The close of this period of the history of the N. T. Canon is marked by the existence of two important testimonies to the N. T. as a whole. Hilberto the evidence has been in the main fragmentary and occasional; but the MYSTORIAN CANON in the West, and the Peshito in the East, deal with the collection of Christian Scriptures as such. The first is a fragment, apparently translated from the Greek and yet of Roman origin, mutilated both at the beginning and the end, and written, from internal evidence, about 170 A.D. It commences with a clear reference to St. Mark’s Gospel, and then passes on to St. Luke like the third, St. John, the Acts, thirteen Epistles of St. Paul. The first Epistle of St. John is quoted in the text: and then afterwards it is said that "the Epistle of Jude and two Epistles of the John mentioned above (super scriptio: or "which bear the name of John," super scriptio) are reckoned among the Catholic Epistles " (MS. Catholic, i. c. Ecclesia?) “ We receive moreover the Apocalypse of John and Peter only, which [latter] some of our body will not have read in the Church." Thus the catalogue omits the books received at present the Epistle of James, the Epistle to the Hebrews, and 2 Peter while it notices the partial reception of the Revelation of Peter. The Canon of the Peshito forms a remarkable complement to this catalogue. It includes the four Gospels and the Acts, fourteen Epistles of St. Paul, 1 John, 1 Peter, and James, omitting Jude, 2 Peter, 3 John, and the Apocalypse, and this Canon was preserved in the Syrian Churches as long as they had an independent literature (Ebed Ješu† 1518 A.D. ap. Asbīl. *Bibl. Or.* iii. pp. 3 ff.). Up to this point, therefore, 2 Peter is the only book of the N. T. which is not recognized as an Apostolic and authoritative writing: and in this result the evidence from casual quotations coincides exactly with the enumeration in the two express catalogues.

2. The history of the Canon of the N. T. from 170 A.D. to 305 A.D. — The second period of the history of the Canon is marked by an entire change in the literary character of the Church. From the close of the second century Christian writers take the form of the canon intellectually as well as morally: and the powerful influence of the Alexandrine Church widened the range of Catholic thought, and checked the spread of spurious heresies.

From the first the common elements of the Roman and Syrian Canons, noticed in the last section, form a Canon of acknowledged books, regarded as a whole, authoritative and inspired, and coömine with the O. T. Each of these points is proved by the testimony of contemporary writers who represent the Churches of Asia Minor, Alexandria and North Africa. THEKELIUS, who was connected by direct succession with St. John (Euseb. *H. E.* v. 20), speaks of the Scriptures as a whole, without distinction of the Old or New Testaments, as "perfect, inasmuch as they were uttered by the Word of God and His Spirit" (*Adv. Her.* ii. 28, 2). "There could not be," he elsewhere argues, "more than four Gospels or fewer" (*Adv. Her.* iii. 11, 8 ff.). CLEMENT OF ALEXANDRIA, again, marks the "Apostle" (ο άποστόλος, *Strom.* vii. 3, § 11; sometimes ἀπόστολος) as a collection definite as a *Gospel,* and combines them as "Scriptures of the Lord" with the Law and the Prophets (*Strom.* vi. 11, § 88) as "ratified by the authority of one Almighty power" (*Strom.* iv. 1, § 25). TERTULLIAN notices particularly the introduction of the word *inscription* for the earlier word *instrumentum,* as applied to the dispensation and the record (cf. *Marc.* i. 1); and appeals to the *New Testament,* as made up of the "Gospels" and "Apostles" (*Adv. Prot.* 15). This comprehensive testimony extends to the four Gospels, the Acts, 1 Peter, 1 John, thirteen Epistles of St. Paul, and the Apocalypse; and, with the exception of the Apocalypse, no one of these books was ever afterwards rejected or obliterated till modern times.

But this important agreement as to the principal contents of the Canon left several points still undecided. The East and West, as was seen in the last

---

*a We have given what appears to be the meaning of the corrupt text of the passage. It would be out of keeping with the disputed points above; hence a new transmission of the disputed points here; *comp. Hist. of N. T. Cano., pp. 212, [184, 2d ed.]* ii., and the references there given.

*b The Manichees offer no real exception to the truth of this remark. *Comp. Beausobre, *Hist des Manes,* i. 295 f."
section, severally received some books which were not universally accepted. So far the error lay in defect; but in other cases apocryphal or unapostolic books obtained a partial sanction or a popular use, before they finally passed into oblivion. Both these phenomena, however, were limited in time and range, and in part of explanation from the internal character of the books and the question. The mutilation of the clauses of the separate writings belongs to special introductions; but the subjoined table (No. III.) will give a general idea of the extent and nature of the historic evidence which bears upon them.

This table might be much extended by the insertion of isolated testimonies of less considerable writers. Generally, however, it may be said that of the "disputed" books of the N. T., the Apocalypse was universally received, with the single exception of Dionysius of Alexandria, by all the writers of the period: and the Epistle to the Hebrews, by the Churches of Alexandria, Asia (?) and Syria, but not by those of Africa and Rome. The Epistles of St. James and St. Jude, on the other hand, were little used, and the Second Ep. of St. Peter was barely known.

But while the evidence for the formation of the Canon is much more copious during this period than during that which preceded, it is essentially of the same kind. It is the evidence of use and not of inquiry. The Canon was fixed in ordinary practice, and doubts were resolved by custom and not by criticism. Old feelings and beliefs were perpetuated by a living tradition; and if this habit of mind was unfavorable to the permanent solution of difficulties, it gives fresh force to the claims of the acknowledged books, which are attested by the witness of every division of the Church (Origens, Cyprian, Methodus), for it is difficult to conceive how such unanimity could have arisen except from the original weight of apostolical authority. For it will be observed that the evidence in favor of the acknowledged books as a whole is at once clear and concordant from all sides as soon as the Christian literature is independent and considerable. The Canon preceded the literature and was not determined by it.

3. The history of the N. T. Canon from A.D. 303-397. — The persecution of Diocletian was directed in a great measure against the Christian writings (Lact. Inst. v. 2; de Mort. Persec. 16). The influence of the Scriptures was already so great and so notorious, that the surest method of destroying the faith seemed to be the destruction of the records on which it was supported. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the sacred books, and at a later time the question of the readmission of these "traitors" (traditores), as they were emphatically called, created a schism in the Church. The Donatists, who maintained the sternest judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the discussion; and Augustine allows that they held in common with the Catholics the same "Canonical Scriptures," and were alike "bound by the authority of both Testaments" (August. c. Creae, i. 31, 57; Ep. 129, 3). The only doubt which can be raised as to the integrity of the Donatist Canon arises from the uncertain language which Augustine himself uses as to the Epistle to the Hebrews, which the Donatists may also have counterenanced.

But, however this may have been, the complete Canon of the N. T. as commonly received at present, was ratified at the third Council of Carthage (A.D. 397), and from that time was accepted throughout the Latin Church (Jerome, Innocent, Rufinus, Philastrius), though occasional doubts as to the Epistle to the Hebrews still remained (Isid. Hisp. Proven., §§ 88-109).

Meanwhile the Syrian Churches, faithful to the conservative spirit of the East, still retained the older Canon. Cf. CHALLONIER († 429 A.D.), THEODORE OF MOPSUESTIA († 429 A.D.), and THEODORIT, who represent the Church of Antioch, furnish no evidence in support of the Epistles of Jude, 2 Peter, 2, 3 John, or the Apocalypse. JULIUS, in his account of the public teaching at Nisibis, places the Epistles of James, Jude, 2, 3 John, 2 Peter, in a second class, and mentions the doubts which existed in the East as to the Apocalypse. And though ETHEM SYRIUS was acquainted with the Apocalypse (Ep. ep. ep. ii. p. 332 c), yet his genuine Syrian works exhibit no habitual use of the books which were not contained in the Syrian Canon, a fact which must throw some discredit upon the frequent quotations from them which occur in those writings which are only preserved in a Greek translation.

The churches of Asia Minor seem to have occupied a mean position as to the Canon between the East and West. With the exception of the Apocalypse, they received generally all the books of the N. T. as contained in the African Canon, but this is definitely excluded from the Catalogue of Gregory of Nazianzus († 389 A.D.), and pronounced "spurious" (σπουδος), on the authority of "the majority" (οἵ ει παιεως), in that of AMPHILICHUS (c. 380 A.D.), while it is passed over in silence in the Laodicean Catalogue, which, even if it has no right to its canonical position, yet belongs to the period and country with which it is commonly connected. The same Canon, with the same omission of the Apocalypse, is given by Cyril of Jerusalem († 386 A.D.); though Ephiph.

1 The sign † marks a verbal coincidence; * a direct quotation; ? an expression of doubt; ( ) an uncertain reference; † a clear rejection; [ ] that the evidence is suspicious, or inconclusive as to the authority assigned to the book.
nus, who was his fellow-countryman and contemporary, confirms the Western Canon, while he notices the doubts which were entertained as to the Apostolica. These doubts prevailed in the Church of Constantinople, and the Apostolica does not seem to have been recognized there down to a late period. The Catholic Church, either because the Roman pontiff, or on the ground of the officially recognized and permanent Canon was complete and pure (Nicephorus, Photius, Eusèbeus, Theophylact, 
† c. 1077 A. D.).

The well-known Festal Letter of Athanasius († 373 A. D.), bears witness to the Alexandrine Canon. This contains a clear and positive list of the books of the N. T. as they are received at present; and the judgment of Athanasius is confirmed by the practice of his successor Cyril.

One important Catalogue yet remains to be mentioned. After noticing in separate places the origin and use of the Gospels and Epistles, Eusebius sums up in a famous passage the results of his inquiry into the evidence on the Apostolic books furnished by the writings of the three first centuries (H. E. iii. 25). His testimony is by no means free from difficulties, nor in all points obviously consistent, but his last statement must be used to fix the interpretation of the former and more curious notices. In the first class of acknowledged books (διαλογογράφων) he places the four Gospels, the Epistles of St. Paul (i.e. fourteen, H. E. iii. 3), 1 John, 1 Peter, and (cf. e.g. Suidas) in case its authenticity is admitted (such seems to be his meaning), the Apostolica. The second class of disputed books (ἀντιλογογράφων) he subdivides into two parts, the first consisting of such as are generally known (διαφανείς τοις πολλοις), including the Epistles of James, Jude, 2 Peter, 2, 3 John; and the second of those which he pronounces spurious (σφαλών), that is, which are either unauthentic or unapostolic, as the Acts of Paul, the Shepherd, the Apocalypse of Peter, the Apocalypse of John (if not a work of the Apostle), and according to some the Gospel according to the Hebrews. These two great classes contain all the books which had received ecclesiastical sanction, and were in common distinguished from a third class of heretical forgeries (καίνων οἱ Μοναδικία, καίνων οἱ Μοναδικία, etc.), the Gospels of Thomas, Peter, Matthias, etc.

One point in the testimony of Eusebius is particularly deserving of notice. The evidence in favor of the apostolic authority of 2 Peter which can be derived from the existing writings of the first three centuries is extremely slender; but Eusebius, who possessed more copious materials, describes it as "generally well known," and this circumstance alone suggests the necessity of remembering that the early Catalogues rest on evidence no longer available for us. In other respects the classification of Eusebius is a fair summary of the results which follow from the examination of the extant ancient literature. The evidence of later writers is little more than the repetition or combination of the testimony already quoted. An examination of table No. IV., p. 374, which includes the most important Catalogues of the writings of the N. T., will convey a clear summary of much that has been said, and apply the most important omissions.

At the era of the Reformation the question of the N. T. Canon became again a subject of great though partial interest. The hasty decree of the Council of Trent, which affirmed the authority of all the books commonly received, called out the opposition of controversialists, who quoted and enforced the early doubts. Erasmus with characteristic moderation denied the apostolic origin of the Epistle to the Hebrews, 2 Peter, and the Apostolica, but left their canonical authority unquestioned (Prof. ad Antilegum.). Luther, on the other hand, had no doubts concerning the Vulgate Canon, and maintained the Old Testament of the Lutheran Church as the only subjective standard for the canonicity of the Scriptures in the character of their "teaching of Christ," and while he placed the Gospel and first Epistle of St. John, the Epistles of St. Paul to the Romans, Galatians, Ephesians, and the first Epistle of St. Peter, in the first rank as containing the "kernel of Christianity," he set aside the Epistle to the Hebrews, St. Jude, St. James, and the Apocalypse at the end of his version, and spoke of them and the remaining Antilegomena with varying degrees of disrespect, though he did not separate 2 Peter and 3 John from the other Epistles (comp. Luderer, Art. Kanon in Herzog's Encyclo. p. 295 f.). The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers (Melanchthon, Centur. Magdeburg., Flacius, Gerhard: comp. Reuss, § 394), and even especially with a polemical aspect against the Romish Church by Chemnitz (Eccles. Conc. Trib. i. 73). But while the tendency of the Lutheran writers was to place the Antilegomena on a lower stage of authority, their views received no direct sanction in any of the Lutheran symbolic books, which admit the "prophetic and apostolic writings of the Old and New Testaments," as a whole, without further classification or detail. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. Carlstadt, who was originally a friend of Luther and afterwards professor at Zurich, endeavored to bring back the question to a critical discussion of evidence, and placed the Antilegomena in a third class "on account of the controversy as to the books, or rather (ut certa loquar) as to their authors" (De Com. Scrip. pp. 410-12, ed. Creuz.). Calvin, while he denied the Pauline authorship of the Epistle to the Hebrews, and at least questioned the authenticity of 2 Peter, did not set aside their canonicity (Prof. ad Heb.; ad 2 Petr.); and he notices the doubts as to St. James and St. Jude only to dismiss them.

The language of the Articles of the Church of England with regard to the N. T. is remarkable. In the Articles of 1552 no list of the books of Scripture is given; but in the Elizabethan Articles (1562, 1571) a definition of Holy Scripture is given as "the Canonical books of the Old and New Testament, of whose authority was never any doubt in the Church" (Art. vi.). This definition is followed by an enumeration of the books of the O. T. and of the Apocalypse; and then it is said summarily, without a detailed catalogue, "all the books of the N. T., as they are commonly received, we do receive and account them for Canonical (pro Canonica habemus)." A distinction thus remains between the "Canonical" books, and such "Canonical books as have never been doubted in the Church;" and it seems impossible to avoid the conclusion that the framers of the Articles intended to leave a freedom of judgment on a point on which the greatest of the continental reformers, and even of Romish scholars (Sixtus Sen. Bibl. S. I. 1; Cajetan, Prof. ad Epp. ad Heb., Jac., 2, 3 John, Jud.) were divided. The omission of the Antilegomena has arisen solely from the fact that the Article in question was framed with reference to the Church of...

De Instr. diss. Litt. 14. 11
De Ord. Libr. S. Script. init. 12
Hody, p. 649.
Rome, with which the Church of England was agreed on the N. T. Canon; for all the other Protestant confessions which contain any list of books, give a list of the books of the New as well as of the Old Testament (Conf. Belg., 4; Conf. Galt., 3); and in this list, a complete list of the books as sanctioned by the Anglican Articles, the great writers of the Church of England have not availed themselves of it. The early commentators on the O. T. take little (Burnet) or no notice (Beveridge) of the doubts as to the Antilegomena; and the chief controversialists of the Reformation accepted the full Canon with emphatic avowal (Whitaker, Disput. on Scripture, exiv. 103; Fulke’s Defence of Eng. Trans., p. 8 Jewell, Defence of Apol. ii. 3, 1).

The judgment of the Greek Church in the case of the O. T. was seen to be little more than a reflection of the opinions of the West. The difference between the Roman and Reformed Churches on the N. T. was less marked; and the two conflicting Greek confessions confirm in general terms, without any distinct enumeration of books, the popular Canon of the N. T. (Cyr. Luc. Conf. i. 42; Posith. Confess. i. 467). The confession of Metropolis contains a complete list of the books; and compares their number—thirty-three—with that of the Saviour’s life, that “not even the number of the Sacred books might be devoid of a divine mystery” (Metropol. Crispi. Conf. ii. 105, Ed. Kimm. et Weissenb.). At present, as was already the case at the close of the 17th century (Leo Alitanius, ap. Fabric. Bibl. Græc. v. App. p. 38), the Antilegomena are reckoned by the Greek Church as equal in Canonical authority in all respects with the remaining books (Catechism, I. c. sup.).

The assaults which have been made, especially during the present century, upon the authenticity of the separate books of the Old and New Testaments belong to the special articles. The general course which they have taken is simple and natural (Untersuch. d. Kan. 1771—9) first led the way. The historic and interpretive critics have rightly connected the formation of the Canon with the formation of the Catholic Church, but without any clear recognition of the providential power which wrought in both. Next followed a series of special essays in which the several books were discussed individually with little regard to the place which they occupy in the whole collection (Schlenmacher, Bretschneider, De Wette, &c.). At last an ideal view of the early history of ChristianitY was used as the standard by which the books were to be tried, and the books were regarded as results of typical forms of doctrine and not the sources of them (F. C. Baur, Schwéyler, Zeller).

All true sense of historic evidence was thus lost. The growth of the Church was left without explanation, and the original relations and organic unity of the N. T. were disregarded.

For the later period of the history of the N. T. Canon, from the close of the second century, the great work of Lardner (Credibility of the Gospel History, Works, i.—vi. Ed. Kippis, 1788) furnishes ample and trustworthy materials. For the earlier period his criticism is necessarily imperfect, and requires to be combined with the results of later inquiries.

Kriechefer’s collection of the original passages which bear on the history of the Canon (Quellenzusamm. u. s. w. Zürich, 1844) is useful and fairly complete, but frequently inaccurate.

NOTES ON TABLE NO. IV.

1 The omission of the Apocalypse is frequently explained by the expressed object of the Catalogue, as a list of books for public ecclesiastical use: ἡδὲ βιβλία ἀναγκαίως έστω, compared with the former canon: ἦτοί δὲ βιβλία ἀναγκαίως, even with the latter.

2 When the Catalogue was confirmed in the Quinisextine Council (Can. 2), the Constitutions were excluded on the ground of corruptions; but no notice was taken of the Epistle of Clement, which as is well known, are found at the end of the Cod. Alex., and are mentioned in the index before the general summary of books; which again is followed by the titles of the Apocryphal Psalms of Solomon.

3 He adds also the Apocalyptic Canons, and according to one MS. the two Epistles of Clement.

4 The other chief passages in Eusebius are, H. E. lii. 3, 24; ii. 23. His object in the passage quoted is ἀνακεφαλαίωσις τὴς διδασκαλίας της καθιστής διαδοχής ῥηθῆ έστώ.

5 The list concludes with the words, τὰ δὲ οὖν πάντα ἐξ ἑαυτοῦ καὶ πάντα μὲν ἐν ἑκάστῳ, ἐπιμέλειας ἡ διαδοχή καὶ ἀνακεφαλαίωσις τῆς διδασκαλίας ἡ ἑαυτοῦ καὶ τὴν καθιστής διαδοχήν ἄνω έστώ.

6 The entrance of this Athanasius says (comp. above), ἐπιμέλειας τούτου μὲν ἄνω ἀνακεφαλαίωσις τοῦ καθιστήχους διαδοχῆς.

7 Athanasius, I. c. τὰς δὲ ἑωράσεις τῆς παύσεως ἀπείρου, οὐκ ἐὰν ἔμεντος γεγονός ἡ χιρική, εἰς τί λόγια; καθολικὸς ἑπτακάτως οὐκ εἰς τί λόγια ἡ τρίτη τῶν τινών, τῶν ὑπὸ τούτου, ἐκ τῆς ἐξουσίας ἡ ἀνακεφαλαίωσις τῆς διαδοχῆς τοῦ μὲν ἐγκαθίστασιν, οἱ πλεῖον δὲ γένος λέγοντος. Οὐκός ἐδεξιοθέτης Καθιστῆς ἡ ἐπιμέλειά τοῦ τοῦ παύσεως καθιστήκης.

8 This Canon of Chrysostom, which agrees with that of the Peshito, is fully supported by the casual evidence of the quotations which occur in his works. The quotation from 2 Peter, which is found in Hom. in Joann. 24 (33, tom. viii. p. 200) (ed. Paris), stands alone. Suidas’ assertion (s. v. ιερουσαλήμ) that he recited “the Apocalypse and three Epistles of St. John” is not supported by any other evidence.

9 Neiphores adds to the disputed books “the Gospel according to the Hebrews.” In one MS. the Apocalypse is placed also among the Apocryphal books (Credner, a. o. p. 122).

10 This Catalogue, which excludes the Epistle to the Hebrews and the Apocalypse (statuta est nihil aliud legi in ecclesia bevera catholica nisi . . . et Pauli tredecim epistolae et septem alia . . .), is followed by a section in which Philiastrius speaks of “other [heretics] who assert that the Epistle to the Hebrews is not Paul’s” (Her. 89). And in another place (Her. 90) he reckons it as holy to deny the authenticity of the Gospel and Apocrypha of St. John. The different expositions seem to be the result of careless compilation.

11 This Catalogue is described as "secundum anti quam translationem," and stands parallel with those of Jerome and Augustine. The enumeration of the Catholic epistles is somewhat ambiguous, but I believe that it includes only three epistles. Epistola Petri ad gentes, Johanni ad Parthos. The insert of ludica after gentes, seems to have been a typographical error, for the present writer has not found the reading in any one of four MSS. which he has examined.

12 In another place (D. Euseb. Οἰκ. i. 12) Isidore mentions without condemning the doubts which existed as to the Epistle to the Hebrews, James, 2, 3 John, 2 Peter, but not as to Jude.
The writings of F. C. Baur and his followers often contain very valuable hints as to the characteristics of the several books in relation to later teachings, however perverse their conclusions may be. In opposition to them Thiersch has vindicated, perhaps with an excess of zeal, but yet in the main rightly, the position of the Apostolic writings in relation to the first age (Versch. der Heiligung, u. v. s., Erlangen, 1842; and Kirchenzahn, u. v. s., Erlangen, 1846). The section on Reuss on the subject (Die gesch. d. heil. Schrift, N. T. 2d. Aufl. Braunschweig, 1853 [4th ed. 1861]), and the articles of Landereck (Herzog's Lingbluph, s. v.) contain valuable summaries of the evidence. Other references and a fuller discussion of the chief points are given by the author of this article in The History of the Canon of the N. T. (Cambr. 1855). B. F. W.

**CANTICLES** (KANTILIA.) The canon of Hiphelerm is the only one mentioned, although, perhaps, from the "pillars" of the litter [Brd.] described in Cant. iii. 10, it may be argued that its epigraphie would include a canon. It probably retained the mosquito nets or curtains in which the name originated, all the books being by the scribes of this period, it is argued, have been composed. The letter, display rather than such simple usefulness. Varro (R. R. ii. 10, 8) uses one in comp. jucund. of language, as much as θάμανος θάμανος... in το τὸ κοινοτεί (k. v.) describes the position of a luxury general. (For further classical illustra-

replied that Solomon could scarcely be ignorant of the Aramaic literature of his own time, and that he may have consciously used it for the purpose of enrichment (Gesen. Heb. cir. §§ 2, 4).

The title, though it is possibly too flattering to have come from the hand of Solomon, must have existed in the copy used by the LXX., and consequently can lay claim to a respectable antiquity. The moral argument put forward by the supporters of the most recent literal interpretation, and based upon the improbability of Solomon’s criminalizing himself (see below), is not very conclusive. His conduct could easily be traced to a spirit of generous self-acquiescence; and at any rate it need not be excised above the standard of the most spiritual to flourish in the atmosphere of a court such as his. On the whole then it seems unnecessary to depart from the plain meaning of the Hebrew title.

Supposing the date fixed to the reign of Solomon, great ingenuity has been employed by the Rabbinical and some Christian writers, in determining at what period of that monarch’s life the poem was written (see Pol. Syn. Proef. ad Cant.). The point at issue seems to have been whether Solomon ever repented after his fall. If he did, it was contended that the ripeness of wisdom exhibited in the Song sustained the natural growth of the spirit of repentance; if he did not, it was urged that no other than a spiritually-minded man could have composed such a poem; and that therefore it must have been written while Solomon was still the cherished of God. Then again it was a moot point whether the composition was the product of Solomon’s matured wisdom, or the fresh outburst of his warm and passionate youth; whether in fact the master elements of the poem were the liturgical, or the allegorical meaning. The question resolves itself into one of interpretation, and must be determined by reference to III. below.

II. Form. — This question is not determined by the Hebrew title. The rendering of בְּרוֹאֵת יַרְאֵת יִרְאֶת, mentioned by Simonis (Lec. Heb.), “artists aim,” and adopted by Paulus, Good, and other commentators, can scarcely compete with Gesenius’s, “Song of Songs, i. e. the most beautiful of songs” (comp. Ps. xlv. 1, בְּרוֹאֵת יַרְאֵת יִרְאֶת, “a delightful song,” Gesen.; “even- jucundum,” Rosen.; comp. also Theoc. Ἡμι. viii. προφοράς μέλος). The non-continuity which many critics attribute to the poem is far from being a modern discovery. This is sufficiently attested by the Lat. “Cantica cantorum;” and the Chaldee paraphrase, “the songs and hymns which Solomon, the prophet, the king of Israel, uttered in the spirit of prophecy before the Lord.”

Glosiolerus (16th cent.) considered it a drama in five acts. One of the first separate translations published in English is entitled “The Canticles, or Balades of Solomon, in English metre,” 1549; and in 1596 appeared Solomon’s Song in 8 elegies, by J. M. [Jervase Markham]; the number of elegies in this latter production being the same as that of the Idyls into which the book was afterwards divided by Jahn. Down to the 18th cent., however, the Canticles were generally regarded as continuous.

Glees [of] Nazianzus calls it ναυμαχος δραμα τε και ἁγια. According to Patrick, it is a Pastoral Elegy, or a “Dramatic poem;” according to Lowth, “an epiphalamion, or οραστος μυ- tials of a pastoral kind.” Michaelis and Rosenmüller, while differing as to its interpretation, agree in making it continuous, “ærmen annatoriam,” Ausser, “by the Mithraic Continuity was suggested by Bossuet, who divided the Song into scenes or scenes of a pastoral drama, corresponding with the 7 days of the Jewish nuptial ceremony (Lowth, Prelect. xxx.). Bossuet is followed by Calmet, Percy, Williams, and Lowth; but his division is impugned by Taylor (Fragn. Cant.), who proposes one of 6 days; and considers the drama to be post-nuptial, not ante-nuptial, as it is explained by Bossuet. The entire nuptial theory has been severely handled by J. D. Michaelis, and the literal school of interpreters in general. Michaelis attacks the first day of Bossuet, and involves in its destruction the remaining six (Not. ad Lowth. Pred. xxxi.). It should be observed that Lowth does not compromise himself to the perfectly dramatic character of the poem. He makes it a drama, but only of the minor kind, i. e. dramatic as a dialogue; and therefore not more dramatic than an Idyl of Theocr., or a Satire of Horace. The fact is that he was unable to discover a plot; and evidently meant a good deal more by the term “pastoral” than by the term “drama.” Moreover, it seems clear, that if the only dramatic element in Canticle the dialogue, the rich pastoral character of its scenery and allusions renders the term drama less applicable than that of ἰδυλ. Bossuet, however, claims it as a regular drama with all the proprieties of the classic model. Now the question is not so much whether the Canticles make up a drama, or a series of idyls, as which of these two Greek names the more nearly expresses its form. And if with Lowth we recognize a chorus completely sympathetic and assistant, it is difficult to see how we can avoid calling the poem a drama. But in all the translations of the allegorical school which are based upon the dramatic idea, the interference of the chorus is so infrequent or so indefinite, the absence of anything like a dramatic progress and development sufficient to enlist the sympathy of a chorus is so evident, that the strongly marked ἰδυλlic scenery could not fail to outweigh the scarcely perceptible elements of dramatic intention. Accordingly the idyllic theory, propounded by Sig. Melasgenio, confirmed by the use of a similar form among the Arabsians, under the name of ‘Cassidas’ (Sir W. Jones, a. 1743), J. Cousen, and others, was adopted by Good, became for a time the favorite hypothesis of the allegorical school. After Markham’s translation, however (see above), and the division of Ghibrius, we cannot consider this theory as originating either with the learned Italian translator, or, as suggested by Mr. Horne, with Sir W. Jones. The ἰδυλlic form seems to have recommended itself to the allegorical school of translators as getting rid of that dramatic unity and plot which their system of interpretation reduced to a succession of events without any cumulating issue. In fact, it became the established method of division both with literal and allegorical translators: e. g. Herder, Pye Smith, Klinker, Magnus; and as late as 1846 was maintained by Dr. Noyes of Harvard University, an ultra literalist. But the majority of recent translators belonging to the literal school have adopted the theory of Jacob, originally proposed in 1776, and since developed by Umbreit, Ewald, Meier, &c. Based as this theory is upon the dramatic evolution of a simple love-story, it supplies that essential movement and interest, the
want of which was felt by Lowth; and justifies the application of the term droma to a composition of which it manifests the vital principle and organic structure.

By the reactionary allegorists, of whom Rosenmüller may be considered the representative, the Song of Solomon has either been made absolutely continuous, or has been divided with reference to its spiritual meaning, rather than to its external form (e. g. Hengstenberg, and Prof. Burrows).

The supposition that the Cant. supplied a model to Theocritus seems based on merely verbal coincidences, such as occur so commonly to occur between two writers of pastoral poetry (comp. Cant. i. 9, vi. 10, with Theocr. xviii. 30, 36; Cant. iv. 11 with Theocr. xx. 26, 27; Cant. viii. 6, 7, with Theocr. xxiii. 23-26; see other passages in Pol. Syg. ; Lowth, Prof.; Gray’s Key). In the essential matters of form and of ethical teaching, the resemblance does not exist.

III. Meaning.—The schools of interpretation may be divided into three:—the mystical, or typical, the allegorical; and the literal.

1. The mystical interpretation is properly an offshoot of the allegorical, and probably owes its origin to the necessity which was felt of supplying a literal basis for the speculations of the allegorists. This basis is either the marriage of Solomon with Pharaoh’s daughter, or his marriage with an Israelitish woman, the Shulammite. The former (taken together with Harnack’s variation) was the favorite opinion of the mystical interpreters to the end of the 18th century; the latter has obtained since its introduction by Good (1803). The mystical interpretation makes its first appearance in Origens, who wrote a voluminous commentary upon the Cant. Its literal basis, minus the mystical application, is condemned by Theodoret (A. D. 420), it reappears in Ambrose (1250-1286), and was received by Grotius. As involving a literal basis, it was vehemently objected to by Sanctius, Durham, and Calvinists; but approved of and systematized by Bossuet, endorsed by Lowth, and used for the purpose of translation by Percy and Williams. The arguments of Calvinists prevented its taking root in Germany; and the substitution by Good of an Israelitish for an Egyptian bride has not saved the general theory from the neglect which was inevitable after the reactionary movement of the 17th century allegorists.

2. Allegorical.—Notwithstanding the attempts which have been made to discover this principle of interpretation in the LXX. (Cant. iv. 8); Ezech. (xlvii. 14-17); Wisd. (viii. 2); and Joseph. (c. Aimon, I. § 8); it is impossible to trace it with any certainty further back than the Talmud (see Ginsburg, Introd.). According to the Talmud the beloved is taken to be God, the kingdom, or bride; the bride, the congregation of Israel. This general relation is expanded into more particular detail by the Targum, or Chaldee Paraphrase, which treats the Song of songs as an allegorical history of the Jewish people from the Exodus to the coming of the Messiah and the building of the third temple. In order to make out the parallel, recourse was had to the most extraordinary devices; c. g. the reduction of words to their numerical value, and the free interchange of words similar to each other in sound. Elaborate as it was, the interpretation of the Targum was still further developed by the medieval Jews; but generally constructed upon the same allegorical hypothesis. It was introduced into their liturgical services; and during the persecutions of the middle ages, its consoling appeal to the past and future glories of Israel maintained it in the popular version of a national poem. It would be strange if so universal an influence as that of the scholastic philosophy had not obtained an expression in the interpretation of the Canticles. Such an expression we find in the theory of Ibn Caspi (1280-1340), which considers the book as representing the union between the entire intellect (intellectus aegens), and the receptive or material intellect (intellectus materiæ). A new school of Jewish interpretation was originated by Mendelssohn (1729-1786) which, without actually denying the existence of an allegorical meaning, determined to keep it in abeyance, and meanwhile to devote itself to the literal interpretation. At present the most learned Rabbits, following Lipsius, have abandoned the allegorical interpretation in toto (Herzleiner, 1818; Philippson, 1834).

In the Christian Church, the Talmudical interpretation, imported by Origens, was all but universally received. It was impugned by Theodore of Mopsuestia (360-420), but continued to hold its ground as the orthodox theory till the revival of letters; when it was called in question by Erasmus and Grotius, and was gradually superseded by the typical theory of Grotius, Bossuet, Lowth, &c. This, however, was not effected without a severe struggle, in which Sanctius, Durham, and Calvinists were the champions of the allegorical against the typical theory. The latter seems to have been mainly identified with Grotius (Pol. Syg.), and was stigmatized by Calvinists as the heresy of Theodore Mopsuestia, condemned at the 2d council of Constantinople, and revived by the Anabaptists. In the 15th century the allegorical theory was reaccepted, and reconstructed by Tuffendorf (1770) and the reactionary allegorists; the majority of whom, however, with Rosenmüller, return to the system of the Chaldee Paraphrase.

Some of the more remarkable variations of the allegorical school are:—(a.) The extension of the Chaldee allegory to the Christian Church, originally projected by Aponius (2nd century), and more fully wrought out by De Lyra (1270-1340), Brightman (1600), and Cocceius (1663-1699). According to De Lyra, chaps. ii.-vii. describe the history of the Jews from the Exodus to the birth of Christ; chap. vii. ad fin. the history of the Christian Church to Constantine. Brightman divides the Cant. into a history of the Legal, and a history of the Evangelical Church; his detail is highly elaborate, e. g. in Cant. v. 8, he discovers an allusion to Peter Wahlbo (1690), and in verse 13 to Rob: Trench (1290). (b.) Luther’s theory limits the allegorical meaning to the contemporaneous history of the Jewish people under the early Chaldee Paraphrase; according to thiherius and Corn. a Ladis the bride is the Virgin Mary. (c.) Tuffendorf refers the spiritual sense to the circumstances of our Saviour’s death and burial.

3. The literal interpretation seems to have been connected with the general movement of Theodore Mopsuestia (360-312) and his followers, in opposition to the extravagances of the earlier allegorists. Its scheme was nutshell, with Pharaoh’s daughter as the bride. That it was by many regarded as the only admissible interpretation appears from Theodoret, who mentions this opinion only to condemn it. Born down and overwhelmed by the prolific genius of medieval allegory, we have
glimpse of it in Abulpharagius (vid. supr.); and in the MS. commentary (Boll. Oppenh. Coll. No. 625), cited by Dr. Ginsburg, and by him referred sarcastically to a French Jew of the 12th or 13th cent. This Commentary anticipates more recent criticism of the Song as concerning the humble loge of a shepherd and shepherdess. The extreme literal view was propounded by Castellio (1544), who called the Cant. "Colloquium Solomonis cum amici quidam Sulanitiae," and rejected it from the Canon. Following out this idea, Whiston (1723) recognized the book as a composition of Solomon; but denounced it as foolish, licentious, and idolatrous. Meanwhile the mystical theory was adopted by Grotius as a secondary and spiritual interpretation; and, after its dramatical development by Bossuet, long continued to be the standard scheme of the mystical school. In 1803 it was reconstructed by Good, with a Jewish instead of an Egyptian bride. The purely literal theory, opposed on the one hand to the allegorical interpretation, and on the other to Castellio and Whiston, owes its origin to Germany. Michaelis (1779) regarded the Song as an exponent of wedded love, innocent and happy. But, while justifying its admission into the Canon, he is betrayed into a levity of remark altogether inconsistent with the supposition that the book is inspired (Not. ad Loeth. Pref.). From this time the scholarship of Germany was mainly enlisted on the side of the literalists. The literal basis became thoroughly dissociated from the mystical superstructure: and all that remained to be done was to elucidate the true scheme of the former.

The most generally received interpretation of the modern literalists is that which was originally proposed by Jacobi (1771), adopted by Herder, Ammon, Umbrét, Ewald, &c.; and more recently by Prof. Meier of Tübingen (1854), and in England by Mr. Ginsburg, in his very excellent translation (1857). According to the detailed application of this view, as given by Dr. Ginsburg, the Song is intended to display the victory of humble and constant love over the temptations of wealth and royalty. The temptor is Solomon; the object of his seductive endeavors is a Shulamite shepherdess, who, surrounded by the glories of the court and the fascinations of unwonted splendor, pines for the shepherd-lover from whom she has been involuntarily separated.

The drama is divided into 5 sections, indicated by the three repeated formula of adjuration (iii. 7; iii. 6; vii.; 4); and the use of another closing sentence (v. 1).

Section 1 (Ch. i.—ii. 7) scene—a country seat of Solomon. The shepherdess is committed to the charge of the court-ladies ("daughters of Jerusalem"), who have been instructed to prepare the way for the royal approach. Solomon makes an unsuccessful attempt to win her affections.

Sec. 2 (ii. 8—iii. 3): the shepherdess explains to the court-ladies the cruelty of her brothers, which had led to the separation between herself and her beloved.

Sec. 3 (iii. 6—v. 1): entry of the royal train into Jerusalem. The shepherd follows his betrothed into the city, and proposes to rescue her. Some of her court companions are favorably impressed by her constancy.

Sec. 4 (v. 2—viii. 4): the shepherdess tells her dream, and still further engages the sympathies of her companions. The king's flatteries and promises are unavailing.

Sec. 5 (viii. 5—14): the conflict is over; virtue and truth have won the victory, and the shepherdess and her beloved return to their happy home; visiting on the way the tree beneath whose shade they first plotted their truth (viii. 5). Her brother repeats the promises which they had once made conditionally upon her virtues and unapproachable conduct.

Such is a brief outline of the scheme most recently projected by the literalists. It must not be supposed, however, that the supporters of the allegorical interpretation have been finally driven from the field. Even in Germany a strong band of reactionary allegorists have maintained their ground, embracing almost entirely such names as Han, Kaiser, Rosenmüller, Hahn, and Hengstenberg. On the whole, their tendency is to return to the Chaldee Paraphrase—a tendency which is specially marked in Rosenmüller.

In England the battle of the literalists has been fought by Dr. Pye Smith (Congreg. Mag. for 1837—38); in America by Prof. Noyes, who adopts the extreme literal theory, and is unwilling to recognize in Cant. any moral or religious teaching. It should be observed that as this Dr. Noyes is utterly alien to the views of Jacobii and his followers, who conceive the recommendation of virtuous love and constancy to be a portion of the very highest moral teaching, and in no way unworthy of an inspired writer.

The allegorical interpretation has been defended in America by Professors Stuart and Barrowes. The internal arguments adduced by the allegorists are substantially the same which were urged by Calvinius against the literal basis of the mystical interpretation. The following are specimens:—

(v.) Particulars not applicable to Solomon: (v. 2): (b.) particulars not applicable to the wife of Solomon (v. 1; 6; v. 7; vi. 13, cf. i. 6): (c.) Solomon addressed in the second person (viii. 12): (d.) particulars inconsistent with the ordinary conditions of decent love (v. 2): (c.) date 20 years after Solomon's marriage with Pharaoh's daughter (comp. Cant. v. 4, and 1 K. vi. 38). It will readily be observed that these arguments do not in any way affect the literal theory of Jacobii.

For external arguments the allegorists depend principally upon Jewish tradition and the analogy of Oriental poetry. The value of the former, as respects a composition of the 10th cent. u. c., is estimated by Mich. (Not. ad Loeth.) at a very low rate. For the latter, it is usual to refer to such authors as Chardin, Sir W. Jones, Herchel, &c. (see Rosenm. Animad.). Rosenmüller gives a song of Hafiz, with a paraphrase by a Turkish commentator which unfolds the spiritual meaning. For other specimens of the same kind see Lane's Egyptians. On the other hand the objections taken by Dr. Noyes are very important (New Transl.). It would seem that there is one essential difference between the Song of Solomon and the allegorical compositions of the poets in question. In the latter the allegory is more or less avowed; and distinct reference is made to the Supreme Being: in the former there is nothing of the kind. But the most important consideration adduced by the literalists is the fact that the Cant. are the production of a different country, and separated from the songs of the Sufis and the Hindu mystics by an interval of nearly 2000 years. To which it may be added that the Song of Solomon springs out of a religion which has such names as Han, Kaiser, Rosenmüller, Hahn, and Hengstenberg. In short, the conditions of
production in the two cases are utterly dissimilar. But the literalists are not content with destroying this analogy; they proceed further to maintain that allegories do not generally occur in the sacred writings, and to some extent of their secondary meaning, which intervention in the case of the Cant, is not forthcoming. They argue from the total silence of our Lord and his Apostles respecting this book, not indeed that it is unscriptured, but that it was never intended to be read within its poetic envelope, that mystical sense which would have rendered it a perfect treasury of reference for St. Paul, when unfolding the spiritual relation between Christ and his Church (see 2 Cor. xi. 4; Eph. v. 22-32). Again, it is urged that if this poem be all-spiritually spiritual, then its spirituality is of the very highest order, and utterly inconsistent with the opinion which assigns it to Solomon. The philosophy of Solomon, as given in Ecc, is a philosophy of indifference, apparently suggested by the exhaustion of all sources of practical enjoyment. The religion of Solomon had but little practical influence on his life: if he wrote the glowing spiritualism of the Cant, when a young man, how can we account for his fearful degeneracy? If the poem was the production of his old age, how can we reconcile it with the last fact recorded of him that "his heart was not perfect with the Lord, his God?" For the same reason it is maintained that no other writer would have selected Solomon as a symbol of the Messiah. The excessively amatory character of some passages is designated as almost blasphemous when supposed to be addressed by Christ to his church (vii. 1-7; 8, 7); and the fact that the dramatic personae are three, is regarded as decidedly subversive of the allegorical theory. The strongest argument on the side of the literalists is the matrimonial metaphor so frequently employed in the Scriptures to describe the relation between Jehovah and Israel (Ex. xxv. 16; Num. xx. 29; Ps. lxvii. 25; Jer. iii. 11; Ez. xvi., xxiii., etc.). It is fully stated by Prof. Stuart (O. T. Canon). On the other hand the literalists deny so early a use of the metaphor. They contend that the phrase "to go whoring after other gods" describes a literal fact; and that even the metaphor as used by the prophets who lived after Solomon implies a wedded relation, and therefore cannot be compared with the antiepiscopal allusion which forms the subject of Cant.

IV. Canonicity.—It has already been observed that the book was rejected from the Canon by Castellio and Whiston; but in no case has its rejection been defended on external grounds. It is found in the LXX., and in the translations of Aquila, Symmachus, and Theodotion. It is contained in the catalogue given in the Talmud, and in the catalogue of Melito; and in short we have the same evidence for its canonicity as that which is commonly adduced for the canonicity of any book of the O. T. (In addition to the ordinary sources, reference is advised to Louth, Proph. xxx. xxiii., together with the notes of Michaels, and the apparatus of Rosenmüller, Osn., 1821; Harmer's Outlines, etc., London, 2d ed. 1775; Transl., with notes by Madvig, Gött. 1803; Congreg. Max., etc., and 1838; New Transl., of Prov., Ecc., and Cant., by Prof. Noyes, Boston, 1816 [2d ed. 1867]; Commentary on Song, etc., by Prof. Parrotes, Philadelphia, 1853 [2d ed New York, 1896]; Das Ge¬

CANTICLES
CAPIERNAUM

CAPIERNAUM

(Capernaum) is a name with which all are familiar as that of the scene of many acts and incidents in the life of Christ. There is no mention of Capernaum in the O. T. or Apocrypha, but the passage Is. xi. 1 (in Hebrew, viii. 23) is applied to it by St. Matthew. The word Caphtor in the name perhaps indicates that the place was of Egyptian origin. [CAPHTOR.]

The few notices of its situation in the N. T. are not sufficient to enable us to determine its exact position. It was on the western shore of the Sea of Galilee (την παραλαίαν του, Matt. iv. 13; comp. John vi. 24), and if recent discoveries are to be trusted (Cureton's Nikriin Rec. John vi. 17), was of sufficient importance to give that to Sea, in whole or in part, the name of the "lake of Capernaum." (This was the case also with Tiberias, at the other extremity of the lake. Comp. John ii. 1, "the sea of Galilee of Tiberias"). It was in the "land of Gennesaret" (Matt. xiv. 34, compared with John vi. 17, 21, 24), that is, the rich, busy plain on the west shore of the lake, which we know from the descriptions of Josephus and from other sources to have been at that time one of the most prosperous and crowded districts in all Palestine. [GENNESARET.] Being on the shore Capernaum was lower than Nazareth and Cana of Galilee, from which the road to it was one of descent (John ii. 12: Luke iv. 31), a mode of speech which would apply to the general level of the spot even if our Lord's expression "exalted unto heaven" (ἀφηδέρυγη, Matt. xi. 23) had any reference to height of position in the town itself. It was of sufficient size to be always called a "city" (缗ov, Matt. ix. 1: Mark i. 33), had its own synagogue, in which our Lord frequently taught (John vi. 50; Mark i. 21; Luke iv. 33, 38)—a synagogue built by the centurion of the detachment of Roman soldiers which appears to have been quartered in the place (Luke vii. 1, comp. 8; Matt. viii. 2). But besides the garrison there was also a customs station, where the dues were gathered both by stationary (Matt. ix. 9; Mark ii. 14; Luke v. 27) and by itinerant (Matt. xvii. 24) officers. If the "way of the sea" was the great road from Damascus to the south (Ritter, Jordan, p. 271), the duties may have been levied not only on the fish and other commerce of the lake, but on the caravans of merchandise passing to Galilee and Judea.

The only interest attaching to Capernaum is as the residence of our Lord and his Apostles, the scene of so many miracles and "agricious words." At Nazareth He was "brought up," but Capernaum was emphatically his "own city;" it was when He returned thither that He is said to have been "at home" (Mark ii. 1: such is the force of εκσυγχον — A. V. "in the house"). Here he chose the Evangelist Matthew or Levi (Matt. ix. 9). The brothers Simon-Peter and Andrew belonged to Capernaum (Mark i. 29), and it is perhaps allowable to imagine that it was on the sea-beach below the town (for, doubtless, like true orientals, these two

 fishermen kept close to home), while Jesus was "walking" there, before "great multitudes" had learned to "gather together unto Him," that they heard the quiet call which was to make them forsake all and follow Him (Mark i. 10, 17, comp. 28). It was here also He healed the miracle on the centurion's servant (Matt. vii. 5; Luke vii. 9). Simon's wife's mother (Matt. viii. 14; Mark i. 30; Luke iv. 38), the paralytic (Matt. ix. 1; Mark ii. 1; Luke v. 18), and the man afflicted with an unclean devil (Mark i. 23; Luke iv. 35). The son of the nobleman (John iv. 46) was, though resident at Capernaum, healed by words which appear to have been spoken in Cana of Galilee. At Capernaum occurred the incident of the child (Mark x. 35; Matt. xviii. 1; comp. xvii. 24); and in the synagoge there was spoken the wonderful discourse of John vi. (see verse 51).

The doon which our Lord pronounced against Capernaum and the other unbelieving cities of the plain of Gennesaret has been remarkably fulfilled. In the present day no ecclesiastical tradition even ventures to fix its site; and the contest between the river and lake which was made the subject of the probable spot is, one of the hottest, and at the same time the most hopeless, in sacred toponomy. Fortunately nothing hangs on the decision. The spots in dispute are (1) Khun Minijh, a mound of ruins which takes its name from an old khan hard by. This mound is situated close upon the seashore at the northwestern extremity of the plain (now el-Cha'cviit). It is of some extent, but consisting of heaps only with no visible ruins. These are south of the ruined khan; and north of them, close to the water-line of the lake, is a large spring surrounded by vegetation and overshadowed by a fig-tree which gives it its name — 'Ain el-Tin (the spring of the fig-tree). Three miles south is another large spring called the "Round Fountain," which is a mile and a half from the lake, to which it sends a considerable stream with fish.

2. Three miles north of Khun Minijh is the other chalama, Tell Haim,—ruins of walls and foundations covering a space of "half a mile long by a quarter wide," on a point of the shore projecting into the lake and backed by a very gently rising ground. Rather more than three miles further is the point at which the Jordan enters the north of the lake.

The arguments in favor of Khun Minijh will be found in Robinson ii. 403-4, iii. 344-388). They are chiefly founded on Josephus's account of his visit to Capernaum, which Dr. R. would identify with the mounds near the khan, and on the testimonies of successive travellers from Arculius to Quaresmius, whose notices Dr. R. interprets—often, it must be confessed, not without difficulty—in reference to Khun Minijh. The fountain Capernaum, which Josephus elsewhere mentions (B. J. iii. 10, § 8) in a very emphatic manner as a chief source of the water of the plain of Gennesaret and as abounding with fish, Dr. R. believes to be the 'Ain el-Tin. But the "Round Fountain" certainly answers better to Josephus's account than a spring so close to the shore and so near one end of the district as is 'Ain el-Tin. The claim of Khun Minijh is also strongly opposed by a later traveller (Boznar, pp. 437-441). Still this makes nothing for Tell Haim.
The arguments in favor of Tell Ham date from about 1675. They are urged by Dr. Wilson. The principal one is the name, which is maintained to be a relic of the Hebrew original — Capernaum having given place to that of Capernaum. Dr. Wilson favours Josephus when he says (Landes of the Bible, iii. 182–185, and see also Kitto, Joshua, pp. 332–344, who supports Tell Ham). Khan Minych, et-Tibishte, and Tell Ham, are all, without doubt, ancient sites, but the conclusion from the whole of the evidence is irresistible: it is impossible to say of which they represent Capernaum, which Chorazin, or which Bethsaida. These anxious to inquire further into this subject may consult the originals, as given above. For the best general description and reproduction of the district, see Stanley, S. & P. ch. x.

The later travellers in Palestine leave the question as to the spot on which Capernaum stood hardly less perplexed than it was before. "The disputed sites of the cities of Gennesaret," says Dean Stanley, after his second visit to the East (Notes, i. 195) "are still to remain disputed." Porter (Handbook of Syria, ii. 425) accepts Dr. Robinson's conclusion in favor of Khan Minych, so called from an old caravanserai near a heap of ruins, on the northern edge of Gennesaret. "Alum-Tim is only another name for the same place, derived from a fig-tree which overhangs a fountain in the neighborhood. Dr. Thompson (Land and Book, i. 442–458) and Mr. Dixon (Holy Land, ii. 175, London, 1865) decide for Tell Ham, at the head of the lake, about three miles northeast of Khan Minych. The chum of Alum Masuker, or the Round Fountain, near the south end of the plain of Gennesaret, and so named from being enclosed by a low curcular wall of mason-work," has for some time past been kept in a manger: but Mr. Tristram (Land of Israel, p. 442, London, 1865) has brought it forward once more, and certainly with reasons for it which are not without weight. He speaks with greater authority on some branches of the argument from his character as an eminent naturalist. Josephus states (B. J. iii. 10, § 8) that the fountain of Capernaum produced the caparicus, a fish like that of the lake near Alexandria. Mr. Tristram now maintains that neither of the places except the Round Fountain furnishes this mark of identification. "The remarkable siurnid, the catfish or common caparicius, abounds to a remarkable degree in the Round Fountain to this day. . . . We obtained specimens a yard long, and some of them are deposited in the British Museum. The loose, sandy bottom of this fountain is peculiarly adapted for this singular fish, which buries itself in the sediment, leaving only its feelers exposed. . . . Here, in the clear shallow water, it may, when disturbed, be once detected, swimming in numbers along the bottom. But it is not found at 'Ain et-Tim, where the fountain could neither supply it with cover nor food; nor could we discover it at 'Ain Tibishtah (the nearest fountain to Tell Ham, though distant two miles to the southward), "where the water is hot and brackish." Mr. Tristram thinks it worth while to mention that fever is very prevalent at this day at 'Ain Mudawwarah (the Round Fountain), whereas "the dry, elevated, rocky ground of 'Ain Hamam" would be comparatively free from it. "Peter's wife's mother by sick of a fever" at Capernaum (Mark i. 30). For other details of his able argument the reader is referred to his work as above. "The Abbe' Micheon (Vie de Jesus, i, 220–24, Paris, 1869) who has travelled in Palestine, holds in like manner that the Capernaum of Josephus (B. J. iii. 10, § 8) is identical with the Round Fountain, and hence that the Capernaum of the Talmuds, so far as it is mentioned, is to be found at that place. So Norton, Treatise of the Gospels, with Notes, ii. 55, 56. On the other hand the English explorers, Captain Wilson and his associates, are reported to have found indications which point to Tell Ham as the disputed site. They regard as such the discovery of a synagogue in a state of fine preservation, remarkable for its elegant architecture, and belonging in all probability to an age earlier than that of Christ (Atheneum, Feb. 24, 1866). It may have been one of the Galilean synagogues in which the Saviour himself taught and performed some of his mighty works. It is certain that such a discovery shows that an important town must once have existed on this spot; but this of itself would not settle the question of the name of the town. Mr. Thrupp (Journal of Class. and Soc. Philol. ii. 210–308) also contends for Tell Ham as the ancient Capernaum. Dr. Tregelles (ibid. iii. 141–154) presents a widely different view, placing Capernaum close by Bethsaida (Julias), near the mouth of the Upper Jordan, in the Batithah, which (and not the Gibeon) he regards as the plain of Gennesaret described by Josephus.

It may be added in regard to Khan Minych that the recent excavations of the English exploring expedition (see Atheneum, March 31, 1866) have brought to light nothing there except some fragments of "masonry and pottery of comparatively modern date."
CAPHENATHA

CAPHENATHA (Χαφεναθά: Caphenatha), a place apparently close to and on the east side of Jerusalem, which was repaired by Jonathan Maccabeus (1 Macc. xii. 57). The name is derived by Lightfoot from Caphisath, the Talmudic word for unripe figs. If this be correct, there is a remarkable correspondence between the name Caphenatha and those of Bethany (house of dates), Bethphage (house of figs), and of the Mount of Olives itself, on which the three were situated— all testifying to the ancient fruitfulness of the place.

G.

CAPHISA (Καφίσα; [Vat. Πειρα; Ald. Alex. Καφῖσα; Eumodalis], 1 Esd. vi. 19. [Umb.-Phinah].

CAPHTOR (Σκαφτόρ: Kaptaqocea [except in Jer.]; Cappadox): CAPHTORIM (Σκαφτόριμ: [In Gen.], Σαφθοριμ, [Alex.] Χαφθοριμ; [in 1 Chr, Rom. Vat. omit; Alex. Χαφθοριμ; Comp. Ald.] Καφθοριμ; [In Deut. Καππάδοκες: Caphtorim, Cuppadoke]). A country thrice mentioned as the primitive seat of the Philistines (Deut. ii. 23; Jer. xxxvii. 4; Am. ix. 7), who are once called Caphtorim (Deut. ii. 23), as of the same race as the Mizraite people of that name (Gen. x. 14; 1 Chr. i. 12). The position of the country, since it was peopled by Mizraites, must be supposed to be in Egypt or near to it in Africa, for the idea of the southwest of Palestine is excluded by the migration of the Philistines. In Jer. it is spoken of as Σκαφτόριμ, and has therefore been supposed to be an island. However, it has a wider signification; commonly it is any maritime land, whether coast or island, as in the expression ὅπως είσαι (Gen. x. 5), by which the northern coasts and the islands of the Mediterranean seem to be intended, the former, in part at least, being certainly included. It must be remembered, however, that the Nile is spoken of as a sea (Σκαφτόριμ) by Nahum in the description of No, or Thbes (iii. 8). [No.] It is also possible that the expression in Jer. merely refers to the maritime position of the Philistines (comp. Ez. xxv. 16), and that Caphtor is here poetically used for Caphtorim.

The writer (Encyclopaedia Britannica, 8th ed., Egypt, p. 419) has proposed to recognize Caphtor in the ancient Egyptian name of Coptos. This name, if literally transcribed, is written in the hieroglyphics Ke constituent, Keht, and Keb-her, probably pronounced Kuhb, Kehb, and Kehb-Hor (Brugsch, Geogr. Inschr. Taf. xxxviii. no. 809, 900), whence Coptic Keht, Kepto, Keutw.

KΕΤΤΩ, Gr. Κόττως, Arab. كعت, Keh. The similarity of name is so great that it alone might satisfy us, but the correspondence of Alqutus, as if Αλα γυνος, to Σκαφτόριμ, unless μ in the Philistine coast, seems conclusive. We must not suppose, however, that Caphtor was Coptos: it must rather be compared to the Coptic name, probably in primitive ages of greater extent than under the Ptolemies, for the number of names was in the course of time greatly increased. The Caphtorim stand last in the list of the Mizraite peoples in Gen. and Chr., probably as dwellers in Upper Egypt, the names next before them being Egyptian, and the earliest names of Libyan peoples (Egypt). It is not necessary to discuss other identifications that have been proposed. The chief are Cappadocia, Cyprus, and Crete, of which the last alone, from the evident connection of the Philistines with Crete, would have any probability in the absence of more definite evidence. There would, however, be great difficulty in the way of the supposition that in the earliest times a nation or tribe removed from an island to the mainland.

The migration of the Philistines is mentioned or alluded to in all the passages speaking of Caphtor or the Caphtorim. It thus appears to have been an event of great importance, and this supposition receives support from the statement in Amos. In the lists of Gen. and Chr., as the text now stands, the Philistines are said to have come forth from the Caushalim—the Caushalim, whence came the Philistines, and the Caphtorim,—where the Hebrew forbids us to suppose that the Philistines and Caphtorim both came from the Caushalim. Here there seems to have been a transposition, for the other passages are as explicit, or more so, and their form does not admit of this explanation. The period of the migration must have been very remote, since the Philistines were already established in Palestine in Abraham's time (Gen. xxvi. 32, 34). The evidence of the Egyptian monuments, which is indirect, tends to the same conclusion, but takes us yet further back in time. It leads us to suppose that the Philistines and kindred nations were cognate to the Egyptians, but so different from them in manners that they must have separated before the character and institutions of the latter had attained that development in which they continued throughout the period to which their monuments belong. We find from the sculptures of Rameses III. at Medeenet Haboo, that the Egyptians about 1230 B. C. were at war with the Philistines, the Tok-kara, and the Sharytana of the Sea, and that other Sharytana served them as mercenaries. The Philistines and Tok-kara were physically cognate, and had the same distinctive dress; the Tok-kara and Sharytana were also physically cognate, and fought together in the same ships. There is reason to believe that the Tok-kara are the Carians, and the Sharytana cannot be doubted to be the Chere-thim of the Bible and the earlier Cretons of the Greeks, inhabiting Crete, and probably the coast of Palestine also (Enc. Brit. art. Egypt, p. 492). All bear a greater resemblance to the Egyptians than does any other group of foreign peoples represented in their sculptures. This evidence points therefore to the spread of a seafaring race cognate to the Egyptians at a very remote time. Their origin is not alone spoken of in the record of the migration of the Philistines, but in the tradition of the

"καφθορίμ" has become, through the previous change of Σ to Τ, 'Σαφθορίμ', even to Azahb (Gams), Caphtorim who came forth from Caphtor destroyed them and dwell in their stead," may mean that a part of the Avim alone perished.
CAPTAIN OF THE GUARD

Phoenicians that they came from the Erythraean Sea (Arabia), and we must look for the primordial seat of the whole race on the coasts of Arabia and Africa, where all ancient authorities lead us mainly to place the Cushites and the Ethiopians. [Cesth.] The difference of the Philistines from the Egyptians in dress and manners is, as we have seen, evident on the Egyptian monuments. From the Bible we learn that their law and religion were likewise different from those of Egypt, and we may therefor consider our previous supposition as to the time of the separation of the peoples to which they belonged to be positively true in their particular ease. It is probable that they left Caphnotor not long after the first arrival of the Mitzraite tribes, while they had not yet attained that attachment to the soil that afterwards so eminently characterized the descendents of those which formed the Egyptian nation.

The words of the prophet Amos seem to indicate a deliverance of the Philistines from bondage. [Are] ye not as children of Ethiopians (κρυστάλλου) unto me, [I] children of Israel? hath the Lord said. Have not I caused Israel to go up out of the land of Egypt, and the Philistines from Caphtor, and Aram out of Kir? (Am. iv. 5). The mention of the Ethiopians is perfectly of note: here are they perhaps spoken of as a degraded people. The intention appears to be to show that Israel was not the only nation which had been providentially led from one country to another where it might settle, and the impression would seem to imply oppression preceding the migration. It may be remarked that Manetho speaks of a revolt and return to allegiance of the Lycaonians, probably the Ibleans or Labans, from whose name Libya, Arc, certainly came, in the reign of the first king of the third dynasty, Memphis or Nechochis, in the earliest age of Egyptian history, n. c. cir. 2600 (Cory, Anc. Frag. 2d ed. pp. 100, 101).

CAPTITORIM (Κατέχειν): Vat. omits. Alex. Ἐφραίμι: [Comp. mid. Ἐφραίμίσθη] (Captitorn). 1 Chr. 5. 12. [CAPITORES: CAPTORS.]

CAPTORIM (Καταγγέλω: of Καταγγέλες: Cappadocia). Deut. ii. 23. [CAPITORES: CAPTORS.]

CAPTAVDII (Καππαδοίκια): Cappadocia. This eastern district of Asia Minor is interesting in reference to New Testament history only from the mention of its Jewish residents among the hearers of St. Peter's first sermon (Acts ii. 9), and its Christian residents among the readers of St. Peter's first Epistle (1 Pet. i. 1). The Jewish community in this region, doubtless, formed the nucleus of the Christian; and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Seleucus (Ant. xii. 3, § 4). The Roman period, through the growth of large cities and the construction of roads, would afford increased facilities for the spread both of Judaism and Christianity. It should be observed that Cappadocia was easily approached from the direction of Palestine and Syria, by means of the pass called the Cilician Gates, which led up through the Taurus from the low-lying country of Cilicia, and that it was connected, at least under the later Emperors, by good roads with the district beyond the Euripates.

The range of Mount Taurus and the upper course of the Euphrates may safely be mentioned, in general terms, as natural boundaries of Cappadocia on the south and east. Its geographical limits on the west and north were variable. In early times the name reached as far northwards as the Euxine Sea. The region of Cappadocia, viewed in this extent, constituted two satrapies under the Persians, and afterwards two independent monarchies. One was Cappadocia on the Pontus, the other Cappadocia near the Taurus. Here we have the gern of the two Roman provinces of Pontus and Cappadocia. [PONTUS.] Several of the monarchs who reigned in Cappadocia Proper bore the name of Agathares. One of them is mentioned in 1 Mar. xx. 22.

The last of these monarchs was called Archelaus (see Joseph. Ant. xvi. 4, § 6). He was treacherously treated by the Emperor Tiberius, who reduced his kingdom to a province A. D. 17. This is the position in which the country stood during the time of St. Peter's apostolic work.

Cappadocia is an elevated table-land intersected by mountain-chains. It seems always to have been deficient in wood; but it was a good grain country, and it was particularly famous for grazing. Its Roman metropolis, afterwards both the Birthplace and episcopal see of St. Basil, was Caesarea (now Kaisareia), formerly Maenas, situated near Mount Idaus, the highest mountain in Asia Minor. Some of its other cities were equally celebrated in ecclesiastical history, especially Nysa, Nazianzus, Samosata and Tysana. The native Cappadocians seem originally to have belonged to the Syrian stock: and since Cappadocia (v. 6) places the cities of Ionia and Doré within the limits of this region, we may possibly obtain from this circumstance some light on the "speech of Lycaonia," Acts xiv. 11. [LYCAONIA.] The best description of these parts of Asia Minor will be found in Hamilton's Researches, and Textier's Asia Minor. J. S. H.

CAPTAIN. (1.) As a purely military title, Captain answers to צֶרֶם in the Hebrew army, and χαλαρῷς (tribunos) in the Roman. [Army.] The "captain of the guard" (στρατιοτάτον) in Acts xxiii. 16, is also spoken of under Army [p. 164]. (2.) צָרְם, which is occasionally rendered captain, applies sometimes to a military (Josh. x. 24; Judg. xi. 6; 11; Is. xxii. 3; Dan. xi. 18), sometimes to a civil command (c. g. Is. i. 10, iii. 6): its radical sense is division, and hence decision without reference to the means employed: the term illustrates the double office of the צָרְם. (3.) The "captain of the temple" (στρατιοτάτον του ἱεροῦ) mentioned by St. Luke (xix. 24; Acts iv. 1, v. 24) in connection with the priests, was not a military officer, but superintendent the guard of priests and Levites, who kept watch by night in the Temple. The office appears to have existed from an early date: the "priests that kept the door" (2 K. xii. 20, xx. 34) were described by Josephus (Ant. x. 8, § 5) as τοὺς φυλάσσοντας το ἱερὸν ἱερεῦς: a native occurs in 2 Mar. iii. 4 of a προστάτη του ἱεροῦ: this officer is styled στρατιοτάτον by Josephus (Ant. xx. 6, § 2; B. J. vi. 5, § 3); and in the Mishna (Mebubh. i. § 2) צָרְם צָרְם הַמִּשְׁמֵי, "the captain of the mountain of the Temple:" his duty, as described in the place last quoted, was to visit the priests during the night, and see that the sentences were doing their duty. (4.) The term דַּרְךְ בָּטָן, rendered "captain" (Heb. ii. 10), has no reference whatever to a military office. W. L. B.*

* CAPTAIN OF THE GUARD. Title of the officer (A. V.) to whose custody Paul and other prisoners were committed at Rome (Acts...
CAPTIVITY OF THE JEWS

xxxvi. (16), where a stricter translation would be Praetorian prefect or commander of the Praetorian camp. See Wieseler's Christl. d. op. g. in Zeller, p. 80; compare the first place (το ἱεροτεσσαράχυς) an opening question. The command of the praetorian guard was originally divided between two prefects, but during the reign of Claudius, Burrus or Barbus Afinius, a distinguished Roman general, was appointed sole prefrēgō

*praetorius* and retained this office as late certainly as the beginning of A. D. 62. On his death the command was committed again to two prefects, as it was hence at first, and this continued to be the arrangement until a late period of the empire. The time of Paul's arrival at Rome could not have been far from A. D. 62, as admits of being shown by an independent calculation. Wieseler supposes το ἱεροτεσσαράχυς to refer to this Burrus, as sole prefect at that time, and he urges the expression as a reason for assigning the apostle's arrival to A. D. 62, or the year preceding. So also Anger, De tempore in Actis Apost. addit. p. 100, and Lewin, Fasti Sacri, p. 325. It is very possible that this view is the correct one. It would furnish a striking coincidence between Luke's narrative and the history of the times. Yet, in speaking of the praetorian prefect, the writer of the Acts may have meant the one who acted in this particular case, the one who took into his charge the prisoners whom the centurion transferred to him, whether he was sole prefect or had a colleague with him: comp. xxiv. 27. De Wette assents to Meyer in this explanation of the article. The expression, as so understood, does not affirm that there was but one prefect, or deny it.

But if the words ὁ ἱεροταυράχος τοι. το ἱεροτεσσαράχυς (Acts xxviii. 16) are not genuine,9 this question concerning το ἱεροτεσσαράχυς falls away, so far as it depends on Luke's authority. At the same time the words (if added to the text) express what was unquestionably true, according to the Roman usage (see Plin. Epist. x. 65); but of course we have then the testimony only of some glossator who (if we may conjecture a motive), knowing what the rule was, apprises the reader of its observance as to the other prisoners, because he would represent Paul in being "suffered to dwell by himself" as exempted from the rule, or if at first subjected to the

same custody (which no doubt was the fact), as afterwards treated with special indulgence. — "Captain of the guard" in Gen. xxxix. 1, xl. 4, 5, as probably should be interpreted (158) "leger of the commandants." [Josephus; Potit.)

H.

CAPTIVITIES OF THE JEWS.

The bondage of Israel in Egypt, and their subjugation at different times by the Philistines and other nations, are sometimes included under the above title; and the Jews themselves, perhaps with reference to Daniel's vision (ch. vii.), reckon their national captivities as four — the Babylonian, Median, Greek, and Roman (Eisenmenger, Eindeutliche Judenchau., vol. i. pp. 745). But the present article is confined to the fourth deportation of the Jews from their native land, and their forcible detention, under the Assyrian or Babylonian kings.

The kingdom of Israel was invaded by three or four successive kings of Assyria. PUL or Sardanapalus, according to Rawlinson (Outline of Assyrian History, p. 14), but compare Rowl. Herodotus, vol. i. p. 406, imposed a tribute, n. c. 771 (or 762 B.C.) upon Meshaem (1 Chr. v. 29; and 2 K. xv. 18). The Assyrian conqueror made his way to the land of the Trans-Jordanic tribes (1 Chr. v. 29) and the inhabitants of Gilet (2 K. v. 23), compare Is. ix. 1, to Assyria. Sualmaneser twice invaded (2 K. xviii. 3, 5) the kingdom which remained to Hosea. took Samaria n. c. 721 after a siege of three years, and carried Israel away into Assyria. In an inscription interpreted by Rawlinson (Herodotus, vol. i. p. 732), the capture of Samaria is claimed by King Sargon (Is. xx. 1) as his own achievement. The cities of Samaria were occupied by people sent from Babylon, Cuthah, Ava, Hamath, and Sepharvaim; and Habor, Habur, Hanar, and the gozan became the seats of the exiled Israelites.

Sumacheri b. c. 713 is stated (Rowl. Outline, p. 24, but compare Demetrius ap. Clem. Alexand. Stromato, i. 21, incorrectly quoted as confirming the statement) to have carried into Assyria 200,000 captives from the Jewish cities which he took (2 K. xviii. 13). Nebuchadnezzar, in the first half of his reign, n. c. 606-602, repeatedly invaded Judaea, besieged Jerusalem, carried away the inhabitants to Babylon, and destroyed the city and temple. Two distinct deportations are mentioned in 2 K. xxiv. 14 (including 10,000 persons) and xxv. 11. One father cited for them (Erumenias) flourished at the end of the tenth. This concurrence of all the oldest and most independent authorities in the omission of words which might so easily creep in from a marginal gloss, seems inconceivable with the supposition of their genuineness. They are, however, defended by Borne-

manna, De Wette, Meyer, and Alford, who would explain their omission by the homozoteleuton in ἱεροταυράχος τοι. το ἱεροτεσσαράχυς. This is unsatisfac-
tory, (1) because the homozoteleuton is so imperfect that it was not likely to cause any error; (2) because it would only occasion the loss of the words ὁ ἱεροταυράχος τοι. το ἱεροτεσσαράχυς; (3) because it does not appear how or why it should affect all one oldest and best authorities (including the versions used by all the principal churches) and leave hardly a trace of its influence on the great mass of modern manuscripts. Alford, it should be noted, in his edition of the Psalms, of 1840 has inserted the words as doubtful. The critical scholar may find it instructive to compare other examples of glossarial additions in the Received Text and the mass of later manuscripts of the Acts, in opposition to the most ancient authorities. See辑. ii. 30, 31; xxvii. 26, 27, 28, 29, 31, 32; xxviii. 18, 22, 24, 25; xxviii. 19; xxviii. 29, etc.
in 2 Chr. xxxvi. 20. Three in Jer. lii. 28, 29, including 4000 persons, and one in Dan. i. 3. The two principal deportations were, (1) that which took place n. c. 598, when Nebuchadnezzar, with all the forces he had collected, and captives were carried away; and (2) that which followed the destruction of the Temple and the capture of Zedekiah n. c. 588. The three which Jeremiah mentions may have been the contributions of a particular class or district to the general captivity; or they may have taken place under the orders of Nebuchadnezzar, before or after the two principal deportations. The captivity of certain selected persons n. c. 607, ordered by Nebuchadnezzar, who was cousin or lieutenant of his father Nabopolassar, a year before he refused to reign alone. The 79 years of captivity predicted by Jeremiah (xxv. 12) are dated by Pridiaux from n. c. 606 (see Connexion, anno 606; and comp. Davison, On Prophecy, Lect. vi. pt. 1). If a symbolical interpretation were required, it would be more difficult to regard (with Winer and Rosenmuller) as an indefinite period designated arbitrarily by a sacred number, than to believe with St. Augustine (Liberani in Ps. xxvii. 1) that they are a symbol of "all time." The captivity of Ezekiel dates from n. c. 598, when that prophet, like Mordecai the uncle of Esther (ii. 16), accompanied Jehoiachin.

We know nothing, except by inference from the book of Tobit, of the religious or social state of the Israelites in Assyria. On all this, the constant policy of 17 successive kings had completely estranged the people from that religion which centered in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah. Some priests at least were among them (2 K. xviii. 28), though it is not certain that these were of the tribe of Levi (4 K. xii. 31). The people had been nurtured for 250 years in idolatry, in their own land, where they departed not (2 K. xxii. 22, from the sins of Jeroboam, notwithstanding the proximity of the Temple, and the succession of inspired prophets (2 K. xvii. 13) among them. Depiring of these checks on their natural inclinations (2 K. xiii. 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbors in Media. And when, after the lapse of more than a century, they were joined n. c. 598 by the first exiles from Jerusalem, very few, if any, retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogies were probably lost, a fusion of them with the Jews took place, Israel ceasing to exist. Judah (xi. 13); and Ezekiel may have seen his own symbolical prophecy (xxvi. 15-29) partly fulfilled.

The captive Jews were probably prostrated at first by their great calamity, till the glorious vision of Ezekiel in the 5th year of the Captivity revived and reunited them. The wishes of their conqueror were satisfied when he had displayed his power by transporting them into another land, and gratified his pride by inscribim: on the walls of the royal palace his victorious progress and the number of captives deported. He had designed to increase the population of Babylon, for he sent Babylonian colonists into Samaria. One political end certainly was attained—the more easy government of a people separated from local traditions and associations (see Gesenius on Is. xxxvi. 16, and compare Gen. xlvii. 21). It was also a great advantage to the Assyrian king to remove from the Egyptian border states more especially those which were well-adapted to Egypt. The captives were treated not as slaves but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (Dan. iv. 40), or holding the most confidential office near the person of the king (Neh. x. 11; Tob. i. 13, 22). The advice of Jeremiah (xxix. 5, 6) was generally followed. The exiles increased in numbers and in wealth. They obeyed the institution of Neh. viii. 17, 18 (Isa. xix. 24). They kept up distinctions of rank among themselves (Ez. xx. 1). And though the assertion in the Tal- mun is unsupported by proof that they assigned thus early to one of their countrymen the title of Head of the Captivity, viz., captain of the people, 2 Esdr. v. 16, it is certain that they at least preserved their genealogical tables, and were at no loss to tell who was the rightful heir to David's throne. They had neither place nor time of national gathering, no Temple; and they offered no sacrifice. Yet the rite of circumcision and their laws respecting food, etc. were observed; their priests were with them (Jcr. xxxix. 1); and possibly the practice of creating synagogues in every city (Acts xx. 21) was begun by the Jews in the Babylonian captivity.

The Babylonian captivity was brought to a close by the decree (Ezr. i. 2) of Cyrus the great, 536, and the return of a portion of the nation under Sheshbazzar or Zerubbabel b. c. 535, Ezr. b. c. 458, and Nehemiah b. c. 443. The number who returned upon the decree of n. c. 538 (which was possibly framed by Daniel, Milman, *Hust. of Jews*, ii. 8) was 42,360, a number greatly inferior to the census of 530,000 (compare Ezra. ii. 60) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred (Prideaux, *Annales*) that the remaining 12,000 belonged to the tribes of Israel (compare Ezr. vi. 17). From the fact that out of the 24 courses of priests only 4 returned (Ezr. ii. 40), it has been inferred that the whole number of exiles who chose to continue in Assyria was about six times the number of those who returned. Those who remained (Esth. viii. 9, 11), and kept up their national distinctions, were known as The Dispersion (John vii. 55; 1 Pet. i. 1; James i. 1); and, in course of time, served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the Evangelists of the Christian faith.

Many attempts have been made to discover the ten tribes existing as a distinct community. Josephus (Ant. vi. 5, § 2) believed that in his day they dwelt in large multitudes, somewhere beyond the Euphrates, in Arrashet, according to the author of 2 Esdr. xiii. 45. Rabbinical traditions and fables, committed to writing in the middle ages, assert the same fact (Lightfoot, *Hor. Heb.* in 1 Cor. xiv. Appendix), with many marvellous amplifications (Eisenmenger, *Einl. Jud.* vol. ii., ch. x.; John, *Hebreae Commentarvth.* App. ii. vi.). The imagination of Christian writers has sought them in the neighborhood of their last recorded habitation: Jewish features have been traced in the Afghan tribes: rumors are heard to this day of a Jewish colony at the foot of the Himalayas: the Black Jews of Malabar claim affinity with them; elaborate attempts have been made to identify them recently with the Nestorians, and in the 17th century with the Indians of North America. But though history bears no witness of their present distinct existence, it enables us to track the foot-steps of the departing race in four directions after the time of the Captivity. (1.) Some returned and mixed with the Jews (Luke vii. 36; Phil. iii. 5, &c.). (2.) Some were left in Samaria, mingled with the Samaritans (Ezr. vi. 21; John iv. 12), and became bitter enemies of the Jews. (3.) Many remained in Assyria, and mixing with the Jews, formed colonies throughout the East, and were recognized as an integral part of the Dispersion (see Acts ii. 9, xxvi. 7; Buchanan’s *Christian Researches*, p. 212), for whom, probably ever since the days of Ezra, that pietistic prayer, the tenth of the Shemoneh Esre, has been daily offered. 

Sound the great trumpet for our deliverance, lift up a banner for the gathering of our exiles, and unite us all together from the four ends of the earth.” (4.) Most, probably, apostatized in Assyria, as Prideaux (anno 677) supposes, and adopted the usages and idolatry of the nations among whom they were planted, and became wholly swallowed up in them. Dissertations on the Ten Tribes have been written by Calmet, *Commentaire litteral*, vol. iii. and vi.; by Witsius, *Fugitivum*, and by J. D. Michaelis.

The Captivity was a period of change in the vernacular language of the Jews (see Neh. viii. 8) and in the national character. The Jews who returned were remarkably free from the old sin of idolatry: Amos 9:13. The Jews returned with a great revival of national and divine promise (Exx. xxvi. 24–28), was wrought in them. A new and deep feeling of reverence for the letter of the law and for the person of Moses was probably a result of the religious service which was performed in the synagogues. A new impulse of commercial enterprise and activity was implanted in them, and developed in the days of the Dispersion (see James iv. 13).

CARABASION (Papæsiun; [Vat. Capar- 
basiiun; Abl.]. Alex. Caparbasiiun; Mamroth), a corrupt name to which it is difficult to find anything corresponding in the Hebrew text (1 Esdr. ix. 34).

CARBUNCLE. The representative in the Λ. V. of the Hebrew words έκσωθικός and βαρέκθος, or βαρέκθη.

1. *Eksōthikós* (Έξωθικός): άλίθος κρυστάλλων: άλίθος γλαυκίου, Sym. Theod.; άλατις παρασκευήσης, Mq. *Lapis celestius*, 3 Esdr. ii. 11. 13; occurs only in the Psalter in the description of the beauties of the new Jerusalem: “I will make thy windows of agates and thy gates of carbuncles” (comp. Tob. xiii. 16, 17, and Rev. xxi. 21 – 22) = “general images,” as Lowth (Notes on Is. i. c.) has remarked, “to express beauty, magnificence, purity, strength, and solidity, agreeably to the ideas of the Eastern nations.” The translators of the A. V., having in mind the etymology of the Hebrew word, render it “carbuncle,” but as many precious stones have the quality of “shining like fire,” it is obvious that such an interpretation is very doubtful. Symmachus, referring the word to a Chaldee signification of the root, namely, “to bore,” understands “sculptured stones,” whence the Vulg. *lypides sculpti* (see Lie semmler, *Schol. ad Esdr. iv. 13*). Perhaps the term may be a general one to denote any bright sparkling gem, but as it occurs only once, without any collateral evidence to support it, it is impossible to determine the real meaning of the word. 

2. *Bărēkthos, bărcēketh* (Βαρέκθος, Παρεκθης): σμαιραγδός, κεραυνός, Sym.: *smaragdus*, the third stone in the first row of the sacerdotal breastplate (Ex. xxviii. 17, xxix. 10), also one of the mineral treasures of the king of Tyre (Ex. xxxviii. 13). Braun (De Voel. Sacror. Heb. p. 652. Anst. 1680) supposes with much probability that the smaragdus or emerald is the precious stone signified. This view is supported by the LXX. (which always gives σμαιραγδός as the representative of the bărcēkthos, the Vulgate, and Josephus (Ant. iii. 7, § 6). Hliny (xxviii. 5) speaks in terms of the warmest admiration of the smaragds, and mentions no fewer than twelve kinds, but it is probable some of them are malachites or glass. It is certain that the smaragds which, according to Theophrastus (Fr. ii. 24. ed. Schneider), was sent as a present from the king of Babylon into Egypt,

*extimare institutum ignem ex igniote* “(Freytag, *Lev. Amb. 8. V.*)

b. From παρεκθης “to send forth lightning,” “v. flash.”
and which, as Egyptian chronicles state, was four cubits long by three wide, must have been made of some other material than emerald; but σμάραγδος is used by Theophrastus to denote the emerald.

"This gem," he says, "is very rare and of a small size. It has some peculiar properties, for it renders water of the same color as itself. It soothes the eyes, and people wear seals of this stone in order that they may look at them." Mr. King (Antique Gems, p. 30) is of opinion that the smaragdi of Thity may be confined to the green ruby and the true emerald. Braun believes that the Greek σμάραγδος, μαραγδος is etymologically allied to the Hebrew term, and Kalisch (Ex. xxvii. 17) is inclined to this opinion: see also Gesenius, Hebr. et Ch. Lex. s. v. 770. Some, however, believe the Greek word is a corruption of the Sanskrit smāryakata, and that both the gem and its name were imported from Bactria into Europe, while others hold that the Sanskrit term came from the West. See Mr. King's valuable remarks on the Smaragdos, "Antique Gems," p. 30–37.

W. H.

CARCASA (καρσασα, [this form belongs to Carshena, ver. 14]; Ῥαβδας or Ῥαβδαί, Alex. Ἀρκάςα; [Comp. Ἀρκασάς]; Choræus), the seventh of the seven "chamberlains" (i.e., eunuchs, καρσάσας) of king Abacenus (Ezech. i. 10). The name has been compared with the Sanskrit kaṛṣṭiya, a city on the Euphrates (1 Esdr. i. 25), the same as Carcinum.

A.

CARCHAMIS (καρχάμις; [in Jer.]) Xarpes; [Comp. Karos;] Charcois, a city on the Euphrates (1 Esdr. i. 25), the same as Carcinum.

G. R.

CAREAH (καρέαθ; [bald-head]; Kapath; Alex. Κάρος; [Abb. Kapis]; Carie, father of Johanan (2 K. xxv. 23), elsewhere in the A. V. spelt KARIAB.

CARRIA (Καρρία), the southern part of the region which in the N. T. is called Asa, and the southwestern part of the peninsula of Asia Minor.

In the Roman times the name of Caria was probably less used than previously. At an earlier period we find it mentioned as a separate district (1 Macc. xxv. 23). At this time (n. c. 139) it was in the enjoyment of the privilege of freedom, granted by the Romans. A little before it had been signed by them to Rhodes, and a little later it was incorporated in the province of Asia. From the context it appears that many Jews were resident in Caria. The cities where they lived were probably Halicarnassus (ib.), Cymidus (ib. also Acts xxvi. 7), and Miletus (Acts xx. 15–38). Off the coast of Caria were the islands Patmos, Cos, Rhodes.

J. S. H.

CARMANIIANS (Carmenii). The inhabitants of Carmannia, a province of Asia on the north side of the Persian Gulf (2 Esdr. xx. 30). They are described by Strabo (xx. p. 727) as a warlike race, worshipping Ares alone of all the gods, to whom they sacrifice an ass. None of them married till he had cut off from the head of an enemy and presented it to the king, who placed it on his palace, having first cut out the tongue, which was chopped up into small pieces and mixed with meal, and in this condition, after being tasted by the king, was given to the warrior who brought it, and to his family to eat. Necradius says that most of the customs of the Carmannians, and their language, were Persian. Arrian gives the same testimony (Ind. 38), adding that they used the same order of battle as the Persians. W. A. W.

CARMEL (ΧαρΜελ; [Var.] Alex. Χαρμεΐ; [Abb. Kapith;] Caro, 1 Esdr. v. 25; [Harim].

CARMEL. Nearly always with the definite article, "τὸ τῆς Χαρμελοῦντος," i.e., "the park," or "the well-wooded place" [garden-land; First]. 1. (οῦ Καρμηλός; Carmel; Carmenus, Carmel). In Kings, generally "Mount Carmel," τὸ τῆς Χαρμελοῦντος; in the Prophets, "Carmel." A mountain which forms one of the most striking and characteristic features of the country of Palestine. As it accentuates more distinctly the lay which forms the one indentation in the coast, this noble ridge, the only headland of lower and central Palestine, forms its southern boundary, running out with a bold bluff promontory all but into the very waves of the Mediterranean. From this point it stretches in a nearly straight line, bearing about S. S. E., for a little more than twenty miles, when it terminates suddenly by a bluff somewhat corresponding to its western end, breaking down abruptly into the hills of Jasim and Samaria which form at that part the central mass of the country.

Carmel thus stands as a wall between the maritime plain of Sharon on the south, and the more inland expanse of Esdraelon on the north. Towards the former the slopes are steeper, by which the central ridge descends, are gradual; but on the north side the gradients are more sudden, in many places descending almost by precipices to the Kishon, which runs at the foot of the mountain in a direction generally parallel to the central axis.

The structure of Carmel is in the main the Jura formation (upper eolith), which is prevalent in the centre of Western Palestine—a soft white limestone underlaid by red and yellow layers of flint. As a result of lime-bone formations it abounds in caves (c. more than 2000), Milbin, ii. 46), often of great length

The smaragdi of Cyprus, however, of which Theophrastus speaks, is the copper emerald, Carum-ba, which he seems himself to have suspected.
The whole mountain-side was dressed with blossoms, and flowerering shrubs, and fragrant herba " (Martineau, p. 539)."

Carmel fell within the lot of the tribe of Asher (Josh. xix. 26), which was extended as far south as Dor (Tantura), probably to give the Asherites a share of the rich corn-growing plain of Sharon. The kingdom of Judah extended to the Lebanon and to the Sea of Galilee (Rit- ter, 712-13). The round stones known by the names of "Lapidies Judaicae" and "Elijah's melons," are the bodies known to geologists as "geodes." Their exterior is short or flint of a lightish brown color; the interior hollow, and lined with crystals of quartz or chalcedony. They are of the form, and often the size, of the large water-melons of the east. Formerly they were easily obtained, but are now very rarely found (Seetzen, ii. 131-4; Parkinson's Organic Remains, i. 322, 431). The "olives" are commoner. They are the fossil spines of a kind of echinus (ceterius globuliferus) frequent in these strata, and in size and shape are exactly like the fruit (Parkinson, iii. 45). The "apples" are probably the shells of the ceterius itself. For the legend of the origin of these "fruits," and the position of the "field" or "garden" of Elijah in which they are found, see Mislin, ii. 64, 65. רו

A broad and gently undulating ridge at the W. end about 600 ft, and the E. about 1600 feet above the sea. The highest part is some four miles from the east end, at the village of Lysh, which, according to the measurements of the English engineers, is 1725 feet above the sea. In appearance Carmel still maintains the character which it had in the times of Elijah (Seetzen, xxxii.). Modern travellers delight to describe its "rocky dells with deep jungles of cove," — its "shrubbery thicker than any others in central Palestine" (Stanley, M.S.), — its "impenetrable bushwood of oaks and other evergreens, tenanted in the wilder parts by a profusion of game and wild animals" (Porter, Flora, &c.), but in other places bright with "besom" flowers, "the infinite roses and various flowering trans- porters" (Van de Velde). "There is not a flower," says the last-named traveller, "that I have seen in Galilee, or on the plains along the coast, that I do not find here on Carmel .... still the fragrant, lovely mountain that he was of old " (i. 317-18).

The legend is sometimes told of Lazarus (Seetzen, Relien, 1854, i. 134).

The cupola of the convent is 500 ft. above the sea (Admiralty Chart, 1558). For the general form of the ridge, see the section on Van de Velde's new map.

"The Flora of Carmel," says Schubert, writing on the subject, "is by no means inferior to that of all the other countries in all Palestine, since it unites the products of the mountain with those of the valley and the sea-coast." He enumerates forty-seven different kinds of flowers found there, without pretending to complete the list. "A botanist," he remarks, "might spend a year there, and every day be adding new specimens to his collection " (Reise in das Morgenland, ii. 212).

Mr. Tristram, who wandered at leisure over the Carmel range, speaks of "the wonderful profusion of flowering shrubs, in all their glory, when everything was in full blossom (March)," as the grand characteristic of the "excellency of Carmel." He mentions (giving at the same time the botanical names) the arbutus, myrtle, scented bay, guelder-rose, a sweet-scented evergreen like the hars- ninus, elder, carob-tree or locust, wild-sweet, wildberry, tree-broom, Judas-tree (one mass of bunches of brilliant red hawthorn-shaped bloom), honey-scented hawthorn, service-apple, and most abundant of all, the stornax-tree, "one sheet of pure white blossom, rivaling the orange in its beauty and its perfume; all these in flower together wafted their fragrance in volumes through the air." "Then the ground, wherever there was a fragment of open space, was covered with tall red hollyhocks, pink convolvules, valerians, a beautiful large red linum, a gladiolus, a gigantic mottled amaranth, red to- lips, ranunculuses (large and red), pleasant's eye, of endless varieties, tufts of exquisite cyclamen, a mass of bloom under every tree, five species of orchis,— the curious Orchis atrata, with its bold-like lip, another like the spider-orchis, and a third like the man-orchis; while four species of Oconea, and especially the brilli- ant yellow Oconea Syriaca, hung from every tree. It was the garden of Eden run wild; yet all this beauty scarcely lasts a month " (Land of Israel, pp. 496, 497, 24 ed.).

the
of unfurling the French flag on various occasions. Edward I. of England was a brother of the order, and one of its most famous generals was Simon Stokes of Kent (see the extracts in Wilson's Lands, ii. 246). For the convent and the singular legend connecting Mount Carmel with the Virgin Mary and our Lord, see Mission, ii. 47-50). By Napoleon, it was used as a hospital for General Acre, and after its retreat was destroyed by the Arabs. At the time of Irby and Mangles's visit (1817) only one friar remained there (Irby, 60).

G.

* It is instructive, as a means of learning the relative position of places, to know what points of geographical interest can be seen from such watchtowers of the Holy Land. The best position for viewing the prospect from Carmel is that furnished from the flat roof of the convent. Standing there, with our faces toward the east, the attitude of the Hebrew in naming the points of the compass, we have behind us "the great and wide sea," as the Psalmist calls it (civ. 25), which suggested to the sacred writers so many of their grandest images for setting forth an idea of God's power. Before us lies an extensive reach of the plain of Esdraelon (Jezreel), and the summits of Gilboa and the lesser Hermon.

On the southeast is the mountainous tract, known as that of Ephraim or Samaria, filled up with a rolling expanse of hill-tops to an indefinite extent. Looking to the south, along the coast, at the distance of ten miles, is Acre, the site of a famous castle of the Crusaders, one of the last footholds which they relinquished to the Saracens. A few miles beyond, though not in sight, are the ruins of Cesareon, so interesting from its connection with the fortunes of the great apostle. The line of vision on the north is bounded by the hills near Nazareth and Safed. Indeed, the path which leads up to the monastery of Carmel, indented in the white limestone, is distinctly visible, like a strip of snow, from the Wely so famous for its view of Esdraelon behind Nazareth. It would be easy, far as the distance is concerned, to make out the position of ancient Tyre, now Suri; but the projection of Res el-Ablid, the White Promontory, hides it from view. The graceful curve of the bay of Acre, sweeping from that city (An colony of the O. T. and Phoenicia), to the head of Carmel, appears from here to great advantage. Glimpses of the Kishon (el-Mukattat) as its waters flash under the sun-light mark, at points here and there, the course of that stream as it winds its way from the foot of Tabor to the Mediterranean. Directly at the base of the mount is the little sea-port of Hitha, one of the harbors of Asher, but actually held by the Sidonians (Judg. i. 21). A rich landscape of olive-yards, gardens, vegetables, wheat-fields, and a few palm trees, fills up the narrow margin between the sea and the roots of the mountain.

For a description of the scene from other hands, see Lord Nugent's Lands, Classical and Sacred, ii. 157; Tristram's Land of Israel, p. 65; Presbyter's Land of the Gospel, p. 150 ff; and Tischendorf's Reise in den Orient, ii. 222-223.

H.

2. (খামিলা in Josh.; Ḫareth in Sam.: Carmel [Carneol].) A town in the mountainsous country of Judah (Josh. xv. 55), familiar to us as the residence of Nabal (1 Sam. xxv. 2, 5, 7, 40), of the native place of David's favorite wife, "Ab- 

axa the Carmelitess" (1 Sam. xxvii. 3; 1 Chr. iii. i). This was doubtless the Carmel at which Saul

set up a "place" (מְקוֹם, i.e. literally a "handy") comp. 2 Sam. xviii. 18, "Abshalom's place," where the same word is used) after his victory over Am- 

uel (1 Sam. xvii. 12). And this Carmel, and not the northern mount, must have been the spot at which king Uzziah had his vineyards (2 Chr. xxvi. 10). In the time of Ezechias and Jerome it was the seat of a Roman garrison (Onomasticon, Carmelis). The place appears in the wars of the Crus- 

ades, having been held by king Amalrich against Saladin in 1172. The ruins of the town, now Karneil, still remain at ten miles below Hebron in a slight slope close to the summit of Mount Carmel (Ma'noon, Zifh, Ziph), and other places named with Carmel in Josh. xv. 55. They are described both by Robinson (i. 494-8) and by Van de Velde (ii. 77-79), and appear to be of great extent. Conspicuous among them is a castle of great strength, in the walls of which are still to be seen the large bevelled masonry characteristic of Jewish buildings. There is also a very fine and large reservoir. This is mentioned in the account of king Amalrich's occupation of the place, and now gives the castle its name of Ksar el-Bichlik (Van de Velde, ii. 78).

W. A. W.

CARMEITESS (খামিলা, Ḫareth, Car- 

melitess). A woman of Carmel in Judah: used only of Abigail, the favorite wife of David (1 Sam. xxvii. 3; 1 Chr. iii. 1). In the former passage both LXX. and Vulg. appear to have read ἀκρίμαλτισ, "Carmelitess." W. A. W.

CARMI (খামিলা; a vine-dresser, Ges.; a dis- 

tinguished one, Furst.: Ḫarmā; Char- 

mail). 1. A man of the tribe of Judah, father of Achan, the "troubler of Israel" (Josh. vii. 1, 18; 2 Sam. ch. 7, vs. 20) who was the last of a race of Moabites, or Moabites. In 1 Chr. iv. 1 the name is given as that of a "son of Ju- 

dah;" but the same person is probably intended; because (1) no son of Judah of that name is elsewhere mentioned; and (2) because, out of the five names who in this passage are said to be "sons" of Judah, none but Pharee are strictly in that relation to him. Hezron is the 2d generation, Hur the 4th, and Shobal the 6th.

2. [Alex. Ḫarmē in Num.; Vulg. Carmin in 1 Chr.] The 4th son of Reuben, progenitor of the family of the CARMITES (খামিলা) (Gen. xvii. 9; Ex. vi. 14; Num. xxvi. 6; 1 Chr. v. 3). G.

CARMITES, THE (খামিলা: Ḫarmē; Char- 

mite). A branch of the tribe of Reuben, descended from Carmi 2 (Num. xxvi. 6).

CARNAIM (খামিলা: Alex. Ḫarpnev; [Sin. in 1 Macc. v. 26, Ḫarpvē]: Cornim), a large and fortified city in the country east of Jordan — "the land of Gaadhah," containing a "temple" (খা}
CARNION. [CArnion.]

CART. [CArniOn.]

CARTER. [HANDCRAFT.]

CARTER, CARRIAGE. This word occurs only six times in the text of the A. V., and it may be useful to remind the reader that in none of these does it bear its modern sense, but signifies what we now call "luggage." The Hebrew words so rendered are three.

1. נָּבַע, c't, generally translated "stuff," or "vessels." It is like the Greek word οἰκεῖος; and in its numerous applications perhaps answers most nearly to the English word "thing." This word, rendered "cargoes," occurs in 1 Sam. vii. 22,—"David left his ... the keeper of the ... baggage."" Also Is. x. 28,—"At Michmash he hath left his baggage.""

2. מָשֵׁל, memil, "heavy matter," Job. xviii. 21 only, though perhaps the word may bear a signification of "preciousness," which is sometimes attached to the root, and may allude to the newly acquired treasures of the Danites (I.XX. Alex. מְשֵׁל מְשַׁלמָה מְשַׁלמָה). The word rendered "carriages" in Is. xvi. 1 should, it would appear (Gen. Thes. 917 b; Jenius, ii. 101), be "your burdens." 4. In the N. T., Acts xxii. 16,—"we took up our carriages" is the rendering of ἑλκυσσάτομον, and here also the meaning is simply "luggage" (Jer. penserat)."

5. No. 10 of 1 Sam. vii. 20, and xxvi. 5, 7—and there only—"carriage" is employed in the sense of a wagon or cart, and the "place of the carriage" answering to "trench" in the text. The Hebrew word is נָּבַע, from נָּבַע, a wagon, and the allusion is to the circle of wagons which surrounded the encampment (Gen. Thes. 989).

For carriages in the modern sense, see CART.

CARTSHENA (נְשֵׁל: I.XX. omits: [rather, ἀρισταῖος: ΦΑ. ἀρισταῖος; Comp. Καρπέβας: Daromātēs], one of the seven princes (נָּבַע) of Persia and Media who saw the king's face; and

The incident referred to in Acts xxii. 16 (see No. 4 above) shows the presence of an eye-witness. What Paul and his travelling companions did was to place their baggage, in part perhaps the arms which they were carrying up to Jerusalem (Acts xxiv. 11), in their beasts of burden. The leading and unloading sat the first in the kingdom of Ahasuerus (Esth. i. 14). A similar name, Carshen, is found in modern Persian. For other derivations from the ancient dialects of Persia, see Cesennus, 717.

CART (נָּבַע; θανατόν; also rendered "wagon," Gen. xiv. 19, 27; Num. vii. 3, 7; from נָּבַע, roll, Ges. p. 980), a vehicle drawn by cattle (2 Sam. vi. 6), to be distinguished from the chariot drawn by horses. [CHARIOT.] Carts and wagons were either open or covered (Num. vii. 3), and were used for conveyance of persons (Gen. xiv. 19), burdens (1 Sam. vi. 7, 8), or produce (Am. i. 13). As there are no roads in Syria and Palestine and the neighboring countries, wheel-carriges for any purpose except conveyance of agricultural produce are all but unknown; and though modern usage has introduced European carriages drawn by horses into Egypt, they were unknown there also in times comparatively recent. (Stanley, S. o. P. 135; Porter, Dummess, i. 339; Lynch, Narrative, 75, 84; Xichu, Voyage, i. 123; Layard, Nin. ii. 73; Mrs. Poole, Englishwoman in Egypt, 2d series, 77.) The only cart used in Western Asia has two wheels of solid wood (Olearius, Travels, 418; Sir R. K. [r] Porter, Travels, ii. 593). For the machine used for threshing in Egypt and Syria, see THRESHING. But in the monuments of ancient Egypt representations are found of carts with four wheels, having four or six spokes, used for carrying produce, and of one used for religious purposes having four wheels with eight spokes.
CARVING

used in carrying timber and other articles (Layard, *Nin. ii. 396, Nim. & Bab. 134, 447, 583, Mon. of Bab. pt. ii. pls. 12, 17). Four-wheeled carriages are said by Phyl (N. H. vii. 50) to have been invented by the Phrygians (Wilkinson, *Anc. Egypt. Abrig. l. 394, 385; ii. 39, 47). The carts used in India for conveying goods, called Sugar or Hackeri, have two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, *India*, pp. 346, 352).

H. W. P.

in India for conveying goods, called Sugar or Hackeri, have two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, *India*, pp. 346, 352).

H. W. P.

**CASLUHIM**

place of uncertain site on the road between Babylon and Jerusalem (Ex. vii. 17). Neither the Caspie Pyle nor the city Kas-rin, with which some writers have attempted to identify it, are situated upon this route. (Gesen. *Thes. 703."

"First has a long note in his Lexicon on this enigmatical word. He supposes it to denote "the snowy-mountainous Caucasian region." It is not said that Ezra himself came to this place on his journey from Babylonia to Jerusalem; but only that the river Ahava (Ex. viii. 15), from the banks of which he sent messengers to the Jewish exiles in Caspia, lay on his route. This stream (mentioned only in Ezra) may have been in the extreme north of Babylonia; and the caravan in this instance, taking a more northern track than usual, may have passed so near this point as to render it practicable while they halted there, to send the messengers to Caspia and await their return. Kitto suggests on Ahava (*Cycl. of Bibl. Lit.*, 3d ed.) that in this instance a more circuitous route may have been a safer one for the wayfarers, and was chosen on that account. First, guided by an ancient Jewish tradition, would identify the "large country" (Is. xxvii. 18) to which Shelaon, the treasurer of Hezekiah, was to be driven, with this same Caspia or Caspia.

II.

**CASTLEUX**

*Casaric*: Colenso, 1 Macc. i. 54, iv. 52, 59; 2 Macc. i. 9, 18, x. 5. [CASLEU: MONTHS.]

**CASLUHIM**

in 1 Chr., Rom. Vat. omit, Alex. Comp. *Kasluhima*.]

Chaldea, *Chaldea*), a Chaldean people or tribe (Gen. x. 14: 1 Chr. i. 12). In both passages in which this word occurs, it would appear, as the text now stands, as if the Philistines came forth from the Casluhim, and not from the Caphtorim, as is elsewhere expressly stated: here therefore there would seem to be a transposition [CAPHTOR]. The only clue we have as yet to the position of the Casluhim is their place in the list of the sons of Mizraim between the Faithrassim and the Caphtorim, where it is probable that they were seated in Upper Egypt [PATHROS: CAPHTOR]. The LXX. seem to identify them with the *Kasluhima* of Ps. lviii. 31 (A. V. +"princes"), which some, though not the LXX. in that place, take to be a proper name, and compare with the native civil name of Hermopolis Magna. This would place the Casluhim in the Heptanomis [HASPANIMM]. Bochart (*Phileg., iv. 31) suggests the identity of the Casluhim and the Cohaim, who are said to have been an Egyptian colony (Herod. ii. 104; Dio. Sic. i. 28), but this story and the similarity of name (Ges. *Thes. s.v.*) do not seem sufficient to render the supposition a probable one. Gesenius, however, gives it his support (*Thea. l. c.*). Forster conjectures the Casluhim to be the inhabitants of Cassitata, the tract in which is the slight elevation called Mount Casius (*Ep. ad Michaelis*, p. 16 ff.). Rouen assumes this to be proved (*Bibloev. p. 28. There is, however, a serious difficulty in the way of this supposition — the nature of the ground, a low littoral tract of rock, covered with shifting and even quick sand, like the neighboring "Serbiani bog," and which we cannot suppose ever to have supported much animal or vegetable life, far less a whole people or tribe.

R. S. P.

CASSIA

The representative in the A. V. of the Hebrew words ḳıḥḇīth and kētāzith.

1. ḳıḥḇīth (ἱχθὺς "fish" or κασσία, "cassia, stoecke") occurs in Ex. xxx. 24, as one of the ingredients in the composition of the "oil of holy ointment," and in Ez. xxvii. 19, where "bright iron, cassia, and coloams" are mentioned as articles of merchandise brought by Dan and Javan to the market of Tyre. There can be no doubt that the A. V. is correct in the translation of the Hebrew word, though there is considerable variety of reading in the old versions. The LXX. and Josephus (Jos. iii. 8, § 3) have ḳıḥḇīth, i.e. some species of figne, perhaps the liv iulamis, which has an aromatic root-stick, according to the Vulg. (in Ez. i. c.) read stoecke, "liquid myrrh." The Arabic versions of Sandals and Erpenius conjecture costus, which Dr. Boyle (Kitto's Cyc. art. Ketizith) identifies with Auck-lindorii Costus, to which he refers not the ḳıḥḇīth, but the kētāzith of the Hebrew Scriptures (see below). The Chaldee and Syriac, with most of the Eastern versions, understand costus, which they follow by Gesenius, Simons, First, Lee, and all the lexicographers. The accounts of cassia as given by ancient authors are confused; and the investigation of the subject is a difficult one. It is clear that the Latin writers by the term cassia understood both the Oriental product now under consideration, as well as some low sweet herbsaceous plant, perhaps the Drypne gaulicum, Linn. (see Fleischer in Cephal. p. 32, and Du Moral, Encycl. Diet. Antiquit. 2:77); but the Greek word, which is first used by Herodotus (ii. 86), who says (iii. 110) the

Arabians procured it from a shallow lake in their country, is limited to the Eastern product. Dioscorides mentions several kinds of cassia, and says that they are produced in Spicy Arabia (i. 12). One kind is known by the name of monogloss, or according to Dioscorides (De Théât. ad fin. p. 108), of monogloss, from the present city and promontory Masylon, on the coast of Africa and the sea of Babel Meneb, not far from the modern Cape Gournafón (Sprengel, Anm. ad Deccor. i. 12). Will not this throw some light on Ez. xxvii. 19, where it will be observed that, instead of the rendering "going to and fro" in the text of the A. V., the margin has μεζαίον. "Dan and Javan and Mezulah tread in the markets with cassia, calamus," etc. The cassia would be brought from India to Mezulah, and from thence exported to Tyre and other countries under the name of Mezulah, or Mezulah cassia.\(^a\)

Dioscorides speaks of another kind of cassia called κῦτος, which has been supposed by some to be substantially the same as the Hebrew word κῦθιθ, to which it certainly bears a strong resemblance. If the words are identical, they must denote cassia of different qualities, for the κῦτος of Dioscorides was very inferior, while we cannot doubt that the cassia used in the composition of the holy ointment would be of the best kind.

Cassia is not produced by any trees which are now found growing in Arabia. It is probable therefore that the Greek authors were mistaken on this subject, and that they occasionally have regarded produce imported into Arabia, and thence exported to other countries as the natural productions of that country. The cassia-bark of commerce is yielded by various kinds of Cinnamomum, which grow in different parts of India, and is not the produce of only one species of tree. Cinnamomum mohlabAticum of S. India supplies much of the cassia-bark of commerce. Dr. Hooker says that cassia is an inferior cinnamon in one sense, though, as it never comes from the same species as the true cinnamon, the statement is ambiguous.

2. Kētāzith (ἡκταζής "rattle" or κασσία, "cassia") only in Ez. viii. 8. "All thy garments smell of myrrh, aloes, and cassia." This word is generally supposed to be another term for cinnamon; the old versions are in favor of this interpretation, as well as the etymology of the Hebrew word. The Arabic reads سياح from its description by AbulFadl and Wazzem (Islamic, Hvrb. ii. 304-5), evidently denotes some cinnamon-yielding tree. Dr. Boyle suggests (see above) that kētāzith is identical in meaning and in form with the Arabic لثحث, kott, or (Syrian) κοκκοθ, whence is probably derived the name of the Greeks and Romans. Dioscorides (i. 15) enumerates three kinds of costus, an Arabian, an Indian, and Syrian sort: the first two are le Sprengel referred to Costus arbores, Linn. (Zäg.

---

\(^a\) From "ιχθὺς," Arab. "民办," or "ال," "to cleave," "to tear lengthwise," "so-called from the splitting of the bark.

\(^b\) The country of the Moavites was in the Cinnamomum region, and not far from Aromat Emporium, and the author of the Periplus particularly coasted amongst the exports of the same coast (Tennent, Ceylon, 690, note). As to "κυτος," see Bochart, Geogr. Sac. p. 1. lib. ii. c. 21, and Rosenmuller, Schol. ad Ez. i. c., who, however, identify it with Sansa, in Arabia.
CASTLE

[Fortifications.]

CASTOR AND POLLUX, the Dioscuri (Διόσκουροι, Acts xxviii. 11). For the mythology of these two heroes, the twin-sons of Jupiter and Leda, we must refer to the Dict. of B. and M. We have here to do with them only so far as they were connected with seafaring life. They were regarded as the tutelary deities (θεοι σαρτίποις) of sailors. They appeared in heaven as the constellation Gemini. Immediately on shipboard they were recognized in the phosphorescent lights, called by modern Italian sailors the stelle di St. Elmo, which play about the masts and the sails ("In magna tempestate apparent quasi stelle velo incidentes: adjurent se tute percuteanties existuam Polluæs et Castoris numine," Senec. Nat. Quæst. i. 1; comp. Plin. ii. 37). Hence the frequent allusions of Roman poets to these deities in connection with navigation (see especially Hor. Carm. i. 3. 2; "fratres Helene, Incida sidera," and iv. 8. 31). As the ship mentioned here by St. Luke was from Alexandria, it may be worth to notice that Castor and Pollux were specially honored in the neighboring district of Cynouria (Schol. Vind. 4. 6). In Catull. iv. 27, we have distinct mention of a boat dedicated to them. See also lxviii. 65. In art these deities were sometimes represented simply as stars hovering over a ship, but more frequently, as young men on horseback with conical caps, and stars above them (see the coins of Rhiethium, a city of Bruttii, at which St.

CATERPILLAR

Felix communis. The representative in the A.V. of the Hebrew words chaisil and yelek.

1. Chaisil (ךֵיתָּל): "sparrow, sparrow, sparrow" (כֵיתָּל).

2. Eve to a proverb: —

"Catus amat ponzu, sed non vult tangere plantam." (Even)

3. Letting 1 dare not wait upon 1 would.

Like the poor cat I'll the shade. — Shaksp. Macbeth, i. 7.

See Tranch’s Lessons in Proverbs, p. 149.

Silver coin of Bruttii. Obv.: Heads of Castor and Pollux to right. Rev.: Castor and Pollux mounted, advancing to right. In the exergae PETTHRIN.

Paul touched on the voyage in question, ver. 13). Such figures were probably painted or sculptured at the bow of the ship (hence παράστασις: see Dict. of Antony, art. Insigne). This custom was very frequent in ancient shipbuilding. Herodotus says (ii. 57) that the Phenicians used to place the figures of deities at the bow of their vessels. Virgil (Geor. v. 200) and Ovid (Trist. i. 10. 2) supply us with illustrations of the practice; and Cyril of Alexandria (Cramer’s Catenæ, ad l. c.) says that such was always the Alexandrian method of ornamenting each side of the prows. [Stru.] J. S. II.

giberaceae). The koost of India, called by European Indian sorts, is the root of what Royle has named Acklaudia costus. There is no reason, however, why we should abandon the explanation of the old versions, and depart from the satisfactory etymological evidence afforded by the Hebrew term to the doubtful question of identity between it and the Arabic koost.

W. H. II.

See Tranch’s Lessons in Proverbs, p. 149.

Silver coin of Bruttii. Obv.: Heads of Castor and Pollux to right. Rev.: Castor and Pollux mounted, advancing to right. In the exergae PETTHRIN.

Paul touched on the voyage in question, ver. 13). Such figures were probably painted or sculptured at the bow of the ship (hence παράστασις: see Dict. of Antony, art. Insigne). This custom was very frequent in ancient shipbuilding. Herodotus says (ii. 57) that the Phenicians used to place the figures of deities at the bow of their vessels. Virgil (Geor. v. 200) and Ovid (Trist. i. 10. 2) supply us with illustrations of the practice; and Cyril of Alexandria (Cramer’s Catenæ, ad l. c.) says that such was always the Alexandrian method of ornamenting each side of the prows. [Stru.] J. S. II.

The word Catus occurs only once in classical Latin, namely, in Martial, Epig. xiii. 69; but that some bird is intended is beyond a doubt. The ancient Greeks and Romans do not appear to have kept domestic cats, we have sought in vain for the slightest allusion to Felis domesticus in classical authors.
CATHUA

CATHU'A (Kathew [Vat. Koch: Canova], 1 Esdr. v. 30). Apparent answer to GÔBEL in Hebrew text. (Fritzsche [Eng. Handb. loc. cit.] makes Καθέων the representative of Gôbêl, and finds no Hebrew correspondent of Kathoa. A.)

CAUSTICI. (Bull.)

CAULS (קַעַל; ἐμφάλωκα: torques). The margin of the A. V. gives "networks." The Old English word "caul" denoted a netted cap worn by women. Compare Chaucer ("Lyd of Bath's Tale, C. T. I. 6589): "Let se, which is the prowetest of him alle,

That wereth or a covercheif or a cote."

The Hebrew word קַעַל thus rendered in Is. iii. 18, is, like many others which occur in the same passage, the subject of much dispute. It occurs but once, and its root is not elsewhere found in Hebrew. The Rabbinical commentators connect it with קַעַל, shibbets, rendered "embroider" in Ex. xxviii. 39, but properly "work in squares, needlework." So Knobel (loc. cit.) explains קַעַל as "the name of garments wrought in checker-work." Rashi says they are "a kind of network to adorn the head." Albernius is more full: he describes them as "head-dresses, made of silk or gold thread, with which the women bound their heads about, and they were of checker-work." The word occurs again in the Mishna (Cilt., xxvii. 10), but nothing can possibly be inferred from the passage itself, and the explanations of the commentators do not throw much light upon it. If there appears to be used as part of a network worn as a head-dress by women. Bartnera says it was "a figure which they made upon the network for ornament, standing in front of it and going round from one ear to the other." Beyond the fact that the קַעַל were head-dresses or ornaments of the head-dress of Hebrew ladies, nothing can be said to have been learnt about them.

CAVE

CAVE (קַיָּב; σπήλανα: spelaeum; in A. V. Is. ii. 19, hole; [Is. xxiii. 14.] Jer. vii. 11, den; Josh. xiii. 4, literal. Hebrew, Manon, Vulg.). The chalky limestone of which the rocks of Syria and Palestine chiefly consist presents, as is the case in all limestone formations, a vast number of caverns and natural fissures, many of which have also been artificially enlarged and adapted to various purposes both of shelter and defense. (Page, Text-book of Geology, p. 141; Kittto, Phys. Geogr. of Pal., p. 72.) This circumstance has also given occasion to the use of so many words a number of which are employed in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places in their neighborhood. Out of them, besides No. 1, may be selected the following:

II. קַיָּב or קָיָּב (Ges. p. 458), a hole; usually סֶפֶּרֶךְ and סֶפֶּרֶךְ. From this come (u.) קָיָּב, dweller in caves, the name of the Horites of Mount Seir, Wady Glasgow, expelled by the Edomites, probably alluded to by Job, a Troglobyte race spoken of by Strabo. (Gen. xiv. 6, xxix. 21; Deut. ii. 12; Job xxx. 6; Strab. i. 42; xxvi. pp. 775-776; Barekhard, Syrig., p. 410; Robinson, ii. 63, 157; Stanley, S. of P., §§ 68-71.) [Horites.]

(b.) קָיָּב, boul of caverns (Ez. xvi. 16, 18; Barekhard, Syrig., pp. 110, 286): ἀγαπαρίσις, LXX.; Auran, Vulg. [Haran.] (c.) קָיָּב, house of caverns, the two towns of Bethhoron (Josh. xvi. 3, 5). [Beth-Horon.] (d.) קָיָּב, two caverns, the town Horonaim (Is. xv. 5). [Horonaim.]

IV. קָיָּב, קָיָּב, קָיָּב, קָיָּב: לֹא: A. V. den: a ravine through which water flows (Ges. p. 858) Jud. vi. 2

The caves of Syria and Palestine are still used either occasionally or permanently, as habitations as at Asur, near Scythian, a north Gilgal (Hacking-
The shepherds near Hebron leave their villages in the summer to dwell in caves and ruins, in order to be nearer to their flocks and fields (Robinson, i. 212). Almost all the habitations at Oms-keis, Gadara, are caves (Burckhardt, p. 273). An extensive system of caves exists at Beit Jibrin, Eleutheropolis, in Judah, which has served for residence or concealment, though now dismissed (Robinson, ii. 54); and another between Bethleem and Hebron (Irby and Mangles, p. 103).

The most remarkable caves noticed in Scripture are:—1. That in which Lot dwelt after the destruction of Sodom (Gen. xix. 30). 2. The cave of Machpelah (xixii. 17). 3. Cave of Makkedah (Josh. x. 16). 4. Cave of Adullam (I Sam. xxii. 1). 5. Cave of En-gedi (xxiv. 3). 6. Obadiah's cave (I K. xviii. 4). 7. Elijah's cave in Horeb (xix. 9). 8. The rock sepulchres of Luzarim, and of our Lord (John xli. 35; Matt. xxvii. 60). Some of these may be identified, and to others approximate, if not absolutely identical, sites may be assigned. Thus the existing caverns near the S. E. end of the Dead Sea serve fully to justify the mention of a cave as the place of Lot's retirement; as those on the W. side agree both in situation and in name with the caves of En-gedi (Lynch, Narrative, p. 234; Robinson, i. 508; Stanley, p. 206). The cave of Machpelah undoubtedly lies beneath the mosque at Hebron (Robinson, ii. 79; Stanley, p. 149; Benj. of Tudela, Early Trav. p. 86). The cave of Makkedah can hardly be the one to which tradition has assigned the name (Irby and Mangles, p. 93); for though it is not necessary to suppose that the cave was close to the town of Makkedah, yet the situation of the great caverns both at Beit Jibrin and at Deir Robban in neither case agrees with that of Makkedah as given by Esd.iiia, eight miles from Eleutheropolis (Reland, p. 383; Robinson, ii. 23, 53; Stanley, p. 211). The site assigned by the same ancient authority to Adullam, 10. m. E. of Eleutheropolis, agrees as little with that of the cave believed by tradition to have been David's hiding-place, namely, in the Wady Khareitun at the S. E. of Bethlehem, which in some respects agrees with the Scripture narrative better than the neighborhood of Deir Robban, assigned to it by Mr. Stan- ley (Robinson, i. 22, 16; Sam. xxvii. 29, and particularly xlii. 3, 4; Joseph. Ant. vi. 2, § 3; Reland, p. 549; Irby and Mangles, p. 103; Robinson, i. 482; Stanley, p. 259). [See OADULLAM.]

The cave in which Obadiah concealed the prophets cannot now be identified, but it was probably in the northern part of the country, in which abundant instances of caves fit for such a purpose might be pointed out.

The sites of the cave of Elijah, as well as of the "cleft" of Moses on Mount Horeb (Ex.xxxi. 22) are also obviously indeterminate: for though tradition has not only assigned a place for the former on Jebel Musa, and consecrated the spot by a chapel, there are caves on the competing summit of Serbal, to one or other of which it might with equal probability be transferred. (Stanley, p. 49; Robinson, i. 103; Burckhardt, p. 692.)

Besides these special caves there is frequent mention of caves in general both of travel and of residence. Thus the Israelites are said to have taken refuge from the Philistines in "holes" (1 Sam. xiv. 11); to which the name of the scene of Jonathan's conflict, Mikkados (Michmash), sufficiently answers. (Stanley, p. 204; Rob. i. 440; Irby, p. 83.) So also in the time of Gideon they had taken refuge from the Midianites in dens and caves and strongholds, such as abound in the mountain region of Manasseh. (Judges vi. 2; Stanley, p. 341.)

Not only have the caves of Palestine afforded refuge from enemies, but during the earthquakes also, by which the country has been so often visited, the inhabitants have found in them a safe retreat. This was the case in the great convulsion of 3577, when Sefed was destroyed; and to this mode of retreat the prophet Isaiah probably alludes (Is. ii. 19, 21; Robinson, ii. 422; Stanley, p. 151).

But Adullam is not the only cave, nor were its tenants the only instances of banditti making the caves of Palestine their accustomed haunts. Josephus (Ant. xiv. 15, § 5) relates the manner in which, by order of Herod, a cave occupied by robbers, or rather insurgents, was attacked by soldiers let down from above in chests and halelets, from which they dragged forth the inmates with hooks, and killed or thrust them down the precipices; or, setting fire to their stores of fuel, destroyed them by suffocation. These caves are said to have been in Gallilee, not far from Sephoris; and are probably the same as those which Josephus himself, in providing for the defense of Galilee, fortified near Gennesaret, which elsewhere he calls the caves of Abela (Ant. xvi. 16, § 24-26; xvi. 29, § 1, 15; xxvii. 97). Bacchides, the general of Demetrios, in his expedition against Judas, encamped at Messeloth, near Arbeia, and reduced to submission the occupants of the caves (Ant. xiii. 11, § 1; 1 Macc. ix. 2).

Messeloth is probably מָסֶלֶת, steps, or terraces (comp. 2 Chr. ix. 11; Ges. p. 957). The Messeloth of the book of Maccabees and the robber-caves of Arbeia are thus probably identical, and are the same as the fortified cavern near Medjfel (Mag- dala), called Kolbost Ila Meen, or Pigeon's Castle, mentioned by several travellers. They are said by Burckhardt to be capable of containing 600 men. (Reland, p. 555, 575; Burckhardt, Syrce, p. 331; Irby and Mangles, p. 91; Lightfoot, Cont. Chron. ii. 211; Robinson, ii. 398; Lxmother, p. 108; comp. also Hos. x. 14.) [BETH-ARBEEL.]

Josephus also speaks of the robber inhabitants of Trachonitis, who lived in large caverns, presenting no prominence above ground, but widely extended below (Ant. xv. 10, § 1). These banditti annoyed much the trade with Damascus, but were put down by Herod. Strabo alludes very distinctly to this in his description of Trachonitis, and describes one of the caverns as capable of holding 4000 men (Strabo, v. p. 786; Raumer, p. 68; Dohluff, Travels in Pat. in P. i. 197).

Lastly, it was the caves which lie beneath and around so many of the Jewish cities that formed the last hiding-places of the Jewish leaders in the war with the Romans. Josephus himself relates the story of his own concealment in the caves of Jotapata; and after the capture of Jerusalem, John of Gischala, Simon, and many other Jews, endeavored to conceal themselves in the caverns beneath the city; whilst in some of them great spoils and vast numbers of dead bodies were found of those who had perished during the siege by hunger or from wounds (Joseph. B. J. iii. 8 § 5, vi. 9, § 4).

The rock dwellings and temples of Petra are described in a separate article.

Natural cavities in the rock were and are frequently used as cisterns for water, and as places of imprisonment (Is. xxiv. 22; Ez. xlviii. 23; Zech 397)
CEDAR

(ix. 11) [Cisterne; Prison] also as stalls for horses and for granaries (Irby and Mangles, p. 146). No use, however, of rock caverns more strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as burial-places. The rocky soil of so large a portion of the Hauran and the Hezibah was found for burial, except in cisterns either natural or hewn from the rock. The dwelling of the demoniac among the tombs is thus explained by the rock caverns abounding near the Sea of Galilee (Jolliffe, i. 36). Accordingly numerous sites are shown in Palestine and adjacent lands (of so-called) sepulchres of saints and heroes of Old and New Test., venerated both by Christians and Mohammedans (Early Travels, p. 36); Stanley, p. 181. Among these may be mentioned the cave of Machpelah, the tomb of Aaron on Mount Hor, of Joseph, and of Rachel, as for those which every probability of identity in site at least may be claimed (Irby and Mangles, p. 134; Robinson, i. 218, 219, ii. 275-287). More questionable are the sites of the tombs of Elisha, Obediah, and John the Baptist, at Samaria; of Habakkuk at Jelilah (Calathia), Micah near Kele, and of Deborah, Hezibah's niece, at Bethel (Stanley, p. 148, 149; Ez. xxvii. pp. 722, 638, 601; Bib. iii. 3044). The questions so much debated relating to the tombs in and near Jerusalem and Bethany will be found treated under these heads. But whatever value may belong to the connection of the names of judges, kings, or prophets, with the very remarkable rock tombs near Jerusalem, there can be no doubt that the caves bearing these names are sepulchral caverns enlarged and embellished by art. The sides of the valley of Hezibah are studded with caves, many of which are inhabited by Arab families. (Sandys, p. 188; Maundrell, p. 446; Robinson, i. 241, 349, 364; Bartlett, W. disq. Jeruslum, p. 117.) It is no doubt the vast number of caves throughout the country together with, perhaps, as Maundrell remarks the taste for hermit life which prevailed in the 4th and 6th centuries of the Christian era, which has placed them in the eye of so many important events in races and grooves; e. g. the birth of the Virgin, the Annunciation, the Slaughter, the birth of the Baptist and of our Lord, the scene of the Agony, of St. Peter's denial, the composition of the Apostles' Creed, the Transfiguration (Shaw, pt. ii. c. 12; Maundrell, E. T. p. 479): and the like causes have created a traditional cave-site for the altar of Elijah on Mount Carmel, and peopled its sides, as well as those of Mount Tabor, with hermit inhabitants. (1 K. xviii. 18; Irby and Mangles, p. 160; Rehal, p. 323; Winier, s. v. Carmel; Ann. ix. 31; Sir J. Mandeville, Travels, p. 31; Sands, p. 283; Maundrell, E. T. p. 478; John, Arch. Bibl. p. 9; Stanley, p. 353; Kittto, Phign. Geogr. pp. 30, 31; Van Egmont, Travels, ii. 5-7.)

CEDAR (CEDER) (ked'or): cedar: from 7287, root of 3777, caled or comprased, Gese, p. 148. The term is expressive of a mighty and deeply-rooted tree and is usually understood to imply here too the more of the coniferous kind, but not always to that which is commonly known as the Cedar of Lebanon.

The conditions to be fulfilled in order to answer all the descriptions in the Bible of a cedar-tree are that it should be tall (1 K. ii. 13), spreading (Ez. xxxii. 3), abundant (1 K. v. 6, 10), fit for beams, pillars, and boards (1 K. vi. 10, 13, vii. 2), mastas of ships (Ez. xxvii. 5), and for carved work as images (Is. xlv. 14). To these may be added qualities which are not especially enunciated in Scripture: Phiny speaks of the cedar of Crete, Africa, and Syria as being most esteemed and imperishable. The same quality is ascribed also to juniper. In Egypt and Syria ships were built of cedar, and in Cyprus a tree was cut down 120 feet long and proportionately thick. The durability of cedar was proved, he says, by the duration of the cedar roof of the temple of Ephesus, which had lasted 1000 years. At Uleai the beams, made of Numidian cedar, of a temple of Apollo had lasted 1170 years! Vitruvius speaks of the antiseptic properties of the oil of cedar and also of juniper (Plin. H. n. iv. 5, 30; Vitruv. ii. 9; Joseph. Ant. viii. 5, § 2; Sands, Travels, pp. 166, 167).

Not only was cedar timber used by David and Solomon in their buildings (2 Sam. v. 11; 1 K. v. 6, vi. 15, vii. 2), but also in the temple built under Zerubbabel, the timber employed was cedar from Lebanon (Ezr. iii. 7; 1 Esdr. iv. 48, v. 55). Cedar is also said by Josephus to have been used by Herod in the roof of his temple (H. J. v. 5, § 2). The roof of the Rotunda of the Church of the Holy Sepulchre at Jerusalem is said to have been made of cedar, and that of the Church of the Virgin at Bethlehem to have been of cedar or cypress. (Williams, Holy City, ii. 202; Quaresmius, Lib. Teor. Sacr. vii. 13). Sotter, Toled, Bethlehem, p. 110, 112.)

Now in some important respects no tree but the cedar (Pinea cedrus), or its almost equivalent, the Pinus Dodea, can answer the above conditions. The characteristics of these two trees, of which great numbers are found from Mount Taurus to the Himalaya's, are so often interchanged that they are scarcely to be distinguished as the one from the other. No tree is so easy to grow, spreading, andumberous, and the wood of the Desolana at least is extremely durable. The difficulties which are found in reconciling the ancient descriptions with the modern specimens of cedar wood are, (1) in the fitness of cedar trees for mastas of ships (Ez. xxvii. 5), (2) still more in the very general agreement as to the inferior quality of the timber, which is usually described as less valuable than the worst sorts of deal. Of authorities quoted by Dr. Boyle in his article on the subject in Dr. Kitto's Cyclopaedia (art. Trees), two only ascribe serviceable qualities to the cedar-wood, whether grown in England or in specimens brought from the ancient cedar grove on Mount Lebanon. Accordingly, Celsius in his Historia naturae has endeavored to prove that by the cedar of Scripture is meant the Pinae syriacae or Scotch fir and that by "far" is intended the express. Others have supposed that the Sambucea tree, the citron of Phiny, Callicrassa quadrivalvis, or Thuya articulata, represents the cedar. The timber of this tree is extremely hard and durable; the roof of the masque of Cordova, built in the 9th century, is constructed of it, which was formerly supposed from the Spanish name abies to have been made of larch (Cook, Sketches in Spain, p. 6, and note; who are longer and more distinctly sickle. The roof of both is extremely redness.
Besides these trees, the Cephalonian pine, the common yew, Taxus baccata, and the juniper cedar, Cedrus baccifera, or oxycedrus, each of them possesses qualities which answer to some at least of those ascribed to the cedar. The opinion of Celsius is founded in great measure on the use by the Arabs and Arabic writers of the words μαρσ, evidently the equivalent of μαρς, cedrus, to express the cedar of Lebanon, and also at Aleppo the Pinus sylvestris, which is abundant both near that city and on Lebanon. A similar argument will apply also to the Thuja articulata of Mount Athos, which is called by the Arabs ћттг итг, a name which led to the mistake as to the material of the Cordova roof from its similarity to the Spanish arce (Nieburh, Descr. de l'Arabie, p. 191, &c., and Questions, x. p. 169, &c.; Pliny, H. N. xiii. 11. 15; Kitto, Erc, Thuja; Hay, West. Barb. c. iv. 49; Gesen. p. 148, who rejects the opinion of Celsius; Winer, s. v.).

It may be observed, (1.) That unsuccessful experiments on English-grown cedar, or on wood derived from the trees of the ancient cedar grove of Lebanon, do not as yet invalidate all claim of the cedar, whether Lebanon or Deodora cedar, to share in the qualities anciently ascribed to it. Besides the trees which belong to the one groove known by the name of "the Cedars," groves and green woods of cedar are found in other parts of the range (Burckhardt, Travels among Arabs, p. 463; Eng. Cyc. s. v. Syrion; Robinson, iii. 533; Burckhardt, Syriace, p. 19; London, Archeologia, vol. iv. pp. 2406, 2407; Celsius, Hierobotanicon, i. 89; Rebn, Obs. de Araboribus conficiens, ii. 162, 165, 166). (2.) That it has been already shown that the Deodora cedar certainly possesses in a remarkable degree the property of durability, said to be wanting in the Leb-

anoni cedar. But (3.) The remains of wood used in the Nineveh palaces were supposed by Layard to be cedar, a supposition confirmed by the inscriptions, which show that the Assyrian kings imported cedar from Lebanon. This wood is now proved by microscopic examination to be yew (Layard, N. and B. pp. 356, 357; London, n. s. p. 2431).

In speaking, therefore, of cedar of Lebanon used in building for beams, pillars, or ceiling boards, it is probable that the wood of more than one tree was employed, but under the one name of cedar, and that the trees which furnished the material were, besides the Pinus cedrus, the Cedrus Deodora, the yew, (Taxus baccata), and also the Scotch pine (Pinus sylvestris). The Sandarac tree (Thuja articulata) is said by Van Egmont (Travels, ii. 289) to have been found on Lebanon, but no hint of importation of foreign timber is anywhere given in Scripture, or by Josephus, whilst each of the above-named trees grows there in greater or less abundance. The Pinus sylvestris may have furnished the material of the ship-masts mentioned by Ezekiel; and it may be added, that the LXX. render "masts" in that passage by ἀρτοῖς ἐκατίπους, unde of "fris," or like "fris."

But there is another use of cedar-wood mentioned in Scripture, namely, in purification (Lev. xiv. 4; Num. xix. 6). The term cedar is applied by Pliny to the lesser cedar, oxycedrus, a Phoenician juniper, which is still common on the Lebanon, and whose wood is aromatic. The wood or fruit of this tree was anciently burnt by way of perfume, especially at funerals (Plin. H. N. xiii. 1, 5; Ov. Fast. ii. 538; Hom. Od. v. 60). The tree is common in Egypt and Nubia, and also in Arabia, in the Wady Mousa, where the greater cedar is not found. It is obviously likely that the use of the more common tree should be enjoined while the people were still in the wilderness, rather than of the uncommon (Shaw, Travels, p. 464; Burckhardt, Syria, p. 439; Russell, Nubia, p. 425).

The grove of trees known as the Cedars of Lebanon consists of about 400 trees, standing quite alone in a depression of the mountain with no tree
near, about 6400 feet above the sea, and 3000 below the summit. About 11 or 12 are very large and do the cedars of Lebanon. To the

CEDAR

CEDAP

niperus excelsa, were probably all included under the term cedrus; though there can be no doubt that by this name the ancients generally denoted the cedar of Lebanon, as being κέδρος the finest and grandest of the conifers.

The Pinus sylvestris is by old writers often mentioned as one of the pines of Lebanon; but Dr Hooker says he has little doubt that the P. Hulse- pensis must be the tree meant, for the P. sylvestris (Scotch fir) is not found in Lebanon or Syria.

The claim of the Cedars to represent a Bible Conifer may be dismissed at once. Cedars are not found nearer to the Lebanon than within a distance of several hundred miles. As to the "cedar wood" used in purifications, it is probable that one of the smaller junipers is intended (J. sabina), for it is doubtful whether the Juniperus excelsa exists at all in Arabia. [JUNIPER]

Dr. Hooker has favored us with the following valuable communication relative to the true cedars of Lebanon: "As far as is at present known, the cedar of Lebanon is confined in Syria to one valley of the Lebanon range, namely, that of the Kedesh river, which flows from near the highest point of the range westward to the Mediterranean, and enters the sea at the port of Tripoli. The grove is at the very upper part of the valley, about 15 miles from the sea, 6000 feet above that level, and their position is moreover above that of all other arborescent vegetation. The valley here is very broad, open, and shallow, and the grove forms a mere speck on its flat floor. The mountains rise above them on the N. E. and S. in steep stoney slopes, without precipices, gorges, ravines, or any other picturesque features whatever. Nothing can be more dreary than the whole surrounding landscape. To the W. the scenery abruptly changes, the valley suddenly contracts to a gorge, and becomes a rocky ravine of the most picturesque description, with villages, groves, and ravines perched on its bluffs, base, and summits, recalling Switzerland vividly and accurately. At the time of my visit (October, 1869) the thanks of the valley about the cedars were perfectly arid, and of a pale yellow red; and the view of this great red area, perhaps two or three miles across, with the minute patch of cedar grove, seen from above and at a distance of ten miles or more, is one that can give you some idea of what a speck the grove is in the yawning hollow. I have said the floor of the valley is flat and broad; but, on nearer inspection, the cedars are found to be confined to a small portion of a range of low stony hills of rounded outlines, and perhaps 60 to 100 feet above the plain, which sweep across the valley. These hills are, I believe, old moraines, deposited by glaciers that once debouched on to the plain from the surrounding tops of Lebanon. I have many reasons for believing this, also for supposing that their formation dates from the glacial epoch. The restriction of the cedars to these moraines is absolute, and not without analogy in re-

* Mr. Jessup (see addition to this article) says that the largest of these is forty-eight feet in circumference, and the remaining eleven vary from twenty to thirty feet (Hours at Home for March, 1867); fr. 488.

* Dr. Thomson (Land and Book, I. 246) remarks on a striking peculiarity of Solomon's cedars, with which is illustrated the engraving given here. He says: 'The branches are thrown out horizontally from the parent trunk. These, again, part into limbs which preserve the same horizontal direction, and so on down the minutest twigs, and even the arrangement of the bracteate leaves has the same general tendency. Climb into one, and you are delighted with a succession of verdant floors spread around the trunk, and gradually narrowing as you ascend. The beautiful cones seem to stand upon, or rise out of this green flooring.'

CEDAR

To other coniferous trees in Swiss and Himalayan valleys.

Dr. Hooker draws attention to the unfortunate disregard shown with respect to the seedlings annually produced from the old cedar-trees in Lebanon. It is a remarkable but lamentable fact that no trees are seen much less than 50 years old! The browsing goats and the drought destroy all the young seedlings; and it is a sad pity that no means are adopted to encourage their growth, which might easily be done by fencing and watering.*

W. H.

* It has been popularly supposed and often asserted (even by Stanley, S. J. F., p. 140, 3d ed.) that the B‘sberhe grove above described was the only remaining representative of the ancient cedars of Lebanon," though Seetzen found cedars to the number of several thousands at Ettnah, north of Elled, and speaks of two other groves which he did not personally visit (Rob. Letter Bibl. Res. iii. 363). Ehrenberg also in 1823 found the cedar growing abundantly on those parts of the Lebanon range which lie north of the road between Baalbek and Tripoli (Rob. ibid.). More recently, other large groves were described by Berggren and the botanist Doev (Ritter, Erdth. xvii. 638). But we are indebted for the fullest information on this subject to the Rev. Henry H. Jessup, an American missionary in Syria, who has visited and described no less than eleven distinct groves of cedars in Mount Lebanon, two of them of great size and numbering thousands of trees. Five of these groves are in northern and six in southern Lebanon, and their situation and relative altitude above the sea, Mr. Jessup remarks, are such as to indicate that at some time in the past, the whole Lebanon range, at an average height of from 3900 to 7000 feet above the sea, was covered with forests of this imperial tree. (See his article on the "Cedar Forests in Mount Lebanon" in "Hours at Home" for March and April, 1867; iv. 405 ff., 499 ff.)

Of the groves in northern Lebanon the most remarkable, besides the famous B’sberhe grove, is one at el-Halilith, first visited by Mr. Jessup in 1856, in which, as he says, “the trees are literally immeasurable, extending for a mile along the range, and containing cedars enough to build a city of temples." (Hours at Home, iv. 409). Mr. Tristram visited the same place in 1864, and describes the largest of the trees as "fifteen or eighteen feet in circumference," but he found "none that approached the patriarchs of the grove either in size or magnificence (Land of Israel, p. 694, 2d ed.). In southern Lebanon there was a forest of cedars a few years ago near Ain Zehahe, containing more than 10,000 trees, many of them of immense size;" but the Vandal of a Sheik," as Mr. Tristram calls him, "sold them to a native speculator, who cut them down for pitch." The stumps, however, remain, and luxuriant young plants are springing up on every side. Mr. Jessup visited the place, and measured one stump "nearly 15 feet in diameter" (Hours at Home, iv. 409). Among the most remarkable groves now flourishing in southern Lebanon is one near Masis, "not inferior in interest to the "Cedars of the Lord themselves."

It contains about 300 trees, the largest measuring over 30 feet in circumference. Perhaps 20 of them," says Mr. Jessup, "will measure from 20 to 25 feet in circumference, and almost all of them are large and venerable in appearance. There is not an insignificant tree in the grove." Near el-Barlik there is a much larger grove or rather forest, containing thousands of trees. They cover an area of nearly one hundred acres along the mountain side, and up and down a gradually sloping ravine. The largest of the trees measure in girth about 20 feet, and they vary in size down to a foot in diameter. Below this, at about fifteen minutes' ride, lies the northeastern grove of el-Barlık, on the southern side of a deep ravine, containing about 230 noble trees, the largest 24 feet in circumference.

Mr. Jessup in his visits to these groves was accompanied by Dr. Post, an experienced botanist, who pronounces the trees to be the genuine Pinus cedrus. A.

CEDRON (J Ke'braw): Alex. [1 Mac. xv. 39, Kad'bar 41] Ke'braw: [1 Mac. xv. 39, 41] Cedru (H, Cedrus, ed. 1300, as in vi. 9). I. A place fortified by Cendebeus under the orders of king Antiochus (Sidetes), as a station from which to command the roads of Judea (1 Mac. xv. 39, 41, xiv. 9). It was not far from Jamnia (Jalane), or from Azotus (Ashdod), and had a winter-torrent or wady (cheimageos), on the eastward of it, which the army of the Maccabees had to cross before Cendebeus could be attacked (xiv. 5). These conditions are well fulfilled in the modern place Katrâ or Kâbrâh, which lies on the maritime plain below the river Rudân, and three miles southwest of Akir (Ekon). Schwartz (p. 119) gives the modern name as Kadrain, but this wants confirmation. Ewald (Gesch. iv. 390, note) suggests Tell el-Turmus, five or six miles further south.

2. In this form is given in the N. T. the name of the proverbial book Ke'dron (τὸν Ἰδρῶν = "the black torrent") in the ravine below the eastern wall of Jerusalem (John xviii. 1, only). Beyond it was the garden of Gethsemane. Lachmann, with AD [As A, not D, see below], has χαιμαγαρ ρος του Κεβρων: but the text with B [C. L. and most of the MSS.] has εντος Κεβρων, i.e. "the brook of the cedars" (so too the LXX. in 2 Sam. xxv. 23). Other MSS. [as Sin. D] have the name even so far corrupted as του Κεβρων, κεδρί, and των δυυρ- δρων. In English the name is often erroneously read (like Cephas, Cenchrea, Chazu, &c.) with a soft C: but it is unnecessary to point out that it has no connection with "Cedar." [KEDRON].

CEILAN (Kalâv): [Ald. Ke'dâv]: Ceylon. Sons of Celian and Atzaz, according to I Esdr, v. 15, returned with Zoroabel from Babylon. There are no names corresponding to these in the lists of Ezra or Nehemiah.

CEILING (ηπατος, from ηπατας: ἐκάτωστθ' edo partner, 1 K. vi. 9; to cover with rafters, Gesen. p. 695; Schleusner, Lec. V. T. καλλος, or ἐκάτας, (Ex. xii. 16), a planking). The descriptions of Scripture upon a visit to the cedar) in which he brings together in a striking picture all the Scripture allusions to this celebrated forest (Notes of Localities, p. 239 ff.)
CEILING

are (1 K. vi. 9, 15, vii. 3; 2 Chr. iii. 5, 9, Jer. xxii. 14; Hag. i. 4), and of Josephus (Ant. viii. 3, §§ 2-9, xx. 11, § 6), show that the ceilings of the Temple and the palaces of the Jewish kings were formed of cedar planks applied to the beams or joints crossing from wall to wall, probably with sunk panels (φαραγώματα), edged and ornamented with gold, and carved with inlaid or other patterns (Βαρυθομένα γάματα), sometimes painted (Jer. xxii. 14).

It is probable that both Egyptian and Assyrian models were in this as in other branches of architectural construction, followed before the Roman period. [ARCHITECTURE.] The construction and designs of Assyrian ceilings in the more important buildings can only be conjectured (Layard, Nineveh, ii. 255, 289), but the proportions in the walls themselves answer in a great degree to those mentioned in Scripture (Nin. and Rob. p. 612; Ferguson, Handbook of Architecture, i. 201).

Examples, however, are extant of Egyptian ceilings in stucco painted with devices of a date much earlier than that of Solomon’s Temple. Of these devices the principal are the grillehe, the chevron, and the scroll; also painted in blue with stars, and others bear representations of birds and other figures (Wilkinson, Ant. Egypt. ii. 290). The excessive use of vermillion and other glaring colors in Roman house-painting, of which Vitruvius in a later date complains (vii. 5), may have been introduced from Egypt, whence also came in all probability the taste for vermillion painting shown in Delphicam’s palace (Jer. xxii. 14; Am. iii. 15; Wilkinson, i. 192). See also the descriptions given by Athenaeus (v. p. 166) of the tent of Ptolemy Philopatris, and the ship of Philopator (ib. p. 236), and of the so-called sepulchres of the kings of Syria near Tyre (Hassfeld, p. 165).

The panel work in ceilings, which has been described, is found in Oriental and North African dwellings of late and modern times. Shaw describes the ceilings of Moorish houses in Barbary as of wainscot, either ‘very artfully painted, or else thrown into a variety of panels, with gilded mouldings and scrolls of the Koran intermixed’ (Travels, p. 288). Mr. Porter describes the ceilings of houses at Damascus as delicately painted, and in the more ancient houses with arabesques encompassing panels of blue, on which are inscribed verses and chapters of the Koran in Arabic. Also a tomb at Palmyra, with a stone ceiling beautifully panelled and painted (Damasus, i. 31, 37, 57, 99, 222; cf. Dent, vi. 97; also Lane’s Med. Egypt. i. 37, 38).

Many of the rooms in the Palace of the Moors at the Alhambra were ceiling and ornamented with the richest geometrical patterns. These still remain, and restorations of them may be seen at the Alhambra Court of the Crystal Palace. The ancient Egyptians used colored tiles in their buildings (Athen. v. 206; Wilkinson, ii. 287). The

CENCHREA *

* CELLSARS. [Jou. No. 7.]

CELOSYRIA. [CULESIA.]

CENCHREA (accurately CEN'CHREÆ, Kýroypía; [Cenchrea]), the eastern harbor of Corinth (i.e. its harbor on the Saronic Gulf) and the emporium of its trade with the Asiatic shores of the Mediterranean, as Lechaion (Lutrerik) on the Corinthian Gulf connected it with Italy and the west. A line of walls extended from the citadel of Corinth to Lechaion, and thus the pass of Cenchrea was of peculiar military importance in reference to the approach along the isthmus from Northern Greece to the Morea. [CORINTH.]

St. Paul sailed from Cenchrea (Acts xviii. 18) on his return to Syria from his second missionary journey; and when he wrote his epistle to the Romans in the course of the third journey, an organized church seems to have been formed here (Rom. xvi. 1. See PAMPHILE. The first bishop of this church is said (Apost. Const. viii. 46) to have been named Lucius, and to have been appointed by St. Paul.

The distance of Cenchrea from Corinth was 70 stadia or about nine miles. Pamantias (ii. 3) describes the road as having tombs and a grove of cypresses by the wayside. The modern village of Kórieros retains the ancient name, which is conjectured by Dr. Stiborpe to be derived from the mild-sounding Kýroypía, which still grows there (Walpole’s Travels, p. 41). Some traces of the moles of the port are still visible (see Leake’s Morea, iii. pp. 233-235). The following coin exhibits the port exactly as it is described by Pamantias, with a temple at the extremity of each mole, and a statue of Neptune on a rock between them. J. S. H.

* Kýroypía is the vulgar form, but in modern Greek the educated still write Kýroypía (Rangabes, &c. El. Ann. ix. ii. 318). It is situated near the mouth of a little river which bears the same name, as does also the bay (σαλάς) into which the river
Colonial Coin of Corinth. On the obverse the head of Antoninus Pius; on the reverse the port of Conchreai, with C. L. I. C., that is, COLONIA LAVS VIII CORINTHII.

BEGINUS (seemingly CENDEBUS; [Sinn. in 1 Mac. xxiv. 10, Δεβαος, Δαμεβαος: Cenchesus], a general left by Antiochus VII. in command of the sea-board of Palestine (1 Mac. xx. 38 H.) after the defeat of Tryphon, n. c. 138. He fortified Kidron and harassed the Jews for some time, but was afterwards defeated by Judas and John, the sons of Simon Maccabaeus, with great loss (1 Mac. xxvi. 1-10). [Antiochus VII.] B. F. W.

CENSOR (τηρητής, τηρητος; in LXX., mostly πυρεύς, but also θυρεύς and θυματήριον: thurible). The former of the Hebrew words (from θηρεύω, to seize or hold by, especially of fire) seems used generally for any instrument to seize or hold burning coals, or to receive ashes, &c., such as the appendages of the brazen altar and golden candlestick mentioned in Ex. xxvii. 13, xxxvi. 38, xxxvii. 21, in which senses it seems rendered by the LXX. by ἑτροφόρος, ἑτροφός, or perhaps ὑπόθεσις. It, however, generally bears the limited meaning which properly belongs to the second word, found only in the later books (e. g. 2 Chr. xxvi. 19; Ez. viii. 11), (der. τηρητηπός, incense), that, namely, of a small portable vessel of metal fitted to receive burning coals from the altar, and on which the incense for burning was sprinkled by the priest to whose office this exclusively belonged, who bore it in his hand, and with whose personal share in the most solemn ritual duties it was thus in close and rigid connection (2 Chr. xxvi. 18; Luke i. 9). Thus "Korah and his company" were bidden to take "censers," with which in emulation of Aaron and his sons they had perhaps provided themselves a (comp. Ez. viii. 11); and Moses tells Aaron to take "the censer" (not as in A. V.); i.e. that of the sanctuary, or that of the high-priest, to stay the plague by atonement. The only distinct passages regarding the use of the censer are found in Num. iv. 14, where among the vessels of the golden altar, i.e. of incense, "censers" are reckoned; and in Lev. xvi. 12, where we find that the high-priest was to carry it (here also it is "the" not a "censer" that he is ordered to "take") into the most holy place within the vail, where the "incense" was to be "put on; i.e. on the censer, "before the Lord." This must have been on the Day of Atonement, for then only was that place entered. Solomon prepared "censers of pure gold" as part of the same furniture (1 K. vii. 50; 2 Chr. iv. 22). Possibly their general use may be explained by the imagery of Rev. viii. 3, 4a and may have been to take up coals from the brazen altar, and convey the incense while burning to the golden altar, or "altar of incense," and by it to be offered morning and evening (Ex. xxv. 7, 8). So Uzziah, when he was intending "to burn incense upon the altar of incense," took a censer in his hand" (2 Chr. xxvi. 16, 19). The Mishna (Joma, iv. 4) mentions a silver censer which had a handle, and was fetched from some chamber where such utensils were kept (b. v. 1, and Bartenora's comment); and was used to gather the coals from the altar, which were then transferred to a golden censer. On the great Day of Atonement, however, a golden one of finer standard (Tosaf. v. 5) was used throughout. The word θυματηριον rendered "censer" in Heb. ix. 4, probably means the "altar of incense." [Altar.] (In Ugelini, vol. xi. a copious collection of authorities on the subject will be found; Some- schmied de Thum. Socia is referred to by Winer, s. v. Rauelias.)

CENSUS (Τηρητής, or Τηρητός, numbering combined with lustration, from τηρή, survey in order to purify, Gesen. 1120: LXX. ἄρματος: N. T., ἄρμογραφος: diumacratia, declaratio). 1. Moses laid down the law (Ex. xxx. 12, 13) that whenever the people were numbered, an offering of a shkel should be made by every man above 20 years of age by way of atonement or propitiation. A previous law had also ordered that the firstborn of man and of beast should be set apart, as well as the first fruits of agricultural produce; the first to be redeemed, and the rest with one exception offered to God (Ex. xii. 12, 13, xxii. 29). The idea of lustration in connection with numbering predominated also in the Roman census (Dict. of Antig. s. v. Lustrum), and among Mohammedan nations at the present day a prejudice exists against numbering their possessions, especially the fruits of the field (Hax; Western Barbary, p. 19; Crichton, Arab. ii. 190; see also Lane, Mod. Egypt. ii. 72, 

a Gesenius s. v. Τηρήτης seems to prefer the general meaning of a fire-shovel in this passage: but, from Num. xvi. 17, it was probably the same fashion of thing as that used by Aaron in the priestly function. Or, as the rebellion was evidently a deliberately converted movement, is there any difficulty in supposing he amount of preparation suggested in the text.

b The word for censer here is λαβανος, from the
CENSUS

73. The instances of numbering recorded in the O. T. are as follows:

1. Under the express direction of God (Ex. xxviii. 25), in the 3d or 4th month after the Ex-
odus, during the encampment at Sinai, chiefly for the purpose of raising money for the Tabernacle.
The numbers then taken amounted to 603,550 men, which may be presumed to express with
greater precision the round numbers of 600,000 who are said to have left Egypt at first (Ex. xii.
37).

2. Again, in the 2d month of the 3d year after the Exodus (Num. i. 2, 3). This census was taken
for a double purpose, (a) to ascertain the number of fighting men from the age of 20 to 50 (Joseph.
Ant. iii. 12, § 4). The total number on this occasion,

exclusive of the Levites, amounted at this time
also to 603,550 (Num. ii. 32). Josephus says 604,560; each tribe was numbered, and placed under
a special leader, the head of the tribe. (b) To as-
certain the amount of the redemption offering due
on account of all the first-born both of persons and

cattle. Accordingly the numbers were taken of all
the first-born male persons of the whole nation above
one month old, including all of the tribe of Levi
in the same age. The Levites, whose numbers
amounted to 22,000, were taken in lieu of the first-
born males of the rest of Israel, whose numbers
were 227,530, and for the surplus of 273,3 a money
payment of 1350 shekels, or 5 shekels each, was
made to Aaron and his sons (Num. iii. 39, 51).

If the numbers in our present copies, from which
these given by Josephus do not materially differ,
be correct, it seems likely that these two number-
ings were in fact one, but applied to different pur-
poses. We can hardly otherwise account for the
identity of numbers even within the few months
of interval (Calmont on Num. ii. Pictorial Bible.
ibid.). It may be remarked that the system of
appointing head men in each tribe as leaders, as
well as the care taken in preserving the pedigrees
of the families corresponds with the practice of the
Arab tribes at the present day (Crichton, Arabias.
ii. 183, 186; Niebuhr, Desc. de L'Arabie, 14;
Buckingham, Arab Tribes, 98; John, Hist. Bibl.
e. i. 11; Malcolm, Sketches of Persia, xiv. 157,
159).

3. Another numbering took place 38 years after-
wards, previous to the entrance into Canaan, when
the total number, excepting the Levites, amounted
to 601,730 males, showing a decrease of 1,870. All
tribes presented an increase except the following:
Benjamin, [showing a decrease] of 5770; Simeon,
37,100; Gad, 5,190; Ephraim and Naphtali, 9,000
each. The tribe of Levi had increased by 737
(Num. xxvi.). The great diminution which took
place in the tribe of Simeon may probably be as-
signed to the plague consequent on the misconduct
of Zimri (Calmont, on Num. xxv. 9). On the other
hand, the chief instances of increase are found in
Manasseh, of 26,500; Benjamin, 10,200; Asher,
11,000; and Issachar, 9,000. None were numbered
at this census who had been above 20 years of age
for 38 years, except Caleb and Joshua (Num. xxvi.
64-65).

4. The next formal numbering of the whole
people was in the reign of David, who in a moment
of presumption, contrary to the advice of Joab, gave
orders to number the people without requiring the
statutory offering of a shekel. The men of Israel
above 20 years of age were 800,000, and of Judah
300,000, total 1,100,000. The book of Chron. gives
the numbers of Israel 1,100,000, and of Judah
470,000, total 1,570,000; but informs us that Levi
and Benjamin were not numbered (1 Chr. xxi. 6,
xxvii. 24). Josephus gives the numbers of Israel
and Judah respectively 900,000 and 400,000 (2
Num. xxiv. 19, 3, and Calm. od loc.; 1 Chr. xxi.
1-5, xxvii. 24; Joseph. Ant. vii. 14, § 1.)

The census of David was completed by Solo-
mon, by causing the foreigners and remnant of
the conquered nations resident within Palestine to
be numbered. Their number amounted to 153,-
600, and they were employed in forced labor on
his great architectural works (Josh. ix. 27; 1 K. v.
15, ix. 20, 21; 1 Chr. xxi. 2; 2 Chr. ii. 17, 18).

Between this time and the Captivity, mention
is made of the numbers of armies under successive
kings of Israel and Judah, from which may be
gathered with more or less probability, and with the
due consideration of the circumstances of the times
as influencing the numbers of the levies, estimates
of the population at the various times mentioned.

6. Rehoboam (l. c. 975-938) collected from
Judah and Benjamin 180,000 men to fight against
Jeroboam (1 K. xii. 21).

7. Abijam (938-955), with 400,000 men, made
war on Rehoboam with 800,000, of whom 500,000
were Ephraimites (1 K. xii. 24).

8. Asa (955-914) had an army of 300,000 men
from Judah, and 280,000 (Josephus says 250,000)
from Benjamin, with which he defeated Zerah the
Ethiopian, with an army of 1,000,000 (2 Chr. xiv.
8, 9; Joseph. Ant. viii. 12, § 1).

9. Jehoshaphat (914-891), besides men in gar-
risons, had under arms 1,160,000 men, including
probably subject foreigners (2 Chr. xiv. 19-19;
John, Hist. Bibl. e. i. 12, 13).

10. Amaaziah (828-811) had from Judah and
Benjamin 300,000, besides 100,000 mercenaries
from Israel (2 Chr. xxv. 5, 6).

11. Uzziah (811-753) could bring into the field
307,500 men (307,000, Josephus), well armed, under
3000 officers (2 Chr. xxvi. 11-15; Joseph. Ant. ix.
10, § 3).

Besides these more general statements, we have
other and partial notices of numbers indicating
the condition of the army. The census of 4 tribes
collected 32,000 men (Judg. vi. 35, vii. 3). (b)
Jehoshaphat put to death 42,000 Ephraimites (Judg.
xii. 6). The numbers of Ephraim 300 years before
were 32,500 (Num. xxvi. 57). (c) Of Benjamin
25,000 were slain at the battle of Gibeah, by which
danger, and that of the inhabitants of its cities, the
tribe was reduced to 600 men. Its numbers
in the wilderness were 45,000 (Num. xxvi. 41;
Judg. xx. 34, 46). The number of those who
joined David after Saul's death, besides the tribe
of Issachar, was 340,222 (1 Chr. xxiii. 23-38). (c.) At
the time when Jehoshaphat could muster 1,160,000
men, Ahin in Israel could only bring 7000 against
the Syrians (1 K. xx. 15). (f) The numbers car-
rried captive to Babylon v. c. 209 from Judah, are
said (2 K. xiv. 14, 16) to have been from 8000 to
10,000, by Jerimiah 40,000. (f.) The people who
were returned with Zerubbabel in the first caravan
are reckoned at 42,390 (Exx. ii. 61); but of these
perhaps 12,542 belonged to other tribes than Judah
and Benjamin.

It is thus that the difference between the total
(vers. 61) and the several details is to be accounted
for. The purpose of this census, which does not
materially differ from the statement in Nehemiah
(Neh. vii.), was to settle with reference to the year
CENSUS

at Jubilee the inheritances in the Holy Land, which had been disturbed by the Captivity, and also to ascertain the family genealogies, and ensure, as far as possible, the purity of the Jewish race (Ezr. ii. 59, x. 2, 8, 14, 44; Lev. xxv. 10).

In the second caravan, n. c. 438, the number was 1,496. Women and children were in neither case included (Ezr. viii. 1-14).

It was probably for kindred objects that the previous and subsequent researches which occupy the first 9 chapters of the first book of Chronicles were either composed before the Captivity, or compiled afterwards from existing records by Ezra and others (1 Chr. iv. 38, 32, 30, v. 9, vi. 57, 81, vii. 28, ix. 2). In the course of these we meet with notices of the numbers of the tribes, but at what periods is uncertain. Thus Reuben, Gad, and half the tribe of Manasseh are set down at 44,700 (v. 18), Issachar at 57,000 (vii. 5), Benjamin 30,454 (vii. 7, 9, 11), Asher 29,000 (vii. 10). Besides there are to be reckoned plebeians, Levites, and residents at Jerusalem from the tribes of Benjamin, Ephraim, and Manasseh (ix. 3).

Throughout all these accounts two points are clear. 1. That great pains were taken to ascertain and register the numbers of the Jewish people at various times for the reasons mentioned above. 2. That the numbers given in some cases can with difficulty be reconciled with other numbers of no very distant date, as well as with the presumed capacity of the country for supporting population. Thus the entire male population above 23 years of age, excepting Levi and Benjamin, at David's census, is given as 1,300,000 or 1,570,000 (2 Sam. xxiv. 1; 1 Chr. xxii.), strangers 153,000, total 1,453,000 or 1,723,000. These numbers (the excepted tribes being borne in mind) represent a population of not less than 4 times this amount, or at least 5,814,000, of whom not less than 2,000,000 belonged to Judah alone (2 Sam. xxiv. 9).

About 100 years after Jehoshaphat was able to gather from Judah and Benjamin (including subject foreigners) an army of 1,100,000 besides garrisons, representing a population of 4,640,000. Fifty years later, Amaziah could only raise 300,000 from the same 2 tribes, and 27 years after this, Uzziah had 307,500 men and 2,600 officers. Whether the number of the foreigners subject to Jehoshaphat constitutes the difference at these periods must remain uncertain.

To compare these estimates with the probable capacity of the country, the whole area of Palestine, including the trans-Jordanian tribes, so far as it is possible to ascertain their limits, may be set down as not exceeding 11,000 square miles: Judah and Benjamin at 3,153, and Galilee at 593 square miles. The population, making allowance for the excepted tribes, would thus be less than 590 to the square mile. Now the population of Belgium in 1830 was 4,425,202, or at the rate of 338 to the sq. mile, the area being about 11,400 sq. miles. The area of the kingdom of Saxony is 5,752 sq. miles, and its population in 1832 was 1,987,832, or an average of 345; but in some districts 500, to the sq. mile. The counties of Yorkshire, Westmoreland (the least populous county in England), and Lancashire, whose united area is 8,942 sq. miles contained in 1832 a population of 3,850,213, or rather more than 445 to the sq. mile: what the county of Lancashire alone gave 1,064 persons, the West Riding of Yorkshire 496, and Warwickshire 39 to the sq. mile. The island of Barbadoes contains about 168 sq. miles, and in 1830 contained a population of 145,000, or 875 to the sq. mile.

The population of Malta in 1849 was 115,864, or 1,182 to the sq. mile. The two last instances, therefore, alone supply an average superior to that ascribed to Palestine in the time of David, while the average of Judah and Benjamin in the time of Jehoshaphat, would seem, with the exception mentioned above, to give 1,480 to the sq. mile, a population estimated only, in England, by the county of Middlesex (6,059), and approached by that of Lancashire (1,094).

But while, on the one hand, great doubt rests on the genuineness of numerical expression in O. T. it must be considered on the other, that the readings on which our version is founded give, with trifling variations, the same results as those presented by the L.XX. and by Josephus (Jahn, v. 36; Winer, Zeitb., 2a. Gesch. Phil. Sacr. de conscrib. corruptr., i. § 23, vol. ii. p. 181).

In the list of cities occupied by the tribe of Judah, including Simeon, are found 123 "with their villages," and by Benjamin 26. Of one city, Ai, situate in Benjamin, which like many, if not all the others, was walled, we know that the population, probably exclusive of children, was 12,000, whilst of Gilboa it is said that it was larger than Ai (Jos. viii. 32, 23), x. 2, xv. 21-62, xviii. 21-38, xix. 14, 16). If these cities may be taken as samples of the rest, it is clear that Southern Palestine, at least, was very populous before the entrance of the people of Israel.

But Josephus, in his accounts (1) of the population of Galilee in his own time, and (2) of the numbers congregated at Jerusalem at the time of the Passover, shows a large population inhabiting Palestine. He says there were many cities in Galilee, besides villages, of which the least, whether cities or villages is not quite certain, had not less than 13,000 inhabitants (B. J. iii. 3, § 2, 4; comp. Tac. Hist. v. 8). After the defeat of Cestius, A.D. 66, before the formal outbreak of the war, a census taken at Jerusalem by the priests, of the numbers assembled there for the Passover, founded on the number of lambs sacrificed, compared with the probable number of persons partaking, gave 2,700,000 persons, besides foreigners and those who were excluded by ceremonial defilement (see Tac. Hist. v. 12). For the siege itself 1,100,000 perished, and during the war 97,000 were made captives. Besides these many deserted to the Romans, and were disclosed by them (B. J. vi. 8, 9, 3). These numbers, on any supposition of foreign influx (ου διαλυαμαι ουκ ἐπιθύμησιν), imply a large native population; and 63 years later, in the insurrection of Barcothobas, Dion Cassius says that 50 fortified towns and 980 villages were destroyed, and 380,000 persons were slain in war, besides a countless multitude who perished by famine, fire, and disease, so that Palestine became almost depopulated (Dion Cass. lxxix. 14).

Lastly, there are abundant traces throughout the whole of Palestine of a much higher rate of fertility in former ages than at present times, a fertility remarked by profuse writers, and of which the present neglected state of cultivation affords no test. This, combined with the positive divine promises of population existing in the Book of Genesis, make it probable that at least some degree of a very approximate correctness in the foregoing estimate of population (Tac. Hist. v. 6; Ann. Mare. xiv 8; Joseph. B. J. iii. 3; St. Jerome on Ezek. xx. and Rabbinical authorities in Reld. c. xxvi. : Shaw

20; Acts xii. 20.

H. In N. T., St. Luke, in his account of the
"taxing," says a deixe went out from Augustus
{/maparh/peia aitai upo mpwv mpwv tov aitai aitai
-mporo/pev wv porpi exwv tov aitai aitai, and
in the Acts alludes to a disturbance raised by Judas
of Galilee in the days of the "taxing." (Luke ii. 1; Acts v. 37.)

The Roman census under the Republic consisted,
so far as the present purpose is concerned, in an
enrollment of persons and property by tribes and
households. Every paterfamilias was required to
appear before the Censors, and give his own name
and his father's: if married, that of his wife, and
the number and ages of his children; after this an
account and valuation of his property, on which a
tax was then imposed. By the Acts thus obtained
every man's position in the state was regulated.

After this the property lists had been performed a
benevolence or solemn purification of the people followd,
not always immediately. (Dict. of Antiq. acts. Con-
sus, Litterum; Dionys. iv. 15, 22, 24. De legg.
iii. 3; 100, 50, 15, 47; Col. 11, 16, 48; Clinton,
Fast. Hell. iii. p. 457, c. 10.)

The census was taken, more or less regularly,
in the provinces, under the Republic, by provincial
censers, and the tribute regulated at their discretion
(Cic. U. c. c. u. ii. 53, 54), but no complete census
was made before the time of Augustus, who carried
out 3 general inspections of this kind, namely,
(1) c. 28; (2) c. 8; (3) a. d. 14; and a partial one,
A. D. 4. The reason of the partial exten-
t of this last was that he feared disturbances out
of Italy, and also that he might not appear as
an exactor. Of the returns made, Augustus himself
kept an accurate account (archivium), like a private
man of his property (Plin. C. a. i. 43, 15; Suet.
Aug. 27, 101; Tac. Ann. i. 11; Tac. Ann. iv. 15,
Ernest.)

A special assessment of Gaul under commissioners
sent for the purpose: mentioned in the time of
Tiberius (Tac. Ann. i. 31, ii. 65; Liv. vi. 134,
136).

The difficulties which arise in the passage from
St. Luke are discussed under CHERES.

H. W. P.

CENTURION. [As a military title, see
Atmy, p. 161.]

* It is worth notice that all the centurions men-
tioned in the N. T. of whom we learn anything
beyond the strict line of their office, appear in a
favorable light in the course of whom we read in
Matt. viii. 5; if the Jews bare testimony that "he
loved their nation and had build them a synagogue."
His faith and humility were so great that when
Christ proposed to come and heal his servant, he
replied, "Lord, I am not worthy that thou shouldest
come under my roof; but speak the word only and
my servant shall be healed." He had been born
a heathen, but Christ declared of him, "I have
not found so great faith, no, not in Israel." The
centurion who was on guard at the time of the cruci-
fixon, saw the portentous character of the events
which accompanied the Saviour's death (Mark
xv. 32; Luke xxiii. 47), acknowledged the right-
fulness of his claims, and confessed, "Truly this
man was the Son of God."

The name of Cornelius (Acts x. 1 ff.) marks a distinct period in the history
of the church. Before he had any knowledge of the gospel he had renounced idolatry and become
a worshipper of Jehovah (eisarabes). He "feared
God with all his house," abounded in alms-giving,
and had a "good report among all the nation of
the Jews." His prayers for light and guidance
were heard and answered. By a remarkable adj-
justment of visions and providences he was at length
honored as the first Gentile convert who was re-
ceived into the church under such circumstances as
to become a figure in the elevation of the universalism of Christ's
religion and its independence of the rites of Judaism.
It is not certain that Julius, Paul's keeper on the
journey to Rome (Acts xxvii. 1 ff.), became a
Christian: but he is described as a model of cour-
tesy and kindness, and, as may be inferred from the
ascendency which the apostle gained over him
during the voyage, was capable of appreciating the
noble character and rare endowments of his prin-
ciple.

A. CHETREAS, the proper orthography for
CHERES, 2 Mac. x. 52, 57.

CHAFF (Γεληθαηθα, ζήληθα). Child. ἑκατά-
τροπ, στίβωμα, πτελεια, φυλλωτα, τσαλ,
(Tamp. Cebos, p. 41).

The word meaning "chaff," is used twice in O. T., namely, Is. v.
24, xxxiii. 11. The root ζήληθα is not used. Probably the Sanskrit kākhaḥ = hay;
and occurs twice only in O. T., namely, Is. v. 24, xxvii. 3.

or ζήληθα is chaff separated by winnowing
from the grain on the back of the wheat. The car-
ya way of chaff by the wind is an ordinary
Sanskrit image of the destruction of the wicked,
and of their powerlessness to resist God's judgments
(Is. xvii. 13; Hos. xiii. 3; Zeph. ii. 2 [Job xxi.
18; Ps. i. 4, xxxv. 5; Is. xxix. 5]). The root of
the word is ζήληθα, to press out, of milk: whence,
its second meaning, to separate.

is rendered straw in Ex. v. 7, 10, 11, etc.,
and stubble in Job xxi. 18. In Ex. v. 12, we read
ζήληθα, stubble; for straw; so that it is not
the same as stubble. It means straw cut into short portions, in which state it was mixed with the mud of which bricks were made to give it consistency. In I K. iv. 28, mention is made of a mixed fodder for horses and camels of barley and \( \text{\textit{jebel}} \), such as the Arabs call \text{\textit{día}} to this day. The derivation of the word is doubtful. Gesenius was of opinion that \( \text{\textit{hejbel}} \) was for \( \text{\textit{hejbel-}\text{\textit{b}}\text{\textit{u}}}, \) from root \( \text{\textit{loj-\text{\textit{b}}}} \), to build, in reference to edifices of bricks made with straw.

Koediger prefers to connect it with \( \text{\textit{jebel}}, \) which properly implies a separation and division of parts, and is thence transferred to the mental power of discernment; so that \( \text{\textit{hejbel}} \) signifies properly anything cut into small parts (Ges. Thes. 1492).

The Chaldaic word \( \text{\textit{hejbel}} \) occurs but once, in Dan. ii. 35. It is connected with the Syr. \( \text{\textit{hâbû}}, \) and Arab. \( \text{\textit{hâbû}}, \) i.e. a straw or small bit of chaff flying into and injuring the eye.

W. D.

**CHAIN.** Chains were used, (1) as lugs of office; (2) for ornament; (3) for confining prisoners.

(1) The gold chain (\( \text{\textit{hâbûb}} \)) placed about Joseph’s neck (Gen. xii. 42), and that promised to Daniel (Dan. v. 7, named \( \text{\textit{hâbûb}} \)), are instances of the first use. In Egypt it was one of the insignia of a judge, who wore an image of truth attached to it (Wilkinson’s Anc. Egypt. ii. 23); it was also worn by the prime minister. In Persia it was considered not only as a mark of royal favor (Xen. Anc. i. 2; \( \text{\textit{xxvii.}} \)), but a token of investiture (Ibn. i.e.; Morier’s Second Journey, p. 93). In Ez. xvi. 11, the chain is mentioned as the symbol of sovereignty. (2) Chains for ornamental purposes were worn by men as well as women in many countries both of Europe and Asia (Wilkinson, iii. 373), and probably this was the case among the Hebrews (Prov. i. 9). The necklace (\( \text{\textit{hâbûb}} \)) consisted of pearls, corals, &c., threaded on a string; the beads were called \( \text{\textit{hâbûb}}, \) from \( \text{\textit{hâbû}}, \) to perfore (Cant. i. 10). A.V. “chains,” where “of gold ” are interpolated.

Besides the necklace, other chains were worn (Judg. x. 4) hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon, named \( \text{\textit{hâbûb}}, \) (\textit{chamara}, LXX.; \textit{luma}, Vulg.; round tires like the moon, A. V.; Is. iii. 19); a similar ornament, the hilal, still exists in Egypt (Lane’s Modern Egyptians, App. A.). The Midianites adorned the necks of their camels with it (Judg. viii. 21, 26); the Arabs still use a similar ornament (Wellsted, i. 301). To other chains were suspended various trinkets—as scent-bottles, \( \text{\textit{hâbûb}}, \), \( \text{\textit{hâbûb}}, \), \( \text{\textit{hâbûb}}, \) (tablets or houses of the soul, A. V., Is. iii. 20), and mirrors, \( \text{\textit{hâbûb}}, \) (Is. iii. 23). Step-chains, \( \text{\textit{hâbûb}}, \) (adorned ornaments, A. V.), were attached to the ankle-rings, which shortened the step and produced a mining gait (Is. iii. 10, 18). (3) The means

*Our calcedony being often opalescent—i.e., having something of Pliny’s \"Carbonato-erume\"* in a "got confounded with the Chalcodetius or Pink carnelian of a pale color, and this again with his green Chalcodetius. Капричный and Капричный are continued adopted for confusing prisoners among the Jews were fetters similar to our hand-cuffs, \( \text{\textit{hâbûb}}, \) (lit. two bracelets, as though made in halves), fastened on the wrists and ankles, and attached to each other by a chain (Judg. xvi. 21; 2 Sam. iii. 34, 2 K. xvi. 7; Jer. xxxix. 7). Among the Romans, the prisoner was hand-cuffed to one, and occasionally to two guards—the hand-cuff on the one being attached to that on the other by a chain (Acts xii. 6, 7, xxii. 33 [xxviii. 16, 20]; Eph. vi. 20; 2 Tim. i. 16); \ix\textit{Dict. of Ant., art. Cæcitus}. W. L. B.

*The \"chains\" (\"A. V.\") with which the Gadarene maniac was bound (Mark v. 3, 4) were ap- parently those or wrists, which he called \"his phrenesy, \" in his phrenesy (\textit{bëraschab}), while he crushed or shivered to pieces the iron fetters (\textit{sŵŵt̂̃nû ̂̃mû̃ĝ̃}). See FETTERS.

**CHALCEDON.** (\x97\text{\textit{hejbel}}, \) chalcodetius), only in Rev. xxi. 18, where it is mentioned as being the stone which garnished the third foundation of the heavenly Jerusalem. The name is applied in modern mineralogy to one of the varieties of agate, specimens of this sub-species of quartz, when of a pearly or wax-like lustre and of great transluence, are known by the name of chalcodony, sometimes popularly called \"white carnelian.\" There is also a stalactitic form found occasionally in cavities. There can, however, be little doubt that the stone to which Theophrastus (\textit{De Lapid.} \textit{xxvii.}) refers, as being found in the island opposite Chalcodon and used as a solder, must have been the green transparent carbonate of copper, or our copper emerald. It is by no means easy to determine the mineral indicated by Pliny (\textit{xxvii.} 5); the white agate is mentioned by him (\textit{xxxvii.} 7), as one of the numerous varieties of Achates (Agate), under the names Cerochletes and Lencochletes. The Chalcodony was so called from Chalcodon, and was obtained from the copper-mines there. It was a small stone and of no great value; it is described by Pliny as resembling the green and blue tints which are seen on a peacock’s tail, or on a pigeon’s neck. Mr. King (\textit{Aiwnyge Genre}, p. 8) says it was a kind of inferior emerald, as Pliny understood it.

W. H.

*Thomson (\textit{Land and Book}, i. 437) speaks of this mineral as not uncommon in Syria. In one of the valleys of Galilee (3: hours on the way from Safed to Acco) \#\textbf{are} beautiful geodes of chalcedony, which I have spent days, first and last, in gathering. In the spring of 1838 I sent four donkey-loads to Bèrèit, and from there they have been dispersed by friends to almost every part of the world. Some five years ago I discovered a new locality of it, extending from Jar Kurnaone, below Muskahara, quite up to the south end of the Búkâ’ah, at Juh Jennin. The whole country there for many miles is literally covered with these geodes, from the size of a walnut to that of a large melon. I have discovered jasper and agate in great variety and very beautiful, along the southern and eastern base of Mount Casius, and in a few other places. Of the twelve manner of stones in the breast-plate of the high-priest (Ex. xxi. 17-20) there are native to this country the jasper, the agate, the beryl, and the sardius. If

thucally interchanged in MS. Marobodu already understood it of our Calcedony, as shown by his \"Pal- lenaque Chalcodinius Ignis habet efigem.\"—C. W. King."
the sapphire is the lapis lazuli, it is also met with in certain parts of Syria.'

It is surprising to observe with what familiarity the sacred writers refer to the names and qualities of precious stones. This is specially true of Job in the Apocalypse (xxi. 18-21), who exhibits a knowledge of such matters which an expert only in this species of learning among us would be expected to possess. But in the East, where such stones abound and are applied to so many uses, persons of the most ordinary intelligence in other respects show themselves almost the equals of artisans and scholars. 'I say,' says Job, referring to the writer just quoted, 'that this donkey-lord coming to meet us could confound nine-tenths of Bible-readers in America by his familiar acquaintance with the names, appearance, and relative value of the precious stones mentioned in the Word of God. We need not be surprised, therefore, at the constant mention of them by plain and unlettered prophets and apostles. Job was not a scholar nor a lapidary, and yet he is perfectly at home among precious stones, and without effort gives a list which has puzzled and does still puzzle our wisest scholars even to understand, nor are they yet agreed in regard to them. In our translation, and in every other with which I am acquainted, the same Hebrew word is made to stand for entirely different gems, and lexicographers, commentators, and critics are equally uncertain.'

II.

CHALDEA, more correctly CHALDEA (Zu/lu, 'Nabata), is properly only the most southern portion of Babelonia. It is used, however, in our version, for the Hebrew ethnic appellative 'Cushion,' or 'Chaldeans,' under which term the inhabitants of the entire country are designated; and it will therefore here be taken in this extended sense. The origin of the term is very doubtful. Cushion has been derived by some from Chasidel (7lu/lu), the son of Nabor (Gen. xvi. 22); but if it was already a city of the Cushim, before Abraham quit it (Gen. xi. 24), the name of Cushin cannot possibly have been derived from his nephew. On the other hand the term Cushin has been connected with the city Kishishin (Chil. mad of Ezekiel, xxvii. 23). This is possible correctly. At any rate, in searching for an etymology it should be borne in mind that Kish or Kishan, not Cushin, is the native form.

1. Limits and boundaries.—The tract of country viewed in Scripture as the land of the Chaldeans is that vast alluvial plain which has been formed by the deltas of the Euphrates and the Tigris—and let us be as near to the west of the latter stream. The country to the east is Elam or Susiana; but the entire tract between the rivers, as well as the low country on the Arabian side of the Euphrates, which is cultivable by irrigation from that stream, must be considered as comprised within the Chaldean of which Nebuchadnezzar was king. This extraordinary flat, unbroke other than by the works of man, extends, in a direction nearly N. W. and S. E., a distance of 400 miles along the source of the rivers, and is on the average about 100 miles in width. A line drawn from Hit on the Euphrates to Tekrit on the Tigris, may be considered to mark its northern limits; the eastern boundary is the Tigris itself; the southern the Persian Gulf; on the west its boundary is some-what ill-defined, and in fact would vary according to the degree of skill and industry devoted to the regulation of the waters and the extension of works for irrigation. In the most flourishing times of the Chaldean empire the water seems to have been brought to the extreme limit of the alluvium, a canal having been cut along the edge of the territory formation on the Arabian side throughout its entire extent, running at an average distance from the Euphrates of about 30 miles.

2. General character of the country.—The general aspect of the country is thus described by a modern traveller, who well contrasts its condition now with the appearance which it must have presented in ancient times. "In former days," he says, "the vast plains of Babylon were nourished by a complicated system of canals and water-courses, which spread over the surface of the country like a net-work. The wants of a teeming population were supplied by a rich soil, not less bountiful than that on the banks of the Egyptian Nile. As islands rising from a golden sea of waving corn stood frequent groves of palm-trees and pleasant gardens, and the idler or traveller their grateful and highly-valued shade. The streams were so well channelled that the bustle of gardens, nothing now meets the eye but an airy waste the dense population of former times is vanished, and no man dwells there." (Lottin's Chaldaic, pp. 14, 15.) The cause of the change is to be found in the neglect of man. "There is no physical reason," says the same writer, "why Babylon should not be as beautiful and as thickly inhabited as in days of old; a little care and industry would once more make the country a land of fields and gardens of the olden times." The prosperity and fertility of the country depend entirely on the regulation of the waters. Carefully and properly applied and husbanded, they are sufficient to make the entire plain a garden. Left to themselves, they desert the river courses to accumulate in lakes and marshes, leaving bare districts waterless, and other equally nearly supplied, while they once more become formerly under cultivation which become covered with a forest of reeds, and during the summer heats breed a pestiferous nuisance. This is the present condition of the greater part of Babelonia under Turkish rule; the evil is said to be advancing; and the whole country threatens to become within a short time either marsh or desert.

3. Divisions.—In a country so uniform and so devoid of natural features as this, political divisions could only accidental or arbitrary. Few are found of any importance. The true Chaldean, as has been already noticed, is always in the geographers a distinct region, being the most southern portion of Babilonia, lying chiefly (if not solely) on
the right bank of the Euphrates (Strab. xvi. 1, 6; Ptol. v. 20). Babylonia above this is divided into two districts, respectively Amurru and Auranitis. The former is the name of the central territory round Babylon itself; the latter is applied to the regions towards the north, where Babylonia borders on Assyria (Ptol. v. 20).

4. Cities. — Babylonia was celebrated at all times for the number and antiquity of its cities. "Babel, and Ezech, and Accad, and Calneh, in the land of Shinar," are the first towns mentioned in Scripture (Gen. x. 10). The "vast number of great cities" which the country possessed, was noted by Herodotus (i. 178), and the whole region is in fact studded with huge mounds, each mound marking beyond a doubt the site of a considerable town. The most important of those which have been identified are Borsippa (Birs-Nimrud), Sippar or Sepharvaim (Musul), Chatha (Borsam), Calneh (Niffer), Ezech (Warka), Ur (Megiddo), Chillum (Kulwoda), Laranca (Scibaek), Is (Hit), Duraba (Abekker); and besides there were a multitude of others, the sites of which have not been determined, as the Accad of Genesis (x. 10); the Theorden of Abduenus (Fr. 8); Ar-Abdi, Robesi, &c., towns mentioned in the inscriptions. Two of these places — Ur and Borsippa — are particularly noticed in the following article (CHALDEANS).

5. Canals. — One of the most remarkable features of ancient Babylonia was, as has been already observed, its net-work of canals. A more particular account will now be given of the chief of these. Three principal canals carried off the waters of the Euphrates towards the Tigris above Babylon. These were, (1) The original "Royal river," or Ar-Malche of Berosus, which left the Euphrates at Perisob or Anbar, and followed the line of the modern Sulaymaniyah or Shattala, passing through Cutha, and fell into the Tigris 20 miles below the city of Soloi. On the other side of the stream, a large canal, perhaps the most important of all, leaving the Euphrates at Hit, where the alluvial plain commences, skirted the deposit on the west along its entire extent, and fell into the Persian Gulf at the head of the Tidwin creek, about 20 miles west of the Shat-el-Arab; while a second main artery (the Pallocaus of Arrian) branched from the Euphrates nearly at Musul, and ran into a great lake in the neighborhood of Borsippa, whence the lands to the southwest of Babylon were irrigated. From these and other similar channels, numerous branches were carried out, from which further cross cuts were made, until at length every field was duly supplied with the precious fluid.

6. Sea of Niphon, Chalbean marshes, &c. — Phalae, and Phalae, and Phalae, and Phalae: one natural feature deserving of special description — the vast inland freshwater sea of Niphon." (Lotus, p. 45). This sheet of water, which does not owe its origin to the inundations, but is a permanent lake of considerable depth, surrounded by cliffs of a reddish sandstone in places 40 feet high, extends in a south-easterly direction a distance of 40 miles, from about lat. 31° 53', long. 44° 5', to lat. 31° 25', long. 44° 35'. Its greatest width is 35 miles. It lies thus on the right bank of the Euphrates, from which it is distant (at the nearest point) about 20 miles, and receives from it a certain quantity of water at the time of the inundation, which flows through it, and is carried back to the Euphrates at Shumara, by a natural river course known as the Shat-el-Jawab Above and below the Sea of Niphon, from the Birs-Nimrud to Kyfr, and from the south-eastern extremity of the Sea to Shumara, extend the famous Chalbean marshes (Strab. xvi. 1, § 12; Arrian, Exp. Al. vii. 22), where Alexander was nearly lost, but these are entirely distinct from the sea itself, depending on the state of the Hindiyah canal, and disappearing altogether when that is effectually closed.

7. Productions. — The extraordinary fertility of the Chalbean soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild. Berosus noticed this production (Fr. 1, § 2), and also the spontaneous growth of barley, sesame, ocher, palms, apples, and many kinds of shellfuit. Herodotus declared (i. 193) that grain commonly returned 200-fold to the sower, and occasionally 300-fold. Strabo made nearly the same assertion (iv. 1, § 14); and Pliny said (H. N. xviii. 17), that the soil will not bear wheat twice, and afterwards was good for pease, hair, and ears. The palm was undoubtedly one of the principal objects of cultivation. According to Strabo it furnished the natives with bread, wine, vinegar, pork, oil, and ropes; with a fuel equal to charcoal, and with a means of fattening cattle and sheep. A Persian poem celebrated its 360 uses (Strab. xvi. 1, 14). Herodotus says (i. 193) that the whole of the flat country was planted with palms, and Ammoniaca Marcellinum (xxiv. 3) observes that from the point reached by Julian's army to the Shores of the Persian Gulf was one continuous forest of verdure. At present palms are almost confined to the vicinity of the rivers, and even then do not grow thickly, except about the villages on their banks. The soil is rich, but there is little cultivation, the inhabitants subsisting chiefly upon dates. More than half the country is left dry and waste from the want of a proper system of irrigation; while the remaining half is a great expanse covered with shrubs, varying to the same neglect. Thus it is at once true that the sea has come up upon Babylon and she is covered with the waves thereof" (Jer. li. 42); that she is made "a possession for the battier, and pools of water" (Is. xiv. 23); and that "a drought is upon her waters, and they are dried up" (Jer. i. 38); that she is "wholly desolate" — "the hindermost of the nations, a wilderness, a dry land, and a desert" (ib. 12, 13). (See Loftus's Chaldaea and Susiana; Layard's Nineveh and Bab. chs. xxi.—xxiv.; Rawlinson's Herodotus, vol. i. Essay ix.; and Mr. Taylor's Paper in the Journal of the Asiatic Society, vol. xv. [Also: — Rawlinson, Five Great Monarchies of the Ancient Heiden Welt, vol. i. Lond. 1862; and Oppert. Historie des empires de Chalde et d'Asyrie d'apres les monuments, Versailles, 1869 (from the Annales de philos. chretienne, 1865).])

G. E.

CHALDEANS, or CHALDEES (Σαλδηνοί: Chaldei), appear in Scripture until the time of the Captivity, as the people
CHALDEANS

of the country which has Babylon for its capital, and which is itself termed Sinâr (ṣinār); but in the book of Daniel, while this meaning is still found (v. 39), and ix. 1, a new sense shows itself. The Chaldeans are classed with the magicians and astronomers; and evidently form a distinct class, who have a peculiar "tongue" and "learning" (ii. 4), and are consulted by the king on religious subjects. The same variety appears in prose writers. Berosus, the native historian, himself a Chaldean in the narrower sense (Eutat. Or. ed. G. L., 38.), uses the term only in the wider sense, while Herodotus, Diodorus, Strabo, and the later writers almost universally employ it to signify either a sect or portion of the people, whom they regard as wise men or as philosophers. With this view, however, is joined another, which till harmonizes with it; namely, that the Chaldeans are the inhabitants of a particular part of Babylonia, viz., the country bordering on the Persian Gulf and on Arabia (Strab. xvi. i., § 6; Plut. v. 20). By help of the inscriptions recently discovered in the country, these discrepancies and apparent contradictions are explicable.

It appears that the Chaldeans (Kûbî or Kûbbî) were in the earliest times merely one out of the many Chaldean tribes inhabiting the great alluvial plain known afterwards as Chalda or Babylonia. Their special seat was probably that southern portion of the country which is found to have so late retained the name of Chaldea. Here was E'r or the Chaldees; the modern Mâhîrâ, which lies south of the Euphrates, near its junction with the Shatt-el-Hîr. Hence doubtless came the three words of Chaldeans, who were instrumental in confirming the Babylon, in the afflication of Job (Job. i. 15-17). In process of time, as the Kûbî grew in power, their name gradually prevailed over that of the other tribes inhabiting the country; and by the era of the Jewish Captivity it had begun to be used generally for all the inhabitants of Babylonia. We may suspect that when the name is applied by Herodotus to the dynasts which preceded the Assyrians, it is by way of reproach. The dynasty of Nabûqadûner, however, was (it is probable) really Chaldean, and this greatly helped to establish the wider use of the appellation. It had thus come by this time to have two senses, both ethnic in the one it was the special appellative of a particular race to whom it had belonged from the remotest times, in the other it designated the nation at large in which this race was predominant. We have still to trace its transformation from an ethnic to a mere class sense—from the name of a people to that of a priest caste or sect of philosophers.

It has been observed above that the Kûbî proper were a Chaldean race. This is proved by the remains of their language, which closely resembles the Gûlu or ancient language of Ethiopia. Now it appears by the inscriptions, that while both in Assyria and in later Babylonia the Semitic type of speech prevailed for civil purposes, the ancient Chaldean dialect was retained, as a learned language, for astronomical and religious literature. This is no doubt the "learning" and the "tongue," to which reference is made in the book of Daniel (i. 4). It became gradually inaccessible to the great mass of the people, who were Semitized, by means (chiefly) of Assyrian influence. But it was the Chaldean learning, in the old Chaldean or Chaldean language, Hence all who studied it, whatever the origin of race were, on account of their knowledge, termed Chaldeans. In this sense Daniel himself, the "master of the Chaldeans" (Dan. v. 11), would have no doubt been reckoned among them; and so we find Senecio, a Greek, called a Chaldean by Strabo (xvi. i., § 6). It may be doubted whether the C. Chaldeans at any time were all priests, though no doubt priests were required to be Chaldeans. They were really the learned class, who by their acquaintance with the language of science had become its depositaries. They were priests, magicians, or astronomers, as their preference for one or other of these occupations inclined them; and in the last of the three capacities they probably effected discoveries of great importance.

According to Strabo, who well distinguishes (xvi. i., § 6) between the learned Chaldeans and the mere race descended from the ancient Kûbbî, which continued to predominate in the country bordering upon Arabia and the Gulf, there were two chief seats of Chaldean learning, Borsippa, and Ur or Orchoe. To these we may add from Pliny (II. N. vi. 26) two others, Babylon, and Sippa or Sus-harawain. The Chaldeans (it would appear) congregated into bodies, forming what we may perhaps call universities, and pursuing the studies, in which they engaged, together. They probably mixed up to some extent astrology with their astronomy, even in the earlier times, but they certainly made great advances in astronomical science, to which their serene sky, transparent atmosphere, and regular horizon specially invited them. The observations, covering a space of 1003 years, which Callisthenes sent to Aristotle from Babylon (Simplic. ad Arist. de Coelol. ii. 123), indicate at once the antiquity of such knowledge in the country, and the care with which it had been preserved by the learned class. In later times they seem certainly to have degenerated into mere fortune-tellers (Cic. de Div. i. 1; Avth. ii. 9; Juv. vi. 552, x. 94, &c.); but this reproach is not justly levelled against the Chaldeans of the empire, and indeed it was but partially deserved so late as the reign of Augustus (see Strab. xvi. i., § 6).

G. R.
CHAMBERLAIN, UPPER. [House.]

CHAMBERLAIN (οἰκόμοιος: arcarius) was one of those whose salutations to the Roman Christians are given at the end of the Ep. addressed to them (Rom. xvi. 23). The office which he held was apparently that of public treasurer or arcarius, as the Vulgate renders his title. These arcuii were inferior magistrates, who had the charge of the public chest (arcus publicus), and were under the authority of the senate. They kept the accounts of the public revenues. In the Glossary of Philostr. the word οἰκόμοιος is explained ὅ ἐπὶ τῆς δημοσίας τραπεζῆς, and in the Pallatius the term arcarius is applied to any one who attends to public or private money. It is, as Grotius remarks, one of those words which have been transferred from the house to the state. In old glosses quoted by Suicer (Theatra) we find arcarius explained by ὑποδείκτης χρυσός, and in accordance with this the translators of the Geneva Version have placed “receiver” in the margin. Erasmus interpreted the word quastor avaria. St. Ambrose thought that the office of the economus principally consisted in regulating the prices of the markets, and hence Pancerolus was erroneously led to interpret the term of the soda. Theophy�akt rendered it διοικητής, ὁ προνοητής τῆς πλείους Κοινοῦν, and is followed by Beza, who gives procurator.

In an inscription in the Museo, Oros. (p. 85, ed. 1732) we find Νεξίδοι οἰκόμοιοι Άρηας; and in another, mention is made of Miktus, who was economus of Smyrna (Ins. xxx. 26; see Prideaux’s note, p. 477). Another in Gruter (p. mxlv. 7, ed. Scaliger, 1616) contains the name of “Secundus Arcarius Redpublicae Aemiliarum”; but the one which bears most upon our point is given by Orelli (No. 2821), and mentions the “arcuarius provinciae Aeliae.”

For further information see Reischius, Syntagma, Inscri. p. 431; La Cerda, Advers. Sacre. cap. 56; Elsner, Obs. Sacr. ii. 68; and a note by Reischius to the Marmor Oecumenicum, p. 515, ed. 1732.

Our translators had good reason for rendering οἰκόμοιοι by “chamberlain.” In Stow’s Survey of London (b. v. p. 102, ed. Strype) it is said of the Chamberlain of the city of London: “His office may be termed a publick treasury, collecting the customs, monies, and yearly revenues, and all other payments belonging to the corporation of the city.”

The office held by Blastus, “the king’s chamberlain (τὸν ἐπὶ τοῦ κοίτως τοῦ βασιλέως),” was entirely different from that above mentioned (Acts xii. 20). It was a post of honor which involved great intimacy and influence with the king. The margin of our version gives “that was over the king’s bed-chamber,” the office thus corresponding to that of the prefectus cubiculae (Suet. Dom. 16).

For Chamberlain as used in the O. T., see Eunuch, ad fin.

W. A. W.

CHAMELEON (蔃, כובך: χαμαίλων: chamæleon). The Hebrew word which signifies "strength" occurs in the sense of some kind of uncarnal animal in Lev. xi. 30; the L. V. follows the LXX. and Vulg. Various other interpretations of the word have been given, for which see Bochart (Hieroz. ii. 493). It is not possible to come to any satisfactory conclusion on the subject of the identity of this word: Bochart accepts the Arabic reading of išqama, i.e. the lizard, known by the name of the “Monitor of the Nile” (Acanthosaurus, Grey), a large strig reptile common in Egypt and other parts of Africa. Arabian writers have recorded many wonderful things of this creature, and speak especially of its power in fighting with snakes, and with the dabb, a closely allied species [Herod. i. 142]. No doubt much they relate is fabulous, and it seems that there is some confusion between the dabb (Vulgate spinipes) and the crocodile, whose eggs the "Nilean Monitor" devours. Forskål (Ins. Anim. p. 13) speaks of this last-named lizard under the Arabic name of ʿArabi. See also Hasselquist (Tovr. p. 221). The Hebrew root of ʿeḇēḵ has reference to strength, and as the Arabic verb, of almost similar form, means "to conquer any one in fighting," Bochart has been led to identify the lizard named above with the Heb. ʿeḇēḵ. It is needless to add how far from conclusive is the evidence which supports this interpretation.

W. H.

CHAMOIS (xious, zemer: καμηλοπόδαλις, camelopardalos). In the list of animals allowed for food (Deut. xiv. 5) mention is made of the zemer; the L.XX., Vulg., and some other versions, give "camelopard" or "giraffe" as the rendering of this term; it is improbable that this animal is intended, for although it might have been known to the ancient Jews from specimens brought into Egypt as tributes to the Pharaohs from Ethiopia, where the giraffe is found, it is in the highest degree improbable that it should ever have been named as an article of food in the Levitical law, the animals mentioned therein being doubtless all of them such as were well known and readily procured. The "chamois" of the A. V. can hardly be allowed to represent the zemer; for although, as Col. H. Smith asserts, this antelope is still found in Central Asia, there is no evidence that it has ever been seen in Palestine or the Lebanon. The etymology points to some "springing" or "leaping" animal, a definition which would suit any of the Antelope or Oryx.

Aoudad Sheep.

or Caprae, etc. Col. H. Smith (in Kitto’s Cyc. art. Zemer) suggests that some mountain sheep is intended, and figures the Kebac (Ammotragus

See some interesting observations on the Dabb, by Mr. Tristram, in Zoöl. Proc. for 1859.
CHAMPION

Champion, a wild sheep not uncommon, be
ought in the Mokattam rocks near Cairo, and found
also in Sinai: it is not improbable that this is the
animal denoted, for the names of the other rami-
nants mentioned in the catalogue of beasts allowed
for food, are, for the most part, identifiable with
other wild animals of the Bible lands, and there
may be no doubt that the Kibosh or Ambad was
known to the Israelites; again, Col. Smith's sug-
gestion has partly the sanction of the Syriac ver-
se, which reads as the equivalent of the Heb,
word, "a mountain goat," the Ambad, although
really a sheep, being in general form more like
a goat. This animal occurs not unfrequently figured
on the monuments of Egypt: it is a native of N.
Africa, and an inhabitant of high and inaccessible
places.

W. H.

* CHAMPION, CHAMPION, old form for
champion in A. V. col. 1611, Ez. xxxvii. 2,
marg., and Deut. xi. 30.

CHA'ANAN (Xaranats), the manner in which the
word Canaan is spelt in the A. V. of the
Apostrophe and N. T. (comp. Charran for Hara
(see) Jud. v. 3, 8, 9; Bar. iii. 22; Sus. 56; 1 Mac.
ix. 37; Acts vii. 11, viii. 19.

CHA'ANNAVITE for Canaanite, Jud. v. 16.
[Also 1 Esd. viii. 69.]

* CHANCEL-BONE, Job xxxi. 22, margin of
A. V. An old term for the collar-bone or clav-
icle, also written "cowl bone." See Eastwood
and Wright's Bible Word-Book, p. 94.

CHANNUNUS (Xaranannus), 1 Esd. viii. 48. This answers to Menarij, if anything, in
the parallel list of Ezra (viii. 19).

* CHANOCH, Gen. iv. 17, marg. A form of
Ezech, more nearly representing the Hebrew.

A.

* CHAPEL occurs in Am. vii. 13 as the transla-
tion of צ"ח צ"ח (Sept. Zyaigma, and Vulg. sancti-
ificantem prophetis), i. e., sanctuary or place of worship,
the word is applied there not to any single shrine or temple,
but to Bethel itself, which in the time of Jer-
oboam II. was crowded with altars (Am. iii. 14) which
that king had erected to Baal. The render-
ing is as old certainly as the Bishops' Bible, and
perhaps arose from an idea that the king had a
private place of worship at Bethel. The term
"chapel" is also applied in the A. V. to places
for idol-worship (ם"נ,ם"נ) 1 Mac. i. 47; 2
Mac. x. 2, xi. 3.

CHAREA (Chariot) [Vat. omits: Chare.] 1 Esdr. v. 32. [Harm.]

CHARGER (1. ἡχος, from a root signifying hollowness: ἀχοῦς, κοτλάς: acetabulum. 2. ἕρατον: phiale; only found Ezr. i. 9, a shallow vessel for receiving water or blood, also for presenting offerings of fine flour with oil (Num. viii. 79; Ges. Thes. 22). The "chargers" mentioned in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 15 oz. (Hersey, Anc. Weights, c. i. p. 110).

2. The daughter of Herodelus brought the head of St. John Baptist "in a charger," εἰς πάνα (Matt. xiv. 8 [11; Mark vi. 23, 28]; probably a trower or platter, as Hom. Od. i. 114: - διοικός δὲ κρεόω πάνας παραθέναι διαφέρει παραθύρων.

W. H. P.*

* The English "charger" as "that on which anything is laid, a dish," comes from the French charger, and the old English chargr, i.e. "to load." The A. V. renders ἑρατοῖς dish in Ex. xxv. 20, xxxvii. 16, and Num. iv. 7. H.

** CHARGES. "Be at charges with them" A. V. Acts xxiv. 21, or rather for them" διατάξαντες ἐν αὐτοῖς, means "pay the expense of their offerings." A.

CHARIOT. (1) πεπόθος, from πέποθος, to ride. Apoc: currus: sometimes including the horses (2 Sam. viii. 4, x. 18). (2) θηβὴν: a chariot or horse (Ps. civ. 3). (3) ἐρατοῦς, from same root as (1), a chariot, litter, or seat (Lev. xv. 9, Cant. iii. 9). (4) νεφέλας: f. (5) ἑρατοῖς, from ἑρατεῖα, roll (Ps. xlv. 9, θηβοῖς: scutum). (6) καρδιά, Cant. iii. 9: φωρεῖς: furculum. [1. Θηβής, Ex. xxvii. 20; Ges., Ewald, riding; Vulg., ad sequendum. (8) τῆς, Ex. xxiii. 24, a difficult word.

Ges., arms; Fürst, battle-axe; Hitzig, by alter- ing the points, and etymological conjecture, rot- ilium, A. [Between i-4 no difference of significance. A vehicle used either for warlike or peaceful purposes, but most commonly the former. Of the latter use the following only are probable instances: as regards the Jews, 1 K. vi. 34; and as regards other nations, Gen. xii. 43, xvi. 29; 2 K. v. 9; Acts viii. 28.

The earliest mention of chariots in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. xii. 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xvi. 29). In the funeral procession of Jacob chariots also formed a part, possibly by way of escort or as a guard of honor (I. 9). The next mention of Egyptian chariots is for a warlike purpose (Ex. xiv. 7). In this point of view chariots among some nations of antiquity, as elephants among others, may be regarded as filling the place of heavy artillery in modern times, so that the military power of a nation might be estimated by the number of its chariots. Thus Pharaoh in pursuing Israel took with him 600 chariots. The Canaan ites of the valleys of Palestine were enabled to resist the Israelites successfully in consequence of the number of their chariots of iron, i. e. perhaps armed with iron scythes (Gen. s. r. ,Josh. xvii. 18; Judg. i. 19). Jabin, king of Canaan, had 900 chariots (Judg. iv. 3). The Philistines in Saul's time had 3000, a number which seems excessive (1 Sam. xxi. 5); but comp. LXX. and Joseph, Ant. vi. 6, § 1). David took from Hadadezer king of Zobah 1000 chariots (2 Sam. viii. 4), and from the Syrians a little later 700 (18), who in order to recover their ground collected 32,000 chariots (1 Chr. xix. 7). Up to this time the Israelites possessed few or no chariots, partly no doubt in consequence of the theocratic prohibition against multiplying horses, for fear of intercourse with Egypt, and the regal despotic implied in the possession of them (Deut. xvii. 16: 1 Sam. viii. 11, 12). But to some extent David (2 Sam. viii. 4), and in a much greater degree Solomon, broke through the prohibition from seeing the necessity of pleasing his kingdom, under it's altered circumstances, on a footing of military equality or superiority towards other nations. He raised, therefore, and maintained a force of 1400 chariots (1 K. x. 25) by taxation againly to Eastern custom in such matters (1 K. ix. 19, x. 25; Xen. Anwb. i. 4, 9). The chariots themselves and also the horses were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 150 (1 K. x. 20). [Skeels] From this time chariots were regarded as among the most important arms of war, though the supplies of them and of horses appear to have been still mainly drawn from Egypt (1 K. xii. 34; 2 K. ix. 10, 21, xiii. 7, 14, xviii. 24, xxiii. 39; Is. xxxii. 1). The prophets also allude frequently to chariots as typical of power, Ps. xx. 7, civ. 3; Jer. li. 21; Zech. vi. 1.

Chariots also of other nations are mentioned, as of Assyria (2 K. xix. 23; Ez. xxiii. 24), Syria (2 Sam. viii. and 2 K. vi. 14, 15), Persia (Is. xxii. 6), and lastly Antiochus Epipator is said to have had 3000 chariots armed with scythes (2 Macc. xiii. 2).

In the N. T., the only mention made of a chariot except in Rev. ix. 9, is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is described as sitting in his chariot reading (Acts viii. 28, 29, 35).

Jewish chariots were no doubt imitated from Egyptian models, if not actually imported from Egypt. The following description of Egyptian chariots is taken from Sir G. Wilkinson. They appear to have come into use not earlier than the 18th dynasty (n. c. 1550). The war chariot, from which the chariot used in peace did not essentially differ, was extremely simple in its construction. It consisted, as appears both from Egyptian paintings and reliefs, as well as from an actual specimen preserved at Florence, of a nearly semicircular wooden frame with straightened sides, resting posteriorly on the axle-tree of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leather thongs and one wooden upright in front. The floor of the car was made of rope net-work, intended to give a more springy footing to the occupants. The car was mounted from the back, which was open, and the sides were strengthened and ornamented with leather and metal bind-
ing. Attached to the off or right-hand side, and crossing each other diagonally, were the bow-case, and inclining backwards, the quiver and spear-case. If two persons were in the chariot, a second bow-case was added. The wheels, of which there were 2, had 6 spokes; those of peace chariots had sometimes 4, fastened to the axle by a linch-pin secured by a thong. There were no traces; but the horses, which were often of different colors, were only a breast-band and girths, which were attached to the saddle; together with head furniture consisting of cheek-pieces, throat-lock, head-stall and straps across the forehead and nose. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving-reins passed through other rings on each side of both horses. From the central point of the saddle rose a short stem of metal, ending in a knob, whether for use or mere ornament is not certain. The driver stood on the off-side, and in discharging his arrow hung his whip from the wrist. In some instances the king is represented alone in his chariot with the reins fastened round his body, thus using his weapons with his hands at liberty. Most commonly 2 persons, and sometimes 3 rode in the chariot, of whom the third was employed to carry the state umbrella (2 K. ix. 20, 21; 1 K. xxi. 34; Acts viii. 28). A second chariot usually accompanied the king to battle to be used in case of necessity (2 Chr. xxxvi. 34).

On peaceful occasions the Egyptian gentleman sometimes drove alone in his chariot attended by servants on foot. The horses wore housings to protect them from heat and insects. For royal personages and women of rank an umbrella was carried by a bearer, or fixed upright in the chariot. Sometimes mules were driven instead of horses, and in travelling sometimes oxen, but for travelling purposes the sides of the chariot appeared to have been closed. One instance occurs of a 4-wheeled car, which, like the τερπακώδος οίκος (Herod. ii. 63), was used for religious purposes. [Cart.] The processes of manufacture of chariots and harness are fully illustrated by existing sculptures, in which also are represented the chariots used by neighboring nations (Wilkinson, Anc. Egypt. i. 308, 386; ii. 75, 79; 2d ed.).

The earlier Assyrian war chariot and harness did not differ essentially from the Egyptian. Two or three persons stood in the car, but the driver is sometimes represented as standing on the near side, whilst a third warrior in the chariot held a shield to protect the archer in discharging his arrow. The car appears to have had closed sides. The war chariot wheels had 6 spokes; the state or peace chariot 8 or more, and a third person in state processions carried the royal umbrella. A third horse, like the Greek καρποσάρα, was generally attached (Layard, Nineveh, ii. 354). In later times the third horse was laid aside, the wheels were made higher, and had 8 spokes; and the front of the car, to which the quiver was 

An Egyptian war-chariot, with bow-cases and complete furniture. (Wilkinson.)

Egyptian princes in their chariots. (Wilkinson.)
moved from its former side position, was made square instead of round. The cars were more highly ornamented, panelled, and inlaid with valuable woods and metals, and painted. The embroidered housings in which in earlier times the horses were clothed, were laid aside, and plumes and tassels used to decorate their necks and foreheads. (Layard, Nineveh, ii. 355, 396; Nineveh and Babylonia, pp. 341, 587, 603, 618; Mon. of Nineveh, ii. 24; Ez. xxvii. 20.)

The Persian art, as appears from the sculptures at Persepolis, and also at Konyunjik, shows great similarity to the Assyrian; but the procession represented at the former place contains a chariot or ear with wheels of 12 spokes, while from the sculptures at the latter, it appears that the Elamites, or Persians, besides chariots containing 2 persons which were sometimes drawn by 4 horses, used a kind of cart drawn by a single mule or more, consisting of a stage on high wheels capable of holding 5 or 6 persons, of whom the driver sat on a low stool, with his legs hanging on each side of the pole. (Xenophon, Cyrop. iv. 3, 1, and 2, § 22; Is. xxii. 6; Ez. xxiii. 24; Niebuhr, Voyage, ii. 105; Chardin, Voyage, viii. 25, p. lix; Layard, Nineveh and Babylonia, pp. 447, 449; Olearius, Travels, p. 302.)

The writer has here followed the erroneous rendering of the A. V. in 1 K. vii. 33. According to the best lexicographers and commentators the spoko are denoted by וַיְסַפְּר, the naves by וַיְסַפְּר, and the

CHEBAR

CHEJOT

CHEBAR [Xabah]: [Vat. M. Ex. x. 22. Xabath:] (Chabah), a name among the list of the "Servants of the Temple" (1 Esdr. v. 31), which has nothing corresponding to it in Ezra and Nehemiah, and is probably a mere corruption of that succeeding it — GAZERA.

CHAS'VAH, Gen. iii. 20 marg. A form of EVE, more nearly representing the Hebrew. A.

CHAWS, an old form for jaws, Ez. xxix. 4 and xxxviii. 4, in A. V. ed. 1611 and other early editions. A.

CHEBARK [Xobaph]: [Vat. M. Ex. x. 22. Xabath:] (Chabah), a river in the "land of the Chaldeans" (Ez. i. 5), on the banks of which some of the Jews were located at the time of the Captivity, and where Ezekiel saw his earlier visions (Ez. i. 1, iii. 15, 23, &c.). It is commonly regarded as identical with the Haber (ךבִּ֖ר), or river of Gazer, to which some portion of the Israelites were removed by the Assyrians (2 K. xvii. 26). But this is a mere conjecture, resting wholly upon the similarity of name: which after all is not very close. It is perhaps better to suppose the two streams distinct, more especially if we regard the Haber as the ancient Abdophos (modern Khabour), which fell into the Euphrates at Cireissium; for in the Old Testament the name of Chaldaea is never extended so far northwards. The Chebar of Ezekiel must be looked for in Babylonia. It is a name which might properly have been given to any great stream (comp. כְּבָּר, great). Perhaps the view, which finds some support in Pliny (H. N. vi. 26), and is adopted by Bochart (Phæleg, i. 8) and Celarius (Geograph. c. 22), that the Chebar of Ezekiel is the Nahr Melchir or Royal Canal of Neschadacazar — the greatest of all the cuttings in Mesopotamia — may be regarded as best deserving acceptance. In that case we may suppose the Jewish captives to have been employed in the excavation of the channel.
CHEBEL

That Chelah, not upper Mesopotamia, was the scene of Ezekiel's preaching, is indicated by the tradition which places his tomb at Kyfîl (Loeb's Chebelum, p. 35).

CHEBEL (חֶבֶל), one of the singular topographical terms in which the ancient Hebrew language abounded, and which give so much force and precision to its records. The ordinary meaning of the word Chebel is a "rope" or "cord," and in this sense it frequently occurs both literally (as Josh. ii. 15, "cord;" I K. xx. 11, "ropes;" Is. xxxii. 23, "tacklings;" Am. vii. 17, "line") and metaphorically (as Ezek. xii. 6; Is. x. 18; Hos. xi. 4). From this it has passed — with a curious corolary to our own modes of speech — to denote a body of men, a "band" (as in Ps. exxix. 61).

In 1 Sam. x. 5, 10, our word "strangly" would not be inappropriate to the circumstances — a "string of prophets coming down from the high place." Further it is found in other metaphorical senses, arising out of its original meaning (as Job xviii. 10; Ps. xxviii. 4; Jer. xiii. 21). From the idea of a measuring-line (Meio. ii. 5), it has come to mean a "portion" or "allotment" (as 1 Chr. xvi. 13; Ps. cv. 11; Ez. xliii. 15"). It is the word used in the familiar passage "the lines are fallen unto me in pleasant places" (Ps. xxxvi. 6). But in its topographical sense, as meaning a "tract" or "district," we find it always attached to the region of Argeb, which is invariably designated by this, and by no other term (Deut. iii. 13, 14; 1 K. iv. 13).

It has been already shown how exactly applicable it is to the circumstances of the case. [Add. But in addition to the observations there made, the reader should be referred to the report of the latest traveller in those interesting regions, who abundantly confirms the statements of his predecessors as to the abrupt definiteness of the boundary of the district. (Mr. C. C. Graham, in Cambridge Essays, 1858.)

No clue is afforded to us the reason of this definite localization of the term Chebel; but a comparison of the fact that Argeb was taken possession of by Manasseh — a part of the great tribe of Joseph — with the use of this word by that tribe, and by Joshua in his report, in the very early and characteristic fragment, Josh. xxi. 5, 14 (A. V. "portion"), prompts the suggestion that it may have been a provincialism in use amongst that large and independent part of Is. Should this be thought untenable, its application to the "rocky shore" of Argeb may be illustrated and justified by its use (Zeph. ii. 5-7; A. V. "coast") for the "coast line" of the Mediterranean along Philistia. In connection with the seashore it is also employed in Josh. xix. 29.

The words used for Chebel in the older versions are σχολασμα, περιστερας, περιφεροντας, τροφοειν, μιντανιθα. [See Add. and the addition to Basha in A. M. ed.]

CHEDORLAOMER (חדרלואומר: Χαδραλαομερης: Cheborahomer), a king of Elam, in the time of Abraham, who with three other chiefs made war upon the kings of Sodom, Gomorrah, Admah, Zeboim, and Zor, and reduced them to servitude. For twelve years he retained his hold over them; in the thirteenth they rebelled; in the next year, however, he and his allies marched upon their country, and after defeating many neighboring tribes, encountered the five kings of the plain in the vale of Siddim. He completely routed them; slew the kings of Sodom and Gomorrah, and carried away much spoil, together with the family of Lot. Chedorlaomer seems to have perished in the rescue which was effected by Abraham upon hearing of the captivity of his nephew (Gen. xiv. 17).

According to Genesis the meaning of the word may be "handful of sheaves," from the Septuagint, and "reaping sheaf," but this is unsatisfactory. The name of a king is found upon the bricks recently discovered in Chelah, which is read Kadur-mupula.

This man has been supposed to be identical with Chedorlaomer, and the opinion is confirmed by the fact that he is further distinguished by a title which may be translated "Ravager of the west." "As however one type alone of his legends has been discovered," says Col. Rawlinson, "it is impossible to pronounce at present on the identificatory value of the word element in the name Chedor-laoamer," is of course distinct from that in "Kudur-mupula." Its substitution may be thus accounted for.

In the names of Babylonian kings the latter portion is often dropped. Thus Shuldanuwar becomes Shulman in Hosea; Merechkebel-adum, becomes Merodocempul, &c. Kadur-mupula might therefore become known as Kadur simply. The epithet "el-Ahmar," which means the Red, may afterwards have been added to the name, and may have been corrupted into Laomer, which, as the orthography now stands, has no apparent meaning. Kadur-el-Ahmar, or "Kedar the Red," is in fact a famous hero in Arabian tradition, and his history bears no inconsiderable resemblance to the Scripture narrative of Chedor-lamom. It is also very possible that the second element in the name of Chedor-lamom, whatever be its true form, may be a Semitic translation of the original Hamite term ʾәʾәʾmed. "Chedorlaomer may have been the leader of certain immigrant Chaldean Elamites who founded the great Chaldean empire of Persia in the early part of the 20th century B.C., while Amraphel and Arioch, the Hamite kings of Shinar and Ellasar, who fought under his banner in the Syrian war as subordinate chiefs, and Tidal, who led a contingent of Median Seyths belonging to the old population, may have been the local governs who had submitted to his power when he invaded Chelah." (Rawlinson's Hevel, i. 436, 446.)

S. L.

CHEESE

CHEESE is mentioned only twice in the Bible, and on each occasion under a different name in the Hebrew: (1) 2222, from כבדו, to curdle (Job x. 18); referred to, not historically, but by way of illustration: (2) כבד [3077] 2222, from כבד (-24) 2222, to cut (τραφαλας του γαλακτου, LXX; formula coniunct., Vulg., 1 Sam. xvii. 18); the Chaldean and Syriac give כבד [3077] 2222. Hechi exjains τραφαλας as τραφαμα του ἀπαλου τυροι. (3) כבד [3077] 2222, from כבד (-24) 2222, to scrape (Σαρόε βοσκει, LXX; "chain," and also "cost" as applied in the provinces and colonies, to solid measure of wood, &c., are obvious.)
CHELAL  

CHEMOSH  

cheese of kine, A. V. 2 Sam. xvii. 29: the Vulgate, following Theodotion's rendering, *γαλακτόβια μουστία* gives *pinques citanos*, guided by the position of the words after "sheep": *the Targum and other Jewish authorities, however, identify the substance with those mentioned above*. It is difficult to decide how far these terms correspond with our notion of cheese, for they simply express various degrees of coagulation. It may be observed that cheese is not at the present day common among the Bedouin Arabs, butter being decidedly preferred; but there is a substance, closely corresponding to those mentioned in 1 Sam. xvii., 2 Sam. xvi., consisting of coagulated butter-milk, which is dried until it becomes quite hard, and is then ground: the Arabs eat it mixed with butter (Barckhardt, *Notes on the Bedouins*, i. 68). In reference to this subject, it is noticeable that the ancients seem generally to have used either butter or cheese, but not both: thus the Greeks had in reality but one expression for the two, *βοετωρια* or *πυρονσ*, "cheese of kine": the Romans used cheese exclusively, while all nomad tribes preferred butter. The distinction between cheese proper, and coagulated milk, seems to be referred to in Pliny, *x*. 96. 

W. L. B.

CHELAL (χήλαλ), [perfection] : ἧλαλία [Vat. Nεύαλα, Ne- belonging to the preceding work:] Chel'luh, Ezr. x. 30 [where he is mentioned as one of the eight sons of Pahath-Moab who had all taken "strange wives"].

CHELCHAS (χελχας, i. e. χήληκας, the portion of the Lord, *Hilkia*: Hebrew), the father of Susannah ([Hist. of Sis. 2, 29, 63]). Tradition (Hippol. in Seneca, i. 689, ed. Migne) represents him as the brother of Jeremiah, and identical with the priest who found the copy of the law in the time of Josiah (2 K. xxii. 8).

B. F. S.

CHELIANS, THE (Judg. ii. 23). [CHEL.-]

CHELUH (χήληου, Keri, χελήου [strength, First]: Xελαάθ; [Vat. F.A. Xελαία; Adj. Alex. Xίαλα]: Chel'luh), Ezr. x. 35 [one of the sons of Bani, who had foreign wives].

CHELLUS (χελλος; [Sin. Χελλους; Vat.] Alex. Xελλους: Vulg. omits), named amongst the places beyond (i.e. on the west of) Jordan to which Nabuchodonosor sent his summons (Judg. i. 9). Except its mention with "Kades" there is no clue to its situation. (Ibid. *Pal.*, p. 717) conjectures that it may be Chelata, *τιθησαν χέλα* [In the Targum, *χελλος*], a place which, under the altered form of *Ελααθα*, was well known to the Roman and Greek geographers. With this agrees the subsequent mention of the "land of the Chelus" which] 2 K. xvi. 10 (Vat. M. Xελλους; Sin. Alex. Xελλανος; *lavra Cellon*, "by the wilderness," to the south of whom were the children of Israel (Judg. ii. 23). 

G. * Volkmar (Eind. in die Apokr. i. 191) adopts the reading Xελλανος, which is supported by the Syr. 

CHELUS (Χελλος; Alex. Xελλους; [Sin. Χελλους; Adj Xελαάτ]: Vulg. omits). "Many nations of the sons of Chehol" were among those who obeyed the summons of Nabuchodonosor to his war with Arphaxad (Judg. i. 6). The word is apparently corrupt. Simonis suggests Xελαρω, perhaps Xελασθω. Ewald conjectures it to be a nickname for the Syrians, "sons of the nodes" [Geach, iv. 543].

* Volkmar gives the same interpretation, only applying the term, in accordance with his theory of the book, to the Roman armies as a *Schutzgraber-Heer*, famous for intertreating. See his *Eind. in die Apokr. i. 31 f.*, 153.

CHE'LEB (χελήβ) [first-born]. 1. A man among the descendants of Judah, described [1 Chr. iv. 11] as the brother of Shunah and the father of Meehir [1 Chr. iv. 11]. (In the LXX. the name is given as Caleb, Xαλαβ, the father of Ascha; the daughter of the well-known Caleb was Aelsah; Vulg. Calah.)

2. (δ Xελαβος; [Vat. Χαλβος;] Cheleb). Ezri the son of "Chelub" the overseer, and those who "did the work of the field for tillage of the ground," one of David's officers (1 Chr. xxvii. 20).

CHELE'BAI [3 syn.] (χελεβαί) [heros, Fürst]: δ Χαλβαί; [Vat. M. Χαλβαί; i. e. δ Χαλβαί;]: Calubi, the son of Hezon, of one of the chief families of Judah. The name occurs in 1 Chr. ii. 9; and, from a comparison of this passage with ii. 13 and 42, it would appear to be but another form of the name Caleb. It is worth noting that, while in this passage Jerahmeel is stated to be a brother of Chelubai, it appears from 1 Sam. xxvii. 10 that the Jerahmeelites were placed on the "south of Judah," where also were the possessing houses of the case of Hezon (Judg. i. 15; 1 Sam. xxv. 4, xx. 11). In the Syriac Vers. the name is เชלבי, Saclei; probably a transcriber's error for เชלבי, Cebabi (Burrington, i. 209).

CHEMERIMS, THE (כֹּהֶרִים): (in 2 K. xxiii. 5) כֶּחֶרֶים; [Vat.] Alex. כּהֶרֶים; arapisces, adlatir). This word only occurs in the text of the A. V. in Zeph. i. 4. In 2 K. xxiii. 5 it is rendered "idolatrous priests," and in Hos. x. 5 "priests," and in both cases "cheremarim" is given in the margin. So far as regards the Hebrew usage of the word it is exclusively applied to the priests of the false worship, and was in all probability a term of foreign origin. In Syriac the word כֹּהֶרִים, כהָרִים, is found without the same restriction of meaning, being used in Judg. xvii. 5, 12, of the priest of Meehir, while in Is. xii. 6 it denotes the priests of the true God, and in Heb. ii. 17 is applied to Christ himself. The root in Syriac signifies "to be sad," and hence כהָרִים is supposed to denote a mournful, ascetic person, and hence a priest or monk (compare Arab. الدلاب, obid, and Syr. [הדר], obid, in the same sense). Kimchi derived it from a root signifying "to be black," because the idolstrous priests wore black garments; but this is without foundation. [IOLOATH, II.]

In the Peshito-Syriac of Acts xix. 35 the feminine form of the word is used to render the Greek *νεκροψω*, "a temple keeper." Compare the Vulg. *venerabilis*, which is the translation of Cheremarim in two passages. 

W. A. W.

CHEMOSH (כֹּהֶשָּׁם) [perh. adder. Gen.
fire, heath, i.e. god of fire. [First: ] Xo'arë: [Vat. in Judg. Asorë:] Chorne, the national deity of the Moabites (Num. xxi. 29; Jer. xviii. 7, 13, 46). In Judg. xii. 24, he also appears as the god of the Ammonites: he must not, however, be identified with Moloch. Solomon introduced, and Josiah abolished, the worship of Chemosh at Jerusalem (1 K. xi. 7; 2 K. xxiii. 13). With regard to the meaning of the name, and the position which Chemosh held in mythology, we have nothing to record beyond doubtful and discreditable conjectures. Jerome (Comm. in Is. xxv. 2) identifies him with Baal-Perash; others with Baal-Zedub, on etymological grounds; others, as Gesenius (Thesaur. 684), with Mars, or the god of war, on similar grounds; and others (Bever and Schub, p. 524) with Saturn, as the star of ill omen, Chemosh having been worshipped, according to a Jewish tradition, under the form of a black star. Jerome (on Is. xv.) notices Dibon as the chief seat of his worship.

W. L. B.

CHENA'ANAH (חֵנָאָנָא) Xerávd [Vat. Xaravà: Alex. Xaravà: Chornava: according to the Vulg. Caernavum: ] 1. Saul's Dibhan, son of Jedud, chief of Benjamin, head of a Benjaminite house (1 Ch. vii. 10), probably of the family of the Belaites. [14]:41:

2. [Xeravà: Vat. M. 1 K. xxi. 11, Xara: Alex. Xarava, Xarava, Xarava: Chernava:] Father, or ancestor, of Zedeckiah, the false prophet who made him horns of iron, and encouraged Ahaz to go up against Ramoth-Gilead, and smote Micaiah on the cheek (1 K. xxi. 11; 2 Ch. xviii. 10, 24). He may be the same as the preceding.

A. C. II.

CHENAI (חרנאי, ] ['cherok or 'moek]: Xeroví: F.2; Alex. Xaraví: F.A.Vat. omitt.: cf. Chernái), one of the Levites who assisted at the solemn purification of the people under Ezra (Neh. ix. 4 only). By the LXX., the word Bani (בָּנַי) preceding is read as if meaning "sons"—a sons of Chenena. The Vulgate and A. V. adhering to the Masoretic pointing, insert "and.

CHENA'ANAH (חסן) [as above]: Xenovia, Xenovias: [Vat. Xenovia, Xenovias: Alex. Xenovia, Xenovias; in 1 Chr. xv. 27, Alex. Xenovías: F.A. Xenovias: Chornovias]: chief of the Levites, when David carried the ark to Jerusalem (1 Chr. xxv. 22, xxvi. 29). In 1 Chr. xv. 27, his name is written חֵנָאָנָא.

CHEPHI'RAH (קדְפֶּרָה) [chepher]: "Hamlet of the Ammonites:" Kaphírak kal Kep̄ráh kal Movi [Vat. -cheper-and -weor]: Alex. Kaph̄ér̄am [Vomp. Kaph̄ér̄am] Vhíl kal Movi kal Movi, a place mentioned among the towns of Benjamin (Josh. xvii. 21). No trace of it has yet been discovered, but in its name is doubtless preserved the memory of an incursion of the Ammonites up the long ravines which lead from the Jordan valley to the highlands of Benjamin.

G.

CHEPHIRAH (קדְפֶּרָה), with the definite article, except in the later books, — the hamlet: [Rom. Kérāph, [etc.: Vat. Kēp̄ēph, Kēp̄ēph, Kēp̄ēph: F.A. in Neh. Kēp̄ēph: Alex.] Xēp̄ēph, [etc.: Cēp̄ēph, Cēp̄ēph], one of the four cities of the Gibonites (Josh. ix. 17), and named afterwards among the towns of Benjamin, with Ramah.

