13, ii. 35, vi. 66, [71, x. 23]).

2. The Benjamite chief of a body of archers at the time of David (1 Chr. xii. 3). R. W. B.

AHIIHU (גַּיֶּם, [brother = friend, of the Jews, or of renown]:] "Αχιεβοι: [Alex Αχιεβοι: Αχιους]: Ahiob). 1. Son of Shelomi, and prince of the tribe of Asher, selected by God to judge Shashm and Eezar in the division of the Promised Land (Num. xxxvii. 27).

2. (גַּיֶּם, [brother = friend, of union]: ] "Αχιους: [Vat. Αιεχειους: Alex. Αιεχεις; Comp.}
AHIKAM

3. [LXX. αἵκαμος αὑτῷ: Aĥīkām.] Son of Jerahmeel (1 Chr. ii. 25).

4. [Ahih.] One of David's mighty men, a Peleonite (1 Chr. xi. 36).

5. [LXX. ὁ τοιοῦτος αὐτῶν: Aĥīkās.] A Levite in David's reign, who was over the treasures of the house of God, and over the treasures of the dedicated things (1 Chr. xxvii. 29).

6. [Ahih.] One of Solomon's princes, brother of Hishai, and son of Shishai (1 K. iv. 5).

7. [Ahih.] A prophet of Shiloah (1 K. xiv. 2), hence called the Shilonite (xi. 19). In the days of Solomon and of Jeroboam king of Israel, of whom we have two remarkable prophecies extant: the one in 1 K. xi. 33–39, addressed to Jeroboam, announcing the rending of the ten tribes from Solomon, in punishment of his idolatries, and the transfer of the kingdom to Jeroboam: a prophecy which, though delivered privately, became known to Solomon, and excited his wrath against Jeroboam, who fled for his life into Egypt, to Shishak, and remained there till Solomon's death. The other prophecy, in 1 K. xiv. 6–16, was delivered in the prophet's extreme old age to Jeroboam's wife, in which he foretold the death of Abijah, the king's son, who was sick, and to inquire concerning whom the queen was to come in disguise, and then went on to denounce the destruction of Jeroboam's house on account of the images which he had set up, and to foretell the captivity of Israel "beyond the River" Euphrates. These prophecies give us a high idea of the faithfulness and boldness of Abijah, and of the eminent rank which he attained as a prophet. Jeroboam's speech concerning him (1 K. xiv. 2, 3) shows the estimation in which he held his truth and prophetic powers. In 2 Chr. ix. 21 reference is made to a record of the events of Solomon's reign contained in the "prophecy of Abijah the Shilonite." If there were a larger work of Abijah's, the passage in 1 K. xi. is doubtless an extract from it.

8. [Ahih.] Father of Basha, king of Israel, the contemporary of Asa, king of Judah. He was of the tribe of Issachar (1 K. xxvii. 33). [Occurs also 1 K. xxxi. 22; 2 K. ix. 9.] A.C. H.

9. [Aaz.] [Vat. Aazat:] Echah. One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 26). W. A. W.

AHIKAM (אֵֽהִיקָם [brother of the court]): 'Aχίκαμ [Vat. -χίκαμ; Aḥikām], a son of Shaphan the scribe, an influential officer at the court of Josiah (2 K. xxiii. 12), and of Jehohanan his son (Jer. xxxvi. 21). When Shaphan brought the book of the law to Josiah, which Hilkiah the high priest had found in the temple, Ahikam was sent by the king, together with four other delegates, to consult Hilkiah the prophetess on the subject. In the reign of Jehoiakim, when the priests and prophets arrayed Jeremiah before the princes of Judah on account of his old denunciations of the national sins, Ahikam successfully used his influence to protect the prophet. His son Gedaliah was made governor of Judah by Nebuchadnezzar, the Chaldean king, and to his charge Jeremiah was entrusted when released from prison (Jer. xxxix. 14, xl. 5).

AHI'LUD (אַֽֽהָאֱלוד [brother of one born]): or Ach, i. e. God, who originated, First: Rom.] 'Aχίλαδ: 'Aχιλαδ [Vat. -χίλαδ] in 2 Sam. xx. 21: [Vat. 'Aχιλαδ in 2 Sam. viii. 16 and 1 Chr.; in 1 K. iv. 3, Vat. M. 'Aχιλαδ; H. 'Aχιλαד: Alex. 'Aχιλαδ] 2 Sam. viii. 16, 'Aχιλα� 1 K. iv.

3: Ahikam. 1. Father of Jehoshaphat, the recorder or chronicler of the kingdom in the reigns of David and Solomon (2 Sam. viii. 16, xx. 24; 1 K. iv. 3; 1 Chr. xviii. 15).

AHI'MAAZ [וָאֵֽחִימָאָצ] (Aχίμας [brother of upper, i. e. oriental]): 'Aχίμας [Vat. 'Aχίμας; Aχίμας]: 1. Father of Saul's wife, Ahinoam (1 Sam. xiv. 50). 2. [Vat. 'Aχίμας, etc.]: Son of Zadok, the priest in David's reign. When David fled from Jerusalem on account of Absalom's rebellion, Zadok and Abiathar, accompanied by their sons Ahimaz and Jonathan, accompanied Ahimaz, who stayed outside the walls of the city at En-Rioel, on the road towards the plain. A message soon came to them from Zadok and Abiathar through the mid-servant, to say that Ahithophel had counselled an immediate attack against David and his followers, and that, consequently, the king must cross the Jordan without the least delay. They started at once on their errand, but not without being suspected, for a bad feeling was raised on both sides, and they immediately ran off quickly—and Ahimaz, we know, was a practised runner—went and told Absalom, who ordered a hot pursuit. In the mean time, however, they had got as far as Bahurim, the very place where Shimea cursed David (2 Sam. xv. 5), to the house of a steadfast partisan of David's. Here the woman of the house effectually hid them in a well in the court-yard, and covered the well's mouth with a brained corn. Among the servants coming up searched for them in vain; and as soon as they were gone, and returned on the road to Jerusalem, Ahimaz and Jonathan hasted on to David, and told him Ahithophel's counsel, and David with his whole company crossed the Jordan that very night. Ahithophel was so mortified at seeing the failure of his scheme, through the unwise delay in executing it, that he went home and hanged himself. This signal service rendered to David, at the hazard of his life, by Ahimaz, must have tended to ingratiate him with the king. We have a proof how highly he was esteemed by him, as well as an honorable testimony to his character, in the saying of David recorded 2 Sam. xxvii. 27. For when the watchman announced the approach of a messenger, and added, that his running was like the running of Ahimaz, the son of Zadok, the king said, "He is a good man, and counsels with good tidings."

The same transaction gives us a very curious specimen of the manners of the times, and a singular instance of oriental or Jewish craft in Ahimaz. For we learn, first, that Ahimaz was a professed runner—and a very swift one too—which one would hardly have expected in the son of the high-priest. It belongs, however, to a simple state of
society that bodily powers of any kind should be highly valued, and exercised by the possessor of them in the most natural way. Ahimaaz was probably naturally swift, and so became famous for his running (2 Sam. xvii. 27). So we are told of Asahel, Joab's brother, that "he was as light of foot as a wild roe" (2 Sam. ii. 18). And that quick running was not deemed inconsistent with the utmost dignity and gravity of character appears from what we read of Elijah the Tidhite, that "he girded up his loins and ran before Ahabs (who was in his chariot) to the entrance of Jezered" (I K. xviii. 46). The kings of Israel had running footmen to precede them when they went in their chariots (2 Sam. xv. 1; 1 K. i. 5), and their guards were called בֵּית בֶּן, runners.

It appears by 2 Chr. xxx. 6, 10, that in Hezekiah's reign there was an establishment of running messengers, who were also called בֵּית בֶּן. The same name is given to the Persian posts in Esth. iii. 13, 15, viii. 14; though it appears from the latter passage that in the time of Xerxes the service was performed with mules and camels. The Greek name, borrowed from the Persian, was ἄγγελον. As regards Ahimaaz's craftiness we read that when Absalom was killed by Joab and Hushai, Ahimaaz was very urgent with Joab to be employed as the messenger to run and carry the tidings to David. The politic Joab, well knowing the king's fond partiality for Absalom, and that the news of his death would be anything but good news to him, and, apparently, having a friendly feeling towards Ahimaaz, would not allow him to be the bearer of such tidings, but employed Cushl instead. But after Cushl had started, Ahimaaz was so urgent with Joab to be allowed to run too that at length he extorted his consent.

Taking a shorter or an easier way by the plain he managed to outrun Cushl before he got in sight of the watch-tower, and, arriving first, he reported to the king the good news of the victory, supressing his knowledge of Absalom's death, and leaving to Cushl the task of announcing it. He had thus the merit of bringing good tidings without the alloy of the disaster of the death of the king. This is the story of the hear of Ahimaaz, for the Ahimaaz of 1 K. iv. 15, who was Solomon's captain in Naphtali, was certainly a different person. There is no evidence, beyond the assertion of Josephus, that he ever filled the office of high-priest; and Josephus may have concluded that he did, merely because, in the genealogy of the high-priests (1 Chr. vi. 8, 9), he intervenes between Zadok and Azariah. Judging only from 1 K. iv. 2, compared with 1 Chr. vi. 10, we should conclude that Ahimaaz died before his father Zadok, and that Zadok was succeeded by his grandson Azariah. Josephus's statement that Zadok was the first high-priest of Solomon's temple, seeing the temple was not finished till the eleventh year of his reign, is a highly improbable one in itself. The statement of the Nedar Omran, which makes Ahimaaz high-priest in Rehoboam's reign, is still more so. It is safer, therefore, to follow the indications of the Scripture narrative, though somewhat obscured by the apparently corrupted passages, 1 K. iv. 4, and 1 Chr. vi. 9, 10, and conclude that Ahimaaz died before he attained the high-priesthood, leaving as his heir his son Azarias.

3. Solomon's officer in Naphtali, charged with providing victuals for the king and his household for one month in the year. He was probably of the tribe of Naphtali, and was the king's son-in-law, having married his daughter Basmuth (1 K. iv. 7, 15).

AHI'MAN [אח'ימן] [brother of a gift; Gers.]

Aχωδας; [Aχωδα; Vat. -χερι]; in Judg., Vat. -χερι; Alex. Αχωδας. Alex. Αχωδας. Achimoth, [Ahimoth]. 1. One of the three great Anakim who inhabited Mount Hebron (Num. xiii. 22, 33; [Josh. xx. 14]), seen by Caleb and the spies. The whole race were cut off by Joshua (Josh. xi. 21), and the three brothers were slain by the tribe of Judah (Judg. i. 10).

2. Διαίδης: [Vat. Μ. Αχωδά, Α. Αχωδά; Ald.]. Alex. Αχωδά, [Com. Αχωδας]; Ahimoth. One of the porters or gatekeepers, who had charge of the king's gate for the "camps" of the sons of Levi (1 Chr. ix. 17).

AHI'MELECH [أخיملך] (Aχμελέχ) [brother of the king]; Aχμελέχ and 'Αχμελέχ; Vat. -χερι and -βερι; Alex. Ἀχμελέχ. Aχμελέχ, [Achimelech]. 1. Son of Ahitub (1 Sam. xxii. 11), and high-priest at Nob in the days of Saul. He gave David the showbread to eat, and the sword of Goliath; and for so many times he was used to the consecration of David, the Eternal, was put to death with his whole house by Saul's order. Eighty-five priests wearing an ephod were thus cruelly slaughtered; Abiathar alone escaped. [AbiaIIath]. The LXX. read three hundred and five men, thus affording another instance of the frequent clerical errors in transcribing numbers, of which Ex. ii. compared with Neh. vii. is a remarkable example. The interchange of בֵּית בֶּן or בֵּית בֶּן, with בֵּית בֶּן and בֵּית בֶּן, is very common. For the question of Achimelech's identity with Ahijah, see AHIJAH. For the singular confusion [or apparent confusion] between Ahimelech and Abimelech in the 1st Book of Chronicles, see ABAIMATH. [The name occurs 1 Sam. xxii. 1, 2, 8, xxii. 9, 11, 14, 16, 29, xxiii. 6, xxx. 7; 2 Sam. vii. 17; 1 Chr. xxiv. 3, 6, 31; Ps. lii. title.]

2. [Aχμελέχ; Vat. Αχμελέχ, 2. m. Αχμελέχ; Achimelech]. One of David's companions while he was persecuted by Saul, a Hittite; called in the LXX. Aχμελέχ, which is perhaps the right reading, after the analogy of Abimelech, king of Gerar (1 Sam. xxvi. 6). In the title of Ps. xxxiv. בֵּית בֶּן [Achiemelch, Achiash] seems to be a corrupt reading for בֵּית בֶּן. See 1 Sam. xxii. 13 (19, in A. V.).

AHI'MOTH [אח'ימות] [brother of death]; Aχωδάθ; [Vat. Αχωδάθ]; Achimoth, a Levite of the house of the Kohites, of the family of the Kohathites, apparently in the time of David (1 Chr. vi. 25). In ver. 35, for Abinadab we find מְדוֹת (מְדוֹת); Mada; as in Luke iii. 26. For a correction of these genealogies, see Genealogies of our Lord and Saviour Jesus Christ, p. 214, note.

A. C. H.

AHINADAB [אח'נדב] [tomb brother]; Aχωδάθ; [Vat. Αχωδάθ; Alex. Αριελάδ]. Ahiadab, son of Iddo, one of Solomon's twelve commissaries who supplied provisions for the royal household. The district entrusted to Ahinadab

A. C. H.
was that of Mahanaim, situated on the east of the Jordan (1 K. iv. 14).

AHINOAM [Heb. 'ahî'î.nô'am] (אֹהִינֹעַם) [brother of grace or beauty; according to Fürst's theory, 'borah, i. e. God, is grace] = 'A'î'î'ô'â'm: Alex. 'A'î'nô'ô'mâ: [Comp. 'A'î'nô'ô'mād] A'î'nô'maûn. 1. Daughter of Ahimelech and wife of Saul (1 Sam. xiv. 50; xxv. 14) and later, according to 2 Sam. xxiv. 18, the wife of David.

2. [A'î'nô'ô'mâ: Alex. 'A'î'nô'ô'mâ: Vat. 'A'î'nô'ô'mâ etc.] A woman of Zareah, whose masculine name may be compared with that of Abigail, father of joy. It was not uncommon to give woman names composed with סָoblins (father) and סָoblins (brother). Ahinoam was married to David during his wandering life (1 Sam. xxv. 43), lived with him and his other wife Abigail at the court of Achish (xxvii. 3), was taken prisoner with her by the Amalekites when they plundered Ziklag (xxx. 5), but was rescued by David (18). She is again mentioned as living with him when he was king of Judah in Hebron (2 Sam. ii. 2); and was the mother of his eldest son Amnon (iii. 2 also 1 Chr. iii. 1). G. E. L. C.

AHIO (אֹהִי [brotherly]; אִי אֵלֶּף oî 'â'î-lôf) אָוֹ oî 'â'ô Toû: Mî'o, 2 Sam. vi. 3, 4; frater eius, 1 Chr. xiii. 7). 1. Son of Abinadab who accompanied the ark when it was brought out of father's house (2 Sam. vii. 3, 4; 1 Chr. xiii. 7).

2. [אָוֹ oî 'â'ô Toû: Alex. אִי אֵלֶּף oî 'â'ô Toû: Mî'o.] A Benjamite, one of the sons of Peraiah, who drove out the inhabitants of Gath (1 Chr. xviii. 14). According to the Vat. MS. the LXX. must have read Αιός, according to the Alex. MS. Αίός.

3. A Benjamite, son of Jehiel, father or founder of Gibon (1 Chr. vii. 31, ix. 37). In the last quoted passage the Vatican MS. [as also Sin.] has אֵלֶּף oî 'â'î-lôf and the Alex. אֵלֶּף oî 'â'î-lôf. W. A. W.

AHIRAH (אֹהִרָה [brother of cell]; 'A'î'yô'â [Vat. generally 'yô'; Alex. 'A'î'yô'â: Mî'o]) chief of the tribe of Naphtali when Moses took the census in the year after the Exodus (Num. i. 15, ii. 29, vii. 78, 81, x. 27).

AHIRAM (אֹהִרָם [brother exalted]; 'A'î'yô'â [Vat. 'yô'; Alex. 'A'î'yô'â: Mî'o]) son of Benjamen (Num. xxvi. 38), called Eli in Gen. xvi. 21, and perhaps the same as A'î'mî which see.

AHIRAMITES, THE (אֹהִרָמִי [brotherly]; אַלְּאִירָמִי [Vat. oî 'â'îrâmî; Alex. o'î 'â'îrâmî: Abîn].) 'A'î'yô'â: 'A'î'râmî: Mî'o, one of the brethren of the tribe of Benjamin, descendants of Ahiram (Num. xxvi. 38.

AHIAS (אַהִישׁ [brother of support]; 'A'î'sô [Alex. 'A'î'sô: Abîn].) A priest, father of Abinadab, one of the architects of the tabernacle (Ex. xxxi. 6, xxxv. 34, xxxvii. 29).

AHIASHAR (אַהִישׁ [brother of the sinner]; אַהִישׁ הָאָדָם [Vat. 'A'î'sô hâ'â'dâm: Alex. 'A'î'sô hâ'â'dâm].) One of the sons of Baniyan, the grandson of Benjamin (1 Chr. vii. 10).

AHITUB (אָהִיתוּב [brother of goodness; or, God is good, Firsty]; 'A'î'tôb: Alex. 'A'î'tôb. I. Father of Ahimelech, or Ahiphah, the son of Phin- chas, and the elder brother of Jehiel (1 Sam. xiv. 9, xii. 11), and therefore of the house of Eli and the family of Hkham. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.

2. [Vat. 'A'î'tôb: Alex. 'A'î'tôb. I. Father of Ahimelech, or Ahiphah, the son of Phin- chas, and the elder brother of Jehiel (1 Sam. xiv. 9, xii. 11), and therefore of the house of Eli and the family of Hkham. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.

AHITUB (אָהִיתוּב [brother of goodness; or, God is good, Firsty]; 'A'î'tôb: Alex. 'A'î'tôb. I. Father of Ahimelech, or Ahiphah, the son of Phin- chas, and the elder brother of Jehiel (1 Sam. xiv. 9, xii. 11), and therefore of the house of Eli and the family of Hkham. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.

2. [Vat. 'A'î'tôb: Alex. 'A'î'tôb. I. Father of Ahimelech, or Ahiphah, the son of Phin- chas, and the elder brother of Jehiel (1 Sam. xiv. 9, xii. 11), and therefore of the house of Eli and the family of Hkham. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.
The expression Aho'shahar (Av. Aohashahar) is applied to Azariah: the high-priest in Hezekiah's reign in 2 Chr. xxxi. 13. The passage is repeated in Neh. xi. 11, but the LXX. have spoilt the sense by rendering it Διαναυοντα, as if it were Διαναυοντα. If the line is correctly given in these two passages, Ahitub was not the father, but the grandfather of Zadok, his father being Meraiah. But in 1 Chr. vi. 3, and in Ezra vii. 2, Ahitub is represented as Zadok's father. This uncertainty makes it difficult to determine the exact time of Ahitub's high-priesthood. If he was father to Zadok he must have been high-priest with Ahimelech. But if he was grandfather, his age would have coincided exactly with the other Ahitub, the son of Phinehas. Certainly a singular coincidence.

3. [Vat. Aeyterof.] The genealogy of the high-priests in 1 Chr. vi. 11, 12, introduces another Ahirah, son of another Amariah, and father of another Zadok. At p. 287 of The Genealogies will be found reasons for believing that the second Ahitub and Zadok are spurious. A. C. H.

Aholab [אַהוֹלָב Hebrew: Aholab] (2 Kings 3:11) [fertility: Δαὶδηφι] [Comp. 'Aχαδῆ: Aholob] a city of Asher from which the Canaanites were not driven out (Judg. i. 31). Its omission from the list of the towns of Asher, in Josh. xix., has led to the suggestion (Bertheau on Judg.) that the name is but a corruption of Achshaph; but this appears extravagant. It is more probable that Aholab reappears in later history as Gush Caleb, גׇשׇכָּל, or Gischa, (Reland, pp. 818, 817), a place lately identified by Robinson under the abbreviated name of El-Tish, near Safed, in the hilly country to the N. W. of the Sea of Galilee (Rob. ii. 144, iii. 72). Gush Caleb was in Rabbinical times famous for its oil (see the citations in Reland, p. 817), and the oil olive-trees still remain in the neighborhood (Rob. iii. 72). From it came the famous John, son of Levi, the leader in the siege of Jerusalem (Jos. Vit. § 10; B. J. ii. 21, § 1), and it had a legendary celebrity as the birthplace of the parents of no less a person than the Apostle Paul (Jerome, quoted by Reland, p. 813). [Gischaal.] G.

Aholai [אַהוֹלִיא Hebrew: Aholai] [2 syl. (Aholai) [O that, a wish]: Δαέατι [Vat. Ахайд: Aholai; Comp. 'Aχαδ: Aholai; 'Αχαία: Aholai; 'Αχαίο: Aholai; 'Αχαίοι: Aholai; 'Αχαίος: Aholai]: Oholai; Oholai]. Daughter of Sheshan, whom he gave in marriage to his Egyptian slave Jarba (1 Chr. ii. 31, 35). In consequence of the failure of male issue, Ahloai became the foundress of an important branch of the family of the Jerahmeelites, and from her were descended Zadok, one of David's mighty men (1 Chr. xi. 41), and Azariah, one of the captains of hundreds in the reign of Josiah (2 Chr. xxiii. 1; comp. 1 Chr. ii. 38).

Aho'ah [אַהוֹה Hebrew: Ahoah], probably another form of itsob [friend of Jehovah]: 'Aχαία: [Comp. 'Aχαδ: Ahoah; Comp. 'Aχαδ: Ahoah]. Son of Beha, the son of Benjamin (1 Chr. viii. 4). The patronymic Ahohite [אַהוֹהִּי] [found in 2 Sam. xxiii. 9, 28; 1 Chr. xi. 12, 29, xxvii. 4]. [EHM.]

Aho'hitel [אַהוֹהִיתֵל Hebrew: Ahohitel] [Ahoah, Ahoah]

Aholah [אַהוֹלָה Hebrew: Aholah] (2 Kings 3:11) [her tent]: 'Oαλα: [Vat. Οαλα: Οαλα: [Alex. Ολα]: Oola], a harlot, used by Ezekiel as the symbol of Samaria (Ez. xxiii. 4, 5, 30, 44).

Aholibamah [אַהוֹלִיבַּמָּה Hebrew: Aholibamah] [tent of his father]: 'Eλדַב (Eldob, a Dane of great skill as a weaver and embroiderer, whom Moses appointed with Bezaleel to erect the tabernacle (Exx. xxxv. 30-35) [xxxvi. 6, xxxvi. 1, 2, xxxviii. 21)].

Aholibab [אַהוֹלִיבַּב Hebrew: Aholibab] [my tabernacle in her]: 'Ωολαβ (Alex. Ωλαβ, etc.: Olobon), one (probably the second) of the three wives of Esau. She was the daughter of Aannah, a descendant of Seir the Horite (Gen. xxxvi. 2, 25). It is doubtful through this connection of Esau with the original inhabitants of Mount Seir that we are to trace the subsequent occupation of that territory by him and his descendants, and it is remarkable that each of his three sons by this wife is himself the head of a tribe, whilst all the tribes of the Edomites sprung from his other two wives are founded by his grandsons (Gen. xxxvi. 15-19). In the earlier narrative (Gen. xxvi. 31) Aholibamah is called Judith, daughter of Beer, the Hittite. The explanation of the change in the name of the woman seems to be that her proper personal name was Judith, and that Aholibamah was the name which she received as the wife of Esau and foundress of three tribes of his descendants; she is therefore in the narrative called by the first name, whilst in the genealogical table of the Edomites she appears under the second. This explanation is confirmed by the recurrence of the name Aholibamah in the concluding list of the genealogical table (Gen. xxxvi. 40-43 [comp. 1 Chr. i. 52]) which, with Hengstenberg (Die Autentic d. Pont. ii. 279, Eng. transl. ii. 228), Tuch (Komm. ab. d. Gen. p. 493), Knobel (Genes. p. 238), and others, we must regard as a list of names of places and not of persons, as indeed is expressly said at the close of it: "These are the chiefs (heads of tribes) of Esau, according to their settlements in the land of their possession." The district which received the name of Esau's wife or perhaps rather from which she received her marriage was not doubt (as the name itself indicates) situated in the heights of the mountains of Edom, probably therefore in the neighborhood of Mount Hor and Petra, though Knobel places it south of Petra, having been misled by Burchardt's name Hamas, which, however, according to Robinson (H. 155), is "a sandy tract with mountains around it . . . but not itself a mountain, as reported by Burchardt." It seems not unlikely that the three tribes descended from Aholibamah, or at least two of them, possessed this district, since there are enumerated only eleven districts, whereas the number of tribes is thirteen, exclusive of that of Korah, whose name occurs twice, and which we may further conjecture emigrated (in part at least) from the district of Aholibamah, and became associated with the tribes descended from Eliphaz, Esau's first-born son.

It is to be observed that each of the wives of Esau is mentioned by a different name in the genealogical table from that which occurs in the history. This is noticed under Basmath.
to the name and race of the father of Aholiabam, see AXAM and BEER.

F. W. G.

AHU'MAI [3 syl.] (אָהֻמַּיПетербургская: 'Ayaına [Vat. ܐܝܢܐ] 'Ahami) 2. Son of Jahath, a descendant of Judah, and head of one of the families of the Zoraites (1 Chr. iv. 2).

W. A. W.

AHU'ZAM (אָהּעַזָּם theirs possession: אָהֻזָּם Petersburgская: 'Ayaınam [Ahd. 'Айнам [Comp. 'A'yānām -Azm] - Akm.) Properly AHUZ'ZATH, son of Asier, the father or founder of Tekoa, by his wife Naarah (1 Chr. iv. 6).

W. A. W.

AHUZZATH (אָהֻצָּת theirs possession: אָהֻצָּת Petersburgская: 'Ayaınam [Ahd. 'Айнам [Comp. 'A'yānām -Azm] - Akm.) was, in fact, the descendant of Seir, and ancestor of one of the wives of Esau (1 Chr. i. 40), called in Gen. xxxvii. 24 AIAH. He probably died before his father, as the succession fell to his brother AXAM.

2. (In 2 Sam. iii. 2) 'AIÁ (Vat. M. i55, Alex. 2 λόμ. Comp. 'A'm [in 2 Sam. xxi. 11] AIAH) Father of Ragah, the concubine of Saul (2 Sam. iii. 7, xvi. 8, 10, 11).

W. A. W.

AIAH [2 syl.] (אִיָּה [fem. of 'AIÁ: 'Aiyáh [Ahd. 'Aiyāh [Comp. 'A'yāh - 'Aym] - Akm.) is, probably a variation of the name AIL. The name is mentioned with Micmash and Bethel (Neh. vi. 31). [AIAH.]

AIAJAH [2 syl.] (אִיֵּאֶה place of deer or gazelles, Geon. p. 49, Stanley, p. 208, note; Ἀιαζέας [? Ἀιαζέας], and Αἰαζέα, [etc.] Αἰαζόν) 1. A city of the Judæites (Josh. xxii. 24; 1 Chr. vi. 93), originally allotted to the tribe of Dan (Josh. xiv. 42; Alex. [A] 'AIAM), which tribe, however, was unable to dispossess the Amorites of the place (Judg. ii. 35). Aijalon was one of the towns fortified by Rehoboam (2 Chr. xi. 10) during his conflicts with the new kingdom of Ephraim (1 K. xii. 30); and the last we hear of it is as being in the hands of the Philistines (2 Chr. xxvii. 18, Alex. [A] 'AIAM).

Living on the very frontier of the two kingdoms, we can understand how Aijalon should be spoken of sometimes (1 Chr. vi. 93, comp. with 66) as in Ephraim, and sometimes (2 Chr. xi. 10; 1 Sam. xiv. 31) as in Judah and Benjamin.

The name is most familiar to us from its mention in the celebrated speech of Joshua during his pursuit of the Canaanites (Josh. x. 12, valley (אָלֶן) of Aijalon; see Stanley, p. 219). There is no doubt that the town has been discovered by Dr. Robinson in the modern Yebus a little to the N. of the Jaffa road, about 14 miles out of Jerusalem.

It stands on the side of a high hill which forms the southern boundary of a fine valley of corn-fields, which valley now earns the name of the Jaffa or Jerusalem valley, but which there seems no reason for doubting was the valley of Aijalon which witnessed the defeat of the Canaanites (Rob. ii. 253, iii. 115).

2. [A]'AJO'-Abd. Alex. A'Axo'am) A place in Zebulun, mentioned as the burial-place of Elon (אֶלון [fem. of 'AIÁ: 'Ełā'ôn) of one of the Judges (Judg. xii. 12). [AJO-]

AIJALON [3 syl.] (אְיִלִּון, place of deer or gazelles, Geon. p. 49, Stanley, p. 208, note; Ἀιαζέας [? Ἀιαζέας], and Αἰαζέα, [etc.] Αἰαζόν) 1. A city of the Judæites (Josh. xxii. 24; 1 Chr. vi. 93), originally allotted to the tribe of Dan (Josh. xiv. 42; Alex. [A] 'AIAM), which tribe, however, was unable to dispossess the Amorites of the place (Judg. ii. 35). Aijalon was one of the towns fortified by Rehoboam (2 Chr. xi. 10) during his conflicts with the new kingdom of Ephraim (1 K. xii. 30); and the last we hear of it is as being in the hands of the Philistines (2 Chr. xxvii. 18, Alex. [A] 'AIAM).

Living on the very frontier of the two kingdoms, we can understand how Aijalon should be spoken of sometimes (1 Chr. vi. 93, comp. with 66) as in Ephraim, and sometimes (2 Chr. xi. 10; 1 Sam. xiv. 31) as in Judah and Benjamin.

The name is most familiar to us from its mention in the celebrated speech of Joshua during his pursuit of the Canaanites (Josh. x. 12, valley (אָלֶן) of Aijalon; see Stanley, p. 219). There is no doubt that the town has been discovered by Dr. Robinson in the modern Yebus a little to the N. of the Jaffa road, about 14 miles out of Jerusalem.

It stands on the side of a high hill which forms the southern boundary of a fine valley of corn-fields, which valley now earns the name of the Jaffa or Jerusalem valley, but which there seems no reason for doubting was the valley of Aijalon which witnessed the defeat of the Canaanites (Rob. ii. 253, iii. 115).

2. [A]'AJO'-Abd. Alex. A'Axo'am) A place in Zebulun, mentioned as the burial-place of Elon (אֶלון [fem. of 'AIÁ: 'Ełā'ôn) of one of the Judges (Judg. xii. 12). [AJO-]
It may have been also his birth-place, and possibly took its name from him. Elken.] Van de Velde (Mem. p. 283) reports his finding a Juluan, a place of ruins, in northern Galilee, inland from Akko, which (if this be reliable) might answer well enough for the Aijalon of Zedekiel.

The Aijalon mentioned as lying in the tribe of Benjamin (2 Chr. xi. 10), one of "the fenced cities" fortified by Recholom, some regard as a third town of this name. But it was probably the Danite Aijalon (Josh. xix. 42), which, after the Danites had extended their territory further north (Judg. xviii. 1 f.), was assigned to Benjamin, and hence at different times was held by different tribes. See Herrenn's note on 2 Chr. xi. 10 (Ezeg. Handbuch, xv. 308).

AIJELETH [3 syl.] SHA'HAR, more correctly AYILETH HAS-SHACHAR (ג"ד, the hind of the morning dawn), found once only in the Bible, in connection with P. xxiii., of which it forms part of the introductory verse or title. This term has been variously interpreted. Rashii, Kimchi and Aben-Ezra attest that it was taken for the name of a musical instrument. Many of the modern versions have adopted this interpretation; and it also seems to have been that of the translators from whom we have the Authorized Version, although they have left the term itself untranslated. Some critics speak of this instrument as a "flute," and J. D. Michaelis, Mendelssohn, Knapp, and others, render the Hebrew words by "morning flute." Michaelis admits the difficulty of describing the instrument thus named, but he conjectures that it might mean a "flute" to be played on at the time of the "morning" sacrifice. No account is rendered, however, by Michaelis, or by those critics who adopt his view, of the etymological voucher for this translation. Mendelssohn quotes from the Skillo Haggeberorin a very fanciful description of the "Ayileth Hassachar" (see Prolegomena to Mendelssohn's Psalms); but he does not approve it: he rather seeks to justify his own translation by connecting the name of the "flute" with חאג יילית איה

Ayileth Ahabim (Prov. v. 19), and by endeavoring to make it appear that the instrument derived its appellation from the sweetness of its tones. The Chaldee Paraphrast, a very ancient authority, renders לילית איה הח"ד, "the power of the continual morning sacrifice," implying that this term conveyed to the chief musician a direction respecting the time when the 22d psalm was to be chanted. In adopting such a translation, איה must be received as synonymous with ח"ד (strength, force) in the 20th ver. (A. V. 19th ver.) of the same psalm. According to a third opinion, the "hind of the morning" expresses allegorically the argument of the 22d psalm. That this was by no means an uncommon view is evident from the commentaries of Rashii and Kimchi; for the latter regards the "Hind of the Morning" as an allegorical appellation of the house of Judah, whose captivity in Babylon is, agreeable to his exegesis, the general burden of the psalm. Tholuck, who imagines the 22d psalm to treat primarily of David, and of the Messiah secondarily, makes David allude to himself under the figure of "the hind of the morning." He speaks of himself as of a hind pursued even from the first dawn of the morning (Tholuck on the Ps. in loc.).

The weight of authority predominates, however, in favor of the interpretation which assigns to איה the sole purpose of describing to the musician the melody to which the psalm was to be played, and which does not in any way connect Ayeileth Hassachar with the argument of the psalm itself. To Aben-Ezra this interpretation evidently owes its origin, and his view has been received by the majority of grammarians and lexicographers, as well as by those commentators whose object has been to arrive at a grammatial exposition of the text. Amongst the number, Buxtorf, Bochart, Gesenius, Rosenmüller, and M. Sachs (in Zunz's Bible), deserve especial mention. According to the opinion, then, of this trustworthy band of scholars, איה described a lyrical composition no longer extant; but in the age of David, and during the existence of the Temple of Solomon, when the Psalms were chanted for public and private service, it was so well known as to convey readily to the director of the sacred music what it was needful for him to know. That this was not an unusual method of describing a melody may be satisfactorily proved from a variety of analogous instances. Ample evidence is found in the Tanhoud (Jerushal. Berach.) thus the expression "hind of the morning" was used figuratively for "the rising sun:" and a similar use of the Arabic "gezalath" may be adduced. (See Rosenmüller's Scholiis, in loco, and Furst's Concordance.) Aben-Ezra is censured by Bochart (Herتصرفcon, book iii. ch. 17) for describing the poem איה as an amanur song (ינש מים בפיות הימים, איה איה) (ת'). איה איה describing a term considered too profane to be employed in reference to a composition used for public worship. But if for the obvious epithet "amorous" the word "elegiac" be substituted (and the expression used by the rabbi will readily admit of this change in the translation) the objection is removed.

Cabinet understands איה to mean a "band of music:" and he accordingly translates the introductory verse, "A Psalm of David, addressed to the music master who presides over the band called the Morning Hind." D. W. M.

ATN (א"ת), "an eye," and also, in the simple but vivid imagery of the East, a spring or natural burst of living water, always contrasted with the well or tank of artificial formation, which latter is designated by the words בור (בורי),BOR (בר) and "well." Ain still retains its ancient and double meaning in Arabic. "عين.

Such living springs abound in Palestine even more than in other mountainous districts, and apart from their natural value in a hot climate, form one of the most remarkable features of the country. Professor Stanley (S. of P. pp. 147, 509) has called attention to the accurate and persistent use of the word in the original text of the Bible, and has well expressed the inconvenience arising from the confusion
in the A. V. of words and things so radically distinct as AIN and BeEr. "The importance of distinguishing between the two is illustrated by Ex. xxvii., in which the word דָּרָך (translated 'wells') is used for the springs of fresh water at El hin, although the rocky soil of that place excludes the supposition of dug wells." [FOUNTAIN.] AIN ethnean occurs in combination with other words, forming the names of definite localities. These will be found under Eu, as En-gedi, En-ganim, &c. It occurs twice in two cases:

1. (With the def. article, יִבְרָכָה.) One of the landmarks on the eastern boundary of Palestine as described by Moses (Num. xxxiv. 11), and apparently mentioned, if the rendering of the A. V. is accurate, to define the position of Riblah, namely, "on the east side of the spring." (LXX. εἰς παγάς.) By Jerome, in the Vulgate, it is rendered contra fontem Deiphan, meaning the spring which rose in the celebrated grove of Daphne dedicated to Apollo and Diana at Antioch. But Riblah having been lately, with much probability, identified (Rob. iii. 535-6; Porter, ii. 553) with a place of the same name on the N. E. slopes of the Hermon range, "the spring" of the text must in the present state of our knowledge be taken to be AIN el-ayyat, the main source of the Orontes, a spring remarkable, even among the springs of Palestine, for its force and magnitude. The objections to this identification are the distance from Riblah—about 9 miles—and the direction—nearer N. E. than E. (See Rob. iii. 535; Porter. ii. 555-6, 558). [RHODE: HAMATH.]

2. [Aar, etc.: Axe, Aor, etc.: AIN, Ayin, etc.] One of the southermost cities of Judah (Josh. xv. 32), afterwards allotted to Simon (Josh. xix. 1: 1 Chr. iv. 32) and given to the priests (Josh. xxi. 16). In the list of priests' cities in 1 Chr. vi. 38.

Ashan (אֲשָן) takes the place of AIN. [ASHAN.]

In Neh. xi. 29, AIN is joined to the name which in the other passages usually follows it, and appears as En-rimmon. So the LXX., in the two earliest of the passages in Joshua, give the name as Ἑρμοῦδα and Ερμοῦδαν. [EN-RIMMON.] (See Rob. i. 214. 4.

* The reader should not overlook, under this head, Dr. Robinson's admirably accurate account of the Ayins or Fountain of Palestine in his Physical geography, 228-224. He enumerates and describes the principal of them under the classes of (a), those of the western plain along the Mediterranean; (b) those of the hill-country west of the Jordan; (c) those in the Ghur or valley of the Jordan; (d) those of the hill-country east of the Jordan; and (e) the warm and mineral fountains. (In the comparative frequency of such living springs of water, he finds the characteristic difference between Palestine and Egypt, and a perfect justification of the language of Moses in his description of the Promised Land to the children of Israel: "For the Lord the God bringeth thee into a good land, a land of brooks of water, of fountains and depths that spring out of valleys and hills." [Deut. viii. 7]. The English explorer, Mr. Tritram, in his Land of Israel, has given special attention to this important branch of sacred geography; and Dr. Sepp has done the same in his two volumes (Jerusalem u. his Heilige Land, 1863). The subject recurs again under FOUNTAINS.

H. * AIN (in the N. T. ἀῖπ, also ἀ菂ῶς). The Greeks generally used the word ἀῖπ to denote the lower portion of the atmosphere, the region of vapors, clouds and mist, in opposition to ἀ藟, the polar region. But although the former word also included the whole space between the earth and the nearest of the heavenly bodies, the Romans borrowed the words and adopted the conceptions connected with them. It appears to have been a common opinion, both among the Jews and heathen, that the air was filled with spiritual beings, good and evil, the region nearest the earth being regarded as, in particular, the abode of the inhabitants of the harts of Pythagoras taught them. (See, for example, references to Diogenes Laërtius (viii. 32), "that the whole air was full of souls," namely, demons and heroes: Plutarch says "that the air beneath the ether and the heaven, τὸν ὄραρόν ἀῖπα καὶ τὸν ὅραρόν, is full of gods and demons." [Quod Rom. c. 40, p. 274 b]; and he ascribes to Xenocrates the doctrine "that there are beings in the region surrounding us, great and powerful indeed, but evil-disposed and malignant." [De f. et Gér. c. 26, p. 364 b]. Varro, in a curious passage preserved by Augustine (De Civ. I, vii. 6), represents the space between the moon and the lower part of our atmosphere as full of "heroes, haruts, and genii"; and, according to Plutarch, our "ancestors," that is, souls inhabiting the air in distinction from the ether. Philo says "that angels, which the philosophers call demons, are souls flying about in the air," ὀφεῖ κατά τον ἀῖπα περιγράμμα (De Ignite, c. 2, Op. i. 253 ed. Mang); and similar passages repeatedly occur in his writings (De Plent. Nat. c. 4, p. 331; De Conf. Ling. c. 31, p. 471; De Somn. i. 22, p. 641). In a Rabbinical commentary on Pirke Aboth, fol. 83, 2, it is said "that from the earth upward the whole space is filled with beings divided into hands with rulers: and that below [i.e. in the lower region of the air] there are many creatures employed in judging, accusing, and pronouncing on evil deeds", the expression on Eph. vi. 12, or Keppe on Eph. ii. 2.) The Test. XII. Patriarch., Bej. c. 3, speaks of Beliar or Belial as ἀὕρων πειράς, a "spirit of the air." (Fabric. Cod. pess. v. T. p. 728.) These passages may serve to illustrate Eph. ii. 2, where Satan is designated as ἀὕρων τῆς ἐχθρίας τῶν ἄθροος, i. e. "the ruler of the powers of the air," ἐχθρία being used in a collective sense for ἐχθρίαν (comp. Eph. vi. 12, Col. iii. 16), as we say "force" for "forces," and denoting the evil spirits which make the air he is driven to assume that the Daphne near Palaus had also the name of Riblah.

b There is a curious expression in this verse which has not yet been explained. After enumerating the "ethers" ἀὕρων of Simun, the text proceeds, "and their villages ἀὕρων" were Etnan, AIN, five others ἀὕρων. Considering the strict distinction so generally observed in the use of these two words the above is at least worthy of note. [Hyyon,
AIRUS

Eisner, one of the genii, in A. and D. of the Latin lexicographers, in the sense of "servants of the Temple," or "Nethinim," whose descendants returned with Zerubabel (1 Esdr. vi. 31). Perhaps the same as REJAH.

W. A. W.

AJAH, Gen. xxxvi. 24. [AJAH],

AJALON (Josh. x. 12, xix. 42; 2 Chr. xxviii. 18). The same place as AJALON (1) which see. The Hebrew being the same in both, there is no reason for the inconsistency in the spelling of the name in the A. V.

G.

AKAN (['a:kan] [pers. sharp-sighted, Furst] toudaï; [Alex. [rououou:] Ab. [iouou:] Acan), descendant of Esau (Gen. xxxvi. 27, called JAKA-

in 1 Chr. i. 42. [BJE-N.JAARAN]

AK'KUB ([o:soi] [infinitives]; [Akôv; [Lacouor;]: Alex. Akoov; Acov;]. 1. A descendant of Zerubbabel, and one of the seven sons of Elieoni (1 Chr. iii. 24).

2. ([Akoov; in 1 Chr., [Akôv; Alex. Akov; in 1 Chr., Akoov; in Ezr. and Neh.; [Vat. Akoov; in 1 Chr. and Ezr., Akôv; in Neh. vii.]) One of the Levites or doorkeepers at the east gate of the Temple. His descendants succeeded to his office, and appear among those who returned from Babylon (1 Chr. ix. 17; Ezr. ii. 42; Neh. vii. 45, xi. 19, xii. 25). Also called Dacoov (1 Esdr. vi. 28).

3. ([Akôv; [Vat. Akov];]) One of the Nethinim, whose family returned with Zerubbabel (Ezr. ii. 45). The name is omitted in Neh. vii., but occurs in the form ACOV in 1 Esdr. vi. 31.

* It rather corresponds to ACOC (Acoc; in 1 Esdr. vi. 30). Acoc in 1 Esdr. vi. 31 answers to BARAC, Ezr. ii. 51.

A. 4. (om. in LXX. [but Comp. 'Akoov;] A Levi who assisted Ezra in expounding the Law to the people (Neh. viii. 7). Called Jacobus in 1 Esdr. ix. 48.

W. A. W.

AKRAVBIM [scorpions], "the ascent of," and "the going up to;" also "MAALEH-

AKRAVBIM." ([o:soi] [com.]. = the scorpion-pest; [avanabas; [Akóvbiv [Alex. -biv;]: Ascension scorpionum). A pass between the south end of the Dead Sea and Zin, forming one of the landmarks on the south boundary at once of Judah (Josh. xv. 3) and of the Holy Land (Num. xxxiv. 4). Also the north (?) boundary of the Amorites (Judg. i. 36).

Judah Macalendo had here a great victory over the Edomites (1 Macc. v. 3), "Arabattine," which see; Jos. Ant. xii. 8, § 1).

De Sauley (i. 77) would identify it with the long and steep pass of the Wady es-Zurqivv. Scorpions he certainly found there in plenty, but this wady is too much to the north to have been Arababim, as the boundary went from thence to Zin and Kadesh-barna, which, wherever situated, were certainly many miles further south. Robinson's conjecture is, that it is the line of cliffs which cross the Ghor at right angles, 11 miles south of the Dead Sea, and form the ascent of separation between the Ghor and the Aralah (ii. 120). But this would be a descent and not an ascent to those who were entering the Holy Land from the south. Perhaps the most feasible supposition is that Arakabim is

was then in possession of the Edomites. But this reading does not agree with the context, and it is at least certain that Josephus had the text as it now stands.

In his Phys. Geogr. p. 53, Dr. Robinson says that

a The Alex. MS. in this place reads [Iovouou; for [Iovouou; and Ewald (Gesch. iv. 91, 535) endeavors to show therefore that the Acrabatine there mentioned was that between Samaria and Judea, in support of his opinion that a large part of Southern Palestine

b
ALABASTER

Alabastro (ἀλάβαστρον: alabastrum) occurs in the N. T. only, in the notice of the alabaster box of ointment which a woman brought to our Lord when He sat at meat in the house of Simon the leper at Bethany, the contents of which she poured on the head of the Saviour. (Matt. xxvi. 7; Mark xiv. 3; Luke vii. 37.) By the English word alabaster is to be understood both that kind which is also known by the name of gypsum, and the oriental alabaster which is so much valued on account of its translucency, and for its variety of colored streakings, red, yellow, gray, &c., which it owes for the most part to the admixture of oxides of iron. The latter is a fibrous carbonate of lime, of which there are many varieties, vitre spar being one of the most common. The former is a hydrous sulphate of lime, and forms when calcined and ground the well-known substance called plaster of Paris. Both these kinds of alabaster, but especially the latter, are and have been long used for various ornamental purposes, such as the fabrication of vases, boxes, &c. The ancients considered alabaster (carbonate of lime) to be the best material in which to preserve their ointments (Pliny, H. N. xiii. 34). Hendecott (iii. 20) mentions an alabaster vessel of ointment which Cambyses sent, amongst other things, as a present to the Ethiopians. Hammond (Antiquit. Matth. xxvi. 7) quotes Plutarch, Julius Pollux, and Athenaeus, to show that alabaster was the material in which ointments were wont to be kept.

In 2 K. xxi. 13, "I will wipe Jerusalem as a man wipeth a dish." (Heb. τολθόθιθεν, the Vulgate, and the Vulgate, versions of the LXX, use alabstrum in the rendering of the Hebrew words a) The reading of the LXX. in this passage is thus literally translated by Harmer (On crevial, iv. 473): "I will unman Jerusalenm as an alabaster unmantled box is unmantled, and is turned down on its face." Pliny states that we the usual form of these alabaster vessels was long and slender at the top, and round and full at the bottom. He likens them to the long pears, called elenchi, which the Roman ladies suspended from their fingers or dangling from their ears. He compares also the green pointed cone of a rose-bud to the form of an alabaster ointment-vessel (H. N. xvi. 4). The agate — (cf. Hor. Phi. iv. 12, 17), 'Nardī parvis onixe'—which Pliny says is another name for alabastria, must not be confounded with the precious stone of that name, which is a sub-species of the quartz family of minerals, being a variety of agate. Perhaps the name of onix was given to the pink-colored variety of the calcareous alabaster, in allusion to its resemblance to the fingernail (onyx) in color or else because the calcareous alabaster bears some resemblance to the agate-onyx in the characteristic lunar-shaped mark of the last-mentioned stone, which mark reminded the ancients of the white semi-circular spot at the base of the fingernail.

The term alabaster, however, was by no means exclusively applied to vessels made from this material. Theorists speak of golden alabasters. That the passage in Theoritius implies that the alabasters were made of gold, and not simply girt, as some have understood it, seems clear from the words of Plutarch (in Alex.unt. p. 676), cited by Kyrie on Mark xiv. 3, where he speaks of alabasters 'all skilfully wrought of gold.' Alabasters, then, may have been made of any material suitable for keeping ointment in, glass, silver, gold, &c. Precisely similar is the use of the English word box: and perhaps the Greek πιξός and the Latin lacern are additional illustrations. Box is doubtless derived from the name of the shrub, the wood of which is so well adapted for turning boxes and such-like objects. The term, which originally was limited to boxes made of the box-wood, eventually extended to boxes generally; as we say, an iron box, a gold box, &c.

In Mark xiv. 3, the woman who brought the alabaster box of ointment of spikenard is said to break the box before pouring out the ointment. This passage has been variously understood; but Harmer's interpretation is probably correct, that breaking the box implies merely breaking the box which kept the essence of the perfume from evaporating.

The town of Alabstraon in Middle Egypt received its name from the alabaster quarries of the adjacent hill, the modern Mount St. Anthony. In this town the Vultge understand the passage in a very different way.

15 "Et provecto suo gravis est: elenches appetit fastigia longitudine, alabasterum figuram in pleniturn orbe deserunt." (H. N. ix. 59).
16 "Xovos δὲ μυρον χρεωτίς ἀλαβαστάρα (H. ο. xii. 11)." "Meper χρεωτίς ἀλαβαστάρα to onix sun vass augmentaria ex alabastros laticia cupe auro ornata, sed simpiliter vass augmentaria ex auro facta." (Schleusen Iov. T. N. ὑ. v. alabastorum.) "Keiseling, u. Theor. (=)
17 Δραιοῦσι οὖσανά απεκτέτον (λεγουμεν)
was a manufactory of vases and vessels for holding perfumes, &c.

A. W. II.

* Layard found vases of white alabaster among the ruins at Nineveh, which were used for holding ointments or cosmetics (Rogers and Nineveh, p. 197). The alabaster often had a long, narrow neck, and it not only accords best with the Greek (σπαρτίθος) to suppose that the woman broke this in two, but makes the act more expressive.

She would reserve nothing for herself, but devote the whole to her Lord. See Meyer and Lange on Mark xiv. 3.

**ALAMETH (אֲלַמִּת [covering]): **'Elameh;

[Var. 'Elameh; Abd. 'Alex. 'Elameh;

[Comp. 'Alexameth: ] Alometh.

Properly Alameh; one of the sons of Becher, the son of Benjamin (1 Chr. vii. 8).

W. A. W.

ALAM'AMELECH (Hebrew Alummelech)

(אֲלַמִּאֵמְלָךְ = king's oak; 'Elamelech; [Var. 'Alex.-

Ald. 'Alexamelech: ] Elomelech), a place within the limits of Asher, named between Achshaph and Adam (Josh. xii. 26, only). It has not yet been identified; but Schwarz (191) suggests a connection with the Nahar el-Melk, which falls into the Kishon near Haifa.

G.

ALAMOTH (אֲלַמוֹת): Ps. xlv. title; 1 Chr. xx. 20), a word of exceedingly doubtful meaning, and with respect to which various conjectures prevail.

Some critics are of opinion that it is a kind of huts brought originally from Elam (Persia); others regard it as an instrument on which young girls (תַּנָּה) used to play (comp. the old English instrument "the Virginal"); whilst some again consider the word to denote a species of lyre, with a sounding (mute) attached to it for the purpose of softening or deadening the sound, and that on this account it was called תַּנָּה from תַּנָּה, to conceal. Lafage speaks of תַּנָּה as "chant supérieur ou chant à l'octave." Some German commentators, having discovered that the keys of the medieval minstrels were chanted to a melody called "die Jungfrauenweise," have transferred that notion to the Psalms; and Thoheck, for instance, translates תַּנָּה by the above German term. According to this notion תַּנָּה would not be a musical instrument, but a melody. (See Mendelssohn's Introduction to his Version of the Psalms; Forkel, Geschichte der Musik; Lafage, Hist. Gen. de la Musique; and Gesenius on תַּנָּה.)

D. W. M.

AL'CIMUS (גֶּלֶכִּים, valiant, a Greek name, assumed, according to the prevailing fashion, as representing תַּנָּה): 'Elaxeim, God hath set up), called also JACIMUS (יוֹץ), 'Iaxeim; all

'Tacmeim, Joseph. Ant. xii. 3, 5, 6, c. תַּנָּה, c. Jud. iv. 6, person,ledge,, a Jewish priest (1 Macc. vii. 12) who was attached to the Hellenizing party (2 Macc. xiv. 3). On the death of Menelaus he was appointed to the high-priesthood by the influence of Lysias, though not of the pontifical family (Joseph.

.c. xx. 9; 1 Macc. vii. 14), to the exclusion of Junias, the nephew of Menelaus. When Demetrius

7 According to a Jewish tradition (Eriith R. 55), he was "sister's son of Jose ben Joscer," chief of the
ALEXANDER III.

The battle of the Granicus was followed by the subjugation of western Asia; and in the following year the fate of the East was decided at Issus (n. c. 333). Tyre and Gaza were the only cities in Western Syria which offered Alexander any resistance, and these were reduced and treated with unusual severity (n. c. 332). Egypt next submitted to him; and in n. c. 331 he founded Alexandria, which remains to the present day the most characteristic monument of his life and work. In the same year he finally defeated Darius at Gaugamela; and in n. c. 330 his unhappy rival was murdered by Bessus, satrap of Bactria. The next two years were occupied by Alexander in the consolidation of his Persian conquests, and the reduction of Bactria. In n. c. 327 he crossed the Indus, penetrated to the Hyphasis, and was there forced by the discontent of his army to turn westward. He reached Susa n. c. 325, and proceeded to Babylon n. c. 324, which he chose as the capital of his empire. In the next year he died there (n. c. 323) in the midst of his gigantic plans: and those who inherited his conquests left his designs unachieved and unattempted (cf. Dan. vii. 6, viii. 5, xi. 3).

The famous tradition of the visit of Alexander to Jerusalem during his Phoenician campaign (Joseph. Ant. xii. 8, 1 ff.) has been a fruitful source of controversy. The Jews, it is said, had provoked his anger by refusing to transfer their allegiance to him when summoned to do so during the siege of Tyre, and after the reduction of Tyre and Gaza (Joseph. l. c.) he turned towards Jerusalem. Judas (Jaddua) the high-priest (Neh. xii. 11, 22), who had been warned in a dream how to avert the king's anger, eagerly awaited his approach; and when he drew near went out to Saphah (\.\'\'\'\'\', the noted), within sight of the city and temple, clad in his robes of haught and gold, and accompanied by a train of priests and citizens arrayed in white. Alexander was so moved by the solemn spectacle that he did reverence to the holy name inscribed upon the tiara of the high-priest; and when Pammenes expressed surprise, he replied that he had seen the god whom Jaddua represented in a dream at Damascus, and he expected to find him to cross over into Asia, and restore him his former greatness. After this, it is said that he visited Jerusalem, offered sacrifice there, heard the prophecies of Daniel which foretold his victory, and conferred important privileges upon the Jews, not only in Judaea but in Babylonia and Media, which they enjoyed during the supremacy of his successors. The narrative is repeated in the Talmud (Baba Batha 68; ap. Tosa. Kol. 1. 10, ed. Rob. s. v. Alexander), and the tradition is there said to have been Simon the Just, in later Jewish writers (Vajikra R. 13; Joseph ben Gerson, ap. Ste. Croix, p. 554), and in the chronicles of Abulafia (Ste. Croix, p. 555). The event was adapted by the Samarians to suit their own history, with a corresponding change of places and persons, and various embellishments (Abulafia, quoted by Ste. Croix, pp. 296—12); and indeed the time Alexander was enrolled among the prophets of Judaism. On the other hand, the event of the Cotton图书馆 of the great and Curious, — the connexion in which it is placed by Josephus is alike inconsistent with Jewish history (Ewald, Gesch. d. Völker Isr. iv. 124 f.) and with the narrative of Arrian (iii. 1 42 Ηπιπέδη ηταλόν ἄκαθος τήν Γαϊσαν- ης διάκολον τοις Παρθονοις). But admitting the inexactness of the details of the tradition as given by Josephus, there are several points which confirm the truth of the main fact. Justin says that "many kings of the East came to meet Alexander wearing fillets" (lib. xi. 10); and after the capture of Tyre "Alexander himself visited some of the cities which still refused to submit to him" (Unt. iv. 5, 13). Even at a later time, according to Curtius, he executed vengeance personally on the Samaritans for the murder of his governor Androclus (Unt. iv. 8, 10). Besides this, Jewish soldiers were enlisted in his army (Hecat. ap. Joseph. c. Apion. i. 22); and Jews formed an important element in the population of the city which he founded shortly after the supposed visit. Above all, the privileges which he is said to have conferred upon the Jews, including the remission of tribute every sabbatical year, existed in later times, and imply some such relation between the Jews and the great conqueror as Josephus describes. Internal evidence is decidedly in favor of the story, even in its picturesque fulness. From policy or conviction Alexander delighted to represent himself as chosen by destiny for the great act which he achieved. The siege of Tyre arose professedly from a religious motive. The battle of Issus was preceded by the visit to Gordium; the invasion of Persia by the pilgrimage to the temple at Athens. And it was necessary to determine the correct circumstances of the meeting of Alexander and the Jewish sages, the silence of the classical historians, who notoriously disregarded (e. g. the Maccabees) and misrepresented (Tac. Hist. v. 8) the fortunes of the Jews, cannot be held to be conclusive against the occurrence of an event which must have appeared to them trivial or unintelligible (John, Arch. cond. 139 f.; Ste. Croix, Ezech. quod super Aristot., Amstel. 1705, pp. 69 ff.)

The tradition, whether true or false, presents an aspect of Alexander's character which has been frequently lost sight of by his recent biographers. He was not simply a Greek, nor must he be judged by a Greek standard. The Orientalism, which was a main part of his character, and essential to his success, is not a divergence from his principles, and not the result of caprice or vanity (comp. Arr. vii. 29). He approached the idea of a universal monarchy from the side of Greece; but his final object was to establish something higher than the paramount supremacy of one people. His purpose was to combine and equalize, not to annihilate: to weld the East and West in a just union—not to enslave Asia to Greece (Plut. Athen. iv. 1, § 6). The time indeed, was not yet come when this was possible, but if he could not accomplish the great issue, he prepared the way for its accomplishment.

The first and most direct consequence of the policy of Alexander was the weakening of nationalities, the first condition necessary for the dissolution of the old religions. The swift course of his victories, the constant change in the incorporation of new elements in his armies, the fierce wars and changing fortunes of his successors, broke down the barriers by which kingdom had been separated from kingdom, and opened the road for larger conceptions of life and faith than had hitherto been possible (cf. Polyb. iii. 50). The contact of the East and West brought into practical forms, thoughts and feelings which had been内容d to the achievements of Paganism, was depicted beyond the narrow limits in which it was transplanted beyond the narrow limits in which it remained unknown.
took its shape. The spread of commerce followed the progress of arms; and the Greek language and literature vindicated their claim to be considered the most perfect expression of human thought by becoming gradually universal.

The Jews were at once most exposed to the powerful influences thus brought to bear upon the East, and most able to support them. In the arrangement of the Greek conquests which followed the battle of Ipsus, n. c. 301, Judaea was made the frontier land of the rival empires of Syria and Egypt, and though it was necessarily subjected to the constant vicissitudes of war, it was able to make advantageous terms with the state to which it owed allegiance, from the important advantages which it offered for attack or defense [Antiochus, ii.-vii.]. Internally also the people were prepared to withstand the effects of the revolution which the Greek dominion effected. The constitution of Ezra had obtained its full development. A powerful hierarchy had succeeded in substituting the idea of a church for that of a state; and the Jew was now able to wander over the world and yet remain faithful to the God of his fathers [The Dispersion]. The same constitutional change had strengthened the intellectual and religious position of the people. A rigid "fence" of ritualism protected the course of common life from the license of Greek manners; and the great doctrine of the unity of God, which was now seen to be the divine centre of their system, counteracted the attractions of a philosophic pantheon [Samon the Just]. Through a long course of discipline in which they had been left unguided by prophetic teaching, the Jews had realized the nature of their mission to the world, and were waiting for the means of fulfilling it. The conquest of Alexander furnished them with the occasion and the power. But at the same time the example of Greece fostered personal as well as popular independence. Judaism was

specifically divided into sects, analogous to the typical forms of Greek philosophy. But even the rude analysis of the old faith was productive of good. The freedom of Greece was no less instrumental in forming the Jews for their final work than the contemplative spirit of Persia, or the civil organization of Rome; for if the career of Alexander was rapid, its effects were lasting. The city which he chose to bear his name perpetuated in after ages the office which he providentially discharged for Judaism and mankind; and the historian of Christianity

a The attempt of Bertholdt to apply the description of the third monarchy to that of Alexander has little to recommend it [Daniel].

must confirm the judgment of Arrian, that Alexander, "who was like no other man, could not have been given to the world without the special design of Providence" (Ew. τοῦ θεοῦ, Att. vii. 30). And Alexander himself appreciated this design better even than his great teacher; for it is said (Plut. de Alec. Or. 1, § 6) that when Aristotle urged him to treat the Greeks as freemen and the Orientals as slaves, he found the true answer to this counsel in the recognition of his "divine mission to unite and reconcile the world" (καὶ οὐκ εἶδεν διάστημα καὶ παλαιάστηκα τῶν ὥν δὲν οἴον.)

In the prophetic visions of Daniel the influence of Alexander is necessarily combined with that of his successors. They represented with partial exaggeration the several phases of his character; and to the Jews nationally the policy of the Syrian kings was of greater importance than the original conquest of Asia. But some traits of "the first mighty king" (Dan. viii. 21, xi. 3) are given with vigorous distinctness. The emblem by which he is typified (Dan. vii. 14; a he-goat, fr. Τ irresistibile, Ges. Thes. s. v.) suggests the notions of strength and speed; and the universal extent (Dan. viii. 5, "from the west on the face of the whole earth") and marvellous rapidity of his conquests (Dan. i. c. he toucheth not the ground) brought to the characteristics of his power, which was directed by the strongest personal impetuosity (Dan. vii. 6, "in the fury of his power.") He ruled with great dominion, and did according to his will (xi. 3); and there was none that could deliver . . . out of his hand (viii. 7)."

B. F. W.

ALEXANDER BALAS (Joseph. Ant. xii. 4, § 8, Αλέξανδρος ὁ Βάλας λεγόμενος; Strab. xiv. p. 734, τὸν Βάλα Αλέξανδρον Just. xxxv. 1, Suborning pro eo Euboulus quemdam . . . et . . . nomen ei Alexander indultur. Balas possibly represents the Aram. Βαλα, bond; he likewise assumed the titles ἔτριγες and ἐφρετηστι, 1 Macc. x. 1). He was, according to some, a (natural) son of Antiochus IV. Epiphanes (Strab. xiii. Joseph. Ant. xii. 2, 1), but he was more generally regarded as an impostor who falsely assumed the connection (App. Syg. 67; Justin i. c. cf. Polyb. xxxiii. 10). He claimed the throne of Syria in 152 B. c. in opposition to Demetrius Soter, who had provoked the hostility of the neighboring kings and alienated the affections of his subjects (Joseph. l. c.). His pretensions were put forward by Hellenists, formerly treasurer of Antiochus Epiphanes, who obtained the recognition of his title at Rome by scandalous intrigues (Polyb. xxxiii. 14, 16). After landing at Ptolemais (1 Macc. x. 1) Alexander gained the warm support of Jonathan, who was now the leader of the Jews (1 Macc. ix. 73); and though his first efforts were unsuccessful (Just. xxxv. 1, 10), in 150 B. c. he completely routed the forces of Demetrius, who himself fell in the retreat (1 Macc. x. 48-50; Joseph. Ant. xii. 2, 4; Str. xvi. p. 751). After this Alexander married Cleopatra, the daughter of Ptolemais VI. Philometor; and in the arrangement of his kingdom appointed Jonathan governor (μεγάλης: 1 Macc. x. 69) of a province (Judaea: cf. 1 Macc. xi. 57). But his

There may be also some allusion in the word to the legend of Cyrus, the founder of the Achaemenid dynasty in Macedon, who was guided to victory by a flock of goats. (Jast. i. 75)
ALEXANDER

triumph was of short duration. After obtaining power he gave himself up to a life of indulgence (Liv. Ep. 59; cf. Athen. v. 211); and when Demetrius Nicator, the son of Demetrius Soter, landed in Syria in 147 B.C., the new pretender found powerful support (1 Mac. x. 67 ff.). At first Jonathan deserted and slew Apollonius the governor of Cilicia-Syria, who had joined the party of Demetrius, for which he received fresh favors from Alexander (1 Mac. x. 68-83); but shortly afterwards (v. c. 146) Ptolemy entered Syria with a large force, and after he had placed garrisons in the chief cities on the coast, which received him according to the commands of Alexander, suddenly pronounced himself in favor of Demetrius (1 Mac. xii. 1-11; Joseph. Ant. xiii. 4, 5 ff.), alleging, probably with truth, the existence of a conspiracy against his life (Joseph. I. c. cf. Diod. ap. Muller. Fug. ii. 16). Alexander, who had been forced to leave Antioch (Joseph. I. c.), was in Cilicia when he heard of Ptolemy's defection (1 Mac. xii. 14). He hastened to meet him, but was defeated (1 Mac. xii. 15; Just. xxv. 2), and fled to Asia in Arabia (Diod. I. c.), where he was murdered v. c. 146 (Diod. I. c.; 1 Mac. xii. 17) differs as to the manner; and Euseb. Chron. Ann. i. 349 represents him to have been slain in the battle). The narrative in 1 Mac. and Josephus shows clearly the partiality which the Jews entertained for Alexander "as the first that entreated of true peace with them" (1 Mac. x. 47); and the same feeling was exhibited afterwards in the zeal with which they supported the claims of his son Antiochus. [Antiochus VI.]

ALEXANDRIA

Tetradrachm (Ptolemaic talent) of Alexander Balas.

(See: Bust of king to right. Rev. ΑΛΕΞΑΝΔΡΟΥ. Eagle, upon rudder, to left, and palm-branch. In field, the monogram and symbol of Tyre; date ΤΠ (132 B.C., Seleucid).)

ALEXANDER (Ἀλεξάνδρος), in N. T. 1. Son of Simon the Cyrenian, who was compelled to bear the cross for our Lord (Mark xxv. 21). From the manner in which he is there mentioned, together with his brother Rubus, they were probably persons well known in the early Christian church. [Comp. Rom. xvi. 13.]

2. One of the kindred of Amass the high-priest (Acts iv. 6), apparently in some high office; as he is among three who are mentioned by name. Some suppose him identified with Alexander the Malachi at Alexandria, the brother of Philo Judæus, mentioned by Josephus (Ant. xviii. 8, § 1, xix. 5, § 1); in the latter passage as a ϕίλος ἀρχαγγέλου of the Emperor Hadrian; so that the time is not inconsistent with such an idea.

A. The Alexandrine corvessels (Acts xxvii. 6, xviii. 11) were large (Acts xxvi. 35) and handsome (Luc. Nigr. p. 698 ed Benzi); and even Verpasian made a voyage in one (Joseph. B. J. vii. 2). They generally sailed direct to Puteoli (Demochron. Strab.

3. A Jew at Ephesus, whom his countrymen put forward during the tumult raised by Demetrius the silversmith (Acts xix. 33), to plead their cause with the mob, as being unconnected with the attempt to overthrow the worship of Artemis. Or he may have been, as imagined by Calvin and others, a Jewish convert to Christianity, whom the Jews were willing to expose as a victim to the frenzy of the mob.

4. An Ephesian Christian, reproved by St. Paul in 1 Tim. i. 20, as having, together with one Hymenaeus, put him from faith and a good conscience, and so made shipwreck concerning the faith. This may be the same with

5. ALEXANDER: the coppersmith (Acts, δ χαλκι- κείος), mentioned by the same apostle, 2 Tim. iv. 14, as having done him many mischiefs. It is quite uncertain where this person resided; but from the caution to Timothy to beware of him, probably at Ephesus.

H. A.

ALEXANDRIA [Gr. Ἀλεξάνδρεια] (Acts xix. 38, 3 Mac. iii. 11; Mod. E-Δικάσθενες; Ebn., Αλεξάνδρεις, 3 Mac. iii. 30, iii. 21; Acts xvi. 24, vi. 9), the Hellenic Roman and Christian capital of Egypt, was founded by Alexander the Great the latter of whom traced himself the ground-plan of the city which he designed to make the metropolis of his western empire (Plut. Alex. 26). The work thus begun was continued after the death of Alexander by the Ptolemies; and the beauty (Athen. i. p. 3) of Alexandria became proverbial. Every natural advantage contributed to its prosperity. The climate and site were singularly healthy (Strab. p. 793). The harbors formed by the island of Pharos and the headland Lochias, were safe and commodious, alike for commerce and for war; and the lake Mareotis was an inland haven for the mercantile of Egypt and India (Strab. p. 798). Under the despots of the later Ptolemies the trade of Alexandria declined, but its population (300,000 freemen, Diod. xvii. 52; the free population of Antioch was about 130,000) and wealth (Strab. p. 798) were enormous. After the victory of Augustus it suffered for its attachment to the cause of Antony (Strab. p. 792); but its importance as one of the chief corn-ports of Rome secured for it the general favor of the first emperors. In later times the solitaries tunneled for which the Alexandrians had always been notorious, desolated the city (A.D. 260 A.D.; Gibbon, Decline and Fall, i. x.), and religious feuds aggravated the popular distress (Dionys. Alex. Ep. iii. xii.; Euseb. H. E., vi. 41 ii.; vii. 22). Yet even thus, though Alexandria suffered greatly from constant dissensions and the weakness of the Byzantine court, the splendor of "the great city of the West" endured. Among its Arab conquerors (A.D. 649; Gibbon, e. c.) and after centuries of Mohammedan misrule it promises once again to justify the wisdom of its founder (Strab. xvii. pp. 791-9; Fug. ap. Joseph. Ant. xiv. 7, 2; Plut. Alex. 26; Arr. iii. 1; Joseph. B. J. iv. 5. Comp. Alexander the Great).

The population of Alexandria was mixed from the days of its foundation (Acts xviii. 27, 28) and this fact formed the groundwork of the Alexandrine character. The three regions into which the city was divided (Regio Alexandrina, Bithynica, Rhoeotis) corre-

sounded to the three chief classes of its inhabitants, Jews, Greeks, Egyptians; but in addition to these principal races, representatives of other races were found there (Dion Chrys. Orat. xxiii.). According to Josephus, Alexander himself assigned to the Jews a place in his new city; "and they obtained," he adds, "equal privileges with the Macedonians" (c. Ap. ii. 4) in consideration of "their services against the Egyptians" (B. J. ii. 18, 7). Ptolemy I.imitated the policy of Alexander, and, after the capture of Jerusalem, he removed a considerable number of its citizens to Alexandria. Many others followed of their own accord; and all received the full Macedonian franchise (Joseph. Ant. xii. 1; cf. c. Ap. i. 22), as men of known and tried fidelity (Joseph. c. Ap. ii. 4). Already on a former occasion the Jews had sought a home in the land of their bondage. More than two centuries and a half before the foundation of Alexandria a large body of them had taken refuge in Egypt, after the murder of Gedaliah; but these, after a general apostasy, were carried captive to Babylon by Nebuchadnezzar (2 K. xxv. 26; Jer. xlv.; Joseph. Ant. x. 9, 7).

The fate of the later colony was far different. The numbers and importance of the Egyptian Jews were rapidly increased under the Ptolemies by fresh immigrations and maturing industry. Philo estimates them in his time at little less than 1,800,000 (In Flacc. § 6, p. 971); and adds that two of the five districts of Alexandria were called "Jewish districts;" and that many Jews lived scattered in the remaining three (id. § 8, p. 973). Julius Caesar (Joseph. Ant. xiv. 10, § 1) and Augustus confirmed to them the privileges which they had enjoyed before, and they retained them with various interruptions, of which the most important, A. D. 59, is described by Philo (l. c.), during the tumults and persecutions of later reigns (Joseph. c. Ap. ii. 4; B. J. xiii. 3, 2). They were represented, at least for some time (from the time of Cleopatra to the reign of Claudius; Jost, Gesch. d. Judenth. i. 353) by their own officer (εὐφρόνιος, Strab. ap. Joseph. Ant. xiv. 7, 2; αλαμβάνως, Joseph. Ant. xviii. 7, 3; 9, 1; xix. 3, 1; cf. Rup. ad Juv. Sat. i. 139; γενναίος, Philo, In Flacc. § 10, p. 975), and Augustus appointed a council (ἐραυναία, i. c. Sankte- din. Philo l. c.) to superintend the affairs of the Jews. The establishment of Christianity altered the civil position of the Jews, but they maintained their relative prosperity; and when Alexandria was taken by Amrou 40,000 tributary Jews were reckoned among the marves of the city (Gibbon, cl.).

For some time the Jewish Church in Alexandria was in close dependence on that of Jerusalem. Both were subject to the civil power of the first Ptolemies, and both acknowledged the high-priest as their religious head. The persecution of Ptol- emy Philopator (217 B. c.) occasioned the first political separation between the two bodies. From that time the Jews of Palestine attached themselves to the fortunes of Syria [Antiochus the Great]; and the same policy which alienated the Palestin- ian party gave unity and decision to the Jews of Alexandria. The Septuagint translation which strengthened the barrier of language between Pal- estine and Egypt, and the temple at Leontopolis (161 B. c.) which subjected the Egyptian Jews to the charge of sensualism, widened the breach which was thus opened. But the division, though marked, was not complete. At the beginning of the Chris- tian era the Egyptian Jews still paid the contributions to the temple-service (Raphall, Hist. of Jews, ii. 72). Jerusalem, though its name was fashioned to a Greek shape, was still the Holy City, the met- tropolis not of a country but of a people (Τεφθο- αρχα, Philo, In Flacc. § 7; Leg. ad Cit. § 86); and the Alexandrians had a synagogue there (Acts vi. 9). The internal administration of the Alexan- drine Church was independent of the Sanhedrin at Jerusalem; but respect survived submission.

There were, however, other causes which tended to produce at Alexandria a distinct form of the Jewish character and faith. The religion and phi- losophy of that restless city produced an effect upon the people more powerful than the influence of poli- tics or commerce. Alexander himself symbolized the spirit with which he wished to animate his new capital by founding a temple of Isis side by side with the temples of the Greek gods (Arr. iii. 1). The creeds of the East and West were to coexist in friendly union; and in after-times the mixed worship of Sarapis (comp. Gibbon, c. xxviii.; Dict. of Geogr., p. 99) was characteristic of the Greek kingdom of Egypt (August. De Civ. Dei, xviii. 9; S. maximius Egyptianus Jews). This catholicity of worship was further combined with the spread of universal learning. The same monocrats who favored the worship of Sarapis (Clem. Al. Protr. iv. § 48) founded and embellished the Museum and Library; and part of the Library was deposited in the Sarapeum. The new faith and the new litera- ture led to a common issue; and the Egyptian Jews necessarily imbued the spirit which prevailed around them.

The Jews were, indeed, peculiarly susceptible of the influences to which they were exposed. They presented from the first a capacity for Eastern or Western development. To the faith and conserva- tion of the Oriental they united the activity and energy of the Greek. The mere presence of Hel- lenic culture could not fail to call into play their powers of speculation, which were hardly repressed by the traditional legalism of Palestine (comp. Jost, Gesch. d. Judenth. i. 247); and the un- changing element of divine revelation which they always retained, enabled them to harmonize new thought with old belief. But while the intercourse of the Jew and Greek would have produced the same general consequences in any case, Alexandria was peculiarly adapted to insure their full effect. The result of the contact of Judaism with the many creeds which were current there must have been speedy and powerful. The earliest Greek fragment of Jewish writing which has been pre- served (about 160 B. c.) [ARISTOBULUS] contains large Orphic quotations, which had been already moulded into a Jewish form (comp. Jost, Gesch. d. Judenth. i. 370); and the attempt thus made to connect the most ancient Hellenic traditions with the Law, was often repeated afterwards. Nor was this done in the spirit of bold forgery. Orphics, Musaeus, and the Sibyls appeared to stand, in some

a Polibius (xxxiv. 14; ap. Strab. p. 797) speaks of the population as consisting of "three races (τρις γέρικη), the native Egyptian . . . the mercenary . . . and the Alexandria . . . of Greek descent." The Jews might
remote period anterior to the corruptions of polythelism, as the witnesses of a primeval revelation and of the teaching of nature, and thus it seemed exæscable to attribute to them a knowledge of the Modern Hellenic or third book of the Mahabharata (c. u. c. 150) is the most valuable relic of this pseudo-Hellenic literature, and shows how far the conception of Judaism was enlarged to meet the wider view of the religious condition of heathendom which was opened by a more intimate knowledge of Greek thought; though the later Apocalypse of Ezra (ESDRAS II.) exhibits a marked reaction towards the extreme exclusiveness of former times.

But the indirect influence of Greek literature and philosophy produced still greater effects upon the Alexandrine Jews than the open conflict and combination of religious dogmas. The literary school of Alexandria was essentially critical and not creative. For the first time men labored to collect, revise, and classify all the records of the past. Poets trusted to their learning rather than to their imagination. Language became a study; and the legends of early mythology are transformed into philosophic mysteries. The Jews took a vigorous share in these new studies. The caution against writing, which became a settled law in Palestine, found no favor in Egypt. Numerous authors adapted the history of the Patriarchal, of Moses, and of the Kings, to classical models (Eiseh. Prog. Er. i. 15-20) [as] Eupolemus, Artapanus (?), Demetrius, Aristaeus, Cleopatra Philo, or Malchus, a prophet. A poem which bears the name of Phileolochus, gives in verse various precepts of Leviticus (Justin vec. LXX. Apology, p. 512 f. Romae, 1772); and several large fragments of a "tragedy" (in which Ezekiel (c. u. c. 110) dramatized the Exod., have been preserved by Eusebius (l. c.), who also quotes numerous passages in heroic verse from the older Philo and a "sibylus. This classicalism of style was a symptom and a cause of classicalism of thought. The same Aristobulus who gave currency to the Judaeo-Orphic verses, endeavored to show that the Pentateuch was the real source of Greek philosophy (Eiseh. Prog. Er. xiii. 12; Clem. Al. Strom. vi. 98).

The proposition thus enunciated was thoroughly congenial to the Alexandrine character; and henceforth it was the chief object of Jewish speculation to find in the analogies of the New Testament another proof to the existence of both the writings of Moses and the teaching of the schools. The circumstances under which philosophical studies first gained a footing at Alexandria favored the attempt. For some time the practical sciences reigned supreme; and the issue of these was skepticism (Matter, Hist. de l'École d'Alex. iii. 162 ff.). Then at length the clear analysis and practical morality of the Peripatetics found ready followers; and in the strength of the reaction men eagerly trusted to those splendid ventures with which Plato taught them to be content till they could gain a surer knowledge (Phaed. p. 83). To the Jew this surer knowledge seemed to be already given; and the belief in the existence of a spiritual meaning underlying the letter of Scripture was the great principle on which all his investigations rested. The facts were to be essentially to understand the language the veil (or sometimes the mask) which partly disguised from common sight the truths which it enveloped. In this way a twofold object was gained. It became possible to withdraw the Supreme Being (τὸ ηὐαγγελία τοῦ θεοῦ) from immediate contact with the material world; and to apply the narratives of the Bible to the phenomena of the soul. It is impossible to determine the process by which the results were reached; but, as in parallel cases, they seem to have been shaped gradually in the minds of the mass, and not fashioned at once by one great teacher. Even in the LXX. there are traces of an endeavor to interpret the anthropomorphic imagery of the Hebrew text [Septuagint]; and there can be no doubt that the Commentaries of Aristobulus gave some form and consistency to the allegoric system. In the time of Philo (c. u. c. 20 — 100) the theological and interpretative systems were evidently fixed, even in many of their details, and he appears in both cases only to have collected and expressed the popular opinions of his countrymen.

In each of these great forms of speculation — the philosophical and the exegetical — Alexandrianism has an important bearing upon the Apostolic writings. But the doctrines which are characteristic of the Alexandrine school were by no means peculiar to it. The same causes which led to the formation of wider views of Judaism in Egypt, acting under greater restraint, produced corresponding results in Palestine. A doctrine of the Word (Logos), and a system of mystical interpretation grew up within the Rabbinic schools, which bear a close analogy to the language of St. John and to the "allegories" of St. Paul than the speculations of Philo. But while the importance of this Rabbinic element in connection with the expression of Apostolic truth is often overlooked, there can be no doubt that the Alexandrine teaching was more powerful in furthering its reception. Yet even when the function of Alexandrianism with regard to Christianity is thus limited, it is needful to avoid exaggeration. The preparation which it made was indirect and not immediate. Philo's doctrine of the Word (Logos) led men to accept the teaching of St. John, but not to anticipate it; just as his method of allegorizing fitted them to enter into the arguments of the Epistle to the Hebrews, though they could not have foreseen their application.

The first thing, indeed, which must strike the reader of Philo in relation to St. John, is the similarity of phrase without a similarity of idea. His treatment of the Logos is vague and does not give the term and not about the reality, and seems to delight in the ambiguity which it involves. At one time he represents the Logos as the reason of God in which the archetypal ideas of things exist (Δοξά τοῦ ἐν κόσμῳ), at another time as the Word of God by which he makes himself known to the outward world (Δοξά προσώπου); but he nowhere realizes the notion of One who is at once the Creator and the Revelation, which is the personal unity of the Logos and the Messiah. But while it is right to state in its full breadth the opposition between the teaching of Philo and St. John, it is a The closest analogy to the teaching of Philo on the Logos occurs in the Epistle to the Hebrews, which
impossible not to feel the important office which the mystic theosophy, of which Philo is the representative, fulfilled in preparing for the apprehension of the highest Christian truth. Without any distinct conception of the personality of the Logos, the tendency of Philo's writings was to lead men to regard the Logos, at least in some of the senses of the term, as a person; and while he maintained with devout earnestness the indivisibility of the divine nature, he described the Logos as divine. In this manner, however unconsciously, he prepared the way for the recognition of a twofold personality in the Son of God, and performed a work without which it may well appear that the language of Christianity would have been unintelligible (comp. Döner, Die Lehre von der Person Christi, i. 23 ff.).

The allegoric method stands in the same relation to the spiritual interpretation of Scripture as the mystic doctrine of the Word to the teaching of St. John. It was a preparation and not an anticipation of it. Unless men had been familiarized in some such way with the existence of an inner meaning in the Law and the Prophets, it is difficult to understand how an Apollo "mighty in the Scriptures" (Acts xviii. 24-28) could have convinced many, or how the infant Church could have seen almost unMOVED the riddle of the Old Covenant sweep away, strong in the conscious possession of its spiritual antitypes. But that which is found in Philo in isolated fragments combines in the New Testament to form one great whole. In the former the truth is affirmed in casual details, in the latter it is laid down in its broad principles which admit of infinite application; and a comparison of patristic interpretations with those of Philo will show how powerful an influence the Apostolic example exercised in curling the imagination of later writers. Nor is this all. While Philo regarded that which was positive in Judaism as the mere symbol of abstract truths, in the Epistle to the Hebrews it appears as the shadow of blessings realized (Hebr. ii. 11, pedou-ména [so Lachm.] in the presence of a personal Saviour. History in the one case is the emanation of a riddle; in the other it is the record of a life.

The speculative doctrines which thus worked for the general reception of Christian doctrine were also embodied in a form of society which was afterwards transferred to the Christian Church. Numerous bodies of sectaries (Therapeutæ), especially on the borders of Lake Marœus, devoted themselves to a life of ceaseless discipline and study. Unlike the Essenes, who present the corresponding phase in Palestinian life, they abandoned society and labor, and often forgot, as it is said, the simplest wants of nature in the contemplation of the hidden wisdom of the Scriptures (Philo, De Vit. Contempl. throughout). The description which Philo gives of their occupation and character seemed to Eusebius to present so clear an image of Christian virtues that he claimed them as Christians; and there can be no doubt that some of the forms of monasticism were shaped upon the model of the Therapeutæ (Euseb. H. E. ii. 10).

According to the common legend (Euseb. c. c.) St. Mark first "preached the Gospel in Egypt, and founded the first Church in Alexandria." At the beginning of the second century the number of Christians at Alexandria must have been very large, and the great leaders of Gnosticism who arose there (Hassibès, Valentins) exhibit an exaggeration of the tendency of the Church. But the later form of Alexandrine speculation, the strange varieties of Gnosticism, the progress of the catechetical school, the development of Neo-Platonism, the various phases of the Arian controversy, belong to the history of the Church and to the history of philosophy. To the last Alexandria fulfilled its mission; and we still owe much to the spirit of its great teachers, which in later ages struggled, not without success, against the stern systems of the West.

ALEXANDRIANS, THE (eii άλεξάνδριοι). 1. The Greek inhabitants of Alexandria (3 Mac. ii. 30, iii. 21). 2. (Alexandrinus). The Jewish colonists of that city, who were admitted to the privileges of citizen ship, and had a synagogue at Jerusalem (Acts vi. 9). [ALEXANDRIA, p. 63 a.]

ALGUM or ALMUG TREES (αλμύγις, αλμύγινον, Αλμύγις, abamsgin: Άλμυγις, abamysgin, abamysgin, abamysgin; βασιλικά, abamysgin; επαξιλεκτῇ, almygii; έκαί, abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgin; abamysgi
Algem to the mountains of Lebanon must be considered to be either an intermixture of some
transmitter, or else it must bear a different interpretation.
The former view is the one taken by Rosenmuller (Bibl. Bot. p. 215; Morren's translation),
who suggested that the wood had been brought from Ophir to Tyre, and that Solomon's instructions to
Hiram were sent on to Jerusalem (viz de Bois, perhaps) to the oil merchant from Ophir that was
l1ng at the port of Tyre, with the cedar which had been cut in Mount Lebanon (see Lee's Heb.
Lxx. s. v. "Alhagiim"). No information can be deduced from the readings of the LXX., who explain the Hebrew word by "lewn wood" (1 K. x. 11, Vat.), "unhewn wood" (ibid. Alex.), and "cme-wood" (2 Chr. ii. 8, and ix. 10, 11). The Vulg. in the passages of Kings and 2 Chr. ix. reads ligna lignum; but in 2 Chr. ix. 8 follows the LXX., and has ligna pinum. Interpreters are greatly perplexed as to what kind of tree is denoted by the words algammam and almaggam. The Arabic and the Chaldee interpretations, with Munster, A. Montanus, Deechaut, Noddia, Tigririnus, retain the original word, as does the A. V. in all the three
passages. The attempts at identification made by modern writers have not been happy. (1) Some writers hold that the "almaggam" wood is signified by almug. This wood, as is well known, was highly prized by the Romans, who used it for doors of temples, tables, and a variety of purposes; for the citron-wood of the ancients appears to be identical with the thuya. (The word occurs in Rev. xii. 13.) Its value to the Romans accounts for the reading of the Vulgate in the passages quoted above. But the Thuya orientalis is indigenous to the north of Africa, and is not found in Asia; and few geographers will be found to identify the ancient Ophir with any port on the N. African coast. (Orph.) (2) Not more happy is the opinion of Dr. Kitto, that the douroar is the tree probably designated by the term algam (Vest. Bibl.,
note on 2 Chr. i.). On this subject Dr. Hooker, in a letter to the writer, says, "The douroar is out of the question. It is no better than cedar, and never could have been imported from Hiram, to whom it was sent." (3) The late Dr. Boileau, with more reason, is inclined to decide on the white sandal-wood (Sondhun album; see Cyc. Bibl. Lit. art. "Algum"). This tree is a native of India, and the mountainous parts of the coast of Malabar, and deliciously fragrant in the parts near to the root. It is much used in the manufacture of work-boxes, cabinets, and other arti-
2 facts. (4) The rabbinus understand a wood commonly called haddon, in Arabic ahedon, or a
derp red color, used in dying," this appears to be the haddon (corallium rubrum), a tree allied to the Brazil wood of modern commerce, and found in India; and many of the Jewish doctors
understand oral (i. e. cord-wood) by the word algam, the name no doubt having reference to the color of

the wood. (5) If any reliance is to be placed on these rubricated interpretations, the most probable of all the attempts to identify the algam is that first proposed by Celsius (Herod. i. 172), namely that the red sandal-wood (Phoeocarpus sandanus) may be the kind denoted by the Hebrew word. But this, after all, is mere conjecture. "I have," says Dr. Hooker, "heard the subject of the "alhagiim discussed, but never to any purpose. The Phoeocarpus sandanus has occurred to me, but it is not found in large pieces, nor is it, I believe, now used for musical purposes.

Such a tree, which belongs to the natural order Leguminosae, and sub-order Papilionacae, is a native of India and Ceylon. The wood is very heavy, hard, and fine-grained, and of a beautiful garnet color, as any one may see who has observed the medical preparation, the compound tincture of lavender, which is colored by the wood of the red sandal-tree. Dr. Lee (ibid. Heb. Lxx. s. v. "Alhaggim") identifying Ophir with some seaport of Ceylon, following Bochart (Chamnan, i. 46) herein, thinks that there can be no doubt that the wood in question must be either the Kalkunj ill of Ceylon or the sandal-wood (Phoeocarpus sant.?) of India. The Kalkunj ill, which apparently is some species of P. ceylonensis, was particularly esteemed, and sought after for the manufacture of lutes and musical instruments, as Dr. Lee has proved by quotations from Arabic and Persian works. In fact he says that the Eastern lyre is termed the ill, perhaps because made of this sort of wood. As to the de-
2ivation of the word nothing certain can be learnt. Miller (Hierogl, p. i. 106) derives it from two words meaning "drops of gum;" and as if some resins wood was intended. There is no objection to this derivation. The various kinds of pines are for the most part trees of a resinous nature; but the value of the timber for building is great. Nor would this derivation be unsuitable to the Phoe-
carpus generally, several species of which emit resins when the stem is wounded. Josephus (Ant.
8, § 1) makes special mention of a tree not unlike pine, but which he is careful to warn us not to identify with the pine trees known to the merchants of his time. "Those are we speaking of," he says, "were in appearance like the wood of the fig-tree, but were whiter and more shining." This description is too vague to allow us even to conjecture what he means. And it is quite impossible to arrive at any certain conclusion in the attempt to identify the algam or alum-tree. The arguments, however, are more in favor of the red sandal-wood than of any other tree. W. H.

**ALL TO.** On the expression (Judg. ix. 53) "all to brake his skull," see note to the art. ALM.

A. **ALLEGORY, a figure of speech, which has been defined by Bishop Marsh, in accordance with its etymology, as "a representation which is intended to excite the representation of another thing;" the first representation being consistent with itself, but requiring, or being capable of admitting, a moral and spiritual interpretation over and above its literal sense. An allegory has been incorrectly considered by some as a lengthened or sustained metaphor, or a continuation of metaphors, as by Cicero, thus standing in the same relation to metaphor as parable to simile. But the two figures are quite distinct: no sustained metaphor, or succession of metaphors, can constitute an allegory, and the interpretation of allegory differs from that of metaphor, in having to do not with words but things. In every allegory there is a twofold sense; the immediate or historic, which is understood from the words, and the ultimate, which is concerned with the things signified by the words. The allegorical interpretation is not of the words but of the things signified by them; and not only may, but actually does, coexist with the literal interpretation in every allegory, whether the narrative in which it is conveyed be of things possible or real. An illustration of this may be seen in Gal. iv. 24, where the apostle gives an allegorical interpretation to the historical narrative of Hagar and Sarah: not treating that narrative as an allegory in itself, as our A. V. would lead us to suppose, but drawing from it a deeper sense than is conveyed by the immediate representation.

In pure allegory no direct reference is made to the principal object. Of this kind the parable of the prodigal son is an example (Luke xvi. 11-32). In mixed allegory the allegorical narrative either contains some hint of its application, as Ps. lixxx., or the allegory and its interpretation are combined, as in John xv. 1-8; but this last passage is, strictly speaking, an example of a metaphor.

The distinction between the parable and the allegory is laid down by Dean Treach (On the Parables, chap. i.) as one of form rather than of essence. "In the allegory," he says, "there is an interpretation of the thing signifying and the thing signified, the qualities and properties of the first being attributed to the last, and the two thus blended together, instead of being kept quite distinct and placed side by side, as is the case in the parable." According to this, there is no such thing as pure allegory as above defined.

W. A. W.

**ALLELELUIA** (ἀληλελούα: Halleluia), so written in Rev. xix. 1 ff. [and Tob. xiii. 18], or more properly ἈΛΛΕΛΕΛΥ (προκαταλελέλυ), "praise ye Jehovah," as it is found in the margin of Ps. civ. 35, ev. 45, evi. 1, exi. 1, exili. 1, exili. 1 (comp. Ps. exili. 9, exvi. 18, evxi. 19, exvii. 2). The Psalms from exiii. to exviii. were called by the Jews the Hallel, and were sung on the first of the month, at the feast of Dedication, and the feast of Tabernacles, the feast of Weeks, and the feast of the passover. [HOSANNA.] On the last occasion, Ps. exili. and exvii., according to the school of Hillel (the last not representing to the school of Shammai), were sung before the feast, and the remainder at its termination, after drinking the last cup. The hymn (Matt. xxvi. 30), sung by Christ and his disciples after the last supper, is supposed to have been the great Hallel, which seems to have varied according to the feast. The literal meaning of "Halleluiah" is sufficiently indicated by the changes of the Psalms in which it occurs, as hymns of praise and thanksgiving. They are all found in the last book of the collection, and bear marks of being intended for use in the temple-service; the words "praise ye Jehovah" being taken up by the full chorus of Levites. In the great hymn of triumph in heaven over the destruction of Babylon, the apostle in vision heard the multitude in chorus like the "mightyangels mingling their voices:

- "Alleluia, for the Lord God omnipotent reigneth," responding to the voice which came out of the throne saying "Praise our God, all ye his servants, and ye that fear him, both small and great" (Rev. xix. 1-6). In this, as in the offering of incense (Rev. viii.), there is evident allusion to the service of the temple, as the apostle had often witnessed it in its failing grandeur.

W. A. W.

**ALLIANCES.** On the first establishment of the Jews in Palestine, no connections were formed between them and the surrounding nations. The geographical position of their country, the peculiarity of their institutions, and the prohibitions against intercourse with the Canaanites and other heathen nations, alike tended to promote an exclusive and isolated state. But with the extension of the kingdom under the kings, the Jews were brought into contact with foreigners, and alliances became essential to the security of their commerce. Solomon concluded two important treaties exclusively for commercial purposes: the first with Hiram, king of Tyre, originally with the view of obtaining materials and workmen for the erection of the Temple, and afterwards for the supply of ship-builders and sailors (1 K. 2-12, ix. 27); the second with a Pharaoh, king of Egypt, which was concluded by his marriage with a princess of the royal family; by this he secured a monopoly of the trade in horses and other products of that country (1 K. 28, 29). After the division of the kingdom, the alliances were on the defensive nature. They had their origin partly in the internal disputes of the kingdoms of Judah and Israel, and partly in the position which these countries held relatively to Egypt on the one side, and the great eastern monarchies of Assyria and Babylonia on the other. The scantiness of the historical records at our command makes it probable that the key to many of the events that occurred is to be found in the alliances and counter-alliances formed between these peoples, of which no mention is made. Thus the invasion of Shishak in Rehoboam's reign was not improbably the result of an alliance made with Jeroboam, who had previously found an asylum in Egypt (1 K. xii. 24). Each of these monarchs sought a connection with the neighboring kingdom of Syria, on which side Israel was particularly accessible (1 K. xv. 19); but Asa ultimately succeeded in securing the active cooperation of Benhadad against Baasha (1 K. xvi. 19-20). Another policy, induced probably by the encroaching spirit of Syria, led to the formation of an alliance between the two kingdoms under Ahaz and Jehoshaphat, which was maintained until the end of Ahaz's reign. It was on this alliance that the shift from commercial operations (2 Chr. xx. 36). The alliance ceased in Jehu's reign: war broke out
shortly after between Amaziah and Jeroboam II.; each nation looked for foreign aid, and a coalition was formed between the kings of Syria, and Pekah on the one side, and Ahaz and Tachith-Plezer, king of Assyria, on the other (2 K. xvi. 5-9). By this means an opening was afforded to the advances of the Assyrian power; and the kingdoms of Israel and Judah, as they were successively attacked, sought the alliance of the Egyptians, who were strongly interested in maintaining the independence of the Jews as a barrier against the encroachments of the Assyrian power. Then Hoshea made a treaty with So (Salame or Sevedus), and receded against Shishmeser (2 K. xvi. 1); Hezekiah adopted the same policy in opposition to Nemascherib (Is. xxx. 2). In neither case was the alliance productive of much good: the Israelites were abandoned by So. It appears probable that his successor Sotah, who had offended the military caste, was unable to render Hezekiah any assistance; and it was only when the independence of Egypt itself was threatened, that the Assyrians were defeated by the joint forces of Sotah and Tirkah, and a temporary alliance afforded thereby to Judah (2 K. xix. 9, 36; Herod. ii. 141). The weak condition of Egypt at the beginning of the 26th dynasty left Judah entirely at the mercy of the Assyrians, who under Esarhaddon subdued the country, and by a conciliatory policy succeeded in obtaining the alliance of his successor to his side against Egypt (2 Chr. xxxiii. 11-13). It was apparently as an ally of the Assyrians that Josiah resisted the advance of Necho (2 Chr. xxxv. 20). His defeat, however, and the downfall of the Assyrian empire again changed the policy of the Jews, and made them the subjects of Egypt. Nehemiah's first expedition against Jerusalem was contemporaneous with and probably in consequence of the expedition of Necho against the Babylonians (2 K. xxv. 1; Jer. xvi. 2); and lastly, Zedekiah's rebellion was accompanied with a renewal of the alliance with Egypt (Ez. xxvii. 15). A temporary relief appears to have been afforded by the advance of Hophrah (Jer. xxxvii. 11), but it was of no avail to prevent the extinction of Jewish independence.

On the restoration of independence, Judah Mac- cenas sought an alliance with the Romans, who were then gaining an ascendency in the East, as a counterpart to the neighboring state of Syria (1 Mac. viii.; Joseph. Ant. xii. 10, § 6). This alliance was renewed by Jonathan (1 Mac. xii. 1; Ant. xiii. 5, § 9), and by Simon (1 Mac. xv. 17; Ant. xiii. 7, § 4). On the last occasion the independence of the Jews was recognized and formally ratified by the neighboring nations n. c. 140 (1 Mac. xxv. 22, 23). Treaties of a friendly nature were at the same period concluded with the Eroy- dianians under an impression that they came of a common stock (1 Mac. xii. 2, xiv. 20; Ant. xii. 4, § 10, xiii. 5, § 8). The Roman alliance was again renewed by Hyrcanus, r. c. 126 (Ant. xiii. 3, § 2), after his defeat by Antiochus Sidetes, and

the losses he had sustained were repaired. This alliance, however, ultimately proved fatal to the independence of the Jews. The rival claims of Hyrcanus and Aristobulhus having been referred to Pompéy, r. c. 68, he availed himself of the opportunity of placing the country under tribute (Ant. xiv. 4, § 4). Finally, Herod was raised to the sovereignty by the Roman Senate, acting under the advice of M. Antony (Ant. xiv. 14, § 5).

The formation of an alliance was attended with various religious rites. A victim was slain and divided into two parts, between which the contracting parties passed, involving imprecations of a similar destruction upon him who should break the terms of the alliance (Gen. xv. 10; cf. Liv. i. 24); hence the expression תְנֵי־בִּלְשָנָּה (= open covenant, fides iure) to make (lit. to cut) a treaty; hence also the use of the term תְנֵי־בִּלְשָנָּה (lit. impression) for a covenant. That this custom was maintained to a late period appears from Jer. xxxiv. 18-20. Generally speaking, the oath alone is mentioned in the contracting of alliances, either between nations (Josh. ix. 13) or individuals (Gen. xxviii. 28, xxx. 53; 1 Sam. xvii. 17; 2 K. x. 4). The event was celebrated by a feast (Gen. L c.; Ex. xivv. 11; 2 Sam. iii. 12. 20). Salt, as symbolic of fidelity, was used on these occasions: it was applied to the sacrifices (Lev. ii. 13), and probably used, as among the Arabs, at hospitable entertainments: hence the expression "covenant of salt" (Num. xviii. 19; 2 Chr. xii. 5). Occasionally a pillar or a heap of stones was set up as a memorial of the alliance (Gen. xxxvi. 53). Their presents were also sent by the party soliciting the alliance (1 K. xv. 18; 1 S. xxx. 6; 1 Mac. xv. 18). The fidelity of the Jews to their engagements was conspicuous at all periods of their history (Josh. ix. 18), and any breach of covenant was visited with conspicuous severe punishment (2 Sam. xxxi. 1; Ez. xivv. 16).
ALMOND definition of "by Kedeha (Naphtali)." Here, now, the A. V., following the Vulgate, renders the words "the plain of Zaanaim." [ELOI.] (See Stanley, p. 340, note.)

2. AL'ON-BA'CHUTH (אַלַון בַּכֹּות) = oak of weeping; and so βαθύς (quercus flutes), the tree under which Rebekah's nurse, Deborah, was buried (Gen. xxxv. 8). Ewald (Gesch. iii. 29) believes the "oak of Tabor" (1 Sam. x. 3, A. V., "plain of T"). to be the same as, or the successor of, this, "Tabor" being possibly a merely dialectical change from "Deborah," and he would further identify it with the "palm-tree of Deborah." (Judg. iv. 5). See also Stanley, pp. 143, 222b.

G.

ALMODAD (אַלַון מַדָּד) [possibly = the progenitor, First]: Eumodad: Esmodad: Alex: ALMODAD: (Alon). A Simonite, ancestor of Zirra, a prince of his tribe in the reign of Hezekiah (1 Chr. iv. 37). W. A. W.

ALMOND (אַלַון, shakel): ἀμύγδαλος, κασμίον, κασμίον, ταρεία: amygdalus, amygglon, in Vict. nut, ineris, carya virginus. This word is found in Gen. xliii. 11; Ex. xxx. 33, 34, xxxvii. 19, 20; Num. xv. 8; Eccles. vii. 5; Jer. i. 11, in the text of the A. V. It is invariably represented by the same Hebrew word (shakel), which sometimes stands for the whole tree, sometimes for the fruit or nut; for instance, in Gen. xliii. 11, Jacob commands his sons to take as a present to Joseph "a little honey, spices and myrrh, nuts and almonds." Here the fruit is clearly meant. In the passages out of the book of Exodus the "bowls made like unto almonds," which were to adorn the golden candlestick, seem to allude to the nut also.4 Aaron's rod, that so miraculously budded, yielded almond nuts. In the two passages from Ecclesiastes and Jeremia, shakel is translated almond tree, which from the context it certainly represents. It is clearly then a mistake to suppose, with some writers, that shakel stands exclusively for "almond-nuts," and that láz signifies the "tree." Rosenmuller conjectures that the latter word designates the wish, the former the cultivated tree. This may be so, but it appears more probable that this tree, conspicuous as it was for its early flowering and useful fruit, was known by these two different names.

ALMOND, always used in Heb. text in reference to the golden candlestick: LXX. ἀμύγδαλον, κασμίον, κασμίον, ταρεία: amygdalus, amygglon, in Vict. nut, ineris, carya virginus.

4. shakel: "aunt amygdalus et amygdalum, arbor et frutus." (Michaels, op. cit., p. 229) understands the almond-shaped bowels to refer to the blossom, i. e. the calyx and the corolla. See Harris, Nat. Hist. of the Bible, art. "Almond," and Dr. Royce in Kîto, art. "Shaked."
The etymology of the Hebrew liz is uncertain; and although the word occurs only in two, xxx. 37, where it is translated bough in the text of the A. V., yet there can be little or no doubt that it is another word for the almond, for in the Arabic this identical word, liz, denotes the almond. [Hazel.] The early appearance of the blossoms on the almond-tree (Amygdalus communis) was no doubt regarded by the Jews of old as a welcome harbinger of spring, reminding them that the winter was passing away— that the flowers would soon appear on the earth—and that the time of the singing of birds and the voice of the turtle would soon be heard in the land (Song of Sol. iv. 11, 12). The word shaked, therefore, or the tree which hastened to put forth its blossoms, was a very beautiful and fitting synonym for the liz, or almond-tree, in the language of a people so fond of imagery and poetry as were the Jews. We have in our own language instances of plants being named from the season of the year when they are flowering—snow for hawthorn; purple flower for amaranth; but lily for daffodil; white cross for white mustard. But perhaps the best and most exact illustration of the Hebrew shaked is to be found in the English word apricot, or apricock, as it was formerly and more correctly called, which is derived from the Latin perocanus, perocina; this tree was so called by the Romans, who considered it a kind of peach which ripened earlier than the common one; hence its name, the perocina tree (comp. 1 Kin. xv. 11; Martial, xiii. 46). Shaked, therefore, was in all probability only another name with the Jews for liz.

Shaked is derived from a root which signifies "to be wakeful," "to hasten," for the almond-tree blossoms very early in the season, the flowers appearing before the leaves. Two species of Amygdalus—A. persica, the peach-tree, and A. communis, the shaked—appear to be common in Palestine. They are both, according to Dr. Kitto (Chrys. Hist. Palest, p. 211), in blossom in every part of Palestine in January. The almond-tree has been noticed in flower as early as the 9th of that month: the 19th, 23rd, and 25th are also recorded dates. The knowledge of this interesting fact will explain that otherwise unaccountable passage in Jeremiah (i. 11, 12), "The word of the Lord came unto me, saying, Jeremiah, what seest thou?" And I said, I see the rod of an almond-tree (shaked). Then said the Lord unto me, Then hast thou seen, O son of man, then I will cause thee to know the significance of the word to perform it."

In that well-known poetical representation of old age in Eccles. xii, it is said, "the almond-tree shall flourish." This expression is generally understood as emblematic of the hoary locks of old age thinly scattered on the bald head, just as the white blossoms appear on the yet leafless boughs of this tree. Gesenius, however, does not allow such an interpretation, for he says, with some truth, that the almond flowers are pink or rose-colored, not white. This passage, therefore, is rendered by him—"the almond is rejected." Though a delicious fruit, yet the old man, having no teeth, would be obliged to refuse it. If, however, the reading of the A. V. is retained, then the allusion to the almond-tree is intended to refer to the hastening of old age in the case of him who remembereth not his Creator in the days of his youth. As the almond-tree ushers in spring, so do the signs mentioned in the context foreshadow the approach of old age and death. It has always been regarded by the Jews with reverence, and even to this day the English Jews on their great feast-days carry a bough of flowering almond to the synagogue, just as in old time they used to present palm-branches in the Temple, to remind them perhaps, as Lady Collott has observed (Script. Heb., p. 10), that in the great famine in the time of Joseph the almond did not fail them, and that, as it failed not to their patriarchs in the days of drought, it cometh to their hand in this day of worse and more bitter privation, as a token that God forgetteth not his people in their distress, nor the children of Israel, though scattered in a foreign land, though their home is the prey of the spoiler, and their temple is become an high place for the heathen.

A modern traveller in Palestine records that, at the passover, the Jews prepare a compound of almonds and apples in the form of a brick, and having the appearance of fine or mortar to remind the people of their hard service in the land of Egypt and house of bondage (Anderson's Wanderings in the Land of Israel, p. 250).

The almond-tree, whose scientific name is Amygdalus communis, belongs to the natural order Rosaceae, and sub-order Amygdalinae. This order is a large and important one, for it contains more than 1000 species, many of which produce excellent fruit. Apricots, peaches, nectarines, plums, cherries, apples, pears, strawberries, &c., &c., are all included under this order. It should be remembered, however, that the seeds, flowers, bark, and leaves, of many plants in the order Rosaceae contain a poisonous principle, called milder, which appears to be a bitter principle. The almond-tree is a native of Asia and North Africa, but it is cultivated in the milder parts of Europe. In England it is grown simply on account of its beautiful vernal flowers, for the fruit scarcely ever comes to maturity. The height of the tree is about 12 or 14 feet; the flowers are pink, and arranged for the most part in pairs; the leaves are long, cuneate, with a serrated margin, and an acute point. The covering of the fruit is downy.

\[\text{to be Hophil future, from } \text{a}, \text{to deride, to despise}; \text{would then be after the Syriac form, instead of } \text{a}.\]

But all the old versions agree with the translation of the A. V., the verb being formed regularly from the root \(\text{a}\). flower.

\[\text{When the grinders cease because they are few (Eccles. xii. 3). For some other curious interpretations of this passage, see that of R. Salomon, quoted by省内's Pagninus in his Thesaurus, sub voce } \text{a} \text{. and Vatablus, Annotation ad Ecclesiastic, xii. 5 (Ort Nov. in 296).}\]
The Almond-tree and Blossom.

Variety of this species. The English *Almond*, Spanish *Almendro*, the Provençal *Anamolada*, the French *Amande*, are all apparently derived from the Greek ἀμπελόνα, Latin *Amigdal*ina. It is curious to observe, in connection with the almond-bowls of the golden candlestick, that pieces of rock-crystal used in adorning branch-candlesticks are still denominated by the lapitharies "Almonds."—W. H.

**ALMS (Child. Νησίς**), beneficence towards the poor, from Anglo-Sax. *alones*, probably, as well as Germ. *alanem*, from ἐλεοσωματική; eleemosyna, Vulg. (but see Bosworth, A. S. Dict.). The word "alms" is not found in our version of the canonical books of O. T., but it occurs repeatedly in N. T., and in the Apocryphal books of Tobit and Ecclesiasticus. The Heb. ינשין, righteouness, the usual equivalent for *alms* in O. T., is rendered by LXX in Deut. xxiv. 15, Dan. iv. 24, and elsewhere, ἐλεοσωματικά, whilst some MSS., with Vulg. and Rhen. Texit., read in Matt. vi. 1. ἀλατοί (This reading is adopted by Griesb., Lachm., Tisch., Treleges, and Alford. — A.)

The duty of almsgiving, especially in kind, consisting chiefly in portions to be left designately from produce of the field, the vineyard, and the olive-yard (Lev. xix. 9, 10, xxvii. 22; Deut. xxv. 11, xxiv. 19, xxvi. 3-10; Ruth ii. 2), is stringly enjoined by the Law. After his entrance into the land of promise, the Israelite was ordered to present yearly the first-fruits of the land before the Lord, in a manner significant of his own previously destitute condition. Every third year also (Deut. xiv. 28) each proprietor was directed to share the tithes of his produce with "the Levite, the stranger, the fatherless, and the widow." The theological estimate of almsgiving among the Jews is indicated by the following passages:—Job xxxi. 17; Prov. x. 2, xi. 4; Esth. ix. 22; Ps. cxiii. 11; Acts ix. 30, the case of Dorcas; x. 2, of Cornelius: to which may be added, Tob. iv. 10, 11, iv. 10, 11; and Eccles. iii. 30, x. 24. And the Talmudists went so far as to interpret *righteousness* by almsgiving in such passages as Gen. xviii. 19; Is. lv. 14; Ps. xvii. 15.

In the women's court of the Temple there were 13 receptacles for voluntary offerings (Mark xii. 41), one of which was devoted to alms for education of poor children of good family. Before the Cap-

**ALOES, LIGN ALOES (Cassia, A. Bahā'ilim, 连理草): *Aloes*; *sperai* (in Num. xxvi. 6), *Στερανί* (Ps. xiv. 8); *Δωδή*, *Aquil* and Abd. *Δωδίς*; *Comp. Δωδίς*; Sym. *ευανθίον* (in Cant. iv. 14): *toberemcula, gutta, abo*; in N. T. *Δωδίς, abo*, the name of some costly and sweet-smelling wood mentioned in Num. xxvi. 6, where Balaam compares the condition of the Israelites to "trees of lign-aloës which the Lord hath planted;" in Ps. xvii. 8, "All thy garments smell of myrrh, and aloes, and cassia;" in Prov. xvii. 17, "I have perfumed my bed with myrrh, aloes, and cinnamon;" and in Cant. iv. 14, Solomon speaks of "cinnamon and aloes, with all the chief spices." The word occurs once in the N. T. (John xix. 39), where mention is made of Nicodemus bringing a "mixture of myrrh and aloes, about an hundred pound weight," for the purpose of anointing the body of our Lord. Writers generally, following Celsius (*Microb. i. 153*), who devotes thirty-five pages to this subject, suppose that the *Aquilaria agallochum* is the tres
n question. The trees which belong to the natural order 
Aquilariaceae, aptly called cistakeous flowering plants, are for the most part natives of tropical Asia. The species *Aq. agallochum*, which supplies the aloes-wood of commerce, is much valued in India on account of its aromatic qualities for fumigations and incense. It was well known to the Arabian physicians, Ibn Sina (Avicenna), in the Latin translation, speaks of this wood under the names of *Apolinaria, Agallochum, Agallochis, or Lignum-Aloes.* In the Arabic original a description is given of it under the names of *Aquilaria, Agallochis, Oud.* (Dr. Reade, *Ueber die Naturgesch. von Bind., p. 171*) mentions three varieties of this wood as being obtained in the bazaars of Northern India.

The *Aquilaria secondaria* of *China* has the character of being the most highly scented. But it is a singular fact that this fragrance does not exist in any of this family of trees when in a healthy and growing condition; it is only when the tree is diseased that it has this aromatic property. On this account the timber is often buried for a short time in the ground, which accelerates the decay, when the *utter* or fragrant oil, is secreted. The best *aloes-wood* is called *culo-baís,* and is the produce of *Aquilaria agallochum,* a native of Bih, in Northern India. This is a magnificent tree, and grows to the height of 120 feet, being 12 feet in girth. The bark of the trunk is smooth and asphaltum, colored; that of the branches gray and lightly striped with brown. The wood is white, and very light and soft. It is totally without smell; and the leaves, bark, and flowers are equally odorless." *(Script. Herb. p. 238).* The *Exoorum agallochum,* with which some writers have confused the *Aq. agallochum,* is an entirely different plant, being a small crooked tree, containing an acid milky poison, in common with the rest of the *Aquilariaceae.* Persons have lost their sight from this juice getting into their eyes, whereas the plant's generic name, *Exoorum.* It is difficult to account for the specific name of this plant, for the agallochum is certainly not the produce of it.

It must be confessed, however, that, notwithstanding all that has been written to prove the identity of the *Aloes-*trees with the *aloe-wood* of commerce, and notwithstanding the apparent connection of the Hebrew word with the Arabic *Aquilaria* and the Greek *Apyallochum,* the opinion is not clear of difficulties. In the first place the passage in Num. xxiv, 6, as the *Ahalim* which Jehovah hath planted, is an argument against the identification with the *Aquilaria agallochum.* The LXX read *σκευαί* (tents); and they are followed by the Vulg., the Syriac, the Arabic, and some other versions. If *alalim* (tents) is not the true rendering — and the context is against it — then if *Aquilaria agallochum* means a tree, we must suppose that *Baham* is speaking of trees concerning which in their growing state he could have known nothing at all. Rosenmüller (*Schol. in T. T. ad Num. xiv. 6*) allows that this tree is not found in Arabia, but thinks that Baham might have become acquainted with it from the merchants. Perhaps the prophet might have seen the wood. But the passage in Numbers manifestly implies that he had seen the *Ahalim* growing, and that in all probability they were some kind of tree sufficiently known to the Israelites to enable them to understand the allusion in its full force. But if the *Ahalim* is the *Aquilaria, agallochum,* then much of the illustration would have been lost to the people who were the subject of the prophecy; for the *Aq. agallochum* is found neither on the banks of the Euphrates, where Baham lived, nor in Moab, where the blessing was enunciated.

Michaelis (*Supp. pp. 34, 35*) believes the LXX. reading to be the correct one, though he sees no difficulty, but rather a beauty, in supposing that Baham was drawing a simile from a tree of foreign growth. He confesses that the parallelism of the verse is more in favor of the tree than the tent; but he objects that the ligia-aloes should be mentioned before the cedars, the parallelism requiring, he thinks, the inverse order. But this is hardly a valid objection; for what tree was held in greater estimation than the cedar? And even if *Ahalim* = *Aq. agallochum,* yet the latter clause of the verse does no violence to the law of parallelism, for of the two trees the cedar = "major ost de auctoriter." Again, the passage in Ps. xlv. 8 would perhaps be more correctly translated thus: "The myrrh, aloes, and cassia, perfuming all thy garments, brought from the ivory palaces of the Minni, shall make thee glad." *The Minni, or Minni*, were inhabi...
itants of spicy Arabia, and carried on a great trade in the exportation of spices and perfumes (Piln. xii. 14, 16; Bochart, Phileg. ii. 22, 135. As the myrrh and cassia are mentioned as coming from the Minni, and were doubtless natural productions of their country, the inference is that obes, being named with them, was also a production of the same country.

The Scriptural use of the Hebrew word applies both to the tree and to its produce; and although some weight must be allowed to the opinion which identifies the Ablinis with the Agathoboea, supported as it is by the authority of so eminent a botanist as the late Dr. Boyle, yet it must be conceded that the matter is by no means proved. Hiller (Hierogl. i. 314) derives the word from a root which signifies "to shine," "to be splendid," and believes the tree to be some species of cedar; probably, he says, the Cedrus magna, or Cedrelate. What the C. magna may be, modern botanical science would be at a loss to conjecture, but it is quite possible that some kind of odoriferous cedar may be the tree denoted by the term Ablinis or Abilinis. W. H.

ALOTH [אלהים]: Balaôth; [Alex. Mela-
or:] Balôth, a place or district, forming with Asher the jurisdiction of the ninth of Solomon's commissariat officers (1 K. iv. 16). It is read by the LXX. and later scholars as Bealôth, though the A. V. treats the ל as a prefix.

In the former case see Beallôt. Josephus has γῆν πεδινάριον, "Aρχή, the being which he name elsewhere gives to Εκθέτη (Achzib) on the coast inAsher.

ALPHA (α), the first letter of the Greek alphabet, as Omega is the last. Its significance is plainly indicated in the context, "I am Alpha and Omega, the beginning and the end." (Rev. xxi. 15, comp. i. 8, 11 [rec. text], xxi. 6), which may be compared with Is. xli. 4, xlv. 6, "I am the first and I am the last, and beside me there is no God." So Prudentius (Cathemer. kyian, i. 11) explains it:

"αλφά et οιογονιατόρ: ἵπη φόνος et clausura Ominium quae sunt, incurram, quaque post futura sunt."

The expression "I am Alpha and Omega" is illustrated by the usage in Rabbinical writers of Alpha and Tau, the first and last letters of the Hebrew alphabet. Schoetgen (Hor. Heb. i. 1080) quotes from Jellul Rabeni, fol. 17, 4, "Adam transgressed the whole law from Σ to Π, that is, from the beginning to the end. It is not necessary to inquire whether in the latter usage the meaning is so full as in the Revelation; but it must be determined by separate considerations. As an illustration merely, the reference is valuable. Both Greeks and Hebrews employed the letters of the alphabet as numerals. In the early times of the Christian Church the letters A and W were combined with the cross or with the monogram of Christ (Maitland, Church in the Catacombs, pp. 169-8). One of the oldest monuments on which this occurs is a marble tablet found in the catacombs at Melos, which belongs, if not to the first century, to the first half of the second. [Chrys.]

W. A. W.

ALPHAUS [αλϕαυς]: [or Alphæus, A. V. 1611, and most eds.]("Αλπάος: αλϕαυς [perh. exchange]), the father of the lesser St. James the Apostle (Matt. x. 3; Mark ii. 18; Luke vi. 13; Acts i. 13). And husband of that Mary (called in Mark xv. 40, mother of James the less and of Jesus) who, with the mother of Jesus and others, was standing by the cross during the crucifixion (John xix. 25). [Mark.] In this latter place he is called Cephas (not, as in the A. V., Cleophas); a variation arising from the double pronunciation of the letter Γ: and found also in the LXX. rendering of Hebrew names. Winer compares Αργαίος from Αλφά, "Ευαθ from Αλϕαυς, φακίακ from Φακία (2 Chr. xxxi. 1), Τασίκ from τασίκ (Gen. xxii. 24), and says that although no reliable example appears in the LXX. of the hardening of Γ at the beginning of a word, yet such are found, as in Καλακία from Καλάκι. Whether the fact of this variety existing gives us a further right to identify Alpheus with the Cephas of Luke xiv. 18, can never be satisfactorily determined. If, as commonly, the ellipsis in Ιωάννας Καλάκιου in Luke vi. 13, Acts i. 13, is to be filled up by inserting Αλϕαυς, then the apostle St. Jude was another son of Alpheus. And in Mark ii. 14, Levi (or Matthew) is also said to have been the son of Alpheus. Nor can any satisfactory reason be given why we should suppose this to have been a different person, as is usually done. For further particulars, see JAMES THE LESS, AND BRETHEN OF JESUS. H. A.

* The Alpheus who was the father of Levi or Matthew (Mark ii. 14), and the Alpheus who was the father of James the Less (Matt. x. 3), in all probability, were different persons. In the lists

* It does so in I K. iv. 16, but not in Josh. xvi. 24.
of the apostles (Matt. x. 3; Mark iii. 18; Luke vi. 15); Acts i. 13), those of them known to be related to each other are usually mentioned in pairs, whereas Matthew (or Levi) and James the younger are never placed thus together. Altars was a common name among the Jews (see Lightfoot on Acts i. 13), and need not be appropriated to one person. Fritzsche, Winer, de Wette, Oldhausen, Meyer, Lange, and most of the leading critics, recognize two men of this name in the Gospels. Bleck remakes (Neppel, Evangelien, 396) that it is only on the supposition that Levi and Matthew were different persons, and that Levi was a disciple only and not an apostle, that he could be the son of the Altar who was the father of the younger James.

ALTAR

ALTARNEUS (Ἀλτάρευς; [Vat. Altarevus;] Alex. Altarreus; Carinus). The same as MATTHEUS (Ex. x. 33), one of the sons of Hashmon (1 Esdr. ix. 33). W. A. W.

ALTAR (ἐλαιόν: ὑστεραθησών, βασίς: altare). (A) The first altar of which we have any account is that built by Noah when he left the ark (Gen. viii. 20). The Targumists indeed assert that Adam built an altar after he was driven out of the garden of Eden, and that on this Cain and Abel offered Noah and Abram, on his sacrifice (Ps Amos-Jonah. Gen. viii. 20, xxii. 5). According to the tradition the First Man was made upon an altar which God himself had prepared for the purpose, and on the site of this altar were rear'd both those of the Patriarchs and that in the Temple of Solomon. This tradition, if it can be rationally explained, at least shows the great importance which the Jews attached to the altar as the central point of their religious worship (Kühir, Symbolik, ii. 503).

In the early times altars were usually built in certain spots hallowed by religious associations, e. g. where God appeared (Gen. xii. 7, xiii. 18, xxvi. 25, xxxv. 1). Generally of course they were erected for the offering of sacrifice; but in some instances they appear to have been only memorial. Such was the altar built by Moses and called Jebus -Neci, on a sign that the Lord would have war with Amalek from generation to generation (Ex. xvii. 15, 16). Such too was the altar which was built by the Reubenites, Gadites, and half-tribe of Manasseh, "in the borders of Jordan," and which was erected "not for burnt-offering nor for sacrifice," but that it might be "a witness" and between them and the rest of the tribes (Josh. xxi. 19-29). Alteras were most probably originally made of earth. The Law of Moses allowed them to be made either of earth or unhewn stones (Ex. xx. 26); any iron tool would have profaned the altar — but this could only refer to the body of the altar and that part on which the victim was laid, as directions were given to make a casing of shittim-wood overlaid with brass for the altar of burnt-offering. (See below).

In later times they were frequently built on high places, especially in idolatrous worship (I Kings. xvii. 1; for the pagan worship on this subject, see Tac. Ann. xiii. 71). The altars so erected were themselves sometimes called "high places" (I Chron. ii. 21; 2 Kings xiv. 3, 4). The Law of Moses all altars were forbidden except those first

ALTAR (ἐλαιόν: ὑστεραθησών, βασίς: altare). (B) The Law of Moses directed that two altars should be made, the one the Altar of burnt-offering (called also the Altar war εἰς τὸν θυσίαν, see Haver- nick in Ex. xiii. 13 ff.) and the other the Altar of incense.

I. The Altar of Burnt-offering (ἐλαιόν: ὑστεραθησών), called in Mal. i. 7, 12, "the table of the Lord," perhaps also in Ex. xiv. 16. This differed in construction at different times. (1) In the Tabernacle (Ex. xxvii. 1 ff., xxxviii. 1 ff.) it was comparatively small and portable. In shape it was square. It was five cubits in length, the same in breadth, and three cubits high. It was made of planks of shittim (or acacia) wood overlaid with brass. (Josiphus says gold instead of brass, Ant. iii. 6, 8.) The interior was hollow (ἰθυόν: ὑστεραθησών, Ex. xxviii. 8). But as nothing is said about a covering to the altar on which the victims might be placed, Jarchi is probably correct in supposing that whenever the tabernacle for a time became stationary, the hollow case of the altar was filled up with earth. In support of this view he refers to Ex. xx. 24, where the command is given, "make me an altar of earth," etc., and observes: "Altar terrae est locum sanctum argus cujus eadem forma terrae impleatur, cum exarata meteatur."

At the four corners were four projections called horns, made, like the altar itself, of shittim-wood overlaid with brass. It is not quite certain how the words in Ex. xxvii. 2, ἐλαιόν: ὑστεραθησών, should be explained. According to Mendesbohm they mean that these horns were of one piece with the altar. So also Knobel (Comm. in loc.). And this is probably right. By others they are understood to describe only the projection of the horns from the altar. These probably projected upwards, and to them the victim was bound when about to be sacrificed (Is. xxviii. 27). On the occasion of the consecration of the priests (Ex. xxix. 12) and the offering of the sin-offering (Lev. iv. 7 ff.) the blood of the victim was sprinkled on the horns of the altar. (See the symbolism explained by Baumann, Comment. zum Pseudois, ii. 63.) Round the altar midway between the top and bottom (or, as others suppose, at the top) ran a projecting ledge (ἐλαιόν: ὑστεραθησών, A. V. "Compass") on which perhaps the priests stood when they officiated. To the outer edge of this, again, a grating or network of brass (ἐλαιόν: ὑστεραθησών) was affixed, and reached to the bottom of the altar, which thus presented the appearance of being larger below than above. Others have supposed this grating to adhere closely to the boards of which

The ἐλαιόν: ὑστεραθησών, he thinks, was merely an ornament by way of finish at the top of this.
the altar was composed, or even to have been substituted for them half-way up from the bottom.

At any rate there can be little doubt that the grating was perpendicular, not horizontal as Jonathan supposes (Targum on Ex. xxvii. 5). According to him it was intended to catch portions of the sacrifice or coals which fell from the altar, and which might thus be easily replaced. But it seems improbable that a net work or grating should have been constructed for such a purpose (cf. Joseph. Ant. iii. 6, § 8). At the four corners of the network were four brazen rings into which were inserted the staves by which the altar was carried. These staves were of the same materials as the altar itself. As the priests were forbidden to ascend the altar by steps (Ex. xx. 26), it has been conjectured that a slope of earth led gradually up to the 

Altar of Burnt Offering, from Surenhusius’s Mishna.

It is said (Surenhusius’s Mishna) that (2 Chr. xx. 18), and Manasseh, after renouncing his idolatry, either repaired (Chethb, לֵזִי) or rebuilt it (Keri, פֶּלַי). It may finally have been broken up and the brass carried to Babylon, but this is not mentioned (Jer. ii. 17 ff.). According to the Rabbinical tradition, this altar stood on the very spot on which man was originally created.

(3.) The Altar of Burnt-offering in the second (Zerubbabel’s) temple. Of this no description is given in the Bible. We are only told (Ex. iii. 2) that it was built before the foundations of the Temple were laid. According to Josephus (Ant. xii. 4, § 1) it was placed on the same spot on which that of Solomon had originally stood. It was constructed, as we may infer from 1 Macc. iv. 47, of unhewn stones (אֲבָהָנִים סְלָם). Antiochus Epiphanes desecrated it (אֵרֵסְמָנִים בֵּיתוֹ סְלָם יָסִירִים אֵנִי רֹאשׁ כַּבְדַיָּבְר). According to Josephus (Ant. xii. 5, § 4) it was removed altogether. In the restoration by Judas Macabeaus a new altar was built of unhewn stone in conformity with the Mosaic Law (1 Macc. iv. 47).

(4.) The altar erected by Herod which is thus described by Josephus (Bell. i. v. 5, § 4): “In front of the Temple stood the altar, 15 cubits in height, and in breadth and length of equal dimensions, viz. 50 cubits; it was built foursquare, with horn-like corners projecting from it: and on the south side a gentle inclivity led up to it. Moreover it was made without any iron tool, neither did iron ever touch it at any time.” It was also a correspondence to the Moslem dimension of the Mishra (3, 1) that the altar was at the base 32 cubits square; at the height of a cubit from the ground 30 cubits square; at 5 cubits higher (where was the circuit, אֲבָהָנִים) it was reduced to 29 cubits square, and at the
horns still further to 26. A square of a cubit each way was here allowed for the officiating priests to walk, so that 24 cubits square were left for the fire on the altar (αἵρεσις).

This description is not very clear. But the Rabbinical and other interpreters consider the altar from the unhewn upwards to have been 28 cubits square, allowing at the top, however, a cubit each way for the horns and another cubit for the passage of the priests. Others, however (as L. Emperor in loc.), suppose the ledge on which the priests walked to have been 2 cubits lower than the surface of the altar on which the fire was placed.

The Mishna further states, in accordance with Josephus (see above), and with reference to the law already mentioned (Ex. xx. 25), that the stones of which the altar was made were unhewn: and that twice in the year, viz. at the Feast of the Passover and the Feast of Tabernacles they were whitewashed anew. The way up (αἵρεσις) was on the south side, 32 cubits long and 16 broad, constructed also of unhewn stones. In connection with the horn on the south-west corner was a niche intended to receive the blood of the victims which was sprinkled on the left side of the altar: the blood was afterwards carried by means of a subterranean passage into the brook Kidron. Under the altar was a cavity into which the drink-offerings passed. It was covered over with a slab of marble, and emptied from time to time. On the north side of the altar were a number of bronze rings, to secure the animals which were brought for sacrifice. Lastly, round the middle of the altar ran a scarlet thread (ἐλεον) to mark where the blood was to be sprinkled, whether above or below it.

According to Lev. vi. 12, 13, a perpetual fire was to be kept burning on the altar. This, as Bähr (Symbolen, II. 350) remarks, was the symbol of and token of the perpetual worship of Jehovah. For inasmuch as the whole religion of Israel was concentrated in the sacrifices which were offered, the extinguishing of the fire would have looked like the extinguishing of the religion itself. It was therefore, as he observes, essentially different from the perpetual fire of the Persians (Curt. iii. 3; Amm. Marc. xxiii. 6; Hyde, Pash. Vit. Pers., viii. 148.), or the fire of Vesta to which it has been compared. These were not sacrificial fires at all, but were symbols of the Deity, or were connected with the belief which regarded fire as one of the primal elements of the world. This fire, according to the Jews, was the same as that which came down from heaven in κατὰ τύχην (Ex. xxxi. 18) and consumed upon the altar the burnt-offering and the tithe (Lev. xi. 21). It continued upon the altar, they say, like a lion; it was bright as the sun; the flame thereof was solid and pure: it consumed things wet and dry alike: and finally, it emitted no smoke. This was one of the five things existing in the first temple which tradition declares to have been wanting in the second (Iren. Hom. c. i. sub fin. fol. 21, rd. b.). The fire which consumed the sacrifices was kindled from this; and besides these there was the fire from which the coals were taken to burn incense with (as Cuppone, Appar. Hist. Crit. Annot. p. 286.).

H. The Altar of Incense (ἐλεον)

This altar stood in the Holy Place, "before the vail that is by the ark of the testimony" (Ex. xxxii. 6, xii. 5). Philo too speaks of it as "before the vail."
The Altar in Solomon's Temple was similar (1 K. vii. 48; 1 Chr. xxviii. 18), but was made of cedar overlaid with gold. The altar mentioned in Is. vi. 6, is clearly the Altar of Incense, not the Altar of Burnt-offering. From this passage it would seem that heated stones (πέπηρα) were laid upon the altar, by means of which the Incense was kindled. Although it is the heavenly altar which is there described, we may presume that the earthly corresponded to it.

(c.) The Altar of Incense is mentioned as having been removed from the Temple of Zerubbabel by Antiochus Epiphanes (1 Mac. i. 21). Jude Macæus restored it, together with the holy vessels, &c. (1 Mac. iv. 49). On the arch of Titus no Altar of Incense appears. But that it existed in the last Temple, and was richly overlaid, we learn from the Mishna (Chogign., iii. 8). From the circumstance that the sweet incense was burnt upon it every day, morning and evening (Ex. xxx. 7, 8), as well as that the blood of atonement was sprinkled upon it (v. 10), this altar had a special importance attached to it. It is the only altar which appears in the Heavenly Temple (Is. vi. 6; Rev. viii. 3, 4).

(c.) Other Altars. (1.) Altars of brick. There seems to be an allusion to such in Is. lxv. 3. The words are: ὡς ὁ στίχωμα τῆς ζύμης, "offering in-
...11. and...
occupation by the descendents of Joktan. This account of their origin harmonizes with Gen. xiv. 7, while the introductory "generations" ("genealogical" to the reading adopted by the LXX.) of the Amalekites is mentioned several generations before the birth of the Edomite Amalek: it throws light on the traces of a permanent occupation of central Palestine in their passage westward, as indicated by the names Amalek and Mount of the Amalekites (Judg. v. 14, xii. 15); and it accounts for the silence of Scripture as to any relationship between the Amalekites on the one hand, and the Edomites or the Israelites on the other. That a mixture of the two former races occurred at a later period, would in this case be the only inference from Gen. xxxvi. 16, though many writers have considered that passage to refer to the origin of the whole nation, explaining Gen. xiv. 7 as a case of ἕνωπη. The physical character of the district which the Amalekites occupied (Amahia), necessitated a nomadic life, which they adopted to its fullest extent, taking their families with them, even on their military expeditions (Judg. vi. 5). Their wealth consisted in flocks and herds. Mention is made of a "town" (1 Sam. xv. 5), and Josephus gives an exaggerated account of the capture of several towns by Saul (Ant. vi. 7, § 2); but the towns could have been little more than stations or nomadic enclosures. The kings or chieftains were perhaps distinguished by the hereditary title Agag (Num. xxxiv. 7; 1 Sam. xv. 8). Two important routes led through the Amalekite district, namely, from Palestine to Egypt by the Ishmaus of Suez, and to southern Asia and Africa by the Elanitic arm of the Red Sea. It has been conjectured that the expedition of the four kings (Gen. xiv.) had for its object the opening of the latter route; and it is in connection with the former that the Amalekites first came in contact with the Israelites, whose progress they attempted to stop, adopting a guerilla style of warfare (Deut. xxv. 18), but were signalily defeated at Rephidim (Ex. xvii.). In union with the Ca'naanites they again attacked the Israelites on the borders of Palestine, and defeated them near Hormah (Num. xiv. 45). Thereafter we hear of them only as a secondary power, at one time in league with the Moabites (Judg. iii. 13), when they were defeated by Ehud near Jericho; at another time in league with the Midianites (Judg. vi. 3) when they penetrated into the plain of Esdraelon, and were defeated by Gideon. Saul undertook an expedition against them, overrunning their whole district - from Havilah to Shur, and inflicting an immense loss upon them (1 Sam. xv.). Their immense power was then for ever broken, and they degenerated into a band of banditti, whose style of warfare is well expressed in the Hebrew term מַעְטַה (Gesen. Lec.) frequently applied to them in the description of their contests with David in the neighborhood of Ziklag, when their destruction was completed (1 Sam. xxxviii, xxx.; comp. Num. xxxiv. 20).

W. L. B.

A'MAM (אָמָם [gathering-place]; שָׁב [Ahd. Comp. 'Adav] 'Amam), a city in the south of Judah, named with Shema and Moladah (el-Milh) in Josh. xv. 26 only. In the Alex. LXX. the name is joined to the preceding - אָמוֹרָם. Nothing is known of it.

A'MAN (אָמָן; [in Tobit, Vat. Asa]; Sin. נאָמָן; Ammon, Hanaman) (Tob. xiv. 10; Esth. x. 7, xii. 6, xiii. 3, 12. xv. 17, xvi. 10, 17).

AMANA (אַמָּנָא; [permanent], apparently a mountain in or near Lebanon, = 'from the head of Amana' (Cant. iv. 8). It is commonly assumed that this is the mountain in which the river Abana (2 K. v. 12; Keri. Targum Jonathan, and margin of A. V. = 'Amana') has its source, but in the absence of further research in the Lebanon this is mere assumption. The LXX. translate ἀμάνα πιστῶς.

G.

* If Amana and Abana be the same (Amana), and consequently the name of a river, the mountain so called, as the etymology shows (see above), must have taken its name from the stream; and further, if this river be the Besorah, which has its sources in a part of Anti-Lebanon near Hermon, that part of Anti-Lebanon near Hermon must be the part that was anciently called Amana. See Bibl. Sacra, vi. 371; and Hauber, für Syria, ii. 558. There is no proof that Amana still exists as the name of any part of this range. If, as above suggested, the name of the mountain was derived from the river, and not the reverse, it is less surprising that the name of the region should have been, as in the lapse of time, perhaps, the river-name, gave place to Beraida.

H.

AMARI'AH (עֲרַיָּה and עֲרַיָּים: 'Arapia and [Alex.] 'Arapias: Amarians: whom God promised), Num. (Gen. i. q. Αμαλη'καιος). Father of Ahitub, according to 1 Chr. vi. 32, and son of Meribaal, in the line of the high-priests. In Josephus's Hist. (Ant. viii. 1, § 3) he is transformed into 'Αφαρίαος.

2. The high-priest in the reign of Jehoshaphat (2 Chr. xix. 11). He was the son of Azariah, and the fifth high-priest who succeeded Zadok (1 Chr. vi. 11). Nothing is known of him beyond his name, but from the way in which Jehoshaphat mentions him he seems to have succeeded that pious king in his endeavors to work a reformation in Israel and Judah (see 2 Chr. xvii. xix.). Josephus, who calls him ἀμαρίαν τὸν ἵππον "Amariah the priest," unconsciously says of him that he was of the tribe of Judah, as well as of Zadokiah, as the text now stands. But if ἀκτιοὺς is struck out of this absurd statement will disappear (Ant. ii. 1, § 1). It is not easy to recognize him in the wonderfully learned list of his successors given in the Ant. x. 8, § 6. But he seems to be concealed under the strange form ΑΞΙΟΡΑΜΟΣ, Axioramus. The syllable ΑΞ is corrupted from ΑΖ, the termination of the preceding name, Azarias, which has accidentally adhered to the beginning of Amari'ah, as the final Σ has to the very same name in the text of Nicephorus (op. Seld. de Success. p. 193), producing the form Αξιορίας. The remaining Ζαρίας is not far removed from 'Arapia. The successor of Amari'ah in the high-priesthood must have been Jehohanan. In Josephus Ζαρίας, which is a corruption of ᾿Ιαρίας, follows Axioramus. There is not the slightest support in the sacred history for the names Abi'zib and Zobah, who are made to follow Amari'ah in the genealogy, 1 Chr. xvi. 11, 12.

3. [In 1 Chr. xxiii. 23, Rom. Abl. 'Amaria; 4. [Arapia; v.a. in 2 Chr. Vat. Alex. Αμαρίας]

[H. * Dr. Robinson's remark (II. 447) is understood to be an inference from Cant. iv. 8.

G. 4]
Ammonias; [Vat. Manuscr.], Alex. Manuscr.: Amo
nias). Son of Zichri, and captain of 200,000 war
riors of Judah, in the reign of Jehoshaphat (2 Chr.
vi. 16). W. A. W.

AMATH [Hamat.] AMATHIES [3 syl.] (Ammathias; [Vat. Emath
thias; Abd. Alex. Emathias; Wechsel A'mathis; E'mathis)], 1 Esdr. ix. 29. [Athlaih.

AMATHIAS [in some copies AMATHIAS], "THE LAND OF" (After Amathías, a district to the north of Palestine, in which Jonathan Maccab
eans met the forces of Demetrius (1 Macc. xii. 23). From this context it can be evidently HAMATH.

AMAZIAH (אמסיה, or מתיה, strength of Jehovah: 'Amoseias; [Vat. -st], 'Amoseias; Ammiasis), son of Joash, and eighth king of Judah, succeeded to the throne at the age of 25, on the murder of his father, and punished the murderers; sparing, however, their children, in accordance with Deut. xxiv. 16, as the 2d look of Kings (xiv. 6). expressely informs us, thereby implying that the pre
cept had not been generally observed. In order to restore his kingdom to the greatness of Jehoshaphat's days, he made war on the Edomites, defeated them in the valley of Salt, south of the Dead Sea (a scene of a great victory in David's time, 2 Sam. xvi. 11; 1 Chr. xxvii. 12; 2 S. k. title), and took their capital, Selah or Petra, to which he gave the name of Jokteel, i.e. perium Bel (Genesis in verse), which was also borne by one of his own Jewish cities (Jos. xvii. 38). We read in 2 Chr. xxvi. 12-14, that the victorious Jehos. threw 10,000 Edomites from the cliffs, and that Amaziah per
formed religious ceremonies in honor of the gods of the country; an exception to the general characte
r of his reign (of 2 K. xiv. 3, with 2 Chr. xxvi. 2). In consequence of this he was overthrown by misfortune. Having already offended the Hebrews of the northern kingdom by sending back, in obedience to a prophet's direction, some mercenary troops whom he had hired from it, he had the fool
ish arrogance to challenge Josiah king of Israel to bat
tle, despising probably a sovereign whose strength had been exhausted by Syrian wars, and who had not yet made himself respected by the great successes reserved in 2 K. xiv. 25. But Judah was completely defeated, and Amaziah himself was taken prisoner, and conveyed by Josiah to Jerusalem, which, according to Josephus (Ant. ix. 9, 3), opened its gates to the conqueror under a threat that otherwise he would put Amaziah to death.

We do not know the historian's authority for this statement, but it explains the fact that the city was taken apparently without resistance (2 K. xiv. 19). A portion of the wall of Jerusalem on the side towards the Israelitish frontier was broken down, and treasures and hoardages were carried off to Samaria. Amaziah lived 15 years after the
death of Josiah; and in the 29th year of his reign he was murdered by conspirators at Lachish, whether he had retired for safety to Jerusalem.

The chronicle seems to regard this as a punishment for his idolatry in Edom, though his language is not very clear on the point (2 Chr. xxv. 27); and doubtless it is very probable that the conspiracy was a consequence of the low state to which Judah must have been reduced in the latter part of his reign, after the Edomitic war and humiliation inflicted by the Edom of king of Israel. His reign lasted from n.

AMASIAH (אמוניה, or מתיה, strength of Jehovah: 'Amoseias; [Vat.
manuscr.], Alex. Manuscr.: Ammiasis). Son of Jehoarnab, and commander of 200,000 war
riors of Judah, in the reign of Jehoshaphat (2 Chr. vii. 16). W. A. W.
AMBASSADOR.

AMBER

2 [A`uarias.]. Priest of the golden calf at Bethel, who endeavored to drive the prophet Amos from Israel into Judah, and complained of him to king Ahaziah (2 K. iii. 10-16).

3. [A`uasia. Vat. -etia.]. A descendant of Simeon (1 Chr. iv. 34).

G. E. L. C.

AMBASSADOR.

Sometimes άμπ and sometimes άμπ is thus rendered, and the occurrence of both terms in the parallel clauses of Prov. xiii. 17 seems to show that they approximate to synonyms. The office, like its designation, was not definite nor permanent, but προ νυ ta merely. The precept given Deut. xx. 10, seems to imply such a usage: rather, however, that of a mere function, often bearing a letter (2 K. v. 5, xix. 14) than of a legate empowered to treat. The inviolability of such an officer’s person may perhaps be inferred from the only recorded intimation of it being followed with unusual severity towards the vain efforts of Antiochus the Great to extinguish, of that of Iznik in a more manageable form of that offense (2 Sam. x. 2-5; cf. xii. 26-31).

The earliest examples of ambassadors employed occur in the cases of Eben, Moab, and the Amorites (Num. xx. 14, xxi. 21; Judg. xi. 17-19), afterwards in that of the fraudulent Gilgamesh (J osh. ix. 4, &c.), and in the instances of civil strife mentioned Judg. xi. 12, and xx. 12. (See Comment. de Rep. Hebr. ii. 29, with notes by J. Nicolaus. Lpz. iii. 771-4.) They are mentioned more frequently during and after the contact of the great adjacent monarchies of Syria, Babylonia, &c., with those of Judah and Israel, e.g. in the invasion of Nebuchadrezzar. They were usually men of high rank; as in that case the chief captain, the chief eunuch, and chief of the eunuchs were deputed, and were met by delegates of similar dignity from Hezekiah (2 K. xvii. 17, 18; see also Is. xxx. 4). Ambassadors are found to have been employed, not only on occasions of hostile challenge or insolent menace (2 K. xiv. 8; 1 K. xx. 2, 6), but of friendly compliment, of request for alliance or other aid, of submissive deprecation, and of curious inquiry (2 K. xiv. 8, xvi. 7, xviii. 14; 2 Chr. xxxiii. 31). The dispatch of ambassadors with urgent haste is introduced as a token of national grandeur in the obscure prophecy Is. xviii. 2. II.

AMBER (άμπηρ, chashnath; άμπηρ, chashoneth : σάκχαρον: electron) occurs only in Ez. i. 4, 27, viii. 2. In the first passage the prophet compares it with the brightness in which he beheld the heavenly apparition who gave him the divine commands. In the second, “the glory of the Lord’s appearance was more manifest—‘from the appearance of his loins even downward, fire; and from his loins even upward as the appearance of brightness, as the color of amber.’” It is by no means a matter of certainty, notwithstanding Bochart’s dissertation and the conclusion he comes to (Hieroz. iii. 876, ed. Rosenmüll.), that the Hebrew word chashnath denotes a metal, and not the fossil resin called amber, although perhaps the probabilities are more in favor of the metal. Dr. Harris (Nat. Hist. Bib. art. “Amber”) asserts that the translators of the A. V. could not mean amber, “for that being a bituminous substance, becomes dim as soon as it feels the fire, and soon dissolves and consumes.” But this is founded on a misconstruction of the words of the prophet, who does not say that what he saw was amber, but of the color of amber (Pict. Bib. note on Ez. viii. 2). The context refers to the appearance as clearly as much in favor of amber as of metal. Neither do the LXX. and Vulg. afford any certain clue to identification, for the word electron was used by the Greeks to express both amber and a certain metal, composed of gold and silver, and held in very high estimation by the ancients (Ytihn. H. N. xxxiii. 4.). It is a curious fact, that in the context of all the passages where mention of electron is made it is in the works of Greek authors (Hom. see below; Hes. Sc. Herc. 142; Soph. Antig. 1038; Aristoph. Eq. 532; &c.), no evidence is afforded to help us to determine what the electron was. In the Odyssey (iv. 73) it is mentioned as enriching Menelaus’ palace, together with copper, gold, silver, and ivory. In Od. iv. 460, xviii. 216, a necklace of gold is said to be fitted with electron. Pliny, in the chapter quoted above, understands the electron in Menelaus’ palace to be the metal. But with respect to the golden necklace, it is worthy of note that amber necklaces have been long used, as they were deemed an amulet against throat diseases.

Beads of amber are frequently found in British barrows with entire necklaces (Vosbr. Antig. i. 239), Theophrastus (ix. 18, § 2; and Fr. ii. 29, ed. Schneider), it is certain, uses the term electron to denote amber; for he speaks of its attracting properties. On the other hand, to assert that electron was understood by the Greeks to denote a metal composed of one part of silver to every four of gold, we have the testimony of Pliny to show; but whether the early Greeks intended the metal or the amber, or sometimes one and sometimes the other, it is impossible to determine with certainty. Passow believes that the metal was always denoted by electron in the writings of Homer and Hesiod, and that amber was not known till its introduction by the Phenicians; to which circumstance, as he thinks, Herodotus (iii. 115, who seems to speak of the resin, and not the metal) refers. Others again, with Böttgermann (Mythol. ii. 337), maintain that the electron denoted amber, and they very reasonably refer to the ancient myth of the origin of amber. Pliny (H. N. xxxvii. cap. 2) ridicules the Greek writers for their credulity in the fabulous origin of this substance, and especially finds fault with Sophocles, who, in some lost play, appears to have believed in it.

From these considerations it will be seen that it is not possible to identify the chashnath by the help of the L.XX., or to say whether we are to understand the metal or the fossil resin by the word. There is, however, one reason to be adduced in favor of the chashnath denoting the metal rather than the resin, and this is to be sought in the etymology of the Hebrew name, which, according to Gesenius, seems to be compounded of two words which together = polished copper. Bochart (Hieroz. iii. 885) conjectures that chashnath is compounded of two Chaldee words meaning copper — gold-leaf, to which he refers the aurichalcum. But aurichalcum is in all probability only the Latin form of the Greek orichalchom (mountain copper). (See Smirke, Rev. Eng. Bible Dictionary v. 282.) Aurichalcum, however (Oriq. xvi. 19), is a contraction from the etymology which Bochart adopts. But the electron, according to Pliny, Paninius (v. 12, § 6), and the numerous authorities quoted by Bochart, was composed of gold and silver, not of gold and copper—
The Hebrew word may denote either the metal *electrum or amber*; but it must still be left as a question which of the two substances is really intended.  

W. H.

*AMETHATHA*, Esth. iii. 1, A. V. ed. 1611, for HAMMEATHA.

A.

**A.MEN** (αμέν), literally, "firm, true," and used as a substantive, "that which is true," "truth" (Is. lv. 16): a word used in strong asseverations, fixing it as the stamp of truth upon the assertion which it accompanied, and making it binding as an oath (comp. Num. v. 22). In Is. xxii. 15; Jer. xvi. 30, Neh. vi. 13, xvi. 6, the word appears in the form ἀμὴν, which is used throughout the N. T. In other passages the Heb. is rendered by *vé moment*, except in Is. lv. 16. The Vulgate adopts the Hebrew word in all cases except in the Psalms, where it is translated *sìd*.

In Deut. xxviii. 15-26, the people were to say "Amen," as the Levites pronounced each of the curses upon Mount Ebal, signifying by this their assent to the conditions under which the curses would be inflicted. In accordance with this usage we find that, among the Rabbins, "Amen" involves the ideas of swearing, acceptance, and truthfulness. The first two are illustrated by the passages already quoted: the last by 1 K. i. 36; John iii. 3, 5, 11 (A. V. "verily"), in which the assertions are made with the solemnity of an oath, and then strengthened by the repetition of "Amen." "Amen" was the proper response of the person to whom an oath was administered (Neh. v. 14; vii. 6: 1 Chr. xvi. 36; Jer. vi. 5; 2 Cor. i. 20); and the Levitical, to whom appeal was made on such occasions, is called "the God of Amen" (Is. lxv. 16), as being a witness to the sincerity of the implied compact. With a similar significance Christ is called "the Amen, the faithful and true witness" (Rev. iii. 14; comp. John i. 14, xiv. 6; 2 Cor. i. 20). It is matter of tradition that in the Temple the "Amen" was not uttered by the people, but that, instead, at the conclusion of the priest's prayers, they responded, "Blessed be the name of the glory of his kingdom for ever and ever." Of this a trace is supposed to remain in the concluding sentence of the Lord's Prayer (comp. Rom. xi. 36). But in the synagogues and private houses it was customary for the people or members of the family who were present to say "Amen" to the prayers which were offered by the minister of the house, and the custom remained in the early Christian church (Matt. vi. 13; 1 Cor. xiv. 16). And not only public prayers, but those offered in private, and doxologies, were appropriately concluded with "Amen" (Rom. ix. 5, xi. 36, xvi. 26; 2 Cor. xiii. 14 (15), etc.)

W. A. W.

* The phrase of the received text at the end of most of the books of the N. T. is probably genuine only in Rom., Gal., Heb. (?), 2 Pet. (?), and Jude.

**AMETHYST** (αμέθυστος, achlaméthos: amethystos: amethystus). Mention is made of this precious stone, which formed the third in the third row of the high-priest's breastplate, in Ex. xxviii. 19, xxxix. 12, "And the third row a figure, an agate, and an amethyst." It occurs also in the N. T. (Rev. xii. 20) as the twentieth stone which garnished the foundations of the wall of the heavenly Jerusalem. Commentators generally are agreed that the amethyst is the stone indicated by the

Hebrew word, an opinion which is abundantly supported by the ancient versions. The Targum of Jerusalem indeed reads σμαραγδος (smaragdus); those of Jonathan and Onkelos have two words which signify "call-eyed" (ουδες ετριη), which Brunnus (de Vit. Sacerd. Heb. ii. 711) conjectures to be identical with the Pal. *Amethath* and the Assyrians (1Sm. ii. N. X. xxxvii. 10), the Cat.'s *eye* (Cholebank, according to Assafon and Befontsines; but as Brunnus has observed, the word ακριμαθων according to the best and most ancient authorities signifies αμηθυστος.

Modern mineralogists by the term amethyst usually understand the amethystine variety of quartz, which is crystalline and highly transparent: it is sometimes called Rose quartz, and contains alumina and oxide of manganese. There is, however, another mineral to which the name of Oriental amethyst is usually applied, and which is far more valuable than the quartz kind. This is a crystalline variety of Cymailin, being found more especially in the E. and W. Indies. It is extremely hard and bright, and generally of a purple color, which, however, it may readily be made to lose by subjecting it to fire. In all probability the common Amethystine quartz is the mineral denoted by ακριμαθων; for Pliny speaks of the amethyst being easily cut (σκυπτεριζειν, H. N. xxxvii. 9), whereas the Oriental amethyst is inferior only to the diamond in hardness, and is moreover a comparatively rare gem. The Greek word amethystos, the origin of the English amethyst, is usually derived from Αμηθυστος, or "not, and μορφας, "to be intoxicated," this stone having been believed to have the power of dispelling drunkenness in those who wore it. (Dionys. Perig. 1122: Antol. Pelas. 9, 762; Martini, Excurs. 158.) Pliny, however (H. N. xxxvii. 9), says, "The name which these stones have is to be traced to their peculiar tint, which, after approximating to the color of wine shades off into a violet." Theophrastus also alludes to its wine-like color."

W. H.

A'MI (אַמִי [architect, Fürst]: "Haecit: Ami"), name of one of Solomon's servants (Exr. ii. 57), called Amon (עמון) (Hebr. Vat. Alex. F. H. Hm: Comp. *Amon*): in Neh. vii. 59 Ami is probably a corrupted form of Amon.

AMIN'ADAB (אֲמִינָדָב: Aminadab). AMINADAB 1 (Matt. i. 4; Luke iii. 33).

A. W. W.

AMITTAI (אַמִיתָי [true, faithful]): *Amasthi* (Vat. Sin. -d̄t̄f̄; *Amathai*), father of the prophet Joel (2 K. xv. 25; Jon. i. 1).

* AMI'ZABAD, 1 Chr. xxviii. 6. So the A. V. ed. 1611, etc., following the Vulgate, the Genevan version, and the Bishop's Bible, for the correct form AMMIZABAD.

A.

**AMMAH**, the hill of (אַמֶמה [mother, cubs]: but here, according to Furst, aqueducis, after an Armenian and Talmudic ms.): διοβολος *Amai* [Alex. Comp. Am'it: Akh. "Amatho" coll. *Ama* *amata*: a hill "facing" Giah by the way of the wilderness of Gileon, named as the point to which Joshua's pursuit of Abner after the death of Asriel extended (2 Sam. ii. 24). Josephus (Ant. vii. i. § 3) "φυτον τις, δι' Άμιαθανολα καλους" (comp

a το τοις άμαθανοις αντικειμενο τη γη

(Πτ. ii. 31; ed. Schadab.)
Targ. Jon. (םולש). Both Symmachus (אדר), and Theodotion (אדר), agree with the Vulgate in an allusion to some source here. Can this point to the "excavated fountain," as under the high rock," as described near Gibeon (Ex. 17:7)?

G.

*AMMEDATHA.* Esth. iii. 10, A. V. ed. 1611, for Hammedatha. A.

AMMI (אמי) (יָדְדַד). The name is of频属 woes), i.e., as explained in the margin of the A. V., "my people"; a figurative name applied to the kingdom of Israel in token of God's reconciliation with them, and their position as "sons of the living God," in contrast with the equally significant name Lo-am-mi, given by the prophet Hosea to his second son by Gomer, the daughter of Diblahim (Hos. ii. 1). In the same manner Rahamah contrasts with Lo-ruhamah.

W. A. W.

AMMIDOI, in some copies [e. g. ed. 1611] Ammidoi (אָמִידַד or אָמִידַה), named in 1 Esdr. v. 29, among those who came up from Babylonia with Zorobabel. The three names, Pira, Chadias, and A., are inserted between Beeroth and Ramah, without any corresponding words in the parallel lists of Ezra or Nehemiah.

* Fritzche (in loc.) identifies אָמִידַה with the inhabitants of Hunatha, Josh. xv. 54. There appears to be no authority for the form אָמְדוּי.

A.

AMMIHEL (אמי-הל). The father of Eleazar, chief of the tribe of Dan (Num. xxii. 12).

2. Alex. אָמְדָה, Vulg. Ammihel in 2 Sam. xviii. 27; [Vat. in 2 Sam. ix., Ammeh, Ammiel].

The father of Machir of Loefbar (2 Sam. ix. 4, 5, xvii. 27).

3. The father of Bathshua, or Bathsheba, the wife of David (1 Chr. iii. 5), called Eliahim in 2 Sam. xi. 3; the Hebrew letters, which are the same in the two names, being transposed. He was the son of Ahithophel, David's prime minister.

4. [Vat. אמיֶלָה]. The sixth son of Obed-edom (1 Chr. xxvi. 5), and one of the doorkeepers of the Temple.

A. W. W.

AMMihuD (אָמִיהוּד [people of Judah]): 'Euoio in Num., 'Amiñod [Vat. אמיו''ד] in 1 Chr. [Amiñod]. 1. An Ephraimite, father of Elishama, the chief of the tribe at the time of the Exodus (Num. i. 10, ii. 18, vii. 48, 54, x. 22), and through him ancestor of Joshua (1 Chr. vii. 26).

2. [Euoio] Alex. AmmiuH. A Simeonite, father of Shemuel, chief of the tribe at the time of the division of Canaan (Num. xxiv. 20).

3. [Euoio] Alex.aven. The father of Pedahel, chief of the tribe of Naphtali at the same time (Num. xxiv. 28).

4. [Euoio, Keri 헬לקוי] 'Euoio. Ammiuhd, or "Ammichur," as the written text has it, was the father of Tahmi, king of Geshur (2 Sam. xiii. 37).

A. W. W.

AMMINDAB (אָמִינָדָב). 'Ammindab [Vat. יָדְדַב]: Ammindab; one of the people, i.e. family, of the prince [familia principis], Geeses.
AMMIZABAD (אַמִּיְזָבָּד) [people of the Giver, i. e. God: Rom. Alt.] Zabādā; [Vat. Αμιζίβαδ: Alex. Αμιζζαδ: Comp. Αμιζζαδα: Amizbad]. The son of Remiahi, who apparently acted as his father's lieutenant, and commanded the third division of David's army, which was on duty for the third month (1 Chr. xxvii. 6). [Amizbad.] W. A. W.

AMMON, AMMONITES, CHILDREN OF AMMON a גֵּרֶּר (only twice), sons of Ammôn. Ammônites (N. B. 10, 2 Chr. xxvii. 3; 31; Acts vii. 45); Ammôns, Ammônites. [Vulg.] Amōn, Amōnīa, LXX. in Pent. elsewhere Amōn, Amōn; Joseph. Αμμονίαν: Ammon (Ammōniter), a people descended from Ben-Ammon, the son of Lot by his younger daughter (Gen. xix. 38; comp. Ps. lxxiii. 7, 8), as Moab was by the elder; and dating from the destruction of Sodom. The near relation between the two peoples indicated in the story of their origin continued throughout their existence: from their early connexion (Deut. ii. 4) to their disappearance from the biblical history (Judg. v. 2), the brother-tribes are named together (comp. Judg. x. 10; 2 Chr. xx. 1; Zeph. ii. 8, &c.). Indeed, so close was their union, and so near their identity, that each would appear to be occasionally spoken of under the name of the other. Thus "the land of the children of Ammon" is said to have been given to the "children of Lot," i. e., to both Ammon and Moab (Deut. ii. 3). They are both said to have hired Balam to curse Israel (Deut. xxiii. 4), whereas the detailed narrative of that event omits all mention of Ammon (Num. xxvii. xxixii.). In the answer of Jephthah to the king of Ammon the allusions are continually to Moab (Judg. xi. 15, 18, 25), while the meshes, the peculiar deity of Moab (Num. xxx. 29), is called "thy god" (24). The land from Ammon to Jabesh, which the king of Ammon calls "my land" (13), is elsewhere distinctly stated to have once belonged to a "king of Moab" (Num. xxvi. 26).

Unlike Moab the precise position of the territory of the Ammonites is not ascertainable. In the earliest mention of them (Deut. ii. 20) they are said to have destroyed those Edom, whom they called the Zemanim, and to have dwelt in their place, Jabesh being their border (Num. xxvi. 21; Deut. iii. 15, 37). "Land" or "country" is, however, but rarely ascribed to them, nor is there any reference to those habits and circumstances of civilization — the "plentiful fields," the "hay," the "summer fruits," the "wineyards," the "presses," and the "songs of the grape-treader" — which so constantly recur in the allusions to Moab (Is. xv., xxvi.; Jer. viii.; but on the contrary we find everywhere traces of the fierce habits of marauders in their incursions — thrusting out the right eyes of whole cities (1 Sam. xi. 2), ripping up the women with child (Am. i. 13), and displaying a very high degree of cruelty (Jer. vii. 6; Jud. vii. 11, 12) to their enemies, as well as a suspicious courtesy to their allies, which on one occasion (2 Sam. x. 1—5) brought all but extermination on the tribe (xxii. 31). Nor is the contrast less observable between the one city of Ammon, the fortified hold of Jabesh (2 Sam. xi. 1; Ez. xxv. 5; Am. i. 10), and the "streets," the "house-tops," and the "eminent places," the numerous and busy towns of the rich plains of Moab (Jer. xli. 8 xxv. 36). Taking the above into account it is hard to avoid the conclusion that, while Moab was the settled and civilized half of the nation of Lot, the Bene-Ammon formed its predatory and Bedouin section. A remarkable confirmation of this opinion occurs in the fact that the special deity of the tribe was worshipped, not in a house or on a high place, but in a booth or tent designated by the very word which most readily expressed to the Israelites the contrast between a nomadic and a settled life (Am. vi. 26; Acts vii. 43) [Suet. Cotz.]. (See Stanley, App. § 69.)

On the west of Jordan they never obtained a footing. Among the confusions of the times of the Judges we find them twice passing over: once with Moab and Amalek seizing Jericho, the "city of palm-trees," (Judg. iii. 13), and a second time to "fight against Judah and Benjamin, and the house of Ephraim:" but they quickly returned to the free pastures of Gilead, leaving but one trace of their presence in the name of Chephar ha-Ammoni, "the band of the Ammonites." (Josh. xviii. 24), situated in the portion of Benjamin somewhere at the head of the passes which lead up from the Jordan-valley, and form the natural access to the table-land of the west country.

The hatred in which the Ammonites were held by Israel, and which possibly was connected with the story of their incestuous origin, is stated to have arisen partly from their opposition, or, rather, their want of assistance (Deut. xxiv. 4), to the Israelites on their approach to Canaan. But it evidently sprang mainly from their share in the affair of Balam (Judg. xxiii. 7. Neh. xii. 1). At the period of Israel's first approach to the south of Palestine the feeling towards Ammon is one of regard. The command is then "distress not the Moabites . . . . . , distress not the children of Ammon, nor meddle with them" (Deut. ii. 9, 19; and comp. 35); and it is only from the subsequent transaction that we can account for the fact that Edom, who had also refused passage through his land but had taken no part with Balam, is punished with the ban of exclusion from the congregation for three generations, while Moab and Ammon is to be kept out for ten generations (Deut. xxiii. 5), a sentence which acquiesces peculiar significance from its being the same pronounced on "curseds" in the preceding verse, from its collocation amongst those pronounced in reference to the most hateful physical deformities, and also from the emphatic recapitulation (ver. 6), "then shall not seek their peace or their prosperity all the days forever."

But whatever its origin it is certain that the animosity continued in force to the latest date. Subdued by Jephthah (Judg. xi. 33) and scattered with great slaughter by Saul (1 Sam. xi. 11) — and that not once only, for he "vexed" them — the Ammonites employed the three terms, Children of Ammon, Ammonites, Ammon, indiscriminately.

The expressions most commonly employed for this nation in "Bene-Ammon": next in frequency comes "Ammon" or "Ammonites"; and least of all "Ammon." The translators of the Author Version have, as usual, neglected these minute differences, and have

* "The expression most commonly employed for this nation in "Bene-Ammon": next in frequency comes "Ammon" or "Ammonites"; and least of all "Ammon." The translators of the Author Version have, as usual, neglected these minute differences, and have
whithersoever he turned them — (xiv. 47) — they enjoyed under his successor a short respite, probably the result of the connection of Moab with David (1 Sam. xxii. 3) and David's town, Bethlehem — where the memory of Ruth must have been still fresh. But this was soon brought to a close by the shameful treatment to which their king subjected the friendly messengers of David (2 Sam. x. 1; 1 Chr. xix. 1), and for which he destroyed their city and inflicted on them the severest blows (2 Sam. xii. 1: Chr. xx. 1.) [Ixxhah.]

In the days of Jehoshaphat they made an incursion into Judah with the Moabites and the Ammonites, but were signally repulsed, and so many killed that three days were occupied in spilling the bodies (2 Chr. xxi. 1—25). In Uzziah's reign they made incursions and committed atrocities in Gilgal (Am. i. 13); Jotham had wars with them, and executed from them a heavy tribute of "silver (comp. "jewels," 2 Chr. xx. 25), wheat, and barley" (2 Chr. xxvii. 5). In the time of Jeremiah we find them in possession of the cities of Gad from which the Jews had been removed by Tidgatha-Pileser (Jer. xxxix. 1—6), and other incursions are elsewhere alluded to (Zeph. ii. 8, 9). At the time of the captivity many Jews took refuge among the Ammonites from the Assyrians (Jer. xl. 11); but no better feeling appears to have arisen, and on the return from Babylon, Tobiah the Ammonite and Sanballat a Moabit (of Chorazin, Jer. xiii.), were foremost among the opponents of Nehemiah's restoration.

Amongst the wives of Solomon's harem are included Ammonite women (1 K. x. 1); one of whom, Naamah, was the mother of Rehoboam (1 K. xiv. 31; 2 Chr. xii. 13), and henceforward traces of the presence of Ammonite women in Judah are not wanting (2 Chr. xxiv. 26; Neh. xiii. 23; Ezr. ix. 1; see Geiger, Urschrift, cp. pp. 47, 49, 209).

The last appearances of the Ammonites in the biblical narrative are in the books of Judith (vi, vii.) and of the Maccabees (1 Macc. v. 6, 30—13), and it has been already remarked that their chief characteristics — close alliance with Moab, hatred of Israel and cunning cruelty — are maintained to the end. By Justin Martyr (Hist. c. Tryph.) they are spoken of as still numerous (κόντο πόλα παρθένους); but, notwithstanding this they do not appear again.

The tribe was governed by a king (Judg. xi. 12, &c.; 1 Sam. xii. 12; 2 Sam. x. 1; Jer. xiv. 14) and by prince, "Ammonite" (2 Sam. x. 3; 1 Chr. xix. 3). It has been conjectured that Nahash (1 Sam. xi. 1; 2 Sam. x. 2) was the official title of the king, as Pharaoh was of the Egyptian monarchs; but this is without any clear foundation.

The divinity of the tribe was Moloch, generally named in the O. T. under the altered form of Milcom — the abomination of the children of Ammon; and occasionally as Maleham. In more than one passage under the word rendered "their king" in the A. V., an allusion is intended to this idol. [Moloch.]

The Ammonite names preserved in the sacred text are as follow. It is open to inquiry whether these words have reached us in their original form (certainly those in Greek have not), or whether they have been altered in transference to the Hebrew records.

Achlor, *Achiaph, quasi Ἀκιάφ, brother of light, Jud. v. 5, &c.

Hanum, *Hanum, pitiable, 2 Sam. x. 1, &c.

Molech, *Μολεχ, king.

Naamah, *Νααμά, pleasant, 1 K. xiv. 21, &c.

Nachash, *Ναχασ, serpent, 1 Sam. xi. 1, &c.

Shold, *Σόλουχ, return, 2 Sam. xvii. 27.

Timothaeus, *Τιμόθαιος, 1 Macc. v. 6, &c.

Tobiah, *Τοβιά, good, Neh. ii. 10, &c.

Zelok, *Ζέλοκ, scar; 2 Sam. xiii. 37.

The name Zammammin, applied by the Ammonites to the Hebram whom they despoissed, should not be omitted.

G.

AMMONITESS (ἡ Ἄμομωντισσίς) in 1 K. Ἄμομωντισσίς, 2 Chr. xiii. 13; 2 Chr. xxiv. 20; Alex. Ἄμομωντισσίς in 1 K.; [Vat. Ἄμομωντισσίς, Ἀμομωντισσίς] Amomithsis. A woman of Ammon. [See Ammonite.] Such were Naamah, the mother of Rehoboam, one of Solomon's foreign wives (1 K. xiv. 21, 31: 2 Chr. xii. 13), and Shimneath, whose son Zalad or Jozachar was one of the murderers of king Joash (2 Chr. xxiv. 20). For allusions to these mixed marriages see 1 K. xi. 1, and Neh. xiii. 25. In the Hebrew the word has always the definite article, and therefore in all cases should be rendered "the Ammonitess."

W. A. W.

AMNON (אַמֹּנְו, once אַמֹּנְו [faithful]): Ἄμονος, [Alex. sometimes Ἄμων]: Ammon. 1. Eldest son of David by Ahinoam the Jezreelites, born in Hebron while his father's royalty was only acknowledged in Judah. He dishonored his half-sister Tamar, and was in consequence murdered by her brother (2 Sam. xiii. 1—21). [Absalom.]

[See also 2 Sam. iii. 2, xiii. 32, 33, 39; 1 Chr. i. 1.]

2. Son of Shimon (1 Chr. iv. 20). G. E. L. C.

AMOK (אַמֹּק [deep or incomprehensible]): Ἀμοκ: [Vat. om.; Comp. Ἀμοκός]: Amoc. A priest, whose family returned with Zerubabel, and were represented by Elter in the days of Josiah (Neh. xii. 7, 29). W. A. W.

*AMOMUM (אָמוּם: amoom). In the description of the merchandise of Babylon (Rome) in Rev. xlviii. 13, the best critical editions read κρύσταλλον καὶ ἄμομον, "cinnamon and amomum," for κρύσταλλον of the received text. Under the name ἄμομον or amomum Dioscorides and Pliny describe an aromatic plant growing in India, Armenia, Media, and Pontus, which modern botanists have found it difficult to identify with any known species. (See Dioscor. i. 14; Plin. H. N. xii. 13, xiii. 1, 2, xvi. 32: Theophr. Hist. Plant. ix. 7; Fr. iv. 32.) Fée (Flore de Vigne, pp. 16, 17) supposes it to be the Amomum racemosum, Lam., Am. cariddmannum, Linn.; Hillerbeck (Phala Cinaesis, p. 21) makes it the Amomum grains Paracel: Sprengel (Hist. Rei. Herb. i. 140 ff. 247 f.), Fras, and others identify it with the *Osis

*Compare the sobriquet of "Le Balafré."
A'MON (יוֹמָן, יְהוֹמָן: meaning ambiguous; [Sin.] in Nahum, [Greek] in Psalms 104:47; [Hebrew] in Judges 8:7) also called ܢܘܡܢ (Nah. iii. 8; or Theb. 364; Matt. vi. 64, xiii. 7, 3; Sil. Hal. xi. 493). See Wetstein's note on Rev. xviii. 13.

A'MON, a god. 1. An Egyptian divinity, whose name occurs in that of Ṣiḥ-n (Nah. iii. 8; or Theb. 364, Matt. vi. 64, xiii. 7, 3; Sil. Hal. xi. 493). It has been supposed that Amon is mentioned in Jer. xvi. 25, but the A.V. is most probably correct in rendering Ṣiḥ-n as the multitude of Nc, as in the parallel passage, Ez. xxx. 15, where the equivalent יְהוֹמָן is employed. Comp. also Ez. xxx. 4, 10, for the use of the latter word with reference to Egypt. These cases, or at least the two former, seem therefore to be instances of pronounisation (comp. Is. xxx. 7, 11, 12). The Egyptian name of Amon, and the Latin Ammon and ammonites, but their writers give the Egyptian pronunciation as 'Aμονος (Herod. ii. 42): 'Aμων (Plut. de Isol. et Osir. 9), or 'Aμων (lambd. de Myst. viii. 3). The ancient Egyptian name is Amen, which must signify the hidden, from the verb aown, to envelop, conceal (Champollion, Dictionnaire Egyptien, p. 197). Cop. 2. 'AMUN. This interpretation agrees with that given by Plutarch, on the authority of a supposition of Manetho. (Mανήθης μὲν ὁ Ἑλευθέριος τὸ κεφαλαίων ὄντα τῆς πρῶτης ὄπω τοῦτος δηλούσα τὴν φωνήν τῆς ᾽Αμοῦν τῆς Ἑλευθ. κ. τ. l. c.) Amen was one of the eight gods of the first order, and chief of the triad of Thebes. He was worshipped at that city as Amen-Ra, or 'Amen the sun,' represented as a man wearing a

The god Amon. (Wilkinson.)

with Baal. In the Great Osiris, and the famous one named after him, he was worshipped in the form of the ram-headed god Num, and called either Amen, Amen-Ra, or Amen-Num, and thus the Greeks came to suppose him to be always ram-headed, whereas this was the proper characteristic of Num (Wilkinson, More Egypt and Thebaid, vol. ii. pp. 367, 375). The worship of Amon spread from the Oases along the north coast of Africa, and even penetrated into Greece. The Greeks identified Amen with Zeus, and he was therefore called Zeus Ammon and Jupiter Ammon. R. S. P.

A'MON, a god. 1. A king of Egypt, called 'Amon, son of the god Amon, and reigning in the reign of Thutmose III. He is mentioned in the First Intermediate Period, and was the last king of the Thinite dynasty. He was the founder of the Amarna Period, and the first king to adopt the Amon cult. He was succeeded by his son, Tutankhamun. The Amon cult was adopted by the Pharaohs of the Eighteenth Dynasty, and became the dominant religious cult of Egypt. Amon was considered the god of the capital city of Thebes, and was associated with the god Ra, the sun god. The Amon-Ra cult was the most important religious cult in ancient Egypt, and the Amon temple in Thebes was the most important temple in Egypt.

AMORITE. The Amorites (אַמְרִית, אַמְרָית) (always in the singular, accurately "the Amorite") — the dwellers on the summits — mountaineers: אַמְרִית (Amerithi), one of the chief nations who possessed the land of Canaan before its conquest by the Israelites.

In the genealogical table of Gen. x. the "Amori" is given as the fourth son of Canaan, with "Zidon, Beth [Hitite], the Jebusite," &c. The interpretation of the name as "mountaineer" or "highlanders" — due to Simons (see his "Omons-

toum"), though commonly wanted by Ewald — is quite in accordance with the notices of the text, which, except in a few instances, speak of the Amorites as dwelling on the elevated portions of the
country. In this respect they are contrasted with the Canaanites, who were the dwellers in the lowlands; and the two tribes mentioned in the division of the land to the east of the Jordan. "The Hittite, and the Jebusite, and the Amorite, dwell in the mountain [of Judah and Ephraim], and the Canaanite dwells by the sea [the lowlands of Philistia and Sharon] and by the 'side of Jordan' [in the valley of the Aravah], — was the report of the first Israelites who entered the country (Num. xiii. 22); and see Josh. v. 1, x. 6, xi. 9; Deut. i. 7, 20; "Mountain of the A.," ver. 44)). This we shall find repeated by other notices. In the very earliest times (Gen. xiv. 7) they are occupying the barren heights west of the Dead Sea, at the place which afterwards bore the name of En-gedi; hills in whose fastnesses, the "rocks of the wild goats," David afterwards took refuge from the pursuit of Saul (1 Sam. xxix. 25-24). [Hazezon-Tamar]. From this point they stretched west to Hebron, where Abram was then dwelling under the "oak grove" of the three brothers, Aner, Eshcol, and Mamre (Gen. xiv. 13; comp. xiii. 18). From this, their ancient seat, they may have crossed the valley of the Jordan, tempted by the high table-lands on the east, for there we next meet them at the date of the invasion of the country. Sihon, their then king, had taken the rich pasture-land south of the Jabok, and had driven the Moabites, its former possessors, across the wide chasm of the Arnon (Num. xxi. 16, 17), which the Israelites afterwards formed the boundary between the two hostile peoples (Num. xxi. 13). The Israelites apparently approached from the south-east, keeping "on the other side" (that is, on the east) of the upper part of the Arnon, which then bends southwards, so as to form the eastern boundary of the country of Moab. Their request to pass through his land to the fords of Jordan was refused by Sihon (Num. xxi. 21; Deut. ii. 20); he went out against them (xii. 21, 32), was killed with his sons and his people (iii. 33), and his land, cattle, and cities taken possession of by Israel (xii. 24, 25, 31, ii. 34-6). This rich tract, bounded by the Jabok on the north, the Arnon on the south, Jordan on the west, and the wilderness on the east (Judg. xii. 11, 22) — in the words of Josephus "a land lying between three rivers after the manner of an island." (Ant. iv. 5, 2 §) — was, perhaps, in the most special sense the "promised land of the Amorites." (Num. xiii. 31; Josh. xii. 2, 3, xiii. 9; Judg. xii. 21, 22) ; but their possessions are distinctly stated to have extended to the very feet of Hermon (Deut. iii. 8, iv. 48), abounding "all Gilead and all Bashan" (iii. 10), with the Jordan valley on the east of the river (iv. 49), and forming together the land of the "two kings of the Amorites," Sihon and Og (Deut. xxxi. 4; Josh. ii. 10, ix. 10, xiv. 12).

After the passage of the Jordan we again meet with Amorites disputing with Joshua the conquest of the west country. But although the name generally denotes the mountain tribes of the centre of the country, yet this definition is not always strictly maintained, varying probably with the author of the particular part of the history, and the time at which it was written. Nor ought we to expect that the Israelites could have possessed very accurate knowledge of a set of small tribes whom they were perhaps too soon to extinguish with whom they were forbidden to hold any intercourse — and, moreover, of whose general similarity to each other we have convincing proof in the confusion in question.

Some of these differences are as follows: — He has in "Amorite" in Gen. xiii. 18, xiv. 13, though "Hittite" in xiii. and "Canaanite" in Judg. i. 10. The "Hivites" of Gen. xxxv. 2, are "Amorites" in xviii. 22; and so also in Josh. ix. 7, x. 19, as compared with 2 Sam. xxi. 2. Jerusalem is "Amorite" in Josh. x. 5, 6; but in xv. 63, xviii. 28; Judg. i. 21, xiv. 11; 2 Sam. v. 6, &c., it is "Jebusite." The "Canaanites" of Num. xiv. 45 (comp. Judg. i. 17), are "Amorites" in Deut. iv. 44. Jarmouth, Laishah, and Eglon, were taken in the low country of the Shefelah, (Josh. xv. 35, 39), but in Josh. x. 5, 6, they are "Amorites that dwell in the mountains;" and it would appear as if the "Amorites" who forced the Danites into the mountain (Judg. i. 34, 35) must have themselves remained on the plain.

Notwithstanding these few differences, however, from a comparison of the passages previously quoted it appears plain that "Amorite" was a local term, and not the name of a distinct tribe. This is confirmed by the following facts. (1) The wide area over which the name was spread. (2) The want of connection between those on the east and those on the west of Jordan — which is only once hinted at (Josh. ii. 10). (3) The existence of kings like Sihon and Og, whose territories were separate and independent, but who are yet called "the two kings of the Amorites:" a state of things quite at variance with the habits of Semitic tribes. (4) Beyond the three confederates of Abram, and these two kings, no individual Amorites appear in the history (unless Arunah or Ornan the Jebusite be one). (5) There are no traces of any peculiar government, worship, or customs, different from those of the other "nations of Canaan." One word of the "Amorite" language has survived — the name Senir (not "Shenir") for Mount Hermon (Deut. iii. 9); but may not this be the Canaanite name as opposed to the Phoenician (Sidon) on the one side and the Hebrew on the other?

All mountaineers are warlike; and, from the three confederate brothers who at a moment's notice accompanied "Abrah the Hebrew" in his pursuit of the five kings, down to those who, not depressed by the slaughter inflicted by Joshua and the terror of the name of Israel, persisted in driving the children of Dan into the mountain, the Amorites fully maintained this character. After the conquest of Canaan nothing is heard in the Bible of the Amorites, except the occasional mention of their name in the usual formula for designating the early inhabitants of the country.

A'MOS (א'מוס, a burden: A'mos: Amnon), a native of Tekoa in Judah, about six miles S. of Bethlehem, originally a shepherd and dresser of sycamore-trees, was called by God's Spirit to be a prophet, although not trained in any of the regular prophetic schools (i. 1, vii. 14, 15). He travelled from Judah into the northern kingdom of Israel or Ephraim, and there exercised his ministry, apparently for a very long time. His death was announced, however, later than the 15th year of Uzziah's reign (n. c. 808, according to Clinton, F. H. ii. 325); for he tells us "that he prophesied in the reigns of Uzziah king of Judah, and Jeroboam the son of Joash king of Israel, two years before the earthquake."
This earthquake (also mentioned Zech. xiv. 5) cannot have occurred after the 17th year of Uzziah, since Jeroboam II. died in the 15th of that king's reign, which therefore is the latest year fulfilling the three chronological indications furnished by the prophet himself. But his (iii. 14) probably took place at an earlier period of Jeroboam's reign, perhaps about the middle of it: for on the one hand Amos speaks of the conquests of this warlike king as completed (vi. 13, cf. 2 K. xiv. 35), on the other the Assyrians, who towards the end of his reign were approaching Palestine (Hos. x. 6, xi. 5), do not seem as yet to have caused any alarm in the country. Amos predicts indeed that Israel and Judah, the leading nations will be overthrown by certain wild conquerors from the North (i. 5, v. 27, vi. 14), but does not name them, as if they were still unknown or uncensed. In this prophet's time Israel was at the height of power, wealth, and security, but infected by the crimes to which such a state is liable. The poor were oppressed (viii. 4), the ordinances of religion thought burdensome (viii. 5), and idleness, luxury, and extravagance were widespread. The society of the day was idyllic, of that of the golden calves, not of Paul, since Jehoiakim occupied the throne, though it seems probable from 2 K. xii. 6, which passage must refer to Jeroboam's reign (Benjamin i. 31), that the rites even of Astarte were tolerated in Samaria, though not encouraged. Cult-worship was specially practised at Bethel, where was a principal temple and summer palace for the king (vii. 14; cf. iii. 15), also at Gilgal, Dan, and Beersheba in Judah (iv. 5, v. 5, viii. 14), and was extensively mixed with the true worship of the Lord (v. 14, 21-23; cf. 2 K. xvii. 33). Amos went to reside at Bethel itself, but was compelled to return to Judah by the high-priest Amaziah, who procured from Jeroboam an order for his expulsion from the northern kingdom.

The book of the prophecies of Amos seems divided into four principal portions closely connected together. (1) From i. 1 to ii. 3 he denounces the sins of the nations bordering on Israel and Judah, as a preparation for (2), in which, from ii. 4 to vi. 11, he describes the state of those two kingdoms, especially the former. This is followed by (3), vii. 1-ix. 10, in which, after reflecting on the previous prophecy, he relates his visit to Bethel, and sketches the impending punishment of Israel which he predicted to Amaziah. After this, in (4), he rises to a loftier and more evangelical strain, looking forward to the time when the hope of the Messiah's kingdom will be fulfilled, and His people forgiven and established in the enjoyment of God's blessings to all eternity. The chief peculiarity of the style consists in the number of allusions to natural objects and agricultural occupations, as might be expected from the early date of the author. See i. 3, 5, 12, 14, iii. 1, 5, 6, 7, 9, v. 8, 19, vi. 12, vii. 5, 3, 9, 11, 14. The book presupposes a popular acquaintance with the Pentateuch and Heinekenberg, Ritus der Einigung im Alten Testament, i. 83-125, and implies that the ceremonies of religion, except where corrupted by Jeroboam I., were in accordance with the law of Moses. The references to it in the New Testament are two: v. 25, 26, 27.

\* There was a later Jewish tradition, says Stanley, that he was beaten and wounded by the indignantcrowd on some occasion; but he should have died in his native place—the fate which such a rough, plain-spoken preacher would naturally invite; and it was almost as if it had been carried to its logical extreme, with the motive it suggests.

\* Among the later commentators on Amos may be mentioned J. A. Theiner, Klein. Propheten, 1828; Hitzig, Klein. Prophet, erklart, 1838, 3 ed. Ausl. 1833; Muraet, Com. Gram. Hist. Crit. in Prophet. Minoros, 1840; Ewald, Prophet. d. Alten Bundes, 1840; Umbreit, Proph. Com. über die Prophet. IV. ii. 1844; Heuender, Minor Prophet. Lland. 1845, Amer. ed. 1850; Baur, Die Prophet. Amos, erklart, 1847, and Pusey, Minor Prophet., 1861. There is a rapid but graphic sketch of the contents of the prophecy, as well as of the career of the prophet, by Stanley (Jewish Church, ii. 396 f. Amer. ed.) for a list of the older writers and their characteristics, the reader is referred to Baur's Einleitung to his commentary named above (pp. 149-162).

2. (Amos: Amos.) Son of Naum, in the genealogy of Jesus Christ (Luke iii. 25). W. A. W.

AMOZ (Ἀμώζ; Amos), father of the prophet Isaiah (2 K. xix. 2, xx. 1; 2 Chr. xxvi. 22, xxvii. 22, 29; Is. i. 1, ii. 1, xiii. 1, xx. 22 [xxvii. 21], xxxviii. 1.)

AMPHIPOLIS (Ἀμφιπόλις; Amphipolis), a city of Macedonia, through which Paul and Silas passed in their way from Philippi to Thessalonica (Acts xvii. 1). It was distant 33 Roman miles from Philippi (Itin. Anton., p. 320). It was called Amphipolis, because the river Strymon flowed almost round the town (Thuc. iv. 192). It stood upon an eminence on the left or eastern bank of this river, just below its entrance from the lake Cerasitis, and at the distance of about three miles from the sea. It was a colony of the Athenians, and was memorable in the Peloponnesian war for the battle fought under its walls, in which both Brasidas and Cleon were killed (Thuc. v. 6-11). Its site is now occupied by a village called Nikopolis, in Turkish Jeniköy, or "New-Town."

* The reader will notice from the wood-cut (taken from Cousin) the singular position of this apostolic place. Nikopolis is the modern Greek Neómpolis. Though the name is changed, the identification is undeniable, since the position answers so perfectly to the ancient name and to the notices of ancient writers (cfr. Νικόπολις περάν τοῦ Ἱπταμένου τοῦ Στρυμόνα, Thuc. iv. 192). Cousin inserts a plan of the ruins still found on the spot in his Voyage dans la Macédoine (i. 131), among which are parts of the city wall, symbolic figures, inscriptions, tombs, &c. See also Leake's Northern Greece, iii. 181 f., on the point here where Paul crossed the Strymon on his mission of philanthropy (διὰ Ἀμφιπολίτων τοῦ σταυροῦ ἐπὶ Θεόν, Tit. iii. 43). Nercessian, on his invasion of Greece, "offered a sacrifice of white horses to the river, and buried alive nine youths and maidens." See Herod. vii. 113, 114 and Rawlinson's note there. It was not till after the great sacrifice on Gorgotha that human sacrificers would naturally bristle; and it was almost as if it had been carried to its logical extreme, with the motive it suggests. (Cfr. Νικόπολις, Mat. xxiii. 35.) See Jewish Church, ii. 290, Amer. ed. 32.
AMULETS

Ampelis.

been cease generally, even among the Greeks and Romans. See Lasaulx's interesting monograph entitled Silbongef der Griechen u. Römer u. ihr Verhältnis zu dem Einem auf Golgota (tr. in the Bibl. Sacra, i. 308-408). For the classical interest of Amphiopis, the reader is referred to Grote's History of Greece, vi. 625 ff., and Arnold's Thucydides, ii. (at end). [APOLLOXIA.] H.

AMPLIAS ('Amyiaías, Lachm. marg. Sin. AVG. 'Amyiaías: Ampelis), a Christian at Rome [whom Paul salutes and terms his beloved in the Lord'] (Rom. xvi. 8).

AMRAM (['Amyras, people of the exalted, i.e. Ger]: 'Amyras, ['Amyras: Vat. in Ex. vi. 20, Ἀμμαράς: Amaran). 1. A Levite, father of Moses, Aaron, and Miriam (Ex. vi. 18, 2); Num. iii. 10, (xxvi. 58, 59; 1 Chr. vi. 2, 5, 18, xxiii. 12, 15, xxiv. 20)]. R. W. B.

2. (['Amyras: 'Eiméras: Alex. Ἀμμάδα: [Ald. 'Amydá: Comp. 'Amydáv: Hamram.) Properly Hamran or Charmun; son of Dishon and descendant of Levi (1 Chr. i. 41). In Gen. xxxvi. 29 he is called Ἡμιδάν, and this is the reading in 1 Chr. in many of Kennicott's MSS.

3. (['Amyras: 'Amyras: [Vat. Ἀμαρείς: Alex. Ἀμβραία: Amaran). One of the sons of Bani, in the time of Ezra, who had married a foreign wife (Ex. x. 34). Called Ὀλμαραί in 1 Esdr. ix. 34.

AMRIMATES, THE (['Amyras, ὁ 'Amyras: ὁ Ἀμβραία: Alex. ὁ Ἀμβραία, ὁ Ἀμπραία: Amramites). A branch of the great Kohathite family of the tribe of Levi (Num. iii. 27; 1 Chr. xxvi. 23); descended from Amram, the father of Moses.

W. A. W.

AMRAPHEL (['Amyrapel: Am-raphel), perhaps a Hamite king of Shinar or Babylon, who joined the victorious inversion of the Elamite Chedorlammer against the kings of Sodom and Gomorrah and the cities of the plain (Gen. iv. 1, 9). The meaning of the name is uncertain;

some have connected it with the Sanskrit aumrāpeli, "the guardian of the immortals." (Comp. Rawlinson's Herodotes, i. 446.) S. L.

AMULETS were ornaments, gems, scrolls, &c., worn as preservatives against the power of enchantments, and generally inscribed with mystic forms or characters. The "ear-rings" in Gen. xxxv. 4 (ἔντος: ἕνας) were obviously connected with idolatrous worship, and were probably amulets taken from the bodies of the skin Shechemites. They are subsequently mentioned among the spoils of Midian (Judg. viii. 21), and perhaps their objectionable character was the reason why Gideon asked for them. Again, in Hos. ii. 13, "decking herself with ear-rings" is mentioned as one of the signs of the "days of Baalim." Hence in Chaldee an ear-ring is called ἄμνηστη.

But amulets were more often worn round the neck, like the golden bulla or leather lorum of the Roman boys. Sometimes they were precious stones, supposed to be endowed with peculiar virtues. In the "Mirror of stones" the strongest properties are attributed to the amethyst, Kinocetus, Alectoria, Ceranium, &c.; and Fliny, talking of succina, says "Infantibus aligari amuletis ratione prodest." (xxxvi. 12, s. 37). They were generally suspended as the centre-piece of a necklace, and among the Egyptians often consisted of the embalms of various deities, or the symbol of truth and justice ("Thmei"). A gem of this kind, formed of sapphires, was worn by the chief judge of Egypt (Diod. i. 48, 75), and a similar one is represented as worn by the youthful deity Harropates (Wilkinson, Ant. Egypt. iii. 394). The Arabs hang round their children's necks the figure of an open bantu; a custom which, according to Svor, arises from the un-buckleless of the number 5. This principle is often found in the use of amulets. Thus the basilisk is constantly engraved on the talismanic scarabaei of Egypt, and according to John (Arch. Bibl. § 131 Engl. tr.), the ἄμνηστη of Is. iii. 21, were "fig-
AMULETS

ues of serpents carried in the hand (more probably worn in the ears) by Hebrew women. The word is derived from בַּרְצָה, *sidheq*, and means both *enchantments* (cf. Is. iii. 3), and the magica1 words and formulas used to avert them (Gesen. s. v.). It is doubtful whether the LXX. intends περπατία as a translation of this word: *pro voce* περπατο, nihil est in textu Hebraico* " (Schlesner's *Thesaurus*). For a like reason the phallic was among the sacred emblems of the Vestals (Dict. of Art, art. "Fascinating").

The commonest amulets were sacred words (the tetragrammaton, &c.) or sentences, written in a peculiar manner, or inscribed in some cabalistic figure, like the shield of David, called also Solomon's Seal. Another form of this figure is the pentangle (or pentacle, r. Scott's *Antiquity*), which "consists of three triangles intersected, and made of five lines, which may be set forth with the body of man to touch and point out the places where our Savour was wounded" (Sir Thos. Brown's *Vulg. Exrcv*. i. 19). Under this head fall the 'Εγκέπτα προσωπου (Acts xix. 19), and in later times the Arabic gems of the Basilians; and the use of the word *Abmnedahar*, recommended by the physician Serennas Samonius, as a cure of the hernia. The same physician prescribes for quartan ague:

"Διαφορικός ἱπποδρόμος συντομ συνειδημον.

Charms consisting of words written on bolts of papyrus tightly rolled up and sewed in linen, have been found at Thebes (Wilkinson, i. c.), and our English translators possibly intended something of the kind when they rendered the curious phrase (in Is. iii.) מַּהְרָן מְלַחְקָה by "tablets." It was the danger of lewdish practices arising from a

Amulet. Modern Egyptian. (From Lane's Modern Egyptians.)

knowledge of this custom that probably induced the sanction of the use of phylacteries (Deut. vi. 8: xi. 18, מַּהְרָן מְלַחְקָה). The modern Arabs use amulets of the Koran (which they call "telemos" or "cababaki") in the same way.

A very large class of amulets depended for their value on their being constructed under certain astronomical conditions. Their most general use was to avert ill-luck, &c., especially to nullify the effect of the עֲבֹדָה מְלַחְקָה, a belief in which is found among all nations. The Jews were particularly addicted to them, and the only restriction placed by the Rabbis on their use was, that none but approved amulets (i.e., such as were known to have cured three persons) were to be worn on the Sabbath. (Lightfoot's *Hor. Hebr.* in Matt. xxiv. 21). It was thought that they kept off the evil spirits who caused disease. Some animal substances were considered to possess such properties, as we see from Paul. (xxviii. 42) mentioning a fox's tongue worn on an amulet as a charm against bleak eyes, and says (xxx. 15) "Scablarum cornua alligata amuleti naturam obstinent;" perhaps an Egyptian fancy. In the same way one of the Roman emperors wore a seal-skim as a charm against thunder.

Among plants, the white hyacinth and the Hyssop, or *Hygana syriaca*, are mentioned as useful (St. G. Brown, *Vulg. Exrcv*. i. 19). He attributes the whole doctrine of amulets to the devil, but still shows a hint that they may work by "imponderable and invisible emissions"

2. (Ammzi [Vat.-sic]: Amizi). A priest, whose descendant Adahiah with his brethren did the service for the Temple in the time of Nehemiah (Neh. xi. 12).

W. A. W.

A'NABB [אַנַבָּב [goose-town, Gesen.]: *Ambedh*, *Amad*: Alex. *Amadh*: *Amad*), a town in the mountains of Judah (Josh. xv. 50), named, with Debir and Hebron, as once belonging to the Ana-kim (Josh. xi. 21). It has retained its ancient name ("Amad"), and lies among the hills about ten miles S. W. of Hebron, close to Sheva and Edentien (Eob. i. 494). The conjecture of Eus. and Jerome (Nom. *Amadh, Amud*), is evidently impossible.

G.

A'MAEL (Amael). The brother of Tobit (Tob. i. 21).

A'NAH [אָנָה [pers. answering, i. e. a request]: *Anai*. (Gen. xxxvi. 24, Alex. *Gerai*: 1 Chr. i. 40, 41. Rom. *Apeli*: Alex. *Grau*: *Arai*: *Arai*), the son of Ziloeon, the son of Seir, the Horite (Gen. xxxvi. 24, 24: and father of Abdihaman, one of the wives of Esau (Gen. xxxvi. 2, 14). We are not dubious as to understand the text with Winer, Hengstenberg, &c., though the Hebrew reads *Abdihamah, daughter of Anah*, daughter of Zibeon (*כֶּבֶּהֶר* אֱלָה אֶלֶּה יְבֵן). It is there any necessity to correct the reading in accordance with the Same, which has instead of the second הַּיָּבֶּה instead of to Abdihaman instead of to its immediate antecedent Anah. The word is thus used in the wider sense of descendant (here granddaughter), as it is apparently again in this chapter, v. 28. We may further conclude with Hengstenberg (Pract. ii. 280: Eng. trans. ii. 225) that the Anah mentioned amongst the sons of Seir in v. 29 in connection with Zibeon, is the same person as here referred to, and is therefore the grandson of Seir. The invention of the genealogy plainly is not so much to give the literal descent of the Seirites as to enumerate these descendants who, being heads of tribes, came into connection with the Edomites. It would thus appear that Anah, from whom Esau's wife sprang, was the head of a tribe independent of his father, and ranking on an equality with that tribe. Several difficulties occur in regard to the race and name of Anah. By his descent from Seir he is a
ANAHARATH and ANAMMELECH

Anaharath [which see] (Gen. xxxvi. 20), whilst in v. 2 he is called a Hivite, and again in the narrative (Gen. xxvi. 34) he is called Beeri the Hittite.