CHERITH (קרית), the torrent bed or valley — to use the modern Arabic word which exactly answers to the Hebr. נחל—in (not "by," as the translators of the A. V. were driven to say by their use of the word "brook") which Elijah hid himself during the early part of the three years' drought (1 K. xvii. 3, 5). No further mention of it is
found in the Bible, and by Josephus (Ant. viii. 13, § 2) it is spoken of merely as χειράμαιος της. The position of the Cherith has been much disputed. The words of the passage unfortunately give no clue to it: — "get thee hence (i.e. apparently from the spot where the interview with Ahab had taken place, and which may or may not be Samaria), and turn thy face eastward (§ § § §), and hide thee in the torrent Crith, which is facing (§ § § §) the Jordan." The expression "facing the Jordan," which occurs also in verse 5, seems simply to indicate that the stream in question ran into that river and not into either the Mediterranean or the Dead Sea. Josephus, as we have seen, does not name the torrent, and he says that Elijah went, not "eastward," but towards the south — εἰς τὰ πᾶσα πότον μέρος. Eusebius and Jerome on the other hand (Onomasticon, Cherith) place the Cherith beyond Jordan, where also Schwartz (51) would identify it in a Wady Alis, opposite Bethshean. This is the Wady el-Yabis (Jabesh), which Benj. Tudela says is a corruption of צֶרַּיָּה צְנָת (ii. 408; Asher). The only tradition on the subject is one mentioned by Marinus Sanutus in 1321; that it ran by Phasaeus, Herod's city in the Jordan valley. This was in the east of the Ain Fossail which falls from the mountains of Ephraim into the Ghôr, south of Karn Sâtareh, and about 15 miles above Jericho. This view is supported by Buchene, and in our own time by Van de Velde (iii. 310). The spring of the brook is concealed under high cliffs and under the shade of a dense jungle (V. de Velde, Memoir, 359). Dr. Robinson on the other hand would find the name in the Wady Kelt ([right]), behind Jericho. The two names are however so essentially unlike, — not so much in the change of the Cyph to Koph, and Resh to Lom, both of which are conceivable, as in the removal of the accent from the end in Crith to the beginning in Kelt, — that this identification is difficult to receive, especially in the absence of any topographical grounds. (See the same doubt expressed by Winer, Cherith.)

The argument from probability is in favor of the Cherith being on the east of Jordan, of which Elijah was a native, and where he would be more out of Ahab's reach than in any of the recesses of the mountains of Ephraim or Benjamin. With increased knowledge of that part of the country, the name may possibly be discovered there. *

* Dr. Robinson reafirms the identity of Cherith and Kelt in his Phys. Geog. p. 94, f. Wilson (Lands of the Bible, ii. 5) holds the same view. It is impossible to press the argument from any supposed affinity in the names. Dr. Van Dyck, one of the best living authorities, says: "I do not see how Kelt can be derived from Cherith, except on principles of etymology which make no account of vowels and consonants." Hence in this respect, Kelt may have no advantage over Ain Fossail, or any other place put forward for this identification. But it must be owned that a brook or ravine better suited to have been the asylum of the prophet could hardly be found anywhere. Mr. Tristram (Land of Israel, p. 232, 2d ed.) mentions some traits of the locality which accord remarkably with the Scripture account. In going down from Jerusalem to Jericho

the frightful gorge opens suddenly upon us at a bend of the road, about two miles from the Phin; there "the traveller finds himself in front of a precipice, perhaps 500 feet high, pierced by many inaccessible anchorite caverns, and with a steep, rugged hill above. We gaze down into the steep ravine, and see the ravens, eagles, and griffon-vultures sailing beneath us. These are now the sole inhabitants of these caves, the monarchs of the waste." It will be seen how well this description answers to the import of the ancient name. In a retreat like this, too, the prophet could easily have hid himself from the knowledge and pursuit of Ahab, and the birds of prey, which must have haunted the place of old as now, could have brought to him the food which God prepared through them for the preservation of his servant.

There is a treatise "Elia's corvorum convicctor" in the Critici Sacri. Gumpach's "Elia und die Raben" in his Altertumsuchliche Studien, p. 200 ff. (Heidelberg, 1852), is an attempt to remove from the narrative all traces of a miraculous intervention. We have the various opinions on the subject canvassed, and the obvious meaning of the history vindicated, in Delvig's Obscurationes Sacrae, Para i., No. xxv.

CHERUB (כֶּרִיב): [Vat. in Ezr. corrupt: Cherub], apparently a place in Babylonia from which some persons of doubtful extraction returned to Judea with Zerubbabel (Ezr. ii. 59; Neh. vii. 61). In the parallel list of 1 Esdr. v. this name, with the next, Addan, seems to be corrupted to CHERRATH-ALEH.

CHERUB, CHERUBIM (כֶּרִיב, plur. כֶּרִיבוֹת, כְּרִיבָיוֹ; or, as mostly in Pentateuch, כֶּרִיב, כְּרִיבִית [Vat. Alex. -בימ or -בימ]: חֲשֶׁרֶב, חֲשֶׁרֶבּוֹת (Vat. in Ezr. corrupt: Cherub), the symbolic figure so called was a composite creature-form, which finds a parallel in the religious insignia of Assyria, Egypt, and Persia, e. g. the sphinx, the winged bulls and lions of Nineveh, &c.,

Fig. 1. The winged female-sphinx. (Wilkinson.)

Fig. 2. An Egyptian winged animal. (Wilkinson.)

a general prevalence which prevents the necessity of our regarding it as a mere adoption from the Egyptian ritual. In such forms (comp. the Chimera of Greek and the Griffin of northeastern

* From a note to the writer.
CHERUB

fables) every imaginative people has sought to em-
body its notions either of the attributes of Divine
essence, or of the vast powers of nature which
transcend that of man. In the various legends of
Hercules the bull and the lion constantly appear
as forms of hostile and evil power; and some of
the Persian sculptures apparently represent evil gen-
ut under similar quasi-cherubic forms. The Hebrew
idea seems to limit the number of the cherubim.

A pair (Ex. xxv. 18, &c.) were placed on the mercy-
seat of the ark: a pair of colossal size overshadow-
olved it in Solomon's Temple with the canopy of
their continuously extended wings. Ezekiel, i. 4-
14, speaks of them; and similarly the apocalyptic
(Zech. iv. 6) are four. So at the front or east of
Eden were posted "the cherubim," as though
the whole of some recognized number. They utter
no voice, though one is "heard from above them,"
nor have dealings with men save to awe and repel.
A "man clothed in linen" is introduced as a me-
dium of communication between them and the
prophet, whereas for a similar office one of the
symbolism personally officiates; and these utter also
"cry one to another." The cherubim are placed
beneath the actual presence of Jehovah, whose
moving throne they appear to draw (Gen. iii. 24;
Ez. i. 5, 25, 26, x. 1, 2, 6, 7; Is. vi. 2, 3, 6). The
expression, however, "the chariot (יִתְנּוּם) of
the cherubim" (1 Chr. xxviii. 18), does not imply
wheels, but the whole apparatus of ark and cheru-
bin is probably so called in reference to its being
carried on staves, and the words "chariot" and
"cherubim" are in apposition. So a sedan might
be called a "carriage," and יֶנְוַם is used for the
body of a litter. See, however, Boerjan, De Cherus,
Sacnt. (ap. Uzolinii, vol. viii.), where the opposite
opinion is ably supported. The glory symbolizing
that presence which eye cannot see, rests or rides
on them, or one of them, hence dismounts to the
temple threshold, and then departs and mounts
again (Ez. x. 4, 14; comp. ix. 7; Ps. xviii. 10).
There is in them an entire absence of human sym-
pathy, and even on the mercy-seat they probably
appeared not merely as admiring and wondering
(1 Pet. i. 12), but as guardians of the covenant
and avengers of its breach. A single figure there
would have suggested an idol, which two, especially
when represented regarding something greater than
themselves, could not do. They thus became sub-
ordinate, like the supporters to a shield, and are
repeated, as it were the distinctive bearings of di-
vine heraldry,—the mark, carved or wrought,
everywhere on the house and furniture of God (Ex.
xxv. 20; 1 K. vi. 24, 35, vii. 29, 36).

Those on the ark were to be placed with wings
stretched forth, one at each end of the mercy-seat,
and to be made "of the mercy-seat," which Ahar-
benel (Spencer, De Leg. Heb. ritual. iii., Diss. vi.)
and others interpret of the same mass of gold with
it, namely, wrought by hammering, not cast and
then joined on. This seems doubtful, but from the
word יִתְנּוּם, the solidity of the metal may per-
haps be inferred. They are called יִתְנּוּם דַּגְשֵׁי (Hab. ix. 5), as on them the glory, when visible,
rested; but whether thus visibly symbolized or not,
a perpetual presence of God is attributed to the
Holy of Holies. They were anointed with the holy
oil, like the ark itself, and the other sacred furni-
ture. Their wings were to be stretched upwards,
and their faces "towards each other and towards
the mercy-seat." It is remarkable that with such
precise directions as to their position, attitude, and
material, nothing, save that they were winged, is
said concerning their shape.

---

a It is perhaps questionable whether the smaller
cherubim on the mercy-seat were there in Solomon's
Temple, as well as the colossal overshadowing ones.
That they were on the ark when brought from Shiloh
to the battle seems most likely; and it is hardly con-
sistent with the reverential awe shown in the treat-
ment of the ark, even by the enemy, to suppose that
they could have been lost in the course of its wander-
ings (see Ark or Covenant); still, the presence of
the two pairs together seems hardly consistent and ap-
propriate.

b The number four was one of those which were
sacred among the Jews, as seven, and forty (Bahr
De Symbol.). [Number]
The carvings, &c., of the temple had made them popular. Josephus could not possibly have said (Ant. viii. 3, § 5) "tâs ãâ̂̊̅πονοντες οὐδές οὐσίας τινες ἄραν εἰκόνα ὕπνω εἰκάσας διώκεια." It is also remarkable that Ez. i. speaks of them as "living creatures." (ἱερὰ γένεσις τῶν ζῴων, τῶν δὲ τῶν τιμίων) under mere animal forms. Into which description in ch. x. 14, the remarkable expression, "the face of a cherub," is introduced, and the prophet concludes by a reference to his former vision, and an identification of those creatures with the cherubim — (v. 20) "I knew that they were cherubim." On the whole it seems likely that the word "cherub" meant not only the composite creature-form, of which the man, lion, ox, and eagle were the elements, but, further, some peculiar and mystical form, which Ezekiel, being a priest, would know and recognize as "the face of a cherubim." kar ἐξωχύρων: but which was kept secret from all others; and such probably were those on the ark, which, when it was moved, was always covered [ARK OF COVENANT], though those on the hangings and panels might be of the popular device.14 What this peculiar cherubic form was is perhaps an impenetrable mystery. It was probably believed popularly to be something of the bovine type (though in Ps. cvi. 20 the notion appears to be marked as degraded): so Spencer (De Leg. Heb. vit. iii. Diss. 5, 4, 2) thinks that the ox was the forma precipuus, and quotes Grotius on Ex. xxv. 18; Bochart, Hierozoic. p. 87, ed. 1690. Hence the "golden calf." The symbolism of the visions of Ezekiel is more complex than that of the earlier Scriptures, and he certainly means that each composite creature-form had four faces so as to look four ways at once, was four-sided 2 and four-winged, so as to move with instant rapidity in every direction without turning, whereas the Mosaic idea was probably single-faced, and with but one pair of wings. Ezekiel adds also the imagery of the wheels — a mechanical to the previous animal forms. This might typify inanimate nature revolving in a fixed course, informed by the spiritual power of God. The additional symbol of being "full of eyes" is one of obvious meaning. This mysterious form might well be the symbol of Him whom none could behold and live. For as symbols of Divine attributes, e. g. omnipotence and omniscience, not as representations of actual beings (Cham. Alex. Strum. i. 244), the cherubim should be regarded.4 Philo indeed assigns a varied signification to the cherubim: in one place he makes them allegories of the beneficent and avenging energies of God: in another, of the two hemispheres of the then astronomical system, one of which supported the planets and the other the fixed stars; elsewhere, of power and goodness simply. They are symbolical in Gen. iii. 24, just as the serpent is a symbol in iii. 1-14, though functions and actions are attributed to each. When such symbolical forms have become conventional, the next step is to literalize them as concrete shapes of real beings. The ζωα of Rev. iv. 6-8 are related both to the cherubim and to the seraphim of prophecy, combining the symbols of both. They are not stern and unsympathizing like the former, but invite the seer to "come and see;" nor like the latter do they cover their face (Is. vi. 2) from the presence of deity, or use their wings to speed on his errand but, in a state of rest and praise, act as the cherugs of the heavenly host. And here, too, symbolism ever sliding into realism, these have been diversely construed. e. g. as the four evangelists, four archangels, &c.

Many etymological sources for the word צִרְעִית have been proposed. The two best worth noticing and between which it is difficult to choose are, (1) the forms of creature-being expressing best the highest attributes of the Creator. Thus he thinks the human form might indicate spirituality (p. 349). (Comp. Grot. on Exod. xxv. 20, and Heb. ix. 5.) Some useful hints as to the connection of cherubic with other mythological forms may be found in Creuzer, Symbol. i. 441, 540.

4 In Ez. xxviii. 14, 16, the Tyrian king is addressed as the "anointing cherub that covereth." This seems a mistake in the A.V., arising from a confusion of צִרְעִית צִרְעִית, which means "stretched out" (Vulg. cherub extensus), from צִרְעִית, Aram. to extend, with some word from צִרְעִית, to anoint. The notion is borrowed not doubt from the "extended" attitude of the cherubim of the sanctuary, "covering" the ark, &c., with their wings. So the king should have been the guardian of the law.
the Syriac סֵרוּב, great, strong (Gesen. s. v.; comp. Philo de Præfagiis, p. 465). The fact that all the symbols employ various forms of strength, the lion among wild, and the ox among tame beasts, the eagle among birds, the man as supreme over all nature, is in favor of this; (2) the Syriac סֵרוּב, to plough, i.e. to cut into; hence Arab. بَضَرُبُ، sculpit; and here a doubt occurs whether in the active or passive sense, - that which ploughs is the ox (comp. סֵרוּב, "ox," from same word in Arab. "to plough"), which brings us to the form precedence of Spencer; or, that which is carved is an image. In favor of the latter is the fact that סֵרוּב is rabbinical for "image" generally (Simonis, Bonger, and Pagninus, Lux. s. v.), perhaps as the only image known to the law, all others being deemed forbidden, but possibly also as containing the true germ of meaning. Besides these two possible meanings or interpretations has been given by high authority the true meaning of the name (Jerome on Is. vi. 2: so Philo, de Vit. Mos. 666 — see § 5: § 6. "Ελληνες οίνοεοε, ἐπίγραυσιν καὶ ἐπιστύφη τι λατ. [Opp. ii. 150 ed. Mang.]; and Clem. Alex. Strom. v. c. 6, p. 210 [667 ed. Potter] — ἔνεις δὲ τοῦ νόμου τῶν χρυσήματος δύναται ἀστήριον πολιτείᾳ.

Though the exact form of the cherubim is uncertain, they must have borne a general resemblance to the composite religious figures found upon the monuments of Egypt, Assyria, Babylonia, and Persia. The first two figures are winged creatures from the Egyptian monuments. The next three:

* The griffin of Northern fable watching the gold in the wilderness has so far been compared with the cherub, both as regards his composite form, and his function as the guardian of a treasure. The "waterful dragon" of the Heptapod is perhaps a fabulous reflex of the same, where possibly the "serpent" (ὕδωρεως) may, by a change not uncommon in myth, have taken the place of the "cherubim." The dragon and the bull have their place also in the legend of the golden fleece. There is a very near resemblance are taken from Assyrian sculptures. No. 6 represents the griffin of Northern fable, as we see from the griffin found as an ornament in Scythian tombs, but drawn by Greek artists. In the sacred bees or arks of the Egyptians, there are sometimes found two figures with extended wings, which remind us of the description of the cherubim "covering the mercy-seat with their wings, and their faces looking one to another" (Ex. xxv. 20). H. H.

* Were the cherubim merely ideal symbols, having no objective personal reality, or were they actual beings represented under these ideal symbols? In support of the former view, it is alleged, (1) that we meet with these ideal forms only in poetic description, or prophetic vision, or symbolic worship, too between the names γαλαξία (with γαλαξίας) and γάλαξις; and possibly an affinity between γαλαξίας and the Greek forms γαλαξία, γαλαξίας, γαλαξίας, γαλαξίας (cf. German graveled), all related to carving, and between γαλαξίας and the Syriac and Arab. words signifying service, sculptor, hence as above. We have another form of the same root probably in κρεμαῖος, the block or tablet on which the laws were engraved.

---

Fig. 6. A Grecian griffin.

Fig. 7. A sacred Egyptian boat or ark, with two figures resembling cherubim. (Wilkinson.)
and the like; (2) that the forms are manifestly of a symbolic character; and (3) that they correspond with similar symbolic representations, of Egyptian, Assyrian, and Indian antiquity. So Heinsius (Die Bücher Moses, p. 137 ff.), Keil (Archd., § 19), Hävernick (Comm. über Ecc.; Vorles. über d. Theol. des A. T. pp. 79, 80), Neumann (Zeitschr. f. luth. Theol. 1854, i. 137 ff.), Lange (Bibelwerk, Gen. iii. 23, 24).

In favor of the other view, it is maintained, that the representation of these beings under symbolic forms, for purposes of poetical description, &c., does not exclude their objective reality; that similar representations among ancient heathen nations are only relics of early tradition, or of a primitive revelation; furthermore, that in the Scriptures (e. g. Ps. xviii. 10, compared with Ps. civ. 3, 4) angels and cherubim are placed in the same category, and hence the real existence of both must stand or fall together; and finally, that the mention of them in a narration of actual facts, in the third chapter of Genesis, is decisive of the question, if we hold to the historical reality of what is there related. So Kurtz (Gesch. des Alten Bundes, p. 63 ff.; art. Cherubim, in Herzog's Real-Encyclop.), Deitelsch (Genesis, 3te Aufl. p. 190), Hofmann (Schriftlobenweis, i. 179 ff., 317 ff.), Nägelsbach (Der Gottmenscher, i. 924).

On the reasons for the first view, it may be remarked, that the symbolic character of the forms certainly does not exclude an objective reality; but on the other hand, it may be said, that the symbol is sufficient in itself for any purpose that can fairly be claimed in the connection, and requires no corresponding personality.

In the reasons given for the other view, it is plainly a false inference from the comparison of Ps. xviii. 10 with Ps. civ. 3, 4, that angels and cherubim stand in the same category in the representations of the Scriptures. The personal existence of the former is attested by their frequent appearance on earth: while to the existence of the latter there is no similar attestation, unless it be found in the third chapter of Genesis. But the historical reality of the facts there narrated is not impaired by regarding the cherubim, spoken of in v. 24, as symbolic representations of the divine majesty and power, in whatever way these were manifested.

In the Hebrew text of this passage we have the definite form, "the cherubim and the flaming sword;" not "as though the whole of some recognized number " (as stated in the first paragraph of the preceding article) but denoting well known and familiar objects or conceptions.

One of the statements in the last paragraph but two of the preceding article is founded on a very injurious perversion of the Greek text in Rev. vi. 1, 2, 5, 7. It is one of the instances in which Erasmus followed the later corrupted copies of the Latin Vulgate (translating from it into Greek) instead of the Greek manuscript which was before him, as shown, by Prof. Deitzsch in his collation of it with Erasmus' printed Greek text (Handschriften, Feudal, 1861). Instead of the false reading of the current text, the true reading is "Come!" Instead of "inviting the seer to 'come and see,'" it is an authoritative summons, calling forth the several per-

---

a Possibly referring to the village now Beit Joun, between Jerusalem and Nabi Samwil, and therefore in Benjamin

CHEST

CHESALON (צַֽלְוֹן) [Dietr., strength, firmness; Fürst, pristness, fertility] Xaηαλών; [Alex. Χασελών]: Chislev, a place named as one of the landmarks on the west part of the north boundary of Judah, apparently situated on the shoulder (A. V. "side") of Mount Jerim (Josh. xv. 10). The name does not, however, reappear in the list of towns of Judah later in the same chapter. Mount Jerim, the "Mount of Forests," has not necessarily any connection with Kirjath Jerim, though the two were evidently, from their proximity in this statement of the boundary, not far apart. Chesa- lon was the next landmark to Beth-shemesh, and it is quite in accordance with this that Dr. Robinson has observed a modern village named Keddi, about six miles to the N. E. of "Ain Shams, on the western mountains of Judah (Job. ii. 30, note; iii. 154). Eusebius and Jerome, in the Onomasticon, mention a Chaslon, but they differ as to its situation, the former placing it in Benjamin, the latter in Judah: both agree that it was a very large village in the neighborhood of Jerusalem. The meaning of the name is thought by Professor Stanley, like Chesiloth, to have reference to its situation on the "bains" of the mountain.

CHESED (חֵסֶד) : Xασός; [Alex. Χασσόχ]: Cessdeh, fourth son of Nahor (Gen. xxii. 22). [Chaldea, p. 408.]

CHESIL (חֵשֵיל) [a food or impious]: Bar- δέλα: Alex. Χαζέλη: [Ald. Χαζόθ]: Cezeld, a town in the extreme south of Palestine, named with Hornah and Ziklag (Josh. xv. 30). The name does not occur again, but in the list of towns given out of Judah to Simeon, the name Bethuel occurs in place of it (xix. 4), as if the one were identical with, or a corruption of, the other. This is confirmed by the reading of 1 Chr. iv. 30, Bethuel; by that of the LXX. as given above, and by the mention in 1 Sam. xxi. 25 of a Bethel among the cities of the extreme south. In this case we can only conclude that בְּית-אֵל was an early variation of בְּית-אֵל.

CHEST. By this word are translated in the A. V. two distinct Hebrew terms: (1) הֵוֶ֥נֶג or הֵוֶ֥נֶג from יָנֵב, to gather; קִבְּחֵרָ֣ב. gräzgebildet. This is invariably used for the Ark of the Covenant, and with two exceptions, for that only. It is instructive to be reminded that there is no Egyptian chest or box for θείαThebes. (Wilkinson)
Children (Heb. שְׁלֹ֣מִים, Shôlûm, "children") is a list of persons who were summoned to the king by Hezekiah (2 K. 20:9; 2 Chr. 32:23). From its position in the list it appears to be between Jerah and Shunem (Sebna), and, therefore, not far enough north to be the Hezek mentioned by Robinson (252) or the place noted by Eusebius and Jerome under Aelaichuth, אֶלֶעָיָה, in the Quadragesim."
CHILDREN

sprung, but especially, and sometimes exclusively, of the male sex, is highly valued among all Eastern nations, while the absence is regarded as one of the severest punishments (Her. i. 130; Strab. xv. 733; Gen. xvi. 2, xxix. 31, xxx. 1, 14; Deut. vii. 14; 1 Sam. i. 6, ii. 5, iv. 20; 2 Sam. vi. 23, xviii. 18; 2 K. iv. 14; Is. xlvii. 9; Jer. xx. 15; Hos. ix. 14; Esth. v. 11; Ps. cviii. 3, 5; Eccl. vi. 3; Drusius, Prov. Ben-Sir. ap. Crit. Sacr. viii. 1887; Lane, Mod. Egypt. i. 208, 240; Mrs. Poole, English in Egypt, iii. 207. Niebuhr, Descri. de P. Arab. 67; Chardin, Voyage, vii. 446; Russell, Nabate, 343.)

Childbirth is in the East usually, but not always, attended with little difficulty, and accomplished with little or no assistance (Gen. xxxvi. 17, xxviii. 28, Ex. i. 19; 1 Sam. iv. 19, 20; Burchhardt, Notes on Bedouins, i. 96; Harmer, Obs. iv. 425; Lady M. W. Montagu, Letters, ii. 217, 219, 222).

As soon as the child was born, and the umbilical cord cut, it was washed in a tub, rubbed with salt, and wrapped in swaddling clothes. Arab mothers sometimes rub their children with earth or sand (Ex. xvi. 4; Job xxxviii. 9; Luke ii. 7; Burchhardt, l. c.). On the 8th day the rite of circumcision in the case of a boy, was performed, and a name given, sometimes, but not usually, the same as that of the father, and generally conveying some special meaning.

Among Mohammedans, circumcision is most commonly delayed till the 5th, 9th, or even the 14th year (Gen. xvi. 4, xxx. 32, xxx. 6, 24; Lev. xii. 5; Is. xlvii. 18, 58; Luke i. 59, ii. 21, and Lightfoot, ad loc.: Spener, de Legg. Hebr. v. 62; Strab. vii. 824; Hor. ii. 36, 104; Burchhardt, ibid. i. 96; Lane, Mod. Egypt. i. 87; Mrs. Poole, English, in Egypt, iii. 158; Niebuhr, Descr. p. 70). [CIRCUMCISION.]

After the birth of a male child, the mother was considered unclean for 7 + 33 days if the child were a female, or for double that period 14 + 66 days. At the end of the time she was to make an offering of purification of a lamb as a burnt-offering, and a pigeon or turtledove as a sin-offering, or in case of poverty, two doves or pigeons, one as a burnt-offering, the other as a sin-offering (Lev. xii. 1–8; Luke ii. 22).

The period of nursing appears to have been sometimes prolonged to 3 years (Is. xliv. 13; 2 Mac. vii. 28; comp. Livingstone, Travels, c. vi. p. 128; but Burchhardt leads to a different conclusion). The Mohammedan law enjoins mothers to suckle their children for 2 full years if possible (Lane, Mod. Egypt. i. 83; Mrs. Poole, English, in Egypt, iii. 181).

Nurses were employed in cases of necessity (Ex. i. 9, Gen. xxiv. 50, xxvii. 8; 2 Sam. iv. 1; 2 K. xi. 2; 2 Chr. xxii. 11). The time of weaning was an occasion of rejoicing (Gen. xxii. 8). Arab children wear little or no clothing for 4 or 5 years; the young of both sexes are usually carried by the mothers on the hip or the shoulder, the young of which allusion is made by Isaiah (Is. xxii. 22, xvi. 12; Lane, Mod. Egypt. i. 83). Both boys and girls in their early years, boys probably till their 5th year, were under the care of the women (Prov. xxxi. 1; Herod. i. 130; Strab. xv. p. 733; Niebuhr, Descr. p. 24). Afterwards the boys were taken by the father under his charge. Those in wealthy families had tutors or governors (טָבְלוֹרָיָּא, בְּבֶלָּר), who were sometimes eunuchs (Num. xi. 12; 2 K. x. 1, 5; Is. xiii. 29; Gal. iii. 24; Esth. ii. 7; Joseph. Vit. 76; Lane, Mod. Egypt. i. 83). Daughters usually remained in the women's apartments till marriage, or, among the poorer classes, were employed in household work (Lev. xi. 9; Num. xvi. 14; 1 Sam. iv. 11; Prov. xxxi. 19, 29; Ecclus. vii. 25, xiii. 9; 2 Mac. iii. 19).

The example, however, and authority of the mother were carefully upheld to children of both sexes (Deut. xxii. 20; Prov. x. 1, xv. 20; 1 K. ii. 19).

The first-born male children were regarded as devoted to God, and were to be redeemed by an offering (Ex. xiii. 13; Num. xviii. 15; Luke ii. 22). Children devoted by special vow, as Samuel was, appear to have been brought up from very early years in a school or place of education near the tabernacle or temple (1 Sam. i. 24, 28). [EDUCATION.]

The authority of parents, especially the father, over children was very great, as was also the reverence enjoined by the law to be paid to parents. The disobedient child, the striker or reviler of a parent, was liable to capital punishment, though not at the independent will of the parent. Children were liable to be taken as slaves in case of non-payment of debt, and were expected to perform menial services for them, as washing the feet, and to maintain them in poverty and old age. How this last obligation was evaded, see COROBAN.

The like obedience is enjoined by the Gospel (Gen. xxxvii. 24; Lev. xii. 9; Num. xii. 14; Deut. xxiv. 16; 1 K. ii. 19; 2 K. xiv. 6, iv. 1; Is. i. 1; Neh. v. 5; Job xxxiv. 3; Prov. x. 1, xv. 20, xxxix. 3; Drusius, Quest. Hebr. ii. 63, ap. Crit. Sacr. viii. 1547; Col. iii. 20; Eph. vi. 1; 1 Tim. i. 9; comp. Virg. Aen. vi. 909; and Servius, ad loc.; Aristoph. Ran. 148; Plato, Phaed. 144; de Legg. ix.).

The legal age was 12, or even earlier in the case of a female, and 13 for a male (Maimon. de Pros. c. v.; Groitus and Calmet on John iv. 21).

The inheritance was divided equally between all the sons except the eldest, who received a double portion (Deut. xxi. 17; Gen. xxv. 31, xxx. 3; 1 Chr. v. 1, 2; Judg. xli. 2, 7). Daughters had by right no portion in the inheritance; but if a man had no son, his inheritance passed to his daughters, but they were forbidden to marry out of their father's tribe (Num. xxvii. 1, 5, xxxvi. 2, 8).

The term sons was applied also to the disciples and followers of the teachers of the various sects which arose after the Captivity [EDUCATION; Scribes.], (Lightfoot, Hor. Hebr. on John xiii. 33, Luke xii. 45, John xvi. [xv. 2.] 16.) [Comp. Matt. xii. 27; Luke xi. 19. See also I Cor. iv. 14, 15, 17; 2 Tim. i. 2; 2 Tim. i. 2; Philen. 10; 3 John 4, A.]

H. W. P.

CHIL'EB. [Abigail; Daniel.]

CHILION [properly Chylyon] (τῆς θυλών).

Χέλλων: [Vat. Ruth i. 2, Κελ.] ALEX. Χέλλων: [Xalóvon]: Chillon), the son of Elineeb and Naomi, and husband of Orpah (Ruth i. 2–3, iv. 9). He is described as "an Ephrathite (? Ephraimite) of Bethlehem-judah."

* The etymology usually assigned for the names of the brothers (Ruth i. 2) is τῆς χηλήν for Chillon, sickly, and τῆς μοῖς for Mahlon, pining; either given to them at first from prognostics of their early fate, which, as they did young, were fulfilled, or substituted for other original names, after their death, in the family traditions. Considering how readily the Orientals change the names of persons both living and dead, the latter supposition is by no means impossible. See Bertheau (Richer u. Ruth, p. 239).
But the derivation is uncertain. So good a scholar as Cassel (Richter u. Ruh, p. 285) refers Chilimon to 7. t. T Europe, and Mahlon to kIN, i.e. the former, notes, and the latter, may: so that the names could be given to them at their birth as terms of parental kindness. Mr. Wright (Ruth in Hebrew and Chaldee, p. 2) conjectures that the children were so named (الن) in account of the sad condition of the land at the time. That the land was specially afflicted at the time they were born we do not know. The famine which drove the family to Moab was later. The names, in whatever way explained, afford but a slight foothold for assailing the historical claims of the book.

H.

CHILMAD (ט"למ:
[ democrat. In conjunction with Seha and Assur (Ex. xxxvii. 23). The only name bearing any similarity to it is Chamza, a town near the Euphrates between the Mascan and the Babylonian frontier ( Xen. Alex. i. 5, § 10). As however in other cases this produces this place, it is highly improbable that it was of sufficient importance to rank with Seha and Assur. Hitzig (Comment. on Ex. i. c.) proposes to alter the punctuation to $ט"למ and with the sense, Assur was as thy pupil in commerce.

W. L. B.

* Rawlinson identifies Chilmad with Koliobinta.

[Chaldee, § 4.] A.

CHIMHAM (ט"למ [pining, hanging], but see below: Xummon: Alex. Xummon: [Comp. Xemmon, lonym: Aquila: Xemmon: LXX. in Jer. x. 1; Joseph. Xe
ing: Chimenon, a follower, and probably a son ( Joseph. Ant. xii. 11, § 4; and comp. 1 K. ii. 7) of Barzillai the itzidare, who returned from beyond Jordan with David (2 Sam. xiv. 37, 38, 40). David appears to have bestowed on him a possession at Bethelannah, on which, in later times, an inn or Khan (ט"למ) was standing, well known as the starting-point for travellers from Jerusalem to Egypt (Jer. xli. 17). There is some uncertainty about the name, possibly from its not being that of a Hebrew text Chishmim, י"משא, and in the Cheth of Jer. xli. 17, Chemoth, י"משא. G.

CHINNERRETH (Heb. Cinnereth or Kin
ereth) (accurately (?) Cinnorath, י"משא [in pause י"משא]: Kinnorath: Alex. Xinnorath: [Comp. Xinnorath, י"משא: Cinnereth, a fortified city in the tribe of Naphtali (Josh. xix. 35 only), of which no trace is found in later writers, and no remains by travelers. Whether it gave its name to, or received it from, the lake, which was possibly adjacent, is quite uncertain. By St. Jerome Cinnereth was identified with the later Tiberias. This may have been from some tradition then existing; the only corroboration which we can find for it is the mention in Joshua of Hamath as near it, which was possibly the Hammon of Ex. cxxvii, near the shore of the lake a little south of Tiberias. This is denied by

* We see from Jer. xlii. 17 that this Khan bore Chilmad's name for at least 4 centuries, and as the usage of the East is so unchanging may have been the Khan (סדה) which almost 6 centuries later

Roland (161), on the ground that Capernaum is said by St. Matt. (iv. 13) to have been on the very borders of Zebulon and Naphtali, and that Zebul

on was to the south of Naphtali. But St. Mat
tew's expression will hardly bear this strict inter

pretation. The town, or the lake, appears to have given its name (slightly altered) to a district — "all

CINNORATH (I K. xvii. 20).

G.

* The name (Josh. xix. 35) is spelt "Cinnerath" in the A. V. ed. 1611, and other early editions. According to Furst, the city in later times was calledINO Cinnerath (Megilla 69). At the time of Fasti (at the beginning of the 14th century) it was still in existence, lying, without doubt, one hour northwest of Tiberiyya (Tiberias), where the ruins of Cinnerath are still found at the present day! (Hib. Lex. s. v., Davidson's transl.).

CHINNERRETH, SEA OF (ט"למהא: י"הלסא נָיְכֶנֶרֶת [etc.] more Cenereth, Num. xxiv. 11: Josh. xxiii. 27), the inland sea which is most familiarly known to us as the "lake of Gen
dernal" (John xxi., 2). As this is evident from the mode in which it is mentioned in various passages in the Pentateuch and Joshua — as being at the end of Jordan opposite to the "sea of the Arabah," i.e. the Dead Sea; as having the Arabah or Ghor below it, see. (Deut. xiii. 17: Josh. xii. 2, xiii. 3). In the two former of these passages the word "sea" is omitted; in the two latter it is in a plural form — "Cinnerath" (Acc. Cinnerath, י"משא, and י"משא, Cinnerath, [Vulg. Ceneroth]). The word is by some derived from Cinnerath (nearcat, cibara, a "harbor"), as if in allusion to the oval shape of the lake. But this, to say the least, is doubtful. It seems more likely that Cinnerath was an ancient Canaanite name existing long prior to the Israelite conquest, and, like other names, adopted by the Israelites into their language. The subsequent name "Gensar" was derived from "Cinnerath" by the change of a letter of a kind frequent enough in the East. [Binxmabo.] G.

CHINNERRATH (ט"למהא: י"הלסא נָיְכֶנֶרֶת: Kev
erath: Alex. Xevnerath: Cenereth, Josh. xi. 2, xii. 3) [Chirnnerath].

W. A. W.

* In A. V. ed. 1611, and other early editions, the word is spelt "Cinerreth," as in K. xvii. 20. See CINORATH. A.

CHIOS (Xenos: [Chiose].) The position of this island in reference to the neighboring islands and coasts could hardly be better described than in the detailed account of St. Paul's return voyage from Troas to Cereon (Acts xx. 16). Having come from Assos to Mytilene in Lesbos (xx. 14), he arrived the next day and called at Chios (v. 15), the next day at Samos and tarried at Tergylia (v. 16); and the following day at Miletus (v. 17); thence he went by Rhodes and Pharsal to Patara (vixi. 1). [MYTIKON: SAMOS.] With this it is worth while to compare the account of Herod's voyage to join Marcus Agrippa in the Black Sea. We are told (Joseph. Ant. xvi. 2, § 2) that after passing by Rhodes and Cos, he was detained some time by north winds at Chios, and sailed on to Mytilene,

*furnished shelter for two travellers with their infant child when 'there was no room in the inn,' and when they too from that spot fled into Egypt" (Stanley, Jewels Church li. 204).
when the winds became more favorable. It appears that during this stay at Chios Herod gave very liberal sums towards the restoration of some public works which had suffered in the Mithridatean war. This island does not appear to have any other association with the Jews; nor is it specially mentioned in connection with the first spread of Christianity by the Apostles. When St. Paul was there on the occasion referred to, he did not land, but only passed the night at anchor. At that time Chios enjoyed the privilege of freedom (Plin. v. 38), and it is not certain that it ever was politically a part of the province of Asia, though it is separated from the mainland only by a strait of 5 miles. Its length is about 32 miles, and in breadth it varies from 8 to 18. Its outline is mountainous and bold; and it has always been celebrated for its beauty and fruitfulness. In recent times it has been too well known, under its modern name of Sezio, for the dreadful sufferings of its inhabitants in the Greek war of independence. Chios is described by the older travellers, Thevenot, Tournefort, and Chandler. J. S. H.

CHILEU. [Months.]

CHILON (Χιλόν) [hope, confidence]: Xaclo-
λος: Chanleon), father of Eleid, the prince of the tribe of Bequinian, chosen to assist in the division of the land of Canaan among the tribes (Num. xxxiv. 21).

CHILSTOTH-TABOR (Χίλσθοθ-τάβωρ, sons of Tabor: Χασθοθλαυιοι; Alex. Χασθαλδαυιοι: Badawi: [Abl. Χασθοθλαυιθαμπός: Comp. Χασθοθλαυιθαμπός] 
: (aschizhlotabor), a place to the border (νήσος) of which reached the border of Zebu-
rim (Josh. xix. 12). It may be the village of Ikloil, which is now standing about two miles and a half to the west of Mount Tabor. Josephus names a village Xaloth in the great plain, i. e. of Esdraelon, and as one of the landmarks of lower Galilee, (B. J. iii. 3, § 1; and see Titre, § 44), but it is impossible to say if this was identical with Chilothoth-Tabor or with Chesiloth. [See Tabor.] G.

CHITTIM, KITTIM (קיתים, קתים; χίτην, χίτην: כיתית, כיתית; etc.) Cethion, Cethin), a family or race descended from Javan (Gen. x. 4: 1 Chr. i. 7; A. V. Chittim), closely related to the Dodanim, and remotely (as we may conclude from the absence of the conjunction before it) to the other descendants of Javan. Chittim is frequently noticed in Scripture: Balaam predicts that a fleet should then come proceed for the destruct-
ion of Assyria (Num. xxiv. 24, "καὶ ἐγκριθήτωσαν in trieribus de Italia, Vulg.): In Is. xxiii. 1, 12, it appears as the resort of the fleets of Tyre: in Jer. ii. 10, the "isles of Chittim" (νησίν, i. e. maritime districts) are to the far west, as Kebar to the east of Palestine: the Tyrians procured thence the cedar or box-wood, which they infused with ivory for the decks of their vessels (Ex. xxv. 6, "καὶ ἐγκριθήτωσαν in trieribus de Italia, Vulg."); A. V. the "company of the Ashurites," but rather [ivory] the daughter of cedar, i. e. in-
closed in cedar: in Dan. xi. 30, "ships of Chittim" (καὶ ἐγκριθήτωσαν: Trieres et Romani) advance to the south to meet the king of the north: at a later period we find Alexander the Great de-
scribed as coming "ἐκ τῶν γῆς [Rom. xvi. 19, Alex. Sin.] ΧΙΤΙΤΙΑ [1 Macc. i. 1; A. V. Chit-
tim], and Persians as ΚΙΤΙΤΕΩΝ ΒΑΣΙΛΕΩΝ [Uctevoun rex] (1 Macc. viii. 5: A. V. Cittim). Josephus considered Cyprus as the original seat of the Chittim, adducing as evidence the name of its principal town, Chilim (Χηλίων, ἥ Χηλία ἡ πόλις ης ἑως χες) Κύρος αὐτῆς τῶν καλεῖται, Int. i. 9, § 1). Chittim was without doubt a Phoenician town, and the name, as it appears in Phoenician inscriptions, exactly agrees with the Hebrew (Gesen. Thes. 720). From the town the name extended to the whole island of Cyprus, which was occupied by Phoenician colouies, and remained under Tyre certainly until about B. C. 720 (Joseph. Ant. x. 14, § 2). With the decay of the Phoenician power (c. i. c. 600) the Greeks began to found flourishing settlements on its coasts, as they had also done in Crete, Rhodes, and the islands of the Egean Sea. The name Chittim, which in the first instance had applied to Phoenicians only (for ἐλαιόνια, Ἑλίτης, a branch of the Canaanitish race), passed little by little to the islands which they had occupied, and thence to the people who succeeded the Phoenicians in the occupation of them (ἀπὸ αὐτῆς, s. Κύρος, ἡ Χηλία τε πίσω, καὶ τὰ πλείω τῶν παρὰ θάλασσαν, Χε-
μία ἢ Εὐβοίαν οὐνιοῦται, Joseph. Ant. i. 6, § 1). Thus in Mac. Chittim evidently = Mac-
donius, and was perhaps more especially applied to that country from the apparent similarity of the name in the form Moueria, which they supposed to be the Ma and Ketio, the land of the Celti. The use of the term was extended yet further so as to em-
brace Italy according to the LXX. (Dan.), and the Vulgate (Num. and Dan.), to which we may add the rendering of the Chaldean Targum, which gives Ἰταλία (Italia) in 1 Chr. i. 7, and Ἱππαν (Apulia) in Ez. xxvii. 6. The "ships of Chittim," in Dan. have been explained as Macedonians, which Ptolemy Laenas may have seized at Delos after the defeat of Persians, and taken on his expedition to Egypt against Antiochus; but the assumption on which this interpretation rests is not borne out by the narrative (LXX. xl. 29, xl. 10), nor does there appear any difficulty in extending the term to Italy, as one of the lands in the far west with which the Hebrews were but little acquainted. In an etno-
logical point of view, Chittim, associated as the name is with Javan and Eliahsh, must be regarded as applying, not to the original Phoenician settlers of Cyprus, but to the race which succeeded them; namely, the Carins, who were widely dispersed over the Mediterranean coasts, and were settled in the Cyclades (Thucyd. i. 8), Crete (Herod. i. 171) and in the islands called Maceda Insome, perhaps as being the residence of the Carins. From these islands they were dispersed by the Dorians and Ionians (Herod. i. c.), and emigrated to the main land, where they occupied the district named after them. The Carins were connected with the Lelgees, and must be considered as related to the Pelagian family, though quite distinct from the Hellanic branch (Knobel, Volksfest, p. 95 ff.). W. L. B.

CHI'UN (חִין), [Remphan.]

CHLOE' (Χλοή) [tender about or herbage], a woman mentioned in 1 Cor. i. 11, some of whose household [κοίνων τῶν Χαλεκ] comp. Rom. xvi. 10, 11] had informed St. Paul of the fact that there
CHOBA (Greek: Χωβά; Latin: Xobâ; Vulg. Xoba), a place mentioned in Jud. iv. 4, apparently situated in the central part of Palestine. It is probably the name place as

CHOBAI (2 syl.: Xoebâ; Vulg. omits), a place which occurs in Jud. xxv. 4, 5; in the latter verse the Greek is Xobâ. The name suggests Hohab (םיהב), which is the reading of the Syriac, especially in connection with the mention of Damascus in v. 5, if the distance from the probable site of Bethulia were not too great.

* CHENIX (χοίνιξ), Rev. vi. 6, marg. See WEIGHTS AND MEASURES, II. § 2, near the end.

CHOR-A-SHAN (שחרاشן) [burnt of smoke]: Bygorâisse (Alex. Bepartov; in loc. Assen), one of the places in which "David and his men were wont to haunt," and to his friends in which he sent presents of the plunder taken from the Amalekites (1 Sam. xxx. 30). The towns named in this catalogue are all south of Hebron, and Chorasian may, therefore, be identified with Ashtalan of Simeon. This is, however, quite uncertain, and the name has not been discovered.

G. CHORAZIN ( שכזער [text, rec.], Xoçâiz [Tisch., Treg.], Xapaçiz [D]; mcçaza, or Corazin), one of the cities in which our Lord's mighty works were done, but named only in His denunciation (Matt. xi. 21; Luke x. 13). It was known to St. Jerome, who describes it (Comm. in Esai, ix. 1) as on the shore of the lake, two miles from Capernaum. St. Willibrord (about A.D. 750) visited the various places along the lake in the following order—Tiberias, Magdala, Capernaum, Bethsaida, Chorazin. Dr. Robinson's conclusion is that Khoâ Mount being Capernaum, et-Tibleeck is Bethsaida, and Tell Hum Chorazin, but the question is covered in great obscurity. The origin of the name is also very uncertain. Origin gives the name as escâï Ziz, i.e., the district of Zin: but this appears to be only conjectural, and has no support from MSS. A place of this name is mentioned in the Talmud (see Berak. p. 722) as famous for wheat, which is still grown in large quantities in this neighborhood.

G. Dr. Thomson (Land and Bedr., ii. 8) found a heap of shapeless ruins about 2 miles north of Tell Hum, known among the natives as Chora'zây. "The name is nearly the Arabic for Chorazin, and the situation just where we might expect to find Chorazin." His readers more recently made strength-sounding this presumption from the name and position of Chorazin. Mr. Grose, speaking of the excavations by Mesers. Wilson and Anderson, says: "The ruins of Chorazin at Keritz [so he writes the word], "turn out to be far more important than was previously suspected; they cover a much larger extent of ground than Tell Hum, and many of the private houses are almost perfect, with the exception of the roofs; the openings for doors and windows remaining in some cases. All the buildings, including a synagogue or church [?], are of basalt, and it is not till one is right in among them that one sees clearly what they are..."

CHRISTIANS (খ্রীষ্টিয়ানঃ): The disciples, we are told (Acts xi. 26), were first called Christians at Antioch on the Orontes, somewhere about A.D. 43. The name, and the place where it was conferred, are both significant. It is clear that the appellation "Christian" was one which, though eagerly adopted and gloried in by the early followers of Christ, could not have been imposed by themselves. They were, indeed, no better than the Heathen, and were, in some respects, better than the Heathens, and were, in some respects, the same, as the Jewish autóarchons, or officers of the synagogues, to whom the early Christians were naturally attached. This title was, however, quite uncertain, and the name has not been discovered.

G. Christ. [Jesus].

CHRISTIAN (Χριστιανός): Christians, the disciples, we are told (Acts xi. 26), were first called Christians at Antioch on the Orontes, somewhere about A.D. 43. The name, and the place where it was conferred, are both significant. It is clear that the appellation "Christian" was one which, though eagerly adopted and gloried in by the early followers of Christ, could not have been imposed by themselves. They were, however, quite uncertain, and the name has not been discovered.

G.
name is what would be expected, for Antioch had long been a Roman city. Its inhabitants were celebrated for their wit and a propensity for confering nicknames (Procop. Pers. ii. 8, p. 160). The Emperor Julian himself was not secure from their jests (Anm. Marc. xxii. 14). Apollonius of Tyana was driven from the city by the insults of the inhabitants (Philostor. I. i. Apoll. iii. 16). Their wit, however, was often harmless enough (Lucian, De Stultit. 76); and there is no reason to suppose that the name "Christian" of itself was intended as a term of scurrility or abuse, though it would naturally be used with contempt.

Suidas (s. v. Χριστιανός) says the name was given in the reign of Claudius, when Peter appointed Evodius bishop of Antioch, and they who were formerly called Nazarenes and Gallicans had their name changed to Christians. According to Malalas ('Chronikon', x.), it was changed by Evodius himself, and William of Tyrre (iv. 9) has a story that a synod was held at Antioch for the purpose. Ignatius, or the author of the Epistle to the Magnesians (c. x), refers the prophecy of Isaiah (xxii. 2, 12) as first fulfilled in Syria, when Peter and Paul founded the Church at Antioch. But reasons have already been given why the name did not originate within the Church.

Another form of the name is Χριστιανος, arising from a false etymology (Lact. iv. 7; Tertullian, De Apol. c. 3; Suec. Claud. 25), by which it was derived from χριστός.

W. A. W.

CHRONICLES, First and Second Books of (in Heb. נְּדוֹן הַמֶּדַּתְיָה: verba dierum, as Jerome translates it, and sermons dieruen, as Hilar. Pictav. in Wofl, but rather acta diesorum; journals, or diaries, i.e. the record of the daily occurrences), the name originally given to the record made by the appointed historiographers in the kingdoms of Israel and Judah. In the LXX. these books are called ταρακολογημένα τράπεζαν and δευτέρων, which is understood, after Jerome's explanation, as meaning that they are supplementary to the books of Kings. The Vulgate retains both the Hebrew and Greek name in Latin characters, Dubre jamuin, or ha- jamim, and Paradippenmom. Jerome tells us (ad Dominion. et Reginaion.) that in his time they formed only one book, and have been one to which both Ezra and Nehemiah gave their earnest attention, as David, Hezekiah, and other kings, had done before them. Another difficulty intimately connected with the former was the maintenance of the temple services at Jerusalem. This could only be effected by the residence of the priests and Levites in Jerusalem in the order of their courses; and this residence was only practicable in case of the payment of the appointed tithes, first-fruits, and other offerings. Immediately [as soon as] these ceased the priests and Levites were obliged to disperse to their own villages to obtain a livelihood, and the temple services were neglected. But then again the registers of the Levitical genealogies were necessary, in order that it might be known who were entitled to such and such allowances, as porters, as singers, as priests, and so on; because all these offices went by fami-

cepted, there is no difficulty. The hand which added Neh. xii. 20, 11, 22, 28, might equally have added 1 Chr. ii. 22, 24.

Keil says that Spinosa led the way, by suggesting that they were compiled after Judas Macabaeus (p. 9)
lies; and again the payment of the tithes, firstfruits, &c., was dependent upon the different families of Israel being established each in his inheritance. Obviously, the primary value of the most precious documents of the Jewish community after their return from Babylon would be trustworthy genealogical records, and if there were any such in existence, the arrangement and publication of them would be one of the greatest services a person in Ezra's situation could confer. But further, not only had Zerubbabel (Ezr. iii., v., vi.) and Haggai (Ezr. vii.) labored most earnestly, in the midst of immense difficulties, to restore the temple and the public worship of God there to the condition it had been in under the kings of Judah; but it appears clearly from their policy, and from the language of the contemporary prophets, Haggai and Zechariah, that they had it much at heart to re-infuse something of national life and spirit into the heart of the people, and to make them feel that they were still the inheritors of God's covenantal mercies, and that the captivity had only temporarily interrupted, not dried up, the stream of God's favor to their nation. Now nothing could more effectually aid these pious and patriotic designs than setting before the people a compendious history of the kingdom of David, which should embrace a full account of its prosperity, should trace the sins which led to its overthrow, but should carry the thread through the period of the captivity, and continue it unbroken on the other side; and these passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the temple, in returning all corruptions in religion, and zealously regulating the services of the house of God. As regards the kingdom of Israel or Samaria, see it had utterly and hopelessly passed away, and that the existing inhabitants were among the bitterest adversaries of Judah and Benjamin, it would naturally engage very little of the compiler's attention. These considerations explain exactly the plan and scope of that historical work which consists of the two books of Chronicles and the book of Ezra. For after having in the first eight chapters given the genealogical divisions and settlements of the various tribes, the compiler marks distinctly his own age and his own purpose, by informing us in Ezr. i. 2, of the disturbance of those settlements by the Babylonian Captivity, and, in the following verses, of the partial restoration of them at the return from Babylon (2-24); and that this list refers to the families who had returned from Babylon is clear, not only from the context, but from its re-insertion, Neh. vi. 3-22; with additional material evidently extracted from the public archives, and relating to times subsequent to the return from Babylon, extending to Neh. xii. 27, where Nehemiah's narrative is again resumed in connexion with Neh. vi. 2. Having thus shown the re-establishment of the returned families, each in their own inheritance according to the houses of their fathers, the compiler proceeds to the other part of his plan, which is to give a continuous history of the kingdom of Judah from David to his own times, interwoven by the closing scene of Saul's life (ch. x.), which introduction is itself probably by a reminiscence of the case of Saul (xxi. 14), extracted from the genealogical tables
drawn up in the reign of king Hezekiah, as is at once manifest by counting the 13 or 14 generations, from Jonathan to the sons of Azel inclusive, exactly corresponding to the 14 from David to Hezekiah inclusive. This part of the plan extends from 1 Chr. ix. 35 to the end of the book of Ezra 1 Chr. xxvii., xxii.-xxiv.; 2 Chr. xxiii.-xxv., xxvi., xxvii.-xxxii., xxxiv., and xxxv., and among the passages wholly or in part peculiar to the books of Chronicles, which mark the purpose of the compiler, and are especially suited to the age and the work of Ezra.
called "the story (or interpretation, Meluhah, מלועה) of the prophet Iddo," supplied an account of the acts, and the ways, and sayings of king Abijah (xxxii. 22); while yet another book of Iddo concerning genealogies, with the book of the prophet Shemariah, contained the acts of king Rehoboam (xii. 15). For later times the "Book of the kings of Israel and Judah" is repeatedly cited (2 Chr. xxv. 26, xxvii. 7, xxviii. 32, xxixii. 18, &c.), and "the sayings of the sores," or rather of Chozai (xxiii. 19); and for the reigns of Uzziah and Hezekiah "the vision of the prophet Isaiah" (xxvi. 22, xxxii. 36). In other cases, where no reference is made to any book as containing further information, it is probable that the whole account of such reign is transcribed. Besides the above-named works, there was also the public national record called מִשְׁרָיָן, mentioned in Neh. xii. 23, from which doubtless the present books took their name, and from which the genealogies and other matters in them were probably derived, and which are alluded to as having existed as early as the reign of David, 1 Chr. xxvii. 24. These "Chronicles of David," וְיֵשׁוּבִּים, are probably the same as the וְיִשְׁרָיֵי יִשְׂרָאֵל, above referred to, as written by Samuel, Nathan, and Gad. From this time the affairs of each king's reign were regularly recorded in a book called at first וְיֵשׁוּבִּים, "the book of the acts of Solomon" (1 K. xi. 41), by the name of the king, as before of David, but afterwards in both kingdoms by the general name of מִשְׁרָיָן, as in the constantly recurring formula,—"Now the rest of the acts (וְיֵשׁוּבִּים) of Rehoboam, Abijam, &c.; Jeroboam, Nadab, &c., are they not written in the book of the Chronicles of the kings of Judah" or "of Israel" (1 K. xiv. 21, xv. 7, &c.) And this continues to the end of Jehoiakim's reign, as appears by 2 K. xxiv. v; 2 Chr. xxxvi. 6. And it was doubtless from this common source that the passages in the books of Samuel and Kings identical with the books of Chronicles were derived. All these several works have perished, but the most important matters in them have been providentially preserved to us in the Chronicles.

As regards the closing chapter of 2 Chr. subsequent to v. 8, and the 1st ch. of Ezra, a comparison of them with the narrative of 2 K. xxvii., xxv., will lead to the conclusion that, while the writer of the narrative in Kings lived in Judah, and died under the dynasty of Nebuchadnezzar, the writer of the chapter in Chronicles lived at Babylon, and survived till the commencement at least of the Persian dynasty. For this last writer gives no details of the reigns of Jehoachin or Zedekiah, or the events in Judah subsequent to the burning of the temple; but only dwelling on the moral lessons connected with the destruction of Jerusalem, passes on quickly to relate the return from captivity. Moreover, he seems to speak as one who had long been a subject of Nebuchadnezzar, calling him simply "King Nebuchadnezzar;" and by the repeated use of the expression "brought him, or the" to Babylon," rather encourages the idea that the writer was there himself. The first chapter of Ezra strongly confirms this view, for we have copious details, not likely to be known except to one at Babylon, of the decree, the presents made to the captives, the bringing out of the sacred vessels, the very name of the Chaldee treasurer, the number and weight of the vessels, and the Chaldee name of Zerubbabel, and in this chapter the writer speaks throughout of the captives going up to Jerusalem, and Sheshbazzar taking them up (נַעְנָה תֵנְכָּם), as opposed to נַעְנָה תֵנְכָּם. But with this clow we may advance a little further, and ask, who was there at Babylon, a prophet, as the writer of sacred annals must be, an author, a subject of Nebuchadnezzar and his sons, and yet who survived to see the Persian dynasty, to whom we can with probability assign this narrative? Surely the answer will be Daniel. Who so likely to dwell on the sacred vessels taken by Nebuchadnezzar (Dan. v. 2; 25); who so likely to refer to the prophecies of Jeremias (Dan. ix. 2); who so likely to bewail the stubbornness of the people, and their rejection of the prophets (Dan. ix. 5-8); who so likely to possess the text of Cyrus's decree, to know and record the name of the treasurer (Dan. i. 3, 11); and to name Zerubbabel by his Chaldee name (Dan. i. 7)? Add to this, that Ezr. i. exactly supplies the unaccountable gap between Dan. ix. and x. [Ezra], and we may conclude with some confidence that as Jeremiah wrote the closing portion of the book of Kings, so did Daniel write the corresponding portion in Chronicles, and down to the end of Ezr i. Ezra perhaps brought this with him from Babylon, and made use of it to carry on the Jewish history from the point where the old Chronicles failed him. As regards the text of the Chronicles, it is in parts very corrupt, and has the appearance of having been copied from MSS. which were partly affected by age or injury. Jerome [Propr. ad Pravol.] speaks of the Greek text as being hopelessly confused in his days, and assigns this as a reason why he made a new translation from the Hebrew. However, in several of the differences between the text of Chronicles and the parallel passages in the other books, the Chronicles preserve the purest and truest reading, as e. g. 2 Chr. ix. 25, compared with 1 K. iv. 26; 1 Chr. xi. 11 compared with 2 Sam. xxix. 8; xxxii. 12 compared with 2 Sam. xxiv. 13; 2 Chr. xxix. 1, 3, 8, &c. comp. with 2 K. xv. 6, &c. As regards the language of these books, as of Ezra, Nehemiah, Esther, and the later prophets, it has a marked Chaldee coloring, and Gesenius says of them, that "as literary works they are decollately inferior to those of older date" (Introduct, to Heb. Gram.). The chief Chalduisms are the use of certain words not found in old Hebrew, as וְיֵשָׁרֵי יִשְׂרָאֵל, מִשְׁרָיָן, מִשְׁרָיִם, מִשְׁרַיִם, &c., or of words in a different sense, as וְיֵשָׁרֵי יִשְׂרָאֵל, מִשְׁרָיָן, מִשְׁרַיִם, מִשְׁרַיִם, &c., or of a different orthography, as מִשְׁרָיָן for מִשְׁרַיִם, וְיֵשָׁרֵי יִשְׂרָאֵל for וְיֵשָׁרֵי יִשְׂרָאֵל, &c., and the interchange of נ and נ at the end and at the beginning of words, and other peculiarities pointed out by Gesenius and others. For further information see C. F. Keil, Apotheologie Versuch i. b. Dächer d. Chron. i. b. Bibl. Chronik; F. C. Movers, Kritische Untersuchungen i. b. Bibl. Chronik; Wolf's Biblioth. Hebr.; Kittel's a For a careful comparison of the text of 1 Chr. xii. with 2 Sam. v. and xxvii., see Dr. Kennicott's dissertation.
CHRONOLOGY

Cyclop. of Bibl. Lit., art. Chronicles, and other works cited by the above-named writers.

A. C. H.

* Additional Literature. — It would be unjust to withhold from the reader Dean Stanley's republication (as he understands it) of the compilation and spirit of the book of Chronicles. Though the latest of all the canonical writings, it represents the workmanship of many generations. It resembles the structure of an ancient cathedral, with fragments of every style worked into the building as it proceeded, — here a piece of the most holy antiquity, there a provisional relic of a lost man or general idea, in some unknown poet or warrior, — but all preserved, and wrought together, as by the workmen of medieval times, under the guidance of the same sacrosanct mind, with the spirit of the same priestly order. Far below the prophetic books of the Kings in interest and solidity, it yet furnishes a useful counterpart by filling up the voids with materials which none but the peculiar traditions and peculiarities of the Levitical caste could have supplied. It is the culminating point of the purely Levitical system, both in what it relates, in what it omits, and the manner of its relations and omissions; "History of the Jewish Church, ii. 461-2.

Dillmann has an article on the Chronicles in Herzog's Real-Encycl. ii. 689-95. Havernick (Handb. der Enot. in des Alten Test., i. 284 ff.; Scholz (Einl. in die h. Schriften, ii. 391-409; Welte (in Herzog's Einleitung, ii. 162-291); and Keil (Einl. in des Alten Test. pp. 473-500) furnish valuable summaries of the results of their respective investigations. See also De Wette, Einl. 7^ Aufl. 1852. pp. 237-257; Ewald, Gesch. d. Volkes Isr. i. 214-285, 2^ Aufl. 1884; Bleek, Einl. in das A. T. 1869, pp. 391-411; Davidson, Intro. to the Old Test. ii. 47-129, Lond. 1852; Graf, Die geschichtl. Bücher des A. T., Leipzig, 1866, pp. 114-247, comp. the notice by Bertheau in the Japan. f. deutsche Theol. 1896, xlv. 150 ff.; and Kuenen, Hist. crit. des lieuv. de l'Ancien Testament, trad. par Pierson, i. 442-455, Paris, 1896. Many commentaries may be mentioned Bertheau's Die Bücher der Chronik (1854), vol. xv. of the Exeget. Handb. vam A. T.; Mau's. Commentary, in Vet. Test. i. 232 ff. (the notes very meagre); and Wordsworth's Holy Bible, with Notes, in. 167 ff. (1896). The relations of Chronicles to the Books of Kings must be traced to 1 and 2 Kings and 1 and 2 Samuel, both as to the parts common to both as well as to peculiar to each, is well illustrated by this last writer in his "Introduction to the Books of Kings and to the Books of Chronicles," pp. vii.-xxxv. Keil (Einleitung, p. 473) refers to the Thübingen Theol. Querelschriift, 1841, ii. 241-282, as treating ably of the credibility and time of the composition of these writings. Against the objections raised by De Wette, Graubner and others, the replies of Krupp and of his editor, Schleierm. (Die Eshh, ein Werk der offent. Weisheit, ii. 514 ff.), are concise and to the point.

H. and A.

CHRONOLOGY. I. Introduction. — The object of this article is to indicate the present state of Biblical chronology. By this term we understand the technical and historical chronology of the Jews and their ancestors from the earliest time to the close of the New Testament times. The technical division must be discussed in some detail, the historical only as far as the return from Babylon, the disputed matters of the period following that event being separately treated in other articles.

The character of the inquiry may be made clearer by some remarks on the general nature of the subject. Formerly too great an exactness was hoped for in the determination of Hebrew chronology. Where the materials were not definite enough to fix a date within a few years, it was expected that the very day could be ascertained. Hence arose the great unsoundness and variety of results, which ultimately produced a general feeling of distrust. At present critics are rather prone to run into this latter extreme and to treat this subject as altogether vague and uncertain. The truth, as might be expected, lies between these two extreme judgments. The character of the records whence we draw our information forbids us to hope for a complete system of Biblical chronology. The chronology does not give a complete history of the times to which it refers: in its historical portions it deals with special and detached periods. The chronological information is, therefore, not absolutely continuous, although often, with the evident purpose of forming a kind of connection between these different portions, it has a more continuous characte than might have been expected. It is rather historical than strictly chronological in its character. In what the technical parts of the subject depend, so far as the Bible is concerned, almost wholly upon inference. It might be supposed that the accuracy of the information would compensate in some degree for its scantiness and occasional want of continuity. This was, doubtless, originally the case, but it has suffered by designed alteration and by the carelessness of copyists. It is, therefore, of the highest moment to ascertain, as far as possible, what are the indications of alterations by design, and the character of the data in which they occur, and also what class of data has been shown to have suffered through the carelessness of copyists. Designed alteration of numbers has only been detected in the two genealogical lists of Abraham's ancestors in Genesis, in which the character of the differences of the Hebrew text, the Septuagint, and the Samaritan Pentateuch, is such as to indicate that such alterations by design have taken place. Formerly the object of these alterations may have been either to shorten or to lengthen the chronology. With the same purpose alterations may have been made in the prominent detached large numbers in the Old Testament, and even in the smaller numbers, when forming part of a series, or, in either case, in the accompanying words determining the historical place of these numbers. Hence there is great value in independent evidence in the New Testament and in incidental evidence in the Old. Of the former class are St. Paul's mentions of the period of the Judges, and of that from the promise to Abraham until the Exod. especially considered in connection with his speaking of the duration of Saul's reign, as to which the Hebrew Scriptures are silent. Of the latter class are such statements as Jephthah's of the 300 years that the Israelites had held the country of the Amorites before his days, and the indications of time afforded by the growth of a tribe or family, and changes in national character and habits, which indications, from their requiring careful study and close criticism, have been greatly neglected. The evidence of the genealogies without numbers is weakened not so much by designed alteration, of which the presence of the second and third instances, but by the abundant indications they show
of the carelessness of copyists. Their very nature also renders them guides to which we cannot trust, since it appears that they may be in any case broken without being technically imperfect. Even were this not the case, it must be proved, before they can be made the grounds of chronological calculation, that the length of man's life and the time of mankind were always what they now are, and even then the result could only be approximate, and when the steps were few, very uncertain. This inquiry therefore demands the greatest caution and judgment.

II. Technical Chronology. — The technical part of Hebrew chronology presents great difficulties. The historical information is, if possible, less wholly inferential, although in many cases the inferences to be drawn are of a very positive nature, not always absolutely, but in their historical application. For instance, although the particular nature of each year of the common kind — for there appear to have been two years — cannot be fixed, yet the general or average character of all can be determined with a great approach to exactness. In this part we may use with more than ordinary confidence the evidence of the Egyptian calendrical enumerators, who, in such matters, could scarcely be ill-informed. They lived near to the times at which all the Jewish observances connected with the calendar were strictly kept in the country for which they were framed, and it has not been shown that they had any motive for misrepresentation. We can, however, make no good use of our materials if we do not ascertain what character to expect in Hebrew technical chronology. There is no reason to look for any great change, either in the way of advance or decline, although it seems probable that the patriarchal division of time was somewhat ruder than that established in connection with the Law, and that, after the time of Moses until the establishment of the kingdom, but little attention was paid to science. In our endeavor to ascertain how much scientific knowledge the patriarchs and Israelites are likely to have had, we must not expect either the accuracy of modern science or the inaccuracy of modern ignorance. As to scientific knowledge connected with chronology, particularly that of astronomy, the cases of the Egyptians and the Chaldees will assist us to form a judgment with respect to the Hebrews. These last, however, we must remember, had not the same advantage of being wholly settled, nor the same inducements of national religions connected with the heavenly bodies. The Atlas of the desert, from somewhat before the time of Mohammed — that is, as far as our knowledge of them in this respect extends — to the present day, afforded the last parallel. We do not find them to have been a mathematical people or one given to chronological computation depending on astronomy, but to have regulated their calendars by observation alone. It might have been expected that their observations would, from their constant recurrence, have acquired an extraordinary delicacy and gradually given place to computations; but such we do not find to have been the case, and these observations are not now more accurate than would be the earlier ones of any series of the kind. The same characteristics appear to have been those of the scientific knowledge and practice of the Hebrews. We have no reason for supposing that they had attained, either by discovery or by the instruction of foreigners, even in individual cases, to a high knowledge of mathematics or accuracy of chronological computation at any period of their history. In these particulars it is probable that they were always far below the Egyptians and the Chaldees. But there is sufficient evidence that they were not inattentive observers of the heavens in the adlusions to stars and constellations in well-known objects. We may therefore expect in the case of the Hebrews that wherever observation could take the place of computation it would be employed, and that its accuracy would not be of more than a moderate degree. If, for instance, a new moon were to be observed at any town, it would be known within two days when it might be first seen, and one of the clearest-sighted men of the place would ascend to an eminence to look for it. This would be done throughout a period of centuries without any close average for computation being obtained, since the observations would not be kept on record. So also of the rising of stars and of the times of the equinoxes. These probable conclusions as to the importance of observation and its degree of accuracy must be kept in view in examining this section.

Before noticing the divisions of time we must speak of genealogies and generations. It is commonly supposed that the genealogies given in the Bible are mostly continuous. When, however, we come to examine them closely, we find that many are broken without being in consequence technically defective as Hebrew genealogies. A modern pedigree thus broken would be defective, but the principle of these genealogies must have been different. A notable instance is that of the genealogy of our Saviour given by St. Matthew. In this genealogy Joram is immediately followed by Ozias, as his son, and the period between them broken when the new birth, and Angelus being omitted (Matt. i. 8). That this is not an accidental omission of a copist is evident from the specification of the number of generations from Abraham to David, from David to the Babylonian Captivity, and from the Babylonian Captivity to Christ, in each case fourteen generations. Probably these missing names were purposely left out to make the number for the interval equal to that of the other intervals, Babylonish, Persian, and Assyrian, and very obvious and not liable to cause error. In Ezra’s genealogy (Ezr. vii. 1–5) there is a similar omission, which in so famous a line can scarcely be attributed to the carelessness of a copist. There are also examples of a man being called the son of a remote ancestor in a statement of a genealogical form, as the following: “Shebael the son of Gershom [Gershon], the son of Moses” (1 Chr. xxvi. 24), where a contemporary of David is placed in the same relation to Gershom the son of Moses, as the latter is to Moses himself. That these are not exceptional instances is evident from the occurrence of examples of the same kind in historical narratives. Thus Jehn is called “the son of Ninmis” (1 K. xix. 16, 2 K. ix. 20; 2 Chr. xxii. 7) as well as “the son of Jehoshaphat the son of Ninmis” (2 K. ii. 2, 14). In the same manner Lahon is called “the son of Nahor” (Gen. xxix. 5), whereas he was his grand son, being the son of Bethuel (xxvii. 2, comp. xxii. 23–27). We cannot, therefore, venture to use the Hebrew genealogical lists to compute intervals of time except where we can prove each descent to be immediate. But even if we can do this we have still to be sure that we can determine the average length of each generation. (Historical Chronology.) Ideler remarks that Moses, like Herodotus, reckons by generations. (Handbuch, i. 506.) Certainly in the Pentateuch generations are
connected with chronology by the length of each in a series being indicated, but this is not the manner of Herodotus, who reckons by generations, assum- ming an average of three to a century (ii. 142). There is no use of a generation as a division of time in the Pentateuch, unless, with some, we suppose that "_in_" in Gen. xvi. 16 is so used. These, however, who hold this opinion make it an interval of a hundred years, since it would, if a period of time, seem to be the fourth part of the 400 years of verse 13; most probably, however, the meaning is that some of the fourth generation should come forth from Egypt. [Genesis 10: 1-30: GENERATION.]

We have now to speak of the divisions of time, commencing with the least. There is no evidence that the ancient Hebrews had any such division smaller than an hour.

**Hour.**—The hour is supposed to be mentioned in Daniel (iii. 6, 15, iv. 16, 30, A. V. 19, 33, v. 5), but in no one of these cases is a definite period of time clearly intended by נוֹם, שָׁעוֹת, שָׁעָה, שָׁאוֹה, שְׁעָה, Chalch., the word employed. The Egyptians divided the day and night into hours like ourselves from at least B. c. cir. 1200. (See Lepsius, Chronologie der Ägypt., i. 130.) It is therefore not improbable that the Israelites were acquainted with the hour from an early period. The "sun-dial of Ahaz," whatever instrument, fixed or movable, it may have been, implies a division of the kind. In the N. T. we find the same system as the modern, the hours being reckoned from the beginning of the Jewish night and day. [Hours.]

**Day.**—For the civil day of 24 hours we find in one place (Dan. viii. 14) the term נוֹם הלָעָה, "evening-morning," i. e.xx. מֵשֶׁהֶבֶּשֶׁבֶּסֶבֶּסֶבֶּסֶב (also in 2 Cor. xi. 25 A. V. "a night and a day"). Whatever may be the proper meaning of this Hebrew term, it cannot be doubted here to signify "nights and days." The common word for day as distinguished from night is also used for the civil day, or else both day and night are mentioned to avoid vagueness, as in the case of Jonah's "three days and three nights" (Jon. ii. i. A. V. i. 17; comp. Matt. xii. 40). The civil day was divided into night and natural day, the periods of darkness and light (Gen. i. 5). It commenced with night, which stands first in the special term given above. The night, לָעָה, and therefore the civil day, is generally held to have begun at sunset. Idler, however, while admitting that this point of time was that of the commencement of the civil day among all other nations known to us, which followed a lunar reck- oning, objects to the opinion that this was the case with the Jews. He argues in favor of the beginning of deep night, reasoning that, for instance, in the ordaining of the Day of Atonement, on the 10th of the 7th month, it is said "in the nigh [day] of the month at even, from even unto even, shall ye celebrate (lit. rest) your Sabbath".—(Lev. xxvii. 32), where, if the civil day began at sunset, it would have been said that they should commence the observance on the evening of the 10th day, or merely on the 10th day, supposing the word evening, לָעָה, to mean the later part of our afternoon.

He cites, as probably supporting this view, the expression לָעָה לָעָה, "between the two evenings," used of the time of offering the passover and the daily evening sacrifice (Ex. xii. 6; Num ix. 3 xxviii. 4); for the Pharisees, whom the present Jews follow, took it to be the time between the 9th and 11th hours of the day, or our 3 and 5 p. m., although the Samaritans and Karaites supposed it to be the time between sunset and full darkness, particularly on account of the phrase לָעָה לָעָה, "when the sun is setting," used in a parallel passage (Deut vi. 6) (see Handb. i. 182-484). These passages and expressions may, however, be not unreasonably held to support the common opinion that the civil day began at sunset. The term "between the two evenings" can scarcely be supposed to have originally indicated a long period: a special short period, though scarcely a point, the time of sunset, is shown to correspond to it. This is a natural division between the late afternoon when the sun is low, and the evening when his light has not wholly disappeared,—the two evenings into which the natural evening would be cut by the commencement of the civil day if it began at sunset. There is no difficulty in the command that the observance of so solemn a day as that of atone- ment should commence a little before the true be- ginning of the civil day, that the preparation might be made for the sacrifice. In Julius Caesar, where the duration of twilight is very short at all times, the most natural division would be at sunset. The natural day, לָעָה, probably was held to commence at sunrise, morning-twilight being included in the last watch of the night, according to the old as well as the later division; some, however, made the morning-watch part of the day. Four natural per- iods, smaller than the civil day, are mentioned. These are לָעָה, לָעָה, לָעָה, לָעָה, of which there is frequent mention, and the less usual לָעָה, לָעָה, or לָעָה. "half the night," midnight. No one of these with a people not given to astronomy seems to indicate a point of time, but all to designate periods, evening and morning being, however, much longer than noon and midnight. The night was divided into watches (לָעָה לָעָה לָעָה). In the O. T. but two are expressly mentioned, and we have to infer the ex- istence of a third, the first watch of the night. The middle watch (לָעָה לָעָה לָעָה) occurs in Judges, vii. 19, where the connection of watches with military affairs is evident.—And Gideon and the hundred men that [were] with him went down into the extremity of the camp at the beginning of the middle watch; [and] they had but set the watchmen לָעָה לָעָה; and the morning-watch (לָעָה לָעָה לָעָה) is mentioned in Ex. xiv. 24 and 1 Sam. xi. 11: in the former case in the account of the passage of the Red Sea, in the latter, in that of Saul's surprise of the Ammonites when he relieved Jabesh-gilead. Some Rabbinis held that there were four watches (Handb. i. 486). In the N. T. four night-watches are mentioned, which were probably adopted from the Romans as a modi- fication of the old system. All four occur together

* In Ex. xii. 10, לָעָה לָעָה לָעָה of course refers to, without absolutely designating, the first watch.
MARK xiii. 35, 36, the late watch; **σαββατον**, midnight; **Διακοπή**, the cock-crowing; and 
πρωύν, the early watch. [DAY, NIGHT, WATCHES OR NIGHT.]

H'cek (יוֹבֶל, a hebdomad). — The Hebrew week was a period of seven days ending with the Sabbath; therefore it could not have been a division of the month, which was lunar, without intercalation. But there was no such intercalation, since the Sabbath was to be every seventh day, its name is used for week, and weeks are counted on without any additional day or days. The mention together of Sabbaths and new moons proves nothing but that the two observations were similar, the one closing the week, the other beginning the month. The week, whether a period of seven days, or a quarter of the month, was of common use in antiquity. The Egyptians, however, were without it, dividing their month of thirty days into decads as did the Athenians. The Hebrew week therefore cannot have been adopted from Egypt; probably both it and the Sabbath were used and observed by the patriarchs. [WEEK; SABBATH.]

Month (**יָסַר, **יָסָר, **יָשָׁר**). — The months by which the time is measured in the account of the Flood would seem to be of 30 days each, probably forming a year of 360 days, for the 1st, 21, 7th, and 10th months are mentioned (Gen. xvi. 13, xvii. 11, xvi. 14, 4, 5). Ideler contests this, arguing that as the water first began to sink after 150 days (and then had been 15 cubits above all high mountains), it must have sunk for some days ere the Ark could have rested on Ararat, so that the second date must be more than 150 days later than the first (Handbuch, i. 69, 70, 478, 479). This argument depends upon the meaning of "high mountains," and upon the height of those — the mountains of Ararat? (viii. 4), on which the Ark rested, questions connected with that of the universality of the Flood. [NOAH.] On the other hand it must be urged that the exact correspondence of the interval to five months of 30 days each, and the use of a year of 360 days, a fact strangely ignored by Ideler, in prophetic passages of both Testaments, are of no slight weight. That the months from the giving of the Law until the time of the Second Temple, when we have certain knowledge of their character, were always lunar, appears from the command to keep new-moons, and from the like likelihood of a change in the calendar. These lunar months have been supposed to have been always alternately of 21 and 30 days. Their average length would of course be a lunation, or a little (44') above 29½ days, and therefore they would in general be alternately of 21 and 30 days, but it is possible that occasionally months might occur of 28 and 31 days, if, as is highly probable, the commencement of each was strictly determined by observation; that observation was employed for this purpose is distinctly affirmed in the Babylonian Talmud of the practice of the time at which it was written, when, however, a month was not allowed to be less than 20, or more than 30 days in length. The first day of the month is called **יָסַר, **יָשָׁר**, "new

a Ideler corrects Gesenius (Handwörterb. s. v. יָסַר) for affirming that the usual meaning, "sabbath," is satisfactory in Lev. xlvii. 15. In the Talmud (p. 2, v.), Rigidier, possibly on the authority of Gesenius, admits that the signification is perhaps "week." Ideler's moon;" I.XX. **נָעָרָיָה**, from the root **נָעָרָה**, "it was new" (as to the primary sense of which, see MONTH); and in speaking of the first day of the month this word was sometimes used with the addition of a number for the whole expression, "in such a month on the first day," as **יָסַר נָעָרָיָה** . . . **יָסַר נָעָרָיָה**. "On the third new moon . . . . . on that day," badly rendered by the LXX. Τρείς μήνες τού τρίτου . . . τὴν ἤμερα τοῦτον (Lxx. xii. 1); hence the word came to signify month, though then it was sometimes qualified as **יָסַר נָעָרָיָה**. The new moon was kept as a sacred festival. [FESTIVALS.] In the Pentateuch, and Josh., Judg., and Ruth, we find but one month mentioned by a special name, the rest being called according to their order. The month with a special name is the first, which is called **יָסַר נָעָרָיָה** (LXX. μήν τοῦ νίου), "the month of ears of corn," or "Abib," that is, the month in which the ears of corn became full or ripe, and on the 16th day of which, the second day of the feast of unleavened bread, ripe ears, **יָסַר נָעָרָיָה**, were to be offered (Lev. ii. 14; comp. xxii. 10, 11, 14). This undoubted derivation shows how monstrous is the idea that Abib comes from the Egyptian Ethphii. In 1 K. three other names of months occur, Zif, יַז, or יָז, the second, Ethphii, **יָסַר נָעָרָיָה**, the seventh, and Bul, בַּל, the eighth. These names appear, like that of Abib, to be connected with the phenomenon of a tropical year. No other names are found in any book prior to the Captivity, but in the books written after the return the later nomenclature still in use appears. This is evidently of Babylonian origin, as the Jews themselves affirm. [MONTHS.]

Yovel (**יָעֹלָה**). — It has been supposed, on account of the dates in the narrative of the Flood, as already mentioned, that in Noah's time there was a year of 360 days. These dates might indeed be explained in accordance with a year of 365 days. The evidence of the prophetic Scriptures is, however, conclusive as to the knowledge of a year of the former length. The time, times and an half of Dan. (xii. 23, xii. 7), where time means year (see xi. 13), cannot be doubted to be equivalent expressions to the 42 months and 1290 days of Lev. (xi. 3, xi. 6); for **30 × 30 = 1260**; and **30 × 42 = 1260**. We have also the testimony of ancient writers that such a year was known to some nations, so that it is almost certain that the year of Noah was of this length. The characteristics of the year instituted at the Exodus can be clearly determined, though we cannot absolutely fix these of any single year. There can be no doubt that it was essentially tropical, since certain observations connected with the produce of the land were fixed to particular days. It is equally clear that the months were lunar, each commencing with a new moon. It would appear therefore that there must have been some mode of adjustment. To ascertain what this was, it is necessary to examine the passage of Dion Cassius (xix. 19), in itself ambiguous, is of no value against the strong negative evidence of the monuments. [See Lepsius, Chronologe der. Epyg. i. 131-133.]
CHRONOLOGY

necessary first to decide when the year commenced. On the 16th day of the month Abib, as already mentioned, ripe ears of corn were to be offered as first-fruits of the harvest (Lev. ii. 14, xxiii. 10, 11). The reaping of the barley commenced the harvest (2 Sam. xxvi. 19), the wheat following (14th Ruth ii. 25). Joseph expressly says that the offering was of barley (1st. iii. 10, § 5). It is therefore necessary to find when the barley becomes ripe in Palestine. According to the observation of travellers the barley is ripe, in the warmest parts of the country, in the first days of April. The barley-harvest therefore commences about half a month after the vernal equinox, so that the year would begin at about that tropical point were it not divided into lunar months. We may conclude that the nearest new moon about or after the equinox, but not much before, was chosen as the commencement of the year. Ideler, whom we have thus far followed, as to this year, concludes that the right new moon was chosen through observation of the forwardness of the barley-crops in the warmer districts of the country (Handb. i. 300). There is, however, this difficulty, that the different times of barley-harvest in various parts would have been liable to cause confusion. It seems, therefore, not unlikely that the Hebrews observed the sun's movements of determining their new year's day by observations of heliacal risings or similar stellar phenomena known to mark the right time before the barley-harvest. Certainly the ancient Egyptians and the Arabs made use of such means. The method of interpolation can only have been that which obtained after the Captivity — the addition of a thirteenth month, whenever the twelfth ended too long before the equinox for the first-fruits of the harvest to be offered in the middle of the month following, and the similar offerings at the times appointed. This method would be in accordance with the permission granted to postpone the celebration of the Passover, in the case of any one who was either legally unclean or journeying at a distance, for a whole month to the 14th day of the second month (Num. ix. 9-13); of which permission we find Hezekiah to have availed himself for both the reasons above, because the fasts were not sufficiently sanctified, and the people were not collected (2 Chr. xxxi. 1-3, 15). The later Jews had two beginnings to the year, or, as it is commonly but somewhat inaccurately said, two years. At the time of the Second Temple (as Ideler admits) these two beginnings obtained: the seventh month of the civil reckoning being Abib, the first of the sacred. Hence it has been held that the institution at the time of the Exodus was merely a change of commencement, and not the introduction of a new year; and also that from this time there were the two beginnings. The former opinion is at present purely hypothetical, and has been too much mixed up with the latter, for which, on the contrary, there is some evidence. The strongest point in this evidence, although strangely unnoticed by Ideler as such, is the circumstance that the sabbatical and jubilee years commenced in the seventh month, and doubled on its first day. That the jubilee year commenced in this month is distinctly stated, since its solemn proclamation was on the 1oth day of the seventh month, the Day of Atonement (Lev. xxv. 9, 10); and as this year immediately followed a sabbatical year, the latter must have commenced in the same manner. As however these were whole years, it must be supposed that they began on the first day of the month, the Day of Atonement standing in the same relation to their beginning, and perhaps to the civil beginning of the year, as did the Passover to the sacred beginning. It is perfectly clear that this would be the most convenient, if not the necessary commencement of single years of total cessation from the toils of the field, since the sacred year so commencing would comprise the whole round of these occupations in a regular order from seed-time to harvest, and from harvest to vintage and gathering of fruit. This is indeed plain from the injunction as to both Sublatical and Jubilee years apart from the mention of the Day of Atonement, unless we suppose, and this would be very unwarrantable, that the injunction follows the order of the seasons of agriculture, but that the observance did not. It might seem, at first sight, that the seventh month was chosen, as itself of a kind of sabbatical character; but this does not explain the fact that Sublatical and Jubilee years were natural years, nor would the seventh of twelve months be analogous to every seventh year. We can therefore come to no other conclusion but that for the purposes of agriculture the year was held to begin with the seventh month, while the months were still reckoned from the sacred commencement in Abib. There are two expressions used with respect to the time of the celebration of the Feast of Ingathering on the 15th day of the seventh month, one of which leads to the conclusion at which we have just arrived, while the other is in accordance with the idea of the turning-point of a natural year. By the term טֹּלָכָה the Rabbins denote the commencement of each of the four seasons into which their year is divided (Handb. i. 330, 551). Evidence correlative of our conclusion is also afforded by the similar distinctive character of the first and seventh months in the calendar with respect to their observances. The one was distinguished by the Feast of Unleavened Bread from the 16th to the 21st inclusive; the other by that of Tabernacles, from the 15th to the 22d. There is besides some evidence in the special sanctification, above that of the ordinary new month, of the first day of the seventh month, which in the blowing of trumpets bears a resemblance to the celebration of the commencement of the jubilee year on the Day of Atonement. On these grounds we hold that there were two beginnings to the year from the time of the Exodus. [YRPN.]

Success. — The ancient Hebrews do not appear to have divided their year into fixed seasons. We find mention of the natural seasons, סָבָט, "summer," and סָוְיָם, "winter," which are used for the whole year in the expression סָבָט וּסָוְיָם (18. lviii. 17; Zech. xiv. 8; and perhaps Gen. viii. 22). The former of these properly means the time of cutting fruits, and the latter, that of gathering fruits; the one referring to the early fruit season, the other to the late one. Their true signification are therefore rather summer and autumn than summer and winter. There can be no doubt, however

The Day of Atonement, 

was the 10th day of the 7th month. It was a sabbath, that is, a holy day, and also a fast, the only one in the Hebrew year before the Babylonian Captivity. Upon this day the high-priest made an offering of atonement for the nation. This annual solemn rite seems more appropriate to the commencement than to the middle of the year, and the time of its celebration thus affords some evidence in favor of the theory of a double beginning. The Feast of Tabernacles, 

was kept in the 7th month, from the 15th to the 22nd days inclusive. Its chief days were the first and last, which were sabbaths. Its name was taken from the people dwelling in tabernacles, to commemorate the Exodus. It was otherwise called 

"The Feast of Gathering," because it was also instituted as a time of thanksgiving for the end of the gathering of fruit and of the vintage. The small number and simplicity of these primitive festivals is especially worthy of note. It is also observable that the people are not of an astronomical character; and that when they are connected with nature, it is as directing the gratitude of the people to Him who, in giving good things, leaves not Himself without witness. In later times many holy days were added. Of these the most worthy of remark are the Feast of Purim, or "Lots," commemorating the deliverance of the Jews from Haman's plot, the Feast of the Dedication, recording the cleansing and re-dedication of the Temple by Judas Maccabaeus, and fasts on the anniversaries of great national misfortunes connected with the Babylonian Captivity. These last were doubtless instituted during that period (comp. Zech. vii. 1-5). [FESTIVALS, &c.]

The Sabbath and the Yizra'el Years.

The Sabbath and Jubilee years, 

"the fallow year" or possibly "year of remission," or "the year of jubilee," alone, also called a "sabbath," and a "great sabbath," was an institution of the same character as the sabbath—"a year of rest, like the day of rest. It has not been sufficiently noticed that as the day has a side of physical necessity with reference to man, so the year has a side of physical necessity, with reference to the earth. Every seventh year appears to be a very suitable time for the recurrence of a fallow year, on agricultural grounds. Besides the rest from the labors of the field and vineyard, there was in this year to be remission, temporary or absolute, of debts and obligations among the people. The sabbatical year must have commenced at the civil beginning of the year, with the 7th month, as we have already shown. Although doubtless held to commence with the 1st of the month, its beginning appears to have been kept at the Feast of Tabernacles (Deut. xxxi. 10), while that of the jubilee year was kept on the Day of Atonement. This institution seems to have been greatly neglected. This was prophesied by Moses, who speaks of the desolation of the land as an enjoying the sabbaths which had not been kept (Lev. xxvi. 34, 35, 43). The seventy years' captivity is also spoken of in 2 Chr. (xxxvi. 21) as an enjoying sabbath; but this may be on account of the number being sabbatical, as ten times seven, which indeed seems to be indicated in the passage. After the lapse of some sabbatical periods, or forty
nine years, a year of jubilee was to be kept, immediately following the last sabbatical year. This was called הַיּוֹן שִׁבְעָת, "the year of the trumpet," or בָּשָׂר שָׁבִיעֹת, the latter word meaning either the sound of the trumpet or the instrument itself, because the commencement of the year was announced on the Day of Atonement by sound of trumpet. It was similar to the sabbatical year in its character, although doubtless yet more important. In the jubilee year debts were to be remitted, and lands were to be restored to their former owners. It is obvious from the words of the law (Lev. xxv. 8-11) that this year was followed by every seventh sabbatical year, so that the opinion that it was always identical with a sabbatical year is untenable. There is a further question as to the length of each jubilee period, if we may use the term, some holding that it had a duration of 50, but others of 49 years. The latter opinion does not depend upon the supposed reason that the seventh sabbatical year was the weekly sabbath, since the jubilee might be the first year of first and second seven years after. That such was the case, he noted that most probably by the analogy of the period was death, and the custom of the Jews in the new period, and centuries n. c.: although it must that the Jews were consequently in Maimonides, the jubilee of the first 70 years, the 51st year, commencing jubilee years, well that the same writer mentions i. pp. 505, 504.) The tradition that after the destruction of the only sabbatical years, and not seem to us at all the (c) holds it to be so: (t. c.) holds the expression of a period instead of standing between, absolutely that a jubilee year was kept the first the expression עַמָּנוּ (int. iii. 12) is it important to ascertain when year of a jubilee year ought to have been kept: with two such periods, and jubilee years seem to have been first indication: that positive record there is o: that the sabbatical or jubilee years having been kept: a: been contested he recorded there are of a reckoning by some but each kind: 1. It can scarcely be contested what the first sabbatical year be kept after the 1st Meccan years had entered Cæman would be identical with fourteenth, declensions, Jewish Antiquities, lxx. iii. 4, 9; and 14. intr. Historical Chronology.) It is possible that it might have been sometime earlier or later; but the narrative will not admit of much latitude. 2. It is clear that any sabbatical and jubilee years kept from the time of Joshua until the destruction of the first Temple, would have been reckoned from the first one, but it may be questioned if any kept after the return would be counted in the same manner: from the nature of the indications, it is rather to be supposed that the reckoning, in the second case, would be from the first cultivation of the country after its reoccupation." The record of sabbatical years do not end up to this an position, because we do not know exactly the year of return, for that of the first cultivation of the country. The recorded dates of periodical years would make that next after the return the commencement in n. c. 528, and before current in n. c. 527, which would make the 7th year of the period n. c. 534-3, which would not be improbably the first year of cultivation: but "in the case of so short a period his cannot be regarded as evidence of much weight. chronicles. There was no passerover like to that 1. There is no positive record of any jubilee year kept in Israel from the days of Samuel the prophet having been kept at any time. The dates of three sabbatical years have, however, been preserved. These were current n. c. 163, 155, and 137, and therefore commenced in each case about three months earlier than the beginning of these Jubilee years. (Joseph. Ant. xii. 3, § 5; xiii. 8, § 14; xiv. 16, § 21; xv. n. c. 21, § 2: H. i. 2, § 4; and 1 Macc. vi. 49, 53.) There are some chronological indications in connection with the sabbatical system: one in prophet Ezekiel dates his first prophecy of "the book "in the third year," and "activity" [was the fifth year of King Jehoiachin's new year (l.c. 2): thus apparently dating in the prophet's from a better known era than that of of years, with captivity, which he employs in later g. This it, however, in general again described as the 18th date of the 50th year is the jubilee year, was on the 1st of the law was date of jubilee for the date of jubilee, when the book of. (See Haverford, and a great passover celebrate.) This year round, and the jubilee year of Josiah, when the book of (Ezek.) 2: the reckoning of Josiah would certainly be the 1st reforming, and might be used as a kind of "sabbatical era, not unlike the era of Sinaitic, this seems very

Chronology
neither did all the kings of Israel keep such a pass-
over as Josiah kept " (2 Chr. xxxv. 18). The men-
tion of 15 years (Samuel is remarkable, since in this time the
earlier supposed date fails. It may be objected that the passover is nowhere connected with the sab-
batical reckoning, but these passovers can scarcely have been greater in sacrifices than at least one in
Solomon's reign, nor is it likely that they are men-
tioned as characterized by greater zeal than any others whatever; so that we are almost driven to the idea of some relation to chronology. This re-
result would place the Exodus in the middle of the 17th century B.C., a time for which we believe
there is a preponderance of evidence (Historical
Chronology). [SABBATICAL YEAR; JUBILEE. ]
Ex. 28. — There are indications of several histor-
ical eras having been used by the ancient Hebrews,
but our information is so scanty that we are gen-
erally unable to come to positive conclusions. Some
of these possible eras may be no more than dates
employed by writers, and not national eras; others,
however, can scarcely have been used in this spe-
cial or individual manner from their referring to
events of the highest importance to the whole people.

1. The Exodus is used as an era in 1 K. vi. 1,
in giving the date of the foundation of Solomon's
Temple. This is the only positive instance of the
occurrence of this era, for we cannot agree with
Ilerder that it is certainly employed in the Pen-
tateuch. He refers to Ex. xix. 1, and Num. xxxiii.
38 (Hendebach, i. 507). Here, as elsewhere in
the same part of the Bible, the beginning of the Exo-
dus-year, not of course, the actual date of the
Exodus (Regnal years, &c.) is used as the point
whence time is counted; but during the interval of
the dates of which it formed the natural commencement it
cannot be shown to be an era, though it may have
been, any more than the beginning of a sovereign's
reign is one.

2. The foundation of Solomon's temple is con-
j ectured by Ilerder to have been an era. The pas-
sages to which he refers (1 K. ix. 19; 2 Chr. viii.
1), merely speak of occurrences subsequent to the
interval of 20 years occupied in the building of the
temple and the king's house, both being distinctly
specified: so that his reading — " Zwezige Jahre, 
hochdem Solomons Haus des Herrn erbaute " —
leaves out half the statement and so makes it in-
correct (v. vart. i. 1). It is elsewhere stated that
the building of the temple occupied 7 years (1 K.
vi. 37, 38), and that of Solomon's house 13 (vii.
1), making up the interval of 20 years.

3. The era once used by Ezekiel, and commen-
ting in Josiah's 18th year, we have previously dis-
cussed, concluding that it was most probably con-
ected with the sabbatical system (Sabbatical and
Jubilee Years).

4. The era of Jehoiachin's captivity is constantly
used by Ezekiel. The earliest date is the 5th year
(i. 2) and the latest, the 27th (xxix. 17). The
prophet generally gives the date without applying
any distinctive term to the era. He speaks, how-
ever, of " the fifth year of king Jehoiachin's captive-
ty " (i. 2), and " the twelfth year of our captivity "
(xxvii. 21), the latter of which expressions may
explain his constant use of the era. The same era
is necessarily employed, though not so much, where
the advancement of Jehoiachin in the 37th year of
his captivity is mentioned (2 K. xxv. 27; Jer. liii.
1). We have no proof that it was used except
by those to whose captivity it referred. Its 1st
year was current u. c. 596, commencing in the
spring of that year.

5. The beginning of the seventy years' captivity
does not appear to have been used as an era (Hist-
orical Chronology).

6. The return from Babylon does not appear to
be employed as an era: it is, however, reckoned
from in Ezra (i. 8), as is the Exodus in the
Pentateuch.

7. The era of the Seleucids is used in the first
and second books of Maccabees.

8. The liberation of the Jews from the Stran-
yoke in the 1st year of Simon the Maccabee is
stated to have been commemorated by an era used
in contracts and agreements (1 Macc. xiii. 41). The years 1, 2, and 3 on the coins ascribed to Si-
mon [MONEY, SHEKEL] are probably of this era,
although it is related that the right of coming
money with his own stamp was not conceded to
him until somewhat later than its beginning (xxv.
6): for it may be reasonably supposed, either that
Antiochus VII. confirmed privileges before granted
by his brother Demetrius II. (comp. xv. 5), or that
he gave his sanction to money already issued (Ear

Regnal Years. — By the Hebrew regnal years
appear to have been counted from the beginning of
the year, from the day of the king's accession.
Thus, if a king came to the throne in the last
month of one year, regned for the whole of the
next year, and died in the 1st month of the 9th
year, we might have dates in his 1st, 24 and 9d
years, although he governed for no more than 13
or 14 months. Any dates in the year of his acces-
sion, before that event, or in the year of his death,
after it, would be assigned to the last year of his
predecessor, and the 1st of his successor. The
same principle would apply to reckoning from eras
or important events, but the whole stated lengths
of reigns or intervals would not be affected by it.

III. HISTORICAL CHRONOLOGY. — The histori-
ical part of Hebrew Chronology is not less difficult
than the technical. The information in the Bible
is indeed direct rather than inferential, although
there is very important evidence of the latter kind;
but the present state of the numbers makes abso-
cute certainty in many cases impossible. If, for
instance, the Hebrew and LXX. differ as to a par-
ticular number, we cannot in general positively de-
tein that the original form of the number has not
been preserved, when we have decided, and this we
are not always able to do, which of the present
forms has a preponderance of evidence in its favor.
In addition to this difficulty there are several gaps
in the series of smaller numbers which we have no
means of supplying with exactness. When, there-
fore, we can compare several of these smaller
numbers with a larger number, or with independent
evidence, we are frequently prevented from putting
a conclusive test by the deficiencies in the first se-
ries. The frequent occurrence of round numbers is
a matter of minor importance. for, although when
we have no other evidence it manifestly precludes
our arriving at positive accuracy, the variation of
a few years is not to be balanced against great dif-
ferences apparently not to be positively resolved,
as those of the principal numbers in the Hebrew,
LXX., and Samaritan Pentateuch. Lately some have
had great reliance upon the sequence of the number
40, alleging that it and 70 are vague terms
ativey equivalent to " many," so that + 40 years, or + "70
years," would mean no more than "many years."
CHRONOLOGY

Prima facie, this idea would seem reasonable, but on a further examination it will be seen that the details of some periods of 40 years are given, and show that the number is not intended where it would at first seem to be so. Thus the 40 years in the wilderness can be divided into three periods: (1.) from the Exodus to the sending out of the spies was about one year and a quarter of a month; (2.) the time of the spies, 40 days (Num. xiii. 33); (3.) the time of the wanderings until the brook Zered was crossed, 38 years (Num. xii. 14), making altogether almost 391 years. This perfectly accords with the date (yr. 40, n. 11, d. 1) of the address of Moses after the conquest of Sihon and Og (Deut. i. 3, 4), which was subsequent to the crossing of the brook Zered. So again David's reign of 40 years is divided into 7 years 6 months in Hebron, and 33 in Jerusalem (2 Sam. ii. 11, v. 5; 1 Chr. iii. 4), but 1 K. ii. 11, 7 years omitting the months, and 33). This therefore cannot be an indefinite number, as some might conjecture from its following Saul's 40 years and preceding Solomon's. The last two reigns again could not have been much more or less than the circumstances of the history. The occurrence of such round numbers, therefore, does not warrant us supposing the constant use of vague ones. In discussing the technical part of the subject we have laid some stress upon the opinions of the earlier Rabbinical commentators; in this part we place no reliance upon them. As to divisions of time connected with religious observances they could scarcely be wrong; in historical chronology they could hardly be expected to be right, having a very small knowledge of foreign sources. In fact, by comparing their later dates with the chronology of the time astronomically fixed, we find so extraordinary a departure from correctness that we must abandon the idea of their having held any additional facts handed down by tradition, and serving to guide them to a true system of chronology. There are, however, important foreign materials to aid us in the determination of Hebrew chronology. In addition to the literary evidence that has been long used by chronologists the comparative identification of the Egyptian and Assyrian inscriptions has afforded us valuable additional evidence from contemporary monuments.

Biblical data. — It will be best to examine the Biblical information under the main periods into which it may be separated, beginning with the earliest.

A. First Period, from Adam to Abram's departure from Haran. — All the numerical data in the Bible for the chronology of this interval are comprised in two genealogical lists in Genesis, the first from Adam to Noah and his sons (Gen. v. 3 and fin.), and the second from Shem to Abram (xi. 10-25), and in certain passages in the same book (vii. 6, 11, viii. 13, ix. 28, 29, xi. 32, xii. 4). The Masoretic Hebrew text, the LXX., and the Samaritan Pentateuch greatly differ, as may be seen by the following table, which we take from the 'Genesis of the Earth and of Man' (p. 90), adding nothing essential but a various reading, and the age of Abram when he left Haran, but also including in parentheses numbers not stated but obtained by computation from others, and making some alterations consequently necessary. The advantage of the system of this table is the clear manner in which it shows the differences and agreements of the three versions of the data. The dots indicate numbers agreeing with the LXX.

= 2224 = 1582 = 1939

This was "two years after the Flood."
Josephus, Philo, and the earlier Christian writers appear however to have known nothing of him, and it is therefore probable either that he was first introduced by a copyist into the Gospel and thence into the LXX., or else that he was found in some cod. of the LXX. and thence introduced into the Gospel, and afterwards into all other copies of the LXX. (Caius.) Before considering the variations of the numbers it is important to notice that as two of the three sources must have been corrupted, we may reasonably doubt whether any one of them be preserved in its genuine state (Genesis of the Earth, &c., p. 92)—a check upon our confidence that has strangely escaped chronologers in general. The variations are the result of design, not accident, as is evident from the years before the birth of a son and the residues agreeing in their sums in almost all cases in the antediluvian generations, the exceptions, save one, being apparently the result of necessity that lives should not overlap the date of the Flood (comp. Clinton, Fusti. Hellen. i. 285). We have no clue to the date or dates of the alterations beyond that we can trace the LXX. form to the first century of the Christian era, if not higher, and the Heb. to the fourth century: if the Sam. numbers be as old as the text, we can assign them a higher antiquity than what is known as to the Heb. The little acquaintance most of the early Christian writers had with Hebrew makes it impossible to decide, on their evidence, that the variation did not exist when they wrote: the testimony of Josephus is here of more weight, but in his present text it shows contradiction, though preponderating in favor of the LXX. numbers. A comparison of the lists would lead us to suppose, on internal evidence, that they had first two forms, and that the third version of them originated from these two. This supposed later version of the lists would seem to be the Sam., which certainly is less internally consistent, on the supposition of the original correctness of the numbers, than the other two. The cause of the alterations is most uncertain. It has indeed been conjectured that the Jews shortened the chronology in order that an ancient prophecy that the Messiah should come in the sixth millenary of the world's age might not be known to be fulfilled in the advent of Christ. The theory could be defended in itself, but it does not rest upon sufficient evidence. It is, however, worthy of remark, that in the apostolic age there were hot discussions respecting genealogies (Tit. iii. 9), which would seem to indicate that great importance was attached to them, perhaps also that the differences or some difference then existed. The different proportions of the generations and lives in the LXX. and Heb. have been asserted to afford an argument in favor of the former. At a later period, however, this difference may be explained in itself, but it does not rest upon sufficient evidence. It is, however, worthy of remark, that the uncertainty of the dates in the genealogies is not different from what it is at the present day, although there are some long generations. A stronger argument for the LXX., if the unity of the human race be admitted, is found in the long period required from the Flood to the Dispersion and the establishment of kingdoms: this supposition would, however, require that the patriarchal generations should be either exceptional or recurrent periods: for the former of these hypotheses we shall see there is some ground in the similar case of certain generations, just alluded to, from Abraham downwards. With respect to probability of accuracy arising from the state of the text, the Heb. certainly has the advantage. There is every reason to think that the rabbinics have been scrupulous in the extreme in making alterations: the LXX., on the other hand, shows signs of a carelessness that would almost permit change, and we have the probable interpolation of the second column. If, however, we consider the Sam. form of the lists as sprung from the other two, the LXX. would seem to be earlier than the Heb., since it is more probable that the antediluvian generations would have been shortened to a general agreement with the Heb., than that the postdiluvian would have been lengthened to suit the LXX.; for it is obviously most likely that a sufficient number of years having been deducted from the earlier generations, the operation was not carried on with the later. It is noticeable that the stated sums in the postdiluvian generations in the Sam. generally agree with the computed sums of the Heb. and not with those of the LXX., which would be explained by the theory of an adaptation of one of these two to the other, although it would not give us reason for supposing either form to be the earlier. It is an ancient conjecture that the term year was of old applied to periods of short than three years. There is some plausibility in this theory, at first sight, but the account of the Deluge seems fatal to its adoption. The only passage that might be alleged in its support is that in which 120 years is mentioned as if the term of man's life after the great increase of wickedness before the Deluge, compared with the lives assigned to the antediluvian patriarchs, but this from the context seems rather to mean a period of probation before the catastrophe (Gen. vi. 3). A question has been raised whether the generations and numbers may not be independent, the original generations in the Sam. having been, as those in 1 Chr., simply names, and the numbers having been added, perhaps on traditional authority, by the Jews (comp. Genesis of the Earth, &c., pp. 92-94). If we suppose that a period was thus portioned out, then the character of Hebrew genealogies as not of necessity absolutely continuous might somewhat lessen the probability of numbers being assigned to individuals, and supposed that the numbers were originally cyclical, an idea perhaps originating in the notion of the distribution of a space of time to a certain number of generations. This particular theory can however scarcely be reconciled with the historical character of the names. Turning to the evidence of ancient history and tradition, we find the numbers of the LXX. confirmed rather than those of the Heb. The history and civilization of Egypt and Assyria with Babylonia reach to a time earlier than, in the first case, and about as early as, in the second, the Heb. date of the Flood. Moreover the concurrent evidence of antiquity carries the origin of gentle civilization to the Noahian races. The question of the unity of the species does not therefore affect this argument (Max), whence the numbers of the LXX. up to the Deluge would seem to be correct, for an accidental agreement can scarcely be admitted. If correct, are we therefore to suppose them original, that is, of the original text whence the
CHRONOLOGY

LXX. version was made? This appears to be a necessary consequence of their correctness, since the translators were probably not sufficiently acquainted with external sources to obtain numbers either actually or approximatively true, even if they were necessarily correct, and had they this knowledge, it is scarcely likely that they would have used it in the manner supposed. On the whole, therefore, we are inclined to prefer the LXX. numbers after the Hebr. and, as consistent with these, and probably of the same authority, those before the Deluge also. It remains for us to ascertain what appears to be the best form of each of the three versions, and to state the intervals thus obtained. In the LXX. antediluvian generations, that of Methuselah is 187 or 167 years; the former seems to be undoubtedly the true number, since the latter would make this patriarch, if the subsequent generations be correct, to survive the Flood 117 years. In the postdiluvian numbers of the LXX. we must, as previously shown, reject the second Cainan, from the preponderance of evidence against his genuineness. [CAMAIX.] Of the two forms of Nahor's generation in the LXX. we must prefer 79, as more consistent with the numbers near it, and also found in the Sam. An important correction of the next generation has been suggested in all the lists. According to them it would appear that Terah was 200 years old at Abraham's birth, and Terah lived seventy years, and begat Abram, Nahor, and Haran." (Gen. xi. 26.) It is afterwards said that Terah went from Ur of the Chaldees to Haran and died there at the age of 205 years (Is. xi. 32), and the departure of Abram from Haran to Canaan is thus narrated (Gen. xvi. 31). His age being stated to have been at that time 73 years (xvi. 1-5), it follows therefore conjecture, that Terah was 130 years old at Abram's birth (xvi. 32), and supposes the latter not to have been the eldest son but mentioned first on account of his eminence, as is shown in several places (v. 32, vi. 10, vii. 13, ix. 18, x. 1), who yet appears to have been the third son of Noah and certainly not the eldest (v. 21, and arrangement of chap.). There is, however, a serious objection in the way of this supposition. It seems scarcely probable that if Abram had been born to his father at the age of 120 years, he should have been asked in wonder, "is [a] child [be] born unto him that is an hundred years old? and shall Sarah, that is ninety years old, bear [a] child?" (Gen. xvii. 17.) Thus to suit a single number, that of Terah's age at his death, where the Sam. does not agree with the Heb. and LXX., a hypothesis is adopted that at least strains the consistency of the narrative. We should rather suppose the number might have been changed by a copist, and take the 145 years of the Sam. — It has been generally supposed that the Dispersion took place in the days of Peleg, on account of what is said in Gen. x. as to him: [of the two sons of Eber] "the name of one [was] Peleg (ח""ג, division), for in his days was the earth divided " (17;1;11;1;1, 25). It cannot be positively affirmed that the "Dispersion" spoken of in Gen. x. is here meant, since it was a Dispersion might be intended, although the former is perhaps the more natural inference. The event, whatever it was, must have happened at Peleg's birth, rather than, as some have supposed, at a later time in his life, for the easterns have always given names to children at birth, as may be noticed in the cases of Jacob and his sons. — We should therefore consider the following as the best forms of the numbers according to the three sources.

B. Second Period, from Abram's departure from Haran to the Exodus. — The length of this period is stated by St. Paul as 430 years from the promise to Abraham to the giving of the Law (Gal. iii. 17), the first event being held to be that recorded in Gen. xii. 5–7. The same number of years is given in LXX., where the Hebrew reads — "Now the sojourn of the children of Israel who dwelt in Egypt [was] four hundred and thirty years. And it came to pass at the end of the four hundred and thirty years, even the selfsame day it came to pass, that all the hosts of the Lord went out from the land of Egypt" (xii. 40, 41). Here the LXX. and Sam. add after "in Egypt" the words "and in Canaan," while the Alex. and other MSS. of the former also add after "the children of Israel" the words "and their fathers." It seems most reasonable to regard both these additions as glosses; if they are excised, the passage appears to make the duration of the residence in Egypt 430 years, but this is not an absolutely certain conclusion. The "sojourn" might well include the period after the promise to Abraham while that patriarch and his descendants "sojourned in the land of promise as [in] a strange country." (Heb. ix. 9), for it is not positively said "sojourning of the children of Israel in Egypt," but we may read "who dwelt in Egypt." As for the very day of beginning that of commencement, it might refer either to Abraham's entrance, or to the time of the promise. A third passage, occurring in the same essential form in both Testaments, and therefore especially satisfactory as to its textual accuracy, throws light upon the explanation we have offered of this last, since it is impossible to understand it except upon analogical principles. It is the divine declaration to Abraham of the future history of his children: "Shall all nations be numbered after thee, and shall thy seed be strangers in a land [that is] not theirs, and shall serve them; and they shall afflict thee four hundred years; and also that nation whom they shall serve, will I judge; and afterward shall they come out with great substance." (Gen. xv. 13, 14; comp. Acts vii. 6, 7). The four hundred years cannot be held to be the period of oppression without a denial of the historical character of the narrative of that time, but can only be supposed to mean the time from this declaration to the Exodus. This reading, which in the A. V. requires no more than a slight change in the punctuation, if it suppose an unusual construction in Hebrew, is perfectly admissible according to the principles of Semitic grammar, and might be used in Arabic. It is also noticeable that after the citation given above, the words of the whole sojourn are repeated, and added; and perhaps, therefore, the period defined (15, 16). The meaning of the "fourth generation" here mentioned has been previously considered. It cannot, therefore, be held that the statement of St. Paul that from the promise to Abraham until the Exodus was 430 years is irreconcilable with the two other statements of the same kind. In order to arrive at
as certain a conclusion as may be attainable, we must examine the evidence we have for the details of this interval. First, however, it will be necessary to form a distinct opinion as to the length of life of the patriarchs of this age. The Biblical narrative plainly ascribes to them lives far longer than what is held to be the present extreme limit, and we must therefore carefully consider the evidence upon which the general correctness of the numbers rests, and any independent evidence as to the length of life at this time. The statements in the Bible regarding longevity may be separated into two classes, those given in genealogical lists, and those interwoven with the relation of events. To the former class virtually belong all the statements relating to the longevity of the patriarchs before Abraham, to the latter nearly all relating to that of Abraham and his descendants. In the case of the one we cannot arrive at certainty as to the original form of the text, as already shown, but the other rests upon a very different kind of evidence. The statements as to the length of the lives of Abraham and his nearer descendants, and some of his later, are so closely interwoven with the historical narrative, not alone in form, but in sense, that their general truth and its cannot be separated. Abraham's age at the birth of Isaac is a great fact in his history, equally tested in the Old Testament and in the New. Again, the longevity ascribed to Jacob is confirmed by the question of Pharaoh, and the patriarch's remarkable answer, in which he makes his then age of 130 years less than the years of his ancestors (Gen. xlvii. 9), a minute point of agreement with the other chronological statements to be especially noted. At a later time the age of Moses is attested by various statements in the Pentateuch, and in the New Testament on St. Stephen's authority, though it is to be observed that the mention of his having retained his strength to the end of his 120 years (Deut. xxxiv. 7), is perhaps indicative of an unusual longevity. In the earlier part of the period following, we notice similar instances in the case of Joshua, and, inferentially, in that of Othniel. Nothing in the Bible could be cited against this evidence, except it be the common explanation of Ps. xc. (ver. 10) concerning the man to Moses (Is. xxv. 5). The title cannot, analogically, be considered a very strict guide, but the style and contents seem to us to support it. It may be questioned, however, whether the general shortness of man's life forms the subject of this psalm. A shortness of life is lamented as the result of God's anger, the people are described as under his wrath, and prayer is made for a happier condition. Nothing could be more applicable to the shortening of life in the desert in order that none who were twenty years old and upwards at the Exodus should enter the Land of Promise. With these the ordinary term of life would be three-score years and ten, or fourscore years. If, therefore, we ascribe the psalm to Moses, we cannot be certain that it gives the average of long life at his time independently of the peculiar circumstances of the wandering in the desert. Thus it is evident that the two classes of statements in the Bible bearing on and applying upon a very different basis. It must be observed that all the supposed modern instances of great longevity, as those of Parr, Jackson, and the old Countess of Desmond, have utterly broken down on examination, and that the registers of this country prove no greater extreme than about 100 years. We have recently had the good fortune to discover some independent contemporary evidence bearing upon this matter. There is an Egyptian hieratic papyrus in the Bibliothèque at Paris bearing a moral discourse by one Ptah-hotp, apparently eldest son of Assa (n. c. cir. 1910-1890), the fifth king of the Fifteenth Dynasty, which was of Shepherds [Egypt]. At the conclusion Ptah-hotp thus speaks of himself: "I have become an elder on the earth (or in the hand); I have traversed a hundred and ten years of life by the gift of the king and the approval of the elders, fulfilling my duty toward the king in the place of favor (or blessing)." (Facsimile d'un "Papyrus Egyptian, par E. Prisse d'Avennes, pl. xix., lines 7, 8). The natural inferences from this passage are that Ptah-hotp wrote in the full possession of his mental faculties at the age of 110 years, and that his father was still reigning at the time; and, therefore, had attained the age of about 130 years, or more. The analogy of all other documents of the kind known to us does not permit a different conclusion. That Ptah-hotp was the son of Assa is probably from inscriptions in tombs at Memphis; that he was a king's eldest son is expressly stated by himself (Facsimile, &c., pl. v., lines 6, 7). Yet he had not succeeded his father at the time of his writing, nor does he mention that sovereign as dead. The reigns designated Menes to the Shepherd-Kings of this dynasty seem indicative of a greater age than that of the Egyptian sovereigns (Cory's Ancient Fragments, 2d ed., pp. 114, 136). It has been suggested to us by Mr. Goodwin that 110 years may be a vague term, meaning "a very long life;" it seems to be so used in pyxii of a later time (n. c. cir. 1200). We rarely thus employ the term centenarian, more commonly employing sexagenarian and octogenarian, and this term is therefore indicative of a greater longevity than ours among the Egyptians. If the 110 years of Ptah-hotp be vague, we must still suppose him to have attained to an extreme old age during his father's lifetime, so that we can scarcely reduce the numbers 110 and about 130 more than ten years respectively. This Egyptian document is of the time of the Fifteenth Dynasty, and of so realistic and circumstantial a character in its historical bearings that the facts it states admit no question. Other records tend to confirm the inferences we have here drawn. It seems, however, probable that such instances of longevity were exceptional, and perhaps more usual among the foreign settlers in Egypt than the natives, and we have no ground for considering that the length of generation was then generally different from what it now is. For these reasons we find no difficulty in accepting the statements as to the longevity of Abraham and certain of his descendants, and can go on to examine the details of the period under consideration as made out from evidence requiring this admission. The narrative affords the following data which we place under two periods — (1) that from Abram's leaving Haran to Jacob's entering Egypt; and (2) that from Jacob's entering Egypt to the Exodus.

1. Age of Abram on leaving Haran 75 yrs.

These data make up about 357 or 358 years, which is reasonable to make some addition, since it appears that all Joseph’s generation died before the oppression commenced, and it is probable that it had begun some time before the birth of Moses. The sum we thus obtain cannot be far different from 430 years, a period for the whole sojourn that these data must thus be held to confirm. The genealogies relating to the time of the dwelling in Egypt, if continuous, which there is much reason to suppose some to be, are not regrouped in this scheme; but on the other hand, one alone of them, that of Joshua, in 1 Chr. (vii. 23, 25, 26, 27) is so arranged, can be reconciled with the opinion that dates the 430 years from Jacob’s entering into Egypt. The historical evidence should be carefully weighed. Its chief point is the increase of the Israelites from the few souls who went with Jacob into Egypt, and Joseph and his sons, to the six hundred thousand men who came out of the Exodus. At the former date the following are enumerated—besides Jacob’s sons’ wives,” Jacob had twelve sons and one daughter (13), his fifty-one grandsons and one granddaughter (52), and his four great-grandsons, making with the patriarch himself, seventy souls (Gen. xvi. 8-27). The generation to which children would be born about this date may thus be held to have been of at least 51 pairs, since all are males except one, who most probably married a cousin. This computation takes no account of polygamy, which was certainly practised at the time by the Hebrews. This first generation must, except where there were at the time other female grandchildren of Jacob besides the one mentioned (comp. Gen. xvi. 7), have taken foreign wives, and it is reasonable to suppose the same to have been constantly done afterwards, though probably in a less degree. We cannot therefore found our calculation solely on these 51 pairs, but must allow for polygamy and foreign marriages. These admissions being made, and the special blessing which attended the people borne in mind, the interval of about 215 years does not seem too short for the increase. On the whole, we have no hesitation in accepting the 430 years as the length of the interval from Abram’s leaving Haran to the Exodus.

C. Third Period, from the Exodus to the Foundation of Solomon’s Temple. There is but one passage from which we obtain the length of this period as a whole. It is that in which the Foundation of the Temple is dated in the 856th (Heb.) or 450th (LXX.) year after the Exodus, in the 4th yr. 24 m. of Solomon’s reign (1 K. vi. 1). Subtracting numbers 245 (Ex. 34:27) this is incorrect, since if 75 = 1-1, then 105 = 26, and the interval 49 yrs.

a Bunsen ridicules Dr. Baumgarten of Kiel for supposing a residue of 56 pairs from 70 souls. This results from 480 or 490 yrs. the first three yrs. of Solomon and the 40 of David, we obtain (480 - 43 = 437 or (440 - 43 = 427) yrs. These results we have first to compare with the detached numbers. These are as follows: (a.) From Exodus to death of Moses, 40 yrs. (b.) Leadership of Joshua, 7 + 4 yrs. (c.) Interval between Joshua’s death and the First Servitude 8 yrs. (d.) Servitudes and rule of Judges until Eli’s death, 430 yrs. (e.) Period from Eli’s death to Saul’s accession, 20 + 4 yrs. (f.) Saul’s reign, 40 yrs. (g.) David’s reign, 40 yrs. (h.) Solomon’s reign to Foundation of Temple, 3 yrs. (i.) Sum, 580 yrs. It is possible to obtain approximately the length of the three wanting numbers. Joshua’s age at the Exodus was 20 or 20 + 4 yrs. (Num. xiv. 29, 30), and at his death, 110; therefore the utmost length of his rule must be (110 - 20 + 40 = 70) yrs. After Joshua there is the time of the Elders who overlived him, then a period of disobedience and idolatry, a servitude of 8 yrs., deliverance by Othniel, the son of Kenaz, the nephew of Caleb, and rest for 40 yrs. until Othniel’s career of Joshua. The duration of Joshua’s reign is limited by the circumstance that Caleb’s lot was apportioned to him in the 7th year of the occupation, and therefore of Joshua’s rule, when he was 85 yrs. old, and that he conquered the lot after Joshua’s death. Caleb cannot be supposed to have been a very old man on taking his portion, and it is unlikely that he would have waited long before attacking the heathen who held it, to say nothing of the portion being his claimed reward for not having feared the Amakim who dwelt there, a reward promised him of the Lord by Moses and claimed of Joshua, who alone of his fellow-squires had shown the same faith and courage (Num. xiv. 24; Deut. 1. 36; Josh. xiv. 6 of fir., xv. 13-19; Judg. i. 9-15, 20). If we suppose that Caleb set out to conquer his lot about 7 years after its apportionment, then Joshua’s rule would be about 15 yrs., and he would have been a little older than Caleb. The interval between Joshua’s death and the First Servitude is limited by the history of Othniel. He was already a warrior when Caleb conquered his lot; he lived to deliver Israel from the Mesopotamian oppressor, and died at the end of the subsequent 40 yrs. of rest. Supposing Othniel to have been 30 yrs. old when Caleb set out, and 110 yrs. at his death, 22 yrs. would remain for the interval in question. The rule of Joshua may be therefore reckoned to have been about 13 yrs., and the subsequent interval to the First Servitude about 32 yrs., altogether 47 yrs. These numbers cannot be considered exact; but they can hardly be far wrong, more especially the sum. The residence of Samuel’s judgeship after the 20 yrs. of Eli’s death until the solemn fast and victory at Mizpeh, can scarcely have much exceeded 20 yrs. Samuel must have been still young at the time of Eli’s death, and he died very near the close of Saul’s reign (1 Sam. xxi. xxxii. 1). If he were 10 yrs. old at the former date, and judged for 20 yrs. after the victory at Mizpeh, he would have been near 90 yrs. old (19 + 20 + 29 + 38?) at his death, which appears to have been a long period of life at that time. If we thus suppose the three uncertain intervals, number of 56 pairs out of 70 souls puts us very much nearer at Caleb’s model of reckoning (2 K. xiv. 1, 7). Had the critical read Gen. xvi. 10 he would not have made this extraordinary mistake, and allowed only three wives to G. men.
the residue of Joshua’s rule, the time after his death to the First Servitude, and Sam. viii’s rule after the victory at Mizpeh to have been respectively 6, 32, and 20 yrs, the sum of the whole period will be 
(389 + 58 = 447) yrs. Two independent large numbers seem to confirm this result. One is in St. Paul’s address at Antioch of Pisidia, where, after referring to the death of Joshua and the desert, he adds: ‘And when he had destroyed seven nations in the land of Chanaan, he divided their land unto them by lot. And after that he gave [unto them] judges about the space of four hundred and fifty years, until Samuel the prophet. And afterward they desired a king’ (Acts xix. 29, 39, 21). This interval of 450 yrs. may be variously explained, as commencing with Othniel’s deliverance and ending with Eli’s death, a period which the numbers of the earlier books of the Bible, if added together, make 422 yrs., or as commencing with the First Servitude, 8 yrs. more, 430 yrs., or with Joshua’s death, which would raise these numbers by about 30 yrs., or again it may be held to end at Saul’s accession, which would raise the numbers given respectively by about 40 yrs. However, explained, this sum of 450 yrs. supports the authority of the smaller numbers as forming an essentially correct measure of the period. The other large number occurs in Jephthah’s message to the king of the Children of Ammon, where the period during which Israel had held the land of the Amorites from the first conquest even up to the beginning of the Servitude from which they were about to be freed, or up to the very time, is given as 300 yrs. (Judg. xi. 25). The smaller numbers, with the addition of 38 yrs. for two uncertain periods, would not only fit with the king’s accession, but also with his death, which is given in 2 Sam. vii. 2. Here, therefore, there appears to be another agreement with the smaller numbers, although it does not amount to a positive agreement, since the meaning might be either three centuries, as a vague sum, or about 300 yrs. So far as the evidence of the numbers goes, we must decide in favor of the longer interval from the Exodus to the building of the First Temple, in preference to the period of 480 or 440 yrs. The evidence of the genealogies has been held by some to sustain a different conclusion. These lists, as they now stand, would, if of continuous generations, be decidedly in favor of an interval of about 300, 400, or even 500 yrs, some being much shorter than others. It is, however, impossible to reduce them to consistency with each other without arbitrarily altering some, and the result with those who have followed them as the safest guides has been the adoption of the shortest of the numbers just given, about 300 yrs. The evidence of the genealogies may therefore be considered as probably leading to the rejection of all numerical statements, but as perhaps less inconsistent with that of 480 or 440 yrs. than with the rest. We have already shown (Technical Chronology) what strong reasons there are against using the Hebrew genealogies to measure time. We prefer to hold to the evidence of the numbers, and to take as the most satisfactory the interval of about 388 yrs. from the Exodus to the Foundation of Solomon’s Temple.

D. Fourth Period, from the Foundation of Solomon’s Temple to its Destruction. — We have now reached a period in which the differences of chronologers are no longer to be measured by centuries but by tens of years and even single years, and towards the close of which accuracy is attainable. The most important numbers in the Bible are generally stated more than once, and several means are afforded by which their accuracy can be tested. The principal means of these tests are the kings’ ages at their ascensions, the double dating of the ascensions of kings of Judah in the reigns of kings of Israel and the converse, and the double reckoning by the years of kings of Judah and of Nebuchadnezzar. Of these tests the most valuable is the second, which extends through the greater part of the period under consideration, and prevents our making any very serious error in computing its length. The mentions of kings of Egypt and Assyria contemporary with Hebrew sovereigns are also of importance, and are likely to be more so, when, as we may expect, the chronological places of all these contemporaries are more nearly determined. All records therefore tending to fix the chronologies of Egypt and Assyria, as well as of Babylonia, are of great value from their bearing on Hebrew chronology. At present the most important of such records is Ptolemy’s Canon, from which no sound chronologist will venture to deviate. If all the Biblical evidence is carefully collected and compared, it will be found that some small and great inconsistencies necessitate certain changes of the numbers. The amount of the former class, however, been much exaggerated, since several supposed inconsistencies depend upon the non-recognition of the mode of reckoning regnal years, from the commencement of the year and not from the day of the king’s accession. The greater difficulties and some of the smaller cannot be resolved without the supposition that numbers have been altered by copyists. In these cases our only resource is to propose an emendation. We must never take refuge in the idea of an interregnum, since it is a much more violent hypothesis, considering the facts of the history, than the conjectural change of a number. Two interregnum have however been supposed, one of 11 yrs. between Jeroboam I and Zachariah, and the other, of 9 yrs between Pekah and Hoshea. The former supposition might seem to receive some support from the words of the prophet Hosea (x. 3, 7, and perhaps 15), which, however, may as well imply a lax government, and the great power of the Isrealite princes and captains, as an absolute anarchy, and we must remember the impracticality of a powerful sovereign not having been at once succeeded by his son, and of the people having been content to remain for some years without a king. It is still more unlikely that in Hoshea’s case a king’s murderer should have been able to take his place after an interval of 0 yrs. We prefer in both cases to propose a longer reign of the earlier of the two kings between whom the interregnums are con jected. With the exception of these two interregnums, we would accept the computation of the interval we are now considering given in the margin of the A. V. It must be added, that the date of the conclusion of this period there given n. c. 588 must be corrected to 586. The received chronology as to its intervals cannot indeed be held to be beyond question in the time before Josiah’s acces-

**a** Bth Bunsen (Egyp’s Place, i. 175-77 and Lex. Apol. (ch. d., 6. 3 19) suppose the genealogy of Saul the son of Nahsh the Levite (1 Chr. vi. 22-24).
tion up to the Foundation of the Temple, but we cannot at present attain any better positive result than that we have accepted. The whole period may therefore be held to be of about 425 yrs., that of the unvindicated kingdom 129 yrs., that of the kingdom of Judah 388 yrs., and that of the kingdom of Israel about 265 yrs. It is scarcely possible that these numbers can be more than a very few years wrong, if at all. (For a fuller treatment of the chronology of the kings, see I. vol. VIII. Kingdon, ed., and Innsen, I. vol. XIV.)

E. Fifth Period, from the Destruction of Solomon's Temple to the Return from the Babylonish Captivity.—The determination of the length of this period depends upon the date of the return to Palestine. The decree of Cyrus leading to that event was made in the 1st year of his reign, doubtless at Babylon (Ezr. i. 1), n. 588, but it does not seem certain that the Jews at once returned. So great a migration must have occupied much time, and about two or three yrs. would not seem too long an interval for its complete accomplishment after the promulgation of the decree. Two numbers, held by some to be identical, must here be considered. One is the period of 70 yrs., during which the tyranny of Babylon over Palestine and the East generally was to last, prophesied by Jeremiah (xxv.), and the other, the 70 yrs. Captivity (xxix. 40; 2 Chr. xxxv. 21; Dan. ix. 2). The commencement of the former period is plainly the 1st year of Nebuchadnezzar and 4th of Jehoiakim (Jer. xxv. 1), when the successes of the king of Babylon began (xvi. 2), and the miseries of Jerusalem (xxv. 24), and the conclusion, the fall of Babylon (ver. 26). Prophetic Canon counts from the accession of Nebuchadnezzar to that of Cyrus 66 yrs., a number sufficiently near to the round sum of 70, which may indeed, if the yrs. be of 360 days (Ver.) represent at the utmost no more than about 68 tropical years. The famous 70 yrs. of captivity would seem to be the same period as this, since it was to terminate with the return of the captives (Jer. xxv. 10). The two passages in Zech., which speak of such an interval as one of desolation (i. 12), and during which fasts connected with the last captivity had been kept (vii. 5), are not irreconcilable with this explanation: a famous past period might be spoken of, as the moderns speak of the Thirty Year War. These two passages are, it must be noticed, of different dates, the first of the 2d year of Darius Hyugas, the second of the 4th year. This period we consider to be of 48 + x yrs., the doubtful number being the time of the reign of Cyrus before the return to Jerusalem, probably a space of about two or three years.

Principal Systems of Biblical Chronology.—Upon the data we have considered three principal systems of chronology have been founded, which may be termed the Long System, the Short, and the Rabbinical. There is a fourth, which, although an offshoot in part of the last, can scarcely be termed Biblical, inasmuch as it depends for the most part upon theories, not only independent of, but repugnant to the Bible: this last is at present peculiar to Baron Bunsen. Before noticing these systems it is desirable to point out some characteristics of those who have supported them, which may serve to aid our judgment in seeing how far they are trustworthy guides. All, or almost all have erred in the side of claiming for their results a greater accuracy than the nature of the evidence upon which they rested rendered possible. Another failing of these chronologers is a tendency to accept, through a kind of false analogy, long or short numbers and computations for intervals, rather according as they have adopted the long or the short reckoning of the patriarchal genealogies than on a consideration of special evidence. It is as though they were resolved to make the sum as great or as small as possible. The Rabbis have in their chronology afforded the strongest example of this error, having so shortened the intervals as even egreciously to throw out the dates of the time of the Persian rule. The German school is here an exception, for it has generally fallen into an opposite extreme and required a far greater time than any derivable from the Biblical numbers for the earlier ages, while taking the Rabbinical date of the Exod., and so has put two portions of its chronology in violent contrast. We do not lay much stress upon the opinions of the early Christian writers, or even Josephus: their method was uncertain, and they accepted the numbers best known to them without any feeling of doubt. We shall therefore confine ourselves to the moderns.

The principal advocates of the Long Chronology are Jackson, Hales, and Des-Vignes. They take the L.N.X. for the patriarchal generations, and adopt the long interval from the Exodus to the Foundation of Solomon's Temple. The Short Chronology has had a multitude of illustrious supporters owing to its having been from Jerome's time the recognized system of the West. Usher may be considered as its most able advocate. He follows the Hebrew in the patriarchal generations, and takes the 480 yrs. from the Exodus to the Foundation of Solomon's Temple. The Rabbinical Chronology has lately come into much notice from its partial reception, chiefly by the German school. It accepts the Biblical numbers, but makes the most arbitrary corrections. For the date of the Exodus it has been virtually accepted by Bunsen, Lepsins, and Lord A. Herv. The system of Bunsen we have been compelled to constitute a fourth class of itself. For the time before the Exodus he discards all Biblical chronological data, and reasons altogether, as it appears to us, on philological considerations. The following table exhibits the principal dates according to these writers.

The principal disagreements of these chronologers, besides those already indicated, must be noticed. In the post-diluvian period Hales rejects the 5th year of Jehoiakim's captivity, 1290, 2541 (Jer. i.), or 2572 (b.), falling according to the rendering of the Aug. in the 1st year of Otho-Meroerokh (ii. 31: 2 K. xxv. 27), may be explained, as Dr. Hincks suggests, either by supposing the Heb. "in the year when he was king," to mean that he reigned but one year instead of two, as in the cœnus, or that Otho-Meroerokh is not the Anemodannes of the cœnus (Journ. Soc. Le. Oct. 1808).
second Caiman and reclaims Terah's age at Abram's birth (136) instead of 70 years; Jackson accepts the second Caiman and does not make any change in the second case; Ussher and Petavius follow the Hebrew, but the former alters the generation of Terah, while the latter does not. Bunsen requires it for the Neochian period about ten millennia before our era, and for the beginning of our race another ten thousand years, or very little more" (Outline, vol. ii. p. 12). These conclusions necessitate the abandonment of all belief in the historical character of the Biblical account of the times before Abraham. We cannot here discuss the grounds upon which they seem to be founded: it may be stated, however, that those grounds may be considered to be wholly philosophic. The writer does indeed speak of "facts and traditions" his facts, however, as far as we can perceive, are the results of a theory of language, and tradition is, from its nature, no guide in chronology. How far language can be taken as a guide is a very hard question. It is, however, certain that no Semitic scholar has accepted Bunsen's theory. For the time from the Exodus to the Foundation of Solomon's Temple, Ussher alone takes the 430 years; the rest, except Bunsen, adopt longer periods according to their explanations of the other numbers of this interval; but Bunsen calculates by generations. We have already seen the great risk that is run in adopting Hebrew genealogies for the measure of time, both generally and in this case. The period of the Kings, from the foundation of Solomon's Temple, is very nearly the same in the computations of Jackson, Ussher, and Petavius: Hales lengthens it by supposing an interregnum of 11 years after the death of Amazek; Bunsen shortens it by reducing the reign of Manasseh from 53 to 45 years. The former theory is improbable and unceritcal; the latter is merely the result of a supposed necessity, which we shall see has not been proved to exist: it is thus needless, and in its form as unceritcal as the other.

Probable determination of dates and intervals.—Having thus gone over the Biblical data, it only remains for us to state what we believe to be the most satisfactory scheme of chronology, derived from a comparison of these with foreign data. We shall endeavor to establish on independent evidence, either exactly or approximately, certain main dates, and shall be content if the numbers we have previously obtained for the intervals between them do not greatly disagree with those thus afforded.

1. Date of the Destruction of Solomon's Temple. —The Temple was destroyed in the 19th year of Nebuchadnezzar, in the 5th month of the Jewish year (Jer. lii. 12, 13; 2 K. xvii. 8, 9). In Trol- eny's Canon, this year is current in the proleptic Julian year, b. c. 586, and the 5th month may be considered as about equal to August of that year.

2. Synchonism of Josiah and Pharaoh Necho. —The death of Josiah can be clearly shown on Biblical evidence to have taken place in the 22nd year before that in which the Temple was destroyed, that is, in the Jewish year from the spring of b. c. 608 to the spring of 607. Necho's 1st year is proved by the Apis-tablets to have been probably the Egyptian year of Josiah, but possibly not in 608-7, the expedition in opposition which Josiah fell cannot be reasonably dated earlier than Necho's 24th year, b. c. 608-7. It is important to notice that no earlier date of the destruction of the Temple than b. c. 586 can be reconciled with the chronology of Necho's reign. We have thus n. c. 608-7 for the last year of Josiah, and 638-7 for that of his accession, the former date falling within the time indicated by the chronology of Necho's reign.

3. Synchonism of Hezekiah and Tirhakah. —Tirhakah is mentioned as an opponent of Semach- eph shortly before the miraculous destruction of his army in, according to the present text, the 14th year of Hezekiah. It has been lately proved from the Apis-tablets that the 1st year of Tirhakah's reign over Egypt was the vague year current in b. c. 689. The 14th year of Hezekiah, according to the received chronology, is b. c. 713, and, if we correct it two years on account of the lowering of the date of the destruction of the Temple, b. c. 711. If (Rawlinson's Herod. vol. i. p. 479, n. 1) we hold that the expedition dated in Hezekiah's 14th year was different from that which ended in the destruction of the Assyrian army, we must still place the latter event before b. c. 685. There is, therefore, a prima facie discrepancy of at least 6 years. Bunsen (Bibehlerc, p. xcvii.) unhesitatingly reduces the reign of Manasseh from 53 to 45 years. Lipsius (Köningbuch, p. 104) more critically takes the 35 years of the LXX. as the true duration. Were an alteration demanded, it would seem best to make Manasseh's computation of his reign commence with his father's illness in preference to taking the conjectural number 45 or the very short one 35. The evidence of the chronology of the Assyrian and Babylonian kings is, however, we think, conclusive in favor of the sum of 55. In the Bible we are told that Shalmaneser laid siege to Samaria in the 4th year of Hezekiah, and that it was taken in the 6th year of that king (2 K. xiv. 9, 10). The Assyrian inscriptions indicate the taking of the city by Sargon in his 1st or 2d year, whereas we must suppose that he completed the enterprise of Shalmaneser, to whom the capture is not expressly ascribed in the Scriptures, or that he took the credit of an event which happened just before his accession. The 1st year of Sargon is shown by the inscriptions to have been exactly or nearly equal to the 1st of Meroebch-Ebdanu, Mardocampasius: therefore it was current in b. c. 721 or 720, and the 2d year, 720 or 719. This would place Hezekiah's accession b. c. 720, 725, or 724.
the 4th being the very date the Hebrew numbers give. Again, Merodach-Baladan sent messengers to Hezekiah immediately after his sickness, and therefore in about his 15th year, n. c. 710. According to Ptolemy's Canon, Mardocceanus reigned 721-710, and, according to Perosus, seized the regal power for six months before Eliafan, the Bolhsus of the Canon, and therefore in about 703, this being, no doubt, a second reign. Here the prolixity of evidence is in favor of the earlier dates of Hezekiah. Thus far the chronological data of Egypt and Assyria appear to clash in a manner that seems at first sight to present a hopeless knot, but not on this account to be rashly cut. An examination of the facts of the history has afforded Dr. Hincks what we believe to be the true explanation. Tirhakah, he observes, is not explicitly termed Pharaoh or king of Egypt in the Bible, but king of Cush or Ethiopia, from which it might be inferred that at the time of Sennacherib's disastrous invasion he had not assumed the crown of Egypt. The Assyrian inscriptions of Sennacherib mention kings of Egypt and a contemporary king of Ethiopia in alliance with them. The history of Egypt at the time, obtained by a comparison of the evidence of Herodotus and others with that of Manetho's lists, would lead to the same or a similar conclusion, which appears to be reinforced and confirmed by the prophecies of Isaiah. We hold, therefore, as most probable, that at the time of Sennacherib's disastrous expedition, Tirhakah was king of Ethiopia in alliance with the king or kings of Egypt. It only remains to ascertain what evidence there is for the date of this expedition. First, it must be noted that the warlike operations of Sennacherib recorded in the Bible have been conjectured, as already mentioned, to be those of two expeditions. The line paid by Hezekiah is recorded in the inscriptions as a result of an expedition of Sennacherib's 3d year, which, by a comparison of Ptolemy's Canon with Berosus, must be dated n. c. 700, which would fall so near the close of the reign of the king of Judah, if no alteration be made, that the supposed second expedition, of which there would naturally be no record in the Assyrian annals on account of its nonexistence, could not be placed much later. The Bible and the inscriptions are not only in agreement about the year, but are together reasonably explained by the supposition that the two expeditions were but two campaigns of the same war, a war but temporarily interrupted by Hezekiah's submission. Since the first expedition fell in n. c. 700, we have not to suppose that the reign of Tirhakah in Ethiopia commenced more than 11 years at the utmost before his accession in Egypt, a supposition which, on the whole, is far preferable to the discrediting attempts that have been made to lower the reign of Hezekiah. This would, however, necessitate a substitution of a later date in the place of the 14th year of Hezekiah for the first expedition. (See especially Dr. Hincks's paper "On the Rectifications of Sacred and Profane Chronology, which the newly-discovered Apis-tables render necessary," in the Journal of Sacred Literature, Oct. 1858; and RAWSON, JEREMIAH, 4:176-184). The synchronism of Hezekiah and Shalmanasar, Rehoboam, and Right-Phleer, Memahem and Pail, have not yet been approximatively determined on double evidence.

4. Synchonism of Rehoboam and Shishak. — The Biblical evidence for this synchonism is as follows: Rehoboam appears to have come to the throne about 249 years before the accession of Hezekiah, and therefore n. c. cir. 973. The invasion of Shishak took place in his 5th year, by this computation, 969. Shishak was already on the throne when Jeroboam fled to him from Solomon. This event happened during the building of Millo, &c., when Jeroboam was head of the workmen of the house of Joseph (1 K. xi, 26-40, see ver. 29). The building of Millo and repairing of the breaches of the city of David was after the building of the house of Pharaoh's daughter, that was constructed about the same time as Solomon's house, the completion of which is dated in his 23d year (1 K. vi. 1, 37, 38, vii. 1: 2 Chr. viii. 1). This building is recorded after the occurrences of the 24th year of Solomon, for Pharaoh's daughter remained in Jerusalem until the king had ended building his own house, and the temple, and the wall of Jerusalem round about (1 K. iii. 1), and Millo was built after the removal of the queen (ix. 24); therefore, as Jeroboam was concerned in this building of Millo and repairing the breaches, and was met "at that time" (xi. 29) by Ahijah, and in consequence had to flee from the country, the 24th or 25th year is the most probable date. Thus Shishak appears to have come to the throne at least 21 or 22 years before his expedition against Jeroboam. An inscription at the quarries of Sibiu in Upper Egypt records the cutting of stone in the 22d year of Sheshonk I., or Shishak, for constructions in the chief temple of Thebes, where we now find a record of his conquest of Judah (Cambrioll, Letters, pp. 190, 191). On these grounds we may place the accession of Shishak n. c. cir. 990. The evidence of Manetho's lists, compared with the monuments, would place this event within a few years of this date, for they do not allow us to put it much before or after 7 c. 1000, an approach to correctness which at this period is very valuable. It is not possible here to discuss this evidence in detail.

5. Exodus. — Arguments founded on independent evidence afford the best means of deciding which is the most probable computation from Biblical evidence of the date of the Exodus. A comparison of the Hebrew calendar with the Egyptian has led the writer to the following result: The civil commencement of the Hebrew year was with the new moon in the 1st month, and the 22d year of Sheshonk or Shishak, the approximate date of the Exodus obtained by the long reckoning, we find that the Egyptian vague year commenced at or about that point of time. This approximate date, therefore, falls about the time at which the vague year and the Hebrew year, as dated from the autumnal equinox, nearly or exactly coincided in their commencements. It may be reasonably supposed that the Israelites in the time of the oppression had made use of the vague year as the common year of the country, which indeed is rendered highly probable by the circumstance that they had mostly adopted the Egyptian religion (Josh. xxiv. 14; Ez. xx. 7, 8), the celebrations of which were kept according to this year. When, therefore, the festivals of the Law rendered a year virtually tropical necessary, of the kind either restored or instituted at the Exodus, it seems most probable that the vague year was fixed under Moses. If this supposition be correct, we should expect to find that the 14th day of Abib, on which fell the full moon of the Passover of the Exodus, corresponded to the 14th day of Phamenoth, in a vague year commencing about the autumnal equinox. It has been ascertained by computation that
a full moon fell on the 14th day of Phaenomenon, on Thursday, April 21st, in the year B.C. 1652. A full moon would not fall on the same day of the vague year at a shorter interval than 25 years before or after this date, while the triple coincidence of the new moon, vague year, and autumal equinox could not recur in less than 1560 vague years (Enc. Brit. 5th ed. Egypt, p. 485). The date thus obtained is but 4 years earlier than Hale's, and the interval from it to that of the Foundation of Solomon's Temple, B. C. cir. 1010, would be about 642 years, or 4 years in excess of that previously obtained from the numerical statements in the Bible. It must be borne in mind that the inferences from the calculation of great passovers also led us to about the same time. In later articles we shall show the manner in which the history of Egypt agrees with this conclusion. [Egypt: Exodus, The.] Setting aside Ussher's preference for the 480 years, as resting upon evidence far less strong than the longer computation, we must mention the principal reasons urged by Bunsen and Lepsius in support of the Rabbinical date. The reckoning by the genealogies, upon which this date rests, we have already shown to be unsafe. Several points of historical evidence are, however, brought forward by these writers as leading to or confirming this date. Of these the most important is the supposed account of the Exodus given by Manetho, the Egyptian historian, placing the event at about the same time as the Rabbinical date. This narrative, however, is, on the testimony of Josephus, who has preserved it to us, wholly devoid of authority, being, according to Manetho's own showing, a record of uncertain antiquity, and of an unknown writer, and not part of the Egyptian annals. An indication of David's name has also been supposed in the mention that the name of one of the treasure-cities built for Pharaoh by the Israelites during the oppression was Rameses (Ex. i. 11), probably the same place as the Rameses elsewhere mentioned, the chief town of a tract so called. [Rameses.] This name is the same as that of certain well-known kings of Egypt of the period to which by this scheme the Exodus would be referred. If the story given by Manetho be founded on a true tradition, the great oppressor would have been Rameses II., second king of the 19th dynasty, whose reign is variously assigned to the 14th and 13th centuries B.C. It is further urged that the first king Rameses of the Egyptian monuments and Manetho's lists is the grandfather of this king, Rameses I., who was the last sovereign of the 18th dynasty, and reigned at the utmost about 60 years before his grandson. It must, however, be observed, that there is great reason for taking the lower dates of both kings, which would make the reign of the second after the Rabbinical date of the Exodus, and that in this case both Manetho's statement must be of course set aside, as placing the Exodus in the reign of this king's son, and the order of the Biblical narrative must be transposed that the building of Rameses should not fall before the accession of Rameses I. The argument that there was no king Rameses before Rameses I. is obviously weak as a negative one, more especially as the names of very many kings of Egypt, particularly those of the period to which we assign the Exodus, are wanting. It loses almost all its force when we find that a son of Aahmes, Amenose, the head of the 18th dynasty, variously assigned to the 17th and 16th centuries B.C. bore the name of Rameses, which name from its meaning (son of Ra or the sun, the god of Helopolis, one of the eight great gods of Egypt) would almost necessarily be a not very uncommon one, and Rameses might therefore have been named from an earlier king or prince bearing the name long before Rameses I. The history of Egypt presents great difficulties to the reception of the theory together with the Biblical narrative, difficulties so great that we think they could only be removed by abandoning a belief in the historical character of that narrative: if so, it is obviously futile to found an argument upon a minute point, the occurrence of a single name. The historical difficulties on the Hebrew side in the period after the Exodus are not less serious, and have induced Bunsen to ante-date Moses' war beyond Jordan, and to compress Joshua's rule into the 40 years in the wilderness (Biblerek, i. pp. cexvi.--ix.), and so, we venture to think, to forfeit his right to reason on the details of the narrative relating to the earlier period. This compression arises from the want of space for the Judges. The chronology of the Hebrew olden days is also open to the objection brought against the longer schemes, that the Israelites could not have been in Palestine during the campaigns in the East of the Pharaohs of the 18th, 19th, and 20th dynasties, since it does not seem possible to throw those of Rameses III. earlier than Bunsen's date of the beginning of the conquest of western Palestine by the Hebrews. This question, involving that of the policies and relation of Egypt and the Hebrews, will be discussed in later articles. [Egypt; Exodus, The.] We therefore take B.C. 1652 as the most satisfactory date of the Exodus (see Duke of Northumberland's paper in Wilkinson's Anc. Egy. p. 77--81; Bunsen, Biblerek, i. pp. cxxi.--cxxxii., cxxxiii. ff.; Lepsius, Chronologie der Egytter, i. 314 ff.).

6. Date of the Commencement of the 430 years of Sojourner. -- We have already given our reasons for holding the 430 years of Sojourn to have commenced when Abraham entered Canaan, and that it does not seem certain that the Exodus was the anniversary of the day of arrival. It is reasonable, however, to hold that the interval was of 430 complete years or a little more, commencing about the time of the vernal equinox, B.C. 2082, or nearer the beginning of that proleptic Julian year. Before this date we cannot attempt to obtain anything beyond an approximate chronology.

7. Date of the Dispersion. -- Taking the LXX numbers as most probable, the Dispersion, if coincident with the birth of Pleg, must be placed B.C. cir. 2698, or, if we accept Ussher's correction of the age of Terah at the birth of Abraham, cir. 2738. We do not give round numbers, since doing so might needlessly enlarge the limits of error.

8. Date of the Flood. -- The Flood, as ending about 401 years before the birth of Pleg, would be placed B.C. cir. 3000 or 3135. The year preceding, or the 402d, was that mainly occupied by the
CHRONOLOGY

CRONONLOGY

It is most reasonable to suppose the
Necubanian colonists to have begun to spread about
three centuries after the Fune. If the Divisi
of Pely's birth be really the same as the Dispersion
after the building of the Tower, this supposed in-
ternal would not be necessarily to be lengthened,
but both the amount of the building of the Tower does not absolutely prove that all Noah's
descendants were concerned in it, and therefore
some may have previously taken their departure
from the primeval settlement. The chronology of
Egypt, derived from the monuments and Manetho,
be held by some to indicate for the foundation of
its first kingdom a much earlier period than would
be consistent with this scheme of approximate
Biblical dates. The evidence of the monuments,
however, does not seem to us to carry back this
event earlier than the latter part of the 28th cen-
tury n. c. The Assyrians and Babylonians have
not been proved, on satisfactory grounds, to have
reckoned back to so remote a time; but the evi-
dence of their monuments, and the fragments of
their history preserved by ancient writers, as in
the case of the Egyptians, cannot be reconciled with
the supposed period proposed by Eusebius. As far
as we can learn, no independent historical evidence
points to an earlier period than the middle of
the 28th century n. c. as the time of the foundation
of kingdoms, although the chronology of Egypt reaches
to about this period, while that of Babylon and other
states does not greatly fall short of the same an-

tinuity.

9. Date of the Creation of Adam. — The num-
bers given by the LXX. for the antediluvian patriarchs
would place the creation of Adam 2662 years
before the end of the Flood, or n. c. cir. 5361 or
5421.

R. S. P.

* The assignment of only 215 years to the so-
journ in Egypt (see No. 6 above) is far from meet-
ing with general acceptance. It has indeed come down from the Septuagint as the traditional theory,
but in modern times has been strongly opposed.
Of these who dissent from that view are Rosen
n-uller, Hofmann, John, Ewald, Gesenius, Winer,
Tuch, Kurtz, Delitzsch, Keil, Knobel, Kuhlich, and
many others of similar rank as scholars. On this
question the reader may consult especially, Knobel
on Ex. xii. 18 (Exeg. Handb. vi. 121), and Kurtz
(History of the Old Testament, ii. 335 ff., Eng. tr.).
There are two texts that seem quite distinct and
unexplicably. Ex. xii. 14 asserts that the abode in
Egypt was 430 years — even though we translate
"who abode in Egypt." And here is found no
manuscript variation in the Hebrew text. It is
supported by Targum Onkelos, the Syriac, and
Vulgata. The Septuagint (Codex Vatican.), how-
ever, has introduced the words "in the land of
Canaan," while the Alexandrian Codex adds also,
"and their parents." This change, though
found in the Targum Jonathan and the Samaritan
version, at once suggests, by its two-fold explana-
tion, the suspicion of an artificial emendation to
meet a difficulty. That these words, once in the
text, should have been omitted, is hardly probable
that they should have crept in to solve various diff-
culties, is quite natural. Again, Gen. xx. 13 de-
clares the future servitude and affliction, not of
Abraham, but of his seed "in a land not
their's," to be 400 years," in round numbers.
If this was what was in Ca-
man, is cut off by the statement that it should be
in a land not theirs — one land too — in strong
contrast to the repeated guaranty of the land of
Canaan (vs. 7, 8, 18) to Abraham and his seed as
their own. The inclusion of any part of Abra-
ham's own history in this period of servitude and
affliction seems forbidden by the positive assurance
of Gen. xii. 1, and his father's prophecy should be
the manifest assignment of this servitude (as Tuch remarks) to the distant future. Besides, Abra-
ham's residence in Egypt had taken place be-
fore the prophecy was uttered. The statement of
Stephen (Acts vii. 6, 7) accords with this inter-
pretation. Paul, however (Gal. iii. 17), reckons 430
years between the promise to Abraham and the
grant of the land: but it is remarked by Kurtz,
Keil, and others, that he simply conforms to the
traditional view of the synagogue and the phrase-
ology of the Septuagint, which alone was in the
hands of the Gentile readers, and because the pre-
cise length of time did not affect his argument.
It was, on any view, 430 years. (It should be
mentioned in passing that Josephus gives 400
years, Ant. ii. 9 § 1; B. J. v. 9, § 4; and 215 years,
Ant. iii. 15, § 2; comp. c. Apion. i. 379.)

The question of the meaning of the words, too

CHRONOLOGY

450
CHRONOLOGY

But the original leaves it more indefinite than our version, "a daughter of Levi, whom one bore [who was born] to him in Egypt." Here the LXX, read thus: Ὦνάτυρ Λευ, ἡ ἔτεκε τοῦτον τῆς Λευ ἐν Ἄγγελῷ, — the τοῦτο evidentely referring to Moses, Aaron, and Miriam. One Hebrew manuscript has a similar reading, "in place of Λευ."

Kurtz does not hesitate, under the circumstances (including this diversity between the Gr. and Heb.), to regard the whole clause after 11:27 as a gloss, appended by some one who understood the phrase "daughter of Levi." in a strict sense, and endeavored to soften down the improbablity by explaining that the daughter was born in Egypt. Without going this length, we venture to regard the verse in the original as not absolutely definite — although its first aspect seems to be so. Yet when we consider the vagueness of the expression used; when we remember that Levi must have been at least 135 years old at her birth if Jochhebel was his daughter; when we recall the ten or eleven generations from Ephram to Joshua; when we observe the distinctness of the declarations in Ex. xli. 40 and Gen. xvi. 13, as to the time spent in Egypt; when we remember the increase from 70 souls to 600,000 fighting men; we seem to encounter far less difficulty in fixing the time of sojourning in Egypt at 430 than at 215 years.

S. C. B.

* Literature. — Among the more recent works referring to Biblical chronology may be mentioned: Gumpach, Über den altjüdischen Kalender, zunächst in seiner Beziehung zur neuesten Geschichte, Brüssel, 1848; and Die Zeitrechnung der Bibel, Asyrie und Assyria, Heidelb., 1852; Sayyibar, Chronologia Sacra, Leipzig, 1848; Berichtigungen d. vorigen, griech., pers., ägypt., hebräischen Gesch. u. Zeitrechnung, Leipzig, 1885; and Summary of Recent Discoveries in Biblical Chronology, New York, 1857; Fausset, Sacred Chronology, Oxford, 1855; Oppert, Chronologie des Assyriens und des Babyloniens, Paris, 1857 (from the Ann. de la phil. chrétienne); Lehmann, Chron. Bestimmung der in d. Apostelgesch. Cap. 13—28 erzählten Begebenheiten (in the Theol. Stud. u. Krit. 1858, pp. 312—333); Wolff, O., Versuche, die Widersprüche in den Jahrreihen der Könige Judas's u. Isr. u. eine Differenzierung des Chron., aus verschiedenen (xx. 825—658); Bunsen, Biblewerk, Bd. i. p. eci. ff., and bd. v. (1858—60); Parker, F., Chronology, Lond., 1859; Shimuel, Our Bible Chronology ... critically examined and demonstrated, New York, 1860; — finds the end of the world A. D. 1868; Bosanquet, Assyrian and Hebrew Chronology compared (in the Journ. of the Royal. As. Soc. of Great Brit., 1864, N. S. i. 145—180); and Conspectus of Hebrew Chronology from Solomon to the Birth of Christ, Lond., (1867)?; Eich, art. Zeitrechnung, bibliograph., in Herzog's Real-Encycl. xvii. 421—471 (1864); Ruckeather, Bibliothische Chronologie, u. w. nach den bibl. u. ausserbibl. Quellen bearbeitet, Münster, 1865; Lewin, Festi Stori (from B. C. 70 to A. D. 70), Lond. 1865; and Wieseler, art. Zeitrechnung, neuestenmalische, in Herzog's Real-En-

a Epiphanius, in his Twelve Stones of the Rationale, ascribes to Chrysoprase, agate, chrysolite, chrysolita, according to some, a golden color, and found close to the walls of Babylon. Pliny makes several varieties of this name; als first is doubtless the Oriental topaz. — C. W. King.

CHUB

CHRYSOLITE (χρυσολίθος: chrysolita), one of the precious stones in the foundation of the heavenly Jerusalem (Rev. xxi. 20). It has been already stated [Beryl] that the chrysolite of the ancients is identical with the modern Oriental topaz, the tsvishish of the Hebrew Bible. There is much reason for believing that the topaz is the stone indicated by the χρυσολίθος of St. John’s vision. See Beryl. W. H.

CHRYSOPRASE (χρυσọπράσος: chryso-prasos) occurs only in Rev. xxi. 20 [in A. V. there “chrysoprasus”], as one of the precious stones mentioned in St. John’s vision. The chryso-prasos of the ancients is by some supposed to be identical with the stone now so called, namely, the apple or leek-green variety of agate, which owes its color to oxide of nickel; this stone at present is found only in Silesia; but Mr. King (Antiqu. Genus, p. 59, note) says that the true chryso-prasos is sometimes found in antique Egyptian jewelry set alternatively with bits of lapis-lazuli; it is not improbable therefore that this was the stone which was the tenth in the walls of the heavenly Jerusalem. W. H.

* The Anglo-Cized form “chryso-prasos” occurs in the margin of Ez. xxvii. 16, and xxviii. 13 (A. V.) where it stands for “agate” and “emerald” in the text, which represent different Hebrew words. See CHALCEDONY.

CHUB (צוב: Chub), a word occurring only once in the Heb., the name of a people in alliance with Egypt in the time of Nebuchadnezzar (Ez. xxx. 5). "Cush, and Phut, and Lud, and all the mingled people (צובים), and Chub, and the children of the land of the covenant, shall fall by the sword with them" (i. e. no doubt the Egyptians: see ver. 4). The first three of these names or designations are of African peoples, unless, but this is improbable, the Shemite Lud be intended by the third (see however, xxvii. 10, xxviii. 5: Is. xxvi. 19; Jer. xlii. 9): the fourth is a people on the Egyptian frontier; and the sixth applies to the remnant of the Jews who had fled into Egypt (comp. Dan. xi. 28, 30, 32, especially the last, where the covenant is not qualified as “holy”), which was prophesied to perish for the most part by the sword and otherwise in that country (Jer. xlii. 16, 17, 22, xlv. 12, 13, 14, 27, 28). This fifth name is therefore that of a country or people in alliance with Egypt, and probably of northern Africa, or of the lands near Egypt to the south. Some have proposed to recognize Chub in the names of various African places — Kũũũ, a port on the Indian Ocean (Ptol. iv. 7, § 10). Ko-Fi or Ko-Fi in Mauritania (iv. 2, § 9), and Ko-Bi or Ko-Bi in the Mareotic name in Egypt (iv. 5) — conjectures which are of no value except as showing the existence of similar names where we might expect this to have had its place. Others, however, think

b That of Solinus (iv.) exactly agrees with our Indian chrysolite: "Chryso-prasos quoque ex auro et perneco mixtam luem trahentes aque beryllorum generi agnudiuenervent."
the present Heb. text corrupt in this word. It has been therefore proposed to read שֶׁזֹּן for Nubia, as the Arab. vers. has "the people the Nubed," which might be supposed at that least one copy of the LXX. had as the first letter: one Heb. Ms. indeed reads שֶׁזֹּן (6ν. 409, ap. de Rossi). The Arab. vers. is, however, of very slight weight, and although שֶׁזֹּן might be the ancient Egyptian form or pronunciation of שֶׁזֹּן, as Winer observes (s. v.), yet we have no authority of this kind for applying it to Nubia, or rather the Nubil, the countries held by whom from Strabo's time to our own are by the Egyptian inscriptions included in Keosh or Kesh, that is, Cush: the Nubil, however, may not in the prophet's days have been settled in any part of the territory which has taken from them its name. Far better, on the score of probability, is the emendation which Hitzig proposes, שֶׁזֹּן (Begriff der Kirch, p. 129). The Lubim, doubtless the Mizratic Lelabin of Gen. x. 13; 1 Chr. i. 11, are mentioned as serving with Tushim in the army of Shishak (2 Chr. xii. 2, 3), and in that of Zerah (2 Chron. xiv. 9), who long probably was a king of Egypt, and certainly the leader of an Egyptian army (Cush; Zeran). Nahum speaks of them as helpers of Thebes, together with Phut (Phut), while Cush and Egypt were her strength iii. 8, 9); and Daniel mentions the Lubim and Tushim as submitting to or counting a conqueror of Egypt (xi. 43). The Lubim might therefore well occur among the peoples suffering in the fall of Egypt. There is, however, this objection, that we have no instance of the supposed form שֶׁזֹּן, the noun being always given in the plural — לְמוֹת. In the absence of better evidence we prefer the reading of the present Heb. text, against which little can be urged but that the word occurs nowhere else, although we should rather expect a well-known name in such a passage. R. S. P.

CHUN (חון: εἰς τὸν ἐκλεκτὸν πλανήματος; Joseph. Μακεδονία: Chun). The words of the LXX. look as if they had read Berititha, a word very like — שֶׁזֹּן — they frequently render by ἐκλεκτοῖς. 1 Chr. xvi. 8. [Bekahn.]

CHURCH (ἐκκλησία). — 1. The derivation of the word Church is uncertain. It is found in the Teutonic and Slavonic languages (Anglo-Saxon, Ger. Geist, Geche, Gegen; English, Church; Scottish, Kirk; German, Kirche; Swedish, Kyrka; Danish, Kyk; Dutch, Kerk; Swiss, Kiche; Frisian, Eirbek; Bohemian, Cyrgyz; Polish, Cyrgos; Russian, Zerkov), and answers to the derivatives of ἐκκλησία, which are naturally found in the Romance languages (French, Eglise; Italian, Chiesa; old Vulgate, Glies; Spanish, Iglesia); and by foreign importation elsewhere (Greek, Εὐλαβία, Greek, Εὐλαβία, Welsh, Eglwys; Russian, Церковь, English, Eglise). The word is generally said to be derived from the Greek κοινακίο (Waldorf Strabo, De Relbus Ecclesiast. e. 7; Suicer, s. v. κοινακίο: Glossarium, s. v. "Dominicum;" Casaubon, Extrem. Ross. xiii. § 181; Hooker, Eccle. Pol. v. xiii. 1; Pearson, On the Creed, Art. i. x. Beveridge, On the Thirty-Nine Articles, Art. xix.; Wordsworth, Thesaurus Anglicus, e. i; Geseler, Eccles. History, e. i; French, Study of Words, p. 75), but that the derivation has been too hastily assumed. The arguments in its favor are the following: (1) A similarity of sound. (2) The statement of Waldorf Strabo. (3) The fact that the word κοινακίο was undoubtedly used by Greek ecclesiastics in the sense of "a church," as proved by a reference to the Canons of the Council of Ancyra (Can. xiv., Can. xv. 2, Can. xvi.,), of Laodicea (Can. xxviii.), and of the Council in Trullo (Can. lxiv.), to Maximin's Edict (in Euseb. H. E. ix. 10), to Eunachii's Oration in praise of Constantine (c. xlvii.), to the Apostolical Constitutions (ii. 59), to Cyril of Jerusalem (Catech. xviii.), and to a similar use of "Dominium" by Cyprian, Jerome, Rufinus, etc. (4) The possibility of its having passed as a theological term from the Greek into the Teutonic and Slavonic languages. (5) The ambiguous meaning and derivation of the Ethopic word for Church, which signifies "the house of Christ." On the other hand it requires little acquaintance with philology to know that (1) similarity of sound proves nothing, and is capable of raising only the fondest presumption. (2) A medieval writer's guess at an etymology is probably founded wholly on similarity of sound, and is as worthless as the derivations with which an Augustinian scholar has disfigured (Moroni derives Chiesa from κοινακίο in his Dizionario storico-ciascisticato, and Waldair Strabo derives the words vater, matter, from the Greek through the Latin, hert from kern, moner and mouth from μόση, in the same breath as kirche from κοινακίο). (3) Although κοινακίο is bound, signifying a church," it is no more the common term used by Greeks, than Dominium is the common term used by Latins. It is therefore unlikely that it should have been adopted by the Greek missionaries and teachers, and adopted by them so decidedly as to be thrust into a foreign language. (4) Nor is there any probable way pointed out by which the importation was effected. Waldair Strabo, indeed (loc. cit.), attributes it, not obscurely, so far as the Teutonic tongues are concerned, to Lithis; and following him, Trench says (loc. cit.) that the first converted to the Christian faith, the first therefore that had a Christian vocabulary, lent the word in their turn to the other German tribes, among others to our Anglo-Saxon forefathers. "Had it been so introduced, Ulthi's "peaceful and populous colony of shepherds and herdsmen on the pictures below Mount Haunus" (Milman, i. 272), could never have adopted the language of the whole Teutonic race in all its dialects. But in matter of fact we find that the word employed by Ulthi in his version of the Scriptures is not any derivative of κοινακίο but, as we should have expected, ab Papst (Rom. xxvi. 23; 1 Cor. xvi. 19 et passim). This theory therefore falls to the ground, and with it any attempt at showing the way in which the word passed across into the Teutonic languages. No special hypothesis has been brought forward to account for its admission into the Slavonic tongues, and it is enough to say that, unless we have evidence to the contrary, we are justified in assuming that the Greek missionaries in the 9th century did not adopt a term in their intercourse with strangers, which they barely, if at all, used in ordinary conversation amongst themselves. (5) Further, there is no reason why the word should have passed into these two languages rather than into Latin. The Latin Church, however, had a Greek connection, and it introduced the Greek word for Church into the Latin tongue; but this word was not cypriacum
it was ecclesia; and the same influence would no doubt have introduced the same word into the northern languages, had it introduced any word at all. (6) Finally, it is hard to find examples of a Greek word being adopted into the Teutonic dialects, except through the medium of Latin. On the whole, the corresponding form of the word in the Teutonic languages that Strabo should have imposed it on the world so long. It is difficult to say what is to be substituted. There was probably some word which, in the language from which the Teutonic and Slavonic are descended, designated the old heathen places of religious assembly, and this word, having taken different forms in different dialects, was adopted by the Christian missionaries. It was probably connected with the Latin circus, circularis, and with the Greek κύκλος, possibly also with the Welsh cyhch, cyf, cynhych, or cor. Lipsius, who was the first to reject the received tradition, was probably right in his suggestion, "Credo et a circlo Kirch nostrum esse, quia veterum tempora instar Circus rotundae" (Epist. ad Belga, Cent. iii. Ep. 44).

II. The word ἐκκλησία is no doubt derived from ἐκκλαίω, and in accordance with its derivation it originally meant an assembly called out by the magistrates, or by legitimate authority. This is the ordinary classical sense of the word. But it throws no light on the nature of the institution so designated in the New Testament. For to the writers of the N. T. the word had now lost its primary signification, and was either used generally for any meeting (Acts xix. 32), or more particularly, it denoted (1) the religious assemblies of the Jews (Dent. iv. 19, xvii. 16, op. LXX.); (2) the whole assembly or congregation of the Israelitish people (Acts vii. 52; Heb. ii. 12; Ps. xxi. 22; Deut. xxxi. 30, op. LXX.). It was in this last sense, in which it answered to בַּשָׁבָת, that the word was adopted and applied by the writers of the N. T. to the Christian congregation. The word ἐκκλησία, therefore, does not carry us back further than the Jewish Church. It implies a resemblance and correspondence between the old Jewish Church and the recently established Christian Church, but nothing more. Its etymological sense having been already lost when adopted by and for Christians, is only misleading if pressed too far. The chief difference between the words "ecclesia" and "church," would probably consist in this, that "ecclesia" primarily signified the Christian body, and secondarily the place of assembly; while the first signification of "church" was the place of assembly, which imparted its name to the body of worshippers.

III. The Church as described in the Gospels. — The word occurs only twice, each time in Matt. (xvi. 18, "On this rock will I build my Church:" xvii. 17, "Tell it unto the Church"). In every other case it is spoken of as the kingdom of heaven by St. Matthew, and as the kingdom of God by St. Mark and St. Luke. St. Mark, St. Luke, or both, use the expression kingdom of heaven. St. John once uses the phrase kingdom of God (iii. 3). St. Matthew occasionally peaks of the kingdom of God (vi. 33, xxi. 31, 43), and sometimes simply of the kingdom (iv. 23, xiii. 19, xxiv. 14). In xii. 41 and xvi. 28, it is the Son of Man's kingdom. In xx. 21, thy kingdom, e. c. Christ's. In the one Gospel of St. Matthew the Church is spoken of no less than thirty-six times as the kingdom. Other descriptions or titles we hardly found in the Evangelists. It is Christ's household (Matt. x. 25), the salt and light of the world (x. 13, 15), Christ's flock (Matt. xxvi. 31; John x. 1), its members are the branches growing on Christ the Vine (John xvi.); but the general description of it, not metaphorically but directly, is, that it is a kingdom. In Matt. xvi. 19, the kingdom of heaven is formed in language which is identified with ἐκκλησία. From the Gospel then, we learn that Christ was about to establish his heavenly kingdom on earth, which was to be the substitute for the Jewish Church and kingdom, now doomed to destruction (Matt. xxi. 43). Some of the qualities of this kingdom are illustrated by the parables of the tares, the mustard seed, the leaven, the hid treasure, the pearl, the draw-net. The spiritual laws and principles by which it is to be governed, by the parables of the talents, the husbandmen, the wedding feast, and the ten virgins. It is not of this world though in it (John xviii. 36). It is to embrace all the nations of the earth (Matt. xvi. 19). The means of entrance into it is Baptism (Matt. xxviii. 19). The conditions of belonging to it are faith (Mark xvi. 16) and obedience (Matt. xxviii. 20). Participation in the Holy Supper is its perpetual token of membership, and the means of supporting the life of its members (Matt. xxvi. 26; John vi. 51; I Cor. xi. 26). Its members are given to Christ by the Father out of the world, and sent by Christ into the world; they are sanctified by the truth (John xvii. 19); and they are to live in love and unity, cognizable by the external world (John xiii. 34, xvi. 23). It is to be established on the Rock of Christ's Divinity, as confessed by Peter the representative (for the moment) of the Apostles (Matt. xvi. 18). It is to have authority in spiritual cases (Matt. xviii. 17). It is to be never deprived of Christ's presence and protection (xxviii. 20), and to be never overthrown by the power of hell (xvi. 18).

IV. The Church as described in the Acts and in the Epistles — Its Origin, Nature, Constitution, and Growth. — From the Gospels we learn little in the way of detail as to the kingdom which was to be established. It was in the very first forty days that intervened between the Resurrection and the Ascension that our Lord explained specifically to his Apostles the things pertaining to the kingdom of God" (Acts i. 3), that is, his future Church. Its Origin. — The removal of Christ from the earth had left his followers a scattered company with no bond of external or internal cohesion, except the memory of the Master whom they had lost, and the recollection of his injunctions to unity and love, together with the occasional glimpses of his presence which were vouchsafed them. They continued together, meeting for prayer and supplication, and waiting for Christ's promise of the gift of the Holy Ghost. They numbered in all some 140 persons, namely, the eleven, the faithful women, the Lord's mother, his brethren, and 120 disciples. They had faith to believe that there was a work before them which they were about to be called to perform; and that they might be ready to do it, they filled up the number of the Twelve by the appointment of Matthias "to be a true witness" with the eleven of the Resurrection." The Day of Pentecost is the birth-day of the Christian Church. The Spirit, who was then sent by the Son from the Father, and rested on each of the Disciples, combined them once more into a whole — combined them as they never had before been combined, by an internal and spiritual bond of cohesion. Before
CHURCH

they had been, individual followers of Jesus, now they became his mystical body, animated by his Spirit. The nucleus was formed. Agglomeration and development would do the rest.

Its Nature. — St. Luke explains its nature by describing in narrative form the characteristics of the society formed by the union of the original 120 Disciples with the 3000 souls who were converted on the Day of Pentecost. “Then they that gladly received his word were baptized, . . . And they continued steadfastly in the Apostles’ doctrine and fellowship, and in breaking of bread and in prayers” (Acts ii. 41). Here we have indirectly exhibited the essential conditions of Church Communion. They are (1) Baptism, Baptism implying on the part of the recipient repentance and faith; (2) Apostolic Doctrine; (3) Fellowship with the Apostles; (4) the Lord’s Supper; (5) Public Worship. Every requisite for church-membership is here enumerated not only for the Apostolic days, but for future ages. The conditions are exclusive as well as inclusive, negative as well as positive. St. Luke’s definition of the Church, then, would be the congregation of the baptized, in which the faith of the Apostles is maintained, connection with the Apostles is preserved, the Sacraments are duly administered, and public worship is kept up. The earliest definition (virtually) given of the Church is likewise that which St. Paul adopts in his day. He imparts the name of “The Church” (the first time that the word is used as denoting an existing thing), and to it, constituted as it was, he states that there were daily added of σωτηρίας (ii. 47). By this expression he probably means those who were “saving themselves from their own sedition” (τι μετανοείν), were “saved,” added, however, “to the Church” not by their own mere volition, but “by the Lord,” and so became the elect people of God, sanctified by his Spirit, and described by St. Paul as “delivered from the power of darkness and translated into the kingdom of his dear Son” (Col. i. 13). St. Luke’s treating the Church of the earliest, not dogmatically, he does not directly enter further into the essential nature of the Church. The community of goods, which he describes as being universal amongst the members of the infant society (τι μετανοείν, iv. 42), is specially declared to be a voluntary practice (κοινονία), and as a necessary duty of Christians as such (comp. Acts ix. 36, 30, xi. 29).

From the illustrations adopted by St. Paul in his Epistles, we have additional light thrown upon the nature of the Church. Thus (Rom. xi. 17), the Christian Church is described as being a branch grafted on the already existing olive-tree, showing that it was no new creation, but a development of that spiritual life which had flourished in the Patriarchal and in the Jewish Church. It is described (Rom. xii. 4; I Cor. xii. 12) as one body made up of many members with different offices, to exhibit the close cohesion which ought to exist between Christian and Christian; still more it is described as the body, of which Christ is the Head (Eph. i. 22), so that members of his Church are members of Christ’s body, of his flesh, his bone (Eph. v. 31, 32; Col. ii. 19). In short, Christ is the head union between Christ and his people; again, as the temple of God built upon the foundation-stone of Jesus Christ (1 Cor. iii. 11), and by a slight change of metaphor, as the temple in which God dwells by his Spirit, the Apostles and prophets forming the foundation, and Jesus Christ the chief cornerstone, i.e., probably the foundation corner-stone (Eph. ii. 20). It is also the city of the saints and the household of God (Eph. ii. 19). But the passage which is most illustrative of our subject in the Epistles is Eph. iv. 3, 6. "Endeavoring to keep the unity of the Spirit in the bond of peace. There is one body, and one Spirit, even as ye are called in one hope of your calling; one Lord, one faith, one baptism, one God and Father of all, who is above all, and through all, and in you all." Here we see what it is that constitutes the unity of the Church in the mind of the Apostle: (1) unity of Headship, “one Lord;” (2) unity of belief, “one faith;” (3) unity of Sacraments, “one baptism;” (4) unity of hope of eternal life, “one hope of your calling” (comp. Tit. i. 2); (5) unity of love, “unity of the Spirit in the bond of peace;” (6) unity of organization, “one body.” The Church, then, at this period was a body of baptized men and women who believed in Jesus as the Christ, and in the redemption made by Him, who were united by having the same faith, hope, and animating Spirit of love, the same Sacraments, and the same spiritual invisible Head.

What was the Constitution of this body? — On the evening of the Day of Pentecost, the 3,140 members of which it consisted were (1) Apostles, (2) previous disciples, (3) converts. We never afterwards find any distinction drawn between the Apostles and the other men who were converted. They were uniformly said to be Apostles throughout stand apart. Here, then, we find two classes, Apostles and converts — teachers and taught. At this time the Church was not only morally but actually one congregation. Soon, however, its numbers grew so considerably that it was a physical impossibility that all its members should come together in one spot. It became, therefore, an aggregate of congregations. But its essential unity was not affected by the accidental necessity of meeting in separate rooms for public worship; the bond of cohesion was still the same. The Apostles, who had been closest to the Lord Jesus in his life on earth, would doubtless have formed the centres of the several congregations of hearing believers, and besides attending at the Temple for the national Jewish prayer (Acts iii. 11), and for the purpose of teaching (iv. 42), they were the great itinerant preachers to whom the converts assembled "teaching and preaching," and "breaking bread," and "distributing" the common goods "as each had need" (vi. 46, iv. 35, v. 42). Thus the Church continued for apparently some seven years, but at the end of that time the "number of disciples was so greatly multiplied" (Acts vi. 1) that the Twelve Apostles found themselves to be too few to carry out these works united. They therefore for the first time exercised the powers of mission intrusted to them (John xvi. 21), and by laying their hands on the Seven who were recommended to them by the general body of Christians, they appointed them to fulfill the secular task of distributing the common stock, which they had themselves hitherto performed, retaining the functions of praying, and preaching, and administering the sacraments in these new works. They thereby for the first time least answered what the office of these Seven is to be identified with that of the διάκονοι elsewhere found. They are not called deacons in Scripture, and it has been supposed by some that they were extraordinary officers appointed for the occasion to see that the Hellenistic widows had their fair share of the goods distributed amongst the
poor believers, and that they had no successors in their office. If this be so, we have no account given us of the institution of the Deaconate: the Deacons, like the Presbyters, are found existing, but the circumstances under which they were brought into existence were not recorded. We must look to the other hypothesis, which makes the Seven the originals of the Deacons. Being found apt to teach, they were likewise invested, almost immediately after their appointment, with the power of preaching to the unconverted (vi. 10) and of baptizing (viii. 38). From this time, therefore, or from about this time, there existed in the Church — (1) the Apostles; (2) the Deacons and Evangelists; (3) the Priests; (4) the Bishop and the Presbyters. After the first Church-officer till the year 44, seven years after the appointment of the deacons. We find that there were then in the Church of Jerusalem officers named Presbyters (xi. 30) who were the assistants of James, the chief administrator of that Church (xii. 17). The circumstances of their first appointment are not recorded. No doubt they were similar to those under which the Deacons were appointed. As in the case of Titus, it appears that the whole work of the ministry was too great for them, and they therefore placed a portion of it, namely, distributing alms to the brethren and teaching Christ to the heathen, on the deacons, so a few years later they would have found that what they still retained was yet growing too burdensome, and consequently they devolved another portion of their ministerial authority on another order of men. The name of Presbyter or Elder implies that the men selected were of mature age. We gather incidentally that they were ordained by Apostle or other authority (xiv. 23, Tit. i. 5). We find them associated with the Apostles as distinguished from the main body of the Church (Acts xii. 24, 4), and again as standing between the Apostles and the brethren (xxv. 23). Their office was to pasture the Church of God (xx. 28), to rule (1 Tim. v. 17) the flock over which the Holy Ghost had made them overseers or bishops (Acts xxv. 28; Phil. i. 1; 1 Tim. iii. 1, 2; Tit. i. 7), and to pray with and for the members of their congregations (James v. 14). Thus the Apostles would seem to have invested these Presbyters with the full powers which they themselves exercised, excepting only in respect to those functions which they discharged in relation to the general regimen of the whole Church as distinct from the several congregations which formed the whole body. These functions they still reserved to themselves. By the year 44, therefore, there were in the Church of Jerusalem — (1) the Apostles holding the government of the whole body in their own hands; (2) Presbyters invested by the Apostles with authority for conducting public worship in each congregation; (3) Deacons or Evangelists similarly invested with the lesser power of preaching and of baptizing unbelievers, and of distributing the common goods among the brethren. The same order was established in the Gentile Churches founded by St. Paul, the only difference being that those who were called Presbyters in Jerusalem bore indiscriminately the name of Bishops (Phil. i. 1; 1 Tim. iii. 1, 2; Tit. i. 7) and of Presbyters (1 Tim. v. 17; Tit. i. 5) elsewhere. It was in the Church of Jerusalem that another order of the ministry found its exemplar. The Apostles, we find, remained in Jerusalem (Acts viii. 1) or in the neighborhood (viii. 14) till the persecution of Herod Agrippa in the year 44. The death of James, the son of Zebedee, and the imprisonment and flight of Peter, were the signal for the dispersion of the Apostles. One remained behind — James the brother of the Lord, whom we identify with the Apostle, James the son of Alphæus [James the Less]. He had not witnessed the death of James, or at least not till it was reported, but his Judicial asceticism and general character would have made him an object of popularity with his countrymen, and even with the Pharisaical Herod. He remained unmolested, and from this time he is the acknowledged head of the Church of Jerusalem. A consideration of Acts xii. 17, xv. 13, 19, xxi. 18; Gal. ii. 2, 9, 12; will remove all doubt on this head. In the Acts, before Herod had put them to death, it would seem, on a level with Peter (Gal. i. 18, 19; Acts ix. 27), and it has been thought that he received special instructions for the functions which he had to fulfill from the Lord himself (1 Cor. xviii. 7; Acts i. 3). Whatever his preeminence was, he appears to have borne no special title indicating it. The example of the Mother Church of Jerusalem was again followed by the Pauline Churches. As in Jerusalem, so in the second instance, Timothy and Titus had the title, but it is impossible to read the Epistles addressed to them without seeing that they had an authority superior to that of the ordinary bishops or priests with regard to whose conduct and ordination St. Paul gives them instruction (1 Tim. iii., v. 17, 19; Tit. i. 5). Thus, we then, see that where the Apostles were themselves able to superintend the Churches which they had founded, the Church in question consisted of — (1) Apostles; (2) Bishops or Priests; (3) Deacons and Evangelists. When the Apostles were unable to give personal superintendence, they delegated that power which they had in common to one of themselves, as in Jerusalem, or to one in whom they had confidence, as at Ephesus and in Crete. As the Apostles died off, these Apostolic Delegates necessarily multiplied. By the end of the first century, when St. John was the only Apostle that now survived, they would have been established in every country, as Crete, and in every large town where there were several bishops or priests, such as the seven towns of Asia mentioned in the book of Revelation. These superintendents appear to be addressed by St. John under the name of Angels. With St. John's death the Apostolic College was extinguished, and the Apostolic Delegates or Angels were left to fill their places in the government of the Church, not with the full unrestricted power of the Apostles, but with authority only to be exercised in limited districts. In the next century we find that these officers bore the name of Bishops, while those who in the first century were called indifferently Presbyters or Bishops had now only the title of Presbyters. We conclude, therefore, that the title bishop was gradually dropped by the second order of the ministry, and applied specifically to those who represented what James, Timothy, and Titus had been in the Apostolic age. Thenobret says expressly, "The same persons were anciently called promiscuously both bishops and presbyters, whilst those who are now called bishops were called apostles, but shortly after the name of apostle was appropriated to such as were apostles indeed, and then the name bishop was given to those before called apostles." (Comm. in 1 Tim. iii. 1). There are other names found in the Acts and in the Epistles which the light thrown backward by early ecclesiastical history showed has to have been the titles of those who exercised func
The history of the growth of the Church, so far as we know it, is identical with the history of St. Paul. In his three journeys he carried Christianity through the chief cities of Asia Minor and Greece. His method appears almost invariably to have been this: he presented himself on the Sabbath at the Jewish synagogue, and having first preached the doctrine of a suffering Messiah, he next identified Jesus with the Messiah (xviii. 3). His arguments on the first head were listened to with patience by all; those on the second point wrought conviction in some (xviii. 4), but raised the rest to persecute him (xvii. 5). On finding his words rejected by the Jews, he turned from them to the Gentiles (xviii. 6, xxviii. 28). His captivity in Rome, A. D. 63-65, had the effect of forming a Church out of the Jewish and Greek residents in the imperial city, who seem to have been joined by a few Italians. His last journey may have spread the Gospel westward as far as Spain (Rom. xv. 28; Clemens, Euchesis, Jerome, Chrisostom). The death of James at Jerusalem and of Peter and Paul at Rome, A. D. 67, leaves one only of the Apostles presented distinctly to our view. In the year 70 Jerusalem was captured, and before St. John fell asleep in 98, the Petrine and Pauline converts, the Churches of the circumcision and of the circumcision, had melted into one harmonious and accordant body, spreading in scattered congregations at the least from Babylon to Spain, and from Macedonia to Africa. How far Christian doctrine may have penetrated beyond these limits we do not know.

**Further Growth.** As this is not an ecclesiastical history, we can but glance at it. There were three great impulses which enlarged the borders of the Church. The first is that which began on the day of Pentecost, and continued down to the conversion of Constantine. By this the Roman Empire was converted to Christ, and the Church was, speaking roughly, made conterminous with the civilized world. The second impulse gathered within her borders the l ith ier dur karunon nations formed by the Teton and Celtic tribes, thus winning, or in spite of the overthrow of the Empire, retaining the countries of France, Scotland, Ireland, England, Lombardy, Germany, Denmark, Sweden, Norway. The third impulse gathered in the Slavonian nations. The first of these impulses lasted to the fourth century: the second to the ninth century: the third (beginning in the eleventh century) had reference to the tenth and eleventh centuries. We do not reckon the Nestorian missionary efforts in the seventh century in Syria, Persia, India, and China, nor the post-Reformation exertions of the Jesuits in the East and West Indies, for these attempts have produced no permanent results. Nor, again, do we speak of the efforts now being made in Africa, India, Australia, New Zealand, because it has not yet been shown that except perhaps in the case of New Zealand, whether they will be successful in bringing these countries within the fold of Christ.

**III. The Church in its Constitution.** — We have said that ecclesiastical authority resided (1) in the Apostles; (2) in the Apostles and the Deacons; (3) in the Apostles, the Presbyters, and the Deacons; (4) in the Apostolic Delegates, the Presbyters, and the Deacons; (5) in the Apostles, the Apostolic Delegates, the Presbyters, and the Deacons. And to these successors of the Apostolic Delegates came to be appropriated the title of Bishop, which was originally applied to Presbyters. At the commencement of the second century and thenceforward Bishops, Presbyters, and Deacons are the
sisters of the Church wherever the Church existed. Ignatius's Epistles (in their unadulterated form), and the other records which are preserved to us, are on this point decisive. (See Pearson's Vindication Ignatianæ, pars ii. c. xii. p. 534, ed. Charton.) Bishops were looked upon as Christ's Vicegerents (Cyprian, Ep. 15 (or 69) with ligitation's notes), and also as exarchæ of the Church (Cyprian, Ep. 69 (or 68) and 42 (or 45), Firmilian, Jerome), every bishop's see being entitled a "sedes apostolica." They retained in their own hands authority over presbyters and the function of ordination, but with respect to each other they were equals, whether their see was "at Rome" or at Ephesus."

Within this equal college of bishops there soon arose difference of rank though not of order. Below the city-bishops there sprang up a class of country-bishops (chorépiscopi) answering to the archdeaconies of the English Church, except that they had received episcopal consecration (Hampden, Beveridge, Cave, Ringham), and were enabled to perform some episcopal acts with the sanction of the city-bishops. Their position was ambiguous, and in the fifth century they began to decay and gradually died out. Above the city-bishops there were, in the second century apparently, Metropolitans, and in the third, Patriarchs or Exarchs. The metropolitan was the chief bishop in the civil division of the empire which was called a province (σαραγος). His see was at the metropolis of the province, and he presided over his suffragans with authority similar to, but greater than, that which is exercised in their respective provinces by the two archbishops in England. The authority of the patriarch or exarch extended over the still larger division of the civil empire which was called a diocese. The ecclesiasticum was framed in accord with the exigencies and after the model of the civil polity. When Constantine, therefore, divided the empire into 13 dioceses, "each of which espoused the just measure of a powerful kingdom" (Gibbon, c. xvii.), the Church came to be distributed into 13 (including the city and neighborhood of Rome, 14) diocesan, or, as we should say, national, churches. There was no external bond of government to hold these churches together. They were independent self-governed, combined together into one greater whole by having one invisible Head and one animating Spirit, by maintaining each the same faith and exercising each the same discipline. The only authority which they recognized as capable of controlling their separate action, was that of an Ecumenical Council composed of delegates from each; and these Councils passed canon after canon forbidding the interference of the bishop of any one diocese, that is, district, or country, with the bishop of any other diocese. "Bishops outside a diocese are not to invade the Churches across the borders, nor bring confusion into the Churches," says the second canon of the Council of Constantine, "lest," says the eighth canon of the Council of Ephesus, "the pride of worldly power be introduced under cover of the priestly functions, and by little and little we be deprived of the liberty which our Lord Jesus Christ, the deliverer of all men, has given us by his own blood." But there was a stronger power at work than any which could be controlled by canons. Rome and Constantinople were each the seats of imperial power, and symptoms soon began to appear that the patriarchs of the imperial cities were rival claimants of imperial power in the Church. Rome was in a better position for the struggle than Constantinople, partly because of being Old Rome, she was also of Apostolic foundation. Constantinople could not boast an Apostle as her founder, and she was but New Rome. Still the imperial power was strong in the East when it had fallen in the West, and furthermore the Council of Chalcedon had so far dispensed with the canons and with precedent in respect to Constantinople as to grant the patriarchal jurisdiction over three dioceses, to establish a right of appeal to Constantinople from any part of the Church, and to confirm the decree of the second Council, which elevated the see of Constantinople above that of Alexandria and of Antioch. It was by the Pope of Constantinople that the first overt attempt at erecting a Papal Monarchy was made; and by the Pope of Rome, in consequence, it was fiercely and indignantly denounced. John of Constantinople, said Gregory the Great, was destroying the patriarchal system of government (lib. v. 43; ix. 68); by assuming the profane appellation of Universal Bishop he was anticipating Antichrist (lib. vii. 27, 32), invading the rights of Christ, and initiating the Devil (lib. v. 18). John of Constantinople failed. The successors of Gregory adopted as their own the claims which John had not been able to assert, and on the basis of the False Decretals of Bishops, and of Gratian's Decretum, Nicholas I., Gregory VII., and Innocent III. reared the structure of the Roman in place of the Constantinopolitan Papal Monarchy. From this time the federal character of the constitution of the Church was overthrown. In the West it became wholly despotic, and in the East, though the theory of aristocratical government was and is maintained, the still -cherished title of Ecumenical Patriarch indicates that it is weakness which has prevented Constantinople from erecting at least an Eastern if she could not an Universal Monarchy. In the sixteenth century a further change of constitution occurred. A great part of Europe revolted from the Western despotism. The Churches of England and Sweden returned to, or rather retained, the episcopal form of government after the model of the first centuries. In parts of Germany, of France, of Switzerland, and of Great Britain, a Presbyterian, or still less defined form was adopted, while Rome tightened her hold on her yet remaining subjects, and by destroying all peculiarities of national liturgy and custom, and by depressing the order of bishops except as interpreters of her decrees, converted that part of the Church over which she had sway into a jealous centralized absolutism.

VI. The existing Church.—Its members fall into three broadly-marked groups, the Greek Churches, the Latin Churches, the Eastern Churches. The Orthodox Greek Church consists of the Patriarchate of Constantinople with 135 sees, of Alexandria with 4 sees, of Antioch with 18 sees, who were to act under the bishops of the diocese in which they were situated.
of Jerusalem with 13 sees, of the Russian Church with 65 sees; besides which, there are in Cyprus 3 sees, in Austria 11 sees, in Mount Sinai 1 see, in Montenegro 1 see, in Greece 24 sees. To these must be added, (1.) the Nestorian or Chaldean Church, once spread from China to the Tigris, and from Lake Balkal to Cape Comorin, and ruled by twenty-five Metropolitans and a Patriarch possessing a plenitude of power equal to that of Innocent III. (Nole, Eastern Church, i. 144), but now shrunk to 16 sees. (2.) The Christians of St. Thomas under the Bishop of Mahabar. (3.) The Syrian Jacobites under the Patriarch of Antioch resident at Caramant or Diarbekir. (4.) The Maronites with 9 sees. (5.) The Copts with 13 sees. (6.) The savage, but yet Christian Abyssinians, and (7.) the Armenians, the most intelligent and active minded, but at the same time the most distracted body of Eastern believers.

The Latin Churches are those of Italy with 262 sees, of Spain with 54, of France with 81, of Portugal with 17, of Belgium and Holland with 11, of Austria with 64, of Germany with 24, of Switzerland with 5. Besides these, the authority of the Roman See is acknowledged by 63 Asiatic bishops, 10 African, 136 American, 43 British, and 36 Prelates scattered through the countries where the Church of Greece is predominant.

The Eastern Churches constitute the Anglican communion with 48 sees in Europe, 51 in Canada, America, and the West Indies, 8 in Asia, 8 in Africa, and 15 in Australia and Oceania; of the Church of Norway and Sweden, with 17 sees; of the Churches of Denmark, Prussia, Holland, Scotland, and scattered congregations elsewhere. The members of the Greek Churches are supposed to number 80,000,000; of the Teutonic and Protestant Churches 96,000,000; of the Latin Churches 176,000,000; making a total of 25 per cent. of the population of the globe.

VII. Definitions of the Church.—The Greek Church gives the following: "The Church is a divinely instituted community of men united by the orthodox faith, the law of God, the hierarchy, and the Sacraments" (Fall Creathion of the Orthodox, Catholic, Eastern Church, Moscow, 1839). The Latin Church defines it "the company of Christians, of the profession by the profession of the same faith and the communion of the same sacraments, under the government of lawful pastors, and especially of the Roman bishop as the only Vicar of Christ upon earth" (Bellarm. De Eccl. Fili. iii. 2; see also Devoti Inst. Comm. i, § iv., Romae, 1818). The Church of England, "a congregation of faithful men in which the pure word of God is preached, and the Sacraments be duly ministered according to Christ's ordinance in all these things that of necessity are requisite to the same" (Art. xiv.). The Lutheran Church, "a congregation of saints in which the Gospel is rightly taught and the sacraments rightly administered" (Confessio Augustana, 1631, Art. vii.). The Confesso Helvetica, "a congregation of faithful men called, or collected out of the world, the communion of all saints" (Art. xvii.). The Confesso Saxoniae, "a congregation of men, enbracing the Gospel of Christ, and rightly using the Sacraments" (Art. xii.). The Confesso Belgica, "a true congregation, or assembly of all faithful Christians who look for the whole of their salvation from Jesus Christ alone, as being washed by his blood, and sanctified and sealed by his Spirit" (Art. xxvii.).

These definitions show the difficulty in which the different sections of the divided Church find themselves in framing a definition which will at once accord with the statements of Holy Scripture, and be applicable to the present state of the Christian world. We have seen that according to the Scriptural view the Church is a holy kingdom, established by God on earth, of which Christ is the invisible King—it is a divinely organized body, the members of which are knit together amongst themselves, and joined to Christ their Head, by the Holy Spirit, who dwells in and animates it; it is a spiritual but visible society of men united by constant succession to those who were personally united to the Apostles, holding the same faith that the Apostles held, administering the same sacraments, and like them forming separate, but only locally separate, assemblies, for the public worship of God. This is the Church according to the Divine intention. But as God permits men to mar the perfection of his designs in their behalf, and as men have both corrupted the doctrines and broken the unity of the Church, we must not expect to see the Church of Holy Scripture actually existing in its perfection on earth. It is not to be found, thus perfect, either in the collected fragments of Christendom, or still less in any one of these fragments; though it is possible that one of these fragments might, or another may approach the Scriptural and Apostolic ideal which existed only until sin, heresy, and schism, had time sufficiently to develop themselves to do their work. It has been questioned by some whether Hooker, in his anxious desire after charity and liberality, has not founded his definition of the Church upon too wide a basis; but it is certain that he has pointed out the true principle on which the definition must be framed (Eccl. Pol. v. 68, 6). As in defining a man, he says, we pass by those qualities wherein one man excels another, and take only those essential properties whereby a man differs from creatures of other kinds, so in defining the Church, which is a technical name for the professors of the Christian religion, we must fix our attention solely on that which makes the Christian religion differ from the religions which are not Christian. This difference is constituted by the Christian religion having Jesus Christ, his divinity, his atonement, his mystical Body, or Visible and Invisible, and by the plot of its contemplations and the motive of its actions. The Church, therefore, consists of all who acknowledge the Lord Jesus Christ the blessed Saviour of mankind, who give credit to his Gospel, and who hold his sacraments, the seals of eternal life, in honor. To go further, would be not to define the Church by that which makes it to be what it is, i.e. to declare the being of the Church, but to define it by accident, which may conduce to its well being, but do not touch its innermost nature. From this view of the Church the important consequence follows, that all the baptized belong to the visible Church, whatever or their divisions, crimes, misbeliefs, provided only they are not plain apostates, and directly deny and utterly reject the Christian faith, as far as the same is professly different from infidelity. "Heretics as such are to be touched with the points of the law, till: schismatics as touching the quarrels for which, or the duties in which they divide themselves from their brethren: loose, licentious, and wicked persons, as touching their several offences or crimes, have all forsaken the true Church of God—the Church which is sound and sincere in the doctrine
which they corrupt, the Church that keepeth the bond of union which \( H \) violate, the Church that walketh in the laws of righteousness which they transgress, this very Church of which they have left—howbeit, not altogether left nor forsaken simply the Church, upon the foundation of which they continue built, notwithstanding these breaches whereby they are rent at the top or undernourishment.” (v. 68, 7).

VIII. The Faith, Attributes, and Notes of the Church. —The Nicene Creed is the especial and authoritative exponent of the Church's faith, having been accepted as such by the Ecumenical Councils of Nicea and Constantinople, and ever afterwards regarded as the sacred summary of Christian doctrine. We have the Western form of the same Creed in that which is called the Creed of the Apostles—a name probably derived from its having been the local Creed of Rome, which was the chief Apostolic see of the West. An expansion of the same Creed, made in order to meet the Arian errors, is found in the Creed of St. Athanasius.

The Confessions of Faith of the Synod of Bethlehem (A. D. 1672), of the Council of Trent (completely known as Pope Pius' Creed, A. D. 1564), of the Synod of London (A. D. 1562), of Augsburg, Switzerland, Saxony, &c., stand on a lower level, as binding on the members of certain portions of the Church, but not being the Church's Creeds. The attributes of the Church are drawn from the expressions of the Creeds. The Church is described as One, Holy, Catholic, Apostolic. Its Unity consists in having one object of worship (Eph. iv. 6), one Head (Eph. iv. 15), one body (Rom. xii. 5), one Spirit (Eph. iv. 4), one faith (ib. 13), hope (ib. 4), love (1 Cor. xiii. 14), the same sacraments (ib. x. 17), discipline and worship (Acts ii. 42). Its Holiness depends on its Head and Spirit, the means of grace which it offers, and the holiness that it demands of its members (Eph. iv. 21). Its Catholicity consists in its being composed of many national Churches, not confined as the Jewish Church to one country (Mark xvi. 15); in its enduring to the end of time (Matt. xxviii. 20); in its teaching the whole truth, and having at its disposal all the means of grace vouchsafed to man. Its Apostolicity in being built on the foundation of the Apostles (Eph. ii. 20), and continuing in their doctrine and fellowship (Acts ii. 42). The notes of the Church are given by its profession and the theologians of his school, as being the title "Catholic," "antiquity, succession, extent, papal succession, primitive doctrine, unity, sanctity, efficacy of doctrine, holiness of its authors, miracles, prophecy, confession of foes, unhappy end of opponents, temporal good-fortune (Bellarm. Contr. tom. ii. lib. iv. p. 1233, Ingeolst, 1580); by Dean Field as (1) the complete profession of the Christian faith; (2) the use of certain appointed ceremonies and sacraments; (3) the union of men in their profession and the use of these sacraments under lawful pastors (Of the Church, bk. ii. c. ii. p. 65). It is evident that the notes by which the Church is supposed to be distinguished must differ according to the definition of the Church accepted by the theologian who assigns them, because the true notes of a thing must necessarily be the essential properties of that thing. But each theologian is likely to assume them apart as such, to which he believes his own branch or part of the Church to exalt others as the notes of the Church Universal.

IX. Distinctions. — "For lack of diligent ob-

CHURCHES

CILICIA

H. B. S. & F. M. 2d. 

*CHURCHES, ROBBERS OF, is the translation (A. V.) of ἱππαρχοι (Acts xix. 37) which should be render-ings of temples or of sacrificial service. The Ephesian town-clerk declared that no accusation like this could be brought against Paul and his companions, Gaius and Aristarchus. The temples of the heathen contained images of gold and silver, votive offerings and other gifts, which were often plundered. "Churches," when our version was made, denoted places of pagan as well as of Christian worship, and hence this latter application of the term, which is now so incongruous, was not improper then. For examples of this wider usage in the older writers, see Trench, Authorized Version, Av., p. 42 (ed. 1859). 2d. 

CHUSHAN-RISHAIATHIM (*חָעָשָׁן-רִשְׁלַאיָתִים*; [Comp. Ḫου subparagraph] Chamis Roshathaim), the king of Mesopotamia who oppressed Israel during eight years in the generation immediately following Joshua (Judg. iii. 8). The seat of his dominion was probably the region between the Euphrates and the Khabur, to which the name of Mesopotamia always attached in a special way. In the early cuneiform inscrip-

tions this country appears to be quite distinct from Assyria: it is inhabited by a people called Nuzi, who are divided into a vast number of petty tribes and offer but little resistance to the Assyrian armies. No centralized monarchy is found, but as none of the Assyrian historical inscriptions date earlier than about n. c. 1100 which is some centuries later than the time of Chushan, it is of course quite possible that a very different condition of things may have existed in his day. In the weak and divided state of Western Asia at this time, it was easy for a brave and skillful chief to build up rapidly a vast power, which was apt to crumble away almost as quickly. The case of Solomon is an instance. Chushan-Rishaiatham's yoke was broken from the neck of the people of Israel at the end of eight years by Othniel, Caleb's nephew (Judg. iii. 10) and nothing more is heard of Mesopotamia as an aggressive power. The rise of the Assyrian empire, about n. c. 1270, would naturally reduce the bordering nations to insignificance. G. R. 2d. 

CHUSI (חֻזִּי; Alex. Χοσέ]]; [Abb. Comp. Χοσέ'] Vulg. omit's), a place named only in Judith viii. 18, as near Ekron, and upon the brook Machmutha, a stream which runs in central Palestine, but all the names appear to be very corrupt, and are not recognizable. 2d. 

CHUZA (properly CHUSAS; Ἁζας [Chusas or -se]), εὐστήρως, or house-steward of Herod (Anti-

pater), whose wife Joanna (Ἰωάννης, ש"זח"ז), having been healed by our Lord either of possession by an evil spirit or of a disease, became attached to that body of women who accompanied Him on his journeys (Luke viii. 3): and, together with Mary Magdalen and Mary the mother of James, having come early to the sepulchre on the morning of the resurrection, to bring spices and ointments to complete the burial, brought word to the Apostles that the Lord was risen (Luke xvi1. 10). 2d. 

CICCARR (ג'גג'). [JORDAN; TOPOGRAPH-

ICAL TERMS.] CILICIA (Κιλίκια), a maritime province in the S. E. of Asia Minor, bordering on Pamphylia in the W., Lycaonia and Cappadocia in the N., and Syria in the E. Lofty mountain chains separate it from these provinces, Mons Amannus from Syria, and Antitaurus from Cappadocia; these barriers can be surmounted only by a few difficult passes: the former by the Porte Amamuda at the head of the valley of the Pinharas, the latter by the Porte Cilicia near the sources of the Cydnus; towards the S., however, an outlet was afforded between the Shus Issiues and the spurs of Amans for a road, which afterwards crossed the Porte Syrie in the direction of Antioch. The sea-coast is rock-bound in the W., low and shelving in the E.; the chief rivers are the Pinharas, the Cydnus, and the Calycadnus; were impossible to vessels of any size from sand-bars formed at their mouths. The western portion of the province is intersected with the ridges of Anti-

taurus, and was denominated Trachea, rough, in contradistinction to Pelus, the level district in the E. The latter portion was remarkable for its beauty and fertility, as well as for its luxurious climate: hence it became a favorite residence of the Greeks after its incorporation into the Macedonian empire, and its capital Taras was elevated into the seat of a celebrated school of philosophy. The connection between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. Antiochus the Great is said to have introduced 2000 families of the Jews into Asia Minor, many of whom probably settled in Cilicia (Joseph. Ant. xii. 3, § 4). In the Apostolic age they were still there in considerable numbers (Acts vi. 9). Cilician mercenaries, probably from Trachae, served in the body-guard of Alexander Jannaeus (Joseph. Ant. xii. 13, § 5; B. j. i. 4, § 3). Joseph of Cilicia with the Tardish of Gen. x. 4: μή εἰς δὲ θαρσήσεσθαι σὺν οἴκοις τοῦ παλαία ἢν Κιλίκια (Ant. i. 6, § 1). Cilicia was from its geographical

* Hence the close connection which exists between Syria and Cilicia, as indicated in Acts xv. 25, 41 Gal. i. 21.
CINNAMON

CINNAMON (κύπαρις; קְפָרִי): κυπάρισσον: κυπαρίσσιον), a well-known aromatic substance, the rind of the Laurus cinna/amonum, called Co- navedo-g brother in Ceylon. It is mentioned in Ex. xxx. 23 as one of the component parts of the holy anointing oil, which Moses was commanded to prepare; in Prov. vii. 17 as a perfume for the bed; and in Cant. iv. 13 as one of the plants of the garden which is the image of the spouse. In Rev. xvi. 13 it is enumerated among the merchandise of the great Babylon. *It was imported into Judaea by the Phenicians or by the Arabs, and is now found in Sumatra, Borneo, China, &c., but chiefly, and of the best quality, in Ceylon, the S. W. part of Ceylon, where the soil is light and sandy, and the atmosphere moist with the prevalent southern winds. The stem and boughs of the cinnamon-tree are surrounded by a double rind, the exterior being whitish or gray, and almost inodorous and tasteless; but the inner one, which consists properly of two closely connected rinds, furnishes, if dried in the sun, that much-valued brown cinnamon which is imported to us in the shape of thin bars, eight or ten of which, rolled one into the other, form sometimes a quill. It is this inner rind which is called in Ex. xxx. 23, κυπάρισσος, "spicy cin- namon" (Kalisch ed loc.). From the coarse pieces of oil of cinnamon is obtained, and a finer kind of oil is also got by boiling the ripe fruit of the tree. This last is used in the composition of incense, and diffuses a most delightful scent when burning.

Herodotus (iii. 111) ascribes to the Greek word κυπάρισσον a Phenician, i. e. a Semitic origin. His words are: οὐράθα δὲ λέγουσα μεγαλάς φορέοι ταῖς τὰ κάρφοις, τὰ χρύσα ἀπὸ Φονικῶν μαθέτες κυπαρίσσω καλεῖσμαι. The meaning of the Heb. root קְפָרִי is doubtful.

The Arab. كَفَّارْي is to smell offensively like vanil- nut-oil. Gesenius suggests that the word might have had the notion of lifting up or standing up- right, like קְפָרִי, קָפָרִי, קַפָרִי, and so be identical with קְפַרִי, קָפַרִי, קֶפָרִי, which the cinnamon-rind resembles in form when prepared for the market, and has hence been called in the later Latin cannella, in Italian cannella, and in French cimelle. Gesenius (Thes. 1233) corrects his former derivation of the word (in Lex. Mon.) from קְפַרִי as being contrary to grammatical analogy.

W. D.

The reader is referred to Sir E. Tennent’s Ceylon (i. 599) for much interesting information on the subject of the early history of the cinnamon plant. *His writer believes that the earliest knowledge of this substance possessed by the Western nations was derived from China, and that it first reached India and Phoenicia overland by way of Persia: at a later period when the Arabs, the merchants of Sheba,” competed for the trade of Tyre, and carried to her "the chief of all spices" (Ex. xxviii. 22), their supplies were drawn from their African possessions, and the coast of the Troglodyte coast supplied the cinnamon of the far East, and to a great extent excluded it from the market.

With regard to the origin of the word, it is probable that it is derived from the Persian Κιν- namon, i. e. "Chinese anammon" (see Tennent in loc.). Dr. Royle, however, conjectures that it is allied to the Cingalese Синамом, "sweet wood," or the Malayan Kinamom. The brothers C. G. and Th. F. L. Nees von Esenbeck have published a valuable essay, "De Cinnamonum Imagototis" (Annenkien botem. Bonnens. Fasc. i. Bonn., 1823, 4to), to which the reader is referred for additional information.

CINNAMON, ALL (κυπαρίσσια; קְפָרִי): παπαράζης τῆς Ναυποτίας; [Vat. Χερετάθ; Alex. Χερετάθ] ▲vivisopiem Generali, a district named with the land of Naphtali, and other northern places as having been laid waste by Benhadad king of Damascus, the ally of Ass king of Judah (1 K. xv. 20). It probably took its name from the adjacent city or take of the same name (in other passages of the Λ. V. [in modern editions] spelt CHINNEROETH) and was properly the small enclosed district [3 miles long and 1 wide] north of Tiberias, and by the side of the lake, afterwards known as "the plain of Gennesaret." The expression "All Cinnereth" is unusual and may be compared with "All Bithron," — probably, like this, a district and not a town.

CIRAMA. The people of Cidna (de Κεραμε) [Vat. Κεραμα; Alex. Κεραμα] ▲vivisopiem Gentes) and Gal- des came up with Zorobabel from Babylon (1 Esdr. v. 20). [Καραμαί.]

CIRCUMCISION (κύπερτον; περιτομη: cir- cumcision) was peculiarly, though not exclusively, a Jewish rite. It was enjoined upon Abraham, the father of the nation, by God, at the institution, and as the token of the covenant, with the express promise of the Messiah (Gen. xvii.). It was thus made a neces- sary condition of Jewish nationality. Every male child was to be circumcised when eight days old (Lev. xii. 3) on pain of death; a penalty which, in the case of Moses, appears to have been demanded of the father, when the Lord "sought to kill him" because his son was uncircumcised (Ex. iv. 24-25). If the eighth day were a Sabbath the rite was not postponed (John vii. 22, 23). Slaves, whether born or purchased, were circumcised (Gen. xvii. 12, 13); and foreigners must have their males circumcised before they could be allowed to partake of the passover (Ex. xii. 48), or become Jewish citizens (Jud. xiv. 10. See also Esth. viii. 17, where for Heb. בַּתְרָתָא, "became Jews," the LXX. have περιτομήν κατ’ ἱποκάτων). The operation, which was performed with a sharp instru- ment (Ex. iv. 22; Josh. v. 2 [Knipe],) was a painful one, at least to grown persons (Gen. xxiv. 25; Josh. v. 8). It seems to have been customary to name a child when it was circum cised (Luke i. 59).
Various explanations have been given of the fact, that, though the Israelites practised circumcision in Egypt, they neglected it entirely during their journeying in the wilderness ( Josh. v. 5). The most satisfactory account of the matter appears to be, that the nation, having partaken of disobedience in its forty years' wandering, was, as it were, under a temporary rejection by God, and was therefore prohibited from using the sign of the covenant. This agrees with the mention of their disobedience and its punishment, which immediately follows in the passage in Joshua (v. 6), and with the words (v. 9), "This day have I rolled away the reproach of Egypt from off you." The "reproach of Egypt" was the threatened taunt of their former masters that God had brought them into the wilderness to shame them (Exx. xxxii. 12; Num. xiv. 15-16; Deut. ix. 28), which, so long as they remained uncircumcised and wanderers in the desert for their sin, was in danger of falling upon them. (Other views of the passage are given and discussed in Keil's Commentary on Joshua, in Clark's Thol. Libr., p. 129, &c.)

The use of circumcision by other nations beside the Jews is to be gathered almost entirely from sources extraneous to the Bible. The rite has been found to prevail extensively both in ancient and modern times; and among some nations, as, for instance, the Abyssinians, Nabians, modern Egyptians, and Hottentots, a similar custom is said to be practiced by both sexes (see the Pean Cyclopedic, article Circumcision). The Biblical notice of the rite describes it as distinctively Jewish; so that in the N. T. - the "circumcision" (παρθένος) and the uncircumcision (η απόστησις) - are frequently used as synonyms for the Jews and the Gentiles. Circumcision certainly belonged to the Jews as it did to no other people, by virtue of its divine institution, of the religious privileges which were attached to it, and of the strict regulations which enforced its observance. Moreover, the O. T. history incidentally discloses the fact that many, if not all, of the nations with whom they came in contact were uncircumcised. One tribe of the Canaanites, the Hivites, were so, as appears from the story of Hamor and Shechem (Gen. xxxiv.). To the Philistines the epithet "uncircumcised" is constantly applied (Judg. xiv. 5, &c. Hence the force of the narrative, 1 Num. xviii. 25-27). From the great unwillingness of Zipporah to allow her son to be circumcised (Ex. iv. 25), it would seem that the Midianites, though descended from Abraham by Keturah (Gen. xxv. 2), did not practice the rite. The expression "lying uncircumcised," or "lying with the uncircumcised," as used by Ezekiel (e. xxxiii.) of the Egyptians, Assyrians, and others, does not necessarily affirm anything either way, as to the actual practice of circumcision by those nations. The origin of the custom amongst one large section of those Gentiles who follow it, is to be found in the Biblical record of the circumcision of Ishmael (Gen. xvii. 21). Josephus relates that the Arabs were circumcised after the thirteenth year, because Ishmael, the founder of their nation, was circumcised at that age (Ant. i. 12, § 2; see Lane's Med. I, cpyt. ch. ii.). Though Mohammed did not enjoin circumcision in the Koran, he was circumcised himself, according to the custom of his country; and circumcision is now as common amongst the Mohammedans amongst the Jews.

Another passage in the Bible has been thought by some to speak of certain Gentile nations as circumcised. In Jer. ix. 25, 26 (Heb. 24, 25) the expression (בָּשָׁם יַעֲפֹר, ver. 24) which is translated in the A. V. "all them which are circumcised with the uncircumcised," is rendered by Michaelis and Ewald "all the uncircumcised circumcised ones," and the passage understood to describe the Egyptians, Jews, Edomites, Ammonites, and Moabites, as alike circumcised in flesh and uncircumcised in heart. But, whatever meaning be assigned to the particular expression (Rossmiller agrees with the A. V.; Ewald suggests "circumcised in foreskin"), the next verse makes a plain distinction between two classes, of which all the Gentiles (בָּשָׁם יַעֲפֹר), including surely the Egyptians and others just named, was one, and the house of Israel the other; the former being uncircumcised both in flesh and heart, the latter, though possessing the outward rite, yet destitute of the corresponding state of heart, and therefore to be visited as though uncircumcised. The difficulty that thus arises, namely, that the Egyptians are called uncircumcised, whereas Herodotus and other states that they were circumcised, has been obviated by supposing those statements to refer only to the priests, who entered into the lists in the contest, so that the nation generally might still be spoken of as uncircumcised (Herod. ii. 36, 37, 104; and Wes- seling and Bähr in loc.). The testimony of Herodotus must be received with caution, especially as he asserts (ii. 104) that the Syrians in Palestine confessed to having received circumcision from the Egyptians. If he means the Jews, the assertion, though it has been ably defended (see Spencer, de Lev. Bibl. i. § 457; &c.), is not to be reconciled with Gen. xvii.; John vii. 22. If other Syrian tribes are intended, we have the contradiction of Josephus, who writes, "It is evident that no other of the Syrians that live in Palestine besides us alone are circumcised" (Ant. viii. 10, § 3. See Whiston's note there). Of the other nations mentioned by Jeremiah, the Moabites and Ammonites were descended from Lot, who had left Abraham before he received the rite of circumcision; and the Edomites, though made over to be circumcised, were compelled to be so by Hyrcanus (Joseph. Ant. xiii. 9, § 1). The subject is fully discussed by Michaelis (Commentaries on the Laws of Moses, iv. 3, cxxvii.-cxxviii.).

The process of restoring a circumcised person to his natural condition by a surgical operation was sometimes undergone (Velas, de Rel. Medit., viii. 25). Some of the Jews in the time of Antiochus Epiphanes, wishing to assimilate themselves to the heathen around them, built a gymnasion (γυμνασ- σία) at Jerusalem, and that they might not be known to be Jews when they appeared naked in the games, "made themselves uncircumcised" (1 Macc. i. 15, ἀπείθησαν εὐαυτον ἀκροβοστίας: ficevo- rat ut pretytum: Joseph. Ant. xii. § 3, τὴν ἄνων ἄνων πετρινῶν μυστηριάς, κ. τ. λ.). Against having recourse to this practice, from an excessive anti-Judaic tendency, St. Paul cautions the Corinthians in the words "Was any one called being circumcised, let him not become uncircumcised" (μὴ μὴ ἐπιστάσθη τοις ἄνων πετρινῶν μυστηριάς, κ. τ. λ.). Against having recourse to this practice, from an excessive anti-Judaic tendency, St. Paul cautions the Corinthians in the words "Was any one called being circumcised, let him not become uncircumcised" ( μὴ μὴ ἐπιστάσθη τοις ἄνων πετρινῶν μυστηριάς, κ. τ. λ.).

The attitude which Christianity, at its introduction, assumed towards circumcision was one of absolute hostility; so far as the necessity of the rite to salvation, or its possession of any religious
woral worth were concerned (Acts xv.; Gal. v. 2).
But while the Apostles resolutely forbade its imposition by authority on the Gentiles, they made no objection to its practice, as a mere matter of feeling or expediency. St. Paul, who would by no means consent to the demand for Titus, who was a Greek (Gal. ii. 14; Gal. ii. 11), on another occasion had Timothy circumcised to conciliate the Jews, and that he might preach to them with more effect as being one of themselves (Acts xvi. 3).
The Abyssinian Christians still practice circumcision as a national custom. In accordance with the spirit of Christianity, those who ascribed efficacy to the mere outward rite, are spoken of in the N. T. almost with contempt as "the concision" or "carnification" (Rom. xiii. 11), while the claim to be the true circumcision is vociferated by Christians themselves (Phil. ii. 3, 2). An ethical idea is attached to circumcision even in the O. T., where uncircumcised lips (Ex. vi. 12, 30, or ears (Jer. vi. 10), or hearts (Lev. xxvi. 41) are spoken of, i.e., either stammering or dull, closed as it were with a foreskin (Gen. Heb. Lez. s. v. ἄρρητος), or rather rebellions and unholy (Deut. xxx. 6; Jer. iv. 4), because circumcision was the symbol of purity (see Is. lii. 1). Thus the fruit of a tree is called uncircumcised, or in other words unclean (Lev. xix. 23). In the N. T. the ethical and spiritual idea of purity and holiness is fully developed (Col. ii. 11, 13; Rom. ii. 29, 29).

CIS (Rec. T. Kf.) [and so written because the Greek alphabet did not express š]); Lamch. (Tisch. Treg.) with [Sin.] A B C D, Keis. (Ce), Acts xii. 21. [Kist., 1.]

CISARAI [2 syl.] (Kaūrā'ē; [Vat. Alex. F. Kassapou] (Ch), Esth. xi. 2. [Kist., 2.]

CISTERN (§ 12), from γυάνη, die or bore, Gesen. 176: usually Diósicos: cisternas or locas), a receptacle for water, either conducted from an external spring, or proceeding from rain-fall.
The dryness of the summer months between May and September, in Syria, and the scarcity of springs in many parts of the country, make it necessary to collect in reservoirs and cisterns the rain-water, of which abundance falls in the intermediate period (Shaw, Travels, 335: S. Jerome, quoted by Harmer, i. 148; Robinson, i. 430; Kitto, Phys. Geogr. of H. L. 302, 303). Thus the cistern is essentially distinguished from the living spring (§ 2), 'Ain; but from the well βάσις, Beir, only in the fact that Beir is almost always used to denote a place ordinarily containing water rising on the spot, while τῆς, Bôr, is often used for a dry pit, or one that may be left dry at pleasure (Stanley, S. 8. p. 512, 514). [Avn; WELL.]. The larger sort of public tanks or reservoirs, in Arabic, Bîrâch, Hebrew Be'rebâh, are usually called in A. V. "pool," while for the smaller and more private it is convenient to reserve the name cistern.

Both bîrâch and cisterns are frequent throughout the whole of Syria and Palestine, and for the construction of them the rocky nature of the ground affords peculiar facilities either in original excavation, or by enlargement of natural cavities. Dr. Robinson remarks that the inhabitants of all the hill country of Judah and Benjamin are in the habit of collecting water during the rainy season in tanks and cisterns, in the cities and fields, and along the high roads, for the subsistence of themselves and their flocks, and for the comfort of the passing traveller. Many of these are obviously antique, and exist along ancient roads now deserted. On the long forgotten way from Jericho to Bethel, "broken cisterns" of high antiquity are found at regular intervals. Jerusalem is described as "well supplied with water, in a dry neighborhood (xvi. 760), depends mainly for this upon its cisterns, of which almost every private house possesses one or more, excavated in the rock on which the city is built. The following are the dimensions of 4, belonging to the house in which Dr. Robinson resided. (1.) 13 ft. X 8 X 12 deep. (2.) 8 X 4 X 15. (3.) 10 X 10 X 15. (4.) 30 X 30 X 20. The cisterns have usually a round opening at the top, sometimes built up with stonework above, and furnished with a curb and a wheel for the bucket (Eccl. xii. 6), so that they have externally much the appearance of an ordinary well. The water is conducted into them from the roofs of the houses and during the rainy season, and with care remains sweet during the whole summer and autumn. In this manner most of the larger houses and public buildings (Robinson, i. 324-5). Josephus (B. J. iv. 4, § 4) describes the abundant provision for water supply in the towers and fortresses of Jerusalem, a supply which has contributed greatly to its capacity for defense, while the dryness of the neighborhood, verifying Strabo's expression τὴν κύκλωσιν χάρας ἐχον λωτρᾶν καὶ ἀνδρόν, has in all cases hindered the operations of besiegers. Thus Hezekiah stopped the supply of water outside the city in anticipation of the attack of Sennacherib (2 Chron. xxxii. 3). The progress of Antiochus Sidetes, n. c. 134, was at first retarded by want of water, though this want was afterwards unexpectedly relieved (Joseph. Ant. xiii. 8, § 2; Clinton, iii. 331). Josephus also imputes to divine interposition the supply of water with which the army of Titus was furnished after suffering from want of it (B. J. iv. 9, § 4). The crusaders also, during the siege A. D. 1099, were harassed by extreme want of water while the besieged were supplied (Matth. Paris, Hist. pp. 46, 49, ed. Wat.). The defense of Masada by Joseph, brother of Herod, against Antigonus, was enabled to be prolonged, owing to an unexpected replenishing of the cisterns by a shower of rain (Joseph. Ant. xiv. 15, § 2), and in a subsequent passage he describes the cisterns and reservoirs, by which that fortress was plentifully supplied with water, as he had previously done in the case of Jerusalem and Machabaus (B. J. iv. 4, § 4, iv. 6, § 2, viii. 8, § 3). Benjamin of Tudela says very little water is found at Jerusalem, but the inhabitants drink rain-water, which they collect in their houses (Early Trac. p. 84).

Barchardt mentions cisterns belonging to private houses, among other places, at Serrinei, near Allepô (Syria, p. 121), El Bara, in the Orontes valley (p. 152), Dhami and Misens in the Lebanon (pp. 110, 112, 118), Tiberias (p. 331), Kerek in Moab (p. 377), Mount Tabor (p. 331). At some at Haleb, near Gilgal, the dimensions are given by Robinson: — (1.) 7 ft. X 5 X 3 deep. (2.) Nearly the same as (1.). (3.) 12 X 9 X 8. They have one or two steps to descend into them, as they have one with each near Gaza, now disused, described by Sandys as "a mighty cistern, filled only by the rain-water, and descended into by stairs of stone." (Sandys, p. 150; Robinson, ii. 39). Of those at Haleb, some were covered with flat stones resting
on arches, some entirely open, and all evidently ancient (Robinson, iii. 157).

Empty cisterns were sometimes used as prisons and places of confinement. Joseph was cast into a "pit," ܢܰܪܩ (Gen. xxxvii. 22), and his " dungeon" in Egypt is called by the same name (xli. 14). Jeremiah was thrown into a miry and empty cistern, whose depth is intimated by the cords used to let him down (Jer. xxvi. 20). To this prison tradition has assigned a locality near the gate called Herod's gate (Hassheqist, p. 140; Manndrell, Early Trav. p. 418). Vitruvius (viii. 7) describes the method in use in his day for constructing water tanks, but the native rock of Palestine usually superseded the necessity of more art in this work than is sufficient to excavate a basin of the required dimensions.

The city of Alexandria is supplied with water contained in arched cisterns supported by pillars, extending under a great part of the old city (Van Egmont, Travels, ii. 134). [Post: Weil.] H. W. P.

CITHERN (= cithara, κιθάρα, 1 Macc. iv. 54), a musical instrument most probably of Greek origin, employed by the Chaldeans at balls and routs, and introduced by the Hebrews into Palestine on their return thither after the Babylonian Captivity. The cithara was of the guitar species, and was known at a later period as the citara, under which name it is mentioned by the old dramatists as having constituted part of the furniture of a barber's shop. Of the same species is the Cithar or Zither of Southern Germany, Tyrol, and Switzerland.

With respect to the shape of the Cithara or Citharum mentioned in the Apocrypha, the opinion of the learned is divided: according to some it resembled in form the Greek Delta (Δ), others represent it as a half-moon, and others again like the modern guitar. In many eastern countries it is still in use, with strings varying in number from three to twenty-four. Under the name of Kithara, the traveller Nicholas describes it as a wooden plate or dish, with a hole beneath, and a piece of skin stretched above like a drum. Two sticks, joined after the manner of a fan, pass through the skin at the end, and where the two sticks stand apart they are connected by a transversal piece of wood. From the upper end of this wooden triangle to the point below are fastened five chords, which at a little distance above their junction pass over a bridge, like the strings of a violin. The chords are made to vibrate by means of a leather thong fastened to one of the lateral sticks of the triangle. In Mendelssohn's edition of the Psalms representations are given of the several musical instruments met with in the sacred books, and Kithara or Kithara is described by the accompanying figure.