Hengstenberg's explanation of the first of these difficulties is far-fetched: and it is more probable that the word Hivite (חֵיתֵי) is a mistake of transcribers for Horite (כָּהִיתֵי). With regard to the identification of Anah the Horite with Beeri the Hittite, see Beeri.

F. W. G.

* In Gen. xxxvi. 24 (A. V.), we read: "This was that Anah that found the nudes in the wilderness, as he fed the asses of Ziloon his father." The word בַּעֲלָה is here rendered males, according to the Jewish explanation (Targ. of Jonathan, the Talmud, Scandin., Rabbinic commentators), followed in Luther's and other modern versions. With this rendering of בַּעֲלָה, the statement is altogether insignificant, unless נְעִיִּים is taken (as by the Talmudist) in the sense of invent, as in Luther's version; meaning that Anah found out the way of producing males, by coupling animals of different species. But this sense the Hebrew word will not bear. The explanation is evidently drawn from the connection merely, without any support from etymology. Equally baseless is the interpretation in the Targ. of Onkelos, and the Samaritan Codex, taking בַּעֲלָה in the sense of giants (as if נְעִיִּים). Deut. ii. 11.

Another and probably older exegetical tradition, transmitted through Jerome and the Vulgate, renders בַּעֲלָה by verna springs (Vulgate aquas calid.). This has the support of etymology (Genesius, Thea., בַּעֲלָה), as well as of the ancient tradition, and is corroborated by the frequent occurrence of warm springs in the region referred to, as observed both by ancient writers and by modern travellers.

T. J. C.

ANAHARATH [בַּעֲלָה] (בַּעֲלָה) [hollow way or pass, First].: Anah'aroth: [Alex. Anah'arah: Anah'arah], a place within the borders of Issachar, named with Shickon and Rabith (Josh. xix. 19). Nothing is yet known of it.

G.

* Some think it may be the present Ar'nah, near the foot of Gilboa, about 2 miles east of Jenin (En-gannim). See Zeller's Bibl. Wörterb. p. 60, 2te Aufl. Robinson mentions the place twice (ii. 316, 319), but does not suggest the identification.

H.

ANAH'AH [ם] (ם) [י]: Ar'afips: [Vat. M. Ar'apha: Ar'apha]. 1. Probably a priest; one of those who stood on Ezra's right hand as he read the Law to the people (Neh. viii. 4). He is called Anahas in 1 Esdr. ix. 43.

2. (Ar'apha: [Vat. Ar'apha: Abd. Ar'apha] Ar'apha). One of the "heads" of the people who signed the covenant with Nehemiah (Neh. x. 22).

W. A. W.

AN'AK. [Anakim.]

AN'AKIM [גַּלְגַּלָּה]: [Ar'aphah: [Vat. -apha, and so Alex. in Deut. i. 27] Ar'rephah], a race of giants (so called either from their stature (long.collis, Gesen.). or their strength (Fürst.), (the root גַּלְגַּלָּה being identical with our word neck), descendants of Arba (Josh. xv. 13, xxi. 11), dwelling in the southern part of Canaan, and particularly at Hebron, which from their progenitor received the name of גַּלְגַּלָּה. Besides the general designation Anakim, they are variously called גַּלְגַּלָּה, sons of Anak (Num. xiii. 33), גַּלְגַּלָּה, sons of Anak (Num. xiii. 32), and גַּלְגַּלָּה, sons of Anakim [LXX. υἱοὶ γαρδάτων] (Deut. i. 28). These designations serve to show that we must regard Anak as the name of the race rather than that of an individual, and this is confirmed by what is said of Arba, his progenitor, that he "was a great man among the Anakim" (Josh. xiv. 15).

The race appears to have been divided into three tribes or families, bearing the names Sheshai, Ahiman, and Talmai. Though the warlike appearance of the Anakim had struck the Israelites with terror in the time of Moses (Num. xiii. 28; Deut. ix. 2), they were nevertheless dispossessed by Joshua, and utterly driven from the land, except a small remnant that found refuge in the Philistine cities, Gaza, Gath, and Ashdod (Josh. xi. 21). Their chief city, Hebron, became the possession of Caleb, who is said to have driven out from it the three sons of Anak mentioned above, that is, the three families or tribes of the Anakim (Josh. xv. 14; Judg. i. 20). After this time they vanish from history.

F. W. G.

AN'AMIM [גַּלְגַּלָּה] : Ar'me'elah: [Alex. Ar'meelah: Abd. Ar'meelah] Ar'melah), one of the idols worshipped by the colonists introduced into Samaria from Sebharvain (2 K. xvii. 31). He was worshipped with rites resembling those of Melech, children being burnt in his honor; and is the companion to Adrammelech. As Adrammelech is the male power of the sun, so Anammelech is the female power of the sun (Rawlinson's Hist. of the Prom. x. 611). The etymology of the word is uncertain. Rawlinson connects it with the name Anamut. Gesenius derives the name from words meaning 'idol and king,' but Reland (de vet. ling. Pers. i.) deduces the first part of it from the Persian word for 'grief.' Winer advocates a derivation connecting the idol with the constellation Ce-
ANAN [a chson]: 'Hida, Alex. [Comp.]. 'Hirson: Anan. 1. One of the "heads", of the people, who signed the covenant with Nehemiah (Neh. x. 20).

2. (Arab: Alex. Arvas: Aroni.) HANAN 4 (1 Esdr. v. 30; comp. Ezra ii. 46). W. A. W.

ANANI (???) [Jehovah protects]: 'Aravz: 'Anani. The seventh son of Elioenai, descended through Zerubbabel from the line royal of Judah (1 Chron. iii. 24). W. A. W.

ANANIAH (???) [whom Jehovah protects]: 'Aravz: 'Anani. Probably a priest; ancestor of Ananiah, who assisted in rebuilding the city wall after the return from Babylon (Neh. iii. 23).

ANANIAH (???) [whom Jehovah protects], a place, named between Noh and Hazor, in which the Enamites lived after their return from captivity (Neh. xi. 32). The LXX. [in most MSS.] omits all mention of this and the accompanying names [but Comp. has 'Aravz, and F.3 Aravz].

ANANIAS (???, or ???) [Jehovah is gracious]: 'Aravz: 'Anani. 1. A high-priest in Acts xxiii. 2 if xxiv. 1. [Before whom Paul attempted to defend himself, in the Jewish Council at Jerusalem, but was silenced with a blow on the mouth for asserting that he had always "lived in all good conscience before God." See, in regard to that incident, Acts v.]. He was the son of Nehemiah (Joseph, 'Avavias, Ant. xx. 5, § 2); succeeded Joseph son of Caiaphas (Ant. xx. 1, § 3, 5, § 2), and preceded Ismael son of Phah (Ant. xx. 8, §§ 8, 11). He was nominated to the office by Herod king of Chalcis, in x. v. 45 (Ant. xx. 5, § 2); and in x. v. 52 sent to Rome by the prefect Ciphas Quadratus to answer before the Emperor Claudius a charge of oppression brought by the Samaritans (Ant. xx. 6, § 2). He appears, however, not to have lost his office, but to have resumed it on his return. This has been doubted; but Wieseler ('Avavias, d. Apostol. Zeitalters, p. 76, note) has shown that it was in all probability, seeing that the procurator Cummans, who went to Rome with him as his adversary, was unsuccessful, and was condemned to banishment. He was deposed from his office shortly before Felix left the province (Ant. xx. 8, § 8; but still held great power, which he used violently and lawlessly (Ant. xx. 9, § 2). He was at last assassinated by the Sicarii (B. J. ii. 17, § 9) at the beginning of the last Jewish war.

2. A disciple at Jerusalem, husband of Sapphira (Acts v. 1 ff.). Having sold his goods for the benefit of the church, he kept back a part of the price, bringing to the apostles the remainder, as if it were the whole, his wife also being privy to the scheme. St. Peter, being enabled by the power of the Spirit to see through the fraud, denounced him as having lied to the Holy Ghost, i. e. having attempted to pass upon the Spirit resident in the soul as an act of deliberate deceit. On hearing this, Ananias fell down and expired. That this incident was no mere physical consequence of St. Peter's severity of tone, as some of the German writers have maintained, distinctly appears by the direct sentence of a similar death pronounced by the same apostle upon his wife Sapphira a few hours after. [Sapphira.] It is of course possible that Ananias's death may have been an act of divine justice unlooked for by the apostle, as there is no mention of such an intended result in his speech; but in the case of the wife, such an idea is out of the question. Nienroyer (Charakteristik der Bibel, c. 55) has well stated the case as regards the husbands which some have endeavored to cast on St. Peter in this matter, when he says that not man, but God, is thus animadverted on. The apostle is but the organ and announcer of the divine justice, which was pleased by this act of deserved severity to protect the morality of the infant church, and strengthen its power for good.

3. A false disciple at Damascus (Acts ix. 10 ff.), of high repute, "a devout man according to the law, having a good report of all the Jews which dwelt there" (Acts xxii. 12). Being ordered by the Lord in a vision, he sought out Saul during the period of blindness and dejection which followed his conversion, and announced to him his future commission as a preacher of the Gospel, conveying to him at the same time, by the laying on of his hands, the restoration of sight, and commanding him to arise, and be baptized, and wash away his sins, calling on the name of the Lord. Tradition makes him to have been afterwards bishop of Damascus, and to have died by martyrdom (Muratorian Canon, i. 76 f.).

ANANIAS (Aravz: [Vat. Apocr.]: Alex. Arvas: Abd. 'Aravz: 'Anani.). 1. The sons of Ananias to the number of 101 (Vulg. 130) enumerated in 1 Esdr. v. 16 as having returned with Zerubbabel. No such name exists in the parallel lists of Ezra and Nehemiah.

2. Ananias; son, in Vulg. 1) HANAN 3 (1 Esdr. ix. 21; comp. Ezra x. 20).

3. (Anani.) HANANIAH 9 (1 Esdr. ix. 29; comp. Ezra x. 28).

4. (Anani.) ANANIAH 1 (1 Esdr. ix. 43; comp. Neh. viii. 4).

6. Father of Ananias, whose name was assumed by the angel Raphael (Tob. v. 92, 134). In the LXX. he appears to be the eldest brother of Tobit.

7. (Arvaniai.) Ancestor of Judith (Jud. viii. 1). The Cod. Sin. [with Alex.] gives Aravanus, though the Vat. MS. omits the name.

8. (Aravz: Vat. Apocr.): Shadrach (Song of 34 b. 66; 1 Macc. ii. 59). [HANANIAH 7.]

W. A. W.

ANANTHEMEN (Avsvia). Forefather of Tobias (Tab. 1). I.

ANATH (???, i. e. to prayer): 'Aravz; Aravz: [Vat. Luc. and Aravz: Alex. Aravz, Kevavz: 'Anani.] Asheth, father of Shamgar (Judg. iii. 31, v. 6).

ANATHHEMA (??, or ??, or ??) in LXX., the equivalent for ??, a thing or person denounced; in N. T. generally translated anathema. The more usual form is ??, with the sense of an offering supraadul, in a temple (Luke xxii. 52 Macc. ix. 16). The Alexandrine writers preferred the short penultimate in this and other kindred words (e. g. ??, ??);: but occasionally both forms occur in the MSS., as in 1 Macc. vii. 19 and 2 Macc. xxxii 13; Luke xxii. 51: no distinctive sense.

in tilled fields of grain, with figs and olives. There are the remains of walls and strong foundations, and the quarries still supply Jerusalem with building stone (Rob. i. 437, 438). G.

* The present Andō is a little hamlet of 12 or 13 houses, where, as of old on roofs of this humble class, the grass still grows on the house-tops; the striking image of the Song of Songs (i. 5, 7, and ii. xxxii. 27) of man's immaturity and frailty. The 100 House in Besser's Bibl. Worth. p. 61, should certainly be 100 inhabitants (or less), and not “houses.” It is worth remarking, too, that parts of the Dead Sea and its dismal scenery are distinctly visible from this ancient home of the pensive, heart-burdened Jeremiah. Dr. Wilson (Land of the Bible, i. 483) represents Andō as within sight from the Mount of Olives. H.

ANCHOR. [Srn^]

ANDREW, St. (Ἀνδρέας; Andrew: the name Andreas occurs in Greek writers: e. g. Athen. viii. 312, and xv. 678; it is found in Dion Cass. libri. 32, as the name of a Caesarien (Xn. in the reign of Trajan), one among the first called of the Apostles of our Lord (John i. 40, 41; Matt. iv. 18); brother (whether elder or younger is uncertain) of Simon Peter (ibid.). He was of Bethsaida, and had been a disciple of John the Baptist. On hearing Jesus a second time designated by him as the Lamb of God, he left his former master, and in company with another of John's disciples attached himself to our Lord. By his means his brother Simon was brought to Jesus (John i. 41).

The apparent discrepancy in Matt. iv. 18 from Mark iii. 16 ff, where the two appear to have been called together, is no real one. St. John relating the first introduction of the disciples to Jesus, the other Evangelists their formal call to follow Him in his ministry. In the catalogue of the Apostles, Andrew appears, in Matt. x. 2, Luke vi. 14, second, next after his brother Peter, but in Mark iii. 16, Acts i. 13, fourth, next after the three, Peter, James, and John, and in company with Philip. And this appears to have been his real place of dignity among the apostles; for in Mark xiii. 3, we find Peter, James, John, and Andrew, inquiring privately of our Lord about His coming; and in John xii. 23, when certain Greeks wished for an interview with Jesus, they applied through Andrew, who consulted Philip, and in company with him, proposed the request to our Lord. This last circumstance, combined with the Greek character of both their names, may perhaps point to some slight shade of Hellenistic connection on the part of the two apostles; though it is extremely improbable that any of the Twelve were Hellenists in the proper sense. On the occasion of the five thousand in the wilderness wanting nourishment, it is Andrew who points out the little lad with the five barley loaves and the two fishes. Scripture relates nothing of him beyond these scattered notices. Except in the catalogue (i. 13), his name does not occur once in the Acts. The traditions about him are various. Eusebius (iii. 1) makes him preach in Smyrna; Jerome (Ep. 148, ad Marc.) and Theodoret (ad Paulin. exvii.), in Achaim (Greece); Nicephorus (ii. 38), in Asia Minor and Thrace. He is said to have been crucified at Patrae in Achaim, or a cruze decussata (X); but this is doubted by Lipsius (de Cruce, i. 7), and Sagittarii (de Crucccssibus Martyrum, viii. 12). Eusebius (H. E. iii. 25) speaks of an apocryphal Acts of Andrew: and Epiphanius (Her. xvi. 1) states that the Evangelists accredited it among their principal Scriptures; and (xiii. 2) he says the same of the Origenists. (See Fabric. Cod. Apocr. i. 436 ff. [Tischendorf, Acta Apost. Apost. p. xii. ff., 105 ff. Memory, Grant. i. 221 ff.] Perenn. Vit. Apost. i. 82 ff.)

II. A.

ANDRONICUS (Ἀνδρόνικος [man of victory]). 1. An officer left as victor (Σάββατος, 2 Macc. iv. 31) in Antioch by Antiochus Epiphanes during his absence (v. c. 171). Menæcus avoided himself of the opportunity to secure his good offices by offering him some golden vessels which he had taken from the temple. When Onias (Οἰνας ΙΙΙ.) was certainly assured that the sacrifice had been committed, he sharply reproved Menæcus for the crime, having previously taken refuge in the sanctuary of Apollo and Artemis in Daphne. At the instigation of Menæcus, Andronicus induced Onias to leave the sanctuary and immediately put him to death in prison (παρακάτω, 2 Macc. xii. 37). This murder excited general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2 Macc. iv. 30-38). Josephus places the death of Onias before the high-priesthood of Jason (Ant. xii. 5, 4) and omits all mention of Andronicus; but there is not sufficient reason to doubt the truthfulness of the narrative, as Wernershof has done (De judeis llib. Macc. pp. 90 f.).

2. Another officer of Antiochus Epiphanes who was left for him on Gibraltar (de Tap. 2 Macc. v. 29), probably in occupation of the temple there. As the name was common, it seems unreasonable to identify this general with the former one, and so to introduce a contradiction into the history (Wernershof, l. c.: Ewald, Greek d. Volks Isr. iv. 335 n.; comp. Grimm, 2 Macc. iv. 38).

B. F. W.

ANDRONICUS (Ἀνδρόνικος; Andronicus), a Christian at Rome, saluted by St. Paul (Rom. xvi. 7), together with Junias. The two are called by him his relations (συγγενείς) and fellow-captives, and of note among the apostles, using that term probably in the wider sense; and he describes them as having been converted to Christ before himself. According to Hippolytus he was bishop of Panomia; according to Dorotheus, of Spain. H. A.

* Luke, as the companion of Paul's life for so many years, could hardly fail to have met with Andronicus and Junias (rather than Junia) in his travels, and, according to his habit (Luke i. 1), could have learnt much from them as personal witnesses, concerning the earlier events of Christianity, before Paul himself had been brought into the ranks of Christ's followers. As regards the mechanics, they had removed to the neighboring Capernaum from Bethsaida, their original home (John i. 44). H.

* The sense may be (as Meyer, Philippff, De Wette, Stuart, prefer) that the two were so famous (Σάββατος as to have become well known among the apostles. It is uncertain when or where they shared Paul's episcopacy.

H.
ANEM

(though illustrated) of the early Christians for obtaining and diffusing such knowledge among themselves, see Tholuck's striking remarks in his Gläubenbildung
des geschehn. Gesch., p. 140 ff.]

H. ANEM (אנה [see fountain]): תור אנה
(Alex. Aquæ [Anem]), a city of Issachar, with
suburbs,” belonging to the Gerzounites, 1 Chr.

ANGAREU'O (Ἀγαρεύω: Angaríco, Vulg.,
Matt. v. 41, Mark xv. 21), simply translated "compel
in the A. V., is a word of Persian, or
rather of Tatar, origin, signifying to compel to
serve as an Áγγελος or mounted courier. The
words anérkevi or anérkevi, in Tatar, mean compulsory
work without pay. Herodotus (viii. 98) describes
the system of the áγγελος. He says that
the Persians, in order to make all haste in
carrying messages, have relays of men and horses
stationed at intervals, who hand the despatch from
one to another without interruption either from
weather or darkness, in the same way as the Greeks
in their λαοσιοιρια. This horse-post of the
Persians called Áγγελος. In order to effect the
object, license was given to the couriers by the gov-
ernment to press to the service men, horses, and
even themselves. Hence the word is meant to signify
"press," and áγγελος is explained by Suidas
διονουσια και αγεωσια δολεια, and áγγελουσια,
vii. φυτισσον ἀγγελεια. Persian supremacy
introduced the practice and the name into Pales-
rine; and Lightfoot says the Talmudists used to
call any oppressive service áγγελος. Among
the proposals made by Demetrius Soter to Jonathan
the high-priest, one was μη áγγελουσια αυτων
του τουδειαν ṣοπρυγια. The system was also adopted
by the Romans, and thus the word "angario"
came into use in later Latin. Many alludes to
the practice, "destinationem tabellarii diplomatis ad-
juvam." Sir J. Chardin and other travellers make
mention of it. The áγγελος were also called áσ-
edo[. (Liddell and Scott, and Stephens; ana

W. P.

ANGELS (אנה [אנה]: αἱ ἄγγελοι; often with
the addition of נון, or נון, in later
books the word נון א聲音, is used as an
equivalent term). By the word "angels" (i. e.
"messengers" of God) we ordinarily understand a
race of spiritual beings, of a nature excited far
above that of man, although infinitely removed
from that of God, whose office is to do Him ser-
vice in heaven, and by His appointment to suc-
cess and defend men on earth." The object of
the present article is threefold: 1st, to refer to any
other Scriptural uses of this and similar words;
2ndly, to notice the revelations of the nature of
these spiritual beings given in Scripture; and 3rdly,
that, as derived from the same source a brief
description of their office toward man. It is to be noticed
that its scope is purely Biblical, and that, in
sequence, it does not enter into any extra-Scriptu-
ral speculations on this mysterious subject.

I. In the first place, there are many passages
in which the expression the "angel of God," or
the angel Jehovah," is certainly used for a mani-
festation of God himself. This is especially the
case in the earlier books of the Old Testament, and
may be seen at once, by a comparison of Gen. xxvii.
11, and of Ex. iii. 2 with 6, and 14; where
He, who is called the "angel of God" in one verse,
is called "God," and even "Jehovah" in those which follow,
and accepts the worship due to God alone.
(Contrast Rev. xix. 10, xxi. 9.) See also Gen. xvi.
7, 13, xxxi. 11, 13, xlviii. 15, 16; Nums. xxii.
22, 32, 33, and comp. Is. xlvii. 9 with xxiv. 11, 12.
It is to be observed also, that, side by side with
these expressions, we read God's being manifested
in the form of ange: as to Abraham at Mamre
(Gen. xviii. 2, 22 comp. xix. 1), to Jacob at Peniel
(Gen. xxiv. 24, 30), to Joshua at Gilgal (Josh. v.
13, 15), &c. It is hardly to be doubted, that both
sets of passages refer to the same kind of mani-
festation of the Divine Presence.

This being the case, we know that "no
man hath seen God" (the Father) "at any time," and
that "the only-begotten Son, which is in the
bosom of the Father, He hath revealed Him"
(John i. 18), the inevitable inference is that by
the "Angel of the Lord" in such passages is meant
He, who is from the beginning the "Word," i. e.
the Manifestor or Reveler of God. These appear-
ances are evidently "foreshadowings of the incarna-
tion." By these (that is) God the Son mani-
fested Himself from time to time in that human
nature, which He united to the Godhead forever
in the Virgin's womb.

This conclusion is corroborated by the fact, that
the phrases used as equivalent to the word "angels"
in Scripture, viz. the "sons of God," or even in
poetry, the "gods" (Elohim), the "holy ones,"
&c., are names, which in their full and proper
sense are applicable only to the Lord Jesus Christ.
As he is "the Son of God," so also is He the "Angel."
or "messenger" of the Lord. Accordingly it is to His incarnation that all angelic ministration is distinctly referred, as to a central truth, by which alone its nature and meaning can be understood. (see John i. 14; comparing it with Gen. xxviii. 11-17, not especially v. 13.)

Besides this, which is the highest application of the word "angel," we find the phrase used of any messengers of God, such as the prophets (Is. xiii. 19; Hag. i. 13; Mal. iii. 1), the priests (Mal. ii. 7), and the rulers of the Christian churches (Rev. i. 20) ; much as, even more remarkably, the word "Elohim" is applied, in Is. xxxiii. 6, to those who judge in God's name.

The more rare use of the word are not only interesting in themselves, but will serve to throw light on the nature and the method of the ministration of those whom we more especially term "the angels."

11. In passing on to what is revealed in Scripture as to the angelic nature, we are led at once to notice, that the Bible deals with this and with kindred subjects exclusively in their practical bearings, only so far (that is) as they conduce to our knowledge of God and of ourselves, and more particularly as they are connected with the one great subject of all Scripture, the Incarnation of the Son of God. Little therefore is said of the nature of angels as distinct from their office.

They are termed "spirits" (as e. g. in Heb. i. 14), although this word is applied more commonly, not so much to themselves, as to their power dwelling in man (as e. g. I Sam. xviii. 10; Matt. viii. 26, &c., &c.). The word is the same as that used of the soul of man, when separate from the body (as e. g. Matt. xiv. 26; Luke xxiv. 37, 39; i Pet. iii. 19); but, since it properly expresses only that superhuman and rational element of man's nature, which is in him the image of God (see John iv. 24), and by which he has communion with God (Rom. viii. 16); and since also we are told that there is a "spiritual body," as well as a "natural body," (I Cor. xv. 44), it does not assert that the angelic nature is incorporeal. The contrary seems expressly implied by the words in which our Lord declares that, after the Resurrection, men shall be "like the angels" (αιδεφανατοι) (Luke xx. 36); because (as is elsewhere said, Phil. iii. 21) their bodies, as well as their spirits, shall have been made entirely like His. It may also be noticed that the glorious appearance ascribed to the angels in Scripture (as in Dan. x. 6) is the same as that which showed out in our Lord's transfiguration, and in which St. John saw Him clothed in heaven (Rev. i. 14-16); and moreover, that, whenever angels have been made manifest to man, it has always been in human form (as e. g. in Gen. xviii., xix.; Luke xxiv. 4; Acts i. 10, &c., &c.). The very fact that the titles "sons of God" (Job. i. 6, xxviii. 7; Dan. iii. 25)] comp. with 280) and "gods" (Ps. viii. 4; xxvi. 7) are applied to them, are also given to them (see Luke iii. 28; Ps. lxixii. 6, and comp. our Lord's application of this last passage in John x. 34-37), points in the same way to a difference only of degree, and an identity of kind, between the human and the angelic nature.

The angels therefore revealed to us as beings,

such as man might be and will be when, the power of sin and death is removed, partaking in their measure of the attributes of God, — Truth, Purity, and Love, — because always beholding His face (Matt. xviii. 10), and therefore being "made like Him in nature" (1 John iii. 2). This, of course, implies finiteness, and therefore (in the strict sense) an imperfection of nature, and constant progress, both moral and intellectual, through all eternity. Such imperfection, contrasted with the infinity of God, is expressly ascribed to them in Job iv. 18; Matt. xxiv. 36; i Pet. i. 12; and it is this which emphatically points them out to us as creatures, follow-servants of man, and therefore incapable of usurping the excellencies of God. This finiteness of nature implies capacity of temptation (see Butler's Apology, part i. ch. 5); and accordingly we hear of "fallen angels." Of the nature of their temptation and the circumstances of their fall, we know absolutely nothing. All that is certain, is that they "left their first estate" (την προκαταλημμαν) and that they are now "angels of the devil" (Matt. xxv. 41; Rev. xi. 7, 9), partaking therefore of the falsehood, unchasteness, and hatred which are his peculiar characteristics (John viii. 44). All that can be conjectured must be based on the analogy of man's own temptation and fall.

On the other hand, the title especially assigned to the angels of God, that of the "holy ones" (see e. g. Dan. iv. 13, 24, viii. 13; Matt. xxv. 31), is precisely the one which is given to those men who are renewed in Christ's image, but which belongs to them in actuality and in perfection only hereafter. (comp. Heb. ii. 10, v. 9, xii. 23.) Its use evidently implies that the angelic probation is over, and their crown of glory won.

Thus much, then, is revealed of the angelic nature as may make it to us an ideal of human goodness (Matt. vi. 10), or beacon of warning as to the tendency of sin. It is obvious to remark, that in such revelation is found a partial satisfaction of that craving for the knowledge of creatures, higher than ourselves and yet fellow-servants with us of God, which in its diseased form becomes Polytheism. Its full satisfaction is to be sought in the Incarnation alone, and it is to be noticed, that after the Revelation of God in the flesh, the angelic ministrations recorded are indeed fewer, but the references to the angels are far more frequent — as though the danger of idolatry being: laid, conversely speaking, passed away.

III. The most important subject, and that on which we have the fullest revelation, is the office of the angels.

Of their office in heaven, we have, of course, only vague prophetic glances (as in I K. xxii. 19; 15. iv. 1-3; Dan. viii. 10; Rev. xiv. 11, &c.), which show us nothing but a never-ceasing adoration, proceeding from the vision of God, through the "perfect love, which casteth out fear."

Their office towards man is far more fully described to us. They are represented as being, in the widest sense, agents of God's Providence, natural and supernatural, to the body and to the soul. Thus the operations of nature are spoken of as hastous to the conclusion that the belief in angels is a mere consequence of this craving, never (it would seem) so entering into the analogy of God's providence as to suppose it possible that this inward craving should correspond to some outward reality.
under angelic guidance fulfilling the will of God. Not only is this the case in poetical passages, such as Ps. iv. 4 (commented upon in Heb. i. 7), where the powers of air and fire are referred to them, but in the simplest prose history, as where the postilions which slew the first-born (Ex. xii. 25; Heb. xi. 29), the disobedient people in the wilderness of Egypt (1 Cor. x. 10), the Israelites in the days of David (2 Sam. xxiv. 10; 1 Chr. xxi. 16), and the army of Sennacherib (2 K. x. 35), as also the plague which cut off Herod (Acts xii. 23) are plainly spoken of as the work of the "Angel of the Lord." Nor can the mysterious declarations of the Apocalypse, by far the most numerous of all, be resolved by honest interpretation into mere poetical imagery. (See especially Rev. viii. and ix.) It is evident that angelic agency, like that of man, does not exclude the action of secondary, or (what are called) "natural" causes, or interfere with the directness and universality of the Providence of God. The personifications of poetry and legends of mythology are obscure witnesses of its truth, which, however, can rest only on the revelations of Scripture itself.

More particularly, however, angels are spoken of as ministers of what is commonly called the "supernatural," or perhaps more correctly, the "spiritual" Providence of God; as agents in the great scheme of the spiritual redemption and sanctification of man, of which the Bible is the record. The representations of them are different in different books of Scripture, in the Old Testament and in the New; but the reasons of the differences are to be found in the differences of scope attributable to the books themselves. Different parts of God's Providence are brought out, so also arise different views of His angelic ministers.

In the Book of Job, which deals with "Natural Religion," they are spoken of but vaguely, as surrounding God's throne above, and rejoicing in the completion of His creative work (Job i. 6, li. 1, xxxviii. 7). No direct and visible appearance to man is even hinted at.

In the New Testament, there is no notice of angelic appearance till the call of Abraham. Then, as the book is the history of the chosen family, so the angels mingle with and watch over its family life, entertained by Abraham and by Lot (Gen. xlvii., xlix.), guiding Abraham's servant to Padan-Aram (xxiv. 7, 40), seen by the fugitive Jacob at Bethel (xxvii. 12), and welcoming his return at Mahanaim (xxxii. 1). Their ministry hallows domestic life, in its trials and its blessings alike, and is closer, more familiar, and less awful than in after times. (Contrast Gen. xlviii. with Judg. vi. 21, 22, xiii. 16, 22.)

In the subsequent history, that of a chosen nation, the angels are represented more as ministers of wrath and mercy, messengers of a King, rather than common children of the One Father. It is, moreover, to be observed, that the records of their appearance belong especially to two periods, that of the Judges and that of the Captivity, which were transition periods in Israelitish history, the former one destitute of direct revelation or prophetic guidance, the latter one of special trial and unusual contact with heathenism. During the lives of Moses and Joshua there is no record of the appearance of created angels, and only obscure reference to angels at all. In the book of Judges angels appear at once to rebuke idolatry (li. 1-4), to call Gideon (vi. 11, &c.), and consecrate Samson (xiii. 3, &c.) to the work of deliverance.

The office of prophet begins with Samuel, and immediately angelic guidance is withheld, except when needed by the prophets themselves (1 K. xix. 5; 2 K. vi. 17). During the prophetical and kingly period, angels are spoken of only (as noticed above) as ministers of God in the operations of nature. But in the captivity, when the Jews were in the presence of foreign nations, each claiming its tutelary deity, then to the prophets Daniel and Zechariah angels are revealed in a fresh light, as watching, not only over Jerusalem, but also over heathen kingdoms, under the Providence, and to work out the designs of the Lord. (See Zech. passim, and Dan. iv. 13, 23, x. 10, 13, 20, 21, &c.) In the whole period, they, as truly as the prophets and kings themselves, are seen as God's ministers, watching over the national life of the subjects of the Great King.

The Incarnation marks a new epoch of angelic ministration. "The Angel of Jehovah," the Lord of all created angels, having now descended from heaven to earth, it was natural that His servants should continue to do Him service there. Whether to predict and glorify His birth itself (Matt. i. 20; Luke i. 26) to minister to Him after His temptation and agony (Matt. iv. 11; Luke xxii. 43), or to declare His resurrection and triumphant ascension (Matt. xxviii. 2: John xx. 12; Acts i. 10, 11)—they seem now to be indeed "ascending and descending on the Son of Man," almost as though transferring to earth the administrations of heaven. It is clearly seen, that whatever was done by them for men in earlier days, was but typical of and flowing from their service to Him. (See Ps. cxl. 11, comp. Matt. iv. 6.)

The New Testament is the history of the Church of Christ, every member of which is united to Him. Accordingly, angels are revealed now as "ministering spirits" to each individual member of Christ for his spiritual guidance and aid (Heb. i. 14). The records of their visible appearance are but infrequent (Acts v. 19, viii. 26, x. 3, xii. 7, xxvii. 23): but their presence and their aid are referred to familiarly, almost as things of course, ever after the Incarnation. They are spoken of as watching over Christ's little ones (Matt. xvii. 19), as rejoicing over a penitent sinner (Luke x. 19), as present in the worship of Christians (1 Cor. xi. 10), and (perhaps) bringing their prayers before God (Rev. viii. 3, 4), and as bearing the souls of the redeemed into Paradise (Luke xvi. 22). In one word, they are Christ's ministers of grace now, as they shall be of judgment hereafter (Matt. xxii. 39, 41, 49, xvi. 27, xxiv. 31, &c.). By what method they act we cannot know of ourselves, nor are we told, perhaps lest we should worship them, instead of Him, whose servants they are (see Col. i. 18; Rev. xii. 7); but of course their agency, like that of human ministers, depends for its efficacy on the aid of the Holy Spirit.

Such is the action of God's angels on earth, as disclosed to us in the various stages of Revelation:

\[\text{\textsuperscript{a}}\] The notion of special guardian angels, watching over individuals, is consistent with this passage, but not necessarily deduced from it. The belief of it among the early Christians is shown by Acts xii. 15.

\[\text{\textsuperscript{b}}\] The difficulty of the passage has led to its being questioned, but the wording of the original and the usage of the N. T. seem almost decisive on the point.
that of the evil angels may be better spoken of elsewhere [Satan]: here it is enough to say that it is the direct opposite of their true original office, but permitted under God's overruling providence to go until the judgment day.

That there are degrees of the angelic nature, fallen and unfallen, and special titles and agencies belonging to each, is clearly declared by St. Paul (Eph. i. 21; Rom. viii. 38), but what their general nature is, it is needless for us to know, and therefore useless to speculate. For what little is known of this special nature see Ceruchim, Nebaphim, Michael, Gabriel.

ANISE

1859, i. 236 ff.; Hengstenberg's Christology, i. 153 ff. (Keith's trans.); Noyes, G. B. in the Chris. Examiner for May and July 1856, xx. 207-240, 320-342 (in opposition to Hengstenberg); Kurtz, Der Engel des Herrn, in Tholuck's Anzeiger, 1846, Nos. 11-14, reproduced essentially in his Gesch. des Alten Bundes, i. 144-159; Trip, C. J., Die Theophanien in der Gesch. des J. T., Leiden, 1858, a prize essay.

On the literature of the whole subject, one may consult Bretschneider, System. Entwicklung, n. s. 4e Aufl., 1841, §§ 81, 82, and Grässle's Bibliotheca magica et pseudo-magica, Leipzig, 1843.

A. and H.

ANGLING. [Fishing]

ANJAM [זַנַי] [sighting of the people]

A'rai\v: [Var. A\rami\v: A\rima]. A Manasses, son of Shemdi\v (1 Chr. vii. 19).

A. W. W.

A'IM [םָנָי] [fountain]. A'irim: [Comp. A\rim]; A\rim], a city in the mountains of Judah, named with Eslemoth (Es-Sumeib) and Goshen (Josh. xv. 50). Eusebius and Jerome (Onom. Ap\rim, A\rim) mention a place of this name in Baroma, 9 miles south of Hebron (comp. also Anor, s. v. Amb).

* Anir is a contraction for w\rim, and might be the plural form of a\irim (which see); but the fact that Anir was "toward the east of Edom, southward" (Josh. xv. 31, 32) while Anir was in the mountain district (Josh. xv. 38, 50) indicates that they were different places. Dr. Wilson insists on the difference, and would identify Anir with the present Sheinâw (which though singular in Arabic may by a frequent permutation stand for a Hebrew plural) near Awb and Semâ'. and therefore in the territory of Judah (Wilson's Lands of the Bible, i. 334). Dr. Robinson adopts this suggestion in the second edition of his Bibl. Res. (ii. 204), though he had previously declared himself for the other view. See also Rammer, Pakistan, p. 171 (1th s. c. H.

ANISE [アンイス]. This word occurs only in Matt. xi. 23, "Woe unto you, scribes and Pharisees, hypocrites! for ye pay tithe of mint and anise and cummin." It is by no means a matter of certainty whether the anise (Pimpinella anisum, Lin.), or the dill (Anethum graveolens) is here intended, though the probability is certainly more in favor of the latter plant. Both the dill and the anise belong to the natural order Umbelliferae, and are much alike in external character; the seeds of both, moreover, are and have long been employed in medicine and cookery, as condiments and carminatives. Celsius (Herbd. i. 494, ft) quotes several passages from ancient writers to show that the dill was commonly so used. Pliny uses the term anisma, to express the Pimpinella anisum, and anisum to represent the common dill. He enumerates as many as sixty-one remedies [diseases?] that the anise is able to cure, and says that on this account it is sometimes called anisurn, a. The best anise he adds, comes from Crete; and next to that of Egypt is preferred (Plin. H. N. xx. 17). Forskål (Descript. Plant. p. 154) includes the anise (Yuminâ, Arabic) in the Materia Medica

\]
ANKLET

Dr. Royle is decidedly in favor of the dill being the proper translation, and says that the anisum is more especially a genus of Eastern cultivation than the other plant. The strongest argument in favor of the dill, is the fact that the Talmud (Toset. Moasevet, c. iv. § 5) use the word shabith to express the dill, "The seeds, the leaves, and the stem of dill are, according to Rabbi Eliezer, subject to tithe;" and in connection with this it should be stated, that Forskål several times alludes to the Anisum graveolens as growing both in a cultivated and a wild state in Egypt, and he uses the Arabic name for this plant, which is identical with the Hebrew word, namely, Sjexbet, or Sicklet (Descr. Plant. 65, 109).

Celsius remarks upon the difference of opinion amongst the old authors who have noticed this plant, some maintaining that it has an agreeable taste and odor, others quite the opposite; the solution of the difficulty is clearly that the matter is simply one of opinion.

There is another plant very dissimilar in external character to the two named above, the leaves and capsules of which are powerfully carminative. This is the aniseed-tree (Illicium anisatum), which belongs to the natural order Magnoliferae. In China this is frequently used for seasoning dishes, &c.; but the species of this genus are not natives of the Bible lands, and must not be confused with the umbelliferous plants noticed in this article.

W. H.

Pimpinella Anisum.

ANKLET (περισκελίδες, πέδαι περισφύρων, Chem. Alex.). This word only occurs in Is. iii. 18, τόποις (and as a proper name, Josh. xiii. 16); unless such ornaments are included in τόποις, Nam. xxxi. 50, which word etymologically would mean rather an anklet than a bracelet. Indeed, the same word is used in Is. iii. 20 (without the Aleph prothetic for the "stepping-chains worn by Oriental women, fastened to the ankle-band of each leg, so that they were forced to walk elegantly with short steps" (Gesen. s. v.). They were as common as bracelets and armbands, and made of much the same materials; the pleasant jingling and tinkling which they made as they knocked against each other, was no doubt one of the reasons why they were admired (Is. iii. 16, 18, "the bravery of their tinkling ornaments "). To increase this pleasant sound pebbles were sometimes enclosed in them (Calmet, s. v. Pergisellis and Bells). The Arabic name "khalkhal" seems to be onomatopoean, and Lane (Mod. Egyp. App. A.) quotes from a song, in allusion to the pleasure caused by their sound, "the ringing of thin anklets has deprived me of reason." Hence Mohammed forbade them in public, "let them not make a noise with their feet, that their ornaments which they hide may [thereby] be discovered" (Koran, xxiv. 31, quoted by Lane). No doubt Tertullian disconntenances them for similar reasons: "Nescio an cruss de periscelio in terram se patiatur aratari. . . . Pedes domi figite et plus quam in auro placebunt" (De cult. femin. ii 13).

They were sometimes of great value. Lane speaks of them (although they are getting uncommon) as "made of solid gold or silver" (Mod.

a Dill, so called from the old Norse word, the nurse's lullaby, to ditl = to soothe. Hence the name of the carminative plant, the dilling or soothing herb (see Wedg. Dict. Engl. Bymal.).

ANNA

Egypt. l. c.) but he says that the poorer village children wear them of iron. For their use among the ancient Egyptians see Wilkinson, iii. 374, and among the ancient Greeks and Romans, Dict. of Ant. art. "Pericles." They do not, we believe, occur in the Nineveh sculptures.

Livy's passage of the favorite wife of an African chief, "she wore a profusion of iron rings on her ankles, to which were attached little pieces of sheet iron to enable her to make a tinkling as she walked in her mincing African style." On the weight and inconvenience of the copper rings worn by the chiefs themselves, and the odd walk it causes them to adopt, see ib. p. 276. F. W. F.

AN'NA (Ἀννας [grace or prayer]: Ἀννος: Anna). The name occurs in the picture as the sister of Lidia. 1. The mother of Samuel (1 Sam. i. 2 ff.). [HANNAY].

2. The wife of Tobit (Tob. i. 9 ff.).

3. The wife of Raphail (Tob. vii. 2 ff.).

AN'NAS (Ἀννας; [Vat. Όνας; Amb. Ὄνας;] Anna), 1 Esdr. v. 23. [SENAXA].

AN'NAS (Ἀννας, in Josephus ᾽Αννας), a Jewish high-priest. He was son of one Sethi, and was appointed high-priest in his 37th year (1. v. 7), after the battle of Capharnum, by Ptolemy the governor of Syria (Joseph. Ant. viii. 2, § 1): but was obliged to give way to Isaael, son of Phabi, by Valerius Gratus, procurator of Judaea, at the beginning of the reign of Tiberius, A. D. 14 (ib. xviii. 2, § 2). But soon Isaael was succeeded by Eleazar, son of Annas; then followed, after one year, Simon, son of Canithias, and then, after another year (about A. D. 25), by Joseph Caiaphas, son-in-law of Annas (John xvii. 13; Joseph. l. c.). He remained till the passage, A. D. 37, and is mentioned in Luke iii. 2, as officiating high-priest, but after Annas, who seems to have retained the title, and somewhat also of the power of that office. Our Lord's first hearing (John xviii. 13) was before Annas, who then sent him bound to Caiaphas. In Acts iv. 6, he is plainly called the high-priest, and Caiaphas merely named with others of his family. It is no easy matter to give an account of the seemingly capricious appointments of this title. Wiener supposes that Annas retained it from his former enfeoffment of the office: but to this idea St. Luke's expressions seem opposed, in which he clearly appears as hearing the high-priest's dignity at the time then present in each case. Wieseler, in his Chronol. and more recently in an article in Herzog's Recht-Woehrbuch, maintains that the two, Annas and Caiaphas, were together at the head of the Jewish people, the latter as actual high-priest, the former as president of the Sanhedrin.

It is to be observed that this latter supposes Caiaphas to have been the second prefect of the Sanhedrin. Some again suppose that Annas held the office of ἀριστεύς, or sub-priest, of the high-priest; maintained by the later LXX. transcribers. He lived to old age, having had five sons high-priests (Joseph. Ant. xx. 9, § 1).

AN'ONT (Ἀοντ; φίασ: ἀντόν). Anointing in Holy Scripture is either (1.) Material, with oil (Oil), or (2.) Spiritual, with the Holy Ghost.

I. MATERIAL.—1. Ordinary. Anointing the body or head with oil was a common practice with the Jews, as with other Oriental nations (Deut. xxxviii. 40; Ruth iii. 3; Mic. vi. 15). Abstinence from it was a sign of mourning (2 Sam. xiv. 2; 1 Kin. xvii. 18). Anointing the head with oil byointing seems also to have been a mark of respect sometimes paid by a host to his guests (Luke xi. 46 and Ps. xxxiii. 5), and was the ancient Egyptian custom at least. Observe, however, that in Ps. xcviii. the Hebrew is הָנָי, "thou hast made fat;" LXX. Ἀονταῖον, ἀναπαύειν; and in Luke vii. Ἀαντίανος is used as it is in the similar passages (John xii. 2, xiii. 3).

The word anoint (Ἀονταῖον) also occurs in the sense of preparing a body with spices and unguents for burial (Mark xvi. 1. Also xiv. 8, μαρμαρόν). From the custom of discontinuing the use of oil in times of sorrow or disaster, to be anointed with oil comes to signify metaphorically, to be in the enjoyment of success or prosperity (Ps. xxii. 10; comp. Ezek. ix. 2).

2. Official. Anointing with oil was a rite of inauguration into each of the three typical offices of the Jewish commonwealth, whose tenants, as anointed, were types of the Anointed One (Ἱησοῦς Χριστός).

(a.) Prophets were occasionally anointed to their office (1 K. xix. 16), and are called messiahs, or anointed (1 Chr. xxii. 22; Ps. cv. 15).

(b.) Priests, at the first institution of the Levitical priesthood, were all anointed to their offices, the sons of Aaron as well as Aaron himself (Ex. xl.; Num. iii. 3); but afterwards anointing seems not to have been repeated at the consecration of ordinary priests, but to have been especially reserved for the high-priest (Ex. xxix. 29; Lev. xvi. 32); so that "the priest that is anointed" (Lev. iv. 3) is generally thought to mean the high-priest, and is rendered by the LXX. ὁ ἄρχων τῶν ἀσκεσάσσων (Ἠσαβεῖας ὁ ἀντίαινος).

See also vv. 5, 16, and c. v. 22 (vi. 15, Heb.). (c.) Kings. The Jews were familiar with the idea of making a king by anointing, before the establishment of their own monarchy (Judg. ix. 8, 15). Anointing was the principal and divinely-appointed ceremony in the inauguration of their own kings (1 Sam. ix. 16, x. 1; 1 K. i. 31, 39); indeed, so preeminently did it belong to the kingly office, that "the Lord's anointed" was a common designation of the theocratic king (1 Sam. xii. 3, 5; 2 Sam. i. 14, 16).

The rite was sometimes performed more than once (David was thrice anointed to be king: first, privately by Samuel, before the death of Saul, by way of conferring on him a right to the throne (1 Sam. xvi. 13); again over Judah at Hebron (2 Sam. ii. 4), and finally over the whole nation (2 Sam. v. 3). After the separation into two kingdoms, the kings both of Judah and of Israel seem still
to have been anointed (2 K. ix. 3, xi. 12). So
ate as the time of the Captivity the king is called
the anointed of the Lord" (Ps. lxxiii. 38, 51; 
Lam. iv. 20). Some persons, however, think that,
after David, subsequent kings were not anointed
except as, in the cases of Solomon, Jond, and John,
the right of succession was disputed or transferred
(Jahn, Archzol. Bibl. § 223). Besides
Jewish kings, we read that Hazael was to be
anointed king over Syria (1 K. xix. 15). Cyrus
also is called the Lord's anointed, as having been
raised by God to the throne for the special purpose
of delivering the Jews out of captivity (Is. xiv. 1).
(d) Inanimate objects also were anointed with oil in
token of their being set apart for religious service.
Thus Jacob anointed a pillar at Bethel (Gen. xxxii.
13); and at the introduction of the Mosaic econ-
omy, the tabernacle and all its furniture were con-
secrated by anointing (Ex. xxx. 29—30). The
expression "anoint the shield" (Is. xxi. 5) (translat.
atum), LXX.; arripite clypeum, Vulg.) refers to the custom of rubbing oil into the
hilt, which, stretched upon a frame, formed the
shield, in order to make it supple and fit for use.
3. Ecclesiastical. Anointing with oil in the
name of the Lord is prescribed by St. James to be
used together with prayer, by the elders of the
church, for the recovery of the sick (Gk6vites; (James v. 14). Analogous to this is the anointing
with oil practiced by the twelve (Mark vi. 13), and
our Lord's anointing the eyes of a blind man
with clay made from salvia, in restoring him mira-
ously to sight (vte;tev, John ii. 6, 11).
II. Spiritual. — 1. In the O. T. a Deliever is
promised under the title of Messick, or Anointed
(Ps. ii. 2; Dan. ix. 25, 26); and the nature of his
anointing is described to be spiritual, with the Holy
Ghost (Is. li. 1; see Luke iv. 18). As anointing
with oil betokened prosperity, and produced a cheer-
ful aspect (Ps. civ. 15), so this spiritual anointing
is figuratively described as anointing, with the oil
of gladness" (Ps. xiv. 7; Heb. i. 9). In the N. T.
Jesus of Nazareth is shown to be the Messiah, or
Christ, or Anointed of the Old Testament (John
i. 41; Acts ix. 22, xviii. 2, 3, xviii. 5, 28); and
the historical fact of his being anointed with the
Holy Ghost is recorded and asserted (John i. 32,
33; Acts iv. 27, x. 38). 2. Spiritual anointing
with the Holy Ghost is conferred also upon Chris-
tians by God (2 Cor. i. 21), and they are described as
having an unction (yiepax) from the Holy Oup,
by which they know all things (1 John ii. 29, 27).
To anoint the eyes with eye-salve is used figurative-
ly to denote the process of obtaining spiritual per-
ception (Rev. viii. 18).
T. T. P.
A'NOS (A'nos: Jouns), 1 Esdr. ix. 34.
[VAEXLAX].

ANT (Mixndh, neudynth: myruph, formica). This insect is mentioned twice in the O. T.; in
Prov. vi. 6, "Go to the ant, thou sluggard con-
sider her ways and be wise;" in Prov. xxx. 25.
"The ants are a people not strong, yet they pre-
pare their meat in the summer." In the former
of these passages the diligence of this insect is
instanced by the wise man as an example worthy of
imitation; in the second passage the ant's winter
is especially alluded to, for these insects, "though
they be little on earth, are exceeding wise." It is
good to think that the ancient Greeks and Ro-
nans believed that the ant stored up food, which it
collected in the summer, ready for the winter's con-
sumption. Bochart (Hieroz. iii. 478) has cited
numerous passages from Greek and Latin writers,
as well as from Arabian naturalists and Jewish
rabbis, in support of this opinion. Such wisdom
was this little insect believed to possess, that, in
order to prevent the corn which it had stored from
germinating, it took care to bite off the head of
each grain; accordingly some have sought for the
derivation of the Hebrew word for ant, neudynth," in
this supposed fact. Nor is the belief in the
ant's biting off the head of the grains unsupported
by some ancient writers. Addison, in the Essays
divine (No. i. 167), inserts the following letter of
"of undoubted credit and authority," which was first
published by the French Academy: "The corn
which is laid up by ants would shoot under
ground if these insects did not take care to prevent
it. They therefore bite off all the grains before
they lay it up, and therefore the corn that has lain
in their cells will produce nothing. Any one may
make the experiment, and even see that there is no
germ in their corn." N. Plucho, too (Vivtum
Mayj. i. 125), says of these insects, "Their next
passion is to amass a store of corn or other grain
that will keep, and lest the humidity of the cells
should make the corn shoot up, we are told for a
certainty that they guaw off the buds which grow
at the point of the grain."
It is difficult to see how this opinion originated,
for it is entirely without foundation. Equally
erroneous appear to be the notions that the ant provident foresight in laying up a store of
corn for the winter's use; b though it is an easy
matter to trace it to its source. No recorded species
of ant is known to store up food of any kind for
provision in the cold seasons, and certainly not
grains of corn, which ants do not use for food.
The European species of ants are all dormant in
the winter, and consequently require no food; and
although it is well still to bear in mind the careful
language of the authors of Introduction to Ento-
ology (li. 46), who say, "all the manners of exotic

Of the anıno, abissines (Simon, Lex. Heb. ed.
Winer). The derivation of the word is uncertain.
(a) Ovid, "Abisius" is inclined to derive it from the Arabic Arab. verb sensis, is consedent, proc. procreato, arborum, Vulg. (N. Jol.
Arab. Lex. s. v. V. conj. "moti inter esse permista
formicarum repentiam more." First says, "For
Latinus putus diminutum est n. ἀνί, unde ἀνίνην f.
οὐκ ἄνίνην, sicut ὁ κιντις, ad bestiolam pulsum signifi-
cationem factum esse potest." Cf. Michels, Sop. Lex.
Heb. 1914, and Rosenmüll. not. ad Bochart, iii. 480.
(b) If not probable that the name nενδίνθης (from ἀνί

"To cut") was given to the ant from its extreme ten-
acity at the junction of the thorax and abdomen? If
the term insertus is applicable to any one living creature
more than to another, it certainly is to the ant. N. Mueller
is the exact equivalent to insertus. [Since the above
was written it has been found that Parkhurst—s. v.
[529](r. v.)—gives a similar derivation.]
ants are more accurately explored, it would be rash to affirm that no ants have magazines of provisions; for although during the cold of our winters in this country they remain in a state of torpidity, and have no need of food, yet in warmer regions during the rainy seasons, when they are probably confined to their nests, a store of provisions may be necessary for them; — yet the observations of modern naturalists who have paid considerable attention to this disputed point, seem almost conclusive that ants do not lay up food for future consumption. It is true that Col. Sykes has a paper, vol. ii. of Transactions of Entomol. Soc., p. 103, on a species of Indian ant which he calls *Attla provisoria,* so called from the fact of his having found a large store of grass-seeds in its nest; but the amount of that gentleman's observations merely goes to show that this ant carries seeds underground, and brings them again to the surface after they have got wet during the monsoons, apparently to dry. “There is not,” writes Mr. F. Smith, the author of the Catalogue of the Formicidae in the British Museum, in a letter to the author of this article, “any evidence of the seeds having been stored for food;” he observes, Catalogue of Formicidae (1858), p. 180, that the processionary ant of Brazil (*Ectatomma cephalotes*) carries immense quantities of portions of leaves beneath its underground nest, and that it was supposed that these leaves were for food; but that Mr. Bates quite satisfied himself that the leaves were for the purpose of lining the channels of the nest, and not for food. Ants are carnivorous in their habits of living, and although they are fond of saccharine matter, there is no evidence at all to prove that any portion of plants ever forms an article of their diet. The fact is, that ants seem to delight in running away with almost any thing they find, — small portions of sticks, leaves, little stones,—as any one can testify who has cared to watch the habits of this insect. This will explain the erroneous opinion which the ancients held with respect to that part of the economy of the ant now under consideration: nor is it, we think, necessary to conclude that the error originated in observers mistaking the cocoons for grains of corn, to which they bear much resemblance. It is scarcely credible that Aristotle, Virgil, Horace, &c., who all speak of this insect storing its *unguis of corn,* should have been so far misled, or have been such bad observers, as to have taken the cocoons for grains. Ants do carry off grains of corn, just as they carry off other things — not, however, as was stated, for food, but for their nests. “They are great robbers,” says Mr. Thomson (Land and Book, p. 537), “and plunder by night as well as by day; and the farmers must keep a sharp eye for his track, or they will abstract a large quantity of grain in a single night.”

It is right to state that a well-known entomologist, the Rev. F. W. Hope, in a paper “On some doubts respecting the economy of Ants” (Trans. Entom. Soc., ii. 211), is of opinion that Col. Sykes’s observations do tend to show that there are species of exotic ants which store up food for winter consumption, but it must be remembered that Mr. Bates’s investigations are subsequent to the publication of that paper.

A further point in the examination of this subject remains to be considered, which is this: Does Scripture assert that any species of ant stores up food for future use? It cannot, we think, be maintained that the words of Solomon, in the only two passages where mention of this insect is made, necessarily teach this doctrine: but at the same time it must be allowed, that the language used, and more especially the context of the passage in Prov. xx. 25, do seem to imply that such an opinion was held with respect to the economy of this insect.

“There are four things which are little upon the earth, but they are exceeding wise: the ants are a people not strong, yet they prepare their meat in the summer.” In what particular, it may be asked, are these insects so especially noted for their wisdom, unless some allusion is made to their supposed provident foresight in preparing their meat in the summer? If the expression here used merely has reference to the fact that ants are able to provide themselves with food, how is their wisdom herein more excellent than the countless host of other minute insects whose natural instinct prompts them to do the same? If this question is fairly weighed in connection with the acknowledged fact, that from very early times the ancients attributed storing habits to the ant, it will appear at least probable that the language of Solomon implies a similar belief; and if such was the general opinion, is it a matter of surprise that the wise man should select the ant as an instance wherein he might ground a lesson of prudence and forethought?

The teaching of the Bible is accommodated to the knowledge and opinions of those to whom its language is addressed, and the observations of naturalists, which, as far as they go, do certainly tend to disprove the assertion that ants store up food for future use, are no more an argument against the truth of the Word of God than are the ascertained laws of astronomical science, or the facts in the mysteries of life which the anatomist or physiologist has revealed.

The Arubians held the wisdom of the ant in such estimation, that they used to place one of these insects in the hands of a newly-born infant, repeating these words, “May he turn out clever and skillful.” Hence in Arabic, the noun *mukki, “an ant,” is connected the adjective *numil,* “quick,” “clever” (Bochart, Hier. lib. 494). The Talmudists, too, attributed great wisdom to this insect. It was, say they, from beholding the wonderful ways of the ant that the following expression originated: “Thy justice, O God, reaches to the heavens” (Challa, 61b). Ants live together in societies, having “no guide, overseer, or ruler.” See Latrille’s *Histoire Naturelle des Fourmis,* Paris, 1802; Huber’s *Traite des Mants des F. Ind.;* T urban, Brit. 7th ed. art. “Ant;” Kirby and Spence, *Intro. to Entom.* Ants belong to the family Formicidae, and order Hymenoptera. There is not in the British Museum a single specimen of an ant from Palestine. W. H.

**ANTICHRIST.** (Greek, *apokatastasis.* The word Antichrist is used by St. John in his first and second Epistles, and by him alone. Elsewhere it does not occur in Scripture. Nevertheless, by an ant, which had become wet. See instances in *Bo* chart, iii 490.

*Our English word ant appears to be an abbreviation of the form ennuit (Sax. ennorn).*
The Antichrist 

The first teaching with regard to the Antichrist and to the antagonist of God (whether these are the same or different we leave as yet uncertain) was oral. "Ye have heard that the Antichrist cometh," says St. John (1 Ep. ii. 18); and again, "This is that spirit of Antichrist wherewith ye have heard that it should come" (1 Ep. iv. 3). Similarly St. Paul, "Remember ye not, that when I was yet with you I told you these things" (2 Thess. ii. 5)? We must not therefore look for a full statement of the "doctrine of the Antichrist" in the Apostolic Epistles, but rather for allusions to something already known. The whole of the teaching of St. John's Epistle with regard to the Antichrist himself seems to be confined to the words twice repeated, "Ye have heard that the Antichrist shall come." The verb ἐφερταί here employed has a special reference, as used in Scripture, to the first and second advents of our Lord. Those whom St. John was addressing had been taught that, as Christ was to come (ἐφερταί), so the Antichrist was to come likewise. The rest of the passage in St. John appears to be rather a practical application of the doctrine of the Antichrist than a formal statement of it. He warns his readers that the spirit of the Antichrist could exist even then, though the coming of the Antichrist himself was future, and that, therefore, the Messianic and the Messiahship of Jesus were Antichrists, as being types of the final Antichrist who was to come. The teaching of St. John's Epistles therefore amounts to this, that in type, Cerinthus, Basilides, Simon Magus, and those Gnostics who denied Christ's Sonship, and all subsequent heretics who should deny it, were Antichrists, as being wanting in that divine principle of love which with him is the essence of Christianity; and he points on to the final appearance of the Antichrist that was "to come" in the last times, according as they had been orally taught, who would be the antitype of these his forerunners and servants.

The Adversary of God of St. Paul's Epistles. — St. Paul does not employ the term Antichrist, but there can be no hesitation in identifying his Adversary (ὁ ἀντικείμενος) of God with the "Antichrist" whom he describes as "to come." He refers to his oral teaching on the subject, but as the Thessalonians appeared to have forgotten it, and to have been misled by some passages in his previous Epistle to them, he recapitulates what he had taught them. Like St. John, he tells them that the spirit of Antichrist or Antichristianism, called by him "the mystery of iniquity," was already working; but Antichrist himself he characterizes as "the Man of Sin," "the Son of Perdition," "the Adversary to all that is called God," "the one who lifts himself above all objects of worship;" and assures them that he should not be revealed in person until some present obstacle to his appearance should have been taken away, and until the predicted ἀνοσία should have occurred.

From St. John and St. Paul together we learn (1) that the Antichrist should come; (2) that he should not come until a certain obstacle to his coming was removed; (3) nor till the time of, or rather till after the time of the ἀνοσία; (4) that his characteristics would be (a) open opposition to God and religion, (b) a claim to the incommunicable attributes of God, (γ) impiety, sin, and lawlessness, (δ) a power of working lying mir-
The Antichrist

This passage is universally acknowledged to be primarily applicable to Antichrist Epiphanes. Antiochus Epiphanes is recognized as the chief prototype of the Antichrist. The prophecy may therefore be regarded as descriptive of the Antichrist. The point is clearly argued by St. Jerome:—

"Down to this point (Dan. xiii.) the historical order is preserved, and there is no difference between Orpah and our own interpreters. But all that follows down to the end of the book he applies personally to Antichrist Epiphanes, brother of Seleucus, and son of Antiochus the Great; for, after Seleucus, he reigned eleven years in Syria, and possessed Judaea; and in his reign there occurred the persecution about the Law of God, and the wars of the Maccabees. But our people consider all these things to be spoken of Antichrist, who is to come in the last time. ... It is the custom of Holy Scripture to anticipate in types the reality of things to come. For in the same way our Lord and Saviour is spoken of in the 72d Psalm, which is entitled a Psalm of Solomon, and yet all that is there said cannot be applied to Solomon. But in part, and as in a shadow and image of the truth, these things are foretold of Solomon, to be more perfectly fulfilled in our Lord and Saviour. As, then, in Solomon and other saints the Saviour has types of His coming, so Antichrist is rightly believed to have for his type that wicked king Antiochus, who persecuted the saints and defiled the Temple." (S. Hiero. Op. tom. i. p. 523. Col. Afr. 1670; tom. iii. p. 1127. Paris, 1704.

The Little Horn of Daniel.—The Horns are being dealt with a person, not a kingdom or a polity. This is evident from St. John's words, and still more evident from the Epistle to the Thessalonians. The words used by St. Paul could not well have been more emphatic, had he studiously made use of them in order to exclude the idea of a polity.

"The Man of Sin," the Son of Perdition, the one who opposeth himself to God, the one who exalteth himself above all that is called God, the wicked one who was to come with Satanic power and lying wonders:—it words have a meaning, these words designate an individual. But when we come to Daniel's prophecy of the Little Horn this is all changed. We there read of four beasts, which are explained as four kings, by which expression is meant four kingdoms or empires. These kingdoms represented by the four beasts but undoubtedly the Asiatic empire, the Persian empire, the Grecian empire, and the Roman empire. The Roman Empire is described as breaking up into ten kingdoms, amongst which there grows up another kingdom which gets the mastery over nearly a third of them (three out of ten). This kingdom, or polity, is the little horn of the fourth beast, before which three of the first ten horns are plucked up. If thereby four "kings" (vii. 24) are monarchies or nationalities, then the other "king" who rises after them is, in manner, as an individual but a polity. It follows that the Little Horn of Daniel cannot be identified with the Antichrist of St. John and St. Paul. The former is a polity, the latter an individual.

VI. The Apocalyptic Beast of St. John.—A further conclusion follows. For the Apocalyptic Beast is clearly identical with the Little Horn of Daniel. The Beast whose power is absorbed into the Little Horn has ten horns (Dan. vii. 7) and rises from the sea (Dan. vii. 2): the Apocalyptic Beast has ten horns (Rev. xiii. 1) and rises from the sea (Rev. xiii. 1). The Little Horn has a mouth speaking great things (Dan. vii. 8, 11, 20): the Apocalyptic Beast has a mouth speaking great things (Rev. xiii. 5). The Little Horn makes war against the saints, and overcomes them (Rev. xiii. 7). The Little Horn speaks great words against the Most High (Dan. vii. 25): the Apocalyptic Beast opens his mouth in blasphemy against God (Rev. xvi. 6). The Little Horn wears out the saints of the Most High (Dan. vii. 25): the woman who rides on, etc. directs, the Apocalyptic Beast, is drunken with the blood of the saints (Rev. xvi. 6). The persecution of the Little Horn is to last a time and times and a dividing of times, etc. three and a half times (Dan. vii. 25): power is given to the Apocalyptic Beast for forty-two months, etc. three and a half times (Rev. xiii. 5). These and other parallels cannot be accidental. Whatever was meant by Daniel's Little Horn must be also meant by St. John's Beast. Therefore St. John's Beast is not the Antichrist. It is not an individual like the Antichrist of St. John's and St. Paul's Epistles, but a polity like the Little Horn of Daniel.

But, though not identical, it is quite evident, and it has been always recognized, that the Antichrist of the Epistles and the Beast of the Apocalypse have some relation to each other. What is this relation? and in what relation to both does the second Apocalyptic Beast or False Prophet stand? To answer this question we must examine the imagery of the Apocalypse. Shortly stated, it is, so far as concerns our present purpose, as follows. The church is represented (Rev. xix.) as a woman bringing forth children to Christ, persecuted by Satan, and compelled to fly from him into the wilderness, where she remains for 1260 days, or three and a half times, Satan, being unable to destroy the woman, will set up his own kingdom, and her seed (xii. 17). At this time the Beast arises from the sea, and Satan gives to him his power, and his seat, and great authority. The length of time during which the Beast prevails is three and a half times, the same period as that during which the sufferings of the woman last. During a certain part of this three and a half times the Beast takes upon itself, as its guide and rider, a harlot, or woman, it is expressly said, "that great city which reigneth over the kings of the earth" (Rev. xviii. 18) from her seven hills (xviii. 9). After a time Babylon the harlot-rider falls (ch. xviii.), but the Beast on whom she had ridden still survives, and is finally destroyed at the glorious coming of Christ (xix. 20).

Can we harmonize this picture with the prediction of Daniel, always assuming that his Man of Sin is an individual, and that the Apocalyptic Beast is a polity?

As we have here reached that which constitutes the great difficulty in mastering the conception of the Antichrist as revealed by the inspired writers we shall now turn from the text of Scripture to the...
The commentaries and essays of the ancient church fathers were written to provide guidance and interpretation of the scriptures. They were known as church authorities and played a crucial role in the development of Christian doctrine. These writings were used to explain and elucidate passages of the New Testament, often providing historical context and theological insights.

The Antichrist, as described in the New Testament, is a figure who will arise in the end times to challenge Christ's authority. This understanding is based on the belief that certain historical figures and events foreshadow the rise of the Antichrist. For example, the Roman Emperor Domitian is sometimes identified with this figure.

The Antichrist is also associated with the Beast, who is described in the Book of Revelation as a figure of power and control. The Antichrist will be a powerful ruler who will exert his authority over the earth, using his power to deceive and seduce people away from the true faith.

The Antichrist is depicted as a figure of evil, who will seek to undermine the work of God and bring about the downfall of the true kingdom. He is described as a false prophet, a lying devil, and a person who will deceive the world.

The Antichrist is closely associated with the number 666, which is often used as a code name for him. This number is seen as a symbol of evil and persecution.

The Antichrist is also associated with the mark of the beast, which is a sign of obedience to the Antichrist. Those who refuse to take the mark will be marked for death.

The Antichrist is described as a figure who will be present during the time of revelation, and his arrival is anticipated by many Christians as a sign of the end times. The Antichrist is seen as a test of faith, and those who remain faithful to Christ will be rewarded with eternal life.

The Antichrist is also associated with various symbols and places. For example, he is often depicted as a dragon, a beast, or a false prophet. He is also associated with Jerusalem, Rome, and Babylon, representing the worldly powers that oppose Christ.

The Antichrist is a figure of great interest and debate among Christians, and his description in the New Testament has been the subject of much interpretation and speculation. The Antichrist is seen as a symbol of the ongoing struggle between good and evil, and the ultimate victory of Christ over the forces of darkness.
ANTICHRIST

at Babylon, saying that he will be instructed in the Magian philosophy, and that his doctrine and miracles will be a parody of those of the Lamb. The received opinion of the twelfth century is brought before us in a striking and dramatic manner at the interview between King Richard I. and the Pope. The very prospect of an Antichrist has not been very edifying to the Holy Land. "I thought," said the king, "that Antichrist would be born in Antioch or in Babylon, and of the tribe of Dan; and would reign in the temple of the Lord in Jerusalem; and would walk in that land in which Christ walked; and would reign in it for three years and a half; and would dispute against Elijah and Enoch, and would kill them; and would afterwards die; and that after his death God would give sixty days of repentance, in which those might repent which should have erred from the way of truth, and have been seduced by the preaching of Antichrist and his false prophets." This seems to have been the view defended by the archbishops of Rouen and Auxerre and by the bishop of Bayonne, who were present at the interview; but it was not Joachim's opinion. He maintained the seven heads of the beast to be Cephas, Peter; Constantius, Maximianus; Melsemut, Shadrach; Malshad, who were post; Saladin, who was then living; and Antichrist, who was shortly to come, being already born in the city of Rome, and about to be elevated to the Apostolic See (Roger de Veneden in Richard I., anno 1190). In his own work on the Apocalypse Joachim speaks of the second Apocalyptic beast as being governed by "some great prophet who will be like Simon Mago, and as it were universal pontiff throughout the world, and be very Antichrist of whom St. Paul speaks." These are very noticeble words. Gregory I. had long since (A. D. 590) declared that any man who held even the shadow of the power which the popes of Rome soon after his time arrogated to themselves, would be the precursor of Antichrist. Annullin bishop of Orleans (or perhaps Gerbert), in an invective against John XV. at the Council of Rheims, A. D. 1051, had declared that if the Roman pontiff was destitute of charity and parted up with knowledge, he was Antichrist — it destitute both of charity and of knowledge, that he was a base stone (Mansi, tom. ix. p. 132; Ven. 1774); but Joachim is the first to suggest, not that such and such a pontiff was Antichrist, but that the Antichrist would be a Univers der Pontific, and that he would occupy the Apostolic See. Still, however, we have no hint of an order or succession of men being the Antichrist. It is an actual, living, individual man that Joachim contemplates.

The master had said that a Pope would be the Antichrist; his followers began to whisper that it was the Pope. Ambrose, professor of logic and theology at Paris at the end of the 12th century, appears to have been the first to have put forth the idea. It was taken up by three different classes; by the moralists, who were scandalized at the laxity of the Papal Court; by the imperialists, in their temporal struggle with the Papacy; and, perhaps independently, by the Waldenses and their followers in their spiritual struggle. Of the first class we

may find examples in the Franciscan enthusiasm, Peter John of Olivi, Telephorus, Ubertinus, and John of Paris, who saw a mystic Antichrist at Rome, and looked forward to a real Antichrist in the future; and again in such men as Grossete whom we find asking, as in despair, whether the name of Antichrist has not been earned by the Pope (Matt. Par. in Jo. 1253, p. 875, 1640). Of the second class we may take Becket archbishop of Salzburg as a specimen, who denounces Hildebrand as "having, in the name of religion," laid the foundation of the kingdom of Antichrist 1700 years before his time." He can even name the ten horns. They are the "Turks, Greeks, Egyptians, Africans, Spaniards, French, English, Germans, Sicilians, and Italians, who now occupy the provinces of Rome; and a little horn has grown up with eyes and mouth, speaking great things, which is reducing three of these kingdoms — i. e., Sicily, Italy, and Germany — to subserviency, is persecuting the people of Christ and the saints of God with intolerable opposition, is contounding things human and divine, and attempting things unutterable, execrable (Joachims, Annales, 1251, p. 1740)."

2. The Waldenses also at first regarded the Antichrist as an individual. The "Noble Lesson," written in the 12th century, teaches the expectation of a future and personal Antichrist; but the Waldensian treatise of Antichrist in the 14th century identifies Antichrist, Babylon, the Fourth Beast, the Harlot, and the Man of Sin, with the system of Papery. Wieland and Hussites held the same language. Lord Cobham declared at his trial that the Pope was Antichrist's head (Bedle's Works, p. 38; Cambidge, 1849). Walter Brute, brought before the Bishop's Court at Hereford at the close of the 14th century, pronounced the Antichrist to be the "high bishop of Rome calling himself God's servant and Christ's chief vicar in this world," (Foxe, iii. 151, Lond. 1841). Thus we reach the Reformation. Walter Brute (A. D. 1839), Bulilnger (1844), Chytrius (1571), Aetius (1573), Foxe (1566), Napier (1569), More (1632), Jurieu (1685), Bp. Newton (1756), Cunningham (1814), Faber, (1814), Woodhouse (1828), Harsen (1845), identify the False Prophet, or Second Apocalyptic Beast, with Antichrist and with the Papacy; Marbot (A. D. 1774), King James I. (1603), Banning (1729), Galloway (1802), the First Apocalyptic Beast; Brightman (A. D. 1809), Pareus (1615), Vitringa (1675), Gill (1776), Bachman (1778), Frerer (1753), Croy (1828), Fryt (1837), Elliot (1811), both the Beasts. That the Pope and his system are Antichrist, was

Car, segent l'escritura, son ara als molt Anticrist; Car Anicrist son fuit aquell que contrarest a Xrist."

— La Noma Lerzen, liv. 457. See Raymond's Choix des plus utiles et des plus estimables ecrits de Paul litteraire, tom. ii, to vol. iii. of Elliot's Historie Apocalyptique, Lond. 1846; Haliian's Int. Europe, i 28 (note), Lond. 1855.
Antichrist

Antichrist

taught by Luther, Calvin, Zwingli, Melancthon, Bucer, Beza, Calixtus, Bengel, Michaelis, and by almost all Protestant writers on the Continent. Nor was the notion of Antichrist, as a power of the Papal theologians to seize the same weapon of offense. Bp. Bale (A.D. 1491), like Luther, Bucer, and Melancthon, pronounces the Pope in Europe and Mohammed in Africa to be Antichrist. The Pope is Antichrist, say Cranmer (Works, vol. ii. p. 46, Camb. 1814), Latimer (Works, vol. i. p. 149, Camb. 1844), Ridley (Works, p. 53, Camb. 1841), Hooper (Works, vol. ii. p. 44, Camb. 1852), Hurrington (Comm., Camb. 1844), Cunliffe (Works, vol. i. p. 147, Camb. 1848), Sands (Works, p. 11, Camb. 1841), Philpot (Works, p. 152, Camb. 1842), Jewell (Works, vol. i. p. 109, Camb. 1845), Rogers (Works, p. 182, Camb. 1854), Fuller (Works, vol. ii. p. 299, Camb. 1848), Bradford (Works, p. 435, Camb. 1848). Nor is the opinion confined to these 16th century divines, who may be supposed to have been specially increased against Popery. King James held it (Apoc. pro Juv. Nol. London, 1600), as strongly as Queen Elizabeth (see Jewell, Letter to Bulling, May 22, 1559, Zerach Letters, First Series, p. 33, Camb. 1842); and the theologians of the 17th century did not repudiate it, though they less and less dwelt upon it as their struggle came to be with Puritanism in place of Popery. Bp. Andrews maintains it as a probable conclusion from the Epistle to the Thessalonians (Resp. ad Delta, p. 304, Oxon. 1851); but he carefully explains that King James, whom he was defending, had expressed his private opinion, not the belief of the Church, on the subject (ibid. p. 23). Brannahh introduces limitations and distinctions (Works, iii. 520, Oxif. 1845); significantly suggests that there are marks of Antichrist which apply to the General Assembly of the Kirk of Scotland as much as to the Pope or to the Turk (ib. iii. 257); and declines to make the Church of England responsible for what individual preachers or writers had said on the subject in moments of exasperation (ib. ii. 582). From this time forward the Papal-Antichristian theory is not to be found in any theologians of name in the English Church, nor indeed in the sixteenth century does it seem to have taken root in England. Hard names were bandied about, and the hardest of all being Antichrist, it was not neglected. But the idea of the Pope being the Antichrist was not the idea of the English Reformation, nor was it ever applied to the Pope in his Patriarchal or Archiepiscopal, but solely in his distinctively Papal character. But the more that the sober and learned divines of the seventeenth century gave up this application of the term, the more violently it was insisted upon by men of little charity and contracted views. A string of writers followed each other in succession, who added nothing to the interpretation of prophecy, but found each the creation of his own brain in the sacred book of the Revelation, grouping history in any arbitrary manner that they chose around the central figure of the Papal Antichrist.

3. A reaction followed. Some returned to the ancient idea of a future individual Antichrist, as Iacunza or Benezra (A.D. 1810), Burgh, Samuel Maitland in his Essay on the Prophecy of Daniel (1747), No. 43), Charles Maitland (Prophetic Interpretation). Others preferred looking upon him as long past, and fixed upon one or another persecutor or heretic as the man in whom the predictions as to Antichrist found their fulfillment. There seems to be no trace of this idea for more than 1600 years in the Church. But it has been taken up by two opposite classes of expositors, by Romanists who were anxious to avert the application of the Apocalyptic prophecies from the Papacy, and by others, who were disposed, not indeed to deny the pro phetic import of the Apocalypse, but to confine the seer's ken within the closest and narrowest limits that were possible. Alcasar, a Spanish Jesuit, taking a hint from Victorinus, seems to have been the first (A.D. 1564) to have suggested that the Antichristian power did not consist further than to the overthrow of Paganism by Constantine. This view, with variations by Grothus, is taken up and expanded by Bossuet, Calmet, De Saey, Eichhorn, Hug, Herder, Ewald, Moses Stuart, Davidson. The general view of the school is that the Apocalypse describes the triumph of Christianity over Judaism in the first, and over Heathenism in the third century. Mariana sees Antichrist in Nero; Bossuet in Dacia and in Julian; Grothus in Caligula; Wetstein in Titus; Hammond in Simon Magnus (Works, vol. iii. p. 629, Lond. 1631); Whitby in the Jews (Comm. vol. ii. p. 431, Lond. 1760); Le Clerc in Simon, son of Giora, a leader of the rebel Jews; Schützgen in the Pharisees; Nüssel and Krause in the Jewish zealots; Harduin in the High Priest Ananiah; F. D. Maurice in Vellinus (On the Apocalypse, Camb. 1890).

4. The same spirit that reunites regard Satan as an individual, naturally looks upon the Antichrist as an evil principle not embodied either in a person or in a polity. Thug Koppe, Storey, Nitschel. (See Alford, Gr. Test. iii. 69.) We do not gain much by a review of the opinions of the commentators. In the case of prophecy, partially at least unfilled, little is to be expected. Of the four opinions which we have exhibited, the last is in accordance neither with St. Paul nor St. John, for St. Paul describes the Asbyerd as being distinctly a man; St. John speaks of the coming of Antichrist in terms similar to those used for the coming of Christ, and describes Antichristianism as τοῦ οὗτου οὐακρίστου, thereby showing that Anti christianism is Antichristianism because it is the spirit of the concrete Antichrist. The third opinion is plausibly refuted by the fact that the persons fixed upon as the Antichrist have severally passed away, but Christ's glorious presence, which is immediately to succeed the Antichrist, has not yet been vouchsafed. The majority of those who maintain the second opinion are shown to be in the wrong because they represent as a polity what St. Paul distinctly describes as a man. The majority of those who hold the first opinion are in like manner shown to be in the wrong, because they represent as an individual what the Apocalypse demonstrably pictures as a polity. We are unable to follow any one interpreter or any one school of interpreters. The opinions of the two last schools, we are able to see, are wholly false. The two first appear to contain the truth between them, but so divided as to be untrue in the mouth of almost any individual expositor who has entered into details. We return to Scripture.

St. Paul says that there are two things which are to remain unaffected by the Apocalypse, the συμπαλαιστήριον and the revelation of the Asbyerd, and he does not say that these two things are contemporary. On the contrary, though he does not directly express it, he implies that there was to be a succession
of events. First, it would seem, an unnamed and to us unknown obstacle has to be removed; then was to follow the "Apostasy;" after this, the Adversary was to arise, and then to come his destruction. We need hardly say that the word "apostasy," as ordinarily used, does not give the exact meaning of ἀπόστασις. The Λ. V. has no notion of qualifying the original by "falling away," having only failed of entire exactness by omitting to give the value of the article.a An open and unblushing denial and rejection of all belief, which is implied in our "apostasy," is not implied in ἀπόστασις. It means one of two things: (1) Political defection (Gen. xiv. 4; 2 Chr. xiii. 6; Acts v. 37); (2) Religious defection (Acts xxii. 21; 1 Tim. iv. 1; Heb. iii. 12). The first is the common classical use of the word. The second is more usual in the N. T. Cyril of Jerusalem seems to understand the word rightly when he says in reference to this passage: Νυν εἰς ἑν τῇ ἀπόστασις ἀπστάσατε γὰρ ἐν ἑωρᾷ τῆς ὁρίσθ πιστεῖς . . . ἀπστάσατε γὰρ ἐν ἑωρᾷ πρὸ ἀπὸ τῆς ἁλθείας . . . Αὐτή τοις εἰς τὴν ἀπόστασιν καὶ μελέτα προσδοκίας ἀπὸ ἔχοντο (St. Cyril. Catech. xv. 9, Ῡμα. p. 228, Paris 1720). And St. Ambrose: "A certain religious people has errore descensum" (Cassiod. in loc. xx. 20). This "falling away" implies persons who fall away, the ἀπόστασις consists of ἀπόστασα. Supposing the existence of an organized religious body, some of whom should fall away from the true faith, the persons so falling away would be ἀπόστασα, though still formally unsealed from the religious body to which they belonged, and the religious body itself, while from one side and in respect to its faithful members it would retain its character and name as a religious body, might yet from another side and in respect to its other members be designated an ἀπόστασις. It is such a corrupted religious body as this that St. Paul seems to mean by the ἀποστασία which he foretells in the Epistle to the Thessalonians. In the Epistles to Timothy he describes this religious defection by some of its peculiar characteristics. These are, seducing spirits, doctrines of demons, hypocrisy lying, a secret contempt for science, a forbidding of marriage and of meats, a form of godliness without the power thereof (1 Tim. iv. 1; 2 Tim. iii. 5). It has been usual, as we have seen, to identify the Beast of the Apocalypse with St. Paul's Man of Sin. It is impossible, as we have said, to do so. But it is possible, and more than possible, to identify the Beast and the ἀποστασία. Can we find any thing which will serve as the antitype of both? In order to be the antitype of St. John's Beast it must be a polity, arising, not immediately, but shortly, after the dissolution of the Roman Empire, gaining great influence in the world, and getting the mastery over a certain number of those nationalities which like itself grew out of that empire (Dan. vii. 24). It must last three and a half times, i. e., nearly twice as long as the empire of Assyria, or Persia, or Grecia, to which only two times seem to be allotted (Dan. vii. 12). It must blaspheme against God, i. e., it must arrogate to itself or claim for creatures the honor due to God alone. It must be an object of wonder and worship to the world (Rev. xiii. 6). It must put forward orishing chains in behalf of itself, and be full of its own perfections (Rev. xiii. 5). At a certain period in his history it must put itself under the guidance of Rome (Rev. xvi. 3), and remain hidden by her until the destruction of the latter (Rev. xviii. 2); its own existence being still prolonged until the coming of Christ in glory (Rev. xix. 9). To satisfy the requirements of St. Paul's description, its essential features must be a falling away from the true faith (2 Thess. ii. 3; 1 Tim. iv. 1), and it must be further characterized by the specific qualities already transcribed from the Epistles to Timothy.

The antitype may be found in the corrupted Church of Christ, in so far as it was corrupted. The same body, in so far as it maintained the faith and love, was the bride and the spouse, and, in so far as it "fell away" from God, was the ἀποστασία just as Jerusalem of old was at once Sion the beloved city and Sedam the bloody city — the Church of God and the Synagogue of Satan. According to this view, the three and a half times of the Beast's continuance (Rev. xiii. 5) and of the Beast's suffering in the wilderness (Rev. xii. 6) would necessarily be conterminous, for the persecuted and the persecutors would be the faithful and the unfaithful members of the same body. These times would have commenced when the Church lapsed from her purity and from her first love into unfaithfulness to God, exhibited especially in idolatry and creature-worship. It is of the nature of a religious detection to grow up by degrees. We should not therefore be able to lay the finger on any special moment at which it commenced. St. Cyril of Jerusalem considered that it was already existing in his time. "Nunc," he says, "is the ἀποστασία, for men have fallen away (ἀπετασύνην) from the right faith. This then is the ἀποστασία, and we must begin to look out for the enemy; already he has begun to send his legions, and the hour of his might may be ready for him at his coming." (Catech. xv. 9). It was at the Second Council of Nice that the Church formally committed itself for the first time (A. D. 787) by the voice of a General Council to base doctrine and idolatrous practice. The after acquiescence in the Hildebrandine theory of the Papal supremacy would be typified by the Beast taking the woman who represents the seven-headed city on its back as its guide and director. From the twelfth to the sixteenth century, and partially to the present day, this Hildebrandine idea has reigned over and has been the governing spirit of the Corrupted Church. The fall of Babylon, i. e., of Rome, would be as yet future, as well as the still subsequent destruction of the Corrupted Church, on the day of the coming of Christ. The period of the three and a half times would continue down to the final moment that this destruction takes place.

a For the force of the article, see Bip. Midleton on τελος (τιν. τ. p. 828, Camb. 1852).

b The word "blasphemy" has come to bear a secondary meaning, which it does not bear in Scripture. Schleiermacher (in var.) rightly explains it, Dieu et paixes jugable sacre sur des secrètes. The Jews accused our Lord of blasphemy because He claimed divine power and the divine attributes (Matt. x. 32). John x. (53) There was nothing in our Lord's words which the most bitter malice could have called blasphemies in the later sense which the word has come to bear. It is of course in the Scripture, not in the modern, sense that St. John attributes blasphemy to the Beast. (See Wordsworth, On the Apocryphas, p. 528.)
The Apocalyptic False Prophet. - There is a second Apocalyptic Beast: the beast from the Earth (Rev. xii. 13), and this is described as being "first in war, and afterwards in peace (Rev. xix. 20). Can we identify this Beast either with the individual Antichrist of the Epistles or with the corrupt polity of the Apocalypse? We were compelled to regard the First Beast as a polity by its being identical with that which clearly is a polity, the Little Horn of Daniel. There is no such necessity here, and there is no reason for regarding the Second Beast as a polity, beyond the fact of its being described as being" by the polity, which a polity had been just previously described. This presumption is more than counterbalanced by the individualizing title of the False Prophet which he bears (Rev. xvi. 13, xix. 20). His characteristics are - (1) "doing great wonders, so that he maketh fire to come down from heaven on the earth in the sight of men" (Rev. xiii. 13). This power of miracle-working, we should note, is not attributed to St. John to the First Beast; but it is one of the chief signs of St. Paul's Adversary, "whose coming is with all power and signs and lying wonders" (2 Thess. ii. 9). (2) He deceived them that dwell on the earth by the means of those miracles which he had power to do in the sight of the Beast" (Rev. xiii. 14). He wrought miracles with which he deceived them that received the mark of the Beast and worshipped the image of the Beast" (Rev. xix. 20). In like manner, no special power of beguiling is attributed to the First Beast; but the Adversary is possessed of "all deceivableness of unrighteousness in them that perish because they received not the love of the truth that they might be saved" (2 Thess. ii. 10). (3) He has borne a lamb, i.e., he bears an outward resemblance to the Messiah (Rev. xiii. 11); and the Adversary sits in the temple of God showing himself that he is God (2 Thess. ii. 4). (4) His title is The False Prophet, δ Προφητής, (Rev. xvi. 13, xix. 20); and our Lord, when Antichrist counterfeits, is emphatically δ Προφητής. The ψευδοπροφηταί of Matt. xxiv. 24 are the forerunners of δ Προφητής, as John the Baptist of the True Prophet. On the whole, it would seem that if the Antichrist appears at all in the Book of the Revelation it is by this Second Beast or the False Prophet that he is represented. If this be so, the question is, whether he is an individual person who will at some future time arise, or whether he is in the belief with the Corrupted Church, represent himself as her minister and vindicator (Rev. xiii. 12), compel men by violence to pay reverence to her (xiii. 14), breathe a new life into her decaying frame by his use of the secular arm in her behalf (xiii. 15), forbidding civil rights to those who renounce her authority and reject her symbols (xiii. 17), and putting them to death by the sword (xiii. 15), while personally he is an atheistical blasphemer (1 John ii. 22) and sums up in himself the evil spirit of unbelief which has been working in the world from St. Paul's days to his (2 Thess. ii. 7). That it is possible for a professed unbeliever and atheist to make himself the champion of a corrupt system of religion, and to become on political grounds as violent a persecutor in its behalf as the most fanatical bigot could be, has been proved by events which have occurred under a similar, and to that extent again occur on a more gigantic and terrible scale. The Antichrist would thus combine the forces, generally and happily antagonistic, of infidelity and superstition. In this would consist the special horror of the reign of the Antichrist. Hence also the special sufferings of the faithful delivered until Christ's second advent again appeal to vindicate the cause of truth and liberty and religion.

The sum of Scripture teaching with regard to the Antichrist, then, appears to be as follows. Already in the times of the Apostles there was the mystery of iniquity, the spirit of Antichrist, at work. It embodied itself in various shapes — in the Gnostic heresies of St. John's days, in the Jewish impostors who preceded the fall of Jerusalem, in all heresies and unbelief, and especially in the Gnostic heresy whose heresies had a tendency to deny the incarnation of Christ, and in the great persecutors who from time to time afflicted the Church. But this Antichristian spirit was then, and is still, diffused. It had not, and it has not yet, gathered itself into one person in whom it will be one day completely and fully manifested. There was something which prevented the open manifestation of the Antichrist in the Apostles' days which they spoke of by word of mouth, but were unwilling to name in letters. What this obstacle was, or is, we cannot now know. The general opinion of the early writers and fathers is that it was the power of secular law existing in the Roman Empire. The Roman Empire fell, and upon its fall, and in consequence of its fall, there arose a secularization and corruption of the Church, which would not have been so secularized and corrupted had it been kept in check by the jealousy of the imperial power. The secularization and corruption increasing, the Church, which from one point of view and in respect to some of its members was considered as the Church of Christ, from another point of view and in respect to others of its members, came to be regarded as no better than an άποστασία. Time passing, the corrupt element, getting still more the mastery, took the Popacy on its back and gave itself up to be directed from Rome. So far we speak of the past. It would appear further that there is to be evolved from the womb of the Corrupt Church, whether after or before the fall of Rome does not appear, an individual Antichrist, who, being himself a scoffer and contemner of all religion, will yet act as the patron and defender of the Corrupt Church, and compel men to submit to her sway by the force of the secular arm and by means of bloody persecutions. He will unite the old foes superstition and unbelief in one coalition attack on liberty and religion. He will have, finally, a power of performing lying miracles and beguiling souls, being the embodiment of satanic as distinct from brutal wickedness. How long his power will last we are wholly ignorant, as the three and a half times do not refer to his reign (as is usually imagined), but to the continuance of the άποστασία. We only know that his continuance will be short. At last he will be destroyed together with the Corrupt Church, in so far as it is corrupt, at the glorious appearance of Christ, which will usher in the millennium triumph of the faithful and hitherto persecuted members of the Church.

(B) There are points which require further elucidation:

1. The meaning of the name Antichrist. Mr. Greswell argues at some length that the only correct rendering of the word is "Counterfeit Christ" or "Pro-Christ", and denies that the idea of Adversary to Christ is involved in the word. Mr. Greswell's authority is great; but he has been in this case too hasty in drawing his conclusion from the instances
which he has cited. It is true that "Antichrist" is not synonymous with καριγον, but it is impossible to resist the evidence which any Greek lexicon supplies that the word ἀντικριστον, both in composition and by itself, will bear the sense of "opponent to." It is probable that both senses are combined in the word "Antichrist." The word "Antichrist" is very exact in its resemblance, but the primary notion which it conveys would seem rather to be that of antagonism than rivalry. See Greswell, *Exposition of the Parable*, vol. i. p. 327 ff; Wordsworth, *On the Apocalypse*, p. 512.

2. The meaning of καριγον. What is that thing which withholdeth (2 Thess. ii. 6) and why is it apparently described in the following verse as a person (καριγον)? There is a remarkable unanimity among the early Christian writers on this point. They explain the obstacle, known to the Thessalonians but unknown to us, to be the Roman Empire. Thus Tertullian, *De Rame, Curra.*, c. 24, and *Apoll.*, c. 32; St. Chrysostom and Theophylact on 2 Thess. ii.; Hippolytus, *De Antichristo*, c. 49; St. Jerome on Dan. vii.; St. Augustine, *De Civ. Dei*, xx. 19; St. Cyril of Jerusalem, *Catech.* c. 35; and H. Mors's *Works*, iv. 19, p. 692; Mole, *Life, etc.*, x. viii. p. 636. Alford, *Gk. Text. iii.*, 57; Wordsworth, *On the Apocalypse*, p. 520. Theodoret and Theodore of Mopsuestia hold it to be the determination of God. Theodoret's view is embraced by Pelt: the Patriotic interpretation is accepted by Wordsworth. Elliott and Alford so far modify the Patriotic interpretation as to explain the obstacle to be the restraining power of human law (καριγον) wielded by the Empire of Rome (καριγον) which Tertullian wrote, but now by the several governments of the civilized world. The explanation of Theodoret is untenable on account of St. Paul's further words, "until he be taken out of the way," which are supplied by him to the obstacle. The modification of Elliott and Alford is necessary if we suppose the ἀντικριστον to be an ἁγιος apoastasy still future, for the Roman Empire is gone, and this apoastasy is not come nor is the Wicked One revealed. There is much to be said for the Patriotic interpretation in its plainest acceptance. How should the idea of the Roman Empire being the obstacle to the revelation of Antichrist have originated? There was nothing to lead the early Christian writers to such a belief. They regarded the Roman Empire as idolatrous and abominable, and would have been more disposed to consider it as the precursor than as the obstacle to the Wicked One. Whatever the obstacle was, St. Paul says that he told the Thessalonians what it was. Those to whom he had preached knew, and every time that his Epistle was publicly read (1 Thess. v. 27), questions would have been asked by those who did not know, and thus the revelation must have been kept up. It is very difficult to see whence the tradition could have arisen except from St. Paul's own teaching. It may be asked, Why then did he not express it in writing as well as by word of mouth? St. Jerome's answer is sufficient: "If he had openly and unreservedly said, 'Antichrist will not come unless the Roman Empire be first destroyed,' the infant Church would have been exposed in consequence of persecution" ( *ed. Alford*, q.v. xi. vol. iv. p. 289, Paris, 1860). Remington gives the same reason. Why should the obstacle for a Roman should perhaps read the Epistle, and raise a persecution against him and the other Christians, for they held that they were to rule forever in the world? (Bib. *Patr.*, Max. viii. 1018; see Wordsworth, *On the Apocalypse*, p. 343). It would appear then that the obstacle was probably the Roman Empire, and on its being taken out of the way there did occur the "falling away." Zion the beloved city became Sodom, and still Sodom, and still Sodom though Zion. According to the view given above, this would be the description of the Church in her present estate, and this will continue to be our estate, until the time, times and half time, during which the evil element is allowed to remain within her, shall have come to their end.

3. What is the *Apocalyptic Babylon*? There is not a doubt that by Babylon is figured Rome. The "seven mountains on which the woman sit[s]" (Rev. xvii. 9), and the plain declaration, "the woman which thou sawest is that great city which reigneth" (i.e. in St. John's days) "over the kings of the earth" (Rev. xvii. 18), are too strong evidence to be gainsaid. There is no commentator of note, ancient or modern, Romanist or Protestant, who does not acknowledge so much. But what is that Rome is that is thus figured? There are four possible opinions: (1) Roman Pagans; (2) Pope; (3) Rome having hereafter become infidel; (4) Rome as a type of the world. That it is old Pagan Rome is the view ably contended for by Bossuet and held in general by the *protestant* school of interpreters. That it is Rome Papal was held by the Protestants of the sixteenth century, and by those who preceded and have followed them in their line of interpretation. That it is Rome Papal having lapsed into infidelity is the view of many of the *fathers*. That it is Rome as the type of the world is suggested or maintained by Tielmanus, Primasius, Arcetas, Albert the Great, and in our own days by Dr. Arnold (On the *Interpretation of Prophecy*) and Dr. Newman ( *Treats for the Times*, No. 83). That the harlot-woman must be an unfaithful Church is argued convincingly by Wordsworth ( *On the Apocalypse*, p. 376), and no less decisively by Isaac Williams ( *The Apocalypse*, p. 365). A close consideration of the language and import of St. John's prophecy appears, as Mr. Williams says, to leave no room for doubt on this point. If this be so, the conclusion seems almost necessarily to follow that the unfaithful Church spoken of is, as Dr. Wordsworth argues, the Church of Rome. And this appears to be the case. The Babylon of the Apocalypse is probably the Church of Rome which gradually raised and seated itself on the back of the Corrupted Church — the Harlot-rider on the Beast. A very noticeable conclusion follows from hence, which has been little marked by many who have been most anxious to identify Babylon and Rome. It is, that it is impossible that the Pope or the Papal system can be Antichrist, for the Harlot who rides on the Beast and the Antichrist are wholly distinct persons; (2) Babylon is fallen and destroyed (Rev. xviii.) the Antichrist is still found (Rev. xix.). Indeed there is hardly a feature in the Papal system which is similar in its lineaments to the portrait of Antichrist as drawn by St. John, however closely it may resemble Babylon.

4. What are we to understand by the two Witnesses? The usual interpretation given of the early Church is that they are Enoch and Elijah, who are to appear in the days of Antichrist, and by him to be killed. Victorians substitute Jeremias for Enoch. Joachim would suggest Moses
and Elijah taken figuratively for some persons, or perhaps orders, actuated by their spirit. Builinger, ike, Cityteaus, Parez, Mede, Vitringa understood by them the line of Antipapal renouncers. For they used to say that their eyes were opened to the Way of the Law, that is, the New Testament. Some of these people are: Bossuet, the early Christian martyr. Herder and Eichhorn, the chief priest Ananus and Jesus slain by the Zealots; Moses Stuart, the sick and old who did not fly from Jerusalem on its capture by the Romans; Maurice, the priest Joshua and the judge Zerubbabel as representing Law and Sacrifice; Lee understands by them the Law and the Gospel; Tichonius and Bede, the two Testaments; others: the Canaanites. And we are able to say this: The time of their witnessing is 1260 days, or a time, times, and half a time. This is the same period as that during which the aorostacia and the power of the Beast continues. They would seem therefore to represent all those who in the midst of the faithless are found faithful throughout this time. Their being described as "candlesticks" would lead us to regard them perhaps as Churches. The place of their temporary death, "the great city, which spiritually is called Sodom and Egypt, where also our Lord was crucified," would appear to be Jerusalem, as typifying the Corrupted Church. The Beast that kills them is not Antichrist, but the faithless Church.

5. The Number of the Beast. Nothing whatever is known about it. No conjecture that has been made is worth mentioning on the ground of its being likely in any the least degree to approximate to the truth. The usual method of seeking the solution of the difficulty is to select the name of an individual and to count the numerical values of its constituent letters. The extravagant conclusions which have been made to result from this system have naturally brought it into disrepute, but it is certain that it was much more usual, at the time that St. John wrote, to make calculations in this manner than most persons are now aware. On this principle Mercury and Hanth was invoked under the name of 1218, Jupiter under that of 717, the Sun of 608 or XH. Mr. Elliott quotes an enigma from the Syriac verses in some way expressing the name of God, strikingly illustrative of the challenge put forth by St. John, and perhaps formed in part on its model:

Ειναι γράμματα ἵνα τετραπλασιασμὸν εἰς νοεῖν με. Αἱ τρεῖς ἀριθμοὶ δύο γράμματα ἔχουσιν ἐκατόμον, Η μονήν δὲ τὰ λοιπά καὶ εἰς ὃμοια τὰ πέντε. Τοι ποιητὸς δ' ἀριθμὸν επιστάτησε εἰς τυχόν καὶ τρεῖς τρισκέλεις. έστιν γ' εἶναι τέσσαρας, ὅνες ὁμοίως συνέχεια παρ εἰς ἐν συνεχίς.

supposed by Mr. Clarke to be θεὸς σωτήρ. The only conjecture with respect to the number of the Beast, made on this principle, which is worthy of mention is one which dates as early as the time of Irenaeus, and has held its ground down to the time of Dean Alford and Canon Wordsworth. Irenaeus suggests, though he does not adopt, the word Δαντείου. Dr. Wordsworth (1860) thinks it possible, and Dean Alford (1881) has "the strongest persuasion that no other can be found approaching so near to a complete solution." Of other names the chief favorites have been Τηταυα, Αρτουμέ (Hippolytus), Λαμπετία, Αντεύβας (Tichonius), Γεννησία (Irenaeus), Κοκοσ Οδύςας, Ἀλήθης Βαλεφρός, Παλαιος Βασιλανος, Αμένος Μοτίζιος (Arethas), Αντίπατρια, Πολυς Αλεξάντες (Bossuet); Ewald constructs "the Roman Caesar" in Hebrew, and Binyan "the Cæsar Nero" in the same language. Any one who wishes to know the many attempts that have been made to solve the difficulty — attempts seldom even relieved by ingenuity — may consult Wolfius, Calmet, Clarke, Wrangham, Thorn (Thom?). Probably the principle on which Wolfius worked is false. He must have looked for Antichrist among their toes, and have tortured the name of the person fixed upon into being of the value of 606. Hence Latins under the Roman Emperors, Mohammed at the time of the Saracenic successes, Luther at the Reformation, Bonaparte at the French Revolution. The name to be found is not that of Antichrist, but the name of the Beast, which, as we have argued, is not the name of Antichrist. The name of Antichrist is probably that of a sounder method of interpretation is adopted by Mr. Isaac Williams, Dr. Wordsworth, and Mr. Maurice. There is clearly a symmetrical meaning in the numbers used in the Apocalypse: and they would explain the three sixes as a threefold declension from the holiness and perfection symbolized by the number seven. We will add an ingenious suggestion by an anonymous writer, and will leave the subject in the same darkness in which it is probably destined to remain: "At his first appearance," he writes, "he will be hailed with acclamations and hosannas as the redeemer of Israel, another Judas Maccabees: and either from the initials of his name, or from the initial letter of some scriptural motto adopted by him, an artificial name will be formed, a cipher of his real name. And that abreviated name or cipher will be ostentatiously displayed as their badge, their watchword, their shibboleth, their 'Maccabai,' by all his adherents. This artificial name, his name, or symbol of the real name, will be equal to Gerartia to 666." (Jewish Miscellany, p. 52, 1848.)

(C.) Jewish and Mohammedan traditions respecting Antichrist. The name given by the Jews to Antichrist is (מָצָא צִידָן) Armillus. There are several Rabbinical books in which a circumstantial account is given of him, such as the "Book of Zerubbabel," and others printed at Constantinople. Buxtorf gives an abridgment of their contents in his Lexicon, under the head "Armillus," and in the fifteenth chapter of his Synagogue Judaica (p. 717). The name is derived from Isaiah xi. 4, where the Targum gives "By the word of his mouth the wicked Armillus shall be slain," or "with the breath of his lips shall he slay the wicked." There will, say the Jews, be twelve [ten] signs of the coming of the Messiah: — 1. The appearance of three apostate kings who have fallen away from the faith, but in the sight of men appear to be worshippers of the true God. 2. A terrible heat of the sun. 3. A dew of blood (Joel ii. 30). 4. A healing dew for the plagues. 5. A darkness will be cast upon the sun (Joel ii. 31) for thirty days (Isa. xxxiv. 22). 6. God will give universal power to 888, which may well be regarded as a curiosity of illustration.
the Romans for nine months, during which time the Roman chieftain will afflict the Israelites; at the end of the nine months, God will raise up the Messian Ben-Joseph, that is, the Messiah of the tribe of Joseph, named Nehemiah, who will defeat the Roman chieftain and slay him. Then there will arise another great man from the Gentiles, for Christians call Antichrist. He will be born of a marble statue in one of the churches in Rome. He will go to the Romans and will profess himself to be their Messiah and their God. At once the Romans will believe in him and accept him for their king, and will have him and cling to him. Having made the whole world subject to him, he will say to the Ishmaeans (i.e. Christians) "Bring me the law which I have given you." They will bring it with their book of laws; and he will accept it as his own, and will exhort them to persevere in their belief of him. Then he will send to Nehemiah, and command the Jewish Law to be brought him, and proof to be given from it that he is God. Nehemiah will go before him, guarded by 30,000 warriors of the tribe of Ephraim, and will read, "I am the Lord thy God: thou shalt have none other gods but me." He will say that the Lord had given (each word of the Law), and will command the Jews to confess him to be God, as the other nations had confessed him. But Nehemiah will give orders to his followers to seize and bind him. Then Armillius, in rage and fury will gather all his people in a deep valley to fight with Israel, and in that battle the Messian Ben-Joseph will fall, and the angels will bear away his body and carry him to the resting-place of the Patriarchs. Then the Jews will be cast out by all nations, and suffer afflictions such as have not been from the beginning of the world, and the residue of them will fly into the desert, and will remain there forty and five days, during which time all the 1-tradities who are not worthy to see the redemption shall die. 8. Then the great angel Michael will rise and blow three mighty blasts of a trumpet. At the first blast there shall appear the true Messiah Ben-David and the prophet Elijah, and they will manifest themselves to the Jews in the desert, and all the Jews throughout the world shall hear the sound of the trump, and those that have been carried captive into Assyria shall be gathered together; and with great gladness they shall come to Jerusalem. Then Armillius will raise a great army of Christians and lead them to Jerusalem to conquer the new king. But God shall say to Messiah, "Sit thou on my right hand," and to the Israelites, "Stand still and see what God will work for you to-day." Then God will pour down sulphur and fire from heaven (Ex. xxxxi. 22), and the impious Armillius shall die, and the impious Ishmaeans (i.e. Christians), who have destroyed the house of our God and have led us away into captivity, shall perish in misery, and the Jews shall revenge themselves upon them, as it is written, "The house of Jacob shall be a fire, and the house of Joseph a flame, and the house of Esau (i.e. the Christians) for stubble, and they shall kindle in them and devour them: there shall not be any remaining of the house of Esau, for the Lord hath spoken it" (Obad. 18.) 9. On the second blast of the trumpet the tombs shall be opened, and Messiah Ben-David shall raise Messiah Ben-Joseph from the dead. 10. The ten tribes shall be led to Paradise, and there they shall dwell for ever with Messiah. And the Messiah shall choose a bride amongst the fairest of the daughters of Israel, and children and children's children shall be born to him, and then he shall die like other men, and his sons shall reign over Israel after him, as it is written, "He shall prolong his days" (Is. lili. 10), which Ramban explains to mean "He shall live long, but he too shall die another glory, and his sons shall reign in his stead, and his sons shall ascend successors to the Sycorax Syngaphe Judaeos, p. 717, Basil. 1661 [and Eisenmenger, Ethil eltes Judaiam, ii. 608-717]). The Mohammedan traditions are an adaptation of Christian prophecy and Jewish legend without any originality or any beauty of their own. They too have their signs which are to precede the final consummation. They are divided into the greater (or messianic) and lesser signs. Of the greater signs the first is the rising of the sun from the west (cf. Matt. xxiv. 29). The next is the appearance of a Beast from the earth, sixty cubits high, bearing the staff of Moses, and the seal of Solomon, with which he will inscribe the word "Believer" on the face of the faithful, and "Unbeliever" on all who have not accepted Islamism (comp. Rev. xiii.). The third sign is the capture of Constantinople, while the spoil of which is being divided, news will come of the appearance of Antichrist (cf. Apoc. vii. 9), and every man will return to his own home. Antichrist will be blind of one eye and deaf of one ear, and will have the name of Unbeliever written on his forehead (Rev. xiii.). It is he that the Jews call Messiah Ben-David, and say that he will come in the last times and reign over sea and land, and restore to them the kingdom. He will continue forty days, one of these days being equal to a year, another to a month, another to a week, the rest being days of ordinary length. He will devastate all other places, but will not be allowed to enter Mecca and Medina, which will be guarded by angels. Lastly, he will be killed by Jesus at the gate of Lut. For when news is received of the appearance of Antichrist, Jesus will come down to earth, alighting on the white tower at the east of Damassus, and will say him, Jesus will then embrace the Mohammedan religion, marry a wife, and leave children after him, having reigned in perfect peace and security, after the death of Antichrist, for forty years. (See Poecile, Poetae Moses, p. 258, Oxon. 1655; and Sale, Koran, Preliminary Discourse.)

ANTIOCH

Eiduteiig in die Offenbarung und die apocryph. Literatur, Comm., iv., Bonn, 1832, [2d Aufl. 1852.]

F. M.

ANTIOCH (Αντίοχη). I. IN SYRIA. The capital of the Greek kings of Syria, and afterwards the residence of the Roman governors of the province which bore the same name. This metropolis was situated where the chain of Lebanon, running northwards, and the chain of Taurus, running eastwards, are brought to an abrupt meeting. Here the Orontes breaks through the mountains; and Antioch was placed at a bend of the river, partly on an island, partly on the level which forms the left bank, and partly on the steep and craggy ascent of Mount Silpius, which rose abruptly on the south. In the immediate neighborhood was Daphne, the celebrated sanctuary of Apollo (2 Macc. iv. 33); whence the city was sometimes called Antioch by Daphne, to distinguish it from other cities of the same name.

No city, after Jerusalem, is so intimately connected with the history of the apostolic church. Concerning the life of close association between these two cities, as regards the progress of Christianity, may be noticed in the first place. One of the seven deacons, or almoners appointed at Jerusalem, was Nicolas, a proselyte of Antioch (Acts vi. 5). The Christians, who were dispersed from Jerusalem at the death of Stephen, preached the gospel at Antioch (ibid. xi. 19). It was from Jerusalem that Agabus and the other prophets, who foretold the famine, came to Antioch (ibid. xi. 27, 28); and Barnabas and Saul were consequently sent on a mission of charity from the latter city to the former (ibid. xi. 30, xii. 25). It was from Jerusalem again that the Judaizers came, who disturbed the church at Antioch (ibid. xv. 1); and it was at Antioch that St. Paul rebuked St. Peter for conduct into which he had been betrayed through the influence of emissaries from Jerusalem (Gal. ii. 11, 12).

The chief interest of Antioch, however, is connected with the progress of Christianity among the heathen. Here the first Gentile church was founded (Acts xi. 20, 21); here the disciples of Jesus Christ were first called Christians (xi. 26); here St. Paul exercised so far as is distinctly recorded his first systematic ministerial work (xi. 22–26; see xiv. 28–29; also xv. 35 and xviii. 23); hence he started at the beginning of his first missionary journey (xiii. 1–5), and bifurcated his return (xx. 26). So again after the apostolic council (the decrees of which we are specially addressed to the Gentile converts at Antioch, xv. 23), he began and ended his second missionary journey at this place (xvii. 22). This too was the starting-point of the third missionary journey (xviii. 23), which was brought to a termination by the imprisonment at Jerusalem and Cesarea. Αντιοχος was never again, so far as we know, at Antioch, it did not cease to be an important centre for Christian progress; but it does not belong to this place to trace its history as a patriarchate, and its connection with Ignatius, Chrysostom, and other eminent names.

Antioch was founded in the year 309 B.C., by Seleucus Nicator, with circumstances of considerable display, which were afterwards emblazoned by fable. The situation was well chosen, both for military and commercial purposes. Jews were settled there from the first in large numbers, were governed by their own ethnarch, and allowed to have the same political privileges with the Greeks (Joseph. Ant. xii. 3, § 1; c. Ap. ii. 4). Antioch grew under the successive Seleucid kings, till it became a city of great extent and of remarkable beauty. Some of the most magnificent buildings were on the island. One feature, which seems to have been characteristic of the great Syrian cities — a vast street with colonnades, intersecting the whole from end to end — was added by Antiochus Epiphanes. Some lively notices of the Antioch of this period, and of its relation to Jewish history, are supplied by the books of Maccabees. (See especially 1 Macc. iii. 37, xi. 13; 2 Macc. iv. 7–9, v. 21, xi. 36.)

It is the Antioch of the Roman period with which we are concerned in the N. T. By Pompey it had been made a free city, and such it continued till the time of Antonius Pius. The early Emperors raised there some large and important structures, such as aqueducts, amphitheatres, and baths. Herod the Great contributed a road and a colonnade (Joseph. Ant. xvi. 5, § 3; B. J. i. 21, § 11): Here should be mentioned that the citizens of Antioch under the Empire were noted for scurrilous wit and the invention of nicknames. This perhaps was the origin of the name by which the disciples of Jesus Christ are designated, and which was now one of the foreign fields to which missionaries are sent by the churches of America.
probably given by Romans to the despised sect, and not by Christians to themselves.

The great authority for all that is known of ancient Antioch is C. O. Müller's *Antiquitates Antiochenae* (Göttingen, 1839). Modern Antakya is a shrunken and miserable place. Some of the walls, shattered by earthquakes, have a striking appearance on the crags of Mount Silpius. They are described in chestnut's account of the *Euphrates Expedition*, where also is given a view of a gateway which still bears the name of St. Paul. One error, however, should be pointed out, which has found its way into these volumes from Calmet, namely, chestnut's erroneous identification of Antioch with the Kiblah of the Old Testament.

The great authority for all that is known of ancient Antioch is C. O. Müller's *Antiquitates Antiochenae* (Göttingen, 1839). Modern Antakya is a shrunken and miserable place. One error, however, should be pointed out, which has found its way into these volumes from Calmet, namely, chestnut's erroneous identification of Antioch with the Kiblah of the Old Testament.

In the district of Phrygia called Phrye, there is a certain mountain-ridge, stretching from E. to W. On each side there is a large plain below this ridge; and it has two cities in its neighborhood: Philomelium on the north, and on the other side Antioch, called Antioch near Pisidia. The former lies entirely in the plain; the latter (which has a Roman colony) is on a height. The relations of distance also between Antioch and other towns are known by the Pentecostian table. Its site, however, has only recently been ascertained. It was formerly supposed to be Akshe, which is now known to be Philomelium on the north side of the ridge. Even Winer (1847) gives this view, the difficulties of which were seen by Leake, and previously by Mannert. Mr. Arundell, the British chaplain at Smyrna, undertook a journey in 1853 for the express purpose of identifying the Pisidian Antioch, and he was perfectly successful (Arundell's *Asi Minor*, ch. xii., xiii., xiv.). The ruins are very considerable. This discovery was fully confirmed by Mr. Hamilton *Res. in Asia Minor*, vol. i. ch. 25). Antioch corresponds to Yedebet, which is distant from Akshe six hours over the mountains.

This city, like the Syrian Antioch, was founded by Seleucus Nicato. Under the Romans it became a colonia, and was also called Cesarea, as we learn from Pliny (v. 21). The former fact is confirmed by the Latin inscriptions and other features of the coins of the place; the latter by inscriptions discovered on the spot by Mr. Hamilton.

The occasion on which St. Paul visited the city for the first time (Acts xiii. 14) was very interesting and important. His preaching in the synagogue led to the reception of the gospel by a great number of the Gentiles; and this resulted in a violent persecution on the part of the Jews, who first, using the influence of some of the wealthy female residents, drove him from Antioch to Leo.
ANTIOCHIA

The concurrence of Antiochus Epiphanes (2 Macc. iv. 30).

W. A. W.

ANTIOCHUS (Ἀντίοχος: Antiochus). Father of Numenius, one of the ambassadors from Jonathan to the Romans (1 Macc. xii. 16, xiv. 22).

W. A. W.

ANTIOCHUS II. (Ἀντίοχος, the eisbeter), king of Syria, surnamed the God (Θεός), "in the first instance by the Mileseans, because he overthrew their tyrant Timarchus" (App. Syr. 65), succeeded his father Antiochus (Σταυρίω, the Σιδερό) in B. C. 261. During the earlier part of his reign he was engaged in a fierce war with Ptolemaus Philadelphus, king of Egypt (τοις viribus dominatoribus, Hieron. ad Pol. v. xi. 6), in the course of which Parthia and Bactria revolted and became independent kingdoms. At length (B. C. 250) peace was made, and the two monarchs "joined themselves together" (Dan. xi. 6), and Ptolemy ("the king of the south") gave his daughter Berenice in marriage to Antiochus ("the king of the north") who set aside his former wife, Laodice, to receive her. After some time, on the death of Ptolemy (B. C. 247), Antiochus recalled Laodice and her children Seleucus and Antiochus to court. Thus Berenice was "not able to retain her power;" and Laodice, in jealous fear lest she might a second time lose her ascendancy, poisoned Antiochus (him "that supported her," e. Berenice), and caused Berenice and her infant son to be put to death, B. C. 246 (Dan. xi. 6; Hieron. ad Deo, l. e.; App. Syr. 65).

After the death of Antiochus, Ptolemaus Evergetes, the brother of Berenice ("out of a branch of her root"), who succeeded his father Ptol. Philadelphus, exacted vengeance for his sister's death by an invasion of Syria, in which Laodice was killed, her son Seleucus Callinus driven for a time from the throne, and the whole country plundered (Dan. xi. 7–9; Hieron. l. c.; hence his surname "the benefactor"). The hostilities thus renewed continued for many years: and on the death of Seleucus B. C. 229, after his "return into his own land" (Dan. xi. 9), his sons Alexander (Seleucus) Keraunos and Antiochus "assembled a great multitude of forces" against Ptol. Philopator the son of Evergetes, and "one of them" (Antiochus) threatened to overthrow the power of Egypt (Dan. xi. 9, 10; Hieron. l. c.).

ANTIOCHUS III, surnamed the Great (μεγας), succeeded his brother Seleucus Keraunos, who was killed in a short rebellion (July 223). He prosecuted the war against Ptol. Philopator with vigor, and at first with success. In B. C. 218 he drove the Egyptian forces to Sidon, conquered Samaria and Gilead, and wintered at Ptolemais, but was defeated next year at Ephip, near Gaza (B. C. 217), with immense loss, and in consequence made a peace with Ptolemy, in which he ceded to him the disputed provinces of Cœle- Syria, Phoenicia and Palestine (Dan. xi. 11, 12; Pol. v. 40 ff., 53 ff.). During the next thirteen years Antiochus was engaged in strengthening his position in Asia Minor, and on the frontiers of Parthia, and by his successes gained his surname of the Great. At the end of this time, B. C. 205, Ptolemaus Philopator died, and left his kingdom to his son Ptolemy, who was only five years old. Antiochus availed himself of the opportunity which was offered by the weakness of a minority and the unpopularity of the regent, to unite with Philip III. of Macedon for the purpose of conquering and dividing the Egyptian dominions. The Jews, who had been exasperated by the conduct of Ptol. Philopator both in Palestine and Egypt, openly espoused his cause, under the influence of a short-sighted policy ("the factions among thy people shall rise," i. e. against Ptolemy; Dan. xii. 14.) Antiochus succeeded in occupying the three disputed provinces, but was recalled to Asia by a war which broke out with Attalus, king of Pergamos; and his ally Philip was himself embroiled with the Romans. In consequence of this diversion Ptolemy, by the aid of Scopas, again made himself master of Jerusalem (Joseph. Ant. xiii. 3, 3) and recovered the territory which he had lost (Hieron. ad Deo, xi. 14). In B. C. 198 Antiochus reappeared in the field and gained a decisive victory "after the divisions of the Jordan" (Joseph. Ant. xiii. 3, 3; Hieron. l. c. ubi Ptolemaeus nunc condition est); and afterwards captured Scopas and the remnant of his forces who had taken refuge in Sidon (Dan. xi. 15). The Jews, who had suffered severely during the struggle (Joseph. l. c.), welcomed Antiochus as their deliverer, and "he stood in the glorious land which by his hand was to be consumed" (Dan. xi. 16). His further designs against Egypt were frustrated by the intervention of the Romans; and his daughter Cleopatra (Pol. xviii. 17), whom he gave in marriage to Ptol. Epiphanes, with the Phoenician provinces for her dowery (Joseph. Ag. xii. 4, 1), favored the interests of her husband rather than those of her father (Dan. xi. 17; Hieron. l. c.). From Egypt Antiochus turned again to Asia Minor, and after various successes in the Εγγεραν crossed over to Greece, and by the advice of Hannibal entered on a war with Rome. His victory at Thermopylae (Dan. xiii. 191), and after subsequent reverses he was finally defeated at Magnesia in Lydia, B. C. 190. By the peace which was concluded shortly afterwards (B. C. 188) he was forced to cede all his possessions "on the Roman side of

The statement in 1 Macc. viii. 6, that Antiochus was taken prisoner by the Romans, is not supported by any other testimony.
Antiochus IV.

Mt. Taurus," and to pay in successive installments an enormous sum of money to defray the expenses of the war (15,000 En Richie talents; App. Syr. 38). This last condition led to his ignominious death. In B.C. 187 he attacked a rich temple of Belus in Eleusis, and was slain by the people who rose in its defense (Strab. xvi. 744; Just. xxxii. 2). Thus "he stumbled and fell, and was not found" (Dan. xi. 18).

The policy of Antiochus towards the Jews was liberal and conciliatory. He not only assured them perfect freedom and protection in the exercise of their worship, but according to Josephus (Ant. xii. 3, 3), in consideration of their great sufferings and services in his behalf, he made splendid contributions towards the support of the temple ritual, and gave various immunities to the priests and other inhabitants of Jerusalem. At the same time imitating the example of Alexander and Seleucus, and appreciating the influence of their fidelity and unity, he transported two thousand families of Jews from Mesopotamia to Lydian and Phrygian, to repress the tendency to revolt which was manifested in those provinces (Joseph. Ant. i. c.).

Two sons of Antiochus occupied the throne after him, Seleucus Philopator, his immediate successor, and Antiochus IV., who gained the kingdom upon the assassination of his brother. B. C. W.

Antiochus IV.

Tetrarchus (Attic talent) of Antiochus III.

Obv.: Head of King, to right. Rev.: ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΝ. In field, two monograms. Apollo, naked, seated on cortina to left.

Antiochus IV. Epiphanes (Eponymus, the Illustrious, also called Niceus, and in modern Νικήτας, the Frontal; Athen. v. 429; Polyb. xxiv. 10) was the youngest son of Antiochus the Great. He was given as a hostage to the Romans (c. 158) after his father's defeat at Magnesia. In B.C. 175 he was released by the intervention of his brother Seleucus, who substituted his own son Demetrius in his place. Antiochus was at Athens when Seleucus was assassinated by Heliodorus. He took advantage of his position, and, by the assistance of Eumenes and Attalus, easily expelled Heliodorus who had usurped the crown, and himself "obtained the kingdom by flattery" (Dan. xi. 21; cf. Liv. xliii. 20), to the exclusion of his nephew Demetrius (Dan. viii. 7). The accession of Antiochus was immediately followed by desperate efforts of the Hellenizing party at Jerusalem to assert their supremacy. Jason (Josh. Ant. xii. 5, 1; see Jason), the brother of Onias III., the high priest, persuaded the king to transfer the high priesthood to him, and at the same time bought permission (2 Macc. iv. 9) to carry out his design of habituating the Jews to Greek customs (2 Macc. iv. 7, 29). Three years afterwards Menelaus, of the tribe of Benjamin (Simon), who was commissioned by Jason to carry to Antiochus the price of his office, supplanted Jason by offering the king a larger bribe, and was himself appointed high priest, while Jason was obliged to take refuge among the Ammonites (2 Macc. iv. 23-26). From these circumstances and from the marked honor with which Antiochus was received at Jerusalem very early in his reign (e. g. c. 173; 2 Macc. iv. 22), it appears that he found no difficulty in restricting the border provinces which had been given as the dower of his sister Cleopatra to Phil. Epiphanes. But his ambition led him still further, and he undertook four campaigns against Egypt, c. 171, 170, 169, 168, with greater success than had attended his predecessor, and the complete conquest of the country was prevented only by the interference of the Romans (Dan. xi. 21; 1 Macc. i. 16 ff.; 2 Macc. v. 11 ff.). The course of Antiochus was everywhere marked by the same wild profligacy as had characterized his occupation of the throne (Dan. i. c.).

The consequent exhaustion of his treasury, and the armed conflicts of the rival high priests whom he had appointed, furnished the occasion for an assault upon Jerusalem on his return from his second Egyptian campaign (c. 170), which he had probably planned in conjunction with Phil. Philometor, who was at that time in his power (Dan. xi. 26).

The temple was plundered, a terrible massacre took place, and a Syrian governor was left with Menelaus in charge of the city (2 Macc. v. 1-22; 1 Macc. i. 20-28). Two years afterwards, at the close of the fourth Egyptian expedition (Polyb. xxix. 1, 11; App. Syr. 66; cf. Dan. xi. 29, 30), Antiochus detached a force under Apollonius to occupy Jerusalem and fortify it, and at this time he availed himself of the assistance of the ancestral enemies of the Jews (1 Macc. iv. 61, v. 3 ff.; Dan. xii. 41). The decree then followed which have rendered his name infamous. The Temple was desecrated, and the observance of the law was forbidden. "On the fifteenth day of Cislen [the Syrians] set up the abomination of desolation (i. e. an idol altar: v. 39) on the altar" (1 Macc. i. 54).

Ten days afterwards an offering was made upon it by piper Olympus. At Jerusalem all opposition appears to have ceased; but Mattathias and his sons organized a resistance ("help with a little help," Dan. xi. 34), which preserved inviolate the name and faith of Israel. Meanwhile Antiochus turned his arms to the East, towards Parthia (Tae. Hist. v. 8) and Armenia (App. Syr. 45; Diad. ap. Müller, Fugioii. ii. p. 10; Dan. xii. 40). Hearing not long afterwards of the riches of a temple of Nana ("the desire of women," Dan. xii. 57) in Edom, hung with the gifts of Alexander, he resolved to plunder it. The attempt was defeated; and though he did not fall like his father in the act of sacrilege, the event hastened his death. He retired to Babylon, and thence to Tabea in Persia, where he died n. c. 164, the victim of superstition, terror, and remorse (Polyb. xxxi. 2; Joseph. Ant. xii. 8, 1 ff.), having first heard of the successes of the Maccabees in restoring the temple-worship at Jerusalem (Ant. xii. 16; 2 Macc. iv. 7, 8; cf. Dan. xii. 7, 10). "He came to his end and there was none to help him" (Dan. xii. 45). Cf. App. Syr. 45; Liv. xliii. 21-5, xliii. 6, xlv. 19, xlv. 11-13; Joseph. Ant. xii. 5, 8.

The reign of Antiochus, thus shortly traced, was the last great crisis in the history of the Jews be-
fore the coming of our Lord. The prominence which is given to it in the book of Daniel fits well with its typical and representative character (Dan. vii. 8, 25, viii. 11 ff.). The conquest of Alexander had introduced the forces of Greek thought and life into the East, which was already prepared for their operation (ALEXANDER). For more than a century and a half these forces had acted powerfully both upon the faith and upon the habits of the people; and the time was come when an outward struggle alone could decide whether Judaism was to be merged in a rationalized Paganism, or to rise not only victorious from the conflict, but more vigorous and more pure. There were many symptoms which betokened the approaching struggle. The position which Judah occupied on the borders of the conflicting empires of Syria and Egypt, exposed equally to the open miseries of war and the treacherous favors of rival sovereigns, rendered its national condition precarious from the first, though these very circumstances were favorable to the growth of freedom. The terrible crimes by which the wars of the North and South were stained, must have alienated the mind of every faithful Jew from his Hellenic lords, even if persecution had not been superadded from Egypt first and then from Syria. Politically nothing was left for the people in the reign of Antiochus but independence, or the abandonment of every prophetic hope. Nor was their social position less perilous. The influence of Greek literature, of foreign travel on extended commerce, had the Greek idea and life. At Jerusalem the mass of the inhabitants seemed to have desired to imitate the exercises of the Greeks; and a Jewish embassy attended the games of Hercules at Tyre (2 Macc. iv. 9–20). Even their religious feelings were yielding; and before the rising of the Maccabees no opposition was offered to the execution of the king's decrees. Upon the first attempt of Jason the priests had no courage to stand up for the altar" (1 Macc. i. 43); and this was not so much from willful apostasy, as from a disregard to the vital principles involved in the conflict. Thus it was necessary that the final issues of a false Heilensm should be openly seen, that it might be discarded forever by those who cherished the ancient faith of Israel.

The conduct of Antiochus was in every way suited to accomplish this end; and yet it seems to have been the result of passionate impulse rather than of any deep-sighed scheme to extirpate a strange creed. At first he imitated the liberal policy of his predecessors; and the occasion for his attacks was furnished by the Jews themselves. Even the motives by which he was finally actuated were personal, or at most only political. Aile, energetic, (Polyb. xxvii. 17) and liberal to profusion, Antiochus was reckless and unscrupulous in the execution of his plans. He had learnt at Rome to court power and to drape it. He gained an empire, and he remembered that he had been a hostage. Regardless of the gods of his fathers (Dan. xi. 37), he was incapable of appreciating the power of religion in others; and like Nero in later times, he became a type of the enemy of God, not as the Roman emperor by the perpetration of unnatural crimes, but by the disregard of every higher feeling. "He magnified himself above all." The real felty whom he recognized was the Roman war-god, and fortresses were his most sacred temples (Dan. xi. 38 ff.; Ewald, Gesch. der Volker [iv. 340]). Confronted with such a persecutor the Jew realized the spiritual power of his faith. The evils of heathendom were seen concentrated in a personal shape. The outward forms of worship became in-...
success [Alexander Balas], occupying Ascalon and Gaza, and reducing the country as far as Damascus (1 Macc. xvi. 60–2). He afterwards defeated the troops of Ptolemaeus at Hazor (1 Macc. xvi. 67) near Cadesh (v. 73); and repulsed another attempt which he made to regain Palestine (1 Macc. xii. 21 ff.). Tryphon having now gained the supreme power in the name of Antiochus, no longer concealed his design of usurping the crown. As a first step he took Jonathan by treachery and put him to death, n. c. 143 (1 Macc. xiv. 40 ff.); and afterwards murdered the young king, and ascended the throne (1 Macc. xiii. 31; Joseph. Ant. xiii. 5, 6). He, by his troops, directly or indirectly, even won Samaria down to Joppa . . . . (Diod. ap. Müller, Farg. ii. 19. Just. xxxvi. 1).

B. F. W.

ANTIOCHUS VII. SIDETES (Σώδητης). of Sidon, in Phoenicia; not from "Σόδος", a hunter; Plut. Apophth. p. 54; called also Εὐδοβίσδος, the pious, Joseph. Ant. xiii. 8, 2; Eus. Chron. Aed. i. 349), king of Syria, was the second son of Demetrius I. When his brother, Demetrius Nicator, was taken prisoner (c. 111 n. c.) by Mithridates I. (Arsaces V., 1 Macc. xiv. 1) king of Parthia, he married his wife Cleopatra (App. Syr. 68; Just. xxxvi. 1), and obtained possession of the throne (156 n. c.), having expelled the usurper Tryphon (1 Macc. xi. 1 ff.; Strab. xiv. p. 628). At first he made a very advantageous treaty with Simon, who was now a high-priest and prince of the Jews; but when he grew independent of his help, he withdrew the concessions which he had made and demanded the surrender of the fortresses which the Jews held, or an equivalent in money (1 Macc. xv. 26 ff.; Joseph. Ant. xiii. 7, 3). As Simon was unwilling to yield to his demands, he sent a force under Cendebeus against him, who occupied a fortified position at Seleucia (1 Macc. xiv. 13), near Ascalon, and harassed the surrounding country. After the defeat of Cendebeus by the sons of Simon and the destruction of his works (1 Macc. xvi. 1–40), Antiochus, who had returned from the pursuit of Tryphon, undertook an expedition against Judæa in person. He had sieged Jerusalem, but according to Josephus granted honorable terms to John Hyrcanus (c. 131), who had made a vigorous resistance (Joseph. Ant. xiii. 30; see below). Porphyr. ap. Eus. Chron. Aed. i. 319, maris urbem demolitione, etque Cendebeus armis truncavit: Antiochus next turned his arms against the Parthians, and Hyrcanus accompanied him in the campaign. But, after some successes, he was entirely defeated by Phraortes II. (Arsaces VII.), and fell in the battle v. c. 127–6 (20 Macc. x. 33; App. Syr. 68, v. c. 133; App. Syr. viii. 3, xxxvii. 10). App. Syr. 68, Euseb. (c. 127–6). For the year of his death cf. Niebuhr, Kl. Schrift. i 251 f.: Clinton. F. R. ii. 332 ff.

B. F. W.

ANTIPAS (Ἀντίπας: Antipâs). A martyr at Pergamos, and, according to tradition, bishop of that place (Rev. ii. 13). He is said to have suffered martyrdom in the reign of Domitian by being cast into a burning brazen bull (Mend. Gr. iii. 51). His day in the Greek calendar is April 11.

W. A. W.

ANTIPATER (Ἀντίπατρος: Antipater), son of Jason, ambassador from the Jews to the Lacedæmonians (1 Macc. xvi. 16, xvii. 22).

ANTIPATRIS (Ἀντιπάτρις). Our means of identifying this town are due partly to the fortunate circumstance that the old Semitic name of the place has lingered among the present Arabic population, and partly to a journey specially undertaken by Dr. Eli Smith, for the purpose of illustrating the night march of the soldiers who conspired against Saul from Jerusalem to Caesarea (Acts xiii. 31). Dr. Robinson was of opinion, when he published his first edition, that the road which the soldiers took on this occasion led from Jerusalem to Caesarea by the pass of Beth-Horon, and by Lydda, or Dopsalis. This is the route which was followed by Cestius Gallus, as mentioned by Josephus (R. J. ii. 19, § 1); and it appears to be identical with that taken by Antipatris. On this route he met the Roman pavement again and again, and indeed says he does not remember observing anywhere beyond extensive remains of a Roman road. (See Ibid. Sacra, vol. i. pp. 478–498, Life and Epistles of St. Paul, vol. ii. pp. 330–331, 2d ed.)

It may be difficult to fix the precise spot where the ancient city stood, but the Arabic name, Kefr-Salāḥ, determines the general situation. Josephus tells us that the old name was Capharsalas (Kaphar ṣalāḥ or Antipatris), and that Herod, when he rebuilt the city, changed its name to the present one of his father Antipatris (Ant. xii. 15, § 1, xvi. 5, §§ 2; R. J. i. 21, § 39). The position of Kefr-Salāḥ is in sufficient harmony with what the Jewish historian says of the position of Antipatris, which he describes as a well-watered and well-wooded plain, near a hilly ridge, and with his notices of a trench dug from thence for military purposes to the sea near Joppa, by one of the Asmoncean princes (Ant. xii. 15, § 1; R. J. i. 1, § 7). At a later period he mentions the place again in connection with a military movement of Vespasian from Caesarea towards Jerusalem (R. J. ix. 8, § 1). No remains of ancient Antipatris have been found; but the ground has not been fully explored. J. S. H.
ANTONIA, a fortress built by Herod on the site of the more ancient Batis, on the N. W. of the Temple, and so named by him after his friend ANTONINUS. [JERUSALEM.] The word nowhere occurs in the Bible. [The fortress is referred to, however, in Acts xvi. 31 ff.]

ANTOTHIÁH (Ἀνθοθια; [Official of Jeshour:]: Ἀνθαθιὰ καὶ ἱασθ; [Vat. Ἀναθηθα καὶ ἱασθ.*) Alex. Ἀναθηθα: Ἀναθηθαῖα]. A Benjamite, one of the sons of Shashak (1 Chr. viii. 24).

W. A. W.

ANTOTHITE, THE (Ἀνθωθίτης; ὁ Ἀναθαθιάς). [Vat. θεί:] Comp. ὁ Ἀναθωθηθής]: Ἀναθωθηθιάς, Ἀναθωθήτως]. A native of ANATHOTH (1 Chr. xi. 28, xii. 3).

W. A. W.

A'NUB (א'נהוב [bound together]: ἕνοβις; [Vat. ἕνοβις]: Alex. ἕνοβις; [Comp. ἕνοβις; ἔνοβις]. Son of COZ, and descendant of Judah, through Ashur the father of TEKOA (1 Chr. iv. 8).

W. A. W.

A'NUS (א'נהוס; [Alex. ἄνους; ἄνους]: Benoia), a Levite (1 Esdr. ix. 48).

[DAN].

APA'MLE (Ἀπαμλε; Ἀπαμλε: [daughter of Bartacua] [1 Esdr. iv. 29].

APELLES (Ἀπελλῆς), a Christian sainted by St. Paul in Rom. xvi. 10, and honored by the designation ἄγιος ἐν Χριστῷ. Origen (in loc.) suggests that he may have been identical with Apelles: but there seems no ground for supposing it, and we learn from Horace (Sat. i. 5, 100) that Apella was a common name among the Jews. Tradition makes him bishop of Smyrna, or Heraclea (Fabric. Lec. Evangel. p. 116).

W. A. W.

APES (πίθηκος; πιθήκος; simile) occur in 1 K. x. 22, once in three years came the nay of Tharshish, bringing gold, and silver, ivory, and apes, and peacocks, and in the parallel passages of 2 Chr. ix. 21. The Vat. version [edition] of the LXX. in the first-mentioned passage omits the words "ivory, and apes, and peacocks," while the Alex. version [edition] has them; but both these versions have the words in the passage of the book of Chronicles.

For some attempts to identify the various kinds of Quadrumanus, which were known to the ancients, see L. A. H. Lichtenstein's work, entitled Commentaria philologica de Simurum quotundem veteribus inuicemur foenis (Hamb. 1791); and Ed. Tyson's Homo sylvestris, or the Anatomy of a Pignic (Lond. 1699), to which he has added a Philosophical Essay concerning the Cycnocephali, the Satyrs, and Splinges of the ancients. Aristotle (De Anim. Hist. ii. 5, ed. Schneider) appears to divide the Quadrumanus order of Quadrumanus into three tribes, which he characterizes by the names, πίθηκος, κῆβα, καικωρόφαλα. The last-named family are no doubt identical with the animals that form the African genus Cynocephalus of modern zoologists. The κῆβα, Aristotle distinguishes from the πίθηκος, by the fact of the former possessing a tail. This name, perhaps, may stand for the whole tribe of tailed monkeys, excluding the Cynocephali and the Lemurèque, which latter, since they belong to the island of Madagascar, were probably wholly unknown to the ancients.

The πίθηκος, therefore, would stand as the representative of the tailless apes, such as the Chimpanzee, &c. Although, however, Aristotle perhaps used these terms respectively in a definite sense, by no means follows that they are so employed by other writers. The name πίθηκος, for instance, seems to have been sometimes used to denote some species of Cynocephalus (see a Fragment of Simonides in Schneider's Anot. ad Arist. Hist. Anim. iii. 76). The LXX. use of the word was in all probability used in an extended sense as the representative of the Hebrew word קיפח, to denote any species of Quadrumanus Mammalia; Lichtenstein conjectures that the Hebrew word represents some kind of Diana monkeys, perhaps, Cercopithecus Diana, but as this species is an inhabitant of Guinea, and unknown in Eastern Africa, it is not at all probable that this is the animal denoted.

In the engraving which represents the Lithostrotum Prenestinum (that curious mosaic pavement found at Preneste), in Shaw's Travels (ii. 294, 8vo ed.), is to be seen the figure of some animal in a tree, with the word KHIPEIIN over it. Of this animal Dr. Shaw says (312), "It is a beautiful little creature, with a shaggy neck like the Colithricia, and shaped exactly like these monkeys that are commonly called Marmosets. The KHIPEIIN may therefore be the Ethiopian monkey, called by the Hebrews KUGH, and by the Greeks ΚΗΨΟΣ, ΚΗΨΟΣ, or ΚΕΙΠΟΣ, from whence the Latin name CEPHAUS." This description will be found to apply better to the figure in the 4to ed. of Dr. Shaw's Travels than to that in the 8vo ed. Perhaps, as Col. Hamilton Smith has suggested, the KEPEN of the Prenestine mosaic may be the Cercopithecus gracix-revela, Desmar., which is native of Nubia, the country represented in that part of the mosaic where the figure of the bejewi occurs. It cannot represent any species of mammal, since the members of that group of Quadrumanus are peculiar to America. In all probability, as has been stated above, the קיפח of the Bible is not intended to refer to any one particular species of ape.4

Solomon was a naturalist, and collected everything that was curious and beautiful; and if, as Sir E. Tennent has very plausibly argued, the ancient Tarshish is identical with Pt. de Galile, or some seaport of Ceylon, it is not improbable that the קיפח which the fleet brought to Solomon, were some of the monkeys from that country, which, according to Sir E. Tennent, are comprised, with the exception of the graceful silvine (Mecurus penterereus), under the Wanderer group of Quadrumanus. There can be little doubt but that the קיפח were brought from the same country which supplied ivory and peacocks; both of which are common in

4 The use of the word ape is generally now understood in a restricted sense to apply to the tailless Quadrumanus.

KHIPIIN

Monkey from the Prenestine Mosaic.
APHARSATHCHITES

Ceylon; and Sir E. Tenem has drawn attention to the fact that the Tamil names for apes, ivory, and peacocks are identical with the Hebrew.

Dr. Krapf (Tracts, in E. Africa, p. 518), believing Ophir to be on the E. African coast, thinks Solomon wished to obtain specimens of the Girass (Colobus).

It is very probable that some species of baboons are signified by the term Satys, which occurs in the A. V. in the prophet Isaiah. [SATYS]: The English versions of 1550 and 1574 (Bishop's Bible) read (Is. xiii. 21), where the A. V. has "satys shall dance there,"—"apes shall dance there."

The ancients were no doubt acquainted with many kinds of Quadruman, both of the tailed and tailless kinds (see Plin. viii. c. 19, xi. 44; Elian. Nat. Av. xix. 23, 39; Strab. xvii. p. 857; Bochart, Hieros. ii. 308); cf. Matt. Ep. iv. 12—

"Si mihi causae foret ceraevicibus etc.,"

W. II.

APHARSATHCHITES, APHARSLI-
TES, APHARSACHITES (aphars-
chites, apharsachites): Apharsa-
chus, Apharsachus; [Vat. in Exzr. iv., Aphars-
chad, Apharsachus: Ezr. v, Apharsakh]: Apharsa-
thanthe (finished, Apharsach, [Aphars,
achus]), the names of certain tribes, colonies from which had settled in Samaria under the Assyrian leader Assarpar (Erez. iv. 9, v. 6, [vi. 6]). The first and last are regarded as the same. Whence these tribes came is entirely a matter of conjecture: the initial S is regarded as prophetic: if this be rejected, the remaining portion of the first two names bears some resemblance (a very distant one, it must be allowed) to Paratsar, or Paratsarchi, significant of "mountainers," applied principally to a tribe living on the borders of Media and Persia; while the second has been referred to the Parnassius, and by Gesenius to the Parsee, to which it certainly bears a much greater affinity, especially in the prolonged form of the latter name found in Dan. vi. 28 (apharsachites). The presence of the proper name of the Persians in Exzr. i. 4, 3, must throw some doubt upon Gesenius' conjecture; but it is very possible that the best name of the tribe may have undergone alteration, while the official and general name was correctly given. W. L. B.

APHIEK (aphieki), from a root signifying tenacity or firmness, Ges.; Aphieki: [Aphieki], the name of several places in Palestine.

1. [Rom. 'Opher: Vat. om.]: A royal city of the Canaanites, the king of which was killed by Joshua (Josh. xii. 18). As this is named with Tappath and other places in the mountains of Judah, it is very probably the same as the Aphekah of Josh. xv. 54.

2. [In Josh. xiii. Vat. Taphieki; Add. Alex. 'Aphieki: Lomp. 'Aphieki: Aphieki]. A city, apparently in the extreme north of Acher (Josh. xix. 39), from which the Canaanites were not ejected (Judg. i. 34; though here it is Aphik, Ἀφίκ). This is probably the same place as the Aphieki (Josh. xii. 18), on the extreme north of "border of the Amorites,"

aphieki, apparently beyond Sidon, and which is identified by Gesenius (Thes. 149 a) with the Apheke of classical times, famous for its temple of Venus, and now Akro (Eob. ill. 600; Porter, ii. 256-6). Akro, however, lies beyond the ridge of Lebanon, on the northern edge of the mountain, and consequently much further up than the other towns of Asler which have been identified. On the other hand it is hardly more to the north of the known limits of the tribe, than Kadesh and other places named as in Judah were to the south; and Aphek may, like many other sanctuaries, have had a reputation at a very early date, sufficient in the days of Joshua to cause its mention in company with the other northern sanctuary of Tid-al-gad.

3. (With the article, τὸ Ἀφθιοκαί, a place at which the Philistines encamped, while the Israelites pitched in Eben-ezer, before the fatal battle in which the sons of Eli were killed and the ark taken (1 Sam. iv. 1). This would be somewhere to the N. W. of, and at no great distance from, Jerusalem.

4. The scene of another encampment of the Philistines, before an encounter not less disastrous than that just named,—the defeat and death of Saul (1 Sam. xxix. 1). By comparison with ver. 11, it seems as if this Aphek were not necessarily near Shema, though on the road thither from the Philistine district. It is possible that it may be the same place as the preceding; and if so, the Philistines were marching to Normal to seize the present road along the "backbone" of the country.

5. [In 1 K. 'Apheska]: A city on the military road from Syria to Israel (1 K. xx. 26). It was called (341), and was apparently a common spot for engagements with Syria (2 K. xiii. 17; with the article). The use of the word Ἀφεσσάς (A. V. "the plain") in 1 K. xx. 25, fixes the situation of A to have been in the level down-country east of the Jordan (Masston); and there, accordingly, it is now found in Fil, at the head of the Wady Fil, 6 miles east of the Sea of Galilee, the great road between Damascus, Nablus, and Jerusalem, still passing (Kiepert's map, 1857), with all the permanent lines of march, through the vallies which is remarkable of the number of inns that it contains (Burck. p. 280). By Josephus (viii. 14, § 4) the name is given as Aphēka. Eusebius (Onom. Αφεσσάς) says that in his time there was, beyond Jordan, a κωπή μεγάλη (Jer. castellum grande) called Apheca by (ταπάς) Hippius (Jer. Hippus); but he apparently confounds it with 1. Hippius was one of the towns which formed the Decapolis. Fil, or Filh, has been visited by Borchardt, Setzen, and others (Pitter, Pet. pp. 348-354), and is the only one of the places bearing this name that has been identified with certainty.

G.

APHIEK AH (aphieki, maphieki; [Alex. Add. Comp. 'Aphieka]: Apher: Apher), a city of Judah, in the mountains (Josh. xx. 57), probably the same as Aphieki.

APHIREMA (aphirema; [Alex. Apher-
ema, Apherēma, Apher). One of the three "governments" (ἐπαρχίας) added to Judah from Samaria and Galilee, x. 30) by Demetrios Soter, and confirmed by Nicomed (1 Mac. xi. 34) (see Jos. Ant. xiv. 8, § 9, and Rendall, p. 178). The word is

 Aphieki, the initial aspirate being dropped. Gesenius illustrates this derivation by comparing the Latin amicus from Semitic, kara.
APHERRA

APHRAHA (Ἄφραχα) (ref.): 'Aρέχα; [Alex. Αρέχα] Apirah, name of one of the forefathers of King Saul (1 Sam. ix. 1). 

APHEK (ἈΦΕΧ) (ref.): Naḥi: Vat. Naexi Alex. Nāphēk: A.V. Comp. 'Aρέχα) Apirah, a city of Asher from which the Canaanites were driven out (Judg. i. 31). Probably the same place as Ḍîrok 2.

APHRAH, the house of (Ἄφραχ) (ref.): [the fourth], a place mentioned in Mic. i. 10, and supposed by some (Winer, 172) to be identical with Ophrah. But this can hardly be, inasmuch as all the towns named in the context are in the low country to the west of Judah, while Ophrah would appear to be E Bethel (Ophrişah). The LXX. translate the word ἡ Ἀπεκ κατὰ γένεσα [Vulg. in domo putetur].

* According to the analogy of other similar compound names the translators of the L. V. might have written Beth Leaphrah for Aphrah. The σ is here sign of the genitive. 'If the name be the same as Ophrah (it may be different as there is some evidence of an Aphrah near Jerusalem) it is written Ἀφραχ in Mic. i. 10, instead of Ἀφραχ so as more readily to suggest ἀπεκ, dust, in conformity with the expression which follows: "In Asher" (as we should say in English) "roll thyself in ashes."" See Pusey's Minor Proverbs, iii. 300. II.

APHYES (ἈΦΗΤΗ) (the dispersion): 'Aφητή; [All. Alex. 'Αφητήγε: ] Aphyes, chief of the 18th of the 24 commanders in the service of the Temple (1 Chr. xiv. 15).

APOCRYPHYA. [REVELATION.]

The collection of Books to which this term is popularly applied includes the following: (1) that in which they stand in the English version of the Bible, (2) that given by the Septuagint; (3) the word ἀπόκρυφα answers to the Heb. בִּינָא יִתְנָא, libri obscuri, by which the later Jews designated those books which, as of doubtful authority or not tending to edification, were not read publicly in the synagogues: (4) that it originates in the κρυπτα of secret books of the Greek mysteries. Of these it may be enough to say, that (1) is, as regards some of the books now bearing the name, at variance with fact: that (2), as has been said, rests on a mistake: that (3) wants the support of direct evidence of the use of ἀπόκρυφα as the translation for the Hebrew word, and that (4), though it approximates to what is probably the true history of the word, is so far only a conjecture. The data for explaining the transition from the neutral to the bad meaning, are to be found, it is believed, in the quotations already given, and in the facts connected with the books to which the epithet was given in the first instance applied. The language of Clement implies that it was not altogether disclaimed by those of whose books he uses it. That of Athanasius is in the tone of a man who is confining his opponents out of their own mouth. Augustus implicitly admits that "as if..."
receiving them wast not only for the sake of the converse of the Apocrypha, but for the reasons which follow. It is not surprising that the Apocrypha should be included in the books of the O. T., and that they should be placed in the order of the books of the Hebrew Bible. They are, in fact, the books of the Apocrypha, and they should be read with that spirit of reverence and respect which is due to the sacred books of Scripture. The Apocrypha are the books of the Apocrypha, and they should be read with that spirit of reverence and respect which is due to the sacred books of Scripture.

The Apocrypha are the books of the Apocrypha, and they should be read with that spirit of reverence and respect which is due to the sacred books of Scripture. The Apocrypha are the books of the Apocrypha, and they should be read with that spirit of reverence and respect which is due to the sacred books of Scripture.
APOCRYPHA

decision, stood out in sharper contrast. The Council of Trent closed the question which had been left open, and deprived its theologians of the liberty they had hitherto enjoyed—extending the Canon of Scripture so as to include all the hitherto doubt-ful or deuterocanonical books, with the exception of the so-called book of Enoch. As with the commonly
seh, the evidence against which seemed too strong to be resisted (Sess. IV. de Con. Script.). In accordance with this decree, the editions of the Vulgate published by authority contained the books which the Council had pronounced canonical, as standing on the same footing as those which had never been questioned, while the three which had been rejected were printed commonly in smaller type and stood after the New Testament. The Reformers of Germany and England on the other hand, influenced in part by the revival of the study of Hebrew and the consequent recognition of the authority of the Hebrew Canon, and subsequently by the reaction against this stretch of authority, maintained the opinion of Jerome and pushed it to its legitimate results. The principle which had been asserted by Carlstadt dogmatically in his "De Canonicis Scripturis Biblicis" (1520) was acted on by Luther. He spoke of individual books among those in question with a freedom as great as that of Jerome, judging each on its own merits, praising Tobit as a "pleasant comedy" and the Prayer of Manaseh as a "good model for penitents," and rejecting the two books of Esdras as containing worthless fables. The example of collecting the doubtful books in a separate group had been set in the Strasburg edition of the Septuagint, 1520. In Luther's common edition, in 1534 (the books (Judith, Wisdom, Tobias, Song of Songs, 1 and 2 Maccabees, Additions to Esther and Daniel, and the Prayer of Manaseh) were grouped together under the general title of "Apocrypha, i. e. Books which are not of like worth with Holy Scripture, yet are good and useful to be read." In the history of the English Church, Wittliase showed himself in this as in other points the forerunner of the Reformation, and applied the term Apocrypha to all but the "canonized" Cano-Books of the Old Testament. The judgment of Jerome was formally asserted in the sixth Article. The disputed books were collected and described in the same way in the printed English Bible of 1539 (Craumer's), and since then there has been no fluctuation as to the application of the word. The books to which the term is ascribed are in popular speech not merely apocryphal, but the Apocrypha.

II. Whatever questions may be as to the authority of these books, they have in any case an interest of which no controversy can deprive them as connected with the literature, and therefore with the history, of the Jews. They represent the period of transition and decay which followed on the return from Babylon, when the prophets who were then the teachers of the people had passed away and the age of scribes succeeded. Uncertain as may be the dates of individual books, few, if any, can be put before the third or fourth quarter of the 3d century B. C. The latest, the 2d Book of Esdras, is probably not later than 30 B. C., 2 Esdr. vii. 23 being a subsequent interpolation. The alterations of the Jewish character, the different phases which Judaism presented in Palestine and Alexandria, the good and the evil which were called forth by contact with idolatry in Egypt and by the struggle against it in Syria, all these present themselves to the reader of the Apocrypha with greater or less distinctness. In the midst of the diversities which we might naturally expect to find in books written by different authors, in different countries, and at considerable intervals of time, it is possible to discern some characteristics which belong to the collection as a whole, and these may be noticed in the following order.

(1.) The absence of the prophetic element. From first to last the books bear testimony to the assertion of Josephus (c. Ap. i. 8), that the διαβάσεως διαμαντών of prophets had been broken after the close of the O. T. canon. No one speaks because the word of the Lord had come to him. Sometimes there is a direct confession that the gift of prophecy had departed (1 Macc. ix. 27), or the utterance of a hope that it might one day return (1 Esdr. iv. 46, xiv. 41). Sometimes a teacher asserts in words the perpetuity of the gift (Wisd. viii. 27), and shown in the act of asserting it how different the illumination which he had received was from that bestowed on the prophets of the Canonical Books. When a writer simulates the prophetic character, he repeats with slight modifications the language of the older prophets, as in Baruch, or makes a mere prediction or a violent expression of confidence, or plays arbitrarily with combinations of dreams and symbols, as in 2 Esdras. Strange and perplexing as the last-named book is, whatever there is in it of genuine feeling indicates a mind not at ease with itself, distressed with its own sufferings and with the problems of the universe, and it is accordingly very far removed from the utterance of a man who speaks as a messenger from God.

(2.) Connected with this is the almost total disappearance of the power of the prophet, as had shown itself in the poetry of the Old Testament. The Song of the Three Children lays claim to the character of a Psalm, and is probably a translation from some liturgical hymn; but with this exception the form of poetry is altogether absent. So far as the writers have come under the influence of Greek cultivation they catch the taste for rhetorical ornament which characterized the literature of Alexandria. Fic-

tions and metaphors abound, especially in the introductions to the narrative of a historian, and the story of a martyr is not complete unless (as in the later Acta Martyrum of Christian traditions) the sufferer declines in set terms against the persecutors. (Song of the Three Child., 3-22; 2 Macc. vi. vii.)

(3.) The appearance, as part of the current literature of the time, of works of fiction, resting or purporting to rest on a historical foundation. It is possible that this development of the national genius may have been in part the result of the Captivity. The Jewish exiles brought with them the reputation of excelling in minstrelsy, and were called on to sing the songs of Zion" (Ps. cxvi. vii.). The trial of skill between the three young men in 1 Esdr. iii. iv. implies a traditional belief that those who were promised to places of honor under the Persian kings were conspicuous for gifts of a somewhat similar character. The transition from this to the presentation of the future as a story telling was with the Jews, as afterwards with the Greeks, easy and natural enough. The period of the Captivity with its strange adventures, and the remoteness of the scenes connected with it, offered a wide and attractive field to the imagination of such narrators. Sometimes, as in Bel and the Dragon, the motive of such stories would be the love of the marvellous mingling itself with the feeling of scorn with which
the Jew looked on the idolater. In other cases, as in Tobit and Susanna, the story would gain popularity from its ethical tendencies. The singular variations in the text of the former book indicate at once the extent of its circulation and the liberties taken by successive editors. In the narrative of Judith, again, there is probably something more than the interest attaching to the history of the past. There is indeed too little evidence of the truth of the narrative for us to look on it as history at all, and it takes its place in the region of historical romance, written with a political motive. Under the guise of the old Assyrian enemies of Israel, the writer is covertly attacking the Syrian invaders against whom his countrymen were contending, stirring them up by a story of religious or national heroism to follow the example of Judith as she had followed that of Jael (Judg. iv. 3), the development of this form of literature is of course compatible with a high degree of excellence, but it is true of it at all times, and was especially true of the literature of the ancient world, that it belongs rather to its later and feebler period. It is a special sign of decay in honesty and discernment when such writings are passed off and accepted as belonging to actual history.

(4.) The free exercise of the imagination within the limits of the historical led to the ending of a purely legendary literature. The full development of this was indeed reserved for a yet later period. The books of the Apocrypha occupy a middle place between those of the Old Testament in their simplicity and truthfulness and the wild extravagances of the Talmud. As it is, however, we find in them the germs of some of the fabulous traditions which were influencing the minds of the Jews at the time of our Lord's ministry, and have since in some instances incorporated themselves more or less with the popular belief of Christendom. So in 2 Macc. i. ii. we meet with the statements that at the time of the Captivity the priests had concealed the sacred fire, and that it was miraculously renewed—that Jeremiah had given, accompanied by the tetrarch and the ark, "to the mountain where Moses climbed up to see the heritage of God," and had there concealed them in a cave together with the ark of in- 5 consequence. The appellation of the prophet at the close of the same book (xv. 15), as giving to Judas Maccabaeus the sword with which, as a gift from God, he was to "wound the adversaries," shows how prominent a place was occupied by Jeremiah in the traditions and hopes of the people, and prepares us to understand the rumors which followed on our Lord's teaching and working that "Jeremiahs or prophets of the patriarchs" had appeared again (Matt. xxvi. 14). So again in 2 Esd. xii. 40—47 we find the legend of the entire disappearance of the Ten Tribes which, in spite of direct and indirect testimony on the other side, has given occasion even in our own time to so many wild conjectures. In ch. xiv. of the same book we recognize (as has been pointed out already) the tendency to set a higher value on books of an esoteric knowledge than on those in the Hebrew Canon; but it deserves notice that this is also another form of the tradition that Ezra dictated from a supernaturally inspired memory the Sacred Books which, according to that tradition, had been lost, and that both tables are exaggerations of the part actually taken by him and by the "men of the Great Synagogue" in the work of collecting and arranging them. So also the rhetorical narrative of the Exodus in Wisd. xvi.—xix. indicates the existence of a traditional, half-legendary history side by side with the canonical. It would seem, indeed, as if the life of Moses had appeared with many different embellishments. The form in which that life appears in Josephus, the facts mentioned in St. Stephen's speech and not found in the Pentateuch, the allusions to James and Judas (2 Tim. iii. 8), to the disputes between Michael and the Devil ( Jude 9), to the "rock of as we followed" the Israhelites (1 Cor. x. 4), all bear testimony to the wide-spread popularity of this semi-apocryphal history.

(5.) As the most marked characteristic of the collection as a whole and of the period to which it belongs, there is the tendency to pass off suppositions books under the cover of fictitious names. The books of Esdras, the additions to Daniel, the letters of Barnabas and Jeremiah, and the Wisdom of Solomon, are obviously of this character. It is difficult perhaps for us to measure in each instance the degree in which the writers of such books were guilty of actual frauds. In a book like the Wisdom of Solomon, for example, the form may have been adopted as a means of gaining attention by which no one was likely to be deceived, and, as such, it does not go beyond the limits of legitimate personation. The fiction in this case need not be such as to destroy our admiration and reverence for the book any more than it would destroy the authority of Ecclesiastes were we to come to the conclusion from internal or other evidence that it belonged to a later age than that of Solomon. The habit, however, of writing books under fictitious names, is, as the later Jewish history shows, a very dangerous one. The practice becomes almost a trade. Each such work creates a new demand, to be met in its turn by a fresh super- 10 tition, and thus the prevalence of an apocryphal literature becomes a sure sign of want of truthfulness on one side, and want of discernment on the other.

(6.) The absence of honesty and of the power to distinguish truth from falsehood, shows itself in a yet more serious form in the insertion of formal documents purporting to be authentic, but in reality falling altogether to establish any claim to that title. This is very conspicuous in the case with the alternate text. The letters with which 2 Macc. opens, from the Jews at Jerusalem, betray their true character by their historical inaccuracy. We can hardly accept as genuine the letter in which the king of the Macedonians (1 Macc. xii. 20, 21) writes to Onias that "the Macedonians and Jews are brethren, and that they are of the stock of Abraham." The letters in 2 Macc. iv. and xi., on the other hand, might be authentic so far as their contents go, but the recklessness with which such documents are inserted as embellishments and make-weights throws doubt in a greater or less degree on all of them.

(7.) The loss of the simplicity and accuracy which characterize the history of the O. T. is shown also in the errors and anachronisms in which these books abound. Thus, to take a few of the most striking instances, Haman is made a Macedonian, and the purpose of his plot is to transfer the kingdom from the Persians to the Macedonians (Esth. xvi. 10); two contradictory statements are given in the same book of the death of Antiochus Epiphanes (2 Macc. i. 15—17, iv. 5—22); Nabalchonosor is made to dwell at Nineve as the king of the Assyrians (Judith i. 1) .

(8.) In their relation to the religious and ethical development of Judaism during the period which
these books embrace, we find (a) The influences of the struggle against idolatry under Antichus, as shown partly in the revival of the old heroic spirit, and in the record of the deeds which it called forth, as in Maccabees, partly again in the tendency of a narrative literature to protest against pollutions of worship in Baruch and Wisdom. (b) The growing hostility of the Jews towards the Samaritans is shown by the Confession of the Son of Sirach (Eccles. i. 25, 26). (c) The teaching of Tobit illustrates the prominence then and afterwards assigned to atoning among the duties of a holy life (Tob. iv. 7-11, xii. 9). The classification of the three elements of such a life — prayer, fasting, alms — in xii. 8, illustrates the traditional ethical teaching of the Scribes, which was at once recognized and purified from the errors that had been connected with it in the Sermon on the Mount (Matt. vi. 1-18). (d) The same book indicates also the growing belief in the individual guardianship of angels and the genius of a grotesque demonology, resting in part on the more mysterious phenomena of man's spiritual nature, like the cases of demonic possession in the Gospels, but associating itself only too easily with all the frauds and superstitions of vagabond exorcists. (e) The great Alexandrian book of the collection, the Wisdom of Solomon, breathes, as we might expect, a strain of higher mood; and though there is absolutely no ground for the patriotic tradition that it was written by Philo, the conjecture that it might have been was not without a plausibility which might well commend itself to men like Basil and Jerome. The picture of Wisdom as the unspotted mirror of the power of God and the image of his goodness" (vii. 26) as the universal teacher of all "holy souls" in "all ages" (vii. 27), as guiding and ruling God's people, approaches the teaching of Philo and foreshadows that of St. John as to the manifestation of the Unseen God through the medium of the Logos and the office of that divine Word as the light that lighteth every man.

In relation again to the symbolic character of the Temple as a reenactment of the work of Wisdom as "which God "has prepared from the beginning" (ix. 8), the language of this book connects itself at once with that of Philo and with the teaching of St. Paul or Apollos in the Epistle to the Hebrews. But that which is the great characteristic of the book, as of the school from which it emanated, is the writer's apprehension of God's kingdom and the blessings connected with it as eternal, and so, as independent of men's conceptions of time. Thus clas. i. 2, contain the strong protest of a righteous man against the materialism which then in the form of a sensual selfishness, as afterwards in the developed system of the Sadducees, was corrupting the old faith of Israel. Against this he asserts that the "souls of the righteous are in the hands of God" (viii. 1); that the blessings which the popular belief connected with length of days were not to be measured by the duration of years, seeing that "wisdom is the gray hair unto men, and a unspotted life is old age." (xvii. 25) In regard to another truth also, this book was in advance of the popular belief of the Jews of Palestine. "In the midst of its strong protests against idolatry, there is the fullest recognition of God's universal love (xii. 23-25), of the truth that His power is but the instrument of His righteousness (xii. 15), of the difference between those who are the "less to be blamed" as "seeking God and desirous to find Him" (xiii. 6), and the victims of a darker and more debasing idolatry. Here also the unknown writer of the Wisdom of Solomon seems to prepare the way for the higher and wider teaching of the New Testament.

It does not fall within the scope of the present article to speak of the controversies which have arisen within the Church of England, or in Lutheran or Reformed communities abroad, in connection with the authority and use of these Books. Those disputes raise questions of a very grave interest to the student of Ecclesiastical History. What has been aimed at here is to supply the Biblical student with data which will prepare him to judge fairly and impartially. E. H. P.

The most recent separate ed. of the Greek text, with a selection of various readings, is by H. A. Apel, Libri V. T. Apoc. Graece, Lips. 1837. This includes 3d and 4th Maccabees, and is the basis of Wahl's excellent Chris liberorum V. T. Apoc philologicus, Lips. 1853.

By far the most important exegetical help to the study of the Apocrypha is the K beganzfe, ed. Handb. zu den Apok. des A. T. by O. F. Fritzsche and U. L. W. Grimm, 6 Lieferungen, Leips. 1851-60, which also contains full critical introductions to the several books. The German translation and notes of Hezel, 2 Thelle, 1890-02, are not highly esteemed. There is a more recent German translation, with notes, by a Jewish Rabbi, M. Gutmann, Die Apokryphen des A. T., u. w. Alton, 1841. The principal commentary in English is by Richard Arnold, Lond. 1744-52, fol., 2d ed. 1769, new ed. by Pitman, Lond. 1822, 4to. It was published as a continuation of Patrick and Lowth's Comm. on the Old Test., which it usually accompanies, as in the Philadelphia ed. of 1846. There is a separate ed. of the common English version by Charles Wilson, The Books of the Apocryphon, with Crit. and Hist. Observations prefixed, Edin. 1891. A good English translation of the Apocrypha, with
APOLLOPHANES (Ἀπολλόφανης; Ἀργαῖος), a Syrian, killed by Judas Maccabaeus (2 Macc. x. 37).

APOLLOS (Ἀπόλλος, i. e. Ἀπόλλων ἐν Αἰγίλη), the son of Thracian governor of Cilicia, and slain, under SALTUS IV. PINDER, i. c. 187 B.C., a bitter enemy of the Jews (2 Macc. iv. 4), who urged the king, at the instigation of Simon the commander (στρατηγός) of the temple, to plunder the temple at Jerusalem (2 Macc. iii. 5 f.). The writer of the Pervaguration in the Maccabees, praised among the works of Josephus relates of Apollonius the circumstances which are commonly referred to his emissary Heliodorus (De Macc. 4; cf. 2 Macc. iii. 7 ff.).

2. An officer of Antiochus Epiphanes, governor of Samaria (Joseph. Ant. xii. 3, § 37, 7; § 1), who led a large force against Judas Maccabaeus, but was defeated and slain. (1 Macc. xii. 10-12, Joseph. Ant. xii. 71.) He is probably the same person who was chief commissioner of the revenue of Judae (ἀρχων φθαρμογίας, 1 Macc. i. 29; cf. 2 Macc. v. 24), who spoiled Jerusalem, taking advantage of the Sabbath (2 Macc. v. 24-26), and occupied a fortified position there (v. c. 108) (1 Macc. i. 30 ff.).

3. The son of Menestheus (possibly identical with the former), an envoy commissioned (v. c. 173) by Antiochus Epiphanes to congratulate Ptolemaeus Philometer on his being enthroned (2 Macc. iv. 21). An ambassador of the same name was at the head of the embassy which Antiochus sent to Rome (Liv. xiii. 6).

4. The son of Genninus (ὁ τὸν Γενάνιον ἐγένετο) it seems impossible that this can be des ecles Apollos, Noah, Luthe), a Syrian general under Antiochus V. Epipator c. n. 163 (2 Macc. xx. 7).

5. The Eban (Ἄβαν, Joseph. Ant. xiii. 4, § 3, i. e. one of the Palae or Pala, a people of Sagodia), a governor of (Cilicia (περί ἐντολής κ.), 1 Macc. x. 69) under Alexander Balas, who embraced the cause of his rival Eumenes, and was enrolled to a chief command (1 Macc. l. c. κατατέθη, Vulg. constestavit fidem). If he were the same as the Apollonius whom Polybios mentions as fader rather and son of Ptolemaeus II. (probably a son of (2) Πύθων ἔσχαιρον ἀδελφόν, Μακεδόνας καὶ Μυκῆνας τοὺς, Polyb. xxxi. 21, § 2), his conduct is easily intelligible. Apollonius raised a large force and attacked Jonathan, the ally of Alexander, but was entirely defeated by him (v. c. 147) near Azotus (1 Macc. x. 70 ff.). Josephus (Ant. xiii. 4, § 3 f. 4) represents Apollonius as the general of Alexander at the time of his defeat: but this statement, though it has found advocates (Wernsbruch, der jede liber, Macc. p. 135, yet doubtfully), appears to be untenable on internal grounds. Cf. Orinum, 1 Macc. x. 69.

B. F. W.
APOLLYON

any diligently, that it:thing may be wanting to them.

After this nothing is known of him. Tradition makes him bishop of Casarea (Monday, tracts. ii. b. 17). The exact part which Apollon took in the missionary work of the apostolic age can never be ascertained: and much fruitless conjecture has been spent on the subject. After the entire unity between St. Paul and him which appears in the first Epistle to the Corinthians, it is hardly possible to imagine any important difference in the doctrines which they taught. Certainly we cannot ascribe to the hypothesis that the copy against which the apostle so often warns the Corinthians, was a characteristic of the teaching of Apollon. Thus much may safely be granted, that there may have been difference enough in the outward character and expression of the two to attract the lover of eloquence and philosophy rather to Apollon, somewhat, perhaps, to the disparagement of St. Paul.

Much ingenuity has been spent in Germany in directing the four parties in the church at Corinth, supposed to be indicated 1 Cor. i. 12: and the Apollon party has been variously characterized. See Neander, Pfanz. u. Leitungen. p. 373 ff. 4th ed.: Conybeare and Howson, Life and Epistles of St. Paul, vol. i. p. 526, vol. ii. pp. 6-11, 2d ed.; Winer refers to Fitzer, Diss. de Apollone doctor apostol., Altor, 1718; Hopf, Com. de Apollone pseudohistor. Hag. 1752; and especially to Heymann, in the Saxon Exegetische Studien Nov. 213 ff.

H. A.

* The conjecture of Luther, that Apollon was the author of the Epistle to the Hebrews, has been favored by many eminent scholars, among whom may be named Osiander, Beausobre, Le Clerc, Henmann, Zieger, Semler, Dindorf, Bertholdt, Schott, Bleek, Norton, Fellenhozer (Cath.), Creder, Lutterbeck (Cath.). De Wette (without confidence), Tholuck, Rues, Bausen, Linnemann, and Alford. See Bleek, Brief an die Hebr. i. 429-451; Norton in the Christian Examiner for July 1823, vi. 338-343; and Alford’s Prolegomena to the Epistle, ch. i. sect. i. §§ 183-191. [Hebrews, Epistle to the.]

APOLLYON (Ἀπόλλων. Apollon), or, as it is literally the margin of the A. V. Rev. ix. 11, “a destroyer,” is the rendering of the Hebrew word ΑΒΔΒΙΔΟΝ, “the angel of the bottomless pit.” The Vulgate adds, “Latenis habens nomen Exterminatorum.” The Hebrew term is really abstract, and signifies “destruction,” in which sense it occurs in Job xxvi. 6, xxviii. 22; Prov. xv. 11; and other passages. The angel Apollon is further described as the king of the locusts which rose from the smoke of the bottomless pit at the sounding of the fifth trumpet. From the occurrence of the word in Ps. lxxviii. 11, the Rabbins have made Apollon the nethermost of the two regions into which they divided the under world. But that in Rev. ix. 11 Apollon is the angel, and not the abyss, is perfectly evident in the Greek. There is no authority for connecting it with the destroyer alluded to in 1 Cor. x. 10; and the explanation, quoted by Bengel, that the name is given in Hebrew and Greek, to show that the locusts would be destructive alike to Jew and Gentile, is far-fetched and unnecessary. The etymology of

APOSTLE

Asmodeus, the king of the demons in Jewish mythology, seems to point to a connection with Apollon, in his character as “the destroyer,” or the destroying angel. See also Wisd. xviii. 22, 25. [ASMODEUS.]

W. A. W.

APOSTLE (ἀπόστολος, one sent forth), the official name, in the N. T., originally of those Twelve of the disciples whom Jesus chose, to send forth first to preach the gospel, and to be with Him during the course of his ministry on earth. Afterwards it was extended to others who, though not of the number of the Twelve, yet were equal with them in honour and dignity. The word also appears to have been used in a non-official sense to designate a much wider circle of Christian messengers and teachers (see 2 Cor. viii. 23; Phil. ii. 25).

It is only of those who were officially designated Apostles that we treat in this article.

The original qualification of an apostle, as stated by St. Peter, on occasion of electing a successor to the traitor Judas, was, that he should have been personally acquainted with the whole ministerial course of our Lord from His baptism to the day when He was taken up into heaven. He himself describes them as “they that had continued with Him in His temptations” (Luke xxii. 28). By this close personal intercourse with Him they were peculiarly fitted to give testimony to the facts of redemption: and we gather from his own words in John xiv. 26, xv. 27, xvii. 13, that an especial bestowal of the Spirit’s influence was granted them, by which their memories were quickened, and their power of reproducing that which they had heard from Him increased above the ordinary measure of man. The Apostles were from the lower ranks of life, simple and uneducated; some of them were related to Jesus according in the flesh; some had previously been disciples of John the Baptist. Our Lord chose them early in his public career, though it is uncertain precisely at what time. Some of them had certainly partly attached themselves to Him before; but after their call as apostles, they appear to have been consecratedly with Him, or in his service. They seem to have been all on an equality, both during and after the ministry of Christ on earth. We find one indeed, St. Peter, from fervor of personal character, usually prominent among them, and distinguished by having the first place assigned him in founding the Jewish and Gentile churches [PETER]; but we never find the slightest trace in Scripture of any superiority or primacy being in consequence accorded to him. We also find that he and two others, James and John, the sons of Zebedee, are admitted to the inner privacy of our Lord’s acts and sufferings on several occasions (Mark v. 37; Matt. xvii. 1 ff., xxvi. 37); but this is no proof of superiority in rank or office. Early in our Lord’s ministry, He sent them out two and two to preach repentance, and perform miracles in his name (Matt. x.i Luke ix.). This their mission was of the nature of a solemn call to the children of Israel, to whom it was confined (Matt. x. 5, 6). There is, however, in his charge to the Apostles on this occasion, not a word of their proclaiming his own mission as the Messiah of the Jewish people. Their preaching was at this time strictly of a preparatory kind, resembling that of John the Baptist, the Lord’s forerunner.
The Apostles were early warned by their Master of the solemn nature and the danger of their calling (Matt. x. 17), but were not intrusted with any mystic doctrines, of which indeed his teaching, being eminently and entirely practical, did not admit. The Master blessed Him in his journey of teaching and to the Jewish fasts, saw his wonderful works, heard his discourses addressed to the people (Matt. v. 1 ff., xxiii. 1 ff.; Luke iv. 13 ff.) or those which He held with learned Jews (Matt. xix. 13 ff.; Luke x. 25 ff.), made inquiries of Him on religious matters, sometimes concerning his own savings, sometimes of a general nature (Matt. xiii. 10 ff., xv. 13 ff., xvi. 1 ff.; Luke viii. 9 ff., xii. 41, xviii. 10, John iv. 2 ff., v. 5, 22 al.); sometimes they worked miracles (Mark vi. 13; Luke ix. 6), sometimes attempted to do so without success (Matt. xvii. 16). They recognized their Master as the Christ of God (Matt. xvi. 16; Luke ix. 20), and ascribed to Him supernatural power (Luke ix. 54), but in the recognition of the spiritual teaching and mission of Christ, they made very slow progress, held back as they were by weakness of apprehension and by natural prejudices (Matt. xv. 12, xx. 29 f.; Luke ix. 54, xxi. 25 ff.). They were compelled to ask of Him the explanation of even his simplest parables (Mark viii. 14 ff.; Luke xii. 47 ff.), and openly confessed their weakness of faith (Luke xvii. 5). Even at the removal of our Lord from the earth they were yet weak in their knowledge (Luke xxiv. 21; John xvi. 12), though He had for so long been carefully preparing and instructing them. And when that happened of which He had so often forewarned them,—his apprehension by the chief priests and Pharisees,—they all forsook Him and fled (Matt. xxvii. 56, Av.). They left his burial to one who was not of their number and to the women, and were only convinced of his resurrection on the very plainest proofs furnished by Himself. It was first when this fact became undeniable that light seems to have entered their minds, and not even then without his own special aid, opening their understandings that they might understand the Scriptures. Even after that, many of them returned to their common occupations (John xxi. 3 ff.), and it required a new direction from the Lord to recall them to their mission and reunite them in Jerusalem (Acts i. 4). Before the descent of the Holy Spirit on the Church, Peter, at least, seems to have been specially inspired by Him to declare the prophetic sense of Scripture respecting the traitor Judas, and direct his place to be filled up. On the Feast of Pentecost, ten days after our Lord's ascension, the Holy Spirit came down on the assembled church (Acts ii. 1 ff.; and from that time the Apostles became altogether different men, giving witness of power of the life and death and resurrection of Jesus as he had declared they should (Luke xxiv. 48; Acts i. 8, 22, ii. 32, iii. 15, v. 32, xiii. 31). First of all the mother-church at Jerusalem grew up under their hands (Acts iii. xvii.), and their superior dignity and power were universally acknowledged by the rulers and the people (Acts v. 12 ff.). Even the persecution which arose about Stephen, and put the first check on the spread of the Gospel in Judæa, does not seem to have brought peril to the Apostles (Acts viii. 1). Their first mission out of Jerusalem was to Samaria (Acts viii. 5 ff. 14), where the Lord himself, during his ministry, addressed the seed of the Church. Here ends, properly speaking for other perhaps with the general visitation hinted at in Acts ix. 32), the first period of the Apostles' agency, during which its centre is Jerusalem, and the prominent figure is that of St. Peter. Agreedly to the promise of our Lord to him (Matt. xvi. 18), we conceive it impossible to understand otherwise than in a personal sense, he among the twelve foundations (Luke xi. 14) with whom the Church was first built: and it was his privilege first to open the doors of the kingdom of heaven to Jews (Acts ii. 44, 42) and to Gentiles (Acts x. 11). The centre of the second period of the apostolic agency is Antioch, where a church soon was built up, consisting of Jews and Gentiles; and the central figure of this and of the subsequent period is St. Paul, a convert not originally belonging to the number of the Twelve, but wonderfully prepared and miraculously won for the high office [Paul]. This period, whose history (all that we know of it) is related in Acts xv. 19-20, xxii. 1-5, was marked by the united working of Paul and the other apostles, in the cooperation and intercourse of the two churches of Antioch and Jerusalem. From this time the third apostolic period opens, marked by the almost entire disappearance of the Twelve from the sacred narrative. Some notices we have of their personal history, which will be found under their respective names, together with the principal legends, trustworthy or untrustworthy, which have come down to us respecting them. See Peter. James, John especially. As regards the apostolic office, it seems to have been predominantly that of founding the churches, and upholding them by supernatural power specially bestowed for that purpose. It ceased, as a matter of course, with its first holders—all continuation of it, from the very conditions of its existence (cf. 1 Cor. ix. 1), being impossible. The églises of the ancient churches existed with, and did not in any sense succeed, the Apostles; and when it is claimed for bishops or any church officers that they are their successors, it can be understood only chronologically, and not officially.

The work which contains the fullest account of the agency of the Apostles within the limits of the N. T. history is Neander's treatise, Gesch. der Pfanzung und Leitung der christlichen Kirche durch die Apostel, 4th edition, Hamburg, 1847. More ample, but far less interesting, notices may be found in Cave's Antiqu. Apost., or History of the Apostles, Lond. 1847.

A. *APOPHTHEGMATA* occurs in Neh. iii. 8 (A. V.) for διαφθοράς, supposed to mean "perfumers" or "makers of ointments" (in the Sept. strangely ἐπάργυρος, as a proper name). In this
peculiar as laying claim not to the revision of a sentence, but to a hearing at Rome before judgment had been rendered elsewhere. The point is not without its difficulty, and deserves a more specific notice.

Appeal in Roman law under the emperors (for this alone concerns us) proceeded on the principle that the emperor was the supreme judge, and all other judges, the provincial magistrates, for instance, his delegates. Such appeal from a decision in a province, when allowed, was authenticated by apostoli or litterae dismissiones, which contained a notice of the appeal to the higher court, and were accompanied by the necessary documents and evidence, etc. The appeal did not necessarily come before the emperor in the first instance, but he delegated the matter to subordinate persons, as to consular men, to the prefect of the city, and particularly to the prefect of the praetorium. Appeal was allowed in all sorts of cases, when a decision null and void had been given by the inferior court. Where the judgment was formally invalid, a querela nullitatis was necessary.

The apostle Paul, a Roman citizen, was brought to trial before the procurator of Judea on the charge of having profaned the temple and of having been "a mover of sedition among all the Jews throughout the world;" and to these offenses it was sought to attach political importance (Acts xxv. 8). If he had consented, a trial might have been held at Jerusalem before the procurator Festus. But Paul, fearing that he would be sacrificed to the malice of his enemies, if such a trial were held, made an appeal to the emperor, and Festus, after consulting with his consilium or assessors, allowed the appeal to take effect, glad, doubtless, to be freed from the responsibility of either irritating the Jewish leaders by acquitting Paul, or of pronouncing an innocent man guilty.

The peculiarity of this case consisted in this: that an appeal was taken before any condemnatory decision had been made, whereas an appeal implied a verdict. It is not easy to explain in this case of Paul's trial, or to illustrate it by analogous instances. The emperors, however, were wont, and sometimes from the best motives, to prevent the initiation or the continuance of a judicial proceeding (Geib, Gesch. d. röm. Criminalproces, p. 424). And Walter in his Gesch. d. röm. Rechts, ii. 147, says that a case was sometimes sent to the emperor by the procu
d for his settlement of it without a previous verdict, in support of which he cites Fronto, Epist. ad Miram, li. 15, but there is a mistake in the citation. The emperors' tribunici power could easily involve such a kind of appeal, which would be no stranger than to quash proceedings before a verdict (see Geib, as above). For appeal see the two writers referred to, and Rein in Paul's Recht-Eussel s. v. Appellatio.

T. D. W.

APHPHIA (Ἀποφθία, a Greek form of the Latin Appro, written 'Aπφθία, Acts xxviii. 13), a Christian woman addressed jointly with Philemon and Archippus in Philemon, 2 apparently a member of the former's household, seeing that the letter is on a family matter, and that the church that is in her house is mentioned next to these two, and not improbable his wife (Chrys., Theodoret). Nothing more is said or known of her.
The Arabsians make special allusion to the restorative properties of this fruit; and Celsus (p. 261) quotes Abn'l Fadli in illustration of Cant. ii. 5, "Comfort me with apples, for I am sick of love." Its scent," says the Arabic author, "cheers my soul, reneweth my strength, and restores my breath." Phylarchus (Hist. lib. vi.), Rabbi Solomon (in Numb. iv. 20), Maimon. (M. T., x. xi. 11), who uses the words odora praecipitamissimae, bear similar testimony to the delicious fragrance of the quince. It is well known that among the ancients the quince was sacred to the goddess of love; whence statues of Venus sometimes represent her with the fruit of this tree in her hand, the quince being the ill-fated "apple of discord" which Paris appropriately enough presented to that deity.

Other writers, amongst whom may be mentioned Dr. Boyle, deign to the opinion that the quince is the fruit here intended, and believe that the citrus (Citrus medica) has a far better claim to the byphagn of Scripture. The citrus belongs to the orange family of plants (Aurantioideae), the fruit of which tree, together with the lemon (C. limonum) and the lime (C. limetta), is distinguished from the orange by its oblong form and a protuberance at the apex. The name is as its name implies, borne on the top of Media (Theophrast. Plant. Hist. iv. 4, § 2); and according to Josephus (Ant. xiii. 13, § 5), branches of the citrus-tree were ordered by law to be carried by those persons who attended the Feast of Tabernacles, and to this day the Jews offer citrus at this feast; they must be "without blemish and the stalk must still adhere to them" (Script. Herb. p. 198). "The boughs of goodly trees" (Lev. xxiii. 40) may be several of the Jewish rabbis understood to be those of this tree (Celsus, Hierob. i. 20); and the citrus-tree is occasionally represented on old Samaritan coins. The rich color, fragrant odor, and handsome appearance of the tree, whether in flower or in fruit, are, Dr. Boyle asserts, "particularly suited to the passages of Scripture mentioned above." Dr. Thomson (Land and Book, p. 343), on the other hand, is in favor of the translation of the A. V., and has little doubt that quince is the correct rendering of the Hebrew word. He says, "The whole area (about Askelon) is especially celebrated for its apples, which are the largest and best I have ever seen in this country. When I was here in June, quite a caravan started for Jerusalem laden with them, and they would not have disgraced an American orchard. . . . The Arabic word for apple is almost the same as the Hebrew, and it is as perfectly definite, to say the least, as our English word—as much as the word for grape, and just as well understood; and so is that for citron; but this is a comparatively rare fruit. Citrons are also very large, weighing several pounds each, and are so hard and indigestible, that they cannot be used except when made into preserves. The tree is small, slender, and must be pruned up, or the fruit will bend it down to the ground. Nobody ever thinks of setting under its shadow, for it is too small and struggling to make a shade. I cannot believe, therefore, that it is spoken of in the Canticles. It can scarcely be called a tree at all, much less would it be singled out as among the choice trees of the wood. As to the smell and color, all the demands of the Biblical allusions are fully met.

* Apples and oranges (Malus domestica) have been grown in the Mediterranean region for centuries. They are both members of the Rosaceae family, which includes more than 100 species of flowering plants. Apples are typically used in cooking and as a fresh fruit, while oranges are commonly consumed as a fresh fruit and used in various culinary applications.

**Note:** The image contains a reference to a sentence that is not fully understandable due to the quality of the text. The sentence refers to a specific verse in the Bible, which is not visible in the image. The full context of the sentence is not provided. The text is a historical account of the apple and quince trees, mentioning their symbolic and cultural significance in ancient literature and scripture.
APPLE-TREE

by these apples of Askelon; and no doubt, in ancient times and in royal gardens, their cultivation was far superior to what it is now, and the fruit larger and more fragrant. Let *toppiwch* therefore stand for apple, as our translation has it.

Neither the quince nor the citron nor the apple, however, appears fully to answer to all the scriptural allusions. The *toppiwch* must denote some tree which is sweet to the taste, and which possesses some fragrant and restorative properties, in order to meet all the demands of the Biblical allusions. Both the quince and the citron may satisfy the last-named requirement, but it can hardly be said that either of these fruits is sweet to the taste. Dr. Thomson, in the passage quoted above, says that the citron is "too straggling to make a shade;" but in Cant. ii. 3 the *toppiwch* appears to be associated with other trees of the wood, and it would do no violence to the passage to suppose that this tree was selected from amongst the rest under which to recline, not on account of any extensive shade it afforded, but for the fragrance of its fruit. The expression "under the shade" by no means necessarily implies anything more than "under its branches."

But Dr. Thomson's trees were no doubt small specimens. The citron-tree is very variable as regards its size. Dr. Kitto (*Pict. Bib. on Cant. ii. 3*) says that it "grows to a fine large size, and affords a pleasant shade;" and Risso, in his *Histoire Naturelle des Oranges,* speaks of the citron-tree as having a magnificent aspect.

The passage in Cant. ii. 3 seems to demand that the fruit of the *toppiwch* in its unprepared state was sweet to the taste, whereas the rind only of the citron is used as a sweetmeat, and the pulp, though it is less acid than the lemon, is certainly far from sweet. The same objection would apply to the fruit of the quince, which is also far from being sweet to the taste in its uncooked state. The orange would answer all the demands of the scriptural passages, and orange-trees are found in Palestine; but there does not appear sufficient evidence to show that this tree was known in the earlier times to the inhabitants of Palestine, the tree having been in all probability introduced at a later period. As to the apple-tree being the *toppiwch,* most travelers assert that this fruit is generally of a very inferior quality, and Dr. Thomson does not say that he tasted the apples of Askelon. Moreover the apple would hardly merit the character for excellent fragrance which the *toppiwch* is said to have possessed. The question of identification, therefore, must still be left an open one. The citron appears to have the best claim to represent the *toppiwch,* but there is no conclusive evidence to establish the opinion. As to the *Apples of Sodom,* see Vine of Sodom.

The expression "apple of the eye" occurs in

Pot. ii. 10; Ps. xvii. 2; Prov. ivii. 2; Lam. ii. 18; Zech. ii. 8. The word is the representative of an entirely different name from that considered above; the Hebrew word being *toppiwch,* "a little man" — the exact equivalent to the English *pupil of the eye* is in the languages of different nations. Gesenius (*Thes. p. 86*) quotes from the Arabic, the Syriac, the Ethiopic, the Coptic, the Persian, in all of which tongues an expression similar to the English "pupil of the eye" is found. It is a pity that the same figure is not preserved in this English construction which invariably uses the expression "apple of the eye" (in allusion to its shape), instead of giving the literal translation from the Hebrew. W. H.

*PREPAREND* (as used in Phil. iii. 12, 13, of the A. V.) meant formerly "to take in the hand, or by the hand," (a Latin sense of the word.) Thus Jeremy Taylor (*Holy Living, ii. 6*) says: "There is nothing but hath a double handle, or at least we have two hands to apprehend it." Hence a more correct rendering would be: "If that I may lay hold (κατάλαβα) on that (φιλοκράτος) crown, very free, I was laid hold upon" (καταλαβόμενος). "Blest are ye that do not hold of myself to have laid hold," &c. The language is evidently figurative, derived from the contests of runners in the stadium. See GAMES.

AQUILA (Ἀκρίλας; Wolf, Curzer, on Acts xviii. 2, believes it to have been Grecised from the Latin Aquila, not to have any Hebrew origin, and to have been adopted as a Latin name, as Paulus by Saul), a Jew whom St. Paul found at Corinth on his arrival from Athens (Acts xviii. 2). He is there described as *Πορτινάζ ἀρτός* (ὅτε) from the connection of which description with the fact that we find more than one Pontius Aquila in the Pontian gnos at Rome in the days of the Republic (see Cic. ad Fam. x. 33; Suet. Caes. 78; *Dict. of Biog.,* art. AQUILA and PONTIUS), it has been imagined that he may have been a freedman of a Pontius Aquila, and that his being a Pontian by birth may have been merely an inference from his name. But besides that this is a point on which St. Luke could hardly be ignorant, Aquila, the translator of the O. T. into Greek, was also a native of Pontus. At the time when St. Paul met with Aquila at Corinth, he had fled, with his wife Priscilla, from Rome; for consequence of an order of Claudius commanding all Jews to leave Rome (Suet. Claud. 25) — "Judæos impulso Cæsare assidue tumultantes Roma expulsit:" see CLAUDIUS. He became acquainted with St. Paul, and they abode together, and wrought at their common trade of making the Cilician tent or hair-cloth (*Pallē*) on the departure of the apostle from Corinth, a year and six months after,

Aquila, and knew a little of horticulture, who assured me they were all QUINEX, the apples being admirable."

* In like manner Mr. Tristram says (*Land of Israel* p. 604) that he scarcely ever saw the apple-tree in the Holy Land except on a few high situations in Lebanon and in the region of Damascus. The question does not affect at all the accuracy of Scripture, but the meaning of *-appointed* which the A. V. renders "apple," Mr. Tristram concludes that it cannot be "the apple" that is intended, but is "the apicid."
PRISCILLA AND AQUILA ACCOMPANYED HIM TO EPHESUS ON HIS WAY TO SYRIA. THERE THEY REMAINED; AND WHEN APOLLO CAME TO EPHESUS, KNOWING ONLY THE BAPTISM OF JOHN, THEY TOOK HIM AND TAUGHT HIM THE WAY OF THE LORD MORE PERFECTLY. AT WHAT TIME THEY BECAME CHRISTIANS IS UNCERTAIN; BUT AQUILA WAS CONVERTED BEFORE HIS FIRST MEETING WITH ST. PAUL. THE WORD `APHISAPIA` WOULD HARDLY HAVE BEEN OMITTED (SEE AGAIN THIS VIEW NEUMER, *Pfl. u. Leit*, p. 292 f., AND FOR IT HERZOG, *Enzykol., s. v.*). AT THE TIME OF WRITING I COR., AQUILA AND HIS WIFE WERE STILL IN EPHESUS (1 COR. XIX. 19); BUT IN ROM. XIII. 31, WE FIND THEM AGAIN AT ROME, AND THEIR HOUSE A PLACE OF ASSEMBLY FOR THE CHRISTIANS. THEY ARE THERE DESCRIBED AS HAVING ENDANGERED THEIR LIVES FOR THAT OF THE APOSTLE. IN 2 TIM. IV. 19, THEY ARE SALUTED AS BEING WITH TIMOTHEUS, PROBABLY AT EPHESUS. IN BOTH THESE LETTERS THE PLACE OF THE PRISCAS AND NOT PRISCILLA IS NOTED.

Nothing further is known of either of them. The *Meyers Konversations- Lexicon* gives only a vague tradition that they were beheaded; and the *Morgenl. Rom.** celebrates both on July 8.

H. A.

* We must advert here to the question whether Luke mentions the Nazarite vow (Acts xviii. 18) of Aquila or the apostle Paul. The passage, grammatically viewed, no doubt should be understood of Aquila; and so much the more, it is urged, because Luke places Priscilla's name before Aquila's as if for the very purpose of showing that καταψυκτος belongs to Ακυλαία, and not Παίλος. So Gratian, Kuinoel, Wieseler, Meyer, and others.

On the contrary, Neumer, Olshausen, Hensen, De Wette, Winer, Wrede, Lechler (Lange's *Bibl. Lex.*), with others, refer the vow to the apostle, and not Aquila. Πάλασα is the leading subject, and the reader connects the remark spontaneously with him. It is only as an act of reflection, on perceiving that Ακυλαία stands nearer, that the other connection occurs to the mind as a possible one.

The intervening words (καὶ εἰς τὸν ἀρτέροι... Ἰταλόν) may separate καταψυκτος and Παίλασα from each other, because the clause is so evidently parenthetic, and because εἰς τὰ πανταχὖν has a tendency to draw its several subjects towards itself. No stress can be laid upon Luke's naming Priscilla, as is clear from Rom. xii. 2 and 2 Tim. iv. 19, where the names follow each other in the same manner. Some principle of association, as that of the relative superiority of Priscilla, seems to have made it customary to speak of them in that order. Dr. Howson (*Life and Epistles of St. Paul*, p. 498) maintains that Aquila assumed the vow; but in his *Bibl. Lex.* (p. 16, note) reverts from that opinion and ascribes the act to Paul.

AR

(AR) AND AR OF MOAB (.Border Map) 18

SAM. VERS. (.border Map) [Num. xxi. 15] TOP: [Deut. ii. 9, 18, Rom. Alex. *Apophh*; Vat. *Σεριρ*; 28, Rom. Vat. *Apophh, Alex. Arabia*, Comp. [Ar.] one of the chief places of Moab (Is. xvi. 1; Num. xxi. 28). From the onomasticon (Moab), and

a According to Gesenius (Joshua, p. 55), an old, probably Manitite, form of the word "Asher", a "city;" b Samarian Codex and Version, "as far as Moab," reading "Asher" for "Asher," and so also LXX. *εἰς Μ.*

We have Jerome's testimony that Aropulis was believed to be χαρτον "Apos môsis," "the city of Ares;" *Marc.* This is a good instance of the tendency which from Jerome's *Com. on Is. xvi. 1*, it appears that in that day the place was known as Aropolis and Rababbah-Moab, "id est, grandis Moab" (Rheing., p. 577; Rob. ii. 166, note).* The site is still called "Robba"; it lies about half-way between Kerak and the Wady Mejdeh, 10 or 11 miles from each, on the Roman road passing through it. The remains are not so important as might be imagined (Irby, p. 149; Burnell, p. 577; De Sauley, ii. 44-46, and map 8).

In the books of Moses Ar appears to be used as a representative name for the whole nation of Moab; see Deut. ii. 9, 18; and also Num. xxii. 15, where it is coupled with a word rarely if ever used in the same manner, Δέλλον Αρ., "the dwelling of Ar."

In Num. xxii. 36 the almost identical words Αραβία and Ar are rendered "a city of Moab," following the Sam. Vers., the LXX, and Vulgate. G.

* Ritter's view (referred to in the note) that Ar was not the present Robba, but was situated near Aror on the Arnon, is held also by Hengstenberg (Gesch. Blumen conexion, p. 234 f.), Keel (*Pentateuch* li. 146), and Kurtz (*Gesch. des A. Bandes*, ii. 448). Among the reasons on which they rely for this opinion, are that Ar formed the northern boundary of Moab (Num. xxii. 36, comp. xxii. 15), whereas Robba is 3 or 4 hours further south in the interior of Moab, and that Ar was in the Wady of the Arnon (Deut. ii. 36; Josh. xiii. 9) whereas Robba is not in that valley, but 10 miles or more distant from it. Bardinhard (*Syrinx*, ii. 636) found "a fine green pasture-land in which is a hill with important ruins," near the confluence of Wady Feynan and Wady Mejdeh (the Arnon) which may well be supposed to be the site of the ancient Ar. It is true, the name Aropolis, which was the Greek name of Ar, was applied also to Robba; but there is no proof that this was done till after the destruction of Ar by an earthquake in the 4th century B.C. (cf. *Jos.** xvi. 1*), and hence the name may have designated different places at different times. It is possible, as Ritter argues, that after the overthrow of Ar, the capital of the region, the name was transferred to Robba, which was the next in range and became then the seat of the episcopate, which had previously been at Ar. Dr. Robinson identifies Ar with Robba, but without specially noticing the objections to that view. The argument against that identification, and for supposing Ar to have been on the Arnon, is well stated in Kellers's *Bibl. Wirth*, p. 96. Rammer held at first a different opinion, but changed it in view of Hengstenberg's arguments (*Pentateuch*, p. 271, 4th Aufr.). Dietrich also agrees with Ritter, and distinguishes Ar from the present Robba in Moab (*Hebr. u. Chald. Handb., p. 680*).

ARAB (Arabic) [pers. liam = Aram; *Arab.*] One of the sons of Jether, the head of a family of Asherites (I Chr. xii. 38).