The Cithara, if it be not the same with, resembles very closely, the instruments mentioned in the book of Psalms under the denominations of ܢܰܪܩ, ܪܲܠܲܫܲܐ, ܐܬ݂ܒܲܐ, respectively rendered in the A. V. "cittern," " psalteriy, " " organ. " In Chaldee, Cithara is translated ܡܪܝܐ, the Keri for ܡܪܝܐ; (Dan. iii. 5). In the A. V. ܒܕܚܐ is rendered "cither," and the same word is employed instead of Cithern (1 Macc. iv. 54) in Robert Barker's edition of the English Bible, London, 1615. Gesenius considers Cithara as the same with harp; but Luther translates κιθάρας by mit pijifis, " with pipes." (See Beine to Mendelssohn's Psalms, 21 Pref.; Niebuhr, Travels; Furst's Concordance; Gesenius on the word ܡܪܝܐ.) D. W. M.

CITIES. (1) ܒܠܐ ܡܪܝܐ, plur. of both ܒܠܐ ܡܪܝܐ, "Ar, and also ܒܠܐ ܡܪܝܐ, to keep watch. — Gen. p. 1004, 5; once (Judg. x. 4) in plur. ܒܠܐ ܡܪܝܐ, for the sake of a play with the same word, plur. of ܒܠܐ ܒܠܐ ܡܪܝܐ, a young ass: ܢܘܟܓ蝼: civitates, or urbes. (2) ܒܠܐ ܡܪܝܐ, Kirjath; once in dual. ܒܠܐ ܡܪܝܐ, Kirjathiam (Num. xxxii. 37), from ܫܠܝܚܐ approach as an enemy, prefixed as a name to many names of towns on both sides of the Jordan existing before the conquest, as Kirjath-Arba, probably the most ancient name for city, but seldom used in prose as a proper name for town (Gen. p. 12536; Stanley, S. of P. Ap., p. 80).

The classification of the human race into dwellers in towns and nomad wanderers (Gen. iv. 20, 22) seems to be intimated by the etymological sense of both words, "Ar, or "Ir, and Kirjath, namely, as places of security against an enemy, distinguished from the unwalled village or hamlet, whose resistance is more easily overcome by the marauding tribes of the desert. This distinction is found actually existing in countries, as Persia and Arabia, in which the tent-dwellers are found, like the Rechabites, almost side by side with the dwellers in cities, sometimes even sojourning within them, but not amalgamated with the inhabitants, and in general making the desert their home, and, unlike the Rechabites, robbery their undissembled occupation (Judg. v. 7: Jer. xxxv. 9, 11; Fraser, Persia, 366, 500; Malcolm, Sketches of Persia, 147-156: Durekband, Notes on Rechabites, 157; Wellcome, Words in Arabia, i. 355; Porter, Damascus, ii. 96, 181, 185; Vaux, Nimrod and Persipolis, c. ii. note A; Lavard, Nimrod, ii. 272: Nin. of Bab. 141). [Villages.]

The earliest notice in Scripture of city-building is of Enoch by Cain, in the land of his " exile " (Gen. iv. 17). After the confusion of tongues, the descendants of Nimrod founded Babel, Erech, Accad, and Calneh, in the land of Shinar, and Ashur, a branch from the same stock, built Nineveh, Rechoboth-by-the-river, Calah, and Resen, the last being " a great city." A subsequent passage mentions Shiloh, Gaza, Sodom, Gomorrah, Admah, Zeboim, and Lasha, as cities of the Canaanites, but without implying for them antiquity equal to that of Nineveh and the rest (Gen. x. 10-12, 19, xi. 3, 9, xxxii. 37). Sir H. Rawlinson supposes, (1) that the expedition of Chedorlaomer (Gen. xiv.) was prior to the building of Babylon or Nineveh, indicating a migration or conquest from Persia or Assyria; (2) that by Nimrod is to be understood, not an individual, but a name denoting the "settlements" in the Assyrian plain; and (3) that the names Rechoboth, Calah, &c., when first mentioned, only denoted sites of buildings afterwards erected. He supposes that Nineveh was built about 1256.
... and telling of a century later, when Babylon appears to have existed in the 13th century B.C. If this be correct, we must infer that the places then attacked, Sodom, Gomorrah, etc., were cities of higher antiquity than Nineveh or Babylon, inasmuch as when they were destroyed a few years later, they were cities in every sense of the term. The name Kirjathaem, "double-city" (Gen. xii. 13), indicates an existing city, and not only a site. It may be added that the remains of civic buildings existing in Mesopotamia are evidently very ancient, if not, in some cases, the same as those erected by the aboriginal Emins and Replains. (See also the name Avich, ruins," (Gen. p. 1000); Gen. xxxi. 20, xxxvi. 35; Is xliv. 13; Wilkinson, Arc. Egypt. i. 308; Layard, Nin. & Bib. p. 532; Porter, Danases, i. 309, ii. 196; Rawlinson, Outline of Asyrr. Hist. i. 5, 6.) But though it appears probable that whatever dates may be assigned to the building of Babylon or Nineveh in their later condition, they were in fact rebuilt at those epochs, and not founded for the first time, and that towns in some form or other may have occupied the sites of the later Nineveh or Calah; it is quite clear that cities existed in Syria prior to the time of Abraham, who himself came from "Ur," the "city" of the Chaldeans (Gen. p. 55; Rawlinson, p. 4).

The earliest description of a city, properly so called, is that of Sodom (Gen. xix. 22), but it is certain that from very early times cities existed on the sites of Jerusalem, Hebron, and Danases. The last, said to be the oldest city in the world, must from its unrivalled situation have always commanded a congregated population; Hebron is said to have been built seven years before Zoan (Tanis) in Egypt, and is thus the only Syrian town which presents the elements of a date for its foundation (Num. xviii. 22; Stanley, S. & P. p. 409; Joseph. Antiq. i. 6, 5, 4; Couybeare and Howson, Life and Exp. of St. Paul, i. 94, 96). But there can be no doubt that whatever date may be given to Egyptian civilization, there were inhabited cities in Egypt long before this (Gen. xii. 14, 15; Martineau, Early Life, i. 154; Wilkinson, i. 307; Dict. of Geogr. art. Tanis). The name, however, of Hebron, Kirjath-Arba, indicates its existence at least as early as the time of Abraham, as the city, or fortified place of Arba, an aboriginal province of southern Palestine (Gen. xxii. 2; Josh. xiv. 15). The "tower of Eder," near Bethlehem, or "of flocks" (箖 posix 600), indicates a position fortified against marauders (Gen. xxxv. 21).

Whether the "city of Shidim" be a site or an existing town cannot be determined, but there can be no doubt that the situation of Shechem is as well identified in the present day, as its importance as a fortified place is plain from the Scripture narrative (Gen. xxiii. 18, xxiv. 20, 26; Robinson, ii. 287). On the whole it seems plain that the Canaanite, who was "in the land" before the coming of Abraham, had already built cities of more or less importance, which had been largely increased by the time of the return from Egypt.

Even before the time of Abraham there were cities in Egypt (Gen. xii. 14, 15; Num. xiii. 22; Wilkinson, i. 4, 5). The Israelites, during their sojourn there, were able to build cities of fortification and "treasure cities" of Pithom (Abbâsteû) and Raamses (Ex. i. 11; Herod. ii. 158; Winer, Gesammelte. x. s. v.; Robinson, i. 54, 55) but their nomad habits make it unlikely that they should build, still less fortify, cities of their own in Goshen (Gen. xxxii. 14, xxvii. 11).

Meanwhile the settled inhabitants of Syria on both sides of the Jordan had grown in power and in number of "fenced cities." In the kingdom of Siron are many names of cities preserved to the present day; and in the kingdom of Og, in Bashan, were 60 "great cities with walls and brazen bars," besides unwalled villages; and also 23 cities in Gilead, which were occupied and perhaps partly rebuilt or fortified by the tribes on the east of Jordan (Num. xxxi. 21, 32, 33, 35, xxxii. 1-3, 34, 42; Deut. iii. 4, 5, 14; Josh. xi. 13, 14; 1 K. iv. 13; 1 Chr. ii. 22; Burchardt, Syria, pp. 311, 457; Porter, Danases, i. 195, 196, 206, 250, 275).

On the west of Jordan, whilst 31 "royal" cities are enumerated (Josh. xii.), in the district assigned to Judah 125 "cities" with villages are reckoned (Josh. xvii.); in Benjamin 20; to Simeon 17; Zabulon 12; Issachar 16; Asher 22; Naphtali 19; Dan 17 (Josh. xviii., xix.). But from some of these the possessors were not expelled till a late period, and Jerusalem itself was not captured till the time of David (2 Sam. v. 6-9).

From this the Hebrews became a city-dwelling and agricultural rather than a pastoral people. David enlarged Jerusalem, and Solomon, besides embellishing his capital, also built or rebuilt Tadmor, Palmyra, Gezer, Beth-horon, Hazor, and Megiddo, besides store-cities (2 Sam. v. 7, 9, 10; 1 K. ix. 15-18; 2 Chr. vii. 1). To Solomon also is ascribed by eastern tradition the building of Persepolis (Chardin, Voyage, viii. 390; Mandelslo, i. 4; Kurian, ch. xxxviii.).

The works of Jeroboam at Shechem (1 K. xii. 29; Judg. ix. 43), of Rehoboam (2 Chr. xi. 5-10), of Bussha at Rama, interrupted by Asa (1 K. xv. 22), of Omer at Samaria (xvi. 24), the rebuilding of Jericho in the time of Ahaz (xvi. 34), the works of Jehoshaphat (2 Chr. xvi. 2), of Jotham (2 Chr. xxvii. 4), the rebuilding of Jerusalem, and later still, the works of Herod and his family, belong to their respective articles.

Collections of houses in Syria for social habitation may be classed under three heads:—(1) cities; (2) towns with citadels or towers for resort; and (3) unwalled villages. The cities may be assumed to have been in almost all cases "fortified." e.g. possessing a wall with towers and gates (Lev. xxv. 39; Deut. ix. 1; Josh. xii. 15, vi. 20; 1 Sam. xiii. 7; 1 K. iv. 13; 2 K. vi. 26, vii. 3, viii. 8, 13; Acts ix. 25); and as a mark of conquest was to break down a portion, at least, of the city wall of the captured place, so the first care of the defenders, as of the Jews after their return from captivity, was to rebuild the fortifications (2 K. xiv. 13, 22; 2 Chr. xxvi. 2, 6, xxxii. 14; Neh. iii. 7, vi. 16; 1 Mace. iv. 69, 80, xiv. 45, Xen. Hell. ii. 2, § 15).

But around the city, especially in peaceful times, lay undefended suburbs (istani, περιποιημα, subbarba. 1 Chr. vi. 57 f.; Num. xxxv. 1-5, Josh. xxx.), to which the privileges of the city extended. The city thus became the citadel, while the population overflowed into the suburbs (1 Mace. xii. 61). The absence of walls as indicating security in peaceful times, combined with population, as was the case in the flourishing period of Egypt, is illustrated by the prophet Zechariah (ii. 4; 1 K. iv. 25; Martineau, Early Life, n. 306).

According to Eastern custom, special cities were
applied to furnish special supplies for the service of the state; cities of store, for chariots, for horsemen, for building purposes, for provision for the royal table. Special governors for these and their surrounding districts were appointed by David and by Solomon (1 K. iv. 7, 19; 1 Chr. xxvii. 25). 2 Chr. xvii. 12, xxi. 3; 1 Mac. iv. 28, xiv. 33: Jos. xix. 4. To this practice our Lord alludes in his parable of the pounds, and it agrees with the theory of Hielian government, which was to be conducted by lords of single townships, of 10, 100, or 1000 towns (Luke xix. 17, 19; Elphinston, Inhabit, ch. ii., i. 32, and App. v. p. 485).

To the Levites 48 cities were assigned, distributed throughout the country, together with a certain amount of suburban ground, and out of these 48, 18 were specially reserved for the family of Azron in Judah and 4 in Benjamin, and 6 as refuge cities (Jos. xxi. 13, 42), but after the division of the kingdoms the Levites in Israel lost their cities and resorted to Judah and Jerusalem (2 Chr. xi. 13, 14).

The internal government of Jewish cities was vested before the Captivity in a council of elders with judges, who were required to be priests: Josephus says seven judges with two Levites as officers. piagetas (Deut. xxi. 5, 19, xvi. 18, xix. 17; Ruth iv. 2; Joseph. Antiq. v. 8, § 13). A president or governor appears to have been appointed (1 K. xxii. 20; 2 Chr. xvii. 25); and judges were sent out on circuit, who referred matters of doubt to a council composed of priests, Levites, and elders, at Jerusalem (1 Chr. xxiv. 4, xxvii. 20; 2 Chr. xiv. 5, 8, 10, 11). After the Captivity Ezra made similar arrangements for the appointment of judges (Ezra. vii. 25). In the time of Josephus there appear to have been councils in the provincial towns, with presidents in each, under the directions of the great council at Jerusalem (Joseph. Antiq. xiv. 9, § 4; B. J. ii. 21, § 3; II. 12, 13, 27, 34, 57, 61, 68, 74). [SANCHEZ.]

In many Eastern cities much space is occupied by gardens, and thus the size of the city is much increased (Nicolai, Voyage, ii. 172, 238; Conybeare and Howson, i. 96; Fenton, p. 240). The vast extent of Nineveh and of Babylon may thus be in part accounted for. (Diod. i. 20; Quatrem. Curt. vi. 26; Jos. i. 11; Chardin, Voy. vii. 274, 284; Porter, Domanicus, i. 153; P. della Valle, ii. 331). In most Oriental cities the streets are extremely narrow, seldom allowing more than two loaded waggons, or one caleed and two foot passengers, to pass each other, though it is clear that some of the streets of Nineveh must have been wide enough for chariots to pass each other (Nah. ii. 5; Olearius, Trav. pp. 204, 309; and D'Hervey, Trav. in Arabia, i. 183; Buckingham, Arab Tribes, p. 339; Mrs. Poole, Englishmen in Egypt, i. 141). The word for streets used by Nahum — בַּתַּיִל מְנֹּת, from בַּתַּיִל, is used also of streets or broad places in Jerusalem (Prov. i. 29; Jer. v. 1, xvii. 4; Cant. iii. 2); and it may be remarked that the παρευρέων, by which the sick were brought to receive the shadow of St. Peter (Acts v. 15) were more likely to be ordinary streets than the special παρευρέων of the city, since it seems likely that the immense concourse which resorted to Jerusalem at the feasts would induce wider streets than in other cities. Herod built in Antioch a wide street paved with stone, and having covered ways on each side. Agram P. Pavel Jerusalem with white stone (Joseph. Antiq. xvi. 5, § 2, 3, xx. 9, § 7). The straight street of Damascus is still clearly defined and reccognizable (Ibry and Mangles, v. 86; Robinson, iii. 454, 455).

In building Ceusarea, Josephus says that Herod was careful to carry out the drainage effectually. Joseph. Antiq. xvi. 5, § 14. We determine whether the internal commerce of Jewish cities was carried on as now by means of bazaars, but we read of the bakers' street (Jer. xxxvii. 21), and Josephus speaks of the wool market, the hardware market, a place of blacksmiths' shops, and the clothes market, at Jerusalem (B. J. v. 8, § 1).

The open spaces (παρευρέων) near the gates of towns were in ancient times, as they are still used, as places of assembly by the elders, of holding courts by kings and judges, and of general resort by citizens (Gen. xxii. 10; Ruth iv. 1; 2 Sam. vi. 2, xviii. 21; 2 K. vii. 1, 3, 20; 2 Chr. xvii. 6, xxvi. 6; Neh. viii. 13; Job xxxix. 7; Jer. xvii. 19; Matt. vi. 5; Luke xii. 26). They were also used as places of public exposure by way of punishment (Jer. xx. 2; Am. v. 10).

Prisons were under the kingly government, within in the royal precinct (Gen. xxxix. 20; 1 K. xxii. 27; Jer. xxxii. 2; Neh. iii. 29; Acts xxi. 34, xxiii. 35).

Great pains were taken to supply both Jerusalem and other cities with water, both by tanks and cisterns for rain-water, and by reservoirs supplied by aqueducts from distant springs. Such was the fountain of Gibon, the aqueduct of Hezekiah (2 K. xx. 20; 2 Chr. xxxii. 20; Is. xxix. 9), and of Solomon (Eccles. ii. 6), of which latter water is still conveyed from near Bethlehem to Jerusalem (Mamre, Early Trav. p. 457; Robinson, i. 347, 348). Josephus also mentions an attempt made by Pilate to bring water to Jerusalem (Ant. xviii. 3, 2).

Burial-places, except in special cases, were outside the city (Num. xix. 11, 16; Matt. viii. 28; Luke vii. 12; John xix. 41; Heb. xiii. 12).

H. W. P.

CITIES OF REFUGE (παρευρέων), from παρευρέω, to contract in, i. e. a fugitive, hence, cities of reception), Gesen. p. 1216: πόλεις των φυλακτηρίων, φυλακτήρα, φυλακής: apud in fugitivorum uxoribus, praeda, separata: menses fugitiviorem. Six Levitical cities specially chosen for refuge to the involuntary homicide until released from banishment by the death of the high-priest (Num. xxv. 6, 13, 15; Josh. xx. 2, 7, 9). [HOLMAN, REVEREVER OF.] There were three on each side of Jordan. (1.) KEDASH, in Naphtali, Kedesh, about twenty miles E. S. E. from Tyre, twelve S. W. W. from Ramath (1 Chron. vi. 76; Robinson, ii. 439; Benj. of Tudela, Early Trav. p. 89).

(2.) SHEPHIELM, in Mount Ephraim, Nobha, (Josh. xxii. 21; 1 Chron. vi. 67; 2 Chron. x. 1; Robinson, i. 287, 288). (3.) HEBRON, in Judah, Jebus. (Josh. xix. 6; 6): we cannot determine whether the last were royal cities, and the latter sacerdotal also, inhabited by David, and fortified by Rehoboam (Josh. xii. 13; 2 Sam. v. 1; 1 Chron. v. 55; xxiv. 27; 2 Chron. x. 10; Robinson, i. 213, lii. 89).

(4.) On the E. side of Jordan — BEZER, in the tribe of Reuben, in the plains of Moab, said in the Genma to be opposite to Hebron, perhaps Bozor; but the site has not yet been found (Pent. iv. 43; Josh. xvii. 6; 29; 1 Mac. i. 28; Joseph. Antiq. iv. 7, § 4; Eichard, p. 692).

(5.) RAMEH-GIL
KAD, in the tribe of Gad, supposed to be on or near the site of c-Scott (Deut. iv. 43; Josh. xxi. 38; 1 K. xxvii. 3; Rehum, iii. 906). (6.) GOLAN, in Bashan, in the half-tribe of Mannasseh, a town whose site has not been ascertained, but which doubtless gave its name to the district of Golanites, Jactum (Deut. iv. 43; Josh. xxi. 27; 1 Chr. vii. 71; Joseph. Ant. iv. 7, § 4; Rehum, p. 815; Por- ter, Damascus, iii. 251, 254; Burchhardt, Syria, p. 289).

The Genars notices that the cities on each side of the Jordan were nearly opposite each other, in accordance with the direction to divide the land into three parts (Deut. xix. 2; Rehum, iii. 662). Maimonides says all the 48 Levitical cities had the privilege of asylum, but that the six refuge-cities were required to receive and lodge the homicide gratuitously (Calcut, On Num. xxxv.).

Most of the Rabbinical refinements on the law are stated under Blood, Revenger of. To them may be added the following. If the homicide committed a fresh act of manslaughter, he was to flee to another city; but if he were a Levite, to wander from city to city. An idea prevailed that when the Messiah came three more cities would be added; a misinterpretation, as it seems, of Deut. xix. 8, 9 (Lightfoot, Cont. Chur. cii. 238). The altar at Jerusalem, and, to some extent also, the city itself, possessed the privilege of asylum under similar restrictions; a privilege claimed, as regards the former, successfully by Adonijah and in vain by Josiah; accorded, as regards the city, to Shimei, but forfeited by him (1 K. i. 53, ii. 28, 33, 36, 46).

The directions respecting the refuge-cities present some difficulties in interpretation. The Levitical cities were to have a space of 1000 cubits (about 553 yards) beyond the city wall for pasture and other purposes. Presently after, 2000 cubits are ordered to be the suburb limit (Num. xxxv. 4, 5). The solution of the difficulty may be, either the 2000 cubits are to be added to the 1000 as "fields of the suburbs" (Lev. xxxv. 34) as appears to have been the case in the gift to Caleb, which excluded the city of Hebron, but included the "fields and villages of the city" (Josh. xxi. 11, 12, Patrick), or that the additional 2000 cubits were a special gift to the refuge-cities, whilst the other Levitical cities had only 1000 cubits for suburb. Calmet supposes the line of 2000 cubits to be measured parallel, and the 1000 perpendicular to the city wall; an explanation, however, which supposes all the cities to be of the same size (Calcut, On Num. xxxv.).

The right of asylum possessed by many Greek and Roman towns, especially Ephesus, was in process of time much abused, and was curtailed by Tiberius (Tac. Ann. iii. 60, 63). It was granted, under certain limitations, to churches by Christian emperors (Cod. i. tit. 12: Gibbon, ch. xx. iii. 35, Smith). Hence came the right of sanctuary possessed by so many churches in the middle ages (Hallam, Mobile Ages, ch. ix. pt. 1; vol. iii. p. 362, 11th ed.).

CITTIMS (Κήτους [rather Κήτος]; A.E. Κήτωτα; Celte, 1 Mac. viii. 5. [CITTM.]

CITIZENSHIP (πολιτεία; cietes). The use of this term in Scripture has exclusive reference to the usages of the Roman empire; in the Hebrew commonwealth, which was framed on a basis of religious rather than of political privileges and distinctions, the idea of the commonwealth was merged in that of the congregation, to which every Hebrew and even strangers under certain restrictions, were admitted. [CONGREGATION; STRANGERS.] The privilege of Roman citizenship was widely extended under the emperors; it was originally acquired in various ways, as by purchase (Acts xxii. 28; Cic. ad Fam. xiii. 39; Dion Cass. l. xv. 17), by military services (Cic. pro Balb. 22; Suet. Aug. 47), by favor (Tit. iii. 2; Acts iii. 47), or by manumission. The right once acquired descended to a man's children (Acts xxii. 28). The Jews had rendered signal services to Julius Caesar in the Egyptian war (Joseph. Ant. xiv. 8, § 1, 2), and it is not improbable that many obtained the freedom of the city on that ground: certainly it is that great numbers of Jews, who were Roman citizens, were scattered over Greece and Asia Minor (Ant. xiv. 10, § 13, 14). Among the privileges attached to citizenship, we may note that a man could not be bound or imprisoned without a formal trial (Acts xxii. 29), still less be scourged (Acts xvi. 37; Cic. in Verr. v. 63, 66); the simple assertion of citizenship was sufficient to deter a magistrate from such a step (Acts xxii. 25; Cic. in Verr. v. 62), as any infringement of the privilege was visited with severe punishment. A Jew could only plead exemption from such treatment before a Roman magistrate; he was still liable to it from Jewish authorities (2 Chr. xi. 24; Schel. de Syn. ii. 15, § 11). Another privilege attaching to citizenship was the appeal from a provincial tribunal to the emperor at Rome (Acts xxv. 11). [See the addition to Appeal, Amor. ed.]

W. L. B.

CITRON. [APPLE-TREE.]

CLAUDA (Κλοα, Acts xxvii. 16; called Gandos by Mela and Pliny, Klaodos by Ptolomy, and Klaodia in the Studiolum Maris Magni: it is still called Claudia-nasa, or Gauloina, by the Greeks, which the Italians have corrupted into Gossó). This small island, unimportant in itself and in its history, is of very great geographical importance in reference to the removal of some of the difficulties connected with St. Paul's shipwreck at Malta. The position of Claudia is nearly due W. of Cape Matala on the S. coast of Crete [Fair Havens], and nearly due S. of Phoenice. (See Post. i. 17, § 1; Studiolum. p. 494, ed. Gaib.) The ship was seized by the gale a little after passing Cape Matala, when on her way from Fair Havens to Phoenice (Acts xxvii. 12-17). The storm came down from the island (σαραντός, v. 14), [? see under Cretæ], and there was danger lest the ship should be driven into the African Syrtes (v. 17). It is added that she was driven to Claudia and ran under the lee of it (v. 16). We see at once that this is in harmony with, and confirmatory of, the arguments derivable from all the other geographical circumstances of the case (as well as from the etymology of the word Eurodyon or Euro-Aquilo), which lead us to the conclusion that the gale came from the west rather than the E. N. E. Under the lee of Claudia there would be smooth water, advantage of which was taken for the purpose of getting the boat on board and making preparations for riding out the gale. [Ship.] (Smith, Vog. and Shipwreck of St. Paul, 2d ed. pp. 92, 98, 253.) [3d ed. 1866, pp. 94, 100, 250.] J. S. II.

CLAUDIA (Κλαυδία), a Christian female mentioned in 2 Tim. iv. 21, as saluting Timotheus. There is reason for supposing that this Claudia
470

CLAUDIA

was a British maiden, daughter of King Cogidubnus, an ally of Rome (Tacit. Agricol. 14), who took the name of his imperial patron, Tiberius Claudius. She appears to have become the wife of Pudens, who is mentioned in the same verse. (See Martial, lib. iv. Epigr. 13). This Pudens, we gather from the inscription found at Chichester, and now in the garden at Goodwood, was at one time in close connection with King Cogidubnus, and gave an area for a temple of Neptune and Minerva, which was built by that king's authority.

Cludia is said in Martial (xi. 53) to have been corculis Britanniæ editrix. Moreover, she is there also called Kufa. Now Pomponia, wife of the late commander in Britain, Aulus Plautus, under whose Claudia's father was received into alliance, belonged to a house of which the Nod were one of the chief branches. If she herself were a Rufia and Claudia her protege, the latter might well be called Kufia; and we know that Pomponia was tried as superstitionis extremæ rei in the year 57 Tacit. Ann. xii. 32; so that there are many circumstances concurrent, tending to give verisimilitude to the conjecture.

See Archdeacon Williams's pamphlet On Pudens and Claudia;—an article in the Quarterly Review for April, 1853, entitled "The Romans at Chichester;"—and an Excursus in Alford's Greek Testament, vol. iii. Proleg. p. 104, in which the contents of the two works first mentioned are embodied in a summary form.

II. A.

Corythearc and Howson also are disposed to adopt the foregoing view of the personal and historical relations of Pudens and Claudia (Life and Epistles of Paul, ii. 284). Amer. ed.). One obvious exegetical difficulty is that Linus stands nearer than Pudens to Claudia in the order of the names (2 Tim. iv. 21), and if Claudia was the wife of either, it is arbitrary to make her the wife of the latter rather than of the former. The reply made to this is that the amanuensis, confused by Paul's rapid dictation, may have written down the names incorrectly. The German critics, as De Wette, Matthews, Doderer in Meyer's Commen. ad Actis Pauli, Tisch., Wiesinger, find no such point of contact here between secular and sacred history, but pass over the name simply with the remark that Claudia is otherwise unknown. Winer and Herzog have no articles on the name. The combinations which the writers assume who maintain that Claudia was a British princess, are strained and hypothetical. Pudens and Claudia were, confessedly, everyday names among the Romans, and therefore prove nothing as to the identity of the persons. The character of Martial forbids the idea that he could have had intimate friends among the friends of St. Paul; and still more, his invoking on their behalf the favor of heathen gods on the occasion of their marriage (iv. 13) shows that they were still addicted to idolatry and not word-sweepers of the true God.

The inscription found at Chichester also (see above) represents Pudens as a pagan. To meet these points, we are required to "suppose either that Pudens concealed his faith, or that his relatives, in their anxiety to shield him, did idolatries acts in his name." (Life and Epistles of Paul, ii. 366). North of the Tweed this ingenious theory of the British origin of Claudia has found much less favor. See the objections to it forcibly by A. Köhn in Kilti, 284; Amyx's field, Lit. i. 320; and Shirley, 584. The writer of the article there points out a near approach, at least, to a serious chronological difficulty. "Paul's Pudens and Claudia, if husband and wife, must have been married before A. D. 67, the latest date that can be assigned to Paul's writing. But Martial's epigram must have been written after this, perhaps several years after, for he came to Rome only in A. D. 69; so that if they were married persons in 67, it is not very likely that Martial would celebrate their nuptials years after this."

II. CLAUDIUS (Καῦδιους; in full, Tiberius Claudius Nero Drusus Germanicus), fourth Roman emperor, successor of Caligula, reigned from 41 to 54 A. D. He was son of Nero Drusus, was born in Lyons, Aug. 1, n. c. 9 or 10, and lived private and unknown till the day of his being called to the throne, January 24, A. D. 41. He was nominated to the supreme power mainly through the influence of Herod Agrippa the First Joseph. Ant. xix. 2, § 1, 3, 4; Suet. Claud. p. 10; and when on the throne he proved himself not ungrateful to him, for he enlarged the territory of Agrippa by adding to it Judaea, Samaria, and some districts of Lebanon, and appointed his brother to the kingdom of Chalcis, Joseph. Ant. xix. 5, § 6; Dion Cass. ix. 8, giving to this latter also, after his brother's death, the presidency over the Temple at Jerusalem (Joseph. Ant. xx. 4, § 3). In Claudius's reign unfavorable famines (Dion Cass. ix. 11, Euseb. Chron. Arm. i. 263, 271; Tacit. Ann. xii. 13), and one such occurred in Palestine and Syria (Acts xii. 28-30) under the procurators Cuspius Fadus and Tiberinus Alexander (Joseph. Ant. xx. 2, § 6, and 5, § 2), which perhaps lasted some years. Claudius was induced by a tumult of the Jews in Rome, to expel them from the city (Suet. Claud. p. 23; "Judaeos impulserat, i.e. assidue tumultantes Roma expulit." c. Actis xviii. 2). It is probable that Suetonius here refers to some open discussion between Jews and Christians, but when it, and the consequent edict, took place, is very uncertain. Orosius (Hist. vii. 6) fixes it in the 9th year of Claudius, a. D. 49 or 50; referring to Josephus, who, however, says nothing about it. Pearson (Anecd. Paul. p. 22) thinks the 12th year more probable. As Augustus has "testimonia in lustralibus" (Hieron. in Pauli epistolas in Acts Apologeticum, p. 1174), the edict of expulsion would hardly be published as long as Herod Agrippa was at Rome, i.e. before the year 49. Claudius, after a weak and foolish reign ("omnia principes se sed ministrum egit," Suet. p. 2), was poisoned by his fourth wife Agrippina, the mother of Nero (Tac. Ann. xii. 66, 7; Suet. Claud. pp. 14, 45; Joseph. Ant. xx. 8, § 1; B. J. ii. 12, § 8; October 13, A. D. 54). II. A.

CLAUDIUS LYSTAS. [LYMAS]

CLAY (κλαύς; ποσάκι: humanis od intestina), a sedimentary earth, tough and plastic, arising from the disintegration of silicious and similar minerals, and always containing silica and alumina combined in variable proportions, as the sediment of water remaining in pits or in streets, the word is used frequently in O. T. (e. g. Is. xlii. 29; Jer. xxxviii. 6; Ps. xlvii. 42; and in N. T. (ποσάκι, John iv. 6), a mixture of sand or dust with spittle. It is also found in the sense of potter's clay (Is. xxvi. 25). The alluvial soils of Palestine would no doubt supply material for pottery, a manufacture which we know was, as it still is, carried on in the country (Jer. xviii. 2-5), but our knowledge on the subject is so small as to afford little or no means of deter

material things which suggest most easily spiritual being. Hence it is, so to speak, the recognized machinery by which supernatural appearances are introduced (Is. xiv. 1; Ez. i. 4; Rev. i. 7, and *parsiim*), or the veil between things visible and invisible; but, more especially, a mysterious or supernatural cloud is the symbolic seat of the Divine presence itself—the phenomenon of deity vouchsafed by Jehovah to the prophet, the priest, the king, or the people. Sometimes thick darkness, sometimes intense luminosity, often, apparently, and especially by night, an actual fire (as in the descent of Jehovah on Sinai, Ex. xix. 18), is attributed to this glory-cloud (Pent. iv. 11; Ex. xi. 23, xxvii. 22, 23; 2 Sam. xxii. 12, 13). Such a bright cloud, at any rate at times, visited and rested on the Meruc seat (Ex. xxv. 42, 43; k K. viii. 11; 2 Chr. v. 14; Ez. xlvii. 4) and was by later writers named Shekinah. For the curious questions which the Rabbis and others have raised concerning it, e.g. whether its light was created or not, whether the actual "light" created on the "first day" (Gen. i. 3), or an emanation therefrom, Buxtorf's history of the Ark, ch. xi.-xiv. (UgoUini, vol. viii.), may be consulted. II. II.

**CLOUD. PILLAR OF (םֵּלֶדֶת).**

This was the active form of the symbolical glory-cloud, betokening God's presence to lead his chosen host, or to inspire and visit offenses, as the luminous cloud of the sanctuary exhibited the same under an aspect of repose. The cloud, which became a pillar when the host moved, seems to have rested at other times on the tabernacle, whence God is said to have "come down in the pillar" (Num. xii. 5; so Ex. xxxiii. 9, 10). It preceded the host, apparently resting on the ark which led the way (Ex. xii. 21, xl. 36, &c.; Num. ix. 15-23, x. 34). So by night the cloud on the tabernacle became fire, and the guiding pillar a pillar of fire. A remarkable passage in Curtius (v. 2. § 7), descriptive of Alexander's army on the march, mentions a beacon hoisted on a pole from head-quarters as the signal for marching; "observatur ignis nocti, funus interdum." This was probably an adoption of an eastern custom. Similarly the Persians used as a conspicuous signal, an image of the sun inclosed in crystal (ib. iii. 3. § 9). Caravans are still known to use such beacons of fire and smoke; the cloudlessness and often stillness of the sky giving the smoke great density of volume, and boldness of outline.

**CLOUTED,** Josh. ix. 5, "old shoes and clouted," i.e. patched; compare clouts, Jer. xxxviii. 11, 12.

**CNIĐUS (Κρήτης) is mentioned in 1 Mace. xxv. 23, as one of the Greek cities which contained Jewish residents in the second century before the Christian era, and in Acts xxvii. 7, as a harbor which was passed by St. Paul after leaving Myra, and before running under the lee of Crete. It was a city of great consequence, situated at the extreme S. W. of the peninsula of Asia Minor (CABYL), on a promontory now called *Cape Creio*, which projects between the islands of Cos and Rhodes (see Acts.

**COAL.** In A. V. this word represents no less than five different Hebrew words. (1.) The first and most frequently used is *Gachelth, גָּשֵׁל* (Gashel, Gashel, gashel, cæm, cober), a live ember, burning fuel, as distinguished from נָבַן (Prov. xxvi. 21). It is written more fully in Ez. x. 2 וָאָמַר לָאֵז, and in Ez. i. 13, וָאָמַר לָאֵז וַּאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹр לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז וַאֲמֹר לָאֵז V. 1533, 1604. [Newton, C. T., Discoveries at Halicarnassus, Chiusus, and Brundibier, Lond. 1802]
in Proverbs xxv. 22 we have the proverbial expression, "If thou shalt heat coals of fire upon his head," which has been adopted by St. Paul in Romans xii. 20, and by which is metaphorically expressed the burning shame and confusion which men must feel when their evil is requited by good. In Ps. cxix. 4, "coal" = burning brands of wood (not "juniper," but broom), to which the false tongue is compared (James iii. 6).

In 2 Samuel vii. 18 the quenching of the live coal is used to indicate the threatened destruction of the single remaining branch of the family of David submerged by Joah; just as Lucian (Tim. § 3) uses the word carpos, in the same connection.

The root of רַעִּנָּה is רַעִּנָּה, which is possibly the same in meaning as the Arab. مَكَحْ، to light a fire, with the change of ه to هو.

2. Pechum, ♦קֶפֶך (סָפִּים, שָׂפֵּ֖א: carbo, pruna). In Proverbs xxvi. 21, this word clearly signifies fuel not yet lighted, as contrasted with the burning fuel to which it is to be added; but in Is. xli. 12, and liv. 16, it means fuel lighted, having reference in both cases to smiths' work. It is derived from קֶפֶך: Arab. مَكَحْ, to be very black.

The fuel meant in the above passages is probably charcoal, and not coal in our sense of the word.

3. Retseph, or Risrub, רַגְשֵּפָּה, רַגְשֵּפָּה (שָׂפִּים: calcina, calcina). In Is. vi. 6; but in x. xix. 6, יָשָׂפָּה יָשָׂפָּה, is rendered by the LXX. ἰθυκρυσίας, and by the Vulg. prunis subsecuvinicis).

In the narrative of Elijah's miraculous meal the word is used to describe the mode in which the cake was baked, namely, on a hot stone, as is still usual in the East. Comp. the Arab. ﷲ‏کَفَّة, a hot stone on which flesh is laid. רַגְשֵּפָּה, in Is. vi. 6, is rendered in A. V. "a live coal," but properly means "a hot stone." The root is יָשָׂפָּה to lay stones together as a pavement.

4. יָשָׂפָּה, in Hab. iii. 5, is rendered in A. V. "burning coals," and in the margin "burning diseases." The former meaning is supported by Cant. viii. 6, the latter by Deut. xxx. 24. According to the Rabbinical writers, יָשָׂפָּה = יָשָׂפָּה, pruna.

5. Shechor. — In Lam. iv. 8, יָשָׂפָּה יָשָׂפָּה יָשָׂפָּה יָשָׂפָּה, is rendered in A. V. "their visage is blacker than a coal," or in the marg. "darker than blackness." יָשָׂפָּה is found but this once, and signifies to be black, from root יָשָׂפָּה. The LXX. render it by ἰθυκρυσίας, the Vulg. by corbones. In other forms the word is frequent, and Shiloh is a usual name for the Nile. [SHEHOR.] W. D.

There can, we think, be no doubt that the fuel denoted by the Heb. words וּנְכָלָּה (יָשָׂפָּה יָשָׂפָּה) and פֶּכֶלִים (יָשָׂפָּה יָשָׂפָּה) is charcoal, and not mineral coal. There is no evidence to show that the ancient Hebrews were acquainted with the substance we now denominate "coal." Indeed it seems pretty clear that the ancients generally used charcoal for their fuel; and although there is a passage in Theophrastus (Phys. Hist. xxii. 11, ed. Reiske) in which we learn that fossil coal was found in Liguria and Els, and used by "the smiths," yet its use must have been very limited. The houses of the ancient Greeks and Romans were without chimneys in our sense of the word (see this subject admirably discussed by Beckmann, Hist. Invent. l. 225). As the houses had merely an opening in the centre of the roof, the burning of "coal" would have made even their kitchens intolerable. Little has been done for the zoology and botany of Palestine, still less has been done for its geology. "Indications of coal are exhibited," says Kittto (Phys. Hist. Pal. p. 67), "in various parts of the Lebanon mountains; and here and there a narrow seam of this mineral protrudes through the superincumbent strata to the surface; and we learn from Mr. Elliot (ii. 257) that the enterprise of Mohammed Ali has not suffered even this small supply of national wealth to escape his notice." At Corfu, 8 miles from Beirut, and 2500 feet above the level of the sea, where the coal-seams are 3 feet in thickness, good coal is obtained, whence it was transported on mules to the coast.

The following works contain all that is at present known respecting the geology of Syria: —

W. H.

* The Greek words in the N. T. for "coals" (Rom. xii. 20) and "fire of coals" (John xviii. 18, and xxi. 9) are ἀνθρακεῖς and ἀνθρακις, i.e. charcoal or coal made of wood. The incident of Peter's warning himself at such a fire on the night of the crucifixion, tallies both with the climate of the country at the end of March or beginning of April, and with the present customs of the people. The nights at Jerusalem, at that season of the year, are cool, though the days may be warm. The air, after sunset, becomes chilly, and, under the open sky, a person needs to increase his raincoat or have recourse to a fire. Coal is one of the articles of fuel which the inhabitants of Jerusalem burn at the present day. Much of the wood which they consume, says Tobler (Dendroblitter auf Jerusalem, p. 180), and probably much of that out of which the coal is made, is procured from the region of Hebron. This writer mentions also that the coal fire is often built, especially in houses of the better class, in a vessel like a brazier, around which the family gather, and, with unt-stretched hands, stand and warm themselves. It is a custom, as he remarks (Dendroblitter, p. 181), that vividly recalls the ancient scene in the court of the high-priest (Ex. xxv. 18).

Dr. Robinson furnishes an outline of the results of the observations of such professional explorers as Seetzen, Russegger, Schubert, Anderson, and others, in relation to the "Geological Features" of Palestine (chapter iv. Phys. Geogr. p. 311 ff.), which the general reader will find convenient and interesting. Mr. Gage has inserted in his Ritson's Topography of Palestine iii. 351 ff. (Appendix) the elaborate articles on the "Former
tion of the Basin of the Dead Sea," and other related topics by M. Louis Larit, etc., etc., translated by Mr. Grove from the French. Mr. Grove has largely with questions of this nature in his article on SEA, THE SALT, in this Dictionary. (See additions in Amer. ed.) On that particular subject, and on the geology of the country generally, we have much valuable information in Mr. Tristram's Land of Israel (scattered through the work, but especially in chapter xv.)

II.

* COAST (derived though the French zéte, from the Latin zeto, "a rib", "a side"), stands often in the A. V. for "border" (Judg. xi. 24; 1 Sam. v. 6; Matt. viii. 34, &c.). The present usage restricts the term to the sea-shore.

COAT. [Dress.]

* COAT OF MAIL, 1 Sam. xvii. 5, 38, See Arms, H. § 1, p. 161.

COCK (αλετρός, gyllius). There appears to be no mention of domestic poultry in the O. T., as the passages where the LXX. and Vulg. (as in Prov. xxvi. 31; 1 Sam. xvii. 17) "read αλετρός and gyllius having no reference to that bird. In the N. T. the "cock" is mentioned in reference to St. Peter's denial of our Lord, and indirectly in the word μαλακτοφωνία (Matt. xxvi. 34; Mark iv. 36, xiii. 37, &c.). The origin of the numerous varieties of our domestic poultry is undoubtedly Asiatic, but there is considerable doubt as to the precise breed whence they were sprung, as well as to the locality where they were found. Tenunick is of opinion that we are chiefly indebted to the Mahay Gallus Gignatcius and the Indian G. Ben- kier for our domestic birds. We know that the domestic cock and hen were early known to the ancient Greeks and Romans. Plutarch (Lucan. Arv. 164) calls the cock the Persian bird (πτηνής σατύρος). It is not at all improbable that the Greeks obtained domestic birds from Persia. As no mention is made in the O. T. of these birds, and as no figures of them occur on the Egyptian monuments (Wilkinson, Ivo. Egypt. i. 244, ed. 1854), we are inclined to think that they came into Babia with the Romans, who, as is well known, prized these birds both as articles of food and for cock-fighting. The Mishna (Rob. Know. vii. 7) says that they do not cock during the days of the Passover according to the law. "Here is a bone broken as an objection to the evangelical history. On this subject a writer in Harris' Dict. of Nat. Hist. of Isr. p. 74, ed. 1831, very properly remarks, "If there was any restraint in the use or domestication of this bird it must have been an arbitrary practice of the Jews, but could not have been adhered to, there being no record of the practice in the Talmud, as officers or traders."

Thompson (Land and Book, p. 672) says the fowl are not common in Jerusalem, "that they swarm round every door, share in the food of their possessors, are at home among the children in every room, roast over head at night, and with their waddle and crowing are the town cock and the morning bell to call up sleepers at early dawn."

As to the cock-crowing see TIME. W. H.

COCKATRICE. A not very happy rendering by the A. V. of the Hebrew word צייפנית (tsiphônî). We have vezifô, vezîfô, in 3 Marc. v. 22. H.

M. Louis Larit. (See Prov xxiii. 32, margin; Is. xi. 8, lix. 5; Jer. viii. 17. The cockatrice is a fabulous animal concerning which absurd stories are told. [Ainmer.] W. H.

COCKLE (אַלַּסִּים, bashăl; βάρος, spint), occurs only in Job xxxii. 40: "Let thistles grow instead of wheat, and cockle instead of barley."

The plural form of a Heb. noun, namely, אַלַּסִּים (bashkin), is found in Is. v. 2, 4, A. V. "wilde grapes." It is uncertain whether these two words denote "noxious weeds" generally, or some particular plant. Celsius has argued in favor of the aspen, the Acionition Aphyllus, which however is quite a mountain—never a field—plant. He traces the Hebrew name to a Persian word (Bashk) of somewhat similar form. The bashkin of Isaiah (l. c.), which the LXX. render "thorns" (ἄκαθαρτα), the Vulg. "bohmen," are by some thought to be the fruit of the Vitis bohmenae of Linnaeus, a N. American plant! Hassequith thought he had discovered the bashkin in the berries of the hoary nightshade, which the Arabs call ouz-esdelib, i. e., "wolf's mouth.""[1] Trench (Syn. p. 290), says, "a product could not have found a plant more opposite to the vine than this, for it grows much in the vineyards, and is very pernicious to them." Some, as Parkhurst (Lex. Heb. s. v.), believe some "stinking weed" is intended by bashkâh, in Job l. c., from the root בָּשַׁק (bâsk), "to smell as carrion." If the word denotes a plant in so limited a sense, we would suggest the hound's tongue (Cynoglossus), which has literally a carrion smell. But we are inclined to believe that the bashkâh and bashkin denote any bad weeds or fruit: the bashkin of the prophet's vineyard may thus be understood to represent "sour or bad grapes," with which view accord the caprae of Aquila and the gærâh of Symmachus (see also Miller, Hebrews, i. 293), and the bashkâh of Job (l. c.) may denote bad or smitten barley. The bunt or stinking root (Fecru potibâ) which sometimes attacks the ears of wheat and barley is characterized by its disgusting odor, which property would suit the etymology of the Hebrew name; or the word may probably denote some of the useless grasses which have somewhat the appearance of barley, such as Bashan marianum, &c. W. H.

CELESTRYIA (Κελεστρία, Celestria), "the kolath Narria," was (strictly speaking) the name given by the Greeks, after the time of Alexander, to the remarkable valley or hollow (κελέστρια) which intervenes between Lebanon and Anti-Lebanon, stretching from lat. 33° 20' to 34° 40', a distance of nearly a hundred miles. As applied to this region the word is strikingly descriptive. Discor- diants the geographer well observes upon this, in the lines—

"The kolath nartia eipron otopia, én kòt de aithp.

Makrâr kai énousiasmôi doxip ón brôs Ômôvov.

Pirroxi, 898, 900.

A modern traveller says, more particularly—

"We finally looked down on the vast green and red valley—green from its vet unripe corn, red from its vineyards not yet verdant—which divides the range of Lebanon and Anti-Lebanon; the for- mer reaching its highest point in the snowy crest

of the valley which they bound. The view of this

great valley is chiefly remarkable as being exactly

to the eye what it is on maps — the 'hollow' be-

 tween the two mountain ranges of Syria. A screen

through which the Lebanon (Litany) breaks out,

closes the south end of the plain. There is a

similar screen at the north end, but too remote to

be visible' (Stansely's Sin. of Pol. p. 407). The

plain gradually rises towards its centre, near which,

but a little on the southern declivity, stand the

ruins of Baalbek or Helopolis. In the immediate

neighborhood of Baalbek rise the two streams of

the Oronites (Nahr-el-Am) and the Litany, which

flowing in opposite directions, to the N. W. and

the S. E., give freshness and fertility to the tract

inclined between the mountain ranges.

The term Coele-Syria was also used in a much

wider sense. In the first place it was extended so

as to include the inhabited tract to the east of the

Anti-Libanus range, between it and the desert,

in which stood the great city of Damascus; and

then it was further carried on upon that side of Jordan,

through Trachonitis and Perea, to Idumaea and

the borders of Syria (Strab. vi. § 21; Polyb. v.

80, § 3; Joseph. Ant. i. 11, § 5). Ptolemy (v. 15)

and Josephus (Ant. xiii. 13, § 2) even place Scy-

thopolis in Coele-Syria, though it was upon the

west side of Jordan; but they seem to limit its

extent southwards to about lat. 31° 30', or the

country of the Ammonites (Pol. v. 15; Joseph. i.

11). Ptolemy distinctly includes in it the Damasc-

us country.

None of the divisions of Syria (Arava) in the

Jewish Scriptures appear to correspond with the

Coele-Syria of the Greeks; for there are no

grounds for supposing, with Calmet (Dict. of the

Bible, art. Cæliesyria), that 'Syria of Zobah' is

(Cœlesyria). Coele-Syria seems to have been

included under the name of 'Syria of Damascus'

(γυναικοεράω), and to have formed a portion of

that kingdom. [A.D.M.] The only distinct ref-

erence to the region, as a separate tract of country,

which the Jewish Scriptures contain, is probably

that in Amos (i. 5), where the inhabitants of the

plain of Aven' (γυναικοεράω, Bikath-Aven) are

threatened, in conjunction with those of Damascus.

Bikath is exactly such a plain as Coele-Syria (Stan-

ley's Palestine, Append. p. 184), and the expression

Bikath-Aven, 'the plain of Idols,' would be well

applied to the tract immediately around the great

sanctuary of Baalbek. [Aven.] In the Apocry-

phal Books there is frequent mention of Coele-Syria

in a vague sense, nearly as an equivalent for

Syria (1 Esdr. ii. 17, 24, 27, iv. 45, vi. 29), vii.

1, 8, 9, 12, 13; Macro., Mace. xix. 2; Test. xi.

2, 3, 4, viii. 3, x. 11). In all these cases the word is

given in A. V. as CELOSYRIA.

G. L.

COFFER (ἐρείπω, probably from ἔριπος, to be

worn: ἐρεῖπος, a morose box hanging from

the side of a cart (1 Sam. vi. 8, 11, 15)).

This word is found nowhere else, and in each of

the above examples has the definite article, as if of

some special signification. [H. W. P.]

COFFIN. [BURIAL.]

A few points require notice under this head,

which are not found under Burial. One is that

in Gen. i. 26, the body of Joseph, after being em-

balmed, is said to have been put into a 'coffin' (A.

V.); or wooden chest (γυναικοεράω). Objectors

have urged from this expression that the writer of

Genesis was ignorant of Egyptian customs, and hence

could not have known Moses, if Moses was born

and brought up in Egypt. But this objection mis-

states the usage in such cases. Basaltic sarcophagi

were very unusual, and, as the general rule, the

mummy was placed in a wooden coffin. Herodotus

says expressly (ii. 80) that the body, after being
duly prepared, was 'given back to the relatives,

who inclosed it in a wooden case which they made

for the purpose, shaped into the figure of a man.'

See Rawlinson's Herodotus, ii. 143, and Hengsten-

berg's Die Bächer Moses und Egypten, p. 71

(Robinson's trans. p. 76). 'If a massive tomb or

lofty pyramid had been erected to his memory, and

if his mortal remains had been deposited there like

those of the princes of Egypt, it would have been

supposed that his body would remain in Egypt till

the day of doom. But he would not permit this to

be done; he 'took an oath of the children of Israel

that they should carry up his bones' from Egypt to

Canaan; and he was content with a simple

coffin of wood.' (Wordsworth, Genesis, p. 197.)

'Cofer,' the margin rendering of the A. V. for

σοφός in Luke vii. 14, is probably more correct than

'lier' in the text. The proper Greek for 'lier'

is φέρετρον, ελκήν, λειον (in modern Greek φορέας

κρύνων). With this stricter meaning we must

infer that the coffin was an open one, since other-

wise the young man whom the Saviour restored to

life could not have 'sat up' at once, as he did in

obedience to our Lord's command. But if σοφός

refers to the bier or litter on which the body was

carried, it must be from an accommodated sense of

the word, corresponding perhaps to the Hebrew

םַעַם, as in 2 Sam. iii. 31. [Comp. Lightfoot, Hor.

Hebr. on Luke vii. 12, 14.] This latter ex-

planation is not necessary. Nearly all admit that

the coffin was not only sometimes used among the

Hebrews, but was occasionally, at least, if not as

a general practice, made as to be open at the top.

See Winer, Bibl. ii. 16; Herzog, Real-Encycl. i

773; Paulus, Comm. ib. dss. N. T. test. i. 824.

The present customs of Palestine are not incon-

sistent with either view. We are permitted to

lay before the reader the following statement of Dr.

Van Dyck. 'At present coffins are only used in

the cities, and even there they have been in use for

only a comparatively short period. The general

way of burial is to array the corpse in its best
dress, and, if it were living, and lay it on a bier with

no covering at all, or with a cloak thrown over

the face. The shroud, a long piece of white cotton

tissue, is wrapped around the body at the grave.

The grave has at the bottom, on all four sides, a

ledge of stones built up against its sides high enough
to allow the body to be deposited in the niche thus

made, and be covered with boards, the ends of which
rest on this ledge and prevent the earth from actually

touching the body. I have attended scores of bar-

emumations, and I never saw a corpse carried that
could not have sat up at once had it been restored
to life. In Beirit coffins have more recently

come into use, which may be left uncovered until

the grave is reached, or, as is often the case with

Christians, they are closed at the house or church
Mohammedans in Beirút carry the dead to the grave on a bier, as above mentioned, and sometimes put the body into a rude coffin at the grave.

II.

COLA (יוֹלָדָא; Alex. Ὠλάντα; [Sin. Vulg.-omit., only], the position or real name of which has not been ascertained. Simonis [Onom. N. T. 170] suggests Abel-nocholah.

COLHZEH (םילשה נולאש [all-seeing]): [in Neh. iii. 15.] Ὠλάντα; [Vat. omits.; in xi. 5, Χαλαδά, Vat. F.) Χαλαδα (Chaldean), a man of the tribe of Judah in the time of Nehemiah (Neh. iii. 15, xi. 5).

COLIUS (אוליו; [Vat. Καρπος; Abd.] Alex. קַלּוֹא: Colias, 1 Esdr. ix. 23. [KELAIUH].

COLLAR. For the proper sense of this term, as it occurs in Judg. viii. 26, see Earrings. The expression רחֵץ (as the collar) in Job, xxx. 18, is better read רוחץ (comp. Job xxiii. 6), in which case the sense would be "it bindeth me as my coat," referring to the close fit of the chiton.

The נב, literally the "mouth," as a part of a garment, refers to the orifice for the head and neck, but we question whether it should be applied to any other robe than the saecroval ephod (Ex. xxviii. 23; Ps. cxxxiii. 2). The authority of the LXX. (σακρον το περιστριμαντιον), of the Vulg. (quasi capiti), and of Gesenius (Thes. p. 1088), must however be cited in favor of the ordinary rendering.

W. L. B.

COLLEGE, THE (רְשׁוֹתָה; הַמַּקְרָמָה; Seconda). In 2 K. xxi. 14 it is said in the A. V. that Habbuk the prophetess "dwelt in Jerusalem in the college," or, as the margin has it, "in the second part." The same part of the city is undoubtedly alluded to in Zeph, i. 10 (A. V. "the second"). Our translators derived their rendering "the college" from the Targum of Jonathan, which has "house of instruction," a school-house supposed to have been in the neighborhood of the Temple. This translation must have been based upon the meaning of the Hebrew midban, "repetition," which has been adopted by the Jeshu-Syracian and the word was thus taken to denote a place for the repetition of the law, or perhaps a place where copies of the law were made (comp. Deut. xvii. 18; Josh. viii. 32). Rashî, after quoting the rendering of the Targum, says, "there is a gate on the [Temple] court, the name of which is the gate of Habbuk in the treatise Middoth [i. 3], and some translate מִדְבַּן הַיָּהּ without the wall, between the two walls, which was a second part (midbanu) to the city." The latter is substantially the opinion of the author of Quest. in Liber, Rg. attributed to Jerome. Keil's explanation (comm. in loc.) is probably the true one, that the Midbanu was the "lower city," called by Josephus ἡ ἁλειπτική πόλις (Ant. xxv. 11, § 5), and built on the hill Akra. Ewald (in Zeph. i. 10) renders it Naxia-stad, that is, Bezezah, or New Town.

Others have explained the word as denoting the quarter of the city allotted to the Levites, which was a second or inferior order as compared with the priests, or to the priests who were second in rank as compared with the high-priest. Junius and Tremellius render "in parte secunda ab eo,"

that is, from the king, the position of Habbuk's house, next the king's palace, accounting for the fact that she was first appealed to. Of conjectures like these there is no end. W. A. W.

* * * * *

In the same sense the word מִדְבַּן alone is used in 2 K. xxii. 14, and 2 Chr. xxxiv. 22 (A. V. in both passages, "college"), and in Zeph. i. 10 (A. V. "second"). The Latin Vulgate, in 2 K. and 2 Chr., translates, "qua habitat in Jerusalem in Secundâ," and in Zeph., "et ululatus a Secundo in A.V. The absurd idea of a "college" was received by the first Christian Hebraists, at the time of the Reformation, from their Jewish teachers. The Targum of Jonathan, 2 K. xii. 24, acting the interpreter here as elsewhere (Herzog's Keil-Liturg. xv. 678) has מִדְבַּן, house of instruction, school, and is followed in the Syriac version of the parallel passage in 2 Chr. xxiv. 22. Accordingly, Sebastian Minster (Hebrew Bible, with Latin translation and notes, Basle, 1546) translates, in 2 K., "in domo doctrinae," with the annotation: "Exponent hic communitur Hebraei mihi pro 'ululatus' vel, ut Chal. interpreps verit, מִדְבַּן id est, dominus doctrinae seu studi laudis divinis." He adds, from the Rabbinic writers: "En profetis crinitum locus juxta templum, in quo docuit quique convenientem, et confredante de lege et vaticinis prophetarum." Having no Targum on the parallel in 2 Chr., he there retained the rendering of the Latin Vulgate.

This Rabbinic notion thus became current among Christian scholars, and was at length incorporated in our authorized English version.

It is interesting to trace this rendering of the A. V. in the earlier stages of our vernacular Bible. Coverdale's Bible (first published in 1535) has in 2 K. xxi. 14, "a she dwelt in Jerusalem in the second part" (probably a misprint for "parte," which appears in his version of the parallel passage in 2 Chr.). Matthew's Bible, so called (1557), generally understood to be essentially Tyndale's version of the Old Testament, has in both passages, "dwelt in Jerusalem in the second ward." Cranmer's Bible (1540) has in 2 K., "in the house of the doctrine," but in 2 Chr. "within the second wall;" followed in both passages by the Bishops' Bible (1558). The Geneva version (1550) has in 2 K., "in the college," 2 Chr. "within the college" (with the marginal note on the former passage, "or, the house of doctrine, which was near to the temple;" i.e., as in the Rabbinic commentaries referred to above), and in both passages was followed by King James's revisers.

T. J. C.
which means simply "fat," or "fatness." It is said to be a Yorkshire word, still used, signifying lumps or slices of meat (Eastwood and Wright's Bible Word-Book, p. 114). As "fatness" occurs just before, the translators may have wished to vary the expression, or may have been guided by Dr. Conant (Translation of the Book of Job, p. 54) renders "fatness" in one line of the parallelism, and "fat" in the other.

H.

**COLORS.**

COLORS, the terms relative to color, occurring in the Bible, may be arranged in two classes, the first including those applied to the description of natural objects, the second those artificial mixtures which were employed in dyeing or painting.

In an advanced state of art, such a distinction can hardly be said to exist; all the hues of nature have been successfully imitated by the artist; but among the Jews, who fell even below their contemporaries in the cultivation of the fine arts, and to whom painting was unknown until a late period, the knowledge of artificial colors was very restricted. Dyeing was the object to which the colors known to them were applied. So exclusively were the ideas of the Jews limited to this application of color, that the name of the dye was transferred without any addition to the material to which it was applied. The Jews were not however by any means insensible to the influence of color: they attached definite ideas to the various tints, according to the use made of them in robes and vestments; and the subject exercises an important influence on the interpretation of certain portions of Scripture.

1. The natural colors noticed in the Bible are white, black, red, yellow, and green. It will be observed that only three of the prismatic colors are represented in this list; blue, indigo, violet, and orange are omitted. Of the three, yellow is very seldom noticed; it was apparently regarded as a shade of green, for the same term *greenish* (τῇ κιτρίνῳ) is applied to gold (Ps. lxxviii. 13), and to the leporus spot (Lev. xii. 49), and very probably the golden (τῇ κιτρίνῳ) or yellow hue of the leporus hair (Lev. xiii. 30-32) differed little from the greenish spot on the garments (Lev. xiii. 49). Green is frequently noticed, but an examination of the passages in which it occurs, will show that the reference is seldom to color. The Hebrew terms are *ramah* (רמָה) and *zirvah* (צירבה); the first of these applies to what is vigorous and flourishing, hence it is metaphorically employed as an image of prosperity (Job xv. 32; Ps. xxxvii. 5, lii. 8, xci. 14; Jer. xii. 16, xvii. 8; Dan. iv. 4; Hos. div. 5); it is invariably employed whenever the expression of a green tree is used in connection with holier atrocities, as though with the view of con veying the idea of the outgrowing branches which served as a canopy to the worshippers (Dent. xii. 2; 2 K. xvi. 4); elsewhere it is used of that which is fresh, as oil (Ps. xcii. 10), and newly plucked boughs (Cant. i. 16). The other term, *zirvah*, has not been used in this peculiar designation.

* * * 

Walch, in his Dissertations in Acta Apostolorum (Σπραττομενοι Philippoom, iii. 281-302), treats fully of this municipal peculiarity of Philippi.
the radical signification of putting forth leaves, sprouting (Gesen. Theol. p. 632); it is used indiscriminately for all productions of the earth fit for food (Gen. i. 30, ix. 3; Ex. x. 15; Num. xxii. 4; Is. xxv. 6; cf. χαράσθη, Rev. vii. 5, ix. 4), and again for all kinds of garden herbs (Deut. xi. 10; 1 K. xxi. 2; 2 K. xix. 20; Prov. xiv. 17; Is. xxxvii. 27); contrast the restricted application of our grœsus, when applied to grass, it means specifically the young, fresh grass (Sæb. Ps. xxxvii. 2), which springs up in the desert (Job xxxix. 8). Elsewhere it describes the sickly yellow hue of mildewed corn (Deut. xlviii. 22; 1 K. viii. 37; 2 Chr. vi. 28; Am. iv. 9; Hag. ii. 17); and lastly, it is used for the entire absence of color produced by fear (Jer. xxx. 6; compare χαράσθη, II. x. 376); hence χαράσθη (Rev. vi. 8) describes the ghastly, livid hue of death. In other passages "green" is erroneously used in the A. V. for white (Gen. xxxv. 37; Esth. i. 6), young (Rev. vii. 14, xxi. 14), Lios (Judg. vii. 5, 8), soppy (Job. viii. 10), and unripe (Cant. ii. 13). Thus it may be said that green is never used in the Bible to convey the impression of color.

The only fundamental color of which the Hebrews appear to have had a clear conception was red; and even this is not very often noticed. They had no scientific knowledge of colors, and we cannot but think that the attempt to explain such passages as Rev. iv. 3 by the rules of philosophical truth, must fail (see Hengstenberg, Com. in loc.). Instead of assuming that the emerald represents green, the jasper yellow, and the sardine red, the idea intended to be conveyed by these images may be simply that of pure, brilliant, transparent light. The emerald, for instance, was chiefly prized by the ancients for its glittering, scintillating qualities (αρεστής, Orphei de lex. p. 608), whence perhaps it derived its name (σαρδίως, from σαρπίδως). The jasper is characterized by St. John himself (Rev. xxi. 11) as being crystal-clear (σαρακτάς), and not as having a certain hue. The sardine may be compared with the amber of Ez. i. 4, 27, or the burned brass of Dan. x. 6, or again the fine brass, "as if burning in a furnace," of Rev. i. 15, each conveying the impression of the color of fire in a state of pure incandescence. Similarly the beryl, or rather the chrysolite (the Hebrew Thuuzrth), may be selected by Daniel (x. 6) on account of its transparency. An exception may be made perhaps in regard to the sapphire, in as far as its blue answers to the deep blue of the firmament (Ex. xxiv. 10; cf. Ez. i. 26, 1 x), but even in this case the peculiarity (τιθηρφας, omitted in A. V., Ex. xxiv. 10) or polish of the stone (comp. Lam. iv. 7) forms an important if not the most important in the comparison. The highest development of color in the mind of the Hebrew evidently was light, and hence the prominence given to white as its representative (comp. the connection between λευκός and luç). This feeling appears both in the more numerous allusions to it than to any other color — in the variety of terms by which they discriminated the shades from λευκός, dull tint (τιθηρφας, blackish, Lev. xiii. 21 ff.) to the most brilliant splendor (τιθηρφας, Ez. viii. 2; Dan. xii. 3) — and in the comparisons by which they sought to heighten their ideas of it, an instance of which occurs in the three accounts of the transfiguration, where the countenance and roles are described as like "the sun" and "the light," (Matt. xvii. 2), "shining, exceeding wide as snow" (Mark i. 3), "glistening" (Luke i. 20). Snow is used eleven times in a similar way: the sun five times; wool four times; milk once. In some instances the point of the comparison is not the actual color of the object, but the idea of color: as "white as" or "white as a garment." In reference to the white color of the Hebrew dress, and in Ps. lxviii. 13, where the glancing lines of the dove's plumage suggested an image of the brilliant effect of the white holiday costume. Next to white, black, or rather dark, holds the most prominent place, not only as its opposite, but also as representing the complexion of the Orientals. There were various shades of it, including the brown of the Nile water (whence its name Sameh) — the reddish tint of early dawn, to which the completion of the bride is likened (Cant. vi. 10), as well as the black, hue produced by a flight of locusts (Joel ii. 2) — and the darkness of blackness itself (Lam. iv. 8). As before, we have various heightening images, such as the tents of Kedar, a flock of goats, the raven (Cant. i. 5, iv. i. 11) and sableketh (Rev. vi. 13). Red was also a color of which the Hebrews had a vivid conception; this may be attributed partly to the prevalence of that color in the outward aspect of the countries and peoples with which they were familiar, as attested by the name Edom, and by the words abuawah (earth), and adam (man), so termed either as being formed out of the red earth, or as being red in comparison with the fair color of the Assyrians, and the black of the Ethiopians. Red was regarded as an element of personal beauty; comp. i Sam. xvi. 12; Cant. ii. 1, where the lily is the red one for which Syria was famed (Pinn. xxi. 11); Cant. iv. 3, vi. 7, where the complexion is compared to the red fruit of the pomegranate; and Lam. iv. 7, where the hue of the skin is redder than coral (A. V. "rubies") contrasting with the white of the garments before noticed. The three colors, white, black, and red, were sometimes intermixed in animals, and gave rise to the terms (οηηη, "dappled" (A. V. "white"), probably white and red (Judg. v. 10); (οηηη, "ringstraked," either with white bands on the legs, or white-footed; (οηηη, "spackled," and (οηηη, "spotted," white and black; and lastly (οηηη, "piedblack" (A. V. "grisled"), the spots being larger than in the two former (Gen. xxx. 32, 35, xxxi. 10); the latter term is used of a horse (Zech. vi. 3, 6) with a symbolical meaning: Hengstenberg (Christl. in loc.) considers the color itself to be meaningless, and that the prophet has added the term strong (A. V. "dark"), by way of explanation: Hitzig (Com., in loc.) explains it, in a peculiar manner, of the complexion of the Egyptians. It remains for us now to notice the various terms applied to these three colors.

1. Whitt. The most common term is (οηηη), which is applied to such objects as milk (Gen. xlix. 12; numah (Ex. xvi. 31), snow (Is. i. 18), horses (Zech. i. 8), raincoat (Ez. iv. 8); and a derivative word expresses the color of the moon (Is. xxiv. 23), (οηηη), dazzling white, is applied to the complexion (Cant. v. 10); (οηηη), a term of a later age, to snow (Dan. vii. 9 only), and to the paleness of shame (Ia).
COLORS

22. עַרְבָּן; ְבַיֶּנֶּק, to the hair alone. Another class of terms arises from the textures of a naturally white color, as ְבַיֶּנֶּק and ְבַיֶּנֶּק. These words appear to have been originally of foreign origin, but were connected by the Hebrews with roots in their own language descriptive of a white color (Gesen. Thesaur. pp. 190, 1384). The terms were without doubt primarily applied to the material, but the idea of color is also prominent, particularly in the description of the curtains of the tabernacle (Ex. xxvi. 1), and the priests’ vestments (Ex. xxviii. 1). ְבַיֶּנֶּק is also applied to white marble (Esth. i. 6; Cant. v. 15); and a cognate word ְבַיֶּנֶּק, to the lily (Cant. ii. 16). In addition to these we meet with ְבַיֶּנֶּק (βίστρος, Esth. i. 6, viii. 15), and ְבַיֶּנֶּק (καθώρασας; A. V. “green,” Esth. i. 6), also descriptive of white textures.

White was symbolical of innocence: hence the raincoat of angels (Mark xvii. 5; John xxi. 12), and of glorified saints (Rev. xiv. 8, 14), is so described. It was also symbolical of joy (Exod. ix. 22); and, lastly, of victory (Zech. vi. 3; Rev. vi. 2). In the Revelation the term λευκός is applied exclusively to what belongs to Jesus Christ (Wordsworth’s Apoc. p. 105).

2. BLACK. The shades of this color are expressed in the terms ְבַיֶּנֶּק, applied to the hair (Lev. xiii. 15; Cant. v. 11); the complexion (Cant. i. 5), particularly when affected with disease (Job xxx. 30); horses (Zech. vi. 2, 6); דַּקָּר, literally scorched (גַּדֵּר; A. V. “brown,” Gen. xxx. 32), applied to sheep; the word expresses the color produced by influence of the sun’s rays: דַּקָּר, literally to be dirty, applied to a complexion blackened by sorrow or disease (Job xxx. 30); mourning’s robes (Jer. viii. 21, xiv. 2; compare ג’דָרֵד and ג’דָרֵד). A clouded sky (1 K. xvi. 45): night (Mic. iii. 6; Jer. iv. 28; Joel ii. 10, iii. 15); a turbid brook (whereas possibly קֹדֶר, particularly when rendered so by melted snow (Job vi. 16). Black, as being the opposite to white, is symbolical of evil (Zech. vi. 2, 6; Rev. vi. 5).

3. RED. דַּקָּר is applied to blood (2 K. iii. 22); a garment sprinkled with blood (Is. xliii. 2); a heifer (Num. xi. 2); potage made of lentils (Gen. xxv. 30); a horse (Zech. i. 8, vi. 2); wine (Prov. xxiii. 31); the complexion (Gen. xxv. 25; Cant. v. 10; Lam. iv. 7). דַּקָּר ְבַיֶּנֶּק is a slight degree of red, redish, and is applied to a leprous spot (Lev. xiii. 19, xiv. 37). דַּקָּר, literally for-colored, bay, is applied to a horse (A. V. “speckled,” Zech. i. 8), and to a species of wine bearing a purple grape (Is. v. 2, vi. 8); the translation “bay” in Zech. vi. 3, A. V. is incorrect. The corresponding term in Greek is μαύρος, literally red as fire. This color was symbolical of bloodshed (Zech. vi. 2; Rev. vi. 4, xii. 3).

II. ARTIFICIAL COLORS. The art of extracting dyes, and of applying them to various textures, appears to have been known at a very early period. We read of scarlet thread at the time of Zarah’s birth (Gen. xxviii. 28); of blue and purple at the time of the Exodus (Ex. xxvi. 1). There is however no evidence to show that the Jews themselves

were at that period acquainted with the art: the profession of the dyer is not noticed in the Bible, though it is referred to in the Talmud. They were probably indebted both to the Egyptians and the Philistines; to the latter for the dyes, and to the former for the mode of applying them. The purple-dyes with which they more extensively were credited by the Philistines (Ex. xvii. 6; Plin. ix. 69), and in certain districts of Asia Minor (Hom. II. iv. 111; especially Thasian (Acts xvi. 14). It does not appear that those particular colors were used in Egypt, the Egyptian colors being produced from various metallic and earthy substances (Wilkinson, Anc. Egypt. iii. 301). On the other hand, there was a remarkable similarity in the mode of dying in Egypt and Palestine, insomuch as the color was applied to the raw material, previous to the processes of spinning and weaving (Ex. xxxvi. 23, xxxix. 3; Wilkinson, iii. 125). The dyes consisted of purples, light and dark (the latter being the “blue” of the A. V.), and crimson (scarlet, A. V.): vermilion was introduced at a late period.

1. PURPLE (רַכּוֹר: Chalcidian form, ρονή): This color was obtained from the secretion of a species of shell-fish (Plin. ix. 69), the Murex trunculus of Linnaeus, which was found in various parts of the Mediterranean Sea (hence called ρονή rpiveϊα, 1 Macc. iv. 23), particularly on the coasts of Phoenicia (Strab. xvi. p. 757), Africa (Strab. xvi. p. 835), Laconia (Hor. Od. ii. 18, 7), and Asia Minor. [Elliott.] The derivation of the Hebrew name is uncertain: it has been connected with the Sanskrit räççñ, “tinted with red,” and again with ῥαγχυκάς, “costly” (Hitzig, Comment. in Dan. v. 7). Gesenius, however (Thesaur. p. 1263), considers it highly improbable that a color so peculiar to the shores of the Mediterranean should be described by a word of any other than Semitic origin, and connects it with the root דַּקָּר, to keep up or oversee with color. The coloring matter was contained in a small vessel in the throat of the fish; and as the quantity amounted to only a single drop in each animal, the value of the dye was proportionately high: sometimes, however, the whole fish was crushed (Plin. ix. 69). It is difficult to state with precision the tint described under the Hebrew name. The Greek equivalent was, we know, applied with great latitude, not only to all colors extracted from the shell-fish, but even to other brilliant colors: thus in John xix. 2; ἔσπερον φωνέα = ἀλαίων κοίνον, in Matt. xxvii. 28 (cf. Plin. ix. 62). The same may be said of the Latin purpureus. The Hebrew term seems to be applied in a similarly broad sense in Cant. vii. 5, where it either = black (comp. v. 11), or still better, shining with oil. Generally speaking, however, the tint must be considered as having been defined by the distinction between the purple proper, and the other purple dye (A. V. “blue”), which was produced from another species of shell-fish. The latter was undoubtedly a dark violet tint, while the former had a light reddish tinge. Robes of a purple color were worn by kings (Judg. viii. 26), and by the highest officers, civil and religious: thus Mordcai (Esth. viii. 15), Daniel (A. V. “scarlet,” Dan. vii. 1, 16, 29), and Andronicus, the deputy of Antiochus (2 Macc. iv. 38), were invested with purple in token of the offices they held (cf. Xen. Anab. i. 5, 7, 8); so also Jonathan, the high-priest...
COLORS

(1 Mac. x. 20, 64, xi. 58). They were also worn by the wealthy and luxurious (Jer. x. 9; Ez. xxvii. 7; Luke xvi. 19; Rev. xvi. 4, xviii. 16). A similar value was attached to purple robes both by the Greeks (Hom. od. xii. 225; Herod. ii. 22; Strab. xiv. 648), and by the Romans (Virg. Geor. ii. 493; Hor. Ep. i. 21, 21; Suet. (Cai. 49); Varro, 32). Of the use of this and the other dyes in the textures of the tabernacle, we shall presently speak.

2. BLUE (?i72: blue, copper, blue, copper, blue, copper, copper, Num. iv. 7; hyacinthus, hyacinthus). This dye was procured from a species of shell-fish found on the coast of Phœnicia, and called by the Hebrews צלמון (Targ. Pseudo-Jon., in Dent. xxvii. 19), and by modern naturalists Hebe bleu. The Hebrew name is derived, according to Gesenius (Thesaurus, p. 1262), from a root signifying to unhue; but according to Hitzig (Comment. in Ez. xxiii. 6), from יָלָּע, in the sense of dull, blanched, as opposed to the brilliant hue of the proper purple. The tint is best explained by the statements of Josephus (Ant. iii. 7, § 7) and Philo that it was emblematic of the sky, in which case it represents not the light blue of our northern climate, but the deep dark hue of the eastern sky (אַחַשׁ דְּתָמֻם: כַּהָנִים, כַּהָנִים, melax γαρ ωτὸς φόνείσθαι, Phil. Hilep. i. 536). The term adopted by the LXX. is applied by classical writers to a color approaching to black (Hom. od. vi. 231, xxiii. 158; Theoc. Th. 10, 28); the flower, whose name was borrowed, being, as is well known, not the modern hyacinth, but of a dusky red color (floriscens, Virg. Geor. iv. 193; colotis luminis hyacinthus, Colum. iv. 4, 4). The A. V. has rightly designated the tint in Est. i. 6 (margin) as royal; the ordinary term blue is incorrect: the Lutheran translation is still more incorrect in giving it gibe Seide (yellow silk), and occasionally simply Seide (Ez. xxiii. 6). This color was used in the same way as purple. Princes and nobles (Ez. xxiii. 6; Excles. xi. 4), and the idols of Babylon (Jer. x. 9), were elobed in robes of this tint: the rind and the fringe of the Hebrew dress was ordered to be of this color (Num. xxv. 28); it was used in the tapestries of the Persians (Esth. i. 6). The effect of the color is well described in Ez. xxiii. 12, where such robes are termed יָרוּעַ יָטָרָּע, robes of perfection, i.e. gorgeous robes. We may remark, in conclusion, that the LXX. treat the term יָרָע (A. V. "bridegroom") as indicative of color, and has translated it βασιλιάς, βασιλιάς (Ex. xxviii. 5).

3. SCARLET (Crimson. Is. i. 18; Jer. iv. 30). The term by which this color is expressed in Hebrew varies; sometimes יָרָע is simply used, as in Gen. xxxviii. 28-30; sometimes יָרָע זָרָע, as in Ex. xxv. 4; and sometimes יָרָע יָרָע simply, as in Ps. i. 18. The word יָרָע (A. V. "crimson;" 2 Chr. ii. 7, 14, iii. 14) was introduced at a late period, probably from Armentia, to express the same color. The first of these terms (derived from יָרָע, to shine) expresses the brilliancy of the color: the second, יָרָע, the worm, or grub, whence the dye was procured, and which gave name to the color; occasionally without any addition, just as crimson is derived from vernicula. The LXX generally renders it κόκκινον, occasionally with the addition of such terms as κόκκινον μέλανον (Ex. xxvi. 1), or κοκκινοσμέλανον (Ex. xxviii. 8); the Vulgate has it generally coccinum, occasionally coccus his tinum (Ex. xxviii. 8), apparently following the erroneous interpretation of Aquila and Symmachus who render it βασιλιάς, double-edged (Ex. xxv. 4), as though from יָרָע, to repeat. The process of double-dyeing was however peculiar to the Tyrian purples (Plin. ix. 39). The dye was produced from an insect, somewhat resembling the cochineal, which is found in considerable quantities in Armenia and other eastern countries. The Arabian name of the insect is kermez (wherein crimson); the Latin name is Coccus hiscus. It frequents the boughs of a species of ilxavon these it has its eggs in groups which become covered with a kind of down, so that they present the appearance of vegetable galls or excrecences from the tree itself, and are described as such by Pliny, xvi. 12. The dye is procured from the female grub alone, which, when alive, is about the size of a kernel of a cherry and of a dark brown colour; but when dried, it is much the size of a grain of wheat, and is covered with a bluish mould (Porrett's Journey to Ararat, p. 114). The general character of the color is expressed by the Hebrew term יָרָע (Is. iii. 1, lit. sharp, and hence dazzling (compare the expression χώρα μας ἑλέον), and in the Greek ἅλεον (Luke xiii. 14), compared with κόκκινον (Matt. xxvii. 28). The tint produced was cinnabarus rather than scarlet. The only natural object to which it is applied in Scripture is the lips, which are compared to a scarlet thread (Cant. iv. 3). Josephus considered it as symbolical of fire (Ant. iii. 7, § 7; cf. Phil. i. 536). Scarlet threads were selected as distinguishing marks from their brilliancy (Gen. xxviii. 28; Josh. ii. 18, 21); and hence the color is expressive of what is energetic or glistening (Is. i. 18). Scarlet robes were worn by the luxurious (2 Sam. i. 24; Prov. xxxi. 21; Jer. iv. 30; Lam. iv. 5; Rev. xvii. 4, xviii. 12, 16); it was also the appropriate hue of a warrior's dress from its similarity to blood (Nah. ii. 2; cf. Is. ix. 5), and was especially worn by officers in the Roman army (Plini. xxii. 3; Matt. xxvii. 28).

The three colors above described, purple, blue, and scarlet, together with white, were employed in the textures used for the curtains of the tabernacle and for the sacred vestments of the priests. The four were used in combination in the outer curtains, the veil, the entrance curtain (Ex. xxvi. 1, 31, 36), and the gate of the court (Ex. xxvii. 16); as also in the high-priest's ephod, girdle, and breastplate (Ex. xxvii. 5, 6, 8, 15). The three first, to the exclusion of white, were used in the pomegranates about the hem of the high-priest's robe (Ex. xxvii. 31). The hems of the curtains (Ex. xxvi. 4), the face of the high-priest's breastplate, the ephod and the breastplate of the high-priest's ephod on his mitre were exclusively of blue (Ex. xxviii. 28, 31, 37). Cloths for wrapping the sacred vessels were either blue (Num. iv. 6, scarlet 8), or purple (13). Scarlet thread was specified in connection with the rites of cleansing the leper (Lev. xiv. 4, 6, 51), and of burning the red heifer (Num. xix. 6); apparently for the purpose of binding the hyssop to the cedar wood. The hangings for the court (Ex. xxvii. 9, xxxii. 9), the veils, mitres, bonnets, and breeches of the priests, were white (Ex. xxix. 27, 28). The appli
COLORS

_That_ the _see_ and _This_ was a pigment used in _vesco_ paintings, either for drawing figures of idols on the walls of temples (Ex. xxiii. 14), for coloring the idols themselves (Wis. xiii. 14), or for decorating the walls and beams of houses (Jer. xxii. 14). The Greek term _mýlos_ is applied both to _mýlos_, red lead, and _nubilis_, red ochre; the Latin _sín operatives_ describes the best kind of ochre, which came from Sinope. Vermilion was _t_ favorite color among the Assyrians (Ex. xxiii. 14.), as is still attested by the Assyrians and Khorsabad (Layard, ii. 303).

**COLOSSI** (more properly COLOSETI) Col. i. 2; but the preponderance of MS. authority is in favor of _Kolossi_, Colossae, a for.

**Colossae.** used by the Byzantine writers, and which perhaps represents the provincial mode of pronouncing the name. On coins and inscriptions, and in classical writers, we find _Kolossai_. See Ellicott, _ad loc._.

_A city in the upper part of the basin of the Meander, on one of its affluent streams named the Lyceus. Hierapolis and Laodicea were in its immediate neighborhood (Col. ii. 1, iv. 13, 15, 16; see Rev. i. 11, iii. 14). Colossae fell, as these other two cities rose, in importance. Herodotus (vii. 30) and Xenophon (Anab. i. 2, § 6) speak of it as a city of considerable consequence. Strabo (xii. p. 576) describes it as only a _polis_, not a _polis_; yet elsewhere (p. 578) he implies that it had some mercantile importance; and Pliny, in St. Paul’s time, describes it (v. 41) as one of the _“cel-eberrima oppida”_ of its district. Colossae was situated close to the great road which led from Ephesus to the Ephraimites. Hence our impulse would be to conclude that St. Paul passed this war, and found or confirmed the Colossian Church on his third missionary journey (Acts xix. 23, xiv. 1). He might also easily have visited Colossae during the prolonged stay at Ephesus, which immediately followed. The most competent commentators, however, agree in thinking that Col. ii. 1 proves that St. Paul had never been there, when the Epistle was written. Theodoret’s argument that he must have visited Colossae on the journey just referred to, because he is said to have gone through the whole region of Phrygia, may be proved fallacious from geographical considerations: Colossae, though ethnologically in Phrygia (Herod. L. c., Xen. L. c.), was at this period politically in the province of Asia (see Rev. L. c.). That the Apostle hoped to visit the place on being delivered from his Roman imprisonment is clear from Phil.ii. 22 (compare Phil. ii. 24). Philemon and his slave Onesimus were dwellers in Colossae. So also were Archippus and Epaphras. From Col. i. 7, iv. 12, it has been naturally concluded that the latter Christian was the founder of the Colossian Church (see Alford’s Prolegomena to _Gr. Test._, vol. iii. p. 31.)

**[Epaphras.]** The worship of angels mentioned by the Apostle (Col. ii. 18) curiously reappears in Christian times in connection with one of the top-
graphical features of the place. A church in honor of the archangel Michael was erected at the entrance of a chasm in consequence of a legend connected with an inundation (Harley's Researches in Greece, p. 52), and there is good reason for identifying this chasm with one which is mentioned by Herodotus.

This kind of superstition is mentioned by Theodoret as subsisting in his time; also by the Byzantine writer Nectas Chroniakes, who was a native of this place, and who says that Colossae and Chornae were the same. The neighborhood (visited by Pococke) was explored by Mr. Armfield (Skeat's Churchers, p. 140); but Mr. Hamilton was the first to determine the actual site of the ancient city, which appears to be at some little distance from the modern village of Chomet (Researches in A. M. i. 508). J. S. H.

COLOSSIANS, THE EPISTLE TO THE, was written by the Apostle St. Paul during his first captivity at Rome (Acts xxviii. 16), and apparently in the portion of it (Col. iv. 4) when the Apostle's imprisonment had not assumed the more severe character which seems to be reflected in the Epistle to the Philippians (ch. i. 20, 21, 30, ii. 27), and which not improbably succeeded the death of Burrus in A. D. 62 (Clinton, Fasti Rom. i. 44), and the decline of the influence of Seneca.

This important and profound epistle was addressed to the Christians of the once large and influential, but now smaller and declining, city of Colossae, and was delivered to them by Tychicus, whom the Apostle had sent both to them (ch. iv. 7, 8) and to the church of Ephesus (Eph. vi. 21), to inquire into their state and to administer exhortation and comfort. The epistle seems to have been called forth by the information St. Paul had received from Epaphras (ch. iv. 12; Philem. 25) and from Onesimus, both of whom appear to have been natives of Colossae, and the former of whom was, if not the special founder, yet certainly one of the very earliest preachers of the gospel in that city. The main object of the epistle is not merely, as in the case of the Epistle to the Philippians, to exhort and to confirm, nor, as in that to the Ephesians, to set forth the great features of the church of the chosen in Christ, but is especially designed to warn the Colossians against a spirit of semi-ludicrous theosophy, which was corrupting the simplicity of their belief, and was noticeably tending to obscure the eternal glory and dignity of Christ.

This main design is thus carried out in detail.

After his usual salutation (ch. i. 1, 2) the Apostle returns thanks to God for the faith of the Colossians, the spirit of love they had shown, and the progress which the gospel had made among them, as related by Epaphras (ch. i. 3-8). This leads him to pray without ceasing that they may be fruitful in good works, and especially thankful to the Father, who gave them an inheritance with saints, and translated them into the kingdom of His Son - His Son, the image of the invisible God, the first-born before every creature, the Creator of all things earthy and heavenly, the Head of the church, He in whom all things consist, and by whom all things have been reconciled to the eternal Father (ch. i. 9-20). This reconciliation, the Apostle reminds them, was exemplified in their own cases: they were once alienated, but now so reconciled as to be presented holy and blameless before God, if only they continued firm in the faith, and were not moved from the hope of which the Gospel was the source and origin (ch. i. 21-24).

Of this Gospel the Apostle declares himself the minister, andBurse in A. D. 62 (Clinton, Fasti Rom. i. 44), and the decline of the influence of Seneca.

This important and profound epistle was addressed to the Christians of the once large and influential, but now smaller and declining, city of Colossae, and was delivered to them by Tychicus, whom the Apostle had sent both to them (ch. iv. 7, 8) and to the church of Ephesus (Eph. vi. 21), to inquire into their state and to administer exhortation and comfort. The epistle seems to have been called forth by the information St. Paul had received from Epaphras (ch. iv. 12; Philem. 25) and from Onesimus, both of whom appear to have been natives of Colossae, and the former of whom was, if not the special founder, yet certainly one of the very earliest preachers of the gospel in that city. The main object of the epistle is not merely, as in the case of the Epistle to the Philippians, to exhort and to confirm, nor, as in that to the Ephesians, to set forth the great features of the church of the chosen in Christ, but is especially designed to warn the Colossians against a spirit of semi-ludicrous theosophy, which was corrupting the simplicity of their belief, and was noticeably tending to obscure the eternal glory and dignity of Christ.

This main design is thus carried out in detail.

After his usual salutation (ch. i. 1, 2) the Apostle returns thanks to God for the faith of the Colossians, the spirit of love they had shown, and the progress which the gospel had made among them, as related by Epaphras (ch. i. 3-8). This leads him to pray without ceasing that they may be fruitful in good works, and especially thankful to the Father, who gave them an inheritance with saints, and translated them into the kingdom of His Son - His Son, the image of the invisible God, the first-born before every creature, the Creator of all things earthy and heavenly, the Head of the church, He in whom all things consist, and by whom all things have been reconciled to the eternal Father (ch. i. 9-20). This reconciliation, the Apostle reminds them, was exemplified in their own cases: they were once alienated, but now so reconciled as to be presented holy and blameless before God, if only they continued firm in the faith, and were not moved from the hope of which the Gospel was the source and origin (ch. i. 21-24).

Of this Gospel the Apostle declares himself the minister, and
to make individual writings of the N. T. mere theosophistic productions of a later Gnosticism, the intelligent and critical reader will naturally yield but little credence. It is indeed remarkable that the strongly marked peculiarity of style, the nerve and force of the arguments, and the originality that appears in every paragraph should not have made both these writers pause in their ill-considered attack on this epistle.

A few special points demand from us a brief notice.

1. The opinion that this epistle and those to the Ephesians and to Philæmon were written during the Apostle's imprisonment at Caesarea (Acts xxi. 37-xxii. 32), i.e. between Pentecost A. D. 58 and the autumn of A. D. 69, has been recently advocated by several writers of ability, and stated with such cogency and clearness by Meyer (Einelit. z. Ephes. p. 15 ff.), as to deserve some consideration. It will be found, however, to rest on ingeniously urged plausibilities; whereas, to go no further than the present epistle, the notices of the Apostle's imprisonment in ch. iv. 3, 4, 10, certainly seem historically inconsistent with the nature of the imprisonment at Caesarea. The permission of Felix (Acts xxiv. 23) can scarcely be strained into any degree of liberty to teach or to publish the Gospel, while the facts recorded of St. Paul's imprisonment at Rome (Acts xxviii. 23, 31) are such as to harmonize admirably with the freedom in this respect which our present epistle represents to have been accorded both to the Apostle and his companions: see ch. iv. 11, and comp. De Wette, Einleitung z. Coloss. pp. 12, 13; Wieseler, Chronol. p. 420.

2. The nature of the erroneous teaching condemned in this epistle has been very differently estimated. Three opinions only seem to deserve any serious consideration: (a) that these erroneous teachers were adherents of Neo-Platonism, or of some forms of Occidental philosophy; (b) that they leaned to Essene doctrines and practices; (c) that they advocated that admixture of Christianity, Judaism, and Oriental philosophy which afterwards became consolidated into Gnosticism. Of these (a) has but little in its favor, except the somewhat vague formula of Philem. (ch. ii. 8), which, however, it seems arbitrary to restrict to Grecian philosophy; (b) is much more plausible; as far as the usages alluded to, but seems inconsistent both with the exclusive nature and circumscribed localities of Essene teaching; (c) on the contrary is in accordance with the Gentile nature of the church of Colosse (ch. i. 21), with its very locality — speculative and superstitious Phrygia — and with that tendency to associate Judicial observances (ch. ii. 16) with more purely theosophistic speculations (ch. ii. 18), which became afterwards so conspicuous in developed Gnosticism. The portions in our analysis of the epistle marked in italics serve to show how deeply these perverted opinions were felt by the Apostle to strike at the doctrine of the eternal Godhead of Christ.

3. The striking similarity between many portions of this epistle and of that to the Ephesians has given rise to much speculation, both as to the reason of this studied similarity, and as to the priority of order in respect to composition. These points cannot here be discussed at length, but must be somewhat briefly dismissed with the simple expression of an opinion that the similarity may reasonably be accounted for, (1) by the proximity in time at which the two epistles were written: (2) by the high probability that in two cities of Asia within a moderate distance from one another, there would be many doctrinal prejudices, and many social relations, that would call forth and need precisely the same language of warning and exhortation. The priority in composition must remain a matter for a reasonable difference of opinion. To us the shorter and perhaps more vividly expressed Epistle to the Colossians seems to have been first written, and to have suggested the more comprehensive, more systematic, but less individualizing, epistle to the church of Ephesus.

For further information the student is directed to Davidson's Introduction, ii. 394 ff.; Alford, Prolegomena, to N. T. iii. 33 ff.; and to the introduction to the excellent Commentary of Meyer.

The editions of this epistle are very numerous. Of the other commentaries those of Davenant, Expos. Ep. Pauli ad Col., ed. 3; Suicer, in Ep. Pauli ad Col. Comment., Tig. 1699, may be specified; and of modern commentaries, those of Bähr (Bas. 1833), Olshausen (Königsb. 1840), Huther (Hamb. 1841, a very good exegetical commentary), De Wette (Leipz. 1847), Meyer (Götting. 1848); and in our own country those of Eade (Edinb. [also New York] 1856), Alford (Lond. 1857), and Elliott (Lond. 1858).

* Later editions of Commentaries — Meyer, 1855; Alford, 1865; Elliott, 1865, and Amer. reprint, 1865. Other recent works — Ewald, Schriften des Apostels Paulus, 1857; Schenkel, Briefe an die Epheser, Philipp. u. Kolosser, 1862; Dr. Karl Braune, Die Briehe an die Epheser, Kolosser, 1867 (intended as a substitute for Schenkel on these epistles in Lange's Bibelwerk); Bleek, a brief ch. xvi. die Briefe an die Epheser, Kolosser, v. s. w. 1855, and Einl. in das N. Test., 1852, p. 494 ff.; Wordsworth, Greek Testament, 1856 (4th ed.); and J. Llewelyn Davies, The Epistles of St. Paul to the Ephesians, the Colossians, and Philemon, with Introductions and Notes, London, 1866. There are many good thoughts on this epistle, exegetical and practical, though quaintly expressed, in Trapp's Commentary on the New Testament, pp. 613-21 (Webster's ed., London, 1865).

For the information of the genuineness of the epistle in opposition to the Tübingen critics, see Klöpper, De Origine Ep. ad Ephesias et Colossenses, Gryph. 1583, and Ribäger, De Christologia Pauliana contra Barthium Commentaria, Vratisl. 1852. Prof. Weiss also defends the genuineness of the epistle against Baur's assumptions (Herzog's Real-Encyc. xix. 717-723). But as to the place where it was written, he sides with those who maintain that Paul was imprisoned at the time at Caesarea and not at Rome. He insists with some earnestness on the fact that in Phil. ii. 24 to be meditating a journey to Macedonia and not to Asia Minor, on regaining his liberty. But the implication here that Paul could not have taken Colosse and Macedonia in his way on the same journey (provided he was at Rome), seems not well founded. For, crossing from Italy to Dyrrachium, he could traverse the Egyptian Way through Macedonia to Philippi, and then embarking at Neapolis (Kadath), the port of Philippi, proceed to Troas or the mouth of the Cayster, and thence to Ephesus or Colosse as his plan might require. Presseux also assigns the Colossian epistle to Caesarea (Hist. des trois premiers Sibylles, i. 55 ff.); but natural as it may seem that Paul
should have written to the Asiatic churches during the two years that he was at Caesarea, that con-

complementation (on which Presbres's mainly relies) can hardly have more weight than the opposite consideration that Paul might be expected also to write to the Colossians while he was at Rome. The fuller doctrinal development in the letters to the Colossians and the Ephesians favors a later rather than an earlier period in the history of these churches. The same writer's allegation that Paul must have written this group of letters (Colossians, Ephesians, Philippians) at Caesarea, because a slave like Onesimus could not have been the apostle's fellow-prisoner at Rome, where his captivity was less rigorous than at Caes-

area, is inconclusive; for in fact there is no evidence at all that Onesimus was a prisoner anywhere.

Yet it should be stated there is a strong current of opinion, among critics at present in favor of Caes-

area. In support of that view, see especially Deus, Geschicht der heil. Schriften, p. 100 ff. (3rd. Aufl.). Böttger, Meyer, Thiersch, Schenkel, Laurent (Neuz.

zeit. Studien, p. 100 ff.), and others, advocate the same opinion. On the other hand, Hugen, Cred-

er, Giebeler, Ewald, Nieder, Lange, Bleek, Braune (in Lange's Bibelwerk), and nearly all the English critics, refer the epistle to Paul's first En-

gli captivity. Bleek in his Vorlesungen und Einleitung, mentioned above, states very fully and forcibly the grounds for this conclusion. 11.

* COME BY. "We had much work to come by the boat" (Acts xxvii. 16). περιμετοτος γενεται: τον σαλπηρίαν, lit. "to become masters of the boat," i.e. to secure it so as to hold it into the ship (ver. 17). 12.

* COMFORTER. "Out of the tides and offices of the Spirit which see." COMMERCE (1. 777-777), Gesen. p. 316; εμπορίον: n.γεωτοία: from 777, a merchant, from 777, travel, Ez. xxv. 15; A. V., merchant-

door, traffic; 2. 777, 777, Gesen. p. 1298; Ez. xxvi. 12, τά εμπορικά, n.γεωτοίς; in xxvii. 3, 16, ἐμπορία, n.γεωτία, from 777, travel.)

From the time that men began to live in cities, trade in some shape or form has been carried on to supply the town-dwellers with necessaries (see Heeren, Afs. Nat. i. 189), but it is also clear that international trade must have existed and affected to some extent even the pastoral nomad races, for we find that Abraham was rich, not only in cattle, but in silver, gold, and gold and silver plate and ornaments (Gen. xiii. 2, xxiv. 22, 53); and further, that gold and silver in a manufactured state, and silver, not improbably in coin, was at least among the settled inhabitants of Palestine and the pastoral tribes of Syria at that date (Gen. xx. 16, xxii. 16, xxviii. 16, Heb. xi. 11), to whom those metals must in all probability have been imported from other countries (Hussey, loc. Wight, c. vii. 3, p. 184; Kitto, P. H. Hist. of Pol., p. 109, 110; Herod. i. 215). Among living nations mentioned in Scripture, Egypt holds in very early times a prominent posi-

tion, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of the nomad races (Heeren, Afs. Nat. i. 468, ii. 371, 372). It was an Ishmaelitine caravan, laden with spices, which carried Joseph into Egypt, and the account shows that slaves formed sometimes a part of the merchandise imported (Gen. xxxvii. 25, xxxix. 1; Job vi. 19). From Egypt it is likely that all the gold and silver of the Eastern world was brought, but especially in times of general scarcity, corn would be exported, which was generally paid for by the non-exporting nations in silver, which was always weighed (Gen. xii. 57, xiii. 2, 25, 35, xlii. 11, 22, 21). These caravans also brought the precious stones as well as the spices of India into Egypt (Ex. xxv. 3, 7; Wilkinson, Anc. Eg. ii. 235, 257). Intercourse with Tyre does not appear to have taken place till a later period, and thus, though it cannot be determined whether the purple by which the Egyptian women and linen cloths were dyed was brought by land from Phenícia, it is certain that colored cloths had long been made and dyed in Egypt, and the use, at least, of them, adopted by the Hebrews for the tabernacle as early as the time of Moses (Ex. xxv. 4, 5; Heeren, Assiut Nat. i. 552; Herod. i. 1). The pasture-ground of Shechem appears from the story of Joseph to have been in the way of these caravan journeys (Gen. xxxvii. 14, 25; Schulze, Arch. Heb. 13, i. 150).

At the same time it is clear that trade was carried on between Babylonia and the Syrian cities, and also that gold and silver ornaments were common among the Syrian and Arabian races; a trade which was obviously carried on by land-carriage (Num. xxxv. 59; Josh. vii. 21; Judges x. 30, viii. 24; Job xli. 10).

Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. Foreign trade was indeed contemplated by the Law, and strict rules for morality in commercial dealings were laid down by it (Deut. xxvii. 12, xxv. 13-16; Lev. xix. 35, 36), and the tribes near the sea and the Phenician territory appear to have engaged to some extent in maritime affairs (Gen. xlix. 13; Deut. xxxii. 18; Judges vi. 17), but the spirit of the Law was more in favor of agriculture and against foreign trade (Deut. xvii. 16, 17; Lev. xxv.; Joseph. c. Ant. i. 12). Solomon, however, organized an extensive trade with foreign countries, but chiefly, at least so far as the more distant nations were concerned, of an import character. He imported linen yarn, horses, and chariots from Egypt. Of the horses some appear to have been bred to the Phenician type; some were obtained by Solomon from Persia for his own use, and others he paid in gold, which was imported by sea from India and Arabia by his fleets in conjunction with the Phenicians (Heeren, Isr. Nat. i. 534; 1 K. x. 22-

24; Ges. p. 1202). It was by Phenicians also that the cedar and other timber for his great architec-
tural works was brought by sea to Joppa, whilst Solomon found the provisions necessary for the workmen in Mount Lebanon (1 K. vi. 6, 9; 2 Chr. iii. 10). The united fleets used to sail into the Indian Ocean every three years from Edath and Ezion-geber, ports on the Arabian gulf of the Red Sea, which David had probably gained from Edom, and brought back gold, silver, ivory, sandal-wood, ebony, precious stones, apes, and peacocks. Some of these may have come from India and Ceylon, and some from the coast of the Persian Gulf and the E. coast of Africa (2 Sam. vii. 14; 1 K. vi. 26, x. 11, 22; 2 Chr. viii. 17; Her. iii. 114; Livingstone, Travels, pp. 637, 662).

But the trade which Solomon took so much pains to encourage was not a maritime trade only. He built, or more probably fortified, Raamah and Pal-

myra; the latter at least expressly as a caravan.
CONCUBINE. The subject was subjected, involving both large abstraction of treasure by invaders and heavy impovements on the inhabitants to purchase immunity or to satisfy demands for tribute, must have impoverished the country from time to time (under Jehohabok, 1 K. xiv. 26; Asaf, xv. 18; Josiah, 2 K. xii. 18; Anchisi, xiv. 13; Ahaz, xvi. 8; Hezekiah, xvii. 13, 16; Jehoahaz and Jehoiakim, xxiii. 33, 35; Jehoiachin, xiv. 13), but it also helps to clear the monuments of the prophets bear witness, that much wealth must somewhere have existed in the country, and much foreign merchandise have been imported; so much so that, in the language of Ezekiel, Jerusalem appears as the rival of Tyre, and through its port, Joppa, to have carried on trade with foreign countries (Is. ii. 6, 16, iii. 21-23; Hos. xiv. 7; Ez. xxii. 2; Jonah i. 3; Heeren, As. Not. i. p. 328).

Under the Maccabees Joppa was fortified (1 Mace. xiv. 34), and later still Caesarea was built and made a port by Herod (Joseph. Ant. xv. 9, § 6; Acts xxvii. 2). Joppa became afterwards a haunt of pirates, and was given to Cestins; afterwards by Vespasian, and destroyed by him (Strab. xvi. p. 759; Joseph. B. J. ii. 18, § 10; ii. 9, § 1).

The internal trade of the Jews, as well as the external, was much promoted, as was the case also in Egypt, by the festivals, which brought large numbers of persons to Jerusalem, and caused great outlay in victims for sacrifices and in incense (1 K. viii. 1-2; 2 K. xviii. 36; 30).

The places of public market were, then as now, chiefly the open spaces near the gates, to which goods were brought for sale by those who came from the outside (Neh. xii. 15, 16; Zeph. i. 10).

The traders in later times were allowed to intrude into the temple, in the outer courts of which victims were publicly sold for the sacrifices (Zech. xiv. 21; Matt. xvi. 12; John ii. 14).

The matter of buying and selling great stress is laid by the Law in dealing. Just weights and balances are stringently ordered (Lev. xix. 35; 36; Deut. xxv. 13-16). Kidnapping slaves is forbidden under the severest penalty (Ex. xxi. 16; Deut. xxv. 7). Trade in swine was forbidden by the Jewish doctors (Surenhus. Mish. de domum. v. 7, vol. iv. p. 60; Lightfoot, H. II. on Matt. viii. 33; Winer; Haenel; Saalschutz, Arch. Hebr. z. 15, 16; 17, 18). H. W. P.

CONCUINE

quite independent of the fact of there being another woman having the rights of wife towards the same man. The difference probably lay in the absence of the right of divorce, which the wife could not be repudiated, and in some particulars of treatment and consideration of which we are ignorant; also in her condition and rights on the death of her lord, rather than in the absence of nuptial ceremonies and dowry, which were non-essential; yet it is so probable that these last did not pertain to the concubine, that the assertion of the Talmud (B. H. 30a) to that effect, though controverted, might be received. The doctrine that a concubine also could not be dismissed without a formal divorce is of later origin—not that such dismissals were more frequent, probably, than those of wives—and negatively by the silence of Ex. xxi. and Deut. xxi. regarding it. From this it seems to follow that a concubine could not become a wife to the same man, nor vice versa, unless in the improbable case of a wife divorced returning as a concubine. With regard to the children of wife and concubine, there was no such difference as our illegitimacy implies; the latter were a supplementary family to the former, their names occur in the patriarchal genealogies (Gen. xxii. 21; 1 Chr. i. 32), and their position and provision, save in the case of defect of those former (in which case they might probably succeed to landed estate or other chief homage), would depend on the father's will (Gen. xxi. 6). The state of concubinage is assumed and provided for by the law of Moses. A concubine would generally be either (1) a Hebrew girl bought of her father, i.e. a slave, which alone the Rabbins regard as a lawful connection (Maimon. Hilkhot-Mabkim, iv.), at least for a private person; (2) a genteel captive taken in war; (3) a foreign slave bought, or (4) a Canaanitish woman, bond or free. The rights of (1) and (2) were protected by law (Ex. xxi. 7; Deut. xxi. 10), but (3) was unrecognized, and (4) probably in the names of Hebrew women also might become concubines. So Gideon's concubine seems to have been of a family of rank and influence in Shechem, and such was probably the state of the Levite's concubine (Judg. xix.). The ravages of war among the male sex, or the impoverishment of families, might often induce this condition. The case (1) was not a hard lot. The passage in Ex. xx. xxxi is somewhat obscure, and seems to mean, in brief, as follows:—A man who bought a Hebrew girl as concubine for himself might not treat her as a mere Hebrew slave, to be sent "out" (i.e. in the seventh, v. 2), but might, if she displeased him, dismiss her to her father on redemption, i.e. repayment probably of a part of what he paid for her. If he had taken her for a concubine for his son, and the son then married another woman, the concubine's position and rights were secured, or, if she were refused these, she became free without redemption. Further, from the provision in the case of such a concubine given by a man to his son, that she should be dealt with "after the manner of daughters," we see that the servile merged in the connubial relation, and that her children must have been free. Yet some degree of contempt attached to the "handmaid's son" (תֶּרֶם כָּרָה), used reproachfully to the son of a concubine merely in Judg. ix. 18; see also Ex. xxvi. 16. The provisions relating to (2) are merciful and considerate to a rare degree, but overlaid by the Rabbis with distorting comments.

CONDUIT (םִּינָּה), ut: a trench or water-course, from פֶּנֶּה; to ascend, Gesen. p. 1022).

1. Although no notice is given either by Scripture or by Josephus of any connection between the pools of Solomon beyond Bethlehem and a supply of water for Jerusalem, it seems unlikely that so large a work as the pools should be constructed merely for irrigating his gardens (Ecc. ii. 6), and tradition, both oral and as represented by Talmudical writers, ascribes to Solomon the formation of the original aqueduct by which water was brought to Jerusalem (Marrard, Early Temp. p. 458; Haschbiust, Treat. 146; Lightheod, Desc. Temp. c. xxviii. vol. i. p. 612; Robinson, i. 205). Pontius Pilate applied the sacred treasure of the Corban to the work of bringing water by an aqueduct from a distance, Josephus says of 300 or 400 stadia (B. J. ii. 9, § 4), but elsewhere 200 stadia, a distance which would fairly correspond with the length of the existing aqueduct with all its turns and windings (Int. xviii. 3, § 2; Williams, Holy City, ii. 501). His application of the money in this manner gave rise to a serious disturbance. Whether his work was a new one or a reparation of Solomon's original one is uncertain; and it is not certain whether it was more than probable that the ancient work would have been destroyed in some of the various sieges since Solomon's time. The aqueduct, though much injured, and not serviceable for water beyond Bethlehem, still exists: the water is conveyed from the fountain which supply the pools about two miles S. of Bethlehem. The water-course then passes from the pools in a N. E. direction, and winding round the hill of Bethlehem on the S. side, is carried sometimes above and sometimes below the surface of the ground, partly in earthen pipes and partly in a channel about one foot square of rough stones laid in cement, till it approaches Jerusalem. There it crosses the valley of Hinnom at the S. W. side of the city on a bridge of nine arches at a point above the pool called Rivets-al-Salim. then returns S. E. and E. along the side of the valley and under the wall, and continuing its course along the east side is finally conducted to the Haram. It was repaired by Sultan Mohammed Ibn-Kahlan of Egypt about A. D. 1300 (Williams, Holy City, ii 498; Hamner, Pol. p. 280; Robinson, i. 265-267 347, 475, ii. 247).
2. Among the works of Hezekiah he is said to have stopped the "upper water-course of Gihon," and brought it down straight to the W. side of the city of David (2 Chr. xxxii. 30). The direction of this water-course of course depends on the site of Gihon. Dr. Robinson identifies this with the large pool called Bori'ka-'an-Ma'lli'a at the head of the valley of Hinnom on the S. W. side of Jerusalem, and considers the lately discovered subterranean conduit within the city to be a branch from Hezekiah's water-course (Rob. iii. 243–4, i. 327; Ges. pp. 616, 1336). Mr. Williams, on the other hand, places Gihon on the N. side, not far from the tomb of the kings, and supposes the water-course to have brought water in a S. direction to the temple, whence it flowed ultimately into the Pool of Siloam or Lower Pool. One argument which recommends this view is found in the account of the interview between the emissaries of Sennacherib and the officers of Hezekiah, which took place "by the conduit of the upper pool in the highway of the fuller's field" (2 K. xviii. 17), whose site seems to be indicated by the "fuller's monument," mentioned by Josephus as on the N. E. side of the city, and by the once well-known site called the Camp of the Assyrians (Joseph. B. J. v. 4, § 2, 7, § 3, and 12, § 2). [Gihon; Jerusalem.] H. W. P.

CONEY (טַֽלֹֹנְקִיָּה; εὐαγγελία; εὐαγγέλιον; v. l. אֲנָנָיָה: εὐαγγελία, εὐαγγελισμός, εὐαγγελισμός), a creodont mammal of the class Pachydermata, which is found in Palestine, living in the caves and cliffs of the rocks, and has been erroneously identified with the Rabbit or Coney. Its scientific name is Hyrax Syriacus. The כַּגּוֹנָה is mentioned four times in the O. T. In Lev. xi. 5 and in Deut. xiv. 7 it is declared to be unclean, because it chews the cud, but does not divide the hoof. In Ps. civ. 18 we are told "the rocks are a refuge for the conenys," and in Prov. xxx. 26 that "the conenys are but a feeble folk, yet make they their houses in the rocks." The Hyrax satisfies exactly the expressions in the two last passages; and its being reckoned among the ruminating animals is no difficulty, the hare being also erroneously placed by the sacred writers in the same class, because the action of its jaws resembles that of the ruminating animals. Its color is gray or brown on the back, white on the belly; it is like the alpine marmot, scarcely of the size of the domestic cat, having long hair, a very short tail, and round ears. It is very common in Syria, especially on the ridges of Lebanon, and is found also in Arabah Petraea, Upper Egypt, Abyssinia, and Palestine (Wilson, Lands of the Bible, ii. 28 ff.). The Arabs call the כַּגּוֹנָה "a n灰; but among the southern Arabs we find the term "thawfa = schilpaḥ (Freucl in Asiatic Journ. June, 1838, p. 514). The Amharic name is "abōkíd, under which name the hyrax is described by Bruce, who also gives a figure of it, and mentions the fact that the Arabs also called it "sheep of the children of Israel." The hyrax is mentioned by Robinson (iii. 387), as occurring in the sides of the chasm of the Lityan opposite Belait. It says that it is seen coming out of the cliffs of the rocks in winter at midday; in summer only towards evening. The derivation of כַּגּוֹנָה from the unused root, כַּגּוֹ, to hide, chiefly in the earth, is obvious.

W. D.

The Hyrax Syriacus is now universally allowed to be the schilpaḥ of the Bible, and the point may fairly be considered satisfactorily settled. The "coney" or rabbit of the A. V., although it suits the Scriptural allusions in every particular, except in the matter of its ruminating, is to be rejected, as the rabbit is nowhere found in the Bible lands; there are several species or varieties of hare, but the rabbit is not known to exist there in a wild state." The Jerboa (Dipus Egyptianus) which Bochart (Hieroc. ii. 490), Rosenmüller (Schol. in Lev. xi. 5), and others have sought to identify with the schilpaḥ, must also be rejected, for it is the nature of the jerboas to inhabit sandy places and not stony rocks. It is curious to find Bochart quoting Arabian writers, in order to prove that the "word" denotes the jerboa, whereas the description of this animal as given by Damir, Giauari, and others, exactly suits the hyrax.

The "word," says Giauari, "is an animal less than a cat, of a brown color, without a tail," upon which Dr. Wilson (Jews of the Bible, ii. 28) remarks, "We were, we believe, the first European travellers who actually noticed this animal within the proper bounds of the Holy Land," this was amongst the rocks at Mar Saba. Bruce, however, noticed these animals plentifully in Lebanon, and among the rocks at the Pharan Promontorium or Cape Mohammed, near the Gulf of Suez; and Shaw (Tetr. ii. 160, 350 ed.) also saw the hyrax on Lebanon, and says "it is common in other places of this country." Dr. Hooker in his recent journey to the Lebanon and Palestine saw no hyrax anywhere, and says he

a Russell (Alpinum, ii. 159, 214 ed.) mentions rabbits as being occasionally bred in houses, "for the use of the Franks" at Aleppo; and adds that the fur of the white and black rabbit is much worn, and that the latter kind is imported from Europe. Even if the ancient Hebrews had ever seen imported specimens of the rabbit, there can be no doubt that it would have been included under the Hebrew term קָנָה, which is the Arabic name at Aleppo both of this animal and the hare.
was told it is confined to the sterile hills of the Jordan and Dead Sea valleys only; Thomson (Land and Book, p. 298) speaks only of one individual among the ruins of the Castle of Kurnein.

Hennepich (Sprache Phys. p. i.) enumerates three species of hyrax, and gives the localities as follows: H. Sicyonis, Mount Sinai; H. habessinos, mountains on the coast of Abyssinia; — this is the Achidoko of Bruce — and H. cupreos, Donna- gala. The Amharic name of Achidoko is, according to Bruce, derived from the long hermaphroditic hairs which like small thorns grow about his back, and which in Amharic are called Aishok. A tame hyrax was kept by Bruce, who from the action of the animal's jaws was led into the error of supposing that "it chewed the cud," it is worthy of remark that the poet Cooper made the same mistake with respect to his tame hares. The flesh of the hyrax is said to resemble the rabbit in flavor; the Arabs of Mount Sinai esteem it a delicacy; the Christians of Abyssinia do not eat its flesh, nor do the Mohammedans; see Oudemans (Tabern. Summ. p. v. ch. ii.). Hennepich states that the urine of the Cape hyrax (H. cupreos), as well as that of the Asiatic species, is regarded as medicinal. See also Spurrum (Trans. p. 324) and Thumberg (Trans. i. 199). This is confirmatory of the remarks of an Arabic writer cited by Bochart (Hieros. ii. 413).

The hyrax is zoologically a very interesting animal, for although in some respects it resembles the Rokhal, in which order this genus was originally placed, its true affinities are with the rhinoceros; its molars teeth differ only in size from those of that great pachyderm. Accordingly Dr. Gray places the hyrax in his sub-family Rhinocerinae, family Equidae; it is about the size of a rabbit, which in some of its habits it much resembles; the animals are generally seen to congregate in groups amongst the rocks, in the cavities of which they hide themselves when alarmed; they are herbivorous as to diet, feeding on grass and the young shoots of shrubs. Some observers have remarked that an old male is set as a sentry in the vicinity of their holes, and that he utters a sound like a whistle to apprise his companions when danger threatens; if this is a fact, it forcibly illustrates Prov. xxvi. 24, 25, where the skolopaulus is named as one of the four things "upon earth which, though little, are exceeding wise." W. II.

II. CONFECTION (Ex. xxx. 35); stands for compound or mixture, a Latin sense of the word.

II. CONFIRMATION. [Barang, p. 241.]

CONGREGATION (παραγια, from παρά to call = conyagination: συναγωγή; συνηγορία, in Pent. viii. 16, xvii. 1: congregation, electivus, cæteris). This term describes the Hebrew people in its collective capacity under its peculiar aspect as a holy community, held together by religious rather than political bonds. Sometimes it is used in a broad sense as inclusive of foreign settlers (Ex. xii. 19); but more properly, as exclusively appropriate to the Hebrew element of the population (Num. xx. 15). In such cases this word expresses the idea of the Roman Curia or the Greek polis.

* * *

A M. Tristram, who was a naturalist was the more earnest in his efforts, caught one of these animals (which it is extremely difficult to do) among the cliffs on the S. W side of the Dead Sea, and describes it as an interesting subject to what is said in Prov.xxx 23, 24, both as to its usefulness and its singular running and power of self-preservation. See his Land of Israel 2d ed. p. 255 (London, 1850).
CONIAH (Josiah).

CONONI'AH (Achon Jeroham) established : Eusebius : [Vat. in ver. 12 "Noxenoiis."]

Alex. Noxenoiis : Chronicles, a Levite, ruler of the offerings and titles in the time of Hezekiah (2 Chr. xxxii. 12, 13). [See CONAIAH.]

CONSECRATION. [P R I E S T .]

• CONVENIENT signifies "becoming, fitting, appropriate" in several passages, e. g. Prov. xxxii. 8; Ex. xiv. 4; Rom. i. 28; Eph. v. 4; Phil. ii. 6. It occurs once in the dedication of James's translators. It is the rendering of הָרָבָאָב and חָיֹבָא in the N. T., and was an ancient Latin sense of the word. It belongs to the class of terms of which Archbishop Whately remarks that "they are much more likely to perplex and bewildre the reader, than those entirely out of use. The latter only leave him in darkness; the others mislead him by a false light." See his "Brins's Essays with Annotations" (Essay xxiv. p. 330, 5th ed. Boston, 1863).

• CONVERSATION is never used in the A. V. in its ordinary sense, but always denotes "course of life," "conduct." In the N. T. it commonly represents the Greek ἀναγράφως: once ἐγρά-

φος. In Phil. iii. 20, "our conversation is in heaven," it is the rendering of πανεύρια. The probable meaning is well expressed by Wieland's translation, "we are citizens of heaven." A.

CONVOCATION (תְּוָאֵב, from נָדֵב, to 

vow; comp. Num. x. 2; Is. i. 13). This term is applied invariably to meetings of a religious char-

acter, in contradistinction to congregation, in which political and legal matters were occasionally settled.

Hence it is connected with נָדֵב, holy, and is ap-
piled only to the Sabbath and the great annual festivals of the Jews (Ex. xii. 15; Lev. xxiii. 2 ff.; Num. xxviii. 18 ff., xxix. 1 ff.). With one excep-
tion (Is. i. 12), the word is peculiar to the Pentateuch.

The LXX. treats it as an adjective "πατρίν, ἐγκλάτος; but there can be no doubt that the A. V. is correct in its rendering.

W. L. B.

COOKING. As meat did not form an article of ordinary diet among the Jews, the art of cooking was not carried to any perfection. The difficulty of preserving it from putrefaction necessitated the immediate consumption of an animal, and hence few were slaughtered except for purposes of hospitality or festivity. The proceedings on such occasions appear to have been as follows: On the arrival of a guest the animal, either a kid, lamb, or calf, was killed (Gen. xvii. 7; Luke xvi. 23), its throat being cut so that the blood might be poured out (Lev. vii. 20); it was then flayed and was ready either for roasting (נַּחַל), or boiling (תְּבַע), in the former case the animal was preserved entire (Ex. xii. 46), and roasted either over a fire (Ex. xii. 8) of wood (Is. xiv. 19), or perhaps, as the mention of five implies another method, in an oven, consisting simply of a hole dug in the earth, well hallowed, and covered up (Barkhardt, Notes on Bedoinous, i. 240); the Paschal lamb was roasted by the first of these methods (Ex. xii. 8, 9; 2 Chr. xxxix. 33). Boiling, however, was the more usual mode of cooking, both in the case of sacrifices, other than the Paschal lamb (Lev. viii. 31), and for domestic use (Ex. xvi. 29), so much so that נַּחַל נַחַל to cook generally, including even roasting (Deut. xvi. 7). In this case the animal was cut up, the right shoulder being first taken off (hence the priest's joint, Lev. vii. 32), and the other joints in succession: the flesh was separated from the bones and minced, and the bones them-

selves were broken up (Mic. iii. 3); the mingled flesh was then thrown into a caldron (Ex. xxiv. 4, 5) filled with water (Ex. xii. 9), or, as we may infer from Ex. xxi. 18, occasionally with milk, as is still usual among the Arabs (Barkhardt, Notes, i. 63), the prohibition "not to seethe a kid in his mother's milk" having reference apparently to some heathen practice connected with the offering of the first-fruits (Ex. l. c.; xxix. 20), which rendered the kid so prepared unleavened bread, and butter (Gen. xviii. 8), as a sauce for dipping morsels of bread into (Barkhardt's Notes, i. 63). Sometimes the meat was so highly spiced that its flavor could hardly be distinguished; such dishes were called נַּחַל נַּחַל (Gen. xvii. 4; Prov. xxvii. 3). There is a striking similarity in the culinary operations of the Hebrew and Egyptians (Wilkinson's Anc. Egypt. ii. 374 ff.). Veg-
Coos was first spelt "Cook." (Gen. xxv. 29; 2 K. iv. 38.) Fish was also cooked (Lk. xvi. 22; pater move; Luke xxiv. 42), probably boiled. The cooking was in early times performed by the mistress of the household (Gen. xviii. 6); professional cooks (αὐτός ὑπάρχων) were afterwards employed (1 Sam. viii. 13, 25). The utensils required were — δοχυρία (χειροτροφεῖα; chytropalae), a cooking range, having places for two or more pots, probably of earthenware (Lev. xi. 55): δοχηλία (λειβος; λείβος), a caldron (1 Sam. ii. 14): δοχος (κρασίναμα), a large fork or flesh-hook: θημία (Ἀβιλαία, ὧν ἱπποῖα), a wide, open, metal vessel, resembling a fish-keetle, adapted to be used as a wash-pot (Ps. ix. 8), or to eat from (Ex. xxxi. 9). 

ποταμός, or δοχομος, pots probably of earthenware and high, but how differing from each other does not appear; and, lustily, ἀλυσός, or ὑπαρχόντα, dishes (2 K. ii. 20, xxi. 13; Prov. xiv. 21, A. V. "boon").

W. L. B.

COPPER (κόπρης). This word in the A. V. is always rendered "brass," except in Ex. viii. 27. As brass. This metal is usually found as pyrites (sulphur of copper and iron), malachite (cuff of copper), or in the state of oxide, and occasionally in a native state, principally in the Near West. It was almost exclusively used by the ancients for common purposes; for which its elastic and ductile nature rendered it practically available. It is a question whether in the earliest times iron was known (μελας δ's οὐκ ἑκέει σίδερον, Hes. Olyg. et Diec, 149; Lucr. v. 1258 ff.). In India, however, its manufacture has been practiced from a very ancient date by a people exceedingly simple, and possibly a similar use was employed by the ancient Egyptians (Napier, Anc. Works in Metal, p. 137). There is no certain mention of iron in the Scriptures; and, from the allusion to it as known to Tubalain (Gen. iv. 22), some have ventured to doubt whether in that place ἄρης means iron (Wilkinson, Anc. Egypt. iii. 212).

We read in the Bible of copper, possessed in countless abundance (2 Chr. iv. 18, and used for every kind of instrument; as chains [Ez. xvi. 21], pillars [1 K. vii. 15-21], hedges, the great one being called "the copper sea" (2 K. xv. 13; 1 Chr. xviii. 8), and the other temple vessels. These were made in the foundry, with the assistance of Hiram, a Phoenician (1 K. xvii. 13), although the Jews were not ignorant of metallurgy (Ex. xxv. 18; Dan. iv. 26, &c.), and appear to have worked their own mines (Ez. viii. 9; lvi. 1). We read also of copper mirrors (Ex. xxxvii. 8; Job xxxvii. 19), since the metal is susceptible of brilliant polish (2 Chr. iv. 15); and even of copper arms, as helmets, spears, &c. (1 Sam. vii. 5, 6, 58; 2 Sam. xvi. 16). The expression "law of steel," in Job xx. 21, 24, xvii. 31, should be rendered "law of copper," since the term for steel is ἄρης or ἄρης ἄρης (northern iron). They could hardly have applied copper to these purposes without possessing some judicious system of alloys, or perhaps some forgotten secret for rendering the metal harder and more elastic than we can make it. It has been maintained that the cutting-tools of the Egyptians, with which they worked the granite and porphyry of their monuments, were made of bronze, in which copper was a chief ingredient. The arguments on this point are found in Wilkinson, iii. 243, &c., but they are not conclusive. There seems no reason why the art of making iron and excellent steel, which has been for ages practiced in India, may not have been equally known to the Egyptians. The quickness with which iron decomposes will fully account for the non-discovery of any remains of steel or iron implements. For analyses of the bronze tools and articles found in Egypt and Assyria, see Napier, p. 88.

The only place in the A. V. where "copper" is mentioned is Ex. viii. 27, "two vessels of fine copper, precious as gold" (cf. 1 Esdr. viii. 57; ἀνάστασιν χαλκοῦ στίλβοντος, διάφορα, ἐν χρυσῷ: νεκταρίων χαλκηίς, Syr.; "ex orichalco," Jun.), perhaps similar to those of "bright brass" in 1 K. viii. 43; 1 Sam. vi. 6. They may have been of orichalcum, like the Persians or Indian vases found among the treasures of Darius (Aristot. de Mirob. Auscult.), and there were two kinds of this metal, one natural (Serv. ad Aen. xii. 87), which Pliny (H. N. xxxiv. 2, 2) says had long been extinct in his time, but which Chardin alludes to as found in Sumatra under the name "Calumac" (Rouen, &c.); the other artificial (identified by some with ἀλτέκτων, whence the mistaken spelling "orichaleum"); which Beechert (Hieroc. vi. 16, p. 811 ff.) considers to be the Hebrew ἄρης (copper) and Chal. ἀρής (? gold, Ez. i. 24, 27; viii. 2; ἀλτέκτων, LXX.; 'ελαττώτου χρυσίω, Hesych.; to which Suid. adds, ἀποικίματων ἀλαίω καὶ λευκίω). On this substance see Fausan, v. 12; Hist. xxxiii. 4, § 25; Gesenius considers the χαλαλλοβιομ, of Rev. i. 10 to be χαλαλλος λάμπανοι = λάμπων; he differs from Beechert, and argues that it means merely "smooth or polished brass."

In Ez. xxiv. 13, the importation of copper vessels to the markets of Tyre by merchants of Judah (Psa. lxx. 9) is alluded to; probably these were the Moschi, &c., who worked the copper mines in the neighborhood of Mount Caucasis.

In 2 Tim. iv. 14, χαλαλλος is rendered "coppersmith," but the term is perfectly general, and is used even for workers in iron (Od. ix. 391); χαλαλλος, πάν τε τεχνίτης, καὶ ὁ χρυσοκόπας καὶ ὁ χρυσανθός (Hesych.).

"Copper" is used for money, Ez. xvi. 30 (A. V. "filthiness"); ἐξελθομιν τοῦ χαλαλλου, LXX.; "luxuriam est utrum," Vulg.; and in N. T. (εὐκαλή, ποιητικοί ἐπὶ χρυσίων καὶ του ὑπεράνων ἀλείων, Hesych.).

F. W. F.

* COPPER VERSION. [Versions, Ancient (Latinman)].

* COR ( kube : κόπος ; corus) a measure of capacity, the same as the homer (Er. xv. 14; 1 K. iv. 22 and v. 11, marg.; Ez. xvi. 22, marg.). See Weights and Measures, § 2.

CORAL (κοράλλιον; κοράλλιον; κοράλλιον) occurs only, as
the somewhat doubtful rendering of the Hebrew rénéth, in Job xxviii. 18, "No mention shall be made of coral (réénéth, margin) or of pearls, for the price of wisdom is above rubies;" and in Ez. xxvii. 16, where coral is enumerated amongst the wares which Syria brought to the markets of Tyre. The old versions fail to afford us any clue; the LXX. gives "τοίοι λίθοι" (τοίοι λίθοι), the Aramaean "םיתו לית" the Hebrew term "lofty things;" the Vulg. in Ez. (l. c.) reads "silk." Some have conjectured "rhi- noceros skins," deriving the original word from recorn (the unicorn of the A. V.), which word, however, has nothing to do with this animal. [UNI- CORN.] Schultens (Comment. in Joban, l. c.) gives up the matter in despair, and leaves the word untranslated. Many of the Jewish rabbis understand "red coral" by rénéth. Gesenius (Thes. s. v.) conjectures "black coral" (?) assigning the red kind to penénim ("rubies," A. V.); see Ruby. Michaelis (Suppl. Lex. Hbr. p. 2218) translates réénéth by Lapides gazellorum, i.e. l. b. bezoavoris as if from ria, an Arabic name for some species of gazelle. The Lapis bezoavoricus of Linnaeus denotes the cæcaline concretions sometimes found in the stomach of the Indian gazelle, the Sela (Antilope cervicapra, Falisc). This stone, which possesses a strong aromatic odor, was formerly held in high repute as a talisman. The Arabic physi- cians attributed valuable medicinal properties to these concretions. The opinion of Michaelis, that réénéth denotes these stones, is little else than conjecture. On the whole, we see no reason to be dissatisfied with the rendering of the A. V. "Coral." has decided the best claim of any other substance to represent the réénéth. The natural upward form of growth of the Corallium rubrum is well suited to the etymology of the word. The word rendered "price" in Job xxviii. 18, more properly denotes "a drawing out;" and appears to have reference to the manner in which coral and pearls were obtained from the sea, either by diving or dredging. At present, Mediterranean corals, which constitute an important article of commerce, are broken off from the rocks to which they are attached by long hooked poles, and thus "drawn out." With regard to the estimation in which coral was held by the Jews and other Orientals, it must be re- membered that coral varies in price with us. Fine compact specimens of the best tints may be worth as much as £10 per oz., while inferior ones are perhaps not worth much more than a shilling per lb. Pliny says (N. H. xxxii. 2) that the Indians valued coral as the Romans valued pearls. It is possible that the Syrian traders, who as Jerome re- marks (Rosenmüller, Schol. in Ez. xxvii. 16), would in his day run all over the world "luri cupiditate, may have visited the Indian seas, and brought home thence rich coral treasures; though they would also readily procure coral either from the Red Sea or the Mediterranean, where it is abund- antly found. Coral, Mr. King informs us, often occurs in ancient Egyptian jewelry as beads, and cut into carvings. W. II.

CORD (Cal., L. v., runc, ḫilib. ḫilib. The varieties of the purpose to which cord, including under that term rope and twisted things, was applied, the following are specially worthy of notice. (1) For fastening a tent, in which sense "ropes" is more particularly used (e. g. Ew. xxxv. 18, xxxix. 40; Is. liv. 2). As the tent supplied a favorite image of the human body, the cords which held it in its place represented the principle of life (Job iv. 21, "And his tent-cords are turned away?"; Ez. xii. 6). (2) For binding or binding animals, as a halter or rein (Ps. ex. xxvii; Hos. xi. 4), whence to "loosen the cord" (Job xxx 11) to be free from authority. (3) For yoking them either to a cart (Is. v. 18) or a plough (Job xxxix. 10). (4) For binding prisoners, more par- ticularly ḫilib (Judg. xv. 13; Ps. ii. 3, exxix. 4; Ez. iii. 25), whence the metaphorical expression "hands of love" (Hos. xi. 4). (5) For bow- strings (Ps. xi. 2), made of catgut; such are spoken of in Judg. xvi. 7 (םיאולמ, מיאולמ) A. V. "groc.
CORINTH

(Kömpfort: [Corinth]). This city is alike remarkable for its distinctive geographical position, its eminence in Greek and Roman history, and its close connection with the early spread of Christianity. Geographically its situation was so marked, that the name of its Isthmus has been given to every narrow neck of land between two seas. Thus it was "the bridge of the sea" (Plut., Dem., vii. 44) and "the gate of the Peloponnese" (Xen., Hell. II. 2). No invading army could enter the Morea by land except by this way, and without forcing some of the defenses which have been raised from one sea to the other at various intervals between the great Persian war and the recent struggles of the Turks with the modern Greeks, or with the Venetians. But, besides this, the site of Corinth is distinguished by another conspicuous physical feature—namely, the Acrocorinthus, a vast citadel of rock, which rises abruptly to the height of 2000 feet above the level of the sea, and the summit of which is so extensive that it once contained a whole town. The view from this eminence is one of the most celebrated in the world. Besides the mountains of the Morea, it embraces those on the northern shore of the Corinthian gulf, with the snowy heights of Parnassus conspicuous above the rest. To the west is the Saronic gulf, with its islands, and the hills round Athens, the Acropolis itself being distinctly visible at a distance of 45 miles. Immediately below the Acrocorinthus, to the north, was the city of Corinth, on a table-land descending in terraces to the low plain, which lies between Cenchrea, the harbor on the Saronic, and Lechaion, the harbor on the Corinthian gulf.

The situation of Corinth, and the possession of these eastern and western harbors, are the secrets of her history. The earliest passage in her progressive eminence was probably Thracian. But at the most remote period of which we have any sure record we find the Greeks established here in a position of wealth (Hom. II. ii. 570; Plut., Oth., viii. 41), and military strength (Thucyd., i. 13). Some of the earliest efforts of Greek ship-building are connected with Corinth, and her colonies to the westward were among the first and most flourishing sent out from Greece. So too in the latest passages of Greek history, in the struggles between Macedonia and Rome, Corinth held a conspicuous place. After the battle of Chaeronea (n. c. 338) the Macedonian kings placed a garrison in the Acrocorinthus. After the battle of Cynoscephalae (n. c. 197) it was occupied by a Roman garrison. Corinth, however, was constituted the head of the Hellespont (Livy, xxx. 45). Here the Roman ambassadors were maltreated; and the consequence was the utter ruin and destruction of the city.

It is not the true Greek Corinth with which we have to do in the life of St. Paul, but the Corinth which was rebuilt and established as a Roman colony. The distinction between the two must be carefully remembered. A period of a hundred
ears intervened, during which the place was almost utterly desolate. The merchants of the Isthmus retired to Delos. The presidency of the Isthmian games was given to the people of Sicyon. Corinth seemed blotted from the map; till Julius Caesar refounded the city, which thenceforth was called Colossi Julia Corinthiæ. The new city was hardly less distinguished than the old, and it acquired a fresh importance as the metropolis of the Roman province of Achæa. We find Galleus, brother of the philosopher Senece, exercising the functions of proconsul here (Achæa was a senatorial province) during St. Paul's first residence at Corinth, in the reign of Claudius.

This residence continued for a year and six months, and the circumstances, which occurred during the course of it, are related at some length (Acts xviii. 1-18). St. Paul had recently passed through Macedonia. He came to Corinth from Athens; shortly after his arrival Silas and Timothy came from Macedonia and rejoined him; and about this time the two epistles to the Thessalonians were written (probably A. D. 52 or 53). It was at Corinth that the apostle first became acquainted with Aquila and Priscilla; and shortly after his departure Apollos came to this city from Ephesus (Acts xviii. 27).

Corinth was a place of great mental activity, as well as of commercial and manufacturing enterprise. Its wealth was so celebrated as to be proverbial; so were the vice and profligacy of its inhabitants. The worship of Venus here was at tended with shameful licentiousness. All these points are indirectly illustrated by passages in the two epistles to the Corinthians, which were written (probably A. D. 57) the first from Ephesus, the second from Macedonia, shortly before the second visit to Corinth, which is briefly stated (Acts xx. 3) to have lasted three months. During this visit (probably A. D. 58) the epistle to the Romans was written. From the three epistles last mentioned, compared with Acts xxiv. 17, we gather that St. Paul was much occupied at this time with a collection for the poor Christians at Jerusalem.

There are good reasons for believing that when St. Paul was at Ephesus (A. D. 57) he wrote to the Corinthians an epistle which has not been preserved (see below, p. 195); and it is almost certain that about the same time a short visit was paid to Corinth, of which no account is given in the Acts.

It has been well observed that the great number of Latin names of persons mentioned in the epistle to the Romans is in harmony with what we know of the colonial origin of a large part of the population of Corinth. From Acts xviii. we may conclude that there were many Jewish converts in the Corinthian church, though it would appear (1 Cor. xii. 2) that the Gentiles predominated. On the other hand it is evident from the whole tenor of both epistles that the Judaizing element was very strong at Corinth. Party-spirit also was extremely prevalent, the names of Paul, Peter, and Apollos being used as the watchwords of restless factions. Among the eminent Christians who lived at Corinth were Stephanas (1 Cor. i. 16, xvi. 15, 17), Crispus (Acts xviii. 8; 1 Cor. i. 14), Caius (Rom. xvi. 23; 1 Cor. i. 14), and Erastus (Rom. xvi. 23; 2 Tim. iv. 20). The epistles of Clement to the Corinthians are among the most interesting of the post-apostolic writings. Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place for such an ecclesiastical dignity," used in Turkish times to be in the Aerocorinthian. The city has now shrunk to a wretched village, on the old site, and bearing the old name, which, however, is often corrupted into Goerthe.

Pausanias, in describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those which belonged to the old Greek city, and those which were of Roman origin. Two

Among the eminent Christians who lived at Corinth were Stephanas (1 Cor. i. 16, xvi. 15, 17), Crispus (Acts xviii. 8; 1 Cor. i. 14), Caius (Rom. xvi. 23; 1 Cor. i. 14), and Erastus (Rom. xvi. 23; 2 Tim. iv. 20). The epistles of Clement to the Corinthians are among the most interesting of the post-apostolic writings. Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place for such an ecclesiastical dignity," used in Turkish times to be in the Aerocorinthian. The city has now shrunk to a wretched village, on the old site, and bearing the old name, which, however, is often corrupted into Goerthe.

Pausanias, in describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those which belonged to the old Greek city, and those which were of Roman origin. Two

A * Of the two epistles to the Corinthians ascribed to Clement of Rome, only the first is now regarded as genuine by respectable scholars.
CORINTH

Relics of Roman work are still to be seen; one a heap of brick-work which may have been part of the baths erected by Hadrian, the other the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting are the ruins of the ancient Greek temple—the "old columns which have looked down on the rise, the prosperity, and the desolation of two [in fact, three] successive Corinthians." At the time of Wheel's visit in 1876 twelve columns were standing; before 1835 they were reduced to five; and further injury has very recently been inflicted by an earthquake. It is believed that this temple is the oldest of which any remains are left in Greece. The fountain of Peirene, "full of sweet and clear water," as it is described by Strabo, is still to be seen in the Aerocorinthus, as well as the fountains in the lower city, of which it was supposed by him and Pausanias to be the source. The walls on the Aerocorinthus were in part erected by the Venetians, who held Corinth for twenty-five years in the 17th century.

This city and its neighborhood have been described by many travellers, but we must especially refer to Leake's More, iii. 229-304 (London, 1830), and his Peleponnesiac, p. 392 (London, 1846), Curtius, Pausanias, ii. 514 (Gotha, 1851-52); Clark, Peleponnes, pp. 42-61 (London, 1858). There are four German monographs on the subject, Willeck's, Reisen Corinthischen spec- imen mit Illustrationen uterique Epitope Paulina, Bremen, 1747; Walch, Antiquitates Corinthiaceae, Jena, 1761; Wagner, Reisen Corinthischen specimen, Darmstadt, 1824; Barth, Corinthienn Com- merce et Mercurian Historie Particulic, Berlin, 1844. [The eminent archaeologist, Kangas, has a sketch of Corinth, its earlier and later history, and its antiquities, in his EAAJ, p. 287-314.]

This article will be incomplete without some notice of the Poseidonium, or sanctuary of Neptune, the scene of the Isthmian games, from which St. Paul borrows some of his most striking images in 1 Cor. and other epistles. [See GAMES, Amer. ed.] This sanctuary was a short distance to the N. E. of Corinth, at the narrowest part of the Isthmus, near the harbor of Schcenus (now Kolonaki) on the Saronic gulf. The wall of the inclosure can still be traced. It is of an irregular shape, determined by the form of a natural platform at the edge of a ravine. The fortifications of the Isthmian followed this ravine and abutted at the east upon the inclosure of the sanctuary, which thus served a military as well as a religious purpose. The exact site of the temple is doubtful, and none of the objects of interest remain, which Pausanias describes as seen by him within the inclosure: but to the north and at the rear of the stellium where the foot-races were held (Acts xix. 21); to the east are those of the theatre, which was probably the scene of the tragic contests (ib. 21); and abundant on the shore are the small green pine-trees (σειρώλιοι) which gave the fading wreath (ib. 25) to the victors in the games. An inscription found here in 1676 (now removed to Verona) affords a valuable illustration of the inter- est taken in these games in Roman times (Bo- selich, No. 1941). The French map of the Morea does not include the Isthmus; so that, till recently, Col. Leake's sketch (reproduced by Curtius) has been the only trustworthy representation of the scene of the Isthmian games. But the ground has been more minutely examined by Mr. Clark, who gives us a more exact plan. In the immediate neighborhood of this sanctuary are the sources of the canal, which was begun and discontinued by Nero about the time of St. Paul's first visit to Corinth.

CORINTHIANS. FIRST EPISTLE TO THE, was written by the Apostle St. Paul toward the close of his nearly three-year stay at Ephesus (Acts xix. 10, xx. 31; see the subscription in B and in Corp. W.), which we learn from I Cor. xvi. 8, probably terminated with the Pentecost of A. D. 57 or 58. Some supposed allusions to the passover in ch. v. 7, 8, have led recent critics (see Meyer in loc.), not without a show of probability, to fix upon Easter as the exact time of composition. The bearers were probably (according to the common subscription) Stephanas, Fortunatus, and Achaicus, who had been recently sent to the Apostle, and who, in the conclusion of this epistle (ch. xvi. 17), are especially commended to the honorable reg. of the church of Corinth.

This varied and highly characteristic letter was addressed not to any party, but to the whole body of the large (Acts xviii. 8, 10) Judaeo-Gentile (Acts xviii. 4) church of Corinth, and appears to have been called forth, 1st, by the information the Apostle had received from members of the household of Chloe (ch. i. 11) of the divisions that were existing among them, which were of so grave a nature as to have already induced the Apostle to desire Timo- thy to visit Corinth (ch. iv. 17) after his journey to Macedonia (Acts xix. 22): 2ndly, by the information he had received of a grievous case of incest (ch. v. 1), and of the defective state of the Corinthian converts, not only in regard of general habits (ch. vi. 1 ff.) and church discipline (ch. vi. 20 ff.), but, as it would also seem, of doctrine (ch. xiv. 37); 3rdly, by the inquiries that had been specially addressed to St. Paul by the church of Corinth on several matters relating to Christian practice.

The contents of this epistle are thus extremely varied, and in the present article almost preclude a more specific analysis than we here subjoin. The Apostle opens with his usual salutation and with an expression of thankfulness for their general state of Christian progress (ch. i. 1-9). He then at once passes on to the important divisions there were among them, and incidently justifies his own con- duct and mode of preaching (ch. i. 10-iv. 16), concluding with a notice of the mission of Timothy, and of an intended authoritative visit on his own part (ch. iv. 17-21). The Apostle next deals with the case of incest that had taken place among them, and had proved no censure (ch. v. 1-8, noticing, as he passes, some previous remarks he had made upon not keeping company with fornicators (ch. v. 9-13). He then comments on their evil practice of litigation before heathen tribunals (ch. vi. 1-8), and again retours to the plague-spot in Corinthian life, fornication and uncleanness (ch. vi. 9-20).
The last subject naturally paves the way for his answers to their inquiries about marriage (ch. vii. 1-24), and about the celibacy of virgins and widows (ch. viii. 25-40). The Apostle next makes a transition to the subject of the lawfulness of eating things sacrificed to idols, and Christian freedom generally (ch. viii.), which leads, not unnaturally, to a digression on the nature of these same apostolic privileges, and performed his apostolic duties (ch. ix.). He then reverts to and concludes the subject of the use of things offered to idols (ch. x.-xi.), and passes onward to reprove his converts for their behavior in the assemblies of the church, both in respect to women prophesying and praying with uncovered heads (ch. xi. 2-16), and also their great irregularities in the celebration of the Lord's Supper (ch. xi. 17-54). Then follow full and minute instructions on the exercise of spiritual gifts (ch. xii.-xiv.), in which is included the noble panegyric of charity (ch. xiii.), and further a defense of the doctrine of the resurrection of the dead, about which doubts and difficulties appear to have arisen in this unlikeness divided church (ch. xiv.). The epistle closes with some directions concerning the contributions for the saints at Jerusalem, in ch. xv. (1-4), brief notices of his own intended movements (ch. xv. 5-9), commendation to them of Timothy and others (ch. xvi. 10-18), greetings from the churches (ch. xvi. 19, 20), and an autograph salutation and benediction (ch. xvi. 21-24).

With regard to the genuineness and authenticity of this epistle no doubt has ever been entertained. The external evidences (Chls. Rom. ad Cor. 47, 49; Polycarp, ad Phil. c. 11; Ignat. ad Eph. c. 2; Irenaeus, Hist. 3; Athanasius, de Resurr. [c. 18] p. 61, ed. Col.; Clem. Alex. Pedag. i. 33 [?c. 6, p. 42 f. or 117 f. ed. Potter]; Tertull. de Præser. c. 33) are extremely distinct, and the character of the composition such, that if any critic should hereafter be bold enough to question the correctness of the ascription, he must be prepared to extend it to all the epistles that bear the name of the great Apostle. The baseless assumption of Harnack and Harnack (the latter in Athanasius, de Resurr. [c. 18]) that a translation of an Aramaic original requires no confirmation. See further testimonies in Lardner, Credibility, ii. 36 ff., 8vo, and Davidson, Introduction, ii. 253 ff.

Two special points deserve separate consideration:

1. The state of parties at Corinth at the time of the Apostle's writing. On this much has been written, and, it does not seem too much to say, more ingenuity displayed than sound and sober criticism. The few facts supplied to us by the Acts of the Apostles, and the notices in the epistle, appear to be as follows:—The Corinthian church was planted by the Apostle himself (1 Cor. iii. 6), in his second missionary journey, after his departure from Athens (Acts xviii. 1 f.). He abode in the city a year and a half (ch. xiv. 11), at first in the house of Aquila and Priscilla (ch. xvii. 3), and afterwards, apparently to mark emphatically the几分ious nature of the conduct of the Jews, in the house of the proselyte Justus. A short time after the Apostle had left the city, the eloquent Jew of Alexandria, Apollos, after having received, when at Ephesus, more exact instruction in the Gospel from Aquila and Priscilla, went to Corinth (Acts xix. 1), where he preached, as we may perhaps infer from St. Paul's comments on his own mode of preaching, in a manner marked by unusual eloquence and persuasiveness (comp. ch. i. 1, 4). There is, however, no reason for concluding that the subservience of the teaching was in any respect different from that of St. Paul; for see ch. i. 12. The uncertain case of Apollos, the former convert of Apollos, owing to the sanguine and carnal spirit which marked the church of Corinth, appears to have formed the commencement of a gradual division into two parties, the followers of St. Paul, and the followers of Apollos (comp. ch. iv. 6). These divisions, however, were to be multiplied; for, as it would soon, shortly after the departure of Apollos, Judaising teachers, supplied probably with letters of commendation (2 Cor. iii. 1) from the church of Jerusalem, appear to have come to Corinth and to have preached the Gospel in a spirit of direct antagonism to St. Paul personally, in every way seeking to depress his claims to be considered an Apostle (1 Cor. xi. 2), and to extol those of the Twelve, and perhaps especially of St. Peter (ch. i. 12). To this third party, which appears to have been characterized by a spirit of excessive bitterness and faction, we may perhaps add a fourth; that, under the name of "the followers of Christ" (ch. i. 12), sought at first to separate themselves from the factions adherent to particular teachers, but eventually were driven by antagonism into positions equally sectarian and inimical to the unity of the church. At this momentous period, before parties had become consolidated, and had distinctly withdrawn from communion with one another, the Apostle writes; and in the outset of the epistle (ch. i. 1-iv. 21), we have his noble and impassioned protest against this fourfold rending of the robe of Christ. This spirit of division appears, by the good providence of God, to have eventually yielded to his Apostle's rebuke, as it is noticeable that Clement of Rome, in his epistle to this church (ch. 47), alludes to these evils as long past, and as but slight compared to those which existed in his own time. For further information respecting the contents of the epistle in the v-i. 18, we have the testimony of Neander, Davidson, Conybeare and Howson, and others, the student may be referred to the special treatises of Schenkel, de Eccl. Cor. (Basel, 1838), Kneivel, Eccl. Cor. Dissensiones (Gedan. 1841), Becker, Parthiehungen in der Gemeinde z. Kor. (Altona, 1841), Rüäger, Krit. Untersuch. (Bresl. 1847); but he cannot be too emphatically warned against that tendency to construct a definite history out of the fewest possible facts, that marks most of these discussions.

2. The number of epistles written by St. Paul to the Corinthian church. This will probably remain a subject of controversy to the end of time. On the one side we have the à priori objection that an epistle of St. Paul should have ever been lost to the church of Christ; on the other we have certain expressions which seem inexcusable on any other hypothesis. As it seems our duty here to express an opinion, we may briefly say that the well-known words, ἐγώ ἐσμήν ἐν ᾿τῇ ἐκκλησίᾳ, μὴ συνανακρίνωνας ὑπόθεσιν (ch. v. 9), do certainly seem to point to some former epistolary communication to the church of Corinth—not from linguistic, but hardly worth while to refer more fully to the copious literature on this very uncertain subject. For a brief review of the various hypotheses, see Holtmann in Bunsen's Bibliotheca, viii. 454 ff. (1888).
from simple exegetical considerations: for it does seem impossible either to refer the definite μή συνανταχθεῖν α. τ. λ. to what has preceded in ver. 7 or to discover any other reference or to the command which the Apostle is now giving for the first time. The whole context seems in favor of a former command given to the Corinthians, but interpreted by them so literally here as to require further explanation. It is not right to suppose the fact that the Greek commentators are of the contrary opinion, nor must we overlook the objection that no notice has been taken of the lost epistle by any writers of antiquity. Against this last objection it may perhaps be urged that the letter might have been so short, and so distinctly occupied with specific directions to this particular church, as never to have gained circulation beyond it. Our present epistles, it should be remembered, are not addressed exclusively to the Christians at Corinth (see 1 Cor. 1, 2; 2 Cor. 1, 1). A special treatise on this subject (in opposition, however, to the view here taken), and the number of St. Paul's journeys to Corinth, has been written by Müller, De Tribus Pauli Rima, 2e, (Basil., 1831).  

The apocryphal letter of the church of Corinth to St. Paul, and St. Paul's answer, existing in Armenian, are worthless productions that deserve no consideration, but may be alluded to only as perhaps affording some slight evidence of an early belief that the Apostle had written to his converts more than twice. The original Armenian, with a translation, will be found in Ander, Armen. Graecorr., p. 143-161.

The editions of [commentaries on] these epistles have been somewhat numerous. Among the best are those of Böhnlich (Leipz. 1833 [trans. in Edin. Catb. Libr.]), Friedrich (Leipz. 1830-57), Olshausen (Königsb. 1840), De Wette (Leipz. 1845 [3d Aufl. by Mosssor, 1854]), Osiander (Stuttg. 1847 [2d Lp. 1858]), Meyer (1845 [4th Aufl. 1851, 2d Lp. 1862]), and in our own country, Pole (Lond. 1848), Albert (Lond. 1856 [4th ed. 1865]), and Stanley (Lond. 1858 [3d ed. 1867]). C. J. E.

The following works should be added: Adolf Maier (Cath.), Comm. üb. den ersten Brief Pauli an die Korinther, 1857; Comm. üb. d. zweiten Brief, 1865; Ewald, Die Schriften des Ap. Paulus, 1857; Neander, Auslegung der beiden Briefe an die Korinther (a posthumous work edited by Begasch), 1859; Chr. Fr. King, Die Korintherbriefe, in Lange's Bibelwerk, 1861; Charles Hodge, Exposition of the First Epistle to the Corinthians, New York, 1857, 12mo, and Exposition of the Second Epistle, ditto; Chr. Wordsworth, in his Greek Testament, with Introduction and Notes, 4th ed., 1866; W. F. Besser, St. Paul, erster Brief an die Korinther (1862), and Zweiter Brief (1863), in Bibelstudien für die Gemeinde ausgelegt, regarded in Germany as one of the best specimens of a happy union of accurate exegesis and practical exhortation; and J. C. K. von Hofmann, Erster Brief an die Korinther (1864), Zweiter Brief (1866), in his Die heilige Schrift Neum Testament zu zusammenhangend, untersucht, with special reference to the development of the doctrinal ideas. The article by Holtzmann (in Herzog's Real-Encycl. xix. 739-41) on the relation of the

II.

CORINTHIANS, SECOND EPISTLE TO THE, was written a few months subsequently to the first, in the same year, and thus, if the dates assigned to the former epistle be correct, about the autumn of A. D. 57 or 58, a short time previous to the Apostle's three months' stay in Achaia (Acts xx. 3). The place whence it was written is clearly not Ephesus (see ch. i. 8), but Macedonia (ch. vii. 5, viii. 1, ix. 2), whither the Apostle went by way of Troas (ch. ii. 12), after waiting a short time in the latter place for the return of Titus (ch. ii. 13). The Vatican MS., the bulk of later MSS., and the old Syr. version, assign Philippi as the exact place whence it was written; but for this assertion we have no certain grounds to rely on; that the bearers, however, were Titus and his associates (Luke?) is apparently substantiated by ch. viii. 25, ix. 5.

The occasion was occasioned by the information which the Apostle had received from Titus, and also, as it would certainly seem probable, from Timothy, of the reception of the first epistle. It has indeed recently been doubted by Neander, De Wette, and others, whether Timothy, who had been definitely sent to Corinth (1 Cor. iv. 17) by way of Macedonia (Acts xix. 22), really reached his destination (comp. 1 Cor. xii. 19); and it has been urged that the mission of Timothy would hardly have been left unattended in 2 Cor. xii. 17, 18 (see Eichard, Comm. p. 490). To this, however, it has been replied, apparently convincingly, that as Timothy is an associate in writing the epistle, any notice of his own mission in the third person would have seemed inappropriate. His visit was assumed as a fact, and as one that naturally made him an associate with the Apostle in writing to the church he had so lately visited.

It is more difficult to assign the precise reason for the mission of Titus. That he brought back tidings of the reception which St. Paul's first epistle had met with seems perfectly clear (ch. vii. 5 ff.), but whether he was specially sent to ascertain this, or whether to convey fresh directions, cannot be ascertained. There is a show of plausibility in the supposition of Black (Stud. a. Krit. for 1839, p. 625), followed more recently by Neander (Ibid. a. Leit. p. 437), that the Apostle had made Titus the beater of a letter couched in terms of decided severity, now lost, to which he is to be supposed to refer in ch. ii. 3 (compared with ver. 4, 9), viii. 8, 11 ff.; but, as has been justly urged (see Meyer, Einleitung, p. 3), there is quite enough of severity in the first epistle (consider ch. iv. 18-21, v. 2 ff., vi. 5-8, xi. 17) to call forth the Apostle's affectionate anxiety. If it be desirable to hazard a conjecture on this mission of Titus, it would seem most natural to suppose that the return of Timothy and the intelligence he conveyed might have been such as to make the Apostle feel the necessity of at once dispatching to the contentious church one of his immediate followers, with instructions to support
and strengthen the effect of the epistle, and to bring back the most recent tidings of the spirit that was prevailing at Corinth.

These tidings, as it would seem from our present epistle, were mainly favorable; the better part of the church were returning back to their spiritual Analyst feelings, and were in many cases alluding to their founded (ch. i. 11, 15, 18); but there was still a friction, possibly of the Judaising members (comp. ch. xi. 22), that were sharpened into even a more keen animosity against the Apostle personally (ch. x. 1, 10), and more strenuously denied his claim to Apostleship.

The contents of this epistle are thus very varied, but may perhaps be roughly divided into three parts:—1st, the Apostle's account of the character of his spiritual labors, accompanied with notices of his affectionate feelings towards his converts (ch. i.—vii.); 2ndly, directions about the collections (ch. viii., ix.); 3rdly, defense of his own apostolical character (ch. x.—xiii. 10). A close analysis is scarcely compatible with the limits of the present article, as in no one of the Apostle's epistles are the changes more rapid and frequent. Now he thanks God for their general state (ch. i. 3 ff.); now he glances to his purpose visited (ch. i. 15 ff.); now he alludes to the special directions in the first letter (ch. ii. 3 ff.); again he returns to his own plans (ch. ii. 12 ff.), pleads his own apostolical dignity (ch. iii. 1 ff.), dwells long upon the spirit and nature of his own labors (ch. iv. 1 ff.), his own hopes (ch. v. 1 ff.), and his own sufferings (ch. vi. 1 ff.), returning again to more specific declarations of his love towards his children in the faith (ch. vi. 11 ff.), and a yet further declaration of his views and purposes, with regard to them (ch. viii. 1 ff.). Then again, in the matter of the alms, he stirs up their liberality by alluding to the conduct of the churches of Macedonia (ch. viii. 1 ff.), their spiritual progress (ver. 7), the example of Christ (ver. 9), and passes on to speak more fully of the present mission of Titus and his associates (ver. 18 ff.), and to reiterate his exhortations to liberality (ch. ix. 1 ff.). In the third portion he passes into language of severity and reproach; he gravely warns those who presume to hold lightly his apostolical authority (ch. x. 1 ff.); he puts strongly forward his apostolical dignity (ch. xi. 5 ff.); he illustrates his forceliance (ver. 8 ff.); he makes honest boast of his labors (ver. 23 ff.); he declares the revelations vouchsafed to him (ch. xii. 1 ff.); he again returns to the nature of his dealings with them (ver. 12 ff.), and concludes with grave and reiterated warning (ch. xiii. 1 ff.), brief greetings, and a doxology (ver. 11—14).

The genuineness and authenticity is supported by the most decided external testimony (Irenæus, Her. iii. 7, 1, iv. 28, 3; Athenagoras, de Resurr. [c. 18.] p. 61, ed. Col.; Clem. Alex. Strom. iii. 94, iv. 101; [iii. c. 11, iv. c. 16, pp. 544, 608, ed. Potter.] Tertull. de Pudicit. c. 13), and by internal evidence of such a kind that what a writer can have pointed in this part of the first epistle is here even still more applicable. The only doubts that modern pseudo-criticism has been able to bring forward relate to the unity of the epistle, but are not such as seem to deserve serious consideration (see Meyer, Einl. p. 7).

The principal historical difficulty connected with the epistle relates to the number of visits made by the Apostle to the church of Corinth. The words of this epistle (ch. xii. 14, xiii. 1, 2) seem distinctly to imply that St. Paul had visited Corinth twice before the time at which he now writes. St. Luke, however, only mentions one visit prior to that there (Acts xviii. 1 ff.); for the visit recorded in Acts xx. 3, is confessedly subsequent. If with Grotti and others we assume that in ch. xii. 14 τρίτων belongs to έτοιμως ἔγω, and not to ἐλθεῖν πρός οὖν, we still have in ch. xiii. 1, the definite words τρίτων τότε ἔρχομαι, which seem totally to exclude any other meaning than this—that the Apostle had visited them twice before, and was now on the eve of going a third time. The ordinary subterfuge that ἔρχομαι is here equivalent to έτοιμως ἔγω ἐλθεῖν (so actually A, the Arabic [Etr.], and the Coptic versions) is grammatically indefensible, and would never have been thought of if the narrative of the Acts had not seemed to require it. We must assume then that the Apostle made a visit to Corinth which St. Luke was not moved to record, and which, from its probably short duration, might easily have been omitted in a narrative that is more a general history of the church in the lives of its chief teachers, than a chronicle of annalistic detail. So Chrysostom and his followers, [Ecumenius and Theophyret, and in recent times, Müller (De Tribus Pindii Hin. Basii, 1831), Anger (Itr. Temp. p. 70 ff.), Wieseler (Chronol. a. d. 700, p. 203), and the majority of modern critics. It has formed a further subject of question whether, on this supposition, the visit to Corinth is to be regarded only as the return there from a somewhat lengthened excursion during the 13 months' stay at that city (Anger), or whether it is to be referred to the period of the 3 years' residence at Ephesus. The latter has most supporters, and seems certainly most natural; see Wieseler, Chronol. 1. c., and Meyer, Einl. p. 6.

The commentaries on this epistle are somewhat numerous, and the same as those mentioned in the article on the former epistle. [See the addition on that epistle.] No portion of the Apostle's writings deserves more careful study, as placing before us the striking power of Christian rhetoric, which distinguished its great and inspired author.

* CORINTHUS. This Latin form occurs (for CORINTH) in the A. V. in the subscription to the Epistle to the Romans. A.

COROMANTEL. The representative in the A. V. of the Hebrew words כָּלָת (k"\na\q) and שָבָכִים (sh'\na\q), as to the former, see PELICAN.

Shibac (καταρακτίας: mergulus; nycticorax) occurs only as the name of an unclean bird in Lev. xi. 17; Dent. xv. 17. The word has been variously rendered (see Bochart, Hieroz. iii. 24), but some sea bird is generally understood to be denoted by it. There is some difficulty in identifying the καταρακτίας of the LXX.: nor can we be quite satisfied with Oedmann (Verm. Samml. iii. c. vii. p. 68), Michaelis, Rosenmüller, and others, that the Solan goose, or gannet (Sula alecto), is the bird mentioned by Aristotle (Hist. An. ii. 12, § 35; iv. 19, § 1) and the author of the Ixiontides (Opiyan, ii. 9). Col. H. Smith (Kitto's Cyc. art. Sabhk) has noticed that this bird (καταρακτίας) is described as being of the size of a hawk or one of the smaller gulls (ός των λάπον διάσχησε), whereas the gannet is as large as a goose. The account given in the Ixiontides (l. c.) of this bird is the fullest we possess; and certainly the description, with the exception above noted, is well suited to the gannet, whose habit of rising high into the air, and par-

**CORN**

CORN (ηςι). The most common kinds were wheat, ηςιαζ ηςιαζ; barley, ηςιαζ ηςιαζ; spelt (A. V., Ex. ix. 32, and Is. xxvii. 25, "rice"); Ez. iv. 9, "fitches"; ηςιαζ ηςιαζ (or in plur. form ηςιαζ ηςιαζ); and millet, ηςιαζ: ears are mentioned only by rabbinical writers. The doubtful word "corn" rendered "principal," as an epithet of wheat, in the A. V. of Is. xxvii. 25, is probably not distinctive of any species of grain (see Gesen, sub voc.). Corn crops are still reckoned at twofold what was sown, and were anciently much more. "Seven ears on one stalk" (Gen. xlii. 22) is no unusual phenomenon in Egypt at this day. The many-eared stalk is also common in the wheat of Palestine, and it is of course of the bearded kind. The "heap of wheat set about with lilies" which probably grew in the fields is supposed to be a custom of so decorating the sheaves (Gen. xlii. 2). Wheat (see 2 Sam. iv. 6) was stored in the house for domestic purposes — the "midst of the house," meaning the part more retired than the common chamber where the guests were accommodated. It is at present often kept in a dry well, and perhaps the "ground corn" of 2 Sam. xvii. 19 was meant to imply that the well was so used. From Solomon's time (2 Chr. ii. 10, 13), i. e., as agriculture became developed under a settled government, Palestine was a corn-exporting country, and her grains were largely taken by her commercial neighbor Tyre (Ez. xxvii. 17; comp. Amos viii. 5). "Plenty of corn" was part of Jacob's blessing (Gen. xxviii. 21; comp. Psa. lxx. 13). The "store-houses" mentioned 2 Chr. xxxii. 28 as built by Hezekiah, were, perhaps the consequence of the haye made by the Assyrian armies (comp. 2 K. xix. 29); without such protection the country in its exhausted state would have been at the mercy of the desert marauders.

Grain crops were liable to ηςιαζ ηςιαζ, "mildev," and ηςιαζ ηςιαζ, "blasting" (see 1 K. viii. 37), as well as of course to fire by accident or malice (Ex. xxvii. 3; Jude xv. 5); see further under Agriculture. Some good general works will be found in Saussure, Archäol. der Hebr. H. II.

**CORNELIUS** (ΚΩΝΔΛΩ), a Roman centurion of the Italian cohort stationed in Caesarea (Acts x. 1, Acts xv. 4); a man full of good works and almsgivers, who was admonished in a vision by an angel to send for St. Peter from Joppa, to tell him words whereby he and his house should be saved. Meanwhile the Apostle had himself been prepared by a symbolical vision for the admission of the Gentiles into the church of Christ. On his arriving at the house of Cornelius, and while he was explaining to them the vision which he had seen in reference to this mission, the Holy Ghost fell on the Gentiles present, and thus anticipated the reply to the question, which might still have proved a difficult one for the Apostle, whether they were to be baptized as Gentiles into the Christian Church. They were so baptized, and thus Cornelius became the first-fruits of the Gentile world to Christ. Tradition has been busy with his life and acts. According to Jerome (Lect. Jerom. i. 301), he built a Christian Church at Caesarea; but later tradition makes him Bishop of Scæmanni ("ria"), and ascribes to him the working of a great miracle (Moral. Grac. i. 129).

* We need not infer from Acts x. 7 that Cornelius was actually the first Gentile convert who believed the Gospel and was brought into the church; for at the time of his conversion and baptism, Paul, the Apostle of the Gentiles, had been laboring several years, preaching, in all probability, to some extent, in Arabia, and certainly in Syria and Cilicia. It is sufficient to understand that it was so ordered of God, that Cornelius, when he embraced the Gospel, should be received into the church under such circumstances as to settle authoritatively the question of circumcision in opposition to the Jewish claim that the Rite was to be imposed on all Gentile converts. The position of Cornelius in this respect was one of great interest, and the fullness of the account of his reception into the church shows the importance which the first Christians attached to it. The precise relation of Cornelius to Judaism before he adopted the Christian faith is not perfectly clear. He had certainly embraced the pure doctrines of the Old Testament and godliness, but was unconverted, and may not openly have professed the Jewish belief. Neander thinks that he belonged at least to the class of proselytes of the gate. It appears that the Jews regarded him as belonging at this time, ηςιαζ ηςιαζ (from ηςιαζ ηςιαζ, to break) means "grist," "patched corn," useful for provisions, as not needing cooking. In ηςιαζ ηςιαζ, and ηςιαζ ηςιαζ, comp. the Arab . It is from ηςιαζ (2 Sam. xvii. 19, Prov. xxvii. 22).
CORN

Corner. The στόμον or "corner," l. e. of the field, was not allowed (Lev. xiv. 9) to be wholly reaped. It formed a right of the poor to carry off what was so left, and this was a part of the maintenance from the soil to which that class were entitled. Similarly the gleaning of fields and fruit trees (Gleaning), and the taking a sheaf accidentally left on the ground, were secured to the poor and the stranger by law (xxiii. 22; Deut. xxiv. 19-21). These see to us, amidst the sharply defined legal rights of which alone civilization is cognizant, loose and inadequate provisions for the relief of the poor. But custom and common law probably insured their observance (Job xxiv. 10) previously to the Mosaic enactment, and continued for a long but indefinite time to give practical force to the statute. Nor were the "poor," to whom it appertained the right, the vague class of sufferers whom we understand by the term. On the principles of the Mosaic polity every Hebrew family had a hold on a certain fixed estate, and could by no ordinary and casual calumny be wholly beggared. Hence its indigent members had the claims of kindness on the "corners," i.e., of the field which their landed brethren reaped. Similarly the "stranger" was a recognized dependent; "within thy gates" being his expressive description, as sharing, though not by any tie of blood, the domestic claim. There was thus a further security for the maintenance of the right in its definite and ascertainable character. Neither do we, in the earlier period of the Hebrew polity, closely detailed as its social features are, discover any general traces of agrarian distress and the unsafe condition of the country which results from it—such, for instance, as is proved by the handiwork of the Herodian period. David, a popular leader (1 Sam. xviii. 30, xxii. 11), could only muster from four to six hundred men out of all Judah, though "every one that was in distress, in debt, and every one that was discontented came unto him" (1 Sam. xxii. 2, xxiv. 13). Further, the position of the Levites, who had themselves a similar claim on the produce of the land, but no possession in its soil, would secure their influence as expounders, teachers, and in part administrators of the law, in favor of such a claim. In the later period of the prophets their constant complaints concerning the defrauding the poor (Is. x. 2; Amos v. 11, viii. 6) seem to show that such laws had lost their practical force. Still later, under the Scribes, minute legislation was made on sixteenth as on the twenty-fifth part of a field which was to be left for the legal "corners;" but provided also (which seems hardly consistent) that two fields should not be so joined as to leave one corner only where two should fairly be reckoned. The proportion being thus fixed, all the grain might be reaped, and enough to satisfy the regulation subsequently separated from the whole crop. This "corner" was, like the gleaning, title-free. Certain fruits to which, as so nuts, pomegranates, vines, and olives, were deemed liable to the law of the corner. Maimonides indeed lays down the principle (Constitutions de dominio praeceptorum, cap. ii. 1) that whatever crop or growth is fit for food, is kept, and gathered all at once, and carried into store, is liable to that law. A Gentile holding land in Palestine was not deemed liable to the obligation. As regards land, this provision seems to have been sanctioned as follows: When a house was consecrated to the Temple and its services, was held exempt from the claim of the poor; an owner might thus consecrate it while the crop was on it, and then reeve it, when in the sheaf, to his own use. Thus the poor would lose the right to the "corner." This reminds us of the "Corban" (Mark vii. 11). For further information, see under AGRICULTURE.

The treatise Pseki, in the Mishna, may likewise be consulted, especially chaps. i. 2, 3, 4, 5, 6; ii.; iv. 7, also the above-quoted treatise of Maimonides.

Corner-stone (σταυροτής or σταυρός, of σταύρων: lapis angularis; also אגנון, Ps. cxviii. 22: יְהוָה יְהוָה: opulentus, Ps. cxviii. 22: יְהוָה יְהוָה: opulentus). A great stone, of great importance in binding together the sides of a building. One of the corner-stones in the ancient work of the temple foundations were 17 or 19 feet long, and 7½ feet thick (Robinson, i. 286). Corner-stones are usually laid sideways and endways alternately, so that the end of one appears above or below the side-face of the next. At Nineveh the corners are sometimes formed of one angular stone (Layard, Nin. ii. 254). The expression in Ps. cxviii. 22 is by some understood to mean the coping or ridge, "crown of vantage," of a building, but as in any part a corner-stone must of necessity be of great importance, the phrase "corner-stone" is sometimes used to denote any principal person, as the princes of Egypt (Is. xix. 13), and is thus applied to our Lord, who, having been once rejected, was afterwards set in the place of the highest honor (Is. xxvii. 16: Matt. xxi. 42; I Pet. ii. 6, 7; (Grotius on Ps. cxviii. and Eph. ii. 20; Harmer, Ola., ii. 356). H. W. P.

CORNET (Sheqhid, שֶׁקִּחֵד, σκύχεις: buccina), a loud sounding instrument, made of the horn of a ram or of a chamois (sometimes of an ox), and used by the ancient Hebrews for signals. For announcing the לֶחֶם, "Jubilee" (Lev. xxv. 9), for proclaiming the new year (Mishna, Rosh Hashanah, III. and iv.), for the purposes of war (Jer. iv. 5, 19, comp.Job xxxiv. 25), as well as for the sentinel placed at the watch-towers to give notice of the approach of an enemy (Ez. xxxiii. 4, 5). לֶחֶם is generally rendered in the A. V. "trumpet," but "corne" (the more correct translation) is used in 2 Chr. xv. 14; Ps. xcviii. 6; Hos. v. 8; and 1 Chr. xxv. 28. It seems probable that in the two last instances the authors of the A. V. would also have preferred "trumpet," but for the difficulty of finding different English names in the same passage for two things so nearly resembling each other in meaning as לֶחֶם, buccina, and Chatzoldera, לֶחֶם, taba. "Corne" is also employed in...
DAN iii. 5, 7, 10, 18, for the Chaldee noun ארב, keren (literally a horn).

Oriental scholars for the most part consider sho- phar and keren to be one and the same musical instrument; but some Biblical critics regard sho- phar and chothzetervah as belonging to the species of keren, the general term for a horn. (Joel Brili, in prefacc to Mendelssohn's version of the Psalms.)

John distinguishes keren, "the horn or crooked trumpet," from chothzetervah, the straight trumpet, and an instrument a cubit in length, hollow throughout, and at the larger extremity so shaped as to resemble the mouth of a short bull (Archdradg, xcv. 4, 5): but the generally received opinion is, that keren is the crooked horn, and sho- phar the long and straight one.

The silver trumpets (המכה 달), which Moses was charged to furnish for the Israelites, were to be used for the following purposes: for the calling together of the assembly, for the journeying of the camps, for sounding the alarm of war, and for celebrating the sacrifices on festivals and new moons (Num. x. 1-10). The divine command to Moses was restricted to two trumpets only, and these were to be sounded by the sons of Aaron, the appointed priests of the sanctuary, and not by laymen. It should seem, however, that at a later period an impression prevailed, that whilst the trumpets were suffered to be sounded only by the priests within the sanctuary, they might be used by others, not of the priesthood, without the sacred edifice. (Gumal ken's Antiquities He- breus, pars i, sec. viii. Sacerdotum eum instrumentis ipserunt.) In the age of Solomon the "silver trumpets" were increased in number to 120 (2 Chr. v. 12); and, independently of the objects for which they had been first introduced, they were now employed in the orchestra of the temple, as an accompaniment to songs of thanksgiving and praise.

Yôbed, בֹּד, used sometimes for the "year of Jubilee." (תנrito תּוֹרִית יַבָּד), comp. Lev. xxv. 13, 15, with xxv. 38, 40), generally denotes the institution of Jubilee, but in some instances it is spoken of as a musical instrument, resembling in its object, if not in its shape, the keren and the sho- phar. Gesenius pronounces yôbed to be "an onomatopoetic word, signifying jubilium or a joyful sound, and hence applied to the sound of a trumpet signal, like תּוּרִית יַבָּד" (alarm," Num. x. 5): and Dr. Munk is of opinion that "le mot yôbed n'est qu'une épithète" (Palestine, p. 456 a, note). Still it is difficult to divert yôbed of the meaning of a sounding instrument in the following instances: When the trumpet (תנrito תּוּרִית יַבָּד) sounded long, they shall come up to the mount" (Ex. xix. 13): "And it shall come to pass that when they make a long blast with the ram's horn" (תנrito תּוּרִית יַבָּד, Josh. vi. 5); "And let seven priests bear seven trumpets of rams' horns" (תנrito תּוּרִית יַבָּד, Josh. vi. 8).

The sounding of the cornet (תנrito תּוּרִית יַבָּד) was the distinguishing ritual feature of the festival appointed by Moses to be held on the first day of the seventh month under the denomination of "a day of blowing trumpets" (תנrito תּוּרִית יַבָּד, Num. xxix. 1), or "a memorial of blowing of trumpets" (תנrito תּוּרִית יַבָּד, Lev. xxiii. 24): and that rite is still observed by the Jews in their celebration of the same festival, which they now call "the day of mem- orial" (תנrito תּוּרִית יַבָּד), and also "New Year" (תנrito תּוּרִית יַבָּד). Some commentators," says Rosenmuller, "have made this festival refer to the preservation of Isaac" (Gen. xxii.), whence it is sometimes called by the Jews, "the Binding of Isaac" (תנrito תּוּרִית יַבָּד). But it is more probable that the name of the festival is derived from the usual kind of trumpets (rams' horns) then in use, and that the object of the festival was the celebration of the new year and the exhortation to thank- givings for the blessings experienced in the year just finished. The use of cornets by the priests in all the cities of the land, not in Jerusalem only (where two silver trumpets were added, whilst the Levites chanted the 81st Psalm), was a suitable means for that object" (Rosenmuller, Das alte und neue Morgenland, vol. ii., No. 357, on Lev. xxiii. 24).

Although the festival of the first day of the seventh month is denominated by the Mishna "New Year," and notwithstanding that it was observed as such by the Hebrews in the age of the second temple, there is no reason whatever to believe that it had such a name or character in the times of Moses. The Pentateuch fixes the vernal equinox (the period of the institution of the Passover), as the commencement of the Jewish year; but for more than two centuries the Jews have dated their new year from the autumnal equinox, which takes place about the season when the festival of "the day of sounding the cornet" is held. Rab- binical tradition represents this festival as the anniver- sary of the creation of the world, but the state- ment receives no support whatever from Scripture. On the contrary, Moses expressly declares that the month Ann (the Moon of the Spring) is to be regarded by the Hebrews as the first month of the year: "This month shall be unto you the beginning of the sixth month; it shall be the first 

"Nisan" month of the year to you" (Ex. xii. 2). (Munk, Palestine, p. 184 b.) The intention of the appointment of the festival "of the Sounding of the Cornet," as well as the duties of the sacred institution, appear to be set forth in the words of the prophet, "Sound the cornet (תנrito תּוּרִית יַבָּד) in Zion, sanctify the fast, proclaim the solemn assembly " (Joel ii. 15). Agreeably to the order in which this passage runs, the institution of the"Festival of Sounding the Cornet," seems to be the prelude and preparation for the awful Day of Atonement. The Divine command for that fast is connected with that for "the Day of Sound- ing the Cornet" by the conjunctive particle ז'. "Likewise on the tenth day of this seventh month is the Day of Atonement" (Lev. xxiii. 27). Here ז'" (likewise) unites the festival "of the Day of Sound- ing the Cornet" with the solemnity of the Day of Atonement precisely as the same particle connects the "Festival of Tabernacles" with the obser- vance of the ceremonial of "the fruit of the Hidbar tree, the palm branches," &c. (Lev. xxiii. 39-40). The word "solemn assembly" (תנrito תּוּרִית יַבָּד)}
in the verse from Joel quoted above, applies to the festival "Eighth Day of the Solemn Assembly" (יהוהיִּיםָ֣יִם), the closing rite of the festive cycle of Tabernacles (see Religious Discourse of Rev. Professor Marks, vol. i. pp. 201, 282). Besides the use of the cornet on the festival of "blowing the trumpets," it is also sounded in the synagogue at the close of the service for the day of atonement, and, amongst the Jews who adopt the ritual of the Sephardim, on the seventh day of the feast of Tabernacles, known by the post-biblical denomination of "the Great Hosannah" (הָהַנָּה הַגּוֹדָם).

The sounds emitted from the cornet in modern times are exceedingly harsh, although they produce a solemn effect. Gesenius derives the name הָהַנָּה from הָהַנָּה, "to be bright, clear" (compare הָהַנָּה, Ps. xvi. 6).

D. W. M.

COS (Kós, now Šanakio or Šanako; [Cous].) a small island has several interesting points of connection with the Jews. It is specified, in the edict which resulted from the communications of Simon Macabaeus with Rome, as one of the places which contained Jewish residents (1 Macc. xx. 33). Josephus, quoting Strabo, mentions that the Jews had a great amount of treasure stored there during the Mithridatic war (Joseph. Ant. xiv. 7, § 2).

From the same source we learn that Julius Caesar issued an edict in favor of the Jews of Cos (ibid. 10, § 15). Herod the Great conferred many favors on the island (Joseph. B. J. i. 21, § 11); and an inscription in Bēthēma (No. 2502) associates it with Herod the tetrarch. St. Paul, on the return from his third missionary journey, passed the night here, after sailing from Miletus. The next day he went on to Rhodes (Acts xxii. 1). The proximity of Cos to these two important places, and to COTTON

* COTTAGE. In Is. xxiv. 20 the Hebrew word בַּתָּן, Mishanah, rendered "cottage" in the A. V., would be better translated "hammock." See Bed, p. 261.

A.

COTTON (סֶפֶר כֹּתָן): קֹדֶמָא, הקֹדֶם, i.e., "the most holy and costly apparel" (comp. Prov. xxii. 22 with Esth. viii. 15). The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii. 37), in spite of Pliny's assertion (xix. 1. 2) that they preferred cotton. Yet cotton garments for the worship of the temples are said to be mentioned in the Rosetta stone (Wilkinson, Anc. Egypt. iii. 117). The same with the Jewish ephod and other priestly attire, in which we cannot suppose any carelessness to have prevailed. If, however, a Jew happened to have a piece of cotton cloth, he probably would not be deterred by any scruple about the heterogenesis of Deut. xxii. 11 from wearing that and linen together. There is, however, no word for the cotton plant (like סֶפֶר כֹּתָן) for flax) in the Hebrew, nor any reason to suppose that there was any early knowledge of the fabric.

The Egyptian mummy swathing also, many of which are said to remain as good as when fresh
from the loom, are decided, after much controversy and minute analysis, to have been of linen, and not cotton. The very difficulty of deciding, however, shows how easily even scientific observers may mistake, and, much more, how impossible it would have been for ancient popular writers to avoid confusion. Even Greek naturalists sometimes clearly include "cotton" under ψάτη, The same appears to be true of लाभ, लाभर, and the whole class of words signifying white textile vegetable fabrics. The proper oriental name for the article सम्पत्ति (said to occur with slight variation in Sanskrit, and other oriental languages) is rendered "green" in the A. V. of Esth. i. 6, but Grecized in the LXX. by κατάσκινον. From the same word, with which either their Alexandrian or Parthian intercourse might familiarize them, the Latins borrowed curblas, complete current in poetical use in the golden and silver period of Latinity, for sails, awnings, &c. Varro knew of tree-wool on the authority of Ctesias, contemporary with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Amasis, indeed (about B.C. 540) sent as a present from Egypt a basket κεντισματος χρυσος και ἐπίκεν τοιαυτα ξυλοι (Herod. ii. 47), which Pliny says was still existing in his time in a temple in Rhedes, and that the minutes of its tide had provoked the experiments of the curious. Cotton was manufactured and worn extensively in Egypt, but extant monuments give no proof of its growth, as in the case of flax, in that country (Wilkinson, i. pp. 116-138, and plate No. 356); indeed, had it been a general product, we could scarcely have missed finding some trace of it on the monumental details of ancient Egyptian arts, trades, &c.; but, especially, when Pliny (i. xxiv) asserts that cotton was then grown in Egypt, a statement confirmed by Julius Pollux in a century later, we can hardly resist the inference that, at least as a curiosity and as an experiment, some plantations existed there. This is the more likely since we find the cotton-tree (gossypium herbaceum, less usual than, and distinct from, the cotton plant, goss. indica) is mentioned still by Pliny as the only remarkable tree of the adjacent Ethiopian district, and since Arabia, on its western side, appears to have known cotton from time immemorial, to grow it in abundance, and in parts to be highly favorable to that product. In India, however, we have the earliest records of the use of cotton for dress; of which, including the starching of it, some curious traces are found as early as 800 B.C. (in the Institutes of Manu; also it is said, on the authority of Ptolemy the Ptolemaic) in the Rig-Veda, 106, v. 8. For these and some other curious antiquities of the subject, see Ryle's Cotton and Commerce of Cotton in India, pp. 117-122.

"Cotton tree" in Arabic is kharsha, in Persian khesar, and in Naskhi khasr. The Hebrew word invariably used for the former is נָחַר, from a root, נ-ץ-ץ, to surround (Genesis, p. 512). (See amongst others, Ex. xxv. 9, to xl. 33; Lev. vi. 16; Num. iii. 26, &c.). The same word is also most frequently used for the "cotton" of the Temple, as i. K. vi. 26, viii. 2; xiv. 1. 31; xxv. 12; 2 Chr. xxvii. 17; Ps. xviii. 11; Acts 21. 2. 4, 5, and vii. 13, however, a different word is employed, apparently in Arabic, כּותַנ חֲנִי, meaning: (1) any annual; (2) anything between two leaves; (3) the well-known "cotton" plant. This ending of the speciea from the general sense seems to indicate that the name "cotton" is originally Arabic; though it may be true that the plant is indigenous in India.
be the same places — ἄνθροπον, ἀνθρώπων, from a root of similar meaning to the above. This word also occurs in Ez. xiii. 14, 17, 20, xiv. 19 (A. V. "settle"), but perhaps with a different force. Chaiter also designates the court of a prison (Neh. iii. 25; Jer. xxxix. 2, 7) of the house of the high-priest, and not "palace" or "hall" (A. V.). Peter himself was not in the room of the palace where the Saviour was on trial, as the English reader would be led to suppose, but was in the court outside. [See HOUSE; Peter.]

COUHITA (Kowhida: [Vat. omits Phous], 1 Esdr. v. 32). There is no name corresponding with this in the lists of Ezra and Nehemiah. [He is mentioned as one of those whose sons were "servants of the temple" after the return from the Captivity. — H.]

COVENANT (γα浃ν: διαθήκη; once, Wisd. i. 16, σωφρονίζω in O. T.: field, pactum — often interchangeably, Gen. ix., xviii.; Num. xxv.; in Apoc. testamentum, but sacramentum; 2 Esdr. ii. 7; sponsiones, Wisd. i. 16; in N. T. testamentum [of make field, Rom. i. 31; Gr. σωφρονίζων]).

The Hebrew word is derived from Gesenius from the root דשם, i. e. מַשֶּׁה, "he cut," and taken to mean primarily "a cutting," with reference to the custom of cutting or dividing animals in two, and passing between the parts in ratifying a covenant (Gen. xv.; Jer. xxxiv. 18, 19). Hence the expression "to cut a covenant" (דרש, דרה, דרָה, דרש, with מַשֶּׁה understood, 1 Sam. x. 2) is of frequent occurrence. (Comp. ἐπιγραφὴς τέμνων, τέμνων σωφρονίς, icere, ferire, percurre, percursus.) Professor Lee suggests (Heb. Lex. s. v. מַשֶּׁה) that the proper signification of the word is an eating together, or banquet, from the meaning "to eat," which the root מַשֶּׁה sometimes bears, because among the Orientals to eat together amounts almost to a covenant of friendship. This view is supported by Gen. xxxi. 46, where Jacob and Laban eat together on the heap of stones which they have set up in ratifying the covenant between them. It affords also a satisfactory explanation of the expression "a covenant of salt" (מָשֶׁה מְשַׁה, διαθήκη ἀλός, Num. xviii. 19; 2 Chr. xiii. 5), when the Eastern idea of eating salt together is remembered. If, however, the other derivation of מַשֶּׁה be adopted, this expression may be explained by supposing salt to have been eaten, or offered with accompanying sacrifices, in occasion of very solemn covenants, or it may be regarded as figurative, denoting, either, from the use of salt in sacrifice (Lev. ii. 13; Mark ix. 41), the sacresness, or, from the preserving qualities of salt, the perpetuity, of the covenant.

In the N. T. the word διαθήκη is frequently, though by no means uniformly, translated testament in the English Authorized Version, whence the two divisions of the Bible have received their common English names. This translation is perhaps due to the Vulgate, which has adopted testamento, as the equivalent for διαθήκη in the Apoc., uses it always as such in the N. T. (see above). There seems, however, to be no necessity for the introduction of a new word conveying a new idea. The LXX. having rendered מַשֶּׁה (which never means until or testament, but always covenant or agreement) by διαθήκη consistently throughout the O. T., the N. T. writers, in adopting that word, may naturally be supposed to intend to convey to their readers, most of them familiar with the Greek O. T., the same idea. Moreover, in the majority of cases the same thing which has been called a "covenant" (מַשֶּׁה in the O. T. is referred to in the N. T. (e. g. 2 Cor. iii. 14; Heb. vii., ix.; Rev. xi. 19); while in the same context the same word and thing in the Greek are in the same sometimes represented by "covenant," and sometimes by "testament" (Heb. vii. 22, viii. 8-13, ix. 15). In the confessedly difficult passage, Heb. ix. 15, 17, the word διαθήκη has been thought by many commentators absolutely to require the meaning of until or testament. On the other side, however, it may be alleged, that in addition to what has just been said as to the usual meaning of the word in N. T., the word occurs twice in the context, where its meaning must necessarily be the same as the translation of מַשֶּׁה, and in the unquestionable sense of covenant (cf. διαθήκη καθαρίς, Heb. ix. 15, with the same expression in viii. 8; and διαθήκη, ix. 16, 17, with ver. 20, and Ex. xxiv. 8). If this sense of διαθήκη be retained, we may either render εἴη νεκροίς, "over, or in the case of, dead sacrifices," and διαθήκης, "the mediating sacrifices" (Scholfield's Hints for an Improved Translation of the N. T.), or (with Ebrard and others) restrict the statement of ver. 16 to the O. T. idea of a covenant between man and God, in which man, as guilty, must always be represented by a sacrifice with which he was so completely identified, that in its person he (διαθήκης, the human covenantor) actually died (cf. Matt. xxvii. 28).

In its Biblical meaning of a compact or agreement between two parties, the word is used — 1. Improperly, of a covenant between God and man. Man not being in any way in the position of an independent covenanting party, the phrase is evidently used by way of accommodation. Strictly speaking, such a covenant is quite unconditional, and amounts to a promise (Gal. iii. 15 ££, where εὐγγέλια and διαθήκη are used almost as συνονύμως) or act of mere favor (Ps. lxxxix. 28, where מָשֶׁה stands in parallelism with מַשֶּׁה on God's part. Thus the assurance given by God after the Flood, that a like judgment should not be repeated, and that the recurrence of the seasons, and of day and night, should not cease, is called a covenant (Gen. ix.; Jer. xxxiii. 29). Generally, however, the form of a covenant is maintained by the bene
covering of the Eyes.

The Hebrew word בַּעַשֶּׂבֶּה (b'eshbe) occurs in eight passages of the Old Testament: in six of which (Gen. xx. 16 Ex. xxii. 27; Job xvi. 7. xxxvi. 9. xxxvi. 19. Is. L 3) it is translated “covering” in the A. V.; in one (Ex. xxi. 19) it is translated “vainment,” and in one (Deut. xxiii. 12) “vesture.”

The meaning of the phrase, “covering of the eyes,” in Gen. xx. 16, and the construction and import of the sentence, are still subjects of discussion, even among the latest interpreters. “Tut pane estant explicationes, quot sunt interpretes” (Ros.) The points still at issue have respect to almost every word in the sentence. The pronoun בַּעַשֶּׂבֶּה (b'eshbe), or (it) be the present made to him. “A covering of the eyes” may mean (c) a literal veil, or (d) a veil in a figurative sense as a protective influence, or (e) with a different allusion, a means of purification. By “the eyes” may be meant (f) those of Sarah herself, or (g) in connection with the following בַּעַשֶּׂבֶּה (b'eshbe), those of all around her and in intercourse with her. The word “all” (בַּעַשֶּׂבֶּה b'eshbe) may refer (b) to things (namely, acts), or (i) to persons. In the last clause, בַּעַשֶּׂבֶּה (b'eshbe) may be (j) a preposition, or (k) the sign of the accusative case, after בַּעַשֶּׂבֶּה (b'eshbe), or (l) as the punctuators have indicated by the Akkadian, in connection with the following verb. The form בַּעַשֶּׂבֶּה (b'eshbe) may be (m) the 2d pers. fem. of the perfect, or (n) the participle used as the 3d pers. fem.

No. v, in conjunction with ḩ, was well expressed by Talvin: "Docteur enim Sura, maritum cui juncta est, instar veli esse, quod se tegere debeat, non exposita st aliens." So Vitringa. But Tiele judicis objects, that in this view, the present of a thousand silverlings, with which Abimelech prefaces this remark, has no significance.

Ewald (Aug. Lehrb. p. 281), combining a, d, g. i, j, m, translates and explains thus: "He is to thee a covering of the eyes for every one who is with thee (so that, under his protection, no impure eye can with impunity venture to look on thee), and fenced every one; so dost thou right thyself" (defend thyself)

Gesenius, combining b, e, f, h, j, n, translates and explains thus: "So this (the thousand silverlings) is to thee a penalty [satisfaction] for all which (has happened) with thee and before all; and she was corrected (had nothing to say in excuse). Compare Gen. xxxii. 21, I will cover his face (appease him) with the present." So Keil, and also Delitzsch; except that they take בַּעַשֶּׂבֶּה (b'eshbe) (m) as the 2d pers., and בַּעַשֶּׂבֶּה (b'eshbe) (n) as referring to persons: "So it is to thee a covering of the eyes (an expiatory gift) in reference to all who are with thee (because all in the household shared their mistress's dishonor); so thou art righted properly, pecuni, namely, to be the one who suffered wrong."

So the passage is understood by Tisch. He takes exception, however (after Schumann) to Ewald's and Gesenius's construction of the second בַּעַשֶּׂבֶּה, which should be construed as the one immediately preceding it; for בַּעַשֶּׂבֶּה בַּעַשֶּׂבֶּה must not be arbitrarily separated in construction and reference.
Hence he translates: "for all which (has been, or has taken place) with thee and with all, that thou mayest be righted."

Baumgarten (Theol. Comm. zum Pent.) has revived Schroeder's interpretation (followed by Rosenmüller and others), taking "covering of the eyes" (c) in the sense of a literal veil; not, however, as Schroeder viewed it, as the tosh of a married woman, but simply as a means of concealing her beauty, and thus avoiding the danger referred to in xvi. 11. Baumgarten supposes that after Athnach the accusative construction is resumed in ἁνα.

(k), taking γυνὴ as the 2d pers. perf. (or), and translates: "and all this (I do, or, I give) that thou mayest be righted."

Lange, understanding "covering of the face" a veil in the figurative sense, finds (with Le Clerc) a double meaning in the expression; namely, a gift of atonement and reconciliation, which at the same time shall be as a veil to all eyes, by indicating the relation of one married to a husband.

On these views it may be remarked, that the form of the expression, "covering of the eyes," (not "of the face,") seems to be decisive against the supposition that a veil is meant, either as worn by Sarah for concealing her person from the sight of others, or by them to restrict their sight. In the former case, the expression should have been, "covering of the face" (ἡ γυνὴ ἐπί). A "covering of the eyes," in the literal sense, can mean nothing else than the repression of the improper use of the eyes, as of wanton looks. This, with reference to Sarah, is inapposite, as no such fault is laid to her charge; and it is understood of others ("a covering of the eyes to all who are with thee"), a veil cannot be meant, for that is used for concealment, and not for the purpose of obstructing the vision. The objection lies equally against the supposition of a veil in a figurative sense, since this must conform to the literal and proper use of the term.

The only alternative remaining, is to take the expression, "covering of the eyes," in its strict and proper sense, instead of a veil for the face; either with Ewald, as referring to Abraham, her lawful protector from the wanton gaze of others; or with Gesenius, as a figurative expression for a peace-offering. In favor of the former, is the juxtaposition of the pronoun ἡ (he, or it) with "thy brother," making this its most natural antecedent: an objection to the latter view, which is but partially obviated by the use of ἐπί for both genders in the Pentateuch. But on the contrary, against Ewald's view lies the more serious objection, that Abimelech prefers this remark with a statement which has no bearing on it; and thus a part of what he says to Sarah herself is without significance, as addressed to her.

The ancient versions are all at fault here, and throw no light on the true rendering and interpretation (unless we understand the Septuagint version with Gesenius), showing that it was as difficult then as it is now.

T. J. C.

COW. The Heb. words נבּ (nēb), נֶבֶּ֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫֫ hustle.
being expressive of happiness rather than of grief; out it must be remembered that the ancients regarded the swallow as a mournful bird; and it is worthy of remark that, according to Dr. Kennet, in thirteen volumes of Jeremiah (l. c.) the word *litis* occurs instead of *sit*: it is probable therefore that Sostratus, from *litis*, of ancient mythology had its source in ancient Egyptian *la-isis, as the Egyptians say, having been changed into a swallow. The Hebrew word *beshur* (7777) is noticed under the article SWALLOW. W. H.

**CREATES** (Κρητης; Vulg. translites *peregrinus*, or servant of the Cyprians), (76) *see in the article Sibyllas*). An island, which was left in charge of the "castle" (5777 σοφρινον Ακρωτηριον) of Jerusalem (72), during the absence of Sostratus, in the reign of Antiochus Epiphanes (2 Macc. iv. 29).

**CREDITOR. [Loan.]**

**CRETES** (Κρήτης; Greek for the work for the Latin name *Crecus*; *increasing*). 2 Tim. iv. 10, an assistant of St. Paul [who went from Rome to Galatia, perhaps sent by the Apostle], said to have been one of the seventy disciples. According to the Apostolical Constitutions, and many of the fathers, he preached the Gospel in Galatia, which is perhaps only a conjecture built on the "Crecus to Galatia" of 2 Tim. iv. 19. Later tradition (Cyprian) makes him preach in Cæsarea, Italy, see Theodoret on 2 Tim. L. 52, and found the Church at Vienna.

**CRETE (Κρήτη; Creta), the modern Candia.** This large island, which closes in the Greek Archipelago on the N., extends through a distance of 140 miles between its extreme points of Cape Samos (Acts xxii. 7) on the E., and Cape Grias-topon beyond Phoenicia or Phoenix (ib. 12) on the W. The breadth is comparatively small, the narrowest part (called an isthmus by Strabo, x. 475) being near Phoenix. Though extremely hilly and mountains, this island has very fruitful valleys, and in early times it was celebrated for its hundred cities (Virg. Aen. iii. 106). Crete has a conspicuous position in the mythology and earliest history of Greece, but a comparatively unimportant one in its later history. It was reduced (A. D. 67) by the Romans under Metellus, hence called Cretans, and united in one province with Cyrenaica, which was at no great distance (Strabo, x. 475) on the opposite coast of Africa (7777). It is possible that in Tit. iii. 1, there may be an implied reference to a turbulent condition of the Cretan part of the province, especially as regarded the Jewish residents.

It seems likely that a very early acquaintance took place between the Cretans and the Jews. The story in Tacitus (Hist. v. 2), that the Jews themselves of Cretan origin, may be accounted for by supposing a confusion between the Philistines and the Jews; and by identifying the Cretenses of 1 Sam. xxx. 14; 2 Sam. viii. 18; Ez. xxvi. 16; Zeph. ii. 5, with Cretan emigrants. In the two last of these passages they are expressly called *Kρητες* by the LXX., and in Zeph. ii. 6, we have the word *Kretynn*. Whatever conclusion we may arrive at on this point, there is no doubt that Jews were settled in the island in considerable numbers during the period between the death of Alexander the Great and the final destruction of Jerusalem. Gortyn seems to have been their chief residence; for it is specially mentioned (1 Macc. xx. 23) in the letters written by the Romans on behalf of the Jews, when Simon Macceabaeus renewed the treaty which his brother Judas had made with Rome. The name of the country Cretan (76), perhaps the period Josephus says (Ant. xviii. 12, § 1, B. J. ii. 7, § 1) that the Psæudo-Alexander, Herod's supposed son, imposed upon the Jews of Crete, when on his way to Italy. And later still, Philo (Leg. ad Cai. § 36) makes the Jewish envoys say to Caligula that all the more noted islands of the Mediterranean, including Crete, were full of Jews. Thus the special mention of Cretans (Acts ii. 11) among those who were in Jerusalem at the great Pentecost is just what we should expect.

No notice is given in the Acts of any more direct evangelization of Crete: and no absolute proof can be adduced that St. Paul was ever there before his voyage from Cæsarea to Puteoli; though it is quite possible that he may have visited the island in the course of his residences at Corinth and Ephesus. For the speculations which have been made in regard to the possibility that we should refer to what is written in the articles on TITUS, and TITUS, EPISTLE TO.

The circumstances of St. Paul's recorded visit were briefly as follows. The wind being contrary when he was off Cnidus (Acts xxvii. 8), the ship was forced to run down to Cape Samos, and thence under the ice of Crete to Fair Havens, which was near a city called Lasca (ver. 8). Thence, after some delay, an attempt was made, on the wind becoming favorable, to reach Phœnicia for the purpose of wintering there (ver. 12); but a sudden gale from the S. E. (Winds) coming down from the high ground of Crete (σαρωνις), in the neighborhood of Mount Ida, drove the ship to the little island of Clauda (vv. 13-16), whence she drifted to Malta. It is impossible to say how far this short stay at Fair Havens may have afforded opportunities for preaching the Gospel at Lasca or elsewhere.

The next point of connection between St. Paul and this island is found in the epistle to Titus. It is evident from Tit. i. 5, that the Apostle himself was here at no long interval of time before he wrote the letter. We believe this to have been between the first and second imprisonments. In the course of the letter (Tit. i. 12) St. Paul adresses from Ephesus, a Cretan sage and poet (6666 Κρητης Ἀριστ.). A quotation in which the virtues of his countrymen are described in dark colors. The truth of what is said by Epimenides is abundantly confirmed by the passages collected (iv. 10) in Murensis's great work on Crete (Murensis Opera, Florence, 1744, vol. iii.). He has also a chapter (iv. 4) on the early Christian history of the island. Titus was much honored here during the middle ages. The cathedral of Megalo-CASTRUM was dedicated here; and his name was the watchword of the Cretans, when they fought against the Venetians, who themselves seem to have placed him above St. Mark in Candia, when they became masters of the island. See Pashley's Travels in Crete, i. 6, 175 (London, 1835). In addition to this valuable work, we must refer to Hoeck's *Kreta* (Gottingen, 1829), and to some papers translated from the Italian, and published by Mr. E. Falkener in the

* Rangabas in his Ελληνικά (iii. 453-579) has sketched the ancient history and the geographical features of Crete (mountains, rivers, promontories, and harbours, with an enumeration of the cities and villages), and (though some redaction may be necessary for the present time) furnishing valuable statistics respecting the population of the island at different periods (Greeks and Turks), its monastic establishments, products, exports, imports, and the like. This author represents ΚαλλιΑμύνες as an insecure roadstead, to which vessels resorted only in great distress, in accordance with its reputation among seamen in Paul's time (Acts xxvii. 8). He supposes the Lassan which was near there to be the "Lisia" of the Peutinger Table, but says nothing of any place still known by that name (Laša). He mentions the interesting fact that Phoenix or Phoenix (Acts xxvii. 12) had its own bishops at an early period, and that one of them named Leon was present at the second Nicean Council. He speaks of this Phoenix as near Latro (Δυτικά), but evidently had no idea that they were identical (see Phœnix). The opinion of so eminent an archaeologist on these points deserves to be considered. The more recent publications of Capt. Sproat, R. N. (Sailing Directions for the Island of Crete, and Travels and Researches in Crete) have added largely to our knowledge of the topography of the island. Mr. Smith has availed himself of these later discoveries, with good effect, in his admirable work on the Voyage and Shipwreck of St. Paul (3d ed. 1866).

One of the observations reported by navigators is that on the south side of Crete a light southerly wind is often succeeded by a typhoon, which strikes down from the high mountains on the island, as happened to Paul's vessel in going from Fair Havens to Phoenix (Acts xxvii. 14). It is said that this fact favors the interpretation of ἐβάλε καὶ ἀνέβει (mentioned in the article above) and adopted in several of the later English Commentaries (which refers to the island (down from βαίλει) and the voyage and shipwreck of St. Pauls, 3d ed. p. 99). It is true, no doubt, that the wind in that instance came from the high land on shore, but it does not follow that κατ᾽ ἀνέβει points out that circumstance. No proof has been given that βαίλεως, as said of winds, was actually used thus with the genitive of the quarter whence the wind came. Lechler's view (Der Apostelgeschichte, p. 348, in Lange's Bibelwerk) seems to be more correct, that ἀνέβει refers to the vessel which the wind struck and drove out to sea, with ναῦς as the mental antecedent, which (actually employed in ver. 41) could so easily take the place here of Luke's usual παραβάλων. This is the explanation also of Winer (vii. Text. Gram. § 47, 5, h) and of Buttmann (Neutest. Gram. p. 127). It is known to the writer that Prof. Sophocles of Harvard College interprets Luke here in the same manner. 11.

* CRETES (Κρήτες; Cretes), inhabitants of Crete (Acts ii. 11), where probably Jews and proselytes are meant (comp. Ρώμαιοι = ἱπποδιότει καὶ προσήλυτοι); but for the same term we have Cretians (A. V.) in Tit. i. 12, applied there to native Greeks. "Cretans" would be a better rendering; says Trench (Arch. Itt. p. 78, ed. 1856), in both passages. The subscript "to the Epistle to Titus" (A. V.) states that it was written to him as the "first bishop or overseer of the church of the Cretians." For the character of the ancient Cretans, see Crete. 11.

H.

* CRETANS. [CRETENS.]

* CRIB. This is the rendering (A. V.) of τάξις, c. g. in Is. i. 3. The word denotes (from τάξις, to order) the place from which cattle and horses were accustomed to eat their food, but throws no light on the sort of structure provided for that purpose. It was, no doubt (for such usages in the East remain the same from age to age), a box or trough "built of small stones and mortar," or hollowed out of an entire block, such as the farmers of the country use at the present time. Dr. Thomson mentions an incident connected with these conveniences which illustrates a Scripture passage. At Tiberias, as "the dromes of cattle and donkeys came down from the green hills" at night, "I buried them . . . and no sooner had we got within the walls than the dromes began to disperse. Every ox knew perfectly well his owner, his house, and the way to it, nor did he get bewildered for a moment in the mazes of these narrow and crooked alleys. As for the asses, they walked straight to the door, and up to their master's crib . . . I followed one company clear into their habitations, and saw each take its appropriate manger and begin its evening meal of dry tithe. Isaiah (i. 3, 4) says in all this they were wiser than their owners, who neither knew nor considered, but forsook the Lord, and provoked the Holy One of Israel." — Lord and Book, ii. 97.

The "mangers" of the N. T. were probably like the "cribs" of the O. T. The new Paris edition of Stephens' Theophrastus Parthenius' Linguae (1834) adopts the rendering in Sucier's Thes. Ecles. ii. 1420, that φάνην is properly a hollow place in the stable which contains the food of animals; that it is a part of the stable, and each of the horses has its own φάνην or table, as it were, before it. Here φάνην and τραπέζια (crib and table) are used interchangeably. But while the writers admit that sense in Luke xiii. 15 (where the A. V. has "stall") they regard the word as employed out of its proper signification in the passages relating to the nativity of our Lord, and as "standing there by metonymy for a stable in which was a crib." But such an exception to the usual meaning is the less necessary here, because the locality of the φάνην may imply the stall, if for any reason that be required. Undoubtedly the true conception of the history is that the holy family, excluded from the part of the caravanserai (χωραδίαμα) allotted to travellers, required to the part where the animals were, and the birth taking place there, the newborn child was laid in one of the feeding-troughs within reach. They are not ill adapted to such a use; for Dr. Thomson states (Lord and Book, ii. 98) that "his own children have slept in them in his rule summer retreats on the mountains." The Arabic translation from the Vulgate by the Maronite bishop Serkis en-Kurr (under Pope Urban VIII.) adjusts the rendering to this view of the word. Dyevick says that he has no doubt of the correctness of such a translation. The writer found this to be a common use of φάνην among the modern Greeks. Biesel (Thes. Philol. iii. 534) states very correctly the Sept. usage, and in accordance with the foregoing view.

11. * From a note of Dr. Van Dyck to the writer.
CRIMSON [COLORS.]

* CRISPING-PINS. The Hebrew word so translated in Ls. iii. 22, "כְּנַפְס הָאָרֶן," chariit, denotes the reticule, often, probably, elegant and highly ornamented, carried by the Hebrew ladies. In 2 K. v. 23, the only other passage in which it occurs, it is rendered "bow." See Bag., 1. A.

CRISTUS (Crīstos [crispēd, carded]) found also in the Talmudists under the forms סְדִּירְפָא סְדִּרוֹפָא and סְדִּרְפָא), ruler of the Jewish synagogue at Corinth (Acts xviii. 8); baptized with his family by St. Paul (1 Cor. i. 14). According to tradition, he became afterwards Bishop of Ægina (Constant. Apost. vii. 46).

II. A.

* His office (ἄρχων σκύλων) shows that he was a Jew, and his foreign name that he or his ancestors had mingled freely with other nations. The guarded manner in which Paul speaks in 1 Cor. i. 14, would lead us to think that he baptized Crispus only, and not those of his family also who believed (Acts xviii. 8).

CROSS (σταυρός, σκόλαψ). Except the Latin cross there was no word definitively and invariably applied to this instrument of punishment. The Greek word σταυρός is derived from ἱσταμί, and properly, like σκόλαψ, means merely a stake (Hom. Od. xiv. 11; R. xxiv. 456). Hence Eustathius defines σταυρός to be ὁμίλα καὶ ἀπακωμέναι ἕνα, and Hexah. οἱ κατασταφυγότες σκόλαψες, χάρισμα. The Greeks use the word to translate both παλας and αὔσων: τοῦ παλαν σπανεῖν in Iov. Cross (xlix. 22) is exactly equivalent to the Latin ad patam deliberare. In Livy even αὔσω means a mere stake (in tres sustoli crudes, xviii. 28), just as, vix resee, the Fathers use σκόλαψ and even αὔσω ("de stipite pendens") of a cross proper. (In consequence of this vagueness of meaning, impaling (Herod. i. 76) is sometimes spoken of, loosely, as a kind of crucifixion, and ἀνακολοτρικῶς is nearly equivalent to αὔσωσον; "aliis per obsceun stipitem egerunt, aliis brachia patibulato exploere unt." Sen. Csed. ad Marc. xx.; and Ep. xiv.). Other words occasionally applied to the cross are patibulum and servex, pieces of wood in the shape of Π or Π and λ as respects (Div. 48, tit. 13; Plut. Math. p. 47); and in Sall. fr. ap. Non. iv. 355, "patibulo eminens afflictatur" seems clearly to imply crucifixion). After the abolition of this mode of death by Constantine, Trehounian substituted servex gemma, for crucifigur, whereas the word occurred. More generally the cross is called arbor inflix (Livy. i. 26; Sen. Ep. 101), or lignum inflix (Vie. per Rob. 3); and in greek σταῦ, (Deut. xxi. 22). The Fathers, in controversy, used to quote the words αὐτὸς ἔσθισεν κυρίως (ἀπὸ τοῦ σταῦ), from Ps. xlii. 10, or Ps. xxvi., as a prophecy of the cross; but these words are "adulterum et Christiana devotee addita:" though Genesarian thought them a prophetical addition of the LXX., and Agellius conjectures that they read ψυχή for ψυχή (Scheleusner's Thes.). The Hebrews had no word for a cross more definite than יָשָׁב (Gen. xl. 19, 20.), and so they called the transverse beams יָשָׁב יָשָׁב, "warp and woof" (Pearson, On the Creed, art. iv.), like ἀσόν δίδωσιν LXX. Cross is the root of σταῦ, and is then used proverbially for what is most painful (as "sumnum jussa, summus crux," Colum. i. 7; "quercus in nudo crucem," Ter. Phorm. iii. 3, 11), and as a nickname for villains ("Quid quis, crux?" Plaut. Pers. ii. 5, 17). Rarer terms are ἔσπον (Euseb. viii. 8), σπάς (?), and Gibulas (Vart. ap. Non. ii. 373; Macrinus ap. Capitol. Marc. 11). This last word is derived from ἄσπα, "to complete."

As the emblem of a slave's death and a murderer's punishment, the cross was naturally looked upon with the profoundest horror, and closely connected with the ideas of pain, of guilt, and of ignominy" (Gibbon, ii. 158; "Nomen ipsum crucis adhibuit non modo a corpore Romanae, sed etiam a coccitanea, orris, auribus," (Cic. pro Boc. 5). But after the celebrated vision of Constantine (Euseb. Vf. Const. i. 27-30), he ordered his friends to make a cross of gold and gems, such as he had seen, and "the towering eagles resigned the flags unto the cross" (Pearson), and "the tree of cursing and shame" (Bishop Taylor, Life of Christ, iii. x.).

"In quibus aegypti crucis et gemmata refugit. Aut longis solido ex auro pretandi ab hastis," (Præsent. in Symm. ii. 464 ff.).

were called by the name Labarum, and may be seen engraved in Bononius (Jun. Rec. a. d. 312, No. 36), or represented on the coins of Constantine the Great and his nearer successors. The Labarum is described in Euseb. (I. Constant. i. 25), and, besides the pendent cross, supported the celebrated embroidered monogram of Christ (Gibbon, ii. 154; "Transversæ X litteræ, summæ capite circumflantes," Cassell.), which was also inscribed on the shields and helmets of the legions: —

"Christus purpuræmum gemmam tectis in auro Signabat labarum : elyceorum insignia Christus Scripserat, arctata summis cruc addita cristi:"

(Præsent. 1. c.)

Nay, the στιβαδομον στρύγμον o a vis in the British Museum.

(From a Coin in the British Museum.)

The Labarum.

We may tabulate thus the various descriptions of cross (Lips. de Crure, i.; Godwyn's Moera and Aurum) —

1. Crux.
2. Purpurea, 3. Commissa, 4. Immissa
Andreae, or and unmissa, or capitis, Burgundian.

1. The crux simplex, or mere stake of one single piece without transom, was probably the
original of the rest. Sometimes it was merely driven through the man's chest, but at other times it was driven longitudinally, διὰ βρέχως καὶ κάτων (Hesych. s.v. κατάλαθος), coming out at the mouth (Sen. Ep. xiv.), a method of punishment called ἀνυσφαλέως, or ἀγράφω. The latter consisted merely of tying the criminal to the stake (κατάλαθος θεραπευτικός, Liv. xxvi. 13), from which he hung by his arms; the process is described in the little poem of Ausonius, Cyprius crepidianus. Trees were naturally convenient for this purpose, and we read of their being applied to such use in the Martyrology. Tertullian tells us (Apol. viii., 16) that the Egyptians (so ably argued, than to punish the priests of Saturn, Tiberius ii.; in ceduo arboribus, olisbamatricibus scalarum, validis crucibus explicit) "(cf. Tac. Germ. xii., "Prodotres et fugas arboribus suspendunt."); How far the expression "acquiesced tree" is applicable under this head is examined under the word Crucifixion.

2. The croix decouste is called St. Andrew's croos, although on no good grounds, since, according to some, he was killed with the sword; and Hippolytus says that he was crucified upright, "ad arborem," whence the shape of the cross called the Greek letter X (in Jer. xxxvi.; x; X litters and in figura crucem, et in numero decem demonstrat,"

Isidor. Orig. i. 3). Hence Just. Mart. (Dial. c. Tryph. p. 200) quotes I Thes. ii. 13 that this was of the kind of cross in Jacob's blessing of Joseph's sons, χρέων ἐν τῇ λάμπειν (cf. Tert. de Baptismo, viii.; in the anointing of priests, "deucessativus" (Sir T. Browne, Garden of Cyrus); for the rabbis say that kings were anointed "in forma corona, sacerdotes autem

δὲ δὲ, i.e. ad fornam X Grecorum" (Schotteln gen. Hor. Hefc. et Tadu. iv. ad loc.; and in the crossing of the hands over the head of the goat on the day of expiation (Targ. Jonath. ad Lev. xvi. 21, etc.).

3. The croix commissaire, or St. Anthony's cross (so called from being embroidered on that saint's cope, Mrs. Jameson's Sacred Art, i. xxxvi.,) was in the shape of a T. Hence Lucian, in his amusing Dein phanatous, joyfully derives σταυρον from τούτῳ (κατά τὸν τοπον καὶ τὴν στηματικὴν τὴν πορείαν ἐπενικός δυνατόν, and makes mankind accuse it bitterly for suggesting to tyrants the instrument of torture (Jud. Voci 12). This shape is often alluded to as "the mystical Tau" (Griekon de Cyrilis: "Nostra autem T species crucis, Tert. adv. Marc. iii. 22; Jer. in Exech. iv. etc.).

As that letter happens to stand for 300, opportunity was given for more elaborate trifling; thus 300 cubits of the ark are considered typical (Clem. Alex. Strom. vi.; S. Paulin. Ep. li.; and even Abrāman's 318 servants (!) since 318 is represented by της, they deduced της μου ἀγαθόν εἰς τοὺς δώσις γραμματισταὶ καὶ καὶ ἐν η τοῦ σταυροῦ (Barnab. Ep. ix.; Clem. Alex. Strom. vi.; Ambros. Procl. in l. i. de Fide; Pearson (art. iv.) On the Creed, in which these notes these passages are quoted).

A variety of this cross (the croix anastas, "crosses with circles on their heads") is found in the sculptures from Khorsabad and the ivories from Nimroud. M. Lajard (Observations sur la croix ancienne) refers it to the Assyrian symbol of divinity, the winged figure in a circle; but Egyptian antiquaries quite reject the theory "(Lajard's Nicerect, ii. 213, nob.). In the Egyptian sculptures, a similar object, called a croix anastas, is constantly borne by deities, and is variously called "the key of the Nile" (Dr. Young in Encycl. Britton), the character of Venus," and more correctly (as by Lacroze) "the emblem of Ra," we need this old explanation (ἐνθρισμένοις σημαίαις πάντως γραφής Ζωή ενθρισμένη, Sossow, Hist. Eccl. vii. 15; so too Kuirimus (ii. 29), who says it was one of the "ἐρατικαὶ vel sacer dota literae.") "(E) Egyptians thereby expressed the powers and motion of the spirit of the world, and the diffusion thereof upon the celestial and chthonic nature, (Sir T. Browne, Garden of Cyrus). This too was the signification given to it by the Christian converts in the army of Theodosius, when they remarked it on the temple of Serapis, according to the story mentioned in Suidas. The same symbol has been also found among the Copts, and (perhaps accidentally) among the Indians and Persians.

4. The croix immensis (or Latin cross) differed from the former by the projection of the δόμου θρόνον (or αἰχμή) above the κέρας ἐνθρισμένου, or (cf. Sir T. Browne, Garden of Cyprus, xi.) saying that he was hidden by the Spirit, ζωὴ τούτων τοῦ σταυροῦ καὶ τοῦ μέλλουσι πάθειοι (Barnab. Ep. 12; Just. Mart. Dial. c. Tryph. 89; κοιμός crucis, Tert. adv. Marc. iii. 18). Firmicus. Maternus (de Infirr, xx.; says (from the Talmudists) that Moses made a cross of his rod, "ut faciis imperat neu quod magis postularetur, crucem sibi festa ex virga." He also fantastically applies to the cross expressions in Hab. iii. 16, 16. &c. Other supposed types are Jacob's ladder (Jer. Com. in Ps. xxi.; οί Δόμινισ μυκτιν σκαλα Christus crucifixus ostenditur.); August. Carmen de Tempor. ixxix.; the paschal lamb, pierced by transverse spites (σχηματιζομένου δύον την σχηματικὴν τοῦ σταυροῦ ḫπάτης, Just. Dial. c. Tryph. 40; and "the Hebrew Tenebula, or ceremony of their obligations waved by the priest into the four quarters of the world after the form of a cross" (Vitrings. Obs. Squo. i. v; Schotteln, l.c.). A truer type (John iii. 14) is the elevation (γεραύνιον, Chald.) of the ferry serpent (Num. xxx. 8, 9). For some strange applications of texts to this see Cyr. Temp. ii. xx. iv. In Matt. v. 18, καὶ παρά τὴν κεφαλήν is also made to represent a cross (της συναφος τοῦ κεφαλῆς τοῦ Θεοφυλ. in loc., etc.). To the four ἄκρα of the cross they also applied the ἄκρα καὶ βάθος καὶ πλάτος καὶ μήκος of Eph. iii. 18 (as Greg. Nysss. and Aug. Ep. 120); and another of their fancies was that there was a mystical significance in this δύο τετράγωνον (Num. in Joh. xvi. 18), because it pointed to the four corners of the world ("Quattuor indici plagatus quadrantis" according to Sedul. iii.). In all nature the sacred sign was found to be indispensable (κατασκηνάσας πάντως ἐν τῷ κόσμῳ καὶ ἐν τούτῳ τοῖς ὑποίδεοι), Just. Mart. (Apol. i. 72), especially in such things as involve
dignity, energy, or deliverance: as the actions of lifting, glowing, &c., the human race as an ensemble of a ship in full sail, &c. "Aves quando volant ad aethere signum crucis assumunt. Homo natans, vel orans, formâ crucis visitatur" (Jer. in Mar., xi.).

"Signa ipec et cantabula et vexilla quid alium quid inaurate crucies sunt?" (Min. Fed. Oct. xxix.). Similar analogies are repeated in Firm. Matern. de Errorv., xxi.; Terr. adl. Nat. i. 12; Apol. i6; de Corn. Mil. i. 3; and, in answer to the sneers of those to whom the cross was "false-color," were considered sufficient proof that "signo crucis et ratio naturalis nittitur aut vestra religio formatur" (Min. Fed., &c.). The types adduced from Scripture were valuable to silence the difficulties of the Jews, to whom, in consequence of Deut. xxii. 22 (etipitáteo dò stauróloiyos), the cross was an especial "stumbling-block" (Terr. adl. Nat. i. 12).

Many such fancies (e. g. the harmlessness of cruciform flowers, the southern cross, &c.) are collected in "Communications with the Unenlightened World."

Besides the four árca (or árques, Terr.) of the cross, was a fifth (épiktov), projecting out of the central stem, on which the body of the sufferer rested (épiktov épi oúdei stauróloiyos, Just. M. Tryph. 91, who (more suum) compares it to the horn of a rhinoceros: solidi e crucem, Terr. adl. Nat. i. 12; "ubi requiescit qui clavis aedituit," Iren. adl. Heres. i. 12). This was to prevent the weight of the body from bearing away the hands, since it was impossible that it should rest upon nothing but four great wounds." (Ker. Taylor, Life of Christ, iii. xx. 2, who erroneously quotes the δόνον τεταρτάλεον of Nonnus). This projection is probably alluded to in the famous lines of Maxenas (ap. Sen. Ep. 101):—

"Vita dura superest bene est;
Hane mihi vel aerata
Si setsum cruce, sustine." 

Ruthkopf (ad loc.) so explains it, and it is not so probable that it refers to ánaskópoulos as Lipsius thinks (de Cruce, i. 6). Whether there was also a époptáthá or support to the feet (as we see in pictures), is doubtful. Gregory of Tours mentions it; but he is the earliest authority, and makes no weight (G. J. Voss. Hecsan. Passion. ii. 7, 28).

An inscription, titulus or clavium (épigrammá, Luke xxii.: aitíá, Matt. xxvii.: ή ἐπίγραμμα τῆς αἰετίας, Mark: τίτλος, John xix.: "qui causam pene indicavit," Suet. Col. 32; πίθος, Euseb.: γραμματια τῆς αἰετίας τῆς θανατώτης δυνατοῦ, Dion Cass. liv. 3; πνευχον ἐπιγράμμα ἑαυτοῦ, Hezych. : ἡ ἄλη) was generally placed above the person's head, and literally expressed his guilt, as νότος ἐστών Ἀτταλὸς ὁ Χριστιανός (Euseb. v. 1). I found, however, that neither was generally carried before the criminal ("precedente titulo," Suet.). It was covered with white gypsum, and the letters were black: hence Sozomen calls it ákhyma (Hist. Ecle. ii. 11). And, as Lipsius justly remarks (Hist. Ecle. viii. 29). But Nierupitis (Tit. Nierup. Cruciis, i. 4) says it was white with red letters.

A common tradition assigns the perpetual shiver of the aspen to the feet of the cross having been sown of its wood. Lipsius, however (de Cruce, iii. 13), thinks it was of oak, which was strong, and common in Judaea. Few will attach any consequence to his other reason, that the relics appear to be of oak. The legend to which he alludes.

"Petric crucis est eculus, corpus tenet alta e crucessu, Palmus manus retinet, titulus invatat oliva," hardly needs refutation. It must not be overlooked that crosses must have been of the most artistic and richest materials, because they were used in such marvelous numbers. Thus we are told that Alexander Januarius crucified 800 Jews (Joseph. Ant. xiii., 14, § 2); and Varus 2000 (ib. xii., 10, § 10); and Hadrian 500 a day; and Titus so many that χρωμα τε έκενιστατο των σταιρων και σταυρων των σώματων (Joseph. B. J. vi. 28, where I find rightly notice the strange retribution, "a" that they who had nothing but crucify in their mouth, were therewith paid homage in their own bodies," Sir T. Browne, Essay, Lyr. Err. v. 21). In Sicily, Augustus crucified 600 (Oros. vi. 18).