W. A. W.
Although but Jer. but Josh.

Looking to the indications of the Sacred Text there can be no doubt that in the times of the conquest and the monarchy the name "Arabah" was applied to the valley in the entire length of both its southern and northern portions. Thus in Deut. i. 1, probably, and in Deut. ii. 8, certainly (A. V. "plain" in both cases), the allusion is to the southern portion, while the other passages in which the name occurs, point with certainty — now that the identification has been suggested — to the northern portion. In Deut. iii. 17, iv. 49; Josh. iii. 16, xi. 2, xii. 3; and 2 K. xiv. 25, both the Dead Sea and the Sea of Chinneroth (Gennesareth) are named in close connection with the Arabah. The allusions in Deut. xi. 30; Josh. viii. 14, xii. 1, xviii. 18; 2 Sam. ii. 29, iv. 7; 2 K. xxiv. 4; Jer. xxxix. 4, iii. 7, become at once intelligible when the meaning of the Arabah is known, however puzzling they may have been to former commentators. * In Josh. xi. 16 and xii. 8 the Arabah takes its place with "the mountain," "the lowland," "the plains of Philistia and Esrauel, the south" and the "plain" of Celeno-Syria, as one of the great natural divisions of the conquered country.

3. But further the word is found in the plural and without the article (ןו*), also, always in connection with either Jericho or Moab, and therefore doubtless denoting the portion of the Arabah near Jericho; in the former case on the west, and in the latter on the east side of the Jordan; the Arabah-Moab being always distinguished from the Socal-Moab — the bare and burnt-up soil of the sunken valley, from the cultivated pasture or cornfields of the downs on the upper level — with all and "Arabah;" but it is difficult to say whether this has been done intelligently, or whether it is an instance of the favorite habit of these translators of transferring a Hebrew word literally into Greek when they were unable to comprehend its force. (See some curious examples of this — to take one book only — in 2 K. ii. 14, אֲדוֹנָי; iii. 4, וָנָּא; iv. 39, ברֹאשׁ; v. 18 (comp. Gen. xxxvi. 10), כְּשָׁרָה; vi. 8, כְּשָׁרָה; ix. 13, נַחֲלָה, &c. &c.). In the latter case it is evidence of an equal ignorance to that which has rendered the word by שָׁרוֹאָל, כְּשָׁרָה, and "Arabia*.

b By Abulfeda and Ibn Haukal the word el-Ghor is used to denote the valley from the Lake of Gennesareth to the Dead Sea (Ritter, Sinait, pp. 1059, 1060). Thus each word was originally applied to the whole extent, and each has since been restricted to a portion only (see Stanley, App. p. 487). The word Ghor is interpreted by Freytag to mean "locus depressus inter montes."

c See the mistakes of Michaelis, Marius, and others, who identified the Arabah with the Beksa (i.e. the plain of Celeno-Syria, the modern el-Dikwa), or with the Mishor, the level down to the east of Jordan (Kelly, pp. 215, 223).
The precise location of the ancient city of Arabah in the Bible is uncertain. However, it appears in the Books of Numbers and Deuteronomy. The city is mentioned in connection with the Promised Land and the wilderness. The people of Israel passed through Arabah on their journey from Egypt to the Promised Land. The region is characterized by a large, open valley that stretches from the Dead Sea to the Gulf of Elath, with a series of wadis and wadis running through it. The landscape is rocky, with limestone and granite formations, and is known for its beauty and natural resources.

The description of Arabah in the Bible suggests that it is a place of stark contrast, with its wadis and wadis carrying water that is either too hot or too cold for human use. The region is also known for its mineral springs, which have been used for centuries by those who inhabit the area. The landscape is dotted with small villages and towns, and is home to a variety of flora and fauna, including birds and animals that have adapted to the harsh conditions of the desert.

The description of Arabah in the Bible also suggests that it is a place of national and religious significance. The region is mentioned in the stories of the Israelites' journey through the desert, and is associated with the Israelites' victory over their enemies. The region is also associated with the region of the Promised Land, and is seen as a place of promise and hope for the Israelites.

Overall, the description of Arabah in the Bible suggests that it is a place of beauty and natural wonder, but also of harsh conditions and challenges. The region is a place of stark contrast, where the landscape is both beautiful and barren, and is home to a variety of flora and fauna that have adapted to the harsh conditions of the desert.
in the sand of the Arabah, "in a few paces" after they forsake the shadow of their native ravines (Labarde, 141), are yet sufficient to keep alive a certain amount of vegetation, rushes, tarnarsiks, palms, and even olivers, elbes, and ammons, while they form the resort of the numerous tribes of the children of Esau, who still "dwell (Stanley, p. 87, also M. S. Journal; Laburde, p. 141; Mart. p. 396) in Mount Seir, which is Edom" (Gen. xxxvi. 8). The most important of these waddies are the Wady Ithun (Jeboun of Laburde), and the Wady Abu Kusheibch. The former enters the mountains close above the Akalah and leads by the back of the mountains to Petra; and the latter, as Schubert and Tullel to the country east of the Dead Sea. 

Traces of a Roman road exist along this route (Laburde, p. 203; Rob. ii. 161); by it Laburde returned from Petra, and there can be little doubt that it was the route by which the Israelites took their leave of the Arabah when they went to "compass the land of Edom" (Num. xxxi. 4). The second, the W. Abu Kusheibch, is the most direct access from the Arabah to Petra, and is that up which Laborde and his party ascended to have gone to the city. Beside these are the Wady Tabal, in which the traveller from the south gains his first glimpse of the red sandstone of Edom, and W. Ghardab, not to be confounded with those of the same name north of Petra and west of Sinai.

To Dr. Robinson is due the credit of having first ascertained the spot which forms at once the southern limit of the Ghor and the northern limit of the Arabah. This boundary is the line of chalk cliffs which sweep across the valley at about 6 miles below the S. W. corner of the Dead Sea. They are from 50 to 150 feet in height; the Ghor ends with the marshy ground at their foot, and level with their tops the Arabah begins (Rob. ii. 116, 118, 120). Thus the cliffs act as a retaining wall or buttress supporting the higher level of the Arabah, and the whole forms what in geological language might be called a "fault" in the floor of the great valley. 

Through this wall breaks in the escarpment of the great main drain of the Arabah — the Wady el-Feib — in itself a very large and deep water-course which collects and transmits to their outlet at this point the torrents which the numerous waddies from both sides of the Arabah pour along it in the winter season (Rob. ii. 118, 129, 125). The furthest point south to which this drainage is known to reach is the Wady Ghurundel (Rob. ii. 125), which debouches from the eastern mountains about 40 miles from the Akalah and 60 from the cliffs just spoken of. The Wady el-Feib also forms the most direct road for penetrating into the valley from the north. On its west bank, and crossed by the road from Wady Musa (Petra) to Hebron, are the springs of Ain el-Weibeh, maintained by Robinson to be Kadesh (Rob. ii. 175; but see Stanley, pp. 93, 95).

Of the substructure of the floor of the Arabah very little is known, but his progress southward along the Wady el-Feib, which is 87 miles of its course over 100 feet in depth, Dr. Robinson (ii. 119) notes that the sides are "of chalky earth or marl," but beyond this there is no information.

The surface is dry and desolate in the extreme. "A more frightful desert," says Dr. Robinson (ii. 121) "it had hardly been our lot to behold ... loose gravel and stones everywhere furrowed with the beds of torrents ... blocks of porphyry brought down by the torrents among which the camel picked their way with great difficulty ... a bone shrub of the ghiblih, almost the only trace of vegetation." This was at the ascent from the Wady el-Feib to the floor of the great valley itself. Further south, near Ain el-Weibeh, it is a rolling gravelly desert with round naked hills of considerable elevation (ii. 173). At Wady Gharandel it is an expanse of shifting sands, broken by mounds of inconceivable and low hills (Burckh. p. 442), and "intersected by a hundred water-courses" (Stanley, p. 87). The southern portion has a considerable general slope from east to west quite apart from the undulations of the surface (Stanley, p. 85), a slope which extends as far north as Petra (Schubert, p. 1037). Nor is the heat less terrible than the desolation, and all travellers, almost without exception, bear testimony to the difficulties of journeying in a region where the sirocco appears to blow almost without intermission (Selim, p. 1016; Burckh. p. 144; Mart. p. 394; Rob. ii. 123). However, in spite of this heat and desolation, there is a certain amount of vegetation, even in the open Arabah, in the driest parts of the year. Schubert in March found the Arcti (Calligonum com.), the Anthriscus carum, and the Cyclomum (Ritter, p. 1014), also tarnarsik-bushes (tayasa) lying thick in a torrent-bed (p. 1016); and on Stanley's road "there is the appearance of a jumble," though it is true that they were so thin as to disappear when the "waste of sand" was overlooked from an elevation (85, and see Rob. i. 163, 175).

It is not surprising that after the discovery by Burckhardt in 1812 of the prolongation of the Jordan valley in the Arabah, it should have been assumed that this had in former times formed the outlet for the Jordan to the Red Sea. Lately, however, the levels of the Jordan and the Dead Sea have been taken, imperfectly, but still with sufficient accuracy to dispise the possibility of such a theory; and in addition there is the universal testimony of the Arabs that at least half of the dis-
ARABATTINE

strict drains northward to the Dead Sea—a testimony fully confirmed by all the recorded observations of the conformation of the ground. A series of accurate levels from the Akabah to the Dead Sea, up the Arakah, are necessary before the question can be set at rest, but in the mean time the following may be taken as an approximation to the real state of the case.

1. The waters of the Red Sea and of the Mediterranean are very nearly at one level.

2. The depression of the surface of the Sea of Galilee is 502 feet, and of the Dead Sea 3166 feet, below the level of the Mediterranean, and therefore of the Red Sea. Therefore the waters of the Jordan can never in historical times have flowed into the Gulf of Akabah, even if the formation of the ground between the Dead Sea and the Gulf would admit of it.

3. All testimony goes to show that the drainage of the northern portion of the Arakah is towards the Dead Sea, and therefore that the land rises southward from the latter. Also that the south portion drains to the gulf, and therefore that the land rises northward from the gulf to some point between it and the Dead Sea. The watershed is said by the Arabs to be a long ridge of hills running across the valley at 2 miles, or say 40 miles, from the Akabah (Stanley, p. 83), and it is probable that this is not far wrong. By M. de Bertou it is fixed as opposite the entrance to the Holy Tush, apparently the same spot.

G. ARABATTINE (ἡ Ἑράμπατίνη; Alex. Sin. Ἀραβάττινη; Accurate name, in Idmane (1 Mac. v. 3). [Ἀράβαττινα; and see the note to that article.]

G. ARABIA (Ἀράβια, Gal. i. 17, iv. 25), a country known in the O. T. under two designations:—1. Ἀράβια Λεβαντική, the coast country (Gen. xxx. 6); or perhaps Ἀράβια Ἕβραι, (Gen. x. 50; Num. xxii. 7; Is. ii. 6); and Ἀράβια Ἐρυθρά, (Gen. xxix. 1); gent. n. "Haram, sons of the East (Judg. vi. 3 ff.; I K. iv. 50; Job i. 3; Is. xi. 14; Jer. xxii. 28; Ez. xxvii. 4). (Translated by the LXX. and in the Vulg. and sometimes transcribed (Kabya) by the former.) From these passages it appears that Ἀράβια Ἑραματική and Ἀράβια Ἐρυθρά indicate, primarily, the country east of Palestine, and the tribes descended from Ishmael and from Keturah; and that this original significance may have become gradually extended to Arabia and its inhabitants generally, though without any strict limitation. The third and fourth passages above referred to, as terminus marks (i.e. ed. Tréglés, in loc.), relate to Mesopotamia and Babylonia (comp. ἱπποχωρία, Matt. ii. 1 ff). Winer considers Kedem, &c., to signify Arabia and the Arabs generally (Real. world, loc. cit.); but a comparison of the passages (Schubert's interpretation is founded on) has led us to consider it doubtful. [BENEDICTUS].

ARABIA

(xxv. 21; Ez. xxvii. 21); gent. n. Ἀράβιοι (Is. xiii. 20; Jer. iii. 2); and Ἀράβης (Neh. ii. 19). pl Ἀράβιται (2 Chr. xxi. 16, xxii. 1), and Ἀράβες, Ἀράβων (2 Chr. xxvii. 11, xxvii. 7). (LXX. Ἀραβία, &c.; Vulg. Arabiae, &c.) These seem to have the same geographical reference as the former names to the country and tribes east of the Jordan, and chiefly north of the Arabian peninsula. In the N. T. Ἀραβία cannot be held to have a more extended signification than the Hebrew equivalents in the O. T. Ὄδος Ἀραβίας (Ex. xiii. 38; Neh. xiii. 3) and Ἀραβία (1 K. x. 15; Jer. xxv. 20, l. 37; Ez. xxx. 5), rendered in the A. V. "a mixed multitude" (Ex. xiii. 38, here followed by Πύλας), "the mixed multitude," "kings of "Arabia" (so in Vulg., and in Heb. in corresponding passage in 2 Chr. ix. 14), and (in the last two instances) "the mingled people," have been thought to signify the Arabs. The people thus named dwelt in the deserts of Petra. By the Arabs the country is called بِلَاد أَلْعَبَرُ (Bilad El-'Arab), "the country of the Arab," and حُرْبَةُ الْعَرَبِ (Jezreel El-'Arab), "the peninsula of the Arabs," and the people عَبَرُ (Arab); "Bedawee" in modern Arabic, and "Arab (أُرَابِ) in the old language, being applied to people of the desert, as distinguished from townspeople. They give no satisfactory derivation of the name "Arab, that from Aaqib being purlicie. The Hebrew designation, "Arab, has been thought to be from "Arabah, a desert," &c., which, with the article, is the name of an extensive district in Arabia Petrea.

Geographical Divisions. Arabia was divided, by the Greeks, into Araba Felix (ἡ εὐπρόοιος Ἀράβα), Araba Deserta (ἡ ἄπροοιος Ἀράβα), (Strab. xvi. p. 767; Plin. vi. 28; 52; Diod. Sic. i. 48 ff.), and Araba Petraea (ἡ πετραία Ἀράβα, Pl. v. 17, § 1). The first two divisions were those of the earlier writers; the third being introduced by Ptolemy. According to this geographer's arrangement, they included, within doubtful limits, 1, the whole peninsula: 2, the Arabian desert north of the former: and 3, the desert of Petra, and the peninsula of Sina. It will be more convenient in this article to divide the country, agreeably to the natural divisions and the native nomenclature, into Araba Propria, or Jezreel El-'Arab, containing the whole peninsula as far as the limits of the northern deserts; Northern Araba, or El-Hadiyyah, bounded by the peninsula, the Euphrates, Syria, and the desert of Petra, constituting properly Araba Deserta, or the great desert of Arabia; and Western Araba, the desert of Petra and the peninsula of Sina, or the country that has been called Araba Petraea, bounded by Egypt, Palestine, Northern Arabia, and the Red Sea.

1 See the Report of Mr. Robert Stephenson, and of M. Baudouin, quoted in Albin's Report for 1863. Schubert's topographical observations are not very intelligible, but they at least show this: at the end of the 29th day his halting-place was 465 ft. above the water of the Gulf; 31 days, 167 ft.; 48th day, 230 ft. Then, after leaving Petra, his halting-place (in the Akabah) was 97 ft. below the water of the Gulf (Schubert: Ritter, Sinai, p. 196).

2 See in Palm respecting his journey to Arabia (Gal. i. 17).
Arabia Proper, or the Arabian peninsula, consists of high tablelands, declining towards the northwestern and southwestern, and separated partially by a chain of mountains running nearly parallel to the Red Sea, and the territory east of the southern part of this chain. The high land is enclosed from the 'Arabah to the head of the Persian Gulf by a belt of low littoral country; on the west and southwest the mountains fall abruptly to this low region: on the opposite side of the peninsula the fall is generally gradual. So far as the interior has been explored, it consists of mountainous and desert tracts, relieved by large districts under cultivation, well-peopled, watered by wells and streams, and enjoying periodical rains. The water-shed, as the confirmation of the country indicates, stretches from the high land of the Yemen to the Persian Gulf. From this descend the torrents that irrigate the western provinces, while several considerable streams — there are no navigable rivers — reach the sea in the opposite direction: two of these traverse 'Oman; and another, the principal river of the peninsula, enters the Persian Gulf on the coast of El-Bahrayn. It is known to traverse the inland province called Yemenih. The geological formation is in part volcanic; and the mountains are basalt, schist, granite, as well as limestone, &c.; the volcanic action being especially observable about El-Medmeench on the northwest, and in the districts bordering the Indian Ocean. The most fertile tracts are those on the southwest and south. The modern Yemen is especially productive, and at the same time, from its mountainous character, picturesque. The settled regions of the interior also appear to be more fertile than is generally believed to be the case; and the deserts afford pasturage after the rains. The principal products of the soil are date-palms, tamarix-trees, vines, fig-trees, tamarisks, acacias, the banana, &c., and a great variety of thorny shrubs, — which, with others, afford pasture for the camels, — the chief kinds of pulse and cereals (except oats), coffee, spices, drugs, gums and resins, cotton and sugar. Among the metallic and mineral products are lead, iron, silver (in small quantities), sulphur, the emerald, onyx, &c. The products mentioned in the Bible as coming from Arabia will be found described under their respective heads. They seem to refer, in many instances, to merchandise from the Far East, brought by Arab and other traders. Gold, however, was perhaps found in small quantities in the beds of torrents (comp. Diod. Sic. ii. 34, ii. 45, 47); and the spices, incense, and precious stones, brought from Arabia (1 K. x. 2, 10, 15; 2 Chr. ix. 1, 9, 14; Is. ix. 6; Jer. vi. 20; Ez. xxvii. 22), probably were the products of the southern provinces, still celebrated for spices, frankincense, ambergris, &c., as well as for the products of India, carried on the Arabian coasts. Among the more remarkable of the wild animals of Arabia, besides the usual domestic kinds, and of course the camel and the horse, for both of which it is famous, are the wild ass, the musk-deer, wild goat, wild sheep, several varieties of the antelope, the hare, monkeys (in the south, and especially in the Yemen); the bear, leopard, wolf, jackal, hyena, fox; the eagle, vulture, several kinds of hawks, the pheasant, red-legged partridge (in the peninsula of Sinai), sand-grouse (throughout the country), the varlich (abundantly in Central Arabia, where it is hunted by Arab tribes); the tortoise, serpents, lizards, &c. Lions were formerly numerous, as the names of places testify. The sperm-whale is found off the coasts bordering the Indian Ocean. Greek and Roman writers (Herod., Agatharch. op. Maller, Diod., Diod. Sac., Philo, Hérod. Héliod., & alii.) mention most of the Biblical and modern products, and the animals, above enumerated, with some others. (See the Dictionary of Geography.)

Arabia Proper may be subdivided into five principal provinces: the Yemen; the districts of Hadramiwt, Mahar, and 'Omam, on the Indian Ocean; and the entrance of the Persian Gulf; El-Bahrayn, towards the head of the Gulf just named; and the great central country of Nejd and Yemenih; and the Hijaz and Tihmeh on the Red Sea. The Arabs also have five divisions, according to the opinion most worthy of credit (Moravici, ed. Juvansull, in roe. Hijaz; comp. Strabo, Tihmeh, the Hijaz, Nejd, El-'Arool (the provinces lying towards the head of the Persian Gulf, including Yemenih), and the Yemen (including Oman and the intervening tracts). They have, however, never agreed either as to the limits or the number of the divisions. It will be necessary to state in some detail the positions of these provinces, in order to the right understanding of the identifications of Biblical with Arab names of places and tribes.

The Yemen embraced originally the most fertile districts of Arabia, and the frankincense and spice country. Its name, signifying "the right hand," and therefore "south," (comp. Matt. xii. 42,) is supposed to have given rise to the appellation esdahna (Felix), which the Greeks applied to a much more extensive region. At present, it is bounded by the Hijaz on the north, and Hadramiwt on the east, with the sea-board of the Red Sea and the Indian Ocean; but formerly, as Fresnel remarks (comp. Sale, Prelim. Disc.,) it appears to have extended at least so as to include Hadramiwt and Mahar (Bun-Eil-Wardee, M.S.; Yakost's Madhura, ed. Wüstenfeld, and Moravici, præs.), and was in this wider acceptation, it embraced the region of the first settlements of the Joktanites. Its modern limits include, on the north, the district of Klüvian (not, as Niebuhr supposes, two distinct districts), named after Klüviém (Kiwos), the Joktante (Moravici, in roe., and Caussin de Perceval, Essai sur l'Hist. des Arabes avant l'Islamisme, i. 113); and that of Neirum, with the city of that name founded by Neirum the Joktanite (Caussin, i. 50, and 113 ff.), which, is according to the soundest opinion, the Negro of Elus Gallus (Strab. xvi. 782; see Jonnard, Études geogr. et hist. sur l'Arabie, appended to Mengin, Hist. de l'Egypte, &c., iii. 385-8). Hadramiwt, on the coast east of the Yemen, is a cultivated tract contiguous to the sandy deserts called El-Alkhid, which are said to be the original type of the semi-deserts of the desert, and Garamantes. It was celebrated for its frankincense, which it still exports (El-Idreesee, ed. Iaunbert, i. 54), and formerly it carried on a considerable trade, its principal port being Zafari, between Mirhut and Ras Sajir, which is now composed of a series of villages (Fresnel, 4e Lettre, Journ. Asiat. (ii. Série, v. 821). To the east of Hadramiwt are the districts of Shihar, which exported ambergris (Moravici, in roe.), and Mahar (so called after a tribe of Kushitah (Ib. in roe.), and therefore Joktanites), extending from Seyhoot to Karwil (Fresnel, 4e Lettre, p. 510). 'Omam forms the easternmost corner of the south coast, lying at the entrance of the Persian Gulf. It presents the same natural charac
characteristics as the preceding districts, being partly desert with large fertile tracts. It also contains some considerable head-numeric.

The highest province on the Persian Gulf is El-Bahrayn, between 'Quran and the head of the Gulf, of which the chief town is Hejer according to some; the name of the province also (καρατζα, Harrat, in roc.) It contains the towns (and districts) of Katteef and El-Abas (El-Heresse, i. 571; Musecquit, in roc.; Majdsher, in roc. El-Abis), the latter not being a province, as has been erroneously supposed. The inhabitants of El-Bahrayn dwelling on the coast are principally fishermen and pearl-divers. The district of El-Abis abounds in wells, and possesses excellent pastures, which are frequented by tribes of other parts.

The great central province of Nejd, and that of Yemen, which bounds it on the south, are little known from the accounts of travellers. Nejd signifies “high land,” and hence its limits are very doubtfully laid down by the Arabs themselves. It consists of cultivated table-land, with numerous wells, and is celebrated for its pastures; but it is intersected by extensive deserts. Yemenich appears to be generally very similar to Nejd; but it is distinguished by the great desert called El-Rabia el-Khoud, uninhabitable in the summer, but yielding pasture in the winter after the rains. The camels of the tribes inhabiting Nejd are highly esteemed in Arabia, and the breed of horses is the most famous in the world. In this province are said to be remains of very ancient structures, similar to those east of the Jordan.

The Hijaz, and Tihamah (or El-Ghir r, the “low land”), are bounded by Nejd, the Yemen, the Red Sea, and the desert of Petra, the northern limit of the Hijaz being Elaych (El-Makreresse’s Khilai, in roc. Eyleh). The Hijaz is the holy land of Arabia, its chief cities being Meckkah and El-Medineeh, and it was also the first seat of the Ishmaedites in the peninsula. The northern portion is in general sterile and rocky; towards the south it gradually merges into the Yemen, or the district called El-Aseer, which is but little noticed by either eastern or western geographers (see Joseph, p. 245 ff.). The province of Tihamah extends between the mountains-plain of the Hijaz, and the shore of the Red Sea; and is sometimes divided into Tihamah of the Hijaz, and Tihamah of the Yemen. It is a patched, sandy tract, with little rain, and fewer pasturages and cultivated portions than the mountainous country.

Northern Arabia, or the Arabian Desert (البادية) is divided by the Arabs (who do not consider it as strictly belonging to their country) into Haidjet Esh-Sharm, “the desert of Syria,” Haidjet el-Jezirah, “the desert of Mesopotamia” (not “— of Arabia,” as Winer supposes), and Haidjet el-Itrak, “the desert of El-Itrak.” It is, as far as it is known to us, a high, undulating, sandy plain, of which the Emprates forms the natural boundary from the Persian Gulf to the frontier of Syria, whence it is bounded by the latter country and the desert of Petra on the north-west and west, the peninsula of Arabia forming its southern limit. It has few courts, the water of the wells is generally either brackish or impotable, and is visited by the sand-wind called Samoun, of which however the terriers have been much exagger.

The Arabs find pasture for their flocks and herds after the rains, and in the more depressed plains; and the desert generally produces prickly shrubs, &c., on which the camels feed. The inhabitants were known to the ancients as canepira, “dwellers in tents,” or perhaps so called from their hair, which projects in long curls (Strab. xvi. 747. Note 36; Diod. iv. 24; Amm. Marc. xiii. 6; comp. Is. xxii. 29.; Jer. xlix. 31; Ezck. xxxviii. 11); and they extended from Babylonia on the east (comp. Num. xxi. 7; 2 Chr. xvi. 21; Is. ii. 6, xiii. 29), to the borders of Egypt on the west (Strab. xvi. 748; Pim. v. 12; Amm. Marc. xiv. 4, xvi. 15). These tribes, principally descended from Ishmael and from Keturah, have always led a wandering and pastoral life. Their predatory habits are several times mentioned in the O.T. (2 Chr. xvi. 16 and 17, xxvii. 7; Job i. 15; Jer. iii. 2). They also conducted a considerable trade of merchandise of Arabia and India from the shores of the Persian Gulf (Ezek. xxvii. 20-24), whence a chain of houses still forms caravan stations (Barekhardi, Arabes, Appendix i.); and they likewise traded from the western portions of the peninsula. The latter traffic appears to have been more frequently frequented by the Ishmaelites, Keturahites, and other Arabian peoples (Gen. xxvii. 25, 28; 1 K. x. 15, 25; 2 Chr. ix. 14, 24; Is. k. 6; Jer. vi. 20), and probably consisted of the products of southern Arabia and of the opposite shores of Ethiopia; it seems, however, to have been chiefly in the hands of the inhabitants of Isumma; but it is difficult to distinguish between the references to the latter people and to the tribes of Northern Arabia in the passages relating to this traffic. That certain of these tribes brought tribute to Jehoshaphat appears from 2 Chr. xiii. 23, xiv. 11; and elsewhere there are indications of such tribute (comp. passages referred to above).

Western Arabia includes the peninsula of Sinai (Sinai), and the desert of Petra, corresponding generally with the limits of Arabia Petraea. The latter name is probably derived from that of its chief city, not from its story character. It was in the earliest times inhabited by a people whose genealogy is not mentioned in the Bible, the Horites or Horim (Gen. xiv. 6, xxxii. 20, 21; Dent. ii. 1. 22, xxxvi. 20-22). [Horites.]: Its later inhabitants were in part the same as those of the preceding division of Arabia, as indeed the boundary of the two countries is arbitrary and unsettled; but it was mostly peopled by descendants of Esau, and generally known as the land of Edom, of Idumaa [Edom], as well as by its older appellation, the desert of Sin, or Mount Seir [Sin]. The common origin of the Edomians from Esau and Idumaa is found in the marriage of the former with a daughter of the latter (Gen. xxviii. 9, xxxv. 3). The Nabataeans succeeded to the Idumaeans, and Idumaa is mentioned only as a geographical designation after the time of Josephus. The Nabataeans have always been identified with Nebatae, son of Ishmael, and the Nabataeans [Nabathaean] (Nabathaean) advanced the theory that they were of another race, and a people of Mesopotamia. [Nabathene]: Petra was in the great route of the western camel-traffic of Arabia, and of the merchandise brought up the Elomite Gulf. See preceding section, and Edom ELAM, EDOM-EDUM, &c.

Inhabitants. — The Arabs, like every other an

a In this section is included the history. The Arab
nant nation of any celebrity, have traditions representing their country as originally inhabited by races which became extinct at a very remote period. These were the tribes of 'A'd Thamood, Unneryum, Abeel, Taam, Jekos, Taneke (Analek), Jurheim (the Beni Jurheim, the fourth, and the last two, but add Jasim. The majority of their historians derive these tribes from Shem; but some, from Ham, though not through Cush. Their earliest traditions that have any obvious relation to the Bible refer the origin of the existing nation in the first instance to Kahtain, whom they and most European scholars identify with Joktan; and secondly to Islamad, whom they assert to have married a descendant of Kahtain, though they only carry up their genealogies to 'Adram (said to be of the 21st generation before Mohammed). They are silent respecting Cushite settlements in Arabia; but modern research, we think, proves that Cushites were among its early inhabitants. Although Cush in the Bible usually corresponds to Ethiopia, certain passages seem to indicate Cushite peoples in Arabia; and the series of the Cush should accelerate the discoveries, be sought for in order along the southern coast, exclusive of Saba (Meroi), occupying one extreme of their settlements, and Nineim the other. The great riches of Ma-rib and Sela, and of other places in the Yemen and Hadramaut, are not those of a Semitic people; and further to the east, the existing language of Mahrez, the remnant of that of the inscriptions found on the ancient remains just mentioned, is in so great a degree applicable to Africa, as to be called by some scholars Cushite; while the settlements of Wadiaw and those of his sons Sela and Dedan are probably to be looked for towards the head of the Persian Gulf, bordered on the north by the descendants of Keturah, bearing the same names as the two latter. In Babylonia also independent proofs of this immigration of Cushites from Ethiopia have been thought, been lately obtained. The ancient cities and buildings of southern Arabia, in their architecture, the inscriptions they contain, and the native traditions respecting them, are of the utmost value in aiding a student of this portion of primeval history. Indeed they are the only important archeological monuments of the country; and they illustrate both its earliest peoples and its greatest kingdoms. Ma-rib, or Sela (the Marib of the Greek geographers), is one of the most interesting of these sites. See Michaelis's "Questions, No. 94, &c. in Niebuhr's "Arabia." It was founded, according to the general agreement of tradition, by 'Abel-shehr Shems Sela, grandson of Yaarub the Kahtinite (Masbaham, in loc.; Abel-Idha, Hist. antica, ed. Fleischer, p. 114); and the Dyke of El-Arin, which was situated near the city, and the rupture of which (A. D. 150-170 according to De Saucy; 120 according to Cassius de Perceval) formed an era in Arabian history, is generally ascribed to Lukan the Greater, the 'A'dite, who founded the dynasty of the 21 'A'd (Bin-El-Wardee MS.; Hanza Isphahanaeus, pp. Schleierm. 24-5; El-Mes- couple, cited by De Saucy, "Mte. de la PAc.," xviii. p. 484 f.; and Ibn Khaldoon in Cassius's "Ess. s., i. 15); 'A'dites (in conjunction with Cushites) were probably the founders of this and similar structures, and were succeeded by a predominantly Joktanite people, the Biblical Sela, whose name is preserved in the Arabian Sela, and in the Sebei of the Greeks. It has been argued (Cassius, "Ess. s., i. 42 f.; Rennan, "Linguæ Semiticae," i. 500) that the 'A'dites were the Cushite Sela; but this hypothesis, which involves the question of the settlements of the eldest son of Cush, and that of the descent of the 'A'dites, rests solely on the existence of Cushite settlements in southern Arabia, and of the name of Sela (مسب) in the Yemen (by these writers inferentially identified with "Nap"; by the Arabs, unanimously, with Sela the Kahtinite, or "Neap:" the Hebrew śā'īn being, in by far the greater number of instances, sēn in Arabic); and it necessitates the existence of the two Biblical kingdoms of Saba and Sela in a circumscribed province of southern Arabia, a result which we think is irreconcilable with a careful comparison of the passages in the Bible bearing on this subject. [CUSHI, SEBA, SHEBA.] Neither is there evidence to indicate the identity of 'A'd and the other extinct tribes with any Semitic or Hamitic people. They must, in the present state of knowledge, be classed with the Kaphim and other peoples whose genealogies are not known to us. The only one that can possibly be identified with a Scriptural name is Analek, whose supposed descent from the grandson of Esau seems inconsistent with Gen. xiv. 7 and Num. xxiv. 20. [ANKAL.] The several nations that have inhabited the country are divided, by the Arabs, into extinct and existing tribes; and these are again distinguished as 1. El-'Arab el-'A'rib (or — or — or el-'A'rib), the Pure or Genuine Arabs; 2. El 'Arab el-Muta'-arrib (or — or — or —), the Arab and the Most Arab, the Institutions, or Naturalized, Arabs. Of many conflicting opinions respecting these races, two only are worthy of note. According to the first of these, El-'Arab el-'A'rib denotes the extinct tribes, with whom some conjoin Kahtain; while the other two, as synonymous appellations, belong to the descendants of Islamad. According to the second, El-'Arab el-'A'rib denotes the extinct tribes; El-'Arab el-Muta'-arrib, the umixed descendants of Kahtain; and El-'Arab el-Muta'-arrib the descendants of Islamad, by the daughter of Madik the Joktaite. That the descendants of Joktan occupied the principal portions of the south and southwest of the peninsula, with colonies in the interior, is attested by the Arabs and fully confirmed by historical and philological researches. It is also asserted that they have been generally abjectly reconciling contradictory opinions; and his identifications of these with other tribes are purely hypothetical.

1. Sela was the city of Marib (Masbaham, in loc.), or the country in the Yemen of which the city was Masrib (Marib, in loc.). See also Sheba.

2. El-'Arab el-'A'rib is conventionally applied by the lexicographers to all who spoke pure Arabic before its corruption began.
wounded into the Ishmaelite immigrants, though not without leaving strong traces of their former existence. Fresnel, however (in Lettre, p. 24), says that they were quite distinct, at least in Mohammedi's time, and it is not unlikely that the Ishmaelite element has been exaggerated by Mohammedian influence.

Respecting the Joktanite settlers we have some certain evidence. In Genesis (x. 30) it is said, and their dwelling was from Medea, as thou goest unto Sephar, a mount of the east [Kedem]."

The position of Medea is very uncertain: it is most reasonably supposed to be the western limit of the first settlers [Musita]. Sephar is undoubtedly Dhiifar, or Zafiri, of the Arabs (probably pronounced, in ancient times, without the final vowel, as it is at the present day), a name not uncommon in the peninsula, but especially that of two celebrated towns— one being the seaport on the south coast, near Mirbat; the other, now in ruins, near Sun'a, and said to be the ancient residence of the Himyerite kings (Es-Saghane, MS.: Ḏhaidīrak, in roc.; Marisid, ds; El-Ibirosei, i. 148). Fresnel (in Lettre, p. 516 ff.) prides the seaport, as the Himyerite capital, and is followed by Jomard (Études, p. 357). He informs us that the inhabitants call this town by ʿAṣ̄al, and that the position of the Joktanite races, this is probably Sephar. It is situated near a thritherous mountain (Musbaq, in roc.), and exports the best frankincense (Nielander, i. 148). Zafiri, in the Yemen, however, is also among mountains [SEPAH]. In the district indicated above are distinct and undoubted traces of the names of the sons of Joktan mentioned in Genesis, such as Hadramawt for Hazar-matheth, ʿAṣ̄al for Uzal, Selah for Sheba, &c. Their remains are found in the existing inhabitants of (at least) its eastern portion, and their records in the numerous Himyerite ruins and inscriptions.

The principal Joktanite kingdom, and the chief state of ancient Arabia, was that of the Yemen, founded (according to the Arabs) by Yarub, the son (or descendant) of Kahim (Joktan). Its most ancient capital was probably Sun'a, formerly called \[\text{Azal} (אָזַל), or אַזְאַל in the Marisid, in roc.\]

Sun'a, after ʿAṣ̄al, son of Joktan (Yākūt). [Uza]. The other capitals were Marib, or Sela, and Zafiri. This was the Biblical kingdom of Sheba. Its rules, and most of its people, were descendants of Selah (Sheba), whence the classical Nobai (Baal, Sid., iii. 38, 46). Among its rulers was probably the Queen of Selah who came to hear the wisdom of Solomon (I K. x. 2). The Arabs call her Bikkee, a queen of the later Himyrite, and their traditions respecting her are otherwise not worthy of credit. [SHEBA]. The dominant family was apparently that of Himyer, son (or descendant) of Selah. A member of this family founded the more modern kingdom of the Himyrites, and the foundation of the Bible, and of the classical writers, as well as native tradition, seems to prove that the latter appellation superseded the former only shortly before the Christian era; i.e. after the foundation of the latter kingdom. "Himyerite," however, is now very vaguely used. Himyer, it may be observed, is perhaps their names from Asfar (אֶזָרֶף), "red." This may identify Himyer (the red man?) with Qabar, respecting whose settlements, and the position of the country called Qabar, the opinion of the learned is widely divided [Ormsby]. Considering the ambiguity of signification with quār and ʿeṣba, it lends weight to the tradition that the Phoenicians came from the Erythraean Sea (Herod. vii. 89). The maritime nations of the Mediterranean who had an affinity with the Egyptians, such as the Philistines, and probably the primitive Canaanites and Carian, appear to have been an offshoot of an early immigration from southern Arabia, which moved northwards, partly through Egypt [Carpio]. It is noticeable that the Shepherd invaders of Egypt are said to have been Phoenicians; but Manetho, who seems to have held this opinion, also tells us that some said they were Arabs (Manetho, ap. Cory, Rec. Fragments, 20 ed., p. 171), and the hieroglyphic name has been supposed to correspond to the common appellation of the Arabs, Shasa, the "camel-riding Shasu" (Select Papyri, pl. lii.), an identification entirely in accordance with the Egyptian notion of the result of their invasion and amalgamation.

In the opposite direction, an early Arab domination of Chaldea is mentioned by Berosus (Cory, p. 60), as preceding the Assyrian dynasty. All these indications, slight as they are, must be borne in mind in attempting a reconstruction of the history of southern Arabia. The early kings of the Yemen were at continual feud with the descendants of Kahim (brother of Himyer) until the fifteenth in descent (according to the majority of modern historians) from Himyer united the kingdom. This king was the first Tubba, a title also distinctive of his successors, whose dynasty represents the proper kingdom of Himyer, whence the Himyarite (Plut. vi. 7; Plin. vi. 28). Their rule probably extended over the modern Yemen, Hadramawt, and Mahreth. The fifth Tubba, Dhh.-Adhar, or Za-Qa'zir, is supposed (Cauvin, i. 75) to be the Himyarite king of the Dhh. (Strab. vii. 758). The kingdom of Himyer lasted until A.v. 525, when it fell before an Ayyishian invasion. Already, about the middle of the 4th century, the kings of Axum appear to have become masters of part of the Yemen (Cauvin, l.c., i. 114: Zösch, der Deutschen Moscheenland, Geschichte, vii. 17 ff., xi. 338 ff.), adding to their titles the names of places in Arabia belonging to Himyer. After four reigns they were succeeded by Himyerite princes, vassals of Persia, the last of whom submitted to Mohammed. Kings of Hadramawt (the people of Hadramawt are the classical Chottaimat, Plin. vi. 28; comp. Alabyrin) are also enumerated by the Arabs (Has-Khuddem, ap. Cauvin, i. 155 ff.) and distinguished from the descendants of Yarub, an indication, as is remarked by Cauvin (l. c.), of their separate descent from Hazar-matheth (Hazarnawt). The Greek geographers mention a fourth people in conjunction with the Sabai, Himyerite, and Chottaimat, the Miny (Strab. vii. 768: Plut. vi. 7, § 23; Plin. vi. 32; Diod. Sic. iii. 42) who have not been identified with any Biblical or modern name. Some place them as high as Mebekk and derive their name from Minä (the sacred valley N. E. of that city), or from the goddess Minä, worshipped in the district of Minä, after whom Mekhāk (El-Medawwār), Fresnel, however, places them the Wadu Dālim in Hadramawt, arguing.
that the Yemen anciently included this tract, that the Mamel were probably the same as the Bihananite or Bihnananite (Phil. vi. 7; § 24; Strabo, xvi. p. 732); and that 'Parnionius was a copyist's error for 'Parniuinian.

The other chief Joktanite kingdom was that of the Hijaz, founded by Jurinum, the brother of Yarub, who left the Yemen and settled in the neighborhood of Mekkeh. The Arab lists of its kings are inextricably confused; but the name of their leader and that of two of his successors was Mudal (or El-Mudal), who probably represents Almudal [AL-MU'DAL]. Among the Arabs of the Hijaz, Ismael, according to the Arap, was a branch of the first Mudal, whence sprang 'Adin the ancestor of Mohammed. This kingdom, situated in a less fertile district than the Yemen, and engaged in conflict with aboriginal tribes, never attained the importance of that of the south. It merged, by intermarriage and conquest, into the tribes of Ismael. (Kutb-ed-Deen, ed. Wilstenfeld, pp. 35 and 39 ff.; comp. authorities quoted by Causin.) Fresnel cites an Arab author, who identifies Jurinum with Hodrana [HODRAN].

Although these were the principal Joktanite kingdoms, others were founded beyond the limits of the peninsula. The most celebrated of these were that of El-Heereh in El-Irak, and that of Ghasson on the confines of Syria; both originated by emigrants after the Flood of El-Arim. El-Heereh soon became Ismaelitish; Ghasson long maintained its original stock. Among its rulers were many named El-Harit, respecting the presumed identity of some of these with kings called by the Greeks and Romans Aretas, and with the Aretas mentioned by St. Paul (2 Cor. xi. 32), see ARATAS.

The Ismaelites appear to have entered the peninsula from the northwest. That they have spread over the whole of it (with the exception of one or two districts on the south coast which are said to be still inhabited by unmixed Joktanite peoples), and that the modern nation is predominantly Ismaelitish, is asserted by the Arabs. They do not, however, carry up their genealogies higher than 'Adin (as we have already said), and they have lost the names of most of Ismael's immediate and near descendants. Such have been identified with existing names will be found under the several articles bearing their names. [See also HABARENSES.] They extended northwards from the Hijaz into the Arabian desert, where they mixed with Keturahites and other Abrahamic peoples; and westwards to Idumaea, where they mixed with Edomites, &c. The tribes sprung from Ismael have always been governed by petty chiefs or heads of families (sheikhs and emirs); they have generally followed a patriarchal life, and have not originated kingdoms, though they have in some instances succeeded to those of Joktanites, the principal one of these being that of El-Heereh. With reference to the Ismaelites generally, we may observe, in continuation of a former remark, that although their first settlements in the Hijaz, and their spreading over a great part of the northern portions of the peninsula, are sufficiently proved, there is doubt as to the wide extension given to them by Arab tradition. Mohammed derived from the Jews whatever tradition he pleased, and silenced any contrary, by the Kur-an or his own dicta. This religious element, which does not directly affect the tribes of Joktan (where settlements are otherwise unquestionably identified), has a great influence over those of Ismael. They therefore cannot be certainly proved to have spread over the peninsula, notwithstanding the almost universal adoption of their language (which is generally acknowledged to have been the Arabic commonly so called), and the concurrent testimony of the Arabs; but from these and other considerations it becomes at the same time highly probable that they now form the predominant element of the Arab nation.

Of the descendants of Keturah the Arabs say little. They appear to have settled chiefly north of the peninsula in Desert Arabia, from Palestine to the Persian Gulf, and the passages in the Bible in which a reference is made to Deden (except those relating to the Cushite Deden, Gen. x. 7) refer apparently to the tribe sprung from this race (Is. xxi. 13; Jer. xxiv. 21; Ez. xxvii. 29), perhaps with an admixture of the Cushite Deden, who seems to have passed over the western shores of the Persian Gulf. Some traces of Keturahites, indeed, are asserted to exist in the south of the peninsula, where a king of Himyar is said to have been a Midianite (Schultess, El-Mes'oodee, ap. 38-90) and where one dialect is said to be of Midian, and another of Jokshan son of Keturah (Majum); but these traditions must be ascribed to the Rabbinical influence in Arab history. Native writers are almost wholly silent on this subject; and the dialects mentioned above are not, so far as they are known to us, of the tribes of Keturah. [KETURAH, &c.]

In Northern and Western Arabia are other peoples which, from their geographical position and mode of life, are sometimes classed with the Arabs. Of these are AMALEK, the descendants of Esau, &c.

Religion.—The most ancient idolatry of the Arabs we must conclude to have been fetishism, of which there are striking proofs in the sacred trees and stones of historical times, and in the worship of the heavenly bodies, or Saboeism. With the latter were perhaps connected the temples (or palace-temples) of which there are either remains or traditions in the Hijazite kingdoms; such as Rehob in Sa'n, and those of Reydun, Beynume, Ku'eyn, 'Eyney, and Riam. To the worship of the heavenly bodies we find allusions in Job (xxx. 20-23) and to the belief in the influence of the stars to give rain (xxxvii. 31), where the Pleiades give rain, and Orion withholds it; and again in Judges (v. 20, 21) where the stars fight against the host of Sisera. The names of the objects of the earlier fetishism, the stone-worship, tree-worship, &c., of various tribes, are too numerous to mention. One, that of Manah, the goddess worshipped between Mekkeh and El-Meleeheen, has been compared with Meni (Isa. xv. 11), which is rendered in the A. V. "number" [MENI]. Magianism, an importation from Chaldae and Persia, must be reckoned among the religious of the pagan Arabs; but it never had very numerous followers. Christianity was introduced in southern Arabia towards the close of the 2d century, and about a century later it had made great progress. It flourished chiefly in the Yemen, where many churches were built (see Philostorg. Hist. Eccl. iii. : Sozomen, vi.; Evagr. vi.). It also rapidly advanced in other portions of Arabia, through the kingdom of Heereh and the contiguous countries, Ghassin, and other parts. The persecutions of the Christians, and more particularly those of Ne'gin by the Tubilan Zara-Niusiwa, brought about the fall of the Himyarite dynasty by the invasion of the
Christian rule of Byzantium. Judaism was propagated in Arabia, principally by Kairaites, at thecaptivity, but it was introduced before that time. It became very prevalent in the Yemen, and in the Hijaz, especially at Kheybar and El-Medeneh, where there are said to be still tribes of Jewish extraction. In the period immediately preceding the birth of Mohammed another class had sprung up, who, disbelieving the divinity of the greater number of their countrymen, and not yet believers in Judaism, or in the corrupt Christianity with which alone they were acquainted, looked to a revival of what they called the "religion of Abraham" (see Spranger's Life of Mohammed, I., Calcutta, 1856). The promulgation of the Mohammedan imposture overthrew Judaism, but enounced while it assumed to lead the movement which had been one of the causes of its success, and almost wholly superseded the religions of the Bible in Arabia.

Language. — Arabic, the language of Arabia, is the most developed and the richest of the Semitic languages, and the only one of which we have an extensive literature: it is, therefore, of great importance to the study of Hebrew. Of its early phases we know nothing; while we have the historical monuments of the ancient language (the Semitic language of southern Arabia), though we cannot fix their precise ages. Of the existence of Hebrew and Chaldee (or Arabian) in the time of Jacob there is evidence in Gen. (xxvi. 47); and probably Jacob and Laban understood each other, the one speaking Hebrew and the other Chaldee. It seems also (Judg. vii. 9-15) that Gideon, or Pharaoh, or both, understood the conversation of the "Midianites," the Amalekites, and all the children of the east (Zeph. ii. 22). It is probable, therefore, that in the 14th or 13th century B.C. the Semitic languages differed much less than in after times. But it appears from 2 K. xviii. 26, that in the 8th century B.C. only the educated classes among the Jews understood Aramaic. With these evidences before us, and making a due distinction between the earlier and the known phases of the Aramaic spoken in Arabia and the Arabic, we think that the Himmite is to be regarded as a sister of the Hebrew, and the Arabic (commonly so called) as a sister of the Hebrew and the Aramaic, or, in its classical phase, as a descendant of a sister of these two, but that the Himmitic is mixed with an African language, and that other dialects of Arabia are in like manner, though in a much less degree, mixed with an African language. The inferential differences between the older and later phases of the Aramaic, and the presumed difference between those of the Arabic, are amply confirmed by comparative philology. The division of the Ismaelitc language into many dialects is to be attributed chiefly to the separation of tribes by uninhabitable tracts of desert, and the subsequent amalgamation of these dialects to the pilgrimage and the annual meetings of "Okaz, a fair in which literary contests took place. It is not improbable that the literary art was developed in those gatherings, and that the outstanding poets should deliver themselves in a language perfectly intelligible to the mass of the people congregated, in order that it might be critically judged by them; for many of the me scant of the Arabs, utterly ignorant of reading and writing, were of the highest of the authorities consulted by the theologians when the corruption of the language had commenced, i.e. when the Arabs, as Mohammedans, had begun to spread among foreigners.

Respecting the Himmite, B. may lately little was known; but monuments bearing inscriptions in this language have been discovered in the southern parts of the peninsula, especially in Hadramawt and Yemen, and some of the inscriptions have been published by Fresnel, Arnal, Wollstedt, and Cratenden; while Fresnel has found a dialect still spoken in the district of Malrich and westwards as far as the neighborhood of Zufar and Mirbat, being the purest, and called "Ekhill." This is supposed with reason to be the modern phase of the old Himmitic (4th Letter). Fresnel's alphabet has been accepted by the learned. The dates found in the inscriptions range from 30 (on the dyke of Marib) to 604 at Him Gobhar, but what era these represent is uncertain. Ewald (Vor der Himmpische Sprache, in Heer's Zeit- schrift, ii. 245 ff.) thinks that they are years of phrase, and not the era, while acknowledging their apparent high antiquity; but the difficulty of supposing such inscriptions on a ruined dyke, and the fact that some of them would thus be brought later than the time of Mohammed, make it probable that they belong rather to an earlier era, perhaps that of the Himmitic empire, though what point marks its commencement is not determined. The Himmitic in its earlier phase probably represents the first Semitic language spoken in Arabia. 6

The manners and customs of the Arabs of great value in illustrating the Bible; but supposed parallels between the patriarchal life of the Scriptures and the state of the modern Arabs must not be hastily drawn. It should be remembered that this people are in a degraded condition; that they have been influenced by Jewish contact, especially by the adoption, by Mohammed, of parts of the ceremonial law, and of rabbinical observances; and that they are not of the race of Israel. They must be regarded, 1st, as Redeans, or people of the desert, and 2dly, as settled tribes or townspeople.

A. The Arabs have impressed their national characteristics on every people whom they have conquered, except the Tartar races. "Arab life" is therefore generally understood in a very wide sense. The modern Egyptians are essentially an Arab people.
The Bedawee acknowledge that their ancient excellence has greatly declined since the time of Mohammed, and there cannot be a doubt that this decline had commenced much earlier. Though each tribe boasts of its unadulterated blood, and pure language, their learned men candidly admit the depreciation of national character. Scriptural customs still found among them must therefore be generally regarded rather as indications of former practices, than as being identical with them. Furthermore, the Elide always draws a strong contrast between the character of the Israelites and that of the descendants of Ishmael, whom the Bedawees mostly represent. Yet they are, by comparison with other nations, an essentially unchangeable people, retaining a primitive, pastoral life, and many customs strikingly illustrating the Bible. They are not as much affected by their religion as might be supposed. Many tribes disregard religious observances, and even retain some pagan rites. The Wahshibees, or modern Arab reformers, found great difficulty in suppressing by persuasion, and even by force of arms, such rites; and where they succeeded, the suppression was, in most cases, only temporary. Insect, sacrifices to sacred objects, &c., were among these relics of paganism. (See Burckhardt's Notes on the Bedawees and Wahshibees.) The less changed a tribe, however, the more difficulty is there in obtaining information respecting it. Such a one is very jealous of intercourse with strangers even of its own nation. In southern Arabia, for instance, is a tribe which will not allow a guest to stay within its encampments beyond the three days demanded by the laws of hospitality. This exclusion undoubtedly tends to preserve the language from corruption, and the people from foreign influence; but it probably does not improve the national character.

To the settled Arabs, these remarks apply with the difference that the primitive mode of life is in a great degree lost, and the Jewish practices are much more observable; while intermixture with foreigners, especially with Abyssinian and Negro concubines in the Yemen and the Hijaz, has tended to destroy their purity of blood. A Bedawee will scarcely marry out of his tribe, and is not addicted to concubines; he considers himself, and is, quite distinct, as a man in blood, mind, and thought, and in national feeling. Again, a distinction should be made between the people of northern and those of southern Arabia; the former being chiefly of Ishmaelite, the latter of Joktanite, descent, and in other respects than settlement and intermarriage with foreigners, further removed from the patriarchal character.

Regarded in the light we have indicated, Arab manners and customs, whether those of the Bedawees or of the townspeople, offer valuable hints to the student of the Bible, and testimony to the truth and vigor of the Scriptural narrative. No one can mix with this people without being constantly and forcibly reminded either of the early patriarchs or of the settled Israelites. We may instate their pastoral life, their hospitality (that most remarkable of desert virtues) [Hospitality], their universal respect for age [comp. Lev. xix. 32], their familiar demeanors [comp. 2 K. v. 13], their superstitious regard for the beard. On the signifying, which is worn on the little finger of the right hand, is usually inscribed a sentence expressive of submission to God, or of his perfection, &c., explaining Ex. xxx. 90, "the engraving of a signet, Holiness to the Lord," and the saying of our Lord (John iii. 33), "He . . . hath set to his seal that God is true." As a mark of trust, this ring is given to another person (as in Gen. xli. 42). The inlaid worn in the girdle is also very ancient (Ez. ix. 2, 3, 11), as well as the veil. (For these and many other illustrations, see Lane's Modern Egyptians, index.) A man has a right to claim his cousin in marriage, and he relinquishes this right by taking off his shoe as the kinsman of Ruth did to Boaz (Ruth iv. 7, 8; see Burckhardt's Notes on the Bedawees and Wahshibees, i. 113).

References in the Bible to the Arabs themselves are still more clearly illustrated by the manners of the modern people in their predatory expeditions, their mode of warfare, their caravan journeys, &c. To the interpretation of the book of Job, an intimate knowledge of this people, and their language and literature, is essential; for many of the most obscure passages can only be explained by that knowledge.

The commerce of Arabia especially connected with the Bible has been referred to in the sections on western and northern Arabia, and incidentally in mentioning the products of the peninsula. Direct mention of the commerce of the south does not appear to be made in the Bible, but it seems to have passed to Palestine principally through the southern tribes. Passages relating to the fleets of Solomon and to the maritime trade, however, bear on this subject, which is a curious study for the historical inquirer. The Joktanite people of southern Arabia have always been, in contradistinction to the Ishmaelite tribes, addicted to a seafaring life. The latter were caravan-merchants; the former, the chief traders of the Red Sea, carrying their commerce to the shores of India, as well as to the nearer coasts of Africa. Their own writers describe those voyages—since the Christian era especially, as we might expect from the modern character of their literature. (See the curious Accounts of India and China by Two Mohammedan Travelers of the 9th cent., trans. by Renanod, and amply illustrated in Mr. Lane's notes to his translation of the Thousand and One Nights.) The classical writers also make frequent mention of the commerce of southern Arabia. (See the Dict. of Gr. and Rom. Geography.) It was evidently carried on by the two great caravan routes from the head of the Red Sea and from that of the Persian Gulf; the former especially taking with it African produce; the latter, Indian. It should be observed that the wandering propensities of the Arabs, of whatever descent, do not date from the promulgation of Islam. All testimony goes to show that from the earliest ages the peoples of Arabia formed colonies in distant lands, and have not been acted on only by the desire of conquest or by religious impulse in their foreign expeditions; but rather by restlessness and commercial activity.

the geography, Niebuhr's Description de l'Arabie, 1774, in a translation of his Beschreibung von Arabien, Copenhagen 1772; see also his Reise- schreib, nach Arabien, 2 vol. (ibid. 1774-78).

Purchadis's Travels in Arabia, Lond. 1828; and William M. Jones's Narrative of a Journey to the ruins of Nakhel-el-Hijar, in Judah (ibid. 1829); his copy of Inscription, in Journal of Asiat. Soc. of Bengal, iii (1831); and his Journal, Lon. 1838. Grottendieck, Narrative of a Journey from Mecca to Sana; Jomard, Études geogr. et hist. appended to Mergin, Hist. de l'Egypte, vol. iii. Paris, 1839; [Barton, R. F.; Pilgrimage to El-Medineh and Meccah, 3 vol. Lond. 1855-56; Yule, W. G.: Journey through Central and Eastern Arabia, 2d ed. 2 vol., Lond. 1855-57; and for Arabia Petraea and Sinai, Robinson's Biblical Researches; Stanley's Sinai and Palestine; Tuch's Essay on the Sinaitic Inscriptions, in the Journal of the German Oriental Soc. xiv. 129 ff. Strabo, Polonny, Dioscorus Siculus, Pliny, and the minor geographers, should also be consulted. For the manners and customs of the Arabs, Purchadis's Notes on the Bedoinians and Wahhabis, Svo, 1831; and for Arabs of the most modern times, the Rev. Mr. Lane's Notes on the Thousand and One Nights, ibid. 1838; and his Modern Egyptians, ed. 1842 (new ed. 1869).

The most important works are, with two exceptions, still untranslated, and but few of them are edited. Abu'l-Fida's Hist. Antiquiomenos has been edited and translated by Fleischer, Lips., 1831; and El-Berrouci's Geography translated by Lumbert, and published in the Recueil d'Inscriptions de Me moires, by the Greco. Soc. of Paris, 1830; of those which have been, or are in course of being edited, are Yakout's Hominymous Geographical Dictionary, entitled El-Medina El-Medineh, ed. Wustenfeld, Got. 1845; the Mu'addal el-Buhuri, probably an abridgment by an unknown hand of his larger geographic, dit. called the Muqaddam, ed. Jannoull, Bang. Res. 1852-4; the Histories of Mikkab, ed. Wustenfeld, and now publishing by the German Oriental Society; and Ibn-Khaldoun's Prolegomenon, ed. Quatremere, i [-iii.] Paris, 1858 (in the Notices et Extraits des Monuments, xxvi. pt. 1, xvii. pt. 1, xvii. pt. 1, trans. into French, with notes, by Sane, Paris 1, 2. Paris, 1863-65). Of those in MS., besides the indispensable works of the Arab lexicographers, we would especially mention Ibn-Khaldun's History of the Arabs; the Khvarezẖ el-A'man of Ibn-al- Warah; the Mocar el-Zaman of Ibn-Elsudair; the Manaqiq el-Habab of El-Mes'oodi; Yakout's Mawrut el-Rabbi; the Khatib al-Yahwih of El-Flahane; and the Itid of El-Kurtubi.

E. S. P.

ARABIAN, THE (אראב), Neh. ii. 19, vi. 1: ḳ Abéôi [Vat. ܒܝܐ] Arabis; ḳ Abéôš, Is. xiii. 23]; Jer. iii. 2: ḳ Abéôsh: Arabæs; ARABANS.

The (אראב), 2 Chr. xvi. 11; ḳ Abéôš, 2 Chr. xvi. 16, xxvi. 1, xxvi. 7 (Keri); Neh. iv. 7: ḳ Abéôš: Arabæs: Arabæs; Arabæs: Arabæs). The nomadic tribes inhabiting the country to the east and south of Palestine, who in the early times of Hebrew history were known as Ishmaelites and descendants of Keturah. Their roving pastoral life in the desert is illustrated by the following texts, Jer. iii. 2, 2 Chr. xvi. 11: their country is associated with the country of the Dedan the travelling merchants (Is. xxi. 13) with Dedan, Tema, and Buz (Jer. xxvi. 21, and with Dedan and Kedar (Ez. xxvii. 21), all of which are supposed to have occupied the northern part of the peninsula later known as Arabia. During the prosperous reign of Jehoshaphat, the Arabians, in conjunction with the Phœciscans, were tributary to Judah (2 Chr. xix. 11), but in the reign of his successor they revolted, ravaged the country, plundered the royal palaces, slew all the king's sons with the exception of the youngest, and carried off the royal harves (2 Chr. xxi. 16, xxii. 1). The Arabians of Garm-ban were again subdued by Uzziah (2 Chr. xxvii. 7). During the Captivity they appear to have spread over the country of Palestine, for on the return from Babylon they were among the foremost in hindering Nebuchadnezzar in his work of restoration, and plotted with the Ammonites and others for that end (Neh. iv. 7). Geshem, or Gashum, one of the leaders of the opposition, was this race (Neh. ii. 19, vii. 1). In later times the Arabians served under Timothoes in his struggle with Judas Maccabaeus, but were defeated (1 Macc. v. 39; 2 Macc. xii. 10). The Zebalim, an Arab tribe, were routed by Jonathan, the brother and successor of Judas (1 Macc. xii. 31). The chieftain or king of the Arabians bore the name of Aratus as far back as the time of Antiochus Epiphanes and Jason the high-priest (2 Macc. v. 8: comp. 2 Cor. xi. 32). Zabdiel, the assassin of Alexander Balas (1 Macc. xi. 17), and Simon, who brought up Antiochus, the young son of Alexander (1 Macc. iii. 33), afterwards Antiochus VI., were both Arabians. In the time of the N. T. the term appears to have been used in the same manner (Acts i. 11).

W. A. W.

* ARABIC LANGUAGE. Besides the remarks under Arabia, p. 142, see Semitic Languages, §§ 20-24.

* ARABIC VERSIONS. [Versions, Arabic.]

ARAD (אראד [נולדת]; אפר: Alex. Arbôd; [Vat. Ḫ̄p; Comp. Abh. Ḫ̄pô; Ḫ̄pô; Arab.] Arod). A Benjamite, son of Berriah, who drove out the inhabitants of Sath (Judg. xvi. 13). W. A. W.

ARAD (אראד [place of fowlers, First]; Ḫ̄pô: [Arab. Ḫ̄pô, exc. in Josh., where we find Ḫ̄pô; [Vat. Ḫ̄pахa, Arab. Ḫ̄pахa; Comp. Ḫ̄pахa; Hebr.] Heber), a royal city of the Canaanites, named with Hormah and Lachish (Josh. xvi. 14). The wadi Pesevus of Judah was "to the south of Arad" (Judg. i. 16). It is also undoubtedly named in Num. xxii. 1 (comp. Hormah in ver. 3), and xxi. 40, "the Canaanite king of Arad," instead of the reading of the A. V., "king Arad the Canaanite." (See the translations of Zunck, De Wette, &c.) It is mentioned in the Othnielitc (s. V. Ḫ̄pахa, Arab. Ḫ̄pахa, Assam. Thamar) as a city of the Amorites, near the desert of Dedan, 4 miles from Medeba (Malachi), and 20 from Hebron. This agrees with the conjecture of Robinson, who identifies it with a hill, Tell Ḫ̄p, an hour and a half N. E. by E. from Milh (Mohabah), and 8 hours from Hebron (Robb. ii. 10, 201, 292).

ARADUS (אראדוס; Arabus), included in the list of places to which the decree of Lucius the equal, protecting the Jews under Simon the high-priest, was addressed (1 Macc. xv. 23). The same place as ARAD.

G.

ARAH (ארא; [vayofcr]; Ḫ̄pô: Ḫ̄pô; Arab.)
An Asherite, of the sons of Ulla (1 Chr. vii. 30).

2. [XXVIII. ix.] Apel [Vat. Haq. Neh.] Haq. 9p: Arca.] The sons of Aram returned with Zerubbabel, in number 773, according to Ezra ii. 8, but 632 according to Neh. vii. 10. One of his descendants, Shechaniah, was the father-in-law of Tobiah the Ammonite (Neh. vii. 18). The name is written Ares in 1 Esdr. v. 10.

W. A. W.

ARAM (עַרַם), occasionally with the definite article בֵּנֵי עַרַם, and once בֵּרָם; probably from a root meaning "height," and which is also the base of "Ramah" (Genesis, p. 151; Stanley, p. 129), the name by which the Hebrews designated, generally, the country lying to the northeast of Palestine; the great mass of that high table-land, rising with sudden abruptness from the Jordan and the very margin of the lake of Gennesaret, stretches, at an elevation of no less than 2000 feet above the level of the sea, to the banks of the Euphrates itself, contrasting strongly with the low land bordering on the Mediterranean, the "land of Canvas," or the low country (Gen. xxxvi. 18, xxxviii. 18, &c.). Throughout the A. V. the word is, with only a few exceptions [Num. xxxvii. 7, Judg. iii. 10, marg.], rendered as in the Vulgate and LXX. in [Vat. Syr.,] or for SYRIANS; a name which, it must be remembered, includes far more to our ears than did Aram to the Jews.

Its earliest occurrence in the book of Genesis is in the form of Aram-naharaim, i. e. the "highland of or between the two rivers" (Gen. xxiv. 10, A. V. "Mesopotamia"). But in several succeeding chapters, and in other parts of the Pentateuch, the word is used without any addition, to designate a dweller in Aram-naharaim—Laban or Bethuel—"the Aramite" (see Gen. xxv. 29, xxviii. 2, 5, xxxi. 24; also Judg. iii. 10, compared with 8; Deut. xxxv. 5, compared with xxxiii. 4, and Ps. lxx. title).

Psal. or accurately Padan, Aram (saben 777 1-cultivated highland,) from padon, to plough, Ges. p. 1092; Stanley, p. 123, note) was another designation for the same region (Gen. xxv. 29, xxviii. 2; comp. Hos. xii. 12, where the word Stoth, סֵתֹו, is, perhaps, equivalent to Padon). [SATON: PADAN ARAM.] A tribe of Hittites (Khatti) bearing the name of Padon is reported to have been met with in the inscriptions of Shalmaneser, b. c. 800-820. They then occupied the valley of the Orontes, and the country eastwards as far as the water-shed between that river and the Euphrates. The latest explorers do not hesitate to identify this name with Padok-aram and Bit-tanan or Beshan (Rawlinson's Herodotus, i. 463); but if this be correct, the conclusion of the identity of Padok-aram and Mesopotamia arrived at above from a comparison of the statements of Scripture, must be modified.

Later in the history we meet with a number of small nations or kingdoms forming parts of the general land of Aram:—1. Aram-Zobah (2 Sam. x. 6, 8), or simply Zobah, 2727 (1 Sam. xiv. 47; 2 Sam. viii. 3; 1 Chr. xvii. xix.) [ZOBAH]. 2. Aram Beth-rehob (2 Sam. x. 6), or Rehob, 2727 (x. 8). [REHOB]. 3. Aram-maachah (1 Chr. xix. 6), or Maachah only, 2727 (2 Sam. x. 8). [MAACHAH]. 4. Aram, "in Aram" (2 Sam. xv. 8), usually named in connection with Maachah (Deut. iii. 14; Josh. xiii. 11, 13, &c.). [GESHER]. 5. Aram-Damascus (Damascene) (2 Sam. viii. 6; 1 Chr. xvii. 5, 6). The whole of these petty states are spoken of collectively under the name of "Aram" (2 Sam. x. 13), but as Damascus increased in importance it gradually absorbed the smaller powers (1 K. xx. 1), and the name of Aram was at last applied to it alone (1 K. xi. 25, xv. 18, &c.).

It is difficult to believe, from the narrative, that at the time of David's struggles these "kingdoms" were anything more than petty tribes located round the skirts of the possessions of Gad and Manasseh. Some writers, however (Rosenmiller and Michaels amongst others), have attempted to show that their territory extended as far as the Euphrates on the one hand and the Mediterranean on the other, in which case it would have been considerably larger than Palestine itself. This, however, will be best examined under the separate heads, including, in addition to those already noticed, Ish-toh and Hamath.

According to the genealogical table in Gen. x., Aram was a son of Shem, and his brethren were Elam, Assur, and Arphaxad. It will be observed that these names occur in regular order from the east, Aram closing the list on the borders of the "western sea." In three passages Aram would seem to denote Assyria (2 K. xviii. 20; Is. xxxvi. 11, Jer. xxxv. 11).

In 2 K. xvi. 6, the Syrians are said to have come to Elath (on the Red Sea). The word rendered Syrians is רִמְנִים רָם, Aramim, in which the Keri is corrected to אֲדֹם, Edomites.

In 2 Chr. xxii. 5, the name is presented in a shortened form as Ram., רָם; comp. Job xxxiii. 2.

2. [Ziqqat: Syri.] Another Aram is named in Gen. xxii. 21, as a son of Kedem, and descendant of Nahor. From its mention with Uz and Buz it is probably identical with the tribe of Ram, to the "kindred" of which belonged "Elephan, the son of Barachel the Buzite," who was visiting Job in the land of Uz (Job xxii. 2). It is also worthy of notice that among the other descendants of Nahor are named Telach (comp. Tithath, 1 Chr. xix. 18), and Mechez; so that the tribe was possibly one of the smaller divisions of Aram described above.

G.

3. (Aphdi: [Vat. M. אבֵּדָךְ פָּרֹת]: Aram.) An Asherite, one of the sons of Shamer (1 Chr. vii. 34).

4. The son of Esrom, or Hezon; elsewhere called Ram (Matt. i. 3, 4; Luke iii. 33). W. A. W.

* In Luke, Tisch. with Sin. BXXII reads (instead of Aphdi) אֲדֹמֵי, אֲדֹמֵי, Apol, A.

ARAMITESS (ץיקפְּרֶא: Syr.): i. e. a female inhabitant of Aram (1 Chr. vii. 14).

In other passages of the A. V. the ethnic of Aram is rendered Syrian.

ARAM-NAHARAIM (ץיקפְּרֶא רַמְנִים): 84)

Comp. Strab. xvi. 735; Grote, History of Greece, iii. 395.

* The name Aram probably appears also in the Homeric names Ἀράμος (U. ii. 765) and Ἐρῆπος (Od. iv. 10).

ARAM-ZOBAY (חָמָה צֹבָה) [wild goat]: Sam. * רש: *Apdp [Alex. Apinn: in 1 Chr. *Appav (and so Vat.): Armin, Armen], name of a Horite (Gen. xxxvi. 28; 1 Chr. i. 42).

ARARAT (גַּבָּרֶג) [Apapar: Ararat], a mountainous district of Asia mentioned in the Bible in connection with the following events:—(1.) As the resting-place of the ark after the Deluge (Gen. viii. 4, "upon the mountains of Ararat," A. V.; *super montis Armenia, Vulg.: (2.) As the asylum of the sons of Semacherib (2 K. xix. 37; Is. xxxvii. 38; the LXX. have εἰς Αρμενία in the former passage, A. V. has in both "the land of Ararat"); (3.) As the ally, and probably the neighbor, of Mimi and Aschizanen (Jer. li. 27).

ARARAT

[ARMENIA.] In Gen. xi. 2 we have apparently an indication of its position as eastward of Mesopotamia (גַּבָּרֶג), "from the east," A. V.), whence Bohlen (Introil. to Gen. ii. 139) identifies Ararat with Aryanarte, [a Sanskrit name] the "holy land" in the north of Hindustan; but the Hebrew is more correctly translated in the margin, as also in Gen. xii. 11, eastward (Gesen. Thes. p. 805), the writer, as it would seem, describing the position of Mesopotamia in reference to his own country, rather than to Ararat.

The name Ararat was unknown to the geographers of Greece and Rome, as it still is to the Armenians of the present day; but that it was an indigenous and an ancient name for a portion of Armenia, appears from the statement of Moses of Chorene, who gives Araratia as the designation of the central province, and connects the name with an historical event reputed to have occurred n. c. 1750 (Histor. Armen. Whiston. p. 361). Jerome identified it with the plain of the Araxes. It would, however, be more correct to consider the name in its Biblical sense as descriptive generally of the Armenian highlands—the lofty plateau which overlooks the plain of the Araxes on the N., and of Mesopotamia on the S. We shall presently notice the characteristics of this remarkable region, which adapted it to become the cradle of the human race and the central spot whence, after the Deluge, the nations were to radiate to different quarters of the world. It is, however, first necessary to notice briefly the opinions put forth as to the spot where the ark rested, as described in Gen. viii. 4, although all such speculations, from the indefiniteness of the account, cannot lead to any certain result. Berosus the Chaldean, contemporary with Alexander the Great, fixes the spot on the mountains of Kordistan (πορός τού ύποι τού Κορο Σιάνθα, Joseph. Ant. i. 3, § 6), which form the southern frontier of Armenia. His opinion is followed by the Syrian and Chaldean versions, which give גַּבָּרֶג as the equivalent for Ararat in Gen. viii. 4, and in a later age by the Koran. Tradition still points to the *Sebali Dudi as the scene of the event, and maintains the belief, as stated by Berosus, that fragments of the ark exist on its summit. The selection of this range was natural to an inhabitant of the Mesopotamian plain; for it presents an apparently unsurmountable barrier on that side, hemming in the valley of the Tigris with abrupt declivities so closely that only during the summer months is any passage afforded between the mountain and river (Ainsworth's Travels in the Track of the Ten Thousand, p. 154). Josephus also quotes Nicolaus Damascenus to the effect that a mountain named Baris, beyond Minyas, was the spot. This has been identified with Taurus, a mountain mentioned by St. Martin (Mem. sur l'Arménie, i. 265) as rising to the N. of Lake Van; but the only important mountain in the position indicated is described by recent travellers under the name Sahane Tajo, and we are therefore inclined to accept the enumeration of Schroeder, who proposes to read *Mardis, the indigenous name of Mount Ararat, for *Hippus. That the scene of an event so deeply interesting to mankind had even at that
early age been transferred, as was natural, to the loftiest and most imposing mountain in the district, appears in the statement of Josephus (Ant. i. 3, § 5), that the spot where Noah left the ark had received a name descriptive of that event, which he renders Ἀραξάμαρα, which is identical with Ναχούθερων, on the banks of the Araxes. To this neighborhood all the associations connected with Noah are now assigned by the native Armenians, and their opinion has been so far indorsed by Europeans that they have given the name Ararat exclusively to the mountain which is called Masis by the Armenians, Arpil-Dag, i. e. Steep Mountain, by the Turks, and Kul-e-Nath, i. e. Noah's Mountain, by the Persians. It rises immediately out of the plain of the Araxes, and terminates in two conical peaks, named the Great and Less Ararat, about seven miles distant from each other, the former of which attains an elevation of 17,260 feet above the level of the sea and about 14,000 above the plain of the Araxes, while the latter is lower by 4,000 feet. The summit of the higher is covered with eternal snow for about 3,000 feet of perpendicular height. That it is of volcanic origin, is evidenced by the immense masses of lava, cinders, and porphyry with which the middle region is covered. A deep cleft on its northern side has been regarded as the site of its crater, and this cleft was the scene of a terrible catastrophe which occurred July 2, 1840, when the village of Arguri and the Monastery of St. James were buried beneath the débris brought down from the upper heights by a violent earthquake. Clouds of reddish smoke and a strong smell of sulfur, which pervaded the neighborhood after the earthquake, seem to indicate that the volcanic powers of the mountain are not altogether dormant. The summit of Ararat was long deemed inaccessible, and the Armenians still cling to this belief. It was first ascended in 1824 by Parrot, who approached it from the N. W. He describes a secondary summit about 400 yards distant from the highest point, and on the gentle depression which connects the two Eminences he observes the archeological ruins of Noah's Ark. The same geographer, when he returned to Ararat, (Jour. de l'Exé du Casp., p. 174.) The region immediately below the limits of perpetual snow is barren and unvisited by beast or bird. Wagner (Reise, p. 185) describes the silence and solitude that reign there as quite overpowering. Argarit, the only village known to have been built on its slopes, was the spot where, according to tradition, Noah planted his vineyard. Lower down, in the plain of Araxes, is Nachoutheon, where the patriarch's grave is supposed to have been buried.

Returning to the broader significations we have assigned to the term "the mountains of Ararat," as coextensive with the Armenian plateau from the base of Ararat in the N. to the range of Kurdsitan in the S., we notice the following characteristics of that region as illustrating the Bible narrative:—

1. Its elevation. It rises as a rocky island out of a sea of plain to a height of from 6000 to 7000 feet above the level of the sea, presenting a surface of extensive plains, whence, as from a fresh base, spring important and lofty mountain-ranges, having a generally parallel direction from E. to W., and connected with each other by transverse ridges of moderate height.

2. Its geographical position. The Armenian plateau stands equidistant from the Euxine and the Caspian seas on the N., and between the Persian Gulf and the Mediterranean on the S. With the first it is connected by the Araxes, with the second by the Tigris and Euphrates, the latter of which also serves as an outlet towards the countries on the Mediterranean coast. These seas were the high roads of primitive colonization, and the plains watered by these rivers were the seats of the most powerful nations of antiquity; the Assyrians, the Babylonians, the Medes, and the Cœlæans. Viewed with reference to the dispersion of the nations, Armenia is the true Ἵνδος of the world; and it is a significant fact that at the present day Ararat is the great boundary-stone between the empires of Russia, Turkey, and Persia. (3.) Its physical formation. The Armenian plateau is the result of volcanic agencies: the plains as well as the mountains supply evidence of this. Armenia, however, differs materially from other regions of similar geological formation, as, for instance, the neighboring range of Caucasus, inasmuch as it does not rise to a sharp, well-defined central crest, but expands into plains or steppes, separated by a graduated series of subordinate ranges. Wagner (Reise, p. 253) attributes this peculiarity to the longer period during which the volcanic powers were at work, and the room afforded for the expansion of the molten masses into the surrounding districts. The result of this expansion is that Armenia is far more accessible, both from without and within its own limits, than other districts of similar elevation. The passes, though high, are comparatively easy, and there is no district which is shut out from communication with its neighbors. The fall of the ground in the centre of the plateau is not decided in any direction, as is demonstrated by the early courses of the rivers—the Araxes, which flows into the Caspian, rising westward of either branch of the Euphrates, and taking at first a northerly direction—the Euphrates, which flows to the S., rising northward of the Araxes, and taking a westerly direction. (4.) The climate is severe. Winter lasts from October to May, and is succeeded by a brief spring and a summer of intense heat. The contrast between the plateau and the adjacent countries is striking. In April, when the (Gülevi) sown with wheat are still green on the Euxine shore the azalia and rhododendron are in bloom, the Armenian plains are still covered with snow; and in the early part of September it freezes keenly at night. (5.) The vegetation is more varied and productive than the climate would lead us to expect. Trees are not found on the plateau itself, but grass grows luxuriantly, and furnishes abundant pasture during the summer months to the flocks of the nomad Kurds. Wheat and barley ripen at far higher altitudes than on the Alps and the Pyrenees: the volcanic nature of the soil, the abundance of water, and the extreme heat of the short summer bring the harvest to maturity with wonderful speed. At Erz-rum, more than 6000 feet above the sea, the crops appear above ground in the middle of June, and are ready for the sickle before the end of August (Wagner, p. 355). The vine ripens at about 6000 feet, while in Europe its limit, even south of the Alps, is about 2500 feet.

The general result of these observations as bearing upon the Biblical narrative would be to show that, while the elevation of the Armenian plateau constituted it the natural resting-place of the ark after the Deluge, its geographical position and its physical character secured an impartial distribution of the families of mankind to the various quarters of the world. The climate furnished a powerful
ARABATH

adventure to seek the more tempting regions on all sides of it. At the same time the character of the vegetation was remarkably adapted to the nomadic state in which we may conceive the early generations of Noah's descendants to have lived.

W. L. B.

W. A. W.

ARAPATH (Ἄραπαθ: [Ornan.].) Aid. (Ex. 41: 8; comp. 2 K. xiii. 37).

A. W.

ARANTH (Ἄρανθ: Irbid), a Jebusite who sold his threshing-floor on Mount Moriah to David as a site for an altar to Jehovah, together with his oxen, for 50 shekels of silver (2 Sam. xxiv. 18-24), or (according to 1 Chr. xxii. 25) for 100 shekels of gold by weight. (The expression (2 Sam. xxiv. 21) "those things did Aranath, the king, give unto the king," it has been inferred that he was one of the royal races of the Jebusites. His name is variously written in various places: Ἄρανθ (2 Sam. xxiv. 16); Ἄραντ (xxiv. 18); Ἄραντος (1 Chr. xii. 15 ii; 2 Chr. iii. 1). [Ornan.]. R. W. B.

ARBA (אֶרֶב), hero of Beul, so Fürst, for בַּרְבָּא; like נֶבֶר, נֶבֶר. A. R. B. [Abba]; A. (1 Sam. xxvii. 8; comp. 1 Sam. xvi. 14). "The city of Arba" is always rendered elsewhere Hebem, or Kirjath-Arba (Gen. xxxv. 27). The LXX. appear to have read Βαρβάορα. W. A. W.

ARABITHE, THE (Ἀράβιτή), [in 1 Chr. 6: Γάβαδα; Vat. [G. Zaraçathia; FA. Xarząwethe; T. Xarząwethe; 1 comp. (G. Xarząwethe; I. Xarząwethe) in 2 Sam. all different.] Arabitide, etc. a native of the Arba (or else). Abdon the son of one of David's 30 mighty men (2 Sam. xxi. 31; 1 Chr. xiii. 52).

ABRATISS (ἐν ἀρατίσσον; Sin. Abraziss): Alex. Abrazissi and so Sin.: Arbatitsi, a district of Palestine named in 1 Marc. v. 23 only. Ewald's conjecture (Geschichtl. iv. 359; note) grounded on the reading of the Peshito Syriac ( עשפתא), "Arad for" is that the district N. of the sea of Galilee, part of which is still called Arad (see Huthal, is here intended. But it seems at least equally probable that the word is exactly a corruption of ἄραπαθίον, the province or toparchy which lay between Neapolis and Jericho (Ireland, p. 192; Joseph. B. J. iii. 3, §§ 4, 5, &c.).

ARBELA (ἐν ἀρψάθιοι: in Arbelith), mentioned in the Bible only in 1 Marc. ix. 2, and there only as defining the situation of Masakah, a place besieged and taken by Barchides and Aelius at the opening of the campaign in which Judas Macenas was killed. According to Josephus (Ant. xii. 11, § 1) this was at Arbel of Galilee, in ἀρψάθιοι πολείς τῆς Γαλανίας, a place which he elsewhere states to be near Sepphoris, on the lake of Gennesarath, and remarkable for certain improbable caves, the resort of robbers and insurgents, and the scene of more than one desperate encounter (comp. Ant. xiv. 13, §§ 4, 5; B. J. i. 16, §§ 2, 3; ii. 28, § 6; V: n. § 57). These topographical requirements are fully met by the existing Erbal, a site with a few ruins, west of Medjel, on the southeast side of the Wady Hammah, in a small plain at the foot of the hill of Kurin Huttin. The coves are in the opposite face of the ravine, and bear the name of Khabat ibn Mua'in (Rob. ii. 338; Barak. p. 331; Ifry, p. 91).

There seems no reason to doubt the soundness of this identification. The army of Barchides was on the road from Antioch to the land of Judah (γατατία), which they were approaching "by the way that leadeth to Galgala" (gilgal) ; that is by the valley of the Jordan in the direct line to which Arbid lies. Ewald, however (Geschichtl. iv. 370, note), insists, in opposition to Josephus, that the engagements of this campaign were confined to Judaea proper, a theory which drives him to consider "Galgalas" as the Jalignor north of Gophna. [Etg.] But he admits that no trace of an Arbel in that direction has yet come to light.

Arbel may be the Beth-arbel of Hos. x. 14, but there is nothing to ensure it.

G.

ARBITE, THE (אֶרְבִּי: de Arba). Parani the Arbsite was one of David's guard (2 Sam. xxiii. 35). The word, according to Gesenius (Thes. ii. p. 145) [and Fürst, i. 134], signifies a native of Arba. In the parallel list of Chronicles, it is given as Ren-Eziel, by a change in letters not infrequently occurring. [Ezech.] The LXX. version, ὁ ἀρβίτις, is very corrupt. [Comp., however, reads Ἀρβίλ: Alex. as ὁ ἀρβίτης—A.] (See Kenneth, Dissert. on 2 Sam. xxiii. 210.)

ARBOYNAI [Ἀρβούναι: Sin. Xebovw]: Comp. ἀρβόματι: Abb. ἀρβόματι: Minia, jiid. ii. 21.] It is called there a "river" (A. V.), on the banks of which were "high cities" destroyed by Holophernes in his desulting march toward the country of the Jews. [Arboynax].

Volkmar (Handb. d. Ethn. in die Apost. i. 190, 195) adopts with some modification the con-

v Some MSS. and the important version of the Syriac Peshito read "Bilad;" in which case the Arblade beyond Judaea must be thought of. But it is hardly likely that Josephus would be inaccurate in his topography of a part of the country which he knew so thoroughly.

v The importance of the Wady Hamnah in a military point of view, as commanding the great north road, the Sea of Galilee, and the important springs in the plain of Gennesarath, is not lost sight of by Wilkow (Landk. des Bib., in Ritter, Jordan, p. 328).
ARCHELAUS

ARCHITECTURE

The death of Herod took place in the same year with the birth of Christ; but this is to be placed four years before the date in general use as the Christian era.

ARCHITECTURE

ARCHIPPELUS, ARCHITECTUS (ARCHITECTUS; ARCHITECTUS, ARCHITECTUS)

ARCHIVES, ARCHIVE (ARCHIVE, ARCHIVE, ARCHIVES, ARCHIVES)
very artificer in brass and iron.” It is probable that the workers in metal were for the most part dwellers in towns; and thus the art of architecture and metalurgy became from the earliest times leading characteristically of Babylon. The practice of this art was derived from the nomadic tendencies of the human race.

To the race of Shehi is attributed (Gen. x. 11, 12, 22, xl. 2-9) the foundation of those cities in the plain of Shinar, Babylon, Nineveh, and others; to one of which, Resen, the epithet “great” sufficiently marks its importance in the time of the writer, a period at least as early as the 15th cent. B.C., if not very much earlier. (Rawlinson, Outl. of Arch. i. 221, 240, 258.) From the same book we learn the account of the earliest recorded building, and of the materials employed in its construction (Gen. xii. 3, 9); and though a doubt rests on the precise site of the tower of Babel, so long identified with the Birs Nimroud (Benjamin of Tudela, p. 109; Bodin, Newt. on Prop. x. 150, 530; Vaux, Nin. and Persp. pp. 173, 178; Keith, On Prop. p. 289), yet the nature of the soil, and the bricks found there in such abundance, though bearing merely the name of Nebuchadnezzar, agree perfectly with the supposition of a city previously existing on the same or a closely neighboring site. (Layard, ii. 249, 278, and Nin. and Bab, 511; Plin. vii. 50; Ex. i. 1.)

In the book of Esther (i. 2) mention is made of the palace at Susa, for three months in the spring the residence of the kings of Persia (Esth. ii. 13; Xen. Cyrop. vi. 6, § 22); and in the books of Isaiah and Judith, of the palace of Darius, to which they retired for two months during the heat of summer. (Tob. iii. 7, xiv. 14; Jud. i. 14; Herod. i. 98.)

A branch of the same Syro-Arabian race as the Assyrians, but the children of Ham, was the nation, or at least the dominant caste, of the Egyptians, the style of whose architecture agrees so remarkably with the Assyrian (Layard, ii. 290 ff.). It is in connection with Egypt that the Israelites appear first as builders of cities, compelled, in common with other Egyptian captives, to labor at the buildings of the Egyptian monarchs. Pithom and Ramses are said to have been built by them. (Ex. i. 11; Wilkinson, ii. 105.)

The Israelites were by occupation shepherds, and by habit dwellers in tents (Gen. xviii. 3). The “house” built by Jacob at Succoth is probably no exception to this statement (Gen. xii., Genes.). They had therefore originally, speaking properly, no architecture. Even Hebron, a city of higher antiquity than the Egyptian Zoon (Tunis), was called originally from its founder, perhaps a Canaanite of the race of Anak, Kirjath-Arba, the house of Arba (Num. xxii. 22; Josh. xiv. 15). From the time of the occupation of Canaan they became dwellers in towns and in houses of stone, for which the native limestone of Palestine supplied a ready material (Lev. xiv. 31, 45; 1 K. vii. 10; Stanley, S. of P. pp. 146, 8), but the towns which they occupied were not all, nor indeed in most cases, built from the first by themselves (Dent. vi. 10; Num. xiii. 19).

The peaceful reign and vast wealth of Solomon gave great impulse to architecture; for besides the Temple and his other great works at and near Jerusalem, he built cities and cities in various places. Eccl. iv, 16. Now which the names and sites of Beth- shiel and Gadur are in all probability represented by the more modern superstructures of Baalbek and Palmyra (1 K. ix. 15-24). Among the succeeding kings of Israel and of Judah, more than one is recorded as a builder: Asa (1 K. xv. 23), Baasha (xvi. 17), Omri (xvi. 24), Ahab (xvi. 34, 35), Jehu (1 K. xx. 34), Ezra (x. 27, 30), Josiah (xii. 11, xii. 6), and lastly, Jehezekiel, whose winter palace is mentioned (Jer. xxii. 14, xxxiv. 22; see also Am. iii. 15).

On the return from captivity, the chief care of the rulers was to rebuild the Temple and the walls of Jerusalem in a substantial manner, with stone, and with timber from Lebanon (Ex. iii. 8, 9; Neh. ii. 8, iii. 22). During the government of Solomon, Masaeæus (v. 27), the first castle of Haris, and afterwards a holy city, was erected for the defense of the Temple and the city. But the reigns of Herod and of his sons and successors were especially remarkable for the great architectural works in which they delighted. Not only was the Temple restored to a large portion if not to the full degree of its former magnificence, but the fortifications and other public buildings of Jerusalem were enlarged and embellished to an extent never before approached (xvi. 5; Neh. v. 26; p. 81, Bodin). [More particular descriptions of these works will be found under JERUSALEM.] Besides these great works, the town of Cæsarea was built on the site of an insignificant building called Strato’s Tower: Samaria was enlarged, and received the name of Sebastæ; the town of Antiquia was built: and Herod carried his love for architecture so far as to adorn with buildings cities even not within his own dominions, Berytus, Damascus, Tripolis, and many other places (Joseph. B. J. i. 21, 1, 11). His son Philip the tetarch enlarged the old Greek colony of Paneas, giving it the name of Cæsarea in honor of Tiberius; whilst his brother Antipas founded the city of Tiberias, and adorned the towns of Sepphoris and Bethanamphith, giving to the latter the name Livias, in honor of the mother of Tiberius (Leland, p. 497).

Of the original splendor of these great works no doubt can be entertained; but of their style and appearance we can only conjecture, though with nearly absolute certainty, that they were formed on Greek and Roman models. Of the style of the earlier buildings of Palestine, we can only form an idea from the analogy of the Egyptian, Assyrian, and Persian monuments now existing, and from the models of buildings still adopted in Eastern countries. The connection of Solomon with Egypt and with Tyre, and the influence of the Captivity, may have in some measure successively affected the style both of the two temples, and of the partial edifices of Solomon. The enormous stones employed in the Assyrian, Persepolitan, and Egyptian buildings find a parallel in the substructions of Baalbek, more ancient than the superstructure (Layard, ii. 317, 318), and in the stones of so vast a size which still remain at Jerusalem, relics of the building either of Solomon or of Herod (Williams, p. ii. 1). But as it has been observed again and again, scarcely any connected monuments are known to survive in Palestine by which we can form an accurate idea of its buildings, beautiful and renowned as they were throughout the East (Plin. v. 14; Stanley, p. 184), and even of those which do remain no trustworthy examination has yet been made; however, that the reservoirs known under the names of the Pools of Solomon and Hezekiah contain some portions at least of the original fabrics (Stanley, pp. 103, 165).
ARCTURUS

The domestic architecture of the Jews, so far as it can be understood, is treated under House, tools and instruments of building are mentioned by the sacred writers; the plumb-line, Am. vii. 7; the measuring-rod, Ez. xi. 3; the saw, 1 K. vii. 9.

ARCTURUS. The Hebrew words יַעֲרֹת, rendered "Arcturus" in the A. V. of Job ix. 9, xxxvii. 32, in conformity with the Vulg., of the former passage, are now generally believed to be identical, and to represent the constellation Urs Major, known commonly as the Great Bear, or Charles's Wain. Niebuhr (Deastr. de F. Arctt. p. 101) relates that he met with a Jew at Sana, who identified the Hebrew יַעֲרֹת with the constellation known to the Arabs by the name 'Oo-en-Nash, or 'Nash simply, as a Jew of Bagdad informed him. The four stars in the body of the Bear are named Ean u. u. in the tables of Ulgii Beigh, those in the tail being called el Beuth, "the daughters" (comp. Job. xxxvii. 32). The ancient versions differ greatly in their renderings. The LXX. render יַעֲרֹת by the "Placidae" in Job ix. 9 (unless the text which they had before them had the words in a different order), and יַעֲרֹת by "Hezerus," the evening star, in Job xxxvii. 32. In the former they are followed or supported by the Chaldee, in the latter by the Vulgate.

R. David Kimchi and the Talmudists understood by יַעֲרֹת the tail of the Ram or the head of the Bull, by which they are supposed to indicate the bright star Aldebaran in the Bull's eye. But the greatest difficulty is found in the rendering of the Syriac translators, who give as the equivalent of both יַעֲרֹת and יַעֲרֹת the word יַעֲרֹת, which is interpreted to signify the bright star Capella in the constellation Auriga, and is so rendered in the Arabic translation of Job. On this point, however, great difference of opinion is found. Bar Alī conjectured that יַעֲרֹת was either Capella or the constellation Orion; while Bar Bahlii hesitated between Capella, Aldebaran, and a cluster of three stars in the face of Orion. Following the rendering of the Arabic Hyde was induced to consider יַעֲרֹת and יַעֲרֹת distinct; the former being the Great Bear, and the latter the bright star Capella, or α of the constellation Auriga.

W. A. W.

ARD (אָרֶד [descend.]: ἀρέας: Ared). 1. Son of Benjamin (and if so, the youngest of his sons) (Gen. xvi. 21).

2. ἀρέας; [Ald. Alex. 'Ares]: Hebrew. Son of BELA, and grandson of Benjamin (Num. xxvi. 40), written Addar in 1 Chr. viii. 3. His descendants are called the AREDITES (altar), Num. xxvi. 40. [As Ard is not mentioned among the sons of Benjamin in Num. xxvi. 38, 39, "son" may stand for grandson in Gen. xvi. 21, and thus the same person be meant in both passages.]

AR DATH — the field called Ardathe — 2 Esdr. ix. 29.

* Lücke (Einl. in d. Offenb. d. Joh. i. 174) and Volkmar (Einl. in d. Apokr. lii. 131) take Ardathe (אַרְדָּחַד, Arad, Ahamat) to be a corruption for Arboth, meaning "a desert" (Heb. יָעַרָת), used as an appellative rather than as a proper name. Lücke supposes the desert of Judah to be intended: Volkmar, the Holy Land in general, which, though a "field of flowers," was then to the Israelites a desert (comp. 2 Esdr. x. 21, 22). A.

AR DITES, THE. [Ar.]

ARDON (ארדַן [figur.]: ἀρδαῖος; [Vat. H. Alex. Opea; Vat. M. Iopra; Arubai], 1 Chr. ii. 18. [A son of Caleb, the son of Hezon, by his wife Azubah.]

ARELE (אַרְלֶה, Sam. אַרְלֶה [son of a kera]: ἀρδαῖος; [Gen. ἀρδαῖος: Alex. ἀρδαῖος, Gough]. A red, a son of Gad (Gen. xvi. 11; Num. xxvi. 17). His descendants are called the AREITEDS (Num. xxvi. 17).

AREOPAGITE (Ἀρεωπαγιτής [Tisch. γελετός]): Areopagita. A member of the Court of Areopagus (Acts xxv. 34). [See DIONYSIUS.]

W. A. W.

AREOPAGUS or MARS' HILL (ὁ ἀρεωπάγος ἡμιότος, i. e. the hill of Mars or Areopagus, Vulg.), was a rocky height in Athens, opposite the western end of the Acropolis, from which it is separated by the valley of the Pythian. It rises gradually from the northern end, and terminates abruptly on the south, over against the Acropolis, at which point it is about fifty or sixty feet above the valley already mentioned. Of the site of the Areopagus, there can be no doubt, both from the description of Pausanias, and from the narrative of Herodotus, who relates that it was a height over against the Acropolis, from which the Persians assailed the latter rock (Vaus. i. 28, § 5; Herod. vii. 52). According to tradition it was called the hill of Mars (ares), because this god was brought to trial here before the assembled gods by Neptune (Poseidon), on account of his murdering Halirrhethius, the son of the latter. The spot is memorable as the place of meeting of the Council of Areopagus (ὁ ἀρεωπαγιτής ἐπισκόπος), frequently called the Upper Council (ὁ ἀρωπαγιτής) to distinguish it from the Council of Five Hundred, which held its sittings in the valley below the hill. It existed as a criminal tribunal before the time of Solon, and was the most ancient and venerable of all the Athenian courts. It consisted of all persons who had held the office of Archon, and who were members of it for life, unless expelled for misconduct. It enjoyed a high reputation, not only in Athens, but throughout Greece. Before the time of Solon the court tried only cases of willful murder, wounding, poisoning, and arson; but he gave it extensive powers of a censorial and political nature. The Council is mentioned by Cicero (ad Fam. xxii. 1; ad Att. i. 14, v. 11), and continued to exist even under the Roman emperors. Its meetings were held on the south-eastern summit of the rock. There are still sixteen stone steps cut in the rock, leading up to the hill from the valley of the Aegora below; and immediately above the steps is a bench of stones entrenched in the rock, forming three sides of a quadrangle, and facing the south. Here the Areopagites sat as judges in the open air (σταθμὸς ἐκκατανοοντος, Polux. viii. 118). On the eastern and western side is a raised block. These blocks are probably the two rude stones which Pausanias saw there, and which are described by Euripides as assigned, the one to the accuser, the other to the criminal, in the cases which were tried in the court (Iph. T. 961). The Areopagus possesses peculiar interest to the

* A. - I. Robinson says, habitation, that it is "from about north" from the Areopagus (E by Rec. i. 7). H.
ARGOB

Christian, as the spot from which St. Paul delivered his memorable address to the men of Athens (Acts xvii. 22-31). It has been supposed by some commentators that St. Paul was brought before the Council of Areopagus; but there is no trace in the narrative of any judicial proceedings. St. Paul "disputed daily" in the "market" or Agora (xvii. 17), which was situated south of the Areopagus in the valley lying between this hill and those of the Acropolis, the Pnyx, and the Museum. Attracting more and more attention, certain philosophers of the Epicureans and Stoics "brought him up from the valley, probably by the stone steps already mentioned, to the Areopagus above, that they might listen to him more conveniently. Here the philosophers probably took their seats on the stone benches usually occupied by the members of the Council, while the multitude stood upon the steps and in the valley below. (For details, see Dict. of. Ant. p. 126; Dict. of. George, l. c. 281.) [See Mars. Hist. for Paul's discourse there.]

A'RES (Αρές: Ares).—AH. 2 (1 Esdr. v. 10).

A'RETAS (Αρέτας: Arab. Chor. ech,): a common appellation of many of the Arabian kings or chiefs. Two are mentioned in the Bible:

1. A contemporary of Antiochus Epiphanes (B. C. 170) and Jason (2 Macc. v. 8). B. F. W.

2. In 2 Cor. xi. 32, St. Paul writes, εν δαμασκός καὶ θεάρφυς Αρέτα του βασιλείου εσφορει τιν τινι δαμασκίνης πασα τι. This Aretas was father-in-law of Herod Antipas. [HEL.1] There is a somewhat difficult chronological question respecting the subordination of Damascus to this Aretas. The city under Augustus and Tiberius was attached to the province of Syria; and we have Damascuscene coins of both these emperors, and again of Nero and his successors. But we have none of Caligula and Claudius, and the following circumstances make it probable that a change in the ruler-ship of Damascus took place after the death of Tiberius. There had been war for some time between Aretas, king of Arabia Nabataea, whose capital was Petra, and Antipas, on account of the divorce by Antipas of Aretas's daughter at the instance of Herodias, and also on account of some frontier disputes. A battle was fought, and the army of Antipas entirely destroyed (Joseph. Ant. xviii. 5, § 1).a On this, being in favor with Tiberius, he sent to Rome for help; and Vitellius, governor of Syria, was commissioned to march against Antipas, and to take him dead or alive. While he was on his march (Ant. xviii. 5, § 5) he heard at Jerusalem of the death of Tiberius (March 16, A. D. 37), and πάνων ενδοχρονίων αμείβων δυσμενών διὰ τὰ εἰς Γαίαν μεταποτικοῖν τὰ πράγματα, abandoned his march, and sent his army into winter-quarters, himself remaining at Antioch. By this change of affairs at Rome, a complete reversal took place in the situation of Antipas and his enemy. The former was now long (A. D. 50) banished to Lyons, and his kingdom given to Agrippa, his son (Joseph. Ant. xviii. 7), who had been living in bonds of intimacy with the new emperor (Ant. xviii. 6, § 5).

It would be natural that Aretas, who had been grossly injured by Antipas, should, by this change of affairs, be received into favor: and the more so, as Vitellius had an old grudge against Antipas, of which Josephus says, Ant. xviii. 4, § 5, Ύπερτωτερόων, μέχρι ἵνα καὶ μετέγιναι. Ἐγὼ τὴν ἀρχήν παρειληφθών. Now in the year 38 Caligula made several changes in the East, granting Iturœ to Sozomen, Lesser Armenia, and parts of Arabia to Cotes, the territory of Cotes to Ilmataxes, and to Polemon, son of Polemon, his father's government. These facts, coupled with that of no Damascuscene coins of Caligula or Claudius existing, make it probable that about this time Damascus, which belonged to the predecessor of Aretas (Ant. xviii. 5, § 2), was granted to him by Caligula. Thus the emoluments would vanish. The other hypotheses, that the ethemarch was only visiting the city (as if he could then have guarded the walls to prevent escape),—that Aretas had seized Damascus on Vitellius giving up the expedition against him (as if a Roman governor of a province would allow one of its chief cities to be taken from him, merely because he was in uncertainty about the policy of a new emperor), are very improbable. Wieseler, Chron. des apostolischen Zeitalters, p. 174, and again in his art. in Herzog's Realencyk., refers to a coin "Βασιλείως Αρέτας φιλάνθρωπος," but it seems to belong to an earlier Aretas. See Conyby, and Howson, Life of St. Paul, ed. 2, vol. i. p. 132, note. See Wieseler, pp. 142 ff., 167 ff., whose view has been adopted in this article: Anger, de Tempor. in Actis Ap. not. sub. 173 ff., and Conyby and Howson, vol. i. p. 59 ff. end.

A'REUS, a king of the Lacedæmonians, whose letter to the high priest Onias is given in 1 Macc. xii. 20 ff. He is called Ares in the A. V. in ver. 20, and in the margin of ver. 7; but in the Greek text he is named "Οραγυς [Alex. -vev]" in ver. 20, and Αρέως in ver. 7: there can be little doubt however that these are corruptions of "Aresus." In Josephus (Josephus Ant. xii. 4, § 10, v. § 8) the name is written "A'ρέως, and in the Vulgate "Aresus." There were two Spartan kings of the name of Aresus, of whom the first reigned n. c. 309-265, and the second, the grandson of the former, died when a child of eight years old in n. c. 257. There were three high-priests of the name of Onias, of whom the first held the office n. c. 323-300. This is the one who must have written the letter to Aresus I., probably in some interval between 309 and 300. (Grimm, zu Macc. p. 185.) [ONIAXS.]

ARGOB (Αργόβ), once with the def. article αργόβ, "the stony," from αργός, l. c. 1260: "Αργόβ: Argob," a tract of country on the coast of the east of Jordan, in Bashan, in the kingdom of Og, containing 60 "great" and fortified "cities."
ARGOB

ARGOB (אֲרֹגּוֹב) was in the portion allotted to the half-tribe of Manasseh, and was taken possession of by Jair, a chief man in that tribe. [Jair, the chief man in the half-tribe of Manasseh, according to the Book of Judges.]

Aryeh W. -^?^15, 16

Identification circle Edrei. In the Samaritan version it is rendered אֲרֹגּוֹב (Argoba), but in the Targums of Onkelos and Jonathan it is אַרְגּוֹב (l. e. Trachonitis).

Later on we trace it in the Arabic version of Sebastian Schmid explained that both Argob and Arich were two princes of Pekahiah, whose influence Pekah feared, and whom he therefore slew with the king. Rashii understands by Argob the royal palace, near which the castle was in which the murder took place (2 K. 25). W. A. W.

ARIAHATHES (properly Mithridates, Dioq. xxxi. 25, ed. ap. Vl. ΠΗΛΟΠΟΤΩΡ (Ἀριάραθης), [Comp. Abb. Alex.] Ἀριάραθης [Vuig. Aristarchus], probably signifying "great" or "honorable one of armor," from the roots existing in argos [Sanskr.], "honorable," and ραθος [head], "master;" Smith. Dict. Biogr. s. v.), king of Cappadocia B. C. 163-130. He was educated at Rome (Liv. xlii. 19): and his whole policy was directed according to the wishes of the Romans. This subservience cost him his kingdom B. C. 138; but he was shortly afterwards restored by the Romans to a share in the government (App. Syr. 47; cf. Polyb. xxxii. 26, 29; Polyb. iii. 5.) and on the capture of his palace Pergamum by Demetrius Soter, regained the supreme power (Just. xxxviii. 1). He fell in B. C. 130, in the war of the Romans against Antonines, who claimed the kingdom of Pergamum on the death of Attalus III. (Just. xxxviii. 1, 2). Letters were addressed to him from Rome in favor of the Jews (1 Macc. xx. 22), who in after-times seem to have been numerous in his kingdom (Acts ii. 9, comp. I. Pet. i. 1).

ARIADAI [3 sp.] (Ἀριάδαι) [FA. Apses; Comp. I. Pet.] Ariadai, ninth son of Haman (Esth. ix. 9).

ARIDATHA (Ἀριάθα) [3 sp.;] [Zeabadi] [Vat. Alex. FA. Zeabata; Comp. Apses; Aridaioi] Aridaia), sixth son of Haman (Esth. iii. 8).

ARIEH (properly Arjah or Arjah.) (אֶרְיֶה) [Comp.] Aréia; [Vat. Aréia] Alex. [Comp.] Arie, "The Lion," so called probably from his daring as a warrior; either one of the accomplices of Pekah in his conspiracy against Pekahiah, king of Israel, or, as Sebastian Schmid understands the passage, one of the princes of Pekahiah, who was put to death with him (2 K. xxv. 25). Rashii explains it literally of a golden lion which stood in the castle. W. A. W.

ARIEL (אַרְיֵאֵל, i. e. hero, of God, or, hearth of God: Ἀριήλ: Arieel).

1. As the proper name of a man (where the meaning no doubt is the first of those given above) the word occurs in Ezr. viii. 16. This Arieel was one of the "chief men" who under Ezra directed
the caravan which he led back from Babylon to Jerusalem.

The word occurs also in reference to two Moabites slain by Benoah, one of David's chief captains (2 Sam. xxii. 20; 1 Chr. xi. 22). Gesenius and many others agree with our A. V. in regarding the word as an epithet, "two lion-like men of Moab;" but it seems better to look upon it, with Tholuck, Winer, Furst, and others, as a proper name, and translate "two [sons of] Ariel," supplying the word שָׂרִי, which might easily have fallen out.

A similar word occurs in Num. xxvi. 17, בָּנֶיה (bànî’), as the name of a Gadite, and head of one of the families of that tribe. Both the LXX. and the Vulg. give Ariel for this word, and Winer without remark treats it as the same name.

2. A designation given by Isaiah to the city of Jerusalem (Is. xxi. 1 [bis], 2 [bis], 7 [Alex. יוסי-ปาף]). Its meaning is obscure. We must understand by it either "Lion of God;" — so Gesenius, Ewald, Hufnicker, Furst, and many others — or, with Umbreit, Knobel, and most of the ancient Jewish expositors, "Hearth of God," tracing the first component of the word to the Arabic ش،א a

fireplace or hearth (Gen. Thes.; First, Heb. s. Child, Rambaut. s. v.). This latter meaning is suggested by the use of the word in Ez. xliii. 16, in a synonomy for the altar of burnt-offering, although Hufnicker (Commentator ab. Hebrew. p. 698), relying on the passage in Isaiah, insists that even here we must understand Lion of God. The difficulty is increased by the reading of the text in Ezekiel being itself doubtful. On the whole it seems most probable that the words used by the two prophets, if not different in form, are at least different in derivation and meaning, and that as a name given to Jerusalem Ariel means "Lion of God," whilst the word used by Ezekiel means "Hearth of God."

F. W. G.

ARIMATH.εα (A. V. the.σα) (Ἀριμαθαία, Matt. xxvii. 57; Luke xxiii. 51; John xix. 38), the birthplace, or at least the residence of Joseph, who obtained leave from Pilate to bury his Lord in "his new tomb" at Jerusalem. St. Luke calls this place "a city of Judah;" but this presents no objection to its identification with the prophet Samuel's birthplace, the Ramah of 1 Sam. i. 1, 19, which is named in the Septuagint Armathim (Ἀραμαθαία), and by Josephus, Armathai (Ἀραμαθαί, Ιωσήφ. Ant. vi. 10, § 2). The Ramathaim of the Apocalypse (Ῥαμαθία, 1 Mac. x. 34) is probably the same place. [Raham.

J. S. H.

ARIIOCH (אַריוֹך) probably from לֶשֶׁך (Lechem, LXX.: [twice] in Dan. only: elsewhere אַרְיוֹך) אָרִיּוֹך (Arioch, Vulg.).

1. "King of Ellasar" (Gen. xiv. 1, 9).
2. "The captain of the guard" of Nebuchadnezzar (Dan. ii. 14 ff. B. W.

ARIASAI (3 syl.) (אריאסאי): Πορφαῖος: [Alex. Πορφαῖος] Πορφαῖος: [Alex. Πορφαῖος] Aristobulus, eighth son of Hannan (Esth. ix. 9).

ARISTARCUS (Ἀρισταρχος [most excellent ruler]; Aristarchus), a Thessalonian (Acts xx. 4; xxvii. 2), who accompanied St. Paul on his third missionary journey (Acts xix. 29), where he is mentioned as having been seized in the tumult at Ephesus together with Gaius, both συνεκποιησαντιος Παπποσ). We beat of him again as accompanying the apostle on his return to Asia, Acts xx. 41, and again xxvii. 2; as being with him on his voyage to Rome. We have him here forwards as St. Paul's συνεπιμελητης in Col. iv. 10, and Phil. 2. 21, both these notices belonging to the same time of Col. iv. 7; Phil. 12. 2. After this we altogether lose sight of him. Tradition, says Winer, makes him bishop of Aphaea.

II. A.

* Though Aristarchus is mentioned so often, the A. V. very strangely speaks of him as "one Aristarchus" in Acts xxvii. 2. He appears from that passage to have gone with the apostle to Rome of his own accord. We do not trace him as Paul's συνεπιμελητης (fellow-guardian) in Phil. 1:2, but since he is reckoned there among the συνειρημενοι (fellow-labourers), we may conclude that he received the other appellation in Col. iv. because he made himself the voluntary slaver of Paul's exile and captivity. To remember the brethren in their bonds was accounted the same thing as to be bound with them; see Heb. xiii. 3 (οὐκοδημοσίως). The letters to the Colossians and to Philemon were sent many at the same time, which leaves no room for supposing that Aristarchus had been put in prison after the letter to Philemon was written.

II. ARISTOBULUS (Ἀριστοβούλος [most excellent counsellor]; Aristobulus), a Jewish priest (2 Mac. i. 10), who resided in Egypt in the reign of Ptolemy VI. Philometer (comp. Grumus, 2 Mac. i. 9). In a letter of Judas Maccabaeus he is addressed (165 n. c.) as the representative of the Egyptian Jews (Ἀριστοβούλος ... καὶ των Ἰουρίων Ἰουδαίων). The letters to the Cœlecyrians and to Philemon were sent very at the same time, which leaves no room for supposing that Aristarchus had been put in prison after the letter to Philemon was written.

**The fragments which remain**
ARK OF THE COVENANT

This, taken generally together with the mercy-seat, was the one piece of the tabernacle's furniture especially invested with sanctity and mystery, and is therefore the first for which precise directions were delivered (Ex. xxv.). The word signifies a mere chest or box, and is (as well as the word ἄρχοντα) "ark" of Noah) rendered by the LXX. and New Testament writers by ΚΑΦΡΟΣΘΥ. We may remark: (I.) its material dimensions and fittings; (II.) its design and object, under which will be included its contents; and (III.) its history.

I. It appears to have been an oblong chest of hewing (cedar) wood, 2 cubits long, by 1 broad and deep. Within and without gold was overlaid on the wood, and on the upper side or lid, which was edged round about with gold, the mercy-seat, supporting the cherubim one at each end, and regarded as the symbolical throne of the Divine presence (Cherubim and Mercy-seat), was placed. The ark was fitted with rings, one at each of the four corners, and therefore two on each side, and through these were passed staves of the same wood similarly overlaid. By these staves, which always remained in the rings, the Levites of the house of Kohath, to whose office this especially appertained, bore it in its progress. Probably, however, when removed from within the veil, in the most holy place, which was its proper position, or when taken out therefrom, priests were its bearers (Num. vii. 9, x. 21, iv. 19, 20; 1 K. viii. 6, 9). The ends of the staves were visible without the veil in the holy place of the temple of Solomon, the staves being drawn to the ends, apparently, but not out of the rings. The ark, when transported, was enveloped in the veil of the dismantled tabernacle, in the curtains of badgers' skins, and in a blue chiton of all, and was therefore not seen.

II. Its purpose or object was to contain inviolate the Divine autograph of the two tables, that "covenant" from which it derived its title, the idea of which was inseparable from it, and which may be regarded as the depositum of the Jewish dispensation. The perpetual safe custody of the material tables no doubt suggested the moral observance of the precepts inscribed. It was also probably a reliquary for the pot of manna and the rod of Aaron. We read in 1 K. viii. 9, that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." Yet St. Paul, or the author of Heb. iv. 4, asserts that, beside the two tables of stone, the "pot of manna" and "Aaron's rod that budded" were inside the ark, which were directed to be "laid up" and "kept before the testimony," i. e., before the tables of the law (Ex. xx. 20); and probably, since there is no mention of any other receptacle for them, and some would have been necessary, the statement of 1 K. vii. 9 implies that by Solomon's time these relics had disappeared.

The expression יִנַּשׁ יָנָשָׁה, Deut. xxxi. 26, obscurely rendered "in the side of the ark" ("A. V.") merely means "beside" it. The words of the A. V. in 1 Chr. xiii. 3, seem to imply an use of the ark for the purpose of an oracle; but this is probably erroneous, and "we sought it not" the meaning; so the LXX. renders it: see Gesenius, Lex. s. v. יִנַּשׁ.

Occupying the most holy spot of the whole sanctuary, it tended to exclude any idol from the centre of worship. And Jeremiah (iii. 16) looks forward to the time when even the ark should be "no more remembered," as the climax of spiritualized religion apparently in Messianic times. It was also the support of the mercy-seat, materially symbolizing, perhaps, the "covenant," as that on which "manhood" rested. It also furnished a legitimate vest to that longing after a material object for reverential feeling which is common to all religions. It was, however, never seen, save by the high-priest, and resembled in this respect the Peity whom it symbolized, whose face none might look upon and live (Winer, ad loc. not. That this reverential feeling may have been impaired during its absence among the Philistines, seems probable from the example of Uzzah.

III. The chief facts in the earlier history of the ark (see Josh. xii. and other chapters) need not be recited. We may notice, however, a fiction of the Rabbis which seems to be a corruption of the two arks, one which remained in the shrine, and another which preceded the camp on its march, and that this latter contained the
breaken tables of the law, as the former the whole ones. In the decline of religion in a latter period a superstitions sanctity was attached to its presence in battle (though this was relaxed by its per- mitted c...
ARMENIA

used by one of the Jewish prophets (Zech. xii. 11).

As regards the Apocalypse, it is remarked by Stauney
(S. 5. P. p. 340), that this imagery would be
peculiarly natural to a Galilean, to whom the scene
of these battles was familiar. [MEGIDDO] 

J. S. L.

ARMENIA (Armenia) is nowhere mentioned
under that name in the original Hebrew, though
it occurs in the English version (2 K. xix. 37),
where our translators have very unnecessarily
substituted it for Ararat (comp. marginal reading).
[Here the LXX. read Αραρατ (Alex. Αραραν),
Vulg. Araratia). The absence of a definite
article, however, which was not the indigenous name
of the people, by no means implies that the Hebrew
writers were unacquainted with the country. They
undoubtedly describe certain districts of it under the
names Ararat, Minni, and Togarmah. Of these
three the latter appears to have the widest signifi-
cation. It is the name of a race (Gen. x. 3), and
not of a locality, and is used by Ezekiel as descrip-
tive of the whole country (xxvii. 14, xxxviii. 6),
while the two former are mentioned together, and
have been identified with separate localities.

Armenia is that lofty plateau whence the rivers
Euphrates, Tigris, Araxes, and Acaspis, pour
down their waters in different directions, the two
first to the Persian Gulf, the last two respectively
to the Caspian and Arus Seas. It may be termed
the nucleus of the mountain system of western
Asia. From the centre of the plateau rise two
lofty chains of mountains, which run from E. to
W., converging towards the Caspian sea, but par-
allel to each other towards the W., the most norther-
ly named by ancient geographers Alanis M., and
culminating in Mount Ararat; the other named
Niphates M. Westward these ranges may be
traced in Anti-Taurus and Taurus, while in the op-
posite direction they are continued in Caspius M.
The climate of Armenia is severe, the degree of
severity varying with the altitude of different local-
ities; the valleys being sufficiently warm to ripen
the grape, while the high lands are bleak and only
adapted for pasture. The latter supported vast
numbers of mules and horses, on which the wealth
of the country chiefly depended; and hence Strabo
(xi. 523) characterizes the country as αρδζάμη
τοί ποδίτων, and tells us that the horses were held in
as high estimation as the celebrated Nissene breed.
The inhabitants were keen traders in ancient as
in modern times.

The slight acquaintance which the Hebrew
writers had of this country was probably derived
from the Phenicians. There are signs of their
knowledge having been progressive. Isaiah, in his
prophecies regarding Babylon, speaks of the hosts
as coming from "the mountains" (xiii. 4), while
Jeremiah, in connection with the same subject, uses
the specific names Ararat and Minni (li. 27).
Ezekiel, who was apparently better acquainted
with the country, uses a name which was familiar to its
own inhabitants, Togarmah. Whether the use of
the term Ararat in Is. xxxviii. 38 belongs to the
period in which the prophet himself lived, is a
question which cannot be here discussed. In the
prophetic passages to which we shall refer, it will
be noticed that Armenia is spoken of rather in
reference to its geographical position as one of the
extreme northern nations with which the Jews were
acquainted, than for any more definite purpose.
(1) Ararat is noticed as the place whither the
remnants of Scenacheri fell (Is. xxxviii. 35). In
the prophecies of Jeremiah (li. 27) it is summoned
along with Minni and Ashkenaz to the destruction of
Babylon,—the LXX. however only notice the last.
It was the central district surrounding the moun-
tain of that name. (2) Minni (Minh) is only
noticed in the passage just referred to. It is
probably identical with the district Minyas, in the
upper valley of the Murad-so branch of the Eup-
hrates (Joseph. Ant. i. 3, § 6). It contains
the root of the name Armenia according to the
generally received derivation, Har-Minni, "the
mountains of Minni." It is worthy of notice that the
spot where Xenophon ascertains that the name of
the country through which he was passing was Ar-
menia, coincides with the position here assigned to
Minni (Xen. An. iv. 5; Ainsworth, Track of
10,000, p. 177). (3) Togarmah (τογαρμα) is noticed in two passages
of Ezekiel, both of which support the idea of its
identity with Armenia. In xxvii. 14 he speaks of
its commerce with the Tyrians in "horses, horse-
men, and mules" (A. V.), or, as the words mean,
"carriage-horses, riding-horses, and mules" (Hitzig,
Comment.), which we have already noticed as the
staple productions of Armenia. That the house of
Togarmah traded in the fairs of Tyre," as the
A. V. expresses it, is more than the Hebrew text
seems to warrant. The words simply signify that
the Armenians carried on commerce with the Ty-
rians in these articles. In this passage Togarmah
is mentioned in connection with Meshech and
Tudal; in xxxviii. 6, it is described as "of the
northern quarters" in connection with Gomer. Cou-
ping with these particulars the relationship between
Togarmah, Ashkenaz, and Riphath (Gen. x. 3),
the three sons of Gomer, and the nations of which
these patriarchs were the progenitors, we cannot
fail in coming to the conclusion that Togarmah
represents Armenia. We will only add that the
traditional belief of the Armenians themselves, that
they are descended from Thorgomass or Togar-
mah, strongly confirms this view.

Egypt, iii. 375, and Plates 1, 2, 14. They were even used by the old British chiefs (Turner, Engl. Soc. i. 385). The story of Tarchia shows that they were common among the ancient Sabines, but the Romans considered the use of them effeminate, although they were sometimes given as military rewards (Liv. x. 44). Finally, they are still worn among most of the splendid regalia of modern Oriental sovereigns, and it is even said that some of the kings of Persia are worth a million sterling (Kitto, Crit. Hist. of Pol. i. 409). They form the chief wealth of modern Hindoo ladies, and are rarely taken off. They are made of every sort of material from the finest gold, jewels, ivory, coral, and pearl down to the common glass rings and varnished earthware bangles of the women of the Decian. Now, as in ancient times, they are sometimes plain, sometimes encased, sometimes with the ends not joined, and sometimes a complete circle. The arms are sometimes quite covered with them, and if the wearer be poor, it matters not how mean they are provided only that they glitter. It is thought essential to beauty that they should fit close, and hence Hatner calls them "rather maimers than braclets," and Buchanan says that "the poor girls rarely get them on without drawing blood, and rubbing part of the skin from the hand; and as they weigh great numbers, which often break, they suffer much from their love of admiration." Their enormous weight may be conjectured from Gen. xxxiv. 24. [Bracel.]
the derivation of the words, and from the renderings of the ancient versions.

The subject naturally divides itself into 1. Offensive weapons: Arms. II. Defensive weapons: Armor.

I. Offensive weapons: 1. Apparently the earliest known, and most widely used, was the Chereb (כֶּרֶב), "Sword," from a root signifying to lay waste.

Its first mention in the history is in the narrative of the massacre at Shechem, when "Simeon and Levi took each man his sword, and came upon the city boldly and slew all the males" (Gen. xxxiv. 25). But there is an allusion to it shortly before in a passage undoubtedly of the earliest date (Ewald, i. 446 note); the expostulation of Laban with Jacob (Gen. xxxi. 26). After this, during the account of the conquest and of the monarchy, the mention of the sword is frequent, but very little can be gathered from the casual notices of the text as to its shape, size, material, or mode of use. Perhaps if anything is to be inferred it is that the chereb was not either a heavy or a long weapon. That of Ehud was only a cubit, i.e. 18 inches long, so as to have been concealed under his garment, and nothing is said to lead to the inference that it was shorter than usual, for the "dagger" of the A. V. is without any ground, unless it be a rendering of the μαχαίρα of the LXX. But even assuming that Ehud's sword was shorter than usual, yet a consideration of the narratives in 2 Sam. ii. 16 and xx. 8-10, and also of the case with which David used the sword of a man so much larger than himself as Goliath (1 Sam. xvii. 51, xxi. 8).

Egyptian Sword.

K. ii. 5. A ghastly picture is there given us of the murdered man and his murderer. The unfortunate Anaxa actually disembowelled by the single stroke, and "wallowing" in his blood in the middle of the road — the treacherous Joab standing over him, bespattered from his "girdle" to his "shoes" with the blood which had spouted from his victim!

The chereb was carried in a sheath (רָכָּב, 1 Sam. xvii. 51; 2 Sam. xx. 8, only: רִכְּב). The passage (1 Chr. xxvi. 27, only) shang by a girdle (1 Sam. xxv. 13) and resting upon the thigh (Ps. xlv. 3; Judg. iii. 16), or upon the hips (2 Sam. xx. 8). "Girding on the sword" was a symbolical expression for commissioning war, the more forcible because in times of peace even the king in state did not wear a sword (1 K. iii. 24); and a similar expression occurs to denote those able to serve (Judg. viii. 19; 1 Chr. xxii. 5). Other phrases, derived from the chereb are, "to suite with the edge," (literally "mouth," comp. στόματα, and comp. "devour," Is. i. 20) of the "sword" — "skin with the sword" — "men that drew sword," &c.

Swords with two edges are occasionally referred to (Judg. iii. 16; Ps. cxlix. 6), and allusions are found to "whetting" the sword (Heb. xxi. 41; Ps. xliv. 3; Ez. xxi. 9). There is no reference to the material of which it was composed (unless it be Is. ii. 4; Joel iii. 10); doubtless it was of metal from the allusions to its brightness and "glittering" (see the two passages quoted above, and others), and the ordinary word for blade, namely, חָרֵב, "a flame." From the expression (Josh. v. 2, 3) "swords of rock," A. V. "sharp knives," we may perhaps infer that in early times the material was flint.

2. Next to the sword was the Spear; and of this weapon we meet with at least three distinct kinds.

a. The Chanith (חַנִית), a "Spear," and that of the largest kind, as appears from various circumstances attending its mention. It was the weapon of Goliath — its staff like a weaver's beam, the iron head alone weighing 600 shekels, about 25 lbs. (1
ARMS

Sam. xvii. 7, 45; 2 Sam. xxi. 19; 1 Chr. xx. 5), and also of other giants (2 Sam. xviii. 21; 1 Chr. xi. 24) and mighty warriors (2 Sam. ii. 23, xxiii. 18; 1 Chr. xi. 11, 20). The chisnith was the habitual companion of King Saul — a fit weapon for one of his gigantic stature — planted at the head of his sleeping-place when on an expedition (1 Sam. xvi. 7, 8, 11, 12, 16, 22), or held in his hand when mustering his forces (xxii. 6); and on it the dying king is leaning when we catch our last glimpse of his stately figure on the field of Gilboa (2 Sam. i. 6). His fits of anger or madness become even more terrible to us, when we find that it was this heavy weapon and not the lighter javelin "(as the A. V. renders it) that he cast at David (1 Sam. xvi. 10, 11, xix. 9, 10) and at Jonathan (xx. 33). A striking idea of the weight and force of this ponderous arm may be gained from the fact that a mere back thrust from the hand of Xerxes was enough to drive its butt end through the body of Achab (2 Sam. ii. 21). The chisnith is mentioned also in 1 Sam. xix. 19, 22, xxi. 8; 2 K. xi. 10; 2 Chr. xxiii. 9, and in numerous passages of poetry.

b. Apparently lighter than the preceding, and in more than one passage distinguished from it, was the cedon (ךֵדֹן), to which the word "javelin" perhaps best answers (Ewab, Wurfspieß). It would be the appropriate weapon for such maneuvering as that described in Josh. viii. 14-27, and could with ease be held outstretched for a considerable time (18, 26; A. V. "spear"). When not in action the cedon was carried on the back of the warrior, between the shoulders (1 Sam. xvii. 6, "target," and margin "gorget"). Both in this passage and in verse 15 of the same chapter the cedon is distinguished from the chisnith. In Job xxxix. 23 ("spear") the allusion seems to be to the quivering of a javelin when poised before hurling it.

c. Another kind of spear was the Remoth (רמֹת). In the historical books it occurs in Num. xxx. 7 ("javelin"), and 1 K. xviii. 28 ("lances," 1611, "lancers"). Also frequently in the later books, especially in the often recurring formula for arms, "shield and spear." 1 Chr. xii. 8 ("beak-Ver"), 24 ("spear"), 2 Chr. xi. 12, xiv. 8, xxv. 5, and Neh. iv. 13, 16-21; Ez. xxxix. 9, &c.

d. A lighter missile or "dart" was probably the Shekib (שְׁקִיב). Its root signifies to project or shoot out, but unfortunately there is nothing beyond the derivation to give us any knowledge of its nature. See 2 Chr. xxii. 10, xxiii. 5 ("darts"); Neh. iv. 17, 23 (see margin); Job xxxiii. 18, xxvii. v. 12; Joel ii. 8.

e. The word Shebath (שֶבָת), the ordinary meaning of which is a rod or staff, with the derived force of a baton or sceptre, is used once only with a military signification, for the "darts" with which Joab despatched Absalom (2 Sam. xviii. 14).

f. Of missile weapons of course the chief was undoubtedly the Bow, Kesbeth (קֶשְׁבֶת), it is met with in the earliest stages of the history, in use both for the chase (Gen. xxi. 20, xxvii. 3) and war (xlviii. 22). In later times archers accompanied the armies of the Philistines (1 Sam. xxx. 3; 1 Chr. x. 3) and of the Syrians (1 K. xxi. 34). Among the Jews its use was not confined to the common soldiers, but captains high in rank, as Jehu (2 K. ix. 24), and even kings' sons (1 Sam. xviii. 4) carried the bow, and were expert and sure in its use (2 Sam. i. 22). The tribe of Benjamin seems to have been especially addicted to archery (1 Chr. vii. 40, xii. 2; 2 Chr. xiv. 8, xvii. 17); but there were also bowmen among Reuben, Gad, Manasseh (1 Chr. v. 18), and Ephraim (Ps. lixvii. 9).

Egyptian Bows.

Of the form or structure of the bow we can gather almost nothing. It seems to have been bent with the aid of the bow-stick, as now, for the word commonly used for it is רָכִּב, to trend (1 Chr. v. 18, viii. 40; 2 Chr. xiv. 8; Is. v. 18; Ps. lii. 12, &c.).

Bows of steel (or perhaps brass, בַּזֵּבָת) are mentioned as if specially strong (2 Sam. xxii. 35; Ps. xlvii. 34). The string is occasionally named, בַּזֵּבָת. It was probably at first some kind of weed or natural cord, since the same word is used in Josh. xvii. 7-9 for "green withs."

In the allusion to bows in 1 Chr. xii. 2, it will be observed that the sentence in the original stands "could use both the right hand and the left in stones and arrows out of a bow," the words "hurling" and "shooting" being interpolated by the translators. It is possible that a kind of bow for shooting bullets or stones is here alluded to, like the peltet-bow of India, or the "stone-bow" in use in the middle ages — to which allusion is made by Shakespeare (Twelfth Night, ii. 5), and which in Wiel. v. 22 is employed as the translation of πέτροβολός. This latter word occurs in the LXX. text of 1 Sam. xiv. 14, in a curious variation of a passage which in the Hebrew is hardly intelligible — ἐν βολία, καὶ ἐν πέτροβολοις, καὶ ἐν κόνδυλας, τοὺς πέδων: "with things thrown, and with stone-bows, and with flints of the field." If this le
accepted as the true reading, we have here by com-
parison with xiv. 27, 43, an interesting con-
firmation of the statement (xiii. 19-22) of the degree to
which the Philistines had deprived the people of arms
leaving to the king himself nothing but his fa-
thful spear, and to his son, no sword, no shield,
and nothing but a stone-bow and a staff (A. V. " ro-
let ").
The Arowos, Choixim (חֵיקִים), were carried
in a quiver, Theli (תְּלָי, Gen. xxvii. 3, only), or
Ashpah (אֲשַׁפָׁה, Ps. xxii. 6, xxvi. 2, cxxv. 4).
From an allusion in Job vi. 4, they would seem to have been sometimes poisoned; and the "sharp
arrows of the mighty with coals of juniper," in Ps.
exx. 4, may point to a practice of using arrows
with some burning material attached to them.
4. The Sling, Kela (קֶלֶת), is first mentioned
in Judg. xx. 16, where we hear of the 300 Benja-
mites who with their left hand could "sling stones
at a hairbreadth, and not miss.” The simple
weapon with which David killed the giant Philis-
tine was the natural attendant of a shepherd, whose
duty it was to keep at a distance and drive off any-
thing attempting to molest his flocks. The sling
would be familiar to all shepherds and keepers of
sheep, and therefore the bold metaphor of Abigail
has a natural propriety in the mouth of the wife of
a man whose possessions in flocks were so great as
those of Nabal — "as for the souls of thine ene-
mies, them shall God sling out, as out of the
middle of a sling" (1 Sam. xxv. 29).
 Later in the monarchy slingers formed part of
the regular army (2 K. iii. 25), though it would be
seen that the slings there mentioned must have
been more ponderous than in earlier times, and
that those which could break down the fortifications
of so strong a place as Kir-hareseth must have
been more like the engines which king Uzziah con-
trolled to "shoot great stones" (2 Chr. xxvi. 15).
In verse 14 of the same chapter we find an allusion
(concealed in the A. V. by two interposed words)
to stones specially adapted for slings — "Uzziah
prepared throughout all the host shields and spears
... bows and sling-stones."
II. Passing from weapons to Armor — from of-
fensive to defensive arms — we find several refer-
ces to what was apparently armor for the body.
1. The Shigron (שִׁרִּון; or in its con-
tracted form שָּׁרְן, and once רִן; according to the
LXX. φίνον, Vulg. lorica, — a Breastplate.
This occurs in the description of the arms of Go-
lith — הָעְרָבֶת לָא, a "coat of mail," literally a "breastplate of scales" (1 Sam. xvii. 5),
and further (21), where shirgon alone is rendered
"coat of mail." It may be noticed in passing that
this passage contains the most complete inventory
of the furniture of a warrior to be found in the
whole of the sacred history. Golitha was a Philis-
tine, and the minuteness of the description of his
equipment may be due either to the fact that the
Philistines were usually better armed than the He-
brews, or to the impression produced by the con-
trast on this particular occasion between this fully
armed champion and the wretchedly appointed
soldiers of the Israelite host, tripped as they had
seem very shortly before, both of arms and of the
means of supplying them, so completely that no
smith could be found in the country, nor any
weapons seen among the people, and that even the
ordinary implements of husbandry had to be re-
minded and sharpened at the forge of the con-
querrors (1 Sam. xiii. 19-22). Shigron also occurs
in 1 K. xxvii. 34, and 2 Chr. xviii. 33). The last
cited passage is very obscure; the A. V. follows the
Syria translation, but the real meaning is prob-
ably "between the joints and the breastplate.
Ewald reads "between the loins and the chest;"
LXX. and Vulgate, "between the loins and the
breastbone." It is further found in 2 Chr. xxvi.
14, and Neh. iv. 16 ("habergeons"), also in Job
xxvi. 26 and Is. Ex. 17. This word has furnished
one of the names of Mount Hermon (see Deut. iii.
9; Stanley, p. 403), a parallel to which is found in
the name Ḡāṣāq given to Mount Sipylus in Lydia
It is possible that in Deut. iv. 43, Slon (סִּלֹן)
is a corruption of shigron (or shirgon, cf. Jer. ii. 3).
2. Another piece of defensive armor was the
Tacharva (תַּחַרְוָה), which is mentioned but twice,
namely, in reference to the Meil or gown of the
priest, which is said to have had a hole in the
middle for the head, with a hem or binding round
the hole as it were the "mouth" of an habergeon"
(שִׁרְהֹן), to prevent the stuff from tearing (Ex
xxxvii. 32). The English "habergeon," was the diminutive of the "hauberck," and was a quilted
shirt or doublet put on over the head.
3. The Helmet is but seldom mentioned. The
word for it is Coba (כּבָּה, or twice כּבָּרָה), from
a root signifying to be high and round. Reference
is made to it in 1 Sam. xvii. 5; 2 Chr. xxvi. 14;
Ex. xxvii. 10.
Assyrian Helmet.

4. Greaves, or defenses for the feet (not "legs"
as in the A. V.) — גֵּפָּה, Mitzvah, made of
brass,ından — are named in 1 Sam. xvii. 6,
only.
Of the defensive arms borne by the warrior the
notices are hardly less scanty than those just exa-
named.
5. Two kinds of Shield are distinguishable.
a. The Tsinnah (תִּשְׁנָה; from a root חָשַׁב, to
protect). This was the large shield, encompassing
(Ps. v. 12) and forming a protection for the whole
person. When not in actual conflict, the tsinnah
was carried before the warrior (1 Sam. xvii. 7, 41).
The definite article in the former passage ("the"
shield, not "a shield") as in the A. V.) denotes the
importance of the weapon. The word is used with
romach (1 Chr. xii. 8, 24; 2 Chr. xi. 12, &c.) and
chenith (1 Chr. xii. 34) as a formula for weapons
generally.
b. Of smaller dimensions was the *magen* (םָגֶּן) from קֹּדֶם, to cover), a buckler or target, probably for use in hand to hand fight. The difference in size between this and the *tsimod* is evident from 1 K. x. 16; 17; 2 Chr. ix. 15, 16, where a much larger quantity of gold is named as being used for the latter than for the former. The portability of the *magen* may be inferred from the notice in 2 Chr. xiv. 9, 10; and perhaps also from 2 Sam. i. 21. The word is a favorite one with the poets of Assyrian Shields. Egyptian Shield.

the Bible (see Job xv. 20; Ps. iii. 3, xviii. 2, &c.). Like *tsimod*, it occurs in the formalistic expressions for weapons of war, but usually coupled with light weapons—the bow (2 Chr. xiv. 8, xvii. 17), darts, מַגְּנֵי (2 Chr. xxiii. 5).

6. What kind of arm was the *Skelet* (שֵּלְקֶת) it is impossible to determine. By some translators it is rendered a "quiver," by some a "weapon," generally, by others a "shield." Whether either or none of these are correct, it is clear that the word had a very individual sense at the time. It denoted certain special weapons taken by David from Hadadezer king of Zobah (2 Sam. viii. 7; 1 Chr. xviii. 7), and dedicated in the temple, where they did service on the memorable occasion of David's proclamation (2 K. xi. 10; 2 Chr. xxi. 9), and where their remembrance long lingered (Sam. iv. 4). From the fact that these arms were of gold it would seem that they cannot have been for offense.

In the two other passages of its occurrence (Jer. li. 11; Ez. xxvii. 11) the word has the force of a foreign arm.

ARMY. 1. JEWISH ARMY. — The military organization of the Jews commenced with their departure from the land of Egypt, and was adapted to the nature of the expedition on which they then entered. Every man above 20 years of age was a soldier (Num. i. 3); each tribe formed a regiment, with its own banner and its own leader (Num. ii. 2, x. 14); their positions in the camp or on the march were accurately fixed (Num. ii.); the whole army started and stopped at a given signal (Num. x. 5, 6); thus they came up out of Egypt ready for the fight (Ex. xiii. 18). That the Israelites preserved the same exact order throughout their march, may be inferred from Balaam's language (Num. xxiv. 6). On the approach of an enemy, a conscription was made from the general body under the direction of a muster-master (originally named מָגָן, Deut. xx. 3, "officer;" afterwards מָגָן, 2 K. xvi. 19, "scribe of the host," both terms occurring, however, together in 2 Chr. xxvi. 11, the meaning of each being primarily a writer or scribe), by whom also the officers were appointed (Deut. xx. 9). From the number so selected, some might be excused serving on certain specified grounds (Deut. xx. 5–8; 1 Marc. iii. 56). The army was then divided into thousands and hundreds under their respective captains (Num. i. 10; Num. xxxi. 14), and still further into families (Num. ii. 34; 2 Chr. xxv. 5, xxvi. 12) — the family being regarded as the unit in the Jewish polity. From the time the Israelites entered the land of Canaan until the establishment of the kingdom, little progress was made in military affairs. Their wars resembled *bardi* or *fangai*, and the tactics turned upon strategem rather than upon the discipline and disposition of the forces. Skillfully availing themselves of the opportunities which the country offered, they gained the victory sometimes by an ambush (Josh. viii. 4); sometimes by surprising the enemy (Josh. 3, 9, xi. 7; Judg. xvii. 21); and sometimes by a judicious attack at the time of forcing a river (Judg. iii. 29, iv. 7, vii. 24, xil. 5). No general muster was made at this period; but the combatants were summoned on the spur of the moment either by trumpet-call (Judg. iii. 27), by messengers (Judg. vi. 35), by some significant token (1 Sam. xi. 7), or, as in later times, by the erection of a standard (תַּנַךְ, Is. xviii. 3; Jer. iv. 21, li. 27), or a beacon-fire on an eminence (Jer. vi. 1).

With the kings arose the custom of maintaining a body-guard, which formed the nucleus of a standing army. Thus Saul had a band of 3000 select warriors (1 Sam. xii. 2, 52, xxiv. 2), and David, before his accession to the throne, 600 (1 Sam. xv. 13, xx. 13). This band he retained after he became king, and added the *Shechitites* and *Peleites* (2 Sam. xv. 18, xx. 7), together with another class, whose name *Shaldashim* (עְלָדָשִׁים, ταπαρασκάν, I. X.) has been variously interpreted to mean (1) a corps of veteran guards — Roman *tribii* (Winer, s. v., Königsm); (2) chariot-warriors, as being three in each chariot (Gesen. Thes. p. 1429); (3) officers of the guard, thirty in number (Ewald, Gesch. ii. 601). The fact that the Egyptian war-chariot, with which the Jews were first acquainted, contained but two warriors, forms an objection to the second of these opinions (Wilkinson, Ann. Egypt. i. 335), and the frequent use of the term in the singular number (2 K. vii. 2, ix. 25, x. 25) to the third. Whatever be the meaning of the name, it is evident that it indicated officers of high rank, the chief of whom (זַעַרְשָׁג, מְלֹאֵץ, "lord," 2 K. vii. 2, or בְּבָאֵל בָּשַׁלָדָשׁ בְּבָאֵל, "chief of the captains," 1 Chr. xiii. 18) was immediately about the king's person, as adjutant or secretary-at-war. David further organized a national militia, divided into twelve regiments, each of which was called out for one month in the year under their respective officers (1 Chr. xxvii. 1); at the head of the army when in active service be appointed a commander-in-chief (מטְשָׁל מְלֹאֵץ, "captain of the host," 1 Sam. xiv. 50).

Hitherto the army had consisted entirely of infantry (תַּנַךְ, 1 Sam. iv. 10, xv. 4), the use of horses having been restrained by divine command
The Jews had, however, experimented the great advantage to be obtained by chariots, both in their encounters with the Canaanites (Josh. xvi. 16; Judg. i. 19), and at a later period with the Syrians (2 Sam. viii. 4, x. 18). The interior of Palestine was indeed generally unsuited to the use of chariots. The Canaanites had employed them only in the plains and valleys, such as Jezreel (Josh. xvii. 16), the plain of Philistia (Judg. i. 19), and the upper valley of the Jordan (Josh. xi. 9; Judg. iv. 5). But the border, both on the side of Egypt and Syria, was admirably fitted by a standing body of horsemen, and that as the foreign relations of the kingdoms extended, much importance was attached to them. David had reserved a hundred chariots from the spoil of the Syrians (2 Sam. viii. 4). These probably served as the foundation of the force which Solomon afterwards enlarged through his alliance with Egypt (1 K. x. 28, 29), and applied to the protection of his border, stations or barracks being erected for them in different localities (1 K. iv. 19). The force amounted to 1400 chariots, 4000 horses, at the rate (in round numbers) of three horses for each chariot, the third being kept as a reserve, and 12,000 horsemen (1 K. x. 26; 2 Chr. i. 14). At this period the organization of the army was complete; and we have, in 1 K. ix. 22, apparently a list of the various gradations of rank in the service, as follows: —

1. "men of war" = privates; 2. זִכְרָיָיָה וְשַׁךְ הָיָהוּ, "servants," the lowest rank of officers = lieutenants; (3) זִכְרָיָיָה וְשַׁךְ הָיָהוּ, "princes" = captains; (4) זִכְרָיָיָה וְשַׁךְ הָיָהוּ, "captains," already noticed, perhaps = staff-officers; (5) זִכְרָיָיָה וְשַׁךְ הָיָהוּ, "rulers of his chariots and his horsemen" = overdy officers.

It does not appear that the system established by David was maintained by the kings of Judah; but in Israel the proximity of the hostile kingdom of Syria necessitated the maintenance of a standing army. The militia was occasionally called out in time of peace, as by Asa (2 Chr. xiv. 8), by Jehoshaphat (2 Chr. xviii. 14), by Amaziah (2 Chr. xxv. 5), and lastly by Uzziah (2 Chr. xxvi. 11); but these notices prove that such exceptions were the exceptional. On the other hand the incidental notices of the body-guard lead to the conclusion that it was regularly kept up (1 K. xiv. 28; 2 K. x. 4, 11). Occasional reference is made to war-chariots (2 K. viii. 21), and it would appear that this branch of the service was maintained, until the wars with the Syrians weakened the resources of the kingdom (2 K. xiii. 7). It was restored by Jotham (Is. ii. 7), but in Hezekiah's reign no force of the kind could be maintained, and the Jews were obliged to seek the aid of Egypt for horses and chariots (2 K. xvii. 23, 24). This was an evident breach of the injunction in Deut. xviii. 16, and met with strong reprobation on the part of the prophet Isaiah (xxxvi. 1).

With regard to the arrangement and maneuvering of the army in the field, we know but little. A division into three bodies is frequently mentioned (Judg. vii. 16, ix. 43; 1 Sam. xi. 11; 2 Sam. viii. 2). Such a division served various purposes. As a general principle, by which, according to Herodotus (viii. 24), the Macedonians, German, and Gallic troops (Ant. xvi. 8, § 2) the discipline and arrangement of the army was gradually assimilated to that of the Romans, and the
titles of the officers borrowed from it (Joseph. B. ii. 29, § 7).}

II. Roman Army. — The Roman army was divided into legions, the number of which varied considerably, each under the command of a centurion (xalpypas, "chief captain"). Acts xxii. 31, who commanded by turns. The legion was subdivided into ten cohorts (aivtp*a, "bands". Acts x. 1), the cohort into three maniples, and the maniple into two centuries, containing originally 100 men, as the name implies, but subsequently from 50 to 100 men, according to the strength of the legion. There were thus 60 centuries in a legion, each under the command of a centurion (aivtpaq). Acts x. 22; (paras-tapuros, Matt. viii. 5, xxvii. 54). In addition to the legionary cohorts, independent cohorts of volunteers served under the Roman standards; and Biscoe (History of Acts, p. 229) supposes that all the Roman forces stationed in Judea were of this class. Josephus speaks of five cohorts as stationed at Cesarea at the time of Herod Agrippa’s death (Ant. xix. 9, § 2), and frequently mentions that the 1st, 2nd, and 5th cohorts of Cesarea and Sebaste served in the ranks (Ant. xx. 8, § 7). One of these cohorts was named the Italian (Acts x. 1), not as being a portion of the Italian legion (for this was not embodied until Nero’s reign), but as consisting of volunteers from Italy (— Cohors militaria voluntaria, quae est in Syria.” Gruter, Biscoe, i. 434). This cohort probably acted as the body-guard of the procurator. The cohort named “Augustas” (aivtq*a xirwpaB pos, Acts xxvi. 33) may have consisted of the volunteers from Sebaste (B. J. ii. 12, § 5; Biscoe, p. 225). Winer, however, thinks that it was a cohors Augusta, similar to the legio Augusta (Rieder, s. v. Römer). The head-quarters of the Roman forces in Judea were at Cesarea. A single cohort was probably stationed at Jerusalem as the ordinary guard. At the time of the great feasts, however, and on other public occasions, a larger force was sent up, for the sake of preserving order (B. J. ii. 12, § 1, 15, § 3). Insurgent disturbances arose in reference to the images and other emblems carried by the Roman troops among their military ensigns, which the Jews regarded as idolatrous; deference was paid to their prejudices by a removal of the objects from Jerusalem (Ant. xviii. 3, § 1, 5, § 3). The ordinary guard consisted of four soldiers (aerponyov, “quartemion”), of which there were four, corresponding to the four watches of the night, who relieved each other every three hours (Acts xii. 4; cf. John xix. 28; Polyb. vi. 33, § 7). When in charge of a prisoner, two watched on the door of the cell, while the other two were inside (Acts xii. 6). The officer mentioned in Acts xxviii. 16 (aerponyovdpywpas, “captain of the guard”) was perhaps the praefectus portariorum, or commander of the Praetorian troops, to whose care prisoners from the provinces were usually consigned (Thm. P. x. 65). The aerponyov (hommei, Volk. “spearman,” A. V.), noticed in Acts xxii. 23, appears to have been light-armed, irregular troops. The origin of the name is, however, quite uncertain (Alford, Comm. in l. c.).

ARNA (Armun), one of the forerunners of Ezra (2 Esdr. i. 2), occupying the place of Zerahiah or Zattan in his genealogy.

ARKAN (אֶרְכָּן; [after], Orop; [comp.] Karam, joining the Wady Mophb, or two or three miles east from Ar’Avin. 

ARON (אָרֹן; derivate, according to Ges., Thes. p. 153, from roots signifying “swift” or “noisy,” either stating the character of the stream: “Aron: Armon.”). In the received Hebrew text the sons of Aron are mentioned in the genealogy of Zerahbaid (1 Chr. iii. 21). But according to the reading of the LXX., Vulgate, and Syrian versions, which the Hymbantig is adopt, Aron was the son of Sebspah. W. A. W.
tor (Seetzen). It then runs through the delta in a S. W. course, narrowing as it goes, and is 10 ft. deep where its waters meet those of the Dead Sea. (Lynch, Report, May 3, 1847, p. 20.)

According to the information given to Burckhardt, its principal source is near Katrumm, on the Haje route. Hence, under the name of Stell es-Saïd, it flows N. W. to its junction with the W. Lejâm, one hour E. of 'Arôtîr, and then, as W. Mojèb, more directly W. to the Dead Sea. The W. Mojèb receives on the north the streams of the V. Wade, and on the south those of W. Shek-kal and W. Saïd (S). At its junction with the Lejâm is a piece of pasture ground, in the midst of which stands a hill with ruins on it (Burck. p. 374). May not these ruins be the site of the mysterious "city that is in the midst of the river" (Josh. xiii. 9, 16; Deut. ii. 36), so often coupled with Aroer? From the above description of the ravine it is plain that the city cannot have been situated immediately below Aroer, as has been conjectured. G.

**AROD** (אָרֹד [descendent, First]; [ַ'אָרֹדֶל]; [Arodi; Arod; Arodi]; Arod) a son of Gad (Num. xxvi. 17), called Arodi (אָרוֹדֶל) in Gen. xlvi. 16. His family are called the ARODITES (Num. xxvi. 17).

**ARODITES, THE (אָרֶדֶתּ; אָרוֹדֶתּ) of Arodi (Var. -dîth; Aroldes). Descendants of Arod the son of Gad (Num. xxvi. 17). W. A. W.

**AR'ORER** (אָרוֹרֶר, occasionally אָרוֹרֶר), ruins, places of which the foundations are laid bare, Gesenius: a Аорор: Aoror; the name of several towns of Eastern and Western Palestine.

1. [In Josh. xii. 2, Rom. and Vat. M. 'AroÁn (in Jer. xviii. 19, Rom. 'Apôp.] A city "by the brink," or "on the bank of" (both the same expression — "on the lip" or "by the" the torrent Arnon, the southern point of the territory of Sihon king of the Amorites, and afterwards of the tribe of Reuben (Deut. iii. 36, iii. 12, iv. 48; Josh. xii. 2, xii. 9, 16; Judg. xi. 26; 2 K. x. 33; 1 Chr. v. 8), but later again in possession of Moab (Jer. xviii. 19). It is described in the Omastation (Arôr) as вaque hide in vertice montis, sup. by the Romans atop promotus Arunon," an account agreeing exactly with that of the only traveller of modern times who has noticed the site, namely, Burckhardt, who found ruins with the name 'Arôr on the old Roman road, upon the very edge of the precipitous north bank of the Wadi Mojèb. [ARON.] Like all the toponymy east of the Jordan, this site requires further examination. Aroer is often mentioned in connection with the city that is "in," or "in the midst of," "the river." The nature of the drift through which the Arnon flows is such that it is impossible there have been any names derived from it, e.g. Arôr; in the modern Arabic 'Arur (see Rob. ii. 124, note). Comp. Luz, Rimmon, Tappach, and other places deriving their names from trees.

2. From the omission of the name in the remarkable fragment, Num. xxvii. 24-30, where the principal places taken by the Amorites from Moab are named, Aroer would appear not to be one of the very oldest cities. Possibly it was built by the Amorites after town in such a position immediately near Aroer; but a suggestion has been made above [ARON], which on investigation of the spot may clear up this point.

2. In [Josh. xiii. 25, Rom. and Vat. M. 'Αροὖς:] Aroer "that is facing" (τὸς τῆς Ραββά) "Rabbah" (Rabbah of Ammon), a town "built" by and belonging to Gad (Num. xxxii. 34; Josh. xiii. 25; 2 Sam. xxxv. 9). This is probably the place mentioned in Judg. xi. 35, which was shown in Jerome's time (Onom. Aroerius) in monte, vigesimo ab Elia lique ad septentrionem." Ritter (Syria, p. 1130) suggests an identification with Agour, found by Burckhardt 2 hours S. W. of es-Solt. There is considerable difference however in the radical letters of the two words, the second Ain not being present.

3. Aroer, in Is. xvii. 2, if a place at all, must be still further north than either of the two already named, and dependent on Dananes. Gesenius, however, takes it to be Aroer of Gad, and the "for-saken" state of its cities to be the result of the deportation of Galilee and Gilead by Tidahth-Pileser (2 K. xv. 29). See Ges. Jesuit, p. 550.

4. A town in Judah, named only in 1 Sam. xxx. 23. Robinson (ib. 199) believes that he has identified its site in Winly 'Ar'arôh, on the road from Petra to Gaza, about 11 miles W. S. W. of Bir es-Seba, a position which agrees very fairly with the slight indications of the text. G.

**AR'OERITE** (אָרוֹרִי; 'Aroapr, Vat. Alex. -pês: Aroprès). Moab, the Aroerite was the father of two of David's chief captains (1 Chr. xi. 44).

**AR'OM** (אָרֹם [Alt. 'Arâm:] Asonus). The sons of Arom, to the number of 32, are enumerated in 1 Esdr. v. 16 among those who returned with Zorobabel. Unless it is a mistake for Ason, and represents Hashum in Ezr. ii. 19, it has no parallel in the lists of Ezra and Nehemiah. W. A. W.

**AR'PAD** (אָרֶפֶד; [support], a strong city). 'Arôphô: [Arôphô, Alex. Aerophet, etc.: Arphon], a city or district in Syria, apparently dependent on Dananes (Jer. xiii. 23). It is invariably named with Hamath (now Hamah, on the Orontes), but no trace of its existence has yet been discovered, nor has any mention of the place been found out of the Bible (2 K. xvii. 34, xix. 13; Is. x. 9, xxvi. 19, xxvii. 13). In the two last passages it is rendered in the A. V. Arphad. Arpad has been identified, but without any ground beyond the similarity in the names, with Arvad, the island on the coast of Phoenicia (Winer). G.

**AR'PHAD.** [ARPAD.]

**ARPHAXAD** (אָרֶפֶהָד; [Arôphah; Jos. Arôphâd; Arôphah; Arphaxad], the son of Shem and the ancestor of Eber (Gen. x. 22, 24, xi. 10), and said to be of the Chaldeans (Joseph. i. 6, 4). Bochart (Phylei, i. 4) supposed that the name was derived from their conquest, to guard the important boundary of the Ammon.

1 In this place the letters of the name are transposed, אָרֶפֶהָד.

2 The LXX. have καταλειμματος εις την ανων, apparently reading אָרֶפֶהָד for אָרֶפֶהָד; not do any of the ancient versions agree with the Hebrew text.
served in that of the province Arrapachitis ('Ar-arpāχiτης, Phil. vi. 1, § 2: 'Ar'pāχa) in northern Assyria (comp. Ewald, Gesch. des Volkes Isr., i. 378). Different interpretations of the name have been given; but that of Ewald (t. c.) appears to be the best, who supposes it to mean the arrows, held of the two arrows of the name, to bend, and Khali, Khud, Khud, pl. Khud, Chakh. Comp. Nebuchad., Gesch. Isr., p. 414, n. 1.

2. ARPHAXAD, a king "who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications" (Jud. i. 14). In a war with "Nabuchodonosor, king of Assyria," he was entirely defeated in "the great plain in the borders of Ramah" (? Rages, Rege, Tohit i. 14, Acv.), and afterwards taken prisoner and put to death (Jud. i. 13-15). From the passage in Judg. ii. 2, glossators etc. 'Enkar'ytai has been frequently identified with Deioces (Artius, Ces.), the founder of the Medes (Herod. i. 98); but as Deicles died peacefully (Herod. i. 102), it seems better to look for the original of Arphaxad in his son Pharaohs (Artius, Ces.), who greatly extended the Median empire, and at last fell in a battle with the Assyrians, 633 B.C. (Herod. i. 102, αὐτός τε διαφερέων τα κατακρατησάντοι τον το Αρμένιον). Nebuchad., Gesch. Isr., p. 32 endeavours to identify the name of Araphshad, Wadhalakan, the common title of the Median dynasty, and refers the events to a war in the twelfth year of Nebuchadnezzar, king of Babylon, B.C. 592 (ibid. pp. 212, 285). [Judith; Nebuchadnezzar.] B. F. W.

ARROWS. [Arms.]

ARSAVES VI, a king of Parthia, who assumed the royal title Araxes (Αράξης, Armen. Ashtip), probably containing the roots both of Arp and Sora) in addition to his proper name, Mithridates I. (Phraates, App. S. p. 67 from confusion with his successor) according to universal custom (Strob. xv. 1, 702), in honor of the founder of the Parthian monarchy (Justin xli. 5, § 5). He made great additions to the empire by successful wars; and when Demetrius Iscander entered his dominions to collect forces or otherwise strengthen his position against the usurper Tryphon, he despatched an officer against him who defeated the great army after a campaign of varied success (Justin. xxxvi. 1), and took the king prisoner, r. c. 138 (1 Macr. xiv. 1-3; Joseph. Ant. xiii. 5, § 11; Justin, xxxvi. 1, xxxviii. 9). Mithridates treated his prisoner with respect, and gave him his daughter in marriage (App. S. pp. 67, 68), but kept him in confinement till his own death, r. c. 130, (App. S. p. 68; Ibid. ap. Müller, Forsch. Hist. ii. 19.) B. F. W.

ARSAETH, a region beyond Euphrates, apparently of great extent (2 Esdr. xiii. 45, only). G.

* Volkmar (Handb. d. Einl. in die Apokr. ii. 193) supposes the word to represent הַשֵּׁם בַּנָּי "Land of Art" or "Arrat," in northern Armenia.

ARTAXERXES (Ἀρτάξερξης or Ἀρτάξης). Arachshata or Arachshatshana; 'Ar'pāχασάθα; [Vat. Arapaha, etc.; Ar-arpahres,] the name probably of two different kings of Persia mentioned in the Old Testament. The word, according to Herod. vi. 58, means αὐτός ἐπιτίθηται, the great warrior, and is compounded

 presumed in Ezr. iv. 7, as induced by "the adversaries of Judah and Benjamin" to obstruct the rebuilding of the temple, and appears identified with Smerdis, the Magian impostor, and pretended brother of Cambyses. For there is no doubt that the Ahaseurus of Ezr. iv. 6 is Cambyses, and that the Darius of iv. 24 is Par- Assur's Hystaspis, so that the intermediate king must be the Persian Smerdis who usurped the throne (i. v. 622, and reigned eight months (Herod. iii. 61, 67 ff.). We need not wonder at this variation in his name. Artaxerxes may have been adopted or conferred on him as a title, and we find the true Smerdis called Tanyoxares (the younger Oxares) by Xenophon (Cyerp. viii. 7) and Ctesias (Pers. Yr. 8-13), and Dorostratus by Justin (Hist. i. 9). Oxares appears to be the same name as Xerxes, of which Artaxerxes is a compound.

1. In 486, we have another Artaxerxes, who permits Nehemiah to spend twelve years at Jerusalem, in order to settle the affairs of the colony there, which had fallen into great confusion. We may safely identify him with Artaxerxes Ma- croeheir or Longannus, the son of Xerxes, who reigned c. 484-445. And we believe that this is the same king who had previously allowed Ezra to go to Jerusalem for a similar purpose (Ezr. vii. 1). There are indeed some who maintain that as Darius Hystaspis is the king in the sixth chapter of Ezra, the king mentioned next after him, at the beginning of the seventh, must be Xerxes, and thus they distinguish three Persian kings called Artax- erxes in the Old Testament, (1) Smerdis in Ezr. iv., (2) Xerxes in Ezr. vii., and (3) Artaxerxes Macro- eheir in Nehemiah. But it is almost demon- strable that Xerxes is the Ahasuerus of the book of Esther, and it is hard to suppose that in addition to his ordinary name he would have been called both Ahaseurus and Artaxerxes in the O. T. It seems, too, very probable that the policy of Neh. ii. was a continuation and renewal of that of Ezr. vii., and that the same king was the author of both. Now it is not possible for Xerxes to be the Artaxerxes of Nehemiah, as Josephus asserts (Ant. xxi. 5, § 6), for Xerxes reigned 21 years, whereas Nehemiah (viii. 6) speaks of the 32nd year of Artaxerxes. Nor is it necessary to believe that the Artaxerxes of Ezr. vi. is necessarily the immediate successor of the Daries of Ezr. vi. The book of Ezra is not a continuous history. It is evident from the first words of ch. viii. that there is a pause at the end of ch. vi. In- deed, as ch. vi. concludes in the 6th year of Darius, and ch. vii. begins with the 7th year of Artaxerxes, we cannot even believe the latter king to be Xerxes, without assuming an interval of 36 years (n. c. 515-479) between the chapters, and it is not more difficult to imagine one of 58, which will carry us to n. c. 657, the 7th year of Artaxerxes Macro- eheir. We conclude therefore that this is the king of Persia under whom both Ezra and Nehemiah carried on their work; that in n. c. 457 he sent Ezra to Jerusalem; that after 14 years it became evident that a civil as well as an ecclesiastical head was required for the new settlement, and therefore that in 444 he allowed Nehemiah to go up in the
after capacity. From the testimony of profane historians this king appears remarkable among Persian monarchs for wisdom and right feeling, and with this character his conduct to the Jews coincides (Diod. xii. 71).

It remains to say a word in refutation of the view that the Artaeææ of Nehemiah was Artaxerxes Memon, elder brother of Cyrus the Younger, who reigned B. C. 404–459. As Ezra and Nehemiah were contemporaries (Neh. viii. 9), this theory transfers the whole history contained in Ezra vii. 12, Xerxes, and Nehemiah to this date, and it is hard to believe that in this critical period of Jewish affairs there are no events recorded between the reigns of Darius Hystaspis (Ezr. vii.) and Artaxerxes Memon. Besides, Hysãrub, who was high-priest when Nehemiah reached Jerusalem (Neh. iii. 1), i.e. on this last assumption, B. C. 397, was grandson of Joshua (Neh. xii. 10), high-priest in the time of Zerubbabel, B. C. 530. We cannot think that the grandfather and grandson were separated by an interval of 139 years.

G. E. L. C.

ARTEMIS (Ἄρτεμις, i. e. Ἀρτεμιδώρος), a companion of St. Paul (Tit. iii. 12). According to tradition he was bishop of Lydia.

* Paul was about to send Artemas to Crete at the time of his writing to Titus in that island, and hence Artemus must have been then with the apostle at Nicopolis or on the way thither (Tit. iii. 12). The name, which signifies "gift of Artemis," was a common one among the Greeks. (See Pape's Griech. Eigenamen, p. 77.)

H.

* ARTEMIS (Ἄρτεμις, Acts xix. 24). [Di.-]

* ARTILLERY (no longer applied, as in the older English, to the smaller missive weapons) is the translation of ἁπάν in 1 Sam. xx. 40, i. e. his arms, namely, the bow and arrows with which Jonathan had been shooting, at the time of his memorable interview with David at the stone Ezel. The A. V. has "his instruments" in the margin, which is the rendering of the Bishop's Bible.

H.

ARUBOTH (Aruboth, מַעֲרָבָה: Araphá: Aruboth), the third of Solomon's commissariat districts (1 K. iv. 10). It included Sochoh, and was therefore probably a name for the rich corn-growing country of the Shefelâh. In any case, the significance of the word is entirely lost at present. Josephus omits all mention of it. G.

ARUMAH (מַעְרָם [height]: Ἁραμᾶς, Vat. [not Vat., but Comp. Am. Alex.] Ἀραμᾶ: in Ruman), a place apparently in the neighborhood of Shechem, at which Abimelech resided (Judg. iv. 41). It is conjectured that the word in verse 31, מַעְרָם, rendered "privily," and in the margin "at Tormah," should be read "at Arummah" by changing the מ to an נ, but for this there is no support beyond the apparent probability of the change. Arumah is possibly the same place as Ruma, under which name it is given by Eusebius and Jerome in the Onomasticon. According to them it was then called Arimathaea (see also ARIMA). But this is not consonant with its apparent position in the story.

* Ramner (Palæstina, p. 148, 4th Aufl.) thinks Arumah was probably El-Armah, of the ruins of which Van de Velde speaks (Mem. p. 288), a little S. W. of Nablus.

Bunsen (Biblischer on Judg. ix. 31) and Bertheau (Richter, p. 145) make Tormah, referred to above, a proper name = Arumah. Keil and Delitzch (on Judges, p. 268, English trans.) are undecided. But critics generally, as Gesenius, Dietrich, De Wette, Cassel, Furtel, retain the etymological sense, secretly (ἐκ κρύπτος, in Sept. Cod. Vat.); which is better, both as agreeing with the text, and on exegetical grounds. Zebul, who had command in the city, was friendly to Abimelech; but in order to advance the interest of the latter without betraying himself to the Shechemites, he must confide with him secretly; and for this purpose sent messengers to him (ix. 31) for concerting measures against Gaal, the common enemy. If the term suggests the idea of deceit as well as secrecy, it is none the less appropriate, since acting in this way Zebul was deceiving Gaal as well as intriguing with Abimelech. [TORMAH.]

H.

ARVAD (אֶרַוַד, from a root signifying "wandering," Ges. p. 1208), a place in Phoenicia, the men of which are named in close connection with those of Zidon as the navigators and defenders of the ship of Tyre in Ez. xxvii. 8, 11. In agreement with this is the mention of "the Aravdite" (הארדית) in Gen. x. 18, and 1 Chr. i. 16, as a son of Canaan, with Zidon, Hamath, and other northern localities. The LXX. have in each of the above passages Ἀράδιος, and in Josephus (Ant. i. 6, § 2) we find Ἀρανδιος ἠραδίου την πῆιαν τοὺς φοίησαι. There is thus no doubt that Arvad is the island of Ἅρβα (Δίω), which lies off Tortosa (Tartus), 2 or 3 miles from the Phoenician coast, (not at, but) some distance above, the mouth of the river Eleutherus, now the Nahr el-Kubîr (Maund. p. 403; Buregh. p. 164), and at the northern extremity of the great bay which stretches above Tripoli (Kiepert's Map, 1856). The island is high and rocky, but very small, hardly a mile in circumference (see Maund. p. 399; "800 yards in extreme length," Allen, ii. 178). According to Strabo (xvi. 2, § 14) Arvad was founded by fugitives from Sidon, and he testifies to its prosperity, its likeness to Tyre, and especially to the well known nautical skill of the inhabitants. (See the notices by Strabo, Pliny, and others in Gesenius, p. 1209, and Winer, Arvad.) Opposite Arvad, on the mainland, was the city Antaradas, by which name the Targum Jehoseph renders the name Arvad in Gen. x. 18. [ARADEN.]

A plan of the island will be found in Allen's De et ^, end of vol. ii.; also in the Admiralty Charts, p. 2030, *Island of Randa.* G.

* Dean Stanley has a brief notice of this island, "a spot rarely seen, but full of interest in connection both with Phoenicia and with the cedars of Lebanon," in his Notices of Some Localities, &c. p. 220 (1863): "Just where Lebanon, with its white line of snow, ends, and melts away in the north into a range of low green hills, Phoenicia and the last remains of Phænicia also end in the northwesternmost of the Phœnician cities, Arvad, Arvad, by the Greeks called Arwhus, and now Rond." Mr. Thomson, author of The Land and the Book, had already visited and described this place in 1845 (see

a These nautical propensities remain in full force (See Allen's Dead Sea, ii. 183.)
ARVADITE

Bibl. Sacra, v. 251 ff). "On the very margin of the sea there are the remains of double Phoenician walls of huge beveled stones, which remind one of the outer foundations of Baalbek. In one part the wall is still 30 or 40 feet high, and was originally 15 or 20 feet thick. It must have been a stronger place than Tyre, for its distance from the shore and depth of channel rendered it impossible for even an Alexander to destroy its insular character. The harbor was on the northeast side, formed by carrying out into the sea two walls of great stones, to move any one of which would puzzle our best modern engineers." Tyre drew important supplies of military and naval stores from this little island. "The habitants of Arvad were the mariners: the men of Arvad with thine army were upon thy walls round about." (Ez. xxxvii. 8, 11). Many Greek inscriptions are found "graven on columns of hard black basalt." Mr. Thomson copied some of them, which are inserted in the Bibl. Sacra as above. II.

ARVADITE, THE (":170:5: 'Aparazos: Aradus). One of the families of Canaan (Gen. x. 13; 1 Chr. i. 16). [ARVAD.] Probably the habitants of the little island Aradas, or Izal, opposite Antaradis on the N. coast of Phenicia.

W. A. W.

ARZA (SNAS [earth]; 'Azai; Alex. Area; [Comp. 'Azarai; Arv].) Prefect of the palace at Tirzah to Elah king of Israel, who was assassinated at a banquet in his house by Zimri (1 K. xvi. 9). In the Targum of Jonathan the word is taken as the name of an idol, and in the Arabe version in the London Polyglot the last clause is rendered "which belongs to the idol Beth-Area."

W. A. W.

ASA (SNAS, caring, physician: 'Arad; Jos. 'Aravos; Arv.) 1. Son of Abijah, and third king of Judah, was conspicuous for his earnestness in supporting the worship of God and putting out idolatry, with its attendant immoralities; and for the vigor and wisdom with which he provided for the prosperity of his kingdom. In his zeal against heathenism he did not spare his grandmother, Maachah, who occupied the special dignity of "King's Mother," to which great importance was attached in the Jewish court, as afterwards in Persia, and to which parallels have been found in modern Eastern countries, in the position of the Sultana Valide in Turkey (see 1 K. ii. 19; 2 K. xxiv. 12; Jer. xxix. 2; also Calmet, Fragr. xvi.; and Bruce's Tracts, vol. ii. p. 337; and iv. 244). She had set up some impure worship in a grove (the word translated 'ud, 1 K. xv. 13, is in Hebrew horror, while in the Vulgate we read, ne cast (Melch) princiiss in seors Priego); but Asa burnt the symbol of her religion, and threw its ashes into the brook Kidron, as Moses had done to the golden calf (Ex. xxxiii. 20), and then deplored Maachah from her dignity. He also placed in the temple certain gifts which his father had dedicated, probably in the earlier and better period of his reign (1 K. v.), and which the heathen priests must have used for their own worship, and renewed the great altar which they apparently had desecrated (2 Chr. xv. 8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to 2 Chr. xiv. 8, to 300,000 men, but the uncertainty attaching to the numbers in our present text of Chronicles has been pointed out by Kennicott [Abiah], and by Davidson (Introduction to the O. T., p. 688), who considers that the copyists were led into error by the different modes of marking them, and by confounding the different letters which denoted them, fearing as they did a great influence to enter here. Then Asa's reign marks the return of Judah to a consciousness of the high destiny to which God had called her, and to the belief that the Divine Power was truly at work within her. The good effects of this were visible in the enthusiastic resistance offered by the people to Zerah, an invader, who is called a Cushite or Ethiopian, and whom several authors, as Ewald (Gesch. des V. V., iii. 470), identify with Osorkon I., the second king of the 22d dynasty of Egypt, inheritor therefore of the quarrel of his father Shishak, to whom Asa had probably refused to pay tribute. [ZERAH.] At the head of an enormous host (a million of men, we read in 2 Chr. xiv. 9) he attacked Maresiah or Marissa in the S. W. of the country, near the later Eluthropolis (Robinson, B. R., ii. 67), a town afterwards taken by Judas Macabeus (1 Macc. vi. 65). He was defeated by the Carthaginians in their war against Herod (Joseph. Ant. xxv. 9, 3). There he was utterly defeated, and driven back with immense loss to Gerar. As Asa returned laden with spoil, he was commended and encouraged by a prophet, and on his arrival at Jerusalem convoked an assembly of his own people and of many who had come to him from Israel, and with solemn sacraies and ceremonies renewed the covenant by which the nation was dedicated to God. The forces which followed this victory was broken by the attempt of Basha of Israel to fortify Ramah as a kind of Decelia, "that he might not suffer any to go out or to come unto Asa king of Judah." To stop this he purchased the help of Benhadad I., king of Damascus, by a large payment of treasure left in the temple and palace from the Egyptian tribute in Rehobam's time, and thus he forced Basha to abandon his purpose, and destroyed the works which he had built at Ramah, using the materials to fortify two towns in Benjamin, Geba (the hill), and Mizpeh (the watch-tower), as checks to any future invasion. The wells which he sunk at Mizpeh were famous in Jeremiah's time (xli. 9). The means by which he obtained this success were censured by the prophet Hanani, who seems even to have excited some discontent in Jerusalem, in consequence of which he was imprisoned, and some other punishments inflicted (2 Chr. xvi. 7). The prophet threatened Asa with war, which appears to have been fulfilled by the continuance for some time of that with Basha, as we infer from an allusion, in 2 Chr. xvii. 2, to the cities of Ephraim which he took, and which can hardly refer to any events prior to the destruction of Ramah.

In his old age Asa suffered from the gout, and it is mentioned that "he sought not to the Lord but to the physicians." If any blame be intended, we must suppose that he acted in an arrogant and independent spirit, and without seeking God's blessing on their remedies. He died greatly loved and honored in the 41st year of his reign. These are difficulties connected with its chronology, arising perhaps from the reasons already mentioned as to the numbers in Chronicles. For instance, in 2 Chr. xvi. 1, we read that Basha fortified Ramah in the course of Asa's reign, but in the next verse it is said that Basha is said to have died in the 29th. If the former number be genuine, it is supposed by the
ASADIAS

note in the margin of the English Bible, by Clinton, and with some little hesitation by Ewald, that the chronicle is referring to the years not of Asa's reign, but of the separate kingdom of Judah, which would coincide with the 15th of Asa and the 15th of Baasha, and leave 11 years for the statement of 1 K. xvi. 16, and for the fulfillment of Haman's threat. According to Clinton (F. II. i. 421) the date of Asa's accession was n. c. 956. In his 15th year (n. c. 942) was the great festival after the defeat of Zerah. In n. c. 941 was the league with Benhadad, and in n. c. 916 Asa died. The statement in 2 Chr. xix. 19 must be explained by the 55th year of the kingdom of Judah, if we adopt that view of the date in xvi. 1. Clinton, with an inconsistency very unusual in him, does adopt it in the latter place, but imagines a fresh war with Ethiopia in n. c. 922 to account for the former.

G. E. L. C.

* In Matt. i. 7, 8, Lachm., Tisch. (8th ed.), and Tregelles read 'Aσαφ for 'Ασαφ.

2. ('Ασαφ; Alex. [Comp. Adv.] 'Ασαφ.) Ancestor of Berechiah, a Levite who resided in one of the villages of the Netophathites after the return from Babylon (1 Chr. ix. 16).

A. W. W.

ASADIAS (Ἀσάδιας; Alex. Σαδιας; Se- doua). Son of Chelias, or Hilkiun, and one of the ancestors of Baruch (2 Chr. i. 1). The name is probably the same as that elsewhere represented by Ἰςαμαθ (1 Chr. iii. 39). A. W. W.

AS'AL (Ἀσάλ; Vulg. omits), of the tribe of Naphtali, and forerunner of Tobit (Tob. i. 1).

[Hierkle?]

AS'ANIE (Ἀσανίης, made by God: 'Ασανιά: 'Ασανιελ). 1. Nephew of David, being the youngest son of his sister Zeruiah. He was celebrated for his swiftness of foot, a gift much valued in ancient times, as we see by the instances of Achilles, Antilochus (Hom. Il. xii. 570), Papirus Cursor (Liv. iv. 16), and others. When fighting under the command of his brother Joab against Ishbosheth's array at Gibeon, he pursued Abner, who, after vainly warning him to desist, was obliged to kill him in self-defense, though with great reluctance, probably on account of his extreme youth (2 Sam. ii. 18 ff. [Lii. 27, 30, xxiiii. 24: 1 Chr. xii. 26, xxvii. 7]). [A. N. E. L. C.]

2. ('Ασανια; Alex. Ιεανια; [Vat. Ιανια; Ιανελ].) One of the Levites in the reign of Jehoshaphat, who went throughout the cities of Judah to instruct the people in the knowledge of the Law, at the time of the revival of the true worship (2 Chr. xvii. 8).

3. ['Ασανια: 'Ασανιελ]. A Levite in the reign of Hezekiah, who had charge of the titles and dedicated things in the Temple under Cononiah and Shimeai (2 Chr. xxxii. 13).

W. A. W.

ASA'HI'H, or ASA'I'H (أشوح [whom Jehovah made]: 'Ασαίας; [Alex. 2 K. xiiii. 14, Ασα'ει: Ασαια], a servant of king Josiah, sent by him, together with others, to seek information of Jehovah respecting the book of the law which Hilkiah found in the temple (2 K. xiiii. 12, 14; also called Asahiah, 2 Chr. xxiv. 20). W. B. W.

ASA'AI'H [3 syl.] (אשיה) [Jehovah made]. 'Ασαίας; [Vat. Ασαία: Αθαίας; Ασαίο]. 1. A prince of one of the families of the Simeonites in the reign of Hezekiah, who drove out the Hamite shepherds from Gedor (1 Chr. iv. 30).

2. ('Ασαίας; [Vat. Ασαία].) Alex. [Comp.] 'Ασαία in 1 Chr. vii. 1. 'Ασαία [Vat. Ασαία; Ασαία]; Alex. [Adv.] 'Ασαία in 1 Chr. v. xx. A Levite in the reign of David, chief of the family of Merari (1 Chr. vi. 30). With 129 of his brethren he took part in the solemn service of bringing the ark from the house of Obed-edom to the city of David (1 Chr. xvi. 6, 11).

3. ('Ασαίας: Alex. Ασαία). The firstborn of "the Shilohite," according to 1 Chr. ix. 5, who with his family dwelt in Jerusalem after the return from Babylon. In Neh. xii. 5 he is called ΑΣΑΙΑΗ, and his descent is traced from Shem, which is explained by the Targum of R. Joseph on 1 Chr. as a patronymic from Shelah the son of Judah, by others as "the native or inhabitant of Shiloh."

4. (ντ.] [Vat. Ασαία].) 2 Chr. xxiv. 20

[AΣAIH] W. A. W.

ASA'ANA (Ἀσαώνα; [Aθαία: Αθαώνα: Ασα'ανι: Ασαντ]. name of a man (1 Esdr. i. 31). [A. N. A.]

A'SAPH (を作 [collectors]: 'Ασαφ: Ασαφ). 1. A Levite, son of Berechiah, one of the leaders of David's choir (1 Chr. vi. 39). Psalms i. and lxxii. to lxxxiii. are attributed to him, but probably all these, except i., lxxiii., and lxxxvi., are of later origin (Vailinger, Vers. von Psalmen); and he was in aftertimes celebrated as a seer (שאף) as well as a musical composer, and was put on a par with David (2 Chr. xxi. 20; Neh. xii. 40). The office appears to have remained hereditary in his family, unless he was the founder of a school of poets and musical composers, who were called after him "the sons of Asaph" (comp. the Homeric) (1 Chr. xxv. 1: 2 Chr. xxv. 14; Ezr. ii. 41).

2. (Ασαφ) [Vat. Ασαφ] in 2 K. [Vat. Ασαφ] in Is.: Alex. [Comp.] 'Ασαφ in 2 K. xviii. 57.) The father or ancestor of Joash, who was recorder or chronicler to the kingdom of Judah in the reign of Hezekiah (2 K. xviii. 18, 37; Is. xxxvi. 3, 22). It is not improbable that this Asaph is the same as the preceding, and that Joash was one of his numerous descendants known as the Baca-Asaph.

3. (Ασαφ.) The keeper of the royal forest or "paradise" of Araxeses (Neh. ii. 8). His name was so frequently indicated that he was a Jew, who, like Nehemiah, was at high office at the court of Persia.

4. (Ασαφ [Vat. Ασαβ] in Neh.) Ancestor of Mattaniah, the conductor of the temple-choir after the return from Babylon (1 Chr. ix. 15; Neh. xii. 17). Most probably the same as ΑΣΑΓΙ and ΑΣΑΓΙ.

A. W. W.

M. W.

ASARAEL. [ΑΣΑΡΑΕΛ.]

ASAREEL (אסריאל [whom God bound) Asaph who wrote may have been a descendant of the founder of the family, which, as Ezr. ii. 41 shows, existed through many generations.

H.
ASARELH

**ASARELH** [Sem.: 'Eserah; [Vat. Ieserah;] Axex. Eserah; [Comp. 'Aserah;] Jerezah]. A son of Jehudel, whose name is abruptly introduced into the genealogies of Judah (1 Chr. iv. 16). W. A. W.

**ASARELH** (אָסָרֶל, אֶשָּרֶל). Ephraim was said to have received the names near Mount Asarhel, designated in the Hebrew word asaret; the I.XX. and the Vulg. understand some species of pine-tree; and this rendering is supported by many learned commentators, amongst whom who is named Munster, Calvin, and Bodart: and some of the Jewish rabbis, according to Celsius (Hierob. i. 101), believe that the oren is identical with the Arabic sarabba, a kind of pine, and assert that the oren is often coupled with the asrez and berzech; as though all the three trees belonged to the same nature. Another understands the oren by orenus. Rosenmüller thinks that the stone-pine (Pinus pinea, Linn.) is the tree denoted. Celsius is inclined to think that the oren is identical with a tree of Arabie Petraea, of which Abul Fadil makes mention, called ares. Of the same opinion are Michaelis (Supp. al Lex. Heb. 129), Dr. Royle (Cyc. Bib. Lit. art. Oren), and Dr. Lee (Lex. Heb. s. v.). This tree is described as growing chiefly in valleys and low districts; it is a thorny tree, bearing grape-like clusters of berries, which are noxious and bitter when green, but become rather sweet when they ripen, and turn black. Celsius (Thes. s. v.) is in favor of some species of pine being the tree intended.

Nothing is known of the tree of which Abul Fadil speaks. Sprangel (Hist. Rei Hort. 1. 14) thinks the ares is the cypress-tree (Cupressus spinae, Linn.). Dr. Royle says the tree appears to agree in some respects with Solebrena parisiensis. Other attempts at identification have been made by Faber in his posthumous MS. notes on Biblical Botany, and Link (schröder's Botan. Journal, iv. 152), but they are mere conjectures. The A. V. adopted the translation of ashe in all probability from the similarity of the Hebrew asereth with the Latin oren; and Dr. Royle states that the Orenus europaeus is found in Syria, but thinks it is not a true native.

Until future investigation acquaints us with the nature of the tree denoted by the oren of Abul Fadil, it will be far better to adopt the interpretation of the LXX., and understand some kind of pine to be the oren of Scripture. Pinae holopini or P. aristata may be intended. Celsius (Hierob. i. 153) objects to any pine representing the oren, because he says pines are difficult to transplant, and therefore that the pine would all suit the words of the prophet, "he plucked an oren." This, however, is not a valid objection: the burch, for instance, is readily transplanted, and grows with great rapidity, but it is not a native of Syria. The Hebrew oren is probably derived from the Arabic verb oren, "to be agile," "to be slender," or "graceful."

W. H.

Dr. Hooker says he never heard of P. sylvestris in Syria, and thinks P. holopini is meant.

b 17N and 22N, cedars and cypress.

c Reading 17N instead of 17N, "quid 17N non unus minusculo, in multis eolcis Eolol editibus scribatur, quod re Saur simulminum est." (Hierob. i. 151.)

**ASH**

**ASH** (אָשׁ [יָשָׁה]: oren; πιῦν: pinus) occurs only in Is. xlv. 14, as one of the trees out of the wood of which idols were carved: "He heweth him down cedars, and taketh the eypress and the oak, which he strengtheneth for himself among the trees of the forest: he planteth an oren, and the rain doth nourish it." It is impossible to determine what is the tree denoted by the Hebrew word oren; the I.XX. and the Vulg. understand some species of pine-tree, and this rendering is supported by many learned commentators, amongst whom who is named Munster, Calvin, and Bodart; and some of the Jewish rabbis, according to Celsius (Hierob. i. 101), believe that the oren is identical with the Arabic sarabba, a kind of pine, and assert that the oren is often coupled with the asrez and berzech; as though all the three trees belonged to the same nature. Another understands the oren by orenus. Rosenmüller thinks that the stone-pine (Pinus pinea, Linn.) is the tree denoted. Celsius is inclined to think that the oren is identical with a tree of Arabie Petraea, of which Abul Fadil makes mention, called ares. Of the same opinion are Michaelis (Supp. al Lex. Heb. 129), Dr. Royle (Cyc. Bib. Lit. art. Oren), and Dr. Lee (Lex. Heb. s. v.). This tree is described as growing chiefly in valleys and low districts; it is a thorny tree, bearing grape-like clusters of berries, which are noxious and bitter when green, but become rather sweet when they ripen, and turn black. Celsius (Thes. s. v.) is in favor of some species of pine being the tree intended.

Nothing is known of the tree of which Abul Fadil speaks. Sprangel (Hist. Rei Hort. 1. 14) thinks the ares is the cypress-tree (Cupressus spinae, Linn.). Dr. Royle says the tree appears to agree in some respects with Solebrena parisiensis. Other attempts at identification have been made by Faber in his posthumous MS. notes on Biblical Botany, and Link (schröder's Botan. Journal, iv. 152), but they are mere conjectures. The A. V. adopted the translation of ashe in all probability from the similarity of the Hebrew asereth with the Latin oren; and Dr. Royle states that the Orenus europaeus is found in Syria, but thinks it is not a true native.

Until future investigation acquaints us with the nature of the tree denoted by the oren of Abul Fadil, it will be far better to adopt the interpretation of the LXX., and understand some kind of pine to be the oren of Scripture. Pinae holopini or P. aristata may be intended. Celsius (Hierob. i. 153) objects to any pine representing the oren, because he says pines are difficult to transplant, and therefore that the pine would all suit the words of the prophet, "he plucked an oren." This, however, is not a valid objection: the burch, for instance, is readily transplanted, and grows with great rapidity, but it is not a native of Syria. The Hebrew oren is probably derived from the Arabic verb oren, "to be agile," "to be slender," or "graceful."

W. H.
ASHAN

ASHAN (אִשָּׁן) [smoky]: ['Ashan], Ashdan; Ash'da; [Alex. Iephon, Acan. Assawa]: Ashon, a city in the low country of Judah named in Josh. xxv. 42 with Libnah and Elzur. In Josh. xix. 7, and 1 Chr. iv. 32, it is mentioned again as belonging to Simeon, but in company with Ain and Rimmon, which (see Josh. xv. 31) appear to have been much more to the south. In 1 Chr. vi. 59, it is given as a priests' city, occupying the same place as the somewhat similar word Ain (אֵין) does in the list of Josh. xxxi. 16.

In 1 Sam. xxx. 30, Chor-ashan is named with Horma and other cities of the South. [The compound name (אִשָּׁן) means (Ges.) smocking,因素, or (First) smelling因素.]

Eusebius and Jerome (Onom.; mention a village named Bethsan as 15 miles west of Jerusalem; but this, though agreeing sufficiently with the position of the place in Josh. xiv. 42, is not far enough south for the indications of the other passages; and indeed Euseb. and Jer. discriminate Bethsan from "Asan of the tribe of Simeon." It has not yet been identified, unless it be the same as Ain: in which case Robinson found it at Al Qwasser.

* The identification of Ain with Ghweer, Dr. Robinson recalls in his Res. ii. 204 (ed. 1858).

See ASIM. The Ashan of Simeon, situated on the northern limit of Palestine, may be a different one from the Ashan of Judah (Jos. xix. 7; 1 Chron. iv. 32). (Rammer, Palestine, p. 173). See CHOR-ASHAN.

ASHBE'A (אֵשֶׁב) [check, Ges.]: 'Essobi; [Comp. 'Ashbedi]: Incarnation. A proper name, but whether of a person or place is uncertain (1 Chr. iv. 21). Houbigant would understand it of the latter, and would render "the house of Ashbea" by Beth-ashbea. The whole clause is obscure. The Targum of R. Joseph (ed. Wilkins) paraphrases it, *'and the family of the house of manufacture of the fine linen for the garments of the kings and priests, which was handed down to the house of Ashba." W. A. W.

ASH'BEEL (אֵשֶׁבל): Ashbel, 'Ashbi'el: Ashbel, a son of Benjamin (Gen. xlv. 21; Num. xxvi. 38; 1 Chr. viii. 1). Respecting the sons of Benjamim, see BECHEER.

ASHBE'ELITES, THE (אֵשֶׁבלים): 'Ashbe'elites; [Vat. per.; Comp. 'Ashbi'elit]: Ashbei'elites. The descendants of Ashbel, the son of Benjamin (Num. xxvi. 38). W. A. W.

ASHCHENAZ (אֵשְׁכֶנָז): 'Ashkenaz, or Ashkenazim [Vat. A'sch]; Alex. äschunn, or Aṣ-

Ashdod.

ASHDOD (אֵשָׁד) [stronghold or castle]: 'Asdoros, LXX. [commonly] and N. T., one of the five confederate cities of the Philistines, situated about 30 miles from the southern frontier of Palestine, 3 from the Mediterranean Sea, and nearly midway between Gaza and Joppa. It stood on an elevation overlooking the plain, and the natural advantages of its position were improved by fortifications of great strength. For this reason it was probably selected as one of the seats of the national worship of Dagon (1 Sam. v. 5). It was assigned to the tribe of Judah (Josh. xvi. 47), but was never subdued by the Israelites: it appears on the contrary to have been the point for conducting offensive operations against them, so much so, that after Uzziah had succeeded in breaking down the wall of the town, he secured himself against future attacks by establishing forts on the adjacent hills (2 Chr. xxvi. 6): even down to Nehemiah's age it preserved its distinctiveness of race and language (Neh. xiii. 23). But its chief importance arose...
from its position on the high road from Palestine to Egypt, commanding the entrance to or from the latter country: it was on this account besieged by Jabin, the general of the Assyrian king, Sargon, about B.C. 736, apparently to frustrate the league formed between Troadish and Egypt (Is. xx. 1). Its importance as a stronghold is testified by the protracted siege which it afterwards sustained under Psammeticus, about B.C. 630 (Herod. ii. 157), the effects of which are incidentally referred to by Jer. (xxxv. 29). That it recovered from this blow appears from its being mentioned as an independent power in alliance with the Arabians and others against Jerusalem (Neh. iv. 7). It was destroyed during the wars of the Maccabees (1 Macc. v. 68, x. 94), and lay in ruins until the Roman conquest of Judea, when it was restored by Galbaeus, c. B.C. 55 (Joseph. Ant. xiv. 5, § 3; B. J. i. 7, § 7), and was one of the towns assigned to Sabone after Herod's death (Joseph. Ant. xiii. 8, § 1). The only notice of Azotus in the N.T. is in connection with Philip's return from Caesarea (Acts viii. 40). It is now an insignificant village, with no memorials of its ancient importance, but it is still called Ashdod.

W. L. B.

* Yet the present site is not wholly destitute of vestiges of its ancient fame. A few discoveries still reward the traveller's search. The high mound which probably formed the acropolis of the old city cannot be mistaken, covered with fragments of pottery, and with remains of columns or cisterns which excavations recently made (1852) have laid open. Here must have been the citadel which for 20 years baffled the efforts of Psammeticus for its capture, the longest siege (says Herodotus) on record (see Rev. xiv. 8; B. J. i. 7, § 23). From the summit of this hill may be seen the Mediterranean, and here doubtless stood the fish-god, Dagon (I Sam. v. 3 ff.), where he could survey the domain over which he was supposed to preside. Two marble columns remain, one prostrate in the court of the neighbouring khan, and the other upright in a drinking trough not far from it: and a few fragments of columns and capitals are to be seen built into a sidewalk or watering-machine, or into the walls of goat and sheep pens. Some traces of mosaicary occur near the Jaffa road, which may have belonged to the city walls, so nearly concealed as to be found only with special pains. There is also a large caravan-yard on the edge of an adjacent marsh (see woodcut), now entirely deserted, but once an important station, when the traffic at present transferred to the sea passed this way between Syria and Egypt.

**ASHDOTHITES, THE (אָשָּדוֹתִים): Ashdod.** The inhabitants (strictly "inhabitants," but collective) of Ashdod, or Azotus (Josh. xiii. 7).

W. L. B.

**ASHDOOTHITES, THE (אָשָּדוֹתִים): Ashdod.** The inhabitants (strictly "inhabitants," but collective) of Ashdod, or Azotus (Josh. xiii. 7), also called his name Asher ("Aashah", i.e. "happy"). A similar play occurs in the blessing of Moses (Deut. xxxiii. 24). Gaz was Zilpah's other son, but the fortunes of the brothers were not at all connected. Of the tribe descended from Asher no action is recorded during the whole course of the sacred history. Its name is found in the various lists of the tribes which occur throughout the earlier books, as Gen. xxxv. 16; Ex. i. 1; Num. ii. viii. xii., and like the rest Asher sent his chief as one of the spies from Kadesh-barnim (Num. xiii.). During the march through the desert his place was between Dan and Naphtali on the north side of the tabernacle (Num. ii. 27); and after the conquest he took up his allotted position without any special mention.

The limits of the territory assigned to Asher are, like those of all the tribes, and especially of the northern tribes, extremely difficult to trace. This is partly owing to our ignorance of the principle on which these ancient boundaries were drawn and recorded, and partly from the absence of identification of the majority of the places named. The general position of the tribe was on the seashore from Carmel northwards, with Manasseh on the south, Zebulun and Issachar on the southeast, and Naphtali on the northeast (Josh. Ant. i. 1, § 22). The boundaries and towns are given in Josh. xix. 31-34, xvi. 10, 11, and Judg. i. 31, 32. From a comparison of these passages it seems plain that Dan (Ventfris) must have been within the limits of the tribe, in which case the southern boundary was...
probably one of the streams which enter the Medi-
terranean sea from that place—rather than or el-
defining the term Zerach Zebulun. (1) While around the promontory of Carmel, the tribe then possessed the maritime portion of the rich plain of Esdraelon, probably for a distance of eight or ten miles from the shore. The boundary would then appear to have run northwards, possibly bending to the east to embrace Ashlah, and reaching Zidon by Kanaï. (a name still attached to a site six miles inland from Sidyl, whence it turned and came down by Tyre to Achdah (Khalloum, now ez-Zalo), a promontory which contained some of the richest soil in all Palestine (Stanley, p. 235; Kenrick, Phen. p. 35), and in its productiveness it well fulfilled the promise involved in the name ‘Asher,’ and in the blessings which had been pronounced on him by Jacob and by Moses. Here was the oil in which he was to ‘dip his foot,’ the ‘bread’ which was to be ‘fat,’ and the ‘royal dainties’ in which he was to indulge: and here in the metallic manufactures of the Phenicians (Kenrick, p. 38) were the ‘iron and brass’ for his ‘shoes.’ The Phenician settlements were even at that early period in full vigour: and it is not surprising that Asher was soon contented to partake their luxuries, and to ‘dwell among them’ without attempting the conquest and extermination enjoined in regard to all the Canaanites (Judg. i. 31, 32). Accordingly he did not drive out the inhabitants of Acco, nor Dor, nor Zidon, nor Ahlab, nor Achish, nor Helkah, nor Aphek, nor Rehob (Jud. i. 31), and the natural consequence of this inert acquiescence is immediately visible. While Zebulun and Naphtali ‘jeopardised their lives unto the death’ in the struggle against Sisera, Asher was content to forget the peril of his fellows in the creeks and harbours of his new allies (Judg. v. 17, 18). At the numbering of Israel at Sinai, Asher was more numerous than either Ephraim, Manasseh, or Benjamin (Num. i. 32—41), but in the reign of David so insignificant had the tribe become, that its name is altogether omitted from the list of the chief rulers (1 Chr. xxvii. 16—22); and it is with a kind of astonishment that it is related that ‘divers of Asher and Manasseh and Zebulun’ came to Jerusalem to the Passover of Hezekiah (2 Chr. xxx. 11). With the exception of Simeon, Asher is the only tribe west of the Jordan which furnished no hero or judge to the nation. One name alone shines out of the general obscurity—the aged widow Anna, the daughter of Pianuel of the tribe of Asher, who in the very close of the history departed not from the temple, but served God with fasting and prayers night and day” (Stanley, p. 265).

ASHER (אשת [fortress; Frst.: Comp.] Alex. ‘Ashph: Aser). A place which formed one boundary of the tribe of Manasseh on the south (Josh. xvii. 7). It was placed by Eusebius on the road from Shechem to Bethshan or Scythopolis, about 15 miles from the former. Three quarters

of an hour from Tibha, the ancient Thebez, is the hamlet of Teqsiris, which Mr. Porter suggests may be the Asher of Manasseh (Howb., p. 348). It is the Vul. MS. the LXX. of this passage is entirely corrupt.

W. A. W.

ASHERAH (אסרות), the name of a Phoe-
nician goddess, or rather of the idol itself. Translators, following the rendering of the LXX. (Aeror) and of the Vulg. (aexus), translate the word by ‘grove.’ Almost all modern interpreters however, since Schellen (De Dios Syrias, p. 343), agree that an idol or image of some kind must be intended, as seems sufficiently proved from such passages as 2 K. xvi. 7, xxviii. 6, in the latter of which we find that Josiah ‘brought out the Asherah’ (or as our version reads ‘the grove’) ‘from the house of the Lord.’ There can, moreover, be no doubt that Asherah was very closely connected with Ashtoreth and her worship, indeed the two are so placed in connection with each other, and each of them with Baal (e. g. Judg. iii. 7, comp. ii. 3; Judg. vi. 25; 1 K. xviii. 19), that many critics have regarded them as identical. There are other passages, however, in which these terms seem to be distinguished from each other, as 2 K. xxiii. 15, 16. Moreover (Plin. i. 261) first esteemed but not established the difference between the two names, though he probably goes too far in considering them as names of distinct deities. The view maintained by Bertheau (Exeg. Haehlb. Rict., p. 67) appears to be the more correct one, that Ashtoreth is the proper name of the goddess, whilst Asherah is the name of the image or symbol of the goddess. This symbol seems in all cases to have been of wood (see e. g. Judg. vi. 19—30; 2 K. xxiii. 14), and the most probable etymology of the term (Ashor = =, to be straight, direct) indicates that it was formed of the straight stem of a tree, whether living or set up for the purpose, and thus points us to the phallic rites with which no doubt the worship of Ashtoreth was connected. [ASHEROTH.] See also EGYPT. F. W. G.

ASHERITES, THE (Asherites). Alex. Aserph. Vulg. enm.). The descendants of Asher and members of his tribe (Judg. i. 32). W. A. W.

ASHES. The ashes on the altar of burnt-offering were gathered into a cavity in its surface, on a heap called the apple (מצל), from its round shape (Cramer, de Arc externarii), said to have sometimes amounted to 300 Cords: but this Maimon, and others say is spoken hyperbolically. On the days of the three sabbaths the ashes were not removed, and the accumulation taken away afterwards in the morning, the priests casting lots for the office (Mishnah, Tamid, l. 2, and ii. 2). The ashes of a red heifer burnt entire, according to regulations prescribed in Num. xix., had the ceremonial efficacy of purifying the unclean (Heb. ix. 19), but of polluting the clean. [SACRIFICE. Ashes

c. Zidon was then distinguished by the name Rab-bah = ‘the Strong.’ Josh. xix. 28.

d. This name is added by the LXX. Compare Josh xvii. 11.

e. This would be well compensated for if the ancient legend could be proved to have any foundation, that the parents of St. Paul resided at Gessina or Gush Chalib, i. e. the Alhab of Asher (Judg. i. 31). See Jerusalem, p. 513. (But see Acts xxii. 8.)
ASHIMA

about the person, especially on the head, were used as a sign of sorrow. [MOURNING.]

H. H.

Jeremiah (xxvi. 40) speaks of "a valley of ashes;" and from his mention of "the brook of Kidron" in the same passage, he may possibly refer to a "valley" which bore this name, near Jerusalem. But the prophet's representation there being symbolic, it is not easy to decide how far we are to regard the scene under which he conceives the allegory as literal and how far as figurative.

At a little distance north of Jerusalem are several large mounds of ashes (one of them 40 feet high), which some conjecture may be as old as the age of the temple, having been built up by the ashes carried out thither from the altar of sacrifice (Lev. vi. 10, 11). So much curiosity was felt respecting these ashes that two small specimens of them were submitted to Professor Lebègue, who found them on analysis to consist largely of animal and not of vegetable elements. But the general opinion is that they are the accumulations of ashes deposited there from soap manufactories which formerly existed at Jerusalem. The fact that similar mounds occur in the vicinity of Nâbâdûs (SILLOCHEN), which are known to be formed in this way, would seem to be decisive on this question. Travellers have observed them also near Gâzâ (GAZA), Liâdû (Lydda), and Rehôbôth, where the Jews never offered sacrifices. See Dr. Robinson's Letter Res. ii. 20.

The chemical test, as he suggests, is too limited for determining the character of the entire mass, and a few particles of bones might easily be intermingled with the other sediments. Dr. Nepp takes notice of these ash-heaps (Jerusalem n. d. héel, Liadû, i. 230), and expresses the same opinion of their origin.

H.

ASHIMA [Ašôma [Vat. -šôma]; Comp. Ašôma'atà, Ašôma]. A god worshipped by the people of Hamath. The worship was introduced into Samaria by the Hamathite colonists whom Shalmanasser settled in that land (2 K. xvii. 30). The name occurs only in this single instance. The Talmudists say that the word signifies a goat without hair, or rather with short hair (Buxtorf, Lex. Talm.); and from this circumference Ashima has been regarded as identical with the Mesopotamian god of the Egyptians (considered by the Greeks to be Pan), to whom the goat was sacred. This god has also by some been identified with the Phœnician god Elam (see Winer, Rech.), whose name is frequently found in Phœnician inscriptions as a component of the names of persons, and who is regarded as the Phœnician Elam (Green, Mon. Phœn. pp. 136, 417). The two conjectures are not necessarily discrepant, since to the Phœnician Elam belong the characteristics both of Pan and of Elam (Movers, Phonizier, i. 552). There are many other conjectures of Jewish writers respecting this god, but they are of no authority whatever.

F. W. G.

ASHKELON, ASHELON. Aper. ASH-CALON (אַשְׁכֵּלְּוֵן) [a] [perh. migration, Ge-sen.; story, Dicht.]; once "the Ashkalonite." (note the change from Aleph to Ain): Aššañn.

a The usual form would be אַשְׁכִּלְּוֵנָ פָּרָשָׁ הָא- פָּרָשׁ אַשְׁכַּלְוָנָ אָשִׂ שָׁן (note the change from Aleph to Ain): Aššañn.

one of the five cities of the lords of the Philistines (Josh. xiii. 3; 1 Sam. vi. 17), but less often mentioned, and apparently less known to the Jews than the other four. This doubtless arose from its remote situation, alone, of all the Philistine towns, on the extreme edge of the shore of the Mediterranean (Jer. xlvii. 7), and also well down to the south. Gaza, indeed, was still further south, but then it was on the main road from Egypt to the centre and north of Palestine, while Ashkelon lay considerably to the left. The site, which retains its ancient name, fully bears out the above inference; but some indications of the fact may be traced, even in the scanty notices of Ashkelon which occur in the Bible. Thus, the name is omitted from the list in Josh. xvi. of the Philistine towns falling to the lot of Judah (but comp. Joseph. Ant. v. 1, § 22, where it is specified), although Ebron, Ashdod, and Gaza are all named; and considerable uncertainty rests over its mention in Judg. i. 18 (see Bertheau in Exeg. Rambh.). Sonson went down from Timnath to Ashkelon when he slew the thirty men and took their spoil, as if to a remote place whence his exploit was not likely to be heard of; and the only other mention of it in the historical books is in the formalistic passages, Josh. xiii. 5, and 1 Sam. vi. 17; and in the casual notice of Judg. xix. 28; 1 Macc. x. 39; and 2 Macc. vi. 32. Their other Philistine cities are each distinguished by some special occurrence or fact connected with it, but except the one exploit of Samson, Ashkelon is to us no more than a name. In the poetical books it occurs 2 Sam. i. 20; Jer. xxi, 20, xlvii. 5, 7; Am. i. 8; Zeph. ii. 4; 7; Zech. ix. 5.

In the post-biblical times Ashkelon rose to considerable importance. Near the town—though all previous notices of them have now vanished—were the temple and sacred like of Pentecost, the Syrian Venus; and it shared with Gaza an infamous reputation for thesteadfastness of its heathenism and for the cruelty there practised on Christians by Julian (Ivanal, pp. 588, 590). "The soil around the town was remarkable for its fertility; the wine of Ascalon was celebrated, and the Ab-harum plant flourished better than in any other place except Canopus," says Keunick. It was also well watered by various great streams, it was surrounded by a vast plain, and by a semicircular, or rather a crescent, valley of blackish, shewy sandstones, and by a forest of figs, olives, and pomegranates, and by its beans, which gave their name to a valley in the neighborhood (Keunick, p. 28; Edrisi and Ibn Batuta in Ritter, Palastina, p. 88). Its name is familiar to us in the "Asbackah" or "Shallot," a kind of onion, first grown there, and for which this place was widely known. "The sacred doves of Venus still fill with their cooings the luxurious gardens which grow in the sandy hollow within the ruined walls." (Stanley, p. 257). Ashkelon played a memorable part in the struggles of the Crusades. "In it was intrenched the hero of the last gleam of history which has thrown its light over the plains of Philistia, and within the walls and towers now standing Richard held his court" (Stanley, ibid.). By the Mohammedan geographers it was called "the bride of Syria" (Schulten, Ind. x Graec.).

"The position of the town is naturally very strong. The walls are built on a ridge of rock which winds in a semicircular curve around the town and terminates at each end in the sea. There is no bay or shelter for ships, but a small harbor towards the east advanced a little into the town, and ancients bore, like that of Gaza, the name of Majamas" (Keunick, p. 28).
ASHKENAZ

It. the time of Origen some wells of remarkable shape were shown near the town, which were believed to be those dug by Isaac, or at any rate, to be of the time of the patriarchs. In connection with this tradition may be mentioned the fact that in the Samaritan version of Gen. xx. 1, 2, and xxi. 1, Ashkelon (תַּלְמָדָא) is put for the "Garar" of the Hebrew text.

G.

A word should be said of the present site of Ashkelon. Genesis speaks of a village there still bearing the ancient name; but in fact not a living soul dwells any longer within the proper precincts of the old city, though a little east of the ruins is a cluster of some twenty mud hovels surrounded by a few palms and other trees. The name is unknown on the spot except by tradition. The testimony of all travellers is the same; it is difficult to conceive of a more desolate scene, a sadder spectacle of the wasting effects of time, and of the havoc of war, than the ruins of Ashkelon present to us.

"A lofty and abrupt ridge begins near the shore, runs up eastward, bends round to the south, then to the west, and finally towards the sea, forming an irregular amphitheatre. On the top of this ridge ran the wall, which was defended at its salient angles by strong towers. The specimens which still exist along the southeast and west sides show that it was very high and thick, built, however, of small stones, and bound together by broken columns of granite and marble. These extraordinary fragments, tumbled up in strange confusion along the sandy ridge, are what generally appear in the pictures of Ashkelon, and impart such an air of desolation to the view. The whole area is now planted over with orchards of the various kinds of fruit which flourish on this coast. From the top of these tall fragments at the southeast angle of the wall, we have the whole scene of desolation before us, stretching, terrace after terrace, quite down to the sea on the northwest. The walls must have been blown to pieces by powder, for not even earthquakes could toss these gigantic masses of masonry into such extraordinary attitudes; (Thomson's Land and Book, ii. 328 ff.). Not a solitary column stands upright, and not a building can be traced even in outline, though a few stones of a wall are here and there seen in their places. Deep wells are frequently met with, with curb-stones of marble or granite; columns, mostly of granite, exist everywhere in vast numbers—so much of them may be seen projecting from the ruinous wall along the cliff over the sea, and some lie half buried in the sands below."

(Vorter's Handbook, i. 293.) We seem, as we stand there, to hear echoing through the ruins those words of Zephaniah (ii. 4), spoken 25 centuries ago: "Ashkelon shall be a desolation"; and of Zechariah (ix. 5): "Ashkelon shall not be inhabited." H.

ASHKENAZ (אַשְּכֵנָא): "Aryan, Ascenez, one of the three sons of Gomer, son of Japheth (Gen. x. 3), that is, one of the peoples or tribes belonging to the great Japhetic division of the human race, and springing immediately from that part of it which bears the name of Gomer. The original seat of the people of Ashkenaz was undoubtedly in the neighborhood of Armenia, since they are mentioned by Jeremiah (li. 27) in connection with the kingdoms of Amman and Minni. We are not, however, on this account to conclude that they, any more than the Genesiotes in general, were confined to this locality. Assuming here, what will be more properly discussed under the word Japhet, that the Japhetic tribes migrated from their original seats westward and northward, thus populating Asia Minor and Europe, we may probably recognize the tribe of Ashkenaz on the northern shore of Asia Minor, in the name of Lake Assan, and in Europe in the name Somnius, Scumbnivus. Knobel (Volkerfest, p. 35) regards the word as a compound (וֹלֶמְדָא), the latter element being equivalent to the Gr. γυναικεία, Lat. gens, geneus, Eng. blood, and the former meaning the male race.

A.

ASH'NAH (אַשְׁנָנָה [the strong, firm]), the name of two cities of Judah, both in the Shephelah or Lowland; (1) named between Zorea and Zanoah, and therefore probably N. W. of Jerusalem (Jos. xv. 33; Ashan; [Comp. Abd. Alex. 'Ashdn; A.]; and (2) between Jiphthah and Neziah, and therefore S. W. of Jerusalem (Jos. xiv. 22; Ashan; Abd. Alex. 'Ashdn; Comp. 'Assurad) Ezem). Each, according to Robinson's map (1857), would be about 16 miles from Jerusalem, and therefore corresponding to the Bethsam of the Old Test. Eusebius names another place, 'Asdah, but with no indication of position.

G.

ASH'PENAZ (אַשְׁפֶּנָא), of uncertain origin, yet see Hitzig on Dan. i. 3, and compare the form 'A'Shpena, Gen. x. 3: LXX., 'A'stēsphādī = אַשְׁפֶּנָא (?: 'A'sphādī), Theodot.: [Ashenec, Vulg. 'Ashphon, Ashper, Asper, Syr.], the master of the eunuchs of Nebuchadnezzar (Dan. i. 3). B. F. W.

ASH'RIEL (אַשְׁריֵלי: 'Esriel, [Vat. Asrean]: Eriel). Probably Ashreel, the son of Manasseh (1 Chr. vii. 14).

W. A. W.

ASHTERATHE (אַשְׁטֵרָתִי: Ṣ'ṭaratūth [Vat. 'Assaratūth]: Astaroth). A native or inhabitant of Ashtaroth (1 Chr. xi. 44) beyond Jordan. Uzzia the Ashterathite was one of David's guards.

W. A. W.

ASH'TAROTH, and (once) ASTAROTH (אַשְׁטֵרָות [Vat. 'A'stārotūth]: [A'stārādūth]: Astaroth [in Josh. xlii. 31]. Alex. Ασταράθη; in 1 Chr. vii. 71, 'A'strādāv; Alex. Ασταράθη, Comp. Abd. A'strāvad: Astaroth). A city on the E. of Jordan, in Bashan, in the kingdom of Og, doubtless so called from being a seat of the worship of the goddess of the same name. [Ashtoretel]. It is generally mentioned as a description or definition of Og,—who "dwelt in Ashtaroth in Edrei" (Deut. i. 4), "at Ashtaroth and at Edrei" (Josh. xii. 4. xiii. 12), or "who was at
Ash'taroth "(ix. 10). It fell into possession of the
half tribe of Manasseh (J Josh. xiii. 31), and was
given with its suburbs or surrounding pasture-lands
(אשתרות, אשתר) to the Gershonites (1 Chr. vi. 71 [59]),
the other Levitical city in this tribe being Golan.
In the list in Josh. xxii. 27, the name is given as
Reateriah (quasi ארתהא "house of A.");
Reelad, p. 621; Gesenius, Thes. pp. 175 a, 196
xv. 1083). Nothing more is heard of Ash'taroth.
It is not named in any of the lists, such as those
in Chronicles, or of Jeremjah, in which so many
of the trans-Jordanic places are enumerated.
Jerone (Thom. Astaroth) states that in his time it
lay six miles from Adra, which again was 25 from
Beitra. He further (Astaroth Carnaim) and
Eusebius speaks of two καιαλαί, or castella, which lay
nine miles apart, "inter Adram et Albinium cata-
tes." One of these was possibly that first named
above, and the other may have been Ash'teroth-Kar-
naim. The only trace of the name yet recov-
ered in these interesting districts is Telf-Astarte
or Ash'terath (Ritter, Geric, p. 819; Porter, ii. 212),
and of this nothing more than the name is known.
Uzziah the Ashterathite is named in 1 Chr. xi. 44.
G.

* ASHTAROTH

"Ash'taroth (אשתרות "house of A.");
Judg. ii. 3, 13, at 'Aš'taratha: x. 6, at 'Aš'taroth: 1 Sam. vii.
3, xii. 10, to (אשתרה) יִשְׂרָאֵל; vii. 4, at 'אשתרה 'Aš'taroth;
xxxi. 10, with המ with 'Aš'tarothא, Alex. -i: -Aš'taroth),
the plural of ASHTORETH, which see.
A.

ASH'TORETH-KARNAIM

(עשתרתה-קארניאים "Ash'taroth of the two horns or peaks;
אשתרות כאל (Alex. omits (אלא) כארניה: 'Astaroth Carnaim),
a place of very great antiquity, the
ashore of the Rechon (Gen. xiv. 5), while the cities
of the plain were still standing in their oasis.
The name reappears but once, and that in the later
history of the Jews, as Carnaim, or Carnion (1 Macc.
v. 26, 43, 44; 2 Macc. xii. 21, 26; Joseph, Ant. xii.
8, § 4), "a strong and great city, " Ash'terath to
be besieged," with a "temple (ט emple of Ararat" (ע "Aramatseuah),
but with no indication of its locality,
being beyond its "the land of Babad."
It is usually assumed to be the same place as the
preceding [ASH'TAROTH], but the few facts that
cannot be ascertained are all against such an identi-
fication. 1. The suffix "Karnain," which certainly
dicates some distinction, and which in this time of
the Maccabees, as quoted above, appears to have
superseded the other name. 2. The fact that En-
selius and Jerome in the Onomasticon, though not
very clear on the point, yet certainly make a dis-

tinction between Ash'taroth and Astaroth-Carnaim,
describing the latter as a קואל תמונת תנייא א"א
Aram-tiain, more splendid in angle Bataanae. 3.
Some weight is due to the renderings of the Samaritan
version, and of the Arabic version of Sandan, which
give Ash'taroth as in the text, but Ash'teroth-Kar-
naim by entirely different names (see above).
The first of these, אphabetith, does not appear to have been
yet recognized; but the second, א-Samman, can
hardly be other than the still important place which
continues to bear precisely the same name, on the
Haj route, about 25 miles south of Damascus, and
so the N. W. of the Leljih (Burekh. p. 55; Ritter,
Syrisch, p. 812). Perhaps it is some confirmation
that the name Karnaim refers to a
some double character in the deity there worshipped
א-Samman is also dual, meaning "the two idols."
There accordingly we are disposed to fix the site of
Ash'teroth-Karnaim in the absence of further evi-
dence.
G.

* Mr. Porter is very confident that "Karnaim"
refers to the figure of Ash'terath. At Kunnenit
(Keatnet, Num. xxxii. 42) in Lejjih, the ancient
Asab, he found "a colossal head of Ash'terath,
sadly broken, in front of a little temple, of which probably it was once the chief idol. The crescent
moon which gave the goddess the name "Carnaim"
(two-horned) is on her brow." Elsewhere also
among the massive ruins of the deserted cities there
he saw "sculptured images of Astarte, with the
crescent moon," showing how prevalent was this form of worship, and what its characteristic symbol
was (ASH'TORETH). See his Great Cities of
Bosrah, pp. 12, 43. 11.

ASHTORETH (עשתרתה: 'Aš'taroth; Aš-
taroth [Ash'taroth]), the principal female divinity of
the Phenicians, as Baal was the principal male
divinity. It is a peculiarity of both names that they
frequently occur in the plural, and are associated
together in this form (Judg. x. 6: 1 Sam. vii.
4, xii. 10). Gesenius (Thes. s. v.) maintained that by
these plurals were to be understood statues of
Baal and Astarte: but the more correct view seems
to be that of Movers (Phoe. i. 175, 692), that the
plurals are used to indicate different modifications
of the deities themselves. In the earlier books
of the O. T. only the plural, ASHTO"RETH, occurs,
and it is not till the time of Solomon, who intro-
duced the worship of the Sidonian Astarte, and
only in reference to that particular goddess, Ash-
toreth of the Sidonians, that the singular is found
in the O. T. (1 K. xi. 5, 53; 2 K. xxiii. 21). The
worship of Astarte was very ancient and very
widely spread. We find the plural Ash'toreth united
with the adjunct Karnaim as the name of a
city as early as the time of Abraham (Gen. xiv. 5),
and we read of a temple of this goddess, appar-
tently as the goddess of war, amongst the
Philistines in the time of Saul (1 Sam. xxxi. 10). From
the connection of this goddess with Baal or Be'l,
we should moreover naturally conclude that she
would be found in the Assyrian pantheon, and in
fact the name "Astarte" appears to be clearly identified
in the list of the great gods of Assyria (Layard,
N. and B., pp. 352, 629; Rawlinson, Early History
of Babylon, London, 1854, p. 23; Rawlinson, Herod-
etus, i. 634). There is no reason to doubt that
this Assyrian goddess is the Ash'toreth of the Old
Testament and the Astarte of the Greeks and
Romans. The worship of Astarte seems to have ex-
tended wherever Phenician colonies were
founded. Thus we find her name Ash'toreth in
scriptions still existing in the island of Cyprus on the site of the ancient
Cition, and also at Carthage (Genen. Mon. Phae.
p. 125, 449), and not uncommonly as an element
alludes to the worship of the horned goddess, the
"mooned Ash'terath."
in Phoenician proper names, as Ασταρτος, Αθλασταρτος, Δελεασταρτος (Joseph c. Αν. i. 15). The name occurs moreover written in Egyptian hieroglyphics, as Αστηρ (Gen. Thes. s. v.). For evidence of her wide-spread worship see also Eckhel, Dict. Vocab. iii. 369 ff. It is worthy of remark that Rüdiger, in his recently published Addenda to Gesenius's Thesaurus (p. 106), notices that in the inscription on the sarcophagus of a king named Kaunuzar, discovered in January, 1855 (see Robinson, iii. 35, note), the founding, or at least restoration, of the temple of this goddess at Sidon, is attributed to him and to his mother Ashurathath, who is further styled priestess of Ashthoret.

If now we seek to ascertain the character and attributes of this goddess, we find ourselves involved in considerable perplexity. There can be no doubt that the general notion symbolized is that of productive power, as Baal symbolizes that of generative power, and it would be natural to conclude: that as the sun is the great symbol of the latter, and therefore to be identified with Baal, so the moon is the symbol of the former and must be identified, with Asherah, the moon-goddess. Yet the name is also too aptly to be so interpreted, can scarcely be doubted. The ancient name of the city, Ashthorath-Karnaim, already referred to, seems to indicate a horned Astarte, that is, an image with a crescent moon on her head like the Egyptian Athor. At any rate it is certain that she was by some ancient writers identified with the moon; thus Lucian (De Syr. Des. iv. 4) says, Ασταρτην δι' έγνου δεκα[στα]ναι[ανα] μελεον. And again Herodian, v. 6, 10, Ὠρωσιαν Φωικαις Ασταρτην επικαθηρουσας σαλας και θελων. On these grounds, Movers, Winer, Keil, and others maintain that originally Ashethoret was the moon-goddess. On the other hand, it appears to be now ascertained that the Assyrian Ishtar was not the moon-goddess, but the planet Venus (Rawlinson, Herod. i. c.), and it is certain that Astarte was by many ancient writers identified with the goddess Venus (or Aphrodite) as well as with the planet of that name. The name itself seems to be identical with our word Αστήρ, a word very widely spread (Sanekt., tav. Zen: studium; Pehlevi, xtotrun). Pers. 3ηντολιν xtotra; Gr. αστήρ: Lat. stele.

Though this derivation is regarded as doubtful by Keil, from the absence of the initial Α in all the presumed representatives of the word (Κίναιος, i. 168, Eng. tr. i. 189), it is admitted by Gesenius, Fürst, Movers, and most Hebrew critics on apparently good grounds. On the whole it seems most likely that both the moon and the planet were looked upon as symbols, under different aspects and perhaps at different periods, of the goddess, just as each of them may in different aspects of the heavens be regarded as the "queen of heaven." The inquiry as to the worship paid to the goddess is not less perplexed than that of the heavenly body in which she was symbolized. Movers (Phoen. 697) distinguishes two Astartes, one Carthaginian-Sidonian, a virgin goddess symbolized by the moon, the other Syro-Phoenician symbolized by the planet Venus. Whether this be so or not, it is certain that the worship of Astarte became identified with that of Venus: thus Cicero (de Nat. Deor. iii. 23) speaks of a fourth Venus, "Syria Tyretoque concepta, que Astarte vocatur," and that this worship was connected with the most impure and licentious rites is apparent from the close connexion of this goddess with Ashterah, or, as our translators render the word, "groves." It is not necessary that we should here enter further into this perplexing and revolting subject of the worship of this goddess. The reader who wishes to pursue the inquiry may find ample details in Movers' Phainism, already referred to, and in Creuzer's Symbolik.

F. W. G.

ASHUR (אָשָׁר [black, Ges., possibly hero, First]: Ασθή: [Var. Σανωά]): [Alex. Ξαρς, Astro, Comp. Ασθόμ:] Ashtar, Asnur), the "father of Tekoa," 1 Chr. ii. 24, iv. 5 [which probably means that he was the founder or prince of that village. See Teroaj].

ASHURITES, THE (אשָׁרִים): [Δ θάρηπ: [Var. Θάρηπ: Alex. Θάρω]: [Comp. Ασθόπ]], Gessue.] This name occurs only in the enumeration of those over whom Ishbosheth was made king (2 Sam. ii. 9). By some of the old inter preters—Arabé, Syriac, and Vulgate versions—and in modern times by Ewald (iosch. iii. 143), the name is taken as meaning the (West) or members of a small kingdom to the N. or S. E. of Damascus, one of the petty states which were included under the general title of Aram. [Αραμ. Gessuer.] The difficulty in accepting this sub stitution is that Geshur had a king of its own, Tashui, whose daughter moreover was married to David somewhere about this very time (1 Chr. iii. 2, compared with 4), a circumstance not consistent with his being the ally of Ishbosheth, or with the latter being made king over the people of Geshur. Tashui was still king many years after this occurrence (2 Sam. xiii. 37). In addition, Geshur was surely too remote from Mahamna and from the rest of Ishbosheth's territory to be intended here.

It would therefore be perhaps safer to follow the Targum of Jonathan, which has Beth-Asher, צֶּבָּר הָאִישׁ, "the house of Asher," a reading supported by several MSS. of the original text, which, omitting the Vau, have רוֹנָיוֹשׁ (Davidson, Tesh. Text, ad loc.). "The Asherites" will then denote the whole of the country west of the Jordan above Jezreel (the district of the plain of Esdraelon), and the enumeration will proceed regularly from north to south, Asher to Benjamin. The term "Asherite" occurs in Judg. i. 32. The reading of the LXX. was evidently quite different; but what it was has not been yet recognized.

There is clearly no reference here to the Ashurrim of Gen. xxv. 3.

ASH VATH (אָשָׁד: 'Ashid: [Var.]: Alex. Ασθόθ: [Comp. Ασθόθ]: Aseth). One of the sons of Japheth, of the tribe of Asher (1 Chr. vii. 34).

A'SIA (אָסִי; [Join]). The passages in the N. T. where this word occurs are the following: Acts ii. 9, 10, 11, 13, 17, 20, 24, 27, 32, 37, 14, 17, 20, 21, 27, xxvii. 2; Rom. xvi. 5 (where the true reading is Ασίαις); 1 Cor. xvi. 19; 2 Cor. i. 8; 2 Tim. i. 15; 1 Pet. i. 1; Rev. i. 4, 11. [CHIEF of ASIA. See ASIARCH]. In all these passages it may be confidently stated that the word is used, not for "the continent of Asia," nor for what we commonly understand by "Asia Minor," but for a Roman province which embraced the western part of the peninsula of Asia Minor and of which Eph
sion was the capital. This province originated in the request of Attalus, King of Pergamus, or King of Asia, who left by will to the Roman Republic his hereditary dominions in the west of the peninsula (n. c. 133). Some rectifications of the frontier were made, and "Asia" was constituted a province. Under the early Emperors it was rich and flourishing, though it had been severely plundered under the Republic. In the division made by Augustus of senatorial and imperial provinces, it was placed in the former class, and was governed by a proconsul. Hence Ἀσιαῖοι, Acts xiv. 38, and on coins. It contained many important cities, among which were the seven churches of the Apocalypse, and it was divided into assay districts for judicial business. (Hence Ἀσιαῖοι, i. c. Ἀσιάς, Acts, ibid.) It is not possible absolutely to define the inland boundary of this province during the life of St. Paul: indeed the limits of the provinces were frequently undergoing change; but generally it may be said that it included the territory anciently subdivided into Lydia, Ionia, and Caria, and afterwards into My西亚, Lydia, and Caria. [MY西亚, Lycia, Bithynia, Phrygia, Galatia.]

Meyer's comment on Acts xvi. 6 is curious, and neither necessary nor satisfactory. He supposes that the divine intimation given to St. Paul had reference to the continent of Asia, as opposed to Europe; and that the apostle supposed it might have reference simply to Asia eis Taurum, and therefore attempted to penetrate into Bithynia. The view of Meyer and De Wette on Acts xxvii. 3 (and of the former on Acts xix. 10), namely, that the peninsula of Asia Minor is intended, involves a geographical mistake; for this term "Asia Minor" does not seem to have been so applied till some centuries after the Christian era. Moreover the mistake introduces confusion into both narratives. It is also erroneous to speak of Asia in the N. T. as Λ. προεομοθνία: for this phrase also was of later date, and denoted one of Constantine's subdivisions of the province of which we are speaking.

In the books of Macebees, where reference is made to the pre-provincial period of this district (n. c. 300-150), we frequently encounter the word Asia in its earlier sense. The title "King of Asia" was used by the Seleucid monarchs of Antioch, and was claimed by them even after it more properly belonged to the immediate predecessors of Attalus (see 1 Marc. xvi. 13; only Care and Howson's Life and Epistles of St. Paul, ch. xiv.; Marquardt's Rom. Alterthümer, ii. 139-140). J. S. H.

ASIA RICHE (Ἀσιαρχής: princeps Asiae, Vulg.: chief of Asia, A. V.; Acts xix. 34), officers chosen annually by the cities of that part of the province of Asia of which Ephesus was, under Roman government, the metropolis. They had charge of the public games and religious theatrical spectacles, the expenses of which they bore, as was done by the holders of Ἀσιότητα at Athens, and the arches at Rome (Nolhain, iii. 35; Gibbon, iv. xii. 295, ed. Smith). Their office was thus, in great measure at least, religious, and they are in consequence sometimes called ἀσιάρχης, and their office ἀσιάρχειον. (Mart. S. Poly无可 in Po. Ap. c. 21 [cf. c. 12].) Probably it represented the religious element of the ancient Panticus league; to the

greek Imperial Copper Coin ("medallion") of Izadiirin of Phrygia; Commagene; with name of Asiana.

Rev.: EHIKAIMTH ITOCAGAT ASIARICHE. Bust of Emperor to right.

OE.: ATTAKMAYP, ANUTEINOUCE. Bust of Emperor to right.

Territorial limits of which also the circle of the functions of the Asarchs nearly corresponded. (See Herod. i. 142.) Officers called Άσιαρχῇς are mentioned by Strabo (xiv. 665), who exercised judicial and civil functions, subject to the Roman government; but there is no evidence to show that the Asarchs exercised any but the religious functions above mentioned. Moderns names Ωθοναρχία and Καταθαραρχία as religious offices in Bithynia and Cappadocia. The office of Asarch was annual, and subject to the approval of the proconsul, but might be renewed; and the title appears to have been continued to those who had at any time held the office. From its costliness, it was often (ἀριστοκρατεῖ) conferred on a citizen of the wealthy city of Tralles (Strabo, xiv. 649). Philip, the Asarch at the time of St. Polycarp's martyrdom, was a Tralienne. Coins or inscriptions bearing the names of persons who had served the office of Asarch once or more times, are known as belonging to the following cities: Aphrodisias, Cyzicus, Hierapolis, Laodicea, Pergamus, Philadelphia, Sardis, Smyrna, Thyatira. (Aristid. Oc. xvi. 518, ed. Dind.; Eckel, ii. 507, iv. 207; Eckel, Inser. vol. ii.; Van Dale, D. W. p. 274 sqq.; Krause, Crisp. Nieszer, p. 71; Wetstein, On Ac. xix. 27.) As coast of the Caspian Sea, as in Acts ii. 9 and xi. 9.
serve in building the temple, which he did noiselessly, by means of a mysterious stone Shamir (Cæmet, s. v. and Fragmenta, p. 271, where there is a great deal of fanciful and groundless speculations). F. W. F.

AS'NAH (ασ'ναθ) [thorn-bush]: 'Asennah'. The children of Assnah were among the Nethinim who returned with Zerubbabel (Ezr. ii. 50). In the parallel list of Neh. vii. 52 the name is omitted, and in 1 Esdr. v. 31 it is written Asana. [See also Asnath.] W. A. W.

[ASNAPPAR (so correctly A. V. ed. 1611; in later eds.)] ASNAPPER (ασ'ναπ'παρ) [Syr. Epop.]: 'Asennaphar; [Vat. At'ennaphar: Alex. Naqaph: Asennar'], mentioned in Ezr. iv. 10, with the epithets ‘great and noble,’ as the person who settled the Cuthans in the cities of Samaria. He has been variously identified with Shalmaneser, Senanorah, and Ezra-baldon. Of the three the third is the most probable, as Gesenius says, since in ver. 2 of the same chapter the Cuthans attribute their settlement to that king. But on the whole, as this is but slight evidence, it seems better to accept Patrick’s view (Comm. in loco), that Asnapper was ‘some great commander, who was intrusted by one of these kings to conduct them, and bring them over the river Euphrates, and see them settled in Samaria.’ G. E. L. C.

AS'OM (ασ'μα: Asom), 1 Esdr. ix. 33. [Hastum.]

ASP (ασ'μα: Asp): ‘Plures, ἀρπάζων, βαρνάκος: aspis, basiliscus. The Hebrew word occurs in the six following passages: Dent. xxxii. 33: Ps. viii. 4, xvi. 12; Job xx. 14, 16; Is. xi. 8. It is expressed in the passages from the Psalms by akker in the text of the A. V., and by ἀσπίς in the margin. Elsewhere the text of the A. V. has *asp* as the representative of the original word *pethen*. That some kind of poisonous serpent is denoted by the Hebrew word is clear from the passages quoted above. We further learn from Ps. viii. 4. that the *pethen* was a snake upon which the serpent-charmers practised their art. In this passage the wicked are compared to ‘the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely:’ ‘and from Is. xi. 8. ‘the sucking child shall play on the hole of the *asp,*’ it would appear that the *pethen* was a dweller in holes of walls, &c. The question of identity is one which is by no means easy to determine. Böckh attributes nothing in aid to a solution when he attempts to prove that the *pethen* is the *asp* (Hieroz. iii. 156), for this species of serpent, if a species be signified by the term, has been so vaguely described by authors, that it is not possible to say what known kind is represented by it. The term *asp* in modern zoology is generally restricted to the *Vipera aspis* of Latrille, but it is most probable that the name, amongst the ancients, stood for different kinds of venomous serpents. Solinus (xxvi. 28) says, ‘plures diversissimorum aspidum species;’ and Elian (V. Anim. x. 31) asserts that the Egyptians enumerate

---

*a* Asp (the Greek ἀσπίς, the Latin *aspis*) has by some been derived from the Heb. מַעֲשָׂה, ‘to gather up,’ in allusion to the coiling habits of the snake when first rest; but this etymology is very improbable. We think that the words are onomatopoeia, alluding to the hissing sounds serpents make: cf. Lat. *aspis-nare.* The shield (ἀσπίς) is no doubt derived from the form of the animal at rest.
sixteen kinds of asp. Bruce thought that the asp of the ancients should be referred to the cerasus, while Cuvier considered it to be the Egyptian cobra (Naja haje). Be this, however, as it may, there can be little doubt that the Hebrew name pethen is specific, as it is mentioned as distinct from asp, asp, apis, naja, naja, bant, bant, naja, etc., names of other members of the Ophidien.

Oedmann (Vernisich, Samuel, v. 81) identifies the pethen with the Celaer bantun, Linn., a species described by Forskål (Descr. Anim. p. 15). Rosemuller (Nota, ed Hierzn. iii. 156), Dr. Lee (Ichth. S. v. 77), Dr. Harris (Nat. Hist. of Bible, art. Asp), Col. H. Smith (Cypr. Bib. Lib. art. Serpent), believe, that pethen is identified with the Celaer bantun of Forskål. Oedmann has no hesitation in establishing an identity between the Celaer bantun and the C. bantun; but from Forskål’s descriptions it is most probable that the two species are distinct. The whole argument that seeks to establish the identity of the Celaer bantun with the pethen of Scripture is based entirely upon a similarity of sound. Rosemuller thinks that the Arabic word bantun ought to be written pethen, and thinks there can be no doubt that this species represents the pethen of Scripture. Oedmann’s argument also is based on a similarity of sound in the words, though he adds an additional point in the fact that, according to the Swedish naturalist quoted above, the common people of Cyprus bestow the epithet of bont (copea), “deaf,” upon the Celaer bantun. He does not, however, believe that this species is absolutely deaf, for he says it can hear well. This epithet of deafness attributed to the Celaer bantun Oedmann thinks may throw light on the passage in Ps. 39. 3, about “the deaf adder.”

As regards the opinion of Rosemuller and others who recognize the pethen under the bantun of Forskål, it may be stated that, even if the identity is allowed, we are as much in the dark as ever on the subject, for the Celaer bantun of Forskål has never been determined. If C. bantun = Celaer bantun, the species denoted may be the Echis ceratophora (tation) of Egypt (Catalogue of Snakes in Brit. M. i. 29). Probably all that naturalists have ever heard of the C. bantun is derived from two or three lines of description given by Forskål. “The whole body is spotted with black and white; it is a foot in length, and the thickness of two thumbs; oviparous; its bite kills in an instant, and the wounded body swells.” The evidence adduced by the deaf snake of Cyprus, and adduced in support of his argument by Oedmann, is of no value whatever, for it must be remembered that the ambition in all the opinion is very imperfect; as all the members of this order are destitute of a tympanic cavity. The epithet “deaf” therefore, as far as relates to the power all serpents possess of hearing ordinary sounds may reasonably be applied to any snake. Vulgar opinion in this country attributes “deafness” to the adder; but it would be very unreasonable to infer from thence that the adder of this country (P. harisi) is identical with the “deaf adder” of the 38th Psalm! Vulgar opinion in Cyprus is of no more value in the matter of identification of species than vulgar opinion in England.

A preliminary proof, moreover, is necessary for the argument. The snake of Cyprus must be demonstrated to occur in Egypt or the Holy Land—a fact which has never yet been proved, though, as was stated above, the snake of Cyprus (C. ceratophora) may be the same as the Echis ceratophora of North Africa.

Very absurd are some of the explanations which commentators have given of the passage concerning the “deaf adder that stoppeth her ears;” the Rabbi Solomon (according to Bochart, iii. 162) asserts that this snake becomes deaf when old in one ear; that she stops the other with dust, lest she should hear the charmour’s voice.” Others maintain that “she applies one ear to the ground and stops the other with her tail.” That such errors should have prevailed in former days, when little else but foolish marvels filled the pages of natural history, is not to be wondered at, and no allusion to them would have been made here, if this absurd error of “the adder stopping her ears with her tail” had not been perpetuated in our own day. In Byttner’s Lyra of David, p. 152 (Dee’s translation, 1847?), the following explanation of the word pethen, without note or comment, occurs: “Asp, whose deafness marks the venom of his nature, as though impenetrable even to charms. It is deaf of one ear, and stops the other with dust or its tail, that it may not hear incantations.” Dr. Thomson also (Land and Book, p. 155, London, 1859.) seems to give credence to the fable when he writes: “There is also current an opinion that the adder will actually stop up his ear with his tail to fortify himself against the influence of music and other charms.” It is not, then, needless to observe, in confirmation of the above error, that no serpent possesses external openings to the ear.

The true explanation of Ps. 39. 4 is simply as follows: There are some serpents, individuals of the same species perhaps, which deaf all the attempts of the charmour; in the language of Scripture such individuals may be termed deaf. The point of the relative consists in the fact that the pethen was capable of hearing the charmour’s song, but refused to do so. The individual case in question was an exception to the rule. If, as some have supposed, the expression “deaf adder” denoted some species that was incapable of hearing, whence it had its specific name, how could there be any force in the comparison which the psalmist makes with wicked men?

![Egyptian Cobra. (Naja haje.)](image-url)
reason why such sounds as the charmer makes produce the desired effect in the subject under treatment. [SERPENT-CHARMING.] As the Egyptian zóbra is more frequently than any other species the subject upon which the serpent-charmers of the Bible lands practice their science, as it is fond of concealing itself in walls and in holes (Is. xi. 8), and as it is not improbable that the derivation of the Hebrew word pathen has reference to the expanding powers of this serpent's neck when irritated, it appears to us to have a decidedly better claim to represent the pathen than the very doubtful species of Coluber bonin, which on such slender grounds has been so positively identified with it.

W. H.

**ASPALATHUS** (asphaltóς ἀρωμάτων; Comp. πάλαθος: βεβηλόνας), the name of some sweet perfume mentioned in Ezek. xxiv. 15, to which Wisdom compares herself: "I gave a sweet smell like cinnamon and aspalathus." The question as to what kind of plant represents the aspalathus of the ancients has long been a puzzling one. From Theocritus (bd. iv. 57) we learn that the aspalathus was of a thorny nature, and (from bd. xxiv. 87) that the dry wood was used for burning. Phiny (H. N. xii. 24) says that aspalathus grows in Cyprus; that it is a white thorny shrub, the size of a moderate tree; that another name for this plant was cypesceptron or reperciputrum, as "red sceptre," a name perhaps which it owed to the fact of the flowers clustering along the length of the branches; but in another place (xxiv. 13) he speaks of aspalathus as distinct from the cypesceptron, as growing in Spain, and commonly employed there as an ingredient in perfumes and ointments. He states that it was employed also in the washing of wool. Theophrastus (Hist. Pl. iv. 7, § 3, ed. Schneider) enumerates aspalathus with cinnamon, cassia, and many other articles which were used for ointments, and appears to speak of it as an Eastern production. In Fr. iv. 33 he says it is sweet-scented and an astringent. Dioscorides (i. 19) says that the aspalithus was used for the purpose of thickening ointment.

It appears that there were at least two kinds or varieties of plants known by the name of aspalathus; for all the authorities cited above clearly make mention of two: one was white, thorny, and inferior; the other had red wood under the bark, and was highly aromatic. The plant was of so thorny a nature that Plato (Republic, p. 616 A. ed. Bekker) says cruel tyrants were punished with it in the lower world.

Gerarde (Herbal, p. 1625) mentions two kinds of aspalathus: aspal albeirus toro citrico, and aspal rubens. "The latter," he says, "is the better of the two; its smell is like that of the rose, whence the name Lignum Rhodenum, rather than from Rhodes, the place where it is said to grow." The Lignum Rhodenum is by some supposed to be the substance indicated by the aspalathus; the plant which yields it is the Convolvulus auratus of Linnaeus. Dr. Royle (CycI. Bibl. Lit. xi. v. c.) is inclined to believe that the bark of a tree of the Himalayan mountains, the Myrica sphydr of Dr. Wallis, is the article indicated; because, in India the term Dharshinum, which by Avicenna and Serapion are used as the Arabic synonym of aspalathus, is applied to the bark of this tree. If the aspalathus of the Apocrypha be identical with the aspalathus of the Greeks, it is clear that the locality for the plant must be sought nearer home, for Theocritus evidently mentions the aspalathus as if it were familiar to the Greek colonists of Sicily or the south of Italy in its growing state. For other attempts to identify the aspalathus see Salmatis, Hyg. Int. cap. lxxvin.; Dr. Royle, in passage referred to above; Sprengel, Hist. Real Herb i. 45, 1831; but in all probability the term has been applied to various plants.

W. H.

**ASPATHA** (Ἀσψάθα): [Alex. F. Φαγαί; Comp. Ἀσφαθάδις] Espathatho, third son of Haman (Esth. ix. 7).

**ASP' THAR, THE POOL** (Ἄσπατος Ασφαθ: [Alex. Λ. Ασφαθ: λακα Ασφαθ]: in the "wilderness of Theoc." By this "pool" Jonathan and Simon Maccaebus encamped at the beginning of their struggle with Bocoelius (I Macc. ix. 33; Joseph. Ant. xiii. 1, § 2). Is it possible that the name is a corruption of Ἀσπατής or Ἀσπατής?

G.

**ASP' THAR' ASUS** (Ἀσφαθάρασ: Machpattowchor), l Esdr. v. 8. [MISPERETIL]

**AS'RIEL** (Ἀσρείλ; [Row of God]: Esreil, I Ερεια [Acts-ερεία]; Alex. Ἐρεία in Jos.: Ashriel, Esriel). The son of Gilead, and great-grandson of Joseph (Num. xvi. 13; Josh. viii. 2). He was the founder of the family of the Ash剧烈ites. The name is wrongly written Ashriel in the A. V. of 1 Chr. vii. 14. According to the rendering of the latter passage by the LXX., Ashriel was the son of Manasseh by his Syrian concubine.

W. A. W.

**AS'RIELITES, THE** (Ἀσρείλίτες; Ἀσρείλίτες) [Acts-ερείλιτας]. Num. xxvi. 31. [ARIJEL]

**ASS.** The five following Hebrew names of the genus Asinus occur in the O. T.: Chamor, Ἀχιθών, Ἀγις, Ἀρίδ, and Ἀρίδιος.

the discovery of the Canary Islands this name was transferred to Convol. scoparius, and afterwards to several American plants. It is called in the Canary Islands Lema NAO, a corruption of Lignum aures, and though now in little request, large quantities of it were formerly exported, and the plant nearly exterminated. The apothecaries used it both as Lignum Rho- dium and as the aspalathus of Dioscorides: it soon however, took the latter name, which was handed over to a wood brought from India, though the original plant was a thorny shrub growing on the shores of the Mediterranean, probably Spartium villosum, according to Sibthorpe (For. Grec. vol. viii. p. 69). "c" so in the Genaran version. This accords with the Hebrew in 2 MSS., and one edition cited by Mi- chaeels. A.
ASS

1. Chzover (אש) in 1 Sam. xvi. 20; ass, "the ass," (her-ass) denotes the male domestic ass, though the word was no doubt used in a general sense to express any ass whether male or female. The ass is frequently mentioned in the Bible; it was used (a) for carrying burdens (1 Sam. 18. 26; Gen. xliii. 16; 2 Sam. 23; 2 Sam. xii. 1; 1 Chr. xii. 40; Neh. xiii. 15; 1 Sam. xxvii. 7) (b) for riding (Gen. xxvii. 11; Ex. iv. 20; Num. xxi. 14; 1 K. viii. 19; Josh. xiv. 18; Judg. i. 14, v. 10, x. 4, xii. 14; 1 Sam. xix. 20; 2 Sam. xii. 23, xix. 26; Zech. ix. 9; Matt. x. 7) (c) for ploughing (Is. xxv. 24, xxxv. 20; Deut. xvii. 11), and perhaps for treading out corn, though there is no clear Scripture allusion to the fact. In Egypt asses were so employed (Wilkinson's Anc. Egypt., iii. 34), and by the Jews, according to Josephus (Cont. Apion, iii. § 7) (d) for grinding at the mill (Matt. viii. 6; Luke xii. 2) — this does not appear in the A. V., but the Greek has μελας ἀνδρέας for "mill-tone"; (e) for (carrying baggage in wars (2 K. vii. 10); and, perhaps from the time of David, (f) for the procuration of mules (Gen. xxxvi. 21; 1 K. iv. 28; Esth. viii. 10, &c.).

It is almost needless to observe that the ass in eastern countries is a very different animal from what he is in western Europe. There the greatest care is taken of the animal, and much attention is paid to cultivate the breed by crossing the finest specimens; the riding on the ass therefore conveys a very different notion from the one which attaches to such a mode of conveyance in our own country. The most noble and honorable amongst the Jews were wont to be mounted on asses; and in this manner our Lord himself rode his triumphant entry into Jerusalem. He came, indeed, "meek and lowly," but it is a mistake to suppose, as many do, that the ass was meekest; according to our English ideas, ought to do with his meekness; although thereby, doubtless, he meant to show the peculiar nature of his kingdom, as horses were used only for war purposes. In illustration of the passage in Judg. v. 10, "Speak ye that ride on white asses," it may be mentioned that Buckingham (Trav., p. 389) tells us that one of the peculiarities of Bagdad is its race of white asses, which are saddled and bridled for the conveyance of passengers. . . . that they are large and spirited, and have an easy and steady pace. Bukhara is also celebrated for its breed of white asses, which are sometimes more than thirteen hands high; they are imported into Peshawar, and fetch from 80 to 100 rupees each.

In Deut. xxi. 10 "swearing with an ox and an ass together" was forbidden by the law of Moses. Michaelis (Comm. on the Laws of Moses, transl. vol. ii. p. 322) believes that this prohibition is to be traced to the economic importance of the ox in the estimation of the Jews; that the coupling together, therefore, so valued an animal as the ox with the inferior ass was a dishonor to the former animal; others, i.e. Clerc for instance, think that this law and merely a symbolical meaning, and that by it we are to understand improper alliances in civil and religious life to be forbidden: he compares 2 Cor. vi. 14, "Be ye not unequally yoked with unbelievers." It is not at all improbable that such a lesson was intended to be conveyed; but we think that the main reason in the prohibition is a physical one, namely, that the ox and the ass could not pull pleasantly together on account of the difference in size and strength; perhaps also this prohibition may have some reference to the law given in Lev. xix. 19.

The expression used in Is. xxx. 24, "The young asses that car the ground," would be more intelligible to modern understandings were it translated thence to till the ground; the verb is from αροι, "I till," or "I plough," being now obsolete (comp. also 1 Sam. viii. 12). [EAR, EATING.]

Although the flesh of the wild ass was deemed a luxury amongst the Persians and Tartars, yet it does not appear that any of the nations of Canaan used the ass for food. The Mosaic law considered it unclean, as "not dividing the hoof and chewing the cud." In extreme cases, however, as in the great famine of Samaria, when "an ass's head was sold for eighty pieces of silver" (2 K. vi. 25), the flesh of the ass was considered nothing. Many commentators on this passage, following the LXX., have understood a measure (αχομης of bread) by the Hebrew word. Dr. Harris says,— "no kind of extremity could compel the Jews to eat any part of this animal for food;" but it must be remembered that in cases of extreme need parents ate their own offspring (2 K. vi. 29; Ez. v. 19). This argument therefore fails to the ground; nor is there sufficient reason for assigning the common acceptance of these passages (1 Sam. xvi. 20, xxv. 18), and for understanding a measure and not the animal. For an example: to illustrate 2 K. i. c. comp. Plutarch, Arist. i. 1023, "An ass's head could hardly be bought for sixty drachmas."[a]

The Jews were accused of worshipping the head of an ass. Josephus (Cont. Apion, ii. § 7) very indignantly blames Apion for having the impudence to pretend that the Jews placed an ass's head of gold on the holy place (1 Macc. iii. 21), and that the grammarians asserted Antiochus Epiphanes discovered when he spoiled the temple. Plutarch (Sympoe., ch. 5) and Tacitus (Hist. v. 3 and 4) seem to have believed in this slander. It would be out of place here to enter further into this question, as it has no Scriptural bearing, but the reader may find much curious matter relating to this subject in Bochart (Hieroz. iii. 299 ff).

2. Αλεύθ (αλέβης); ους, ους, ους θηλεία, ἡμίους, ους θηλεία οὐχαίς; αὖσα, αὖσα, "ass," "she-ass.") There can be no doubt that this name represents the common domestic she-ass, nor do we think there are any grounds for believing that the αὐσις indicates some particular valuable breed which judges and great men only possessed, as Dr. Kittel (Phys. Hist. Polit. p. 381), and Dr. Harris (Nat. Hist. of Bible, art. Ass) have supposed. Αλεύθ in Gen. xiii. 16, xvi. 23 is clearly contrasted with θηλεία. Balaam rode on a she-ass (αὐσις). The asses of Kish which Saul sought were she-asses. The Shumannite (2 K. i. 22, 24) rode on one

[a] The Talmudists say the flesh of the ass causes barrenness in women. But this is a mistaken interpretation of the text (Seder Thum, § 165).

[b] A word of uncertain derivation, usually derived from an unused root. It was "to be slow," or "to walk with
when she went to seek Elisa. They were she-asses which formed the especial care of one of David's officers (1 Chr. xxvii. 30). While on the other hand Abraham (Gen. xxiii. 3, &c.), Achish (Josh. xv. 18), Abigail (1 Sam. xxv. 20), the disobedient prophet (1 K. xiii. 29), rode on a zebnir.

3. 'Ayir (אֲיִיר; pā'ïros, pā'álos νός, óvōs, beús (in Is. xxx. 24): pullus animæ, pullus ovis, ju-mentum, pullus asinæ, "coal," "ass colt," "young ass," "colt"), the name of a young ass, which occurs Gen. xix. 11, xxxii. 13; Jud. x. 4, xii. 14; Job xi. 12; Is. xxx. 6, 24; Zech. ix. 9. In the passages of the books of Judges and Zechariah the 'ayir is spoken of as being old enough for riding upon; in Is. xxx. 6, for carrying burdens; and in ver 24 for tilling the ground. Perhaps the word 'ayir is intended to denote an ass rather older than the age we now understand by the term foal or colt; the derivation "to be spirited" or "impetuous" would then be peculiarly appropriate.

4. Pere (פֶּר; ὡς ἁγράς, ὡς ἐν ἂγρι, ἄγρασ, ὡς ἴματις, ἄγραικος ἄ ρατως: ferus homo, Vulg.; "wild man," A. V., in Gen. xvi. 12; onager, "wild ass"). The name of a species of wild ass mentioned Gen. xvi. 12; Ps. civ. 11; Job vi. 5, vii. 12; xxxiv. 6, 9, 11; Hos. viii. 9; Jer. ii. 12; Is. xxxii. 14. In Gen. xvi. 12, Pere Asinus, a "wild ass man," is applied to Ishmael and his descendants, a character that is well suited to the Arabs at this day. Hosea (viii. 9) compares Israel to a wild ass of the desert, and Job (xxxiv. 5) gives an animated description of this animal, and one which is amply confirmed by both ancient and modern writers.

5. 'Arūd (אֶרָוד; omitted by the LXX. and Vulg., which versions probably supposed 'ārid and pere to be synonymous: "wild ass"). The Hebrew word occurs only in Job xxxiv. 5, "Who hath sent out the pere free, or who hath hossed the bands of the 'ārod?" The Chaldaic plural 'arūd-ayth (אֶרָוד עֵית) occurs in Dar. c. 21. Nebuchadnezzar's "dwelling was with the wild asses." Bochart (Hieroz. ii. 218) and Rosenmüller (Sch. in L. T. i., l. c.); Lee (Comment. on Job l. c.), Gesenius (Thes. s. v.) suppose 'ārid and pere to be identical in meaning. The last-named writer says that pere is the Hebrew, and 'ārid the Arabic; but it is not improbable that the two names stand for different animals.

The subject which relates to the different animals known as wild asses has recently received very valuable elucidation from Mr. Blythe in a paper contributed to the Journal of the Asiatic Society of Bengal (1839), a reprint of which appears in the October No. of The Annals and Magazine of Nat-ural History (1840). This writer enumerates seven species of the division Asinus. In all probability the species known to the ancient Jews are Asinus hémipus, which inhabits the deserts of Syria, Mesopotamia, and the northern parts of Arabia; and Asinus vulpes of N. E. Africa, the true onager or aboriginal wild ass, whence the domesticated breed is sprung; probably also the Asinus wrenii, the Koulun or Ghorkhur, which is found in Central Asia from 48° N. Intitide southward short steps; but Först (Heb. Conco. l. s. v.) demurs strongly to this etymology.

From וּז, ferure.

Syrian Wild Ass. (Asinus Hemipus.) Specimen in Zoological Gardens

[The text continues with descriptions and illustrations of other animals and locations, not fully transcribed here.]

is perhaps only a variety of Asinus onager, inhabits Thibet, Mongolia, and Southern Siberia, countries with which the Jews were not familiar. We may therefore safely conclude that the 'ūthān and pere of the sacred writings stand for the different species now distinguishing under the names of Asinus hémipus, the Assyrian wild ass, Asinus vulpes, the true onager, and perhaps Asinus onager, the Koulun or Ghorkhur of Persia and Western India.

The following quotation from Mr. Blythe's valuable paper is given as illustrative of the Scriptural allusions to wild asses: "To the west of the range of the Ghorkur lies that of Asinus hémipus, or true Hemionus of ancient writers—the particular species apostrophized in the book of Job, and again that noticed by Xenophon. There is a recent account of it by Mr. Layard in Nineveh and its Remains (p. 324). Returning from the Sinher, he was riding through the desert to Tel Afer, and there he mistook a troop of them for a body of horse with the Belonin riders concealed! 'The reader will remember,' he adds, 'that Xenophon mentions these beautiful animals, which he must have seen during his march over these very plains.'

The country," says he, "was a plain throughout,

[The text ends here, indicating the conclusion of the passage.]
as even as the sea, and full of wormwood, if any other kind of shrubs or reeds grew there they had all an aromatic smell, but no trees appeared . . . The asses, when they were pursued, having gained ground on the horses, stood still (for they exceeded them much in speed); and when these came up with them they did the same thing again . . . The flesh of those that were taken was like that of a red deer but more tender" (Jn. 1, § 5). "In fleeciness, continues Mr. Layard, 'they equal the gazelle, and to overtake them is a feat which only one or two of the most celebrated horses have been known to accomplish'" (Jews and Mag. of Nat. Hist. vol. vi. No. 34, p. 234).

The subjoined wood-cut represents some kind of wild ass depicted on monuments at Persepolis. W. H.

Greek correspondent of Gazerah in the text. [Gaxrera.] The Complutensian and Aldine editions of the Sept., with 6 MSS., read 'Asaphemath in the passage referred to for αἰσθημα of the Roman edition. 'Asaphemath is also found in the Sept. in Jer. xxxviii. (Heb. xxxii.) 40 as the representative of the Heb. גַּשָּׁם. A.

Ass'ur. [Assyria.]

Asshurim (חָשִׂירָם: 'Assowrim: Alex 'Așwrm: Assoumim). A tribe descended from Dedan, the grandson of Abraham (Gen. xxv. 3). They have not been identified with any degree of certainty. Knobel considers them the same with the Assur of Ez. xxvii. 23, and connected with southern Arabia. W. A. W.

Assideans (Ἄσσιδαι: [in 1 Mac. vii. Alex. Ασσίδιον, Sin. Ασσίδιον:] Assiadi, i. e. Ἀσσιάδα, the plains, "paritians"; οἱ εἰσαβείς, οἱ ἑσαβείς), the name assumed by a section of the orthodox Jews (1 Mac. ii. 42 [so Comp. Adj. Alex.], alli [Rom. Sin.] Τουδαίων, probably by correction; 1 Mac. vii. 13; 2 Mac. vii. 6), as distinguished from the "lawless" (οἱ αἰσθηματικοί, 1 Mac. iii. 8, vi. 21, vii. 5, &c.), "the howless" (οἱ ἀμαρτόμενοι, 1 Mac. iii. 6, ix. 23, &c.), "the transgressors" (οἱ παράνομοι, 1 Mac. i. 11, &c.), that is, the Hel-

* Assareimoth. This word is given in the margin of the A. V. in 1 Mac. iv. 15 as the

Assos, or Assas (Ἀσσας), a town and seaport of the Roman province of Asia, in the district anciently called Mycia. It was situated on the northern shore of the gulf of Advamytium, and was only about seven miles from the opposite coast of Lesbos, near Methymna (Strab. xiii. p. 618). A road went up the mountains, and the towns were situated in the central parts of the province with Alexandria Troas [Thrace] passed through Assos, the distance between the two latter places being about 20 miles (Itin. Anton.). These geographical points illustrate St. Paul's rapid passage through the town as
mentioned in Acts xx. 13, 14. The ship in which he was to accomplish his voyage from Troas to Caesarea [to Ptolemais, Acts xxi. 7] went round Cape Lectum, while he took the much shorter journey by land. Thus he was able to join the ship without difficulty, and in sufficient time for her to anchor off Mitylene at the close of the day on which Troas had been left.

The chief characteristic of Assyra was that it was singularly Greek. Greeks found there "no trace of the Romans." Leake says that "the whole gives perhaps the most perfect idea of a Greek city that anywhere exists." The remains are numerous and remarkably well preserved, partly because many of the buildings were of granite. The citadel, above the theatre, commands a glorious view, and must itself have been a noble object from the sea. The Street of Tombs, leading to the Great Gate, is one of the most remarkable features of Assyra. Illustrations of the ancient city will be found in Texier, Charts, Fellows, and Choiseul-Gouffier. It is now utterly desolate. Two monographs on the subject are mentioned by Winer; Quandt, De Assyria Region. 1710; Annall, De Assyria, Upsal. 1758.

It is now a matter of curiosity to refer to the interpretation which used to be given to the words ἀσσυρία παρεληγοτός, in Acts xxvii. 13. In the Vulgate they were rendered "cum sustulissent de Assyra," and they were supposed to point to a city of this name in Crete. Such a place is actually inserted by Pader Georgi, in the map which accompanies his Praxis Navigantium (Venet. 1730), p. 181. The true sense of the passage was first given by Beza. J. S. H

ASSYRIA

ASSUE RUS (Ἀσσύριος [Alex. Ασσούρ: Comp. Abd. Ασσούριος: Assuerus]), Tob. xiv. 15. [AHA SUE RUS.]

ASSUR (Ἀσσūρ: Ἀσσούρ: [Assur]). 1. Est. iv. 2; Ps. lxxiiii. 8; 2 Esdr. ii. 8; Jud. ii. 14; v. 1; vi. 1, 17; vii. 20, 24; xiii. 15; xiv. 3; xv. 6; xvi. 4. [Assur: ASSYRIA.]

ASSYRIA, ASSHUR (Ἀσσυρία, Ἀσσούρία: [Assur]). Jos. Ἀσσυρία: Assur, was a great and powerful country lying on the Tigris (Gen. ii. 14), the capital of which was Nineveh (Gen. x. 11, &c.). It derived its name apparently from Assur, the son of Shem (Gen. x. 22 [1 Chr. i. 17]), who in later times was worshipped as their chief god by the Assyrians. [Assur occurs also Gen. x. 11 (probably): Num. xxiv. 22, 24; Ez. xxvii. 23, xxviii. 22; Hos. xiv. 3, as the name of the country or people.] The boundaries of Assyria differed greatly at different periods. Probably in the earliest times it was confined to a small tract of low country between the Gibeon Mirkibm and the Lesser Zab, or Zib Assy'l, lying chiefly on the left bank of the Tigris. Gradually its limits were extended, until it came to be regarded as comprising the whole region between the Armenian mountains (lat. 37° 30') upon the north, and upon the south the country about Buhgdan (lat. 35° 30'). Eastward its boundary was the high range of Zagros, or mountains of Kurdistân; westward, it was, according to the views of some, bounded by the Mesopotamian desert, while, according to others, it reached the Euphrates. Taking the greatest of these dimensions, Assyria may be said to have extended in a direction from N. E. to S. W. a distance of nearly 500 miles, with a width varying from 350 to 100 miles. Its area would thus a little exceed 100,000 square miles, or about equal that of Italy.

1. General character of the country. — The country within these limits is of a varied character. On the north and east the high mountain-chains of Armenia and Kurdistân are succeeded by low ranges of limestone hills of a somewhat arid aspect, which detach themselves from the principal ridges, running parallel to them, and occasionally inclosing, between their northern or northeastern flank and the main mountain-line, rich plains and fertile valleys. To these ridges there succeeds at first an
ASSYRIA

and undulating zone of country, well watered and fairly productive, which finally sinks down with some suddenness upon the great Mesopotamian plain, the modern district of Elam-Shirz, This vast plain, which extends in length for 250 miles from the latitude of Mardin (37° 21') to that of Tukrit (34° 34'), and which, in places, of nearly equal width, is interrupted only by a single limestone range — a narrow ridge rising abruptly out of the plain; which, splitting off from Zagros in lat. 33° 50', may be traced under the names of Susiana, Haman, and Sippar, from here in Persianistan nearly to Rind, where the Euphrates. Some parts of the plain the Sippar is a beautiful object. Its limestone rocks, wooded here and there with dwarf oak, are of a rich golden color; and the numerous ravines which narrow its sides form ribs of deep purple shadow" (Layard, Niniveh and Babylon, p. 266), Above and below this barrier, stretching southward and westward further than the eye can reach, and extending northward and eastward 70 or 80 miles to the hill-country before mentioned, is an immense level tract, now for the most part a wilderness, scantily watered on the right bank of the Tigris, but abundantly supplied on the left, which bears marks of having been in early times throughout well cultivated and thickly peopled. This plain is not arid, and most parts of it are even considerably raised above the level of the rivers. It is covered in spring time with the richest vegetation, presenting to the eye a carpet of flowers, varying in hue from day to day; but as the summer advances it is parched up, and gradually changes to an arid and yellow waste, except along the courses of the rivers. All over this vast tract, on both sides of the Tigris, rise "grass-covered heaps, marking the site of ancient habitations" (Layard, p. 245). Mr. Layard counted from one spot nearly a hundred (Niniveh and its Remains, i. 315); from another, above 200 of these lofty mounds (Nin. and Babel, p. 245). Those which have been examined have been uniformly found to present appearances distinctly connecting them with the remains of Nineveh. [Niniveh.] It may therefore be regarded as certain that they belong to the time of Assyrian greatness, and thus they will serve to mark the extent of the real Assyrian dominion. They are numerous on the left bank of the Tigris from Rind to the Diyarah, and on the right, they thicken still the entire country both north and south of the Sinjar range, extending eastward beyond the Khozeh (Layard, chs. xii.-xiv.), northward to Mardin, and southward to the vicinity of Baghdad.

2. Provinces of Assyria.—Assyria in Scripture's commonly spoken of in its entirety, and unless the Huzbeh (2 Ki. 24:7) of Nahum (vi. 7) is an equivalent for the Adiabene of the geographers, no name of a district can be said to be mentioned. The classical geographers, on the contrary, divided Assyria into a number of regions—Strabo (xvi. § 1 and § 4) into Mari, Arbelaith, Aractae, Apolloniatis, Chabatea, Dumaena, Calahena, Adiabena, Messopotamia, &c.; Ptolemy (vi. 1) into Aporennithia, Adiabene, the same country, Apolloniatis, Arbelaith, the country of the Sandabas, Calahena, and Sittacena. These regions appear to be chiefly named from cities, as Arbelaith from Arba; Calahena (or Calache) from Calah or Calah, Gen. x. 11; 2 K. xiv. 6; Apolloniatis from Apol-

over, the richest region of all, derived its appellation from the Zab (Dair) rivers on which it lay, as Asshurian Marcellinus informs us (xxiii. 20). Ptolemy (vii. 18) makes Mesopotamia (which he understood literally as the whole country between the Euphrates and the Tigris) distinct from Assyria, just as the sacred writers distinguish .self from Saba.

3. Chief Cities.—The chief cities of Assyria in the time of its greatness appear to have been the following: Nineveh, which is marked by the mounds opposite Mosul (Nabhi-Yamma and Rawandiz); Calah or Calah, now Niniveh; Ashur, now Khbarbet-Sagur; Sagarra or Dur-Sagurra, now Khawshelita; Arbela, still Arbel; Opel, at the junction of the Diyarah with the Tigris; and Sittacena, a little further down the latter river, if this place should not rather be reckoned to Babylonia.

4. Nations bordering on Assyria.—Towards the north Assyria bordered on the strong and mountainous region of Armenia, which may have been at times under Assyrian dominion, but was never reckoned a part of the country (iii. 14; xii. 37.) Towards the east her neighbors were originally a multitude of independent tribes, scattered along the Zab rivers, who have their fitting representatives in the modern Kurds and Lurs — the real sovereigns of that mountain-range. Beyond these tribes lay Media, which ultimately selected the mountaineers, and was thereby brought into direct contact with Assyria in this quarter. On the south, Sogdiana was the recognized state east of the Tigris, while Babylonia occupied the same position between the rivers. West of the Euphrates was Arabia, and higher up Syria, and the country of the Hittites, which last reached from the neighborhood of Damascus to Anti-Taurus and Amanus.

5. History of Assyria—original population.—On the subject of the original peopling and early condition of Assyria we have more information than is generally possessed with regard to the first beginnings of nations. Scripture informs us that Assyria was peopled from Calah (Gen. x. 11), and both classical tradition and the monuments of the country agree in this representation. In Herodotus i. 7, Ninus, the mythic founder of Nineveh, is the son (descendant) of Belus, the mythic founder of Babylon — a tradition in which the derivation of Assyria from Babylon, and the greater antiquity and superior position of the latter in early times are shadowed forth sufficiently. That Teshish (ap. Dion- Sic. ii. 7) inverts the relation, making Semiramis (according to him, the wife and successor of Ninus) found Babylon, is one out of ten thousand proof of the untrustworthy character of his history. The researches recently carried on in the two countries clearly show, not merely by the statements which are said to have been deciphered on the historical monuments, but by the whole character of the remains discovered, that Babylonian and civilization was older than Assyrian, and that while the former was of native growth, the latter was derived from the neighboring country. The cuneiform writing, for instance, which is rapidly punched with a very simple instrument upon moist clay, but is only with much labor and trouble inscribed by the chisel upon rock, must
have been invented in a country where men "had brick for stone." (Gen. xi. 3), and have thence passed to one where the material was unsuited for it. It may be observed also, that while writing occurs in a very rude form in the earlier Babylonian ruins (Loth. Ch. il. p. 169), and gradually improves in the later ones, it is in Assyria uniformly of an advanced type, having apparently been introduced there after it had attained to perfection.

6. Date of the foundation of the kingdom.——With respect to the exact date at which Assyria became a great independent power, there is an important difference between classical authorities.

Herodotus and Ctesias were widely at variance on this point, the latter placing the commencement of the empire almost a thousand years before the former! Scripture itself, that little, however, is in favor of the earlier author. Geographically—as a country—Assyria was evidently known to Moses (Gen. ii. 14, xxiv. 18; Num. xxiv. 24); but it does not appear in Jewish history as a kingdom till the reign of Menahem (ab. c. 770). In Abraham's time (b. c. 1900?) it is almost certain that there can have been no Assyrian kingdom, or its monarch would have been found among those who invaded Palestine with Chedorlaomer (Gen. xiv. 1). In the time of the early Judges (b. c. 1400?) Assyria, if it existed, can have been of no great strength: for Chushan-Rishathaim, the first of the foreigners who oppressed Israel (Judg. iii. 8), is master of the whole country between the rivers (Aram-Naharaim = "Syria between the rivers"). These facts militate strongly against the views of Ctesias, whose numbers produce for the founding of the empire the date of b. c. 2182 (Clinton. F. H. i. 253). The more modest account of Herodotus is at once more probable in itself, more agreeable to Scripture; and more in accordance with the native writer Berosus. Herodotus relates that the Assyrians were "lords of Asia" for 522 years, when their empire was partially broken up by a revolt of the subject-nations (i. 95). After a period of anarchy, the length of which he does not estimate, the Median kingdom was formed, 179 years before the death of Cyrus, or b. c. 708. He would thus, it appears, have assigned to the foundation of the Assyrian empire a date not very greatly anterior to b. c. 1525.

Berosus, who made the empire last 522 years to the reign of Pul (ap. Euseb. Chron. Can. i. 4), must have agreed nearly with this view; at least he would certainly have placed the rise of the kingdom within the 13th century. This is, perhaps, the utmost that can be determined with any approach to certainty. If, for convenience' sake, a more exact date be desired, the conjecture of Dr. Brandis has some claim to be adopted, which fixes the year n. c. 1273 as that from which the 522 years of Berosus are to be reckoned (Beros. Assyri. Temporum Emendat. p. 17).

7. Early kings, from the foundation of the kingdom to Pul.——The long list of Assyrian kings, which has come down to us in two or three forms, only slightly varied (Clint. F. H. ii. 257), and which is almost certainly derived from Ctesias, must of necessity be discarded, together with his date for the kingdom. It could be made use of absurdly, and severe marks besides of internal fraud, being composed of names snatched from all quarters, Arrian, Semitic, and Greek,—names of gods names of towns, names of rivers,—and in its estimate of time presenting the impossible average of 34 or 35 years to a reign, and the very improbable phenomenon of trigus in half the instances, amounting exactly to a decimal number. Unfortunately we have no authentic list to substitute for the forgery of Ctesias. Berosus spoke of 45 kings as reigning during his period of 522 years, and mentioned all their names (Euseb. l. s. c.) but they have luckily not been preserved to us. The work of Herodotus on Assyrian history Herod. i. 166 and 184) has likewise entirely perished; and it is whether Oriental sources, or the impression on their supply the loss, which has hitherto proved irreparable. Recently the researches in Mesopotamia have done something towards filling up this sad gap in our knowledge; but the reading of names is still so doubtful that it seems best, in the present condition of cuneiform inquiry, to treat the early period of Assyrian history in a very general way, only mentioning kings by name when, through the sacrifice of identification, a cuneiform royal designation with the numerous symbols, known to us from sacred or profane sources, firm ground has been reached, and serious error rendered almost impossible.

The Mesopotamian researches have rendered it apparent that the original seat of government was not at Nineveh. The oldest Assyrian remains have been found at Kîlich-Sherghat, on the right bank of the Tigris, 90 miles south of the later capital, and this place the monuments show to have been the residence of the earliest kings, as well as of the Babylonian governors who previously exercised authority over the country. The ancient name of the town appears to have been identical with that of the country, namely, *babatu*. It was built of brick, and has yielded but a very small number of sculptures. The kings proved to have reigned there are fourteen in number, divisible into three groups; and their reigns are thought to have covered a space of nearly 550 years, from n. c. 1273 to i. c. 794. The most remarkable monarch of the series was called Tiglath-Pileser. He appears to have been king towards the close of the twelfth century, and thus to have been contemporary with Samuel. He overran the whole country between Assyria Proper and the Euphrates; swept the valley of the Euphrates from south to north, from the borders of Babylon to Mount Taurus; crossed the Euphrates, and continued in northern Syria with the Hittite-invasion Aramaea and Cappadocia; and claims to have subdued forty-two countries "from the channel of the Lower Zab (Zob Apal) to the Upper Sea of the Setting Sun." All this he accomplished in the first five years of his reign. At a later date he appears to have suffered defeat at the hands of the king of Babylon, who had invaded his territory and succeeded in carrying off to Babylon various idols from the Assyrian temples.

The other monarchs of the Kîlich-Sherghat series, both before and after Tiglath-Pileser, are comparatively insignificant. The later kings of the series are only known to us as the ancestors of the two great monarchs, Sardanapalus the first, and his son Shalmaneser or Shalmanbar, who were among the most warlike of the Assyrian princes. Sardanapalus the first, who appears to have been the warlike Sardanapalus of the Greeks (SUADD. s. c. cap. Herod. i. 188), transforms the cuneiform legend from Kîlich-Sherghat to Nineveh (probably the Scriptural Cal'dah, where he built the first of those magnificent palaces which have recently been
ASSYRIA

exhumed by our countrymen. A great portion of the Assyrian sculptures now in the British Museum are derived from this edifice. A description of the building has been given by Mr. Layard (Vind. and its Remains, 251, 361). It has been repeated more than a hundred times upon its sculptures, we learn that Sardanapalus carried his arms far and wide through Western Asia, warring on the one hand in Lower Babylonia and Chaldea, on the other in Syria and upon the coast of the Mediterranean. His son, Shalmaneser or Shalmanuahr, the monarch who set up the Black Obelisk, now in the British Museum, to commemorate his victories, was still a greater conqueror. He appears to have overrun Armenia, Assyria, great portions of Media Magna, the Kurlish mountains, Babylonia, Mesopotamia, Syria, and Phinecia; everywhere making the kings of the countries tributary to him. If we may trust the reading of certain names, on which concomput scholars appear to be entirely agreed, he came in contact with various scriptural personages, being opposed in his Syrian wars by Benhadad and Hazael, kings of Pal¬
natium, and taking tribute from Jeho, king of Israel. His son and grandson followed in his steps, but scarcely equalled his glory. The latter is thought to have been identical with the Biblical Pulp, Phul, or Pheloch (PUL), who is the first of the Assyrian kings of whom we have mention in Scripture.

8. The Kings from PUL to ISCHIAHOD. — The succession of the Assyrian kings from PUL almost to the close of the empire is rendered tolerable cer¬
tain, not merely by the inscriptions, but also by the Jewish records. In the 23 book of Kings we find the names of PUL, Tights-Pileser, Shalmaneser, Senna¬
cherib, and Esarhaddon, following one another in rapid succession (2 K. xx. 19 and 29, xvi. 3, xviii. 13, xix. 37); and in Isaiah we have the name of “Sargon, king of Assyria” (xx. i), who is a contemporary of the prophet, and who must evi¬
dently therefore belong to the same series. The inscriptions, by showing us that Sargon was the father of Sennacherib, fix his place in the list, and give us for the monarchs of the last half of the 8th and the first half of the 7th century B.C. the (probably) complete list of Tights-Pileser II., Shal¬
maneser III., Sargon, Sennaacherib, and Esarhaddon. It is not intended in this place to enter into any detailed account of the actions of these kings, which will be more properly related in the articles especially devoted to them. (PUL, SHALMANESER, SAR¬
GEN, ISCHIAHOD). A few remarks, however, will be made on the general condition of the empire at this period.

9. Establishment of the Lower Dynasty. — It seems to be certain that at, or near, the accession of PUL, a great change of some kind or other oc¬
curred in Assyria. Pinosus is said to have brought his grand dynasty of 45 kings in 326 years to a close at the reign of PUL (Pihlist. ap. Esch. i. 42), and to have made him the last king of a new series. By the synchronism of Menahem (2 K. xv. 19), the date of PUL may be determined to about B.C. 779. It was only 23 years later, as we find by the Canon of Ptolemy, that the Babylonians considered their independence to have com¬
men (1 c. 747). Herodotus probably intended c. 345 B.c. nearly to this same era the great commis¬
tion which (according to him) broke up the As¬
Syrian monarchies of that nation. These kings, which were formed the Median and other kingdoms. These traditions may none of them be altogether

certain; their coincidence is at least re markable, and seems to show that about the middle of the eighth century B.C. there must have been a break in the line of Assyrian kings,—a revolution, a foreign dynasty,—and a consequent weakening of the empire, which united the con¬
quered nations with their conquerors.

It was related by Bion and Polychistor (Agathias, ii. 25), that the original dynasty of Assyrian kings was ended with a certain Belechus or Beldeus, who was succeeded by a usurper (called by them Belcates or Balatorus), in whose family the crown continued until the destruction of Nineveh. The general character of the circumstances narrated, combined with a certain degree of resemblance in the names, for Belechus is close upon Puloch, and Belethas may represent the second element in Tights-Pileser (who in the inscriptions is called Tights-Pital¬
seri), — induce a suspicion that probably the PUL or Puloch of Scripture was really the last king of the old monarchy, and that Tights-Pileser II., his successor, was the founder of what has been called the “Lower Empire.” It may be suspected that Tights-Pileser and his grandson, the two kings, whose names are found in Scripture, the former by Phechius, the later by Polychistor, who repeated it, has been misreported by the former. The synchronism between the revolution in Assyria and the era of Babylonian independence is thus brought almost to exactness, for Tights¬
Pileser is known to have been upon the throne about B.C. 740 (Flelton. E. H. i. 278), and may well have ascended it in B.C. 747.

10. Supposed loss of the empire at this period. — Many writers of report — amongst them Clinton and Niebuhr — have been inclined to accept the state¬
ment of Herodotus with respect to the breaking up of the whole empire at this period. It is evident, however, both from Scripture and from the monuments, that the shock sustained through the dom¬
estic revolution has been greatly exaggerated. Niebuhr himself observes (Vorg.Bl.ter altere Ge¬
schichte, i. 38) that after the revolution Assyria soon recovered itself, and displayed the most extraordinary energy. It is plain from Scripture, that in the reigns of Tights-Pileser, Shalmaneser, Sargon, Sennaacherib, and Esarhaddon, Assyria was as great as at any former era. These kings all warred successfully in Palestine and its neighbor¬
hood; some attacked Egypt (Is. xx. 4); one appears as master of Media (2 K. xvii. 6); while another has authority over Lydia, Susiana, and Olymades (2 K. xvm. 21; Ezr. iv. 9). So far from our ob¬
serving symptoms of weakness and curtailed domi¬
non, it is clear that at no time were the Assyrian arms pushed further, or their efforts more sustained and vigorous. The Assyrian annals for the period are in the most complete accordance with those representations. They exhibit to us the above mentioned monarchs as extending their dominions further than any of their predecessors. The empire is continually rising under them, and reaches its culminating point in the reign of Esarhaddon. One of the statements of the inscriptions on these subjects are fully borne out by the indications of greatness to be traced in the architectural monuments. No palace of the old monarchy equalled, either in size or splendor, that of Sennaacherib at Nineveh. No series of kings belonging to it left buildings at all to be compared with those which were erected by Sargon, his son, and his grandson. The nobility and Khorehod belong entirely to these later kings, while those at Nineveh and the latter part of their time were of the same division.
ASSYRIA

predecessors. It is further noticeable that the writers who may be presumed to have drawn from Berosus, as Polyhistor and Abdyenus, particularly exploited upon the stories of these other kings. Polyhistor said (ap. Enesb. i. 5) that Sennacherib conquered Babylon, defeated a Greek army in Cilicia, and built there Tarsus, the capital. Abdyenus related the same facts, except that he substituted for the Greek army of Polyhistor a Greek fleet: and added, that Esarhaddon (his Axerdis) conquered lower Syria and Egypt (Ibid. i. 9). Similarly Menander, the Syrian historian, assigned to Shalmanesar an expedition to Cyprus (ap. Joseph. Ant. Jud. x. 14), and Herodotus himself admitted that Sennacherib invaded Egypt (ii. 141). On every ground it seems necessary to conclude that the second Assyrian kingdom was really greater and more glorious than the first; that under it the limits of the empire reached their fullest extent, and the internal prosperity was at the highest.

The statement of Herodotus is not, however, without a basis of truth. It is certain that Babylon, about the time of Sennacherib's accession, ventured upon a revolt, which she seems afterwards to have reckoned the commencement of her independence [ BABYLON]. The knowledge of this fact may have led Herodotus into his error, for he would naturally suppose that when Babylon became free there was a general dissolution of the empire. It has been shown that this is far from the truth; and it may further be observed that, even as regards Babylon, the Assyrian loss was not permanent. Sargon, Sennacherib, and Esarhaddon all exercised full authority over that country, which appears to have been still an Assyrian fief at the close of the kingdom.

11. Successors of Esarhaddon. — By the end of the reign of Esarhaddon the triumph of the Assyrian arms had been so complete that scarcely an enemy was left who could cause her serious anxiety. The kingdoms of Hanath, of Damascus, and of Samaria had been successively absorbed; Phoenicia had been conquered; Judaea had been made a foedatory; Philistia and Idumea had been subjected, Egypt chastised, Babylon recovered, cities planted in Media. Unless in Armenia and Susiana there was no foe left to chastise, and the consequence appears to have been that a time of profound peace succeeded to the long and bloody wars of Sargon and his immediate successors. In Scripture it is remarkable that we hear nothing of Assyria after the reign of Esarhaddon, and profane history is equally silent until the attacks begin which brought about her downfall. The monuments show that the son of Esarhaddon, who was called Sardanapalus by Berosus (ap. Enesb. i. 9), made scarcely any military expeditions, but occupied almost his whole time in the enjoyment of the pleasures of the chase. Instead of adorning his residence — as his predecessors had been accustomed to do — with a record and representation of his conquests, Sardanapalus II. covered the walls of his palace at Nineveh with sculptures exhibiting his skill and prowess as a hunter. No doubt the military spirit rapidly decayed under such a ruler, and the advent of fresh enemies, synchronizing with this decline, produced the ruin of a power which had for six centuries been dominant in Western Asia.

12. Fall of Assyria. — The fall of Assyria, long previously prophesied by Isaiah (x. 5—19), was effected (humanly speaking) by the growing strength and boldness of the Medes. If we may trust Herodotus, the first Median attack on Nineveh took place about the year n. c. 643. By what circum- stances this people, who had so long been engaged with the Assyrians, and had hitherto shown themselves so utterly unable to resist them, became suddenly strong enough to assume an aggressive attitude, and to force the Ninevites to submit to a siege, can only be conjectured. Whether mere natural increase, or whether fresh immigrations from the east, had raised the Median nation at this time so far above its former condition, it is impossible to determine. We can only say that, soon after the middle of the seventh century they began to press upon the Assyrians, and that, gradually increasing in strength, they proceeded, about the year n. c. 633, to attempt the conquest of the country. For some time their efforts were unsuccessful; but after a while, having won over the Babylonians to their side, they became superior to the Assyrians in the field, and about n. c. 625, or a little earlier, bid final siege to the capital [MITIAE]. Sardus, the last king, — probably the grandson of Shalmanesar — made a stout and prolonged defense, but at length, finding resistance vain, he collected his wives and his treasures in his palace, and with his own hand setting fire to the building, perished in the flames. This account is given in brief by Abdyenus, who probably follows Berosus; and its outline so far agrees with Jeros (ap. Dio.d. ii. 27) as to give an important value to that writer's details of the siege. [NINEVEH.] In the general fact that Assyria was overcome, and Nineveh captured and destroyed, by a combined attack of Medes and Babylonians, Josephus (Ant. Jud. x. 5) and the book of Tobit (xiv. 15) are agreed. Polyhistor also implies it (ap. Enesb. i. 5); and these authorities must be regarded as outweighing the silence of Herodotus, who mentions only the Medes in connection with the capture (i. 106), and says nothing of the Babylonians.

13. Fulfilment of prophecy. — The prophesies of Nahum and Zephaniah (ii. 13—15) against Assyria were probably delivered shortly before the catastrophe. The date of Nahum is very doubtful [NAHUM], but it is not unlikely that he wrote about n. c. 645, towards the close of the reign of Manasseh. Zephaniah is even later, since he prophesied under Josiah, who reigned from n. c. 639 to 609. If n. c. 625 be the date of the destruction of Nineveh, we may place Zephaniah's prophecy about n. c. 630. Esr, writing about n. c. 584, bears witness historically to the complete destruction which had come upon the Assyrians, using the example as a warning to Phraor-Hophra and the Egyptians (ch. xxxi.).

It was declared by Nahum emphatically, at the close of his prophecy, that there should be "no healing of Assyria's bruise" (iii. 19). In accordance with this announcement we find that Assyria never rose again to any importance, nor even succeeded in maintaining a distinct nationality. Once only was she attempted; and then in conjunction with Armenia and Media, the latter heading the rebellion. This attempt took place about 250 years after the Median conquest, during the troubles which followed upon the accession of Darius Hystaspis. It failed signally, and appears never to have been repeated. The Assyrians remaining thenceforth submissive subjects of the Persian empire. They were reckoned in the same state with Babylon (Herod. iii. 92; comp. i. 192), and paid an annual tribute of a thousand talents of silver.
the Persian armies, which were drawn in great part from the subject nations, they appear never to have been held of much account, though they fought, in common with the other levies, Thermopylae, at Thermopylae, at Issus, and at Arbela.

14. General character of the empire. — In considering the general character of the Assyrian empire, it is, in the first place, to be noticed, that like all the early monarchies which attained to any great extent, it was composed of a number of separate kingdoms. In the East, conquest has scarcely ever been followed by amalgamation, and in the primitive empire there was not even an attempt at that governmental centralization which we find at a later period in the satrapal system of Persia. As Solomon reigned over all the kingdoms from the river (Euphrates) unto the land of the Philistines and the border of Egypt, so the Assyrian monarchs bore sway over a number of petty kings — the native rulers of the several countries — through the entire extent of their dominions. These native princes, the sole governors of their own kingdoms — were feudatories of the Great Monarch, of whom they held their crown by the double tenure of homage and tribute. Monachen (2 K. xv. 19), Hoshea (ibid. xiii. 4), Ahaz (ibid. xvi. 8), Hezekiah (ibid. xviii. 14), and Manasseh (2 Chr. xxxiii. 11-15), were certainly in this position, as were many native kings of Babylon, both prior and subsequent to Nabonassar; and this system (if we may trust the inscriptions) was universal throughout the empire. It naturally involved the frequent recurrence of troubles. Princes circumstance as were the Assyrian feudatories would be always looking for an occasion when they might revolt and reestablish their independence. The offer of a foreign alliance would be a bait which they could scarcely resist, and hence the continual warnings given to the Jews to beware of trusting in Egypt. Apart from this, the occurrence of any imperial misfortune or difficulty, such for instance as a disastrous expedition, a formidable attack, or a sudden death, natural or violent, of the reigning monarch, there would be a strong temptation to throw off the yoke, which would lead, almost of necessity, to a rebellion. The history of the kings of Israel and Judah sufficiently illustrates the tendency in question, which required to be met by checks and remedies of the severest character. The deposition of the rebel princes, the wasting of his country, the plunder of his capital, a considerable increase in the amount of the tribute thenceforth required, were the usual consequences of an unsuccessful revolt; to which were added, upon occasion, still more stringent measures, as the wholesale execution of those chiefly concerned in the attempt, or the transplantation of the rebel nation to a distant locality. The captivity of Israel is only an instance of a practice long previously known to the Assyrians, and by them handed on to the Babylonian and Persian governments.

It is not quite certain how far Assyria required a religious conformity from the subject people. Her religion was a gross and complex polytheism, comprising the worship of thirteen principal and numerous minor divinities, at the head of the whole of whom stood the chief god, Ashur, who seems to be the deified patriarch of the nation (Gen. x. 22). This god was supposed to state the affairs of the countries over which the Assyrians established their supremacy, they set up "the laws of Ashur," and "rules to the Great Gods." It was probably in connection with this Assyrian requirement that Ahaz, on his return from Damascus, where he had made his submission to Tachti-Pileser, incurred the guilt of idolatry (2 K. xvii. 10-12). The history of Hezekiah would seem, however, to show that the rule, if resisted, was not rigidly enforced; for it cannot be supposed that he would have consented to re-establish the idolatry which he had removed, yet he certainly came to terms with Sennacherib, and resumed his position of tributary (2 K. xxi. 14). In any case it must be understood that the worship which the conquerors introduced was not usually adopted by the subject races, but was only required to be superadded as a mark and badge of submission.

15. Its extent. — With regard to the extent of the empire very exaggerated views have been entertained by many writers. Ctesias took Semiramis to India, and made the empire of Assyria at least co-extensive with that of Persia in his own day. This false notion has long been exploded, but even Niebuhr appears to have believed in the extension of Assyrian influence over Asia Minor, in the expedition of Menon — whom he considered an Assyrian — to Troy, and in the derivation of the Lydian Heracleids from the first dynasty of Ninevite monarchs (Alt. Geschicht. i. 28-9). The information derived from the native monuments tends to contract the empire within more reasonable bounds, and to give it only the expansion which is indicated for it in Scripture. On the west, the Mediterranean and the river Euphrates appear to have been the boundaries; on the north, a fluctuating line, never reaching the Euxine nor extending beyond the northern frontier of Armenia; on the east, the Caspian Sea and the Great Salt Desert; on the south, the Persian Gulf and the desert of Arabia. The countries included within these limits are the following: Susiana, Cilicia, Babylonia, Media, Media, Armenia, Assyria Proper, Mesopotamia, parts of Cappadoce and Cilicia, Syria, Phœnicia, Palæstine, and Iudæa. Syria was also for a while a dependency of the Assyrian kings, and they may perhaps have held at one time certain portions of Lower Egypt. Lydia, however, Irygia, Lycia, Pamphylia, Pontus, Heria, on the west and north, Baetica, Scaea, Parthia, India, — even Carmania and Persia Proper, — upon the east, were altogether beyond the limit of the Assyrian sway, and appear at one time even to have been overrun by the Assyrian armies.

16. Civilization of the Assyro-Babylonians. — The civilization of the Assyro-Babylonians, as has been already observed, was derived originally from the Babylonians. They were a Semitic race, originally resident in Babylonia (which at that time was unsettled), and this acquainted with the Babylonian inventions and discoveries, who ascended the valley of the Tigris and established in the tract immediately below the Armenian mountains a separate and distinct nationality. Their modes of writing and building, the form and size of their bricks, their architectural ornamentation, their religion and worship, in a great measure, were drawn from Babylon, which they always regarded as a sacred land — the original seat of their nation, and the true home of all their gods, with the one exception of Assur. Still, as their civilization developed, it became distinctly peculiar. Their art is of home growth. The alabaster quarries in their neighborhood supplied them with a material unknown to their southern neighbors, on which they could represent
ASSYRIA

As Assyrians (Assyr.) and Assyrians (Asyrii). The inhabitants of Assyria. The name in Hebrew is simply Assur, the same as that of the country, and there appears to be no reason in most cases for translating it as a gentilic (Is. x. 24, xiv. 25, xxvi. 8; Is. xvi. 29; Jud. xii. 13, &c.).

ASTAROTH (Ἀσταρόθ; Assur, the god of the Assyrians), Deut. i. 4. [ASHTAROTH.]

ASTARTE (Ἀσταρτή). [ASHTORETH.]

ASTATH (Ἀστάθ; Assur). 1 Esdr. viii. 38. [AZGAD.]

ASTROLOGER. [DIVINATION; MAGI; STAR.]

ASTRONOMY. [MAGI; STAR OF THE WISE MEN.]

ASTY'AGES (Ἄστυαγος; Herod. Ἀστυάγας, Ctes. Ἀστύαγας), the last king of the Medes, B. C. 595-561, or B. C. 592-588, who was conquered by Cyrus (Id. and Dragon, 1). The name is identified by Rawlinson and Niebuhr (Gesch Assur's, p. 52) with Deioces = Ashshakhaš (Arw.) Aja Duškaš (Pers., " king of Media"; the name of the Median power. [DAIUS THE M:D:AR CYRUS.] B. F. W.

ASUPPIM, and HOUSE OF (יִשְׁפָּה יִשְׁפָּה or יִשְׁפָּה יִשְׁפָּה). [Vat. Εσφά, 6 Εσφά: Alex. Ἀσφάς, Εσφά: in qui parte dominus erat seniorum concilium, ubi erat concilium, 1 Chr. xxvi. 15, 17, literally "house of the gatherings." Some understand it as a proper name of chambers on the south side of the Temple. Geemenius and Bertheau explain it of certain storerooms, and Furst, following the Vulgate, of the council-chambers in the outer court of the Temple in which the elders held their deliberations. The same word in A. V. of Neh. xii. 29, is rendered "thresholds," and is translated "tents" in the Targum of R. Joseph. W. A. W.

ASYNCRITUS (Ἀσυνκρίτος) [incomparable, unlike]; Asyncrius), a Christian at Rome, saluted by St. Paul (Rom. xvii. 14).

ATAD. THE THRESHING-FLOOR OF (אֶתַדְת). = the floor (or threshing-floor) of the thorn. Sam. Vers. אֶתַדְת = Saad. אֶתַדְת.
ATARAH

(ATARATHES, Alex. ATAROTH, etc.)

There was a temple of Atarathes (ATARATHES), Alex. A. தரசீ, — 2 Mac. xii. 26) at Karnaim (Karaim, 1 Mac. v. 43; i.e. Ashdard-Karnaim which was destroyed by Judas Maccabaeus (1 Mac. v. 44).

The name is rightly derived by Michaelis (Lex Syr. pp. 975 ff.) from Syr. dartego, an opening (through, he opened). Comp. Movers, Phoni, i. 594 f. Others have deduced it, with little probability, from άτισίος, greatness of fortune (?), or άτισίος, great fish. Gesenius (Thee. s. v. άτισίος) suggests Syr. darzego = dagga, a fish. It has been supposed that Atarathes was the tutelary goddess of the first Assyrian dynasty (Diodor.; fr. Peretto: Nicolaus, Gesenius, s. p. 131, 138), and that the name appears in Tigr- and Tilghath-Pileser (ol. p. 57).

ATAROTH (INΓατώρη, and once ινΓατώρη = εύτορη: Αταρόθ: Ataroth), the name of several places in Palestine both on the E. and W. of Jordan.

1. [Alex. Ataroth in Num. xxxii. 3.] One of the towns in the "land of Jazer and land of Gilead" (Num. xxxii. 3), taken and "built" by the tribe of Gad (xxxii. 44). From its mention with places which have been identified on the N. E. of the Dead Sea near the mountain of Jebel Ataroth (عين خورس), a connection has been assumed between Ataroth and that mountain. But Jebel Ataroth lies considerably to the S. of Heshbon (Hoshea), which was in the tribe of Reuben, and which is named apparently as the southernmost limit of Gad (Josh. xiii. 24), so that some other identification is necessary. Atot/Athophena was probably in the neighborhood of Ataroth; the shepahan serving as a distinction; but for this see ATROTH.

2. [LXX. corrupt in Josh. xvi. 21] A place on the (South?) boundary of Ephraim and Manasseh (Josh. xvi. 21). The whole specification of this boundary is exceedingly obscure, and it is not possible to say whether Ataroth is or is not the same place as.

3. [In Josh. xvi., ΑΤΑΡΩΘ (Vat. ΑΤΑΡΩΘ) και ΕΡΩΣ (Vat. M. EROS, Comp. Alex. 'ΑΕΡΟΣ), in Josh. xviiii., ΑΤΑΡΩΘ ΒΟΡΗ (Vat. ΑΜΑΡΟΘ ΒΟΡΗ, Alex. ΑΤΑΡΩΘ ΑΔΑΒ, Abd. ΑΤΑΡΩΘ ΕΘΗΔΑ: Ataroth Adab.) ATAROTH-ADAR, or ΑΤΑΡΩΘ (Γηνιατρής), on the west border of Benjamin, "near the mountain" that is on the south side of the rather Beth-horon" (Josh. xviiii. 13). In xvi. 5 it is accurately rendered Ataroth-adar.

In the Onomasticon mention is made of an Ataroth in Ephraim, in the mountains, 4 miles N. of Belasote; as well as of two places of the name "not far from" Jerusalem. The former cannot be that seen by Robinson (ii. 265), now Menhor. Robinson discovered another about 6 miles S. of Bethel (i. 575). This is too far to the E. of Beth-horon to be Ataroth-adar, and too far S. to be that on the boundary of Ephraim (2).

Jordan," the point of reckoning being left indeterminable.

H.
ATER

4. "ATAROTH, THE HOUSE OF JOAH" (i.e. Ateroth-beth-Joab), a place (?) occurring in the list of the descendants of Judah (1 Chr. ii. 54; Ateroth in 1 Chr. v. 13), and Aterah in 1 Chr. v. 13, as in the name of the Ateroth-beth-Joab, a place (?) occurring in the list of the descendants of Judah (1 Chr. ii. 54; Ateroth in 1 Chr. v. 13), and Aterah in 1 Chr. v. 13, as in the name of the

ATER (אֶתֶר, bound [perh. dative] "Ater"); Alex. Aţerăp. Alex. Aţerăp in Ezr.: Ater. 1. The children of Ater were among the porters or gate-keepers of the Temple who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45). They are called in 1 Esdr. v. 28, "the sons of Ater of Jatul." 2. The children of Ater of Hezekiah, to the number of ninety-eight, returned with Zerubbabel (Ezr. ii. 16; Neh. vii. 21), and were among the heads of the people who signed the covenant with Nehemiah (Neh. x. 17). The name appears in 1 Esdr. v. 15, as Aterezias.

W. A. W.

ATEREZIAS (אֶתֶרֶזְיָאָס; [Vat. Aţeręzjās; Ewald's schichte, xxxiii. 7.]). A corruption of "Ater of Hezekiah." (1 Esdr. v. 15; comp. Ezr. ii. 16.)

W. A. W.

ATHACH (אַתֵּחַ) [leading-place]: Nusaëî; [Vat. Nsūś]. Alex. Āthāī; Comp. 'Āthāī. One of the places in the tribe of Judah, which David and his men frequented during the time of his residence at Zildah (1 Sam. xxx. 30). As the name does not occur elsewhere, it has been suggested that it is an error of the transcriber for Ether, a town in the low country of Judah (Josh. xiv. 43).

W. A. W.

ATHALIAH (אתֹלָיהו) [whom Jehovah afflicts]: Θεολαία; Athaliah. 1. Daughter of Ahaz and Jezekel, married Jehoram the son of Jehosophat, king of Judah, and into the 8. kingdom the worship of Baal, which had already defiled and overspread the N. After the great revolution by which Jehu seated himself on the throne of Samaria, she killed all the members of the royal family of Judah who had escaped his sword (2 K. x. 14), availing herself probably of her position as King's Mother [Asa] to perpetrate the crime. Most likely she exercised the royal functions during Ahaziah's absence at Jezreel (2 K. x.), and resolved to retain her power, especially after seeing the danger to which she was exposed by the overthrow of the house of Omri and of Baal-worship in Samaria. It was not unusual in those days for women in the East to attain a prominent position, their present degradation being the result of Mohammadanism. Miriam, Deborah, Abigail, are instances from the Bible, and Dido was not far removed from Athalath, either in birthplace or date, if Carthage was founded b.c. 891 (Joseph. c. Apion. i. 18). From the slaughter of the royal house, one infant named Josiah, the youngest son of Ahaziah, was rescued by his aunt Jehosheba, daughter of Jehoram (probably by another wife than Athalath) who had married Jehoiada (2 Chr. xxi. 11) the high-priest (2 Chr. xxiv. 6). The child was brought up under Jehoiada's care, and concealed in the temple for six years, during which period Athalath reigned over Judah. At length Jehoiada thought it time to produce the lawful king to the people, trusting to their zeal for the worship of God, and loyalty to the house of David, which had been so strenuously called out by Asa and Jehoshaphat. After communicating his design to five "captains of hundreds," whose names are given in 2 Chr. xxiii. 1, and securing the cooperation of the Levitical and chief men in the country-towns in case of necessity, he brought the young Josiah into the temple to receive the allegiance of the soldiers of the guard. It was customary on the Sabbath for a third part of them to do duty at the palace, while two thirds restrained the crowd of visitors and worshipers who thronged the temple on that day, by occupying the gate of Sur (הָרָע, 2 K. xi. 6, called of the foundation, הָרָע, 2 Chr. xxiii. 5, which Gerlach, in loco, considers the right reading in Kings also), and the gate behind the guard ("porta que est post tabernaculum stat ruriorum, Vulg."), which seem to have been the N. and S. entrances into the temple, according to Ewald's description of it (Ge schichte, iii. 397-9). On the day fixed for the outbreak there was to be no change in the arrangement at the palace, lest Athalath, who did not worship in the temple, should form any suspicion from missing her usual guard, but the latter two thirds were to protect the king's person by forming a long and closely-serried line across the temple, and killing any one who should approach within certain limits. They were also furnished with David's spears and shields, that the work of restoring his descendant might be associated with his own sacred weapons. When the guard had taken up their position, the young prince was announced, crowned, and presented with the Testament or Law, and Athalath was first roused to a sense of her danger by the shouts and music which accompanied the inauguration of her grandson. She hurried into the temple, but found Josiah already standing "by a pillar," or more properly on it, i.e. on the tribune or throne, apparently raised on a massie column or cluster of columns, which the king occupied when he attended the service on solemn occasions. The phrase in the original is תֹלָיהו תֹלָיהו, rendered "on the stone of splendour" by the LXX. and super trono in the Vulgate, while Gesenius gives it for the substantive a stone or pulex. (Comp. 2 K. xxiii. 4, and Ez. xiv. 2.) She arrived however too late, and was immediately put to death by Jehoiah's commands, without the temple. The only other recorded victim of this happy and almost bloodless revolution, was Mattan the priest of Kidna. For the view here given of the details of Jehoiada's plan, see Ewald, Geschichte, iii. 574 ff. The latter words of 2 K. xi. 6 in our version, "thai it be not broken down," are probably wrong:—Ewald translates, "according to caution"; Gesenius gives it in his Lexicon a keeping off." Clinton's date for Athalath's usurpation is c. 583-877. In modern times the name of Athalath has been illustrated by the music of Handel and of Mendelssohn, and the stately declamation of Racine.

G. E. L. C.

2. (Θεολαία; Alex. Θεολαία; Otholai.) A Benjamite, one of the sons of Jeroham who dwelt at Jerusalem (1 Chr. viii. 29).

3. (Athalia; [Vat. Athelai;] Alex. Athelia;}

a The marginal note to this name in the Bible of the present day, namely, "Aartites or crowns." &c., is a corruption of Aartites in the edition of 1611.

b * Rendered in the margin of the A. V. "Crowns of the house of Josiah."
ATHARIAS

Atharia, one of the Bene-Elim, whose son Jeshaiah with seventy males returned with Ezra in the second caravan from Babylon (Ezr. viii. 7.)

W. A. W.

ATHARIAS (Αθαρίας; et Αθαρίας), a corrupt rendering of Ἀθαρίας, the Tushathia (1 Esdr. v. 40).

ATHENOBUS (Αθηνόβους; [Athensi]), an envoy sent by Antiochus VII. Sidetes to Simon, the Jewish high-priest (1 Mac. xx. 25-36). He is not mentioned elsewhere.

B. F. W.

ATHENIANS (Αθηναίοι; Athenienses). Natives of Athens (Acts xvii. 21) and 22. For the character which Paul ascribed to them, see ATHENS.

ATHENS (Αθήνα: Athenë), the capital of Attica, and the chief seat of Grecian learning and civilization during the golden period of the history of Greece. This city is fully described elsewhere (Dict. of Geog. and Bow, tomos. i. 235 ff.; and an account of it would be out of place in the present work. St. Paul visited it in his journey from Macedonia, and appears to have remained there some time (Acts xxii. 14, 15 ff.; comp. 1 Thess. iii. 1). During his residence there he delivered his memorable discourse on the Areopagus to the "men of Athens" (Acts xxii. 22-31 [Āthēnai].)

In order to understand the facilities mentioned in the sacred narrative, it may be observed that four hills of moderate height rise within the walls of the city. Of these one to the northeast is the celebrated

Plan of Athens, showing the position of the Areopagus

Agora, or citadel, being a square craggy rock about 150 feet high. Immediately to the west of the Agor is a second hill of irregular form, but inferior height, called the Areopagus. To the southwest rises a third hill, the Pnyx, on which the assemblies of the citizens were held; and to the south of the latter is a fourth hill, known as the Museum. The Agora or "market," where St. Paul disputed daily, was situated in the valley between the Agor and the Areopagus, the Pnyx, and the Museum, being bounded by the Agor on the N.E. and E., by the Areopagus on the N., by the Pnyx on the N.W. and W., and by the Museum on the S. The annexed plan shows the position of the Agora. Many writers have maintained that there were two markets at Athens; and that a second market, usually called the new Agora, existed to the north of the Agor. If this were true, it would be doubtful in which of the two markets St. Paul disputed; but since the publication of Forester's "Treatise on the Topography of Athens, it is generally admitted that there was only one Agora at Athens, namely, the one situated in the valley already described. (The subject is discussed at length in the Dict. of Geog. i. 293 ff.)

The remark of the sacred historian respecting the inquisitive character of the Athenians (xvii. 21) is attested by the unanimous voice of antiquity. The great Athenian orator rebukes his countrymen for their love of constantly going about in the market, and asking one another, What news? (ποιήσεστε αὕτων πανανέσθαι κατὰ τὴν ἄγοραν, λέγεται τι καθορή; Dem. Phœn. i. 43, ed. Reiske). Their natural liveliness was partly owing to the purity and clearness of the atmosphere of Attica, which also allowed them to pass much of their time in the open air.

The remark of St. Paul upon the "superstitions" [A. V.] a character of the Athenians (xvii. 22) is in like manner confirmed by the ancient writers. Thus Pausanias says that the Athenians surpassed all other states in the attention which they paid to the worship of the gods (Αθηναίοι περισσότερον τὰ γενὸς ἄλλοις ἐί τά θεά τοι ἐστὶ σπάνια, Paus. i. 21, § 43); and hence the city was crowded in every direction with temples, altars, and other sacred buildings. The altar of the Unknown God," which St. Paul mentions in his address, has been spoken of under ALTAR.

a * This rendering is the more unfortunate as it recalls from the reader a remarkable instance of Paul's conciliatory habit in dealing with men when no principle was at stake. The Greek term (διαμεθομένως) is neutral, and means "very religious" or "devout." In the same paragraph the rendering should be instead of the) "an unknown God," II.
ATHLAI

Of the Christian church founded by St. Paul at Athens, we have no particulars in the N. T.; but according to ecclesiastical tradition (Euseb. H. E. iii. 4) Dionysius the Areopagite, who was converted by the preaching of the apostle, was the first bishop of the church. [DIONYSIUS.]

ATHLAI [2 syl.] (not Jehovah afflicted); όςα (Vat. Ζαζόπολες) Alex. άςα: Akathā), One of the sons of Bebal, who put away his foreign wife at the exhortation of Ezra (Ezra x. 28). He is called AMATHIUS in 1 Esdr. ix. 29.

ATIPHA (Ateph): [All. Ahis. Ateph]: Agiūth), 1 Esdr. v. 32. [HIPHAI.

atonement, the day of ἁµέα ἐξαιµεύµο: dies expiationum and dies propitiotionis; in the Talmud, מיהנ: י. כ. the day; in Philo, νοµεῖας κατηγ., Lib. de Sept. vol. v. p. 47, edit. Tarnovius. In Acts xxvii. 3, νοµεῖα: in Heb. vii. 27, מיהנ, according to Okhansanu and others; but see Edward's and Bengel's notes), the great day of national humiliation, and the only one commanded in the Mosaic law. [FASRS.] The mode of its observance is described in Lev. xvi., where it should be noticed that in v. 3 to 10 an outline of the whole ceremonial is given, while in the rest of the chapter certain points are mentioned with more details. The victims which were offered in addition to those strictly belonging to the special service of the day, and to those of the usual daily sacrifice, are enumerated in Num. xxix. 7-11; and the conduct of the people is emphatically enjoined in Lev. xxix. 20-32.

II. It was kept on the tenth day of Tisri, that is, from the evening of the ninth to the evening of the tenth of that month, five days before the Feast of Tabernacles. [FESTIVALS.] Some have inferred from Lev. xvi. 1, that the day was instituted on account of the sin and punishment of Nadab and Abihu. Maimonides (More Nechoich., xviii.) regards it as a commemoration of the day on which Moses came down from the mount with the second tables of the law, and proclaimed to the people the forgiveness of their great sin in worshipping the golden calf.

III. The observances of the day, as described in the law, were as follows. It was kept by the people as a solemn sabbath (σάββατον σαββάτων, LXX). They were commanded to set aside all work and "to afflict their souls," under pain of being "cut off from among the people." It was on this occasion only that the high-priest was permitted to enter into the Holy of Holies. Having bathed his person and dressed himself entirely in the holy white linen garments, he brought forward a young bullock for a sin-offering and a ram for a burnt-offering, purchased at his own cost, on account of himself and his family, and two young goats for a sin-offering with a ram for a burnt-offering, which were paid for out of the public treasury, on account of the people. He then presented the two goats before the Lord at the door of the tabernacle and cast lots upon them. On one lot נ.Therefore he next sacrificed the young bullock as a sin-offering for himself and his family. Taking with him some of the blood of the bullock, he filled a censer with burning coals from the brazen altar, took a handful of incense, and entered into the most holy place. Then he threw the incense upon the coals and enveloped the mercy-seat in a cloud of smoke. Then, dipping his finger into the blood, he sprinkled it seven times before the mercy-seat, eastward.

The goat upon which the lot, "for Jehovah," had fallen was then slain, and the high-priest sprinkled its blood before the mercy-seat in the same manner as he had done that of the bullock. Going out from the Holy of Holies he purified the holy place, sprinkling some of the blood of both the victims on the altar of incense. At this time no one besides the high-priest was suffered to be present in the holy place.

The purification of the Holy of Holies and of the holy place being thus completed, the high-priest laid his hands upon the head of the goat on which the lot, "for Azazel," had fallen, and confessed over it all the sins of the people. The goat was then led, by a man chosen for the purpose, into the wilderness, into "a land not inhabited," and was there let loose.

The high-priest after this returned into the holy place, bathed himself again, put on his usual garments of office, and offered the two rams as burnt-offerings, one for himself and one for the people. He also burnt upon the altar the fat of the two sin-offerings, while their flesh was carried away and burned outside the camp. They who took away the flesh and the man who had led away the goat had to bathe their persons and wash their clothes as soon as their service was performed.

The accoty burnt-offerings mentioned Num. xxix. 7-11, were a young bullock, a ram, seven lambs, and a young goat. It would seem that at least in the time of the second temple these were offered by the high-priest along with the evening sacrifice (see below, V. 7).

It may be seen (as Winier has remarked) that in the special rites of the Day of Atonement there is

a See Lev. xvi. 14. The English version, "upon the mercy-seat," appears to be opposed to every Jewish authority. (See Drusius in loc. in the Critici Sacri.) It has, however, the support of Ewald's authority. The Vulgate omits the clause; the LXX. follows the ambiguity of the Hebrew. The word καταρχῆς must mean either the direction in which the drops were thrown by the priest, or else on the east side of the vr., i.e. the side towards the veil. The last clause of the verse may be taken as a repetition of the command, for the sake of emphasis on the number of sprinklings: "and he shall take of the blood of the bullock and sprinkle it before the mercy-seat, on the east; and seven times shall he sprinkle the blood with his finger before the mercy-seat.

b That the altar of incense was thus purified on the day of atonement we learn expressly from Ex. xxx. 10. Most critics consider that this is what is spoken of in Lev. xvi. 18 and 20. But some suppose that it is the altar of burnt-offerings which is referred to in these verses, the purification of the altar of incense being implied in that of the holy places mentioned in ver. 16. Abenazer was of this opinion (see Drusius in loc.). That the expression, "before the Lord," does not necessarily mean within the tabernacle, is evident from Ex. xxix. 11. If the golden altar is here referred to, it seems remarkable that no mention is made in the ritual of the cleansing of the brazen altar. But perhaps the practice spoken of by Josephus and in the Mishna of pouring what remained of the mixed blood at the foot of the large altar, was an ancient one, and was regarded as its purification.
A natural gradation. In the first place the high-priest and his family are cleansed; then atonement is made by the purified priest for the sanctuary and all contained in it; then (if the view to which reference has been made be correct) for the brazen altar in the court, and lastly, reconciliation is made for the people.

IV. In the short account of the ritual of the day which is given by Josephus (Ant. iii. 10, § 3) there are a few particulars which are worthy of notice. His words of course apply to the practice in the second temple, when the ark of the covenant had disappeared. He states that the high-priest sprinkled the blood with his finger seven times on the ceiling and seven times on the floor of the most holy place, and seven times towards it (as it would appear, outside the veil), and round the golden altar. Then going into the court he either sprinkled or poured the blood round the great altar. He also informs us that along with the fat, the kidneys, the top of the liver, and the extremities (αι ἐγκέφαλοι) of the victims were burned.

V. The treatise of the Mishna, entitled Yoma, professes to give a full account of the observances of the day according to the usage in the second temple. The following details appear either to be interesting to themselves or to illustrate the language of the Pentateuch.

1. The high-priest himself, dressed in his colored official garments, went, on the Day of Atonement, to perform all the duties of the ordinary daily service, such as lighting the lamps, presenting the daily sacrifices, and offering the incense. After this he bathed himself, put on the white garments, and commenced the special rites of the day. There is nothing in the Old Testament to render it improbable that this was the original practice.

2. The high-priest went into the Holy of Holies four times in the course of the day: first, with the censor and incense, while a priest continued to agitate the blood of the bullock lest it should congeal; secondly, with the blood of the bullock; thirdly, with the blood of the goat; fourthly, after having offered the evening sacrifice, to fetch out the golden censer which had contained the incense. These four entrances, forming, as they do, parts of the one great annual rite, are not opposed to a reasonable view of the statement in Heb. ix. 7, and that in Josephus, B. J. v. 5, § 7. Three of the entrances seem to be very distinctly implied in Lev. xvi. 12, 14, and 15.

3. It is said that the blood of the bullock and that of the goat were each sprinkled eight times, once towards the ceiling and seven times on the floor. This does not agree with the words of Josephus (see above, IV.).

4. After he had gone into the most holy place the third time, and had returned into the holy place, the high-priest sprinkled the blood of the bullock eight times towards the veil, and did the same with the blood of the goat. Having then sprinkled the blood of the two victims together and sprinkled the altar of incense with the mixture, he came into the court and poured out what remained at the foot of the altar of burnt-offering.

5. Most careful directions are given for the preparation of the high-priest for the services of the day. For seven days previously he kept away from his own house and dwelt in a chamber appointed for his use. This was to avoid the accidental causes of pollution which he might meet with in his domestic life. But to provide for the possibility of his incurring some uncleanness in spite of this precaution, a deputy was chosen who might act for him when the day came. In the treatise of the Mishna entitled Parcz. Achod, it is stated that no such misdemeanour ever befell the high-priest. But Josephus (Ant. xvii. 6, § 4) relates an instance of the high-priest Matthias, in the time of Herod the Great, when his relation Joseph took his place in the sacred office. During the whole of the seven days the high-priest had to perform the ordinary sacerdotal duties of the daily service himself, as well as on the Day of Atonement. On the third day and on the seventh he was sprinkled with the ashes of the red heifer in order to cleanse him in the event of his having touched a dead body without knowing it. On the seventh day he was also required to take a solemn oath before the elders that he would alter nothing whatever in the accustomed rites of the Day of Atonement.

6. Several curious particulars are stated regarding the scapegoat. The two goats of the sin-offering were to be of similar appearance, size, and value. The lots were originally of being cast, but in later times they were of gold. They were put into a little box or urn, into which the high-priest put both his hands and took out a lot in each, while the two goats stood before him, one at the right side and the other on the left. The lot in each hand belonged to the goat in the corresponding position, and when the lot was for Atonel they happened to be in the right hand, it was regarded as a good omen. The high-priest then tied a piece of scarlet cloth on the scapegoat's head, called "the scarlet tongue," from the shape in which it was cut. Maimonides says that this was only to distinguish him, in order that he might be known when the time came for him to be sent away. But in the Gemara it is asserted that the red cloth ought to turn white, as a token of God's acceptance of the atonement of the day, referring to Is. i. 18. A particular instance of the exchange which happened is recorded in the Gemara, p. 18, and so the lot "for Atonel" was in the priest's right hand, is related as having occurred in the time of Simon the Just. It is further stated that no such change took place for forty years before the destruction of Jerusalem. The praver which the high-priest uttered over the head of the goat was as follows: "O Lord, the house of Israel, they have trespassed, rebelled, and sinned before thee. I beseech thee, O Lord, forgive now their trespasses, rebellions and sins which thy people have committed, as it is written in the law of Moses, thy servant, saying that in that day there shall be an atonement for thee to cleanse thou that ye may be clean from all your sins before the Lord" (Gemara on Yoma, quoted by Frischmuth). The goat was then gaded and calmly treated by the people till it was led away by the man appointed. As soon as it reached a certain spot which seems to have been regarded as the commencement of the wilderness, a signal was made by some sort of telegraphic contrivance, to the high-priest, who waited for it. The man who led the goat is said to have taken him to the top of a high precipice and thrown him down backwards, so

This, according to the Jerusalem Gemara on Yoma (quoted by Lichtenfeld), was instituted in consequence of an innovation of the Sadducean party, who had

ATONEMENT
ATONEMENT

A to dash him to pieces. It was not a mistake of the writer of Yoma, it must have been, as Spener argues, a modern innovation. It cannot be doubted that the goat was originally set free. Even if there be any uncertainty in the words of the Hebrew, the word used in the LXX must be better than the Talmud — καὶ ὁ ἄρπαγγαιῶ τῶν χιμάρων τῶν διασταλλόμενων εἰς ἄφεσιν κ. τ. λ., Lev. xvi. 23.

7. The high-priest, as soon as he had received the signal that the goat had reached the wilderness, read some lessons from the law, and offered up some prayers. He then bathed himself, resumed his colored garments, and offered either the whole or a great part of the necessary offering (mentioned Num. xiii. 7-11) with the regular evening sacrifice. After this he washed again, put on the white garments, and entered the most holy place for the fourth time, to fetch out the censor and the incense-plate. This terminated the special rites of the day.

8. The Mishna gives very strict rules for the fasting of the people. In the law itself no express mention is made of abstinence from food. But it is most likely implied in the command that the people were to "afflict their souls." According to Yoma, every Jew (except invalids and children under 13 years of age) is forbidden to eat anything so large as a date, to drink, or to wash from sunset to sunset.

VI. There has been much discussion regarding the meaning of the word Azazel. The opinions which seem most worthy of notice are the following:

1. It has been regarded as a designation of the goat itself. This view has been most favored by the old interpreters. They in general supposed it to mean the goat sent away, or, let loose. In accordance with this the Vulgate renders it, Ccepemauistrus; Symmachus, ὁ τράγος ἀπερχόμενος; Aquila, ὁ τράγος ἀπολειμένος; Luther, der ledge Boch; the English translators, the scapegoat. The LXX. uses the term ἄποστασίος, applied to the goat itself. Theolozet and Cyril of Alexandria consider the meaning of the Hebrew to be the goat sent away, and regard that as the sense of the word used in the LXX. if there were right, ἄποστασίος is, of course, not employed in its ordinary meaning (Acremonius). (See Suicer, s. v.) It should also be observed that in the latter clause of Lev. xvi. 10 the LXX. renders the Hebrew term as if it was an abstract noun, translating ἄποστασίων by εἰς τὴν ἄποστασιν. Buxtorf (Hub. Lex.) and Fagius (Critici Sacri, in loc.) in accordance with this view of its meaning, derived the word from ἄποστασις, a goat, and ἔπος, to depart. To this derivation it has been objected by Bochart.

Winer, and others, that ἄποστασις denotes a she-goat, not a he-goat. It is, however, alleged that the word appears to be eponim in Gen. xxx. 33; Lev. iii. 12; and other places. But the application of ἄποστασις to the goat itself involves the Hebrew text in insuperable difficulties. It can hardly be supposed that the prefix which is common to the designation of the two lots should be used in two different meanings. If one expression is to be rendered for Jehovah, it would seem that the other must be for Jehovah, with the prefix in the same sense. If this is admitted, taking Azazel for the goat itself, it does not seem possible to make sense out of Lev. xvi. 10 and 26. In these verses the versions are driven to strange shifts. We have already referred to the inconsistency of the LXX. In the Vulgate and our own version the first clause of ver. 10 stands εἰς ἄφεσιν (the word in caprum emissarium) — "but the goat on which the lot fell to be the scapegoat." In ver. 26 our version reads « And he that let go the goat for the scapegoat," while the Vulgate cuts the knot to escape from the awkward tautology — "ille vero, qui dimiserat caprum emissarium."

2. Some have taken Azazel for the name of the place to which the goat was sent. (a.) Aben Ezra, following the words of an anonymous writer referring it to a hill near Mount Sinai. Vatalab adopts this opinion (Critici Sacri, in Lev. xvi.). (b.) Some of the Jewish writers, with Le Clerc, consider that it denotes the cliff to which the goat was taken to be thrown down, according to Yoma. (c.) Bochart regarded the word as a pluralis fractus signifying desert places, and understood it as a general name for any fit place to which the goat might be sent. But Gesenius remarks that the pluralis fractus, which exists in Arabic, is not found in Hebrew.

3. Many of those who have studied the subject most closely take Azazel for a personal being to whom the goat was sent. (c.) Gesenius gives τον ἄποστασίον the same meaning as the LXX. has assigned to it, if ἀποστασιοῦ is to be taken in its usual sense; but the being so designated he supposes to be some false deity who was to be appeased by such a sacrifice as that of the goat. He derives the word from a root unused in Hebrew, but found in Arabic, ἄπωστιν, to remove or take away (Hub. Lex. s. v.). Encel agrees with Gesenius, and speaks of Azazel as a demon belonging to the pre-Mosaic religion. (b.) But others, in the spirit of a simpler faith, have regarded him as an evil spirit, or the devil himself. In the book of Enoch the name Azazel is given to one of the fallen angels; and assuming, with Spencer, that this is a corruption of Azazel, if the book were written, as is generally supposed, by a Jew, about n. c. 40, it represents an old Jewish opinion on the subject. Origin, adopting the word of the LXX., identifies him with the devil: ἦν τις τοῦ Ἑλεωτῆς ἄποστασίος οὗ ἐφάνετο γραφή ἀποστασεῖς 'Αζαζής, ὕπερ τοὺς ἁγίους ἡ ἐν διαδόσει (Cels. vi. 305, ed. Spence). Of modern writers, Spencer and Hengstenberg have most elaborately defended the same opinion. Spencer derives the word from ἄποστιν, fortress, and ἄπωστιν, explaining it as εἶχο recusans, which he affirms to be a most suitable name for the evil spirit. He supposes that the goat was given up to the devil, and committed to his disposal. Hengstenberg affirms with great confidence that Azazel cannot possibly be anything but another name for Satan. He repudiates the conclusion that the goat was in any sense a sacrifice to Satan, and does not doubt that it was sent away laden with the sins of God's people, now forgiven, in order to mock their spiritual enemy in the desert, his proper abode, and to symbolize by its five gamboils their exculting triumph. He considers that the origin of the rite was Egyptian, and that the Jews substituted Satan for Typhon, whose dwelling was the desert. The obvious objection to Spencer's view is that the goat
formed part of a sin-offering to the Lord, and that it, with its fellow, had been formally presented before the Lord at the door of the Tabernacle. For, perhaps, we will be satisfied with Hengstenberg's mode of meeting this difficulty, &c.

4. An explanation of the word which seems less objectionable, if it is not wholly satisfactory, would render the designation of the lot "mittellos", for complete sending away;" Thus understood, the word would come from "mittel" (the root adopted by Gesenius), being the Peal form, which indicates intensity. This view is held by Thodeck (quoted and approved by Thomson), by Bahr, and by Winer.

VII. As it might be supposed, the Talmudists miserably degraded the meaning of the day of atonement. They regarded it as an opportunity afforded them of wiping off the score of their more heavy offenses. Thus Yoma (cap. viii.) says, "The day of atonement and death make atonement through penitence. Penitence itself makes atonement for slight transgressions, and in the case of grosser sins it obtains a respite until the coming of the day of atonement, which completes the reconciliation." More authorities to the same general purpose are quoted by Frischmuth (p. 917), some of which seem also to indicate that the peculiar atoning virtue of the day was supposed to rest in the scapegoat.

Philos (Lib. de Septuaginta) regarded the day as a far nobler light. He speaks of it as an occasion for the discipline of self-restraint in regard to bodily indulgence, and for bringing home to our minds the truth that man does not live by bread alone, but by whatever God is pleased to appoint. The prayers proper for the day, he says, are those for forgiveness of sins past and for amendment of life in future, to be offered in dependence, not on our own merits, but on the goodness of God.

It cannot be doubted that what especially distinguished the symbolical equation of this day from that of the other sacrifices of the law was its broad and national character, with perhaps a deeper reference to the sin which belongs to the nature of man. Exaud instructively remarks that though the least uncleanness of an individual might be atoned by the rites of the law which could be observed at other times, there was a consciousness of secret and indefinite sin pervading the congregation, which was aptly met by this great annual festivity. Hence, in its national character, he sees an antithesis between it and the passover, the great festival of national life; and, in its atoning significance, he regards it as a fit preparation for the rejoicing at the ingathering of the fruits of the earth in the feast of tabernacles. Philo looked upon its position in the Jewish calendar in the same light.

In considering the meaning of the particular rites of the day, three points appear to be of a very distinctive character. 1. The white garments of the high priest. 2. His entrance into the Holy of Holies. 3. The scapegoat. The writer of the Epistle to the Hebrews (ix. 25) teaches us to apply the first two particularly. The high-priest himself, with his person cleansed and dressed in white garments, was the best outward type which a living man could present in his own person of that pure and holy One who was to purify His people and to cleanse them from their sins.

But respecting the meaning of the scapegoat, we have no such light to guide us, and (as has been already implied in what has been stated regarding the word Azazel) the subject is one of great doubt and difficulty.

Of those who take Azazel for the Evil Spirit, some have supposed that the goat was a sort of brute, or retaining be, for the accuser of men, Spencer, in supposing that it was given up with its load of sin to the enemy to be tormented, made it a symbol of the punishment of the wicked; while, according to the strange notion of Hengstenberg, that it was sent to mock the devil, it was significant of the freedom of those who had become reconciled to God.

Some few of those who have held a different opinion on the word Azazel, have supposed that the goat was taken into the wilderness to suffer there for the sins of the people. But it has been generally considered that it was dismissed to signify the carrying away of their sins, as it were, out of the sight of Jehovah.

If we keep in view that the two goats are spoken of as parts of one and the same sin-offering, and that every circumstance connected with them appears to have been cunningly arranged to bring them under the same conditions up to the time of the casting of the lots, we shall not have much difficulty in seeing that they form together but one symbolical expression. Why there were two individuals instead of one may be simply this—that a single material object could not, in its nature, symbolically embrace the whole of the truth which was to be expressed. This is implied in the reasoning of the author of the Epistle to the Hebrews on the office and sacrifice of Christ (Heb. ix.). Hence some, regarding each goat as a type of Christ, supposed that the one which was slain represented his death, and that the goat set free signified his resurrection. (Cyril, Beza, and others, quoted by Spencer.) But we shall take a simpler, and perhaps a truer view, if we look upon the slain goat as setting forth the act of sacrifice, in giving up its own life for others to Jehovah, in accordance with the requirements of the Divine law; and the goat which carried off its load of sin for complete removal, as signifying the cleansing influence of faith in that sacrifice. Thus in his degree the devoted lambs might have felt the truth of the Psalmist's words, "As far as the east is from the west, so far hath he removed our transgressions from us." But for us the whole spiritual truth has been revealed in historical fact, in the life, death, and resurrection of Him who was made sin for us, who died for us, and who rose again for our justification. This Mediator, it was necessary, should "in some unspirable manner unite death and life" (Maurice on Sacrifice, p. 85).

(Spencer, Dr. Lightfoot's Hebrews and Ritudbulus, lib. iii. Dissertatio viii.; Lightfoot's Temple Service,

[In support of the view that Azazel denotes an evil spirit, or Satan, see also Bush, Arndt, etc, in the American Review, July, 1842, 247, viii. 1843; Dietrich, Nat.-Theol. 1. of the Eich, and Sassen, in the Zeusche, f. d. tvb. Tav., 1849, xxx. 193, 217; and Valentinus, etc. in Herzog's Real-Encycl., vol. i. A.]

[In the similar part of the rite for the purification of the leper, Lev. xiv. 7, in which a live bird was sent that the bird signified the carrying away of the uncleanness of the sufferer to precisely the same manner.]
ATROTH (っぱ町) Eroh, a city of Gad, named with Aroer and Jazer (Num. xxxii. 33). No doubt the name should be taken with that following it, Shophan; the addition serving to distinguish this place from the Atroth in the same neighborhood. The A. V. follows the Vulgate, Eroth et Sophan. In the LXX. it is altogether omitted.

ATRAH SASH (Aaron), E. V. (Atakoth), a grandson of Sheshan, whose name is given to one of the priests of the tribe of Judah. Jer. iv. 2.

ATTALUS (Attalos), a Macedonian name of uncertain origin, the name of three kings of Pergamus who reigned respectively B.C. 211-197, 193-198 (Philadelphus), 188-138 (Philometor). They were all faithful allies of the Romans (Liv. xiv. 13); and the last appointed the Romans his heirs. It is uncertain whether the letters sent from Rome in favor of the Jews (1 Macc. xxv. 22) were addressed to Attalus II. (Polyb. xxv. 6, xxxi. 9, xxxii. 3, 5, 8, &c., 25 f.; Strab. xiii. 4; Just. xxxv. 1, xxxvi. 4, 5; App. Mith. 62) or Attalus III., as their date falls in B.C. 139-8 (Lucius), about the time when the latter succeeded his uncle. Jos. Ant. xxii. 2. It is a decree of the Ptolemies in favor of the Jews (Ant. xiv. 10, § 22) in the time of Hyrcanus, about B.C. 112: comp. Apoc. ii. 12-17.

ATTAR ATAT (Atharathas). A city of Cilicia, 1 Esdr. ix. 49 (comp. Neh. viii. 9), a corruption of the Tirshatha; "comp. ATHARHAS.

ATTICA (Attikē), Attica, a county in Greece, mentioned only very casually in the New Testament (Acts xiv. 23), as the place from which Paul and Barnabas sailed on their return to Antoch from their missionary journey into the inland parts of Asia Minor. It does not appear that they made any stay, or attempted to preach the gospel in Attica. This city, however, though comparatively modern at that time, was a place of considerable importance in the first century, and has continued to exist till now. Its name since the twelfth century has been Sallade, a corruption of which the crusading chronicler, William of Tyre, gives a curious explanation.

ATTALUS, king of Pergamus, ruled over the western part of the peninsula from the N. to the S., and was in want of a port which should be useful for the trade of Egypt and Syria. As Tras was that of the Jezean. Thus Attala was built and named after the monarch. All its remains are characteristic of the date of its foundation.

ATTALUS, king of Pergamus, ruled over the western part of the peninsula from the N. to the S., and was in want of a port which should be useful for the trade of Egypt and Syria. As Tras was that of the Jezean. Thus Attala was built and named after the monarch. All its remains are characteristic of the date of its foundation.

There has been considerable doubt concerning the exact position of Attala. There is a discrepancy even between Strabo and Ptolemy; the former placing it to the W. of the river Cataractae, the latter to the E. This may probably be accounted for by the peculiar character of this river, the eulogizing waters of which are continually making changes in the channels. Beaufort thought that the modern Saltaka is the ancient Attala, and that Leonis is the true Atroth. Forliger after Mau- nert, is inclined to identify the two places. But Spratt and Forbes found the true Othalia further to the west, and have confirmed Leake's opinion, that Attala is where the modern name would lead us to expect it. (Beaufort's Karamania; Spratt and Forbes' Asia.)

J. S. H.

AUGUSTUS CÆSAR ( Augusta Caesar). The first Roman emperor, during whose reign Christ was born (Luke ii. 1). He was born A. D. 63, or 64. His father was Caius Octavius; his mother Atia, daughter of Julia, the sister of C. Julius Caesar. He bore the same name as his father, Caius Octavius. He was principally educated, having lost his father when young, by his great uncle Julius Caesar. After his murder, the young Octavius came into Italy as Caius Julius Caesar Octavianus, being by his uncle's will adopted into the gens Julia as his heir. He was taken into the family of Antony and Lepidus, and after the removal of the latter divided the empire with Antony, taking the West for his share. But there was no real concord between them, and the compact resulted in a struggle for the supreme power, which was terminated in favor of Octavianus by the decisive naval battle of Actium, in B.C. 31 (suet. Oct. 17; Dion Cass. l. 15 f.; Vell. Pater. ii. 51). On this victory he was invested emperor by the senate: and on his offering afterwards to resign the chief power, they conferred on him the title Augustus (B.C. 27). He managed with consummate tact and skill to consolidate the power conferred on him, by leaving the names and rights of the principal state officers intact, while by degrees he united them all in his own person. The first link binding him to N. T. history is his treatment of Herod after the battle of Actium. That prince, who had espoused Antony's side, found himself proscribed, taken into favor and confirmed, may even increased in his power (Comp. Ant. xiv.
the N. of Palestine. It has not been identified with certainty. Michaelis (notes on Amos) to regard it as "the N. of Palestine." It has not been identified with certainty. Michaelis (notes on Amos) to regard it as "the N. of Palestine." It has not been identified with certainty.

AVIM

AVIM, Avi, AVIM, or Avimos (אַוִּים), the word elsewhere used by the LXX. for Hittites: Ἀβραίοι, the name rendered by them is an etymological guess. AVIM is of Egyptian origin and was a toponym or a name of a people. It is a term used in the context of the Egyptian conquest of Palestine. The Avims are mentioned in the Egyptian records as a people living in the area of modern Israel and Palestine. The name Avims is thought to be a corruption of the Egyptian name for the people, which may have been the Amorites or the Amalegites. The Avims are also mentioned in the biblical text, where they are described as living in the region of the Amalegites in the north of Egypt. The Avims are mentioned in the context of the Egyptian conquest of Palestine, and they are thought to be the same people as the Avims of the biblical text. The Avims were a people who lived in the region of modern Israel and Palestine, and they were mentioned in the context of the Egyptian conquest of Palestine. The name Avims is thought to be a corruption of the Egyptian name for the people, which may have been the Amorites or the Amalegites. The Avims are mentioned in the Egyptian records as a people living in the area of modern Israel and Palestine.

AXE

Egyptian Axe. — (British Museum.)

2. ǎ区域内, Chereb, which is usually translated "sword," is used of other cutting instruments, as a "knife" (Josh. v. 2) or razor (Ex. v. 1), or a tool for hewing or dressing stones (Ex. xx. 25), and is once rendered "axe" (Ex. xxvi. 9), evidently denoting a weapon for destroying buildings, a pick-axe.

3. ǎ区域内, Cossid, occurs but once (Is. lxviii. 6), and is evidently a later word, denoting a large axe. It is also found in the Targum of Jer. xlvii. 22.

4. ǐ区域内, Magzérith (2 Sam. xii. 31), and ǐ区域内, Míg'érith (1 Chr. xx. 3), are found in the description of the punishments inflicted by David upon the Ammonites of Rabbah. The latter word is properly "a saw," and is apparently an error of the transcriber for the former.

6. ǐ区域内, Mûtatu, rendered "axe" in the margin of Is. xlvii. 12, and Jer. x. 3, was an instrument employed both by the iron-smith and the carpenter, and is supposed to be a curved knife or bill, smaller than

7. ǐ区域内, Kavshin, a large axe used for felling trees (Judg. ix. 48; 1 Sam. xiii. 20, 21; Ps. lxiv. 5; Jer. xlvii. 22). The words 1, 5, and 7 have an etymological affinity with each other, the idea of cutting being that which is expressed by their roots. The "battle-axe," ǐ区域内, mappêla (Jer. li. 20), was probably, as its root indicates, a heavy mace or

tion of it, as "dwellers in the lowlands," is not obvious; nor does he specify any derivation.

c. See Leeneker's convenient hypograph (Kenman, p. 158), for which, as is often the case, he does not condescend to give the shadow of a reason.
AZAEL

AZAEL (Açâ'elos; [Abb. 'Açâ'el; Koedus], name of a man (1 Esdr. ix. 14). [Açâ'el].)

AZAE LEUS (Açâ'elos; [Alex. 'Açâ'el; Biolas], an Israhite in the time of Esdras; the name is probably a repetition of that preceding it (1 Esdr. ix. 31).

AZAL (Azal, 557, but from the euphonic accent 555, Azal: 'Açâ'al; Alex. [Comp. Afr.]. 'Açâ'el; name of a prominent), a name only occurring in Ezeh. xiv. 5. It is mentioned as the limit to which the "aravim" or eft (55) of the Mount of Olives will extend when "Jehovah shall go forth to fight." The whole passage of Zecharilah is a highly poetical one; and several commentators agree with Jerome in taking Azal as an apppellative, and not a proper name.

AZALIAH (55555 [where Jehovah has spred]: 'Ezzâ'el; Ezâ'el; [Vat. Ezzâ'el, Ezâ'el]; Alex. [Essâ'elias in 1 K.]; Zâ'el; Ezâ'el). The father of Shemaiah the son of Shobab in the reign of Josiah (2 K. xxii. 3; 2 Chr. xxxiv. 18).

AZARIAH (5555 [where Jehovah bears]; 'Açâ'aria [Vat. seren]: 'Açâ'arion). The father or immediate ancestor of Jesse, the Levite in the time of Nehemiah (Neh. vi. 9). W. A. W.

AZARPHION (Açâ'arphiôd; [Vat. Açâ'arphiôd]: Alex. Açâ'arphiôd; Abb. 'Açâ'arphiôd; Syphus, 1 Esdr. xiv. 33). Possibly a corruption of SeraPhim.

AZARA (Açâ'arai; Atti), one of the "servants of the temple" (1 Esdr. xiv. 31). No corresponding name can be traced in the parallel list in Ezra.

AZARIEL (the same name as the succeeding one; 55555; 'Oçâ'riô: [Vat. Alex. E.A.-'çâ'riô: Comp. 'Eçâ'riô], a Levite musician (Neh. xii. 38). [The A. V. ed. 1611, following the Bishop's Bible, incorrectly reads 'Azarad.']

AZAREEL (55555 [where God helps]: 'Oçâ'riô: [Vat. spirc: Abb. Alex. 'Eçâ'riô; Comp. 'Açâ'riô]; Ezrael). 1. A Korhite who joined David in his retreat at Ziklag (1 Chr. xii. 6).

2. ('Açâ'riô: [Vat. Açâ'riô; Alex. 'Eçâ'riô]) A Levite musician of the family of Heman in the time of David. 1 Chr. xxviii. 18; called 'Uzzai, in xxv. 4.

3. ('Açâ'riô: [Vat. Açâ'riô; Alex. 'Eçâ'riô]: Ezrâ'el). Son of Judah, and prince of the tribe of Dan when David numbered the people (1 Chr. xxviii. 22; 27).

4. ('Eçâ'riô: [Vat. 'Eçâ'riô; Ezrâ'el]. One of the sons of Bani, who put away his foreign wife on the command of Ezra (Ezr. x. 41); apparently he same as Ezrâ'el 1 Esdr. ix. 34.

AZARIAH

5. ('Eçâ'riô: [Comp. Abb. 'Eçâ'riô; Alex. 'Eçâ'riô; Ezrâ'el]. Father, or ancestor, of Maaseiah, or Amaziah, a priest who dwelt in Jerusalem after the return from Babylonia (Neh. xi. 13; comp. 1 Chr. ix. 12). W. A. W.

AZARIAH (55555 and 5555; 'Açâ'riôs; Azariah: who is God that helped). It is a common name in Hebrew, and especially in the families of the priests of the line of Eleazar, whose name has precisely the same meaning. Azariah. It is nearly identical, and is often confounded with Ezra as well as with Zerubbabel and Seraiah. The principal persons who bore this name were:

1. Son of Ahimad (1 Chr. vi. 9). He appears from 1 K. iv. 2, to have succeeded Zadok, his grandfather, in the high-priesthood, in the reign of Solomon. Ahimad having died before Zadok. [Ahimad]. To him, it can scarcely be doubted, instead of to his grandson, Azariah, the son of Jehoanan, belongs the notice in 1 Chr. vi. 10, "He it is that executed the priest's office in the temple that Solomon built at Jerusalem," meaning that he officiated at the consecration of the temple, and was the first high-priest that ministered in it. The other interpretation which has been put upon these words, as alluding to the Azariah who was high-priest in Uzziah's reign, and resisted the king when he attempted to offer incense, is quite unsuited to the words they are meant to explain, and utterly at variance with the chronology. For this Azariah of 1 Chr. vi. 10 precedes Amariah, the high-priest in Jehoshaphat's reign, whereas Uzziah was king five reigns after Jehoshaphat. Josephus merely mentions Azariah as the son and successor of Ahimad.

2. [Vat. 'Oçâ'riô: Vat. Ozeria]. A chief officer of Solomon's, the son of Nathan, perhaps David's grandson (1 K. iv. 5).

3. (55555, 55555) in 2 K. xv. 6 [where Jehovah helps]: 'Açâ'riôs; Azariah]. Tenth king of Judah, more frequently called Uzziah (2 K. xiv. 21, xv. 1, 6, 7, 8, 17, 23, 27; 1 Chr. iii. 12).

4. [Vat. M. 'Oçâ'riô: H. ë. 'Açâ'riô: Alex. 'Açâ'riô]. Son of Eliah, of the sons of Zerah, where, perhaps, Zerubbabel is the more probable reading (1 Chr. ii. 8).

5. Son of Jehon of the family of the Jeraumleeves and descended from Jara the Egyptian slave of Sheshesh (1 Chr. ii. 59, 39). He was probably one of the captains of hundreds in the time of Athaliah mentioned in 2 Chr. xxiii. 18; and there called the son of Obed. This fact assigns the compilation of the genealogy in 1 Chr. ii. 59-61 to the reign of Jeroham.

6. The son of Jehonan, 1 Chr. vi. 10, 11. He must have been high-priest in the reigns of Aliah and Asa, as we know his son Amariah was in the days of Jehoshaphat, the son of Asa. It does not appear what part he took in Asa's zealous reformation (2 Chr. xvi.), nor whether he approved the stripping of the house of God of its treasures to induce Jehoram to break his league with Baasha king of Israel, as related 2 Chr. xvi., for his name and his office are never alluded to in the history of Asa's reign, either in the book of Kings or Chronicles. The active persons in the religious movements of the times were the king himself and the

* The original article has been here combined with that in the Encyclopaedia Britannica.
two prophets, Azariah the son of Oded, and Haman.

The silence concerning Azariah, the high-

priest, is, perhaps, rather unfavorable than other-

wise to his religious character. His name is

almost lost in Josephus's list of the high-priests.

Having lost, as we saw in the article Azariah, its

termination Αζαρια, which adhered to the following

name, it got by some process transformed into

城市发展．

7. Another Azariah is inserted between Hilkiah,

in Josiah's reign, and Seriah, who was put to

death by Nebuchadnezzar, in 1 Chr. vi. 13. But

Josiah does not mention him by name, making Se-

rial the son of Hilkiah, and there seems to be

scarcely room for him. It seems likely that he

may have been inserted to assimilate the genealogy

to that of Ezra vi. 7, where, however, the Seriah

and Azariah are probably neither of them the high-
priests of those names.

8. Son of Zephaniah, a Kohathite, and ancestor of

Samuel the prophet (1 Chr. vi. 96). Apparently

the same as Uzziiah in ver. 24.

9. Azariah, the son of Oded (2 Chr. xv. 1),
called simply Oded in ver. 8, was a remarkable

prophet in the days of king Asa, and a contempo-

rary of Azariah the son of Johanan the high-priest,

and of Haman the seer. He powerfully stirred up

the spirit of Asa, and of the people of Judah and

Benjamin, in a brief but pithy prophecy, which has

been preserved, to put away all idolatrous worship

and to restore the altar of the one true God before

the porch of the temple. Great numbers of Israelites

from Ephraim, and Manasseh, and Simeon, and all

Israel, joined in the national reformation, to the

great strengthening of the kingdom; and a season

of rest and great prosperity ensued. Oded, the

prophet in the days of Azaz, may probably have

been a descendant of Azariah.

10. Son of Jehoshaphat king of Judah (2 Chr.

xxii. 2).

11. (גנדייינאשנו) Another son of Jehoshaphat,

and brother of the preceding (2 Chr. xxii. 2).

12. [O'cylrov, Var. Ócylrov]: Ochozias. At 2

Chr. xxii. 6, Azariah is a clerical error for Azahiah.

13. (זנדייינאשנו) Son of Jeroham, and one of

the captains of Judah in the time of Athaliah (2 Chr.

xxiii. 8).

14. The high-priest in the reign of Uzziah, king of

Judah, whose name, perhaps from this circumstance,
is often corrupted into Azariah (2 K. xiv.

21, xv. 1, 6, 7, 8, Æc.). The most memorable

event of his life is that which is recorded in 2 Chr.

xxvi. 17-20. When king Uzziah, elated by his

great prosperity and power, "transgressed against the

Lord his God, and went into the temple of the

Lord to burn incense upon the altar of incense," Azariah

the priest, accompanied by eight of his brethren,
got in boldly after him, and withstood him.

With unflinching faithfulness, and a high

sense of his own responsibility as ruler of the

House of God, he addressed the king with the well-

merited reproof — "It appertaineth not unto thee,

Uzziah, to burn incense unto the Lord, but to the

priests the sons of Aaron, that are consecrated to

burn incense: go out of the sanctuary, for thou

must needs be despised; neither shalt thou be for thine honor

from the Lord (μορ)." And it is added that when

Azariah the chief priest and all the priests looked

upon him, behold he was leprous in his forehead,

and they thrust him out from thence; yea, himself

hastened to go out, because the Lord had smitten him." Uzziah was a leper unto the day of his

death, and, as such, was never able again to go to

the Lord's house, which was afterwards violently

invaded. Azariah was contemporary with Isaiah

the prophet, and with Amos and Joel, and doubt-

lessly witnessed the great earthquake in Uzziah's reign

(Am. i. 1; Zech. xiv. 5). He is not men-

tioned in Josephus's list. "Iωάνας occurs instead

possibly the name of the prophet inadvertently sub-

stituted for that of the high-priest. Neither is he

in the priestly genealogy of Zech. vi. 11.

15. [Rom. Quer. Var. Vat. Origen.]: Son of

Johanan, one of the captains of Ephraim in the

reign of Alaz (2 Chr. xxviii. 12), who sent back

the captives and spoil that were taken in the

invasion of Judah by Pekah.

16. [Var. Alex. Mid. Ζαχαρίας.]: A Kohathite,

father of Joel in the reign of Hezekiah (2 Chr.

xxix. 12).

17. [Var. Ζαχαρίας.]: A Merarite, son of

Jehaleel, in the time of Hezekiah, contemporary

with the son of the preceding (2 Chr. xxix. 12).

18. The high-priest in the days of Hezekiah (2 Chr.

xxxii. 10-13). He appears to have cooperated zealously with the king in that thorough purifica-

tion of the temple and restoration of the temple-
services which was so conspicuous a feature in Hez-

ekiah's reign. He especially interested himself in

providing chambers in the house of the Lord in

which to store the gifts and offerings and consec-

rated things for the use of the priests and Levites,

and in appointing overseers to have the charge of

them. For the attendance of priests and Levites,

and the maintenance of the temple-services, de-

pended entirely upon the supply of such offerings,

and whenever the people neglected them the priests

and Levites were forced to disperse themselves to

their villages, and so the house of God was deserted

(Comp. Neh. x. 35-39, xii. 27-30, 44-47). His

name seems to be corrupted into Ζαχαρίας in Jose-

phus. He succeeded Urijah, who was high-priest

in the reign of Alaz. Who his successor was is

somewhat uncertain. He is not, any more than the

preceding, included in the genealogy of 1 Chr. vi.

19. [Var. Alex. FA. Α'αχαρίας.]: Son of Maaz-

iah, who repaired part of the wall of Jerusalem

in the time of Nehemiah (Neh. iii. 29, 24).

20. [Var. Alex. FA. Α'αχαρίας.]: One of the

leaders of the children of the province who went

up from Babylon with Zerubbabel (Neh. vii. 7).

Elsewhere called Seriah (Ezr. ii. 2) and Zacha-

rias (1 Esdr. v. 8).

21. [Rom. Var. Alex. FA. omit; Mid. Α'αχαρίας.]

One of the Levites who assisted Ezra in instructing

the people in the knowledge of the law (Neh.

vii. 7). Called Ζαχαρίας in 1 Esdr. iv. 43.

22. [In Neh. x. Α'αχαρίας, Comp. αρ, FA.

ζαχαρίας: In Neh. xii. Var. FA. Ζαχαρίας.]: One of

the priests who sealed the covenant with Ne-

ehemiah (Neh. x. 2), and probably the same with the

Azariah who assisted in the dedication of the city

wall (Neh. xii. 32).

23. (Α'αχαρίας.): Jezeaniah (Jer. xxxiii. 2).

24. The original name of Abed-ego (Dan. i. 6, 7, 11, 19).

He appears to have been of the seed-

royal of Judah, and for this reason selected, with

Daniel and his other two companions, for Nebu-

chadnezzar's especial service. The three children,

as they were called, were remarkable for their

beauty, and wisdom, and knowledge, and intelli-

gence. They were no less remarkable for their
AZARIAS (Ἀζαρίας; Azariah). 1. (1 Esdr. ix. 21) = Uzziel, Ex. 21. 2. (1 Esdr. ix. 43) = Urieliah, Neh. viii. 4. 3. (Alex. Ἀζάριας: 1 Esdr. ix. 48) = Azaziah, Neh. viii. 7.

AZAZ (אָצָא; strong;): ‘Aẓqā’s; [Vat.] Alex. Ὄζος; [Vomp. Ἀζής]. A Reubenite, father of Bech (1 Chr. v. 8).

AZAI stands in the margin of the A. V. (Lev. xvi. 8) for “scope-gate.” See ATEMET, THE DAY OF, under III. and VI.

AZAI (AZAIH [אָצָי; strong;] Jekoreh strengthened): ‘Oẓāz; [Vat. F.A. Ὅζαζ; Ozzian].
1. A Levite musician in the reign of David, appointed to play the harp in the service which attended the procession by which the ark was brought up from the house of Obed-edom (1 Chr. xxv. 21).
2. [Vat. Oẓāz]. The father of Hosen, prince of the tribe of Ephraim when David numbered the people (1 Chr. xxvii. 20).
3. (Vat. Ὅζαζ; Alex. Ὄζαζ; Azirias). One of the Levites in the reign of Zechariah, who had charge of the tithes and dedicated things in the temple under Conaniah and Shelumiel (2 Chr. xxxix. 13).

AZIBAZARETH (Ἀζιβαζαρέθ; [Vat.-φαθ; Alex. Ἀζιβαζαρέθ; Johazareth], king of the Assyrians, probably a corruption of Esar-haddon (1 Esdr. vi. 60). [The A. V. ed. 1611 reads, more correctly, “Azazarath.”]

AZIBUK (אֶזְבּוּך; Ἀζιβούκ; Alex. Ἀζιβοὺκ; Azibuk). Father or ancestor of Nehemiah, the prince of part of Bethzur (Neh. xii. 16).

AZIKAH (אָזְיקָה) from a root signifying to dig or till the ground; see Gesen. s. v.: ‘Azqēḏ, once ‘Iaqqōḏ: ‘Azēr, a town of Judah, with dependent villages (= daughters) lying in the Shephelah or rich agricultural plain, a situation quite in accordance with the derivation of the name given above. It is named with Adullam, Shunem, and other places known to have been in that locality (Josh. xv. 57; 2 Chr. xi. 9; Neh. xi. 30), but is most clearly defined as being near Shechem (that is the northern one) [Simon] (1 Sam. xvii. 1), Esmer’s pursuit of the Canaanites after the battle of Beth-horon extended to Azizah (Josh. x. 10, 11).
Between Azizah and Shechem, an easy step out of their own territory, the Philistines encamped before the battle in which Goliath was killed (1 Sam. xvii. 1). It was among the cities fortified by Rechabim (2 Chr. xi. 9), was still standing at the time of the invasion of the kings of Babylonia (Alex. xxxiv. 7).

AZIZA (Ἀζίζα; Azira). 1. A Levite musician in the reign of David, appointed to play the harp in the service which attended the procession by which the ark was brought up from the house of Obed-edom (1 Chr. xxv. 21). 2. (1 Esdr. ix. 43) = Urieliah, Neh. viii. 4.

AZIZA (Ἀζίζα; Azira). 1. A Levite musician in the reign of David, appointed to play the harp in the service which attended the procession by which the ark was brought up from the house of Obed-edom (1 Chr. xxv. 21). 2. (1 Esdr. ix. 43) = Urieliah, Neh. viii. 4.
AZMAVETH (אי'ומ [strong and death, Gez.]: 'Aṣ'āḇēṯ [Vat. 'Aṣ'āḇēth, 'Aṣ'āḇēth, 'Aṣ'āḇē]. Azel, Ammeq, 1 Chr. 2:37. 9. One of David's mighty men, a native of Bethurim (2 Sam. xxviii. 31; 1 Chr. xi. 33), and therefore probably a Benjamite. 2. (Greek: 'Aṣ'āḇēth). A descendant of Mephi-boseth, or Merib-bosea (1 Chr. viii. 36, ix. 42. [In 1 Chr. viii. 36 the A. V. ed. 1611, etc. reads "Azmaveth," following the Bishops' Bible].)

3. (Aṣ'āḇēth). The father of Jeiel and Pelet, two of the skilful Benjamite singers and archers who joined David at Ziklag (1 Chr. xiv. 1), perhaps identical with 2. It has been suggested that in this passage "sons of Azmaveth" may denote natives of the place of that name.

4. Overseer of the royal treasures in the reign of David (1 Chr. xxviii. 25).

AZMAVETH (אי'ומ [strong and death, Gez.]: 'Aṣ'āḇēṯ [Vat. in Ezr., 'Aṣ'āḇēth]: "Azmaveth," a place to all appearance in Benjamin, being named with Anathoth, Kirjath-jearim and other towns belonging to that tribe. Forty-two of the Bene-Azmaroth returned from the captivity with Zerubbabel (Ezr. ii. 24). The "sons of the singers" seem to have settled round it (Neh. xii. 29). The name elsewhere occurs as BETH-AZMMAVETH. Azmaveth does not make its appearance in the lists in Joshua, but the name was borne by several Benjamites of the kindred of Saul (1 Chr. viii. 36, ix. 42, xii. 3; in the last passage Bene-A. may merely denote natives of the place, especially as natives of Anathoth, Gibeah, &c. are mentioned in the same verse). G.

AZMON ('ai'om or 'ai'mon [strong]: 'Āṣ-μō'nā, 'Āṣμwānā: [Alex. once 'Aṣμwanoν: "Azmonei, a place named as being on the S. boundary of the Holy Land, apparently near the torrent of Egypt (Wadi el-Arish) (Num. xxxiv. 4, 5; Josh. xiv. 1). It has not yet been identified. It is mentioned by Eusibius and Jerome ("Amonus," but evidently was not actually known to them."

* Mr. Williams (Holy City, p. 462) would identify Azmon with Asinach, of which he speaks as west of Kedesh (Kedesh). Dr. Robinson in tracing the southern boundary of Judah (as laid down in Josh. xv. 1-4) makes no account of this proposed identification (Phys. Geogr. p. 17). Kloebel remarks (Exeget. Handb. xiii. 414) that the name reminds us of the "Asišim," an Arab tribe well known in that part of the desert (Deb. 19. 186)."

AZNOTH-TEBAR (אי'ומת-תאבר: 'Aṣ'āḇēṯ-'Aṣ'āḇēbā: [Alex. "Aṣ'aḇāθ 'Aṣ'āḇîbāh: Aznothtabor] = the era (i.e. possibly the annals) of Tabor, one of the landmarks of the boundary of Naphtali (Josh. xix. 34). The town if it be, or the reason for the expression contained in the name, has hitherto escaped recognition. By Eusibius (under "Aṣ'āḇēbā") it is mentioned as lying in the plain in the confines of Dioscearen. For the use of the word "Aṣ'āḇēbā" see Zebon-Sheva; and for the metaphor involved in the name, comp. Cheththoth Tabor.

AZOR ("Aṣ'āḇ: Azor), son of Elakim, in the line of our Lord (Matt. i. 13, 14).

of Jezebel, who represented his tribe in the division of the promised land (Num. xxxiv. 26).

A. W. W.

AZZUR (אֶזוּר) [helper]: "Aqūr; [Vat. אָצוּר; Ab. 'Aẓār]. One of the heads of the people who signed the covenant with Nehemiah (Neh. x. 17). The name is probably that of a family, and in Hebrew is the same as elsewhere represented by Azuz.

W. A. W.

B.

BAAL (בָּאָל). Baal: Baal, the supreme male Divinity of the Phoenician and Canaanitish nations, as Asherah was their supreme female divinity. Both names have the peculiarity of being used in the plural, and it seems certain that these pluralis designates not (as Gesenius, Thes. x. s.v., maintained) status of the divinities, but different modifications of the divinities themselves. That there were many such modifications of Baal is certain from the fact that his name occurs with numerous adjuncts, both in the O. T. and elsewhere, as we shall have occasion to notice hereafter. The plural Baalim is found frequently alone (e. g., Judg. ii. 11, x. 19; 1 K. xviii. 18; Jer. ix. 14; Hos. ii. 17), as well as in connection with Asherah (Judg. x. 6; 1 Sam. vii. 4) and with Asherah, or, as the version renders it, "the groves" (Judg. iii. 7; 2 Chr. xxxiii. 3). There is no difficulty in determining the meaning of the name, since the word is in Hebrew a common noun of frequent occurrence, having the meaning Lord, not so much, however, in the sense of ruler as of Master, Owner, Possessor. The name of the god, whether singular or plural, is always distinguished from the common noun by the presence of the article (וַּבַּאֲל, etc.), except when it stands in connection with some other word which designates a peculiar modification of Baal. In the Chaldaic form the word becomes shortened into אֱל, and, thence dropping the guttural, ב, Biit, which is the Babylonian name of this god (Buxtorf, loc. cit., Chaldb. et Talm., Gesen., Furst, Movers; the identity of the two words is, however, doubted by Rawlinson, Hist. i. 319).

There can be no doubt of the very high antiquity of the worship of Baal. We find his worship established amongst the Moabites and their allies the Medesians in the time of Moses (Num. xxxii. 41), and through these nations the Israelites were seduced to the worship of this god under the particular form of Baal Peor (Num. xxxv. 3 ff.; Deut. iv. 3). Notwithstanding the feathery punishment which their idolatry brought upon them in this instance, the succeeding generation returned to the worship of Baal (Judg. ii. 10-14), and with the exception of the period during which Gideon was judge (Judg. vi. 26 ff.; viii. 33) this form of idolatry seems to have prevailed amongst them up to the time of Samuel (Judg. x. 10: 1 Sam. xii. 4), at whose request the people renounced the worship of Baalim. Two centuries pass over before we hear again of Baal in connection with the people of Israel, though we can scarcely conclude from this silence that his worship was altogether abandoned. We know that in the time of Solomon the service of many gods of the surrounding nations was introduced, and particularly that of Asherah, with which Baal is so frequently connected. However this may be, the worship of Baal spread greatly, and, together with that of Asherah became the religion of the court and people of the ten tribes under Ahaz, king of Judah, in consequence of his marriage with Jezebel (1 K. xvi. 31-34; xxiii. 19, 22). And though this idolatry was occasionally put down (2 K. iii. 2, x. 28) it appears never to have been permanently or effectually abolished in that kingdom (2 K. xvi. 16). In the kingdom of Judah also Baal-worship extensively prevailed. During the short reign of Ahaziah and the subsequent usurpation of his mother Athaliah, the sister of Ahaz, it appears to have been the religion of the court (2 K. xxii. 27; comp. xi. 18), as it was subsequently under Ahaz (2 K. xvi. 3; 2 Chr. xxviii. 2), and Manasseh (2 K. xxii. 3).

The worship of Baal amongst the Jews appears to have been appointed with much pomp and ceremony. Temples were erected to him (1 K. xvii. 52; 2 K. xi. 18); his images were set up (2 K. x. 28); his altars were very numerous (Jer. xi. 13), were erected particularly on lofty eminences (1 K. xviii. 29), and on the roofs of houses (Jer. xxviii. 25); there were priests in great numbers (1 K. xviii. 19), and of various classes (2 K. x. 19); the worshipers appear to have been arrayed in appropriate robes (2 K. x. 22); the worship was performed by burning incense (Jer. vii. 9) and offering burnt-sacrifices, which occasionally consisted of human victims (Jer. xix. 3). The officiating priests danced with frantic shouts around the altar, and cut themselves with knives to demonstrate their devotion and compassion for the god (1 K. xxi. 26-28; comp. Lucian, De Syr. dea, 50; Tert. Apol. 9; Lucan, i. 565; Tibull. i. 6. 47).

Throughout all the Phoenician colonies we continually find traces of the worship of this god, partly in the names of men such as Ahaziah, Asdrubal, Haman-baal, and still more distinctly in Phoenician inscriptions yet remaining (Gesen. Mon. Phoen. passim). Nor need we hesitate to regard the name Bel (Jer. xvi. 1) or Belus (Herod. i. 181), as essentially identical with Baal, though perhaps under some modified form. Rawlinson distinguishes between the second god of the first trial of the Assyrian pantheon, whom he names provisionally Bel-Nimrud, and the Babylonian Bel whom he considers identical with Merodach (Herod. i. 594 ff.; 627 ff.).

The same perplexity occurs respecting the connection of this god with the heavenly bodies as we have already noticed in regard to Asherah. Creswell (Synops, ii. 413) and Movers (Phoen. i. 180) declare Baal to be the Sun-god; on the other hand, the Babylonian god is identified with Zeus by Heindeit, and there seems to be no doubt that Bel-Merodach is the planet Jupiter (Rawlinson, Hist. i. c.). It is quite likely that in the case of Baal as well as of Asherah the symbol of the god varied at different times and in different localities. Thus the great number of allusions with which the name of Baal is found is a sufficient proof of the diversity of characters in which he was regarded, and there must no doubt have existed a corresponding diversity in the worship. It may even be a question whether in the original notion of Baal there was reference to any of the heavenly bodies, since the derivation of the name cannot be traced in any case of Ashethoreth directly to any of the planets. If we separate the name Baal from idolatry, we seem, according to its nature
ing, to obtain simply the notion of Lord and Pro-
prietor of all. With this the idea of productive
power is naturally associated, and that power is as
naturally symbolized by the sun, whilst on the
other hand the ideas of providential arrangement
and rule, and so of prosperity, are also suggested
by the word, and in the astrological mythology these
ideas are associated with the planet Jupiter. In
point of fact we find adjuncts to the name of Baal
answering to all these notions, e. g. Beelzebub,
Baalhamon (Plut. Pas. v. 2, 67) = בּaal בּהָמָן,
"Lord of the heavens; " בּaal בּהָמָן, Baal-Hamon
(Gesen. Mon. Phen. 349), the Sun-Baal, and simi-
larly the name of a city in the O.T. בּaal בּהָמָן
(Cant. viii. 11); בּaal בּהָמָן, Baal-Gad, the
name of a city (Josh. xi. 17), Baal the Fortune-bringer,
which god may be regarded as identical with the
planet Jupiter (Gesen. Thee. Fürst.). Many more
compounds of Baal in the O.T. occur, and
amongst them a large number of cities, which are
mentioned below. We shall first mention those
names of men and of gods in which Baal is the
first element. It may be noted before proceeding
to specify the particular compounds of Baal that
the word standing alone occurs in the O.T. in
two (probably) instances as the name of a man (1 Chr.
v. 6, viii. 39, ix. 30). First considers that in
these instances the latter element of the word is
dropped.

1. BA'AL-BE'rITH (בּaal בּרֵית): [טז Baal
דֹּדֲחֵיתָא,] Baalbèreth; [Aex. ton Baal Beep eis
diaqethia,] Baal diacethia; [Baal jiwtha.] Baal-
berith. This form of Baal was worshipped at Shechem by the Israelites after the death of Gideon
(Judg. viii. 33, ix. 4). The name signifies the
Covenant-Baal, and has been compared with the
Greek Zeux ðiροσ or the Latin Deus fiúna. The
meaning, however, does not seem to be the god
who presides over covenants, but the god who comes
into covenant with the worshippers. In Judg. ix.
46 he is called נָֽוֵֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽবֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽבֶֽעֶֽלֶֽבֶֽעֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽלֶֽl — Le-
then Baal and the Hebrew Ish—"at that day, saith Jehovah, men shall call Me 'Ish,' and shall cut Me no more 'Baal,'" both words having the sense of "my husband.""

6. Such places called by this name or its compounds must have been identified, and several of which existed at the time of the conquest, were either near Phœnicia, as Baal-gad, Baal-hermon, Belmarlos (of later times); or in proximity to some other acknowledged seat of heathen worship, as Baal-meon and Ramath-Baal, near the infamous seat of Baal-teron, or Kirjath-Baal and Bal-tamar, which were in the district containing the early and famous sanctuaries and high places of Gilgal and Bethel.

(c). On more than one occasion Baal forms part of the names of places which we elsewhere discover to have been elevated spots, spots in which the worship of the Canaanites delighted. Thus Baal-hermon is elsewhere called "Mount B.,” and Baal-Peraziim is (very probably) "Mount P.,” Baalath-téer too is called in the parallel lists Ramath (6. c. "height.”) Compare the Vulgate rendering of Baalath (<Rom. 8 ch. xvi.), ad colloem <Vulgate> "the hillside." There is the consideration of the very deep significance with which the name of Baal must always have been invested both for the Israelites and for their predecessors in the country: for those who venerated and those who were commanded to hate him. Surely this significance must have been sufficient to prevent that portentious name from becoming a mere alternative for a term which, like Beth, was in the commonest daily use.

The places in the names of which Baal forms a part are as follows:

1. BAAL. [Baal: Jat. Balæ; Vat. Balæt: "Baal.”], a town of Simeon, named only in 1 Ch. iv. 33, and which from the parallel list in Josh. xix. 9, seems to have been identical with BALEATH-BEER.

2. BALEATH (בַּלַיֶּה; fem. possess., i.e. of a town = city or state, Gen.]: Bæa: [in Josh. xv. 9, Vat. 26aa for bia: Baal, 11, εἰς Ἁλῆ, Alex.] Bala: [Bala: "Baal.”]

(a). Another name for KILILIAH-JEARM, or KILILIAH-BAIL, the well-known town, now Kurie of El Biaa. It is mentioned in Josh. xv. 9, 10; 1 Ch. xiii. 6 (εἰς πόλιν Δαοίαν: αδ collem Corynthiaram). In Josh. xvi. 11, it is called Mount ("Mount”) Baalah, and in xv. 60, and xviii. 14, Kirjath-Baal. From the expression "Balah, which is Kirjath-jearm" (comp. "Jebusa, which is Jerusalem," 2 Sam. xvii. 8), it would seem as if Baalah were the earlier or Canaanite application of the place. In 2 Sam. vii. 2, the name occurs slightly altered as "Baal of Judah" (בַּלַיֶּהוּ נֶבּה, and τωρ ἀρχάγγελον Ιουδα, de viri Judae)."

(b). [Bala: Abd. Alex, Bala: ] A town in the south of Judah (Josh. xv. 29), which in xiv. 3 is called Balalah, and in the parallel list (1 Ch. iv. 29) Balaah.

3. BALEATH (בַּלַיֶּה; [בַּלַיֶּהוּ, Balaah, om. in 1 K.; Vat. in 2 Ch. Balæ, Alex. Baława, Bala, Balæt: Balaath, 1 K. Balaath, a town of Ben named with Gildeon, Gath-rimon, and other Philistine places (Josh. xiv. 44). It is possible that the same town is referred to in 1 K. ix. 18 and 2 Ch. viii. 6 (Balaah). See Joseph. Ant. viii. 6, § 1.

4. BALEATH-BEER (בַּלַיֶּה בֵּיר, Baal of the sec: Holy-well: Balaë: [Vat. Báæa: Alex. Bala Balaath]: [Bala Balaath: Balaath-Beer], a town among those in the south part of Judah, given to Simeon; and which also bore the name of RAHILLIHAM, or, "villages of the South." (Josh. xix. 8). In another list it appears in the contracted form of Bala.

Other sacred wells in this parched region were the Beer-jalni-rai, the "well of the vision of God;" and Beer-sheba, the "well of the oath.”

5. BALEATH-GAD (בַּלַיֶּה גָּד, Balaegad: [Abd. Alex. Balaegad: Comp. Balægad: in Josh. xvii. 5, Geægad, Comp. Balægad: xii. 7, Vat. M. Balaægæ:] Balaugad), a place evidently very well known at the time of the conquest of Palestine, and as such used to denote the most northern (Josh. xvi. 17, xii. 7) or perhaps northwestern (xiii. 5, Hamath being to the extreme northeast) point to which Joshua's victories extended. It was in all probability a Philenian or Canaanite sanctuary of Baal under the aspect of God, or Fortune. [GAD.] No trace of its site has yet been discovered. The words "the plain (בַּלַיֶּה גָּד) of Lebanon” would lead to the supposition that it lay in the great plain between the two ranges of Lebanon and Anti-Lebanon, which is still known by the same Hebrew word el-Bala'as, and it has accordingly been identified by Ren and others with Baalbec (Rom. iii. 519). But against this are the too great distance of Baalbec to the north, and the precise expression of the text —under Mount Hermon” (Jerome: ad sudor montium Hermon). The conjecture of Schwarz (60), supported by Robinson with his usual care, is, that the modern representative of Balaalg is Farina, a place which long maintained a great reputation as the sanctuary of Pan. [CÁREAS PHILIPPI.]

6. BALEEHL-MON (בַּלַע לָם, Balael of multitude: Balaæmon: "as yea habeb peoples a place at which Solomon had a vineyard, evidently of great extent (Comp. viii. 11). The only possible clue to its situation is the mention in Jud. viii. 3, of a Belaenam or Balaenam (Rom. Belaæmon: Vat. Alex. Balaæmon: Comp. Abd. Balaæmon: Bethalæmon: A. V. Balaæmon) near Bethanath: and therefore in the mountains of Ephraim, not far north of Samaria. If so, this vineyard may have been in one of the "fat valleys” of the "drunkards of Ephraim, who were overcome with wine,” to which allusion is made in Is. xxviii. 4.

7. BALEEHL-ZOÈ (בַּלַע זֹא, Baal's village: Balaæzor: [Vat. Balæser]: Alex. Belæsor: [Comp. Balaæser: Balæser]: a place "by" Ephraim (בַּלַע זֹא, where Absalom appears to have had a sheep-farm, and where Amnon was murdered (2 Sam. xiii. 23).

8. MOUNT BALEEHL-MON (בַּלַע הָרָם, Mount of ruin: Balaæharon: [24 ὅς την Ἀραμάην, Alex. το. τ. Balaæarçov, Comp. Abd. το. τ. Balaæarçov mons Balaæharon: Judeg. iii. 5); and simply Baal-hermon ([Balaæe, Vat. Balæ: Bala: Horamon: 1 Ch. v. 23]). This is usually considered as a distinct place from Mount Hermon; but the only apparent ground for so doing is the statement in the latter of the above passages—"unto
BAAL

Baal-hermon, and Senir, and "Mount Hermon;" cut it is quite possible that the conjunction rendered "and" may be here, as often elsewhere, used as an expletive,—"unto Baal-hermon, even Senir, even Mount Hermon." Perhaps this derives some color from the fact, which we know, that this mountain had at least three names (Deut. iii. 9). May not Baal-hermon have been a fourth, in use among the Phoenician worshippers of Baal, one of whose sanctuaries, Baal-gad, was at the foot of this very mountain?

9. BAAL-MEKON (בֵּאל-מֵאָקּון): Near Beth-mekon, in 1 Chr. 27: 20; and Beth-mekon (בֵּאל-מֵאָקּון), one of the towns which were "built" by the Reubenites (Num. xxxii. 38), and to which they "gave other names." Possibly the "Beth," which is added to the name in its mention elsewhere, and which sometimes superseded the "Baal" of the original name, is one of the changes referred to. [Beth-baal-mecon: Beth-mekon (בֵּאל-מֵאָקּון)] is also named in 1 Chr. v. 8, and on each occasion with Nebi.

* The site is still known. "Taking a sweep on the fine turf to the southeast" (from Heshbon), says Mr. Tristram (Land of Israel, p. 540), "we passed by the ruins of Mecon (Baal-mékon), situated on a mamonel exactly like Heshbon, and due east of Nebi, shapeless and featureless, at which a cursory glance was sufficient." H.

10. BAAL-PEKÆAZIM (בֵּאל-פֶּקֶאָזִים): The scene of a victory of David over the Philistines, and of a great destruction of their images, and so named by him in a characteristic passage of exulting poetry—"Jehovah hath burst (נָפַשׁ) upon mine enemies before me as a burst (נָפַשׁ) of waters." Therefore he called the name of that place "Baal-pekáazim," i.e. bursts or destructions (2 Sam. v. 29; 1 Chr. xiv. 11). The place and the circumstance appear to be again alluded to in Is. xxviii. 21, where it is called Mount V. Perhaps this may point to the previous existence of a high place or sanctuary of Baal at this spot, which would lend more point to David's exclamation (see Gesenius, Jês. 844). The LXX. render the name in its two occurrences, respectively ἐπάνω διάκονον, and Διανόησις ψαλατις: [Vat. -pi; in 1 Chr. xiv. 11v. Baal Phæazim, Alex. -esb; Vat. Φαξαϊσιμα] the latter an instance of retention of the original d l word and its explanation aside by side: the former uncertain.

11. BAAL-SHALISHA (בֵּאל-שָלִישָה): [Vat. M. Baalshaphera, H. Baalshaphera; Alex. 2. Baalshaphar; Alex. Baalshaphar: Comp. Baal Saul-shad: Baalshephas], a place named only in 2 K. iv. 12; apparently not far from Gilgal (comp. v. 38).

a The "unto" in the A. V. is interpolated, though not so marked.

BAAL

It was possibly situated in the district, or "land" of the same name. [Shalishah.]

12. BAAL-TASMAR (בֵּאל-תָּסָמָר, sanctuary of the palm: Baal Θασμαρ: Baalthamar), a place named only in Judg. xx. 33, as near Gibeon of Benjamin. The palm-tree (תָּסְמָר) of Deborah (iv. 5) was situated somewhere in the locality, and is possibly alluded to (Stanley, 145, 6). In the days of Ezechias it was still known under the altered name of Baalhadda; but no traces of it have been found by modern travellers.

G.

13. BAAL-ZEPHON (בֵּאל-צֶפֵּון, place of Zephon: Βασίλειον, Baalzeboul: [Alex. Βασίλειον]): A place in Egypt near where the Israelites crossed the Red Sea (Ex. xiv. 2, 9; Num. xxxii. 7). From the position of Goshen and the indications afforded by the narrative of the route of the Israelites, we place Baal-zephon on the western shore of the Gulf of Suez, a little below its head, which at this time was about 30 or 40 miles northward of the present head. [Gospen; Red Sea, Passage of; Baalzaphon.] Its position with respect to the other places mentioned with it is clearly indicated. The Israelites encamped before or at Pi-hahiroth, between Migdol and the sea, before Baal-zephon, according to Ex. (xiv. 2, 9), while in Num. Pi-hahiroth is described as being before Baal-zephon, and it is said that when the people came to the former place they pitched before Migdol (Num. xxxii. 7): and again, that afterwards they departed from before Pi-hahiroth (v. 8). Migdol and Baal-zephon must therefore have been opposite to one another, and the latter behind Pi-hahiroth with reference to the Israelites. Baal-zephon was perhaps a well-known place, if, as seems likely, it is always mentioned to indicate the position of Pi-hahiroth, which we take to be a natural locality [Red Sea, Passage of; Pi-hahiroth]. The name has been supposed to mean "place of Typhon," in allusion to a god of the same name approved by Gesenius (Thes. s. v.). Zephon would well enough correspond in sound to Typhon, had we any ground for considering the latter name to be either Egyptian or Semitic, but as we have not, the conjecture is a very bold one. Were, however, Typhon an Egyptian word, we could not consider Zephon in Baal-zephon to be its Hebrew transcription, inasmuch as it is joined with the Hebrew form הֶבֶּל. We would rather connect Baal-zephon as a Hebrew compound, with the root הֶבֶּל, as if it were named from a watch-tower on the frontier like the neighboring הֶבֶּל, "the tower." It is noticable that the name of the son of Gad called Ziphon הֶבֶּל in Gen. (xli. 16) is written Zephon הֶבֶּל in Num. (xxvi. 15). The identifications of Baal-zephon that have been proposed depend upon the supposed meaning "place of Typhon." Forster (Epp. ad Mich., pp. 28, 29) thinks it was Horeopolis, Ηρωοπόλις, which some, as Champollion (L'Egypte sous les Pharaons, ii. 87 a) consider, wrongly, to be the same as Avaris, the stronghold of the Hycanos, both which places were connected with Typhon (Steph. B. s. r. Ἡρωοπόλις: Manetho, ap. Joseph. c. Apion, i. 20). Avaris cannot be Horeopolis, for geographical reasons. (Comp. as to the site of Avaris, Brugsch, Geographische...
Inscriptions, i. 86 ff.; as to that of Herodotus, Lepsius, Chron. d. Aegypt. i. 344 ff., p. 342, against the two places being the same.)

R. S. P.

BA'AL (בעַאל; [jiheon, under Babel, 132), "86K«]. The confirms Part BeAeiffo; cer after with elain against ej.

2. (Baal: [Vat. M. I Chr. viii. 30, Bealakeuq].) The son of Jehiel, father or filter of Gibeon, by his wife Manayah, brother of Kish, and grandfather of Saul (1 Chr. vii. 30, 35). W. A. W.

BA'ALAH. [Baal, No. 2.]

BA'ALATH. [Baal, Nos. 3, 4.]

BA'ALE OF JUHAN. [Baal, No. 2, a.]

* BAALI (בעִיל; Baalxia: Baalil, as employed in Hos. ii. 16, has a twofold sense: first, my Beal, the name of the principal god of the Canaanites; and, second, my lord, as applied by a woman to her husband (Ex. xxiii. 22; 2 Sam. xi. 20). The passage is: "And it shall be that day, saith the Lord, that thou shall call me Ishi, and shalt call me no more Baalii." The time is coming, the prophet would say, when Israel shall utterly renounce his idolatry, and so far from going after heathen gods, shall not even take upon his lips so much as a word that would revile even a thought of the old idolatry which had been so base a violation of the covenant of marriage between Jehovah and his people. See the next verse (17th) which confirms this view. Consult Manger (Comment. in Liber. Hos. p. 132), and Pusey (Minor Prophets, Part I. p. 19). The A. V. (marg.) translates both terms (my husband: my lord). The Vulgate translates the former (mens vivit), but does not translate the latter.

BA'ALIM. [Baal.]

BA'ALUS (בעַאלוס; Baalwsa: [Vat. FA- Beleva, Ch. -f] Baalua), king of the Bene-Ammun (Baalewos vwa Amuwr) at the time of the destruction of Jerusalem by Nebuchadnezzar (Jer. xiii. 14).

BA'ANA (בעָנָא; son of affliction): Baav. [Alex.] Beava: Beaan. The name of several men.

1. The son of Ahiah, Solomon's commissariat officer in Jezebel and the north of the Jordan valley (1 K. iv. 12).

2. (Baal: Beaan.) The father of Zadok, one of those who repaired the wall of Jerusalem after the captivity (Neh. iii. 4).

3. [Baal: Vulg. coram.] (1 Esdr. v. 8.)

BA'ANAAN (בעָנָן; see above).

Baaan: [Vat. in 2 Sam. iv. 5, 9, Beaan: 6, Baraa: 20100."

1. Son of Elimson, a Benjamite, who with his brother Rechab murdered Ish-bosheth. For this they were killed by David, and their murdered bodies hung up over the pool at Hebron (2 Sam. iv. 2, 5, 6, 10).

2. [Alex. Beaan, Beaan: Rom. Vat. in 1 Chr. Noa: in 2 Sam. om.]. A Nebuchadnezzar, father of Hezekiah, father of David's mighty men (2 Sam. xviii. 29; 1 Chr. xi. 30).

3. (Accurately Beaan, נָעַן; Baaan: [Alex. Beaan: Baanun], son of Hushai, Solomon's commissariat officer in Asher (1 K. iv. 16).

BABEL

4. A man who accompanied Zerubbabel on his return from the captivity (Exn. ii. 2; Neh. vii. 7). Possibly the same person is intended in Neh. x. 27. [Bana, 3.]

BA'A'RA (בעַרא; Baas: [Vat. 1 Baas: Beera], one of the wives of Shilaharain, a descendant of Benjamin (1 Chr. viii. 8).

BAASETAH [4 syl. (בעַראת; Baaasa: [Vat. Macar: Besan], a Gereshonite Levite, one of the forefathers of Askph the singer (1 Chr. vi. 40 [29]).

BA'ASHA (בעָשֶׂ; in some eds. בָּשֶׂ; Beasa: Joseph. Barooay: Beasaan), third sovereign of the separate kingdom of Israel, and the founder of its second dynasty. The name, according to Gesenius, is from a root to be wicked, but this would seem impossible unless it has been altered [Ariah], and Calmet suggests that it may mean in the work, from Be, and it make, or he who seeks Be, and lays waste Be. Baasha was son of Abijah of the tribe of Issachar, and conquered against King Nadab, son of Jero- boam, when he was besieging the Philistine town of Gibeon, and killed him with his whole family. He appears to have been of humble origin, as the prophet Jeah speaks of him as having been exalted out of the dust (1 K. xvi. 2). In matters of religion his reign was no improvement on that of Jeroboam: he equally forgot his position as king of the nation of God's election, and was chiefly remarkable for his persevering hostility to Judah. It was probably in the 13th year of his reign [Asa] that he made war on its king Asa, and began to fortify Ramah as an épitéix caught against it. He was defeated by the unexpected alliance of Asa with Benhadad I. of Damascus, who had previously been friendly to Baasha. Benhadad took several towns in the N. of Israel, and conquered lands belonging to it near the sources of Jordan. Baasha died in the 24th year of his reign, and was honorably buried in the beautiful city of Tirzah (Cant. vi. 4), which he had made his capital. The dates of his accession and death according to (F. E. H. i. 321) are c. 934 and c. 931 (1 K. xv. 27, xvi. 7; 2 Chr. xvi. 1-6).

G. E. L. C.

* First derives the name from an obsolete root (existing in Arabic) = valor, boldness.

BA'BEL, BABYLON, &c. (בעַל; Baal, Babylw: [Label, Babylon] is properly the capital city of the country which is called in Genesis Shimar babyl (1x. 4) and in the later Scriptures Chabba, or the land of the Chaldeans (בעָבָל). The name is connected in Genesis with the Hebrew root בבל, "confound," because the god did there confound the language of all the earth (Gen. xi. 9); but the native etymology is Babylon, the queen of the gods, or perhaps more simply the gate of God; and this no doubt was the original intention of the appellative as given by Nimrod, though the other sense came to be attached to it after the confusion of tongues. Probably a temple was the
References to the Babylonians in Alexander’s age the city was originally built about the year B.C. 2230. The architectural remains discovered in southern Babylonia, taken in conjunction with the monumental records, seem to indicate that it was not at first the capital, nor, indeed, a town of very great importance. It probably owed its position at the head of Nimrod’s cities (Gen. x. 10) to the power and prominence whereby it afterwards attained rather than to any original superiority that it could boast over the places coupled with it. *Erech, Ur, and Eblus, appear to have been all more ancient than Babylon, and were capital cities when *Babul was a provincial village. The first rise of the Chaldean power was in the region close upon the Persian Gulf, as Herodotus indicated by his fish-god Oannes, who brought the Babylonians civilization and the arts out of the sea (ap. Struwwel. p. 28, B.). Thence the nation spread northwards up the course of the rivers and the seat of government moved in the same direction, being finally fixed at Babyl., perhaps not earlier than about B.C. 1700.

1. Topography of Babylon—Ancient descriptions of the city. The descriptions of Babylon which have come down to us in classical writers are derived chiefly from two sources, the works of Herodotus and of Ctesias. These authors were both at the head of the time of the Persians—Babylon —not, indeed, at their highest point, but before they had greatly declined and left accounts of the city and its chief buildings, which the historians and geographers of later times were, for the most part, content to copy. The description of Herodotus is familiar to most persons. According to this, the city, which was built on both sides of the Euphrates, formed a vast square, inclosed within a double line of high walls, the extent of the outer circuit being 450, and of the inner 56 miles. The entire area included thus have been about 230 square miles. Herodotus appears to imply that this whole space was covered with houses, which, he observes, were frequently three or four stories high. They were laid out in straight streets crossing each other at right angles, the cross streets leading to the Euphrates being closed at the river end with false gates, which allowed or prevented access to the quays wherewith the banks of the Euphrates were lined along its whole course through the city. In each division of the town, Herodotus says, there was a fortress or stronghold, consisting in the one case of the royal palace, in the other of the great temple of Belus. This last was a species of pyramid, composed of eight square towers placed cye above the other, the dimensions of the basement tower being a stade—or about 200 yards—each way. The height of the temple is not mentioned by Herodotus in his writing ascent, which, rising about round all the towers, led to the summit on which was placed a spacious ark or chapel, containing no statue, but regarded by the natives as the habitation of the god. The temple stood in a sacred precinct, two stades (or 400 yards) square, which contained two altars for burnt-offerings and a sacred ark or chapel, wherein was the golden image of Bel. The two portions of the city were united by a bridge, composed of a series of stone piers with movable platforms of wood stretching from one pier to another. Such are the chief features of the description left us by Herodotus (I. 178-185).

According to Ctesias (ap. Diod. Sic. ii. 7, ff.; the circuit of the city was not 480 but 360 stades— which Ctesias only says, and he says, both sides of the Euphrates, and the two parts were connected together by a stone bridge five stades (above 1000 yards) long, and 30 feet broad, of the kind described by Herodotus. At either extremity of the bridge was a royal palace, that in the eastern city being the more magnificent of the two. It was defended by a triple enceinte, the outermost 60 stades, or 7 miles round; the second, which was circular, 46 stades, or 4¾ miles; and the third 20 stades, or 2½ miles. The height of the second or middle wall was 300 feet, and its towers were 420 feet. The elevation of the innermost circuit was even greater than this. The walls of both the second and the third inclosure were made of colored brick, and represented hunting scenes—the chase of the leopard and the lion—with figures, male and female, regarded by Ctesias as those of Ninus and Semiramis. The other palace was inferior both in size and magnificence. It was inclosed within a single enceinte, 30 stades, or 3½ miles in circumference, and contained representations of hunting and battle scenes as well as statues in bronze, said to be those of Ninus, Semiramis, and Jupiter Belus. The two palaces were joined, not only by the bridge, but by a tunnel under the river! Ctesias’s account of the temple of Belus has not come down to us. We may gather however, that he represented it in a similar character to the temple of Belus, but spoke of it as surrounded by three statues, one of Bel, 40 feet high, another of Ichen, and a third of Juno or Belis. He seems further to have described elaborately the famous "hanging gardens" of Nebuchadnezzar (Diod. Sic. ii. 10) but the description, as reported by Diodorus, is not very intelligible. It appears that they were a square of 400 feet each way, and rose in terraces, the topmost terrace being planted with trees of all kinds, which grew to a great height. In examining the truth of these descriptions, we shall most conveniently commence from the outer circuit of the town. All the ancient writers appear to agree in the fact of a district of vast size, more or less inhabited, having been inclosed within lofty walls, and included under the name of Babylon. With respect to the exact extent of the circuit they differ. The estimate of Herodotus and of Pliny (H. N. vii. 26) is 480 stades, of Strabo (xvi. i. § 5) 595, of Q Curtius (c. 1 § 20) 308, of Ctesibus (ap. Diod. Sic. ii. 7) 362, and of Ctesias (ap. Eust.) 350 stades. It is evident that here we have merely the moderate variations to be expected in independent measurements, except in the first of the numbers. Setting this aside, the difference between the greatest and the least of the estimates is little more than 1 per cent. With this near agreement on the part of so many authors, it is the more surprising that the remaining case should have given the difference of one third more, or 33½ per cent. Perhaps the true explanation is that Herodotus spoke of the outer wall, which could be traced}
in his time, while the later writers, who never speak of an inner and an outer barrier, give the measurement of Herodotus's inner wall, which may have alone remained in their day. This is the opinion of M. Uprert, who even believes that he has found traces of both inclosures, showing them to have been really of the size ascribed to them. This conclusion is at present disputed, and it is the more general belief of those who have examined the ruins with attention that no vestiges of the ancient walls are to be found, or at least, that none have as yet been discovered. Still it is impossible to doubt that a line of wall inclosing an enormous area originally existed. The testimony to this effect is too strong to be set aside, and the disappearance of the wall is easily accounted for, either by the constant quarrelling, which would naturally have commenced with it (Rich, First Int., p. 44), or by the subsidence of the bulwark into the moat from which it was raised. Taking the lowest estimate of the extent of the circuit, we shall have for the space within the rampart an area of above 100 square miles; nearly five times the size of London! It is evident that this vast space cannot have been entirely covered with houses. Pisoenus confesses (ii. 9, ad fin.) that but a small part of the enclosure was inhabited in his own day, and Q. Curtius (v. i. § 27) says that as much as nine-tenths consisted, even in the most flourishing times, of gardens, parks, paradises, fields, and orchards.

With regard to the height and breadth of the walls there is nearly as much difference of statement as with regard to their extent. Herodotus makes the height 200 royal cubits, or 337 feet; 
Ctesias 50 fathoms, or 300 feet; Pliny and Solinus 200 royal feet; Strabo 50 cubits, or 75 feet. Here there is less appearance of independent measurements than in the estimates of length. The two original statements seem to be those of Herodotus and Ctesias, which only differ accidentally, the latter having omitted to notice that the royal scale was used. The later writers do not possess fresh data; they merely soften down what seems to them an exaggeration — Pliny and Solinus changing the cubits of Herodotus into feet, and Strabo the fathoms of Ctesias into cubits. We are forced then to fall back on the earlier authorities, who are also the only eye-witnesses; and surprising as it seems, perhaps we must believe the statement, that the vast inclosed space above mentioned was surrounded by walls which have well been termed "artificial mountains," being nearly the height of the dome of St. Paul's! (See Grote's Greece, vol. iii. p. 397, and, on the other side, Marx's Lit. of Greece; vol. iv. p. 546.) The mined wall of Nineveh was, it must be remembered, in Xenophon's time 150 feet high (Anab. iii. 4, § 10), and another wall which he passed in Mesopotamia was 100 feet high (ibid. ii. 4, § 12).

The estimates for the thickness of the wall are the following: — Herodotus, 50 royal cubits, or nearly 85 feet; Pliny and Solinus 50 royal, or about 60 common feet; and Strabo, 32 feet. Here again Pliny and Solinus have merely softened down Herodotus: Strabo, however, has a new number. This may belong properly to the inner wall, which, Herodotus remarks (i. 181), was of less thickness than the outer.

According to Ctesias the wall was strengthened with 250 towers, irregularly disposed, to guard the weakest parts (Diod. Sic. ii. 7): and according to Herodotus it was pierced with a hundred gates which were made of brass, with brazen lintels and side-posts (i. 129). The gates and walls are alike mentioned in Scripture, the height of the one and the breadth of the other being specially noticed (Jer. li. 58; comp. 1. 15, and ii. 53).

Herodotus and Ctesias both relate that the banks of the river as it flowed through the city were on each side ornamented with quays. The stream has probably often changed its course since the time of Babylonizing greatness, but some remains of a quay or embankment (E) on the eastern side of the stream still exist, upon the bricks of which is read the name of the last king. The two writers also agree as to the existence of a bridge, and describe it very similarly. Perhaps a remarkable mound (K) which interruptts the long flat valley — evidently the ancient course of the river — closing in the principal ruins on the west, may be a trace of this structure.

2. Present state of the Ruins.— Before seeking to identify the principal buildings of ancient Baby-
artificial mounds of enormous size, which have been recognized in all ages as probably indicating the site of the capital of southern Mesopotamia. They consist chiefly of three great masses of building—the high pile of unburned brickwork called by Rich 'Mijelleh,' but which is known to the Arabs as 'Babel' (A); the building demominated the 'Kors' or palace (B); and a lofty mound (C), upon which stands the modern tomb of Ame-rid-ibn-ley, (Lobius's Chabba, p. 17). Besides these principal masses the most remarkable features are two parallel lines of rampart (F F) bounding the chief ruins on the east, some similar but inferior remains on the north and west (I I and H H), an embankment along the river-side (E), a remarkable isolated heap (K) in the middle of a long valley, which seems to have been the ancient bed of the stream, and two long lines of rampart (G G) meeting at a right angle, and with the river forming an irregular triangle, within which all the ruins on this side (except Babel) are inclosed. On the west, or right bank, the remains are very slight and scanty. There is the appearance of an inclosure, and of a building of moderate size within it (D), nearly opposite the great mound of Amuram: but otherwise, unless at a long distance from the stream, this side of the Euphrates is absolutely bare of ruins.

Scattered over the country on both sides of the Euphrates, and reducible to no regular plan, are a number of remarkable mounds, usually standing single, which are plainly of the same date with the great mass of ruins upon the river-bank. Of these, by far the most striking is the vast ruin called the Birs-Nimrud, which many regard as the tower of Babel, situated about six miles to the S. W. of Hillah, and almost that distance from the Euphrates at the nearest point. This is a pyramidal mound, crowned apparently by the ruins of a tower, rising to the height of 153 feet above the level of the plain, and in circumference somewhat more than 2000 feet. As a complete description of it is given under the next article [BABEL, Tower], no more need be said of it here. There is sufficient reason to believe from the inscriptions discovered on the spot, and from other documents of the time of Nebuchadnezzar, that it marks the site of Borsippa, and was thus entirely beyond the limits of Babylon (Beros. Fr. 14).

3. Identification of sites.—On comparing the existing ruins with the accounts of the ancient writers, the great difficulty which meets us is the position of the remains almost exclusively on the left bank of the river. All the old accounts agree in representing the Euphrates as running through the town, and the principal buildings as placed on the opposite sides of the stream. In explanation of this difficulty it has been urged, on the one hand, that the Euphrates having a tendency to run off to the right has obliterated all trace of the buildings in this direction (Layard's Nin. and Babil, p. 493); on the other, that by a due extension of the area of Babylon it may be made to include the Birs-Nimrud, and that thus the chief existing remains will really lie on the opposite banks of the river (Rich, Second Memoir, p. 32; Ker Porter, Travels, ii. 383). But the identification of the Birs with Borsippa completely disposes of this latter theory: while the former is unsatisfactory, since we can scarcely suppose the abrasion of the river to have entirely removed all trace of such gigantic buildings as those which the ancient writers describe. Perhaps the most probable solution is to be found in the fact that a large canal (called Selleb) intervened in ancient times between the Kors mound (B) and the ruin now called Babel (A), which may easily have been confounded by Herodotus with the main stream. This would have had the two principal buildings upon opposite sides; while the real river, which ran down the long valley to the west of the Kors and Amuram mounds, would also have separated (as Ctesias related) between the greater and the lesser palace. If this explanation be accepted as probable, we may identify the principal ruins as follows:—1. The great mound of Babel will be the ancient temple of Belus. It is an oblong mass, composed chiefly of unburned brick, rising from the plain to the height of 140 feet, flattish at the top, in length about 200 and in breadth about 140 yards. This oblong shape is common to the temples, or rather temple-towers, of lower Babylon, which seem to have had nearly the same proportions. It was originally coated with fine burnt brick laid in an excellent mortar, as was proved by Mr. Layard (Nin. and Babil, pp. 500-51); and there was no doubt built in stages, most of which have crumbled down, but which may still be in part concealed under the rubbish. The statement of Berosus (Fr. 14), that it was rebuilt by Nebuchadnezzar, is confirmed by the fact that all the inscribed bricks which have been found in it bear the name of that king. It formed the tower of the temple, and was surmounted by a chapel, but
the main shrine, the altars, and no doubt the residences of the priests, were at the foot, in a sacred precinct. 2. The mound of the Kasr will mark the site of the great Palace of Nebuchadnezzar. It is an irregular square of about 700 yards each way, and may be regarded as chiefly formed of the old palace-platform (resembling those at Nineveh, Susa, and elsewhere), upon which are still standing certain portions of the ancient residence where the name of "Kasr" or "Palace" especially attaches. The walls are composed of burnt bricks of a pale yellow color and of excellent quality, bound together by a fine lime cement, and stamped with the name and titles of Nebuchadnezzar. They

Contain traces of architectural ornament — piers, tions of figures are traceable, recalling the state buttresses, pilasters, &c." (Layard, p. 598); and in ments of Ctesias (ap. Diod. Sic.) that the brick the rubbish at their base have been found slabs walls of the palace were colored and represented inscribed by Nebuchadnezzar and containing an hunting-scenes. No plan of the palace is to be account of the building of the edifice, as well as a made out from the existing remains, which are few sculptured fragments and many pieces of enam- elled brick of brilliant hues. On these last por- of the mound. 3. The mound of Amurn is thought
M. Oppert to represent the "hanging gardens" of Nebuchadnezzar; but this conjecture does not seem to be a very happy one. The mound is composed of poorer materials than the edifices of that prince, and has furnished no bricks containing his name. Again, it is far too large for the hanging-gardens, which are said to have been only 400 feet each way. The Aaruim mound is described by Rich as an irregular parallelogram, 1100 yards long by 800 broad, and by Ker Porter as a triangle, the sides of which are respectively 1400, 1100, and 850 feet. Its dimensions therefore very greatly exceed those of the curious structure with which it has been identified. Most probably it represents the ancient palace, coeval with Babylon itself, of which Nebuchadnezzar speaks in his inscriptions as adorning his own more magnificent residence. It is the only part of the ruins from which bricks have been derived containing the names of kings earlier than Nebuchadnezzar; and is therefore entitled to be considered the most ancient of the existing remains. 4. The ruins marked DD on either side of the Euphrates, together with all the other remains on the right bank, may be considered to represent the lesser Palace of Ctesias, which is said to have been connected with the greater by a bridge across the river, as well as by a tunnel under the channel of the stream (1). The old course of the Euphrates

Chart of the country round Babylon, with limits of the ancient City, according to Oppert.
entirely destitute of stone, and even wood was scarce and of bad quality, being only yielded by the palm-groves which fringed the courses of the canals. Hence the ordinary materials for building, recourse was had to the soil of the country—in many parts an excellent clay—and with bricks made from this, either sun-dried or baked, the vast structures were raised, which, when they stood in their integrity, provoked comparison with the pyramids of Egypt, and which even in their decay excite the astonishment of the traveller. A modern writer has noticed as the true secret of the extraordinary results produced, "the unbounded command of naked human strength," which the Babylonian monarchs had at their disposal (Groce's *Hist. of Greece*, vol. III. p. 401); but this alone will not account for the phenomena, and we must give the Babylonians credit for a genius and a grandeur of conception rarely surpassed, which led them to employ the labor whereof they had the command in works of so imposing a character. With only a 'brick for stone,' and at first only a 'slime ('$\text{\textedsymbol} -$') for mortar' (Gen. xi. 3), they constructed edifices of so vast a size that they still remain at the present day among the most enormous ruins in the world, impressing the beholder at once with awe and admiration.