It is a question whether tying or binding to the cross was the more common method. In favor of the first are the expressions ligare and deligere; the description in Anasius, Capit. Cruïtis; the Egyptian custom (Xen. Ephes. β. 2); the mention by Philo (xxviii. 11) of σημεῖα και εἰς εἰχος among vague importations; and the allusion to the cross noted by the fathers in John xix. 24 (Theophyl. ad loc. and Terr. "Tume Petrus at altera eincitatum eam cruci astrigitur.") On the other side we have the expression παραθηκαία, and numberless authorities (Sen. de Ut. Beiti, 19; Artemidor. Univer., in several passages; Apol. Met. iii. 69; Plaut. Model. ii. 1, 13, et passim). That our Lord was nailed, according to prophecy, is certain (John xx. 27, 28; Accl. Ech. xii. 10; Ps. xxi. 16: οδομανους μας μετες, παρα προφητείαν τετωνος). Such was the common idea of the Jews, and it was probably intended to maintain that here "Νздание, like a lion," is the true reading. Sixt. Senecis Fihül, Sacnt. viii. 5, p. 640). It is, however, extremely probable that both methods were used at once: thus in Lucan (v. 517, ff.) we have mention both of "νοδος νοικοτης" and of "σεμεῖα μανιλας ελευθερας;" and Hilary (de Triv. x.) mentions together "colliguntum finiumi vincula et adulatorum clavorum vulnera." We may add that in the crucifixion (as it is sometimes called, Terr. adl. Marc. i. 1, et Manil. de Androm. v.) South China, Leslie describes, "a fold of the sail," speaks of a μασαλισθή (Prom. 79). When either method was used alone, the tving was considered more painful (as we find in the Martyrologies), since it was a "dittius cruciatus." It is doubtful whether three or four nails were employed. The passage in Plaut. Model. ii. 1, 13, is, as Lipsius (de Cruce, i. 9) shows, indiscernible. Nonnus speaks of the two feet (μασαλισθή) being fastened together, and Gregory Naz. (De Christ. pot.) tells us the cross a μασαλισθή; hence on gold and silver crosses the nails were represented by one ruby or carbuncle at each extremity (Mrs. Jameson, l. c.). In the "invention" of the cross, Socrates (H. E. i. 17) only mentions the hand-nails; and that only two were found is argued by Winer (s. v. Κροῦσιοι) from the τὰ χειρα, τὰ χείρα (not τῶν χειρῶν) in Theodor. H. E. i. 17. Romance writers, however, generally follow Gregory of Tours (De Gloc. Mort. vi.) in maintaining four, which may also be implied by the plural in Cyr. de Possesio ("chelis . . . pedes terzollulantis"), who also mentions three more, used to nail on the title. Cyprian is a very good
authority, because he had often been a witness of executions. There is a monograph of the subject by V. A. C. (de Cruce triumphanti, Antwerp, 1670). What has been said sufficiently disproves the calumny against the Albignenses in the following very curious passage of Lucas Tudorins (ii. contra Abip.: "Albignenses primiti pinxerunt imaginem crucificti uno clavo simul utractus pedem confignente, et virginitm Mariam Monoculam! (i.); utractus in dersionem: sed postea prior figura retenta est, et irreput in vulgatum famam." (Quoted by J. Taylor, e. c.). On the supposed fate of the nails, see Theodor. H. E. i. 17. Constantine fastened one as a φαλαιτηρίῳ on his horse's bridle, and one (Zeuxins says same) on the head of the statue which he intended to be the paladium of Constantinople, and which the people used to surround with lighted torches (Mosheim, Eccl. Hist. ii. 1, 3, and notes). The cruces pedis ejecti is shown at Trèves (Lips. ii. 9, note). The story of the so-called "invention of the cross," A. D. 320, is too famous to be altogether passed over. Besides Socrates and Theodoret, it is mentioned by Rufinus, Sozomen, Paulinus, Sub. Severus, and Chrysostom, so that Tillemont (Mem. Ecc. vii.) says that nothing can be more certain; but, even if the story were not so intricately absurd (for among other reasons it was a law among the Jews that the cross was to be burnt; Othonis Lex. Rom. v. Suspiciis), it would require more probable evidence to outweigh the silence of Euseb. It clearly was to the interest of the Church of Rome to maintain the belief, and invent the story of its miraculous multiplication, because the sale of the relics was extremely profitable. The story itself is too familiar to need repeating. To this day the supposed title, or rather fragments of it, are shown to the people once a year in the church of St. Croce in Gerusalemme at Rome. On the capture of the true cross by Chosroes II., and its rescue by Heraclius, with even the seals of the case unbroken, and the subsequent sale of a large fragment to Louis IX., with Gibbon, iv. 326, vi. 66. Those sufficiently interested in the annals of ridiculous imposture may see further accounts in Baronius (Ann. Ecc. l. v. 320, Nos. 42-50), Jortin, and Schmidt (Problema de Cruce Dominica Inventione, Helmst. 1724); and on the fate of the true cross, as read by Lord Mahon before the Society of Antiquaries, Feb. 1831 (cited by Dean Milman). It was not till the 6th century that the emblem of the cross became the image of the crucifix. As a symbol the use of it was frequent in the early Church ("frontem crucis sacrametum terminis," Tent. de Cor. Ml. 3). It was not till the 12th century that any particular efficacy was attached to it (Cypri. Testim. ii. 21, 22; Lact. Instit. iv. 21, &c.; Mosheim, ii. 4, 5). On its subsequent worship (sacrificium) by the Church of Rome, see J. Taylor's Disc. from Popery, ii. 7, 12; and on the use of the sign in our Church, Hooker's Eccl. Pol. vi. 65. Some suppose an allusion to the custom in Ex. iv. 4 (Poli Synops. ad loc.: Gesen. s. v. סף; signum spec. crucifercum; Sixt. Sen. ii. 120). Besides the noble monograph of Lipsius, de Cruce (from which we have largely borrowed, and whose wealth of erudition has supplied every succeeding writer on the subject with abundant authorities), there are works by Salmasius (de Cruce, Epp. 3); Kippingius (de Cruce et Cruvinris, Brem. 1671); Bosius (de Cruce triumphanti et gloriis, Antwerp, 1617); Gresae (de Cruce Christi); and Bartholdius (Hypomnemata de Cruce); very much may also be gleaned from the learned notes of Bishop Pearson (On the Cruce, art. iv.). Other authorities are cited or alluded to in the article itself. [CROCEBON.] F. W. F.

CROWN (παρέκκλησις). This ornament, which is both ancient and universal, probably originated from the fillets used to prevent the hair from being dishevelled by the wind. Such fillets are still common, and they may be seen on the sculptures of Persepolis, Nineveh, and Egypt; they gradually developed into turbans (Joseph. Ant. iii. 7, § 7), which by the addition of ornamental or precious materials assumed the dignity of mitres or crowns. The use of them as ornaments probably was suggested by the natural custom of crowning the head with flowers in token of joy and triumph. ("Let us crown ourselves with rosebuds," Wisd. ii. 8; 3 Macc. vii. 16; Jud. xv. 13, and the classical writers, passim; Winer, s. v. Κυράντα). The first crown was said to have been woven for Pandora by the Graces (Comp. στέφανοι χαριτών, Prov. iv. 9 = στέφανοι τῶν πνευματικῶν χαριτῶν, Lxx. Cyp.) According to Theophrastus, Saturn was the first to wear a crown; Diodorus says that Jupiter was first crowned by the gods after the conquest of the Titans. Pliny, Harpoeratius, &c., ascribe its earliest use to Bacchus, who gave to Ariadne a crown of gold and Indian gems, and assumed the laurel after his conquest of India. Leo. Egyptianus attributes the invention to Isis, whose wreath was cereal. These and other legends are collected by Tertullian from the elaborate treatise on crowns by Claud. Saturninus ("præstansimnis in his literis commantator"). Another tradition says that Nearchus was the first to wear a crown, the shape of which was suggested to him by a cloud (Eutychius Alexander. Ant. i. 63). Tertullian in his tract De Cor. Militis (c. 7 ff.) argues against them as unnatural and idolatrous. He is, however, singularly unsuccessful in trying to disprove the countenance given to them in Scripture, where they are constantly mentioned. He says "Quis . . . episcopos inventur corona pecunia (e.¢.). But both the ordinary priests and the high-priest wore them. The common mitre (παρέκκλησις, πίσταρι, Ex. xxviii. 40, xxix. 9, &c., taniia, Joseph. στέφανοι μι οἱ εἰριής φο- ροῦσα, Lex. Hier.) was a παλᾶς έκανός, forming a sort of linen taini or crown (στέφανος), Joseph. Ant. iii. 7. The παρεκκλησία (σαυρινή τίμας) of the high-priest (used also of a regal crown, Ex. xxix. 20) was much more splendid (Ex. xxviii. 39: Lev. viii. 9: an "ornament of honor," a costly work, the desire of the people), Exch. xxvii. 12: "the highest honor," Lev. viii. 9, so called from the Tetragrammaton inscribed on it; Sopranes, de Re Vet. Jud. p. 441). It had a second fillet of blue lace (ξί οὐκείην πεποιθημένημ, the color being chosen as a type of heaven), and over it a golden diadem (τυμάς, Ex. xxix. 6), "on which blossomed a golden calyx like the flower of the λουκάκιος" (Joseph. Ant. iii. 6). The gold band (Παρέκκλησις, Lxx. Παρεκκλήσις, Orig. Παρεκκλήσις, D is Sterling, Luther) was tied behind with blue lace (embroidered with flowers), and being two fingers broad, bore the inscription (not in bas-relief as Abarbanel says) "Holiness to the Lord." Comp. Rev. xvii. 5; Braunius, de Vet.
CROWN

CROWN OF THORNS

Crown was worn by Assyrian kings. (From Ninroud and Konyunjik.)

first "rather to the pontificalia than the regalia." Thus Q. Fabius Pictor says that the first crown was used by Janus when sacrificing. "A striped head-dress and quene," or "a short vail of which a band was fastened, ornamented with an asp, the symbol of royalty," was used by the kings of Egypt in religious ceremonies (Wilkinson's Anc. Egypt. iii. 354, fig. 13). The crown worn by the kings of Assyria was "a high mitre ... frequently adorned with flowers, &c., and arranged in bands of linen or silk. Originally there was only one band, but afterwards there were two, and the ornaments were richer." (Layard, ii. 320, and the illustrations in Jahn, Arch. Germ. ed. pt. i. vol. ii. tab. ix. 4 and 8).

There are several words in Scripture for a crown besides those mentioned; as κοίνος, the head-dress of bridegrooms, Is. xi. 10, μυρων, LXX.; Bar. v. 2; Ez. xxiv. 17 (πηλοσ), and of women, Is. iii. 20 (ἐμπαλωκιων); ἀλεξανδρια; a head-dress of great splendor (Is. xxviii. 5); ἀλεξανδρια, a wreath of flowers (στέφανος), Prov. i. 9, iv. 9: such wreaths were used on festival occasions (Is. xxviii. 1). ἀλεξανδρια, a common tiara or turban, Job xxi. 14; Is. iii. 23 (but LXX. ἀλεξανδρια, ἀλεξανδρια): the words αλεξανδρια, αλεξανδρια, and ἀλεξανδρια, are spoken of under DIADEM.

The general word is ἀλεξανδρια, and we must attach to it the notion of a costly turban interwoven with pearls and gems of priceless value, which often form aigrettes for feathers, as in the crowns of modern Asiatic sovereigns. Such was probably the crown, which with its precious stones weighed (or rather "was worth") a talent, taken by David from the king of Ammon at Rabbah, and used as the state crown of Judah (2 Sam. xii. 30). Some groundlessly suppose that being too heavy to wear, it was suspended over his head. The royal crown was sometimes barred with the king (Schickard, Jus Reg. vi. 19, 421). Insolent nations also "made crowns for the head of their gods" (Pl. ter. 9) or (Bar. vi. 9).

The Jews boast that three crowns were given to them: ἀλεξανδρια, the crown of the priesthood; and ἀλεξανδρια, the royal crown, better than all, which is ἀλεξανδρια, the crown of a good name (Carpos. Apparat. Critic. p. 60; Othonis Lex. Tobia, s.v. Corona).

Στέφανος is used in the N. T. for every kind of crown; but στέφανον only once (Acts xiv. 13) for the garlands used with victims. In the Byzantine Court the latter word was confined to the imperial crown (Du Fresne, Gloss. Grec. p. 1442). The use of funerary crowns is not mentioned in the Bible.

In Rev. xii. 1, xix. 12, allusion is made to "many crowns," worn in token of extended dominion. Thus the kings of Egypt used to be crowned with the "plume" or united crowns of Upper and Lower Egypt (Wilkinson, Anc. Egypt. iii. 351 ff.; comp. Layard, ii. 320); and Ptolemy Philometor wore two diadems, one for Europe and one for Asia. Similarly the three crowns of the Paphian tiara mark various accessions of power: the first crown was added to the mitra by Alexander III., in 1519; the second by Boniface VIII., in 1303; and the third by Urban V., in 1362.

The laurel, pine, or parsley crowns given to victors in the great games of Greece are finely alluded to by St. Paul (1 Cor. ix. xxiii: 2 Tim. ii. 5, &c.) They are said to have originated in the laurel-wreath assumed by Apollo on conquering the Python (Tert. de Corp. Mort. c. 7, 15). "Laurel" is often used figuratively in the Bible (Prov. xiv. 4, xvii. 6; Is. xxviii. 5; Phil. iv. 1, &c.). The term is also applied to the rings of authors, tables, &c. (Exx. xxv. 23, &c.; Deut. xxxii. 8, ποιησες στέφανον το διδασα σου. "Projecta coronarum," Vitr. ii. 8; "Angusti uirri corona," Q. Curt. ix. 4, 80). The ancients as well as the moderns of both countries by a "crown" (των στέφανων ὑπὸ ὀρφέατα, 1 Macc. xiii. 29, x. 29; Δ. v. "crown-tax." v. Suid. s. e. στέφανων τέλεως.) [Diadem.]

The chief writers on crowns are Gaschalinus (de Coronis lib. iii.) and Meursius (de Coronis, Hafniae, 1671). For others, see Fabricius, Bibl. Anti. xiv. 13.

F. W. F.

CROWN OF THORNS (στέφανος εἰς ἀκανθον, Matt. xxvii. 29). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, and not the infliction of pain, as has generally been supposed. The Rhamnus or Spina Christi, although abundant in the neighborhood of Jerusalem, cannot be the plant intended, because its thorns are so strong and large that it could not have been woven (καλασάρτης) into a wreath. The large-leaved acanthus (μένακτη) is totally unsuited for the purpose. Had the acacia been intended, as some suppose, the phrase would have been εἰς ἀκανθον. Obviously, some small flexible thorny shrub is meant: perhaps *Vitis sylvestris* (Rethel's Politeia, ii. 52) or *Haworthia* (Lindl, p. 290) says that the thorn used was the Arabian Nokh. It was very suitable for its purpose, as it has many sharp thorns which inflict painful wounds: and its flexible, plant, and round branches might easily be plated in the form of a crown. It also resembles the rich dark green of the triumphal ivy-wreath, which would give additional penumcncy to its ironical pur

"• On Paul's use of metaphors derived from this source, see (Garms. Amer. ed. 3).

F. W. F.

CRUCIFIXION (σταυρόν, ἀνασταύρων, ακολουθίας προσολογίων (and, less properly, ἀνακολουθίας): crucis or patibulum officii, sufferenc, or simply figere (Tert. de Pat. iii.), crucifixion (Ason.;) as patia alligare, crucem aliam statue, in crucem agere, tolere, &c.: the sufferer was called crucifarius.) The variety of the phrases shows the extreme commonness of the punishment, the invention of which is traditionally ascribed to Semiramis. It was in use among the Egyptians (as in the case of Inaras, Thuc. i. 30; Gen. xii. 19), the Cartaginians (as in the case of Hamno, &c., Val. Max. ii. 7; Sil. Ital. ii. 344), the Persians (Polycrates, &c., Herod. iii. 125, iv. 43; Esth. vii. 10, σταυρωθησάντες επ᾽ αὐτό, I.XX. v. 14), the Assyrians (Diod. Sic. ii. 1), Scythians (ib. ii. 44), Indians (ib. il. 18), (Winer, s. v. Kreuzgang,) Germans (possibly, Tac. Germ. 12), and very frequent from the earliest times (cruci suspensio, Liv. ii. 26) among the Greeks and Romans. Cicero, however, refers it not (as Livy) to the early kings, but to Tarquinius Superbus (pro Rob. 4; Aurel. Victor calls it "Vetus veterumque (an tert.?) patibulum supplicii.") Both κρεατα and suspendere (Ov. B. 299) refer to death by crucifixion; thus in speaking of Alexander's crucifixion of 2000 Tyrians, ἀνεκραψασεν in Diod. Sic. answers to the crucibus officios, q. Curt. iv. 4.

Whether this mode of execution was known to the ancient Jews is a matter of dispute, on which Winer quotes a monograph by Borminius. It is asserted to have been so by Baronius (Annal. i. xxiv.), Sigonius (de Rep. Hist. vi. 8), &c., who are refuted by Casanovae (e. Baron. Exerc. xvi.; Carp. Appar. Crit. p. 591). The Hebrew words said to allude to it are דַּרְךֶּלֵב (sometimes with the addition of יָנָּה יָנָּה), but the Jews in the Old Testament call our Lord יָנָּה יָנָּה, Christians יָנָּה יָנָּה, "worshippers of the crucified") and יָנָּה, both of which in A. V. are generally rendered "to hang"; (2 Sam. xviii. 10; Deut. xxi. 22; Num. xxiv. 4; Job xxvi. 7; for which σταυροθαρμος occurs in the I.XX. (Esth. viii. 10), and crucifer in the Vulg. (2 Sam. xxi. 6, 9). The Jewish account of the matter (in Maimonides and the Rabbis) is, that the exposure of the body tied to a stake by its hands (which might loosely be called crucifixion), took place after death of eighteen, Hor. Hist. in Matt. xxvi. 31; Othonis Lex. Rob. s. v. Supplicio; Reclus, Ant. ii. 6; Sir T. Browne, Vulg. Errors, v. 21). Even the placing of a head on a single upright pole has been called crucifixion. This custom of crucifixion after death (which seems to be implied in Deut. xxi. 22, 23), was by no means rare; men were first killed in mercy (Suet. Caes. Herod. iii. 125; Plut. Cleom. 98). According to a discussion of the fourth sentence, Hor. Hist. in Matt. xxvi. 31; Othonis Lex. Rob. s. v. Supplicio; Reclus, Ant. ii. 6; Sir T. Browne, Vulg. Errors, v. 21). Even the placing of a head on a single upright pole has been called crucifixion. This custom of crucifixion after death (which seems to be implied in Deut. xxi. 22, 23), was by no means rare; men were first killed in mercy (Suet. Caes. Herod. iii. 125; Plut. Cleom. 98). According to a discussion of the fourth sentence, Hor. Hist. in Matt. xxvi. 31; Othonis Lex. Rob. s. v. Supplicio; Reclus, Ant. ii. 6; Sir T. Browne, Vulg. Errors, v. 21).

The crucifixion (capitulum crucis) of our Lord, according to the Synoptists, took place by the common method, and was adopted by Tarsus, as a post-mortem disgrace, to prevent the prevalence of suicide. It seems on the whole that the Rabbis are correct in asserting that this exposure is intended in Scripture, since the Mosaic capital punishments were four (namely, the sword, Ex. xvi., stoning, fire, Lev. xx., and stoning, Deut. xxi.). Philo indeed says (De leg. quer. 33), that Moses adopted crucifixion as a murderer's punishment, because it was the worst he could discover; but the passage in Deut. (xxi. 23) does not prove his assertion. Probably therefore the Jews borrowed it from the Romans (Joseph. Ant. xx. 6, § 2; de Bell. Jud. ii. 12, § 6; Vit. 75, &c.), although there might have been a few isolated instances of it before (Joseph. Ant. xiii. 14, § 2).

It was unanimously considered the most horrible form of death, worse even than burning, since the "cross" preceded it; burning in the law-books (Lips. de Cruce, ii. 1). Hence it is called "crude" or "crude cinerum temporum" (Cic. de Verr. v. 66), "extrema peena" (Apul. de Ars. Asin. x.), "sumnum supplicium" (Paul. Sent. v. tit. xix., &c.); and to a Jew it would create horrific horror from the curse in Deut. xxib. Among the Romans also the degradation was a part of the infliction, since it was especially a serio supplicium (Tit. II. iv. 11; Jud. vii. 28; Hor. Stat. i. 3, 8, &c.; Plaut. prostiin), so that even a freedom ceased to dread it (Cic. pro Rob. 5); or if applied to freemen, only in the case of the vilest criminals, thieves, &c. (Joseph. Ant. xvii. 10, § 10; J. v. 11, § 1; Paul. Sent. v. tit. xxiii.; Lamprid. Alex. Sec. 23). Indeed exemption from it was the privilege of every Roman citizen by the jus civitatis (Cic. de Verr. ii. 48). Our Lord was condemned to it by the popular cry of the Jews (Matt. xxvi. 23, as often happened to the early Christians) on the charge of sedition against Caesar (Luke xxii. 2), although the Sanhedrin had previously condemned him on the totally distinct charge of blasphemy. Hundreds of Jews were crucified on this charge as by Florus (Joseph. Bell. Jud. ii. 14, § 9) and Varus, who crucified 2000 at once (Ant. xvii. 10, § 10).

We now purpose briefly to sketch the steps of the punishment, omitting only such parts of it as have been already detailed under Cross. The scarlet robe, crown of thorns, and other inflictions to which our Lord was subjected were illegal, and arose from the spontaneous petulance of the brutal soldiery. But the punishment properly commenced with scourging, after the criminal had been stripped; hence in the common form of sentence we find numerous cases, e.g. "sumnum scurtum..." &c. (Liv. i. 26). For this there are a host of authorities, Liv. xi. 13; Q. Curt. vii. 11; Luc. de Pisoni. 2; Jer. Comment. ad Matt. xxvi. 26, &c. It was inflicted not with the comparatively mild virga, but the more terrible flagellum (Hor. Sat. i. 3; 2 Cor. vi. 24, 25), which was not used by the Jews (Deut. xxv. 3). Into these scourges the soldiers often stuck nails, pieces of bone, &c., to heighten the pain (the μανική θυραγαλωτή mentioned by Athenaeus, &c.); "flagrum peccaminosi extermini, &c." (Apul.), which was often so intense that the sufferer died under it (Up. de Pisoni. viii.). The scourging generally took place at a column, and the one to which our Lord was bound was seen by Jerome, Prudentius, Gregory of Tours, &c., and is still shown at several churches among the relics. In our Lord's case, however, this infliction seems neither to have been the legal scourging after the sentence (Matt. xxvii. 26; Mark. xvi. 28, i. 14, § 9), nor yet the examination by torture (Acts xxii. 24), but rather a scourging before the sentence, to excite pity and procure immunity from further punishment (Luke xxii. 22; John xix. 11); and if this view be correct, the φαγαλλατάς in Matt. xxvii. 26 is retrospective, as so great an anguish could hardly have been endured twice (see Poli
CRUCIFIXION

Sympathized, ad loc.). How severe it was is indicated in prophecy (Ps. xxxvi. 15), 1, 6. Vessels considers that it was partly legal, partly tentative (Hist. Pass., v. 13).

The criminal carried his own cross, or at any rate a part of it (Plut. de inis qui sera, Ac. 9; Ar-

tenid. Onserier. ii. 61; John xix. 17; — "et patrocinari ferat per urbem, deinde alligatur cruce," Plut. O-

rington.) Hence the term Fuscifer, or cross-bearer, given to him by

This was prefigured by Isaac carrying the wood in Gen. xxii. 6, where even the Jews notice the parallel; and to this the fathers fantastically applied the expression in Is. ix. 6, "the government shall be upon his shoulder." They were sometimes scourged and chained on the way (Plut. Model. i. 1, 2). In some old figures we see our Lord described with a table appendent to the fringe of his garment, set full of nails and pointed iron." (Jer. Taylor, Life of Christ, iii. xx. 2.) Perhaps some legend quod taliones; Cypri, de Pote, p. 50.) [Simon of Cynere.

The place of execution was outside the city ("post uritem, " Cic. Verr. v. 66; " extra portam," Plut. Mil. Vit. ii. 4, 6; 1 K. xxi. 13; Acts vii. 58; Heb. xii. 12; and in camps " extra vallum") often in some public road (Quintet. Decl. 275) or other conspicuous place like the Campus Martius (Cic. per Robb.), or some spot set apart for the purpose (Inc. Ann. xxvii.). This might sometimes be a hill (Val. Max. vii.); it is however merely tradi-

tion to call Golgotha a hill; in the Evangelists it is called τοῦ σταυροῦ (Ful. V.) Arrived at the place of execution, the sufferer was stripped naked (Ar-

tenid, Onserier, i. 58), the dress being the per-

quisite of the soldiers (Matt. xxvi. 35; Dag. xxviii. 20, 6); possibly not even a cloth round the loins, was allowed him; at least among the Jews the rule was " that a man should be stoned naked," where what follows shows that "naked" must not be taken in its restricted sense. The cross was then driven into the ground, so that the feet of the condemned were a foot or two above the earth (in pictures of the crucifixion the cross is generally much too large and high), and he was lifted upon it (cruct, " ex-

currente," " extrinsecus in crucem:"

Presid.

ent. συγκροτοῦσθαι; Plant. Model., ii. e. "Cruzinianus,"

Id. Richt, ii. 3. 128: "αὐξήσω, ἀργών, ἀργὼν εἰς ἀργον τέλος."

Gree. Xeni., or else stretcht upon it on the

ground, and then lifted with it, to which there seems to be an allusion in a lost prophecy quoted by Barnabas (Ep. 12, ἡμας ἐκέλευς καὶ ἀκάθαρτος (Pear- 

son on Creed, Art. iv.). The former method was the commoner, for we often read tas in Exod. xix. 14, i.e. of the cross being erected beforehand in terraeus.

Before the nailing of binding took place (for which see Cross), a medicated cup was given out of kindness to cushion the senses and deaden the pangs of the sufferer (Prox. xxvi. 6), usually of οἶνος ἐπικομισμοῦ or ἐλαιωδέματος, as among the Jews (Lightfoot, Hor. Hebr. ad Matt. xxvii.), because myrrh was soporific. Our Lord refused it that his senses might be clear (Matt. xxvii. 34; Mark xiv. 23). Marmion, Smalc., xii. 9. Matt. calls it ζυγὸς ἐπικοπής χαλίας (Matt. xxvii., an expression used in reference to Ps. xiv., but not strictly accurate. This mercifully intended draught must not be confounded with the spong of vinegar but " robbers" (Αρματί). The Greek makes a distinc-

tion between the terms (John x. 8). See TRAPP. II.
CRUCIFIXION

was generally therefore forbidden, though it might be granted as a special favor on grand occasions (Ulp. l. ix. De offic. Pascore.). But in consequence of Deut. xxxi. 22, 23, an express national exception was made in favor of the Jews (Matt. xxvii. 38; cf. Joseph. B. J. iv. 5, § 2).

Having thus traced the whole process of crucifixion, it only remains to speak of the manner of death, and the kind of physical suffering endured, which we shall very briefly abridge from the treatise of the physician Richter (in John's Arch. Bldt.). These are, 1. The unnatural position and violent tension of the body, which cause a painful sensation from the least motion. 2. The nails being driven through parts of the hands and feet which are full of nerves and tendons (and yet at a distance from the heart) create the most exquisite anguish. 3. The exposure of so many wounds and lacerations brings on inflammation, which tends to become gangrene, and every moment increases the probability of suffering. 4. In the distended parts of the body more blood flows through the arteries than can be carried back into the veins: hence too much blood finds its way from the aorta into the head and stomach, and the blood-vessels of the head become pressed and swollen. The general obstruction of circulation which ensues causes an internal excitement, excitation, and anxiety, more intolerable than death itself, and would produce the most wretchedly increasing and lingering anguish. To all which we may add, 6. Burning and raging thirst.

This accrued and awful mode of punishment was happily abolished by Constantine (Sozom. i. 8), probably towards the end of his reign (see Lips. de Cruc, iii. 15), although it is curious that we have no more definite account of the matter. "An edict so honorable to Christianity," says Gibbon, "deserved a place in the Theodosian code, instead of the indirect mention of it which seems to result from the comparison of the 5th and 18th titles of the 9th book" (ii. 154, note)

An explanation of the other circumstances attending the crucifixion belongs rather to a commentary than a dictionary. On the types and prophecies of it, besides those adduced, see Typr. Testin. ii. 21. On the resurrection of the saints, see Lightf. de Resurr. cap. 52 (there is a monograph by Gelzerius — Dissert. de Resur. sanctorum cum Christo.). On other concomitant prodigies, see Schoettgen, Hor. Hebr. et Talmud. vi. 3, 8. [Darkness; Cross.] The chief authorities are quoted in the article, and the ancient ones are derived in part from Lipsis; of whose most interesting treatise, De Cruc, an enlarged and revised edition, with notes, would be very acceptable. On the points in which our Lord's crucifixion differed from the ordinary Jewish customs, see Othonus Lex. Rab. § 214; Suppl. § 217; Humeus de Morte I. Christi; Vossius, Harm. Passionum; Carpzov, Apopt. Crit. p. 591 ff. &c. [See also Friedlieb, Archéologie der Leidensgeschichte, Bonn, 1843; Stroud, Physical cause of the Death of Christ, Lond. 1847; and for very full references to the literature of every part of the subject, Hase, Leben Jesu. 2. Aufl. Leipzig. 1835—1844.]

The question whether the feet of Jesus belonged to the cross, has bearing on the reality of his death and resurrection; for, if they were, it cannot reasonably be supposed that, having been restored, without a miracle, from a merely apparent death, he was able to walk the same day many miles through a hilly country. The wounds of his feet would have surely prevented the journey to Emmaus. Influenced, it appears, by this consideration, Dr. Paulus published an Essay in 1792, asserting that the feet of persons crucified were not nailed to the cross, but rather bound to it by cords. Forty years later, in reply to arguments against this view, he attempted to show that the feet were not even bound to the cross, but suffered to hang down freely. The point in question is one of considerable interest and a brief survey of the evidence which relates to it is therefore inserted. (1.) The narrative of Luke (see xxviii. 39), seems to imply that the feet, as well as the hands, of Jesus were nailed to the cross. For, according to this narrative, when the two disciples whom Christ had joined on their way to Emmaus had returned to Jerusalem and were reporting to the eleven what they had seen and heard, Jesus himself stood in the midst of the astonished group, saying:— "Peace be unto you;" and then, for the double purpose of enabling them to identify fully his person, and ascertain that his body was real, he added: "See my hands and my feet, that it is I myself: handle me and see; for a spirit hath not flesh and bones, as ye see me have." Had it been the sole aim of Christ to convince his disciples that they were not gazing at a mere apparition, the words, "handle me and see; for a spirit hath not flesh and bones, as ye see me have," would have been quite suffice- cient; for the act of grasping his hand would have afforded evidence of his possessing a genuine body, as complete as could have been gained by touching his feet also. But if he wished to convince them that they were looking once more upon their Lord, who had risen with his own body from the dead, it was natural for him to call their attention to those parts of his body which would enable them most surely to identify it, that is, those which bore the marks of his recent crucifixion. Hence the fact that he showed them his hands and his feet affords evidence that the marks of his peculiar death were visible in them both. (See Meyer, Bleek, Alford, in loc.) Moreover, the narrative of John (see xx. 19 ff.), which probably describes the same meeting of Jesus with his disciples, confirms the interpretation now given to the words preserved by Luke. For John declares that Christ showed them unto them both (καῖτε, repeated, Tisch.) his hands and his side; evidently, as appears from the whole tenor of the account, that they might identify him beyond a doubt by the known marks of violence on his body, and thus assure themselves of his actual resurrection. That John does not mention the feet of Christ, is surely no evidence that they were not shown for the same purpose as his hands and side. (2.) Justin Martyr twice refers to the nailing of Christ's feet as a fulfilment of the prophecy in Ps. xxiii. 17. (See Apol. i. c. 35; Did. c. Tryph. c. 97.) In the former passage he says:— "But the sentence, 'they pierced my hands and my feet,' was on account of the nails fixed in his hands and feet on the cross;" and in the latter:— "In the twenty-second Psalm David did thus typically speak of his cross and passion: 'They pierced my hands and my feet.' For when Christ was crucified they pierced his hands and his feet by driving nails into them." Justin distinctly affirms that the feet as well as the hands of Christ were nailed to the cross, and that by this act a prediction of the O. T. respecting him was fulfilled. But he does not intimate that his crucifixion differed in any respect from the same punishment
method. The nailing of the feet of Jesus to the cross may therefore be said to rest on satisfactory evidence; but whether a single nail was driven through both feet, or they were fastened separately to the cross, cannot be ascertained with any degree of certainty.

A. H.

CRUSE, a word employed in the A. V., apparently without any special intention, to translate three distinct Hebrew words.

1. Tzippoceth, ציפכeth (from פֶפֶל, a root with the idea of width; comp. qoppelus, from ambua). Some clue to the nature of this vessel is perhaps afforded by its mention as being full of water at the head of Saul when on his night expedition after David (1 Sam. xxvi. 11, 12, 16), and also of Elijah (1 K. xix. 6). In a similar case in the present day this would be a globular vessel of porous stones — the ordinary zaza — about 9 inches in diameter, with a neck of about 3 inches long, a small handle below the neck, and opposite the handle a straight spout, with an orifice about the size of a straw, through which the water is drunk or sucked. The form is common also in Spain, and will be familiar to many from pictures of Spanish life. A similar globular vessel probably contained the oil of the widow of Zarephath (1 K. xxi. 12, 14, 16). For the "box" or "horn" in which the consecrated oil was carried on special occasions, see 011.

2. The noise which these vessels make when emptied through the neck is suggestive of the second term, Bakkâb, בקָבָב, probably like the Greek handabas, βαδάβας, an unomatopoeic word. This is found but twice — a "cruse of honey," 1 K. xiv. 3; and an "earthen bottle," Jer. xix. 1.

3. Apparently very different from both these is the other term, Tzîpîkâh, ציפיѣ (found also in the forms צָיפִּיָה and ציפיѣ), from a root (צָיפִּי) signifying to sprinkle; or perhaps from ציפִּי, to ring, the root of the word for cymbal. This was probably a flat metal saucer of the form still common in the East. It occurs 2 K. ii. 20, "cruses;" xxxi. 13, "dish;" 2 Chr. xxxiv. 13, "pans;" also Prov. xix. 24, xxi. 15, where the figure is obscured by the choice of the word יבוסם.

G.

* What is related of the "cruse of water" placed by Samuel's "bolster" as he slept in the cave, which David so quietly removed without awaking him (1 Sam. xxvi. 12), and of "the cruse of water at the head of Elijah as he lay and slept beneath a juniper-bush" (1 Kings xix. 5, 6), accords perfectly, says Thomson, with the habits of Eastern life at this day. "No one ventures to travel over the deserts there without his cruse of water; and it is very common to place one at the bolster, so that the owner can reach it during the night. The Arabs eat their dinner in the evening, and it is
CRYSTAL

The use of crystal is often associated with the Hebrew word צורה (tsorah), which signifies a “glass” or “crystal.” For instance, the Targum of Neofiti translates צורה as "crystal" (A.T. 6971). The Talmudists, however, sometimes assign the meaning of "glass" to the word צורה, possibly due to the similarity between the Hebrew word צורה and the Greek word χρυσός (chrysos), meaning "gold," as noted by Harris (Vulg. 2361).

The ancient Greeks used crystal for various purposes, including as a matter of decoration and for medicinal uses. The ancients used rock-crystal to be merely ice congealed by intense cold; whereas the Greek word κρύσταλλος (krysstallos) from κρύος (kryos), “cold” (see Pliny, N. H. xxviii. 2). The similarity of appearance between ice and crystal caused no doubt the identity of the terms to express these substances. The A. V., following the Vulg., translates the epithet צורה (tsorah) “terrible” in Ez. (l. c.); the word would be better rendered "splendid." It has the same meaning as the Latin spectabilis. The Greek κρύσταλλος occurs in Rev. iv. 6, xxii. 1. It may mean either “ice” or "crystal." Indeed there is no absolute necessity to depart from the usual signification of the Hebrew צורא in Ez. (l. c.). The upper vault of heaven may well be compared to "the astonishing brightness of ice" (see Harris, N. T. Hist. of Bible, art. Crystal).

CUCUMBERS (פָּרְקִים, parqim; κορμίον, kormiōn; Cucumis sativus)

This word occurs once only, in Num. xi. 5, as one of the good things of Egypt for which the Israelites longed. There is no doubt as to the meaning of the Hebrew word, which is found with a slight variation in the Arabic, Syriac, Ethiopic, &c., to denote the plant now under consideration (see Celsius, Hist. ii. 247). Egypt produces excellent cucumbers, melons, &c. (Melon), the Cucumis ecklon, being, according to Hasselquist (Tent. p. 258), the best of its tribe yet known. This plant grows in the fertile earth around Cairo after the inundation of the Nile, and not elsewhere in Egypt. The fruit, which is somewhat sweet and cool, is eaten, says Hasselquist, by the Greeks and Europeans in Egypt as that from which they have least to apprehend. Prosper Alpinus (Plent. Ægypt. xxxviii. p. 54) speaks of this cucumber as follows: "The Egyptians use a certain kind of cucumber which they call chelot. This plant grows not directly from the cucumber kind, except in size, color, and tenderness; it has smaller, whiter, softer and rounder leaves, and the fruit is longer and greener than ours, with a smooth soft rind, and more easy of digestion." The account which Forskål (Flor. Ægypt. p. 168) gives of the Cucumis ecklon, which he says is called by the Arabs ʿAbdelīri or ʿAfīr, does not agree with what Hasselquist states with regard to the locality where it is grown, this plant being, according to the testimony of the first-named writer, "the commonest fruit in Egypt, planted over whole fields." The C chelot is a variety only of the common melon (C. melo); it was once cultivated in England and called the "round-leaved Egyptian melon;" but it is rather an insipid sort. Besides the Cucumis ecklon, the common cucumber (C. sativa), of which the Arabs distinguish a number of varieties, is common in Egypt. This grows with the water-melons, in the poor people's field and is eaten with vinegar; the richer

CUCKOO (קָקֹו, qako).

This bird is not to be regarded as a bird of such a nature as to create thirst, and the quantity of water which they drink is enormous. The use of the bird is, therefore, in perpetual demand. (Leviart and Book, ii. 21.) H.

CRYSTAL, the representative in the A. V. of the Hebrew words צורה (tsorah) and קרש (kerash) (רברב). 1. צורה (tsorah; riteus) occurs only in Job xxviii. 17, where wisdom is declared to be more valuable than "gold and the crystal." Notwithstanding the different interpretations of "rock crystal," "glass," "adamant," &c., that have been assigned to this word, there can, we think, be very little doubt that "glass" is intended. The old versions and paraphrases are in favor of this interpretation. The Targum has ṣeypqulon, by which the Talmudists understand "glass." The Syriac has ṣeypqulon; the Arabic susyj, i. e. "glass," Schultena (Comment. in Job, l. c.) conjectures that the words צורה צורה (רברב צורה צורה) are a headlong to denote "a valuable glass or crystal goblet," or "a glass vessel gilt with gold," such a one perhaps as that which Nero is reported to have broken to pieces in a fit of anger (Pliny, N. H. xxviii. 2). Cary (Job l. c.) translates the words "golden glass;" and very aptly compares a passage in Wilkinson (Anc. Egypt. ii. 61, ed. 1854), who speaking of the skill of the Egyptians in making glass, says "they had even the secret of introducing gold between two surfaces of glass, and in their bottles a gold band alternates within a set of blue-green, and other colors." It is very probable that the צורה צורה of Job (l. c.) may denote such a work of art as is referred to in this quotation. [GLASS.] 2. קרש (krosholās; crystalum) occurs in numerous passages in the O. T. to denote "ice," "frost," &c.; but once only (Ez. i. 22), as is generally understood, to signify "crystal." And the likeness of the furnament . . . . . . . . . was as the color of the magnificent crystal." The ancients supposed rock-crystal to be merely ice congealed by intense cold; whence the Greek word κρύσταλλος from κρύος, "cold" (see Pliny, N. H. xxviii. 2). The similarity of appearance between ice and crystal caused no doubt the identity of the terms to express these substances. The A. V., following the Vulg., translates the epithet צורה צורה (רברב צורה צורה) "terrible" in Ez. (l. c.); the word would be better rendered "splendid." It has the same meaning as the Latin spectabilis. The Greek κρύσταλλος occurs in Rev. iv. 6, xxii. 1. It may mean either "ice" or "crystal." Indeed there is no absolute necessity to depart from the usual signification of the Hebrew צורא in Ez. (l. c.). The upper vault of heaven may well be compared to "the astonishing brightness of ice" (see Harris, N. T. Hist. of Bible, art. Crystal).
people fill it with flesh and aromatics, and make a kind of puddings, which, says Hasselquist (p. 227), eat very well. "Both Cuminum chete and C. sativum," says Mr. Tristram, "are now grown in great quantities in Palestine: on visiting the Arab school in Jerusalem (1858) I observed that the dinner which the children brought with them to school consisted, without exception, of a piece of barley cake and a raw cucumber, which they eat rind and all."

The prophet Isaiah (i. 8) foretells the desolation, that was to come upon Judah and Jerusalem in these words: "The daughter of Zion is left as a cottage in a vineyard, as a lodge in a garden of cucumbers, as a besieged city." The cottage or lodge here spoken of is a rude temporary shelter, erected in the open ground where vines, cucumbers, goards, &c., are grown, in which some lonely man or boy is set to watch, either to guard the plants from robbers, or to scare away the foxes and jackals from the vines. Dr. Thomson (Land and Book, ii. 11) well illustrates this passage of Scripture, and brings out its full force. The little woodcut which he gives of the lodge at Batailah represents such a shelter as is alluded to above; by and by, when the crop is gathered and the lodge forsaken, "the poles will fall down or lean every way, and the green beghs with which it is shaded will be scattered by the winds, leaving only a ragged sprawling wreck—a most affecting type of utter desolation."

It is curious to observe that the custom of keeping off birds, &c., from fruit and corn by means of a scarecrow is as old as the time of Baruch (xi. 70) [or Epist. of Jer. 70]: "As a scarecrow (πομπατάklär) in a garden of cucumbers keepeth nothing, so are their gods of wood," &c.

W. H.

(CUMMIN [rather CUMIN] (צمساعدة; Cummin, Bindo), one of the cultivated plants of Palestine, mentioned by Isaiah (xxvii. 25, 27) as not being threshed in the ordinary way in which wheat was threshed, but with a rod; and again by our Saviour as one of the crops of which the Scribes and Pharisees paid tithe. It is an unornamented plant somewhat like fennel (Cuminum satureum, Linn.). The seeds have a bitterish warm taste with an aromatic flavor. It was used in conjunction with salt as a sauce (Phin. xiv. 8). The Mulsees are said to grow cummin at the present day, and to thresh it in the manner described by Isaiah.

W. D.

* CUNNING originally meant μυθίσκειν, "knowing," and has this sense in Gen. xxv. 27 (where Esau is called a "cunning hunter"); in Exod. xvii. 1 ("cunning work," said of figures of the Cherubim); in 1 Sam. xvi. 16 ("cunning player" on the larp) and other passages (A. V.). II.

* CUNNINGLY (2 Peter iv. 16). [Owing to the word "cup" in the A. V. are, I. כוס: ποτήριων: cup; 2. כוס, only in plural: סמטכוס: curnera; 3. כוס: sephos. See also, further, words BASSIN and BOWIV. The cups of the Jews, whether of metal or earthenware, were possibly borrowed, in point of shape and design, from Egypt and from the Phoenicians, who were celebrated in that branch of workmanship (II. xx. 3. 1; IV. 419, 518).

Egyptian drinking cups, one-fifth of the real size. (Lane.)

The use of gold and silver cups was introduced into Greece after the time of Alexander (Athen. vii. 220, 30, xi. 416, 465; Birch, Arc. Phot. ii. 109).

The cups of the N. T., ποτήρια, were often no doubt formed on Greek and Roman models. They were sometimes of gold (Rev. xii. 4). Dict. of Antiq. art. Patena. II. W. P.

* "Cup" or "bowl" would undoubtedly be more correct than "vial" (A. V.), as the rendering of φακαί in the Apocalypse. The term designates a vesl with breadth rather than depth, and whether used of the censor-dish (Rev. v. 8), or of the cup with its contents as the emblem of punishment (Rev. xv. 7, 26, 2, &c.), does not correspond to our word vial, as at present employed.

CUP-BEARER (ποτηριάς: περομένος: ποτηρίος), an officer of high rank with Egyptian, Persian, Assyrian, as well as Jewish monarchs. The chief cup-bearer, or butler, to the king of Egypt was the means of raising Joseph to his high position (Gen. xi. 21, 31). Rabshakeh, who was sent by Sennacherib to Hezekiah, appears from his name to have filled a like office in the Assyrian court (2 Kings xvii. 17; Ges. p. 1225), and it seems probable, from his association with Han-sars, chief of the eunuchs (2 Kings xxv. 22), and from Eastern custom.

Assyrian cup with handle. (Layard, ii. 300.)

Assyrian drinking cups. (Nebuhru, Topgen, li. 106; Char.-cup. (Layard, ii. 304.)

Egyptian cups were of various shapes, having handles or without them. In Solomon's time all his drinking vessels were of gold, none of silver (1 K. x. 21). Babylon is compared to a golden cup (Jer. vii. 5).

Assyrian cups from Khorsabad and Nimroud may be seen figured in Layard (Nin. ii. 303, 304); Nin. and Bish, 186, 190, 192), some perhaps of Phoenician workmanship, from which source both Solomon and the Assyrian monarch possibly derived their workshops and the works themselves. The cups and other vessels brought to Babylon by Nebuchadnezzar may thus have been of Phoenician origin (Dum. v. 2).

On the bas-reliefs at Persepolis many figures are represented bearing cups or vases which may fairly be taken as types of the vessels of that sort described in the book of Esther (Esth. i. 7; xii. 4). The great laver, or "sea," was made with a rim like the rim of a cup (Geet, "with flowers of lilies" (1 K. vii. 26), a form which the Persepolitan cups resemble (Dahl, Arch. § 414). The common form of modern Oriental cups is represented in the accompanying drawing:
CURTAINS

n general, that he was, like him, an eunuch (Gen. p. 973). Herod the Great had an establishment of eunuchs, of whom one was a cup-bearer (Joseph. Ant. xvi. 8, 1). Nehemiah was cup-bearer to Artaxerxes Longimanus king of Persia (Neb. i. 11, ii. 1). Cup-bearers are mentioned among the attendants of Solomon (1 K. x. 5; comp. Layard, Nine. ii. 324, 329).

CURTAINS. The Hebrew terms translated in the A. V. by this word are three:

1. יִּתְרְדֶּחֶנ (תְּרֵדֶחֶנ); the ten "curtains" of fine linen, &c., each 28 cubits long and 4 wide, and also the eleven of goats' hair, which covered the Tabernacle of Moses (Ex. xxvi. 1-13, xxxiv. 8-17). The charge of these curtains and of the other textile fabrics of the Tabernacle was laid on the Gershonites (Num. iv. 25). Having this definite meaning, the word came to be used as a synonym for the Tabernacle — its transitoriness and slightness; and is so employed in the sublime speech of David, 2 Sam. vii. 3 (where "curtains" should be "the curtain"), and 1 Chr. xvii. 1. In a few later instances the word bears the more general meaning of the sides of a tent; as in the beautiful figure of Is. liv. 2 (where "habitations" should be "curtains"). מִשְׁכֶּנָּה, poetic word for "tents"; Jer. iv. 20, x. 20 (here "tabernacle" and "tent" are both one word, מִשְׁכֶּנָּה); Ps. civ. 2 (where "stretch," מְבָנָה, is the word usually employed for extending a tent). Also specially of nomadic people, Jer. xlix. 29; Hab. iii. 7; Cant. i. 5 (of the black hair-cloth of which the tents of the real Bedouin are still composed).

2. מִשְׁכֶּנָּה, the "hanging" for the door-way of the tabernacle, Ex. xxvi. 36, 37, xxxiv. 15, xxxvi. 37, xxxix. 38, xl. 5; Num. iii. 25, iv. 25; and also for the gate of the court round the tabernacle, Ex. xxvii. 16, xxxvii. 17, xxxviii. 18, xxxix. 40, xl. 33; Num. iii. 26, iv. 26. Amongst these the rendering "curtain" occurs but once, Num. iii. 26; while "hanging" is shared equally between מִשְׁכֶּנָּה and a very different word — קֶבֶת, קֶבֶּט. The idea in the root of מִשְׁכֶּנָּה seems to be of shielding or protecting (קֶבֶת, Gen. p. 951). If this be so, the Mishcan may have been not a curtain or veil, but an awning to shade the entrances — a thing natural and common in the fierce sun of the East (see one figured in Ferguson's Nineveh and Per- sepolis, p. 184). But the nature of this and the other textile fabrics of the tabernacle will be best examined under TA BERNACLE.

Besides "curtain" and "hanging," Mishcan is rendered "covering" in Ex. xxxv. 12, xxxix. 34, xl. 21; Num. iv. 5; 2 Sam. xvii. 19; Ps. cv. 39; Is. xxii. 8.

3. לֶךֶּנָּה. There is nothing to guide us to the meaning of this word. It is found but once (Is. xl. 22), in a passage founded on the metaphor of a tent.

G.

CUSH (כוש [see the word below]) Xojos; [Vat. Sin. -ơ] Ἀθηωία, and Othaoi), a Benja-

nese mentioned only in the title to Ps. vii. There is every reason to believe this title to be of great antiquity (Ewald. Par. tom. p. 9). Cush was probably a follower of Saul, the head of his tribe, and sought the friendship of David for the purpose of "reward [i.e. will to him who was at peace with him]" — an a.t. in which no Oriental of ancient or modern times would give any shame, but, if successful, the reverse. Happily, however, we may gather from verse 15 that he had not succeeded.

* The antiquity of the name has been less questioned than its application. The Jewish interpreters very generally regard the name as symbolic: Ethiopian, black in heart and character. But amongst those who accept this view opinions differ as to the person that was so etymologically designated. Some suppose Cush to be Shimea who cursed David when he fled from Absalom (2 Sam. xvi. 5 ft.); and others suppose him to be Saul, chiefly because the Psalm seems to refer to the times of Saul rather than those of Absalom. The latter is Hengstenberg's view (Die Psalmen, i. 138 ft.), and also Alexander's (Psalms, i. 49). Rosenmüller argues against both opinions and abides by the name as that of some partition of Saul, and an enemy and calumniator of David (Scholia in Psalmos redacta, iii. 56).

CUSH (כוש [dark-colored, First; perf. an assembly, people brought together], Gen. 6, 6th Aufl.): Xojos, Chos (Gen. x. 6, 7, 8; 1 Chr. i. 8, 9, 10); Адоснуа, Адосноас: Ἀθηωία; CUSHITTE, Шуш: Adosno: Ἀθηωία; pl. mehoshi, me&osum: fem. me^osum, the name of a son of Ham, apparently the eldest, and of a territory or territories occupied by his descendants. (1) In the genealogy of Noah's children Cush seems to be an individual, for it is said "Cush begat Nimrod" (Gen. x. 8; 1 Chr. i. 10). If the name be older than his time he may have been called after a country allotted to him. The following descendants of Cush are enumerated: his sons, Seba, Havilah, Sabtah or Sabta, Raamah, and Sabtechah or Sabtechah: his grandsons, the sons of Raamah, Sheba and Dedan; and Nimrod, who, as mentioned after the rest, seems to have been a remoter descendant than they, the text not necessarily proving him to have been a son. The only direct geographical information given in this passage is with reference to Nimrod, the beginning of whose kingdom was in Babylonian, and who afterwards went, according to the reading which we prefer, into Assyria, and founded Nineveh and other cities. The reasons for our preference are, (1) that if we read "Out of that land went forth Asshur," instead of "he went forth into Asshur," i.e. Asshur, there is no account given but of the "beginning" of Nimrod's kingdom; and (2) that Asshur the patriarch would seem here to be quite out of place in the genealogy.

(2) Cush as a country appears to be African in all passages except Gen. ii. 13. We may thus distinguish a primeval and a post-diluvian Cush. The former was encompassed by Giloh, the second river of Paradise. It would seem, therefore, to have been somewhere to the northward of Assyria. It is possible that Cush is in this case a name of a period later than that to which the history relates, but it seems more probable that it was of the earliest age, and that the African Cush was named from this older country. Most ancient nations thus connected their own lands with Paradise, or with primeval seats. In this manner the future Paradise of the Egyptians was a sacred Egypt watered by a sacred Nile; the Arabs have told of the ter-
restful Paradise of Schehelad, the son of ‘Abd, as sometimes seen in their deserts; the Greeks located the all-destroying floods of Ogyges and Dendecian in Greece; and the Mexicans seem to have placed a similar deluge in America: all carrying with them their traditions and fixing them in the territories where most of the modern Malays reside. The ‘Cushites’ mentioned in Hab. (iii. 7) has been thought to be an Asiatic post-diluvian Cush, but it is most reasonable to hold that Cuskan-rishathaim is here intended [CUSHAN]. In the ancient Egyptian inscriptions Ethiopia above Egypt is termed Kesh or Kesh, and this territory probably perfectly corresponds to the African Cush of the Bible. The Cushites however had clearly a wider extension, like the Ethiopians of the Greeks, but apparently with a more definite ethnic relation. The settlements of the sons and descendants of Cush mentioned in Gen. x. may be traced from Mezoe to Babylon, and probably on to Nineveh. We have not alone the African Cush, but Seta appears to correspond to Mezoe, other sons of Cush are to be traced in Arabia [Arabia, Rasman, &c.], and Ninrds reigned in Babylonia, and seems to have extended his rule over Asia. Thus the Cushites appear to have spread along tracts extending from the higher Nile to the Ematurites and Tigris. Philological and ethnological data lead to the same conclusion. There are strong reasons for deriving the non-Semitic primitive language of Babylonia, variously called by scholars Cushite and Sythie, from an anti-Semitic dialect of Ethiopia, and for supposing two streams of migration from Africa into Asia in very remote periods: the one of Nigrals through the present Mendeh region, the other and later ones, of Cushites, from Ethiopia properly so called, through Arabia, Babylonia, and Persia, to Western India (Genius of the Earth, &c., pp. 214, 215).

Sir H. Rawlinson has brought forward remarkable evidence tending to trace the early Babyloniens to Ethiopia: particularly the similarity of their mode of writing to the Egyptian, and the indication in the traditions of Babylonia and Assyria of "a connection in very early times, between Ethiopia, Southern Arabia, and the cities on the Lower Euphrates," the Cushite name of Nimrod himself as a defined hero, being the same as that by which Meroe is called in the Assyrian inscriptions (Rawlinson’s Herod. i. 412, 443). History affords many traces of this relation of Babylonia, Arabia, and Ethiopia. Zerah the Cushite (A. V. - ‘Ethiopian’) who was defeated by Assy, was most probably a king of Egypt, certainly the leader of an Egyptian troops. The dynasty then ruling the (224) bears names that have caused it to be supposed to have had a Babylonian or Assyrian origin, as Shishak, Shishak, Sheshak, Shemar, Nimmor, Tekrat, Tekh, Tekhith. The early spread of the M芝麻tists illustrates that of the Cushites [APPEND], it may be considered as a part of the great system of migrations. On these grounds we suppose that these Hamite races, very soon after their arrival in Africa, began to spread to the east, to the north, and to the west; the Cushites establishing settlements along the southern Arabian coast, on the Arabian shore of the Persian Gulf and in Babylonia, and thence onward to the Indus, and probably northward to Nineveh; and the Mizraites spreading along the south and east coasts of the Mediterranean, on the part of the north shore, and in the great island.

These must have been sea-faring peoples, not wholly unlike the modern Malays, who have similarly spread on the shores of the Indian Ocean. They may be always traced where very massive architectural ruins are seen, where the native language is partly mixed with the Semitic and partly with the native religion is partly cosmic or high nature-worship, and partly fetishism or low nature-worship. These indications do not fail in any settlement of Cushites or Mizraites with which we are well acquainted. [ETHIOPIA.]

R. S. P.

* Cush, as the name of a country, is translated in the A. V. “Ethiopia” or “Ethiopians,” in all the passages in which it occurs except Is. xi. 11.

A.

CUSHAN (גשנה): Adiabene: [Sin.1 Ed.:] Ethiopia, Hab. iii. 7), possibly the same as Cushan-rishathaim (A. V. Cushan) king of Mesopotamia (Judg. iii. 8, 10). The order of events attended to by the prophet seems to favor this supposition. First he appears to refer to former acts of Divine favor (ver. 2); he then speaks of the wonders at the giving of the Law, “God came from Teman, and the Holy One from Mount Paran;” and he adds, “I saw the tents of Cushan in affliction: [and] the tent-curtains of the land of Midian did tremble,” as though referring to the fear of the enemies of Israel at the manifestations of God’s favor for His people. Cushan-rishathaim, the first recorded oppressor of the days of the Judges, may have been already reigning at the time of the entrance into Palestine. The Mizraites, who were not associated with the Cushites at that time, feared the Israelites and plotted against them (Num. xxii. xxiii. xxiv. xxv.); and it is noticeable that Ishmael was sent for from Aram (xxiii. 7), perhaps the Aram-naharin of the oppressor, Halakzik afterwards alludes to the crossing of Jordan or the Red Sea, or both (ver. 8–10, 15), to the standing still of the sun and moon (11), and apparently to the destruction of the Canaanites (12, 13, 14). There is far less reason the Cushites at that time feared the Israelites and plotted against them (Num. xxii. xxiii. xxiv. xxv.); and it is noticeable that Ishmael was sent for from Aram (xxiii. 7), perhaps the Aram-naharin of the oppressor, Halakzik afterwards alludes to the crossing of Jordan or the Red Sea, or both (ver. 8–10, 15), to the standing still of the sun and moon (11), and apparently to the destruction of the Canaanites (12, 13, 14).

B. Father of Zophaniah the Prophet (Zeph. i. 1).

C. With the article, גָּשָּׁנָה, i. e., “the Cushite,” “the Ethiopian;” d Xamari [Var. -arai]: Cushu, a man apparently attached to Jehoiachin’s person, but unknown and unmentioned to the king, as may be inferred from his not being recognized by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David, unlike Ahimaz, who was well aware of the effect they were sure to produce. That Cush was a forigner—as we should infer from his name—is also slightly corroborated by his ignorance of the ground in the Jordan valley—the way of the “Cicar”;—by knowing which Ahimaz was enabled to enthrone him (2 Sam. viii. 21, 22, 23, 31, 32). Ewald, however, conjectures that a mode of running is here referred to, peculiar to Ahimaz, and by which partly or wholly, in spite of their after knowledge of phonetic characters.
CUTHAH or CUTH (ךוּת, כות):
Xoûth [Vat. Xwûtha, Alex. Xwûh], Xôth [Alex. suits]; Joseph. Xôthôs: Cuthus, one of the countries, and whom Shalmaneser invaded colonists into Samaria (2 K. vii. 24, 39); these, intermixing with the remnant of the ten tribes, were the progenitors of the Samaritans, who were called Cuthceans by the Jews, and are so described in the Chaldee and Talmud (oi katê thn 'Eβραϊων γλώσσαν Xoûthoi, kata ðê thn 'Ελληνων Σαμαριτάιον, Joseph. Ant. ix. 14, § 3). The position of Cuthah is undecided; Josephus speaks of a river of that name in Persia, and fixes the residence of the Cuthceans in the interior of Persia and Media (Ant. ix. 14, § 3, x. 9, § 7). Two localities have been proposed, each of which corresponds in part, but neither wholly, with Josephus's account. For the one we depend on the statements of Arabian geographers, who speak of a district and town named Kutha, between the Tigris and Euphrates, after which one of the channels (the fourth in Xen. Anab. i. 7) was named. This town existed in the time of Abulfeda, and its site has been identified with the ruins of Towlah immediately adjacent to Babylon (Ainsworth's Assyriqû. p. 105; Knobel, Hâlîcerafel, p. 252); the canal may be the river to which Josephus refers. The other locality corresponds with the statement that the Cuthceans came from the interior of Persia and Media. They have been identified with the Cossæi, a warlike tribe, who occupied the mountain ranges dividing those two countries, whose hairless habits made them a terror even to the Persian emperors (Strab. x. 524, xvi. 744). They were never wholly subdued until Alexander's expedition; and it therefore appears doubtful whether Shalmaneser could have gained sufficient authority over them to effect the removal of any considerable number; their habits would have made such a step highly expedient, if practicable. The connection between the Samaritans and the Sidonians, as stated in their letter to Alexander the Great (Joseph. Ant. xi. 8, § 6, xii. 5, § 5), and between the Sidonians and the Cuthceans as expressed in the version of the Chaldee Paraphrase Pseudo-Jonathan in Gen. x. 19, who substitutes בָּנָיָהוּ for בָּנָי, and in the Tamgam, 1 Chr. i. 13, where a similar change is made, is without doubt to be referred to the traditional belief that the original seat of the Phoenicians was on the shores of the Persian Gulf (Herod. i. 1).

FORBIDDEN, or was at least tolerated. The ground therefore, of the prohibition must be sought else where, and will be found in the superstitious or inhuman practices prevailing among heathen nations. A notion apparently existed that self-inflicted baldness or mutilation had a propitiatory efficacy in respect of the names of the dead, perhaps as representing, in a modified degree, the solemnity of human or animal sacrifices. Herodotus (iv. 71) describes the Sgyptian usage in the case of a deceased king, for whose obsequies not fewer than six human victims, besides offerings of animals and other effects, were considered necessary. An extreme case of funeral bloodshed is represented on the occasion of the burial of Patroclus, when four horses, two dogs, and twelve Trojan captives are offered up (Ili. xxi. 171, 176). Together with human or animal sacrifices at funerals, and after these had gone out of use, the minor propitiatory acts of self-sacrifice and depilation continued in use (II. xxii. 141; Od. iv. 197; Virg. Æn. iii. 67, with Servius ad loc. xii. 605; Eurip. Auge. 423; Seneca, Hûgol. v. 1176, 1193). Plutarch says that some barbarians mutilate themselves (De Cons. ad Apollon. p. 119, vol. vi. Reiske). He also says that Solon, by the advice of Epimenides, curtailed the Athenian practice in this respect (Socon. 12-21, vol. i. pp. 184, 194). Cicero quotes a law of the twelve Tables to the same effect; "universes gens ne raduntu" (De Leg. ii. 23).

Such being the ancient heathen practice it is not surprising that the Law should forbid similar practices in every case in which they might be used or misconstrued in a propitiatory sense. "Ye shall not make cuttings for (properly) the dead (Lev. xix. 28; Gesen. p. 731; Spener de Leg. Heb. ii. 404, 405)."

But the practice of self-mutilation as an act of worship belonged also to heathen religious ceremonies not funereal. The priests of Baal, a Syrian and also an Assyrian deity, cut themselves with knives to propitiate the god "after their manner" (1 K. xviii. 28). Herodotus says the Carions, who resided in Europe, cut their foreheads with knives at funeral of his; and in this respect existing the Egyptians, who beat themselves on these occasions (Herod. ii. 61). This shows that the practice was not then at least an Egyptian one. Lucian, speaking of the Syrian priestly attendants of this mock deity, says, that using violent gestures they cut their arms and tongues with swords (Lucian, Aión. c. 37, vol. ii. 102 Amst.; de Deo Syq. lib. 638, 681; comp. Ex. viii. 14). Similar practices in the worship of Belonia are mentioned by Lucretius (Phars. i. 590), and alluded to by Elias Lambadius (Comm. p. 269), by Tertullian (Apol. e. 9), and Latantius (Div. Inst. i. e. 21, 29, Paris). Herodotus, speaking of means used for allaying a storm, uses the words οὕτως ποιοῦντες, which may mean cutting the flesh, but more probably offering human sacrifices (Herod. vii. 191, ii. 110, with Schwucheweiner's note; see also Virg. Æn. ii. 116; Lucr. i. 83).

The prohibition, therefore, is directed against practices prevailing not among the Egyptians whom the Israelites were leaving, but among the Syrians, to whom they were about to become neighbors (Selden, de Dis Syq. Syr. ii. e. 1). Practices of self-mutilation, whether propitiatory or simply funerary, i. e. expressive of highly excited feeling, are mentioned of the modern Persians on
the occasion of the celebration of the death of He- 
seen, at which a man is paraded in the character of 
the saint, with points of lances thrust into his 
head. At funerals also in general the women tear 
their hair and faces. The Cypriots express grief by tearing the flesh of their foreheads, arms, 
and breasts. The Mexicans and Peruvians offered 
human sacrifices both at funerals and festivals. 
The Goans of India, a class of Brahminical friars, 
endeavor in some cases to extort alms by 
gashing their limbs with knives. Among the 
tive negro African tribes also the practice appears 
to prevail of offering human sacrifices at the death 
of chieftains. Tytler, vi. 490; ix. 492; Olearius, 
Travels, p. 237; Lames, Med, Egypt ii. 
59; Prescott, Mexico, i. 53, 63; Peru, i. 56; Ephi- 
plinestone, Hist. of India, i. 116; Strab. xv. p. 711 
i£: Niederh, Voyages, ii. 54; Livingston, Travels 
pi. 318, 588; Col. Ch. Chron. No. cxxxi. 179; Mu-
rorati, Anecd. iv. 99, 100.

But there is another usage contemplated more 
remotely by the prohibition, namely, that of printing 
marks (στίγματα), tattooing, to indicate alle-
giances, sacrifices, and other things. The Cyprians 
also shave tattooed marks to indicate allegi-
ience or adscription. This is evidently alluded to 
in the Revelation of St. John (xiii. 16, xix. xvi. 
5), χρυσάμενοι ἐπί τῆς χεριος τῆς δεξιᾶς καὶ 
ἐπί τῶν μετασθών, and, though in a 
contrary direction, by Ezekiel (ix. 4), by St. Paul (Gal. vi. 
17), in the Revelation (xvii. 3), and perhaps by 
Jeremiah (xxxii. 5) and Zechariah (xii. 6). Lukan, 
writing of the priests of the Syrian deity, says 
ποιεῖται πάντες, οἱ μὲν εἰς καρποὺς, οἱ δὲ εἰς 
αὐξήμας, καὶ αὐτὸ τὰς ἄπαντας ἐπιγραφάς 
στιγματοφορέωσι (de Deo Sng. c. 58.) ii. p. 684.

A tradition, mentioned by Jerome, was current 
among the Jews, that King Jehoiakim bore on 
his body marks of this kind which were discovered 
after his death (Spencer, De Leg. Hebr. ii. xx. 
410). Philo, quoted by Spencer, describes the 
marks of tattooing impressed on those who submit-
ted to the process in their besotted love for idol-
worship, as being made by branding (εἰσθήμερος 
πε-
πυρωδέων, Philo, de Monarch. i. 819; Spencer. p. 
416). The Arabs, both men and women, are in 
the habit of tattooing their faces, and other parts of 
the body: and the members of Brahminical sects 
in India are distinguished by marks on the fore-
head, often erroneously supposed by Europeans to 
be marks of caste (Niederh, Descr. de l'Inde. p. 
58; Voyages, i. 242; Wellesley, Arabia ii. 296, 
445; Olearius, Travels, p. 299; Elphinston, India, 
i. 195).

II. W. P.

CY'AMON (Koumou): (Chamon), a place 
named only in Jud. vii. 3, as lying in the plain 
(Qallq, A. V. "valley") over against (ἀπεναντία 
Esdreron. If by "Esdreron" we may understand 
Aderes, the "Esdreron" may be understood 
the same with "Esdreron" in the Onomasticon. 
It is mentioned by them with CY'AMON, the burial-place 
of Jair the Gileadite. Robinson suggests its identity 
with the "Esdreron" in the Gilead. 

This last remark may be misunderstood. Dr. 
Robinson ascribes the suggestion that Jokneam 
be Tell El-Eldad (iii. 114); but (see ii. 339, 
note) he regards Cyamon (Jud. vii. 3) as unknown, 
unless it be Faltach, on the east side of the plain 
of Esdraelon. Cyamon (Koumou, and Falch both 
mean a beam or pile of beams, and so may repre-
sent an earlier name of (Φαλέρος of that significa-
tion. Banister (Palastine, p. 134) identifies 
Cyamon with Falch. It was the central point of the 
battle of Kleber against the Turks in 1799, in 
which Bonaparte's opportunity from Abka 
saved the French from defeat.

II.

CYMBAL, CYMBALS (τραβεκής or 
τραβηκία), a percussive musical instrument, from 
τραβέω to tinkle (comp. his ears shall tingle, 
Revel. vi. 11), and a fish-pear, 
Cybelle, Cybèle. Two kinds of cymbals 
are mentioned in Ps. cl. 5, πλατύς, λεπίδος, "a loud 
cymbals," cymbala bene sceleata, or castagnaetites, 
and πλατής, λεπίδος, "high-sounding 
cymbals," cymbala jubilatoriums. The former consisted 
of four small plates of brass or of some other hard 
metal; two plates were attached to each hand of 
the performer, and were struck together to produce 
a loud noise. The latter consisted of two larger 
plates, one held in each hand, and struck together 
as an accompaniment to other instruments. Asayh, 
Heeman, and Jeduthun, the renowned conductors 
of the music of the sanctuary, employed the "loud 
cymbals" possibly to best time, and to give 
the signal to the choir when it was to take part in 
the sacred chant. Lewis says — but he does not sup-
port his statement by any authority — that "there 
was allowed but one cymbal to be in choir at once." 
The use of cymbals was not necessarily restricted to 
the worship of the Temple or to sacred occasions: 
they were employed for military purposes, as also 
by the Hebrew women as a musical accompaniment 
to their national dances. The "loud cymbals" 
are the same with πλατύς, λεπίδος, A. V. "cymbals," 
performed on by the band which accompanied 
David when he brought up the ark of God from 
Kiriath-jearim (1 Chr. xiii. 8).

Both kinds of cymbals are still common in the 
East in military music, and Niederh often refers to 
them in his travels. "Il y a chez les Orientaux," 
says Munk, "deux espèces: l'une se compose de 
deux petits morceaux de bois ou de fer creus 
or qu'on tire contre les doigts, et qui sont con-
vertis sous le nom de castagnettes; l'autre est com-
posée de deux demi-sphères creusés en métal."
Lampe has written a curious dissertation on ancient 
cymbals, and his work may be consulted with 
avantage by those who desire fuller information on 
the subject.

The cymbals used in modern orchestras and 
military bands, and which are called in Italian 
piatti, are two metal plates of the size and shape of 
saucers, one of which is fixed, and the other is 
held by the performer in his left hand. As has already 
been observed very closely the "high-sounding cymbals" of 
old, and they are used in a similar manner to mark the 
ritual, especially in music of a loud and grand
CYPRESS

character. They are generally played by the person who performs on the large side drum (also an instrument of pure percussion); and whilst he holds one cymbal in his left hand, he strikes it against the other which is fixed to the drum, his right hand remaining free to hold the drumstick, as the large drum is only struck on one side, and with one stick. In practice the drum and the cymbals are struck simultaneously, and an effect of percussion is thus produced which materially powers the mark.

The noun mettillth, ἱπποκάλαμος, found in Zechar. xiv. 20, is regarded by some critics as expressive of certain musical instruments known in the age of the second Temple, and probably introduced by the Israelites on their return from Babylon. The A. V. renders the word "belly," supposing it to be derived from ὀέκῳ. The most generally received opinion, however, is, that they were concave plates or plates of brass which the people of Palestine and Syria attached to horses by way of ornament. (See Mendelssohn's Preface to Book of Isaiah; Kimchi, Comment. in loc.: Lewis, Origins Hebrew, Lond. 1724, 176–7; Forkel, Gesch., Musik, 11th ed., Archologia, Amer. ed., cap. v. § 96, 2; Muñoz, Palestina, p. 456; Esdalius, Dict. of Music, i. 112.)

CYPRESS (ophys). tirēkh: ἱπποκάλαμος, Alex., Aq., and Theod.: ἱπποκάλαμος. The Hebrew word is found only in Is. xiv. 14, "He leweth him down cedars and taketh the tirēkh and the oak." We are quite unable to assign any definite rendering to this word. Besides the cypress, the "beech," the "holm-oak," and the "fir" have been proposed; but there is nothing in the etymology of the Hebrew name, or in the passage where it occurs, to guide us to the true intended. The word is derived from a root which means "to harden," a quality which obviously suits many kinds of trees. Celsius (Herb. ii. 269) believes the "ilex" or "holm-oak" is meant; but there is no reliable evidence to show that this tree is now found in Palestine. With respect to the chins of the cypress (Cupressus sempervirens), which, at present, at all events, is found cultivated only in the lower levels of Syria, it must be granted that they are unsupplied by my authority. Van de Velde says the tree is the Juniperus oxycedrus, which is also the cypress of Poecock; but neither Juniper nor cypress, as is asserted by Poecock, grow anywhere near the top of Lebanon. "The juniper," says Dr. Hooker, "is found at the height of 7000 feet, on Lebanon, the top of which is 10,600 feet or so." The true cypress is a native of the Taurus. The Hebrew word points to some tree with a hard grain, and this is all that can be positively said of it.

W. H.

CYPRIANS (Kyprioi Cyprioi). Inhabitants of the island of Cyprus (2 Mac. iv. 20). At the time being free from the control of the powerful Antiochus Epiphanes, they were under the dominion of Egypt, and were governed by a viceroy who was possessed of ample powers, and is called in the inscription Stratagous καὶ ναραγός καὶ ἀρχιερεὺς δικατὰ τῆς νῦν σιγανον (comp. Boeckh, Corp. Ins. No. 2024). Crates, one of these viceroys, was left by Sosistratus in command of the cacolet, or aeropolls, of Jerusalem while he was summoned before the king. W. A. W.

* Barnabas, who was Paul's associate in his first missionary journey, was a Cyprian by birth (Kyprioi τοῦ γενείου, Acts iv. 30), for which the A. V. substitutes "of the country of Cyprus." This origin of Barnabas appears to have been the providential reason why the first missionaries went to the particular fields of labor first visited by them (Cyprus and the southern parts of Asia Minor), where Christianity won its earliest signal victories among the heathen.

II.

CYPRUS (Κύπρος). This island was in early times in close commercial connection with Phoenicia; and there is little doubt that it is referred to in such passages of the O. T. as Ez. xxvii. 6. [CHITTIM.] Josephus makes this identification in the most express terms (Xen. Anab. ii. 10, 1; 80 Epiphan. Haer. xxx. 23). Possibly Jews may have settled in Cyprus before the time of Alexander. Soon after his time they were numerous in the island, as is distinctly implied in 1 Mac. xv. 23. The first notice of it in the N. T. is in Acts iv. 36, where it is mentioned as the native place of Barnabas. In Acts xii. 19, 20, it appears prominently in connection with the earliest spreading of Christianity, first as receiving an impulse among its Jewish population from the persecution which drove the disciples from Jerusalem, at the death of Stephen, and then as furnishing disciples who preached the gospel to Gentiles at Antioch. Thus when Paul was sent with Barnabas from Antioch on his first missionary journey, Cyprus was the first scene of their labors (Acts xii. 19–25). Again when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 19). Another Christian of Cyprus, Mnason, called an old disciple," and therefore probably an early convert, is mentioned Acts xxii. 16. The other notices of the island are purely geographical. On St. Paul's return from the third missionary journey, they "sighted" Cyprus, and sailed to the southward of it on the voyage from Paphos to Tyre (ib. 3). At the commencement of the voyage to Rome, they sailed to the northward of it, on leaving Sidon, in order to be under the lee of the land (Acts xxvii. 4), and also in order to obtain the advantage of the current, which sets northerly along the coast of Phoenicia, and westerly with considerable force along Cilicia.

All the notices of Cyprus contained in ancient writers are diligently collected in the great work of Mauus (Maurii Opera, vol. iii. Flor. 1744). Situated in the extreme eastern corner of the Mediterranean, with the range of Lebanon on the east, and that of Taurus on the north, distinctively visible, it never became a thoroughly Greek island. Its religious rites were half Oriental (Paphos), and its political history has almost always been associated with Asia and Africa. Cyprus was a rich and productive island. Its fruits and flowers were famous. The mountains also produced metals, especially copper. This circumstance gives us an interesting link between this island and Judea. The copper mines were at one time farmed to Herod the Great (Joseph. Ant. xvi. 4, § 5), and there is a Cyprian inscription (Beekh, No. 2628) which seems to refer to one of the Herods. The history of Cyprus is briefly as follows: it was at one time a subject of the Egyptian king Amasis (Herod. ii. 182) it became part of the Persian empire (ib. iii. 19, 91), and furnished ships against Greece in
the expedition of Xerxes (ib. vii. 90). For a time it was subject to Greek influence, but again became tributary to Persia. After the battle of Issus, it joined Alexander, and after his death fell to the share of Ptolemy. In a desperate sea-fight off Salamis at the east end of Cyprus (n. c. 366) the victory was won by Demetrius Poliorcetes,—but the island was recovered by his rival, and afterwards it remained in the power of the Ptolemies, and was regarded as one of their most cherished possessions. It became a Roman province (n. c. 58) under circumstances discorable to Rome.

Copper Coin of Cyprus, under Emp. Claudius. 96 ce. (CILXI, CESAUR). Head of Emp. to left.

Rev. EINOKIMXXEIPOKAYVYANATPHIIA.

At first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province (Dion Cass. lii. 12). From this passage and from Strabo (xiv. 683) it has been supposed by some, as by Ramsay, that St. Luke used the word ἀποκάμπος (provences), because the island was still connected with Cilicia: by others, as by Grolier and Hammond, that the evangelist employs the word in a loose and general manner. But, in fact, Dion Cassius himself distinctly tells us (ib. and lv. 4) that the emperor afterwards made this island a senatorial province: so that St. Luke’s language is in the strictest sense correct. Further confirmation is supplied by coins and inscriptions, which mention other provences of Cyprus not very remote from the time of St. Luke’s epistles. The governor appears to have resided at Paphos on the west of the island. Under the Roman empire a road connected the two towns of Paphos and Salamis, as appears from the Pent. Table. One of the most remarkable events in this part of the history of Cyprus was a terrible insurrection of the Jews in the reign of Trajan, which led to a massacre, first of the Greek inhabitants, and then of the insurgents themselves (Milman, Hist. of Jews, iii. 111, 112). In the 9th century Cyprus fell into the power of the Saracens. In the 12th it was in the hands of the Crusaders, under our king Richard I. Materials for the description of Cyprus are supplied by Ptoecke and Von Hammer. But see especially Engel’s Kypros, Berlin, 1834, and Ross’s Reich und Kos, Milet, Darmstadt, 1835, on the island of Cyprus, Halle, 1832.

A.

CYRENE (Kypreio), the principal city of that part of northern Africa, which was anciently called Cyrenaica, and also (from its five chief cities) Pentapolis. This district was that wide projecting portion of the coast (corresponding to the modern Tripoli), which was separated from the territory of Carthage on the one hand, and that of Egypt on the other. Its surface is a table-land descending by terraces to the sea; and it was celebrated for its climate and fertility. It is observable that the expression used in Acts ii. 10, "the parts of Libya and Cyrene," exactly corresponds with a phrase used by Dion Cassius (Αἰγυπτική πρωτάρχησ αὐτοῦ ἐν τῷ λαῷ Πτολεμαίου, liv. 12), and also with the language of Josephus (folio Κυπριανή Αἰγύπτιος: Ant. xvi. 6, § 1). [LIBYA.]

The points to be noticed in reference to Cyrene as connected with the N. T. are these,—that, though on the African coast, it was a Greek city; that the Jews were settled there in large numbers; and that under the Romans it was politically connected with Crete, from which it is separated by so great a space of sea. The Greek colonization of this part of Africa under Battus began as early as n. c. 651; and it became celebrated not only for its commerce, but for its physicians, philosophers, and poets. After the death of Alexander the Great, it became a dependency of Egypt. It is in this period that we find the Jews established there with great privileges. Ptolemy, the son of Lagus, introduced them, because he thought they would contribute to the security of the place (Joseph. c. Apion. ii. 4): they became a prominent and influential class of the community (Ant. lv. 7, § 21) and they afterwards received much consideration from the Romans (xvi. 6, § 5). See 1 Marc. xv. 23. We learn from Josephus (Lii. 70) that soon after the Jewish war they rose against the Roman power. Another insurrection in the reign of Trajan led to great disasters, and to the beginning of the decay which was completed under the Mohammedans. It was in the year n. c. 75 that the territory of Cyrene (having previously been left to the Romans as a legacy by Apion, son of Ptolemy Philometor) was reduced to the form of a province. On the conquest of Crete (n. c. 67) the two were united in one province, and together frequently called Crete-Cyrene. Under Constantine they were again separated. [CRETE.]
CYRENIUS

by Augustus (Dion Cass. ii. 23), the one should hold an imperial province for less than three or more than five years, Varus cannot have been governor of Syria during the twelve years from u. c. 6 to A. D. 6. Who then were the missing governors? One of them has been found, L. Volumnius Saturninus, whose name occurs as legatus Syriae on a coin of Antioch, A. D. 4. Zumpt will not fill the whole time, and one or two governors must be supplied between Varnus, ending 4 u. c., and Volumnius, 4 or 5 a. d.

Just in that interval falls the census, of which it is said in Luke ii. 2, that it πρῶτον ἐγένετο η ἐγενετος τῆς Ζωρίας Κυρίου. Could Quirinus have been governor at any such time? From Jan. to Aug. u. c. 12 he was consul. Soon after he triumphed over the Hiconades (Μεκ εξαγγελτις ιερικειαι ομοναμενειας εκτελεσσα τινων ισιων αυτου.)

We have come to the conclusion that a C. Quirinus, governor of Syria, must have been present in Syria at the time of the census. This conclusion is based on the hypothesis that Zumpt, who bases his account on the tradition of Dio Cass. liv. 4, is right, and that it was Quirinus who was in Syria when the census was held. The evidence for this conclusion is: (1) that the name Quirinus is found on a coin of Antioch, and that it is mentioned in Dio Cass. ii. 4; (2) that the census was held in a year when Quirinus was governor of Syria; (3) that the tradition of Dio Cass. liv. 4 is correct.

The first point is clear. The second is proved by the fact that Quirinus was governor of Syria in the year 4 a. d., in which year the census was held. The third point is based on the hypothesis that the census was held in the year of the death of Augustus, which is the year in which Quirinus was governor of Syria.

We have therefore a new and important piece of evidence for the history of the reign of Augustus in Syria, and we are thus able to date the events of the reign with more precision than has been possible before.

* CYRENIANS (Kυρηνας) (Cyrenses), Mark xv. 21; Luke xxiii. 26; Acts vi. 9, a native or inhabitant of CYRENE, which see. The adjective also occurs in the original, 2 Macc. ii. 29; Matt. xxvii. 52; Acts xi. 26, xiii. 1. A. C. H. S. H. U. G.

CYRENIUS (Kυρηνας) (Cyrenses), Luke ii. 2, the literal English rendering in the A. V. of the Greek name, which is itself the Greek form of the Roman name QUIRINUS (not Quirinus; see Meyer, in loc.), etc.; see P. Tiber. 49; Tac. Ann. ii. 30, iii. 48. The full name is Publius Juliucus Quirinus. He was consul A. u. c. 742, b. c. 12, and made governor of Syria after the position of Archelaus in A. d. 6. (Joseph. Ant. xvii. 13, § 5.) He was sent to make an enrollment of property in Syria, and made accordingly, both there and in Judea, a census or a ἀπογραφή (Joseph. l. c., and xvii. i., § 1). But this census seems to be Luke (li. 2) to be identical with the other one which took place at the time of the birth of Christ, when Quentius Saturninus was governor of Syria. Hence has arisen a considerable difficulty, which has been variously solved, either by supposing some corruption in the text of St. Luke (a supposition which is not comtenanced by any external critical evidence), or by giving some unusual sense to his words, ἀνήρ ἡ ἀπογραφή πρῶτη ἐγένετο. The name of Quirinus is known in some of the accounts from Cilicia, Uscher, Petavius, Storr, Tholuck, Wieseler, who would render this, was made before Q. was governor of Syria, by a usage otherwise confined to St. John among the Evangelists. But this is very improbable, both in itself and because thus there would have been no good ground for inserting the notice.

An unexpected light has been thrown on the matter lately, which renders it only necessary to refer to summaries and criticisms of the various hypotheses, as that which in Winer, art. Quirinus.

A. W. Zumpt, of Berlin, the nephew of the distinguished grammarian, in his Commentatio de Syria Romanae pro inc. a Ceseare Augusto ad T. Vespasianum, has shown it to be probable that Quirinus was twice governor of Syria. This he supports by the following considerations:—

In b c. 7, Sentius Saturninus succeeded M. Ti- tus in the province of Syria, and governed it three years. He was succeeded by T. Quintillus Varrus (Joseph. Ant. xvii. 3, § 2), who, as it appears, remained governor up to the end of b c. 4. Thenceforward we lose sight of him till he is appointed to the command in Germany, in which he lost his life in 1 A. D. 7. We also lose sight of the governors of Syria till the appointment of P. Sulpicius Quir- inus, in b c. 6. Now from the maxim acted on

* Was Quirinus or Quirinius — not Quirinus, as many call him — governor or legatus Augusti pro praetore in Syria more than once? A. W. Zumpt, in his Comment. epigraph. ii. 71-150 (Berlin, 1854), has maintained this, and his conclusions have been accepted by many. Quirinus, consul in the year
Afterwards the head of an army in Africa—perhaps as provincial of the province of Africa in 7 B. C. = 747 C. E. (comp. Florus, iv. 12)—appears in the East sometime between 2 B. C. = 752 C. E. and 2 A. D. Here he won a triumph over a people in Cilicia Trachea, was appointed "rector" of C. Cesar, when he was sent to Vithula, and during his stay at Rhodes (Tac. Ann. iii. 48; comp. Strabo, xii. p. 854 a.). C. Cesar went to the East late in 2, or early in 1 B. C., and Tiberrus returned to Rome in 2 A. D. As Quirinius needed an army in Cilicia, he must have been a governor of a province, or alegate of the emperor's legate. Zumpt shows that probably at this time Cilicia, although popularly called a province, was under the jurisdiction of the legate in Syria, who had with him a large army, while the other provincial governors around Cilicia had no army. With Syria, then, Quirinius is at this time brought into connection, and, as Zumpt endeavors to make out on probable grounds, in the capacity of governor of that province. This could have happened only after the departure of Quintilius Varus from his Syrian administration. Varus followed C. Sentius Saturnus, is known by coins which have been given in 4 B. C. = in 4 A. D., and left his post after the death of Herod the Great in 4 B. C. (Tac. Hist. v. 29; Joseph. Ant. xvii. 10). It happens that there is here a gap in our list of governors of Syria until 4 A. D., when L. Volumnius Saturnus, as appears from coins, held the office. Quirinius is assigned by Zumpt on probable grounds to the earlier part of this interval,—to the years between 4 and 1 B. C.

It is far from being improbable that this Roman filled the office of governor of Syria twice—once at this time, and once from 6 A. D. onward, in the times of the "taxing" mentioned Acts v. 37. The ἀναποσύνασθη in Luke ii. 2 might thus be called "the first" in opposition to the second or more noted one, which Luke had in his mind without mentioning it. It may be added that a Latin inscription speaks of some one as twice governor of Syria in the first century. The name is lost. Mommsen refers it to our Quirinius. Zumpt to Sentius Saturnus, his second predecessor. But these combinations fail to remove the difficulties which Luke ii. 1-2 presents to us; they rather bring Matthew and Luke into irreconcilable variance. For our Lord was born some time before Herod's death, and Quirinius cannot have commanded in Syria until some months after Herod's death.

Something, however, is gained from the known fact that Quirinius was in the East and in active service about the time of our Saviour's birth. Νησσος of Syria he could not, it is certain, then have been. But if employed there as a special commissioner, he may well at that time have subdued the mountainers of Cilicia, and superintended the census in Syria. Popularly he might be called ἀναποσύνασθη, while acting in such a capacity; but the ἀναποσύνασθη itself was not like the one which the same Quirinius—sent there, we may suppose, on account of his previous experience—undertook in 6 A. D., which was a valuation of property in Judea with a view to the taxation of the Jews, now no longer under a king; while the prior one could not have gone beyond a numbering of the population.

T. D. W.

CYRIA

CYRUS Κύρος, or Κυρίος, i.e. Cosheh: Κύρος: probably from the root contained in the Παρακαλούμενος, the sun; Sans. sūr: so Phut. Artax. c. 1, cf. .Gen. Thes. v. s.v., the founder of the Persian empire (Herod. i. 137; vii. 207, 223, 234), was according to the common legend (Herod. i. 107; Xen. Cyrop. i. 2. 1), the son of Mandane, the daughter of Astyages, the last king of Media, and Cambises, a Persian of the royal family of the Achaeænae. In consequence of a dream, Astyages, it is said, designed the death of his infant grandson, but the child was spared by those whom he charged with the commission of the crime (Herod. i. 106), and Cyrus grew up in obscurity under the name of Agathocles (Strab. xv. p. 729). His real parentage was discovered by the imperious spirit which he displayed while yet a boy (Herod. i. 114), and when he grew up to manhood his courage and genius placed him at the head of the Persians. The tyranny of Astyages had at that time amalgamated a large fiction of the Medes, and Cyrus headed a revolt which ended in the defeat and capture of Astyages, the last king of Media (Marty. Ast. Strab. xv. p. 730). After consolidating the empire which he thus gained, Cyrus entered on that career of conquest which has made him the hero of the East. In B. C. 546 (?) he defeated Croesus, and the kingdom of Lydia was the prize of his success. While his general Harpagus was engaged in completing the reduction of Asia Minor, Cyrus turned his arms against the Babylonians. Babylon fell before his army, and the ancient dominions of Assyria were added to his empire (B.C. 538). The conquest of Babylon opened the way for greater designs. It is probable that Cyrus planned an invasion of Egypt; and there are traces of campaigns in Central Asia, in which he appears to have attempted to extend his power to the Indus (Ctes. Pers. v. 54 ff.). Afterwards he attacked the Massagetae, and according to Herodotus (i. 214; cf. Joseph. Ant. xi. 2. 1) he fell in a battle against them. B.C. 529 (Clinton, F. B. ii. 301 ff.). His tomb is still shown at Pasargade (Art. Exp. Al. vi. 29), the scene of his first decisive victory (Rawlinson, Herod. i. 531).

It is impossible to insist upon the details of the outline thus sketched. In the time of Herodotus Cyrus was already regarded as the national hero of Persia, and his history had received various popular embellishments (Herod. i. 155; cf. iii. 18. 190; Xen. Cyrop. i. 2. 1). In the next century Xenophon chose him as the hero of his romance, and fact and fiction became thereforthe hopeless confused in classical writers. But in the absence of authentic details of his actions, the empire which he left is the best record of his power and plans. Like an oriental Alexander he aimed at universal dominion; and the influence of Persia, like that of Greece, survived the dynasty from which it sprang. In every aspect the reign of Cyrus marks an epoch in universal history. The fall of Sardis and Babylon was the starting-point of European life; and it is a singular coincidence that the beginning of Greco-Roman art and philosophy, and the foundation of the Roman constitution synchronize with the triumph of the Aray race in the East (cf. Niebuhr Græk. Ant. p. 232).

A. In an inscription he is described as "Son of Cambyses, the powerful king" (Col. Rawlinson, on Herod. i. 107).
But while the position which Cyrus occupied with regard to the nations of the world is strikingly significant, the personal relations to God's people, with which he is invested in the Scriptures, are full of a more peculiar interest. a

Hitherto the great kings, with whom the Jews had been brought into contact, had been open oppressors or seductive allies: but Cyrus was a generous liberator and a just guardian of their rights. An inspired prophet (Is. xliv. 28) recognized in him "a shepherd" of the Lord, an "anointed" king (Is. xlv. 1; ἐνδυτής, Messiah: τὸ ἄνωτέρω μας: Christos mou); and the title seemed to later writers to invest him with the dignity of being in some sense a type of Christ himself (Hieron. Comm. in Is. xlv. 1). His successes are connected in the prophecy with their religious issue; and if that appear to be a partial view of history which represents the restoration of a poor remnant of captive Israelites to their own land as the final cause of his victories (Is. xlv. 28-xlv. 4), it may be answered that the permanent effects which Persia has brought upon the world can be better traced through the Jewish people than through any other channel. The laws, the literature, the religion, the very ruins of the material grandeur of Persia have passed away; and still it is possible to distinguish the effects which they produced in preparing the Jews for the fulfillment of their last mission. In this respect also the parallel, which has been already hinted, holds good. Cyrus stands out clearly as the representative of the East, as Alexander afterwards of the West. The one led to the development of the idea of order, and the other to that of independence. Ecclesiastically the first crisis was signaled by the consolidation of a Church; the second by the distinction of sects. The one found its outward embodiment in "the great Synagogue;" the other in the dynasty of the Asm∞an∞ez.

The edict of Cyrus for the rebuilding of the Temple (2 Chr. xxxvi. 22-23; Ezr. i. 1-4, iii. 7, iv. 3, v. 13, 17, vi. 3) was in fact the beginning of Judaism: and the great changes by which the nation was transformed into a church are clearly marked.

1. The lesson of the kingdom was completed by the Captivity. The sway of a temporal prince was at length felt to be at best only a faint image of that Messianic kingdom to which the prophets pointed. The royal power had led to apostasy in Israel, and to idolatry in Judah; and men looked for some other outward form in which the law might be visibly realized. Dependence on Persia excluded the hope of absolute political freedom and offered a sure guarantee for the liberty of religious organization.

2. The Captivity which was the punishment of idolatry was also the limit of that sin. Thenceforth the Jews apprehended fully the spiritual nature of their faith, and held it fast through persecution. At the same time wider views were opened to them of the unseen world. The powers of good and evil were recognized in their action in the material world, and in this way some preparation was made for the crowning doctrine of Christianity.

3. The organization of the outward Church was connected with the purifying of doctrine, and served as the form in which the truth might be realized by the mass. Prayer — public and private — assumed a new importance. The prophetic work came to an end. The Scriptures were collected. The "law was fenced in" by an oral tradition. Synagogues were erected, and schools formed. Scribes shared the respect of priests, if they did not supersede them in popular regard.

a It seems unnecessary to enter into the question of the identity of the Cyrus of Scripture and profuse history, though the opinion of the Duke of Manchester that the Cyrus of Herodotus is the Nebuchadnes-sar of the Bible has found advocates in Germany (Pressel, s. v. Cyrus in Herzog's Encyclopedia). It is impossible that the great conqueror of Isaiah can be merely a satrap of Xerxes.
4. Above all, the bond by which "the people of God" was held together was at length felt to be religious and not local, nor even primarily national. The Jews were incorporated in different nations, and still looked to Jerusalem as the centre of direct faith. The boundaries of Canaan were passed; and the beginnings of a spiritual dispensation were already made when the "Dispersion" was established among the kingdoms of the earth (comp. Niebuhr's Gesch. Assaros and Betholah, p. 224 ff.; Ewald, Gesch. d. Volks Israel, iv. 60 ff.; Jost, Gesch. d. Judenschaft, ii. 13 ff.; [DISPERSION OF THE JEWS.]

D. 

DABAREH (דבֵּהַ֑י) [posture]: דבֵּבָּה; Alex. דבֵּבָּה; Diboreth, Josh. xxii. 28. This name is incorrectly spelt in the A. V., and should be DABRETH; which see.

* The A. V. inherits the orthography from the older English versions. The pronunciation of the word without Mether, as usually read in 1 Chr. vi. 57 (A. V. 72), would be Diboreth.

DABBASHETH (דבֵּשֶּת) [Bat-dibasa]: Alex. דבֵּשֶּבַּה; Diboreath, a town on the boundary of Zebulun (Josh. xix. 11 only).

* The name is properly Dabbasheth (דבֵּשֶּת), the vowel being changed as above by the pause. It signifies a hump (Gesen, Fürst) as of a camel (comp. Is. xxx. 6), and points therefore to a hill or town on a hill. Josephus says that Guemar was so called for a similar reason (B. J. iv. 1, § 1). Hence Knobel (Gesen, p. 458) conjectures among other possibilities that Dabbasheth may be the present Ichmeh, on one of the hills which skirt the plain of Esdraelon (Rob. Bibb. Res. ii. 344, 28 ed.) between Sebaste and Kairienon. But the position above, without an affinity in the names, would not bear out that conclusion.

DABERATH (with the article in Josh. דָבֵּרָה [the posture, fem. of דַּבָּר]; דָבָּרָה [Vat. בַּי]; Alex. דבֵּרָה; Diboreth, Josh. vii. 17) by double copying, דָבֵּרָה [Vat. הֵר] and דָבֵּרָה [Diboreth], a town on the boundary of Zebulun (Josh. xix. 12) named as next to Chisbeoth-Tabor. In the list of Levitical cities, however, in 1 Chr. vii. 72, and in Josh. xxi. 28 (where the name in the original is the same, though in the A. V. of Dabirah, "it is stated as belonging to Issachar.

DABEREH. It is no doubt the Dabirath (דָבְרַת) mentioned by Josephus (B. J. ii. 21, § 3). Under the name of Diborath it still lies at the western foot of Tabor (Rob. Bibb. Res. ii. 350). A tradition mentioned by Van de Velde (ii. 374) makes this the scene of the miracle on the lunatic child performed by our Lord after his descent from the Mount of Transfiguration (Matt. xviii. 14). But this event probably took place farther G.

* For the scene of the Transfiguration, see HILICON and TABOR. Dabirath could belong to Isaacar and yet be on the border of Zebulun, because the two tribes had a conterminous boundary Diborath lies in the way of the traveller in going from Nazareth to Tabor. Like other Galilean villages, it illustrates still ancient Scripture customs. The writer, passing there, observed booths made of the branches of trees in front of some of the houses, occupied as an apportionment of the house. Allusion is made to dwelling on the house-top in some such way as this in Prov. xvi. 9. In this place, says Mr. Bartlett (Footsteps of our Lord and his Apostles, p. 139, 3d ed.) "we established our bivouac at night-fall upon the roof of a house, amidst heaps of corn just gathered from the surrounding plain. It is a custom that reaches back to the age of the Cananites. Rahab who dwelt at Jericho took the two Hebrew spies and "brought them up to the roof of the house and hid them with the stalks of the flax which she had laid in order upon the roof" (Josh. ii. 6). The flat roof furnishes a convenient place for storing such products, because, exposed there to the sun, they ripen or become dry more speedily, and are also more secure from pilage. [Horae.] One of the remoter branches of the Dagon has its source near Diborath (Rob. Phys. Gogur, p. 188, 2d ed.).

DABBRIA, one of the five swift seraphs who recorded the visions of Esdras (2 Esdr. xiv. 24; comp. 37, 42).

DACOTH (דָקָו; Alex. דָקָו; [Akk. דָקַו] Achara), 1 Esdr. v. 28. [Acharath.]

DADDEUS, or SADDUS (1 Esdr. viii. 35, 46), a name which answers to the Greek Δάδας [Vat. Δαδάς, Δάδαος], or Δαδάος [Alex. Aeth. ΔαΔAς, ΔαΔAος; Leodhoes], which is itself a corruption of Ido (Ex. xx. 17), arising out of the preceding word יד (Ido).

* DAGGER. [Arms, l. 1.]

DAGON (דַּגּוֹן, דַּגּוֹו, a diminutive of דַּגּ, a fish, used in a sense of endearment: cf. Gesen. Thes. v. c.), apparently the masculine (1 Sam. v. 3, 4; Nanchon, p. 28; Movers, Thes. c. 144) correlative of Atargatis (Atargatias), was the national god of the Philistines. The most famous temples of Dagon were at Gaza (Judg. xvi. 21-30) and Ashdod (1 Sam. v. 5, 6; 1 Chr. x. 10). The latter temple was destroyed by Jonathan in the Macedonian wars (1 Macc. v. 83, 84, xi. 4; Joseph. Ant. xiii. 4, § 3). Traces of the worship of Dagon likewise appear in the names Capheus-Dagon (near Ammonia), and Beth-Dagon in Judah (Josh. xxv. 41) and Asher (Josh. xix. 27). [BETH-DAGON.] Dagon was represented with the face and hands of a man and the tail of a fish (1 Sam. v. 4).

In the Babylonian mythology the name Dagon, Oilamon (אילא- VMware), is applied to a sea monster. "He says Mr. Van Dyck, one of the translators of the modern Arabic Bible, "against consider the Biblical Diborath, in point of etymology as well as position."
DAMARIS

The sixth son of Elyoenai, a descendant of the royal family of Judah (1 Chr. iii. 24).

DALMANUTHA (Δαλμανουθά). In Matt. xv. 29 it is said that Jesus "came into the borders of Magdala," while in Mark viii. 10 we read that he "came into the regions (εἰς τὰ μέρη) of Dalmanutha." From this we may conclude that Dalmanutha was a town on the west side of the Sea of Galilee, near Magdala. The latter stood close upon the shore, at the southern end of the little plain of Gennesaret. [MAGDALA.] Immediately south of it a precipitous hill juts out into the sea. Beyond this, about a mile from Magdala, a narrow glen breaks down from the west. At its mouth are some cultivated fields and gardens, amid which, just by the beach, are several copious fountains, surrounded by heavy ancient walls, and the ruins of a village. The place is called "Ain-al-Bârieh, "the cold Fountain." Here in all probability is the site of the long lost Dalmanutha. J. L. P.

* Mr. Tristram (Land of Israel, p. 429, 2d ed.) would also identify Dalmanutha with "Ain-al-Bârieh. Dr. Thomson (Land and Book, ii. 69) slightly favors the idea that Dalmanutha may be the present Dalhamia or Dalbamia on the Jarub which flows into the Jordan a little south of the lake of Galilee. But the manifest parallelism between Mark viii. 10 and Matt. xv. 29 (where there can be no doubt about the position of Magdala) requires that it should be found on the west side of the lake and not on the east. It may be that Mark, with his characteristic precision (Westcott, Introduction to the Study of the Gospels, p. 366, Amer. ed.), mentions the more exact place, and Matthew the one near which the Saviour disembarked. The two points on the coast are so near each other that it would be perfectly natural for the writers to adopt this twofold designation. Whether the Evangelists agree or differ in cases like this the critics of Baur's school find fault with them; if they agree they merely copy from each other, and if, as here, Matthew writes Magdala but Mark Dalmanutha, it is because Mark wished to show his independence.

DALTANIA (Δαλτάνια), a mountainous district on the eastern coast of the Adriatic Sea, extending from the river Naro in the S. to the Savus in the N. It formed a portion of the Roman province of Illyricum, subsequently to Tiberius's expedition, A.D. 9. St. Paul sent Titus there (2 Tim. iv. 10); he himself had preached the Gospel in its immediate neighborhood (Rom. xv. 19), for the boundaries of Illyricum and Dalmatia were not well defined, and the two names were, at the time St. Paul wrote, almost identical. [ILLYRICUM.]

W. L. B.

DAL'PHON (Dalphon) [prob. Persian]; Δαλφων, some MSS. (Δαλφων); Daphon, the second of the ten sons of Haman; killed by the Jews on the 13th of Adar (Esth. ix. 7).

DAM'ARIUS (Δαμαρίας) [Δαμαρίας], an Athenian woman converted to Christianity by St. Paul's preaching (Acts xvii. 34). Chrysostom (de Sacerdotio, iv. 7) and others held her to have been the wife of Dionysius the Areopagite, but apparently for no other reason than that she is mentioned together with him in that passage. Grotius and Henstenburgius think the name should be Δαμαρίας, which is frequently found as a woman's name; but

Fish-god. From Nimroud. (Layard.)

Various kinds of fish were, as is well known, objects of general worship among the Egyptians (Herod. ii. 72; Strab. xxvii. 812).

DAISAN [2 syl.] (Δαίσαν; Alex. Δείσαν; Deieum), 1 Padd. v. 31. Rezin; by the commonly repeated change of R, 7, to D, 7.

DALA'TAH [3 syl.] (Δαλατάθ [Jehovah delic-
the permutation of α and ρ was not uncommon both in pronunciation and writing. We have ἄγανος and καλίσσας, νερείς and νεράφρος, βοήκοις and αἰγυπτοῖς, from the obsolete κάρος or κάλξ, εὐνο, σώο (Lobeck on Phrynius, p. 652).

* If Damaris had been the wife of Dionysius, she would properly have been called ἡ γυνὴ αὐτοῦ (Acts v. 1) or at least ἡ γυνὴ (Acts xxiv. 24). She must have had some personal or social distinction, to cause her to be thus singled out by name from the others.

* DAMASCENES' (Δαμασκηνοί: Damasceni), inhabitants of Damascus (2 Cor. xi. 32). It repeats δαμασκηνοί just before, but is not altogether pleonastic. The city which the Edomarch guarded was that of the Damascenes, while he himself was an Arabian.

** DAMASCUS (דמשק) [also דמשק, دماسك],

2 K. xvi. 10, and דַּמָּשָׁק in 1 and 2 Chr.: activity, industry, as being a seat of traffic, (Ges.) Δαμασκός: (Damascus) is one of the most ancient, and has at all times been one of the most important, of the cities of Syria. It is situated in a plain of vast size and of extreme fertility, which lies east of the great chain of Anti-Libanus, on the edge of the desert. This fertile plain, which is nearly circular, and about 30 miles in diameter, is due to the river Barada, which is probably the “Alana” of Scripture. This stream, rising high up on the western flank of Anti-Libanus, forces its way through the chain, running for some time among the mountains, till suddenly it bursts through a narrow cleft upon the open country east of the hills, and diffuses fertility far and wide.

[Alana]: “from the edge of the mountain range,” says a modern traveller, “you look down on the plain of Damascus. It is here seen in its widest and fullest perfection, with the visible expla-

nation of the whole secret of its great and enduring charm, that which it must have had when it was the solitary seat of civilization in Syria, and which it will have as long as the world lasts. The river is visible at the bottom, with its green banks, rising through the cleft; it bursts forth, and as if in a moment swells over the plain, through a circle of 30 miles, the same verdure which had hitherto been confined to its single channel. . . . Far and wide in front extends the level plain, its horizon bare, its lines of surrounding hills bare, all bare far away on the road to Palmyra and Bagdad. In the midst of this plain lies at your feet the vast lake or island of deep verdure, walnuts and apricots waving above, corn and grass below; and in the midst of this mass of foliage rises, striking out its white arms of streets hither and thither, and its white minarets above the trees which enshroud them, the city of Damascus. On the right towers the snowy height of Hermon, overlooking the whole scene, whose back are the sterile limestone mountains — so that you stand literally between the living and the dead” (Stanley, S. i P., p. 410). Another writer mentions among the produce of the plain in question “walnuts, pomegranates, figs, plums, apricots, citrons, pears, and apples” (Addison’s Dam. and Palmyr., ii. 92). Olive-trees are also a principal feature of the scene. Besides the main stream of the Barada, which runs directly through the town, supplying its public cisterns, baths, and fountains, a number of branches are given off to the right and to the left, which irrigate the meadows and corn fields, turning what would otherwise be a desert into a garden. The various streams

* There is a river of considerable size a few hours to the north of Damascus still called Ammuna. See C. V. A. V. A.
We were since the king's gifts" (Gen. xx. 2). We may gather from the name of this person, as well as from the statement of Josephus, which connects the city with the Arameans, that it was a Semitic settlement. According to a tradition preserved in the native writer, Nicaius, Abraham stayed for some time at Damascus, after leaving Charan and before entering the land of Canaan, where he was made king of the place. (Gen. xv. 2). This last circumstance would seem however to conflict with the notion of Abraham having been king, since in that case he would have dwelt in the capital. Nothing more is known of Damascus until the time of David, when the Syrians of Damascus came to submit to the king of Judah, with whom David was at war (2 Sam. vii. 5; 1 Chr. xvii. 5). On this occasion David "slew of the Syrians 22,000 men;" and in consequence of this victory became completely master of the whole territory, which he possessed with Israelites. David put garrisons in Syria of Damascus; and the Syrians became servants to David, and brought gifts" (2 Sam. viii. 9). Nicaius of Damascus said that the name of the king who reigned at this time was Hadad, and he relates the story of his dominion, not only over Damascus, but over "all Syria except Phenicia" (Fr. p. 31). He noticed his attack upon David; and related that many battles were fought between them, the last, wherein he suffered defeat, being "upon the Ephruthes." According to this writer Hadad the First was succeeded by a son who took the same name, as did his descendants for ten generations. But this is irreconcilable with Scripture. It appears that in the reign of Solomon, a certain Rezon, who had been a subject of Hadadezer, king of Zobah, and had escaped when David conquered Zobah, made himself master of Damascus and established his own rule there (1 K. xi. 21-25). He was "an adversary to Israel all the days of Solomon . . . . and he abhorred Israel, and reigned over Syria." Afterwards the family of Hadad appears to have recovered the throne, and a Benhadad, who is probably Hadad II. of Nicolaites, a grandson of the antagonist of David, is found in league with Baasha, king of Israel, against Asa (1 K. xv. 19; 2 Chr. xvi. 3), and afterwards in league with Asa against Baasha (1 K. xv. 21). He made a successful invasion of the Israelite territory in the reign of that king; and in the reign of Ovdi he not only captured a number of Israelite cities which he added to his own dominions, but even seems to have exercised a species of lordship over Samaria itself, in which he acquired the right of "making himself streets" (1 K. xx. 34; comp. Nic. Dam. Fr. p. 31, ad fin.). He was succeeded by his son, Hadad IV. (the Benhadad II. of Scripture, and the Ben- bri of the Assyrian inscriptions), who came at the head of thirty-six thousand horsemen, and had laid siege to Samaria (1 K. xx. 1). The attack was unsuccessful; and was followed by wars, in which victory declared itself unmistakably on the side of the Israelites; and at last Benhadad was taken prisoner, and forced to submit to a treaty whereby he gave up all that his father had gained, and submitted in turn to the suzerainty of Ahab (6 K. xx. 3-34). The terms of the treaty were inserted in the book of cuneiform tablets, five years afterward war broke out afresh, through the claim of Ahab to the city of Ramoth-gilead (ib. xxii. 29-34). This defeat and death of Ahab at that place (ib. 15-37) seems to have enabled the Syrians of Damascus to resume the offensive. Their bands ravaged the lands of Israel during the reign of Je- horam; and they even undertook at this time a second siege of Samaria, which was frustrated by a miraculous drought. In 836, however, we do not hear of any more attacks against the Israelite capital. The cuneiform inscriptions show that toward the close of his reign Benhadad was exposed to the assaults of a great conqueror, who was bent on extending the dominion of Assyria over Syria and Palestine. Three several attacks appear to have been made by this prince upon Ben- hadad, who, though he had the support of the Phenicians, the Hittites, and the Hamathites, was unable to offer any resistance to those of the Assyrain arms. His troops were worsted in several engagements, and in one of them he lost as many as 20,000 men. It may have been these circumstances which encouraged Hazael, the servant of Benhadad, to murder him, and seize the throne, which Elisha declared would certainly one day be his (2 K. viii. 15). He may have thought that the Syrians would willinglysequences in the re- in the accession of Hazael (about n. c. 881), he was in his turn attacked by the Assyrians who defeated him with great loss amid the fastnesses of Anti-Libanus. However, in his other wars he was more fortunate. He repulsed an attack on Ramoth-gilead, made by Alazah, king of Judah and Jehoram king of Israel in conjunction (2 K. viii. 28, 29); ravaged the whole Israelite territory east of Jordan (ib. x. 32, 33); besieged and took Gath (ib. xii. 17; comp. Am. vi. 2); threatened Jeru- salem, which only escaped by paying a heavy ransom (2 K. xii. 18); and established a species of suzerainty over Israel, which he maintained to the day of his death, and handed down to Benhadad, his son (2 K. xiii. 3-7, and 22). This prince in the earlier part of his reign had the same good fortune as his father. Like him, he "abhorred Is- rael," and added various cities of the Israelites to his own dominion (2 K. xiii. 25); but at last a de- liverer appeared (verse 5), and Josiah, the son of Jehoahaz, "best Hazzlaz thire, and recovered the cities of Israel" (verse 25). In the next reign still further advantages were gained by the Israelites. Jeroboam II. (about n. c. 836) is said to have recovered Damascus" (ib. xiv. 28), and though this may not mean that he captured the city, it at least implies that he obtained a certain influence over it. The mention of this circumstance is fol-
There was a long pause, during which we hear nothing of the Syrians, and must therefore conclude that their relations with the Israelites continued peaceful. When they reappear nearly a century later (about B.C. 742) it is as allies of Israel against Judah (2 K. xv. 37). We may suspect that the chief cause of the union now established between two powers which had been so long hostile, was the necessity of combining to resist the Assyrians, who at the time were steadily pursuing a policy of encroachment in this quarter. Scripture mentions the invasions of Pul (2 K. xv. 19; 1 Ch. v. 26), and Tiglath-Pileser (2 K. xx. 21; 1 Ch. v. 26); and there is reason to believe that almost every Assyrian monarch of the period made war in this direction. It seems to have been during a pause in the struggle that Rezin king of Damascus and Pekah king of Israel resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Is. vii. 1-6; 2 K. xvi. 5). Ahaz may have been already suspected of a friendly feeling towards Assyria, or the object may simply have been to consolidate a power capable of effectually opposing the arms of that country. In either case the attempt signally failed, and only brought about more rapidly the evil against which the two kings wished to guard. Jerusalem successfully maintained itself against the combined attack; but Elath, which had been formerly built by Achan, king of Judah, in territory regarded as Syrian (2 K. xiv. 22), having been taken and retained by Rezin (ib. xvi. 6), Ahaz was induced to throw himself into the arms of Tiglath-Pileser, to ask aid from him, and to accept voluntarily the position of an Assyrian feudatory (ib. xvi. 7, 8). The aid sought was given, with the important result that Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed, the inhabitants being carried captive into Assyria (ib. verse 9; comp. Is. vii. 8 and Am. i. 5).

It was long before Damascus recovered from this serious blow. As Isaiah and Amos had prophesied in the day of her prosperity, that Damascus should be "taken away from being a city and be a ruinous heap" (Is. xxi. 1), that "a fire shall be sent into the house of Hazael, which should devour the palaces of Benhadad" (Am. i. 4); so Jeremiah, writing shortly before (Jer. xi. 68), declares that Damascus is "wasted, spoiled and turned herself to thee, and fear hath seized on her; anguish and sorrows have taken her, as a woman in travail. How is the city of praise not left, the city of my joy?" (Jer. xlix. 24-5). We do not know at what time Damascus was rebuilt; but Strabo says that it was the most famous place in Syria during the Persian period (xvi. 2, § 19); and we find that before the battle of Issus it was selected by Pharaoh as the city to which he should send for better security the greater part of his treasures and valuables (Arr. T. ep. A. ii. 11). Shortly after the battle of Issus it was selected by Ptolemy to be the chief city of his province of Damascus; becoming however decidedly second to Antioch, which was raised up as a rival to it by the Seleucids. From the monarchs of this house it passed to the Romans, who became masters of it by conjunction with the Parthians and Mithridates (Jos. Chocr. i. 14; comp. Joseph. Ant. Jud. xiv. 2, § 3; and App. Bell. Mith. p. 214). At the time of the Gospel history, and of the Apostle Paul, it formed a part of the kingdom of Aretas (4 Cor. xi. 32), an Arabian prince, who, like the princes of the house of Herod, held his kingdom under the Romans (Joseph. Ant. Jud. xvi. 11, § 9). A little later it was reckoned to Decapolis (Plin. H. N. v. 16), after which it became a part of the province known as Phoenicia Lillasiana (Hieroc. Synecol. p. 717). It grew in magnificence under the Greek emperors, and when taken by the Mohammedan Arabs in A.D. 634, was one of the first cities of the eastern world. It is not necessary to trace its sub- sequent glories under the Alphids, the Saracens, and the Turks. It may be noticed here that there has scarcely been an interruption to its prosperity, and that it is still a city of 150,000 inhabitants.

Damascus has always been a great centre for trade. The difficulties and dangers of the Anti-Libanus made the line of traffic between Egypt and Upper Syria follow the circuitous route by Damascus rather than the direct one through Cilicia-Syria, while the trade of Tyre with Assyria and the East generally, passed naturally through Damascus on its way to Palmyra and the Euphrates. Ezekiel, speaking of Tyre, says, "Damascus was thy merchant in the multitude of thy wares, for the multitude of all riches; in the vine of Hellen, and white wool." It would appear from this that Damascus took manufactured goods from the Phoenicians, and supplied them in exchange with wool and wine. The former would be produced in abundance in Cilicia-Syria and the valleys of the Anti-Libanus range, while the latter seems to have been grown in the vicinity of Hellen, a village still famous for the produce of its vines, 10 or 12 miles from Damascus to the northwest (Geograph. Jour. vol. xxvi. p. 44). But the passage trade of Damascus has probably been at all times more important than its direct commerce. Its merchants must have profited largely by the caravans which continually passed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactures of its own. According to some expositors, the passage in Amos iii. 12, which we translate "i.e. Damascus on a couch," (לַעֲרָבָהּ פִּנְמוּס תֶּשֶׁב), means really "on the damask couch," which would indicate that the Syrian city had become famous for a textile fabric as early as the eighth century B.C. There is no doubt that such a fabric gave rise to our own word, which has its counterpart in Arabic as well as in most of the languages of modern Europe; but it is questionable whether either this, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the world, was invented by the Damascenes before the Mohammedan era. In ancient times they were probably rather a consuming than a producing people, as the passage in Ezekiel clearly indicates.

Certain localities in Damascus are shown as the site of those Scriptural events which especially interest us in its history. A "long, wide thoroughfare" leading direct from one of the gates to the castle or palace of the Pasha — is "called by the guides "Straight"" (Acts ix. 11); but the natives know it among themselves as "the Street of Hakamars" (Stanley p. 204). The house of Judas is shown, but it is not in the street "Straight" (Procop. ii. 119). That of Ananias is also pointed out. The scene of the conversion is confidently said to be "an open green spot, surrounded by trees," and used as the Christian burial-ground but this spot is on the eastern side of the city.
whereas St. Paul must have approached from the west or south. Again it appears to be certain that "four distinct spots have been pointed out at different times" (Stanley, p. 419) as the place where the "great light suddenly shined from heaven" (Acts ix. 3); so that little confidence can be placed in any of them. The point of the walls at which St. Paul was let down by a basket (Acts ix. 25; 2 Cor. xi. 33) is also shown; and, as this locality is free from objection, it may be accepted, if we think that the tradition, which has been so faithless or so uncertain in other cases, has any value here.

In the vicinity of Damascus certain places are shown, traditionally connected with the prophet Elias; but these local legends are necessarily even more doubtful than those which have reference to the comparatively recent age of the Apostles. (See Stanley's Sinai and Palestine; Maundrell's Journey to Damascus; Addison's Rambles and Palæstra; Poore's Travels; and especially Porter's Fire Years in Damascus, and his account of the country round Damascus in the Geographical Journal, vol. xvi.)

* DAMN, DAMNATION. These terms, when the common English version was made, were not restricted to their present meaning, but were used also in their primitive sense of condemnation and condemnation (comp. Pope's "damn with faint praise"). This, often, with the associated idea of punishment, is all that the Greek words which they represent properly signify. Damn is the rendering of κατακρίνει, Mark xvi. 16; Rom. xiv. 23, "he that doleth is damned (condemned) if he eat;" and κρίνει, 2 Thess. ii. 12. Damnation is the rendering of κρίσια, literally "judgment," Matt. xxiii. 14; Mark xii. 40; Luke xx. 47; Rom. iii. 8, xiii. 2, "they that resist shall receive to themselves damnation" (punishment); 1 Cor. xi. 23, "he that eateth and drinketh unworthily eateth and drinketh damnation (condemnation, judgment) to himself;" 1 Tim. v. 12: — κρίσις, Matt. xxiii. 33; Mark iii. 29; John v. 21: — κατακρίνει, "condemnation," "punishment," Wisd. xii. 27; and ἀπώλεια, "destruction," 2 Pet. ii. 3.

A.

DAN. 1. (177) DAH: Joseph. Δαυίς, βασιλεὺς τῶν ἰσραήλ ἔντοιχος κατά τὴν καταλείπουσαν D. M. I. The fifth son of Jacob, and the brother of Bilhah, Rachel's maid (Gen. xxx. 6). The origin of the name is given in the exclamation of Rachel — "I God hath judged me (κατακρίνει), . . . and given me a son," therefore she called him Dan," i.e. "judge." In the blessing of Jacob (Gen. xliv. 16) this play on the name is repeated — "Dan shall judge (κατακρίνει), yudlin) his people."

* It is understood that Mr. Rogers, the English consul at Damascus, has in preparation an elaborate work on the manners and customs of the Syrians, similar to that of Mr. Lane on Egypt.

2. Gesenius has pointed out a slight difference between the two derivations; the verb being active in the latter and passive in the former (Thes. 323). This is quite in keeping with the uncertainty which attends many of these ancient personomastic derivations (compare Abax, Benjamin, and others).

3. The frequent variations in the LXX. forbid absoluted reliance on these numbers; and in addition it should not be overlooked that the census in Num. i. 4 of fighting men, that of xxvi. of the "children of Dan" was own brother to Naphtali: and as the son of Rachel's maid, in a closer relation with Rachel's sons, Joseph and Benjamin, than with the other members of the family. It may be noticed that there is a close affinity between his name and that of Dinah, the only daughter of Jacob whose name is preserved.

The records of Dan are unusually meagre. Of the patriarch himself no personal history is, unfortunately, preserved. Only one son is attributed to him (Gen. xvi. 23); but it may be observed that "Hushim" is a plural form, as if the name, not of an individual, but of a family; and it is remarkable — whether as indicating that some of the descendants of Dan are omitted in these lists, or from other causes — that when the people were numbered in the wilderness of Sinai, this was, with the exception of Judah, the most numerous of all the tribes, containing 62,700 men able to serve. The position of Dan during the march through the desert was on the north side of the tabernacle (Num. ii. 25). Here, with his brother Naphtali, and Asher, the son of Zilpah, before him, at his station, the headmost of the long procession (ii. 31, x. 25). The names of the "captain" (נְנַבֵּי) of the tribe at this time, and of the "ruler" (the Hebrew word is the same as before), who was one of the spies (xili. 12), are preserved. So also is the name of one who played a prominent part at that time, "Abdah the son of Ahinaph, of the tribe of Dan," associated with Bezalel in the design and construction of the fittings of the tabernacle (Ex. xxxi. 6, c.). The numbers of this tribe were not subject to the violent fluctuations which increased or diminished some of its brethren (comp. the figures given in Num. i. and xxvi.), and it arrived at the threshold of the Promised Land, and passed the ordeal of the rite of Baal-peor (Num. xxv.) with an increase of 7500 on the earlier census. The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a "prince" (נָבִי, as before) to the apportionment of the land; and it was appointed to stand on Mount Ebal, still in company with Naphtali (but opposite to the other related tribes), at the ceremony of blessing and cursing (Deut. xxvii. 13). After this nothing is heard of Dan till the specification of the inheritance allotted to it (Josh. xix. 48). It was, however, the last of the tribes to receive his portion, and that portion, according to the record of Joshua — strange as it appears in the face of the numbers just quoted — was the smallest of the twelve. But notwithstanding its smallness it had eminent natural advantages. On the north and east it was completely embraced by its two brother-tribes Ephraim and Benjamin, while on the south-east and south it joined Judah, and was thus surrounded by the

Reuben," &c., and therefore probably without that limitation.

4. This one word is rendered in the A. V. by "prince," "ruler," "captain," "chief," and "governor." 

5. The enumeration of the tribes in this record is in the order of their topographical position, from S. to N. It is remarkable that Dan is named after Naphtali and Asher, as if already associated with the northern position afterwards occupied by the city Dan. This is the case in Judg. i. 34, and 1 Chron. xii. 55. The writer is not aware that any explanation has been offered of this apparent anomaly.
three most powerful states of the whole confederacy. Of the towns enumerated as forming the border of its inheritance, the most easterly which can now be identified are Ajalon, Zorah (Zarah), and Ir-Shemesh (or Beth-shemesh; which see). These places are on the slopes of the lower ranges of hills by which the highlands of Benjamin and Judah descend to the broad maritime plain, that plain which on the S. bore the distinctive name of the Shelechith, and more to the N., of Shorim. From Ajalon—afterwards Joppa, and now Yaffi—on the north, to Ekron and Gathrimmon on the south—a length of at least 14 miles—that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. By Josephus (Ant. v. 1, § 22, and 3, § 1) this is extended to Ashdod on the south, and Dor, at the foot of Carmel, on the north, so as to embrace the whole, or nearly the whole, of the great plain. But this rich district, the corn-field and the garden of the whole south of Palestine (Stanley, S. and P. 288), which was the richest prize of Phoenician conquest many centuries later, and which even in the now degenerate state of the country is enormously productive, was too valuable to be given up without a struggle by the original occupants. The Amorites accordingly forced the children of Dan into the mountain, for they would not suffer them to come down into the valley (Judg. i. 34)—forced them up from the corn-fields of the plain, with their deep black soil, to the villages whose ruins still crown the hills that skirt the lowland. True, the help of the great tribe so closely connected with Dan was not wanting at this juncture, and “the hand of the house of Joseph, i.e. Ephraim, prevailed against the Amorites” for the time. But the same thing soon occurred again, and in the eclipse with which we are afterwards favored into the interior of the tribe, in the history of its great hero, the Philistines have taken the place of the Amorites, and with the same result. Although Samson “comes down” to the “vineyards of Timnath” and the valley of Sorek, yet it is from Mahaneh-Dan—the fortified camp of Dan, between Zorah and Eshtaol, behind Kirjath-jearim—that he descends, and it is to that natural fastness, the residence of his father, that he “goes up” again after his encounters, and that he is at last borne to his family sepulchre, the burying-place of Manoah (Judg. xiv. 1, 5, 19, xiii. 25, xvi. 4; comp. xviii. 12, xvi. 31).

These considerations enable us to understand how it happened that long after the partition of the land all the inheritance of the Danites had not fallen to them among the tribes of Israel (Judg. xvi. 1).

a See the inscription of king Esar-haddon, as interpreted by Stanley (S. F. P. pp. 27, 28).

b The “all” in this passage (A.V.) has nothing answering to it in the Hebrew, and hides from the reader a peculiarity of the text. The Hebrew writer states that the Danites had not yet received an inheritance among the tribes of Israel. What is more may be that they had not received any territory adequate to the wants of an overgrown population in their original settlement, or, more probably, had received some extent of land which they could rarely occupy as a permanent possession on account of the superior power of the Philistines (see Bertheau, Reicher und Ruth, p. 186). These suggests that the Danites may have compelled in these terms of their having no inheritance as an excuse for their rapacity, when the complaint was not true in fact (Recher und Ruth, p. 190).

c Esbal ascribes it to their being engaged in commerce (Delitzsch, i. 191). This may have been the case with Asher, but can hardly, for the reasons a framed above, have been so with Dan. The “ship” of Delitzsch’s song are probably only a bold figure, in allusion to Joppa.

d The complete appointment of these warriors is perhaps a more certain sign of the tribe being praised, or lost, of the fact that it was in the existing time policy to deprive of their arms those whom we have conjectured (1 Sam. xiii. 19-21, and perhaps also Samson’s mule weapon, the jaw-bone).

e For “the captivity of the land.” IV. N. Esbal proposes to read “that of the Ark,” IV. N. That is, till the time of Samuel (1 Sam. iv. 11), Geer, ii. pt. 2, p. 233.
Dan who were sealed by the Angel in the vision of St. John (Rev. vii. 5-7).

The mention of this tribe in the "blessings" of Jacob and Moses must not be overlooked, but it is difficult to extract any satisfactory meaning from them. Herder's interpretation as given by Prof. Sayce is probably the closest:

"It is doubtful whether, the delineation of Dan in Jacob's blessing relates to the original settlement on the western outskirts of Judah, or to the northern outpost. Herder's explanation will apply almost equally to both. 'Dan,' the judge, 'shall judge his people'; he, the son of concubine, no less than three sons of Leah; he, the frontier tribe, no less than those in the places of honor, shall be 'as one of the tribes of Israel.' Dan shall be a serpent by the way, an adder in the path, that is to the invading enemy by the north or by the west, that biteth the heels of the horse, the indigenous serpent biting the foreign horse unknown to Israelite warfare, so that his rider shall fall backwards. And his war-cry as from the frontier fortresses shall be 'For thy salvation, O Lord, I have waited!' This in the blessing of Moses the southern Dan is lost sight of. It is the barrenity from one aspect, the same characteristics though under a different image: a lion's whelp in the far north, as Judah in the far south: he shall keep from Bashan — from the slopes of Hermon, where he is cached watching for his prey."

2. (II: 24: $\Delta$; Joseph. 7. 7: $\Delta$; Dan, in the common expression "from Dan even to Beersheba." The name of the place was originally Laish or Leshem (Josh. xix. 47). Its inhabitants lived "after the manner of the Zidonians," i.e., engaged in commerce, and without defense. But it is nowhere said that they were Phoenicians, though it may perhaps be inferred from the parents of Heram — his mother "of the daughters of Dan," his father "a man of Tyre." (2 Ch. ii. 14). Living thus "quiet and secure," they fell an easy prey to the active and practiced freebooters of the Danites. They conferred upon their new acquisition the name of their own tribe, "after the name of their father who was born unto Israel." (Judg. xviii. 29; Josh. xix. 47); and Laish became Dan.

The locality of the town is specified with some minuteness. It was "far from Zidon," and "in the valley (NABJ, Einck) that is by (?), Beth-rehob," but as this latter place has not been identified with certainty, the position of Dan must be ascertained by other means.

The graven image which the wandering Danites had stolen from Micah they set up in their new home, and a line of priests was established, which, though belonging to the tribe of Levi and even descended from Moses, was not of the family of Aaron, and therefore not belonging to the regular priesthood. To the form of this image and the nature of the idolatry we have no clue, nor to the relation, if any, which existed between it and the calf-worship afterwards instituted there by Jeroboam (1 K. xii. 29, 30). The latter is alluded to by Amos (viii. 14) in a passage which possibly preserves a formula of invocation or adjuration in use among the worshipers; but the passage is very obscure.

After the establishment of the Danite temple it became the acknowledged extremity of the country, and the formula "from Dan even to Beersheba" is frequent throughout the historical books (Judg. xx. 1; 1 Sam. iii. 20: 2 Sam. iii. 10, xvii. 11, xxiv. 2, 15; 1 K. iv. 25). In the later records the form is reversed, and becomes "from Beersheba even to Dan." (1 Chr. xxi. 2; 2 Chr. xxxi. 5).

Dan was, with other northern cities, laid waste by Benhadad (1 K. xx. 22; comp. xvi. 4), and this is the last mention of the place.

Various considerations would incline to the suspicion that Dan was a holy place of note from a far earlier date than its conquest by the Danites. Those are: (1.) the extreme reductiveness of the Orientalists — apparent in numerous cases in the Bible — to initiate a sanctuary; or to adopt for worship any place which had not enjoyed a reputation for holiness of several ages. (2.) The roundish area, some 100 square miles, of the Danite settlement, in connection with the life of Abraham — the origin of Beersheba also being, as has been noticed, enclosed in some diversity of statement. (3.) More particularly its incidental mention in the very clear and circumstantial narrative of Gen. xiv. 14, as if well known even at that very early period. Its mention in Deut. xxxiv. 1 is also before the events related in Judg. xviii., though still many centuries later than the time of Abraham. But the subject is very difficult, and we can hardly hope to arrive at more than conjecture upon it.

With regard to Gen. xiv. 14 three explanations suggest themselves. 1. That another place of the same name is intended. (See Kalisch, ed loc. for an ingenious suggestion of Dan-jaun; another is disposed of by Prof. Stanley, S. of P. p. 400.) Against this may be put the belief of Josephus (comp. Ant. i. 10, § 1, with v. 3, § 1) and of Jerome (in Lactant., loc. cit. in Genes., xiv. 14), who both hesitatingly identify the Dan of the Danites, near Paneas, with the Dan of Abraham. 2. That it is a prophetic anticipation by the sacred historian of a name which was not to exist till centuries later, just as Samson has been held to be alluded to in the blessing of Dan by Jacob. 3. That the passage originally contained an older name, as Laish; and that when that was superseded by Dan, the new name was inserted in the MSS. This last is Vulgat's (Vulga. 73), and of the three is the most feasible, especially when we consider the characteristic, genuine air of the story in Judges, which fixes the origin of the name so circumstantially. Josephus (Ant. v. 3, § 1) speaks positively of the situation of Laish as "not far from Mount Libanus and the springs of the lesser Jordan, near (sori) the great plain of the city of Sidon." (compare also Ant. viii. 8, §

According to Jewish tradition, Jacob's blessing on Dan is a prophetic allusion to Samson, the "judge" of the tribe; and the ejaculation with which the blessing closed was actually uttered by Samson when brought into the temple at Gaza. (See the Targum Ps. on Joshua, xiv. 15; 17, ar. the quotations in Kalisch's Genesis ad loc.) Modern critics likewise see an allusion to Samson in the terms of the blessing, which they presume on that account to have been written after the prehistoric times of the Judges (Keil, Gesch. i. 92), Jerome's observations (Qu. in Gen.) on this passage are very interesting.

Moses is doubtless the genuine reading of the name, which, by the insertion of an V, was changed by the Jews into Manasseh, as it stands in the A.V of Judg. xviii. 29 (Masor. 544, 5).
DAN

Gi; and this, as just said, he identifies with the Dan in Gen. xiv. 14 (\textit{Ant.}, i. 10, \S 1). In consonance with this are the notices of St. Jerome, who derives the word "Jordan" from the names of its two sources. Dan, the westernmost and smaller of the two, he places at four miles from Panæa on the road to Tyre. This perfect agreement with this is the position of \textit{Tell el-Kalîth}, a mound from the foot of which pushes out one of the largest fountains in the world,\textsuperscript{1} the main source of the Jordan (Rof. iii. 392-393; Stanley, 394, 395). The Tell itself, rising from the plain by somewhat steep terraces, has its long, level top strewn with ruins, and is very probably the site of the town and citadel of Dan. The spring is called \textit{el-Lobidi}, possibly a corruption of Dan (Rof. iii. 392), and the stream from the spring \textit{Nidher el-Dhlan} (Wilson, ii. 173), while the name, \textit{Tell el-Kalîth}, "the Judge's mound," agrees in signification with the ancient name.\textsuperscript{2} Both Dr. Robinson and Prof. Stanley give the exact agreement of the spot with the requirements of the story in Judg. xviii. — "a good land and a large, where there is no want of anything that is on the earth" (Rof. iii. 396; Stanley, as above).

\textsuperscript{1} Deltzsch accounts for the name of Dan in Gen. xiv. 14, by his theory that the Pentateuch was completed by some of the companions and survivors of Moses. Murphy (\textit{Commentary on Genesis}, p. 286, Amer. ed.) argues from the mode of designation here employed that Dan was the original name, current in Abraham's time. He supposes that the recollection of its ancient name and story attracted the Banites, and that after taking and destroying the city, they displaced the intermediate name, Leschem (according to Josh. xiv. 47), by the original designation. But the conjecture not only lacks foundation, but seems in conflict with the narrative, which refers the origin of the name to "the name of their father" Dan (Josh. xiv. 47; Judg. xviii. 29). Ewald's suggestion (No. 3 above) is strongly countenanced by the character of the narrative and the circumstances of the case.

The air of extreme antiquity which invests Gen. xiv. 14, with any unique even by questions as Ewald, Tuch, and Knobel; Ewald ascribing it to patriarchal times, and Tuch to a period prior to the Israelitish invasion, except for this one name, is the usual phraseology of the chapter is peculiar. But the names of places have this peculiarity, that several of them were obsolete at the time of the conquest of Canaan, and are interpreted by other names applied; thus, Bah which is Zear; En-numspt which is Kadid; the vale of Sidlion which is the Salt Sea. In one or two other cases we have an old name without the more modern appended, as though the latter were not yet established or originated; thus, Hazazon-tamar, which afterwards became En-gedi (2 Chr. xx. 2), and Mt. Tarman, the older name, as Keil and Knobel argue for Elath.

Now in the midst of these ancient appellations occurs one place not designated by its older name, but by a title, which a few years after the time of Moses, completely displaced and eclipsed the older name. When, however, we bear in mind the entire obscurity of the place under its former appellation, the speedy change, the renown of its later name, and the circumstances under which it was given, it can be no matter of surprise that a later hand, instead of adding the explanatory phrase "which is Dan" or leaving the old and unknown name Leschem, should directly substitute the one for the other. The solution seems equally obvious and simple, and the transaction itself almost unavoidable.

Keil, however, still insists with Kalisch and others on the first of the above solutions, namely, that it was another Dan, the Dan-land of 2 Sam. xxiv. 6, and belonging to Gilgal (Deut. xxxiv. 1). They say that Laisa-Dan did not lie on either of the two roads leading from the vale of Siddim or of the Jordan to Danassens; whereas this Dan, supposed to be "in northern Perea to the southwest of Lassus" (Keil), "between Gilgal and Sidon" (Kalisch), would be perfectly appropriate to the passage.\textsuperscript{2} The argument involves too many assumptions to be of much weight. Yet on the other hand it must be admitted that we cannot deny the existence of another Dan without supposing an incorrect reading in 2 Sam. xxiv. 6 (the interchange of 1 for 7); a supposition countenanced by the Vulgate, though not so clearly by the Septuagint.

S. C. B.

3. (\textsuperscript{13} ch. in LXX. [in most MSS.; Comp. \textit{Dard; Abd. \textit{Dardar}] Dan.} Apparently the name of a city, associated with Jason as one of the places in Southern Arabia from which the Phenicians and Egyptians wrought iron. Jassua and Caleb (I Kings xxi. 19). Ewald conjectures that it is the same as the Keturbite Dedan in Gen. xxv. 3, but his conjecture is without support, though it is adopted by Mühl.- others refer to the tribe of Dan, for the Danites were skillful workmen, and both Ahohab (Ex. xxxiv. 34) and Huram (2 Chr. ii. 13) belonged to this tribe. But for this view there also appears to be as little foundation, if we consider the connection in which the name occurs.\textsuperscript{1}

W. A. W.

DANCE. As emotions of joy and sorrow universally express themselves in movements and gestures of the body, efforts have been made among all nations, but especially among those of the south and east, in proportion as they seem to be more demonstrative, to reduce to measure and to strengthen by unison the more plausible—these of joy. The dance is spoken of in Holy Scripture universally as symbolic of some rejoicing, and is often coupled for the sake of contrast with mourning, as in Joel iii. 4, "a time to mourn and a time to dance" (comp. Ps. xxx. 11; Matt. xi. 17). In the earlier period it is found combined with some song or refrain (Ex. xx. 20, xxxii. 18, 19; 1 Sam. xxi. 11); and with the \textit{hps}, or tambourine (A. V., "timbrel"), more especially in those impassive outbursts of popular feeling which cannot find solli-

\textsuperscript{1} This agreement in meaning of the modern name with the ancient is so rare, that little dependence can be placed on it. Indeed, Stanley (\textit{S. S. E. P.} p. 384, note) has shown grounds for at least questioning it. The modern names, when representatives of the ancient, generally agree in sound though often disagreeing in meaning.

\textsuperscript{2} A still more recent writer, \textit{Quarry on Genesis and its Authorship}, p. 472, Lord 1899), deems it after all a tenable position that the Dan of Abraham (Gen. xiv. 11) was a different one from that of the later Hebrew history. \textit{Zeller's Bib. Wörterb. p. 233} presents the same view.

H.
character among her own sex, seem to have felt that it was her part to lead such a demonstration of triumph, or of welcome; so Miriam (Ex. xvi. 20) and so Jephthah's daughter (Judg. xi. 34), and similarly there no doubt was, though none is mentioned, a chorus and dance of women led by Deborah, as the song of the men by Barak (comp. Judg. v. 1 with Ex. xv. 1, 20). Similarly, too, Judith (xv. 12, 13) leads her own song and dance of triumph over Holophernes. There was no such leader

DANCE

who also praises among styles of dancing "το ἐγερθὲς καλὸν θηρίων ἢςποτο ἐν πολέμῳ"

Dancing formed a part of the religious ceremonies of the Egyptians, and was also common in private entertainments. Many representations of dances both of men and women are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was really a dance (II); see below.

Plato certainly (Leg. vii. 6) reckons dancing (δρυμαίς) as part of gymnastics (γυμναστική). So far was the feeling of the purest period of antiquity from attaching the notion of effeminacy to dancing, that the ideas of this and of warlike exercise are mutually interwoven, and their terms almost correspond as synonymous (Hom. Il. xvi. 617; comp. Creuzer, Symb. ii. 367, iv. 474; and see especially Lucian de Sult., passion). Women, however, among the Hebrews made the dance their especial means of expressing their feelings; and when their husbands or friends returned from a battle on behalf of life and home, felt that they ought to have some share in the event, and found that share in the dance of triumph welcoming them back. The "eating and drinking and dancing" (Deut. i. 45) of the Anakites is recorded, as is the people's "rising up to play" (κυθητεῖν, including a revelling dance), with a tacit censure: the one seems to mark the lower civilization of the Anakites, the other the looseness of conduct into which idolatry led the Israelites (Ex. xxxii. 6; 1 Cor. x. 7; 1 Sam. xxx. 16). So among the Reduans, native dances of men are mentioned (Lynch, Dead Sea, p. 295; Stanley, pp. 56, 466), and are probably an ancient custom. The Hebrews, however, save in such moments of temptation, seem to have left dancing to the women. But more especially on such occasions of triumph, any woman whose nearness of kin to the champion of the moment gave her a public

a The proper word for this combination is κυθητεῖν.Jug. xvi. 25; 1 Sam. viii. 6; 2 Sam. vi. 5, 21; 1 Kii. xiii. 8, xv. 29; Jer. xxx. 19), though it also includes other senses.

b Among Romans of a late period the sentiment had expired, "Nemo fere sabit subitus, nisi forte insaniat" (Cic. pro Marcel. p. 14). Perhaps, however, the standard of morals would rather lead us to expect that drunkenness was common than that dancing was rare.
the peculiarity of David's conduct, when, on the return of the Ark of God from its long sojourn among strangers and borderers, he (2 Sam. vi. 5-22) was himself choeur us; and here too the women, with their timbrels* (see especially v. 5, 19, 29, 22), to an important share. This fact brings not more markedly the feelings of Sam's daughter Michal, keeping aloof from the occasion, and "looking through a window" at the scene. She should, in accordance with the examples of Miriam, &e., have herself led the female choir, and so come out to meet the Ark, and her lord. She stays with the "household" (ver. 20), and "comes out to meet" him with reproaches, perhaps feeling that his zeal was a relapse to her apathy. It was before the "fastenings," i.e., in leading that choir which she should have led, that he had " unconcerned " himself; an unkinly exposure as she thought it, which the dance rendered necessary—— the wearing merely the ephod or linen tunic. The occasion was meant to be popularly viewed in connection with David's jubilation of various armies and accession to the throne of Israel (see I Chr. xii. 29-xiii. 3): he accordingly thinks only of the honor of God enclosed so soon, and avails not for "self" (comp. Miliar, de Dauid aut. Arc. Ugo- lini, xxxii.). From the mention of " dances," " timbrels," and " dances " (Ps. lxxvi. 23, cxix. 3, cl. 4), as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him, for as Sausschutz remarks (Archiv. de l'Hist. Vol. i. p. 209), in the mention of religious revival under Hezekiah and Josiah, no notice of them occurs; and this, although the " words," the " writing," and the " commandment of David " (on such subjects, are distinctly alluded to (2 Chr. xxix. 30, xxxiv. 4, 13). It is possible that the banishing of this popularising of this element, which found its vent no doubt in the idolatrous rites of Baal and Ashtaroth (as it certainly did in those of the golden calf, Ex. xxxiii. 19), made these efforts take a less firm hold on the people than they might have done; and that David's more comprehensive scheme might have retained some tincts of feeling which were thus lost. On the other hand there was doubtless the peril of the loose morality which commonly attended festive dances at heathen shrines. Certainly in later Judaism the dance was included among some religious festivitics, e. g., the feast of Tabernacles (Midrash, Succ. v. 5, 14), where, however, the performers were men. This was probably a more following the example of David in the letter. Also in the earlier period of the Judges the dances of the virgins in Shiloh (Judg. xxi. 19-23) were certainly not religious in character. It seems also from this last instance clear, and from the others probable, that such dances were performed by maidens apart from men, which gives an additional point to the reappearance of Michal. What the fashion or figure of the dance was is a doubtful question; nor is it likely to have harked such variety as would adapt it to the various occasions of its use. The word י"ז means to move in a ring, or round; whence in Ps.

\[\text{DANCE} \]

\[\text{DANCE} \]

\[4\] we read י"ז י"ז, meaning a festive crowd, apparently as dancing in a ring. So י"ז, whence י"ז, means to turn. In modern Oriental dances a woman leads off the dance, the others then follow her with exact imitation of her artistic and graceful attitudes. A parallelism of movement is also incident to it (Saschttz, ib. p. 201). Possibly Miriam so led her countrywomen. The same writer thinks that in v. 13, the words י"" י"" (A. V. "company of two armies") imply two rows of dancing girls, and that the address in the singular number, "return, return," and again in v. 1 occasion the movements of the individual performer in a kind of contretemps. The interpretation, however, does not remove the obscurities of the passage.

Dancing also had its place among nicely festive amusements apart from any religious character (Jer. xxxv. 4, 13; 1 Sam. v. 13; Mark vi. 22; Luke xv. 25). The accomplishments exhibited by Herodias's daughter seem, however, to show that Dean Trench's remark on the last-named passage that the dancers were of course not the guests but hired performers is hardly to be received with strictness; although the tendency of luxury in the East has no doubt been to reduce the estimation in which the pastime, as shared in, is there held. Children, of course, always did and always will dance (Job xxi. 11; Matt. xi. 17; Luke v. 32). Whilst in their "dancing derivishes" the Turks seem to have adopted into their system the enthusiastic raptures, at once martial and sacred, which (e. g. in the Roman Saliet) seem indigenous in many southern and eastern races from the earliest times. For further remarks Spencer, de Saliet, ed. Heber, may be consulted (Ugolini, xxxv.); and, for the Greek and Roman dances, see Dic. of Aut. art. Salutaris. II. II.

**DANCE.** By this word is rendered in the A. V. the Hebrew term מֵתָכָל, לַיִלְיָה, a musical instrument of percussion, supposed to have been used by the Hebrews at an early period of their history. Some modern lexicographers, who regard מֵתָכָל as synonymous with הרֹוקִל, לַיִלְיָה (Ecc. iii. 4), restrict its meaning to the exercise or manipulation of dance. But according to many scholars, it also signifies a musical instrument imparting the dance, and which the Hebrews therefore called by the same name as the dance itself. The Septuagint generally renders מֵתָכָל χορός, "dancing;" occasionally, however, it gives a different meaning, as in Ps. xxx. 11 (Heb. Bible, ver. 12), where it is translated χορός, "joy;" and in Jer. xxxxi. 4 and 11, where it is rendered χορόν, "assembly." The Semitic versions of the O. T. almost invariably interpret the word as a musical instrument.

On the joyous occasion when the Israelites escape from their Egyptian pursuers, and reach the Arabian shore of the Red Sea in safety, Miriam is represented as going forth striking the מֵתָכָל, and

\[\text{a} \]

The מֵתָכָל was clearly the women's instrument, see the allusion of the other different instruments to men in 1 Chr. xv. 16-21, and xxvi. 6, 12; comp. also the מֵתָכָל of Ps. lixiv. 25.

\[\text{b} \]

Some commentators have been at pains to point out that it was not the act of dancing, but the dress directed of upper robes which was the subject of remark. But clearly the "dancing with all his might" could hardly be done in the dignified costume of royalty, etc.; every Hebrew would see that the one implies the other. Comp. Ex. xxxii. 26, 25.

translates, translated by

bling, in his Lexicon, "a drum with either one or two faces;" and the word תַּנְפּוֹת. (Jugd. xi. 36, A. V. "and with dances") is rendered by תַּנְפּוֹת, "songs." Gesenius, Fürst, and others, adopt for the most part the Septuagint rendering; but Rosenmüller, in his commentary on Ex. xiv. 20, observes that, on comparing the passages in Judg. xi. 36, 1 Sam. xviii. 6, and Jer. xxxi. 4, and assigning a rational meaning to their contexts, machol must mean in these instances some musical instrument, probably of the flute kind, and principally played on by women.

In the grand Hallahah Psalms (ed.) which closes that magnificent collection, the sacred poet exhorts mankind to praise Jehovah in His sanctuary with all kinds of music; and amongst the instruments mentioned at the 3d, 4th, and 5th verses is found machol, which cannot here be consistently rendered in the sense of dancing. Joel Bell, whose second preface (יוֹנָה וּנְפּוֹת) to Mendelssohn's Psalms contains the best treatise extant on the musical instruments mentioned in the Hebrew Bible, says: "It is evident from the passage, 'Praise Him with the "flute," and the machol,' that Machol must mean here some musical instrument, and this is the opinion of the majority of scholars."

Mendelssohn derives machol from מַדּוֹל, "hollow," on account of its shape; and the author of Shilte Haggadaborn denotes it גלפסיא, which probably intends for קָדָרָה. The musical instrument used as an accompaniment to dancing is generally believed to have been made of metal, open like a ring; it had many small bells attached to its border, and was played at weddings and merry-making by women, who accompanied it with the voice. According to the author of Shilte Haggadabrin, the machol had tinkling metal plates fastened on wires, at intervals, within the circle that formed the instrument, like the modern tambourine; according to others, a similar instrument, also formed of a circular piece of metal or wood, but furnished with a handle, which the performer might manage as to set in motion several rings strung on a metal bar, passing from one side of the instrument to the other, the waving of which produced a loud, merry sound.

Some modern critics consider macholath the same with machol. Gesenius, however, translates the latter "dancing," whilst the former he renders "a stringed instrument," from the root תַּנְפּוֹת. Ethiopic צָפָת, "to sing." D. W. M.

DANIEL (דָּנֵיאֵל) [judge of God, his representative as such, or, God (El) is judge]. Dan. i. 6, 7, 5, &c.; Exr. viii. 2; Neh. x. 6; 1 Chr. iii. 1; and xxvii. 20, 20; xxviii. 3), the name of three (or four) persons in the Old Testament.

1. The second son of David (דָּנֵיאֵל; [Abil.] Alex. דניאגא; [Comm. דניאגא; Daniel]; "born unto him in Hebron," of Abigail the Carmelitess) (1 Chr. iii. 1). In the parallel passage, 2 Sam. iii. 3, he is called Chileb (דניאגא, i.e. like his father (7?); דניאגא). For the Jewish explanation of the origin of the two names see Patrick; Bochart, Hiero- nicum ii. 55, p. 603.

2. [דניאגא; Daniel] The fourth of the "greater prophets" (cf. Matt. xxiv. 15, προφήτης Μεγάλος). Nothing is known of the parentage or family of Daniel. He appears, however, to have been of royal or noble descent. (Daan. i. 3; cf. Joseph. Ant. x. 10, § 1), and to have possessed considerable personal endowments (Dan. i. 4). He was taken to Babylon, in the third year of Jehoiakim (n. c. 604), and trained for the king's service with his three companions. Like Joseph in earlier times, he gained the favor of his guardian, and was divinely supported in his resolve to abstain from the king's meat (7) for fear of defilement (Dan. i. 8-16). At the close of his three years' discipline (Dan. i. 5, 18), Daniel had an opportunity of exercising his peculiar gift (Dan. i. 17) of interpreting dreams, on the occasion of Nebuchadnezzar's decree against the Magi (Dan. ii. 14 15). In consequence of his success he was made ruler of the whole province of Babylon, and chief of the governors over all Nebuchadnezzar was not properly king. But some further difficulties remain, which appear, however, to have been satisfactorily removed by Niebuhr (Gesch. Assyr's, § 85). The date in Jer. xiv. 2 is not that of the battle of Carchemish, but of the warning of the prophet; and the threats and promises in Jer. xxv. are consistent with the notion of a previous subjection of Jerusalem to Nebuchadnezzar, which may have been accomplished without resistance (cf. Niebuhr, a. a. 9 § 88 f.).
the wise men of Babylon" (ii. 48). He afterwards interpreted the second dream of Nebuchadnezzar (ii. 8-27), and the handwriting on the wall which disturbed the feast of Belshazzar (x. 10-28), though he no longer held his official position among the magi (Dan. v. 7, 8, 12), and probably lived at Susa (Dan. viii. 2; cf. Joseph. Ant. x. 11; § 7; Bechart, Geogr. Sacri, iii. 14). At the accession of Darius [Davut's] he was made first of the "three presidents" of the empire (cf. Ezra iii. 9), was delivered from the lion's den, into which he had been cast for his faithfulness to the rite of his faith (vii. 10-23; cf. Bel. & Dr. 29-32). At the accession of Cyrus he still retained his prosperity (vi. 28; cf. i. 21; Bel & Dr. 2); though he does not appear to have remained at Babylon (cf. Dan. i. 17), and in the "third year of Cyrus" (n. v. 534) he saw his last recorded vision on the banks of the Tigris (x. 1-4). According to the Mohammedan tradition Daniel returned to Judaea, held the government of Syria, and finally died at Susa (Rosenmüller, Schod. p. 5, n.), where his tomb is still shown, and is visited by crowds of pilgrims. In the prophecies of Ezekiel mention is made of Daniel as a pattern of righteousness (xiv. 14, 29) and wisdom (xxviii. 3); and since Daniel was still young at that time (c. n. c. 588-584), some have thought that another prophet of the name must have lived at some earlier time (Bleek), perhaps during the captivity of Nineveh (Ewald, Die Propheten, ii. 500), whose name was transferred to his later namesake. Hitzig imagines (Vorbezeuge, § 3) that the Daniel of Ezekiel was purely a mythical personage, whose prototype is to be sought in Melchizedek, and that the character was borrowed by the author of the book of Daniel as suited to his design. These suppositions are favored by no internal probability, and are unsupported by any direct evidence. The order of the names "Noah, Daniel, and Joh." (Ex. xiv. 14) seems to suggest the idea that they represent the first and last historic types of righteousness before the law and under it, combined with the ideal type (cf. Delitzsch, p. 271). On the other hand the narrative in Dan. i. 11, implies that Daniel was conspicuously distinct from the other Hebrews of his knowledge in a very early age (cf. Hist. Sus. 45), and he may have been near forty years old at the time of Ezekiel's prophecy. Allusion has been made already to the comparison which may be instituted between Daniel and Joseph, who stand at the beginning and the close of the divine history of the Jews, as representatives of the true God in heathen courts (Amurah, Daniel, pp. 23, 29). In this respect the position of Daniel must have exercised a powerful influence upon the form of the revelations conveyed through him. And is it turn the authority which he enjoyed renders the course of the exile and the return clearly intelligible. By station, by education, and by character, he was peculiarly fitted to fulfill the work assigned to him. He was not only a resident in a foreign land, like Jeremias or Ezekiel, but the minister of a foreign empire, and of successive dynasties (Dan. ii. 48, vi. 28). His political experience would naturally qualify him to give distinct expression to the characteristics of nations in themselves, and not only in their relation to God's people. His intellectual advantages were as remarkable as his civil dignity. Like the great lawyer who was "trained in all the wisdom of the Egyptians," the great seer was trained in the secrets of Chaldaean wisdom, and placed at the head of the school of the Magi (Dan. ii. 48). He was thus enabled to preserve whatever was true in the traditional teaching of the East, and to cast his revelations into a form suited to their special character. But though occupied in the service of a heathen prince and familiar with Oriental learning, Daniel was from the first distinguished by his strict observance of the Mosaic law (i. 8-16; cf. vi. 10, 11). In this way the third outward condition for his work was satisfied, and at the close of the exile he offered a pattern of holiness for the instruction of the Dispersion of after times. (Cf. Aberlen, Daniel, 24, &c.)

The exact meaning of the name is disputed. The full form (נְנֵבִים) is probably more correct, and in this the god appears to be not merely formative, but a pronominal suffix (בַּיִם). So that the sense will be God is my Judge (C. B. Michaelis ap. Rosenmüller, Schod. § 1). Others interpret נבִים as נבִים, because the last name of a formative is justified by the parallel of Melchizedek, &c. (Hitzig, § 2). This interpretation is favored by the Chaldaean name, Belteshazzar (בַּיִם, i. 7; i.e. the prince of Bel: Theod. LXX. Βαλτασάρ: Βαλτασάρ), which was given to Daniel at Babylon (Dan. i. 7), and contains a clear reference to his former name. Hitzig's interpretation (― Βαλτασάρ = Ερνάρας και Βερβερής) has nothing to recommend it. Such changes have been common at all times; and for the simple assumption of a foreign name compare Gen. xli. 45; Ezra i. 11, v. 14 (Sheshbazzar).

Various apocryphal fragments attributed to Daniel are collected by Fabricius (Col. Prolog. i. T. i. 1124), but it is surprising that his fame in later times seems to have been obscure (Hottinger, Hist. Orient. p. 92). Cf. Epiph. Vit. Dom. ii. p. 243, ed. Petavius: Vit. Dom. ap. Fabricius; Joseph. Ant. x. 11.

4. The name of a prophet, whom some (Harden, loc. cit.) make the covenant drawn up by Nebuchadnezzar c. 146 (Neb. x. 6). He is probably the same as (3); and is confounded with the prophet in the apocryphal addenda to Daniel: Dan. xiv. 1 (LXX. not Theod.).

B. F. W.

DANIEL, THE BOOK OF, is the earliest example of apocalyptic literature, and in a great degree the model, according to which all later apocalypses were constructed. In this aspect it stands at the head of a series of writings in which the deepest thoughts of the Jewish people found expression after the close of the prophetic era. The book of Ecclesiastes (Ecclesiastes), the Jewish Sibyllines, and the fourth book of Ezra (Ezra), carry out with varied success and in different directions, the great outlines of universal history which it contains; and the "Revelation" of Daniel received at last its last completion in the Revelation of St. John. Without an inspired type it is difficult to conceive how the later writings could have been framed; and whatever judgment be formed as to the composition of the book, there can be no doubt that it exercised a greater influence upon the early Christian Church than any other writing of the Old Testament, while in the Apocrypha it is especially distinguished by the emphatic quotation of the
The book of Daniel was not a late composition, though he questioned the authenticity of some part of it (c. iii.—vii., cf. Keil, Lehr. d. Einl. § 133, p. 4). In addition to these two great elements—Aramic and Hebrew—the book of Daniel contains traces of other languages which indicate the peculiar position of the writer. The use of Greek technical terms (cf. § 10) marks a period when commerce had already united Persia and Greece; and the occurrence of peculiar words which admit of an explanation by reference to Aramaic roots (De'litzeh, p. 274) is almost inexplicable on the supposition that the prophecies are a Palestinian forgery of the Maccabean age.

3. The book is generally divided into two nearly equal parts. The first of these (i.—vi.) contains chiefly historical incidents, while the second (vii.—xxii.) is entirely apocalyptic. This division is further supported by the fact that the details of the two sections are arranged in order of time, and that the commencement of the second section falls earlier than the close of the first, as if the writer himself wished to mark the division of subject. But on the other hand this division takes no account of the difference of language, nor of the change of person at the beginning of ch. vii. And though the first section is mainly historical, yet the vision of ch. vii. finds its true foundation and counterpart in ch. ii. From these circumstances it seems hardly necessary to divide the book (Auberlen, p. 36 ff.) into three parts. The first chapter forms an introduction. The next six chapters (ii.—vii.) give a general view of the progressive history of the powers of the world, and of the principles of the divine government as seen in events of the life of Daniel. The remainder of the book (viii.—xii.) traces in minuter detail the fortunes of the people of God, as typical of the fortunes of the Church in all ages. The second section is distinguished by a remarkable symmetry. It opens with a view of the great kingdoms of the earth revealed to a heathen sovereign, to whom they appeared in their outward unity and splendor, and yet devoid of any true life (a metal colossus); it closes with a view of the same powers as seen by a prophet of God, to whom they were displayed in their distinct characters, as instinct with life, though of a lower order, and displaying the power of action (ἴδροι, four beasts). The image under which the manifestation of God's kingdom is foreshown corresponds exactly with this twofold exhibition of the world's powers. "A stone cut without hands," "becoming a great mountain and filling the whole earth." (Dan. ii. 34, 35) —a rock and not a metal—is contrasted with the finite proportions of a statue moulded by man's art, as "the Son of man," the representative of humanity, is the true Lord of that lower creation (Gen. i. 30) which symbolizes the spirit of mere earthly dominions (Dan. vii. 13, 14). The intermediate chapters (iii.—vi.) exhibit a similar correspondence, while setting forth the action of God among men. The deliverance of the friends of Daniel from the punishment to which they were condemned for refusing to perform an idolatrous act at the command of Nebuchadnezzar (ch. iii.), and the interpretation of Nebuchadnezzar's dream reveals the power of the second section. The whole is a systematic plan of the times of Daniel; and in the same way the degradation, the repentance, and the restoration of Nebuchadnezzar (ch. iv.) forms a striking contras to the sacrilegious pride and death of Belshazzar (ch. v. 22—31). The arrangement of the last section.
4. The position which the book of Daniel occupies in the Hebrew Canon seems at first sight remarkable. It is placed among the Holy writings (Ketuvim,ʿAyḥar yafṣa) between Esther and Ezra, or immediately before Esther (cf. Hude, De Bibl. Hist. p. 644, 645), and not among the prophets. This collection, however, is a natural consequence of the right apprehension of the different functions of the prophet and seer. It is not, indeed, certain at what time the triple division of the Scriptures which is preserved in the Hebrew Bibles was first made; but the characteristics of the classes show that it was not based on the supposed outward authority, but on the inward composition of the books [Canon]. Daniel, as the truth has been well stated, had the spirit but not the work of a prophet; and as his work was a new one, so was it carried out in a style of which the Old Testament offers no other example. His Apocalypse is as distinct from the prophetical writings as the Apocalypse of St. John from the apostolic epistles. The heathen court is to the one seer what the Ideal of Parmes is to the other, a place of exile and isolation, where he stands alone with his God, and is not like the prophet active in the midst of a struggling nation (Auberlen, p. 34).\(^6\)

5. The unity of the book in its present form, notwithstanding the difference of language, is generally acknowledged (De Wette, Einl. § 256; Hitzig, § 4). Still there is a remarkable difference in its internal character. In the first seven chapters Daniel is spoken of historically (i. 8-21, ii. 14-19, iv. 8-27, v. 13-23, vi. 2-28, vii. 1, 2) in the last five he appears personally as the writer (vii. 15-28, viii. 1-ix. 22, x. 1-19, xii. 5). This peculiarity, however, is not without some precedents in the writings of the earlier prophets (e. g. vii. 3, xx. 2) and the seventh chapter prepares the way for the change; for while Daniel is there spoken of in the third person (i. 1, 2), the same chapter in which it is given in his words, in the first person (vii. 2, 15, 28). The cause of the difference of person is commonly supposed to lie in the nature of the case. The prophet narrates symbolic and representative events historically, for the event is its own witness: but revelations and visions need the personal attestation of those to whom they are communicated. It is, however, more probable that the peculiarity arose from the manner in which the book assumed its final shape (§ 11).

6. Allusion has been made already to the influence which the book exercised upon the Christian Church. Apart from the general type of apocalyptic composition which the apocalyptic writers derived from Daniel (2 Thes. ii., Rev. chap. xiii., ch. 4, cf. Matt. xxxvi. 64, xxi. 41), the New Testament incidentally acknowledges each of the characteristic elements of the book, its miracles (Hebr. xi. 34), its predictions (Matt. xxiv. 15), and its doctrine of angels (Luke i. 19, 26). At a still earlier time the same influence may have been traced in the Apcrynoph. The book of Baruch [Harmon] exhibits so many coincidences with Daniel, that by some the two books have been assigned to the same author (cf. Fritzschc, Hanah, z. d. Apoc. i. 173); and the first book of Maccabees represents Mattathias quoting the marvelous deliveries recorded in Daniel, together with those of earlier times (1 Macc. ii. 59, 60), and elsewhere exhibits an acquaintance with the Greek version of the book (1 Macc. i. 24 = Dan. ix. 27). The allusion to the guardian angels of nations, which is introduced into the Alexandrine translation of the Pentateuch (Bent. xxxiii. 8: LXX.), and recurs in the Wisdom of Sirach (Ecclus. xxi. 17), may have been derived from Dan. x. 21, xii. i, though this is uncertain, as the doctrine probably formed part of the common belief. According to Josephus (Ant. xi. 8, § 4) the prophecies of Daniel gained for the Jews the favor of Alexander [ALEXANDER THE GREAT]; and whatever credit may be given to the details of his narrative, it at least shows the unquestioning belief in the prophetic worth of the book which existed among the Jews in his time.

7. The testimony of the Synagogue and the Church gave a clear expression to the judgment that the book exercised an early and authoritative use of the book, and pronounced it to contain authentic prophecies of Daniel, without contradiction, with one exception, till modern times. Paraphry alone (c. 395 A. D.) ascended the book, and devoted the 12th of his fifteen Homoiou against Christians (Aψιηα κατὰ Χριστιανοῖς) to a refutation of its claims to be considered a prophecy. \"The history,\" he said, \"is true up to the date of Antiochus Epiphanes, and false afterwards; therefore the book was written in his time.\" (Hieron, Prof. in Jnem.) The argument of Paraphry is an exact anticipation of the position of many modern critics, and involves a twofold assumption, that the whole book ought to contain predictions of the same character, and that definite predictions are impossible. Externally the book is as well attested as any book of Scripture, and there is nothing to show that Paraphry urged any objection to the book except that it brings the lie in the miracle and prediction, in the divine power and foreknowledge as active among men, to a startling test, and according to the character of this belief in the individual must be his judgment upon the book.

8. The history of the assaults upon the prophetic worth of Daniel in modern times is full of interest. In the first instance Duhé was raised as to the authorship of the opening chapters, i. vii. (Sturtevant, Newton), which are perfectly compatible with the fullest recognition of their canonicity. Then the variations in the LXX. suggested the belief that iii. vi. were a later interpolation (J. D. Michaelis). As a next step the last six chapters only were retained as a genuine book of Scripture (Fieldhorn, 1st and 2d editions); and at last the whole book was rejected as the work of an imposter, who lived in the time of Antiochus Epi-

---

\(^{6}\) Fieldhorn attributed ch. ii. vii. viii.-xii. to different authors; and Bährleid supposed that each section was the work of a distinct writer, though he admitted that each successive writer was acquainted with the composition of his predecessors, recognizing in this way the unity of the book (Einl.).
The Buxtorfian text (Corrodi, 1783) has its place among the Haggioraphe, but Daniel is on its list of prophets given in the Wisdom of Sirach: the language is corrupted by an intermixture of Greek words; the details are essentially unhistorical: the doctrinal and moral teaching betrays a late date.

In reply to these remarks, it may be urged, that if the book of Daniel was already placed among the Haggioraphe at the time when the Wisdom of Sirach was written, the omission of the name of Daniel (Ezech. xlix.) is most natural, and that under any circumstances the omission is not more remarkable than that of Ezra and the twelve lesser prophets, for xii. 10 is probably an interpolation intended to supply a supposed defect. Nor is the mention of Greek musical instruments (iii. 5, 17, 10, ἀρχήν; cf. xlviii. 4, ἀρχήν; xlvii. 10, ἀρχήν), for these words only can be shown to be derived from the Greek (De Wette, Einl, p. 255 b.), surprising at a time when the Greek of the text of Daniel was already considerable, and when a brother of A'lexas (c. 600-500 B.C.) had gained distinction as "at the farthest end of the world, aiding the Babylonians" (Brandis, in Delitzsch, p. 274; Ale. Figur. 33, Bergk.). Yet further the scene and characters of the book are Oriental. The colossal image (De Wette, iii. 1, not necessarily a human figure; the term is applied familiarly to the cross; Buxt. Lex. Rabb. s. r.), the fiery furnace, the martyr-like boldness of the three confessors (iii. 10), the decree of Darius (vi. 7), the lions' den (vi. 7, 19, 20), the demand of Nebuchadnezzar (ii. 5), his obedience before Daniel (iv. 46), his sudden fall (iv. 39; cf. Euseb. Prep. Ev. i. 41; Jos. c. Ap. i. 20), are not only consistent with the nature of Eastern life, but in many instances directly confirmed by other evidence (cf. Daniel iv. and Daniel the Mide for the difficulties of l. 1, ii. 1, v. 31). In doctrine, again, the book is closely connected with the writings of the Exile, and forms a last step in the development of the ideas of Messiah (vii. 13, &c.), of the resurrection (xii. 2, 3), of the ministry of angels (viii. 10, xii. 1, &c.), of personal devotion (vi. 10, 11, i. 8), which formed the basis of later speculations, but received no essential addition in the interval before the coming of our Lord.

Generally it may be said that while the book presents in many respects a startling and exceptional character, yet it is far more difficult to explain its composition in the Maccabean period than to connect the peculiarities which it exhibits with the exigencies of the Return. It appears as a key to the later history and struggles of the Jews, and not as a result from them. The peculiarities of language, the acquaintance with Eastern manners and history, which is seen more clearly as our knowledge widens, the reception into the canon, the phenomena of the Alexandrine version, all point in the same direction; and a sounder system of later pretension, combined with a more worthy view of the divine government of men and nations, will probably do much to remove those undefined doubts parallel to those of Daniel, both from their particularity, and from the position which the prophet occupied (cf. Delitzsch, p. 273).
Daniel, the Book of

as to be inspired character of the Revelation which naturally arise at first in the minds of thoughtful students.

11. But while all historical evidence supports the canonicity of the book of Daniel, it does not follow that the recognition of the unity and authority of the book is necessarily connected with the belief that the book was actually written by Daniel. According to the Jewish tradition (Bava Bathra, C. 146) "the books of Ezekiel, the twelve minor prophets, Daniel, and Esther were written (i.e. drawn up in their present form) by the men of the great synagogue," and in the case of Daniel the tradition is supported by strong internal evidence. The manner in which Daniel is spoken of (i. 17, 19, 20, ii. 11, 12; the title in iv. 25, xii. is different) suggests the notion of another writer; and if Daniel wrote the passages in question, they cannot be satisfactorily explained by i Cor. xvi. 10; 2 Cor. xi. 5, 6, xii. 2 (Keil, § 136), or by the consciousness of the typical position which he occupied (Auberlen, p. 37). The substantial authorship of a book of Scripture does not involve the subordinate work of arrangement and revision; and it is scarcely conceivable that a writer would purposely write one book in two languages, though there may have been an obvious reason why he should treat in separate records of events of general history in the vernacular dialect, and of the special fortunes of God's people in Hebrew. At the return we may suppose that these records of Daniel were brought into one whole, with the addition of an introduction and a fuller narrative, when the other sacred writings received their final revision. The visions themselves would be necessarily preserved in their original form; and if this is to be assigned to the author, the four empires described in cc. ii. vii. xii. exhibit no traces of any subsequent recension, with the exception, perhaps, of two introductory verses, vii. 1, x. 1.

12. The interpretation of Daniel has hitherto proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. According to the traditional view, which appears as early as the fourth book of Ezra (2:23ff.) and the epistle of Barnabas (e. 4), the four empires described in cc. ii. vii. xii. are the Babylonian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in the eleventh chapter (xi. 31 ff.), by which the seer passes from the persecutions of Antiochus to the times of Antichrist. A careful comparison of the language of the prophecy with the history of the Syrian kings must, however, convince every candid student of the text that the latter hypothesis is wholly unfounded and arbitrary. The whole of the eleventh chapter forms a history of the struggles of the Jewish church with the Greek powers up to the death of its great adversary (xi. 45). This conflict, indeed, has a typical import, and foreshows in its characteristic outlines the abiding and final conflict of the people of God and the powers of evil, so that the true work of the interpreter must be to determine historically the nature of each event signaled in the prophetic picture, that he may draw from the past the lesson of the future. The traditional interpretation of "the four empires" seems to spring from the same error as the other, though it still finds numerous advocates (Hofmann, Auberlen, Keil, Hervnick, Hengstenberg, and most English commentators). It originated at a time when the triumphant advent of Messiah was the object of immediate expectation, and the Roman empire appeared to be the last in the series of earthly kingdoms. The long interval of conflict, which has followed the first Advent formation in the anticipations of the first Christians, and in succeeding ages the Roman period has been unnaturally prolonged to meet the requirements of a theory which took its rise in a state of thought which experience has proved false. It is a still more fatal objection to this interpretation that it destroys the great idea of a cyclic development of history which lies at the basis of all prophecy. Great periods (années) appear to be marked out in the fortunes of mankind which answer to another, so that that divine utterance which receives its first fulfillment in one period, receives a further and more complete fulfillment in the corresponding part of some later period. Thus the first coming of Christ formed the close of the last age, as His second coming will form the close of the present one. The one event is the type and, as it were, the spring of the other. This is acknowledged with regard to the other prophecies, and yet the same truth is not applied to the revelations of Daniel, which appear then first to gain their full significance when they are seen to contain an outline of all history in the history of the nations which ruled the world before Christ's coming. The first Advent is as much a fulfillment of the visions of Daniel as of those of the other prophets. The four empires precede the coming of Messiah and pass away before him. At the same time their spirit survives (vii. 12), and the forms of national existence which were developed on the plains of Mesopotamia again reproduce themselves in later history. According to this view the empires of Daniel can be no other than those of the Babylonians, Medes, Persians, and Greeks, who all placed the centre of their power at Babylon, and appear to have exhibited on one stage the great types of national life. The Roman power was at first at Jerusalem, and was afterwards transplanted to a new centre, but Greece did not exist until Alexander had been destroyed, and thus the "stone cut without hands struck the feet of the image," and Christianity destroyed for ever the real supremacy of heathen dominion. But this first fulfillment of the vision was only incomplete, and the correlative of the four empires must be sought in post-Christian history. The corresponding symbolism of Babylon and Rome is striking at first sight, and other parallels may be drawn. The Byzantine empire, for instance, "inferior" to the Roman (Ban. ii. 29) may be compared with that of the Medes. The Teutonic races with their divided empire recall the image of Persia (vii. 6). Nor is it difficult to see in the growing might of the northern powers, a future kingdom which may rival in terrible energy the conquests of Alexander. Without insisting on such details as these, which still require careful examination, it appears that the true interpretation of Daniel is to be sought in the recognition of the principle which they involve. In this way the book remains a "prophecy," while it is also a "revelation," and its most special predictions acquire an abiding significance.\(^a\)

\(^a\) The letter of Schneidewin (c. iv.) appears to present clear traces of the interweaving of a commentary with the original text.

\(^b\) An example of the recurrent and advancing completion of the predictions of Daniel occurs in Matt
13. There is no Chaldee translation of Daniel, and the deficiency is generally accounted for, as in the parallel case of Ezra, by the danger which would have existed in such a case of confusing the original text with the paraphrase; but on the other hand the whole book has been published in Hebrew. The Greek version has undergone singular changes. At an early time the LXX. version was supplanted in the Greek Bibles by that of Theodotion, and in the time of Jerome the version of Theodotion was generally "read by the Churches" (c. Verg. ii. 33; Profes. in Comm. « Illud quoque licetem admonere, Danielis non juxta LXX. interpretes sed juxta... Theodotionem ecclesiae leg.»...). This change, for which Jerome was unable to account ("hoc cur accidit nescio," Profes. in Vers. Dan.), may have been made in consequence of the objections which were urged against the corrupt LXX. text in controversy with Jews and heathens. The LXX. version was certainly very unfaithful (Hieron. l.c.); and the influence of Origen, who preferred the translation of Theodotion (Hieron. in Dan. iv. 6), was probably effectual in bringing about the substitution (cf. Credner, Beitr. ii. 256 ff.). In the course of time, however, the version of Theodotion was interpolated from the LXX., so that it is now impossible to recover the original text. [Daniel, Apocryptal Ap- ations, and other studies on the original LXX. translation passed entirely out of use, and it was supposed to have been lost till the last century, when it was published at Rome from a Codex Clis- iusianus (Daniel secundum LXX. Rome, 1772, ed. P. de Magistris), together with that of Theodotion, and several illustrative essays. It has since been published several times (ed. Michaelis, Gotting. 1774; ed. Segner, 1775; Heim, 1846), and lastly by Tischendorf in the second edition of his Septuagint. Another recension of the text is contained in the Syro-Hexaplaric version at Milan (ed. Bagatus, 1788), but a critical comparison of the several recensions is still required.

14. The commentaries on Daniel are very numerous. The Hebrew commentaries of R. Saadiah Haggaoon (1424), Rashi (c. 1100), and Aben Ezra (c. 1167), are printed in the great Rabbinitic Bibles of Pisa (1300) and Damascus (c. 1597) has been printed several times (Anastol. 1647, 4to); and others are quoted by Rosenmuller, Schottii, p. 39, 40. Among the patristic commentaries the most important are those of Jerome (vol. v. ed. Migne), who noticed especially the objections of Porphyry, Theodoret (ii. 1053 ff. ed. Schulze), and Ephrem Syrus (Op. Syr. ii., Rome, 1740). Considerable fragments remain of the commentaries of Hippolytus (collected in Migne's edition, Paris, 1857), and Polycyronius (Mai, Script. Vet. Nov. Coll. vol. i.); and Mai has published (l.c) a catena on Daniel, containing fragments of Apollinarius, Athanasius, Basil, Euse- bius, and many others. The chief reformers, Luther (Ausegung d. Proph. Dan. 1530-1546; Op. Germ. vi. ed. Walch), Geolampadius (In Din. Bfio do, Basil, 1530), Melanchthon (Comm. in

Dan. prophy. Vitebsk, 1543), and Calvin (Proelet. in Dan., Geneva, 1563; Act. Franc. 1565; in English, 1852-3), wrote on Daniel; and Rosenmüller enumerates nearly fifty other special commentators, and his list now requires considerable additions. The combination of the Revelations of Daniel and St. John (Sir I. Newton, Observations upon the Prophecies, &c., Lond. 1733; M. F. Roos, Ausl. d. Weissag. Dan. u. s. w. Leipzig, 1771) opened the way to a truer understanding of Daniel; but the edition of Bertholdt (Daniel, aus dem Hebr.-Aram. neues ubersetzt und verkürzt, u. s. w. Erlangen, 1806-8), in spite of all its grave faults, marks the beginning of a new era in the study of the book. Bertholdt was decidedly unfavorable to its authentici- ty; and he was followed on the same side by von Lengerke (Das Buch Dan. verd. u. ausgel. Kiinigsb. 1835), Maurer (Comm. Gramm. Crit. ii. Lips. 1838), and Hitzig (Kerzyz. Exeg. Hebr. X. Leipzig 1839), whose commentary is among the worst specimens of supercilious criticism which his school has produced. On the other side the com- mentary of Havernick (Comm. ab. d. B. Dan. Hamburg 1832) is the most complete, though it leaves much to be desired. Auberlin (Der Proph. Dan. u. d. Offenbarung Joh. u. s. w., 2te Aufl. Basel, 1857, translated into English from the 1st ed. by A. Saphir, 1859) has thrown considerable light upon the general construction and relations of the book. Cf. Hofmann, Weissag. u. Erfassung, i. 276 ff. The question of the authenticity of the book is discussed in most of the later commenta- ries; and specially by Hengstenberg (Die Authentie d. Dan. u. erwiesen, 1831, translated by E. B. Fratten, Edin.), Havernick (Neue krit. Unter- such. Hamburg 1838), Delschitz (Herzog's Real-Enzyk. s. v. 1849), Keil (Lehrb. d. Einl. in d. A. T. Frankf. 1853), Davidson (Introduction to the O. T. ii. Lond. 1856), who maintain the affirmative; and by Bleek (Berti. Theol. Zeitschr. iii. 1822), Ber- tholdt (Einleit. Erlang. 1814), Lücke (Versuch einer vollständ. Einl. u. s. w. 2te Aufl. Bonn, 1852), De Wette (Einleit. 1te Aufl. Berl., 1852), who deny its authenticity. Cf. Ewald, Die Proph. d. Al. Band. ii. 559 ff. Among English works may be mentioned the Essays of T. R. Dirks, The four prophetic books (1848), Komische Weissagungen und Visionen d. Dan., 1846; of E. B. Elliott, Ho- prophetic Apocryphon, 1844; of S. P. Tregelles, Remarks on the prophetic Visions of Daniel, 1852; and the Commentary of Stuart (Boston, 1850).

B. F. W.

Christian Church since the 4th century (Rufin Apol. ii. 35; cf. Concil. Tott. iv. Con. 14). Like several similar fragments, the chief parts of this composition are given at the end of the Psalter in the Alexandrine MS., as separate psalms, under the titles "The prayer of Azarias" and "The hymn of our Father," and a similar arrangement occurs in other MSS. (b) The two other pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. The History of Susanna (or The Judgment of Daniel) is generally found at the beginning of the book (Gr. MSS. Vit. Lat.), though it also occurs after the 12th chapter (Vulg. ed. Vat.). The History of Bel and the Dragon is placed at the end of the book; and in the LXX. version, it bears a special heading as "part of the prophecy of Hophniakk," (ἐκ προφητείας Ἀρμα-κωμίων Ἰωάννου πρὸ τοῦ φίλου Δαν. 2).

2. The additions are found in both the Greek texts—the LXX. and Theodotion, in the Old Latin and Vulgate, and in the existing Syriac and Arabic versions. On the other hand there is no evidence that they ever formed part of the Hebrew text; and they were only want in the Syriac (Peshito Syriac) and Arabic, but it is by no means certain that any commentary of his own adds shortly Origen's remarks on the fables of Bel and Susanna" (Comm. in Dan. xiii. 1). In a similar manner he notices shortly the Song of the Three Children, "lest he should seem to have overlooked it" (Comm. in Dan. iii. 23).

3. Various conjectures have been made as to the original of these additions. It has been supposed that they were derived from Aramean originals (Wetle, Herbsts Einl. ii. 3, Kap. 8, gives the arguments at length), but the intrinsic evidence is wholly insufficient to establish the point. The character of the additions themselves indicates rather the hand of an Alexandrine writer; and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work (cf. Fritzsche, Frg. Homl. zu den Apok. 1. 121). The abruptness of the narrative in Daniel furnished an occasion for the introduction of the prayer and hymn; and the story of the Dragon seems like a strange exaggeration of the record of the deliverance of Daniel (Dan. vi.), which may naturally have formed the basis of different legends. Nor is it difficult to see in the History of Susanna a pointed allusion to the name of the prophet, though the narrative may not be wholly homogenous.

4. The LXX. appears to be the original source from which all the existing recensions of the fragments were derived (cf. Hody, de Bibl. test. p 583). Theodotion seems to have done little more than transcribe the LXX. text with improvements in style and language, which are considerably greater in the appended narratives than in the Song incorporated into the canonical text. Thus while the History of Susanna and Bel and the Dragon contain large additions which complete and
smellish the story (e. g. Hist. Sus. vv. 15–18; 20, 21; 24–27; 46, 47; 49, 50; Bel and Dragv. vv. 1, 9–13; Eichh. pp. 431 ff.), the text of the Song is little more than a repetition of that of the LXX. (cf. De Magistria, Daniel, &c., pp. 234 ff.; Eichh. Ehr.).

The Yezd. Syriac, Arabic, and Latin versions are derived from Theodotion; and the Hexaplar-Syriac from the LXX. (Eichh. p. 430, &c.).

5. The stories of Bel and Susanna received various embellishments in later times, which throw some light upon the manner in which they were originally composed (cf. Orig. Ed. Afric. §§ 7; §§ 19). Bachtie, Hieroc. iii. 3; Eichhorn. p. 440, &c.); just as the change which Theodotion introduced into the narrative of Bel, to give some consistency to the facts, illustrates the rationalizing process through which the legends passed (cf. Delitzsch, De Habacucit cive et aetate, 1844). It is thus useless to institute any inquiry into the historic foundation which lies below the popular traditions; for though the stories cannot be regarded as more fables, it is evident that a moral purpose determined the shape which they assumed. A later age found in them traces of a deeper wisdom, and to Christian commentators Susanna appeared as a type of the true Church tempted to infidelity by Jewish and Pagan adversaries, and lifting up her voice to God in the midst of persecution (Hippol. In Sus. p. 689 ff. ed. Migne). B. F. W.

* On these apocryphal additions to Daniel, see, in addition to the works referred to above, David's Introd. to the O. T. 1893, iii. 227 ff.; Ewald, Gesch. d. Volkes Israel, 30 Aufl. iv. 635 ff.; Ginsburg's art. in the 3d ed. of Kitto's Cyclop. of Bib. Lit.; Arnold's Comm. on the Apoc. Books; and Fritzsche, Exeg. Handb. zu den Apok. des A. T. i. 1:111 ff.

DANITES, THE (דָּנִיטִים): דָּנָי [Vat. res.], דָּנָי, דָּנָי, דָּנָי (Vat.-res.); דָּנָי, דָּנָי (Vat.-res.); Alex. דָּנָי, דָּנָי (Din). The descendants of Dan, and members of his tribe (Judg. xii. 2, xvii. 1, 11; 1 Chr. xii. 35).

DAN-JA'AN (דָּנִיָּא): דָּנִיָּה [Vat. res.-] or דָּנִיָּה; Alex. דָּנִיָּהוֹנָא קאַו לודאָא; [Abl. דָּנִיָּהוֹנָא: Comp. דָּנִיָּהוֹנָא: Dim. דָּנִיָּהוֹנָא: Don yulecstin], a place named only in 2 Sam. xxiv. 6 as one of the points visited by Joab in taking the census of the people. It occurs between Gilead and Zebon, and therefore may have been somewhere in the direction of Dan (Lishah), at the sources of the Jordan. The reading of the Alex. LXX. and of the Vulg. was evidently דָּנִיָּא, Don-jaan, the nearest translation of which is 'Dan in the wood.' This reading is approved by Gesenius, and agrees with the character of the country about Tel el-Milk First (Handbuchverzeichb. p. 303) compares Dan-jaan with Baal-jaan, a Phoenician divinity whose name is found on coins. Thenius suggests that Jaan was originally Lishah, the ה having fallen away, and ה having been substituted for ו (Exeg. Handb. auf Sam. p. 257). There seems no reason for doubting that the well-known Dan is intended. We have no record of any other Dan in the north, and even if this were not the case, Dan, as the accepted

northern limit of the nation, was too important place to escape mention in such a list as that in the text. Dr. Schultz, the late Prussian Consul at Jerusalem, discovered an ancient site called Doni or Doniy, in the mountains above Khon-en-Naharon, which has proprieties to the north with Dan-jaan (Van de Velde, Memoir, p. 306), but this requires confirmation. G.

DAN'NAH (דָּנְנָה) [depression, low ground, Ges., Fürst]; דָּנְנָה: Donnay), a city in the mountains of Judah (Josb. xv. 49), and, from its mention with Debir and Socoh, probably south or southwest of Hebron. No trace of its name has been discovered.

G.

DAPH'NE (דָּפְנֶה) [Daphne], a celebrated grove and sanctuary of Apollo, near Antioch in Syria. Its establishment, like that of the city, was due to Seleucus Nicator. The distance between the two places was about 5 miles, and in history they are associated most intimately together. Just as Antioch was frequently called 'A. el- דָּפְנֶה, and a דָּפְנֶה, so conversely we find the name Δ. δαφνας Antiochus (Joseph. B. J. i. 12, § 5). The situation was of extreme natural beauty, with perennial fountains and abundant wood. Seleucus localized here, and appropriated to himself and his family the fables of Apollo and the river Penes and the nymph Daphne. Here he erected a magnificent temple and colossal statue of the god. The succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. Among other honors, it possessed the privileges of an asylum. It is in this character that the place is mentioned, 2 Macc. iv. 33. In the reign of Antiochus Epiphanes (B. c. 171) the aged and patriotic high-priest Onias, having reburied Meleabas for his sacrilege at Jerusalem, took refuge at Daphne; whence he was treacherously brought out, at the instance of Menchas, and murdered by Andronius, who was governor of Antioch during the king's absence on a campaign. Josephus does not give this account of the death of Onias (Ant. xii. 5, § 1). When Syria became Roman, Daphne continued to be famous as a place of pilgrimage and vice. 'Daph- nici moveb' was a proverb (see Gibbon's 23d chapter).

The beginning of the decay of Daphne must be dated from the time of Julian, when Christianity in the Empire began to triumph over Heathenism. The site has been well identified by Poseck and other travellers at Bel-el-Mour, 'the House of the Water,' on the left bank of the Orontes, to the S. W. of Antioch, and on higher ground; where the fountains and the wild fragrant vegetation are in harmony with all that we read of the natural characteristics of Apollo's sanctuary. J. S. H.

* Besides the famous description in Gibbon's 23d chapter, referred to above, an account of Daphne and its worship will be found in K. O. Müller's dissertations De Antiquithudibus Antiochenis (Gottling, 1829), p. 41 ff. A remarkable Greek inscription of the date 180 n. c., relating to the worship of Apollo and Artemis at Daphne, was discovered in 1838, in a garden on the ancient site of the place, by the Rev. Homer B. Morgan, an American missionary in Syria, and published, with a translation, by Prof. James Hadley in the Journal of the American Oriental Society, iv. 350-355 comp. v. p. 353. The inscription stone itself is now in the Library of Yale College New Haven. A.

a Not a bad specimen of the wild and gratuitous suggestions which sometimes occur even in these generally careful Manuals.
DARIUS (Δαριάος) [contracted for the word below]: Δαρᾶς; [Vat.] Alex. Δαος; Comp. Δαρᾶδη: Syr. Pesh. Darā da: Dara. [Der.], Ezr. G. [Darda.], called fame Alex. much ill greatly again. In 5d; low.

1. 1 Chr. ii. 6. [Dardas.]

DARDA (Δαρδα [heart of wisdom; perh. thorn, thistle, see Destr. in Ges. s. v.]: Δαρδαῖος: Alex. τὸν Δαρδαίαν; [Ahd. with 17 MSS. ευν Δαρδαίαν: Comp. τὸν Δαρδαίαν] Joseph. Δαρδαίος: Dardaia, a son of Mahol, one of four men of great fame for their wisdom, who were excelled by Solomon (1 K. iv. 31). Ethan, the first of the four, is called "the Ezrachite," but it is uncertain whether the designation extends to the others. [Ethian.] In 1 Chr. ii. 6, however, the same four names occur again as "sons of Zerach," of the great family of Piarez in the tribe of Judah, with the slight difference that Darda appears as Dara. The identity of these persons with those in 1 K. iv. has been much debated (see the arguments on both sides in Burrelling, 1. 296-38); but there cannot be a much reasonable doubt that they are the same.

2. The son of Zerach would be without difficulty called in Hebrew the Ezrachite, the change depending merely on the position of a vowel point. [Ezrachite.] And further, the change is actually made by the Targum Jonathan, which in Kings has "son of Zerach." The word "son" is used in Hebrew so often to denote a descendant beyond the first generation, that no stress can be laid on the "son of Mahol," as compared with "son of Zerach." For instance, of the five "sons of Judah" in 1 Chr. iv. i, the first was really Judah's son, the second his grandson, the third his great-grandson, and the fourth and fifth still later descendants. Besides there is great plausibility in the conjecture that "Bne Mahol" means "sons of the choir," in which case the men in question were the famous musicians, two of whom are named in the titles to Psalms xxxviii. and lxviii. [Mahol.]

DARIC (Δαρίκος, Ἰρανοβός, Ἰρανλοβος), only in pl.: Tadm. Ἰρανοβός: solubus, drachma; Ex. li. 69, viii. 27; Neh. vii. 70, 71, 72; 1 Chr. xix. 7), a gold coin current in Palestine in the period after the return from Babylon. That the Hebrew word is, in the Bible, the name of a coin and not of a weight appears from its similarity to the Greek appellation of the only piece to which it could refer. The mentions in Ezra and Neh. show that the coin was current in Palestine under Cyrus and Artaxerxes Longimanus. At these times there was no large issue of gold money except by the Persian kings, who struck the coin known to the Greeks as the στατήρ Δαρειός, or Δαρειός. The Darics which have been discovered are thick pieces of pure gold, of archaic style, bearing on the obverse the figure of a king with bow and javelin, or bow and dagger, and on the reverse an irregular inscription. Their full weight is about 128 grains troy, or a little less than that of an Attic stater, and is most probably that of an early drachm of the Phoenician type. They must have been the common gold pieces of the Persian empire. The oldest that we have seen cannot refer to an earlier period than about the time of Cyrus, Cambyses, or Darius Hystaspis, and it is more probable that they are not anterior to the reign of Xerxes, or even that of Artaxerxes Longimanus. There are, however, gold pieces of about the same weight, but of an older style, found about Sardis, which cannot be doubted to be either of Croesus or of an earlier Lydian king, in the former case the Κροιωνία (στατηρίας) of the Greeks. It is therefore probable, as these followed a Persian standard, that Daries were struck under Cyrus or his nearer successors. The origin of this coin is attributed by the Greeks to a Darius, supposed by the moderns to be either Darius the Mede, or Darius Hystaspis. That the Greeks derived their distinctive appellation of the coin from this proper name cannot be doubted; but the difference of the Hebrew forms of the former from that of the latter renders this a questionable derivation. Gesenius suggests the ancient Persian word Dara (Handw. s. v., "king") but (in his Thes. s. v.) inclines to connect the Hebrew names of the coin and that of Darius. In favor of the derivation from Dara, it must be noted that the figure borne by these coins is not that of any one king, but of the king of Persia in an abstract sense, and that on the same principle the coins would rather be called regal coins than Darics. The silver Darics mentioned by Plutarch (Cin. p. 10) are probably the Persian silver pieces similar in type to the gold Darics, but weighing a drachm and a third of the same standard. See Money and Dict. of Ant. art Daricæn. R. S. P.

Darius. Obv.: King of Persia to the right, kneeling, bearing bow and javelin. Rev.: Irregular insc. square.

DARIUS (Δαριανος, Ναριβανος, Tavirvanus, Tavirvoanus, in Inscr.: Δαρειος, ΙXV.: Δαρεις, Strab. xvi. p. 789: Δαροιος, Ουτε), the name of several kings of Media and Persia. Herodotus (vi. 98) says that the name is equivalent to θυριος (θηριος), the restrainer: and this is probably correct from the analogy of the Persian dorsâv, "restraint;" Sanskr. δικαίω, "firmly holding." (Gesen. Thes. s. v.). Herodotus gives a double derivation: Δαριας ἐσχή Περσῶν ἀφ θυριον ἐσχμη ἀπὸ δι θεριον ἔσχαος. Others have regarded the word as another form of the modern Persian dor, deroz, "a king;" but this sense of dorâ is not justified by usage, and it is rather the epithet of a king (the holder, restrainer, as above) than the title itself (Ges. l. c.). Three kings bearing this name are mentioned in the O. T.

1. Darius the Mede (Δαριας, Dan. xi: 1; Chal. Dāriā, vi. 1), "the son of Ahasuerus of the seed of the Medes" (ix. 1), who succeeded to (Δαριας) the Babylonian kingdom on the death of Belshazzar, being then sixty-two years old (Dan. v. 31 (lx.X. Απαρααριας), ix. 1). Only one year of his reign is mentioned (Dan. ix. 1, xi. 1); but that was of great importance for the Jews. Daniel was advanced by the king to the highest dignity
The extreme obscurity of the Babylonian annals has given occasion to three different hypotheses as to the name under which Darius the Mede is known in history. The first of these, which identifies him with Darius Hystaspis, rests on no plausible evidence, and may be dismissed at once (Lengerke, Darius, p. 219 f.). The second, which was adopted by Josephus (Ant. xii. 11, § 4), and has been supported by many recent critics (Pertz, Lengerke, Hävernick; Hengstenberg; Ameltern, Daniel und d. Offenbarung, p. 16 ff.) is more deserving of notice. According to this he was (Cyr. ii. 1) "the son and successor of Astyages" (Joseph. l. c. ἦν ἀστιγάυος οὗς, ἔτερον δὲ παρὰ τοῖς Ἑλληνσὶ ἐκεῖτο δούμα), who is commonly regarded as the last king of Media. It is supposed that the reign of this Cyaxares has been neglected by historians from the fact that through his inaudience and luxury he yielded the red exercise of power to his nephew Cyrus, who married his daughter, and so after his death received the crown by direct succession (Xen. Cyrop. l. 5, § 2, iv. 5, § 8, vii. 5, § 19). But it appears to be a fatal objection to this hypothesis that the only direct evidence for the existence of a second Cyaxares is that of Xenophon's romance (cf. Niebuhr, Gesch. Ass. u. Bab. p. 61). The title Cyaxares (şı lưu) Cyprusia, which has been quoted from an inscription (Aulener, Daniel d. Offenbarung, p. 18), is either a false reading or certainly a false translation (Niebuhr, Gesch. Ass. u. Bab. 214, n. 4); and the passage of Ἱσσαχρ (Pers. 766 ff.) is inconsistent with the character assigned to Cyaxares II. On the other hand, Herodotus expressly states that "Astyages" was the last king of the Medes, that he was conquered by Cyrus, and that he died without leaving any male issue (Herod. i. 73, 109, 127 ff.); and Cyaxares appears as the immediate successor of "Astyages" in the Chronicle of Eusebius (Chron. ad. Ól. 54; Synecell. p. 188; cf. Bell and Dragor, 1.). A third identification (Winer, Rech. s. v.; Niebuhr, Gesch. Ass. u. Bab. pp. 45, 92) remains, by which Darius is represented as the personal name of "Astyages," the last king of the Medes, and this appears to satisfy all the conditions of the problem. The name "Astyages" was national and not personal [Astyages], and Ahasuerus (Achashveirach) represents the name "Hwelekhaštria" Cyaxares, borne by the father of "Astyages" (Tob. xiv. 15). The description of the unnamed king in Ἰσσαχρ (l. c.) as one whose "feelings were guided by wisdom" (φιλενέως γὰρ κατὰ θυμον φαντάστασιν), is applicable to the Darius of Scripture and the Astyages of Herodotus. And as far as the name itself is concerned, there are traces of the existence of an older king Darius before the time of Darius Hystaspis (Schn. ad Arist. Eccles. 508 Δαρεικος — οὑς ἀπὸ Δαρέιου τοῦ Υσαχρ πατόρος, ἀλλ' ἀπὸ ἄγιον τινος παλαιότερος Βασιλεύς ἠνωμαθησαν, cf. Suidas s. v. Δαρεικος). If, as seems most probable, Darius (Astyages) occupied the throne of Babylon as supreme sovereign with Nergalbaraz as vassal-prince, after the murder of Evil-merodach (Belszazzar) n. c. 550, one year only remains for this Median supremacy before the victory of Cyrus n. c. 558, in exact accordance with the notice in Daniel (Niebuhr, L. c.), and the apparent incompleteness of the political arrangements which Darius "purposed" to make (Dan. vi. 3, דָּרָיָּשֵׁש). For the short duration of his supreme power may have caused his division of the empire (Dan. vi. 1 ff.) — a work congenial to his character — to fall into abeyance, so that it was not carried out till the time of his namesake Darius Hystaspis: a suspicion at least as probable as that there is any confusion of the two monarchs in the book of Daniel.

The chronological difficulties which have been raised (Rawlinson, Herodotus, i. 418) against the identification of Darius with Astyages on the assumption that the events in Dan. v. relate to the taking of Babylon by Cyrus (n. c. 558), in which case he would have ascended the throne at seven years of age, are entirely set aside by the work of Marcus Niebuhr, which has been adopted above; and this coincidence serves to confirm the general truth of the hypothesis.

2. Darius the son of Hystaspes (Vashtapa), the fifth in descent from Achaemenes, the founder of the Perso-Aryan dynasty, was, according to the popular legend (Herod. i. 209, 210), already marked out for empire during the reign of Cyrus. Upon the usurpation of the Magian Smerdis [Abytehenes] he conspired with six other Persian chiefs to overthrow the impostor, and on the success of the plot was placed upon the throne n. c. 521. He devoted himself to the internal organization of his kingdom, which had been impeded by the wars of Cyrus and Cambyses, and the confusion of the reign of Smerdis. His designs of foreign conquest were interrupted by a revolt of the Babylonians, under a pretender who bore the royal name of Nabonidus (Niebuhr, Gesch. Ass. u. Bab. p. 94), which was at length put down with great severity (cf. n. c. 516). After the subjugation of Babylon Darius turned his arms against Scythia, Libya (Herod. iv. 145 ff.), and India (Herod. iv. 44). Thrace and Macedonia acknowledged his supremacy, and some of the islands of the Ægean were added to his dominion in Asia Minor and the seaboard of Thrace (n. c. 613-505). Shortly afterwards he came into collision with Greece, and the defeat of Marathon (n. c. 490) only roused him to prepare vigorously for that decisive struggle with the West which was now inevitable. His plans were again thwarted by rebellion. Domestic quarrels (Herod. vii. 2) followed on the rising in Egypt, and he died, n. c. 485, before his preparations were completed (Herod. vii. 4).

With regard to the Jews, Darius Hystaspis pursued the same policy as Cyrus, and restored to them the privileges which they had lost. For the usurpation of Smerdis involved a religion as well as a political revolution, and the restorer of the Magian faith willingly listened to the enemies of a people who had welcomed Cyrus as their deliverer (Ezr. iv. 17 ff.). But in the second year of Darius, n. c. 520, as soon as his power had assumed some solidity, Haggai (Hag. i. 1, ii. 1, 10) and Zechariah (of Babylonia, p. 39, n.) shows that the foundation of the Median empire was really due to Hanukkahv (Cyaxares), in spite of the history of Herodotus.
DARKNESS

encouraged their countrymen to resume the work of restoration (Ezr. v. 1 ff.), and when their proceedings came to the king's knowledge he confirmed the decree of Cyrus by a new edict, and the temple was finished in four years (n. c. 516, Ezr. vi. 15), though it was apparently used before that time (Zech. vii. 2, 3).

3. DARIUS the Persian (Neh. xii. 22, "5 ΛΤτΟντ;," may be identified with Darius H. Xoitus (Ochos), king of Persia b. c. 425—406-4, if the whole passage in question was written by Nehemiah; but the register was continued to a later time, as is not improbable, the occurrence of the name Juddix (xxv. 11, 22), who was high-priest at the time of the invasion of Alexander [ALEXANDER], points to Darius III. Codomans, the antagonist of Alexander and last king of Persia, b. c. 336-330 (1 Mac. i. 1). Cf. John, Arch.

[Arch. ii. 1, 272 ff.; Keil, Arch. b. Fr. § 132, 7, who defends at length the integrity of the passage.] 4. Dαρηνος: [Sln. Alex. Dαρηνος: Arius]. Artes, king of the Lacedaemonians (1 Mac. xii. 7). [Arbes.]

DARKNESS (δεσμός, fem. form τον βεραίνον, and with much variation in the vowel points: σκο-τείνον), is spoken of as encompassing the actual presence of God, as that out of which He speaks, the envelope, as it were, of Divine glory (Ex. xx. 21; 1 K. viii. 12). The cloud symbol of His guidance offered an aspect of darkness to the enemy as of light to the people of Israel. In the description of His coming to judgment, darkness overspreads nature and blots out the sun, &c., is constantly included (Ex. xiii. 9, 10; Joel ii. 31, iii. 15; Matt. xxv. 29; Mark xiii. 21; Luke xx. 17; Rev. vi. 12).

The plague of darkness in Egypt has been ascribed by various neologistic commentators to non-miraculous agency, but without sufficient account of its intense degree, long duration, and limited area, as proceeding from any physical cause, has been given. The darkness και πάνω της γης του Ματτ., xxvii. 45 attending the crucifixion has been similarly attributed to an eclipse. Philemon of Tralles indeed mentions an eclipse of intense darkness, and which began at noon, combined, he says, in Bithynia, with an earthquake, which in the uncertain state of our chronology (see Clinton's Fasti Romani, Olymp. 202) more or less nearly synchronizes with the event. Nor was the account one without reception in the early church. See the testimonies to that effect collected by Whiston (Testimony of Philostrum) Richardson, Lond. 1732. Origens, or. loc. (Latin commentary on St. Matt.) denies the possibility of such a cause, arguing that if the fixed Ptolemaic reckoning the moon must have been about full, and denying that Luke xxii. 35 by the words εικοσικ και αυτος an allusion that facts be the cause. The genuineness of this commentary has been impeached, nor is its tenor consistent with the above. [Olahs, Ces. p. 80; but the argument remains 30 such an assumption as that mentioned below, seems decisive, and has ever since been adhered to. He limits πάνω της γης to Judaea. Dean Alford, or loc., though without stating his reason, prefers the wider interpretation of all the earth's surfaces on which it would naturally have been day. That Philostrum's darkness, perceived so intense in Tralles and Bithynia, was left in Judaea is highly probable, and the Evangelist's testimony to similar phenomena of a coincident darkness and earthquake, taken in connection with the near agreement of time, gives a probability to the supposition that the former speaks of the same circumstances as the latter. Wieseler (Chron. Synops. p. 388), however, and De Wette (Com. on Matt.) consider the year of Phegeon's eclipse an impossible one for the crucifixion, and reject that explanation of the darkness. The argument from the duration (3 hours) is also of great force: for an eclipse seldom lasts in great intensity more than 6 minutes. On the other hand, Seyffarth (Chronology, Soc. pp. 58, 59) maintains that the Jewish calendar, owing to their following the sun, had become so far out that the moon might possibly have been at new, and thus, admitting the year as a possible epoch, revives the argument for the eclipse as the cause. He, however, views this rather as a natural basis than as a full account of the darkness, which in its degree at Jerusalem was still preternatural (ib. p. 138). The pamphlet of Whiston above quoted, and two by Dr. Sykes, Dissertation on the Eclipse mentioned by Philostrum, and Defence of same, Lond. 1733 and 1734, may be consulted as regards the statement of Phegeon. Darkness is also as, in the expression, "kind of darkness," used for the state of the dead (Job x. 21, 22), and is frequently figuratively, for ignorance and blindness, the privation of spiritual light (John i. 5; iii. 19). II.

DARKON (ταυσίσιον) [bauer, Fürst]: Δαρ-κών, Δαρκων; [Alex. in Ext. Δαρκών] Dercmon. Children [sons] of Darkon were among the "servants of Solomon," who returned from Babylon with Zerubbabel (Ezr. ii. 50; Neh. viii. 58). [Lozan.]

* DARLING, twice in the A. V., Ps. xxii. 19, and xxxv. 17, and used there of life as something inexpressibly dear and precious to men (like Homer's φιλώπωτα, and Plato's τιματίστωτα σε, ψυχής) "My only one" would be more correct for ταυσίσιον, the original word, applied properly (mas. or fem.) to something which exists singly and cannot be replaced if lost, as an only son (Gen. xxii. 2) or daughter (Jud. xi. 34). In the Psalms, as above, the Sept. τιτρογιαναί μοι, and the Vulg. "unicum non mecum." II.

* DART. [Arms.]

DATES, margin of 2 Chr. xxxi. 5 only. [Palm Tree.]

DATHAN (ταυσίσιον) [perh. fontanae, connected with fontanae]: Δαθάν: Dathan, a Reubenite chieftain, son of Eliah, who joined the conspiracy of Korah the Levite (Num. xvi. 1, [12, 24], 27.) xxv. 29, Dent. xi. 6; Ps. evi. 17; [Ezra. xvi. 18.]

K. W. B.

DATHEMA (Δαθέμα): Alex. and Josephina, Dathema: other MSS. Δαθημα: [Sin. Dathema: Dathan, a fortress (ταυσισια), Joseph. φρονίμιον) in which the Jews of Tiberias took refuge from the heathen (1 Mac. v. 9). Here they were relieved by Judas and Jonathan (21). They marched from Boaz to Dathena (26, 27) and left it for Masphil (Mizpeh) (35). The reading of the Pe- shitta, Ramath, points to Ramath-Gilead, which can hardly fail to be the correct identification. Ewald however (iv. 339, note) would correct this to Dom iθανε, which he compares with Domath, a place reported by Buxtorff. [G.}
The original Hebrew authorities:

1. The Davideic portion of the Psalms, including such fragments as are preserved to us from other sources, namely, 2 Sam. 1: 10-27, iii. 33, 34, xxii. 1-51, xxiii. 1-7.

2. The "Chronicles" or "State-papers" of David (1 Chr. xxvii. 24), and the original biographies of David by Samuel, Gad, and Nathan (1 Chr. xxix. 29). These are lost, but portions of them no doubt are preserved in

3. The narrative of 1 Sam. xvi. to 1 K. ii. 10; with the supplementary notices contained in 1 Chr. xi. to xxix. 30.

The two slight notices in the heathen historians, Nicolaus of Damascus in his Universal History (Joseph. Ant. vii. 5, § 2), and Eupolemus in his History of the Kings of Judah (Eus. Prep. Ec. ix. 30).

The Hebrew traditions, which may be divided into three classes:

1. The additions to the Biblical narrative contained in Josephus, Ant. vi. 8-vii. 15.

2. The Hebrew traditions preserved in Jerome's Questions Hebraica in Libros Regum et Paralipomenon (vol. iii., Venice ed.)

3. The Rabbinical traditions reported in Bagadage, Hist. des Juifs, lib. v. c. 2; Calmet's Dictionary, art. David.

The MSSalmic traditions, chiefly remarkable for their extravagance, are contained in the Kanon, ii. 250-252, xxviii. 20-24, xxii. 79-82, xxi. 13, and explained in Lane's Selections from the Kavan, pp. 228-242; or amplified in Well's Legenda, Eng. Tr. p. 152-170.

In modern times his life has been often treated, both in separate treatises and in histories of Israel. Winer's article on David refers to monographs on almost every point in his life. In English, the best known is Dr. Chandler's Life, written in the last century; in French, De Choisil's, and that in Bayle's Dictionary. The most recent, and probably the best treatment is that in Kaland's Geschichte des Volkes Israel, iii. 71-257.

His life may be divided into three portions, more or less corresponding to the three old lost biographies by Samuel, Gad, and Nathan: 1. His youth before his introduction to the court of Saul. 2. His relations with Saul. 3. His reign.

1. The early life of David contains in many important respects the antecedents of his future career.

2. Unlike most of the characters of the Scriptures, his family are well known to us by name, and are not without bearing on his subsequent career. They may best be seen in the form of a genealogy.

---

More information could be added to the text, but for now, this provides a clear and comprehensive overview of the historical and critical discussion of the life of David in the ancient and modern literature.
It thus appears that David was the youngest son, probably the youngest child, of a family of ten. His mother's name is unknown. His father, Jesse, was of a great age when David was still young (1 Sam. xvii. 12). His parents both lived till after his final rupture with Saul (1 Sam. xxii. 3). Through them David inherited several points which he never lost. (a) His connection with Moab through his great-grandmother Ruth. This he kept up when he escaped to Moab and entrusted his aged parents to the care of the king (1 Sam. xxii. 3), and it may not have been without its use in keeping open a wider view in his mind and history than if he had been purely Jewish descent. Such is probably the design of the express mention of Ruth in the genealogy in Matt. i. 5. (b) His birthplace, Bethlehem. His recollection of the well of Bethelhem is one of the most touching incidents of his later life (1 Chr. xi. 17). From the territory of Bethelhem, as from his own patrimony, he gave a property as a reward to Chimham, son of Barzillai (2 Sam. xix. 37, 38; Jer. xii. 17); and it is this connection of David with Bethelhem that brought the place again in later times into universal fame, when Joseph went up to Bethelhem, "because he was of the house and lineage of David" (Luke ii. 4). (c) His general connection with the tribe of Judah. In none of the tribes does the tribal feeling appear to have been stronger; and it must be borne in mind throughout the story both of his security amongst the hills of Judah during his flight from Saul, and of the early period of his reign at Hebron, as well as of the jealousy of the tribe at having lost their exclusive possession of him, which broke out in the revolt of Absalom. (d) His relations to Zeruiah and Abigail. Though called in 1 Chr. ii. 16, sisters of David, they are not expressly called the daughters of Jesse; and Abigail, in 2 Sam. xvii. 25, is called the daughter of Nahash. Is it too much to suppose that David's mother had been the wife or concubine of Nahash, and then married by Jesse? This would agree with the difference of age between David and his sisters, and also (if Nahash was the same as the king of Ammon) with the kindnesses which David received first from Nahash (2 Sam. x. 2), and then from Shobai, son of Nahash (xvii. 27). 2. As the youngest of the family he may possibly have received from his parents the name, which first appears in him, of David, the beloved, the darling. But, perhaps for this same reason, he was never intimate with his brethren. The eldest brother, who alone is mentioned in connection with him, and who was afterwards made by him head of the tribe of Judah (1 Chr. xxvii. 18), treated him scornfully and imperiously (1 Sam. xvii. 28), as the eldest brothers of large families are apt to do; his command was regarded in the family as law (xx. 19); and the father looked upon the youngest son as hardly one of the family at all (xvi. 11), and as a mere attendant on the rest (xvii. 17). The familiarity which he lost with his brothers, he gained with his nephews. The three sons of his sister Zeruiah and the one son of his sister Abigail, seemingly from the fact that their mothers were the eldest of the whole family, were probably of the same age as David himself, and they accordingly were to him — especially the three sons of Zeruiah — throughout life in the relation usually occupied by brothers and cousins. In them we see the rougher qualities of the family, which David shared with them, whilst he was distinguished from them by qualities of his own, peculiar to himself. The two sons of his brother Shimeah are both connected with his after history, and both celebrated for the gift of sagacity in which David himself excelled. One was Jonadab, the friend and adviser of his eldest son Amnon (2 Sam. xiii. 3). The other was Jonathan (2 Sam. xxi. 24), who afterwards became the counsellor of David himself (1 Chr. xxvii. 22). It is a conjecture or tradition of the Jews preserved by Jerome (Qu. Heb. on 1 Sam. xxvii. 12) that this was no other than Nathan the prophet, who, being adopted into Jesse's family, makes up the eighth son, not named in 1 Chr. ii. 13-15. But this is hardly probable. The first time that David appears in history at all admits us to the whole family circle. There was a practice once a year at Bethelhem, probably at the first new moon of the year, of holding a tribal feast, at which Jesse, as the chief proprietor of the place, would preside (1 Sam. xx. 6), with the elders of the town. At this or such like feast (xvi. 1. 25,"); They make Nahash — "the serpent" — to be another name of Jesse, because he had no sin except that which he contracted from the original serpent; and thus David inherited none. (Jerome, Qu. Heb. in 1 Sam. xvii. 21.)
David

1] suddenly appeared the great prophet Samuel, driving a heifer before him, and having in his hand a horn of the consecrated oil of the Tabernacle. The people of the land knew this apperition, but were reassured by the August visitor, and invited by him to the ceremony of sacrificing the heifer. The heifer was killed. The party were waiting to begin the feast. Samuel stood with his horn to pour forth the oil, as if for an invitation to begin (comp. ix. 22). He was restrained by divine intimation as son after son passed by, Eliab, the eldest, by his height and his countenance, seemed the natural counterpart of Saul, whose rival, unknown to them, the prophet came to select. But the day was gone when kings were chosen because they were head and shoulders taller than the rest. "Samuel said unto Jesse, Are these all thy children? And he said, There remaineth yet the youngest, and behold he keepeth the sheep.

This is our first and most characteristic introduction to the future king. The boy was brought in. We are enabled to fix his appearance at once in our minds. He was of short stature, thus contrasting with his tall brother Eliab, with his rival Saul, and with his gigantic enemy of Gath. He had red or auburn hair, such as is not frequently seen in his countrymen of the East at the present day. In later life he wore a beard. His bright eyes are especially mentioned (xvi, 12), and generally he was remarkable for the grace of his figure and countenance ("fair of eyes," "comely," "goodly," xvi, 12, xvii, 42). He was well made, and of immense strength and agility. His swiftness and activity made him (like his nephew Asahel) like a wild gazelle, his feet like harts' feet, and his arms strong enough to break a bow of steel (Ps. xviii. 33, 34). He was pursuing the occupation abstracted in Eastern countries usually to the slaves, the females, or the despoiled of the family (comp. the case of Moses, of Jacob, of Zipporali, and Rachel, and in later times, of Mohammed; Spranger, p. 8).

The postures of Bethlehem are famous throughout the sacred history. The Tower of Shepherds (Gen. xxx. 21), the shepherds abiding with their flocks by night (Luke ii.), were both there. He usually carried a switch or wand in his hand (1 Sam. xviii. 40), such as would be used for his dogs (xvii. 49), and a scrip or wallet round his neck, to carry anything that was needed for his shepherd's life (xvii. 40). Such was the outer life of David when (as the later Psalmists described his call) he was "taken from the shepherds, from following the ewes great with young, to feed Israel according to the integrity of his heart, and to guide them by the skillfulness of his hands" (Ps. lxviii. 70-72). The recollection of the sudden and great elevation from this humble station is deeply impressed on his after life. "The man who was raised up on high" (2 Sam. xxiii. 1) — "I have exalted one chosen out of the flock of his people" (Ps. lxxiii. 29) — "I took thee from the sheepfold" (2 Sam. vii. 8).

3. But there was another preparation still more needed for his office, which possibly had made him already known to Samuel, and which at any rate is his next introduction to the history. When the body-guard of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard mentioned David. Saul, with the absolute control inherent in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterwards consecrated in the Psalms. It is impossible not to connect the early display of this gift with the schools of the prophets, who exercised their vocation with tabret, psaltery, pipe, and harp (1 Sam. xv. 5), in the postures (Psiv. 20. xiii. 2); to which he afterwards returned as to his natural home (1 Sam. xix. 18). Whether any of the existing Psalms can be referred to this epoch of David's life is uncertain.

The 23d, from its subject of the shepherd, and from its extreme simplicity (though placed by Ewald somewhat later), may well have been suggested by this time. The 8th, 19th, and 29th, which are universally recognized as David's, describe the phenomena of nature, and as such may more naturally be referred to this tranquil period of his life than to any other. The imagery of danger from wild beasts, lions, wild bulls, &c. (Ps. vii. 2, xxii. 21), must be reminiscences of this time. And now, at any rate, he must have first acquired the art which gave him one of his chief claims to mention in after times — the sweet singer of Israel "(2 Sam. xxiii. 1), "the inventor of instruments of music." (1 Sam. vi. 5): "with his whole heart he sung songs and loved him that made him" (Eccles. xiii. 8). 4. One incident alone of his solitary shepherd life has come down to us — his conflict with the lion and the bear in defense of his father's flocks (1 Sam. xvii. 34, 35). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably against the Philistines (xvi. 18), and when he suddenly appeared in the camp, his elder brother immediately guessed that he had led the sheep in his arduous task to see the battle (xvii. 28). To this new aspect of his character we are next introduced.

There is no perfectly satisfactory means of reconciling the apparently contradictory accounts in 1 Sam. xvi. 14-23, and xvi. 12-31, 55-58. The first
states that David was made known to Saul and became his armor-bearer in consequence of the charm of his music in assuring the king’s melancholy.

The second implies that David was still a shepherd with his father’s flock, and unknown to Saul. The Vatican MS. of the LXX., followed by Kennicott (who argues the question at length, * Dissertation on Hebrew Text. *, 418-432, 551-558), rejects the narrative in 1 Sam. xvi. 12-23, 55-56, as spurious. But the internal evidence from its graphic touches is much in its favor, and it must at least be accepted as an ancient tradition of David’s life. Horsley, but with no external authority, transposes 1 Sam. xvi. 14-23. Another explanation supposes that Saul had forgotten him. But this only solves half the difficulty, and is evidently not the intention of the narrative. It may therefore be accepted as an independent statement of David’s first appearance, modified by the counter-statement already noticed.

a The scene of the battle is at EPHESA-DANNIM, in the frontier-hills of Judah, called probably from this or similar encounters “the bound of blood.” Saul’s army is encamped on one side of the ravine, the Philistines on the other, the water-course of Elah or “the Teredinth” runs between them. A Philistine giant, clad in armor and clothed with complete armor, insults the comparatively defenseless Israelites, amongst whom the king alone appears to be well armed (xviii. 38; comp. xiii. 29). No one can be found to take up the challenge. At this juncture David appears in the camp, sent by his father with ten loaves and ten slices of milk-cheese to his three eldest brothers, fresh from the shepherds. Just as he comes to the circle of wagons which formed, as in Arab settlements, a rude fortification round the Israelite camp (xviii. 29), he hears the well known shout of the Israelite war cry (comp. Num. xxiii. 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers (like one of the royal messengers* ) into the midst of the lines. * Then he hears the challenge, now made for the forthtime — sees the dignity of his countrymen; he hears the reward promised by the king — goes with the impetuousity of

b Variations in the common account are suggested by two other passages. 1. In 2 Sam. xxi. 19, it is stated that “Goliath of Gath, the staff of whose spear was like a weaver’s beam,” was killed (not by David, but) by Elhanan of Bethlehem. This, combined with the fact that the Philistine whom David slew is usually nameless, has suggested to Ewald (iii. 25, 211) the ingenious conjecture that the name of Goliath (which is only given twice to David’s enemy, 1 Sam. vii. 4. xiv. 19) was borrowed from the conditions of the real Goliath with Elhanan, whose Bethlehemite origin has led to the confusion. Jerome (Qui Hebr. est locus) makes Elhanan the same as David. 2. In 1 Chr. xi. 22, Eleazar (or more probably Shammah, 2 Sam. xxiii. 11) is said to have fought with David at Ephes-dammim against the Philistines. It is of course possible that the same scene may have witnessed two encounters between Israel and the Philistines; but it may also indicate that David’s first acquaintance with Eleazar, afterwards one of his chief captains, was made on this memorable occasion.

The conjecture of Ewald is wholly unnecessary. The Philistine whom David slew is as expressly called Goliath (see above) as the Philistine whom Elhanan slew, and, as the writer of the book of Samuel distinctly

Youth from soldier to soldier talking of the event in spite of his brother’s rebuke — he is introduced to Saul — undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapons with which it was accomplished — not the armor of Saul, which he naturally found too large, but the shepherd’s sling, which he always carried with him, and the five polished pebbles which he picked up as he went from the water-course of the valley, and put in his shepherd’s wallet.* Two trophies long remained of the battle — one, the huge sword of the Philistine, which was hung up behind the ephod in the Tabernacle at Nob (1 Sam. xxii. 9); the other, the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. (N. B.) 1s. exiliv. though by its contents of a much later date, is by the title in the LXX. “against Goliath.” But there is also a psalm, preserved in the LXX. at the end of the Psalter, and which, though probably a mere adaptation from the history, well sums up this early period of his life: “This is the psalm of David’s own writing (7) διδαγμένος εἰς Δαυίδ, and outside the number, when he fought the single combat with Goliath.” As I was small amongst my brethren, and was no greater in my father’s eyes (which was after I was feeding my father’s sheep). My hands made a harp, and my fingers fitted a psaltery. And who shall tell it to my Lord? He is the Lord, He heareth. He sent his messenger (angel*) and took me from my father’s flock, and anointed me with the oil of His anointing. My brothers were beautiful and tall, but the Lord was not well pleased with them. I went out to meet the Philistine, and he came to me in his array, and he put on his armor, and armed his horse with his armor. He debated with me, and he said, ‘Am I a dog that thou art come to me with thine sword and with thine bow? Wherefore comest thou to me with thine sword and with thine bow? Loved I not, the Lord my God the enemy? For if I had not done so, now would they have come up against me with one mouth. ’

2. Relations with Saul. — We now enter on a new aspect of David’s life. The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court. Jonathan was inspired by the romantic friendship which bound the two youths together to the end of their lives. The triumphant songs* of the Israelitish women announced that they felt that

Loved I not, the Lord my God the enemy? For if I had not done so, now would they have come up against me with one mouth. ’

2. Relations with Saul. — We now enter on a new aspect of David’s life. The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court. Jonathan was inspired by the romantic friendship which bound the two youths together to the end of their lives. The triumphant songs* of the Israelitish women announced that they felt that
in him Israel had now found a deliverer mightier even than Saul. And in those songs, and in the name which David thus acquired, was laid the foundation of that unhappy jealousy of Saul towards him which, mingling with the king's constitutional malady, possessed the son of Jesse, andler years, of David.

Three new qualities now began to develop themselves in David's character. The first was his prudence. It had been already glanced at on the first mention of him to Saul (1 Sam. xvi. 18), "prudent in matters." But it was the marked feature of the beginning of his public career. Thrice over it is emphatically said, "he behaved himself wisely;" and evidently with the impression that it was the wisdom called forth by the necessities of his delicate and difficult situation. It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterwards in the persecuted Israelites of the Middle Ages. One instance of it appears immediately, in his answer to the trap laid for him by Saul's servants, "Seemeth it to you a light thing to be the king's son-in-law, seeing that Saul hath slain both the males and females of the Amalekites?" (xviii. 23). Secondly, we now see his magnanimous forbearance called forth, in the first instance, towards Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtue of chivalry. Thirdly, his hairbreadth escapes, continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch. His usual oath or assurance in later times was, "As the Lord liveth which hath redeemed my soul out of adversity." (2 Sam. iv. 9; 1 K. i. 29); and the Psalms are filled with imagery taken even literally from shelter against pursuers, slipping down precipices (Ps. xviii. 36), hiding-places in rocks and caves, leafy covert (xxxi. 20), strong fastnesses (xlviii. 2).

This course of life subdivides itself into four portions:

1. His life at the court of Saul till his final escape (1 Sam. xvii. 2—xxix. 18). His office is not exactly defined. But it would seem that, having been first armor-bearer (xvi. 21, xviii. 2), then made captain over a thousand—the subdivision of a tribe—(xviii. 13), he finally, on his marriage with Michal, the king's second daughter, was raised to the high office of captain of the king's body-guard, second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent. These three formed the usual companions of the king at his meals (xx. 25). David was now chiefly known for his successful exploits against the Philistines, by one of which he won his wife, and drove back the Philistine power with a bow from which it only rallied at the disastrous close of Saul's reign. He also still performed from time to time the office of ministrel. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out, at last convinced him that his life was no longer safe. He had two faithful allies, however, in the court—the son of Saul, his friend Jonathan, and the son of Saul, his wife Michal. Warned by the one, and assisted by the other, he escaped by night, and was from thenceforward a fugitive. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death (2 Kith. viii.). To this escape the traditional title assigns Ps. lix. Internal evidence (according to Ewald) gives Ps. xvi. and xvii. to this period.

In the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Chr. xii. 17) according to the title of the psalm, Cush, a Benjamite, and therefore of Saul's tribe.

2. His escape (1 Sam. xix. 18—xxii. 15).—(a.) He first fled to Nainath (or the pastures) of Ramah, his family's native place. It was the first time we hear of his meeting with Samuel since the original interview during his boyhood at Bethlehem. It might almost seem as if he had intended to devote himself with his musical and poetical gifts to the prophetic office, and give up the cares and dangers of public life. But he had a higher destiny still. Up to this time both the king and himself had thought that a reunion was possible (see xx. 5, 29). But the madness of Saul now became more settled and fiercer in character; and David's danger proportionately greater. The secret interview with Jonathan, of which the recollection was probably handed down through Jonathan's descendants when they came to David's court, confirmed the alarm already excited by Saul's endeavor to seize him at Ramah, and he now determined to leave his country, and take refuge, like Coriolanus, or Themsites, in like circumstances, in the court of his enemy. Before this last resolve, he visited Nain, the seat of the Tabernacle, partly to obtain a final interview with the High-priest (1 Sam. xxii. 9, 19), partly to obtain food and weapons. On the pretext of a secret mission from Saul, he gained an answer from the oracle, some of the consecrated loaves, and the consecrated sword of Goliath. "There is none like that: give it me." The incident was of double importance in David's career. First, it established a connection between him and the only survivor from the massacre in which David's visit involved the house of Ahimelech. Secondly, from Ahimelech's surrender of the consecrated bread to David's hunger our Lord drew the inference of the superiority of the moral to the ceremonial law, which is the only allusion made to David's life in the N. T. (Matt. xii. 3; Mark ii. 26).

3. His flight to the mountains (xi. 1, comp. 1 Sam. xxvi. 20), and probably to the neighborhood of the Dead Sea (xi. 6), rather point to the time when he was at En-gezi.

The statement of his pretended mission is differently given in the Hebrew and in the LXX. It must be observed that the young men spoken of as his companions were Imaginary. He was quite alone.

(a) It is a characteristic Jewish comment (as distinguished from the lesson drawn by Christ) that the bread was useless to him (Jerome, Qu. Hen. in loc.).
556

DAVID

25: Luke vi. 3, 4). It is also commemorated by the traditional title of Ps. liii.

(b) His stay at the court of Achish was short. Discovered possibly by "the sword of Goliath," his presence revived the national emnity of the Philistines against their former conqueror: and he only escaped by feigning madness, violent gestures, playing on the gates of the city, or on a drum or cymbal, letting his beard grow, and leaning at the month (1 Sam. xxi. 13, LXX.). The 95th and 34th psalms are both referred by their titles to this event, and the titles state (what does not appear in the narrative) that he had been seized as a prisoner by the Philistines, and that he was, in consequence of this stratagem, set free by Achish, or (as he is twice called) Abimelech.