*History of Babylon.*—The history of Babylon mounts up to a time not very much later than the Flood. The native historian seems to have possessed authentic records of his country for above 3000 years before the conquest by Alexander (Herod. *Fr.* 11); and Scripture represents the "beginning of the kingdom" as belonging to the time of Ninus, the grandson of Ham and the great-grandson of Noah (Gen. x. 10). Of Ninus no trace has been found in the Babylonian remains, unless he is identical with the god Bel of the Babylonian Pantheon, and so with the Greek Belus, the hero-bosom of the city. This identity is possible, and at any rate the most ancient inscriptions appear to show that the primitive inhabitants of the country were really Cushites, i.e. identical in race with the early inhabitants of Southern Arabia and of Ethiopia. The seat of government at this early time was, as has been stated, in lower Babylon, Erech (Babylonia), Nineveh (Akkadian), and Babylon (if built) being a piece of new consequence. The country was called Shinar (נִינָר), and the people the Akkadian (comp. *Accad* of Gen. x. 19). Of the art of this period we have specimens in the ruins of Nineveh and *Warka*, the remains of which date from at least the 20th century before our era. We find the use of kiln-baked as well as of sun-dried bricks already begun; we find writing practiced, for the bricks are stamped with the names and titles of the kings; we find buttresses employed to support buildings, and we have probable indications of the system of erecting lofty buildings in stages. On the other hand, mortar is unknown, and the bricks are laid either in clay or in bitumen (comp. Gen. xi. 3); they are rude and moulded, and of various shapes and sizes; sun-dried bricks predominate, and some large buildings are composed entirely of them; in these red masonry occurs at intervals, apparently used to protect the mass from disintegration. There is no trace of ornament in the erections of this date, which were imposing merely by their size and solidity.

The first important change which we are able to trace in the external condition of Babylon, is a subjection, at a time anterior to Abraham, by the neighboring kingdoms of Elam or Susiana. Berosus speaks of a first Chaldaean dynasty lasting the reign of eleven kings, whom he probably represents as reigning from c. 2234 to n. c. 1576. At the last mentioned date he said there was a change, and a new dynasty succeeded, consisting of 49 kings, who reigned 438 years (from n. c. 1576 to n. c. 1158). It is thought that this transition may mark the invasion of Babylonia from the East, and the establishment of Elamite influence in the country, under Chedhohamer (Gen. xiv). This monarch represents his conqueror in the inscription Amraphel, king of Shinar, and Arioch, king of Ellasar (Larsa), would be tributary princes whom Chedhohamer had subjected, while he himself may have become the founder of the new dynasty, which, according to Berosus, continued on the throne for above 440 years. From this point the history of Babylon is almost a blank for above twelve centuries. Except in the mention of the plundering of Job by the Chaldaeans (Gen. xiv), it is not marked by a "godly Babylonish garment" which Achan coveted (Josh. vii. 21). Scripture is silent with regard to the Babylonians from the time of Abraham to that of Hezekiah. Berosus covered this space with three dynasties; one (which has already been mentioned) of 49 Chaldaean kings, who reigned 438 years; another of 9 Arab kings, who reigned 245 years; and a third of 49 Assyrian monarchs, who held dominion over 526 years; but nothing beyond this bare outline has come down to us on his authority concerning the period in question. The monumental records of the country furnish a series of names, the reading of which is very uncertain, which may be arranged with a good deal of probability in chronological order, apparently belonging to the first of these three dynasties. Of the second no traces have been hitherto discovered. The third would seem to be identical with the Upper Dynasty of Assyria, of which some account has been given in a former article [Assyr.1]. It would appear then as if Babylon, after having had a native Chaldaean dynasty which ruled for 224 years (Brandis, p. 17), and a second dynasty of Elamite Chaldaeans who ruled for a further period of 458 years, fell wholly under Semitic influence, becoming subject first to Assyria for two centuries and a half, and then to Assyria for above five centuries and not beginning even a qualified independence till the time marked by the close of the Upper and the formation of the Lower Assyrian empire. This is the conclusion which seems naturally to follow from the abstract which is all that we possess of Berosus: and doubtless it is to a certain extent true. But the statement is too broad to be exact; and the monuments show that Babylon was at no time absorbed into Assyria, or even for very many years together a subject state. Assyria, which she had colonized during the time of the second or great Chaldaean dynasty, to which she had given letters and the arts, and which she had held in subjection for many hundred years, became in her turn (about n. c. 1270) the predominant Mesopotamian power, and the glory of Babylon in consequence suffered eclipse. But she had her native kings during the whole of the Assyrian period, and she frequently contended with her great neighbor, and even with a conqueror. Though much sunk from her former greatness, she continued to be the second power in Asia; and retained a vitality which
at a later date enabled her to become once more the head of an empire.

The line of Babylonian kings becomes exactly known to us from the year B.C. 747. An astronomical work of the geographer Ptolemy has preserved to us a document, the importance of which for historical astronomy it is scarcely possible to exaggerate. The "Canon of Ptolemy," as it is called, gives us the succession of Babylonian monarchs, with the exact length of the reign of each, from the year B.C. 747, when Nabonassar mounted the throne, to B.C. 331, when the last Persian king was deposed by Alexander. This document, which from its close accordance with the statements of Scripture always, vindicated to itself a high authority in the eyes of Christian chronologers, has recently been confirmed in so many points by the inscriptions that its authentic character is established beyond all possibility of cavil or dispute. As the basis of all accurate calculation for oriental dates previous to Cyrus, it seems proper to transcribe the earlier portion of it in this place. [The dates B.C. are added for convenience sake.]

Of Nabonassar, the first king in Ptolemy's list, nothing can be said to be known except the fact, reported by Berosus, that he destroyed all the annals of his predecessors for the purpose of compelling the Babylonians to date from himself (Fr. 11 a). It has been conjectured that he was the husband, or son, of Semiramis, and owed to her his possession of the throne. But of this theory there is at present no proof. It rests solely upon a synchronism obtained from Herodotus, who makes Semiramis a Babylonian queen, and places her five generations (167 years) before Nitocris, the mother of the last king. The Assyrian discoveries have shown that there was a Semiramis about this time, but they furnish no evidence of her connection with Babylon, which still continues uncertain. The immediate successors of Nabonassar are still more obscure than himself. Absolutely nothing beyond the brief enumeration of the Canon has hitherto concerned us concerning Nadius (or Nabus), Chinzinus (or Chinzirus) and Porus, or Elulas, who certainly cannot be the Tyrian king of that name mentioned by Menander (ap. Joseph. Ant. Jud. iv. 14, § 2). Mardocompalus, on the contrary, is a monarch to whom great interest attaches. He is undoubtedly the Merodach-Baladan, or Merodach-Baladum (Me-

RODACIIH-BALADUM] of Scripture, and was a personage of great consequence, reigning himself twice the first time for 12 years, contemporaneously with the Assyrian king Sargon, and the second time for six months only, during the first year of Sennacherib; and leaving a sort of hereditary claim to his son and grandson, who were found to have been engaged in hostilities with Esar-haddon and his successor. His dealings with Hezekiah sufficiently indicate the independent position of Babylon at this period, while the interest which he felt in an astronomical phenomenon (2 Chr. xxix. 31) harmonizes with the character of a native Chaldean king which appears to belong to him. The Assyrian inscriptions show that after reigning 12 years Merodach-Baladan was deposed of his crown and driven into banishment by Sargon, who appears to have placed Arreans (his son?) upon the throne as viceroy, a position which he maintained for five years. A time of trouble then ensued, estimated in the Canon at two years, during which various pretenders assumed the crown, among them a certain Hangis, or Aucis, who reigned for about a month, and Merodach-Baladan, who held the throne for half a year (Polyhist. ap. Euseb.). The latter was bent on reestablishing the influence of Assyria over Babylon, proceeded against Merodach-Baladan (as he informs us) in his first year, and having deposed him, placed an Assyrian named Belib or Beldus, upon the throne, who ruled as his viceroy for three years. At the end of this time, the party of Merodach-Baladan still giving trouble, Sennacherib descended again into Babylonia, once more overran it, removed Belib, and placed his eldest son—"Canor, in Assyrian Assurdum, in the place of Belib," as they call him, upon the throne. Apamanalitis reigned for six years, when he was succeeded by a certain Regibodus, who reigned for one year; after which Messeamanelitis held the throne for four years. Nothing more is known of these kings, and it is uncertain whether they were viceroys, or independent native monarchs. They were contemporaneous with Sennacherib, to whose reign belongs also the second interregnum, extending to eight years, which the Canon fixes between the reigns of Messeamanelitis and Assirianus. In Assirianus critical eyes long ago detected Esar-haddon, Sennacherib's son and successor; and it may be regarded as certain from the inscriptions that this king ruled in person over both Babylonia and Assyria, holding his court alternately at their respective capitals. Hence we may understand how Manasseh, his contemporary, came to be "carried by the captives of the king of Assyria to Babylon," instead of to Nineveh, as would have been done in any other reign. [ESAR-

HADUN.] Saosuehinnas and Chimilidas (or Cimueladumas), his brother (Polyhist.), the successors of Assirianus, are kings of whose history we know nothing. Probably they were viceroys under the later Assyrian monarchs, who are represented by Abydenus (ap. Euseb.) as retaining their authority over Babylon up to the time of the last siege of Nineveh.

With Nabonassar, the successor of Cimueladumas, and the father of Nebuchadnezzar, a new era in the history of Babylon commences. According to Abydenus, who probably drew his information from Berosus, he was appointed to the government of Babylon by the last Assyrian king, at the moment when the Medes were about to make their final attack; whereupon, betraying the trust reposed in him, he went over to the enemy, arranged
a marriage between his son Nebuchadnezzar and the daughter of the Median leader, and joined in the last siege of the city. [Nineveh.] On the success of the confederates (b. c. 625) Babylon became not only an independent kingdom, but an empire; the southern and western portions of the Assyrian dominion were dismembered, and were divided in the partition of the spoils which followed on the conquest, and thereby the Babylonian dominion became extended over the whole valley of the Euphrates as far as the Taurus range, over Syria, Phoenicia, Palestine, Hidumae, and (perhaps) a portion of Egypt. Thus, among others, the Jews passed quietly and almost without remark, from one feudal head to another, exchanging dependence on Assyria for dependence on Babylon, and continuing to pay to Nabopolassar the same tribute and service which they had previously rendered to the Assyrians. Friendly relations seem to have been maintained with Media throughout the reign of Nabopolassar, who led or sent a contingent to help Cyaxares in his Lydian war, and acted as mediator in the negotiations by which that war was concluded (Herod. i. 74). At a later date hostilities broke out with Egypt. Necho, the son of Psammetik I., about the year b. c. 608, invaded the Babylonian dominions on the southwest, and made himself master of the entire tract between his own country and the Euphrates (2 K. xxiii. 20, and xxiv. 7). Nabopolassar was now advanced in life, and not able to take the field in person (Herod. Fv. 14). He therefore sent his son, Nebuchadnezzar, at the head of a large army, against the Egyptians, and the battle of Carchemish, which soon followed, restored to Babylon the former dominions of her empire (2 K. xxvii. 2). But Herod. art. xvi. 2-12. Nebuchadnezzar pressed forward and had reached Egypt, when news of his father's death recalled him; and hastily returning to Babylon, he was fortunate enough to find himself, without any struggle, acknowledged king (b. c. 604).

A complete account of the works and exploits of this great monarch — by far the most remarkable of all the Babylonian kings — will be given in a later article. [NEBUCHADNEZZAR.] It is enough to note in this place that he was great both in peace and in war, but greater in the former. Besides recovering the possession of Syria and Palestine, and carrying off the Jews after repeated rebellions into captivity, he reduced Phoenicia, besieged and took Tyre, and ravaged, if he did not actually conquer, Egypt. But it was as the adorer and benefactor of his native land — as the builder and restorer of almost all her cities and temples — that this monarch obtained that great reputation which has handed down his name traditionally in the East, on a par with those of Nimrod, Solomon, and Alexander, and made it still a familiar term in the mouths of the people. Probably no single man ever left behind him as his memorial upon the earth one half the amount of building which was erected by this king. The ancient ruins and the modern towns of Babylonia are alike filled almost everywhere with the remains of his buildings. Babylon itself, the capital, was peculiarly the object of his attention. It was here that, besides repairing the walls and restoring the temples, he constructed that magnificent palace, which, with its triple incomer, its hanging gardens, its plated pillars, and its rich ornamentation of inlaid brick, was regarded in ancient times as one of the seven wonders of the world (Strab. xvi. 1, § 6). Nebuchadnezzar died b. c. 561, having reigned for 43 years, and was succeeded by Evil-Merodach, his son, who is called in the Canon Bkhamarnus. This prince, who, in the year that he began to reign, did lift up his head and Jehoiakim, king of Judah, out of prison (2 K. xxvii. 27), was murdered, or, at least, held in captivity for some time, not by Nebuchadnezzar, but by Nergal-sharezer-Nabopolassar, the successor of the latter, and a brother-in-law. [Evil-Merodach.] Nergal-sharezer-Nabopolassar, the Nergal-sharezer-Elam of the Canon. — is (apparently) identical with the "Nergal-sharezer, Bal-Mag," of Jeremiah (xxxi. 3, 13-14). He bears this title, which has been translated "chief of the Magi" (Gesenius), or "chief priest" (Col. Rawlinson), in the Inscriptions, and calls himself the son of a "king of Babylon." Some writers have considered him identical with "Durinc the Mede" (Larcher, Conr.ig, Boulhier); but this is improbable [DARIUS THE MEDA]; and he must rather be regarded as a Babylonian of high rank, who having married a daughter of Nebuchadnezzar raised his thoughts to the crown, and finding Evil-Merodach unpopular with his subjects, murdered him and became his successor. Nergal-sharezer-Nabopolassar built the palace at Babylon, which seems to have been placed originally on the right bank of the river. He was probably advanced in life at his accession, and thus reigned but four years, though he died a natural death, and left the crown to his son, Laborsorarchus. This prince, though a mere lad at the time of his father's decease, was allowed to ascend the throne without difficulty: but when he had reigned nine months, he became the victim of a conspiracy among his friends and connections, who, professing to detect in him symptoms of a sudden incline to precipitate his father to death, and tortured him to death. Nabonidus (or Labyntes), one of the conspirators, succeeded; he is called by Berosus "a certain Nabonidus, a Babylonian" (ap. Joseph. c. Ap. ii. 21), by which it would appear that he was not a member of the royal family; and this is likewise evident from his inscriptions, in which he only claims for his father the rank of "Bal-Mag." Herodotus seems to have been mistaken in supposing him (i. 184) the son of a great queen, Nitocris, and (apparently) of a former king, Labyntes (Nebuchadnezzar)? In deed it may be doubted whether the BabylonianNitocris of Herodotus is really a historical personage. His authority is the sole argument for her existence, which it is difficult to credit against the silence of Scripture, Berosus, the Canon, and the Babylonian monuments. She may perhaps have been a wife of Nebuchadnezzar; but in that case she must have been wholly unconnected with Na bonidus, who certainly bore no relation to that monarch.

Nabonidus, or Labyntes (as he was called by the Grecians), mounted the throne in the year b. c. 555, very shortly before the war broke out between Tyres and Carthage. He entered into alliance with the latter of these monarchs against the former, and had the struggle been prolonged would have sent a contingent into Asia Minor. Events proceeded too rapidly to allow of this; but Nabonidus had provoked the hostility of Tyre by the mere fact of the alliance, and felt at once that sooner or later he would have to resist the attack of an avenging army. He probably employed his long and peaceful reign of 17 years in preparations against the dreaded foe, executing the defensive works which Herodotus ascribes to his mother (i. 185), and accumulating in the town abundant
BABEL, BABYLON

Stores of provisions (ib. c. 190). In the year u. c. 539 the attack came. Cyrus advanced at the head of his irresistible hordes, but wintered upon the Diyaleh or Guedes, making his final approaches in the ensuing spring. Nabonidus appears by the inscriptions to have shortly before this associated with him in the government of the kingdom his son, Bel-shar-ezer or Belshazzar; on the approach of Cyrus, therefore, he took the field himself at the head of his army, leaving his son to command in the city. In this way, by help of a recent discovery, the accounts of Berosus and the book of Daniel—litherto regarded as hopelessly conflicting—may be reconciled. [Belshazzar.] Nabonidus engaged the army of Cyrus, but was defeated and forced to shut himself up in the neighboring town of Dorsippa (marked now by the Bira-Yinawit), where he continued till after the fall of Babylon (Beros. ap. Joseph. c. Ap. i. 21). Belshazzar guarded the city, but over-confident in its strength kept insufficient watch, and recklessly indulging in untimely and impious festivities (Dan. v.), allowed the enemy to enter the town by the channel of the river (Herod. i. 191; Xen. Cyrop. vii. 7). Babylon was thus taken by a surprise, as Jeremiah had prophesied (li. 31)—by an army of Medes and Persians, as intimated 170 years earlier by Isaiah (xxvi. 1-3), and as Jeremiah had also foretold (li. 24), during a festival. In the carnage which ensued upon the taking of the town, belshazzar was slain (Dan. v. 30). Nabonidus, on receiving the intelligence, submitted, and was treated kindly by the conqueror, who not only spared his life, but gave him estates in Caramania (Beros. at supra; comp. Abdi. Fr. 9).

Such is the general outline of the siege and capture of Babylon by Cyrus, as derived from the fragments of Berosus, illustrated by the account in Daniel and reduced to harmony by aid of the important fact, obtained recently from the monuments, of the relationship between Belshazzar and Nabonidus. It is scarcely necessary to remark that it differs in many points from the accounts of Herodotus and Xenophontus; but the latter of these two writers is in his Cyropodica a mere romancer, and the former is very imperfectly acquainted with the history of the Babylonians. The native writer, whose information was drawn from authentic and contemporary documents, is far better authority than either of the Greek authors, the earlier of whom visited Babylon nearly a century after its capture by Cyrus, when the tradition had doubtless become in many respects corrupted.

According to the book of Daniel, it would seem as if Babylon was taken on this occasion, not by Cyrus, king of Persia, but by a Median king, named Darius. It is impossible that this personage with any Median or Babylonian king known to us from profane sources, will be discussed hereafter. [Darius the Mede.] It need only be remarked here that Scripture does not really conflict on this point with profane authorities; since there is sufficient indication, from the terms used by the sacred writer, that "Darius the Mede," whoever he may have been, was not the real conqueror nor the king who afterwards built the new monarch arisen from another with a certain delegated authority (see Dan. v. 31, and li. 1).

With the conquest by Cyrus commenced the decay and ruin of Babylon. The " broad walk" were then to some extent " broken down" (Beros. Br. 14) and the " high gates" probably " burnt with fire" (Jer. xi. 58). The defenses that is to say, were ruined; though it is not to be supposed that the laborious and useless task of entirely demolishing the gigantic fortifications of the place was attempted, or even contemplated, by the conqueror. Babylon was weakened, but it continued a royal residence, not only during the life-time of Darius the Mede, but through the entire period of the Persian empire. The Persian kings held the throne court at Babylon during the larger portion of the year; and at the time of Alexander's conquests it was still the second, if not the first, city of the empire. It had, however, suffered considerably more than one occasion subsequent to the time of Cyrus. Twice in the reign of Darius (Pers. Ins.), and once in that of Xerxes (Ctes. Pers. § 32), it had risen against the Persians, and made an effort to regain its independence. After each rebellion its defenses were weakened, and during the long period of profound peace which the Persian empire enjoyed from the reign of Xerxes to that of Artaxerxes Ocholomanus they were allowed to go completely to decay. The public buildings also suffered grievously from neglect. Alexander found the great temple of Belus in so ruined a condition that it would have required the labor of 10,000 men for two months even to clear away the rubbish with which it was covered (Plin. h. N. vi. 30). Since then Babylon has been a quarry from which all the tribes in the vicinity have perpetually derived the bricks with which they have built their cities, and (besides Seleucia) Tesium, Anil Masdin, Baghadish, Kufa, Kerelik, Cilah, and numerous other towns, have risen from its ruins. The " great city," the beauty of the Chaldees' excellency, has thus emphatically " become heaps" (Jer. li. 37)—she is truly " an astonishment and a hissing, without an inhabitant" (Hab. ii. 14). Scripture has thus far appeared—they have " fallen" (Jer. li. 41), been " thrown down" (l. 15), been " broken utterly" (li. 58). " A drought is upon her waters" (l. 38); for the system of irrigation, on which in Babylon fertility altogether depends, has long been laid aside: " her cities" are everywhere " a desolation" (li. 43), her " land a wilderness;" " wild beasts of the desert " (Jackals) " be there," and " owls dwell there" (comp. Layard, Nin. and Bab. p. 494, and pls. 213, 214), with few exceptions, the whole city and the entire region about are " wicked inhabited". We are told that the district was utterly desolate. The whole site has been burnt, and nothing remains but " a few old halls" (l. xiii. 29).

BABEL, TOWER OF

and Profane Chronology: and Rawlinson’s Herod-

G. R.

* As a fitting close to this article we subjoin

from Prof. Rawlinson’s new volume (Monographs

of the Ancient Eastern World, iii. 516-18) his

notes of the capture of Babylon by Cyrus,

which so remarkably fulfilled the Hebrew pre-
dictions:—”When all was prepared, Cyrus de-
termined to wait for the arrival of a certain festi-
val, during which the whole population were wont
to engage in drinking and revelling, and then
silently in the dead of night to turn the water
of the river and make his attack. All fell out
as he hoped and wished. The festival was even
held with greater pomp and splendour than usual;
for Bel-Sharrar, with the natural insouciance of youth,
to mark his contempt for the besieging army,
abandoned himself wholly to the delights of the
season, and himself entertained a thousand lords
in his palace. Elsewhere the rest of the popula-
tion was occupied in feasting and dancing. Drunk-
en riot and mad excitement held possession of the
town: the siege was forgotten; ordinary precau-
tions were neglected. Following the example
of their king, the Babylonians gave themselves
up for the night to orgies in which religions frenzy
and drunken excitement formed a strange and re-
volting medley.

* Meanwhile, outside the city, in silence and
darkness, the Persians waited at the two points
where the Euphrates entered and left the walls.
Anxiously they noted the gradual sinking of the
water in the river-bed; still more anxiously they
watched to see if those within the walls would ob-
serve the suspicious circumstances and sound an
alarm through the town. Should such an alarm
be given, all their labors would be lost. But
as they watched no sounds of alarm reached
them—only a confused noise of revel and riot,
which the unhappy townsmen were quite unconscious
of the approach of danger.

* At last shadowy forms began to emerge from
the trees and clusters of the deep river-bed, and on
the landing-places of the river gates, scattered
clusters of men grew into solid columns, — the
undeciphered gateways were seized,—a war-shout
was raised,—the alarm was taken and spread,—
and swift runners started off to ‘show the King
of Babylon that his city was taken at one end.’
In the darkness and confusion of the night a terri-
fible massacre ensued. The drunken revelers could
make no resistance. The king, paralyzed with fear
at the awful handwriting on the wall, which too late
had warned him of his peril, could do nothing even
to check the progress of the assailants, who carried all
before them everywhere. Bursting into the palace,
a band of Persians made their way to the presence
of the monarch and slew him on the scene of his
impious revelry. Other bands carried fire
and sword through the town. When morning
came, Cyrus found himself unchallenged master
of the city.”

II.

BA BEL, TOWER OF. The “tower of
Babel” is only mentioned once in Scripture (Gen.
xi. 4,9), and then as incomplete. No reference to
it appears in the profane denunciations of the
punishments which were to fall on Babylon for her
pride. It is therefore quite uncertain whether the
building ever advanced beyond its foundations.
As, however, the classical writers universally,
in their descriptions of Babylon gave a prominent
place to a certain tower-like building, which they
called the temple (Herod. I. i. 56. Sec., Arrian, Plin.
Ac.), or the tomb (Strabo) of Belus, it has generally
been supposed that the tower was in course of
fame finished, and became the principal temple of
the Chaldeans, and most probably (certainly this may
have been the case), but while there is something
against there is none in favor of it. A Jewish
tradition, recorded by Ezechart (Philo, i. 9), de-
clares that fire fell from heaven, and split the tower
through to its foundation; while Alexander Poly-
histor (Fr. 10) and the other profane writers who
noticed the tower (as Abudene, Fr. 5 and 6),
said that it had been blown down by the winds.
Such authorities therefore as we possess, represent
the building as destroyed soon after its erection.
When the Jews, however, were carried captive into
Babylonia, struck with the vast magnitude and
peculiar character of certain of the Babylonian
temples, they imagined that they saw in them, not
merely buildings similar in type and mode of con-
struction to the “tower” (בָּבֶל) of their Script-
ures, but in this or that temple that they thought
to recognize the very tower itself. The predominant
opinion was in favor of the great temple of Nebo
at Borsippa, the modem Ḫurri-Niṣanu, although
the distance of that place from Babylon is an in-
superable difficulty in the way of the identification.
Similarly when Christian travellers first began to
visit the Mesopotamian towns, they generally at-
tached the name of “the tower of Babel” to what-
ever mass, among those beloved by them, was the
handsomely and most imposing. Persian in the 18th
century found the “tower of Babylon” at Fālajūn,
Πετρολόθος Vaudo the 18th identified it with the
ruin Bēlūl near Hillah, while early in the present
century Rich and Ker Porter revived the Jewish
notion, and argued for its identity with the Bīb.
There are in reality no real grounds either for either
identifying the tower with the Temple of Belus, or for
supposing that any remains of it long survived the
check which it received, when it was “swept away
upon the face of the earth,” and “left off to build the city” (Gen. xi. 8). All
then that can be properly attempted by the modern critic is to show (1.) what was the probable type
and character of the building; and (2.) what were the materials and manner of its construction.
With regard to the former point, it may readily
be allowed that the Bīb-Nīṣanu, though it cannot
be the tower of Babel itself, which was at
Babil (Gen. xi. 9), yet, as the most perfect rep-
resentative of an ancient Babylonian temple-tower,
may well be taken to show, better than any other
ruin, the probable shape and character of the edifice.
This building appears, by the careful examinations
recently made of it, to have been a sort of oblique
pyramid built in seven receding stages. Upon
a platform of crude brick, raised a few feet above
the level of the alluvial plain, was built of burnt
brick the first or basement stage—an exact square, 372
feet each way, and 26 feet in perpendicular height.
Upon this stage was erected a second, 230 feet each
way, and likewise 26 feet high; which, however,
was not placed exactly in the middle of the first,
but considerably nearer to the southwestern end,
which constituted the back of the building. The
other stages were arranged similarly—the third
being 189 feet, and again 26 feet high; the fourth
146 feet square, and 14 feet high; the fifth 194
feet square, and the same height as the fourth; the
sixth 62 feet square, and again the same height; and the seventh 20 feet square and once more the same height. On the seventh stage there was probably placed the ark or tabernacle, which seems to have been again 15 feet high, and must have nearly, if not entirely, covered the top of the seventh story. The entire original height, allowing three feet for the platform, would thus have been 156 feet, or, without the platform, 153 feet. The whole formed a sort of oblique pyramid, the gentler slope facing the N. E., and the steeper inclining to the S. W. On the N. E. side was the grand entrance, and here stood the vestibule, a separate building, the debris from which having joined those from the temple itself, fill up the intermediate space, and very remarkably prolong the mound in this direction" (Rawlinson’s Herodotus, vol. ii. pp. 582-3). The Birs temple, which was called the “Temple of the Seven Spheres,” was ornamented with the planetary colors (see the plan), but this chief feature of it seems to have been common to most, if not all, of the Babylonian temple-towers. The feature of stages is found in the temples at Warka and Mugheir (Lowis’s Chaldaea, pp. 129 and 168) which belonged to very primitive times (p. c. 2250); that of the emplacement, so that the four angles face the four cardinal points, is likewise common to those ancient structures; while the square form is universal. On the other hand it may be doubted whether so large a number of stages was common. The Mugheir and Warka temples have no more than two, and probably never had more than three, or at most, four stages. The great temple of Belus at Babylon (Labiib) shows only one stage; though, according to the best authorities, it too was a sort of pyramid (Herod., Strabo). The height of the Birs is 153; feet, that of Babil 140 (?), that of the Warke temple 100, that of the temple at Mugheir 50 feet. Strabo’s statement that the tomb of Belus was a stade (606 feet) in height would thus seem to be a gross exaggeration. Probably no Babylonian tower ever equalled the Great Pyramid, the original height of which was 480 feet.

With regard to the materials used in the tower, and the manner of its construction, more light is to be obtained from the Warke and Mugheir buildings than from the Birs. The Birs was rebuilt from top to bottom by Nebuchadnezzar, and shows the mode of construction prevalent in Babylon at the best period; the temples at Warke and Mugheir remain to a certain extent in their primitive condition, the upper stories alone having been renovated. The Warke temple is composed entirely of sun-dried bricks, which are of various shapes and sizes; the cement used is mud; and reeds are largely employed in the construction. It is a building of the most primitive type, and exhibits a ruder style of art than that which we perceive from Scripture, that we have obtained at the date of the tower. Burnt bricks were employed in the composition of the tower (Gen. xi. 3), and though perhaps it is somewhat doubtful what the chesmar (חֶשֶׁם) used for mortar may have been (see Fresnel in Journ. Asiatique for June, 1853, p. 9), yet on the whole it is most probable that bitumen (which abounds

Temple of Birs-Nimrud of Borsippa.
in Babylonia) is the substance intended. Now the lower basement of the Mynhoër temple exhibits this combination in a decidedly primitive form. The burnt bricks are of small size and of an inferior quality; they are laid in bitumen; and they face a mass of sun-dried brick, forming a solid wall outside it, ten feet in thickness. No reeds are used in the building. Writing appears on it, but of an antique cast. The supposed date is B.C. 2500—a little earlier than the time commonly assigned to the building of the tower. Probably the erection of the two buildings was not separated by a very long interval, though it is reasonable to suppose that of the two the tower was the earlier. If we mark its date, as we perhaps are entitled to do, by the time of Peleg, the son of Eber, and father of Pei (see Gen. x. 25), we may perhaps place it about B.C. 900.

It is not necessary to suppose that any real idea of "scaling heaven" was present to the minds of those who raised either the Tower of Babel, or any other of the Babylonian temple-towers. The expression used in Genesis (xii. 4) is a mere hyperbole for great height (comp. Deut. i. 28; Dan. iv. 11, 13), and should not be taken literally. Military defense was probably the primary object of such edifices in early times; but with the wish for this may have been combined further secondary motives, which remained when such defense was otherwise provided for. Diochus states that the great tower of the temple of Belus was used by the Chaldeans as an observatory (ii. 3), and the careful emplacement of the Babylonian temples with the angles facing the four cardinal points would be a natural consequence, and may be regarded as a strong confirmation of the reality of this application. M. Fresnel has recently conjectured that they were also used as sleeping-places for the chief priests in the summer-time (Journ. Asiatique, June, 1833, pp. 529–531). The upper air is cooler, and it is free from the insects, especially mosquitoes, which abound below: and the description which Herodotus gives of the chamber at the top of the Belus tower (i. 181) goes far to confirm this ingenious view.

BABYLON. [Babyl.]

BABYLON (Babylô, Babylia). The occurrence of this name in 1 Pet. v. 13 has given rise to a variety of conjectures, which may be briefly enumerated.

1. That Babylon tropically denotes Rome. In support of this opinion is brought forward a tradition recorded by Eusebius (H. E. ii. 15), on the authority of Papias and Clement of Alexandria, to the effect that 1 Peter was composed at Rome. Clemens and Jerome both assert that Rome was figuratively denoted by Babylon. Although this opinion is held by tiropius, Lardner, Cave, Whitby, Macknight, Hales, and others, it may be rejected as improbable. It is not nothing to indicate that the name is used figuratively, and the subscription to an epistle is the last place we should expect to find a mystical appellation.
BABYLON

2. Cappellus and others take Babylon, with a little reason, to mean Jerusalem.

3. Bar-Hebraeus understands by it the house in Jerusalem where the Apostles were assembled on the Day of Pentecost.

4. Others place it on the Tigris, and identify it with Seleucia or Ctesiphon, but for this there is no evidence. The two theories which remain are worthy of more consideration.

5. That by Babylon is intended the small fort of that name which formed the boundary between Upper and Lower Egypt. Its site is marked by the modern Bubool in the Delta. A little north of Fostat, or old Cairo. According to Strabo it derived its name from some Babylonian deserters who had settled there. In his time it was the headquarters of one of the three legions which garrisoned Egypt. Josephus (Ant. ii. 15, § 1) says it was built on the site of Lelopulos, when Cambyses subdued Egypt. That this is the Babylon of 1 Pet. is the tradition of the Coptic Church, and is maintained by Le Clerc, Mill, Pearson, and others. There is, however, no proof that the Apostle Peter was ever in Egypt, and a very slight degree of probability is created by the tradition that his companion Mark was bishop of Alexandria.

The most natural supposition of all is that by Babylon is intended the old Babylon of Assyria, which was largely inhabited by Jews at the time in question (Joseph. Ant. xvi. 3, § 1: Philo, De Vit. p. 1023, ed. Franc. 1681). The only argument against this view is the negative evidence from the silence of historians as to St. Peter's having visited the Assyrian Babylon, but this cannot be allowed to have much weight. Lightfoot's remarks are very suggestive. In a sermon preached at St. Mary's, Cambridge (Works, ii. 1144, Eng. folio ed.), he maintained that Babylon of Assyria is intended, because "it was one of the greatest knots of Jews in the world," and St. Peter was the minister of the circumcision. Again, he adds, "Bosor (2 Pet. ii. 13) speaks Peter in Babylon"; it being the Chaldee or Syriac pronunciation of Pethor in Num. xxiii. 6. This last argument has not, perhaps, much weight, as the same pronunciation may have characterized the dialect of Judaea. Bentley gave his suffrage in favor of the ancient Babylon, quoting Joseph. c. Ap. i. 7 (Crit. Sacr. p. 81, ed. Ellis).

W. A. W.

* The writer above has mentioned English names only. Of German writers who hold that the Babylon of Assyria is meant (1 Pet. v. 13), are Steiger (on Pet. Eind. p. 23); De Wette (Exeg. Hamb. in loc.); Winer (Rech. ii. 124); Credner (Eind. in das N. T., p. 643); Bleek (Eind. in das N. T., p. 587); Neander (Pf. und. Lit. ii. 450); Furner (in 1 Peter, Lange's Biblical, p. 64), and others. Neander thinks that the wife of Peter (ἀπαρακτὴ) is meant (1 Pet. v. 13), and not the church in Babylon.

H. BABYLON, in the Apocalypse, is the sym- bolical name by which Rome is denoted (Rev. xiv. 8, xvii, xviii.). The power of Rome was regarded by the later Jews as that of Babylon by their forefathers (comp. Jer. iii. 7 with Rev. xiv. 8), and hence, whatever the people of Israel be understood o symbolize, Babylon represents the antagonistic principle. [REVELATION]

W. A. W.

BABYLONIANS (בָּבָלָנִי, בָּבָלָנִי בָּבָלָנִי בָּבָלָנִי בָּבָלָנִי בָּבָלָנִי בָּבָלָנִי בָּבָلָנִי בָּבָלָנִי בָּבָלָn): Babyloni, filii Babylonis). The in-

habitants of Babylon, a race of Shemitic origin, who were among the colonists planted in the cities of Samaria by the conquering Assyrians (Ezr. iv. 9). At a later period, when the warlike Chaldeans acquired the predominance in the 7th cent. B.C., the names Chaldean and Babylonian became almost synonymous (Ezr. xxiii. 14, 15; Dan. ix. xlviii. 14, 20).

W. A. W.

BABYLONISH GARMENT, literally (בָּבָלָנִי בָָנִי בָּבָלָנִי בָּבָלָn): τοιαύτα τοιαύτα: pellium cocci- nem) "robe of Shinar" (Joh. vii. 21). An ample robe, probably made of the skin or fur of an animal (comp. Gen. xxv. 25), and ornamented with embroidery, or perhaps a variegated garment with figures inwoven in the fashion for which the Babylonians were celebrated. Josephus (Ant. v. 1, § 10) describes it as "a royal mantle (χειμάδιον βασιλικόν), all woven with gold." Tertullian (De Habiti mutilati, c. i.) tells us that while the Syrians were celebrated for dyeing, and the Phrygians for patchwork, the Babylonians inwove their colors. For this kind of tapestry work they had a great reputation (Pliny viii. 74; Cobsere diverses picture intere Brybolon einece celebriat, et water in- posuit). Compare also Martial (Ep. viii. 29).

Non ego pretulere Babylonica picta superbe Texta, Semitanaque qua variantur ac et the Babyloniana peristomata de Plautus (Stich. ii, 54; see also Joseph B. J. vii. 3, § 5; Plut. M. Crito, iv. 5). Perhaps some of the trade in these rich stuffs between Babylon and the Phoenicians (Ezr. xxvii. 21) passed through Jericho, as well as the gold brought by the caravans of Sheba, which they may have left in exchange for the products of its fertile soil (Joh. vii. 21). [HERECIO] Bashi has a story that the king of Babylon had a palace at Jericho, probably founded on the fact that the robe of the king of Nineveh (Jon. iii. 6) is called אֲבָדָר, odbereth. In the Bereshith Robba (§ 85, fol. 75, 2, quoted by Gill) it is said that the robe was of Babylonian purple. Another story in the same passage is that the king of Babylon had a deputy at Jericho who sent him dates, and the king in return sent him gifts, among which was a garment of Shinar. Kinehi (on Josh. vii. 21) quotes the opinions of R. Channa bar R. Isaac that the Babylonish garment was of Babylonian purple, of Ral that it was a robe of fine wool, and of Shemuel that it was a cloak washed with alum, which we learn from 1 Kny (xxv. 52) was used in dyeing wool.

W. A. W.

BACA, THE VALLEY OF (בֵּאֵכָא) (בֵּאֵכָא): κατα του κολασωμάτων [Alex. μοσα]: Vallia lacrymargrum), a valley somewhere in Pales- tine, through which the exiled Psalmist sees in vision the pilgrims passing in their march towards the sanctuary of Jehovah at Zion (Ps. ixxxiv. 6). The passage seems to contain a play, in the manner of Hebrew poetry, on the name of the trees (בֵּאֵכָא: MULBERRY) from which the valley probably derived its name, and the "tears" (תּוּך) shed by the pilgrims in their joy at their approach to Zion. These tears were so abundant as to turn the dry valley in which the Bacaean tczks delighted (Neh. xi. 11) into a springy or marshy place (גֶּה). That the valley was a
BACCHIDES

real locality is most probable, from the use of the definite article before the name (Gesen. Thes. p. 205).

A valley of the same name (Βάκχιδες) still exists in the Sinaitic district (Barak. p. 640).

The rendering of the Targum is Gehemaa, i.e. the Ge-Himmom or ravine below Mount Zion. This locality agrees well with the mention of Bacin trees in 2 Sam. 24: 14.

This valley, according to the general view of interpreters (Hengstenberg, Tholuck, Hüpfeld) is not an actual, but an idealized place. Human life is a pilgrimage (Gen. xxvii. 9), and those who serve God and have faith in Him, bear cheerfully its hardships. His people find cause for thanksgiving and joy under circumstances the most adverse and trying (2 Cor. vi. 4-10; Phil. iv. 6, 7). The later lexicographers (Dietrich, Furtwaengler) discard the old etymology, and derive $S$ $\xi$ from the verb $S$ $\zeta$, to flee out, tricole. Hüpfeld finds no allusion to the mulberry tree (which complication needlessly the idea), but only a mark of the commonality of the figure: the bitter tears become to us as it were fountains of sweet water (Ps. 126: 2). Dr. Robinson has a note against the idea of a proper name in this passage (Phys. Geog. p. 124). The valley of the shadow of death” (Ps. x. 5) is no doubt a similar expression.

II.

BACCHIDES (Βακχίδες), a friend of Antiochus Epiphanes (Joseph. Ant. xii. 10, § 2) and governor of Mesopotamia (v. τοῦ πέρας τοῦ ποταμοῦ, 1 Macc. vii. 8; Joseph. I. c.), who was commissioned by Demetrius Soter to investigate the charges which Alcimus preferred against Judas Macabaeus. He confirmed Alcimus in the high priesthood, and having inflicted signal vengeance on the extreme party of the Assideans [Assideans], he returned to Antioch. After the expulsion of Alcimus and the defeat and death of Nicanor he led a second expedition into Judaea. Judas Macabaeus fell in the battle which ensued at Laisa (n. c. 161); and Bacinides re-established the supremacy of the Syrian faction (1 Macc. ix. 23, 00 αὐναίρετον άνάφθεσις; Joseph. Ant. xiii. 1, § 1). He next attempted to surprise Jonathan, who had assumed the leadership of the national party after the death of Judas; but Jonathan escaped across the Jordan. Bacinides then placed garrisons in several important positions, and took hostages for the security of the present government. Having completed the purification of the country (Joseph. Ant. xiii. 1, 5) he returned to Demetrius (n. c. 169). After two years he came back at the request of the Syrian faction, in the hope of overpowering Jonathan and Simon, who still maintained a small force in the desert; but meeting with ill success, he turned against those who had induced him to undertake the expedition, and sought an honorable retreat. When this was known by Jonathan he sent envoys to Bacinides and concluded a peace (n. c. 158) with him, acknowledging him as governor under the Syrian king, while Bacinides pledged himself not to enter the land again, a condition which he faithfully observed (1 Macc. vii. 13; Joseph. Ant. xii. 10, 11; xiii. 1).

B. F. W.

BADGER-SKINS

BADGER-SKINS (βακχϊδες, βάχιδες, βάχτης, βάκχης, βάκχις, βάκχιδα, βάχτης, βάκχης, βάκχις), a skin from the head and neck of the badger (Meles meles). The Hebrew tachash, which the A. V. renders "badger," occurs in connection with "ār, "ovith ("skin," "skins") in Ex. xxv. 5, xcv. 7, xxxv. 19, xxxvi. 10; Numb. vi. 6, 8, 11, 12, 14, 25. In Ex. xcv. 10 tachash occurs without ovith, and is mentioned as the substance out of which women's shoes were made: in the former passages the tachash skins are named in relation to the tabernacle, ark, &c., and appear to have formed the exterior covering of these sacred articles. There is much obscurity as to the meaning of the word tachash. The ancient versions seem nearly all agreed that it denotes not an animal, but a color, either black or sky-blue; amongst the names of those who adopt this interpretation are Bechahart (Hier. ii. 5), Linguaminer (Schol. ad v. T., Ex. xxxv. 12, xcv. 10, Numb. de Ceptis Heberorum, lib. i. ch. 3, Schenkel (Phys. Sacr. in Ex. xxv. 5), Parkhurst (Heb. Lex. s. v.), who observes that "an external covering for the tabernacle of azure or sky-blue was very proper to represent the sky or azure boundary of the system." Some versions as the German of Luther and the A. V., leaf apparently by the Chaldean, and perhaps by a certain similarity of sound between the words tachash, tachash, tachash, have supposed that the leger (τάχαχ σκιν) is denoted; but this is clearly an error, for the leger is not found in the Greek MSS. Others, as Gesner and Harenberg (in Museo Rerum. ii. 312), have thought that some kind of wolf, known by the Greek name θαύς and the Arabic Shaybal, is intended. Hasea (in Dissert. Philol. Syllog., Diss. ix. § 17) and Bisinger, in his preface to the Epitome of Schenkel's Phys. Sacra, are of opinion that tachash denotes a certain animal, the Trichecanus montanus of Linnaeus which, however, is only found in America and the West Indies. Others with Seckel Rau (Comment. de isis qve ex Arab, in usum Tabernac, frequunt repetita, Traj. ad Rhm. 1753, ch. ii.) are in favor of tachash representing some kind of seal (Phoca vitulina, Linnae) Dr. Goldes (Crit. Rem. Ex. xxv. 5) is of the same opinion. Gesenius understands...
some "kind of seal or badge, or other similar (1) creature." Of modern writers Dr. Kitto (Pict. Bible on Ex. xxv. 5) thinks that tocshash denotes some clean animal, as in all probability the skin of an unclean animal would not have been used for the sacred coverings. Col. H. Smith (Cyc. Bib. Lit. [1st ed.] art. 'Rodger') with much plausibility, conjectures that tocshash refers to some mammal of the Algoerine or Damaline groups, as these animals are known to the natives under the names of processe, thacasse (varieties, he says, of the word tocshash), and have a deep gray, or slaty (hygianus) colored skin. Dr. Robinson on this subject (Bib. Res. 1. 17.1) writes: "The superior of the convent at Sinai procured for me a pair of the sandals usually worn by the Bedawin of the peninsula, made of the thick skin of a fish which is caught in the Red Sea. The Arabs around the convent called it Tūn, but could give no farther account of it than that it is a large fish, and is eaten. It is a species of Halicore, named by Ehrenberg (Symb. Phys. Manual. ii.) Halicora Hemprichii. The skin is clumsy and coarse, and might answer very well for the external covering of the tabernacle which was constructed at Sinai, but would seem hardly a fitting material for the ornamental vases belonging to the costly attire of high-born dams in Palestine, described by the prophet Ezekiel" (xvi. 10).

It is difficult to understand why the ancient versions have interpreted the word tocshash to mean a color, an explanation which has, as Gesenius remarks, no ground either in the etymology or in the cognate languages. Whatever is the substance indicated by tocshash, it is evident from Ex. xxv. 23, that it was some material in frequent use amongst the Israelites during the Exodus, and the construction of the sentences where the name occurs (for the word drēth, " skins," is always, with one exception, repeated with tocshash), seems to imply that the skin of some animal and not a color is denoted by it. The Arabic duchas or touchas denotes a dolphin, but in all probability is not restricted in its application, but may refer to either a seal or a cetacean. The skin of the Halicore, from its hardness, would be well suited for making soles for shoes; and it is worthy of remark that the Arabs near Cape Musaeum apply the skin of these animals for a similar purpose (Col. H. Smith, l.c.). The Halicore Tabernaculi is found in the Red Sea, and was observed by Rupell (Mus. Senck. i. 113, t. 6), who gave the animal the above name, on the coral banks of the Arabian coast. Or perhaps tocshash may denote a seal, the skin of which animal would suit all the demands of the Scriptural allusions. Play (II. N. ii. 55) says seal-skins were used as coverings for tents; but it is quite impossible to come to any satisfactory conclusion in an attempt to identify the animal denoted by the Hebrew word. W. H.

BAG is the rendering of several words in the Old and New Testaments. 1. (דול핀, דולפין; thalass: sacciis) Chablius, the "lags," in which Naaman bound up the two talents of silver which he gave Hazvi (2 K. v. 23), probably so called, according to Gesenius, from their long, cone-like shape. The word only occurs besides in Is. iii. 22 (A. V. "crisp- ing-pins"), and there denotes the reticules carried by the Hebrew ladies.

2. (אבקון, אבקון; μαρμοτος, μαροτον: sacculus, saccellus) Cis, a bag for carrying weights (Deut. xxv. 13: Prov. xvi. 11; Mic. vi. 11), also used as a purse (Prov. i. 14; Is. xvi. 6).

3. (קבדה, קבדה; pena, Pena) CPh, translated "bag" in 1 Sam. xvii. 40, 49, is a word of most general meaning, and is generally rendered "vessel" or "instrument." In Gen. xlii. 25, it is the "sack" in which Jacob's sons carried the corn which they brought from Egypt; and in 1 Sam. ix. 7, xiii. 5, it denotes a bag or wallet for carrying food (A. V. "vessel"); comp. Jud. x. 3, xiii. 10, 15. The shepherd's "bag," which David had seems to have been worn by him as necessary to his calling, and was probably, from a comparison of Zech. xiv. 16 (where A. V. "instruments" is the same word), for the purpose of carrying the lambs which were unable to walk, or were lost, and contained materials for healing those who were sick and binding up those that were broken (comp. Ex. xxxiv. 4, 16).

4. (אבקון, אבקון; ἀκοψόμαξ, ἀκοψόμαξ; sacciis) Tef- ρόρ, properly a "bundle" (Gen. xiii. 35; 1 Sam. xxv. 2), appears to have been used by travellers for carrying money during a long journey (Prov vii. 29; Hag. i. 6; comp. Luke xii. 33; 1 Sam. ix. 5). In such "bundles" the priests bound up the money which was contributed for the restoration of the Temple under Jehoiada (2 K. xii. 10, A. V. "put up in lags"). The "bag" (ἀκοψόμαξ; loc. dist.) which Judas carried was probably a small box or chest (John xii. 6, xiii. 29). The Greek and Arabic noun ṭḥkus (touchas), as applying to the dolphin or the seal promiscuously. The common Arabic name for the dolphin is دلفين (dulfin). Perhaps, therefore, duchas and touchas had a wide signification. The Hebrew ṭḥkus is of obscure origin.
word is the same as that used in the LXX. for "chess" but signed a box used by musicians for carrying the mouth-pieces of their instruments. W. A. W.

BA'GO (Bayyā'; [Vat. Basan; Alex.] Bayo: Vulg. omits), 1 Esdr. viii. 40. [BRAIAX]

BA'GOAS (Bayyās; [Old Lat.] Baygoas; [Vulg.] Baygo), Jud. xii. 11, [13]. The name is said to be equivalent to Emma in Persia (H. N. xiii. 4, 9). Comp. Bumah ad Oril. Am. ii. 2, 1. B. W.

BA'GOÍ [3 svl. (Bayā' [Vat. Baasà]; Zo-voir), 1 Esdr v. 14. [BRAIAX]

BAHARUM'ITE, THE. [BRAHIRM.]

BAHURUM (בָּהָרּוּמ) and בָּהָרְוֻמ [young men, or warriors]: Baqāxia (2 Sam. iii. 16, elsewhere Baqāviya); Vat. 2 Sam. iii. 16, Bahaer; xvi. 3, xvi. 9, xo. Bahaer, xvi. 18, Bahaer; xvi. 2, Bahaer (and so Alex.); Alex. elsewhere Baqām; Joseph. Baqāmy and Baqām; Bahurum, a village, the slight notices remaining of which connect it almost exclusively with the flight of David. It was apparently on or close to the road leading up from the Jordan valley to Jerusalem. Shimei the son of Gera resided here (1 K. ii. 8), and from the village, when David having left the "top of the mount" behind him was making his way down the eastern slopes of Olivet into the Jordan valley below, Shimei issued forth, and running along (Joseph. Barphale) on the side or "rib" of the hill over against the king's party, flung his stones and cast dust abroad (2 Sam. xxv. 5), with a virulence which is to this day exhibited in the East towards fallen greatness, however eminent it may previously have been. Here in the court of a house was the well in which Jonathan and Abinuam ebod their pursuers (xxii. 18). In his account of the occurrence, Josephus (Ant. vii. 9, § 7) distinctly states that Bahurum lay off the main road (מִשְׁמֶרֶת נַעֲרֵי הַגֵּד), which agrees well with the account of Shimei's behaviour. Here Phalid, the husband of Michal, bade farewell to his wife when on her return to King David at Hebron (2 Sam. iii. 16). Bahurum must have been very near the southern boundary of Benjamin, but it is not mentioned in the lists in Joshua, nor is any explanation given of its being Benjaminite, as from Shimei's residing there we may conclude it was. In the Targum Jonathan on 2 Sam. xvii. 5, we find it given as Almon (אָלָמ). But the situation of Almon (see Josh. xxi. 18) will not at all suit the requirements of Bahurum. Dr. Böcking conjectures that the place lay where some mines still exist close to a Wady Rovah, which runs in a straight course for 3 miles from Olivet directly towards Jordan, fashioning the nearest, though not the best route (Barchey, 563, 4).

AZMVAVETH "the Barhumite" (אָצָנְתָה יָד בַּרְחָם), [Vat. Barhamis]; Alex. Barhamis; [cf. Barchey] 2 Sam. xxiii. 31, or "the Bahurumite", (בָּהָרִיִּם) & Barwali; [Vat. Barrow; Alex. Barrows: Barmantus] 1 Chron. xi. 43., one of the heroes of David's guard, is the only native of Bahurum that we hear of except Shimei.

BAJITH (בַּיִת, with the definite article, "the house"), referring not to a place of this

BALAAM (בָּלָם), of the definite article, name, but to the "temple" of the false gods of Moab, as opposed to the "high places" in the same sentence (Is. xv. 2, and compare xvi. 12). The allusion has been supposed to be to Beth-Baal-meon, or Beth-diblathaim, which are named in Jer. xlvii. 22, as here, with Balaam and Eleazar. But this is mere conjecture, and the conclusion of Gesenius is as above (Jesuaj, ad loc.): LXX. Ῥαλαϊο-βεν ποτήρειων: Ascendit domus. G.

BAHKKAKAR (בַּחָקַקְר [perh. w.r. of the mount]): Baksarak [Vat. Baskap]: Boc-boa, a Levite, apparently a descendant of Asaph (1 Chr. ix. 15).

BAKUKI'AH (בַּכּוּקְיָא [w.r. from Jabrul]): LXX. omits (in most MSS., but FA, Baskakas, Baskiaia: Comp. Boccaci, Baskaias: Bocciati). 1. A Levite in the time of Nehemiah (Neh. xi. 17, xii. 9).

2. [Comp. Baskasarc]. A Levite porter, apparently a different person from the preceding (Neh. xii. 27).

BAKING. [BRAH.

BALAAM (בַּלָּם), i. e. Bileam: Balaam: Joseph. Balaam: Balaam, a man endowed with the gift of prophecy, introduced in Numbers (xxii. 5) as the son of Beor. He belonged to the Midianites, and perhaps as the prophet of his people possessed the same authority that Moses did among the Israelites. At any rate he is mentioned in conjunction with the five kings of Midian, apparently as a person of the same rank (Num. xxxi. 8; cf. xxxi. 16). He seems to have lived at Pethor, which is said at Bent. xxviii. 4, to have been a city of Mesopotamia (בַּלָּם בַּלָּם). He himself speaks of being "brought from Aram out of the mountains of the East." (Num. xxiii. 7). The reading, therefore, בַּלָּם בַּלָּם, instead of בַּלָּם בַּלָּם, which at Num. xxiii. 5 is found in some MSS., and is adopted by the Samaritan, Syriac, and Vulgate versions, need not be preferred, as the Ammonites do not appear to have ever extended so far as the Ephraimites, which is probably the river alluded to in this place. The name Balaam, according to Gesenius [and Fürst] is compounded of בַּלָּם and בָּלָם, "non-populus, fortasse i. q. pereriminus;" according to Vitringa it is בַּלָּם and בָּלָם, the lord of the people; according to Simonis, פָּלָם and פָּלָם, the destruction of the people. There is a Bala, the son of Beor, mentioned Gen. xxxvi. 32, as the first king of Edom. Balaam is called in 2 Pet. ii. 15, "the son of Balaam:" this Lightfoot (Works, vii. 80) thinks a Chaldaism for Beor, and infers that St. Peter was then in Babylon. Balaam is one of those instances which meet us in Scripture, of persons dwelling among heathen, but possessing a certain knowledge of the one true God. He was endowed with a greater than ordinary knowledge of God; he was possessed
of high gifts of intellect and genius: he had the intuition of truth, and could see into the life of things,—in short, he was a poet and a prophet. Moreover, he confessed that all these superior advantages were not his own, but derived from God, and were his gift. And thus, doubtless, he had won for himself among his contemporaries far and wide a high reputation for wisdom and sanctity. It was believed that he whom he blessed was blessed, and he whom he cursed was cursed. Elated, however, by his fame and his spiritual elevation, he had begun to conceive that these gifts were his own, and that they might be used to the furtherance of his own ends. He could make merchandise of them, and might acquire riches and honor by means of them. A custom existed among many nations of antiquity of devoting enemies to destruction before entering upon a war with them. At this time the Israelites were marching forward to the occupation of Palestine; they were now encamped in the plains of Moab, on the east of Jordan, by Jericho. Balak, the king of Moab, having witnessed the discomfiture of his neighbors, the Amorites, by this people, entered into a league with the Midianites against them, and dispatched messengers to Balaam with the rewards of devotion in their hands. And he said to him, therefore, that Balaam was the habit of using his prophetic art, as a trade, and of mingling with it devices of his own by which he imposed upon others, and perhaps partially deceived himself. When the elders of Moab and Midian told him their message, he seems to have had some misgivings as to the lawfulness of their request, for he invited them to tarry the night with him, that he might learn how the Lord would regard it. These misgivings were confirmed by the express prohibition of God upon his journey. Balaam reported the answer, and the messengers of Balak returned. The king of Moab, however, not deterred by this failure, sent again more and more honorable princes to Balaam, with the promise that he should be promoted to very great honor upon complying with his request. The prophet again refused, but notwithstanding invited the embassy to tarry the night with him, that he might know what the Lord would say unto him further; and thus the importance which he had, and the permission he desired, but was warned at the same time that his actions would be overruled according to the Divine will. Balaam therefore proceeded on his journey with the messengers of Balak. But God's anger was kindled at this manifestation of determined self-will, and the angel of the Lord stood in the way for an adversary against him. The words of the Psalmist, "Be ye not like to horse and mule which have no understanding; whose mouths must be held with bit and bridle, lest they fall upon thee," had they been familiar to Balaam, would have come home to him with most amenable force; for never have they received a more forcible illustration than the comparison of Balaam's conduct to his Maker with his treatment of his ass, affords us. The wisdom with which thetractable brutish was allowed to "speak with man's voice," and "forbid" the untractable "madness of the prophet's" is palpable, and conspicuous alike in the story. He was taught, moreover, that even she had a spiritual perception to which he, though a prophet, was a stranger; and when his eyes were opened to behold the angel of the Lord, "he bowed down his head and fell flat on his face." It is hardly necessary to suppose, as some do, among whom are Hengstenberg and Leibnitz, that the event here referred to happened only in a trance or vision, though such an opinion might seem to be supported by the fact that our translators render the word בַּכַּשׁ in xxiv. 4, 16, "filling into a trance," whereas no other idea than that of simple filling is conveyed by it. St. Peter refers to it as a real historical event: "the dumb ass, speaking with man's voice, foiled the madness of the prophet." (2 Pet. ii. 16). We are not told how these things happened, but that they did happen, and that it pleased God thus to intervene on behalf of His elect people, and to bring forth from the genius of a self-willed prophet, who thought that his talents were his own, strains of poetry bearing upon the destiny of the Jewish nation and the church at large, which are not surpassed throughout the Mosaic records. It is evident that Balaam, although acquainted with God, was desirous of throwing an air of mystery round his wisdom, from the instructions he gave Balak to offer a bullock and a ram on the seven altars he everywhere prepared for him; but he seems to have thought, also, that these sacrifices would be of some avail to change the mind of the Almighty, because he pleads the merit of them (xxiii. 4), and after experiencing their impotence to effect such an object, "he went no more," we are told, "to seek for enchantments" (xxiv. 1). His religion, therefore, was probably such as would be the natural result of a general acquaintance with God not confirmed by any covenant. He knew Him as the fountain of wisdom, how to worship Him he could merely guess from the customs in vogue at the time. Sacrifices had been used by the patriarchs; to what extent they were efficacious the same could only be surmised. There is an allusion to Balaam in the prophet Micah (vi. 5), where Bishop Butler thinks that a conversation is preserved which occurred between him and the king of Moab upon this occasion. But such an opinion is hardly tenable, if we bear in mind that Balak is nowhere represented as consulting Balaam upon the acceptable mode of worshipping God, and that the directions found in Micah are of an opposite character to those which were given by the son of Beor upon the high places of Baal. The prophet is recounting "the righteousness of the Lord" in delivering His people out of the hand of Moab under Balak, and at the mention of his name the history of Balaam comes back upon his mind, and he is led to make those noble reflections upon it which occur in the following verses. "The doctrine of Balaam" is spoken of in Rev. ii. 14, where an allusion has been supposed to Num. ii. 14, the founder of the sect of the Nicolaitans, mentioned in v. 15, these two names being probably similar in signification. Though the utterance of Balaam was overruled so that he could not curse the children of Israel, he nevertheless suggested to the Moabites the expedient of seducing them to commit fornication. The effect of this is recorded in ch. xxv. A battle was afterwards fought against the Midianites, in which Balaam sided with them, and was slain by the sword of the people whom he had endeavored to curse (Num. xxxi. 8). (Comp. Bishop Butler's Sermons, serm. vi.; Ewald, Gesch. des Volkes Israel, ii. 277.) S. L.

* There are but two views that can well be taken of this miracle of "the dumb ass speaking." Did God exert such an influence upon the beast that it saw his messenger which men did not see, and
without a reasoning mind distinctly uttered the words of a rational being? or did God exert such an influence upon Balaam that the reproof of the messenger of God and the beast on which he rode sounded in his ears and sunk into his heart? In either case the occurrences were realities to Balaam, and were the result of a direct interposition of God more palpable on the former, but not less real on the latter supposition.

The arguments for the subjective view (as represented by Hdbck, Hengstenberg and others) on Balaam are the following: 1. The usual manner in which God revealed himself in that age was by visions and dreams, and we have no evidence that he ever revealed himself otherwise to Balaam, whilst in the first two cases he waited until after night, the proper season for visions and dreams, before he gave his answer. 2. No astonishment is indicated at the communication of the ass, or respect such as we should naturally expect to be exhibited to such a messenger of God. On the other hand he says in his impudence, "Because thou hast mocked me, I would there be a sword in my hand, for now would I kill thee." 3. At the time of the revelation, Balaam's two servants (Num. xxii. 22) and probably the Moabish messengers (xxii. 35) were with him, and yet they do not seem to have been cognizant of any communication to the external senses of Balaam. 4. Balaam himself did not perceive the messenger of God which proved so formidable an obstruction to the ass until after its expostulation, and God had opened his eyes. Compare similar language as preparatory to a vision, or internal illumination, in 2 K. vi. 17; Ps. cxix. 18. In opposition to this view it may be said: (a.) "This occurs in a Historical Book, and unless it is expressly stated, we should not interpret these occurrences as seen in vision." But we reply, that God so often revealed himself in visions, and they were so unquestionably relied upon, that the authors of the Historical Books of the Bible do not consider it necessary to state in what way a particular revelation is made. Compare Gen. xxi. 7; xxviii. 12 Ec; xxxii. 31; and many other passages. (b.) "We cannot draw the line of demarcation between what was seen in vision, and what occurred before the eyes of all." It is not necessary that we should do this; one mode is as real as the other; it is enough when what is narrated belongs to the sphere of ordinary experience, that we then understand it of external events. (c.) "The language in Num. xxii. 28, as well as in 2 pet. ii. 16, implies a direct oral communication." But it is not necessary to so interpret it. There was a direct communication in the way of reproof from God to Balaam, and it matters little whether God put the sound of words into the mouth of the dumb beast, or into the ears of Balaam as coming from the beast.

R. D. C. R.

* The sin of Balaam was one of peculiar aggravation, and is characterized as such in 2 pet. ii. 15; 16, and Jude 11. To see his conduct in its true light, we must call to mind the geography of the scene. This professed servant and prophet of Jehovah was standing at the time on one of the summits of the Arabim beyond the Jordan, from which Moses was permitted to behold the Land of Promise just before his death. For the range of view under the eye of the spectator from that position, see under X't'ou (Amer. ed.). Standing there, Balaam was on a mound surrounded to partake of worship and Shergab with idolaters. On his left hand he sees the dark waters of the Dead Sea with its black and desolate shores, which were recognized among all the eastern tribes as a monument of God's wrath against the impious and ungodly. On the right he sees the land of the Amorites, whom Jehovah had just overthrown as proof of His power and purpose to deal the stroke of retribution to His people. In the valley of the Jordan lies spread out before him the camp of Israel, divided according to their tribes, in the midst of which is seen the tabernacle of God, above which hangs the pillar of cloud: while in the distance beyond the camp his eyes rest upon the land which he knew to be promised to the people of Israel. Yet even in this situation, amidst so much adapted to show him how fearful a thing it is to sin against the Infinite One, he dared, for the reward with which Balaak tempted his aversives, to abuse his office as a holy prophet and to attempt, once and again, to call down curses on those whom God had blessed. How much more vivid is our conception of Balaam's apostasy and guilt, when we thus place ourselves in imagination where he stood in that critical hour of his moral history!

In support of the internal or subjective interpretation, the reader may consult Herder, Geist der Ebr. Poesie, i. 437; Tholuck's Vornehmten Schrift-ten, i. 406-432; Hengstenberg's Geschichte Balaam a. seine Weisungen (Berlin, 1812); and Prophecies of Balaam (Bibl. Sacr. iii. 347-378, and 699-743). Kurtz maintains the outward or literal view (Geschichte des A. Bundes, ii. 477-480).

Later exegetical helps for the study of Balaam's prophecies: Keil and Delitzsch in their Commentary on the Pentateuch, iii. 176-292 (Clark's Library); Knobel, Exeg. Handb., xii. 121-148; Bunsen's Bibliothek, i. 261-265; and Wordsworth's Holy Bible, with Notes and Introductions, Part ii. 150-164 (London, 1864).

Dean Stanley has grouped together with fine effect the characteristic points of this "grandest of all the episodes introduced into the Mosaic narrative" (History of the Jewish Church, p. 209-218). Bishop Hall has given good practical reflections on Balaam's character and prophecies (Contemplations on Historical Passages of the O. and N. T., book vii. 4). Keble's noble hymn (Christian Year: Second Sunday after Easter) should not be overlooked. The "sculptor's hand" has graphically bodied forth both the sin of the apostate and the warning from it for others, in the lines:

"No sun or star so bright
In all the world of light
That they should draw to Heaven his downward eye:
He bears th' Atmright's word;
Yet low upon the earth his heart and treasure lie."
BALAMO

He is mentioned also at Josh. xxiv. 9; Judg. xi. 25; Mic. vi. 5. [Balam.] S. L.

* Balah's name signifies notinnam, vacuous, but in the active sense one who makes empty or desolate, "a waster, a spoiler"; a complimentary title such as a king or conqueror might bear. The writer above quotes Gesenius in his Theaur. i. 214; but in his other works Gesenius defines the name in the other way. See his Hebr. u. Chald. Handb. (1835); Hoffmann's Latin ed. 1847; and Dietrich's ed. 1863. First adopts the same explanation (i. 194). The last book of the Bible mentions Balak once more, and presents him in the same character as the dupe and instrument of Balan in denoting the people of Israel into gross idolatry and licentiousness (Rev. ii. 14).

H.

BALAMO. [Jud. viii. 3.] [BALH, Geogr. No. 6.]

BALANCE. Two Hebrew words are thus translated in the A. V.

1. כּוֹתֶף (coth³f), nāzōqā́yim (LXX. ψυχόν, Vulg. staterae), the dual form of which points to the double scales, like Lat. bilance. The balance in this form was known at a very early period. It is found on the Egyptian monuments as early as the time of Joseph, and our allusions to the use in later times of the purchase of the cave of Machpelah (Gen. xxiii. 16) by Abraham. Before coinage was introduced it was of necessity employed in all transactions in which the valuable metals were the medium of exchange (Gen. xlviii. 21; Ex. xxii. 17; 1 K. xx. 39; Esth. iii. 9; Is. xlv. 6; Jer. xxxii. 10, &c.). The weights which were used at first were probably stones, and from this the word "stone" is continued to denote any kind of weight whatever, though its material was later in times lead (Lev. xiv. 30; Deut. xxv. 13, 15; Prov. xi. 10, 23; Zech. v. 8). These weights were carried in a bag (Deut. xxv. 13; Prov. xi. 11) suspended from the girdle (Chardin, Voy. iii. 422), and were very early made the vehicles of fraud. The habit of carrying two sets of weights is denounced in Deut. xxv. 14 and Prov. xx. 10, and the necessity of observing strict honesty in the matter is insisted upon in several passages of the Law (Lev. xiv. 30; Deut. xxv. 13). But the custom lived on, and remained in full force to the days of Micah (vi. 11), and even to those of Zechariah, who appears (ch. v.) to pronounce a judgment against fraud of a similar kind. The earliest weight to which reference is made is the וּכּוֹתֶף, דֵאֶשְׁת (Gen. xxxiii. 19; Josh. xxxv. 32; Job xlix. 11), which in the margin of our version is in two passages rendered "amals," while in the text it is "piece of money." It may have derived its name from being in the shape of a lamb. We know that weights in the form of bulls, lions, and antelopes were in use among the ancient Egyptians and Assyrians. [MONEY, I. 2.] By means of the balance the Hebrews appear to have been able to weigh with considerable delicacy, and for this purpose they had weights of extreme minuteness, which are called metaphorically "the small dust of the balance" (Is. xl. 15). The "little grain" (םַיִּית) of the balance in Wisd. xi. 22 is the small weight which causes the scale to turn. In this passage, as in 2 Macc. i. 8, the Greek word παραστὴς, rendered "balance," was originally applied to the scale-pan alone.

2. כּוֹתֶף, kāneh (ψυχόν: statera), rendered "balance" in Is. xvi. 6, is the word generally used for a measuring-rod, like the Greek κωπία, and like it too denotes the tongue or beam of a balance. כּוֹתֶף, pelcs, rendered "weight" (Prov. xvi. 11, LXX. ψυχόν) and "scales" (Is. xi. 12, LXX. σταρέωσις): it is said by Keimlich (in Ps. xxxv. 7) to properly the beam of the balance. In his Lexicon he says it is the part in which the tongue moves, and which the weigher holds in his hand. Gesenius (Thes. a. v.) supposed it was a steelyard, but there is no evidence that this instrument was known to the Hebrews. Of the material of which the balance was made we have no information.

Sir G. Wilkinson describes the Egyptian balance as follows: "The beam passed through a ring suspended from a horizontal rod, immediately above and parallel to it; and when equally balanced, the ring, which was large enough to allow the beam to play freely, showed when the scales were equally poised, and had the additional effect of preventing the beam tilting when the goods were taken out of one and the weights suffered to remain in the other. To the lower part of this ring a small plummet was fixed, and this being touched by the hand and found to hang freely, indicated, without the necessity of looking at the beam, that the weight was just "due." [Aug. Eng. li. 240.]

The expression in Dan. v. 27, "thou art weighed in the balances, and art found wanting," has been supposed to be illustrated by the custom of weighing the Great Mogul on his birthday in the presence of his chief grandees. The ceremony is described in a passage from Sir Thomas Roe's Voyage in India, quoted in Taylor's Calmet. Fogg. 186: "The scales in which he was thus weighed, were plated with gold, and so the beam on which they hung by great chains, made likewise of that most precious metal. The king, sitting in one of them, was weighed first against silver coin, which immediately after was distributed among the poor: then was he weighed against gold; after that against jewels (as they say): but I observed (being there present with my lord ambassador) that he was weighed against three several things, laid in silken bags, on the contrary scale. . . . By his weight (of which his physicians yearly keep an exact account) they presume to guess the present state of his body, of which they speak flatteringly, however they think it to be." It appears, however, from a consideration of the other metaphorical expressions in the same passage of Daniel that the weighing in balances is simply a figure, and may or may not have reference to such a custom as that above described. Many examples of the use of the same figure of speech among Orientals are given in Robert's Oriental Illustrations, p. 509. W. A. W.

BALAS'AMUS (βαλασάμου [Abl. Balasámon]: Balaam), in 1 Edcr. iv. 43. The corresponding name in the list in Ezra is ΜΑΛΑΣΑΜΑ."
Balm (Lev. xxi. 20, LXX.) which were disqualifica-
IONS for priesthood. A man laid on the back of
the head is called φρακτός, phalakrós, LXX., Lev.
xiii. 40; and if forehead-ball, the wood used to
describe him is δεσμός, ἀναφαλακτιας, LXX., Lev.
xiii. 41 (revelcindnt). (Gesen. s. v.) In Lev.
xiii. 20 ff., very careful directions are given to dis-
tinguish באלוק, "a plague upon the head and beard"
(which probably is the Mentegra of Pliny, and
is a sort of leprosy), from mere natural bald-
ness which is pronounced to be clean, v. 30 (Jalil,
Arch. Bibl. § 181). But this shows that even
natural baldness subjected men to an unpleasant
suspicion. It was a defect with which the Israelites
were by no means familiar, since Αλογίστους ἄν
τις ελαχιστον ὄντο δαλακτος πάντως ἀνάφα-
κως, says Herod. (iii. 12): an immunity which he
attributes to their constant shaving. They adopted
this practice for purposes of cleanliness, and gener-
ally wore wigs, some of which have been found in
the ruins of Thebes. Contrary to the general
practice of the East, they only let the hair grow as
a sign of mourning (Herod. ii. 56), and shaved
themselves on all joyous occasions: hence in Gen.
xxi. 14 we have an undesignated coincidence. The
same custom obtains in China, and among the
modern Egyptians, who shave off all the hair except
the beard, a butt on the forehead and crown of
the head (Wilkinson, Anc. Egypt. iii. 539 ff.; Lane,
Mod. Egypt. i. ch. 1).

Baldness was despised both among Greeks and
Romans. In H. ii. 219, it is one of the defects of
Thersites: Aristophanes (who was probably bald
himself, Pops, 767, Epq. 590) takes pride in not
joining in the ridicule against it (οὔς ἔσοβα τῶν
φαλακρῶν, Mod. 540). Cesar was said "a calidri
decemtutum insignissime ferrum," and he generally
endeavored to conceal it (Suet. Caes. 45; conp.
Dion. 18).

Artificial baldness marked the conclusion of a
Nazarene's vow (Acts xviii. 18; Num. vi. 9),
and was a sign of mourning ("quasi calvito lactus
levaretur," Cic. Tus. Disp. iii. 26). It is often
alluded to in Scripture; as in Mic. i. 16; Am. viii.
19; Jer. xlvi. 5, &c.; and in Dext. xiv. 1, the
reason for its being forbidden to the Israelites is
their being "a holy and peculiar people." (Cf.
Lev. xvi. 27, and Jer. ix. 29, margin.) The practices
alluded to in the latter passages were adopted by
heathen nations (e. g. the Arabs, &c.) in honor of
various gods. Hence the expression προσοκοπάρδω.
The Alcantes (ἐπὶ δὲν κορωπάτες), and other half-
civilized tribes, shaved off the foreheads, to avoid
the danger of being seized by them in battle. (See
also Herod. ii. 56, i. 82.)

W. F. F.

Balm (.function, v. 41; v. 54: προσφ: αποστ.) occurs in Gen. xxvii. 25 as one of the substances
which the Ishmaelites were bringing from
Gilead to take into Egypt; in Gen. xliii. 11, as one
of the presents which Jacob sent to Joseph: in Jer.
xxii. 22, xiii. 11, as a symbol of the baldness of
the king of Gilead by Manasseh, who saw abundantly at Jericho.

ever, can be considered conclusive. The Syrian
xxxi. 25, suppose carn, "wax," to be meant;
others, as the Arabic version in the passages cited
in Genesis, conjecture llicravus, a medical com-
ponent of great supposed virtue in serpent bites.
Of the same opinion is Castell (Lxx. Hept. s. v.
"balm"). Luther and the Swedish version have
"salve," "ointment," in the passages in Jeremiah;
but in Ex. xxvii. 17 they read "mastic." The
Arabic Rabbis, Jonas and Trenellins, Decedatus,
&c., have "balm" or "balsam," as the A. V. (Cebas,
Herod. ii. 180) identifies the ζωτηρ with the man-
drestree (Pistacia bituminaceae).

Rossmuller (Bibl. Ant. 97) believes that the
pressed juice of the fruit of the zuckerk (Eric-
agarum angustifolium, Linm. [7]), or narrow-leaved
olster, is the substance denoted; but the same
author, in another place (Schol. in Gen. xxvii. 25),
mentions the balsam of Meeca (Amagia opobalsamum,
Linm.), referred to by Strabo (xiv. 778) and Dios-
dorus Siculus (iii. 102), as being probably the ζωτηρ
(see Kito, Phys. Rist. Pal. p. 275; Hasselquist,
Hipp. Rusc. iii. 264). Dr. Revell (Kito's Cyc. Bibl.
Lit.) is unable to identify the ζωτηρ with any of the
numerous substances that have been referred to it.

Josephus (Ant. viii. 6, § 7) mentions a current
opinion amongst the Jews, that the queen of Sheba
first introduced the balsam into Judaism, having
made Solomon a present of a root. This he says
but perhaps it was merely a tradition — the ζωτηρ
cannot be restricted to represent the produce of this
tree, as the word occurs in Genesis, and the plant
was known to the patriarchs as growing in the high-
district of Gilead.

Hasselquist has given a description of the true
balsam-tree of Meeca. He says that the exudation
from the plant is of a yellow color, and pellucid.
It has a most fragrant smell, which is resinous
balsamic, and very agreeable. It is very tenacious
or glutinous, sticking to the fingers, and may be
drawn out into long threads. I have seen it in
a Turkish surgeon's, who had it immediately from
Mecca, described it, and was informed of its virtues;
which are, first, that it is the best stomachic they
know, if taken to three grains, to strengthen a weak
stomach; secondly, that it is a most excellent and
capital remedy for curing wounds, for if a few drops
are applied to the fresh wound, it cures it in a very
short time" (Turb. p. 259).

The trees which certainly appear to have the best
claim for representing the Scriptural ζωτηρ — sup-
posing, that is, that any one particular tree is
denoted by the term — are the Pistacia bituminacea
(mastic), and the Amyris opbalsamum, Linn., the
Balsamodendron opobalsamum, or Gliciante of
modern botanists (Balm of Gilead). One argument
in favor of the first-named tree rests upon the fact
that its name in Arabic (drār, drar) is identical with
the Hebrew: and the Arabic naturalists have attrib-
uted great medicinal virtues to the resin afforded by
this tree (Dioscor. i. 90, 91; Plin. xxiv.
7: Avicenna, edit. Arab. pp. 204 and 277, in
Celsus). The Pistacia bituminacea has been recorded
to occur at Joppa both by Rauwolf and Porroce
(Stend. Flor. Palæst. No. 561). The derivation of
the word from a root, "to flow forth," "is opposed
to the theory which identifies the pressed oil of the

a From Mammeth's description of the zuckem Dr.
Hooker undesitatingly identifies it with Balsamites
Egyptiacae, which he saw abundantly at Jericho.

b "ζωτηρ," "to flow as a wound from a cleft."
suckum (balaamites: Εὐγγελιακα [?]) with the tävîr, although this oil is in very high esteem amongst the Arabs, who even prefer it to the balm of Mecca, as being more efficacious in wounds and bruises (see Marit., ii. 353, ed. Loud.). Maundrell (Journey from Aleppo, to Jerusa., p. 80), when near the Dead Sea, saw the suckum-tree. He says it is a thorny bush with small leaves, and that "the fruit both in shape and colour resembles a small unripe walnut. The kernels of this fruit the Arabs bray in a mortar, and then, putting the pulp into scalding water, they skin off the oyl which rises to the top: this oyl they take inwardly for bruises, and apply it outwardly to green wounds. . . . I procured a bottle of it, and have found it upon some small trials a very healing medicine." "This," says Dr. Robinson (Bib. Res. ii. 211), "is the modern balsam or oil of Jericho." Perhaps, after all, the tävîr does not refer to an exact name from any particular tree, but was intended to denote any kind of resinous substance which had a medicinal value. The tävîr, then, may represent the gum of the Pistacia lentiscus, or that of the Bahamendron opobalsamum. [SPICES; MASTIC;] Compare Winer, Biblisch. Realencyc. s. v., for numerous references from ancient and modern writers on the subject of the balm or balsam-tree, and Hooker's Kew Garden Misc. i. 257.

W. H.

BANUUS (Balaamites; [Vat. Balaam]).

BALTHasar (Baltasar; Baltsasor), Bar. i. 11, 12. [BELHASSAR.]

B'AMAH ([ב'מ, a high place].) Though frequently occurring in the Bible to denote the elevated spots or erections on which the idolatrous rites were conducted [HIGH PLACE], this word appears in its Hebrew form only in one passage (Ez. xx. 29), very obscure, and full of the paronomasia so dear to the Hebrew poets, so difficult for us to appreciate: "What is the high place ([מ'מ]?) whereunto ye hie ([מ'מ]?) and the name of it is called Banah ([מ'מ] unto this day)." (LXX. τι ἐστιν ἀβαίμ . . . καὶ ἐπεκλάδευσεν τὸ ἴσων αὐτοῦ 'Αβαίμ [Vat. AHAM; Alex. A'Balam; Vulg. excelsum.]) Ewald (Propheten, 246) pronounces this verse to be an extract from an older prophet than Ezekiel. G.

* Ewald's idea of a quotation is purely conjectural. The passage is certainly obscure. Hübernick understands "the height!" as referring to the place of the tabernacle or of the temple, to which the people prone to idolatry through successive ages had been accustomed to apply (down to the prophet's time = unto this day) the same name, with very much the same feeling, which they applied to the high places of their idol worship (see his Comm. üb. den Propheten Ezekiel, p. 316). Professor Fairbairn says: Jehovah gave the name Banah to every place of their worship, and held by that as the proper name; for the worship was essentially of a polluted and heathenish character (Ezekiel and his Prophecy, p. 211, 2d ed.). Umbreit would find a sarcasm in the expression: "Truly you do not up, but down when you repair to your high place!" Thus the term ([מ'מ] ever in the mouth of the

backsliding Israelites became a perpetual reminder of their abominable treachery against the gracious God who would draw them upward, on a very different height, to himself" (Comm. üb. die Propheten, iii. 115, ed. 1845). The word after all is really appellative rather than a proper name (A. V. II.

BAMOTH (בָּאֲמֹת [heights]): Ba'adah: Ba'moth. A halting-place of the Israelites in the Amorite country on their march to Caanaan (Num. xxii. 19, 20). It was between Nahaliel and Pfrageh, north of the Arnon. Eusebius (Onomast.) calls it "Baboth, a city of the Amorite beyond Jordan on the Arnon, which the children of Israel took." Jerome adds that it was in the territory of the Beubenites. Knobel identifies it with "the high places of Baal" (Num. xxii. 41), or Bamoth Baal, and places it on the modern Jebel Attarás, the site being marked by stone heaps which were observed both by Sotzet (ii. 342) and Burekhard (Syria, p. 370).

W. A. W.

BAMOTH-BA'AL (בָּאֲמֹת-בָּאָל, high places of Baal): Ba'adah Ba'adah: Ba'mothba'al, a sanctuary of Baal in the country of Mob (Josh. xiii. 17), which is probably mentioned in the Itinerary in Num. xxii. 19, under the shorter form of Bamoth, or Bamoth-in-the-ravine (20), and again in the enumeration of the towns of Moab in Is. xv. 2. In this last passage the word is translated in the A. V. "the high places," as it is also in Num. xxii. 41, where the same locality is doubtless referred to. Near to Bamoth was another place bearing the name of the same divinity,—BAAL-MEON, or BETH-BAAL-MEON.

G.

BAN (Busav [Alex. Abd. Bár]): Tabal, a name in a very corrupt passage (1 Esdr. v. 37); it stands for Tobiah in the parallel lists in Ezra and Nehemiah.

BANA'IAS [3 syl.]: B'aniah; Banais), 1 Esdr. ix. 35. [BENAHAI.

BANI (בָּני [built, perh. baring posteriority]), the name of several men. 1. A Galatite, one of David's mighty men (2 Sam. xxiii. 36; LXX. [ed. Rom.]) translate, Πολυμενοῦς υἱὸς Γαλααθί [Vat. -beï; Alex. Πολύκος δυναμοῦς υἱὸς Γαλατία; Comp. Bani & G'dali; Bani de Gadi].

2. [Barni]: Vat. Bari; Alex. Baan: Boni. A Levite of the line of Merari, and forefather to Ethan (1 Chr. vi. 46).

3. [Bani]: Vat. Alex. om.: Bami. A man of Judah of the line of Pharez (1 Chr. iv. 4). 4. [Bani: Barni, etc.]: Barni. "Children of Barni" returned from captivity with Zerubbabel (Ezr. ii. 10; Neh. x. 14; Ezr. x. 29, 34; 1 Esdr. vi. 12). [BANNI, MANI, and MAANI.]

5. [Barni]: Barni. An Israelite "of the son of Barni" (Ezr. xii. 36). [BANNU'S.]

7. [Bana'ias, etc.]: Barni. A Levite (Neh. viii 7; ix. 4; LXX. transl. καὶ οἱ υἱοὶ Καναδάς, 4 x. 13). [ANUS.]

8. Another Levite (Neh. ix. 4; LXX. [ed Rom.] transl. υἱοί Καναδάς [Vat. om.: Comp Abd. Alex. Xavari: Barni]).

a It will be observed that our Translators have, in Num. xxiii. 3, rendered by "high place" a totally different word (ץ'מ') which is devoid of the special meaning of "Bamoth."
BANID

Levite, of the sons of Asaph (Neh. xi. 22).

BANID (Bavtis) [Vat. τεμιδ.; Alex. Baviti]. Another

[Abd. Bar. 4: Bawtis]. 1 Esdr. viii. 36. This repre-

sum. of a name which has apparently escaped from

seems the Hebrew text (see Ezr. viii. 10).

BANNAIA (3 syl.) [Ζαβάναιας [Vat.

The corresponding name in the list in Ezra is Zawioa.

BANUS (Bavtina). 1 Esdr. ix. 34. [Baut., or Bawhol].

BANQUETS. These, among the Hebrews,

were not only a means of social enjoyment, but

Banqueted to a large extent observed by the male sex

(Neh. viii. 17). Sacrifices, both ordinary and ex-

traordinary, as amongst heathen nations (Ex. xxxix.

15; Judg. xvi. 23), included a banquet, and the sons

made this latter the prominent part. The

two, thus united, marked strongly both domestic

and civil life. It may even be said that some sacrificial

recognition, if it only in pouring the blood

solemnly forth as before God, always attended

the slaughter of an animal for food. The

firstlings of cattle were to be offered and eaten at the sanc-

tuary if not too far from the residence (1 Sam. ix.

13; 2 Sam. vi. 19; Ex. xxii. 29, 39; Lev. xix. 5,

Deut. xix. 20, 21, xv. 19-22). From the

sacrificial banquet probably sprang the ἀγαθᾶς;

as the Lord's supper, with which it for a while 

ceded precedence from the Passover as an extra-

religious celebrations, such events as the evening a son

and heir, a marriage, the separation or reunion of

friends, and sheepshearing, were customarily

attended by a banquet or repast (Gen. xxii. 8, xxix.

22, xxxvi. 27, 54; 1 Sam. xxvi. 2, 36; 2 Sam. xiii.

23). At a funeral, also, refreshment was taken in com-

mon by the mourners, and this might tend to be-

come a scene of indulgence, but ordinarily abso-

luteness seems on such occasions to have been

the rule. The case of Archelaus is not conclusive,

but his inclination towards alien usages was doubt-

less shared by the Herodizing Jews (Jer. xvi.

5-7; Ex. xxiv. 17; Hos. iv. 4; 1 Esdr. vii. 2; Joseph.

de R. J. ii. 1). Birthday-banquets are only men-

tioned in the cases of Pharohi and Heron (Gen.

xx. 29; Matt. xiv. 6). A leading topic of prophetic

relish is the abuse of festivities to an occasion of drunk

ewedness, and the growth of fashion in favor of

drinking parties. Such was the invitation typi-

ically given by Jeremiah to the Hechabites (Jer.

xxvi. 5). The usual time of the banquet was the

evening, and to begin early was a mark of excess

(Ex. v. 11; 1 Esdr. x. 16). The slaughtering of the

cattle, which was the preliminary of a banquet,

occupied the earlier part of the same day (Prov. ix.

2: Is. xxii. 13; Matt. xxii. 4). The most essential

materials of the banquet-room, next to the

table and wine, which last was often drugged

with spices (Prov. ix. 2; Cant. viii. 2), were perfumed

oointments, garlands or loose flowers, white or brilli-

ant roles, after these, exhibitions of music, singers,

and dancers, riddles, jesting, and merriment (Is.

xxvii. 5; 1 Wisd. ii. 6-8; 2 Sam. xiii. 55; Is. xxv.

6, v. 12; Judg. xiv. 19; xvi. 19; xix. 10; Exod. x. 19;

Matt. xxii. 11; Ann. xi. 5, 6; Luke xv. 23). One day

was a not uncommon duration of a festival,

especially for a wedding, but sometimes fourteen

(Tob. viii. 19; Gen. xxix. 27; Judg. xiv. 12); but

if the bride were a widow, three days formed the

limit (Buxtorf, de Conc. Heb.). The reminder

sent to the guests (Luke xiv. 17) was, probably,

only usual in private banquets on a large scale,

involved much preparation. Whether the

slaves who bade the guests had the office (as the

coventor or inventores among the Romans) of

pointing out the places at table and naming the

strange dishes, must remain undecided." (Winer,

s. v. gastermacher.) There seems no doubt that

the Jews of the O. T. period used a common table for

all the guests. In Joseph's entertainment a cerem-

onial separation prevailed, but there is no reason

for supposing a separate table for each, as is dis-

tinctly asserted in Joseph's Te. Ricvets. e. vii.

to have been usual (Buxtorf, l. c.). The latter custom

was certainly in use among the ancient Greeks and

Romans (Hom. Od. xiii., xii. 74; Tac. Germ.

22), and perhaps among the Egyptians (Wilkinson,

ii. 202, earings). But the common phrase to "sit at table," or "eat at any one's table," shows the

originality of the opposite usage. The posture

table at early times was sitting (αἰσθητι, ἀκατηστι),

to sit round, 1 Sam. xvi. 11, xx. 5, 18), and the

guests were ranged in order of dignity (Gen. xiii.

32; 1 Sam. ii. 22; Joseph. Ant. xi. 2, § 4). The words imply the recluent posture (αὐτο-

δικέων, ἀκατῆτριν, or ἀκάτησιαν) belong to the

N. T. The separation of the women's banquet was

not a Jewish custom (Esth. i. 9). Portions or

measures were sent from the entertainer to each guest

at table, and a double or even five-fold share when

peculiar distinction was intended, or a special part

was reserved (1 Sam. i. 5; Gen. xlix. 34; 1 Sam.

xv. 23, 24). Portions were similarly sent to poorer

friends direct from the banquet-table (Neh. viii.

10; Esth. ix. 19, 22). The kiss on receiving a

guest was a point of friendly courtesy (Luke vii.

45). Perfumes and scented oils were offered for the

head, beard, and garments. It was strictly

enjoyed by the Rabbis to wash both before and

after eating, which they called the νομορεισμός

and ἱδρυματοδοσία; but washing the feet seems to

have been limited to the case of a guest who was

also a traveller.

In religious banquets the wine was mixed, by

rabbinical regulation, with three parts of water, and

four short forms of benediction were pronounced

over it. At the passover four such cups were

mixed, blessed, and passed round by the master of

the feast (ἀρχηγός τῶν ἄρχων). It is probable that

the character of this official varied with that of the

entertainment; if it were a religious one, his office

would be quasi-priestly; if a revel, he would be the

necropomaios or arbiter libitum. H. H.

BANUAS (Bawtins; Bavtins), a name occurring

in the lists of those who returned from cap-

tivity (1 Esdr. v. 26). Banumus and Sudias are

mentioned to Hodiarch in the parallel lists of Ezra and Ne-

hemiah.
BAPTISM (βαπτισμα). 1. It is well known that ablution or bathing was common in most ancient nations as a preparation for prayers and sacrifice, or as expiatory of sin. The Egyptian priests, in order to be fit for their sacred offices, bathed twice in the day and twice in the night (Herod. ii. 37). The Greeks and Romans used to bathe before sacrifice (Eo laetum, at sacrificio, Plaut. Addular. iii. 49) and before prayer —

"Hec sanecti ut peacem, Tiberino in gurgite mergis Mane caput bis terque, et noctem flumine purges." Paus. Sat. ii. 15.

At the celebration of the Eleusinian mysteries, on the second day of the greater mysteries, the mystes went in solemn procession to the sea-coast, where they were purified by bathing (see Dict. of Gr. and Rome. Antiq. p. 453). But, above all, when pollution of any kind had been contracted, as by the being stained with blood in battle, purific-

ication by water was thought needful before acts of devotion could be performed or any sacred thing be taken in hand (see Soph. Ajax, 665; Verg. Æn. ii. 719, &c.). Even the crime of homicide is said to have been expiated by such means.

"Omne nefas omnemque nullam purganda causam Credebat nostril tollere posse semen.

Ah! uniam fugies, qui tristis criminis eris.

Purifico tobi possi patris aqua." Orat. Fasti, ii. 35, 33, 45, 46.

There is a natural connection in the mind between the thought of physical and that of spiritual pollution. In warm countries this connection is probably even closer than in colder climates; and hence the frequency of ablution in the religious rites throughout the East.

II. The history of Israel and the Law of Moses abounds with such instructions. When Jacob was returning with his wives and children to Bethel, he enjoined his household to "put away all their strange gods, and to be clean, and change their garments" (Gen. xxxv. 2). When the Almighty was about to deliver the Ten Commandments to Moses in the sight of the people of Israel, he commanded Moses to "sanctify them to-day and to-morrow, and let them wash their clothes" (Ex. xix. 10). After the giving of that Law all kinds of ceremonial pollutions required purification by water. He that ate that which died of itself was to wash his clothes and to bathe his flesh (Lev. xvi. 15); he that touched man or woman who was separated for any legal uncleanness, or who touched even their garments or their bed, was to wash his clothes and bathe himself in water (see Lev. xv.; comp. Deut. xxiii. 10); he that touched a dead body was to be unclean till even, and wash his flesh with water (Lev. xxii. 4, 6); he that let go the scapegoat that burned the skin of the bullock sacrificed for a sin-offering, was to wash his clothes and bathe his flesh in water (Lev. xvi. 26, 28); he that gathered the ashes of the red heifer was to wash his clothes and be unclean till the evening (Num. xix. 10). Before great religious observances such purifi-

cations were especially solemn (see John xi. 55).

And in the later times of the Jewish history there appear to have been public baths and buildings set apart for this purpose, one of which was probably the pool of Bethesda with its five porches men-

ioned in John vi. 2 (see Spencer, De Legg. Heb. p. 92).

It was natural that, of all people, the priests most especially should be required to purify themselves in this manner. At their consecration Aaron and his sons were brought to the door of the tabernacle and washed with water (Ex. xxix. 4); and whenever they went into the sanctuary they were enjoined to wash their hands and their feet in the laver, which was between the altar and the taber-

nacle, "that they died not" (Ex. xxv. 20). In Sol-

omons temple there were two lavers to wash the things offered for the burnt-offering, and a molten sea for the ablution of priests (2 Chr. iv. 2, 6). The consecration of the high-priest deserves especial notice. It was first by baptism, then by un-

cion, and lastly by sacrifice (Ex. xxix. 4, xii. 12-15; Lev. viii.).

The spiritual significance of all these ceremonial washings was well known to the devout Israelite. "I will wash my hands in innocency," says the Psalmist, "and so will I compass thine altar" (Psa. xxvi. 6). "Wash me thoroughly from mine iniquity, and cleanse me from my sin." "Wash me and I shall be whiter than snow" (Psa. li. 2, 7; comp. liii. 13). The prophets constantly speak of pardon and conversion from sin under the same figure. "Wash you, make you clean!" (Is. i. 16).

"When the Lord shall have washed away the filth of the daughter of Zion" (Jer. iv. 4). "O Jerusalem, wash thine heart from wickedness" (Jer. iv. 14). "In that day shall there be a fountain opened to the house of David and to the inhabitants of Jerusalem for sin and for uncleanness" (Zech. xiii. 1). The significant manner in which Pilate washed his hands, declaring himself innocent of the blood of Jesus, was an expressive picturing to the people in forms rendered familiar to their minds from the customs of their law.

From the Gospel history we learn that at that time ceremonial washings had been greatly multi-

plied by traditions of the doctors and elders (see Mark vii. 3, 4), and the testimony of the Evangelist is fully borne out by that of the later writ-

ings of the Jews. The most important and prob-

ably one of the earliest of these traditional customs was the baptizing of proselytes. There is an uni-

versal agreement among later Jewish writers that all the Israelites were brought into covenant with God by circumcision, baptism, and sacrifice, and that the same ceremonies were necessary in admitting proselytes. Thus Maimonides (Isaac Biba, cap. 13). "Israel was admitted into covenant by three things, namely, by circumcision, baptism, and sacrifice. Circumcision was in Egypt, as it is said, "None uncircumcised shall eat of the passover." Baptism was in the Law, as it is said, 'Thou shalt sanctify them to-day and to-morrow, and let them wash their garments,' " And he adds, "So, whenever a Gien tile desires to enter into the covenant of Israel, and place himself under the wings of the Divine Majesty, and take the yoke of the Law upon him, he must be circumcised, and baptized, and bring a sacrifice; or if it be a woman, she must be baptized and bring a sacrifice. The same is abundantly titiled by other writers, as by the Jerusalem and Babylonian Talmud, although no reference to this custom can be found in Philo, Josephus, or the Targum of Onkelos. Its earliest mention appears to be in the Targum of Jonathan on Ex. xii. 44.
BAPTISM

"Thou shalt circumcise him and baptize him." It should be added, that men, women, and children, were all baptized, and either two or three witnesses were required to be present. Some modern writers — Lardner, Ernesti, De Wette, Meyer, Paulus, and others — have doubted or denied that this baptism of proselytes had been in use among the Jews from times so early as those of the Gospel; but it is highly improbable that, after the rise of Christianity, the Jews should have adopted a rite so distinctly Christian as baptism had then become. The frequent use of religious ablution, as enjoined by the Law, had certainly become much more frequent by the tradition of the elders. The motive which may have led to the addition of baptism to the first commanded circumcision is obvious — circumcision applied only to males, baptism could be used for the admission of female proselytes also. Moreover, many nations bordering upon Canaan, and amongst whom the Jews were afterwards dispersed, such as the Ishmaelites and the Egyptians, were already circumcised, and therefore converts from among them could not be admitted to Judaism by circumcision. There seems, indeed, no good reason to doubt that the custom which may so naturally have grown up with it, and which appears to have prevailed not long after the Christian era, had really prevailed from the period of the captivity, if not, as many think, from times of still more remote antiquity (see Bengel, Vorder der Alt. der Jud. Præsidium, Tubing, 1814, quoted by Kuinoel onMatt. iii. 9).

III. The Baptism of John. — These usages of the Jews will account for the readiness with which all men flocked to the baptism of John the Baptist. The teaching of the prophets by outward signs was familiar to the minds of the Israelites. There can be no question but that there was at this period a general expectation of the Messiah's kingdom, an expectation which extended beyond Judea and prevailed throughout all the east (see Urine lento, Stenton, Foggia, c. iv.). Comest had made Judea a province of Rome, and the hope of deliverance rested on the promises of the Kingdom. The last words of Malachi had foretold the coming of the Angel of the Covenant, the rising of the Sun of Righteousness, to be preceded by the prophet Elijah, to turn the hearts of the fathers to the children and of the children to the fathers (Mal. iii. 1, iv. 2, 3). The Seraph therefore taught that "Elias must first come" (Matt. xvii. 10); for this expectation of Elias among the Rabbinos, see Lightfoot, Hexaem. onJohn i. 19, vol. iv. p. 402; Wetstein on Matt. xvi. 13). And so, when John preached and baptized, the people, feeling the call to repentance, came to him as to one who was at the same time reproving them for their sins, and giving hope of freedom from the afflictions which their sins had brought upon them. He proclaimed the near approach of the kingdom of heaven — a phrase taken from Dan. ii. 44, xil. 14, in use also among the Jews in later times (see Wetstein and Lightfoot, H. H., onMatt. iii. 2) — and preached a baptism of repentance "for the remission of sins" (Mark i. 4). They readily united in their own minds the necessity of repentance and the expecta-

tion of the Messiah, according to a very prevalent belief that the sins of Israel delayed the coming of Christ and that their repentance would hasten it. John's baptism, corresponding with the custom of cleansing by water from legal impurity and with the baptism of proselytes from heathenism to Judaism, seemed to call upon them to come out from the unbelieving and sinful habits of their age, and to enlist themselves into the company of those who were preparing for the manifestation of the deliverer.

Naturally connected with all this was an expectation and a using, whether John himself "were the Christ or not" (Luke iii. 15); and when he denied that he was so, the next question which arose was whether he were Elias (John i. 21). But when he refused to be called either Christ or Elias, they asked, "Why, then, baptizest thou?" (John i. 25.) It was to them as a preparation for a new state of things that John's baptism seemed intelligible and reasonable. If he were not bringing them into such a state or making them ready for it, his action was out of place and unreasonable.

There has been some uncertainty and debate as to the nature of John's baptism and its spiritual significance. It appears to have been a kind of transition from the Jewish baptism to the Christian. All ceremonial ablutions under the Law pictured to the eye that inward cleansing of the heart which can come only from the grace of God, and which accompanies forgiveness of sins. So John's baptism was a baptism of repentance for the remission of sins (βαπτισμὸς μετανοής εἰς ἡλιτίαν ἁμαρτιῶν, Mark i. 4); it was accompanied with confession (Matt. iii. 6) it was a call to repentance: it conveyed a promise of pardon; and the whole was Lii up with faith in Him that should come after, even Christ Jesus (Acts xix. 4). It was such that Jesus himself designed to be baptized with it, and perhaps some of his disciples received no other baptism but John's until they received the special baptism of the Holy Ghost on the great day of Pentecost. Yet John himself speaks of it as a new baptism with water unto repentance, pointing forward to Him who should baptize with the Holy Ghost and with fire (Matt. iii. 11). And the distinction between John's baptism and Christian baptism appears in the case of Apollos who, though instructed in the way of the Lord, the faith of Jesus Christ, and fervent in spirit, speaking and teaching diligently the things of the Lord, yet knew only the baptism of John; whereas when Apollos and Priscillas had heard, they took him unto them, and expanded unto him the way of God more perfectly " (Acts xiii. 26). Even more observable is the case of the disciples at Ephesus, mentioned Acts xiv. 1-6. They were evidently numbered among Christians, or they would not have been called disciples, μαθηται. But when they were asked if they had received the Holy Ghost since they had believed, they said that they had not even heard if there was a Holy Ghost, an answer which may have signified either that they knew not as yet the Christian doctrine of the personality of the Spirit of God, or having been baptized in the name of the Trinity, or that they had

a Full information on this subject will be found in Lightfoot, en Matt. iii. 6; Works, xi. 25; Hammond on St. Matt. iii. 6; Schleierm. H. H.; Wetstein on Matt. iii. 2; Buxtorf, Lex. Cod. et Rabbin. s. v. 2; Ges-

b See Lightfoot, as above.
BAPTISM

No doubt it was his will in the first place, by so submitting to baptism, to set to his seal to the teaching and the ministry of John. Again, as He was to be the Head of his Church and the Captain of our salvation, He was pleased to undergo that rite which He afterwards enjoined on all his followers. And, once more, his baptism consecrated the baptism of Christians forever; even as afterwards his own partaking of the Eucharist gave still further sanction to his injunction that His disciples ever after should continually partake of it. But, beyond all this, his baptism was his formal setting apart for his ministry, and was a most important portion of his consecration to be the High Priest of God. He was just entering on the age of thirty (Luke iii. 21), the age at which the Levites began their ministry and the rabbis their teaching. It has already been mentioned that the consecration of Aaron to the high-priesthood was by baptism, anointing, and sacrifice (see Lev. viii. 1). All these were undergone by Jesus. First He was baptized by John. Then, just as the high-priest was anointed immediately after his baptism, so when Jesus had gone up out of the water, the heavens were opened unto Him, and the Spirit of God descended upon Him (Matt. iii. 16); and thus, as St. Peter tells us, “God anointed Jesus of Nazareth with the Holy Ghost and with power” (Acts x. 38). The sacrifice indeed was not till the end of his earthly ministry, when He offered up the sacrifice of Himself; and then at his resurrection and ascension He fully took upon Him the office of priesthood, entering into the presence of God for us, pleading the efficacy of his sacrifice, and blessing those for whom that sacrifice was offered. But the baptism, therefore, was the beginning of consecration; anointing was the immediate consequent upon the baptism; and sacrifice was the completion of the initiation, so that He was thenceforth perfected, or fully consecrated as a Priest for evermore (eis tìn aìdòn tèteleioìnàs, Heb. vii. 28; see Jackson on the Grec, book ix. sect. i. ch. i.).

In this sense, therefore, Christ “came by water” (1 John v. 6); for at baptism He came to his own; as the priest, He entered into the office of a Priest and an Evangelist; He came forth, too, from the privacy of his youth to manifest Himself to the world. But He came “not by water only,” as the Cerinthians, and before them the Nicolaitans, had said (Iren. iii. 11), but by blood also. He had come into the world by birth of the Virgin Mary; He came forth to the world by the baptism of John. Both at his birth and at his baptism the Spirit announced Him to be the Son of God. Thus came He not by baptism only, but by baptism and birth. His birth, his baptism, and the Holy Spirit at both of them, were the three witnesses testifying to the one truth (eis tò év. v. 8), namely, that Jesus was the Son of God (v. 5).

V. Baptism of the Disciples of Christ. Whether our Lord ever baptized has been doubted. The only passage which may distinctly bear on the question is John iv. 1, 2, where it is said that Jesus made and baptized more disciples than John, though Jesus himself baptized not, but his disciples.” We necessarily infer from it, that, as soon as our Lord began his ministry, and gathered to Him a company of disciples, He, like John the Baptist, admitted into that company by the administration of baptism. Normally, however, to say the least of it, the administration of baptism was by the hands of his disciples. Some suppos
that the first-called disciples had all received baptism at the hands of John the Baptist, as must have pretty certainly been the case with Andrew (see John 1:35, 37, 40); and that they were not again baptized with water after they joined the company of Christ. Others believe that Christ himself baptized some of his earlier disciples, who were afterwards authorized to baptize the rest. But in any case the words above cited seem to show that the making disciples and the baptizing them went together; and that baptism was, even during our Lord's earthly ministry, the formal mode of accepting his service and becoming attached to his company.

After the resurrection, when the Church was to be spread and the Gospel preached, our Lord's own commission contains the making of disciples with their baptism. The command, 'Make disciples of all nations by baptizing them' (Matt. xxviii. 19), is merely the extension of his own practice, 'Jesus made disciples and baptized them' (John iv. 1). The conduct of the Apostles is the plainest comment on both; for so soon as ever men, convinced by their preaching, asked for guidance and direction, their first exhortation was to repentance and baptism, that thus the convert should be at once publicly received into the fold of Christ (see Acts ii. 38, viii. 12, 36, ix. 18, x. 47, xvi. 15, 33, 40).

Baptism then was the initiatory rite of the Christian Church, as circumcision was the initiatory rite of Judaism. The contrast between them is plain: the one was a painful and dangerous, the other is a simple and solitary rite. Circumcision seemed a serious entrance upon religion which was a yoke of bondage: baptism is a natural introduction to a law of liberty; and as it was light and easy, like the yoke of Christ, so was it comprehensive and expansive. The command was unlimited, 'Make disciples of all nations by baptizing them.' The arms of mercy were extended to receive the world. The 'Desire of all nations' called all nations to accept his service. Baptism therefore was a witness to Christ's reception of all men, and a sign of God's enduring grace. But again, as circumcision admitted to the Jewish covenant— to the privileges and the responsibility attending to that covenant, so baptism, which secured it, was the mode of admission to the Christian covenant, to its graces and privileges, to its duties and service. It was to be the formal taking up of the yoke of Christ, the accepting of the promises of Christ. The baptized convert became a Christian as the circumcised convert had become a Jew; and as the circumcised convert had contracted an obligation to obey all the ordinances of Moses, but therewith a share in all the promises to the seed of Abraham, so the baptized convert, while contracting all the responsibility of Christ's service, had a share too in all the promises of God in Christ.

It is obviously difficult to draw out the teaching of the New Testament on the rite of baptism and its significance, without approaching too near to the regions of controversy. We shall endeavor therefore merely to classify the passages which refer to it, and to exhibit them in their simplest form, and to let them speak their own language.

VI. The Types of Baptism. — 1. St. Peter (1 Pet. iii. 21) compares the deliverance of Noah in the Deluge to the deliverance of Christians in baptism. The passage is not without considerable difficulty, though its general sense is pretty readily apparent. The apostle had been speaking of those who were put in the ark with the ark which was a prefiguration of Noah when the ark was a preparing, in which few, that is eight souls, were saved by water. According to the A. V., he goes on, 'The like figure whereunto baptism doth now save us.' The Greek, in the best MSS., is 'Ο Καί ήαι άντίστοιχοι ουίν σάδεις βαπτισμάτων . . . . . . Γέφυρας ἀκόλουθος από τούτοις, 'accurately corresponding.' The difficulty is in the relative ὧ. There is no antecedent to which it can refer except ἄντιστοιχος, 'water,' and it seems as if βαπτισμάτων must be put in apposition with ὧ, and as in explanation of it. Noah and his company were saved by water, 'which water also, that is the water of baptism, correspondingly saves us.' Even if the reading were ὧ, it would most naturally refer to the preceding ἄντιστοιχος. Certainly it could not refer to κίβος, which is feminine. We must then probably interpret, that, though water was the instrument for destroying the unbelieving, and this was prefigured; it was yet the instrument ordained of God for saving the ark, and so for saving Noah and his family; and it is in correspondence with this that water also, namely, the water of baptism, saves Christians. Augustine, commenting on these words, writes that 'the events in the days of Noah were a figure of things to come, so that they who believe not the Gospel, when the Church is building, may be considered as like those who believed not when the Church was prepared; whilst those who have believed and are baptized (i.e. are saved by baptism) may be compared to those who were formerly saved in the ark by water' (Festus 184, tom. ii, p. 579). 'The building of the ark,' he says again, 'was a kind of preaching.' 'The waters of the Deluge pre-signified baptism to those who believed—punishment to the unbelieving' (ib.).

It would be impossible to give any definite explanation of every word, and still less without either expressing a theological opinion or exhibiting in detail different sentiments. The apostle, however, gives a caution which no doubt may have need of an interpreter, when he adds, 'not adding yet the water of the flesh, but the answer (ἀπαντήσεως) of a good conscience towards God.' And probably all will agree that he intended here to warn us against resting on the outward administration of a sacrament, with no corresponding preparation of the conscience and the soul. The connection in this passage between baptism and 'the resurrection of Jesus Christ,' may be compared with Col. ii. 12.

2. In I Cor. x. 1, 2, the passage of the Red Sea and the shadowing of the miraculous cloud are treated as types of baptism. In all the early part of this chapter the wanderings of Israel in the wilderness are put in comparison with the life of the Christian. The being under the cloud and the passing through the sea resemble baptism; eating manna and drinking of the rock are as the spiritual food which feeds the Church; and the different temptations, sins, and punishments of the Israelites on their journey to Canaan are held up as a warning to the Corinthian Church. It appears that the Rabbinics themselves speak of a baptism in the cloud (see Wetstein in h. l., who quotes Parch K. Eliezer, 44; see also Schoettgen in h. l.). The passage from
the condition of bondmen in Egypt was through baptism, as
the Red Sea, and with the protection of the luminous
cloud. When the sea was passed, the people were no longer subjects of Pharaoh; but were, un-
der the guidance of Moses, forming into a new
commonwealth, and on their way to the promised
land, with the assurance of a new and differently
appearing land. This resembles the entering of a new
convert from the circumcision of the Christian
Church, his being placed in a new relation, under a
new condition, in a spiritual commonwealth, with a way before him to a better coun-
try, though surrounded with dangers, subject to
temptations, and with enemies on all sides to en-
counter in his progress.2

3. Another type of, or rather a rite analogous to,
baptism, was circumcision. St. Paul (Col. ii. 11)
speaks of the Colossian Christians as having been
circumcised with a circumcision made without
hands, when they were buried with Christ in bap-
tism, in which they were also raised again with
Him (κατὰ περίτευχον τέτοιον τοῦ Χριστοῦ), i. e.
by baptism.

4. Before leaving this part of the subject we
ought perhaps to observe that in more than one
instance death is called a baptism. In Matt. xxi.
22, Mark x. 39, our Lord speaks of the cup which
He had to drink, and the baptism that He was to be
baptized with; and again in Luke xii. 50, "I have
a baptism to be baptized with." The interpreters
generally thought that baptism here means an inun-
dation of sorrows; that, as the baptized went down
into the waters, and was to be poured over
him, so our Lord meant to indicate that He
himself had to pass through "the deep waters of aflic-
tion" (see Kuinoel on Matt. xx. 22: Schleusner, s. r. Βαπτίζω). "To baptize" was used as synon-
ymous with "to overwhelm;" and accordingly in
alter times martyrdom was called a baptism of
blood. But the metaphor in this latter case is
evidently different; and in the above words of our
Lord baptism is used without any qualification,
wheresoever passages adduced from profane authors
we always find some words explanatory of the
meaning of the immersion.3 Is it not then probable that some

1 The Fathers consider the baptism of the sea and
the cloud to be a special type of baptism, that the sea rep-
resented the water, and the cloud the Spirit. (Greg. Naz. Ocr. xxxi. 634: Βάπτισμα Μω-
σέως, ἀλλ’ ἐν ὑδάτι, καὶ τῷ τοιοῦτῳ ἐν νεφέλῃ καὶ ἐν θα-
kλασίῃ, τυπίσεως ἐν τῷ νόμῳ, ὡς καὶ Παύλου δοκεῖ: ἡ ἀθ-
λάσια τοῦ θαλάττων, ἐν νεφελί τοῦ Πνεύματος. See Sozuer, s. v. Βάπτισμα.) Else the Ναύζων is, according to some,
by the ministry of Moses; or, according to others, under the guidance of Moses (as Chrysost., Theophyl-
act, and others, in h. i.). Most plainly, however, and in the opinion of the most weighty commentators,
both ancient and modern, it means "into the relation

22. of death, especially of our Lord's death, to baptism,
when we consider too that the connection of bap-
tism with the death and resurrection of Christ is
so much insisted on by St. Paul? (See below.)

VII. Names of Baptism. — From the types of
baptism referred to in the New Testament, we may
perhaps pass to the various names by which bap-
tism seems to be there designated.

1. "Baptism" (Βάπτισμα) the word "baptismus" occurs only three times. (Mark vii. 8; Heb.
v. 2, x. 10). The verb βαπτίζων (from βαπτίζω, to dip) is the rendering of "baptismus" by the LXX. in 2
K. v. 14; and accordingly the Rabbinus used 
πνεύς κατὰ ὑπομονήν for Βάπτισμα.

The Latin Fathers render "baptizemus" by timpere (c. g. Tertull. oxe. Proc. c. 6, Novissimae mandavit ut tingerent in Patrem
Philum et Spiritum Sanctum); by mergere (as Ambros. De Sacramentis, lib. i. c. 7, Interrogata-
es ex. Creedis in Deum Patrem Omnipotentem: "ad mergere et dixerint, est sepulcrum est\); by mergetur (as Tertullian, De Coram Milliis, c.
3, Definie ter mergitunm); see Suicer, s. r. Ομώδος. Among the Greek Fathers, the word Βαπ-
tize is often used frequently, for to im-
burse or overwhelm with sleep, sorrow, sin, etc.
Thus ο’ τιμωδος Βαπτιζομαι ε’ ουρα, bap-
sed i. e. by baptism.

2. "The Water" (τὸ ὕδατος) is a name of bap-
tism which occurs in Acts x. 47. After St. Peter's
discourse, the Holy Spirit came visibly on Cere-
lius and his company; and the apostle asked,
"Can any man forbid the water, that these should
not be baptized, who have received the Holy
Spirit?" In ordinary cases the water had been
first administered, after that the Apostles laid
their hands on their hands, and then the Spirit was
given. But here the Spirit had come down manifestly, before the
administration of baptism; and St. Peter ar-
gued, that no one could then reasonably addi-
tional baptism (calling it "the water") from those
who had visibly received that of which baptism was the
sign and seal. With this phrase, τὸ ὕδατος, "the
water," used of baptism, compare the "breaking of
bread" as a title of the Eucharist, Acts ii. 42.

3. "The Washing of Water" (τὸ λουτρόν τοῦ
ὕδατος, "the bath of the water"), is another
Scriptural term, by which baptism is signified.
It occurs Eph. v. 26. The whole passage runs,
"Husbands love your own wives, as Christ also
loved the church and gave himself for it, that He
might sanctify and cleanse it by the washing of

a Their is unquestionable, however, that in Mark vii.
4 'Baptismus' is used, where immersion of the whole
body is not intended. See Lightfoot, in loc. [For the
opposite opinion, see De Wette in loc. (Eugen. To}
2. 0), and Meyer in l. (Kontz. u. a. N. T. el. 1194)
See especially Fritzsche, Evangel. Morali, p. 294. H]
water with the word" (καβατις αυτην καθαριζεις τον λουτρον του διος εν ρηματι, "that He might sanctify it, having purified it by the [well-known] laver of the water in the word," Eilli-set). To there appears clearly, in these words, a reference to the bridal bath; but the allusion to baptism is clearer still, baptism of which the bridal bath was an emblem, a type or mystery, signifying to us the spiritual union betwixt Christ and His Church. And as the bride was wont to bathe before being presented to the bridegroom, so washing in the water is that imitative rite by which the Christian Church is betrothed to the Bridegroom, Christ.

There is some difficulty in the construction and interpretation of the qualifying words, εν ρηματι, "by the word." According to the more ancient interpretation they would indicate, that the outward rite of washing and lathing is insufficient and unsatisfying, without the added potency of the Word of God (comp. 1 Pet. iii. 21, "Not the putting away the filth of the flesh," in.; and as the Λουτρον του διος had reference to the bridal bath, the phrase might be an allusion to the words of betrothal. The bridal bath and the words of betrothal typified the water and the words of baptism. On the doctrine so expressed the language of Augustine is famous: "Petrae verbum, et quid est aqua nisi aqua? Aecedit verbum ad elemen tum, et fit sacramentum" (Tract. 80 in John.). Yet the general use of ρημα in the New Testament and the grammatical construction of the passage seem to favor the opinion, that the Word of God preached to the Church, rather than the words made use of in baptism, is that accomplishment of the laver, without which it would be imperfect (see Elliott, on b. l.).

4. "The washing of regeneration." (Λουτρον παλιγγενεσιας, "the bath of regeneration") is a phrase naturally connected with the foregoing. It occurs Tit. iii. 5. All ancient and most modern commentators have interpreted it of baptism. Controversy has made some persons unwilling to admit this interpretation; but the question probably should be, not as to the significance of the phrase, but as to the degree of importance attached in the words of the apostle to that which the phrase indicates. Thus Calvin held that the "bath" meant baptism; but he explained its occurrence in this context by saying, that "Baptism is to us the seal of salvation which Christ hath obtained for us." The current of the apostle's reasoning is this. He tells Titus to exhort the Christians of Crete to be submissive to authority, showing all meekness to all men: "for we ourselves were once foolish, erring, serving our own lusts; but when the kindness of God our Saviour, and his love toward man appeared, not by works of righteousness which we performed, but according to his own mercy. He saved us, by (through the instrumentality of) the bath of regeneration, and the renewing of the Holy Ghost (δια Λουτρον παλιγγενεσιας και ἀνακατασκευας Πνευματος ἀγιου)," which He shed on us abundantly through Jesus Christ our Saviour, that being justified by his grace, we might be made heirs of eternal life through hope for according to hope, κατ' ἐκπαθειαν."

The argument is, that the Christians should be kind to all men, remembering that they themselves had been foremost in disobedience, but that by God's free mercy in Christ they had been transplanted into a better state, even a state of salvation (ἐπαινεις υμαις); and that by means of the bath of regeneration and the renewal of the Holy Spirit. If, according to the more ancient and common interpretation, the water means baptism, the whole will seem pertinent. Christians are placed in a more moral reference to the Church of Christ, by baptism, and they are renewed in the spirit of their minds by the Holy Spirit. One question naturally arises in this passage. Does ἀνακατασκευας depend on Λουτρον, or on διος? If we adopt the opinion of those who make it with παλιγγενεσιας, dependent on Λουτρον, which is the rendering of the Vulgate, we must understand that the renewal of the Holy Ghost is a grace corresponding with, and closely allied to, that of regeneration, and so immediately coupled with it. But it seems the more natural construction to refer ἀνακατασκευας Πνευματος διος to διος, if it were only that the relative, which connects with the verse following, belongs of necessity to Πνευματος. Dean Aford, adopting the latter construction, refers the "washing" to the laver of baptism, and the "renewing" to the actual effect, that it is the spiritual and not the outward and visible sign. Yet it is to be considered, whether it be not novel and unknown in Scripture or theology to speak of renewed as the spiritual grace, or thing signified, in baptism.

There is considerably a connection between baptism and regeneration, whatever that connection may be. But the renewal of the Holy Ghost has been mostly in the language of theologians (is it not also in the language of Scripture?) treated as a further, perhaps a condition, of that spiritual process in the work of grace, than the first breathing into the soul of spiritual life, called regeneration or new birth.

There is so much resemblance, both in the phraseology and in the argument, between this passage in Titus and I Cor. vii, that the latter ought by all means to be compared with the former. St. Paul tells the Corinthians, that in their heathen state they had been stained with heathen vices: "but," he adds, "we were washed" (i.e. ye washed or bathed yourselves. ἁπαλαυθησατε), "but ye were sanctified, but ye were justified in the name of the Lord Jesus Christ, and by the Spirit of our God." It is generally believed that here is an allusion to the being baptized in the name of the Lord Jesus Christ: though some connect it sanetified and justified "as well as washed," with the words "in the name," i.e. (see Stanley, for. b.). But, however this may be, the reference to baptism seems unquestionable.

Another passage containing very similar thoughts, clothed in almost the same words, is Acts xxii. 16, where Ananias says to Saul of Tarsus, "Arise, and be baptized, and wash away thy sins, calling upon the name of the Lord," (ανασται Βαπτισται και ἀπαλαυθησατε τας διαφορας σου, επικαλεσετεται το ονομα αιωνος). See by all means Calvin's Commentary on this passage.

5. "Illumination." (φωτισθαι). It has been much questioned whether φωτισθαι, "enlightened," in Heb. vi. 4, x. 32, be used of baptism or not. Justin Martyr, Clement of Alexandria, and almost all the Greek Fathers, use φωτισθαι as a synonym for baptism. The Syriac version, the most ancient in existence, gives this sense to the word in both passages in the Epistle to the Hebrews. Chrysostom, Theodoret, Theophylact, and other Greek commentators so interpret it; and they are followed by Ernesti, Michaelis, and many mod
BAPTISM

1. The passage in John iii. 5—"Except a man be born of water and of the Spirit, he cannot enter into the kingdom of God"—has been a well-established battle-field from the time of Calvin. Hooker, in his "Order of Bps.," states that for the first fifteen centuries no one had ever doubted its application to baptism, is well known (see Eccl. Pol. v. i.). Zuinglius was probably the first who interpreted it otherwise. Calvin understood the words "of water and of the Spirit" as a τέλειον διά δύναμις, the washing or cleansing of the Spirit (or rather perhaps "by the Spirit"), "who cleanses as water," referring to the Holy Ghost and with fire," as a parallel usage. Stier (Words of the Lord Jesus, in l. i.) observes that Lücke has rightly said that we may regard this interpretation by means of a τέλειον δύναμις, which erroneously appealed to Matt. iii. 11, as now generally abandoned. Stier, moreover, quotes with entire approbation the words of Meyer (on John iii. 5):—"Jesus speaks here concerning a spiritual baptism, as in chap. vi. concerning a spiritual feeding; in both cases, however, with reference to the invisible auxiliaries." That our Lord probably adopted expressions familiar to the Jews in this discourse with Nicodemus, may be seen by reference to Lightfoot, H. H. in loc.

2. The prophecy of John the Baptist just referred to, namely, that our blessed Lord should baptize with the Holy Ghost and with fire (Matt. iii. 11), may more properly be interpreted by a τέλειον δύναμις. Bengel, well paraphrases it:—"Spiritus Sanctus, quo Christus baptizat, ignem vicum habet; atque ex vis igne atiam composat fuit oculis hominum" (Acts ii. 3). The Fathers, indeed, spoke of a threecold baptism with fire: first, of the Holy Ghost in the shape of fiery tongues at Pentecost; secondly, of the fiery trial of affliction and temptation (1 Pet. i. 7); thirdly, of the fire which at the last day is to try every man's works (1 Cor. iii. 13). It is, however, very improbable that there is any allusion to either of the last two in Matt. iii. 11. There is an antithesis in John the Baptist's language between his own lower mission and the Divine authority of the Saviour. John baptized with a mere earthly element, teaching men to repent, and pointing them to Christ; but He that should come after, δέ ερχόμενος, was empowered to baptize with the Holy Ghost and with fire. The water of John's baptism could but wash the body; the Holy Ghost, with which Christ was to baptize, should purify the soul as with fire.

3. Gal. iii. 27:—"For as many as have been baptized into Christ have put on Christ." In the whole of this very important and difficult chapter, St. Paul is reasoning on the inheritance by the Church of Christ of the promises made to Abra- ham. Christ—i.e. Christ comprehending his whole body mystical—is the true seed of Abra- ham, to whom the promises belong (ver. 16). The Law, which came after, could not annul the promises thus made. The Law was fit to restrain (or perhaps rather to manifest) transgression (ver. 23). The Law acted as a pedagogue, keeping us for, and leading us on to Christ, that He might bestow on us freedom and justification by faith in Him (ver. 24). But after the coming of faith we are no longer, like young children, under a peda- gogue, but we are free, as heirs of our Father's house (ver. 23; comp. ch. iv. 1—5). "For ye all are God's sons (filli emancipati, not παῖες, but υἱὸι, Bengel and Elliott) through the faith in..."
BAPTISM

Christ Jesus. For as many as have been baptized into Christ, have put on (clothed yourselves in) Christ (see Schoettgen on Rom. xiii. 14). In Him is neither Jew nor Greek, neither bond nor free, neither male nor female, for all are one in Christ Jesus" (ver. 20-28). The argument is plain. All Christians are God's sons through union with the Only-Begotten. Before the faith in Him came into the world, men were held under the tutelage of the Law, like children, kept as in a state of bondage under a pedagogue. But after the preaching of the faith, all who are baptized into Christ clothe themselves in Him; so they are esteemed as children of His Father, and by faith in Him they may be justified from their sins, from which the Law could not justify them (Acts xii. 38). The contrast is between the Christian and the Jewish church: one bond, the other free; one infant, the other adult. And the transition-point is naturally that when by baptism the service of Christ is undertaken, and the promises of the Gospel are claimed. This is represented as putting on Christ, and in Him assuming the position of full-grown men. In Acts more profound exegesis there is the power of obtaining justification by faith, a justification which the Law had not to offer.

4. 1 Cor. xii. 13: "For by one Spirit (ους εν ένι άναστασις) we were all baptized into one body, whether Jews or Greeks, whether bond or free, and were all made to drink of one Spirit." The resemblance of this passage to the last is very clear. In the old dispensation there was a marked division between Jew and Gentile: under the Gospel there is one body in Christ. As in Gal. iii. 16, Christ is the seed (περιγενεσις) thereof, so here He is the body (περιγενεσις), into which all Christians become incorporated. All distinctions of Jew and Gentile, bond and free, are abolished. By the grace of the same Spirit (ους εν ένι άναστασις) of Christian love and fellowship (comp. Eph. ii. 18), without division or separate interests all are joined in baptism to the one body of Christ, His universal church. Possibly there is an allusion to both sacraments. "We were baptized into one body, we were made to drink of one Spirit (περιγενεσις εν ένι άναστασις) of Lachan and Tisch. omit εις). Both our baptism and our partaking of the cup in the communion are tokens and pledges of Christian unity. They mark our union with the one body of Christ, and they are means of grace, in which we may look for one Spirit to be present with blessing (comp. 1 Cor. x. 4, 17; see Waterland on the Lord's Supper, ch. x., and Stanley on 1 Cor. xii. 13).

5. Rom. vi. 4 and Col. ii. 12, are so closely parallel that we may notice them together. As the apostle in the two last-considered passages views baptism as a joining to the mystical body of Christ, so in these two passages he goes on to speak of Christians in their baptism as buried with Christ in his death, and raised again with Him in his resurrection. As the natural body of Christ was laid in the ground and then raised up again, so His mystical body, the Church, descends in baptism into the waters, in which also (Εν νεκρω σεω, Ματθ. xvi. 17.) the fixation was raised Him from the dead." Probably, as in the former passages St. Paul had brought forward baptism as the symbol of Christian unity, so in those now before us he refers to it as the token and pledge of the spiritual death to sin and resurrection to righteousness; and moreover of the final victory over death in the last day, through the power of the Crucifixion of Christ. It is said that it was partly in reference to this passage in Colossians that the early Christians so generally used true immersion, as signifying thereby the three days in which Christ lay in the grave (see Stier, s. v. ἀναστασις, i. a.).

IX. Recipients of Baptism.—The command to baptize was co-extensive with the command to preach the Gospel. All nations were to be evangelized; and they were to be made members of the fellowship of Christ's religion, by baptism (Matt. xxviii. 19). Whosoever believed the preaching of the Evangelists was to be baptized, his faith and baptism placing him in a state of salvation (Mark xvi. 16). On this command the Apostles acted; for the first converts after the ascension were enjoined to repent and be baptized (Acts ii. 37). The Samaritans who believed the preaching of Philip were baptized, men and women (Acts viii. 12). The Ethiopian eunuch, as soon as he professed his faith in Jesus Christ, was baptized (Acts viii. 37, 38). Lydia listened to the things spoken by Paul, and was baptized, she and her house (Acts xvi. 15). The jailer at Philippi, the very night on which he was convinced by the earthquake in the prison, was baptized, he and all his, straightway (Acts xvi. 33). All this appears to correspond with the general character of the Gospel, that it should embrace the world, and should be freely offered to all men. "Him that cometh unto me I will in no wise cast out" (John vi. 37). Like the Saviour himself, Baptism was sent into the world "not to condemn the world, but that the world might be saved" (John iii. 17). Every one who was convinced by the teaching of the first preachers of the Gospel, and was willing to enroll himself in the company of the disciples, appears to have been admitted to baptism on a confession of his faith. There is no distinct evidence in the New Testament that there was in those early days a body of catechumens gradually preparing for baptism, such as existed in the ages immediately succeeding the Apostles, and such as every missionary church has found it necessary to institute. The Apostles, indeed, frequently insist on the privileges of being admitted to the fellowship of Christ's Church in the initiatory rite, and on the consequent responsibilities of Christians; and these are the grounds on which subsequent ages have been so careful in preparing adults for baptism. But perhaps the circumstances of the Apostles' age were so peculiar as to account for this apparent difference of principle. Conviction at that time was likely to be sudden and strong; the church was rapidly forming; the Apostles had the gift of discerning spirits. All this led to the admission to baptism with but little formal preparation for it. At all events it is evident that the spirit of our Lord's ordinance was comprehensive, not exclusive: that all were invited to come, and that all who were willing to come were graciously received.

The great question has been, whether the invitation extended, not to adults only, but to infants also. The universality of the invitation, Christ's declaration concerning the blessedness of infants and their fitness for his kingdom (Mark x. 14), the admission of infants to circumcision and to the
is little doubt that the expressions in the Book of Acts mean only that those who were baptized with Christian baptism were baptized into the faith of Christ, into the Church of Christ, not that the form of words was different from that enjoined by our Lord in St. Matthew.

Sponsors. — There is no mention of sponsors in the N. T., though there is mention of the "questioning" (ἐπερωτημα). In very early ages of the Church, sponsors (called ἀναθηματίς, sponsors, suscep- toers) were in use both for children and adults. The mention of them first occurs in Tertullian — for infants in the De Baptismo (c. 18), for adults, as is supposed, in the De Corrid, Militis (c. 31; "Inde suscepti lactis et meliss concordiam praestantius.") See Suicer, s. v. ἀναθηματίς). In the Jewish baptism of proselytes, two or three sponsors or witnesses were required to be present (see above, Lightfoot on Matt. iii. 6). It is so improbable that the Jews should have borrowed such a custom from the Christians, that the coincidence can hardly have arisen but from the Christians continuing the usage among the Jews.

XII. Baptism for the Dead. — 1 Cor. xv. 29. "Else what shall they do who are baptized for the dead (ἀνεπί τῶν νεκρῶν), if the dead rise not at all? Why are they then baptized for the dead" (or, "for them")? Lachmann and Tisch. read ἀνεπίτων.

1. Tertullian tells us of a custom of vicarious baptism (vicarium baptismum) as existing among the Marcionites (De Resur. Cons., c. 48: Adj. Marc. Conc., lib. v. c. 10): and St. Chrysostom relates of the same heretics, that, when one of their catechumens died without baptism, they used to put a living person under the dead man's bed, and asked whether he desired to be baptized; the living man answering that he did, they then baptized him in place of the departed (Chrys. Hom. xL in 1 Cor. xv.). Epiphanius relates a similar custom among the Cerinthians (Heres. xxviii.), which, he said, prevailed from fear that in the resurrection those who should suffer punishment who had not been baptized.

The Cerinthians were a very early sect: according to Irenaeus (iii. 11), some of their errors had been anticipated by the Nicobitans, and St. John is said to have written the early part of his Gospel against those errors: but the Marcionites did not come into existence till the middle of the 2d century. The question naturally occurs, Did St. Paul in 1 Cor. xv. 29 allude to a custom of this kind, which even in his days had begun to prevail among heretics and ignorant persons? If so, he no doubt adduced it as an argumentum ad hominem. "If the dead rise not at all, what benefit do they expect who baptize vicariously for the dead?" The very heretics, who, from their belief that matter was incorrigibly evil, denied the possibility of a glorious resurrection, yet showed by their superstitions practices that the resurrection was to be expected; for, if there be no resurrection, their baptism for the dead would lose all its significance. It is truly said, that such accommodations to the opinions of others are not uncommon in the writings of St. Paul (comp. Gal. iv. 21-31; and see Stanley, ad h. l.). St. Ambrose (in 1 ad Cor. xv.) seems to have acquiesced in this interpretation. His words are, "The Apostle adduces the example
BAPTISM

of those who were so secure of the future resurrection that they even baptized the dead, when by human death had come unexpectedly, fearing that the unbaptized might either not rise or rise to evil." Perhaps it may be said, that the greater number of modern commentators have adopted this, as the simplest and most rational sense of the apostle's words. And — which undoubtedly adds much to the probability that vicarious baptism should have been very ancient — we learn from Lightfoot (on 1 Cor. xv.) that a custom prevailed among the Jews of vicarious ablution for such as died under any legal uncleanness.

It is, however, equally conceivable, that the passage in St. Paul gave rise to the subsequent practice among the Marcionites and Cerinthians. Misinterpretation of Scriptural passages has undoubtedly been a fertile source of superstitions ceremony, which has afterwars been looked on as having resulted from early tradition. It is certain that the Greek Fathers, who record the custom in question, wholly reject the notion that St. Paul alluded to it.

2. Chrysostom believes the apostle to refer to the profession of faith in baptism, part of which was, "I believe in the resurrection of the dead," πιστεύω εἰς νεκρῶν ανάστασιν. "In this faith," he says, "we are baptized. After confessing this among other articles of faith, we go down into the water. And reminding the Corinthians of this, St. Paul says, If there be no resurrection, why are they then baptized for the dead, i.e. for the dead bodies (τι καὶ βαπτίζομεν ὑπὲρ τῶν νεκρῶν: πιστεύω, τῶν σωμάτων?) For in this faith thou art baptized, believing in the resurrection of the dead." (Hom. xi. in 1 Cor. xx.: cf. Hom. xiii. in Epist. ad Corinth.). St. Chrysostom is followed, as usual, by Theodoret, Theophylact, and other Greek commentators. Indeed, he had been anticipated by Tertullian among the Latins (Apol. Marcellin. lib. v. c. 11. and probably by Epiphanius among the Greeks (Heres. xxviii.).

The former of the two interpretations above mentioned commends itself to us by its simplicity; the latter by its antiquity, having almost the general consent of the primitive Christians in its favor (see Suicer, i. 642); though it is somewhat difficult, even with St. Chrysostom's comment, to reconcile wholly with the natural and grammatical construction of the words. In addition to the above, which seem the most probable, the variety of explanations is almost endless. Among them the following appear to deserve consideration.

3. "What shall they do, who are baptized when death is close at hand?" Epiphani. Heres. xxviii. 6, where according to Bengel ὑπὲρ will have the sense of μετὰ, close upon.

4. "Over the grave of the martyrs." Such a mode of baptism existed in after ages, see Eiseb. H. E. iv. 12: August. De Ori. Di. xx. 3. Vossius adopted this interpretation; but it is very unlikely that the custom should have prevailed in the days of St. Paul.

5. "On account of a dead Savior:" where an enlagement of number in the word νεκρῶν must be understood. See Rosenmuller, in loc.

6. "What shall they gain, who are baptized for the sake of the dead in the first place?" i.e. that so the εὐθύμων of believers may be filled up (comp. Rom. xi. 25.; Heb. xi. 39), that "God may complete the number of his elect, and hasten his kingdom." See Obsansen, in loc.

7. "What shall they do, who are baptized in the place of the dead?" i.e. who, as the ranks of the faithful are thinned by death, face forward to be baptized, that they may fill up the company of believers. See also Obsansen as above, who appears to hesitate between these last two interpretations.

On the subject of Baptism, of the practice of the Jews, and of the customs and opinions of the early Christians with reference to it, much information is to be found in Vossius, De Baptismo; Suicer, s. c. sacramentum baptismi. [Cfr. H. W. A. Wessel, as referred to above; Lang- ham, Ecol. Art. I. xii. Vices, Discinations, lib. i.; Lightfoot. Hor. Hecb.; and Schottgen, Hor. Hecb., as referred to above. E. H. B.

* The most elaborate recent work on baptism is J. W. F. Heising's Das Sakrament der Taufe, 2 Bde. Erlangen, 1856-1868. See also the art. Taufe (by Stiezel) in Herzog's Real-Lex. xxvi. 428-485. References to the controversial literature on the subject cannot well be given here. The essay, however, of Dr. T. J. Conant, The Meaning and Use of Baptism in philologically and historically investigated, published as an Appendix to his revised version of the Gospel of Matthew (New York, Amer. Bible Union, 1860), and also issued separately, deserves mention for its collections of passages from ancient authors.

A SUPPLEMENT TO BAPTISM.

The "Laying on of Hands" was considered in the ancient church as the "Supplement of Baptism."

1. Imposition of hands is a natural form by which benediction has been expressed in all ages and among all people. It is the act of one superior either by age or spiritual position towards an inferior, and by its very form appears to bestow some gift, or to manifest a desire that some gift should be bestowed. It may be an evil thing that is symbolically bestowed, as when guiltiness was thus transferred by the high-priest to the scapegoat from the congregation (Lev. xvi. 21); but, in general, the gift is of something good which God is supposed to bestow by the channel of the laying on of hands. Thus, in the Old Testament, Jacob accompanies his blessing to Ephraim and Manasseh with imposition of hands (Gen. xxxv. 14); and Moses is ordained in the room of Moses by imposition of hands (Num. xxvii. 18; Deut. xxxiv. 9); eures seem to have been wrought by the prophets by imposition of hands (2 K. v. 11); and the high-priest, in giving his solemn benediction, stretched out his hands over the people (Lev. ix. 22).

The same form was used by our Lord in blessing and occasionally in healing; and it was plainly begun by the Jews as a customary or blesing (Matt. xiv. 13; Mark viii. 16). One of the promises at the end of St. Mark's Gospel to Christ's followers is that they should cure the sick by laying on of hands (Mark xvi. 18); and accordingly we find that Saul received his sight (Acts ix. 17) and Paul's father was healed of his fever (Acts xxvii. 8) by imposition of hands.

In the Acts of the Apostles the nature of the gift is that bestowed by the Apostolic imposition of hands is made clearer. It is called the gift of the Holy Ghost (xvii. 16; xix. 6). This gift of the Holy Ghost is described as the fulfillment of Joel's prediction — "I will pour out my spirit upon all flesh, and your sons and your daughters shall prophesy, and your young men shall see visions.
and your old men shall dream dreams: and on your servants and on your handmaids I will pour out in those days of my Spirit, and they shall prophesy" (ii. 17, 18, and 38). Accordingly, wisdom super-referenced no longer the result of this gift — powers which a Simon Magus could invoke by the recital of bestowing which he could covet and propose to purchase (viii. 18). In the case of the Ephesian disciples these powers are stated to be, speaking with tongues and prophesying (xix. 6). Sometimes they were granted without the ceremony of imposition of hands, in answer to Apostolic prayer (iv. 31), or in confirmation of Apostolic preaching (x. 44). The former cases are included among the extraordinary (xi. 17), and as having occurred in an extraordinary manner for the special purpose of impressing a hardly-learned lesson on the Jewish Christians by its very strangeness.

By the time that the Epistle to the Hebrews was written we find that there existed a practice and doctrine of imposition of hands, which is pronounced by the writer of the Epistle to be one of the first principles and fundamentals of Christianity, which he enumerates in the following order: (1) the doctrine of Repentance; (2) of Faith; (3) of Baptism; (4) of Laying on of Hands; (5) of the Resurrection; (6) of Eternal Judgment (Heb. vi. 1, 2). Laying on of Hands in this passage can mean only one of three things — Ordination, Absolution, or that which we have already seen in the Acts to have been practiced by the Apostles, imposition of hands for the gift of the Holy Ghost on the baptized. The meaning of Ordination is excluded by the context. We have no proof of the existence of the habitual practice of Absolution at this period nor of its being accompanied by the laying on of hands. Everything points to that laying on of hands which, as we have seen, immediately succeeded baptism in the Apostolic age, and continued to do so in the ages immediately succeeding the Apostles.

The Christian dispensation is specially the dispensation of the Spirit. He, if any, is the Vicar whom Christ appointed to fill his place when he departed (John xvi. 7). The Spirit exhibits himself not only by his gifts, but also, and still more, by his graces. His gifts are such as are enumerated in the Epistle to the Corinthians: "the gift of healing, of miracles, of prophecy, of discerning of spirits, of divers kinds of tongues, of interpretation of tongues" (1 Cor. xii. 10). His graces are: "love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance." (Gal. v. 22, 23): the former are classed as the extraordinary, the latter as the ordinary gifts of the Spirit.

It was the will of the Spirit to bestow his gifts in different ways at different times, as well as in different ways and on different persons at the same time (1 Cor. xii. 6). His extraordinary gifts were poured out in great abundance at the time when the Christian Church was being instituted. At no definite moment, but gradually and slowly, these extraordinary gifts were withheld and withdrawn. When the Church was now contemplated as no longer in course of formation, but as having been now brought into being, his miracles of power ceased to be wrought (see Trench, On the Miracles, Introduction, and Jeremy Taylor, On Confirmation). But he continued his miracles of grace. His ordinary gifts never ceased being dispensed. But as one of the intermediate forms of a smaller order of the Apostles, although the same as God's Church, although not always accompanied with equal largeness of those external effects which

ceasing the Apostles, we may suppose that the consequences of the imposition of hands which manifested themselves in visible works of power (Acts viii., xix.) ceased. Nevertheless the practice of the imposition of hands continued. Why? Be it remembered, in addition to the fact that the Spirit his invisible working was believed to be thereby increased, and his divine strength therein imparted. That this was the belief in the Apostolic days themselves may be thus seen. The ceremony of imposition of hands was even then habitual and ordinary. This may be concluded from the passage already quoted from Heb. vi. 2, where imposition is classed with Baptism as a fundamental: "it may possibly be also defined, (as we shall show to have been believed) from 2 Cor. i. 21, 22, compared with Eph. i. 13, iv. 30; 1 John ii. 29; and it may be certainly inferred from subsequent universal practice. But although all the baptized immediately after their baptism received the imposition of hands, yet the extraordinary gifts were not given to all. "Are all workers of miracles? have all the gifts of healing? do all speak with tongues? do all interpret?" (1 Cor. xii. 29). The men thus endowed were, and must always have been, few among many. Why, then, and with what results, was imposition of hands made a general custom? Because, though the visible gifts of the Spirit were bestowed only on those on whom He willed to bestow them, yet there were diversities of gifts and operations (ib. 11). Those who did not receive the visible gifts might still receive, in some cases, a strengthening and enlightenment of their natural faculties. "To one is given by the Spirit the word of wisdom, to another the word of knowledge by the same Spirit" (ib. 8); while all in respect to whom no obstacle existed might receive that grace which St. Paul contrasts with and prefers to the "best gifts," as "more excellent" than miracles, healing, tongues, knowledge and prophesying (ib. 31); greater too than "faith and hope" (xiii. 13). This is the grace of "clarity," which is another name for the ordinary working of the Holy Spirit in the heart of man. This was doubtless the belief on which the rite of Imposition of Hands became universal in the Apostolic age, and continued to be universally observed in the succeeding ages of the Church. There are numberless references or allusions to it in the early Fathers. There is a possible allusion to it in Theophilus Antiochensis, iv. 170 (p. 122, Naut. i. c. 12, al. 17). It is spoken of by Tertullian, A. D. 200 (De Bp. c. viii.; De Resurr. Cor. c. viii.); by Clement of Alexandria, A. d. 200 (opus Euseb. I. iii. c. 17); by Origen, A. D. 210 (Horae. vii. in Ezech.); by Cyprian, A. D. 250 (Ep. pp. 70, 73); by Firmilian, A. D. 250 (opus Cyr. Ep. p. 75, § 8); by Cornelius, A. D. 260 (opus Euseb. I. vi. c. 43); and by almost all of the chief writers of the 4th and 5th centuries. Cyprian (loc. cit.) derives the practice from the example of the Apostles as recorded in Acts viii. Firmilian, Jerome, and Augustine refer in like manner to Acts xix. "The Fathers," says Hooker, "everywhere impute unto it that gift or grace of the Holy Ghost, not which maketh us first Christian men, but when we are made such, assisteth us in all virtue, arithmeteth us against temptation and sin. . . . The Fathers therefore, being thus persuaded, held the confirmation of the Spirit as an ordinance, and although the Apostles always professed God's Church, although not always accompanied with equal largeness of those external effects which
give it countenance at the first" (Eccles. Pol. v. 66, 4).

II. Time of Confirmation.—Originally Imposi-
tion of Hands followed immediately upon Bap-
tism, so closely as to appear to be the princi-
pal act, or a supplement to it. This is clearly stated by Tertullian (De Bapt. vii., viii.), Cyril (Catech. Myst. iii. 1), the author of the Apostolical Constitutions (vii. 43), and all early Christian writers; and hence it is that the names "apophisy, gysmos, sigillum, siguralum, are applied to Baptism as well as to Imposition of Hands. (See Euseb. H. E. iii. 23; Greg. Naz. Or. p. 40; Herm. Post. iii. 9, 16; Tertull. On Repentance.) Whether it were an infant or an adult that was baptized, confirmation and admission to the Eu-
charist immediately ensued. This continued to be the general rule of the Church down to the ninth century, and is the rule of the Eastern Churches to the present time. The way in which the difference in practice between East and West grew up was the following. It was at first usual for many persons to be baptized together at the great festivals of Easter, Ascension, and Epiphany in the presence of the bishop. The bishop then confirmed the newly-baptized by prayer and imposition of hands. But by degrees it became customary for presbylers and deacons to baptize in other places than the cathed-
 drals and at other times than at the great festivals. Consequently, it was necessary either to give to presbylers the right of confirming, or to defer con-
firmation to a later time, when it might be in the power of the bishop to perform it. The Eastern Churches gave the right to the presbyter, reserving only to the bishop the composition of the chrism with which the ceremony is performed. The Western Churches retained it in the hands of the bishop. (See Conc. Carth. iii. can. 36 and iv. can. 36; Conc. Toledo, i. can. 29; Conc. Toledo, can. 6; Conc. Breviar. i. can. 36 and ii. can. 4; Conc. Elber. can. 38 and 77.) Tertullian says that it was usual for the bishop to make expeditions (eccenticum) from the city in which he resided to the villages and remote spots in order to lay his hands on those who had been baptized by presbylers and deacons, and to pray for the gift of the Holy Spirit upon them (Cont. Leo f. iv.). The result was that, in the West, men's minds became accustomed to the se-
verance of the two ceremonies which were once so closely joined—the more, as it was their practice to receive those who had been heretically or schis-
matically baptized, not by rebaptism, but only by imposition of hands and prayer. By degrees the severance became so complete as to be sanctioned and required by authority. After a time this ap-
pendix or supplement to the sacrament of baptism became itself erected into a separate sacrament by the Latin Church.

III. Names of Confirmation.—The title of "Confirmation" is modern. It is not found in the early Latin Christian writers, nor is there any Greek equivalent for it: for τέκνοι answers rather to "consecration" or "perfection," and refers rather to baptism than confirmation. The ordinary Greek word is ψευδης, which, like the Latin "unctio," expresses the gift of the Holy Spirit's grace. In this general sense it is used in 1 John ii. 29, "Ye have an unction from the Holy One," and in 2 Cor. i. 21, "He which hath anointed us is God, and we are anointed with the anointing of the Spirit in our hearts." So early a writer as Tertullian not only mentions the act of anointing as being in use at the same time with the imposition of hands (De Bapt. vii. and viii.), but he speaks of it as being "de pristina disciplina," even in his day. It is certain, therefore, that it must have been recognized in a form and a way that came thought by some that the two scriptural passages above quoted imply its existence from the very be-
ginning. (See Chrysostom, Hilary, Theodoret, Conm. in loc. and Cyril in Catech. 3.)

Another Greek name is ἀποθεσις. It was so called as being the consummation and seal of the grace given in baptism. In the passage quoted from the Epistle to the Colossians "sealing" by the Spirit is joined with the title of the Holy Ghost as being numerically one and the same. Hence Augustine (De Fide, xx. 25) sees a reference in these passages to the rite of confirmation.

IV. Definitions of Confirmation.—The Greek Church does not refer to Acts viii., xix., and Heb. vi. for the origin of confirmation so much as to 1 John ii. and 2 Cor. i. Regarding it as the con-
summation of baptism it condemns the separation which has been effected in the West. The Russian Church defines it as a "mystery in which the bap-
tized believer, being anointed with holy chrism in the name of the Holy Ghost, receives the gifts of the Holy Ghost for growth and strength in the spiritual life" (Lapierre Catechismus). The Latin Church defines it as an "unction by chrism (ac-
companied by a set form of words), applied by the Bishop to the forehead of one baptized, by means of which he receives increase of grace and strength by the institution of Christ" (Ligouri after Bel-
hrmine). The English Church (by implication) as "a rite by means of which the regenerate are strengthened by the manifold gifts of the Holy Ghost the Comforter, on the occasion of their rat-
ing the baptismal vow" (Confirmation Service). Were we to criticise these definitions, or to describe the ceremonies belonging to the rite in different ages of the Church, we should be passing from our legitimate sphere into that of a Theological Dictionary.

Literature.—Hooker, Ecclesiastical Polity, bk ii. v. 66, 1843; Belhormine, De Sacramentis Confirmationis, in libro De Contriversioni, tom. iii. Col. Agr. 1823; Meill, De Confirmatione et Ex-
ternali Institutione, Genev. 1820; Hammond, De Con-
firmatione, Oxon. 1661; Hall, On Imposition of Hands, Works, ii. 876, Lond. 1661; Pearson, Lectio I. in Acta Apostolarum, Minor Works, i. 362, Oxf. 1814; Taylor, A Discourse of Confirmation, Works, v. 619, Lond. 1854; Wheately, Illustration of Book of Common Prayer, c. ix. Oxf. 1806; Bingham, Ecclesiastical Antiquities, bk. xii. Lond. 1838; Ligouri, Theologia Moralis, iii. 408, Parisiis, Parisiis et Divinitiis, Camb. 1811; Mill, Perfection on Heb. vi. 2, Camb. 1843; Palmer, Origins Liturgicarum: On Confirmation, Lond. 1815; Bates, College Lecture on Christian Antiquities, Lond. 1845; H. Wordsworth, Cate-
chesis, Lond. 1857; Dr. Wordsworth, Notes on Grecian Text, on Acts viii., xix. and Heb. vi., Lond. 1860, and On Confirmation, Lond. 1861; Wall on Confirmation, Lond. 1862.

BARABBAS (Bαραβάς, נבavis, son of}
Abaroth, see Simonaitis, Ονομ. Ν. Τ. 38), a robber (κρατήρ, Judges xxviii. 40), who had committed murder in an insurrection (Mark xvi. 7; Luke xxii. 19) in Jerusalem, and was lying in prison at the time of the trial of Jesus before Pilate. When the Roman governor, in his anxiety to save Jesus, proposed to release him to the people in accordance with the custom that he should release one prisoner to them at the Passover, the whole multitude cried out, Αλέχα τοῦτον, απόλογον δέ ἐστιν τῷ Βαραθάιῖον: which request was complied with by Pilate. According to many [especially two of them a seconda auctore] of the cursive, or later MSS. in Matt. xxvii. 17, his name is Βαραθάειον: Pilate's question there running, τίνα δέλετε ἀπόλογον ἐστίν: Βαραθάειον, δέ Ιησοῦ τὸν λέγομεν Χριστόν: and this reading is supported by the Aramaic version, and cited by Origen (on Matt. vol. v. 35). It has in consequence been admitted into the text by Fritzsche and Tischendorf;* but the contrast in ver. 20, that they should ask Barabas, and destroy Jesus," seems fatal to it.

BARACHEL (בַּרַאכֶל [from God has blessed]; Baraeha: Barachiel, "the Buzite," father of Elihu (Job xxxii. 2, 6). [Bez.]

* BARACHTHAH, Zech. i. 1, 7, A.V. ed. 1611, and other early editions. BERECHIAH 7.

BARACHAS (Barachas; Barachias), Matt. xxvii. 15. [ZACHARIAS.]

BARAK (בָּראק, Eighting, as in Ex. xix. 16: Barak, Vulg.: comp. the family name of Hannibal, Barea = "fulmen belli"), son of Abinom of Kedesh, a refuge-city in Mount Naphtali, was invited by Deborah, a prophetess of Ephraim, to deliver Israel from the yoke of Jabin ("proud") which was probably the dynastic name of those kings of northern Canaan, whose capital city was Hazor on Lake Moron. Sisera, his general and procator, oppressed a promiscuous population at Harosheth. Accompanied, at his own express desire, by Deborah, Barak led his rudely-armed force of 10,000 men from Naphtali and Zebulon to an encampment on the summit of Tabor, where the nine hundred iron chariots of Jabin would be useless. At a signal given by the prophetic, the little army, seizing the opportunity of a providential storm (Joseph. v. 3, 4) and a wind that blew in the faces of the enemy, boldly rushed down the hill, and utterly routed the unwieldy host of the Canaanites in the plain of Jezreel (Edomud), the battle field of Palestine" (Stanley, S. & P. p. 331). From the prominent mention of Taanaach (Judg. v. 19, "sandy soil") and of the river Kishon, it is most likely that the victory was partly due to the suddenly swollen waves of that impetuous torrent (κρατήρ, LXX.), particularly its western branch called Megiddo. The victory was decisive, Harosheth taken (Judg. iv. 16); Sisera murdered, and Jabin ruined. A peace of 40 years ensued, and the next danger came from a different quarter. The victors composed a splendid eulogian ode in commemoration of their deliverance (Judg. v.).

It is difficult to decide the date of Barak. He appears to have been a contemporary of Shunmig (Judg. v. 6). If so, he could not have been so much as 175 years after Joshua, where he is generally placed. Lord A. Hervey supposes the narrative to be a repetition of Josh. xi. 1-12 (Genealogies, p. 225 ff.). A great deal may be said for this view; the names Jabin and Hazor: the mention of subordinate kings (Judg. v. 19; cf. Josh. xi. 2 ff.): the general locality of the battle the prominence of chariots in both narratives, and especially the name Mesaphoth-maim, which seems to mean "burning by the waters," as in the margin of the A.V., and not "the flow of waters." Many chronological difficulties are also thus removed; but it is fair to add that in Stanley's opinion (S. & P., p. 392, note) there are geographical difficulties in the way. (Ewald, Gesch. des Volkes Israel: Lord A. Hervey, Genealogies, pp. 225-245 ff. [Deborah].)

F. W. F. * The means we have at present for illustrating the local scene of Barak's victory over Sisera impart a new interest to the narrative, and furnish a remarkable testimony to its accuracy. Though the song of Deborah and Barak was written thousands of years ago, so many of the places mentioned in it have survived to our time and been identified that this battle-field lies now mapped out before us on the face of the country almost as distinctly as if we were reading the account of a contemporary event. Dr. Thomson, who has had his home for a quarter of a century almost in sight of Tabor, at the foot of which the battle was fought, has given a living picture of the movements of the hostile armies, and of the localities referred to, showing that nearly all these still exist and bear their ancient names, and occur precisely in the order that the events of the narrative presuppose. The passage is too long for citation (Land and Book, i. 111-144), but will be found to illustrate strikingly the topographical accuracy of Scripture. Stanley has given a similar description (Sin. and Pal. p. 331, Amer. ed.). We have monographs on the song of the conquerors (Judg. v.) from Hollmann, Comment. philol.-crit. (Lips. 1818); Kötcher, Achdertes zum Alt. Text. (p. 16 ff.; Gumpach, Alttestamentliche Studien (Heidelberg, 1852); and Sack, Lieder in den historischen Büchern des A. T. (1864). The exegetical articles (embracing translation and notes) of Dr. Robinson (Br. Rep. i. 508-612) and of Dr. Smith, Prof. of Bible, xxii. p. 31, ed. 1858, are both elaborate and valuable. The Commentaries on Judges (those of Stader, Keil, Bertheau, Cassel) give special prominence to the explanation of this remarkable odes. There is a spirited though free translation of the song in Milman's History of the Jews, i. pp. 292-295 (Amer. ed.).

BARBARIAN (βαρβαρός). Πέτυ μὴ οἶλαί "Ελλάνος βαρβάρος is the common Greek designation, quoted by Serv. of Virg. Aen. ii. 504; and in this strict sense the word is used in Rom. i. 14, "I am debtor both to Greeks and barbarians," where Luther used the term "Ungrieche," which happily expresses its force. Ελλάνος καὶ βαρβάρος is the constant division found in Greek literature, but Thucydides (i. 3) points out that this distinction is subsequent to Homer, in whom the word does not occur, although he terms the Carians Βαρβαροί (II. ii. 867, where Eustathius connects the other form Κάραβαρος with Κάρ). At first, according to Strabo (xiv. p. 692), it was only used κατά στρατιωτικά of publication, assigning his reasons at considerable length. See also Tregelles' Account of the Printed Text of the Greek N. T., pp. 194-196 A.
The ancient Egyptians (like the modern Chinese) had an analogous word for all 'πῦς πῆς σφᾶνεν ἀραμάσσων, Herod. vi. 138; and βαρβαρός is used in the LXX. to express a similar Jewish distinction. Thus in Ps. exiii. 1, ἀλὸς βαρβαρός is used to translate θηλ, "περιγρεῖσαι σεμνὸν υτῶν" (Schleusen. Thet. s. v.), which is also an onomatopeic from θηλ, to scream. In 1 Cor. vi. 13, 1 Tim. iii. 7, we have αἰτ ἥθην, and Matt. xvi. 32, χαὶ ἥθην, used Hebraistically for ὁμοιοῦν, ἀναγοράζειν (in very much the same sort of sense as that of βαρβαρός) to distinguish all other nations from the Jews; and in the Talmudists we find Palestine opposed to ἐλλάδα, just as Greece was to Barbaria or ἡ βαρβαρός: (cf. A. R. Pin. ii. 15: Lighthoat, Cornish Grammar, 6th edit.) And yet so completely was the term βαρβαρός accepted, that even Josephus and Philo scruple as little to reckon the Jews among them (int. xi. 7, § 1, &c.), as the early Romans did to apply the term to themselves ("Demophilus scriptam, Marcus verit barriers": Plaut. Aul. praef. 10). Very naturally after a word began to involve notions of crassity and contempt (θηλος βαρβαρός, 2 Macc. iv. 26, iv. 2, &c.), and then the Romans excepted themselves from the scope of its meaning (cf. de Rep. i. 37, § 68). Afterwards only the savage nations were called barbarians; though the Greek Constantine-politians called the Romans "barbarians" to the very last. (Gibbon, e. 51, vi. 531, ed. Smith: Winer, s. v.)

BARBAROUS (βαρβαρός), as employed in Acts xxviii. 2 (A. V.), means "foreign," a sense now obsolete, and designates there the Malithans as speaking a different language from the Greeks. The inhabitants of Melita (Bolbo), a Phoenician race and spoke the Phenic, i. e., Phenician, as spoken at Carthage. A misunderstanding of the term rendered "barbarous" in Acts xxviii. 2 led Gerardi to declare that the Malithans could be meant there, because they were highly civilized. The "no little kindness" which "the barbarous people showed" to the wrecked mariners obliges us to requite them of any want of humanity. "Barbarians" (see above) would be less inexact, but bears now towards the same objectionable meaning.

BAR-HUMITE, THE. [BAHUMIR.]  
BARJAH (בֶּריה) [a bolt]: Beřijl; [Vat. Magn.] Alex. Bajna: Bajnij, one of the sons of Slovenia, a descendant of the royal family of Judah (1 Chr. iii. 22).

BAR-JEUS. [ELYMAS].

BAR-JO'NA. [PETER].

BAR-KOS (בָּרָקָס) [painter]: Barpokus, [Vat. Barpoxus; in Neh.] Barpokos, [Alex. Barqous]: Barros, "Children of Barkos" were among the Nethinim who returned from the captivity with Zerubbabel (Ezra ii. 53; Neh. vii. 55).

BARLEY (בריליה, av. 's ab: ῥοῖθαρχον), the well-known useful cereal, mention of which is made in numerous passages of the Bible. Pliny (H. N. xvi. 7) states that barley is one of the most ancient articles of diet. It was grown by the Egyptians (Ex. ix. 31; Herod. ii. 77; Diodor. i. 34; Plin. xxii. 25); and by the Jews (Lev. xxvi. 16; Deut. vii. 8; Ruth ii. 17, &c.), who used it for making into bread, chiefly among the poor (Judg. viii. 13; 2 K. iv. 42; John vi. 9, 13); for making into bread by mixing it with wheat, beans, lentils, millet, &c. (Ex. iv. 9); for making into cakes (Ex. iv. 12); as fodder for horses (1 K. iv. 28). Compare also Juvenal (viii. 154); and Pliny (H. N. xvii. 34; xxvii. 21), who states that though barley was extensively used by the ancients, it had in his time fallen into disrepute and was generally used as fodder for cattle only. Solmiuni says that barley is the common food for horses in the East. Oats and rye were not cultivated by the Jews, and perhaps not known to the Romans. (Rueff also by Kitto. Phys. R. of Pol. 214.) Barley is mentioned in the Mishna as the food of horses and asses.

The barley harvest is mentioned Ruth i. 22, ii. 23; 2 Sam. xxi. 9, 10. It takes place in Palestine in March and April, and in the hill districts as late as May; but the period of course varies according to the localities where the corn grows. Mariti (Travels in Greece) says that the barley in the plain of Jericho begins to ripen in April. Niebuhr (Rath. rom. Arch. p. 199) found barley ripe at the end of March in the fields about Jerusalem. The barley harvest always precedes the wheat harvest, in some places by a week, in others by fully three weeks (Robinson, Bib. Res. ii. 99, 278). In Egypt the barley is cut a month earlier than the wheat; whence its total destruction by the hail-storm (Ex. xxxi. 2). Barley was sown at any time between November and March, according to the season. Niebuhr states that he saw a crop near Jerusalem ripe at the end of March, and a field which had been just newly sown. Dr. Kitto adds the authority of the Jewish writers as an additional proof of the above statement (Phys. H. Pol. 229). This answers to the winter and spring-sown wheat of our own country; and though the former is generally ripe somewhat earlier than the latter, yet the harvest-time of both is the same. Thus it was with the Jews; the winter and spring-sown barley were usually gathered into the graners about the same time; though of course the very late spring-sown crops must have been gathered in some time after the others.

Major Skinner (Jardins in an Eastern Journey to Jeruel, i. 338) observed near Pannasus a field newly sown with barley, which had been submitted to showers similar to what is done to rice-fields. Dr. Royle (Kitto's Cyc. Bib. Lit. art. "Barley") with good reason supposes that this explains Is. xxxii. 20: "Blessed are ye that sow beside all waters," and demurs to the explanation which many writers have given, namely, that allusion is made to the mode in which rice is cultivated. We cannot, however, at all agree with this writer, that the passage in Ezek. xix. 1 has any reference to irriga.
BARLEY

BARNABAS

The Hebrew word דָּוָאָם is derived from דָּוָא אָם, kvar; so called from the long, rough awn which is attached to the husk. Similarly, hordeum is from corne.

The notice of Barnabas in Gal. ii. 13 was later, in or about the 2nd century, and refers to barley fields or hasenbachum, or winter barley of farmers, will serve to represent the latter kind. The kind usually grown in Palestine is the H. diastichum. It is too well known to need further description. 1 W. H.

Barnabas (בָּרָנָבָא; [Barnobas], a name signifying τῶν περιπλάκτων, 'son of prophecy,' or 'environers' or 'outlookers' (or, but not so probably, 'consultation,' as A. V.), given by the Apostles (Acts iv. 36) to Joseph (or Jesus, as the R. C. Text), a Levite of the island of Cyprus, who was early a disciple of Christ (according to Euseb. H. E. i. 12, and Clem. Alex. Strom. ii. 176 Syr., one of the Seventy), and in Acts (i. c.) is related to have brought the price of a field which he had sold, and to have kild it at the feet of the Apostles. In Acts ix. 27, we find him introducing the newly-converted Saul to the Apostles at Jeru-

The connection of Gideon and the barley-cake, in the dream which the man told to his fellow (Judg. vii. 19). Gideon's family was poor in Manasseh—and he was the least in his father's house; and I doubtless the Mitzizzites knew it. Again, the Israelites had been oppressed by Midian for the space of seven years. Very appropriate, therefore, is the dream and the interpretation thereof. The despised and humble Israelitish deliverer was a mere vile barley-cake in the eyes of his enemies. On this passage Dr. Thomson remarks. 'If the Mitzizzites were accustomed in their exporternorous songs to call Gideon and his band 'cakes of barley bread,' as their successors the haughty Bethesda, often do to ridicule their enemies, the application would be all the more natural.' That barley was cultivated abundantly in Palestine is clear from Deut. viii. 8; 2 Chr. ii. 10, 15.

The cultivated barleys are usually divided into 'two-rowed' and 'six-rowed' kinds. Of the first the Hordeum diastichum, the common summer barley of England, is an example; while the H.

If we place Paul's rebuke of Peter (Gal. ii. 11) in the interval between the apostle's second and third missionary journey (Acts xiv. 27, and xvii. 10; comp. Acts x. 1; 1 Cor. iii. 5; 4 Pet. iv. 35; Bauernfater, Apostelgesch. ii. 351, and others) As to character, some of the Germans compare Barnabas with Melechithon and Paul with Luther. 2
BARODIS

the great Apostle. As to his further labors and death, traditions differ. Some say that he went to Milan, and became first bishop of the church there; the Clementine Homilies make him to have been a disciple of our Lord himself, and to have preached in Rome and Alexandria, and converted the Hebrews; and the Clementine Recognitions, to have preached in Rome even during the lifetime of our Lord. There is extant an apocryphal work, probably of the fifth century, *Acta et Passus Baronis* in Cyprus, which relates his second missionary journey to Cyprus, and his death by martyrdom there; and a still later encomium of Baranias by a Syrian monk, Alexander, which makes him to have been brought up with St. Paul under Gamaliel, and gives an account of the pretended finding of his body in the time of the Emperor Zeno (547-540). We have an Epistle in 21 chapters called by the name of Baranias. Of this, the first four chapters and a half are extant only in a barbarous Latin version; the rest in the original Greek. Its authenticity has been defended by some great names; and it is quoted as the work of Baranias by Clem. Alex., seven times, by Origen thrice; and its authenticity, but not its authority, is allowed by Eusebius. *Hist. Eccl*. iii. 24 and 26, and Jerome, *Card. Scriptor. Arcan. 2o*, c. iii. 24. But it is very generally given up now, and the Epistle is believed to have been written early in the second century. The matter will be found concisely treated by Heide, in the preface to his edition of the Apostolic Fathers, vol. 1, Hübner, 1847; and more at length in his volume, *Das Schriften der Apostolischen Väter 4*, Barmen, 1849; and in Heichel's article in *Die christliche Literatur und dogmat. d. k. d. Ew*. 21, 1850. See also *Norton's Grundsätze des Glaubens*, 21, vol. i. Add. Notes, pp. cc-lxxvi, London, 1846, and Donaldson's *Hist. of Christian Literature and Dogma*, Lond. 1854-1856. — A. H. A.

BARODIS [Var. Alex. *Barathan*; a name inserted in the list of those servants of Solomon who returned with Zebedalad 1 Esdr. vii. 47. There is no corresponding name in the list of Ezra or Nehemiah.]

BARRIEL. The Hebrew word *יִבְרֵאֵל* of Scripture is rendered in 1 K. viii. 12, 14, 16, viii. 19, xxiv. 10, everywhere else translated *BYRIEL*, which see. In the passages referred to, *BYRIEL* appears. In Rom., i. 61, Wette would be a better rendering than "barriel"; overbear, and Darby have "breech".

BARSABAS—*Joseph Barsabas; Judas Baresbas.*

BARTACUS. Baractus: Baretus, the father of Apame, the companion of King Parth of Esdr. iv. 24. "The admirable" *αἰσχρότατος* was probably an exalted title belonging to his rank.

The syriac version has *בראתוס*, a name which recalls that of Artheas in Arrian, who is named by Herod. vi. 22, 117, as being in a high position in the Persian army under Xerxes, and a special favorite of that king. Simonis, *Dumont's Dict. of Eng.", p. 106.

BARTHOLOMEW. Bartolomow, i. e. *Bartholomeus*.

BARTIMEUS [A. V. Bartimaeus]. Bartimæus, i. e. *άρτιμης, son of Timæus*, a blind beggar of Jericho who *Mark x. 48* says, was "by the wayside begging as our Lord passed out of Jericho on his last journey to Jerusalem. Notwithstanding that many charged him to hold his peace, he continued crying, 'Jesus, son of David, have mercy on me." Being called, and his blindness miraculously cured, on the ground of his faith, by Jesus, he became thenceforward a disciple. Nothing more is known of him.

*The account of this miracle as related by all the Synoptists is comparatively full in Matt. xx. 26-34; Mark x. 46-52; Luke viii. 39-43.* In point of vividness of description and moral suggestiveness it is hardly surpassed by any similar narrative in the Gospel. For the circumstances under which the miracle was performed and its import as a symbol of the spiritual relations which men sustain to Christ as the great Healer, the remarks of Trench *Manual of the Greek Testament*, 1843-1847, iii. 240, should be read. Westcott calls it among "the miracles of personal faith" so signals exemplified here, both in its degree and its reward (Introduct. to the Study of the Gospels, p. 457, Amer. ed.). See also his *Characteristics of the Gospel Morals*, pp. 48-59. In Cleer's rule explains the apparent discrepancy that Matthew speaks of two blind men as healed at this time, but Mark and Luke only one: but the plural name, *phari*: *qui panther meminet, phara non negat*. It has been thought more difficult to explain how Luke should seem to say that Jesus was approaching Jericho when he performed the cure, while Matthew and Mark say that he performed it as he was leaving Jericho. One reply to this statement is that Jesus may have healed two blind men together before he entered the city, and the other on his departure from it; the former being the instance that Luke mentions, the latter that of Dessel's *Patrum Apaur. Opera*, Lips. 1853, and is critically edited, with the rest of the epistle, in Hilgenfeld's *Novum Test. extra canonem receptum*, ii. Lips. 1854. A.
which Mark mentions, while Matthew speaks of the two cases together. So Wieseler (Synopsis der vier Evang., p. 532) and Ehrard (Krist. der Gegenwart, p. 157 f., 2te Aufl.) need not (note in his Leben Jesu Christi, p. 614, 4te Aufl.) incline to the same view. It is possible also, as Bengel suggests (Gnomon N. T. i. 149), that Bartimaeus having failed in his first application when Jesus arrived at Jericho, renewed his request the next day in company with another blind man, as Jesus left the house of Zaccheus and the city on his way to Jerusalem. Two additional words in Luke xviii. 39. "And (on the morrow) he cried out, would he annul the two accounts perfectly? and, really, the confessedly fragmentary character of the narratives allows us, without violence, to suppose that omission. Trench favors this last explanation.

BARUCH, the BOOK OF

which Mark mentions, while Matthew speaks of the two cases together. So Wieseler (Synopsis der vier Evang., p. 532) and Ehrard (Krist. der Gegenwart, p. 157 f., 2te Aufl.) need not (note in his Leben Jesu Christi, p. 614, 4te Aufl.) incline to the same view. It is possible also, as Bengel suggests (Gnomon N. T. i. 149), that Bartimaeus having failed in his first application when Jesus arrived at Jericho, renewed his request the next day in company with another blind man, as Jesus left the house of Zaccheus and the city on his way to Jerusalem. Two additional words in Luke xviii. 39. "And (on the morrow) he cried out, would he annul the two accounts perfectly? and, really, the confessedly fragmentary character of the narratives allows us, without violence, to suppose that omission. Trench favors this last explanation.

1. The book at present exists in Greek, and in several translations which were made from the Greek. The two classes into which the Greek MSS. may be divided do not present any very remarkable variations (Fritzsche, Einl. § 7); but the Syro-Hexaplaric text of the Milan Ms., of which a copy is still extant at Leiden, is divided into chapters, and contains references to the version of Theodotion (Eichhorn, Einl. in die Apoc. Schriften, p. 388 n.), which must imply a distinct recension of the Greek, if not an independent rendering of an original Hebrew text. Of the two Old Latin versions which remain, that which is incorporated in the Vulgate is generally literal; the other (Curs. Rom., 1585; Sabatier) is more free. The vulgar Syriac and Arabic follow the Greek text closely (Fritzsche, L. e.).

2. The assumed author of the book is undoubtedly the companion of Jeremiah, though Jahn denied this; but the details are inconsistent with the assumption. If the reading in i. 1 be correct (voc.: De Wette comm. ap. introd., Einl. § 321 a. comp. 2 K. xxv. 8), it is impossible to fix "the fifth year" in such a way as to suit the contents of the book, which exhibits not only historical inaccuracy but also evident traces of a later date than the beginning of the Captivity (iii. 9 ff., 22 ff.; 1. 3 ff. Comp. 2 K. xxv. 27).

3. The book was held in little esteem among the Jews (Hier. Pentr. in Jerem. p. 834 . nec habetur apud Hebræos: Epiph. de verb. Ms. III. καιναὶ ἐπιστολαὶ (Βαρούχ) παῖ Ἑβραῖοι;) though it is stated in the Greek text of the Apostolic Constitutions that it was read, together with the Lamentations, "on the tenth of the month Gorpipuous; i.e. the day of Atonement (Cont. Ap. v. 20, 1.). But this reference is wanting in the Syrian version (Hunson, Adv. Ante-Vic. ii. 187), and the assertion is unsupported by any other authority. There is no trace of the use of the book in the New Testament, or in the Apostolic Fathers, or in Justin. But from the time of Irenæus it was frequently quoted both in the East and in the West, and generally as the work of Jeremiah. (LXX. Ac. Hier. xiv. 35, 1, signifiiffent Jeremiah, Bar. iv. 36; . . . Tertull. c. Goet. 8, Hieremias, Bar. (Epist.) vi. 3 ff.; Clem. ProÌ. i. 10, § 91, ἡς Ιερεμίου, Bar. iv. 4; id. Prot. ii. 3, § 39, χριστιανος, Bar. iii. 15-19; Orig. ap. Enseb. H. v. vi. 25: Ιερεμίας θερηδας καὶ τῆς ἐπιστολὴς (;) Cypri. Test. Libr. ii. 6, apud Hieremias, Bar. iii. 35, &c.). It was, however, "obeiized" throughout in the LXX. as deficient in the Hebrew (Cod. Chis. ap. Lact., &c., Rome, 1772, p. 331). On the other hand it is contained as a separate book in the Pseudo-Laos- diose Catalogue, and in the Catalogues of Cyril of Jerusalem, Athanasius, and Nicephorus; but it is not specially mentioned in the Conciliar catalogues of Carthage and Hippo, probably as being included under the title Jeremiah. (Comp. Athanas. Syn. S. Script. ap. Credner, Zur Geschichte des Com. 138. Hilar. Prot. in Psalms 18.) It is complete omission its being omitted in said main the Hebrew Canon (e.g. Melito, Gregory Nazianzen, Epiphanius). Augustine quotes the words of Baruch (iii. 16) as attributed "more commonly to Jeremiah" (quodam . . . acribe ejus attributione.
250 BARUCH, THE BOOK OF

runt . . . sed Jeremiah celebration knowledge, de Gv. xviii. 33), and elsewhere uses them as such (Ezra. xii. 43). At the Council of Trent Baruch was admitted into the Roman Canon: but the Protestant churches have unanimously placed it among the Apocryphal books, though Whiston maintained its authenticity (c. i. infra).

4. Considerable discussion has been raised as to the original language of the book. Those who advocated its authenticity generally supposed that it was first written in Hebrew (Huet, Deverec, &c.; but Jahn is undecided: Berthold, Endl. 1755), and this opinion found many supporters (Frendt, Grundeg. Movers, Hitzig, De Wette, Endl. § 3234). Others again have maintained that the Greek is the original text (Eichborn, Endl. 388 ff.; Berthold, Endl. 1757; Havermick, ap. de Wette, l.c.). The truth appears to lie between these two extremes. The two divisions of the book are distinguished by marked peculiarities of style and language. The Hebrew character of the first part (i.-iii. 8) is such as to mark it as a translation and not as the work of a Hebrewizing Greek: c. y. 14, 15, 22, ii. 4, 9, 25, iii. 8; and several obscurities seem to be mistranslations: c. y. i. 2, ii. 18, 29.

The second part, on the other hand, which is written with greater freedom and vigour, closely resembles the Alexandrine type. And the imitations of Jeremiah and Daniel which occur throughout the first part (cf. i. 15-18 = Dan. ix. 7-10; ii. 1, 2 = Dan. iv. 12, 13; ii. 7-19 = Dan. ix. 13-18) give place to the tone and imagery of the Psalms and Isaiah.

5. The most probable explanation of this contrast is gained by supposing that some one thoroughly conversant with the Alexandrine translation of Jeremiah, perhaps the translator himself (Hitzig, Fritzsche), emended the Hebrew fragment which forms the basis of the book already attached to the writings of that prophet, and wrought it up into its present form. The peculiarities of language common to the LXX. translation of Jeremiah and the first part of Baruch seem too great to be accounted for in any other way (for instance the use of ἐναπωθα, ἀποστολή, βομπέσις [βομπές], ἀποστολής, μάνσα, ἀπωθεσθήνατε [ἀπωθεσθηνατε], ἐργασίας του, ἐναργατίας του, ἐνεργατίας του, ἐνέργατης του) and the great discrepancy which exists between the Hebrew and Greek texts as to the arrangement of the later chapters of Jeremiah, increases the probability of such an addition having been made to the canonical prophecies. These verbal coincidences cease to exist in the second part, or become very rare; but this also is distinguished by characteristic words: c. y. 8 ἀλακετόν, ἀνεκπον, ἀπάλασα. At the same time the general unity even in language, c. v. 9-11, and coherence of the book in its present form point to the work of one man. (Fritzsche, Eidl. § 5; Hitzig, Psalms. ii. 119; Ewald, Gesch. d. Volks Isr. iv. 232 n.) Berthold appears to be quite in error (Eidl. 1743, 1762) in assigning ii. 1-8 to a separate writer (De Wette, Eidl. § 322).

6. There are no certain data by which to fix the time of the composition of Baruch. Ewald (c. ii. 230 f.) assigns it to the close of the Persian period; and this may be true as far as the Hebrew portion is concerned; but the present book must be placed considerably later, probably about the time of the war of liberation (c. ii. 160), or somewhat earlier.

7. The Epistle of Jeremiah, which, according to the authority of some Greek MSS., stands in the English version as the 6th chapter of Baruch, is the work of a later period. It consists of a rhetorical declaration against idols (comp. Jer. xx., xxix.), in the form of a letter addressed by Jeremiah "to them which were to be led captive to Babylon." The letter is divided into clauses by the repetition of a common burden: they are not gods; flee not them (vv. 36, 37, 39, 66); how can a man think or say that they are gods? (vv. 40, 44, 56, 64). The condition of the text is closely analogous to that of Baruch; and the letter found the same partial reception in the Church. The author shows an intimate acquaintance with idolatrous worship, and this circumstance, combined with the purity of the Hellenistic dialect, points to Egypt as the country in which the epistle was written. There in no positive evidence to fix its date, for the supposed reference in 2 Mac. ii. 2 is more than uncertain; but it may be assigned with probability to the first century B. C.

8. A Syriac first Epistle of Baruch "to the nine and a half tribes" (comp. 2 Esdr. xiii. 40, Vers. Arab.) is found in the London and Paris Polyglott. This is made up of commonplaces of warning, encouragement, and exhortation. Fritzsche (Eidl. § 6) [with whom Davidson agrees (ibid. to the 16. T. iii. 442)] considers it to be the production of a Syrian monk. It is not found in any other language. Whiston (A Collection of Authentic Records, &c. London, 1727, i. 1 ff., 25 ff.) endeavored to maintain the canonicity of this epistle as well as that of the Book of Baruch.

B. F. W.

The "First Epistle of Baruch" has also been published in Largans's Libri Lit. Testamenti, 1681, and a Latin translation (taken from the London Polyglott) may be found in Fabricius's Col. apol. p. 1, 170, ii. 145 f. Ginsberg, in the 3d cd. of Kittte's Cyclop. of Bibl. Lit., gives a full analysis of the epistle, and expresses his surprise that this "interesting relic" of antiquity has been so unjustly neglected. He supposes it to have been written by a Jew about the middle of the second century B. C.

A.

BARZELAI [3 syll.], 1 Esdr. v. 38, marg [but BEREZELAI in the text. See APPEAL.]

BARZILAI (Pam) [2 syll. ], iron: Be- zsi (Vat. Alex. -A: in Ezr. Bzefalalii; etc.; in Neh. Alex. Bzefalalii: Bzefalai), 1. A wealthy Gilgilete who showed hospitality to David when he fled from Absalom (2 Sam. xvii. 27). On the score of his age, and probably from a feeling of independence, he declined the king's offer of judging his case at court (2 Sam. xix. 32-30). David before his death recommended his sons to the kindness of Solomon (1 K. ii. 7). [The descendants of his daughter, who married into a priestly family, were unable, after the Captivity, to prove their genealogy (Ezr. ii. 61; Neh. vii. 63. 1 Esdr. v. 38.)]

2. A Meholithite, whose son Adriel married Michal, Saul's daughter (2 Sam. xvi. 8).

R. W. B.

BASALOTH (Barash), [Barash, [AHaz: [Barash, Phurath] [Bazath], 1 Esdr. v. 31. [BAZILITH.]

BASCAHA (by Baschea; Jos. Basada; Basesama), a place in Gilgal (cf. 'Yer Psalms (Baruch)), where Jonathan Maccabaeus was killed by Tryphon, and
BASHAN
from which his bones were afterwards disinterred and conveyed to Medin by his brother Simon (1 Macr. xiii. 23; Joseph. Ant. xiii. 6, § 6). No trace of the name has yet been discovered. G.

BASHAN (almost invariably with the definite article, ạš-an) Bashi, a district on the east of Jordan. It is not, like Argob and other districts of Palestine, distinguished by some constant designation, but is sometimes spoken of as the "land of Bashan" (Josh. Ch. 4, 1; Deut. ii. 35-37; Josh. vi. 32, 33), and sometimes as "all Bashan" (Josh. ii. 3; Josh. xii. 32, 33), but most commonly without any addition. It was taken by the children of Israel after their conquest of the land of Sihon from Arnon to Jabok. They "turned from their road over Jordan and 'went up by the way of Bashan' — probably by very much the same route as that now followed by the pilgrims of the Hajj and by the Romans before them — to Edrei on the western edge of the Lejih. [EDREL] Here they encountered Og king of Bashan, who "came out" probably from the natural fastnesses of Argob, only to meet the entire destruction of himself, his sons, and all his people (Num. xxxi. 33-35; Deut. iii. 1-3). Argob, with its 69 strongly fortified cities, evidently formed a principal portion of Bashan (Deut. iv. 4, 5), though still only a portion (13), there being besides a large number of unwalled towns (5). Its chief cities were Ashtaroth (i.e. Baasha), comp. Josh. xii. 27 with 1 Chr. vi. 71). Edrei, Golan, Salsah, and possibly Mahanaim (Josh. xiii. 30). Two of these cities, namely, Golan and Baasha, were allotted to the Levites of the family of Gershom, the former as a "city of refuge" (Josh. xii. 27; 1 Chr. vi. 71). The limits of Bashan are very strictly defined. It extended from the "border of Gilgal" on the south to Mount Hermon on the north (Deut. iii. 3, 10, 14; Josh. xii. 5; 1 Chr. vi. 23), and from the Aralah or Jordan valley on the west to Salsah (Sukhbal) and the border of the Geshuriites, and the Maacathites on the east (Josh. xii. 3-4; Deut. iii. 10). This important district was bestowed on the half-tribe of Manasseh (Josh. xiii. 29-31), together with the land of Bashan to which Baasha and his descendants had assisted his brethren in the conquest of the country west of the Jordan, they went to their tents and to their cattle in the possession which Moses had given them in Bashan (xxii. 7, 8). It is just named in the list of Solomon's commissariat districts (1 K. iv. 13). And here, with the exception of one more passing glimpse, closes the history of Bashan as far as the Bible is concerned. It vanished from the stage of life and was used for building, being devoted by Hazael in the reign of Jehu (2 K. x. 33). True the "oksas" of its forests and the wild cattle of its pastures — the "strong bulls of Bashan" — long retained their proverbial fame (Ez. xxvii. 5; Ps. xxii. 12), and the beauty of its high downs and wide sweeping plains could not but strike now and then the heart of a poet (Am. iv. 1; Ps. xviii. 15; Jer. l. 19; Mic. viii. 14), but history it has none; its very name seems to have given place as quickly as possible to one which had a connection with the story of the founder of the nation (Gen. xxxi. 47-48), and therefore more claim to use. Even so early as the time of the conquest, "Gilgal" seems to have begun to take the first place as the designation of the country beyond the Jordan, a place which it retained afterwards to the exclusion of Bashan (comp. Josh. xxii. 9, 15, 32; Judg. xx. 1; Ps. Is. 7, xivii. 8; 1 Chr. xxvii. 21 2 K. xv. 24). Indeed "Bashan" is most frequently used as a mere accompaniment to the name of Og, when his overthrow is alluded to in the national poetry.

After the Captivity, Bashan is mentioned as divided into four provinces — Gaulanitis, Auranitis, Trachonitis, and Batanitis. Of these four, all but the third have retained almost perfectly their ancient names, the modern Lejih alone having superseded the Argob and Trachonitis of the Old and New Testaments. The province of Jordan is the most western of the four; it abuts on the sea of Galilee and the lake of Merom, from the former of which it rises to a plateau nearly 3000 feet above the surface of the water. This plateau, though now almost wholly uncultivated, is of a rich soil, and its N. W. portion rises into a range of hills almost everywhere clothed with oak forests (Porter, ii. 239). No less than 127 ruined villages are scattered over its surface. [GOLAN.]

The Hasmon is to the S. E. of the last named province and S. of the Lejih; like Jordan, its sur face is perfectly flat, and its soil esteemed amongst the most fertile in Syria. It too contains an immense number of ruined towns, and also many inhabited villages. [HA'BANAH.]

The contrast which the rocky intricacies of the Lejih present to the rich and flat plains of the Hasmon and the Jordan has already been noticed. [ARGOB.]

The remaining district, though no doubt much smaller in extent than the ancient Bashan, still retains its name, modified by a change frequent in the Oriental languages. Aril-al-Dawtagnel lies on the east of the Lejih and the north of the range of Jebel Hasmon or ed Druze (Porter, ii. 57). It is a mountainous district of the most picturesque character, abounding with forests of evergreen oak, and with soil extremely rich; the surface studded with towns of very remote antiquity, deserted it is true, but yet standing almost as perfect as the day they were built.

For the boundaries and characteristics of these provinces, and the most complete researches yet published, I refer the reader to the interesting portion of Palestine, see Porter's Description, vol. ii (and his Giant Cities of Bashan, 1869). G.

* We have a valuable work for information concerning some parts of Bashan in the Reisbericht üb. Haerum u. die Trachten with Dr. John Wetz stein, Prussian Consul at Damascus (Berlin, 1860). He explored especially that region of almost fabulous wonders, El-Lejih, the supposed Amon, and ascended this interesting portion of Palestine, see Porter's Description, vol. ii. (and his Giant Cities of Bashan, 1869).
those on the other side. He thinks the country
would never have been subdued by the Hebrews.
He states as proof of the impossibility and
strength of this almost impregnable position that
Ibrahim Pasha, whose armies made Constantin-
ople itself tremble, in 1838 stormed the place de-
defended by only 5,000 men for 6 months, survived
20,000 regular troops, and was obliged at last to
withdraw, wholly baffled in his attempt. But the
Bible represents the conquests of Moses on the
cost of the Jordan, as confidedly extraordinary
(Dent. xxxvi. 4; Josh. ii. 10, iv. 10, Ac.). If it be
necessary to insist on that consideration, we must
say that the success of the Hebrew arms could not
be doubtful in a warfare in which they stood un-
der a leadership guided and upheld by divine
cooporation. He argues also that the territory con-
quered by the Hebrews on the east of the Jordan
could not have included the present El-Idjoh,
and hence that Argob must be sought elsewhere.
But the boundaries of the Hebrew territory be-
yond the Jordan are vaguely desribed; they were
not the same at all periods, and it is going be-
yond our knowledge to affirm that they could not
at the time of the first Hebrew invasion have
embraced the region of Argob. For the positive
grounds on which the identification of El-Idjoh
with Argob rests, see under Aaron and Caleb.

The Russian Consul mentions a striking fact in
illustration of the fertility of the country assigned
to Kenuben, Gad, and the half-tribe of Manasseh,
and of its adaptation to the wants of a nomadic
and pastoral people such as many of these Hebrews
were (Num. xxxii. 1-5, 33). He says (Reise-
bericht, p. 82) that the provinces where are Kunuben and
tobia are the best watered and richest for
pasturage not only of Perca but of all Syria;
so that the wandering tribes of nomads alone feel
there more than 300,000 camels six months in the
year while, as ascertained from the bureau of
tax-registration at Damansor, 42 other Bedouin
tribes range there (nomadism) during the entire
year. Hence the agricultural population have for
centuries been driven away and the cities once
found in that quarter lie now in ruins. 1

BASSAN-HAVOTH-JRAIR, a name given to Argob after its conquest by Jair (Dent. iii. 14). [HAVOTH-JAIR.]

BASHEMATH, or BASHEMATH (Bassamath), a fragrant; Basemath [etc.: Bassamath]. 1. Daugh-
ter of Ishmael, the last married of the three wives of
Eaan (Gen. xxxvi. 3, 4, 15), from whose son,
Reuel, four tribes of the Edomites were descended.
When first mentioned she is called Mahalath (Gen.
xxxiv. 9), but whilst, on other occasions, the same
Basemath is in the narrative (Gen. xxxvi. 34) given
to another of Eaan's wives, the daughter of Eon
the Hittite. It is remarkable that all Eaan's wives
receive different names in the genealogical table of
the Edomites (Gen. xxxvi.) from those by which
they have been previously mentioned in the history.
The diversity will be best seen by placing the names
side by side:—

<table>
<thead>
<tr>
<th>Genealogy (Gen. xxxvi. 2, 3).</th>
<th>Narrative (Gen. xxxvi. 34; xxxvii. 9).</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Abih, d. of Eon.</td>
<td>2. Bashemath, d. of Eon.</td>
</tr>
<tr>
<td>3. Bashemath, d. of Ishmael.</td>
<td>4. Mahalath, d. of Ishmael.</td>
</tr>
</tbody>
</table>

Whatever be the explanation of this diversity of
names, there is every reason for supposing that they
refer to the same persons respectively; and we may
well conclude with Hengstenberg that the choice
of all the names cannot have arisen from accident:
and further, that the names in the genealogical
table, which is essentially an Edomitic document,
are those which these women respectively bore as
the wives of Eaan (Hengstenberg, Atl. d. Pent. ii.
257, Eng. transl. ii. 226). This view is confirmed
by the fact that the Seirite wife, who is called Judith
in the narrative, appears in the genealogical account
under the name of Abibaimah, a name which appears
to have belonged to a district of Edomites
(Ten. xxxvi. 41). The only ground for hesitation
or suspicion of error in the text is the occurrence
of this name Bashemath both in the narrative and
the genealogy, though applied to different persons.
The Samaritan text seeks to remove this difficulty
by reading Mahalath instead of Bashemath in the
genealogy. We might with more probability sup-
pose that this name (Bashemath) has been assigned
in error to the wrong person in one or other of these
passages, but if so it is impossible to determine which
is erroneous.

2. [Aqemudah: Alex. Masemudah.] A daughter
of Solomon and wife of one of his officers, called
in A. V. Basmath (1 K. iv. 15). F. W. C.*

3. According to the Masoretic pointing, the name
in English in all the passages should be Basemath;
for the sibilant is ו and not מ. The Bishops'
Bible has Basemath, except in 1 K. iv. 15, where it
is Basmath, as in A. V.

II.

BASIN. (1) "ןוע: φασάν: φανάτ: from
לוע: to scatter (Ges. p. 434); often in A. V. beav.
(2) נוע: καρβιφ: craver. (3) ד"וע: craver;
in A. V. sometimes cup, from ד"וע, corer, a cup
with a lid. (4) גא, wrongly in LXX. (Ex. xii.
22) י"א, and in Vulg. liuna (Ges. p. 965).
1. Between the various vessels bearing in the
A. V. the names of basin, bowl, charger, cup and
fish, it is scarcely possible now to ascertain the
precise distinction, as very few, if any remains
are known up to the present time to exist of Jewish
earthen or metal ware, and as the same names are
variously employed in different places. We can
only conjecture as to their form and material from
the analogy of ancient Egyptian or Assyrian speci-
mens of works of the same kind, and from modern
Oriental vessels for culinary or domestic purposes.
Among the smaller vessels for the Tabernacle or Tem-
ple-service, many must have been required to re-
ceive from the sacrificial victims the blood to be
sprinkled for purification. Moses, on the occasion of the
great ceremony of purification in the wilderness,
poured the blood in "the basins": נושה, or
bowls, and afterwards sprinkled it on the people
(Ex. xxiv. 6, 8, xxv. 21; Lev. i. 5, 15, iii. 2, 8,
13, iv. 5, 34, viii. 29, 24, xiv. 14, 25, xvi. 15, 19;
Heb. i. 19). Among the vessels cast in metal,
whether gold, silver, or brass, by Hiram for Solomon,
besides the laver and great sea, mention is made
of basins, bowls, and cups. Of the first (נושה, marg. bowls) he is said to have made 100 (2 Chr.
iv. 8; 1 K. vii. 45, 46, 1 Chr. xxv. 29) and 1 (Chr.
xxviii. 14, 17). Josephus, probably with great
exaggeration, reckon of φασάν and καρβιφ, 20,000 in gold and 40,000 in silver, besides an
equal number in each metal of κραβιφ, for the
BASKET. The Hebrew terms used in the description of this article are as follows: (1) נָטַף, so called from the тегія of which it was originally made, specially used as the Greek κατάφοι (Hom. Òd. iii. 442); and the Latin coenarium (Virg. Òm. i. 791) for holding bread (Gen. xli. 16 f; Ex. xxix. 3, 25; Lev. viii. 2, 36, 31; Num. vi. 15, 17, 19). The form of the Egyptian bread-basket is delineated in Wilkinson’s ÒAnt. Egypt.Ó iii. 229, after the specimens represented in the tomb of Ramesses III.

Egyptian Baskets. (From Wilkinson.)

These were made of gold (comp. Hom. ÒOd. x. 355), and we must assume that the term σωλ passed from its strict etymological meaning to any vessel applied to the purpose. In ÒJudg.Ó vi. 19, meat is served up in a σωλ, which could hardly have been of wicker-work. The expression ράβι ἠπ (Gen. xli. 16) is sometimes referred to the material of which the baskets were made (κατά βαϊα, Symm.), or the white color of the peeled sticks, or lastly to their being ‘full of holes’ (A. V. margin); 2. ο ● κατα, a work basket.

(2) ύμερα κατά, a word of kindred origin, applied to the basket used in gathering grapes (Jer. vi. 9). (3) γάρ, in which the first

Egyptian Baskets. (From Wilkinson.)

fruits of the harvest were presented (Deut. xxvi. 4). From its being coupled with the kneading-bowl (A. V. ’store’; Deut. xxviii. 5, 17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. The equivalent term in the LXX. for this and the preceding Hebrew words is καρπαλαος, which specifically means a basket that tapers downwards (καρπαλος ὁ δύο τὰ κάτω, Stmd.), similar to the Roman cothia. This shape of basket appears to have been familiar to the Egyptians (Wilkinson, ii. 401). (4) γάρτζα, so called from its similarity to a bird-cage or trap (καρπαλαος is used in the latter sense in Ecles. xi. 30), probably in regard to its having a lid: it was used for carrying fruit (Am. viii. 2); the LXX. gives γάρτζαν: Symm. so our κελάδος; the Vulg. macerius. (5) γάρτζω, used like the Greek καρπαλαος (LXX.) for carrying fruit (Jer. xxv. 1, 2), as well as on a larger scale for carrying clay to the brick-yard (Ps. lixi. 6, καρπαλος, LXX. ἐμέν, A. V.); or for holding bulky articles (2 K. ix. 7; καρπαλαος, LXX.): the shape of this basket and the mode of carrying it usual among the brick-makers in Egypt is delineated in Wilkinson, ii. 99, and aptly illustrates Ps. lixxvi. 6.

The name Saltai (Neh. xi. 8, xii. 20) seems to indicate that the manufacture of baskets was a recognized trade among the Hebrews.

In the N. T. baskets are described under the three following terms, καρπαλος, σπώρα, and σραγάναι. The last occurs only in 2 Cor. xi. 33, in describing St. Paul’s escape from Damascus: the word properly refers to anything twisted like a rope (.S Exc. Suppl. 791) or any article woven of rope (πλέγμα τι ἐκ σχοινίου, Stild.): fish-baskets specially were so made (ἀπὸ σχοινίου πλεγμάτων ἐς ὕπωδοκτίν ἱγνος, Πτυμ. Mag.). With regard to the two former words, it may be remarked that καρπαλος is exclusively used in the description of the miracle of feeding the five thousand (Matt. xxiv. 19, xvi. 9; Mark vi. 43; Luke ix. 17; John vi. 13), and σπώρα in that of the four thousand (Matt. xv. 37; Mark viii. 8): the distinction is most definitely brought out in Mark viii. 19, 20. The σραγάναι is also mentioned as the means of St. Paul’s escape (Acts ix. 25). The difference between these two kinds of baskets is not very apparent. Their construction appears to have been the same: for καρπαλαος is explained by Snidas as ἄγγελον πλεκτόν, while σραγάναι is generally connected with σπώρα. The σραγάναι (σρώτα, Vulg.) seems to have been most appropriately used of the provision basket, the Roman spotaR. Hesychius explains it as το προφυς ἄγγος; compare also the expression διτῖπνοι ἀπὸ σπώρων (Athen. vii. 17). The καρπαλαος seems to have been generally larger. According to Plut. Mag. it is ὑπαν καὶ κάλλον χώρας: as used by the Romans (Colum. xi. 3, p. 469) it contained nanure enough to make a portable hot-bed [Dict. of Ant., COPHINEUS]: in Rome it was constantly carried about by the Jews (quvovs ἄγγειαν παραφυς νεπελεξ, Juv. iii. 14, vi. 542). Creswell (Diss. vii. pt. 4) surmises that the use of the cophines was to keep in, but there is little to support this. 

W. L. B.

BAS'MATH (בָּשָּׁמָה) [fragrant]: η βασίμαθ [Alex. Μαρσμαθ]: Bowsworth, a daughter of Solomon, married to Ahimaz, one of his commandar officers (1 K. iv. 15). [BAESHMATH.]

BASSA (בֶּסָא) [Alex. Μαρσα: Vulg. not recognizable], 1 Esdr. v. 16. [BEZAI.]

BAT וְתַבָּט, תַבָּטַב: νυκτερίς: vespertilio. There is no doubt whatever that the A V
is correct in its rendering of this word: the derivation of the Hebrew name, \( a \) the authority of the old versions, which are all agreed upon the point, and the context of the passages where the Hebrew word occurs, are conclusive as to the meaning. It is true that in the A. V. of Lev. xi. 19, and Deut. xiv. 18, the \( 'utillyph \) closes the lists of \( fowl \) that shall not be eaten;" but it must be remembered that the ancients considered the bat to partake of the nature of a bird, and the Hebrew \( eph, \) "fowl," which literally means "a wing," might be applied to any winged creature: indeed this seems clear from Lev. xi. 20, where, immediately after the \( 'utillyph \) is mentioned, the following words, which were doubtless suggested by this name, occur: "All fowls that creep, going upon all four, shall be an abomination unto you." Besides the passages cited above, mention of the bat occurs in Is. ii. 20: "In that day a man shall cast his idols of silver and his idols of gold . . . to the medes and to the bats," and in Baruch vi. 22 (or Epist. of Jer. 22), in the passage that so graphically sets forth the vanity of the Babylonish idols: "Their faces are blacked through the smoke that cometh out of the temple: upon their bodies and heads sit bats, swallows, and birds, and the cats also."  

are found in Egypt, some of which occur doubtless in Palestine. \( Mobius Ruppelli, Vesperculium pristrellum var. Egyptius, V. maritius var. Egypt. \) \( Typhonus perforatus, Vespertilia Thebaes, Rhinopus micropus, Rhinobatias, Aegyptus } \) occur in the tombs and pyramids of Egypt.

Many travellers have noticed the immense numbers of bats that are found in caverns in the East, and Layard says that on the occasion of a visit to a cavern these noisome beasts compelled him to retreat (\( Nimrode and Babylon, p. 307 \)). To this day these animals find a congenial lurking abode and set the remains of idols and the sculptured representations of idolatrous practices (\( Script. Nat. II. p. 83 \)) thus forcibly attesting the meaning of the prophet Isaiah's words. Bats belong to the order \( Chiroptera, \) class \( Mammalia. \) W. H.  

BASTARD. Among those who were excluded from entering the congregation, that is, from intermarrying with pure Hebrews (\( Schellen, Table Talk, s. v. "Bastard"), even to the tenth generation, was the \( mamzer \) (\( "\text{bastard}, \) \( A. V. "\text{bastard}, \) ), who was classed in this respect with the Ammonite and Moabite (Deut. xxiii. 2). The term is not, however, applied to any illegitimate offspring, born out of wedlock, but is restricted by the Rabbins to the issue of any connection within the degrees prohibited by the Law. A \( mamzer, \) according to the Mishna (\( Yebonoth, x. 13 \)), is one, says R. Akiba, who is born of relations between whom marriage is forbidden. Simon the Tamnai says, it is every one whose parents are liable to the punishment of "cutting off" by the hands of Heaven; R. Joshua, every one whose parents are liable to death by the house of judgment, as, for instance, the offspring of adultery. The ancient versions (\( LXX., Vulg., \) \( Syr., \) ) add another class, the children of a harlot, and in this sense the term \( mamzer \) or \( mamzerim \) survived in Feudal Law (\( Schellen, De Sacre, in Dom. Defunct., c. iii. \)). "Mamzerim securum, sed meczna nothi-scler et ortum."  

The child of a \( yd, \) or non-Israelite, and a \( mamzer \) was also reckoned by the Talmudists a \( mamzer, \) as was the issue of a slave and a \( mamzer, \) and of a \( mamzer \) and female proselyte. The term also occurs in Zech. ix. 6, "a bastard shall dwell in Ashdod," where it seems to denote a foreign race of mixed and foreign birth. Dr. Geiger infers from this passage that \( mamzer \) specially signifies the issue of such marriages between the Jews and the women of Ashdod as are alluded to in Neh. xiii. 23, 24, and applies it exclusively to the Philistine bastard. W. A. W.  

BATH, BATHING. This was a prescribed part of the Jewish ritual of purification in cases of accidental, leprosy, or ordinary uncleanness (\( Lev. xv. pass., xvi. 28, xxii. 6; Num. xix. 7, 19; 2 Sam. xi. 2, 4; 2 K. v. 10 \)) as also after mourning which always implied defilement, \( c. g. \) Ruth iii. 3; \( 2 \) Sam. xii. 20. The high-priest at his inauguration (\( Lev. xiii. 6 \)) and on the day of atonement, once before each solemn act of propitiation (\( xvi. 4, 24 \)) was also to bathe. This the rabbis have multiplied into ten times on that day. Maimon. (\( Comenlii, de Vbis Sacrat. v. 3 \) ) gives rules for the strict privacy of the Bat, perhaps, from \( battalion, battalion \) (as Wedgwood, \( Diet. Eng. Etym. \)).  

\( b \) with the exception of the Syræ, which has \( \{ \text{pesca} \}, \) \"a peacock.\"
high-priest in bathing. There were bath-rooms in the later Temple over the chambers "Abines and "Boupnevth, for the priests used (Lightfoot, Decret. of Temp., p. 24). A bathing-chamber was probably included in his bed-chamber, even of no great rank in cities from early times (2 Sam. xi. 2); much more in those of the wealthy in later times; often in gardens (Susan. 15). With this, anointing was customarily joined; the climate making both these essential alike to health and pleasure, to which luxury added the use of perfumes (Sussan. 17; Jud. x. 3; Esth. ii. 12). The "pools," such as that of Siloam, and Hezekiah's, are said (Is. xxv. 10; 2 K. xx. 29; Is. xxiii. 11; John ix. 7), often sheltered by partly built (John v. 2), are the first indications we have of public bathing accommodation. Ever since the time of Jason (Prideaux, ii. 168) the Greek usages of the bath probably prevailed, and an allusion in Josephus (\(\text{λούσιμον \ όπτραπταιτων} \)), B. J. i. 17, § 7) seems to imply the use of the bath (hence, no doubt, a public one, as in Rome) by legonary soldiers. We read also of a castle luxuriously provided with a volume of water in its court, and of a Herodian palace with spacious pools adjoining, in which the guests continued swimming, &c. in very hot weather from noon till dark (Joseph. Ant. xii. 4 § 11, xv. 3, § 3). The hot baths of Tiberias, or more strictly of Emmaus (Euseb. H. E. vii. 10, query \(\text{Αλίαδ} \) Boniforous) near it, and of Callirhoe, near the Eastern shore of the Dead Sea, were much resorted to. (Rendel, i. 67, Joseph. Ant. xxviii. 2, xvii. 6, § 5, R. J. i. 33, § 5; Annum. Marcell. xiv. 8; Staley, 373, 236.) The parallel customs of ancient Egypt, Greece, and Rome, are too well known to need special allusion. (See Dict. of Gr. and Rom. Ant., art. \(\text{Βαρνηκ} \).

II. H. H.

* The N. T. passages should be noticed. In John xiii. 10 (where \(\text{λούσιμον} \) is opposed to \(\text{βαπτισμός} \) there is an unquestioned reference to the practice of bathing, especially before partaking of the Passover meal. For \(\text{λούσιμον} \) in Eph. v. 26 and Tit. iii. 5, variously rendered as "bath" or "bathing," see Baptism IV. 3, 4; and Meyer and Ellsott on those passages. Whether \(\text{βαπτιστην \ ρανθινω} \) in Mark vii. 4 refers to bathing the body after coming from market (De Wette, Meyer), or washing by immersion what has been purchased and brought from market (Lange, Bleek), is a point about which interpreters differ. As to the means for bathing which the Jews anciently possessed in the tanks and reservoirs within and around Jerusalem, and which to some extent the inhabitants of that city possess at present, see Waters, under Jerusalem. The traveller in the East finds the synagogues of the modern Jews, e. g. those at Safid in Galilee, furnished with large bathing rooms for the performance of the washings which they practice in connection with their worship. The synagogues at Jerusalem have a similar arrangement.

H. BATH. [Measures]

BATH-RAB'BIM, THE GATE OF (\(\text{βαπτιστήριον} \)), one of the gates of the ancient city of Heshbon, by (\(\text{γωνίω} \)) which were two "pools," a whereof Solomon likens the eyes of his beloved (Cant. vii. 4 [5]). The "Gate of Bath-rab'rim" at Heshbon would, according to the Oriental custom, be the gate pointing to a town of that name. The only place in this neighborhood at all resembling Bath-rab'rim is in sound a Rabbin (Amman), but the one tank of which we gain an intelligence as remaining at Heshbon, is on the opposite (S.) side of the town to Amman (Porter, Handbook, p. 298). Future investigations may settle this point. The LXX. and Vulg. translate: \(\text{ἐν πολλάς θυσιά} \) \(\text{πολλά} \) in porti \(\text{πήλα} \) multitudinis. G.

BATH-SHEBA [rather Bath-sh'eha] (\(\text{βαπτιστήριον} \) 2 Sam. xi. 3, &c.; also called Bath-shun, \(\text{βαπτιστήριον} \), in 1 Chr. iii. 5: \(\text{βαπτιστήριον} \) [Alex. Bathsh'ab; in 2 Sam. and 1 K. i. 11]: Joseph. Bathsh'a-bi, B. J. i. e. daughter of an oath, or, daughter of seven, sc. years), the daughter of Eliam (2 Sam. xi. 3), or Ammiel (1 Chr. iii. 5), the son of Ahithophel (2 Sam. xxiii. 34), the wife of Uriah the Hittite. It is probable that the enmity of Ahithophel towards David was increased, if not caused, by the dishonor brought by him upon his family in the person of Bathshua. The child which was the fruit of her adulterous intercourse with David died: but after marriage she became the mother of four sons, Solomon (Matt. i. 6), Shimea, Shobab, and Nathan. When, in David's old age, Adonijah, an elder son by Haggith, attempted to set aside in his own favor the succession promised to Solomon, Bathshua was employed by Nathan to inform the king of the conspiracy (1 K. i. 11, 15, 23). After the accession of Solomon, she, as queen-mother, requested permission of her son for Adonijah to take in marriage Abishag the Shunammite. This permission was refused, and became the occasion of the execution of Adonijah (1 K. ii. 24, 25). (David.) Bathshua was said by Jewish tradition to have composed and recited Prov. xxxi. by way of admonition or reproof to her son Solomon, on his marriage with Pharaoh's daughter. Calmet, Dict. s. v. Corn. a Lapid. on Prov. xxxi.

H. W. P.

BATH-SHUA (\(\text{βαπτιστήριον} \) [daughter of an oath]: Vat. and Alex. Bathsh'ab, Bathsheba), a variation of the name of Bathsheba, mother of Solomon, occurring only in 1 Chr. iii. 5. It is perhaps worth notice that Shua was a Canaanite name (comp. 1 Chr. iii. 3, and Gen. xxxviii. 2, 12—where "Bath-shu" is really the name of Judah's wife), while Bathsheba's original husband was a Hittite.

BATH-ZACHARIAS (\(\text{βαπτιστήριον} \) [house of Z]: Bathsh'arziha; Alex. and Joseph. Bath'shar'ziha; Bethzacharias), a place, named only 1 Macc. vi. 32, 33, to which Judas Maccæus marched from Jerusalem, and where he encamped for the relief of Bethsura (Bethzur) when the latter was besieged by Antiochus Epiator. The two places were seventy stadia apart (Joseph. Ant. xii. 9, § 4), and the approach to Bathzacharias were intricate and confused—\(\text{σταγεῖς οφείλεται πάντας} \) παραβολου (Joseph. B. J. i. 1, § 5, and comp. the passage cited above, from which it is evident that Josephus knew the spot). This description is met in every respect by the modern Beit Saburâkh, which has been discovered by Robinson at nine miles north of Beit sûr, * on an almost isolated promontory or

* Tristram (Land of Israel, p. 540) makes it bear southeast of Hebron. H.
BATTLE-AXE

tell, jutting out between two deep valleys, and connected with the high ground south by a low neck between the heads of the valleys, the neck forming the only place of access to what must have been an almost impregnable position" (Rob. iii. 283, 284). The place lies in the entangled country west of the Hebrew road, between four and five miles south of Bethlehem. [BETHZILNE.]

* BATTLE-AXE (Jer. i. 29). [AXE, 7; MUL.]

* BATTLEMENT. [HORSE.]

BAVAI [2 sy1. (תַּבְאָא̄ [of Persian origin, Gen.]: Bovai; [Lit. Bovai; Comp. Bovati; Bovai], son of Hemad, ruler (תַּבְאָא̄) of the "district" (תַּבְאָא̄) of Keilah in the time of Nehemiah (Neh. iii. 18).

BAY-TREE (תַּבְאָא̄) červich: שֵׁנִיָּה תּוֹעַ הַיָּגָר: cedrus Libani. It is difficult to see upon what grounds the translators of the A. V. have understood the Hebrew word of Ps. xxxvii. 45 to signify a "bay-tree"; such a rendering is entirely unsupported by any kind of evidence. Most of the Jewish doctors understand by the term červich "a tree which grows in its own soil"—one that has never been transplanted; which is the interpretation given in the margin of the A. V. Some versions, as the Vulg. and the Arabic, follow the LXX., which reads "cedar of Lebanon," mistaking the Hebrew word for one of somewhat similar form.* Celsius (Hieroc. i. 194) agrees with the author of the sixth Greek edition, which gives אֲדֹּֽעֵבְּעַן (יאדועב) in italics, "one born in the land" as the meaning of the Hebrew word: with this view Rabba Solomon and Hammond (Comment. on Ps. xxxvii. 45) concur. Dr. Boyle (Keillo's Cyc. Bk. Li. art. "Ezraich") suggests the Arabic ṣakēr, which he says is described in Arabic works on Materia Medica as a tree having leaves like the "glove" or "bay-tree." This opinion must be rejected as unsupported by any authority. Perhaps no tree whatever is intended by the word červich, which occurs in several passages of the Hebrew Bible, and signifies as a native, in contradistinction to a stranger, or a foreigner. Comp. Lev. xvi. 29: "Ye shall afflict your souls... whether it be one of your own country (תַּבְאָא̄ נַעַנְוֶה, hieczvich) or a stranger that sojourneth among you." The epithet "green," as Celsius has observed, is by no means the only meaning of the Hebrew word; for the same word occurs in Isai, iv. 4, where Nehemiah makes use of it: "I was flourishing in my palace." In all other passages where the word červich occurs, it evidently is spoken of a man (Cels. Hieroc. i. 196). In support of this view we may observe that the word translated "in great power," "more literally signifies" to be formidable," or "to cause terror," and that the word which the A. V. translates "spreading himself," as more properly means to make bare." The passage then might be thus paraphrased: "I have seen the wicked a terror to others, and behaving with barefaced audacity, just as some proud native of the land." In the Lepid. war the oppression of the stranger was strongly forbidden, perhaps therefore some reference to such acts of oppression is made in these words of the psalmist.

W. H.

BAZLUTH (תַּבְלָת [a stripping, nakedness].) "Children of B." were among the Na. Thalim who returned with Zerubbabel (Neh. vii. 54). In Ezek. ii. 52, the name is given as BAZLITH (תַּבְלָת [which means the same]). LXX. in both places Bασαλάθ; [Lat. in Ezek. Bασαλαθ, in Neh. Bασαλαθ] BAZLATH. [BAZLATH.]

BAZLUTH (תַּבְלָת: bāsālāth; [Lat. Bασαλαθ]: BAZLATH. (Ezek. ii. 52).

BDELLIUM (תַּבְלָת, bedeloch: נַעַנְוֶה, κρύσταλλαν: bdelillum), a precious substance, the name of which occurs in Gen. ii. 12, with "gold" and "onyx stone," as one of the productions of the land of Havilah, and in Num. xi. 7, where manna is in color compared to bdelillum. There are few subjects that have been more equivocally discussed than this one, which relates to the nature of the article denoted by the Hebrew word bdeliluch, and it must be confessed that notwithstanding the labor bestowed upon it, we are still as much in the dark as ever, for it is quite impossible to say whether bdeliluch denotes a mineral, or an animal production, or a vegetable exudation. Some writers have supposed that the word should be written bdeliluch (beryl), instead of bdeliluch, as Wahl (in Desser, Asier, p. 506) and Hartmann (de Melier, Hebrew, iii. 56), but beryll, or opal mariae, which is only a pale variety of emerald, is out of the question, for the bdelillum was white (Ex. xxi. 31, with Num. xi. 7), while the beryl is yellow or red, or faint blue; for the same reason the ázphag ("carbuncle") of the LXX. (in Gen. i. c.) must be rejected: while κρύσταλλαν ("crystal") of the same version, which interpretation is adopted by Rehnd (de Sina Proclusi, § 12), is mere conjecture. The Greek, Venetian, and the Arabic versions, with some of the Jewish doctors, understand "pears" to be intended by the Hebrew word: and this interpretation Beilart (Hieroc. iii. 592) and Gesenius accept; on the other hand the Gr. versions of Aquila, Theodotion, and Symmachus, Josephus (Ant. iii. 1, § 6), Salmasius (Hist. Itali. p. 181), Celsius (Hieroc. i. 321), Spengel (Hist. Rel. Herb. i. 18, and Comment. in Desser. i. 80), and a few modern writers believe, with the A. V., that bdeliluch = bdelillum, i. e., an offshoot or exudation from a tree which is, according to Kempfcr (Amoen. Exod. p. 638) the Balsamus habillumurmis, Linna., of Arabia Felix; compare Pliny (H. N. xii. 9, § 19), where a full description of the tree and the gum is given. The aromatic gum, according to Dioscorides (v. 80) was called μαθακαον or θαοκαον: and according to Pliny balsamum, mastocho, masticum, names which seem to be allied to the Hebrew bdeliluch. Plautus (Terc. i. 2, 7) uses the word bdelillum.

As regards the theory which explains bdeliluch by "pears," it must be allowed that the evidence in its favor is very inconclusive; in the first place it assumes that Havilah is some spot on the Persian Gulf where pears are found, a point however, which is fairly open to question; and secondly, it must br

a From הַבָּלָת, orus est (Sol).

b הַבָּלָת. See the Hebrew Lexicons, s. v.
BEALIAH (בֶּלִיתָא, remarkable as containing the names of both Bala and Jah; Baalâdî, [Vat. FA. Baâma; Alex. Baâdî] Baâman), a Benjamite, who went over to David at Ziklag (1 Chr. xii. 5).

BE'ALOTH (בֶּלֶז, the plur. fem. form of Baal; Baâmaâvin; Alex. Baâlov; Bôbah), a town in the extreme south of Judah (Josh. xv. 24).

BE'AN, CHILDREN [SONS] of (צָבָא, Joseph; צָבָא וּרְאוּ אֵלָז; בֵּית בֵּל), a tribe, apparently of predatory Bedouin habits, retreating into "towers" (πόλεος) when not plundering, and who were destroyed by Judas Maccabæus (1 Macc. v. 4). The name has been supposed to be identical with Bevon; but in the absence of more information this must remain more conjecture, especially as it is very difficult to tell from the context whether the residence of this people was on the east or west of Jordan.

BEANS (בֵּין, Arab. البَنْطَس, fábî.). There appears never to have been any doubt about the correctness of the translation of the Hebrew word. "Beans are mentioned with various other things in 2 Sam. xvii. 28, as having been brought to David at the time of his flight from Absalom, and again in Ex. iv. 9, beans are mentioned with "barley, lentils, millet, and fitches," which the prophet was ordered to put into one vessel to be made into bread. H'iny (H. N. xviii. 12) also states that beans were used for a similar purpose. Beans are cultivated in Palestine, which country grows many of the leguminous order of plants, such as lentils, kidney-beans, vetches, &c. Beans are in blossom in Palestine in January; they have been noticed in flower at Lydda on the 23d, and at Sidon and Acre even earlier (Kitto, Phys. II. Palest. 215); they continue in flower till March. In Egypt beans are sown in November and reaped in the middle of 'year, but in Syria the harvest is later. Dr. Kitto (ibid. 319) says that "the stalks are cut down with the scythe, and these are afterwards cut and crushed to fit them for the food of cattle; the beans which sent to market are often deprived of their skins by the action of two small null-stones (if the phrase may be allowed) of clay dried in the sun." Dr. Shaw (Travels. i. 257, 5vo ed. 1808) says that in Northern Africa beans are usually full podded at the beginning of March, and continue during the whole spring; that they are "boiled and stewed with oil and garlic, and are the principal food of persons of all distinctions."

Herodotus (ii. 37) states that the Egyptian priests abhor the sight of beans, and consider them impure, and that the people do not sow this pulse at all, nor indeed eat what grows in their country; but a passage in Diodorus implies that the abstinence from this article of food was not general. The remark of Herodotus, therefore, requires limitation. The dislike which Pythagoras is said to have maintained for beans has been by some traced to the influence of the Egyptian priests with that philosopher (see Smith's Dict. of Gr. and Rom. Biog., and the Pythagorians).

Hiller (Hippokrat. ii. 130), quoting from the Mishna, says that the high-priest of the Jews was not allowed to eat either eggs, cheese, flesh, bruised beans (fābūs fressōs), or lentils on the day before the sabbath.

The bean (βακεν ἐστιν) is too well known to need description: it is cultivated over a large portion of the old world from the north of Europe to the south of India; it belongs to the natural order of plants called Leguminosae. W. H.

BEAR (בְּאֵר, Heb. and Ch., or בָּאֵר, אָב, אָבָה; אָבָר, אָבָב, אָבָע, אָבָט; אָבָרָם, אָבָרֶם, אָבָרָמָה; בָּאָר, אָר); BEAR (ר', ל', ש', ב'); or, "to roll," in allusion to its form. Lat. bulla; Dutch, bol, "a bean." The Arabic word بُل (bâl) is identical. Gesen. Thes. n. v.

The derivation of בְּאֵר is doubtful; but Furt's etymology from בְּאֵר, bâr, "to distill," from root בָּאָר or בָּאָר (Heb. בָּאָר) and בָּאָר (Greek βάρας-τος), is in favor of the etymology.
BEARD

which opinion, however, he seems to have had no authority: and a recent writer, Dr. Thomson (Land and Book, p. 573), says that the Syrian bear is still found on the higher mountains of this country, and that the inhabitants of Hermon stand in great fear of him. Hemphir and Ehrenberg (Syndenh Phys., p. 1) inform us that during the summer months these bears keep to the snowy parts of Lebanon but descend in winter to the villages and gardens. It is probable also that at this period in former days they extended their visits to other parts of Palestine: for though this species was in ancient times far more numerous than it is now, yet the snowy summits of Lebanon were probably always the summer home of these animals. Now we read in Scripture of bears being found in a wood between Jericho and Bethel (2 K. ii. 24); it is not improbable, therefore, that the destruction of the forty-two children who mocked Elisha took place some time in the winter, when these animals inhabited the low lands of Palestine.

The ferocity of the bear when deprived of its young is alluded to in 2 Sam. xvii. 8; Prov. xvii. 12; Hos. xiii. 8; its attacking foxes in 1 Sam. xvii. 34, &c.; its craftiness in ambush in Lam. iii. 10, and that it was a dangerous enemy to man we learn from Am. v. 19. The passage in Is. lix. 11, would be better translated, "we grew like bears," in allusion to the animal's plaintive groaning noise (see BarchLT, Her. ii. 135; and Hor. Ep. xvi. 51, "circumventurus utrusque velit"). The bear is mentioned also in Rev. xiii. 2; in Dan. vii. 5; Wisd. xi. 17; Ezek. xlvii. 3.

W. H.

BEARD [pri 3] 

Western Asians have always cherished the beard as the badge of the dignity of manhood, and attached to it the importance of a feature. The Egyptians, on the contrary, sedulously, for the most part, shaved the hair of the face and head, and compelled their slaves to do the like. Herodotus (i. 36) mentions it as a peculiarity of the Egyptians, that they let the beard grow in mourning, being at all other times shaved. Hence Joseph, when released from prison, "shaved his beard" to appear before Pharaoh (Gen. xli. 14). It was, however, the practice among the Egyptians to wear a false beard made of plated hair, and of a different form according to the rank of the persons, private individuals being represented with a small beard, scarcely two inches long, kings with one of considerable length, square

Mr. Tristram not only found "the tracks of bears" in the snow, on the sides of Hermon (Land of Israel, p. 607); but even in Wady Humaam (see zurous), on the west side of the lake of Galilee, saw to

parts we it xi. 258 raoh rvpres<l llos.

The former is not improbable, of lociart,

the of time vii. 32, it is likely that the Jews retained the hair on the sides of the face between the ear and eye (σχέτωσιν), which the Arabs and others shaved away. Size and fullness of beard are said to be regarded, at the present day, as a mark of respectability and trustworthiness. The beard is the object of an oath, and that on which blessings or shame are spoken of as resting (D'Arvieux, Mercure et coutumes des Arabes). The custom was and is to shave or pluck it and the hair out in mourning (Is. i. 6, xx. 2; Jer. xi. 5, xlviii. 37; Ezr. ix. 3; Bar. vi. 31 [as Epist. Jer. 31]); to neglect it in seasons of permanent affliction (2 Sam. xix. 24), and to regard any insult to it as the last outrage which enmity can inflict. Thus David resolved the treatment of his ambassadors by Hadram (2 Sam. x. 1); so the people of God are figuratively spoken of as "beared" or "haired" which he will shave with "the razor, the king of Assyria" (Is. vii. 20). The beard was the object of salute, and under this show of friendly reverence his surprise "a brown Syrian bear clumsily but rapidly slumber down the rocks and cross the ravine" (p. 447).
Joah begat Amasa (2 Sam. xx. 9). The dressing, trimming, anointing, &c. of the beard, was performed with much ceremony by persons of wealth and rank (Ps. xcviii. 3). The removal of the beard was a part of the ceremonious treatment proper to a leper (Lev. xiv. 9). There is no evidence that the Jews compelled their slaves to wear beards otherwise than they wore their own; although the Romans, when they adopted the fashion of shaving, compelled their slaves to cherish their hair and beard, and let them shave when manumitted (Liv. xxiv. 2d, xlv. 44). H. H.

BEAST. The representative in the A. V. of the following Hebrew words: הַרְגִּזָה (Hebrew Chaldee).

1. Behemoth (בְּהֵמוֹת). a) A terapó̄da, a k̄hēn (תֹּרֶפֶת), the Hebrew Taken to mean "beast," and "beast," (A. V.) which is the general name for "domestic cattle" of any kind, is used also to denote "any large quadruped," as opposed to birds and creeping things (Gen. viii. 2, vi. 7, 20; Ex. ix. 23; Lev. xi. 2; I K. iv. 33; Prov. xxx. 30, &c.); or for "beasts of burden," horses, mules, etc., as in K. xviii. 5, Neh. ii. 12, 14, &c.; or the word may denote "wild beasts," as in Deut. xxxii. 24, Hab. ii. 17, 1 Sam. xviii. 44. [BEHEMOTH, note; LX.]

2. Bere (בְּרֵא), b) ρεά, a k̄hēn: jumilment: "beast," "cattle," (A. V.) used either collectively of "all kinds of cattle," like the Latin pecus (Ex. xxii. 4; Num. xx. 4, 8, 11; Ps. lxviii. 48), or specially of "beasts of burden" (Gen. xlv. 17). This word has a more limited sense than the preceding, and is derived from a root, יָבָר, "to pasture."

3. Olamath (ואלֵמָא), as סֹרְאָה, גַּזֵּן, בַּרְגִּזָה, שָׂרָה, בַּרְגִּזָה, פָּרָה, מִיָּחָה, מִיָּחָה: is called, I. "beast," "wild beast," "living," used to denote any animal. It is, however, very frequently used specially of "wild beast," when the meaning is often more fully expressed by the addition of the word הַרְגִּזָה (Gen. xlv. 11, Ex. xxiii. 11, Lev. xvi. 22; Deut. vii. 22; Hos. ii. 14, xili. 8; Jer. xlii. 9, &c.). Similar is the use of the Chaldee יַבִּשָּׁא (Bashi). [BASHE]

BE'ER [2 syll.] (בֵּעֵר) [Pehlevi, fatherly]: [In Ezra.] Baasah. [Vat. Baasah, Alex. Baasah; in Neh.] Baas; Beasah, etc.; in 1 Esdr. Baasah, Zedes (Beitri). 1. "Sons of Be'er," 628 (Neh. 628) in number, returned from Babylon with Zerubbabel (Ezr. ii. 11; Neh. xi. 16; 1 Esdr. v. 13), and at a later period twenty-eight more, under Zechariah the son of Be'er, returned with Ezra (Ezr. viii. 11). Four of this family had taken foreign wives (Ezr. xii. 28; 1 Esdr. ii. 26). The name occurs also among those who sealed the covenant (Neh. x. 15) [BAISAH].

a From the unused root יָבָר ("to be dumb."

b The word יָבָר is translated by the A. V. "wild wants of the desert" in Is. xiii. 21, xxxiv. 14; Jer. 1. The root is יָבָר ("to be dry"; whence יָבָר). 2. (Basis) [Vat. Alex. Baisah.] Father of Zechariah, who was the leader of the twenty-eight men of his tribe mentioned above (Ex. viii. 11).

BE'ER'hai [2 syll.] (בֵּעֵר) [Comp. Atm.] Baasah; [Sin. Abasah] Vat. omits; Vulg. omits), a place named only in Jud. xxv. 4. It is possibly a mere repetition of the name Chobah occurring next to it.

BE'CHER (בְּכֶר). [Gen.] Bocchur. [Alex. Becher; in Num., Bocchur, the others omit]; in 1 Chr., Bocchur, Alex. Bocchur; Vat. Abiexa; in ver. 8, in Num. Becher, in 1 Chr. Becher; first-born, but according to Gesen. a young cousin, which Simonis also hints at, Onom. p. 396).

1. The second son of Benjamin, according to the list both in Gen. xvi. 21, and 1 Chr. vii. 6; but omitted in the list of the sons of Benjamin in 1 Chr. vii. 1, without at least suspecting that יָבָר, his first-born, is a corruption of יָבָר, Becker, and that the suffix לָו is a corruption of לָו, and belongs to the following יָבָר, so that the genuine sense in that case would be, Benjamin begat Bela, Becker, and Aschbel, in exact agreement with Gen. xvi. 21.

The enumeration, the second, the third, etc., must then have been added since the corruption of the text. There is, however, another view which may be taken, namely, that 1 Chr. vii. 1 is right, and that in Gen. xvi. 21 and 1 Chr. vii. 8, יָבָר, as a proper name, is a corruption of יָבָר, first-born, and so that Benjamin had no son of the name of Becher. In favor of this view it may be said that the position of Becher, immediately following Bela the first-born in both passages, is just the position it would be in if it meant "first-born," that Becher is a singular name to give to a second son, and that the discrepancy between Gen. xvi. 21, where Aschbel is the third son, and 1 Chr. vii. 1, where he is expressly called the second, and the omission of Aschbel in 1 Chr. vii. 6, would all be accounted for on the supposition of יָבָר having been accidentally taken for a proper name, instead of in the sense of "first-born." It may be added further that in 1 Chr. vii. 38, the same confusion has arisen in the case of the sons of Azel, of whom the second is in the A. V. called Bocchur, in Hebrew יָבָר, but which in the LXX. is rendered ποστόρακος ἀνήρ, and another name, Αζαδ, added to make up the six sons of Azel. And that the LXX. are right in their rendering is made highly probable by the very same form being repeated in ver. 39, and the sons of Eshek his brother were Ulam his first-born, יָבָר, Ichaiah the second, &c. The support too which Becher as a proper name derives from the occurrence of the same name in Num. xxxvi. 35, is somewhat weakened by the fact that Berekel (Bapadar, LXX.) is substituted for Becher in 1 Chr. vii. 20, and that it is omitted

"a desert;" יָבָר = "any dwellers in a dry or desert region," &c. Becher is wrong in limiting the word to mean "wild cats" (Hieron ii. 203).
altogether in the LXX. version of Num. xxvi. 35. Moreover, which is perhaps the strongest argument of all, in the enumeration of the Benjamite families in Num. xxvi. 21, there is no mention of Becher or the Barchrites, but Ashbel and the Ashdolites immediately follow Bela and the Beites. Notwithstanding, however, all this, the first supposition was, it can scarcely be doubted, substantially the true one. Becher was one of Benjamin's three sons, Bela, Becher, Ashbel, and came down to Egypt with Jacob, being one of the fourteen descendants of Rachel who settled in Egypt, namely, Joseph and his two sons Manasseh and Ephraim, Benjamin and his three sons named Gera, Nanaam, Ehi (γνήσ. abraham, Num. xxvi. 38, and 

\[\text{γνήσ.}^\text{Aharah, 1 Chr. viii. 1, and perhaps \[\text{γνήσ.}^\text{and \[\text{γνήσ.}^\text{ver. 4 and 7}, and Ard (\[\text{γνήσ.}^\text{but in 1 Chr. viii. 3, \[\text{γνήσ.}^\text{Addar}]), the sons of Bela, Muppim (otherwise Shuppim, and Shephuphan, 1 Chr. vii. 12, 15, viii. 5; but Shupham, Num. xxvi. 39) and Huppim (Hiram, 1 Chr. viii. 5, but Hupham, Num. xxvi. 39), apparently the sons of Abraham or Elr (\[\text{γνήσ.}^\text{vii. 12,} \text{and Eshh, of whom we can give no account, as there is no name the least like it in the parallel passages, unless peradventure it be for Jeosh (\[\text{γνήṣ.}^\text{), a son of Becher. 1 Chr. vii. 3,} \text{a and so, it is worth of observation, the LXX. render the passage, only that they make Ard the son of Gera, great-grandson therefore to Benjamin, and make all the other sons of Bela. As regards the posterity of Becher, we have already noticed the singular fact of there being no family named after him at the numbering of the tribes in the plains of Moab, as related in Num. xxvi. But the no less singular circumstance of there being a Becher, and a family of Becherites, among the sons of Ephraim (ver. 55), seems to supply the true explanation. The daughter of the sons of Ephraim by the men of Gath, who came to steal their cattle out of the land of Geshen, in that border affair related in 1 Chr. vii. 21, had thinly thinned the house of Ephraim of its males. The daughters of Ephraim must therefore have sought husbands in other tribes, and in many cases must have been heiresses. It is therefore highly probable that Becher, or his heir and head of his house, married an Ephrimitish heiress, a daughter of Shultheah (1 Chr. vii. 20, 21) and that his house was reckoned in the tribe of Ephraim, just as Jair, the son of Seub, was reckoned in the tribe of Manasses (1 Chr. ii. 52; Num. xxxii. 40, 41). The time when Becher first appears among the Ephrimites, namely, just before the entering into the promised land, when the people were numbered by genealogies for the express purpose of dividing the inheritance equally among the tribes, is evidently highly favorable to this view. (See Num. xxvi. 52-56, xxvii.) The junior branches of Becher's family would of course continue in the tribe of Benjamin. Their names, as given in 1 Chr. vii. 8, were Zemara, Jeosh, Eliezer, Elioenai, Ouiri, Jeremoth, and Abiahi; other branches possedd the fields round Anathoth and Ahinom, called Alemeth vi. 69, and Ahmon Josh. xii. 19. The name of the above were Becher's own sons, and which were grandsons, or more remote descendants, is perhaps impossible to determine. But the most important of them, as being ancestor to king Saul, and his great captain Abner (2 Sam. iii. 37), the last-named Abiahi, was, it seems, literally Becher's son. The generations appear to have been as follows: Becher—Abiahi (Aphshah, 1 Sam. ix. 1) —Bechorath—Zeror—Abiel (Jehiel, 1 Chr. ix. 55) —Ner—Saul. Becher was another son of Ner, brother therefore to Kish, and uncle to Saul. Abiel or Jehiel seems to have been the first of his house who settled at Gibeon or Giloh (1 Chr. viii. 29, ix. 5), which he perhaps acquired by his marriage with Maachah, and which became thenceforth the seat of his family, and was called afterwards Gibeon of Saul (1 Sam. xi. 4; 1s. x. 29). From 1 Chr. viii. 6 it would seem that before this Gibeon or Giloh had been possessed by the sons of Eflon (called Ahiah ver. 3) and other sons of Bela. But the text appears to be very corrupt.

Another remarkable descendant of Becher was Shela the son of Bilhi, a Benjamite, who headed the formidable rebellion against David described in 2 Sam. xx. and another, probably, Shimel the son of Gera of Bahurim, who cursed David as he fled from Absalom (2 Sam. xv. 5), since he is said to have been a man of the family of the house of Saul. But if so, Gera must be a different person from the Gera of Gen. xxxii. 31 and 1 Chr. viii. 2. Perhaps therefore \[\text{γνήσ.}^\text{is used in the wider sense of tribe, as Josh. xvi. 17,} \text{and so the passage may only mean that Shimel was a Benjamite. In this case he would be a descendant of Bela. From what has been said above it will be seen how important it is, with a view of reconciling apparent discrepancies, to bear in mind the different times when different passages were written, as well as the principle of the genealogical divisions of the families. Thus in the case before us we have the tribe of Benjamin described (1.) as it was about the time when Jacob went down into Egypt; (2.) as it was just after the entrance into Canaan; and (3.) as it was in the days of David; and (4.) as it was eleven generations after Jonathan and David, i.e. in Jesse's reign. It is obvious how in these latter times many new heads of houses, called sons of Benjamin, would have sprung up, while older ones, by failure of lines, or translation into other tribes, would have disappeared. Even the non-appearance of Becher in 1 Chr. viii. 1 may be accounted for on this principle, without the necessity for altering the text.

2. Son of Ephraim, Num. xxxii. 35, called Bereh 1 Chr. vii. 20. Same as the preceding.

A. C. II.

BECHORATH ([γνήσ.]) [first-born]: Becher [Vat. \[\text{χροθ.}]) Alex. Becoroth: Bechorath], son of Aphiash, or Abiah, and grandson of Becher, according to 1 Sam. ix. 1: 1 Chr. vii. 8. [Becher.] A. C. II.

really the first-born of Benjamin, but having forfeited his birthright for the sake of the Ephrimitish inheritance.

\(c\) it is possible that Bechorath may be the same person as Becher, and that the order has been accidentally inverted.

\(d\) Comp. 1 Chr. vii. 14, viii. 5, 6, 29, ix. 35.

\(a\) We are more inclined to think it is a corruption of \[\text{γνήσ.}^\text{, or \[\text{γνήσ.}^\text{, and belongs to the preceding \[\text{γνήσ.}^\text{, Ehi, as Abraham is certainly the right name, as appears by Num. xxvi. 38.}

\(b\) This view suggests the possibility of Becher being
BEDILETH

A Place of (ν) πεδιον Εκτραλλα[Val. -τετ-]: Alex. Bactileth. [and so Stn. 25; Stn. 1 Baradlala]: Syr. لَيْهَةُ جَيْدٍ = λάτος of slaughter), mentioned in Jud. ii. 21, as lying between Niniveh and Cilicia. The name has been compared with Βρακτιαλλα, a town of Syria named by Ptolemy; Bantiali in the Puntinger Tables, which place it 21 miles from Antioch. The most important plain in this direction is the Bekaa, or valley lying between the two chains of Lebanon. And it is possible that Bedileth is a corruption of that well-known name: if indeed it be a historical word at all.

G.

BED and BED-CHAMBER. We may distinguish in the Jewish bed five principal parts:—

1. The bedstratum; 2. The covering; 3. The pillow; 4. The bedstead or analogous support for 1. 5. The ornamental portions.

1. This substantive portion of the bed was limited to a mere mat, or one or more quilts.

2. A quilt finer than those used in 1. In summer a thin blanket or the outer garment worn by day (1 Sam. xix. 13) sufficed. This latter, in the case of a poor person, often formed both 1. and 2. and that without a bedstead. Hence the law provided that it should not be kept in pledge after sunset, that the poor man might not lack his needful covering (Deut. xxiv. 13).

3. The only material mentioned for this, is that which occurs 1 Sam. xix. 13, and the word used is of doubtful meaning, but seems to signify some fabric woven or plaited of goat’s hair. It is clear, however, that it was something hastily adopted to serve as a pillow, and is not decisive of the ordinary use.

In Ez. xii. 18 occurs the word בֵּית לֹא (προσκεφάλαιον, LXX.), which seems to be the proper term. Such pillows are common to this day in the East, formed of sheep’s fleece or goat’s skin, with a stuffing of cotton, &c. We read of a “pillow” (rAVOR’S cushion; see ShIIP, 13.) also, in the boat of which our Lord lay asleep (Mark iv. 38) as he crossed the lake. The block of stone such as Jacob used, covered perhaps with a garment, was not unusual among the poorer folk, shepherds, &c.

4. The bedstead was not always necessary, the divan, or platform along the side or end of an Oriental room, sufficing as a support for the bedding. (See preceding cut.) Yet some slight and portable frame seems implied among the senses of the word נָשֶׁע, which is used for a “bier” (2 Sam. iii. 31), and for the ordinary bed (2 K. iv. 10), for the litter on which a sick person might be carried (1 Sam. xix. 15), for Jacob’s bed of sickness (Gen. ivii. 31); and for the couch on which guests reeled at a banquet (Esth. i. 6). Thus it seems the comprehensive and generic term. The proper word for a bedstead appears to be אֶפֶן, used Dent. iii. 11, to describe that on which lay the giant Og, whose vast bulk and weight required one of iron.

Bed and Head-rest. (Wilkinson, Ancient Egyptians.)

5. The ornamental portions, and those which luxury added, were pillars and a canopy (Jud. xiii. 9); ivy carvings, gold and silver (Joseph. Ant. xii. 21, 14), and probably mosaic work, purple and fine linen, are also mentioned as constituting parts of beds (Esth. i. 6; Cant. iii. 9, 10) where the word לְפִירָת עַל נָשֶׁע, LXX. φαπελος, seems to mean “a litter” (Prov. vii. 16, 17; Amos vi. 4). So also are perambures.

There is but little distinction of the bed from sitting furniture among the Orientals, the same article being used for nightly rest, and during the day. This applies both to the divan and bedstead in all its forms, except perhaps the litter. There was also a garden-watcher’s bed, בֵּית לֹא, rendered variously in the A. V. “cottage” and “lodge,” which seems to have been slung like a hammock, perhaps from the trees (Is. v. 8, xxiv. 20).

Josephus (Ant. xii. 4, 11) mentions the bedchambers in the Arabian palace of Hyrcanus.

Pillow or Head-rest. (Wilkinson, Ancient Egyptians.)

The ordinary furniture of a bed-chamber in private life is given in 2 K. iv. 10. The “bed-chamber” in the temple where Joasah was hidden, was, as Calmet suggests (Dict. of Bib., art. Beds), probably a store-chamber for keeping beds, not a mere bedroom, and thus better adapted to conceal the fugitives (2 K. xi. 2; 2 Chr. xxii. 11. בֵּית לֹא עַל נָשֶׁע “a chamber of beds,” not the usual בֵּית לֹא “chamber of reclining,” Ex. viii. 3 and passim). The position of the bed-chamber in the most remote and secret parts of the palace seems marked in the passages Ex. viii. 3; 2 K. vi. 12. H. H.
BEDEAIAH (3 syl.), Exr. x. 35. [BEDEAIAH]  

BEDAN (272 [serene, Grs.]: [Bapaiz:] Bedan]. 1. Mentioned 1 San. xii. 11, as a Judge of Israel between Jerahmeel (Gideon) and Jephtah. As no such name occurs in the book of Judges, various conjectures have been formed as to the person meant, most of which are discussed in Pole (Synagoga, in loc.). Some maintain him to be the Jair mentioned in Judg. x. 3, who, it must then be supposed, was also called Benan to distinguish him from the older Jair, son of Manasseh (Num. xxxix. 41), a Bedan being actually named among the descendants of Manasseh in 1 Chr. vii. 17. The Chaldee Paraphrase reads Samson for Bedan in 1 Num. xii. 11, and many suppose Bedan to be another name for Samson, either a contraction of Ben-Dan (the son of Dan or Danite), or else meaning "in or into Dan (Z)" with a reference to Judg. xiii. 25. Neither explanation of the word is very probable, or defended by any analogy, and the order of the names does not agree with the supposition that Bedan is Samson, so that there is no real argument for it except the authority of the Paraphrase. The LXX, Syr., and Arab. all have Barak, a very probable correction except for the order of the names. Ewald suggests that it may be a false reading for Abdon. After all, as it is clear that the book of Judges is a not a complete record of the period in which it treat, it is possible that Bedan was one of the Judges whose names are not preserved in it, and so may perhaps be compared with the Jael of Judg. v. 6, who was probably also a Judge, though we know nothing about the subject except from Deborah's song. The only objection to this view is, that as Bedan is mentioned with Gideon, Jephtah, and Samuell, he would seem to have been an important Judge, and therefore not likely to be omitted in the history. The second objection applies in some degree to the views which identify him with Abdon or Jair, who are but cursorily mentioned.  

G. E. L. C.  

2. (Bada': [Vat. (Ouamer) Bada:]: Alex. Bada'). Son of Uam, the son of Gilead (1 Chr. vii. 17).  

W. A. W.  

BEDEAIAH (3 syl.) (7172 [servant of Jero- biah]): Bada: [Vat. Bapaia:] Bedobin. One of the sons of Bini, in the time of Ezra, who had taken a foreign wife (Exr. x. 35). [The A. V. ed. 1611, etc., reads Bedobin.]

BEE (772221, dehvthw: meleageta, melag- oso: apis). Mention of this insect occurs in Dent. i. 44, "The Amorites dwelt in that mountain which came out against you, and chased you as bees do;" in Judg. xiv. 8, "There was a swarm of bees and honey in the carchas of the lion;" in Ps. xxxii. 12, "They compassed me about like bees;" and in Is. viii. 18, "It shall come to pass in that day that the Lord shall kiss for the fly that is in the uttermost parts of the rivers of Egypt, and for

a From ἑλευθής, "freewill, grace;" evwma, Grs. evwma. Gen. Pex. x.  

b It is very curious to observe that in the passage of Dent. i. 44, the Syrian version, the Targum of On- tius, and an Arabic MS., read, "Chased you as bees the bee that is in the land of Assyria." That Pal- estine abounded in bees is evident from the descrip- tion of the country by Moses, he was a "flow- ing with milk and honey;" nor is there any reason for supposing that this expression is to be understood otherwise than in its literal sense. Modern travel- lers occasionally allude to the bees of Palestine. Dr. Thomson (Land and Book, p. 291) speaks of immense swarms of bees which made their home in a gigantic cliff of Wadi Kurn. "The people of 'Ma'ila, several years ago," he says, "let a man down the face of the rock by ropes. He was enti- rely protected from the assaults of the bees, and extracted a large amount of honey; but he was so terrified by the prodigious swarms of bees that he could not he induced to repeat the exploit." This forcibly illustrates Dent. xxxii. 13, and Ps. lxxvi. 16, as to "honey out of the stony rock," and the two passages out of the Psalms and Judges quoted above, as to the fearful nature of the attacks of these insects when irritated.  

Maxmudrell (Tevr. p. 566) says that in passing through Samaria he perceived a strong smell of honey and of wax; and that when he was a mile from the Dead Sea he saw bees busy among the flowers of some kind of saline plant. Mariti (Tevr. iii. 139) assures us that bees are found in great multitudes amongst the hills of Palestine, and that they collect their honey in the hollows of trees and in cliffs of rocks; (comp. Land and Book, p. 960). That bees are reared with great success in Pale- stine, we have the authority of Hasselquist (Tevr. p. 236) and Dr. Thomson (ib. p. 253) to show.  

English naturalists, however, appear to know but little of the species of bees that are found in Pale- stine. Dr. Kitto says (Phys. II. Pol. p. 421) there are two species of bees found in that country, Aptis longicornis, and Aptis mellifica. A. longi- cornis, however, which is European, and Aptis mellifica, is an European species; and though Klug and Ehren- berg, in the Syntophe Plagiue, enumerate many Syrian species, and amongst them some species of the genus Fureus, yet E. longicornis, is not found in their list. Mr. F. Smith, our best authority on the hymenoptera, is inclined to believe that the honey- bee of Palestine is distinct from the honey-bee (A. mellifica) of this country. And when it is remem- bered that last-named writer has described as many as seventeen species of true honey-bees (the genus Aptis), it is very probable that the species of our own country and of Palestine are distinct.  

There can be no doubt that the attacks of bees in Eastern countries are more to be dreaded than they are in more temperate climates. Swarms in the East are far larger than they are with us, and, on account of the heat of the climate, one can readily imagine that their stings must give rise to very dangerous symptoms. It would be easy to quote from Aristotle, Theian, and Pliny, in proof of what has been stated; but let the reader consult Mungo Park's Travels (ii. 37, 38) as to the incident which occurred at a spot he named "Bees' Creek" from the circumstance. Compare also Oudemann (Vre m. So. Nom. p. vi. c. 20). We can well, therefore, understand the full force of the Psalmist's complaint, "They came about me like bees."
The passage about the swarm of bees and honey in the lion's carcass (Judg. xiv. 8) admits of easy explanation. The lion which Samson slew had been dead some little time before the bees had taken up their abode in the carcass, for it is expressly stated that "after a time," Samson returned and saw the bees and honey in the lion's carcass, so that "if," as Oeisheim has well observed, "any one here represents himself to a corrupt and putrid carcass, the occurrence ceases to have any true similitude, for it is well known that in these countries at certain seasons of the year the heat will in the course of twenty-four hours so completely dry up the moisture of dead camels, and that without their undergoing decomposition, that their bodies long remain, like mummies, unaltered and entirely free from offensive odor." To the foregoing quotation we may add that very probably the ants would help to consume the carcass, and leave perhaps in a short time little else than a skeleton. Herodotus (v. 114) speaks of a certain Onesilus who had been taken prisoner by the Amathusians and beheaded, and whose head having been suspended over the gates, had become occupied by a swarm of bees; compare also Albiorandus (De Insect. i. 110). Dr. Thomson (Leaves and Book, p. 566) mentions this occurrence of a swarm of bees in a lion's carcass as an extraordinary thing, and makes an unhappy conjecture, that perhaps "horns," "obelus" in Arabic, are intended, "if it were known," says he, "that they manufactured honey enough to meet the demands of the story." It is known, however, that these horns do not make honey, nor do any of the family Vespide, with the exception, as far as has been hitherto observed, of the Brazilian Nectoria mellicope. The passage in Is. vi. 18, "the Lord shall kiss for the bee that is in the land of Assyria," has been understood by some to refer to the practice of "calling out the bees from their hives by a hissing or whistling sound to their labor in the fields, and summoning them again to return in" the evening (Harris, Nat. II. of Bible, art. Bee). Bochart (Hieroc. iii. 353) quotes from Cyril, who thus explains this passage, and the one in Is. vi. 25. Colquhoun, Pliny, "Elian, Virgil, are all cited by Bochart in illustration of this practice; see numerous quotations in the Hierocorus. Mr. Denham (in Kitto's Cyc. Bib. lit. art. Bee) makes the following remarks on this subject:—"No one has offered any proof of the existence of such a custom, and the idea will itself seem sufficiently strange to all who are acquainted with the habits of bees." That the custom existed amongst the ancients of calling swarms to their hives, must be familiar to every reader of Virgil,

"Tintatullque eie, et Maris quae cymbala circulum," and it is curious to observe that this practice has continued down to the present day. Many a cotager believes the bees will more readily swarm if he beats together pieces of tin or iron. As to the real use in the custom, this is quite another matter; but no careful entomologist would hastily adopt any opinion concerning it.

In all probability however, the expression in Is. vi. 18, "the Lord shall kiss for the bee that is in the land of Assyria," has been understood by some to refer to the custom of the people in the East of calling the attention of any one by a significant kiss, or rather hiat."

The LXX. has the following eulogium on the bee in Prov. vi. 8: "Go to the bee, and learn how diligent she is, and what a noble work she produces, whose labors kings and private men use for their health; she is desired and honored by all, and though weak in strength, yet since she values wisdom, she prevails." This passage is not found in any Hebrew copy of the Scriptures: it exists, however, in the Arabic, and it is quoted by Origen, Clemens Alexandrinus, Jerome, and other ancient writers. As to the proper name, see Beelzebath.

The bee belongs to the family Apidae, of the Hymenopterous order of insects. W. H. W.

* On this subject of bees in Palestine, Mr. Tristram furnishes important testimony (Land of Israel, pp. 86, 87). After speaking of "bee-keeping" in that country, carried so far that almost "every house possesses a pile of bee-hives in its yard," he adds respecting the number of wild bees as follows: "The innumerable fissures and cells of the limestone rocks, which everywhere flank the valleys, afford in their recesses secure shelter for any number of swarms, and many of the Bedouin, particularly in the wilderness of Judea, obtain their sustenance by bee-hunting, bringing into Jerusalem jars of that wild honey on which John the Baptist fed in the wilderness and which Jonathan had long before unwittingly tasted, when the comb had dropped on the ground from the hollow of the tree in which it was suspended. The visitor to the Wady Kurm, when he sees the busy multitudes of bees about its cliffs, cannot but recall to mind the promise, "With honey out of the stony rock would I have satisfied thee." There is no epithet of the land more proper indeed to the letter, even to the present day, than this, that it was "a land flowing with milk and honey.""

BEEELIADA (בְּּלִיָדָא) = known by Baal:

ELIADA: [Val. F. B. BALEYDA] Alex. BALEYDA: Beeliada, one of David's sons, born in Jerusalem (1 Chr. xiv. 7). In the lists in Samuel the name is ELIADA, El being substituted for Baal.

BEEELSARUS (בְּּלֵסָרָא): Beelsero, 1 Esdr. v. 8. [BISHIANS]

BEEELTHETH MUS (בְּּלֵתְּהַתְּמָו): Alex. [BEEELTHTHMUS]: Beeltheoth, an officer of Artaxerxes residing in Palestine (1 Esdr. ii. 16, 23). The name is a corruption of בְּּלֵת הָתְּמָ הָתְּיָה = lord of judgment, A. V. "chancellor;" the title of Rehuma, the name immediately before it. (Ezr. iv. 8).

BEEELZEBUL (בְּּלֵצֶבּוּל): Beelzebub, the title of a heathen deity, to whom the Jews ascribed the sovereignty of the evil spirits (Matt. x. 23, xii. 24; Mark iii. 22; Luke xi. 15 ff.). The correct reading is without doubt Beelzebul, and not Beelzebub [A. V.] as given in the Syriac, the Vulg., and some other versions; the authority of the MSS. is decisive in favor of the former, the alteration being easily accounted for by a comparison with 2 K. i. 2, to which reference is made in the passages quoted. [BAAL. p. 297, No. 2.] Two questions present themselves in connection with this subject: (1) How are we to account for the change of the final letter of the name? (2) On what grounds did the Jews assign to the Baal-zebub of Ekron the peculiar position of בְּּלֵצֶבּוּל יָסָרָו? The sources of information at our command for the answer of these questions are scanty. The names are not found elsewhere. The LXX. translates Baalzephon, it is also does Josephus (Ant. ix 2, § 1); and the Talmudical writers are silent on the subject.
1. The explanations offered in reference to the change of the name may be ranged into two classes, according as they are based on the sound or the meaning of the word. The former proceeds on the assumption that the name Beelzebul was offensive to the Greek ear, and that the final letter was altered to avoid the double θ, just as Halachkah became in the LXX. Αχακαθ (Hitzig, Vorbeh. in Halachkah), the choice of θ as a substitute for θ, being decided by the previous occurrence of the letter in the former part of the word (Bengel, Comm. in Matt. x. 25, comparing Μαθα in the LXX. as = Michael). It is, however, by no means clear why other names, such as Megan or Eldad, should not have undergone a similar change. We should prefer the assumption, in connection with this view, that the change was purely of an accidental nature, for which no satisfactory reason can be assigned. The second class of explanations carries the greatest weight of authority with it. These proceed on the ground that the Jews intentionally changed the pronunciation of the word, as so either to give a significance to it adapted to their own ideas, or to cast ridicule upon the idolatry of the neighboring nations, in which case we might compare the adoption of Nyxhn for Nychm, Jehovih for Bethel. The Jews were certainly keenly alive to the significance of names, and not unfrequently indulged in an exercise of wit, consisting of a play upon the meaning of the words, as in the case of Nadal (1 Sam. xxv. 25), Abraham (Gen. xvii. 5), and Sarah (Gen. xvii. 15). Lightfoot (Exegetical, Matt. xii. 24) adduces instances from the Talmudical writers ofapprobatory puns applied to idols. The explanations, which are thus based on etymological grounds, branch off into two classes:

- Some connect the term with $\text{βελζμυλος}$, habitation, thus making Beelzebul = οἰκος εξολοθρείου (Matt. x. 25), the habitation of the devil, whether as the "prince of the power of the air" (Eph. ii. 2), or as the prince of the lower world (Paulus, quoted by Olschansen, Comment, in Matt. x. 25), or as inhabiting human bodies (Schleusner, Lex. s. v.), or as occupying the mansion in the seventh heaven, like Saturn in Oriental mythology (Movers, Phonet. i. 260, quoted by Winer, Redhehn. art. Beelzebul; comp. Michaelis, Suppl. ad Lex. p. 265, for a similar view).

- Others derive it from $\text{βελζμυλός}$, dunghill (a word, it must be observed, not in use in the Bible itself, but frequently occurring in Talmudical writers), thus making Beelzebul, literally, the lord of dunghill, or the dunghill god; and in a secondary sense, as belz was used by the Talmudical writers as = idol or idolatry (comp. Lightfoot, Exeget. Matt. xii. 24; Luke xi. 15), the lord of idols, prince of dust gods, in which case it = ἀρχων τῶν δαμασκέων. It is generally held that the former of these two senses is more particularly referred to in the N. T. (Carlyle, Appol. p. 428, comparing the term $\text{βασιλεύς}$, as though connected with $\text{βελζμυλός}$; Winer, Comment. in Matt. x. 25). The latter, however, is adopted by Lightfoot and Schleusner. We have hesitantly noticed the ingenious conjecture of Hug (as quoted by Winer) that the fly, by which Beelzebul was designated, was the Scarabaeus pilarius or dunghill bee, in which case Beelzebul and Beelzebub might be used indiscriminately.

2. The second question hinges to a certain extent on the first. The reference in Matt. x. 25 [xii. 24] may have originated in a fancied resemblance between the application of Azubah to Raal-zalub, and that of the Jews to our Lord for the ejection of the unclean spirits. As no human remedy availed for the cure of this disease, the Jews naturally referred it to some higher power and selected Raal-zalub as the heathen deity to whom application was made in case of severe disease. The title ἀρχων τῶν δαμασκέων may have special reference to the nature of the disease in question, or it may have been derived from the name itself by a fanciful or real etymology. It is worthy of special observation that the notices of Beelzebul are exclusively connected with the subject of demoniacal possession, a circumstance which may account for the subsequent disappearance of the name.

W. L. B.

**BEER** ("$\text{Σίδων αὐτής} = \text{well: τὸ ὕπατος: putans}")

1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called because the well which was dug by the "princes and nobles" of the people, and is perpetuated in a fragment of poetry (Num. xxxi. 16-18). This is possibly the BEER-ELIM, or "well of heroes," referred to in Is. xxv. 8. The "wilderness" ("$\text{τὰς θανάσεις}") which is named as their next starting point in the last clause of verse 18, may have been that of broth that, before spoken of in 13, or it may be a copyist's mistake for "$\text{Σίδων}."]

It was so understood by the LXX., who read the clause, καὶ ὁ πόταμος — and from the well," i. e. "from Beer." According to the tradition of the Targumists — a tradition in part adopted by St. Paul (1 Cor. x. 4) — this was one of the appearances, the last before the entrance on the Holy Land, of the water which had "followed" the people, from its first arrival at Rephidim, through their wanderings. The water — so the tradition appears to have run — was granted for the sake of Miriam, her merit being that, at the peril of her life, she had gathered the ark in which lay the infant Moses. It followed the people over mountains and into valleys, encircling the entire camp, and furnishing water to every man at his own tent door. This it did till her death (Num. xx. 1), at which time it disappeared for a season, apparently rendering a special act necessary on each future occasion for its evocation. The striking of the rock at Kadesh (Num. xx. 10) was the first of these; the digging of the well at Beer by the staves of the princes, the second. Miriam's well at last found a home in a gulf or recess in the sea of Galilee, where at certain seasons its water flowed and was resorted to for healing purposes (Targums Onkelos, and Ps. Jon. Num. xx. 1, xxi. 18, and also the quotations from the Talmud in Lightfoot on John v. 4 [and Westein on 1 Cor. x. 4]).

2. A place to which Jethro, the son of Gideon, fled for fear of his brother Maimoch (Judg. ix. 21). There is nothing in the text or elsewhere to indicate its position (1.XX. Vat. Barba; the Alex.

dereder "gather" are radically different, $\text{βασιλεύς}$ in xvi.

a There is no connexion between the "gathering" in ver. 15 and that in x.xx. From the A. V. it might be inferred that the former passage referred to the word described in the latter; but the two words refer...
the widely extended Canaanitish tribe of the Hit- 
dites. On this supposition the difficulty vanishes
and each of the accounts gives us just the infor-
mation we might expect. In the narrative, where
the stress is laid on Eun's wife being of the race
of Canaan, her father is called a Hititite; whilst
in the genealogy, where the stress is on Eun's con-
nection by marriage with the previous occupants
of Mount Seir, he is most naturally and properly de-
scribed under the more precise term Horite.

2. Father of the prophet Hosae ( Hos. i. 1).
F. W. G.

BEER-LAHAI-ROI (בְּאֵר לָהַי־רֹאִי)
well of the living and seeing [Gen.]: φῆσαι ὧν
ἐστιν τό εἴδων; τῷ φῆσαι τῶν ὄρασιν: παρὰ
νυκτὸς καὶ νυκτὸν. a

Well, or rather a living spring; (A. V., fountain, comp. Gen. xvi. 7),
between Kadesh and Beerel, in the wilderness, "in
the way to Shur," and therefore in the "south
country" (Gen. xxiv. 62), which, according to the
explanation of the text, was so named by Hagar
because God saw her (בְּאֵר) there (Gen. xvi. 14).
From the fact of this etymology not being in agree-
ment with the formation of the name, it has been
suggested (Gen. Thes. 173) that the origin of the
name is Lechi (comp. Judg. x. 9, 19). It would
seem, however, that the Lechi of Samson's adven-
ture was much too far north to be the site of the
well Lahai-roi.

By this well Isaac dwelt both before and after
the death of his father (Gen. xlvii. 1, xlvii. 11).
In both these passages the name is given in the
A. V., as "the well Lahai-roi."

Mr. Rowland announces the discovery of the well
Lahai-roi at Moge or Moilahi, a station on the
road to Beer-sheba, 10 hours south of Rehebeh;
near which is a hole or cavern bearing the name of
Beel Haeger (Ritter, Sinai, 1086, 7); but this
requires confirmation.

This well is not to be confounded with that near
which the well of Ishmael was preserved on a sub-
sequent occasion (Gen. xxvii. 19) and which, according
to the Moslem belief, is the well Zen-con
at Mecca.

BEEROTH (בֶּאֵר רוֹאִי, wells): Bapört, Ber-
puxah, Bapópt: Beeroth) one of the four cities of the
Hivites that subdued Joshua into a treaty of peace
with them, the other three being Gibeon, Che-
phirah, and Kirjath-Jearim (Josh. xv. 17). Beer-
roth was with the rest of these towns allotted to Ben-
jamin (xviii. 25), in whose possession it continued at
the time of David, the murderers of Ishbosheth
being named as belonging to it (2 Sam. iv. 2).
From the notice in this place (verse 2, 3) it would
appear that the original inhabitants had been forced
from the town, and had taken refuge at Gittaim (Neh.
xi. 34), possibly a Philistine city.

Beeroth is once more named with Chephirah and
Kirjath-Jearim in the list of those who returned from
Babylon (Ezr. ii. 25; Neh. vii. 29; 1 Esdr. v. 19). [Beerothi].

Beeroth was known in the times of Eusebius,
and his description of its position (Onoma. Beeroth,
with the corrections of Reldan, 618, 9; Rob. i. 432, note)
agrees perfectly with that of the modern
el-Birch, which stands at about 10 miles north of

1־יָו, Ain, a living spring, and בֶּאֵר, Beer, an arti-
ificial well, are applied to the same thing.
Jerusalem by the great road to Nablus, just below a ridge which bounds the prospect northwards from the Holy city (Rok. i. 461, 2). The mention of Beeroth beyond those quoted above is found in the Bible, but one link connecting it with the N. T. has been suggested, and indeed embodied in the traditions of Palestine, which we may well wish to regard as true, namely, that it was the place at which the parents of "the child Jesus" discovered that he was not among their "company" (Luke ii. 43-45). At any rate the spring of Beerath is even to this day the customary resting-place for caravans going northward, at the end of the day's journey from Jerusalem (Stanley, 213: Lord Nuggent, ii. 112: Schubert in Winter, s. e.).

Besides Rimmon, the father of Zachan and Rechab, the murderers of Ishshoboth (2 Sam. iv. 2, 5), we find Nahar "the Beerothite" (1 Sam. xi. 11), or "the Beerothite" (1 Sam. vii. 2: Beth-elder: [Alex. Bēthaida].) 2 Sam. xxiii. 37, or "the Beerothite" (1 Sam. vii. 2: Bēth-elder: [Alex. Bēthaida].) 1 Chr. xi. 39, one of the "mighty men" of David's guard.

As liable to less modification from the Samaritans, especially when the object of going to Jerusalem was to keep the festivals (comp. Luke ix. 53), it may be presumed that the Galilean caravans would usually take the longer route through Peraea; and hence in returning they would be likely to make the first day's halt near the eastern foot of the Mount of Olives (about 2 miles). It is not customary in the East to travel more than 1 or 2 hours a day; and in this instance they would encamp earlier still, because to go further would have been to encounter the night-perils of the desert between Jerusalem and Jericho. The sasokia (Luke ii. 44) shows that the holy family travelled in a caravan. Books of travel abundantly illustrate this custom as to the extent of the first day's journey. See, for example, Maunder's Journey from Aleppo to Jerusalem (1837) p. 1; Richardson's Travels along the Mediterranean, ii. 174; Beldam's Recollections of Scenes in the East, i. 281; Miss Martineau's Eastern Life, ii. 194; Barckhardt's Residenz in Syrien, i. 111.a It is not surprising, under such circumstances, that Jesus was not missed till the close of this first brief day. The time to Beeroth (Birch) would be greater, but not so great as to make the separation a cause of anxiety to the parents; and so much the less, as one of the objects of stopping so soon was to see whether the party was complete — whether all had arrived at the place of rendezvous. On this incident, see Life of our Lord, by Mr. Andrews, p. 193.

BEEROTH OF THE CHILDREN OF JAAKAN (בֵּרוֹת תֵּל עֲבָדָם: Bīroth 'āḇādām 'lākōn; [Vat.] Ale. 'āḇādām): Beereth, or Beerath, the well of the family of the genealogy, which formed one of the halting-places of the Israelites in the desert (Deut. i. 6). In the lists in Num. xxxiii., the name is given as Bēth-Ja'akan only.

BEER-SHEBA (בֵּרוֹת-שֵׁבָא),

well of sowing, or of seven: φεραίρ ὠρχείμοις, and φεραίρ τοῦ ὄρχου, in Genesis: Βεροσθηβαί in Joseph and later books: Βεροσηβαίi in ancient, and Βεροσαθίων in Ἐφεσος of Ἰερουσαλήμ, the name of one of the oldest places in Palestine, and which formed, according to the well-known expression, the southern limit of the country.

There are two accounts of the origin of the name. 1. According to the first, the well was dug by Abraham, and the name given, because there he and Abimelech the king of the Philistines "swore" (20:22) both of them (Gen. xxvi. 31). But the compact was ratified by the setting apart of "seven ewe lambs;" and as the Hebrew word for "seven" is שֵׁבָא, Shaba, it is equally possible that this is the meaning of the name. It should not be overlooked that here, and in subsequent earlier notices of the place, it is spelt Beer-s赛道 (בֵּרוֹת שֵׁבָא). 2. The other narrative ascribes the origin [or re-affirmation] of the name to an occurrence almost precisely similar, in which both Abimelech the king of the Philistines, and Phichol his chief captain, are again concerned, with the difference that the person on the Hebrew side of the transaction is Isaac instead of Abraham (Gen. xxvi. 31-33). Here there is no reference to the "seven" lambs, and we are left to infer the derivation of Shilheh (שִׁלְחֵה, not "Sheba," as in the A. V.) from the mention of the "swearing" (שֵׁבָא) in ver. 31.

If we accept the statement of verse 18 as referring to the same well as the former account, we shall be spared the necessity of inquiring whether these two accounts relate to separate occurrences, or refer to one and the same event, at one time ascribed to one, at another time to another of the early heroes and founders of the nation. There are at present on the spot two principal wells, and five smaller ones. They are among the first objects encountered on the entrance into Palestine from the south, and being highly characteristic of the life of the 13th, at the same time that the identity of the site is beyond all question, the wells of Beer-sheba never fail to call forth the enthusiasm of the traveler.

The two principal wells — apparently the only ones seen by Robinson are on or close to the northern spur of the Ἱφύλος ἐς-Σερ', they lie just a hundred yards apart, and are so placed as to be visible from a considerable distance (Boman, Land of Prom. 1). The larger of the two, which lies to the east, is, according to the careful measurements of Dr. Robinson, 12 feet diam., and at the time of his visit (Apr. 12) was 44 feet to the surface of the water: the masonry which incloses the well reaches downward for 28 feet. The other well is 9 feet diam., and was 42 feet to the water. The curvi-stones round the mouth of both wells are worn into deep grooves by the action of the ropes of so many centuries, and "look as if frilled or fluted all round." Round the larger well there are nine, and round the smaller five large stone troughs — some much worn and broken, others nearly entire, lying at a distance of 10 or 12 feet from the edge of the well. There were formerly ten of these troughs at the larger well. The circle

---

a Dr. Frieder. Strauss in his Helen's Wallfahrten nach Jerusalem (1863) with the account of a later visit to the spot where the act of sowing was made, makes the first day's journey of the pilgrims but 14 hour, after starting from Alexandria on their march.
around is carpeted with a sward of fine short grass
with cresses and lilies (Bonar, 5, 6, 7). The
water is excellent, the best, as Dr. R. emphatically
records, which he had tasted since leaving Sennai.

The five lesser wells—apparently the only ones
seen by Van de Velde—are according to his account
and the casual notice of Bonar, in a group in the
bed of the wady, not on its north bank, and at so
great a distance from the other two that the latter
were missed by Lieut. V.

On some low hills north of the large wells are scat-
tered the foundations and ruins of a town of moder-
ate size. There are no trees or shrubs near the spot.
So much for the actual condition of Beer-sheba.

After the digging of the well Abraham planted
a "grove" (אשת) as a place for the wor-
ship of Jehovah, and here he lived until the sacrifice
of Isaac, and for a long time afterwards, xxi. 23—
xxii. 1, 19. Here also Isaac was dwelling at the
time of the transfERENCE of the birthright from
EsaU to Jacob (xxvi. 33, xxviii. 10), and from the pa-
triarchal encampment round the wells of his grand-
father, Jacob set forth on the journey to Mesopo-
tamia which changed the course of his whole life.
Jacob does not appear to have revisited the place
until he made it one of the stages of his journey
down to Egypt. He then halted there to offer sacri-
fice to "the God of his father," doubtless
under the sacred grove of Abraham.

From this time till the conquest of the country
we lose sight of B., only to catch a momentary glimpse of it in the lists of the "cities" in the ex-
trmang south of Judah (Josh. xv. 28) given to the
tribe of Simeon (xix. 2: 1 Chr. iv. 28). Samuel's
sons were judges in Beer-sheba (1 Sam. viii. 2), its
distance no doubt precluding its being among the
number of the "holy cities" (LXX. τόν ἤγαγεν- poiv τών) to which he himself went in circuit
every year (vii. 16). By the times of the monarchy
it had become recognized as the most southerly
place of the country. Its position as the place of
arrival and departure for the caravans trading be-
tween Palestine and the countries lying in that
direction would naturally lead to the formation of
a town round the wells of the patriarchs, and the
great Egyptian trade begun by Solomon must have
increased its importance. Hither Job's census
continued (2 Sam. xxiv. 7: 1 Chr. xxi. 2), and here
Eljah bade farewell to his confidential servant
(רֹמָל) before taking his journey across the
desert to Sinai (1 K. xix. 3). From Dan to Beer-
sheba (Judg. xx. 1, &c.), or from Beer-sheba to Dan
(1 Chr. xxi. 2: comp. 2 Sam. xxiv. 2), now became
the established formula for the whole of the promis-
eland; just as "from Geba to B." (2 K. xxiii.
8), or "from B. to Mount Ephraim" (2 Chr. xix.
4) was that for the southern kingdom after the
disruption. After the return from the Captivity
the formula is narrowed still more, and becomes
"from B. to the Valley of Heimon" (Neh. xi. 30).

One of the wives of Abahazah, king of Judah,
Zibiah mother of Josaph, was a native of Beer-sheba
(2 K. xii. 1: 2 Chr. xxiv. 1). From the incidental
references of Amos, we find that, like Bethel and
Gilgal, the place was at this time the seat of an
idolatrous worship, apparently connected in some
intimate manner with the northern kingdom (Am.
v. 5, viii. 16). But the allusions are so slight that
nothing can be gathered from them, except that in
the latter of the two passages quoted above we have
perhaps preserved a form of words or an adjuration
used by the worshippers, * Live the 'way' of Beer-
sheba!" After this, with the mere mention that
Beer-sheba and the villages round it ("daughters")
were re-inhabited after the Captivity (Neh. xi. 30).
the name dies entirely out of the Biblical records; like
many other places, its associations are entirely con-
fined to the earlier history, and its name is not ever

But though unheard of, its position insured a
continued existence to Beer-sheba. In the time of
Jerome it was still a considerable place (opptibus. Ques.
ad Gen. xxii. 30; or ricus praves, Onom.), the station of a Roman presiederium; and (latter is
mentioned in some of the ecclesiastical lists as an
ecclesiastical city under the Bishop of Jerusalem (Re-
land, p. 620). Its present condition has been already
described. It only remains to notice that the place
retains its ancient name as nearly similar in sound
as an Arabic signification will permit—Beer-es-Schâ-
the "well of the lion," or "of seven." G.

BEESHTERAH (פֶּסְתֶּרָה) — ß Borodâ, Alex. Beeraga; [Comp. Abd. Beersheba.] Borosat,
one of the two cities allotted to the sons of Gerahom,
out of the tribe of Manasseh beyond Jordan (Josh.
xxi. 27). By comparison with the parallel list in
1 Chr. vi. 71. Beeshterah appears to be identical with
Ashtaroth. In fact the name is considered by Gesenius as merely a contracted form of Beth-
Ashtoroth, the house of A. (Thes. 196; comp.
175). [Boson.] G.

BEETLE. See Chargel (ץנָר), s. v. Locust.

BEHEADING. [Punishments.]

BEHEMOTH (בֵּהוֹמֹת) — בֵּה-הוֹמֹת. This word has long been considered one of the dubious exxvota of critics and commentators,
some of whom, as Vatilius, Drusius, Grotius (Crit.
Soc. Annal. ad Job. xl.), Pfeiffer (Dubia exxvota S.
292), A. Schultens (Comment. in Job xlv.), Michau-
is (Suppl. ad Lex. Heb. xii. 238), have under-
stood it as the name of the elephant; while others, as Be-
chart (Hieroz. iii. 705), Landolf (Hieroz. i.
11), Shaw (Trav. ii. 299, Svo. Long.), Scheuler-
ch (Phys. Soc. on Job xl.), Rosenmuller (Not. on
Bochart. Hieroz. iii. 705, and Schol. ad Vel. Test.
in Job xl.), Taylor (Appendix to Calmet's Dict.
Bibl. No. lv.), Harmer (Observations, ii. 319),
the p'aral majestatis of רֹמָל, Rosenmuller's ob-
jection to the Coptic origin of the word is worthy of
observation,—that, if this was the case, the LXX.
interpreters would not have given ἐφαγός as its repre-
sentative.

Michaelis translates רֹמָל by jumenta, and
thinks the name of the elephant has dropped out
"Mili videitur nomen elephantis forte ἐφαγός excidisse."
Gesenius (Thes. s. v. בֵּיתְו), Fürst (Concord. Heb. s. v.), and English commentators generally, believe the hippopotamus to be denoted by the original word. Other critics, amongst whom is Lee (Comment. on Job xli. and Lex. Heb. s. v. בִּיתוֹ), consider the Hebrew term as a plural noun for "cattle" in general; it being left to the reader to apply to the Scriptural allusions the particular animal, which may be, according to Lee, "either the horse or wild ass or wild bull."[174] a Compare also Leake, Conjectures in Job, p. 167. Dr. Mason Good (Book of Job literally translated, p. 473, Lond. 1712) has hazarded a conjecture that the behemoth denotes some extinct pachyderm like the mammoth, with a view to combine the characteristics of the hippopotamus and elephant, and so to fulfil all the Scriptural demands; compare with this Michaelis (Sup. ad Lex. Heb. No. 268), and Haserus in Dissertat. Syllag. No. vii. § 37 and § 38, p. 506, who rejects with some scorn the notion of the identity of behemoth and mammoth. Dr. Kittle (Picv. Dib. Job xl.) and C. E. Hamilton Smith (Kitt's Cyc. Heb. Lit., art. Behemoth,) from being unable to make all the Scriptural details correspond with any one particular animal, are of opinion that behemoth is a plural term, and is to be taken as a poetical personification of the great pachyderms generally, wherein the idea of hippopotamus is predominant. The term behemoth would thus be the counterpart of leviathan, the animal mentioned next in the book of Job; which word, although its signification in that passage is restricted to the crocodile, does yet stand in Scripture for a python, or a whale, or some other huge monster of the deep. [Leviticus.] We were at one time inclined to coincide with this view, but a careful study of the whole passage (Job xl. 16-24) has led us to the full conviction that the hippopotamus above is the animal denoted, and that all the details descriptive of the behemoth are not entirely with the ascertained habits of that animal. Gesenius and Lenzmüller have remarked that, since in the first part of Jehovah's discourse (Job xxxviii., xxxix.) land animals and birds are mentioned, it suits the general purpose of that discourse better to suppose that movile or amphibious creatures are spoken of in the first half of it, and that since the land animals and birds are present, denotes the crocodile, the behemoth seems clearly to point to the hippopotamus, his associate in the Nile. Harmer (Observ. ii. 319) says. "There is a great deal of beauty in the ranging the description of the behemoth and the leviathan, for in the Mosaic pavement the people of an Egyptian barque are represented as darting spears or some such weapons at one of the river-horses, as another of them is pictured with two sticks near his shoulders. . . ." It was then a customary thing with the old Egyptians thus to attack these animals (see also Wilkinson, Anc. Egypt. iii. 71); if so, how beautiful is the arrangement: there is a most happy gradation; after a general but just representation of the terribleness of the river-horse, the Almighty is represented as going on with his expostulations something after this manner: "— But dreadful as this animal is, barbed irons and spears have some times prevailed against him; but what wilt thou do with the crocodile? Canst thou fill his skin with barbed irons?" &c., &c. In the Littorinum Provo stamin, to which Mr. Harmer refers, there are two crooks, associates of three river-horses, which are represented without spears sticking in them, though they seem to be within shot.

It has been said that some parts of the description in Job cannot apply to the hippopotamus: the 20th verse for instance, where it is said, "the mountains bring him forth food." This passage, many writers say, suits the elephant well, but cannot be applied to the hippopotamus, which is never seen on mountains. Again, the 21st verse—"his nose pierceth through mists"—seems to be spoken of the trunk of the elephant, with its extraordinary delicacy of scent and touch, rather than to the obtuse perceptions of the river-horse. In answer to the first objection it has been stated, with great reason, that the word hârim (תִּירָמ) is not necessarily to be restricted to what we understand commonly by the expression "mountains." In the Prenestine pavement alluded to above, there are to be seen here and there, as Mr. Harmer has observed, "hilllocks rising above the water." In Ez. xiii. 15 (margin), the altar of God, only ten cubits high and fourteen square, is called "the mountain of God." The eminences of Egypt, which afford the point of the Nile decreases, may undoubtedly be called mountains in the poetical language of Job." But we think there is no occasion for so restricted an explanation. The hippopotamus, as is well known, frequently leaves the water and the river's bank as night approaches, and makes inaudible excursions for the sake of the pasturage, when he comfits and work among the growing crops (Hassabpâsh, Proor. p. 188). No doubt he might often be observed on the hill-sides near the water, and frequented by him. Again, it must be remembered that the "mountains" are mentioned by way of contrast to the natural habits of aquatic animals generally, which never go far from the water and the banks of the river: but the behemoth, though passing much of his time in the water and in "the covert of the reed and fen," catch grass like cattle, and leaveth on the hill-sides in compass with the hills: he is therefore not a mountain; there is much beauty in the passages which contrast the habits of the hippopotamus, an amphibious animal, to ours. He is a recent traveller in Egypt, the Rev. J. L. Erring-
BEHEMOTH
with those of herbivorous land-quadrapeds: but if the elephant is to be understood, the whole description is comparatively speaking tame.

With respect to the second objection, there is little doubt that the marginal reading is nearer the Hebrew than that of the text. "Will any take him in his sight, or bore his nose with a gin?"

Perhaps this refers to leading him about alive with a ring in his nose, as, says Rosenmüller, "the Arabs are accustomed to lead camels," and we may add the English to lead bulls, "with a ring passed through the nostrils." The expression in verse 17, "he bendeth his tail like a cedar," has given occasion to much discussion; some of the advocates for the elephant maintain that the word אֶלֶף (‘êlêf) may denote either extremity, and that here the elephant’s trunk is intended. The parallelism, however, clearly requires the posterior appendage to be signified by the term. The expression seems to allude to the stiff, unbranching nature of the animal’s tail, which in this respect is compared to the trunk of a strong cedar which the wind scarcely moves.

The description of the animal’s lyeing under "the shady trees amongst the reeds," and willows, is peculiarly applicable to the hippopotamus. It has been argued that such a description is equally applicable to the elephant; but this is hardly the case, for though the elephant is fond of frequent ablations, and is frequently seen near water, yet the constant habit of the hippopotamus, as implied in verses 21, 22, seems to be especially made the subject to which the attention is directed. The whole passage (Job, xl. 15–24) may be thus literally translated: --

"Behold now beemoth, whom I made with thee; he eateth grass like cattle. Behold now, his strength is in his bones, and his power in the palace of his belly. He benteth his tail like a cedar; the sinews of his thighs interweave one with another. His bones are as tubes of copper; his (solid) bones such one as a bar of forged iron. He is (one of) the chief of the works of God; his Maker hath furnished him with his teeth (tooths)."

"For the hills bring forth abundant food, and all the beasts of the field have their pasture there. Beneath the shady trees he lieth down, in the covert of the reed, and fences."

"The shady trees cover him with their shadow; the willows of the stream surround him. "Lo! the river avails proudly against him, yet he is not alarmed: he is securely confident though a Jordan burst forth against his mouth."

"Will any one capture him when in his sight? will any one bore his nostril in the snare?"

to some authorities is another name for the "sidr," the lotus of the ancient "lotophagi," *Zeycophus* lotan. It would appear, however, from Abulfedâ, cited by Celsius (Herb., ii. 19), that the *Dik* is a species distinct from the *Sidr*, which latter plant was also known by the names *Salam* and *Nobk*. Sprengel identifies the *Dik* with the Jujube-tree (*Zeycophus vulgaris*). But even if it were proved that the *sidr* and the *Dik* were identical, the explanation of the *sidr* by Freytag, "Arbor quae remota..." would not warrant us in associating the tree with the reeds and willows of the Nile. The fact is, the plants are not in order that he may eat the grass of the hills.

A. Schultens, following the Arabic writers *Saidia* and *Abuwalid*, was the first European commentator to propose the "lotus-tree" as the identification of the Hebrew בֵּית רֶךֶּב (bîêt rēchèb), which occurs only in this and the following verse of Job. He identifies the *Hebrew word* with the Arabic جَلْدَة, which regarding...
This description agrees in every particular with the hippopotamus, which we fully believe to be the representative of the behemoth of Scripture.

According to the Talmud, Behemoth is some huge land-animal which daily consumes the grass of a thousand hills; he is to have at some future period a battle with Leviathan. On account of his grazing on the mountains, he is called "the bull of the high mountains." (See Lewysohn, Zool. des Talmud, p. 355.) "The 'fathers,' for the most part," says Cary (Job, p. 492) "surrounded the object with an awe equally dreadful, and in the behemoth here, and in the leviathan of the next chapter, saw nothing but mystical representations of the devil; others again have here pictured to themselves some hieroglyphic monster that has no real existence; but these wild imaginations are surpassed by that of Bolderius, who in the behemoth actually beholds Christ!"

The skin of the hippopotamus is cut into whips by the Dutch colonists of S. Africa, and the monuments of Egypt testify that a similar use was made of the skin by the ancient Egyptians (Anc. Egypt. ii. 73). The inhabitants of S. Africa hold the flesh of the hippopotamus in high esteem; it is said to be not unlike pork.

The hippopotamus belongs to the order Pachydermata, class Mammalia.

Chase of the Hippopotamus. (Wilkinson.)

Bela.

Bel.[Baal.]

Bel and Dragon. [Daniel, Apocryphal Additions to.]

BELA (Behemoth). Belah, and Baalé, and Balak, Gen. xiv. 2. 8: Behemoth; a swallowing up, or destruction. In the Liber Nov. Belah, in St. Jerome's works, tom. ii., it is corrected to Σαλαθ, in the Cod. Reg.; but in the Cod. Colbert, it is written Bala, and interpreted καρποτοράδως (see Ps. iv. (Lxx.) 9, Sept.). Jerome appears to confound it with εὐδρος, where he renders it "habens sive deorum," and with πελάς, where he says, "quem habet sive inverterat." 1.

1. [Balaä: Bela.] One of the five cities of the plain which was spared at the destruction of Lot, and received the name of Zoar (בֵּיאָר b'ær), smallness,

2. Bela is also the LXX's version of Bera, Gen. iv. 2.
BELA

abruptly fancied an allusion to its destruction by three earthquakes (Jerome, Quest. Heb. in Gen. xiv.). There is nothing improbable in itself in the supposed allusion to the swallowing up of the city by an earthquake, which ד"הינָּה" exactly expresses (Num. xvi. 30); but the repeated occurrence of ד"הינָּה", and words compounded with it, as names of men, rather favors the notion of the city having been called בֵּית from the name of its founder. This is rendered yet more probable by בֵּית being the name of an Edomitic king in Gen. xxxvi. 32.

For further information see De Sauley’s Narratives, i. 457-481, and Stanley’s S. of P. 285. [Zohar.]

2. [בֵּיתדֶה: בֵּית, בְּדֶה in 1 Chr.] Son of Beor, who reigned over Edom in the city of Dinhabah, eight generations before Saul, king of Israel, or about the time of the Exodus. Bernard Hyle, following some Jewish commentators (Simon. Quenard. 142, note), identifies this Beza with Balaam the son of Beor; but the evidence from the name does not seem to prove more than identity of family and race. There is nothing whatever to guide us as to the age of Beor, or Bosor, the founder of the house from which Bala and Balaam sprung. As regards the name of Bala’s royal or native city Dinhabah, which Fürst and Gesenius render “place of plunder,” it may be suggested whether it may not possibly be a form of דִּינְָּה, the Chaldean for gold, after the analogy of the frequent Chaldean resolution of the dagesh forte into nun. There are several names of places and persons in Idumea which point to gold. There was, for example, a river there — the HIZAHER. Deut. i. 13 — “place of gold;” МИЗАХЪ, “waters of gold;” or “gold-streams,” Gen. xxxvi. 39. Compare Dehelia, the ancient name of the Tiber, famous for its yellow waters. If this derivation for Dinhabah be true, its Chaldean form would not be difficult to account for, and would supply an additional evidence of the ancient conquests of the Chaldeans in the direction of Idumea. The name of Bala’s ancestor Beor, ד"א דא, is of a decidedly Chaldean or Aramaean form, like Peer ד"אָא, Pethor ד"אָא, Rehob ד"אָא, and others; and we are expressly told that Balaam the son of Beor dwelt in Pethor, which is by the river of the land of the children of his people, i. e. the river Euphrates; and he himself describes his home as being in Aram (Num. xxii. 5, xxiii. 7). Saul again, who reigned over Edom after Samlah, came from Rehoboth by the river Euphrates (Gen. xxxvi. 37). We read in Job’s time of the Chaldeans making incursions into the land of Uz, and carrying off the cattle, and slaying Job’s servants (Job i. 17). In the time of Abraham we have the king of Shinar apparently extending his empire so as to make the kings on the borders of the Dead Sea his tributaries, and with his confederates extending his conquests into the very country which was afterwards the land of Edom (Gen. xiv. 6). Putting all this together, we may conclude with some confidence that Bala the son of Beor, who reigned over Edom, was a Chaldaean by birth, and reigned in Edom by conquest. He may have been contemporaneous with Moses and Balaam. Hadad, of which name there were two kings (Gen. xxxvi. 35, 39), is probably another instance of an Aramaean king of Edom, as we find the name Benhadad as that of the kings of Syria, or Aram, in later history (1 K. xx.). Compare also the name of Hadad-ezer, king of Zobah, in the neighborhood of the Euphrates (2 Sam. viii. 5, &c.). The passage Gen. xxxvi. 31-39, is given in duplicate 1 Chr. i. 49-52.

3. [בֵּיתדֶה: בֵּית, בְּדֶה, etc.: בֵּיתדֶה.] Eldest son of Benjamin, according to Gen. xvi. 21, Num. xxxvi. 38, 1 Chr. vii. 8, viii. 1, and head of the family of the Belaites. The houses of his family, according to 1 Chr. vii. 3-5, were Aadder, Gara, Abalah, (read Aedol) ד"הינָּה, for ד"הינָּה, Abilshu, Naaman, Aroah, Shupham, and Hiram. Of these Edom is the most remarkable. The exploit of Edom the son of Gera, who shared the peculiarity of so many of his Benjaminite brethren, in being left-handed (Judg. xx. 16), in saying Eglon the king of Moab, and delivering Israel from the Moabish yoke, is related at length Judg. iii. 14-30. The greatness of the victory subsequently obtained may be measured by the length of the rest of 80 years which followed. It is perhaps worth noticing that as we have Husam in the side of Bela among the kings of Edom, Gen. xxxvi. 34, so also by the side of Bela, son of Benjamin, we have the Benjaminite family of Hushim (1 Chr. vii. 12), sprung apparently from a foreign woman of that name, whom a Benjaminite took to wife in the land of Moab (1 Chr. viii. 8-11). [BECHELE.]

4. [בֵּיתדֶה: אֵל: בֵּיתדֶה. ] Son of Aroah, a Benameth (1 Chr. v. 8). It is remarkable that his kinsman was “Beliah,” even unto Neba, and Beal-fone, and eastward he inhabited unto the entering in of the wilderness from the river Euphrates” (8, 9).

A. C. H.

BELAH. [BELAH, 3.]

BELAITES, THE ד"הינָּה : בֵּיתדֶה; [Vat. Alex. -אֵל: בֵּיתדֶה. ] Num. xxxvi. 38. [BELA, 8.]

BELÉMUS (בֵּיתֶמֹס: Balaamus), 1 Eadri. ii. 16. [BISHLAM.]

BELIAL. The translators of our A. V., following the Vulgate, have frequently treated the word ד"הינָּה as a proper name, and given it in the form Belial, in accordance with 2 Cor. vi. 15. This is particularly the case where it is connected with the expressions ד"הינָּה, son of, or ד"ה י sinful; in other instances it is translated wicked or some equivalent term (Deut. xv. 9; Ps. xli. 8, etc.); Prov. vi. 12, vii. 27, xix. 23; Nah. i. 1, 15). There can be no question, however, that the word is not to be regarded as a proper name in the O. T.; its meaning is worthless, and hence recklessness, lawlessness. Its etymology is uncertain: the first part ד"ה in- without; the second part has been variously connected with ד"ה, goat, as in the Vulg. (Judg. xix. 22) Belial, id est absque juro, in the sense of unbridled, rebellious; with ד"ה, to ascend, as without ascent, that is, of the lowest condition; and lastly with ד"ה, uselessness = without

In ד"הָבִי, "of the golden city," Is. xiv. 4, the reading is doubtful (Gesen.-in v.).

In ד"הָבִי, "a helper whose calf has been taken from her.

A. V. in V. "Beliab," the ד"ה being rendered by Komp. Shanah [3; HEBRON, 2].
usefulness, that is, good for nothing (Gesen. Thevet. p. 280): the latter appears to be the most probable, not only in regard to sense, but also as explaining the unusual fusion of the two words, the one at the end of the one and at the beginning of the other leading to a crevis, originally in the pronunciation, and afterwards in the writing. The expression *son or son of Bethel* must be understood as meaning simply a worthless, baseless fellow (*vapianos*, LXX.): it occurs frequently in this sense in the historical books (Judg. xix. 22, xx. 13; 1 Sam. i. 16, ii. 12, x. 27, xv. 17, 25, xxx. 22; 2 Sam. xvii. 7, xx. 11; 1 K. xxi. 10; 2 Chr. xiii. 7), and only once in the earlier books (Dent. xiii. 13).

The adj. ἐσθκ is occasionally omitted, as in

1 Sam. xxiii. 6, and Job xxxiv. 18, where ἐσθκειται stands by itself, as a term of reproach. The later Hebrews used *בָּאֶד* and *מָכֶה* in a similar manner (Matt. v. 22): the latter is perhaps the most analogous; in 1 Sam. xxv. 23, Nabai (םַאָבֶה = *m高端*/*m高端*) is described as a man of Bethel, as though the terms were equivalent.

In the N. T. the term appears in the form Βηθελας and not Βηθαλας, as given in the A. V. The change of Α into ρ was common: we have an instance even in Biblical Hebrew בִּתְלָה (Job xxxviii. 32) for בִּתְלָה 2 K. xxii. 5); in Chaldee we meet with יְבָתָל for יְבָתָל, and various other instances; the same change occurred in the Doric dialect (*φανερ* for *φανερ*), with which the Alexandrine writers were most familiar. The term as used in 2 Cor. vi. 15 is generally understood as an appellative of Satan, as the personification of all that was bad; Bengel (*Gnomon in loc.*) explains it of Antiarchis, as most strictly the opposite of Christ (*Gnomon collection autarchi christianorum notae vindicat*. W. L. B.

**BELLOWS** (בָּאֶד : φανερος, LXX.). The word occurs only in Jer. vi. 29. "The bellows are burned;" where their use is to heat a smelting furnace. They were known even in the time of Moses, and perhaps still earlier, since the operations of a foundry would be almost impossible without them. A picture of two different kinds of bellows, both of highly ingenious construction, may be found in Wilkinson, Anc. Egypt. iii. 388. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhausted skin with a string he held in his hand. In one instance we observe from the painting, that when the man left the bellows, they were raised as if inflated with air; and this would imply a knowledge of the valve. The pipes even in the time of Hethnese III., [supposed to be] the contemporary of Moses, appear to have been simply two pipes, tipped with a metal point to resist the action of the fire."

Bellows of an analogous kind were early known to the Greeks and Romans. Homer (H. xviii. 470; speaks of 20 ϕαναρι in the force of Hephaestos, and they are mentioned frequently by ancient authors (*Dict. of Ant.*, art. *Fellis*). Ordinary hand-bellows, made of wood and kid's skin, are used by the modern Egyptians, but are not found in the old paintings. They may however have been known, as they were to the early Greeks.

**BELLS**. There are two words thus translated in the A. V., namely, פָּרָשֶׁת, Ex. xxviii. 33 (from פָּרָשֶׁת, to strike: καθάνας, LXX.), and פָּרָשֶׁת, Zech. xiv. 20 (to ετί των χαλινων του ἵππου, LXX.: A. v., marg. "bridles," from פָּרֶשֶת, to strike).

In Ex. xxviii. 33 the bells alluded to were the golden ones, according to the Rabbinis 72 in number (Winer, s. v. *Schellen*), which alternated with the three-colored pomegranates round the hem of the high-priest's ephod. The object of them was that his sound might be heard when he went in unto the holy place, and when he came out, that he die not." (Ex. xxviii. 35), or "that as he went there might be a sound, and a noise made that might be heard in the temple, for a memorial to the children of his people." (Exclus. xiv. 19). No doubt they answered the same purpose as the bells used by the Brahmins in the Hindu ceremonies, and by the Roman Catholics during the celebration of mass (comp. Luke i. 21). To this day bells are frequently attached, for the sake of their pleasant sound, to the anklets of women. [AXELR.] The little girls of Cairo wear strings of them round their feet (Lane, *Med. Egypt.*, ii. 370, and at Koojar, Mungo Park saw a dance "in which many performers assisted, all of whom were provided with little bells fastened to their legs and arms."

In Zech. xiv. 20 "bells of the horses" (where our marg. "Vers. follows the L.X.X.") is probably a wrong rendering. The Hebrew word is almost the same as פָּרָשֶׁת a pair of cymbal", and as they are supposed to be inscribed with the words "Holiness unto the Lord," it is more probable that they are not bells, but "ornaments or flat pieces of brass, which were sometimes attached to horses for the sake of ornament" (Jahn, *Arch. Refer.* 98). Indeed they were probably the same as the קֹדֶשֶׁת, αυξίων (b. iii. 18; Judg. viii. 21), bande of gold, silver, or brass used as ornaments, and hung by the Arabians round the necks of their camels, as we still see them in England on the harness of horses. They were not only ornamental, but useful, as their tinkling tended to enliven the animals; and in the cavaliers they thus served the purpose of our modern sheep-bells. The comparison to the κοδεστευς used by the Greeks to test horses seems out of place; and hence Archbishop Seeck's explanation of the verse, as meaning that
war-horses would become useless, and their trappingss would be converted to sacred purposes, is untenable. The general meaning, as obvious from the context, is that true religion will then be universally professed.  F. W. F.

BELMAIM (Βελμαίμ). [Vat.] Alex. Belmāim; [Sin. Βελμαίμ]. Comp. Beluānum. A place which, from the terms of the passage, would appear to have been south of Dothan (Jud. vii. 3). Possibly it is the same as Belmen, though whether this is the case, or indeed whether either of them ever had any real existence, it is at present impossible to determine. [Judith.] The name has Abel-meholah.

BELMEN ([Rom. Comp.] Belemi; [Sin.] Alex. Belmāim; [Vat.] Beluānum). An Idg. -mon, a place named amongst the towns of Samaria as king between Beth-horon and Jericho (Jud. iv. 4). The Hebrew name would seem to have been Abel-maim; but the only place of that name in the O. T. was far to the north of the locality here alluded to. [Abel-maim.] The Syriac version has Abel-meholah, which is more correct, and has the context. [Abel-meholah; Belmāim.] G.

BELSHAZAR (βελθαζάρ), Dan. v. 1, and Βελθαςάρ, vii. 1: Belaṭṣār [Alex. Beḷṭraṣṣap in Dan. v. 1: Bélṭuṣ]. the last king of Babylon. According to the well-known scriptural narrative, he was warned of his coming doom by the handwriting on the wall which was interpreted by Daniel, and was slain during a splendid feast in his palace. Similarly Xenoph. (Cyp. vii. 5, 3) tells us that Babylon was taken by Cyrus in the night, while the inhabitants were engaged in feasting and revelry, and that the king was killed. On the other hand the narratives of Berosus in Josephus (c. Apion. i. 20) and of Herodotus (i. 184.4) differ from the above account in some important particulars. Berosus calls the last king of Babylon Nabonnedus or Nabonadius (Nobnūt or Nobounādit, 1. c. Nabo bæsos, or makos praecipuus), and says that in the 17th year of his reign Cyrus took Babylon, the king having retired to the neighboring city of Borsippa or Birsippa (Birs-i-Ninlu), called by Niebuhr (Lect. on Anc. Hist. xii.) the Chaldean Benares, the city in which the Chaldeans had their most revered objects of religion, and where they cultivated their science. Being blockaded in that city, Nabonnedus surrendered, his life was spared, and a principality or estate given to him in Carmania, where he died. According to Herodotus the last king was called Lathynus, a name easy to reconcile with the Nabonnedus of Berosus, and the Nabonadius of Megasthenes (Enn. Perip. Erug. iv. 41). Cyrus, after defeating Lathynus in the open field, appeared before Babylon, within which the besieged defied attack and even blockaded, as they had walls 300 feet high, and 75 feet thick, forming a square of 15 miles to a side, and had stored up previously several years' provision. But he took the city by drawing off for a time the water in the Zab Rapties, and then matching in with his whole army in Nabo-naddus, Nebuchadnezzar's festival, while the people, feeling perfectly secure, were scattered over the whole city in reckless amusement. These discrepancies have hitherto been cleared up by the discoveries of Sir Henry Rawlinson; and the histories of profane writers, far from contradicting the Scriptural narrative, are shown to explain and confirm it. In 1854 he deciphered the inscriptions on some cylinders found in the ruins of Ur (the ancient Ur of the Chaldees), containing memorials of the works executed by Nabonnedus. From these inscriptions it appears that the eldest son of Nabonnedus was called Bel-shar-esser and admitted by his father to a share in the government. This name is composed of Bel (the Babylonian god), Shar (a king), and the same termination as in Nabopolassar, Nebuchadnezzar, &c., and is contracted into Belhazzar, just as Nergilissar (again with the same termination) is formed from Nergal-sharezer. In a communication to the Athenæum, No. 1377, Sir Henry Rawlinson says, "we can now understand how Belshazzar, as joint king with his father, may have been governor of Babylon, when the city was attacked by the combined forces of the Medes and Persians, and may have perished in the assault which followed; while Nabonnedus leading a force to the relief of the place was defeated, and obliged to take refuge in Borsippa, capitulating after a short resistance, and being subsequently assigned, according to Berosus, an honorable retirement in Carmania." In accordance with this view we arrange the last Chaldaean kings as follows:—Nebuchadnezzar, his son Evil-merodach, Nergilissar, Babylon's last king in his own (or Nabonnedus, Nabonadius, and Labynetus, Belshazzar. Herodotus says that Lathynus was the son of Queen Nitocris; and Megasthenes (Enn. Chr. Arb. p. 60) tells us that he succeeded Labornoarochad, but was not of his family. Ναβυνυδοχον ἄποδεεννυοι βασίλεις, προσηνήκτοι αἱ οἰκίαι. In Dan. v. 2, Nebuchadnezzar is called the father of Belshazzar. Of this course need only mean grand-father or ancestor. Now Nergilissar usurped the throne on the murder of Evil-merodach (Beros. op. Joseph. Apion. i.): we may therefore well suppose that on the death of his son Labornoarochad, Nebuchadnezzar's family was restored in the person of Nabonnedus or Lathynus, possibly the son of that king and Nitocris, and father of Belshazzar. The chief objection to this supposition would be that if Nergilissar married Nebuchadnezzar's daughter (Joseph. c. Apion. i. 21) [29, Bidet's ed.), Nabonnedus would then be his son, and not his father. This difficulty is met by the theory of Rawlinson (Herod. Essay viii. § 25), who connects Belshazzar with Nebuchadnezzar through his mother, thinking it probable that Naba-nahit, whom he does not consider related to Nebuchadnezzar, would strengthen his position by marryin the daughter of that king, who would thus be Belhazzar's maternal grandfather. A totally different view is taken by Marcus Niebuhr (Geographie Assyrius, Vi. Bibl. von Phil., p. 91), who considers Belshazzar to be another name for Evil-merodach, the son of Nebuchadnezzar. He identifies their characters by comparing Dan. v. with the language of Berosus about Evil-merodach, προστάς τῶν πρωτατόν ἀνδρῶν καὶ ἄγγελων. He considers that the capture of Babylon described in Daniel, was not by the Persians, but by the Medes, under Astyages (c. Apion. i. 21), during the reigns of Evil-merodach or Belshazzar, and Nergilissar, we must insert a brief period during which Babylon was subject to the Medes. This solves a difficulty as to the age of Darius (Dan. v. 31; cf. Rawlinson, Essay iii § 11), but most people will probably prefer the actual facts discovered by Sir Henry Rawlinson to the theory (though doubtless
BELTESHAZZAR. [Daniel—]

BEN (סְנֶ [son]: LXX omits: Ben), a Levite of the second degree," one of the porters appointed by David to the service of the ark (1 Chr. xv. 18).

BENAIATH [3 syll. (בְּנַיַּאָת)] = built by Jah: [Baraiah: Bawetin], the name of several Israelites:

1. Benaiah: the son of Jehochad the priest (1 Chr. xxvii. 5), and therefore of the tribe of Levi, though a native of Kaleb (2 Sam. xxiii. 20; 1 Chr. xi. 22), in the south ofJudah; set by David (1 Chr. xi. 25) over his body-guard of three hundred and five of the latter, and of Pekahiah (2 Sam. viii. 18; 1 Chr. xviii. 17; 2 Sam. xx. 23) and occupying a middle rank between the first three of the Gilborim, or "mighty men," and the thirty Valliant men of the armies" (2 Sam. xxii. 23, 24; 1 Chr. xi. 25, xxvii. 6; and see Kennicott, Diss. p. 177). The exploits which gave him this rank are narrated in 2 Sam. xxii. 20, 21; 1 Chr. xi. 22. He was captain of the host for the third month (1 Chr. xxvii. 5).

Benaiah remained faithful to Solomon during Adonijah's attempt on the crown (1 K. i. 8, 10), a matter in which he took part in his official capacity as commander of the king's body-guard (1 K. i. 32, 38, 44); and after Adonijah and Joab had both been put to death by his hand, he was raised by Solomon into the place of the latter as commander-in-chief of the whole army (ii. 33, iv. 4). Benaiah appears to have had a son, called after his grandfather, Jehochad, who succeeded Abihud, probably about the person of the king (1 Chr. xxviii. 34). But this is only a copious mistake for "Benaiah the son of Jehochad."

2. [Vat. Alex. om. in 2 Sam.; Vulg. in 2 Sam. and 1 Chr. xi. Bawetin.] Benaiah the Pirathonite: an Ephrinianite, one of David's thirty mighty men (2 Sam. xxiii. 30; 1 Chr. xi. 31), and the captain of the eleventh month course (1 Chr. xxviii. 14).

3. [In 1 Chr. xv. 18, Baraia.] Benaiah: a Levite in the time of David, who "played with a psaltery upon Alamoth" (1 Chr. xv. 18, 20, xvi. 5).

4. [1 Chr. xv. 24, Baraia: Vulg. in Aflat.] Benaiah, a priest in the time of David, appointed to blow the trumpet before the ark (1 Chr. xxiv. 24, xvi. 6).

5. [Vat. om.] Benaiah; a Levite of the sons of Asaph (2 Chr. xx. 14).

6. [Vat. Baraia Baraia.] Benaiah: a Levite in the time of Hezekiah, one of the "oversers of offerings" (2 Chr. xxxii. 13).

7. [Vat. om.; Alex. Baraia: Bawetin.] Benaiah: one of the "princes" (טְנַסְנֵי) of the families of Simeon (1 Chr. iv. 36).

8. Benaiah: four tyburns in the time of Ezra who had taken strange wives. [Baraiah: Vulg. 1, Bawetin; 3, Bawetin; 4, Bawetin.] 1 (Ezr. x. 25). [Bawetin.] 2 (Ezr. x. 30). [Nabata.] 3 (Ezr. i. 35), and 4 (x. 43). [Bawetin.]

BEN-AMMI ('בֶּנְיָמִי, "son of my kindred," the son of the younger daughter of Lot, and the progenitor of the Ammonites (Gen. xix. 38). The reading of the LXX. and Vulgate differs from the Hebrew text by inserting the name of Ammon as well as the exclamation which originated it: καὶ ἔκαθεν θ' ἐνομί αὐτοῦ Ἀμμών ἀπὸ τοῦ γένους μου [Alex. Ἀμμών ο ἁγος τον γεων μου]. Ammon, id est filius puellae mei."

BEN-E-BERAK (בֵּנְיָא בֵּרָק "sons of lightnings or of Barok: [Bavaia] Bawetan: Alex. Bawatuan: or Bawatian: [Sam.] Bawetian, one of the cities of the tribe of Dan, mentioned only in Josh. xvi. 45. The paucity of information which we possess regarding this tribe (omitted entirely from the lists in 1 Chr. ii. viii., and only one family mentioned in Num. xxvii.) makes it impossible to say whether the "sons of Berak" who gave their name to this place belonged to Dan, or were, as we may perhaps infer from the name, earlier settlers displaced by the tribe. The reading of the Syrian, Baal-debac, is not confirmed by any other version. By Eusebius the name is divided (comp. Vulg., and Bapacal) is said to have been then a village near Atos. No trace has been found of it."

*Knopel (Joum. p. 471) identifies it with Iba Abrok, an hour's distance from el-Yakhdih (Jebed), according to Scholz (Reise, p. 236). A."

BENE-JAAKAN (בֵּנְיָא תָּאָק "children of Jaakan") [pert. pueri; wise, Furst: Baraia: Alex. Bawetan: Benejakan], a tribe who gave their name to certain wells in the desert which formed one of the halting-places of the Israelites on their journey to Canaan. [Bereith Bene-jaakan.] In Num. xxxiii. 31, 32, the name is given in the shortened form of Bene-jaakan. The tribe doubtless derived its name from Jaakan, the son of Ezer, son of Seir the Horite (1 Chr. i. 42), whose name is also given in Genesis as Akan. [Akan: Jaakan.]"

The situation of these wells has not been yet identified. In the time of Eusebius (Onom. Bereth. Adj. Luc., 'Anotia) the spot was shown four miles from Jericho, on the top of a mountain. Robinson suggests the small fountain et-Twigh, at the bottom of the Pass er-Rabiy under Petra, a short distance from the Arabah. The word Bereith, however, suggests not a spring but a group of artificial wells.

In the Targ. Pa. Jon. the name is given in Numbers as Aktha, נִנְיָא תָּאָק. G.

BENE-KEDEM (בֵּנְיָא קֶדֶם, the children [sons of the East]), an appellation given to a people, or to peoples, displacing the end of Palestine. It occurs in the following passages of the O. T.: (1) Gen. xxix. 1, "Jacob came into the land of the people of the East," in which was therefore reckoned Haran. (2) Job i. 3, Job was "the greatest of all the men of the East." [Jon.] (3) Judg. vi. 3, 33, vii. 12, viii. 10. In the first three passages the Bene-Kedem are mentioned together with the Midianites and the Amalekites; and in the fourth the latter peoples to be included in this compound name: "Now Zelah and Zalmona [were] in Karkor, and their hosts with them, about fifteen thousand [men], all that were left of all the hosts of the children of the East." In the events to which these passages of Judges relate, we find a
curious reference to the language spoken by these eastern tribes, which was understood by Gibbon and his servant (or one of them) as they listened to the talk in the camp; and from this it is to be inferred that they spoke a dialect intelligible to an Israelite: an inference bearing on an affinity of race, and thence on the growth of the Semitic languages.

(4.) 1 K. iv. 30, "Solomon's wisdom excelled the wisdom of all the children of the East country."

(5.) Is. xi. 14; Jer. xlix. 28; Ez. xxxv. 4, 10. From the first passage it is difficult to deduce an argument, for the names and their contexts, with their contents, are highly important. In Ezekiel, Amnon is delivered to the "men of the East," and its city Kabbah is prophesied to become "a stable for camels, and the Ammonites a conflagration-place for flocks;" referring, apparently, to the habits of the wandering Arabs; while "palaces" and "dwellings," also mentioned and thus rendered in the A. V., may be better read "camps" and "tents."
The words of Jeremiah are strengthened by the suggestion just mentioned: Concerning Kedar, and concerning Hazor, which Nebuchadrezzar king of Babylon shall smite, thus saith the Lord, Arise ye, go up to Kedar, and spoil the men of the East. Their tents and their flocks they shall take away; they shall take to themselves their curvatas [i. e. tents], and all their vessels, and their camels.

Opinions are divided as to the extension of the application of Bene-Kedem; some (as Rosenmüller and Winer) holding that it came to signify the Arabs generally. From a consideration of the passages above cited, and that which makes mention of the land of Kedem, Gen. xxv. 6 [Ishmael], we think (with Gesenius) that it primarily signified the peoples of the Arabian deserts (east of Palestine and Lower Egypt), and chiefly the tribes of Ishmael and of Keturah, extending perhaps to Mesopotamia and Babylonia (to which we may suppose Kedem to apply in Num. xxvii. 7, as well as in Is. ii. 6); and that it was sometimes applied to the Arabs and of Arabian generally. The positive instance of this latter signification of Kedem occurs in Gen. x. 30, where "Sephar, a mount of the East," is by the common agreement of scholars situated in Southern Arabia [ARABIA SEMPARI].

In the O. T. "בֶּנֶּה-קְדֵּם," with its conjunctive form, seems to be a name of the peoples otherwise called Bene-Kedem, and with the same limitations. The same may be observed of הָֹּפָּאָּאָי in the N. T. (Matt. ii. 1 ft.), בֶּנֶּה-קְדֵּם, בֶּנֶּה-קְדֵּם, בֶּנֶּה-קְדֵּם, בֶּנֶּה-קְדֵּם, בֶּנֶּה-קְדֵּם, (in the passages above referred to), are translated by the LXX. and in the Vulg., and sometimes transcribed (Krezip) by the former; except LXX. in 1 K. iv. 30, and LXX. and Vulg. in Is. ii. 6, where they make Kedem to relate to ancient time. E. S. P.

BENHADAD [more correctly BENJADAD] (בֶּנֶּה-קְדֵּם, son of Hadad; viz. "Bena") Benhadad, the name of three kings of Damascus. Hadad or Hadd was a Syrian god, probably the Sun (Macrobi. Sat. vi. 23), still worshipped at Damascus in the time of Josephus (Ant. iv. 4, 6), and from it several Syrian names are derived, as Hadadezer, etc. Hadad or Hadad has helped. The "son of Hadad," therefore, means worshipper of Hadad. Damascus, after having been taken by David (2 Sam. viii. 5, 6), was delivered from subjection to his successor by Rezon (1 K. xi. 24), who "was an adversary to Israel all the days of Solomon."

BENHADAD I was either a son or grandson to Rezon, and in his time Damascus was supreme in Syria, the various smaller kingdoms which surrounded it being gradually absorbed into its territory. Benhadad must have been an energetic and powerful sovereign, and his alliance was coveted both by Baasha of Israel and Asa of Judah. He finally closed with the latter on receiving a large amount of treasure, and conquered a great part of the N. of Israel, thereby enhancing Asa to pay the tribute due to his victorious operations in the S. From 1 K. xx. 34, it would appear that he continued to make war upon Israel in Omri's time, and forced him to make "streets" in Samaria for Syrian residents. [Ahab.] This date is B. C. 850.

BENHADAD II, son of the preceding, and also king of Damascus. Some authors call him grand-son, on the ground that it was unusual in antiquity for the son to inherit the father's name. But Benhadad seems to have been a religious title of the Syrian kings, as we see by its reappearance as the name of Hazael's son, Benhadad III. Long wars with Israel characterized the reign of Benhadad II., of which the earlier campaigns are described under Ahab. His power and the extent of his dominion are proved by the thirty-two vassal kings who accompanied him to his first siege of Samaria. Some time after the death of Ahab, probably owing to the difficulties in which Jehoram of Israel was involved by the rebellion of Moab, Benhadad renewed the war with Israel, and after some minor attempts which were frustrated by Elisha, attacked Samaria a second time, and pressed the siege so closely that there was a terrible famine in the city, and atrocities were committed to get food no less revolting than those which Josephus relates of the siege of Jerusalem by Titus. But while the Syrians were on the very point of success, they suddenly broke up in the night in consequence of a sudden panic, under which they fancied that assistance was coming to Israel from Egypt or some Cannaanitish cities as Tyre or Ramoth. Jehoram seems to have followed up this unhoped-for deliverance by successful offensive operations, since we find from 2 K. ix. 1 that Ramoth in Gilead was once more an Israelitish town. [Ahab.] Soon after Benhadad fell sick, and sent his chief officers, with various presents, to consult Elisha, who happened to be in Damascus, as to the issue of his malady. Elisha replied that the sickness was not a mortal one, but that still he would certainly die, and he announced to Hazael that he would be his successor, with tears at the thought of the misery which he would bring on Israel. On the day after Hazael's return Benhadad was murdered, but not, as is commonly thought from a cursory reading of 2 K. xvii. 15, by Hazael. Such a supposition is hardly consistent with Hazael's character, who would involve Elisha in the guilt of having suggested the deed, and the introduction of Hazael's name in the latter clause of ver. 15 can scarcely be accounted for, if he is also the subject of the first clause. Ewald, from the Hebrew text and a general consideration of the chapter (Gesch. des V. v. l. 323, note), thinks that one or more of Benhadad's own servants were the murderers: Calmet (Hist. of the Bible, p. 357, v. 7) believes that the eldest of them, which caused his death, was intended to effect his cure. This view he supports by a reference to Bruce's Travels, iii. 33. Hazael succeeded him perhaps because he had no natural heirs, and with
BEN-HAIL

of the dynasty founded by Rezon. Ben-

nudah's death was about c. 880, and he must

have reigned some 30 years.

BEN-NAN (בְּנֵיהָנָא, son of the host, i. e.

warrior: Ben-hail), one of the "princes" (גְּבָרִים)

whom king Jehoshaphat sent to teach in the cities of

Judah (2 Chr. xvii. 7). The LXX. translates, τοὺς ἵππους τῶν καὶ τοὺς σύνταγματικούς ἰππές αὐτοῦ ἐξεδάρακαν ἐν τῇ πόλει (2 Kind. iii. 27), but the prosperity of Israel began to

reign in the title of his father Jehosh, the son of

Jehohaz. When Benhailah succeeded to the throne of

Hazard, Jehosh, in accordance with a prophecy of the dying Elisha, recovered the cities which Jehohaz had lost to the Syrians, and beat him in Aphek (12 K. xiii. 17) in the plain of

Ebron, where Ahab had already defeated Benhailah II. (1 Kiv.). Jehosh gained two more victories but did not restore the dominion of Israel on the E. of Jordan. This glory was reserved for his

successor. The date of Benhailah III. is c. 810. His misfortunes in war are noticed by Amos i. 4.

G. E. L. C.

BEN-HAIL (בְּנֵיהָיִל, son of the host, i. e.

 creditor: Ben-ha'il), the youngest of the children of

Jacob, the only one of the thirteen (if indeed there were not more; comp. "all his daughters," Gen. xxxvii. 5, xvi. 7), who was born in Palestine. His birth took place on the road between Bethel and Bethhem, a short distance — a length of earth— from the latter, and his mother Rachel died in the act of giving birth to him, naming him with her last breath Ben-oni, "son of my sorrow" (comp. 1 Sam. iv. 19-22). This was by Jacob changed into Benjamin (בְּנֵיהָיִל) (Gen. xxxvii. 16-18).

The name is worthy some attention. From the terms of the story it would appear to be implied that it was bestowed on the child in opposition to the despising, and probably ominous, name given him by his dying mother, and on this assumption it has been interpreted to mean "son of the right hand," i. e. fortunate, dexterous,フェルツ: as if בְּנֵיהָיִל. This interpretation is inserted in the text of the Vulgate and the margin of the A. V. and has the support of Gesenius (Thes. 219). On the other hand the Samaritan Codex gives the name in an altered form as בְּנֵיהָיִל, son of days, i. e. son of boy old age (comp. Gen. xlv. 20), which is adopted by Philo, Aben-Ezra, and others.

Both these interpretations are of comparatively late date, and it is notorious that such explanatory glosses are not only often invented long subsequently to the original record, but are often at variance with the real meaning of that record. The meaning given by Josephus — διὰ τὴν εἰσόδον γενόμενον οἰκονόμου τῇ μητρί (Ant. i. 21, § 3)— is completely different from either of the above. However this may be, the name is not so pointed as to agree with any interpretation founded on "son of" — being בְּנֵיהָיִל, and not בְּנֵיהָיִל. Moreover in the adjetival forms of the word the first syllable is generally suspended, as בְּנֵיהָיִל or בְּנֵיהָיִל, i. e. "sons of Yemini," for sons of Benjamin; יֵעֹּיתס יֵעֹּיתס יֵעֹּיתס, "man of Yemini," for man of Benjamin (1 Sam. ix. 1; Esth. ii. 5); יֵעֹּיתס יֵעֹּיתס, land of Yemini for land of Benjamin (1 Sam. iv. 4), as if the patriarch's name had been originally יֵעֹּיתס, Yamin (comp. Gen. xlii. 10), and that of the tribe Yeminites. These adjetival forms are carefully preserved in the LXX. (In Judg. iii. 15 and 1 Sam. ix. 1 the A.V. reads in the margin "son of Jemini," and "son of a man of Jemini." Until the journeys of Jacob's sons and of Jacob himself into Egypt we hear nothing of Benjamin, and as far as he is concerned those well-known narratives disrobe nothing beyond the very strong allusions entertained towards him by his father and his whole-brother Joseph, and the relation of fond endearment in which he stood, as if a mere darling (comp. Gen. xlv. 20), to the whole of his family. Even the harsh natures of the older patriarchs relaxed towards him. But Benjamin can hardly have been the "lad" which we commonly imagine him to be, for at the time that the patriarchs went down to reside in Egypt, when "every man with his house went with Jacob," only ten sons are ascribed to Benjamin,—a larger number than to any of his brothers,—and two of these, from the plural formation of their names, were themselves apparently families (Gen. xlii. 21). And here, little as it is, closes all we know of the life of the patriarch himself: henceforward the history of Benjamin is the history of the tribe. And up to the time of the entrance on the Promised Land that history is as obscure as it afterwards. We know indeed that shortly after the departure from Egypt it was the smallest tribe but one (Num. i. 36; comp. verse 1), that during the march its position was on the west of the tabernacle with its brother tribes of Ephraim and Manasseh (Num. ii. 18-21). We have the names of the "captain" of the tribe, when it set forth on its long march (Num. ii. 22); of the "ruler" who went up with his fellows to spy out the land (xxvi. 9); the families of which the tribe consisted when it was marshalled at the great halt in the plains of Moab by Jordan-Jericho (Num. xxvi. 38-41, 63), and of the "prince" who was chosen to assist in the division of the land (xxvi. 21). These are indeed preserved to us. But there is nothing to indicate what were the characteristics and behavior of the tribe which sprang from the orphan darling of his father and brothers. No touches of personal biography like those with which

According to other lists, some of these "children" would seem to have been grandchidren (comp. Num. xxvi. 8-11; 1 Chr. vii. 6-11, viii. 1).
ae are favored concerning Ephraim (1 Chr. vii. 20-28); no record of zeal for Jehovih like Levi (Ex. xxxii. 26); no evidence of special bent as in the case of Ephraim (book of Judges xxvii.). The only foreshadowing of the tendencies of the tribe which was to produce Elmd, Saul, and the perpetrating of the deed of Gilgal, is to be found in the prophetic gleam which lighted up the dying Jacob, "Benja-
mun shall ravin as a wolf: in the morning he shall levour the prey, and at night he shall divide the spoil." (Gen. alix. 27.)

The proximity of Benjamin to Ephraim during the march to the Promised Land was maintained in the territories allotted to each. Benjamin lay immediately to the south of Ephraim and between him and Judah. The situation of this territory was highly favorable. It formed almost a parallelogram, of about 20 miles in length by 12 in breadth. Its eastern boundary was the Jordan, and from thence it extended to the wooded district of Kirjath-jearim, a point about eight miles west of Jerusalem, while in the other direction it stretched from the valley of Hinnom, under the "Shoulder of the Jebusite" on the south, to Bethel on the north. Thus Dan intervened between Benjamin and the Philistines, while the communications with the valley of the Jordan were in their own power.

On the south the territory ended abruptly with the steep slopes of the hill of Jerusalem; on the north it melted imperceptibly into the possessions of the friendly Ephraim. The swiftness of this district, hardly larger than the county of Middlesex (Eng.), was, according to the testimony of Josephus, compensated for by the excellence of the land (δα της τινα γεν ἀποτιμητικαϊ, Ant. v. 1). In the degenerate state of modern Palestine few traces remain of this excellence. But other and more enduring natural peculiarities remain, and claim our recognition, rendering this possession one of the most remarkable among those of the tribes.

The general level of this part of Palestine is very high, not less than 2000 feet above the maritime plain of the Mediterranean on the one side, or than 3000 feet above the deep valley of the Jordan on the other, besides which this general level or plateau is surmounted, in the district now under consideration, by a large number of emi-

nences—defined, rounded hills—almost every one of which has borne some part in the history of the tribe. Many of these hills carry the fact of their existence in their names. Gilgon, Gilgal, Gala or Gala, all mean "hill;" Ramah and Ramathanin, "eminence;" Mizpeh, "watch-tower;" while the "ascent of Beth-horon," the "cliff Hinnom," the "pass of Michmash" with its two "feet of rock," all testify to a country eminently broken and hilly.

The special associations which belong to each of these eminences, whether as sanctuary or fortress, many of them arising from the most stirring inci-
dents in the history of the nation, will be best examined under the various separate heads.

a A trace of the pasture lands may be found in the mention of the "hecd" (1 Sam. xl. 5); and possibly other in the names of the towns of Benjamin: as hap-Parah, "the cow;" Zelakh-ha-leph, "the ox-
rib" (Josh. xviii. 23, 28).

b It is perhaps hardly fanciful to ask if we may not account in this way for the curious prevalence among the names of the towns of Benjamin of the titles of tribes. Ha-Avrim, the Avises; Zemaraim, the Ze-
marites; ha-Ofhni, the Ofhnites; Clepher ha-Am-
monul, the village of the Ammonites; ha-Jebusi, the

(2.) No less important than these eminences are the torrent beds and ravines by which the upper country breaks down into the deep tracts on each side of it (Book of Judges, xxvii.). The only mode of access from either the plains of Philis-
tia and of Sharon on the west, or the deep valley of the Jordan on the east— the latter steep and precipitous in the extreme, the former more gradual in their declivity. Up these western passes swarmed the Philistines on their incursions during the times of Samuel and of Saul, driving the first king of Israel right over the higher district of his own tribe to Gilgal in the last recesses of the Ar扒lah, and establishing themselves over the face of the country from Michmash to Ayalon. Down these same defiles they were driven by Saul after Jonathan's victorious exploit, just as in earlier times Joshua had chased the Canaanites down the long hill of Beth-horon, and as centuries after the forces of Syria were chased by Judas Maccabaeus (1 Macc. iii. 16-24).

The passes on the eastern side are of a much more difficult and intricate character than those on the western. The principal one, which, now unfrequented, was doubtful in ancient times the main ascent to the interior, leaves the Arabah behind the site of Jericho, and breaking through the barren hills with many a wild bend and steep slope, extends to and indeed beyond the very central ridge of the table-land of Benjamin, to the foot of the eminence on which stand the ruins of Birch, the ancient Beeroth. At its lower part this valley bears the name of Wady Fiwar, but for the greater part of its length it is called Wady Saeudinit; It is the main access, and from its central ravine branch out side valleys, conducting to Bethel, Michmash, Gilgal, Anathoth, and other towns.

After the fall of Jericho this ravine must have stood open to the victorious Israelites, as their natural inlet to the country. At its lower end must have taken place the repulse and subsequent victory of Ai, with the conviction and stoning of Achan, and through it Joshua doubtless hastened to the relief of the Gileonites, and to his memora-
ble pursuit of the Canaanites down the pass of Beth-horon, on the other side of the territory of Benjamin.

Another of these passes is that which since the time of our Saviour has been the regular road between Jericho and Jerusalem, the scene of the parable of the Good Samaritan.

Others lie further north by the mountain which bears the traditional name of Qurantania; first up the face of the cliff, afterwards less steep, and finally leading to Bethel or Talibeh, the ancient Ophrah (Rob. i. 570). These intricate ravines may well have harbored the wild beasts, which, if the derivation of the names of several places in this locality are to be trusted, originally haunted the district—zebeer, hyenas (1 Sam. xiii. 18), shoul and shambun, foxes or jackals (Judg. i. 35; 1 Sam. xiii. 17), ajaban, gazelles.c

Benjumine, are all among the names of places in Ben-
jamin, and can hardly doubt that in these names is preserved the memory of an original wild tribes of the desert from the sultry and open plains of the low level to the fresh air and secure fastnesses of the upper district.

c The subject of the connection between the topogra-
phy of the land and the events which took place there is treated in the most admirable manner in the 4th chapter of Mr. Stanley's Sinai and Palestine
Such were the limits and such the character of the possession of Benjamin as fixed by those who originally divided the land. But it could not have been long before they extended their limits, since in the early lists of 1 Chr. viii. we find mention made of Benjaminites who built Lod and Ono, and of others who were founders of Ajalon (12, 13), all of which terms were beyond the spot named above as the westernmost point in their boundary. These places too were in their possession after the return from the Captivity (Neh. xiii. 33).

The greatest contrast between the warlike character of the tribe and the peaceful image of its progenitor has been already noticed. That fierceness and power are not less out of proportion to the smallness of its numbers and of its territory. This comes out in many scattered notices. (a) Benjamin was the only tribe which seems to have pursued archery to any purpose, and their skill in the bow (1 Sam. xx. 26, 36; 2 Sam. i. 22; 1 Chr. viii. 40, xii. 2; 2 Chr. xii. 17) and the sling (Judg. xx. 16) are celebrated. (b) When, after the first conquest of the country, the nation began to groan under the miseries of a foreign yoke, it is to a man of Benjamin, Ehud the son of Gera, that they turn for deliverance. The story seems to imply that he accomplished his purpose on Ephron with less risk, owing to his proficiency in the peculiar practice of using his left hand, a practice apparently confined to Benjaminites, though by them greatly employed (Judg. iii. 15, and see xx. 16; 1 Chr. xii. 2). (c) Ramah and Rachelab, "the sons of Rimmon the Beerothite of the children of Benjamin," are the only 1-racites west of the Jordan named in the whole history as captains of marauding predatory bands (Judg. x. 17), and the act of which they were guilty—"the murder of the head of their house—hardly needs the summary vengeance inflicted on them by David to testify the abhorrence in which it must have been held by all Orientals however warlike. (d) The dreadful deed recorded in Judg. xix. though repelled by the whole country, was unabashedly adopted and defended by Benjamin with an obstinacy and spirit truly extraordinary. Of their obstinacy there is a remarkable trait in 1 Sam. xiii. 7-18. Though Saul was not only the king of the nation, but the head of the tribe, and David a member of a family which had as yet no claims on the friendship of Benjamin, yet the Benjaminites resisted the strongest appeal of Saul to betray the movements of David, and after those movements had been revealed by Deog the Ephraimite (worthy member—as he must have seemed to him—of an armed race!) they still firmly refused to lift a hand against those who had assisted him. And yet—to return to the deed of Gilahah—in one or two of the expressions of that antique and simple narrative—"the phrase "Benjamin my brother"—the anxious inquiry, "what shall we do for wives for them that remain?"—and the entreaty, "be favorable to them" for our sakes—we seem to hear as it were an echo of those terms of fond affection which have given the son of Rachel's grief so distinct a place in our minds.

Very much of the above article is drawn from that source.

A fair argument in favor of the received chronology of the book of Judges may be drawn from this circumstance—since no shorter period would have sufficed for the tribe to have recovered from that frightful transaction was indeed a crisis in the history of the tribe: the narrative undoubtedly is intended to convey that the six hundred who took refuge in the cliff Rimmon, and who were afterwards provided with wives partly from Jabesh Gilad (Judg. xxi. 19), partly from Shihoh (xxii. 21), were the only survivors. A bag interval must have elapsed between so abrupt a condition and the culminating point at which we next meet with the tribe. a

Several circumstances may have conducted to its restoration to that place which it was now to associate. The Talbotianites was at Shihoh in Ephraim during the time of the last Judge; but the Ark was in Benjamin at Kirjath-jearim. Ramah, the official residence of Samuel, and containing a sanctuary greatly frequented (1 Sam. ix. 12, &c.),—Mizpeh, where the great assemblies of "all Israel" took place (1 Sam. vii. 5),—Bethel, perhaps the most ancient of all the sanctuaries of Palestine, and Gibeon, specially noted as "the great high place" (2 Chr. i. 3), were all in the land of Benjamin. These must gradually have accustomed the people who resorted to these various places to associate the tribe with power and sanctity, and they tend to elucidate the anomaly which struck Saul so forcibly, "that all the desire of Israel" should have been fixed on the house of the smallest of its tribes (1 Sam. ix. 21).

The struggles and contests which followed the death of Saul arose from the natural unwillingness of the tribe to relinquish its position at the head of the nation, especially in favor of Judah. Had it been Ephraim, the case might have been different, but the inter-tribal relations were in no degree influenced by the alliance of Joseph, and besides the tribe of David, whom Saul had pursued with such unremitting enmity. The tact and sound sense of Abner, however, succeeded in overcoming these difficulties, though he himself fell a victim in the very act of accomplishing his purpose, and the proposal that David should be "king over Israel was one which seemed good to the whole house of Benjamin," and of which the tribe testified its approval, and evinced its good faith, by sending to the distant capital of Hebron a detachment of 3000 men of the "brethren of Saul" (1 Chr. xii. 29). Still the insults of Shimeai and the insurrection of Sheba are indications that the wrongs still existed, and we do not hear of any cordial cooperation or firm union between the two tribes until a cause of common quarrel arose at the discretion, when Rehoboam assembled "all the house of Judah with the tribe of Benjamin to fight against the house of Israel, to bring the kingdom again to the son of Solomon" (1 K. xii. 21; 2 Chr. xi. 1). Possibly the seal may have been set to this by the fact of Jeroboam having just taken possession of Bethel, a city of Benjamin, for the calf-worship of the northern kingdom b (1 K. xii. 29). On the other hand Rehoboam fortified and garrisoned several cities of Benjamin, and wisely dispersed the members of his own family through them (2 Chr. xi. 10-12). The alliance was further strengthened by a covenant solemnly undertaken (2 Chr. x. 9), and by the employment such almost total extermination, and to have reached the numbers and force indicated in the lists of 1 Chr. xiii. 1-5, xvi. 5-17, i-49.

b Bethel, however, was on the very boundary line and centuries before this date was inhabited by both Ephraimites and Benjaminites (Judg. xix. 16)
of Benjamin in high positions in the army of Judah (2 Chr. xvii. 17). But what above all must have contributed to strengthened the alliance was the fact that the Temple was the common property of both tribes. True, it was founded, erected, and endowed by princes of the house of Judah; but the city of the Jebusite (Josh. xviii. 28), and the whole of the ground north of the Valley of Hinnom, was in the lot of Benjamin. In this latter fact is literally fulfilled the prophecy of Moses (Deut. xxxiii. 12): Benjamin "dwelt between the "shoulders" of the ravines which encompass the Holy City on the west, south, and east (see a good treatment of this point in Blunt's Unda. Coincid.-ences, pt. II. § xvii.).

Henceforward the history of Benjamin becomes merged in that of the southern Kingdom. That the tribe still retained its individuality is plain from the constant mention of it in the various censuses taken of the two tribes, and on other occasions, and also from the lists of the men of Benjamin who returned with Zerubbabel (Ezr. ii. Neh. vii.), and took possession of their old towns (Neh. xi. 31-35). At Jerusalem the name must have been always kept alive, if by nothing else, by the name of "the high gate of Benjamin" (Jer. xx. 2).

But though the tribe had thus given up to a certain degree its independent existence, it is clear that the ancient memories of their house were not allowed to fade from the recollections of the Benjamites. The genealogy of Saul, to a late date, is carefully preserved in the lists of 1 Chr. (viii. 33-40, ix. 33-44); the name of Kish recurs as the father of Mordecai (Esth. ii. 5), the honored deliverer of the nation from miseries worse than those threatened by Nahash the Ammonite. But it was reserved for a greater than these to close the line of this tribe in the sacred history of the close. The royal name once more appears, and that Saul who also is called Paul has left on record under his own hand that he was of the stock of Israel, of the tribe of Benjamin. It is perhaps more than a mere fancy to note how remarkably the chief characteristics of the tribe are gathered up in one person. There was the fierceness, in his persecution of the Christians; and there were the obstinacy and persistence, which made him proof against the tears and prayers of his converts, and not ready to be bound only, but also to die for the name of the Lord Jesus (Acts xxii. 12, 13). There were the force and vigor to which natural difficulties and confined circumstances formed no impediment; and lastly, there was the keen sense of the greatness of his house, in his proud reference to his forefather "Saul the son of Cis, a man of the tribe of Benjamin."

Be this as it may, no nobler hero could be found to close the rolls of the worthies of his tribe — no prouder distinction could be desired for Benjamin than that of having produced the first judge of its nation, the first king, and finally, when Judah gave place to Christianity, the great Apostle of the Gentiles.

2. [Berenia]; [Vat. Alex. -men.] A man of the tribe of Benjamin, son of Bilhah, and the head of a family of warriors (1 Chr. vii. 10).

3. [Berenia]; [Vat. Alex. FA. -men.] One of the "sons of Harim;" an Israelite in the time of Ezra, who had married a foreign wife (Ezr. x. 32).

BERACHAH

BERACHAH, HIGH GATE, OF GATE, OF (יִּבְרָעָּה בְּרָעָּה), Jer. xx. 2, xxxvii. 13, xcviiii. 7; Zech. xiv. 10; [JERUSALEM.]

* BENJAMITE (בֵּיתָּה בֵּיתָּה), Judg. xix. 18; 1 Sam. ix. 21, xxii. 7; 2 Sam. xvi. 11; 1 K. ii. 8; 1 Chr. xxvii. 12; Ps. vii., title; with the article, (בֵּיתָּה בֵּיתָּה), Judg. iii. 15; 2 Sam. xvi. 11, xix. 16 (Heb. 17); LXX: οὗτος τοῦ Ισραïλ, τ. Ισραïλι-ον, τ. Ισραïλι, οὗτος Βένιαμιν, etc.; Vulg. filius Jon iai; — בֵּיתָּה בֵּיתָּה, οὗτος ἄνδρα Ισραïλιον, filius viri Jemini, 1 Sam. ix. 1; — בֵּיתָּה בֵּיתָּה, οὗτος Βένιαμιν, etc.; Benjamin, min, etc., Judg. xx. 35, 38, 40, 43; — בֵּיתָּה בֵּיתָּה, Ι'a-" và, Vat. Isaæae, Alex. o Ισραïλιαον, Jemini, 1 Sam. ix. 4), an appellation of the descendants of Benjamin. On the Hebrew forms noted above, see Benjamin, p. 276. A.

BE'NO (בֵּנוֹ [his son]): LXX translates viōi (Benno), a Levite of the sons of Morari (1 Chr. xxiv. 26, 27).

BEN-ONI (בֵּיתָּה בֵּיתָּה, son of my sorrow, or of my strength, i. e. of my last effort, Hiller, Onom. 300, etc.: οὗτος ὁδῶν μου: Benoni, id est filius dobro- ris mei), the name which the dying Rachel gave to her newly-born son, but which by his father was changed into Benjamin (Gen. xxxv. 18).

BEN-ZO'HETH (בֵּיתוֹ הֶזֶה [his house]): LXX translates Zedôhâ; Alex. [vulg] Zêxhôzâ: Benoeth; a name occurring among the descendants of Judah (1 Chr. iv. 20). The passage appears to be a fragment, and as if the name of a son of the Zoheth just mentioned had originally followed. A. V. follows Vulgate.

BE'ON (בֵּון: Bânnâ; Alex. βαυά: Beuon), a place on the east of Jordan (Num. xxxii. 3), doubtless a contraction of Bânnâ-NEON (comp. ver. 38).

BE'OR (בֵּוֹ [a torch]: Beôp; [Alex. ir. 1 Chr. Beôp; Beôr]), the father of Bela, one of the early Edomite kings (Gen. xxxvi. 32-1 Chr. i. 43).

2. [Vat. Beôp, Beôp.] Father of Baham (Num. xxxii. 3; xxxvi. 13, 15; xxxi. 8; Josh. xiii. 22, xxiv. 9; Mic. iv. 1); He is called Boson in the N. T. [BELA.]

BET (בֵּת [son, or in evil=wicked]): Vat. [Rom.] and Alex. Βάλλα: Joseph. Βαλλάς: Bevra, king of Sodom at the time of the invasion of the five kings under Chedorlaomer (Gen. xiv. 2; also 17 and 21).

BERA'CHAH (בֵּרָעָּה בֵּרָעָּה [blessing]; Berê̂; [Vat. FA. Berœ̂; Alex. βεραχά: Barochara], a Benjaminite, one of "Saul's brethren," who attache to himself to David at Ziklag (1 Chr. xii. 3).

BERA'CHAH, VALLEY OF (בֵּרָעָּה בֵּרָעָּה, [valley of blessing]; Kēlās Eϣlispia: vallis benedictiōnis), a valley (Joseph. τια κοιλαι καὶ φα- ραγγαίαν τόπον) in which Jehoshaphat and his people assembled to say "bless." Jehovah after the overthrow of the hosts of Moabites, Ammonites, and Meunim who had come against them, and which from that fact acquired its name of "the valley of blessing" (2 Chr. xx. 26). The place is remarkable as furnishing one of the latest instances
in the 9th c. A. of a name bestowed in consequence of the confusion its occurrence at the spot.

The name of Berechiah (בְּרֶכֶה) still survives, attached to ruins in a valley of the same name lying between Tekoa and the main road from Bethlehem to Hebron, a position corresponding accurately with the locality of the battle as described in 2 Chr. xx. (Rob. iii. 273: the discovery is due to Wolcott; see Ritter, Jordan, 635.) It must not be confounded with Caphar-barnea, nor probably Rehi Neat, an enclosure on the very high ground, 3 or 4 miles east of Hebron, commanding an extensive view of the Dead Sea, and traditionally the scene of Abraham's intercession for Sodom. The tomb of Lot has been shown there since the days of Mandeville (see Kedah, 685; Rob. i. 480-91).

G.

BERACHIAH (בְּרֶכֶה) Berechiah (Je- 

hovah will bless; בְּרֶכֶה: Berechiah, a Ger- 

sonite Levite, father of Asaph the singer (1 Chr. vi. 39). [The name is written "Berechiah" in some ed. of the A. V. See Berechiah 6.]  

BERIAH [3 syll.] (בְּרֶעַ) [whom I created]; בְּרֶעַ: Berea, son of Shimi, a chief man of Benjamin (1 Chr. viii. 21).

BEREA (בּרֵא) [Berear]. 1. A city of Macedonia, to which St. Paul retired with Silas and Timotheus, in the course of his first visit to Europe, on being persecuted in Thessalonica (Acts xvii. 10), and from which, on being again persecuted by emissaries from Thessalonica, he withdrew to Thessalonica for the purpose of preaching to Athens (Acts xvi. 14). The remains of a city of Jews which were certainly in Berea, and their character is described in very favorable terms (ib. 11). Sopater, one of St. Paul's missionary companions, was from this place (Pauline Acts, xx. 4). He accompanied the apostle on his return from the second visit to Europe (ib.); and he appears to have previously been with him, in the course of that second visit, at Corinth, when he wrote the Epistle to the Romans (Rom. xvi. 21).

Berea, now called Veria or Korca-Veria, is fully described by Leake (Northern Greece, vol. iii. 290 ff.), and by Cosin in (Voyage dans le Mac- 

edonie, i. 69 ff.). Situated on the eastern slope of the Olympus mountain-range, with an abundant supply of water, and commanding an extensive view of the plain of the Axios and Haliacmon, it is regarded as one of the most agreeable towns in Thessaly, and has near 15,000 or 20,000 inhabitants. A few ancient remains, Greek, Roman, and Byzantine, still exist here. Two roads are laid down in the Itineraries between Thessalonica and Berea, one passing by Pella. St. Paul and his companions may have travelled by either of them. Two roads also connect Berea with Thessalonica, one passing by Pityna. It was probably from Thessalonica that St. Paul sailed to Athens, leaving Silas and Timotheus behind; and possibly 1 Thess. iii. 2 refers to a jour- 

ney of Timotheus from Berea, not from Pella (Timothy). The coin in Adam's Pamphlet Illustrations of the N. T. p. 46, is erroneously assigned to the Macedonian Berea, and belongs to the following.

2. [Vulg. om.] The modern Aleppo, mentioned in 2 Mac. xiii. 4 in connection with the invasion of Judaea by Antiochus Epiphanes, as the scene of the miserable death of Menelaus. This seems to be the city in which Jerome says that certain persons lived who possessed and used St. Matthew's Hebrew Gospel (De Vir. Illust. c. 3).  

3. [Beilby.] Bereia (Bereia?); a place in Jud- 

aea, apparently not very far from Jerusalem, where Pocadius, the general of Demetrius, encamped shortly before the engagement in which Judas Mac- 

cubarius was slain (1 Mac. iv. 4. See Joseph. Ant. xii. 11, § 1).  

J. S. H.

BERECHEIAH (בְּרֶכֶה) and בְּרֶכֶה, Berechiah (Je- 

hovah will bless; בְּרֶכֶה: Berechiah, a Gerso- 

nonite Levite, father of Asaph the singer (1 Chr. iii. 29). [The name is written "Berechiah" in some ed. of the A. V. See Berechiah 6.]  

1. One of the sons of Zerbubb, and a descendant of the royal family of Judah (1 Chr. iii. 29).  

2. [Vat. Neh. iii. 30, Bereya, vi. 18, Bapaxia,] A man mentioned as the father of Mechu- 

lan who assisted in rebuilding the walls of Jerusa- 

lem (Neh. iii. 4, 50; vi. 18).  

3. [Vat. Barad:] Bereya: Berechiah. A Levite of the line of Elkanah (1 Chr. ix. 16).  

4. Baruch. A doorkeeper for the ark (1 Chr. xv. 23).  

5. [Bapaxia, Vat. Zayapa;] Berechiah, one of the chief men of the tribe of Ephraim in time of king Aba (2 Chr. xxviii. 12).  

6. Berechiah, father of Asaph the singer (1 Chr. xv. 17). [BERECHIAH.]  

7. [Bapaxia:; Berechiah, father of Zeechi- 

aiah the prophet (Zech. i. 1, also 7). [Here A V. ed. 1011 reads "Berechiah."],] G.  

BERED (בּרֵד) [red]; Bara: Barad. 1. A place in the south of Palestine, between which and Kades lay the well Lachai-roi (Gen. xvi. 14). The name is variously given in the ancient versions: Peshito, Gadar, "Gerar: Arab. Iared, probably a mere corruption of the Hebrew name; Onkelos, Chagir, נמרד (where elsewhere employed in the Targums for "Shur:" can it be connected with Hagar, נמרד, נמרד?), Ps.-Jonathan, Chaluts, נמרד, נמרד; i. e. the Elus, "Tavura of Edom and the ecclesiastical writers, now el-Khâ- 

bard, on the Hebron road, about 12 miles south of Beer-sheba (Rob. i. 201, 2; Stewart, 205; Re- 

land, 755). We have the testimony of Jerome (Vita S. Hilario) that Elus was called by its in- 

habitants Bere, which would be an easy corrup- 

tion of Bere, 7 being read for 7. Chaluts is the name elsewhere given in the Arabic version for "Shur" and for "Gerar."  

2. [Vat. om. Iared.] A son or descendant of Ephraim (1 Chr. vii. 20), possibly identical with Becher in Num. xxi. 35, by a mere change of let- 

ters מ for מ.  

G.  

BERENICE. [Berenice.]  

remember Greeks. They have one synagogue, 12 mosques, and 50 Greek churches (which last, P. should be sold, except 3 or 4, are not Jews, properly so called, but Zechariah as the modern Greeks term them, i. e. chapels or shrines).  

H.
BERI (טֵּי [fountain]: Bwire [Vat. N. A. E.]; Alex. B. E. B.; Comp. B. P. E.): Beri, son of Zophah, of the tribe of Asher (1 Chr. vii. 30).

BERIAH (בֹּרְיַה [in evil, or a gift]; see No. 2: Bapai: Beria, Bire). 1. A son of Asher (Gen. xlvii. 17; Num. xxvi. 44, 45), from whom descended the "family of the Berites," זֵרְיָה; Bapai [Alex. Bapai], Family Bricmarum (Num. xxvi. 44).

2. [Bapai: Alex. Bapai: Berio.] A son of Ephraim, so named on account of the state of his father's house when he was born. "And the sons of Ephraim: Shuthelah, and Bered his son, and Tahath his son, and Ehad his son, and Tahath his son, and Zabad his son, and Shuthelah his son, and Ezer, and Eleaah, whom the men of Gath [that were] born in [that] land slew" (lil. "and the men slew them"), "because they came down to take away their cattle. And Ephraim their father mourned many days, and his brethren came to comfort him. And when he went in to his wife, she conceived, and bare a son, and he called his name Beriah, because it went evil with his house." "because evil" or "a gift." "was to his house;" יֹּרְיָה יֹּרְיָה וּֽ֣יֹּרְיָה מִשְׁמָּ֣ו יִבְרָיְהַֽוֹתֵּוּ that is because εὐγενεῦ ἐν οἴᾳ μου, LXX.: "εὖ γενέσθαι mali dominus ejus ortus est," Vulg. [1 Chr. vii. 20-23]. With respect to the meaning of the name, Gesenius prefers the rendering "in evil" to "a gift," as probably the right one. In this case יֹּרְיָה in the explanation would be, according to him, יֹּרְיָה with Beth esseânt (Thes. s. v.). It must be remarked, however, that the supposed instances of Beth esseânt being prefixed to the subject in the O. T. are few and inconclusive, and that it is disputed by the Arabian grammarians if the parallel "redundant Be" of the Arabic be ever so used (comp. Thes. pp. 174, 175, where this use of "redundant Be" is too arbitrarily denied). The LXX. and Vulg. indicate a different construction, with an additional variation in the case of the former ("my house" for "his house"), so that the rendering "in evil" does not depend upon the construction proposed by Gesenius. Michaelis suggests that יֹּרְיָה may mean a spontaneous gift of God beyond expectation and the law of nature, as a son born to Ephraim now growing old might be called (Suppl. pp. 224, 225). In favor of this meaning, which, with Gesenius, we take in the simple sense of "gift," it may be urged, that it is unlikely that four persons would have borne a name of an unusual form, and that a case similar to that here supposed is found in the naming of Seth (Gen. iv. 25). This short notice is of no slight historical importance; especially as it refers to a period of Hebrew history respecting which the Bible affords us no other like information. The event must be assigned to the time between Jacob's death and the beginning of the oppression. The indications that guide us are, that some of Ephraim's sons must have attained to manhood, and that the Hebrews were still free. The passage is full of difficulties. The first question is: What sons of Ephraim were killed? The persons mentioned do not all seem to be his sons. Shuthelah occupies the first place, and a genealogy of his descendants follows as far as a second Shuthelah, the words "his son" indicating a direct descent, as Houbigant (ap. Barrett, Synopsis in loc.) remarks, although he very needlessly proposes conjecturally to omit them. A similar genealogy from Beriah to Joshua is given in 1 Chr. vii. 25-27. As the text stands, there are but three sons of Ephraim mentioned before Beriah — Shuthelah, Ezer, and Eleaah — all of whom seem to have been killed by the men of Gath, though it is possible that the last two are alone meant, and the first of whom is stated to have left descendants. In the enumeration of the Israelite families in Numbers four of the tribe of Ephraim are mentioned, sprung from his sons Shuthelah, Becher, and Tahan, and from Eran, son or descendant of Shuthelah (xxvi. 35, 36). The second and third families are probably those of Beriah and a younger son, unless the third is one of Beriah, called after his descendant Tahan (1 Chr. vii. 25); or one of them may be that of a son of Joseph, since it is related that Jacob determined that sons of Joseph who might be born to him after Ephraim and Manasseh should "be called after the name of their brethren in their inheritance." (Gen. xlviii. 6). See however Bicknell. There can be no doubt that the land in which the men of Gath were born is the eastern part of Lower Egypt, if not Goshen itself. It would be needless to say that they were born in their own land. At this time very many foreigners must have been settled in Egypt, especially in and about Goshen. Indeed Goshen is mentioned as a non-Egyptian country in its inhabitants (Gen. xlvii. 34), and its own name as well as nearly all the names of its cities and places mentioned in the Bible, save the cities built in the oppression, are probably Semitic. In the book of Joshua, Shiloh, the Nile, here the Peh-siach branch, is the boundary of Egypt and Canaan, the Philistine territories apparently being considered to extend from it (Josh. xi. 2, 3). It is therefore very probable that many Philistines would have settled in a part of Egypt so accessible to them and so similar in its population to Canaan as Goshen and the tracts adjoining it. Or else these men of Gath may have been mercenaries like the Cherethim (in Egyptian Sharya-tana) who were in the Egyptian service at a later time, as in David's, and to whom hundreds were probably allotted as to the native army. Some suppose that the men of Gath were the aggressors, and as such extirpated the Philistines thereat, but the verse is too general. The matter is therefore not at variance with the words used in the relation of the cause of the death of Ephraim's sons, since we may read "when ( trebuie) they came down," &c., instead of "because," &c. (Bagster's Bible, in loc.), but it must be remembered that this rendering is equally consistent with the other explanation. There is no reason to suppose that the Philistines at this time may not have sometimes engaged in predatory or other warfare. The warlike habits of Jacob's sons are evident in the narrative of the vengeance taken by Simeon and Levi upon Hamor and Shechem (Gen. xxxiv. 25-29), and of their posterity in the account of the fear of that Pharaoh who began to oppress them lest they should, in the event of war in the land, join with the enemies of his people, and by fighting against them get them out of the country (Ex. i. 5-10). It has been surmised, according to which it was supposed to have acted the aggressor, that the Gittites descended upon the Ephrainites in a predatory excursion from Palestine, or that the Ephrainites made a raid into Palestine. Neither of these explanations is consistent with sound crit-
BERITES

The G. the MopoiSix comp. K. Chr.

BERITITES. [BERIAH, 13]

BERITES, THE (בֵּרִיתֵי [the walls, i. e. people of]) : in Nāṣā'î [Var. Alex. -pehi], a tribe or people who are named with Abel and Beth-macah — and who were therefore doubtless situated in the north of Palestine — mentioned only as having been visited by Jotham in his pursuit after Sheba the son of Bichri (2 Sam. xx. 14). The expression is a remarkable one, "all the Berites." (נאי בּית ינ; comp. "all the Bethlehem"). The Vulgate has a different reading — commone viri electi congregati iterant — apparently reading for בֵּרִיתֵי by an easy transposition and change of letters בֵּרִיתֵי, i. e. the young men, and this is in Ewald's opinion the correct reading (tisch. iii. 249, note).

BERITH, THE GOD (בֵּרִית ה [i. e. of the covenant): בֵּרִית אלпер: Bat. בֵּרִית אֲרֵמָה: Alex. בֵּרִית וּדָאָרָה: 'dun Beroth]}, Judg. ix. 46. [BAAL-HEMOTH, p. 207.]

BERNICE and BERENCCE (בֵּרִית ה, victorious), also in Josephus: בֵּרִית ה = פֵּרֵית: see Starz. Dict. Marc. e. 31; the form Berenice is also found), the eldest daughter of Herod Antipas 1 (Acts xii. 1, 2). She was first married to her uncle Herod, king of Chalcis (Joseph. Ant. xix. 5, § 1), and after his death (A. d. 48) she lived under circumstances of great suspicion with her own brother Agrippa II. (Joseph. Ant. xix. 7, 3; Juvenal Sat. vi. 156 ff.), in connection with whom she is mentioned Acts xxii. 19, 23, xxvi. 30, as having visited Festus on his appointment as Procurator of Judaea. She was a second time married, to Polemon, king of Gilead, but soon left him, and returned to her brother (Joseph. ibid.). She afterwards became the mistress of Vespasian (Tacit. Hist. ii. 81), and of his son Titus (Sueton. Tit. 7).

BERODACH-BALADAN (בֵּדֹדְאָכָה בלעָדָא [Var. Baladan]): Alex. בֵּרֹדְאָכָה בְלעָדָא; Comp. וּרֹדְאָכָה בֵּרֹדְאָכָה בלעָדָא), 2 K. xx. 12. [BERODICH-BALADAN.]

BEROTH (בֵּרֹסח): [Var. Beroth]; Abd. בֵּרֹסח: [in Ez., Var. Alex. corrupt; Abb. בֵּרֹסח: Comp בֵּרֹסח, Beroth, Beroth]. The first of these two names, each of which occurs once only, is given by Ezekiel (xvi. 16) in connection with Hamath and Damascus as forming part of the northern boundary of the promised land. The second is mentioned (2 Sam. viii. 8) as the name of a city of Zobah, taken by David, also in connection with Hamath and Damascus. The slighness of these references makes it impossible to identify the names with any degree of probability, or even to decide whether they refer to the same locality or not. The well known city בֵּרֹסח (Berytus) naturally suggests itself as identical with one at least of the names; but in each instance the circumstances of the case seem to require a position farther east, since Ezekiel places Berodach between Hamath and Damascus, and David's war with the king of Zobah led him away from the sea-coast towards the Euphrates (2 Sam. viii. 3). In the latter instance the difficulty is increased by the Hebrew text reading in 1 Chr. viii. 8, Chin's instead of Berodai, and by the fact that both in Samuel and Chronicles the Greek translators, instead of giving a proper name, translate by the phrase έκ των οπλων πόλεων, clearly showing that they read either the same text in each passage, or at least words which bore the same sense. First regards Berodach and Berodai as distinct places, and identifies the first with Berytus. Mislin (Saints Liezen, i. 244) derives the name from the walls (Beroth), which are still to be seen bore in the solid rock at Berytus.

F. W. G.

BEROTHAH, THE (1 Chr. xi. 39). [BEROTH.]

BERYL (בֵּרֵיל; τορσίχιον, τορσίχιυ, κρύσταλλος: chrysoliths, kypros, nux, nux) occurs in Ex. xxviii. 20, xxxix. 13; Cant. v. 14; Ex. i. 16, x. 9, xxviii. 13; Dan. x. 6. The torsekh was the first precious stone in the fourth row of the high-priest's breastplate. In Ezekiel's vision "the appearance of the wheels and their work was like unto the color of a torsekh;" it was one of the precious stones of the king of Tyre: the body of the man whom Daniel saw in his vision was like Michael the archangel. It is impossible to say with any degree of certainty what precious stone is denoted by the Hebrew word; Luther reads the "turquoise;" the LXX. supposes either "the chrysolite" or "the emerald" (αμέθυστον, [Athys]; Onkelos and the Jerusalem Targum have kernam joma, by which the Jews appear to have understood a "white stone like the froth of the sea," which Bramer (de Gast. Sacr. ii. e. 17) conjectures may be the opal). For other interpretations, see Josephus, more conjectures, see the chapter of Bamm just quoted.

It is generally supposed that the torsekh derives its name from the place so called, respecting the position of which see TIRISHT. Josephus (Ant. iii. 7, § 5) and Bamm (l. c.) understand the chrysolite to be meant; not, however, the chrysolite of modern mineralogists, but the topaz; for it certainly does appear, by a curious interchange of terminology, that this stone is the modern topaz, and the ancient topaz the modern chrysolite (see Phil. H. N. xxxvii. 8; Hill on Theophrastus, De Lev. ; King's Antike Genus, p. 57), though Bemanna, Die Viren und Thammum, p. 62, Berlin, 1824) has advanced many objections to this opinion and has maintained that the topaz and the chryso-

The name of the ancient is identical with the genus non
BETH

283

so called. Braun, at all events, uses the term chryso-
olithos to denote the topaz, and he speaks of its
brilliant golden color. There is little or nothing in
the passages where the *tarsish* is mentioned to lead
us to anything like a satisfactory conclusion as to its
to do we seem to catch a glimmer of the stone de-
noted: *His hands are orbs of gold adorned with
the tarsish stone.* This seems to be the correct
rendering of the Hebrew. The orbs or rings of
gold, as Cocceius has observed, refer not to rings
on the fingers, but to the fingers themselves, as they
gently press upon the thumb and thus form the
figure of an orb or a ring. The latter part of the
verse is the causal expulsive of the former. It is
not only said in this passage that the hands are
called orbs of gold, but the reason why they are
thus called is immediately added — specially in ac-
count of the beautiful chrysolites with which the
hands were adorned (Braun, de F. S. ii. 13).

Piny says of the chrysoolithos, *"it is a transparent
stone with a refulgence like that of gold."
Since then the golden stone, as the name imports, is
admirably suited to the above passage in Canticles,
and would also apply, though in a less degree, to
the other scriptural places cited: as it is supported
by Josephus, and conjectured by the LXX. and
Vulg.; the ancient chrysole to the modern yel-
low topaz appears to have a better claim than any
other gem to represent the tarsish of the Hebrew
Bible, certainly a better claim than the beryl of
the A. V., a rendering which appears to be unsup-
ported by any kind of evidence.

W. H.

BERZELIUS (F. A. S. D.; Alex. Zoph-1
-\nos; [Abld. BcrSennamos]: Phregdne), 1 Esdr.
v. 38. [Barzillai.]

BE'SAI [2 syl.] (בֵּסָא [comparative, First];
Basi, Basiai, [Vat. -sæi: Alex. Basi, Basiæ]:
Baser, [Basi].) "Children of Basiai" were among
the Nethinim who returned to Judaea with Zerub-
babel (Ezr. ii. 49; Neh. vii. 52). [Basta].

BESODETHAHAH [3 syl.] (בֶּשֶדְת-הָא [intimate of
Jehorak]; Baradaza: [Vat. Basæa; F. A.]: Ab-
deæa: Besodai), father of Meshullam, and one
of the repairers of the wall of Jerusalem (Neh. iii.
5).

BESOR, THE BROOK (בֶּשֶר, מַכ-ה
חַיִּים: τὸν Βωρό; [1 Sam. xxx. 21, Vat. Be-
area, Alex. Bexpar]: vorres Besor), a torrent-
ed wady in the extreme south of Judah, of which
mention occurs only in 1 Sam. 9. 10. 21. It
is plain from the conditions of the narrative that it
must have been south of Zikhra, and hithereto
the situation of neither town nor wady has been iden-
tified with any probability. The name may signify
"fresh:" or "cool." (First). G.

* Dr. Robinson holds that the Brook Besor, in
all probability, is the Wady *Ar'deb, the south-
eastern branch of Wady el-Sebei, running from
Aroer to Beersheba. For the grounds of this op-
inion, see his Phys. Geographiy, pp. 121-123. Diet-
rich supposes Besor to mean grassy, verdant
(Gesen. Wortherb. ote Aufl.).

H.

* BESTEAD (from the Anglo-Saxon steal, a
place: comp. our instead, homestead, &c.), found
only in Is. vii. 21 (A. V.). means "placed" or "si-
tated" (well or ill), and hence accompanied by Is.
so above, by "hardly," i.e. severely, the two words
together give the sense of *tolt 2, namely, "brought
into difficulty," or "distress." Eastwood and
Wright's Bible Word-Book (p. 62) illustrates this
archaism from the older English writers. H.

BETAH (בְּתַה [confidence]; * Meth芭n,
quasi * התה: Alex. * Ma branching; [Vat. * Ma-
Branch, Comp. Bedach*; Betah), a city belonging to
Hudadezer, king of Zobah, mentioned with Be-
rothai as having yielded much spoil of brass to
David (2 Sam. viii. 8). In the parallel account, 1
Chr. xvii. 8, the name is called, by an inversion of
letters, Tishath. Ewald (Gesch. ii. 165) pro-
nounces the latter to be the correct reading, and
compares it with Tolach (Gen. xxii. 24). G.

BETANE [Bəth'n: [Vat. Be'tanap; Sin. Pa-
tanap]; Alex. Be'tana, i. e. prob. Be'tanay: Vulg-
omines), a place apparently south of Jerusalem (Jud.
i. 9), and possibly identical with *Bithynia* of Euse-
bius (Oiam. *Ap', Ain), two miles from the Tere-
birth of Abraham and four from Hebron. This
has been variously identified with Beth-moab, Beth
*Linda, and Bethvak or Beletaka in Syria, placed
by Pliny (v. 17) on Carmel (Winer, s. v. Betene).
Bethany is inadmissible from the fact of its unim-
portance at the time, if indeed it existed at all.

G.

BETEN [בּטֵן [bolly or worm]; Basba'; Alex.
Barret; [comp. Bed'är: Be'ten], one of the cities
on the border of the tribe of Asher (Josh. xix. 25,
only). By Eusebius (Oiam. Barbaa) it is said to
have been then called Beiten, and to have lain
eight miles east of Ptolemais. No other trace of
its existence has been discovered elsewhere.

G.

BETH (בְּתֵה, according to Gesenius (Thes.
and Lex.), from a root, *טב, to pass the night, or
from *טב, to build, as *דגוּם, *דגו, from *דגוּם,
the most general word for a house or habitation.
Strictly speaking it has the force of a settled, stable
dwelling, as in Gen. xxxiii. 17, where the building
of a house marks the termination of a stage of
Jacob's wanderings (comp. also 2 Sam. vii. 2, 6,
and many other places): but it is also employed
for a dwelling of any kind, even for a tent, as in
Gen. xxxiv. 2, where it must refer to the tent of
Laban; also Judg. xliii. 31, I Sam. i. 7, to the
tent of the tabernacle, and 2 K. xxii. 7, where it
expresses the textile materials (A. V. "hangings")
for the tents of Astarte. From this general force
the transition was natural to a house in the sense of
a family, as Ps. cxxvii. 41. "families" (Prayer-
Book, "households"), or a pedigree, as Ezr. ii. 59.
In 2 Sam. xiii. 7, I K. xiii. 7, and other places, it
has the sense of "house," i.e. "to the house." Beth
also has some collateral and almost technical
meanings, similar to those which we apply to the
word "house," as in Ex. xxxv. 27 for the "places"
or sockets into which the bars for carrying the table
were "housed;" and others.

Like *Eloa* in Latin and Dom in German. Beth
has the special meaning of a temple or house of
worship, in which sense it is applied not only to
the tabernacle (see above) or temple of Jehovah
(1 K. iii. 2, v. 1, &c.), but to those of false gods
—Dagon (Judg. xvi. 27; 1 Sam. v. 2), Rimmon
(2 K. v. 18), Baal (2 K. x. 21), Nisroch (2 K.
xxvii. 37), and other gods (Judg. ix. 27). *Bajith*
in Is. xv. 2 is really ha-Bajith = "the Temple"
—meaning some well-known idol fane in Moab
[Bajith].
BETHABARA

Beth is more frequently employed in combination with other words to form the names of places than either Kiphat, Hatzer, Beer, Ain, or any other word. A list of the places compounded with Beth is given below in alphabetical order; but in addition to these it may be allowable here to notice two, which, though not appearing in that form in the A. V., yet do so in the LXX., probably with greater correctness.

Beth-Abard ʿABBARD "house of the garden"; Baʿaraʿ: [Vat. Baʿara: Comp. Baʿašāyr.]: Jónn us hors.], A. V. "the garden-house" (2 K. ix. 27), one of the spots which marked the flight of Ahaziah from Jehu. It is doubtless the same place as Ex-γαξηνμ, "spring of gardens," the modern Jenin, on the direct road from Samaria northward, and overlooking the great plain (Stanley, p. 349, note). G.

BETHABARA (Bethabara, quasi ʿABBARD, house of food or ferry: [Bethammon]), a place beyond Jordan, παρὰ τόν Λαόν, in which, according to the Received Text of the N. T., John was baptizing (John i. 28), apparently at the time that he baptized Christ (comp. ver. 29, 39, 35). If the reading of the Received Text be the correct one, Bethabara may be identified with Beth-arabah, the ancient ford of Jordan, of which the men of Edom took possession after Gideon's defeat of the Midianites (Beth-baalgerah): or, which seems more likely, with Beth-arabah, on the east of the river, nearly opposite Jericho. [Beth-arim]. But the oldest MSS. (A B) and the Vulgate have not Bethabara but Bethany, a reading which Origen (vid. loc.) states to have obtained in almost all the copies of his time, σχῆμα πάντως ἀνάγκη, although altered by him in his edition of the Gospel on topographical grounds. In favor of Bethabara are, (a), the extreme improbability of so familiar a name as Bethany being changed by copists into one so unfamiliar as Bethabara, while the reverse—the change from an unfamiliar to a familiar name—is of frequent occurrence. (b). The fact that Origen, while admitting that the majority of MSS., were in favor of Bethany, decided, notwithstanding, for Bethabara. (c). That Bethabara was still known in the days of Eusebius (Onomasticon, s. v.), and greatly prized by persons desirous of baptism (cf. Luke ix. 38). Still the fact remains that the most ancient MSS. have "Bethany," and that the name has been accordingly restored to the text by Lachmann, Tischendorf, and other modern editors. At this distance of time, and in the absence of any careful research on the east of Jordan, it is impossible to decide on evidence so slight and conflicting. It must not be overlooked that, if Bethany be accepted, its identification beyond Jordan "still remains, and therefore another place must be intended than the well-known residence of Lazarus." G.

G. a In the Onomasticon, however, Jerome has Beth-

BETHANY

* It has been claimed that Bethabara or Bethany must have been one of the upper crossig places of the Jordan, far south of the Sea of Tiberias and not so low down as opposite Jericho, because Jesus went thence to Galilee (John i. 44) in a single day (Stanley, Sin. and Pal., p. 305). But this depends on how we are to reckon the "third day" in John i. 1: for unless we count the day of Christ's calling the first disciples (John i. 35) as the first, and that of the marriage at Cana as the third (ii. 1), there may have been three or more days spent on the journey. But instead of its occupying one day only, the third day may have been the third after the arrival in Galilee, or according to Liicke (Frem. des Johannean, i. 467), the third from the calling of Nathaniel (John i. 46). With either of these last computations we must place Bethabara much further south than any ford near the south end of the Galilean Sea. It stands, on Kiepert's Wandl. von Pfahlin, off against the upper part of the plain of Jericho. It confers additional interest on Bethabara, if, as many suppose, it was the place where Jesus himself was baptized. If το παράγων in John x. 40 means that when John began his career as the baptizer, he baptized first at Bethabara beyond the Jordan; and if the desert of Judaea lay in part on the east of the Jordan so as to embrace Bethabara, then Jesus may have received his baptism there: for John came at first baptizing in "the wilderness of Judaea" (Matt. iii. 1), and Jesus, without any intimation of a change of place, is said to have come and been baptized in the Jordan (Matt. iii. 13). But against this conclusion stands the fact that the wilderness (ἐγκάτασσος) of Judaea lay in all probability wholly on the west of the Jordan and the Dead Sea. See-Jeru., Wil-
derness of (Amor. ed.). Further, το παράγων may signify only at the first, referring in a general way to this place beyond the Jordan, where Jesus spent some of the last months or weeks of his life, as the same place where John had formerly baptized. H.

BETH-ANATH (Beth-anath, quasi Bayth-ana, house of answer, &c. to prayer): Baʿaraʿ, Baʿaraʿah, Baʿara-eth: [Alex. Bariati, Barieth, Beeraneth]: Beth-anath, a place named with Beth-eshemesh (Josh. xii. 38): from neither of them were the Canaanites expelled (Jud. i. 33). By Eusebius and Jerome (Onom. s. v. Aselō, Barieth, Baʿaraʿah) it is spoken of as a village called Batanaea, 15 miles eastward of Esaron (Boasarum, or Sephoris), and reputed to contain medicinal springs, άσπερα ἰάματα. Nothing, however, is known to have been discovered of it in modern times.

BETH-ANOTH (Beth-anoth, quasi Bayth-anaoth, house of echo, First): Baʿaraʿah: [Alex. Baʿaraʿah; Comp. Abi Baʿaraʿah]: Bethanath, a town in the mountainous district of Judah, named with Halhul, Beth-zur, and others, in Josh. xc. 50 only. It is very probably the "men of Beth-anath," in 2 Sam. xv. 17, the remains of which, near to those of Halhul and Beth-Sére, were discovered by Woldert and visited by Robinson (iii. 281).

BETHANY (Bethany, quasi Bayth-anı́, house of delight or of sorrow): Bayth: [Bethane]: Bethania, a village which, scanty as are the notices of it contained in Scripture, is more in
BETHANY

umately associated in our minds than perhaps any other place with the most familiar acts and scenes of the last days of the life of Christ. It was at Bethany that He raised Lazarus from the dead, and from Bethany that He commenced His "triumphal entry" into Jerusalem. It was His nightly resting place during the time immediately preceding His passion; and here, at the houses of Martha and Mary and of Simon the leper, we are admitted to see Him, more nearly than elsewhere, in the circle of His domestic life.

Though it was only at a late period of the life of our Lord that His connection with Bethany commenced, yet this is fully compensated for by its having been the scene of His very last acts on earth. It was somewhere here, on these wooded slopes beyond the river of Olivet, that the Apostles stood when they last beheld His figure, as, with "uplifted hands"—still, to the very moment of disappearance, "blessing" them—He was "taken up," into the "cloud" which "received" and hid Him from their "steadfast" gaze, the words still ringing in their ears, which prove that space and time are no hindrance to the connection of Christians with their Lord—"Lo! I am with you always, even to the end of the world." It is the little information we possess about Bethany is gathered from the N. T. neither the O. T. nor the Apocrypha having apparently any allusion to it. It was situated "at" (παρὰ) the Mount of Olives (Mark xi. 1; Luke xix. 29), about fifteen stadia from Jerusalem (John xi. 18), on or near the usual road from Jericho to the city (Luke xix. 29, comp. 1; Mark xi. 1, comp. x. 46), and close by and west (?) of another village called Bethphage, the two being several times mentioned together.

There never appears to have been any doubt as to the site of Bethany, which is now known by a name derived from Lazarus—el-Azurigh (אזריג). It lies on the eastern slope of the Mount of Olives, fully a mile beyond the summit, and not very far from the point at which the road to Jericho begins its more sudden descent towards the Jordan valley (Lindsay, p. 914, and Saulcy, p. 120). The spot is a woody hollow more or less planted with fruit-trees,—olives, almonds, pomegranates, as well as oaks and carobs; the whole lying below a secondary ridge or hump, of sufficient height to shut out the village from the summit of the mount (Rob. i. 431, 432; Stanley, p. 189; Bonar, pp. 138-9).

From a distance the village is, to use the emphatic words of the latest published description, "entirely gathered, "remarkably beautiful"—"the perfection of refinement and repose"—"of seclusion and lovely peace" (Bonar, pp. 139, 230, 310, 337; and see Lindsay, p. 69). It is difficult to reconcile these glowing descriptions with Mr. Stanley's words (p. 189), or with the impression which the present writer derived from the actual view of the place. Possibly something of the difference is due to the different time of year at which the visits were made.

*a It has been suggested (Hitzig, Jesus) that the word rendered "poor" in the A. V. of Is. x. 30 (πανηγια) — "poor Anathoth" — is an abbreviated form of the name of Bethany, as Nimrah is of Beth-simrath &c.; but apart from any other difficulty, there is the serious one that Bethany does not lie near

El-Azurigh itself is a ruinous and wretched village, a "wild mountain hamlet" of "some twenty families," the inhabitants of which display even less than the ordinary eastern thrift and industry (Rob. i. 432; Stanley, p. 189; Bonar, p. 310). In the village are shown the traditional sites of the house and tomb of Lazarus; the former the remains of a square tower, apparently of old date, though certainly not of the age of the kings of Judah, to which De Saulcy assigns it (p. 128)—the latter a deep vault excavated in the limestone rock, the bottom reached by 26 steps. The house of Simon the leper is also exhibited. As to the real age and character of these remains there is at present no information to guide us.

Scholars maintains el-Azurigh to be Azal; and would fix Bethany at a spot which, he says, the Arabs call Beth-hamam, on the Mount of Offense above Siloam (pp. 293, 135).

These traditional spots are first heard of in the 4th century, in the Itinerary of the Bardene Pilgrim, and the Onomasticon of Ensenius and Jerome; and they continued to exist, with certain varieties of buildings and of ecclesiastical establishments in connection therewith, down to the 15th century, since which the place has gradually faded into its present decay. This part of the history is well given by Robinson (p. 432-3). By Mandeville and other mediæval travellers the town is spoken of as the "Castle of Bethany," an expression which had its origin in cantilana being employed in the Vulgate as the translation of anath in John xi. 1.

N.B. The derivation of the name of Bethany given above—that of Lightfoot and Rehah—is doubtless more correct than the one proposed by Simonin (Onom. s. v.), namely, "πανηγια, a locus depressoris, which has no special applicability to this spot more than any other, while it lacks the correspondence with Bethphage, the "House of Figs," and with the "Mount of Olives," which gives so much color to this derivation, although it is true that the dates have disappeared, and the figs and olives alone are now to be found in the neighborhood of Bethany. This has been well brought out by Stanley (S. & P. pp. 185, 187). It may also be remarked that the use of the Chaldean word ἀναθημα, for the fruit of the date-palm, is consistent with the late period at which we first hear of Bethany.

G.

* The etymology is still unsettled. The various conjectures are stated by Arnold in Herzog's Real-Encyc. ii. 116. The one that he prefers makes it the Chaldean or Aramean ἀναθημα ἄνθος (Buxtorf. Lex. Chaldis. col. 1631 f.), i.e. dūnus misertis, "house of the afflicted." Origen, Theophylact and others express a similar idea in οἶκος σταυκοῦ, as if related to ἀναθημα, i.e., where the prayer of the needy is heard and answered.

H. *BETHANY BEYOND THE JORDAN (according to the true text in John i. 28). For this, see BETHABARA.
BETH-ARABAH

**BETH-ARABAH** (בִּית אֲרָבָה, Bitt' Arôb), house of the desert: בִּית אֲרָבָה, בִּית אֲרָבָא (B. and B.); *Atiq. Jsh.* xxv. 6; *Birbat Abū Ayyub* is one of the six cities of Judah which were situated down in the Arabah, i.e. the sunk valley of the Jordan and Dead Sea. In *Josh.* xxv. 6, it is again called the border of the tribe, and apparently between Beth-hoglah and the high land on the west of the Jordan valley (xxv. 6). It is also included in the list of the towns of Benjamin (xviii. 22, בִּית אֲרָבָּת, Vat. [Alex. *Birbat Abū Ayyub*].

**BETH-ARAM** (accurately *Beth-haram*), בִּית הָאֲרָם, not to be confused with the Arabah or Jordan valley, *Josh.* xii. 27, and no doubt the same place as that named *BETH-HARAM* in Num. xxxii. 36. No further mention is found of it in the Scriptures; but Enaeus and Jerome (*Onomast.*), report that in their day its appellation (איאא) was *Bethramath*. *Berycusepít* (see also the quotations from the Yalma in Schirmacher, p. 213) or the Syriac and other versions, however, have *All Beth-haram* (or, with no material variation), and that, in honor of Augustus, Herod had named it *Libias (Λίβιας)*. Josephus's account is that Herod (Antipas), on taking possession of his territory, fortified Sephoris and the city (ξώμας) of Bitharamathia, building a wall round the latter, and calling it *Julia* in honor of the wife of the emperor. As this could hardly be later than n. c. 4 B.C., it is very likely, that the emperor Livia did not receive her name of Julia until after the death of Augustus, A.D. 14. It is probable that Josephus is in error as to the new name given to the place, and speaks of it as having originally received that which it bore in his own day. It is curious that he names Libias long before (*Ant.* xiv. 1, § 4) in such connection as to leave no doubt that it alludes to the same place. Under the name of Amathus her name is again mentioned (*Ant.* xvi. 19, § 6; comp. *B. D.* ii. 4, § 2), and the destruction of the royal palaces there by insurgents from Perea.

Probus gives the locality of Libias as 31° 26′ lat. and 67° 10′ long. (Ritter, *Jordan*, p. 573); and Enaeus and Jerome (*Onomasticon*) state that it was five miles south of Bethmaramah, or Bethemaramah (i.e. *Beth-haramah*). This agrees with the position of the *Wady Nisr*, or *Nisr*, which falls into the other opposite Jericho, and half way between *Wady Hesdo* and *Wady Shoqel*. No one appears to have explored this valley. Seetzen heard that it contained a castle and a large tank in masonry (*Reisen*, 1854, ii. 318). These may turn out to be the ruins of Libias.

**BETH-ARIEL** (בִּית אֲרִיאֵל, Bitt' Arîel), named only in Hos. x. 14, as the scene of a sack and massacre by Shalman (Shalmanerser). No clue is given to its position; it may be the ancient stronghold of *Arela* in Galilee, or (as conjectured by Hitzig) another place of the same name near Pella, of which mention is made by Enaeus in the *Onomasticon*. In the Vulgate Jerome has translated the name to mean *e domo ejus qui judicavit Baal*, i.e. Jerubbaal (בִּית רִבְבוּ אֵל) or Gideon, un-derstanding Salman as Zalmanu, and the whole passage as a reference to Judges, viii.

**BETH-AMATH**

G.* The weight of opinion is in favor of identifying also this city with the *Ibidi* which represents the Greek Argela in 1 Macc. ix. 2, between Tiberias and Sepphoris (Robinson iii. 281; Baessler's *Palaestina*, p. 108; Ritter's *Kurden*, viii. 2, 328; Porter, *Handb.*, p. 418). Travellers who turn to the left inland from the shore of Gennesaret, after preceding a short distance beyond *Mejdel* (Magdala) in ascending the hills to Safed have before them the site of *Arbel* at the entrance into the *Wady Hamam* (valley of Doves), just back of the remarkable caverns which appear there in the face of the almost perpendicular rocks, reaching the height of 1,500 feet (Tristram, *Land of Israel*, p. 446). In addition to the name so well preserved (though the change of T to D is not common) it is distinctly implied in the prophet's ascribing it with the "fortresses" deemed so impregnable, that Argela (Hos. x. 14) was a place of great natural security, which we find so eminently true of this *Ibidi* or Arbel at the mouth of *Wady Hamam*. For a description of the site see *Land and Book*, ii. 114. On the contrary Ewald knows that the prophet's *Argela* was the famous city of that name on the Tigris, which Shalman, an Assyrian king otherwise unknown, had destroyed a short time before Hoses wrote. (J. Tassetti, *Jahresber.,* i. 153). (M. *Prophets*, i. 69) thinks Arbel must be meant near the middle of the plain of Zejzel (*Onomast.* s. v.), chiefly because, he infers from 2 K. x. 14 that the Galilean *Arbel* must have been already in the power of the Assyrians before Shalman's invasion referred to by Hoses. But it is difficult, with so meagre a history, either to fix the time of Shalman's invasion or to trace the line of the conqueror's march through the country. The name is variously explained. According to Gesenius it signifies "House of God's ambush," i.e. a place made strong by God rather than man's. Simonis (*Onomasticon*, p. 454) comes nearer to this import of the name:="Lustrum Dei, i.e. maximum et inaccessum" from יָבִּים, covert, haunt. First de- rives it from יָבִים, to join together, as luts in a row, hence E's (God's) village or court, i.e. a sacred to him.

**BETH-AVIV** (בִּית אָבִי, Bitt' Abī), house of naught, i.e. e. *bodhis*: (*Josh.* xviii. 12) *Bai'bat*, Alex. *Baphon*: *Bathron* a place on the mountains of Benjamin, east of Beth (Josh. vii. 2, *Bath*; *Alex. *Baphor*; *Bathron*) a place on the mountains of Benjamin, east of Beth (Josh. vii. 2, *Bath*; *Alex. *Baphor*; *Bathron*), and lying between that place and Michmash (1 Sam. xiii. 5, also xiv. 23, *Bath*; *Alex. *Baphor*; *Bathron* in *Josh.* xviii. 12, the "widdershins", *Habla*- or *pasture-land*). Beth- avon is mentioned. In 1 Sam. xiii. 5 the reading of the LXX. is *Bathpôs* (*Comp. Bathpodes*), Beth- horon; but if this be correct, another Beth-horon must be intended than that commonly known which was much further to the west. In *Hos.* iv. 15, v. 8, x. 5 אֲבִית הָאֲבִית, but Alex. *Hos.* iv. 15, אֲבִית הָאֲבִית. The name is transferred, with a play on the word, characterizing this prophet, to the neighbor of Bethel—over the "house of God," but then the house of ibis, of "naught."
BETH-BAAL-MEON {גֶּשֶׁם} [house of my creation]: oikos Barouropo\(\nu\)s (by inclusion of the next name) [Vat. margin: Barouros]; B. of oikos Barouros; Bethberah, a town of Simeon (I Chr. iv. 31), which by comparison with the parallel list in Josh. xix. appears to have had also the name of Beth-Lebaoth. It lay to the extreme south, with Beer-sheba, Hormah, &c. (comp. Josh. xv. 32, Lebooth).

G.

BETH-CAR {גֶּשֶׁם}, house of lambs: Baal-\(\chi\)yr, Alex. Beth\(\chi\)yr: Bethchor, a place named as the point to which the Israelites pursued the Philistines from Mizpeh on a memorable occasion (I Sam. vii. 11), and therefore west of Mizpeh. From the unusual expression "under Beth-car" (גֶּשֶׁם עַל), it would seem that the place itself was on a height, with the road at its foot. Josephus (Ant. vi. 2, § 2) has מַפּוֹרָא קָנָבָיֹו, and goes on to say that the stone Elemenor was set up at this place to mark it as the spot to which the victory had extended. [Eisen-Ezer.]

G.

BETH-DAGON {גֶּשֶׁם}, house of Dagon Bayad\(\chi\)y\(\theta\)s; Alex. Beth\(\chi\)y\(\theta\)y: Bethdagon. 1. A city in the low country (Schelechi) of Judah (Josh. xv. 41), and therefore not far from the Philistine territory, with which its name implies a connection. From the absence of any conjunction before this name, it has been suggested that it should be taken with the preceding, "Gederoth-Beth-dagon," in that case probably distinguishing Gederoth from the two places of similar name in the neighborhood. Caphari-dagon existed as a very large village between Diospolis (Lydda) and Jannia in the time of Jerome (Onom. s. v.). A Beth Dejon has been found by Robinson between Lydda and Jaffa, but this is too far north, and must be another place.

2. A town apparently near the coast, named as one of the landmarks of the boundary of Asher (Josh. xix. 27; גֶּשֶׁם בֵּית יַדְגּוֹן, Bethy\(\chi\)y\(\theta\)n [Alex. Beth-\(\chi\)y\(\theta\)y]). The name and the proximity to the coast point to its being a Philistine colony.

3. In addition to the two modern villages noticed above as bearing this ancient name, a third has been found by Robinson (iii. 298) a few miles to the north of Nilus. There can be no doubt that in the occurrence of these names we have indications of the worship of the Philistine god having spread far beyond the Philistine territory. Possibly these are the sites of towns founded at the time when this warlike people had overrun the face of the country to "Michmah eastward of Beth-a\(\nu\)ven" on the south, and Gilboa on the north — that is, to the verge of the heights which overlook the Jordan valley — driving "the Hebrews over Jordan into the land of Gad and Gilead." (1 Sam. xiii. 5-7; comp. 17, 18, xxix. 1, xxxi. 1).

G.

BETH-DIBLATHAIM {גֶּשֶׁם דִּבְלָתָא}, house of the double cake (of figs): [Vat. M.] oikos Dibal\(\chi\)x\(\theta\)\(\nu\)s; Rom. ὁ ὄικος Διβλάθαιων; Alex. F.A. oikos Diblathaim; Dumus Diblathaim, a town of Moab (Jer. xlviii. 22), apparently the place elsewhere called Almon-Diblathaim.

G.

* BETH-EDEN, Amos i. 5, marg. [Eden, 2].

BETH-EL [properly Beth-\(\epsilon\)l] {גֶּשֶׁם}, house of God: Baal\(\chi\)\(\theta\)s [etc.]. Joseph. Ben\(\eta\)h\(\iota\).
BETHEL

Bethel. 1. A well-known city and holy place of central Palestine.

Of the origin of the name of Bethel there are two accounts extant. (1.) It was bestowed on the spot by Jacob under the awe inspired by the nocturnal vision of God, when on his journey from his father's house at Beersheba to seek his wife in Haran (Gen. xxviii. 19). He took the stone which he had set for his pillow and put (מֵים) it for a pillar, and anointed it with oil; and he called the named "that place" (אָלֶל־בֵית־לֵל) Bethel; but the name of the city (בֵּית־לֵל) was called Luz at the first.

The expression in the last paragraph of this account is curious, and indicates a distinction between the "city" and the "place" — the early Canaanite "city" Luz, and the "place," as yet a mere undistinguished spot, marked only by the "stone," or the heap (Joseph, תֵּיא דֶּשׁ תִּשְׁבֹּא תַּאְנָא, erected by Jacob to commemorate his vision.

(2.) But according to the other account, Bethel received its name on the occasion of a blessing bestowed by God upon Jacob after his return from Padan-aram; at which time also (according to this narrative) the name of Israel was given him. Here again Jacob erects (כִּתְבּ) a "pillar of stone," which, as before, he anoints with oil (Gen. xxxv. 14, 15). The key of this story would seem to be the fact of God's "speaking" with Jacob. "God went up from him in the place where He spake" with him, then "Jacob set up a pillar in the place where He spake" with him, and called the name of the place where God spake with him Bethel.

Whether these two narratives represent distinct events, or, as would appear to be the case in other instances in the lives of the patriarchs, are different representations of the one original occasion on which the hill of Bethel received its consecration, we know not, nor indeed does it concern us to know. It is perhaps worth notice that the prophet Hosea — in the only reference which the Hebrew Scriptures contain to this occurrence — had evidently the second of the two narratives before him, since in a summary of the life of Jacob he introduces it in the order in which it occurs in Genesis — having full and characteristic stress on the key-word of the story: "He had power over the angel and prevailed; he kept and made supplication unto Him; He found him in Bethel, and there He spake with us, even Jehovah God of hosts" (Hos. xii. 4, 5).

Early is the date involved in these narratives: if we are to accept the precise definition of Gen. xxi. 8, the name of Bethel would appear to have existed on this spot even before the arrival of Abram in Canaan: he removed from the oaks of Moriah to "the" mountain on the east of Bethel," with "Bethel on the west and Hai on the east." Here he built an altar; and thither he returned from Egypt with Lot before their separation (xiii. 3, 4).

The two accounts relate to different journeys of Jacob when he stopped at Bethel. The origin of the name, the fulness of its meaning, was not one but two fold. The accounts really differ only in this, that the expressive phrase which the patriarch gave to the place in his setting out for Padan-aram he had occasion, as usual and customarily, on his return to Bethel, because

In one thing, however, the above narratives agree, — in omitting any mention of town or buildings at Bethel at that early period, and in drawing a marked distinction between the "city" of Luz and the consecrated "place" in its neighborhood (comp. besides the passages already quoted, Gen. xxxv. 7). Even in the ancient chronicles of the country the two are still distinguished in this way, and it was only after the Kingdom came to an end, if (1. 2); and the appropriation of the name of Bethel to the city appears not to have been made till still later, when it was taken by the tribe of Ephraim; after which the name of Luz occurs no more (Judg. i. 22-25). If this view be correct, there is a strict parallel between Bethel and Moriah, which (according to the tradition commonly followed) received its consecration when Abraham offered up Isaac, but did not become the site of an actual sanctuary till the erection of the Temple there by Solomon. [MORIATH.]

The intense significance of the title bestowed by Jacob on the place of his vision — "House of God" — and the wide extent to which that appellation has been adopted in all languages and in spite of the utmost diversities of belief, has been well noticed by Mr. Stanley (220-1). It should not be overlooked how far this has been the case with the actual name: the very syllables of Jacob's explanation, forming, as they do, the title of the chief sanctuary of the Mohammedan world — the Beit-Allah of Mecca — while they are no less the favorite designation of the smallest sects of Protestant Christendom.

On the other hand, how singular is the fact — if the conclusions of etymologists are to be trusted (Spencer, in Ley. Itin. 444; Bochart, Conson., ii. 2. 2. 11, 12) — that the awful name of Bethuel should have been its form to the word by which was called one of the most perplexing of all the perplexing forms assumed by the idolatry of the heathen — the Baaltulis, the אלהי ענף, or living stones, of the ancient Phoenicians. Another opportunity will occur for going more at length into this interesting subject [STONES]: it will be sufficient here to say that the Baalatulis seem to have preserved the erect position of the tetragrammaton prototype, and that the worship consisted of anointing them with oil (Armbr. orth. Coste, i. 39).

The actual stone of Bethel itself was the subject of a peculiar tradition, according to which it was removed to the second Temple, and served as the pedestal for the ark. It survived the destruction of the Temple by the Romans, and was restored to by the Jews in their lamentations (Rabbin, Pal. 638). [TEMPLE, THE SECOND.]

After the conquest Bethel is frequently heard of. In the troubled times when there was no king in Israel, it was to Bethel that the people went up in their distress to ask counsel of God (Judg. xx. 18, 26, 31, xxi. 2: in the A. V. the name is translated "House of God"). Here was theark of the covenant under the charge of Phinehas the grandson of Aaron, with an altar and proper appliances for the offering of burnt-offerings and peace-offerings (xx. 29-30, xxi. 4); and the unmounted mule of a regular road or causeway as existing between it

God again appeared to him there and granted him still more signal manifestations of his presence and favor (Gen. xxxv. 14, 15). If

The word is" the same (כִּתְבּ) in all three cases, though in the A. V. it is rendered "talked" in the two former.
and the great town of Shechem is doubtless an indication that it was already in much request. Later than this we find it named as one of the holy cities to which Samuel went in circuit, taking equal rank with Gilgal and Mizpeth (1 Sam. vii. 16).

Doubtless, although we are not so expressly told, it was this ancient reputation, combined with its situation on the extreme south frontier of his new kingdom, and with the hold which it must have had on the sympathies both of Benjamin and Ephraim—the former's by lot, and the latter's by conquest—that made Jeroboam choose Bethel as the depository of the new false worship which he set up and consummated the division between the ten tribes and the two.

Here he placed one of the two calves of gold, and built a "house of high places" and an altar of incense, by which he himself stood to burn, as we see him in the familiar picture of 1 K. xii. Towards the end of Jeroboam's life Bethel fell into the hands of Judah (2 Chr. xiii. 19), whence it was probably recovered by Baasha (xvi. 1). It then remains unmentioned for a long period. The worship of Baal, introduced by the Phœnician queen of Ahab (1 K. xvi. 31), had probably alienated public favor from the simple erections of Jeroboam to more gorgeous shrines (2 K. x. 21, 22). Samaria had been built (1 K. xvi. 24), and Jeruzael; and these things must have tended to draw public notice to the more northerly part of the kingdom. It was during this period that Elijah visited Bethel, and that we hear of "sons of the prophets" as resident there (2 K. ii. 2, 3), two facts apparently incompatible with the active existence of the calf-worship. The mention of the bears so close to the town (ii. 23, 25), looks too as if the neighborhood were not much frequented at that time. But after his destruction of the Baal worship throughout the country, Jehu appears to have returned to the simpler and more national religion of the calves, and Bethel comes once more into view (2 K. x. 21). Under the descendants of this king the place and the worship must have greatly flourished, for by the time of Jeroboam II., the great-grandson of Jehu, the rude village was again a royal residence with a "king's house" (2 K. xvii. 3); there were palaces both for "winter" and "summer," "great houses" and "houses of ivory were many and very sumptuous" (17), and a very high degree of luxury in dress, furniture, and living (viii. 4-6). The one original altar was now accompanied by several others (iii. 14, 18); and the simple "incense" of its founder had developed into the "burnt-offerings" and "meat-offerings" of "sacramental assemblies," with the fragrant "peace-offerings" of "fat beasts" (v. 21, 22).