3. His life as an independent outlaw (xxxi. 1—xxvi. 25. (c) His first retreat was the cave of Adullam, probably the large cavern (the only very large one in Palestine), not far from Bethlehem, now called Khurjat (see Bone's Land of Promise, p. 244). From its vicinity to Bethlehem, he was joined there by his whole family, now feuding themselves securely from Saul's fury (xxxi. 1). This was probably the foundation of his intimate connection with his nephews, the sons of Zeruiah.

Of these, Abishai, with two other companions, was perhaps the earliest (1 Chron. xi. 15, 20; 1 Sam. xxvii. 5); they were joined by Saul's, three years later (1 Sam. xxi. 2, 18). Beside these, there were outlaws and debtors from every part, including doubtless some of the original Commandos of whom the name of one at least has been preserved, Abimelech the Hittite (1 Sam. xxvi. 6).b

(b) His next move was to a stronghold, either the mountain, afterwards called Herodion, close to Adullam, or the fastness called by Josephus (B. J. viii. 8, § 3) Mezubahu, the Grecised form of the Hebrew word Mo'eaz (1 Sam. xxiv. 4, 5; 1 Chron. xii. 11), in the neighborhood of Engedi. Whilst there, he had deposited his aged parents, for the sake of greater security, beyond the Jordan, with their陬ial kinman of Moab (ib. 3). The neighboring king, Nahash of Ammon, also treated him kindly (2 Sam. x. 2). Here another companion appears for the first time, a schoolfellow, if we may take the word, from the schools of Samuel, the prophet God (2 Sam. x. 3; 1 Chron. xii. 5); and whilst he was there, occurred the chivalrous exploit of the three heroes just mentioned to procure water from the well of Bethelhem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1 Chron. xi. 16—19; 2 Sam. xxiii. 14—17). He was joined here by two separate bands. One a body of eleven fierce Gadite mountaineers, who swam the Jordan in flood time to reach him (1 Chron. xii. 8). Another was a detachment of men from Judah and Benjamin under his nephew Ammiel, who henceforth attached himself to David's fortunes (1 Chron. xii. 16—18).

(c) At the warning of God, he fled next to the forest of Horod (somewhere in the hills of Judah, but its exact site unknown), and then again fell in with the Philistines, and again, apparently advised by God (xxxi. 4) made a descent on their foraging parties, and relieved Kirath (also unknown), in which he took up his abode. Whilst there, now for the first time in a fortified town of his own (xxxi. 7), he was joined by a new and most important ally—Abinadab, the last survivor of the house of Ishmaur, who came with the High-priest's Ephod, and henceforth gave the oracles, which David had hitherto received from Gad (xxxi. 6, 9, xxi. 21). By this time, the 400 who had joined him at Adullam (xxii. 2) had swelled to 600 (xxxi. 13).

(d) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," amongst the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness, partly from ignorance of the localities, partly because the same event seems to be twice narrated (1 Sam. xxiii. 19-24, xxiv. 1—4, and perhaps 1 Sam. xiv. 1-22, xxv. 5—25). But thus much we discern. He is in the wilderness of Ziph. Once (or twice) the Ziphites betray his movements to Saul. From thence Saul literally hunts him like a partridge, the treacherous Ziphites beating the bushes before him, and 5000 men stationed to catch even the print of his footsteps on the hills (1 Sam. xxiii. 14, 22 (Heb.), 24 (LXX.). xxiv. 11, 13, 20). David finds himself driven to the extreme south of Judah, in the wildernesses of Moab. On two, if not three occasions, the pursuer and pursued catch sight of each other. Of the first of these escapes, the memory was long preserved in the name of the "Ad of Divisions," signifies the cliff down one side of which David climbed, whilst Saul was surrounding the hill on the other side (xxiii. 25-29), and was suddenly called away by a quarrel of a Philistine invasion. On another occasion, David took refuge in a cave "by the spring of the wild goats" (Engedi) immediately above the Dead Sea (1 Sam. xxiv. 1, 2). The rocks were covered with the pursuers. Saul entered, as is the custom in Oriental countries, for a natural necessity. The followers of David, seated in the dark recesses of the cave, seeing, yet not seen, suggest to him the chance thus thrown in their way. David, with a characteristic mixture ofhuman and generosity, descends and softly cuts out the skirt of the long robe, spreads, as is usual in the East on such occasions, before and behind the person so occupied—and then cursed the pathetic scene of remembrance and forgiveness (xxiv. 8—22).d The third (if it can be distinguished from the one just given) was in the wilderness further south. There was a regular camp, formed with its usual fortification of wagon and baggage. Into this encampment David penetrated by night, and carried off the cress of water and the well known royal spear of Saul, which had twice so nearly transfixed him to the wall in former days (xxvi. 7, 11, 22). [Arms, Canith.] The same scene is repeated as at Engedi—and this is the last interview between Saul and David (xxvi. 24). He had already parted with Jonathan in the forest of Ziph (xxvi. 18).

a This is the subject of one of David's apostolic collogues (Fabricius, Cod. psalm. gr. V. T. p. 902).

b Sidonian, who kills the giant at Gob (2 Sam. xxvi. 14), is said by Josephus to have been a Hittite.

c God, as Jerome's Jewish commentators observe

d For the Musilinian legend, see Well, p. 156.
able for the first time to require the friendly inhab-

David's reign.

(1.) As king of Judah at Hebron, 7 years (2 Sam. ii. 11; 2 Sam. i. 1–v. 5).

Hebron was selected, doubtless, as the ancient sacred city of the tribe of Judah, the burial place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king—by whom is not stated—but the expression seems to limit the inauguration to the tribe of Judah, and therefore to exclude any intervention of Abiathar (2 Sam. ii. 4). To Judah his dominion was nominally confined. But probably for the first five years of the time the dominion of the house of Saul, whose seat was now at Mahanaim, did not extend to the west of the Jordan; and consequently David would be the only Israelite potentate amongst the western tribes. Gradually his power increased, and during the two years which followed the elevation of Ishboseth, a series of skirmishes took place between the two kingdoms. First came a successful inroad into the territory of Ishboseth (2 Sam. ii. 28). Next occurred the defection of Abner (2 Sam. iii. 12), and the surrender of Michal, who was now separated from her second husband to return to her first (2 Sam. iii. 15). Then rapidly followed, though without David's consent, the successive murders of Abner and of Ishboseth (2 Sam. iii. 30, iv. 5). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. A solemn league was made between him and his people (2 Sam. iii. 3). For the time being he was anointed king, and a festival of three days celebrated the joyous event (1 Chr. xii. 39). His little band had now swelled into "a great host, like the host of God" (1 Chr. xii. 22). The com-

mand of it, which had formerly rested on David alone, he now devolved on his nephew Joab (2 Sam. ii. 28). It was formed by contingents from every tribe of Israel. Two are specially mentioned as bringing the weight of authority above the others. The sons of Issachar had "understanding of the times to know what Israel ought to do," and with the adjacent tribes contributed to the common feast the peculiar products of their rich territory (1 Chr. xii. 32, 40). The Levitical tribe, formerly represented in David's following only by the solitary fugitive Abiathar, now came in strength, represented by the head of the rival branch of Eleazar, the High-priest, the aged Jehoiada and his youth-

3 Joseph. Ant. vi. 13, § 5, calls it Abasar.

4 But the value of this is materially damaged by the varied weight of the LXX. to "4 months and 20 days."
The only psalm directly referred to this epoch is the 27th (by its title in the LXX. Ποιο τοι τραγο-
δία — "before the anointing" i.e. at Hebron). ';

Underneath this show of outward prosperity, two cankers, incident to the royal state which David now assumed, had first made themselves apparent at Hebron, which darkened all the rest of his career. The first was the formation of a harem, according to the usage of Oriental kings. To the two wives of his wandering life, he had now added four, and including Michal, five (2 Sam. ii. 2, iii. 2-5, 15). The second was the increasing power of his kinsmen and chief officers, which the king strove to restrain within the limits of right, and thus of all the incidents of this part of his career the most plaintive and characteristic is his humiliation over his powerlessness to prevent the murder of Absner (2 Sam. iii. 31-36).

(II.) Reign over all Israel 33 years (2 Sam. v. 5, to 1 K. ii. 11).

1. The Foundation of Jerusalem. — It must have been with no ordinary interest that the surrounding nations watched for the prey on which the Lion of Judah, now about to issue from his native hair, and establish himself in a new home, would make his first spring. One fastness alone in the interior of the land had hitherto defied the arms of Israel. On this, with a singular presence, David fixed as his future capital. By one sudden assault Jehos was taken, and became henceforth known by the names (whether borne by it before or not we cannot tell) of Jerusalem and Zion. Of all the cities of Palestine great in former ages, Jerusalem alone has vindicated by its long permanence the choice of its founder. The importance of the capture was marked at the time. The reward bestowed on the successful seer of the precipice, was the highest place in the army. Joab henceforward became captain of the host (1 Chr. xvi. 6). The royal residence was instantly fixed there — fortifications were added by the king and by Joab — and it was known by the special name of the "city of David" (1 Chr. xi. 7; 2 Sam. v. 9).

The neighboring nations were partly enraged and partly awestruck. The Philistines made two ineffectual attacks on the new king (2 Sam. v. 17-20), and a retribution on their former victories took place by the capture and configuration of their own idols (1 Chr. xiv. 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram — sent embassage for the building of the new capital (2 Sam. v. 11), especially for the palace of David himself (2 Sam. vii. 2). Unfulfilled and profane as the city had been before, it was at once elevated to a sanctity which it has never lost, above any of the ancient sanctuaries of the land. The ark was now removed from its obscurity at Kirjath-jearim with marked solemnity. A temporary halt (owing to the death of Uzzah) detained it at Obed-edom's house, after which it again moved forward with great state to Jerusalem. An assembly of the nation was convened, and (according to 1 Chr. xvi. 2, xx. 2-27) especially of the Levites. The musical arts in which David himself excelled were now developed on a great scale (1 Chr. xxv. 16-22; 2 Sam. vi. 5). Zadok and Abiathar, the representatives of the two Abrahamic families, were both present (1 Chr. xxv. 11). Jeremiah presided over the music (1 Chr. xxv. 27). Obed-edom followed his sacred charge (1 Chr. xv. 18, 21, 34). The prophet Nathan appears for the first time as the controlling adviser of the future (2 Sam. vii. 3). A sacrifice was offered as soon as a successful start was made (1 Chr. xv. 27; 2 Sam. vi. 14, 20). As in the prophetic schools where he had himself been brought up (1 Sam. x. 5), and as still in the impressive ceremonial of some Eastern Dervishes, and of Seville cathedral (probably derived from the East), a wild dance was part of the religious solemnity. Into this David threw himself with unreserved enthusiasm, and thus conveyed the symbol of the presence of Jehovah into the ancient heathen fortress. In the same spirit of uniting the secular with the royal functions, he offered sacrifices on a large scale, and himself gave the benediction to the people (2 Sam. vi. 17, 18; 1 Chr. xvi. 2). The scene of this inauguration was on the hill which from David's habitation was specially known as the "City of David." As it to mark the new era he had not brought the ancient tabernacle from Gileon, but had erected a new tent or tabernacle (1 Chr. xx. 1) for the reception of the ark. It was the first beginning of the great design, of which we will speak presently, afterwards carried out by his son, of erecting a permanent temple or palace for the ark, corresponding to the state in which he himself was to dwell. It was the greatest day of David's life. One incident only tarnished its splendor — the reproach of Michal, his wife, as he was finally entering his own palace, to carry to his own household the children of the Philistines which had already been born on his people. [MICHAL.] His act of severity towards her was an additional mark of the stress which he himself laid on the solemnity (2 Sam. vi. 20-23; 1 Chr. xx. 29).

No less than eleven psalms, either in their traditional titles, or in the irresistible evidence of their contents, bear traces of this great festival. The 21st psalm (by its title in the LXX.) is said to be on the "Going forth of the tabernacle." The 30th (by its title), the 15th and 118th by their contents, express the feelings of David on his occupation of his new home. The 68th, at least in part, and the 24th seem to have been actually composed for the entrance of the ark into the
ancient gates of the heathen fortress—and the last words of the second of these two psalms may be regarded as the inauguration of the new name by which, God henceforth is called, The Lord of hosts.

Who is this king of glory? "The Lord of hosts, He is the king of glory" (Ps. xxiv. 10; comp. 2 Sam. vi. 2). Fragments of poetry worked up into psalms (xvii. 2-13; e.vi. 1, 47, 48), occur in 1 Chr. xvi. 8-36, as having been delivered by David into the hands of Asaph and his brothers under the close of the festival, and the two mysterious terms in the titles of Ps. vi. and xvi. (Sheminith and Alamoth) appear in the lists of these mentioned on this occasion in 1 Chr. xvi. 23, 21. The 132d is, by its contents, if not by its authorship, thrown back to this time. The whole progress of the removal of the ark is traced in David's reign.

(2.) Foundation of the Court and Empire of Israel, 2 Sam. viii. to xii. — The erection of the new capital at Jerusalem introduces us to a new era in David's life and in the history of the monarchy. Up to this time he had been a king, such as Saul had been before him, or as the kings of the neighboring tribes, each ruling over his territory, unconcerned with any foreign relations except so far as necessary to defend his own nation. But David, and through him the Israelitish monarchy, now took a wider range. He became a king on the scale of the great Oriental sovereigns of Egypt and Persia, with a regular administration and organization of court and camp; and he also founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen. xv. 18-21). The internal organization now established lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. For once, the kings of Israel were on a level with the great potentates of the world. David was an imperial conqueror, if not of the same magnitude, yet of the same kind, as Rameses or Cyrus, — "I have made thee a great name like unto the name of the great men that are in the earth" (2 Sam. vii. 9). Thou hast shed blood abundantly, and hast made great wars" (1 Chr. xiiii. 8). And as, on the one hand, the external relations of life, and the great incidents of war and conquest receive an elevation by their contact with the religious history, so the religious history swells into larger and broader dimensions from its contact with the course of the outer world. The enlargement of territory, the amplification of power and state, leads to a corresponding enlargement and amplification of ideas, of images of sympathies; and thus (humanly speaking) the magnificent forebodings of a wider dispensation in the prophetic writings first became possible through the court and empire of David.

(a.) In the internal organization of the kingdom the first new element that has to be considered is the royal family, the dynasty, of which David was the founder, a position which entitled him to the name of "Patriarch" (Acts ii. 29) and (ultimately) of the ancestor of the Messiah.

Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv. 25; 1 K. i. 6); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1 K. xv. 2). The princes were under the charge of Jehiel (1 Chr. xxvii. 32); perhaps the Levite (1 Chr. xxiv. 21; 2 Chr. xxiv. 14), with the exception of Solomon, who (according at least to one rendering) was under the charge of Nathan (2 Sam. xii. 25). David's strong parental affection for all of them is very remarkable (2 Sam. xiiii. 31, 33, 36, xiv. 36, xviii. 5, 33, xiv. 4; 1 K. i. 6).

(b.) The military organization, which was in fact inherited from Saul, but greatly developed by David, was as follows:

(1.) "The Host," i.e. the whole available military force of Israel, consisting of all males, capable of bearing arms, and summoned only for war. This had always existed from the time of the first settlement in Canaan, and had been commanded by the chief or the judge who presided over Israel for the time. Under Saul, we first find the recognized post of a captain or commander-in-chief—in the person of Abner; and under David this post was taken by Joab, as a reward for the assault on Jerusalem, to his nephew Joab (1 Chr. xi. 4, xxvii. 44), who conducted the army to battle in the absence of the king (2 Sam. xiiii. 26). There were 12 divisions of 24,000 each, who were held to be in duty month by month; and over each of them presided an officer, selected for this purpose from the other military bodies formed by David (1 Chr. xxvii. 1-15). The army was still distinguished from those of surrounding nations by its primitive aspect of a force of infantry without cavalry. The only innovations as yet allowed were, the introduction of a very limited number of chariots (2 Sam. viii. 4) and of mules for the princes and officers instead of the asses (2 Sam. xiiii. 29, xviii. 9). According to a Massu-aULaA™ tradition (Koran, xxi. 80), David invented chain armor. The usual weapons were still spears and shields, as appears from the Psalms. For the general question of the numbers and equipment of the army see the Notes on 2 Sam. xiiii. 41-44.

(2.) The Body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer (1 Sam. xxi. 14; Ewald). But it now assumed a peculiar organization. They were at least in name foreigners, as having been drawn from the Philistines, probably during David's residence at the court of Gath. They are usually called from this circumstance "Philistines and Pelethites," but had also a body especially from Gath amongst them, of whom the name of one, Ittai, is preserved, as a faithful servant of David (2 Sam. xv. 19). The captain of the force was, however, not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David, and became the chief support of a good coat of mail is often called by the Arabs "Dastor."

"Dastor," i.e. David's. A tradition in Jerome (Qu. Heb. on 1 Chr. xviii. 17) speaks of their being in the place of the seventy judges appointed by Moses.

But here the reading is doubtful (Ewald, iii. 177, note.)
the throne of his son, namely, Benaijah, son of the chief priest Jehoiada, representative of the eldest branch of Aaron’s house (2 Sam. viii. 18, xx. 23: 1 K. i. 38, 44).

(3.) The most peculiar military institution in David’s army was that which arose out of the peculiar circumstances of his early life. As the nucleus of the Russian army is the Presovinsky regiment formed by Peter the great out of the companions who gathered round him in the suburb of that name in Moscow, so the nucleus of what afterwards became the only standing army in Par- vyd’s forces was the band of 600 men who had gathered round him in his wanderings. The number of 600 was still preserved, with the name of Gibborim, “heroes” or “mighty men.” It became yet further subdivided into 3 large bands of 200 each, and small bands of 20 each. The large bands were commanded by 3 officers, one for each band, who together formed “the thirty,” and the 3 large bands by 3 officers, who together formed “the three,” and the whole by one chief, “the captain of the mighty men” (2 Sam. xxii. 8-39: 1 Chr. xi. 39-47). This commander of the whole force was Abishai, David’s nephew (1 Chr. xi. 20; and comp. 2 Sam. xvi. 9). “The three” were Jashubiah (1 Chr. xi. 11) or Adino (2 Sam. xxii. 32).

a Taken in war (Jerome, Q. H. Reb. and 2 Sam. xiii. 37).

b Ehud alone is called “David’s wife” in the enumeration 2 Sam. iii. 5. The tradition in Jerome (Q. H. Reb. ed. loc.) says that she was Michal; and ed. 2 Sam. vi. 23) that she died in giving birth to Ita-

ra

The LXX. in 2 Sam. vi. 16, after having given substantially the same list as the present Hebrew text, repeats the list, with strange variations, as follows: Samson, Juditha, Nathan, Elisahama, Eleazar, Triheus, Elisahama, Naboth, Hophfe, Jonathan, Lemusah, Bad- math, Ephialath.

cf. Josephus (Ant. vi. 3, § 3) gives the following list, of which only four names are identical. He states that the last two were sons of the concubines: Abigael, Abigail, Bathsheba, Bathsheba. (See Blunt, Conder, H. A.)

The Hebrew text, 2 Sam. xxiii. 8) make them: 1. Is- bosheth the Canaanite; 2. Adino the Asonite; 3. Elea- zar, son of Dalo.

Perhaps the father of Bathsheba, whose marriage with Uriah would thus be accounted for. (See Blunt, Conder, H. A.)
DAVID

18. iv. 3, 6). Each tribe had its own head (1 Chr. xxvii. 16-22). Of these the most remarkable were Eliphaz, David's brother (probably Eliah), prince of Judah (ver. 18), and Jaasiel, the son of Abner, of Benjamin (ver. 21).

But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile; and from his being called "the seer," belongs probably to the earliest form of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2 Sam. vii. 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2 Sam. vii. 5-17, xili. 1-14), as of the purest type of prophetic dispensation, and as the hope of the new generation, which he supports in the person of Solomon (1 K. i.). Two high-priests also appear—representatives of the two rival houses of Aaron (1 Chr. xxiv. 3); here again, as in the case of the two prophets, one, Abiaah, who attended him at Jerusalem, companion of his exile, and connected with the old time of the judges (1 Chr. xxvii. 34), joining him after the death of Saul, and becoming afterwards the support of his son, the other Zadok, who resided at Gilgal (1 Chr. xxvi. 32), and who was made the head of the Aaronic family (xxvii. 17). Besides these four great religious functionaries there were two classes of subordinates—prophets, specially instructed in singing and music, under Asaph, Heman, the grandson of Samuel, and Jeduthum (1 Chr. xxv. 31-37) Levites, or attendants on the sanctuary, who again were subdivided into the guardians of the gates and guardians of the treasures (1 Chr. xxvii. 1-29) which had been accumulated, since the re-establishment of the nation, by Samuel, Saul, Abner, Joab, and David himself (1 Chr. xxvi. 26-28).

The collection of those various ministers and representatives of worship round the capital must have given a new aspect to the history in David's time, such as it had not borne under the disconnected period of the Judges. But the main peculiarity of the whole must have been, that it so well harmonized with the character of him who was its centre. As his early martial life still placed him at the head of the military organization which had sprung up around him, so his early education and his natural disposition placed him at the head of his own religious institutions. Himself a prophet, a psalmist, he was one in heart with those whose advice he sought, and whose arts he fostered. And, more remarkably still, though not himself a priest, he yet assumed almost all the functions usually ascribed to the priesthood. He wore, as we have seen, the priestly dress, offered the sacrifices, gave the priestly benediction (2 Sam. vi. 14, 17, 18);

and, as if to include his whole court within the same sacerdotal sanctity, Benahad the captain of his guard was a priest by descent (1 Chr. xxvii. 5), and joined in the sacred psalms (1 Chr. xvi. 6); David himself and "the captains of the host" arranged the prophetic duties (1 Chr. xxv. 1); and his sons are actually called "priests" (2 Sam. viii. 18: 1 Chr. xviii. 17, translated "chief," and ανδριχαμ, "chief rulers"), as well as Ira, of Manasseh (2 Sam. xx. 26, translated "chief ruler," but LXX. αποκοιμων). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points. But from this time the idea took possession of the Jewish mind and was never lost. What the heathen historian Justin antedates, by referring it back to Aaron, is a just description of the effect of the reign of David:

"Sacerdos nunc rex creatur; sempereque exinde hic mos nuper Judaeus fuit ut consensuerent reges et sacerdotes habarent; quorum justitiae religione pernix fuerint, inconsiderabile quantum coaurent." (Justin, xxxvi. 2).

(1d.) From the internal state of David's kingdom, we pass to its external relations. These will be found at length under the various countries to which they relate. It will be here only necessary to briefly indicate the enlargement of his dominions. Within 10 years from the capture of Jerusalem, he had reduced to a state of permanent subjection the Philistines on the west (2 Sam. viii. 1); the Moabites on the east (2 Sam. viii. 2), by the exploits of Benaiah (2 Sam. xxii. 20); the Syrians on the northeast as far as the Euphrates (2 Sam. viii. 3); the Edomites (2 Sam. viii. 14), on the south; and finally the Ammonites, who had broken their ancient alliance, and made one grand resistance to the advance of his empire (2 Sam. x. 1-19, xii. 25-31). These three last wars were entangled with each other. The last and crowning point was the siege of Rabliss. The ark went with the host (2 Sam. xi. 11). David himself was present at the capture of the city (2 Sam. xii. 29). The savage treatment of the inhabitants—the only instance as far as appears of cruel severity against his enemies—is perhaps to be explained by the formidable nature of their resistance—"like the stain on the hand of the Black Prince in the massacre of Lagnes." The royal crown, or "crown of Milcom," was placed on David's head (2 Sam. xii. 30), and, according to Josephus (Ant. vii. 5) was always worn by him afterwards. The Hebrew tradition (Jerome, Qu. Heb. ad 1 Chr. xx. 2) represents it as having been the diadem of the Ammonite god Milcom or Molech; and that Ittai the Gittite (doing what no Israelite could have done, for fear of pollution) tore it from the head of the king, and brought it to David. The general peace which followed was commemorated in the name of the "Peaceful" (Solomon), given to the son born to him at this crisis.

To these wars in general may be ascribed Ps.

a 2 Sam. xii. 25, is by some interpreters rendered, thus making Nathan Solomon's preceptor. (See Chalmers to 272.)
b Compare Blunt, II. xv.
c ἢ τερατον τὴ γῆς (Joseph. Ant. vii. 12, § 4).
d By the reduction of Gath, 1 Chr. xviii. 1.
e The punishment of the Moabites is too obscurely worded to be explained at length. A Jewish tradition (which shows that there was a sense of its being excessive) maintained that it was in consequence of the Moabites having murdered David's parents, when conducted to them, 1 Sam. xxiii. 3 (Chalmers, ii. 133).

36

DAVID

561

g To these Eupolemus adds the Nabateans and Nabateans.

h For the details of the punishment, see Rabbin. Chandler, in xxii. 29 (it signifies) into the heart of hard sore grind; Ewald (iii. 294), of hard tears, torture and slaughter.

i The story appears to be told twice over 2 Sam. xi. 3-14, x. 1-11, xii. 29-31).

j The golden shields taken in the Syrian war \n
(b.) The second group of incidents contains the tragedy of David's life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king. Underneath the splendor of his last glorious campaign against the Ammonites, was a dark story, known to all, that time only to a very few, and even in latter times kept as much as possible out of the view of the people, but now recognized as one of the most instructive portions of his career — the double crime of adultery with Bathsheba, and of the virtual murder of Uriah. The crimes are undoubtedly those of a common Oriental despot. But the relapse of Nathan; the sudden revival of the king's conscience; his grief for the sickness of the child; the gathering of his uncles and elder brothers around him; his return of hope and peace; and if we add to these the two psalms, the 32d and the 51st, of which the first by its acknowledged internal evidence, the 2d by its title also claim to belong to this crisis of David's life, we shall feel that the instruction drawn from the sin has more than compensated to us at least for the scandal occasionally occasioned by it. But David is the "free spirit" and "clean heart" of David returned, and though the birth of Solomon was as auspicious as if nothing had occurred to trouble the victorious festival which succeeded it; the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (2 Sam. xii. 10). The outrage on his daughter Tamar; the murder of his eldest son Amnon; and then the revolt of his best beloved Absalom, brought on the crisis, which once more sent him forth a wanderer, as in the days when he fled from Saul; and this, the heaviest trial of his life, was aggravated by the impetuousity of Joash, now perhaps from his complicity in David's crime more unmanageable than ever. The rebellion was fostered apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed into the whole nation; and if, as appears from 2 Sam. xi. 3, xxiii. 34, Ahithophel was the grand counselor of Absalom, its most active supporter was one whom David had provoked by his own crimes. For its general course, the reader is referred to the names just mentioned. But two or three of its scenes relate so touchingly and peculiarly to David, that this is the place for dwelling upon them. The first is the most detailed description of any single day that we find in the Jewish history. It was apparently early on the morning of the day after he had received the news of the rebellion at Hebron that the king left the city of Jerusalem on foot. He was accompanied by a vast concourse; in the midst of which he and his body guard were

"g It is omitted in the Chronicles.

h This is the subject of one of the apocryphal collections of David (Fabric. Cod. pseudo., p. 3. 1. 1091). The story is also told in the Book (xxxi. 20-24), and wild legends are formed out of it (Well's Legends, p. 158-190, 170).

i Ewald places it after the Captivity. From the two last verses (hi. 18, 19) this would be the almost certain conclusion. But it is not allowable to suppose these verses to be an adaptation of the psalm to that later time.

k See Blunt's Coincidences, xi. 11, for a theory perhaps too much elaborated, yet not without some foundation.

l Blunt, H. J., Jerome, Qu. Heb. on 2 Sam. xi. 3.
The family of David's exile, as it had been of the exiled house of Saul (2 Sam. xviii. 24, comp. ii. 8, 12). Three great chiefs of that pastoral district are specially mentioned as supporting him; one, of great age, not before named, Barzillai the gileadite: the two others, bound to him by former ties, Shobi, the son of David's ancient friend Nahash, probably put by David in his brother's place (xii. 20, x. 2); and Mochir, the son of Ammiel, the former protector of the child of David's friend Jonathan (2 Sam. xvii. 27, ix. 4). His forces were arranged under the three great military officers who remained faithful to his fortunes — Joab, captain of the host: Abishai, captain of "the mighty men:" and Ittail, who seems to have taken the place of Benaiah (had he wavered in his allegiance, or was he appointed afterwards?), as captain of the guard (2 Sam. xvii. 2). On Absalom's side, was David's nephew, Amasa (ib. xvi. 35). The warlike spirit and of his faithful followers at this extremity of their fortunes is well depicted by Hushai, "chafed in their minds, as a bear robbed of her whelps in the field" (or a fierce wild boar in the Jordan valley, 1 Xx.): the king himself, as of old, "lodging not with the people," but "hid in some pit or some other place" (2 Sam. xvii. 9). The final battle was fought in the "forest of Ephraim," which terminated in the accident leading to the death of Absalom. At this point the narrative resumes its minute detail. As if to mark the greatness of the calamity, every particular of its first reception is recorded. David was waiting the event of the battle in the gateway of Mahanaim. Two messengers, each endeavoring to outstrip the other, were seen running breathless from the field. The first who arrived was Ahimaaz, the son of Zadok, already employed as a messenger on the first day of the king's flight. He had been entrusted by Joab not to make himself the bearer of tidings so mournful: and it would seem that when he came to the point his heart failed, and he spoke only of the great confusion in which he had left the army. At this moment the other messenger burst in — a stranger, perhaps an Ethiopian (-) and abruptly revealed the fatal news (2 Sam. xviii. 19-32). [Cviii. 11.] The passionate burst of grief which followed, is one of the best proofs of the deep affection of David's character. He wrapped himself up in his sorrow; and even at the very moment of his
triumph, he could not forget the hand that had slain his son. He made a solemn vow to supersede Joab by Amasa, and in this was lied the lasting breach between himself and his powerful nephew, which neither the one nor the other ever forgave (2 Sam. xix. 13).

The return was marked at every stage by rejoicing and amnesty,—Shimei forgiven, Mephibosheth "partially reinstated, Hazuriki rewarded by the gifts, long remembered, to his son CHIDIAN (2 Sam. xix. 10-40; 1 K. ii. 7). Joab was first reconciled. The embers of the insurrection still smouldering (2 Sam. xix. 41-43) in David's hereditary enemies of the tribe of Benjamin were trans- planted out by the mixture of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position. And David again reigned in undisturbed peace at Jerusalem (2 Sam. xx. 1-22).

(c) The closing period of David's life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. This calamity was the three days' pesti- lence which visited Jerusalem at the warning of the prophet Gad. The occasion which led to this warning was the census of the people taken by Joab at the king's orders (2 Sam. xxiv. 1-9; 1 Chr. xxii. 1-7, xxvii. 23, 24); an attempt not materially augmented by the increase of his army, but implying a confidence and pride alien to the spirit inculcated on the kings of the chosen people [see Numbers]. Joab's repugnance to the measure was such that he refused altogether to number Levi and Benjamin (1 Chr. xxi. 6). The king also scourged to number those who were under 20 years of age (1 Chr. xxii. 23), and the final result never was recorded in the <i>Chronicles of King David</i> (1 Chr. xxvii. 24). The plague, however, and its conse- quence were commemorated down to the latest times of the Jewish nation. Possibly Ps. xxx. and xci. had reference (whether David's or not) to this time. But a more certain memorial was preserved on the exact spot which witnessed the close of the pesti- lence, or, as it was called, the Black Death of 1348, "The Death." Outside the walls of Jerusa- lem, Aramah or Ornan, a wealthy shephard, bought from the ancient king of Judah (2 Sam. xxiv. 23) "possessed a threshing-floor" there he and his sons were engaged in threshing the corn gathered in from the harvest (1 Chr. xxii. 23). At this spot an awful vision appeared, such as is described in the later days of Jerusalem, of the Angel of the Lord stretching out a drawn sword between earth and sky over the devoted city. The scene of such an apparition at such a moment was at once marked out for a sanctuary. David demanded, and Aramah willingly granted, the site; the altar was erected on the rock of the threshing-floor; the place was called by the name of "Moriah" (2 Chr. iii. 1); and for the first time a holy place, sancti- fied by a vision of the Divine presence, was recog- nized in Jerusalem. It was this spot which after- wards became the altar of the Temple, and there- fore the centre of the national worship, with but slight interruption, for more than 1000 years, and it is even contended that the same spot is the rock, still regarded with almost idolatrous veneration, in the centre of the Mussalam "Dome of the Rock" (see Professor Willis in Williams's <i>Holy City</i>, ii.).

The selection of the site of this altar probably revived the schemes of the king for the building of a permanent edifice to receive the ark, which still remained inside his own palace in its temporary tent. Such schemes, we are told, he had entertain- ed after the capture of Jerusalem, or at the end of his wars. Two reasons were given for their de- lay. One, that the ancient nomadic form of worship was not yet to be abandoned (2 Sam. vii. 6); the other, that David's wars sufficed him to be the founder of a seat of peaceful worship (1 Chr. xxii. 8). But a solemn assurance was given that his dynasty should continue "for ever" to continue the work (2 Sam. vii. 13; 1 Chr. xi. 9, 10). Such a founder, and the ancestor of such a dynasty, was Solomon to be, and to him therefore the stones [See 1 Kings] and the plans of the future Temple (according to 1 Chr. xxii. 2-19, xxvii. 1-xxix. 19) were committed.

A formidable conspiracy to interrupt the suc- cession broke out in the last days of David's reign [see ADONIJAH], which detachet from his person two of his court, who from personal offense or adherence to the ancient family had been alienated from him—Joab and Abiathar. But Zadok, Nathan, Ne- maiah, Shimei, and Rehoboam remaining firm, the plot was stifled, and Solomon's inauguration took place under his father's auspices (1 K. i. 1-53).

The Psalms which relate to this period are, by title, Ps. xci.: by internal evidence, Ps. i-xvii. David had a great deal of good done upon him. The warmth of his exhausted frame was at- tempted to be restored by the introduction of a young Shammamite, of the name of Abishag, men- tioned apparently for the sake of an incident which grew up in connection with her out of the later events (1 K. i. 1, ii. 17). His last song is pres- erved—a striking union of the ideal of a just ruler which he had placed before him, and of the place where the altar was to be, but forbade him to build the Temple, as being stained with blood, and so stained that he fought many wars. His name was Davi- thad.

In 1 Chr. xxi. 29, a fire from heaven descends to sanctify the altar. This is not mentioned in 2 Sam. xxiv.

This is the subject of one of the apocryphal col- oquies (Fabric. Coll. pseudepigraph. V. T. I. 104). In this respect David still belonged to the older generation of heroes. [See Jerome, Qu. ii. 22 ad loc.]

Eupolemus (Eus. <i>Prop. Ev. ix. 30</i> makes David send these for these stones to Elath and to Ophir. [See Jerome, Qu. ii. 22 ad loc.]) renders Reh as Ira, not improbably. Ewald's conjecture (iii. 206, note) is that he is identical with Raddai.

Eupolemus (Eus. <i>Prop. Ev. ix. 30</i>) adds, "in the presence of the high-priest Eli."

<i>a</i> The injustice done to Mephibosheth by this division of his property was believed in later traditions to be the sin which drew down the division of David's kingdom. Jerome, <i>Op. Hac</i> (on 2 Sam. xix.). The question is argued at length by Selden, <i>De Successione</i>, c. 25, pp. 67, 68. (Chameli, ii. 357.)

<i>b</i> To many English readers, the events and names of this period have acquired a double interest from the power and skill with which Dryden has made the story of "Absalom and Achitophel" the basis of his political poem on the Court of King Charles II.

<i>c</i> In the original the expression is much stronger than in the A. V.—"Aramah, the king." [See Amsah.] This apparition is also described in a fragment of the heathen historian Eupolemus (Eus. <i>Prop. Ev. ix. 30</i>), but is confused with the warning of Nahum against building the Temple. "An angel pointed out

<i>d</i> In this respect David still belonged to the older generation of heroes. [See Jerome, Qu. ii. 22 ad loc.]

Eupolemus (Eus. <i>Prop. Ev. ix. 30</i>) makes David send these for these stones to Elath and to Ophir. [See Jerome, Qu. ii. 22 ad loc.] renders Reh as Ira, not improbably. Ewald's conjecture (iii. 206, note) is that he is identical with Raddai.

Eupolemus (Eus. <i>Prop. Ev. ix. 30</i>) adds, "in the presence of the high-priest Eli."
difficulties which he had felt in realizing it (2 Sam. xxiii. 1–7). His last words, as recorded, to his successor, are a general exhortation to his duty, combined with warnings against Joab and Shimuel, and charges to remember the children of Barzillai (1 K. ii. 1–9).

He died, according to Josephus (Ant. viii. 15, § 2), at the age of 70, and "was buried in the city of David."1 After the return from the Captivity, "the sepulchres of David" were still pointed out "between Siahob and the house of the mighty men,"2 or "the guardhouse" (Neh. iii. 16). His tomb, which became the general sepulchre of the kings of Judah, was pointed out in the latest times of the Jewish people. "His sepulchre is with us unto this day," says St. Peter at Pentecost (Acts ii. 29); and Josephus (Ant. viii. 15, § 3; xiii. 8, § 4; xvi. 7, § 1) states that, Solomon having buried a vast treasure in the tomb, one of its chambers was broken open by Hyrcanus, and another by Herod the Great. It is said to have fallen into rain in the time of Hadrian (Dion Cassius, lxix. 14). In Jerome's time a tomb, so called, was the object of pilgrimages (Ep. ad Marcell. 17 (46)), but apparently in the neighborhood of Bethlehem. The edifice shown as such from the Crusades to the present day is on the southern hill of modern Jerusalem commonly called Mount Zion, under the so-called "Gammaliel."3 For the description of it see Barclay's City of the Great King, p. 290. For the traditions concerning it see William's Holy City, ii. 509–513. The so-called "Tombs of the Kings" have of late been claimed as the royal sepulchre by De Sauley (ib. 162–215), who brought to the Louvre (where it may be seen) what he believed to be the lid of David's sarcophagus. But these tombs are outside the walls, and therefore cannot be identified with the tomb of David, which was emphatically within the walls (see Robinson, ii. 252, note).

The character of David has been so naturally brought out in the incidents of his life that it need not be here described in detail. In the complexity of its elements,4 passion, tenderness, generosity, heroism — the soldier, the shepherd, the poet, the statesman, the priest, the prophet, the king — the romantic friend, the chivalrous leader, the devoted father — there is no character of the O. T. at all to be compared to it. Jacob comes nearest in the variety of elements included within it. But David's character stands at a higher point of the sacred history, and represents the Jewish people just at the moment of their transition from the holy virtues of the older system to the fuller civilization and cultivation of the later. In this manner he becomes naturally, if one may so say, the likeness or portrait of the last and grandest development of the nation, and the type of the period of the Messiah. In a sense more than figureative, he is the type and prophecy of Jesus Christ. Christ is not called the son of Abraham, or of Ja
cob, or of Moses, but he was truly "the son of David." To his own people his was the name most dearly cherished after their first ancestor, Abraham. "The city of David," "the house of David," "the throne of David," "the seed of David," "the oath sworn unto David" (the pledge of the continuance of his dynasty), are expressions which pervade the whole of the Old Testament and all the figurative language of the New, and they serve to mark the lasting significance of his appearance in history.

His Psalms (whether those actually written by himself be many or few) have been the source of consolation and instruction beyond any other part of the Hebrew Scriptures. In them appear qualities of mind and religious perceptions not before expressed in the sacred writings, but eminently characteristic of David, — the love of nature, the sense of sin, and the tender, ardent trust in, and communion with, God. No other part of the Old Testament comes so near to the spirit of the New. The Psalms are the only expansions of devotion which have been equally used through the whole Christian Church — Abyssinian, Greek, Latin, Puritan, Anglican.

The difficulties which attend on his character are valuable as proofs of the imparity of Scripture in recording them, and as indications of the union of natural power and weakness which his character included. The Rabbis in former times, and critics (like Byl[e]4 in later times, have seized on its dark features and exaggerated them to the utmost. And it has been often asked, both by the scoffers and the serious, how the man after God's own heart could have murdered Uriah, and seduced Bathsheba, and tortured the Ammonites to death? An extract from one who is not a too-indulgent critic of sacred characters expresses at once the common sense and the religious lesson of the whole matter. "Who is called 'the man after God's own heart'? David, the Hebrew king, had fallen into sins enough — blackest crimes — there was no want of sin. And therefore the unbelievers sneer, and ask 'Is this your man according to God's heart?' The sneer, I must say, seems to me but a shallow one. What are faults, what are the outward details of a life, if the inner secret of it, the remorse, temptations, the often baffled, never-ended struggle of it be forgotten? David it is, as written for us in those Psalms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best. Struggle often baffled — sore baffled — driven as into entire wreck: yet a struggle never ended, ever with tears, repentance, true unconquerable purification, and a man began again and saw the "(Carlyle's Heroes and Hero-Worship, p. 72).

The conciliatory of 1 Sam. xvi. 14–23 with xvii. 31–35, 55–58 (see i. 4 of the article above).

1 A striking legend of his death is preserved in Weil's Legenda, pp. 165, 170; a very absurd one, in Bamagae, Hist. des Juifs, bk. v. ch. 2.

2 This variety of opinion is strikingly expressed in "the Song of David," a poem written by the unfortunat[te]Christopher Smart in charcoal on the walls of his cell, in the intervals of madness.

3 It may be remarked that the name never appears as the name even in the Jewish history, but, like "Peter" in the Papacy, it was too sacred to be so appropriated.

4 For some just remarks, in answer to Byl[e], on the necessity of taking into account the circumstances of David's age and country, see Dean Milman's Hist. of Jews, i. 247.

5 This expression has been perhaps too much made of. It occurs only once in the Scriptures (1 Sam. xii. 14, quoted again in Acts xiii. 22), where it merely in desists a man whom God will approve, in distinction from Saul who was rejected by His love, and more peculiar commendation of David is that contained in 1 K. xvi. 3–5, and implied in Ps. lxxix. 29–58.
DAVID has given rise to various explanations. It must be acknowledged that there are some difficulties here. Winer (though without ascertaining to them all as equally well founded) enumerates them in his Bibl. Relatio, i. 239 ff., and Bleek also in his Lins. in dou. A. Text. p. 355 ff., with the admission at the same time that they have been urged too far. The reader, happily disappointed in us might be taken of them here, or of the considerations which have been offered to account for the apparent disagreement. It should be stated that the better critical judgment of scholars (as Dr. Wette, Ewald, Bleek, Keil) is that the Hebrew text of the passages under remark has not been corrupted or interpolated, but that the two sections (from whatever source originally derived) form an integral part of the work as it came from the hand of the writer or compiler.

One of the principal difficulties in the relation of the two portions to each other, is that, in the first of them, David is said to have been a musician and an armor-bearer at the court of Saul (1 Sam. xvi. 19 ff.); and, in the second, that he appears to be introduced to the king, at the time of the battle with Goliath, as a stranger whom Saul had no previous knowledge (1 Sam. xvi. 31 ff.). It is to be noted, in reply, that Keil thinks that David may not have been permanently connected with Saul in his capacity as harpist, but was only summoned to him as the intermittent madly of Saul required, and then, after exerting his skill for its removal, returned to the care of his flocks. (See Chandler's Life of David, p. 48.) It is expressly stated, at all events, that even after the outbreak of the war with the Philistines he was in the habit of passing to his flocks in the daytime, and his father's home at Bethlehem (1 Sam. xvi. 17, 18). It is true, he was appointed at the same time one of Saul's armor-bearers as well as his musician; but this office, at least, in times of peace, was one of honor rather than of active service, and would not require that he should be constantly at the person of the king. This was the less necessary, because the number of such servants was so great. Joab, David's chief commander at a later date, is said to have had ten armor-bearers, and Saul in his higher station must have had many more. Under these circumstances, Saul's first acquaintance with David may have been often interrupted and hence comparatively slight: so that when they met again, possibly after an inter-rival of some considerable duration, amid the distraction and tumult of a war which was engrossing every energy of the king's mind, it is not incredible that Saul at first sight may not have recognized the shepherd boy whom he had occasionally seen; while as to David himself it is not to be supposed that he would put forward any obstructive claim to the king's recognition on the ground of his former services.

Again, it is objected that Saul's inquiry of Anan, captain of the host (1 Sam. xxi. 15; after David's slaying of Goliath, "Who is this youth," is extraordinary, if David had really stood in the relation to Saul which the previous account has mentioned. But as Kurtz remarks (Herzog's Real. Enzyk. iii. 390), the import of the question may have been not so much who is David's father as to his name merely, as what is David's ancestry, his parentage and rank in life. Saul may have been indifferent respecting the family of his harp-player and armor-bearer; but after the victory, when the successful champion, according to the terms which Saul himself had proposed, was about to become his son-in-law (1 Sam. xvii. 25), it was obviously a matter of great interest to him to obtain more particular information respecting his birth and connections.

It is affirmed also that the account of David at the time of his first introduction to Saul (1 Sam. xvi. 18), as "a mighty valiant man, and a man of war," is out of place there, because he had not yet displayed the military qualities which those words ascribe to him. This description, as Winer admits (Bibl. Relatio. i. 250), may be merely proleptic, inserted by the historian not of course as representing what David was at that time, but what he was known to be in history to readers of the story. Keil and Delitzsch prefer to say, that his conflicts with the lion and the bear (1 Sam. xvii. 34, 35) had already furnished such proofs of heroism, that none who knew him could fail to discern in him the future conqueror of the Philistines. Samuel, p. 171, (Clark's Library). Stanley (see L. above) thinks that David may already have fought against the Philistines, and was known to some of Saul's guards for his military exploits. But this supposition implies in effect that the two parts of the narrative are inconsistent with each other; for David's awkwardness in the use of weapons when he assumed the championship against Goliath (1 Sam. xvii. 50 ff.) shows that he was then inexperienced in war.

Another allegation is that the statement in 1 Sam. xxi. 54, that "David took the head of the Philistine and brought it to Jerusalem," must certainly be an anachronistic addition to the history, because Jerusalem was not then in possession of the Hebrews, but was captured by David (or Joab) at a later period (1 Chr. xi. 4 ff.). But the statement in that passage really is that David took at that time not Jerusalem itself, but the fortress of Jerusalem, the citadel on Mount Zion (called after him the city of David), which had not before been wrested from the ancient inhabitants (Josh. xvii. 53). As to Jerusalem itself, i.e. the other hills and the suburbs which the city comprised, we read that it had been in the hands of the Hebrews from the time of their first arrival on the west of the Jordan, in the days of Joshua (Judg. i. 8, 21). David at first deposited the armor of Goliath in his own tent or house at Bethlehem (1 Sam. xvii. 54); but it was in the natural course of things that such a trophy after a time would be placed in some more public custody. No one can seriously think that this statement conflicts with 1 Sam. xxi. 9, from which it appears that the sword of Goliath was found in the sanctuary at Nemi at the time of David's interview with the priest Abimelech. Nor is such a return of David to Bethlehem, to leave there the spoils of war or to visit his friends, inconsistent with 1 Sam. viii. 2, where it is said that Saul did not permit him any more to "go to his father's
house." The meaning in that passage is that David was henceforth to attach himself to Saul as one of his personal retinue, and not again, as he had formerly done, resume his occupation as a shepherd.

Dean Stanley has three Lectures on David in his History of the Jewish Church (ii. 49-155). He has presented there essentially the same facts and aspects of character that are brought before us in the preceding sketch: but with the advantage of making the picture more living and real by being put in the frame-work of the history and finished with minister touch. He gives David’s personal appearance in his boyhood, e. t. retains in his Lectures the description previously given in the Dictionary (p. 533). Against one of the traits in this figure Dietrich urges an objection from an unexpected quarter. He understands (Ges. Hdb. und Chald. Handb. p. 16, 6th Aufl.) that what the A. V. renderers as "a pillow of goat’s hair," which Michal placed in David’s bed (1 Sam. xix. 19), was in reality a feature of goat’s hair, a sort of wig which she put around the head of the teraphim or image so as to make it appear like David’s hair, and thus deceive Saul’s messengers. On that view of the case, he says, the stratagem presupposes that David’s hair was black, that being the usual color of goat’s hair in Palestine. First also (i. 25) refers to the hair, not to the hair, but to the countenance of David. Bunsen (Bibelwerk, ii. 1 ter Thell, p. 122) says: "rothbraun, wtrl. r. blithe. An die Haare ist dabei wol nicht zu denken." Its being used of Esau, Gen. xxv. 25, is not decisive, for being generic ("as reddish"), it admits of that application or the one claimed here. The older translators often render mechanically (hence perhaps περίβαλλεται, Sept.; and rufulae, Vulg.). It was because David appeared so boyish (rudely and fair), that Goliath looked on him with contempt (1 Sam. xvi. 12, xvi. 42). It does not appear why he should be thought less a warrior for being red-haired.

In regard to the variations which appear in the mode of relating David’s history, Kurtz has well stated and answered the current objections in his article on David in Herzog’s Real-Encycl. iii. 298-307. He does not consider them to be of any great moment. See also Havernick’s Einl. in des A. V. Psalm 12, p. 153. However, the grounds of a similar conclusion. Tholuck has given a good sketch of David’s outward life in its relation to his writings, and has grouped together on that basis the principal psalms which he would refer to him as the author (Übersetzung u. Auslegung der Psalmen, § 3). Perowne’s remarks here are valuable for the light which they throw on the connection between the psalmist’s inner and outward life as expressed in the writings of Esther and Song of Solomon (Ps. viii., xxi., civ.). Chandley’s Life of David (Oxford, 1858), though anticipated in some respects, still remains one of our best helps for the study of David’s history. Herder commends it strongly (Studien der Theologie, 8ter Brief). Kitt’s Daily Bible Illustrations furnish useful information on the leading incidents in the career of the poet-king. There is a collection of sermons, David, der König, by F. W. Krummacher (1860), similar to those on Elijah and Elisha by the same author, which have obtained so much celebrity.

On the probable scene of David’s encounter with Goliath (1st Sam. xviii. 31) and its modification of the Valley of Elah, 3 days south-west of Jerusalem, see Rob. Bibl. Res. ii. 550, 1st ed.; Thomson’s Land and Book, ii. 363; Porter’s Giant Cities, &c., p. 223; Sepp’s Jerusalem u. das hell. Land, i. 57; Toher’s Drüte Wunderung, p. 122.

David. City of. [Jerusalem.]

Day. (1 Sam. viii., perhaps from בְּנֵי יִשְׁרָאֵל, by dawn, to be warm.) The variable length of the natural day ("ab exortu ad occasum solis," Censor. de Die Nat. p. 23) at different seasons led, in the very earliest times, to the adoption of the civil day (or one resolution of the sun) as a standard of time, and this conception of the civil day varies in different nations: the Babylonians (like the people of Nuremberg) reckoned it from sunrise to sunrise (Isidor. Orig. v. 30); the Umbrians from noon to noon; the Romans from midnight to midnight (1 Tim. ii. 79); the Athenians and others from sunset to sunset (Macrobi. Saturn. i. 3; Gell. iii. 2).

The Hebrews naturally adopted the latter reckoning (Lev. xxvii. 32). "for even to even ye shall celebrate your sabbaths." from Gen. i. 5, "the evening and the morning were the first day." a passage which the Jews are said to have quoted to Alexander the Great (Gen. Tanid, 60, 11; Rolland, Anc. Hdb. iv. 1, § 15). Some (as in Godwin’s Mooses and Aaron) argue foolishly from Matt. xxviii. 1, that they began their civil day in the morning; but the expression εὖμετακηρυξαν shows that the natural day is there intended. Hence the expression "evening-morning." ="day (Dan. viii. 14; LXX. νυγθαμαρ; also 2 Cor. xi. 25). the Hindoo abhavata (Von Bohnen on Gen. i. 4), and νυγθαμαρ (2 Cor. xi. 25). There was a similar custom among the Athenians, Arabs, and ancient Teutons (Tac. Geron. xi., "de dieum nummum us apud hos, sed noctium computant . . . no ducret diei videtur "); and Celtic nations (Ces. de B. G. v. 18, "ut noctem dies subsequeant "). This mode of reckoning was widely spread. It is found in the Roman law (Gauls, i. 112), in the Nibelungenlied, in the Salic law (inter diem noctes), in our own terms "fort-night," "seven-night" (see Orelli, &c. loc. tac.), and even among the Siamese ("they reckon by nights," Bowring, i. 137) and New Zealanders (Taylor’s Te-Ier-Maoi, p. 20). No doubt this arose from the general notion "that the first day in Eden was 36 hours long." (Lightfoot, i. 243, ii. 344; J. M. Renan; De la croix, p. 123; Aristoph. Nub. 223; Wilkinson, Anc. Egypt. iv. 274). Kalisch plausibly refers it to the use of lunar years (Gen. p. 67). Sometimes, however, they reckoned from sunrise (ημερωρινιον, comp. Ps. i. 2; Lev. vii. 15).

* The Hebrew custom of reckoning the day from evening to evening, arose from the use of the lunar-calender in regulating the feast-days, and other days of religious observance. It was not a "natural" day. But the evidence of history follows, that the Schöpfungstage are not from Abend zu Abend, sondern . . . von Morgen zu Morgen gezählt sind." Delitzsch (3d ed. p. 100): "Nachdem es mit der Schöpfung des Lichts Tag geworden, wurde es Abend und
The day consisted, therefore, of a period of light followed by a period of darkness, being reckoned from morning to morning. In later Hebrew usage also, where simply the natural day is meant, as in Lev. vii. 15, the terminating limit is the following morning. See further in Hengel's _Ecclesiastical History_, art. 'Tag' (xx. 410).

The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day. Roughly indeed they were content to divide it into 'morning, evening, and noonday' (Ps. iv. 17); but when they wished for greater accuracy they pointed to six unequal parts, each of which was again subdivided. Here are held to have been:

I. _Neseph_, ἡμέρας νύχτιος (from ἡμέρας νύκτα, 'to blow') and _Shokhar_, καιρὸς νύκτος, or the dawn. After their acquaintance with Persia they divided this into, (a) the time when the eastern, and (b) when the western horizon was illuminated, like the Greek _Aphros_—_Matiu_—_Andron_ or _the gray dawn_ (Milton), and the rosy dawn. Hence we find the _shaharaim_ as a proper name (1 Chr. viii. 8). The writers of the Jews, Talmud divide the day into five parts, of which the (1) was _ディュトκατ_ _Hosip_ _kotitas_, or the 'gazelle of the morning' (Aijellite Shawin), a name by which the Arabs call the sun (comp. 'clouds of the dawn'), Job iii. 9; _ωπας_ Βελειφαιος, Soph. _Ant. 109_. This was the time when Christ arose (Mark xvi. 2; John xx. 1; Rev. xxii. 16; ἐνυποφωνησία, Matt. xxviii. 1). The other three divisions of the day were, (2) _when one can distinguish blue from white_ (προροκε}, _στοριαν_ _τα_ _αυτοματικά_(_John xx. 1; 'obscuration adhibetur lucis'), _Taloth_ ii. iv. 2. At this time they began to revite the phylacterys. (3) _Sunlight_ (αἰωνίας _αὐτοτικά_ _των_ _υἱών_ _Mark_ xii. 2; _Lightfoot, Hor. Hebr. ad_ Marc. viii. 16; _Otho, Lex. Rob. s. v. Sabbothain_).

Before the Captivity the Jews divided the night into three watches (Lxx. viii. 6, xc. 4), namely, the first watch, lasting till midnight (Lam. ii. 19, A. V. 'the beginning of the watches') _ལόχος_ _πολακτικός_; the _middle watch_ (which proves the statement), lasting till cock-crow (Luke, xvii. 19) _μεισον_ _πολακτικός_; and the morning watch, lasting till sunrise (Ex. xiv. 24) _αμαρικόν_ _πειγόν_ (Rom. vii. 433). These divisions were probably connected with the Levitical duties in the Temple service. The Jews, however, say (in spite of their own definition, 'a watch is the third part of the night') that they always had four night-watches (comp. Neh. ix. 3), but that the fourth was counted as a part of the morning (Buxtorf's _Lex. Talm. s. v. Carporos_._Appor. Coll. p. 947; Reland, iv. 18).

The one hour allusions to four watches, a division borrowed from the Greeks (Herod. ix. 51) and Romans (Φαλλακτικά, τὰ _τέταρτον_ _μέρος_ _τῆς_ _πολακτίας_, Suid.). These were, (1) _όξια_ _οὐδα_, or _φοῖν_ _ἀπάνθησιν_, from twilight till 9 o'clock (Mark xi. 11; _John xix. 10); (2) _μεσον_ _πολακτικόν, _midnight, from 9 till 12 o'clock (Mark xiii. 5): (3) _αλκατεροφοια_ , till 3 in the morning (Mark xiii. 35, _ἀλκατερισμός_, 3 Mark v. 25); (4) _πρωί_ _πολακτικόν, _daybreak, the same as _πρωί_ _σαββάτου_. (John xviii. 28; Joseph. _Ant. v. 6, § 5, xxvi. 9, § 4)._ The word held to mean 'hour' is first found in _Dun. iii. 16, 15, v. 5_ (Σαββάτ, πρωτί ferry, also 'a moment'), iv. 19). Perhaps the Jews, like the fame and most quarrelsome fellow once handed me his watch to wind just before sunset on Friday evening. It was now his Sabbath, and he could not work. Thus they still take mint, and anise, and cummin, and two or three other ointments, making with the u of oil by their traditions (Mark vi. 5). It was such peculiar traditions as these that our Lord rebuked when he declared that the Sabbath was made for man, not man for the Sabbath (Mark ii 23). See other like examples on the same page.
Greeks, learnt from the Babylonians the division of the day into 12 parts (Herod. ii. 109). In our Lord's time the division was common; see Acts xii. 9). It is probable that Ahaz introduced the first sum- 

del from Babylon (φαναν, ἰπαν). Is. xxxiii. 8; 2 K. xx. 11), as Anaximenes did the first σκάθειαν into Greece (Jahn, Arch. § 101). Possibly the Jews at a later period adopted the 

chaxys (Joseph. Ant. xi. 6). The third, sixth, and ninth hours were devoted to prayer (Dan. vii. 10; Acts ii. 15, iii. 1, &c.).

On the Jewish way of counting their week-days from the sabbath, see Lightfoot's Works, ii. 354. Ed. Plant. [Week.]

The word "day" is used of a festal day ( Hos. vii. 5); a birthday (Job iii. 1); a day of rain (Hos. i. 11; Job xii. 29; comp. έγνημ, τέμπνα τει-

νοπλικη, Cie, and dies Conclusive); the judgment day (Joel i. 15; 1 Thess. v. 2); the kingdom of Christ (John viii. 56; Rom. xiii. 12); and in other senses which are mostly self-explaining. In 1 Cor. iv. 3, ἀναφερόμενη ἡμέρα is rendered "by man's judgment." 2 Jerome, ad Algin. Quast. x. con-

siders this a Cilicium (Bochart, Hieroz. ii. 471).

On the prophetic or year-day system (Lev. xxv. 9; Num. xxxi. 35; Ezek. ziv. 19, 20; comp. 2 Macc. iii. 23, 25). In the rendering of Elliot's Hor. Aen. iii. 104 ff. The expression ἐρμαινόντα, rendered "daily" in Matt. vi. 11, is an ετ. λέγη, and has been much disputed. It is un-

known to classical Greek (Εως πεπλάθει ὑπὸ τῶν Εὐγελετῶν, Orig. Orat. c. 16). The Vulg. has supersubstantivum, a rendering recom-

mended by Abenda to the name of the Paraclete.

Theophyl. explains it as δε ἐν τῇ οὐσίᾳ καὶ συν-

τασειν ἡμών αυτοκρατο, and he is followed by most-

mournalways critics (cf. Chrysost. Hom. in Or. 9.9. 

Suid. & Etym. M. s. v.). Salmasius, Grotius, &c., 

arguing from the rendering τῆς in the Nazarene 

σοραπ, translate it as though it were τῆς ἐρμα-

νών ἡμέρας, or τίς ἡμέρα (Sext. Syennhis Bibli-

cal Statut. p. 444 a). But see the question examined at full length (after Tholuck) in Alford's Greek Test. ad loc.; Schleusner, Lex. s. v.; Wetstein, N. T. i. 461, &c. See CHRONOLOGY.

F. W. F.

* DAY'S JOURNEY. Distance is often 

reckoned in the Bible by this standard (see Gen. 

xxiii. 23; Ex. iii. 18; Num. xi. 31; Deut. i. 2; 1 K. iv. 4; 2 K. iii. 9; Jonah iii. 3, 4; Luke ii. 44; Acts i. 12). It is certainly conceivable that this 

mode of reckoning, used vaguely at first, as being 

dependent on conditions that were liable to vary 

in the case of each particular journey, might at 

length have become definite, so as to denote a cer-

tain distance traversable under conditions assumed 

as always the same. Something like this was true 

without doubt among the Greeks and Romans, who 

reckoned by days and at the same time by stadia or miles; so that, interchanging the two modes, they 

meant often by a day's journey a fixed number of 

stades or miles, without taking into account the cir-

cumstances which might control the distance actu-

ally traversed in a given instance. This later and 

more precise scale for measuring distances arose 

gradually among them, and appears never to have 

superseded altogether the more primitive method.

Herodotus (as an example of this fluctuation) de-

scribes a day's journey at one time as 150 stadia or 

about 19 Roman miles, and at another as 200 stadia 
or nearly 23 such miles. For information on this 

subject see Förger's Hands. der Alten Geog. 

i. 549 ff. Roman mile-stones are still found on dif-

ferent lines of travel in Palestine, c. e. two south of 

Sidon, on the maritime road along the Mediterra-

nean (Rob. I. ii. 315, 1st col.), and one at Beth-

Zen, between Bethlehem and Hebron (Stan-

ley's Notices of certain Localities, &c., p. 109).

The proverbial expression in Matt. vii. 41, "And 

whosoever shall compel thee to go a mile, go with 

him twain," refers to a foreign custom made famil-

iar to the Jews in the days of their Roman subjec-

tion. Most of the Roman roads with their mile 

stones (civis stratae) have as late an origin as the 

time of the Emperor Septimius Severus, A. D. 193-211. 

Traces of them are found on the east of the Jordan 
as well as the west.

But nothing strictly correspondent to the Greek 

and Roman system of measurement (as far as such 
a system existed among them) appears to have 

been known among the Hebrews. It may be 

assumed, as a general rule, that when the writers of 

the Bible speak of a day's journey, they mean to 

speak historically rather than geometrically, i. e. 
to mention the time actually employed in the jour-

ney rather than any certain distance assigned by 

universal consent to a day's journey. Hence, to 

know the actual distance in any instance, we must 

know more or less of the circumstances under 

which the travelling took place. As the modes 

of travelling were so various,—as the people jour-

neyed on foot, or with horses and camels (though 

if they went in caravans the difference then would 

not be very great), with flocks or without them, 

with women and children or without them, across 

plains or mountains, and with stations for halting 
at night along the route at irregular intervals, de-

termined only by the exigencies of the case, the 

time,—it is evident that a fixed uniformity must 

have been out of the question. It may be men-

tioned, as illustrating this uncertainty, that the 

pilgrim caravans at the present day occupy two 

days in going from Jerusalem to the Jordan, 

about 25 miles; and yet a mounted horseman can easily 

accomplish the distance, rough as some parts of 

the way are, in less than half a day. Josephus 

states repeatedly that it was a journey of three 

days from the Holy City to the Sea of Tiberias or Ga-

lilee. Dragomen at the present time, partly because

a Strictly, by "man or man's day" as opposed 

to Christ's day, or that of the final account: comp. 

loc. in ver. 2.

b The reader will find a much fuller note 

than Alford's, on εἰσοδόν in Matt. vii. 11, in Dr. Conant's 

Matthew, with a Revised Version, p. 30 (New York 

1886). The conclusion is that "daily" of the A. V. 
is substantially correct and sanctioned by the best 

authors, and most moderns; Dr. Schaff supports 

the same view in his Lange's Matthew, p. 121 (New 

York, 1805). Alford makes εἰσοδόν "proper for 
sustenance."
they would adjust the time to the convenience of tourists, usually allot 4 days to the journey. The English consul at Jerusalem (as happens to be within the writer's knowledge) on one occasion of special emergency rode on horseback from Jerusalem to Nazareth in one day.

It is obvious the term "posting," (that of a "journey") in Heb. as to whom Job refers (xix. 25), mentioned by him as an emblem of speed along with that of the "swift ships" (lit. "reel-skiffs") and of "the eagle that hasteth to the prey," must be very different from that of ordinary travellers.

[See Angarico.] Thelwall, therefore, could well say (Palestina, p. 400): "It never died, quod spatium dictum vocant, certo intervallo definiti vix potest. Hanc est, pro locorum ratione, et modo iter facienda, diversa spatia uno die faciunt."

One consequence of a neglect to consider how variously incidental causes may affect the length of a day's journey in the East is that the statements of the sacred writers may not only have been misunderstood, but charged with inaccuracies and contradictions for which the writers are not to be held accountable. It is obvious, for example, that when the journeys of the Israelites in the desert are mentioned by days, great latitude must be allowed in judging of the distance, since the movements of the vast concourse must often have been hastened or retarded by circumstances of which no account is given.

The "eleven days' journey from Horæb, by the way of Mount Sûr unto Kadesh-barnea" (Deut. i. 2), as the writer would merely insert there a general notice of the distance, are to be taken in all probability as the days of ordinary travel with camels, and not such days as people would walk meet with and rest. This specification accords substantially with the report of modern travellers (as Seezen, Reussger, Robinson). See Kold ed., Except. Handb. ii. 268.

Yet it is not to be inferred that the "day's journey," allows no proximate scale of measurement in this matter of distances. The itineraries of travellers, ancient and modern, show that the usual rate of the foot-journey (as it may be called, since these who walk may easily keep pace with those who ride) varies from 3 to 4 miles an hour, and as the number of hours devoted to travelling rarely exceeds 6 or 8 hours per day, the distance of an ordinary day's journey may be said to average about 25 or 30 miles. When there is nothing in the known or probable circumstances of the case to modify this rule, we may safely follow it in judging of the distances represented by time in the Scriptures. Yet here, too, at least in the case of caravans, some allowance must be made for the shortness of the first day's march. That is usually restricted to 2 or 3 hours, or even less, and these the hours near the close of the day; and yet in estimating the time this short distance may be reckoned in Eastern parallax as a whole day's journey. It is so computed, no doubt, in speaking of the day's journey probably in this case, if they went through Petra, 5 or 4 miles only out of Jerusalem) which the priests of Jesus made before they discovered his absence (Luke ii. 44). See the addition under Reschoen (Amer. ed.).

Some of the journeys mentioned in the Scriptures confirm the general rule laid down above, and others require some exceptional qualification, either intimated in the narratives or justified by them. Thus, Cornelius (Acts x. 1ff.) sent messengers from Caesarea to Joppa, distant about 40 Roman miles (according to the land's combination from the Itiner. Hierosolym., and the Itiner. Antonitii.); to invite Peter to come to him; they started on the day of the journey, and travelled but 7 hours (ver. 7, 9), and arrived at Joppa on the next day about noon (ver. 10); and returning on the morrow, they reached Caesarea on the day following, the fourth from the setting out thence. They were unencumbered by any baggage, had in the main a level road, and could proceed rapidly. The return appears to have occupied more time than the going to Joppa, which would be a natural result in the latter part of a continuous journey of some length. Again, we read in Acts xxiii. 31 that the Roman chieftain, Lyseus, sent Paul under a military escort by night from Jerusalem to Antipatris. This latter place was about 38 miles from Jerusalem on the route to Caesarea. To perform the journey in that time would require them to travel at the rate of about 4 miles an hour. As those who conducted Paul had a good road (traces of the old Roman pavement are, see Rob. Bibl. Itz. ii. 79), they could accomplish a forced march of that extent in nine hours. Strabo says that an army under ordinary circumstances could march from 250 to 300 stadia in a day, i.e. an average of about 30 miles.

See Forbiger's Handb. der Alten Reise 551.

The distances indicated by such reckoning sometimes agree remarkably with information derived from other sources. Jonah (iii. 4) describes Nineveh as "a city of three days' journey," i.e. in its circumference; for it could have had no diameter of that extent unless, contrary to all precedent, it was built in a circle. The dimensions which Diodorus (i. 7) assigns to Nineveh give it a circuit of about 60 miles; and thus his statement accords very closely with that of the prophet, who would naturally have in view the foot-journey of about 25 miles. Further, Jonah's "day's journey" in the city (about 25 miles) delivering his message as he went from one end of it to the other (Jonah iii. 4), would be the proportionate length of a street in a city whose longer sides according to Diodorus were 150 furlongs, the shorter 90 furlongs. See Dr. Pusey's Commentary on Jonah, p. 253. Modern investigations on the ground support the same conclusion (Layard's Nine, and Bob. p. 849). On the other hand, Laban's overtaking Jacob in seven days when the latter fled from Haran to Gilead, a distance of 300 miles, seems at first sight to be topographically impossible, and obliges us to resort to suppositions for clearing up the difficulty which he entirely outside of the history (see Haxan, Amer. ed.; Bibl. Sacra, xxiv. 176-179; and Kittos Daily Bibl. Hist. i. 320, Porter's ed. 1866). The question whether the Mourn of Abel's sacrifice (Gen. xxii. 2) was the mount of that name near Jerusalem, or Gerizim near Shechem, depends in part on how we are to dispose of the patriarch's journey of 3 days from Hebron to the place intended (see the addition to Mourn, Amer. ed.).

The Israelites prayed Pharaoh (Ex. iii. 18) to allow them "to go a three days' journey into the..."
wilderness," in order to offer sacrifices to Jehovah. Some have supposed that Horeb was the place which they had in view in making that request. But Horeb is about 150 miles from Suez; travellers with camels occupy 7 days on the way (Rob. Bodl. Res. i. 60). There is no reason for finding a topographical error in 1 Kings xix. 4 ff. It is not meant there that Elijah spent 40 days in going from Beer-sheba to Horeb; but that in the strength of the food miraculously provided for him he wandered 40 days and nights in the desert before he came to that mount, as Israel, nourished with manna from heaven, wandered 40 years before reaching the promised land. The direct journey from Beer-sheba to Horeb is one of 8 or 10 days only (see Keil and Delitzsch, Bacher der Königre, p. 190).

The day's route of the confederate kings of Israel, Judah, and Edom in their expedition against Moab (2 K. iii. 9 ff.), though not entirely certain, is less uncertain for its being said that they made a "journey of 7 days" before reaching the border of Moab (ver. 19). The opinion at least must be set aside that they went through Arabia so as to march against Moab from the south, as did the Israelites under Moses. It would be impossible to make that journey in 7 days. The note here in Keil and Delitzsch, as above (p. 226), shows the value of the modern researches on questions of this nature. At the same time it may be hoped that the proper surveys and observations are soon to be made, which will remove the vagueness connected with these calculations by time, and give us a fixed scale of distances at least for the places on this side of the Jordan.

* DAY'S JOURNEY ON THE SAB- BATH. [Sabbath Day's Journey.]

DAYSMAN, an old English term, meaning umpire or arbitrator (Job ix. 33). It is derived from day, in the specific sense of a day fixed for a trial (comp. 1 Cor. iv. 3, where διάκονος δικαιοσύνη—lit. a man's day, and so given in Wycliffe's translation—is rendered "man's judgment" in the A. V.). Similar expressions occur in German (der Saiche tagen = to bring a matter before a court of justice) and other Teutonic languages. The word "daysman" is found in Spenser's Faerie Queen, ii. c. 8, in the Bible published in 1551 (1 Sam. ii. 25), and in other works of the same age.

W. L. B.

DEACON (διάκονος: διοικόνα). The office described by this title appears in the N. T. as the correlative of πρεσβύτερος [Bishop]. The two are necessarily connected together in Phil. iii. 1: "The union of the two in the LXX. of Is. lv. 17, may have suggested both as fit titles for the officers of the Christian Church, or have led to the adoption of one after the other had been chosen on indepen-
dendent grounds. The coincidence, at all events, soon attracted notice, and was appealed to by

Clement of Rome (1 Cor. xiii.) as prophetic. Like most words of similar import, it appears to have

been first used in its generic sense, implying some su-
dinate activity (1 Cor. iii. 5; 2 Cor. vi. 4), and afterwards to have gained a more defined connota-
tion, as applied to a distinct body of men in the Christian society.

The narrative of Acts vi. is commonly referred to as giving an account of the institution of this office. The Apostles, in order to meet the compliants of the Hellenists, Jews, that their widows were neglected in the daily ministration (Sanctoria), called on the body of believers to choose seven "full of the Holy Ghost and of wisdom," whom they "may appoint over this business." The seven are accordingly appointed, and it is left to them "to serve tables"—to attend to the distribution of the alms of the Church, in money or in kind (Neander, Pflanz. u. Leit. i. 51, ed. 1847); while the ministry (ζαχυαρία) of the word is reserved for the Apostles. On this view of the narrative the seven were the first deacons, and the name and the office were de-

lined by other Churches from that of Jerusalem. At a later period, the desire to reproduce the apo-
sotolic pattern led in many instances to a limitation of the deacons in a given diocese to the original number (Conc. Nicaeae. c. 14).

It may be questioned, however, whether the seven were not appointed to higher functions than those of the deacons of the N. T. They are spoken of not by that title but as the seven (Acts xxii. 8). The gifts implied in the words "full of the Holy Ghost and of wisdom" are higher than those required for the office of deacon in 1 Tim. iii. Two out of the seven do the work of preachers and evangelists. It has been inferred accordingly (Stanley, Apostolic Age, p. 62), that we meet in this narrative with the record of a special institution to meet a special emergency, and that the seven were not deacons, in the later sense of the term, but commissioners who were to super-

intend those that did the work of deacons. There are indications, however, of the existence of another body in the Church of Jerusalem whom we may compare with the deacons of Phil. i. 1, and 1 Tim. iii. 8. As the πρεσβύτερος of Acts xiv. 23, xv. 6; 1 Pet. v. 1, were not merely men advanced in years, so the νεωτέροι or νεωνέαοι of Acts v. 10 were probably not merely young men, but per-
sons occupying a distinct position and exercising distinct functions (cf. Mosheim de Reb. Christ. p. 118). The identity of ιπνινωκαυν and πρεσβύτερος has been shown under Bishop; and it is natural to infer from this that there was a similar relation between the two titles of διάκονος and νεωτέρος. The parallelism of δ νεωτέροι and δ διάκονοι in Luke xxii. 25, tends to the same conclusion.

Assuming these data the identity of the two names we have to ask—

(1) To what previous organization, if any, the order is traceable?

(2) What were the qualifications and functions of the men so designated?

I. As the constitution of the Jewish synagogue had its elders (€πρατόρες) or pastors (τιμίτες), so it also had its subordinate officers (διακόνοι), the τιμίτες of Luke iv. 20, whose work it was to give the reader the rolls containing the lessons for the day, to clean the synagogue, to open and close it at the right times (Συναγώγης; and see Winer),
It was natural that when the Galilean disciples found themselves at the head of congregations of their own, they should adopt this as well as other parts of the arrangements with which they were familiar, and accordingly the νεαντέρον of Acts v. do what the ἅγιον τέρας of the synagogue would have done under like circumstances.

H. The moral qualifications described in 1 Tim. iii. as necessary for the office of a deacon are substantially the same as those of the bishop. The deacons, however, were not required to be "given to hospitality," nor to be "apt to teach." It was enough for them to "hold the mystery of the faith in a pure conscience." They were not to gain their living by disreputable occupations (μὴ αὐτραπαλυτά). On offering themselves for their work they were to be subject to a strict scrutiny (1 Tim. iii. 10), and if this ended satisfactorily were to enter on it. On the view that has been taken of the events of Acts vi., there is no direct evidence in the N. T. that they were appointed by the laying on of hands, but it is at least probable that what was so familiar as the outward sign of the bestowal of spiritual gifts or functions would not have been omitted in this instance, and therefore that in this respect the later practice of the Church was in harmony with the earlier. What the functions of the deacons were we are left to infer from that later practice, from the analogy of the synagogue and from the scanty notices of the N. T. From these data we may think of the νεαντέρος in the Church of Jerusalem as preparing the rooms in which the disciples met, taking part in the distribution of alms out of the common fund, at first with no direct supervision, then under that of the Seven, and afterwards under the elders, maintaining order at the daily meetings of the disciples to break bread, baptizing new converts, distributing the bread and the wine of the Lord's Supper, which the Apostle or his representative had blessed. In the Asiatic and Greek churches, in which the surrender of property and consequent dependence of large numbers on the common treasury had never been carried to the same extent, this work would be one of the chief duties of the deacon, in whose capacity the early Christians were called to the Hebrews murmured against the Helenists; and hence probably it was that the appointment of the Seven stands out as a solitary fact with nothing answering to it in the later organization. Whatever alms there were to be distributed would naturally pass through their hands, and the other functions continued probably as before. It does not appear to have belonged to the office of a deacon to teach publicly in the Church. The possession of any special αὐτοῦ ἀνεμάζων would lead naturally to a higher work and office, but the idea that the diaconate was but a probation through which a man had to pass before he could be an elder or bishop was foreign to the constitution of the Church of the 1st century. Whatever soundness it may receive from the common patriotic interpretation of 1 Tim. iii. 13 (cf. Estius and Hammond ad loc.), there can be little doubt at all the higher order of expositors have felt, cf. Wiesinger and Elliott ad loc.) that when St. Paul speaks of ημῶν καθά τινα, which is gained by those who do the office of a deacon well," he refers to the honor which belongs essentially to the lower work, not to that which they were to find in promotion to a higher. Traces of the primitive constitution and of the permanence of the diaconate are found even in the more developed system of which we find the commencement in the Ignatian epistles. Originally the deacons had been the helpers of the bishop-elder of a Church of a given district. When the two names of the latter title were divided and the bishop presided, whether as prioris inter pares, or with a more absolute authority over many elders the deacons appear to have been dependent directly on him and not on the presbyters, and as being his ministers, the "eyes and ears of the bishop." (Const. Apost. ii. 44), were tempted to set themselves up against the elders. Hence the necessity of laws like those of Conc. Nic. c. 18., Conc. 3. Carth. iv. c. 37, enjoining greater humanity, and hence probably the strong language of Ignatius as to the reverence due to deacons (Ep. ad Trench. c. 3; ad Synag. c. 8). E. H. P.

We think it proper to add a few remarks to this article, supplementary in part, and in part by way of dissent.

(1.) The diaconate or office of help, like the presbyter-priest episcopate, grew out of the apostolic office, which at first embraced all the ministerial functions and duties. Christ did not appoint, either directly or by verbal command, bishops, priests, and deacons, but he chose apostles and endowed them with his Spirit, under whose guidance they divided their latter with proper regard to times and seasons, and founded such institutions in the Church as were useful and necessary. The diaconate originated in the congregation of Jerusalem at the time and on the occasion recorded in Acts vi. 1-7.

(2.) The Seven, oi επίστα, elected on the occasion referred to (Acts vi. 3, cf. xxii. 8), were not extraordinary commissioners or superintendents of deacons (Stanley, Plumptre), but deacons in the primitive sense of the term; for their office is expressly described as διακονίαν, help, and διακονίαν τραπεζίστης, to serve, or wait upon, the tables, i.e. to distribute food to the widows and the poor (Acts vi. 1, 2). Exegetical tradition is almost unanimously in favor of this view, and the latest and best commentators sustain it (comp. Meyer, Alford and Lange-Lechler on Acts vi. 3). In the ancient church the number seven was even considered holy: hence, for example, as late as the third century, there were only seven deacons, though the number of presbyters amounted to forty. The name seven is no argument against this view: for the word διακονεῖ ὑπέρ occurs in the Acts. There is indeed some difference between the apostolic deacons and the ecclesiastical deacons, a difference which is acknowledged by Chrysostom, Clementines and others (see Sueton's Theaevum, s. v. Τέρας): but the latter were universally regarded as the legitimate successors of the former—as much so as the presbyters were the successors of the πρεσβεύτερον τῶν Ναυτικῶν of the N. T.—notwithstanding the changes in their duties and relations. "In these early days," says Alford, on Acts vi. 3, "titles spring out of realities, and were not mere hierarchial classifications." Hackett says, on Acts vi. 3 (p. 116, 24 ed.), "the general opinion at present is, that this order arose from the institution of the Seven, but by a gradual extension of the sphere of duty at first assigned to them."

(3.) There is no evidence whatever for the assumption of Mosheim, Mack, Kuiken, Olshausen, Meyer, Conybeare and Howson, Stanley, and the writer of the above article, that the νεαντέρος (younger) "was" mentioned in Acts v. (οἱ νεοτέροι, ver. 6, and οἱ νεοτέροι, ver. 10; comp. Luke 5:18).

P. S.

DEACONESS (βίακωρος: diaconisian, Tert.)
The word βίακωρος is found in Rom. xvi. 1 associated with a female name, and this has led to the conclusion that there existed in the apostolic age, as there undoubtedly did a little later (Pliny, Ep. of Traj.), an order of women bearing that title, and exercising in relation to their own sex functions which were analogous to those of the deacons. On this hypothesis it has been inferred that the women mentioned in Rom. xvi. 6, 12, belonged to such an order (Herzog, Rent-Encycl. s. v.). The rule given as to the conduct of women in 1 Tim. iii. 11, Tit. ii. 3, have in like manner been referred to them (Chrysost., Theophyl., Hammond, Wiesinger, ml loc.), and they have been identified even with the "widows" of 1 Tim. v. 3-10 (Schaff, Apost.Kirche, p. 336 [Amer. ed. in English p. 555 f.]).

In some of these instances, however, it seems hardly doubtful that writers have transferred to the earliest age of the Church the organization of a later. It was of course natural that the example recorded in Luke viii. 2, 3, should be followed by others, even when the Lord was no longer with his disciples. The new life which pervaded the whole Christian society (Acts ii. 44, 45, iv. 31, 32) would lead women as well as men to devote themselves to labors of love. The strong feeling that the true προσευχατη of Christians consisted in "visiting the fatherless and the widow" would make this the special duty of those who were best fitted to undertake it. The social relations of the sexes in the cities of the empire (cf. Grot. on Rom. xvi. 1) would make it fitting that the agency of women should be employed largely in the direct personal application of Christian truth (Tit. ii. 3, 4), possibly in the preparation of female catechumens. Even the later organization implies the previous existence of the cemns from which it was developed. It may be questioned, however, whether the passages referred to imply a recognized body bearing a distinct name. The "widows" of 1 Tim. v. 3-10 were clearly, so far as the rule of ver. 9 was acted on, women who were no longer able to discharge the active duties of life, and were therefore maintained by the Church that they might pass their remaining days in "prayers night and day."
The conditions of v. 10 may, however, imply that those only who had been previously active in ministering to the brethren, who had in that sense been deaconesses, were entitled to such a maintenance. For the fuller treatment of this subject, see Wir-von. On the existence of deaconesses in the apostolic age, see Moschelm, de Reb. Christ. p. 118; Neander, Pflanz u. Leh. i. 265; Augusti, Hamb. der Christ. Archiv, ii. 3.

E. H. P.

*Ziegler's De Deaconis et Deaconissae veteris Ecclesiae (Wittenberg, 1778), a monograph of sterling value, should not be left out of the list here. The reader will find the argument for "deaconesses" in the primitive church well stated by Dr. Schaff in his History of the Apostolic Church, p. 555. He understands the controverted σεαραλγετή to the "presbytery" of "the cemn and recognition" to this particular office. Presently also (Histoire des trois premiers Siecles, ii. 234) holds to the existence of this order of women in the first Christian age, but places it not so much on the
DEACONESS

ground of explicit Scripture proof, as that of general fitness and probability. Huther's view is not essentially different from this. Without supposing that the widows in question were formally set apart to minister in the Church. He held that in this early period, he thinks that they being put on the roll ("sacred order") of those wholly supported by the Church would naturally bring with it the result, as it did the obligation, of devoting themselves to such works of benevolence as were suited to their age and sex. (See in Meyer's Comm. ad. xvi. Ver. xliii. 64.) Out of this Anovitz may have grown the female hospital of later times.

Rev. J. S. Howson, D. D., has written a valuable treatise on this subject: "Deaconesses; or, The Official Help of Women in Parochial Work and in Charitable Institutions" (London, 1860). He speaks here in a more positive tone than in his "Life and Epistles of St. Paul," of the validity of the texts to which appeal is usually made in proof of such institutions in the apostolic church. He pleads for the revival of the institution in Protestant churches, and results the recommendation of attempts for this purpose in England, France, and Germany. See also his remarks on this point in his still later work: "Sorrows from the Life of St. Paul, and their Religious Lessons" (London, 1866).

For the later ecclesiastical opinions and usages on this subject, the reader may see Women's Work in the Church, by J. M. Ludlow (London, 1865). The writer treats there less fully of the Scripture argument, assuming rather than proving, that ἴδωνκες applied to Phoebe (Rom. xvi. 1) can mean only "deaconesses" as the correlative of "deacon," and that γυναῖκες (1 Tim. iii. 11) must mean "deacons," and that all other explanations are impossible. Dissenting from most of those who yet adopt his conclusion on the main question, he denies that the "widows" (1 Tim. v. 9 ff.) were deaconesses at all, and thus relies almost wholly upon the controverted γυναῖκες for his Scripture proof of a primitive female diaconate. See also Church Polity, by H. J. Ripley, D. D. (Boston, 1867). The author suggests that on whatever ground the Scripture warrant for this office may be put, its proper sphere of exercise is not to conflict with the Apostle's view of woman's position in the church (1 Cor. xiv. 34, 35; 1 Tim. ii. 12). It is not to be known to all readers that the earliest congregational churches in England, in the 16th century, recognized fully this order of female bishops as a part of their organization. Robert Browne (1582) speaks of the deacon as "the reliever" and the deaconess as "the widow" (Hambury's Memorials relating to Independents, i. 21). The separate or Congregational church of Gainsborough, England (1589)—out of which came the Separatists, the Leyden church, and the Plymouth church—had " relievers " or " widows," who must be " widows of 60 years of age at least," whose work it was "to minister to the sick," &c. (Hambury, i. 30, 31). Johnson and Ainsworth's Congregational church in Amsterdam (1606) had " one ancient widow for a deaconess." Though 60 years old when chosen, " she did frequently visit the sick and weak; ... and if they were poor, she would rather relieve them of their alms, or acquit her deaconess, and she was obeyed as an officer of Christ." (Young's Chronicles, p. 455, Boston, 1811). The Cambridge Platform (ch. vii. § 7) recognizes this office of deaconess. "The Lord hath appointed ancient widows (where they may be had) to minister in the Church, in giving attendance to the sick, and to give succour unto them, and others in the like necessities." The Rev. Mr. Punchard, well known for his studies in the early ecclesiastical history of New England, has kindly pointed out to the writer the foregoing references. 11.

DEAD SEA. This name nowhere occurs in the Bible, and appears not to have existed until the 23rd century after Christ. It originated in an erroneous opinion, and there can be little doubt that to the name is due in a great measure the mistakes and misrepresentations which were for so long prevalent regarding this lake, and which have not indeed yet wholly ceased to exist.

In the O. T. the lake is called "the Salt Sea," and "the Sea of the Plain" (Arabah); and under the former of these names it will be found described. [NEA, THE SALT.]

* The popular name of this remarkable sheet of water is a natural and appropriate appellation, although exaggerated stories have been current respecting its properties—among them the fable that it exhalas a noxious miasma. Reposing in its deep chasm or caldron, without any current or outlet; its heavy waters impregnated with mineral salts, combined with a sulphur and sulphur, acid and mucous to the taste, and fatal to animal and vegetable life; no sun stirring its sterile depths, and no flowers or foliage fringing its borders; its shores and surrounding territory sterile, desolate and dreary; the whole region lonely and stern, and bearing marks of some dread convulsion of nature: the cemetery of cities that once occupied a portion of its site, and a perpetual memorial of the righteous judgments of God—by what more suitable and expressive name can it be called, than that by which it is now generally known, "The Dead Sea?"

S. W. *

DEAD, THE. By this term the A. V. represents the Hebrew word בֵּית הָאָדָם (once translated, deceased, Is. xxi. 14), as well as the word מְתָא to which it properly corresponds. It thus confounds two words of very different import; and what is greatly to be regretted, it effaces, in the English version of the Hebrew Scriptures, a distinct and striking recognition of the separate existence of the soul, or spiritual part of man, after the death of the body.

The dead (those who have ceased to live on earth, and are therefore absolutely dead to all earthly relations) are represented by מְתָא, which, as generic, includes also the other term.

The other term translated dead, בֵּית הָאָדָם, means disembodied spirits separated from the body at death, and continuing to live in a separate existence. According to First (Heb. n, Chald. Handw., מְתָא, H.), it is from a root meaning to be obscure, dark, and was applied, by the same figure as the German Schatten, to departed spirits, conceived as mere shadowy forms. According to Gesenius, it means, rather, the quiet, the silent, from their supposed state of inactivity and repose, "at incola regni tenebris et silentiis." (comp. Is. xiv. 9), or the work, the field, the labor, of the dead, . . . quam maximum naturae est accommodatum est." Is. xiv. 10 (Thee iii. 136)."

" Oschach, System der Relig. Psychologie, p. 400"
DEARTh.

In either case, it is well represented by the word 

\( \text{し} \), by which the same object is designated in

English usage. The Hebrew word occurs in the following passages, which show the importance of the distinction overlooked in the A. V.

The shades tremble,

Beneath the waters and their inhabitants

Job xxvi. 5. 

Wilt thou show wonders to the dead?

Will the shades arise and praise thee?

Ps. lxxxviii. 10.

For her house inclines to death,

And her ways to the shades.

Prov. ii. 18.

And he knows not that the shades are there,

Her guests in the depths of the underworld.

Prov. ix. 18.

The boldness of this truthful representation is

worthy of notice. "Her house" is called (ch. vii. 27) "ways to the underworld," and "her steps" (it is said in ch. v. 5) "take hold on it;" so near to its abodes, that (by a bold figure) the shades of the dead are there, and her guests are in the depths of hell!

Other passages in which this word occurs are

Prov. xvi. 16; Is. xlv. 9, xlvii. 14, 19. See in the add. Giants, the paragraph added at the close of No. 3.

T. J. C.

DEARTH. [Famine.]

DE'BIR, the name of three places of Palestine.

1. (\( \text{し} \), but in Judg. and Chr. \( \text{し} \) [hinder part as of a temple, and hence the sanctuary, Ges.; perh. pasture, Fürst]; \( \text{し} \) [Vat. Alex. \( \text{し} \)] Debir, a town in the mountains of Judah (Josh. xv. 49), one of a group of eleven cities to the west of Hebron. In the narrative it is mentioned as being the next place which Joshua took after Hebron (x. 38). It was the seat of a king (x. 39, xli. 13), and was one of the towns of the Amalekites, from which they were utterly destroyed by Joshua (xli. 21). The earlier name of Debir was Kirjath-Sepher, "city of book" (Josh. xv. 15; Judg. i. 11), and Kirjath-Sannah, "city of palm" [or palm-branch or leaf] (Josh. xv. 49). The records of its conquest vary, though not very materially. In Josh. xv. 17 and Judg. i. 13 a detailed account is given of its capture by Othniel son of Kenaz, for love of Achsah, the daughter of Caleb, while in the general history of the conquest it is ascribed to the great commander himself (Josh. x. 38, 39) [since the acts of the principal and the subordinate in such a case may be ascribed to one or the other]. In the last two passages the name is given in the Hebrew text as Debirah (\( \text{し} \)), it was one of the cities given with their "suburbs" (\( \text{し} \) to the priests (Josh. xxi. 15; i Chr. vi. 58). Debir does not appear to have been known to Jerome, nor has it been discovered with certainty in modern times. About three miles to the W. of Hebron is a deep and secluded valley called the Wady Nukib, inclosed on the north by hills of which one bears a

foot-note: " Der Name der Hadesbewohner 

\( \text{し} \) [die Schläffen (von \( \text{し} \) schlaff, mott sein) stimmt zu den homerischen Bezeichnungen καταθέντες die Er schlafenden, θαμναὶ καταθέντες die Hüter ohne Kraft μικροῖς, σεισάμαι, ιεισάμαι, und kommt auch in der Inschrift der idoniischen Könige-Sargen vor."

name certainly suggestive of Debir. — Debir-Sheb. (See the narrative of Rosen in the Zeitsch. d. D. M. G. 1837, pp. 59-64.) The subject, and indeed the whole toponymy of this district, requires further examination: in the mean time it is perhaps some confirmation of Dr. Rosen's suggestion that a village or site on one of these hills was pointed out to the writer as called lest, the Arabic name for Joshua. Schwartz (p. 81) speaks of a Wodi Debir in this direction. Van de Velde (Mem. p. 307) finds Debir at Dilbeh, six miles S. W. of Hebron, where Stewart mentions a spring brought down from a high to a low level by an aqueduct.

2. (\( \text{し} \); \( \text{し} \) to τήταρον τῆς φωτογραφίας Ἀγγελ.] = Debor.) A place on the north border of Judah, near the "Valley of Achor" (Josh. xv. 7), and therefore somewhere in the complications of hill and ravine behind Jericho. De Saulcy (ii. 139) attaches the name Thour-el-Debaur to the ruined khan on the right of the road from Jerusalem to Jericho, at which travellers usually stop to refresh themselves, but this is not corroborated by any other traveller. The name given to it by the Arab is the present name (1858) was Khan Hather-a'rah. A Wodi Debir is marked in Van de Velde's map as close to the S. of Neby Hanna, at the N. W. corner of the Dead Sea.

3. The "border (\( \text{し} \)) of Debir" is named as forming part of the boundary of Gad (Josh. xiii. 20), and as apparently not far from Mahanaim, Rehuel (p. 734) conjectures that the name may possibly be the same as Lodahar (\( \text{し} \)), but no identification has yet taken place (LXX. \( \text{し} \) [Vat. Alex. \( \text{し} \)] Debir, king of Ezgon, a town in the low country of Judah; one of the five kings hanged by Joshua (Josh. x. 23).

DEBORAH (\( \text{し} \) [he]: \( \text{し} \) = Debora.] = Debrāh. [Alex. Debrāba: Vulg. omitted], a woman of Naphtali, mother of Tophil, the father of Tobih (Tob. i. 8). The same name as

DEBORAH (\( \text{し} \) = Debrāba. [Alex. Debrāba: Deborah]. 1. The nurse of Rekab (Gen. xxiv. 8). Nurses held a high and honourable place in ancient times, and especially in the East (2 K. xi. 2; Hom. Od. i. 429; Verg. En. vi. 2). "Anetia nutritia," Or. Met. xiv. 141, where they were often the principal members of the family (2 Chr. xxii. 11; Jahn, Arch. Bibli. § 166). Deborah accompanied Rekab from the house of Bethuel (Gen. xxiv. 59), and is only mentioned by name on the occasion of her burial, under the oak of Bethel, which was called in her honor Allon-Bacuth (Βασιλεία πνευμάτων). Such spots were usually chosen for the purpose (Gen. xxiii. 17, 19; 1 Sam. xxxi. 19; 2 K. xxii. 18, &c.).

a De Saulcy quotes the name in Joshua as "Da bor:" but on what authority is not apparent. Certainly not that of the Hebrew or the Vulgate.

b The A. V. omits the article, and thus obscures the fact that the tree was well known for ages.
Many have been puzzled at finding her in Jacob's family; it is unlikely that she was sent to summon Jacob from Haran (as Jarchi suggests), or that she had returned during the lifetime of Reuben, and was now coming to visit her (as Abarbanel and others say); but she may very well have returned at Reuben's death, and that she was dead is probable from the omission of her name in Gen. xxxv. 27: and if, according to the Jewish legend, Jacob first heard of his mother's death at this spot, it will be an additional reason for the name of the tree, and may possibly be implied in the expression γονίας, comforted, A. V. "blessed" (Gen. xxxv. 9; see too Exod., Gesch. i. 390).

2. [Δαβεροθ: Debora.] A prophetess who judged Israel (Judg. iv. v.). Her name, γονίας, means "a bear" (αἴγιαλε, a "wasp"), just as Μηρασμα and Molthet were proper names. This name may imply nothing whatever, being merely an appellative, derived like Rachel (a lamb), Tamar (a palm), etc., from natural objects; although she was (as Curran, a lance, generally puts it) vita mille, hostinae arcuatu. Some, however, see in the name an official title, implying her prophetic authority. A bee was an Egyptian symbol of regal power (cf. Call. Ior. 66, and Et. Mag. s. v. οἰκόσαφα); and among the Greeks the term was applied not only to poets (more apis Melitella, Hes.), and to those peculiarly chaste (as by the Neoplatonists); but especially to the priestesses of Delphi (χρυσόθραος καὶ λευκόθραος, Pind. F. iv. 106), Cycle, and Artemis (Creuter, Symbolik, iii. 324, i. v.), just as οἰκόσαφα was to the priests (Liddell and Scott s. v.). In both these senses the name suits her, since she was essentially a very sēr or seer, combining the functions of poetry and prophecy.

She lived under the palm-tree ("such tents the patriarchy loved," Glærige) of Deborah, between Ramah and Bethel in Mount Ephraim (Judg. iv. 5), which, as palm trees were rare in Palestine, is mentioned as a well-known and solitary landmark, and was probably the same spot as that called (Judg. xx. 33) Beal-Tamar, or the sanctuary of the palm (Stanley, K. & P. p. 146). Von Bohlen (p. 334) thinks that this tree is identical with Alon-Bachuth (Gen. xxxv. 8), the name and locality being nearly the same (Exod., Gesch. ii. 391, 405), although it is unhistorical to say that this "may have suggested a name for the muse" (Havercamp's Introduced to Pent. p. 201; Kalischer, Gen. ad loc.), possibly it is again mentioned as "the oak of Tabor," in I Sam. x. 3, where Thenum would read ἄνεμος for ὄμος. At any rate it was a well-known tree, and she may have chosen it from its previous associations.

She was probably a woman of Ephraim, although from the expression in Judg. v. 15, some suppose her to have belonged to Issachar (Exod., Gesch. ii. 498). The expression γονίας ἐστίν is much disputed; it is generally thought to mean "wife of Lapidoth," as in A. V.; but other versions render it "uxor principis," or "Fornina Lapidothana" (that great dame of Lapidoth), "Tennyson," or "another splendidum, i.e. one divinely illuminated, since ἄνεμος = lightnings." But the most protracted notion is that of the rabbis, who take it to mean that she attended to the tabernacle lamps from θύσις λαμπή, a lamp! The fem. termination is often found in men's names, as in Shelomith (1 Chr. xxvii. 9), Koheleth, d.c. Lapidoth then was probably her husband, and not Barak, as some say.

She was not so much a judge (a title which belongs rather to Barak, Her, ii. 32) as one gifted with prophetic command (Judg. iv. 6, 14, v. 7); neither does his inspiration (Joseph. Antiq. v. 5, § 4 Is. 57) "Her sex would give her additional weight, as it did to Yeldeh and Ahurim among the Greeks, from an instinctive belief in the divinity of womanhood (Tac. Germ. c. 8). Compare the instances of Miriam, Huldah, Anna, Noadiah (2 K. xii. 14: Neh. vi. 14).

Jabin's tyranny was peculiarly felt in the northern tribes, which were near his capital and under his jurisdiction, namely, Zebulon, Naphtali, and Issachar; hence, when she summoned Barak to the duel, there was an element in it of the spirit of the battle; but they were joined by the adjacent central tribes, Ephraim, Manasseh, and Benjamin, though not by those of the extreme west, north, and east." (Stanley, p. 339). Under her direction Barak encamped on "the broad summit of Tabor" (Joseph. vii. ii. 20, § 6). When asked to accompany him, "she answered indignantly, Thou, oh Barak, deliverst up nearly the authority which God hath given thee into the hands of a woman; neither do I reject or despise thy name." (Joseph. Antiq. v. 5 § 4). The LXX. interpolate the words οὐδὲ καὶ ἡ εἷς ἄλλη τῆς ἔμφασις in διὰ ἡμᾶς Διὸς τὸν γέγονεν μετ' ἔμοι as a sort of excuse for Barak's request (iv. 8: cf. 14, v. 23). When the small band of ill-armored (Judg. v. 8) Israelites saw the dense iron chariots of the enemy, "they were so frightened that they wished to march off at once, had not Deborah detained them, and commanded them to fight the enemy that very day." (Joseph. i. c.). They did so, but Deborah's prophecy was fulfilled (Judg. iv. 9), and the enemy's general perished among the "oaks of the wanderers (Zamanim)," in the tent of the Bedouin Kenite's wife (Judg. iv. 21) in the northern mountains. "And the land had rest forty years" (Judg. v. 31). For the natural phenomena which sided (Judg. 20, 21) the victory, the other details (for which we have ample authority in the twofold narration in prose and poetry), see Barak, where we have also entered on the difficult question of the chronology (Exod., Gesch. ii. 489-494).

Deborah's title of "prophetess" (γονίας) includes the notion of inspired poetry, as in Ex. iv. 20; and in this sense the glorious triumphal ode (Judg. v.) well vindicates her claim to the office. On this ode much has been written, and there are separate treatises about it by Holmann, Kalkar, etc., at present as Deborah's fountain. They have a tradition that the heroines passed there with Barak on his march to Tabor, and bathed in this fountain on the morning of the decisive battle. See the writer's Lives of Scripture, p. 248 (revised ed.); and Thomson's Land and Book, i. 424.
DEBTOR. [LoAN.]

DECAPOLIS (Δέκαπολις, "the ten cities"). This name occurs only three times in the Scriptures, Matt. iv. 25; Mark v. 20, and vii. 31; but it is frequently mentioned by Josephus and other ancient writers. Immediately after the conquest of Syria by the Romans (b. c. 65), ten cities appear to have been rebuilt, partially colonized, and endowed with peculiar privileges: the country around them was hence called Decapolis. The limits of the territory were not very clearly defined; and probably in the course of time other neighboring cities received similar privileges. This may account for the fact that ancient geographers speak so indefinitely of the province, and do not even agree as to the names of the cities themselves. Pliny (v. 18) admitting that "non omnes eadem observant," enumerates them as follows: Scythopolis, Hippos, Gadara, Petî, Philadelphia, Gerasa, Dion, Canathia, Damascus, and Ephraim. Ped- emay (v. 17) makes Cephalis one of the ten; and an old Palmyrene inscription quoted by Roland (Pol. p. 525) includes Abila, a town which, according to Eusebius (Onom. s. v. Abîl) was 12 Roman miles east of Gadara. Josephus (B. J. iii. 9, § 7) calls Scythopolis the largest city of Decapolis, thus manifestly excluding Damascus from the number. All the cities of Decapolis, with the single exception of Scythopolis, lay on the east of the Jordan; and both Eusebius and Jerome (Onom. s. v. De- capolis) say that the district was situated "beyond the Jordan, around Hippos, Pella, and Gadara." that is, to the east and southeast of the Sea of Galilee. With this also agrees the statement in Mark v. 20, that the demoniac who was cured at Gadara "began to publish in Decapolis how great things Jesus had done to him." It would appear, however, from Matt. iv. 25 and Mark vii. 31, that Decapolis was a general appellation for a large distri- bution stretching along both sides of the Jordan. Pliny (v. 18) says it reached from Damascus on the north to Philadælphus on the south, and from Scy- thopolis on the west to Canatha on the east — thus making it no less than 100 miles long by 60 broad; and he adds, that between and around these cities are tetrarchies, each like a kingdom; such as Trach- onitis, Panæas, Abīb, Arca, &c. This region, once so populous and prosperous, from which multitudes flocked to hear the Saviour, and through which multitudes followed his footsteps — is now almost without an inhabitant. Six out of the ten cities are completely ruined and de- serted. Scythopolis, Gadara, and Canatha have still a few families, living, more like wild beasts than human beings, amid the crumbling ruins of palaces, and in the cavernous recesses of old tombs. Damascus alone continues to flourish, like an oasis in a desert. Dr. Conant (Book of Job, p. 24) translates the passage thus: —

"My brethren are deceitful, like the brook, As the channel of brooks that pass away: That become turbid, from ice; The snow hides itself in them. At the time they are poured off, they fall; When it is hot they are consumed from their place. The caravans along their way turn aside; They go up into the wastes, and perish. The caravans of Teuna looked; The companies of Sheba waited for them. They were ashamed that they had trusted, They came thither and were confounded."

The ground of the comparison here lies in the uncertain character of the brooks or streams in the East. A detailed example may best serve to illustrate the peculiarity referred to. On the 2d of April the writer crossed the stone bridge to the right of Kubaineh, 11 hours to the northwest of Jerusalem. The channel of the stream was then entirely destitute of water. Richardson (Travels along the Mediterranean, ii. 235) found there on the 15th of April, of another year, "a small brook trickling down the valley." Prokesch (Reise ins heilige Land, p. 41), who was there at another time, a few weeks later in the season, speaks of a full rushing stream as dashed along the water-bed. Otto von Richter (Wolfgangreise im Morgenlande, p. 15) who was there in August, says that it contained then a little water. Again, Salzbacher (Er- innerungen aus meiner Pilgerreise, ii. 31), who saw the brook near the end of June, says that it was then entirely dry. The stream, therefore, is evidently a very precarious one. It varies not only in winter, but at the same season in different years. It is a fair example of what is true of eastern brooks in general. These water-courses, as they may more properly be called, flow with water during the rainy season; but soon after that are liable to be wholly dried up, or if they contain water still later, contain it only for a longer or shorter time, according to their situation and the severity of the heat of particular years. Hence, the traveller in quest of water must often be disappointed when he comes to such streams. He may find them entirely exhausted; or, he may find the water gone at the place where he approaches them, though it may still linger in other places which elude his observation; he may perceive, from the moisture of the ground, that the last drops have just disappeared, and that he has arrived but a few hours too late for the attainment of his object. Painting with thirst and after many a weary step out of his direct course in pursuit of the cooling stream, the way- farer reaches at length the place of hoped-for relief, but only to be doomed to disappointment — the deceitful brook has fled.

We meet with the same comparison somewhat differently applied in Jer. xxv. 18. The prophet's sky had long been darkened with trouble and sor- row; but the helper for whom he was waiting de- layed to come. The more exact translation would be: —

"Why is my affliction perpetual? And my wound incurable? It will not be healed. Thou art to me as a lying brook, As waters which are not enduring."

Thomson (Land and Book, ii. 231) has some remarks on this characteristic of the brook. He

* For the fuller literature of the Song, see BARK, Amer. ed. 37
supposes, on account of the reference to Tema and Sheba, that the streams which suggested Job's illustration are those which flowed down through the high grounds of Gilead and Bashan, and came to nothing in the neighboring desert.

II.

* DECISION, VALLEY OF. [Jehos. Haphtat.]

**Dedan** (ִֽדִּדְאָנִים) [depression, low country. Furst]: ֶדִּדְאָנִים: [Vat. in 1 Chr. loosesa: ִֽדִּדְאָנִים]: ֶדִּדְאָנִים. 1. The name of a son of Kainam, son of Cush (Gen. vi. 7; 1 Chr. i. 1), "the sons of Kainam, Sheba, and Dedan." 2. [In Gen. ֶדִּדְאָנִים, Alex. ִֽדִּדְאָנִים; 1 Chr. and Ez. ֶדִּדְאָנִים: Jer. xxv. 24, ֶדִּדְאָנִים, F.A. ֶדִּדְאָנִים; xlix. 8, ֶדִּדְאָנִים, Alex. F.A. ֶדִּדְאָנִים: Dedan, dedan.] That of a son of Jokshan, son of Keturah (Gen. xxv. 3), and "Jokshan begat Sheba and Dedan. And the sons of Dedan were Assurim, Lethaim, and Luumim." (Cf. 1 Chr. i. 32). The usual opinion respecting these fathers of tribes is that the first settled among the sons of Cush, whose names may be placed second, and the Syrian borders, about the territory of Edom. But Gesenius and Winer have suggested that the name may apply to one tribe; and this may be adopted as probable, on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan, whom the writer places, presumptively, on the borders of the Persian Gulf. [Arabia, Cyso, Raamah, &c.] The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the south of Palestine, bearing merchandise of India, and possibly of Southern Arabia; and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to), are contained in the prophecies of Isaiah, Jeremias, and Ezekiel, and are in every case obscure. The Edomite settlers seem to be referred to in Jer. xlix. 8, where Dedan is mentioned in the prophecy against Edom; again, in xxv. 23, with Tenia and Buz; in Ez. xxv. 13, with Teman, in the prophecy against Edom; and in Is. xvi. 14 ("the burden upon Arabia. In the forest in Arabia shall lodge, O ye travelling companies of Dedaniam," with Tema and Kedar. This last passage is by some understood to refer to caravans of the Cushite Dedan; and although it may only signify the wandering proprietors of a nomad tribe, such as the Edomite portion of Dedan may have been, the supposition that it means merchant-caravans is strengthened by the remarkable words of Ezekiel in the hamentation for Tyre. This chapter (xxvii. 12) twice mentions Dedan; first in ver. 15, where, after enumerating among the traffickers with the merchant-city many Asiatic peoples, it is said, "The children of Dedan were thy merchants, many isles were the merchandise of thine hand: they brought thee for a present horns of ivory, and ebony." Passing thence to Syria and western and northern peoples, the prophet again (in ver. 20) mentions Dedan in a manner which seems to point to the wide-spread and possibly the mixed ancestry of this tribe. Ver. 15 may be presumed to allude especially to the Cushite Dedan (cf. ch. xxviii. 13, where we find Dedan with Sheba and the merchants of Tarshish; apparently, from the context, the Dedan of ch. xxvii. 15); but the passage commencing in v. 20 appears to include the settlers on the borders of Edom (i.e., the Keturahite Dedan). The whole of the passage is as follows: "Dedan [was] thy merchant in precious clothes for chariots. Arabia, and all the princes of Kedar, they occupied with thee in bands, and rams, and goats: in these [were] thy merchants. The merchants of Sheba and Dedan, they [were] thy merchants: they occupied in thy fair with chaff of all spicas, and with all precious stones, and gold. Haran, and Canneh, and Eden, the merchants of Sheba, As- dur, [and] Chilmad, [were] thy merchants." (Ez. xxvii. 2-23.) We have here a Dedan connected with Arabia (probably the northwestern part of the peninsula) and Kedar, and also with the father and brother of the Cushite Dedan (Kainam and Sheba), and these latter with Asiatic peoples commonly placed in the regions bordering the head of the Persian Gulf. This Dedan moreover is a merchant, not in pastoral produce, in sheep and goats, but in "precious clothes," in contradistinction to Arabia and Kedar, like the far-off eastern nations who came with "spaces and precious stones and gold," "blue clothes and brodered work," and "couches of rich apparel." The probable inferences from these messages of Dedan support the argument first stated, namely: 1. That Dedan son of Kainam settled on the shores of the Persian Gulf, and his descendants became caravan-merchants between that coast and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumen, and perhaps to have had a pastoral life. All traces of the name of Dedan, whether in Idumana or on the Persian Gulf, are lost in the works of Arab geographers and historians. The Greek and Roman geographers however throw some light on the eastern settlement: and a native indication of the name is presumed to exist in the island of Dedon, on the borders of the gulf. The identification must be taken in connection with the writer's recovery of the name of Sheba, the other son of Jokshan, the island of Axv, near the Persian shore of the same gulf. This is discussed in the art. Raamah.

3. P.

**DEDICATION, FEAST OF THE** (τὰ ἑορτασματικὰ, John x. 22: Eucharis, Vulg.: ὁ ἑορτασματικὸς τοῦ θουαστρόπου, 1 Macc. iv. 56 and 59 (the same term as is used in the LXX, for the dedication of the altar by Moses, Num. vii. 10); ὁ καθαρισμὸς τοῦ ναοῦ, 2 Macc. x. 5: Mishna, תַּנּוּתָא, i. e. dedication: Joseph. pción, Ant. xii. 7; § 75, the festival instituted to commemorate the purging of the Temple and the altar after Judas Maccabaeus had driven out the Syrians, v. c. 164. It is named only once in the Canonical Scriptures, John x. 22. Its institution is recorded 1 Macc. iv. 52-56. It commenced on the 24th of Chislev, the anniversary of the pollution of the Temple by Antiochus Epiphanes, v. c. 167. Like the great Mosaic feasts, it lasted eight days, but it did not require attendance at Jerusalem. It was an occasion of much festivity. The
writer of 2 Macc. tells us that it was celebrated in nearly the same manner as the Feast of Tabernacles, with the carrying of branches of trees, and with much singing (x. 6, 7). Josephus states that the festival was called "Lights," and that he supposed the name was given to it from the joy of the nation at their unexpected liberty — τὴν ὁρθὰν ἀγγείον καλώντες αὕτην Φώτα, εἰ τοῦ παρ’ ἐκτὸς οὗμα ταύτῃ ἤμι φανέρα τὴν ἕλνσιαν (Ant. xii. 7, § 7). The Mishna informs us that no fast on account of any public calamity could be commenced during this feast. In the Gemara a story is related that when the Jews entered the Temple, after driving out the Syrians, they found there only one bottle of oil which had not been polluted, and that this was miraculously increased, so as to feed the lamps of the sanctuary for eight days. Maimonides ascribes to this the custom of the Jews illuminating each house with one candle on the first day of the feast, two on the second day, three on the third, and so on. Some had this number of candles for each person in the house. Neither the books of Maccabees, the Mishna, nor Josephus mention this custom, and it would seem to be of later origin, probably suggested by the name which Josephus gives to the festival. In the Temple at Jerusalem, the "Haled" was sung every day of the feast.

In Ezra (vi. 16) the word γνίων, applied to the dedication of the second Temple, on the third of Adar, is rendered in the LXX. by εὐεραίων, and in the Vulg. by dedicato. But the anniversary of that day was not observed. The dedication of the first Temple took place at the Feast of Tabernacles (1 K. vii. 2; 2 Chr. v. 3). [TABERNACLES. FEAST OF.]

S. C.

* DEEP, THE (ἀβυσσός: abyssus). The term which the A. V. renders thus in Luke viii. 31 and Rom. x. 7, it renders "bottomless pit" in Rev. ix. 1, 2, 11; xi. 7; xx. 1, 3. The translation as thus varied (abyss would be better) is unfortunate, and the Vulg. is to be preferred (in Arabic, which binds together these passages (Rom. x. 7 partially excepted), but lends the reader to confound it with "the deep" as meaning the sea (e.g. Luke v. 4; 2 Cor. xi. 25), and founded on a different original word (βασάνος). "The deep" in Luke viii. 31, into which the demons that possessed the Gadarene unclean besought Jesus not to cast them, is evidently the place of punishment to which the "wicked spirits" are consigned (Luke viii. 29), for the being sent thither stands in that passage as equivalent to suffering the torment before the time spoken of in Matt. viii. 23, which they feared might be at once inflicted on them. We may say further, in view of the evident analogy between these passages and Jude ver. 6, that "abyss" is the place also where other wicked spirits of the same class are already confined, awaiting the more complete punishment which they are to suffer after the judgment of the great day. "Abyss" is not one of the names actually applied to the state of place of wicked men after death; but we seem to be forbidden by such language as that in Matt. xxv. 41 to infer that the condition of lost men and fallen angels is to be essentially different when the last stage of their destiny is reached. In Rom. x. 7 the "abyss" and "heaven" are opposed to each other as limits separated by the greatest conceivable distance. The use of the term in the Apocalypse partakes of the vagueness and poetic freedom of that figurative book, but retains still the groundwork of its more direct, literal application. The "abyss" or "bottomless pit" is a place enveloped in gloom and darkness whence arise clouds of smoke which "darken the sun and the air" (ix. 2); from which issue myriads of destructive locusts whose king is Abaddon or Apollyon, who leads them forth to ravage the earth and torment mankind (ix. 3 ff); and into which at length this enemy of all good, the old serpent which is the Devil and Satan, is plunged and chained for a thousand years, and where after a brief respite he is confined again apparently forever (xx. 1 ff).

In regard to the origin and force of this imagery, which with some variations has given expression to men's natural consciousness of a future retribution, among so many different nations, see Prof. Stuart's Comment. on the Apocalypse, i. 189, and Pfanner's Systema Theologica Gentilis Pariotis, pp. 450-489. For the usage of the Septuagint, see Bdel's Thesaur. Phil. p. 4, and for that of the Apocalypse, Wahl's Christa Librarien Vet. Test. Apocryph. p. 2. We are not "to understand, of course, that "abyss" in the N. T. is a contraction with Hades or the underworld as the abode of the dead indiscriminately but is the part of that wider realm assigned as their special abode to the wicked. [Hades.] H.

DEER. [FALLOW-DEER.]

* DEGREE (βαθύς: gradus). The original word occurs in the N. T. only in 1 Tim. iii. 13: "For they that have used the office of a deacon well, purchase to themselves a good degree, and great boldness in the faith which is in Christ Jesus." The "degree" or step referred to has been variously understood: (1.) Of ecclesiastical preferment, e.g. from the deaconate to a higher office: so some of the fathers, and lately Wordsworth: but this, as Alford and Elliott admit, is untenable. It is not likely that any such process of ecclesiastical preferment existed at this early period. (2.) A station or standing-place in the sight of those who are referred to in their different title in De Wette, (or De Wette, Alford, Elliott). (3.) A place of honor in the estimation of the Church (Luther, Calvin). (4.) Progress in the faith.

The word etymologically signifies a step upward or forward, and in the tropical sense in which it is here used, expresses the general idea of advancement. The somewhat emphatic dative "for themselves," makes distinct the idea of personal advantage, as distinguished from service to others, indicated by the verb rendered in A. V., "used the office of a deacon." The subjunctive phrase, "boldness (or better, jōpons confidence; see De Wette and Huther in loc.) in faith," shows that this advantage is of a spiritual nature, and essentially subjective. The "degree" or step referred to, then, would seem most naturally to relate to progress in spiritual life. We may accordingly regard the passage in 1 Tim. iii. 13 as a general provision in respect to the subjective spiritual benefit obtained by faithfully serving as deacons, the importance of which in turn becomes confirmatory of the propriety of requiring the qualifications mentioned in vv. 8-12. The passage in 1 Tim. iii. 13 may be rendered and explained, then, as follows: For
they who well served as deacons" (the verb in the orig. simply indicates the service viewed as completed); there is nothing to mark a reference to the day of judgment, as Alford would have it) "declaim for themselves a good degree" (furtherance in spiritual attainments), and much confidence (towards God) in faith in Christ Jesus." Van Bostereke would unite with this the idea of future blessedness.

G. E. D.

* DEGREES, SHADOW OF [AHAB; DIAL; HEZEKIAH.]

DEGREES, SONGS OF (תַּהוֹעִית הָלָלוֹנָה), a title given to fifteen psalms, from exx. to cxxiv., inclusive. Four of them are attributed to David, one is ascribed to the pen of Solomon, and the other ten give no indication of their author. Eichhorn supposes them all to be the work of one and the same bard (Einl. in den KgT.), and he also shares the opinion of Herder (Geist der ehrwürdigen Poesie), who interprets the title "Hymnus for a journey." "The headings of the psalms, however, are not to be relied on, as many of these titles were superadded long after the authors of the psalms had passed away. The words of David, or of Solomon, do not of themselves establ. the fact that the psalm was written by the person named, since the very same phraseology would be employed to denote a hymn composed in honor of David or of Solomon" (Mark's Serm., i. 281-9). Bellermann (Metrik der Hebräer) calls these psalms "Trochaic songs."

With respect to the term הָלָלוֹנָה, A. V. "degrees," a great diversity of opinion prevails amongst Biblical critics. According to some it refers to the melody to which the psalm was to be chanted. Others, including Gesenius, derive the word from the poetical composition of the song, and from the circumstance that the concluding words of the preceding sentence are often repeated at the commencement of the next verse. Thus Psalm cxvi.

"I will lift up mine eyes unto the hills. From whence cometh my help. My help cometh even from Jehovah," &c.

And so in other passages (comp. xxii. 4, 5, and cxxiv. 1, 2, 3 and 4). Allen Ezra quotes an ancient authority, which maintains that the degrees allude to the fifteen steps which, in the temple of Jerusalem, led from the court of the women to that of the men, and on each of which steps one of the fifteen songs of degrees was chanted. Adam T. Harke (Comment, on Ps. exx.) refers to a similar opinion as found in the Apocryphal Gospel of the birth of Mary: "Her parents brought her to the temple, and set her upon one of the steps. Now there are fifteen steps about the temple, by which they go up to it, according to the fifteen Psalms of Degrees."

The most generally accredited opinion, however, is that הָלָלוֹנָה is etymologically connected with הָלָל, "to go up," or to travel to Jerusalem; that some of these hymns were preserved from a period anterior to the Babylonish Captivity; that others were composed in the same spirit by those who returned to Palestine, on the conquest of Babylonia by Cyrus, and that a few refer even to a later date, but were all incorporated into one collection, because they had one and the same object. This view is adopted by Rosenmüller, Herder, Mendelssohn, Joel Böll, &c. Herder translates the words "Ein Lied für heiligen Chor," thus connecting the psalm with the manner of its execution; and Michaelis compares הָלָלוֹנָה with the Syriac סְלָלִים (Scala) which would likewise characterize the metre or the melody.

D. W. M.

* If הָלָלוֹנָה designates the psalms grouped together under that title as those which the Hebrews sung when they went to Jerusalem to keep the yearly feasts, the rendering should be "Going up" or "Ascents" (comp. עֶבֶרֶשַׁיָּא as so often said of journeys thither in the N. T.). Hengstenberg's advocacy of this explanation (Die Psalmen, iv. 2te Abth. p. 6), has given it to more recently still wider currency. Some of his arguments (which taken together have a cumulative force, though singly less decisive) are the following: (1) הָלָלָלִים is the usual expression for these festival journeys (Ex. xxxiv. 21; 1 Kings xii. 27, 28; Ps. cxiii. 4). (2.) The article in כּלָלִים, by way of precedence, denotes the journeys, which can only be those annual journeys prescribed by the law (comp Ps. cxiii. 4). (3.) The oldest, in all probability, of these pilgrim songs, namely: that which was composed by David soon after the consecration of Zion as the seat of the sanctuary and at the commencement of the pilgrimages thither (Ps. cxii.), contains an explanation of the sense of כּלָלִים in the occurrence of two correspondent expressions (as in the case of the explanation of לַעֲשֵׂה, Ps. xxxii.), namely: "We will go to the house of the Lord" in ver. 1, and "to which the tribes go up" (כּלָלָלִים) in ver. 4. (4.) Some of these psalms, in accordance with the most manifest internal marks, have been used for this purpose, e. g. Ps. cxii. 1 shows how appropriate the psalm was as designed to be sung in view of the mountains of Jerusalem. (5.) According to this interpretation all the common peculiarities of these psalms are accounted for, such as contents, rhythmical structure, and local allusions.

Hupfeld (Die Psalmen, iv. 232) favors this revived opinion of many of the older critics. Ewald alone agrees with those who consider them hymns designed for pilgrim services, to the Temple, composed during and after the time of the exiles (Eld. Jahrh. vi. 105, and Gesch. Isr. iv. 115). Perowne (Book of Psalms: Introduction, p. xxvi., Lond. 1865) gives the preference to this explanation.

H.

DEHAvITES (דְּאָוִּיִּתֵּס; Auclm: Dictis) are mentioned but once in Scripture (Ezr. ix. 9). They were among the colonists planted in Samaria by the Assyrian monarch Esarhaddon, after the completion of the Captivity of Israel. From their name, taken in conjunction with the fact that they are coupled with the Susanchites (Susianians, or people of Susa) and the Edinites (Elymians, natives of the same country), it is fairly concluded that they are the Dari or Dahi, mentioned by Herodotus (i. 125) among the nomadic tribes of Persia. This people appears to have been widely diffused, being found as Dahae (Daia) both in the country east of the Caspian (Strab. xi. 8, § 2; Arrian. Exped. M. iii. 11, &c.), and in the vicinity of the Sea of Azof (Strab. xi. 9, § 3); and again as Dāh (Dānā, Thueyd. ii. 96), Dāi (Dānā, Strab.), or Dace
DEKAR. The son of Deker, i. e. BEN-DEKER.

DELAIAH [3 syl.] (Δελαία; [Alex. Δαλαία: Delaia]) ; a priest in the western part of the hill-country of Judah and Benjamin, Shaddaim and Beth-shemesh (1 K. iv. 9).

DELAIAH [Δαλαία]; was Solomon's commissariat officer in the western part of the hill-country of Judah and Benjamin, Shaddaim and Beth-shemesh (1 K. iv. 9).

DELAIAH [Δαλαία; [Alex. Δαλαία: Delaia]); a priest in the western part of the hill-country of Judah and Benjamin, Shaddaim and Beth-shemesh (1 K. iv. 9).

DELAIAH [Δαλαία; Vat. in Ezr. Δαλαία, in Neh. Δαλαία: Dalaiia]. "Children of Delaiah" were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Ezr. ii. 60; Neh. vii. 62). In 1 Esdr. the name is LADAN.

3. DELAH [Δαλαία; Vat. Δαλέα: Delaia]: son of Mehetael and father of Shemiah (Neh. vi. 10).

4. DELAH [Δαλαία and Godai] [Ver. 12, Alex. Δαλέα, F. A. Δαλά: ver. 23, Comp. Adj. F. A. Δαλά: Delaia]; son of Shemiah, one of the "princes" (Δαλάηατες) of the court of Jehoiakim (Jer. xxxvi. 12, 25).

The name also occurs in the A. V. as DELAI.AH.

DELI.TAH [πιπεινειδιειπινεινειειπινεινεινειπινεινειπινεινειπινεινειπινεινειπινεινειπινεινειπινεινειπινεινειπινεινει

DELI.AH [Δαλεία; [Vat. in ver. 13, Δαλεία: Joseph, Delah; a woman who dwelt in the valley of Sorek, beloved by Samson (Judg. xvi. 1-18). Her connection with Samson forms the third and last of those legendary adventures which in his history are so inextricably blended with the craft and prowess of a judge in Israel. She was bribed by the "lords of the Philistines" to win from Samson the secret of his strength, and the means of overcoming it. (SASMON.)

It is not stated, either in Judges or in Josephus, whether she was an Israelite or a Philistine. Nor can this question be determined by reference to the geography of Sorek; since in the time of the Judges the frontier was shifting and indefinite. [SOLEK.] The following considerations, however, supply presumptive evidence that she was a Philistine:

1. Her occupation, which seems to have been that of a courtesan of the higher class, a kind of political hetaera. The hetaerian and political view of her position is more decided in Josephus than in Judges. He calls her γυνὴ ἑταιρὶα, and associates her influence over Samson with πάροις and συγκουλία (Ant. v. 8, § 11). He also states more clearly her relation as a political agent to the "lords of the Philistines." (Δαληία; Joseph of

DEMAS (Δαμασ), most probably a contraction from Δαμήτριος, or perhaps from ιωαίμας, a companion of St. Paul (called by him his συνεργός in Phil. iv. 3, also Col. i. 11) during his first imprisonment at Rome. At a later period (2 Tim. iv. 10) we find him mentioned as having deserted the Apostle through love of this present world, and gone to Thessalonica. This departure has been magnified by tradition into an apostasy from Christianity (so Epiph. Hores. 6, . . . καὶ Νημαῖς καὶ Ἑραμένης, τοὺς ἀγαπητάς τὸν ἱερατία ἁλανα, καὶ κατελείπαντας τὴν δούν τὴν ἀληθείαν, which is by no means implied in the passage."

H. A.

of his grandest hymns on this association of the two men with Paul's earlier captivity and the subsequent apostasy of Demas (Christian Year: St. Luke). H.
DEMETRIUS (Δημήτριος), a maker of silver shrines of Artemis at Ephesus (Acts xix. 21). These αἰγογεία were small models of the great temple of the Ephesian Artemis, with her statue, which it was customary to carry on journeys, and place on houses, as emblems. Demetrius and his fellow craftsmen, in fear for their trade, raised a tumult against St. Paul and his missionary com­panions. II. A. —

* The speech of Demetrius, by which he so much excited the Ephesian shrine-makers and through them the populace at large, was singularly adroit. He took care, in the first place, to show his fellow­craftsmen how the veneration of this great goddess affected their own personal interests (xix. 25), and then, in order to throw over this motive a better guise, appealed to their zeal for religion (vv. 26, 27). But the speaker relied mainly, as Calvin thinks, on the selfishness of his auditors: "Res ipsa clamat tam pro aris ipsos quam pro foce paganarum et solemnium labantur bene calentum" (In Acta Apost. xix. 23). The attempt to identify this Demetrius with the one next named on the supporters of the Apostle he may have become a believer is unwarranted by Scripture or history. II. —

* DEMETRIUS (Δημήτριος) another person of this name, whom the Apostle mentions in 3 John, vol. 12, as the model of Demetrian, by whom the truth itself, so faithfully exemplified by him, bore witness. This is the only notice of him. The relation between him and John is uncertain. He may have been the bearer of the letter to Gains (ver. 1), and one of the missionaries (vv. 5, 6) whom the Apostle exhorts Gains to forward on their journey. There is no contemporary history to illustrate the epistle, and these points are necessarily obscure. —

DEMETRIUS I. (Δημήτριος), surnamed "The Nazorean" (Σατράπης, in recognition of his services to the Babylonians), king of Syria, was the son of Schemus Phileazar, and grandson of Antiochus the Great. While still a boy he was sent by his father as a hostage to Rome (n. c. 175) in exchange for his uncle Antiochus Epiphanes. From his position, he was unable to offer any opposition to the usurpation of the Syrian throne by Antiochus IV.; but on the death of that monarch (n. c. 164) he claimed his liberty and the recognition of his claims by the Roman senate in preference to that of his cousin Antiochus V. His petition was refused from selfish policy (Polyb. xxxii. 12); and by the advice and assistance of Polybius, whose friendship he had gained at Rome (Polyb. xxxii. 19; Just. xxxv. 3), he left Italy secretly, and landed with a small force at Tripolis in Phoenicia (2 Macc. xiv. 1; 1 Macc. vii. 1; Joseph. Ant. xii. 10, 1). The Syrrians soon declared in his favor (n. c. 162), and Antiochus and his protector Lysias were put to death (1 Macc. vii. 2, 3; 2 Macc. xiv. 2). Having thus gained possession of the kingdom, Demetrius succeeded in securing the favor of the Romans (Polyb. xxxii. 4), and he turned his attention to the internal organization of his dominions. The Greco-oriental party were still powerful at Jerusalem, and he supported them by arms. In the first campaign his general Beechides established Abimimus in the high-priesthood (1 Macc. vii. 5-20); but the success of this was short-lived. Abimimus was deposed; he was reigned a second time at the court of Demetrius, and Nicamor, who was commissioned to restore him, was defeated in two successive engagements by Judas Macabaeus (1 Macc. vii. 31, 32; 43-5), and fell on the field. Two other campaigns were undertaken against the Jews by Beechides (n. c. 161; 158); but in the mean time Judas had completed a treaty with the Romans shortly before his death (n. c. 161), who forbad Demetrius to oppress the Jews (1 Macc. viii. 31). Not long afterwards Demetrius further incurred the displeasure of the Romans by the expulsion of Ariarathes from Cappadocia (Polyb. xxxii. 20; Just. xxxv. 1); and he alienated the affection of his own subjects by his private excesses (Just. L. c.; cf. Polyb. xxxiii. 14). When his power was thus shaken (n. c. 152), Alexander Balas was brought forward, with the consent of the Roman senate, as a claimant to the throne, with the powerful support of Ptolemy Philometor, Attalus, and Ariarathes. Demetrius vainly endeavored to secure the services of Jonathan, who had succeeded his brother Judas as leader of the Jews, and now, from the recollection of his wrongs, warmly favored the cause of Alexander (1 Macc. x. 1-6). The rivals met in a decisive engagement (n. c. 150), and Demetrius, after displaying the greatest personal bravery, was defeated and slain (1 Macc. x. 48-50; Joseph. Ant. xiii. 3, § 4; Polyb. iii. 5). In addition to the very interesting fragments of Polybius the following may be consulted: Just. xxxv. 3, xxxv. 1; App. Syc. 46, 47, 67. —

Demetrius (n. c. 144; 1 Mace. xii. 28); but the treachery to which Jonathan fell a victim (n. c. 143) again altered the policy of the Jews. Simon, the successor of Jonathan, obtained very favorable terms from Demetrius (n. c. 142); but shortly afterwards Demetrius was himself taken prisoner (n. c. 138) by Arsaces VI. (Mithridates), whose dominions he had invaded (1 Mace. xiv. 1–3; Just. xxxvi.). Mithridates treated his captive honorably, and gave him his daughter in marriage (App. Syr. 67); and after his death, though Demetrius made several attempts to escape, he still received kind treatment from his successor, Phraates. When Antiochus Skeletes, who had gained possession of the Syrian throne, invaded Parthia, Phrares employed Demetrius to effect a diversion. In this Demetrius succeeded, and when Antiochus fell in battle, he again took possession of the Syrian crown (n. c. 128). Not long afterwards a pretender, supported by Potl. Phlycon, appeared in the field against him, and after suffering a defeat he was assassinated, according to some by his wife (App. Syr. 68), while attempting to escape by sea (Just. xxxix. 1; Jos. Anti. xiii. 9, 3). [CLEOPATRA.]

Tetradrachm (Attic talent) of Demetrius II.

Obv. Head of Demetrius to the right. Rev. βασιλεύς διόμητρος θεού φιλάρεων. [Nikétaios; in exergue Σφό. (169) of Era Seleuc.). Apollo to the left, seated on cortina, with arrow and bow.

DEMON (LXX. δαιμόνιον; N. T. δαιμόνιον, or rarely δαίμων; [daemonium, demon]). Derivation uncertain. Plato (Crit. i. p. 308) connects it with δαίμων, "intelligent," of which indeed the form δαιμόν is found in Archil. (n. c. 650); but it seems more probably derived from δαίω, to "divide" or "assign," in which case it would be similar to Μαίας). In sketching out the Scriptural doctrine as to the nature and existence of the demons, it seems natural, first, to consider the usage of the word δαιμόν in classical Greek: 2dly, to notice any modification of it in Jewish hands; and then, 3dly, to refer to the passages in the N. T. in which it is employed.

I. Its usage in classical Greek is various. In Homer, where the gods are but supernatural men, it is used interchangeably with θεός; afterwards in Hesiod (σ. 121), when the idea of the gods had become more exalted and less familiar, the δαιμόνες are spoken of as intermediate beings, the messengers of the gods to men. This latter usage of the word evidently prevailed afterwards as the correct one, although in poetry, and even in the vague language of philosophy, το δαιμόνιον was sometimes used as equivalent to το θεόν for any supernatural nature. Plato (Nygma. pp. 212, 204) fixes it distinctly in "the more limited sense: παν το δαιμόνιον μεταξι εστι θεον και ψυχον . . . . . . . τεθει ανθρωπις.

a Those who imputed lust and envy of man to their gods were hardly likely to have a distinct view of

supernatural powers of good and evil, as eternally opposed to each other.}
DEMON

DEMONIACS

terror to the judgment to come (Matt. viii. 24). The description is precisely that of a spirit akin to the angelic [see ANGELS] in knowledge and powers, but with the emphatic addition of the idea of positive and active wickedness. Nothing is said either to support or to contradict the common Jewish belief, that in their ranks might be numbered the spirits of the wicked dead. In support of it are sometimes quoted the fact that the demoniacs sometimes haunted the tombs of the dead (Matt. viii. 28), and the supposed reference of the epithet áσάματα to the ceremonial uncleanness of a dead body.

In 1 Cor. x. 20, 21, 1 Tim. iv. 1, and Rev. ix. 20, the word δαιμόνια is used of the objects of Gentile worship, and in the first passage opposed to the word θεός (with a reference to Pent. xxxii. 17). So also is it used by the Athenians in Acts xvii. 18. The same identification of the heathen deities with the evil spirits is found in the description of the damsel having προεμιθαι, or πιθοον, at Philippi, and the coercion of her as a demoniac by St. Paul (Acts xvi. 16); and it is to be noticed that in 1 Cor. x. 20, 21, the Apostle is arguing with those who declared an idol to be a pure nullity, and while he accepts the truth that it is so, yet declares that all which is offered to it is offered to a "demon." There can be no doubt then of its being a doctrine of Scripture, mysterious (though not a power improbable) as it may be, that in idolatry the influence of the demons was at work and permitted by God to be elective within certain bounds. There are not a few passages of profane history on which this doctrine throws light: nor is it inconsistent with the existence of remnants of truth in idolatry, or with the possibility of its being, in the case of the ignorant, overruled by God to good.

Of the nature and origin of the demons, Scripture is all but silent. On one remarkable occasion, recorded by the first three Evangelists (Matt. xii. 24-30; Mark iii. 22-30; Luke xi. 14-26), our Lord distinctly identifies Satan with Beelzebub, τοῦ ἄρχοντος τῶν δαιμώνων; and there is a similar though less distinct connection in Rev. xvi. 14. From these we gather certainly that the demons are agents of Satan in his work of evil, subject to the kingdom of darkness, and destined doomed to share in its condemnation; and we conclude probably (though attempts have been made to deny the inference) that they must be the same as "the angels of the devil" (Matt. xxv. 41; Rev. xii. 7, 9), "the principalities and powers" against whom we "wrestle" (Eph. vi. 12, 13). As to the question of their fall, see SATAN; and on the method of their action on the souls of men, see DEMONIACS.

The Scripture, as their existence and their enmity to man, has suffered the attacks of skepticism, merely on the ground that, in the researches of natural science, there are no traces of the supernatural, and that the fall of spirits, created doubtless in goodness, is to us inconceivable. Both facts are true, but the inference false. The very darkness in which natural science ends, when it approaches the relation of mind to matter, does not contradict, but rather implies the existence of supernatural influence. The mystery of the origin of evil in God's creatures is inconceivable; but the difficulty in the case of the angels differs only in degree from that of the existence of sin in man, of which nevertheless as a fact we are only as much assured. The attempts made to explain the words of our Lord and the Apostles as a mere confusion of ideas, or a relief of the Jews for the sins incompatible with the simple and direct attribution of personality to the demons, as much as to men or to God, and (if carried out in principle) must destroy the truth and honesty of Holy Scripture itself.

A. B.

On the Biblical representations, and on the later superstitions respecting the subject, see, in addition to the works referred to under Angels, Demoniacs, Magic, and Satan, J. F. Dimar, De Demonolagia, etc. (two diss.) Helmst. 1719, 4to, "useful for the history of opinions" (Bretschn.): J. Opomin, Erläuternde Lehre d. Hebräer u. Christen von guten u. bösen Engelh., Hanib. 1736; J. G. Mayer, Hist. d. Dämoni. u. Demonen, i. Comm. d. Dämonl. märchenartig. in d. Welt, ersch., etc. 1802, etc., "particularly valuable" (Bretschn.).

On the fault of the A. V. in rendering δαιμός, δαιμονία, and δαιμονίων indiscriminately by the same word, see Campbell's Four Gospels,Pref. Dis. vi. pt. 1.

The first elaborate treatise by a Christian writer on this subject appears to be that of Michael Pselus (9th cent.?). Περὶ ἐνέργειας δαιμόνων, De Operatione Demonum, reprinted from Gauvin's edition (1615) in Migne's Patrolog. Graec. vol. xxxiii., which also contains the so-called Testament of Abraham, 1668. One who has the curiosity to look into the speculations of the scholastic divines on angels and demons will find enough to satisfy him in Bonaventura's Expos. in Lib. ii. Sententiarum (Opp. tom. iv. Lugd. 1668), and in the Summa Thesologiae of Thomas Aquinas. For the Rabbincal notions, besides the works of Eisenmenger and others referred to under Angels, see L. A. Cohen, Der hebräische göttliche heit (1845), and: Schief, Schützweg, u. Gleichn. des jahw.-rabh. Jud. authent., Halle, 1851, p. 583 ff.

Δ. DEMONIACS (δαιμονιακόν, δαίμων ἀγγέλων). This word is frequently used in the N. T., and applied to persons suffering under the possession of a demon or evil spirit [see DEMON], such
possession generally showing itself visibly in bodily disease or mental derangement. The word ὕπαττος in classical Greek (as in Ἰσχάος, 566; Sept. c. Theb. 1001, Εὐρ. Πλατ. 888, &c.), except that, as the idea of spirits distinctly evil and rebellious hardly existed, such possession was referred to the will of the gods or to the vague prevalence of an "Aρτο.
Neither word is employed in this sense by the LXX., but in our Lord's time (as is seen, for example, constantly in Josephus) the belief in the possession of men by demons, who were either the souls of wicked men after death, or evil angels, was thoroughly established among all the Jews, with the exception of the Sadducees alone. With regard to the frequent mention of demons in Scripture, three main opinions have been started.

I. That of Strauss and the mystical school, which makes the whole account merely symbolic, without basis of fact. The possession of the devil is, according to this idea, only a lively symbol of the prevalence of evil in the world, the casting out the devil by our Lord a corresponding symbol of his conquest over that evil power by his doctrine and his life. The notion stands or falls with the mythical theory as a whole: with regard to the special form of it, it is sufficient to remark the plain, simple, and prosaic relation of the facts as facts, which, whatever might be conceived as possible in highly poetical and awesomely figurative passages, would make their position here not a symbol or a figure, but a lie. It would be as reasonable to expect a myth or symbolic fable from Tacitus or Thucydides in their accounts of contemporary history.

II. The second theory is, that our Lord and the Evangelists, in referring to demonic possession, spoke only in accommodation to the general belief of the Jews, without any assertion as to its truth or its falsity. It is concluded that, since the symptoms of the affliction were frequently those of bodily disease (as dizziness, Matt. ix. 32; blindness, Matt. xii. 22; ἐπίστησις, Mark ix. 17–27), or those seen in cases of ordinary insanity (as in Matt. viii. 28; Mark v. 1–5), since also the phrase "to have a devil" is constantly used in connection with, and as apparently equivalent to, "to be mad" (see John vii. 20, viii. 48, x. 20, and perhaps Matt. xi. 18; Luke vii. 53); and since, Lastly, cases of demoniacal possession are not known to occur in our own days, therefore we must suppose that our Lord spoke, and the Evangelists wrote, in accordance with the belief of the time, and with a view to be clearly understood, especially by the sufferers themselves, but that the demoniacs were merely persons suffering under unusual diseases of body and mind.

With regard to this theory also, it must be remarked that it does not accord either with the general principles or with the particular language of Scripture. Accommodation is possible when, in things indifferent, language is used which, although, scientifically or etymologically inaccurate, yet conveys a true impression, or when, in things not indifferent, a declaration of truth (1 Cor. iii. 1, 2), or a moral law (Matt. xix. 8), is given, true or right as far as it goes, but imperfect, because of the imperfect progress of its recipients. But certainly here we have a language quite different. Possession was one of little faith and great superstition; its characteristic the acknowledgment of God as a distant Lawgiver, not an Inspiter of men's hearts. This superstition in things of far less moment was denounced by our Lord; can it be supposed that He would sanction, and the Evangelists be permitted to record forever, an idea in itself false, which has constantly been the very stronghold of superstition? Nor was the language used such as can be paralleled with mere conventional expression. There is no harm in our "speaking of certain forms of madness as lunacy, not thereby implying that we believe the moon to have or to have had any influence upon them; . . . but if we began to describe the cure of such as the moon's ceasing to afflict them, or if a physician were solemnly to address the moon, bidding it abstain from injuring his patient, there would be here a passing over to a quite a different region, . . . there would be that gulf between our thoughts and words in which the essence of a lie consists. Now Christ does everywhere speak such language as this." (Trench, On the Miracles, p. 153, where the whole question is most ably treated.) Nor is there, in the whole of the New Testament, the least indication that any "economy" of teaching was employed on account of the "hardness" of the Jews' hearts. Possession and its cure are recorded plainly and simply; demoniacs are frequently distinguished from those afflicted with bodily sickness (see Mark i. 32, xvi. 17, 18; Luke vi. 17, 18), even, it would seem, from the epileptic (σεισμικόν, Matt. iv. 21); the same outward signs are sometimes referred to possession, sometimes merely to disease (comp. Matt. iv. 24, with xvii. 15; Matt. xii. 22, with Mark vii. 32, &c.); the demons are represented as speaking in their own persons with superhuman knowledge, and acknowledging our Lord to be, not as the Jews generally called him, son of David, but Son of God (Matt. viii. 29; Mark i. 24, v. 7; Luke iv. 41, &c.). All these things speak of a personal power of evil, and, if in any case they refer to what we might call mere disease, they at any rate tell us of something in it more than a morbid state of bodily organs or self-caused derangement of mind. Nor does our Lord speak of demons as personal spirits of evil to the multitude alone, but in his secret conversations with his disciples, declaring the means and conditions by which power over them could be exercised (Matt. xvi. 21). Twice also He distinctly connects demoniacal possession with the power of the Evil One; once in Luke x. 18, to the seventy disciples, where He speaks of his power and theirs over demons as a "fall of Satan," and again in Matt. xii. 25–30, when He was accused of casting out demons through Beelzebub, and, instead of giving any hint that the possessed were not really under any direct and personal power of evil, He uses an argument, as to the division of Satan against himself, which, if possession be unreal, becomes inconclusive and almost insincere. Lastly, the single fact recorded of the entrance of the demons at Gadara (Mark v. 10 14) into the herd of swine, and the effect which that entrance caused, is sufficient to overthrow the notion

a Compare also the case of the daimon with the spirit of divination (πνεύμα καλύματος) at Philippi; where also the power of the evil spirit is referred to under the well known name of the supposed inspiration of Delphi.

b It is almost needless to refer to the subterfuges of interpretation by which the force of this fact is evaded.
DEMONIACS

that our Lord and the Evangelists do not assert or imply any objective reality of possession. In the face of this mass of evidence it seems difficult to conceive how the theory can be reconciled with anything like truth of Scripture.

But besides this it must be added, that to say of a case that it is one of disease or insanity, gives no real explanation of it at all; it merely refers to a class of cases which we know to exist, but gives no answer to the further question, how did the disease or insanity arise? Even in disease, whenever the mind acts upon the body (as e. g. in nervous disorders, epilepsy, Ac.) the mere derangement of the physical organs is not the whole cause of the evil; there is a deeper one lying in the mind. Insanity may indeed arise, in some cases, from the physical injury or derangement of those bodily organs through which the mind exercises its powers, but far oftener it appears to be due to metaphysical causes, acting upon and disordering the mind itself. In all cases where the evil lies not in the body but in the mind, to call it "only disease or insanity" is merely to state the fact of the disorder, and give up all explanation of its cause. It is an assumption, therefore, which requires proof, that, amidst the many inexplicable phenomena of mental and physical disease in our own days, there are none in which one gisted with discernment of spiritual manifestations and see signs of what the scripture calls "possession."

The truth is, that here, as in many other instances, the Bible, without contradicting ordinary experience, yet advances to a region whither human science cannot follow. As generally it connects the existence of mental and bodily suffering in the world with the introduction of moral corruption by the Fall, and refers the power of moral evil to a spiritual and personal source; so also it asserts the existence of interior spirits of evil, and it refers certain cases of bodily and mental disease to the influence which they are permitted to exercise directly over the soul and indirectly over the body. Inexplicable to us this influence certainly is, as all action of spirit on spirit is bound to be; but no one can pronounce a priori whether it be impossible or improbable, and no one has a right to exercise the strong expressions of Scripture in order to reduce its declarations to a level with our own ignorance.

III. We are led, therefore, to the ordinary and literal interpretation of these passages, that there are evil spirits (Demons), subjects of the Evil one, who, in the days of the Lord himself and his Apostles especially, were permitted by God to exercise a direct influence over the souls and bodies of certain men. This influence is clearly distinguished from the ordinary power of corruption and temptation yielded by Satan through the permission of God. (Satan.) Its relation to it, indeed, appears to be exactly that of a miracle to God's ordinary Providence, or of special prophetic inspiration to the ordinary gifts of the Holy Spirit. Both (that is) are actuated by the same general principles, and tend to the same general object; but are actuated by different principles, and to a different quantity of that which is worked out in the latter by a long course of indirect action. The distinguishing feature of possession is the complete or incomplete loss of the sufferer's reason or power of will; its actions, his words, and almost his thoughts are mastered by the evil spirit (Mark i. 24, v. 7; Acts xix. 15), till his personality seems to be destroyed, or, if not destroyed, so overborne as to produce the consciousness of a twofold will within him, like that sometimes felt in a dream. In the ordinary temptations and assaults of Satan, the will itself yields consciously, and by yielding gradually assumes, without losing its apparent freedom of action, the characteristics of the Satanic nature. It is solicited, urged, and persuaded against the strivings of grace, but not overborne.

Still, however, possession is only the special and, as it were, miraculous form of the "law of sin in the members," the power of Satan over the heart itself, recognized by St. Paul as an indwelling and agonizing power (Rom. vii. 21-24). Nor can it be doubted that it was rendered possible in the first instance by the consent of the sufferer to temptation and to sin. That it would be most probable in those who yielded to sensual temptations may easily be conjectured from general observation of the tyranny of a habit of sensual indulgence. The cases of the habitually lustful, the opium-eater, and the drunkard (especially when struggling in the last extremity of delirium tremens) have been often noticed, many marks very similar to those of the Scriptural possession. There is in them physical disease, but there is often something more. It is also to be noticed that the state of possession, although so awful in its wretched sense of demonical tyranny, yet, from the very fact of that consciousness, might be less hopeless and more capable of instant cure than the deliberate hardness of willful sin. The spirit might still retain marks of its original purity, although through the flesh and the demonic power acting by the flesh it was enslaved. Here also the observation of the suddenness and completeness of conversion, seen in cases of sensuality, compared with the greater difficulty in cases of more refined and spiritual sin, tends to confirm the record of Scripture.

It was not natural that the power of evil should show itself in mere opiate and direct hostility than ever, in the age of our Lord and his Apostles, when its time was short. It was natural also that it should take the special form of possession in an age of such unprecedented and brutal sensuality as that which preceded His coming, and continued till the bane of Christianity was felt. Nor was it less natural that it should have died away gradually before the great direct, and still greater indirect, influence of Christ's kingdom. Accordingly we find early fathers (as St. Irenaeus, and St. Cyril, C. M. § 11. 8) and other writers (as Tertullian, Apol. viii. 37, 43) alluding to its existence as a common thing, mentioning the attempts of Jewish exorcism in the name of Jehova as occasionally successful (see Matt. xii. 27; Acts xix. 13), but especially dwelling on the power of Christian exorcism to cast it out from the country as a test of the truth of the gospel, and as one well-known by which it already centered on the disciples. By degrees the mention is less and less frequent, till the very idea is lost or perverted. Such is a brief sketch of the Scriptural notices of possession. That round the Jewish notion of it John, writing mainly of the ministry in Judaea, mentions none.
there grew up, in that noble age of superstition, many foolish and evil practices, and much superstition as to fumigations, &c. (comp. Tob. vili. 1-3; Joseph. Ant. xii. 335, and especially the "exorcisms" (see Acts xix. 13) is obvious and would be inevitable. It is clear that Scripture does not in the least sanction or even condescend to notice such things; but it is certain that in the Old Testament (see Lev. xix. 31; 1 Sam. xxviii. 7, &c.; 2 K. xii. 6, xxiii. 24, &c.) as well as in the New, it recognizes possession as a real and direct power of evil spirits upon the heart.”

“* It would seem impossible to deny the fact of demoniac possession, properly so called, without disparaging the inspiration of the Gospels and the integrity or intelligence of our Lord. That the sacred writers shared in the belief of their time is sufficiently shown above, and is as positively asserted by Strauss (Loben Jesu, § 91), and Meyer (Komm. Matt. iv. 24), as by Ellicott (Life of Christ, p. 179, Amer. ed.). Jesus enters fully and on all occasions into the same view. He discerns in the words of demoniacs and demoniacs (Matt. x. 8), addresses the demons (Matt. vii. 31; Luke iv. 35), commands them to be silent, to come out, and, in one instance (Mark ix. 25), no more to enter into the person; he argues with the Jews on that assumption (Matt. xii. 25); he gives his disciples power to cast out evil spirits (Luke ix. 1; Matt. x. 1, 8), and enters into their rejoicing over their success (Luke x. 18); and in his private conversation tells them of the conditions of that success (Matt. xvii. 21). It was as much his exorcistic as his exoteric doctrine. A few additional suggestions may be in place. (1) Whatever resemblances may be found in some particulars, yet in other respects the cases of demoniac possession mentioned in the N. T. stand clearly and entirely apart from all phenomena of the present day; e.g. in the supernatural knowledge exhibited by the demoniacs, and in such facts as occurred in connection with the herd of swine. (2) We may discern a special reason for the abundant outbreak of this manifestation at that time, in its symbolic relation to Christ’s work. He came to “destroy the works of the devil” (1 John iii. 8), and to recover the world from its bondage to Satan unto its allegiance to God. Hence, just as he expressed his sin-healing power by his miracles of bodily cure, and as his personal triumph over Satan was set forth by the temptations in the wilderness, so he symbolized his great spiritual victory over the prince of the power of the air, and the release of his captives, by casting out evil spirits from their outward and visible possession and control of human beings around him. He more than once hints at this significance; e.g. Matt. xii. 28, and especially Luke x. 17, 18. For this purpose in the divine economy, perhaps, were demoniac possessions permitted to such a remarkable extent at that time. (3) Possession with devils, though always carefully distinguished from every kind of disease, was very commonly accompanied by phenomena of disease, especially such as belong to a nervous system shattered by sin. (4) This gives some support to the opinion expressed above, important in its bearing on the government of God, that demoniac possession was the result of moral delinquency; that the victim had at first, by a course of vicious indulgence, become so perverted as to the service of Satan, till he was at length given over to the complete domination of the master he had chosen for (5) the evil spirits appear to have taken entire control of the body and mind of the victim, so that while there was a remarkable play of double consciousness and personality, a sense of misery and some desire for deliverance, the subject apparently was hopeless, except as deliverance was brought by Christ.”

For the older literature of the subject, see Winer’s Realer art. Besessen. For a fuller illustration of the general views presented above, see Trench, On the Miracles, pp. 123-150; Olshausen’s Commentary on Matt. vii. 28; Alfred’s Greek Text, ed. &c.; Owen on the Demonology of the N. T., in the Bibl. Sacra, Jan. 1859; Stuart’s Sketches of Angiography, in Robinson’s Bibl. Sacra, 1843. For the theory that the possession was disease wrought by Satan, but only through the series of natural causes and laws, see Tweltes’s Doctrine respecting Angels, in the Bibl. Sacra, Feb. 1845. Some of the theological principles of the subject are well discussed by President Jesse Appleton, D. D. (three Lectures, in his Works, ii. 94-127, An- dover, 1836). S. C. B.

On so interesting a subject as the present, it may be well to give a brief sketch of the history of opinions, and a fuller view of the literature. The learned and pious Dr. Joseph Mede, in a discourse on John x. 20, first published in his Distribut, Lond. 1642 (Works, ed. 1672, pp. 28-30), maintained that the demoniacs of the Gospels were mad men or epileptics; but though often referred to as a disbeliever in demoniac possession, he expressly admits that their maladies may have been caused by evil spirits. In 1676 a volume entitled The Doctrine of Devils proved to be the Grand Apo- sency of these Latter Times, etc., was published anonymously in London by a clergyman of the Church of England, who maintained that the demoniacs were insane or diseased persons.

The same view was presented in Holland by Dej. Daillon, a French refugee minister of learning and ability, in his Examen de l’appréhension des Ré- forms en France, Amst. 1687. 2d ed. 1691 (see Haag’s La France protestante, iv. 188), and by Dr. Baltsasser Dekker, in his famous work, De be- sorvande secreten, or The World Bewitched, pub- lished at Amsterdam in 1691 (see bk. ii. ch. xxvii.-xxx.). This book, widely circulated, and speedily translated into French, German, English, and Italian, though it called forth a host of writ- ings in opposition, did much to shake the prevalent belief in witchcraft and kindred superstitions.

Daillon’s opinion was also supported by his brother Jacques, in a work entitled Σφαναγλογια, or a Treatise of Spirits, Lond. 1723.

In 1737 Dr. A. A. Sykes published anonymously An Enquiry into the Meaning of the Demonstrations in the New Testament, which, opposing the common view, gave rise to a considerable controversy, in which Twells, Whiston, Thos. Church, Gregory Sharp, Thos. Hutchinson, Samuel Pever, and others, took part. Dr. Richard Mead, in his Med- ico Sacra, Lond. 1749, likewise regarded the demoniacs as afflicted with natural diseases: and this view appears to have been prevalent among physi- cians, ancient and modern (see Wetstein on Matt. iv. 24). In 1758 Lardner published his four discourses On the Use of the Demoniacs mentioned in the N. T., ably controversy the doctrine of possession. See his Works, 4th ed. 1821; comp. x. 263-275, Remarks on Dr. Warr’s Dissertations.) In Germany, Semler appears to
have been the first who vigorously assailed the popular opinion, in his Commentatio de Demoniacis ymson in N. T. fit unio, Hal. 1700, 4th ed. greatly enlarged, 1779. This essay gave a stimulus to the discussion of the subject, and a number of dissertations were published on both sides of the question. Another controversy was excited in England by the appearance of the Rev. Hugh Farmer's Essay on the Demoniacs of the N. T., London, 1775, a learned and elaborate treatise, which was replied to by W. Worthington, An Impartial Enquiry, etc. 1777. Farmer rejoined in Letters, etc. 1778, followed by Worthington's Further Inquiry, 1779, and by John Field's Demoniacs: an Inquiry into the Heathen and Scripture Doctrine of Demons, 1779. Farmer's two volumes were translated into German, and his view found very general acceptance in that country, while in England it has been adopted by such men as Paley, N. H. Wheatstone, and others. In France, Sammelide and art, tum, N. T., 1775, followed by Wheatstone's English Edition, 1782, and by John Malebranche's Lectures on the Demoniacs, 1776. The controversy was carried on in America by John Eliot, in the missionary work in India, and by many religious dissidents, who referred to the controversy as a rationalistic tendency. The belief that the demoniacs of the N. T. were really possessed by evil spirits is, however, still held by the great majority of Christians, and many recent writers dispose of the phenomena of modern "Spiritualism" or "Spiritism" by reference to the same source.

Besides the authors already mentioned, particularly Lardner, Farmer, and Winer, the following might be consulted, in opposition to the doctrine of real possession: Wetzstein, note on Matt. iv. 24, in his Nov. Test. i. 279-281, trans. in the Christian Church, new series, v. 31-42; T. G. Timmermann,Dict. antiquo-novi-testamenti de Demoniacis Evangeliorum, Rinteln, 1786; H. J. F. Winer, Der Demoniacus in N. T. Leben, (as cited above, art. Demon); Hackett's exposition in his Comm. on Matt. iv. 24, reprinted in Scripturum, vol. iii., which also contains the essays of Townsend and Carlisle on the other side; the Rev. E. S. Talmage, On the Demoniacs of the N. T., in the Scriptural Interpreter (Boston, 1832), ii. 255-302; and the notes of Meyer, Norton, and Bleek (Synopt. Ev., 2d. d. drei evang. Evang. i. 217 ff.) on Matt. iii. 21. See also Schneller, A. J. S., in Med. & Phil. Aufs, p. 237 ff. (pp. 151-154, Amer. transl.), who holds a sort of intermediate view. See further the valuable articles, Theory and Phenomenon of Possession among the Hindoos, and Paganic and Demoniacal Possessions in India and Africa, in the Dublin Univ. Mag. for March, Sept. and Oct. 1848, the two last reprinted in Littledale's Life of Jesus, xix. 363 ff. 410 ff.; compare also, for modern analogues of the demoniacs, Robert's Oriental Illustrations of Scripture on Matt. xii. 27, and Thomson's "Land and Book," i. 212, 213.

A. DEMOPHON (Δημόφων), a Syrian general in Palestine under Antiochus V. Epipator (2 Mace. xii. 2).

DENARIUS (δαναρίον; denarius; A. V. "penny," Matt. xviii. 28, xx. 2, 9, 14, xxii. 19; Mark vi. 37, xii. 15, xiv. 5; Luke vii. 41, x. 35, xx. 21; John vi. 7, xii. 5; Rev. vi. 6), a Roman silver coin, in the time of our Saviour and the Apostles. It took its name from its being first equal to ten "asses," a number afterwards increased to sixteen. The earliest specimens are of about the commencement of the 2d century n. c. From this time it was the principal silver coin of the commonwealth. It continued to hold the same position under the Empire until long after the close of the New Testament Canon. In the time of Augustus eighty-four denarii were struck from the pound of silver, which would make the standard weight about 60 grs. This Nero reduced by striking ninety-six from the pound, which would give a standard weight of about 52 grs., results confirmed by the coins of the periods, which are, however, not exactly true to the standard. The drachm of the Attic talent, which from the reign of Alexander until the Roman domination was the most important Greek standard, had, by gradual reduction, become equal to the denarius of Augustus, so that the two coins came to be regarded as identical.

Debaris of Tiberias.

Obv. TI CAESAR DIVI AVG F AVGVSIVS. Head of Tiberius, laureate, to the right, (Matt. xxiii. 19, 20, 21). Rev. PONTIF MAXIM. Seated female figure to the right.

Under the same emperor the Roman coin superseded the greek, and many of the few cities which yet struck silver money took it the form and general character of the denarius, and of its half, the sesterce. In the N. T. period, we learn from numismatic evidence that denarii must have mainly formed the silver currency. It is therefore probable that in the N. T. by δανάριον and δαναρίων, both rendered in the A. V. "piece of silver," we are to understand the denarius [δραχμή, σεκυλία, piece of]. The δαναρίων of the tribute (Matt. xx. 27) was probably in the time of our Saviour not a current coin, like the σαράντα mentioned in the same passage (ver. 27).

[Money.] From the parable of the laborers in the vineyard it would seem that a denarius was then the ordinary day for a day's labor (Matt. xx. 2, 4, 7, 9, 10, 13). The term denarius means (Plin. xxiv. 17, xxvii. 3) is probably a corrupt designation for the aureus (nummus); in the N. T. the denarius proper is always intended. (See Money, and Dict. of Ant. art. Denarius.)

K. S. P.

* DENS. [CAYES.]

DEPOSIT (διαφαγμός: παραδείγμα, παράπλευρον; deponent, the arrangement by which one man kept at another's request the property of the
DEPUTY. The uniform rendering in the A. V. of ἀποστάς, "proconsul," (Acts xii. 8, 12, xxiii. 38). The English word is curious in itself, and is, to certain extent appropriate, having been applied formerly to the Lord Lieutenant of Ireland. Thus Shakespeare, [i.e. viii. iii. 2:  

"Pлагue of your policy,  
You sent me deputy for Ireland."  
W. A. W.

* Such is probably the meaning of the words in τω καλώτατον των. It may also be remarked that in the parable of the talents, the "shifting servant," affects to consider himself as a more δεσποτάριος, in the words θέθηκα τον οίκον (Matt. xxv. 21).

DERBE (Δερβή, Acts xiv. 2), 21, xvi. 1; Eth Ἀρρασίως, Acts xx. 4). The exact position of this town has not yet been ascertained, but its general situation is undoubted. It was in the eastern part of the great upland plain of Lycaonia, which stretches from Iconium eastward along the north side of the chain of Taurus. It must have been somewhere near the place where the pass called the Cilician Gates opened a way from the low plain of Cilicia to the table-land of the interior; and probably it was a stage upon the great road which passed this way. It appears that Cicero went through Derbe on his route from Cilicia to Iconium (Cic. ad Fam. xiii. 73). Such was St. Paul's route on his second missionary journey (Acts xv. 41, xvi. 1, 2), and probably also on the third (xviii. 23, xix. 1). In his first journey (xvii. 20, 21) he approached from the other side, namely, from Iconium, in consequence of persecution in that place and at Lystra. No incidents are recorded as having happened at Derbe [see infra]. In harmony with this, it is not mentioned in the enumeration of places 2 Tim. iii. 11. In the apostolic history, Lystra and Derbe are commonly mentioned together; in the quotation from the epistle, Lystra is mentioned and not Derbe. The distinction is not accurate; for St. Paul is here enumerating his persecutions (Paley, Horae Paulinae, loc.).

Three sites have been assigned to Derbe. (1.) By Col. Leake (Asia Minor, p. 101) it was supposed to be at Bin-bir-Kiliisheh, at the foot of the Karadagh, a remarkable volcanic mountain which rises from the Lycaonian plain; but this is almost certainly the site of Lystra. (2.) In Kiepert's Map, Derbe is marked further to the east, at a spot where there are ruins, and which is in the line of a Roman road. (3.) Hamilton (Researches in Asia Minor, ii. 313) and Tavix (Asie Mineure, i. 123, 130) are disposed to place it at Diele, a little to the S. W. of the last position and nearer to the roots of Taurus. In favor of this view there is the important fact that Steph. Byz. says that the place was sometimes called Δερβαία, which in the Lycaonian language (see Acts xiv. 11) meant a "ju- niper tree." Moreover, he speaks of a Δερβαία here, which (as Leake and the French translators of Strabo suggest) ought probably to be Δερβίαν and if this is correct, the requisite condition is satisfied by the proximity of the Lake Ak Göl, Wieseler (Chronol. der Apost. Zeitfolter, p. 24) takes the same view, though he makes too much of the possibility that St. Paul, on his second journey, trav- elled by a minor pass to the W. of the Cilician Gates. It is difficult to say why Winer (Revel. s. v.) states that Derbe was "S. of Iconium, and S. E. of Lystra." Strabo places Derbe at the edge of Ionia; but in the Synecdecom of Hierocles (Wesseling, p. 575, where the word is Δερβαία it is placed, as in the Acts of the Apostles, in Lycaonia. The boundaries of these districts were not very exactly defined. The whole neighborhood, to the sea-coast of Cilicia, was notorious for robbery and piracy. Antipater, the friend of Cicero (ad Fam. xiii. 73) was the benefic chietain of Lycaonia. Ammianus, king of Galatia (successor of Deiotarus H.), murdered

* The Hebrew expression לְהַכְּנָה, Ex. xxii. 8 rendered in the A. V. "to see whether," is a common formula jurandi
Antipater and incorporated his dominions with his own. Under the Roman provincial government, Derbe was at first placed in a corner of Cappadocia; but other changes were subsequently made. [Galahad.] Derbe does not seem to be mentioned in the Byzantine writers. Leake says (i02) that its bishop was a suffragan of the metropolitan of Ionninum.

II. *No incident* of an adverse character took place at Derbe. But Paul and Barnabas preach there and gained many disciples (μαθηταὶ ἤτοι, Acts xiv. 21). On his second missionary tour Paul visited Derbe again (Acts xvi. 1), where no doubt was one of the churches to which he delivered the «decrees» relating to the treatment of converts from heathenism (Acts xvi. 4). The Gausses, who accompanied Paul on his journey from Greece as far as Asia, belonged to Derbe (Acts xx. 4). Some make this place also the home of Timothy (Kuincl, Olshausen, Naude) but the sound indication from Ἐλας in Acts xvi. 1 is that he belonged to Lystra. At the same time we learn from Acts xvi. 3 (see also ver. 2) that his family, and no doubt Timothy himself, were well known in many of the towns in that region, among which Derbe would naturally be included.

II. *Desert* means in Judges i. 23 (A. V.) to observe a military sense, to reconnoitre: "And the house of Joseph sent to spy out Bethel." The word occurs only in that passage in our Bible and is now obsolete in that signification. Eastwood and Wright (Bible Word-Book, p. 555) point out examples of the same usage in Shakespeare (Rich. III. v. 8, and Lear. iv. 5).

Desert, a word which is sparingly employed in the A. V. to translate four Hebrew terms, of which there are essentially different in signification. A "desert," in the sense which is ordinarily attached to the word, is a vast, burning, sandy plain, alike desolate of trees and of water. This idea is probably derived from the deserts of Africa - that, for example, which is overleaved by the Pyramids, and with which many travellers are familiar. But it should be distinctly understood that no such region as this is ever mentioned in the Bible as having any connection with the history of the Israelites, either their wanderings or their settled existence. With regard to the sand, the author of "Sinai and Palestine" has given the fullest correction to this popular error, and has shown that "sand is the exception and not the rule of the Arabian desert" of the Peninsula of Sinai (S. & P., pp. 59, 64) And as to the other features of a desert, certainly the Peninsula of Sinai is no plain, but a region extremely varied in height, and diversified, even at this day, by oases and valleys of verdure and vegetation, and by frequent wells, which were all probably far more abundant in these earlier times than they now are. This however will be more appropriately discussed under the head of WANDERINGS OF THE WANDERINGS. Here, it is simply necessary to show that the word rendered in the A. V. by "desert," when used in the historical books, denoted definite localities; and that these localities do not answer to the common conception of a "desert."

I. Arabah (אַרְעָה). The roof of this word,

According to Genesis (Thes. p. 1066), is Arab, .cb7, "to be dried up as with heat; and it has been already shown that when used, as it invariably is, in the historical and topographical records of the Old Testament, the meaning is that of a depressed and inclosed region - the deepest and the hottest clime in the world - the sunken valley north and south of the Dead Sea, but more particularly the former. [Arabah.] True, in the present despoilised and neglected state of Palestine the Jordan valley is as arid and desolate a region as can be met with, but it was not always so. On the contrary, we have direct testimony to the fact that when the Israelites were flourishing, and later in the Roman times, the case was emphatically the reverse. Jericho, "the city of Palm trees," at the lower end of the valley, Bethshemish at the upper, and Psadris in the centre, were famed both in Jewish and profane history for the luxuriance of their vegetation (Joseph. Ant. xviii. 2, § 2; xvi. 5, § 2; Bithshemish; Jericho)." When the abundant water-resources of the valley were properly harnessed and distributed, the tropical heat caused not barrenness, but tropical fertility, and here grew the balsam, the sugar-cane, and other plants requiring great heat, but also rich soil, for their culture. Arabah in the sense of the Jordan valley is translated by the word "desert" only in Ez. xlvii. 8. In a more general sense of waste, deserted country - a meaning easily suggested by the idea of excessive heat contained in the root - a "Desert," as the rendering of Arabah occurs in the prophets and poetical books: as Isa. xxxv. 1, 6; xl. 3, xli. 19, li. 3; Jer. ii. 6, v. 6, viii. 2; xii.; but this general sense is never found in the historical books. In these, to repeat once more, Arabah always denotes the Jordan valley, the Ghor of the modern Arabs. Professor Stanley proposes to use "desert" as the translation of Arabah whenever it occurs, and though not exactly suitable, it is difficult to suggest a better word.

2. But if Arabah gives but little support to the ordinary conception of a "desert," still less does the other word which our translators have most frequently rendered by it. Midbar (מִדָּבֶּר) is accurately the "pasture ground," deriving its name from a root debir (גָּרֵד), "to drive," significant of the pastoral custom of driving the flocks out to feed in the morning, and home again at night; and therein analogous to the German word treiben, which is similarly derived from treiben, to drive. With regard to the Wilderness of the Wanderings - for which Midbar is almost invariably used - this signification is most appropriate; for we must never forget that the Israelites had flocks and herds with them during the whole of their passage to the Promised Land. They had them when they left Egypt (Ex. x. 26, xii. 38), they had them at Hazeroth, the middle point of the wanderings (Num. xi. 22), and some of the tribes possessed them in large numbers immediately before the transit of the Jordan (Num. xxxii. 1). Midbar is not often rendered by a "desert" in the A. V. Its usual and certainly more appropriate translation is "wilderness," a word in which the idea of vegetation is present. In speaking of the Wilderness of the Wanderings the word "desert" occurs as the rendering of Midbar, in Ex. iii. 1, v. 3, xii. 2 (Num. xxxiii. 13, 16); and in more than one of
these it is evidently employed for the sake of euphony merely. Míldor is most frequently used for those tracts of waste land which lie beyond the cultivated ground in the immediate neighborhood of the towns and villages of Palestine, and which are a very familiar feature to the traveller in that country. In these tracts are intermingled with a rich green verdure of turf, and small shrubs and herbs of various kinds. But at the end of summer the herbage withers, the turf dries up and is powdered thick with the dust of the chalky soil, and the whole has certainly a dreary aspect. An example of this is furnished by the hills through which the path from Bethany to Jericho pursues its winding descent. In the spring so abundant is the pasturage of these hills, that they are the resort of the flocks from Jerusalem on the one hand and Jericho on the other, and even from the Arabs on the other side of the Jordan. And even in the month of September — when the writer made this journey — though the turf was only visible on close inspection, more than one large flock of goats and sheep was browsing, scattered over the slopes, or stretched out in a long even line like a regiment of soldiers. A striking example of the same thing, and of the manner in which this waste pasture land gradually melts into the cultivated fields, is seen in making one's way up through the mountains of Benjamin, due west, from Jericho to McKenzie or Jeba. These Míldors seem to have borne the name of the town to which they were most contiguous; for example, Beth-aven (in the region last referred to); Zippí, Maon, and Paran, in the south of Judah; Gilson, Jerul, &c. &c.

In the poetical books "desert" is found as the translation of Míldor in Deut. xxxii. 10; Josh. xxiv. 5; Is. xxi. 1; Jer. xxv. 24.

3. Chârâbá [rather Chorabá] (ךְָרָבָת). This word is perhaps related to Arabah, with the substitution of one gutturl for another; at any rate it appears to have the same force, of dryness, and thence of desolation. It does not occur in any historical passages. It is rendered "desert" in Ps. cxxii. 6; Is. lvii. 21; Ez. xiii. 4. The term commonly employed for it in the A. V. is "waste places" or "desolation."

4. Jeshimon (ךְָשָּׁמִון) [desert, waste]. This word in the historical books is used with the definite article, apparently to denote the waste tracts on both sides of the Dead Sea. In all these cases it is treated as a proper name in the A. V. [Jeshimon; Beth-Jeshimoto.] Without the article it occurs in a few passages of poetry; in the following of which it is rendered "desert": Ps. lxxxv. 49; iv. 14; Is. xiii. 19, 20.

5. DESIRE in 2 Chr. xx. 20 is used in the A. V. in the sense of the Latin desiderium, "to feel the loss of," or "to regret." Jesharaim reigned in Jerusalem eight years, and departed without being desired.

A. DES'SAU (ךְָסַע) [Desau], a village (not "town") kâmu, castellum, at which Nicander's army was once encamped during his campaign with Judas (2 Macc. xiv. 16). There 'a no mention of it in the account of these transac-

a This practice is not peculiar to Palestine. Mr. Thackray observed it in Algeria; and gives the reason of it, namely, a more systematic, and therefore con-

DEUTERONOMY 591

DEUEL [2 syll.] (דְּעֶל) [calling on God, Gen.; El is knowing, Firth]; [Rom.] Vat. and Alex. תְּעֹאלֶל; Duelf, father of Elasaph, the "captain" (נָשָּׁה) of the tribe of Gad at the time of the numbering of the people at Sinai (Num. i. 14, vii. 42, xxx. 20). The same man is mentioned again in ii. 14, but here the name appears as Renel, owing to an interchange of the two very similar Hebrew letters 7 and 7. In this latter passage the Samaritan, Arabic and Vulg. retain the D; the LXX., as in the other places, has R. [REUEL.] Which of the two was really his name we have no means of deciding.

DEUTERONOMY (דֵּעֶּרֶן) or דָּעֶּרֶן, so called from the first words of the book; דֵּעֶּרֶנָּם, as being a repetition of the Law; דֵּעֶּרֶנְיָם: called also by the later Jews דָּעֶּרֶנְיָנִים and דָּעֶּרֶנְיָנָּם.

A. Contents. The Book consists chiefly of three discourses delivered by Moses shortly before his death. They were spoken to all Israel in the plains of Moab on the eastern side of the Jordan (i. 1), in the eleventh month of the last year of their wanderings, the fortieth year after their exodus from Egypt (i. 3).

Subjoined to these discourses are the Song of Moses, the Blessing of Moses, and the story of his death.

I. The first discourse (i. 1-iv. 40). After a brief historical introduction, the speaker recapitulates the chief events of the last 40 years in the wilderness, and especially those events which had the most immediate bearing on the entry of the people into the promised land. He enumerates the contests in which they had been engaged with the various tribes who came in their way, and in which their success had always depended upon their obedience: and reminds them of the exclusion from the promised land, first of the former generation, because they had been disobedient in the matter of the spies, and next of himself, with whom the Lord was wroth for their sakes (iii. 26). On the appeal to the witness of this past history is then based an earnest and powerful exhortation to obedience; and especially a warning against idolatry as that which had brought God's judgment upon them in times past (iv. 3), and would bring yet sorier punishment in the future (iv. 20-28). To this discourse is appended a brief notice of the severing of the three cities of refuge on the east side of the Jordan (iv. 41-43).

II. The second discourse is introduced like the first by an explanation of the circumstances under which it was delivered (iv. 44-49). It extends from chap. v. i-xxvi. 19, and contains a recapitulation, with some modifications and additions, of the Law already given on Mount Sinai. Yet it is not bare recapitulation, or naked enumation, but every word shows the heart of the lawgiver full at once of zeal for God and of the most fervent desire for the wel-

(Four Months in Algeria, p. 303.)
fire of his nation. It is the Father no less than the Legislator who speaks. And whilst obedience and life are throughout bound up together, it is the only real and living bond of society. And service of formal constraint which is the burden of his exhortations. The following are the principal heads of discourse: (a.) He begins with that which formed the basis of the whole Mosaic code,—the Ten Commandments,—and impressively repeats the circumstances under which they were given (v. 1—vi. 3). (b.) Then follows an exposition of the spirit of the First Table. The love of Jehovah who has done so great things for them (vi.), and the utter uprooting of all idol-worship (vii.) are the points chiefly insisted upon. But they are also reminded that if idolatry be a snare on the one hand, so is self-righteousness on the other (viii. 10 ff., x.). and therefore lest they should be lifted up, the speaker enters at length on the history of their past rebellions (ix. 7, 22—24), and especially of their sin in the matter of the golden calf (ix. 3—21). The true nature of obedience is again emphatically urged (x. 12—xxi. 32), and the great threats to obedience set forth in God's love and mercy to them as a people (x. 15, 21, 22), as also his signal punishment of the rebellions (xi. 3—6). The blessing and the curse (xi. 26—32) are further detailed. (c.) From the general spirit in which the Law should be observed, Moses passes on to the several enactments. Even these are introduced by a solemn charge to the people to destroy all objects of idolatrous worship in the land (xii. 1—3). They are upon the whole arranged systematically. We have (1) first the laws touching religion (xii.—xvi. 17): (2) then those which are to regulate the conduct of the government and the executive (xvi. 18—xxii. 23); and (3) lastly those which concern the private and social life of the people (xxii. 1—xxvi. 19). The whole are framed with express reference to the future occupation of the land of Canaan.

(1.) There is to be but one sanctuary where all offerings are to be offered. Flesh may be eaten anywhere, but sacrifices may only be slain in "the place which the Lord thy God shall choose." (xii. 5—32). All idol prophets, all entertainers to idolatry from among themselves, even whole cities, if idolatrous, are to be cut off (xiii.); and all idolatrous practices to be eschewed (xiv. 1, 2). Next come regulations respecting clean and unclean animals, title, the year of release and the three feasts of the Passover, of Weeks, and of Tabernacles (xiv. 3—xvii. 17).

(2.) The laws affecting public personages and defining the authority of the Judges (xvi. 18—29) and the Priests (xvii. 8—13), the way of proceeding in courts of justice (xvii. 1—14); the law of the King (xviii. 14—20), of the Priests and Levites and Prophets (xviii.); of the cities of refuge and of witnesses (xix.). The order is not very exact, but on the whole the section xvi. 18—xxiv. 21 is judicial in its character. The passage xvi. 21—xxvii. 1, seems strangely out of place. Baumgarten (Comm. in loc.) tries to account for it on the ground of the close connection which must subsist between the true worship of God and righteous rule and judgment. But who does not feel that this is said with more ingenuity than truth?

Next come the laws on the land (xx.), both as waged (concerning with other nations, and (b) especially with the inhabitants of Canaan (ver. 17).

(3.) Laws touching domestic life and the relation of man to man (xii. 13—xxvi. 19). So Israel divides, assigning the former part of chap. xii. to the previous section. Havernick on the other hand includes it in the present. The fact is, that vv. 10—14 are the very limits of portions which are treated of in chap. xx., whereas 1—9 seem more naturally to come under the matters discussed in this section. It begins with the relations of the family, passes on to those of the friend and neighbor, and then touches on the general principles of justice and charity by which men should be actuated (xxiv. 16—22). It concludes with the solemn confession which every Israelite is to make when he offers the first fruits, and which reminds him of what he is as a member of the covenant community in covenant with Jehovah and greatly blessed by Jehovah.

Finally, the whole long discourse (v. 1—xxvi. 19) is wound up by a brief but powerful appeal (16—19), which reminds us of the words with which it opened. It will be observed that no pains are taken here, or indeed generally in the Mosaic legislation, to keep the several portions of the law, considered as moral, ritual, and ceremonial, apart from each other by any clearly marked line. But there is in this discourse a very manifest gradual descent from the higher ground to the lower. The speaker begins by setting forth Jehovah himself as the great object of love and worship, thence he passes (1) to the Religious, (2) to the Political, and (3) to the Social economy of his people.

III. In the third discourse (xxvii. 1—xxx. 20), the Elders of Israel are associated with Moses. The people are commanded to set up stones upon Mount Elal, and on them to write "all the words of this law." Then follow the several curses to be pronounced by the Levites on Elal (xxvii. 14—26), and the blessings on Gerizim (xxviii. 1—14). How terrible will be the punishment of any neglect of this law, is further portrayed in the vivid words of a prophecy but too fearfully verified in the subsequent history of the people. The subject of this discourse is briefly "The Blessing and the Curse."

IV. The delivery of the Law as written by Moses (for its still further preservation) to the custody of the Levites, and a charge to the people to hear it read once every seven years (xxixii.): the Song of Moses spoken in the ears of the people (xxx. 30—xxxii. 44): and the blessing of the twelve tribes (xxxiii.).

V. The Book closes (xxxiv.) with an account of the death of Moses, which is first announced to him in xxxiii. 48—52. On the authorship of the last chapter we shall speak below.

B. Relation of Deuteronomy to the preceding books. It has been an opinion very generally entertained by the more modern critics, as well as by the earlier, that the book of Deuteronomy forms a complete whole in itself, and that it was appended to the other books as a later addition. Only chapters xxvi, xxvii., xxviii, have been in whole or in part called in question by Dr. Wette, Ewald, and Von Lengerke. Dr. Wette thinks that xxvii. and xxviii. have been borrowed from other sources, and that xxiv. is the work of the Elohist (Pentateuch). Ewald also supposes xxiii. to have been borrowed from another writer, who lived, however, (in accordance with his theory, which we shall notice later on) after Solomon. On the other hand, he considers xxvii. and xxviii. to be by Baruch (Oppert, i. 23) and Tuch (Gen. p. 556) decide that it is Elohist. Some of these critics imagine that these chapters originally formed the conclusion of the book of Numbers, and that the Deuteronomist (Penta-
TRENCH] tore them away from their proper position in order the better to incorporate his own work with the rest of the Pentateuch, and to give it a fitting conclusion. Gensesius and his followers are of opinion that the whole book as it stands at present is by the same hand. But it is a question of some interest and importance whether the book of Deuteronomy should be assigned to the author, or one of the authors, of the former portions of the Pentateuch, whether at variance with, distinct and independent work. The more conservative critics of the school of Hengstenberg contend that Deuteronomy forms an integral part of the Pentateuch, which is throughout to be ascribed to Moses. Others, as Stahelin and Delitzsch, have given reasons for believing that it was written by the Jehovist; whilst others again, as Ewald and De Wette, are in favor of a different author.

The chief grounds on which the last opinion rests are variations and additions to be found in Deuteronomy, both in the historical and legal portions, as well as the observable difference of style and phraseology. It is necessary, therefore, before we come to consider more directly the question of authorship, to take into account these alleged peculiarities: and it may be well to enumerate the principal discrepancies, additions, &c., as given by De Wette in the last edition of his Einleitung (many of his former objections he afterwards abandoned), and to subjoin the replies and explanations which they have called forth.

1. Discrepancies. — The most important discrepancies alleged to exist between the historical portions of Deuteronomy and the earlier books are the following —

(1) The appointment of judges (i. 6–18) is at variance with the account in Ex. xviii. It is referred to a different time, being placed after the departure of the people from Horeb (ver. 6), whereas in Exodus it is said to have occurred during their encampment before the mount (Ex. xviii. 5). The circumstances are different, and apparently it is mixed up with the choosing of the seventy elders (Num. xi. 11–17). To this it has been answered, that although Deut. i. 6 mentions the departure from Sinai, yet Deut. i. 9–17 refers evidently to what took place during the abode there, as is shown by comparing the expression "at that time," ver. 9, with the expression ver. 18. The speaker, as is not unnatural in animated discourse, checks himself and goes back to take notice of an important circumstance prior to one which he has already mentioned. This is manifest, because ver. 19 is so closely reAPTATIVE of ver. 6. Again, there is no force in the objection that Jethro's counsel is here passed over in silence. When making allusion to a well-known historical fact, it is unnecessary for the speaker to enter into details. This at most is an omission, not a contradiction. Lastly, the story in Exodus is perfectly distinct from that in Num. xi., and there is no confusion of the two here. Nothing is said of the institution of the seventy in Deut., probably because the office was only temporary, and if it did not cease before the death of Moses, was not intended to be perpetuated in the promised land. (So in substance Ranke, v. Lengerke, Hengst., Hitzig, Stahelin.)

(2) Chap. i. 22 is at variance with Num. xiii. 2, because here Moses is said to have sent the spies into Canaan at the suggestion of the people, whereas there tied is said to have commanded the measure. The explanation is obvious. The people make the request: Moses refers it to God, who then gives to it his sanction. In the historical book of Numbers the divine command only is mentioned. Here, where the lawgiver deals so largely with the feelings and conduct of the people themselves, he remindeth them both that the request originated with themselves, and also of the circumstances out of which that request sprang (ver. 20, 21). These are not mentioned in the history. The objection, it may be remarked, is precisely that of the same kind as that in which in the N. T. is urged against the reconciliation of Gal. ii. 2 with Acts xv. 2, 3. Both admit of a similar explanation.

(3) Chap. i. 44, "And the Amorites which dwelt in that mountain," &c., whereas in the story of the same event, Num. xiv. 43–45, Amalekites are mentioned. Answer: in this latter passage not only Amalekites, but Canaanites, are said to have come down against the Israelites. The Amorites stand here not for "Amalekites," but for "Canaanites," as being the most powerful of all the Canaanitish tribes (cf. Gen. xv. 16; Deut. i. 7); and the Amalekites are not named, but hinted at, when it is said, "they destroyed you in Seir," where, according to 1 Chr. iv. 22, they dwelt (so Hengst. iii. 421).

(4) Chap. ii. 2–8, confused and at variance with Num. xx. 14–21, and xxi. 4. In the former we read (ver. 4), "Ye are to pass through the coast of your brethren, the children of Esau." In the latter (ver. 20), "And he said, Thou shalt not go through. And Edom came out against him," &c. But, according to Deut., that part of the Edomite territory only was traversed which lay between Edath and Ezion-geber. In this exposed part of their territory any attempt to prevent the passage of the Israelites would have been useless, whereas at Kades, where, according to Numbers, the opposition was offered, the rocky nature of the country was in favor of the Edomites. (So Hengst. iii. 283 ff., who is followed by Winer, i. 293, note 3.) To this we may add, that in Dent. ii. 8, when it is said, "we passed by from our brethren the children of Esau... through the way of the plain from Edath," the failure of an attempt to pass elsewhere is implied. Again, according to Deut., the Israelites purchased food and water of the Edomites and Moabites (ver. 6, 28), which, it is said, contradicts the story. (cf. xxv. 19, 20), which accounts the Israelites offer to pay for what they have (cf. Dent. ii. 6 with Num. xx. 19). And if in Dent. xxvii. 4 there seems to be a contradiction to Deut. ii. 29, with regard to the conduct of the Moabites, it may be removed by observing (with Hengst. iii. 286) that the unfriendliness of the Moabites in not coming out to meet the Israelites with bread and water was the very reason why the latter were obliged to buy provisions.

(5) More perplexing is the difference in the account of the encampments of the Israelites, as given Deut. x. 6, 7, compared with Num. xx. 23, xxxiii. 30 and 37. In Deut. it is said that the order of encampment was, (1) Bene-jaakan, (2) Mosera (where Aaron dies), (3) Gudgodah, (4) Jothath. In Numbers it is, (1) Moresheth, (2) Bene-jaakan, (3) Hor-hagidgad, (4) Jothath. Then follow the stations Ebronah, Ezion-geber, Kades, and Mount Hor, and it is at this last that Aaron dies. (It is remarkable here that no account is given of the stations between Ezion-geber and Kadesh on the return route.) Various attempts have been made to reconcile these accounts. The explanation.
DEUTERONOMY

DEUTERONOMY

given by Kurtz (All a zur Gesch. d. A. B. 20) is on the whole the most satisfactory. He says: "In the first month of the fortieth year the whole congregation comes a second time to the wilderness of Zin, which is Kadesh (Num. xxxiii. 30). On the down-route to Edom they had encamped at Mount Hor (Deut. x. 6, 7), or to Mosera (Deut. v. 22), Besor, Jakan, Chor-bagdad, and Jothab. But now again departing from Kadesh, they go to Mount Hor, 'in the edge of the land of Edom' (ver. 37, 38), or to Mosera (Deut. x. 6, 7), this last being in the desert at the foot of the mountain. Bene-Jakan, Chor-bagdad, and Jothab were also visited about this time, i.e. a second time, after the second halt at Kadesh. This seems a not improbable explanation, and our knowledge of the topography of the desert is so inaccurate that we can hardly hope for a better. More may be seen in Winer, art. Waste.

(6.) But this is not so much a discrepancy as a peculiarity of the writer: in Deut, the usual name for the mountain on which the law was given is Horeb, only once (xxxii. 2) Sinai; in the other books Sinai is far more common than Horeb. The answer given is, that Horeb was the general name of the whole mountain-range; Sinai, the particular mountain on which the law was delivered; and that Horeb, the more general and well-known name, was employed in accordance with the rhetorical style of this book, in order to bring out the contrast between the Sinaitic giving of the law, and the giving of the law in the land of Moab (Deut. i. 5, xxxix. 1). So Keil. Of this last explanation it is not too much to say that it is neither ingenious nor satisfactory.

It must be remembered, with regard to all the answers above given, that so far as they reconcile alleged contradictions, they tend to establish the veracity of the writers, but they by no means prove that the writer of the book of Deuteronomy is no other than the writer of the earlier books. So far indeed there is nothing to decide one way or the other. The additions both to the historical and legal sections are in this respect of far more importance, and the principal of them we shall here illustrate.

II. Additions. — These are to be found both in the History and in the Law.

1. In the History. (a.) The command of God to leave Horeb, Deut. i. 6, 7, not mentioned Num. x. 11. The repentance of the Israelites, Deut. i. 45, omitted Num. xiv. 45. The intercession of Moses in behalf of Aaron, Deut. i. 29, of which nothing is said Ex. xxxii., xxxiii., xxxiv. These are so slight, however, that, as Keil suggests, they might have been passed over very naturally in the earlier books, supposing both accounts to be by the same hand. But of more note are: (b.) The command not to fight with Moabites and Ammonites, Deut. ii. 9, 19, or with the Edomites, but to buy of them food and water, ii. 4-8. The valuable historical notices which are given respecting the earlier inhabitants of the countries of Moab and Ammon and of Mount Seir, ii. 10-12, 20-23; the sixty fortified cities of Bashan, iii. 4; the king of the country who was 'of the remnant of giants,' iii. 11; the different names of Herman, iii. 9; the wilderness of Kedemoth, iv. 26; and the more detailed account of the attack of the Amalekites, xv. 17, 18, compared with Ex. xvii. 8.

2. In the Law. (a.) Appointment of the cities of refuge, Deut. xix. 7-10, as compared with Num. xxxv. 14 and Deut. iv. 41; of one particular place for the solemn worship of God, where all offerings, tithes, &c., are to be brought, Deut. xii. 5, &c., whilst the restriction with regard to the slaying of animals only at the door of the tabernacle of the congregation (Lev. xii. 4) is done away, 19, 20; the limitation (Num. x. 14) of the sacrifices and burnt-offerings to the appointed place, Deut. xii. 6, 11, 17, xxiv. 22, &c., xxvi. 12; concerning false prophets and seducers to idolatry and those who hearken unto them, xiii., concerning the king and the manner of the kingdom, xiv. 11, &c.; the prophets, xvi. 13, &c.; war and military service, xx.; the expiation of secret murder; the law of female captives; of first-born sons by a double marriage; of disobedient sons; of those who suffer death by hanging, xxi.; the laws in xxii. 5-8, 13-21; of divorce, xxiv. 1, and various lesser enactments, xxiii. and xxiv.; the form of thanksgiving in offering the first-fruits, xxix.; the command to write the law upon stones, xxvii., and to read it before all Israel at the Feast of Tabernacles, xxx. 10-13.

Many others are either extensions or modifications of, than additions to, existing laws, as for instance the establishment of the Hebrew slave, Deut. xxi. 12, &c., compared with Ex. xx. 2, &c. See also the fuller directions in Deut. xv. 19-23, xxv. 1-11, as compared with the brief notices, Ex. xiii. 12, xix. 13.

C. Author. — 1. It is generally agreed that by far the greater portion of the book is the work of one author. The only parts which have been questioned as possible by some are, according to De Wette, iv. 41-46, x. 6-9, xxxiii. and xxxiv. Internal evidence indeed is strongly decisive that this book of the Pentateuch was not the work of a compiler.

2. It cannot be denied that the style of Deuteronomy is very different from that of the other four books of the Pentateuch. It is more flowing, more rhetorical, more sustained. The rhythm is grand, and the diction more akin to the sublimar passages of the prophets, than to the sober prose of the historians.

3. Who then was the author? On this point the following principal hypotheses have been maintained:

(1.) The old traditional view that this book, like the other books of the Pentateuch, is the work of Moses himself. Of the later entries Hengstenberg, Hengstenberg, Ranke, and others, have maintained this view. Moses Stuart writes: "Deuteronomy appears to my mind, as it did to that of Eichhorn and Herder, as the earnest outpourings and admonitions of a heart which felt the deepest interest in the welfare of the Jewish nation, and which realized that it must soon bid farewell to them. Instead of bearing upon its face, as is alleged by some, evidences of another authorship than that of Moses, I must regard this book as being so deeply wrought with holy and patriotic feeling, as to convince any unbiased reader who is competent to judge of its style, that it cannot, with any tolerable degree of probability, be attributed to any pretended or legislative, or to any mere imitator of the great legislator. Such a glow runs through all this book it is in vain to seek for in any artificial or poetical composition" (Hist. of the O. T. Canon, § 3).

In support of this opinion it is said: (a) That supposing the whole Pentateuch to have been writ
ten by Moses, the change in style is easily accounted for when we remember that the last book is hortatory in its character, that it consists chiefly of additions and that these were delivered under very peculiar circumstances. (b) That the add. books is not only generally in accordance with that of the earlier books, and that as well in their Elohist as in their Jehovistic portions, but that there are certain peculiar forms of expression common only to these five books. (c) That the alleged discrepancies in matters of fact between this and the earlier books may be reconciled (see above), and that the additions and corrections in the legislation are only such as would necessarily be made when the people were just about to enter the promised land. Thus Bertheau observes: "It is hazardous to conclude from contradictions in the laws that they are to be ascribed to a different age. He who made additions must have known what it was he was making additions to, and would either have avoided all contradiction, or would have altered the earlier laws to make them agree with the latter." (Die Sieben Gruppen Mos. Gesetz, p. 19, note). (d) That the book bears witness to its own authorship (xxvi. 19), and is expressly cited in the N. T. as the work of Moses. (Matt. xix. 7, 8; Mark x. 3; Acts iii. 22, vii. 37).

The advocates of this theory of course suppose that the last chapter, containing an account of the death of Moses, was added by a later hand, and perhaps framed originally the beginning of the book of Joshua.

(2.) The opinion of Stähelin (and as it would seem of Bleek) that the author is the same as the writer of the Jehovistic portions of the other books. He thinks that both the historical and legislative portions plainly show the hand of the supplementist (Krit. Übers., p. 76). Hence he attaches but little weight to the alleged discrepancies, as he considers them all to be the work of the reviser, going over, correcting, and adding to the older materials of the Elohist document already in his hands.

(3.) The opinion of De Wette, Gesenius, and others, that the Deuteronomist is a distinct writer from the Jehovist. De Wette's arguments are based, (a) on the difference in style; (b) on the contradictions already referred to as existing in matters of history, as well as in the legislation, when compared with that in Exodus; (c) on the peculiarities noticeable in this book, that God does not speak by Moses, but that Moses himself speaks to the people, and that there is no mention of the angel of Jehovah (cf. i. 30, vii. 20-23, xiii. 14-17, with Ex. xxiii. 20-33); and lastly on the fact that the Deuteronomist ascribes his whole work to Moses, while the Jehovist assigns him only certain portions.

(4.) From the fact that certain phrases occurring in Deuteronomy are found also in the prophecy of Jeremiah, it has been too hastily concluded by some critics that both books were the work of the prophet. So Von Bohlen, Gesenius (Gesch. d. Heb. Spr., p. 52), and Hartmann (Hist. Krit. Forsch., p. 660), König, on the other hand (Allt. Stud. ii. 12 ff.), has shown not only that this idiomatice resemblance has been made too much of (see also Kell, Einl. p. 117), but that there is the greatest possible difference. It may be theorized (see above) that the De Wette remarks (Einl. p. 191), "zu viel behauptet, aber diese Verwandtschaft von Bohlen, Gen. s. xxiv."

(5.) Ewald is of opinion that it was written by a Jew living in Egypt during the latter half of the reign of Manasseh (Gesch. des L. L. I. 171). He thinks that a pious Jew of that age, gifted with prophetic power and fully alive to all the evils of his time, sought thus to revive and to impress more powerfully upon the minds of his countrymen the great lessons of that Law which he saw they were in danger of forgetting. He avails himself therefore of the groundwork of the earlier history, and also of the Mosaic mode of expression. But as his object is to raise a corrupt nation, he only makes use of the historical notices for the purpose of introducing his warnings and exhortations with the more effect. This he does with great skill and as a master of his subject, whilst at the same time he gives fresh vigor and life to the old law by means of those new prophetic truths which had so lately become the heritage of his people. Ewald further considers that there are passages in Deuteronomy borrowed from the books of Job and Isaiah (iv. 52 from Job vii. 8, and xxviii. 20, 30, 35 from Job v. 14, xxx. 10, ii. 7.; and xxviii. 49, 49, from Is. v. 26 ff., xxxii. 19), and much of it akin to Jeremiah (Gesch. i. 171). The song of Moses (xxxi.) is, according to him, not by the Deuteronomist, but is nevertheless later than the time of Solomon.

D. Date of Composition. Was the book really written, as its language certainly implies, before the entry of Israel into the Promised Land? Not only does the writer assert that the discourses contained in the book were delivered in the plains of Moab, in the last month of the 40 years' wandering, and when the people were just about to enter Canaan (i. 1-5), but he tells us with still further exactness that all the words of this Law were written at the same time in the book (xxxvi. 9). Moreover, the fact that the goodly land lay even now before their eyes seems everywhere to be unpercept in the thoughts of the legislator, and to lend a peculiar solemnity to his words. Hence we constantly meet with such expressions as "When Jehovah thy God bringeth thee into the land which he hath sworn to thy fathers to give thee," or "whither thou goest in to possess it." This phraseology is so constant, and seems to fall in so naturally with the general tone and character of the book, that to suppose it was written long after the settlement of the Israelites in Canaan, in the reign of Jehoshaphat (De Wette and others), or in that of Manasseh (Ewald as above), is not only to make the book an historical romance, but to attribute very considerable inventive skill to the author (as Ewald in fact does).

De Wette argues, indeed, that the character of the Laws is such as of itself to presuppose a long residence in the land of Canaan. He instances the allusion to the temple (xii. and xvi. 1-7), the provision for the right discharge of the kings and the prophetic offices, the rules for civil and military organization and the state of the Levites, who are represented as living without cities (though such are granted to them in Num. xxxv.) and without titles (allotted to them in Num. xviii. 20, &c.). But in the passages cited the temple is not named, much less is it spoken of as already existing; on the contrary, the phrase employed is "The place which the Lord your God shall choose." Again, when Moses was in the sense of the prophetic oracles of the future and very different position of his people as settled in the land of Canaan, is to deny him even ordinary sagacity. Without raising the question about his divine commission, surely it is
not too much to assume that so wise and great a legislator would foresee the growth of a polity and would be anxious to regulate its due administration in the fear of God. Hence he would guard against false prophets and seducers to idolatry. As regards the Levites, Moses might have expected or even desired that, though possessing certain cities (which, however, were inhabited by others as well as themselves), they should not be confined to those cities but scattered over the face of the country. This must have been the case at first, owing to the very gradual occupation of the new territory. The mere fact that in giving them certain rights in Deut. nothing is said of an earlier provision in Num. does not by any means prove that this earlier provision was unknown or had ceased to be in force.

Other reasons for a later date, such as the mention of the worship of the sun and moon (iv. 19, 21, d. e.); the name Feast of Tabernacles; and the motive for keeping the Sabbath, are of little force. In Amos v. 26, Saturn is said to have been worshipped in the wilderness; the punishment of stoning is found also in the older documents; the Feast of Tabernacles agrees with Lev. xxiii. 34; and the motive alleged for the observance of the Sabbath at least does not exclude other motives. The complete isolation of the question of authorship, as well as of the date of the legislation in Pentateuch, must be reserved for another article.

[PENTATEUCH.] J. J. S. P.

DEVIL (δημόςος; נאש).—Properly "one who sets at variance;" δημόςανος; comp. Plat. Symp. p. 222, e, d; and generally a "slanderer," or "false accuser."

The word is found in the plural number and adjectival sense in 1 Tim. iii. 11; 2 Tim. iii. 3; and Tit. ii. 3. In all other cases it is used with the article as a description of Satan" [SATAN]—exempting, as in John vi. 70 it is applied to Judas (as "Satan" to St. Peter in Matt. xvi. 23), because they—\* the one permanently, and the other for the moment—were doing Satan's work.

The name describes him as slandering to man, and man to God.

The former work is, of course, a part of his great work of temptation to evil; and it is not only exemplified but illustrated to its fullest nature by the narrative of Gen. iii. We find there that its essential characteristic is the representation of God as an arbitrary and selfish ruler, seeking his own good and not that of his creatures. The effect is to stir up the spirit of freedom in man to seek a fancied independence; and it is but a slight step further to impute falsehood or cruelty to Him. The success of the Devil's slander is seen, not only in the Scriptural narrative of the Fall, but in the corruptions of most mythologies, and especially in the horrible notion of the divine δαιμόνια, which ran through so many. (See e. g. Herod. i. 32, vii. 46.) The same slander is implied rather than expressed in the temptation of our Lord, and overcome by the faith which trusts in God's love even where its signs may be hidden from the eye. (Comp. the unmasking of a similar slander by Peter in Acts v. 4.)

The other work, the slandering or accusing man before God, is, as it must necessarily be, unintelligible to us. The All-Seeing Judge can need no accuser; and the All-Pure could, it might seem, have no intercourse with the Evil One. But in truth the question touches on two mysteries, the relation of the Infinite to the finite spirit, and the permission of the existence of evil under the government of Him who is "the Good." As a part of these it must be viewed, to the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the facts are proved to us by incontrovertible evidence.

The fact of the Devil's accusation of man to God is stated generally in Rev. xii. 10, where he is called "the accuser (οἰκυγέα) of our brethren, who accused them before your God day and night," and exemplified plainly in the case of Job. Its essence as before is the imputation of self-motivated sins (Job i. 9, 10), and its refutation is placed in the self-sacrifice of those "who loved not their own lives unto death."

For details see SATAN.

A. B.

DEVIIONS denoted formerly objects of worship or religious veneration, and not, as in our intercourse with the Evil One. But in truth the question touches on two mysteries, the relation of the Infinite to the finite spirit, and the permission of the existence of evil under the government of Him who is "the Good." As a part of these it must be viewed, to the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the facts are proved to us by incontrovertible evidence.

The fact of the Devil's accusation of man to God is stated generally in Rev. xii. 10, where he is called "the accuser (οἰκυγέα) of our brethren, who accused them before your God day and night," and exemplified plainly in the case of Job. Its essence as before is the imputation of self-motivated sins (Job i. 9, 10), and its refutation is placed in the self-sacrifice of those "who loved not their own lives unto death."

For details see SATAN.

H.

DEVOUT. [PROPHEYES, at the end, Amer. ed.]

DEW (ῥοζ; δρομος; νοσ). This in the summer is so copious in Palestine that it supplies to some extent the absence of rain (Ezech. xvii. 16, 22), and becomes important to the agriculturist; as a proof of this copiousness the well-known sign of Gideon (Judg. vi. 37, 39, 40) may be adduced. Thus it is coupled in the divine blessing with rain, or mentioned as a prime source of fertility (Gen. xxvii. 28; Deut. xxxii. 13; Ezek. viii. 12); and its withdrawal is attributed to a curse (2 Sam. ii. 21; 1 K. xxiv. 1; Hagg. i. 10). It becomes somehow linked with the narrative of Gen. iii. We find there that its essential characteristic is the representation of God as an arbitrary and selfish ruler, seeking his own good and not that of his account of its pristine relation, or its force as a proper name. See Buttmann's N. T. Gramm. p. 78. H.
DEW OF HERMON

v. 71: while its speedy evanescence typifies the transient goodness of the hypocrite ( Hos. vi. 4, xiii. 3).

It is mentioned as a token of exposure in the night ( Cant. v. 2; Dan. iv. 13, 23, 29-32, v. 21).

* DEW OF HERMON. [HERMON.]

DIadem (διαδέμ, διαδήμα, or διαδήματος; also διαδήματος), a word employed in the A. V. as the translation of the above Hebrew terms. They occur in poetical passages, in which neither the Hebrew nor the English words appear to be used with any special force. διαδήματος is strictly used for the "mitre" of the high-priest. [MITRE.]

What the " diadem " of the Jews was we know not. That of other nations of antiquity was a fillet of silk, two inches broad, bound round the head and tied behind, the invention of which is attributed to Liber ( Plin. H. N. vii. 64, 67.). Its color was generally white (Tac. Ann. vi. 37; Sil. Ital. xvi. 241); sometimes, however, it was of blue, like that of Dar- rius, "cerulea fascia also distincta" ( Q. Curti. iii. 3, vi. 20; Xen. Cyrl. viii. 3, 12); and it was sown with pearls or other gems ( Gibbon. i. 392; Zech. ix. 16), and enriched with gold ( Rev. ix. 7). It was peculiarly the mark of oriental sovereignty (1 Mac. xii. 32, τὸ διάδημα τῆς ἀριστείας), and hence the deep renown caused by the attempt of Cesar to substitute for it the laurel crown appropriated to Roman emperors ( "sedelat . . . coronas"; "diadema ostentis," Cio. Phil. ii. 34); when some one crowned his statue with a laurel-wreath, "can- didae fasciae praefigatur," the tribunes instantly ordered the fillet or diadem to be removed, and the man to be thrown into prison ( Suet. Ces. 79).

Caligua's wish to use it was considered an act of insanity (Suet. Cal. 22). Heligolabsin only wore it in private. Antony assumed it in Egypt ( Flor. iv. 11.), but Diduchetan (or, according to Aurelius Victor, Aurelian) first assumed it as a badge of the empire. Representations of it may be seen on the coin of any of the later emperors ( Tillenouit, Hist. Imp. iii. 531.)

A crown was used by the kings of Israel, even in battle (2 Sam. i. 10: similarly it is represented on coins of Theodosius as e rcirculii his helmet); but in all probability this was not the state crown (2 Sam. xii. 30), although used in the coronation of Josiah (2 K. xii. 12). Kitto supposes that the state crown may have been in the possession of Athaliah; but perhaps we ought not to lay any great stress on the word τίτλος in this place, especially as it is very likely that the state crown was kept in the Temple.

In Esth. i. 11, ii. 17, we have τίτλος (καταραμ., καθαρός) for the turban (σταυλὸς βωσίνης, v. 8) worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favor (vii. 15), διάδημα δύσησων παρουσίαν. The diadem of the king differed from that of others in having an erect triangular peak ( κορβασία, Aris. Soph. Ar. 487; ήν οἱ βασιλεῖς μόνοι ὕφεν φόδι- ρον παρὰ Περσίας, οἱ δὲ στρατηγοὶ κεκλημένης, Suid. s. v. τίτλος, and Hesych.). Possibly the τίτλος of Dan. iii. 21 is a tiara (as in LXX.), where however Drusius and others invert the words τίτλος καὶ τίτλος καὶ τίτλος (καταραμ., καθαρός), A. V. "hat [HAT]")

Some render it by turbel or coleopterologia. Schleusner suggests that κράβολος may be derived from it. The tiara generally had pendant flaps falling on the shoulders. (See Paschalis, de Coro- mato, p. 573; Brissinimus, de Regia Pers., &c.; Layard, ii. 320; Seccacius, Hygroec. iii. 38; Fabricius, Bibl. Ant. xiv. 13.)

The words παρατυπίας παρατυπίας ("exceeding in dyed attire," A. V.) in Ez. xxiii. 15 mean long and flowing turbans of gorgeous colors (LXX. παρα- τυπίας, where a better reading is παρατυπίας). F. W. F. W.

DIAL

597

Obverse of Tetrarchion of Tigranes, king of Syria.

Head of king with diadem, to the right.

* The difference between " diadem " (διαδήματα) and " crown " (στέφανος) is very important for the study of the New Testament. The distinction is not duly recognized in the foregoing article or in that on CROWN. Both the classical usage and that of the Hellenistic Greek are well illustrated by Trench in his Synonymia of the N. T., § xviii. See also Corom in Pauly's Real-Encyk. ii. 714.

The distinctive idea of " diadem " is that of royalty or kingly power; while the other senses of our English " crown " (which embraces also that of " diadem," and hence of itself is indeterminate) belong to στέφανος, denoting " the crown of victory in the games, of civic worth, of military valor, of mtrial joy, of festal gladness," but not the emblem of sovereignty and regal grandeur.

Hence the reference (see above) to Jer. ix. 7, as showing how the diadem was ornamented, is incorrect; for the term there is στέφανος, and describes " the corona " as conquerors, not as kings. The Septuagint (see e. g. the passages in the first book of Maccabees, which contain the two words) observes the distinction under remark with underval- ing accuracy. It would be better, perhaps, if the A. V. had at least suggested to the reader the variation in the Greek, by saying " diadems " instead of " crowns " in Rev. xii. 10, xii. 11. Without a distinct apprehension of the import of these similar but different expressions, we fail, as Trench remarks, to perceive how " fitly it is said of Him who is King of Kings and Lord of Lords, that on his head were many diadems (διαδήματα πολλά) . . . these 'many diadems' the tokens of the many royalties — of earth, of heaven, and of hell ( Phil. ii. 10) — which are his: royalties once stamped or assayed by the Great Red Dragon, the usurper of Christ's dignity and honor, described therefore with his seven diadems as well ( xiii. 1), but now openly and forever assumed by Him to whom rightly belong." See also Webster's Syn. and Synonym. of the Greek Testament, p. 233 (Lond. 1864).

DIAL (διάλογος: ἀναθλογια: horologium). The word is the same as that rendered " steps " in A. V. (Ex. xx. 26; 1 K. x. 19.), and " degrees " in A. V. (2 K. x. 9, 10, 11; Is. xxxviii. 8), where, to give a consistent rendering, we should read with
the margin the "degrees" rather than the "dial" of Ahaz. In the absence of any materials for determining the shape and structure of the solar instrument, which certainly appears intended, the best course is to follow the most strictly natural method, and to consider, not with Avril of Alexandria and Jerome (Comm. on Is. xxxviii. 8), that the δραμάα were really stairs, and that the shadow (perhaps of some column or obelisk on the top) fell on a greater or smaller number of them according as the sun was low or high. The terrace of a palace might easily be thus ornamented. Ahaz's taste seems to have led him in pursuit of foreign curiosities (2 K. xvi. 10), and his intimacy with Tighath-Pileser gave him probably an opportunity of peering from Assyria the pattern of some such structure; and this might readily lead the "princes of Babylon" (2 Chr. xxvii. 31) to "inquire of the wonder," namely, the alteration of the shadow, in the reign of Hezekiah. Herodotus (ii. 109) mentions that the Egyptians received from the Babylonians the πανα and the γραβαλως and the division of the day into twelve hours. Of such division, however, the O. T. contains no undoubted trace, nor does any word proved to be equivalent to the "hour" occur in the course of it, although it is possible that Ps. cxi. 11, and cxix. 23, may contain allusion to the progress of a shadow as measuring diurnal time. In John xii. 9 the day is spoken of as consisting of twelve hours. As regards the physical character of the sign of the retrogression of the shadow in Is. xxxviii. 8, it seems useless to attempt to analyze it; no doubt an alteration in the inclination of the gnomon, or column, etc., might easily effect such an apparent retrogression; but the whole idea, which is that of Divine interference with the course of nature in behalf of the king, rests such an attempt to bring it within the compass of mechanism. It has been suggested that the δραμάα of Is. xviii. 8, xviii. 9; Ez. vi. 4, 6, rendered in the margin of the A. V. "sun-images," were gnomons to measure time (Jahn, Archiv. i. 529), but there seems no adequate ground for this theory.

H. H. * Gumpach, in his Sonnenaugier des Alten (Altertumsw. Studien, p. 186), suggests that the "dial of Ahaz" was so called because it was a present to him from his ally Tighath-Pileser, and that it was not only modeled after the style of such structures in Babylonia, but was made there and sent to Ahaz from that country. In his restoration of the words it makes resemble very much what is supposed to have been the shape of the edifices represented by the Birs Nimroud and their similar ruins, namely, a series of steps or terraces on which an upright pole cast its shadow. [See BAREL, Towle or.] Mr. Layard thinks it possible that these great structures in Mesopotamia may have been built for some astronomical purpose (Xin. and Esb, p. 499). The confirmation of this supposition would bring the ruins on the banks of the Euphrates into a new connection with sacred history. Gumpach attempts to explain the amount of the sun's going back on the dial of Ahaz without finding anything miraculous in the text. See against that view Keil and Pelzsch, Bücher der Könige (1865), p 34a. [HILKEN] H. DIAMOND (διάμαντις; jampis; jaspa), a precious stone, the third in the second row on the breast-plate of the high-priest (Ex. xxviii. 18, xix. 11), and mentioned by Ezekiel (xxvii. 13) among the precious stones of the king of Tyre. Bunsen has noticed the difficulty of identifying the terms used in the versions for each of the Hebrew names of precious stones in the above passages, the translators or transcribers having apparently altered the order in which they stand. [αμάντις seems to be the word in the LXX. corresponding to διάμαντις, but most ancient commentators give ἀμάντης, ομάνθωμα. Our translation, "diamond," is derived from Alex. Ezra, and is defended by Braun (de Vest. Streelen, ii. 13). Kalische (on Ex. p. 536) says "perhaps Emerald." The etymology from (διάμαντις, to strike, or crush) leads us to suppose a hard stone. The emerald, which is of a green color, of various depths, is nearly as hard as the topaz, and stands next to the ruby in value. The same authority doubts whether the art of engraving on the diamond was known to the ancients, since they did not even understand how to cut the ruby.

Respecting δαρμασι, which is translated "diamond" in Jer. xvii. 1, see under ADAMANT.

W. D. DIANA. This Latin word, properly denoting a Roman divinity, is the representative of the Greek Ἀρτέμις (Ἀπρεσά), the tutelary goddess of the Ephesians, who plays so important a part in the narrative of Acts xix. The Ephesian Diana was however, regarded as invested with very different attributes, and made the object of a different worship from the ordinary Diana of the Greeks, and is rather perhaps to be identified with Astarte and other female divinities of the East. K. O. Muller says (Hist. of the Pagan, i. 405. Eng. trans.), "everything that is related of this deity is singular and foreign to the Greeks. Gaul, indeed, (Ephesians, pp. 78-96), takes the contrary view, and endeavors in almost all points to identify her with the true Greek goddess. And in some respects there was doubtless a fusion of the two. Diana was the goddess of rivers, of pools, and of harbors; and these conditions are satisfied by the situation of the sanctuary at Ephesus. Corinna, one of the hills on which the city stood, is connected by Stephana Byzantinius with ἱππιος. We may refer also to the popular notion that, when the temple was burnt on the night of Alexander's birth, the calamity occurred because the goddess was absent in the character of Lucina. Again, on coins of Ephesus we sometimes find her exhibited as a huntress and with a stag. But the true Ephesian Diana is represented in a form entirely alien from Greek art. St. Jerome's words are (Patr., ad Ephes., "Sermonal Paulus ad Ephesios Dianam colentes, qui non venerent, sua arma tenet et secum est, sed istam multiformem, quam Graeci nomina quam vocant, ut sedet ex ipse eligii montem urant cum omnibus eum virum et quin viremus esse nutricem." Gaul, indeed, supposes this mode of representation to have reference simply to the fountain over which the goddess presided, conceiving the multiplication of breasts to be similar to the multiplication of eyes in Argus or of heads in Ephesus. This is the correct view, which is fundamentally the view which treats this peculiar form as a symbol of the productive and nutritive powers of nature. This is the form under which the Ephesian Diana, so called for distinction, was always represented.
The worship of Diana was more honored privately than any other deity, which accounts for the large manufacture and wide-spread sale of the "silver shrines" mentioned by St. Luke (ver. 24), and not by him only. This specific worship was publicly adopted also, as we have seen, in various and distant places: nor ought we to omit the games celebrated at Ephesus in connection with it, or the treaties made with other cities on this half-religious, half-political basis. J. S. H.

**DIBLATHIIM** (/gin-jer-olez/; Διβλαθία, [Alex. Διβλαθαία; Deblatha], mother of Hosen's wife Gomer (Hos. i. 3).

* The name may be = делуч, voluptas, and hence Gomer (which see) as the daughter (.rmtree = delicius dedusa, in accordance with the symbolic import of the names. See Hengstenberg's Chris.

**DIBLATH (accurately Diblah, 帑, the word in the text being ﻦ, = to Diblah; Διβλαθάδ: Diblatha), a place named only in Ez. vi. 14, as if situated at one of the extremities of the land of Israel: — "I will . . . make the land desolate . . . from the wilderness (Mibhar) to Diblah." The word Mibhar being frequently used for the nominal country on the south and southeast of Palestine, it is natural to infer that Diblah was in the north. To this position Beth-Diblathaim or Almon-Diblathaim in Moab on the east of the Dead Sea, are obviously unsuitable; and indeed a place which like Diblatham was on the extreme east border of Moab, and never included even in the allotments of Reuben or Gad, could hardly be chosen as a landmark of the boundary of Israel. The only name in the north at all like it is RibaLah, and the letters D (噇) and R (噇) are so much alike and so frequently interchanged, owing to the carelessness of copyists, that there is a strong probability that RibaLah is the right reading. The conjecture is due to Jerome (Comen, in loc.), but it has been endorsed by Michaelis, Gesenius, and other scholars (Ges. Thes. p. 312; and see Davi.

**DIBLATHIIM. [Almon-Diblathaim: Beth Diblathaim.]**

**DIBON** ([b-o-on] [a reading, Ges.: but Finst a river-place]: Διβών, [in Is.]: Δήβων [Alex. Διβων̓ for και Δήβων; in Josh. xiii. 9, Comp. Δήβων, the rest omit; in Jer., F. A. Δήβων: Dibon]).

1. A town on the east side of Jordan, in the rich pastoral country, which was taken possession of and rebuilt by the children of God (Num. xxxii. 3, 34). From this circumstance it possibly received the name.

---

Greek imperial copper coin of Ephesus and Suytara allied (Ωυκωδεία; Domitia, with name of procural. Obv.: ΔΟΜΙΤΙΑ ΚΙΒΑΤΗ. Bust to right. Rev.: ΑΝΩΥΚΡΑΙΝΕΝ ΗΑΙΤΟΥ ΟΜΟΝΟΙΑ ΕΦΕ ΖΥΜΠ. Ephesian Diana.

A great and archaic character. The head wore a nural crown, each hand held a bar of metal, and the lower part ended in a rude block covered with figures of animals and mystic inscriptions. This idol was regarded as an object of peculiar sanctity, and was believed to have fallen down from heaven (see Διώκτωρ, Acts xix. 35). The Oriental character of the goddess is shown by the nature of her hierarchy, which consisted of women and emnuxs, the former called Μελεσσαι, the latter Μεγάβασι. At their head was a highpriest called Εσρήπ. These terms have probably some connection with the fact that the bee was sacred to the Ephesian Diana (Aristoph. Ran. 1273). For the temple considered as a work of art we must refer to the article Ephesienses. No arms were allowed to be worn in its precincts. No bloody sacrifices were offered. Here, also, as in the temple of Apollo at Daphne, were the privileges of asylum. This is indicated on some of the coins of Ephesus (Akerinan, in Trau. of the Numis.

---

**See DIBLATHIIM, DIBLATHIAM, &c. It is in the LXX. version that the corruption of D into R is most probably observed; Dibion to Rhubon, Dolathim to Rhodioi, &c. A case in point is Riblah itself, which in the LXX. is more often Διβλάθα Δυάνα Περιλάθα.**
The city Dikhah, in the northwest of Arabia Felix, has been suggested as preserving the Joktanite name (Boch Phalag, ii. 22); but Bochart, and after him Gesenius, regard the descendant of Diblah to the Moabites, a people of Arabia Felix inhabiting a palmiferous country. Whether we follow Bochart and most others in placing the Mi'mi' on the east borders of the Ḥijāz, southwards towards the Yemen, or follow Frendel in his identification of the Wādī Dūm with the territory of this people, the connection of the latter with Diblah is uncertain and unsatisfactory. No trace of Diblah is known to exist in Arabic works, except the mention of a place called Dibakah (Διβακή) in El-Yemān (Kirma, s. v.), with many palm-trees (Mu'arrid, s. v.).

"Nakhkēh" (Ναχκήθ) also signifies a palm-tree, and is the name of many places, especially Nakhkeh el-Yammayeq, and Nakhkeh el-Hamayeq (here meaning the Southern and Northern Nakhkeh), two well-known towns situated near each other. According to some, the former was a seat of the worship of El-Latt, and a settlement of the tribe of Thakēf; and in a tradition of Mohammed's, this tribe was not of unmixed Ishmaelite blood, but one of four which he thus excepts: "All the Arabs are [descended from] Ishmael, except four tribes: Sulah (Shekhp), Hadrama (Hazarameh), El-Arwaḥ (א), and Thakēf." (Masʿat ez-Zaman, bis.)

Therefore, (1) Diblah may probably be recovered in the place called Dibakah above mentioned; or, possibly, (2) in one of the places named Nakhkeh.

A discussion of the vexed and intricate question of the Mi'mi' is beyond the limits of this article; but as they are regarded by some authorities of high repute as representing Diblah, it is important to record an identification of their true position. This has hitherto never been done; those who have written on the subject having argued on the vague and contradictory statements of the Greek geographers, from the fact that no native mention of so important a people as the Mi'mi' had been discovered (cf. Bochart, Phalag: Frendel's Letters, p. 129; Wied. Jorand's, El-Nemr, in Magnée's Hist. de l'Egypte, vol. iii.; Cusson, Essai, &c.).

There is, however, a city and people in the Yemen which appear to correspond in every respect to the position and name of the Mi'mi'. The latter is written Mu'arrān, Murāzah, and Murawān, which may be fairly rendered "people of Mur, of Mar, and of Muur," while the former exhibits the sound of a diphthong, or an attempt at a diphthong. The Greek account places them, generally, between the Sabaeans (identified with Sela, or Marib; see Arabia) and the Ethyryeans. It is therefore remarkable that where it should be sought we find a city with a fortress, called Mo'ayn, or Mo'ān,

ΔΙΚΛΑΗ

name of Dibon-Gad. Its first mention is in the ancient fragment of poetry Num. xxi. 30, and from this it appears to have belonged originally to the Moabites. The tribes of Reuben and Gad being both engaged in pastoral pursuits are not likely to have left the names of towns originally made with the same strictness as the more settled people on the west, and accordingly we find Diblon counted to Reuben in the lists of Joshua (viii. 9-12, xxv. 17). In the time of Isaiah and Jeremiah, however, it was again in possession of Moab (Is. xxxv. 2; Jer. xxviii. 18, 22, comp. 24). In the same denunciations of Israel it appears, probably, under the name of Diblon, M and B being convertible in Hebrew, and the change admitting of a play characteristic of the poetry of Isaiah. The two names were both in existence in the time of Jerome (Pseudo on Is. xxv. quoted by Eusobius, p. 758). The last passages appear to indicate that Diblon was on an elevated situation: not only is it expressly said to be a "high place" (Is. xxv. 2), but its inhabitants are bid to "come down" from their glory or their stronghold. Under the name of Diblon or Deblon it is mentioned by Eusebius and Jerome in the Descriptio. It was then a very large village (ὡς παραπόλης) beyond the Arnon. In modern times the name Diblan has been discovered by Setzen, Iris and Munges (142), and Barakhel (S. J. 372) as attached to extensive ruins on the Roman road, about three miles north of the Arnon (Vinof Moqif). All agree, however, in describing these ruins as lying low.

2. [Διβαθαῖα, the rest omit: Dibon]. One of the towns which was re-inhabited by the men of Judah after the return from captivity (Neh. xii. 21). From its mention with Jekabzeel, Moladah, and other towns of the south, there can be no doubt that it is identical with Dibon-Gad.

ΔΙΒΟΝ-ΓΑΔ

[Διβοναί γη], one of the halting places of the Israelites. It was in Moab between Rekem and Almon-Diblahiam (Num. xxxiii. 15, 35). It was no doubt the same place which is generally called Diblon; but whether it received the name of God from the tribe, or originally possessed it, cannot be ascertained.

ΔΙΒΡΗ (Διβρή) [perh. debrati, Gen.]: Διβρη: [Alex. Διβρη: Dibron], a Debit, father of Shedonith, a woman who had married an Egyptian and whose son was stoned for having blasphemed the Name "[i.e. of Jehovah]" (Lev. xxiv. 11).

ΔΙΔΡΑΧΜΩΝ (Διδραχμον: didrachmon). [Money; Shekel.]

ΔΙΔΥΜΟΣ (Διδυμον), that is, the Twin, a surname of the Apostle Thomas (John xi. 16, 24, xxiv. 2). [Thomas.]

ΔΙΚΛΑΗ (Δικλαη): Dēlā: [Alex. in 16 hr. Dēlai: Gen. xvi. 27: 1 Chr. i. 21], a son of Joktan, whose settlements, in common with those of the other sons of Joktan, must be looked for in Arabia. The name in Hebrew signifies "a palm-tree," and the cognate word in Arabic (سلاخ), "a palm-tree abounding with fruit," hence it is thought that Diklah is a part of Arabia containing many palm-trees. The city Dikhah, in the northwest of Arabia Felix, has been suggested as preserving the Joktanite name (Boch Phalag, ii. 22); but Bochart, and after him Gesenius, regarded the descendant of Dibkah to the Moabites, a people of Arabia Felix inhabiting a palmiferous country. Whether we follow Bochart and most others in placing the Mi'mi' on the east borders of the Ḥijāz, southwards towards the Yemen, or follow Frendel in his identification of the Wādī Dūm with the territory of this people, the connection of the latter with Diblah is uncertain and unsatisfactory. No trace of Diblah is known to exist in Arabic works, except the mention of a place called Dibakah (Διβακή) in El-Yemān (Kirma, s. v.), with many palm-trees (Mu'arrid, s. v.).

"Nakhkēh" (Ναχκήθ) also signifies a palm-tree, and is the name of many places, especially Nakhkeh el-Yammayeq, and Nakhkeh el-Hamayeq (here meaning the Southern and Northern Nakhkeh), two well-known towns situated near each other. According to some, the former was a seat of the worship of El-Latt, and a settlement of the tribe of Thakēf; and in a tradition of Mohammed's, this tribe was not of unmixed Ishmaelite blood, but one of four which he thus excepts: "All the Arabs are [descended from] Ishmael, except four tribes: Sulah (Shekhp), Hadrama (Hazarameh), El-Arwaḥ (א), and Thakēf." (Masʿat ez-Zaman, bis.)

Therefore, (1) Diblah may probably be recovered in the place called Dibakah above mentioned; or, possibly, (2) in one of the places named Nakhkeh.

A discussion of the vexed and intricate question of the Mi'mi' is beyond the limits of this article; but as they are regarded by some authorities of high repute as representing Diblah, it is important to record an identification of their true position. This has hitherto never been done; those who have written on the subject having argued on the vague and contradictory statements of the Greek geographers, from the fact that no native mention of so important a people as the Mi'mi' had been discovered (cf. Bochart, Phalag: Frendel's Letters, p. 129; Wied. Jorand's, El-Nemr, in Magnée's Hist. de l'Egypte, vol. iii.; Cusson, Essai, &c.).

There is, however, a city and people in the Yemen which appear to correspond in every respect to the position and name of the Mi'mi'. The latter is written Mu'arrān, Murāzah, and Murawān, which may be fairly rendered "people of Mur, of Mar, and of Muur," while the former exhibits the sound of a diphthong, or an attempt at a diphthong. The Greek account places them, generally, between the Sabaeans (identified with Sela, or Marib; see Arabia) and the Ethyryeans. It is therefore remarkable that where it should be sought we find a city with a fortress, called Mo'ayn, or Mo'ān.
DILEAN

are the latter two places is named Sinhain (comp. Niebuhr, Descr. 201) which was one of the
con- federation formed by the ancient tribe of Jenb,
(Marrisi-, s. v.), grandson of Kahlun, who
was brother of Hynyer the Jokantite. This identi-
fication is reconcilable with all that is known of the
Miniad. See further in art. Uzal.
E. S. P.

DIL'EAN (דילאן: [Var. Δίλαν; [Akl.] Alex. Διλάν: Dilean), one of the cities of
Judah, in the Shefelah or low country (Josh. xv.
38). If Gesenius's interpretation, "gourd," or "
cucumber," be correct, the name is very suitable
for a place situated in that rich district. It is not
elsewhere mentioned, nor has it been subsequently
identified with any certainty. Van de Velde (ti. 190)
suggests that it may be the modern place Ti
(Kiepert's map in Robinson, B. Tiunm), about three
miles north of Tell es-Sufich in the maritime plain
of Philistia, south of Ekron.
G.

*DILL, Matt. xxiii. 23, marg. [Anise.]*

DIM'NAH (דימנה: [Var. om.; Alex. Δυμάνα: Dymna), a city in the tribe of Zebulun, given
to the Menevite Levites (Josh. xxi. 35). The
name does not occur in the list of cities belonging to
the tribe (Josh. xiv. 10-16). In the list of Levitical
cities in 1 Chr. vi. 77 occurs Rimmon, accurately
Rimmon (רֵימָה), which may possibly be a
variation of Dinannah, 7 being often changed into
ת. In this case Rimmon is probably the real name
(Bertheau, Chronik, 72, 73; Movers, Chronik, 72).
G.

DIM'NON, the waters of (דימון ים: ים דימון) Dibon, some streams on the east of the
Dead Sea, in the land of Moab, against which Isaiah is here
uttering denunciations (Is. xv. 9). From Dibon being
named in verse 2 of this chapter, as well as in
the lists of Moabite towns in Jer. xvii., and no
place named Dibon being elsewhere mentioned as
being to Moab, Gesenius (Comm. aber d. Jer. p. 534)
confesses that the two names are the same, the
form " Dibon" being used for the sake of the
play between it and the word דָּם (דָּם) "blood." [Dibon, 1.]
G.

DIMONAH (דימונא [a writing]; Peyyā;
Alex. Δυμονα: Dimon), a city in the south of
Judah, the part bordering on the desert of Idumea
(Josh. xv. 22). Dimonah is mentioned in the
Quomenticon, but was evidently not known to
Eusebius and Jerome, nor has it been identified in
later times. It probably occurs under the altered
name of Dimoo (2) in Neh. xi. 25, 26. G.

*Knoedel (Judenth., p. 423) thinks Dibon (= Dimonah) may be ed-Dibeh, a heap of ruins on
the bank of a Wady of that name, north-east of Tell
Arkāl (Arad). See Van de Velde, Memoir, p. 252.
Robinson writes the name Edibah (Bild. Res. ii.
173, 1st ed.). Keil and Delitzsch regard this con-
jecture as possibly correct (Book of Joshua, p. 159).
H.

DY'NAH or DY'NAH, judged or avenged, from the
same root as דָּנ (object of strīf), Diert. in Gen.
Nahr u. Chabib. Wörterb. 6te Aufl.: Deīra: Dinah,
the daughter of Jacob by Leah (Gen. xxx. 21). She
accompanied her father from Mesopotamia to
Canaan, and, having ventured among the inhabi-
tants, was violated by Shechem the son of Hamor,
the chieftain of the territory in which her father
had settled (Gen. xxxiv.). Her age at this time,
judging by the subsequent notice of Joseph's age
(Gen. xxvii. 2), may have been from 17 to 15,
the ordinary period of marriage in Eastern countries
(Lane's Mod. Egypt. i. 298). Shechem proposed
to make the usual repARATION by paying a sum to
the father and marryng her (Gen. xxxiv. 12); such
repARATION would have been deemed sufficient under
the Mosaic law (Bent. xxii. 28, 29) among the
members of the Hebrew nation. But in this case
the sutor was an alien, and the crow of the offense
consisted in its having been committed by an alien
against the favored people of God; he had "wron
gfully in Israel." (xxxiv. 7). The proposals of Hamor,
who acted as his deputy, were framed on the recog-
nition of the hitherto complete separation of the
two peoples; he proposed the fusion of the two by
the establishment of the rights of intermarriage
and commerce; just as among the liomans the jis
 constant and the jis commerci constituted the
essence of civitas. The sons of Jacob, bent upon
revenge, availed themselves of the eagerness which
Shechem showed to effect his purpose, they
demanded, as a condition of the proposed union,
the circumcision of the Shechemites: the practice
could not have been unknown to the Hivites, for
the Philennians (Het. ii. 104), and probably most
of the Canaanite tribes were circumcised. They
therefore ascended; and on the third day, when
the pain and fever resulting from the operation were
at the highest [CIRCUMCISION], Simeon and Levi,
their brothers to Dinannah, as Josephus observes (Ant.
1. 21, § 1; θέατον ἐν δημοναί), attacked them unexpectedly,
scouring all the males and plundered their
city. Jacob's remark (ver. 30) does not imply
any guiltiness on the part of his sons in this
transaction; for the brothers were regarded as the
proper guardians of their sister's honor, as is still
the case among the Bedouins; but he dreaded the
revenge of the neighboring peoples, and even of the
family of Hamor, some of whom appear to have
survived the massacre (Judg. i. 29). His scope,
which was wonderful, considering the extreme rigor
with which the laws of blood-revenge have in
all ages prevailed in the East [BLOOD, REVENGER
OF], is ascribed to the special interference of Jeho-
annah (xxxv. 5). Josephus omits all reference to the
treachery of the sons of Jacob, and explains the easy
capture of the city as occurring during the celebra-
tion of a feast (Ant. i. 21, § 2). The object for
which this narrative is introduced into the book of
Genesis probably is, partly, to explain the allusion
in Gen. xlix. 5-7, and partly to exhibit the conse-
quences of any association on the part of the
Hebrews with the heathens about them. Ewald
(Geschichte, i. 488) assumes that the historical
foundation of the narrative was furnished by an
actual fusion of the nomad Israelites with the
aborigines of Shechem, on the ground that the
dughters of the patriarchs are generally noticed
with an ethnological view; the form of the
narrative appears being only the coloring of a
late author; such a view appears to us perfectly inconsistent with the letter and the spirit of the
lest.
W. L. B.
DINHABAH 7977 "[perh. = 7911, depredation, low level, Dietr.]; Δανιαβάδις: Ποναρᾶ; Gen. xxxvi. 32; 1 Chr. i. 43), the capital city, and probably the birthplace, of Bala, son of Bear, king of Edom. Esdras (Esron, s. v.) mentions a village Damaa (Dummah, Jerome), seven miles from Areopolis, or Ar of Moab (on the road to Arnon: Jerome), and another on Mount Peror, seven miles from Edsoa (Hesbbon); but neither of these has claim to be the Dinhabah of Scripture. R. Joseph, in his Targum (on 1 Chr. i. 43, ed. Wilkins), finds a significance in the name. After identifying Baanah the son of Bear with Laban the Syrian, he adds, "And the name of his capital city was Dinhabah, for it was given (μετὰ τῆς ἐξουσίας) him as a present." With as little probability Gesenius conjectured that it might signify dominus, i. e. locus directionis, i. e. prædomin. latitudinis. The name is not uncommon among Semitic races. Ptolemy (v. 15, § 24) mentions Δανιαβαίδα in Paphnuye Syria, afterwards a bishop's see; and according to Zosimus (iii. 27) there was a Δανιαβάδ in Babylonia. (Knoch, Genesis.) The Pehitho Syriac has דאנהב. Dinhabah, probably a mistake for דניאב."

W. A. W.

* DINNER. [MEALS.]

DIONYS'SIA (Διονυσία: Βασιλικόν, "the feast of Bacchus," which was celebrated, especially in later times, with wild extravagance and licentious enthusiasm. Women, as well as men, joined in the processions (γενέα), acting the part of Meneds, crowned with ivy and bearing the thyrsus (cf. Ovid. Fast. iii. 767 ff.; Brach. ad Tha., iii. ii. 3, 2, who gives a coin of Meneada, bearing a head of Dionysus crowned with ivy); and the phallic was a principal object in the train (Herod. ii. 48, 49). Shortly before the persecution of Antiochus Epiphanes, 168 B.C., in which the Jews were compelled to go in procession to Bacchus carrying ivy (v. 2 Marc. vi. 7), the secret celebration of the Bacchanea in Italy had been revealed to the Roman senate (v. 218). The whole story was altered by the description of the excesses with which the festival was attended (Liv. xxxiv. 8 ff.), and a decree was passed forbidding its observance in Rome or Italy. This fact offers the best commentary on the conduct of Antiochus; for it is evident that rites which were felt to be incompatible with the comparative simplicity of early Roman worship must have been perniciously reviving the visions of the Hellenic age (v. Herod. iv. 79, Σαφείτα τοῦ Βασιλικοῦ ἱεροῦ, "Ελλάντων ἄνθρωπον")."

B. I. W.

DIONYSSUS THE APOPAGITE (Διονύσιος ὁ Αποπαγιτής, Acts xvii. 34), an eminent Athenian, converted to Christianity by the preaching of St. Paul. Enseh. (II. E. iii. 4) makes him, on the authority of Dionysius, bishop of Corinth, to have been first bishop of Athens (see also II. E. iv. 23). According to a later tradition given in the martyrlogies on the authority of Arius, he suffered martyrdom at Athens. On the writings which were once supposed to have had Dionysius for their author, but which are now confessed to be spurious and the production of some Neo-Platonists of the 6th century, see an elaborate discussion in Herzog's Echtheitsscheinungen: and for further legends respecting himself, seeidas, s. v., and the article in the Dictionary of Biography and Mythology.

H. A.

DIONYSSUS (Διονύσων, Διονύσιος, of uncertain derivation), also called BACCHUS (Βακχος, Βακχος, the wise god; after the time of Herodatus, was properly the god of wine. In Homer he appears simply as the "Bacchus" god (II. vi. 132), and yet as "joy to mortals" (II. xiv. 325), but in later times the most varied attributes were centred in him as the source of the luxuriant fertility of nature, and the god of civilization, gladness, and inspiration. The eastern wanderings of Dionysus are well known (Strab. xv. 7, p. 687; Diet. Beige, s. v.); but they do not seem to have left any special trace in Palestine (yet cf. Luke, de Syria, Dict. p. 886, ed. Bongek). His worship, however, was greatly modified by the incorporation of Eastern elements, and assumed the twofold form of wild orgies (Dionysia) and mystic rites. To the Jew Dionysus would necessarily appear as the embodiment of paganism in its most material shape, sanctioning the most tumultuous passions and the worst excesses. Thus Tacitus (Hist. v. 5) rejects the tradition that the Jews worshipped Bacchus (Lib. potens, cf. Phil. Quod. Conc. iv. 6), on the ground of the "entire diversity of their principles" ("en nequaquam congruentiis institutis"), though he interprets this difference to their discredit. The consciousness of the fundamental opposition of the God of Israel and Dionysus explains the punishment which Ptolemaeus Philopator inflicted on the Jews (3 Macc. ii. 23), "branding them with the ivy-leaf of Dionysus," though Dionysus may have been the patron god of the Ptolemies (Grinnell, 282). And it must have been from the same circumstance that Nicanor is said to have threatened to erect a temple of Dionysus upon the site of the Temple at Jerusalem (2 Macc. xiv. 33).

B. F. W.

DIOSCORINTHUS. [MONTHS.]

DIOTREPHES (Διοτρέφης, [love-enveloped]), a Christian mentioned in 3 John 9, as παρακρατούς in some church to which St. John had written, and which, on account of his influence, did not receive the Apostle's authority, nor the messengers whom he had sent. It is entirely uncertain what church is meant, as it is also trains was, to whom the epistle is addressed. [14:18.]

H. A.

For interesting remarks on the character of Diotrephes and his probable motives for such violent opposition to the Apostle, the reader is referred to Neander's History, ii. 617, 648 (Robinson revised tr. p. 576). See also Liihke, Distopickaer, and Busche (Lange's Biblekex., Theil xv.) on John's Third Epistle.
DISCIPLE

DISCIPLE. [Education; Schools.]

* DISCOVER is often used in the A. V. in the sense of to uncover, e. g. Deut. xxii. 30; 2 Sam. xxi. 16; Is. xxi. 8; Mic. i. 6. "The voice of the Lord discovereth the forests" (Ps. xxix. 9), that is, the thunderbolt strips the trees of their barks, branches, and leaves.

DISCUS (δίσκος), one of the exercises in the Grecian gymnasia, which Jason the high-priest introduced among the Jews in the time of Antiochus Epiphanes, and which he induced even the priests to practice (2 Macc. iv. 14). The discus was a circular plate of stone or metal, made for throwing to a distance as an exercise of strength and dexterity. It was indeed one of the principal gymnastic exercises of the Greeks, and was practiced in the heroic age. (For details and authorities, see Dict. of Gr. & Rom. Ant. s. v.)

Diseases. (Asterolher, Denk. der att. Kunst, vol. i. no. 139.)

DISEASES. [Medicine.]

DISH. (1.) ἰζά, Gesen. p. 965: see BasiN.

(2.) in pl. only. ἰζαταί, ἰζαταὶ; ὢδρισκη, ὀ ἀλαβάστροσ, ἀλβετῆς: τοῖς, lokeis. (3.) see CHARGER.

In N. T. τρυβλίων, Matt. xxvi. 23, Mark xiv. 20. In ancient Egypt, and also in Judea, guests at the table handled their food with the fingers, but spoons were used for soup or other liquid food, when required (Wilkinson, Anc. Egypt. i. 181, 2d ed.). The same is the case in modern Egypt. Each person breaks off a small piece of bread, dips it in the dish, and then conveys it to his mouth, together with a small portion of the meat or other contents of the dish. To pick out a delicate morsel and hand it to a friend is esteemed a compliment, and to refuse such an offering is contrary to good manners. Judas dipping his hand in the same dish with our Lord was showing especial friendliness and intimacy. Τρυβλίον is used in L. X. X. for ἰζά; sometimes in A. V. "charger" (Ex. xxv. 29; Num. iv. 7, vii. 13, 19). This is also rendered κεραυς or half sextarius, i. e. probably a cup or basin rather than a dish. Τρυβλίον is in Vulg.

DISHAN (דְּשָׁן [antype]: [in Gen.], Pi-

σαν; [Alex. Pseus.]: in 1 Chr., Rom. Δίσσαι; ver. 38, Vat. omits, Alex. Pseus.; ver. 42, Vat. Alex. Δίσσαι:] DISON, the youngest son of Seir the Horite (Gen. xxxvi. 21, 28, 30; 1 Chr. i. 38, 42).

W. L. B.

DISHON (דִּשְׁנָה [antype]: Δισαν: Di-

son, 1. The fifth son of Seir (Gen. xxxvi. 21, 26, 30; 1 Chr. i. 38).

2. [in 1 Chr., Δίσσαι.] The son of Anah and grandson of Seir (Gen. xxxvi. 25; 1 Chr. i. 41). Dishon and Dishan belong to the same root, which may possibly reappear in the name Dedh noticed by Abulafia (Hist. Anteisl. p. 196). The geographical position of the tribes descended from these patriarchs is uncertain. Knobel (Cont. in loc.) places them to E. S. E. of the Gulf of Akaba, on the ground that the names of the sons of Dishon, Esban, and Hemdan may be identified with Usboun and Hetnimy, branches of the tribe of Oumran. Such identifications must be received with caution, as similar names are found in other parts of Arabia—Himote, for instance, near Tayf, and again Hamdoun, which bears a still closer resemblance to the original name, near Sawa (Burehhardt's Arabien, i. 156, ii. 376). W. L. B.

* DISSOLVE has once (Dan. v. 16) the an-

tipoded sense of to solve," or "explain." Belshazzar says to Daniel: "Art thou able to explain this," &c. (A. V. v. 16) converses the LXX. the idea of a "dispersion" (μετακίνησιν), the word being used of a "colony" (ἀκαλωσία), while the term "dispersion" (διασπορά, first in Deut. xxvii. 25, ἰζά, cf. Jer. xxxiv. 17), which finally prevailed, seemed to imply that the people that were scattered to the utmost parts of heaven (Deut. xxvii. 4), "in bondage among the Gentiles" (2 Macc. i. 27), and shut out from the full privileges of the chosen race (John vii. 35), should yet be as the seed sown for a future harvest (cf. Is. xlix. 6 Heb.) in the strange lands where they found a temporary resting-place (1 Pet. i. 1, παρεπιδήμων διασποράς). The schism which had divided the first kingdom was forgotten in the results of the general calamity. The dispersion was not limited to the exiles of Judah, but included "the twelve tribes" (Jahn. i. 1, ταῖς διδήκεις φυ-

λαίς ταῖς εἰς τὸν ναό διασποράς), which expressed the completeness of the whole Jewish nation (Acts xxvii. 7, τὸ διδήκειον φυλάς).

The Dispersion, as a distinct element influencing the entire character of the Jews, dates from the
DISPERSION, JEWS OF THE

Babylonian exile. Uncertain legends point to earlier settlements in Arabia, Ethiopia, and Abyssinia; but even if these settlements were made, they were isolated and casual, while the Dispersion, of which Babylon was the acknowledged centre, was the outcome of Jewish missionary and cultural achievement bordering on the commonwealth of nations. Apart from the necessary influence which Jewish communities bound by common laws, ennobled by the possession of the same truths, and animated by kindred hopes, must have exercised on the nations among whom they were scattered, the difficulties which set aside the literal observance of the Mosaic ritual led to a wider view of the scope of the law, and a stronger sense of its spiritual significance. Gradually and inwardly it infused both in the Gentiles and on the people of Israel, the Dispersion appears to have been the clearest providential preparation for the spread of Christianity.

But while the fact of a recognized Dispersion must have weakened the local and ceremonial influences which were essential to the first training of the people of God, the Dispersion was still bound together in itself and to its mother country by religious ties. The Temple was the acknowledged centre of Judaism, and the faithful Jew everywhere contributed the half-shekels towards its maintenance (28). The tribute was indeed the simplest and most striking outward proof of the religious unity of the nation. Treasuries were established to receive the payments of different districts (Joseph. Ant. xiii. 9, 1; cf. Ant. xvi. 6, § 5), and the collected sums were forwarded to Jerusalem, as in later times the Mohammedan offerings were sent to Mecca (Jast. Gesch. d. Judenl. i. 347 n.; Vie. pro Flacco, 28).

At the beginning of the Christian era the Dispersion was divided into three great sections: the Babylonian, the Syrian, the Egyptian. Precedence was yielded to the first. The jealousy which had originally existed between the poor who returned to Palestine and their wealthier countrymen at Babylon had passed away, and Gamaliel wrote "to the sons of the Dispersion in Babylonia, and to our brethren in Meia . . . and to all the Dispersion of Israel" (Frankel, Mowodscrift, 1853, p. 413). From Babylon the Jews spread throughout Persia, Media, and Parthia; but the settlements in China belong to a modern date (Frankel, l. c. p. 463). The few details of their history which have been preserved bear witness to their prosperity and influence (Joseph. Ant. xiii. 2, § 2 f., xviii. 9). No schools of learning are noticed, but Hillel the Elder and Nahum the Mele are mentioned as coming from Babylon to Jerusalem (Frankel).

The Greek conquests in Asia extended the limits of the Dispersion. Seleucus Nicator transplanted large bodies of Jewish colonists from Babylonia to the capitals of his western provinces. His policy was followed by his successor, Antiochus the Great; and the persecutions of Antiochus Epiphanes only served to push forward the Jewish emigration to the remoter districts of his empire. In Armenia the Jews arrived at the greatest dignity; and Nisibis was no less a centre of colonists (Frankel, iii. 454-456). The Jews of Capadocia (1 Pet. i. 1) are casually mentioned in the Mishna; and a prince and princess of Adiabene adopted the Jewish faith only 30 years before the destruction of the Temple (Joseph. Ant. xx. 2). Large settlements of Jews were established in Cyprus, in the islands of the Egean (c. Deob: Joseph. Ant. xiv. 19). The wealthier and more warlike Syrian Jews, supported by Mithras, Pergamus, Halicarneassus, Sardeis (Joseph. Ant. l. c.). The Romans confirmed to them the privileges which they had obtained from the Syrian kings; and though they were exposed to sudden outbursts of popular violence (Joseph. Ant. xviii. 9; B. J. vii. 3), the Jews of the Syrian provinces gradually formed a closer connection with their new homes, and together with the Greek language adopted in many respects Greek ideas. (Hellenists.)

This Hellenizing tendency, however, found its most free development at Alexandria [ALEXANDRIAN]. The Jewish settlements established there by Alexander and Ptolemy I. became the source of the African Dispersion, which spread over the north coast of Africa, and perhaps inland to Abyssinia (the Falasha). At Cyrene (Joseph. Ant. xiv. 7, § 2; Jason) and Berenice (Tripoli) the Jewish in habitants formed a considerable portion of the population, and an inscription lately discovered at the latter place (Frankel, p. 422) speaks of the justice and clemency which they received from a Roman governor (cf. Joseph. Ant. xvi. 6, § 5). The African Dispersion, like all other Jews, preserved their veneration for the "holy city" (Phil. Leg. ad Catam, § 36; in Flacc., c. 7), and recognized the universal claims of the Temple by the annual tribute (Joseph. l. c.). But the distinction in language led to wider differences, which were accentuated in Babylon by the currency of an Aramaic dialect. The Scriptures were no longer read on the Sabbath (Frankel, p. 429: Vorstellung, p. 52 ff.), and no fire-signals conveyed the dates of the new moons to Egypt (cf. Frankel, p. 419, n.). Still the national spirit of the African Jews was not destroyed. After the destruction of the Temple the Zealots found a reception in Cyrene (Joseph. B. J. vii. 11); and towards the close of the reign of Trajan (A.D. 115), the Jewish population in Africa rose with terrible ferocity (Dion, xlviii. 32). The insurrection was put down by a war of extermination (Euseb. H. E. iv. 2); and the remnant who escaped established themselves on the opposite coast of Europe, as the beginning of a new Dispersion.

The Jewish settlements in Rome were consequent on the occupation of Jerusalem by Pompey, B. C. 63. The captives and emigrants whom he brought with him were located in the trans-Tiberine quarter, and by degrees rose in station and importance (Phil. Leg. ad Catam, § 24 ff.). They were favored by Augustus and Tiberius after the fall of Sejanus (Phil. l. c.); and a Jewish school was founded at Rome (Frankel, p. 439). In the reign of Claudius [ANGERST] the Jews became objects of suspicion from their immense numbers (Dion. iv. 6); and the internal disputes consequent, perhaps, upon the preaching of Christianity, led to their banishment from the city (Suet. Claud. 25: "Judaos impudicis Christo assidue tumultuantes Romam expulit." Acts xvii. 2). This expulsion, if general, can only have been temporary, for in a few years the Jews at Rome were numerous (Acts xvii. 15 ff.). and continued to be sufficiently numerous to attract the attention of the satirists [Mart. Ep. xvi. 93; Juv. Sat. iii. 114]. The influence of the Dispersion on the rapid pro-
DIVINATION

72 B, where the μαθητής is carefully distinguished from the προφήτης. But even in the most passionate and irresistible pretensions of divination we have none of these unnatural distortions (Nestin., viii. 5; Ps. xxxix. 3; Jer. xx. 9), although, as we shall see, they were characteristic of pretenders to the gift.

The other kind of divination was artificial (τεχνη), and probably originated in an honest conviction that external nature sympathized with and frequently indicated the condition and prospects of mankind; a conviction not in itself ridiculous, and fostered by the accidental synchronism of natural phenomena with human catastrophes (Thuc. iii. 89; Joseph. B. J. vi. 5, § 3; Foxe's Martyrs, iii. 406, &c.). When once this feeling was established the supposed manifestations were infinitely multiplied, and hence the numberless forms of imposture or ignorance called kapnomancy, pyromancy, arithmomania, libanomancy, botanomancy, kephalomancy, &c., of which there are abundant accounts in Cic. Div. ii. 30; Curtius, xvi. 4; Dule, de Orig. lxxvii.; Fabricius, Biblioth. Ant. pp. 409-426; Carpzov, App. Crit. 540-549; Potter's Antiqu. i. ch. viii. 34. Indeed there was scarcely any possible event or appearance which was not pressed into the service of augury, and it may be said of the ancient Greeks and Romans, as of the modern New Zealanders, that “after uttering their karakias (or charms) the whirling of the wind, the moving of trees, the flash of lightning, the peal of thunder, the flying of a bird, even the buzz of an insect would be regarded as an answer” (Taylor's New Zealand, p. 74; Bowring's Siou, i. 155 ff.).

A system commenced in fanaticism ended in deceit. Hence Cato's famous saying that it was strange how two augurs could meet without laughing in each other’s face. But the supposed knowledge became in all nations an engine of political power, and hence interest was enlisted in its support (Cic. de Legg. ii. 12; Liv. vi. 27; Soph. Ant. 1055; His. iii. 11). It fell into the hands of a priestly caste (Gen. xil. 8; Is. xliii. 13; Jer. v. 31; Dan. ii. 2), who in all nations made it subservient to their own purposes. Thus in Persia, Chardin says that the astrologers would make even the Shah rise at midnight and travel in the worst weather in obedience to their suggestions.

The invention of divination is ascribed to Pro- methaneus (Esch. Pr. Vinct. 492), to the Thracians and Etruscans, especially sages (Cic. de Div. i. 16; and Giel. Alex. Stren. i. 326, where there is a great deal more on the subject), or (as by the Fathers generally) to the Devil (Firm. Maternus de Errore, Proem.; Lactant. ii. 16; Minuc. Felix, Oct. 27). In the same way Zoroaster ascribes all magic to Ahriman (Nork, Brom. et Rob. p. 97). Similar opinions have prevailed in modern times (Sir Thomas Browne, Vulp. Err. i. xi.).

Many forms of divination are mentioned in Scripture, and the subject is so frequently alluded to that it deserves careful examination. We shall proceed to give a brief analysis of its main aspects as presented in the sacred writers, following as fat as possible the order of the books in which the professors of the art are spoken of. They are first mentioned as a prominent body in the Egyptian court, Gen. xlii. 8. (1) μακρινὴς (Έχρυήτας; Hesych. η τερί ἤρελθαν καὶ διασπερμῆς ἐξαιρόμενος: Αχύρ κυριακτάς). They were a class of Egyptian priests, eminent for learning...

written their... in science (Dahn, Arch. Bild, § 402).

If their divination was connected with drawn figures, it is

parallelled by the Persian Ramaut (Cabnet); the modern

Egyptian Zermeh, a table of letters ascribed to Idriss or Enoch

(Lane, I. 354), the renowned Chinese I-yang, lines discovered by

Fohh on the back of a tortoise, which explain everything, and

on which 1490 learned commentaries have been

written (Huc’s China, i. 123 f); and the Jamass or marks on paper, of Japan (Kempfier’s Hist. ch. xv).

2. ἱερογλυφία (σαφεσταλ, Ex. vii. 11; Suid. οὕτως ἀληγο πάντας τοῦ πενταλόμοσου: conjectures). Possibly these, as well as their predecessors, were merely a learned class, invested by vulgar superstition with hidden power. Daniel was made head of the college by Xeluchandezzar (Dan. v. 11).

3. ἱερογλύφοι (εἰσαύδοι, Ex. vii. 11, ἱερογλύφοι, 'vintagers'; the variety of words used in the versions to render these names, shows how vague was the meaning attached to them). The original meaning of ἱερογλύφοι is to matter; and in Ex. vii. 11, the word seems to denote mere jugglers, of the class to which belonged James and Jambres (2 Tim. iii. 8). They had the powers of the wonders which befall the heart of Pharaoh, whether by mechanical or chemical means, or by mere legerdemain, or by denunciational assistance (as supposed by the Fathers, and Joseph, Ant. ii. 5), it is idle to conjecture. Michæels, adopting an Arabic derivation of ἱερογλύφοι), explains them to be "astrologers," such as in ancient times were supposed (from their power to foretell eclipses, &c.) to be able to control the sun and moon by spells (Virg., Ec. iv. 489; Ov. Met. xii. 263). "While the laboring moon eclipses at their charmus," Milton. "A witch, and one so strong she could control the moon," Shakespeare, The Tempest.

Women were supposed to be peculiarly addicted to these arts (Ex. xxi. 28), which were forbidden to the Jews on their ecstatic grounds, independently of their liability to abuse.

4. ἱερογλύφον, Lev. xix. 31, xx. 6 (γραφοσταλ, συμβεβελατός, from ἱερογλύφος, to know; cf. wissen. Munn, Kuge Fron, as saibone, from δοξα): those that could by whatever means reveal the future. The Kabbis derive this word from a certain beast Jaddeth, in shape like a man (καταθέσθησαν), the bones of which the diviner held in his teeth (Maimon, de Idol. vi. 3; Heugel, de Decr. iii. 316; Helmin. Disput. Mag. iv. 2; Godlyns Hist. &c. Ant. i. 10). The Greek diviners ate at καταθέσθησιν ὁ ὀμος μαντικῶν (Porphyr. de Abstain. ii. i). For other lone divinations see Kalpinus. China, p. 65, and Fennant’s Scotland, p. 88 (in Pinkerton).

5. ἱερογλύφος, Lev. xx. 6; Is. viii. 19, xix. 3. ἱερογράμμων, νεκρομάντες: qui Pythones vocatur, vestleri (Plato, Phaedo, 294 f). The word properly means "spirits of the dead," and then by an easy metonymy those who consulted them (Plato, Laws, xxii. 10). θεός: θεοὶ ἱερογλύφοι: of ἱερογλύφοι to νεκρολόγιον, quare non mortuo veritatem. But Shuckford, who denies that the Jews in early ages believed in spirits, makes it mean "consulters of dead idols," Connect. ii. 395 f). They are also called Pythones; ἱεροστράται νουν Πίθαγος καλουμένοι (Plut. de Def. Or., 414; Cic. de Div. i. 19). Hence the πειρεὺς Πίθαγος, Acts xxi. 16. These ventriloquists "peeped and muttered" (cf. τρίγος, II. xiii. 101; "speak and glibber," Shakespeare, Jul. Czs.) from the earth to imitate the voice of the revealing "familiar" (Is. xxi. 9, &c.; 1 Sam. xxvii. 11. Lev. xx. 27, cf. ἱερογλύφος, Soph. Frgm.), θεοὶ properly means a bottle (Job xxii. 19), and was applied to the magician, because he was supposed to be infatuated by the spirit (ἱερομαντία), like the ancient θεοἱ (εἰς ἀλλοτρίας γαρτεράς έδόσει, Ar. Vesp. 1017, "a man of spirit per verenda nature excipiaet."). See, in Schol. Ph.). Of this class was the witch of Endor (Joseph. Ant. vii. 14, § 2), in whose case intended imposture may have been accompanied with necromancy (Eccles. xxv. 20). On this wide subject see Chrysost. ad 1 Cor. xii. Tert. adv. Marc, iv. 25, de Anim, 57; Ang. de Doctr. Christ, § 33; Cic. Tusc. Disp. i. 16, and the commentaries on Enum.; Crit. Sicri, vii. 331; Winer, s. v. Testamentiés; Le Moune, Fiar. Sacr. p. 932 f; Selden, de Dies Supr. i. 2, and above all Battcher, de Infirigis, pp. 101-121, where the research displayed is marvellous. Those who sought inspiration, either from the demons or the spirits of the dead, haunted tombs and caverns (Is. xxv. 4), and invited the unclean communications by voluntary fasting (Maimon. de Idol. iv. 15; Light- foot, Hor. Heb, ad Matt. x. 11). That the supposed ψευδομαντιά was often affected by ventriloquism and illusion is certain; for a specimen of this even in modern times see the Life of Benedetto Cellini.

6. ἱερογλύφος (ζωοτευνιών μαντικός: qui avicola scieret); Dio. Deut. xiii. 10. (As the most complete list of diviners is given in this passage, we shall follow the order of the kinds there enumerated.) This word involves the notion of "cutting," and therefore may be connected with the Chald. (from דע to cut), Dan. ii. 27., iv. 7, &c., and he taken to mean astrologers, magi, genethliaci, &c. (Dict. of Ant. art. Astrolabium; Juv. vii. 582 f; Bihl. Sic., i. 30; Winer, s. v. Magier, Sterne). Others refer it to the καλυμπατίας (Schol. ad Eur. Hipp. 1677), since the use of lots was very familiar to the Jews (Cicatera on Lots, ad init.; but it required no art to explain their use, for they were regarded as directly under God’s control (Num. xxvi. 55; Esth. iii. 7; Prov. xxi. 33, xviii. 18). Both lots and diigmomas miaiotos (odd and even) were used in distributing the duties of the Temple (Olah, Lib. Rab. n. 7, de Gogus micaudos).

7. μαντική, Mic. x. 2; 2 K. xxi. 6; obropon solluq, A. V. "an observer of times;" καλυμπατίας always in LXX, except in Lev. xix. 28, where probably they followed a different reading, from ἱερογλύφος, a bird, ἄκροφυτής): δὲ τοῖς καλουμένοις ποταμοχόρων, Is. (ger. in loco)

Healey. It is derived from ἱγψ, to vover, and may mean generally “using hidden arts” (Is. ii. 5; Jer. xxvii. 9). If the LXX. understand it correctly, it refers to that ἄγανν ἀπαρτηρίας (Stuid.), which was common among the Jews, and which they called Rith Kol; of which remarkable instances are found in Gen. xxxv. 13, ed. Sabine, i. 14; I K. xx. 33. After the extinction of the spirit of prophecy it was considered by the Jews as a sort of substitute for the loss. For a curious dissertation on it see Lightfoot, ad Matt. iii. 13. A belief in the significance of chance words was very prevalent among the Egyptians (Clem. Alex. Stromat. i. 304; Plint. de Is. 14), and the accidental sight of the engineer was sufficient to prevent even Annasius from removing the moonlight shrine to Soli (Wilkinson, Anti. Egypt. iv. 144). The universality of the belief among the ancients is known to every scholar (Cic. de Div. i.; Herod. ii. 90; Virg., Æn. vii. 116, &c.). From the general theory of the possibility of such omens sprang the use of the Sortes Biiicace, &c. (Nepcha. Greg. viii. Aug. Ep. 119; Prideaux, Connect. ii. 376, &c.; Cardan, de Varietate, p. 1040).

If ἔγνως is derived from ἔγνα, it will mean “one who fascinates the eyes,” as in the Syr. Vers. (cf. Vitringa, Comment. ad Is. ii. 6). A belief in the ὀφθαλμος βάκκαρος (ἔγάνα) was universal, and is often alluded to in Scripture (Deut. xxiii. 6; Matt. xx. 13; Tob. iv. 7, μη ψυχωτικόν σου ὁ ὀφθαλμός, 1 Sam. xviii. 9, “Saul eyed David”). The well-known passages of Phiny and the ancients on the subject are collected in Potter’s Anti. i. 383 ff.

Others again make the ἔγνως (Is. ii. 6, &c.), “soothsayers,” who predicted “times” as in A. V., from the observation of the clouds (Ahen Ezra on Lev. xix. 25) and other ὀφθαλμαι, as lightnings, comets, meteors, &c. (Jer. x. 2), like the Etruscan Fulguratores (Cic. Div. i. 18; Plin. ii. 43, 53; Plut. de Superst.; Hom. Od. v. 102; Virg. Ec. i. 16); Humboldt’s Cosmog. ii. 135, ed. Sabine. Possibly the position of the diviner in making these observations originated the Jewish names for East and West, namely, front and back (Godwyn, iv. 10, but Carzpop disputes the assertion, Ap. Crit. p. 541). The practice naturally led to the tabulation of certain days as lucky or unlucky (Job iii. 5, “monthly prognosticators,” Is. xxvii. 13, ἡμέρας παρατηρεῖσθαι, Gal. iv. 10), just as the Greeks and Romans regarded some days as καλός, others as ἄτρι (Hes. Omp. et D. 770; Suet. Aug. 92, &c.). If we have space, every one of the superstitious allusions to might be paralleled in modern times.

In Judg. ix. 37, the expression “erebith in improperly plain,” A. V. of Meonemnin (enchantments) “properly enchanters,” or “diviners” refers not so much to the general sacredness of great trees (Hom. Od. xiv. 328, ἄκροβα θεῖας προκεισθαι, Virg. Georg.), as to the fact that (probably) here Jaceba had buried his amulets (Gen. xxivv. 4; Stauble, S. v. P. p. 142).

8. ἔγνως (ομοίως ἐγνως): observeante autoria; Ps. lviii. 5; 2 K. xvii. 17, xxii. 6, &c.; A. V. “enchanters”; ophiomaniacs (Bochart, Hieroz. ii. 383), from ἔγνως, to kiss; people who, like the ancient Peysi (Plin. H. N. vii. 2, xvii. 4) and Marmardie (Sil. Itali. iii. 304),

were supposed to render serpents innocuous and obedient (Ex. vii. 9; Jer. xvii. 17; Eccl. x. 11), chiefly by the power of music (Nicand. Theor. 102; Luc. ix. 841; Sil. Itl. 8, 492; Xen. vii. 753; Niebuhr’s Travels, i. 189); but also no doubt by the possession of some genuine and often hereditary secret (Lane, Mod. Egypt. ii. 106 ff.; Arnob. adv. Geat. ii. 32). They had a similar power over scorpions (Franciën’s Tour to Persia), the whole subject is illustrated by Bochart (Hieroz. tom. ii. 6, de As. ride usanu).

ἔγνως has, however, a general meaning of “learning by experience,” like “to augur,” in English, Gen. xxxi. 27; either because ophiomancy (Ter. Phorm. iv. 4, 26) was common, or because the word meant (as the Rabbis say) an observation of ἄνδρια σιμβόλα, &c. (Jer. x. 2; Plin. xxvii. 5, 7). Some understand it of divination ex peilvulx (Plin. H. N. XXX. 2; Poli SYN. AD DEUT. XVIII. 10).

9. ἔγνως (φαρμακις): melifici, venifici; A. V. “wizards”); from the Arabic, “to reveal,” meaning the old astrologers proper (Chaldæans), but generally all the professors of occult medicines of discovering the unknown. It might no doubt involve the use of divining-rods for the purpose of Aquaelian, &c., dependent on physical laws only partially understood (Mayo’s Pov. Superstitions).

10. ἔγνως (ἐκβάλεται τὸ σωμήν: inventores), from ἔγνως, to bind (cf. bannum = binden, Gesen. s. v.). [See Deut. xviii. 11] Those who acquired power by uttering spells, &c. (καθαρί-βως; and ἔγνως καθαρί-βως, Esch. Eum. 296; “So the spell now works around thee, and the clankless clavín hath bound thee.”)—Minipled, i. 1.)

In Ouklos it is rendered ἔγνως, a mutterer; and this would connect these “enchancers” with the NEkromanteis (No. 5, Is. xxiv. 4). 11. Belomants. Alluded to in Ex. xxi. 21, where Nêlchadzaunnez, at the parting of the ways, uses divination to decide whether he shall proceed against Jerusalem or Rabbah, and ἔγνως ἠσθαι (τού ἀναβαίναντα ἄδειον, LXX.); but it should be rather ἔγνως ἄδειον, or as Vulg. commissus suavitatis; the other explanations are untenable. Jerome (ad loc.) explains it of mingling in a quiver arrows on which were inscribed the names of various cities, that city being attacked the name of which was drawn out (Paul. Connect. i. 89). Eustis says “he threw up a bundle of arrows to see which way they would light, and falling on the right hand he marched towards Jerusalem.” The A. V. “made his arrows bright,” seems to allude to a sort of σθονοματικαί, —incorrectly. The arrows used were particularized and 7 such were kept at Mecca. Pietro della Valle saw a divination derived from the changes of 8 arrows at Aleppo, and attributed it to the delphic agency. We read of a somewhat similar custom in use among the ancient Teutons (Pae. Germ. x.), and among the Alum (Am. Marcelli, xxvii.) also among the modern Egyptians (Lane, ii. 111). “But of another kind was that practiced by Flishia, 2 K. xii. 15” (Sir Thomas Browne, Vulg. Ercos., v. 23, 7). 12. Closely connected with this was ἔγνως, —

DIVORCE

Levite, not only to secure the formal correctness of the instrument, but because the art of writing was then generally unknown. This would bring the matter under the cognizance of legal authority, and tend to check the rash exercise of the right by the husband. Traditional opinion and prescriptive practice would probably fix the standard of the ἀναστολή, and doubtless with the lax general morality which marks the decline of the Jewish polity, that standard would be lowered (Mal. ii. 14–16). Thus the Gennar, Babylon, Gittin, 9 (ap. Selden, de Ux. Heb. iii. 17) allows divorce for a wife's spinning in public, or going out with head uncovered or clothes so torn as not properly to conceal her Person or Dress. But the absence of any case in point in the period which lay nearest to the lawgiver himself, or in any save a much more recent one, makes the whole question one of great uncertainty. The case of Phaltri and Michal is not in point, being merely an example of one arbitrary act redressed by another (1 Sam. xxv. 44; comp. 2 Sam. iii. 14–16). Selden, quoting (de Ux. Heb. iii. 19) Zach. Prof. p. 8 b, speaks of an alleged custom of the husband, when going to war, giving the wife the libellus divorciis; but the authority is of slight value, and the fact improbable. It is contrary to all known oriental usage to suppose that the right of quitting their husband and choosing another was allowed to women (Joseph. Ant. xvii. 7, § 10). Salome is noted (ibid.) as the first example of it—one, no doubt, derived from the growing prevalence of blemish leprosy. Hence also, probably, the caution given in 1 Cor. vii. 10. Winer is surely mistaken (s. v. Ehescheidung) in supposing that a man might take back as wife her whom he had had divorced, except in the cases when her second husband had died or had divorced her. Such resumption is contemplated by the lawgiver as only possible in those two cases, and therefore in them only expressly forbidden (Jer. iii. 1).

For the view taken among later Jews on this subject, see Joseph. Ant. iv. 8, § 23, xvi. 7, § 3; 17 v. 76, a writer whose practice seems to have been in accordance with the views of Hillel. On the general subject, Buxtorf, de Sponsal., et Divort., pp. 82–85; Selden, Ux. Heb. iii. 17 ff.; and Michaelis, Laws of Moses, ii. 336, may be consulted.

H. H.

The passages treating of divorce are found in Matt. v. 31, 32, xix. 3–9, Mark x. 3–12, Luke xvi. 18, 1 Cor. vi. 10–16, and perhaps Rom. vii. 2, 3, which however has little or no bearing on our subject. If our Lord, as is probable, spoke of divorce more than once, the passage in Luke harmonizes with that in Matt. v. — as the comparison of Matt. v. 18 with Luke xvi. 17 shows,— and the passage in Mark with that in Matt. xix.

In the Gospels only ἀπολύω, in 1 Cor. vii. χωρίωμα and ἀφορίσμα separate marriage parties. All three are used of an act proceeding from either sex, but the second, and probably the third, is used in a wider sense than the first. In classical Greek ἀποστίπωμα said of the husband's act, and ἀπολύεσθαι chiefly but not exclusively of the husband's act, are the terms in best use, but ἀπολύω and perhaps other words are to be met with.

Our Lord's declarations may be summed up under the following heads. (1.) The practice allowed by the Mosaic law of permitting any wife without crime on her part, and on the ground of
some personal dislike or disgust, is opposed to the original, divine idea of marriage, according to which a man and his wife are joined together by God to be one flesh, and are not to be put asunder by man. Therefore, if a man divorces his wife by a bill of divorce without her crime, causes her to commit adultery by placing it within her power to marry another man (Matt. v. 32). Thus even the party who suffers the divorce is criminal in maintaining it. (3) A man or a woman who procures a divorce, except on account of the adultery of the other party, and marries another person, commits adultery. (4) The same crime rests on one who contracts marriage with the divorced person. In explanation of these ordinances of Christ, we remark first, that the passages in Matthew alone contain qualifications of the absolute unlawfulness of divorce, — παρεκτὸς λόγων πορειας, and μη ἐπὶ πορείας,—where a more general word πορεία is used for a more special one, μορφών, and with it can, a προειρήκε, include certain rare, more hallowed, sexual crimes. A similar qualification must doubtless be understood in Mark x., Luke xvi., and 1 Cor. vii. 10, as being too obvious to be expressed, since the act referred to in Matthew was by the law punishable with death, and actually destroyed the first union by a new union (1 Cor. vi. 16). Scarcely, Christ's words go no further than to say that a man who marries a divorced woman commits adultery; but the opposite case, that of a woman marrying a divorced man, is evidently implied. Thirdly, it may excite surprise that, when a wife had no power of legal repudiation, Mark should speak of a woman putting away her husband. But Salome, Herod's sister, did this half a century before our Lord's ministry began, and doubtless without formal divorce women often forsook their husbands. The case then needed to be provided for. Fourthly, with "who is divorced" in Matt. v. 32, παρεκτὸς λόγων πορειας is not to be understood, and consequently marriage with a woman divorced on account of adultery is not expressly noticed. Such a case under the law could not occur, as such a person would suffer death. (Comp. Meyer in loc.)

In 1 Cor. vii. two cases are contemplated by Paul. The first, where both the parties are believers (v. 9, 10, 11), is a case for which our Lord had already provided, and in regard to which the Apostle constantly applies the words of Christ, such as we find in the Gospels. Neither husband nor wife is to separate from the other. It however the wife — for some reason short of her husband's crime, we must suppose — should be separated from him, she is to remain unmarried or seek recoiniliation to him, no third step being allowable. And the same rule must hold good if the husband should separate himself from the wife. Thus the Apostle everviews of a separation which is not divorce with liberty of remarriage. In the other case (v. 12-16), one of the parties is a heathen — a case for which Christ had made no provision. Here separation must proceed from the heathen party, the Christian party must be passive. The Christian party must not regard such a union with a heathen as a sin, and therefore seek to dissolve it, for the marriage relation is more holiness by the faith of the believing, than profaned by the unbelief of the heathen party, as is evident from the fact that the children are holy. But if the heathen party withdraw from such a union, let him not be hindered from so doing. A believer in such circumstances is not constrained to endeavor to keep up the union. For it might involve endless discord, whereas God's call to believers contemplated a state of peace. Nor is the probability of their having a child a matter against the other's will, should feel an urgency to keep up the union in the hope of such an event (ver. 16), to which another turn is generally given.

Here the important question arises, whether the Apostle's words allow the Christian, thus separated from a heathen, to marry again. The Catholic Church, although disliking divorce, gives in this special case an affirmative answer; many Protestants are on the same side, and by this analogy protect remarriage in cases of willful desertion. On the interpretation of the passage we remark first, that χαρίσαμαι, being used in ver. 11 to denote a separation without remarriage, and possibly temporary, settles nothing. Secondly, διαλείπεις is not decisive, since the extent and nature of the constraint are not clearly specified (comp. Meyer in loc.). The meaning may be this: that the believing party can regard the heathen partner's act as final, and so need not feel constrained to seek to live with or even to be reconciled to him, while yet the Apostle in such a case would disapprove of remarriage. This indeed is all that can be inferred from the next words, "God has called us in peace." Therefore you need not feel bound to live with one whose difference of religion or disaffection may produce continual pain. "For what hast thou, O wife, whether thou shalt save thy husband?" etc., i. e., the possibility of something so desirable is not enough to constrain you to keep his society. Thus there is no trace of the thought of remarriage in the context. Meyer, Be Wette, Neander, Stanley on this passage, and Theileck on the Sermon on the Mount, unite in the opinion that the words of the Apostle do not necessarily imply remarriage. And yet, on the other hand, there is some ground for the opinion that Paul contemplated the liberty of marrying again. For otherwise there is not enough of difference between the Apostle's two cases. In the first, the wife is to remain unmarried or be reconciled to her husband. In the second, she is to remain unmarried — according to the supposition — without seeking to be reconciled. Is this enough to constitute a new case, or would the Apostle, in such a case an affirmative answer; many Protestants the heathen party, the Christian party must be passive. The Christian party must not regard such a union with a heathen as a sin, and therefore seek to dissolve it, for the marriage relation is more holiness by the faith of the believing, than profaned by the unbelief of the heathen party, as is evident from the fact that the children are holy. But if the heathen party withdraw from such a union, let him not be hindered from so doing. A believer in such circumstances is not constrained to endeavor to keep up the union. For it might involve endless discord, whereas God's call to believers contemplated a state of peace. Nor is the probability of their having a child a matter against the other's will, should feel an urgency to keep up the union in the hope of such an event (ver. 16), to which another turn is generally given.

Here the important question arises, whether the Apostle's words allow the Christian, thus separated from a heathen, to marry again. The Catholic Church, although disliking divorce, gives in this special case an affirmative answer; many Protestants are on the same side, and by this analogy protect remarriage in cases of willful desertion. On the interpretation of the passage we remark first, that χαρίσαμαι, being used in ver. 11 to denote a separation without remarriage, and possibly temporary, settles nothing. Secondly, διαλείπεις is not decisive, since the extent and nature of the constraint are not clearly specified (comp. Meyer in loc.). The meaning may be this: that the believing party can regard the heathen partner's act as final, and so need not feel constrained to seek to live with or even to be reconciled to him, while yet the Apostle in such a case would disapprove of remarriage. This indeed is all that can be inferred from the next words, "God has called us in peace." Therefore you need not feel bound to live with one whose difference of religion or disaffection may produce continual pain. "For what hast thou, O wife, whether thou shalt save thy husband?" etc., i. e., the possibility of something so desirable is not enough to constrain you to keep his society. Thus there is no trace of the thought of remarriage in the context. Meyer, Be Wette, Neander, Stanley on this passage, and Theileck on the Sermon on the Mount, unite in the opinion that the words of the Apostle do not necessarily imply remarriage. And yet, on the other hand, there is some ground for the opinion that Paul contemplated the liberty of marrying again. For otherwise there is not enough of difference between the Apostle's two cases. In the first, the wife is to remain unmarried or be reconciled to her husband. In the second, she is to remain unmarried — according to the supposition — without seeking to be reconciled. Is this enough to constitute a new case, or would the Apostle, in such a case an affirmative answer; many Protestants the heathen party, the Christian party must be passive. The Christian party must not regard such a union with a heathen as a sin, and therefore seek to dissolve it, for the marriage relation is more holiness by the faith of the believing, than profaned by the unbelief of the heathen party, as is evident from the fact that the children are holy. But if the heathen party withdraw from such a union, let him not be hindered from so doing. A
announcing the office of elder, was a protest in behalf of the sanctity of marriage.

Our Lord, who laid the correction of one enormous practical evil before his eyes, has not noticed many questions concerning marriage, as for instance certain disqualifications which would render it void ab initio, but has left these to the practical wisdom of the Christian Church and the Christian State. (1 Thess. 4:3-5, NIV)

A.

DIZAHAB (דיזאהב; Karaypírē: abi æuri est pluviamus), a place in the Arabian Desert, mentioned Deut. i. 1, as limiting the position of the spot in which Moses is there represented as addressing the Israelites. It is by Robinson (l. c. 147, ii. 187) noted identified with Dodbah, a cape on the W. shore of the Gulf of Arabia about two-thirds down its length; see further under Wilderness. The name seems to mean "lord," i.e., "possessor of (Arab. ژ and and ژ = Heb. יְהִי) gold." * [or perh. יְהִי = where is] probably given from that metal having been there found. See Gesen. s. v.

H. H.

* DOCTOR (διδάσκαλος). Luke ii. 46, or "doctor of the Law" (μουσθδασκαλος), Luke v. 17; Acts v. 34. [LAWYER; Rabbi; SCHOLARS.]

A.

DOCUS a (Δοκος; [Abl. Δωκός] Joseph. Δεκαγβ: Doch: Schr. Δωκός, Dook), a "little hold" (τον ἄλγοσσαμον: munitioewmenos) near Jericho (1 Marc. xxi. 15, comp. verse 14) built by Ptol- emeus the son of Abubus, and in which he entertained and murdered his father-in-law Simon Mac- cabeus, with his two sons. By Josephus (Ant. xiii. 8, 1; B. J. i. 2, 3) it is called Dagon, and is said to have been "one of the fortresses" (ἀρισταί) above Jericho. The name still remains in the neighborhood, attached to the copious and excellent springs of Al- Dukh, which burst forth in the Wady Nour-i-nar, at the foot of the mountain of Quarinatia (Kurmantul), about 4 miles N. W. of Jericho. Above the springs are traces of ancient foundations, which may be those of Ptol- emus's castle, but more probably of that of the Templars, one of whose stations this was; it stood as late as the latter end of the 15th century, when it was visited by Brocadius. (See Rohr, i. 571, and the quotations in 572, note [and also his Phys. Geogr. p. 255].

G.

DODAI [2 syl.] (דדוא恢复正常; [Abl. דודא: Alex. דודא: Comp. Abd. with 17; MISS. דודא] Dodosi, an Ahohite who commanded the course of the 2d month (1 Chr. xxvii. 4). It is probable that he is the same as Dodo, whose name in the Cettib and in the LXX, is Dodoz, and that the words "Eleazar son of " have been omitted from the above passage in Chronicles. [DODA, 2]

DODANIM (דדנימ; פדנימ; Dothanim), a family or race descended from Javan, the son of Japheth (Gen. x. 4; 1 Chr. i. 7). Authorities vary as to the form of the name: the Hebrew text has Dodan, Dodon appears in the Syriac, Chaldean, Vulgate, Persian, and Arabic versions, and in the Targum of Onkelos; Dodaniam is supported by the LXX., the Samaritan version, and some early writers, as Eusebius and Cosmas.

The weight of authority is in favor of the former: the substitution of פדנימ in the LXX. may have arisen from familiarity with that name (comp. Ez. xxvii. 13, where it is again substituted for Dodon). Dodanim is regarded as identical with Dardani (Gesen. Thes. p. 1296), the latter, which is the original form, having been modified by the change of the liquid r into o, as in Barmilec and Baniilec, Hamilcar and Hamilcuck. Thus the Targum of Jonathan, that on Chronicles, and the Jerusalem Talmud give Dardania for Dodaniam. The Dardani were found in historical times in Ilyriam and Troy: the former district was regarded as their original seat. They were probably a semi-Pelasgic race, and are grouped with the Chittim in the genealogical table, as more closely related to them than to the other branches of the Pelasgic race (Knobel, Folkertafel, pp. 104 ff.). The similarity of the name Dodana in Epirus has led to the identification of Dodaniam with that place; but a mere local designation appears too restricted for the general tenor of Gen. x. Noah (Comm. on Gen.) identifies Dodaniam with the Daunians, who occupied the coast of Apulia: he regards the name as referring to Italy generally. The wide and unexplained difference of the names, and the comparative unimportance of the Daunians, form objections to this view.

W. L. B.

DODAYAH (see. DODAYAH, [love of Jehovah]: דודאיה; [Vat. דודאיה] Alex. דודאיה, Dodatian), a man of Maresha in Judah, father of Eliezer who denounced Jehoshaphat's alliance with Ahaziah (2 Chr. xx. 37). In the Jewish traditions Dodavah is the son of Jehoshaphat, who was also his uncle (Jerome, Qu. Heb. ad loc.).

DODO. 1. (דדוע [anomalous, or possibly his uncle]; דודע; Vat. דודע; Alex. דודע; and Dodayah: א. דדוא: [Abl. דדוא: petrus ejus], a man of Bethlehem, father of Elhanan, who was one of David's "thirty captains" (2 Sam. xxviii. 24; 1 Chr. xi. 20). He is a different person from

2. [In 2 Sam., דודע; Vat. דדעי; Alex. דודעי (2 Sam. xxvil. 11 in 1 Chr. xi. 12; דודעי: petrus ejus); Dodo, the Ahohite, father of Eleazar, the 2d of the three "mighty men " who were over the "thirty " (2 Sam. xxviii. 9; 1 Chr. xi. 12). He, or his son — in which case we must suppose the words "Eleazar son of " to have escaped from the text — probably had the command of the second monthly course (1 Chr. xxvii. 4). In the latter passage the name is DODAYAH, דודאיה, Alex. דודאיה; see in full under DODAI]; but this form occurs in the Hebrew text (Cettib) of 2 Sam. xxviii. 9 (דהיה), and in the LXX. of all; and in Josephus (Ant. vii. 12, § 4, דודאיה); and is be-

as that of Wechel, Francon. 1597, which also has the reading דודאיה... A.]
DOEG

II. (Hor. The K. W. believed has examined these lists with great minuteness to be the correct one. The Jewish tradition (Jerome, Qu. Heb. on 1 Chr. xi. 12) was that Doeg was the brother of Jesse.

3. A man of Issachar, forefather of Tola the Judge (Judg. x. 1). The LXX. and Vulg. renderings are remarkable: πατρὶ δὲ Ἀμινάζης: πατρὶ Αμιλεχ. This is the only instance (Judg. x. 1) in which the father and grandfather of a judge are both mentioned. Hence an early Jewish interpretation referred Doeg to Abimelech, and made Paul, Toh's father, the son of some brother or sister of Gideon, the father of Abimelech. But such a relationship is impossible; for Tola was "a man of Issachar," while Gideon was a Manassite (Judg. vi. 15). Even supposing there was a sister who married out of her tribe, it would be very strange to have the descent traced through that line instead of the father's (see Cassel, Richter and Roth, p. 97).

DOEG (297 [fearful, Gesen. and Fürst]; Δοεὼς: [in 1 Sam. xxix. 9, Alex. Δογγυ:] Dogg), an inhabitant (LXX. and Joseph. Ant. vi. 12, § 1, ὁ Ζηρόμπης) chief of Saul's herdsmen ("having charge of the mules"). He was at Nob when Abimelech gave David the sword of Goliath, and not only gave information to Saul, but when others declined the offer, himself executed the king's order to destroy the priests of Nob with their families, to the number of 89 persons, together with all their property (1 Sam. xxix. 7, xxii. 9, 18, 22, 19. lvi.). A question has arisen on the nature of the business by which he was "detained before the Lord" (297 ἐνέργειας Νευσσηριον: ινας τοιαυτά κατὰ Δοῦνα Δογγυ). The difficulty which lies in the idea that Doeg was a foreigner, and so incapable of a Nazarite vow (Mishn. de Vrats, iv. 1, Suremi), is explained by the probable supposition that he was a proselyte, attending under some vow or some act of purification at Hebron (1 Sam. xxv. 18): Ant. Soc. Patrick, Colmant: Gesen. p. 1069: Winet, s. v. Dogg: Thenius, ad loc, in Kurzg. evg. Handb.).

H. W. P.

DOG (297: κολλόν, κολλόμαι: cuoii), an animal frequently mentioned in Scripture. It was used by the Hebrews as a watch for their horses (Is. lxi. 10), and for guarding their flocks (Job xxix. 1). Then also, as now, troops of hungry and semi-wild dogs used to wander about the fields and streets of the cities, devouring dead bodies and other offal (1 K. iv. 14, xvi. 4, xvi. 10, 22, xxii. 38: 2 K. ix. 10, 36; Jer. xv. 4: 1 xlv. 6, 14), and thus became such objects of dislike that fierce and unruly enemies are petrally staked dogs in Ps. xxii. 19, 20. Moreover the dog being an unclean animal (Is. lvi. 3; Hor. l. p. 2, 25, "canis immundus et amica homo vivi", the terms dog, dead dog, dog's head, were used as terms of reproach, or of humility in speaking of one's self) (1 Sam. xxiv. 11; 2 Sam. iii. 8, iv. 8, xvi. 9: 2 K. viii. 13). Knox relates a story of a nobleman of Ulster who hastened by the king how many children he had repulsed — "Your Majesty's dog has three puppies." Throughout the whole East "dog" is a term of reproach for impure and profane persons, and in this sense is used by the Jews respecting the Goyles (Rev. xxii. 15; comp. Schöttgen, Hor Hebr. i. 1146), and by Mohammedans respecting Christians. The wanton nature of the dog is another of its characteristics, and there can be no doubt that בַּר dob in Dent. xxix. 18 means seruam rivicem, i. e. q. רְבָּב, comp. Ecles. xxxvi. 25, "A shameless woman shall be counted as a dog," Hesych. Κόινóν ἄνδρεις. Stanley (N. & P. p. 230) mentions to have seen on the very site of Jezreel the descendants of the dogs that devoured Jezreel, prowling on the mounds without the walls for fish and carrion thrown out to them to consume; and Wood, in his Journal to the source of the Dan, complains that the dog has not yet arrived at his natural position in the social state. We still use the name of one of the noblest creatures in the world as a term of contempt. To ask an Uzbek to sell his wife would be no affront, but to ask him to sell his dog an unpardonable insult —Sugar, fresno or dog-seller being the most offensive epithet that one Uzbek can apply to another. The addition of the article (τοιούτος καυπάνιος, Matt. xxv. 26; Matt. vii. 27) implies that the presence of dogs was an ordinary feature of Eastern life in our Saviour's time.

As to the etymology of the word, Bezaab thinks that it has reference to the firmness and tenacity of a dog's bite, and compares בַּר — fœcipes; but this word is more probably itself derived from בַּר(line) a dog.

The root בַּר is an unreal verb בַּר, to strike — Germ. klopfen; and thence to bark — Germ. klaffen, Fr. clapir.

W. D.

* Dietrich assigns a different meaning to בַּר: to take, seize, and hence, as applied to the dog, "the seizer" (hauper). See his addition in Ges. Hebr. and Chald. Handb. p. 409 (9th Aut.).

DOORS. [Gates.]

DOPH/KAH (םדזה [call-driving, place of, First]: 'Ρουσάκα [Alex. Ρουσάκα], the LXX. apparently read it to 7 for 7: Dophra), a place mentioned Num. xxxiii. 12, as a station in the desert where the Israelites encamped: see Wilderness.

H. H.

DOR (םדזה) and בַּר [del出发ion], Josh. xii. 11: 1 K. iv. 11; [in Judg. i. 27 and 1 Chr. vii. 21, Doph: in Josh. and 1 Kings, פָּנֵיהָ דֶּעִי, נפּוּדָד, etc.; 1 Mac. xxv. 11, [13], 20], an ancient royal city of the Canaanites (Josh. xii. 29), whose ruler was an ally of Abin, king of Hazor (Josh. xi. 2). It was probably the most southern settlement of the Phoenicians on the east of Syria (Joseph. Vit. 8, lnt. xiv. 9, § 8). Josephus describes it as a maritime city, on the west border of Manasseh and the north border of Dan (Int. v. ii. § 22, viii. 2, § 3; R. J. iv. 7, § 7), near Mount Carmel (cf. Apion. ii. 10). One old author tells us that it was founded by Dorus, a son of Neptune, while another affirms that it was built by the Phoenicians, because the neighboring rocky shore abounded in the small fish-fish from which they got the purple dye (Steph. R. s. r.; Ireland, Palestina, p. 739). It appears to have been within the territory of the tribe of Asher, though allotted
to Munasseth (Josh. xvii. 11; Judg. i. 27). The original inhabitants were never expelled; but during the prosperous reigns of David and Solomon they were made tributary (Judg. i. 27, 28), and the latter monarch stationed at Dor one of his twelve purveyors (1 K. iv. 11).—Tryphon, the murderer of Jonathan Maccabaeus and usurper of the throne of Syria, having sought an asylum in Dor, the city was besieged and captured by Antiochus Sidetes (1 Macc. xiv. 11). It was subsequently rebuilt by Gabinius the Roman general, along with Samaria, Ashdod, and other cities of Palestine (Joseph. Ant. xiv. 5, § 3), and it remained an important place during the early years of the Roman rule in Syria. Its coins are numerous, bearing the legend Δωρά (Valliant, Num. Imp.). It became an episcopal city of the province of Palestina Prima, but was already ruined and deserted in the fourth century (Hieron, in Epiph. Putei.). Of the site of Dor there can be no doubt. The descriptions of Josephus and Jerome are clear and full. The latter places it on the coast, "in the ninth mile from Caesarea, on the way to Polemians" (Onom. s. v. Doros). Just at the point indicated is the small village of Tantara, probably an Arab corruption of Doros, consisting of about thirty houses, wholly constructed of ancient materials. Three hundred yards north are low rocky mounds projecting, not into the sea, but covered with heaps of rubbish, massive foundations, and fragments of columns. The most conspicuous ruin is a section of an old tower, 39 ft. or more in height, which forms the landmark of Tantara. On the south side of the promontory, opposite the village, is a little harbor, partially shielded by two or three small islands. A spur of Mount Carmel, steep and partially wooded, runs parallel to the coast line, as the distance of about a mile and a half, between its base and the sandy beach is a rich and beautiful plain—this is possibly the "border," "coast," or "region" of Dor (נובכ in Hebrew, Josh. xi. 2, xii. 25; i K. iv. 11) referred to in Scripture. The district is now almost wholly deserted, being exposed to the raids of the wild Bedawin who pasture their flocks on the rich plain of Sharon.

J. L. P.

DOORA (Δωρά: Doros). 1 Mac. xv. 11, 13, 25. [Dor.]

DORCAS. [TARITH.] DORYMEGENES (Δορυμεγένης [Dorymegeus]), father of Ptolemy, surnamed Macron (1 Mac. iii. 38; 2 Mac. iv. 43). As this Ptolemy was in the service of Ptolemy Philometer, king of Egypt, before he deserts to Antiochus Epiphanes, it is probable that his father Dorymene is the same Dorymenes who fought against Antiochus the Great (Polyb. xvi. 6).

DOSTITHEUS (Δοσιθεός: Dositheus). 1. One of the captains of Judas Maccabeus in the battle against Timotheus (2 Mac. xii. 19, 24).

2. A horse-soldier of Daecon's company, a man of prodigious strength, who, in attempting to capture Gorgias, was cut down by a Thracian (2 Mac. xii. 35).

3. The son of Drinylus, a Jew, who had renounced the law of his fathers, and was in the camp of Ptolemy Philometer at Raphia (3 Mac. i. 3). He appears to have frustrated the attempt of Theodotus to assassinate the king. According to the Syriac Version he put in the king's tent a man of low rank (אֲרֵדָה [ara]), who was slain instead of his master. Polybius (v. 81) tells us it was the king's physician who thus perished. Dositheus was perhaps a certain Chabrian.

W. A. W.

4. (Δοσιθεος [Alex. Δοσίθεος; FA. Δοσίθεος, FA. Δοσιθεος: Dositheus]).—A priest and Levite, who carried the translation of Esther to Egypt (Esth. xi. 1). It is scarcely likely that he is identified with the Dositheus who is mentioned by Josephus (c. Apion, ii. 5) as one of the "commanders of the forces" of Ptol. VI. Philometer, though he probably lived in the reign of that monarch.

B. F. W.

DOThA'M. [DOTHAN.]

DOTHAN (once דותַת, DOTHAN, and in contracted form דות נ; possibly דות נ—two wells—Gesen. pp. 323, 563; [Vat. Alex. Sin.] Δωτισιμος, [Rom.] Δωτισιμος [exc. in Gen., where it has Δω- θεος]. Dotsina [in 2 K. Dotsim, but ed. 1569 Dotsina]), a place first mentioned (Gen. xxvii. 17) in connection with the history of Joseph, and apparently as in the neighborhood of Shechem. It next appears as the residence of Elisha (2 K. vi. 13), and the scene of a remarkable vision of horses and chariots of fire surrounding the "mountain" (בִּישֶׁל, on which the city stood. It is not again mentioned in the O. T.; but later still we encounter it—then evidently well known—as a landmark in the account of Holofernes' campaign against Bethulia (Jud. iv. 6, vii. 3, 18, viii. 3). The change in the name DOTHAM is due to the Greek text, from which this book is translated. In the Vat. and Alex. and Vulg. text—_it_ is also mentioned in Jud. iii. 9, where the A. V. has "Jehoram" (יוֹר- תי for יורה [Doroth]), and also the passages testify to the same feeling in the centre of the country near the southern edge of the great plain of Esdraelon.

Dothain was known to Eusebius (Onomasticon), who places it 12 miles to the N. of Sebaste (Samaria); and here it has been at length discovered in our own times by Mr. Van de Velde (i. 364, &c.) and Dr. Robinson (iii. 122), still bearing its ancient name unimpaired, and situated at the south end of a plain of the richest pasturage, 4 or 5 miles S. W. of Jenin, and separated only by a swell or two of hills from the plain of Esdraelon. The Tell or mound on which the ruins stand is described as very large ("huge," Van de Velde, i. 364); at its southern foot is still a fine spring. Close to it is saw, which was a corruption of מוסר Mosor = "the plain" (Reinach, pp. 742, 743).

6 It is right to say that the true site of Dothan was known to the Jewish traveler Rabbi ha-Parchi, s. b. 1500 (see Zunz's extract in note 4 to the references of Te- delius, Asher's ed. [ii. 431]), and to Schwartz, s. b. 1845 (p. 168); but neither of these travellers gives any account of the site.
DO TO WIT

an ancient road, running N. and S., the remains of the massive (Jewish?) pavement of which are still distinguishable (Van de Velde, pp. 398, 399). The great road from Bābīl to Egypt also passes near Dūthaim (Rob. iii. 122). The traditional site was at the Khew Jābbay Pass near Tell Ḫā'alm, at the N. of the Sea of Galilee. (See the quotations in Rob. ii. 419.) It need hardly be said that this position is not in accordance with the requirements of the narrative.

G.

* It shows the tenacity of the ancient names that the name of Dūthaim still clings to this site, though no village exists or has existed there for a long period. Near the ruins are now large cisterns behind which the name (like Dūthaim) was derived, such as in that country are liable at times to be left dry, as happened to be the true one into which Joseph was put by his brothers (Porter, in Kitto's Daily Bibl. Illustr. i. 315, ed. 1866). Its situation on the present line of travel from East-Jordan to Egypt confirms the truth of the Biblical history; for it is implied (Gen. xxxvi. 27) that the Dothain of Moses was on the great thoroughfare which led from Gilgal beyond the Jordan to the great centre of traffic in the valley of the Nile. Mr. Tristram (Land of Israel, p. 131, 2d ed.) spoke of meeting there a long caravan of males and asses laden (like the Ishmaelites of old), "on their way from Damascus to Egypt." See also Asher's Itinerary of Bashan of Thubil, ii. 434, and Bibl. Sacra, x. 122. Precisely here is found at the present day "the best pasture in all that region," and thus, though the narrative is silent as to the reason why "the sons of Jacob went from Shechem to Dothan, we see that it is the very place which herdsmen, such as they were, would naturally seek after having exhausted the supplies of their previous pasture-ground. It is distant from Shechem about 12 miles northward, and could be easily reached. The Tell or hill on which the ruins are now seen shows itself twice in the brief account of Elisha: it enables us to see how the king of Syria could station his forces so as to "comprise the city," and how "the mountain" could appear to the prophet's servant "full of horses and chariots of fire" (2 K. vi. 15, 17).

* DO TO WIT (A. v. 2 Cor. viii. 1), is a phrase now wholly obsolete, meaning to make known. "Do" was formerly used with other verbs in the same way, in the sense of "to make," "to cause." See Eastwood and Wright's Bible Word-Book, pp. 162, 163.

DOVE'S DUNG (Yênîh, יֵנִּיָה:!<p>perṣerēša; coluberis, i. e. v. 38, 46, 48, 59, 60, 61), is from a root signifying to deposit ordure. There seems good reason for taking this as a literal statement, and that the straits of the besieged were such that they did not hesitate even to eat such revolting food as is here mentioned (comp. Eks. Hrodol. ii. 32; Manuer on 2 K. vi. 25). The notion that some vegetable production is meant which was called by this name, may be compared with the fact that the Arabs call the herb Kali al-šuṣṣar sparrow's dung, and in German the word is called Taufelbeek. W. D.

DOVE'S DUNG (נִיָה, ניתניא: diqumim; Keri, יִנְיָה, יֵנָיָה; kōpōs περσερέων: stercorariae). Various explanations have been given of the passage in 2 K. vi. 25, which describes the famine of Samaria to have been so severe, that "an ass's head was sold for fourscore pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver." The old ver-

unused root יֵנִּיָה, to grow warm (comp. Arab. ķ̣ān), to burn with anger, and Gr. ἱέονις. None of the other derivations proposed for the word are at all probable; nor can we with Winer regard a word of this form as primitive. It is similar to מִיָה from the root מִיָה. Doves are kept in a domesticated state in many parts of the East. The pidgeon-cot is an universal feature in the houses of Upper Egypt. In Persia pidgeon-houses are erected at a distance from the dwellings for the purpose of collecting the dung as manure. There is probably an allusion to such a custom in Is. 10. 29. (N. of P. p. 257), speaking of Ascalon as the haunt of the Syrian Venus, says: "Her temple is destroyed, but the sacred doves—sacred by innumerable legends on the spot, and celebrated there even as late as Eusebius—still fill with their cooings the luxuriant gardens which grow in the sandy hollows within the ruined walls." It is supposed that the dove was placed upon the standards of the Assyrians and Babylonians in honor of Semiramis. Thallus (i. 7) says:—

"quod referat ut volitum crebra intacta per urbas Albæ Facetiæ sancta columba syra." This explains the expression in Jer. xxi. 38, מְנִיָה מִנָּיָה יֵנִּיָה, "from before the fierceness of the dove," i. e. the Assyrian (comp. Jer. xlii. 16, 1, 16). There is, however, no representation of the dove among the sculptures of Nineveh, so that it could hardly have been a common emblem of the nation at the time when they were executed; and the word in the above three passages of Jeremiah admits another interpretation. (See Gesen. Thes. p. 601 a.)

In 2 K. vi. 25, in describing the famine in Samaria, it is stated that "the fourth part of a cab of dove's dung was sold for five pieces of silver. (נִיָה כָּב, Keri ינייא, ינייא: kōpōs περσερέων: stercorariae). This is a root signifying to deposit ordure. There seems good reason for taking this as a literal statement, and that the straits of the besieged were such that they did not hesitate even to eat such revolting food as is here mentioned (comp. Eks. Hrodol. ii. 32; Manuer on 2 K. vi. 25). The notion that some vegetable production is meant which was called by this name, may be compared with the fact that the Arabs call the herb Kali al-šuṣṣar sparrow's dung, and in German the word is called Taufelbeek. W. D.
sions and very many ancient commentators are in favor of a literal interpretation of the Hebrew word. But, Dr. Smith remarks (Script. Herb. p. 130) that the pigeon's dung is meant the Ornithogalum umbellatum. We cannot allow this explanation, because if the edible and agreeable bulbs of this plant were denoted, it is impossible it should have been mentioned by the Spanish chronicler along with dogs, mice, &c. As an additional argument in favor of the literal interpretation of the passage in question may be adduced the language of Rabshakeh to the Jews in the time of Hezekiah (2 K. xviii. 27: 1, xxxvi. 12). Still it must be confessed there is difficulty in believing that so vile a substance should ever, even in the extremities of a horrible famine, have been sold at the rate of about one pint for six shillings and fourpence. We adopt, therefore, the cautious language of Keil (Comment. i. c.): "The above-stated facts prove no doubt the possibility, even the probability, of the literal meaning, but not its necessity: for which reason we refrain, with Gesenius, from deciding."

* Dr. Thomson agrees with those who think some species of vegetable food may be meant, which is, of course, to be so designated must have been very coarse and cheap. "The whimsical this may have been given to a kind of bean, on account of some fancied resemblance between the two. This would not be at all surprising, for the Arabs give the most quaint, obscure, and ridiculous names to their extraordinary edible medicines." See Land and Book, ii. 200. H.

DOWRY. [Marriage.]

DRACHMA (δραχμή; drachma; [Top. v. 15]): 2 Macc. iv. 19, x. 20, xii. 43; a 3 Macc. iii. 28; Luke xv. 8, 9, a Greek silver coin, varying in weight on account of the use of different talents. The Jews must have been acquainted with three talents, the Ptolemaic, used in Egypt and at Tyre, Sidon, and Berytus, and adopted for their own shekels: the Phoenician, used at Aratus and by the Persians: and the Attic, which was almost universal in Europe, and in great part of Asia. The drachmae of these talents weigh respectively, during the period of the Maccabees, about 55 gra. (roy. 58-3, and 66. The drachma mentioned in 2 Macc. are probably of the Schelence, and therefore of the Attic standard; but in Luke denarii seem to be intended, for the Attic drachma had been at that time reduced to about the same weight as the Roman denarius as well as the Ptolemaic drachma, and was wholly or almost superseded by it. This explains the remark of Josephus, ό τοκος . . . ἄττικας δέχεται δραχμὰς τίσσαρας (Ant. i. 8, § 2), for the four Ptolemaic drachmae of the shekel, as equal to four denarii of his time, were also equal to four Attic drachmae (Money; Silver, Piece IV). R. S. P.

DRAGON. The translators of the A. V., apparently following the Vulgate, have rendered by the same word "dragon" the two Hebrew words Τάρας, μέταρας, and Tannim, Τάννις. The similarity of the forms of the words may easily account for this confusion, especially as the masculine plural of the former, Tannim, actually assumes (in xx. 3) the form Tannim, and, on the other hand, Tannim is evidently written for the singular Tarn.

In the first and second of these passages the Vulg. has drachma.
niv in Ez. xxi. 3, xxi. 2. But the words appear to be quite distinct in meaning: and the distinction is generally, though not universally, preserved by the LXX.

I. The term is used, always in the plural, in Job xxx. 20; Is. xxxiv. 13, xiii. 20 (σώματες); in Is. xiii. 22 (φίλοι); in Jer. x. 22, xliii. 35 (προφηταὶ); in Ps. xiv. 19 (τίτλῳ καιρὸν); and in Jer. ix. 11, xvi. 6, lii. 57 (δράκανοι).

The feminine plural δράκαι is found in Mal. i. 3: a passage altogether differently translated by the LXX. It is always applied to some creatures inhabiting the desert, and connected generally with the words γυναικὰ ("ostrich") and θητή ("jackal"). We should conclude from this that it refers rather to some wild beast than to a serpent, and this conclusion is rendered almost certain by the comparison of the term in Jer. xiv. 6, to the wild ass sowing the wind, and the reference to their "wailing" in Mic. i. 8, and perhaps in Job xxx. 20. The Syriac (see Winer, Redhe, s. v. Schakal) renders it by a word which, according to Pococke, means a "jackal" (a beast whose peculiarly mournful howl in the desert is well known), and it seems most probable that this or some cognate species is to be understood whenever the word occurs.

II. The term θηταῖα, δράκαι (plur. δρᾶκαι), is always rendered as δρακόνιον in the LXX., except in Gen. i. 21, where we find κῆτος. It seems to refer to no great monster, whether of the land or the sea,7 being indeed more usually applied to some kind of serpent or reptile, but not exclusively restricted to that sense. When referring to the sea it is used as a parallel to τιτόκτις ("Leviathan"), as in Is. xxvii. 1; and indeed this latter word is rendered in the LXX. by δρακόνιον in Ps. lxiv. 14, cxv. 26; Job xl. 20; Is. xxvii. 1; and by κῆτος in Job iii. 8. When we examine special passages we find the word used in Gen. i. 21 of the great sea-monsters, the representatives of the inhabitants of the deep. The same sense is given to it in Ps. lxiv. 13 (where it is again connected with "Leviathan"), Ps. cxviii. 7, and probably in Job xii. 12 (Vulg. ψαρός). On the other hand, in Ex. viii. 9, 10, 12; Deut. xxxii. 39; Ps. xcv. 13, it refers to a fish, a powerful and deadly kind. It is also applied metaphorically to Pharaoh, or to Egypt (Is. lii. 9; Ex. xiv. 3, xxxii. 2; perhaps Ps. lxvii. 13), and in that case, especially as a sea are attributed to it, it most probably refers to the crocodile as the well-known emblem of Egypt. When, however, it is used of the king of Babylon, as in Jer. lii. 34, the same propriety would lead us to suppose that some great serpent, such as might inhabit the sandy plains of Babylonia, is intended.6

Such is the usage of the word in the 0. T. In the N. T. it is only found in the Apocalypse (Rev. xii. 3, 4, 7, 9, 16, 17, ৫), as applied metaphorically to "the old serpent, called the Devil, and Satan," the description of the "dragon" being dictated by the symbolical meaning of the image rather than by any reference to any actually existing creature. Of similar personification, either of an evil spirit or of the powers of matter Nature as distinct from God, we have traces in the extensive prevalence of dragon worship, and existence of dragon-temples of peculiar serpentine form, the use of dragon-standards, both in the East, especially in Egypt (see also the apocryphal history of Bel and the Dragon), and in the West, more particularly among the Celtic tribes. The most remarkable of all, perhaps, is found in the Greek legend of Apollo as the slayer of the Python, and the supplanter of the serpent-worship by a higher wisdom. The reason, at least of the Scriptural symbol, is to be sought not only in the union of gigantic power with craft and malignity, of which the serpent is the natural emblem, but in the record of the serpent's agency in the temptation (Gen. iii.). [SERPENT.]

A. B.

* DRAGON-WELL (Neh. ii. 13, A. V.), but more correctly FOUNTAIN (Δράκων). It is mentioned in the account of Nehemiah's night-exursion around Jerusalem (see Neh. as above). It is one of the uncertain points in the topography of the ancient city. Robinson assigns reasons for supposing it was a later name for the Gihon, which Hezekiah stopped up or concealed at the time of the Assyrian invasion (2 Chr. xxxiii. 3, 4, 30), near the site of the city of the valley of the two rivers (Bibl. Narr., i. 473, 514, 1st ed.). Barchay (City of the Great King, p. 315, 1st ed.) also places it there, and conjectures, among other explanations, that the name may have come from the figure of a dragon sculptured on the entablature of the Gihon. The LXX. substitutes Fountain of Figs for the Biblical designation. Seep maintains (Jerusalem and Its Environs, i. 272) that the Dragon-well of Nehemiah was the Bethesda of the N. T. (John v. 2), and that Bethesda is the present Hammah esk-Shofin (Bath of Healing), near one of the western avenues to the mosque of Omar. But in that case the well falls within Jerusalem, and not outside of it so as to be within the path of Nehemiah's circuit, whose object evidently was to survey the ruins of the entire city, and not merely those of Mount Zion or the City of David in its more restricted sense. [BETHESDA, 14.] Seep traces the name to a popular notion of some connection of a dragon with the interminable waters. He gives some curious proofs of the prevalence of such a superstition among various nations. (See also Rob. Bibl. Narr. i. 587, 1st ed.) In regard to Hammah esk-Shofin it may be mentioned that Dr. Wollcot was the first modern traveller who explored this remarkable well, and by an interesting account of the adventure in the Bibl. Scient., 1841, pp. 24-28, Tolsd (Die Römischen, p. 73 ft.) and Barchay (City of the Great King, p. 531 ft.) have repeated the examination.

* DRAM. [DARKON.]

DREAMS (δράκων; ἡ ἐννέα: samniim; καθ' ἐννέα in LXX., and καθ' ἐννέα in St. Matthew, are generally used for "in a dream"). The Scriptural record of God's communication with man by dreams has been so often supposed to involve much difficulty, that it seems not out of place to refer briefly to the nature and characteristics of dreams generally, before enumerating and classifying the dreams recorded in Scripture.

I. The main difference between our sleeping and waking thoughts appears to lie in this,—that, in the application of Is. xxviii. 1 appears to be uncertain.

6 The application of Is. xxviii. 1 appears more uncertain.
the former case, the perceptive faculties of the mind (the sensational powers, and the imagination which combines the impressions derived from them) are active, while the reflective powers (the reason or judgment by which we control those impressions, and distinguish between those which are imaginary or subjective, and those which are produced by, objective realities) are generally asleep. Milton's account of dreams (in Par. Lost, book v. 100-113) seems as accurate as it is striking:

But know, that in the soul Are many lesser faculties, that serve Reason as chief: among these Fancy next Her office holds: of all external things Which the five watchful senses represent She forms imaginations, sery shapes, Which Reason joining or disjoining, frames All what we affirm or what deny, and call Our knowledge or opinion; then retires Into her private cell, when nature rests.

Thus it is that the impressions of dreams are in themselves vivid, natural, and picturesque, occasionally gifted with an intuition beyond our ordinary powers, but strangely incongruous and often grotesque: the emotion of surprise or incredulity, which arises from a sense of incongruity, or of unconlikeness to the ordinary course of events, being in dreams a thing unknown. The mind seems to be surrendered to that power of association by which, even in its waking hours, if it be inactive and inclined to "nursing," it is often carried through a series of thoughts connected together by some vague and accidental association, until the reason, when it starts again into activity, is scarcely able to trace back the slender line of connection. The difference is, that, in this latter case, we are aware that the connection is of our own making, while in sleep it appears to be caused by an actual succession of events.

Such is usually the case, yet there is a class of dreams, sebdom noticed and indeed less common, but recognized by the experience of many, in which the reason is not wholly asleep. In these dreams it seems to look on, as it were, from without, and so to have a double consciousness: on the one hand we enter into the events of the dream, as though real; on the other we have a sense that it is but a dream, and a fear lest we should awake and its pogram should pass away.

In either case the ideas suggested are accepted by the mind in dreams at once and inevitably, instead of being weighed and tested, as in our waking hours. But it is evident that the method of such suggestion is still undetermined, and in fact is no more capable of being accounted for by any single cause than the suggestion of waking thoughts. The material of these latter is supplied either by ourselves, through the senses, the memory, and the imagination, or by other men, generally through the medium of words, or by the direct action of the spirit of God, or of created spirits of orders superior to our own or the spirit within us. So also it is in dreams. In the first place, although memory and imagination supply most of the material of dreams, yet physical sensations of cold and heat, of pain or of relief, even actual impressions of sound or of light, will often mould or suggest dreams, and the physical organs of speech will occasionally be made use of to express the emotions of the dreamer. In the second place, instances have been known where a few words whispered into a sleeper's ear have produced a dream corresponding to their subject. On these two points the two former cases are distinguished from the latter; and (as we are to judge of the difference by the way the events occur, and not by the notion of the mind) as the first is given by God, and the second as a consequence of free volition, it is evident that dreams are not to be valued as a test of the soul's spiritual condition.

II. It is, of course, with this last class of dreams that we have to do in Scripture. The dreams of memory or imagination are indeed referred to in Ex. v. 3; Le. xxix. 8; but it is the history of the Revelation of the Spirit of God to the spirit of man, whether sleeping or waking, which is the proper subject of Scripture itself.

It must be observed that, in accordance with the principle enunciated by St. Paul in 1 Cor. xiv. 15, dreams, in which the understanding is asleep, are recognized indeed as a method of divine revelation, but placed below the visions of prophecy, in which the understanding plays its part. It is true that the book of Job, standing as it does on the basis of "natural religion," dwells on dreams and "visions in deep sleep" as the chosen method of God's revelation of himself to man (see Job iv. 5, vii. 14, xxxii. 15). But in Num. xii. 6; Deut. xiii. 1, 3, 5; Jer. xxvii. 9; Joel ii. 28, &c., dreamers of dreams, whether true or false, are placed below "prophets," and even below "diviners;" and similarly in the climax of 1 Sam. xxviii. 6, we read that "as the Lord answered Saul not by dreams, nor by the dreams of the priests, but by a prophet." Under the Christian dispensation, while we read frequently of trances (ἐπιθυμίας) and visions (ὄρασις, ὀρέγοντα) dreams are never referred to as vehicles of divine revelation. In exact accordance with this principle are the actual records of the dreams sent by God. The greater number of such dreams were granted, for prediction or for warning, to those who were aliens to the Jewish covenant. Thus we have the record of the dreams of Abraham (Gen. xx. 7-17); Laban (Gen. xxxi. 24); of the chief butler and baker (Gen. xli. 5); of Pharaoh (Gen. xli. 1-8); of the Midianite (Judg. vii. 13); of Nebuchadnezzar (Dan. ii. 1, &c., iv. 10-18); and of the Magi (Matt. ii. 12), and of Pilate's wife (Matt. xxvii. 19). Many of these dreams, moreover, were symbolical and obscure, so as to require an interpreter. And, where dreams are recorded as means of God's revelation to his chosen servants, they are almost always referred to the periods of their earliest and most imperfect knowledge of him. So it is in the case of Abraham (Gen. xv. 12, and perhaps 1-9), of Jacob (Gen. xxvii. 12-15), of

---

a These powers are to be carefully distinguished (as in Butler's Analogy, part i. 1) from the organ through which they are exercised when we are awake.

b The same order, as being the natural one, is found in the earliest record of European mythology —

"ΑΑΑ ὅλα ἐν τῷ πάντα μέντι εἰσέρχεται, ἡ κρίσις.
Η καὶ διάτροπος, καὶ γέρας ἄντωμα ἐὰν οὖν ἐκείνωσαν ἔτη.
H ομώς προσευχήνθη καὶ ἑκάστου ἀνθρώπου ἐκτιβ.
Hom. Ρ. I. 68.
Joseph (Gen. xxxvii. 5-10), of Solomon (1 K. iii. 5), and in the N. T. of Joseph (Matt. i. 20, ii. 13, 19, 22). It is to be observed, moreover, that they belong especially to the earliest age, and become less frequent as the revelations of prophecy increase. The only exception to this is found in the dreams and visions of the night" given to Daniel (ii. 19, vii. 1), apparently in order to put before the false dream of the Chaldean belief in prophetic dreams and in the power of interpretation of the dreams, and yet to bring out the truth latent therein (comp. St. Paul’s miracles at Ephesus, Acts xix. 11, 12, and their effect, 18-20).

The general conclusion therefore is, first, that the Scripture claims the dream, as it does every other action of the human mind, as a medium through which God may speak to man either directly, that is, as we call it, "providentially," or indirectly in virtue of a general influence upon all his thoughts; and secondly, that it lays far greater stress on that divine influence by which the understanding also is affected, and leads us to believe that as such influence extends more and more, and is more, and more, and more, and revelation by dreams, unless in very peculiar circumstances, might be expected to pass away.

A. B.

DRESS. This subject includes the following particulars:—1. Materials. 2. Color and decoration. 3. Name, form, and mode of wearing the various articles. 4. The several uses relating thereto.

1. The materials were various, and multiplied with the advance of civilization. The earliest and simplest robe was made out of the leaves of a tree (Eh 17:8). A. V. “fig-tree”; and comp. the present Arabic name for the fig, (in, or teen), portions of which were sewn together, so as to form an apron (Gen. iii. 7). Asotic Jews occasionally used a similar material in later times. Josephus (Vit. § 2) records this of Bannus (σουτίς μὴν απὸ δέντρων χρύσονον), but whether it was made of the leaves, or the bark, is uncertain. After the Fall, the skins of animals supplied a more durable material (Gen. iii. 21), which was adapted to a rude state of society, and is stated to have been used by various ancient nations (I. K. iv. 13, 14; And. Introd. cap. 7, § 3). Skins were not wholly disposed at later periods: the aδωρος (773) worn by the Jews at the time of Christ was of a much less degree, and made of a sheep or goat skin. This is doubtless the material of which the ancient Jews made use, and which has been preserved in the costume of the Syrians. It is probable that the acquaintance of the Hebrews with linen, and perhaps cotton, dates from the period of the captivity in Egypt, when they were instructed in the manufacture (1 Chr. iv. 21). After their return to Palestine we have frequent notices of linen, the finest kind being named skĕsh (σκήσ), and at a later period bitts (βιττίς), the latter a word of Syrian, and the former of Egyptian origin, and each indicating the quality whence the material was procured: the term chλαδός was also applied to it from its brilliant appearance (I. K. xix. 9; Esth. i. 6, viii. 15). It is the βιττος of the LXX., and the N. T. (Luke xvi. 19; Rev. xvii. 16), and the “fine linen” of the A. V. It was used in the vestments of the high-priest (Ex. xxvii. 22), as well as by the wealthy (Gen. xii. 42; Prov. xxiv. 22; Luke xiv. 19).

[Linen]. A less costly kind was named bōd (βῶδ), which was used for certain portions of the high-priest’s dress (Ex. xxvii. 22; Lev. iv. 14, 20, 22), and for the ephod of Samuel (1 Sam. ii. 18), and David (2 Sam. vii. 14); it is worthy of notice, in reference to its quality and appearance, that it is the material in which angels are represented (Ez. iv. 3, 11, x. 2, 6, 7; Dan. x. 5, xii. 6; Rev. xvi. 5). A courser kind of linen, termed σαλμών (Ex. xii. 4), was used by the very poor [Linen]. The Hebrew term σαλμών (σαλμών, and σαλμῶν) and terminated in its natural state. The people wearing it had been identified with the Sagaritii-Bousamii (Nimroth, p. 163).
expresses a fine kind of linen, especially adapted for summer wear, as distinct from the saraballi, which was thick (Talmud, Menach., p. 41, 1). What may have been the distinction between skēt and sōlin (Prov. xxvi. 22, 24) we know not: the probability is that the latter name passed from the material to a particular kind of robe. Silk was not introduced until a very late period (Rev. xviii. 12): the term wełsi (נֵסָי: τριχασσος: Ez. xvi. 10) is of doubtful meaning [STILK]. The use of a mixed material (נֵסָי צָלֵבָנָא, א. v. spurious, LXX.: ἀντιδιασειμένον. Aquil.: ἀφρόλιχον. Gr. V.), such as wool and flax, was forbidden (Lev. xix. 19; Deut. xxii. 11), on the ground, according to Josephus (Ant. iv. 8, § 11), that such was reserved for the priests, or as being a practice usual among idolaters (Spencer. Leg. Heb. R. ii. 92), but more probably with the view of enforcing the general idea of purity and simplicity.

2. Color and decoration. The prevailing color of the Hebrew dress was the natural white of the unbleached wool, which might be brought to a high state of brilliancy by the art of the fuller (Mark ii. 3). Some of the terms applied to these materials (e. g. כֶּסֶת, כָּסָר, כָּסָרָן) are connected with words significant of whiteness, while many of the descriptions of garments have special reference to this quality (Job xxxviii. 14; Ps. civ. 1, 2; Is. lxiii. 3): white was held to be peculiarly appropriate to festive occasions (Exc. ix. 8; cf. Hor. Sat. ii. 2, 60), as well as symbolical of purity (Rev. iii. 4, 5, iv. 4, v. 9, 13). It is uncertain what the art of dyeing became known to the Hebrews; the east-asiatic passion worn by Joseph (Gen. xxxviii. 3, 23) is variously taken to be either a "coat of divers colors" (πολυχρῶς, Vulg.; comp. the Greek πολύχρωμος, II. iii. 126, xxii. 441), or a tunic furnished with sleeves and reaching down to the ankles, as in the versions of Aquil., ἀστραγάλιος, καρπωτός, and Symmachus, χεροπνευτός, and in the Vulg. (2 Sam. xiii. 18), taboris, and as described by Josephus (Ant. vii. 8, § 1). The latter is probably the correct sense, in which case we have no evidence of the use of variegated robes previously to the sojourn of the Hebrews in Egypt, though the notice of scarlet thread (Gen. xxviii. 28) implies some acquaintance with dyeing, and the light summer robe (נֵסָי כְּרֵת: בְּאֵיסָרָן: veil, A. V.) worn by Rebecca and Tamar (Gen. xxiv. 65, xxxviii. 14, 19) was probably of an ornamental character. The Egyptians had carried the art of weaving and embroidery to a high state of perfection, and from them the Hebrews learned various methods of producing decorated stuffs. The elements of ornamentation were—(1) weaving with threads previously dyed (Ex. xxxv. 25; cf. Wilkinson's Egyptians, iii. 125); (2) the introduction of gold thread or wire (Ex. xxviii. 6 ff.); (3) the addition of figures, probably of animals and hunting or battle scenes (cf. Layard, ii. 297), in the case of garments, in the same manner as the cherubim were represented in the curtains of the tabernacle (Ex. xxvi. 1, 31, xxxii. 8, 35). These devices may have been either woven into the stuff, or cut out of other stuff and afterwards attached by needlework: in the former case the pattern would appear only on one side, in the latter the pattern might be varied. Such is the distinction, according to Talmudical writers, between cunning-work and needlework, or as marked by the use of the singular and dual number, הבֶּן [nēdālek], needlework, and הבֶּן [nēdālek], needlework on both sides (Judg. v. 30, A. V.), though the latter term may after all be accepted in a simple way as a dual = two embroidered robes (Bertheau, Comm. in l. e.). The account of the corslet of Amasis (Her. iii. 47) illustrates the processes of decoration described in Exodus. Robes decorated with gold (נֵסָי כְּרֵת), Ps. xlv. 13), and at a later period with silver thread (Joseph. Ant. xiv. 8, § 2: cf. Acts xii. 21), were worn by royal personages: other kinds of embroidered robes were worn by the wealthy both of Tyre (Ex. xxi. 13) and Palestine (Judg. v. 30; Ps. xlv. 14). The art does not appear to have been maintained among the Hebrews: the Babylonians and other eastern nations (Jos. viii. 21; Ez. xxviii. 24), as well as the Egyptians (Ez. xxviii. 7), excelled in it. Nor does the art of dyeing appear to have been followed up in Palestine: dyed robes were imported from foreign countries (Zeph. i. 8), particularly from Phoenicia, and were not much used on account of their expensiveness: purple (Prov. xxvi. 22; Luke xvi. 19) and scarlet (2 Sam. i. 24) were occasionally worn by the wealthy. The surrounding nations were more lavish in their use of them: the wealthy Tyrians (Ez. xxvii. 7), the Midianitish kings (Judg. v. 26), the Assyrian nobles (Ez. xxviii. 6), and Persian officers (Est. vii. 15), are all represented in purple. The general hue of the Persian dress was more brilliant than that of the Jews: hence Ezekiel (xxiii. 12) describes the Assyrians as נֵסָי כְּרֵת, lit. clothed in perfection; according to the LXX. εἰδρυμένα, wearing robes with handsome borders. With regard to the head-dress in particular, as described as פֶּסַּנְכָּה בָּרָאָר (παρωπός Βαρσαλι; A. V. "dyed attire [Ez. xxiii. 15]") cf. Or. Met. xiv. 654, mitres pictae, some doubt exists whether the word rendered dyed does not rather mean freezing (Genen. Thestr. p. 542; Layard, ii. 308).

3. The names, forms, and mode of wearing the robes. It is difficult to give a satisfactory account of the various articles of dress mentioned in the Bible: the notices are for the most part incidental, and refer to a lengthened period of time, during which the fashions must have frequently changed: while the collateral sources of information, such as sculpture, painting, or contemporary records, are but scanty. The general characteristics of oriental dress have indeed preserved a remarkable uniformity in all ages: the modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinction between the outer and inner garments, the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries; and there is the same distinction between the costume of the rich and the poor, consisting in the multiplication of robes of a finer texture and more ample dimensions. Hence the numerous illustrations of ancient costume, which may be drawn from the usages of modern Orientals, supplying in great measure the want of contemporaneous representations. With regard to the figures which some have identified as Jews in Egyptian paintings and Assyrian sculptures, we cannot but consider the evidence insufficient. The figures in the painting at
DRESS

Beni Hassan, delineated by Wilkinson (Aegypt. ii. 296), and supposed by him to represent the arrival of Joseph's brethren, are dressed in a manner at variance with our ideas of Hebrew costume; the more important garments wear a double tunic, the upper one constructed so as to pass over the left shoulder and under the right arm, leaving the right shoulder exposed; the servants wear nothing more than a skirt or kilt, reaching from the loins to the knee. Wilkinson suggests some collateral reasons for doubting whether they were really Jews; to which we may add a further objection that the presents which these persons bring with them are not what we should expect from Gen. xlii. 11. Certain figures inscribed on the face of a rock at Behistun, near Kermanshah, were supposed by Sir R. K. Porter to represent Sumarians captured by Shalmaneser; they are given in Vanst's Nineveh, p. 372. These sculptures are now recognized as of a later date, and the figures evidently represent people of different nations, for the tunics are alternately short and long. Again, certain figures discovered at Nineveh have been pronounced to be Jews; in one instance the presence of hats and boots is the ground of identification (Bonomi, Ninev., p. 197; comparing Dan. iii. 21); but if, as we shall hereafter show, the original words in Dan. have been misunderstood by our translators, no conclusion can be drawn from the presence of these articles. In another instance the figures are simply dressed in a short tunic, with sleeves reaching nearly to the elbow, and confined at the waist by a girdle, a style of dress which was so widely spread throughout the East that it is impossible to pronounce what particular nation they may have belonged to; the style of head-dress seems an objection to the supposition that they are Jews. These figures are given in Bonomi's Ninev., p. 381.

The costume of the men and women was very similar; there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages (\( \sigma \) : σαρώνειν), such as the staff, signet ring, and other ornaments, or, according to Josephus (Ant. iv. 8, § 43), the weapons of a man; as well as to a man to wear the outer robe (\( \nu \) : τοίχωνος) of a woman (Dent. xxii. 5); the reason of the prohibition, according to Maimonides (Mish. Nekh. iii. 31), being that such was the practice of idolaters (cf. Carpox. Appar. p. 514); but more probably it was based upon the general principle of propriety. We shall first describe the robes which were common to the two sexes, and then those which were peculiar to women.

(1.) The othometh (\( \nu \) : τοίχωνος), whence the Greek ετομοθήκη was the most essential article of dress. It was a closely fitting garment, resembling in form and use our shirt, though unfortunately translated coat in the A. V. The material of which it was made was either wool, cotton, or linen. From Josephus's observation (Ant. iii. 7, § 4) with regard to the ωδίν, that it was \( \varepsilon \nu \, \varepsilon \, \rho \varepsilon \, \sigma \, \tau \varepsilon \, \alpha \varepsilon \) ρεπερατσαγμετόνωσθαι, we may probably infer that the ordinary othometh or tunic was made in two pieces, which were sewn together at the sides. In this case the ετομοθήκη δίαδος worn by our Lord (John xiv. 23) was either a singular one, or, as is more probable, was the upper tunic or ωδίν. The primitive othometh was without sleeves and reached only to the knee, like the Doric χιτών: it may also have been, like the latter, partially opened at one side, so that a person in rapid motion was exposed (2 Sam. vi. 20). Another kind, which we may compare with the Ionian χιτών, reached to the wrists and ankles: such was probably the εθομοθήκη περσία worn by Joseph (Gen. xlii. 3, 23), and Tamar (2 Sam. xliii. 18), and that which the priests wore (Joseph. Anti. iii. 7, § 2). It was in either case kept close to the body by a girdle (Γυμνάστη), and the fold formed by the overlapping of the robe served as an inner pocket, in which a letter or any other small article might be carried (Joseph. Anti. xiv. 5, § 7).

A person wearing the othometh alone was described

Fig. 1. An Egyptian. (Lane's Modern Egyptians.)

as \( \nu \) νακόλ, A. V.; we may compare the use of the term γυμνικαι as applied to the Spartan virgins (Plut. I. ge., 14), of the Latin nudae (Virg. Georg. i. 299), and of our expression stripped. Thus it is said of Saul after having taken off his upper garments (\( \nu \) : ἄµπελον, 1 Sam. xix. 24); of Isaiah (Is. xx. 2) when he put off his sackcloth, which was usually worn over the tunics (cf. Jon. iii. 6); and only on special occasions next the skin (2 K. vi. 30); of a warrior who has cast off his military cloak (Am. ii. 16; cf. Lev. iii. 23, inermis mitutique); and of Peter without his fisher's coat (John xxi. 5). The same expression is elsewhere applied to the poorly clad (Job xxii. 6; Is. viii. 7; James i. 13).

The above wood-cut (fig. 1) represents the simplest style of Oriental dress, a long loose shirt or othometh without a girdle, reaching nearly to the ankles. The same robe, with the addition of the girdle, is shown in fig. 4.

In fig. 2 we have the ordinary dress of the modern Bedouin: the tunic overlaps the girdle at the waist, leaving an ample fold, which serves as a pocket. Over the tunic he wears the ωδίν, or striped phaid, which completes his costume.

(2.) The σιδήν (\( \nu \) : σίδην) appears to have been a wrapper of fine linen (σίδηνω, I. XX.). It might be used in various ways, but especially as a night-shirt (Mark xv. 36; cf. Her. ii. 53; Schleusner's Lex. in N. T. s. v.). The Hebrew term is given in the Syriac N. T. as \( \nu \) νάρπα (Luke xix. 29), and Ναρπά (John xiii. 4). The material or robe
is mentioned in Judg. xiv. 12, 13 (sheet, shirt). A. V., Prov. xxii. 24, and Is. iii. 24 (fine linen, A. V.); but in none of these passages is there anything to decide its specific meaning. The Talmudic writers occasionally describe the *tallith*

---

**Fig. 2. A Bedouin. (Lynch, Dead Sea.)**

[tallith, or *tallith*] under that name, as being made of fine linen: hence Lightfoot (Exegeses on Mark xiv. 51) identifies the σταυρών worn by the young man as a *tallith*, which he had put on in his haste without his other garments.

(3.) The *me'il* (ME'IL) was an upper or second tunic, the difference being that it was longer than the first. It is hence termed in the LXX. *σωμάτις ποδήγα*, and probably in this sense the term is applied to the *coteneth passin* (2 Sam. xiii. 18), implying that it reached down to the feet. The sacerdotal *me'il* is elsewhere described. [Priest.]

As an article of ordinary dress it was worn by kings (1 Sam. xxiv. 4), prophets (1 Sam. xviii. 14), nobles (Job i. 20), and youths (3 Sam. ii. 19). It may, however, be doubted whether the term is used in its specific sense in these passages, and not rather in its broad etymological sense (from ἰέλειν, to cover); for any robe that chance to be worn over the *coteneth*. In the LXX. the renderings vary between ἱπποδήγα (1 Sam. xviii. 4; 2 Sam. xiii. 18; 1 Sam. ii. 19, Theodot.), a term properly applied to an upper garment, and specially used in John xii. 7 for the linen coat worn by the Phoenician and Syrian fishermen (Theophyl. in l. c.), δινός (1 Sam. ii. 19, xv. 27, xxiv. 4, 11, xxviii. 14; Job xxix. 14), ιμάτιον (Job i. 20), στολή (1 Chr. xv. 27; Job ii. 12), and ἱπποδήγα (Ex. xxix. 21; Lev. viii. 7), showing that generally speaking it was regarded as an upper garment. This further appears from the passages in which notice of it occurs: in 1 Sam. xviii. 4 it is the "robe" which Jonathan first takes off; in 1 Sam. xxvii. 14 it is the "mantle" in which Samuel is enveloped; in 1 Sam. xxv, 27, it is the "mantle," the skirt of which is rent (cf. 1 K. xi. 30, where the *yōdāh* is similarly treated); in 1 Sam. xxiv. 4, it is the "robe," under which Saul slept (generally the *yōdāh* was so used); and in Job i. 20, ii. 12, it is the "mantle" which he rends (cf. Ezr. ix. 3, 5); in these passages it evidently describes an outer robe, whether the *simlah*, or the *me'il* itself used as a *simlah*. Where two tunics are mentioned (Luke iii. 11) as being worn at the same time, the second would be a *me'il*; travellers generally wore two (Joseph. Ant. xiv. 7, § 7), but the practice was forbidden to the disciples (Matt. x. 19; Luke ix. 31).

The dress of the middle and upper classes in modern Egypt (fig. 3) illustrates the customs of the Hebrews. In addition to the shirt, they wear a long vest of striped silk and cotton, called *kafthān*, descending to the ankles, and with ample sleeves, so that the hands may be concealed at pleasure. The girdle surrounds this vest. The outer robe consists of a long cloth coat, called *gibbel*, with sleeves reaching nearly to the wrist. In cold weather the *ahlī* is thrown over the shoulders.

---

**Fig. 3. An Egyptian of the upper classes. (Lam.)**

(4.) The ordinary outer garment consisted of a quadrangular piece of woollen cloth, probably resembling in shape a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are — *simlah* (SIMLAH), occasionally *yōdāh*, which appears to have had the broadest sense; and sometimes is put for clothes generally (Gen. xxvi. 2, xxxii. 34; Ex. iii. 22, xxii. 9; Deut. x. 18; Is. iii. 7, iv. 1), though once used specifically of the warrior's cloak (Is. ix. 5); *be'edāh* (BE'DAHL), which is more usual in speaking of robes of a handsome and substantial character (Gen. xxvii. 15, xli. 42; Ex. xxviii. 2; 1 K. xxii. 10; 2 Chr. xviii. 9; Is. liii. 1): *cesith* (CESITH), appropriate to passages where covering or protection is the prominent idea (Ex. xxii. 29; Job xxvi. 6, xxxi. 19); and lastly *ḥabāh* (ḤAH), usual in poetry, but specially applied to a warrior's cloak (2 Sam. xx. 8; priests' vestments (2 K. x. 22), and royal apparel (Esth. vi. 11, viii. 15). A cognate term (mēlōhād (MELOH)) describes specifically a state-dress, whether as used in a royal household (1 K. x. 5); or speaking to festivals (2 K. x. 22): elsewhere it is used generally for robes of a handsome character (Job xxvii. 16; Is. liii. 3; Ez. xvi. 13; Zeph. i. 8). Another
term, *mad* (μαθήματα), with its derivatives *μαθήματος* (Ps. xxxiii. 2), and *μαθήματι* (2 Sam. x. 4; 1 Chr. xix. 4), is expressive of the length of the Hebrew garments (1 Sam. iv. 12, xviii. 4), and is specifically applied to a long cloak (Judg. iii. 16; 2 Sam. xx. 8), and to the priest’s coat (Lev. vi. 19). The Greek terms *βαδαρία* and *στολή* express the corresponding idea, the latter being specially appropriate to robes of more than ordinary grandeur (1 Mac. x. 21, xiv. 9; Mark xii. 38, xvi. 35; Luke xxv. 22, xx. 46; Rev. vi. 11, xii. 9, 13); the *χτένιον* and *βαδαρία* (τάνυα, *πολλίαια, Vulg.: *veil, cloak, A. V.*) are brought into juxtaposition in Matt. v. 40 and Acts ix. 39. The *bejelg* might be worn in various ways, either wrapped round the body, or worn over the shoulders, like a shawl, with the ends or “skirts” (*παφρόγιαν, *παφρόγιαν*) hanging down in front; or it might be thrown over the head, so as to conceal the kind of shawl (Is. iii. 22), but how differing from the one just mentioned, we know not; the etymological meaning of the first name is *expanded*, of the second, *εὐποίεσθαι*; (3) *τιφλή* (*τιτιφλής, *θηραπών: veil, A. V.*), a robe worn by Bethzak or approaching Isaac (Gen. xxviii. 65), and by Tanan when she assumed the guise of a harlot (Gen. xxxvii. 14, 19); it was probably, as the LXX. represents it, a light summer dress of handsome appearance (*περίμελα* το *θηραπών* καί *εκάλως* *πάραντος*, Gen. xxxvii. 14), and of ample dimensions, so that it might be thrown over the head at pleasure; (4) *ριβόλ* (*ριβάλις: A. V.* “veil”), a similar robe (Is. iii. 23; Cant. v. 7), and substituted for the *τιφλή* in the Chaldee version: we may conceive of these robes as resembling the *pylon* of the Greeks, which might be worn over the head, as represented in Dict. of Ant. p. 885, or again as resembling the *hodhai* and *wili* of the modern Egyptians (Lane, i. 73, 75); (5) *πεθψίλ* (*πεθψίλος*: *χτένιον, μεσοσπόρων: bowing over, A. V.*), a term of doubtful origin, but probably significant of a gay holiday dress (Is. iii. 24); to the various explanations enumerated by Gesenius (Thes. p. 1137), we may add one proposed by Nauck (Arch. i. 31). *ριβόν* or *ριβίλ*, *πλευρίς, πλευρία* in which case it = *unbridled pleasure*, and has no reference to dress at all; (6) *κοπρία* (*κοπρίας, Is. iii. 23), also a doubtful word, explained in the LXX. as a transparent dress, i.e. of gauze (διαμανευρία Αλεξάνδρου): Schneider (vb. Vest. Med. R. H., p. 511) supports this view, but more probably the word means, as in the A. V., *glasse*. The garments of females were terminated by an ample border or fringe (*πολλίαια, παφρόγια: skirts, which concealed the feet* (Is. xvi. 2); Jer. xiii. 22).
DRESS

round the body, the upper parts being attached to the shoulders: another piece of the same stuff is used for the head-veil, or tarhah.

Having now completed our description of Hebrew dress, we add a few remarks relative to the selection of equivalent terms in our own language. It must at once strike every Biblical student as a great defect in our Authorized Version that the same English word should represent various Hebrew words; e.g., that "veil" should be promiscuously used for ṭēḇiḇ (Is. iii. 23), ṭēḇiḇph (Gen. xxiv. 65), mitpachath (Ruth iii. 13), meschah (Ex. xxxvi. 33); "robe" for me'īl (1 Sam. xvii. 4), cetweneth (Is. xxvii. 21), œbbereth (Jon. iii. 6), adarākh (Mic. ii. 8); "mantle" for me'īl (1 Sam. xvi. 27), œbbereth (1 K. xix. 13), me'atāphph (Is. iii. 22); and "coat" for me'īl (1 Sam. ii. 19), cetweneth (Gen. iii. 21); and conversely that different English words should be promiscuously used for the same Hebrew one, as me'īl is translated "coat," "robe," "mantle;" adarākh "robe," "mantle." Uniformity would be desirable, in as far as it can be attained, so that the English reader might understand that the same Hebrew term occurred in the original text, where the same English term was found in the translation. Beyond uniformity, correctness of translation would also be desirable; the difficulty of attaining this in the subject of dress, with regard to which the customs and associations are so widely at variance in our own country and in the East, is very great. Take, for instance, the cetweneth: at once an undergarment, and yet not unfrequently worn without anything over it; a skirt, as being worn next the skin; and a coat, as being the upper garment worn in a house: deprive the Hebrew of his cetweneth, and he was positively naked: deprive the Englishman of his coat, and he has under-garments still. The beged again: in shape probably like a Scotch plaid, but the use of such a term would be unintelligible to the minds of English peasantries: in use unlike any garment with which we are familiar, for we only wear a great-coat or a cloak in bad weather, whereas the Hebrew and his beged were inseparable. With such difficulties attending the subject, any attempt to render the Hebrew terms must be, more or less, a compromise between correctness and modern usage: and the English terms which we are about to propose must be regarded merely in the light of suggestions. Cetweneth answers in many respects to "frock": the sailor's "frock" is constantly worn next the skin, and either with or without a coat over it: the "smock-frock" is familiar to us as an upper garment, and still as a kind of undress. In shape and material these correspond with cetweneth, and like it, the term "frock" is applied to both sexes. In the sacerdotal dress a more technical term might be used: "vestment." In its specific sense as the chasuble, or orphal, would represent it very aptly. Me'īl may perhaps be best rendered "gown," for this too applies to both sexes, and, when to men, always in an official sense, as the academic gown, the alderman's gown, the barrister's gown, just as me'īl appears to have represented an official or, at all events, a special dress. In sacerdotal dress "alb" exactly meets it, and retains still, in the Greek church, the very name, ἐπίκλες, by which the me'īl is described in the LXX. The sacerdotal approach, perhaps, most nearly to the term "gown," the ἔμφαρσις of the Greek church, which we may compare with the ἔμφασις of the LXX. Ἰδιμνιον answers in several respects to "pelisse," although this term is now applied almost exclusively to female dress. Ἱδίμνον = "linen wrapper." Σιάδιθ we would render "garment," and in the "alba," as the broadest term of the kind: beged, "vestment," as being of superior quality; lebākh, "robe," as still superior: nēd, "cloak," as being long; and nūbdānā, "dress," in the special sense in which the term is not unfrequently used as = fine dress. In female costume mitpachath might be rendered "shawl," me'atāphph "mantle," tēḇiḇph "handsome dress," ṭēḇiḇph "cloak."

In addition to these terms, which we have thus far extracted from the Bible, we have in the Talmudical writers an entirely new nomenclature. The tōliṯ (tollith or tolitθ) (תולית) is frequently noticed; it was made of fine linen, and had a fringe attached to it, like the beged; it was of ample dimensions, so that the head might be enveloped in it, as was usual among the Jews in the act of prayer. The kōliṯ (תולית) was probably another name for the tōliṯ, derived from the Greek κολλίθων; Epiphanius (i. 15) represents the στρωλίς of the Pharsees as identical with the διαθεόκατον : the latter, as known to us, was a close tunic without sleeves. The čalāk (בלק) was a woolen shirt, worn as an under tunic. The mōšerōn (מפרון) was a mantle or outer garment (cf. Eightfoot, Eexactations on Matt. v. 40; Mark xiv. 51; Luke ix. 3, &c.).

Gloves (גהלים or גהל) are also noticed (Celin, xvi. 6, xxiv. 15, xxv. 3), not, however, as worn for luxury, but for the protection of the hands in manual labor.

With regard to other articles of dress, see GIRDLE; HANDKERCHIEF; HEADDRESS; HEM OF GARMENT; SANDALS; SHOES; VEIL.

The dresses of foreign nations are occasionally referred to in the Bible: that of the Persians is described in Dan. iii. 21 in terms which have been variously understood, but which may be identified with the statements of Herodotus (i. 195, vii. 61) in the following manner:—(1) The sarbādin
(λόγαρχος) A. V. = ἀναρχικὸς or ἀναχριστής, which were the distinctive features in the Persian as compared with the Hebrew dress; (2) the petiōn (πετίων) A. V. = ἄκρων εἰρήνης or inner tunic; (3) the chēthos (χέθος) A. V. = ἄλας εἰρήνης κυθών or outer tunic, corresponding to the coat of the Hebrews; (4) the lekith (λεκίθιος) A. V. = garment) = χαλκαρίδα ἀνδρός or cloak, which was worn like the bagad, over all. In addition to these terms, we have notice of a robe of state of fine linen, βερίκα (βερίκα): διάδυσμα: sericum petiōn, so called from its ample dimensions (Est. viii. 15). The same expression is used in the Chaldee for purple garments in Ez. xxvii. 16.

The references to Greek or Roman dress are few, the χάλκιον (2 Mac. xii. 35; Matt. xxvii. 28) was either the pateraum, the military scarf of the Roman soldier, or the Greek chiton itself, which was introduced under the Emperors. (Dict. of Ant. art. Chiton), it was especially worn by officers. The travelling chēth (χέθος) referred to by St. Paul (2 Tim. iv. 13) is generally identified with the Roman perna, of which it may be a corruption; the Talmudical writers have a similar name (טַלְמֵד or טַלְמֵד). It is, however, otherwise explained as a travelling case for carrying clothes or books (Onomast. St. Paul, ii. 494).

4. The customs and associations connected with dress are numerous and important, mostly arising from the peculiar form and mode of wearing the outer garments. The bagad, for instance, could be applied to many purposes besides its proper use as a vestment; it was sometimes used to carry a burden (Ex. xii. 34; Judg. viii. 25: Prov. xxx. 4), as Ruth used her shawl (Ruth iii. 15); or to wrap up an article (1 Sam. xxi. 9); or again as an impromptu saddle (Matt. xxi. 7). Its most important use, however, was a covering at night (Ex. xxi. 27; Ruth iii. 9: Ez. xvi. 8), whence the word is sometimes taken for bed-clothes (1 Sam. xiii. 11). K. I. 1): The Barabian applies his abba to a similar purpose (Niedner, Descrip. p. 56). On this account a creditor could not retain it after sunset (Ex. xxii. 12, 13; cf. John vi. 6, xiv. 7; Am. ii. 8). The custom of placing garments in pew appears to have been very common, so much so that ἐπέδρασε, pledge = a garment (Deut. xxiv. 12, 14); the accumulation of such pledges is referred to in Hab. ii. 6 (ὅτου ἔθεν εαυτὸν ἄκρως, i.e. ἀπέδρασε, where the A. V. following the LXX. and Vulg. reads ἐπέδρας, a thick day); this custom prevailed in the time of our Lord, who bids his disciples give up the ἱματίαν, bagad, in which they slept, as well as the κέπος (Matt. xvi. 10). At the present day it is not unusual to size the ἀπόθεμα as compensation for an injury: an instance is given in Wortel's Syr. i. 263.

The loose flowing character of the Hebrew robe admitted of a variety of symbolical actions; rendering them expressive of various emotions, as grief (Gen. xxxiv. 34; Jud. i. 29; 2 Sam. ii. 21) mourning, fear (1 K. xvi. 27; 2 K. xxii. 19), indignation (2 K. v. 7, xi. 14; Matt. xvi. 65), or despair (Judg. xi. 35; Esth. iv. 1): generally the outer garment alone was thus used (Gen. xxxvii. 34; Job i. 20, ii. 12), occasionally the inner (2 Sam. xv. 32), and occasionally both (Ezra. ix. 3; Matt. xxvi. 65, compared with Mark xiv. 63). Shaking the garments, or shaking the dust off them, was a sign of renunciation (Acts vii. 53); spreading them before a person, of loyalty and joyous reception (2 K. ix. 13; Matt. xxi. 8): wrapping them round the head, of awe (1 K. xiii. 13), or of grief (2 Sam. xv. 30; Esth. vi. 12; Jer. xiv. 3, 4); casting them off, of excitement (Acts xxii. 23); laying hold of them, of supplication (1 Sam. xv. 27; Is. iii. 6, iv. 1; Zech. viii. 23).

The length of the dress rendered it inconvenient for active exercise; hence the outer garments were either left in the house by a person working close by (Matt. xxviii. 14), or were thrown off when the occasion arose (Mark x. 50; John xiii. 47; Acts v. 38); or, if this was not possible, as in the case of a person travelling, they were girded up (1 K. xviiii. 46; 2 K. iv. 20, ix. 1: 1 Pet. i. 13); on entering a house the upper garment was probably laid aside and resumed on going out (Acts xii. 8). In a sitting posture the garments concealed the feet; this was held to be an act of reverence (Is. vi. 2; see Louth's note). The proverbial expression in 1 Sam. xxiv. 22: 1 K. xiv. 10, xvi. 21: 2 K. ix. 8, probably owes its origin to the length of the garments, which made another habit more natural (cf. Her. ii. 35; Xen. Cyrop. i. 2, § 16; Ammian. Marcell. xiii. 6): the expression is variously understood to mean the honest or the unfastened of the people (Gen. xxxi. 30; John xxvii. 28; Neh. iii. 5).

The putting on and off of garments, and the case with which it was accomplished, are frequently referred to: the Hebrew expressions for the first of these operations, as regards the outer robe, are ἐπέδρας, to put on, ἔπεδρας, and ἔπεδρας, lit. to cover, the three latter having special reference to the amplitude of the robes; and for the second ἐπέδρας, lit. to expand, which was the natural result of taking off a wide, loose garment. The case of these operations forms the point of comparison in 's. cii. 26; Jer. xiii. 12. In the case of closely fitting robes the expression is ἐπέδρας, lit. to gird, which is applied to the ephod (1 Sam. i. 18; 2 Sam. vi. 14), to sackcloth (2 Sam. iii. 31; Is. xxxvii. 1); Jer. xiv. 4). The sense of the term may illustrate Gen. iii. 7, where the garments used by our first parents are called ἐπέδρας (A. V. = aprons), probably meaning such as could be wound round the body. The converse term is ἐπεδρασμός, to loosen, or uncover (Ps. xxx. 11: Is. xx. 2).

The number of suits possessed by the Hebrews was considerable. A single suit consisted of an under and upper garment, and was termed ἄναρχος (stoiχος) Ἰατρική, i.e. apperiments vestis LXX.: Judg. xvii. 10). Where more than one is
spoken of, the suits are termed ἀλαχοῦσα στολή; cf. Hom. Od. viii. 249, ὑπάρχοντας: changes of raiment, A. V.). These formed in ancient times one of the most usual presents among Orientals (Harmer, Observations, ii. 379 ff.); five (Gen. xxiv. 22) and even ten changes (2 K. v. 5) were thus presented, while as many as thirty were proposed as a wager (Judg. xiv. 12, 19). The highest token of affection was to present the robe actually worn by the giver (1 Sam. xviii. 4; cf. Hom. Il. ii. 320; Harmer, ii. 385). The presentation of a robe in many instances amounted to installation or investiture (Gen. xii. 42; Esth. viii. 15; Is. xxii. 21; cf. Morier, Second Journey, p. 93); on the other hand, taking it away amounted to dismissal from office (2 Macc. iv. 38). The production of the best robe was a mark of special honor in a household (Luke xv. 22). The number of robes thus received or kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job xxvii. 16; Matt. vi. 19; James v. 2), so that to have clothing = to be wealthy and powerful (Is. iii. 6, 7). On grand occasions the entertainer offered becoming robes to his guests (Trench on Parables, p. 231). Hence in large households a wardrobe ἀλαχοῦσα, was required for their preservation (2 K. x. 22; cf. Harmer, ii. 382), superintended by a special officer named ἀπόθηκος, keeper of the wardrobe (2 Chr. xxxiv. 22). Robes reserved for special occasions are termed ἀλαχοῦσα (A. V. "changeable suits"); Is. iii. 22; Zech. iii. 4), because laid aside when the occasion was past.

The color of the garment was, as we have already observed, generally white; hence a spot or stain readily showed itself (Is. ixii. 3; Jude 23; Rev. iii. 4): reference is made in Lev. xiiii. 47 ff. to a greenish or reddish spot of a leprous character. Jain (Archæol. i. 8, § 135) conceives this to be not the result of leprosy, but the depredations of a small insect: but Schilling (de Lepor. p. 192) maintains that leprosy taints clothes, and adds that certain unripe oleander-berries and toads increasement expressed upon the garment sub leprosum; a tract of the same name, of which the Hebrew expression is the Hebrew form (Knobel, Comm. in l. c.). Frequent washings and the application of the fuller's art were necessary to preserve the purity of the Hebrew dress. [SOAP, FULLER.

The business of making clothes devolved upon women in a family (Prov. xxvii. 22; Acts ix. 39); little art was required in what we may term the tailoring department; the garments came forth for the most part ready-made from the loom, so that the weaver superintended the tailor. The references to sewing are therefore few: the term ἀλαχοῦσα (Gen. iii. 7; Job xvi. 13; Eccl. iii. 7; Ez. xiii. 18) was applied by the later Jews to mourning rather than making clothes. The Hebrews were liable to the charge of ex- travagance in dress; Isaiah in particular (iii. 16 ff) ditates on the numerous robes and ornaments worn by the women of his day. The same subject is referred to in Jer. iv. 30; Ez. xvi. 10; Zeph. i. 8, and in a later age Tim. i. 9; 1 Pet. iii. 3. W. L. B.

a "Sicca Hebrew seronim ornare omnia potius non mepatur, quin inebriari potest, sive ulla, quo frumentum contineat, utrum pomerum sacer, aut cum tavi decoquantur in dulcem et barbarum poisonem, aut palmarum frueus ex- perfumantur in virgine, coquista frueus aqua pli gior colorantur."
DROMEDARY

It is not improbable that the Hebrews applied *recess* to this purpose in the simple manner followed by the Arabsians (Burchhardii, ii. 377), namely, by putting them in jars of water and burying them in the ground until fermentation takes place.

W. L. B.

DROMEDARY. The representative in the A. V. of the Heb. word *be'er or beriah, recess* and *romanic.* As to the two former terms, see under Canaan.

1. *Recess* (רְכֵ֫שׁ骑行, *recess,* *recedarrii*) is variously interpreted in our version by "dromedaries" (1 K. iv. 28), "mules" (Esth. viii. 10, 14), "swift beasts" (Mic. i. 13). There seems to be no doubt that *recess* denotes "a superior kind of horse," such as would be required when dispatch was necessary. See Gesenius (Thes. s. v.).

2. *Romane* (רומנִּי, *LXX. and Vulg. omit) occurs only in plural form in Esth. viii. 10, in connection with *hew;* "sons;" the expression *hew ranamochim* being an exegesis of the Heb. word *achashertanim,* "mules, the sons of mares." The Heb. רומני, "a mare," which the A. V. renders incorrectly "dromedary," is evidently alluded to the Arab. アルメン, "a brood-mare." W. H.

* DROPPING, A CONTINUAL. It is said in Prov. xxvii. 15, that "a continual dropping in a rainy day and a contentious woman are alike." The LXX. gives as the sense of this: "Drops of rain in a wintry day drive a man out of his house; in the same manner also does an abusive woman." The force of this comparison becomes evident when we knew something of the construction of ordinary houses in the East. Many of them have mud-covered roofs; and hence the rains, especially if violent and protracted, are liable to hose such coverings and allow the water, according to the extent of the injury, to drop or pour down upon the hapless inmates. Mr. Hartley (Travels in Asia Minor), relates an experience of his own which illustrates this inconvenience: "Last night we retired to rest in what appeared to be one of the best rooms which we have occupied during the journey; but at midnight we were roused by the rain descending through the roof; and were obliged to rise and seek shelter from the incessant dropping, in the corridor, which was better protected."

On the roofs of many houses (the writer observed this most frequently in northern Syria) they keep a cylindrical rolling-stone which the people employ, especially after a shower, for the purpose of smoothing and hardening the softened earth through which the rain so easily penetrates. This precaution will sometimes aggravate the evil. F. Le Play relates (Histoire des Eglises, &c. p. 283) 1852 that, being overtaken by a sudden shower at night, he took refuge in a house near Beir-el-Kamar, on Mount Lebanon. Ere long the rain softening the mud on the roof and began to pour down on his bed. The family sent out one of their number to fill up the crevices and draw away the stone-roller, but in addition to the rain, heaps of stone and rubbish were precipitated on him, and he was compelled to beg his host to forego the well-meant kindness. He passed a sleepless night, and hailed the earliest dawn as the signal for departure.

We see therefore how much the proverb expressed, when it says, that "a continual dropping in a rainy day and a contentious woman are alike."

II.

DRUSILLA (Δροσίλλα, daughter of Herod Agrippa I. (Acts xii. 1, 19 ff.) and Cyprus; sister of Herod Agrippa II. She was at first betrothed to Antiochus Epiphanes, prince of Commagene, but he refusing to become a Jew, was married to Aizicus, king of Euneus, who complied with that condition (Ant. xx. 7, § 1). Soon after, Felix, procurator of Judea, brought about her seduction by means of the Cyrian sorcerer Simon, and took her as his wife (ib. 7, § 2). In Acts xxviv. 24, we find her in company with Felix at Cesarea, on occasion of St. Paul being brought before the latter; and the narrative implies that she was present at the Apostle's preaching. Felix had by Drusilla a son named Agrippa, who, together with his mother, perished in the eruption of Vesuvius under Titus (Joseph. l. c.; comp. Tac. Hist. v. 9).

* DUKE (from the Latin dux) as employed in the English Bible (Gen. xxxvi. 15, 40; Ex. xv. 22, Josh. xiii. 21, &c.) differs widely from the present usage. In the older English writers it often meant simply leader, chieftain, and is so used (A. V.) of the heads or shiefs of Arab clans which come forward so often in the earlier Hebrew history. See Eastwood and Wright's Bible Word-Book.

DULCIMER (Συμφωνική, *symphonia,* a musical instrument, not in use amongst the Jews of Palestine, but mentioned in Daniel, iii. 15, and at ver. 10 under the shorter form of *Συμφνια,* along with several other instruments, which Nebuchadnezzar ordered to be sounded before a golden image set up for national worship during the period of the captivity of Judah. Luther translates it *lute.* Grothus adopts the view of Servins, who considers symphonien to be the same word as the Hebrew *šzayim (אָשָּׂעָיִם),' and Ephraim Benjamin *shabadim (אֱשָׂבָדִים),' who speak of it as a long drum. Raddi Saadia Gaon (Comm. on Dan.) describes the *symphonien* as the log-pipe, an opinion adopted by the author of Shelte kay-Gibborim (Joch Brill's Preface to Mendelssohn's version of the Psalms), by Kircher, Bartoccius, and the majority of Biblical critics. The same instrument is still in use amongst peasants in the N. W. of Asia and in Southern Europe, where it is known by the similar name *symphonie* or *zapaion.* With respect to the etymology of the word a great difference of opinion prevails. Some trace it to the Greek *συμφωνεῖα,* and Calmet, who inclines to this view, expresses astonishment that a pure Greek word should have made its way into the Hebrew tongue; it is probable, he thinks, that the instrument Polterm (A. V.) was introduced into Babylon by some Greek in Western Asia, who seized upon Phoenician harps, and who was taken prisoner by Nebuchadnezzar during one of his campaigns on the coast of the Mediterranean. Others, with far greater probability, regard it as a Semitic word, and connect it with מלחם, "a tule" (First).
The word דּוֹמָה, occurs in the Talmud (Succe. 30b), where it evidently has the meaning of an air-pipe. Landau (Aruch, art. דּוֹמָה) considers it synonymous with siphon. Ibn Yahia, in his commentary on Dan. iii. 5, renders it by יְיָגָרַע (Bygaray), organ, the well-known powerful musical instrument, composed of a series of pipes. Rabah Eliaus, whom Buxtorf quotes (Lexic. Talmud. col. 1564), translates it by the German word Lectar (Lyre).

The old-fashioned spinet, the precursor of the harpsichord, is said to have resounded in tone the ancient dulcimer. The modern dulcimer is described by Dr. Busby (Dict. of Music) as a triangular instrument, consisting of a little chest, strung with about fifty wires cast over a bridge fixed at each end; the shortest wire is 18 inches in length, the longest 30; it is played with two small hammer heads held in the hands of the performer.

D. W. M.

DU'MAH (דּוֹמָה) [silence]: [in Gen., דּוֹמָה (Alex. בּוֹמָה: in 1 Chr.), בּוֹמָה (Comp. דּוֹמָה; in Is.), בּוֹמָה (Dumah), a son of Ishmael, most probably the founder of the Ishmaelite tribe of Arabia, and thence the name of the principal place, or district, inhabited by that tribe. In Gen. xxv. 14, and 1 Chr. i. 30, the name occurs in the list of the sons of Ishmael; and in Isaiah (xxi. 11), in the "burden of Dumah," coupled with Seir, the forest of Arabia, and Kedar. The name of a town in the northwestern part of the peninsula, דומאכ-הלכל (Dumah-el-Jendel), is held by Gesenius, and other German authorities, to have been thus derived; and the opinion is strengthened by Arab traditions, who have the same belief (Mir-it ex-Zemanim). The latter, however, err in writing דומאכ-הלכל, (Dumah-el-Jendel)" (דּוֹמָה יְנֵדָל) or דומאכ-הלכל (Dumah-el-Jendel) (דּוֹמָה יְנֵדָל), signifying "Dumah of the stones or blocks of stone," of which it is said to have been built (Silikh, M.S., Marxvisit, and Mushmuthak, s. v.); not the "stony Dumah," as Europeans render it. El-Jendel is said by some to mean "stones such as a man can lift" (Kamoses), and seems to indicate that the place was built of unsawn or Cyclopean masonry, similar to that of very ancient structures. The town itself, which is one of the "Kirse'iyat" of Wadli-b-Kura b (Marxivit, s. v. Dumah), appears to be called "Dumahc-el-Jendel," and the fortress which it contains, to have the special appellation of "Mirdel" (מְרֵיָד).

It should be observed that there are two "Doomahs"; one that named in this article, and D. el-Eriah. The chief of one, a contemporary of Volamned, is said to have founded the other, or to have given it the name of D.; but most Arab authorities, and probability also, are in favor of the prior antiquity of the former.

E. S. P.

DU' MAH (דּוֹמָה) [silence, i. e. land of]: "Pemah; Alex. [Comp. Ald.] פּוֹמָה: Pomea), a city in the mountainous district of Judah, near Hebron (Josh. xv. 32). In the Onomasticon of Eusebius and Jerome it is named as a very large place (σαπνος κεπαρισσα), 12 miles from Eleutheropolis, in the district of Daroma (i. e. "the south," from the Hebrew דּוֹמָה). Eleutheropolis not being certainly known, this description does not afford much clue. Robinson passed the ruins of a village called ed-Dumah, 6 miles southwest of Hebron (Rob. i. 212), and this may possibly be Dumah. (See also Kiepert's Map, 1856; and Van de Velde's Memoir, 308)." G.

DUNG (דּוֹנֵג, פּוֹנֵה, פּוֹנָה), the latter always, and the two former generally, applied to men; מְנַה, פּוֹנָה, פּוֹנֵה, to brutes animals, the second exclusively to animals offered in sacrifice, and the third to the dung of cows or camels. The uses of dung were twofold, as manure, and as fuel. The manure consisted either of straw steeped in liquid manure (דּוֹנֵג פּוֹנָה, פונַּה, lit. in dung water, Is. xxv. 10), or the sweepings (דּוֹנֵג פּוֹנַּה, is. v. 25) of the streets and roads, which were carefully removed from about the houses and collected in heaps (דּוֹנֵג פּוֹנַּה) outside the walls of the towns at fixed spots (hence the dung-gate at Jerusalem, Neh. ii. 14), and thence removed in due course to the fields (Mishn. Shab. 3, § 1-3). To sit on a dung-heap was a sign of the deepest degradation (1 Sam. ii. 8; Ps. cxvii. 7; Lam. iv. 5; cf. Job ii. 8, LXX. and Vulg.). The mode of applying manure to trees was by digging holes about their roots and inserting it (Lake xiii. 8), as still practiced in Southern Italy (Trench, Paroibis, p. 355). In the case of sacrifices the dung was burnt outside the camp (Ex. xxvii. 17; Num. xvi. 11), which would tend to increase the extreme opprobrium of the threat in Mal. ii. 3. Particular directions were laid down in the law to enforce cleanliness with regard to human ordure (Deut. xxii. 12 ff.): it was the grossest insult to turn a man's house into a receptacle for it (דּוֹנֵג פּוֹנַּה, 2 K. x. 27; פונַּה, Ezr. vi. 11; Dan. ii. 5, iii. 29, "dunghill" A. V.); public establishments of that nature are still found in the large towns of the East (Russell's Aleppo, i. 34). The expression to "cast out as dung" implied not only the offensiveness of the object, but also the idea of removal (1 K. xiv. 10), and still more exposure (2 K. ix. 57; Jer. viii. 2). The reverence of the later Hebrews would not permit the pronunciation of some of the terms used in Scripture, and accordingly more delicate words were substituted in the margin (2 K. vi. 25, x. 27, xvii. 27; Is. xxxvi. 12). The occurrence of such names as Gilgal, Dinmah, Madmanah, and Madmannah, shows that these ideas of delicacy did not extend to ordinary matters. The termเณ Không ("dung")

* Keil (Josua, p. 125) and Kloekel (Josua, p. 487) recognize Dumah in this et-Dumah, though Robinson (i. 222, 2d ed.) expresses no opinion. van Paltino, p. 154, the All. J. J. S. this identification.

H.
EAGLE

EAGLE (בכר, neper: alternat. aqueola). The Hebrew word, which occurs frequently in the O. T., may denote a particular species of the Falcoidea, as in Lev. xi. 13, Deut. xiv. 12, where the neper is distinguished from the cattifis, osprey, and other raptorial birds; but the term is used also to express the griffon vulture (Vultur fulvus) in two or three passages.

At least four distinct kinds of eagles have been observed in Palestine, namely, the golden eagle (Aquila chrysaetos), the spotted eagle (A. clarea), the commonest species in the rocky districts (see T璀, i. 23), the imperial eagle (Aquila heliaca), and the very common Gierfalkus gourcic, which preys on the numerous sheep of Palestine (for a figure of this bird see Osmery). The Hebrew neper may stand for any of these different species, though perhaps more particular reference to the golden and imperial eagles and the griffon vulture may be intended.\(^a\)

The eagle's swiftness of flight is the subject of frequent allusion in Scripture (Deut. xxviii. 49, 2 Sam. i. 29; Jer. iv. 13, xiii. 22; Lam. iv. 19, 20); its mounting high into the air is referred to (in Job xxxiv. 27; Prov. xxiii. 5, xxx. 19; Is. xi. 31; Jer. xiii. 16); its strength and vigor (in Ps. cii. 5); its predaceous habits (Job ix. 26; Prov. xxx. 17); its sitting in high places (in Jer. xiii. 16); the care in training its young to fly (in Ex. xiii. 4; Deut. xxxii. 11); its powers of vision (in Job xxxiv. 29).

The passage in Is. i. 16, "Enlarge thy baldness as the eagle," has been understood by Bochart (Hier., ii. 744) and others to refer to the eagle at the time of its molting in the spring. Oedmann (Vermisch. Samt., i. 64) erroneously refers [?] the baldness spoken of by the prophet to point to the".

\(^a\) The modern Arabic term for the Grifon Vulture, including the V. anatolica and V. cuerois, is Neper. This word is never applied to the Neophron Percar- teri tus of Besch. and may be called a "eagle with a specific adjective for various species. I am inclined, therefore, to restrict the Heb. Neper to the majestic Vultur, every scriptural charac-
Vultur barbatus (Grypetus), the bearded vulture or lammergeyer, which he supposed was bald. It appears to us to be extremely improbable that there is any reference in the passage under consideration to eagles moulting. Allusion is here made to the custom of shaving the head as a token of mourning; but there would be little or no appropriateness in the comparison of a shaved head with an eagle at the time of moulting. But if the neshar is supposed to denote the griffon vulture (Vultur fulvus), the simile is peculiarly appropriate; it may be remarked that the Hebrew verb kareach (כַּרְאָךְ) signifies "to make bald on the back part of the head;" the notion here conveyed is very applicable to the whole head and neck of this bird, which is destitute of true feathers.

Aquila Helicea.

With reference to the texts referred to above, which compare the watchful and sustaining care of his people by the Almighty with that exhibited by the eagle in training its young ones to fly, we may quote a passage from Sir Humphry Davy, who says, "I once saw a very interesting sight above one of the crags of Ben Nevis, as I was going in the pursuit of black game. Two parent eagles were teaching their offspring, two young birds, the manoeuvres of flight. They began by rising from the top of the mountain, in the eye of the sun. It was about midday, and bright for this climate. They at first made small circles, and the young birds imitated them. They paused on their wings, waiting till they had made their first flight, and then took a second and larger gyration; always rising towards the sun, and enlarging their circle of flight so as to make a gradually ascending spiral. The young ones still and slowly followed, apparently flying better as they mounted; and they continued this sublime exercise, always rising, till they became mere points in the air, and the young ones were lost, and afterwards their parents, to our aching sight." The expression in Ex. and Deut. (lx. cc.), "beareth them on her wings," has been understood by Biblical writers and others to mean that the eagle does actually carry her young ones on her wings and shoulders. This is putting on the words a construction which they by no means are intended to convey; at the same time, it is not improbable that the parent bird assists the first efforts of her young by flying under them, thus sustaining them for a moment, and encouraging them in their early lessens.

In Ps. cii. 5 it is said, "Thy youth is renewed like the eagle's;" (see also Is. xi. 31). Some Jewish interpreters have illustrated this passage by a reference to the old fables about the eagle being able to renew his strength when very old (see Bochart, Hieroz. ii. 747). Modern commentators for the most part are inclined to think that these words refer to the eagle after the moulting season, when the bird is more full of activity than before. We much prefer Hengstenberg's explanation on Ps. cii. 5, "Thy youth is renewed, so that in point of strength thou art like the eagle."

The aërol of Matt. xxiv. 28, Luke xvii. 37, may include the Vultur fulvus and Neophron percnopterus; though, as eagles frequently prey upon dead bodies, there is no necessity to restrict the Greek word to the Vulturide. The figure of an eagle is now and has been long a favorite militarv ensign. The Persians so employed it; which fact illustrates the passage in Is. xlv. 11, where Cyrus is alluded to under the symbol of an "eagle" (גָּקְרָךְ) or "ravenous bird" (comp. Xenoph. Cyrop. vii. 4). The same bird was similarly employed by the Assyrians and the Romans. Eagles are frequently represented in Assyrian sculptures attending the soldiers in their battles; and some have hence supposed that they were trained birds. Considering, however, the wild and intractable nature of eagles, it is very improbable that this was the case. The representation of these birds was doubtless intended to portray the common feature in Eastern battle-field scenery, of birds of prey awaiting to satisfy their hunger on the bodies of the slain.

W. H.

E'AXES (MÁNAS; [Alth. 'Háns]; Ennæ), 1 Esdr. ix. 21, a name which stands in the place of HAREM, MAASELIX, and ELIJAH, in the parallel list of Ezra x. It does not appear whence the translators obtained the form of the name given in the A. V.

* Here, as in many other instances in the Apocrypha, the form of the name in the A. V. is derived, either directly or indirectly, from the Aldine edition.

A. * EAR used as a verb (from the Lat. arare through the Anglo-Saxon erian) in Deut. xxi. 4: 1 Sam. viii. 12; Is. xxx. 24 (A. V.), meant "to plough" or "till," at the time when our English version was made. So in Shakespeare (Rich. II., iii. 2):—

"And let them go
To ear the land that hath some hope to grow."

See Eastwood and Wright's Bible Word-Book, p. 168 (Lond. 1866).

* EARING (from the Anglo-Saxon ering) occurs in Gen. xlv. 6 and Ex. xxxiv. 21 (A. V.), where, according to the present English usage, we should write "ploughing" for "earring," and "ploughing-time" for "caring-time." Thus "ear

ing," at present (so liable to be taken in the sense of putting forth ears) suggests almost the opposite of the true meaning.

H. * It is necessary to remember that no true eagle will kill for himself if he can find dead flesh.

H. B. T.
EARNEST. This term occurs only thrice in the A. V. (2 Cor. i. 22, v. 5; Eph. i. 14). The equivalent in the original is ἀποθήκη, a Grecian form of ἀπόθεμα, which was introduced by the Phoenicians into Greece, and also into Italy, where it reappears under the forms κρυβόλου και ψηφών. It may again be traced in the French arêche, and in the old English expression Earl's or Aile's money. The Hebrew word was used generally for pledge (Gen. xxxviii. 17), and in its cognate forms for security (Prov. xvii. 18) and bondage (2 K. xiv. 14). The Greek derivative, however, acquired a more technical sense as signifying the deposit paid by the purchaser on entering into an agreement for the purchase of anything (Suid. l.c. s. v.). A similar legal and technical sense attaches to earnest, the payment of which places both the vendor and the purchaser in a position to enforce the carrying out of the contract (Blackstone, ii. 39 [which see]). There is a marked distinction between pledge and earnest in this respect, that the latter is a part-payment, and therefore implies the identity in kind of the deposit with the future full payment; whereas a pledge may be something of a totally different nature, as in Gen. xxxviii., to be resumed by the depositor when he has completed his contract. Thus the expression "earnest of the Spirit" implies, beyond the idea of security, the identity in kind, though not in degree, and the continuity of the Christian's privileges in this world and in the next. The payment of earnest-money under the name of earnest is still one of the common occurrences of Arab life. W. L. B.

EAR-RINGS. The word אֶתְרִיָּה (by which these ornaments are usually described, is unfortunately ambiguous, originally referring to the nose-ring (as its root indicates), and thence transferred to the ear-ring. The full expression for the latter is אֶתְרַיָּה (Gen. xxxv. 4), in contradistinction to אֶתְרִיָּה (Gen. xcvii. 47). In the majority of cases, however, the kind is not specified, and the only clue to the meaning is the context. The term occurs in this undefined sense in Judg. viii. 24; Job xii. 11; Prov. xxv. 12; Hos. ii. 13. The material of the ear-ring was generally gold (Ex. xxvi. 2), and its form circular, as we may infer from the name אֶתְרַיָּה, by which it is described (Num. xxxi. 50; Ez. xvi. 12); such was the shape usual in Egypt (Wilkinson's Egyptian, iii. 350). They were worn by women and by youth of both sexes (Ex. l.c.). It has been inferred from the passage quoted, and from Judg. viii. 24, that they were not worn by men; these passages are, however, by no means conclusive. In the former an order is given to the men in such terms that they could not be mentioned, though they might have been implicitly included; in the latter the amount of the gold is the peculiarity adverted to, and not the character of the ornament; a peculiarity which is still noticeable among the inhabitants of southern Arabia (Wellden's Travels, i. 324). The mention of the same in Ex. xxvii. 2 (which, however, is omitted in the LXX.) is in favor of their having been worn; and it appears unlikely that the Hebrews presented an exception to the almost universal practice of Asia, both in ancient and modern times (Winer, Realwörter, s. v. Ohringen). The ear-ring appears to have been regarded with superstitious reverence as an amulet; thus it is named in the Chaldee and Samaritan versions מַעֲרָשׂ, a holy thing; and in Is. iii. 20 the word מַעֲרָשׂ, properly amulets, is rendered in the A. V., after the LXX. and Vulg., ear-rings. [AMULET.] On this account they were surrounded along with the idols by Jacob's household (Gen. xxxv. 4). Chardin describes ear-rings, with talismanic figures and characters on them, as still existing in the East (Brown's Antiquities, ii. 365). Jewels were sometimes attached to the rings; they were called מַעֲרָשׂים (from מַעֲרָשׂ, a drop), a word rendered in Judg. viii. 26, squamae: ornamental, or small beads, A. V. and in Is. iii. 19, καλλίτατα: tringa or small balls, A. V. The size of the ear-rings still worn in eastern countries far exceeds what is usual among ourselves (Harmer's Observations, iv. 311, 314); hence they formed a handsomely present (Job xii. 11), or offering to the service of God (Num. xxxi. 50).

EAR-RINGS. This term is used in two widely different senses: (1) for the material of which the earth's surface is composed; (2) as the name of the planet on which man dwells. The Hebrew language discriminate between these two by the use of separate terms, Adamab (תַּאֲדֹנָא) for the former, Earth (תַּאֲדֹנָא) for the latter. As the two are essentially distinct, we shall notice them separately.

1. Adamah is the earth in the sense of soil or ground, particularly as being susceptible of cultivation; hence the expression ish adamah for an agriculturist (Gen. ix. 20). The earth supplied the elementary substance of which man's body was formed, and the terms adam and adamah are brought into juxtaposition, implying an etymological connection (Gen. ii. 7). [ADAMAH.] The opinion that man's body was formed of earth prevailed among the Greeks (Hesiod, Op. et Di. 61, 70; Plat. Rep. p. 268), the Romans (Virg. Georg. ii. 341; Ovid, Met. i. 82), the Egyptians (Hor. Serm. i. 10), and other ancient nations. It is evidently based on the observation of the material into which the body is resolved after death (Job x. 9; Eccl. vii. 7). The law prescribed earth as the material out of which altars were to be raised (Ex. xx. 24); Isaiah (Symb. i. 488) sees in this a reference to the name adamah; others with more reason compare the new couple of the Romans (Th. Trist. v. 3, 9); Hor. Od. iii. 8, 4, 5, and view it as a precept of simplicity. Naaman's request for two mules bar-
I. The earth was regarded not only as the central point of the universe, but as the universe itself: every other body—the heavens, sun, moon, and stars—being subsidiary to, and, as it were, the complement of the earth. The Hebrew language has no expression equivalent to our universe: "the heavens and the earth." (Gen. i. 1, xiv. 19; Ex. xxxi. 17) has been regarded as such: but it is clear that the heavens were looked upon as a necessary adjunct of the earth—the curtain of the tent in which the ark of the covenant (Ex. xxv. 22), the singular vessel which fitted the sphere below (comp. Job xxii. 14, and Isa. xxv. 22)—designed solely for purposes of beneficence in the economy of the earth. This appears from the account of its creation and offices: the existence of the heaven was not prior to or contemporaneous with that of the earth, but subsequent to it; it was created on the second day (Gen. i. 6). The term under which it is described, rokit (םוּל), is significant of its extension, that it was stretched out as a curtain (Ps. civ. 2) over the surface of the earth. Moreover it depended upon the earth; it had its "foundations" (2 Sam. xxix. 8) on the edges of the earth's circle, where it was supported by the mountains as by massive pillars (Job xxvi. 11). Its offices were (1) to support the waters which were above it (Gen. i. 7; Ps. cxxxviii. 4), and thus to form a mighty reservoir of rain and snow, which were to pour forth through its windows (Gen. vii. 11; Is. xxiv. 18) and doors (Ps. lxxxiv. 23), as through opened sluice-gates, for the fructification of the earth; (2) to serve as the sub- stratum (στήριξις or firmament) in which the celestial bodies were to be fixed. As with the heaven itself, so also with the heavenly bodies; they were regarded solely as the ministers of the earth. Their offices were (1) to give light: (2) to separate between day and night; (3) to be for signs, as in the case of eclipses or other extraordinary phenomena; for seasons, as regulating sowing and harvest, summer and winter, as well as religious festivals; and for days and years, the length of the former being dependent on the sun, the latter being estimated by the motions both of sun and moon (Gen. i. 14-18); so that while it might truly be said that they held "dominion" over the earth (Job xxviii. 33), that dominion was exercised solely for the convenience of the tenants of the earth (Ps. civ. 19-23). So entirely indeed was the existence of heaven and the heavenly bodies designed for the earth, that with the earth they shall simultaneously perish (2 Pet. iii. 10); the curtain of the tent shall be rolled up and the stars shall be scattered off (Is. lxiv. 4; Matt. xxiv. 29)—their sympathy with earth's destruction being the counterpart of their joyous song when its foundations were laid (Job xxxvii. 7).

2. The earth was regarded in a twofold aspect,....
in relation to God, as the manifestation of his infinite attributes; in relation to man, as the scene of his abode. (1.) The Hebrew cosmogony is based upon the leading principle that the universe exists, not independently of God, by any necessity or any inherent power, nor yet contemporaneously with God. Creation is co-existent with him; yet in opposition to God, as a hostile element, but dependently upon him, subsequently to him, and in subjection to him. The opening words of Genesis express in broad terms this leading principle; however difficult it may be, as we have already observed, to express this truth adequately in human language, yet there can be no doubt that the subordination of matter to God in every respect is implied in that passage, as well as in other passages, too numerous to quote, which comment upon it. The same great principle runs through the whole history of creation: matter owed all its forms and modifications to the will of God: in itself dull and inert, it received its first vitalising capacities from the influence of the Spirit of God breathing over the deep (Gen. i. 2); the progressive improvements in its condition were the direct and miraculous effects of God's will; no interruption of secondary causes is recognized: “He spake and it was” (Ps. xxxiii. 9); and the pointed terseness and sharpness with which the writer sums up the whole transaction in the three expressions “God said,” “it was so,” “God saw that it was good”—the first declaring the divine volition, the second the immediate result, the third the perfection of the work—harmonizes aptly with the view which he intended to express. Thus the earth became in the eyes of the prime Hebrew, a scene on which the Divine perfections would be displayed: the heavens (Is. xix. 1), the earth (Is. xxiv. 1, civ. 24), the sea (Job xxvi. 10; Ps. lxxix. 9; Jer. v. 22), “mountains and hills, fruitful trees and allcheckboxes, beasts and all cattle, creeping things and flying fowl” (Ps. cxviii. 9, 10), all displayed one or other of the leading attributes of His character. So also with the ordinary operations of nature—the thunder was His voice (Job xxxvii. 5), the lightnings His arrows (Ps. lxxvi. 17), wind and rain His messengers (Is. exviii. 5). The earth, quake, the eclipse, and the comet, the signs of His presence (Job ii. 10; Matt. xxiv. 23; Luke xxii. 25).

(2.) The earth was regarded in relation to man, and accordingly each act of creation is a preparation of the earth for his abode—light, as the primary condition of all life; the heavens, for purposes already detailed; the dry land, for his home: “grass for the cattle and herb for the service of man” (Ps. civ. 14); the alternation of day and night, the one for his work and the other for his rest (Ps. civ. 23); fish, fowl, and flesh for his food; the beasts of burden, to lighten his toil. The work of each day of creation has its specific application to the requirements and the comforts of man, and is recorded with that special view.

3. Creation was regarded as a progressive work—a gradual development from the inferior to the superior orders of things. Thus it was with the earth's surface, at first a chaotic mass, estate and empty, well described in the paronomastic terms toin, bold, overspread with waters and enveloped in darkness (Gen. i. 2), and thence gradually brought into a state of order and beauty so conspicuous, as to have led the Latins to describe it by the name Mundus. Thus also with the different portions of the universe, the earth before the light, the light before the firmament, the firmament before the dry land. Thus also with light itself, at first the elementary principle, separated from the darkness, but without defined boundaries; afterwards the illuminating bodies with their distinct powers and offices—a progression that is well expressed in the Hebrew language by the terms of and malbr (anf, l-irr). Thus also with the orders of living beings: firstly, plants; secondly, fish and birds; thirdly, cattle; and lastly, man. From “good” in the several parts to “very good” as a whole (Gen. i. 31), such was its progress in the judgment of the Omnimonstrous workman.

4. Order involves time; a succession of events implies a succession of periods; and accordingly Moses assigns the work of creation to six days, each having its specific portion—light to the first, the firmament to the second, the dry land and plants to the third, the heavenly bodies to the fourth, fish and fowl to the fifth, beasts and man to the sixth. The manner, in which these acts are described as having been done, precludes all idea of time in relation to their performance: it was miraculous and instantaneous; “God said,” and “it was” (Gen. i. 3). Hence the thought was that consequently the individuality of the acts, does involve an idea of time as elapsing between the completion of one and the commencement of another; otherwise the work of creation would have resolved itself into a single continuous act. The period assigned to each individual act is a day—the only period which represents the entire cessation of a work through the interposition of night. That a natural day is represented under the expression “evening was and morning was,” admits, we think, of no doubt; the term “a day” alone may refer sometimes to an indefinite period contemporaneous with a single event; but when the individual parts of a day, “evening and morning” are specified, and when a series of such days are noticed in their numerical order, no analogy of language admits of our understanding the term in anything else than its literal sense. The Hebrews had no other means of expressing the civil day by six hours than as “evening, morning” (term, term, term, term); Dan. viii. 14), similar to the Greek τόμον ομονόματι, and although the alternation of light and darkness lay at the root of the expression, yet the Hebrews in their use of it no more thought of those elements than do we when we use the terms forthnight or sea night: in each case the lapse of a certain time, and not the elements by which that time is calculated, is intended; so that, without the least inconsistency either of language or of reality, the expression may be applied to the days previous to the creation of the sun. The application of the same expressions to the events subsequent to the creation of the sun, as well as the use of the word a day in the 4th commandment without any indications that it is used in a different sense, or in any other than the literal acceptance of Gen. i. 5, 17, confirm the view above stated. The interpretation that “evening and morning” —ba'glumayim and el, is opposed not only to the order in which the words stand, but to the sense of the words elsewhere.

5. The Hebrews, though regarding creation as the immediate act of God, did not ignore the evident fact that existing materials and intermediate agencies were employed both then and in the subsequent operations of nature. Thus the simple fact
God created man (Gen. i. 27) is amplified by the subsequent notice of the material substance of which his body was made (Gen. ii. 7); and so also of the animals (Gen. i. 24, ii. 19). The separation of sea and land, attributed in Gen. i. 6 to the Divine fiat was seen to involve the process of partial eustatic elevation of the earth's surface (Isa. 40, 18; the mountains ascend, the valleys descend; comp. Prov. viii. 23-25). The formation of clouds and the supply of moisture to the earth, which in Gen. i. 7 was provided by the creation of the firmament, was afterwards attributed to its true cause in the continual return of the waters from the earth's surface (Eccl. i. 7). The existence of the element of light, as distinct from the sun (Gen. i. 3, 14; Job xxxvii. 19), has likewise been explained as the result of a philosophically correct view as to the nature of light: more probably, however, it was founded upon the incorrect view that the light of the moon was independent of the sun.

6. With regard to the earth's body, the Hebrews conceived its surface to be an immense disc, supported like the flat roof of an Eastern house by pillars (Job ix. 6; Is. lxxx. 3), which rested on solid foundations (Job xxxvii. 4, 6; Ps. civ. 5; Prov. vii. 22); but where those foundations were on the "sockets" of the pillars rested, none could be observed (Job xxxvii. 3). The more philosophical view of the earth being suspended in free space seems to be implied in Job xxvi. 7; nor is there any absolute contradiction between this and the former view, as the pillars of the earth's surface may be conceived to have been founded on the deep bases of the mountains, which bases themselves were unsupported. Other passages (Ps. xxiv. 2, xxxvi. 6) seem to imply the existence of a vast subterraneous ocean; the words, however, are susceptible of the sense that the earth was elevated above the level of the seas (Hengstenberg, Comm. in loc.), and that this is the sense in which they are to be accepted, appears from the converse expression "water under the earth" (Ex. xx. 4), which, as contrasted with "heaven above" and "earth beneath," evidently implies the comparative elevation of the three bodies. Beneath the earth's surface was sheol (גֵּן), the hollow place, "hell" (Num. xvi. 30; Deut. xxxii. 22; Job xi. 8), the "house appointed for the living" (Job xxx. 23), a "land of darkness" (Job x. 21), to which were ascribed poetical language gates (Is. xxxvii. 10) and bars (Job xvii. 15), and which had its valleys or deep places (Prov. ix. 18). It extended beneath the sea (Job xxvi. 5, 6), and was thus supposed to be conterminous with the upper world.

II. GEOGRAPHY. — We shall notice (1) the views of the Hebrews as to the form and size of the earth, its natural divisions, and physical features: (2) the countries into which they divided it and their progressive acquaintance with those countries. The world in the latter sense was sometimes described by the poetical term têbel (תֵּבֶל), corresponding to the Greek ἐξοικεύων (Is. xiv. 21). (1.) In the absence of positive statements we have to gather the views of the Hebrews as to the form of the earth from scattered allusions, and these for the most part in the poetical books, where it is difficult to decide how far the language is to be regarded as literal, and how far as metaphorical. There seem to be traces of the same ideas as prevailed among the Greeks, that the world was a disk (Is. xi. 22; the word גַּלְּכֶה, circle, is applied exclusively to the circle of the horizon, whether bounded by earth, sea or sky), bordered by the ocean (Deut. xxx. 13; Job xxvi. 10; Ps. cxxxix. 9; Prov. vii. 27), with Jerusalem as its centre (Ez. v. 5), which was thus regarded, like Delphi, as the navel (גֹּullet, Judg. ix. 37; Ez. xxxviii. 12; Lxx. 1; Vulg.), or, according to another view (Gen. ii. Thesaur. s. v.), the highest point of the world. The passages quoted in support of this view admit of a different interpretation: Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense; for Palestine was situated between the important empires of Assyria and Egypt; and not only between them, but above them, its elevation above the plains on either side contributing to the appearance of its centrality. A different view has been gathered from the expression "four corners" (קְנֵי רָעָת, generally applied to the skirts of a garment), as though implying the quadrangular shape of a garment stretched out, according to Eratosthenes' comparison; but the term "corners" may be applied in a metaphorical sense for the extreme ends of the earth (Job xxxvii. 3, xxxviii. 13; Is. xi. 12, xxiv. 16; Ez. vii. 2). Finally, it is suggested by Riehl (Symbolik, I. 170) that these two views may have been held together, the former as the actual and the latter as the symbolic representation of the earth's form. As to the size of the earth, the Hebrews had but a very indefinite notion; in many passages the "earth," or "whole earth," is used as co-extensive with the Babylonian (Is. xiii. 5, xiv. 7 ff., xxiv. 17), or Assyrian empires (Is. x. 14, xiv. 20, xxxvii. 18), just as at a later period the Roman empire was styled orbis terrarum; the "ends of the earth" (קְנֵי רָעָת) in the language of prophecy applied to the nations on the border of these kingdoms, especially the Moab (Is. v. 23, viii. 5) in the east, and the islands and coasts of the Mediterranean in the west (Is. xii. 3, 9); but occasionally the boundary was contracted in this latter direction to the eastern shores of the Mediterranean (Is. xiv. 16; Zech. ix. 10; Ps. lxxii. 8). Without unduly pressing the language of prophecy, it may be said that the views of the Hebrews as to the size of the earth extended but little beyond the nations with which they came in contact; its solubility is frequently noticed, its dimensions but seldom (Job xxxviii. 18; Is. xiii. 5). We shall presently trace the progress of their knowledge in succeeding ages.

The earth was divided into four quarters or regions corresponding to the four points of the compass; these were described in various ways, sometimes according to their positions relatively to a person facing the east, before (מָזַב), behind (לָבָן), the right hand (מָאָב), and the left hand (מַעֲרֵב), representing respectively E., S., and N. (Job xxiii. 8, 9); sometimes relatively to the sun's course, the rising (מָאָב), the setting (מָאָב, Ps. 1. 1) the brilliant quarter (מַעֲרֵב, Ez. xl. 24), and the dark quarter (מַעֲרֵב, Ez. xxxvi. 20; comp. the Greek θόρος, Hom. II. 240); but sometimes as the sextant of the four winds (Ez. xxxviii. 9); and sometimes according to the physical char-
characteristics, the sea (Σ) for the W. (Gen. xxi.
14), the perished (Τ) for the S. (Ex. xxvii. 9),
and the mountains (Ση) for the N. (Is. xiii.
4). The north appears to have been regarded as
the highest part of the earth's surface, in conse-
quence perhaps of the mountain ranges which
existed there, and thus the heaviest part of the
carth (Job xvi. 7). This was also the quarter in
which the Hebrews are described as, the land of
gold mines (Job xxxii. 22; moriah; comp.
Her. iii. 116).

These terms are very indistinctly used when
applied to special localities; for we find the north
quarter of Assyria (Jer. iii. 18), Babylonia (Jer.
vi. 22), and the Egyptians (Ex. xlv. 10), and
more frequently Media (Jer. i. 3; comp. li. 11),
while the south is especially repre-

tanted by Egypt (Is. xxx. 6; Dan. xi. 5). The
Hebrews were not more exact in the use of terms
descriptive of the physical features of the earth's
surface; for instance, the same term (Σ) is ap-
plied to the sea (Mediterranean), to the lakes of
Palestine, and to great rivers, such as the Nile (Is.
xviii. 2), and perhaps the Euphrates (Is. xlvii. 1);
and mountain (Ση) signifies not only high ranges,
such as Sinai or Ararat, but an elevated region
(Josh. xi. 16); river (Ση) is occasionally applied
to the sea (Dan. ii. 3; Is. xxv. 2) and to canals
fed by rivers (Is. xxv. 27). Their vocabulary, how-
ever, was ample for describing the special features
of the lands with which they were acquainted, the
terms for the different sorts of valleys, mountains,
rivers, and springs being very numerous and
expressive. We cannot fail to be struck with the
adequate ideas of descriptive geography expressed
in the directions given to the spies (Num. xiii.
17-20), and in the closing address of Moses (Deut.
viii. 7-9); nor less, with the extreme accuracy and
the variety of almost technical terms, with which the
boundaries of the various tribes are described in
the book of Joshua, warranting the assumption that
the Hebrews had acquired the art of surveying from
the Egyptians (Ezah. i. 6; § 104).

(2.) We proceed to give a brief sketch of the
geographical knowledge of the Hebrews down to
the period when their distinctive names and ideas
were superseded by those of classical writers. The
chief source of information open to them, beyond the
circle of their own experience, was their inter-
course with the Phoenician traders. While the first
made them acquainted with the nations from the
Tigris to the African desert, the second informed
them of the coasts of the Mediterranean, the regions
of the north, and the southern districts of Arabia.
From the Assyrians and Babylonians they gained
some slight knowledge of the distant countries of
India, and perhaps even China.

Of the physical objects noticed we may make the
following summary, omitting of course the details of
the geography of Palestine: (1.) Sars — the
Mediterranean, which was termed the "Great Sea"
(Num. xxxv. 6), the "Sea of the Philistines" (Ex.
xviii. 31), and the "Western Sea" (Deut. xi. 21);
the Red Sea, under the names of the "Sea of
Suph," "sedge" (Ex. x. 19), and the "Egyptian Sea"
(Is. xi. 15); the Dead Sea, under the names "Salt
Sea" (Gen. xiv. 3), "Eastern Sea" (Jod. ii. 20)
and "Sea of the Desert" (Deut. iv. 49); and the
Sea, Cimmerian, or Galilee (Num. xxiv. 11).
(2.) Rivers — the Euphrates, which was especially
"the river" (Gen. xxxi. 21), or "the great river"
(Deut. i. 7); the Nile, which was named either
Yor (Gen. xii. 1), or Sihor (Josh. iii. 3); the
Tigris, under the name of Hiddekel (Dan. x. 4);
the Chebar, Chabora, a tributary to the Euphrates
(Ex. ii. 3); the Habor, probably the same, but
sometimes identified with the Chaboras that falls
into the Tigris (2 K. xvii. 6); the river of Egypt
(Num. xiv. 13); and the rivers of Damascus, Alona
(Barakel), and Pharpag (2 K. x. 12). For the
Gilban and Pison (Gen. ii. 11, 33), see Eden.
(3.) Mountains — Ararat or Armenia (Gen. viii. 4);
Sinai (Ex. xix. 2); Hor (Num. xx. 22) near Petra;
Lebanon (Deut. iii. 25); and Sepher (Gen. x. 30)
in Arabia.

The distribution of the nations over the face of
the earth is systematically described in Gen. x., to
which account subsequent, though not very im-
portant, additions are made in chaps. xxxv. and
xxxvi., and in the prophetical and historical books.
Although the table in Gen. x. is essentially ethno-
graphical, yet the geographical element is also
strongly developed: the writer had in his mind's
eye not only the desert but the residence of the
various nations. Some of the names indeed seem to
be purely geographical designations; Aram, for
instance, means high lands; Canaan, low lands;
Eber, the land arising, or begot; Shilon, holy station;
Mabli, control land; Tarshish, probably conquered;
Mizraim, still more remarkably from its dual form, the
two Egyptians; Ophir, the rich land. It has indeed been surmised that the names of the
tree great divisions of the family of Noah are also
in their origin geographical terms; Japheth, the
widely extended regions of the north and west;
Ham, the country of the black soil, Egypt; and
Shem the mountaneous country; the last is, how-
ever, more than doubtful.

In endeavoring to sketch out a map of the world
as described in Gen. x., it must be borne in mind
that, in cases where the names of the races have
not either originated in or passed over to the lands
they occupied, the locality must be more or less
doubtful. For the migrations of the various tribes
in the long course of ages led to the transfer of the
name from one district to another, so that even in
Biblical geography the same name may at different
periods indicate a widely different locality. Thus
Mogez in the Mosaic table may have been located
south of the Caucasus, and in Ezekiel's time, north
of that range; Gomer at the former period in Cap-
cadonia, at the latter in the Crimea. Again, the
terms may have varied with the extending knowl-
dge of the earth's surface; Chittim, originally
Cyprius, was afterwards applied to the more westerly
lands of Macedonia in the age of the Macedonians,
if not even to Italy in the prophecies of Daniel, while
Tarshish may without contradiction have been the
sea-coast of Ethiopia in the Mosaic table, and the
case of Spain in a later age. Possibly a solution
may be found for the occurrence of more than one
Dedan, Sheba, and Havilah, in the fact that these
names represent districts of a certain character, of
which several might exist in different parts of
the ancient world; it will appear how numerous
are the elements of uncertainty introduced into this
subject; unanimity of opinion is almost impossible; nor need it cause surprise, if even in the present work the views of different writers are found at variance. The principle on which the following statement has been compiled is this — to assign to the Mosaic table the narrowest limits within which the nations have been, according to the best authorities, located, and then to trace out, as far as our means admit, the changes which those nations experienced in Biblical times.

Commencing from the west, the "isles of the Gentiles," i.e. the coasts and islands of the Mediterranean sea, were occupied by the Japhethites in the following order: Dedan, the lonians, in parts of Greece and Asia Minor; Elahish, perhaps, the Edilians, in the same countries; Dodanim, the Darod, in Illyricum; Tiras in Thrace; Kittim, in Citia, in Cyprus; Ashkenaz in Phrygia; Gomer in Capadocia, and Tarshish in Cilicia. In the north, Tubal, the Tiberiades, in Pontus; Meshech, the Moschich, in Colchis; Magog, Goorgen, in northern Armenia; Tagarannah in Armenia; and Midian, in Moab. Hameites represent the southern parts of the known world; Cosha, probably an appellative similar to the Greek Ethopi, applicable to all the dark races of Arabia and eastern Africa; Mizraim in Egypt: Phut in Libya; Naphtalan and Lelabin, on the coast of the Mediterranean, west of Egypt; Caphtorim, in Egypt; Cashhima from the Nile to the border of Palestine; Pathrusim in Egypt: Seba in Mercia; Siboth, on the western coast of the straits of Behbolamnich; Havillah, more to the south; and Subeteach in the extreme south, where the Somalis now live; Nimrod in Babylonia; Basmah and Dedan on the southwestern coast of the Persian gulf. In the central part of the world were the Shemites: Elam, Elupolu, in Persia; Assur in Assyria; Arphaxad, Ararcechitas, in northern Assyria; Lud in Lygia; Aram in Syria and Mesopotamia, and the descendants of Joktan in the peninsula of Arabia.

This sketch is filled up, as far as regards northern Arabia, by a subsequent account, in ch. xvii., of the settlement of the descendants of Abraham by Keturah and of Ishmael; the geographical position of many is uncertain; but we are acquainted with that of the Midianites among the sons of Abraham, and of Nebaioth, Nobatav: Kedar, Kelbe (Pis. v. 12); Dumah, Dumahoth (Pis. v. 19), among the sons of Ishmael. Some of the names in this passage have a geographical origin, as Milsam, a spice-bearing land, Tena, an arid or southern land. Again, in ch. xxxvi. we have some particulars with regard to the country immediately to the south of Palestine, where the aboriginal Horites, the Troglodytes of the mountainous districts in the eastern part of Arabia Petraea, were displaced by the descendants of Esau. The narrative shows an intimate acquaintance with this district, as we have the names of various towns, Dinhahah, Bozrah, Avith, Masrekkah, Reboloth, and Pau, few of which have any historical importance. The peninsula of Sinai is particularly described in the book of Exodus.

The countries, however, to which historical interest attaches are Mesopotamia and Egypt. The acreditary connection of the Hebrews with the former of these districts, and the importance of the dynasties which bore sway in it, make it by far the most prominent feature in the map of the ancient world; its designation in the book of Genesis is Padan-aram, or Arum-Naharaim; in the north was Ur of the Chaldees, and the Haran to which Terah migrated; in the south was the plain of Shinar, and the seat of Nimrod's capital, Babel; on the banks of the Tigris were the cities of Accad Calneh, Nineveh, Cuthah, and Resen; and on the banks of the Euphrates, Erech and Behemoth (Gen. x. 10—12). From the same district issued the warlike expeditions headed by the kings of Shinar, Elasar, Elam, and Tubal, the object of which apparently was to open the commercial route to the Eelitic gulf (Gen. xiv.); and which succeeded in the temporary subjugation of all the intervening nations, the Rephaim in Ashereth-Karnaim (Bashan), the Zuzim beyond the Border, the Lud-benijok, the Hazarmakath, the Emims in Shaveh (near the Arnon), and the district of the Amelekites (to the south of Palestine). It is, in short, to the early predominance of the eastern dynasties that we are indebted for the few geographical details which we possess regarding those and the intervening districts. The Egyptian captivity introduces to our notice some of the localities in Lower Egypt, namely, the provence of Goshen, and the towns Hamesses (Gen. xlvii. 11); On, Bithynia (Gen. xlii. 45); Pithom, Potimah (Ex. i. 11); and Migdol, Megiddon (Ex. xiv. 2).

During the period of the Judges the Hebrews had no opportunity of advancing their knowledge of the outer world; but with the extension of their territory under David and Solomon, and the commercial treaties entered into by the latter with the Phenicians in the north and the Egyptians in the south, a new era commenced. It is difficult to estimate the amount of information which the Hebrews derived from the Phenicians, since as the general policy of those enterprising traders was to keep other nations in the dark as to the localities they visited; but there can be no doubt that it was from them that the Hebrews learned the route to Ophir, by which the trade with India and South Africa was carried on, and that they also became acquainted with the positions and productions of a great number of regions comparatively unknown. From Ex. xxvii. we may form some idea of the extended ideas of geography which the Hebrews had obtained: we have notice of the mineral wealth of Spain, the dyes of the Egean Sea, the famed horses of Armenia, the copper-mines of Colchis, the yams and embroideries of Assyria, the cutlery of South Arabia, the spices and precious stones of the Temen, and the caravan trade which was carried on with India through the entrepots on the Persian Gulf. As the prophet does not profess to give a systematical enumeration of the places, but selects some from each quarter of the earth, it may fairly be inferred that more information was obtained from that source. Whether it was from thence that the Hebrews heard of the tribes living on the northern coasts of the Euxine —the Scythians (Magog), the Cimmerians (Gomer), and the Roxolani (?), or perhaps Russiones (Roseh, Ex. xxxviii. 2, Hebrew text) —is uncertain: the head of the northern hordes, which occurred about Ezekiel's time, may have drawn attention to that quarter.

The progress of information on the side of Africa is clearly marked: the distinction between Upper and Lower Egypt is shown by the application of the name Pathros to the former (Ex. xxix. 14). Memphis, the capital of lower Egypt, is first mentioned in Hosea (ix. 6) under the name Moph, and afterwards frequently as Noph (Is. xix. 13); Thebes, the capital of Upper Egypt, at a later period, as
No-Amon (Nah. iii. 8) and Xo (Jer. xvi. 25); and the distant Syene (Ex. xxix. 10). Several other towns are noticed in the Delta; Sin, Pelusium (Ex. xxx. 15); Hibisoth, Bubastis (Ex. xxx. 17); Zeran, Tellaters (Is. xi. 11); Tell-Fanouk, Tell-Fahmeh, Deiraphene (Jer. ii. 16); Helioptolis, under the Hebrew form Beth-shemesh (Jer. xiii. 13); and, higher up the Nile, Hanes, Hurepelopolis (Is. xxx. 4). The position of certain nations seems to have been better ascertained. Cush (Ethiopia) was fixed immediately to the south of Egypt, where Tirihakah held sway with Napatia for his capital (2 K. xix. 9); the Lubim (Libya), perhaps Nubia, may also be noticed under the ruined form Chubah, Ex. xxx. 5) appear as allies of Egypt; and with them a people not previously noticed, the Sikkilina, the Troygolites of the western coast of the Red Sea (2 Chr. xii. 3); the Lubim and Phint are mentioned in the same connection (Ex. xxx. 5).

The wars with the Assyrians and Babyloniasts, and the captivities which followed, bring us back again to the geography of the East. Incidental notice is taken of several important places in connection with these events: Persis, Shushan, Susa (Dan. viii. 2); that of Media, Achmetha, Edcbatana (Ex. vi. 2); Henna, Irav, and Sepharvaim, on the Euphrates (2 K. xviii. 34); Carchemish, Circocea, on the same river (Is. x. 9); Gozan and Hidah, on the borders of Media (2 K. xvii. 6); Kir, perhaps on the banks of the Cyrus (2 K. xvi. 9). The names of Persia (2 Chr. xxxvi. 20) and Indus (Esth. i. 1), now occur: whether the far-distant China is noticed at an earlier period under the name Shinim (Is. xix. 12) admits of doubt.

The names of Greece and Italy are hardly noticed in Hebrew geography: the earliest notice of the former, subsequently to Gen. x., occurs in Is. lvii. 12, under the name of Javan; for the Javan in Joel iii. 6 is probably in South Arabia, to which we must also refer Ez. xxvii. 15, and Zech. ix. 13. In Dan. viii. 21, the term definitely applies to Greece, whereas in Is. lvii. it is indefinitely used for the Greek settlements. If Italy is described at all, it is under the name of Chittim (Dan. xii. 30).

In the Macedo-ean era the classical names came into common use: Crete, Sparta, Celos, Sicily, Caria, Cilicia, and other familiar names, are noticed (1 Mac. x. 67, xi. 14, xv. 23); Asia, in a restricted sense, as — the Syrian empire (1 Mac. vii. 6); Hispania and Rome (1 Mac. viii. 1-9). Henceforward the geography of the Bible, as far as foreign lands are concerned, is absorbed in the wider field of classical geography. It is hardly necessary to add that the use of classical designations in our Authorized Version is in many instances a departure from the Hebrew text: for instance, Asia in the Septuagint stands for Aram-Sabarain (Gen. xxiv. 10); Ethipya for Cush (2 K. xix. 9); the Chaldeans for Chashmim (Job x. 17); Girev for Yavan (Dan. viii. 21); Egypt for Mryam (Gen. xiii. 10); Aramoa for Ararat (2 K. xix. 37); Asshur for Assur (Gen. ii. 14); Idumeen for Edom (Is. xxxiv. 5), and Syria for Aram. Arabia, it may be observed, does occur as an original Hebrew name in the later books (Is. xxi. 15), but probably in a restricted sense as applicable to a single tribe.

W. L. B.

EARTHENWARE. [Pottery.]

Earthquake (Gr. θησαλίζω [a trembling]). Earthquakes, more or less violent, are of frequent occurrence in Palestine, as might be expected from the numerous traces of volcanic agency visible in the features of that country. The recorded instances, however, are but few; the most remarkable occurred in the reign of Uzziah (Am. i. 1; Zech. iv. 5), which Josephus (Ant. ix. 10, § 4) connected with the sacrifice and consequent punishment of that monarch (2 Chr. xxxvi. 16 ff.). From Zech. xiv. 4 we are led to infer that a great convulsion took place at this time in the Mount of Olives, the mountain being split so as to leave a valley between its summits. Josephus records something of the sort, but his account is by no means clear, for his words (τὸν ὄρον ἀκροβατικὸν τῷ ἡμετέρῳ τὸν κατὰ τὴν διώσει) can hardly mean the western half of the mountain, as Hittig seems to think, but the half of the western mountain, i.e., of the Mount of Evil Counsel, though it is not clear why this height particularly should be termed the western mountain. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. Hitzig (Comm. in Zech.) suggests that the name Ἰωνᾶννης, "corruption," may have originated at this time, the rolling down of the side of the hill, as described by Josephus, entitling it to be described as the destroying mountain, in the sense in which the term occurs in Jer. ii. 25. An earthquake occurred at the time of our Saviour's crucifixion (Matt. xxvii. 51-54), which may be deemed miraculous rather than the consequence of circumstances than from the nature of the phenomenon itself; for it is described in the usual terms (§ 597, xiv. 13. 12) records a very violent earthquake, that occurred in n. 31, in which 10,000 people perished. Earthquakes are not unfrequently accompanied by fissures of the earth's surface; instances of this are recorded in connection with the destruction of Korah and his company (Num. xvi. 32; cf. Joseph. Ant. iv. 3, § 3), and at the time of our Lord's death (Matt. xxvii. 51), the former may be paralleled by a similar occurrence at Opole in Cæsarea A. D. 1783, where the earth opened to the extent of 500, and a depth of more than 200 feet; and again by the sinking of the bed of the Tazus at Lisbon, in which the quay was swallowed up (Thaïs, Schiaparelli's, p. 115). These depressions are sometimes on a very large scale; the subsidence of the valley of Sidihum at the southern extremity of the Dead Sea may be attributed to an earthquake; similar depressions have occurred in many districts, though the figurative allusions to earthquakes are so numerous in the Bible, and those instances mentioned as occurring in Palestine, namely that in the days of Uzziah (Am. i. 1 and Zech. xiv. 5) and the one in connection with the Saviour's death, Earthquakes are not uncommon in the Arabian peninsula (comp. Ex. xix. 18 and I K. xix. 11).
John's usage to insert \(\text{\|\text{\|}}\) and \(\text{\|\text{\|}}\) (Matt. ii. 11, xxiv. 27; Luke xiii. 29), and not \(\text{\|\text{\|}}\).

It is hardly possible that St. Matthew would use the two terms indifferently in succeeding verses (ii. 1, 2), particularly as he adds the article to \(\text{\|\text{\|}}\) which is invariably absent in other cases (cf. Rev. xxi. 13). He seems to imply a definiteness in the locality — that it was the country called \(\text{\|\text{\|}}\) or \(\text{\|\text{\|}}\) (comp. the modern Antiochio) as distinct from the quarter or point of the compass \(\text{\|\text{\|}}\) in which it lay. In confirmation of this it may be noticed that in the only passage where the article is prefixed to \(\text{\|\text{\|}}\) (Gen. x. 30), the term is used for a definite and restricted locality, namely, Southern Arabia.

W. L. B.

EASTER \(\text{\|\text{\|}}\); \(\text{\|\text{\|}}\). — The occurrence of this word in the A. V. of Acts xii. 4 "Intending after Easter to bring him forth to the people" — is chiefly noticeable as an example of the want of consistency in the translators. In the earlier English versions Easter had been frequently used as the translation of \(\text{\|\text{\|}}\). At the last revision Passover was substituted in all passages but this. It would seem from this, and from the use of such words as "robbers of churches" (Acts xix. 39), "town-clerk" (xix. 35), "serjeants" (xxvi. 35), "deputy" (xiii. 7, &c.), as if the Acts of the Apostles had fallen into the hands of a translator who acted on the principle of choosing, not the most correct, but the most familiar equivalents. (Comp. Trench, On the Authorized Version of the N. T. p. 21 [2d ed. p. 49]). For all that regards the nature and celebration of the Feast thus translated, see PASSOVER.

E. H. P.

* In Christian antiquity the joyful remembrance of our Lord's resurrection was intimately associated, as it has ever since been, with the mournful recollection of his death. The allusions in the New Testament are not indeed so distinct (cf. 1 Cor. v. 7) that any positive evidence can be drawn from them; yet the resurrection of Christ was so connected in the teaching of the Apostles with his death (e. g. Rom. vi. 1; 1 Cor. xv. 20, &c.) that it is difficult to conceive in the early churches of an annual festival to commemorate the latter apart from all reference to the former.* As the two events however took place on different days, and as they called upon the mind to think of the different sides of the great work upon earth, and along with these different sets of thoughts and emotions, it became easy to observe them in close connection with each other, and yet with a marked separation between them. Such an arrangement probably was recognized under Aniochus at Rome (\(\text{\|\text{\|}}\)) by the keeping of Friday in commemoration of the death, and of the following Lord's day as the anniversary of the resurrection, although the decree to this effect ascribed to him cannot be considered genuine. (Cf. Suicer, Thes. s. v. \(\text{\|\text{\|}}\), H. 625.) Towards the close of the second century, the notices of directions for the observance of the "Passover" or the "Lord's Resurrection" only on the Lord's day become very numerous in the western church. The two names seem to be used indifferently in the admonitions of bishops and the determinations of councils; but in either case it is spoken of as a joyful festival and the termination of the preceding solemn fast.

three centuries was only the death of Christ: but the notices of antiquity do not seem to support this conclusion.

F. G.
EASTER

(see the citations in suiæ, ab igitur.) In the Eastern Church, when the fast was terminated and the festival kept on the day of the Jewish Passover, it does not so clearly appear how the distinction was drawn between the two events; but that both were in remembrance cannot be doubted in view of the fact that there were no reenactments upon this point in the sharp and bitter controversy between the East and the West as to the proper time of celebration.

This controversy was at first conducted in a kindly and fraternal spirit. Polycarp visited Rome (a. d. 164) for the express purpose, among other objects, of bringing about an agreement. He was unsuccessful, but separated from Anicetus in peace and in full communion. The same spirit united the successors of Anicetus down to the time of Victor I., who excommunicated the "quartodecimanos" and threw into the controversy that element of bitterness from which it was never after wholly free. The council of Arles (a. d. 314) finally decided the dispute, now so prolonged and so acrimonious, in favor of the Western practice, and this decision was reaffirmed at Nice. The decision however, seems hardly to have been received in the more distant parts of the empire, as is evidenced by the famous conferences between St. Augustine and the Anglican Christians at the close of the sixth century. The decision of Nice required the festival to be celebrated on the Lord's day following the full moon next succeeding the Vernal Equinox. This still left the question open as to what should be done when that full moon itself fell on a Sunday; and here again the East and West divided, the former in such case following their old custom and celebrating on the same day with the Jews, while the latter deferred their festival to the following Lord's day. This controversy likewise travelled to England and was then settled in favor of the Western practice at the council of Whithby (a. d. 684) after a sharp dispute between Alfheart of Paris and Columb Bp. of Northumbria.

Such controversies, perhaps all the more from the earnestness with which they were conducted, testify to the importance attached to this festival from the earliest antiquity. Had there ever been any desire among Christians to forget the annual return of the time of the Redeemer's suffering and resurrection, the recurrence of the Jewish Passover must have been a sufficient reminder, and when the Christian Church had outgrown such influence, the observance of the festival had become fixed. Its early name continued to be 'the Passover,' as at once continuing the Jewish festival, and in it itself deeply significant. Substantially the same name is still preserved throughout a large part of Christendom. The English name of Easter and the German Ostern have direct reference rather to the season of the year, the Spring, at which the festival occurs, than to its subject matter; while yet that season itself has always been considered as suggestive of the resurrection. Indeed the names themselves are supposed to be derived from the old word ověr, ovĕn, rising, becoming mature, and ripening. This was a Teutonic goddess Ostera, whose festival was celebrated early in the Spring by the Saxons, and the occurrence of the Easter festival at the same season made it easier for them to give up their heathen feast, and perhaps led to their attaching thereto a name to which they were already accustomed. F. G.

EBAH, MOUNT

* EAST SEA, THE, Ezek. xiii. 18: Isa. ii. 20; Zech. xiv. 8, marg. [SEA, THE SALT.]

EAST WIND. [WINDS.]

* EATING, CUSTOMS RELATING TO. [FOOD; MEALS; WASHING.]

EBAL (אבאל) [stone]: Γαβὰθα, Γαβשׂ(849,830),(901,868)(182,830),(234,868)(329,830),(381,868), in 1 Chr. Eleboth, 1. One of the sons of Shadal the son of Seir (Gen. xxxvi. 24; 1 Chr. i. 40).

2. ( Omn. in Vat. MS.; Alex. Ῥαγαθ [Comp. Rαβαθά]: Hebrew). The son of Joktan (1 Chr. i. 22; comp. Gen. x. 28). Eleven of Kennicott's MSS. with the Syrian and Arabic versions read אבאל in 1 Chr. as in Gen.

EBAL, MOUNT (אבאל) [mount of stone]: בַּעַסֵּי: Joseph. Ῥαβάθα: Moses Ῥαβאט, a mount in the promised land, on which, according to the command of Moses, the Israelites were, after their election on the promised land, to "set up" the curse which should fall upon them if they disobeyed the commandments of Jehovah. The blessing consequent on obedience was to be similarly localized on Mount Gerizim (Deut. xi. 26-29). This was to be accomplished by a ceremonial in which half the tribes stood on the one mount and half on the other; those on Gerizim responding to and affirming blessings, those on Ebal curses, as pronounced by the Levites, who remained with the ark in the centre of the interval (comp. Deut. xxvii. 11-26 with Josh. viii. 30-35, with Joseph. Ant. iv. 8, § 44, and with the comments of the Talmud [Sota, vii. § 5], quoted in Hesychius' Pentateuch). But notwithstanding the ban thus apparently laid on Ebal, it was further appointed to be the site of the first great altar to be erected to Jehovah; an altar of large unhewn stones plastered with lime and inscribed with the words of the law (Deut. xxvii. 2-8). On this altar peace-offerings were to be offered, and round it a sacrificial feast was to take place, with other rejoicings (ver. 6, 7). Scholars disagree as to whether there were to be two altars—a kind of cromlech and an altar—or an altar only, with the law inscribed on its stones. The latter was the view of Josephus (Ant. iv. 8, § 44, v. 1, § 19), the former is unsatisfactorily adopted by the latest commentator (Keil, on Josh. viii. 32). The words themselves may perhaps bear either sense.

The terms of Moses' injunction seem to infer that no delay was to take place in carrying out this symbolic transaction. It was to εἰς τὴν ἡμέραν τῶν ἀναμνήσεων τοῦ βεβαιωμένου. That Jordan was crossed (vers. 11), before they went in unto the land which Jehovah had given them (vers. 13). And accordingly Joshua appears to have seized the earliest practicable moment, after the pressing affairs of the siege of Jericho, the execution of Achan, and the destruction of Ai had been despatched, to carry out the command (Josh. viii. 30-35). After this Ebal appears no more in the sacred story.

The question now arises, where were Ebal and Gerizim? (2.) The all but unanimous reply to this is, that they are the mounts which form the sides of the fertile valley in which lies Nablus, the ancient SHECHEM—Ebal on the north and Gerizim on the south. (1.) It is plain from the passages already quoted that they were situated near together, with a valley between.
(2.) Gerizim was very near Shechem (Judg. ix. 1), and in Josephus's time their names appear to have been attached to the mounts, which were then, as now, Ebol on the north and Gerizim on the south. Since that they have been mentioned by Keland (Geodea, 62), and Sir John Maundrell, and among modern travellers by Maundrell (Mod. Trav. p. 432).

The main impediment to our entire reception of this view rests in the terms of the first mention of the place by Moses in Deut. xi. 30: A. V. "Are they not on the other side of Jordan, by the way where the sun goeth down in the land of the Canaanites, which dwell in the champaign over against Gilgal, beside the plains of Moreh?" Here the mention of Gilgal, which was in the valley of the Jordan near Jericho, of the valley itself (Aradob, mistranslated here only, "campaign"), and of the Canaanites who dwelt there, and also the other terms of the injunction of Moses, as already noticed, seem to imply that Ebol and Gerizim were in the immediate neighborhood of Jericho. And this is strengthened by the narrative of Joshua, who appears to have carried out the prescribed ceremonial on the mounts while his camp was at Gilgal (comp. vii. 2, ix. 6), and before he had (at least before any account of his having) made his way so far into the interior of the country as Shechem.

This is the view taken by Eusebius (Onomasticon, Ἐβάλ). He does not quote the passage in Deut., but seems to be led to his opinion rather by the difficulty of the mountains at Shechem being too far apart to admit of the blessing and curse being heard, and also by his desire to contradict the Samaritans; add to this that he speaks from no personal knowledge, but simply from hearsay (Ἀγετατος), as to the existence of two such hills in the Jordan valley. "The notice of Eusebius is merely translated by Jerome, with a shade more of animosity to the Samaritans (vehementer erravit), and expression of difficulty as to the distance, but without any additional information. Poccius and Elphinston also favored Eusebius, but their mistakes have been disposed of by Reland (Pet. pp. 509, 504; Miscell. pp. 123-133).

With regard to the passage in Deut., it will perhaps assume a different aspect on examination.

(1.) Moses is represented as speaking from the east side of the Jordan, before anything was known of the country on the west, beyond the exaggerated reports of the spies, and when everything there was wrapped in mystery, and localities and distances had not assumed their due proportions. (2.) A closer rendering of the verse is as follows: "Are they not on the other side the Jordan, beyond — (Ἀβάλ, the word rendered "the backside of the desert," in Ex. iii. 1) — the way of the sunset, in the land of the Canaanite who dwells in the Araphah over against Gilgal, near the terrains of Moreh." If this rendering is correct, a great part of the difficulty has disappeared. Gilgal no longer marks the site of Ebol and Gerizim, but of the dwelling of the Canaanites, who were, it is true, the first to encounter the Israelites on the other side the river, in their native lowlands, but who, if we have it actually on record, were both in the time of Abraham (Gen. xii. 6) and of the conquest (Josh. xvii. 18) located about Shechem. The word now rendered "beyond" is not represented at all in the A. V., and it certainly throws the locality much further back; and lastly there is the striking

mark of the trees of Moreh, which were standing by Shechem when Abraham first entered the land, and whose name probably survived in Moriah, or Munamtha, a name of Shechem found on coins of the Roman period (Reland, Miscell. pp. 127, 129).

In accordance with this is the addition in the Samaritan Pentateuch, after the words "the terebins of Moreh," at the end of Deut. xi. 30, of the words "over against Shechem." This addition is more credible because there is not, as in the case noticed afterwards, any apparent motive for it. If this interpretation be accepted, the next verse (31) gains a fresh force: "For ye shall pass over Jordan into the land of the Amorrhæans, Canaanites, Hittites, Perizzites, and Jebusites." It is also more natural to suppose that in the books of Law we are to understand the ends of Jordan not only to meet the Canaanites immediately on the other side, but to go in to possess the land [the whole of the country, even the heart of it, where these mounts are situated (glancing back to ver. 29)], the land which Jehovah your God giveth you; and ye shall possess it, and dwell therein." And it may also be asked whether the significance of the whole solemn ceremonial of the blessing and cursing is not misused if we understand it as taking place directly a festival had been obtained on the outskirts of the country, and not as in the heart of the conquered land, in its most prominent natural position, and close to its oldest city — Shechem.

This is evidently the view taken by Josephus. His statement (Ant. v. 1, § 19) is that it took place after the subjugation of the country and the establishment of the Tabernacle at Shiloh. "He has no misgivings as to the situation of the mountains. They were at Shechem ((fr. Σαμαριταις), and from thence, after the ceremony, the people returned to Shiloh.

The narrative of Joshua is more puzzling. But even with regard to this something may be said. It will be at once perceived that the book contains no account of the conquest of the centre of the country, of those portions which were afterwards the mountain of Ephraim, Eschalon, or Galilee. We lose Joshua at Gilgal, after the conquest of the south, to find him again suddenly at the waters of Merom in the extreme north (x. 43, xi. 7). Of his intermediate proceedings the only record that seems to have escaped is the fragment contained in viii. 30-35. Nor should it be overlooked that some doubt is thrown on this fragment by its omission in both the Vat. and Alex. MSS. of the LXX.

The distance of Ebol and Gerizim from each other is not such a stumbling-block to us as it was to Eusebius; though it is difficult to understand how he and Jerome should have been ignorant of the distance to which the voice will travel in the clear, chastic atmosphere of the East. Prof. Stanley has given some instances of this (S. & P. p. 13); others equally remarkable were observed by the writer; and he has been informed by a gentleman long resident in the neighborhood that a voice can be heard without difficulty across the valley separating the two spots in question (see also Bonar, p. 371).

It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text, is in reference to Ebol and Gerizim. In Deut. xvii. 4, the Samaritan has Gerizim, while the Hebrew (as in A. V.) has Ebol, as the mount on which the altar to Jehovah and the inscription of the law were to be erected. Upon this basis they ground the sanctity of Gerizim and the authenticity of the temple and
EBAL

the holy place, which did exist and still exist there. The arguments upon this difficult and hopeless question will be found in Kennicott (Dissert. 2), and in the reply of Verschuur (Leonard, 1775; quoted by Gesenius, loc. Pont., Sam. p. 61). Two points may merely be glanced at here which have apparently escaped notice. (1.) Both agree that Ebal was the mount on which the encumbrances were to rest, Gerizim that for the blessings. It appears inconsistent, that Ebal, the mount of cursing, should be the site of the altar and the record of the law, while Gerizim, the mount of blessing, should remain unoccupied by sanctuary of any kind. (2.) Taking into account the known predilection of Orientals for ancient sites on which to fix their sanctuaries, it is more easy to believe (in the absence of any evidence to the contrary) that in building their temple on Gerizim, the Samaritans were making use of a spot already enjoying a reputation for sanctity, than that they built on a place upon which the curse was laid in the records which they received equally with the Jews. Thus the very fact of the occupation of Gerizim by the Samaritans would seem an argument for its original sanctity.

Ebal is rarely ascended by travellers, and we are therefore in ignorance as to how far the question may be affected by remains of ancient buildings thereon. That such remains do exist is certain, even from the very meagre accounts published (Bartlett, Walks about Jerusalem, App. 251, 252; and Narrative of Rev. J. Mills in Trans. Pol. Archæol. Assoc. 1855), while the mountain is evidently of such extent as to warrant the belief that there is a great deal still to be discovered. [See also Mills's Three Months in Babylonia (London, 1861).]

The report of the old travellers was that Ebal was more barren than Gerizim (see Benjamin of Tudela, &c.), but this opinion probably arose from a belief in the effects of the curse mentioned above. At any rate, it is not borne out by the latest accounts, according to which there is little or no perceptible difference. Both mountains are terraced, and Ebal is 'occupied from bottom to top by beautiful gardens' (Mills; see also Porter, Hand.-book, ii. p. 322). The slopes of Ebal towards the valley appear to be steeper than those of Gerizim (Wilson, Levith, ii. 45, 71). It is also the higher mountain of the two. There is some uncertainty about the measurements, but the following are the results of the latest observations (Van de Velde, Mém., p. 178).

According to Wilson (Levith, ii. 71, — but see Rob. ii. 277, 290, note) it is sufficiently high to shut out Hermon from the highest point of Gerizim. The structure of Gerizim is monumental lime-stone with occasional outcrops of igneous rock (Ib. in topog. Journ. xxxvi. 55), and that of Ebal is probably similar. At its base above the valley of Nablus are numerous caves and sepulchral excavations. The modern name of Ebal is Sitti Subayrigah, from a Mohammedan female saint, whose tomb is standing on the eastern part of the ridge, a little before the highest point is reached (Wilson, ii. 71, note). By others, however, it is reported to be called 'innaal al-thura,' 'the pillar of the religion.' (Stanley, p. 228, note). The tomb of another saint called Aoudi is also shown (Ritter, p. 411), with whom the latter name may have some connection. On the southeast shoulder is a ruined site bearing the name of 'A'dur (Rob. iii. 132). [See Char.]

EBED. 1. (vπ?w = 'slave'; but many MSS., and the Syr. and Arab. versions, have vπ?w, Ebed: 1518; Alex. Abbē: [exe. ver. 35, xε-βητ.: Ebed (?) and Osib], father of Gaal, who with his brethren assisted the men of Shechem in their revolt against Ahamelch (Judg. ix. 26, 28, 30, 31, 35).

2. (vπ?w: 'Αββηθ; Alex. Aββη: [Comp. 15186: Ebed,] son of Jonathan; one of the Bene-Adin [sons of Adin] who returned from Babylon with Ezra (Ezra viii. 6). In 1 Esdras the name is given Oesethu.

It would add greatly to the force of many passages in the O. T. if the word 'slave' or 'handmaid' were appropriated to the Hebrew term Ebed, while 'servant,' 'attendant,' or 'minister,' was used to translate נב'ר, מְשָׁכֶר, &c. In the addresses of subjects to a ruler, the oriental character of the transaction would come home to us at once if we read 'what with my lord to his slave' — the very form still in use in the East, and familiar to us all in the Arabiun Nights and other oriental works — instead of 'his servant.'

EBED-MELECH (vπ?w, vπ?w, vπ?w) [see below]: 'Αββδουάχ: Abadeolesch, an Ethiopian eunuch in the service of king Zedekiah, through whose influence Jeremiah was released from prison, and who was on that account preserved from harm at the taking of Jerusalem (Jer. xxxviii. 7, xxxix. 13, 16). His name seems to be an official title = king's slave, i. e. minister.

* out of the hints in Jer. xxxviii. 7-13 (very imperfectly unfolded in the A. V.) Stanley draws the following scene: Ebed-melech found the king sitting in the great northern entrance of the Temple, and obtained a revocation of the order (by which Jeremiah had been put into the dungeon); and then, under the protection of a strong guard, proceeded with a detailed care, which the prophet seems gratefully to render, to throw down a mass of soft rags from the royal wardrobe to ease the rough ropes with which he drew him out of the well. [Leicester in the Jersch Church, ii. 693.] The Ethiopian's escape amid the disasters which fell on the nation (as the prophet foretold) is recorded as exemplifying the truth that those who put their trust in God shall be saved (Jer. xxxix. 18). II.

EBEN-EZER (vπ?w) = the stone of help: 'Αββδοζέερ: [Vat. I Sam. v. I, Aββδοζέερ: Alex. iv. v. I, Aββδοζέερ; Joseph, Αββδοζέερ: vps. ομονυμία,] a stone set up by Samson after a signal defeat of the Philistines, as a memorial of the 'help' received on the occasion from Jehovah (1 Sam. vii. 12). 'He called the name of it Ebenezer, saying, bitherto hath Jehovah helped us' (οτωδεών), παραπανοίδος). Its position is carefully defined as between Mizpeth — 'the watch-tower,' one of the conspicuous eminences a few miles north of Jerusalem — and Sheen — 'the tooth' or 'crag.' Neither of these points, however, for a peculiarly in the Hebrew name in iv. 1, the definite article to both words, — see Deiss. Augenb. Leih, § 290 d.

EBER 641

EBONY

EBER, have been identified with any certainty—the latter not at all.∗ According to Josephus’s record of the transaction (Ant. vi. 2, 2), the stone was erected to mark the limit of the victory, a spot which he calls Korraia, but in the Hebrew Be’tit-car. It is remarkable that of the occurrences of the name Eben-ezer, two (1 Sam. iv. 1, v. 1) are found in the order of the narrative before the place received its name. But this would not unnaturally happen in a record written after the event, especially in the case of a spot so noted as Eben-ezer must have been.

∗ Though Eben-ezer is mentioned twice after Samuel’s victory (see above), it was on the same occasion, namely, when the Hebrews fought at that place with the Philistines. Kienel suggests (Horaz’s Real-Encyk. iii. 618) that possibly there may have been a village Eben-ezer, near which Samuel’s “stone,” taking the same name, was afterwards set up. But there is no difficulty in supposing a case of prolepsis. [See Dan.]

EBER (אֶבֶר) [hebrew]: “E’ber, E’ber: Heber [in Num. xxiv. 24, E’berion, Vulg. Hebrew]. 1. Son of Salah, and great-grandson of Shem (Gen. x. 24, [xi. 14-17;] 1 Chr. i. 19). For confusion between Eber and Heber see Heber; and for the factitious importance attached to this patriarch, and based upon Gen. x. 21, Num. xxiv. 24, see Heber. T. E. B.

2. (אֶבֶר) [Heb.]: “A’ber. Son of Elnan and descendant of Shaharaim of the tribe of Benjamin (1 Chr. viii. 12). He was one of the founders of Ono and Lol with their surrounding villages.

3. (A’Ber): [Vat. Alex. omit.]. A priest, who represented the family of Anok, in the days of Jotham the son of Josha (Neh. xii. 29).

W. A. W.

EB’I’ASAPH (אֶבַּיָסַף) “Ab’iasaph and [1 Chr. vi. 23, ]’Ab’iasaph; [1 Chr. vi. 23, Vat. Ab’i-asaph; vi. 37, Ab’iasaph, vi. 23, m. -grap: Alex. F. vi. 23, Ab’iasaph, 2. m. Ab’iasaph]; Abiasaph’, a Kohathite Levite of the family of Korah, one of the forefathers of the prophet Samuel and of Heman the singer (1 Chr. vi. 23, 37). The same man is probably intended in ix. 19. The name appears also to be identical [as a contracted form] with Abi’asaph (which see), and in one passage (1 Chr. xxvi. 1) to be abbreviated to Asaph.

EBONY (אֶבְנֵי), hobam: καὶ τοῖς ἔθνοις ἐβυόνους: Eβύνους, Symm. (dentes hebeninon) occurs only in Ex. xxviii. 15, as one of the valuable commodities imported into Tyre by the men of Dedan. [Dedan.] It is mentioned together with “horns of ivory,” and it may hence be reasonably conjectured that ivory and ebony came from the same country. The best kind of ebony is yielded by the Diospyros ebenon, a tree which grows in Ceylon and Southern India: but there are many trees of the natural order Ebenaceae which produce this material. Ebony is also yielded by trees belonging to different natural families in other parts of the world, as in Africa. The ancients held the black heart-wood in high esteem. Herodotus (iii. 97) mentions ebony (φάλαργας ἐβύνους) as one of

the precious substances presented by the people of Ethiopia to the king of Persia. Dioscorides (i. 130) speaks of two kinds of ebony, an Indian and an Ethiopian; he gives the preference to the latter kind. It is not known what tree yielded the Ethiopian ebony. Royle says, “No Abyssinian ebony is at present imported. This, however, is more likely to be owing to the different routes which commerce has taken, but which is again returning to its ancient channels, than to the want of ebony in ancient Ethiopia.” There can be little doubt that the tree

which yielded Ethiopian ebony is distinct from the Diospyros ebenum, and probably belongs to another genus altogether. Virgil (Georg. ii. 116) says that “India alone produces the black ebony;” and Theophrastus (Hist. Plant. iv. 6, § 6) asserts that “ebony is peculiar to India.” The Greek word Εβυνας, the Latin ebena, our “ebony,” have all doubtless their origin in the Hebrew hobam, a term which denotes “wood as hard as stone” (comp. the German Steinholz, “fossil-wood”; see Gesenius, Thes. s. v., and First, Heb. Concord.). It is probable that the plural form of this noun is used to express the billets into which the ebony was cut previous to exportation, like our “log-wood.” There is every reason for believing that the ebony afforded by the Diospyros ebenum was imported from India or Ceylon by Phoenician traders; though it is equally probable that the Tyrian merchants were supplied with ebony from trees which grew in Ethiopia. See full discussions on the ebony of the ancient in Bochart, Hieroz. ii. 714, and Stahnhausen, Plin. Exercit. p. 735 sq.; comp. also Royle in Kitto’s Cyc., art. Hobina. According to Sir F. Trench (Ceylon, i. 116) the following trees yield ebony: Diospyros ebenum, D. reticulata, D. ebenaster, and D. hirsuta. The wood of the first named tree, which is abundant throughout all the flat country to the west of Trincomalee, excels all others in the evenness and intensity of its color. The centre of the trunk is the only portion which furnishes the extremely black part which is the ebony of commerce; but the trees are of such magnitude that reduced logs of two feet in diameter,

6 For the Hebrew word used by the LXX., see Rosenmüller’s Schol. ad Ex. xxvii. 15.
EBRONAH and varying from 10 to 15 feet in length, can be readily procured from the forests at Trincemakes" (Cyphon, I. e.).

EBRONAH. [Abronah.]

ECANUS, one of the five swift scribes who attended on Ezra (2 Esdr. xiv. 24).

ECBATANA (Ἐκβατάνα, 'Ekbatana, Ecbatana). It is doubtful whether the name of this place is really contained in the Hebrew Scriptures. Many of the best commentators understand the expression Ἐκβατάνα, in Ezra vi. 2, differently, and translate it in arach, "in a corner," (see Buxtorf and others, and so our English Bible, in the margin). The LXX., however, give ἐν πύλαις, "in a city," or (in some MSS., [c. g. Alex.]) ἐν Ἀμαθά ἐν πύλαις (Comp. Abil. ἐν Ἀμαθά πύλαις), which favors the ordinary interpretation. If a city is meant, there is little doubt of one of the two Ecbatanas being intended, for except these towns there was no place in the province of the Medes "which contained a palace" (Ἐκβατάνα), or where records are likely to have been deposited. The name 'Achmēdra, too, which at first sight seems somewhat remote from Ecbatana, wants but one letter of Ἐκβατάνα, which was the native appellation. In the apocryphal books Ecbatana is frequently mentioned (Tob. iii. 7, xiv. 12, 14; Jos. i. 1, 2; 2 Macc. ix. 3, &c.); and uniformly with

the later and less correct spelling of Ἐκβατάνα, instead of the earlier and more accurate form, used by Herodotus, Eschylus, and Ctesias, of 'Aγβατάνα.

Two cities of the name of Ecbatana seem to have existed in ancient times, one the capital of Northern Media, the Media Atropatene of Strabo; the other the metropolis of the larger and more important province known as Media Magna (see Sir H. Rawlinson's paper on the Atropatene Ecbatana, in the 10th volume of the Journal of the Geographical Society, art. ii.). The site of the former appears to be marked by the very curious ruins at Takht-i-Saleman (lat. 36° 28', long. 47° 9'); while that of the latter is occupied by Hamadan, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the "seven-walled town" described by Herodotus, and declared by him to have been the capital of Cyrus (Herod. i. 98, 69, 153; comp. Mos. Choren. ii. 84); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their Temple.

Plan of Ecbatana.

EXPLANATION.

2. Ruined Mosque.
3. Ancient buildings with shafts and capitals.
4. Ruins of the Palace of Abasai Khan.
5. Cemetery.
6. Ridge of Rock called "the Dragon." 
7. Hill called "Tawishah," or "the Stable." 
8. Ruins of Kalibiah.
9. Rocky hill of Zimbani-Saleman.

Various descriptions of the northern city have come down to us, but none of them is completely to be depended on. That of the Zendavesta (Vend. 11. Fargard 12.) is the oldest, and the least exaggerated. "Jenshish," it is said, "erected a fortress, sufficiently large, and formed of squared blocks of stone; he assembled in the place a vast population and stocked the surrounding country with cattle for their use. He caused the water of the great fortress to flow forth abundantly. And within the wall, or fortress, he erected a lofty palace, encompassed with walls, and had it out in many separate divisions, and there was no place, either in front or rear, to command and oversee the fortress." Herodotus, who ascribes the foundation of the city to his king Darius, says: "The Medes were obedient to Darius, and built the city now called Achæbatana, the walls of which are of great size and strength, rising in circles, one within the other. The plan of the place is that each of the walls should out-top the one beyond it by the battlements. The nature of the ground, which is a gentle hill, favors this arrangement in some degree, but it was mainly effected by art. The number of the circles is seven, the royal palace and the turrets standing within the last. The circuit of the outer wall is nearly the same with that of Athens. Of this outer wall the battlements are white, of the
The peculiar feature of the site of Tobiht-Saleiman, which it is proposed to identify with the northern Ecbatana, is a conical hill rising to the height of about 130 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and primitive character. A perfect enceinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within, there is an oval enclosure about 890 yards in its greatest and 400 in its least diameter, strewed with ruins, which cluster round a remarkable lake. This is an irregular basin, about 300 paces in circuit, filled with water exquisitely clear and pleasant to the taste, which is supplied in some unknown way from below, and which stands uniformly at the same level, whatever the quantity taken from it for irrigating the lands which lie at the foot of the hill. This hill itself is not perfectly isolated, though it appears so to those who approach it by the ordinary route. On three sides — the south, the west, and the north — the activity is steep and the height above the plain uniform, but on the east it abuts upon a hilly tract of ground, and here it is but slightly elevated above the adjacent country. It cannot therefore have ever answered exactly to the description of Herodotus, as the eastern side could not anyhow admit of seven walls of circumvallation. It is doubted whether even the other sides were thus defended. Although the thanks on these sides are covered with ruins, "no traces remain of any wall but the upper one" (As. Journ. x. 52). Still, as the nature of the ground on three sides would allow this style of defense, and as the account in Herodotus is confirmed by the Armenian historian, writing clearly without knowledge of the earlier author, it seems best to suppose that in the period of the Persian empire it was thought sufficient to preserve the upper enceinte, while the others were allowed to fall into decay, and ultimately were superseded by domestic buildings. With regard to the coloring of the walls, or rather of the battlements, which has been considered to mark especially the famous character of Herodotus' description, recent discoveries show that such a mode of ornamentation was actually in use at the period in question in a neighboring country. The temple of the Seven Spheres at Borsippa was adorned almost exactly in the manner which Herodotus assigns to the Median capital [The. Tower of; and it does not seem at all improbable that, with the object of placing the city under the protection of the Seven Planets, the seven walls may have been colored nearly as described. Herodotus has a little demanded the order of the colors, which he has seen: either black, orange, scarlet, gold, white, blue, silver, — as at the Borsippa temple, — or black, white, orange, blue, scarlet, silver, gold — if the order of the days dedicated to the planets were followed. Even the use of silver and gold in exter-

(wisdom, understood, and supposes a poetic license in the use of the word as a kind of symbolic proper-
name, appealing to Prov. xx. 1, xxxi. 1, as example of a like usage. As connected with the root מְעָלָה to ‘call together,’ and with מְעָלָה an assembly, the word has been applied to one who speaks publicly in an assembly, and there is, to say the least, a tolerable agreement in favor of this interpretation. Thus we have the comment of the Midrash, stating that the writer thus designates himself, ‘because his words were spoken in the assembly’ (quoted in Preston’s Ecclesiastes, note on i. 1); the rendering ἐκκλησιαστὴς by the LXX.; the adoption of this title by Jerome (Prof. in Eccles.), as meaning qui eunctum, i.e. ecclesiastic congregat quem nos inmoxmre posimus Consociatorem; the use of ‘Preacher’ by Luther, of ‘Preacher’ in the Authorized Version. On the other hand, taking מְעָלָה in the sense of collecting things, not of summoning persons, and led perhaps by his inability to see in the book itself any greater unity of design than in the chapters of Proverbs, Grotius (in Eccles. i. 1) has suggested ἱκανοποιεῖν (compiler) as a better equivalent. In this he has been followed by Horder and Schleiermacher, and perhaps Adorno has adopted the same rendering (notes on i. 1, and vii. 27, in Preston), seeing in it the statement partly that the writer had compiled the sayings of wise men who had gone before him, partly that he was, by an inductive process, gathering truths from the facts of a wide experience.

II. Canonicity.—In the Jewish division of the books of the Old Testament, Ecclesiastes ranks as one of the five Megilloth or Rolls [Hallel], and its position, as having canonical authority, appears to have been recognized by the Jews from the time in which the idea of a canon first presented itself. We find it in all the Jewish catalogues of the sacred books, and from them it has been received universally by the Christian Church. Some singular passages in the Talmud indicate, however, that the recognition was not altogether unhesitating, and that it was at least questioned how far the book was one which it was expedient to place among the Scriptures that were read publicly. Thus we find he statements (Wishnia, Shabbat, c. x., quoted by Mendelssohn in Preston, p. 74; Mibhur, fol. 114 a; Preston, p. 13) that ‘the wise men sought to secrete the book Koheloth, because they found in it words tending to heresy,’ and ‘words contradictory to each other;’ that the reason they did not secrete it was ‘because its beginning and end were consistent with the law;’ that when they examined it more carefully they came to the conclusion, ‘We have looked closely into the book Koheloth, and discovered a meaning in it.’ The chief interest of such passages is of course connected with the inquiry into the plan and teaching of the book, but they are of some importance also as indicating that it must have commanded itself to the teachers of an earlier generation, either on account of the external authority by which it was sanctioned, or because they had a clearer insight into its meaning, and were less startled by its apparent difficulties. Traces of this controversy are to be found in a singular discussion between the schools of Shammai and Hillel, turning on the question whether the book Koheloth were inspired, and in the comments on that question by R. Ob. de Bartenora and Mainmoneis (Suracliha iv. 34.)

III. Author and Date. — The questions of the authorship and the date of this book are so closely connected that they must be treated of together, and it is obviously impossible to discuss the points which they involve without touching also on an inquiry into the relation in which it stands to Hebrew literature generally.

The hypothesis which is naturally suggested by the account that the writer gives of himself in ch. i. and ii. is that it was written by the only ‘son of David’ (i. 1), who was ‘king over Israel in Jerusalem’ (i. 2). According to this notion we have in it what may well be called the Confessions of King Solomon, the utterance of a repentance which some have even ventured to compare with that of the 51st Psalm. Additional internal evidence has been found for this belief in the language of vii. 29–30, as harmonising with the history of 1 K. xli. 4, and an interpretation (somewhat forced perhaps) which refers iv. 13–15 to the murmurs of the people against Solomon and the popularity of Jeroboam as the leader of the people, already recognized as their future king (Mendelssohn and Preston in loc.). The belief that Solomon was actually the author, it need hardly be said, received generally by the Rabbinic commentators and the whole school of Patristic writers. The apparent exceptions to this in the passages by Talmudic writers which ascribe it to Hezekiah (Baba Batrura, c. i. fol. 15), or Isaiah (Shoth. Hakkob. fol. 50 b, quoted by Michaelis), can hardly be understood as implying more than a share in the work of editing, like that claimed for the ‘men of Hezekiah’ in Prov. xxv. 1. Grotius (Prof. in Eccles.) was indeed almost the first writer who called it in question, and started a different hypothesis. It can hardly be said, however, that this consensus is itself decisive. In questions of this kind the later witnesses add nothing to the authority of the earlier, whose testimony they simply repeat, and unless we had clearer knowledge than we have as to the sources of information or critical discernment of those by whom the belief was adopted, we ought not to look on their acceptance of it as closing all controversy. This book which bears the title of ‘The Wisdom of Solomon’ asserts, both by its title and its language (vii. 1–21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it, till Jerome had asserted the authority of the Hebrew text as the standard of canonicity, and by not a few afterwards. The book which bears the title of ‘The Wisdom of Solomon’ ascertains, both by its title and its language (vii. 1–21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it, till Jerome had asserted the authority of the Hebrew text as the standard of canonicity, and by not a few afterwards. The book which bears the title of ‘The Wisdom of Solomon’ ascertains, both by its title and its language (vii. 1–21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it, till Jerome had asserted the authority of the Hebrew text as the standard of canonicity, and by not a few afterwards.

The hypothesis that every such statement in a canonical book must be received as literally true, is, in fact, an assumption that inspired writers were debased from forms of composition which were open, without blame, to others. In the literature of every other nation the form of personated
AUTHORSHIP, where there is no animus decipendi, has been recognized as a legitimate channel for the expression of opinions, or the quasi-dramatic representation of character. Why should we venture on the assertion that if adopted by the writers of the Old Testament it would have made them guilty of a falsehood, and been inconsistent with their inspiration? The question of authorship does not involve that of canonical authority. A book written by Solomon would not necessarily be inspired and canonical. There is nothing that need startle us in the thought that an inspired writer might use a liberty which has been granted without hesitation to the teachers of mankind in every age and country.

The preliminary difficulty being so far removed, we can enter on the objections which have been urged against the traditional belief by Grothus and later critics, and the hypotheses which they have substituted for it. In the absence of adequate external testimony, these are drawn chiefly from the book itself.

1. The language of the book is said to be inconsistent with the belief that it was written by Solomon. It belongs to the time when the older Hebrew was becoming largely intermingled with Aramaic forms and words (Grothus, De Wette, Ewald, and nearly the whole series of German critics), and as such takes its place in the latest group of books of the Old Testament, along with Ezra, Nehemiah, Daniel, Esther: it is indeed more widely different from the language of the older books than any of them (Ewald). The prevalence of abstract forms again, characteristic of the language of Ecclesiastes, is urged as belonging to a later period than that of Solomon in the development of Hebrew thought and language. The answers given to these objections by the defenders of the received belief are (Preston, Eccles. p. 7), (a) that many of what we call Aramaic or Chaldean forms may have belonged to the period of pure Hebrew, though they have not come down to us in any extant writings; and (b) that so far as they are foreign to the Hebrew of the time of Solomon, he may have learnt them from his "strange wives," or from the men who came as ambassadors from other countries.

2. It has been asked whether Solomon would have been likely to speak of himself as in i. 12, or to describe with bitterness the misery and wrong of which his own misgovernment had been the cause, as in iii. 16, iv. 1 (Jahn, Einl. ii. p. 840). On the hypothesis that he was the writer, the whole book is an acknowledgment of evils which he had occasioned, while yet there is no distinct confession and repentance. The question here raised is, of course, worth considering, but it can hardly be looked on as heating in either direction to a conclusion.

There are forms of saticy and self-reproach, of which this half-sad, half-sorful retrospect of a man's own life—this utterance of bitter words by which he is condemned out of his own mouth—is the most natural expression. Any individual judgment on this point cannot, from the nature of the case, be otherwise than subjective, and ought therefore to be based on our estimate of other evidence as little as possible.

3. It has been urged that the state of society indicated in this book leads to the same conclusion as its language, and carries us to a period after the return from the Babylonian Captivity, when the Jews were enjoying comparative freedom from invasion, but were exposed to the evils of misgovernment under the satraps of the Persian king (Ewald, Post. Bücher; Keil, Einl. in das A. T. unter Eccles.). The language is throughout that of a man who is surrounded by many forms of misery (iii. 16, iv. 1, v. 8, viii. 11, ix. 12). There are sudden and violent changes, the servant of to-day becoming the ruler of to-morrow (x. 5-7). All this, it is said, agrees with the glimpses into the condition of the Jews under the Persian empire in Ezra and Nehemiah, and with what we know as to the general condition of the provinces under its satraps. The indications of the religious condition of the people, their formalism, and much-speaking (v. 1, 2), their readiness to evade the performance of their vows by casuistic excuses (v. 9), represent, in like manner the growth of evils, the germs of which appeared soon after the Captivity, and which we find in a fully developed form in the prophecy of Malachi. In addition to this general resemblance there is the agreement between the use of the words "angel" or priest of God (v. 6, Ewald, in loc.), and the recurrence in Malachi of the terms מַעַן, מַעֲנֵי, the "angel" or messenger of the Lord, as a synonym for the priest (Mal. ii. 7), the true priest being the great agent in accomplishing God's purposes. Significant, though not conclusive, in either direction, is the absence of all reference to any contemptuous prophetic activity, or to any Messianic hopes. This might indicate a time before such hopes had become prevalent or after they had been extinguished. It might, on the other hand, be the natural result of the experience through which the son of David had passed, or fitly take its place in the dramatic personation of such a character. The use throughout the book of Elohim instead of Jehovah as the divine Name, though characteristic of the book as dealing with the problems of the universe rather than with the relations between the Lord God of Israel and his people, and therefore striking as an idiocy, leaves the problem as to date. The indications of rising questions as to the end of man's life, and the constitution of his nature, of doubts like those which afterwards developed into Sadduceism (iii. 10-21), of a copious literature connected with those questions, confirm, it is urged (Ewald), the hypothesis of the later date. It may be added too, that the absence of any reference to such a work as this in the enumeration of Solomon's writings in 1 K. iv. 22, tends, at least, to the same conclusion.