How this prosperity came to its doom we are not told. After the desolation of the northern kingdom by the mixed invasion of Assyria, Bethel still remained an abode of priests, who taught the wretched colonists "how to fear Jehovah," "the God of the land" (2 K. xviii. 27). The buildings remained till the time of Josiah, by whom they were destroyed; and in the account preserved of his reforming iconoclast we catch one more glimpse of the altar of Jeroboam, with its last bathsome fire of "dead men's bones" burning upon it, the altar and high-placed surviving in their archaic antiquity amidst the successive additions of later votaries, like the wooden altar of Becket at Canterbury, which continued in its original simplicity through all the subsequent magnificence of the church in which he was murdered (Stanley, Canterbury, 184.19)

Not the least remarkable of these later works was the monument (立志ologiX : στηρύλια), evidently a conspicuous erection, of the "man of God," who proclaimed the ultimate downfall of this idolatrous worship at its very outset, and who would seem to have been in the earliest days denounced by the votaries of the very idolatry which he denounced. "Woe unto you! for ye build the sepulchres of the prophets, and your fathers killed them."

But, in any case, the fact of the continued existence of the tomb of this prophet through so many centuries of idolatry illustrates very remarkably the way in which the worship of Jehovah and the false worship went on side by side at Bethel. It is plain from several allusions of Amos that this was the case (v. 14, 22); and the fact before noticed of prophets of Jehovah being resident there, and of the friendly visits even of the stern Elijah: of the relation between the "man of God from Judah," and the "lying prophet" who caused his death, of the manner in which Zedekiah the son of Jehoahaz, a priest of Baal, returns, to the name of Jehovah for his solemn adjuration, and lastly of the way in which the denunciations of Amos were tolerated and even believed by himself allowed to extend to this point to a state of things well worthy of investigation. In this connection, too, it is curious that men of Bethel and Ai returned with Zerubbabel (Ezr. ii. 28; Neh. vii. 52); and that they returned to their native place whilst continuing their relations with Nehemiah and the restored worship (Neh. xi. 31). In the Book of Esdras the name appears as Bezeloth. In later times Bethel is only named once among the strong cities in Judaea, which were repaired by Baccid and during the struggles of the times of the Maccabees (1 Macc. ix. 50).

Bethel receives a bare mention from Enosius and Jerome in the Onomasticon, as 12 miles from Jerusalem on the right hand of the road to Sichem; and here its ruins still lie under the scarcely altered name of Beita. They cover a space of "three or four acres," and consist of "very many foundations and half-standing walls of houses and other buildings." The ruins lie upon the front of a low hill between the heads of two hollow valleys or "two hollows" valley ex-sinuinit" (Reb. i. 448-9). Dr. Clarke, and other travellers since his visit, have remarked on the "stony" nature of the soil at Bethel, as perfectly in keeping with the narrative of Jacob's slumber there. When on the spot little doubt can be felt as to the localities of this interesting place. The round mount S. E. of Bethel must be the "mount on which Abram built the altar, and on which he and Lot stood when they made their division of the land" (Gen. xiv. 7, xiii. 10). It is still thickly strewn to its top with stones formed by nature for the building of "altar" or sanctuary. As the eye turns invol untarily eastward, it takes in a large part of the plain of the Jordan opposite Jericho; distant it is true, but not too distant to discern in that clear atmosphere the lines of verdure that mark the brooks which descend from the mountains beyond the river and fertilize the plain even in its present neglected state. Further south lies, as in a map, fully half of that sea which now covers the once fertile oasis of the "cities of the plain," and which in those days was as "the garden of the Lord, even as the land of Egypt." Eastward again of this mount, at about the same distance on the left that
Bethel is on the right, overlooking the Windy Sa

rivitit, is a hill that must be named, by a remarkably des

date-looking mass of gray debris, the most perfect

heap of ruin to be seen even in that country of

ruins. This is Tell er-Rujuk, "the mound of the

heap," agreeing in every particular of name, aspect, and

situation, with At.

An admirable passage on the history of Bethel

will be found in Stanley (217-223).

2. [In Josh, Rom. Var. Alex. omit: Comp.

Abd. Banâ'â.] A town in the south part of Judah,

named in Josh. xii. 16 and 1 Sam. xxx. 27. The

collection of the name in these two lists is de

cisive against its being the well-known Bethel. In

the latter case the LXX. read Banâ'â, i. e. Beth-azur

[buts Comp. Alex. Banâ'â] By comparison of the

lists of the towns of Judah and Simeon (Josh. xx.

30, xix. 4; 1 Chr. iv. 30), the place appears under

the names of Chesil, Bethul, and Bethuel.

G. * It is remarkable that a place so prominent as

Bethel (1) in the O. T. should be unmentioned in

the New; and yet it continued to exist in the time of

Christ, for Josephus (B. J. iv. 9, § 9) relates its

capture by Vesuvian on his march from Tiberius to

Jerusalem. The Samaritans must have passed

within sight of it (perhaps at other times, but cer
tainly) on his journey from Judah to Galilee,

when he stopped at Jacob's well near Sychar (John

iv. 3 f.), and must have been near it when he re

tired to Ephraim (John xii. 54) after the raising of

Lazarus; but there is no evidence that he ever

turned aside to go to the place itself. After the

notice of Bethel in the Omintationen (above referred

to) it disappeared from history, and for ages its

location was unknown to the people of western

countries. It is an instance of what is true of so many

of the ancient places in the Bible, namely, that after

having been last mentioned in the Scriptures they

were unheard of, till geographers and tourists in

our own day have traversed the land, and on asking

the inhabitants to tell them the names of their

towns and villages have had the old Scripture

names given back to them from the mouths of the

people to add that the identification of Bethel with the

ancient Bethel seems to be due to the missionary

Niederw. in 1836. (Jewish

Intelligencer. Feb. 1837, p. 38.) J. R. Robinson

(Researches, ii. 297 ff.) argues the question at

length whether Bethel may not also be the Bether

which was the scene of the great battle between

the Jewish leader Bar-Cochba, Son of a Star, and

Hadrian, a battle so terribly disastrous to the Jews.

The supposition (Williams, Holy City, ii. p. 212)

that this Bether is the ridge near Bither, 2 hours

southwest of Jerusalem, he regards as without any

sufficient foundation.

The sojourn of Abraham and Lot with their

flocks and herds in this region (Gen. xii. 1 ff.) implies

that it was very fertile and well suited to their

pastoral occupations. The writer can testify that it

maintains still its ancient character in this re

spect. The cattle which he saw there surpassed in

number and size any that he saw at any one time in

any other place. Here, as in Syria, and in the east to

west, toward Jaffa, the Roman Gophna,

was a flooded meadow, which as late as 28th of

April was almost large enough to be called a lake.

On the hill-top just east of Bethel, where Abraham

and Lot agreed to separate from each other, the

tree etches a sight which is quite startling: we see

not only the course of the Jordan stretching north

and south, readily traced by the waving line of

water along its banks, but its waters broken and

foaming as they roll over some of the many cas

cades, almost cutaways, for which the river is re

markable. Lieutenant Lynch, who floated down:

the Jordan from the Lake of Galilee to the Dead

Sea, ascertained that the river in its intermediate

passage rushes over no fewer than 27 violent rap

ids, as well as many others less precipitous. It is

interesting to be reminded that so many are found at

the present day in the rocky heights around

Bethel. See Simai and Gold usher, Von F. A. Strauss,

p. 371. Stanley also (Sinu. and Pal. p. 147, Am.

ed.) speaks of the "excavations" which the trav

erler sees in approaching this place, in which the

death of so many past generations have been buried.

It was from such recesses, no doubt, that King Jo

nish, in his zeal for the worship of Jehovah, dug

up the bones of the old idolaters who had lived at

Bethel, which he burned on the altar of the golden

calf in order by this set of pollution to mark his

abundance of such idolatry, and to render the place

infamous forever. There is nothing very remark

able in the situation or scenery of Bethel to impress

the observer: and the hold which it acquired on

the religious veneration of the Hebrews presupposes

some such antecedent history as that related of the

patriarchs in the book of Genesis. H.

BETHELITE, THE (1 K. xvi. 34) [Bethel.]

BETH-EMEK (? ? ? ?), house of the

valley: Banâ'â: Alex. Beth-A'emek: Bethimeke), a

place on or near the border of Asher, on the north

tide of which was the ravine of Jiphthah-el (Josh.

xix. 25). Robinson has discovered an Amosk

about 8 miles to the N. E. of Akbar; but if his

identification of Jiphæth with Jiphthah-el be tenable,

the site of Beth-emek must be sought for further

south than Amosk (Rob. iii. 103, 107-8). G.

BETHER, THE MOUNTAINS OF (? ? ? ?

? ? ? ?) y?n 'olamâ'â: Bither, and Bethl (? ?)

Cant. xvi. 57) is thought to be a clue to what moun

tains are intended here.

For the site of Bether, so famous in the post-

biblical history of the Jews, see Ireland, 639, 640;

Rob. iii. 207-21.

G. * Bether, says Gesenius, signifies section, a piece

cut off, and describes apparently a region consisting

of hills and valleys, and at the same time craggy,

precipitous. First defines the term in the same

way. The scene of Solomon's Song being laid on

Mount Lebanon, we may suppose Bether to have

been in that region whose physical aspects so well

agree with the etymology, though that trait be

among others which make up the nature of Palestine.

This Bether has probably no connection with that

of the later Jewish history: see: addition to Bether.

II. BETHESDA (Bâthesda, as if 'âs-âbâdah, house of mercy, or 'âs-âbâdah, place of the floor

ing of water: Bâthâdâ: Bethanah), the Hebrew

name of a reservoir or tank (kôlahâbâdâ, i. e. a

swimming-pool, with live "porches" (ôsó), close

upon the sheep-gate or "market" (ômînâ, öôfînă-

weh) — it will be observed that the word "market"

is supplied) in Jerusalem (John v. 2)
The porches — i.e., cloisters or colonnades — were extensive enough to accommodate a large number of sick and infirm people, whose custom it was to wait there for the “troubling of the water.”

Eusebius — though unfortunately he gives no clue to the situation of Bethsaida — describes it in the Onomasticon as existing in his time as two pools (ἐν ταῖς Ἀλώνας δύο θηάδεσμοι), the one supplied by the perennial rains, while the water of the other was of a reddish color (περιφανέως), due, as the tradition then ran, to the fact that the flesh of the sacrifices was anciently washed there before offering, on which account the pool was also called προβατικόν.

See, however, the comments of LIGHTFOOT on this view, in his Excerpt. on S. John, v. 2. Eusebius’s statement is partly confirmed by the Bourdeaux Pilgrims (A. D. 355), who mentions in his Itinerary ×των ἐν θηάδεσι, having five porches, which are called Bethsaida (quoted in Barclay, 240).

The large reservoir called the Birket Israfil, within the walls of the city, close by the St. Stephen’s gate, and under the northeast wall of the Haram area, is generally considered to be the modern representative of Bethsaida. This tradition reaches back certainly to the time of Searali, A.D. 1192, who mentions it under the name of Bethsaida (Urfa Tzemah). It is also named on the Cité de Jeours item, A.D. 1187 (see vii.; Robb. ii. 502), and in more modern times by Maundrell and all the later travellers.

The little that can be said on the subject goes rather to confirm than to invalidate this tradition. On the one hand, (1.) the most probable position of the sheep-gate is at the northeast part of the city [JERUSALEM]. On the other hand, the Birket Israfil exhibits none of the marks which appear to have distinguished the water of Bethsaida in the records of the Evangelist and of Eusebius. (3.) The construction of the Birket is such as to show that it was originally a water-reservoir, and not, as has been suggested, the moat of a fortress (Robb. i. 241—iii. 243); (3.) there is certainly a remarkable coincidence between the name as given by Eusebius, Dacatha, and that of the northeast suburb of the city at the time of the Gospel history — Bethsaida; and (4.) there is the difficulty that if the Birket Israfil be not Bethsaida, which of the ancient “pools” does it represent?

One other proposed identification must be noticed, namely, that of Dr. Robinson (i. 342—3), who suggests the “fountain of the Virgin,” in the valley of the Kedron, a short distance above the Pool of Siloam. In favor of this are its situation, supposing the sheep-gate to be at the southeast of the city, as Lightfoot, Robinson, and others suppose, and the strange intermittent “troubling of the vessel” caused by the periodical ebbing and flowing of the supply. Against it are the confined size of the pool, and the difficulty of finding room for the five stories. (See BURCH's detailed account, City, p. 516—524, and 325—6.)

BETH-EZEL (בֵּית-אֶזֶל, house of firmness (?); ἡ άκρα τοῦ ἐνοῦτος; domus visio), a place named only in Mic. i. 11. From the context it was doubtless situated in the plain of Philistia.

* GeSENIUS defines the name as “fixed dwelling;” and the point of the expression in Mic. i. 11 seems to turn on that meaning. “They who abide, strong though they be, shall not furnish an abiding place.” See Pusey’s Minor Prophets, iii. 300. In some versions (Sept. Vulg. Luth.) the expression, instead of being treated as a proper name, is rendered house by the side, i.e., the one next.

BETH-GADER (בֵּית-גַּדֶר, “house of the wall”): BETHYUL; Vat. Baithyul: Alex. Bethyeldor: BETHGELOR, doubtless a place, though it occurs in the genealogies of Judah as if a person (1 Chr. ii. 51). Possibly the same place as GEDER (Josh. xii. 13.)

BETH-GA’MUL (בֵּית-גַּמּוּל, house of the walled, Genen. LXX., but may it not be “house of camel?”: ἡ άκρα Γαμάλ, Alex. Γαμαλιὰς: Bethgammal, a town of Moab, in the midst or downs east of Jordan (A. V. “plain country,” Jer. xlviii. 25, comp. 21); apparently a place of late date, since there is no trace of it in the earlier lists of Num. xxxii. 11—34. A place called Um el-Femi describes itself to be on a few miles south of Buserah in the Hauran (Barthol. 106; Kiepert’s map in Robb. 1857); but this is too far to the N. E. to suit the requirements of the text. In a country of nomadic tribes this latter name would doubtless be a common one.

BETH-HACCEREM (בֵּית-חצֶרֶם) [Hb. ‘aṣṣerem] (בֵּית-חֵצֶר, house of the vine: [in Heb.] Vatersayim, [Vat. Vatersayim: Alex. Vatersayma: in Jer. Vatersayma, Sim. Vatersayma, Alex. Vatersayap:] Bethacharam, [Bethaacarem], a town which, like a few other places, is distinguished by the application to it of the word pele, שַׁלֶּשׁ, A. V. “part” (Neh. iii. 14). It had then a “ruler” called שַׁלֶּשׁ. From the other mention of it (Jer. vi. 1) we find that it was used as a beacon-station, and that it was near Tekoa. By Jerome (Con. Jer. vi. 1) a village named Bethacharam is said to have been on a mountain between Tekoa and Jerusalem, a position in which the enigma known as the Frank mountain (Herodium); stands conspicuous; and this has accordingly been suggested as Beth-hacerem (Pascal, Robb. i. 480). The name is at any rate a testimony to the early fruitfulness of this part of Palestine.

Karem (Kapera) is one of the towns added in the LXX.—to the Hebrew text of Josh. xv. 60, as in the mountains of Judah, in the district of Bethlem.

BETH-HARAN (בֵּית-הָרָן, Ẓeb Haran): [Hab. Harem:] Betharam, one of the “fenced cities” on the east of Jordan, “built” (by the Gadites (Num. xxiii. 36). It is named with Bethnimrah, and therefore is no doubt the same place as BETH-ARAN (accurately Beth-haram), Josh.

cloisters or colonnades round artificial tanks are common in the East. One example is the Taf Boere, in the set of drawings of Beesmore now publishing by the East India Company.

The photographs, woodcuts, and careful statements of Salzmann, are conclusive on this point.

This name deserves notice as one of the very few instances in which the translators of the A. V. have retained the definite article, which in the original so frequently occurs in the middle of compound proper names.
The name is not found in the lists of the towns of Moab in either Isaiah, Jeremiah, or Ezekiel.

**BETH-HOGLA** and **HOGLAHI ( glyc. Ste-Hogl, etc.) BETH-**

*house of perturbation, Gesen.*; though Jerome gives another interpretation, *bous eyer,* reading the name *Glhlyla,* and connecting it with the funeral races or dances at the mourning for Jacob [ATAD]: Bethaglyla, [A] (Alasa, etc.) Bete-gyal: *Alex. Bethaglyla, Bethaglya, Bethaglya.* (Bethaglyla), a place on the border of Judah (Josh. xv. 6) and of Benjamin (xviii. 19), to which latter tribe it was re-concorded to belong (xviii. 21). A magnificent spring and a ruin between Jericho and the Jordan still bear the names of 'Ain-hajat and Keré Hiyja, and are doubtful on or near the old site (Rob. i. 544-5). The LXX. rendering, *Betiaglya,* may point to Efneghilm, a place which was certainly near this locality.

**BETH-HORON ( J.J/gb3 3 or in contracted form J.J/GL 3), or in contracted form J.J/LZ 3, and once J.J/LZ 3, house of curvets or holes: Bethagly, etc.) BETHORON,** the name of two towns or villages, an “upper” (J.J/LX 3 or a “nether” (J.J/LX 3), (Josh. xvi. 3, 5; 1 Chr. vi. 24), on the road from Gibea to Azokah (Josh. x. 10, 11) and the Philistine Phim (1 Macc. iii. 24). Beth-horon lay on the boundary-line between Benjamin and Ephraim (Josh. xvi. 3, 5, and xviii. 13, 14), was counted to Ephraim (Josh. xxi. 22; 1 Chr. vii. 24), and given to the Kohathites (Josh. xxi. 22; 1 Chr. vi. 68 [84]).

The road connecting the two places is memorable in sacred history as the scene of two of the most complete victories achieved by the Jewish arms: that of Joshua over the five kings of the Amorites (Josh. x.; Eccles. xvi. 6), and that of Judas Macabaeus over the forces of Syria under Seraon (1 Macc. iii. 13-24). Later still the Roman army under Cestius Gallus was totally cut up at the same spot (Joseph. B. J. ii. 19, §§ 8-9).

There is no room for doubt that the two Beth-horons still survive in the modern villages of Bet-l'ar (بيت-أتر) et-Tohta and et-Foks, which were first noticed by Dr. Charke, and have been since visited by Dr. Robinson, Mr. Stanley, and others. Besides the similarity of the name, and the fact that the two places are still designated as “upper” and “lower,” all the requirements of the narrative are fulfilled in this identification. The road is still the direct one from the site which must have been Gibea (el-Jib), and from Michmash (Michmáx) to the Philistine plain on the one hand, and Antipatris (Joseph. B. J. ii. 19, § 9) on the other. On the mountain which lies to the southward of the nether village is still preserved the name (Váha) and the site of Apha, so closely connected with the proudest memories of Beth-horon; and the long ascent between the two remains unmarred from what it was on that great day, “which was like no day before or after it.”

The importance of the road on which the two Beth-horons are situated, the main approach to the interior of the country from the hostile districts on both sides of Palestine or Phœnicia and Egypt on the west, Moab, and Ammon on the east—first explains and justifies the frequent fortification of these towns at different periods of the history (1 K. ix. 17; 2 Chr. vii. 5; 1 Macc. ix. 50; Jud. iv. 4, 5). This road — still, as in ancient times, “the great road of communication and heavy transport between Jerusalem and the sea-coast” (Rob. ii. 52), though a route rather more direct, known as the “Jaffa road,” now used by travellers with light baggage leaves the main north road at Télél (Fal-Fal, 3) miles from Jerusalem, due west of Jericho. Bending slightly to the north, it runs by the modern village of el-Jib, the ancient Gibea, and then proceeds by the Bethlehemers in a direct line due west to Jerusalem (Gimzo) and Léli (Lyn- da), at which it parts into three, diverging north to Caphar-Saba (Antipatris), south to Gaza, and west to Joffa (Joppa).

From Gibea to the Upper Beth-horon is a distance of about 4 miles of broken ascent and descent. The ascent, however, predominates, and this therefore appears to be the “going up” to Beth-horon which formed the first stage of Joshua’s pursuit. With the upper village the descent commences; the road rough and difficult even for the mountain-pathes of Palestine; now over sheets of smooth rock flat as the flagstones of a London pavement; now over the upturned edges of the limestone strata; and now amongst the loose rectangular stones so characteristic of the whole of this district. There are in many places steps cut, and other marks of the path having been artificially improved. But though rough, the way can hardly be called “precipitous;” still less is it a ravine (Stanley, p. 208), since it runs for the most part along the back of a ridge or water-shed dividing wadies on either hand. After about three miles of this descent, a slight rise leads to the lower village standing on its mound—the last outpost of the Benjaminite hills, and characterized by the date-palm in the enclosure of the village mosque. A short and sharp fall below the village, a few undulations, and the road is amongst the dîna of the great corn-growing plain of Sharon.

This rough descent from the upper to the lower Beth-horon, the going down to Beth-horon ° of the Bible narrative. Standing on the high ground of the upper village, and overlooking the wild scene, we may feel assured that it was over this rough path that the Canaanites died to their native lowlands.

In a remarkable fragment of early history (1 Chr. vii. 21) we are told that both the upper and lower towns were built by a woman of Ephraim, Selsar, who in the present state of the passage appears as a grand-daughter of the founder of her tribe, and also as a direct progenitor of the great leader with whose history the place is so closely connected.

**BETH-JESHMOTH,** or **JESHMOTH ( fJ7J'7 2 in Numbers, 1 fJ7J'7 2, house of the wastes: Aittam, etc.) BETHJESHMOTH, BETHJESMOTH,** a town or place east of Jordan, in the “deserts” (1 fJ7J'7 2) of Moab; that of that of an ascent; and Bitchór, though perhaps no higher than the ridge between it and Gibea, yet looks higher, because it is so much above everything beyond it.
BETH-LEBAOTH

A, on the lower level at the south end of the Jordan valley (Num. xxxiii. 49); and names with Ashboth-pieagh and Beth-por. It was one of the limits of the encampment of Israel before crossing the Jordan. Later it was allotted to Kenben (Josh. xii. 3, xiii. 20), but came at last into the hands of Moab, and formed one of the cities which were "the glory of the country" (Ex. xxv. 9). Schwartz (p. 228) quotes "a Beth-Jisrael as still known at the northeasternmost point of the Dead Sea, half a mile from the Jordan;" but the requirement is confirmed.

G.

BETH-LEBAOTH (בְּתֵי-לְבָאוֹס), house of lions: בְּתֵי-לְבָאוֹס; Alex. Bethel-Baôâ: Beth-lebaoth), a town in the list of Simeon (Josh. xix. 6), and therefore in the extreme south of Judah (xxv. 32, Lekoth), probably in the wild country to which its name bears witness. In the parallel list in 1 Chr. iv. 31 the name is given Beth-bireil.

G.

BETH-LEHAM (בְּתֵי-לְחָם: Beth-leham). I. One of the oldest towns in Palestine, already in existence at the time of Jacob's return to the country. Its earliest name was Ephrath or Ephratha (see Gen. xxxv. 16, xviii. 7: Josh. xv. 60, LXX.), and it is not till long after the occupation of the country by the Israelites that we meet with it under its new name of Bethlehem. Here, as in other cases (comp. Beth-meon, Beth-diblathaim, Beth-por), the "Beth" appears to mark the bestowal of a Hebrew appellation; and if the derivations of the Lexicons are to be trusted, the name in its present shape appears to have been given to a town conquered by the earlier Ephratah into Hebrew language and idiom, just as the Arabs have in their turn, with a further slight change of meaning, converted it into Beit-lâm (house of flesh).

However this may be, the ancient name lingered as a familiar word in the mouths of the inhabitants of the place (Ruth ii. 11; 1 Sam. xvii. 12), and in the poetry of the Psalms and Prophets (Ps. cxxxi. 6; Mic. v. 2) to a late period. [Ephrath.] In the genealogical lists of 1 Chr. it recurs, and Ephrath appears as a person — the wife of Caleb and mother of Hur ("ם"נה) (ii. 19, 51, iv. 4; the title of "father of Bethlehem" being bestowed both on Hur (iv. 4) and on Salma, the son of Hur (i. 51, 54). The name of Salma recalls a very similar name intimately connected with Bethlehem, namely, the father of Boaz, Salma (יְלַעֲשָׁה, Ruth iv. 20; A. V. "Salmon") or Salmon (יְלַעֲשָׁה), verse 21). Hur is also named in Ex. xxxi. 2 and 1 Chr. ii. 20, as the father of Uri the father of Bezalel. In the East a trade or calling remains fixed in one family for generations; and if there is any foundation for the tradition of the Targum, that Jesse the father of David was "a weaver of the veils of the sanctuary" (Targ. Jonathan on 2 Sam. xvi. 19), he may have inherited the accomplishments and the profession of his art from his forefather, who was "filled with the Spirit of God," "to work all manner of works," and amongst them that of the embroiderer and the weaver (Ex. xxxv. 35).5

After the conquest Bethlehem appears under its own name Beth-lehem-judah (Judg. xvii. 7; 1 Sam. xvii. 12; Ruth i. 1, 2), possibly, though hardly probably, to distinguish it from the small and more place of the same name in Zebulun. As the Hebrew text now stands, however, it is omitted altogether from the list of the towns of Judah in Joshua xv. though retained by the LXX. in the eleven names which they insert between verses 59 and 60. Among these it occurs between Theko (Tekoa), Thekâ (comp. 1 Chr. iv. 4, 5), and Phanger (? Peor, פָּהָג). This omission from the Hebrew text is certainly remarkable, but it is quite in keeping with the obscurity in which Bethlehem remains throughout the whole of the sacred history. Not to speak of the later event which has made the name of Bethlehem so familiar to the whole Christian and Mussulman world, it was, as the birthplace of David, the scene of a most important occurrence to ancient Israel. And yet from some cause or other it never rose to any eminence, nor ever became the theatre of any action or business. It is difficult to say why Hebron and Jerusalem, with no special associations in their favor, were fixed on as capitals, while in the place which the great Israelite king and his people occupied, in which he was first born and spent his youth remained an "ordinary Judaeo village."

No doubt this is in part owing to what will be noticed presently — the isolated nature of its position; but that circumstance did not prevent Gibeah, Ramah, and many other places situated on eminences from becoming famous, and is not sufficient to account entirely for such silence respecting a place so strong by nature, commanding one of the main roads, and the excellence of which as a military position may be safely inferred from the fact that at one time it was occupied by the Philistines as a garrison (2 Sam. xxi. 14; 1 Chr. xi. 16).7

Though not named as a Levitical city, it was apparently a residence of Levites, for from it came the young man Jonathan, the son of Gershom, who became the first priest of the Levites at their new northern settlement (Judg. xvii. 7, xviii. 30), and from it also came the conceiver of the other Levite whose death at Gibeah caused the destruction of the tribe of Benjamin (xix. 1-9).

The book of Ruth is a page from the domestic history of Bethlehem: the names, almost the very persons, of the Bethlehemites are there brought before us; we are allowed to assist at their most peculiar customs, and to witness the very springs of those events which have conferred immortality on the name of the place. Many of these customs were doubtless common to Israel in general, but one thing must have been peculiar to Bethlehem.

What most strikes the view, after the charm of the general picture has lost its first hold on us, is the intimate connection of the place with Moab. Of the origin of this connection no record exists, nor hint of it has yet been discovered, but it continued in force for at least a century after the arrival of Ruth, till the time when her great grandson could find no more secure retreat for his parents from the fury of Saul, than the house of the king's beam" (whatever the "beam" may be) which occur in the accounts of giants or mighty men slain by David or his heroes, but not in any unconnected

4 At the date of the visit of Benjamin of Tudela, there were still "twelve Jews, dyers by profession, living at Beth-lehem" (Benj. of Tudela, Asher, i. 75).

5 May not this elucidate the allusions to the "weaver's beam" (whatever the "beam" may be) which occur in the accounts of giants or mighty men slain by David or his heroes, but not in any unconnected with him.
of Moab at Mifreh (1 Sam. xxxii. 3, 4). But whatever its origin, here we find the connection in full vigor. When the famine occurs, the natural resource is to go to the country of Moab and "continue there;" the surprise of the city is occasioned not at Naomi's going, but at her return. Ruth was "not like" the handmaids of Boaz; some difference of feature or complexion there was doubtless which distinguished the "children of Lot" from the children of Abraham, Isaac, and Jacob; but yet she gleams after the reapers in the field without molestation or remark, and when Boaz in the most public manner possible proclaims his intention of taking the stranger to be his wife, no voice of remonstrance is raised, but loud congratulations are expressed, the parallel in the life of Jacob occurs at once to all, and a blessing is invoked on the head of Rachel, that she may be like the two daughters of the Mesopotamian Nahor, "like Rachel and like Leah, who did build the house of Israel." This, in the face of the strong denunciations of Moab contained in the Law, is, to say the least, very remarkable.²

The elevation of David to the kingdom does not appear to have affected the fortunes of his native place. The residence of Saul acquired a new title specially from him, by which it was called even down to the latest time of Jewish history (2 Sam. xxi. 6; Joseph. B. J. v. 2 § 1, 1.מֶּשֶבֶּנהוּ), but David did nothing to dignify Bethlehem, or connect it with himself. The only touch of recollection which he manifests for it, is that recorded in

Bethlehem.

the well-known story of his sudden longing for the water of the well by the gate of his childhood (2 Sam. xxiii. 15).

The few remaining casual notices of Bethlehem in the Old Testament may be quickly enumerated. It was fortified by Rehoboam (2 Chr. xi. 6). By the time of the Captivity, the inn of Chimham by (7'N = "close to") Bethlehem, appears to have become the recognized point of departure for travellers to Egypt (Jer. xlii. 17) — a caravanserai or khana (7'N'N; see Stanley, App. § 90), perhaps the identical one which existed there at the time of our Lord (καραβάσανα), like those which still exist all over the east at the stations of travellers. Lastly, "Children of Bethlehem," to the number of 125, returned with Zerubbabel from Babylon (Ezr. ii. 21; Neh. vii. 26).

a Moab appears elsewhere in connection with a place in Judah, Jeshobboam (1 Chr. iv. 22). We might be tempted to believe the name merely another form of Bethlehem, if the context — the mention of Moab, and Moabites, places on the extreme west of the tribe — did not forbid it.

b In the Greek copies of St. Matthew the name is In the New Testament Bethlehem retains its distinctive title of Bethlehem judah (Matt. ii. 1, 5), and once, in the announcement of the angels, the "city of David" (Luke ii. 4; and comp. John vii. 42: Κατὰ τό ισραήλ: εἰσίν οἱ δικαιούμενοι). Its connection with the history of Christ is too familiar to all to need any notice here; the remark should merely be made that as in the earlier history less is recorded of the place after the birth of David than before, so in the later nothing occurs after the birth of our Lord to indicate that any additional importance or interest was fastened on the town. In fact, the passages just quoted, and the few which follow, exhaust the references to it in the N.T. (Matt. ii. 6, 8, 16; Luke ii. 15).

After this nothing is heard of it till near the middle of the 21st century, when Justin Martyr speaks of our Lord's birth as having taken place in a certain

given as Ψάργωνας, but in the more ancient Syrian recension lately published by Mr. Cureton it is, as in the O.T., Bethlehem-judah.

c Observe that this phrase has lost the meaning which it bears in the O. T., where it specially and invariably signifies the fortress of the Jebusites, the fastness of Zion (2 Sam. v. 7, 9; 1 Chr. xi. 6, 7).
ain cave very close to the village," which cave he goes on to say had been specially pointed out by Isaiah as "a sign." The passage from Isaiah to which he refers is xxi. 13-19, in the LXX. version of which occurs the following—"He shall dwell on high: His place of defense shall be in a lofty cave of the strong rock" (Justin, Dial. c. Tryph. §§ 78, 70). Such is the earliest supplement we possess to the meagre indications of the narrative of the Gospels; and while it is not possible to say with certainty that the tradition is true, there is no reason, for discrediting it. There is nothing in itself improbable—as there certainly is in many cases where the traditional scenes of events are hid in caverns—in the supposition that the place in which Joseph and Mary took shelter, and where was the "manger" or "stall" (whatever the φαγητόν may have been),3 was a cave in the limestone rock of which the eminence of Bethlehem is composed. Nor is it necessary to assume that Justin's quotation from Isaiah is the ground of an inference of his own; it may equally be an authority happily adduced by him in support of the existing tradition.

But the step from the belief that the nativity may have taken place in a cave, to the belief that the present subterraneous vault or crypt is that cave, is a very wide one. Even in the 150 years that had passed when Justin wrote, some doubt had been cast upon the genuineness of the tradition that the birth of Christ had happened at Bethlehem; but it is difficult to believe that the true spot could have been accurately preserved. In that interval—an interval as long as that between the landing of William III. and the battle of Waterloo—not only had the neighborhood of Jerusalem been overrun and devastated by the Romans at the destruction of the city, but the emperor Hadrian, amongst other desecrations, had actually planted a grove of Alonius at the spot (Lucus inuentor). (Justin, Jerome, Ep. Pauli.) This grove remained at Bethlehem for no less than 180 years, namely, from A. D. 135 till 315. After this the place was purged of its abominations by Constantine, who about A. D. 330 erected the present church (Enseh. Viit. Const. iii. 40. See Tobler, 102, note). Conceive the alterations in the ground implied in this statement!—a heathen sanctuary established and a grove planted on the spot—that grove and those groves demolished to make room for the Basilica of Constantine!

The modern town of Beil-bolin (Bethlehem in Arabic) lies to the E. of the main road from Jerusalem to Hebron, 8 miles from the former. It covers "the E. and N. E. parts of the ridge of a "long gray hill" of Jura limestone, which stands nearly due E. and W., and is about a mile in length. The hill lies a deep valley on the N. and mother on the S. The west end shelves down gradually to the valley; but the east end is bolder, and overlooks a plain of some extent. The slopes of the ridge are in many parts covered by terraced gardens, shaded by rows of olives with figs and vines, the terraces sweeping round the contour of the hill with great regularity. On the top of the hill lies the village in a kind of irregular triangle (Stewart), at about 150 yards from the apex of which, and separated from it by a vacant space on the extreme eastern part of the ridge, spreads the noble Basilica of St. Helena, "half church, half fort," now embraced by its three convents, Greek, Latin, and Armenian.

This is not the place for a description of the "holy places" of Bethlehem. All that can be said about them has been well said by Lord Nugent (i. 15-21) and Mr. Stanley (438-442). (See also, though interspersed with much irrelevant matter, Stewart, 246, 334–5.) Of the architecture of the church very little is known: for a resume of that little see Ferguson's Handbook of Architecture, 524; also Salzmann's Photographs and the Etude accompanying them (p. 72). One fact, of great interest—probably the most genuine about the place—is associated with a portion of the crypt of this church, namely, that here "beside what he believed to be the cradle of the Christian faith," St. Jerome lived for more than 30 years, leaving a lasting monument of his sojourn in the Vulgate translation of the Bible.

In the plain below and east of the convent, about a mile from the walls, is the traditional scene of the angels' appearance to the shepherds, a very small, poor village called Beit-Nabhar, to the E. of which are the unimportant remains of a cave-church. These buildings and ruins are surrounded by olive-trees (Setzton, ii. 41, 42). Here in Arculf's time, "by the tower of Adra," was a church dedicated to the three shepherds, and containing their monuments (Arculf. 6). But this plain is too rich ever to have been allowed to lie in posturage, and it is more likely to have been then occupied, as it is now and as it doubtless was in the days of Ruth, by cornfields, and the sheep to have been kept on the hills.4

The traditional well of David (2 Sam. xxiii. 15) a group of three cisterns is more than half a mile away from the present town on the other side of the wady on the north. A few yards from the western end of the village are two apertures, which have the appearance of wells; but they are merely openings to a cistern connected with the aqueduct below, and we have Dr. Robinson's assurance that there is now no well of living water in or near the town.

The population of Beteil-bolin is about 3000 souls, entirely Christians. All travellers remark the good looks of the women (Edeh), the substantial, clean appearance of the houses, and the general air of comfort (for an eastern town) which prevails. G. 5

* In regard to the well at Bethlehem (1) it should be remarked that David (see 2 Sam. xxi. 15) longed not for "living water" but for that from the "reservoir" or "cistern" (as נגש signifies, see Fürst: Sept. lexikon: Vulg. cisternam) at the gate of Bethlehem. The writer in approaching Beth lehem from the south (April 21st, 1852) found a little stream running down the steep bank on that side, and at the top, on entering the town, drank of the refreshing water from a reservoir there, said it is as well to remember that the "stable" and its appendages are the creations of the imagination of poets and painters, with no support from the Gospel narrative.

[Dr. Stanley mentions, and recurs characteristically interesting fact, that the present roof is constructed from English oak given to the church by Edward IV. (S. S. P. 141, 432.) Tobler, 104, note.]

BETHLEHEM

adduces the authority of Eusebius that the present Church is the work of Justinian, who destroyed that of Constantine as not sufficiently magnificent.

["Ἄργουσαλάτους (Luke ii. 5; A. V. "abiding in the field") has no special reference to "field" more than hill, but means rather "passing the night out of doors;" κόρα also means a "district" or neighborhood, with no special topographical significance.]
to be supplied by an aqueduct from Solomon's Pools. The same springs must have furnished Bethlehem with water of old (there is no better water in all that region now); and supposing I had to have been, as he probably was, in the wilderness of Teken at the time, it was the water of which he would naturally think not only as so good in itself, but actually nearer to him than any other. The "traditional well," half a mile or more northeast of Bethlehem, contains water at times (Kitter, Edk.

BETH-PAZEZ

BETH-PAZEZ (בְּתַ-פַּצֶּז [house of dispersion]): Ḫermon; Alex. Bəṭḥəṣeq; Beth-ḥas, a town of Issachar named with Ez-liddah (Josh. xix. 21), and of which nothing is known.

G.

BETH-PEOR (בְּתַ-פֹּהַּר [house of Peor]): Ḫermon; Alex. Bəṭḥəṣeq; Beth-ḥas; Jericho, and six miles above Lhahis or Beth-haran (Enselem. Omastoneon). It was in the possession of the tribe of Reuben (Josh. xiii. 29). In the Pentateuch the name occurs in a formula by which one of the last halting-places of the children of Israel is designated — "the ravine (נָּבָה 7) over against (בּוֹתֵּר) Beth-peor" (Deut. ii. 39, iv. 40). In this ravine Moses was probably buried (xix. 6).

Here, as in other cases, the Beth may be a Hebrew substitution for Bad.

G.

BETHPHAGE [4 syl.]: (Bəṭḥpəgah and Bəṭחpəgah): Bethphage: quasi נָּבָה ַּר, house of unripe figs), the name of a place on the mount of Olives, on the road between Jericho and Jerusalem. From the two being twice mentioned together, it was evidently close to Bethany (Matt. xxi. 1; Mark xi. 1; Luke xix. 29), and from its being named first of the two in the narrative of a journey from east to west, it may be presumed that it lay, if anything, to the eastward of Bethany. The fact of our Lord's making Bethany his nightly lodging place (Matt. xxi. 17. xce.) is no confirmation of this (as Winde would have it); since he would doubtless take up his abode in a place where He had friends, even though it were not the first place at which He arrived on the road. No remains which could answer to this position have however been found (Rob. i. 433), and the traditional site is above Bethany, half-way between that village and the top of the mount.

By Enselem and Jerome, and also by Origen, the place was known, though no indication of its position is given; by the former it is called קָוָה by Jerome Ṣellaha. They describe it as a village of the priests, possibly situated on the southern boundary of the "Mount of Olives," above the village of Siloam, and therefore west of Bethany.

The name of Bethphage, the signification of which as given above is generally accepted, is, like those of Bethany [?], Caiphas, Bezeba, and the Mount of Olives itself, a testimony to the ancient fruitfulness of this district (Stanley, 187). G.

BETH-PHOLET, Neh. xi. 26. [BETH-PALET.]

BETH-RAPHA (בְּתַ-רָפָה, house of Rapha, or of the giant): Ḫermon; Alex. Bəṭḥəṣeq; Beth-ḥas; a name which occurs in the genealogy of Josiah as the son of Esthon (1 Chr. iv. 12 only). There is a Rapha in the line of Benjamin and elsewhere, but no apparent connection exists between these and this, nor has the name been identified as belonging to any place.

G.

BETH-REHOB (בְּתַ-רְּהוֹב, house of Reohob, or of room): Ḫermon; Alex. Toṣh: [in 2 Sam.]: ʿAḏar: Reob): a place mentioned as having near it the valley in which lay the town or Laish or Dan (Judg. xviii. 28). It was one of the little kingdoms of Aram or Syria, like Zobah, Maacah, and Ishtar (compare the reading of the Alex. LXX. above), in company with which it was hired by the Ammonites to fight against David (2 Sam. x. 6). In ver. 8 the name occurs in the shorter form of Reohob, in which form it is doubtless again mentioned in Num. xiii. 31. Being, however, "far from Zidon" (Judg. xviii. 28), this place must not be confounded with two towns of the name of Rehobo in the territory of Asher. (Rapha, or Rehobo.) The theory that the present name of the ancient place is represented by the modern Ḥelb, a fortress commanding the plain of the Ḥelb, in which the city of Dan (Tell el-Kudîhay) lay, hadaderzer the king of Zulah is said to have been the son of Reob (2 Sam. vii. 13). G.

BETHSAIDA (בְּתַ-סְאִידָה: יְבַּת-סֵאִידָה, house of fish: Bethschois), the name of two places in Northern Palestine:—

1. "Bethsaida of Galilee" (John xii. 21), a city (�דיאס), which was the native place of Andrew, Peter, and Philip (John i. 44, xii. 21) in the land of Gennesaret (רְפָה יִבְּרֹע פָּרָח) (Mark vi. 45; comp. 53), and therefore on the west side of the lake. It was evidently in near neighborhood to Capernaum and Chorazin (Matt. xi. 21; Luke x. 13; and comp. Mark vii. 35, with John vi. 16), and, if the interpretation of the name is to be trusted, close to the water's edge. By Jerome (Comm. in Execli. ix. 1) and Eusebius (Onom.) these towns and Tiberias are all mentioned together as lying on the shore of the lake. Epiphanius (Adv. Het. iii.) says of Bethsaida and Capernaum "οἱ μετάφησαν τον τόπον τῆς διαηρώσεως." Wilkald (A. D. 722) went from Megiddo to Capernaum, thence to Bethsaida, and then to Chorazin. These ancient notices, however, though they fix its general situation, none of them contain any indication of its exact position, and as, like the other two towns just mentioned, its name and all memory of its site have perished, no positive identification can be made of it. Dr. Robinson places Bethsaida at 'Ain el-Tibiakoh, a short distance north of Khâlad Miyeh, which he identifies with Capernaum (iii. 355).

2. By comparing the narratives (of the same event) contained in Mark vi. 31-53 and Luke ix. 10-17, in the latter of which Bethsaida is named as the spot at which the miracle took place, while in the former the disciples are said to have crossed the water from the scene of the event "to Bethsaida in the land of Gennesaret" — it appears certain that the Bethsaida at which the 5000 were fed must have been a second place of the same name on the east of the lake. Such a place there was at the northeastern extremity — formerly a village (טיים), but rebuilt and adorned by Philip the Tetrarch, and raised to the dignity of a town under the name of Julias, after the daughter of the emperor (Jos. Ant. xiv. 2. § 1: B. J. ii. 9, § 1, iii. 16, § 7). Here, in a magnificent tomb, Philip was buried (Jos. Ant. xviii. 4. § 6).
Of this Bethsaida we have certainly one and probably two mentions in the Gospels: 1. That named above, of the feeding of the 5000 (Luke ix. 10). The miracle took place in a πάρος ἐρῶμα—a vacant, lonely spot, somewhere up in the rising ground at the back of the town, covered with a profusion of green grass (John vi. 3, 10; Mark vi. 39; Matt. xiv. 19), and in the evening the disciples were constrained to send the water and went home across the lake (ἐν τῷ παρῳ) to Bethsaida (Mark vi. 14), or as St. John (vi. 17) and St. Matthew (xiv. 34) more generally express it, towards Capernaum, and to the land of Gennesaret. The coincidence of the two Bethsidas occurring in the one narrative, and that on the occasion of the only absolutely certain mention of the eastern one, is extraordinary. In the very ancient Syrian recension (the Nitrian) just published by Mr. Curton, the words in Luke ix. 10, "belonging to the city, called Bethsaida," are omitted.

2. The other, highly probable, mention of this place is in Mark viii. 22. a) If Balnahmuth (viii. 10) was on the west side of the lake, then was Bethsaida on the east: because in the interval Christ had departed by ship to the other side (13). And with this well accords the tradition immediately after of the villages of Cesarea Philippi (27), and of the "northern mountain of the transjordan" (ix. 25), which, as Mr. Stanley has ingeniously suggested, was, not the traditional spot, but a part of the Hermon range somewhere above the source of the Jordan (S. P. 299).

Of the western Bethsaida no mention is made in Josephus, and until the discovery by Reland of the fact that there were two places of the name, one on the west, and one on the east side, the elucubrations of the various occurrences of the two was one of the hardest kinds of sacred geography (see Cellarius, Novit. ii. 560).

G. BETHSAMOS (Βαθησαμως: [Vat. Barasa- mower]: Alex. Βαθησαμω: [Alb. Bethsamos: [Chelmsford], 1 Esdr. v. 18. [Beth-aymaveth].

BETH-SAN [Βαθησαν: Alex. in 1 Macc. xii. Betha: Bethsan]: 1 Macc. vii. 35, 36, 40, 41. [Beth-shean.]}

BETH-SHEAN (Βαθησαιν, -αν: Vat. Bethe- shean, Bethshean, Beth: Alex. Βαθησαιν: Bethsam). A city which, with its "daughter" towns, belonged to Manasseh (1 Chr. vii. 29), though within the limits of Issachar (Josh. xvii. 11), and therefore at the west of Jordan (comp. 1 Macc. v. 52) — but not mentioned in the lists of the latter tribe. The Caunuates were not driven out from the town (Judg. i. 27). In Solomon's time it seems to have given its name to a district extending from the town itself to Abel-meholah: and "all Beth-shan" was under the charge of one of his commissariat officers (1 K. iv. 12).

The corpses of Saul and his sons were fastened up to the wall of Beth shean by the Philistines (1 Sam. xxxi. 10, 12) in the open "street" or space (27), which, then as now — fronted the gate of the eastern town (2 Sam. xxii. 12). From this time we lose sight of Beth-shean till the period of the Maccabees, in connection with whose exploits it is mentioned more than once in a cursory manner (1 Macc. v. 52; comp. 1 Macc. xii. 40, 41).

The name of Scythopolis (Σκυθόπολις παραστάσις) appears for the first time in 2 Macc. xii. 29. [Scythopolis.] This name, which it received after the exile, and under the Greek dominion, has not survived to the present day; as in many other cases (comp. § 88) the old Semitic appellation has survived, and the place is still called Beisan. It lies in the Ghér or Jordan valley, about twelve miles south of the sea of Galilee, and four miles west of the Jordan. The site of the town is on the brow of the descent by which the great plain of Esdraelon drops down to the level of the Ghér. A few miles to the southwest are the mountains of Gilboa, and close beside the town runs the water of the Jumblilud, the fountain of which is by Jeremiah, and is in all probability the spring by which the Israelites encamped before the battle in which Saul was killed (1 Sam. xxiii. 14). b) Three other large brooks pass through or by the town, and in the fact of the abundance of water, and the exuberant fertility c) of the soil consequent thereon, as well as in the power of using their chafirs, which the level nature of the country near the town conferred on them (Josh. xvii. 16), besides the secret of the hold which the Corinthians retained on the place.

If Jabesh-Gilead was where Dr. Robinson conjectures — at el-Bhir in the Wady Yabis — the distance from thence to Beisan, which it took the men of Jabesh "all night" to traverse, cannot be less than twenty miles.

G. a) For fuller information respecting this important site (Beisan) — its various ruins (Herod, Grecian, Roman, Christian, Saracenic), its abundant waters which gush from perennial fountains, its fertility and luxuriant vegetation, its Tell or acropolis (200 feet high and nearly perpendicular), which affords by Philip, since being in his tetarchia it would need a different name from Bethsaida on the Galilean side. See also, for this view, Hug, Einl. i. § 4; J. F. Thruopp in the Journ. of Class. and Sac. Philol., ii. 392 ft., and Tregelles, ibid. iii. 145 ff.

b) Unless the conjecture of Schwarz (148, note) be accepted, that the words (קְנִיְהֹן יִבְשַׁא, house of the north; A. V. every house) in 1 K. xxii. 29, should be rendered Beth-shean.

c) The exactness of the description in this description is seriously impaired in the A. V. by the substitution of "a fountain" for "the fountain" of the original.

So great was this fertility, that it was said by the Rabbis, that if Paradise was in the land of Israel, Beth-shean was the gate of it: for that its fruits were the sweetest in all the land. (See the quotations in Lightfoot, Chron. Crit. ix.)
the finest panoramas, next to Gerizim, in all central Palestine" — the reader may see Robinson's *Later Bibl. Res.* ii. 326 ff. (who visited the place in his second journey); Thomson's *Land and Book*, i. 173-175; Tristram's *Land of Israel*, pp. 500-504; Porter's *Monh. for Syr. and Palæst.*, ii. 354 ff.; Van de Velde's *Journey through Syr. and Palæst.*, ii. 369 ff.; and Sepp's *Jerusalem u. des heiligen Land*, ii. 62 (though this last writer appears to have only seen the region from *Zer'ah* (literated). But from *Zer'ah*, which is on the brow of a steep declivity, one can easily look down into the Ghor upon Beth-shemesh, so exactly described in 1 K. iv. 12 as "beneath Jerehed." (See also *Bibl. Res.* iii. 166, 1st ed., and Wilson's *Lands of the Bible*, ii. 87.)

**BETH-SHEMESH** (בִּית-שֶּׁמֶשׁ), in pause בִּית-שֶׁמֶשׁ, house of the sun: παῦλος ἄλογον, Batth-σαμώσ, [=etc.] Bethnances), the name of several places. I. One of the towns which marked the north boundary of Judah (Josh. xv. 10), but not named in the lists of the cities of that tribe. It was in the neighborhood of Kirjath-jearim and Timnah and therefore in close proximity to the low-country of Philistia. The expression "went down" in Josh. xv. 10: 1 Sam. vi. 21, seems to indicate that the position of the town was lower than Kirjath-jearim; and it is in accordance with the situation that there was a valley (מַקֵּב) of cornfields attached to the place (1 Sam. vi. 13).

From Ekron to Beth-shemesh a road (דְּבַשָּׁת, דְּבַשָּׁת) existed, along which the Philistines sent back the ark after its calamitous residence in their country (1 Sam. vi. 9, 12); and it was in the field of "Joshua the Beth-shemite" (בְּנֵי בָּשְׁמֶשׁ) that the "great Abel" (whatever that may have been) was, on which the ark was set down (1 Sam. vi. 18). Beth-shemesh was a "suburb city," allotted to the priests (Josh. xxi. 16; 1 Chr. vi. 39); and it is named in one of Solomon's commissariat districts under the charge of Ben-Deker (1 K. iv. 11). It was the scene of an encounter between Jehovah, king of Israel, and Amaziah, king of Judah, in which the latter was worsted and made prisoner. 2 K. xiv. 11, 13; 2 Chr. xxv. 21, 23. Later, in the days of Ahaz, it was taken and occupied by the Philistines, together with several other places in this locality (2 Chr. xxvii. 18).

By comparison of the lists in Josh. xv. 10, xix. 41, 43, and 1 K. iv. 9, it will be seen that *Besheshem*, "city of the sun," must have been identical with Beth-shemesh, if being probably the older form of the name; and again, from Judg. i. 33, it appears as if Har-cheres, "mount of the sun," were a third name for the same place; suggesting an early and extensive worship of the sun in this neighborhood. [Ir-Sheshem; Hebrs.]

Beth-shemesh is now "Ain-Shems. It was visited by Dr. Robinson, who found it to be in a position exactly according with the indications of Scripture, on the northwest slopes of the mountains of Judah — a low plateau at the junction of two fine streams (Rob. iii. 153) — about two miles from the west Philistia plain, and seven from Ekron (ii. 224-6). The origin of the "Ain ("spring") in the modern name is not obvious, as no spring appears now to exist at the spot; but the Shems and the position are decisive.

2. *[Beshemâs; Alex. Bâshâs.*] A city on the border of Issachar (Josh. xix. 24).

3. *[Beshemâs; Alex. âshâm.*] One of the "seed cities" of Naph- tali, twice named (Josh. xix. 38; Judg. i. 33) and on both occasions with BETH-ANATH. The Cannan- ite inhabitants were not expelled from either place, but became tributaries to Israel. Jerome's expression (Onom. Bethanath) in reference to this is perhaps worthy of notice, "in quia cultores pristini mansasent," possibly glancing at the worship from which the place derived its name.

4. By this name is once mentioned (Ex. xil. 13) an idolatrous temple or place in Egypt, which the LXX. render by Ἰαγονάθα ἠδῶν, i. e. the famous Heliopolis; Vulg. domus solis. In the middle ages Heliopolis was still called by the Arabs 'Ain Shems (Edrisi, dc, in Rob. i. 25). [AVEN; ON.]

**BETH-SHEMITE, THE** (בְּנֵי בָּשְׁמֶשׁ), בְּנֵי בָּשְׁמֶשׁ: חֶבֶשָּׁה בָּשְׁמֶשָּׁה בָּשְׁמֶשָּׁה [Vat.esseract.; Alex. ο Βαπασεττής, Bethsime, Bethsimite]. Properly "the Beth-shemite," an inhabitant of Beth- shemesh (1 Sam. vi. 14, 18). The LXX. in the former passage refer the words to the field and not to Joshua (τὸν ἐν Βασισεί). W. A. W.

**BETH-SHITTAH** (בְּנֵי שִׂטָּה), house of the aspen: בֵּית-שִׂטָּה: בֵּית-שִׂטָּה: בֵּית-שִׂטָּה [Alex. Barassota; (Comp. Bwassatet; Bethseba), one of the spots to which the flight of the host of the Midianites extended after their discomfiture by Gideon (Judg. vii. 22). Both the narrative and the name (comp. "Abel-shihim," which was in the Jordan valley opposite Jericho) require its situation to be somewhere near the river, where also Zereshath (probably Zareatha or Zartan) and Abel-meholah doubtless lay: but no identification has yet been made of any of these spots. The Shittah mentioned by Robinson (iii. 356) and Wilson (Ritter, Jordan, p. 414) is too far to the west to suit the above requirements. Josephus's version of the locality is absolutely in favor of the place being well watered: ἐν καλὸν χαράδρας περιλημναμένον χώρον (Ant. v. 6, § 5).

**BETHSU'BA** (בֵּית-שׁוֹבָם), בֵּית-שׁוֹבָם: בֵּית-שׁוֹבָם: בֵּית-שׁוֹבָם [Alex. generally Bethsûbam: Bethsouam, exc. 1 Mac. iv. 29, Betharon], 1 Mac. iv. 29, 61, vi. 7, 26, 31, 49, 50, lx. 52, x. 14, 65, xiv. 7; 2 Mac. xi. 5, xiii. 19, 22. [BETH-ZUR.]

**BETH-TAPPU'AH** (בֵּית-תָּפָר), בֵּית-תָּפָר: בֵּית-תָּפָר: בֵּית-תָּפָר [Alex. generally Beththopah, Beththophah; Beththapone], one of the towns of Judah, in the mountainous district, and near Hebron (Josh. xv 53; comp. 1 Chr. ii. 43). Here it has actually been discovered by Robinson under the modern name of Tefîth; 13 hour, or say 5 miles, W. of Hebron, on a ridge of high table-land. The terraces of the ancient cultivation still remain in use, and though the "apples" have disappeared, yet olive-groves and vineyards with fields of grain surround the place on every side (Rob. ii. 71; Schwarz, 105).

The name of Tappuah was borne by another town of Judah which lay in the rich lowland of the Shephelah. [APPLE; TAPPULAH.]

**BETHUEL** (בְּתֵעֶל, בְּתֵעֶל: בְּתֵעֶל [man of God]): Ba-thôôlah: Joseph. Ba-thôôlah: Bethuel), the son of Nahor by Milcah; nephew of Abraham, and father
BETHUEL

Bethuel (Gen. xxii. 22, 23; xxiv. 15, 24, 47; xxviii. 2). In xxv. 20, and xxviii. 5, he is called "Bethuel the Syrian" (i.e. Aramaic, "बेथुल"). Though often referred to as above in the narrative, Bethuel only appears in person once (xxiv. 50).

Upon this an ingenious conjecture is raised by Prof. Hunt (Coincidences, i. § iv.) that he was the subject of some simile or other imagery. The Jewish tradition, as given in the Targum Ps. Jonathan on Gen. xxiv. 55 (comp. 331), is that he died on the morning after the arrival of Abraham's servant, owing to his having eaten a sauce containing poison at the meal the evening before, and that on that account Laban requested that his sister's departure might be delayed for a year or ten months. Josephus was perhaps aware of this tradition, since he speaks of Bethuel as dead (Ant. i. 16, § 2). G.

BETHUEL (בֶּתְעִיל [son of God]; Bāth-ū-) [Vat. Bāthu-]: Alex. Βαθουλ. 1 Chr. iv. 39. [B ethul.]

BETHUL (בֵּיתוּל as above; Arab. Bāthūl;) [Vat. Bathu-]; a town of Simeon in the South, named with Eloth and Hormah (Josh. xix. 4). In the parallel lists in Josh. xv. 30 and 1 Chr. iv. 30 the name appears under the forms of Geshul (גְּשֶׁל) and Bethul; and probably also under that of Bethul in Josh. xii. 16; since, for the reasons urged under Bethel, and also on account of the position of the name in this list, the northern Bethel can hardly be intended. [B ethel.]

BETHULIA (בֵּיתוּליה; [Vat. Jud. iv. 6] בֵּיתוּליא; Alex. commonly Βαθουλια, and so Vat. according to Holowes, Sim. Barsoom, etc. Josh. iv. 6, "Aia; Bethulio"); the city which was the scene of the chief events of the book of Judith, in which book only does the name occur. Its position is there described with much minute detail. It was near to Dathaim (iv. 6), on a hill (gopos) which overlooked (ἀνεματορίζω) the plain of Esdraelon (vi. 11, 14, vii. 7, 10, xiii. 10) and commanded the passes from that plain to the country of Manasseh (iv. 7, vii. 1); in a position strong that Holopherne advanced on the idea of taking it by attack, and determined to reduce it by possessing himself of the two springs or wells (πηγαί) which were under the "city" in the valley at the foot of the eminence on which it was built, and from which the inhabitants derived their chief supply of water (vi. 14, vii. 7, 13, 21). Notwithstanding this detail, however, the identification of the site of Bethulia has hitherto delayed all attempts, and is one of the greatest puzzles of sacred geography; so much so as to form an important argument against the historical truth of the book of Judith (Rob. iii. 357-8).

In the middle ages, the name of Bethulia was given to "the Frank Mountain," between Bethlehem and Jerusalem (Rob. i. 479), but it is unnecessary to say that this is very much too far to the south to suit the narrative. More lately it has been assumed to have been Bethul (Coh. ii. 123), but again, if in other respects it would agree with the story, it is too far north. Von Hammer (Paris, p. 165-6) suggests Samaria, which is perhaps the nearest to probability. The rains of that town are on an "isolated rocky hill," with a plain of considerable extent to the east, and, as far as situation is concerned, naturally all but impregnable (Rob. ii. 312). It is about three miles from Dathaim, and some six or seven from Jehon (Engumnu) which stand on the very edge of the great plain of Esdraelon. Though not absolutely commanding the pass which leads from Jehon in Sebaethu and forms the only practicable ascent to the high country, it is yet sufficiently near to bear out the somewhat vague statement of Jud. iv. 6. Nor is it unnecessary to remember that Sennacherib actually endured a siege of two months from Tijazar Pasha without yielding, and that on a subsequent occasion it was only taken after a three or four months' investment, by a force very much out of proportion to the size of the place (Rob. ii. 313). G.

BETH-ZACHARIAS. [Bath-Za-cha-lias.]

BETH-ZUR (בֶּתוּז [house of rock]; בֶּתּוּז, בֶּתוּצָר; Bathurgoa, Bätturgoa, etc.; Bethzur, Bethzur, and in Macr. Bēthzer). a town in the mountains of Judah, named between Halhul and Gedor (Josh. xv. 58). As far as any interpretation can, in their present imperfect state, be put on the genealogical lists of 1 Chr. ii. 42-49, Beth-zur would appear from ver. 45 to have been founded by the people of Maon, which again had derived its origin from Hebron (see Num. xxvi. 31). Thus the question may be, "Is Beth-zur a "built," i.e. probably fortified—by Hezroben, with other towns of Judah, for the defense of his new kingdom (2 Chr. xi. 7). After the Captivity the people of Beth-zur assisted Nebuchadnezzar in the rebuilding of the wall of Jerusalem (Neh. iii. 16); the place had a "ruler" (בֶּתוּז), and the peculiar word Pelee (בֶּתוּז) is employed to denote a district or circle attached to it, and to some other of the cities mentioned here. [Topographical Terms.]

In the wars of the Macaebeans, Beth-zur or Beth- sura played an important part. It was fortified by Judas and his brethren that "the people might have a defense against Idumaea," and they succeeded in making it "very strong and not to be taken without great difficulty" (Jos. Ant. xii. § 5); so much so, that it was able to resist for a length of time the attacks of Simon Macaeus (i. 65) and of Lydias (2 Macc. iv. 5), the garrison having in the former case capitulated. Before Beth-zur took place one of the earliest victories of Judas over Lydias (1 Macc. iv. 29), and it was in an attempt to relieve it when besieged by Antiochus Epiphan, that he was defeated in the pass between Beth-zur and Bath-zacharias, and his brother Eleazar killed by one of the elephants of the king's army (1 Macc. vi. 13-19). The recovery of the site of Beth-zur, under the almost identical name of Bet-sir, by Wulcott and Robinson (i. 216, note: § 277), explains its impregnable, and also the reason for the choice of its position, since it commands the road from Beer-sheba and Hebron, which has always been the main approach to Jerusalem from the south.

A short distance from the Tell, on which are strewn the remains of the town, is a spring, "Ain Dafinthurah, which in the days of Jerome, and later, was regarded as the scene of the baptism of the Eunuch by Philip. The probability of this is elsewhere examined (Gaza); in the mean time it may be noticed that Bet-sir is not near the road to Gaza (Acts viii. 26), which runs much more to the northwest. [Bethsheba.] G.
BETOLIUS

• It shows how wonderfully the oldest names of the Bible have been preserved and transmitted to us that we find Halhul, Beth-zur and Gedor grouped together in Josh. xv. 58, and the same places represented on the modern map as Halhul, Beth-sir, and Jocder in the immediate vicinity of each other. (See Rob. Bibl. Res. iii. 277, and Wilson’s Lewis of the Bible, p. 385.) Enaeusius makes Beth-zur correctly 160 stadia or 20 Roman miles from Jerusalem; but in 2 Macc. xi. 5 it is said to be 5 stadia. Roland (Palestine, p. 65) calls the latter a mistake, which it certainly is. Some of the codices show attempts at correction. Grimm suggests (Exeg. Hund. zu den Apokryph. iv. 169) that the Maccabean writer confounded Beth-zur in the mountains of Judah with another place of the same or a similar name near Jerusalem, probably the present Moulhadian village Bet Sabur, half an hour from the city, which Tobler visited (Denkblatter aus Jerusalem, p. 616). The recovery of Beth-zur is due to Dr. Wolcott (Bibl. Scona, 1843, p. 56), formerly a missionary in Palestine.

It is impossible to say whether Philip baptized the eunuch here, because we are left in doubt as to the road by which the eunuch travelled from Jerusalem to Gaza. That carriages could pass there, and that it was one of the ways of making the journey between these places, cannot well be questioned. See Struven in Plozinien in Herzog’s Real-Encycl., xv. 161. Travellers have noticed the traces of a paved road near Beth-zur (Rob. Later Res. iii. 277) and the “vestiges of an ancient carriage road all along, from Jerusalem to Hebron” (Wilson, Landes of the Bible, i. 381). Stanley (Notices of Localities, p. 189) speaks of a Roman milestone there, as well as of the paved way. The veneration of early times, in the belief of this tradition (Jerome, Commen. s. v.), reared a chapel on the spot, the ruins of which are still to be seen. Naumer has discussed this question at some length (Anhang, iv.) in his Palestine, p. 449, and decides for Beth-zur as the probable scene of the baptism. Robinson proposes Wady-el-Husy, in the plain near Tell-el-Husy, since he thinks the party must have been near Gaza at the time (Bibl. Res. ii. 641). There is an interesting itinerary of a journey which Dr. Barclay (City of the Great King, pp. 571-578, 1st ed., London) made from Jerusalem to Gaza by way of Hebron, with special reference to this investigation. He heard of a place (Moyat es-Sid) in the same Wady Husy, which he would regard as the ḥūdār of which he was in quest. See further under GAZA.

H.

BETOLIUS (Bētolw; [Aiv. Bētolw; Adj. Bētolw]). 1 Esdr. v. 21. [BETHHEL.]

BETOMESOTHAM (Betomesosam [Vat. Basarmosam, Sinai, om.]) and BETOMAS- THEM (Batomesathem [Sin. Barmosanov: Συν. Betomesathem; Vulg. omits], a town “over against Edrom”, being the plain that is near Betham, Jud. iv. 6, x. 4), and which from the manner of its mention would seem to have been of equal importance with Betham itself. No attempt to identify either Betomesotham or Betham has been hitherto successful. [BETHULLA; BETHAM.]

G.

BETONIM (Bētonim [Vat. Beutonim; Alex. Botanuim]: Betoim), a town in the inheritance of the children of Gad, apparently on their northern boundary (Josh. xiii. 26). The word, somewhat differently pointed, occurs in Gen. xliii. 11, A. V. “nuts.” It is probably related to the modern Arabic word Buteim, Pistacia terebenth. G.

BETROTHING. [Marriage.]

BETOLIUS. [BETOLIUS.]

BEZAI (Bēzai [victory, or conqueror]; Basor, Bezeth, Byrith, [etc.: Bezeti], “Children of Beza,” to the number of 323, returned from captivity with Zerubbabel (Ezr. ii. 17; Neh. vii. 23). The name occurs again among those who sealed the covenant (Neh. x. 18). [BASSA.]

BEZAI/EBEL (Bēzai/ebel; Bezai/Bezel: Besele). 1. The architect to whom was confided by Jehovah the design and execution of the works of art required for the tabernacle in the wilderness (Ex. xxxi. 1-6). His charge was chiefly in all works of metal, wood, and stone. Bezelah being associated with him for the textile fabrics: but it is plain from the terms in which the two are mentioned (xxvii. 1, 2, xxviii. 22), as well as from the enumeration of the works in Bezael’s name in xxvii. and xxviii., that he was the chief of the two, and master of Aholiah’s department as well as his own. Bezelah was of the tribe of Judah, the son of Uri the son of Hur (or Chor). Hur was the offspring of the marriage of Caleb (one of the chiefs of the great family of Pharez) with Ephrath (1 Chr. ii. 19, 50), and one of his sons, or descendants (comp. Ruth iv. 29) was Salma, or Salmon, who is handed down under the title of “father of Bethlehem”: and who, as the actual father of Boaz, was the direct progenitor of king David (1 Chr. ii. 51, 54; Ruth iv. 21). [BETHELHEM; HUR.]

2. [Vat. Alex. Bezaelka]. One of the sons of Palaiah-moab who had taken a foreign wife, Ezr. x. 30.

BEZAI (Bēzai; Bezae: Beze): the name of two apparently distinct places in Palestine.

1. The residence of ADONI-BEZAI, i. e. the “lord of Bezae” (Judg. i. 5); in the “lot (Bēzai)” of Judah (verse 3), and inhabited by Canaanites and Perizzites (verse 4). This must have been a distinct place from —

2. [Vat. Abze for ev Bezek]. Where Saul numbered the forces of Israel and Judah before going to the relief of Jabesh-Gilead (1 Sam. xi. 8). From the terms of the narrative this cannot have been more than a day’s march from Jabesh; and was therefore doubtless somewhere in the centre of the country, near the Jordan valley. In accordance with this the mention in the Onomasticon of two places of this name seventeen miles from Nepopolis (Shechem), on the road to Beth-shean. The LXX. inserts ev Bēzai after the name, possibly alluding to some “high place” at which this solemn muster took place. This Josephus gives as Bālid (Ant. xvi. 3, § 5).

No identification of either place has been made in modern times.

* With reference to the first of these places, Cassel (Richter u. Ruth, pp. 5-7) argues that Bezek was not a city but a tract of country or district. Among his reasons are, that a battle resulting in
the slaughter of 10,000 (Judg. i. 5) indicates a wider field than a single town; that two battles were fought in Bezek (vers. 4, 5), the second evidently after a change of position; that a city in Judah so important as this could hardly fail to be mentioned on other occasions; and that the name (finding an analogy between קַרְבָּן and קַרְבָּן) points to a desolate region with a chalky soil or limestone cliffs, reflecting strongly the glare of the sun-light. This desert of Bezek (with which is to the origin of the name he compares the well-known Bezerah in North Africa) he thinks lay between the west side of the Dead Sea and the region of Tekoa, which answers so well to the above description (Ritter's Erkund. xvi. 653), and, further, lay on the line of march of Judah and Simeon if they broke up their camp in this expedition from Gilgal. Some of the reasons have weight, but the more probable exegesis recognizes but one battle, and the proposed etymology, or certainly this application of it, is at least precautions. That Bezek, at all events, was not far from Jerusalem, appears from the fact that the conquerors went thither immediately after their victory in that place.

II. BEZER [or] in the Wilderness (בֵּרֶזֶר) בֵּרֶזֶר הִנְּהַ יִשְׂרָאֵל: Bezer in solitudo, a city of the Reubenites, with "suburbs," in the Midian or deserts, set apart by Moses as one of the three cities of refuge on the east of the Jordan, and allotted to the Manassehites. (Deut. iv. 43; Josh. x. 8, xii. 61; 1 Chr. vii. 78). In the two last passages the exact specification, בֵּרֶזֶר הִנְּהַ יִשְׂרָאֵל, of the other two is omitted, but traces of its former presence in the text in Josh. xii. 36 are furnished us by the reading of the LXX. and Vulg. — הָעָבִר בֵּרֶזֶר הִנְּהַ יִשְׂרָאֵל, the latter being treated as a proper name, with the article prefixed, Bezer in solitude, a city of the Midianites. Bezer may be the Bezer of the books of Macra- boses. [Bezer.] G.

BEZER (בּּרֶזֶר) [or, metal] Bezar: [Vat. corrapt.] Alex. Bezaroph: Bezer, son of Zophah, one of the heads of the house of Asher. (1 Chr. vii. 37).

BEZETH (בֵּזֶת: [Sin. בֵּתֶז; Bab. Bezeth] Bethze- con), a place at which Ezechias encamped after leaving Jerusalem, and where there was a "great pit" (לְוִית הַגָּדוֹל) in 1 Mac. vii. 19. By Josephus (Ant. xii. 10, § 2) the name is given as "the village Bethzecath." (כְּפָאָה בֵּתְזֶה בְּחַלָּתָה), which recalls the name applied to the Mount of Olives in the early Syriac recension of the N. T. published by Mr. Curzon — Beth-Zith [rarely mentioned in the N. T.] in Can. Antiq. iii. 17, where the article is Simpson's MS. in 1 Mac. vii. 19). The name may thus refer either to the main body of the Mount of Olives, or to that branch of it to the north of Jerusalem, which at a later period was called Bezaeth. G.

BIKATAS (בֵּיקָטָא: Alex. Bikataes; [M. Bikates; Plut. Phlebinus], 1 Esdr. ix. 18. [Πηλείας].)

BIBLE (בִּבְלִי, LXX. : Biblios, Vulg.) — I. The application of this word, כָּרַת יִשְׂרָאֵל, to the collected books of the Old and New Testament is not to be traced further back than the 5th century. The terms which the writers of the New Testament use of the Scriptures of the Old are יִשְׂרָאֵל (2 Tim. iii. 15; 1 Pet. iii. 3), יְהֹוָה יִשְׂרָאֵל (2 Tim. iii. 15; Rev. xx. 2, v. 1), but with no distinctive meaning; nor does the use of יִשְׂרָאֵל בֵּית בִּבְלִי for the Hagiography in the preface to Ecclesiastes, or of בֵּית בִּבְלִי in Josephus (Ant. i. 6, § 2), indicate anything as to the use of יִשְׂרָאֵל בֵּית בִּבְלִי alone as synonymous with יִשְׂרָאֵל. The word employed by early Christian writers were naturally derived from the language of the New Testament, and the old terms, with epithets like מֵיתָא, מַלָּא, and the like continued to be used by the Greek fathers, as the equivalent "Scriptura" was by the Latin. The use of יִשְׂרָאֵל בֵּית בִּבְלִי in 2 Cor. iii. 14, for the law as real in the synagogues, and the prominence given in the Epistle to the Hebrews (vii. 23), viii. 6, ix. 15) to the contrast between the יִשְׂרָאֵל and the מַלָּא, led gradually to the exclusion of the former to include also the books of the Jewish Scriptures, and to the application of the latter, as of the former, to a book or collection of books. Of the Latin equivalents which were adopted by different writers (Inventarium, Testamentum), the latter met with the most general acceptance, and percutuated itself in the languages of modern Europe. One passage in Tertullian (adv. Marc. iv. 1)illustrates the growing popularity of the word in later Christian writings, recalling "instrumenta vel quid magis in usu est dicere, testamentum." The word was naturally used by Greek writers in speaking of the parts of these two collections. They enumerate (e. g. Athan. Synop. Sac. Script.) יִשְׂרָאֵל בֵּית בִּבְלִי of the Old and New Testament; and as these were contrasted with the apocryphal books circulated by heretics, there was a natural tendency to the appropriation of the word as limited by the article to the whole collection of the canonical Scriptures. In Chrysostom (Hom. in Gen., Hom. ix. in Col.) it is thus applied in a way which shows this use to have already become familiar to those to whom he wrote. The liturgical use of the Scriptures, as the worship of the Church began to be formalized, would naturally favor this application. The MSS. from which they were read would be emphatically the books of the Church, and the monasteries, and as this use of the word was established in the East, it was natural that it should pass gradually to the Western Church. The terminology of that Church bears witness throughout (e. g. Episcoples, Presbyter, Diocesan, Liturgia, Liturgia, Monachus, Abas, and others) to its Greek origin, and the history of the word Biblios has followed the analogy of those that have been referred to. Here too there was less risk of its being used in any other than the higher meaning, because it had not, in spite of the introduction even in classical Latinity of bibliotheca, bibliopola, taken the place of librarii or libraris, in the common speech of men.

It is, however, worthy of note, as bearing on the history of the word in our own language, and on that of its reception in the Western Church, that "Bible" is not found in Anglo-Saxon literature, although biblia is given by Old English-Sax., as used in the same sense as the corresponding word in medieval Latin for the Scriptures as the great treasure-house of books (Du Canu and Addis, in loc.). If we derive from our mother-tongue the singularly happy equivalent of the Greek εὐαγγέλια, we have received the word which stands on an equal eminence with Gospel as one of the later importations consequent on the Norman Conquest and fuller intercourse with the Continent.
When the English which grew out of this union first appears in literature, the word is already naturalized in R. Brunne (p. 240), Pier Ploughman (1916, 4271), and Chaucer (p. 437), it appears in its distinctive sense, though the latter, in at least one passage (House of Fame, book iii.) uses it in a way which indicates that it was not always limited to that meaning. However, the higher use prevailed to the exclusion of any lower; and the choice of it, rather than of any of its synonyms by the great translators of the Scriptures, Wycliffe, Luthcr, Coverdale, fixed it beyond all possibility of a change. The transformation of the word from a plural into a singular noun in all the modern languages of Europe, though originating probably in the solennisms of the Latin of the 13th century (Du Cange, in loc. Biblia), has made it either than it would otherwise have been, for its high office as the title of that which, by virtue of its unity and plan, is emphatically The Book.

II. The history of the growth of the collections known as the Old and New Testament respectively, will be found fully under Canon. It falls within the scope of the present article to indicate in what way and by what steps the two came to be looked on as of co-equal authority, and therefore as parts of one whole — how, i. e. the idea of a completed Bible, even before the word came into use, presented itself to the minds of men. As regards a large portion of the writings of the New Testament, it is not too much to say that they claim an authority not lower, may even higher than the Old. That which has not been revealed to the "prophets" of the Old dispensation is revealed to the prophets of the New (Eph. iii. 5). The Apostles write as having authority (1 Cor. x. 3); their teaching is recognized, and they show with what feelings individual writings were regarded. They prepared the way for the acceptance of the whole body of N. T. writings, as soon as the Canon is completed, as on a level with those of the Old. A little further on and the recognition is complete. The propheticus of Antioch (ypo Autob. Lie. iii.) Irenicus (In. H. p. 25, ii. 1), Clement of Alexandria (Strom. lib. iii. c. 19, v. c. 8), Tertullian (In. Prose. c. 13, 30), all speak of the New Testament writings (what writings they included under this title is of course a distinct question) as making up with the Old, ad gravis (Cmm. Al. c. 3), "totum instrumentum urbisque testamenti" (Tert. c. 1), "universe scripture."* As this was in part a consequence of the liturgical usage referred to, so it reacted on it, and influenced the transcribers and translators of the books which were needed for the instruction of the Church. The Syrian Peshito in the 3d, and at the close of the 2d century, included (with the omission of some of the οὐκ έπηκοινωνα the New Testament as well as the Old. The Alexandrian Codex, presenting in the fullest sense of the word a complete Bible, may be taken as the representative of the full maturity of the feeling which we have seen in its earlier developments.

III. The existence of a collection of sacred books recognized as authoritative leads naturally to a more or less systematic arrangement. The arrangement must rest upon some principle of classification. The names given to the several books will indicate in some instances the view taken of their contents, in others the kind of notation applied both to the greater and smaller divisions of the sacred volumes.

The existence of a classification analogous to that adopted by the later Jews and still retained in the printed Hebrew Bibles, is indicated even before the completion of the Old T. of the Canon (Zechariah xii. 12). When the Canon was looked on as settled, in the period covered by the books of the Apocrypha, it took a more definite form. The Prologue to Ecclesiasticus mentions "the Law and the Prophets and the other Books." In the N. T. there is the same kind of recognition. "The Law and the Prophets" is the shorter (Matt. xi. 25, xiii. 49; Acts xi. 15, i.e.); "the Law, the Prophets, and the Psalms" (Luke xxiv. 44), the fuller statement of the division popularly recognized. The arrangement of the books of the Hebrew text under these three heads, requires, however, a further notice.

1. The Torah, תור ו, νόμος, naturally continued to occupy the position which it must have held from the first as the most ancient and authoritative portion. Whatever questions may be raised as to the antiquity of the whole Pentateuch in its present form, the existence of a book bearing this title is traceable to a very early period in the history of the Israelites (Josh. i. 8, viii. 34, xiviv. 29). The name which must at first have attached to those portions of the whole book was applied to the earlier and contemporaneous history connected with the giving of the Law, and ascribed to the same writer. The marked distinctness of the five por-
the Hebrew titles were adopted without change, except as to the 4th, in the Latin versions, and from them have descended to the Bibles of modern Christians.

2. The next group presents a more singular combination. The arrangement stands as follows:

\[
\begin{align*}
\text{Nebiim} & \quad \text{Prophetes} \\
\text{Joshua} & \quad \text{Deut.} \\
\text{Judges} & \quad \text{Josh.} \\
\text{1 & 2 Samuel} & \quad \text{Jeron.} \\
\text{1 & 2 Kings} & \quad \text{Ezekiel.}
\end{align*}
\]

— the Hebrew titles of these books corresponding to those of the English Bibles.

The grounds on which books simply historical were classed under the same name as those which contained the teaching of prophets, in the stricter sense of the word, are not at first sight obvious, but the O. T. presents some facts which may suggest an explanation. The "sons of the prophets" (1 Sam. x. 5; 2 K. v. 22, vi. 1) living together as a society, almost as a caste (Am. vii. 14), trained to a religious life, cultivating sacred minstrelry, must have occupied a position as instructors of the people, even in the absence of the special calling which sent them as God's messengers to the people. A body of men so placed became naturally, unless intellectual activity is absorbed in asceticism, historians and annalists. The references in the historical books of the O. T. show that they actually were so. Nathan the prophet, Gad, the seer of David (1 Chr. xxiv. 29), Abijah and Iddo (2 Chr. ix. 25), Ithiel (2 Chr. xxvi. 22, xxvii. 29), are cited as chronicles. The greater antiquity of the earlier historical books, and perhaps the traditional belief that they had originated in this way, were likely to cooperate in raising them to a high place of honor in the arrangement of the Jewish Canon, and so they were booked on as having the prophetic character which was denied to the historical books of the Hagiographa. The greater extent of the prophecies of Ithiel, Jeremiah, Ezekiel, no less than the prominent position which they occupied in the history of Israel, led naturally to their being recognized as the Prophetes Majores. The exclusion of Daniel from this subdivision is a more remarkable fact, and one which has been differently interpreted; the Rationalistic school of later criticism (Eichhorn, Be Wette, Bertholdt) seeing in it an indication of later date, and therefore of doubtful authenticity, the orthodox school on the other hand, as represented by Hengstenberg (Didasc. on Dan., ch. ii. § 4. and v.), maintaining that the difference rested only on the ground that, though the utterer of predictions, he had not exercised, as the others had done, a prophet's office among the people. Whatever may have been its origin, the position of this book in the Hagiographa led the later Jews to think and speak slightly of it, and Christians who reasoned with them out of its predictions were met by remarks disparaging to its authority (Hengstenberg, l. c.). The arrangement of the Prophetes Minorres does not call for special notice, except so far as they were counted, in order to bring the whole list of canonical books within a memorial number answering to that of the letters in the Hebrew alphabet, as a single volume, and described as τὸ δβερς-

3. In like order came the group known as Ἰστορία, μετακικτημένον from μετάς to write), ἱστορία, ἱστορία, including the remaining books of the Hebrew Canon, arranged in the following order, and with subordinate divisions:

(a) Psalms, Proverbs, Job.
(b) The Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther.
(c) Daniel, Ezra, Nehemiah, 1 and 2 Chronicles.

Of these, (a) was distinguished by the memorial word μετακικτημένον, truth, formed from the initial letters of the three books; (b) as τῶν μετακικτημένων, the five rolls, as being written for use in the synagogue on special festivals on five separate rolls.

Of the Hebrew titles of these books, those which are descriptive of their contents are μετακικτημένον, the Psalms, τῶν μετακικτημένων, Proverbs, μετακικτημένον, Lamentations (from the opening word of wailing in i. 1). The Song of Songs (τῶν μετακικτημένων), Ecclesiastes (τῶν μετακικτημένων), the Preacher). 1 and 2 Chronicles (τῶν μετακικτημένων, words of days or records).

The Septuagint translation presents the following titles, — Ἱστορία, Παραμενώντας, Θρησκοῦντας, Ἐκκλησιαστικὰ, Παραλείποντα (i.e., things omitted, as being supplementary to the Books of Kings). The Latin version imports some of the titles, and translates others, Psalms, Proverbs, Threni, Testamentum Canticorum, Ecclesiastes, Paralipomenon; and these in their translated form have determined the received titles of the books in our English Bibles: Ecclesiastes, in which the Greek title is retained, and Chronicles, in which the Hebrew and not the Greek title is translated, being exceptions.

The LXX. presents, however, some striking variations in point of arrangement as well as in relation to the names of books. Both in this and in the insertion of the ἑπίκειανα, which we now know as the Apocrypha, among the other books, we trace the absence of that strong reverence for the Canon and its traditional order which distinguished the Jews of Palestine. The Law, it is true, stands first, but the distinction between the greater and lesser prophets, between the Prophets and the Hagiographa is no longer recognized. Daniel, with the Apocryphal additions, follows upon Ezekiel: the Apocryphal 1st or 3d Book of Esdras.
The con. as a 24 following on the Canonical Extra. a Tobit and Judith are placed after Nehemiah, Wis- dom (2 Sam 11:24) and Ecclesiastes (2 Sam 11:26) after Canticles, Baruch before and the Epistle of Jerniath after Dieu was the Boke of the Lesser Prophets before the four Greater, and the two [three or four] Books of Maccabees come at the close of all. The Latin version follows nearly the same order, inverting the relative position of the greater and lesser prophets. The separation of the double books under the title of Apocrypha in the Protestant versions of the Scriptures, left the others in the order in which we now have them.

1st. The order of the Books of the New Testament presents some variations, not without interest, as indicating differences of feeling or modes of thought. The four Gospels and the Acts of the Apostles uniformly stand first. They are so far to the New what the Pentateuch was to the Old Testament. They do not present however in themselves, as the books of Moses did, any order of succession. The actual order does not depend upon the order given by Jerome, the former editor of the Vulgate, in which they are assigned. The two not written by Apostles are preceded and followed by those which are, and it seems as if the true explanation were to be found in a traditional belief as to the dates of the several Gospels, according to which St. Matthew's, whether in its Greek or Hebrew form, was the earliest, and St. John the latest. The arrangement once adopted would naturally confirm the belief, and so we find it assumed by [the Muratorian Canon,] Irenaus, Origen, Augustine. [The other hand, the Codex Boe; (D) and the best MSS. of the Old Latin version have the following order: Matt., John, Luke, Mark. — A.] The position of the Acts as an intermediate book, the sequel to the Gospels, the prelude to the Epistles, was obviously a natural one. After this we meet with some striking differences. The order in the Alexandrian, Vatican, and Ephraem MSS. (A B C) gives precedence to the Catholic Epistles, and as this is also recognized by the Council of Laodicea (Can. 60), Cyril of Jerusalem (Ctchch. iv. p. 35), and Athanasius (Epist. Fest. ed. Bened. i. p. 961), it would appear to have been characteristic of the Eastern Churches. Lachmann, who bases his recension of the text chiefly on this family of MSS., has reproduced the arrangement in his editions. [So has Tischendorf; and this is the arrangement found in a great majority of the manuscripts. In the Codex Sinaiticus and in four other MSS. the Pauline Epistles precede the Acts. — A.] The Western Church on the other hand, as represented by Jerome, Augustine, and their successors, has preserved the original position of the Pauline Epistles, and as the order in which these were given presents (1) those addressed to Churches arranged according to their relative importance, (2) those addressed to individuals, the foremost place was naturally occupied by the Epistle to the Romans.

The tendency of the Western Church to recognize Rome as its centre of authority may perhaps in part account for this departure from the custom of the East. The order of the Pauline Epistles them- selves, however, seems to be the same, and the only conspicuously different arrangement was that of Marcion, who aimed at a chronological order. In the three MSS. above referred to [and in the Codex Sinaiticus] the Epistle to the Hebrews comes after 2 Thessalonians. [In the manuscript from which the Vatican (B) was copied, it stood between Galatians and Ephesians. This is shown by the numbering of the sections in the Vat. MS. of A.] In those from which our Codex B is derived, it is introduced in the English Bible and the Textus Receptus, after Phil- lemon. We are left to conjecture the grounds of this difference. Possibly the absence of St. Paul's name, possibly the doubts which existed as to his being the sole author of it, possibly its approxima- tion to the character of the Catholic Epistles may have determined the arrangement. The Apocalypse, as might be expected from the peculiar character of its contents, occupied a position by itself. Its comparatively late recognition may have determined the position which it has uniformly held as the last of the Sacred Books. b

IV. Division into Chapters and Verses. As soon as any break is made in the continuous writing which has characterized in nearly all countries the early stages of the art, we get the germs of a sys- tem of division. But these divisions may be used for two distinct purposes. So far as they are used to exhibit the logical relations of words, clauses and sentences to each other, they tend to a recognized punctuation. So far as they are used for greater convenience of reference, or as a help to the memory, they answer to the chapters and verses of our modern Bibles. The question now to be answered is that which asks what systems of notation of the latter kind have been employed at different times by transcribers of the Old and New Testament, and to whom we owe the system now in use.

a * The Apocryphal 1st Book of Esdras, certainly in the principal MSS. and editions of the LXX., and prob- ably in all, precedes the canonical Ezra. The Vatican, Alexandrine, and Sinaitic (Praed-Aug.) MSS. of the Septuagint, with the Aldine edition, unite the Books of Ezra and Nehemiah in one as 24 Esdras. The state- ments in the text in regard to the order of the books in the Septuagint require great modification; for the MSS. and editions differ widely in this respect; and the Roman edition of the LXX. (1557), deviates mate- rially in the arrangement of the books from the Vatican manuscript, which it has been popularly supposed to represent. In the Vat. MS. the whole series of the poetical books intervenes between Nehemiah and Esther, which is followed by Judith, Tobit, and the Lesser and Greater Prophets, including Daniel. In the Alex. MS. the twelve Minor Prophets immediately follow Chronic- les; then come the Greater Prophets, ending with Daniel; then Esther, Tobit, Judith, I Esdras, Ezra and Nehemiah as 24 Esdras, and the four Books of Macc- abees. These are followed by the poetical books. In the codex Sinaiticus 1st and 4th Maccabees come after Judith; then follow the Prophets, the greater preced- ing the lesser, contrary to the order in the Vat. and Alex MSS.; and last of all come the poetical books, Psalms, Proverbs, Ecclesiastes, Song of Songs, Wisdom of Sol- omon, Ecclesiasticus, Job. In respect to the position of the Book of Job, the Vatican and the Alexandrine manuscripts differ both from the Sinaitic and from each other, the former placing it after Canticles, the latter after Psalms. See Tischendorf's Proleg. to his 3d edition of the LXX. (1899), pp. xxiv., xxx., xxxvi.

(1.) The Hebrew of the Old Testament. It is hardly possible to conceive of the liturgical use of the books of the Old Testament, without some kind of recognized division. In proportion as the books were studied and commented on in the schools of the Rabbis, the division would become more technical and complete, and hence the existing notation, which is recognized in the Talmud (the Gemara ascribing it to Moses, — Hupfeld, *Stud. und Krit.* 1849, p. 827), may probably have originated in the earlier stages of the growth of the synagogal ritual. The New Testament quotations from the Old are for the most part cited without any more specific reference than to the book from which they come. The references however in Mark xii. 29 and Luke xx. 37 (καὶ τὸς ἑαυτοῦ ἥρωαν), Rom. xi. 2 (καὶ Ἡαγνίκ), and Acts viii. 32 (οἱ περὶ ὑμᾶς τὸς γαμαυνόμενος), indicate a division which had become familiar, and show that some at least of the sections were known under titles taken from their subjects. In like manner the existence of a cycle of lessons is indicated by Luke iv. 17; Acts xiii. 15, xv. 21; 2 Cor. iii. 14; and this, whether identical with the later Rabbinic cycle, must have involved an arrangement analogous to that subsequently adopted.

The Talmudic division is on the following plan. The law was in the first instance divided into fifty-four פֶּרֶשְׂוֹת (Parshioth or Parshahs), so as to provide a lesson for each Sabbath in the Jewish intercalary year, provision being made for the shorter year by the combination of two of the shorter sections. Coexisting with this there was a subdivision into lesser Parshioth, which served to determine the portions of the sections taken by the several readers in the synagogues. The lesser Parshioth themselves were classed under two heads — the Open פֶּרֶשְׂוֹת (Parshoth) which served to indicate a change of subject analogous to that between two paragraphs in modern writing, and began accordingly a fresh line in the MS., and the שֵׁלֶט (Sheleth, Se'udoth), which corresponded to minor divisions, and were marked only by a space within the line. The initial letters ה or ה served as a notation, in the margin or in the text itself, for the two kinds of sections. The threefold initial י or י, was used when the commencement of one of the Parshioth coincided with that of a Sabbath lesson (comp. Kell, *Einleitung in das A. T.* §§ 170, 171).

A different terminology was employed for the Prophetic Priores and Postiores, and the division was less uniform. The tradition of the Jews that the Prophets were first read in the service of the synagogue, and consequently divided into sections, because the reading of the Law had been forbidden by Antiochus Epiphanes, rests upon a very slight foundation, but its existence is at any rate a proof that the Law was believed to have been systematically divided before the same process was applied to the other books. The name of the sections in this case was פֶּרֶשְׂוֹת (Parshioth, from פְּרֵשׁ, diminutive). If the name were applied in this way because the lessons from the Prophets came at the close of the synagogue service, and so were followed by the dismissal of the people (Vitrina de Synag. ii. 2, 20), its history would present a singular analogy to that of "Mass," on the assumption that it also was derived from the "He, missa est," by which the congregation was informed of the conclusion of the earlier portion of the service of the Church. The peculiar use of מן in the phrase after its appearance in the Latin of ecclesiastical writers in a sense different to that of Haphtaroth (p. Missas de Prophetâ Essaiâ facite," Cassianus Archid. and Aurelian in Binding, *Ant.* xiii. 1) presents at least a singular coincidence. The Haphtaroth themselves were intended to correspond with the larger Parshioth of the Law, so that there might be a distinct lesson for each Sabbath in the intercalary year as before; but the traditions of the German and the Spanish Jews, both of them of great antiquity, preserved considerable diversity in the length of the divisions, and show that they had never been determined by the same authority as that which had settled the Parshioth of the Law (Van der Hoecht, *Præf. in Bib.* § 55). Of the traditional divisions of the Hebrew Bible, however, that which has exercised most influence in the received arrangement of the text, was the subdivision of the larger sections into verses (תַּנִין, Pesakin). These do not appear to have been used till the post-Talmudic recension of the text by the Masoretes of the 9th century. They were then applied, first to the prose and afterwards to the poetical books of the Hebrew Scriptures, superseding in the latter the arrangement of στιγμα, καλα, κακατρα, lines and groups of lines, which had been based upon metreical considerations. The verses of the Masoritic divisions were preserved with comparatively slight variations through the middle ages, and came to the knowledge of translators and editors when the attention of European scholars was directed to the study of Hebrew. In the Hebrew MSS., the notation had been simply marked by the ספ hutši, at the end of each verse; and in the earlier printed Hebrew Bibles (Sabinetta's, 1557, and Plantin's, 1566) the Hebrew numerals which guide the reader in referring, are attached to every fifth verse only. The Concordance of Rabbi Nathan, 1450, however, had rested on the application of a numeral to each verse, and this was adopted by the Dominican Pagninus in his Latin version, 1528, and carried throughout the whole of the Old and New Testament, coinciding substantially, as regards the former, with the Masorete, and the latter with the modern division, but differing materially as to the New Testament from that which was adopted by Robert Stephens (cf. infra) and through his widely circulated editions passed into general reception. The chief facts that remain to be stated as to the verse divisions of the Old Testament are, (1) that it was adopted by Stephens in his edition of the Vulgate, 1555, and by Frohlin in that of 1556; (2) that it appeared, for the first time in an English translation, in the Geneva Bible of 1560, and was thence transferred to the Bishops' Bible of 1568, and the Authorized Version of 1611. In Coverdale's Bible we meet with the older notation, which was in familiar use for other books, and retained in some instances (e. g. in references to Plato), to the present times. The letters A B C D are placed at equal distances in the margin of each page, and the reference is made to the page (or, in the case of Scripture, to the chapter) and the letter according.

The Septuagint translation, together with the Latin versions based upon it, have contributed little or nothing to the received division of the Bible.
BIBLE

Made at a time when the Rabbinic subdivisions were not enforced, hardly perhaps existing, and not used in the worship of the synagogue, there was no reason for the scrupulous care which showed itself in regard to the Hebrew text. The language of Tertullian (Sorc. ii.) and Jerome (in Mic. vi. 9; Zeph. iii. 4) implies the existence of "canitula" of some sort: but the word does not appear to have been used in any more definite sense than "locus" or "passage." The liturgical use of portions of the Old Testament would lead to the employment of some notation to distinguish the 

made at a time when the Rabbinic subdivisions were not enforced, hardly perhaps existing, and not used in the worship of the synagogue, there was no reason for the scrupulous care which showed itself in regard to the Hebrew text. The language of Tertullian (Sorc. ii.) and Jerome (in Mic. vi. 9; Zeph. iii. 4) implies the existence of "canitula" of some sort: but the word does not appear to have been used in any more definite sense than "locus" or "passage." The liturgical use of portions of the Old Testament would lead to the employment of some notation to distinguish the

"transformed" or "lecciones," and individual students or transcribers might adopt a system of reference of their own: but we find nothing corresponding to the fully organized notation which originated with the Talmudists or Masoretes. It is possible indeed that the general use of Lectionaria—in which the portions read in the Church services were written separately—may have hindered the development of such a system. Whatever traces of it we find are accordingly scanty and fluctuating. The stichometric mode of writing (i.e. the division of the text into short lines, generally with very little regard to the sense) adopted in the 4th or 5th centuries (see Prolegomena, to Breitinger's Septuagint, i. § 6), though it may have facilitated reference, or been used as a guide to the reader in the half-chant commonly used in liturgical services, was too arbitrary (except where it corresponded to the parallel clauses of the Hebrew poetical books) and inconvenient to be generally adopted. The Alexandrian MS. presents a partial notation of 

kep@x@n, but as regards the Old Testament these are found only in portions of Deuteronomy and Joshua. Traces exist (Coffler, Monum. Eccles. Graec., Breitinger, Prolegom., vii. 422, and Gunnerus, Bibliotheca, and Lovettius, and Latin MSS. present frequently a system of division into "tituli" or "capitula," but without any recognized standards. In the 13th century, however, the development of theology as a science, and the more frequent use of the Scriptures as a text-book for sermons, led to the general adoption of a more systematic division, traditionally ascribed [by some] to Stephen Langton, Archbishop of Canterbury (Trivvet, ed. 182, ed. Ossian), [by others] to Hugh de S. Caro (Gilbert Genebraud, Chronol. l. iv. 644), and passing through his commentary (Postilla in Universa Biblia, and Concordance, circ. 1240) into general use. No other subdivision of the chapters was united with this beyond that indicated by the marginal letters A B C D as described above.

As regards the Old Testament then, the present arrangement grows out of the union of Cardinal Hugo's capitol division and the Masoretic verses. The Apocryphal books, to which of course no Masoretic division was applicable, did not receive a versicular division till the Latin edition of Pagninus in 1528, nor the division now in use till Stephens's edition of the Vulgate in 1555.

(2.) The history of the New Testament presents some additional facts of interest. Here, as in the case of the Old, the system of notation grew out of the necessities of study. The first of the (superscription) gives rise to attempts to exhibit the harmony between them. Of these, the first of which we have any record was the Don castron of Tatian in the 2d century (Eus. H. E. iv. 29). This was followed by a work of like character from Ammonius of Alexandria in the 3d (Eus. Epist. ad Carp. p. 48). The system adopted by Ammonius however, that of attaching to the Gospel of St. Matthew the parallel passages of the other three, and inserting those which were not parallel, destroyed the outward form in which the Gospel history has been recorded, and was practically inconvenient. Nor did their labors have any direct effect on the arrangement of the Greek text, unless we adopt the conjectures of Mill and Wetstein that it is to Ammonius or Tatian that we have to ascribe the marginal notation of kep@x@n marked by A B F D, which are found in the older MSS. The search after a more convenient method of exhibiting the parallels of the Gospels led Euselius of Cæsarea to form the ten Canons (kep@x@n, registers) which bear his name, and in which the sections of the Gospels are classed according as the fact narrated is found in one Evangelist only, or in two or more. In applying this system to the transcription of the Gospels, each of them was divided into shorter sections of variable length, and to each of these were attached two numerals, one indicating the Canon under which it would be found, and the other its place in the Canon. Luke [iii. 21, 22], for example, would represent [constituted] the 13th section belonging to the first Canon [corresponding to the 14th section in Matthew, the 5th in Mark, and the 15th in John,—the first Canon comprising the sections common to the four Gospels]. This division, however, extended only to the books that had come under the study of the Harmonists. The Epistles of St. Paul were first divided in a similar manner by the unknown Bishop to whom Euselius assigns the credit of it (circ. 350), and he himself, at the instigation of Athanasius [the younger], applied the method of division to the Acts and the Catholic Epistles. Andrew, bishop of Cæsarea in Cappadocia, completed the work by dividing the Apocalypse (circ. 500). Of the four great uncial MSS., A [and so the Sinaiæan MSS., but not, according to Tischendorf, a pseuðos manus] presents the Ammonian or Eusebian numerals and canons, C and D the numerals without the canons. B has neither numerals nor canons, but a notation of its own, the chief peculiarity of which is, that the Epistles of St. Paul are treated as a single book, and brought under a continuous capitulation. After passing into disuse and into comparative oblivion, the Eusebian and Ethelbian divisions have recently (since 1827) again become familiar to the English student through Bishop Lloyd's edition of the Greek Testament. [The Eusebian sections and canons also appear in the recent editions of Tischendorf, Wordsworth, and Tregelles.] With the New Testament, however, as with the Old, the division into chapters adopted by Hugh de S. Cher superseded those that had been in use previously, appearing in the early editions of the Vulgate, was transferred to the English Bible by Coverdale in 1535, and the notation of the verses in each chapter naturally followed on the use of the Masoretic verses for the Old Testa-

a Euthalius appears to have derived these division, at least in the Acts, from a MS. written by Pamphilus the martyr (A. D. 300). See Montfaucon, Bib. Citadin. p. 78 f.; Tregelles, Text.Crit. of the N. T. pp. 50.
ment. The superiority of such a division over the universal notion A B C D in the Bible of Cardinal Hugh de St. Cher led men to adopt an analogous system for the New. In the Latin version of Paginus accordingly, there is a versical division, though differing from the one subsequently used in the greater length of its verses. The absence of an authoritative standard like that of the Massoretes, late more scope to the individual discretion of editors or printers, and the activity of the two Stephens caused that which they adopted in their numerous editions of the Greek Testament and Vulgate to be generally received. In the Preface to the Concordance, published by Henry Stephens, 1594, he gives the following account of the origin of this division. His father, he tells us, finding the books of the New Testament already divided into chapters (locuma, or sections), proceeded to a further subdivision into verses. The name versiculi did not commend itself to him. He would have preferred tactamina or sectiones, but the preference of others for the former led him to adopt it. The whole work was accomplished "inter equidam" on his journey from Paris to Lyons. While it was in progress men doubted of its success. No sooner was it known than it met with universal acceptance. The edition in which this division was first adopted was published in 1554, another came from the same press in 1555. It was used for the Vulgate in the Antwerp edition of Hentenius in 1559, for the English version published in Geneva in 1560, and from that time, with slight variations in detail, has been universally recognized. The convenience of such a system for reference is obvious; but it may be questioned whether it has not been purchased by a great sacrifice of the perception by ordinary readers of the true order and connection of the books of the Bible. In some cases the division of chapters separates portions which are very closely united (see e. g. Matt. ix. 38, and x. 1, xix. 30, and xx. 1; Mark ii. 23-28, and iii. 1-5, viii. 38, and ix. 1; Luke xx. 43-47, and xvi. 1-4; Acts vii. 60, and viii. 1; 1 Cor. x. 33, xi. 1; 2 Cor. iv. 18, v. 1, vi. 18, and vii. 1), and throughout gives the impression of a formal division altogether at variance with the continuous flow of narrative or thought which characterized the book as it came from the hand of the writer. The separation of verses in its turn has conducd largely to the habit of building doctrinal systems upon isolated texts. The advantages of the received method are united with those of an arrangement representing the original more faithfully in the structure of the Paragraph Bibles, lately published by different editors, and in the Greek Testaments of Lloyd, Lachmann, and Tischendorf. The student ought, however, to remember in using these that the paragraphs belong to the editor, not to the writer, and are therefore liable to the same casualties rising out of subjective peculiarities, dogmatic bias, and the like, as the chapters of our common Bibles. Practically the risk of such casualties has been reduced almost to a minimum by the care of editors to avoid the errors into which their predecessors have fallen, but the possibility of the evil exists, and should therefore be guarded against by the exercise of an independent judgment.

E. II. P.

* BIBLE, ENGLISH. See VERSION, AUTHORIZED.

BICHTH (בִּכְתָח) [Bach, Gen.;] Bidadak [Vat. Alex.-pes]. Bicheth; first-born, Sim.; youthful, Gesen. First, but perhaps rather son of Beker), ancestor of Sheba (2 Sam. xx. 1 ff.). [Bicheth.]

A. C. H.

BIDKAR (בִּדֶּקַר) [tiberis, Ges.;] Badekak [Vat. Alex.-kaa]; Joseph. Badekès; Badeker, Jehu's captain (2 K. xxii. 19), Joseph. τὸ ταύτης ωραίας γραμμάτων, Ant. ix. 6, § 3), originally his fellow-officer (2 K. ix. 25): who completed the sentence on Jehoram son of Ahab, by casting his body into the field of Naohot after Jehu had transfixed him with an arrow.

BIER. [Bural].

BIGTHA (בִּגְתָה) [Bakia, Vat. hava(g); Alex. corrut: Comp. Bagan: Bagthah], one of the seven "chamberlains" (דְּנַנְנִים, camera) of the harem of Ahasuerus (Esth. i. 10).

BIGTHAN AND BIGTHIANA (בִּגְתָה, בִּגְתִיָּה, בִּגְתִיָּהַ) [Esth. ii. 21, and נַנְנִים, vi. 2: Bagthianah], a eunuch ("chamberlain," A. V.) in the court of Ahasuerus, one of those "who kept the door" (mag. "threshold", בִּקָבָּת הַצֶּמֶח, LXX.), and who conspired with Teresh, one of his coadjutors, against the king's life. The conspiracy was detected by Mordecai, and the eunuchs hanged.

Prideaux (Cor. i. 363) supposes that these officers had been partially superseded by the degradation of Vashti, and sought revenge by the murder of Ahasuerus. This suggestion falls in with that of the Chaldee Va., and of the LXX. which in Esth. ii. 21 interjuxtaposes the words δικασθησαν οι δυο ευόνιμοι του βασιλεως . . . οτι προειρηθη Μαρ- 

bogias. The name is omitted by the LXX. on both occasions. Bigthan is probably derived from the Persian and Sanskrit Bagdah or, "a gift of fortune." (Gesen. s. v.)

F. W. P.

BIGVII [2 syn.] (בֵּגְוִי) [Bayovi, Bayovai, etc.]: Beogni, [Begovin].

1. "Children of Bigvii." 2006 (Neh. 2067) in the name from the Captivity with Zerub- 

babel (Est. ii. 14; Neh. vii. 19), and 72 of them at a later date with Ezra (Est. viii. 14). [Bagoiv; Bagoi.

2. (Beogov, Beogovin). Apparently one of the chiefs of Zerubabel's expedition (Est. ii. 2; Neh. vii. 7), and who afterwards signed the covenant (Neh. x. 16).

BIKATH-AVEN, Am. i. 5, marg. [AVEN 1; CELESTIVLA].

BILDAD (בִּילְדָאָד) [Vat. Alex. Balam, in Job ii. 11, xviii. 13]: Bildah, the second of Job's three friends. He is called "the Shulmite" (יִשְׁלוֹם), which implies both his family and nation. Shulah was the name of a son of Abraham and Keturah, and of an Arab- 

ian tribe sprung from him, when he had been sent eastward by his father. Gesenius (s. v.) supposes it to be "the same as the Zakkai of Ptolemy (v. 15) to the east of Batanea," and therefore to the east of the land of Vz (Shelah). The LXX. strangely enough, renders it δῶν τῶν Ζακχείων τῷ
BILEAM

from which the sons of Benjamin, Jediael was
descended, as he is not mentioned in Gen. xvi. 21.
| Num. xxvi. 11. But as he was the father of Ehud (ver. 10),
| and Ehud seems, from 1 Chr. vii. 3, to
| have been a son of Bela, Jediael, and con-
| sequently Bilhan, were probably Belahites. The
| occurrence of Bilhan as well as Bela in the tribe
| of Benjamin, names both imported from Edom, is
| remarkable.

A. C. H.

BILSHAN (בִּלְשָן [son of the tongue]):
Balašán [Vat. Barqaq]; Balašán [Alec. Baraqo;
FA. Baraqq;]: Belam, [Belamni]), one of Zerub-
label's companions on his expedition from Babylon:
(Exr. ii. 2; Neh. vii. 7).

BIMHAI (בִּמְתָּה [son of circumcision]:
Bašã; [Vat. 11ašã];]: Chamra), one of the sons of
Japhlet in the line of Asher (1 Chr. vii. 33)

BIN'EA (בִּינֶא [perh. fountain]:
Bavvi; [Vat. Bavvi;]: Bennoi). One of the sons
of Pahath-moab, who had taken a foreign
wife (Exr. x. 30). [BAlNUTS].

3. [Bavvi]: Bennoi.] Another Israelite, of
the sons of Bani, who had also taken a foreign
wife (Exr. x. 38). [Here the A.V. ed. 1611, etc. reads
Bennoi].

4. [Bavvi]: Bennoi.] Altered from Bani in the
Corresponding list in Ezra (Neh. vii. 15).

5. [In Neh. iii. 24, Bard, Vat. Alex. FA. Bavvi;
X. 9, Bavvi]: xii. 8, Bavvi: Benui.] A Levite,
son of Hemadad, who assisted at the reparation
of the wall of Jerusalem, under Nehemiah, Neh.
24. x. 9. He is possibly also the Binni in xii. 8.

BIRDS. [Fowls.]

BIR'SHA (בֵּירְשָׁה [son of wickleness, Ges.]:
Bavā; Berys), king of Gomorrha at the time of
the invasion of Chedorlaomer (Gen. xiv. 2).

* BIRTH. [Children.]

BIRTHDAYS (רָאָה יֵשְׂרָאֵל, Matt. xiv. 6)

Properly יֵשְׂרָאֵל is a birthday feast (and hence
in the early writers the day of a martyr’s com-
memoration), but יֵשְׂרָאֵל seems to be used in
this sense by a Hellenism, for in Herod. iv. 26
it means a day in honor of the dead. It is very
probable that in Matt. xiv. 6 the feast to commemorate
Herod’s accession is intended, for we know that
such feasts were common (especially in Herod’s
family, Joseph. Ant. xx. 11, § 5; Plut. Herod’s Con-
cen-dences, Append. vii.), and were called “the day of
the king” (Hos. vii. 5). The Gemarists distin-
guish expressively between יֵשְׂרָאֵל יְמיִנְיָה יִשְׂרָאֵל and the
ירָאָה יֵשְׂרָאֵל or birthday.
(Lightfoot, Hor. Hebr. ad Matt. xiv. 6.)

The custom of observing birthdays is very an-
cient (Gen. xi. 20; Jer. xx. 15); and in Job i. 4,
we, that Job’s sons “easted every one his day.”
In Persia they were celebrated with peculiar
honors and lavauxs, for the details of which see
meaning. See also Kuntila, 1. 425. There is no reason
for discarding the usual sense in Matt. xiv. 6. H.

* Against this opinion see Meyer (loc. cit.) who says
there is not a single Greek example of γεβεία with this
A
Jerusalem in Acts xv. It is transferred by Paul to Barcaebus to the Gentile churches in their first missionary journey (Acts xiv. 24). The earliest use of ἐπίσκοπος, on the other hand, is in the address of St. Paul to the elders at Miletus (Acts xx. 28), and there it is rather descriptive of functions than given as a title. The earliest epistle in which it is formally used as equivalent to πρεσβυτέρῳ (except on the improbable hypothesis that Timothy belongs to the period following on St. Paul's departure from Ephesus in Acts xx. 1) is that to the Philippian church. In St. Paul's day the time of his first imprisonment at Rome. It was natural, indeed, that this should be the order; that the word derived from the usages of the synagogues of Palestine, every one of which had its superintending elders (ὑπάρχων ἐκ πρεσβυτέρους: comp. Luke vii. 3), should precede that borrowed from the constitution of a Greek state. If the latter was afterwards felt to be the more adequate, it may have been because there was a life in the organization of the Church higher than that of the synagogues, and functions of pastoral superintendence devolving on the elders of the Christian congregation which were unknown to those of the other periods. It had the merit of being descriptive as well as titular: a "nomen officii" as well as a nomen dignitatis that they might be associated, as the other could not be, with the thought of the highest pastoral superintendence—of Christ himself as the παπάς καὶ ἐπίσκοπος (1 Pet. ii. 25).

II. Of the order in which the first elders were appointed, as of the occasion which led to the institution of the office, we have no record. Arguing from the analogy of the Seven in Acts vi. 5, 6, it would seem probable that they were chosen by the members of the Church collectively (possibly to take the place that had been filled by the Seven, comp. Stanley's Aposl. Age, p. 64) and then set apart to their office by the laying on of the Apostles' hands. In the case of Timothy (1 Tim. iv. 14; 2 Tim. i. 6) the πρεσβυτέρῳ, probably the office of the elders at Lystra, had taken part with the apostle in this act of ordination; but here it remains doubtful whether the office to which Timo
ty was appointed was that of the Bishop-Elder or one derived from the special commission with which the two epistles addressed to him show him to have been entrusted. The case of Titus (v. 22) is, on the whole, against our referring the laying on of hands there spoken of to the ordination of elders (comp. Hammond, in loc.), and the same may be said of Heb. vi. 2. The imposition of hands was indeed the outward sign of the communication of all spiritual χαρίσματα, as well as of functions for which χαρίσμαta were required, and its use for the latter (as in 1 Tim. iv. 14; 2 Tim. i. 6) was connected with its instrumentality in the bestowment of the former. The conditions which were to be observed in choosing these officers, as stated in the pastoral epistles, are, blameless life and reputation among those that are without "as well as within the Church, fitness for the work of teaching, the widekindness of temper which shows itself in hospitality, the being the husband of one wife." i. e. according to the most probable interpretation, not divorced and then married to another; but married, Hammond, Fattus, Elliott, in loc., showing powers of government in his own household as well as in self-control, not being a recent and, therefore, an untutored convert. When appointed, the duties of the bishop-elders appear to have been as follows:—1. General superintendence over the spiritual and temporal well-being of the flock (1 Pet. v. 2). According to the aspects which this function presented, those on whom it devolved were described as παπάς (Eph. iv. 11), προστάστε (1 Tim. v. 17), πρεσβυτέρους (1 Thess. v. 12). Its exercise called for the χάρισμα κυβερνήσεως (1 Cor. xii. 28). The last two of the above titles imply obviously a recognized rank, as well as work, which would show itself naturally in special marks of honor in the meetings of the Church. The work of teaching, publicly and privately (1 Thess. v. 12; Tit. i. 9; 1 Tim. v. 17). At first, it appears from the description of the practices of the Church in 1 Cor. xiv. 26, the work of oral teaching, whatever form it as suned, was not limited to any body of men, but was exercised according as each man possessed a special χάρισμα for it. Even then, however, there were, as the warnings of that chapter show, some inconveniences attendant on this freedom, and it was a natural remedy to select men for the special function of teaching because they possessed the χάρισμα, and then gradually to confine that work to them. The work of preaching (ἐκχορήγησιν) to the heathen did not belong, apparently, to the bishop-elders as such, but was the office of the apostle-evangelist. Their duty was to feed the flock, teaching publicly (Tit. i. 9), opposing errors, admonishing privately (1 Thess. v. 12). The work of visiting the sick appears in Jam. v. 14, as assigned to the elders of the Church. There, indeed, it is connected with the practice of anointing as a means of healing, but this office of Christian sympathy would not, we may believe, be confined to the exercise of the extraordinary χαρίσματα ἰατρών, and it is probably to this, and to acts of a like kind, that we are to refer the ἀρχιεπίσκοπος τῶν ἀρχιερεῶν of Acts xx. 25, and the ἀρχιερεῖς of 1 Cor. xii. 28. Among these acts of charity that of receiving strangers occupied a conspicuous place (1 Tim. iii. 2; Tit. i. 8). The bishop-elder's house was to be the house of the Christian who arrived in a strange city and found himself without a friend. 5. Of the part taken by them in the liturgical meetings of the Church we have no distinct evidence. Reasoning from the language of 1 Cor. x., xii., and from the practices of the post-apostolic age, we may believe that they would have a place in such meetings, that it would belong to them to bless and to give thanks when the Church met to break bread. The mode in which these officers of the Church were supported or renumenated varied probably in different cities. At Miletus St. Paul exhorts the elders of the Church to follow his example and work for their own livelihood (Acts xx. 34). In 1 Cor. xiv. 14, and Gal. vi. 6, he asserts the right of the ministers of the Church to be supported by it. In 1 Tim. v. 17, he gives a special application of the principle in the assignment of a double allowance (τρικλ. comp. Hammond, in loc.) to those who have been conspicuous for their activity. Collectively at Jerusalem, and probably in other churches, the body of bishop-elders took part in deliberations (Acts xvi. 6-22, xxi. 18), addressed other churches (ibid. xvi. 23), were joined with the Apostles in the work of ordaining by the laying on of hands (Acts 2 (Tim. i. 6). It lay in the necessities of any organized society that such a body of men should be subject to a power higher than their own, whether vested in one chosen by themselves or de-
BISHOP

receiving its authority from some external source; and we accordingly found that it belonged to the delegate of an apostle, and a forerunner to the apostle himself, to give a dispensation against this for evidence, to admonish whom there was the hope of amendment, to depose where this proved unavailing (1 Tim. v. 1, 19; Tit. iii. 10).

III. It is clear from what has been said that episcopal functions in the modern sense of the words, as implying a special superintendence over the ministers of the Church, belonged only to the Apostles and those whom they invested with their authority. The name of Apostle was not, however, limited to the twelve. It was claimed by St. Paul for himself (1 Cor. ix. 1); it is used by him of others (Rom. xvi. 7; 2 Cor. viii. 23; Phil. ii. 25). It is clear that a process of change must have been at work between the date of the latest of the pastoral epistles and the letters of Ignatius, leading not so much to an altered organization as to a modification of the original terminology. The name of apostle is looked on in the latter as belonging to the past, the title of honor which their successors could not claim. That of bishop rises in its significance, and takes the place left vacant. The dangers by which the Church was threatened made the exercise of the authority which was thus transmitted more necessary. The permanent superintendence of the bishop over a given district, as contrasted with the less settled rule of the travelling apostle, would tend to its development. The Revelation of St. John presents something like an intermediate stage in this process. The angels of the seven churches are partly addressed as their representatives, partly as individuals ruling them (Rev. ii. 2, iii. 2-4). The name may belong to the special symbolism of the Apocalypse, or have been introduced like σερβίερα from the organization of the synagogue, and we have no reason for believing it ever to have been in current use as part of the terminology of the Church. But the functions assigned to the angels are those of the earlier apostolate, of the later episcopate. The place of the old title of the highest office by pretenders, as in Rev. ii. 2, may have led to a reaction against its being used at all except for those to whom it belonged καρποφόροι. In this, or in some similar way, the constitution of the Church assumed its later form; the bishops, presbyters, and deacons of the Ignatian Epistles took the place of the apostles, bishops, elders, and deacons of the New Testament (Stanley, Hebrew and Greek New Testament, p. 245; Augusti, Christl. Archiv. b. ii. c. 6).

The later history of the word is only so far remarkable as illustrating by its universal reception in all the western churches, and even in those of Syria, the influence of the organization which originated in the cities of Greece or the Proconsular Asia, and the extent to which Greek was the universal medium of intercourse for the churches of the first and second centuries (Mileham, Latin Christi. b. i. c. i.); nowhere do we find any attempt at substituting a Latin equivalent, hardly even an explanation of its meaning. Augustine (de Civ. D. 23) compares it with "speculatoris," "præpositi;" Jerome (Ep. VII. ad Eucher. i. superintendentes). The title episcopus itself, with its同志式, i.e. "superintendentes." The title episcopus itself, with its synonyms, was first used as the title of the Latin of the Western Church to all the Romance languages. The members of the Gothic race received it, as they received their Christianity from the missionaries of the Latin Church.

BITHYNIA

E. H. P.

BITHIAH (ביתיהוּ, worshipper, lit. daughter of Bithron; [Vat. Bethia: Alex. Bethia] Bithia), daughter of a Pharoh, and wife of Merod, a descendant of Jochab (1 Chr. iv. 18).

The date of Merod cannot be determined, for the genealogy in which his name occurs is indistinct, some portion of it having apparently been lost. It is probable, however, that he should be referred to the time before the Exodus, or to a period not much later. Pharoh in this place might be conjectured not to be the Egyptian royal title, but to be or represent a Hebrew name; but the name Bithiah probably implies conversion, and the other wife of Merod seems to be called "the Jewess." Unless we suppose a transposition in the text, or the loss of some of the names of the children of Merod's wives, we must consider the name of Bithiah understood before "she bare Miriam" (ver. 17), and the latter part of ver. 18 and ver. 19 to be recapitulatory: but the l.XX. does not admit any except the second of these conjectures. The Scriptures, as well as the Egyptian monuments, show that the Pharohs intermarried with foreigners; but such alliances seem to have been contracted with royal families alone. It may be supposed that Bithiah was taken captive. There is, however, no ground for considering that she should have been a concubine: on the contrary she is shown to be a wife, from her taking precedence of one specially designated as such.

BITHRON (more accurately "the Bithron," בִּיתְרוֹן, the broken or divided place, from בִּיתְרוֹ, to cut up, Gen. 31. 18: τῆς ἀρχής παρατείνοντας; omnis Bithronum, a place— from the form of the expression, "all the Bithrona," doubtless a district—in the Araksh or Jordan valley, on the east side of the river (2 Sam. ii. 29). The spot at which Abner's party crossed the Jordan not being specified, we cannot fix the position of the Bithron, which lay between that ford and Mahanaim. As far as we know, the whole of the country in the Ghér on the other side of the river is of the broken and interspersed character indicated by the derivation of the name. If the renderings of the Vulg. and Aquila are correct, they must of course intend another Beth-horon than the well-known one. Beth-larnam, the conjecture of Theenius, is also not probable.

* This Bithron (בֵּיתְרוֹן, shutoff, ravine) may have been the narrow valley of 'Aqaba, next north of the Jabok, and so situated that Abner would ascend the valley in order to reach Mahanaim (Melek) which lay high up on the acclivity (Robinson, Pales. Geogr. p. 60, 86).

BITHYNIA (בִּיתְיָניָה; [Bithynien]). This province of Asia Minor, though illustrious in the earlier parts of post-apocalyptic history, through Pliny's letters and the Council of Nicea, has little connection with the history of the Apostles themselves. It is only mentioned in Acts xvi. 7, and in 1 Pet. i. 1. From the former of these passages it appears that St. Paul, when on his progress from Iconium to Troas, in the course of his second missionary journey, made an attempt to enter Bithynia, but was prevented, either by privilege granted him, or by direct Divine intimation. From the latter it is evident that, when St. Peter wrote his first
BITHYNIA

Epistle, there were Christians (probably of Jewish or proselyte origin) in some of the towns of this province, as well as in "Pontus, Galatia, Cappadocia, and Asia."

Bithynia, considered as a Roman province, was on the west contiguous to Asia. On the east its limits underwent great modifications. The province was originally inherited by the Roman republic (B.C. 74) as a legacy from Nicomedes III., the last of an independent line of monarchs, one of whom had invited into Asia Minor those Gauls, who gave the name of Galatia to the central district of the Peninsula. On the death of Mithridates, king of Pontus, B.C. 63, the western part of the Pontic kingdom was added to the province of Bithynia, which again received further accessions on this side under Augustus, A.D. 7. Thus the province is sometimes called "Pontus and Bithynia" in inscriptions; and the language of Pliny's letters is similar. The province of Pontus was not constituted till the reign of Nero [Pontus]. It is observable that in Acts ii. 9 Pontus is in the enumeration and not Bithynia, and that in 1 Pet. i. 1 both are mentioned. See Marquardt's continuation of Becker's Röm. Alterthümer, III. i. p. 146.

For a description of the country, which is mountains, well wooded and fertile, Hamilton's Researches in A. M. may be consulted, also a paper by Ainsworth in the Roy. Geog. Journal, vol. ix. The course of the river Ibyrundacus is a marked feature on the western frontier of Bithynia, and the snowy range of the Myrian Olympus on the southwest.

J. S. H.

BITTER HERBS (μέραίνα, meráia: μέρος, méros; bacteaN agrestis). The Hebrew word occurs in Ex. xii. 8; Num. ix. 11; and Lam. iii. 15: in the latter passage it is said, "He hath filled me with bitterness, he hath made me drunken with wormwood." The two other passages refer to the observance of the Passover: the Israelites were commanded to eat the Paschal lamb with unleavened bread and with bitter herbs.

There can be little doubt that the term meráia is general, and includes the various edible kinds of bitter plants, whether cultivated or wild, which the Israelites could with facility obtain in sufficient abundance to supply their numbers either in Egypt.

Gate of Nicea, the capital of Bithynia.

where the first passover was eaten, or in the deserts of the Peninsula of Sinai, or in Palestine. The Mishna (Pesch. c. 2, § 6) enumerates five kinds of bitter herbs — chosceath, 'ulshin, thamen, charchothina, and ater, which it was lawful to eat either green or dried. There is great difficulty in identifying the plants which these words respectively denote, but the reader may see the subject discussed by Bochart (Hieroz. i. 601, ed. Rosenmuller) and by Carpzovius (Apparat. Hist. Crit. p. 402). According to the testimony of Forskål in Niebuhr's Preface to the Description de l'Arabie (p. xiv.), the modern Jews of Arabia and Egypt eat lettuce, ar, if this is not at hand, hugloss with the Paschal lamb. The Greek word πιπάς is identified by Sprengel (Hist. Rei Herb. i. 100) with the Helminthus Echidode, Limn. [rather Gaertn.; Picris Echidode, Limn.], Bristly Helminthus (Ox-tongue), a plant belonging to the chicory group. The Picris of botanists is a genus closely allied to the Helminthin.

Aben Ezra in Celsius (Hierob. ii. 227) remarks that, according to the observations of a certain learned Spaniard, the ancient Egyptians always used to place different kinds of herbs upon the table, with mustard, and that they dipped morsels of bread into this salad. That the Jews derived this custom of eating herbs with their meat from the Egyptians is extremely probable, for it is easy to see how, on the one hand, the bitter-herb salad should remind the Jews of the bitterness of their bondage (Ex. i. 14), and, on the other hand, how

(For. Egypt. p. 122.) identifies with Borago officinalis.

لسان الثور (lissus atthor), which Forskål

m.
it should also bring to their remembrance their merciful deliverance from it. It is curious to ob-
serve in connection with the remarks of Aben Ezra,
the custom, for such it appears to have been, of
fishing a morsel of bread into the dish (το τριφαντio
ντ), which prevailed in our Lord's time. May not
το τριφαντio be the sábado dish of bitter herbs, and
το θειαφον, the morsel of bread of which Aben
Ezra speaks?

The μαριανα may well be understood to denote
various sorts of bitter plants, such particularly as
belong to the crucifer, as some of the bitter
cresses, or to the chichory group of the composite,
the hawk-weeds, and sow-thistles, and wild lettuces,
which grow abundantly in the Peninsula of Sinai,
in Palestine, and in Egypt (Dauciane, Flora.)

word has been the subject of various inter-
pretations, the old versions generally sanctioning
the "hedgehog" or "porcupine," in which rendering
they have been followed by Bochart (Ha-
neas, ii. 454); Shaw (Tract. i. 291, Soc ed.);
Lowth (On Isaiah, xiv. 29); and some others; the
"porcupine," the "hedgehog," the "hedgehog," the "sauce," have also all been conjectured, but without
the slightest show of reason. Philological arguments
appear to be rather in favor of the "hedgehog" or
"porcupine," for the Hebrew word kyppeis appears
to be identical with kanjaf, the Arabic word 3b
for the hedgehog; but zoologically, the hedgehog or
porcupine is quite out of the question. The word
occurs in Is. xxi. 2, where of Babylon the Lord
says, "I will make it a possession for the kyppeis
and pools of water;" — in Is. xxxiv. 11, of the
kind of hinnom it is said, "the kathed and the kip-
peis shall possess it;" and again in Zeph. ii. 14:
"I will make Nineveh a desolation and dry like a
wilderness; flocks shall lie down in the midst of
her, both the kathed and the kippeis shall lodge in
the chambers thereof, their voice shall sing in the
windows." The former passage would seem to
point to some solitary-loving aquatic bird, which
might well be represented by the bittern, as the A.
V. has it; but the passage in Zephaniah which
speaks of Nineveh being made "dry like a wild-
erness," does not at first sight appear to be so strictly
suited to this rendering. Gesenius, Lee, Parkhurst,
Winer, Fürst, all give "hedgehog" or "porcu-
pine" as the representative of the Hebrew word;
but neither of these two animal-ever lodges on the
chapters of columns, nor is it their nature to fre-
quaint pools of water. Not less unhappy is the read-

"Our custom of eating salad mixtures is in all pro-
bability derived from the Jews. 'Why do we pour
over our lattrees a mixture of oil, vinegar, and ma-
sard?' The practice began in Judaea, where, in order
to render palatable the bitter herbs eaten with the
potash bread, it was usual, says Moses Kispel, to
sprinkle over them a thick sauce called Karoseth,
which was composed of the oil drawn from dates or
from pressed raisin-kernels, of vinegar and mustard."
See "Extract from the Portfolio of a Man of Letters,"

a Cr. Harris (art Bittern) objects to the words
'their voices shall sing in the windows' being applied

made "dry like a wilderness," but the bittern would
find an abode in the Tigris which flows through
the plain of Mesopotamia; as to the bittern perching
on the chapters of ruined columns, it is quite
probable that this bird may occasionally do so; in-
deed (Ib. Smith (Kittie's Cyclop. art. Kyppeis)
says, "though not building like the stork on
the tops of houses, it resorts like the heron to ruined
structures, and we have been informed that it has
been seen on the summit of Tain Kiera at Cesi-
plon." Again, as was noticed above, there seems to
be a connection between the Hebrew kyppeis and
the Arabic kanjaf, 'hedgehog.' Some lexicog-
ographers refer the Hebrew word to a Syrian root
which means "to bristle," and though this deri-
vation is exactly suited to the porcupine, it is no,
on the other hand opposed to the bittern, which
from its habit of erecting and bristling out the

ing of the Arabic version el-bouharn, a species I
boustard — the Bouharae ambulat, see ibis, i. 281 —
which is a dweller in dry regions and quite inca-
pable of roosting. We are inclined to believe that
the A. V. is correct, and that the bittern is the bird
denoted by the original word, as to the objection
alluded to above that this bird is a layer of napkins
and pools, and would not therefore be found in a
beehive which is "dry like a wilderness," a little
reduction will convince the reader that the difficulty
is more apparent than real. Nineveh might be

Boumerus stellaris.
heathers of the neck, may have received the name of the porcupine bird from the ascenti Orientals. The bittern (Botaurus stellaris) belongs to the Ardeidae, the hero family of birds; it has a wide range, being found in Russia and Siberia as far north as the river Lena, in Europe generally, in Barbary, S. Africa, Trebizond, and in the countries between the Black and Caspian Seas, &c.

W. H.

BITUMEN. [SAME.]

BIZJOTHJAH (בּיז'וֹתְיָה) [content of Jethob]: LXX. [Vat. Alex.] omits, [but Comp. Bzothia; Al. בּּּוֹשְׁחֵיתַא:] Bzothiah, a town in the south of Judah named with Beer-sheba and Baalah (Josh. xv. 28). No mention or identification of it is found elsewhere.

G.

BIZTHA (בּיז'תָה): Bzath, [Vat. FA. Mazar]: Alex. Ba'azitha (Bzathia), the second of the seven eunuchs of king Ahasuerus's harem (Esth. i. 10). The name is Persian, possibly בּיזתָה, best, a word referring to his condition as a eunuch (Ges. Thes. p. 197).

BLACK. [COLORS.]

BLAINS (בלין‎:): phléagides, phléagwana, LXX.; Ex. ix. 8, ἀυρέσαντος καὶ ἐν τοις ἄουρασι καὶ ἐν τοις πτεράσι; also מָעָה, pantula ordinis, violent ulcers or inflammations (from עאים, to boil up). It was the sixth plague of Egypt, and hence is called in Deut. xxvii. 35, "the bough of Egypt." (בּלָיִין‎:).—cf. Job ii. 7, עַל בּלי

It seems to have been the psalm of a black leprosy, a fearful kind of leprous disease (comp. Phn. xxvii. 5). It must have had with dreadfulness on the magicians whose art it baffled, and whose scrupulous cleanliness (Herod. ii. 36) it rendered nugatory: so that they were unable to stand in the presence of Moses because of the boils.

Other names for purulent and leprous eruptions are מַרְפֵּנוֹת (Morpheca alba), מַרְפֵּנה (Morpheca nigra), and the more harmless scab מַרְפֵּנוֹת, Lev. xiii. passion (Jalms, Arch. Bibl. § 189).

F. W. P.

BLASPHEMY (בּלָשְׁפָּה, בּלָשְׁפָּה): in its technical English sense, signifies the speaking evil of God (בּלָשְׁפָּה), and in this sense it is found Ps. lxxiv. 18: Is. lii. 5; Rom. ii. 21, &c. But according to its derivation (בּלָשְׁפָּה) it may mean any species of calumny and abuse (or even an unlucky word, Eurip. Ion. 1187): see 1 K. x. 10; Acts xviii. 6; Jude 8, &c. Hence in the LXX. it is used to render בּלָשְׁפָּה, Job ii. 5; בּלָשְׁפָּה, 2 K. xix. 6; בּלָשְׁפָּה, 2 K. xix. 4, and בּלָשְׁפָּה, Hos. vii. 16, so that it means "reproach," "derision," &c. and it has even a wider use, as 2 Sam. xii. 14, where it means "to despise Judah," and 1 Macc. ii. 6, where בּלָשְׁפָּה = calumny. In Ezech. iii. 16 we have בּלָשְׁפָּה = a reproach, where it is equivalent to קִנַּמְיָה (Schlesner, Theol. s. v.). Blasphemy was punished with stoning, which was inflicted on the son of Shelomith (LXX. xxix. 11). On this charge both our Lord and St. Ste-

phus were condemned to death by the Jews. From Lev. xxiii. 16, wrongly understood, arose the singular superstition about never even pronouncing the name of Jehovah. Ex. xxii. 28, "Thou shalt not revile the gods, nor curse the ruler of thy people," does not refer to blasphemy in the strict sense, since 'eblūm' is there used (as elsewhere) of magistrates, &c.

The Jews, misapplying Ex. xxiii. 13, "Make no mention of the name of other gods," seemed to think themselves bound to give nicknames to the heathen deities, and made use of Bēthel for Bēst [Hos. ix. 10, comp. 1st-Bonhetti, Methuen, W. E.], Beth-aven for Beth-el [Hos. iv. 15], Heb. zeal for Belzebul, &c. It is not strange that this "contumelius minimum" (Plln. xii. 9), joined to their zealous proselytism, made them so deeply unpopular among the nations of antiquity (Winer, s. v. Gotteshinsternung). When a person heard blasphemy he laid his hand on the head of the offender, to symbolize his sole responsibility for the guilt, and rising on his feet, tore his robe, which might never again be mended. (On the mystical reasons for these observances, see Lightfoot, Hor. Heb. Matt. xxvi. 63.)

It only remains to speak of the blasphemy against the Holy Ghost, which has been so fruitful a theme for speculation and controversy (Matt. xii. 32; Mark iii. 28). It consisted in attributing to the power of Satan those unquestionable miracles, which Jesus performed by "the finger of God," and the power of the Holy Spirit; nor have we any safe ground for extending it to include all sorts of silliness (as distinguished from wilful offenses, besides those one limited and special sin. The often misunderstood expression "it shall not be forgiven him, neither in this world, &c.," is a direct application of a Jewish phrase in allusion to a Jewish error, and will not bear the inferences so often explored from it. According to the Jewish school notions, "a quo blasphematur nomen Dei, ei non velet penitentia ad suspensum judicium, nec dies expiationis ad expiandum, nec plagae ad abstergerendum, sed omnes suspensum judicium, et moris absterget." In refutation of this tradition our Lord used the phrase to imply that "blasphemy against the Holy Ghost shall not be forgiven; neither before death, nor, as you wisely dream, by means of power" (Lightfoot, Hor. Heb. ad loc.). As there are no tenable grounds for identifying this blasphemy with "the sin unto death," 1 John v. 16, we shall not here enter into the very difficult inquiries to which that expression leads.

F. W. P. * On the meaning of בּלָשְׁפָּה, and on the theological abuse of the term blasphemy in English, see Campbell, Diss. IX. Part ii., prefixed to his Translation of the Gospels.

A.

BLASTUS (בּלָסְתּוֹס‎: shoot or spear), the chamberlain (דָּשְׁבִּיקְטָה) of Herod Agrippa I., mentioned Acts xii. 22, as having been made by the people of Tyre and Sidon a mediator between them and the king's anger. (See CHAMBERLAIN.)

H. A.

* BLESSING. [SALUTATION.]

BLINDING. [PUNISHMENTS.]

BLINDNESS (בּלָיִין, בּלָיִין), from the root

α. * It does not appear how the rendering of the LXX. of Job ii. 5 and Hos. vii. 15 illustrates the use of בּלָשְׁפָּה or its cognates.
BLINDNESS

**BLINDNESS (βλάνθω, to blind) is extremely common in the East from many causes; e. g., the quantities of dust and sand pulverized by the sun's intense heat; the perpetual glare of light; the contrast of the heat with the cold sea-air on the coast where blindness is specially prevalent; the dews at night while they sleep on the roots; small-pox, old age, &c., and perhaps more than all the Mohammedan fadibus, which leads to a neglect of the proper remedies in time. One traveler mentions 4000 blind men in Cairo, and Volney reckons that 1 in every 5 were blind, besides others with sore eyes (i. 86). Luke, the ancient Lydian, and Rambler, enjoy a fearful notoriety for the number of blind persons they contain. The common saying is that in Lydii every man is either blind or has but one eye. Jaffa is said to contain 500 blind out of a population of 5000 at most. There is an asylum for the blind in Cairo (at present contains 300), and their conduct is often turbulent and fanatical (Lane, i. 29, 292; Trench, *On the Miracles*; Matt. ix. 27, &c.). Blind beggars figure repeatedly in the N. T. (Matt. xii. 22), and "opening the eyes of the blind" is mentioned in prophecy as a peculiar attribute of the Messiah (Is. xxix. 18, &c.). The Jews were specially charged to treat the blind with compassion and care (Lev. xix. 14; Deut. xxii. 18).

Focal and neuralgic blindness is several times mentioned in the Bible (Gen. xix. 11, *opherix*; LXX.: 2 K. vi. 18-22; Acts ix. 9). In the last passage some have attempted (on the ground of St. Luke's profession as a physician) to attach a technical meaning to ἄχλως and σκότος (Jahn, *Arch. Ebd.*, § 20), viz. a spot or "thin tunicule over the cornea," which vanishes naturally after a time: for which fact Winer (s. v. *Blindheit*) quotes Hippocr. (*Praxid. ii. 215*): ἄχλως... ἅλειαντοι καὶ ἀφαιξόμενα, ἵνα μὴ τρέμα δι εἰπτυγίαν ἐν αὐτών το οὖρον. But this does not remove the miraculous character of the infliction. In the same way analogies are quoted for the use of salvia (Mark viii. 25, &c.) and of fish-gill in the case of the λέυκωα of Tobias: but whatever may be thought of the latter instance, it is very obvious that in the former the salvia was no more instrumental in the cure than the bonch alone would have been (Trench, *On the Miracles*; Acts xxiv. 14, &c.).

Blindness willfully inflicted for political or other purposes was common in the East, and is alluded to in Scripture (1 Sam. xi. 2; Jer. xxxix. 7).

F. W. F.

**BLOOD**

**BLOOD, REVENER OF**

To blood is sacrificed in Scripture the mystic sacredness which belongs to life, and God reserves it to Himself when allowing man the dominion over and the use of the lower animals for food, &c. (as regards, however, the eating of blood, see *Lev.*). Thus reserved, it acquires a double power: (1) that of sacrificial atonement, in which it had a wide recognition in the heathen world; and (2) that of becoming a curse, when wanton shedding ever so much as to make blood (in the human sense) or foul water (by the Levitical) of none value, unless duly expiated, i. e., by burial (Gen. ix. 4; Lev. xxi. 25, xxvi. 11-13). As regards (1), the blood of sacrifices was caught by the Jewish priest from the neck of the victim in a basin, then sprinkled seven times (in case of birds at once squeezed out) on the altar, if. e. on its horna its base, or its four corners, or on its side above or below a line running round it, or on the mercy-seat according to the quality and purpose of the offering, but taken away passover on the lintel and doors (Exod. xii.; Lev. iv. 5-7, xvi. 14; 14, 20, 21; Lev. ibid., *Thes.* vol. x. and xiii.). There was a drain from the temple into the brook Cedron to carry off the blood (Maimon. op. cit. *Commen. de Aral Exter. Teglini*, viii.). In regard to (2), it sufficed to pour the animal's blood on the earth, or to bury it, as a solemn rendering of the life to God; in case of human bloodshed a mysterious connection is observable between the curse of blood and the earth or land on which it is shed, which becomes polluted by it: and the proper expiation is the blood of the shedder, which every one had thus an interest in seeking, and was bound to seek (Gen. iv. 10, ix. 4-6; Num. xxxv. 32; Ps. civ. 38; see *BLOOD, REVENGER OF*). In the case of a dead body found, and the death not accounted for, the guilt of blood attached to the nearest city, to be ascertained by measurement, until freed by prescribed rites of expiation (Num. xxi. 1-9). The guilt of murderer here is one for which "satisfaction" was forbidden (Num. xxxv. 31).

**BLOOD, ISSUE OF** (βλανθώ, βλάνθω, βλανθώς, coagul.: *plasma laboriosum*). The term is in Scripture applied only to the case of women under menstruation or the *plafus uteri* (Lev. xv. 19-30; Matt. ix. 19, 20. γυναίκα αμφιθορίας Mark v. 25 and Luke viii. 43. οὐδε ἐν σάλιοις αὐτόν. The latter caused a permanent legal uncleanness, the former a temporary one, mostly for seven days, after which she was to be purified by the customary offering. The "bloody flux" (διαστρεβλία in Acts xxiii. 8, where the patient is of the male sex, is, probably, a medically correct term* (see Karlholm, *H. Med. Biblioth., 17*).

**BLOOD, REVENGER OF** (γεόλ, Geol). It was, and is even still, a common practice among nations of patriarchal habits, that the nearest of kin should avenge a relative. The duty was no doubt that of a murdured relative. The early impressions and practice on this subject may be gathered from writings of a different though very early age, and of different countries (Gen. xxiv. 30; Hom. H. xii. 84, 88, xxiv. 480; Od. xx. 270, 276; Müller on *Aeschyl. Fem. c. ii. A. & R.*). Compensation for murderer is allowed by the Koran, and he who transgresses against this by killing the murdured shall suffer a grievous punishment (Sole, *Koran*, ii. 21, and xiii. 230). Among the Beduins, and other Arab tribes, should the offer of blood-money be refused, the "Thar," or law of blood, comes into operation, and any person within the fifth degree of blood from the homicide may be legally killed by any one within the same degree of consanguinity to the victim. Frequently the homicide will wander from tent to tent over the desert, or even rove through the towns and villages on its borders with a claim round its neck and in rags begging contributions from the charitable to pay the appeitioned blood-money. Three days and four hours are allowed to the persons included within the "Thar" for escape. The right to blood-revenge is never

*It has been objected that though the term may be technically correct, Luke has erred in substituting "blown away" to a sky element, like that of Malta. But we have now the testimony of physicians in that
BOOR. REVENGER OF

BOAZ 317

BLOOD.

The spirit of all legislation on the subject has probably been to restrain the license of punishment assumed by relatives, and to limit the duration of feuds. The law of Moses was very precise in its directions on the subject of Retaliation.

The willful murderer was to be put to death without permission of compensation. The nearest relative of the deceased became the authorized avenger of blood (קִשָּׁי, the redemer, or avenger, as next of kin, Gen. s. v. p. 254), who rejects the opinion of Michaelis, giving it the signification "to pollute," i.e. till the murder was avenged (דָּעַיְשֶׂה רֹאֶה, LXX., propinquus occisi, Vulg., Num. xxxv. 19), and was bound to execute retaliation himself if it lay in his power. The king, however, in later times appears to have had the power of restraining this license. The shedder of blood was thus regarded as inimical and polluted (Num. xxxv. 16-31; Deut. xix. 11: 2 Sam. xiv. 7, 11, xvi. 8, and iii. 29, with 1 K. ii. 31, 35; 2 Chr. xxiv. 22-29).

2. The law of retaliation was not to extend beyond the immediate offender (Deut. xxiv. 16; 2 K. xiv. 6; 2 Chr. xxv. 4; Jer. xxxii. 29-30; Ez. xviii. 2): Joseph. Ant. iv. 8, § 39). The involuntary shedder of blood was permitted to take flight to one of six Levitical cities, specially appointed out of the 48 as cities of refuge, three on each side of the Jordan (Num. xxxv. 22, 23; Deut. xiv. 4-6). The cities were Kedesh, in Mount Naphtali; Bezer, in Mount Ephraim; and Helbron in the hill-country of Judah. On the E. side of Jordan, Bezer, in Reuben; Ramoth, in Gad; Golan, in Manasseh (Josh. xx. 7, 8). The elders of the city of refuge were to hear his case and protect him till he could be tried before the authorities of his own city. If the act were then decided to have been involuntary, he was taken back to the city of refuge, round which an area with a radius of 2000 (3000, Patrick) cubits was assigned as the limit of protection, and to remain there in safety till the death of the high-priest for the time being. Beyond the limit of the city of refuge, the avenger might slay him, but after the high-priest's death he might return to his home with impunity (Num. xxxv. 25, 28; Josh. xx. 4, 6). The roads to the cities were to be kept open (Deut. xix. 3).

To these particulars the Talmudists add, among others of an absurd kind, the following: at the cross-roads posts were erected bearing the word בּגֶזָּר, refuge, to direct the fugitive. All facilities of water and situation were provided in the cities: no implements of war or chase were allowed there. The mothers of high-priests used to send presents to the detainted persons to prevent their wishing for the high-priest's death. If the fugitive died before the high-priest, his bones were sent home after the high-priest's death (P. Fagius in Frag. W. J. K. ii. 190). The Talmudists also relate a story of a man who had been sent to Rome, was shipwrecked on the coast of Greece, and was killed there. His mother, hearing of his death, sent to Rome, and the body was sent to her with great care. The mother, however, was not satisfied, and sent for the corpse. When she saw it, she exclaimed: "The body is now here, but the soul is gone." See Talmud, Sanh. 41b.

* Cassel (Richter u. Ruth, p. 215) derives Boaz from בּּע, son of strength: which as the name of the pillar on the left of Solomon's porch, agrees better with Jachin (堅ness), name of the pillar on the right Jachin the mate of Boaz, The derviation from

* BLUE. [Colours.]

BOANERGES (נֶבֶן-גֶּרֶנֶּס), Mark iii. 17, a name signifying בּוֹאֵנֵר, "sons of thunder," given by our Lord to the two sons of Zebedee, James and John. It is the Aramaic pronunciation (according to which Shem is sounded as שֶנַּע) of בּוֹאֵנֵר. The latter word in Hebrew signifies a tumult or uproar (Ps. ii. 1), but in Arabic and Syriac thunder. Probably the name had respect to the fiery zeal of the brothers, signs of which we may see in Luke ix. 34; Mark ix. 38; comp. Matt. xx. 29 ff. H. A.

BOAR. [Swine.]

* BOAT. [Ship.]

BOAZ (בּוֹאֵצ, fleetness: a Bozë, Vat. [Boz] Alex. Βόας exc. Ruth ii. 19, iv. 8, and 1 Chr. Boz). 1. A wealthy Bethlehemite, kinsman to Elimelech, the husband of Naomi. Finding that the kinsman of Ruth, who stood in a still nearer relation than himself, was unwilling to perform the office of קִשָּׁי, he had those obligations publicly transferred with the usual ceremonies to his own discharge; and hence it became his duty by the levirate law to marry Ruth (although it is hinted, Ruth iii. 10, that he was much her senior, and indeed this fact is evident whatever system of chronology we adopt), and to redeem the estates of her deceased husband Mahlon (iv. 1 ff.; 1 John, Arch. Bibl. § 157). He gladly undertook these responsibilities, and their happy union was blessed by the birth of Obed, from whom in a direct line our Lord was descended. No objection seems to have arisen on the score of Ruth's Moabish birth; a fact which has some bearing on the date of the narrative (cf. Est. ii. 1 ff.). [BETHLEHEM.] Boaz is mentioned in the genealogy (Matt. i. 5) but there is great difficulty in assigning his date. The genealogy in Ruth (iv. 18-22) only allows 10 generations for 850 years, and only 4 for the 450 years between Salmon and David, if (as is almost certain from St. Matt. and from Jewish tradition) the Kishah mentioned is Rahab the harlot. If Boaz be identical with the judge Ibzan [Ibzan], as is

* הָיְשָׁר, in whom is strength, affords a similar meaning. Gesenius thinks the name as applied to Solon’s pillar may have been that of the donor or of a chieftain. H.
stated with some shadow of probability by the Jerusalem Talmud and various rabbis, several generations must be inserted. Dr. Kennicott, from the difference in form between Salmon and Nahum ( Ruth iv. 20, 21), supposes that by mistake two different men were identified (Dict. i. 543); but we want at least three generations, and this supposition gives us only one. Mill quotes from Nicolaus Lymanus the theory, *"dumfato majores nostrae et bene vivant, quod (a revo puncto Bocce sibi succedentes:) in Mt. i. isti tres sub uno nomine comprehendarunt." Even if we shorten the period of the Judges to 240 years, we must suppose that Boaz was the youngest son of Salmon, and that he did not marry till the age of 65 (Dr. Mill, On the Genealogies: Lord A. Hervey, ib. p. 202, &c.).

2. Bocce (in 1 K. Baalq f. Vat. Baalq, Alex. Boos, Comp. Baosc; in 2 Ch. LXX. iror, strength], the name of one of Solomon's brazen pillars erected in the temple porch. [LXXIV.] It stood on the left, and was 17 cubits high (1 K. vii. 15, 21; 2 Ch. iii. 15; Jer. iii. 21). It was hollow and surmounted by a chapter, 5 cubits high, ornamented with net-work and 100 pomegranates. The apparent discrepancies in stating the height of it arise from the including and excluding of the ornament which united the shaft to the chapter, &c.

F. W. F.

BOCCAS (دووكاس: Boccos), a priest in the line of Esdras (1 Esdr. viii. 2). [Bekker; Beith.]

BOCHERU (תְּבַרְוּ): [youth or first-born]: Boccos: 1 Ch. viii. 38, ix. 44, according to the present Hebrew text, son of Azel: but rendered πρωτός of LXX. in both passages, as if pointed תבַר. [Bacher.]

A. C. H.

BOCMICH (בּכַמְו, the shepherds: יַרְבַּדִּים, כַּמְוָיִם, basc fleuloin wise bergamom,）、 a place on the west of Jordan above Gilgal (Judg. ii. 1 and 5), so called because the people *went* there.

* The LXX. insert εἰς Basidi after Bochim, and thus follow an opinion, possibly a tradition, that the place of weeping was near Bethel. The going up thither of the "angel" from Gilgal (על הובּות) favors that view. Bertheau (Richter, p. 50) infers from the sacrileges (ver. 5) that the Hebrews could not have been at the time far from one of their sacred places, perhaps Shiloh; but (see Keil's Book of Judges, p. 264) they were not restricted in this manner, but performed such rites in any place where Jehovah appeared to them. Beyond this there is no clue to the exact spot where the scene occurred.

II.

BOHAN (*תֹבֵּן, *תֹבֵּן): Bocos; in Josh. viii. 17 Alex. Baum: Comp. Abd.: Baos: Bocs; a Red-rite after whom a stone was named, possibly erected to commemorate some achievement in the conquest of Palestine (comp. 1 Sam. vii. 12). Its position was on the border of the territories of Benjamin and Judah between Beth-arabah and Beth-georg on the E., and Adummim and En-shemen on the W. Its exact situation is unknown (Josh. xv. 5, xviii. 17). [Stones.]

W. L. H.

BOIL. [Medicine.]

BOILSTER. The Hebrew word (נָסָמֵץ, נָשַׁמֵּץ) so rendered, denotes, like the English, imply a place for the head. Hardy travelers, like Jacob (Gen. xxviii. 11, 18) and Elijah (1 K. xia 6), sleeping on the bare ground, would make use of a stone for this purpose; and soldiers on the march had probably no softer resting place (1 Sam. xxvi. 7, 11, 12, 16). Possibly both Saul and Elijah may have used the water-bottle which they carried as a bolster, and if this were the case, David's midnight adventure becomes more conspicuously daring. The "pillow" of goat's hair which Michal's cunning put in the place of the bolster in her husband's bed (1 Sam. xiv. 13, 16) was probably, as Ewald suggests, a net or curtain of goat's hair, to protect the sleeper from the mosquitoes (Gesch. iii. 101, note), like the "canopy" of Holofernes. [David, Amer. ed.] W. A. W.

* BOLLED. * The flux was balled," Ex. ix. 31, i. e. swollen, queued for seed. The word ball is etymologically cognate with ball, bolt, hostel. The Hebrew term here used, בּוּלָה, does not imply anything more than that the flux was in bud, ready to flower (see Ges. and Först, s. v.). See also FLAX.

A.

BONDAGE. [Slavery.]

BONNET. [See Head-dress.] In old English, as in Scotch to this day, the word "bonnet" was applied to the head-dress of men. Thus in Hall's Rich. i. 114, fol. 9 a: *"And after a little season putting of lyfe bondhe he sayeth: O Lord God creator of all thynge, howe muche is this realme of Englonde and the people of the same bounden to thy goodnes." And in Shakespeare (Ham. v. 2): *"Your bonnet to his right use: 'tis for the head." W. A. W.

BOOK. [Writing.]

BOOTH. [Succoth; Tabernacles, Feast of.]

BOOTY. This consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. Within the limits of Canaan no captives were to be made (Deut. xx. 14 and 16); beyond these limits, in case of warlike resistance, all the women and children were to be made captives, and the men put to death. A special charge was given to destroy the "pictures and images" of the Canaanites, as tending to idolatry (Num. xxxvi. 52). The case of Amalek was a special one, in which Saul was bidden to destroy the cattle. So also was that of the expedition against Arad, in which the people took a vow to destroy the cities, and that of Jericho, on which the curse of God seems to have rested, and the gold and silver, &c. of which were viewed as reserved wholly for Him (1 Sam. xv. 2, 3; Num. xxi. 23. Josh. vi. 19). The law of booty was that it should be divided equally between the army who won it and the people of Israel, but of the former half one head in every 500 was reserved to God, and appropriated to the priests, and of the latter one in every 50 was similarly reserved and appropriated to the Levites (Num. xxxi. 26-47). As regarded the army, David added a regulation that the baggages should share equally with the troops engaged. The spoils made by David out of the cities of towns in Judah was an act of grateful courtesy merely, though perhaps suggested by the law, Num. l. e. So the spoils devoted by him to provide for the temple, must be regarded as a free will offering (1 Sam. xxx. 24-26; 2 Sam. viii. 11 1 Chr. xxvi. 27). W. H.
BOZ

BO' OZ (Rec. T. Ba'ot; Lachm. [Treg. and 
for Q. PH. (7th ed.)] with ABD [in Luke], Boös;

T*O* (Barros, Bosor), a strong city in Gilead 
taken by Judas Maccabeus (1 Mac. v. 25, 28), 
doubtless the same as BOZKH.

BOTICH. [MEDICINE.]

BOTTLE. The words which are rendered in 
A. V. of O. T. "bottle" are, (1.) λεκτέα (Gen. xxi. 
14, 15, 19): ἄνεσι: ets: a skin-bottle. (2.) ἴπποι, 
or ἱππός (1 Sam. x. 3; Job xxxviii. 37; Jer. xiii. 
12; Is. v. 11, xxx. 14; Lam. iv. 2): ἄγγελος, 
κεραίων, ἄνακτος: uts: uter, vis testenum, legum, lucan-
culae. (3.) ΡΩΣ (Jer. xix. 1): ΒΝΟΣ ΒΡΟΠΧ-, 
ροσ: lucanulae. (4.) λαος (Josh. ix. 4, 13; Judg. 
iv. 19; 1 Sam. xvi. 20; Ps. cxix. 83): ἄνεσιος: uts: 
legum.

In N. T. the only word rendered "bottle" is 
ὁνάκτος (Matt. ix. 17; Mark ii. 22; Luke v. 37).
The bottles of Scripture are thus evidently of two 
kinds: (1.) The skin bottle. (2.) The bottle of 
carthen or glass-ware, both of them capable of be-
ing closed from the air.

1. The skin bottle will be best described in 
the following account collected from Chardin and oth-
ers. The Arabs, and all those that lead a wander-
ing life, keep their water, milk, and other liquors, 
a leathern bottles. These are made of goatskins. 
When the animal is killed, they cut off its feet 
and its head, and they draw it in this manner out 
of the skin, without opening its belly. In Arabia 
they are then tanned with acacia-bark and the hairy 
part left outside. If not tanned, a disagreeable 
taste is imparted to the water. They afterwards 
saw up the places where the legs were cut off and 
the tail, and when it is filled they tie it about the 
neck. The great leathern bottles are made of 
the skin of a he-goat, and the small ones, that serve 
instead of a bottle of water, on the road, are made 
of a kid's skin. These bottles when rent are re-
paired sometimes by setting in a piece; sometimes 
by gathering up the wounded place in manner of a 
purse; sometimes they put in a round flat piece of 
wood, and by that means stop the hole (Char-
din, ii. 405, viii. 409; Wellsted, Arabien, i. 81; ii. 
73; Lane, Mod. Eg. ii. e. 11; Harmer, from Char-
din's notes, ed. Clarke, i. 294). Bruce gives a de-
scription of a vessel of the same kind, last larger.

"A gerba is an ox's skin, squared, and the edges 
sewed together by a double seam, which does not 
let out water. An opening is left at the top, in 
the same manner as the bung-hole of a cork; around 
this the skin is gathered to the size of a large 
handful, which, when the gerba is full of water, is tied 
round with whipcord. These gerbas contain about 
sixty gallons each, and two of them are the load of 
a camel. They are then all beseamed on the 
outside with grease, as well to hinder the water from 
coozing through, as to prevent its being evaporated 
by the heat of the sun upon the gerba, which, in 
fact, happened to us twice, so as to put us in 
danger of perishing with thirst." (Travels, iv 
334.)

Skin Bottles. (From the Museo Borbonico.)

Wine-bottles of skin are mentioned as used by 
Greeks, Romans, and Egyptians, by Homer (Od. 
vil. 78, ολὸν ἔχειν ἀσκόν ἀσκόν ἐν αἰγίλοις; ii. 
247); by Herodotus, as used in Egypt (ii. 121), 
where he speaks of letting the wine out of the skin 
by the μοδίεων, the end usually tied up to serve as 
the neck; by Virgil (Georg. ii. 384). Also by 
Athenaeus, who mentions a large skin-bottle 
of the nature of the gerba (ἄσκος ἐκ παραδόλου διαρᾶτων 
ἀμαμάτων, v. 28, p. 199). Chardin says that 
wine in Persia is preserved in skins saturated with 
pitch, which, when good, impart no flavor to the 
wine (Loyges, iv. 75). Skins for wine or other 
liquids are in use to this day in Spain, where they 
are called borrachas.

The effect of external heat upon a skin-bottle is 
disclosed in Ps. cxxiii. 83, "a bottle in the smoke," 
and of expansion produced by fermentation in Matt. 
ix. 17, "new wine in old bottles" [or "skins"].

2. Vessels of metal, earthen, or glass ware 
for liquids were in use among the Greeks, Egyptians, 
Egyptian Bottles. 1 to 7, glass, 8 to 11, carthinware. 
(From the British Museum Collection.)
branched of a candlestick (Zech. iv. 2), and also a suspended lamp, in A. V. "golden bowl" (Ezek. xii. 6); (2) indicating lowness, is perhaps a shallow dish or basin; (3) a hollow vessel; (4) a round vessel (Jer. xxxv. 5) κεφαλής LXX.; (5) a lustratory vessel, from θυρώς, pure.

A like uncertainty prevails as to the precise form and material of these vessels as is noticed under Basin. Bowls would probably be used at meals for liquids, or broth, or potage (2 K. iv. 40). Modern Arabs are content with a few wooden bowls. In the British Museum are deposited several terra-cotta bowls with Chalidian inscriptions of a superstitious character, expressing charms against sickness and evil spirits, which may possibly explain the "divining cup" of Joseph (Gen. xlv. 5). The bowl was filled with some liquid and drunk off as a charm against evil. See a case of Tippoo Sahib drinking water out of a black stone as a charm against misfortune (French, Life of Muawo, i. 218). One of the Brit. Mus. bowls still retains the stain of a liquid. These bowls, however, are thought by Mr. Birch not to be very ancient (Layard, Nineveh and Babylon, pp. 196, 503; Gesenius, i. v.).

* BOX-TREE. The Hebrew word (כדרון) "box-tree; κεδρόν, κέδρος; box-tree, pine" occurs in Is. ix. 13, together with the "fir-tree and the pine-tree," as furnishing wood from Lebanon for the temple that was to be built at Jerusalem. In Is. xlii. 10 the "cedar" is mentioned in connection with the cedar, "the fir-tree and the pine," &c., which should one day be planted in the wilderness. There is great uncertainty as to the tree denoted by the "cedar." The Talmudical and Jewish writers generally are of opinion that the box-tree is intended, and with them agree Montanus, Boccalini, the A. V. and other modern versions; Rosenmueller (Bibl. Botan. 300), Celsius (Hierob. ii. 153), and Parkhurst (Heb. Lex. s. v. כדרון) are also in favor of the box-tree.

The Syrian and the Arabic version of Saadius understand the "cedar" to denote a species of cedar called σελήνυς which is distinguished by the small size of the cones and the upright growth of the branches. This interpretation is also sanctioned by Gesenius and Firm (Heb. Concord. p. 134). Hillel (Hierob. 3. 401) believes the Hebrew word may denote either the box or the maple. With est telicelisma et prestantissima inter omnes species cedro unum (Phil. l. c.).
regard to that theory which identifies the tesassārī with the sherbānā, there is not, beyond the authority of the Syriac and Arabic versions, any satisfactory evidence to support it. It is uncertain moreover what tree is meant by the sherbānā: it is supposed to be some kind of cedar: but although the Arabic version of Dioscorides gives sherbānī as the rendering of the Greek κέδρος, the two trees which Dioscorides speaks of seem rather to be referred to the genus juniperus than to that of pinus. However Celsius (Hic. orb. i. 80) and Sprengel (Hist. Rei. Herb. i. 207) identify the sherbānī with the Pinus cedrus (Linn.), the cedar of Lebanon. According to Niebuhr also the cedar was called sherbānī. The same word, however, both in the Chaldee, the Syriac, and the Arabic, is occasionally used to express the berānī. Although the claim which the box-tree has to represent the tesassārī of Isaiah and Ezekiel is far from being satisfactorily established, yet the evidence rests on a better foundation than that which supports the claims of the sherbānī. The

BOZRAH (בֹּזְרַא, shining, according to the conjecture of Gesenius, Thee. p. 229); Bařēs: [Vat. Baש: Comp. Boשס: Boasis], the name of one of the two "sharp rocks" (Hebrew, "teeth of the cliff") between the passages by which Jonathan entered the Philistine garrison. It seems to have been that on the north side (1 Sam. xiv. 4, 5). Robinson notices two hills of blunt conical form in the bottom of the Wady Suscečit just below Jabbō∃ (i. 441 and iii. 293). Stanley, on the other hand, could not make them out (8. of P. 205, note). And indeed these hills answer neither to the expression of the text nor the requirements of the narrative. [See Seneh. Amer. ed.] G.

Amer. ed.] G.
Men as well as women wore bracelets, as we see from Cant. v. 14, which may be rendered, "His wrists are circlets of gold full set with topazes." Layard says of the Assyrian kings: "the arms were encircled by armlets, and the wrists by bracelets, all equally remarkable for the taste and beauty of the design and workmanship. In the centre of the bracelets were stars and rosettes, which were probably inlaid with precious stones" (Nimruch, ii. 323). These may be observed on the sculptures in the British Museum. [Armlet; Anklet.] E. W. F.

BRACELET (πρᾶσατ, χαλακός). The word πρᾶσατ (from the root πυξίς, to shine) is improperly translated by "bracelet" in the earlier books of Scripture, since the Hebrews were not acquainted with the compound of copper and zinc known by that name. In most places of the O.T. the correct translation would be copper (although it may sometimes possibly mean bronze (χαλακός κορμαίων), a compound of copper and tin. Indeed a simple metal was obviously intended, as we see from Deut. iii. 9, "out of whose hills thou mayest dig brass," and Josh xxii. 2. "Brass is molten out of the stone," and Deut. xxxii. 25, "Thy shoes shall be iron and brass," which seems to be a promise that the king should have a district rich in mines, which we know to have been the case, since Ezek. xiii. 15, 17 [de Mort. Pol. c. 7] speaks of the Christians beingRomans κατά φάσμα τῆς Παλαιστίνης χαλακοῦ μετάκειλαν (Lightfoot, Cont. Chronig. c. 99). [Armlet.]

Copper was known at a very early period, and the invention of working it is attributed to Tubal-cain (Gen. iv. 22; cf. Wilkinson, Anc. Egypt, iii. 243; comp. [1 Pet. 3]. 192). Its extreme ductility (χαλακός from χαλάω) made its application almost universal among the ancients, as Hesiod expressly says (Dict. of Ant. art. Αρε).
The word χαλακτιβάνου in Rev. i. 15, ii. 18 (οἱ πάντες αὐτὸν δωμαί χαλακτίβανοι), has excited much difference of opinion. The A. V. renders it "fine brass," as though it were from χαλάδας and λευβα (smelting brass), or that ἄριστος, which was so rare as to be more valuable than gold. Beza refers to "as album igneo colore splendens," as though from ἄλους, "shining." It may perhaps be deeply-colored frankincense, as opposed to ἀργυροκλατίβανον (Liddell and Scott's LEX.).

* BRAYING IN A MORTAR. Prov. xxvii. 22. [Punishments, III. (c. 4.)]

* BRAZEN SEA. 2 K. xxv. 13; Jer. iii. 17. [Sea, Molten.]

* BRAZEN SERPENT. [Serpent.]

BREAD (בֶּן). The preparation of bread as an article of food dates from a very early period. It must not, however, be inferred from the use of the word lechem in Gen. iii. 19 ("bread," A. V.) that it was known at the time of the fall, the word there occurring in its general sense of food: the earliest undoubted instance of its use is found in Gen. xviii. 6. The corn or grain (בֶּן, בֶּן, בֶּן) employed was of various sorts. The best bread was made of wheat, which after being ground produced the "flour" or "meal" (בֶּן, בֶּן) usually used in the sacred offerings (Ex. xxix. 40; Lev. ii. 1; Ex. xiv. 14), and in the meals of the wealthy (1 K. iv. 22; 2 K. vii. 1; Ex. xvi. 13, 19; Rev. xiii. 13). "Barley" was used only by the very poor (John vi. 9, 13), or in times of scarcity (Ruth iii. 15, compared with i. 1; 2 K. iv. 38, 42; Rev. vi. 6; Joseph. B. J. v. 10, § 2) as it was the food of horses (1 K. iv. 28), it was considered a symbol of what was mean and insignificant (Judg. vii. 13; comp. Joseph. Ant. v. 6, § 4, μᾶλα κρατίνην, ὕπε εὐερείαι ἀνθρωπός ἄργυρος; Liv. xxvii. 31), as well as of what was of a more animal character, and hence ordered for the offering of jealousy (Num. v. 15; comp. Hosea iii. 2; Philo, ii. 307). "Spelt" (סֵפֶל: שפֶל, שפֶל) was also used both in Egypt (Ex. i. 32) and Palestine (Deut. xxv. 25; Ex. IV. 9; 1 K. xix. 6, LXX. λεγεφλων διαφέρει).

* Translated "flishiness" in Ezek. xvi. 30 (A. V.), instead of brass or money (בֶּן, בֶּן, בֶּן). H.

(ii. 36) that in the former country bread was made exclusively of οἶνος, which, as in the LXX., he identifies with zen; but in this he was mistaken, as wheat was also used (Ex. ix. 32; comp. Wilkinson's Anc. Egypt. ii. 397). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentils, and millet, were added (Ex. iv. 19; cf. Sam. xvu. 28); the bread so produced is called "barley cakes" (Ex. iv. 12, "as barley cakes," A. V.), inasmuch as barley was the main ingredient. The amount of meal required for a single baking was an ephah or three measures (Gen. xviii. 6; Judg. vi. 19; 1 Sam. i. 24; Matt. xiii. 33), which appears to have been suited to the size of the ordinary oven. The baking was done in primitive times by the mistress of the house (Gen. xvii. 6) or one of the daughters (2 Sam. xi. 8); female servants were however employed in large households (1 Sam. viii. 13); it appears always to have been the proper business of women in a family (Jer. vii. 18, xiv. 19; Matt. xxii. 33; cf. Hfn. xviii. 11, 28). Baking, as a profession, was carried on by men (Hos. vii. 4, 6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street" (Jer. xxxvii. 21), and "tower of the ovens" (Neh. xi. 11, xli. 38, "furnaces," A. V.). In the time of the Herods, bakers were scattered throughout the towns of Palestine (Ant. xiv. 9, § 2). As the bread was made in thin cakes, which soon became dry and unpalatable, it was usual to bake daily, or when required (Gen. xviii. 6; comp. Harmer's Observations, i. 483): reference is perhaps made to this in the Lord's prayer (Matt. vi. 11; Luke xi. 3). The bread taken by persons on a journey (Gen. xiv. 23; Josh. ix. 12) was probably a kind of biscuit. The process of making bread was as follows: the flour was first mixed with water, or perhaps milk (Bareard's Notes on the Bedouins, i. 58); it was then kneaded (בֶּן) with the hands (in Egypt with the feet also; Herod. ii. 36; Wilkinson, ii. 386) in a small wooden bowl or "kneading-trough" (בֶּן, a term which may, however, rather refer to the leathern bag in which the Bedouins carry their provisions, and which serves both as a wallet and a table; Niebuhr's Voyage, i. 171; Harmer, iv. 360 ff.; the LXX. inclines to this view, giving "kneading-pan." The amount of meal required for a single baking was an ephah or three measures (Gen. xxi. 34, however, "baked up in their clothes," favors the idea of a wooden bowl), until it became dough (בֶּן: σταίρ, Ex. xii. 34, 39; 2 Sam. xiii. 8; Jer. vii. 18; Hos.
Egyptians kneading the dough with their feet. At a and b the dough is probably left to ferment in a basket, as is now done at Cairo. (Wilkinson.)

vii. 4. The term "dough" is improperly given in the A.V. as ἀρτήριον; in Num. xv. 20, 21; Neh. x. 37; Ez. xlv. 30. When the kneading was completed, leaven (τράγος; q.v.) was generally added (Lev. xvi.), but when the time for preparation was short, it was omitted, and unleavened cakes, hastily baked, were eaten, as is still the prevalent custom among the Bedouins (Gen. xviii. 6, xix. 3; Ex. xii. 39; Judg. vi. 19; 1 Sam. xxviii. 24). Such cakes were termed ἄρτηριον (ἀρτηρια), a word of doubtful sense, variously supposed to convey the ideas of thinness (First. Lex. s. v.), swiftness (Green. Theog. p. 315), or purity (Knobel, Comm. in Ex. xii. 20), while leavened bread was called αὐράμ (lit. sharpened or sour'd; Ex. xii. 39; Hos. vii. 4). Unleavened cakes were ordered to be eaten at the passover to commemorate the haste by which the Exodus was accomplished (Ex. xii. 13; xiii. 3, 7; Deut. xvi. 3), as well as on other sacred occasions (Lev. ii. 11, vi. 16; Num. vi. 15). The leavened mass was allowed to stand for some time (Matt. xiii. 33; Luke xiii. 21), sometimes for a whole night ("their baker sleepeth all the night," Hos. vii. 6), exposed to a moderate heat in order to forward the fermentation ("the cease not stirring" [נтель]: "raising," A.V.) so as until it be leavened," Hos. vii. 4). The dough was then divided into round cakes (ἄρτηρια τήθρη, lit. circle; ἀποτελεῖ: "leaves," A.V.; Ex. xix. 23; Judg. viii. 5; 1 Sam. x. 3; Prov. vi. 26; in Judg. vii. 13, ἄρτηρια; marṣaḥ), not unlike flat stones in shape and appearance (Matt. vii. 9; comp. iv. 13), about a span in diameter and a finger's breadth in thickness (comp. Luke's Modern Egyptians, i. 164). Three of these were required for the meal of a single person (Luke xi. 5), and consequently one was barely sufficient to sustain life (1 Sam. ii. 36, "merse"), A.V.; Jer. xxxix. 21, "piece," A.V.), whence the expression ἄρτηρια ἄρτηρια, "bread of affliction" (1 K. xxi. 27; Is. xxx. 20), referring not to the quality (πομ πλεθνου, Grotius), but to the quantity; two hundred would suffice for a party for a reasonable time (1 Sam. xiv. 18; 2 Sam. xi. 1). The cakes were sometimes punctured, and hence called ἄρτηριον (καλλυρίζειν; Ex. xxix. 2, 23; Lev. vi. 4, viii. 26, xxiv. 5; Num. xv. 20; 2 Sam. vi. 19), and mixed with oil. Similar cakes, sprinkled with seeds, were made in Egypt (Wilkinson, ii. 386). Sometimes they were rolled out into wafers

An Egyptian carrying cakes to the oven. (Wilkinson.)

Egyptians making cakes of bread sprinkled with seeds. (Wilkinson.)

(ἄρτηριον: Ex. xxix. 2, 23; Lev. vi. 4; Num. vi. 15-19), and merely coated with oil. Oil was occasionally added to the ordinary cake (1 K. viii. 12). A more delicate kind of cake is described in 2 Sam. xiii. 6, 8, 10: the dough ("flour," A.V.) is kneaded a second time, and probably some stimulating seeds added, as seems to be implied in the name ἄρτηριον (from ἄρτηριον, heart; compare our expression a cordial: καλλυρίδαις: subtilissimum). The cakes were now taken to the oven, having been first, according to the practice in Egypt, gathered into "white baskets" (Gen. xl. 16), ἄρτηριον, a doubtful expression, referred by some to the whiteness of the bread (μαρσᾶ χορδιτρων: Aquila, κάρατες γράνιτρων: cotides fivina); by others, as in the A. V., to the whiteness of the baskets, and again, by connecting the word ἄρτηριον with the idea of a hole, to an open-work basket (margin, A.V.), or lastly to bread baked in a hole (Kitto, Cyclop., art. Bread). The baskets were placed on a tray and carried on the baker's head (Gen. xl. 16; Herod. ii. 35; Wilkinson, ii. 386).

The methods of baking (ἄρτηριον) were, and still are, very various
in the East, adapted to the various styles of art. In the towns, where professional bakers resided, there were no doubt fixed ovens, in shape and size resembling those in use among ourselves; but more usually each household possessed a portable oven (Ἱμηθρ ιαλθρη) consisting of a stone or metal jar about three feet high, which was heated inwardly with wood (1 K. xvii. 12; Is. xlv. 13; Jer. vii. 18) or dried grass and flower-stalks (χορος, Matt. vi. 30); when the fire had burned down, the cakes were applied either inwardly (Hered. ii. 92) or outwardly: such ovens were used by the Egyptians (Wilkinson, ii. 385) and by the Easterns of Jerome’s time (Comment. in Lam. x. 10), and are still common among the Bedouins (Wellsted’s Travels, i. 350; Niebuhr’s Descript. de l’Arabie, pp. 45, 46). The use of a single oven by several families only took place in time of famine (Lev. xxvi. 29). Another species of oven consisting of a hole dug in the ground, the sides of which were coated with clay and the bottom with pebbles (Harmer, i. 487). John (Arch. ed. i. 9, § 140) thinks that this oven is referred to in the term θηλη (Lev. xi. 35); but the dual number is an objection to this view. The term ἀνθρος (Gen. x. 16) has also been referred to it.

Other modes of baking were specially adapted to the migratory habits of the pastoral Jews, as of the modern Bedouins; the cakes were either spread upon stones, which were previously heated by lighting a fire above them (Burekhardt’s Notes, i. 58) or beneath them (Bedouin’s Travels, p. 81); or they were thrown into the heated embers of the fire itself (Wellsted’s Travels, i. 350; Niebuhr, Descript. p. 40); or lastly, they were roasted by being placed between layers of dung, which burned slowly, and is therefore specially adapted for the purpose (Ez. iv. 12, 15; Burekhardt’s Notes, i. 57; Niebuhr’s Descript. p. 46). The terms by which such cakes were described were θηλη (Gen. xviii. 6; Ex. xii. 39; 1 K. xvii. 13; Ez. iv. 12; Hos. vii. 8), θηλή (1 K. xvii. 12; Ps. xxxix. 19), or more fully ἱμηθρος θηλη (1 K. xix. 6, lit. on the stones, “coals,” A. V.), the term ἱμηθρος referring, however, not to the mode of baking, but to the molded shape of the cake (Gen. xxi. 27; xix. 2; Gen. xxiv. 2). The equivalent terms in the LXX. ἑκρυσίας, and in the Vulg. subsecivitios fornii, have direct reference to the peculiar mode of baking. The cakes required to be carefully turned during the process (Hos. vii. 8; Harmer, i. 488). Other methods were used for other kinds of bread; some were baked on a pan (θηλη: τριγχανον: σφέντε: the Greek term survives in the tureen of the Bedouins), the result being similar to the khobz still used among the latter people (Burekhardt’s Notes, i. 58) or like the Greek ταξιγρημα, which were baked in oil, and eaten warm with honey (Athen. xvi. 55; p. 646); such cakes appear to have been chiefly used as sacred offerings (Lev. v. 3; vi. 14; vii. 9; 1 Chr. xxiii. 29). A similar cooking utensil was used by Tamar (2 Sam. xiii. 9), named τριγχανον (τριγχανον), in which she baked the cakes and then emptied them out in a heap (not poured, as if it had been broth) before Amnon.

A different kind of bread, probably resembling the fista of the Bedouins, a pasty substance (Burekhardt’s Notes, i. 57) was prepared in a saucepan (ἐρυθρα: κροτελα: φρεγινη: A. V.); none of which meanings however correspond with the etymological sense of the word, which is connected with boiling); this was also reserved for sacred offerings (Lev. vi. 7, vii. 9). As the above-mentioned kinds of bread (the last excepted) were thin and crisp, the mode of eating them was by breaking (Lev. ii. 6; Is. lvii. 7; Lam. iv. 4; Matt. xiv. 19, xv. 36, xxvi. 26; Acts x. 11; comp. Xen. Anab. vii. 3, § 22, ἄφρος ἄκλες), whence the term ἱμηθρος, to break = to give bread (Jer. xvi. 7): the pieces broken for consumption were called κάδαιμα (Matt. xiv. 20; John vi. 12). Old bread is described in Josh. iv. 5, 12, as crumbled (καρύπα: Aquil. ἐπιθυμομαν: in frusta comminuti; A. V. “frequently,” following the LXX. ἐπιθυμομαν καὶ βεβηματομ, a term which is also applied (1 K. xiv. 3) to a kind of biscuit which easily crumbled (κολλομαι: “cracknels,” A. V.)

BREAStPLATE. [Armor, p. 161; High-Priest, I. (2 a.)]

* BREECES (περικεφαλη: feminalis), a kind of drawers, extending only from the loins to the thighs, worn by the priests (Ex. xxviii. 42, xxxiv. 28; Lev. vi. 10, xvi. 4; Ex. xiv. 18; comp. Joseph. Ant. iii. 7, § 1; Philo, De Monarch. lib. ii. c. 6; Opp. ii. 225 ed. Mang.). See PRIEST, Dress.

A.

BRETHREN OF JESUS. [Brotherly.]
The Greeks preferred brick walls in general to stone (xxxv. 14; Vitruv. ii. 3, 8). Bricks of more than 3 palms length and of less than ⅓ palm, are mentioned by the Talmudists (Gesen. s. v.). The Israelites, in common with other captives, were employed by the Egyptian monarchs in making bricks and in building (Ex. i. 14, v. 7). Kiln-bricks were not generally used in Egypt, but were dried in the sun, and even without straw are as firm as when first put up in the reigns of the Amunophs and Thothmuses whose names they bear. The usual dimensions vary from 20 in. or 17 in. to 14½ in. long; 8½ in. to 6½ in. wide; and 7 in. to 4½ in. thick. When made of the Nile mud, or alluvial deposit, they required (as they still require) straw to prevent cracking, but those formed of clay taken from the torrent beds on the edge of the desert, held together without straw; and crude brick walls had frequently the additional security of a layer of reeds and sticks, placed at intervals to act as kinders (Wilkinson, ii. 194, smaller ed.; Birch, Antient Pottery, i. 14); comp. Her. i. 179. Baked bricks however were used, chiefly in places in contact with water. They are smaller than the sun-dried bricks (Birch, i. 23). A brick-kiln is mentioned as in Egypt by the prophet Jeremiah (xliii. 9). A brick pyramid is mentioned by Herodotus (ii. 130) as the work of King Asynchron. Sesostris (ii. 158) is said to have employed his captives in building. Numerous remains of buildings of various kinds exist, constructed of sun-dried bricks, of which many specimens are to be seen in the British Museum with inscriptions indicating their date and purpose (Birch, i. 11, 17). Among the paintings at Thebes, one on the tomb of Rikshara, an officer of the court of Thothmes III. (about 1400 B.C.), represents the enforced labors in brick-making of captives, who are distinguished from the natives by the color in which they are drawn. Watching over the laborers are "task-masters," who, armed with sticks, are receiving the "date of bricks" and urging on the work. The processes of digging out the clay, of moulding, and of arranging, are all duly repre-

---

**Fig. 15.** Fetching water from the tank, e. At e the bricks (tubi) are said to be made at Thebes.
BRIDE, BRIDEGROOM. [MARRIAGE]

BRIDGE. The only mention of a bridge in the Canonical Scriptures is indirectly in the proper name Geshepth (γεσήπθ), a district in Bashan, N. E. of the sea of Galilee. At this place a bridge still exists, called the bridge of the sons of Jacob (Ge- sen. s. v.). Absalom was the son of a daughter of the king of Geshepth (2 Sam. iii. 3, xiii. 37, xiv. 23, 32). The Chaldean paraphrase renders "gates," in Nahum ii. 6, "bridges," where, however, dykes or weirs are to be understood, which being burnt by inundation, destroyed the walls of Nineveh (Diod. ii. 27). Judas Maccabaeus is said to have intended to make a bridge in order to besiege the town of Caphspor or Caspia, situate near a lake (2 Mac. xii. 12). Josephus (J. W. i. 1, § 3), speaking of the Jordan at the time of the passage of the Israelites, says it had never been bridged before, οὐς ξενοκρον πόρτροφον, as if in his own time bridges had been made over it, which under the Romans was the case. (See the notices below.) In Is. xxxvii. 25, θάλας, dig for water, is rendered by LXX. γεφωμα τήθη. Permanent bridges over water do not appear to have been used by the Israelites in their earlier times, but we have frequent mention made of fords and of their military importance (Gen. xxxvi. 22; Josh. ii. 7; Judg. iii. 29, vii. 24, xii. 5; Is. xvi. 2). West of the Jordan there are few rivers of importance (Amm. Marc. xiv. 8; Beland, p. 294), and perhaps the policy of the Jews may have discouraged intercourse with neighboring tribes, for it seems unlikely that the skill of Solomon's architects was unable to construct a bridge.

Herodotus (i. 186) describes a bridge consisting of stone piers, with planks laid across, built by Ni- tocris, b. c. 669, connecting the two portions of Babylon (see Jer. ii. 34, 32, I. 38), and Diodorus speaks of an arched tunnel under the Euphrates (ii. 9). Bridges of boats are described also by Herodotus (iv. 88, vii. 36; comp. Euseb. Pers. 69, νωπείων σενεκίαν), and by Xenophon (Anab. ii. 4, § 12). A bridge over the Zab, made of wickerwork, connecting stone piers, is described by Layard (l. 192), a mode of construction used also in South America.

Though the arch was known and used in Egypt as early as the 15th century B. C. (Wilkinson, ii. 302 ff.), Bich, i. 14 the Romans were the first constructors of arched bridges. They made bridges over the Jordan and other rivers of Syria, of which remains still exist (Stanley, 296; Irlby and Mangels, 90, 91, 92, 148, 143). A stone bridge over the Jordan, called the Bridge of the daughters of Jacob, is mentioned by B. de la Broquiere, A. D. 1432, and a portion of one by Arell, A. D. 700 (Early Trav. in Pal. 8, 300; Burchardt, Syria, 315; Robinson, ii. 441). The bridge (γεφωμα) connecting the Temple with the upper city, of which Jose- phus speaks (B. J. vi. 6, § 2, Ant. xv. 11, 5), seems to have been an arched viaduct (Robinson, i 288, iii. 244; Wilkinson, ii. W. P.)

BRIERS. No less than six Heb. words are thus rendered in eleven passages of the O. T. In Heb. vi. 8, it represents גבורה. In the 8th chapter of Judges occurs twice (v. 7, 16) the word גמרו, which the LXX. render by ταύτα Βαρσουβία (Vat. 699, Buxtorf, or [Alex.] Buxtorfius, Barsoviae, and the A. V. by briiers. This is probably an incorrect rendering. The word properly means a threshing machine, consisting of a flat, square, wooden board set with teeth of iron, flint, or fragments of iron pyrites, which are abundant in Palestine. Gesenius conjectures that γεφωμα was the name for pyrites, from γεφωμα, fulgurare; and hence that γεφωμα = tribul- ula pyritae mundita = יִבְּבָג (see Robinson, ii. 307).

For גנום, Mic. vii. 4, and גנום, Ez. xxviii. 24, see under THORN.

In Ez. ii. 6, we read "Though briers and thorns" be with thee," "briere representing the Heb. יִבְּבָג, which is explained by rebela in the margin. The root is יבב, rebellion vel refractorius fuit, and the rendering should be "Though rebellious men like thorns be with thee."

In Is. lv. 13, we have "instead of the briar shall come up the myrtle-tree," the Heb. word for briar being יבב, irirp; kôvâr: κόαρα, a strong-smelling plant of the endive kind, fether- bone, fulVaPTa, bulba helianthinum, Linnae. (Arist. H. A. iv. 8, 28; Dios. iii. 129). The Pesheho has יִבְּב, satureia, savvoy, wild thyme, Thymus serpyllus, a plant growing in great abundance in the desert of Sinai according to Buckhardt (Syv. ii.). Gesenius rejects both hea-bane and wild thyme on etymol- ogical grounds, and prefers κόαρα, nettle, considering יבב to be a compound of יבב, usit, and יִבְּב, punxit. He also notices the opinion of Ewald (Gnom. Crit. p. 520) that Sinapii album, the white mustard, is the plant meant.

In Is. v. 6, we have mention of briers and thorns as springing up in desolate and wasted lands; and here the Heleew word is יבב, from root יבב, ritgul, hortul, [Adamant] (comp. Is. vii. 29, 34, 25, ix. 18, and xxxii. 13. In Is. x. 17, xvii. 4, יבב is used metaphorically for men. The LXX. in several of these passages have ἅπαλα, in one χφρος, in another [ἀγροτης] ἐργα. Palestine must always have passed this way. See Gesenius.

H.  

b The eminent Hebrewist, Professor Dietrich of Marburg, treats of the subject of this article under the head of Donum- und Dissilam (pp. 35-68) in his Abhandlungen für Semitische Weforschung (Leipzig, 1844).
There is nothing in the etymology or usage by which we can identify the בֶּן-יַרְדֵּנָה with any particular species of prickly or thorny plant. Possibly it is a general term for the very numerous plants of this character which are found in the uncultivated lands of the East.

W. D.

BRIGANDINE. The Hebrew word thus rendered in Jer. xvi. 4, ii. 3 (ningar, singia: ὑπάγας: becirey) is closely connected with that (ningar, shirgin) which is elsewhere translated "coat of mail" (1 Sam. xv. 5, 38), and "helmet" (2 Chr. xxii. 14.; 16 iv. 10). [Arms. p. 161 u.]. Mr. Wedgwood (Dict. of Eng. Figur. s. v.) says it was "a kind of scale armor, also called Brigandins, from being worn by the light troops called Brigands." The following examples will illustrate the usage of the word in Old English: "The rest of the armor for his body, he had put on before in his tent, which was a Sicilian cassece, and upon a damantine made of many foldes of cuirasses with slit-holes, which was gotten among the spoiles at the battle of Issus." (North's Plutarch, B. c. p. 735, ed. 1595). "Hyia selle with the Duke of Burykingdo stede harnes in olde cut-taunored Brigandins" (Hall, Educ. I. 1., ed. 1515.) The forms brigan-taille and brigantine also occur.

W. A. W.

BRIMSTONE (בֶּן-יַרְדֵּנָה, ֻּגְּלִית; ὕπάγω: sulphur). There can be no question that the Hebrew word which occurs several times in the Bible is correctly rendered "brimstone:" if this meaning is fully corroborated by the old versions. The word is very frequently associated with "fire." The Lord rained upon Sodom and Gomorra brimstone and fire out of heaven." (Gen. xix. 24; 2) Ps. vi. 6; Ez. xxxix. 22. In Job xvii. 15, and Is. xxx. 33, "brimstone" occurs alone, but no doubt in a sense similar to that in the foregoing passages, namely, as a synonymous expression with lightning, as has been observed by Le Clerc (Digest. de Sodoma subsidium, Commentario [in] Pentateuch, adjuncta, § iv.), Michaelis, Rosenmüller, and others. There is a peculiar sulphurous odor which is occasionally perceived by a thunder-storm; the ancients had particular attention to it: see Pliny (V. H. ii. 33, L.), Fulminae ac fulgura quoque sulphuris odorum habitant; "Seneca (Qu. nat. ii. 53), and Persius (Sat. ii. 24, 25). Hence the expression in the Sacred writings "fire and brimstone" to denote a storm of thunder and lightning. The stream of brimstone in Is. xxx. 33 is, no doubt, as Lee (Ib. I. I. p. 123) has well expressed it, "a rushing stream of lightning." From Deut. xxiv. 24, "the whole land thereof is brimstone," like the overthrow of Sodom, it would appear that native sulphur itself is alluded to (see also Is. xvii. 9). Sulphur is found at the present time in different parts of Palestine, but in the greatest abundance on the borders of the Dead Sea. "We picked up pieces," says Dr.

Robinson (Bib. Res. ii. 221), "as large as a walnut near the northern shore, and the Arabs said it was found in the sea near "Sin el-Feshkhah in bunks as large as a man's fist; they took it in sufficient quantities to make from it their own gunpowder." See Irby and Mangles (Travels, p. 453), Burekhard (Travels, p. 264), who observes that the Arabs use sulphur in diseases of their camels, and Shaw (Travels, i. 159). There are hot sulphurous springs on the eastern coast at the ancient Callirhoe (Irby and Mangles, Trav. p. 407), and Robinson, Bib. Res. ii. 222.

The pieces of sulphur varying in size from a nutmeg to a small hen's egg, which travelers pick up on the shore of the Red Sea, have, in all probability, been disintegrated from the adjacent limestone or volcanic rocks and washed up on the shores. Sulphur was much used by the Greeks and Romans in their religious purifications (Juv. ii. 157; Plin. xxxv. 15): hence the Greek word ὄμου, lit., "the divine thing;" was employed to express this substance. Sulphur is found nearly pure in different parts of the world, and generally in volcanic districts; it exists in combination with metals and in various sulphates; it is very combustible, and is used in the manufacture of gunpowder, matches, &c. Pliny (l. c.) says one kind of sulphur was employed as dietheumol conficienda." W. I.

* BRING. "To bring a person on his way" or "journey" is used in the A. V. in the sense of to conduct or accompany him, for a part or the whole of the distance, often with the associated idea of fitting him out with the necessary supplies (בֶּן-יַרְדֵּנָה: ὄμουπτήματα, ὄμουπτήματα: δαμος, πρειποτ.): Gen. xviii. 10; Acts xiv. 3, xxi. 5; Rom. xv. 24; 1 Cor. xvi. 6. 2 Cor. i. 16; Tit. iii. 13; 3 John 6). A.

* BRODER. See EMBRODERER. In many modern editions of the A. V., brodered in 1 Tim. ii. 9 — "not with brodered hair" — is a corruption of bridel, the rendering of the ed. of 1611 and other early editions. Bridel is an old form of brodred. The marginal rendering is "platted," Gr. ἐπὶ πλέγμασι: Vulg. in torris erubente.

A.

BROOK. Four Hebrew words are thus rendered in the O. T.

1. בֶּן-יַרְדֵּנָה, ἡπικ (Ps. xlii. 1 [2]), which properly denotes a violent torrent, sweeping through a mountain gorge. It occurs only in the poetical books, and is derived from a root ἡπικ, signifying "to be strong." Elsewhere it is rendered "stream," "channel," "river."

2. בֶּן-יַרְדֵּנָה, ֻּגְּלִית (Is. xix. 6, 7, 8, xxiii. 3, 10), an Egyptian word, generally applied to the Nile, or to the canals by which Egypt was watered. The only exceptions to this usage are found in Dan. xii. 5, 6, 7.

3. בֶּן-יַרְדֵּנָה, ֻּגְלַכ (2 Sam. xxi. 20), which occurs but once, and then, according to the most probable conjecture, signifies a "rivulet," or small stream of water. The etymology of the word is

a Probably allied to בֶּן-יַרְדֵּנָה, a general name for such trees as abound with resinous inflammable exudations;

b Hence בֶּן-יַרְדֵּנָה, "sulphur," as being very combustible. See the Lexicons of Parkhurst and Gesenius.

c Cf. the Arabic بِنْرِدَنِة, B^nrdn.

d From A. S. broom, "to burn," and stone.

e See the different explanation of Hengstenberg (Ps. xlii. 6), who maintains, contrary to all reason, that Sodom and Gomorra were destroyed by "a literal raining of brimstone."
BROTHER

Ac. 4: 37, a most common term applied to both the dry torrent-bed (Num. xxii. 12; Judg. xvi. 4) and to the torrent itself (I K. xviii. 5). It corresponds with the Arabic ِ‌ب‌ر‌ح‌ل‌ك‌, the Greek ἄγαλμα, the Italian piantina, and the Indian मिल्क. For further information, see RIVIÈRE, W. A. W.

BROTHER (τέμνον). The Hebrew word is used in various senses in the O. T., as (1.) Any kinsman, and not a mere brother; e. g. nephews (Gen. xiv. 10, xiii. 9), husband (Gen. iv. 9). (2.) One of the same tribe (2 Sam. xiv. 12). (3.) Of the same people (Ex. ii. 11), or even of a cognate people (Num. xx. 14). (4.) An ally (Am. i. 9). (5.) Any friend (Job vii. 15). (6.) One of the same office (I K. ix. 13). (7.) A fellow man (Lev. xix. 17). (8.) Metaphorically of any similarity. It is a very favorite Oriental metaphor, as in Job xxx. 29, "I am become a brother to the jackals" (Gesen. s. c.).

The word ἀδελφός has a similar range of meanings in the N. T., and is also used for a disciple (Matt. xx. 40, &c.); a fellow-worker, as in St. Paul’s ἀδικία; and especially a Christian. Indeed, we see from the Acts that it was by this name that Christians usually spoke of each other. The name Christian was merely used to describe them objectively, i. e. from the pagan point of view, as we see from the places where it occurs, namely, Acts [xv. 26], xxxi. 28, and I Pet. iv. 16.

The Jewish schools distinguish between a "brother" and a "neighbor"; a "brother" meant an Israelite by blood, a "neighbor" a proselyte. They allowed neither title to the Gentiles; but Christ and the Apostles extended the name "brother" to all Christians, and "neighbor" to all the world, 1 Cor. vii. 39: Luke x. 29, 30 (Lightfoot, Hor. Heb. ad Matt. v. 22).

We must now briefly touch on the difficult and interesting question as to who were "the brethren of the Lord," and pass in review the theories respecting them. And first we would observe that in arguing at all against their being the real brethren of Jesus, far too much stress has been laid on the assumed indefiniteness of meaning attached to the word "brother" in Scripture. In all the adduced cases it will be seen that, when the word is used in any but its proper sense, the context prevents the possibility of confusion; and indeed in the only two exceptional instances (not metaphorical), namely, those in which Lot and Jacob are respectively called "brothers" of Abraham and Laban, the word is only extended so far as to mean "nephew;" and it must be remembered that even these exceptions are quoted from a single book, seventeen centuries earlier than the gospels. If then the word "brother," as repeatedly applied to James, &c., really meant "cousins" or "kinsmen," it will be the only instance of such an application in which no data are given to correct the laxity of meaning. Again, no really parallel case can be quoted from the N. T., except in merely rhetorical and topographical passages; whereas when "nephews" are meant they are always specified as such, as in Col. iv. 10: Acts xxiii. 11 (Kittel, The Apostles, &c., p. 195 f.). There is therefore no adequate warrant in the

a * Not the primitive bishop of this name, of Hierapolis, but a medieval namesake who lived in the 11th

language alone, to take "brethren" as meaning "relatives," and therefore that a priori presumption is in favor of a literal acceptation of the word.

We have dwelt the more strongly on this point, because it seems to have been far too easily assumed that no importance is to be attached to the mere fact of their being invariably called Christ’s brethren; whereas this consideration alone goes far to prove that they really were so.

There are, however, three traditions respecting them. They are first mentioned (Matt. xiii. 56) in a manner which would certainly lead an uninfluenced mind to conclude that they were our Lord’s utsedrine brethren. "Is not this the carpenter’s son? is not his mother called Mary? and his brethren James, and Joseph, and Judas, and Simon? and his sisters, are they not all with us?" But since we find that there was a "Mary, the mother of James and Joses" (Matt. xvii. 56), and that a "James and Judas (?)" were sons of Alphaeus (Luke xvi. 16), the most general tradition is — 1. That they were all our Lord’s first cousins, the sons of Alpheus (or Cleopas — not Cleopas, see Alford, Gr. Test. Matt. x. 3) and Mary, the sister of the Virgin. This tradition is accepted by Papias, Jerome (Cist. Script. Ecc. 2), Augustine, and the Latin Church generally, and is now the one most generally received. Yet there seem to be overwhelming arguments against it: for (1.) The reasoning entirely depends on three very doubtful assumptions, namely, "That his mother’s sister" (John xix. 25) must be in apposition with "Mary, the wife of Cleophas," which would be improbable, if only on the ground that it supposes two sisters to have had the same name, a supposition substantiated by no parallel cases [Wieseler (comp. Mark xv. 40) thinks that Salome, the wife of Zebedee, is intended by "his mother’s sister"]. (6.) That Mary, the mother of James, was the wife of Cleophas, i. e. that the James intended is Ιακώβος ὁ Ἀλπθαέους. (c.) That Cleophas, or more correctly Cleopas, whose wife Mary was, is identical with Alpheas; which may be the case, although it cannot be proved. (2.) If his cousins were meant, it would be signally untrue that "neither did his brethren believe on him" (John vii. 5 ff.), for in all probability three out of the four (namely, James the Less, Matthew (or Levi), and Jude, the brother (?) of James) were actual Apostles. We do not see how this can be removed. (3.) It is quite unaccountable that these "brethren of the Lord," if they were only his cousins, should be always mentioned in conjunction with the Virgin Mary, and never with their own mother Mary, who was both alive and in constant attendance on our Lord. (4.) They are generally spoken of as distinct from the Apostles; see Acts i. 14: I Cor. ix. 5; and Jude (17) seems to clearly indicate that he himself was not an Apostle. It seems to us that these four objections are quite adequate to set aside the very slight grounds for identifying the "brethren of the Lord" with the "sons of Alpheas."