In this case, however, as in others, the arguments of recent criticism are stronger against the traditional belief than in support of any rival theory, and the advocates of that belief might almost be content to rest their case upon the discordant hypotheses of their opponents. On the assumption that the book belongs, not to the time of Solomon, but to the period subsequent to the Captivity, the dates which have been assigned to it occupy a range of more than 300 years. Grothus supposes Zerubbabel to be referred to in x. 11, as the "One Shepherd" (Colum. in Eccles. in loc.), and so far agrees with Keil (Einleitung in das A. T.), who fixes it in the time of Ezra and Nehemiah. Ewald and De Wette conjecture the close of the period of Persian or the commencement of that of Macedonian rule; Bertholdt, the period of Alexander the Great and Antiochus Epiphanes; Hitzig, circ. 204
ECCLESIASTES

B.C.; Hartmann, the time of the Maccabees. On the other hand it must be remembered in comparing these discordant theories that the main facts relied upon by these critics as fatal to the traditional belief are compatible with any date subsequent to the Captivity, while they are inconsistent, unless we admit the explanation, given as above, by Preston, with the notion of the Sablonerie authorship.

Of Vision. — The book of Ecclesiastes comes before us as being conspicuously, among the writings of the O. T., the great stumbling-block of commentators. Elsewhere there are different opinions as to the meaning of single passages. Here there is the widest possible divergence as to the plan and purpose of the whole book. The passages already quoted from the Mishna show that some, at least, of the Rabbincal writers were perplexed by its teaching — did not know what to make of it — but gave way to the authority of men more discerning than themselves. The traditional statement, however, that this was among the scriptures which were not read by any one under the age of thirty (Cist. Sac., Ammata in Eccles., but with a "neeolo ubi," as to his authority), indicates the continuance of the old difficulty, and the remarks of Jerome (Pref. in Eccles., Comm. in Eccles. xii. 13) show that it was not forgotten. Little can be gathered from the series of Pseudepigraphic interpolations. The book is comparatively seldom quoted by them. No attempt is made to master its plan and to enter into the spirit of its writer. The charge brought by Philostratus of Brescia (cir. 383) against some heretics who rejected it as teaching a false morality, shows that the obscurity which had been a stumbling-block to Jewish teachers was not removed for Christians. The fact that Theodore of Mopsuestia was accursed at the Fifth General Council of calling in question the authority and inspiration of this book, as well as of the Cauticles, indicates that in this respect as in others he was the precursor of the spirit of modern criticism. But with these exceptions, there are no traces that men's minds were drawn to examine the teachings of the book. When, however, we descend to the more recent developments of criticism, we meet with an almost incredible divergence of opinion. Luther, with his broad, eloquent vision into the workings of a manifold human heart, sees it in (Pref. in Eccles.) a noble "Politica vel Economica," leading men in the midst of all the troubles and disorders of human society to a true endurance and reasonable enjoyment. Grotius (Pref. in Eccles.) gives up the attempt to trace in it a plan or order of thought, and finds in it only a collection of many maxims, connected more or less closely with the great problems of human life, analogous to the discussion of the different definitions of happiness at the opening of the Nicomachean Ethics. Some (of whom Warburton may be taken as the type, Works, vol. iv. p. 154) have seen in the language of iii. 18-21 a proof that the belief in the immortality of the soul was no part of the transmitted creed of Israel. Others (Patrick, Desvoux, Davidson, Mendelssohn) contend that the special purpose of the book was to convey truth against the teaching of a seeming skepticism. Others, the later German critics, of whom Ewald may be taken as the highest and best type, reject these views as partial and one-sided, and while admitting that the book contains the germs of later systems, both Piaristic and Socion, assert that the object of the writer was to point out the secret of a true blessedness in the midst of all the distractions and sorrows of the world as consisting in a tranquil, calm enjoyment of the good that comes from God (Poet. Besth. iv. 180).

The variety of these opinions indicates sufficiently that the book is as far removed as possible from the character of a formal treatise. It is that which it professes to be — the confession of a man of wide experience looking back upon his past life and looking out upon the disorders and calamities which surround him. Such a man does not set forth his premises and conclusions with a logical completeness. While it may be true that the absence of a formal arrangement is characteristic of the Hebrew mind in all stages of its development (Lowth, de Soc. Polit. Heb. Præd. xxiv.), or that it was the special mark of the declining literature of the period that followed the captivity (Ewald, Poet. Besth. iv. p. 177), it is also true that it belongs generally to all writings that are addressed to the spiritual rather than the intellectual element in man's nature, and that it is found accordingly in many of the greatest works that have influenced the spiritual life of mankind. In proportion as a man has passed out of the region of a traditional, easily-systematized knowledge, and has lived under the influence of great thoughts — possessed by them, yet hardly knowing their bearing upon the form of the book, as a kind of scientific classification — are we likely to find this apparent want of method. The true utterances of such a man are the records of his struggles after truth, of his occasional glimpses of it, of his ultimate discovery. The treatise de Initiatione Christi, the Pensées of Pascal, Augustine's Confessions, widely as they differ in other points, have this feature in common. If the writer consciously reproduces the stages through which he has passed, the form he adopts may either be essentially dramatic, or it may record a statement of the changes which have brought him to his present state, or it may repeat and renew the oscillations from one extreme to another which had marked that earlier experience. The writer of Ecclesiastes has adopted and interwoven both the latter methods, and hence, in part, the obscurity which has made it so prominently the stumbling-block of commentators. He is not a didactic moralist writing a homily on Virtue. He is not a prophet delivering a message from the Lord of Hosts to a sinful people. He is a man who has sinned in giving way to selfishness and sensuality, who has paid the penalty of that sin in satiety and weariness of life; in whom the mood of spirit, over-reflective, indissoluble to action, of which Shakespeare has given us in Hamlet, Jaques, Richard II., three distinct examples, has become dominant in its darkest form, but who has through all this been under the discipline of a divine education, and has learnt from it the lesson which God meant to teach him. What that lesson was will be seen from an examination of the book itself.

Leaving it an open question whether it is possible to arrange the contents of this book (as Kestner and Vahlen have done) in a carefully balanced series of strophes and antistrophes, it is tolerably clear that the recurring burden of "Vanity of vanities," and the teaching which recommends a life of calm enjoyment, mark, whenever they occur, a kind of halting-place in the succession of thoughts. It is the summing up of one cycle of experience: the sentence passed upon one phase of life. Taking this, accordingly, as our guide, we may look on the
whole book as falling into five divisions, each, to a
certain extent, running parallel to the others in its
order and results, and closing with that which, in
its position no less than its substance, is "the con-
clusion of the whole matter."

(1.) Ch. i. and ii. This portion of the book
more than any other has the character of a personal
confession. The Preacher starts with reproducing
the phase of despair and weariness into which his
experience had led him (i. 2, 9). To the man who
is thus satisfied with life the order and regularity
of nature are oppressive (i. 4—7); nor is he led, as
in the 90th Psalm, from the things that are transi-
tory to the thought of One whose years are from
sternity. In the midst of the ever-recurring changes
he finds no progress. That which seems to be new
is but the repetition of the old (i. 8—11). Then,
having laid bare the depth to which he had fallen,
he retraces the path by which he had travelled
thitherward. First he had sought after wisdom as
that to which God seemed to call him (i. 13), but
the pursuit of it was a sore travail, and there was
no satisfaction in its possession. It could not
remedy the least real evil, nor make the crooked
straight (i. 15). The first experiment in the search
after happiness had failed, and he tried another. It
was one to which men of great intellectual gifts
and high fortune are continually tempted—to sur-
round himself with all the appliances of sensual
enjoyment and yet in thought to hold himself above
it (ii. 1—9), making his very voluptuousness part
of the experience which was to enlarge his store of
wisdom. This—which one may perhaps call the
Goethe idea of life—was what now possessed him.
But this also failed to give him peace (ii. 11). Had
he not then exhausted all human experience and
found it profitless (ii. 12)? If for a moment he
found comfort in the thought that wisdom excelleth
folly, and that he was wise (ii. 10, 14), it was soon
darkened again by the thought of death (ii. 15).
The wise man dies as the fool (ii. 16). This is
enough to make even him who has wisdom hate
even his all labor and sink into the outer darkness
of despair (ii. 20). Yet this very despair leads to
the remedy. The first section closes with that which,
in different forms, is the main lesson of the book—
to make the best of what is actually around one
(ii. 24) —to substitute for the reckless feverish
pursuit of pleasure the calm enjoyment which men
may yet find both for the senses and the intellect.
This, so far as it goes, is the secret of a true life;
this is from the hand of God. On everything else
there is written, as before, the sentence that it is
vanity and vexation of spirit.

(2.) Ch. iii. I—vi. 9. The order of thought in
this section has a different starting-point. One
who looked out upon the infinitely varied phenomena
of man's life might yet discern, in the midst of
that variety, traces of an order. There are times
and seasons for each of them in its turn, even as
there are for the vicissitudes of the world of nature
(iii. 1—8). The heart of man with its changes is
the mirror of the universe (iii. 11), a^ 4 is, like that,
incertitude. And from this there comes the same
conclusion as from the personal experience. Cured
hy to accept the changes and chances of life, entering
into whatever joy they bring, as one accepts the
order of nature, this is the way of peace (iii. 13).
The ever-recurring cycle of nature which had
before been irritating and disturbing,
ow whispers the same lesson. If we suffer, others
have suffered before us (iii. 15). God is seeking
out the past and reproducing it. If men repeat
injustice and oppression, God also in the appointed
season repeats his judgments (iii. 16, 17). It is
true that this thought has a dark as well as a
bright side, and this cannot be ignored. If men
come and pass away, subject to laws and changes
like those of the natural world, then, it would seem,
man has no preeminence above the beast (iii. 19).
One end happens to all. All are of the dust and
return to dust again (iii. 20). There is no imme-
diate comfort of that conclusion. It was to teach
that the preacher's experience and reflection had
led him. But even on the hypothesis that the
personal being of man terminates with his death,
he has still the same counsel to give. Admit that
all is darkness beyond the grave, and still there is
nothing better on this side of it than the temper
of a tranquil enjoyment (iii. 22). The transition
from this to the opening thoughts of ch. iv. seems
at first somewhat abrupt. But the Preacher is
retracting the path by which he had been actually
led to a higher truth than that in which he had
then rested, and he will not, for the sake of a
formal continuity, smooth over its ruggedness.
The new track on which he was entering might have
seemed less promising than the old. Instead of the
self-centred search after happiness he looks out
upon the miseries and disorders of the world, and
learns to sympathize with suffering (iv. 1). At
first this does but multiply his perplexities. The
world is out of joint. Men are so full of misery that
death is better than life (iv. 2). Successful energy
exposes men to envy (iv. 4). Indolence leads to
poverty (iv. 5). Here too he who steers clear of
both extremes has the best portion (iv. 6). The
man who heaps up riches stands alone without
kindred to share or inherit them, and loses all the
blessings and advantages of human fellowship (iv.
8—12). And in this survey of life on a large scale,
as in that of a personal experience, there is a cycle
which is ever being repeated. The old and foolish
king yields to the young man, poor and wise, who
steps from his prison to a throne (iv. 13, 14). But
he too has his successor. There are generations
without limit before him, and shall be after him
(iii. 15, 16). All human greatness is swallowed
up in the great stream of time. The opening of
ch. v. again presents the appearance of abruptness,
but it is because the survey of human life takes a
wider range. The type of the Preacher, who
sees the dwellers in palaces to the worshippers in
the Temple, the devout and religious men. Have
they found out the secret of life, the path to wisdom
and happiness? The answer to that question is
that there the blindness and folly of mankind show
themselves in their worst forms. Hypocrisy, un-
seemly prayers, idle dreams, broken vows, God's
message, the Priest, mocked with curses—that
was what the religion which the Preacher witnessed
presented to him (v. 1—6). The command "Fear
then God," meant that a man was to take no part
in a religion such as this. But that command also
suggested the solution of another problem, of that
prevalence of injustice and oppression which had
before weighed down the spirit of the inquirer.
Above all the tyranny of petty governors, above
the might of the king himself, there was the power
of the Highest (v. 8); and his judgment was manifest
upon earth. Was there not an inequality of power;
Was God's purpose that the earth
would be for all, really counteracted (v. 9)? Was
the rich man with his cares and fears happier than
the laboring man whose sleep was sweet without riches (v. 10–12)? Was there anything permanent in that wealth of his? Did he not leave the world naked as he entered it? And if so, did not all this bring the inquirer round to the same conclusion as before? Moderation, self-control, freedom from all disturbing passions, these are the conditions of the maximum of happiness which is possible for man on earth. Let this be received as from God. Not the outward means only, but the very capacity of enjoyment is his gift (v. 18, 19). Short as life may be, if a man thus enjoys, he makes the most of it. God approves and answers his cheerfulness. Is not this better than the riches or length of days on which men set their hearts (vi. 1–5)? All are equal in death; all are nearly equal in life (vi. 6). To feel the eyes with what is actually before them is better than the careless wanderings of the spirit (vi. 9).

(3.) Ch. vi. 10–viii. 15. So far the lines of thought all seemed to converge to one result. The ethical teaching that grew out of the wise man's experience had in it something akin to the higher forms of Epicureanism. But the seeker could not rest in this, and found himself beset with thoughts at once more troubling and leading to a higher truth. The spirit of man looks before and after, and the uncertainties of the future vex it (vi. 12). A man cannot but be beset, as being man, with the want of wealth that riches (vii. 1); death is better than life, the house of mourning than the house of feasting (vii. 2). Self-command and the spirit of calm endurance are a better safeguard against vain speculations than any form of enjoyment (vii. 8, 9, 10). This wisdom is not only a defense, as lower things, in their measure may be, but it gives life to them that have it (vii. 12). So far there are signs of a clearer insight into the end of life. Then comes an oscillation which carries him back to the old problems (vii. 15). Wisdom suggests a half-solution of them (vii. 18), suggests also calmness, caution, humility in dealing with them (vii. 22); but this again is followed by a relapse into the bitterness of the sated pleasure-seeker. The search after wisdom, such as it had been in his experience, had led only to the discovery that though men were shocked, women were more wicked still (vii. 26–29). The repetition of thoughts that had appeared before, is perhaps the natural consequence of such an oscillation, and accordingly in ch. viii, we find the seeker moving in the same round as before. There are the old reflections on the misery of man (viii. 6), and the conclusions in the moral order of the universe (viii. 10, 11), the old conclusion that enjoyment each enjoyment as is compatible with the fear of God is the only wisdom, viii. 15.

(4.) Ch. viii. 16–xii. 8. After the pause implied in his again arriving at the lesson of v. 15, the Preacher retraces the last of his many wanderings. This time the thought with which he started was a profound conviction of the inability of man to unravel the mysteries by which he is surrounded (viii. 17); of the nothingness of man when earth is thought of as ending all things (vii. 3–6); of the wisdom of enjoying life while we may (v. 9, 10); of the evils which affict nations and individual man (ix. 11, 12). The wide experience of the Preacher suggests sharp and pointed sayings as to these evils (v. 1–29), each true and weighty in itself, but not leading him on to any firmer standing ground or clearer solution of the problems which oppressed him. It is here that the traces of plan and method in the book seem most to fail us. Consciously or unconsciously the writer teaches us how clear an insight into the follies and sins of mankind may exist with doubt and uncertainty as to the great ends of life, and give him no help in his pursuit after truth. In ch. xi., however, the progress is more rapid. The tone of the Preacher becomes more that of direct exhortation, and he speaks in clearer and higher notes. The conclusions of previous trains of thought are not contradicted, but are placed under a new law and brought into a more harmonious whole. The end of man's life is not to seek enjoyment for himself only, but to do good to others, regardless of the uncertainties or disappointments that may attend his efforts (xi. 1–4). His wisdom is to remember that there are things which he cannot know, problems which he cannot solve (xi. 5), to enjoy, in the brightness of his youth, whatever blessings God bestows on him (xi. 9). But beyond all these there lie the days of darkness, of failing powers and incapacity for enjoyment; and the joy of youth, though it is not to be crushed, is yet to be tempered by the thought that it cannot last for ever, and that it too is subject to God's law of retribution (xi. 9, 10). The secret of a true life is that a man should contemplate the vigor of his youth to God (xii. 1). It is well that he should be conscious of the passage of time, the decay of age enamells all the faculties of sense (xii. 2, 6), before the spirit returns to God who gave it. The thought of that end rings out once more the knell of the nothingness of all things earthly (xii. 8); but it leads also to "the conclusion of the whole matter," to that to which all trains of thought and all the experiences of life had been leading the seeker after wisdom, that to fear God and keep his commandments was the highest good attainable; that the righteous judgment of God would in the end fulfill itself and set right all the seeming disorders of the world (xii. 13, 14).

If one were to indulge conjecture, there would perhaps be some plausibility in the hypothesis that xii. 8 had been the original conclusion, and that the epilogue of xii. 9–14 had been added, either by another writer, or by the same writer on a subsequent revision. The verses (9–12) have the character of a panegyric designed to give weight to the authority of the teacher. The two that now stand as the conclusion, may naturally have originated in the desire to furnish a clew to the perplexities of the book, by stating in a broad intelligible form, not easy to be mistaken, the truth which had before been latent.

If the representation which has been given of the plan and unity of the book be at all true, we find in it, no less than in the book of Job, indications of the struggle with the doubts and difficulties which in all ages of the world have presented themselves to thoughtful observers of the condition of mankind. In its sharp sayings and wise counsels, it may present some striking affinity to the Proverbs, which also bear the name of the son of David, but the resemblance is more in form than in substance. The essential character it agrees with that great inquiry into the mysteries of God's government which the drama of Job brings before us. There are indeed characteristic differences. In the one we find the highest and boldest forms of Hebrew poetry, a sustained unity of design; in the other there are, as we have seen, changes and oscillations, and the style seldom rises.
above the rhythmic character of proverbial forms of speech. The writer of the book of Job deals with the great mystery presented by the sufferings of the righteous, and writes as one who has known those sufferings in their intensity. In the words of the Preacher, we trace chiefly the weariness or satiety of the pleasure-seeker, and the failure of all schemes of life but one. In spite of these differences, however, the two books illustrate each other. In both, the thought that the life of the righteous, the inspired is led to take refuge (as all great thinkers have ever done) in the thought that God’s kingdom is infinitely great, and that man knows but the smallest fragment of it; that he must refrain from things which are too high for him and be content with that which it is given him to know, the duties of his own life and the opportunities it presents for his doing the will of God.

Literature.—Every commentary on the Bible as a whole, every introduction to the study of the O. T., contains of course some materials for the history and interpretation of this as of other books. It is not intended to notice these, unless they possess some special merit or interest. As having that claim may be the specific commentary by Jerome addressed to Paula and Eustochium, as giving an example of the Patriarchic interpretation of the book now before us; the preface and annotations of Grotius (Opp. vol. iii.) as representing the earlier, the translation and notes of Ewald (Post. Bäch. vol. iv.) as giving the later results of philosophical criticism. The Critici Sacri here, as elsewhere, will be found a great storehouse of the opinions of the Biblical scholars of the 16th and 17th centuries. The sections on Ecclesiastes in the Introductions to the O. T. by Elchhorn, De Wette, John, Hilvernick, Kell, Davidson, will furnish the reader with the opinions of the chief recent critics of Germany as to the authorship and meaning of the book. Among the treatises specially devoted to this subject may be mentioned the characteristic Commentary by Luther already referred to (Opp. vol. ii. Jena, 1533); that by Anton. Correns in the 16th century, interesting as one of the earliest attempts to trace a distinct plan and order in it, and as having been adopted by Bishop Patrick as the basis of his interpretation; the Anmerkungen in Koekelijt by J. Drusius, 1655; the translation and Notes of the book published in Germany by Rabe (Ansbach, 1771); the Philosophical and Critical Essay on Ecclesiastes by Desvoues (London, 1760), written chiefly to meet the attacks of skeptics, and to assert that the doctrine of the book is that of the Immortality of the Soul: the Scholia of Maldonatus, better known for his Commentary on the Gospels (Paris, 1767), the commentaries of Knobel (Leipzig, 1834); Zöckel (Würzburg, 1727); Schmitt, J. E. C. (1794); Nachsig, J. Ch. (Heilbronn, 1798); Van der Palm (1781), Küster (1821), Köster (1831), Umbreit (Gottingen, 1818); and the article by Vahinger, in the Stud. und Krit. of 1848 [translated, with modification, in the Meth.-cat. Qw. Rev. for April and July, 1849]. English Biblical literature is comparatively barren in relation to this book, and the only noticeable recent contributions to its exegesis are the Commentary of Stuart, the translation of Moulinsola with Prolegomena, etc., by Preston (Cambridge, 1835), and the Attempt to Illustrate the Book of Ecclesiastes by Holden. As growing out of the attempt a fathoming, though not taking the form of criticism or exegesis, may be mentioned the metrical paraphrases which are found among the works of the minor English poets of the 17th century, of which the most memorable are those by Quarles (1645) and Sandys (1648).

E. II. P.

* Other works or later editions. — Prof. Stuart (Commentary on Ecclesiastes, edited and revised by R. D. C. Robbins, 1841), without admitting all the objections to Solomon’s authorship of the book to be valid, regards the arguments urged for that conclusion as insufficient to establish the claim. He supposes the author of the book to be unknown, but maintains its canonicity to be unquestionable. The book of Ecclesiastes has a claim to the place which it holds as one of the inspired writings. There the book is, in the midst of the Hebrew Scriptures; and there it has been, at least ever since the period when the Hebrew canon was closed. There at all events it was, when our Saviour and the Apostles declared the Jewish Scriptures to be of Divine origin and authority.”

For his views on this point expressed more fully, see his Hist. of the O. T. Canon, p. 138 ff.

We have commentaries also, in addition to those mentioned above, from Ewald, Die Dichter des Alten Blancks, Theil iv. (Gottingen, 1837, 2d Aufl. Theil ii., 1867), Herzfeld (1838), Hitzig (in the Kurszef. Exeg. Haeb. Lief. vii., 1847), Hellingsteyl (continuation of Maurer, iv. sect. ii. 1818), Burger (1834), Philippson (Die Israelsiche Relig., iii. 1834), Elster (1855), Wagenseil (1856), Vahinger (1858), Henstenberg (1858, Eng. trans. in Clark’s For. Theol. Libr. Edin. 1810), L. Young (Phila. 1866), D. Castelli (il Libro del Cofete, trad. del libro etnico con introd. crit. e note, Pisa, 1866), and G. R. Noyes (A New Trans. of Job, Ecclesiastes and Canticles, with Introductions and Notes, 3d ed., Boston, 1867). The Historical and Critical Commentary of Ginsburg (London 1861), a valuable work, contains a good history of the earlier and later literature of the book. Ginsburg writes also the article Ecclesiastes in Kitto’s Cyc. of Bibl. Literature (3d ed., 1882). Vahinger writes the article Prediger Salomo in Herzog’s Real-Encycl. xii. 92-106, worthy of attention especially for its minute analysis of the contents of Koehler. Böck’s section (Einl. in den A. T. p. 641 ff.) summarizes the results of a careful study of the questions relating to this book (See also Herbst’s Einl. in den A. T. p. 241-251). Welte, (1852.) Dr. Nordheimer has an elaborate article on the Philosophy of Ecclesiastes in the Amer. Bibl. Repos. for July 1838, xii. 197-210. See also Gurlitt, Zur Erklärung des Buches Koheleth, in the Theol. Stud. u. Krit., 1845, pp. 321-345. The LXX. translation of Ecclesiastes, says Böck, is remarkable for its literal adherence to the Hebrew text. It is so shabby at times in this respect (e.g. vii. 29) as to be ungrammatical and unintelligible. Such translations have a special value as vouchers for the condition of the text on which they are founded.

Dean Stanley’s remarks on this composition evince his characteristic critical skill, as well as power of elegant expression. As to the author, he understands that the anonymous writer of the Preacher in Ecclesiastes personates Solomon. There can be no doubt that Ecclesiastes embodies the sentiments which were believed to have proceeded from Solomon at the close of his life, and therefore must be taken as the Hebrew, Scriptural representation of his last lessons to the world” (History of the Jewish Church, ii. 281).
characterizes the scope and structure of the writing thus: "As the book of Job is couched in the form of a dramatic argument between the patriarch and his friends— as the Song of Songs is a dramatic dialogue between the Lover and the Beloved One, so the book of Ecclesiastes is a drama of a still more tragic kind. It is an interchanges of voices, higher and lower, mournful and joyful, within a single human soul. It is like the struggle between the two principles in the Epistle to the Romans. It is like the question and answer of the 'Two Voices' of our modern poet. It is like the perpetual strife and astrotrophe of Pascal's Pensees. . . . Every speculation and thought of the human heart is heard, and expressed, and recognized in turn. The conflicts which in other parts of the Bible (comp. especially Pss. Lxxviii. 3, 6, 12, 18, and Lxxxix. 46-50) are confined to a single verse or a single chapter, are here expanded to a whole book." (pp. 252, 253). We have space only for the concluding paragraph. "There is a yet simpler and nobler summary of the wide and varied experience of the manifold forms of human life, as represented in the greatness and the fall of Solomon. It is not 'vanity of vanities,' it is not 'rejoice and be merry,' it is not even 'wisdom and knowledge, and many provers, and the words of the wise, even words of truth:' in making many books there is no end, and much study is a weariness of the flesh. Let us hear the conclusion of the whole matter." For all students of ecclesiastical history, for all students of theology, for all who are about to be religious teachers of others, for all who are entangled in the controversies of the present, there are no better words to be remembered than these, viewed in their original and immediate application. They are the true answer to all perplexities respecting Ecclesiastes and Solomon; they are no less the true answer to all perplexities about human life itself. 'Fear God and keep his commandments; for this is the whole duty of man. For toil shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil' (Ecc. xii. 14-14). II.

ECCLESIASTICUS, the title given in the Latin Version to the book which is called in the Septuagint The Wisdom of Jesus the Son of Sirach (7:1 Ἰωσήφ τοῦ Ἰσραήλ). 1 Macc. 13 (cf. 1 Macc. 12. 26a). 2. The writer of the present book describes himself as Jesus (i.e. Jehoshua) the son of Sirach, of Jerusalem (cf. I. 27), but the conjectures which have been made to fill up this short notice are either unwarranted (e.g. that he was a physician from xxxviii. 1-15) or absolutely improbable. There is no evidence to show that he was of priestly descent; and the similarity of names is scarcely a plausible excuse for confounding him with the Hele- lenizing high-priest Jason (2 Macc. ix. 7-11; George Syne. Chronog. 276). In the Talmud the name of Ben Sirā (בנ סירא, for which בְּנִי לִילֶד is a late error, Jos. Ant. d. Jud. 4. i. 31) occurs in several places as the author of proverbial sayings which in part are parallel to sentences in Ecclesiasticus (cf. § 4), but nothing is said as to his date or person [JESUS THE SON OF SIRACH], and the tradition which ascribes the authorship of the book to Eleazer (n. 260) is without any adequate foundation (Jos. v. v. The Palestinian origin of the author is, however, substantiated by internal evidence, e.g. xxiv. 10. 3. The language in which the book was essentially composed was Hebrew (Ἑβραϊκός); this may mean, however, the vernacular Aramæan dialect, John v. 2. xii. 13, &c.). This is the express statement of the Greek translator, and Jerome says (Pref. in Libr. Sid. l. c.) that he had met with the "Hebrew" text; nor is there any reason to doubt that he saw the book in its original form. The internal character of the prose and the style witness to its foreign source. Not only is the style Hebraistic in general form (cf. Lowth, de verbo Passi, xxxiv.), and idioms (e.g. θεολογία, θαυμάς, xii. 15; κρίμα, θαυμάς, xxxvii. 54; ἔννοια, ἔννοια, xiv. 11; cf. Eichhorn, Fin. d. Apok. p. 57) as distinguished from the Greek of the Introduction, but in several instances it is possible to point out mistakes and

---

* The reading of Cod. A and six other MSS. is remarkable (cf. 338, 352, 358, 361, 368, 369, 370).

* The work was written in Hebrew and not

services of the Church (Comm. in Synov. § 38. "Sapientia, quae dictior fili Sirach in bibliis Apud Latines hoc ipsa generali vocabulo Ecclesiasticus appellatur, quo vocabulo non auter libelli sed scripturarum quas nominantest eis"). The specia, application by Rutilans of the general name of the class (ecclesiasticus as opposed to canonicet) to the single book may be explained by its wide popularity, Athanasius, for instance, mentions the book (Ep. Patr. sub fin.) as one of those 'framed by the fathers to be read by those who wish to be instructed (ἐκ τοῖς κατάθλοις) in the word of godliness.' According to Jerome (Pref. in Libr. Sid. ix. 1212) the original Hebrew title was Proverbs (הaddContainerGapית, cf. inf. § 9) and the Wisdom of Sirach shared with the canonical book of Proverbs and the Wisdom of Solomon the title of The book of all Virtues (ἡ παράδοσις αυτοίς, ἡ παρα
dotos, Hieron, l.c. (cf. Routh, Bibb. Sacra. i. 278). In the Syriac version the book is entitled The Book of Jesus the son of Simon Astro (i.e. the bound); and the same book is called the Wisdom of the Son of Astro. In many places it is simply styled Wisdom (Orig. in Matt. xiii. 4; cf. Chem. i. 42; 39, 72, &c.), and Jesus Sirach (August. ad Simplic. § 20).

---

Aramaean is shown by the fact that the numerous quotations from 2nd preserved in Aramaean writings, as the Talmud and Midrashim, are nearly all in pure Hebrew. See Zunz, Gottschedisch. Veri. d. Juden, p 101; Ginsburg, Art. Ecclesiasticus in Ritté's Cyclo. g. Bibl. Lat., 34 ed., p. 721. ▲
the benefactors of his nation. And on the other hand the manner in which the translator speaks of the Alexandrine version of the Old Testament, and the familiarity which he shows with its language (e. g. xiv. 16, 'Ερυθρά μετέτηθη, Gen. v. 24; cf. Lindle, ap. Eichhorn, p. 41, 42) is scarcely consistent with a date so early as the middle of the third century. From these considerations it appears best to combine the two views. The grandson of the author was already past middle age when he came to Egypt, and if his visit took place early in the reign of Ptolemy Philuscon, it is quite possible that the book itself was written while the name and person of the last of "the men of the great synagogue" were still familiar to his countrymen. 

4. Nothing however remains of the original proverbs of Ben Sira except the few fragments in pure Hebrew (Just, Gesch. d. Juden, i. c. 311 n.) which occur in the Talmud and later Rabbinic writers. These may have been derived from tradition and not from any written collection.

The Greek translation incorporated in the LXX., which is probably the source from which the other translations were derived, was made by the grandson of the author in Egypt, in the reign of Euergetes, b. for the instruction of those in "a strange country (ἐν παρανοίᾳ) who were previously prepared to live after the law." The date which is thus given is unfortunately ambiguous. Two kings of Egypt bore the surname Euergetes. Ptol. III., the son and successor of Ptol. II. Philadephus, c. 217-222; and Ptol. VII. Physcon, the brother of Ptol. VI. Philometor, b. c. 170-117. And the noble eulogy on "Simon the son of Onias, the high-priest," who is described as the last of the great worthies of Israel (ch. 1.), and apparently removed only by a short interval from the times of their nation, is affected with such a strain of ambiguity, so that it cannot be used absolutely to fix the reign in which the translation was made. Simon I., the son of Onias, known by the title of the Just, was high-priest about 310-290 b. c., and Simon II., also the son of Onias, held the same office at the time when Ptol. IV. Philopator endeavored to force an entrance into the Temple, b. c. 217 (3 Macc. i. 2). Some have consequently supposed that the reference is to Simon the Just, and that the grandson of Ben Sirach, who is supposed to have been his younger contemporary, lived in the reign of Ptolemy III. (Jahn, Vaihinger in Herzog's Encycl. s. v.); others again have applied the eulogy to Simon II., and fixed the translation in the time of Ptolemy VII. (Eichhorn, Einl. p. 38). But both suppositions are attended with serious difficulties. The description of Simon can scarcely apply to one so little distinguished as the second high-priest of the name, while the first, a man of representative dignity, is passed over without notice in the list of the

The "Alphabet," or "Book of Ben Sira," which exists at present, is a later compilation (Zaum, Gottesd. Vortr. d. Juden, pp. 100-105) of proverbs in Hebrew and Chaldee, containing some genuine fragments, among much that is worthless (Dukes, Robinsons Babylon. p. 31 ff.). Ben Sira is called in the preface the son of Jeremiah. The sayings are collected by Dukes, i. e. c. 67 ff. They offer parallel to Eccles. iii. 21, vi. 6, ix. 8 ff., xi. 13, xv. 22, xxvi. 1, xxx. 25, xxxvii. 1, 4, 8, xiii. 9 ff.

The "Proverbs" are arranged in a similar manner, with the same division into the four book titles (Eichhorn, 2. c. p. 40), and several others, "in the thirty-eighth year of the reign of Euergetes." It is absolutely impossible to point to any period within the grammatical structure of the sentence. The Septuagint furnishes abundant examples of the construction, which here pronounced impossible. The following list contains some which do not appear to have been hitherto noticed. See Hegg. i. 1, in τὸν δευτέρον ἐτί ἔτει ἡ δαραίσι βασιλείας: II i. (i. 15), 11 (10); Ezech. i. 1, ἐν τῷ δόξαν μετα τοῦ δευτέρου ἐτὸν ἡ δαραίσι: i. 7; vili. 1, ἐν τῷ πρώτῳ ἐτί ἔτει δαραίσι τοῦ βασιλείας; Dan. ix. 1 (LXXX.), ὡς πρώτων ἐτί ἔτει δαραίσι, where Theodotion has ἐν τῷ πρώτω ἐτί ἔτει δαραίσι, though even here the Comp. edition and the Alex. MS. insert ἐτί before δαραίσι; I Macc. xii. 42, ὡς πρώτων ἐτί ἔτει Σιδηρίων ἄρχων: 6v. 27: Jer. xvi. (Heb. xxvii.) 2. Altholz, in the Comp. 1. Eetr. 15 (16), ἐν 62 ὀσικ εἰς Ἱσραήλ τῶν Πιστῶν βασιλείας χρονοι. As Mr. Westcott admits that no reason can be given for the translator's specification of his own age, it is not surprising that Eichhorn's construction of the passage should be adopted by many recent writers, as Bruch (Weisheits-Lehre der Hebräer, p. 207), Paifrey, Davidson, Ewald, Fritzsche (Ecc. Hendh. v. p. xiii.), and Horowitz (Das Buch Jesus Sirach, p. 29, n.).

4. If indeed the inscription in B. "The Wisdom of Sirach" (so also Ewald, Herz. viii. 5. σοφία τοῦ Σεβαστοῦ), as distinguished from the prayer in c. 11 (Ἰησοῦ ν. 2.), is based upon any historic tradition, another generation will be added to carry us back to the first elements of the book. See § 6. 

The "Alphabet," or "Book of Ben Sira," which exists at present, is a later compilation (Zaum, Gottesd. Vortr. d. Juden, pp. 100-105) of proverbs in Hebrew and Chaldee, containing some genuine fragments, among much that is worthless (Dukes, Robinsons Babylon. p. 31 ff.). Ben Sira is called in the preface the son of Jeremiah. The sayings are collected by Dukes, i. e. c. 67 ff. They offer parallel to Eccles. iii. 21, vi. 6, ix. 8 ff., xi. 13, xv. 22, xxvi. 1, xxx. 25, xxxvii. 1, 4, 8, xiii. 9 ff.
ECCLESIASTICUS

Differing widely in their character, though all were purely Hebrew in their origin.

7. The Syriac and Old Latin versions, which later Jerome adopted without alteration (Pref. in Liber. Sol. vulg. LXX. i. c. ..., in Ecclesiasticó, quom esse Jesu filii Sirach nullus ignotum, calamo temperavi. tantummodo Canonicos scripturas connederam desiderarum), differ considerably from the present Greek text, and it is uncertain whether they were derived from some other Greek recension (Eichhorn, p. 81) or from the Hebrew original (Bertholdt, p. 2304 ff.) a. The language of the Latin version presents great peculiarities. Even in the first two chapters the following words occur which are found in no other part of the Vulgate: definieo (i. 15), religiositas (i. 17, 18, 20), comparior (i. 21), inaneriione (i. 88), obelicio (ii. 2, v. 1, 10), recepibilis (iii. 5). The Arabic version is directly derived from the Syriac (Kettenbelt, p. 702 ff.).

8. The existing Greek MSS. present great discrepancies in order, and numerous interpolations. The arrangement of ec. xxx. 25 — xxxvi. 17 in the Vatican and Complutensian editions is very different. The English version follows the latter, which is supported by the Latin and Syriac versions against the authority of the Uncial MSS. The extent of the variation is seen in the following table:

<table>
<thead>
<tr>
<th>Ed. Comp. Lat. Syr. E. V.</th>
<th>Ed. Vat. A. B. C</th>
</tr>
</thead>
<tbody>
<tr>
<td>xxx. 25</td>
<td>xxxii. 13, lorum pater, k. t. a.</td>
</tr>
<tr>
<td>xxxi.</td>
<td>xxxiv. xxxvi.</td>
</tr>
<tr>
<td>xxxii. 1-11</td>
<td>xxxvi. 7-16.</td>
</tr>
<tr>
<td>xxxii. 12-20</td>
<td>xxxvi. 25-29.</td>
</tr>
<tr>
<td>xxxii. 20-27</td>

</tbody>
</table>

The most important interpolations are: i. 5, 7; 18, 21; iii. 25; iv. 230; vi. 296; x. 21; xii. 6; xii. 236; xvi. 15, 16, 22; xvii. 5, 9, 16, 17, 18, 21, 22, 25, 28, 35; xiii. 4, 6, 7, 15, 16, 19, 21, 25; xx. 3, 14, 16, 37, 32; xxi. 10, 12, 13; xxii. 3c, 4c, 5d, 28, xxiv. 18, 24; xxxiv. 12, 26; xxxv. 19-27; 1. 296. All these passages, which are in the Vatican and the Complutensian texts, are wanting in the best MSS. The edition of the Syro-Hexaplaric MS. at Milan, which is at present reported to be in preparation (1853), will probably contribute much to the establishment of a sounder text.

9. It is impossible to make any satisfactory plan of the book in its present shape. The latter part, ch. xii. 15-21, is distinguished from all that precedes in style and subject; and the "phrase of noble men" (παρακεντον, παρακεντον) seems to form a complete whole in itself (ch. xiv.-L. 24). The words of Jerome, Prof. in Liber. Solon. ("Quorum priorem [...]") Jesu filii Sirach librum) Hebraicum requiri, non Fechisenium ut apud Latinos, sed Parabolica praeestant, cui juncti etiam Ecclesiastici et Canticum Canticorum, ut similitudinem Solomonis non solus librum numeros, sed etiam materiarum genere coaequatur," which do not appear to have received any notice, imply that the original text presented a triple character answering to the three works of Solomon, the Proverbs, Ec-

14: In Ep. ad Rom. ix. § 17, &c., and as the allusion of "the divine word" (c. Cels. viii. 50). The other writers of the Alexandrine school follow the same practice. Dionysius calls its words "divine oracles" (Frug. de Nat. iii. p. 1258, ed. Migne), and Peter Martyr quotes it as the work of "the Preacher" (Frug. i. § 5, p. 515, ed. Migne). The passage quoted from Tertullian (de Exhort. Cont. 2; "sicut scriptum est: ecce posui ante bos," and is must be omitted together with the "argumenti...""). Cf. Ezech. xxv. 17, Vulg.) is absolutely conclusive (see Deut. xxx. 35); but Cyril constantly brings forward passages from the book as Scripture (de Bono Pat. 17; de Mort. Iitiate, 9, § 13) and as the work of Solomon (Ep. Ivx. 2). The testimony of Augustine sums up briefly the result which follows from these isolated authorities. He quotes the book constantly himself as the work of a prophet (Serm. xxxix. 1), the word of God (Serm. Ixxvii. 11), "Scripture" (Lib. de Nat. 33), and that even in controversy (c. Jul. Pelag. v. 36), but he expressly notices that it was not in the Hebrew Canon (De Curo pro Mort. 18) "though the Church, especially of the West, had received it into authority" (De Ciuit. xxi. 20, cf. Speculam. ii. 1127, ed. Paris). Jerome, in like manner (l. c. § 7), contrasts the book with the Canonical Scriptures as "doubtful," while they are never quoted in another place (Pref. to work). He says that "it is not in the Canon," and again (Prod. in Liber. Sol.) that it should be read "for the instruction of the people (pédés), not to support the authority of ecclesiastical dogmas." The book is not quoted by Irenaeus, Hippolytus, or Eusebius; and is not contained in the Canon of Melito, Origen, Cyril, Laodicea, Hifray, or Rufinus. [Canon.] It was never included by the Jews among their Scriptures; for though it is quoted in the Talmud, and at times like the Kethubim, the study of it was forbidden, and it was classed among "the outer books" (איברים חיצון). that is probably, those which were not admitted into the Canon (Dukes, Revue, xxvii. pp. 24, 25). While the book was thus distinguished from the highest canonical authority, it is one of the most important monuments of the religious state of the Jews at the period of its composition. As an expression of Palestinian theology it stands alone; for there is no sufficient reason for assuming Alexandrine interpolations or direct Alexandrine influence (Göhrer, Philo, i. 18 ff.). The translator may, perhaps, have given an Alexandrine coloring to the doctrine, but its great outlines are unchanged (cf. Duhme, Relig.-Philos. ii. 129 ff.). The eugenia of God as Creator, Preserver, and Governor is strictly conformable to the old Mosaic type; but at the same time his mercy is extended to all mankind (xviii. 11-13). Little stress is laid upon the spirit-world, either good (xviii. 21, xlv. 2, xxxix. 28?) or evil (xxi. 27)? and the doctrine of a resurrection fades away (xv. 16, xvii. 27, 28, xlv. 14. 15. Yet cf. xviii. 11). In addition to the general hope of restoration (xxxvi. 1, &c.) one trait only of a Messianic faith is preserved in which the writer contemplates the future work of Elias (xlviii. 10). The ethical precepts are addressed to the middle class (Eichhorn, Eikel. p. 44 ff.). The praise of agriculture (vii. 15) and medicine (xxxviii. i. ff.) and the constant ex-

a It is quoted by Hippolytus (Opp. p. 192. i. 12, f. Lagarde), and by Eusebius in De Eccl. Theol. i. 12; Dom. Evang. i. i. Opp. iv. 21 a. et. Migne; D. Vita Cons. i. ii; and Comm. in Ps. iv 21 a. A.
ECLIPSE OF THE SUN

ch. 1. is the famous Simon the Just, and the description in that chapter is so vivid that it must represent what the writer had seen and heard; the book was probably composed at different periods during the long life of the author, the original conclusion being the last verse of ch. xii.: chapters 1. to 4. were added afterwards, possibly as late as n. c. 250, whence the strangely placed invectives against the Samaritans (I. 25, 26), who about this time were harassing the Jews (Joseph. Ant. xii. 4, § 1). The translator came to Egypt in 386th year of Ptolemy Euergetes II. (Physcon), that is, about 132 n. c. But how then could he call the author, who is supposed to have died about 120 years before, his grandfather? Horowitz meets this difficulty by taking πάντας in the wider sense of ancestor. Further, he does not regard the language in the Prologue respecting the books of the Old Testament as necessarily implying that the collection was then complete, and the Canon closed. The essay contains some happy conjectures and restorations of the original text in corrupt passages, chiefly by the aid of the Syriac version.

ECLIPSE OF THE SUN. No historical notice of an eclipse occurs in the Bible, but there are passages in the prophets which contain manifest allusion to this phenomenon. They describe it in the following terms: "The sun goes down at noon," "the earth is darkened in the clear day" (Am. viii. 9), "the day shall be dark" (Mic. iii. 6), "the light shall not be clear nor dark" (Zech. xiv. 6), "the sun shall be dark" (Joel ii. 10, 31, iii. 15). Some of these notices probably refer to eclipses that occurred about the time of the respective compositions; thus the date of Amos coincides with a total eclipse, which occurred Feb. 9, n. c. 784, and was visible at Jerusalem shortly after noon (Hitzig, Comm. in Prov.); that of Micah with the eclipse of June 3, n. c. 716, referred to by Dionys. Hal. ii. 56, to which same period the latter part of the book of Zechariah may be probably assigned. A passing notice in Jer. xx. 29 coincides in date with the eclipse of Sept. 30, n. c. 610, so well known from Herodotus' account (i. 74, 102). The darkness that overspread the world at the crucifixion cannot with reason be attributed to an eclipse, as the moon was at the full time of the Passover. [DARKNESS.] The awe which is naturally inspired by an eclipse in the minds of those who are unacquainted with the cause of it, rendered it a token of impending judgment in the prophetic books.

W. L. B.

EDEN: i. c. "witness." a word inserted in the A. V. of Josh. xxii. 34 [brought along from the earlier English versions] apparently on the authority of a few MSS., and also of the Syriac and Arabic Versions, but not existing in the generally-received Hebrew Text. The passage is literally as follows: "And the children [sons] of Reuben and the children [sons] of Gad named (LXX. οἱ κόρησαν) the altar: because that is a witness (Ed) between us that Jehovah is God." The rendering of the LXX., although in some respects differing materially from the present text, shows plainly that at that time the word Ed (אד) stood in the Hebrew in the present place. The word נְנָפָח, to call or pro-claim, has not invariably (though generally) a transitive force, but is also occasionally an intran-
sitive verb. (For a further investigation of this passage, see Keil, Joshua, ad loc.)

G. The sense is better if we make לָלָל in the last clause restitutive like פָּרָר, not causial, as above: "and Jehovah is God." The entire sentence and not "witness" merely (A. V.) was inscribed on the altar and formed its name. So in De Wette's Uebersetzung (1858) and in that of the Société biblique Protestant de Paris (1866). Ed therefore is not a proper name any more than the other words.

EDAR, TOWER OF (accur. Eder, יִדּר), יִדּר ידד: Vat. omits; Alex. ["in character. minor "] πάντας Πασποί (πάντας Πασποί Fario: turris gregis), a place named only in Gen. xxxvi. 21. Jacob's first halting-place between Bethlehem and Hebron was "beyond (ידדיד) the tower Eder." According to Jerome (Onomasticon, Bethlehem) it was 1000 paces from Bethlehem. The name signifies a "flock" or "drove," and is quite in keeping with the pastoral habits of the district. Jerome sees in it a prophecy of the announcement of the birth of Christ to the shepherds (Gen. ii. 16): and it seems to have been a Jewish tradition that the Messiah was to be born there (Targum Ps. Jon.).

ED'IFAS (טָּיפָּס: [Vat. -טָּיפָּס] Alex. טָּיפָּס; [Akh. טישיסה:] Geddes), 1 Esdr. ix. 26. [JEZEBEL.]

E'DEN (ינְנָפָח) [pleasantsnes]: E'baum [see below], the first residence of man. It would be difficult, in the whole history of opinion, to find any subject which has so invited, and at the same time so completely baffled, conjecture, as the Garden of Eden. The three continents of the old world have been subjected to the most rigorous search; from China to the Canary isles, from the Mountains of the Moon to the coasts of the Baltic, no locality which in the slightest degree corresponded to the description of the first abode of the human race has been left unexamined. The great rivers of Europe, Asia, and Africa, have in turn been supposed to be the Pison and Gihon of Scripture, and there remains nothing but the New World wherein the next adventurous theorist may bewilder himself in the mazes of this most difficult question.

In order more clearly to understand the merit of the several conjectures, it will be necessary to submit to a careful examination the historic narrative on which they are founded. Omitting those portions of the text of Gen. ii. 8-14 which do not bear upon the geographical position of Eden, the description is as follows: "And the Lord God planted a garden in Eden eastward. And a river goeth forth from Eden to water the garden: and from thence it is divided and becomes four heads (or arms). The name of the first is Pison: that is it which compasseth the whole land of Havilah, where there is gold. And the name of the second is Gihon: that is it which compasseth the whole land of Cush. And the name of the third is Hiddekel: that is it which compasseth all the land of Assyria. And the name of the fourth is Euphrates: this is the boundary between the people of Chaldea. [locks. Bethlehem is famous at the present day for the number of similar structures in its neighborhood. I]
And the name of the third river is Hiddekel: that is it which floweth before Assyria. And the fourth river, that is Euphrates." In the eastern portion then of the region of Eden was the garden planted. The river which flowed through Eden watered the garden, and thence branched off into four distinct streams. The first problem to be solved then is this: To find a river which, at some stage of its course, is divided into four streams, two of which are the Tigris and Euphrates. The identity of these rivers with the Hiddekel and P'ath has never been disputed, and no hypothesis which omits them is worthy of consideration. Setting aside minor differences of detail, the theories which have been framed with regard to the situation of the terrestrial paradise naturally divide themselves into two classes. The first class includes all those which place the garden of Eden below the junction of the Euphrates and Tigris, and interpret the names Pison and Gihon of certain portions of these rivers: the second, which seek for it in the high table-land of Armenia, the fruitful parent of many noble streams. These theories have been supported by most learned men of all nations, of all ages, and representing every shade of theological belief; but there is not one which is not based in some degree upon a forced interpretation of the words of the narrative. Those who contend that the united stream of the Euphrates and Tigris is the "river" which "goeth forth from Eden to water the garden," have committed a fatal error in neglecting the true meaning of נֵבְיָא (nevi'ya), which is only used of the course of a river from its source downstreams (cf. Ez. xlvii. 1). Following the guidance which this word supplies, the description in ver. 10 must be explained in this manner: a river takes its rise in Eden, flows into the garden, and from thence is divided into four branches, the separation taking place either in the garden or after leaving it. If this be the case, the Tigris and Euphrates before junction cannot, in this position of the garden, be two of the four branches in question. But, though they have avoided this error, the theorists of the second class have been driven into a Charybdis not less destructive. Looking for the true site of Eden in the highlands of Armenia, near the sources of the Tigris and Euphrates, and applying the names Pison and Gihon to some one or other of the rivers which spring from the same region, they have been compelled to explain away the meaning of נֵבְיָא, the "river," and to give to סְפָנִים (s'fanim) a sense which is not supported by a single passage. In no instance is סְפָנִים (lit. "head") applied to the source of a river. On several occasions (cf. Judg. vii. 16, Job i. 17, &c.) it is used of the detachments into which the main body of an army is divided, and analogy therefore leads to the conclusion that סְפָנִים (s'fanim) denotes "the branches" of the parent stream.

There are other difficulties in the details of the several theories, which may be obstacles to their entire reception, but it is manifest that no theory which fails to satisfy the above-mentioned conditions can be allowed to take its place among things that are probable.

The old versions supply us with little or no assistance. The translators appear to have hied between a mystical and literal interpretation. The word סְפָנִים is rendered by the LXX. as a proper name in three passages only, Gen. ii. 8, 10, iv. 15 where it is represented by Ἐδέη. In all others, with the exception of Is. ii. 3, it is translated ποταμὸς. In the Vulgate it never occurs as a proper name, but is rendered "polypus," "locus voluppatis," or "deliciei." The Targum of Onkelos gives it uniformly ספניא for ספְנִים.

It would be a hopeless task to attempt to chronicle the opinions of all the commentators upon this question: their name is legion. Philo (de Mundi Opif. § 54) is the first who ventured upon an allegorical interpretation. He conceived that by paradise is darkly shadowed forth the governing faculty of the soul; that the tree of life signifies religion, whereby the soul is immortalized; and by the faculty of knowing good and evil the middle sense, by which are discerned things contrary to nature. In another passage (de Plantat. § 9) he explains Eden, which signifies "pleasure," as a symbol of the soul, that sees what is right, exults in virtue, and prefers one enjoyment, the worship of the Only Wise, to myriads of men's chief delights. And again (Legum Allegor. i. § 14) he says, "now virtue is tropically called paradise, and the site of paradise is Eden, that is, pleasure." The four rivers he explains (§ 10) of the several virtues of prudence, temperament, courage, and justice; while the main stream of which they are branches is the generic virtue, goodness, which goeth forth from Eden, the wisdom of God. The opinions of Philo would not be so much worthy of consideration, were it not that he has been followed by many of the Fathers. Origen, according to Luther (Comm. in Gen.), imagined paradise to be heaven, the trees angels, and the rivers wisdom, Pipsis, Irenæus, Pantæans, and Clemens Alexandrinus have all favored the mystical interpretation (Huet, Origens, ii. 167). Ambrosius followed the example of Origen, and placed the terrestrial paradise in the third heaven, in consequence of the expression of St. Paul (2 Cor. xii. 2, 4); but elsewhere he distinguishes between the terrestrial paradise and that to which the Apostle was caught up (De Parad. c. 3). In another passage (Ep. ad Sabiniun) all this is explained as allegory. Among the Hebrew traditions enumerated by Jerome (De loc. or. in Gen.) is one that paradise was created before the world was formed, and is therefore beyond its limits. Moses Bar Cephala (De Parad.) assigns it a middle place between the earth and the firmament. Some affirm that paradise was on a mountain, which reached nearly to the moon; while others, stressed by the manifest absurdity of such an opinion, held that it was situated in the third region of the air, and was higher than all the mountains of the earth by twenty cubits, so that the waters of the flood could not reach it. Others again have thought that paradise was twofold, one corporeal and the other incorporeal: others that it was formerly on earth, but had been taken away by the judgment of God (Hopkinson, Deor. Parad. in Ugol. Theor. viii.). Among the opinions enumerated by Morinus (Dias. de Parad. Terraeit. Ugol. Theor. vii.) is one, that, before the fall, the whole earth was paradise, and was really situated in Eden, in the midst of all kinds of delights. Ephraem Syrus (Comm. in Ge.), expresses himself doubtfully upon this point. Whether the trees of paradise, being spiritual, drank
of spiritual water, he does not undertake to decide; but he seems to be of opinion that the four rivers have lost their original virtue in consequence of the curse pronounced upon the earth for Adam's transgression.

Conjectures with regard to the dimensions of the garden have differed as widely as those which are assigned to its locality. Ephraem Syrus maintained that it surrounded the whole earth, while he said that it was surrounded by forty-six or forty miles, and others have made it extend over Syria, Arabia, and Mesopotamia. (Hopkinson, as above.) But of speculations like these there is no end.

What is the river which goes forth from Eden to water the garden? is a question which has been often asked, and still waits for a satisfactory answer. That the ocean stream which surrounded the earth, and was the source from which the four rivers flowed, was the opinion of Josephus (Ant. i. 1, § 3) and Johannes Damascenus (De Orth. Fid. ii. 9). It was the Shatt-al-Arab, according to those who place the garden of Eden below the junction of the Tigris and Euphrates, and their conjecture would deserve consideration were it not that this stream cannot, with any degree of propriety, be said to rise in Eden. By those who refer the position of Eden to the highlands of Armenia, the river from which the four streams diverge is conceived to mean "a collection of springs," or a well-watered district. It is scarcely necessary to say that this signification of כֶּבֶר (nab.tar) is wholly without a parallel; and even if it could under certain circumstances, be made to adopt it, such a signification is, in the present instance, precluded by the fact that, whatever meaning we may assign to the word in ver. 10, it must be the same as that which it has in the following verses, in which it is sufficiently definite. Sickerl (Augusti, Thed. Monatatschrift, i. 1, quoted by Winer), supposing the whole narrative to be a myth, solves the difficulty by attributing to its author a large measure of ignorance. The "river" which he thinks the Caspian Sea, in which his apprehension was an immense stream from the east. Bertleman, applying the geographical knowledge of the ancients as a test of that of the Hebrews, arrived at the same conclusion, on the ground that all the people south of the Armenian and Persian highlands place the dwelling of the gods in the extreme north, and the regions of the Caspian were the northern limit of the horizon of the biblically (Knobel, Genesis). But he allows the four rivers of Eden to have been real rivers, and not, as Sickerl imagined, oceans which surrounded the earth east and west of the Nile.

That the Hulkea is the Tigris, and the Phratth the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and was adapted by the Hebrews to their own geographical notions. As the former is the name of the great river by which Daniel sat (Dan. x. 4), and the latter is the term uniformly applied to the Euphrates in the Old Testament, there seems no reason to suppose that the appellations in Gen. ii. 14 are to be understood in any other than the ordinary sense. One

* This name is said to be still in use among the tribes who live upon its banks (Col. Peschel, Eire. to Tigris and Euphrates, i. 13).
which this stream is again divided, the names Pison and Gihon are to be applied. Calvin (Comm. in Gen.) was the first to assert that the Pison was the mother of all the rivers of the earth, and in this opinion he is followed by Scaliger and many others. Huet, on the other hand, conceived that he proved beyond doubt that Calvin was in error, and that the Pison was the westernmost of the two channels by which the united stream of the Euphrates and Tigris falls into the Persian Gulf. He was confirmed by the authority of Bochart (Hieroz. pl. ii. l. 5 p. 57) and Junius (Pract. in Gen.), and Rask discovered a relic of the name Pison in the Pastigiris.

The advocates of the theory that the true position of Eden is to be sought for in the mountains of Armenia have been induced, from a certain resemblance in the two names, to identify the Pison with the Phasis, which rises in the elevated plateau at the foot of Mount Arrarat, near the sources of the Tigris and Euphrates. Reland (de Situ Parv. terr. Ugol. vol. vii.), Calmet (Dict. s. v.), Link (Urteilt, i. 307), Rosenmüller (Handb. d. Bibl. Alk.), and Hartmann have given their suffrages in favor of this opinion. Raumer (quoted by De Ritisz, Genesis) endeavored to prove that the Pison was the Phasis of Xenophon (Anab. iv. 6), that is, the Aras or Araxes, which flows into the Caspian Sea. There remain yet to be noticed the theories of Le Clerc (Comm. in Gen.) that the Pison was the Chrysorrhoas, the modern Barada, which takes its rise near Damascus; and that of Böttman (Eh. Erdb. p. 32) who identified it with the Byxis of Irauatti, a river of Ava. Mendelssohn (Comm. on Gen.) mentions that some affirm the Pison to be the Gozan of 2 K. xvi. 6 and 1 Chr. v. 28, which is supposed to be a river, and the same with the Kizil-Uzen in Hyrcania. Colonel Chesney, from the results of extensive observations in Armenia, was led to infer that the rivers known by the comparatively modern names of Hales and Araxes are those which, in the book of Genesis, have the names of Pison and Gihon; and that the country within the former is the land of Havilah, whilst that which borders upon the latter is the still more remarkable country of Cush. (Exeg. to Euphr. and Tigris, i. 267.)

Such, in brief, is a summary of the various conjectures which have been advanced, with equal degrees of confidence, by the writers who have attempted to solve the problem of Eden. The majority of them are characterized by one common defect. In the narrative of Genesis the river Pison is defined as that which surrounds the whole land of Havilah. It is, then, absolutely necessary to fix the position of Havilah before proceeding to identify the Pison with any particular river. But the process followed by most critics has been first to find the Pison and then to look about for the land of Havilah. This same inverted method is characteristic of their whole manner of treating the problem. The position of the garden is assigned, the rivers are then identified, and lastly the countries mentioned in the description are so chosen as to coincide with the rest of the theory.

With such diversity of opinion as to the river which is intended to be represented by Pison, it was scarcely possible that writers on this subject should be unanimous in the selection of a country possessing the most striking similarity of Havilah. In Gen. ii. 11, 12, it is described as the land where the best gold was found, and which was besides rich in the treasures of the b'dolch and the stone shohem. A country of the same name is mentioned as forming one of the boundaries of Ishmael's descendants in Gen. xxv. 18, and the scene of South Arabia of extermination against the Amalekites (1 Sam. xvi. 7). In these passages Havilah seems to denote the desert region southeast of Palestine. But the word occurs also as the proper name of a son of Joktan, in close juxtaposition with Sheba and Phir or Phir, also sons of Joktan and descendants of Shem (Gen. x. 29), who gave their names to the spice and gold countries of the south. Again, Havilah is enumerated among the Hamites as one of the sons of Cush; and in this enumeration, the name stands in close connection with Sheba, Sheet, and Dedan, the first founders of colonies in Ethiopia and Arabia which afterwards bore their names. If, therefore, the Havilah of Gen. ii. be identical with any one of these countries, we must look for it on the east or south of Arabia, and probably not far from the Persian Gulf. In other respects, too, this region answers to the conditions required. Bochart, indeed, thought the name survived in Choubal, which was situated on the east side of the Arabian Gulf, and which he identified with the abode of the Shemitic Joktanites; but if his etymology be correct, in which he connects Havilah with the root שׁumbnails=snub, the appellation of the "sandy" region would not necessarily be restricted to one locality. That the name, derived from some natural peculiarity is evident from the presence of the article. Whatever may be the true meaning of b'dolch, be it carbuncle, crystal, bdellium, emerald, crystal, beryl, pearl, diamond, or emerald, all critics detect its presence, under one or other of these forms, in the country which they select as the Havilah most appropriate to their own theory. As little difficulty is presented by the shohem, call it onyx, sardonyx, emerald, sapphire, beryl, or sardius, it would be hard indeed if some of these precious stones could not be found in any conceivable locality to support even the most far-fetched and improbable conjecture. That Havilah is that part of India through which the Ganges flows, and more generally, the eastern region of the earth; that it is to be found in Susiana (Hopkinson), in Ava (Böttman), or in the Irak region (Rauner), are conclusions necessarily following upon the assumption of regard with the Pison. Hartmann, Reland, and Rosenmüller are in favor of Colchis, the scene of the legend of the Golden Fleece. The Phasis was said to flow over golden sands, and gold was carried down by the mountain torrents (Strabo, xi. 2, § 19). The crystal (b'dolch) of Scythia was renowned (Solinus, c. xx.), and the emeralds (shohem) of this country were as far superior to other emeralds as the latter were to other precious stones (Hyll. ii. N. xxxvii. 171, all which proves, say they, that Havilah was Colchis. Rosenmüller argues, rather strongly, if the Phasis be the Pison, the land of Havilah must be Colchis, supposing that by this country the Hebrews had the idea of a Pontic or Northern India. In like manner Le Clerc, having previously determined that the Pison must be the Chryssorhoeas, finds Havilah not far from Cœle-Syria. Hasse (Execk. pp 49, 50, quoted by Rosenmüller) compares Havilah with the "Naxa of Herodotus" (iv. 9), in the neighborhood of the Arimaspians, and the dragon which guarded the land of gold. For all these hypotheses there is no more support than the merest conjecture.
The second river of Paradise presents difficulties not less insurmountable than the Pison. Those who maintained that the Pison is the Ganges held also that the Gihon was the Nile. One objection to this theory has been already mentioned. Another, equally strong, is, that although in the books of the Old Testament it is frequent allusion is made to a river of this name, it nowhere appears to have been known to the Hebrews by the name Gihon. The idea seems to have originated with the LXX. rendering or ἠλεονίτις by Γάμων in Jer. ii. 18; but it is clear from the manner in which the translators have given the latter clause of the same passage that they had no conception of the true meaning. Among modern writers, Bertheau (quoted by Delitzsch, Genesis) and Kalisch (Genesis) have not hesitated to support this interpretation, in accordance with the principle they adopt, that the description of the garden of Eden is to be explained according to the most ancient notions of the earth's surface, without reference to the advances made in later times in geography.

If this hypothesis be adopted, it certainly explains some features of the narrative; but, so far from removing the difficulty, it introduces another equally great. It has yet to be proved that the opinions of the Hebrews on these points were as contradictory to the new well-known relations of land and water as the recorded impressions of other nations at a much later period. At present we have nothing but categorical assertion. Pannini (ib. 5), indeed, records a legend that the Euphrates, after disappearing in a marsh, rises again beyond Ethiopia, and flows through Egypt as the Nile. Arrian (Exp. Alex. vi. 1) relates that Alexander, on finding crocodiles in the Indus, and beasts like those of Egypt on the banks of the Acesine, imagined that he had discovered the sources of the Nile; but he adds, what those who make use of this passage do not find it convenient to quote, that on receiving more accurate information Alexander abandoned his theory, and cancelled the letter he had written to his mother Olympias on the subject. It is but fair to say that there was at one time a theory afloat that the Nile rose in a mountain of Lower Mauritania (Plin. H. N. vi. 10).

The etymology of Gihon (גיוון, to burst forth) seems to indicate that it was a swiftly flowing, impetuous stream. According to Galpin (Lex. Arab.), جیبون (Jickson) is the name given to the Oxus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gihon of Scripture. But the Araxes, too, is called by the Persians جیبون, and from this circumstance it has been adopted by Riedel, Calmet, and Col. Chesney as the modern representative of the Gihon. It is clear, therefore, that the question is not to be decided by etymology alone, as the name might be appropriately applied to many rivers. That the Gihon should be one of the channels by which the united stream of the Tigris and Euphrates falls into the Persian Gulf, was essential to the theory which places the garden of Eden on the Shat-el-Arab. Bochart and Huet contended that it was the easternmost of these channels, while Calvin considered it to be the most westerly. Hopkinson and Jumins, conceiving that Eden was to be found in the region of Anaranitis (= Auranitis, quae Eubatia) on the Euphrates, were compelled to make the Gihon coincide with the Naharar, the Marses of Amm. Marc. (xiii. 6, § 25). That it should be the Orontes (Le Clerc), the Ganges (Battmann and Ewald), the Kurr, or Cyrus, which rises from the side of the Sagimbon mountain, a few miles northward of the sources of the Araxes (Link), necessarily followed from the exigencies of the several theories extended to cover the garden of Eden. According to the Genesis of the ancients (Her. i. 189), now called the Dyihan, one of the tributaries of the Tigris, Abraham Peritsol (Ugel. vol. vii.) was of opinion that the garden of Eden was situated in the region of the Mountains of the Moon. Identifying the Pison with the Nile, and the Gihon with a river which his editor, Hylé, explains to be the Niger, he avoids the difficulty which is presented by the theory that the Hiddekel and Pardh are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and run underground till they take their appearance in Assyria. Equally satisfactory is the explanation of Ephraemi Syrus that the four rivers have their source in Paradise, which is situated in a very lofty place, but are swallowed up by the surrounding districts, and after passing underneath the sea, come to light again in different quarters of the globe. It may be worth while remarking by the way, that the opinions of this father are frequently misunderstood in consequence of the very inadequate Latin translation with which his Syriac works are accompanied, and which often does not contain even an approximation to the true sense. (For an example, see Kalisch, Genesis, p. 95.)

From etymological considerations, Huet was induced to place Cush in Chustan (called Cutha, 2 K. xxiv. 21), Le Clerc in Cassotis Syria, and Huet himself in Aegyptus in Asia Minor. Beilitz identific it with Susiana, Link with the country of the Caucasus, and Hartmann with Bactria or Bokh, the site of Paradise being, in this case, in the celebrated vale of Kashmir. The term 'Cush is generally applied in the Old Testament to the countries south of the Israelites.' It was the southern limit of Egypt (Exx. xxix. 10), and apparently the most westerly of the provinces over which the rule of the kings extended. 'This term is derived from India, and the name Etipone or Eti- qpon' (Estb. i. 1, vili. 9). Egypt and Cush are associated in the majority of instances in which the word occurs (Ps. lviii. 31: Is. xviii. 11: Jer. xlv. 9, &c.); but in two passages Cush stands in close juxtaposition with Ehn (Is. xi. 11) and Persia (Exx. xxxviii. 5). The Cushite king, Zerah, was utterly defeated by Asa at Maresah, and pursued as far as Gerar, a town of the Philistines, on the southern border of Palestine, which was apparently under his sway (2 Chr. xiv. 9, &c.). In 2 Chr. xxi. 16, the Arabians are described as dwelling 'beside the Cushites,' and both are mentioned in connection with the Philistines. The wife of Moses, who, we learn from Ex. ii., was the daughter of a Midianite chieftain, is in Num. xii. 1 denominated a Cushite. Further, Cush and Sela (Is. xiii. 3) and Cush and the Sabochens (Is. xiv. 14) are associated in a manner consonant with the genealogy of the descendants of Ham (Gen. x. 7), in which Sela is the son of Cush. From all these circumstances it is evident that under the denomination "Cush" were included both Arabia and the country south of Egypt on the western coast of the Red Sea. It is possible, also, that the vast desert tracts west of Egypt were known to the Hebrews as the land of Cush, but of this we have no certain proof. The Targumist on Is. xi. 11, sharing the prevailing
error of his time, translates Cush by India; but that a better knowledge of the relative positions of these countries was anciently possessed is clear from Esth. i. 1. With all this evidence for the southern situation of Cush, on what grounds are Rosenmuller and others justified in applying the term to a more northern region on the banks of the Oxus? We are told that, in the Hindoo mythology, the gardens and metropolis of Indra are placed around the mountain Meru, the celestial mountain; that among the Babylonians and Medo-Persians, the gods' mountain, Alborj, "the mount of the congregation," was believed to be "in the sides of the north" (Is. xiv. 13); that the oldest Greek traditions point northwards to the birthplace of gods and men; and that, for all these reasons, the Paradise of the Hebrews must be sought for in some far distant hyperborean region. Guided by such unerring indications, Hassé (Entdeckungen, pp. 49, 50 a.) scrupled not to gratify his national feeling by placing the garden of Eden on the coast of the Baltic; Rudbeck, a Swede, found it in Scandia-via, and the inhospitable Siberia has not been without its advocates (Morren, Rosenmüller's Geog. i. 96). But, with all this predilection in favor of the north, the Greeks placed the gardens of the Hesperides in the extreme west, and there are strong indications in the Puranas of a terrestrial paradise, different from that of the general Hindu system, in the southern parts of Asia (As. Res. iii. 390). Even Meru was no further north than the Himalayan range, which the Aryan race crossed in their migrations.

In the midst of this diversity of opinions, what is the true conclusion at which we arrive? Theory after theory has been advanced, with no lack of confidence, but none has been found which satisfies the required conditions. All share the inevitable fate of conclusions which are based upon inadequate premises. The problem may be indeterminate because the data are insufficient. It would scarcely, on any other hypothesis, have admitted of so many apparent solutions. Still it is one not easy to be abandoned, and the site of Eden will ever rank, with the quadrature of the circle and the interpretation of unfulfilled prophecy, among those unsolved, and perhaps insoluble, problems, which possess so strange a fascination.

The hypothesis of a Himalayan Eden has, however, that other methods of meeting the difficulty, than those above mentioned, have been proposed. Some, ever ready to use the knife, have unhesitatingly pronounced the whole narrative to be a spurious interpolation of a later age (Granville Penn, Min. and Mos. Geol. p. 184). But, even admitting this, the words are not mere unmeaning jargon, and demand explanation. Ewald (Geach. i. 341, note) affirms, and we have only his word for it, that the tradition originated in the far East, and that in the course of its wanderings the original names of two of the rivers at least were changed to others with which the Hebrews were better acquainted. Hartmann regards it as a product of the Babylonian or Persian period. Luther, rejecting the forced interpretations on which the theories of his time were based, gave it as his opinion that the garden retained under the guardianship of angels till the time of the deluge, and that its site was known to the descendants of Adam; but that by the flood all traces of it were obliterated. On the supposition that this is correct, there is still a difficulty to be explained. The narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the time of the historian. It has been suggested that the description of the garden of Eden is part of an inspired antediluvian document (Morren, Rosenmüller's Geog. i. 92). The conjecture is beyond criticism; it is equally incapable of proof or disproof, and has not much probability to recommend it. The effects of the flood in changing the face of countries, and altering the relations of land and water, are too little known at present to allow any inferences to be drawn from them. Meanwhile, as every expression of opinion results in a confession of ignorance, it will be more honest to acknowledge the difficulty than to rest satisfied with a fictitious solution.

The idea of a terrestrial paradise, the abode of purity and happiness, has formed an element in the religious beliefs of all nations. The image of "Eden, the garden of God," retained its hold upon the minds of the poets and prophets of Israel as a thing of beauty whose joys had departed (Ex. xxviii. 13; Joel ii. 3); and before whose gates the cherubim still stood to guard it from the guilty. Arab legends tell of a garden in the East, on the summit of a mountain of jacinth, inaccessible to man; a garden of rich soil and equable temperature, well watered, and abounding with fruits and flowers of rare colors and fragrance. In the centre of Jambudvipa, the middle of the seven continents of the Puranas, is the golden mountain Meru, which stands like the seed-cup of the lotus of the earth. On its summit is the vast city of Brahman, renowned in heaven, and encircled by the Ganges, which, issuing from the foot of Vishnu, washes the lunar orb, and falling thither from the skies, is divided into four streams, that flow to the four corners of the earth. These rivers are the Indrā, or Oby of Siberia; the Sītā, or Hoangho, the great river of China, the Alakananda, a main branch of the Ganges; and the Chaskul, or Oxus. In this abode of divinity is the Nandana, or grove of Indra: there too is the Jambu tree, from whose fruit are fed the waters of the Jambu river, which give life and immortality to all who drink thereof. (Vishnu Purānas, trans. Wilson, pp. 156-171.) The enchanted gardens of the Chinese are placed in the midst of the summits of Hoomi, and a high chain of mountains further north than the Himalaya, and further east than the great mountain chain of which waters these gardens is divided into four streams, the fountains of the supreme spirit, Tychin. Among the Medo-Persians the gods' mountain Alborj is the dwelling of Ormuzd, and the good spirits, and is called the navel of the waters. The Zend books mention a region called Hēden, and the place of Zoroaster's birth is called Hehēnesh; or, according to another passage, Airjana Vēridī (Knoebel, Genesis). All these and similar traditions are but mere mocking echoes of the old Hebrew story, jarred and broken notes of the same strain; but, with all their exaggerations, "they intimate how in the background of man's visions a Paradise of holy joy,—a Paradise secured from every kind of profanation, and made inaccessible to the guilty; a Paradise full of objects that were calculated to delight the senses and to elevate the mind; a Paradise that granted to its tenant rich and rare immunities, and that fed with its perennial streams the tree of life and immortality" (Hardwick, Christian and Other Mysteries, pt. ii. p. 133).

W. A. W.

* This difficult subject should not be dismissed without additional suggestions. 1. The statements...
of Genesis are to be interpreted in a manner consistent with themselves and with other known facts. We accept it as a true history. In so doing, we thereby set aside all theories which find here the Gaanges, the Indus, or the Nile. All such interpretations come from men who regard the passage as a myth or saga. We get no help from them here. Known laws of hydrostatics and known facts concerning the Tigris and Euphrates also forbid our understanding that any one river in the elevated region where these streams rise, divides itself into four rivers, of which these were two. 2. “Eden” was a region or territory, we know not how extensive, in which God planted a garden, and from which went forth these waters. It was not the garden, but the region in which the garden lay.

3. It would not appear that the Deluge wholly changed the face of the country. The named writer was evidently describing a region that might be still recognized when he wrote, and he made specifications for the sake of recognition. Moreover, two of the rivers are now well known. 4. The general situation of the territory is fixed by the rising of the rivers Tigris and Euphrates, in the highlands of Armenia. It is generally conceded, as the result of ethnographical researches, that the early home (or one of the early homes of the nations) is to be sought around that region.

5. The writer seems to be describing the river-system of the territory and the four great rivers into which these various waters became united. No one Hebrew word would so well describe the case as הָרְשָׁנָה used collectively. The word הָרְשָׁנָה denotes a fountain; בּוֹדֶתָה, bodies of water. But הָרְשָׁנָה is a stream, or used collectively, streams, the river-system. It is commonly employed in the plural when more than one stream is designated. Here however the whole are viewed together. A similar use is found in Jonah ii. 4, where the same word in the singular and connected with a singular verb, designates the ocean streams or floods that surrounded Jonah.

Now in the high regions of Armenia there are still to be found four great streams with numerous branches, rising within a short distance of each other and flowing into three different seas. Two of these rivers are unquestionably among the four mentioned in Genesis; and of these two the Tigris rises within four or five miles of the Euphrates. The latter is 1500 miles in length, and the former 1156 miles long before its junction with it. Now midway between the two main sources of the Euphrates, and about ten miles from each, rises the Araxes and flows a thousand miles to the Caspian Sea; while at no great distance from the Euphrates is the origin of the Halys (now Keîl Iravan) which runs a winding course of 700 miles north-west to the Black Sea. That the Gihon is the Araxes was long ago maintained by Rehfeld and Rosenmuller; and the explorations of Col. Theodore, who adopts the same view, bring no little weight to the opinion. His suggestion that the Pison is the Halys is also favored by the relation of the several streams, and by the striking similarity of the names Havilah, הָרְשָׁנָה, and Colchis, Kaârî, the region at the Golden Fleece, which lay on the eastern end of the Black Sea. Rehfeld, Rosenmüller and others saw the resemblance in the names of the country, not suggested the Phasis as the river. Its remoteness would seem to set it aside. The main objection to identifying the Araxes with the Gihon, lies in the statement that the river encompasses the whole land of Cush. But Genesis himself was obliged to retract his statement that Cush was to be found only in Ethiopia, and to admit an Arabian Cush, while Rawlinson has shown (Herod. i. 353, Am. ed.) a remarkable connection between the Cushites of Ethiopia and the earlier inhabitants of Babylonia and Assyria. (Cf. supra.) Dr. Robinson has well said that "the Cushites occupied the immense region stretching from Assyria in the N. E. through eastern Arabia into Africa" (Gen. Heb. Lex. הָרְשָׁנָה). The Araxes thus apparently lay beyond or compassed "the whole land of the Cushites in Arabia." Without going into further details, or becoming responsible for this theory, we may say that it holds fast certain central facts of the narrative, offers a plausible solution of its chief statements, and introduces no mythical or impossible elements. The unsatisfactory state of our knowledge concerning the regions Havilah and Cush, with the reasons, by no means insuperable, for finding them elsewhere, are the chief objections. It deserves consideration in this at least, that it treats the sacred narrative with respect.

S. C. B.

EDEN, 1. יַתִּים [pleasantness]: To'êdb. [Alex. Εδέβα] Eden; omitted by LXX. in Is. xxxvi. 12, and Ez. xxvii. 24), one of the nai's which supplied the luxury of Tyre with richly embroidered stuffs. It is associated with Haran, Sheba, and Asshur; and in Am. i. 5, Beth-Eden, or "the house of Eden," is rendered in the LXX. by Αὐσέρ. In 2 K. xxix. 12, and Is. xxxvii. 12, "the sons of Eden" are mentioned with Gozan, Haran, and Rezeph, as victims of the Assyrian greed of conquest. Tehassar appears to have been the head-quarters of the tribe; and Knobel's (Comm. on Isaiah) etymology of this name would point to the highlands of Assyria as their whereabouts. But this has no sound foundation: although the view which it supports receives confirmation from the version of Jonathan, who gives מִדְוָד (Mîdowd) as the equivalent of Eden. Bochart proved (Proph. vi. p. 274) that this term was applied by the Talmudic writers to the mountainous district of Assyria, which bordered on Media, and was known as the valley of the Cushites in Mesopotamia, and Haran be Carrhe, it seems more natural to look for Eden somewhere in the same locality. Keil (Comm. on Kings, ii. 97, English translation) thinks it may be מִדְוָד (Medowd), which Assmann (Jubil. Or. ii. 224) places in Mesopotamia, in the modern province of Diarbekr. Bochart, considering the Eden of Genesis and Assyria to be identical, argues that Givan, Haran, Rezeph, and Eden, are mentioned in order of geographical position, from north to south; and, identifying Gozan with Gausanitis, Haran with Carrhe, a little E north Gausanitis on the Chalar, and Rezeph with Rezeph, gives to Eden a still more southerly situation at the confluence of the Euphrates and Tigris, or even lower. According to him, it may be Asshan, or Ashhana, which geographers place on the Euphrates. Michaelis (Nagel. No. 1826) is in favor of the modern Eden, called by Ptolomy Αραμίαν τὴν ἐν Εὐφρατεῖ, as the Eden of Ezekiel. In the absence of positive evidence, probability seems to point to the N. W. of Mesopotamia as the locality of this Eden.
2. Beth-Eden (בְּתֵי אֶדֶן,  "house of pleasure" of Eden, A. V.); לְבֵית פְּלֵשָׂע [COMP. לְבֵית פְּלֵשָׂע] almug tubelitmus, probably the name of a country residence of the Kings of Damascus (Am. i. 5). Michaelis (Suppl. ad Lex. Hebr. s. v.), following Laroque's description, and misled by an apparent resemblance in name, identified it with Êded, about a day's journey from Baalbek, on the eastern slope of the Libanus, and near the old cedars of Bishirâni. Baur (Amos, p. 224), in accordance with the Mohammedan tradition, that one of the four terrestrial paradises was in the valley between the ranges of the Libanus and Anti-Libanus, is inclined to favor the same hypothesis. But Grotius, with greater appearance of probability, pointed to the רדֹסֶת גָּאוֹת of Tobler (v. 13) as the locality of Eden. The ruins of the village of Jâshîb el-Kâdisâni, now a paradise no longer, are supposed by Dr. Robinson to mark the site of the ancient Paradise, and his suggestion is approved by Mr. Porter (Horab. p. 577). Again, it has been conjectured that Beth-Eden is no other than Beth-Jena, "the house of Paradise." Yet, to the southwest of Damascus, on the eastern slope of the Hermon, and a short distance from Mevojïd, it stands on a branch of the ancient Pharpar, near its source (Rosenmüller, Bibl. Alt. ii. 221; Hitzig, Amos, loc.: Porter, Damascus, i. 311). But all this is mere conjecture: it is impossible, with any degree of certainty, to connect the Arabic name, bestowed since the time of Mohammed, with the more ancient Hebrew appellation, whatever be the apparent resemblance.

W. A. W.

E'DEN (אֶדֶן,  "pleasur[e]"; לַוֹאָדָא [Vat. M.] לְוֹאָד; [Vat. II. Alex. לְוֹאָד; Comp. לְוֹאָדֶא] Eden). i. A Gershonite Levite, son of Joash, in the days of Hezekiah (2 Chr. xxix. 12). He was one of the two representatives of his family who took part in the purification of the Temple.

2. (Ođâbî: [COMP. אֹדַבî]) Also a Levite, contemporary and probably identical with the preceding, who under Kõre the son of Innâah was over the free-offerings of God (2 Chr. xxxii. 15).

W. A. W.

E'DER (אֶדֶר,  "a flock"; Vat. omits [rather, with Rom., reads אַדְרִי]; Alex. אַדֶּר: [Ald. with 20 MSS. אַדָּר; Comp. אַדָּר] Edor), one of the towns of Judah in the extreme south, and on the borders of Edom (Josh. xv. 21). No trace of it has been discovered in modern times, unless, as has been suggested, it is identical with Arad, by a transposition of letters.

2. (אַדָּר; Edor.) A Levite of the family of Merari, in the time of David (1 Chr. xxiii. 23, xxiv. 30).

E'DES (אֵדֶס,  "a place of beatitude"; متא: אֵדֶס: סֵלִימֶה: סֵלִימֶה), a Levite of the family of Haman, of the tribe of Zebulun (1 Esdr. ix. 35). [Jâdav].

ED'NA (אֶדְנָא, i. e. אֶדֶנָא,  "pleasure; Amo"), the wife of Raguel (Tob. vii. 2, 8, 14, 16, [viii. 12.] x. 12, xi. 1). B. F. W.

E'DOM, IDUME'A, or IDUM'E'A (אָדֵם, אַדֵּמָה, red: אָדֵם, אַדֵּמָה; נ. ת. אַדֵּמָה; only in Mark iii. 8). The name Edom was given to Esau, the first-born son of Isaac, and twin brother of Jacob, when he sold his birthright to the latter for a meal of lentile pottage. The peculiar color of the pottage gave rise to the name Edom, which signifies "red." "And Esau said to Jacob, Feed me, I pray thee, with that same red pottage; for I am faint; therefore was his name called Edom" (Gen. xxv. 29-34). The country which the Lord subsequently gave to Esau was hence called the "field of Edom" (בָּאָר אֶדֶן, Gen. xxxii. 3) or "land of Edom" (גָּרֶם אֶדֶן, Gen. xxxvi. 16; Num. xxxiii. 37). Probably its physical aspect may have had something to do with this. The Easterns have always been, and to the present day are, accustomed to apply names descriptive of the localities. The ruby hue of the mountain-range given to Esau would at once suggest the word Edom, and cause it to be preferred to the better-known Esan. The latter was also occasionally used, as in Obad. 8, 9, 19; and in 21, we have "the Mount of Esan." (מָכָה אֶדֶן).

Edom was previously called Mount Seir, (מִצְצָא, ruggd: Gen. xxxii. 3, xxxvi. 8), from Seir the progenitor of the Horites (Gen. xiv. 6, xxxvi. 20-22). The name Seir was perhaps adopted on account of its being descriptive of the "rugged" character of the territory. Josephus (Ant. i. 18, § 1) confounds the words Seir and Esau, and seems to affirm that the name Seir was also derived from Isaac's son; but this idea is opposed to the expression statement of Moses (Gen. xiv. 6). The original inhabitants of the country were called Horites, from Hor, the grandson of Seir (Gen. xxxvi. 21, 22), because that name was descriptive of their habits as "Troglobytes," or " dwellers in caves" (סֵיָר, Horites). Timna, the daughter of Seir and aunt of Hor, became concubine to Eliphaz, Esau's eldest son, and bore to him Amelek, the progenitor of the Jâdavites (Gen. xxxvi. 12, 20, 22). Immediately after the death of Isaac, Esau left Canaan and took possession of Mount Seir (Gen. xxxvi. 28, xxxvi. 6, 7, 8). When his descendants increased they extirpated the Horites, and adopted their habits as well as their country (Deut. ii. 12; Jer. xiii. 16; Obad. 3, 4).

The boundaries of Edom, though not directly, are yet incidentally defined with tolerable distinctness in the Bible. The country lay along the route pursued by the Israelites from the peninsula of Sinai to Kadesh-barnim, and thence back again to Edath (Deut. i. 2, ii. 1-5); that is, along the east side of the great valley of Arabah. It reached southward as far as Edath, which stood at the northern end of the gulf of Elath, and was the seaport of the Edomites; but it does not seem to have extended further, as the Israelites on passing Edath struck out eastward into the desert, so as to pass round the land of Edom (Deut. ii. 8). On the north of Edom lay the territory of Moab, through which the Israelites were also prevented from going, and were therefore compelled to go from Kadesh by the southern extremity of Edom (Judg. xi. 17, 18; 2 K. iii. 6-9). The boundary between Moab and Edom appears to have been the "brook Zered" (Deut. ii. 13, 14, 18), probably the modern Wady-el-Majâr, which still divides the provinces of Kerak (Moab) and Jadal (Gebel). But Edom was wholly a mountainous country. "Mount Seir" (Gen. xiv. 6, xxxvi. 8, 9; Deut. i. 2, ii. 1, 5, &c.) and "the Mount of Esau" (Obad. 8, 9, 19, 21) are names often given to it in the Bible, while Josephus and later writers called it Gebulene ("the mountainous"). This shows that it only embraced
the narrow mountainous tract (about 100 miles long by 20 broad) extending along the eastern side of the Arabah from the northern end of the gulf of Elath to near the southern end of the Dead Sea. A glance at the more modern divisions and names corroborates this view. Josephus divides Edom, or Idumaea, into two provinces: the one he calls Gebalites (גבעה), and the other Amalekites (א‎םאָלְּקִּיִּים). The former is Edom Proper, or Mount Seir; the latter is the region south of Palestine now called the desert of Idumah, or "Wandering," originally occupied by the Amalekites (Num. xiii. 29; 1 Sam. xv. 17, xxvii. 8), but afterwards, as we shall see, possessed by the Edomites. Esau also gives the name Gebalite, or Gebelinite, as identical with Edom (Num. xxx. 3, 46; Deut. xxiii. 4, 5), and in the Samaritan Pentateuch the word Gebala is substituted for Seir in Deut. xxiv. 2. Gebal is the Greek form of the Hebrew Gebal (גֵּבָל, mountain), and it is still retained in the Arabic Jebel (جبيل, mountains).

The mountain range of Edom is at present divided into two districts. The northern is called Jebel. It begins at Wady-el-Abyab (the ancient brook Zered), which separates it from Kerak (the ancient Moab), and it terminates at or near Petra. The southern district is called ash-Sharrah, a name which, though it resembles, bears no radical relation to the Hebrew Seir.

The physical geography of Edom is somewhat peculiar. Along the western base of the mountain range are low calcareous hills. To these succeed lofty masses of igneous rock, chiefly porphyry, over which lies red and variegated sandstone in irregular ridges and abrupt cliffs, with deep ravines between. The latter strata give the mountains their most striking features and remarkable colors. The average elevation of the summits is about 2000 feet above the sea. Along the eastern side runs an almost unbroken limestone ridge, a thousand feet or more higher than the other. This ridge sinks down with an easy slope into the plain of the Arabian desert. While Edom is thus wild, rugged, and almost inaccessible, the deep gullies and that terraces along the mountain sides are covered with rich soil, from which trees, shrubs, and flowers now spring up luxuriantly. No contrast could be greater than that between the bare, parched plains on the east and west, and the muddy cliffs, and verdant, flower-sprangled gullies and terraces of Edom. This illustrates Bible topography, and reconciles seemingly discordant statements in the sacred volume.

While the posterity of Esau dwelt amid rocky fastnesses and on mountain heights, making their houses like the eyries of eagles, and living by their sword (Jer. xlix. 16; Gen. xxvii. 40, 41), Edom, in his prophetic blessing, promised his disappointed son that his dwelling should be "out of the fatness of the earth, and of the dew of heaven above." (Gen. xxviii. 30). Some other passages of Scripture are also illustrated by a glance at the towering precipices and peaks of Edom. The border of the Amorites was from "the ascents of seerions (חֶרְבוֹנָה), from the rock," that is, from the rocky habitats of Idumea (Judg. i. 39). And we read that Amaziah, after the conquest of Seir, took ten thousand of the captives to the "top of the cliff," and there cast them down, dashing them to pieces (2 Chr. xxx. 11, 12).

The ancient capital of Edom was Bozrah (בּוֹרְא), the site of which is now probably marked by the village of Buweirich, near the n. tber border, about 25 miles south of Kerak (Gen. xxxvi. 33; Is. xxxiv. 6, xxii. 1; Jer. xlix. 22). But Sela, better known by its Greek name Petra, appears to have been the principal stronghold in the days of Amaziah (2 Chr. xxiv. 7; see PETRA). Elath, and its neighbor Elion-gabal, were the sea-ports; they were captured by king David, and here Solomon equipped his merchant ships (2 Sam. viii. 14; 1 K. x. 26).

When the kingdom of Israel began to decline, the Edomites not only reconquered their lost cities, but made frequent inroads upon southern Palestine (2 K. xvi. 6; where Edomites and not Syrians (Armenians) is evidently the true reading; 2 Chr. xxxiii. 17). It was probably on account of these attacks, and of their uniting with the Chaldeans against the Jews, that the Edomites were so fearfully denounced by the later prophets (Olam. 1 ff.; Jer. xlix. 7 f.; Ez. xxv. 12, xxx. 3 f.). During the Captivity they advanced westward, occupied the whole territory of their brethren the Amalekites (Gen. xxxvi. 12; 1 Sam. xv. 1 f.; Joseph. Ant. ii. 8, § 2), and even took possession of many towns in southern Palestine, including Hebron (Joseph. Ant. xiii. 8, § 6; B. J. iv. 9, § 7; e. Apion, ii. 10). The name Edom, or rather its Greek form, Idumaea, was applied to the whole country lying between the valley of Arabah and the shores of the Mediterranean. Thus Josephus writes (Ant. v. 1, § 22) "the lot of Simeon included that part of Idumaea which bordered upon Egypt and Arabia;" and though this is true, it does not contradict the language of Scripture — "I will not give you of their land, nor so much as a footpath, because I have given Mount Seir unto Esau for a possession." (Deut. vii. 5). Not a footpath of Edom Proper, or Mount Seir, was ever given to the Jews. Je- tone also (in Obad.) says that the Edomites possessed the whole country from Helelropolis to Petra and Elath; and Roman authors sometimes give the name Idumaea to all Palestine, and even call the Jews Idumaeans (Verg. Georg. iii. 12; Juven. viii. 169; Martial, ii. 2).

While Idumaea thus extended westward, Edom Proper was taken possession of by the Nabataeans, an Arabian tribe, descended from Nebaioth, Ishmael's elder son (Gen. xxv. 15; 4 Chr. i. 29; Gen. xxvi. 3). The Nabataeans were a powerful people, and held a great part of southern Arabia (Joseph. Ant. i. 12, § 4). They took Petra and established themselves there at least three centuries before Christ, for Antigonus, one of the successors of Alexander the Great, after conquering Palestine, sent two expeditions against the Nabataeans in Petra (Diod. Sic. xiv.). This people, leaving off their nomad habits, settled down amid the mountains of Edom, engaged in commerce, and founded the little kingdom called by Roman writers Arabia Petraea, which embraced nearly the same territory as the ancient Edom. Some of its monarchs took the name Arctas (2 Marc. v. 8; Joseph. Ant. xiii. 15, § 1, 2; xiv. 5, § 1, and some Obodos (Joseph. Ant. xiii. 15, § 5). Arctas, king of Arabia, was father-in-law of Herod the Great (2 Macc. i. 4), and it was the same who captured the city of Damascus and held it at the time of Paul's conversion (2 Cor. xi. 32; Acts ix. 25). The kingdom of Arabia was finally subdued by the Romans in A. D. 106. Under the Romans the transport trade of the Nabataeans increased. Roads were constructed through the mountain-
files from Edath on the coast to Petra, and thence northward and westward. Traces of them still remain, with ruinous military stations at intervals, and fallen mile-stones of the times of Trajan and Marcus Aurelius (Pentinger Tables: Laborde’s Voyage; Burckhardt’s Syria, pp. 374, 419; Ibrányi and Mangies’ Travels, pp. 571, 577, 1st ed.). To the Nabateans Petra owes those great monuments which are still the wonder of the world.

When the Jewish power revived under the war-like Arabian princes, that section of Idumaea which lay south of Palestine fell into their hands. Judas Maccæus captured Helvon, Marissa, and Ashdod; and John Hyrcanus compelled the inhabitants of the whole region to conform to Jewish law (Joseph. Ant. xii. 3, § 6, xiii. 9, § 2; 1 Mac. v. 63, 68). The country was henceforth governed by Jewish prefects; one of these, Antiapus, an Idumæan by birth, became, through the friendship of the Roman emperor, procurator of all Judæa, and his son was Herod the Great, “King of the Jews” (Joseph. Ant. xiv. 1, § 3, 8, § 5, xv. 7, § 9, xvii. 11, § 4).

Early in the Christian era Edom Proper was included by geographers in Palestine, but in the fifth century a new division was made of the whole country into Palæstine Præviosa, Secunda, and Terïclus. The last embraced Edom and some neighboring provinces, and when it became an ecclesiastical division its metropolis was Petra. In the seventh century the Mohammedan conquest gave a death-blow to the commerce and prosperity of Edom. Under the withering influence of Mohammedan rule the great cities fell to ruin, and the country became a desert. The followers of the false prophet were here, as elsewhere, the instruments in God's hands for the execution of his judgments. Thus saith the Lord God, Behold, O Mount Seir, I am against thee, and I will make thee most desolate. I will lay thy cities waste, and when the whole earth rejoiceth I will make thee desolate. . . . I will make thee perpetual desolations, and thy cities shall not return, and ye shall know that I am the Lord” (Ex. xxxiv. 3, 4, 7, 9, 14).

The Crusaders made several expeditions into Edom, penetrating as far as Petra, to which they gave the name it still bears, Wady Mâṣûs, “Valley of Moses” (Gestæ Dei pri Franc, pp. 405, 518, 555, 581). On a commanding height about 12 miles north of Petra they built a strong fortress called Mons Regalis, now Shobak (Gestæ Dei, p. 611). At that time so little was known of the geography of the country that the Crusaders occupied and fortified Kevak (the ancient Ker Muth) under the impression that it was the site of Petra. From that time until the present century Edom remained an unknown land. In the year 1812 Burckhardt entered it from the north, passed down through it, and discovered the wonderful ruins of Petra. In 1828 Laborde, proceeding northward from Aïlahh through the defiles of Edom, also visited Petra, and brought away a portfolio of splendid drawings, which proved that the description of the country had not been exaggerated. Many have since followed the footsteps of the first explorers, and a trip to Petra now forms a necessary part of the eastern traveller’s grand tour.

J. L. P.

EDOMITES (אֲדֹמִ֑יִּים, נַעֲרֵי), pl.; and נַעֲרֵי עַלְמָה (sons of the hairy), Deut. ii. 4 (18οπαρα¬γφαμα), the descendants of Esau or Edom. [Edom.]

Esau settled in Mount Seir immediately after the death of his father Isaac (Gen. xxvii. 6, 8). Before that time, however, he had occasionally visited, and even resided in, that country; for it was to the “land of Seir” Jacob sent messengers to acquaint his brother of his arrival from Padan-aram (Gen. xxvii. 3). The Edomites soon became a numerous and powerful nation (Gen. xxxvi. 1 ff.). Their first form of government appears to have resembled that of the modern Bedawin; each tribe or clan having a petty chief or sheikh (ארים, a Duke in the A. V., Gen. xxxvi. 15). The Horites, who inhabited Mount Seir from an early period, and among whom the Edomites still lived, had their sheikhs also (Edom, pp. 374, 392). At a later period, probably when the Edomites began a war of extermination against the Horites, they felt the necessity of united action under one competent leader, and then a king was chosen. The names of eight of their kings are given in the book of Genesis (xxvii. 31-39), with their native cities, from which it appears that one of them was a foreigner (“Saal of Rehoboth-by-the-river”), or, at least, that his family were resident in a foreign city. (See also 1 Chr. 4:42-50.) Against the Horites the children of Edom were completely successful. Having either exterminated or expelled them they occupied their whole country (Deut. ii. 12). A statement made in Gen. xxxvi. 31, serves to fix the period of the dynasty of the eight kings. They “reigned in the land of Edom before there reigned any king over the children of Israel.” that is, before the time of Moses, who may be regarded as the first virtual king of Israel (Gen. xxxvii. 5; Ex. xviii. 16-19).

Other circumstances, however, prove that though the Edomite kings had the chief command, yet the old patriarchal government by sheikhs of tribes was still retained. Most of the large tribes of Bedawin at the present day have one chief, with the title of Emir, who takes the lead in any great emergency; while each division of the tribe enjoys perfect independence under its own sheikh. So it would seem to have been with the Edomites. Lists of dukés (or sheikhs, נַעֲרֵי עַלְמָה) are given both before and after the kings (Gen. xxxvi. 15 ff.; 1 Chr. 1. 51 ff.), and in the triumphant song of Israel over the engulphed host of Pharaoh, when describing the effect this fearful act of divine vengeance would produce on the surrounding nations, it is said: “Then the dukés of Edom shall be amazed” (Ex. xv. 19), while, only a few years afterwards, Moses sent messengers from Kadesh unto the king (נַעֲרֵי עַלְמָה) of Edom “to ask permission to pass through his country” (Judg. xi. 17).

Esau’s bitter hatred to his brother Jacob for fraudulently obtaining his blessing appears to have been inherited by his latest posterity. The Edomites peremptorily refused to permit the Israelites to pass through their land, though addressed in the most friendly terms—“thus saith thy brother
EDOMITES

Israel" (Num. xx. 14) — and though assured that the Edomites would not drink of their waters nor trespass on their fields or vineyards (ver. 17). The Israelites were expressly commanded by God neither to resent this conduct, nor even to entertain feelings of hatred to the Edomites (Deut. ii. 4, 5, xxii. 7). The Edomites did not attempt actual hostilities, though they prepared to resist by force any intrusion (Num. xx. 20). Their neighbors and brethren (Gen. xxxvi. 12), the Amalekites, were probably urged on by them, and proved the earliest and most determined opponents of the Israelites during their journey through the wilderness (Ex. xvii. 8, 9).

For a period of 400 years we hear no more of the Edomites. They were then attacked and defeated by Saul (1 Sam. xiv. 47). Some forty years later David overthrew their army in the "Valley of Salt," and his general, Joab, following up the victory, destroyed nearly the whole male population (1 K. xi. 15, 16), and placed Jewish garrisons in all the strongholds of Edom (2 Sam. viii. 13, 14; in ver. 13 the Hebrew should evidently be הָּלֹחֲמָה instead of הָּלוֹחֲמָה; comp. 14; 2 K. xiv. 7; and Joseph. Ant. vii. 5, § 4). In honor of that victory the Jebusitish-warrior may have penned the words in Ps. lx. 8, "over Edom will I cast my shoe." Habad, a member of the royal family of Edom, made his escape with a few followers to Egypt, where he was kindly received by Pharaoh. After the death of David he returned, and tried to excite his countrymen to rebellion against Israel, but failing in the attempt he went on to Syria, where he became one of Solomon's greatest enemies (1 K. xi. 14-22; Joseph. Ant. viii. 7, § 6). The Edomites continued subject to Israel from this time till the reign of Jehoshaphat (n. c. 914), when they attempted to invade Israel in conjunction with Ammon and Moab, but were miraculously destroyed in the valley of Berachah (2 Chr. xx. 22). A few years later they revolted against Jehoshaphat, elected a king, and for half a century retained their independence (2 Chr. xxvi. 8). They were then attacked by Amaziah, 10,000 were slain in battle, &c., their great stronghold, was captured, and 10,000 more were dashed to pieces by the conqueror from the cliffs that surround the city (2 K. xiv. 7; 2 Chr. xxv. 11, 12). Yet the Israelites were never able again completely to subdue them (2 Chr. xxviii. 15). When Nebuchadnezzar besieged Jerusalem the Edomites joined him, and took an active part in the plunder of the city and slaughter of the poor Jews. Their cruelty at that time seems to be specially referred to in the 137th Psalm — "Remember, O Lord, the children of Edom in the day of Jerusalem; who said, Raze it, raze it, even to the foundation thereof." As the first part of Isaac’s prophetic blessing to Esau — "Be the elder shall serve the younger" — was fulfilled in the long subjection of the Edomites to the kings of Israel, so now the second part was also fulfilled — "It shall come to pass when thou shalt have dominion that then shalt break his yoke from off thy neck" (Gen. xxvii. 40). It was on account of these acts of cruelty committed upon the Jews in the day of their exaltation that the Edomites were so fearfully denounced by the later prophets (Is. xxxvii. 5-8, xxiii. 1-4; Jer. xlv. 17; Lam. iv. 21; Ez. xxv. 13, 14; Am. i. 11, 12; Obad. 10 ff.).

On the conquest of Judah by the Babylonians, the Edomites, probably in reward for their services during the war, were permitted to settle in southern Palestine, and the whole plateau between it and Egypt; but they were about the same time driven out of Edom Proper by the Nabateans. [Edom; Nabatæi.]

For more than four centuries they continued to prosper, and retained their new possessions with the exception of a few towns which the Persian monarchs compelled them to restore to the Jews after the Captivity. But during the warlike character of the Maccabees they were again completely subdued and, even forced to conform to Jewish laws and rites (Joseph. Ant. xii. 8, § 6, xiii. 9, § 1; 1 Macc. v. 65), and submit to the government of Jewish prefects. The Edomites were now incorporated with the Jewish nation, and the whole province was often termed by Greek and Roman writers Idumæa (Ptol. Geo. v. 16; Mar. iii. 8). According to the ceremonial law an Edomite was received into "the congregation of the Lord" — that is, to all the rites and privileges of a Jew — "in the third generation" (Deut. xxiii. 8). Antipater, a clever and craftsman Idumæan, succeeded, through Roman influence, in obtaining the government of Judæa (Joseph. Ant. xiv. 8, § 5). His oldest son, Phasaelus, he made governor of Jerusalem, and to his second son Herod, then only in his 15th year, he gave the province of Galilee. Herod, afterwards named the Great, was appointed "king of the Jews" by a decree of the Roman senate (n. c. 37; Joseph. Ant. xiv. 14, § 5; Matt. ii. 1). Immediately before the siege of Jerusalem by Titus, in consequence of the influence of John of Gischala, 20,000 Idumæans were admitted to the Holy City, which they filled with robbery and Bloodshed (Joseph. B. J. iv. 4 and 5). From this time the Edomites, as a separate people, disappear from the page of history, though the name Idumæa still continued to be applied to the country south of Palestine as late as the time of Jerome (in Obs.);

The character of the Edomites was drawn by Isaac in his prophetic blessing to Esau — "By thy sword shalt thou live." (Gen. xxvi. 40). War and rapine were the only professions of the Edomites. By the sword they got Mount Seir — by the sword they exterminated the Horites — by the sword they long battled with their brethren of Israel; and finally they perished as a nation by their own yoke — by the sword of the conqueror, in western southern Palestine — and by the sword they performed the last act in their long historic drama, massacred the guards in the temple, and pillaged the city of Jerusalem.

Little is known of their religion; but that little shows them to have been idolatrous. It is probable that Esau’s marriage with the "daughters of Canaan," who "were a grief of mind" to his father and mother (Gen. xxxxiv. 15, 30), induced him to embrace their religion, and when Esau and his followers took possession of Mount Seir they seem to have followed the prevalent common among ancient nations of adopting the country’s gods, for we read that Amaziah, king of Judah, after his conquest of the Edomites, "brought the gods of the children of Seir, and set them up to be his gods." (2 Chr. xxiv. 14, 15, 20). Josephus also refers to both the idols and priests of the Idumæans (I. ii. 17, § 1; Macc. ii. 35). The habits of the Idumæans were singular. The Horites, their predecessors in Mount Seir, were, as their name implies, troglodytes, or dwellers in caves; and the Edomites seem to have adopted their dwellings as well as their country. Jeremiah and Ob-
of the rocks," and making their habitations high in the cliffs, like the eyries of eagles (Jer. xlix. 16; Josh. iii. 10). In the district is a remarkable site, the ancient citadel of Jericho, which was the scene of many battles between the Israelites and the Canaanites. The ruins are now a place of pilgrimage for the Christian faithful, and are visited by thousands of tourists each year. The site is surrounded by beautiful gardens and vineyards, and is a popular destination for those interested in the history and culture of the region. The ruins of ancient Jericho are a testament to the rich history of the area, and serve as a reminder of the ongoing human presence in the Holy Land. 

The ruins are remarkable for their size and scale, and are a popular spot for tourists and archaeologists alike. The site is now protected as a national park, and efforts are being made to preserve the site for future generations. The ruins are a testament to the long and rich history of the area, and are a reminder of the ongoing human presence in the Holy Land. 2. A town of northern Palestine, allotted to the tribe of Naphtali, and situated near Kedesh. It is only once mentioned in Scripture (Josh. xix. 37.). The name signifies "strength," or a "stronghold." About two miles south of Kedesh is a conical rocky hill called Tell Khurebeh, the "Tell of the ruin;" with some remains of ancient buildings on the summit and a rock-hewn tomb in its side. It is evidently an old site, and it may be that of the long-lost Edrei. The strength of the position, and its nearness to Kedesh, give probability to the supposition. Dr. Robinson (Bibl. Res. vol. iii. p. 365) suggests the identity of Tell Khurebeh with Hazor. For the objections to this theory see Porter's "Hand-book for Syria and Palestine," p. 442.

J. L. P.

EDUCATION. Although nothing is more carefully inculcated in the Law than the duty of parents to teach their children its precepts and principles (Ex. xii. 26, xiii. 8, 14; Deut. iv. 5, 9, 10, vii. 2, 7, 20, xix. 19, 21); Acts xxiii. 2; 2 Tim. iii. 15; Hist. of Susanna, 3; Joseph. c. Ap. ii. 16, 17, 25), yet there is little trace among the Hebrews in earlier times of education in any other subjects. The wisdom, therefore, and instruction, of which so much is said in the Book of Proverbs, is to be understood chiefly of moral and religious discipline imposed, according to the direction of the Law, by the teaching and under the example of parents (Prov. i. 2, 8, ii. 10, iv. 1, 7, 23, vii. 1, ix. 1, x. 19, xii. 22, xxiv. 24, xxxi.). Implicit exceptions to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii. 22); of the writer of the book of Job, who was evidently well versed in natural history and in the astronomy of the day (Job xxxviii. 31, xxxix. 1, xli.); of Daniel and his companions in captivity (Dan. i. 4, 17); and above all, in the intellectual gifts and acquirements of Solomon, which were even more renowned than his political greatness (1 K. iv. 29, 31, x. 19; 2 Chr. ix. 1-8), and the memory of which has with much exaggeration, been widely preserved in oriental tradition. The statement made above may, however, in all probability be taken as representing the chief aim of ordinary Hebrew education, both at the time when the Law was best observed, and also when, after periods of national decline from the Mosaic standard, attempts were made by monarchs, as Jehoshaphat or Josiah, or by prophets, as Elijah or Isaiah, to enforce, or at least to inculcate, reform in the moral condition of the people on the basis of that standard (2 K. xvii. 13, xiii. 8-23; 2 Chr. xvii. 7, 9; 1 K. xix. 14; Is. i. ii.). In later times the prophetesses, and comments on them as well as on the earlier Scriptures, together with other subjects, were studied (Pro. to Eccles., and Eccles. xxxviii. 24, 25, xxxix. 1-11). St. Jerome adds that Jewish children were taught to say by heart the genealogies (Hieronym. on Titus, iii. 9; Calmet, Dict. art. Genealogie). Parents were required to teach their children some trade, and he who failed to do so was said to be virtually teaching his child "nothing," (Mish. Geduliah ii. 2, xliv., vol. iii. p. 413; Surenhus.; Lightfoot, Chron. Temp. on Acts xviii. vol. ii. p. 79.)

The set of the Essenes, though themselves abjuring marriage, were anxious to undertake, and careful in carrying out, the education of children, but confined its subject matter chiefly to morals and the Divine Law (Joseph. B. J. ii. 8, § 12; Philo, Quod omnis probus liber, vol. ii. p. 458, ed. Mansel; § 12, Taulum.).

Previous to the Captivity, the chief depositories of learning were the schools or colleges, which in most cases (see Am. vii. 14) proceeded that succession of public teachers, who at various times endeavored to reform the moral and religious condition of their country, and people. (Prophets, lii.) In these schools the Law was probably the chief subject of instruction; the study of languages was little followed by any Jews till after the Captivity, but from that time the number of Jews residing in foreign countries must have made the knowledge of foreign languages more common than before (see Acts xx. 37). From the time of the outbreak of the last war with the Romans, parents were forbidden to instruct their children in Greek literature (Mish. Sotah, c. ix. 15, vol. iii. pp. 307, 308, Surenhus.).

Besides the prophetic schools, instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x. 11; Ez. xxiv. 23, 24; 1 Chr. xxv. 7, 8; Mal. ii. 7). Those sovereigns who exhibited any anxiety for the maintenance of the religious element in the Jewish polity, were conspicuous in enforcing the religious education of the people (2 Chr. xviii. 7, 8, 9, xix. 5, 8, 11; 2 K. xxiii. 2).

From the time of the settlement in Canaan there must have been among the Jewish people skilled in writing and in accounts. Perhaps the neighborhood of the tribe of Zebulun to the commercial district of Phoenicia may have been the occasion of their reputation in this respect. The "writers" of that tribe are represented (Judg. v. 14) by the same word תֵּן, used in that passage of the levying of an army, or, perhaps, of a military officer (Gen. p. 966), as is applied to Ezra, in reference to the Law (Ezr. vii. 6); to Seraiah, David's scribe or secretary (2 Sam. viii. 17); to Shema, scribe to Hezekiah (2 K. xxiii. 37); Shemaijah (1 Chr. xxiv. 6); Baruch, scribe to Jeremiah (Jer. xxxvi. 32), and others filling like offices at various times. The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons in their various departments under the recorder (תֵּן תְאֹרָה) or historiographer, whose business was to compile memorials of the reign (2 Sam. viii. 16, xx. 24; 2 K. xviii. 18; 2 Chr. xxiv. 8). Learning, in the sense above mentioned, was at all times highly esteemed, and educated persons were treated with great respect, and, according to Rabbinical tradition, were called "sons of the noble," and allowed to take precedence over others at table (Lightfoot, Chr. Temp. Acts xviii. vol. ii. p. 79, 84; Iber, Heb. Lake xviii. 8-24, 11. 549). The same authority deprecates the degeneracy of later times in this respect (Mish. Sotah, ix. 15, vol. iii. p. 308, Surenhus.).

To the schools of the prophets succeeded, after the Captivity, the synagogues, which were either themselves used as schools, or had places attached for that purpose. In most cities there was at least one, and in Jerusalem, according to some, 394, according to others, 699 (Calmet, Dict. art. Ecoles). It was from these schools and the doctrines of the various teachers presiding over them, of whom Gamaliel, Sammi, and Hillel were among the most famous, that many of those traditions and refinements proceeded by which the Law was it
EGGLA [Vat. A'la'; [Alex. in 2 Sam. Ar'as; Comp. in 1 Chr. Ey'la'; Eg'ti, one of David' wives during his reign in Hebron, and the mother of his son Ittreum (2 Sam. iii. 5; 1 Chr. iii. 3). In both lists the same order is preserved, Eglih being the sixth and last, and in both is she distinguished by the special title of David's "wife." According to the ancient Hebrew tradition preserved by Jerome (Locr. Heli, on 2 Sam. iii. 5, vi. 23) she was Michal, the wife of his youth; and she died in giving birth to Ittreum. A name of this signification is common amongst the Arabs at the present day.}

EGGLAMIM (א'גלא'ם), two points: Ayalim [Alex. A'yallim; Sib. A'yallam]; Gallim, a place named only in Is. xx. 6, and there apparently as one of the most remote points on the boundary of Moab. It is probably the same as EN-EGGLAM.

A town of this name was known to Eusebius (Onom. Agallii), who places it 8 miles to the south of Arecopolis, i.e. AR-Moab (Robbe). Exactly in that position, however, stands Kerak, the ancient Kir Moab.

A town named Ogali is mentioned by Josephus with Zoor and other places as in the country of the Arabians (Jos. xxiv. 1). With most of the places on the east of the Dead Sea, Eglon yet awaits further research for its identification.

EGGLON (א'גלו': [Ca'lib, citilana]: Ey'la; [Comp.] Joseph. Ey'la'; Ey'lon), a king of the Moabites (Judg. iii. 12 ff.), who, aided by the Ammonites and the Amelekites, crossed the Jordan and took "the city of palm-trees," or Jericho (Jos. iii. 10), he was himself slain (Joseph. [Ant. v. 4, § 1 ff.]), and continued for eighteen years (Judg. and Joseph.) to oppress the children of Israel, who paid him tribute (Joseph.). Whether he resided at Jericho permanently, or only during the summer months (Judg. iii. 20; Joseph.), he seems to have formed a familiar intimacy (ευοινή, Joseph., not Judg.) with Ehud, a young Israelite (περίαρι, Joseph.; who lived in Jericho (Joseph., not Judg.), and who, by means of repeated presents, became a favorite courtier of the monarch. Josephus represents this intimacy as having been of long continuance; but in Judges we find no mention of intimacy, and only one occasion of a present being made, namely, that which immediately preceded the death of Eglon. The circumstances attending this tragic event are somewhat differently given in Judges and in Josephus. That Ehud had the entrée of the palace is implied in Judges (iii. 19), but more distinctly stated in Josephus. In Judges the Israelites send a present by Ehud (iii. 15); in Josephus Ehud wins his favor by repeated presents of his own. In Judges we have two scenes, the offering of the present and the death scene, which are separated by the temporary withdrawal of Ehud (18, 19); in Josephus there is but one scene. The present is offered, the attendants are dismissed, and the king enters into friendly conversation (διαλογία) with Ehud. In Judges the presentation is from the reception-room into the "summer-parlor" [probably a cool room on the roof is meant], where Ehud found him upon his return (cf. 18, 19). In Josephus the entire action takes place in the summer-parlor (δωμάτιον). In Judges the king exposes himself to the dagger by rising apparently in respect for the divine message which Ehud professed...
EGLON

both and Van to the Mount not of Judg. (i.e.,...crassus," Vulg., and so Gesen. Lex.). After this desperate achievement Ehud repaired to Seirath (unprop. Seirath; vid. Gesen. Lex. sub v.), in the mountains of Ephraim (iii. 26, 27), or Mount Ephraim (Josh. xix. 30). To this wild central region, commanding, as it did, the plains E. and W., he summoned the Israelites by sound of horn (a national custom according to Joseph. A. V., "a trumpet"). Descending from the hills they fell upon the Moabites, dismayed and demoralized by the death of their king (Joseph., not Judg.). The greater number were killed at once, but 10,000 men made for the Jordan with the view of crossing into the land. The Israelites, however, had already seized the fierce, and not one of the unhappy fugitives escaped. As a reward for his conduct Ehud was appointed Judge (Joseph., not Judg.).

Note.—The "quarries that were by Gilgal" (A. V. [iii. 19]) in the margin better, as in Deut. vii. 23, "graven images" (Patrick ad loc.; cf. Gesen. Heb. Lex. sub v. דְּלֶלֶת, [See QUARRIES, Amer. ed.]).

EGLON (אֵלֹן) [see above]: in Josh. x., [Rev.] and Alex. 0'88α'da: vv. 24, 30, 37, Comp. Ἱγάξαν: v. 5, 3; Ἱοσία: Josh. xii. 12] Αίδαα, [Alex. Abl. Comp.] Ἱαλαούα: [Josh. xv. 29, Rom. Vat. corrup. Alex. Ἱαλαούα, Comp. with 17 MSS. Ἱαλαούα] Ἰγανι, a town of Judah in the Shephelah or low country (Josh. xv. 39). During the struggles of the conquest, Eglon was one of a confederacy of five towns, which under Jerusalem attempted resistence, but attacking Gebon the territory of the latter with Israel. Eglon was then Anorite, and the name of its king Débr (Josh. x. 3-5).

The story of the overthrow of this combination is too well known to need notice here (x. 23-25, A.E.). Eglon was soon after visited by Joshua and destroyed (x. 34, 35, xii. 12). The name doubtless survives in the modern Ajlon, "a shapless mass of ruins," "potshehrs," and "scattered heaps of unhewn stone," covering a "round hillock" (Porter, Handbook; Van de Velde, ii. 188; Rob., ii. 49), about 10 miles from Beil Abiron (Eleutheropolis) and 14 from Gaza, on the south of the great maritime plain.

In the Omneanis it is given as Α'λοαν or Ωθλαδον; and its situation stated at 10 miles east of Eleutheropolis. The identification with Adullam arose no doubt from the reading of the LXX. in Josh. x., as given above; and it is to the site of that place, and not of Eglon, that the remarks of Eusebius and Jerome refer. This will be seen upon comparing Adullam. No reason has been assigned for the reading of the LXX.

EGYPT (אָרְץ עֶגֶרְת; Αἰγύπτως, Egypt, a country occupying the northeastern angle of Africa, and ying between N. lat. 31° 07' and 21° 1', and E.

a The system of transcribing ancient Egyptian is that given by the writer, in the Encyclopaedia Britanica, 8th ed., art. Hieroglyphs.

long. 27° 13' and 31° 12'. Its limits appear to have been always very nearly the same. In Ezekiel (xxix. 10, xxx. 6), according to the obviously correct rendering [Michaelis], the whole country is spoken of as extending from Migdol to Syene, which indicates the same limits to the east and the south as at present. Egypt seems, however, to have been always held, except by the modern geographers, to include no more than the tract irrigated by the Nile lying within the limits we have specified. The deserts were at all times wholly different from the valley, and their tribes, more or less independent of the rulers of Egypt.

Names.—The common name of Egypt in the Bible is "Mizraim," or more fully "the land of Mizraim." In form Mizraim is a dual, and accordingly it is generally joined with a plural verb. When, therefore, in Gen. x. 6, Mizraim is mentioned as a son of Ham, we must not conclude that anything more is meant than that Egypt was colonized by descendants of Ham. The dual number doubtless indicates the natural division of the country into an upper and a lower region, the plain of the Delta and the narrow valley above, as it has been commonly divided at all times. The singular Mazor also occurs, and some suppose that it indicates Lower Egypt, the dual only properly meaning the whole country (thus Gesenius, Thes. s. v. מִצְרָיָים, מִצְרַיִם), but there is no sure ground for this assertion. The mention of Mizraim and Pathros together (Is. xi. 11; Jer. xlv. 1, 15), even if we adopt the explanation which supposes Mizraim to be in these places by a late usage put for Mazor, by no means proves that since Pathros is a part of ancient Egypt, Mizraim, or rather Mazor, is here a part also. The mention together of a part of a country as well as the whole is very usual in Hebrew phrasing; Gesenius thinks that the Hebrews supposed the word מִצְרַיִם to mean a limit, although he admits it may have had a different Egyptian origin. Since we cannot trace it to Egyptian, except as a translation, we consider it a purely Semitic word, as indeed would be most likely. Gesenius finds the signification "limit" in the Arabic name of Egypt, מצרים; but this word also means "red mud," the color intended being either red or reddish brown.

Egypt is also called in the Bible מִצְרִי and מִצְרָיָים, the land of Ham (Ps. cv. 23, 27; comp. lxvii. 51), a name most probably referring to Ham the son of Noah (Ham); and מִצְרַיִם. Rahab, "the proud" or "insolent" (Rahab): both these appear to be poetical appellations. The common ancient Egyptian name of the country is written in hieroglyphics KEM, which was perhaps pronounced Cem; the demotic form is KEMPJ, a (Brugsch, Geographische Inschriften, p. 73, No. 362); and the Coptic forms are X.AP, XIAM (M); KIMC, KIMK (S), and KIMM (B). b This name signifies, alike in the ancient language and in Coptic, "black," and may be supposed to have been given to have been given to the land on

b The letters M, S, and B denote here and elsewhere where the Memphitic, Sahidic, and Bashanite dialects
EGYPT 669

The actual state of the country at the present time Mr. Lane calculated the extent of the cultivated land in a. p. 477, A. d. 1375-6, to be 5500 square geographical miles, from a list of the cultivated lands of towns and villages appended to De Sacy's Abel Abulf. He thinks this list may be underrated. The water-level of the Nile was raised from 1821, but since then much waste territory has been reclaimed (Mrs. Poole, Englishwomen in Egypt, i. 83). The chief differences in the character of the surface in the times before the Christian era were that the long valley through which flowed the canal between the Nile and the Red Sea was then cultivated, and that the Gulf of Suez extended much further north than at present.

Nouns. — From a remote period Egypt was divided into Nomes, HESUP, sing. HESP, each one of which had its special objects of worship. The monuments show that this division was as old as the earlier part of the Twelfth Dynasty, which began B. c. cir. 2982. They are said to have been at first 36 in number. Pottery enumerates 44, and Pline 49; afterwards they were further increased. There is no distinct reference to them in the Bible.

In the LXX. version indeed, Ἐγυπτιὰ (Is. xix. 2) is rendered by βαβυλος, but we have no warrant for translating it otherwise than "kingdom." It is probable that at that time there were two, if not three, kingdoms in the country. Two provinces or districts of Egypt are mentioned in the Bible, Pathros and Capito; the former appears to have been part of Upper Egypt, the latter was certainly so, and must be represented by the Coptite Nome, although no doubt of greater extent. [PATHROS: CAPITOR.]

General Appearance, Climate, &c. — The general appearance of the country cannot have greatly changed since the days of Moses. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have suffered still less alteration. Anciently, however, the rushes must have been nowhere as now, whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly-bare yellow mountains or the sand-strewed rocky desert on either side. Thus the plain of Jordan before the cities were destroyed was, we read, "well watered every where"... "[even] like a garden of the Lord, like the land of Egypt." (Gen. xiii. 10). The climate is equal and healthy. Rain is not very frequent on the northern coast, but inland very rare. Cultivation nowhere depends upon it. This absence of rain is mentioned in Deut. (xi. 10, 11) as rendering artificial irrigation necessary, unlike the case of Palestine, and in Zech. (xiv. 18) as peculiar to the country. Egypt has been visited in all ages by severe pestilence, but it cannot be determined that any of those of ancient times were of the character of the modern Plague. The plague with which the Egyptians are threatened in Zech. (l. c.) is described by a word, σθενος, which is not specially applicable to a pestilence of their country (see ver. 12). Cutaneous disorders, which have always been very prevalent in Egypt, are distinctly mentioned as peculiar to the country (Deut. vii. 15, xxviii. 27, 35, 60, and probably Ex. xiv. 26, though here the
Egypt.

The fertile plain of the Delta and the valley of Upper Egypt are bounded by rocky deserts covered or strewn with sand. On either side of the plain they are low, but they overlook the valley, above which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone as far as a little above Thebes, where sandstone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the sandstone and obstruct the river's bed. In Upper Egypt the Nile branches near the Nil, rarely exceed 300 feet in their height, but far in the eastern desert they often attain a much greater elevation. The highest is Tabel Ghairh, which rises about 6000 feet above the sea. Limestone, sandstone, and granite were obtained from quarries near the river; basalt, breccia, and porphyry from others in the eastern desert between the Thebais and the Red Sea. An important geological change has in the course of centuries raised the country near the head of the Gulf of Suez and depressed that on the northern side of the isthmus. Since the Christian era the head of the Gulf has retired southwards, as prophesied by Isaiah — "The Lord shall utterly destroy the tongue of the Egyptian sea" (ix. 15): "the waters shall fail from the sea" (xix. 5). The Delta is of a triangular form, its eastern and western limits being nearly marked by the course of the ancient Pylian and Canopic branches of the Nile; Upper Egypt is a narrow winding valley, varying in breadth, but seldom more than 12 miles across, and generally broader on the western side. Anciently there was a fertile valley on the course of the land of the Red Sea, the Land of Goshen, now called Wadi-T właśnie; this is covered with the sands of the desert. [Geology.] To the south, on the opposite side, is the oasis now called the Firgym, the old Aramaic Nome, connected with the valley by a neck of cultivated land.

The Nile. — The Nile is called in the Bible Shihor, מים למאים, or the black river; Yeoh, ים, ים "the river," probably derived from the Egyptian ATR, or "the river," which may be compared to the Hebrew Yaw. This word has been preserved in the Coptic appellation CIEPO, 12.290, CIEPO (M), or CIEPO (S), which likewise also signifies "the river." The inundation, HAPPE, or "great Nile," or "high Nile," fertilizes and sustains the country, and makes the river its chief blessing; a very low inundation or failure of rising being the case of famine. The Nile was on this account anciently worshiped, and the plague in which its waters were turned into blood, while injuries to the river itself and its fish (Ex. vii. 3; xiv. 29), was a reproach to the superstition of the Egyptians. The rise begins in Egypt about the summer solstice, and the inundation commences about two months later. The greatest height is attained about or somewhat after the autumnal equinox. The inundation lasts about three months. During this time, and especially when near the highest, the river rapidly pours along its red turbid waters, and spreads through openings in its banks over the whole valley and plain. The prophet Amos, ascribed to this time among the people of Israel, metaphorically said that "the land shall be drowned" (i.e., the flood [river] of Egypt) (viii. 8, ix. 5). The rate at which the Nile deposits the alluvial soil of Egypt has been the subject of interesting researches, which have as yet led to no decisive result.

Cultivation. Agriculture, &c. — The ancient prosperity of Egypt is attested by the Bible as well as by the numerous monuments of the country. As early as the age of the Great Pyramid it must have been densely populated and will able to support its inhabitants, for it cannot be supposed that there was then much external traffic. In such a climate the wants of man are few, and nature is liberal in necessary food. Even the Israelites in their hard bondage did "eat freely" the fish and the vegetables and fruits of the country, and ever afterwards they longed to return to the Nile plenty of a land where even now starvation is unknown. The contrast of the present state of Egypt to its former prosperity is more to be ascribed to political than to physical causes. It is true that the branches of the Nile have failed, the canals and the artificial lakes and ponds for fish are dried up; that the reeds and other water plants which were of value in commerce, and a shelter for wild-fowl, have in most parts perished; that the land of Goshen, once, at least for pasture, the best of the land (Gen. xxxvi. 6, 11), is now sand-strung and unwatered as scarcely to be distinguished from the desert around, and that the predictions of the prophets they have thus received a literal fulfillment (see especially Is. xix. 5—10), yet this has not been by any irresistible aggression of nature, but because Egypt, smitten and accursed, has lost all strength and energy. The population is not large enough for the cultivation of the land now fit for culture, and long oppression has taken from it the power and the will to advance.

Egypt is naturally an agricultural country. As far back as the days of Abraham, we find that when the produce failed in Palestine, Egypt was the natural resource. In the time of Joseph it was evidently the granary — at least during famines — of the nations around. The inundation, as taking the place of rain, has rendered the system of agriculture peculiar; and the artificial irrigation during the time of low Nile is necessary on the
same principle. We read of the Land of Promise that it is "not as the land of Egypt, from whence ye came out, where thou sowest thy seed, and waterest [it] with thy foot, as a garden of herbs: [is] a land of hills and valleys, [and] drinketh water of the rain of heaven" (Deut. xi. 10, 11). Watering with the foot may refer to some mode of irrigation by a machine, but we are inclined to think that it is an idiomatic expression implying a laborious work. [Foot, watering with.] The monuments do not afford a representation of the supposed machine. That now called the shadoof,

which is a pole having a weight at one end and a bucket at the other, so hung that the knower is aided by the weight in raising the full bucket, is depicted, and seems to have been the common means of artificial irrigation. There are detailed pictures of breaking up the earth, or ploughing.

The water was brought from reservoirs, sometimes but a few feet from the field, sometimes about a mile distant. The shadoof was commonly used in this manner. It was not the custom to turn the water into the fields in the same manner by irrigation. On the tenure of land much light is thrown by the history of Joseph. Before the famine each city and large village—for thus must be held to have a wider signification than our "city"—had its field (Gen. xil. 48); but Joseph gained for Pharaoh all the land, excepted in the possession of the priests, in exchange for the food, and required for the right thus obtained a fifth of the produce, which became a law (xlvii. 20—26). The evidence of the monuments, though not very explicit, seems to show that this law was ever afterwards in force under the Pharaohs. The earliest records afford no information as to the tenure of land; but about Joseph's time we find frequent mention of villages with their lands, the two being described under one designation, as held by the great officers of the crown, apparently by the royal gift. There does not seem to have been any hereditary aristocracy, except perhaps at an earlier time, and it is not impossible that these lands may have been held during tenure of office or for life. The temples had lands which of course were inalienable. Diodorus Siculus states that all the lands belonged to the crown except those of the priests and the soldiers (i. 73). It is probable that the latter, when not employed, received a salary, or recompense, or held the land for life, but were supported by the crown-lands, and occupied them for the time as their own. [Joseph.]

The great lakes in the north of Egypt were anciently of high importance, especially for their fisheries and the growth of the papyrus. Lake Menzaleh, the most eastern of the existing lakes, has still large fisheries, which support the people who live on its islands and shore, the rude successors of the independent Egyptians of the Biocis. Lake Moris, anciently so celebrated, was an artificial lake between Bence-Suweyt and Medainett El-Fedyoum. It was of use to irrigate the neighboring country, and its fisheries yielded a great revenue. It is now entirely dried up. The canals are now far less numerous than of old, and many of them are choked and comparatively useless. The Bahr Yosif, or "river of Joseph"—not the patriarch, but the famous Sultan Yosif Sahib-eddeken, who repaired it—is a long series of canals, near the desert on the west side of the river, extending northward from Farshoet for about 350 miles to a little below Memphis. This was probably a work of very ancient times. There can be no doubt of the high antiquity of the Canal of the Red Sea, upon which the land of Goshen mainly depended for its fertility. It does not follow, however, that it originally connected the Nile and the Red Sea.

Bebang. — The cultivable land of Egypt consists almost wholly of fields, in which are very few trees. There are no forests and few groves, except of date-palms, and in Lower Egypt a few of orange and lemon-trees. There are also sycamores, mulberry-trees, and acacias, either planted on the sides of roads or standing singly in the fields. The Theban palm grows in the Thebaïs, generally in clumps. These were all, except, perhaps, the mulberry-tree, of old common in the country. The two palms are represented on the monuments, and sycamore and acacia-wood are the materials of various objects made by the ancient inhabitants. The chief fruits are the date, grape, fig, sycamore-fig, pomegranate, banana, many kinds of melons, and the olive; and
there are many others less common or important. These were also of old produced in the country. Anciently gardens seem to have received great attention, to have been elaborately planned, and well

filled with trees and shrubs. Now horticulture is neglected, although the modern inhabitants are so fond of flowers as were their predecessors. The vegetables are of many kinds and excellent, and

form the chief food of the common people. Anciently cattle seem to have been more numerous and their meat, therefore, more usually eaten, but never as much so as in colder climates. The Israelites in the desert, though they looked back to the time when "sat by the flesh pots" (Ex. xvi 31), seem as much to have regretted the vegetables and fruits, as the flesh, and fish of Egypt. What shall give us flesh to eat? We remember the fish which we did eat in Egypt, freely, the cucumbers and the melons, and the leeks, and the onions, and the garlic' (Num. xi. 4, 5). The chief vegetables now are beans, peas, lentils, of which an excellent thick pottage is made (Gen. xxv. 34), leeks, onions garlic, radishes, carrots, cabbages, gourds, cucumbers, the tomato, and the egg-fruit. There are many besides these. The most important field-produce in ancient times was wheat; after it must be placed barley, millet, flax, and among the vegetables, lentils, peas, and beans. At the present day the same is the case; but maize, rice, oats, clover, the sugar-cane, roses, the tobacco-plant, hemp, and cotton, must be added; some of which are not indigenous. In the account of the Plague of Hail

four kinds of field-produce are mentioned — flax, barley, wheat, and ʼתֶּפֶן (Ex. ix. 31, 32), which is variously rendered in the A. V. as 'rice' (l. c.), 'spelt' (Is. xxviii. 25), and 'fitches' (Is. xxviii.,

' It may be well to mention that the writer knows no satisfactory instance of wheat found in ancient

Egyptian tombs having germinated on being sown in our own time.
The lotus or papyrus is almost or quite unknown. Anciently it was a common and most important plant: boats were made of its stalks, and of its thin leaves the famous paper was manufactured. It appears to be mentioned under two names in the Bible, neither of which, however, can be proved to be a peculiar designation for it. (1.) The mother of Moses made נָבָה לָבָנָה, an ark "or "shift" of papyrus "in which to put her child" (Ex. ii. 3), and Isaiah tells of messengers sent apparently from furthest Ethiopia in נַבָּה לָבָנָה "vessels of papyrus" (xxviii. 2), in both cases נבах must mean papyrus, although it would seem in other places to signify "reeds" generically. (2.) Isaiah prophesies "the papyrus-reeds (םְנָבָה) in the river (תְּנֵי), on the edge of the river, and everything growing [lit. sown] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix. 7). Gesenius renders נבָה לָבָנָה a naked or bare place, here grassy places on the banks of the Nile. Apart from the fact that little grass grows on the banks of the Nile, in Egypt, and that little only during the cooler part of the year, instead of those sloping meadows that must have been in the European scholar's mind, this word must mean some product of the river which with the other water-plants should be dried up, and blown away, and utterly disappear. Like the fisheries and the flux mentioned with it, it ought to hold an important place in the commerce of ancient Egypt. It can therefore scarcely be reasonably held to intend anything but the papyrus. The marine and fluvial product יִכְבָּה, from which the Red Sea was called יִכְבָּה יִכְבָּה, will be noticed in art. RED SEA. The lotus was anciently the favorite flower, and at feasts it took the place of the rose among the Greeks and Arabs; it is now very rare.

Zoology. — Of old, Egypt was far more a pastoral country than at present. The neat cattle are still excellent, but lean kine are more common among them than they seem to have been in the days of Joseph's Pharaoh (Gen. xlii. 19). Sheep and goats have always been numerous. Anciently swine were kept, but not in great numbers; now there are none, or scarcely any, except a few in the houses of Copts and Franks. "Under the Pharaohs the horses of the country were in repute among the neighboring nations, who purchased them as well as chariots out of Egypt. Thus it is commanded respecting a king of Israel: "He shall not multiply horses to himself, nor cause the people to return to Egypt, to the end that he should multiply horses: forasmuch as the Lord hath said unto you, Ye shall henceforth return no more that way" (Deut. xvil. 16), — which shows that the trade in horses was with Egypt, and would necessitate a close alliance. "Solomon had horses brought out of Egypt, and fine linen: the king's merchants received the linen yarn at a price. And a chariot came up and went out of Egypt for six hundred [shields] of silver, and an horse for an hundred and fifty; and so for all the kings of the Hittites and for the kings of Syria did they bring [them] out by their hand" (1 K. x. 28, 29). The number of horses kept by this king for chariots and cavalry was large (iv. 25, x. 26; 2 Chr. i. 14, ix. 23). Some of these horses came as yearly tribute from his vessels (1 K. x. 25). In later times the prophets reproved the people for trusting in the help of Egypt, and relying on the aid of her horses and chariots and horsemen, that is, probably, men in chariots, as we shall show in speaking of the Egyptian armies. The kings of the Hittites, mentioned in the passage quoted above, and in the account of the close of the siege of Samaria by Benhadad, where we read — "The Lord hath made the host of the Syrians to hear a noise of chariots, and a noise of horses, [even] the noise of a great host: and they said one to another, Lo, the king of Israel hath hired against us the kings of the Hittites, and the kings of the Egyptians to come upon us" (2 K. vii. 6) — these kings ruled the Hittites of the valley of the Orontes, who were called by the Egyptians SHETIA or KIJEITA. The Pharaohs of the XVIIIth, XIXth, and XXth dynasties waged fierce wars with these Hittites, who were then ruled by a great king and many chiefs, and whose principal arm was a force of chariots resembling those of the Egyptian army. Asses were anciently numerous: the breed at the present time is excellent. Dogs were formerly more praised than now, for being held by most of the Muslims to be extremely unclean, they are only used to watch the houses in the villages. The camel has been long known for its beauty and fine hair, which was mentioned in the inscriptions of Egypt, or represented on the monuments. In the Bible Abraham is spoken of as having camels when in Egypt, apparently as a gift from Pharaoh (Gen. xii. 16); and before the Exodus the camels of Pharaoh or his subjects were to be smitten by the murrain (Ex. ix. 3, comp. 6). Both these Pharaohs were probably Shepherds. The Ishmaelites or Midianites who took Joseph into Egypt, carried their merchandise on camels (Gen. xxvii. 25, 28, 30), and the land-trade of the Arabs must always have been by caravans of camels; but it is probable that camels were not kept in Egypt, but only on the frontier. On the black obelisk from Ninarood, now in the British Museum, which is of Shalmaneser, king of Assyria, contemporary with Jeleu and Hazael, camels are represented among objects sent as tribute by Egypt. They are of the two-humped sort, which, though perhaps then common in Assyria, has never, as far as is known, been kept in Egypt. The desert have always abounded in wild animals, especially of the canine and antelope kinds. Anciently the hippopotamus was found in the Egyptian Nile, and hunted. This is a fact of importance for those who suppose it to be the behemoth of the book of Job, especially as that book shows evidence of a knowledge of Egypt. Now, this animal is rarely seen even in (i. 3), and afterwards double in each case (xlii. 12). The numbers are round, but must be taken as an estimate of a large property of this kind in the patriarchal times.

The number of Solomon's chariots is given as 1400, and his horses 12,000. The stalls of horses are stated at 40,000 (1 K. iv. 26), or 4000 (2 Chr. ix. 25): the former would seem to be the correct number. 43
In Lower Nubia. The elephant may have been, in the remotest historical period, an inhabitant of Egypt, and, as a land animal, have been driven farther south than his brother pygmy, for the name of the Island of Elephantine, just below the first Cataract, is hieroglyphic. 

As Elephants had, it seems to show that he was anciently found there. Bats abound in the temples and tombs, filling the dark and desecrated chambers and passages with the unearthly whirl of their wings. Such desolation is represented by Isaiah when he says that a man shall cast his idols "to the moes and to the bat." (ii. 20).

The birds of Egypt are not remarkable for beauty of plumage; in so open a country this is natural. The Serpents are numerous, but the most common are scorpions, as vultures and the kite. The Grallatrices and Anseres abound on the islands and sandbanks of the river and in the sides of the mountains which approach or touch the stream.

Among the reptiles, the crocodile must be especially mentioned. In the Bible it is usually called מַטְנָה, מַטְנִיתָן, "dragon," a generic word of almost as wide a signification as reptile, and is used as a symbol of the king of Egypt. 7 Thus in Ezekiel, "Behold I am against thee, Pharaoh king of Egypt, the great dragon that lieth in the midst of his rivers, which hath said, My river is mine own, and I have made [it] for myself. But I will put hooks in thy jaws, and I will cause the fish of thy rivers to stick unto thy scales, and I will bring thee up out of the midst of thy rivers, and all the fish of thy rivers shall stick unto thy scales. And I will leave thee [thrown] into the wilderness, thee and all the fish of thy rivers. . . . I have given thee for meat to the beasts of the field and to the fowls of the heaven." (xxiii. 4, 5). Here there seems to be a retrospect of the Exodus, which is thus described in Is. li. 9, 10, and 15: and with a more close resemblance in Ps. xxxiv. 13, 14, "Thou hast divided the sea by thy strength: thou brakest the heads of the dragons (תַּנֵּים) in the waters. Thou brakest the heads of leviathan (לְוִתָהּ) in pieces, [and] gavest him [to be] meat to the dwellers in the wilderness" (בִּשְׁנֵיהוּ; i. e. to the wild beasts, comp. Is. xiii. 21). The last passage is important as indicating that whereas מַטְנָה is the Hebrew generic name of reptiles, and therefore used for the greatest of them, the crocodile, לְוִתָהּ is the special name of that animal. The description of leviathan in Job (xli.) fully bears out this opinion, and it is doubtful if any passage can be adduced in which a wider signification of the latter word is required. 8 In Job (xxvi. 12) there is an apparent allusion to the Exodus in words similar to those in Isaiah (li. 9, 10, and 15?), but with out a mention of the dragon. In this case the division of the sea and the smiting of the serpent, the proud or insolent, are mentioned in connection with the wonders of creation (vv. 7-11, 13): so too in Is. (vv. 13, 15). The crossing of the Red Sea could be thus spoken of as a signal exercise of the Divine power. Frogs are very numerous in Egypt, and their loud and constant croaking in the autumn in "the streams," תַּנֵּים, "the rivers," בַּנֵּים, and "the ponds" or "marshes," הַנָּוֶים (Ex. viii. 1. A. V. 5) makes it not difficult to picture the Plague of Frogs. Serpents and snakes are also common, but the more venomous have their home, like the scorpion, in the desert (comp. Deut. viii. 15). The Nile and lakes have abundance of fishes; and although the fisheries of Egypt have very greatly fallen away, their produce is still a common article of food. Among the insects the locusts must be mentioned, which sometimes come upon the cultivated land in a cloud, and, as in the plague, eat every herb and fruit and leaf where they alight; but they never, as then, overspread the whole land (Ex. x. 3-4, 12-19). They disappear as suddenly as they come, and are carried away by the wind (ver. 19). As to the lice and flies, they are now plagues of Egypt; but it is not certain that the words לְוִתָהּ and לָוֵי designate them (Ex. viii. 16-31).

Ancient Inhabitants. — The old inhabitants of Egypt appear from their monuments and the testimony of ancient writers to have occupied in race a place between the Nigritians and the Caucasians. The constant immigrations of Arab settlers have greatly diminished the Negritian characteristics in the generality of the modern Egyptians. The ancient dress was far more scanty than the modern, and in this matter, as in manners and character, the influence of the Arab race is also very apparent. The ancient Egyptians in character were very religious and contemplative, but given to base superstition, patriotic, respectful to women, insensible, generally frugal, but at times luxurious, very sensual, lying, thievish, treacherous, and craving, and intensely prejudiced, through pride of race, against strangers, although kind to them. This we may much the character of the modern inhabitants, except that Mohammedanism has taken away the respect for women. The ancient Egyptians are indeed the only early eastern nation that we know to have resembled the modern westerns in this particular: but we find the same virtue markedly to characterize the Nigritians of our day. That the Egyptians, in general, treated the Israelites with kindness while they were in their country, even during the oppression, seems almost certain from

a It is supposed by commentators to mean the country also; but this cannot, we think, be proved.  

b Gesenius (Thes. s. v.) would take לְוִתָהּ for a serpent in Job iii. 8, Is. xxvii. 1, and in the latter case supposes the king of Babylon to be meant. In the first passage the meaning "crocodile" is, however, especially applicable. The patriarch speaks of leviathan as those "who are ready to stir up leviathan"; comp. xl. 2: A. V. 16, "None [is so] fierce as to stir him up. Who then can stand before me?" The argument is, that if the creature be so terrible, who shall resist the Creator? The second
the privilege of admission into the congregation in the third generation, granted to them in the Law, with the Edomites, while the Ammonites and Moabites were absolutely excluded, the reference in three out of the four cases being to the stay in Egypt and the entrance into Palestine (Deut. xxiii. 3-5). This supposition is important in its bearing on the history of the opposition.

Language.—The ancient Egyptian language, from the earliest period at which it is known to us, is an agglutinative monosyllabic form of speech. It is expressed by the signs which we call hieroglyphics. The character of the language is compound: it consists of elements resembling those of the Nigritian languages and the Chinese language, on the one hand, and those of the Semitic languages on the other. All those who have studied the African languages make a distinct family of several of those languages, spoken in the northeast quarter of the continent, in which family they include the ancient Egyptian; while every Semitic scholar easily recognizes in Egyptian Semitic pronouns and other elements, and a predominantly Semitic grammar. As in person, character, and religion, so in language we find two distinct elements, mixed but not fused, and here the Nigritian element seems unquestionably the earlier. Bunsen asserts that this language is of Egyptian and Semitic origin, and we think it enough to say that no Semitic scholar has accepted his theory. For a full discussion of the question see The Genesis of the Earth and of Man, ch. vi. As early as the age of the XXVth dynasty a vulgar dialect was expressed in the demotic or chalcographic writing. This dialect forms the link connecting the old language with the Coptic or Christian Egyptian, the latest classic. The Coptic does not very greatly differ from the monumental language, distinguished in the time of the demotic as the sacred dialect, except in the presence of many Greek words.

Religion.—The basis of the religion was Nigritian fetishism, the lowest kind of nature-worship, differing in different parts of the country, and hence obviously indigenous. Upon this were grafted, first, cosmic worship, mixed up with traces of primeval revelation, as in Babylonia; and then, a system of personifications of moral and intellectual abstractions. The instinctive character of the religion necessitates this supposition, and the case with which it admitted extraneous additions in the historical period confirms it. There were three orders of gods—the eight great gods, the twelve lesser, and the Osirian group. They were represented in human forms, sometimes having the heads of animals sacred to them, or bearing on their heads cosmic or other objects of worship. The fetishism included, besides the worship of animals, that of plants and the rocks, hills, or mountains, and all nature. The worship of deified kings and other individuals often received divine honors—in one case, that of Sesertesen III., of the XIIth dynasty, the old Sesostris, of a very special character. Sacrifices of animals, and offerings of all kinds of food, and libations of wine, oil, and the like, were made. The great doctrines of the immortality of the soul, man’s responsibility, and future punishments and rewards, were taught. Among the rites circumcision is the most remarkable: it is as old as the time of the IVth dynasty.

The Israelites in Egypt appear during the oppression, for the most part, to have adopted the Egyptian religion (Josh. xxiv. 14; Ex. xx. 7, 8). The golden calf, or rather steer, was probably taken from the bull Apis, certainly from one of the sacred bulls. Remphan and Chim were foreign divinities adopted into the Egyptian pantheon, and called in the hieroglyphics REMPNU (probably pronounced REMPU) and KEN. It can hardly be doubted that they were worshiped by the Shepherds; but there is no satisfactory evidence that there was any separate foreign system of idolatry. [Remphan.] Ashethoreth was worshiped at Memphis, as is shown by a tablet of Amenophis II., &c. c. cir. 1400, at the quarries of Turia, opposite that city (Veys’s Pyramids, iii. “Fourah tablet 2”), in which she is represented as an Egyptian goddess. The temple of “the Foreign Venus” in “the Tyrian camp” in Memphis (Herod. ii. 112) must have been sacred to her. Doubtless this worship was introduced by the Phcenician Shepherds.

As there are prominent traces of primeval revelation in the ancient Egyptian religion, we cannot be surprised at finding certain analogies to the Mosaic Law, apart from the probability that what is expressed in a comparable form in the Canaanite and Egyptian religions and usages would be retained. The points in which the Egyptian religion shows strong traces of truth are, however, doctrines of the very kind that the Law does not expressly teach. The Egyptian religion, in its reference to man, was a system of responsibility, mainly depending on future rewards and punishments. The Law, in its reference to man, was a system of responsibility mainly depending on temporal rewards and punishments. All we learn, but this is of the utmost importance, is that every Israelite who came out of Egypt must have been fully acquainted with the universally-recognized doctrines of the immortality of the soul, man’s responsibility, and future rewards and punishments, truths which the Law does not, and of course could not, contradict. The idea that the Law was an Egyptian invention is one of the worst examples of modern reckless criticism.

Laws.—We have no complete account of the laws of the ancient Egyptians either in their own records or in works of ancient writers. The passages in the Bible which throw light upon the laws in force during the sojourn of the Israelites in Egypt most probably do not relate purely to native law, nor to law administered to natives, for during that whole period they appear to have been under Shepherd rulers, and in any case it cannot be doubted that they would not be subject to absolutely the same system as the Egyptians. The paintings and sculptures of the monuments indicate a very high degree of personal safety, showing us that the people of all ranks commonly went unarmed, and that neither military protection nor justice therefore infer that the laws relating to the maintenance of order were sufficient and strictly enforced. The punishments seem to have been lighter than those of the Mosaic Law, and very different in their relation to crime and in their nature. Capital punishment appears to have been almost restricted, in practice, to murder. Crimes of violence were more severely treated than offenses against religion and morals. Popular feeling seems to have taken the duties of the judge upon himself in the case of impurity alone. That in early times the Egyptian populace acted with reference to any offense against its religion as it did under the Greeks and Romans.
is evident from the answer of Moses when Pharaoh proposed that the Hebrews should sacrifice in the land. "It is not meet so to do; for we shall sacrifice the abomination of the Egyptians to the Lord our God: lo, shall we sacrifice the abomination of the Egyptians before their eyes, and will they not stone us?" (Ex. vii. 20).

Government. — The government was monarchical, but not of an absolute character. The sovereign was not superior to the laws, and the priests had the power to check the undue exercise of his authority. The kings under whom the Israelites lived, seem to have been absolute, but even Joseph's Pharaoh did not venture to touch the independence of the priests. Nomes and districts were governed by officers whom the Greeks called monarchs and toparchs. There seems to have been no hereditary aristocracy, except perhaps at the earliest period, for indications of something of the kind occur in the inscriptions of the IVth and Xlth dynasties.

Foreign Policy. — The foreign policy of the Egyptians must be regarded in its relation to the admission of foreigners into Egypt and to the treatment of tributary and allied nations. In the former aspect it was characterized by an exclusiveness which sprang from a national hatred of the yellow and white races, and was maintained by the wisdom of preserving the institutions of the country from the influence of the pirates of the Mediterranean and the Indian Ocean, and the robbers of the deserts. Hence the jealous exclusion of the Greeks from the northern parts until Nauracitis was opened to them, and hence too the restriction of Siennite settlers in earlier times to the land of Goshen, scarcely regarded as part of Egypt. It may be remarked as a proof of the strictness of this policy that during the whole of the sovereign of the Israelites they appear to have been kept to Goshen. The key to the policy towards foreign nations, after making allowance for the hatred of the yellow and white races balanced by the regard for the red and black, is found in the position of the great oriental rivals of Egypt. The supremacy or influence of the Pharaohs over the nations lying between the Nile and the Euphrates depended as much on wisdom in policy as prowess in arms. The kings of the IVth, VIth, and Xlth dynasties appear to have uninterruptedly held the peninsula of Sinai, where tablets reveal to us the existence of Asiatic nomads. But with the XlVth dynasty commences the period of Egyptian supremacy. Very soon after the accession of this powerful line most of the countries between the Egyptian border and the Tigris were reduced to the condition of tributaries. The empire seems to have lasted for nearly three centuries, from about B. C. 1550 to about 1200. The chief opponents of the Egyptians were the Hittites of the valley of the Orontes, with whom the Pharaohs waged long and fierce wars. After this time the influence of Egypt declined; and until the reign of Shishak (n. c. cir. 990-967), it appears to have been confined to the western borders of Palestine. No doubt the rising greatness of Assyria caused the decline. Thenceforward to the days of Pharaoh Necho there was a constant struggle for the tracts lying between Egypt, and Assyria and Babylonia, until the disastrous battle of Carchemish finally destroyed the supremacy of the Pharaohs. It is probable that during the period of the empire an Assyrian or Babylonian king generally supported the opponents of the rulers of Egypt. Great aid from a powerful ally can indeed alone explain the strong resistance offered by the Hittites. The general policy of the Egyptians towards their eastern tributaries seems to have been marked by great moderation. The Pharaohs intermarried with them, and neither forced upon them Egyptian garrisons, except in some important positions, nor attempted those deportations that are so marked a feature of Asiatic policy. In the case of those nations which never attacked them they do not appear to have even exacted tribute. So long as their general supremacy was uncontested, they would not be unwise enough to make favorable or neutral powers their enemies. Of their relation to the Israelites we have for the earlier part of this period no direct information. The explicit account of the later part is fully consistent with what we have said of the general policy of the Pharaohs. Shishak and Zerah, if the latter were, as we believe, a king of Egypt, or a commander of Egyptian forces, are the only exceptions in a series of friendly kings, and they were almost certainly of Assyrian or Babylonian extraction. One Pharaoh gave his daughter in marriage to Solomon; another appears to have been the ally of Jehoram, king of Israel (2 K. vii. 6); So made a treaty with Hoshen; Tiribah aid Hezekiah; Pharaoh Necho fought Josiah against his will, and did not treat Judah with the severity of the oriental kings; and his second successor, Pharaoh Hophran maintained the alliance, notwithstanding this break, as firmly as before, and although failed in his endeavor to save Jerusalem from the Chaldeans, received the fugitives of Judah, who, like the fugitives of Israel at the capture of Samaria, took refuge in Egypt. It is probable that during the earlier period the same friendly relations existed. The Hebrew records of that time afford no distinct indication of hostility with Egypt, nor have the Egyptian lists of conquered regions and towns of the same age been found to contain any Israelite name, whereas in Shishak's list the kingdom of Judah and some of its towns occur. The route of the earlier Pharaohs to the east seems always to have been along the Palestinian coast, then mainly held by the Philistines and Phoenicians, both of whom they subdued, and across Syria northward of the territories occupied by the Hebrews. With respect to the African nations a different policy appears to have been pursued. The Rhod (Leban) or Libin, to the west of Egypt, on the north coast, were reduced to subjection, and probably employed, like the Shayerata or Cherehim, as mercenaries. Ethiopia was made a purely Egyptian province, ruled by a viceroy, "the Prince of Kesh (Cush)," and the assimilation was so complete that Egyptian sovereigns seem to have been received by the Egyptians as native rulers. Further south, the Nubians were subject to predatory attacks like the slave hunts of modern times, conducted not so much from motives of hostility as to obtain a supply of slaves. In the Bible we find African peoples, Libin, Phut, Sakkim, Cush, as mercenaries or servants of Egypt, but not a single name that can be positively placed to the eastward of that country.

Army. — There are some notices of the Egyptian army in the O. T. They show, like the monuments, that its most important branch was the chariot-force. The Pharaoh of Egypt had besides his chariot-force besides his whole chariot-force in pursuit of the Israelites. The warriors fighting in chariots are probably the "horsemen" mentioned in the relation of this event and elsewhere, for in Egyptian
they are called the "horse" or "cavalry." We have no subsequent indication in the Bible of the constitution of an Egyptian army until the time of the XXII dynasty, when we find that Shishak's invading force was partly composed of foreigners; whether mercenaries or allies, cannot as yet be positively determined, although the monuments make it most probable that they were of the former character. The army of Necho, defeated at Car- okrithemish, seems to have been similarly composed, although it probably contained Greek mercenaries who soon afterwards became the most important foreign element in the Egyptian forces.

Domestic Life. — The sculptures and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir G. Wilkinson's great work. What most strikes us in their manners is the high position occupied by women, and the entire absence of the harem-system of seclusion. The wife is called

"the lady of the house." Marriage appears to have been universal, at least with the richer class; and if polygamy were tolerated it was rarely practiced. If marriage-ceremonies no distinct account has been discovered, but there is evidence that something of the kind was usual in the case of a queen (De Rougé, Essai sur une Statue Égyptienne, pp. 53, 54). Concubinage was allowed, the concubines taking the place of inferior wives. There were no slaves, although great classes were very distinct, especially the priests, soldiers, artisans, and herdsmen, with laborers. A man of the upper class might, however, both hold a command in the army and be a priest; and therefore the caste-system cannot have strictly applied in the case of the subordinates. The general manner of life does not much illustrate that of the Israelites, from its great essential difference. The Egyptians from the days of Abraham were a settled people, occupying a land which they had held for centuries without question,
Disciplined troops of the time of the XVIIIth Dynasty. (Wilkinson.)
The simple arts of Egypt and of Palestine would be as different as the ordinary diseases of the country. In the arts of architecture, sculpture, and painting, the formers of which was the chief, there seems to have been but a very slight and material influence. This was natural, for with the Egyptians architecture was a religious art, embodying the methods of some of their highest religious conceptions, and mainly devoted to the service of religion. Durable construction, massive and grand form, and rich, though sober, color, characterize their temples and tombs, the abodes of gods, and "homes" of men. To adopt such an architecture would have been to adopt the religion of Egypt, and the pastoral Israelites had no need of buildings. When they came into the Promised Land they found cities ready for their occupation, and it was not until the days of Solomon that a temple took the place of the tent, which was the sanctuary of the pastoral people. Details of ornament were of course borrowed from Egypt; but separated from the vast system in which they were found, they lost their significance, and became harmless, until modern scholars made them prominent in support of a theory which no mind capable of broad views can for a moment tolerate.

Magicians. — We find frequent reference in the Bible to the magicians of Egypt. The Pharaoh of Joseph laid his dream before the magicians, who could not interpret it (Gen. xii. 8); the Pharaoh of the Exodus used them as opponents of Moses and Aaron, when, after what appears to have been a seeming success, they failed as before (Ex. vii. 11, 12, 22, viii. 18, 19, ix. 1; 2 Tim. iii. 8, 9). The monuments do not recognize any such art, and we must conclude that magic was secretly practiced, not because it was sought to be unlawful, but in order to give it importance. [See Magic; Jannes; Jareb; Jub.]

Industrial Arts. — The industrial arts held an important place in the occupations of the Egyptians. The workers in fine flax and the weavers of white linen are mentioned in a manner that shows they were among the chief contributors to the riches of the country (Is. xix. 9). The fine linen of Egypt found its way to Palestine (Prov. vii. 18). Pottery was a great branch of the native manufactures, and appears to have furnished employment to the Hebrews during the bondage (Ps. lxxxii. 6, lviii. 13; comp. Ex. i. 14).

Festivals. — The religious festivals were numerous, and some of them were, in the days of Herodotus, kept with great merrymaking and license. His description of that of the goddess Bubastis, kept at the city of Bubastis in the eastern part of the Delta, would well apply to some of the great Mohammedan festivals now held in the country (ii. 59, 60). The feast which the Israelites celebrated when Aaron had made the golden calf seems to have been very much of the same character: first offerings were presented, and then the people ate and danced and sang (Ex. xxxix. 5, 6, 17, 18, 19), and even, it seems, stripped themselves (ver. 25), as appears to have been not unusual at the popular ancient Egyptian festivals. [See Egyptian Inhabitants.]

The manners of the modern inhabitants are, we are disposed to believe after much consideration, more similar to those of the ancient Hebrews, on account of Arab influence, than the manners of their predecessors. How remarkably they illustrate the Bible is seen in the numerous references given in the Modern Egyptian (see its index), and in the great general value of that work in biblical criticism.

Chronology and History. — In treating of the chronology and history of ancient Egypt it is our endeavor to avoid as much as possible the statement of doubtful matters, and to give the greater prominence to those points on which the generality of scholars are agreed. The subject may be divided into three main branches, technical chronology, historical chronology, and history:

1. Technical Chronology. — It is impossible here to treat in much detail the difficult subject of Egyptian technical chronology. That the Egyptians used various periods of time, and made astronomical observations from a remote age, is equally attested by ancient writers, and by their monuments. It is, however, very difficult to connect periods mentioned by the former with the indications of the same kind offered by the latter; and what we may term the recorded observations of the monuments cannot be used for the determination of chronology without a previous knowledge of Egyptian astronomy that we have not wholly attained. The testimony of ancient writers must, moreover, be carefully sifted, and we must not take their statements as a positive basis without the strongest evidence of correctness. Without that testimony, however, we could not at present prosecute the inquiry. The Egyptians do not appear to have had any common era. Every document that bears the date of a year, gives the year of the reigning sovereign, counted from that year in which he came to the throne, which was called his first year. There is therefore no general means of testing deductions from the chronological indications of the monuments. There appear to have been at least three years in use with the Egyptians before the Roman domination, the Vague Year, the Tropical Year, and the Sothic Year; but it is not probable that more than two of these were employed at the same time. The Vague Year contained 365 days without any additional fraction, and therefore passed through all the seasons in about 5000 years. It was both used for civil and for religious purposes. Probably the Israelites adopted this year during the sojourn in Egypt, and that instituted at the Exodus appears to have been the current Vague Year fixed by the adoption of a method of intercalation. [Chronology.] The Vague Year was divided into twelve months, each of thirty days, with five epagomenae, or additional days, after the twelfth. The months were assigned to three seasons, each comprising four months, called respectively the 1st, 2d, 3d, and 4th of those seasons. The names by which the Egyptian months are commonly known, Thoth, Paophi, &c., are taken from the diaries to which they were sacred. The seasons are called, according to our rendering, those of Vegetation, Manifestation, and the Waters or the Inundation: the exact meaning of their names has however been much disputed. They evidently refer to the phenomena of a Tropical Year, and such a year we must therefore conclude the Egyptians to have had, at least in a remote period of their history. If, as we believe, the third season represents the period of the inundation, its beginning cannot be dated without one month before the autumnal equinox, which would place the beginning of the year at the Winter Solstice, an especially fit time in Egypt for the commencement of a tropical year. The Sothic Year was a supposed sidereal year of 365 1/4 days, commencing with
the so-called heliacal rising of Sothis. The Vague Year, having no intercalation, constantly retreated through the Sothic Year, until a period of 1461 years of the former kind, and 1460 of the latter had elapsed, from one coincidence of commencements to another.

The Egyptians are known to have used two great cycles, the Sothic Cycle and the Tropical Cycle. The former was a cycle of the coincidence of the Sothic and Vague Years, and therefore consisted of 1460 years of the former kind. This cycle is mentioned by ancient writers, and two of its commencements recorded, the one, called the Era of Menophres, July 29, a. c. 1322, and the other, on the same day, A. D. 1329. Menophres is supposed to be the name of an Egyptian king, and this is most probable. The nearest name is Men-phant, or Mem-pitah, which is part of that of Sebec Mem-phant, the father of Rameses II, and also that of the son of the latter, all these being kings of the XIXth dynasty. We are of opinion that chronological indications are conclusive in favor of the earlier of the two sovereigns. The Tropical Cycle was a cycle of the coincidence of the Tropical and Vague Years.

We do not know the exact length of the former year with the Egyptians, nor indeed that it was used in the monumental age; but from the mention of a period of 500 years, the third of the cycle, and the apparent rising of Venus, which the Vague Year would retrograde through one season, we cannot doubt that there was such a cycle, not to speak of its analogy with the Sothic Cycle. It has been supposed by M. Biot to have had a duration of 1565 years; but the length of 1500 Vague Years is preferable, since it contains a number of complete lunations, besides that the Egyptians could scarcely have been more exact, and that the period of 500 years is a subdivision of 1500. Ancient writers do not fix any commencements of this cycle. If the characteristics of the Tropical Year are what we suppose, the cycle would have begun a. c. 2003 and 507; two hieroglyphic inscriptions record, as we believe, the former of these epochs (Herod. Antiq. p. 12 H., pl. i. Nos. 5, 6). The return of the Phenix has indubitably a chronological meaning. It has been supposed to refer to the period last mentioned, but we are of opinion that the Phenix Cycle was of exactly the same character, and therefore length, as the Sothic, its commencement being marked by the so-called heliacal rising of a star of the constellation Bexn. Heiiar, "the Phenix of Osiris," which is placed in the astronomical ceiling of the temple of Khnum six months distant from Sothis. The monuments make mention of Panegyrical Months, which can only, we believe, be periods of thirty years each, and division of a year of the same kind. We have computed the following dates of commencements of these Panegyrical Months: 1st. a. c. 2717, first dynasty, era of Menes (not on monuments); 2d. a. c. 2352, IVth dynasty, Nophis, I and II; 3d. a. c. 1886 (XVIIth dynasty, Nesertesen III.; not on monuments); the last mentioned date being also the beginning of a Phenix Cycle, which appears to have comprised four of these Panegyrical Years. The other important dates of the system of Panegyrical Years are given on the monuments: a. c. 1412, XVIIIth dynasty, Queen Amen-emnet; and a. c. 1412, XVIIIth dynasty, Thothmes III.

Certain phenomena recorded on the monuments have been calculated by M. Biot, who has obtained the following dates: Rising of Sothis in reign of Thothmes III., XVIIth dynasty, a. c. 1445; supposed Vernal Equinox, Thothmes III., e. c. 1441; rising of Sothis, Rameses III., XXth dynasty, a. c. 1301; star-risings, Rameses VI. and IXth, XXth dynasty, n. c. 1241. Some causes of uncertainty affect the exactness of these dates, and that of Thothmes III. On the other hand, we hold the calendar in which the inscription supposed to record it occurs to be a Sothic one, in which case no date could be obtained.

Egyptian technical chronology gives us no direct evidence in favor of the high antiquity which some assign to the foundation of the first kingdom. The earliest record which all Egyptians are agreed to regard as affording a date is of the fifteenth century B. C., and no one has alleged any such record to be of any earlier time than the twenty-fourth century n. c. The Egyptians themselves seem to have placed the beginning of the 1st dynasty in the twenty-eighth century B. C., but for determining this epoch there is no direct monumental evidence.

2. Historical Chronology. — The materials for historical chronology are the monuments and the remains of the historical work of Manetho. Since the interpretation of hieroglyphics has been discovered, the evidence of the monuments has been brought to bear on this subject, but as yet it has not been sufficiently full and explicit to enable us to set aside other aids. We have had to look elsewhere for a general frame-work, the details of which the monuments might fill up. The remains of Manetho are now generally held to supply this want. A comparison with the monuments has shown that he drew his information from original sources, the general authenticity of which is vindicated by minute points of agreement. The information Manetho gives us, in the present form of his work, is, however, by no means explicit, and it is only by a theoretical arrangement of the materials that they take a definite form. The remains of Manetho's historical work consist of a list of the Egyptian dynasties and two considerable fragments, one relating to the Shepherds, the other to a tale of the Exodus. The list is only known to us in the epitome given by A. Hyginus, preserved by Scaliger, and that given by Eusebius. These present such great differences that it is not reasonable to hope that we can restore a correct text. The series of dynasties is given as if they were successive, in which case the commencement of the first would be placed full 5000 years n. c., and the reign of the king who built the Great Pyramid, 4000. The monuments do not warrant so extreme an antiquity, and a majority of critical and contemporary authorities bear held that the dynasties were partly contemporaneous. A passage in the fragment of Manetho respecting the Shepherds, where he speaks of the kings of the Thebais and of the rest of Egypt rising against these foreign rulers, makes it almost certain that he admitted at least three contemporary lines at that period (Joseph. c. Apion. i. 14). The naming of the dynasties anterior to the time of a certain single kingdom, and that of the later ones, which we know to have generally held sway over all Egypt, or the first seventeen, and the XVIIth and following dynasties, lends support to this opinion. The former are named in groups, first a group of Thinite, then one of Memphites, broken by a dynasty of Elephant-
lutes, next a Herculeopolite line, &c., the dynasties of a particular city being grouped together; whereas the latter generally present but one or two together of the same name, and the dynasties of different cities recur. The earlier portion seems therefore to represent parallel lines, the latter, a succession. The evidence of the monuments leads to the same conclusion. Kings who unquestionably belong to different dynasties are shown by them to be contemporaneous. In the present state of Egyptology this evidence has led to various results as to the number of contemporary dynasties, and the consequent duration of the whole history. One great difficulty is that the character of the inscriptions makes it impossible to ascertain, without the explicit mention of two sovereigns, that any one king was not a sole ruler. For example, it has been lately discovered that the XXIth dynasty was for the greatest part of its rule a double line. Yet its numerous monuments in general give no hint of more than one king, although there was almost always a recognized colleague. Therefore, à fortiori, no notice would be taken, if possible, on any monument of a ruler of another house than that of the king in whose territory it was made. We can therefore scarcely expect very full evidence on this subject. Mr. Lane, as long ago as 1839, proposed an arrangement of the dynasties based upon their numbers and names. This scheme the writer believes to be strikingly confirmed by the monuments. The table in the following page contains the dynasties thus arranged, with the approximate dates we assign to their commencement, and the dates of chief events in Hebrew history connected with that of Egypt, according to the system preferred in art. CHRONOLOGY.

The monuments will not, in our opinion, justify any great extension of the period assigned in the table to the first seventeen dynasties. The last date, that of the commencement of the XVIIIth dynasty, cannot be changed more than a few years. Baron Bunsen and Dr. Lepsius indeed place it much earlier, but they do so in opposition to positive monumental evidence. The date of the beginning of the Ist dynasty, which we are disposed to place a little before B.C. 2700, is more doubtful, but a concurrence of astronomical evidence points to the twenty-ninth century of the Christian era. The dates assigned to the two dates cannot therefore be greatly more or less than twelve hundred years, a period quite in accordance with the lengths of the dynasties according to the better text, if the arrangement here given be correct. Some have supposed a much greater antiquity for the commencement of Egyptian history. Lepsius places the accession of Menes u. c. 3832, and Bunsen, two hundred years later. Their system is founded upon a passage in the chronological work of Manetho called Egyp(a). 555 to the thirty dynasties (Chron. p. 51 u). It is by no means certain that this number is given on the authority of Manetho, but apart from this, the whole statement is unmistakably not from the true Manetho, but from some one of the fabricators of chronology, among whom the Pseudo-Manetho held a prominent place (Enc. Brit. 8th ed. Egypt, p. 452; Quarterly Review, No. 210, p. 385-7). If this number be discarded as doubtful or spurious, there is nothing definite to support the extended system so confidently put forth by those who adopt it.

3. History. — Passing from chronology to history, we have first to notice the indications in the Bible which relate to the earliest period. That Egypt was colonized by the descendants of Noah in a very remote age is shown by the mention of the migration of the Philistines from Caphtor which had taken place before the arrival of Abraham in Palestine. Before this migration could occur, the Caphtorim or the Pharaohs, who possessed Egypt for some time. A remarkable passage points to a knowledge of the date at which an ancient city of Egypt was founded: "Hebron was built seven years before Zoan in Egypt" (Num. xiii. 22). We find that Hebron was originally called Kirjath-arba, and it was a city of the Anakim (Josh. xiv. 15), and it is mentioned under that appellation in the history of Abraham (Gen. xviii. 2); it had therefore been founded by the giant-race before the days of that search.

The evidence of the Egyptians as to the primeval history of their race and country is extremely indefinite. They seem to have separated mankind into two great stocks, and each of these again into two branches, for they appear to have represented themselves and the Negroes, the red and black races, as the children of the god Horus, and the Semites and Europeans, the yellow and white races, as the children of the goddess Pesht (comp. Brugsch, Gesch. der Volker, ii. 109, 111). They seem therefore to have held a double origin of the species. The absence of any important traditional period is very remarkable in the fragments of Egyptian history. These commence with the divine dynasties, and pass abruptly to the human dynasties. The latest portion of the first may indeed be traditional, not mythical; and the earliest part of the second may be traditional and not historical, though this last conjecture we are hardly disposed to admit. In any case, however, there is a very short and extremely obscure time of tradition, and at no great distance from the earliest date at which it can be held to end we come upon the clear light of history in the days of the pyramids. The indications of a sudden change of seat, and the settlement in Egypt of a civilized race, which, either wishing to be believed autocratic, or having lost all ties that could keep up the traditions of its first dwelling-place, filled up the commencement of its history with materials drawn from mythology. There is no trace of the tradition of the Deluge which is found in almost every other country of the world. The priests are indeed reported to have told Solon when he spoke of one deluge that many had occurred (Plat. Tim. 23), but the reference is more likely to have been to great floods of the Nile than to any extraordinary catastrophes.

The history of the dynasties preceding the XVIIIth is not told by any continuous series of monuments. There are no monuments of those two dynasties, the XXIst and XXIIInd, there are scarcely any records of the age left to the present day, and hence in a great measure arises the difficulty of determining the chronology. From the times of Menes, the first king, until the Shepherd-invasion, Egypt seems to have enjoyed perfect tranquillity. During this age the Memphite line was the most powerful, and by it, under the IVth dynasty, were the most famous pyramids raised. The Shepherds were foreigners who came from the East, and God made them known to Manetho, gained the rule of Egypt. Those whose kings composed the XVIth dynasty were the first and most important. They appear to have been Phcenicians, and it is probable that their migration into Egypt, and

</table>
ence at last into Palestine, was part of the great movement to which the coming of the Phoenicians from the Erythrean Sea, and the Philistines from Caphtor, belong. It is not impossible that the head of the four kings — Chedorlaomer and his allies — was directed against the power of the kings of the XVth dynasty. Most probably the Pharaoh of Abra-

ham was of this line, which lived at Memphis, and at the great fort or camp of Avaris on the eastern frontier. The period of Egyptian history to which the Shepherd-invasion should be assigned is a point of dispute. It is generally placed after the XIIth dynasty; for it is argued that this powerful line could not have reigned at the same time as one or more Shepherd-dynasties. We are of opinion that this objection is not valid, and that the Shepherd-invasion was anterior to the XIith dynasty. It is not certain that the foreigners were at the outset hostile to the Egyptians, for they may have come in by marriage, and it is by no means unlikely that they may have been long in a position of secondary importance. The rule of the XIIth dy-

nasty, which was of Thebans, lasting about 160 years, was a period of prosperity to Egypt, but after its close those calamities appear to have occurred which made the Shepherds hated by the Egyptians. During the interval to the XVIIth dynasty there seems to have been no native line of any importance but that of the Thebans, and more than one Shepherd dynasty exercised a severe rule over the Egyptians. The paucity of the monuments proves the troubled nature of this period.

We must here notice the history of the Israelites in Egypt with reference to the dynasty of the Pharaohs who favored them, and that of their oppressors. According to the scheme of Biblical Chronology which we believe to be the most prob-

able [Chronology], the whole sojourn in Egypt would belong to the period before the XVIIth dy-

nasty. The Israelites would have come in and gone forth during that obscure age for the history of which we have little or no monumental evidence. This would explain the absence of any positive mention of them on the Egyptian monuments. Some assert that they were an unimportant Arab tribe, and therefore would not be mentioned, and that the calamities attending their departure could not be commemorated. These two propositions are essentially incompatible. It is, of course, possible that as Lespieux supposes, the Israelites came in under the XVIIth dynasty, and went out under the XIXth, or, if as Bunsen holds, they came in under the XIIth, and (after a sojourn of 1434 years!) went out under the XIXth, the oppression in both cases falling in a period of which we have abundant contemporary monuments, sometimes the records of every year, it is impossible that the monuments should be wholly silent if the Biblical narrative is true. Let us examine the details of that narrative. At the time to which we should assign Joseph's rule, Egypt was under Shepherds, and Egyptian kings of no great strength. Since the Pharaoh of Joseph must have been a powerful ruler and held Lower Egypt, there can be no question that he was, if the dates be correct, a Shepherd of the XVth dynasty. How does the Biblical evidence affect this inference? Nothing is more striking throughout the ancient Egyptian dynasties than the frequency with which the names of most foreigners, especially Easterns. They are con-

stantly spoken of in the same terms as the inhabit-

ants of the inferior regions, not 'done when at war with the Pharaohs, but in time of peace and in the case of friendly nations. It is a feeling alone parallel in our days by that of the Chinese. The accounts of the Greek writers, and the whole history of the later period, abundantly confirm this estimate of the prejudice of the Egyptians against foreigners. It seems to us perfectly incredible that Joseph should be the minister of an Egyptian king. In lesser particulars the evidence is not less strong. The Pharaoh of Joseph is a despot, whose will is law, who kills and pardons at his pleasure, who not only raises a foreign slave to the head of his ad-

ministration, but through his means makes all the Egyptians, except the priests, serfs of the crown. The Egyptian kings on the contrary were restrained by the laws, shared the public dislike of foreigners, and would have avoided the very policy Joseph fol-

lowed, which would have weakened the attachment of their fellow-countrymen by the lessening of local ties and complete reducing to bondage of the popu-

lation, although it would have greatly strengthened the power of an alien sovereign. Pharaoh's conduct towards Joseph's family points to the same conclu-

sion. He gladly invites the strangers, and gives them leave to dwell, not among the Egyptians, but in Goshen, where his own cattle seem to have been (Gen. xlv. 34, xlvii. 6). His acts indicate a fellow-

feeling and a desire to strengthen himself against the national party.

The 'new king' 'which knew not Joseph,' as generally thought by those who hold with us as to the previous history, to have been an Egyptian, and head of the XVIIth dynasty. It seems at first sight extremely probable that the king who crushed, if he did not expel, the Shepherds, would be the first oppressor of the nation which they pro-

tected. Plausible as this theory appears, a close examination of the Bible-narrative seems to us to overthrow it. We read of the new king that — "he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them: lest they multiply, and it come to pass, that when there be fitting out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (Ex. i. 9, 10). The Israelites are there-

fore more and stronger than the people of the oppressor, the oppressor fears war in Egypt, and that the Israelites would join his enemies; he is not only strong enough to adopt one of the Egyptian systems, but uses a subtle system to reduce them by making them perform forced labor, and soon after takes the stronger measure of killing their male children. These conditions point to a divided country and a weak kingdom, and cannot, we think, apply to the time of the XVIIIth and XIXth dynasties. The whole narrative of subsequent events to the Exodus is consistent with this conclusion, to which the use of universal terms does not offer any real objection. When all Egypt is spoken of, it is not necessary either in Hebrew or in Egyptian that we should suppose the entire country to be strictly intended. If we conclude therefore that the Exodus most probably occurred before the XVIIIth dynasty, we have to ascertain, if possible, whether the Pharaohs of the oppression appear to have been Egyptians or Shepherds. The change of policy is in favor of their having been Egyptians, but is by no means conclusive, for there is no reason to suppose that all the for-

eigners should have had the same feeling toward the Israelites; and we have already seen that the Egyptian Pharaohs and their subjects seem in
general to have been friendly to them throughout their history, and that the Egyptians were privileged by the Law, apparently on this account. It may be questioned whether the friendship of the two nations, even if merely a matter of policy, would have been as enduring as we know it to have been, had the Egyptians looked back on their conditions of slavery as the result of great national calamities, or had the Israelites looked back upon the persecution as the work of the Egyptians. If the chronology be correct, we can only decide in favor of the Shepherds. During the time to which the events are assigned there were no important lines but the Theban, and one or more of Shepherds. Lower Egypt, and especially its eastern part, must have been in the hands of the latter. The land of Goshen was in the eastern part of Lower Egypt; it was wholly under the control of the oppressors, whose capital, or royal residence, at least in the case of the Pharaoh of the Exodus, lay very near to it. Manetho, according to the transcript of Africanus, speaks of three Shepherd-dynasties, the XVth, XVIth, and XVIIth, the last of which, according to the present text, was of Shepherds and Thebans, but this is probably incorrect, and the dynasty should rather be considered as Shepherd alone. It is difficult to choose between these three: a passage in Isaiah, however, which has been strangely overlooked, seems to afford an indication which narrows the choice. "My people went down aforetime into Egypt to sojourn there; and the Assyrian oppressed them without cause" (ii. 4). This indicates that the oppressor was an Assyrian, and therefore not of the XVth dynasty, which, according to Manetho, in the epitomes, was of Thebans. In the Papyrus, (ed. Wilkinson) are two which appear to be Assyrian, so that we may reasonably suppose that some of the foreign rulers were of that race. It is not possible at present to decide whether they were of the XVth or the XVIth dynasty. It cannot be objected to the explanation we have offered that the title "Pharaoh" is an epithet belonging to any of the Israelites, and that they must therefore have been natives, for it is almost certain that at least some of the Shepherd-kings were Egyptianized, as Joseph, who received an Egyptian name, and Moses, who was supposed by the daughters of Jethro to be an Egyptian (Ex. ii. 19). It has been urged by the opponents of the chronological schemes that place the Exodus before the later part of the fourteenth century B.C., that the conquests of the Pharaohs of the XVIIth, XVIth, and XVth dynasties would have involved collisions with the Israelites had they been in those times already established in Palestine, whereas neither the Bible nor the monuments of Egypt indicate any such event. It has been over- looked by the advocates of the Rabbinical date of the Exodus that the absence of any positive Palestinian names, except that of the Philistines, in the lists of peoples and places subject to these Pharaohs, and in the records of their wars, entirely destroys their argument, for while it shows that they did not conquer Palestine, it makes it impossible for us to decide on Egyptian evidence whether the Hebrews were then in that country or not. Shishak's list, on the contrary, presents several well-known names of towns in Palestine, besides that of the kingdom of Judah. The policy of the Pharaoths, as previously explained, is the key to their conduct towards the Israelites. At the same time the character of the portions of the Bible relating to this period prevents our being sure that the Egyptians may not have passed through the country, and even put the Israelites to tribute. It is illustrative of the whole question under consideration, that in the most flourishing days of the sole kingdom of Israel, Shishak showed himself under the influence of Jacobites, and captured the Canaanite city Gezer at no great distance from Jerusalem, and that this should be merely incidentally mentioned at a later time instead of being noticed in the regular course of the narrative (1 K. ix. 13, 16).

The main arguments for the Rabbinical or latest date of the Exodus have been discussed in a previous article (Συναγωγα). The objections to a much earlier date, that of B.C. 1652, may be considered as favorable to the latest rather than to Usher's date, although not unfavorable to both. The main objection to these, in our opinion, is that the details of the Biblical narrative do not, even with the utmost latitude of interpretation, agree with the history of the country if the Exodus be supposed to have taken place under the XVIIIth or XIXth dynasty. As to the account of the Exodus given by Manetho, it was confessedly a mere popular story; for he admitted it was not a part of the Egyptian records, but a tale of uncertain authorship (ὑπὸ ἕνων...Δάυδαν...τὰ λεγόντα). A critical examination shows that it cannot claim to be a veritable tradition of the Exodus; it is indeed, if based on any such tradition, so distorted that it is impossible to be sure that it is really connected to the events to which it relates. Yet upon the supposition that the king is a real Menaphet, son of Iameses II., the advocates of the Rabbinical date entirely base their adjustment of Hebrew with Egyptian history at this period.

The history of the XVIIIth, XIXth, and XXth dynasties is that of the Egyptian empire. Amones, the head of the first of these (B.C. 1325), overthrew the power of the Shepherds, and probably expelled them from Egypt. The kings of the XXth dynasty, I and II., and III., are the earliest sovereigns of whom great monuments remain in the temple of El-Karnak, the chief sanctuary of Thebes. The last of these rulers was a great foreign conqueror, and reduced Nineveh, and perhaps Babylon also, to his sway. Amenoph III., his great-grandson, states on scarabs, struck apparently to commemorate his marriage that his northern boundary was in Mesopotamia, his southern in Kara (Choha?). By him was raised the great temple on the west bank at Thebes, the site of which is now only marked by the gigantic pair, the Vocal Memnon and its fellow. The head of the XIXth dynasty, Seti, or Sethos, B.C. 1340, waged great foreign war, particularly with the Hittites of the valley of the Orontes, whose capital Carchemish, situate near Eumaes, he captured. By him the great hypothesis of El-Karnak was built, and on its northern wall is a most interesting series of bas-reliefs recording his successes. His son Iameses II. was the most illustrious of the Pharaoths. If he did not exceed all others in foreign conquests, he far outshone them in the grandeur and beauty of the temples with which he adorned Egypt and Nubia. His chief campaign was against the Hittites and a great conference they had formed. He defeated their army, captured Carchemish, and forced them to conclude a (tentative)
with him, though this last object does not seem to have been immediately attained. Menepthah, the son and successor of Ramses II., is supposed by the advocates of the Rabbinical date of the Exodus to have been the Pharaoh in whose time the Israelites went out. One other king of this period must be noticed, Ramses III., of the XXTh dynasty, n. c. cir. 1200. whose conquests, recorded on the walls of his great temple of Medemnet Habo in western Thebes, seem to have been not less important than those of Ramses II. The most remarkable of the sculptures commemorating them represents a naval victory in the Mediterranean, gained by the Egyptian fleet over that of the Tokkuree, probably the Carians, and Shairatana (Khaïretana) or Cretans. Other Shairatana, whom we take to correspond to the Cherethim of Scripture, serve in the Egyptian forces. This king also subdued the Philistines and the Rehu (Leba), or Lubim, to the west of Egypt. Under his successors the power of Egypt evidently declined, and towards the close of the dynasty the country seems to have fallen into anarchy, the high-priests of Amen having usurped regal power at Thebes, and a Lower Egyptian dynasty, the XXIst, having arisen at Tanis. Probably the Egyptian
This page contains a discussion on Egypt, including references to various sources and authors. It mentions Hengstenberg, Habas, Apollos' site, Prince Nil, and other historical and linguistic aspects of Egypt. It also refers to the works of Champollion, Champollion le jeune, and other scholars. The text discusses the history, language, and inscriptions of ancient Egypt, highlighting the contributions of scholars like Champollion, Brugsch, and others. The page touches upon the decipherment of Egyptian hieroglyphs and the significance of this work in the broader field of Egyptology. It also references the work of Brugsch, Champollion, and others in the 19th century.

Henne von Sargans, Dr. Anton, Manethos, die Quellen unserer Geschichte und Chronologie, 1863; a highly fanciful work. Liebelin, J., Égyptienne Chronologie, 1863. Lepsius, R., Über einige Bearbeitungsprozesse der Ägyptischen, Griechischen, und Römischen Chronologie, 1859. Also, by the same, a monograph, Über die Menenianische Bestimmung des Ursprungs der Ägyptischen Geschichte, 1857. Dümichen, J., Altegyptische Kalenderinschriften, 1866. Smyth, C. Piazza, Life and Work at the Great Pyramid, 1867. Professor Smyth, of the University of Edinburgh, and Astronomer-Royal for Scotland, spent the months of January, February, March, and April, 1865, at the Great Pyramid, devoting his whole attention to mathematical measurements and astronomical observations. For this work he had prepared himself by a careful study of all previous measurements and observations, and he was furnished with the best instruments of modern science. His results, in the main confirming, and in some points correcting, those of Col. Howard Vyse and Mr. Perring, are of scientific value, and may hereafter contribute to the settlement of chronological and historical questions, though their authority is weakened by the fanciful and extravagant theories of the author. So exact is the orientation of the Great Pyramid that Professor Smyth found the difference between the direction of its entrance passage and the present astronomical meridian to be less than 3'. His determination of the latitude of the pyramid is 25° 38' 54". He regards the whole structure as a symbolical standard for a universal metrology, anticipating by thousands of years the exactest determinations of modern science, — "the linear standard founded on the earth's axis of rotation; the weight and capacity measured on an employment of the whole earth's mean density; the temperature standard on the mean surface temperature of the whole earth; and the time standard, fixing the position of the moon and the meridian observations combining a well-chosen polar with an equatorial star." All these standards Professor Smyth believes that he has found expressed in the form, materials, and proportions of the entrance passage, the king's chamber, and the cofier therein contained; and he traces to this source the Hebrew cubit, and the dimensions of the sacred ark and the molten sea. A metrology so reconcile and exact, the Professor ascribes to a divine inspiration in the mind of the original architect or founder of the pyramid. The date of the pyramid he fixes upon astronomical grounds at 2170 B.C. Following the theory of Sir John Herschel that a Draconis was the star to which the builders of the pyramid had reference in the angle or dip of its entrance or tube, he finds that this star was in the prescribed position at about 2230 B.C. and 3400 B.C.; but at the former date the Pleiades, whose "sweet influences" were so noted among the ancients, were also crossing the meridian above the pole, and from a comparison of the right ascension and declination of η Tauri with the right ascension and north polar distance of a Draconis, he reaches the mean date of 2170 B.C.

But if the builder of the Great Pyramid was the Souphis or chief of Manetho's fourth dynasty, this date would place Menes at nearly 3000 B.C., long before the flood, according to the Hebrew chronology. For Smyth, Menes is the "founder" of the pyramid, and he is therefore difficultly by impeaching Manetho's list, and, following Mr. William Osburn in his Monumental History of Egypt, he abbreviates and condenses the earlier dynasties. But monumental evidences unknown to Osburn, and overlooked by Smyth, point to a different conclusion. The most important recent additions to the materials of Egyptian Chronology are the "Tablet of Memphis or Sok- krah," discovered by M. Mariette, and the "Seleus Tablet," discovered at Abydos by M. Dupplin. These tablets, collated with each other and with the Turin papyrus, furnish an almost unbroken list of kings from Menes to Sethos I. Lepsius, Brugsch, and others, place Sethos I. about the middle of the 15th century before Christ; Mr. Pocle, a century later, in 1340 B.C. But ever this latter date will require that Egyptian chronology be carried back somewhat beyond the limits assigned in the foregoing article, in order to provide for the seventy-six consecutive reigns from Menes to Sethos. That these reigns are to be taken consecutively, the tablet of Sethos I. clearly indicates. This monarch, accompanied by his son Rameses, is offering homage to his royal predecessors, whose cartouches are arranged in three parallel lines, that of Menes heading the first column; and wherever the list can be verified by a comparison with other monuments, the order of the ear
touched is found to be strictly historical. This tablet must be accepted as an official list of the regular and legitimate dynasties of old Egypt, as these were recognized at the beginning of the nineteenth dynasty. The tablets of Sakkarah and Sethos, with the Turin papyrus, fill out the earlier dynasties with genealogies and chronology; and an average for the seventy-six reigns prior to Sethos I. will place Menes at least 3000 b. c. Thus monumental data for the determination of Egyptian chronology are accumulating, and the conclusions of Mr. Poole should be held in suspense until some surer light is gained.

Religion.—Sharpe, Samuel, Egyptian Mythology and Egyptian Christianity, 1883. Lepsius, R., Aette Lese de Texten, 1867. Egy., E. de, Le Rituel Funerai des Anciens Egyptiens, 1886. Chabas, F., Le Chapitre VI. du Rituel Egyptien, 1866. Pleys, W., Étude sur le Chapitre 125 du Rituel Funerai, 1886. Birch, S., The Funereal Ritual, the first complete translation of this important text-book of the Egyptian faith; see vol. v. of Busch's Egypt's Place in Universal History. Pleys, W., La Religion des Pers-Iraniens, 1892. Beauregard, Ollivier, Les Dérivés Egyptiens de leur Origine, leur Culte, et son Expansion dans le Monde, 1886. The work of Dr. Lepsius is based chiefly upon the inscriptions of sarcophagi in the Berlin Museum, and gives the earliest known text of the Book of the Dead. This text, though much more brief than that of the Turin papyrus, contains the important doctrines of the immortality of the soul, the rehabilitation of the body, the judgment of both good and bad, the punishment of the wicked, the justification of the righteous and their admission to the blessed state of the gods. These doctrines are amplified and repeated under various forms, in the larger text translated by Dr. Birch.

Valuable articles on Egyptology may be found in the Revue Archéologique, the Journal of Sacred Literature, the Bibliothèque Sacree, the Mélanges Egyptologiques of M. Chabas, the Transactions of the Royal Irish Academy, the Abhandlungen der Akademie der Wissenschaften zu Berlin, and especially in the Zeitschrift für Ägyptische Sprache und Alterthumskunde, published monthly at Berlin, and edited by Drs. Lepsius and Brugsch.

J. P. T.

EGYPTIAN (Egypt. mase.; Αίγυπτος, fem.; Αίγυπτισ, Αίγυπτιστα: Egyptian), EGYPTIANS (Egypt.: mase.; Αίγυπτος, fem.; Αίγυπτισ; Αίγυπτιστα: Egyptians, Egyptian multitude). Natives of Egypt. The word most commonly rendered Egyptians (Mitarum) is the name of the country, and might be appropriately so translated in many cases.

W. A. W.

* In Acts xxii. 38, an Egyptian is mentioned who headed a popular tumult in the procuratorship of Felix, whom the Roman chieftain at first supposed might be Paul, whom he had rescued from the rage of the Jews. Josephus gives an account of the same Egyptian, whom he likewise represents as having appeared in the time of Felix (B. J. ii. 13, § 5, and Ant. xx. 7, § 4). In some other respects the Jewish historian seems to be hardly less at variance with himself in the two passages, than with Luke's account. In B. J. ii. 13, § 5, Josephus relates that a juggler (γιγάντης), whom he also denominates Αίγυπτιστος, having procured for himself the reputation of a prophet, led a multitude of about 30,000 men out of the desert to the Mount of Olives, and promised them that the walls of Jerusalem would fall down at his command; but Felix fell upon them, the Egyptian fled with a few men (μετὰ Δαιγων), most of his followers were slain or taken prisoners, and the rest of the crowd (τὸν Αίγυπτιστον) dispersed. In his Ant. xx. 7, § 6, Josephus states that this Egyptian came to Jerusalem, that he persuaded the populace to go out with him to the Mount of Olives, where he would exhibit to them the wonder before mentioned; and then he speaks of the attack of Felix, and in that connection says merely that 400 of the Egyptian's adherents were slain, and 200 were taken captive, without adding any thing further. The points of apparent disagreement here are, that in one case the Egyptian brings the people from the desert to the Mount of Olives, in the other, from Jerusalem; in one case that the greater part of 30,000 people are slain or taken prisoners; in the other, that the number of the slain amounts to only 400, that of the prisoners to only 200.

Here now is an example, as Tholuck argues (Glaubenskraft der evangel. Geschichte, pp. 169, 170), which shows how reasonable it is, if a writer's general credibility be acknowledged, that we should reconcile such differences by having recourse to supposition or combination. Under this rule, we may view the case thus: "The Egyptian at first had a band of sicrii (Luke's σικαρίων), and a rabble also attached themselves to him; these people he leaves behind on the Mount of Olives, and leads thither out of Jerusalem an additional crowd, so that the entire multitude might amount to about 30,000 men. As usually happens in such cases, curiosity merely had drawn together most of them. Only a smaller company belonged to the train of his followers, and among these were the sicrii; the attack of the Romans was directed properly against these, of whom Felix slew 400, and made 200 prisoners. With a small number, i. e., with the 4000 of whom Luke speaks, he escaped into the desert; the remaining mass, i. e., the σικαρίων, of which the first passage of Josephus speaks, dispersed. In this way or in a similar way, the Jewish historian may be reconciled with himself, and with the writer of the Acts." II.

EHI (Ahi, brother, i. e. friend, of Jehovah, Ges.): Αὐχίς; [Alex. Αχυς]: Echi, head of one of the Benjamite houses, according to the list in Gen. xxi. 21, and son of Belih according to the LXX. version of that passage. He seems to be the same as Ahiram, Αἱρήμ in the list in Num. xxvi. 38, and if so, Ahiram is probably the right name, as the family were called 'Ahiramites. In 1 Chr. viii. 1, the same person seems to be called Αἱρήμ, Ahiram, and perhaps also Αἱρήμ, Ahoah, in ver. 4 ("Αχιά, l. x., and in Cod. Vatic. [7] Αχιά): 2 Sam. v. 17, and κυρία (Αχιά): 1 Chr. viii. 12. These fluctuations in the orthography seem to indicate that the original copies were partly effaced by time or injury. [BRUCE: CHRONICLES.]

EHUD (Eehud: [union]: [Αὔθω], 'Αudy [Alex. Αυδυς]: Ahol, Aholiab, i. e., Eze); one of the leaders of the Benjamites.

1. Ebed, the son of Billian, and great-grandson of Benjamin the Patriarch (1 Chr. vii. 10, viii. 6)
2. [A.A.S: Ass.] Ether, the son of Gera (נְֵ֫֫וֶ֫֫וֶ֫֫ו), Cypd: Gera; three others of the name, Gen. xvi. 21; 2 Sam. xvi. 5; 1 Chr. viii. 3), of the tribe of Benjamin (Judg. iii. 15, marg. "son of Jemini," but vid. Gesen. Lex. sub v. יְֵ֫֫וֶ֫֫וֶ֫֫ו), the second Judge of the Israelites (n. c. 1396). In the Bible he is designate d by a different name, 1. c. so Othnuel (Judg. iii. 9) and all the Judges (Neb. ix. 27). As a Benjamite he was specially chosen to destroy Eglon, who had established himself in Jericho, which was included in the boundaries of that tribe. [EGLON] In Josephus he appears as a young man (βεβαίας). He was very strong, and left-handed. So A.V.; but the more literal rendering is as in margin, "shut of his right hand." The words are differently rendered: (1) left-handed, and unable to use his right; (2) using his left hand as readily as his right. For (1), are Targum, Joseph., Syr. (impotent), Arab. (avradum) and Jewish writers generally; Cjct., Buxt., Parkh., Gesen. (impeditus); derivation of יְֵ֫֫וֶ֫֫וֶ֫֫ו from יְֵ֫֫וֶ֫֫ו, the latter only in Ps. lxix. 15, where it = "to shut." For (2), LXX. (αὐσιστός), Vulg. (qui utique manu pro dextra utatur), Corn. a Lap., Bonfrer, Patrick (cf. περιβίβασμα, Hom. Il. xxvi. 163, Hipp. Aph. 7, 49); Judg. xx. 10, sole occurrence; cf. the phrase, applied to 700 Benjamites, the picked men of the army, who were not likely to be chosen for a physical defect. As regards Ps. lxix. 15, it is urged that יְֵ֫֫וֶ֫֫ו may = corono = ope rio: hence יְֵ֫֫וֶ֫֫ו = apertura = expeditus, q. d. expedita dextrâ; or if "clausus," clausus dextrâ = cinctus dextrâ = περιβίβασμα, ambushet (vid. Pol. S hym.). The feast of drawing the dagger from the right thigh (Judg. iii. 21) is consistent with either opinion. For Ehud's adventures see Ego ton; and for the period of eighty years' rest which his valor is said to have procured for the Israelites, see Judges. T. E. B.

E'KER (אְקַר) [a root ing up, perh. = one trans planted, foreigner]: Αξηρ; [Comp. 'tsc'dp: Acher], a descendant of Judah through the families of Herron and Jerahmeel (1 Chr. ii. 27).

E'KRON (אַרְוָ֖֑ון) (Erebusfia; [Vat. Sin. Erebe fia]: Pesh. אַרְוָ֖֑ון, Ercabot: Vulg. omitis), a place named in Jud. vii. 18 only, as "next to Chus, which is on the brook Meounur;" apparently somewhere in the hill country to the south-east of the Plain of Esdraelon and of Dothan. The Syriac rendering of the word points to the place Acrodan, mentioned by Eusebius in the Onomasticon as the capital of a district called Acrodania, and still standing as Acrobat, about 6 miles south-east of Nitoth (Shchehem), in the Wady Madfûf rijeh, on the road to the Jordan valley (Van de Velde, ii. 304, and Map). Though frequently mentioned by Josephus (B. J. ii. 20, § 4, iii. 3, § 5, &c.), neither the place nor the district are named in the Bible, and they must not be con

\[\text{founded with those of the same name in the south of Judah. [Arababim; Arabattine; Maarah-acrabbim.]}\]

E'KRON (אַרְוָ֖֑ון) [eradication q. h.]: Άκαρ όν; [1 Sam. v. 10, xvii. 51-54; Rom. Vat. Alex. Αγκρίων: so Rom. Vat. 1 Sam. vi. 16, vii. 14; Jer. xxv. 20, Fr. 1. Άκαρας: Acaron [in Josh. xix. 43, Acron], one of the five towns belonging to the lords of the Philistines, and the most northerly of the five (Josh. xiii. 3). Like the other Philistine cities it is mentioned in the Sept. (1 Sam. x. 21) but it fell to the lot of Judah (Josh. xvi. [11], 45, 46; Judg. i. 18), and indeed formed one of the landmarks on his north border, the boundary running from thence to the sea at Jarnkel (Jebus). We afterwards, however, find it mentioned among the cities of Dan (Josh. xix. 43). But it mattered little to which tribe it nominally belonged, for before the monarchy it was again in full possession of the Philistines (1 Sam. v. 10). Ekon was the last place to which the ark was carried before its return to Israel, and the mortality there in consequence seems to have been more deadly than at either Ashdod or Gath. From Ekon to Beth-shemesh was a straight highway. Henceforward Ekon appears to have remained uninteruptedly in the hands of the Philistines (1 Sam. vii. 12: 2 K. i. 2, 16; Jer. xxv. 21). Except the casual mention of a sanctuary of Kikal zebub existing there (2 K. i. 4, 2, 3, 6, 16), there is nothing to distinguish Ekon from any other town of this district—it was the scene of no occurrence, and the native place of no man of fame in any way. The following complete the references to it. [1 Sam. vi. 16, 17, vii. 14:] Am. i. 8: Zeph. ii. 4; Zech. ix. 5, 7.

\[\text{Άκηρ, the modern representative of Ekon, lies at about 5 miles S. W. of } \text{Händel, and 3 due E. of } \text{Yehon, on the northerly side of the important valley Wady Suco. It is a large village containing about 30 mud houses, without a remnant of antiquity, except two large finely built wells. The plain south is rich, but immediately round the village it has a dreary, forsaken appearance, only relieved by a few scattered stunted trees (Porter, } \text{Handb. p. 275;} \text{and see Van de Velde, ii. 169; Rob. ii. 228.}

\] In proximity to Jahnec (Yehon) and Beth-shemesh (Atia Shemea), Ākrit agrees with the requirements of Ekon in the O. T., and also with the indications of the Onomasticon (v. v. Accad), Jerome therefore mentions that the Turris Stradoni, ciasara, was Ekon.

In the Apocrypha it appears as Acardon (1 Macc. x. 80, only) bestowed with its borders (râ šâmâ arûfî) by Alexander Balas on Jonathan Macræleus as a reward for his services. It was known in the Middle Ages by the same name. (See the quotation in Rob. ii. 228, note.)

The word EKronites appears in Josh. xiii. 3, and 1 Sam. v. 10. In the former it should be singular—"the Ekonrites;" in the latter [כַּרְוָֽׁי], G.

\[\text{‡} \text{Jt, substitute Ascalon for Ekon throughout this passage (1 Sam. v. 10-12). In support of this it should be remarked that according to the Hebrew text, the golden spoil and offerings were given for Aske lon, though it is omitted from the detailed narrative of the journeyings of the ark. There are other important differences between the LXX. and Hebrew texts of this transaction. See especially ver. 6.} \]

\[\text{‡} \text{The LXX. in both MS.5, and Josephus (Ant. vii. 11)} \]
EKRONITES. THE

EKRONITES, THE (אֱכְרְוִנִיֵּה);  רָאָסָאָןִיַּת, of Ṣaḳaḥalwīṣaṭi; [Vat. viii.; Comp. Ṣaḳaḥalnīṣaṭi; Aκκονιόνιτα]. The inhabitants of Ekron (Jos., xiii. 3; 1 Sam. ii. 10). In the latter passage the LXX. read " Ṣeḳaḥalwīṣaṭa." W. A. W.

ELA (Ἑλά; Joshua 1:27, etc., [in] Johnm., 1 Esdr. ix. 27. [ELAM.]

ELADA (אֶלְדָּא; [in] Joshua 12:5; 1 Sam. vii. 16); a descendant of Elam by Baasha, of Israel (1 Chr. vii. 20).

ELAI. 1. (אֵלַי [or terebinth]; Ἑλᾶ; [in] 1 Chr. iv. 52) the son of Elia, of the house of Zeruiah, king of Israel (1 K. xvi. 8-14); his reign lasted for little more than a year (comp. ver. 8 with 10). He was killed, while drunk, by Zichri, in the house of his steward Arza, who was probably a confederate in the plot. This occurred, according to Josephus (Ant. xii. 3, § 4), while his army and officers were absent at the siege of Gibbethon.

2. Father of Hoshea, the last king of Israel (2 K. xv. 30, xvii. 1). W. L. B.

ELAH. 1. (אֵלַה [or terebinth]; Ἑλᾶ; [in] 1 Chr. iv. 18, etc., 1 Esdr. v. 12; etc., 1 Esdr. v. 12) one of the dukes of Edom (Gen. xxxvi. 41; 1 Chr. i. 52). By Knobel (Genesis, ad loc.) the name is compared with Edith on the Red Sea. [DUKE.]

2. Shimei ben-Elah (accus. Ela, 827; Ἑλᾶ) was Solomon’s commissariat officer in Benjamin (1 K. iv. 18).

3. (אָדָא; [in] 1 Chr. vii. 16; etc., 1 Esdr. v. 12) a son of Caleb the son of Jephunneh (1 Chr. iv. 15). His sons were called Kenez or Kenaz; but the words may be taken as if Kenez was, with Elah, a son of Caleb. The names of both Elah and Kenaz appear amongst the Edomites "dukes."

4. (Ἁλά; [in] 1 Chr. xi. 2, etc.) son of Zechariah (1 Chr. xi. 8), and one of the chiefs of the tribe at the settlement of the country.

ELAI, THE VALLEY OF (אֵלַי; [in] Joshua 13:27; 1 Sam. iv. 21; 1 Sam. vii. 4; 1 K. iv. 18; etc.) the valley in which the Edomites were encamped against the Philistines when David gained Goliath (1 Sam. xvii. 2, 19). It is once more mentioned in the same connection (xxii. 9). We have only the most general indications of its position. It lay somewhere near Socho of Judah, and Azekah, and was nearer Ekron than any other Philistine town. So much may be gathered from the narrative of 1 Sam. xvii. Socho has been with great probability identified with Sareckich, near to Beit Netof, some 11 miles N. W. of Jerusalem, on the road to Beit Shein and Gaza, among the more western of the hills of Judah, not far from where they begin to descend into the great Philistine Plain. The village stands on the south slopes of the Wady es-Saum, or Valley of the Acacia, which runs off in a N. W. direction across the plain to the sea just above Ashkelon. Below Sareckich it is joined by two other wadys, large though inferior in size to itself, and the junction of the three forms a considerable open space of not less than a mile wide, cultivated in fields of grain. In the centre is a wide torrent bed thickly strewn with round pebbles, and bordered by the scented bushes from which the valley derives its present name.

There seems no reason to doubt that this is the Valley of the Terebinth. It has changed its name and is now called after another kind of tree, but the terebinth (Bist^) appears to be plentiful in the neighborhood, and one of the largest specimens in Palestine still stands in the immediate neighborhood of the spot. A mile down the valley from Sareckich is Tell Zedariyeh, which Schwarz (p. 102) and Van de Velde propose to identify with Azekah. If this could be maintained, the site of the valley might be regarded as certain. Ekron is 17 miles, and Bethel 12 miles, distant from Socho. For the valley, see Rob. ii. 20, 21; Van de Velde, ii. 191; Porter, Handbook, pp. 249, 250, 280. [See also Ritter’s Geog. of Palestine, Gage’s trans. iii. 241; Porter’s Girtty Cities, &c., p. 222; Rob. Phys. Geog. p. 117; and the references under DAVID, at the end.]

There is a point in the topographical indications of 1 Sam. xvii., which it is very desirable should be carefully examined on the spot. The Philistines were between Socho and Azekah, at Ephes-dammim, or Pas-dammim, on the mountain on the S. side of the Wady, while the Israélites were in the "valley" (אֵלַי) of the terebinth, or rather on the mountain on the N. side, and "the ravine" or the "glen" (רֶכֶם), was between the two armies (ver. 2, 3). Again (ver. 52), the Israélites pursued the Philistines till you come to "the ravine."

The traditional "Valley of the Terebinth" is the Wady Beit Hanina, which lies about 4 miles to the N.W. of Jerusalem, and is crossed by the road to Nebi Samuel. The scene of David’s conflict is pointed out a little north of the "Tombs of the Judges" and close to the traces of the old paved road. But this spot is in the tribe of Benjamin, and otherwise does not correspond with the narrative of the text.

G.

ELAM (אֶלָם; [in] Gen. xiv. 19, etc.) Elâm, [Alex. Αλάμα; in 1 Chr. vii. 24, Alex. 1 F. 4 omit, Alex. 2 Abd. Dāsā; in Is., Rom. Αλαμαίτας; xii. 11, Rom. Αλαμαίτας, Alex. Αλαμαίτας; xii. 2, xxii. 6, Alex. Αλαμαίτας; 1 Sam. v. 2; 13, 15, Andrew, Αλαμά); like Arab., seems to have been originally the name of a man—the son of Shem (Gen. x. 22; 1 Chr. i. 17). Commonly, however, it is used as the appellation of a country (Gen. xiv. 1, 9; Is. xi. 11, xxxii. 2, xxxii. 6; Jer. xxv. 25, xxxiv. 39–43; Ez. xxxii. 24; Dan. viii. 17), and will be so treated in this article.

The Elam of Scripture appears to be the province lying south of Assyria, and east of Persia Proper, to which Herodotus gives the name of Cissia (iii. 91, v. 49, &c.), and which is termed Susis or Susiana by the geographers (Strab. iv. 3, § 12; Ptolema. vi. 3, &c.). It includes a portion of the mountainous country separating between the Mesopotamian plain and the high table-land of Iran, together with a fertile and valuable low tract at the foot of the range between it and the Tigrais.
The passage of Daniel (viii. 2) which places Shushan (Susa) in "the province of Elam," may be regarded as decisive of this identification, which is further confirmed by the frequent mention of Elamites in this district (Strab. xi. 13, § 6, xvi. 1, § 17; Ptolem. vi. 3; Plin. H. N. vi. 26, &c.), as well as by the combinations in which Elam is found in Scripture (see Gen. xiv. 1; Is. xxi. 2; Ez. xxxix. 24). It appears from Gen. x. 22 that this country was originally peopled by descendants of Shem, closely allied to the Arameans (Syrians) and the Assyrians; and from Gen. xiv. 1-12 it is evident that by the time of Abraham a very important power had been built up in the same region. Not only is "Chedor-lomer, king of Elam," at the head of a settled government, and able to make war at a distance of two thousand miles from his own country, but he manifestly exercises a suzerainty over a number of other kings, among whom we even find Amraphel, king of Shinar, or Babylonia. It is plain then that at this early time the predominant power in Lower Mesopotamia was Elam, which for a while held the place possessed earlier by Babylon (Gen. x. 10), and later by either Babylon or Assyria. Discoveries made in the country itself confirm this view. They exhibit to us Susa, the Elamite capital, as one of the most ancient of the metropolises of the world; and it seems to have maintained, throughout almost the whole period of Babylonian and Assyrian greatness, a quasi-independent position. Traces are even thought to have been found of Chedor-lomer himself, whom some are inclined to identify with an early Babylonian monarch, who is called the "Ravager of the West," and whose name reads as Koder-mogata. The Elamite empire established at this time was, however, but of short duration. Babylon and Assyria proved the whole stronger powers, and Elam during the period of their greatness can only be regarded as the foremost of their feudatories. Like the other subject nations she retained her own monarchical constitution, and from time to time, for a longer or a shorter space, asserted and maintained her independence. But generally she was content to acknowledge one or other of the two leading powers as her overlord. Towards the close of the Elamite period she is found allied with Babylon, and engaged in hostilities with Assyria; but she seems to have declined in strength after the Assyrian empire was destroyed, and the Median and Babylonian arose upon its ruins. Elam is clearly a "province" of Babylonia in Belshazzar's time (Dan. viii. 2), and we may presume that it had been subject to Babylon at least from the reign of Nebuchadnezzar. [ELYMAIS.] The desolation which Jeremiah (xlix. 30-34) and Ezekiel (xxxi. 24-25) foretold, was probably this conquest, which destroyed the last semblance of Elamite independence. It is uncertain at what time the Persians added Elam to their empire. Possibly it only fell under their dominion together with Babylon; but there is some reason to think that it may have revolted and joined the Persians before the city was besieged. The prophet Isaiah in two places (xxi. 2; xiii. 6) seems to speak of Elam as taking part in the destruction of Babylon; and unless we are to regard him with our translators as using the word loosely for Persia, we must suppose that on the advance of Cyrus and his investment of the Chaldaean capital, Elam made common cause with the assailants. She now became merged in the Persian empire, forming a distinct satrapy (Herod. iii. 91), and furnishing to the crown an annual tribute of 300 talents. Susa, the capital, was made the ordinary residence of the court, and the metropolis of the whole empire, a curious circumstance, the causes of which will be hereafter considered. [SHUSHAN.] This mark of favor did not, however, prevent revolts. Not only was the Median revolution organized and carried out at Susa, but there seem to have been at least two Elamite revolts in the early part of the reign of Darius Hystaspis (Behistun Inscr. col. i. par. 16, and col. ii. par. 3). After these futile efforts, Elam acquiesced in her subjection, and, as a Persian province, followed the fortunes of the empire.

It has been already observed that Elam is called Cissia by Herodotus, and Susiana by the Greek and Roman geographers. The latter is a term formed artificially from the capital city, but the former is a genuine territorial title, and marks probably an important fact in the history of the country. The Elamites, a Semitic people, who were the primitive inhabitants (Gen. x. 22), appear to have been invaded and conquered at a very early time by a Hamitic or Cushite race from Babylon, which was the ruling element in the territory from a date anterior to Chedor-lomer. These Cushites were called by the Greeks Cissians (Κίσιοι), or Susasana (Σουσαναί), and formed the dominion race, while the Elamites or Elamians were in a depressed condition. In Scripture the country is called by its primitive title without reference to subsequent changes; in the Greek writers it takes its name from the conquerors. The Greek traditions of Mennon and his Ethiopians are based upon this Cushite conquest, and rightly connect the Cissians or Susasana of Susiana with the Cushite inhabitants of the upper valley of the Nile.

G. R.

2. [Γάλαμα: Alex., by inclusion of prec. name, ιερουποταμα] A Korhite Levite, fifth son of Meshelehum; one of the Bene-Asaph [sons of Asaph], in the time of King David (1 Chr. xxvi. 3).

3. [Αλάμα: Alex. Άλαμα] A chief man of the tribe of Benjamin, one of the sons of Shashak (1 Chr. viii. 24).

4. [Αλάμα, [Αλάμα] Άδα: [In Ezr. ii. 7; Vat. Μαλα: viii. 7; Vat. Ἀδα; Neh. vii. 12, FA. Αλα: i Esdr. v. 12; Vat. Ιάμαου; vii. 23, Al. vii. 11. With full. words Άδαιας, Αλαμ. Άδας: in Ezr. vii. 7, Άδα: 1 Esdr. v. 12, Dem. vii. 5, 32a.] "Children [sons of Elam," Bene-Elam, to the number of 1234, returned with Zerubbabel from Babylon (Ezr. v. 7; Neh. vii. 12; 1 Esdr. v. 12), and a further detachment of 71 men with Ezra in the second caravans (Ezr. viii. 7; 1 Esdr. viii. 33). It was one of this family, Shechaniah, son of Jehiel, who encouraged Ezra in his efforts against the indiscriminate marriages of the people (x. 2, Ceth. άλα, Gomam), and six of the Bene-Elam accordingly put away their foreign wives (x. 20). Elam occurs amongst the names of those, the chief of the people, who signed the covenant with Nehemiah (Neh. x. 14). The list of Ezr. ii. and Neh. vii. contain apparently an irregular mixture of the names of places and of persons. In the former, ver. 21-34, with one or two exceptions, are names of places: 3-19, on the other hand, are not known as names of places, and are probably of persons. No such place as Elam is mentioned in his Palestine, either in the Bible or in the Onomasticon of Eusebius, nor has since been
ELAMITES

As the title suggests, the text discusses the historical and cultural context of Elamites. It notes that Elamites were discovered as existing in the country, and the text mentions that they were considered by the city of Elam, which appears in the Bible (Ezra. ii. 31; Neh. vii. 34), and which was the site of the Elamite Gulf, which was also called the Elantine Gulf. It states that it first occurs on the account of the wanderings (Deut. ii. 8), and that Elamites were mentioned in the revolt of Jerusalem led by David's servants (2 Sam. viii. 14). The text also discusses the place-name mentioned in connection with Solomon's navy, and mentions that the Elamites were described by Strabo, Ptolemy, and Josephus.

The text concludes by stating that the Elamites are described as a people who were known for their governor, the Elamite, who lived in the region of Elath.

ELATH

The text briefly describes the geography of Elath, mentioning that it was a city located at the mouth of the Red Sea and was once a major port. It notes that Elath was mentioned in the Bible (Ezra. vi. 22; 2 Chr. xxxii. 27) and was also known as Ezion-geber and Ezion-gebera. The text mentions that the Elathites were a mixed Cushite settlement from the Persian Gulf, and that they were known for their trade and commerce with the Egyptians and the Canaanites. It also notes that Elath was a key trading post for the Phoenicians and the Egyptians.

The text concludes by summarizing the historical significance of Elath and its role in the trade and commerce of ancient times.

---

The Arabic name is Elath ('אֵלָת). In the geography of Arabia, Elath forms the extreme northern limit of the province of the Hijaz (El-Makreez). The town itself is described as having been inhabited by the Edomites, who were known for their governor, the Elamite, who lived in the region of Elath.

The text concludes by noting that Elath was a key trading post for the Phoenicians and the Egyptians, and that it was an important site for the trade and commerce of ancient times.
EL-BETHEL (אֶלְבֵּתֶל; בֵּית אֱלֹהִים = House of God) was a town in east central Canaan, associated with the ancient Canaanite deity Eshara-Teshub. It was also known as Bethel for later generations. The town was located near Shechem and was a junction for the roads to Shechem and to Hazor. It is mentioned in the Bible in the context of Joseph’s purchase of the parcel of land in Shechem, which he gave to Ephraim as a burial plot (Joshua 24:32). The town was later captured by the Philistines, but was later reoccupied by the Israelites and became a center of cultic activity, with a temple and a priestly temple complex.

EL-DAD and MEDAD (אֵל-דָּד, מֵעַדָד) were two of the 70 elders who were appointed by Moses and Joshua to assist with the transition from military to civilian life. They were selected to feed the people and to be in charge of the public funds. The names of the 70 elders are recorded in Exodus 6:17. The leaders of the tribes were chosen from these elders, and they were expected to maintain discipline among the people and ensure that the requirements of theTorah were observed.

ELDER (אֵלֶּדֶר) is a term used in the Bible to refer to an older person, especially a man who had knowledge and experience to impart to younger people. The term is used in various contexts, such as in the case of the elders of Israel who were appointed by Moses to help him (Exodus 18:18). In later periods, the term was used to refer to a person who had a special role or authority within the community, such as an elder in a particular tribe or congregation. The term elder also has a more general meaning as a person who is older or more experienced than others.

The term elder is used in various contexts in the Bible, such as in the case of the Aaronic high priest (Exodus 28:1), the elders of Israel (Deuteronomy 17:19), and the elders of the local congregation (Acts 11:34). The term is also used in the New Testament, such as in the case of Peter, who was referred to as an elder (1 Peter 5:1). The term elder has been used in various ways throughout history, and it continues to be used in the modern world to refer to an older person or a person who has authority or responsibility.

Some difficulty arises at this period from the notice in 1 Macc. xiv. 29 of a double body. The answer is simply this:—

1. Some difficulty arises at this period from the notice in 1 Macc. xiv. 29 of a double body.
ELLEAD

ELEAZAR

Real-Engl. iii. 750. Judas pursued Bacchides as far as to Azotus (1 Mac. ix. 15), but he followed him before approaching this place, and from what direction, is unknown.

H.

ELE'AZARAH (7ιτιες [God made]: Exod. 4:14; [Vat. Ecclus.] 114, 1). 1. Son of Hezec, one of the descendants of Judah, of the family of Hezron (1 Chr. ii. 20).

2. (E'leasar; Alex. Elasar; [1 Chr. viii. 37, 27; Exod. 23:15; iv. 43, Vat. Sin. om.]) Son of Rapha, or Raphaiah: a descendant of Saul through Jonathan and Merib-baal or Mephibosheth (1 Chr. viii. 37, ix. 43).

This name is elsewhere rendered in the A. V. ELEASAH.

ELEAZAR (7ιτιες [God's help]: Ele'azar). 1. Third son of Aaron, by Eleasha, daughter of Amminadab, who was descended from Judah, through Pharez (Ex. vi. 23, 25; xxviii. 1; for his descent see Gen. xxxviii. 29, xvii. 12; Ruth iv. 18, 20). After the death of Nadab and Abihu without children (Lev. x. 1; Num. iii. 4), Eleazar was appointed chief over the principal Levites, to have the oversight of those who had charge of the sanctuary (Num. iii. 32). With his brother Ithamar he ministered as a priest during their father's lifetime, and immediately before his death was invested on Mount Her with the sacred garments, as the successor of Aaron in the office of high-priest (Num. xx. 28). One of his first duties was in conjunction with Moses to superintend the census of the people (Num. xxvi. 2). He also assisted at the inauguration of Joshua, and at the division of spoil taken from the Midianites (Num. xxvii. 22, xxvii. 21). After the conquest of Canaan by Joshua he took part in the distribution of the land (Josh. xiv. 1). The time of his death is not mentioned in Scripture: Josephus says it took place about the same time as Joshua's, 25 years after the death of Moses. He is said to have been buried in "the hill of Phinehas" his son (Gen. p. 261), where Josephus says his tomb existed (Ant. v. 1, § 29); or possibly a town called Gibeah-Phinehas (Josh. xxiv. 33). The high-priesthood is said to have remained in the family of Eleazar until the time of Eli, a descendant of Ithamar, into whose family, for some reason unknown, it passed until it was restored to the family of Eleazar in the person of Zadok (1 Sam. ii. 27; 1 Chr. vi. 3; 1 K. ii. 27; Joseph. Ant. viii. 1, § 3). [This Eleazar is mentioned 1 Esdr. vii. 2; Ecclus. xiv. 23.]

2. The son of Abinadab, of the "hill" (7ιτιες) of Kirjath-jearim, consecrated by the people of that place to take care of the ark after its return from the Philistines (1 Sam. vii. 1).

3. [In 2 Sam. Rom. Vat. "Eleazar".] The son of Dodo the Ahohite (7ιτιες), i.e. possibly a descendant of Ahioth of the tribe of Benjamin (1 Chr. viii. 4); one of the three principal mighty men of David's army, whose exploits are recorded 2 Sam. xxiii. 9; 1 Chr. xi. 12.

4. [In 1 Chr. xxiii. 21, Alex. Elæas] A Merarite Levite, son of Mahli, and grandson of Merari. He is mentioned as having had only daughters, who were married by their "brothers" under the term γυναι. The identity of the γυναι and the παραστροφαι in other passages, is clear from 1 Mac. xii. 6, compared with 35.
ELEAZURUS

(i.e. their cousins) (1 Chr. xxiii. 21, 22; xxiv. 28).

5. [Rom. Vat. om.] A priest who took part in the feast of dedication under Nehemiah (Neh. xi. 12). 6. [In 1 Esdr., Ελεάζωρος; in Ezr., Alex. Ελεάζωρ: Vulg. Eleazer.] One of the sons of Parosh; an Israelite (i.e. a layman) who had married a foreign wife, and had to put her away (Ezr. x. 23; 1 Esdr. ix. 26).

7. Son of Phinehas a Levite (Ezr. viii. 33; 1 Esdr. vii. 63).

* 7 a. (Ελεάζωρος: Eleazarus.) One of the principal men and learned," who went up to Jerusalem with Ezra (1 Esdr. vii. 43). 8. ELEAZAR (Ελεάζωρος; [2 Mac. viii. 23, and Joseph. Ελεάζωρος: [Eleazarus, Eleazar] named AVARAN (1 Mac. ii. 5, Aïarârân, or Aïarân, and so Joseph. Ant. xii. 6, § 1; 9, § 4). In 1 Mac. vi. 43, the common reading δ Σαουαοῖς arises either from the insertion of C by mistake after O, or from a false division of Ελεάζωρος Αίαράρας, the fourth son of Mattathias, who fled by a noble act of self-devotion in an engagement with Antiochus Epiphanes, B.C. 164 (1 Mac. vi. 43 ff.; Joseph. Ant. xii. 19, § 4; B. J. i. 1, § 5; Ambr. de Offic. Misc. i. 40). In a former battle with Nicana, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watchword in the fight — "the help of God" — was his own name (2 Mac. viii. 22).

The surname is probably connected with Arab. hawara, "to piece an animal behind" (Mich. sub voc.). This derivation seems far better than that of Köger (Ersch u. Gruber, e. r.) from Arab. hawara, "an elephant-like." In either case the title is derived from his exploit.

9. A distinguished scribe (Ελεάζωρος ... τῶν ἀστροφότον γραμματέων, 2 Mac. vi. 18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Mac. vi. 18—31). His death was marked by singular constancy and heroism, and seems to have produced considerable effect. Later traditions embellished the narrative by representing Eleazar as a priest (De Mac. 5), or even high-priest (Griini, ad Macc. I. c.). He was also distinguished by the nobler title of "the proto-martyr of the old covenant," "the foundation of martyrdom" (Chrys. Hom. 3 in Macc. init. Cf. Ambr. de Jacob. i. 10).

For the general credibility of the history compare Grinn, Exercus 2 Mac. vi. 18—22; in Exeg. Handbook; also Ewald, Gesch. iv. 341, 532. [MACCABEES.]

The name Eleazar ['Ελεάζωρος] in 3 Mac. vi. appears to have been borrowed from this Antiochian martyr, as belonging to one weighed down by age and suffering and yet "helped by God." (For the name comp. Lazarus, Luke xvi. 20—23.)

10. ['Ελεάζωρος: Eleaza.] The father of Jason, ambassador from Judas Maccabees to Rome. (1 Macc. viii. 17.)

11. The son of Eleid, three generations above Joseph, the husband of the Virgin Mary (Matt. i. 15).

B. F. W.

ELEAZU RUS (Ελασώρος; Alex. Ελασώρος; Abb. Ελασώρος; Weichel (1597), Ελασώρος;] Eleazzah), 1 Esdr. ix. 24. [ELEAZIUR. It is difficult to see where the translators of the A. V. got the form of this name there given.

* The form in the Bishop's Bible and the Gene-

ELEUTHEREOPOLIS 696

EL ELOHE ISRAEL (ΕΛΕΟΣ ΗΙΣΡΑΕΛ = Almighty [Egypt. name], God of Israel; καὶ ἐπεκάλεσα τὸν θεόν Ἰσραήλ: Fortissimum Deus Israel), the name bestowed by Jacob on the altar which he erected facing the city of Shechem, in the piece of cultivated land upon which he had pitched his tent, and which he afterwards purchased from the Bene-Hanor (Gen. xxxiii. 19, 20).

* ELEMENTS. The expression "the elements of the world," τὰ στοιχεῖα τοῦ κόσμου, in Gal iv. 3 ("even so we, when we were children, were in bondage under the elements of the world," comp. ver. 9, and Col. ii. 8, 20, where στοιχεῖα is translated rudiments), has received a wide diversity of interpretations, which cannot be here specified. (See Meyer, loc. cit.) It appears to refer particularly to the outward observances and burdensome rites common to Jewish and heathen worship (see Gal. iv. 9, 10, and Col. ii. 20—23), and belonging to a very imperfect state of religious knowledge. — "the elements of discipline of the world" — "weak and beggarly," in contrast with the spirituality, renovating power, and enlightened freedom of Christianity.