II. A second tradition accepted by Hilary, Epiphanius, and the Greek fathers generally, makes them the sons of Joseph by a former marriage with a certain Escha or Salome of the tribe of Judah; indeed Epiphanius (Heracl. xxix. § 4) even mentions the supposed order of birth of the four sons and two daughters. But Jerome (Com. in Matt. xii. 49)

century. Prof. Lightfoot (on Galat. p. 259) has pointed out this slip of the writer.
BROTHER

sights this as a mere conjecture, borrowed from the "delirantium Apocryphorum," and Urigen says that it was taken from the Gospels of St. Peter. The only shadow of ground for its possibility is the apparent difference of age between Joseph and the Virgin.

The attempt to have been the offspring of a levirate marriage between Joseph and the wife of his deceased brother Cephas. But apart from all evidence, it is obviously idle to examine so arbitrary an assumption.

The argument against their being the sons of the Virgin after the birth of our Lord, are founded on—(1.) The almost constant tradition of the Mary, &c. (2.) The fact that the cross Christ renewed to his mother to the care of St. John; but this is easily explicable on the ground of his brethren's apparent disbelief in Him at that time. On the other hand, the arguments against their being our Lord's uterine brothers are numerous, and, taken collectively, to an unprejudiced mind almost irresistible, although singly they are open to objections: e.g., (1.) The word ἄνθρωπος, Luke ii. 7. (2) Matt. i. 25, ὁ δὲ Ἰησοῦς ἵνα εἴρηση ἀνθρώπων ἐπειδὴ ἵνα ἀποκριθῇ, εἰς τὸν γὰρ κόσμον, κ. τ. λ., to which Alford justly remarks, only one meaning could have been attached but for press-prominent theories about the ἄνθρωπος. (3.) The general tone of the gospels on the subject, since they are constantly spoken of with the Virgin Mary, and with no shadow of a likelihood that they were not her own children (Matt. xii. 46: Mark iii. 31, &c.). It can, we think, hardly be denied that any one of these arguments is singly stronger than those produced on the other side.

To sum up then, we have seen (1.) that "the brethren of the Lord" could hardly have been identical with the sons of Alpheus, and (11.) that we have no grounds for supposing them to have been the sons of Joseph as a previous or (111.) a levirate marriage; that the arguments in favor of their being actual brothers of our Lord are cogent, and that the tradition on the other side is not sufficiently weighty or manifest to set them aside. Finally, this tradition of the perpetual virginity of the mother of our Lord (which any one may hold, if he will, as one of the πράξεις ἐρείπων," Jer. Taylor, of St. [H. 3, 6] is easily accounted for by the general error on the inferiority of the wedded to the virgin state: Scripture in no way requires us to believe it, and since Mary's previous virginity is above requisite to the Gospel narrative, we must regard it as a question of mere curiosity. [James; ores; Judas]. [Pearson, On the Creed, Art. 111. and note: Rümker and Alford on Matt. xxii. 56; Lightfoot, Hor. Hær., Matt. v. 22; &c. &c.].

BUKKI

* On this question of "the brethren of the Lord," Dr. Lange maintains the consanguinity, but with a peculiar modification. He derives the consanguinity from not the mothers (the two Marys being sisters), but from the fathers (Cephas or Alpheus and Joseph being brothers). See his Bibelkreis, i. 201, and Dr. Schaff's Translntion, p. 255. Professor Lightfoot thinks the words on the cross, "Woman, behold thy son," said of John the Evangelist, are decisive, as showing that the mother of Jesus had no son, if Joseph had none. If so, according to his view the brethren must have been sons of Joseph by a former marriage (St. Paul's Ep. to the Galat., pp. 241-275). Of these two explanations (the consanguinity being regarded as out of the question) Dr. Schaff (on Lange, pp. 256-260, where he has a full note) prefers the latter, partly as agreeing better with the apparent age of Joseph, the husband of Mary (who disappears early from the history), and partly as making the age of the brothers such as to times to have exercised a sort of eldership over Jesus (comp. Mark iii. 21 and John vii. 3 ff.). Undoubtedly the view adopted in the foregoing article, that Jesus had brothers who were the sons of Mary, is the one which an unfeigned credence requires; and, as to the fact of the Saviour's commission the mother in his last moments to the care of John, which this view is said to make irreconcilable with the "claims of filial piety," if Mary had sons of her own, it is not so easy in point of principle to make out the material difference (affirmed by those who suppose a previous marriage of Joseph) between such claims of his own sons and those of step-sons. "The perpetual virginity of Mary," says the late Prof. Edwards, "is inferred from half a verse (Matt. i. 25), which by natural implication teaches the direct contrary." This question is brought up again under James.

BUKASTIS. [Phœbusa.]

BUCKLER. [Arms, 11, 5; Shield.]

BUKKI (Nici [contracted for Μενείς; see infr.; Boetz: [Alex.] Boesca: [Vat. Baei: Boesca: Boesci.]

1. Son of Abishua and father of Uzi, fifth from Aaron in the line of the high-priests in 1 Chr. v. 31, vi. 36 (v. 5, 31, A. V.), and in the genealogy of Ezra, Ezr. vii. 4, and 1 Esdr. viii. 2, where he is called Boesca. Boescia, which is corrupted to Bussia, 2 Esdr. I, 2. Whether Bukki ever filled the office of high-priest, we are not informed in Scripture. Epiphanius in his list of the ancestors of Jehoiada, whom he fancifully supposes to be brother of Elijah the Tishbite, omits both Bukki and Abishua (Ibevers, Melchizedec, iii.). Josephus (Ant. vili. 1, § 3) expressly says that all of Aaron's line between Joseph (Abishua) the high-priest and Zadok who was made high-priest in the reign of David, were private persons (οἰκονοματερές) i.e. not high priests, and mentions by name "Bukki the son of Joseph the high-priest," as the first of those who lived a private life, while the pontifical dignity was in the house of Ithamar. But in v. 11, § 5, Josephus says as expressly that Abishua (then called Abizerai) having received the high-priesthood
from his father Phinehas, transmitted it to his own son Bukki, who was succeeded by Uzzi, after whom it passed to Eli. We may conclude therefore that Josephus had no more means of knowing for certain who were high-priests between Phinehas and Eli, than we have, and may adopt the opinion, which is far the most probable, that there was no high-priest between them, unless perhaps Abishua. For an account of the absurd fancies of the Jews, and the statements of Christian writers relative to the succession of the high-priests at this period, see Selden, de Success., in Pontif. Hebr.; also Geneology, of our Lord, ch. x. A. C. 9.

2. (Bac)ip (Vat. -chrip); Alex. Boer: Bocch. Son of Jophi, 1st prince (Niled) of the tribe of Dan, one of the ten men chosen to apportion the land of Canaan between the tribes (Num. xxxii. 22).

BUKKIAH (Niled) [wasting from Jehovah], Bukkijahu: Boccia: Boccus (Vat.-ker); Alex. Boccus. [Koskar] Boccus, a Kothrite Levite, of the sons of Heman, one of the musicians in the Temple, the leader of the sixth band or course in the service (1 Chr. xxv. 4, 13).

BUL. [MONTHS.]

BULL, BULLOCK, terms used synonymously with ox, oxen, in the A. V. as the representatives of several Hebrew words. [See Ox.] Twice in the N. T. as the rendering of 'tayyemos, Heb. ix. 13, x. 4.

The *tayyemos* is properly a generic name for horned cattle when of full age and fit for the plough. According to it is variously rendered bullock (Is. lxv. 25), cow (Ex. iv. 15), oxen (Gen. xii. 6). Hence in Dent. xxi. 3, 'tayyemos, is a heifer; Ex. xxix. 1, 'tayyemos, a young bullock; and in Gen. xviii. 7, simply 'tayyemos, rendered a calf in A. V. It is derived from an unused root, 'tayyemos, to cleave, hence plough, as in Latin armamentum is aorummentum.

The *tayyemos* differs from 'tayyemos in the same way as 'tayyemos is a sheep, from 'tayyemos, a flock of sheep. It is a generic name, but almost always signifies one head of horned cattle, without distinction of age or sex. It is very seldom used collectively. The Chaldee form of the word, *tayyemos*, occurs in Ezr. vi. 9, 17; Dan. iv. 25, &c.; and Plutarch (Sull. c. 17) says 'tayyemos, of Philaces, Sylus bin coalescentis. It is probably the same word as *tayyemos, tauros, Germ. stier, Eng. steer. The root *tayyemos* is not used, but the Arab. *tayyemos, excita'tur pulverem*, is a very natural derivation of the word.

*Burial*, a calf, male or female, properly of the first year, derived, as Gesenius thinks, from an Egyptian word signifying fetus, embryo, pellis, catalus, while others derive it from *tayyemos, zeli, rotaci, feticorni*. The word is used of a trained heifer (Hos. x. 11), of one giving milk (Is. xii. 21, 22), of one used in ploughing (Judg. xiv. 3), and of one three years old (Gen. xv. 9).

most synonymous with *tayyemos*, the latter signifying generally a young bull of two years old, though in one instance (Judg. vi. 25) possibly a bull of seven years old. It is the customary term for bulls offered in sacrifice, and hence is used metaphorically in Hos. xiv. 2, "so will we render," as bullocks,' our lips." There are four or five passages in which the word *tayyemos* is used for bulls. It is the plural of *tayyemos*, strong, whose use is. See Ps. xxii. 12, 13, xlviii 30; Is. xxxiv. 7; Jer. 1. 11.

All the above words refer to domesticated cattle, which formed of old, as now, an important part of the wealth of the people of Palestine. In Is. li. 20 the word *tayyemos occurs, and is rendered "wild bull," but "wild ox" in Dent. xiv. 5. The LXX. have *avrov* in the former passage and *vym* in the latter. It was possibly one of the larger species of antelope, and took its name from its swiftness — the Arabic *tayyemos* being cura6 ancentevit. The Antelope Oryx of Linnæus is indigenous in Syria, Arabia, and Persia. Dr. Robinson mentions large herds of black and almost hairless buffaloes still existing in Palestine, and these may be the animal indicated (H. 390).

W. D.

BURLUSH, used synonymously with Rush in the A. V. as the rendering of the words *tayyemos* and *tayyemos*. In Is. ix. 14, xix. 15, we have the proverbial expression *tayyemos* *tayyemos*, A. V. "thrice and rush," equivalent to high and low alike (the LXX. have *vpyai kal mupeia* in one passage, *vpyai kal t8nos* in the other), and in Is. lviii. 5, *tayyemos* is rendered burrush.

W. D.

* The remainder of this article in the English edition is entirely superseded by the art. Reed, which see.

A.

BURLUSHES, ARK OP. [Moses.]

BU'NAH (Niled, [accentuation]: Bara'ah: [Vat. Bara'h; Abb. Bara'id]: Baun), a son of Jerahmeel, of the family of Pharez in Judah (1 Chr. ii. 25).

BUN'NI. (Niled, [accentuation]: Bumi), one of the Levites in the time of Nehemiah (Neh. ix. 4); possibly the same person is mentioned in x. 15. The LXX. in both cases translate the name by *vdiös.*

2. [F.A.3 Boevar: Comp. Bura'ah: Bumi.] Another Levite, but of earlier date than the preceding (Neh xi. 15). The name, *tayyemos*, is also slightly different LXX. [in most MSS.] omits. Bumni is said to have been the Jewish name of Nicodemus (Lightfoot on John iii. 1; Ewald, v. 233).

* Burden. The Hebrew *tayyemos*, rendered "burden" in the A. V., denotes both a burden, and an oracle or prophecy. This double sense of the word is referred to in Jer. xxiii. 33 ff. See Noyes's note on the passage (Trans. of the Hebrew Prophecies, 3d ed., 1806, ii. 340).

A.

BURIAL, SEPULCHRES, TOMBS. The Jews uniformly disposed of the corpse by entombment wherever possible, and falling that, by inhumation; extending this respect to the remains even of the
slain enemy and malefactor (1 K. xi. 15; Deut. xxvi. 26), in the latter case by express provision of law. In such cases the body was so guarded by Mosaic precept, it may be concluded that natural feeling was relied on as rendering any such general injunction superfluous. Similarly, to disturb remains was regarded as a barbarity, only justifiable in the case of those who had themselves outraged religion (2 K. xiii. 16, 17; Jer. viii. 1, 2). The Rabbin quote the doctrine "dust thou art, and unto dust shalt thou return," as a reason for preferring to enthrone inter their dead; but that precessional point is other than the Mosaic record, as traversed in patriarchal examples, and continued unaltered by any tenebrous influence; so Tertullian (Hist. v. 5) notices that it was a point of Jewish custom, corpora con- ducere quum cremerent.

On this subject we have to notice: (1) the place of burial, its site and shape; (2) the mode of burial; (3) the prevalent notions regarding this duty; and (4) the rapidity with which burial took place after death.

1. A natural cave enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. This was what the structure of the Jewish soil supplied or suggested. A distinct and simple form of sepulchre as contrasted with the complex and elaborated rites of Egypt clings to the region of Palestine and varies but little with the great social changes between the periods of Abraham and the Captivity. Jacob and Joseph, who both died in Egypt, are the only known instances of the Egyptian method applied to patriarchal remains. Sepulchres, when the owner's means permitted it, were commonly prepared beforehand, and stood often in gardens, by road-sides, or even adjoining houses. Kings and prophets alone were probably buried within houses (1 K. ii. 10, xvi. 8, 25; 2 K. x. 30, xiii. 9; 2 Chr. xvi. 11, xviii. 27; 1 Sam. xxi. 1, xxiii. 3). Sarah's tomb and Rachel's seem to have been chosen merely from the accident of the place of death; but the successive interments at the former (Gen. xvi. 31) are a chronicle of the strong family feeling among the Jews. It was the sole fixed spot in the unsettled patriarchal life; and its purchase and transfer, minutely detailed, are remarkable as the sole transaction of the kind, until repeated on a similar scale at Shechem. Thus it was deemed a misfortune or an indignity, not only to be deprived of burial (Is. xiv. 29; Jer. passim; 2 K. ix. 10), but, in a lesser degree, to be excluded from the family sepulchre (1 K. xii. 22). As were buzz, the royal lie, and Malchus (2 Chr. xvi. 23, xxvii. 21). Thus the remains of Saul and his sons were carried to rest in his father's tomb. Similarly it was a mark of a profound feeling towards a person not of the family to wish to be buried with him (Ruth ii. 17; 1 K. xii. 31), or to give him a place in one's own sepulchre (Gen. xxii. 6; comp. 2 Chr. xxvi. 16). The head of a family commonly provided space for more than one generation; and these galleries of kindred sepulchres are common in many eastern branches of the human race. Cities soon became popular and demanded cemeteries (comp. the term ἐκκατολοχία, Ez. xxvii. 15), which were treated with similar care; such was one seems intended by the expression in 2 K. xxvi. 6, "the graves of the children of the people," situated in the valley of the Kidron or of Jehoshaphat. Jeremiah (vii. 32; xix. 11) threatens that the eastern valley called Tophet, the favorite haunt of idolatry, should be polluted by burying there (comp. 2 K. xxivii. 16). Such was also the "Potter's Field" (Matt. xxvi. 5), which had perhaps been appointed by digging for clay into holes serviceable for graves.

The Mishnaic description of a sepulchre, complete according to Rabbinical notions, is somewhat as follows: a cavern about 6 cubits square, or 6 by 8, from three sides of which are recessed longitudinally several vaults, called מיקתון, each large enough for a corpse. On the fourth side the cavern is approached through a small open uncovered court, or portico, מיקתון, of a size to receive the bier and bearers. In some such structures the demoniac may have housed. The entry from this court to that cavern was closed by a large stone called מיקתון, as capable of being rolled, thus confirming the Evangelistic narrative. Sometimes several such caverns, each with its recesses, were entered from the several sides of the same portico. (Mishna, Bava Batra, 6, 8, quoted by J. N. D. de Steinkirch, Handbook of Jewish Antiquities [vol. iii. cxi.].) Such a tomb is that described in Buckingham's Travels in Arabia (p. 158), and those known to tradition as the "tombs of the kings" (see below). But earlier sepulchres were doubtless more simple, and, to judge from 2 K. xviii. 21, did not prevent mutual contact of remains. Sepulchres were marked sometimes by pillars, as in the case of that of Rachel by pyramids, as those of the Asmonean at Madin (Joseph. Ant. xiii. 6, 7); and had places of higher and lower honor. Like temples, they were, from their assumed inviolability, sometimes made the depositories of treasures (1 Mace. ii. 183). We find them also distinguished by a "title" (2 K. xxvii. 17). Such as were not otherwise noticeable were scrupulously "whited" (Matt. xxiii. 27) once a year, after the rains before the passerover, to warn passers by of defilement (Hot- tinger, Gips Hebr. [U. Gennili, xxxvi. p. 1034]; Rosenthel's Sepulcr. Cult. notat. U. Gennili, xxxvi.).

2. With regard to the mode of burial, we should remember that our impressions, as derived from the 0. T., are those of the burial of persons of rank or public eminence, whilst those gathered from the N. T. regard a private station. But in both cases the manner of the Jews included the use of spires, where they could command the means. Thus Asa lay in "a bed of spices" (2 Chr. xvii. 14). A portion of these were burnt in honor of the deceased, and to this use was probably destined part of the 100 pounds weight of "myrrh and aloes" in our Lord's case. On high state occasions the vessels, bed, and furniture used by the deceased were burnt also. Such was probably the "great burning" made for Asa. If a king was unproporional or died disgracefully (e. g. Jehoram, 2 Chr. xxvi. 13; Joseph. Ant. i. 5, § 3), this was not observed. In no case, save that of Saul and his sons, were the bodies burnt, nor in that case were they so burnt as not to have the "bones," easily concealed and transported, and the whole proceeding looks like a hastily prevention against hostile violence. Even then the bones were interred, and re-exhumed for solemn entombment. The ambiguous word in Am. vi. 10, יִכְרְעֵה, rendered in the A. V. "that burneth him," probably means "the burner of per- formances in his honor," i. e. his near relation, on whom such duties devolved; not, as Winer (s. v. יגרע) and others think, "the burner of the
For a great mortality never causes men to burn corpses where it is not the custom of the country; nor did the custom vary among the Jews on such an occasion (Ex. xxxix. 12-14). It was the office of the next of kin to perform and preside over the whole funeral office; but a company of public buriers, originating in an exceptional necessity (Ex. l. c.), had become, it seems, customary in the times of the N. T. (Acts v. 6, 10). The closing of the eyes, kissing, and washing the corpse (tem. xlvi. 4, l. l.; Acts ix. 37), are customs common to all nations. Coffins were but seldom used, and if used were open; but fixed stone sarcophagi were probably in common in tombs of rank. The hier, the word for which in the O. T. is the same as that rendered bed (see Ben), was borne by the nearest relatives, and followed by any who wished to do honor to the dead. The grave-clothes (στίχων, ἐνταφία) were probably of the fashion worn in life, but swathed and fastened with bandages, and the head covered separately. Previously to being done, spices were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark, that the woman had anointed his body, πρὸς τὸ ἐνταφίαν, "with a view to dressing it in these entaphia;" not, as in A. V., "for the burial." For the custom of mourners visiting the sepulchre, see Mourning; for that of frequenting tombs for other purposes, see Necromancy.

3. The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Following a similar notion, some of the Rabbins taught that only in that land could those who were buried obtain a share in the resurrection which was to usher in Messiah's reign on earth. Thus that land was called by them, "the land of the living;" and the sepulchre itself, "the house of the living." Some even feigned that the bodies of the righteous, wherever else buried, rolled back to Canaan under ground and found there only their appointed rest (J. Nicolas, de Sepulchre, Heb. [lib. iii. c.] xii. 1). Tombs were, in popular belief, led by the same teaching, invested with traditions. Thus Machpelah is stated (Lightsfoot, Centuria Chronographica, s. v. Hebron) to have been the burial-place not only of Abraham and Sarah, but also of Adam and Eve; and there was probably at the time of the N. T. a spot fixed upon by tradition as the site of the tomb of every prophet of note in the O. T. To repair and adorn these was deemed a work of exalted piety (Matt. xxviii. 21). The scruples of the Scribes extended even to the burial of the ass whose neck was broken (Ex. xxxix. 20), and of the first-born of cattle. (R. Maimon, de Primogen. ch. ill. § 4, quoted by J. Nicolas, de Sepulchre, Heb. [lib. iii. c.] xvi. 1, 3, 4).

The neighborhood of Jerusalem is thickly studded with tombs, many of them of great antiquity. A succinct but valuable account of them is given in Porter's Handbook (p. 143 ff.); but it is only necessary in this article to refer to two or three of the most celebrated. The so-called "Tomb of the Prophets" will be best explained by the preceding plan, taken from Porter (p. 147), and of which he gives the following description:—

"Through a long descending gallery, the first part of which is winding, we enter a circular chamber about 24 ft. in diameter and 10 ft. high, having a hole in its roof. From this chamber two parallel galleries, 10 ft. high and 3 wide, are carried southwards through the rock for about 60 ft.; a third diverges S. E., extending 40 ft. They are connected by two cross-galleries in concentric curves, one at their extreme end, the other in the middle. The outer one is 115 ft. long and has a range of thirty niches on the level of its floor, radiating outwards. Two small chambers, with similar niches, also open into it."

The celebrated "Tomb of the Kings" have received this name on account of their remarkable chastring; but they are supposed by Robinson and Porter to be the tomb of Helena, the widowed queen of Monobazus king of Adiabene. She became a proselyte to Judaism, and fixed her resi-
BIRIAL

The door during the famine predicted by Azariah in the days of Claudius Caesar (Acts xi. 28), and built for herself a tomb, as we learn from Josephus. (On Helena and her tomb see Joseph. Ant. xx. 2, § 1 ff., 4, § 3; B. J. v. 2, § 2, 4, § 2; Pans. viii. 16, § 5; Robinson, i. 361 ff.) Into the question of the origin of these tombs it is, however, unnecessary to enter; but their structure claims our attention. They are excavated out of the rock. The traveler passes through a low arched doorway into a court 92 ft. long by 87 wide. On the western side is a vestibule or porch 39 feet wide. The open front was supported by two columns in the middle. Along the front extend a deep frieze and cornice the former richly ornamented. At the southern side of the vestibule is the entrance to the tomb. The first room is a mere antechamber 18 ft. by 19. On the S. side are two doors leading to other chambers, and on the W. one. These three chambers have recesses, running into the walls at right angles, and intended for bodies. (For further par-

iculars see Porter, from whose Handbook the preceding account is taken.)

The so-called "Tomb of Zechariah," said to have been constructed in honor of Zechariah, who was slain "between the temple and the altar" in the reign of Jehoiakim (2 Chr. xxiv. 21; Matt. xxiii. 35), is held in great veneration by the Jews. It is doubtful, however, whether it be a tomb at all, and the style of architecture can scarcely be earlier than the 1st century B.C. (Num. xix. 11 ff.). We have a striking instance of this usage in the account of Ananias and Sapphira, who were beheaded to the grave as soon as the bodies could be laid out and shrouded for that purpose (Acts v. 1 ff.). The deaths in this case were extraordinary, and possibly that fact may have hastened the burial somewhat; though even under ordinary circumstances a person among the Jews was commonly buried the same day on which he died. See Winer's Reallex. ii. 16. Even among the present inhabitants of Jerusalem, says Töbler (Denkblätter aus Jerusalem, p. 325, St. Gallen, 1853), burial, as a general rule, is not deferred more than three or four days after death.

The so-called "Tomb of Zechariah." (From Photograph.)
BURNING

four hours. If the death occurs at evening, so that there is no time for the funeral on the same day, it takes place the next morning at the earliest break of dawn. The body is placed on a bier, and the mourners, men and women, the whole relatives and neighbors, follow it to the grave (comp. Luke vii. 12-15). See Deuklatten, p. 325. When the body was emblazoned, as among the Egyptians, the same reason for a speedy burial did not exist. Hence Joseph, after the 40 days spent in the process of emblazoning the body of Jacob his father, waited 30 (or 70) days longer, before he proceeded to Canaan to deposit the remains in the cave near Machpelah (Gen. xvi. 1-4). De Wette refers to Gen. xxxii. 4-9 and xxv. 9, as showing that the ancient Hebrews did not hasten burial, like the later Hebrews (Lehrb. der hebräisch-jud. Archäologie, p. 409, 4te Aufl.); but the passages hardly warrant that conclusion. Abraham's plea, "Let me bury my dead out of my sight," indicates at least impatience of any needless delay.

II. BURNING. See Burial, 2; Punishments, III. (a. 3).

BURNT-OFFERING (אֵשׁ or אֲשֵׁ), and in poetical passages אֵשׁ אֲשֵׁ, i.e., "perfect"; άλυκάρφος (Gen.), δακτυλία (Ex. and Lev., LXX., Δακτυλία, N. T.; holocaust, Vulg.). The original derivation of the word אֵשׁ is from the root אֶשׁ, "ascends," and it is applied to the offering, which was wholly consumed by fire on the altar, and the whole of which, except the refuse ashes, "ascended" in the smoke to God. It corresponds therefore in sense, though not exactly in form, to the word דאכטוליא, "a burnt-offering," from which the name of the sacrifice in modern languages is taken. Every sacrifice was in part "a burnt-offering," because, since fire was the chosen manifestation of God's presence, the portion of each sacrifice especially dedicated to Him was consumed by fire. But the term is generally restricted to that which is properly a "whole" burnt-offering," the whole of which was so offered and so consumed.

The burnt-offering is first named in Gen. vii. 20, as offered after the Flood. (In iv 4 we find the more general word אֵשׁ אֲשֵׁ, "offering," a word usually applied to unbloody sacrifices, though in the LXX. and in Heb. xi. 4 translated by θυσία.) Throughout the whole of the book of Genesis (see xv. 9, 17, xxii. 2, 7, 8, 13) it appears to be the only sacrifice referred to; afterwards it became distinguished as one of the regular classes of sacrifice under the Mosaic law.

Now all sacrifices are divided (see Heb. v. 1) into "gifts" and "sacrifices of duty" (i.e., eucharistic and propitiatory sacrifices), and of the former of these the burnt-offering was the choicest specimen. Accordingly (in Ps. xi. 8, 9, quoted in Heb. x. 5, 6) we have first (in ver. 8) the general opposition, as above, of sacrifices (θυσίαι) (propitiatory), and offerings (πρασσαρία), and then (in ver. 9) "burnt-offering," as representing the one, is opposed to "sin-offering," as representing the other. Similarly in Ex. x. 23 (less precisely) "burnt-offering" is contrasted with "sacrifice." (So in 1 Sam. xv. 22; Ps. i. 1, 5, Mark xx. 31.) With the other hand, it is distinguished from "meat-offerings" (which were unbloody), and from "peace-offerings" (both of the eucharistic kind), because only a portion of them were consumed. (See 1 K. iii. 15, viii. 64, &c.)

The meaning, therefore, of the whole burnt-offering was that which is the original idea of all sacrifice, the offering by the sacrifice of himself, the body of the Lord, of God, the submission of his will to the Will of the Lord. See Ps. xi. 8, 17, 19, and compare the more general treatment of the subject under the word SACRIFICE. It typified (see Heb. v. 1, 3, 7, 8) our Lord's offering (especially in the temptation and the agony), the perfect sacrifice of his own human will to the Will of his Father. As that offering could only be accepted from one either sincere or already purified from sin, therefore the burnt-offering (see Ex. xxix. 26, 57; Lev. viii. 14, 18, ix. 8, 12, xi. 5, &c.) was always preceded by a sin-offering. So also we Christians, because the sin-offering has been made once for all for us, offer the continual burnt-offering of ourselves, "as a living sacrifice, holy and acceptable to the Lord." (See Rom. xii. 1.)

In accordance with this principle it was enacted that with the burnt-offering a "meat-offering" (of flour and oil) and "drink-offering" of wine should be offered, as well as the burnt-offering itself, which was dedicated also to God the chief earthly gifts with which He had blessed them. (Lev. viii. 18, 22, 26, ix. 16, 17, xiv. 29; Ex. xxix. 40; Num. xxviii. 4, 5.)

The ceremonial of the burnt-offering is given in detail in the book of Leviticus. The animal was to be a male unblemished, either a young bullock, ram, or goat, or, in case of poverty, a turtle dove or pigeon. It was to be brought by the offering "of his own voluntary will," and slain by himself, after he had laid his hand upon its head, to make it his own representative, on the north side of the altar. The priest was then to sprinkle the blood upon the altar, and afterwards to cut up and burn the whole victim, only reserving the skin for himself. The birds were to be offered similarly, but not divided. (See Lev. i. vii. 8, viii. 18-21, &c.) It will be observed how all these ceremonies were typical of the meaning described above, and especially how emphatically the freedom of will in the sacrificer is marked.

The burnt-offering being thus the rite which represented the normal state and constant duty of man, when already in covenant with God, was the one kind of sacrifice regularly appointed. Thus there were, as public burnt-offerings —

1st. The daily burnt-offering, a lamb of the first year, sacrificed every morning and evening (with an offering of flour and wine) for the people (Ex. xxix. 38-42; Num. xxviii. 3-8).

* The 70 days of mourning (Gen. i. 3) probably include the 40 days of the embalming (Tuch, Genesis, 3), though some make the former additions to the latter. II.

* It is clear that in this ceremony the burnt-offering touched closely on the propitiatory or sin-offering, although the solemnity of the blood-sprinkling in the water was much greater, and had a peculiar significant.
BUSH

Bully. The Sabbath burnt-offering, double of that which was offered every day (Num. xxviii. 9, 10).

Bully. The offering of the new moon, at the three great festivals, the great Day of Atonement, and Feast of trumpets: generally two hulbeks, a ram, and seven lambs. (See Num. xxviii. 11-xxix. 28.)

Private burnt-offerings were appointed at the consecration of priests (Ex. xx. 15; Lev. viii. 19, ix. 12), at the purification of women (Lev. xii. 6, 8), at the cleansing of the lepers (Lev. xiv. 19), and removal of other ceremonial uncleanness (xxv. 15, 30), on any accidental breach of the Nazarite vow, or at its conclusion (Num. vi.; comp. Acts xxi. 28), &c.

But freewill burnt-offerings were offered and accepted by God on any solemn occasions, as, for example, at the dedication of the tabernacle (Num. vii.) and of the temple (1 K. viii. 64), when they were offered in extraordinary abundance. But, except on such occasions, the nature, the extent, and the place of the sacrifice were expressly limited by God, so that, while all should be unhumbled and pure, there should be no idea (as among the heathen) of buying his favor by ostentation of sacrifice. Of this law Jehovah's vow was a transgression, consistent with the semi-heathenish character of his early days (see Judg. xi. 30, 35). The sacrifice of cows in 1 Sam. vi. 14 was also a formal instruction of it, excused by the probable ignorance of the people, and the special nature of the occasion. A. H.

BUSH (ךורש, a, swrk: בּרֹאשׁ: rahab). The Hebrew word occurs only in those passages which refer to Jehovah's appearance to Moses in the flame of fire in the bush" (Ex. iii. 2, 3, 4; Pent. xxviii. 16). The Greek word is βάρας both in the LXX. and in the N. T. (Luke xx. 37; Acts vii. 45; see also Luke vi. 44, where it is correctly rendered a "bramble bush." by the A. V.). Baras is used also to denote the swrk by Josephus, Philo, Clemens, Eusebius, and others (see Celsius, Herod. ii. 58). Some versions adopt a more general interpretation and understand any kind of bush, as the A. V. The Arabic in Acts vii. 35 has chammas. Others retain the Hebrew word.

Celsius (Herod. ii. 58) has argued in favor of the opinion of Josephus, i.e. Raphia on the Dead Sea, the bramble or blackberry bush, representing the swrk and tracing the etymology of ( Mt.) " Sinai" to this name. It is almost certain that swrk is definitely used for some particular bush, for the Hebrew swrk expresses bushes generally; the βάρας and ραβαν of the LXX. and Vulg., are used by Greek and Roman writers to denote for the most part the different kinds of brambles (Rubus), such as the raspberry and the blackberry bush; Celsius's opinion, therefore, is corroborated by the evidence of the oldest versions. Puseke (Discover of the Lost, i. 217), however, objects to the bramble as not growing at all in the neighborhood of Mount Sinai, and proposes the hawthorn bush, Pyracantha Arabica (Shaw) as etymologically one would be inclined to refer the swrk of the Hebrew scriptures to some species of semi plant (ros), though we have no direct evidence of any cossia growing in the localities about Mount Sinai, neither Decaisne nor Bove mentioning a semina bush amongst the plants of this mountain. Sprague identifies the swrk with what he terms the Rubus sumatrensis, and says it grows abundantly near Sinai. The monks of St. Catherine, it is well known, have planted a bramble bush near their chapel, to mark the spot and perpetuate the name of the supposed bush in which God appeared to Moses. It is quite impossible to say what kind of thornbush is intended by swrk, but Sinai is almost beyond the range of the genus Rubus.

W. H.

*The word "bush" (בּרֹאשׁ, as in Mark xii. 20) denotes a section of the Pentateuch. See Bible, H. (I)."

BUSHEL. [Measures.]

* Butler. [Cupbearer: Joseph.]

BUTTER (בּוּטָר, chon'ith: בּוּטָרָה: butyrum), enuiled milk, as distinguished from מים, fresh milk; hence, curds, butter, and in one place probably cheese. It comes from an unused root, נָטַתָּה = Arab. לַחֶם, qammat fuit lac. In Gen. xvii. 8, butter and milk are mentioned among the things which Abraham set before his heavenly guests (comp. Judg. x. 25; 2 Sam. vii. 20). Milk is generally offered to travellers in Palestine in a enuiled or sour state, "liden," thick, almost like butter (comp. Josephus's rendering in Judg. iv. 19; — γάλα μέκριωτάτα ἤγοι). In Deut. xxiii. 14, we find מים, מים, מים among the blessings which Jehovah had enjoyed, where milk of kine would seem contrasted with milk of sheep. The two passages in Job (xx. 17, xxx. 6) where the word מים occurs are also best satisfied by rendering it milk; and the same may be said of Ps. lv. 21, which should be compared with Job xxi. 6.

In Prov. xxx. 33, tseanim thinks that cheese is meant, the word יִנַּת significating pressure rather than churning. Jarchi (on Gen. xviii. 8) explains נָטַתָה to be קָנַה לֶחֶם, quem de ejus super, reige colligant, i.e. cream, and Vitrings and Hitzig give this meaning to the word in Is. vii. 15-22. Butter was not in use among the Greeks and Romans except for medicinal purposes, but this fact is of no weight as to its absence from Palestine. Robinson mentions the use of butter at the present day (Bib. Rts. i. 440), and also the method of churning (i. 485, and ii. 415), and from this we may safely infer that the art of butter-making was known to the ancient inhabitants of the land, so little have the habits of the people of Palestine been modified in the lapse of centuries. Burchhardt (Travels in Arabia, i. 52) mentions the different uses of butter by the Arabs of the Hedjaz. W. D.

* The Arabs of the present day do not make any kind of butter, such as we eat with bread, but the

Hocker thinks he must mean the Crataegus Aroma which grows on Mount Sinai.

c Compare the Arabic לַחֶם, "semen, seu folia venen."

d Ronn Freytag, Aronia, c. v.,

e "This," says Dr. Hooker, "is a variety of the bramble, Rubus fruticosus."
BUZ (5
\[\text{Beth}\] ; contemp.: Būzā; [Buz]), the second son of Mekah and Nahor (Gen. xxii. 21).

The gentilic name is "Bethli" and El conclusion is "the Buzite" (Bouqetn) of the kindred of Ram, i.e., Aram. El-Buz was probably a descendant of Buz, whose family seems to have settled in Arabia Deserta or Petraea, since Jeremiah (xxv. 23, 24), in denouncing God's judgments against them, mentions them with Tema and Dedan. Some connect the territory of Buz with Buzan, a Roman fort mentioned in Amm. Marc. xviii. 10, and others with Basta in Arabia Petraea, which however has only the first letter in common with it (Winor, s. c.).

The jingle of the names Buz and Buz is by no means so apparent in the Hebrew (הָבְעֵז הָבֵּז), but it is quite in the Oriental taste to give to relatives these rhyming appellatives: comp. Ishmael and Ishkai (Gen. xlii. 17); Mehujael and Meshusah (Gen. iv. 18), Uzziel and Uzzi (1 Chr. vii. 7): and among the Arabians, Haroot and Maroot, the rebel angels, Hasan and Hoseyn, the sons of "Ale, &c. The Koran abounds in such homophonic names and so pleasing are they to the Arabs, that they even call Cain and Abel, Kabil and Habel (Weill's Biblical Legends, 22); also Southey's Notes to Tholus, or Habel and Habiid (see Stanley, p. 413). The same idiom is found in Mahramta and the modern languages of the East.

2. (Beth; Ax. Αξεθων; [Vat. Ζατομωτιχαμα for Βοις Αδελφων; Buz]) A name occurring in the genealogies of the tribe of Gad (1 Chr. v. 14).

F. W. F.

BUZI (נָוֶז no article: Βουζί; Buzi), father of Ezekiel, the prophet (Ez. i. 3). [The personal name here is gentilic elsewhere. As the son a priest the father must have been so too. — H.]

BUZITE (נָוָט; Bozet; [Vat. Sin. Χεσ, Alex. Σαυ Βουζί; Buzites]). A descendant of Buz. The term is applied to Elbuz, who was of the kindred of Ram or Aram (Job xxxii. 2, 6).

W. A. W.

* BY. This proposition, among its other uses, formerly meant "against" (though never very common in that sense), and so undoubtedly our translators (taking έπαντριν δυσ as dat. incomm.) employed it in 1 Cor. iv. 4: "For I know nothing by (=against) myself." See Trench On the Authorized Version, p. 43 (2d ed. 1859), and Eastwood and Wright's Bible Word-Book, p. 83. But probably the Greek means only "I am conscious to myself of nothing," i.e., blameworthy or wrong. That consciousness is not self-condemnatory lies in ὁδὲν, not ἐπαντριν."

H.

* BY AND BY is used in the A. V. in the sense of "immediately" (Mark v. 25, ἐπαντριν; xii. 21, εὐδος; Luke xvii. 7, xx. 9, εὐδος). A.

BYSSUS. [LINEN.]

C.

CAB. [MATERIALS.]

CAB'DON (גַּבְדָון: Xaβədān; [Comp.] Alex. Xaβedān: [Ald. Xaβαδān: Cheβbun], a town in the land country (Shephelah) of Judah (Josh. xv. 40) which is only once mentioned, and of which nothing has been since discovered.

G.

CABUL (גַּבּוֹל : Xaβασαομא, including the Hebrew word following, גַּבּוֹל: [Ald.] Alex. Xaβαס: Καβοῦλ, a place named as one of the landmarks on the boundary of Asher (Josh. xix. 27). From its mention in proximity to Bilhachola — afterwards Jotapata, and now Jefat — it is probable that it is the same with that spoken of by Josephus (I B. § 43, 45) as in the district of Polemais, and 40 stadia from Jotapata. In this case it may fairly be considered as still existing in the modern Kabul, which was found by Dr. Smith and by Robinson 8 or 9 miles east of Akka, and about the same distance from Jefat (Rob. iii. 87, 88. For references to the Talmudic see Schwarz, p. 192).

Beuing thus on the very borders of Galilee, it is more than probable that there is some connection between this place and the district (גַּבּוֹל, גַּבּוֹל, the land of C.) containing twenty cities, which was presented by Solomon to Hiram king of Tyre (1 K. ix. 11-14). The LXX. rendering of the name Ουτον, appears to arise from their having read גַּבּוֹל, Gecho, "boundary," for גַּבּוֹל. On the other hand, the explanation of Josephus is quite in accordance with that hinted at in the text itself, thoroughly in keeping with Oriental modes of speech. Hiram, not liking Solomon's gift, seizes on the name of one of the cities, which in his own Punicic tongue expresses his disappointment (קַרְתְּ פָוָי הָאֹ לָו וּאֵי עֲרֶמִים, see Ant. rev. 5. § 3), and forms it from it a designation for the whole district. The pun is doubtless a Phoenician one, since there is no trace of it in the Hebrew beyond the explanation in ver. 12, "they pleased him not;" the Hebrew words for which, גַּבּוֹל גַּבּוֹל נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְבֶ נְb.

See however possible derivations of the name in the Omoovatismo of Simonis (p. 417), and Hiller (435, 775).

CADDIS (Καδ doença; [Alex. Ald. Καδός: Sin. Γαδόςις] Gachi, the surname (διακεκλημένος) of Joannan, the eldest brother of Judas Macca- baeus (1 Macc. ii. 2).

CADES ([Καδής; Alex. Κήδης, Καδής; Sin. Κηδής] Kebo; Cades), 1 Macc. xli. 63, 73. [Kadesi.]

CÆSAR'S HOUSEHOLD. The chief

CÆSAREA (Kadesheb, Acts viii. 40, 30, x. 1, 24, xi. 11, xii. 19, xviii. 22, xxi. 8, 16; xxii. 23, 34; xxv. 1, 4, 6, 13). The passages just con-

CÆSAREA was situated on the coast of Palestine, on the line of the great road from Tyre to Egypt, and about half way between Joppa and Dor (Joseph. B. J. i. 21, § 5). The journey of St. Peter from Joppa (Acts x. 24) occupied rather more than a day. On the other hand St. Paul's journey from Tarsus (Acts xvi. 8) was accomplished within the same.

Cesarea. (3) Some of the friends of these soldiers thus brought them into connection with Paul may have been employed about the palace of the emperor, and so could have been the members of "Cesar's household" who sent greetings to the church at Philippi. Perhaps one step of the combination may be left out. The camp of the Praetorians, situated out of the city, may have included also those of the emperor, a small division quartered near the palace in the city, and who as the emperor's body-guard might be said to belong to his "household." There is no proof that the imperial residence itself was ever called "prætorium." Paul may have gained converts from these, as one after another of them acted as sentries over him. As the reason why they in particular greeted the Christians at Philippi, Xenander suggests that they may have known some of the church there who had been at Rome, or possibly may themselves have been natives of that city. It may be that Paul's chiefly "[μετοπίστα]" (Phil. iv. 22), which so emphasizes the greeting of "those of Caesar's household," represents the tone of hearty commonwealth with which they spoke up as he was writing, and asked him to send also their kisses of love (αμφίσουσι) to these Philippians of whom they had heard so much from the apostle. For this, the parties need not have had any personal knowledge of each other.

The subject has been often discussed, with more or less divergence of views. For references, see Eitger's 'Britannia in die Paulin. Briefe,' No. 2, p. 47 ff.; Wieseler, Chrest. des apost. Zeitalt. p. 420 ff., p. 557 ff.; Schenkel, Briefe an die Epheser, Philipp. &c., pp. 119, 162; Eich, 'Einl. in die N. T. p. 433; Meyer, Exeg. Handb. Chapter 11.

Chapter 11. (1.) Soldiers under the general custody of the Praetorian Prefect is this the meaning of του στρατηγοῦ αυτῶν (Acts xviii. 16, text. rec.); attended Paul while he was a prisoner, and in the performance of this service would often relieve the "household" (2.) In the course of time the apostle would thus become known as a preacher of the gospel to many of these soldiers (Phil. i. 13), and through them to their comrades and acquaint-
CEASAREA

690. Dr. Robinson thinks this ought to be 78: Bib. Res. ii. 242, note). It has been ascertained, however, that there was a shorter road by Antipatris than that which is given in the Itinerary,—a point of some importance in reference to the night-journey of Acts xxiii. [Antipatris]

In Strabo's time there was on this point of the coast merely a town called "Strato's tower," with a landing-place (πόλισμα Εὐωδια), whereas, in the time of Tacitus, Cæsarea is spoken of as being the head of Judaea ("Judææ caput," Tac. Hist. ii. 79). It was in this interval that the city was built by Herod the Great. The work was in fact accomplished in ten years. The utmost care and expense were lavished on the building of Cæsarea. It was a proud monument of the reign of Herod, who named it in honor of the Emperor Augustus. The full name was Κασαρεία Σεβαστή (Joseph. Ant. xvi. 5, § 1). It was sometimes called Cæsarea Stratonis, and Cæsarea Palestine; sometimes also (from its position) παράλιος (Joseph. B. J. iii. 9, § 1), or ἢ εἰς θαλάσση (ib. vii. 1, § 2). It must be carefully distinguished from Cæsarea Philippi.

The magnificence of Cæsarea is described in detail by Josephus in two places (Jot. xv. 9; B. J. 1. 21). The chief features were connected with the harbor (itself called Στρατός λιμὴν) on coins, and by Josephus, Ant. xvii. 6, § 1), which was equal in size to the Piraeus. A vast breakwater, composed of stones 50 feet long, curved round so as to afford complete protection from the south-westerly winds, leaving an opening only on the north. Broad landing-wharves surrounded the harbor; and conspicuous from the sea was a temple, dedicated to Cæsar and to Rome, and containing colossal statues of the Emperor and the Imperial city. Cæsarea contained also an amphitheatre and a theatre. The latter was the scene of the death of Herod Agrippa I. Cæsarea was the official residence of the Herodian kings, and of Festus, Felix, and the other Roman procurators of Judaea. Here also were the head-quarters of the military forces of the province. It was by no means strictly a Jewish city. The Gentile population predominated: and at the synagogue-worship the Scriptures of the O. T. were read in Greek. Constant feuds took place here between the Jews and Greeks; and an outbreak of this kind was one of the first incidents of the great war. It was at Cæsarea that Vespasian was declared emperor. He made it a Roman colony, called it by his name, and gave to it the Jus Italicum. The history of the place, during the time of its greatest eminence, is summed up in one sentence by Pliny: — "Stratonicus turris, eadem Cæsarea, ab Herode rex condita: nunc Colonia prima Flavia, a Vespasiano Imperatore deducta" (v. 14).

To the Biblical geographer Cæsarea is interesting as the home of Eusebius. It was also the scene of some of Origen's labors and the birth-place of Procopius. It continued to be a city of some importance even in the time of the Crusades. Now, though an Arabic corruption of the name still lingers on the site (Καισαριγεθ), it is utterly desolate; and its ruins have for a long period been a quarry, from which other towns in this part of Syria have been built. (See Buckingham's Travels and the Appendix to vol. i. of Dr. Tralli's Josephus, J. S. H.)

Cæsarea Philippi (Κασαρεία η Φιλίππη, Λαυραία, Λαυρεία) is mentioned only in the two first Gospels (Matt. xvi. 13; Mark viii. 27) and in accounts of the same transactions. The story in Eusebius, that the woman healed of the issue of blood, and supposed to have been named Berenice, lived at this place, RESTS ON NO FOUNDATION.

Cæsarea Philippi was the northernmost point of our Lord's journeys; and the passage in His life, which was connected with the place, was other
wise a very marked one. (See Stanley’s Sinai and \[Technia, p. 304.\]) The place itself too is remarkable in its physical and picturesque characteristics, and also in its historical association. It was at the easternmost and most important of the two recognized sources of the Jordan, the other being at Tell el-Kasih (Dan or Laisah, which by Winer and others has been erroneously identified with Caes. Philippi). Not that either of these sources is the most distant fountain-head of the Jordan, the name of the river being given (as in the case of the Missouri and Missouri, to quote Dr. Robinson’s illustration), not to the most remote fountains, but the most copious. The spring rises, and the city was built, on a limestone terrace in a valley at the base of Mount Hermon. Caesarea Philippi has no O. T. history, though it has been not unreasonably identified with Baal-gebd. Its annals run back direct from Herod’s time into heathenism. There is no difficulty in identifying it with the Panium of Josephus; and the inscriptions are not yet obliterated, which show that the God Pan had once a sanctuary at this spot. Here Herod the Great erected a temple to Augustus; the town being then called from the grotto where Pan had been hallowed. It is worth while here to quote in succession the words of Josephus and of Dr. Robinson: “Herod, having accompanied Caesar to the sea and returned home, erected him a beautiful temple of white marble near the place called Panium. This is a fine cavern in a mountain; under which there is a great cavity in the earth; and the cavern is abrupt, and very deep, and full of still water. Over it hangs a vast mountain, and under the mountain rise the springs of the river Jordan. Herod adorned this place, which was already a very remarkable one, still further by the erection of this temple, which he dedicated to Caesar.” (Joseph. Ant. xx. 10, § 3; comp. B. J. i. 21, § 3.) “The situation is unique, combining in an unusual degree the elements of grandeur and beauty. It nestles in its recess at the southern base of the mighty Hermon, which towers in majesty to an elevation of 7000 or 8000 feet above. The abundant waters of the glorious fountain spread over the terrace, luxuriant fertility and the graceful intercalation of grass, lawn, and waving fields.” (Robinson, iii. 404.)

Caesarea Philippium became part of the territory of Philip, tetrarch of Trachonitis, who enlarged and established the town, and called it Caesarea Philippi, partly after his own name, and partly after that of the emperor (Joseph. Ant. xviii. 2, § 1; B. J. ii. 9, § 1). Agrippa II. followed in the same course of flattery, and called the place Neronomos (Joseph. Ant. xx. 9, § 4). Josephus seems to imply in his life (Vit. 13) that many heathens resided here. Thus exhibited gladness Josephus Philippi after the end of the Jewish war (B. J. vii. 2, § 1). The old name was not lost. Coins of Caesarea Panim continued through the reigns of many emperors. Under the simple name of Lutena it was the seat of a Greek bishopric in the period of the great councils, and of a Latin bishopric during the crusades. It is still called Banias, the first name having here, as in other cases, survived the second. A remarkable monument, which has seen all the periods of the history of Caesarea Philippi, is the vast castle above the site of the city, built in Byzantian or even Phoenician times, and, after receiving additions from the Saracens and Franks, still the most remarkable fortress in the Holy Land. J. S. H.

**CAGE.** The term so rendered in Jer. v. 27, 40-44, is more properly a *trop* (τρόπος, δεικτόν), in which decy birds were placed; the same article is referred to in Eccles. xi. 30 under the term *καταραλάος*, which is elsewhere used of a tapering basket. (Tophans.) In Rev. xviii. 2 the Greek term is φαλακρος, meaning a prison or restricted habitation rather than a cage. W. L. B.

**CATAPHAs [3 syl.]** (Κατάφας, said (Winer, &c.) to be derived from ἐκάτον, depression, Targ. Prov. xvi. 20), in full Joseph CATAPHAS (Joseph. Ant. xviii. 2, 2), high-priest of the Jews under Tiberius during the years of our Lord’s public ministry, and at the time of his condemnation and crucifixion. Matt. xxvi. 3, 57 (Mark does not name him): Luke iii. 2; John xi. 49, xviii. 13, 24, 25; Acts iv. 6. The Procurator Valerius Gratus, shortly before his leaving the province, appointed him to the dignity, which was before held by Simon ben-Gamaliel. He held it during the whole procuratorship of Pontius Pilate, but soon after his removal from that office was deposed by the procurator Vitellius (49. 50), and succeeded by Jonathan, son of Annas (Joseph. Ant. xviii. 4, § 3). He was son-in-law of Annas. (Annas.) Some in the ancient church confounded him with the historian Josephus, and believed him to have become a convert to Christianity. (Assmann, Biblioth. Orient. ii. 163.)

**CAIN** [2 syl. in Heb.] (عن, derived either from תוע, to acquire, Gen. iv. 1; from יִתְנָה, a spear, as indicative of the weapon used by Cain and Lamech, Gesen. Thesaur. p. 192; or from an Arabic word إنا, or ایناء, in reference to the arts introduced by the Caïnites, Von Bohlen, Intro. to Gen. ii. 55: קָנָה; Joseph. קָנָה, Cain.1 The historical facts in the life of Cain, as recorded in Gen. iv., are briefly these: — He was the eldest son of Adam and Eve; he followed the business of agriculture; in a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel’s, he committed the crime of murder, for which he was expelled from Eden and led to a life of exile; he settled in the kind of Ned, and built a city which he named after his son Enoch; his

1 * Baumgarten (Comm. ub. Philostrach. i. 73) adopts the sense of "spear," "weapon," as the name of the firstborn whom Eve would thus "obtained from Jehovah," because she would recognize in him the means of victory, i.e. the sword of the Lord, who to overcome the great enemy (Gen. iii. 15). According to this view the words "תוע, תוע, תוע, without being related in signification, are merely proparadigmatic (omore et omne), though they serve at the same time to express the dem with greater energy. But the derivation of "
The descendants are enumerated, together with the inten-

sions for which they were remarkable. Occas-

ional references to Cain are made in the N. T.

(Heb. xi. 4; 1 John iii. 12; Jude 11.)

The following points deserve notice in connection with

the Biblical narrative: — 1. The position of

the land of Nod. The name itself tells us little; it

means flight or exile, in reference to v. 12 where

cognate word is used: Von Bohlen's attempt to

identify it with India, as though the Hebrew name

Hind ("2") had been erroneously read han-Nod,

is too far fetched: the only indication of its pos-

ition is the indefinite notice that it was "east of Eden"

(16), which of course throws as back to the

previous settlement of the position of Eden itself.

Knoedel (Comm. in loc.) who adopts an ethnological

interpretation of the history of Cain's descendants,

would identify Nod with the whole of Eastern Asia,

and even hints at a possible connection between the

names Cain and China. It seems vain to attempt

the identification of Nod with any special locality;

the direction "east of Eden" may have reference to

the previous notice in iii. 24, and may indicate

that the land was opposite to (κατήφεντι, LXX.)

the entrance, which was barred against his return.

It is not improbable that the east was further used to

mark the direction which the course took, a distinct

from the Sethites, who would, according to

Hebrew notions, be settled towards the west.

Similar observations must be made in regard to

the city Enoch, which has been identified with

the names of the Hamite, a tribe in Caucasus (Hasse),

Anuchta, a town in Susiana (Huetius), Change,

an ancient town in India (Von Bohlen), and Iconi-

um, as the place where the defiled king Amaasos

was honored (Ewald): all such attempts at identi-

fication must be subordinated to the previous set-

tlement of the position of Eden and Nod.

2. The "mark set upon Cain" has given rise to

various speculations, many of which would never

have been broached, if the Hebrew text had been

consulted: the words probably mean that Jehovah
gave a sign to Cain, very much as signs were after-

wards given to Noah (Gen. xiv. 13), Moses (Ex. iii

2, 12), Elijah (1 K. xix. 11), and Hezekiah (Is.

xxxi. 2, 4). Whether the sign was perceptible to

Cain alone, and given to him once for all, in token

that no man should kill him, or whether it was one

that was perceptible to others, and designed as a

precaution to them, as is implied in the A. V., is

uncertain; the nature of the sign itself is still more

uncertain.

3. The narrative implies the existence of a con-

siderable population in Cain's time: for he fears

lest he should be murdered in return for the mur-

der he had committed (14). Josephus (Ant. i. 2, 1

§ 1) explains his fears as arising not from men but

from devils; but such an explanation is wholly

unnecessary. The family of Adam may have largely

been established before the birth of Seth, as is indeed
implied in the notice of Cain's wife (17), and the

mere circumstance that none of the other children

are noticed by name may be explained on the

ground that their lives furnished nothing worthy

of notice.

4. The character of Cain deserves a brief notice.

He is charactized as a man of a morose, malicious,

and revengeful temper; and that he presented his

offering in this state of mind is implied in the re-

sponse contained in ver. 7, which may be rendered

thus: "If thou dost well (or, as the LXX. has it,

εάν ὁρᾶς προσφέρετες), is there not an elevation

of the countenance (i.e. cheerfulness and oppo-

site) which does not say, is there a sinking of the

countenance?" Cain lurketh (as a wild beast)

at the door, and to thee is its desire: but thou

shalt rule over it." The narrative implies there-

fore that his offering was rejected on account of

the temper in which it was brought.

5. The descendants of Cain are enumerated to

the sixth generation. Some commentators (Kno-

bel, Von Bohlen) have traced an artificial struc-

ture in this genealogy, by which it is rendered paral-

lel to that of the Sethites; e. g. there is a departure

of names in each, commencing with Adam and ending

with Jabal and Noah, the deficiency of generations

in the Cainites being supplied by the addition of

the two younger sons of Lamech to the list; and

there is a considerable similarity in the names, each

list containing a Lamech and an Enoch: while Cain

in the one = Cain-an in the other, Methuselah =

Methuselah, and Methujael = Mahalalel: the in-

ference from this comparison being that the one

was framed out of the other. It must be observed,

however, that the differences far exceed the points

of similarity: that the order of the names, the

number of generations, and even the meanings of

those which are noticed as similar in sound, are

sufficiently distinct to remove the impression of

artificial construction.

6. The social condition of the Cainites is prom-

inently brought forward in the history. Cain him-

self was an agriculturist, Abel a shepherd; the

successors of the latter are represented by the Seth-

ites and the progenitors of the Hebrew race in

later times, among whom a pastoral life was always

held in high honor from the simplicity and devo-

tional habits which it engendered; the successors

of the former are depicted as the reverse in all

these respects. Cain founded the first city; Lame-

uch instituted polygamy; Jabal introduced the

nomadic life; Jubal invented musical instruments;

Tubalcain was the first smith: Lamech's language

takes the stately tone of poetry; and even the names

of the women, Naamah (pleasant), Zillah (shoemaker).

Adah (ornamental), seem to bespeak an advanced

case of civilization. But along with this, there

was violence and godlessness; Cain and Lamech

furnish proof of the former, while the concluding

words of Gen. iv. 29 imply the latter.

7. The exact establishment between the Cainites

and the Sethites appears to have reference solely to

the social and religious condition of the two races.

On the one side there is pictured a high state of

civilization, unsanctified by religion, and produc-

ing of luxury and violence; on the other side, a

state of simplicity which afforded no material for

history beyond the declaration "then began men
to call upon the name of the Lord." The historian

thus accounts for the progressive degeneration of

the religious condition of man, the evil gaining a

predominance over the good by its alliance with

worldly power and knowledge, and producing the

state of things which necessitated the flood.

8. Another motive may be assigned for the in-

roduction of this portion of sacred history. All

ancient nations have loved to trace up the inven-

tion of the arts to some certain author, and, gen-

erally speaking, these authors have been regarded

as objects of divine favor. This is well seen in the

history of Apollo, who was held to be the inventor of

music, Vulcan of the working of metals. Triptolemus

of the plough. A similar feeling of curiosity prevailed
among the Hebrews, and hence the historian has recorded the names of those to whom the invention of the arts was traditionally assigned, obviating at the same time the dangerous error into which other nations had fallen, and reducing the estimate of their value by the position which their inventors held.

W. L. B.

CAIN [2 syl. in Heb.] (with the article, "the lance," Ges.; but may it not be derived from כַּן, "a nest," possibly in allusion to its position: Zavaran [Vat.-eqq], Alex. Zavareinus, both by including name preceding: Avcein), one of the cities in the low country (שִׁפְתָּה) of Judah, named with Zanah and Gibeon (Josh. xv. 57). It does not appear to have been mentioned or identified by any one.

G.

CAINAN [2 syl.] (Marg. correctly Kenan [and so the text 1 Chr. i. 2]); כַּןָאָנָּא: Cainan; poss. son of First; tell father, Gesen, as if = כַּן, from the Arab. to forgo, as in Tubal-Cain, Gen. iv. 22; see Dr. Mill's Tindale, of our Lord's Geneal. p. 130). 1. Son of Enoch, aged 79 years when he begat Mahalaleel his son. He lived 840 years afterwards, and died aged 910 (Gen. v. 9-14). The rabbinical tradition was that he was the first to introduce idol-worship and astrology—a tradition which the Hebrews transferred to the post-diluvian Cian. Thus Ephraem Syrus asserts that the Chaldees in the time of Terah and Abram worshipped a graven god called Cian; and Gregory Bar-Hebraeus, another syriac author, also applies it to the son of Arphaxad (Mill, op. sup.). The origin of the tradition is not known; but it may probably have been suggested by the meaning of the supposed root in Arabic and the Aramaic dialects; just as another signification of the same root seems to have suggested the tradition that the daughters of Cain were the first who made and sang to musical instruments (Gesen, s. v. פִּיִּג).

2. [Alex. Каіауα in Gen. x. 24; Tisch. (with Sin. Б Л) Кαιαу in Luke iii. 36.] Son of Arphaxad, and father of Saha, according to Luke iii. 36, 36, and usually called the second Cainan. He is also found in the present copies of the LXX. in the genealogy of Shem, Gen. x. 24, xi. 12, and 1 Chr. i. 18 (though he is omitted in 1 Chr. i. 24), and is nowhere named in the Hebrew codex, nor in any of the versions made from the Hebrew, as the Samaritan, Chaldee, Syriac, Vulgate, &c. Moreover it can be demonstrated that the intrusion of the name into the version of the LXX. is comparatively modern, since Augustine is the first writer who mentions it as found in the O. T. at all; and even now we have the absolute certainty that it was not contained in any copies of the Alexandrine Bible which either Barbara, Eusebius, Pseudo-Phil., Polyhistor, Josephus, Theseus, Theophilus of Antioch, &c., are

a The letter "ג" is generally rendered in the A. V. by K. A possible connection of this name with that of the "Keniotes" is observed by the form Cain, which is probably derived from the Vulgate.

*Knobel (Deut., p. 457) says that Cain according to an appearance in the Arabic Yek is not far from Jebron (Rob. Bibl. Res., 1st ed., i. 349). Dr. Robinson records the name, but says nothing of the identification. The position may be right enough, but the resemblance of the name is too slight to be of any account.

H. Julius Africanus, Origen, Eusebius, & even Jerome, had access to it. It seems certain, therefore, that his name was introduced into the genealogies of the Greek O. T. in order to bring them into harmony with the genealogy of Christ in St. Luke's Gospel, where Cainan was found in the time of Jerome. The question is thus narrowed into one concerning its introduction into the Gospel. It might have been thought that it had found its way by accident into the genealogy of Joseph, and that Luke inserted that genealogy exactly as he found it. But as Beza's very ancient MS. presented to the University of Cambridge, does not contain the name of Cainan, and there is strong ground for supposing that neither did Irenaeus's copy of St. Luke, it seems on the whole more probable that Cainan was not inserted by St. Luke himself, but was afterwards added, either by accident, or to make up the number of generations to 17, or from some other cause which cannot now be discovered. For further information, see Geneal. of our Lord J. C., ch. viii.; Heiddegger, Hist. Patriarch. ii. 8-15; Bechert, Pelejy, lib. ii. cap. 13; and for the opposite view, Mill's Tindale, of our Lord's Geneal. p. 143 ff. A. C. H.

CAIUS. [John, Second and Third Epistles of.]

CAKES. [Bread.]

CA'LAH (כַּלְהָה, in pause כַּלְהָה [completion]: כַּלְּהָו: Chale), one of the most ancient cities of Assyria. Its foundation is ascribed to the patriarch Assur (Gen. x. 11). The name has been thought identical with the Habah (חַלֶּה), which is found in Kings (2 K. xii. 6, and xviii. 11) and Chronicles (1 Chr. v. 25); but this view is unsupported by the Septuagint, which renders Habah by Ἀλαῖγι. According to the opinions of the best Oriental antiquaries, the site of Cahah is marked by the Nimrud ruins, which have furnished so large a proportion of the Assyrian remains at present in England. If this be regarded as ascertained, Cahah must be considered to have been at one time (about n. c. 930-729) the capital of the empire. It was the residence of the warlike Sardanapalus and his successors down to the time of Sargon, who built a new capital, which he called by his own name, on the site occupied by the modern Khorsabad. Cahah still continued under the latter kings to be a town of importance, and was especially favored by Esarhaddon, who built there one of the grandest of the Assyrian palaces. In later times it gave name to one of the chief districts of the country, which appears as Calaeh (Ptolem. vi. 1) or Calachei (Strab. xvi. 1, § 1) in the geographers.

G. R.

* Mr. J. L. Porter (Kitto's Cyc. of Bibb. Lit., 3d ed., art. "cah" objects to the identification of Cahah with Nimrud, that sufficient force is not left for Rezan, which is described in Gen. x. 12 as "a great city" lying between Niniveh and Cahah;

d Demetrius (n. c. 150), quoted by Eusebius (Porp. Eran. ix. 21), reckons 1390 years from the birth of Shem to Jarchi's going down to Egypt, which seems to include the 1390 years of Cainan. But in the great fluctuation of the numbers in the ages of the patriarchs, no reliance can be placed on this argument. Nor have we any certainty that the figures have not been altered in the modern copies of Eusebius, to make them agree with the computation of the altered copies of the LXX.
The distance between Nin'raíd and the ruins of ancient Nineveh (opposite Mosul) being less than twenty miles. He would therefore identify Resen with Nin’raíd, and Calah with Kalah- or Kîlîh-Sherqhat, forty miles south of Nin’raíd on the right bank of the Tagris. He further observes: “Kalah-Sherqhat was one of the most ancient places in Assyria. On a cylinder discovered there is an inscription recording the fact that the King Tigrash-pišer restored a monument which had been taken down sixty years previously, after having stood for 641 years. It must, therefore, have been founded about 487 B.C. (Kawlinson’s Hebrew iv. 457, 458.)

Since he, too, is identified by Resen, Nin’raíd, and Calah with Kalah-Sherqhat. See Assu’rya, p. 187; Nineveh; Resen. A.

CA’LANO-MA’LUS (Kala’ma’lula’los; [Vat. Ka’lum-wa’lala’los]; Chaldean, 1 Esdr. i. 22, a corrupt name, apparently agglomerated of Elam, Loth, and Hadad.

CA’LAMUS. [Reed.]

CAL’COL (Kol’lo; [perh. sustenance, Ges.]; Ke’lah’; [Vat. Ka’laa’]; Xalal’as; [Alex. Xa’la’la’; Chaldean, Kila’'], a man of Judah, son or descendant of Zerah (1 Chr. ii. 6). Probably identical with Chalcio (A. V. only; no difference in the Hebrew), son of Mahal, one of the four wise men whom Solomon excelled in wisdom (1 K. iv. 31). For the grounds of this identification see Bards. G.

* CAL’DE’A, CAL’DE’ANS, CAL’DE’ES, occur in the A. V. ed. 1611 and other early editions as names for Caldea, etc., which see.

CA’LDRO’N. (1) ‘lal, probably from ‘lal, boil, akin to Arab. 'al, to be moved, as water in boiling; a pot or kettle; also a basket. (2) ‘lal, a pot or kettle. (3) ‘lal, or ‘lal. (4) ‘lal, from ‘al, pour. tâh’a, kîlîh, po-less, elles. A vessel for boiling flesh, either for ceremonial or domestic use (2 Chr. xxv. 13; 1 Sam. ii. 14; Mic. iii. 3; Job xli. 20).” [Pot; Kettle.]

H. W. P.

Bronze Caldron from Egyptian Thebes. (Brit. Mus.)

CA’LEB (Kale’b; Xale’b; [Alex. Xale’ba ver. 42; Caleb?—soy, Gesen.; Belleter, Klaffer, i. e. Sverdrup, First.] 1. According to 1 Chr. ii. 9, 18, 19, 42, 50, the son of Horan, the son of Pharez, the son of Judah, and the father of Hur by Ephrath, or Ephrat, and consequently grandfather of Caleb the spy. His brothers, according to the same authority, were Jerahmeel and Ramm; his wives Azubah, Jeroth, and Ephrathah; and his concubines Ephah and Maachah (ver. 9, 42, 46, 48). But from the manifest corruption of the text in many parts of the chapter, from the name being written כלאב in ver. 9, which looks like a patronymic from לבל, Chelub (1 Chr. iv. 11) the brother of Shemid, from the evident confusion between the two Caleb’s at ver. 49, and from the non-appearance of this elder Caleb anywhere except in this genealogy drawn up in Hebrew’s reign [Aza’rik, No. 5], it is impossible to speak with confidence of his relations, or even of his existence.

2. Son of Jephunneh, by which patronymic the illustrious spies is usually designated (Num. xiii. 6, and ten other places), with the addition of that of “the Kenite,” or “son of Kenaz,” in Num. xxxvii. 12; Josh. xiv. 6, 14. Caleb is first mentioned in the list of the rulers or princes (סקנ linux), called in the next verse כלאב, “head,” one from each tribe, who were sent to search the land of Canaan in the second year of the Exodus, where it may be noted that these כלאב or סכנ are all different from those named in Num. i. ii. vii. x. as princes or heads of the tribes of Israel, and consequently that the same title was given to the chiefs of families as to the chiefs of the tribe. Caleb was a סכנ or כלאב in the tribe of Judah, perhaps as chief of the family of the Hezronites, at the same time that Nabal the son of Aminadab was prince of the whole tribe. He and Oshca or Joshua the son of Nun were the only two of the whole number who, on their return from Canaan to Kadesh-Barnea, encouraged the people to enter in boldly to the land, and take possession of it; for which act of faithfulness they narrowly escaped stoning at the hands of the infurited people. In the plague that ensued, while the other ten tribes perished, Caleb and Joshua alone were spared.

Moreover, while it was announced to the congregation by Moses that, for this rebellious murmuring, all that had been numbered from 20 years old and upwards, except Joshua and Caleb, should perish in the wilderness, a special promise was made to Caleb the son of Jephunneh, that he should survive to enter into the land which he had trodden upon, and that his seed should possess it. Accordingly, 45 years afterwards, when some progress had been made in the conquest of the land, Caleb came to Joshua and reminded him of what had happened at Kadesh, and of the promise which Moses made to him with an oath. He added that though he was now 85 years old, he was as strong as in the day when Moses sent him to spy out the land, and he claimed possession of the land of the Anakims, Kirjath-Aria, or Hebron, and the neighboring hill-country (Josh. xiv.). This was immediately granted to him, and the following chapter relates how he took possession of Hebron, driving out the three sons of Anak; and how he offered Achsh his daughter in marriage to whoever would take Kirjath-Sepher, i. e. Debir; and how when Othniel, his younger brother, had performed the feat, he not
only gave him his daughter to wife, but with her the upper and nether springs of water which she asked for. After this he went no more of Caleb, but his time of his death recorded. But we learn from Josh. xii. 14, that in the distribution of cities out of the different tribes for the priests and Levites to dwell in, Hebron fell to the priests, the children of Aaron, of the family of Kohathites, and was also a city of refuge, while the surrounding territory continued to be the possession of Caleb, at least as late as the time of David (1 Sam. xxv. 3, xxx. 14).

But a very interesting question arises as to the birth and parentage of Caleb. He, as we have seen, styled "the son of Jephunneh the Kenazite," and his younger brother Othniel, afterwards the first Judge, is also called "the son of Kenaz" (Josh. xv. 17; Judg. i. 13, iii. 9, 11).

On the other hand the genealogy in 1 Chr. ii makes no mention whatever of either Jephunneh or Kenaz, but represents Caleb, though obscurely, as being a descendant of Hezron and a son of Hur (see xx ch. iv.). Again in Josh. xv. 13 we have this singular expression, "Into Caleb the son of Jephunneh he gave a part among the children of Judah," and in xiv. 1, the no less significant one, "Hebron became the inheritance of Caleb the son of Jephunneh the Kenazite, because that he wholly followed Jehovah "Gift of Israel." It becomes, therefore, quite possible that Caleb was a foreigner by birth; a proselyte, incorporated into the tribe of Judah, into which perhaps he or his ancestors had married, and one of the first-fruits of that Gentile harvest, of which Jehosh, Caleb, Ruth, Naomi, and many others were samples and signs.

And this conjecture receives a most striking confirmation from the names in Caleb's family. For on turning to Gen. xxxvi. 11, 15, we find that Kenaz is an Edomitic name, the son of Uplphon. Again, in 1 Chr. ii. 50, 52, among the sons of Caleb the son of Hur we find Shohal and half the Manahathites or sons of Manahath. But in Gen. xxxvi. 20-23, we are told that Shohal was the son of Seir the Horite, and that he was the father of the Kenazites. So too Kenosh, Rharan, Eleob (1 Chr. ii., iv.), and perhaps Jephunneh, compared with Pumon, are all Edomitic names (1 Chr. ii.; Gen. xxxvi.). We find too Tenomites, or sons of Teman (1 Chr. i. 36), among the children of Ashur the son of Hezon (1 Chr. iv. 6). The finding thus whole families or tribes, apparently of foreign origin, incorporated into the tribes of Israel, seems further to supply us with an ease and natural solution of the difficulty with regard to the great numbers of the Edomites at the Exodus. The seed of Abraham had been multiplied by the operation of proselytes, and as by generation.

3. CALF, according to the present text of 1 Chr. ii. 24, the name of a place where Hezon died. But no such place was ever heard of, and the composition of the name is a most improbable one. Nor could Hezon or his son have given any name to a place in Egypt, the land of their bondage, nor could Hezon have died, or his son have lived, elsewhere than in Egypt. The present text must therefore be corrected, and the reading which Jerome's Hebrew Bible had, and which is preserved in the LXX., is probably the true one, namely, בָּלַע בָּלַע בָּלַע בָּלַע, "Caleb came in unto Ephrathah." The whole information given seems to be that Hezon had two wives, the first whose name is not given, the mother of Jerahmeel, Rams, and Caleb or Cheleba; the second Abia, the daughter of Machir, whom he married when 60 years old, and who bore him Segub and Ashur. Also that Caleb had two wives, Azubah, the first, the mother, according to Jerome's version, of Jothiel; and Ephrathah, the second, the mother of Hur; and that this second marriage of Caleb did not take place till after Hezon's death.

A. C. H.

* Caleb-Ephrathah (see 3 above), it is true, does not occur elsewhere; but in 1 Sam., xxx. 14 we find mention made of a district Caleb, which must have been a part of Judah, and as called from Caleb, Joshua's spy, to whom it was allotted. Bertheau in his note on 1 Chr. ii. 24 (Bacher der chronik, p. 17) suggests that the northern part of this territory of Caleb where it approached Ephrathah, i.e. Bethlehem, may have been distinguished from the southern part by the more definite name of Caleb-Ephrathah. He remarks further that the proposed change of the text (καλης Εθρησ δωροατας ἐν τη λαξ, which the Vulg. follows) removes the difficulty, but introduces a notice altogether foreign to the text, since the verse relates to Hebron and not to Caleb. There may be some doubt about the translation, but the chronology and history of this period are too obscure to allow us to say that Hebron and Caleb-Ephrathah were the same.

1. CALEB. "The south of Caleb" is that portion of the Negeb (בע) or "south country" of Palestine, occupied by Caleb and his descendants (1 Sam. xxviii.). In the division of Caleb's territory, Judah assigned the city and suburbs of Hebron to the priests, but the "field" of the city, that is, the pasture and corn lands, together with the villages, were given to Caleb. The south, or Negeb, of Caleb, is probably to be identified with the extensive basin or plain which lies between Hebron and Karmeh, the ancient Tarnil of Judah, where Caleb's descendant Nabal had his possessions.

W. A. W.

CALF (τυρυτος, ἕλιος σώματος). In Ex. xxiii. 4, we are told that Aaron, constrained by the people in the absence of Moses, made a molten calf of the golden ear-rings of the people, to represent the tribe which brought Israel out of Egypt. He is also said to have "finished it with a graving-tool," but the word בָּלַע may mean a mound (comp. 2 K. v. 23, A. V. "a graving-tool;" LXX. χαλοστος). Roehl (Hbere. ii. cap. xxvii.) explains it to mean "he pierced the ear-rings in a tag," as Gadson did (Judg. viii. 24). Probably, however, it means that after the calf had been cast, Aaron ornamented it with the sculptured wings, feathers and other marks, which were similarly represented on the statues of Apis, &c. (Wilkinson, iv. 348). It does not seem likely that the ear-rings would have provided the enormous quantity of gold required for a solid figure. More probably a wooden image was formed, gilded, a process which is known to have existed in Egypt. "A gilded ox covered with a pail" was an emblem of Osiris (Wilkinson, iv. 355).

The legends about the calf are numerous. The suggestion is said by the Jews to have originated with certain Egyptian priests (Godwin's Mos. and Jud. iv. 6); Hur, "the desert's martyr." was
To punish the apostasy Moses burnt the calf, and then grinding it to powder scattered it over to the water, where, according to some, it produced in the drinkers effects similar to the water of jehosbs (Num. xvi.). He probably adopted this course as the deaddest and most irreparable blow to their superstition (Deuter. xxvii. 8; Lev. xiv. p. 92.), or as an allegorical act (Judg. xv. 16), or with reference to an Egyptian custom (Herod. ii. 41; Poli Syn. ad loc.). It has always been a difficultly to explain the process which he used: some account for it by his supposed knowledge of a forgotten art (such as was one of the boast of thebes) by which he could reduce gold to dust. Grognet (Origine des Lois) invokes the assistance of nature, which would have had the additional advantage of making the draught nauseous. Baumgarten easily accounts for the fire employed with miraculous properties. Bochart and Rosenmüller merely think that he cut, ground, and filed the gold to powder, such as was used to sprinkle over the hair (Joseph. Ant. viii. 7).

There seems little doubt that καρακάς = καρακάσας. LXX. (Haverfield's Introd. to the Pentat. p. 262.)

It has always been a great dispute respecting this calf and those of Jerobeam, whether, 1. the Jews intended them for some Egyptian God, or II. for a mere cherub symbol of Jehovah.

1. The arguments for the first supposition are, 1. The ready apostacy of the Jews to Egyptian superstition (Acts xvi. 30, and chap. v. passim: Lucian. adv. lac. iv. 19). 2. The fact that they had been worshippers of Apis (Josh. xxiv. 14), and their extreme familiarity with his cultus (1 K. xi. 40). 3. The resemblance of the feast described in Ex. xxiii. 5, to the festival in honor of Aphis (Suid. s. a. "Arisiris"). Of the various sacred cows of Egypt, that of Isis, of Athor, and of the three kinds of sacred bulls, Aphis, Basis, and Mosevis, Sir G. Wilkinson fixes the latter as the prototype of the gold calf-which he describes as offerings, dancing, and rejoicings practiced on that occasion were doubtless in imitation of a ceremony they had witnessed in honor of Mosevis" (Ana. Egypt., v. 157, see Plute 35. 36). The ox was worshipped from its utility in agriculture (Plut. de Is. p. 74), and was a symbol of the sun, and conversed to it (Sum. Of. 1. xii. 2.). Warburton, Ana. Jev. vii. 5. 3. Hence it is almost universally adopted as symbolical and of mythological history. 4. The expression "as an ox that eateth hay" (De. xvii. 20. 21. 35. 28.) shows some see an allusion to the Egyptian custom of bringing a bottle of hay when they consulted Aphis (Godwyn's Mus. and Anc. iv. 5). Yet these terms of scorn are rather due to the intense hatred of the Jews, both to this idolatry and that of Jerobeam. Thus in Tobs. i. 5. we have one of Jerobeam's calves called ίες βασίς Παζά, which is an unquestionable name, and as in Jer. xxvi. 16. Αρίστου. Παζά is either a mistake or a corruption of the text (Bochart, Hieroz. ii. 28. 6, and Schleusner, s. v. "Arisiris").

II. It seems to us more likely that in this calf-worship the Jews merely "Likelst their Maker to the gravid ox"; or in other words, adopted a well-understood cherub-like emblem. For 1. It is obvious that they were aware of this symbol, since Moses finds it unnecessary to describe it (Ex. xxv. 18-22). 2. Josephus seems to imply that the calf symbolized God (Ant. viii. 8. § 4)." (2) (4.) Aaron in proclaiming the feast (Ex. xxxii. 5) distinctly calls it a feast to Jehovah, and speaks of the god as the visible representation of Him who had led them out of Egypt. (4.) It was extremely unlikely that they would so soon adopt a deity whom they had so recently seen humiliated by the judgments of Moses (Num. xxxix. 4. 5.) There was only one Aphis, whereas Jerobeam erected two calves. (But see John, Arch. Illustr. § 461.) (6) Jeroboam's well-understood political purpose was not to introduce a new religion, but to provide a different form of the old; and this alone explains the fact that this was the only form of idolatry into which Judah never fell, since she already possessed the archetypal emblems in the Temple. (7.) It appears from 1 K. xxii. 5. 6. that the prophets of Israel, though sanctioning the calf-worship, still regarded themselves, and were regarded, as "prophets of Jehovah." These arguments, out of many others, are deduced from the interesting treatise of Moneseus, dc Titulo Ierous. (Critici Sacri, i.) The work is initiated by the Church of Rome, and has been answered by Vischer. A brief resume of it may be found in Poli Syn. ad Ex. xxxii. and in Watt's "Remnants of Time." (CROMBIE."

The prophet Hosea is full of denunciations against the calf-worship of Israel (Hos. viii. 5, 6, 5, and mentions the curious custom of Eising them (xvii. 2). His change of Bethel into Bethaven possibly rose from contempt of this idolatry (see BETH-AYEN). The calf at Dan was carried away by Tiglath-Pileser, and that of Bethel 10 years after by his son Shalmanesser (2 K. xx. 29, xvii. 3). Priests at Bethel, 15, 17, 18. 13. 15, 16. 17.

Bochart thinks that the ridiculous story of Calex about the Christian worship of an ass-headed deity...
In the expression "the calves of our lips" ( Hos. xiv. 2), the word "calves" is used metaphorically for victims or sacrifices, and the passage signifies either "we will render to thee sacrifices of our lips," that is, "the tribute of thanksgiving and praise," or "we will offer to thee the sacrifices which our lips have vowed." The LXX. erroneously translate καταστροφή τῶν ἔλεους, which is followed by the Syr. and Arab. versions, and is supposed to have been borrowed by the author of the Hebræus to the Hebrew (xii. 15). For allusions to the "baited calf," see Gen. xviii. 7; Luke xxv. 23, &c.; and on the custom of cutting up a calf, and "passing between the parts thereof" to ratify a covenant, see Jer. xxxiv. 18, 19; Gen. xv. 10, 17; Euphr. Synes., i. 161; Hom. Ρ. ιι. 208.

**CALITAS** (Καλίτας): [Vat. in ver. 23 corrupt; in ver. 46 Vat. Alex. Καλίτας; Calibus, [Calidades]], 1 Esdr. ix. 23, 48. [Καλίτας].

**CALLISTHENES** (Χαλισθένης), a partisian of Nicander, who was burnt by the Jews on the defeat of that general in revenge for his guilt in setting fire to the sacred portals (2 Mac. viii. 53).

**CALXEH, or CALINO** (Χαλέη, Χαλίνον): Χαλάνιον, Χαλάν [see ΧΑΛΙΝΟ]: Chalanne, appears in Genesis (x. 10) among the nations of Nimrod. The word is thought to mean "the fort of the god Anur or Assur," who was one of the chief objects of Babylonic worship. Probably the site is the modern Niffer, which was certainly one of the early capitals, and which, under the name of Niphr, the Talmud identifies with Calneh (see the Υομα). Arab traditions made Niffer the original Babylon, and said that it was the place where Nimrod endeavored to mount on eagles' wings to heaven. Similarly, the LXX. speak of Calneh or Calno, as "the place where the tower was built" (x. 9). Niffer is situated about 60 miles S. E. of Babylon in the marshes on the left bank of the Euphrates; it has been visited and described by Mr. Lavard (Xin. οf Bab., ch. xxiv.), and Mr. Loftus (Choblet, p. 101). We may gather from Scripture that in the 8th century B.C. Calneh was taken by one of the Assyrian kings, and never recovered its prosperity. Hence it is compared with Carchemish, Hamath, and Gath (Is. x. 9; Am. vi. 2), and regarded as a proof of the resistless might of Assyria.

G. E.

**CALNO** (Χαλίνον): [Vat. Sin. Alex. Χαλάνον, the passage [in the LXX.] however, does not agree with the Hebrew: Χαλόνο], Is. x. 9. [Χαλνοθ].

* Hence we have 3 variations of the name: Calno in Isaiah, Calneh in Genesis and Amos, and Camneh in Ezekiel xxxii. 25. The idea which the Seventy bring into the text of Is. 9 (not in the Hebrew).

**CALM** (καλμός): [Aramaic καλμός: kamam]: the common Hebrew term to express the genus "camel," irrespective of any difference of species, age, or breed; it occurs in numerous passages of the O. T. and is in all probability derived from a root which signifies "to carry." The word has survived to this day in the languages of Western Europe. See Gesenius, Thes. x. v.

**CAMEL**. Under this head we shall consider the Hebrew words גמל, בקר, and הבז, avizah. As to the aetheræum in Esth. viii. 10, erroneously translated "cambel" by the A. V., see Mdie. (note):

1. גמל (קַּמְל) [beshar-beaver]: σκυλαγός: camelus] is the common Hebrew term to express the genus "camel," irrespective of any difference of species, age, or breed; it occurs in numerous passages of the O. T. and is in all probability derived from a root which signifies "to carry." The word has survived to this day in the languages of Western Europe. See Gesenius, Thes. x. v.

1. גמל (קַּמְל) [beshar-beaver]: σκυλαγός: camelus] is the common Hebrew term to express the genus "camel," irrespective of any difference of species, age, or breed; it occurs in numerous passages of the O. T. and is in all probability derived from a root which signifies "to carry." The word has survived to this day in the languages of Western Europe. See Gesenius, Thes. x. v.
first mention of camels occurs in Gen. xii. 16, as among the presents which Pharaoh bestowed upon Abram when he was in Egypt. It is clear from this passage that camels were early known to the Egyptians (see also Ex. ix. 3); though no representation of this animal has yet been discovered in the paintings or hieroglyphics (Wilkinson, Anc. Egypt. i. 234, Lond. 1834). The camel has been from the earliest times the most important beast of burden amongst Oriental nations. The Ethiopians had "camels in abundance" (2 Chr. xiv. 15); the queen of Sheba came to Jerusalem "with camels that bare spices and gold and precious stones" (1 K. x. 2); the men of Kedar and of Hazor possessed camels (Jer. xlii. 29, 32); David took away the camels from the Geshurites and the Amalekites (1 Sam. xxvii. 9, xxx. 17); forty camels' burden of good things were sent to Elisha by Ien-hadad, king of Syria, from Damascus (2 K. vii. 9); the Ishmaelites trafficked with Egypt in the precious gums of Gilead, carried on the backs of camels (Gen. xxxvii. 25); the Midianites and the Amalekites possessed camels "as the sand by the sea-side for multitude" (Judg. vii. 12); Job had three thousand camels before his affliction (Job i. 3), and six thousand afterwards (xlii. 12).

The camel was used for riding (Gen. xxiv. 64; 1 Sam. xxx. 17); as a beast of burden generally (Gen. xxxvii. 25; 2 K. viii. 9; 1 K. x. 2, &c.), for draught purposes (Is. xxvii. 7; see also Suetonius,

Nero, c. 11). From 1 Sam. xxx. 17 we learn that camels were used in war; compare also Pliny (N. H. viii. 18), Xenophon (Cyrop. vii. 1, 27), and Herodotus (i. 83, vii. 86), and Livy (xxxvii. 40). It is to the mixed nature of the forces of the Persian army that Leinus is probably alluding in his description of the fall of Babylon (Is. xxvii. 1).

John the Baptist wore a garment made of camel's hair (Matt. iii. 4; Mark i. 6), and some have supposed that Elijah "was clad in a dress of the same stuff," (Calmet's Dict. Prog. No. 4252.; Rosenmuller, Schol. ad Is. xx. 2), the Hebrew expression "lord of hair" (2 K. i. 8) having reference not to his beard or head, but to his garment (compare Zech. xiii. 4; 1 K. xix. 13, 19) [Sacredoth,] but see Elijah. Chardin (in Harmer's Observ. iv. 457) says the people in the East make vestments of camel's hair, which they pull off the animal at the time it is changing its coat. Pliny (N. H. xviii. 34) speaks of the excellent smooth quality of the hair of camels, which the wealthy near the Caspian Sea used to wear; but the garment of camel's hair which the Baptist wore was in all probability merely the prepared skin of the animal.

Camel's milk was much esteemed by Orientalists Aristot. Hist. Anim. vi. 23, § 1, ed. Schmied., Pliny, N. H. vi. 41, xxvii. 9); it was in all probability used by the Hebrews, but no distinct refer-

CAMEL

B  Amongst the live stock which Jacob presented to Esau were "thirty milch camels with their colts."

Two-humped Camels on Assyrian monuments. (Jaward.)

they affirm, having this effect. The Arabs use sour camel's milk extensively as a drink.

c  Compare also Is. iii. 18; "Round tires like the moon," A. V. The LXX. has πυρείναν. Vulg. luna.

* Camel's note (Lange's Biblicalk, p. 83) confirms and illustrates this oriental usage of putting "little moons on" the necks of the camels. It no doubt had some connection with the Sabranism of the Arab tribes who worshipped so extensively the moon and stars. See Rawlinson's note on Herod. iii. 8. B.  d  "Nireo lumata monillia deute on horse's necks."
CAMEL

2. Bœcer, bircâh (בָּרָכָה, בָּרָכָה : LXX. καρπός, λόμος in Is. ix. 6: Δικαίωμα, LXX.) means, ἰδιούς in verses of Ap., Theod., and Symm.: dromedarious, curse). The Hebrew words occur only in the passages above named, where the A. V. reads. "dromedary." Isaiah, foretelling the conversion of the Gentiles, says, "The caravans of camels shall cover thee, the dromedaries of Midian and Ephah." The Midianites had "camels as the sand of the sea" (Judg. vii. 12). In Jeremiah God expectuates with Israel for her wickedness, and compares her to a swift bircâh, "a traversing her ways." Bochart (Hieroz. i. 15 ff.) contends that the Hebrew word is indicative only of a difference in age, and advances the authority of the Arabic bircâh in support of his opinion that a young camel is signified by the term. Gesenius follows Bochart, and (Comm. ad. d. Arc. iv. 6) answers the objections of Rosenmuller, who (Not. ad Bocharti Hieroz. l. c.) argues in favor of the "dromedary." Gesenius's remarks are commented on again by Rosenmuller in his Bibl. Naturgesch. ii. 21. Etymologically the Hebrew word is more in favor of the "dromedary." So too are the old versions, as is also the epithet "swift," applied to the bircâh in Jeremiah; while on the other hand the term is used in the Arabic to denote a "young camel." Oedumann, commenting on the Hebrew word, makes the following just observation: "The multitude of camels shall cover thee, the dromedarious of Midian, &c. — a weak distinction, if bircâh means only young camels in opposition to old ones." (Veit, Sow.) The "traversing her ways" is well explained by Rosenmuller, "more curvius, ille et longa tfuorii venero orcut, et omnibus non confessionem facere solent camell temperate astus libidinosus." We are of opinion that the bircâh or bircâh cannot be better represented than by the "dromedary" of the A. V.

a. See Schleusner (Thes. in LXX.) s. v. bircâh.
b. From בָּרָכָה, i. e. בָּרָכָה, "to be first."c. דִּקְדָּק, "a young camel," of the sex 'age as "a young man," amongst men. But the idea of swiftness is involved even in the Arabic use of this word for properare, fatimac (v. Gesenius, Thes.).d. דָּרָכָה, i. e., "the camel's saddle," with a kind of amopy over it. See Jahn (Arch. Bibl. p. 54, Upham's translation): "Sometimes they travel in a covered vehicle which is secured on the back of a camel, and answers the purpose of a small house," Parkhurst says "is in the reduplicate form, because these baskets were in pairs, and slung one on each side of the beast." In this sense the word may be referred to the Arabic: "sella camelina, alias, cum apparatu uno." (Freytag, s. v.) See figs. in Porrocks Discript. Orient. i. tab. 58.

3. As to the cireciith (בָּרָכָה) of Is. lxv, 29, which the LXX. interpreter σκαθία, the Vulg. Carruce, and the A. V. "swift beasts," there is some difference of opinion. The explanation is not satisfactory which is given by Bochart (Hieroz. i. 225), following some of the Rabbins, and adopted by Rosenmuller, Gesenius, Lex. and others, that "dromedarics" are meant. According to those who sanction this rendering, the word (which occurs only in Isaiah, l. c.) is derived from the root בָּרָכָה, "to leap," or "to gallop," but the idea involved is surely inapplicable to the jolting trot of a camel. The old versions moreover are opposed to such an explanation. We prefer, with Michaelis (App. ad LXX. Heb. No. 1210) and Parkhurst (s. v.), to understand by cireciith "pamiriers" or "baskets" carried on the backs of camels or mules, and to refer the word to its reduplicated form in Gen. xxx. 34. The shaded vehicles of the LXX. may be illustrated by a quotation from Malet (Descript. de l'Égypte, p. 239), who says, "other ladies are carried sitting in chairs made like covered cages hanging on both sides of a camel," or by a remark of Dr. Russell (Nat. Hist. of Aleppo, i. 256), who states that some of the women about Aleppo are commonly stowed, when on a journey, on each side a mule in a sort of covered cradles.

The species of camel which was in common use amongst the Jews and the heathen nations of Palestine is the Arabian or one-humped camel (Camelus Arietinus). The dromedary is a swifter animal than the baggage-camel, and is used chiefly for riding purposes — it is nearly a finer breed than the other: the Arabs call it the Ḥeere. The speed of the dromedary has been greatly exaggerated, the Arabs asserting that it is swifter than the horse: eight or nine miles an hour is the utmost it is able to per-
CAMEL

form; this pace, however, it is able to keep up for hours together. The Bactrian camel (Camelus bactrianus), the only other known species, has two humps; it is not capable of such endurance as its

Arabian cousin: this species is found in China, Russia, and throughout Central Asia, and is employed by the Persians in war to carry one or two guns which are fixed to the saddle. Col. H. Smith says this species appears figured in the procession of the ancient Persian satraps among the horses of Chehel Minar. Though the Bactrian camel was probably not used by the Jews, it was doubtless known to them in a late period of their history, from their relations with Persia and Chaldea. Russell (N. Hist. of Aleppo ii. 170, 2d ed.) says the two-humped camel is now seldom seen at Aleppo.

The camel, as may be readily conceived, is the subject amongst Orientals of many proverbial expressions; see many cited by Bochart (Hieros. i. 20), and comp. Matt. xxiii. 24, and xiv. 24, where there can be no doubt of the correctness of the A. V., notwithstanding the attempts which are made from time to time to explain away the expression: the very magnitude of the hyperbole is evidence in its favor: with the Talmudists [Talmudic writers] an elephant passing through a needle's eye was a common figure to denote anything impossible.

We may notice in conclusion the wonderful adaptation of the camel to the purposes for which it is designed. With feet admirably formed for journeying over dry and loose sandy soil; with an internal reservoir for a supply of water when the ordinary sources of nature fail; with a hump of fat ready on emergencies to supply it with carbon when even the prickly thorns and mists of the burning desert cease to afford food; with nostrils which can close valve-like when the sandy storm fills the air; this valuable animal does indeed well deserve the significant title of the "ship of the desert." The camel belongs to the family Camelidae, order Ruminantia.

W. H.

* It is a disappointment to know that the many serviceable qualities of the camel which have been enumerated, are far from being matched by any correspondent social or moral instincts to increase our regard for him. Dr. Kitto (Daily Bible Illa-

A term used in the Scriptures for "camps" or "encampments." It is used in the Authorized Version of the Bible in 138 different passages, and is generally translated "camp." It is derived from the Hebrew word "shilheh," which means "a fortified place." It is used to describe a place where the Israelites encamped during their journey through the wilderness. The word is also used to describe a place of refuge or safety. In the New Testament, it is used to describe the place where the apostles camped when they were persecuted.

CAMP

[ENCAMPMENTS]

CAMON (καμον) [standing-place, fastness]

[Comp. Akh. Kaim "Canam"; Canaan, the place in which God's judge was buried [Judg. x. 5]. The few notices of fair which we possess have all reference to the country E. of Jordan, and there is therefore no reason against accepting the statement of Josephus (Ant. v. 7, § 6) that Canam was a city of Gilead. In support of this is the mention by Polybius (v. 79, § 12) of a Canam (καμαν) in company with Pella and other trans-Jordanic places (Lichard, 679). In modern times, however, the name has not been recovered on the E. of Jordan. Eusebius and Jerome identify it with Cyamon, in the plain of Esdraelon. - G.
CAMPHIRE ("camphire: kûparos: cyg- 

jes, Cyprus). There can be no doubt that "camphire" is an inaccurate rendering of the He- 

brew term, which occurs in the sense of some arro- 

matic substance only in Cant. i. 14, iv. 13: the 

margin in both passages has "cypress," giving 

the form but not the signification of the Greek 

word. Camphire, or, as it is now generally written, 

phor, is a product of a tree largely cultivated in 

the island of Fornos, the Camphora officinarum, of 

the Nat. order Lamiaceae. There is another tree, 

the Deisulius aromatica of Samarra, which also 

yields camphor; but it is improbable that the 

substance secreted by either of these trees was 

known to the ancients. 

From [For?] the expression "cluster of cypress in 

the vineyards of Engedi," in Cant. i. 14, the Chal- 

dic version reads "bunches of grapes." Several 

versions retain the Hebrew word. The substance 

really denoted by cypress is the kûparos of Diosc- 

rides, Theophrastus, &c., and the cypress of Pliny, 

i.e. the Lawsonia alba of botanists, the henna of 

Arabian naturalists. So R. Ben Melek (Cant. i. 

14): "The cluster of cypress is that which the 

Arabs call "alhenn." (see Celsius, Hierob. i. 223). 

Although there is some discrepancy in the de- 

scriptions given by the Greek and Latin writers of 

the cypress-plant, yet their accounts are on the 

whole sufficiently exact to enable us to refer to 

it to the henna-plant. The Arabic authors Avicenna and 

Scorpius also identify their hennas with the cypres- 

ses of Dioscorides and Galen (both in Kitto's Bib. 

CycI. art. Kophor). 

"The kûparos," says Spruelt (Comment. on 

Dioscor. i. 124), "is the Lawsonia alba Latm., 

which includes the L. inwiusis and spinum, Latm.; 

it is the Cypress of the Hebrews and the Henna of 

the Arabs, a plant of great note throughout the East 

for this day, both on account of its fragrance and 

of the dye which its leaves yield for the hair." 

In a note Spruelt adds that the inhabitants of 

Nubia call the henna-plant Khotiek: he refers to 

Delsile (Flor. Egypt. p. 12). Hassedquist (Thes. 

246, Lund. 1766), speaking of this plant, says "the 

leaves are pulverized and made into a paste with 

water; the Egyptians bind this paste on the nails 

of their hands and feet, and keep it on all night: 

this gives them a deep yellow [red], which is 

greatly admired by Eastern nations. The odor 

lasts for three or four weeks before there is occasion 

to renew it. The custom is so ancient in Egypt 

that I have seen the nails of the mummies dyed in 

this manner." Somnini (Voyage, i. 267) says 

the women are fond of decorating themselves with 

the flowers of the henna-plant; that they take 

them in their hand and perfume their hands with them. 

Compare with this Cant. i. 13; see also Mariti 

Thes. i. 29), Prosper Alpinus (De Plant. Egypt. 

13), Pliny V. H. xii. 24), who says that a good 

kind grows near Aswan, Oedermann (Vern. Sinai. 

l. c. 7, and vi. p. 102), who satisfactorily answers 

Michaelis's conjecture (Schop. ed. Lec. Hib. ii. 1205) 

that "a palm-flowers" or "dates" are intended; see 

also Rosenmuller (Bibl. Bot. p. 133), and Wilkin 

son (Anc. Egypt. ii. 345).

Some have supposed that the expression rendered 

by the A. V., "pave her nails" (Pent. xxi. 12) 

has reference to the custom of staining them with 

henna-dye; but it is very improbable that there is 

any such allusion, for the captive woman was or- 

der'd to shave her head, a mark of mourning; such 

a meaning therefore as the one proposed is quite 

out of place (see Rosenmuller, Schop. ed. Deut. 

xxi. 12). Not only the nails of the hands and the feet, 

but the hair and beard were also dyed with henna, 

and even sometimes the names and tails of horses 

and asses were similarly treated. 

The Lawsonia alba when young is without 

thorns, and when older is spinous, whence Linneus's 

name, L. inwiusis and L. spinum, he regarding 

his specimens as two distinct species. The 

henna-plant grows in Egypt, Syria, Arabia, and N. 

India. The flowers are white, and grow in clusters, 

and are very fragrant. The whole shrub is from 

four to six feet high. The fullest description is 

that given by Somnini. The Lawsonia alba, 

the only known species, belongs to the natural order 

Labiaceae.

expiation," wherein some of the Hebrew doctors, 

by dividing לאמ, have found out the mystery of 

the Mosiah, לאמ וס, "the man that proph- 

By do her nails. Onkelos and Saadia understand the 

expression to denote "letting her nails grow," as a 

sign of grief. The Hebrew "do her nails," however, 

must surely express more than "letting them alone." 

* This is an error. The Nitrin 'ext published by 

Curton (Lond. 1588) agrees in the form of the 

word (John iv. 40) with the Peshito A
The four passages quoted — all, it will be observed, from St. John — are the only ones in which the name occurs. Neither of them affords any clue to the situation of Cana. All we can gather is, that it was not far from Capernaum (John ii. 12, iv. 45), and also on higher ground, since our Lord went down (σαρπίζω) from the one to the other (ii. 12). No further help is to be obtained from the notices either of Josephus (Vit. § 16; B. J. i. 17, § 9) — even if the place which he mentions be the same — or of Eusebius and Jerome in their Onomasticon.

The traditional site is at Κέφρονα, a small village about 4½ miles northeast of Nazareth. It contains only the ruins of a church said to stand over the house in which the miracle was performed, and — doubtless much older — the fountain from which the water for the miracle was brought (Μελίν., iii. 443-6). The Christians of the village are entirely of the Greek Church. The "water-pots of stone" were shown to M. Lamartine, though at St. Willibrold's visit centuries before there had been but one remaining (Early Trav. 16). In the time of the Crusades, the six jars were brought to give the distant people a water supply still to exist in the Musee d'Angers (see M. Didron's Essays in the Annales Archéologiques, xi. 5, xii. 2).

The tradition identifying Κέφρονα with Cana is certainly of considerable age. It existed in the time of Willibrold (the latter half of the 9th cent.), who visited it in passing from Nazareth to Tabor, and again in that of Phocas (12th cent. See Rekand, 880). From that time until lately the tradition appears to have been unchanged. But even by Quaresminus the claims of another site were admitted, and these have been lately brought forward by Dr. Robinson with much force. The rival site is a village situated further north, about 5 miles north of Seffarvich (Sepphoris) and 9 of Nazareth, near the present Jezfal, the Jotapata of the Jewish wars. This village still bears the name of Kāban el-Jelil (قانا الجليل), a name which is in every respect the exact representative of the Hebrew original — as Κέφρονα, كفر كنا, is widely different from it — and it is in this fact that the chief strength of the argument in favor of the northern Kana seems to reside. The argument from tradition is not of much weight. The testimonies of Willibrold and Phocas, given above, appear to have escaped the notice of Dr. Robinson, and they certainly form a balance to those of Adrichomius and others, which he quotes against Κέφρονα (Rob. u. 346-9, ii. 108, with the note on De Saulcy; comp. Ewald, v. 147; Melin, iii. 443-6).

The Gospel history will not be affected whichever site may be discovered to be the real one. G.

* Dr. Robinson (Bibl. Res. ii. 275, ed. 1841) pronounces the addition of el-Jelil to the northern Κανά conclusive in favor of that village, most of the later writers acquiesce in this view. Thomson raises a doubt whether any such designation distinguishes the one place from the other. Of the many, he says, to whom he put the question, "only one had ever heard of the word Jelil as a part of the name; and from the hesitancy with which this one admitted it, I was left in doubt whether he did not merely acquiesce in it at my suggestion. (Land and Book, ii. 121.)" Mr. Picken (Holy Land, 393) has a long note in which he contends for the other Κανά in opposition to Robinson's view. It is impossible to say which of these villages was the scene of the first miracle. Both of them are near enough to Nazareth to make them, in oriental life, parts of the same neighborhood. It has been alleged for many years that Κανά is the direct way to Capernaum. But there is not a word of proof that Jesus was going down to Capernaum at the time; he was at Cana, wherever it was, because he and his disciples had been invited there to attend the marriage (John ii. 2). Nor if he went down to Capernaum from Cana immediately after the marriage (which is not certain — since μετά τοῦ γάμου, John ii. 12, may mark that movement as only relatively subsequent) does the expression "going in the same anything;" for it would be topographically exact whether he went from the one Κανά or the other. Nor does the nobleman's coming to him at Cana, from Capernaum, to intercede for his son (John iv. 46 ff.) decide the question; for it is merely said that on hearing that Jesus had returned to Galilee from Judea, he came to him where he was — of course, whether the Cana in which he found him was the nearer or the more distant place.

Stanley (Notices of Localities, &c., p. 188) suggests that Cana may have been one of the Galilean homes of Jesus; but his going thither on the return from Judea (John iv. 43 ff.) so far from favoring this, is rather opposed to it. The reason assigned for doing so, namely, that "a prophet is not without honor save in his own country," explains in effect why he avoided Nazareth (his σαρπίζω), to which he might have been expected to go, and went to Cana, a place having so much less interest for him.

CANAAN (CA'NAAN = C'na'an; comp. the Greek name Χαναάν, as mentioned below) [four, humbled]: [Xanana: Jos. Xananan: Channah]. 1. The fourth son of Ham (Gen. x. 6; 1 Chr. i. 8; comp. Jos. Ant. i. 6, § 4), the progenitor of the Phœnicians ("Zidon"), and of the various nations who before the Israelite conquest peopled the seacoast of Palestine, and generally the whole of the country westward of the Jordan (Gen. x. 15; 1 Chr. i. 13). [CANAAN, LAND OF; CANAANITES.]

In the ancient narrative of Gen. ix. 20-27, a curse is pronounced on Canaan for the unfaithful and irreverential conduct of Ham: it is almost as if the name had belonged to both, or the father were already in the same condition.

2. The name "Canaan" is sometimes employed for the country itself — more generally styled the "land of C.", It is so in Zeph. ii. 5; and we also find "Language of C." (Is. xix. 18): "Wars of C." (Judg. iii. 1): "Inhabitants of C." (Ex. xv 15): "King of C." (Judg. iv. 2, 23, 24, v. 19): "Daughters of C." (Gen. xxvii. 1, 6, 8, xxxvi. 2): "Kings of C." (Js. xxxv. 11). In addition to the above, the word occurs in several passages in which it is concealed in the A. V. by being transliterated. These are: Is. xxiii. 8, "traffickers," and xxiii. 11, "the merchant city;" Gesenius, "Jehovah gah Befehl über Canaan:" Hos. xii. 7, "Ile is a merchant;" Ewald, "Kanân hält trügerische Wage:" Zeph. i. 11, "merchant-people;" Ewald, "dass alle Cananier sind dafinn." G.

CANAAN, THE LAND OF (CA'NAAN), "from a root 2237, signifying to be low, see 2 Chr. xxviii. 19; Job xli. 12, amongst other passages in which they do is used, a name denoting the cou-
CAANAN

zy west of the Jordan and Dead Sea, and between those waters and the Mediterranean; specially opposed to the "land of Gilead," that is, the high table-land on the east of the Jordan. Thus: "our little ones and our wives shall be here in the cities of Gilead . . . but we will pass over armed into the land of Canaan" (Num. xxvii. 2, 22; and see xxxii. 51). "Phineas, . . . returned from the children of Reuben and the children of Gad out of the land of Gilead into the land of Canaan to the children of Israel," Josh. xxi. 32: see also Gen. xii. 5, xxii. 18, xxxii. 18, xxxv. 12, xxxvi. 1. In, viii. 3, 7, xix. 30; Num. xiii. 2, 17, xxxii. 40, 61; Josh. xii. 2; Judg. xxi. 12. True, the district to which the name of "low land" is thus applied contained many very elevated spots: Shechem (Gen. xxxii. 18), Hermon (xxxi. 19), Bethel (xxxv. 6), Bethlehem (xviii. 7), Shilo (Josh. xxi. 2; Judg. xxi. 12), which are all stated to be in the "land of Canaan." But high as the level of much of the country west of the Jordan undoubtedly is, there are several things which must always have prevented, as they still prevent, it from leaving an impression of elevation. These are, (1) that remarkable, wide, maritime plain over which the eye ranges for miles from the central hills; a feature of the country which cannot be overlooked by the most casual observer, and which impresses itself most indelibly on the recollection; (2) the still deeper, and still more remarkable and impressive hollow of the Jordan valley, a view into which may be commanded from almost any of the heights of central Palestine: and (3) there is the almost constant presence of the long high line of the mountains east of the Jordan, which from their distance have the effect more of an immense cliff than of a mountain range — looking down on the more broken and isolated hills of Canaan, and furnishing a constant standard of height before which everything is dwarfed.

The word "Canaanite" was used in the 0. T. in two senses, a wanderer and a narrower, which will be most conveniently examined under that head; but it does not appear to be the case of "Canaan," at least in the older cases of its occurrence. It is only in later notices, such as Zeph. ii. 5, and Matt. xv. 22, that we find it applied to the low maritime plains of Philistia and Phenicia (comp. Mark vii. 26). In the same manner it was by the Greeks that the name Xrh. Oew, was used for Phenicia, i.e. the sea-plain north of the "Tyrian hither," (see the extract in Reland, 7. and Gesenius, 466), and by the later Phenicians both of Phenicia proper and of the Panitic colonies in Africa. (See the coin of Ludwico ad Libit. and the testimony of Augustine, both quoted by Gesenius, 466.) The LXX. transcribers had learnt to apply this meaning to the word, and in two cases they render the Hebrew words given above by Χάρα των Φήνεων (Ex. xvi. 56; Josh. v. 12, comp. v. 1), as they do "Canaanites" by φηνείον.

* CANAAN, LANGUAGE OF, Is. xix. 8. See CANAANITES: HAM.

CA'NAANITES. THE. (Ree. T. & Kappar thi.) A. Canaaniti; Lachm. [Tisch. Teg,] with B v. Kapparos: D [in Matt.], Kapparos: Ché-nanans, the designation of the Apostle Simon, zonwinik known as "Simon the Zealot." It occurs in Matt. x. 4; Mark iii. 18.

The word does not signify a descendant of Ca-

num, that being in the Greek both of the LXX. and the N. T. Xapaaneos = Χαράτων (comp. Matt. xv. 22 with Mark vii. 26). Nor does it signify, as has been suggested, a native of Kara, since that would probably be Kàrôthy. But it comes from a Chaldee or Syriac word, Xara'at, Kanàán, or Ξέαρατ [ξέαρατ], Kanâni, (2), by which the Jewish sect or faction of the "Zealots" so prominent in the last days of Jerusalem was designated (see Buxtorf, Lex. [Tobin's] s. v.). This Syriac word is the reading of the Peshito version. The Greek equivalent of Kanàán is Ἰψίατος, Zeolites, and this St. Luke (vi. 15; Acts i. 13) has correctly preserved. St. Matthew and St. Mark, on the other hand, have literally transferred the Syriac word, as the LXX. translators did frequently before them. There is no necessity to suppose, as Mr. Cureton does (Nitr. Rec. lxxvii.), that they mistook the word for ξέαρατ [ξέαρατ].

= Xaraaneos, a Canaanite or descendant of Ca-

nan, who was called by his countrymen "the Zealots" because of his former zeal in behalf of Judaism. As there was another Simon among the Apostles, he appears to have retained the name after he became a disciple, as a means of distinction, though it had ceased to mark the trait of character out of which it arose. It has been said that he took the appellation from his having belonged to a political sect known as the Zealots, mentioned by Josephus (B. J. iv. 3, § 9); but though he may have shown some of the tendencies of character, the party historically distinguished by that name did not appear till a later period. See Wetstein's Nov. Test. i. 396.

I. CA'NAANITES, THE (ξέαρατοι), i.e. accurately according to Hebrew usage — Gesen. Heb. Gram. § 107 — "the Canaanite;" but in the A. V. with few exceptions rendered as plural, and therefore indistinguishable from ξεαρατοι, which also, but very un freq. occurs: Xaraaneos, Fovit; Ex. vi. 15, comp. Josh. v. 1: Chanaanites, a word used in two senses: (1) a tribe which inhabited a particular locality of the land west of the Jordan before the conquest; and (2) in a wider sense, the people who inhabited generally the whole of that country.

1. For the tribe of the Canaanites only — the dwellers in the lowland. The whole of the country west of Jordan was a lowland as compared with the loftier and more extended tracts on the east; but there was a part of this western country which was still more emphatically a lowland. (a.) There were the plains lying between the shore of the Mediterranean and the foot of the hills of Benja, Judea, and Ephraim — the Shephelah or plain of Philistia on the south — that of Sharon
between Jaffa and Carmel — the great plain of Edra-
leon in the rear of the bay of Akka; and lastly, the
plain of Phoenicia, containing Tyre, Sidon, and all
the other cities of that nation. (b) But such
areas are given now from these last to the still larger
region of the Jordan valley or Aralah, the modern Ghor,
a region which extended in length from the sea of
Cinneroth (Gennesareth) to the south of the Dead
Sea about 120 miles, with a width of from 8 to 14.
The climate of these sunken regions — especially of
the valley of the Jordan — is so peculiar, that it is
natural to find them the special possession of one
tribe — Amorite — so far as one of the earliest
and most precise statements in the ancient records of
Scripture — "Amalek dwells in the land of the
south; and the Hittite, and the Jebusite, and the
Amorite, dwell in the mountains; and the Canaan-
ite dwells by the sea, and by the side of Jordan" (Num. xiii. 29). This describes the division of
the country a few years only before the conquest.

But there had been little or no variation for cen-
turies. In the notice which purports to be the
earliest of all, the seats of the Canaanite tribes
as distinguished from the sister tribes of Zidon,
the Hittites, Amorites, and the other descendants
of Canaan — are given as on the seashore from
Zidon to Gaza, and in the Jordan valley to Sodom,
Gomorrah, and Lasha (afterwards Cælebrioh), on the
shore of the present Dead Sea (Gen. x. 18-29). In
Josh. xi. 3 — at a time when the Israelites were
actually in the western country — this is expressed
more broadly: "The Canaanite on the east and
the west" is carefully distinguished from the
Amorite who held "the mountain" in the centre of
the country. In Josh. xii. 2, 3, we are told
with more detail that "all the circles" (חַ֣תִיתותּרֵא
from Sibor (the Wady el-Arish) unto Ekron northward, is counted to
the Canaanite." Later still, the Canaanites are still
dwelling in the upper part of the Jordan Valley
— Bethshean: the plain of Edraleon — Taanach,
Bleam, and Megiddo: the plain of Sharon — Dor;
and also on the plain of Phoenicia — Achzib and
Zidon. Here were collected the chariots which
formed a prominent part of their armies (Judg. i.
19, iv. 3; Josh. xvi. 18), and which could indeed be
deployed elsewhere in those level lowlands (Sta-

The plains which thus appear to have been in
possession of the Canaanites specially so called,
were not only of great extent: they were also the
richest and most important parts of the country,
and it is not unlikely that this was one of the rea-
sons for the name of "Canaanite" being

2. Applied as a general name for the non-Israeli-
ite inhabitants of the land, as we have already seen
was the case with Canaan. Instances of this are, Gen. xii. 6; Num. xxi.
3 — where the name is applied to dwellers in the
south, who in xii. 29 are called Amalekites; Judg.
i. 10 — with which comp. Gen. xiv. 13 and xiii. 18, and Josh. x. 5, where Hebron, the highest land in
Palestine, is stated to be Amorite; and Gen. xiii.
12, where the "land of Canaan" is distinguished from
the very Jordan valley itself. See also Gen.
xxiv. 3, 37, comp. xxviii. 2, 6; Ex. xiii. 17, comp.
5. But in many of its occurrences, it is difficult
to know in which category to place the word. Thus
in Gen. i. 11: if the floor of Atrad was at Beth-
hogla, close to the west side of the Jordan, "the
Canaanites" must be intended in the narrower and
stricter sense; but the expression "inhabitants of
the land" appears as if intended to be more gen-
eral. Again, in Gen. x. 18, 19, where the present
writer believes the tribe, in an amended form, this
verse stands, "the tribes of Canaan possess these
places at which the various records thus compared
were composed. And besides this, it is difficult to
imagine what accurate knowledge the Israelites can
have possessed of a set of petty nations, from whom
they had been entirely removed for four hundred
years, and with whom they were now again brought
into contact only that they might exterminate them
as soon as possible. And before we can solve such
questions we also ought to know more than we do
of the usages and circumstances of people who dif-
fered not only from ourselves, but also possibly in
a material degree from the Orientals of the present
day. The tribe who possessed the ancient city of
Hebron, besides being, as shown above, called inter-
changeably Canaanites and Amorites, are in a third
passage (Gen. xxviii.) called the children of Hitthi or
Hittites (comp. also xxvii. 46 with xxviii. 1, 6).
The Canaanites who were dwelling in the land of
the south when the Israelites made their attack on
it, may have been driven to these higher and more
barren grounds by some other tribes, possibly by
the Philistines who displaced the Avites, also
dwellers in the low country (Deut. ii. 23).

Be (see their chartals (see above) we have no
clue to any manners or customs of the Canaanites.
Like the Phoenicians, they were probably given
to commerce; and thus the name became probably in
later times an occasional synonym for a merchant
(Job xii. 6; Prov. xxx. 24; comp. Is. xxiii. 8, 11;
 Hos. xi. 7; Zeph. i. 11. See Kenrick, Phen. p.
232).

Of the language of the Canaanites little can be
said. On the one hand, being — if the genealogy of
Gen. x. be right — Hamites, there could be no
affinity between their language and that of the Is-
raelites, who were descendants of Shem. On the other
is the fact that Abram and Jacob shortly after
their entrance to the country seem able to hold
vexed with them, and also that the names of
Canaanite persons and places which we possess,
are translatable into Hebrew. Such are Melchize-
dek, Hamor, Shechem, Sisera . . . Ephrath, and
also a great number of the names of the Canaanites.
But we know that the Egyptian and Assyrian names
have been materially altered in their adoption into
Hebrew records, either by translation into Hebrew
equivalents, or from the impossibility of accurately
rendering the sounds of one language by those of
another. The modern Arabs have adopted the He-
brew names of places as nearly as would admit of
their having a meaning in Arabic, though that
meaning may be widely different from that of the
Hebrew name. Examples of this are Beit-ar, Beil
Iohn, Bir es-Sheh, which mean respectively, "house
of the eye," "house of flesh," "well of the lion,"
while the Hebrew names which these have super-
seeded mean "house of caves," "house of bread,"
"well of the oath." May not a similar process
have taken place when the Hebrews took possession
of the Canaanite towns, and "called the lands after
their own names with which they were given?" (For an examination of this
interesting but obscure subject see Gesenius, Heb-
Spr., pp. 223-5.)

The "Nethinim" or servants of the temple seem
to have originated in the dedication of captives
CANDACE

The oppidum in and quod island in the lists of their families which we possess in Exx. ii. 43-54; Neh. vii. 46-50. Several of the names in these catalogues—such as Siara, Mehumon, Nebushifin—are the same as those which we know to be foreign, and doubtless others would be found on examination. The subject perhaps would not be beneath the examination of a Hebrew scholar.

This is perhaps the proper place for noticing the various shapes under which the formula for designating the nations to be expelled by the Israelites is given in the various books.

1. Six nations: the Canaanites, Hittites, Amorites, Perizzites, Hivites, and Jebusites. This is the usual form, and, with some variation in the order of the names, it is found in Ex. iii. 8, 17, xxiii. 23, xxxii. 2, xxxiv. 11; Dent. xx. 17; Josh. ix. 1, xii. 8; Judg. iii. 5. In Ex. xiii. 5, the same names are given with the omission of the Perizzites.

2. With the addition of the Girgazites, making up the mystic number seven (Dent. vii. 1; Josh. iii. 6, xxxiv. 11). The Girgazites are reduced to four, and the Hivites omitted in Neh. ix. 8 (comp. Ex. ix. 1).

3. In Ex. xxiii. 28, we find the Canaanite, the Hittite, and the Hivite.

4. The list of ten nations in Gen. xv. 19-21 includes some on the east of Jordan, and probably some on the south of Palestine.

5. In 1 K. ix. 20 the Canaanites are omitted from the list.

CANDACE (κανδασκ, Strab. xvii. p. 820), a queen of Ethiopia (Meroë), mentioned Acts viii. 27. The name was not a proper name of an individual, but that of a dynasty of Ethiopian queens. (See Plin. vi. 35; Dion Cass. liv. 5; Strab. l. c.) The eunuch of this queen, who had charge of all her treasure, is mentioned in Acts as having been met by Philip the Evangelist on the desert road from Jerusalem to Gaza, and converted to Christian. The Ethiopian tradition gives him the name of Indich; and in Iren. iii. 12, and Euseb. H. E. ii. 1, he is said to have first propagated the gospel in Arabia Felix and Ethiopia, but Sophronius makes him preach and suffer martyrdom in the island of Ceylon. (See Wolf, Curt. ii. 113.)

The foregoing is the generally received view, but is subject still to some doubt. Of the writers to whom appeal is made, Strabo (xvii. 2. § 3) says expressly that the inhabitants of Meroë appointed kings (βασιλεία) as their sovereigns, and appoint them for their personal qualities, being therefore elective, and not hereditary: and also that the royal residence of Candace was Napata (ταύρος ἵππος ταυροκριτ), a different place from Meroë, eighty-six geographical miles farther north. Dion Cassius (liv. 5, though he writes erroneously queen for a king, who bore this title to Napata, and not Meroë. In accordance with these notions, Kaulfrum (Herod. ii. 41) makes Napata the capital of one part of Ethiopia, and Meroë the seat of another independent kingdom. The passage in Pliny (Hist. Nat. vi. 55) does not disagree with this conclusion, though it is chiefly his language that has misled readers, if they have fallen into error here. The words are the following: "Napata LXX. Ch. mill.; oppidum id parum inter pristinam sunt. Abro ad insulam Meronem Cocc. LXX. M. Herbas sicra Meronem densum virofiores, silvarumque aliquip aparissae et rhinocerotorum elephantofoe vestigia. Ipsum oppidum Meronem ad introitus insula absese LXX. Mill. passum; iuxtaque altum Insulam Tadu dextris submersione abvo, quae portum faceret. Edifio oppidi paucam. Regnum fruatur Candace, quasi regni. Ludis jugis annis ad regnum transit." If "edificia oppidi" refers to "Me-
roëm," just before, then "regnare Candacem" does of course, and Candace reigned in the city and island of that name. But, on the other hand, Meroë was an important city, and could not well be said to consist of "a few buildings," and Napata might be so described; and hence, as some suppose, Pliny at this point goes back to the remoter Napata, of which he has already spoken as "parvum," and so much the more as that is uppermost in the mind, as being the place from which he reckons the situation of the other places named.

Others suppose that Napata was only one of the capitals of Meroë, and that Strabo and Dion Cassius speak of Candace in connection with the former place rather than the latter, because she had a noted palace there. It follows, then, to make the conciliating here complete, that Strabo must mean by "Tadu" and "KofsoKrrs," a place of both sexes. Ritter (Freudcnau, i. 592, 2d ed.) regards the Napata of Pliny as a different place from that of Strabo. For a fuller statement of the case, the reader is referred to J. C. M. Laurent's Nuntiastitichae Studia, pp. 140-146 (Gotth, 1866); and Bibl. Sacra, 1866 pp. 515-16.

The name Candace, says Rheteschi (Herzog's Real-Encycl. vii. 247), appears not to be of Semitic origin, at least no satisfactory etymology has yet been assigned for it. The supposition that the Candace in Acts viii. 27 was the one who fought against the Romans n. c. 22 (Strabo, xvii. 1, § 54) is just possible, so far as the dates are concerned, but has every presumption against it. Some of the commentators suppose her to have been the same; in which case she must have reigned under the emperor Tiberius, and have been nearly ninety years old at the time of Philip's being in the eunuch's sight. Pliny's statement that Candace was a transmitted title of these Ethiopian queens renders so violent a supposition needless.

CANDACEM 1 (κανδασκα: λακωνία του φαρ- τος, 1 Mac. i. 21; αδικημένος — λακώνιος λατ- θερος και κανδασκα: ἐν τῇ βάσιν του φαρτος, Βιβλ. Sic. ap. Selinus. Thuc. v. v.), which Moses was commanded to make for the tabernacle, is described Exx. xxx. 31-37, xxxvii. 17-24. It is called in Lev. xxiv. 4, "the pure," and in Ezek. xxxvi. 21, "the holy candlestick." With its various appurtenances (mentioned below) it required a talent of "pure gold," and it was not made, but "of leavened work." (punctor). Josephus, however, says (Ant. iii. 6, § 7) that it was of cost gold (εκσκευασμενον, and hollow. From its golden base (7:14 βαρες, Josephs.), which, according to the Jews, was 3 feet high (Winer, Lex.), sprang a main shaft or reed (7:15), and spread itself into as many branches as there are planets, including the sun. It terminated in 7 heads in all one row, all standing parallel to one another, one by one, in imitation of the number of the planets" (Whiston's Jes. Des)
as the description given in Ex. is not very

clear, we abbreviate Lightfoot's explanation of it.

The foot of it was gold, from which went up a
shaft straight, which was the middle light. Near
the foot was a golden dish wrought almondwise;
and a little above, a golden knob, and above
that a golden flower. Then two branches, one
on each side, bowed, and coming up as high as the
middle shaft. On each of them were three golden
cups placed almondwise, on sharp, scollop-shell
fashion; above which was a golden knob, a golden
flower, and the socket. Above the branches on
the middle shaft was a golden boss, above which rose
two shafts straight; above the boss, and two more shafts, and then on
the shaft upwards were three golden scollop-cups,
a knob, and a flower: so that the heads of the
branches stood an equal height" (Works, ii. 399,
ed. Pitman). Calmet remarks that "the number
7 might remind them of the sabbath." We have
seen that Josephus gives it a somewhat Egyptian
reference to the number of the planets, but else-
where (B. J. vi. 7, § 5) he assigns to the 7
branches a merely general reference, as τῆς παρα-
τος Ἰουδαίων ἐθνομάδως τῶν τιμής ἐμφανισθε-
νές. The whole weight of the candlestick was 160
minas; its height was, according to the Rabbis, 5
feet, and the breadth, or distance between the ex-
terior branches 33 feet (Jahn, Arch. Bild. § 329).
It has been calculated to have been worth 5000d.
exclusive of workmanship.

According to Josephus the ornaments on the
shaft and branches were 70 in number, and this
was a notion in which the Jews with their peculiar
reverence for that number would readily coincide;
but it seems difficult from the description in Exodus
to confirm the statement. On the main shaft
(called "the candlestick," in Ex. xxv. 34) there
is said to be "4 almond-shaped bowls," with their
knops and their flowers," which would make 12
of these ornaments in all; and as on each of the 6
branches there were apparently (for the expression
in verse 33 is obscure) 3 bowls, 5 knops, and 3
flowers, the entire number of such figures on the
candlestick would be 96. The word translated
"bowl" in the A. V. is ποτηρὶ, κρασίν, for which
Joseph. (l.c.) has κρασίνιδα καὶ βασίσκον.
It is said to have been almond-shaped (ποτηριον, ἐκτετ-
pωμένον καρπον), but whether the fruit or flower
of the almond is intended cannot be certain. The
word "ποτηρῖς is variously rendered "knop" (A.
V.), "pommeled" (Geddes), σφαιρίτης (LXX.),
σφερίτα (Vulg.), "apple" (Arabic, and other ver-
sions); and to this same apply the βασίσκον, and
not (as is more natural) the σφαιρία of Josephus.

The third term is ποτηρῖ, "a bud," κρίνα (LXX.
and Joseph.), which from an old gloss seems to be
put for any κύτος εἰσωδέαν, κρίνον ὄμοιον.
From the fact that it was expressly made "after
the pattern shown in the mount," many have en-
deavored to find a symbolic meaning in these or-
naments, especially Meyer and Bähr (Symbol. i.
416 ff.). Generally it was "a type of preaching"
(Godwyn's Meas and Aaron, ii. 1) or "of the
light of the law" (Lightfoots, l. c.). Similarly
candlesticks made of such figures were the property
of the Church, of witnesses, &c. (Comp. Zech. iv.
Rev. 1. 5, xi. 4, &c.; Weyenas, Chir. Symbol. v. s.)

The candlestick was placed on the south side of
the first apartment of the tabernacle, opposite the
table of shew-bread, which it was intended to ill-
lumine, in an oblique position (λαοίς) so that the
lamps looked to the east and south (Joseph. Ant.
i. 6, § 7; Ex. xxv. 57); hence the central was
called "the western" lamp, according to some
though others render it "the evening lamp," and
say that it alone burned perpetually (Ex. xxvii. 20,
21), the others not being lit during the day, al-
though the Holy Place was dark (Ex. xxx. 8; 1
Macc. iv. 50). In 1 Sam. iii. 3 we have the ex-
pression "ere the lamp of God went out in the
temple of the Lord," and this, taken in connection
with 2 Chr. xiii. 11 and Lev. xxiv. 2, 3, would
seem to imply that it "always" and "continually:" merely mean "temporae constitute," i. e. by night:
especially as Aaron is said to have dressed the lamps
every morning and lighted them every evening.
Rabbi Kimichi (ad loc.) says that the other lamps
often went out at night, but "they always found the
western lamp burning." They were each sup-
plied with cotton, and half a log of the purest
olive-olive (about two wine-glasses), which was suf-
ficient to keep them burning during a long night
(Winer).

The priest in the morning trimmed the lamps
with golden snuffers (ἐνσωματικές, ἐσωματικές,
and carried away the snuff in golden
dishes (ὑπόθεματα, ἀκορες, Ex. xxv.
38). When carried about, the candlestick was cov-
cered with a cloth of blue, and put with its append-
ages in bagger-skin bags, which were supported on
a bar (Num. iv. 9).

In Solomon's temple, instead of this candlestick
(or besides it, as the Rabbits say, for what became
of it we do not know), there were 10 golden can-
dlesticks similarly embossed, 5 on the right and 5
on the left (1 K. vii. 49; 2 Chr. iv. 7). These are
said to have formed a sort of railing before the
vail, and to have been connected by golden chains,
under which, on the day of atonement, the high-
priest carried. They were taken to Babylon (Jer.
lili. 19).

In the temple of Zerubbabel there was again a
single candlestick (1 Macc. i. 21, iv. 49). It was

Candlestick. (From A-nh of Titus.)

taken from the Herodian temple by Titus, and car-
ried in triumph immediately before the conqueror
CANDLESTICK (Joseph, B. J. vii. 5, § 5). The description given of the καίδα and λεβάντα καλώδια by Josephus, agrees only tolerably with the deeply interesting sculpture on the Arch of Titus; but he drops a hint that it was not identical with the one used in the Temple, saying (possibly in allusion to the fantastic griffins, &c., sculptured on the pediment, which are so much wrought that we found it difficult to make them out), τὸ ἔργον εἴδωλον τύπον κατὰ τέρας μετέτραπε κρόσον συνάφειαν: where see Whiston's note. Hence John (Hibiscus, Comm., § 615.) says that the candlewick carried in the triumph was "somewhat different from the golden candlestick of the temple." These questions are examined in Rolland's treatise De Spolia Titani Hierosol. In Arch Titimae Conspectus. The general accuracy of the sculpture is undoubted (Prideaux, Comment., B. i. 166).

After the triumph the candlestick was deposited in the Temple of Peace, and according to one story fell into the Tiber from the bridge during the flight of Maxentius from Constantine, Oct. 28, 312 A.D.; but it probably was among the spoils transferred, at the end of 400 years, from Rome to Carthage by Genseric, A. D. 455 (Gibbon, iii. 291). It was recovered by Belarius, since more carried in triumph to Constantinople, "and then respectfully deposited in the Christian church of Jerusalem" (ibid. iv. 24), A. D. 533. It has never been heard of since.

When our Lord cried "I am the light of the world" (John viii. 12), the allusion was probably suggested by the two large golden chandeliers, lighted in the court of the women during the Feast of Tabernacles, which illuminated all Jerusalem (Wetstein, ad loc.), or perhaps to the lighting of this colossal candlestick, "the more remarkable in the profound darkness of an Oriental town" (Stanley, Notes of P. p. 429).

F. W. F. *

* According to the description given in Ex. xxv. 31-37, the candelabrum, or chandelier, of the tabernacle (improperly called candlestick in the common English version) was constructed as follows:

From a base or stand (called Παιδία, properly the upper portion of the thigh where it joins the body, and hence, naturally, the support on which a structure rests) rose an upright central shaft (Πυραμιδι, a reed, cane) bearing the central lamp; from two opposite sides of it proceeded other shafts (Πυραμιδι, three on a side, making six branches from the main shaft, all being in the same plane with it, and each bearing a lamp.

As parts of the main shaft and its branches, serving for ornaments of the structure, are mentioned flower-cups (Πυτίμα, properly a cup or bowl, hence, the calyx or outer covering of a flower), capitula (Πυτιτημια, crown of a column, its capital, Am. ix. 1; Zeph. ii. 14), and flowers (Πυραμιδι). In shape, the capital may have had the rounded form of fruit, as indicated in some of the ancient versions and Josephus.

From the representation in verses 32-35, these parts were to have been arranged as follows; Each of the six side-branches (vers. 33) had three flower-cups (calyces) shaped like the calyx of the almond blossom, and terminated in a crown or capital, with its ornamental flower, as a receptacle for the lamp. The central shaft (vers. 34, 35) was composed of four such combinations of calyx, capitul, and flower, each pair of side-branches resting on the capital (ver. 35) of one of the three lower, the fourth and uppermost bearing the central lamp.

As thus understood, the passage is interpreted according to its strictest grammatical construction, and each term is taken in its ordinary acceptance in the Hebrew Scriptures. The form, as thus represented, is more syntactical than the one sculptured on the Arch of Titus, which plainly conflicts with some points in the description, and has no historical chain to represent the form of the candelabrum of the first Hebrew tabernacle.

Whether the lamps were all on the same level, as supposed to be represented on the Arch of Titus (for the central shaft is defaced at the top), whether the central lamp was highest, as supposed by Ewald, and whether the seven lamps were arranged in a pyramidal form, as supposed by Seachius, is matter of mere speculation. But on either of the two latter suppositions, the structure is not only more synthetically artistic in itself, but harmonizes better with the designation of the central shaft by the general name of the whole (Πυραμιδι, in ver. 34), the other parts being only its subordinate appendages. Keil, in the Bibl. Commentar. of Keil and Delitzsch, and in his Archæologia, where an engraved representation is given, arbitrarily reverses the order of the Πυτιτημια and the Πυτιτημια, as given three times in the Hebrew text.

The term candeliK (A. V.) is obviously inappropriate here. It is also improperly used in the New Testament in passages where lamp-stand is meant by the Greek word (Αυθρία). As to the allusion in our Saviour's words, "I am the light of the world," it has been shown by Lickie (who examines the subject minutely), and by Meyer, that they could not have been suggested by the lighting of the lamps in the temple. On the contrary, there is a manifest reference to the repeated and familiar predictions of the Messiah, as "a light of the Gentiles" (Is. xlix. 6, xlix. 6), as "the Sun of righteousness" (Mal. iv. 2), which allusion is made in Luke i. 78, 79, as "the day spring from on high," "to give light to them that sit in darkness." Comp. Matt. iv. 16; Luke ii. 32.

CANE. [Reed.]

CANKERWORM. [Locust.]

CANNEH (Πυραμιδι), one Codex Πυραμιδι, Xuar-ανα; Alex. Xuanan: Chere), Ex. xxvii. 23. [Cal- neh.]

CANON OF SCRIPTURE, THE, may be generally described as "the collection of books which forms the original and authoritative written rule of the faith and practice of the Christian Church." Starting from this definition it will be the object of the present article to examine shortly, I. The original meaning of the term; II. The Jewish Canon of the Old Testament Scriptures as to (a) its formation, and (b) its extent; III. The Christian Canon of the Old; and IV. of the New Testament.

1. The use of the word Canon.—The word Canon (Κανών) akein to Πυτι, [cf. Gesen. Thes. s. v.], κανών, κανών, κανών (cana, channel), cane, cannon) in classical (Greek is (1.) properly a straight rod, as the rod of a shield, or that used in weaving
The usage offers an easy transition to the metaphorical use of the word for a testing rule in ethics (comp. Arist. Eth. Nic. iii. 4, 5), or in art (the Canon of Polydectus; Luc. de Sult. p. 946 B.), or in language (the Canons of Grammar). The varied gift of tongues, according to the ancient interpretation of Acts ii., was regarded as the "canon" or test which determined the direction of the labors of the several Apostles (Severian. ap. Cram. Cat. in Act. ii. 7, οι διήθες έκκλησίας καθήνει κανόνα). Chronological tables were called κανώνες χρονικοί (Plut. Sol. p. 27); and the summary of a book was called κανόνα, as giving the "rule," as it was, of its composition. The Alexandrian grammarians applied the word in this sense to the great "classical" writers, who were styled "the rule" (διά Κανόνα), or the perfect model of style and language. (3.) But in addition to these active meanings the word was also used passively for a measured space (at Olympia), and, in later times, for a fixed tax (Du Cange, s. v. Canon).

The ecclesiastical usage of the word offers a complete parallel to the classical. It occurs in the LXX. in its literal sense (Jud. xiii. 6), and again in Aquila (Job xxxviii. 5). In the N. T. it is found in two places in St. Paul's epistles (Gal. vi. 16; 2 Cor. x. 13-16), and in the second place the transition from an active to a passive sense is worthy of notice. In patristic writings the word is commonly used both as a "rule" in the widest sense, and especially in the phrases "the rule of the Church," "the rule of faith," "the rule of truth" (διά Κανόνα τῆς έκκλησίας, διά Κανόνα τῆς άληθείας, διά Κανόνα τῆς πίστεως) and so also κανώνη δικαιοσύνης (διά Κανόνα simply). This rule was regarded either as the abstract, ideal standard, embodied only in the life and action of the Church; or, again, as the concrete, definite creed, which set forth the facts from which that life sprung (regula: Tertull. de Virg. eccl. 1). In the fourth century, when the practice of the Church was further systematized, the decisions of synods were styled "Canons," and the discipline by which ministers were bound as technically the "Law," and those who were thus bound were styled Canonici (Canons). In the phrase "the canon (i.e. fixed part) of the mass," from which the popular sense of "canonize" is derived, the passive sense again prevailed.

As applied to Scripture the derivatives of κανόνα are used long before the simple word. The Latin translation of Origen speaks of Scripturae Canonicae (de Princ. iv. 38), libri regulares (Comm. in Matt. § 117), and libri canonicizati (ib. § 28). In another place the phrase haberi in Canone (Prod. in Cont. s. f.) occurs, but probably only as a translation of κανονίζειν, which is used in this and cognate senses in Athanasius (Ep. Fest.), the Laodicean Canons (κανώνιστα, Can. lix.), and later writers. This circumstance seems to show that the title "Canonical" was first given to writings in the sense of "admitted by the rule," and not as a "form

*i. e. Credner accepts the popular interpretation, as if canonical were equivalent to "having the force of law," and supposes that scripture legis, a phrase occurring in the time of the persecution of Diocletian, represents κανονισμός, which however does not, as far as I know, occur anywhere (Zur Gesch. d. Kan. p. 67). The terms canonical and canonicize are probably of Alexandrine origin; but there is not the slightest evidence for connecting the "canon" of classical

ing part of and giving the rule." It is true that an ambiguity thus attaches to the word, which may mean only "judicially used in the Church;" but such an ambiguity may find many parallels, and usage tended to remove it.* The spirit of Christendom recognized the books which truly expressed its essence; and in lapse of time, when that spirit was rekindled by later movements of superstition, the written "Rule" occupied the place and received the name of that vital "Rule" by which it was first stamped with authority (διά Κανόνα τῆς θεοτυπίας τῆς γραφῆς, Isid. Pelus. Ep. cxxiii.; comp. Aug. de doctr. Chr. iv. 9 (6); and as a contrast Anon. ap. Euseb. H. E. v. 28).

The first direct application of the term κανόνα to the Scriptures seems to be in the verses of Amphilochius (c. 390 A. D.), who concludes his well-known Catalogue of the Scriptures with the words οὐ δεύτερος κανόνα ἐν τῷ τῶν θεοτυπικῶν γραφῶν, where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent books. Among Latin writers the word is commonly found from the time of Jerome (Proc. Gal. ... Tobias et Judith non sunt in Canone) and Augustine (De Civ. xviii. 24, ... perpaneci autem auctoribus scriptorum). When, in Catech. of c. 423 (c. 438; ... incensurant in Canone), and their usage of the word, which is wider than that of Greek writers, is the source of its modern acceptance.

The uncanonical books were described simply as "those without," or "those uncanonized" (άκανονιστά, Conc. Locd. lxxi.). The Apocryphal books, which were supposed to occupy an intermediate position, were called "books read" (άναγγελονομνημ, Athan. Ep. iv. d. 6), or "ecclesiastical" (ecclesiastici, Bini. in Synch. Apost. § 38), though the latter title was also applied to the canonical Scriptures (Leont. l. c. infra). The canonical books (Leont. de Sect. ii. τά κανόνις βιβλία βιβλία) were also called "books of the Testament" (αν διάδοχα βιβλία), and Jerome styled the whole collection by the striking name of "the holy library" (Bibliothecae sancta), which happily expresses the unity and variety of the Bible (Credner, Zur Gesch. d. Kan. p. 8 in the list of N. T. iv. 22; 5 in the list of V. T. i. 22). II. (a) The formation of the Jewish Canon. — The history of the Jewish Canon in the earliest times is beset with the greatest difficulties. Before the period of the exile only faint traces occur of the solemn preservation and use of sacred books. According to the command of Moses the "book of the law" was "put in the side of the ark" (Deut. xxxi. 25 ff.), but not in it (1 K. viii. 9; comp. Joseph. Ant. iii. i. 14, 17); and thus in the reign of Josiah, Hilkias is said to have "found the book of the law in the house of the Lord" (2 K. xxii. 8; comp. 2 Chr. xxxiv. 14). This "book of the law," which, in addition to the direct precepts (Ex. xxiv. 7), contained general exhortations (Deut. xxviii. 61) and historical narratives (Ex. xvii. 14), was further increased by the records of Joshua (Josh. xxiv. 26), and probably by other writings (1 Sam.}
view harmonizes with what must have been the natural development of the Jewish faith after the return. The Constitution of the Church and the formation of the Canon were both from their nature gradual and mutually dependent. The construction of an ecclesiastical policy involved the practical determination of the divine rule of truth, as, though in the parallel case of the Christian Scriptures, open persecution first gave a clear and distinct expression to the implicit faith.

The persecution of Antiochus (B.C. 168) was for the Old Testament what the persecution of Dio- cletian was for the New, the final crisis which stamped the sacred writings with their peculiar character. The king sought out "the books of the law" (τὰ βιβλία τοῦ νόμου, 1 Macc. i. 56) and burnt them; and the possession of a "book of the covenant" (βιβλίον διαθήκης) was a capital crime (Joseph. Ant. xii. 5, § 4, ἡμαρτανόντως τὸν βιβλίον κρύπτειν ἕκαστος καὶ νόμος . . . ). According to the common tradition, this prescription of "the law" led to the public use of the writings of the prophets, and without discussing the accuracy of this belief, it is evident that the general effect of such a persecution would be, to direct the attention of the people more closely to the books which they connected with the original foundation of their faith. And this was in fact the result of the great trial. After the Maccabean persecution the history of the formation of the Canon is merged in the history of its contents. The Bible appears from that time as a whole, though it was natural that the several parts were not yet placed on an equal footing, nor regarded universally and in every respect with equal reverence (comp. Zunz, Die göt- test. Vorles. d. Jüd., pp. 14, 25, &c.).

But while the combined evidence of tradition and of the general course of Jewish history leads to the conclusion that the Canon in its present shape was formed gradually during a lengthened interval, beginning with Ezra and extending through a part or even the whole (Neh. xii. 11, 22) of the Persian period (B.C. 438-322), when the cessation of the prophetic gift pointed out the necessity and defined the limits of the collection, it is of the utmost importance to notice that the collection was peculiar in character and circumscribed in contents. All the evidence which can be obtained, though it is confused in quantity, tends to show that it is false, both in theory and fact, to describe the O. T. as "all the relics of the Hebrew-halaldaic literature up to a certain epoch" (De Wette, Einl. § 8), if the phrase is intended to refer to the time when the Canon was completed. The epilogue of Ecclesias- tes (xii. 11 ff.) speaks of an extensive literature with which the teaching of Wisdom is contrasted, and "the books," of which it is described as the result of the study bestowed upon it. It is impossible that these "many writings" can have perished in the interval between the composition of Ecclesiastes and the Greek invasion, and the

According to some (Fabric. Cod. Persp. V. T. 116), this collection of sacred books was preserved by Jeremiah at the destruction of the Temple (comp. 2 Macc. ii. 41); according to others it was consumed with the ark (Epiph. De Pont. civ. ii. 102). In 2 K. xxiii. 8, 11, and xxiv. 4, mention is made of the Law.
P. T. 116 refers to the work of Julius Mace, in 2 Macc. ii. 14, οἱ πρῶτοι τοῦ νόμου, τα διακονικάτα, ακούσαντες αὐτῷ, to the collection of books thrown away and destroyed.

Yet the distinction between the three degrees of inspiration which were applied by Abrahambel (Kohl, Einl. § 152, 8) to the three classes of writings is unknown to the early rabbins.

After Malhevi, according to the Jewish tradition (Vitringa, De Sac. vi. 61; ap. Kohl, l. c.).
In order to make up the numbers, it is necessary either to rank Job among the prophets, or to exclude one book, and in that case probably Ecclesiastes, from the Hagiographa. The former alternative is the more probable, for it is worthy of consideration that Josephus regards primarily the historic character of the prophecies (πράξεων παρθένα σωτηρίων), a circumstance which explains his deviation from the common arrangement in regard to the later annals (1 and 2 Chr., Ezr., Neh.), and Daniel and Job, though he is literal in the latter in his narrative (comp. Orig. ap. Euseb. H. E. vi. 25). The later history, he adds, has also been written in detail, but the records have not been esteemed worthy of the same credit, "because the accurate succession of the prophets was not preserved in their case" (διὰ τοῦ γὰρ νεκροῦ τῶν προφητῶν ἀκριβῆς διαλέξεως). "But what faith we place in our own Scriptures (γραφάμας) is seen in our conduct. They have suffered no addition, diminution, or change. From our infancy we learn to regard them as decrees of God (Θεοῦ διάγνωσις); we observe them, and if need be, we gladly die for them" (c. Apion. i. 8; comp. vii. 16—18.)

In these words Josephus clearly expresses not his own private opinion, nor the opinion of his sect, the Pharisees, but the general opinion of his countrymen. The popular belief that the Sadducees received only the books of Moses (Tertull. De Præser. Hæret. 45; Hær. in Matt. xxii. 31, p. 181; Origen, c. Cels. i. 49), rests on no sufficient authority; and if they had done so, Josephus could not have failed to notice the fact in his account of the different sects (Sadducees). In the traditions of the Talmud, on the other hand, Gamaliel is represented as using passages from the Prophets and the Hagiographa in his controversies with them, and they reply with quotations from the same sources without scruple or objection. (Comp. Eichhorn, Einl. § 35; Lightfoot, Horæ Hebr. et Talm. ii. 610; C. F. Schmid, Enarr. Sent. Pl. Josephi de Lóris F. T. 1777; G. Gildenspigel, Dialect. ap. Josephi de Lóris, Cant. ii. 61.)

The casual quotations of Josephus agree with his express Canon. With the exception of Prov., Eccles., and Cant., which furnished no materials for his work, and Job, which, even if historical, offered no point of contact with other history, he uses all the other books either as divinely inspired writings (5 Moses, Is., Jer., Ezr., Dan., 12 Proph.), or as authoritative sources of truth.

The writings of the N. T. completely confirm the testimony of Josephus. Coincidences of language show that the Apostles were familiar with several of the Apocryphal books (Bleck, Ueber d. Stellung d. Apokr. u. s. w. in Stud. u. Krit. 1853, pp. 267 ff.); but they do not contain one authoritative or direct quotation from them, while, with the exception of Judges, Eccles., Cant., Esther, Ezra,

* The chief passages which Bleek quotes, after Stier and Nitzch, are James i. 19 Eccles. v. 11; 1 Pet. i. 6, 7 § Wisl. iii. 3—7; Heb. xi. 34, 35 § 2 Macc. vi. 18 — vii. 42; Heb. i. 3 § Wisl. vii. 23, &c.; Rom. i. 20—32 § Wisl. xiii.—xx.; Rom. ix. 21 § Wisl. xx. 7; Eph. vi. 13—17 § Wisl. v. 18—20. But it is obvious that if these passages prove satisfactorily that the Apostolic writers were acquainted with the Apocryphal books, they indicate with equal clearness that their silence with regard to them cannot have been purely accidental. An early critic of the alleged coincidences is given in Cosin's Canon of Scripture, §§ 55 ff.
and Nehemiah, every other book in the Hebrew Canon is used either for illustration or proof.

Much of the early fathers desire the contents of the Hebrew Canon in terms which generally agree with the results already obtained. Melito of Sardis (c. 179 A.D.) in a journey to the East made the question of the exact number and order of "the books of the Old Testament" a subject of special inquiry, to satisfy the wishes of a friend (Euseb. Hist. Eccl. iv. 26). He gives the result in the following form: the books are, 5 Moses, [Josh., Jud., Ruth, 4 K., 2 Chr., Is., Prov.] 30 (Phil. xvi. 2), or Ezekiel, 12 Proph. (Dan., Esdr., Ezra). The arrangement is peculiar, and the books of Nehemiah and Esther are wanting. The former is without doubt included in the general title "Esdras," and it has been conjectured (Eichhorn, Einl. § 52; comp. Routh, Rel. Sac. i. 136) that Esther may have formed part of the same collection of records of the history after the exile. The testimony of Origen labors under a singular difficulty; according to his Greek text (Euseb. Hist. Eccl. vi. 25; Ps. i. Philos. 3), in enumerating the 22 books "which the Hebrews hand down as included in the Testament (ευαγγέλιον)," he omits the book of the 12 minor prophets, and adds "the Letter" to the book of Jeremiah and Lamentations (Ieremiaus sive Θρόνος καὶ τῇ ἐπιστολῇ ἐν κιβ). The number is thus imperfect, and the Latin version of Rufinus has rightly preserved the book of the 12 prophets in the catalogue placing it after Cant. and before the greater prophets, a strange position, which can hardly have been due to an arbitrary insertion (cf. Hil. Pred. in Ps. 15). The addition of "the Letter" to Jer. is inexplicable on the assumption that it was an error springing naturally from the habitual use of the LXX., in which the books are united, for there is not the slightest trace that this late apocryphal fragment [Baruch, Book iv.] ever formed part of the Jewish Canon. The statement of Jerome is clear and complete. After noticing the coincidence of the 22 books of the Hebrew Bible with the number of the Hebrew letters, and of the 5 double letters with the 5 "double books" (Sam., K., Is., Ezr., Jer.), he gives the contents of the Law, the Prophets, and the Hagiographa, in exact accordance with the Hebrew authorities, placing Daniel in the last class; and adding that whatever is without the number of these must be placed among the Apocrypha. (The book of Tobit, Jordanus principalium omnibus libros de Hebraeo vertint in Latinum convenire potest, ut seire valde, quidquid extra hos est, inter Apocryphas esse ponendum, Hieron. Pred. Gal.). The statement of the Talmud is in many respects so remarkable that it must be transcribed entire.

But who wrote [the books of the Bible].? Moses wrote his own book (2 Sam. 1, the Pentateuch, the section about Balaam and Job. Joshua wrote his own book and the eight [last] verses of the Pentateuch. Samuel wrote his own book, the book of Judges and Ruth. And Samuel wrote the book of Joshua, [of which, however, some were composed] by the ten venerable elders, Adam, the first man, Melchizedek, Abraham, Moses, Haman, Jeduthun, Asaph, and the three sons of Korah. Jeremiah wrote his own book, the books of Kings and Lamentations. Hezekiah and his friends [reduced to writing] the books contained in the memorial word in Mosehi, i.e., Isaiah, Proverbs, Canticles, Ecclesiastes. The men of the great Synagogue [reduced to writing] the closing books in those memorial letters Kan. i.e., Ezekiel, the 12 lesser prophets, Daniel, and Esther. Ezra wrote his own book, and brought down the genealogies of the books of Chronicles to his own times . . . . Who brought the remainder of the books [of Chronicles] to a close? Nehemiah the son of Hachaliah (Bab. Bahrh. i. 14 b, ap. Oehler, art. Kanon, l.c.).

In spite of the comparatively late date (A. D. 500), from which this tradition is derived, it is evidently in essence the earliest description of the work of Ezra and the Synagogue which has been preserved. The details must be tested by other evidence, but the general description of the growth of the Jewish Canon bears every mark of probability. The early fables as to the work of Ezra (2 Esdras; see above) are a natural corruption of this original belief, and after a time entirely supplanted it; but as it stands in the great collection of the teaching of the Hebrew Schools, it bears witness to the authority of the complete Canon, and at the same time recognizes its gradual formation in accordance with the independent work of subsequent generations.

The later Jewish Catalogues throw little light upon the Canon. They generally reckon twenty-two books, equal in number to the letters of the Hebrew alphabet, five of the Law, eight of the Prophets (Josh., Judg., and Ruth, 1, 2 Sam., 1, 2 K., Is., Jer. and Lam., Ez., 12 Proph.), and nine of the Hagiographa (Hieron. Pred. in Reg.). The last number was more commonly increased to twenty by the distinct enumeration of the books of Ruth and Lamentation ("the 21 Books") (ירשנ), and in that case it was supposed that the Yod was thrice repeated in reverence for the sacred name (Hody, De Bibl. Text., p. 614; Eichhorn, Einl. § 56). In Hebrew Misn., and in the early editions of the O. T., the arrangement of the later books offers great variations (Hody, l.c., gives a large collection), but they generally agree in reckoning all separately except the books of Ezra and Nehemiah (Buxtorf, Hattinger, Hengstenberg, Haverbeck, l. c.; Zunz, Gotth. Vorträge d. Juden).

[a] Some passages are quoted in the N. T. which are not found in the canonical books. The most important of these is that from the prologue of Ezech [Ezech., Book of] (Jude, 11). Others have been found in Luke xi. 47-51; John vii. 23; James iv. 5, 6; I Cor. xii. 23; but these are more or less questionable.

[c] Origen expressly excludes 1 Macc. from the canon (τον δυο των 2 Macc. τα υπαρκον, although written in Hebrew. Bertholdt's statement to the contrary is incorrect (Evel. § 31), although Keil (de Auct. Can. Bibb. Macc. 67) maintains the same opinion.

[d] Notwithstanding the unanimous judgment of later writers, there are traces of the existence of doubts among the first Jewish doctors as to some books. Thus in the Misn. (Jud. 3. 5) a discussion is recorded as to Cant. and Eccles., whether they "soil the bands;" and a similar question is raised as to the books of Balaam in the great schools of Hillel and Shammoni. The same doubts as to Eccles. are repeated in another form in
So far then it has been shown that the Hebrew Canon was uniform and coincident with our own; but while the Palestinian Jews combined to preserve the strict limits of the old prophetic writings, the Alexandrine Jews allowed themselves greater freedom. Their ecclesiastical constitution was less definite, gave the same right of origin to different writings which created among them an independent literature disenchanted them to regard with marked veneration more than the Law itself. The idea of a Canon was foreign to their habits; and the fact that they possessed the sacred books not merely in a translation, but in a translation made at different times, without any unity of plan and without any uniformity of execution, necessarily weakened that traditional feeling of their real connection which existed in Palestine. Translations of later books were made (1 Macc., Euch. Baruch, &c.), and new ones were written (2 Macc., Wisd.), which were reckoned in the sum of their religious literature, and probably placed on an equal footing with the Hagiography in common esteem. But this was not the result of any express judgment on their worth, but a natural consequence of the popular belief in the doctrine of the living Word which deprived the prophetic writings of part of their distinctive value. So far as an authoritative Canon existed in Egypt, it is probable that it was the same as that of Palestine. In the absence of distinct evidence to the contrary this is most likely, and positive indications of the fact are not wanting. The translator of the Wisdom of Sirach uses the same phrase (βαπτισμός καὶ ὁ ἱερός) in speaking of his grandfather’s Biblical studies in Palestine, and of his own in Egypt (comp. Eichhorn, Exil. § 22), and he could hardly have done so, had the Bible been different in the two places. The evidence of Philo, if less direct, is still more conclusive. His language shows that he was acquainted with the Apocryphal books, and yet he does not make a single quotation from them (Hornemann, Obser. ad illustr. doct. de Can. V. T. ex Philone, pp. 28, 29), ap. Eichhorn, Exil. § 26), though they offered such a rich stock that was favorable to his views. On the other hand, in addition to the Law, he quotes all the books of the "Prophecies," and the Psalms and Proverbs, from the Hagiography, and several of them (Is., Jer., Hos., Zech., Ps., Prov.) with clear assertions of their "prophectic" or inspired character. Of the remaining Hagiography (Neh., Ruth, Lamm., 1, 2 Chron., Dan., Ezech., Cant.) he makes no mention, but the three first may have been attached, as often in Hebrew usage, to other books (Ez., Jud., Jer.), so that four writings alone are entirely unattested by him (comp. Hornemann, the Talmud (Sêho, f. 30, 2), where it is said that the book would have been concealed (722) but for the quotations at the beginning and the end. Comp. Hier. Comm. in Eccl. n. 1. 1: "Aiuit Hbrei cum inter cetera scripta Salomonis quae antiquata sunt see in memorias duraverunt, et hic libor oblitteratus videatur, ei quod sanit Bel assertos creueras ex hoc uno capitolo (xil.) meruti assuriantur te..."

Parallel passages are quoted in the notes on the passage, and by Blesch, Stud. u. Krit. 1863, 522 ff. The doors as to Esther have already been noticed.

A number of references to the Apocrypha, books from Jewish writers has been made by Hottinger (Theol. Philol. 1859), and collected and reprinted by Wordsworth (On the Canon of the Scriptures, App. C). Compare also the valuable notices in Zunz, Die gotte'se Vortr. d. Juden, pp. 129 ff.

l. c.) A further trace of the identity of the Alexandrine Canon with the Palestinian is found in the Apocalypse of Esdras [2 Esdras], where "24 open books" are specially distinguished from the mass of esoteric writings which were dedicated to Ezra by inspiration (2 Esdr. xiv. 48 f.).

From the combination of this evidence there can be no reasonable doubt that at the beginning of the Christian era the Jews had only one Canon of the Sacred writings, defined distinctly in Palestine, and admitted, though with a less definite appreciation of its peculiar characteristics, by the Hellenizing Jews of the Hesperion, and that this Canon was recognized, as far as can be determined by our books. But on the other hand, the connection of other religious books with the Greek translation of the O. T., and their common use in Egypt, was already opening the way for an extension of the original Canon, and assigning an authority to later writings which they did not derive from ecclesiastical sanction.

III. a. The History of the Christian Canon of the Old Testament.—The history of the Old Testament Canon among Christian writers exhibits the natural issue of the currency of the LXX., enlarged as it had been by apocryphal additions. In proportion as the Fathers were more or less absolutely dependent on that version for their knowledge of the Old Testament Scriptures, they gradually lost in common practice the sense of the difference between the books of the Hebrew Canon and the Apocrypha. The custom of individuals grew into the custom of the Church; and the public use of the Apocryphal books obliterated in popular regard the characteristic marks of their origin and value, which could only be discovered by the scholar. But the custom of the Church was not fixed in an absolute judgment. It might seem as if the great leaders of the Christian Body shrank by a wise forethought from a work for which they were unacquainted, if by requirements and constitution they were little capable of solving a problem which must at last depend on historical data. And this remark must be applied to the details of patristic evidence on the contents of the Canon. Their habit must be distinguished from their judgment. The want of critical tact which allowed them to use the most obviously pseudonymous works (2 Esdras, Enoch) as genuine productions of their supposed authors, or as "divine Scripture," greatly diminishes the value of casual and isolated testimonies to single books. In such cases the form as well as the fact of the attestation requires to be examined, and after this the combined witness of different Churches can alone suffice to stamp a book with ecclesiastical authority.

* The passages from the Talmud relating to Casticles and Ecclesiastes are quoted and translated in full by Ginsburg (Cochleth, Lond. 1811, pp. 13, 14, 15). The phrase used in some of these passages, "to soil (or "pollute") the hands," has often been misunderstood. As applied to a book, it signifies "to be sacred," or "canonical," not the reverse, as might naturally be supposed. This fact is clearly shown, and the reason of it given, by Ginsburg, Song of Songs, London, 1857, p. 5, note.

A.

The dream of a second and third revision of the Jewish Canon in the times of Eleazar and Hillel, by which the Apocryphal books were ratified (Geunbrard), rests on no basis whatever. The supposition that the Jews rejected the Apocrypha after our Lord's coming (Carol. Perron) is equally unfounded. Oddin, Canon of Scripture. §§ 25, 26.
The confusion which was necessarily introduced by the use of the LXX. was further increased when the Western Church rose in importance. The LXX. itself was the original of the Old Latin, and the variations among the different versions of the original between the constituent books of the Bible cannot but be more numerous and more difficult in the version of a single text; and at the same time the Hebrew Church dwindled down to an obscure sect, and the intercourse between the Churches of the East and West grew less intense. The impulse which instigated Melito in the second century to seek in the "Old Testament," an "accurate" account of the "books of the Old Testament," gradually lost its force as the Jewish national literature was further withdrawn from the circle of Christian knowledge. The Old Latin version converted use popularly into belief, and the investigations of Jerome were unable to counteract the feeling which had gained strength silently, without any distinct and authoritative sanction. Yet one important, though obscure, protest was made against the growing error. The Nazarenes, the reliefs of the Hebrew Church in addition to the New Testament, "made use of the Old Testament, as the Jews did in the Canon. (Epiph. Hier. xxix. 7). They had "the whole Law, and the Prophets, and the Hagiography so called, that is the poetical books, and the Kings, and Chronicles and Esther, and all the other books in Hebrew" (Epiph. l. c. parr' autous gar pas o nómos kai ois trógen tis kai tás geografía lexeón, faini dé sti' stigmá kai ai Vasíliakai kai Para-lestímea kai Lwthri kai pállása pálta Órhoi-kai πανωπομονημένηa. And in connection with this fact, it is worthy of remark that Justin Martyr, who drew his knowledge of Christianity from Palestine, makes no use of the apocryphal writings in any of his works.

From what has been said, it is evident that the history of the Christian Canon is to be sought in the first instance from definite catalogues and not from isolated quotations. But even this evidence is incomplete and unsatisfactory. A comparison of the subjoined table (No. I.) of the chief extant Catalogues will show how few of them are really independent; and the later transcriptions are commonly of no value, as they do not appear to have been made with any critical appreciation of their distinctive worth.

These catalogues evidently fall into two great classes, Hebrew and Latin; and the former, again, exhibits three distinct varieties, which are to be traced to the three original sources from which the Catalogues were derived. The first may be called the pure Hebrew Canon, which is that of the Church of England (the Talbot, Jerome, Jeron, Damasc.). The second differs from this by the omission of the book of Esther (Mähler, [Almen. Syn. S. Script, Greg. Nax., Absalon, Leont., Nicph. Collatt.). The third differs by the inclusion of Baruch, or the "Letter" (Origin. Almen, Tcr. Herowi, [Cencil. Leont., Hol. Victor.). The omission of Esther may mark a real variation in the opinion of the Jewish Church. But the addition of Baruch is probably due to the place which it occupied in direct connection with Jeremiah, not only in the Greek and Latin translations, but perhaps also in some copies of the Hebrew text. (Harven, Book of..). This is rendered more likely by the converse fact that the Lamentations and Baruch are not distinctly enumerated by many writers who certainly received both books.

During the four centuries this Hebrew Canon is the only one which is distinctly recognized, and it is supported by the combined authority of those fathers whose critical judgment is entitled to the greatest weight. In the mean time, however, as has been already noticed, the common usage of the church, which the earlier fathers followed, is the Apocryphal books occupied in the current versions, and they quoted them frequently as Scripture when they were not led to refer to the judgment of antiquity. The subjoined table (No. II.) will show the extent and character of this partial testimony to the disputed books.

These casual testimonies are, however, of comparatively slight value, and are, in many cases, opposed to the deliberate judgment of the authors from whom they are quoted. The real divergence as to the contents of the Old Testament Canon is to be traced to Augustine, whose waverings and uncertain language on the point furnish abundant materials for controversy. By education and character he occupied a position more than usually unfavorable for historical criticism, and yet his overpowers influence, when it fell in with ordinary judgment, greatly strengthened the opinion which he appeared to advocate, for it may be reasonably doubted whether he differed intentionally from Jerome except in language. In a famous passage (De Doct. Christ. ii. 8 (13)) he enumerates the books which are contained in "the whole Canon of Scripture," and includes among them the Apocryphal books without any clear mark of distinction. This general statement is further confirmed by two other passages, in which it is argued that he draws a distinction between the Jewish and Christian Canons, and refers the authority of the Apocryphal books to the judgment of the Christian Church. In the first passage he speaks of the Macrebean history as not "found in the Sacred Scriptures which are called canonical, but in others, among which are also the books of the Maccebees, which the Church, and not the Jews, holds canonical, on account of the marvellous sufferings of the martyrs (recorded in them) ..." (quemam supplicatio temperum non in Scripturis sanctis, quia Canonicas appellatur, sed in alis inventur, in quibus sunt et Maccebeorum libri, quos non Judaei, sed ecclesia pro Canonicis hactenus ... De Cir. xviii. 56). In the other passage he speaks of the books of the Maccebees as "received (recepta, by the Church, not without profit, if they be read with sobriety" (c.Local. i. 38). But it will be noticed that in each case a distinction is drawn between the "Ecclesiastical" and properly "Canonical" books. In the second case he expressly lowers the authority of the books of the Maccebees by remarking that "the Jews have them not like the Law, the Psalms, and the Prophets to which the Lord gives his witness" (Aug. l. c.). And the original catalogue is equally qualified by an introductory distinction which distinguishes between the authority of books which are received by all and by some of the Churches; and, again, between those which are received by churches of great or of small weight (de Doct. Chr. ii. 8 (12) so that the list which immediately follows must be interpreted by this rule. In confirmation of this view of Augustine's special regard for the Hebrew Canon, it may be further urged that he appeals to the Jews, the "librarians of the Christians," as possessing "all the writings in which Christ was prophetized of" (In Ps. xi., Ps. li), and to "the Law, the Psalms, and the Prophets," which were supported by the witness
of the Jews (c. Grund. l. c.), as including "all the canonic authorities of the Sacred books" (de Unit. Eccles. p. 16), which, as he says in another place (de Civ. xix. 23, 1), "were preserved in the temple of the Hebrew people by the care of the successive priests. But on the other hand Augustine frequently used them as coordinate with Scripture, and practically disregards the rules of distinction between the various classes of sacred writings which he had himself laid down. He stood on the extreme verge of the age of independent learning, and follows at one time the conclusions of criticism, at another the prescriptions of habit, which from his date grew more and more powerful."

The enlarged Canon of Augustine, which was, as it will be seen, wholly unsupported by any Greek authority, was adopted at the Council of Carthage (A. D. 337?), though with a reservation (Can. 47, De confundendo isto Canone transmuratorum ecclesiae consultari), and afterwards published in the decreets which bear the name of Innocent, Damasens, and Gelasius (cf. Credner, Zur Gesch. d. Kan. p. 151 ff.) and it recurs in many later writers. But nevertheless a continuous succession of the more learned fathers in the West maintained the distinctive authority of the Hebrew Canon up to the period of the Reformation. In the sixth century Primasius (Comm. in Apoc. iv. Cosin, § 927), in the 7th Gregory the Great (Moral. xii. 21, p. 622), in the 8th Bede (In Apoc. iv.), in the 9th Alcuin (op. Hody, 634; yet see Curn. vi., viii.), in the 10th Radulphus Flav. (In Lect. xiv. Hody, 655), in the 12th Peter of Cruigny (Ep. c. Petri. Hody, l. c.), Hugo de S. Victor (de Script. 6), and John of Salisbury (Hody, 654; Cosin, § 130), in the 13th Hugo Cardinalis (Hody, 650), in the 14th Nicholas Lianus (Hody, p. 657; Cosin, § 146), Wycliffe (? comp. Hody, 658), and Occam (Hody, 657; Cosin, § 147), in the 15th Thomas Anglicus (Cosin, § 150), and Thomas de Walden (ld. § 121), in the 16th Card. Ximenes (Ed. Compil. Prof.), Sess. secundus (Hody, p. 602; Cosin § 173), repeat with approval the decision of Jerome, and draw a clear line between the Canonical and Apocryphal books (Cosin, Scholastical History of the Canon; Reuss, die Gesch. d. heiligen Schriften X. T., Ed. 2, § 328). Up to the date of the Council of Trent, the Romansans allow that the question of the Canon was open, but one of the first labors of that assembly was to circumscribe a freedom which the growth of literature seemed to render perils. The decree of the Council "on the Canonical Scriptures," which was made at the 4th session (April 8th, 1546), at which about 53 representatives were present, pronounced the enlarged Canon, including the Apocryphal books, to be deserving in all its parts of "equal veneration" (pari pictatis affeetu), and added a list of books "to prevent the possibility of doubt" (ne cui dubitationi suborni possit). This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solemn anathema against all who should "not receive the entire books with all their parts as sacred and canonical" (Si quis autem libros ipsos integros cum omnibus suis partibus, prout in ecclesia catholica egi conseruuet et in veteri vulgata Latina editione halentur, pro sacris et canonicois non suspe- ritis . . . anathema esto, Conc. Triss. Sess. iv.). This decree was not, however, passed without opposition (Sarp, 139 ff. ed. 1555, though Pallavicino denies this); and in spite of the absolute terms in which it is expressed, later Romanists have sought to find an escape in the mere form of absolutization of the two classes of Sacred writings by a forced interpretation of the subsidiary clauses. De Fin (Dissert. pref. l. 1), Lamy (App. Bolland. ii. 5), and Jahn (Einl. in d. I. T., l. 141 ff. ap. Reuss, a. a. O. § 357), endeavored to establish two classes, of proto-Canonical and deutero-Canonical books, attributing to the first a dogmatic, and to the second only an ethical authority. But such a classification, however true it may be, is obviously at variance with the terms of the Tridentine decision, and has found comparatively little favor among Romish writers (comp. Hébrart Welte Einl. ii. ff. 1 f.).

The reformed churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the Apocryphal books, but the form in which this judgment was expressed varied considerably in the different forms of the councils. The Lutheran formulaires contain no definite article on the subject, but the note which Luther placed in the front of his German translation of the Apocrypha (ed. 1534), is an adequate declaration of the later judgment of the Communio: "Apocrypha, that is, Books which are not placed on an equal footing (nicht gleich gehalten) with Holy Scripture, and yet are profitable and necessary for reading". This general view was further expanded in the special prefaces to the separate books, in which Luther freely criticized their individual worth, and wholly rejected 3 and 4 Esdras, as unworthy of translation. At an earlier period Carlstadt (1529) published a critical essay, De canonico scriptoria libellus (reprinted in Credner, Zur Gesch. d. Kan. pp. 234 ff.), in which he followed the Hebrew division of the Canonical books into three ranks, and added Wind., Ezech., Judith, Tobit, 1 and 2 Macc., as apocryphal, though not included in the Hebrew collection, while he rejected the remainder of the Apocrypha with considerable parts of Daniel as "utterly apocryphal" (scripta apocryphae; Cred. pp. 389, 410 ff.).

The Calvinist churches generally treated the question with more precision, and introduced into their symbolic documents a distinction between the " Canonical " and " Apocryphal," or "Ecclesiastical" books. The Gallican Confession (1561), after an enumeration of the Hieronymian Canon (Art. 3.), adds (Art. 4) "that the other ecclesiastical books are useful, yet not such that an article of faith could be established out of them" (quo [se Spiritu Sancto] susanguere docetur, illis [se libros Canonicos] ubi aliis libros ecclesiasticos disceverere, qui, ut sint utiles, non sunt tamen canonici, ut ex in cautelat possit aliquis fidei nostrae). The Bolognese Confession (1561?) contains a similar enumeration of the Canonical books (Art. 4.), and allows their public use by the Church, but deems to them all independent authority in matters of faith (Art. 6). The later Helvetic Confession (1562, Bullinger) notices the distinction between the Canonical and Apocryphal books without pronouncing any judgment on the question (Niemeyer, Liber Synod. Ec-
No. I. — CHRISTIAN CATALOGUES OF THE BOOKS OF THE OLD TESTAMENT.

The list extends only to such books as are disputed. Of the signs, * indicates that the book is expressly reckoned as Holy Scripture; † that it is placed expressly in a second rank: ? that it is mentioned with doubt. A blank marks the silence of the author as to the book in question.

The evidence against the authenticity of this Canon, as an original part of the collection, is decisive; in spite of the defense of Bickell (Stud. u. Krit. iii. 611 ff.), as the present writer has shown at length in another place (Hist. of N. T. Canon, iv. 498 ff. [p. 384 ff., 24 ed.]). The Canon recurs in the Capitular. Apocryph. cxx., with the omission of Oracul. and Lamentations.

2 The same Canon appears in Cocc. Hipp. Can. xxviii. The Greek version of this Canon omits the books of Maccabees; and the history of the Council itself is very obscure. Comp. Coct. § 82.

3 This Canon mentions three books of the Maccabees. Justinus mentions four Maccabees. Philo does not find the three Maccabees; and generally it may be observed that the published text of the Coptic Council Needs a thorough revision. Ecclesiast.- is thus mentioned: εφηεσεν δὲ προσωποφορίαν μην μονάδις υπὸ τούς τίτους την συμβολην τοΥ κοινωνικου Συμβ. Comp. Ort. ii. 57.

The Canons of Laodicea, Carthage, and the Apostolic Canons, were all included in the Quini-Sextine Council, Can. 2.

4 Ιερευς συν Θερμος και Παιρος στις έν ουρα. Ordinarily, I believe, says this catalogue as is εξ Βιολος παραλος, and begins with the words: εις δε η εισοδην δοι βιβλια κα' ας Εβραιους αιτε. He quotes several of the Apocryphal books as Scripture, as will be seen below; and in his Letter to Africans defends the interpolated Greek text of Daniel and the other T. O. books, on the ground of their public use (Ep. af. Afric. 3. ff.). The whole of this last passage is of the deepest interest, and places in the clearest light the influence which the LXX. exercised on common opinion.

5 Athanasius closes his whole catalogue with the words: τατε γηγυ του σωτηριου . . . εν τουτω μονοι της την εισειτιας διαδικαιοι εν γενεσιτης. Μοιει τουτω ενεματιλα: μοιει τουτω αδημητησι . . . ετος και ητρια βιβλια τουτω εφων, αν κατοικιμεν μεν τετυμωνεν ξε απα των πατρων αναμνησις, σηκοια της ορι προσβορανοι και βολομενοι καταχεια την της εισειτιας λογιν.

The list of the Apocryphal books is prefixed by a clause nearly identical with that in Athanasius. In a second enumeration (Cyprian, a. a. 0. 0. p. 144), this books of the Maccabees and Susanna are enumerated among the αντιΛεγομενα.

7 The Apocryphal books are headed: και δει αντιΛεγομενα της παλαιας αεται εις πασαν. Susanna (i.e. Add. to Daniel) is reckoned among them. The catalogue ends with the words: σηκε δε τουτων έκτο σου γενεσιτης.

9 The verses occur under the name of Gregory of Nazianzus, but are generally referred to Aphrahatius. Of Esther he says: τουτων προσεκρυμην την Εσχον των. Tertullian, as εν Ασιε προεκειτος Καλαν ν εις τον δευτεροτυπικον γαριν εις τον δευτεροτυπικον γαριν.

10 Ephraim adds of Wisdom and Eclesius: χρησις μεν εις και αφιλημεν, αλλα των αριθμων των καθορισθης, διο νοιοτα . . . εις την τη διαφοραν καθορισθης αντιληθης.

The same catalogue is repeated in De Conf. p. 325. In another place (cf. Hist. iv. v. 941, he speaks of the teaching contained in the "xxii. books of the Old Test. in the New Test., and then in τας Σωτηριου, Σολωμονης τε ζωηι και ημειω " (Paphos) or πασον ονοματοποιης. In a third catalogue (see Hori VIII. p. 19) he adds the letters of Ezech and Jerom XI. (which he elsewhere specially notices as wanting in the Hebrew, de Mens. p. 155), and speaks of Wisdom and Eclesius, as in αδιολογησις among the Jewish, χρησις αλλων των δευτεροτυπων καταλογους. Comp. Coh. xxxix. p. 122.

11 Σετυτ. i. εις τατον έστη τα καινονεμια βλεπα εις τη εκκλησιαν και παλαια και ναι, έν τας παλαια πεται (δωκτον οι Εβραιοι.

12 In some MS. v. e. τον οδηγος και θοφος τον ήραυ. . . τερας μεν και καλας ως ον εκπαθης, διο εκπειν εις τη των φωτον. Thynus nonnulli aedificant Esther, Judit, et Tobit. esteb δε τουτων της γραπθη απαν νων (Holyc, i. 249).

13 Hilar. l. e. Quibusdam autum visum est adhibit Tobia et Judith xxiv. libros secundum numerum Graeciae litterarum communes... .

16 After giving the Hebrew canon and the received canon of N. T., Rufinus says: "Scilicet tamen est, quod et alii libri sunt, qui non canonici sed eclesiastici tieti a majoribus appellati sunt, id est, Superitionis, quae dieuitun Salomonis, et aliis Superitionis quae dieuit Sirach, . . . egenis vero ordinis libri, ut Apocryph. eul. Tobita, et Judith in Macabereorum libri . . . quae omnino legem in ecclesiis voluntur, non tamen universa ad auctoritatem ex his filiis confiniramur. Eutera vero Sacrarium apocryphas nonnullarum, quae in eccl. legit nonnullarum. 17 "Cassiodorus concluded: . . . 18 Cassiodorus gives also, however, with marks of high respect, the catalogue of Jerome, as well as that of Augustine. Comp. Coh. § 133."

1 The quotations in brackets are doubtful either as to the reference, or as to the character assigned to the book quoted.
Lucar, who was most favorably disposed towards the Protestant Churches, confirms the Laodicean Catalogue, and marks the Apocryphal books as not forming a canonic part of the authority whose canonicity is unquestioned (Kimmel, Mon. Fed. Eccl. Or. i. p. 42, to kírōs para τον πανηγύριον πνεύματος ούς ἢχουσι as τα καρύσε και ἀνωτέρω βδόλως κανονικά βιβλία). In this judgment Cyril Lucar was followed by his friend Metropolitan Crioph. (Kimmel, ii. p. 105 f.), while some value is assigned to the Apocryphal books (ἀποκρίσεως ούς ἢχουσι) in consideration of the Canonic value; and the detailed decision of Metropolitans is quoted with approval in the "Orthodox Teaching" of Platon, Metropolitan of Moscow (ed. Athens, 1836, p. 50). The "Orthodox Confession," simply refers the subject of Scripture to the Church (Kimmel, p. 159, ἡ ἕκκλησι ἤτι τὴν ἔχουσιν ... διὰ δοκιμασίαν τάς γραφάς; comp. p. 129). On the other hand the Synod at Jerusalem, held in 1672, "against the Catholicists," which is commonly said to have been led by Romish influence (yet comp. Kimmel, i. xxxviii.), pronounced that the books which Cyril Lucar "ignorantly or maliciously called apocryphal," are "canonical and Holy Scripture," on the authority of the testimony of the ancient Church (Kimmel, Jerusalem, Ecclis. Confess. pp. 467 f.). The Constantinopolitan Synod, which was held in the same year, notices the difference existing between the Apostolic, Laodicean, and Cartaginian Catalogues, and appears to distinguish the Apocryphal books as not wholly to be rejected (βαρα μέρος τῶν τῆς παλαιας διάθηκης βιβλίων τὴν ἀπαρατηθέντις τῶν αυτογράφων ού πεπεραταιβά- νεται ... ούκ ἀπάθετα τυρχάνουτι διδασκό). The authorized Russian Catechism (The Doctrine of the Russian Church, &c., by Rev. W. Blackmore, Aberd., 1845, pp. 57 ff.) distinctly quotes and defends the Hebrew Canon on the authority of the Greek Fathers, and repeats the judgment of Athanasius on the usefulness of the Apocryphal books as a preparatory study in the Bible, and there can be no doubt but that the current of Greek judgment, in accordance with the unanimous agreement of the ancient Greek Catalogues, coincides with this judgment.

The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it. The Peshito was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon; but as the LXX. was used afterwards in revising the version, so many of the Apocryphal books were translated from the Greek at an early period, and added to the original collection (Assem. Bibl. Or. i. 71). Yet this change was only made gradually. In the time of Ephraim (c. A.D. 370) the Apocryphal additions to Daniel were yet wanting, and his commentaries were confined to the books of the Hebrew Canon, though he was acquainted with the Apocrypha (Lardner, Credibility, &c., iv. pp. 427 f.; see Lengerke, Daniel, xxii.). The later Syrian writers do not throw much light upon the question Gregory Bar Hebraeus, in his short commentary on Scripture, treats of the books in the following order (Assem. Bibl. Orient. &c.): the Pentateuch, Jos., Jud., Acts, Dan., Bel, Ez., 1 & 2 Macc., Prov., Ecclus., Esther, Tob., Wisdom, Ruth, Hist. Sis., Job, Is., 12 Proph., Jer., Lam., Ez., Dan., Bel, 4 Gosp., Acts ... 14 Epist. of St. Paul, omitting 1 & 2 Chr., Ezra, Neh., Esther, Tobit, 1 & 2 Macc, Judith, (Baruch?), Apocalypse, Epist. James, 1 Pet., 1 John.

The "Oriental Vocabulary of Jacob of Edessa" (Assem. i. c. p. 499), the order and number of the books commented upon is somewhat different: Penta., Jos., Jud., Job, 1 & 2 Sam., David (i. e. Ps.), 1 & 2 K., Is., 12 Proph., Jer., Lam., Baruch, Ez., Dan., Prov., Wisdom, Cant., Ruth, Esther, Judith, Ecclus., Acts, Epist. James, 1 Pet., 1 John, 14 Epist. of St. Paul, 4 Gosp., omitting 1 & 2 Chr., Ezra, Neh., Eccl., Tobit. 1 & 2 Macc., Apoc. (comp. Assem. Bibl. Orient. iii. 4 not.). The Catalogue of EUSEBIUS (Assem. Bibl. Orient., iii. 5 f) is rather a general survey of all the Hebrew and Christian literature with which he was acquainted (Catalogus Historiorum omnium Ecclesiae superiorum) than a Canon of Scripture. After enumerating the books of the Hebrew Canon, together with Ecclus., Wisdom, Judith, add. to Dan, and Baruch, he adds, without any break, "the traditions of the Elders" (Mishnah), the works of Josephus, including the Books of Enoch which were popularly ascribed to him, and at the end mentions the "book of Tobit and Tobit." In the like manner after enumerating the 4 Gosp., Acts, 3 Cath. Epist. and 14 Epist. of St. Paul, he passes at once to the Deissarion of Tatian, and the writings of "the disciples of the Apostles." Little dependence, however, can be placed on these lists, as they rest on no critical foundation, and it is known from other sources that varieties of opinion on the subject of the Canon existed in the Syrian Church (Assem. Bibl. Orient. iii. 6 not.).

One testimony, however, which derives its origin from the Syrian Church, is specially worthy of notice. Junias, an African bishop of the 6th century, has preserved a full and interesting account of the teaching of Paulus, a Persian, on Holy Scripture, who was educated at Nisibis where διὰ the Divine Law was regularly explained by public masters, as a branch of common education (Gymn. De part. [dic.] leg. Prof.). He divides the books of the Bible into two classes, those of "perfect," and those of "mean" authority [ωικίνει αυτοριταί, the first class includes all the books of the Hebrew Canon with the exception of 1 & 2 Chr., Job, Canticles, and Esther, and with the addition of Ecclesiastes. The second class consists of Chronicles (2), Job, Esdras (2), Judith, Esther, and Maccabees (2), which are added by "very many" (plurimi) to the Canonical books. The remaining books are pronounced to be of no authority, and of these Canticles and Wisdom are said to be added by "some" (quidem) to the Canon. The classification as it stands is not without difficulties, but it deserves more attention than it has received (comp. Holy, p. 653; Gallandi, Biblioth. xlii. 70 ff. [Migne, Patr. Lat. vol. lxxvi.] The reprint in Wordsworth, On the Canon, Appendix, pp. 42 ff., is very imperfect). (See Westminster's Canon of the N. T., 2d ed., pp. 485-87.)

The Armenian Canon, as far as it can be ascertained from citations, follows that of the LXX., but it is of no critical authority; and a similar remark applies to the Ethiopian Canon, though it is more easy in this case to trace the changes through which it has passed (Dillmann, Ueber d. Aeth. Kanon, in Ewae, J. Giecher, 1858, pp. 147 ff.) In addition to the books already enumerated, on the heads for which they are specially valuable, some still remain to be noticed. C. F. Schmid,
The great work of Huby (De bibl. Text., Oxon. 1705) contains a rich store of materials, though even this is not free from minor errors. Stuart's Critical History and definition of the Old Text (Cowan, London, 1839 [Annsler, 1845]) is rather an apology than a history. (It has particular reference to Mr. Norton's "Note on the Jewish Dispensation, the Pentateuch, and the other Books of the Old Testament," in vol. ii. of his Evidence of the Genuineness of the Gospels, Cambridge, 1844 (pp. xlvii.-civ. of the 2d ed., 1848), in which the Mosaic authorship of the Pentateuch was denied. See also Palfrey, Lectures on the Jewish Scriptures, Boston, 1838, etc. i. 19-42; De Wette, Einl. in die Bücher des A. T., 2e Aufl. 1852, pp. 13-40, or Parker's (often inaccurate) translation, i. 20-119, and Appendix, pp. 412-28; Dillmann, Ueber die Bildung der Sammlung heidner Schriften A. T. (in the Jahrb., f. deutsche Theol. 1858, iii. 49-94); Bleek, Einl. in das A. T., Berlin, 1860, pp. 662-716, and the references under the art. APOCRYPHA. — A. IV. The History of the Canon of the New Testament. — The history of the Canon of the N. T. presents a remarkable analogy to that of the Canon of the O. T. The beginnings of both Canons are obscure, from the circumstances under which they arose; both grew slowly under the guidance of an inward instinct rather than by the force of external authority; both were connected with other religious literature by a series of books which claimed a partial and questionable authority; both gained definiteness in times of persecution. The chief difference lies in the general consent with which all the churches of the West have joined in ratifying one Canon of the N. T., while they are divided as to the position of the O. T. Apocrypha. The history of the N. T. Canon may be conveniently divided into three periods. It extends to the time of Hegesippus (c. A. D. 170), and includes the era of the separate circulation and gradual collection of the Apostolic writings. The second is closed by the persecution of Diocletian (A. D. 303), and marks the separation of the sacred writings from the remaining Ecclesiastical literature. The third may be defined by the third Council of Carthage (A. D. 397), in which a catalogue of the books of Scripture was formally ratified by conciliar authority. The first is characteristically a period of tradition, the second of speculation, the third of authority; and it is not difficult to trace the features of the successive ages in the course of the history of the Canon.

1. The history of the Canon of the New Testament to 170 A. D. — The writings of the N. T. themselves contain little more than faint, and perhaps unconscious intimations of the position which they were destined to occupy. The mission of the Apostles was essentially one of preaching and not of writing; of founding a present church and not of legislating for a future one. The "word" is essentially one of "hearing," "received," and "handed down," a "message," a "proclamation.

Written instruction was in each particular only occasional and fragmentary; and the completeness of the entire collection of the incidentals thus formed is one of the most striking proofs of the providential power which guided the natural development of the church. The prevailing method of interpreting the O. T., and the peculiar position which the first Christians occupied, as standing upon the verge of "the coming age (aion)," seemed to preclude the necessity and even the use of a "New Testament." Yet even thus, there is nothing to indicate that the Apostles regarded their written remains as likely to preserve a perfect exhibition of the sum of Christian truth, coordinate with the Law and the Prophets, they claim for their writings a public use (1 Thess. v. 27; Col. iv. 16; Rev. xxii. 18), and an authoritative power (1 Tim. iv. 1 ff.; 2 Thess. iii. 6; Rev. xxii. 19); and, at the time when Peter was written, which on any supposition is an extremely early writing, the Epistles of St. Paul were placed in significant connection with "the other Scriptures." "

The transition from the Apostolic to the sub-Apostolic age is essentially abrupt and striking. An age of conservatism succeeds an age of creation; but in feeling and general character the period which follows the "closing" of the Apostles seems to have been a faithful reflection of that which they moulded. The remains of the literature to which it gave birth, which are wholly Greek, are singularly scanty and limited in range, merely a few Letters and "Apologies." As yet, writing among Christians was, as a general rule, the result of a pressing necessity and not of choice; and under such circumstances it is vain to expect either a distinct consciousness of the necessity of a written Canon, or any clear testimony as to its limits. The writings of the Apostolic Fathers (c. 70-150 A. D.) are all occasional. They spring out of peculiar circumstances, and offered little scope for quotation. At the same time the Apostolic tradition was still fresh in the memories of men, and the need of written Gospels was not yet made evident by the corruption of the oral narrative. As a consequence of this, the testimony of the Apostolic fathers is chiefly important as proving the general currency of such outlines of history and types of doctrine as are preserved in our Canon. They show in this way that the Canonical books offer an adequate explanation of the belief of the next age, and must therefore represent completely the earlier teaching on which that was based. In three places, however, in which it was natural to look for a more distinct reference, Clement (Ep. 47), Irenaeus (ad Eph. 12), and Polycarp (Ep. 3) refer to Apostolic Epistles written to those whom they themselves addressing. The casual coincidences of the writings of the Apostolic fathers with the language of the Epistles is much more extensive. With the exception of the Epistles of Jude, 2 Peter, and 2, 3 John, with which no coincidences occur, and 1, 2 Thessalonians, Colossians, Titus, and Philemon, with which the coincidences are very questionable, all the other Epistles were clearly known, and used by t'era; but still they are not quoted with the freedom which pre-

written instruction was in each particular...
face citations from the O. T. (γ γραφά λέγε, γύ-
γραπτα, &c.): a nor is the famous phrase of Ignatius (ad Phil. 5, προφυγίων τῷ εὐαγγελίῳ ὧν
ταρκὶ ἤρως καὶ τοῖς ἀποστόλοι τῷ προφήτη-
ρῳ εἰκόνας) sufficient to prove the existence of
a collection of Apostolic records as distinct from the
scripture. The Apostolic tradition. The coincidences with
the Gospels, on the other hand, both in fact and
substance are numerous and interesting, but such as
cannot be referred to the exclusive use of our
present written Gospels. Such a use would have
been alien from the character of the age, and in-
consistent with the influence of a historical tradi-
tion. The details of the life of Christ were still too
fresh to be sought for only in fixed records; and even
where memory was less active, long habit
interposed a barrier to the recognition of new
Scriptures. The sense of the infinite depth and
paramount authority of the O. T. was too powerful
even among Gentile converts to require or to ad-
mit of the immediate addition of supplementary books.
But the sense of the peculiar position which the
Apostles occupied, as the original inspired teachers of
the Christian church, was already making itself
felt in the Apostolic age, and by a remarkable
argument (Clement ad Cor. 1:7, 47) Polyarp (ad
Phil. 3), Ignatius (ad Rom. 4) and Barnabas (c. 1) draw
darren between themselves and their pre-
cessors, from whom they were not separated by
an any lengthened intervals of time. As the need for
a definite standard of Christian truth became more
pressing, so was the character of those in whose
writings it was to be sought more distinctly ap-
proached.
The next period (12–170 A. D.), which may be
fitly termed the age of the Apostles, carries the
history of the formation of the Canon one step fur-
ther. The facts of the life of Christ acquired a
fresh importance in controversy with Jew and Gen-
tile. The oral tradition, which still remained in the
former age, was dying away, and a variety of
written documents claimed to occupy its place.
Then it was that the Canonical Gospels were de-
nitely separated from the mass of similar narratives
in virtue of their outward claims, which had re-
mainied, as it were, in abeyance during the period
of tradition. The need did not create, but recog-
nized them. Without doubt and without re-
versity, they occupied at once the position which
they have always retained as the fourfold Apostolic
record of the Saviour's ministry. Other narratives
remained current for some time, which were either
interpolated forms of the Canonical books (The
Gospel according to the Hebrews, &c.), or inde-
pendent traditions (The Gospel according to the
Egyptians, &c.), and exercised more or less influ-
ence upon the form of popular quotations, and per-
haps in some cases upon the text of the Canonical
Gospels; but where the question of authority was
raised, the four Gospels were ratified by universal
consent. The testimony of Justin Martyr (f. e.
246 A. D.) is in this respect most important. b 
An important mark of such a tradition is, that, if
carried out with due reference to his general
manner of quotation, to possible variations of read-
ing, and to the nature of his subject, which ex-
cluded express citations from Christian books, shows
that they were derived certainly in the main, prob-
ably exclusively, from our Synoptic Gospels, and
that each Gospel is distinctly recognized by him
(Dial. c. Tryph. c. 103, p. 331, D, ἐν τῷ τῷ
ἀποστόλων ἀποκάλυψις kata phymi év τὸν ἀποστό-
λῶν (Matthew, John) αὐτῶν καὶ τῶν ἐκ-
νοις ἀποκαλυπτάτων (Mark, Luke)
αὐτήτου . . . Comp. Dial. c. 49 with Matt.
xvii. 13; Dial. c. 106 with Mark iii. 16, 17; Dial.
c. 105 with Luke xxiii. 40). The references of
Justin to St. John are less decided (comp. comp. i.
61; Dial. [88], 63, 123, 56, &c.; Otto, in Ilgten's
Zeitschrift, w. e. w. 1841, pp. 77 ff. 1843, pp. 34
ff.; and of the other books of the N. T. he men-
tioned the Apocalypse only by name (Dial. c. 81),
and offers some coincidences of language with the
Pauline Epistles.

The evidence of Papias (c. 140–150 A. D.) is
nearly contemporary with that of Justin, but goes
back to a still earlier generation (δ προφήτης
ἐλέγε). In spite of various questions which have
been raised as to the interpretation of the frag-
ments of his "ενarrations" preserved by Euse-
bius (H. E. iii. 39) it seems on every account most
reasonable to conclude that Papias was acquainted
with our present Gospels of St. Matthew and St.
Mark, the former of which he connected with an
earlier Hebrew original (ἐναρὰνας); and probably
also with the Gospel of St. John (Frag. xi. Routh;
comp. Iren. v. sub ju.). the former Epistles of St.
John and St. Peter (Euseb. H. E. ii. 24), and the
Apocalypse (Frag. VIII.).

Meanwhile, the Apostolic writings were taken by
various mystical teachers as the foundation of
strange schemes of speculation, which are popularly
confounded together under the general title of
Gnosticism, whether Gentile or Jewish in their
origin. In the earliest fragments of Gnostic writ-
iers which remain there are traces of the use of the
gospels of St. Matthew and St. John, and of 1
Corinthians (Ἀποφάσεις μεγάλη [Simon M.] ap.
Hippol. adv. Hier. vi. 16, 9, 19) and the APA-
толопу was attributed by a confusion not difficult of
explanation to Cerinthus (Epiph. Hier. ii. 3).
In other Gnostic (Ophite) writings a little later there

a The exceptions to this statement which occur in
the Latin versions of Polyarp (ad Phil. c. 12 "ut
his Scripturis dictum est," Ps. iv. 4; Eph. iv. 26),
and Barnabas (c. 4 "sicut scriptum est," Matt.
xx. 16), cannot be urged against the uniform practice which is
observed in the original texts. Some of the most re-
markable Evangelical citations are prefixed by [Κέποι
ἐπερ, not λέγει, which seems to show that they were
derived from tradition and lost from a written na-
tive (Clem. Ep. 13, 46).

b The correctness of the old Latin version of Barna-
bas in c. 4, "sicut scriptum est," is now confirmed by
the Codex Vaticanus, which reads χέριαναρ. This is
interesting as perhaps the earliest example which has
come down to us of an express quotation of a book
of the N. T. as Scripture.
are references to St. Matthew, St. Luke, St. John, Romans, 1, 2 (Clement, Galatians, Ephesians, *Hist. of N. T. Cano*, pp. 313 ff. [249 ff., 2d ed.]); and the Clementine Homilies contain clear coincidences with all the Gospels (Hom. xix. 20 St. Mark; Hom. xix. 22 St. John). It is, indeed, in the fragments of a Gnostic writer, Basilides (c. 125 A.D.), that the writings of the N. T. are found quoted for the first time in the same manner as those of the O. T. (Basil. ap. Hipp. *Herm.* p. 298, *γραμματείαν* 214, § 409; *&c.*). See, however, the addition to note a, p. 309.) A Gnostic, Heraclean, was the first known commentator on the Christian Scriptures. And the history of another Gnostic, Marcion, furnishes the first distinct evidence of a Canon of the N. T.

The need of a definite Canon must have made itself felt during the course of the Gnostic controversy. The common records of the life of Christ may be supposed to have been first fixed in the discussions with external adversaries. The standard of Apostolic teaching was determined when the Church itself was rent with internal divisions. The Canon of Marcion (c. 140 A.D.) contained both elements, a Gospel ("The Gospel of Christ") which was a mutilated recension of St. Luke, and an "Apostle" or Apostolicion, which contained ten Epistles of St. Paul—the only true Apostle in Marcion’s judgment—excluding the pastoral Epistles, and that to the Hebrews (cf. *Marc.* i. XIII.). The narrow limits of this Canon were a necessary consequence of Marcion’s belief and position, but it offers a clear witness to the fact that Apostolic writings were thus early regarded as a complete original rule of doctrine. Nor is there any evidence to show that he regarded the books which he rejected as unauthentic. The conduct of other heretical teachers who professed to admit the authority of all the Apocrypha proves the converse; for they generally defended their tenets by forced interpretations, and not by denying the authority of the common records. And while the first traces of the recognition of the divine inspiration and collective unity of the Canon comes from them, it cannot be supposed, without inverting the whole history of Christianity, that they gave a model to the Catholic Church, and did not themselves simply perpetuate the belief and custom which was brought down within them.