ELEPH (Ελπίς = the Ox: Σεληνίας, Alex. Σεληνες — both by including the preceding name: Eleph), one of the towns allotted to Benjamin, and named next to Jerusalem (Josh. xviii. 28). The signification of the name may be taken as an indication of the pastoral pursuits of its inhabitants. The LXX. read Zelah and Eleph as one name, possibly owing to the "i" and "e" between them having been dropped; but if this is done, the number of 14 cities cannot be made up. The Peššiša has גָּאֶסִיו, for Eleph; but what the origin of this can be is not obvious.

ELEPHANT. The word does not occur in the text of the canonical Scriptures of A. V., but is found as the marginal reading to Behemoth, in Job xli. 15. "Elephant's teeth" is the marginal reading for ιβωνί in 1 K. x. 22; 2 Chr. xii. 21. Elephants, however, are repeatedly mentioned in the 1st and 21st books of Maccabees, as being used in warfare. The way in which they were used in battle, and the method of exciting them to fight, is described in the 6th chap. of 1 Macc. For the meaning of Behemoth, see BEHEMOTH. For the meaning of δοξησίμα, see IVORY. W. D.

ELEUTHEREOPOLIS (Ἐλευθερόπολις, the free city), a town of southern Palestine, situated at the foot of the hills of Judah, on the borders of the great plain of Philistia. It is about 25 miles from Jerusalem on the road to Gaza. It is not mentioned in Scripture; but it became in the early centuries of the Christian era one of the most important and flourishing towns in the country. Its ancient name was Bethgubrin (Βαιτογούβοριν, the House of Gubrin or Gubrin), which first occurs in the writings of Philo in the beginning
of the 2d century (ch. xvi.). Josephus refers to a large village called Bēṯzāqīs (in Rufinus's copy Bēṯγας) in this region, which may be the same (B. J. iv. 8, § 1). It is found in the Peutinger Tables as Bēṯqāriz (Reinh., Pat. p. 421). Its new name, Eleutheropolis, first occurs upon coins in the time of the emperor Septimius Severus (A. D. 203); 14 M. i. iii. 488). That emperor during his visit to Palestine conferred imperial rights upon several cities, and this was one of the number. Eusebius is the first writer who mentions Eleutheropolis (Onom. s. v.), which was in his time the capital of a large province. It was the seat of a bishop, and was so well known that he made it the central point in Southern Palestine from which the positions of more than 20 other towns were determined. Epiphanius, the well-known writer, was born in the city, in the beginning of the 4th century, and is often called an Eleutheropolitan (Reinh., pp. 751, 752). In the year A. D. 796, little more than a century and a half after the Saracenic conquest, Eleutheropolis was razed to the ground, and left completely desolate. The Greek language now gave place to the Arabic; and this city lost its proud name, and its prouder rank together (Reinh., p. 987). Like so many other cities, the old name, which had probably never been lost to the present, was revivified among writers; and we thus find Bēṯqāriz or some form like it, constantly in use after the 8th century. In the 12th century the Crusaders found the place in ruins, and built a fortress on the old foundations; the remains of which, and the chapel connected with it, still exist. After the battle of Hattin, Bēṯ Jīlūṁ, for such is its Arabic name, fell into the hands of the Saracens. It was retaken by King Richard of England, but it was finally captured by Saladin (see Will. Tyr. 14, 22; Jac. de Vit. in Geogr. d' i, pp. 1070, 1071; Reinh. E. 17, Subal. p. 223). It has since crumbled to ruins under the blight of Mohammedan rule. Several curious traditions have found a "local habitation" at Bēṯ Jīlūmn. One place here the miraculous fountain which sprang from the jawbone Samson wielded with such success against the Philistines (Anton. Mart. Rm. 39, 32). The modern village contains about 60 houses. It is situated in a little nook, in the side of a long green valley. The ancient ruins are of considerable extent; they consist of the remains of a strong fortress standing within an irregular enclosure encompassed by a massive wall. A great part of this outer wall is completely ruinous; but the north side, which skirts the bank of the valley, is still several feet high. The enclosure is about 300 ft. in diameter. The fortress is about 200 ft. square, and is of a much later date than the outer wall; an Arabic inscription over the gateway bears the date A. H. 558 (A. D. 1551). Along its south side are the walls and part of the grained roof of a fine old chapel—the same, doubtless, which was built by the Crusaders. The valley, on the side of which the ruins of Eleutheropolis lie, runs up among the hills for two miles or more south-by-east. On each side of it are a few small limestone villages, which rise here and there in white bare towers over the dark shreds. In these ridges are some of the most remarkable caverns in Palestine. They are found together in clusters, and form subterranean villages. Some are rectangular, 100 ft. and more in length, with smooth walls and lofty arched roofs. Others are bell-shaped—from 40 to 70 ft. in diameter, by nearly 60 ft. in height—all connected together by arched doorways and winding subterranean passages. A few are entirely dark; but most of them are lighted by a circular aperture at the top. They occur at short intervals along both sides of the whole valley; and the writer also saw them at several other neighboring villages. We learn from history that the Jews [Esra 11:37] came, during the Babylonian Captivity, and occupied the greater part of southern Palestine. Jerome says they inhabited the whole country extending from Eleutheropolis to Petra and Elath; and that they dwelt in caves—preferring them both on account of their security, and their coolness during the heat of summer (Conm, in Ædil.). These remarkable caves, therefore, were doubtless the work of the Jews. (See Handbook for Syria and Palestine, p. 255 ft.; Robinson's Biblical Researches, 2d ed. ii. 23, 57 ft.)

ELEUTHERUS ('Eλευθηρος), a river of Syria mentioned in 1 Macc. x. 7, xii. 39. In early ages it was a noted border stream. According to Strabo it separated Syria from Phoenicia (xvi. 753), and formed the northern limit of Coele-Syria. Josephus informs us that Antony gave Cleopatra the cities that were within the river Eleutherus, as far as Egypt, except Tyre and Sidon (1. xxiv. 4, § 1; B. J. i. 18, § 5). A careful examination of the passages in Num. xxvi. 8-10 and Ez. xlvii. 15-17, and a comparison of them with the features of the country, lead the present writer to the conclusion that this river also formed, for so far, the northern border of the "Promised Land" (First Years in Damascus, pp. 253 sq.). For Solomon says that at a certain season of the year it swarmed with tortoises (ix. 10).

Of the identity of the Eleuthers with the modern Nakhl or Kibrî, "Great River," there cannot be a doubt. Its highest source is at the northeastern base of Lebanon; it sweeps round the northern end of the range, through the opening called in Scripture the entrance of Hamath (Num. xxiv. 25); it passes through several small crags, and from the heights of Lebanon, it falls into the Mediterranean, about 18 miles north of Tripolis. It still forms the boundary between the provinces of Akbîr and Al-Hamam. During summer and autumn it is but a small stream, easily forded; but in winter it swells into a large and rapid river.

J. L. P.

* ELEUZAI (3 syll.), is the reading of the A. V. ed. 1611 in 1 Chr. xii. 5 for ELIZAIA. A.

ELHANAN (בֶּלְחָן [God who is generous]; Ėlahānî; [in 1 Chr. 27:1 El-hānî]; Medoetites.) 1. A distinguished warrior in the time of King David, who performed a memorable exploit against the Philistines, though in what that exploit exactly consisted, and who the hero himself was, it is not easy to determine.

(1.) 2 Sam. xxi. 19 says that he was the "son of Jaare-Oregim the Lephedrites," and that he "slew Gathith the Gittite, the staff of whose shot was a man's length, like a weaver's beam." Here, in the A. V. the words "the brother of" is inserted, to bring the passage into agreement with:

(2.) 1 Chr. xxi. 5, which states that "Elhanan, son of Jaar (or Jaaz), slew Lahmi, the brother of Gathith the Gittite, the staff of whose spear," and Of these two statements the latter is probably
ELIHANAN

ELI

67

ELIHANAN

The more correct — the differences between them when much smaller in the original than in English. We must refer the reader to the Hebrew for the comparison of the two, the discrepancies in which are not greater than those known to exist in other corrupt passages, but the following are the grounds of our decision.

(a.) The word *Gorgum* exists twice in the verse in Samuel, first as a proper name, and again at the end — *weavers.* The former has probably been taken in by an early transcriber from the latter, i.e. from the next line of the MS. To the end of the verse it certainly belongs, since it is found in the parallel passage of Chron., and also forms part of what seems to have been a proverbial description of Goliath (comp. 1 Sam. xvi. 7). The chances are very much against the same word — and that not a common one — forming part of one verse in two capacities.

(b.) The statement in 2 Sam. xxi. 19 is in contradiction to the narrative of 1 Sam. xvii., according to which Goliath the Gittite was killed by David. True, Ewald (Gesch. iii. 91, 92) — from the fact that David's antagonist is, with only 5 exceptions (one of them in the doubtful verses, xvii. 12-32), called "the Philistine," and for other linguistic reasons — has suggested that Elhanan was the real victor of Goliath, and that after David became king the name of Goliath was attached to the nameless champion whom he killed in his youth. But against this is the fact that Goliath is named thrice in 1 Sam. xvii. and xxi. — thrice only though it be; and also that Elhanan's exploit, from its position both in Samuel and in Chronicles, and from other indications, took place late in David's reign and perhaps even after he had been so long king. It is true, then, that all the brilliant feats of his youth must have been brought to light, and well known to his people. It is recorded as the last but one in the series of encounters of what seems to have been the closing struggle with the Philistines. It was so late that David had acquired among his warriors the fond title of "the light of Israel" (2 Sam. xxi. 17), and that his nephew Jonathan was old enough to perform a feat rivalling that of his illustrious uncle years before. It was certainly after David was made king, for he goes down to the fight, not with his "young men" (172), as when he was leading his band during Saul's life, but with his "servants" (172), literally his "slaves," a term almost strictly reserved for the subjects of a king. The vow of his guard, on one of these occasions, that it should be his last appearance in the field, shows that it must have been after the great Ammonite war, in which David himself had led the host to the last victory of his reign (1 Sam. xxi. 20). It may have been between this last event and the battle with Absalom beyond Jordan, though there are other obvious reasons why David stayed within the walls of Mahanaim on that occasion.

On the whole, therefore, though the question is best with difficulties, the just conclusion appears to be that the reading in Chronicles is the more correct one, according to which Elhanan is the son of Jair, and slew Lahmi the brother of Goliath.

Jerome in his *Quast. Hebr.* on both passages — but not, as we might suppose, to the point to which our narrative refers, and adds *filius suhii polygyniernus Bethleemitum — the son of a wood, a weaver Bethleemite.* Adeodatus, he says, is David, which he proves not only by arguments drawn from the meaning of each of the above words, but also from the statement in the concluding verse of the record that all these giants "fell by the hand of David and by the hand of his servants," and as Elhanan slew Goliath, Elhanan must be David.

2. *[Elihanan, Elihanan.]* The son of Dodo of Bethlehem, one of "the thirty" of David's guard, and named first on the list (2 Sam. xxiii. 24: 1 Chr. xi. 26). See Kennicott's *Disputation,* p. 179.

The same name is also found with Baal substituted for El, — BAAHANAN. *(Comp. Beeli-ada.)*

G. *E'LI* (יִהְיָשָׁא) *[ascend, elevation, and coner. the highest, Ges.]*: *'HAI; [Vat. Alex. Hare] 'HAREI, Joseph. Heli* was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev. x. 1, 2, 12), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 K. ii. 27), had a son, Ahimelech, who is expressly stated to have been "of the sons of Ithamar" (1 Chr. xiv. 3; cf. 2 Sam. viii. 17). With this agrees the circumstance that the names of Eli and his successors in the high-priesthood up to, and including, Abiathar, are not found in the genealogy of Eleazar (1 Chr. vi. 4-10; cf. Ex. xiv. 1-5). As the history makes no mention of any high-priest of the line of Ithamar beyond Eli, he is generally supposed to have been the first of that line who held the office. *(Hai בַּגִּיאוֹן תַּאֹיָמָה הַאָגִיָּשָׁא,ו) pareaλγάβος, Joel. Ant. viii. 1, § 35).* From him, his sons being died before him, it appears to have passed to his grandson, Ahitub (1 Sam. xiv. 2; Joel. however, says Φεβίτιος δ' ἡδονα ἐπερείσχο, τῶν πατρὸς αὐτοῦ παρεκκλησιονάρος δυτ. γεγέν., Joel. xii. 5, § 4), and it certainly remained in his family till Abiathar, the grandson of Ahitub, was "thrust out from being priest unto the Lord" by Solomon for his share in Adonijah's rebellion (1 K. ii. 23, 27, 17), and the high-priesthood passed back again to the family of Eleazar in the person of Zadok (1 K. ii. 35). How the office ever came into the younger branch of the house of Aaron we are not informed, though there is reason to suppose that its doing so was sanctioned by God (1 Sam. ii. 30). Its return exclusively employed. Even Absalom's people go by the former name. This will be evident to any one who will look into the quotations under *sor words in that most instructive book, The Eng. Hebr. and Heb. Concordances.* 

EVEN THE most overcomes the difficulty of the two discrepant passages by a curious eclectic process. From Chronicles he accepts the name "Jair," but rejects "Lahmi, the brother of Ithai." From Samuel he takes "the Bethleemite," and rejects "Gergam."
to the elder branch was one part of the punishment which had been denounced against Eli during his lifetime, for his culpable negligence in consenting himself with near relative reprimand (1 Sam. i. 22-25) instead of active paternal and judicial restraint (iii. 12), when his sons, by their rapacity and licentiousness, had committed the priests' privileges, and brought the rites of religion into abettorship among the people (1 Sam. ii. 27-36, with 1 K. ii. 27-28. Another part of the same sentence (ver. 31-33) appears to have been taking effect in the reign of David, when we read, that "there were more chief men found of the sons of Elijahar than of the sons of Ithamar," six or the former, and only eight of the latter (1 Chr. xxiv. 4). Notwithstanding this one great blunder, the character of Eli is marked by eminent piety, as shown by his meek submission to the divine judgment (1 Sam. iii. 18), and his supreme regard for the ark of God (iv. 18). In addition to the office of high-priest he held that of judge, being the immediate predecessor of his pupil Samuel (1 Sam. vii. 6, 15-17), the last of the judges. The length of time during which he judged Israel is given as 40 years in our present Hebrew copies, whereas the LXX. make it 29 years (after Jer. viii. 1 Sam. iv. 18). It has been suggested in explanation of the discrepancy, that he was sole judge for 20 years, after having been co judge with Samuel for 20 years (Judg. viii. 31). He died at the advanced age of 98 years (1 Sam. iv. 15), overcome by the disastrous intelligence that the ark of God had been taken in battle by the Philistines, who had also slain his sons Hophni and Phinehas. (1 Sam. x. 3; 11; 12). [See Lightfoot's Works, vol. i. p. 53, 967, fol. Lond. 1684; Selden, de Sceclea, in Pontiff, Heb. lib. i. cap. 4.]

*Stankey, (Jewish Church, i. 421 ff.) has drawn a touching picture of the circumstances of Eli's sad end. - "In the evening of the same day [on which the Philistines defeated the Hebrews] there rushed through the vale of Shiloh a youth from the camp, one of the active tribe of Benjamin, — his clothes torn, his hair sprinkled with dust, as the two oriental signs of grief and dismay. A loud wail, like that which on the announcement of any great calamity runs through all Eastern towns, rang through the streets of the expectant city. The aged high-priest was sitting in his usual place at the gate-way of the sanctuary. He caught the cry; he asked the tidings. He heard the defeat of the army; he heard the death of his two sons; he heard the capture of the Ark of God. It was in this last tidings, when mention was made of the Ark of God, that broke the old man's heart. He fell from his seat and died in the fall."*

ELIAB (אֵליאָב, "God is father")-Eliab, 1. Son of Helon and leader of the tribe of Zelaham at the time of the census in the wilderness of Sinai (Num. i. 9, 10. 11, 24, 29, x. 16).

2. A Benjamite, son of Pallu or Phallu, whose family was one of the principal in the tribe; and father or progenitor of Paltai and Abiram, the leaders in the revolt against Moses (Num. xxxii. 8, 9, xvi. 1, 12; Deut. xi. 6). Eliab had another son named Nemuel, and the record of Num. xxxii. is interrupted expressly to admit a statement regarding his sons.

3. [In 2 Chr., Vat. Exar.] One of David's brothers, the eldest of the family (1 Chr. ii. 13; 1 Sam. xvi. 6, xvii. 13, 28). His daughter Abihail married her second cousin Rehobam, and bore him three children (2 Chr. xi. 18): although, taking into account the length of the reigns of David and Solomon, it is difficult not to suspect that the word "daughter" is here used in the less strict sense of granddaughter or descendant. In 1 Chr. xxvii. 18, we find mention of "Elihu, the brethren of David," as "ruker" (דַעַר, or "prince" (מִשְׁמָר) of the tribe of Judah. According to the ancient Hebrew tradition preserved by Jerome (Quotat. Hebr. ad loc.), this Elihu was identical with Eliab. "Brethren" is however often used in the sense of kinsmen, e. g. 1 Chr. ii. 2.

4. [In 1 Chr. xv. 18, FA.1 Eliaab; FA.2 Vat. Eliaasbb.] A Levite in the time of David, who was both a "porter" (שְׁבֵר, i. e. a door-keeper) and a musician on the "psaltery" (1 Chr. xv. 18, 20, xvi. 5).

5. [FA. Eliaasbb.] One of the warlike Gadite leaders who came over to David when he was in the wilderness taking refuge from Saul (1 Chr. ii. 9).

6. An ancestor of Samuel the Prophet; a Kishite Levite, son of Nahath (1 Chr. vi. 27, Heb. 12). In the other statements of the genealogy this name appears to be given as Elihu (1 Sam. i. 1) and Eliab (1 Chr. ii. 34, Heb. 19).

7. [Sin. Elia; Ewron.] Son of Nathanuel, one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Judg. viii. 1).

ELIADA (אֶלְיאָד, "God knows") - Eliaad, 1. One of David's sons: according to the lists, the youngest but one of the family born to him after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8). From the latter passage it appears that he was the son of a wife and not of a concubine. In another list of David's family we find the name Eliada changed to Heledada, (Judg. xvi. 18), an omission, but not a false god for the true (1 Chr. xiv. 7). What significance there may be in this change it is impossible to say; at any rate the present is the only instance occurring, and even there Eliada is found in one Heb. MS., also in the LXX. and Syr. versions. [Biblioth.] The name appears to be omitted by Josephus in his list of David's family (ii. vii. 3, § 3). 2. [Eliaad; Vat. Eliaad; Elieodor.] A mighty man of war (לֵוֶד, לֵוֶדֶד), a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2 Chr. xvii. 17).

ELIADAH (אֶלְיָדָה, "God knows") - Rom. Vat. om.: Alex. Eliadass: Elieodor, apparently an Arameite of Zobab; father of Rezon the captain of a marauding band which annoyed Solomon (1 K. xi. 24).

ELIADAS (Elieodor; Elieoros), 1 Esdr. ix. 23. [Elieoros.]

ELIADUN (אֶלְיָדֶן, "God is their law") - Eliadun, 1 Esdr. v. 58. Possibly altered from HENANAD.

ELIABH (אֶלְיָבָה, "God is father") - Eliab, a Benjamite; one of the sons of Jeroham, and a chief man (Heb. 5'27, literally head) of the tribe (1 Chr. viii. 27).
2. (Haia: [Vat. F.A. Haeasa.]) One of the Bene-
clam [sons of Elia']; an Israelite (i.e. a layman)
in the times of Ezra, who had married a foreign
wife (Est. x. 20).

This name is accurately Elijah, and the trans-

tators of the A. V. have so expressed it, not only
in the name of the prophet (most frequently spelled
with a final w), but in another case (Est. x. 21).
[ELIAH]

EL'I'AHBA (-••11, whom God hides);
[2 Sam. 11, E'lama(ssia [Vat. Alex. e'sia:];
[Is. xvi. 20], EL'IA'SIA; [Comp. E'lia'sia; 1 Chr.]
'• El'ias3; [Vat. corrupt: F.A. E'lia'sa]; E'lia'sia, a
Shaalbonite. i.e. probably from Shihalom; one of the Thirty of David's

guard (2 Sam. xxiii. 32; 1 Chr. xi. 33). [The
A. V. ed. 1611, and other earlier editions, read
Eliha, with the Genevan version.]

EL'I'AKIM (-^ia^, whom God will establish;
[In 2 K.], El'iasa, [Vat. Alex. e'sia:]; and
[Is. xvi. 20], EL'IA'SIA; [In Is. xxxvi., xxxvii.,
EL'IA'SIA; El'tion]. 1. Son of Hilkiah; master
of Hezekiah's household (1 K. xv. 32 = over the
house," as Is. xxxvi. 3), 2 K. xvii. 18, 20, 37.

He succeeded Shema in this office, after he had
been ejected from it (Grotius thinks by reason of
his leprosy) as a punishment for his pride (Is. xxii.
15-29). Eliakim was a good man, as appears by
the little emphatically applied to him by God, "my
servant Eliakim" (Is. xxii. 20), and as was evinced
by his conduct on the occasion of Sennacherib's
invasion (2 K. xxii. 37, xix. 1-5), and also in the
discharge of the duties of his high station, in which
he acted as a "father to the inhabitants of Jerusa-
lem, and to the house of Judah" (Is. xxii. 21).
It was as a special mark of the Divine appro
bation of his character and conduct, of which however no
further details have been preserved to us, that he
was raised to the post of authority and dignity which
he held at the time of the Assyrian invasion.

What this office was has been a subject of some
perplexity to commentators. The ancients, including
the LXX. and Jerome, understood it of the priestly
office, as appears by the rendering of י"ל
(1S. xxxii. 15, A. V. "treasurer") by πασστεριφσων,
the "priest's chamber," by the former, and of
יו"ל by "prepositus templi" by the latter.

Hence Niebuhr, as well as the author of the
Alexandrion Chronicle, include in the list of high-
priests, Sons or Sons of (i.e. Shema), and
Eliakim, identifying the latter with Shallum or
Meleshum. His 12th high-priest is, "Sommus,
ille impius et perditus, regnante Ezooth," and his
13th, "Eliakim Museum." But it is certain from
the description of the office in Is. xxi., and espe-
cially from the expression in ver. 22, "the key of the
house of David will I lay upon his shoulder:"
that it was the King's house, and not the House
of God, of which Eliakim was prefect, as Ahiah
had been in the reign of Solomon, 1 K. iv. 6, and
Aziel in that of Ahaz, 2 Chr. xxviii. 7.
And with this agrees both all that is said, and all that
is not said, of Eliakim's functions. The office
seems to have been the highest under the king, as
was the case in Egypt, when Pharaoh said to Joseph,
"Thou shalt be over my house (יו"ל . . .
xuly in the throne will be 1 greater than thou,"
Gen. xli. 40, comp. xxviii. 4. In 2 Chr. xxviii. 7,
the officer is called "governor (יה"ל) of the house.
It is clear that the "scribe" was inferior to him for
Sheba, when degraded from the presidency of the
house, acted as scribe under Eliakim, a 2 K.
xviii. 37. The whole description of it too by Isaiah
implies a place of great eminence and power.
This description is transferred in a mystical or spiritual
sense to Christ the son of David in Rev. iii. 7; thus
making Eliakim in some sense typical of Christ.
This it is perhaps which gave rise to the interpre-
tation of Eliakim's name mentioned by Origen, א
דבז'א יא תוצדוקי or as Jerome has it, Dei essent
rector, or Resurrens Deus: and also favored the
mystical interpretation of the passage in Isaiah
given by Jerome in his commentary, based upon
the interpretation of יבכ (A. V. "treasurer") as
"habitation in tabernaculo," as if it imported the
removal of the Jewish dispensation, and the setting
up of the Gospel in its place. The true meaning
of יבכ is very doubtful. "Friend," i.e. of the
king, and "steward of the provisions," are the two
most probable significations. Eliakim's career was
most honorable and splendid one. Most com-
mentators agree that Is. xxii. 25 does not apply to
him, but to Shebna. Eliakim's name also occurs
2 K. xix. 2; Is. xxxvi. 5, 11, xxvii. 2. (See
further Jerome de Nom. Hbr. and Comment.
Is.; Seiden, De Success. in Pontif. Hbr.;
Winer, s. c.)

2. [E'E'iaXia: Vat. Alex. e'sia: El'tion, Eli-
'akim.] The original name of Jehoiakim king of
Judah (2 K. xxii. 34; 2 Chr. xxvii. 4). [JE-
HO'LAKIM.]

F.A.) "El'tisim, Eli'akim." A priest in the days of
Necho, who assisted at the dedication of the new
wall of Jerusalem (Neh. xii. 41).

4. [E'E'iaXia:] Eldolost son of Ahuld, or Judah;
brother of Joseph, and father of Azor, Matt. i. 13.
[GENEALOGY OF CHRIST.]

5. [E'E'iaXia:] El'tofim. Son of Mela, and
father of Jonam, Luke iii. 30, 31. [HIBBI.]

EL'I'ALI (E'laaii; [Vat. El'ia'aie]; Alex.
E'liaei); Diexus, 1 Esdr. ix. 54. [BIXUI.]

EL'I'AM (י"ל, E'laim, Vat. and Alex.:
[Comp. E'la'ai]; El'tia); L. Father of Bath-shua,
the wife of David (2 Sam. xi. 5). In the list of 1
Chr. iii. 5, the names of both father and daughter
are altered, the former to Ammel and the latter to
Bati-shu'a: and it may be noticed in passing,
that both the latter names were also those of non
Israelite persons, while Uriah was a Hittite. (Comp.
Gene. xxviii. 13; 1 Chr. ii. 3; in both of which
"the daughter of Shun" is ישע ל, Bath-shua;
also 2 Sam. xvii. 27.) The transposition of the
two parts of the name Eli'am in Amm.-id, does not
alter its Hebrew significiation, which may be
"God is my people.

2. [Alex. El'ia'af.] Son of Ahithophel the Gil-
conite; one of David's "thirty" warriors (2 Sam.
xxiii. 34). The name is omitted in the list of 1
Chr. xi, but is now probably dimly discernible as
"Ahilah the Pelonite" (ver. 36) (see Kennicott,
a Bp. Lowth thinks, but without sufficient reason
that this Sheba is a different person from the other.
ELIAONIAS

Disputation, p. 207). The ancient Jewish tradition preserved by Jerome (Qu. Hebr. on 2 Sm. xi. 3, and 1 Chr. iii. 5) is that the two Elimias are one and the same person. An argument has been founded on this to account for the hostility of Ahithophel to King David, as having dishonored his house and caused the death of his son-in-law (Blunt, Compil. Hebr., Pt. II. x.). But such arguments are frequently grounded on ignorance of the habits and modes of feeling of Oriental, who often see no shame in that which is the greatest disgrace to us.

ELIAONIAS (Ελιαωνίας; [Vat. Ελιαώνιας] Montillonis, including preceding name), 1 Ladr. viii. 31. "[Ελιαωνία]"

ELIAS (Ηλαίας; [Vat. Ηλαια] in Maccabees, and Lachm. [also Treg.] in N. T. Ηλαίας [Tisch. in N. T. 8th ed. Ηλαια]; Elias, but in Cod. Amiat. Helias, the form in which the name of Eliashih is given in the A. V. of the Apocrypha and N. T. Text. Exchs. xlviii. 1, 4, 12; 1 Mac. ii. 58; Matt. xi. 19; John vi. 4, 10, 11, 12, xxvii. 47, 49, Mark vi. 15, viii. 28, ix. 4, 5, 11, 12, xxv. 35, 36; Luke i. 17, iv. 25, 26; x. 8, 19, 30, 33, 34 [rec. text]; John i. 21, 23; Rom. xi. 2; James v. 17. In Rom. xi. 2, the reference is not to the prophet, but to the portion of Scripture designated by his name, the words being εὐαγγελία, "in Elias," not as in A. V. "of Elias." [Bible, p. 668, 69, 69a.]

ELIASAPH (יוֹעַשׁ עַשָּׁר) [added of God;] "Eliaphä; [Vat. M. Eliasaph, exc. Nunn. i. 14.] Eliaphah.

1. Son of Benel; head of the tribe of Dan at the time of the census in the Wilderness of Sinai (Nunn. i. 1, 14, ii. 14, vii. 42, 47, v. 20).

2. Son of Lael; a Levite, and "chief of the house of the father of the Gershonites" at the same time (Nunn. iii. 24).

ELIASHIB (יוֹעַשׁ אֵישָׁב) [whom God restores;] "Eliashib, Elasi, Eliashib, Eliasib, Eliasib, Elishab, Elishib, Elia, Elias, Eliáš [Vat. vi. 416 a.], a position name at the later period of the O. T. history.

1. [Ελιασάβ, Βασιλείας; Alex. Eliashib; Ela. viii. 19, 21, 24, 25]. A priest in the time of King David, eleventh in the order of the "governors" (יוֹעַשׁ) of the sanctuary (1 Chr. xxi. 12).

2. [Ελασιάβα, Vat. Aesia; Alex. Eliashib; Elia. vii. 416 a]. A son of Eliashib; one of the latest descendants of the royal family of Judah (1 Chr. iii. 24).

3. [Ελασιάβ, סיֵב, Ελασιάβ, etc. Elia.]. High-priest at Jerusalem at the time of the rebuilding of the wall under Nehemiah (Neh. iii. 1, 29, 21). His genealogy is given in xii. 10, 22, 23. Eliashib was in some way allied (יוֹעַשׁ) to Tidah, the Ammonite, for whom he had prepared a room in the Temple, a desecration which excited the wrath of Nehemiah (Neh. xiii. 4, 7). One of the grandsons of Eliashib had also married the daughter of Sandalath the Horite (xiii. 28). There seems no reason to doubt that the same Eliashib is referred to in Ezra x. 6.

4. [Ελασάβδ, F. -σαβδ; Vat. Elasa]. Eliashib, a singer in the time of Ezra who had married a foreign wife (Ezr. x. 21). [Eliazizah.

5. [Ελασάβ, Vat. -σαβδ, F. -σαου]. A son of Zattu (Ezr. x. 27). [Elissimah]

6. [Ελασφρ, Vat. Eliasaph, F. -σφρ].

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIEZER (יוֹעַשׁ אֵצֶר) [my God is my help;] "Eliyzer; [Vat. Eliasiz; Alex. Eliasiz; Elowar; Elowar], one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).
pear how, if he was "of Damascus," he could be "born in Abraham's house" (ver. 3). But the phrase Ἰς Ἰς Ἔλιν, "son of my house," only imports that he was one of Abraham's household, not that he was born in his house. In the preceding verse Ἰς Ἰς Ἐλῖζερ, i.e., should probably be rendered "the son of possession," i.e., possession, "of my house, shall be ... Eliezer." It was, most likely, this same Eliezer who is described in Gen. xxiv. 2, as the chief servant of Abraham's house, that ruled over all that he had, and whom his master sent to Padan-Aram to take a wife for Isaac from among his own kindred. With what eminent zeal and faithfulness he executed his commission, and how entirely he found the truth of what his own name expressed, in the providential aid he met with on his errand, is most beautifully told in Gen. xxiv. It should, however, be said that the passage (Gen. xv. 2), in which the connection of Eliezer with Damascus seems to be asserted, is one of extreme obscurity and difficulty. The sense above ascribed to מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל (after Simonis and Gesenius) rests only upon conjecture, the use of "Damascene" for "Damascene" is very unusual, and the whole arrangement of the sentence very harsh. There is probably something at the bottom of it all, besides the alternation between Meshek and Damascus, which we are ignorant of, and which is wanting to clear up the sense. The two passages, "Judæa origin Damascena, Syria nobilissima civitatum ... Nomen urbis Damascense, verisimile est ... Past Damascem Aetha, nunc Aethra et Abraham et Israel undis verius" (Justin, lib. xxxvi. cap. 2): and "A'Bàdà ṣiṣuṣa da[ma][s]nūṣ ... ḏd 'A'Bādāmūn ḍtì kān nūn ṣn ḏāma[n]ṣīr the ūmmā dābā ṣtā'at kāmū ḍā'ūnū ḍā'īnūtā' (A.B. r.d. μν συν εφαρμογή [Joseph. Ant. i. 7, § 2, quoting Nicol. Damascus) have probably some relation to the narrative in Gen. xv. (See Gesen. Thes. v. n.)

* Kalsch (Genesis, p. 365) maintains that the words מֶל מֶל מֶל מֶל מֶл מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶل מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶל מֶl
although they do not thoroughly handle, that idea of the disciplinary nature of suffering, which is the key to Job's perplexity and doubt; but, as in the whole book, the greater stress is laid on God's invariable wisdom, and the implicit faith which he demands. [Job, Book iv.]

2. (folio: [Vat. Harro, Alex. Ead.] - Son of Tobiah, a forerunner of Samuel the Prophet (1 Sam. 1. 1). In the statements of the genealogy of Samuel in 1 Chr. vi. the name Elijah occurs in the same position — son of Tob and father of Jeroham (vi. 34, Heb. 19); and also Elijah (vi. 27, Heb. 12), father of Jeroham and grandson of Zophai. The general opinion is that Elifib is the original name, and the latter two forms but copies of variations thereof.

3. (Vat. and Alex. Ead.). A similar variation of the name of Elifi is, the eldest son of Jesse, is probably found in 1 Chr. xxii. 18, where Elifi is "of the brethren of David" mentioned as the chief of the tribe of Judah. But see 1 Chr. xii. 2, where, in a similar connection, the word "brethren" is used in its widest sense. The LXX. retains Elifi. [Eliab, 3, 1. In this place the name is without the final Aleph — ]

4. (folio: [Vat. Harro, Alex. Ead.; [Comp. Abd. Ead. Jerah] - One of the "captains" (נָגָי, i.e. heads) of the thousands of Manasseh (1 Chr. xii. 20) who followed David to Ziklag after he had left the Philistine army on the eve of the battle of Gilboa and who assisted him against the marauding band (נָגָי) of the Amalakites (comp. 1 Sam. xxx. 13)

5. (folio: [Vat. Harro].) A Korbite Levite in the time of David; one of the doorkeepers (נָגָי) of the house of Jehovah. He was a son of Shemiram, and of the family of Obed-edom (1 Chr. xxvi. 7). Terms are applied to all these doorkeepers which appear to indicate that they were not only "strong men," as in A. V., but also fighting men. (See 1 Chr. 1. 12, in which occur the words יָנָגָי as army, and יָנָגָי as warriors or heroes.)

ELIJAH. (general) Generally Elijah, but sometimes יָנָגָי, Eliyauh [God - Jehovah]

a) By Chrystia and others the name is Greated into 'Haios, as if signifying the brightness of the sun.
b) Stanley, S. S. P. P. 328. In the Acts and Sidney, he is called Prophetus Thebodis.

"Omnium sacrorum artis Prophetarum faciunt principem; et, si Mosiosis, multum verem" (Frischmuth, in Crit. Sacra, quoting from Abalbourni).

d) The Hebrew text is יָנָגָי יָנָגוּ יָנָגוּ, יָנָגוּ, יָנָגוּ יָנָגוּ eer.[ god - Jochov;]

2. The third word may be pointed (1) as in the present Masoretic text, to mean "from the inhabitants of Gilead," or (2) from Tishbi of Gilead; which, with a slight change in form, is what the LXX. has. The latter is followed by Exodus iii. 6-10, note. Eighth foot note is not, but without giving his authority, that Elijah was from Jezrahiel Gilben. By Josephus he is said to have come from Thebod - οι κατδοτα της ελειας, της Ολοκαυτοστιας μιστος, (vi. 13, § 2). Perhaps this may have been read as Jezruel, a city of the Levites, and have given rise to the statement of Ephesians, that he was of the tribe of Aaron; and

ELIHU. [Vat. Harro, Alex. Ead.] - A N. T. 'Haios. [Tisch. 8th ed 'Haios: Elijah, ELIJAH THE TISHHITE has been well entitled "the grandest and the most romantic character that Israel ever produced." Certainly there is no personage in the O. T. whose career is more vividly portrayed, or who exercises on us a more remarkable fascination. His rare, sudden, and brief appearances, his unattended courage and fiery zeal, the brilliancy of his triumphs, the pathos of his despondency, the glory of his departure, and the calm beauty of his reappearance on the Mount of Transfiguration, throw such a halo of brightness around him as is equalled by none of his companions in the sacred story. The ignorance in which we are of the circumstances and antecedents of the man who did and who suffered so much, doubtless contributes to enhance our interest in the story and the character. "Eliah, the Tishbeye of the inhabitants of Gilced," is literally all that is given us to know of his parentage and locality. It is in remarkable contrast to the detail with which the genealogies of other prophets and leaders of Israel are stated. Where the place — whether it was a place — Zal, which gave him this appellation, we know not, nor are we likely to know. It is not again found in the Bible, nor has any name answering to it been discovered since. [Tisch.]

The mention of Gilced, however, is the key-note to much that is most characteristic in the story of the prophet. Gilced was the country on the further side of the Jordan — a country of chase and pasture, of tent-villages, and mountain-castles, inhabited by a people not settled and civilised like those who formed the communities of Ephraim and Judah, but of wandering, irregular habits, exposed to the attacks of the nomad tribes of the desert, and gradually conforming more and more to the habits of those tribes; making war with the Hagarites, and taking the countless thousands of their cattle, and then dwelling in their stead (1 Chr. v. 10, 19-22). To an Israelite of the tribes west of Jordan the title "Gilcedite" must have conveyed a terrific impression, though in a far stronger degree, to that to which the title "Celt" does us. To what the Highlands were a century ago to the towns in the Lowlands of Scotland, that, and more than that, must Gilced have been to Samaria or Jerusalem. One of the most famous heroes in the early annals of Zadok. See also the Chana Prach. Fabricius, Cor. Povpep. T. I p. 1070, &c.; and Quaresimus, Eliod, b. 605. According to Jewish tradition — grounded on a certain similarity between the fiery zeal of the two — Elijah was identical with Phinehas. He was the high priest, the son of Eleazar, and the grandson of Aaron. He was also the angel of Jehovah who appeared in fire to Gilced (Lightfoot on John i. 21: Eisenmenger, l. 696). Arab tradition places his birthplace at Gilcad Gilcod, a few miles N. of Naft (Ibray, p. 38), and his tomb near Damascus (Moisen, i. 491).

The common assumption — perhaps originating with Hiler (Thom, p. 347) or Reim (Pat., p. 1035) — is that he was born in the town Thisbe mentioned in Tob i. 2. But not to insist on the fact that this Thesbe was not in territory, but in Naphthal, it is nearly certain that the name has no real existence in that passage, but arises from a mistaken translation of the same Hebrew word which is rendered "inhabitants" in Lk. xviii. 1 (Erasm.)

3) See a good passage illustrative of this in Robe chap. ix.
ELIJAH 708

If Israel was "Jephthah the Gileadite," in whom all these characteristics were prominent; and Professor Stanley has well remarked how impossible it is rightly to estimate his character without recollecting this fact (S. of P. p. 327).

With Elijah, of whom so much is told, and whose part in the history was so much more important, this is still more necessary. It is seen at every turn. Of his appearance as he "stood before" Ahab — with the suddenness of motion to this day characteristic of the Bedouins from his native hills, we can perhaps realize something from the touches, few, but strong, of the narrative. Of his height little is to be inferred — that little is in favor of its being beyond the ordinary size. His chief characteristic was his hair, long and thick, and hanging down his back, and which, if not betokening the immense strength of Samson, yet accompanied powers of endurance so no less remarkable. His ordinary clothing consisted of a girdle of skin and a cloak, which he tightened when about to move quickly (1 K. xvii. 46). But in addition to this he occasionally wore the mantle, or cape, of sleep-skin, which has supplied us with one of our most familiar figures of speech. In this mantle, in moments of emotion, he would hide his face (1 K. xix. 13), or when excited would roll it up as into a kind of staff. On one occasion we find him bending himself down upon the ground with his face between his knees. Such, so far as the scanty notices of the record will allow us to conceive it, was the general appearance of the great Prophet, an appearance which there is no reason to think was other than uncommon even at that time.

"Vir qui curationem et cultum corporis desperaret; facie squalente, que multis lignibus orationem obumbraretur . . . pelle capitis tandem de corpore tegentem quantum abscondit decorum erat, reliqua corporis ad ara perducentem" (Gregory Nyss. quoted by Willemer de Pallio Elise in Ord. Sacri).

The solitary life in which these external peculiarities had been assumed had also nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild loneliness of the hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel.

The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The worship of the calves had been a departure from him, it was a violation of his command against material resemblance; but still it would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not one imported from the idolatries of any of the surrounding countries. They were announced by Jeroboam as the preservers of the nation during the great crisis of its existence: "Behold thy gods, O Israel, that brought thee up out of the land of Egypt" (1 K. xii. 28). But the case was quite different when Ahab, not content with the calf-worship — "as if it had been a light thing to walk in the sins of Jeroboam, the son of Nebat," married the daughter of the king of Sidon, and introduced on the most extensive scale (Joseph. Ant. ix. 6, § 6) the foreign religion of his wife's family, the worship of the Phoenician Baal. What this worship consisted of we are ignorant — doubtless it was of a gay, splendid, and festal character, and therefore very opposite to the grave, severe service of the Mosiac ritual. Attached to it and to the worship of Asherah (A. V. "Ashstaroth," and "the groves") were licentious and impure rites, which in earlier times had brought the heaviest judgments on the nation (Num. xxv.; Judg. ii. 13, 14, iii. 7, 8). But the most obviously and evil characteristic of the Baal-religion was that it was the worship of power, of mere strength, as opposed to that of a God of righteousness and goodness. A foreign religion, imported from nations the hatred of whom was incalculable in every page of the law, as opposed to the religion of that God who had delivered the nation from the bondage of Egypt, had "driven out the heathen with his hand, and planted them in: ... and through whom their forefathers had troubled down their enemies, and destroyed those that rose up against them." It is as a witness against these two evils that Elijah comes forward.

1. What we may call the first Act in his life embraces between three and four years — three years and six months for the duration of the drought, according to the statements of the New Testament (Luke iv. 25; James v. 17), and three

a From a comparison of 2 K. iv. 34 with 1 K. xvii. 21, it would seem as if Elisha approached nearer than Elijah to the stature of the child. But the inference is not to be relied on. Chrysostom applied the same epithet to him as to St. Paul, τρίγωνον ἄδιπτως. b 2 R. i. 8, "a hairy man," literally, "a lord of hair." This might be doubtful, even with the support of the LXX. and Josephus — ἄδιπτως ἀρσάν — and of the Targum Jonathan — יִתְנָה יִתְנָה — the same word used for Easu in Gen. xxvi. 11. But its application to the hair of his head is corroborated by the word used by the children of Bethel when mocking Elisha. "Bald-head" is a peculiar term יִתְנָה applied only to want of hair at the back of the head; and the taunt was called forth by the difference between the bare shoulders of the new prophet and the shaggy locks of the old one. [Rusna.] c Running before Ahaz's chariot; the hardships of the Cherib; the forty days' fast.

d 2 K. i. 8, rendered "leather" in this one place only. See Gen. iii. 21, &c.

e Ashereth, אָשֶׁרֶת, אָשֶׁרֶת : LXX. μορφαῖς; always used for this garment of Elijah, but not for that of any prophet before him. It is perhaps a trace of the permanent impression which he left on some parts of the Jewish society, that a hairy cloak became afterwards the recognized garb of a prophet on Jehovah (Zech. xiii. 4; A. V. "rough garment;" where the Hebrew word is the same which in Elijah's history is rendered "mantle").

Various relics of the mantle are said to exist. The list of claimants will be found in the Acta Synagogorum (July 20). One place is shown at Oviedo in Spain.

f 2 K. ii. 8; "wrapped" is a different word.

g This is generally taken as having been in prayer; but kneeling apparently was not (certainly is not) an attitude of prayer in the East. "We stood praying, forsooth" (Mark xi. 25; and see Matt. vi. 5, &c.).

h This is to be inferred, as we shall see afterwards, from king Ahaziah's recognition of him by mere description.
or four months more for the journey to Loreh, and the return to Gilgal (I K. xii. 1-21). His introduction is of the most startling description: he suddenly appears before Ahab, as with the unen-strained freedom of Eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. This he does in the remarkable formula evidently characteristic of himself, and adopted after his departure by his follower Elijah—a formula which includes everything at issue between himself and the king—the name of Jehovah, his being the God of Israel, the Living God, Elijah being his messenger, and then—the special lesson of the event—that the God of power and of nature should be beaten at his own weapons. "As Jehovah, God of Israel, liveth, before whom I stand," whose constant serv-ant I am, "there shall not be dew nor rain these years, but according to my word." What immediate action followed on this we are not told; but it is plain that Elijah had to fly before some threatened vengeance either of the king, or more probably of the queen (comp. xix. 2). Perhaps it was at this juncture that Jezebel "cut off the prophets of Jehovah" (I K. xvii. 4). He was directed to the brook Cherith, either one of the torrents which cleft the high table-lands of his native hills, or on the west of Jordan, more in, the neighborhood of Samaria. [UNSURE?] There he was shaded by the hollow of the torrent-bed he remained, sup-ported in the miraculous manner with which we are all familiar, till the failing of the brook obliged him to forsake it. How long he remained in the Cherith is uncertain. The Hebrew expression is simply "at the end of days," nor does Josephus afford us any more information. A vast deal of immensity has been devoted to explaining away Elijah's "ravens." The Hebrew word, עֵצֵי הָעַלִּים, Occidum, has been interpreted as "Arabians," as "merchants," as inhabitants of some neighboring town of Orabi or Oris/o. By others Elijah has been held to have plundered a raven's nest—and this-twice a day regularly for several months! There is no escape from the plain meaning of the words—occurring as they do twice, in a passage other-wise displaying no tinge of the marvellous—or from the immensity of all the Hebrew MSS., of

---

a Jerome, quoted by Kenneth, p. 551. See these hypotbeses brought together in Kelv Ev lo. 1.

b Lightfoot quaintly remarks on this that Elijah was the first Apostle to the Gentiles.

c The traditional scene of his meeting with the widow was in a wood to the south of the town (Mislim, I. 532, who however does not give his authority). In the time of Jerome the spot was marked by a hollow (Jerome, Ep. Pastor). At a later period a church dedicated to the prophet was erected over the house of the widow, in which his chamber and her kneeling-trench were shown (Auton, Martyr, and Plaeus, in Reland, p. 285). This church was called ναός εἰρηνής (Ana Santoros).

d This must not be much relied on. Zechariah, son of Chenaanah, one of Ahab's prophets, uses a similar form of words, "Thus saith Jehovah." (I K. xxii. 11). The apparent inference however from Luke iv. 26 is that he was one of the worshippers of Israel. In the Jewish traditions her son was the Messiah (Eisen-menger, Eisd. Judith. b. 725).

e "Jehovah thy God" (see just before) suggests more obviously a difference of worship and nationality among all the ancient versions, and of Josephus. [UNSURE?]

---

His next refuge was at Zarephath, a Pheni-cian town lying between Tyre and Sidon, certainly the last place at which the enemy of Ahab would be looked for. The widow woman in whose house he lived seems, however, to have been an Israelite, and no Baal-worshipper, if we may take her adulation by "Jehovah thy God!" as an indication. Here Elijah performed the miracles of prolonging the oil and the measure of meal; restored the son of the widow to life after his apparent death. Here the prophet is first addressed by the title, which, although occasionally before used to others, is so frequently applied to Elijah as to become the distinguishing appellation of himself and his suc-cessor: "O thou man of God!"—"Now I know that thou art a man of God!" (I K. xviii. 18, 24).

In this, or some other retreat, an interval of more than two years must have elapsed. The drought continued, and at last the full horrors of famine, caused by the failure of the crops, de-scended on Samaria. The king and his chief do-mestic officer divide between them the mournful duty of ascertaining that neither round the springs, which are so frequent a feature of central Palestine, nor in the necks and crannies of the most shaded torrent-beds, was there any of the heritage left, which the inhabitants might supply in indication of the presence of moisture. No one should have two chief persons of the realm could be trusted with this quest for life or death—"Ahab went one way by himself, and Obadiah went another way by himself." It is the moment for the reap-pearance of the prophet. He shows himself first to the minister. There, suddenly planted in his path, is the man whom he and his master have been seeking for more than three years. There is no nation or kingdom," says Oladiah with true Eastern hyperbole, "whither my lord hath not sent to seek thee;" and now here he stands when least expected. Before the sudden apparition of that wild figure, and that stern, unbroken countenance,—between the Sarepta widow and the prophet. See Stanley, Jewish Church, b. 330. So also the exceptive εἰς τῆς, Luke iv 23, properly refers to ἐντὸς καιροῦ and not ἐν τοῖς, i. e., was sent nowhere except to Sarepta, which lay out of Israel, and was sent to minister to the widow in Israel except the one at Sarepta. We have the same idiom in ver. 27, where the opposition between Israelite and foreigner is beyond question. On this use of ἐν τῆς, see especially Fritzsche on Rom. xiv. 14, and Meyer on Matt. xiv. 4. H. 26, 27. This is warranted by the expression "his sickness was so sore that there was no breath left in him," a form of words not elsewhere found; while in the story of the Shunammite's son it is distinctly said the child "died." Josephus's language (xviii. 13, § 3) shows that he did not understand the child as "died." The Jewish tradition, quoted by Jerome, was that this boy was the servant who afterwards accom-panied Elijah, and finally became the prophet Jonah. Jerome, Pref. to Jonah; and see the citations from the Talmud in Eisenmenger, Eisd. Judith. b. 725.)

* That the child's death was real, not apparent, as stated above, cannot well be questioned. The lan-guage itself is sufficiently explicit. The child's cease to breathing must mean the same thing as to die. So the Psalmist says, "Then takest away their breath, they die." (Civ. 28). The two expressions are often interchanged (comp. Gen. viii. 22; Josh. xi. 11; Ps. xxxiv. 7, 11; Eccl. xxxix. 10, etc.). So also the prayer of the prophet which follows, supposed
Obadiah could not but fall on his face. a Elijah, however, soon calms his agitation — "As Jehovah of hosts liveth, before whom I stand, I will surely show myself to Ahab;" and thus relieved of his fear that, as on a former occasion, Elijah would disappear before he could return with the king, Obadiah departs to inform Ahab that the man they seek is there. Ahab arrived, Elijah makes his charge — "Thou hast forsaken Jehovah and followed the Baals." He then commands that all Israel be collected to Mount Carmel with the four hundred and fifty prophets of Baal, and the four hundred of Asherah (Ashtaroth), the latter being under the especial protection of the queen, to be joined by Mount Carmel, which we do not consider of until now, was chosen in preference to the nearer Elal or Gerizim, is not evident. Possibly Elijah thought it wise to remove the place of the meeting to a distance from Samaria. Possibly in the existence of the altar of Jehovah (xviii. 30) — in ruins, and therefore of earlier erection — we have an indication of an ancient sanctity attaching to the spot. On the question of the particular part of the tribe of Issachar, which formed the site of the meeting, there can be no doubt. It is elsewhere examined. b [CARmel.]

There are few more sublime stories in history than this. On the one hand the solitary servant of Jehovah, accompanied by his one attendant; with his wild shaggy hair, his scanty garb, and sheep-skin cloak, but with calm dignity of demeanor and the minutest regularity of procedure, repairing the ruined altar of Jehovah with twelve stones, according to the number of the twelve founders of the tribes, and reciting in his prayer the still greater names of Abrahall, Isaac, and Israel — on the other hand the 800 prophets of Baal and Ashtaroth, doubting in all the splendor of their vestments (2 K. x. 22), with the wild din of their "rain repetitions" and the maddened fury of their disappointed hopes, and the silent people surrounding all — these things form a picture with which we are all acquainted, but which brightens into fresh delight every time we consider it. The conclusion of the long day need only be glanced at. b The fire of Jehovah consuming both sacrifices and altar — the prophets of Baal killed, it would seem by Elijah's own hand (xviii. 40) — the king, with an apathy almost unintelligible, eating and drinking in the very midst of the carnage of his own adherents — the rising storm — the ride across the plain to Jezebel, a distance of at least 16 miles; the prophet, with true Bedouin endurance, running before the chariot, but also with true Bedouin instinct, and going no further than the "entrance of Jezebel."

So far the triumph had been complete; but the spirit of Jezebel was not to be so easily overcome. And her first act is a vow of vengeance against the author of this destruction. "God do so to me, and more also," so ran her exclamation, "if I make not thy life as the life of one of them to-morrow about this time." Its was no duty of Elijah to expose himself to unnecessary dangers. and, as at his first introduction, so now, he takes refuge in flight. The danger was great, and the refuge must be distant. The first stage on the journey was Beer-sheba — "Beer-sheba which belongeth to Judah," says the narrative, with a touch betraying its Israelitish origin. Here, at the ancient haunt of those fathers of his nation whose memory was so dear to him, and on the very confines of cultivated country, Elijah halted. His servant — according to Jewish tradition the boy of Zarephath — he left in the town; while he himself set out alone into the wilderness — the waste uninhabited region which surrounds the south of Damascus. The labors, anxieties, and excitement of the last few days had proved too much even for that iron frame and that stern resolution. His spirit is quite broken, and he wanders forth over the dreary sweeps of those rocky hills wishing for death — "It is enough! Lord, let me die, for I am not better than my fathers." c It is almost impossible not to conclude from the terms of the story that he was entirely without provisions for this or any journey. But God, who had brought his servant into this difficulty, provided him with the means of escaping from it. Whether we are to take the expression of the story literally or not is comparatively of little consequence. In some way little short of miraculous — it might well seem to the narrator that it could be by nothing but an angel d — the prophet was awakened from his dream of despondency beneath the solitary bush e of the wilderness, was fed with the bread and the water which to this day are called a Bedouin's requirements, f and went forward, "in the strength of that food," a journey of forty days to the "mount of God, even to Horeb," the opposite of the Greek convent, Deir Mar Yonas, between Jerusalem and Bethlehem, which is now shown to travellers as the spot on which the prophet rested on this occasion (Bonar; Porter, Handbook, &c.), appears at an earlier date not to have been so restricted, but was believed to be the place on which he was "accustomed to sleep" (Sandys, lib. iii. p. 176; Mannadrit, Eor. Trae, p. 450), and the site of the convent as that where he was born (Gysforde, 1599, in Bonar, p. 117). Neither the older nor the later story is unverified; but it is possible that they may have originated in some more trustworthy tradition of his having rested here on his southward journey, in all probability taken along this very route. See a curious statement by Quaresimus of the extent to which the rock has been dressed in form that "by the pity or impity" of the Christian pilgrims. (Euvlcatio, ii. 905; comp. Dombad, Voyage, &c., p 144.)

The LXX. adds to the description the only touch wanting in the Hebrew text — "a cake of meal." — A. F. R.
Here it is, "the cave," one of the numerous caverns in those awful mountains, perhaps some traditional sanctuary of that hallowed region, at any rate well known,—he remained for certain one's night. In the morning came the "word of Jehovah"—the question, "What dost thou here, Elijah? Driven by what hard necessity dost thou seek this spot on which the glory of Jehovah has in former times been so signaliy shown?" In answer to this invitation the prophet opens his griets. He has been very zealous for Jehovah; but force has been vain; one cannot stand against a multitude; none follow him, and he is left alone flying for his life from the sword which has slain his brethren. The reply comes in that ambiguous and indirect form in which it seems necessary that the deepest communications with the human mind should be couched, to be effectual. He is directed to leave the cavern and stand on the mountain in the open air (εἰς τὸ ἀνθινό, Josephus), face to face (ἐν τῷ ἑαυτῷ) with Jehovah. Then, as before with Moses (Ex. xxxiv. 8), "The Lord passed by;" passed in all the terror of his most appalling manifestations. The fierce wind tore the solid mountains and shivered the granite cliffs of Sinai; the earthquake crash reverberated through the defiles of those naked valleys; the fire burst in the incessant blaze of eastern lightning. Like these, in their degree, had been Elijah's own modes of procedure, but the conviction is now forced upon him that in none of these is Jehovah to be known. Then, penetrating the dead silence which followed these manifestations, came the fourth mysterious symbol—the "still small voice." What sound this was, whether articulate voice or not, we cannot even conjecture; but low and still as it was it spoke in louder accents to the wounded heart of Elijah than the roar and blaze which had preceded it. To him no less unmistakably than to Moses, centuries before, it was proclaimed that Jehovah was "merciful and gracious, slow-to-get-angered and abundant in goodness and truth." Elijah knew the call, and at once stepping forward and hiding his face in his mantle, stood waiting for the Divine communication. It is in the same words as before, and so is his answer; but with what different force must the question have fallen on his ears, and the answer left his lips! "Before his entrance to the cave, he was comparatively a novice; when he left it he was an initiated man. He had thought that the earthquake, the fire, the wind, must be the great witnesses of the Lord. But he was not in them; not they, but the still small voice had that awe in it which forced the prophet to cover his face with his mantle. What a conclusion of all the past history! What an interpretation of its meaning!" (Maurice, "Prophecies and Kings," p. 136.) Not in the persecutions of Ahab and Jezebel, nor in the slaughter of the prophets of Baal, but in the 7000 unknown worshippers who had not bowed the knee to Baal, was the assurance that Elijah was not alone as he had seemed to be.

Three commands were laid on him—three changes were to be made. Instead of Ben-hadad, Hazael was to be king of Syria; instead of Ahab, Jehu the son of Nimshi was to be king of Israel; and Elisha the son of Shaphat was to be his own successor. Of these three commands the two first were reserved for Elisha to accomplish, the last only was executed by Elijah himself. It would almost seem as if his late trials had awakened in him a yearning for that affection and companionship which had hitherto been denied him. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-meholah, probably somewhere about the centre of the Jordan valley. [ABEL-MEHOLAH.] Elijah was then on his way to Damascus, and Elijah was "passed over to him"—possibly crossed the ri e'r — and cast his mantle, the well-known sheep skin cloak, upon him, as if, by that familiar & c action, claiming him for his son. A moment of hesitation—but the call was quickly accepted, and then commenced that long period of service and intercourse which continued till Elijah's removal, and which after that time procured for Elisha one of his best titles to esteem and reverence—"Elisha the son of Shaphat, who poured water on the hands of Elijah." 2. Ahab and Jezebel now probably believed that their threats had been effectual, and that they had seen the last of their tormentor. At any rate this may be inferred from the events of chap. xxi. Foiled in his wish to acquire the ancestral plot of ground of Naboth by the refusal of that sturdy peasant to alienate the inheritance of his fathers, Ahab and Jezabel proceed to possess themselves of it by craft and force, and by a degree of monstrous injustice which shows clearly enough how far the elders of Jezabel had forgotten the laws of Jehovah how perfect was their submission to the will of their mistress. At her orders Naboth is falsely accused of blaspheming God and the king, is with his sons' stone and killed, and his vineyard then—as having belonged to a criminal—becomes at once the property of the king. [NABOTH.] Ahab loses no time in entering on his new acquisition. Apparently the very next day after the execution he proceeds in his chariot to take possesses already ploughed), and he was with the last." [See note under Elisa, p. 714.]

a The Hebrew word has the article, תֶםֶם יִרְאָה; and so too the LXX., τὸ σφάδων. The cave is now shown in the secluded plain below the highest point of Jebel Mısır. "A hole just large enough for a man's body," beside the altar in the chapel of Elijah (Stanley, S. & P. p. 49; Rob. L. 103, 24 ed.).

b Hebrew, גָּדֶל, A. V. "lodge," but in Gen. xix. 2, accurately, "lady all night."

c The words of the text are somewhat obscured in the A. V. They bear testimony at once to the solid position of Elissa, and to the extent of the arable soil of the spot. According to the Masoretic punctuation the passage is: And he departed thence, and found Eliezer, the son of Shaphat, who was ploughing. Twelve oxen were before him (κ.α. either 12 ploughs were before him with his servants, or 12 yoke of land were already ploughed), and he was with the last." [See note under Elisa, p. 714.]

d The word is that always employed for crossing the Jordan.

e See also Ruth ii. 4-14. Ewald, Afterbürger, p. 101, note. A trace of a similar custom survives in the German word Mantelkind.

f "The blood of Naboth and the blood of his sons" (2 K. ii. 26; comp. Josh. vii. 24). From another expression in this verse—yesterday (תֶּמֶם יִרְאָה, A. V. 'yesterday'), we may perhaps conclude that like a later trial on a similar charge, also supported by two false witnesses—the trial of our Lord—it was conducted at midnight. The same word—yesterday—prompts the inference that Ahab's visit and encounter with Elijah happened on the very day following the murder.
suddenly, 707 will come of expected intimation suggested children like fearful burden, was given chariot. oracle troubled the 1 (comp. at appears rapid ly the intimation — that of able in dogs; by in to was shed in the same spot where the blood of thy victims was shed last night; thy wife and thy children shall be torn in this very garden by the wild dogs of the city, or as common carrion devoured by the birds of the sky — the large vultures which in eastern climes are always wheeling along under the clear blue sky, and doubtless suggested the expression to the prophet. How tremendous was this scene we may gather from the fact that after the lapse of at least 20 years Jehu was able to recall the very words of the prophet's burden, to which he and his companion had listened as they stood behind their master in the chariot. The whole of Elijah's denunciation may possibly be recovered by putting together the words recalled by Jehu, 2 K. ix. 26, 36, 37, and those given in 1 K. xxi. 18-23.

3 A score of three or four years now elapses (comp. 1 K. xxi. 1, xxi. 51; 2 K. i. 17), before we again catch a glimpse of Elijah. The denunciations uttered in the vineyard of Nabaloth have been partly fulfilled. Ahab is dead, and his son and successor, Ahaziah, has met with a fatal accident, and is on his death-bed, after a short and troubled reign of less than two years (2 K. i. i. 2; 1 K. xxi. 51). In his extremity he sends to an oracle of Baal at the Philistine town of Ekron to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel, and, as on the former occasions, he suddenly appears on the path of the messengers, without preface or inquiry utters his message of death, and as rapidly disappears. The tone of his words is as national on this as on any former occasion, and, as before, they are authenticated by the name of Jehovah — "Thus saith Jehovah, Is it because there is no God in Israel that ye go to inquire of Baal-zebub, god of Ekron?" The messengers returned to the king too soon to have accomplished their mission. They were possibly strangers; at any rate they were ignorant of the name of the man who had thus interrupted their journey. But his appearance had fixed itself in their minds, and their description at once told Ahaziah, who must have seen the prophet about his father's court or have heard him described in the harem, who it was that had thus reversed the favorable oracle which he was hoping for from Ekron. The "hairy man" — the "lord of hair," so the Hebrew reading runs — with a belt of rough skin and hair, to which came and took this seven-headed, hammer, and uttered his fierce words in the name of the God of Israel, could be no other than the old enemy of his father and mother, Elijah the Tishbite. But ill as he was this check only roused the wrath of Ahaziah, and, with the spirit of his mother, he at once seized the opportunity of possessing himself of the person of the man who had been for so long the evil genius of his house. A captain was despatched with a party of fifty, to take Elijah prisoner. He was sitting [perhaps = "dwelt"] on the top of "the mount," v. e. probably of Carmel [comp. 2 K. ii 25]. The officer approached and addressed the prophet by the title which, as before noticed, is most frequently applied to him and Elisha — a C man of God, the king hath spoken: come down. "And Elijah answered and said, If I be a man of God, then let fire come down from heaven and consume thee and thy fifty! And the angel of Jehovah stood] fire from heaven and consumed him and his fifty." A second party was sent, only to meet the same fate. The altered tone of the leader of a third party, and the assurance of God that his servant need not fear, brought Elijah down. But the king gained nothing. The message was delivered to his face in the same words as it had been to the messengers, and Elijah, so we must conclude, was allowed to go harmless. This was his last interview with the hound of Ahaziah. It was also his last re corded appearance in person against the Baal-wor shippers.

Following as it did on Elijah's previous course of action, this event must have been a severe blow to the enemies of Jehovah. But impressive as it doubtless was to the contemporaries of the prophet, the story possesses a far deeper significance for us than it could have had for them. While it is not characteristic of the terrors of the earlier dispensation under which men were then living, it is remarkable as having served to elicit from the mouth of a greater than even Elijah an exposition, no less characteristic, of the distinction between that severe rule and the gentler dispensation which He came to introduce. It was when our Lord and his disciples were on their journey through this very district, from Galilee to Jerusalem, and whensmarting from the crude inhospitality of some Samaritan villagers, that — led to it by the distant view of the heights of Carmel, or, perhaps, by some traditional name on the road — the impetuous zeal of the two "sons of thunder" burst forth — Lord, wilt thou that we command fire to come down from heaven and consume them, even as Elijah did?" But they little knew the Master they addressed. "He turned and rebuked them, and said, Ye know not what manner of spirit ye are of. For the Son of Man is not come to destroy men's lives, but to save them" (Luke ix. 51-56). As if he had said, of place. The words following "He turned and rebuked them" (from "and said") to "save them" inclusive though so appropriate to the occasion, and so worthy of our Lord, are wanting in a large majority of the most important manuscripts (namely, A B C E G H L S V Ξ E and the Sinaitic) and in other leading authorities for the sentence of the text. They are accordingly rejected by Lachmann.
"Ye are mistaking and confounding the different standing points of the Old and New Covenants; taking your stand upon the Old—that of an avenging righteousness, when you should rejoice to take it upon the New—that of a forgiving love. (Trench, Miracles, ch. iv.)

4. It must have been shortly after the death of Ahaziah that Elijah made a communication with the southern kingdom. It is the only one of which any record remains, and its mention is the first and last time that the name of the prophet appears in the books of Chronicles. Mainly devoted as these books are, to the affairs of Judah, this is not surprising. The alliance between his enemy Ahab and Jehoshaphat cannot have been unknown to the prophet, and it must have made him regard the proceedings of the kings of Judah with more than ordinary interest. When, therefore, Jehoram, the son of Jehoshaphat, who had married the daughter of Ahab, began to walk in the ways of the kings of Israel, as did the house of Ahab, and to do that which was evil in the sight of Jehovah, Elijah sent him a letter denouncing his evil doings, and predicting his death (2 Chr. xx. 12-15). This letter has been considered by a great difficulty, on the supposed idea that Elijah's removal must have taken place before the death of Jehoshaphat (from the terms of the mention of Elisha in 2 K. iii. 11), and therefore before the accession of Joram to the throne of Judah. But admitting that Elijah had been translated before the expedition of Jehoshaphat against Moab, it does not follow that Joram was not at that time, and before his father's death, king of Judah. Jehoshaphat occupying himself during six or seven years of his life in going about the kingdom (2 Chr. xix. 4-11), and in conducting some important wars, amongst others that in question against Moab, while Joram was concerned with the more central affairs of the government (2 K. iii. 7, &c.).

That Joram began to reign during the lifetime of his father Jehoshaphat is stated in 2 K. vii. 11. According to 2 K. i. 17), which immediately precedes the account of Elijah's last acts on earth, Joram was actually on the throne of Judah at the time of Elijah's interview with Ahaziah; and though this is modified by the statements of other places (2 K. iii. i, viii. 16), yet it is not invalidated, and the conclusion is almost inevitable, as stated above, that Joram ascended the throne some years before the death of his father. (See JORAM; JEHOSHA- PHAT; JUBAL.) In its essentials the letter bears a strong resemblance to the speeches of Elijah, while in the details of style it is very peculiar, and quite different from the narrative in which it is imbedded (Barton, Chronicles, ad loc.).

5. The closing transaction of Elijah's life introduces us to a locality hitherto unconnected with him. Hitherto we have found him in the neighborhood of Samaria, Jeruel, Carmel, only leaving these northern places on actual emergency, but now we find him on the frontier of the two kingdoms, at the holy city of Bethel, with the sons of the prophets at Jericho, and in the valley of the Jordan (2 K. ii. 1, &c.).

It was at Gilgal—probably not the ancient place of Joshua and Sannan, but another of the same name still surviving on the western edge of the hills of Ephraim—that the prophet received the divine intimation that his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion. Perhaps his old love of solitude returned upon him, perhaps he wished to spare his friend the pain of a

Tischendorf, and Tregelles, though defended by Alfred, and, as far as ver. 55 is concerned, by Meyer and Bleek, who explain their omission by the supposition that the eye of the copist passed from KAI ELEJHAI to KAI ELHAI ELEJHAI. The fifth verse (so far as quoted above) which is wanting in D and a very few other documents which contain the rest of the words in question, is rejected by most critics, though the authorities which support it are substantially the same with those which contain ver. 55. Further, the words ταίς χάραις, "even as Elias did," in ver. 54, which are wanting in B, L, εμ, and the Sinaitic MS., also in the Cuneiform Syriac, Vulgate, and Armenian versions, and in some MSS. of the Old Latin and Coptic, are likewise rejected by Tischendorf and Tregelles, according to whom the whole passage as originally written reads thus: "Lord, wilt thou that we come down from heaven and destroy them? But he turned, and rebuked them; and they went no other way." The whole question is discussed by Mr. Norton in his Evidence of the Divinity of the Gospels in a very able and instructive note (vol. i. pp. lixxvii.-lixxviii., 2d ed. Boston, 1846). Though concluding that the words in question "did not make a part of the original text of Luke's Gospel," he goes on to remark:—

"But, on the other hand, the words carry with them strong extrinsic proof that they were spoken by Jesus. Nor can we imagine any reason why, if not uttered by him, they should have been invented and ascribed to him.

"In this state of the case, the only solution of the appearances that present themselves seems to be, that the words were spoken by our Lord, were written by him, that they were preserved in the memory of those who heard him and communicated by them to others, and that, not having been recorded by Luke, they were first written in the margin, and then introduced into the text of his Gospel."

The state of the external testimony is such, that he further supposes "that the account of the words of our Lord and his disciples was not introduced in a complete form at once; but that the text owes its present state to minor additions made at three different times: first, the words, 'As Elijah did,' being written down, as these are wanting in the smallest number of manuscripts, then those first spoken by our Lord, and then his remaining words."

a άγγέλιον, "a writing." [A. V.], almost identical with the word used in Arabic at the present day. The ordinary Hebrew word for a letter is סֵפֶר, a book.

b The second statement of Jehoram's accession to Israel (in 2 K. iii. 1) seems inserted there to make the subsequent narrative more complete. Its position there, subsequent to the story of Elijah's departure has probably assisted the ordinary belief in the difficulty in question.

c The ancient Jewish commentators get over the apparent difficulty by saying that the letter was written and sent after Elijah's translation. Others believed that it was the production of Elisha, for whose name that of Elijah had been substituted by copyists. The first of these requires no answer. To the second, the difficulty of its tone, as above noticed, is a sufficient reply. Josephus (Ant. ix. 5, § 2) says that the letter was sent while Elijah was still on earth. (See Lightfoot, Chronicles, &c., "Jehoram." Other theories will be found in Fabricius, Cod. Pseudoepis. 1. 1657, and others, Lec. rhythm. 4. p. 122.)

d The grounds for this inference are given under Elisha (p. 718). See also Gilgal.
ELIJAH

...sudden parting; in either case he endeavors to persuade Elisha to remain behind while he goes on an errand of Jehovah. "Tarry here, I pray thee, for Jehovah hath sent me to Bethel." But Elisha would not so easily give up his master—"as Jehovah liveth and as thy soul liveth I will not leave thee." They went together to Bethel. The event which was about to happen had apparently been communicated to the sons of the prophets at Bethel, and they inquire if Elisha knew of his impending loss. His answer shows how fully he was aware of it. "Yea," says he, "with all the emphasis possible, indeed I do know it, hold ye your peace." But though intending, it was not to happen that day. Again Elisha attempts to escape to Jericho, and again Elisha protests that he will not be separated from him. Again, also, the sons of the prophets at Jericho make the same unnecessary inquiries, and again he replies as emphatically as before. Elisha makes a final effort to avoid what they both so much dread. "Tarry here, I pray thee, for Jehovah hath sent me to the Jordan." But Elisha is not to be conquered, and the two set off across the 'undulating plain of burning sand, to the distant river.—Elisha in his mantle or cape of sheep-skin, Elisha in ordinary clothes (2 Kings, ver. 12). Fifty men of the sons of the prophets ascend the abrupt heights behind the town—the same to which a late tradition would attach the scene of our Lord's temptation—and which command the plain below, to watch with the clearness of eastern vision what happens in the distance. Talking as they go, the two reach the river, and stand on the shelving bank beside its swift brown current. But they are not to stop even here. It is as if the aged Gideon could not rest till he again sets foot on his own side of the river. He rolls up his mantle as into a staff, and with his old energy strikes the waters as Moses had done before him—strikes them as if they were an enemy: and they are divided hither and thither, and they two go on over dry ground. What follows is best told in the simple words of the narrative. "And it came to pass when they were gone over, that Elijah said to Elisha, Ask what I shall do for thee, before I be taken away from thee.

a The Hebrew word "went down" is a serious difficulty, if Gilgal is taken to be the site of Joshua's camp and the resting-place of the ark, since that is more than 3000 feet below Bethel. But this is avoided by adopting the other Gilgal to the N. W. of Bethel, and on still higher ground, which also preserves the sequence of the journey to Jordan. (See Stanley, S. & P. p. 598, note.) Some considerations in favor of this adoption will be found under Elisha.

b "Also I know it;" Kâyêh fuywâa.

c tâshîrîni. The above is quite the force of the word.

d The word is tâshîrîni, used of smiting in battle; generally with the sense of wounding (Gecon. p. 885). e LXX. "As they were going over," is τὸ διά

f The statements of the text hardly give support to the usual conception of Elijah's departure as represented by painters and in popular discourses. It was not in the charity of a man that he went up as Jeho

g The fire served to part the master from the disciple, to show that the severance had arrived, but Elijah was taken up by the fierce wind of the tempest. The word tâshîrîni involves no idea of whirling, and is frequently rendered in the A. V. "storm" or "tempest." The term "the skies" has been employed above to translate the Hebrew נוער יִתְנָה, because we attach an idea to the word "heaven" which does not appear to have been present to the mind of the ancient Hebrews. (The word, among its other senses, often denotes the place of God's abode, and may very properly be so understood here. Indeed, that meaning only agrees with 2 K. ii. 1, and with the general tenor of the narrative.—H. J.)

9 "Also I know it;" the word used amongst others for the "great and bitter cry" when the first-born were killed in Egypt.

The expression in Malachi is "Elijah the prophet." From this unusual title some have believed that another Elijah was intended. The LXX., however, either following a different Hebrew text from that which we possess, or falling in with the belief of their times, insert the usual designation, "the Tichlith." (See Lightfoot, Exercit. on Luke i. 17.)

He is recorded as having often appeared to the wise and good rabbis—at prayer in the wilderness, or on their journeys—generally in the form of an Arabian merchant (Kleinmann, l. II. 402-7). At the circumcision of a child a seat was always placed...
on every page of the Gospels. Each remarkable person, as he arrives on the scene, be his habits and character what they may — the stern John equally with his gentle Successor — is proclaimed to be Elijah (Matt. xvi. 14; Mark vi. 15; John i. 21). His appearance in glory on the Mount of Transfiguration does not seem to have startled the disciples. They were "sore afraid," but not apparently surprised. On the contrary, St. Peter immediately proposes to erect a tent for the prophet whose arrival they had been so long expecting. [See Transfiguration, Amur. 8.] In pronouncing the name of Lord Jesus, to whom the cross, containing as it did but a slight resemblance to the name of Elijah, immediately suggested him to the bystanders. "He calleth for Elijah." "Let be, let us see if Elijah will come to save him."

How far this expectation was fulfilled in John, and the remarkable agreement in the characteristics of these two men, will be considered under John the Baptist.

But on the other hand, the deep impression which Elijah had thus made on his nation only renders more remarkable the departure which the image conveyed by the later references to him evinces, from that so sharply presented in the records of his actual life. With the exception of the allusions contained in the catalogues of worthies in the book of Jesus the son of Sirach (xiv.) and 1 Macc. i. 59, and the passing allusion in Luke xv. 54, none of these later references allude to his works of destruction or of potency. They all set forth a very different side of his character to that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (James v. 17); of his kindness to the widow of Sarepta (Luke iv. 25); of his "restoring all things" (Matt. xviii. 11); of "turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just." (Mal. iv. 6, 6, Luke i. 17). The moral lessons to be derived from these facts must be expanded elsewhere than here; it will be sufficient in this place to call attention to the great differences which may exist between the popular and contemporary view of an eminent character, and the real settled judgment formed in the progress of time, when the excitement of his more brilliant but more evanescent deeds has passed away. Precious indeed are the scattered hints and faint touches which enable us thus to soften the harsh outlines or the discordant coloring of the earlier picture. In the present instance they are peculiarly so. That wild figure, that stern voice, those deeds of blood, which stand out in such startling relief from the pages of the old records of Elijah, are seen by us all slurred over with the "white and glistering" light of the Mountain of Transfiguration. When he last stood on the soil of his native Gilead he was destitute, afflicted, tormented, wandering about "in sheep-skins and goat-skins, in deserts and mountains, and dens and caves of the earth." His teachings have passed away beyond the distance, and with them has receded the fiery zeal, the destructive wrath, which accompanied them. Under that heavenly light they fall back into their proper proportions, and Abah and Zebedee, Baal and Ashraoth are forgotten, as we listen to the prophet talking to our Lord — talking of that event which was to be the consummation of all that he had suffered and striven for — "talking of his decease which he should accomplish at Jerusalem."

Elijah has been enumerated in both the Greek and Latin churches. Among the Greeks Mt. Elip. is the patron of elevated spots, and many a conspicuous summit in Greece is called by his name. The service for his day — Ασαρας μεγαλοπρς — will be found in the Moscow on July 21, a date recognized by the Latin church also. The convent bearing his name, Their Mt. Elijah, between Jerusalem and Bethlehem, is well known to travellers in the Holy Land. It purports to be situated on the spot of his birth, as already observed. Other convents bearing his name once existed in Palest. in Jebel Aljiah, the ancient Gilead (Ritter, Syria, pp. 1029, 1066, &c.); at Ezra in the Hauran (Burchhardt, Syria, p. 59), and the more famous establishment on Carnæd.

It is as connected with the great order of the bardest Carmelites that Elijah is celebrated in the Latin church. According to the statements of the breviary (Off. B. Mariae Virginis de Monte Carmelo, July 21) the connection arose from the dedication to the Virgin of a chapel on the spot from which Elijah saw the cloud (an accepted type of the Virgin Mary) rise out of the sea. But other legends trace the origin of the order to the great prophet himself as the head of a society of ascetics inhabiting Carmel, and even as himself dedicating the chapel in which he was worshipped to the Virgin. These things are matters of controversy for him, that as the zealous champion and messenger of the "covenant" of circumcision (I. xvi. 14; Mal. ii. 1) he might watch over the true performance of the rite. During certain prayers the door of the house was set open that Elijah might enter and announce the Messiah (Klosterm. 1. 655). His coming will be three days before that of Messiah, and on each of the three he will proclaim, in a voice which shall be heard all over the earth, peace, happiness, salvation, respectively (Klosterm. ii. 362). So firm was the conviction of his speedy arrival, that when goods were found and no owner appeared to claim them, the common saying was, "Put them by till Elijah comes" (Abad, Excerpt. Matt. xviii 10; John i. 21). The same customs and expressions are preserved in use among the stricter classes of this and other countries. [See bottom of the page, xxvi. 131, &c.] See also the art Elijah in Hamburger's Real-Encycl. f. Bibl. 

a Tawdor. — A. J.

b On this subject there is an essay entitled Der Prophet Elijah in die Lehnze, in Franklin's Manuscript, f. Jerusalem, 1863, xiii. 201 ff. 281

c The writer divides the legends into three periods: the first, of pure Messianic expectation, closes with the Messian; the second, in which Elijah is represented as taking part in human affairs even before his Messianic coming, closes with the Tantalus; in the third the legends reach the height of extravagance. On the Jewish expectations in regard to Elijah in the time of Christ see Norton's note on Matt. xi. 10 (Translation of the Gospels, ii. 113-113); Berthold, Christol. P. 85 ff. Most of the Christian fathers believed that Elijah would be the precursor of Christ in his second coming; see Sumer's Thes. i. 185, also 322-3, and Stuart's Comm. on the Apocalypse, i. 221 ff. A.

a The considerations adumbrated by Stanley (S. & P. p. 232, Amer. ed.) in favor of the Mountain of Transfiguration being on the east of Jordan. [See Herods., Tawdor.]

b See this fact noticed in Clark's Polyglottus and Margin, p. 190.

c See the Acta Sanctorum, July 20. By Cornelius a Lapide it is maintained that his ascent happened on that day, in the 15th year of Jehoshaphat (Keli, p. 3311).

d S. John of Jerusalem, as quoted by Mista, Liona
in the Roman church, Barons and others having proved that the order was founded in 1181, a date which is repudiated by the Carmelites (see extracts in Fabricius, Cod. L. Scien. injur. i. 1077).

In the Mohammedan traditions Elijah is said to have drunk of the Fountain of Life, "by virtue of which he still lives, and will live to the day of Judgment." He is by some confounded with St. George and with the mysterious al-Khidr, one of the most remarkable of the Muslim saints (see Lane's Archivum Orientalium, intro. note 2; alsoSelections from the Kuritas, 221, 222). The Persian Soffa are said to trace themselves back to Elijah (Fabricius, i. 1077).

Among other traditions it must not be omitted that the words "Eye hath not seen," &c., 1 Cor. ii. 9, which are most probably quoted by the Apostle from Isaiah xlv. 4, were, according to an ancient belief, from "the Apocalypse, or mysteries of Elijah," τά Ἡλίαν σημαδεφονά (see comp. Rom. xi. 2).

Two monographs on Elijah must not be overlooked: (1) that of Frissenschuh, De Eliae Prophetis Nom., &c., in the Crítica Sacra; and (2) Elias Thebesita, by Eugénis Camartus, 4to, Paris, 1631.

There are also dissertations of great interest on the rambles, the mountain, and Naboth, in the Crítica Sacra.

G.

* The Biblical facts relating to Elijah, accompanied with suggestive remarks on his character and the significance of his ministry, have been wrought into an interesting form by Mr. Stanley, in the second volume of his Lectures on the History of the Jewish Church (p. 321 ff.), published since the preceding article was written. It is difficult to represent the composition by any single extract; but the following scene, that of the coming tempest as described from the top of Carmel, and the flight of the prophet to Jezezel, is described with remarkable truthfulness and beauty: "At the top of the mountain, but on a lower declivity (see 1 K. xvii. 43, 44), Elijah bent himself down, with his head, in the oriental attitude of entire abstraction, placed between his knees; whilst his attendant boy mounted to the highest point of all, whence, over the western ridge, there - a wide view of the Mediterranean sea. The sun must have been now come down. But the cloudless sky would be lit up by the long bright glow which succeeds an eastern sunset. Seven times the youthful watcher [Elijah's attendant] ascended and looked; and seven times 'there was nothing.' The sky was still clear; the sea was still calm. At last, out of the far horizon there arose a little cloud, the first that for days and months had passed across the heavens; and it grew.

Saints, ii. 49; and the Bulls of various Popes enumerated by Quaresimus, vol. ii.

* This running of the prophet before the king's horsemen, at the top of his speed, a distance of 12 miles across the plain from Carmel to Jezezel, is not unlike what is still practiced in the East by runners who precede persons of rank as a mark of homage or as part of the official equipage. See a striking illustration of this in Thomson's Land and Boats, ii. 227.

in the deepening shades of evening, and quickly the whole sky was overcast, and the forests of Carmel shook in the welcome sound of those mighty winds which in eastern regions precede a coming tempest. Each from his separate height, the King and the Prophet descended. The cry of the boy from his mountain watch had hardly been uttered when the storm broke upon the plain, and the torrent of Kishon began to swell. The King had not a moment to lose, lest he should be unable to reach Jezezel. He mounted his chariot at the foot of the hill. And Elijah was touched as by a supporting hand; and he snatched up his streaming mantle and twisted it round his bays, and made the rushing storm with which the night closed in, he outstripped even the speed of the royal horses, and 'ran before the chariot' - as that Belthousier of his native Gilead would still run - with inextinguishable strength, to the entrance of Jezezel, distant, though visible, from the scene of his triumph."

The history and character of Elijah have furnished numerous texts for homiletic uses. Of the writers who have applied the teachings of the narrative in this way, they may be mentioned Gottfried Menken, Houillin ab. die Gesch. des Prophet Elijah, xxiv. discourses (Schriften, i. 17-302, Bremen, 1858); Fr. W. Krummacher, whose Elijah der Thäubter (Elberf. 1828-33, 5th Ausg. 1860, Eng. trans. Lond. 1840, Amer. ed. N. Y. 1847) has been extensively read in English as well as German; and Bishop Hall, Contemplations on Passages of the Old and New Testaments (books xiii. and xiv.). Some of the best chapters in Kitto's Daily Bible Illustrations are those which relate to events in the biography of this prophet. One of Kohlé's hymns in the Christian Year is entitled "Elijah in Horeb." See also Edward's Geschichte des Volkes Israel, iii. 524 ff., 3rd Ausg. (to whom Stanley acknowledges himself greatly indebted); Winer, Realw. i. 317-20; Knobel, Der Prophetenwesen der Hebr. ii. 73-88; Keil, Die Propheten des A. u. N. Test. pp. 70-82; Kurtz's article, though brief, in Herzog's Real-Encycl. iii. 754-758; Friedr. Lud. Hasse, Gesch. des Alten Bundes, pp. 97-102 (Leipzig 1863); Milman's Hist. of the Jews, i. 383-401 (Amer. ed.); and the valuable article in Fairbairn's Imperial Bible Dictionary, i. 502-509.

ELIKA (Ελικα): [Rom. Vat. om]; Comp. [Ελικα]; Alex. [Ελικα]; Elco, a Harolite, i. e. from some place called Charod (Harod in A. V. Judg. vii. 1); one of David's guard (2 Sam. xxii. 25). The name is omitted in the corresponding list of I Chr. xi. 27, to account for which see Kennicott's conjecture (Dissertation, &c., p. 182).

* The etymology is unknown (Gen.). First derives it from Ν(η)Ια and Ν(η)ΙΑ, God is regenerator, i. e. of a nation or individual.

ELIM (Ελιμ; Ελιμ): [Alkeia; [Elin]], mentioned Ex. xv. 27; Num. xxxvii. 9, as the second station where the Israelites encamped after crossing the Red Sea. It is distinguished as having had "twelve wells (rather 'fountains,' τῶν ἀρετῶν) of

9 Root Ν(η)ΙΑ, or Ν(η)ΙΑ, to be strong, hence a strong tree, properly either an οικον or a terentibus, but also generally a tree: "here in plural as the trees of the desert" (Stanley, S. & F. P. 514, § 70). Eloth or Elath is another plural, form of the same. [Gen. 36: and First says 'palms.']
ELIMELECH

[Chap. xxxiv. 27] supposed to be Elimelech, the head of one of four
walled towns lying between 2° 5' N., and 2° 29' S., which
descend from the range of the Thib (here nearly parallel
to the coast), towards the sea, and which the
Israelites, going from N. W. to S. E. along the
coast would come upon in the following order:—
W. Gluewodl, where "the low hills" begin,
Stanley, S. of P. (p. 35), W. Ucest, W. Thul, and
H. Tugheb. The last being in its lower part
called also W. Tugilheb, or having a junction with
one of that name. Between Ucest and Tugilheb,
the coast-range of these hills rises into the Gobel
Hammam, "bitty and precipices, extending in
several peaks along the shore, apparently of chalky
limestone, mostly covered with flints ... its precipices ...
cut off all passage along shore from the high springs
lying a little W. of S. from the mouth of Wadu Ucest,
along the coast to the mouth of W. Tugilheb" (Rob. 1. 46; comp. Stanley, S. of P. p. 35).
Hence, between the courses of these walled towns
of the Israelites must have been inland. Dr.
Stanley says, "Elimelech must be Gluewodl, Ucest, or
Tugilheb," (p. 35); elsewhere (p. 66), that "one of
two valleys, or perhaps bath, must be Elimelech;" these appear from the sequel to be Gluewodl and
Ucest, "fringed with trees and shrubs, the first
vegetation which he met with in the desert;" among
these are "wild palms," not stately trees, but
dwarf or savage, "tamarisks," and the "wild acacia."

Lepsius takes another view, namely, that Gluewodl
is Mara, by others identified with Horowah (2)
hours N. W. from Gluewodl, and reached by the
Israelites, therefore, before it; and that Elimelech is
to be found in the list of the four above named,
H. Studeikh (Lepsius, Travels, Berlin, 1845, 8. 1
27 II.). [Wilderness of the Wandering.]

H. H.

ELIMELECH [Heb. unmeleh] רְמֹלָאֵלָא. "Amalek; [Vat. Abimelech; Alex. Kamiléx; λ'εκ, Aṣωmēlēk; Elimelech], a man of the tribe of Judah, and of the family of the House and the
kinsman of Buz, who dwelt in Bethlehem, Ephrath in the days of the Judges. In conse-
quence of a great death in the land he went with
his wife Naomi, and his two sons, Mahalon and
Chilion, to dwell in Moab, where he and his sons
died without posterity. Naomi returned to Beth-
lehem with Ruth, her daughter-in-law, whose mar-
riage with Buz, "a mighty man of wealth, of the
family of Elimelech," "his husband's kinsman,
forms the subject of the book of Ruth. (Ruth
1, 2, 3, 4, 5, 6, 7, 8, 9, 10; A. C. H.)

* Elimelech signifies, if he be pronounced, my God
is king; but it merely paragoge, God is king.
This import of the name, as Ges. remarks (Keller
u. Ruth in Lange's Bibelkpark, p. 265), indicates
the rank of Elimelech's family, since all the names
with this element רְמֹלָאֵלָא, as far as we know, e. g.,
Abimelech, Abimelek, were borne by eminent per-
sons. How long he lived after the arrival in Moab
is uncertain; for though evidently the sons were
not married till after his death (Ruth i. 3, 4), it
does not appear how many of the ten years of the
sojourn there had elapsed (ver. 4) when the sons
were married. [Ruth: Ruth, Book of.] H.

ELIOKAMAI [S. syn. 4 in Heb.] (111112) (into Jehovah are my eyes, Ges.;) [Elo'kamai; Vat. Elekamai; Alex. Alexapar; Elo'kamai]. 1. Head of one of the families of the sons of Becher, the
son of Toba. (1 Chr. vii. 8).

2. [Elokaia; Alex. Alexapar.] Head of a family of the Simeonites (1 Chr. iv. 36).

(3. [Accus. Elokkamai [S. syn.], ἀποξόμενον. [Vat. Vat. -yos; Alex. Alexapar;] Seventh son of Meselemih, the son of Korer, the
son of Asaph, a Kohite Levite, and one of the door-
keepers of the "house of Jehovah" (1 Chr. xxvi.
3). It appears from ver. 14 that the lot fell to Mechemiel (Sholemiah) to have the east-gate; and as we learn from ver. 9 that he had eighteen strong
men of his sons and brethren under him, we
may conclude that all his sons except Zechariah
the first-born (ver. 14) served with him, and there-
fore had no need to draw them. There were six Levites daily on guard at the east-gate, whose turn would therefore come every third day.

4. [Elekophaios; Vat. Elekophaios, -phaios; Alex. Alexopar, -phaios.] Eldest son of Neziah, the son
of Shemaiah, 1 Chr. iii. 23, 24. According to the
present Heb. text he is in the seventh generation
from Zerubbabel, or about contemporary with Alex-
ander the Great; but there are strong grounds for
believing that Shemaiah is identical with Shimei
(ver. 19); Zerubbabel's brother. (See General,
or, 107, 108, and ch. vii.)

5. [In Ezz. 'Elekaios; Vat. F. -kos; Alex. Alexopar; in Neh., Kom. Vat. Alex. omit; F.A. a Elekapios; Comp. Abd. Elekaios.] A priest of the sons of Pashur, in the days of Ezra, one of those
who had married foreign wives, but who, at Ezra's
instigation, put them away with the children born
of them, and offered a ram for a trespass-offering
(Ezr. x. 22). He is possibly the same as is men-
tioned in Neh. xii. 31, as one of the priests who
accompanied Nehemiah with trumpets at the ded-
ication of the wall of Jerusalem. He is called
Eliakim, 1 Esdr. ix. 22.

6. [Elekaps.; Vat. -pa; F. -pas; Alex. Elekaps;] 2 in Elekaps. An Israelite, the
son of Zattu, who had also married a strange wife
(Ezz. x. 27). From the position of Zattu in the
lists, Ezr. ii. 8, Neh. vii. 14, x. 14, it was prob-
ably a family of high rank. Elekaps is corrup-
ted to Eliakim, 1 Esdr. ix. 28.

A. C. H.

ELOXAS. 1. (Elo'xas, Alex. Alexas; Abd. Elekas; Vat. omits), 1 Esdr. ix. 28. [Elo'xas; 5.]

* The A. V. col. 461, with the genevan version
and the Bishops' Bible, following, as usual, the
Aldine edition, reads Eli'xasas.

2. (Elexas; Vat. Elexas; Nom. et), 1 Esdr. ix. 32. [Elexas, 10.]

ELIPHIL [חֵסַל, on whom God judges, Ges.]: [Ex'fl; Alex. Alexapar; Comp. Elephas; Elipha] kph], son of Ur; one of the 
members of David's

a Seetzen (Reserv. 1851, iii. 111-117) traversed them all, and reached Howard in about a six hours' ride.

b Seetzen (Reserv. 1851, iii. 111-117) traversed them all, and reached Howard in about a six hours' ride. He arrived in the opposite direction to the route of Robinson and Stanley; and it is interesting to com-
nare his notes of the local features, caught in the
ppen order, with theirs.
ELIPHALAT

ELIPHALAT (Ελιφαλάτ; [Vat. -λητ]: Eliphalat), 1 Esdr. ix. 33. [Ελιφαλατ].

ELIPHALAT [Heb. Eliphat] (אֵלְפֵּחַת; [God delicides]); [in 2 Sam. 'Ελιφαλάτ; Vat. Ελιφαλάτ; Αξ. Ελιφαλάτ; in 1 Chr. 'Ελιφαλάτ; [Alex. -λητ; Vat. Ελιφαλάτ, Αξ. Ελιφαλάτ, FA. Ελιφαλάτ.; Eliphalath, [Eliphalath]). I. The last of the thirteen sons born to David, by his wives, after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. xiv. 7). Elsewhere, when it does not occur at a pause, the name is given with the shorter vowel — ELIPHALAT (1 Chr. iii. 8). Equivalent to Eliphalat are the names ELIPHEL and PHILHEL.

2. 1 Esdr. viii. 39. [Ελιφαλάτ, Αξ. -λητ; Ald. Alex. Ελιφαλάτας: Eliphalam. [Ελιφαλατ, Ελιφαλάτ].

ELIPHAZ (אֵלְפָּחַז; [God's strength]; Elipha) [in 1 Chr. Eliphas]. [Vat. Eliphas]. 1. The son of Esau and Adah, and father of Teman (Gen. xxxvi. 4, 10-16; 1 Chr. i. 35, 36).

2. [Ελιφαζ]: Alex. once -φαζ; Vat. Sin. Ελιφαζας; Ελιφας; Vat. twice Ελιφαζας; Ελιφας. Eliphas. The chief of the "three friends" of Job. He is called "the Temanite." It is now usually inferred that he was a descendant of Teman (the son of the first Eliphas), from whom a portion of Arabia Petrea took its name, and whose name is used as a poetical parallel to Edom in Jer. xlix. 21. On him falls the main burden of the argument. It shows God's retribution in this world is perfect and certain, and that consequent suffering must be a proof of previous sin (Job iv., v., xv., xxii.). His words are distinguished from those of Bildad and Zophar by greater calmness and elaboration, and in the first instance by greater gentleness towards Job, although he ventures afterwards, apparently from conjecture, to impute to him special sins. The great truth brought out by him is the unanswerable majesty and purity of God (IV. 12-21, xv. 12-16). [Job, Book 1.] But still, with the other two friends, he is condemned for having, in defiance of God's providence, spoken of him "the thing that was not right," i.e. by refusing to recognize the facts of human life, and by contending himself with an imperfect retribution as worthy to set forth the righteous God. On sacrifice and the intercession of Job all three are pardoned (xlii. 7-9). A. B.

ELIPHELEH (אֵלְפִּיאֶלֶה; [God distinguishes], i.e. Eliphalek, Elipha'leh, Elipha'l. Alex. Elifa'la, [Ελιφαλάς: Vat. Ελιφαλάς, Εφαλάς; ΕΦιφαλάς; Εφαλάς; Eliphal, a Merutite Levite: one of the gatekeepers (יוֹרֵשׁ, A. V. "porters") appointed by David to play on the harp "on the Sheminith" on the occasion of bringing up the Ark to the city of David (1 Chr. xv. 18, 21).

ELIPHELEH [Heb. Eliphat] (אֵלְפִּיאֶלֶה; [God delicides]).

1. (Ελιφαλάτ; [Vat. -λητ]: Alex. Eliphalas; Eliphalat. The name of a son of David, one of the children born to him, by his wives, after his establishment in Jerusalem (1 Chr. iii. 6). In the list in 2 Sam. v. 15, 16, this name and another are omitted; while in another list in 1 Chr. xiv. 5, 6, it is given as ELIPHALAT.

2. (Ελιφαλάτ: [Vat. -λητ; Alex. Eliphalat, Eliphalat.) Another son of David, belonging also to the Jerusalem family, and apparently the last of his sons (1 Chr. iii. 8). In the other list occurring at the pause, the vowel is lengthened and the name becomes ELIPHALAT. It is believed by some that there were not two sons of this name; but that, like Nogah, one is merely a transcriber's repetition. The two are certainly sons of Samuel, but on the other hand they are inserted in two separate lists in Chronicles, and in both cases the number of sons is summed up at the close of the list.

3. (Ελιφαλάτ; [Vat. -λητ; Alex. Eliphalat; Eliphalat.). Son of Absalom, son of the Machathite. One of the thirty warriors of David's guard (2 Sam. xxiii. 34). In the list in 1 Chr. xi. the name is abbreviated into ELIMAL.

4. [Ελιφαλάτ; Vat. Ελιφαλατές; Eliphalat.) Son of Ezekiel, a descendant of King Saul through Jonathan (1 Chr. viii. 33).

5. [Ελιφαλάτ; Alex. -ληθ; Vat. Ελιφαλατί; Ελιφαλατί. Another of the chief of the Bene-Adonikah, who returned from Babylon with Ezra (Ezr. viii. 13). [Ελιφαλατ, Ελιφαλατ].

6. [Ελιφαλάτ; Vat. FA. Ελιφαλατές; Eliphalat.) A man of the Bene-Hashum, in the time of Ezra, who had married a foreign wife and had to relinquish her (Ezr. x. 33). [Ελιφαλατ].

ELIS'ABETH (Ελισαβέτ; [Elisabeth]), the wife of Zacharias and mother of John the Baptist (Luke i. 5 ff.). She was herself the priestly family, of ἐν τῶν βασιλείων Πατρόν, and a relation (συγγένιος, Luke i. 36) of the mother of our Lord, Mary, the mother of Jesus). She is described as a person of great piety, and was the first to greet Mary, on her coming to visit her, as the mother of her Lord (Luke i. 42 ff.).

H. A.

* For the import of the name, see ELISHERA. The wife of Aaron bore the same name (Ex. vi. 23), and hence it is one that the females of a sacerdotal family like this of Elisabeth (Luke i. 5) would be apt to have given to them. The Greek form arose, says Fürst (Hebr. u. Chald. Handw. i. 93, from Ἑλισαβέτ. How she was related to Mary the mother of Jesus, is uncertain. It may have been on the side of her own mother (her father being a Levite) as a descendant of David, or on that of Mary's mother (her father being of the house of David) as a descendant of Aaron. Marriages between those of different tribes were not forbidden, except when there were no sons, and the rights of property vested in daughters.

ELISHA (אֵלְישָׁה; [God is salvation], i.e. he who saves]: Ελισα/ά: Ελισα/ά: Ελισα/ά. Joseph. Ελισα/ά: Ελισα/ά: son of Shaphat of Abelmeholah. a. The attendant and disciple of κοίμησιν αὐτής; Eliphelain.

a The story in the Chronic. Paschale and epiphanius
ELISHA

el Shidkoves, Joseph. Ant. viii. 13, § 7) of Elijah, and subsequently his successor as prophet of the kingdom of Israel.

The earliest mention of his name is in the command to Elijah in the cave at Horeb (1 K. xix. 16, 17). But our first introduction to the future prophet is in the fields of his native place. Abel-meholah — the "meadow of the dance" — was probably in the valley of the Jordan, and, as its name would seem to indicate, in a moist or watered situation. [Ant.] Elijah, on his way from Sinai to Damascus by the Jordan valley, lights on his successor engaged in the labors of the field, twelve yoke before him, i. e. either twelve ploughs at work in other parts of the field, or more probably twelve "yokes" of land already ploughed, and he himself engaged on the last.  

To cross to him (i. e. on the other side of the Jordan), to throw over his shoulders the rough mantle — a token at once of investiture with the prophet's office, and of adoption as a son — was to Elijah but the work of an instant, and the prophet strode on as if what he had done were nothing.  

"Go back again, for what have I done unto thee?"  

So sudden and weighty a call, involving the relinquishment of a position so substantial, and family ties so dear, might well have caused hesitation. But the parley was only momentary. To use a figure which we may almost believe to have been suggested by this very occurrence, Elisha was not a man who, having put his hand to the plough, was likely to look back;  

"he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road to become to him what in the earlier times of his nation Joshua had been to Moses.  

Of the nature of this connection we know hardly anything.  "Elisha the son of Shaphat, who poured water on the hands of Elijah,  

is that all is told us. The characters of the two men were thoroughly dissimilar, but how far the like-minded and courageous one had infused itself into the other, we can judge from the few occasions on which it blazed forth, while every line of the narrative of Elijah's last hours on earth bears evidence how deep was the personal affection which the stern, rough, reserved master had engendered in his gentle and plant disciple.  

Seven or eight years must have passed between the call of Elisha and the removal of his master, and during the whole of that time we hear nothing of him. But when that period had elapsed he reappears, to become the most prominent figure in the history of his country during the rest of his long life. It almost every respect Elisha resembles the most complete contrast to Elijah. The copious collection of his sayings and doings which are preserved in the 21st to the 24th chapter of the 21st book of Kings, though in many respects deficient in that remarkable vividness which we have noticed in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true Bedouin child of the desert. The clots of the Cherith, the wild shrubs of the desert, the cave at Horeb, the top of Carmel, were his haunts and his resting-places. If he enters a city, it is only to deliver his message of fire and the coming day; Elisha, on the other hand, is a civilized man, an inhabitant of cities. He passed from the translation of his master to dwell (222, A. V. "tarry") at Jericho (2 K. ii. 18); from thence he "returned" to Samaria (ver. 23). At Samaria (v. 6, vi. 32, comp. ver. 24) and at Dothan (vi. 13) he seems regularly to have resided in a house (v. 6, 24, vi. 32, xiii. 17) with "doors" and "windows," in familiar intercourse with the sons of the prophets, with the elders (vi. 32), with the lady of Shunem, the general of Damascus, the king of Israel. Over the king and the "captain of the host" he seems to have possessed some special influence, capable of being turned to material advantage if desired (2 K. iv. 13). And as with his manners so with his appearance. The touches of the narrative are very lively, and it is easy to form in one's mind that his garb was the ordinary garment of an Israelite, the begild, probably similar in form to the long tabby of the modern Syrians (2 K. ii. 12), that his hair was worn trimmed behind, in contrast to the disordered locks of Elijah (ii. 23, as explained below), and that he used a walking-staff (iv. 29) of the kind ordinarily carried by grave or aged citizens (Zech. viii. 4). What use he made of the rough mantle of Elijah, which came into his possession at their parting, does not anywhere appear, but there is no hint of his ever having worn it.

If from these external peculiarities we turn to the internal characteristics of the two, and to the results which they produced on their contemporaries, the differences which they present are highly instructive. Elijah was emphatically a destroyer. His mission was to slay and to demolish whatever opposed or interfered with the rights of Jehovah, the Lord of Hosts. The nation had adopted a god of power and force, and they were such a god, he was weakness itself compared with the God whom they had forsaken. But after Elijah the destroyer comes Elisha the healer. "There shall not be dew nor rain these years" is the proclamation of the one. "There shall not be from hence any death and when at the end of the field, they can return along the same line, and thus back and forth until the whole is ploughed. It was well that Elisha came the last of the twelve, for the act of Elijah would have stopped all that were in advance of him. They cannot pass one another."  

II.  

b So our translation, and so the latest Jewish rendering (Zuma). Other versions interpret the passage differently.

c According to Josephus (Ant. viii. 13, § 7) he began to prophesy immediately.

d The word ursday, A. V. "ministered to him;" is the same that is employed of Joshua (Josh. iii. 13) in relation to Elisha, except once, is designated by a different word,  יבש = "bad" or "youth."
ELISHA 715

or barren land" is the first miracle of the other. What may have been the disposition of Elijah when not engaged in the actual service of his mission we have unhappily no means of knowing. Like most men of strong stern character, he had probably affections no less strong. But it is impossible to conceive of Jezebel returned from the practice of that beneficence which is so strikingly characteristic of Elisha, and which comes out at almost every step of his career. Still more impossible is it to conceive him exercising the tolerance towards the person and the religion of foreigners for which Elisha is remarkable—in communication, for example, with Naaman or Hazael; in the one case calming with a word of peace the scruples of the newly converted, anxious to reconcile the due homage to Rimmon with his allegiance to Jehovah; in the other case contemplating with tears, but still with tears only, the evil which the future king of Syria was to bring on his country. That Baal-worship was prevalent in Israel even after the efforts of Elijah, and that Samaria was its chief seat, we have the evidence of the narrative of Jehu to assure us (2 K. x. 18-27), but yet not one act or word in disapproval of it is recorded of Elisha. True, he could be as zealous in his feelings and as cutting in his words as Elijah. "What have I to do with thee?" says he to the son of Ahab—"this son of a murderer," as on another occasion he called him—"what have I to do with thee? get thee to the prophets of thy father and to the prophets of thy mother. As the Lord of hosts liveth before whom I stand,"—the very formula of Elijah—"surely were it not that I regard the presence of Elisha, the son of Shaphat of Abel-meholah, that I would not look toward thee nor see thee!" But after this expression of wrath he allows himself to be calmed by the music of the minstrel, and ends by giving the three kings the counsel which frees them from their difficulty. So also he smiles the host of the Syrians with blindness, but it is merely for a temporary purpose; and the adventure concludes by his preparing great provision for them, and sending these enemies of Israel and worshippers of false gods back to their master as his munition.

In considering these differences the fact must not be lost sight of that, notwithstanding their greater extent and greater detail, the notices of Elisha really convey a much more imperfect idea of the man than those of Elijah. The prophets of the nation of Israel—both the predecessors of Elisha, like Samuel and Elijah, and his successors, like Isaiah and Jeremiah—are represented to us as preachers of righteousness, or champions of Jehovah against false gods, or judges and deliverers of their country, or counsellors of their sovereign in times of peril and difficulty. Their miracles and wonderful acts are introduced as means toward these ends, and are kept in the most complete subordination thereto. But with Elisha, as he is pictured in these narratives, the case is completely reversed. With him the miracles are everything, the prophet's work nothing. The man who was for years the intimate companion of Elijah, on whom Elijah's mantle descended, and who was gifted with a double portion of his spirit, appears in these narrations simply as a worker of prodigies, a predictor of future events, a reveler of things happening out of sight or at a distance. The working of wonders seems to be a natural accompaniment of false religions, and we may be sure that Baal-worship of Samaria and Jezebel was not free from such arts. The story of 1 K. xxii. shows that even before Elisha's time the prophets had come to be looked upon as diviners, and were consulted, not on questions of truth and justice, nor even as depositaries of the purposes and will of the Deity, but as able to foretell how an adventure or a project was likely to turn out, whether it might be embarked in without personal danger or loss. But if this degradation is inherent in false worship, it is no less a principle in true religion to accommodate itself to a state of things already existing, and out of the forms of the alien or the false to produce the power of the true. And thus Elisha appears to have fallen in with the habits of his fellow-countrymen. He wrought, without regard and without ceremonial, the cures and restorations for which the soothsayers of Baal-zehab at Ekron were consulted in vain: he warned his sovereign of dangers from the Syrians which the whole four hundred of his prophets had not succeeded in predicting to Ahab, and thus in one sense we may say that no less signally than Elijah he vouched for the false gods on their own field. But still even with this allowance it is difficult to help believing that the anecdotes of his life (if the word may be permitted, for we cannot be said to possess his biography) were thrown into their present shape at a later period, when the idea of a prophet had been lowered from its ancient elevation to the level of a mere worker of wonders. A biographer who held this lower idea of a prophet's function would regard the higher duties above alluded to as comparatively unworthy of notice, and would omit all mention of them accordingly. In the eulogium of Elisha contained in the catalogue of worthies of Eccles. xlvii. 12-14— the only later mention of him save the passing allusion of Luke iv. 27—this view is more strongly brought out than in the earlier narrative: "Whilst he lived, he was not moved by the presence of any prince, neither could any bring him into subjection. No word could overcome him, and after his death his body prophesied. He did wonders in his life, and at his death were his works marvellous!"

But there are other considerations from which the incompleteness of these records of Elisha may be inferred: (1.) The absence of marks by which to determine the dates of the various occurrences.

a The ordinary meaning put upon this phrase (see for example, J. H. Newman, Subjects of the Day, p. 191) is that Elisha possessed double the power of Elijah. This, though sanctioned by the renderings of the Vulgate and Luther, and adopted by a long series of commentators from St. Ephraem Syrus to Pastor Vranaus, would appear not to be the real force of the words. בָּנָּא שׁ 하는, literally "a mouth of two"—a double mouthful—is the phrase employed in Dent. xxi. 17 to denote the amount of a father's goods which were the right a.1.1 tokens of a first-born son. Thus the gift of the "double portion" of Elijah's spirit was but the legitimate conclusion of the act of adoption which began with the casting of the mantle at Abel-meholah years before. This explanation is given by Grotius and others. (See Keil ad loc.) Ernold (Gesen. ii. 507) gives it as nur Zun-identtical, und nach dieser kauzen—two thirds, and largely that. For a curious calculation by S. Peter Demauro, that Elijah performed 12 miracles and Elisha 24, see the Acta Sanctorum, July 20. (See Portion, Double, Amor. ed.)

b See Stanley's Ctenbury Sermons, p. 329
The "king of Israel" is continually mentioned, but we are left to infer what king is intended (2 K. v. 5, 6, 7, &c., vi. 8, 9, 21, 24, vii. 2, viii. 3, 5, 6, &c.). This is the case even in the story of the important events of Naaman's cure, and the capture of the Syrian host at Dothan. The only exceptions are ii. 12 (comp. 6), and the narrative of the visit of Jehosh (xxiii. 14, &c.), but this latter story is itself a proof of the disarrangement of these records, occurring as it does after the mention of the death of Jehovah (ver. 13), and being followed by an account of occurrences in the reign of Jehoahaz, his father (vv. 22, 25). (2.) The absence of chronological sequence in the narrative. The story of the Shunammite embraces a lengthened period, from before the birth of the child till he was some years old, Gehazi's familiar communication with the king, and therefore the story which precedes it (viii. 1, 2), must have occurred before he was struck with leprosy, though placed long after the relation of that event (v. 27). (3.) The different stories are not connected by the form of words usually employed in the consecutive narrative of these books. (See Keil, *Kings*, p. 248, where other indications will be found.)

With this preface we pass to the consideration of the several occurrences preserved to us in the life of the prophet.

The call of Elisha seems to have taken place about four years before the death of Ahaz. He died in the reign of Jotham, the grandson of Joth. This embraces a period of not less than 65 years, for certainly 55 of which he held the office of "a prophet in Israel" (2 K. v. 8).

1. After the departure of his master, Elisha returned to dwell at Jericho (2 K. ii. 18). The town had been lately rebuilt (1 K. xvi. 34), and was the residence of a body of the "sons of the prophets" (2 K. ii. 5, 15). No one who has visited the site of Jericho can forget how prominent a feature in the scene are the two perennial springs which, rising at the base of the steep hills of Qumran, behind the town, send their streams across the plain toward the Jordan, scattering, even at the hottest season, the richest and most grateful vegetation over what would otherwise be a bare tract of sandy soil. At the time in question part at least of this charm was wanting. One of the springs was noxious — had some properties which rendered it unfit for drinking, and also prejudicial to the land (i. i., 19, =laid, A. V., "naught"). At the request of the men of Jericho Elisha remitted this evil. He took salt in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus (B. J. iv. 8, § 3) to the present (Socin., *Med. Trac.* p. 17; Mandeville, *Mand. Soc.* col. i. 553), the existence of the cure has been attached to the large spring N. W. of the present town, and which now bears, probably in reference to some later event, the name of 'Ain es-Sultan.'

2. We next meet with Elisha at Bethel in the heart of the country, on his way from Jericho to Mount Carmel (2 K. ii. 23). His last visit had been made in company with Elijah on their road down to the Jordan (ii. 2). Sons of the prophets resided there, but still it was the seat of the calf-worship, and therefore a prophet of Jehovah might expect to meet with insult, especially if not so well known and so formidable as Elijah. The road to the town winds up the defile of the Wady Suweinit, under the hill which still bears what in all probability are the ruins of Ai, and which, even now retaining some trees, was at that date shaded by a vast forest of firs and threes, and the bank of sweet water. Here the boys of the town were clustered, waiting, as they still wait at the entrance of the villages of Palestine, for the chance passer-by. In the short-trimmed locks of Elisha, how were they to recognize the successor of the prophet, with whose shaggy hair streaming over his shoulders they were all familiar? So with the license of the eastern children they scoffed at the new comer as he walks by — "Go up, roundhead! go up, roundhead!" For once Elisha assumed the sternness of his master. He turned upon them and cursed them in the name of Jehovah, and we all know the catastrophe which followed. The destruction of these children has been always felt to be a difficulty. It is so entirely different from anything elsewhere recorded of Elisha — the one exception of severity in a life of mildness and benevolence — that it is perhaps allowable to conclude that some circumstances have been omitted in the narrative, or that some expression of the fountain further north and south; now they are sweet and pleasant, not cold indeed, but also only slightly warm" (Rob. *Piae Geogr.* p. 255). This fountain is situated a mile or more in front of Qumran, the reputed mount of Christ's temptation. Travellers from Jerusalem to the Jordan usually pitch their tents at night beside this sparkling fountain.
3. Elisha extirpates Jehoram king of Israel; and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (iii. 24—27). The revolt of Moab occurred very shortly after the death of Ahab (iii. 5, comp. i. 1), and the campaign followed immediately—"the same day" (iii. 6; A. V. "time"). The prophet was with the army; according to Josephus (Ant. ix. 3, § 1), he "happened to be in a tent (ἐπὶ τοιχὸν κατοικοποιάρεν) outside the camp of Israel." Jerom he refers to hear except out of respect for Jehoshaphat the son of the true God; but a minstrel is brought, and at the sound of music the band of Jehovah comes upon him, and he predicts a fall of rain, and advises a mode of procedure in connection therewith which results in the complete discomfiture of Moab. This incident probably took place at the S. E. end of the Dead Sea.

4. The widow of one of the sons of the prophets — according to Josephus, of Otahlah, the steward of Ahab—is in debt, and her two sons are about to be taken by her husband for her hired servants. She has no property but a pot of oil. This Elisha causes (in his absence, iv. 5) to multiply, until the widow has filled with it all the vessels which she could borrow. No invocation of Jehovah is mentioned, nor any place or date of the miracle.

5. The next occurrence is at Shunem and Mount Carmel (iv. 8—27). The story divides itself into two parts, separated from each other by several years. (a) Elisha, probably on his way between Carmel and the Jordan valley, calls accidentally at Shunem, now Sodom, a village on the southern slopes of Jebel ed-Dhiby, the Little Hermon of modern travellers. Here he is hospitably entertained by a woman of substance, apparently at that time ignorant of the character of her guest. There is no occasion here to quote the details of this charming narrative, or the manner in which, as a recompense for her care of the prophet, she was saved from that childless condition which was esteemed so great a calamity by every Jewish wife, and permitted to "embrace a son." (b) An interval has elapsed of several years. The boy is now old enough to accompany his father to the corn-field, where the harvest is proceeding. The fierce rays of the morning sun are too powerful for him, and he is carried home to his mother only to die at noon. She says nothing of their loss to her husband, but depositing her child on the bed of the man of God, at once starts in quest of him to Mount Carmel. The distance is fifteen or sixteen miles, at least four hours' ride; but she is mounted on the best ass in the stable, and she does not slacken rein. Elisha is on one of the heights of Carmel commanding the road to Shunem, and from his position opposite to her (גְּחַרְה) he recognizes in the distance the figure of the regular

"טִּירְךָ נָבָה" = "the she-ass." She-asses were, and still are, most esteemed in the East.

b. The A. V. in iv. 27, perversely renders מָשָׂא, "the mount," by "the hill," thus obscuring the connection with ver. 25, "Mount Carmel."c. גַּיד up thy soul and go!d. מְשָׂא, i.e. the lad or youth, a totally different word from [from] that by which the relation of Elisha to attendant at the services which he holds here at "new moon and sabbath" (comp. ver. 26). He sends Gehazi down to meet her, and inquire the reason of her unexpected visit. But her distress is for the ear of the master, and not of the servant, and she tells him in the presence of Gehazi, the place where Elisha himself is stationed, then throwing herself down in her emotion she clasps him by the foot. Misinterpreting this action, or perhaps with an ascetic feeling of the unlowness of a woman, Gehazi attempts to thrust her away. But the prophet is too profound a student of human nature to allow this — "Let her alone, for her soul is vexed within her, and Jehovah hath hid it from me." And she was told not to tarry. He, with the enigmatic form of oriental speech—"Did I desire a son of my lord? did I not say do not deceive me?" No explanation is needed to tell Elisha the exact state of the case. The heat of the season will allow of no delay in taking the necessary steps, and Gehazi is at once despatched to run back to Shunem with the utmost speed. He takes the prophet's walking-staff in his hand which he is to lay on the face of the child. The absence, of Gehazi and Elisha follow in haste. Before they reach the village the sun of that long, anxious, summer afternoon must have set. Gehazi meets them on the road, but he has no reassuring report to give; the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha enters the house, goes up to his own chamber, "and he shut the door on them twain, and prayed unto Jehovah." It was what Elisha had done on a similar occasion, and this in his subsequent proceedings Elisha was probably following a method which he had heard of from his master. The child is restored to life, the mother is called in, and again falls at the feet of the prophet, though with what different emotions — "and she took up her son and went out." There is nothing in the narrative to fix its date with reference to other events. We here first encounter Gehazi the "servant" of the man of God. This comes of course have occurred before the events of viii. 1—6, and therefore before the cure of Naaman, when Gehazi became a leper.

6. The scene now changes to Gilgal, apparently at a time when Elisha was residing there (iv. 38—41). The sons of the prophets are sitting round him. It is a time of famine, possibly the same seven years' scarcity which is mentioned in viii. 1, 2, and during which the Shunammite woman of the preceding story migrated to the Philistine country. The food of the party must consist of any herbs that can be found. The great caldron is put on at the command of Elisha, and one of the company brings his blanket (תַּמְנָה: not "lop," as in A. V.) full of such wild vegetables as he has collected, and emptied it into the pot. But no sooner have they begun their meal than the taste betrays the presence of some noxious herb; and they cry out, "there is death in the pot, O man

Elijah is designated — see above; though the latter is also occasionally applied to Gehazi.

e. For a full discussion of the nature of this herb see the article Pogkoth by the late Dr. Forbes Royle in *Kitt's Cyclop.* One kind of small gourd has received the name Curcus prophetarum in allusion to this circumstance; but Dr. Royle inclines to favor C. colorata, the edible yam, or *Moringa oleifera,* the squirming cucumber. This is surely impossible
of God!" In this case the cure was effected by meal which Elisha cast into the stew, in the caldron. Here again there is no invocation of the name of Jehovah.

(2 Ki. iv. 42-44). This in all probability belongs to the same time, and also to the same place as the preceding. A man from Baal-shalisha brings the man of God a present of the first-fruits, which under the law (Num. xviii. 8, 12; Deut. xviii. 3, 4) were the perquisites of the ministers of the sanctuary—2 loaves of the new barley, and some delicacy, the exact nature of which is disputed, but which seems most likely to have been roasted ears of corn rudely ripe; brought with care in a sack or bag. This moderate provision is by the word of Jehovah rendered more than sufficient for a hundred men.

This is one of the instances in which Elisha is the first to anticipate in some measure the miracles of Christ.

The mention of Baal-shalisha gives great support to the supposition that the Gilgal mentioned in the text (ver. 28) as being frequented by the sons of the prophets, and therefore the same place with that in ii. 1, was not that near Jericho; since Baal-shalisha or Beth-shalisha is fixed by Eusebius at fifteen Roman miles north of Lydda, the very position in which we still find the name of Gilgal lingering as Jillijilch. [Gilgal].

8. The simple record of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (v. 1-27). The chief captain of the army of Syria, to whom his country was indebted for some signal success, was afflicted with leprosy, and that in its most malignant form, the white variety (v. 27). In Israel this would have disqualified him from all employment and all intercourse (2 K. xv. 5; 2 Chr. xxvi. 29, 31). But in Syria no such practice appears to have prevailed; Naaman was still a "great man with his master." a man of countenance. One of the members of his establishment is an Israelite girl, kidnapped by the marauders of Syria in one of their forays over the border, and she brings into that Syrian household the fame of the name and skill of Elisha. "The prophet in Samaria," who had raised the dead, would, if brought "face to face" with the patient, have no difficulty in curing even this dreadful leprosy. The news is communicated by Naaman himself to the king. Benhadad had yet to learn the position and character of Elisha. He writes to the king of Israel a letter very characteristic of a military prince, and curiously recalling words uttered by another military man in reference to the cure of his sick servant many centuries later—"I say to this one, go, and he goeth, and to my servant do this, and he doeth it." And now—so ran Benhadad's letter after the usual complimentary introduction had probably opened the communication—"and now, when this letter is come unto thee, behold I have sent Naaman my slave, to thee, that thou mayest recover him of his leprosy." With this letter, and with a present, in which the rich fabrics, for which Damascus has been always in modern times so famous, form a conspicuous feature, and with a full retinue of attendants (13, 15, 23), Naaman proceeds to Samaria. The king of Israel—his name is not given, but it was probably Joram—is disarrayed at the communication. He has but one idea, doubtless the result of too frequent experience—"consider how much his man searcheth against me!"

The occasion soon reaches the ears of the prophet, and with a certain dignity he "sends" to the king—"Let him come to me, and he shall know that there is a prophet in Israel." To the house of Elisha Naaman goes with his whole cavalcade, the "horses and chariot" of the Syrian general finding themselves particularly in the mind of the chronicler. Elisha still keeps in the background, and while Naaman stands outside, contented himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behavior of the prophet, and the simplicity of the prescription—not only devoid of any ceremonial, but absolutely insulting to the native of a city which boasted, as it still boasts, of the finest water-supply of any city of the East—all combined to outrage Naaman. His shaves, however, knew how to deal with the quiet but ungenerous temper of their master, and the result is that he goes down to the Jordan and dips himself seven times, "and his flesh came again like the flesh of a little child, and he was clean." His first business after his cure is to thank his benefactor. He returns with his whole following (יִשְׁבָּן, i.e. "host," or "cump"), and this time he will not be denied the presence of Elisha, but making his way in, and standing before him, he gratefully acknowledges the power of the God of Israel, and entreats him to accept the present which he has brought from Damascus. But Elisha is firm, and refuses the offer, though repeated with the strongest adulation. Naaman, having adopted Jehovah as his God, begs to take away some of the earth of his favored country, of which to make an altar. He then consults Elisha on a difficulty which he foresees. How is he, a servant of Jehovah, to act when he accompanies the king to the temple of the Syrian god Rimmon? He must bow before the god; will Jehovah pardon this disloyalty? Elisha's answer is—"Go in peace," and with this farewell the caravan moves off. But Gehazi, the attendant Elisha's, cannot allow such treasures thus to escape him. "As Jehovah liveth," an expression in the lips of this vulgar Israelite, exactly

\[\text{a The Hebrew expression \( \text{רַע לָנָאָה \) seems to be}
\[\text{ephitical for \( \text{רַע לָנָאָה} \) (Lev. xi. 14; A. V. "green ears of corn"). The same elision occurs in Lev. xxvii. 14 (A. V. "green ears"). The old Hebrew interpretation is "tender and fresh ears." Gesenius (Thes. p. 763) makes it out to be grain or grits. The passage in Lev. xi. 14, compared with the common practice of the East in the present day, suggests the meaning given above.}
\[\text{b \text{לְלְכָּנָא} \), LXX. πάροικ. The word occurs only here. The meaning given above is recognized by the majority of the versions and by Gesenius, and is stated in the margin of Rev.}

Gehazi's but the prophets, changed, least Lord." he whole dwelling-place. His disciples with our cure. He his grasp, the king of Israel is eager to destroy them. "Shall I say? shall I say, my father?" But the end of Elisha has been answered when he has shown the Syrians how futile are all their attempts against his superior power. "Thou shalt not say. Thou myst say those whom thou hast taken captive in lawful fight, but not these: feed them, and send them away to their master." After such a repulse it is not surprising that the marauding forays of the Syrian troops ceased. 11. (vi. 24-vii. 2). But the king of Syria could not rest under such discomfiture. He abandons his marauding system, and gathers a regular army, with which he lays siege to Samaria. The awful extremities to which the inhabitants of the place were driven need not here be recalled. Roused by an encounter with an incident more ghastly than all, and which remained without parallel in Jewish records till the unspeakable horrors of the last days of Jerusalem (Joseph. B. J. v. 13, § 3; 13, § 7, &c.), the king vents his wrath on the prophet, probably as having by his share in the last transaction, or in some other way not recorded, provoked the invasion; possibly actuated by the spite with which a weak bad man in difficulty often regards one better and stronger than himself. The king's name is not stated in the Bible, but there can be no doubt that Josephus is correct in giving  

The case of Miriam (Num. xii. 10-15) is different. Human agency appears to have done nothing towards her cure.  

The expression is peculiar — "beware thou pass not by such a place." Josephus (ix. 4, § 6) says that the king was obliged to give up hunting in consequence.  

This interpretation is that of the Targum, De Wette, and others, and gives a better sense than that of the A. V. The original will perhaps bear either.  

But their maneuvers are not hid from the ran of God, and by his warnings he saves the king — not once nor twice. So baffled were the Syrians by these repeated failures, and due to their kind un- pect treachery in his own camp. But the true explanation is given by one of his own people — possibly one of those who had witnessed the cure wrought on Naaman, and who could conceive no power too great to ascribe to so gifted a person: "Elisha, the prophet in Israel, telleth the 'king of Israel the words that thou speakest in thy bed-chamber.'" So powerful a magician must be seized without delay, and a strong party with chariots is despatched to effect his capture. They march by night, and before morning take up their station round the base of the eminence on which the ruins of Dothan still stand. Elisha's servant — not Gehazi, but apparently a new comer, unacquainted with the powers of his master — is the first to discover the danger. But Elisha remains unmoved by his fears: and at his request the eyes of the youth are opened to behold the spiritual guards which are protecting them. The enemy has secretly set fire filling the whole of the mountain. But this is not enough. Elisha again prays to Jehovah, and the whole of the Syrian warriors are struck blind. He then descends, and offers to lead them to the person and the place which they seek. He conducts them to Samaria. There, at the prayer of the prophet, their sight is restored, and they find themselves not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. His enemies thus completely in his grasp, the king of Israel is eager to destroy them. "Shall I say? shall I say, my father?" But the end of Elisha has been answered when he has shown the Syrians how futile are all their attempts against his superior power. "Thou shalt not say. Thou myst say those whom thou hast taken captive in lawful fight, but not these: feed them, and send them away to their master." After such a repulse it is not surprising that the marauding forays of the Syrian troops ceased. 11. (vi. 24-vii. 2). But the king of Syria could not rest under such discomfiture. ELISHA

at an Joram; and in keeping with this is his employment of the same oath which his mother degraded used on an occasion not dissimilar (1 K. xix. 2), "God do so to me and more also, if the head of Elisha the son of Shaphat shall stand on him this day." No sooner is the word out of the king's month than his cunningary starts to execute the sentence. Elisha is in his house, and round him are seated the chibers of Samaria, doubtless receiving some word of comfort or guidance in their straitened case. He receives a miraculous intimation of the danger. Ere the messenger could reach the house, he said to his companions, "See how this son of a murderer hath sent to take away my head! Shut the door, and keep him from entering: even now I hear the sound of his master's feet behind him, hastening to stay the result of his rash exclamation." As he says the words the messenger arrives at the door, followed immediately, as the prophet had predicted, by the king and by one of his officers, the lord on whose head be leaven. What follows is very graphic. The king's hereditary love of Baal bursts forth, and he cries, "This evil is from Jehovah," the ancient enemy of my house, "why should I wait for Jehovah any longer?" To this Elisha answers: "Hear the word of Jehovah— he who has sent famine can also send plenty — to-morrow at this time shall a measure of fine flour be sold for a shekel, and two measures of barley for a shekel, in the gate of this very city." "This is folly," says the officer: "even if Jehovah were to make windows in heaven and pour down the provisions, it could not be." "It can, it shall," replies Elisha: "and you, shall see it all, but shall not live even to taste it." 12. (viii. 1-6). We now go back several years to an incident connected with the lady of Shunem, at a period antecedent to the cure of Naaman and the transfer of his leprous to Gehazi (v. 1, 27). Elisha had been made aware of a family which Jehovah was about to bring upon the land for seven years; and he had warned his friend the Shammunite thereof that she might provide for her safety. Accordingly she had left Shunem with her family, and had taken refuge in the land of the Philistines, that is, in the rich corn-growing plain on the seacoast of Judah, where secure from want she remained during the drought. At the end of the seven years she returned to her native place, to find that during her absence her house with the field-land attached to it, the corn-fields of the former story, had been appropriated by some other person. In Eastern countries kings are (or were) accessible to the complaints of the meanest of their subjects to a degree inconceivable to the inhabitants of the Western world. To the king therefore the Shammunite had recourse, as the wisdom of Jehoshaphat on a former occasion to king David (2 Sam. xiv. 4). And now occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the

entrance of the woman and her son—clamoring as oriental suppliants along clamor, for her home and her land — the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating — the restoration to life of the boy of Shunem. The woman was instantly recognized by Gehazi. "My lord, 0 king, this is the woman and this is her son whom Elisha restored to life." From her own mouth the king hears the repetition of the wonderful tale, and whether from regard to Elisha, or struck by the extraordinary coincidence, orders her land to be restored, with the value of all its produce during her absence. 13. (viii. 7-15). Hilkerto we have met with the prophet only in his own country. We now find him at Damascus. He is there to carry out the command given to Elijah on Hoseb to "anoint Hazael to be king over Syria." At the time of his arrival Benhadad was prostrate with his last illness. This marks the time of the visit as after the siege of Samaria, which was conducted by Benhadad in person (comp. vi. 24). The memory of the cure of Naaman, and of the subsequent disinheritedness of the prophet, were no doubt still fresh in Damascus; and no sooner does he enter the city than the intelligence is carried to the king — "the mouth of God is come hither." The king's first desire is naturally to ascertain his own fate; and Hazael, who appears to have succeeded Naaman, is commissioned to be the bearer of a present to the prophet, and to ask the question on the part of his master, "Shall I recover of this disease?" The present is one of royal dimensions; a caravan of 40 camels, laden with the riches and luxuries which that wealthy city could alone furnish. The terms of Hazael's address show the respect in which the prophet was held even in this foreign and hostile country. They are identical with those in which Naaman was addressed by his slaves, and in which the king of Israel in a moment of the deepest gratitude and reverence had addressed Elisha himself. "Thy son Benhadad hath sent me to thee, saying, Shall I recover of this disease?" The reply, probably originally ambiguous, is doubtless uncertain in the present state of the text; but neither the conclusion — "behold, the conclusion was unmistakable: "Jehovah hath showed me that he shall surely die." But this was not all that had been revealed to the prophet. If Benhadad died, who would be king in his stead but the man who now stood before him? The prospect was one which drew forth the tears of the man of God. This man was no rash and imprudent leader, who could be baffled and deceived as Benhadad had so often been. Behind that "steadfast" imperishable counsele was a steady courage and a persistent resolution, in which Elisha could not but foresee the greatest danger to his country. Here was a man who, give him but the power, would "oppose" and "cast Israel short," would "thrust Gilead with threshing instruments of iron," and "make them like the dust by threshing.

a Surely an allusion to Ahab (Joram's father) and Naboth.

b Josephus, Ant. ix. 4, § 4.
c Instances of this are frequent in the Arabian Nights. Perlmot Fuchii, the famous son of Mehmet Ali, was used to hold an open court in the garden of his palace at AIIA (Acre), for complaints of all kinds and from all classes.

d 7 2 7 2 7 (A. V. "cry 1); a word denoting great reverence.

The traditional spot of his residence on this occasion is shown in the synagogue at Jeshur ('Holah), a village about 2 miles east of Damascus. The same villas, if not the same building, also exists in the cave in which Elijah was fed by ravens, and the tomb of Gehazi (Stanley, S. & P. p. 412; Quaresimus, R. 881 — "vixit et mendacia Heremonum 7").

Elisha.
ELISHA

iz" as no former king of Syria had done, and that at a time when the prophet would be no longer alive to warn and to advise. At Hazael's request Elisha confesses the reason of his tears. But the prospect is one which has no sorrow for Hazael. How such a career presented itself to him may be inferred from his answer. His only doubt is the possibility of such good fortune for one so mean. "But what is thy slave, O dog that he is, that he should do this great thing?" To which Elisha replies, "Jeboiah hath showed me that thou wilt be king over Syria." Returning to the king, Hazael tells him only half the dark saying of the man of God — "He told me that thou shouldest surely recover." But that was the last day of Benhadad's life. From whose hand he received his death, or what were the circumstances attending it, whether in the bath as has been recently suggested, we cannot tell. The general inference, in accordance with the account of Josephus, is that Hazael himself was the murderer, but the statement in the text does not necessarily bear that interpretation; and, indeed, from the mention of Hazael's name at the end of the passage, the conclusion is rather the reverse.

14. (ix. 1-10). Two of the injunctions laid on Elijah had not been carried out; the third still remained. Hazael had begun his attacks on Israel by an attempt to recover the stronghold of Ramoth-Gilead (vii. 23), but as the mountain, on the east of Jordan. But the fortress was held by the kings of Israel and Judah in alliance, and though the Syrians had wounded the king of Israel, they had not succeeded in capturing the place (vii. 28, ix. 15). One of the captains of the Israelite army in the garrison was Joram, the son of Jehoshaphat, the son of Nimshi. At the time his name was mentioned to Elijah on Horeb he must have been but a youth; now he is one of the boldest and best known of all the warriors of Israel. He had seen the great prophet once, when with his companion Bidadar he attended Ahaz to take possession of the field of Naboath, and the scene of that day and the words of the curse then pronounced no subsequent adventure had been able to equal (ix. 25, 36). The time was now come for the fulfillment of that curse by his being anointed king over Israel. Elisha's personal share in the transaction was small; he had no provisions to make for the succession of the prophets, and the detailed consideration of the story will therefore be more fitly deferred to another place. [Ezechieliad.]

a The A. V., by omitting, as usual, the definite article before "dog," and by its punctuation of the sentence, completely misrepresents the very characteristic turn of the original—given above—and also differs from all the versions. In the Hebrew the word "dog" has the force of meanness, in the A. V. of cruelty. For a long comment founded on the reading of the A. V., see H. Blunt, Lectures on Elisha, p. 222, &c. [See Deut.]

b The word יִנְחַל, A. V. "a thick cloth," has been variously conjectured to be a carpet, a mosquio-net (which Solomon is said, and a bath-napkin. The latter is Ewald's suggestion (lii. 223, note), and taken in connection with the "water," and with the inference to be drawn from the article attached to the Hebrew word, is more probable than the others. Abba Pacha is said to have been murdered in the bath-net. As to the person who committed the murder, Ewald hastily remarks that as a high officer of state Hazael would have no business in the king's bath. Some

15. Beyond this we have no record of Elisha's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his destitute in his own house (xiii. 14-19). Joash, the grandson of Jehu, is now king, and he is come to weep over the approaching departure of the great and good prophet. His words are the same as those of Elisha when Elijah was taken away — "My father! my father! the chariot of Israel and the horsemen thereof!" But it is not a time for writing. One thought fills the mind of both king and prophet. Syria is the fierce enemy who is gradually destroying the country, and against Syria one final effort must be made before the aid of Elisha becomes unobtainable. What was the exact significance of the ceremonial employed, our ignorance of Jewish customs does not permit us to know, but it was evidently symbolic. The window is opened towards the hated country, the bow is pointed in the same direction, and the prophet laying his hands on the string as if to convey force to the shot, "the arrow of Jehova's deliverance, the arrow of deliverance from Syria," is discharged. This done, the king takes up the bundle of arrows, and at the command of Elisha heets them on the ground. But he does it with no energy, and the successes of Israel, which might have been so prolonged as completely to destroy the foe, are limited to three victories.

19. (xii. 14-24). The power of the prophet, however, does not terminate with his death. Even in the tomb he restores the dead to life. Moab had recovered from the tremendous reverse inflicted on her by the three kings at the opening of Elisha's career (2 K. iii.), and her marauding bands had begun again the work of depredation which Syria so long pursued (2 K. v. 2, vi. 23). The text perhaps infers that the spring—that is, when the early crops were ripening—was the usual period for these attacks; but, be this as it may, on the present occasion they invaded the land "at the coming in of the year." A man was being buried in the cemetery which contained the sepulchre of Elisha. Seeing the Moabite spoilers in the distance, the friends of the dead man hastened to conceal his corpse in the nearest hiding-place. They chose—whether by design or by accident—is not said—the tomb of the prophet, and as the body was pushed into the tomb, which formed the receptacle for the corpse in Jewish tombs, it came in contact with his bones. The mere touch of those hallowed remains was enough to effect that which in his life—suppose that Benhadad killed himself by accident, having laid a wet towel over his face while sleeping. See Keil, ad loc. c. The connection and the contrast between Elisha and Jehu are well brought out by Maurice (Prophets and Kings, serm. ix.).

d Josephus says that Elisha had a magnificent funeral (ταφὸς μεγαλοπρεπὴς, Ant. ix. 5, § 6), in this implied is the expression (xiii. 20), "they buried him"? The rich man in the Gospel is also particu-
larly said to have been "buried" (Luke xvi. 22) i. e. probably in a style befitting his rank.
e The expression of the A. V. "let down," is founded on a wrong conception of the nature of an Elisha's sepulchre, which is excavated in the rear face of a rock, so as to be entered by a door; not sunk below the surface of the ground like our graves. The Hebrew word יִנְחַל is simply "went" as in the marginal or, "came" i. e. to the bones of Elisha.
time had cost Elisha both prayers and exertions— the man "revived and stood up on his feet." It is the only instance in the whole Bible—Old Testament, New Testament, and Apocrypha—of restoration wrought by the inanimate remains of prophet or saint. a It is to this miracle that the fathers of the 5th century and the divines of the Roman Catholic Church have appealed as a parallel to the numerous alleged cures at the tombs of saints, such as those at the graves of SS. Gervais and Protasius. b

Before closing this account of Elisha we must not omit to notice the parallel which he presents to our Lord—the more necessary because, unlike the resemblance between Elijah and John the Baptist, no attention is called to it in the New Testament. Some features of this likeness have already been spoken of. b But it is not merely because he healed a leper, raised a dead man, or increased the loaves, that Elisha resembled Christ, but rather because of that loving, gentle temper and kindness of disposition—characteristic of him above all the saints of the O. T.—ever ready to soothe, to heal, and to conciliate, which attracted to him women and simple people, and made him the universal friend and "father," not only consulted by kings and generals, but resorted to by widows and poor prophets in their little troubles and perplexities.

We have spoken above of the fragmentary nature of the records of Elisha, and of the partial conception of his work as a prophet which they evince. Be it so. For that very reason we should the more gladly welcome those engaging traits of personal goodness which are so often to be found even in those fragments, and which give us a reflection, feeble it is true, but still a reflection, in the midst of the sternness of the Old dispensation, of the love and mercy of the New.

Elisha is canonized in the Greek Church; his day is the 14th June. Under that date his life, and a collection of the few traditions concerning him—few indeed when compared with those of Elijah—will be found in the Acta Sanctorum. In the time of Jerome a "mausoleum" containing his remains was shown at Samaria (Ireland, p. 980). Under Julian the bones of Elisha were taken from their receptacle and burnt. But notwithstanding this, they still are considered of such importance, and the church of S. Apollinaris at Ravenna still boasts of possessing his head. The Carmelites have a special service in honor of Elisha.

Most of the writers mentioned under Elijah (Amer. ed.) may be consulted on the subject of this article. It may be added here, that Stanley's sketch of Elisha is one of surpassing interest (History of the Jewish Church, ii. 359-364). He places before us (to select a single topic) the points of dissimilarity and of resemblance between the two great prophets in a striking manner: "The succession was close and immediate, but it was a succession not of likeness but of contrast... Elisha was not secluded in mountain fastnesses, but dwelt in his own house in the royal city; or lingered amidst the sons of the prophets within the precincts of ancient colleges... or was sought out by admiring disciples in some town on Carmel, or by the path of Dothan; or was received in some quiet balcony, overlooking the plain of Esdraelon, where bed and table and seat had been prepared for him by pious hands. His life was not spent, like his predecessor's, in unwailing struggle, but in widespread successes... His deeds were not of wild terror, but of gracious, soothing, homely benevolence, bound up with the ordinary tenor of human life. When he smites with blindness, it is that he may remove it again: when he predicts, it is the prediction of plenty, and not of famine... At his house by Jericho the bitter spring is sweetened; for the widow of one of the prophets the oil is increased; even the workmen at the prophets' huts are not to lose the axe-head which has fallen through the thickets of Jordan into the eddying stream; the young prophets, at their common meal, are saved from the deadly herbs which had been poured from the blanket of one of them into the caldron, and enjoy the multiplied provision of corn... And Elisha was greater yet less, less yet greater, than Elijah. He is less... We cannot dispense with the mighty past even when we have shot far beyond it. Those who would follow him must not be as those who went before. A prophet like Elisha comes once and does not return. Elisha, both to his contemporaries and to us, is but the successor, the faint reflection of his predecessor... Less, yet greater. For the work of the great ones of this earth is carried on by far inferior instruments but on a far wider scale, and it may be in a far higher spirit. The life of an Elisha is never spent in vain. Even his death has not taken him from us. He struggles, single-handed as it would seem, and without effect; and in the very crisis of the nation's history is suddenly and mysteriously removed. But his work continues; his mantle falls; his teaching spreads; his enemies perish. The prophet preaches and teaches, the martyr dies and passes away; but other men enter into his labors... What was begun in fire and storm, in solitude and awful visions, must be carried on through winning arts, and kindling words, and the soothing influence, of social intercourse; not in the desert of Borch, or on the top of Carmel, but in the crowded thoroughfares of Samaria, in the gardens of Damascus, by the rushing waters of Jordan."

ELISHIAH (ἘΛΗΣΙΑΗ [God is salvation, see above]: Ελειαδή; [Vulg. in 1 Chr. Eleasa; in Ezra.] Ελεισάθ: Joseph. "Ελεισάθ: Elies), the eldest son of Javan (Gen. x. 4). The residence of his descendants is described in Ez. xxvii. 7, as the "Isles of Elishah" (ἘΛΗΣΙΑΗ = maritima regiones), whence the Phenicians obtained their purple and blue dyes. Josephus identified the race of Elishah with the Lullans (Ελεια δοῦνοι Ελειασάθων ἀπὸ Ἰερουσαλημ, ἑρείπων ἀπὸ τοῦ οἴκου τέκνος) (Ant. i. 6, § 1). His view is adopted by Knobel (Vulkanjoven, p. 81 ff.)

a The miracle was certainly a peculiar one, but not without a moral end. In serving, as it must have done, to maintain among the Hebrews a proper reverence for the prophetical order which Elisha represented, it accomplished a result eminently important to the religious training of that people and the fulfillment of their mission as the upholders of God's truth and worship.

b Augustine's Confessions (i. § 16). These resonances are drawn out, with great beauty, but in some instances rather fancifully, by J. H. Newman (Serm. on Subjects of the Day, Elishah a Type of Christ, &c.). See also Rev. Isaac Williams (Old Test. Characters).
ELISHAMA

A preference to the more generally received opinion that Elisha = Elias, and in a more extended sense Peloponnesus, or even Helles. It certainly appears correct to treat it as the designation of a root rather than of a locality; and if Javan represents the Ionians, then Elish the Elohians, whose name presents considerable similarity (Alov having possibly been Alov), and whose predilection for maritime situations quite accords with the expression in Ezekiel. In early times the Elohians were settled in various parts of Greece, Thessaly, Creotis, Eolia, Locria, Elys, and Messenia: from Greece they theoretically were to Asia Minor, and in Ezekiel age occupied the maritime district in the N. W. of that country, named after them. Eolis, together with the islands Lesbos and Tenedos. The purple shell-fish was found on this coast, especially at Abydos (Virgil. Georg. 1. 267), Phoecia (Ovid. Metam. vi. 93), Sigean and Lecum (Atheneus, iii. p. 88). Not much, however, can be deduced from this as to the position of the "isles of Elishah," as that shell-fish was found in many parts of the Mediterranean, especially on the coast of Lycia (Pausan. ii. 21 § 5).

ELISH'AMA (אֵלִישָאָמָא, Hebrew words: 'Eli'shāma, 'Eli'shāmā, 'Ela'shāma, κτλ.), name of several men. 1. [Elohim]: Vat. twice 'Elish; in 1 Chr. Rom. 'Elishaam, Vat. Εἰλισαιμᾶς: Eliezer.] Son of Ammihud, the "prince" or "captain" (both Nn) of the tribe of Ephraim in the Wilderness of Sinai (Num. i. 10, ii. 18, vii. 48, 55, x. 22). From the genealogy preserved in 1 Chr. vii. 29, we find that he was grandfather to the great Joshua.

2. [Elohim]: Vat. 'I'ī{l; in 1 Chr. xiv., Rom. 'Elishama, Vat. Εἰλισαιμᾶς, F.A. -Iēr.] A son of King David. One of the thirteen, or, according to the record of Samuel, the eleven, sons born to him of his wives after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8, xiv. 7).

3. [Elohim]: Vat. -Iēr; Alex. -Eliasaam.] By this name is also given (in the Heb. text) in 1 Chr. iii. 8, to the son of the same family, who in the other lists is called Elishe'ma.

4. [Elohim]: Vat. -Iēr.] A descendant of Judah; the son of Jehanan (1 Chr. ii. 41). In the Jewish traditions preserved by Jerome (Qu. Heb. on 1 Chr. i. 41), he appears to be identified with

5. [In 2 K., 'Elisham: Vat. -Iēr; in Jer. 'Etranslated: Vat. Alex. 'Elish; F.A. 'Elisha; Comp. 'Elisham.] The father of Nathaniah and grandfather of Ishmael "of the seed royal," who lived at the time of the great Captivity (2 K. xxv. 25; Jer. xii. 1). [In Jer. xii. 1 the A. V. ed. 1611, with other early editions, reads Elisahamad.]

6. [Elohim]: Vat. 'Elishama, 'Eliasam, F.A. lv. 20, 21, ditto. Scribe to King Jehoiakim (Jer. xxxix. 12, 20, 21).

7. [Elohim]: Vat. -Iēr.] A priest in the time of Jehoshaphat, one of the party sent by that king through the cities of Judah, with the book of the law, to teach the people (2 Chr. vii. 8).

ELISH'ARHAT (אֵלישָארהָת, Hebrew words: 'Elishāraḥāt, 'Elishāraḥāt, 'Elishārāht; whoam God judge): Φ 'Elishaphar [Vat. -Iēr]; Alex. Elisha having the "captains of hundreds," whom Jehoiada the priest employed to collect the Levites and other principal people to Jerusalem before bringing forward Judah (2 Chr. xxiii. 1):

ELISH'BA (אֵלישָבָה, [Heb. Elishe'ba] אֵלישָבָה: 'Elishabāth; [Alex. -Bet-] 'Elishbeth), the wife of Aaron (Ex. vi. 24). She was the daughter of Amminadab, and sister of Nahshon the captain of the host of Judah (Num. ii. 3), and her marriage to Aaron thus united the royal and priestly tribes.

W. A. W. * The name signifies "God of the oath," i. e. God is her oath, a witness of God (Esen.) or "God of the covenant." (Furt.). Its Greek form is Elisabeth, the name of the mother of John. [ELISABET.] H.

ELISH'U'AH (אֵלישָעָה, Hebrew words: 'Elish'ou'ah, 'Elish'ou'ah, 'Elish'ou'ah, 'Elish'ou'ah, 'Elish'aouyah, 'Elish'ouyah, 'Elish'ouyah; whoam God delight): 'Elishowar [Vat. 'Elishowara, Alex. -Elishowara, in 1 Chr.]; 'Elishowar, Alex. 'Elishowara, [Vat. Exar, Comp. 'Elishowara; Elishowara], one of David's family by his later wives: born after his settlement in Jerusalem (2 Sam. v. 15; 1 Chr. xiv. 5). In the list of 1 Chr. iii. 6, the name is given with a slight difference, as Elis'hama.

ELISH'US'M [Vat. El'isamos; Alex. Elishamo; Ald. 'Elishamos; Lusamos]: 1 Esdr. ix. 28. [ELISHIB.] ELI'TU (אֵלִיתוּ, [Vat. Sin. Alex. Héloú = Heb. Elihu]), one of the forefathers of Judith (Jud. vii. 1), and therefore of the tribe of Simon.

ELI'UD (אֵלִיעד, from the Heb. תַּעַד, which however does not occur, God of the Jeruh), son of Achim in the genealogy of Christ (Matt. i. 15), four generations above Joseph. His name is of the same formation as Abiah, and is probably an indication of descent from him. A. C. H.

ELIZ'APHAN (אֵלִיזָאָפָן, Hebrew words: 'Eli'saphan, 'Eli'saphän, 'Eli'saphān; whoam God protect:] 'Eli'osophan; [in Num. and 2 Chr., 'Elish; Alex. -Elish; in 1 Chr., Rom. 'Elishaphan, Vat. F. A. -Iēr; Alex. -Elishaphan.]. 1. A Levite, son of Uzziel, chief of the house of the Kohathites at the time of the census in the Wilderness of Sinai (Ex. vi. 22; Lev. x. 4); Num. iii. 30). His family was known and represented in the days of King David (1 Chr. xrv. 8), and took part in the revivals of Hezekiah (3 Chr. xxxx. 3). His name is also found in the contracted form of ELI'SAPHAH.

2. [Eli'saph; Vat. -Iēr.] Son of Parnach; "prince" (Nn) of the tribe of Zebulon, one of the men appointed to assist Moses in apportioning the land of Canaan (Num. xxxiv. 25).

* ELIZE'US is the reading of the A. V. ed. 1611 and other early editions in Luke iv. 27 and Ecles. xlviii. 12 for ELISEUS, which see. A.

ELIZ'UR (אֵלִיָּזָר, Hebrew words: 'Elī'zār; Vat. once 'Elish; Alex. 'Elishar), son of Sheden: "prince" (Nn) of the tribe, and over the host of Reuben, at the time of the census in the Wilder- ness of Sinai (Num. i. 5, ii. 10, vii. 30, 35, x. 18).

EL'KANAH (אֵלָכָנָה, Hebrew words: 'Elcakeh, 'Elkannah, 'Elkannah; whoam God cences or pos- sesses]: 'Ela'kah: Elicuina.] 1. Son of Korah, the son of Izhar, the son of Kohath, the son of Levi, according to Ex. vi. 24, where his brothers are represented as being Assir and Abiasaph. But in 1 Chr. vii. 22, 23 (Heb. 7, 8) Assir, Elkanah, and Elisaphen are mentioned in the same order, not as the three sons of Korah, but as son, grandson, and great-grandson, respectively; and this seem.
to be undoubtedly correct. If so, the passage in Exodus must be understood as merely giving the families of the Korhites existing at the time the passage was penned, which must, in this case, have been long subsequent to Moses. In Num. xxvi. 58, "the family of the Korhites" (A. V., "Korhites") is mentioned as one family. As regards the fact of Korah's descendents continuing, it may be noticed that we are expressly told in Num. xxvi. 11, that when Korah and his company died, "the children of Korah died not."

2. A descendant of the above in the line of Abinомz, otherwise Mahath, 1 Chr. vi. 28, 55 (11. 11). (See Hervey, Genealogies, pp. 210, 214, note.)

3. Another Kohanthie Levite, in the line of Henmiz the singer. He was son of Jeroham, and father of Samuel the illustrious judge and prophet (1 Chr. vi. 27, 34). All that is known of him is contained in the above notices and in 1 Sam. i. 1, 4, 8, 19, 21, 23, and ii. 11, 20, where we learn that he lived at Ramathaim-Zophim in Mount Ephraim, otherwise called Ramath, that he had two wives, Hannah and Peninnah, but had no children by the former, till the birth of Samuel in answer to Hannah's prayer. We learn also that he lived in the time of Eli the high-priest, and of his sons Hophni and Phinehas; that he was a pious man who went yearly up from Ramathaim-Zophim to Shiloh, in the tribe of Ephraim, to worship and sacrifice at the tabernacle there; but it does not appear that he performed any sacred functions as a Levite; a circumstance quite in accordance with the account which survives to David the establishment of the priestly and Levitical courses for the Temple service. He seems to have been a man of some wealth from the nature of his yearly sacrifice, which enabled him to give portions out of it to all his family, and from the costly offering of three bullocks made when Samuel was brought to the House of the Lord at Shiloh. After the birth of Samuel, Elkanah and Hannah continued to live at Ramath (where Samuel afterwards had his house, 1 Sam. vii. 17), and had three sons and two daughters. This closes all that we know about Elkanah.

4. [Vat. Hacara.] A Levite (1 Chr. ix. 16).

5. [Vat. Alex. F. Hacara, exc. Vat. Caza in 1 Chr. xii.] Another man of the family of the Korhites who joined David while he was at Ziklag (1 Chr. xii. 6). From the terms of ver. 2 it is doubtful whether this can be the well-known Levitical family of Korhites. Perhaps the same who afterwards was one of the doorkeepers for the ark (xx. 24).

6. [Vat. Elhaera.] An officer in the household of Ahaz, king of Judah, who was slain by Zichri the Ephraimites, when Pekah invaded Judah. He seems to have been the second in command under the prefect of the palace (2 Chr. xxvii. 7).

A. C. H.

ELKOSH (\textit{Ex}, \textit{Els})", the birthplace of the prophet Nahum, hence called "the Elkoshite," Nah. i. 1 (\textit{Ela\'kosho\'i}; \textit{Sin. \'Elak\'ash} or \textit{Ela\'kash}). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was believed to exist in a small village of Galilee. The ruins of some old buildings were pointed out to this father by his guide as the remains of the ancient Elkosh (Jerome, \textit{On Nah.} i. 1). Cyril of Alexandria (Comm. in Nahum) says that the village of Elkosh was somewhere or other in the country of the Jews Pseudo-Epiphanius (de \textit{Vitis Prophetarum}, Opp. ii. 247) places Elkosh on the east of the Jordan, at Bethelam (\textit{Cyr. Pseudo}) 150, Cod. B. has \textit{eis \'Elak\'ash}, where he says the prophet died in peace. According to Schwarz (\textit{Diss. of Palestine}, p. 188), the grave of Nahum is shown at \textit{Kefer Tanchum}, a village 2\frac{1}{2} English miles north of Tiberias. But medieval tradition, perhaps for the convenience of the Babylonian Jews, attached the name of the prophet's burial place to Alawa, a village on the east bank of the Tigris, near the monastery of Rabban Hormuzd, and about two miles north of Mosul. Benjamin of Tudela (p. 53, ed. Asher) speaks of the synagogues of Nahum, Oslodiah, and Jonah at Asshur, the modern Mosul. R. Petachin (p. 55, ed. Benisch) was shown the prophet's grave, at a distance of four parasangs from that of Borch, the son of Neriah, which was itself distant a mile from the tomb of Ezekiel. It is mentioned in a letter of Masius, quoted by Assenam (\textit{Bibl. Orient.}, p. 925). It is not quite certain that the Elkoshite commentator penned, or at least, was familiar with, the pilgrimage to it at certain seasons. The synagogue which is built over the tomb is described by Colonel Shield, who visited it in his journey through Kurdistán (\textit{Journ. Geog. Soc.}, viii. 93). Rich evidently believed in the correctness of the tradition, considering the pilgrimage of the Jews as almost sufficient test (\textit{Kurdistan}, i. 101). The tradition which assigns Elkosh to Galilee is more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria.

W. A. W.

*Elkosh as a place is not named in the Bible, though of course Nahum's appellation (Nah. i. 1) implies the place, just as Elka is called the Harodite from Harod (2 Sam. xxvii. 25), Abijah the Silohite from Shiloh (1 K. xi. 29), and others (see Jer. xxvi. 18). It may have been the prophet's birthplace or his abode only. The etymology is uncertain. Fürst suggests (\textit{Handwörterb.}, i. 988) \textit{Ela\'kos}-, i. e. God's bow or strength. The American missionary, Dr. Perkins of Ormioth, visited the Assyrian Elkosh in 1849. He assumes it to be the home of the prophet, but assigns no reason for that opinion except as the name itself may seem to offer. It is situated on a broken stony declivity, right under the first range of the Kurkish mountains, after crossing the Tigris, and on the northern extremity of the great Assyrian plain. A few stunted pomegranates and figs were growing in small gardens in the village, which were the only trees to be seen, to relieve the eye as it stretched along the bare limestone range and over the vast plain in other directions. The town contains about 300 papal Nesterian families. The prophecy speaks the modern Syrnic and the Kurkish.

"We visited the prophet's tomb. It is in a small Jewish synagogue. An oblong box, covered with green cotton cloth, stands over what purports to be his grave. The synagogue and tomb are kept by a Christian, there now being no Jews in \textit{Elkosh}. Many Israelites make the pilgrimage and spend the feast of Tabernacles in this ancient and venerable place, coming for that purpose even from Harrohah, Constantiopolis, and Jerusalem." (\textit{See Bibl. Orient.}, iv. 644.)

An appeal to the style and contents of Nahum's prophecy leaves the question as to the place of hisnativity still undecided; for critics draw from this
source precisely opposite conclusions. While some
and ideas and expressions in the book which are
alleged to be Assyrian in their origin, others either
refuse to concede to them that character, or affirm
that any Jewish prophet might have so written,
who had never passed beyond the boundary of his
own country. Of those who place Elkosh in Gal-
ilee are Hübernick (Erd. in A. Test. p. 375),
Knoedel (Prophect. ii. 208), Weitel (in Herbst's
Erd. in die heil. Schr. des A. Test. ii. Abth.
2, p. 147), De Wette (Erd. in des A. Test. p.
336), Bleek (Erd. in des Alte Test. p. 542),
and Ranner (Pakiastam, p. 125). Of those who think
that Nahum was born or at least prophesied in
Assyria, are Eichhorn (Erd. ii. 317), Grimm
(Nahum, p. 15 ff.), Ewald (Prop. des A. B.
i. 330), Winer (Bibl. Rowl. ii. 325), and Ritter
(Erdk. ix. 742). Stanley mentions both opin-
ions, but does not venture to decide between them
(Jewish Church, ii. 412). It deserves notice that
all the testimonies as to the existence of an Elkosh
in that remote East are comparatively modern.
There is reason to 'suspect, says a German critic,
that "the name may have come not from the vil-
lage mentioned in our book of Nahum, but out of
our book to that village." The internal argument
found on the coloring or imagery of the prophet,
is too subjective to be of any weight on either side.
II.

**ELKOSHITE. [Elkosh.]**

ELIASAR (אֵילָאָסַּר: 'Ελλασάρ: [Alex. in
ver. 1, Σελλάσαρ: Pontus] has been considered
the same place with the Thehasar (תֹּדָאַסַּר)
of 2 K. xix. 12, but this is very improbable. El-
lasar — the city of Arich (Gen. xiv. 1, 9) — seems
to be the Hebrew representative of the old Chal-
dean town called in the native dialect Lava or
Lavonok, and known to the Greeks as Larissa
(Λαρίσα) or Laracion (Λαράκιον). This em-
placement suits the connection with Elam and
Shinar (Gen. xiv. 1); and the identification is or-
thographically defensible, whereas the other is not.
Lava was a town of Lower Babylonia or Chaldean,
situated nearly halfway between Ur (Muqheir)
and Ereesch (Warka), on the left bank of the Eu-
phrates. It is now Senkerch. The inscriptions
show it to have been one of the primitive capitals
—of earlier date, probably, than Babylon itself;
and we may gather from the narratives in Gen. xiv.
in that the time of Abraham it was the metropolis
of a kingdom distinct from that of Shinar, but
owing allegiance to the superior monarchy of
Elam. That we hear no more of it after this time
is owing to its absorption into Babylon, which took
place soon afterwards.

G. R.

ELM (אֵלָם). Only once rendered elmus, in
 Hos. iv. 13. See OAK.

ELMODAM ('אֶל מוֹדָּא, or 'אֶלְוָדָא[so
fisch. Treg.], apparently the same as the Hebrew
תַּוַאָם], Gen. x. 26; 'Elmaudah, LXX.), son of
Er, six generations above Zerubbabel, in the gen-
alogy of Joseph (Luke iii. 28). [ALMADAD.]

A. C. H.

ELNA'AM (אֶל נֹאָאָם [God's delight]: 'אֶל-
נאות: Alex. Eluona; [F. L. ELUON: Eluôn],
the father of Jerubal and Joshuah, two of David's
guard, according to the extended list in 1 Chr. xi.
16. In the LXX. the second warrior is said to be
the son of the first, and Elsa'an is given as himself
a member of the guard.

EL'NATHAN (אֵל נ תָּהֹנ: [whom God gave
comp. Theodore, Diochate]: [in 2 K.,] 'Ελ Ê
θανάθ: [Vulg. Elnathan, Alex. 'Ελναθαν:] in Jer. xiv.
LXX. om.; Jer. xxxvii. Alex.] Nathan: [Rom
Vat.] Ελθαθάν, [Ελθάθαν] 'Elnathan]. 1. The
maternal grandfather of Jehoiachin, distinguished as
"Elnathan of Jerusalem" (2 K. xxiv. 8). He
is doubtless the same man with "Elnathan the son
of Achbor," one of the leading men in Jerusalem
in Jehoiakim's reign (Jer. xxvi. 22, xxxvi. 12, 25).
The variations in the LXX. arise from the names
Elnathan, and Nathan having the same sense,
God's gift (Theodore).

2. [Α'ΛΑΝΑθ: Comp. 'Ελθάναθ: 'Ελθάναθ,
'Ελναθαν (Vat. 'Ελναθαν).] The name of three
persons, apparently Levites, in the time of Ezra
(Ex. viii. 16). In 1 Esdr. they are corrupted to
ΑΛΜΑΝΑθ, and ΕΛΝΑΤΑΗ.

W. L. B.

*Elnathan, the contemporary of Jehoiakim, ap-
appears in only two incidents, but these strongly illu-
strate his character and that of his times.
He was sent by the king with a body of men into
Egypt to discover and bring back the fugitive
Urijah, who was afterwards beheaded, and whose
innocent blood therefore stained in part the hands
of his pursuer (Jer. xxvi. 20-25). Elnathan was
present also at the burning of Jeremiah's "roll,"
which the king took from Baruch, the prophet's
scribe, and threw into the fire before his eyes,
because it contained such threatenings against the
wicked that the conscience-suiting man could not
submit to hear them read. It is recorded to the
honor of Elnathan, that he had the courage to
protest earnestly though ineffectually against the
improper act (Jer. xxxvi. 20-23). On this trans-
action in its various personal relations, see further
under JEROHAIN (AMOR. ed.).

E'LON. 1. [ֵאֵלון: in oak]: 'Eloth, Aladum;
Alex. [Αλαδομο], Eloth: [Elon], a Hittite, whose
dughter was one of Esau's wives (Gen. xxxvi. 34,
xxxvi. 2). For the variation in the name of his
dughter, see BASHEMATH.

2. [אֵלוהָא: Alex. [in Gen.] Aprouhu:
Elon], the second of the three sons attributed to
Zebulun (Gen. xvi. 14; Num. xxvi. 26); and the
founder of the family (תֵּאֵלָה) of the Elon
ites (תֵּאֵל). From this tribe came

3. Elon the (not "a") Zebulonite (אַלֹה: [Alex. [הא: Ahabah];
Joseph. 'Ahabu; Abiabu], who judged Israel for ten years,
and was buried in Ajalon in Zebulun (Judg. xi. 11, 12).
The names "Elon" and "Ajalon" in Hebrew, are
defined of precisely the same letters, and differ
only in the vowel points, so that the place of Elon's
burial may have been originally called after him.
It will be remarked that the Vulgate does assim-
ilate the two.

E'LON (אֵלון: 'Elohu; [Vat. Αλαδομο:] Elon),
one of the towns in the border of the tribe of Dan
(Josh. xix. 40). To judge from the order of the
list, its situation must have been between Ajalon
(Yado) and Ekron (Akib); but no town cor-
responding in name has yet been discovered. The
name in Hebrew signifies a great oak or other
strong tree, and may therefore be a testimony to
The wooden character of the district. It is possibly the same place as

ELON-BETH-HANAN ( אֵלֹן בֵּית הָעָנָן 7700s) is a place of the house of grace [lit. 'grunting one' or 'crying one', named after a prophet]: 'A'ela (אֵלֹא) [Ab. [Gen. 37.12] Alex, Αὐλαί] or 'Ela (אֵלָה) [Gen. 37.11] Alex, Αὐλαία ] is named with two Danite towns forming one of Solomon's commissariat districts (1 K. iv. 9). For 'Beth-hanan' some Hebrew MSS. have "Ben-hanan," and some "And Beth-hanan;" the latter is followed by the Vulgate ['et in Elon, et in Beth-hanan'].

ELONITES, THE, Num. xxvi. 26. [ELON, 2.]

ELOTH ( אֵלוֹת 7750s) grove of strong trees: A'loth; in 2 Chr. viii. 17, 2 Chr. [Gen. 49.6] Alex, אֵלוֹת, 1 K. ix. 26; 2 Chr. vii. 17, xxvi. 2. [ELATH.]

ELPA'AL ( אֵלְפָאָל 7700s) [God is reared]: 'A'el'paal; [Gen. 49.6] Alex, אֵלְפָאָל; Alex, ver. 12; Al'phaal; [Elphad], a Benjamite, son of Hushin and brother of Abishur (1 Chr. viii. 11). He was the founder of a numerous family. The Bene-Ephal appear to have lived in the neighborhood of Lydda (Loed), and on the outskirts of the Benjamite hills as far as Ajabon (Tibid) (viii. 12-18), near the Danite frontier. Hushin was the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELPA'LET ( אֵלְפָּלֶט 7700s) [Lit. Elaphlet]: 'A'elyma; [Gen. 49.6] Alex, אֵלְפָּלֶט; Alex, ver. 12; Elphad; one of David's sons born in Jerusalem (1 Chr. iv. 5). In the parallel list, 1 Chr. iii. 6, the name is given more fully as Eliphlet.

EL-PARAN ( אֵל-פָּראָן 7700s) 'Eil-paran; Alex, אֵלְפָּרָן; Alex, ver. 12; El'pharan; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELTEKEH ( אֵלְטֵכָה 7700s) or N'kar ( נְכָר 7700s) [God is reared]: 'A'el-tek; Alex, נְכָר; Alex, ver. 12; El-tekar; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELTEKON ( אֵלְטֵקֹן 7700s) God is his foundation: [Gen. 49.6] Alex, אֵלְטֵכָן; Alex, ver. 12; El'tuk; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELYMA'S ( אֵלֵםאָס 7700s) [God is reared]: 'A'el'mas; Alex, אֵלֵמָס; Alex, ver. 12; El'mas; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELYMITE ( אֵלֵמִיט 7700s) a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELPIZED ( אֵלְפָּזָד 7700s) God is kindred, allied to hirev: 'A'el'p'zad; Alex, אֵלְפָּזָד; Alex, ver. 12; Elphad, a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELYMA'S ( אֵלֵםאָס 7700s) [God is reared]: 'A'el'mas; Alex, אֵלֵמָס; Alex, ver. 12; El'mas; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELMA'S ( אֵלִמָּס 7700s) [God is reared]: 'A'el'mas; Alex, אֵלִמָּס; Alex, ver. 12; El'mas; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELMA'S ( אֵלִמָּס 7700s) [God is reared]: 'A'el'mas; Alex, אֵלִמָּס; Alex, ver. 12; El'mas; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELMO'S ( אֵלֿמּוֹס 7700s) [God is reared]: 'A'el'mo; Alex, אֵלֿמּוֹס; Alex, ver. 12; El'mo; a city in Benjamin, the name of the principal Danite family. If the forefather of Ephal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELMOS ( אֵלֿמּוֹס 7700s) [God is reared]: 'A'el'mo; Alex, אֵלֿמּוֹס; Alex, ver. 12; El'mo; a city in Benjamin, the name of the original of the first book of Maccabees. Vaihinger (Herzog's Real-Ency. i. 749) adopts the suggestion of Michaelis that 7750s may have stood in this original document, in its older sense of "province" (= Dan. viii. 2), but was translated into Greek by its later sense of "city," a meaning which the word now bears in Syria and Arabic. Synnachus renders the same word by κωστα in 1 K. xx. 14 and Dan. viii. 2. Dr. Rigper thinks it possible that the name of the country may stand in 1 Macc. vi. 4 for that of the capital (Ersch and Grimm's Real-Ency. art. Elymas). In 10. v. 10, Elymas is evidently the name of the province, and not of a town. (See Fain's Real-Ency. i. 114; Winzer's Real-Ency. i. 313; Fritzsche and Grimm, Elymas, ed. in loc.)

ELUMBANS [ A. V. ed. 1611] Electambans, in later eds. Elymas'ans ( אֵלִמָּשָׁאֵין), Jud. i. 8. [ELUBITES.]

ELYMAS ( אֵלִמָּשָׁאֵין) the Arabic name of the Jewish mage or sorcerer Harjesus, who had attached himself to the pseudo-Sorcerers of Chersus, Sergius Paulus, when St. Paul visited the island (Acts xii. 6 E.). On his attempting to dispense the preconul from embracing the Christian faith, he was struck with miraculous blindness by the Apostle. The name Elymas, "the wise man," is from the same root as the Arabic "Elyma." On the practice generally then prevailing, in the decay of faith, of consulting
ELYMEANS. [ELYMEANS.]

EL'ZABAD (ELYMEANS) [given of God = Theodore]: El'zabad. A Korhite Levite, son of Shemaiah and of the family of Obad-edom: one of the doorkeepers of the "house of Jehovah" (1 Chr. xxvi. 7).

EL'ZAPHAN (ELYMEANS) [one whom God protects]: Elzaphan, second son of Uzziel, who was the son of Kohath son of Levi (Ex. vi. 22). He was thus cousin to Moses and Aaron, as is distinctly stated. Elzaphan assisted his brother Mishael to carry the unhappy Nadab and Abihu in their priestly tunics out of the camp (Lev. x. 4). The name is a contracted form of Elzaphan, in which it most frequently occurs.

EMBALMING, the process by which dead bodies are preserved from putrefaction and decay. The Hebrew word מַעֲנָה (channat), employed to denote this process, is connected with the Arabic بِنْح, which in conj. 1 signifies "to be red," as leather which has been tanned; and in conj. 2, "to preserve with spices." In the 1st and 4th conjugations it is applied to the ripening of fruit, and this meaning has been assigned to the Hebrew root in Cant. ii. 13. In the latter passage, however, it probably denotes the fragrant smell of the ripening figs. The word is found in the Chaldee and Syriac dialects, and in the latter מַעֲנָה (châncet).
more than thirty days (according to some MSS. forty and afterwards sprinkled with myrrh, cinnamon, and other substances, which possess the property not only of preserving the body for a long period, but also of communicating to it an agreeable smell. This process was so effectual that the features of the dead could be recognized. It is remarkable that Diodorus omits all mention of the steeping in natron.

The second mode of embalming cost about 20 minae. In this case no incision was made in the body, nor were the intestines removed, but cedar-oil was injected into the stomach by the rectum. The oil was prevented from escaping, and the body was then steeped in natron for the appointed number of days. On the last day the oil was withdrawn, and carried oil with it the stomach and intestines in a state of solution, while the flesh was consumed by the natron, and nothing was left but the skin and bones. The body in this state was returned to the relatives of the deceased.

The third mode, which was adopted by the poorer classes, and cost but little, consisted in rinsing out the intestines with syrmae, an infusion of saunia and cassia (Petitgrew, p. 69), and steeping the body for the usual number of days in natron.

Porphyry (De Antiq. iv. 10) supplies an omission of Herodotus, who neglects to mention what was done with the intestines after they were removed from the body. In the case of a person of respectable rank they were placed in a separate vessel and thrown into the river. This account is confirmed by Pharaon (Sept. Sup. Canon. e. 16).

Although the three modes of embalming are so precisely described by Herodotus, it has been found impossible to classify the mummies which have been discovered and examined under one or other of these three heads. Dr. Petitgrew, from his own observations, confirms the truth of Herodotus' statement that the brain was removed through the nostrils. But in many instances, in which the body was carefully preserved and elaborately ornamented, the brain had not been removed at all; while in some mummies the cavity was found to be filled with a mixture of resin and aromatics.

M. Lequier, in his Notice sur les Embaumements des Anciens Egyptiens, quoted by Petitgrew, endeavored to class the mummies which he examined under two principal divisions, which were again subdivided into others. These were—I. Mummies with the ventral incision, preserved, (1.) by balsamic matter, and (2.) by natron. The first of these were filled with a mixture of resin and aromatics, and are of an olive color —the skin dry, flexible, and adhering to the bones. Others are filled with bitumen or asphaltum, and are black, the skin hard and shining. Those prepared with natron are also filled with resinous substances and bitumen. II. Mummies without the ventral incision. This class is again subdivided, according to the bodies were, (1.) salted and filled with pisapellatum, a compound of asphaltum and common pitch; or (2.) salted only. The former are supposed to have been immersed in the pitch when in a liquid state.

The medications employed in embalming were various. From a chemical analysis of the substances found in mummies, M. Boule detected three modes of embalming: (1.) with nig VALIDUM, or Jew's pitch, called also from the gum, or gum of mummies; (2.) with a mixture of asphaltum and cedar, the liquor distilled from the cedar; (3.) with his mixture together with some resins and aromatic ingredients. The powdered aromatics mentioned by Herodotus were not mixed with the bituminous matter, but sprinkled into the cavities of the body.

It does not appear that embalming, properly so called, was practiced by the Hebrews. Assa was laid in the bed which was filled with sweet odors and divers kinds of spices prepared by the apothecaries' art" (2 Chr. vii. 14); and by the tender care of Nicodemus the body of Jesus was wrapped in linen cloths, with spices, "a mixture of myrrh and aloes, about an hundred pound weight ... as the manner of the Jews is to bury" (John xix. 39, 40).

The account given by Herodotus has been supposed to throw discredit upon the narrative in Genesis. He asserts that the body is steeped in natron for seventy days, while in Gen. 1. 3 it is said that only forty days were occupied in the whole process of embalming, although the period of mourning extended over seventy days. Diodorus, on the contrary, omits altogether the steeping in natron as a part of the operation, and though the time which, according to him, is taken up in washing the body with cedar oil and other aromatics is more than thirty days, yet this is evidently only a portion of the whole time occupied by the complete process. Henestrosa (Egypt and the Books of Hours, p. 69, Engl. tr.) attempts to reconcile this discrepancy by supposing that the seventy days of Herodotus include the whole time of embalming, and not that of steeping in natron only. But the differences in detail which characterize the descriptions of Herodotus and Diodorus, and the impossibility of reconciling these descriptions in all points of detail, result from the results of scientific observation, lead to the natural conclusion that, if these descriptions be correct in themselves, they do not include every method of embalming which was practiced, and that, consequently, many discrepancies between them and the Bible narrative cannot be fairly attributed to a want of accuracy in the latter. In taking this view of the case it is needless to refer to the great interval of time which elapsed between the date of the events contained in the Bible and the time of Herodotus, or between the latter and the times of Diodorus. It the four centuries which separated the two Greek historians were sufficient to have caused such changes in the mode of embalming as are indicated in their different descriptions of the process, it is not unreasonable to conclude that the still greater interval by which the celebration of the funeral obsequies of the patriarch preceded the age of the father of history might have produced changes still greater both in kind and in degree.

It is uncertain what suggested to the Egyptians the idea of embalming. That they practiced it in accordance with their peculiar doctrine of the transmigration of souls we are told by Herodotus. The actual process is said to have been derived from "their first merely burying in the sand, impregnated with natron and other salts, which dried and preserved the body" (Rawlinson, Herod. ii. p. 142). Drugs and bitumen were of later introduction, the latter not being generally employed before the XVIIIth dynasty. When the practice ceased entirely is uncertain.

The subject of embalming is most fully discussed, and the sources of practical information well-nigh exhausted, in Dr. Petitgrew’s History of Egyptian Mummies. [See also Alger's Hist. of the Pharaohs of a Future Life, p. 95 ff.]. W. A. W.
EMBROIDERER

EMBROIDERER. This term is given in the A. V. as the equivalent of ῥοκίνι (ῥοκίνι), the productions of the art being described as "needlework" (τῆς ῥοκίνης). In Exodus the embroiderer is contrasted with the "cunning workman," chosibh (chodsh); and the consideration of one of these terms involves that of the other. Various explanations have been offered as to the distinction between them, but most of these overlook the distinction marked in the Bible itself, namely, that the ῥοκίνι wove simply a variegated texture, without gold thread or figures, and that the chosibh interwove gold thread or figures into the variegated texture. We conceive that the use of the gold thread was for delineating figures, as is implied in the description of the corydor of Amasis (Her. iii. 47), and that the notices of gold thread in some instances and of figures in others were but different methods of describing the same thing. It follows, then, that the application of the term "embroiderer" to ῥοκίνι is false; if it belongs to either it is to chosibh, or the "cunning workman," who added the figures. But if "embroidery" be strictly confined to the work of the needle, we doubt whether it can be applied to either, for the simple addition of gold thread, or of a figure, does not involve the use of the needle. The patterns may have been worked into the stuff by the loom, as appears to have been the case in Egypt (Wilkinson, iii. 128; cf. Her. loc. cit.), where the Hebrews learned the art, and as is stated by Josephus (ἄρα ἐν παραγενέσεις, Ant. iii. 7, § 2). The distinction, as given by the Talmudists, which has been adopted by Gesenius (Thesaur. p. 1311) and Bahr (Synodik. i. 250) is this—that ῥικόνθα, or "needle-work," was where a pattern was attached to the stuff by being sewn on to it on one side, and the work of the chosibh when the pattern was worked into the stuff by the loom, and so appeared on both sides. This view appears to be entirely inconsistent with the statements of the Bible, and with the sense of the word ῥικόνθα elsewhere. The absence of the figure or the gold thread in the one, and its presence in the other, constitutes the essence of the distinction. In support of this view we call attention to the passages in which the expressions are contrasted. Ῥικόνθα consisted of the following materials:—blue, purple, scarlet, and fine twined linen (Ex. xxvi. 36, xxvii. 16, xxviii. 37, xxxviii. 18, xxxix. 29). The work of the chosibh was either "fine twined linen, blue, purple, and scarlet, with cheredonia" (Ex. xxvi. 1, 31, xxxviii. 8, 35), or "gold, blue, purple, scarlet, and fine twined linen" (xxviii. 6, 8, 15, xxxix. 2, 3, 38). Again, looking at the general sense of the words, we shall find that chosibh involves the idea of invention, or designing patterns; ῥικόνθα the idea of texture as well as variegated color. The former is applied to other arts which demanded the exercise of inventive genius, as in the construction of engines of war (2 Chr. xxvi. 15); the latter is applied to other substances, the texture of which is remarkable, as the human body (Ps. cxxxix. 15). Further than this, ῥικόνθα involves the idea of a regular disposition of colors, which demanded no inventive genius. Of these the insides and edges are added; it is applied to tessellated pavement (1 Chr. xxix. 2), to the eagle's plumage (Ex. xvii. 3), and, in the Targums, to the leopard's spotted skin (Jer. xiii. 23). In the same sense it is applied to the colored sails of the Egyptian vessels (Ex. xxvii. 6), which were either chequered or worked according to a regularly recurring pattern (Wilkinson, iii. 21). Gesenius considers this passage as conclusive for his view of the distinction, but it is hardly conceivable that the patterns were on one side of the sail only, nor does there appear any ground to infer a departure from the usual custom of working the colors by the loom. The ancient versions do not contribute much to the elucidation of the point. The LXX. varies between παλαικτις and ραμβοδειτης, as representing ῥοκίνι, and παλαικτις and οριγονοεις for chosibh, combining the two terms in each case for the work itself, ἡ τυπιλὶα τοῦ ραμβδωτον for the first, ἐργανθροντι παλαικτις for the second. The distinction, as far as it is observed, consisted in the one being needle-work and the other loom-work. The Vulgate gives generally planarius for the first, and polyaustiarius for the second; but in Ex. xxviii. 1, xxxix. planarius is used for the second. The first of these terms (planarius) is well chosen to express ῥικόνθα, i.e. a weaver who works together threads of divers colors, is as applicable to one as to the other. The rendering in Ex. xxviii. 16, sicotlotoi, i.e. "wove," correctly describes one of the productions of the ῥοκίνι. We have lastly to notice the incorrect rendering of the word ἐργανθροντι, in the A. V. "broderer," "embroider" (Ex. xxviii. 4, 39). It means stuff worked in a tessellated manner, i.e. with square cavities such as stones might be set in (comp. ver. 29). The art of embroidery by the loom was extensively practised among the nations of antiquity. In addition to the Egyptians, the Babylonians were celebrated for it, but embroidery in the proper sense of the term, i.e. with the needle, was a Phrygian invention of later date (Plin. viii. 48). W. L. B.

EMERALD (ἐμεραλδός : LXX. ἀμέρας : N. T. and Apoc. σμαραγδός), a precious stone, first in the 2d row on the breastplate of the high-priest (Ex. xxviii. 13, xxxix. 11), imported to Tyre from Syria (Ez. xxvii. 19; Targum xxviii. 18), as a seal or signet (Eccles. xxxvi. 6), as an ornament of clothing and bedding (Ex. xxviii. 13; Jud. x. 21), and spoken of as one of the foundations of Jerusalem (Rev. xxi. 19; Tob. xiii. 16). The rainbow round the throne is compared to emerald in Rev. iv. 3, ἄγαλμα φράεεις σμαράγδων.

The etymology of ὅμερα is uncertain. Gesenius suggests a comparison with the word ἀμέρα, a paint with which the Hebrew women stained their eyelashes. Kalisch on Exodus xxviii. follows the LXX., and translates it carbuncle, transferring the meaning emerald to ἐμεραλδός in the same ver. 18. The Targum Jerusalem on the same ver. expounds ἐμεραλδός by σμαραγδόν = carcehodonias, carbuncle.

W. D.

EMERODS (ἐμεροδός, ἐμεροδότης : ἐμὰ : anna, nates : Dent. xxvii. 27; 1 Sam. v. 6, 9, 12, vi. 4, 5, 11). The probabilities as to the nature of the disease are mainly dependent on the probable roots of these two Hebrew words; the former of which a evidently means "a swelling," the latter,
though less certain, is most probably from a Syriac verb "מִרְאָמָי" meaning "a hideous sub adore, enigmatical in exonerando ventre" (Parkhurst and Gesenius); and the Syriac noun "מִרְאָמָי" from the same root denotes, (1) such effect as the verb implies, and (2) the †innominate renum. Also, whenever the former word occurs in the Hebrew גִלְבּ, the קְרֵי given the latter, except in 1 Sam. vii. 11, where the latter stands in the גִלְבּ. Now this last passage speaks of the images of the emerods after they were actually made, and placed in the ark. It thus appears probable that the former word means the disease, and the latter the part affected, which must necessarily have been included in the actually existing image, and have struck the eye as the essential thing represented, to which the disease was an incident. As some morbid swelling, then, seems the most probable nature of the disease, so no more probable conjecture has been advanced than that הקמרותּ or קמרות, bleeding piles, known to the Romans as morure (Juv. ii. 19), are intended. These are very common in Syria at present, habitual habits of want of exercise and improper food, producing derangement of the Liver, constipation, &c., being such as to cause them. The words of 1 Sam. v. 12, "the men that did not were smitten with emerods," show that the disease was not necessarily fatal. It is clear from its parallelism with "booth" and other diseases in Deut. xxxiii. 27, that מִרְאָמָי is a disease, not a part of the body; but the translations of it by the most approved authorities are various and vague. Thus the LXX. and Vulg., as above, uniformly render the word as bearing the latter sense. The mention by Herodotus (i. 305) of the malady, called by him θήκαλα ρυόντας, as ailing the Scytable, which rubbed the temple of the Syrian Venus) in Assenon, has been deemed by some a proof that some legend containing a distortion of the Scriptural account was current in that country down to a late date. The Scholist on Aristophanes (Avthra, 231) mentions a similar plague (followed by a similar subsequent proliferation to that mentioned in Scripture), as sent upon the Athenians by Bacchus. The opinion mentioned by Winer (s. v. Philistia), as advanced by Lichtenstein, that the plague of emerods and that of mice are one and the same, the former being caused by an insect (σπυραζος) as large as a field-mouse, is hardly worth serious attention.

EMMAIM [A. V. Emims] (מִרְאָמָי [נָבְבָה]; in Gen.], "Written in. [A. V. Emims, "Written in. [in Gen.], "Written in. [A. V. Emims, [A. V. Emims, Comps. Emims]; and [in Deut.] "Ovaim, [Var. Ovaim, [A. V. Ovaim, Ovaimi: Emims]"], a tribe or family of gigantic stature which originally inhabited the region along the eastern side of the Dead Sea. It would appear, from a comparison of Gen. xiv. 5-7 with Deut. ii. 10-12, 20-23, that the whole country east of the Jordan was, in primitive times, held by

a Parkhurst, however, s. v. מִרְאָמָי, thinks, on the authority of Dr. Kennicott's Cudolites, that מִרְאָמָי is in all these passages a very ancient Hebrew word. Letto. b Josephus, Ant. vi. 1, § 5, καταστατηρεα; Aquila, το καταστατηρεα λαος. c Petavius, Thom. iv. 25, thus describes what he calls גִלְבּ, שֹׁמָה met το φαλοστατηρεα συμπατον γυναικας. a race of giants all probably of the same stock, comprehending the Rephaim on the north, next the Zinjim, after them the Emim, and then the Horim on the south; and that afterwards the kingdom of Bashan embraced the territories of the first; the country of the Ammonites the second; that of the Moabites the third; while Edom took in the mountains of the Horim. The whole of them were attacked and pillaged by the eastern kings who destroyed Sodom and Gomorrah.

The Emim were related to the Anakim, and were generally called by the same name; but their conquerors the Moabites termed them Emim—that is, "Terrible men." (Deut. ii. 11) most probably on account of their fierce aspect. [Rephaim; Anakim.] J. J. P.

EMMANUEL [Εμμανουὴλ; Emmanuel], Matt. i. 25. [EMMANUEL]

EMMAUS [Εμμαος; prob. = Εμμαος, warm spring; comp. Josh. xix. 53], the village to which the two disciples were going when our Lord appeared to them on the way, on the day of his resurrection (Luke xxiv. 13). Luke makes its distance from Jerusalem to about a hundred (A. Y. about sixty-two), or about 73 miles; and Josephus mentions "a village called Emmaus" at the same distance (J. u. viii. 6, § 6). These statements seem sufficiently definite; and one would suppose no great mistake could be made by geographers in fixing its site. It is remarkable, however, that from the earliest period of which we have any record, the opinion prevailed among Christian writers, that the Emmaus of Luke was identical with the Emmaus on the border of the plain of Philistia, afterwards called Nichopolis, and which was some 25 miles from Jerusalem. Both Eusebius and Jerome adopted this view (Oeconomic; s. v. Emmaus) and they were followed by all geographers down to the commencement of the 14th century (Rendal, p. 578). Then, for some reason unknown to us, it began to be supposed that the site of Emmaus was at the little village of Kohileh, about 3 miles west of Nebi Samwil and 11 miles east of Jerusalem (Sir J. Mannville in Early Travels in Palatine, p. 175; Ludolph, de Suchen, Itin.; Quaresmius, ii. 719). There is not, however, a shadow of evidence for this supposition. In fact the site of Emmaus remains yet to be identified. Dr. Robinson has recently revived the old theory, that the Emmaus of Luke is identical with Neopals; and has supported it with his wonted learning, but not with his wonted conclusiveness. He hotly endeavors to cast doubts on the accuracy of the reading τιτακουτα in Luke xxiv. 13, because two uncial MSS. (K and X), and a few unimportant cursive MSS. insert ιπητα, thus making the distance 100 stadia, which would nearly correspond to the distance of Neopolis. But the best MSS. have not this word, and the best critics regard it as an interpolation. There is a strong probability that this reading is correct, for the whole passage and the context point betrays a letter which is naturally sniitted from τιτακουτα. It in not certain that Luke and Josephus refer to the same Emmaus in the passages associated above. According to some authorities the correct reading in Josephus, B. J. vi. 6, § 6 (adopted in Band's and Bobek's text) is τιτακουτα, and not τιτακουτα. Τo the authorities for this reading the Codex Sinaiticus and a palimpsest of the 6th century (a) are now to be added. But the evidence against it is greatly preponderates.

Εμμαος η τοιον τοντος, ελις η δι' ουναντος ηματος, Κομπ Βαβιλων, Ηροτ. i. 381.
that some copyist who was acquainted with the
6ty, but not the village of Emmaus, tried thus to reconcile
with this text.
The opinions of Eusebius, Jerome, and their fol-
lowers, on a point such as this, are not of very
great authority. When the name of any noted place agreed with one in the Bible, they were not
always careful to see whether the position corre-
sponded in like manner. [Euseb.] Emmaus-
Nicopolis being a noted city in their day, they were
led somewhat rashly to confound it with the En-
maus of the Gospel. The circumstances of the
narrative are plainly opposed to the identity.
The two disciples having journeyed from Jerusalem to
Emmaus in part of a day (Luke xxiv. 28, 29), let
the latter again after the evening meal, and reached
Jerusalem before it was very late (verses 33, 42, 44).
Now, if we take into account the distance.
and the nature of the road, heading up a steep and
difficult mountain, we must admit that such a
journey could not be accomplished in less than from
six to seven hours, so that they could not have ar-
ived in Jerusalem till long past midnight.
This seems to us conclusive against the identity of
Nicopolis and the Emmaus of Luke. (Kobon-
son, iii. 117 ff; Erelad, Pal. p. 427 ff.) J. L. P.
8 Since the preceding article was written, an in-
teresting monograph on this question as to the
site of Emmaus has appeared from Dr. Hermann
Zschokke, rector of the Austrian Pilgrim-house at
Jerusalem (Das Neutestamentliche Emmaus be-
leuchtet, Schaffhausen, 1835). Rector Zschokke,
who has made this subject a special study, decides
that the Emmaus of Luke (xxiv. 13) must be the
present el-Kubeibeh, about nine miles northwest
of Jerusalem, where the Franciscan monks have placed
it. His arguments for this conclusion are the fol-
lowing:
First, the distance agrees with that of
Luke and Josephus (B. J. viii. § 6), namely,
at a round number, 60 stadia or "furlongs" (A. V.),
as ascertained by actual measurement, i. e., taking
the shortest of three ways, which differ only by a
single stadium, it amounts to 38,029 English feet
662.) Secondly, the two disciples of Jesus
could easily return from Emmaus to Jerusalem after
sunset, or the decline of the day (ἐκείνης ἡ ἡμέρα)
and rejoin the Apostles there in their secret meeting
during the night which followed the walk to En-
maus (John xxi. 19). The journey was performed
later without difficulty, within the time required
by Madame Anna C. Emmerich. Thirdly, the
Crusaders (though really, as appears from the
author's own figures, not earlier than the 11th cen-
tury) were led to fix on Kubeibeh as the N. T.
Emmaus, in consequence of finding the latter name
applied to it by the native inhabitants, though
the name no longer exists among them.
If this last
ink in the chain of the evidence were stronger, it
would deserve serious consideration as bearing on
the question. But aside from the looseness of the
period to which the alleged testimony belongs, it
must be confessed that the currency of the Script-
ure name, even at that late period, outside of the
Christian communities in the East, is by no means
to fully made out as the argument requires.
It has
been generally thought that the earliest traces of
such a tradition appear in the 14th century (see
Kob. Res. iii. 69, 1st ed.).
Some wealthy Catholics, in the assurance that
Jow have identified at length the genuine spot
have recently purchased, at an exorbitant price:
the ground of the old "castrum Arnulphi" (Kubeibeh),
and are converting it into one of their "holy
places." (See more fully in {Bild, S. 261, July,
1865, p. 117.} Rector Zschokke makes it evident
enough, that Jesus (Nicopolis), at the foot of the
mountains, cannot be the N. T. village of that
name. Dr. Sepp, though a Catholic, rejects this
claim in behalf of Kubeibeh, and insists that En-
maus must be at Kokonich, four miles from Jeru-
salem, on the route from Ramleh (Jerusalem a.
heil. Land, i. 52). So Ewald, Gesch. d. Volks
ser. iv. 675 f. The Rev. George Williams (art.
Emmaus in Smith's Dict. of Geog., and Journal
of Class. and Sacr. Phil. iv. 212-217) fixes the
site of Emmaus at Kuriet el-Ewou, from two to
two hours distant from Jerusalem on the road to
Jaffa. Dr. Thomson (Land and Book, ii. 307 f.,
540) inclines to this view. — In a volcanic region
like Judea warm springs might be expected to
exist for a time, and then to disappear. The
Emmaus of the N. T. (see import of the name above)
may have been a place of this description, the site
of which is now lost.
II.
EMMAUS, or NICOPOLIS (Εώμωα':
[Simon. Αμμααο., Αμμαοε., etc.]: in 1 Mace. iii. 40,
[Alex. Αμμαοε., Αμμαοε], &c.) Αμμααοοψ, Joseph.
B. J. ii. 23, 24; [B. J. iv. 21; [Act. xi. 19]; 1 Mace. i. 52.]
It was in the plain of Philistia, at the foot of the mount-
sains of Judah, 22 Roman miles from Jerusalem,
and 10 from Lydda (Rln. Hieros.; Erelad, p. 309).
The name does not occur in the O. T.; but the
place rose to importance in the later history of the
Jews, and was a place of note in the wars of the
Asmoneans. It was fortified by Ecbalides, the gen-
eral of Antiochus Ephiphanes, when he was
engaged in the war with Jonathan Maccabaeus
Joseph. B. J. iii. § 3; I Mace. ix. i. It was in
the plain beside this city that Judas Maccabaeus
so signal. defeated the Syrians with a mere hand-
of men, as related in 1 Mace. iii. 57, iv. 3, &c.
Under the Romans Emmaus became the capital of
a topos (Joseph. B. J. iii. § 5; Plin. v. 14). It was
burned by the Roman general Varus about A.
. 4.
In the 3d century (about a. v. 229) it was
rebuilt through the exertions of Julius Africanius,
the well-known Christian writer; and under the
name of Emmaus. Emmaus and Jerusalem fre-
cently refer to it in defining the positions of
neighboring towns and villages (Chron. Pas. ad
A. c. 223; Erelad, p. 750). Early writers men-
tion a fountain at Emmaus, famous far and wide
for its healing virtues; the cause of this Theophanes
ascribes to the fact that our Lord on one occasion
washed his feet in it (Chron. 41). The Crusaders
contemplated Emmaus with a small fortress further
south, on the Jerusalem road now called Leitara
(Will. Tyr. Hist. vii. 24). A small miserable vil-
lage called 'Ameiya still occupies the site of the
ancient city. It stands on the western declivity of
a low hill, and contains the ruins of an old church.
The name Emmaus was also borne by a village of
Galilee close to Tiberias; probably the ancient
Hammath, i. e. hot springs — of which name En-
maus was but a corruption. The hot springs
still remained in the time of Josephus, and are men-
tioned by him as giving rise to a lake in the place
(B. J. iv. § 3; Act. xviii. 2, § 3).

EMMER (Εώμχη; Val. Empc) Semoemier.
1 Esdr. iv. 21. [IMMER.]
EMMOR (Rec. Text with Εώμχη; Lachm.
[Tisch. and Treg.] with A B C D [and Sin.]}
ENCAMPMENT

"Amud: Emmer), the father of Sychem (Acts vii. 16). [HARMON."

• ENABLIS translates (A. V.) εὐθυμοῦσαι σαραπίων (1 Tim. i. 12): "I thank Christ Jesus our Lord, who hath enabled me," &c. i.e. as the Greek construction shows, qualified me, or made me able, so as to be fitted for the apostolic work. This is an older sense of "enabled," like the reach habillier. See Eastwood and Wright’s ‘Book of Homily,’ p. 175.

* ENAJIM (more correctly ENAIM = אֶנָּאִים) is the marginal reading of the A. V. for "an open place" in the text (Gen. xxxviii. 14). See next article below. Modern scholars generally (Gesenius, Furst, Tuch, Knobel, Keil) regard the LXX. as right here ( Aires), and understand that Tamar placed herself "at the gate (opening) of Enaim," situated "on the way to Timnah." The same word occurs in ver. 21, where the A. V. has "openly," but the proper name is more appropriately there, if not absolutely required. (See Mr. Wright’s ‘Book of Genesis in Hebrew,’ p. 100.) The dual endings נָאִים and נָיִים are interchangeable (Gen. Heb. Gr. § 38, Rem. 1), so that this Enaim and Enam in Josh. xiv. 34 may be and doubt are the same.

ENAM (with the article, נָאִים נָיִים = the double spring, Gen. Thes. p. 1019 a: Maiuri: [Vat. ] Alex. Herazia: [Comp. AB] Herazia: Lazarus), one of the cities of Judah in the Shephelah or lowland (Josh. xiv. 34). From its mention with towns (Jarmuth and Ezbon, for instance) which are known to have been near Timnath, this is very probably the place in the "doorway" of which Tamar sat before her interview with her father-in-law (Gen. xxxviii. 14). In the A. V. the words Pathach enaim (נְאָיִים נְאָיִים) are not taken as a proper name, but are rendered "an open place," lit. "the doorway of Enaim," or the double spring, a translation adopted by the LXX. (ταῖς πόροις Άιρέας) and now generally. In Josh. xv. 34, for "Tappanah and Enam," the Peshito has "Pathach-Eham," which supports the identification suggested above. [A.V.]

ENAN (נַן נָן = rich in fountains: Άιρέας: Enam). Ahira ben-Enam was "prince" of the tribe of Naphtali at the time of the numbering of Israel in the wilderness of Sinai (Num. i. 15, [ii. 29, vi. 78, 83, x. 27]).

ENASIBUS (Enasibos: [Vat. ] [Lazarius]), 1 Esdr. ix. 34. [ELIASHIB.]

ENCAMPMENT (גָּאִים, moshachim, in all places except 2 K. vi. 8, where גָּאִים, moshachim, is used). The word primarily denoted the resting-place of an army or company of travellers at night (Ex. xxi. 12; Gen. xxxvi. 21), and was hence applied to the army or caravan when on its march (Ex. xiv. 19; Josh. x. 5, xi. 4; Gen. xxvii. 7, 8). Among nomadic tribes war never attained to the dignity of a science, and their encampments were consequently devoid of all the appliances of more systematic warfare. The description of the camp of the Israelites, on their march from (Num. ii., iii.), supplies the greatest amount of information on the subject: whichever else may be gleaned is from scattered hints. The tabernacle, corresponding to the chieftain's tent of an ordinary encampment, was placed in the centre, and around and facing it (Num. ii. 2), arranged in four grand divisions, corresponding to the four points of the compass, by the host of Israel, according to their standards (Num. i. 32, ii. 2). On the east the post of honor was assigned to the tribe of Judah, and round its standard rallied the tribes of Issachar and Zebulun, descendants of the sons of Leah. On the south lay Reuben and Simeon, the representatives of Leah, and the children of Gad, the son of Jacob's handmaid. Rachel's descendants were encamped on the western side of the tabernacle, the chief place being assigned to the tribe of Ephraim. To this position of Ephraim, Manasseh, and Benjamin, allusions are made in Judg. v. 14, and Ex. xxx. 2. On the north were the tribes of Dan and Naphtali, the children of Bilhah, and the tribe of Asher, Gad's younger brother. All these were encamped around their standards, each according to the ensign of the house of his fathers. In the centre, round the tabernacle, and with no standard but the cloudy and fiery pillar which rested over it, were the tents of the priests and Levites. The former, with Moses and Aaron at their head, were encamped on the eastern side. On the south were the Kolathites, who had charge of the ark, the table of shewbread, the altars and vessels of the sanctuary. The Gershonites were on the west, and when on the march carried the tabernacle and its lighter furniture; while the Merarites, who were encamped on the north, had charge of its heavier appurtenances. The order of encampment was preserved on the march (Num. ii. 17), the signal for which was given by a blast of the two silver trumpets (Num. x. 5). The details of this account supply Prof. Blunt with some striking illustrations of the undesignated coincidences of the books of Moses (Tukes. Concl. pp. 75-86).

In this description of the order of the encampment no mention is made of settlements, who, it is reasonable to suppose, were placed at the gates (Ex. xxxii. 26, 27) in the four quarters of the camp. This was evidently the case in the camp of the Levites (comp. 1 Chr. ix. 18, 24; 2 Chr. xxxii. 2).

The sanitary regulations of the camp of the Israelites were enacted for the twofold purpose of preserving the health of the vast multitude and the purity of the camp as the dwelling-place of God (Num. v. 3; Deut. xxiii. 14). With this object the dead were buried without the camp (Lxx. x. 4, 5); lepers were excluded till their leprous departure from the camp (x. 9; Num. x. 12, 14, 15), as were all who were visited with leprous diseases (Lxx. xiv. 3). All who were defiled by contact with the dead, whether these were slain in battle or not, were kept without the camp for seven days (Num. xxxi. 19). Captives taken in war were compelled to remain for a while outside (Num. xxxi. 19; Josh. vi. 23). The ashes from the sacrifices were poured out without the camp at an appointed place. Whither all uncleanliness was removed (Deut. xxiii. 10, 12), and where the entrails, skins, horns, &c., and all that was not offered in sac-
rifices were burnt (Lev. iv. 11, 12, vi 11, viii. 17).

The execution of criminals took place without the camp (Lev. xxiv. 14; Num. xv. 35, 36; Josh. vii. 24), as did the cutting off of the young bullock for the sin-offering (Lev. vii. 12). The circumstances combined explain Heb. xiii. 12, and John xix. 17, 20.

The encampment of the Israelites in the desert left its traces in their subsequent history. The temple, so late as the time of Hezekiah, was still "the camp of Jehovah" (2 Chr. xxxii. 2; cf. Ps. lxviii. 28); and the multitudes who flocked to David were "a great camp, like the camp of God" (1 Chr. xxi. 22). High ground appears to have been uniformly selected for the position of a camp, whether it were on a hill or mountain side, or in an inaccessible pass (Judg. vii. 18). So, in Judg. x. 17, the Ammonites encamped in Gilgal, while Israel pitched in Mizpah. The very names are significant. The camps of Saul and the Philistines were alternately in Gilgal, the "height" of Benjamin, and the pass of Michmash (1 Sam. xiii. 2; 3, 16, 29). When Goliath defied the host of Israel, the contending armies were encamped on hills on either side of the valley of Elah (1 Sam. xviii. 3); and in the fatal battle of Gilboa Saul's position on the mountain was stormed by the Philistines who had pitched in Shunem (1 Sam. xxviii. 4), on the other side of the valley of Jezreel. The carelessness of the Midianites in encamping in the plain exposed them to the night surprise by Gideon, and resulted in their consequent discomfiture (Judg. vi. 33, vii. 8, 12). But another important consideration in fixing upon a position for a camp was the propinquity of water; hence it is found that in most instances camps were pitched near a spring or well (Judg. vii. 1; 1 Macc. ix. 33). The Israelites at Mount Gilboa pitched by the fountain in Jezreel (1 Sam. xxix. 1), while the Philistines encamped at Aphek, the name of which indicates the existence of a stream of water in the neighborhood, which rendered it a favorite place of encampment (1 Sam. iv. 11; 1 K. xx. 20; 2 K. xii. 17). In its pursuit of the Amalekites, David halted his men by the brook Besor, and there left a detachment with the camp furniture (1 Sam. xxx. 9). One of Joshua's decisive engagements with the nations of Canaan was fought at the waters of Merom, where he surprised the confederate camp (Josh. xi. 5, 7; comp. Judg. v. 19, 21). Gideon, before attacking the Midianites, encamped beside the well of Harod (Judg. vii. 1), and it was to draw water from the well at Beth-lehem that David's three mighty men cut their way through the host of the Philistines (2 Sam. xxii. 16).

The camp was surrounded by the ἄξιον ἔργα, ma'tzōlah (1 Sam. xvii. 20), or ἄξιον ἔργα, ma'tzōlith (1 Sam. xxvi. 5, 7), which some, and Thenius among them, explain as an earthwork thrown round up the encampment, others as the barrier formed by the baggage wagons. The etymology of the word points merely to the circular shape of the inclosure formed by the tents of the soldiers pitched around their chief, whose spear marked his resting-place (1 Sam. xxvi. 5, 7), and it might with propriety be used in either of the above senses, according as the camp was fixed or temporary. We know that in the case of a siege, the attacking army, if possible, surrounded the place attacked (1 Macc. xiii. 43), and drew about it a line of circumvallation (Thūgō, ἄξιον ἔργα, 2 K. xxv. 1), which was marked by a breastwork of earth (Thūgō, m'silīth, Is. xi. 10; ἄξιον ἔργα, ἀξιόλιθος, Ez. xxi. 27 (23); comp. Job xix. 12), for the double purpose of preventing the escape of the besieged and of protecting the besiegers from their soldies. But there was not so much need of a formal intrenchment, as but few instances occur in which engagements were fought in the camps themselves, and these only when the attack was made at night. Gideon's expedition against the Midianites took place in the early morning (Judg. vii. 10), the time selected by Saul for his attack upon Nahash (1 Sam. xi. 11), and by David for surprising the Amalekites (1 Sam. xxx. 17; comp. Judg. ix. 33). To guard against these night attacks, sentinels (Thūgō, ἀξιόλιθος, shōn'rin') were posted (Judg. vii. 19; 1 Macc. xii. 27) round the camp, and the neglect of this precaution by Zealah and Zalmonna probably led to their capture by Gideon and the ultimate defeat of their army (Judg. vii. 19).

The valley which separated the hostile camps was generally selected as the fighting ground (Thūgō, ἀξιόλιθος, "the battle-field" (1 Sam. iv. 2, xiv. 19; 2 Sam. xviii. 6), upon which the contest was decided, and hence the valleys of Palestine have played so conspicuous a part in its history (Josh. viii. 13; Judg. vi. 33; 2 Sam. v. 22, viii. 13, &c.). When the fighting men went forth to the place of marshalling (Thūgō, ῥωσάριθος, 1 Sam. xvii. 20), a detachment was left to protect the camp and baggage (1 Sam. xvii. 22, xx. 24). The beasts of burden were probably tethered to the tent pegs (2 K. vii. 10; Zeoh. xiv. 15).

The ἄξιον ἔργα, machānēch, or movable encampment, is distinguished from the ἄξιον ἔργα, m'ntaṭēb, or Thūgō, m'tāb (2 Sam. xxiii. 14; 1 Chr. xi. 10), which appear to have been standing camps, like those which Jehoshaphat established throughout Judah (2 Chr. xvii. 2), or advanced posts in an enemy's country (Judg. x. 21; 2 Sam. xxvi. 8), from which skirmishing parties made their predatory excursions and ravaged the crops. It was in resisting one of these expeditions that Shamniah won himself a name among David's heroes (2 Sam. xii. 12). Machānēch is still further distinguished from ἄξιον ἔργα, mikhtaur, "a fortress" or "walled town" (Num. xiii. 10).

Camps left behind them a memorial in the name of the place where they were situated, as among ourselves (cf. Chester, Grantchester, &c.), Ma'ahanah-Dan (Judg. xii. 25) was so called from the encampment of the Danites mentioned in Judg. xii. 12. [MAHANAIM.] The more important camps at Gilgal (Josh. v. 10, ix. 6) and Shiloh (Josh. xvii. 9; Judg. xxi. 12, 19) left no such impress; the military traditions of these places were

---

a The Chaldee renders Thūgō (1 Sam. vii. 20) and ἄξιον ἔργα (2 K. xxv. 1) by the same word, ἄξιον ἔργα, or Μ'ΣΩΡ, the Greek ἀξιόλιθος.
ENCHANTMENTS. 1. (Or) *φαρακταία, φάρακκα*, LXX. (Grotius compares the word with the Greek Αράκτης; secret arts, from ἐκ τοῦ ἄγαλματος, to cover; though others incorrectly connect it with ἐκ τοῦ ἁμαζωνίου, a flame, or the glinting blade of a sword, as though it implied a sort of dazzling cheironomy which deceives spectators. Several versions render the word by "whisperings," "insurrectiones," but it seems to be a more general word, and hence is used of the various means (some of them no doubt of a quasi-scientific character) by which the Egyptian Charammum imposed on the credulity of Pharaoh.

2. (Or) *φαρακτία*, LXX. (2 K. ix. 22; Mic. v. 12; Nah. iii. 4; *rhodion, maleficia*, Vulg.; "malefic arts," "prastigies," "muttered spells.") Hence it is sometimes rendered by ἐκατωνομαζόμενος, as in Is. xlviii. 9. The belief in the power of certain formulae was universal in the ancient world. Thus there were enchantres to draw the fiery chariot out of a city; to turn the winds (*ὑπερφονεία*, iii. 9), to call the gods (*διασκελέω*), and men (*ἐχοροί*, Far. xxxi.), and to influence the heavenly bodies (Ov. Met. v. 207 ff., xii. 263; "αἱ τεκνεὰ τραχεῖα"), Virg. Elef. vii., En. iv. 498; Hor. Epod. v. 15). They were a recognized part of ancient medicine, even among the Jews, who regarded certain sentences of the Law as efficacious in healing. The Greeks used them as one of the five chief resources of pharmacy (Plind. Pyth. iii. 8, 9; Soph. Aj. 582), especially in obstetrics (Plat. Theat. p. 145) and mental diseases (Talbot de Scint. tamuli, i. 8). Homer mentions them as used to check the flow of blood (Od. xix. 456), and Aeta even gives a charm to cure a disjointed limb (Od. Re Rest. 100; cf. Plin. H. N. xxvii. 2). The belief in charms is still left universal in uncivilized nations; see Lane's *Mod. Egypt*. i. 306, 306, &c., ii. 177, &c.; Freethan's Voyage to Borneo, ch. ii.; M'Coller's Congo in Pinkerton's Voyages, xvi. 221, 273; Huc's China, i. 224, ii. 326; Taylor's New Zealand, and Livingston's Africa, passim, &c.; and hundreds of such remedies still exist, and are considered efficacious among the uneducated.

3. (Or) *φαρακτιόν*, Exod. x. 11: *θερμήματα*, LXX.: from ἐκ τοῦ ἁμαζωνίου. This word is especially used of the charming of serpents, Jer. viii. 17 (cf. Ps. lxxvi. 3; Ezek. xii. 13; Exod. x. 11; Luc. xv. 301 — a parallel to "cantando Rupertum aquam," and "Viper was rampo verbal et carnium faves," Ov. Met. i. 27). Maimonides (de Iscol. xi. 2) expressly defines an enchantor as one "who uses strange and meaningless words, by which he imposes on the folly of the credulous. They say, for instance, that if one utter the words before a serpent or scorpion it will do no harm" (Carpov, *Annot. in Godberianum*, iv. 11). An account of the Marsi who excelled in this art is given by Augustus (ad Liv. xvi. 28), and of the Etruscans by Arnobius (adcol. Not. ii. 324), and they are alluded to by a host of other authorities (Plin. ii. 2, xxviii. 6; Julian, H. A. i. 57; Virg. *Aen*. vii. 750; Sil. Ital. viii. 495. They were called Ορθιοδιώκται. The secret is still understood in the East (Lane, ii. 106).

4. The word ἐκ τοῦ ἁμαζωνίου is used of the enchantments sought by Balaam, Num. xxiv. 1. It properly alludes to ophihomancy, but in this place has a general meaning of endeavoring to gain on one's (τοίς ζυγώμασιν τούς οἰωνίου, LXX.);

5. (Or) *φαρακτία* is used for magic, Is. xlviii. 9, 12. It comes from ἐκ τοῦ ἁμαζωνίου, to bind (cf. καταδίωκται, *σαρκολύβω*, bannen), and means generally the process of acquiring power over some distant object or person; but this word seems also to have been sometimes used expressly of serpent-charmers, for R. Sol. Jarchi on Deut. xlvii. 11, defines the ἐκ τοῦ ἁμαζωνίου to be one "who congregates serpents and scorpions into one place."

Any resort to these methods of imposture was strictly forbidden in Scripture (Lev. xii. 26; Is. xlviii. 9, &c.), but to eradicate the tendency is almost impossible (2 K. xvii. 17; 2 Chr. xxviii. 9), and we find it still flourishing at the Christian era (Acts xiii. 6, 8, viii. 9, 11, γορφεία; Gal. v. 20 Rev. iv. 21). The chief sorcerers *daemonemina* were a rod, a magic circle, dragon's eggs, certain herbs, or "insane roots," like the henbane, &c. The fancy of poets, both ancient and modern, has been exercised in giving lists of them (Ovid and Hor. ii. c.) on Shakespeare's *Macbeth, Act iv. 1; Kirke White's *Gondolies; Southey's Curse of Kehama, Cant. iv. 4c.*. (Amulets; Divination; Magic.)

F. W. F.

EN-DOR (or EN-DOR) (A. V.: [a Ps. lxxiii. ἐκ τοῦ ἁμαζωνίου, ἑκ τοῦ ἀγγελικοῦ ὀνόματος] "spring of Dor [or, Embal- lation]; Αἴασάδα; [in i Sam. Vat. Acalaphi. Comp. Ερέμα; in Josh. LXX. oxn.]: Endor), a place which, with its "daughter-towns" (יוֹדָה), was in the territory of Issachar, and yet possessed by Manasseh (Josh. xvii. 11). This was the case with five other places which lay partly in Asher, partly in Issachar, and seem to have formed a kind of district of their own called "the three, or the triple, Niphath."

Endor was long held in memory by the Jewish people as connected with the great victory over Sisera and Jabin. Taanaah, Megido, and the torrent Kishon all witnessed the disconsolation of the huge host, but it was emphatically to Endor that the tradition of the death of the two chiefs attached itself (Ps. lxxiii. 9, 10). Possibly it was some recollection of this, some fame of sanctity or good omen in Endor, which drew the unhappy Sam- thinor on the eve of his last engagement with an enemy no less hateful and no less destructive than the Midianites (1 Sam. xviii. 7). Endor is not again mentioned in the Scriptures; but it was known to Eusebius, who describes it as a large village 4 miles S. of Tabor. Here to the north of *Jesh Debaj* the "Little Hermon" of travellers (the name still lingers, attached to a considerable but now deserted village. The rock of the mountain, on the slope of which Endor stands, is hollowed into caves, one of which may well have been the scene of the impiety of the witch (Van de Veule, ii. 384; Rob. ii. 393; Stanley, p. 345). The distance from the slopes of Gilboa to Endor is 7 or 8 miles, over difficult ground.
and Stanley, H. [En-gedi.] The G. runs whether from east to west, or from west to east. (xlvii.)

**ENDOW**

* Endow had its name evidently from a spring which made the place habitable (Simp. *Oxon.,* p. 238); and it is found that one of the caves there has now a little spring in it, the water by which runs down the hill; the supply is small, but is said to be unfailing. (Porter’s *Handb.* ii. 358). For the striking manner in which the position of Endor, and various customs of the people at present illustrate the account of Saul’s visit to the necromancer, see Thomson’s *Land and Book,* ii. 191. As to the nature of that transaction, see Magic.

**EN-EGLAIM** (ظلمוים = spring of two heifers; *Epan'aleia;* [Vat. Alex. Epanaias, *Elenoiw,* a place named only by Eiel (xlvii. 10), apparently as on the Dead Sea; but whether near to or far from En-gedi, on the west or east side of the Sea, it is impossible to ascertain from the text. In his comment on the passage, Jerome locates it at the embouchure of the Jordan; but this is not supported by other evidence. By some [e. g. Gesenius, *Thee.* p. 1919] it is thought to be identical with Eelaim, but the two words are different, En-eglaim containing the At, which is rarely changed for any other aspirate. G.

**ENEMISSAR** (Enemissaros, *Eunomeos,* [etc.: *Salmos-mos,*] is the name under which Shahmahser appears in the book of Tobit (i. 2, [13.], 15, etc.). This book is not of any historical authority, being a mere work of imagination composed probably by an Alexandrian Jew, not earlier than n. c. 300. The change of the name is a corruption—the first syllable Shel being dropped (compare the Bapudoss of Abydenus, which represents Neob OPPosass); and the order of the liquids n and l being reversed. The author of Tobit makes Enemissar lead the children of Israel into captivity (l. 2), following the opposite narrative of the kings of kings (2 K. xvi. 3-6, xvii. 9-11). He regards Semacherib not only as its successor but as his son (s. 15), for which he has probably no authority beyond his own speculations upon the text of Scripture. As Semacherib is proved by the Assyrian inscriptions to be the son of Sargon, no weight can be properly attached to the historical statements in Tobit. The book is, in the fullest sense of the word, apocryphal. G. R.

**ENENIUS** (Enenios [gen. of *Ennios,*] Vat. Abd. *Enenos;* Alex. *Ennoo,* gen. *Ennon,* i. 13.), one of the leaders of the people who returned from captivity with Zoroabel [1 Esdr. v. 8]. There is no name corresponding in the lists of Ezra and Nehemiah.

**ENAGDAI** (ἐν αγγαίοις: [Sln. *έν ένγαδαί* in Cades], *Ecles.* xxiv. 14. [en-gedai].

**ENGANNIM** (נָגַנְיָם = spring of goats, etc.). 1. A city in the low country of Judah, named between Zemeph and Tappan (Josh. xv. 34).

The LXX. in this place is so distant from the Hebrew that the name is not recognizable. Vulg. *Esenanim.*

2. A city on the border of Issachar (Josh. xix. 21; *Eαυκαί τοις Ταπφαί;* Alex. *μείγμα;* [Comp. Abd. *Εγγανιν.=* *Esenanim;* allowed with its "suburbs" to the Gershomite Levites (xxi. 29; *Πυγος γεγανημάτων = Esenanim*). These notices contain no indication of the position of En-gannim with reference to any known place, but there is great probability in the conjecture of Robinson (li. 315) that it is identical with the Gineas of Josephus (Ant. x. 6, § 1), which again, there can be little doubt, survives in the modern *Jen.* the first village encountered on the ascent from the central plain of Esdraelon into the hills of the central country. *Jen.* is still surrounded by the "orchards" or "gardens" which interpret its ancient name, and the "spring" is to this day the characteristic object in the place (Roh. iii. 315; Stanley, p. 349, note; Van de Velde, p. 550). The position of *Jen.* is also in striking agreement with the requirements of Beth-hag-Gan (A. V. "the garden-house;" *Baidydv*), in the direction of which Abaiah fled from Jehu (2 K. ix. 27). The rough road of the ascent was probably too much for his chariot, and, keeping the more level ground, he made for Megiddo, where he died (see Stanley, p. 349).

In the lists of Levitical cities in 1 Chr. vi. *Aenem* is substituted for En-gannim. Possibly it is merely a contraction.

**EN-GE'DI** (אֶנְגֶדִי, the fountain of the kid: [Αναγεδής, *Eγγαδη, *Eγγάδη, etc.:] Arabic, جَنْدِي: [En-gadidi], a town in the wilderness of Judah (Josh. xv. 62), on the western shore of the Dead Sea (Ex. xvii. 10). Its original name was Hazezon-Tamar (rés, *τας υπώνοιμι, the pruning of the palm), doubtless, as Josephus says, on account of the palm groves which surrounded it (2 Chr. xx. 2; *Ecles.* xxiv. 14; Joseph. *Ant.* ix. 1, § 2). Some doubt seems to have existed in the early centuries of our era as to its true position. Stephanus places it near Sodom (Steph. B. B. v. 1); Jerome at the south end of the Dead Sea (Comm. in Ez. xlvii.); but Josephus more correctly at the distance of 300 stadia from Jerusalem (Ant. ix. 1, § 2). Its site is now well known. It is about the middle of the western shore of the lake. Here is a rich plain, half a mile square, sloping very gently from the base of the mountains to the water, and shut in on the north by a lofty promontory. About a mile up the western acclivity, and at an elevation of some 400 feet above the plain, is the fountain of Ain Jidy, from which the place gets its name. The water is sweet, but the temperature is 81° Fahr. It bursts from the limestone rock, and rushes down the steep descent, fretted by many a rugged crag, and raining its spray over verdant borders of acacia, mimosa, and lotus. On reaching the plain, the brook crosses it in nearly a straight line to the sea. During a greater part of the year, however, it is absorbed in the thirsty soil. Its banks are now cultivated by a few families of Arabs, who generally pitch their tents near this spot. The soil is exceedingly fertile, and in such a climate it might be made to produce the finest fruits of tropical climies. Traces of the old city exist upon the plain and lower declivity of the
EN-GEDI

mountain, on the south bank of the brook. They are rude and minderesting, consisting merely of foundations and shapeless heaps of unwhet stones. A sketch by M. Belle, taken from the fountain, and embracing the plain on the shore, and the south-west border of the Dead Sea, will be found in the Atlas of Plates to De Saulcy's Voyage, pl. viii. A much better one is given under SEA, THE SALT.

The history of En-gedi, though it reaches back nearly 4000 years, may be told in a few sentences. It was immediately after an assault upon the "Amorites, that dwelt in Hazeon-Tamar," that the five Mesopotamian kings were attacked by the rulers of the plain of Sodom (Gen. xiv. 7; comp. 2 Chr. xx. 2). It is probable that the fountain was always called En-gedi, and that the ancient town built on the plain below it got its name. Saul was told that David was in the "wilderness of En-gedi;" and he took 3000 men, and went to seek David and his men upon the rocks of the wild goat (I Sam. xxiv. 1-4). These animals still frequent the cliffs above and around the fountain; the Arabs call them Beken. At a later period En-gedi was the gathering-place of the Moabites and Ammonites who went up against Jerusalem, and fell in the valley of Benach (2 Chr. xx. 2). It is remarkable that this is the usual route taken in the present day by such predatory bands from Moab as make incursions into Southern Palestine. They pass round the southern end of the Dead Sea, then up the road along its western shore to Ain Jidy, and thence toward Hebron, Tekoa, or Jerusalem, as the prospects of plunder seem most inviting.

The vineyards of En-gedi were celebrated by Solomon (Cant. i. 14); its balsam by Josephus (Ant. ix. 1, § 2), and its palms by Pliny — "En-gadab appallam bulti, secundum ab Hierosolyma fertilitate palmamorume memoriam" (v. 17). But vineyards no longer clothe the mountainside, and neither palm-tree nor balsam is seen on the plain.

In the fourth century there was still a large village at En-gedi (Oeana. s. v.); it must have been abandoned very soon afterwards, for there is no subsequent reference to it in history, nor are there any traces of recent habitation (Porter's Handbook, p. 242; Bobb. i. 567). There is a curious reference to it in Manville (Early Trav. p. 179), who says that the district between Jericho and the Dead Sea is "the land of Dangabla" (Fr. d'Engadbe), and that the balm trees were "still called vines of Gady."

J. L. P.

ENGINE, a term exclusively applied to military affairs in the Bible. The Hebrew שַׂרָיָה (2 Chr. xxxvi. 15) is its counterpart in etymological meaning, each referring to the ingenuity (engine, from ingenium) displayed in the contrivance. The engines to which the term is applied in 2 Chr. were designed to propel various missiles from the walls of a besieged town; one, like the ballista, was for stones, consisting probably of a strong spring and a tube to give the right direction to the stone; another, like the catapulta, for arrows, an enormous stationary bow. The invention of these is assigned to Uzziah's time — a statement which is supported both by the absence of such contrivances in the representations of Egyptian and Assyrian warfare, and by the traditional belief that the ballista was invented in Syria (Pliny, v. 56). Luther gives brustwagen, i.e. "parapets," as the meaning of the term. Another war-engine, with which the Hebrews were acquainted, was the battering-ram, described in Ez. xxvi. 9, as יִשְׂרֵי יָהְּשׁ, lit. a beating of that which is in front, hence a ram for striking walls; and still more precisely in Ez. iv. 2, xxii. 22, as יַפִּשֵּׁה, a ram. The use of this instrument was well known both to the Egyptians (Wilkinson, i. 459) and the Assyrians. The references in Ezekiel are to the one used by the latter people, consisting of a high and stoutly built frame-work on four wheels, covered in at the sides in order to protect the men moving it, and armed with one or two pointed weapons. Their appearance was very different from that of the Roman aries with which the Jews afterwards became acquainted (Joseph. b. J. iii. 7, § 19). No notice is taken of the סָתָב וּלְכְיָה or the cinna (cf. Ez. xxvi. 9, Vulg.); but it is not improbable that the Hebrews were acquainted with them (cf. Wilkinson, i. 361). The marginal rendering "engines of shot" (Jer. vi. 6, xxxii. 24; Ez. xxvi. 8) is incorrect.

ENGRAYER. The term קָנִי, so translated in the A. V., applies broadly to any artist; whether in wood, stone, or metal; to restrict it to the engraver in Ex. xxxv. 35, xxviii. 24, is improper; a similar latitude must be given to the term מַנְגָּר, which expresses the operation of the artist; in Zeen. iii. 9, ordinary stone-cutting is evidently intended. The specific description of an engraver was מַנְגָּר (Ex. xxviii. 11), and his chief business was cutting names or devices on rings and seals; the only notices of engraving are...
EN-HADDAH

EN-HADDAH [ἡναδᾶ] = sharp, or self spring, Gesenius: Αἰασάκα: En-haddah, one of the cities on the border of Issachar next to En-Gannim (Josh. xix. 31). Van de Velde (ii. 315) would identity it with Ain-Houl on the western side of Carmel, and about 2 miles only from the sea. (See also Thomson, Land and Book, ii. 248.) But this is surely out of the limits of the tribe of Issachar, and rather in Asher or Manasseh.

EN-HAK-KORE [A. V. En-hakkore] [ἡνακκόρε] = the spring of the crier: πυγη τοῦ επικαλεμένου; [Alex. εκυκλοτος: fons incoaritis], the spring which burst out in answer to the "cry" of Samson after his exploit with the jaw-bone (Judg. xv. 19). The name is a pun founded on the word in verse 18, γίνεται [ἡνακκόρε], A. v. "he called"). The word ἀκος, which in the story denotes the "hollow place" (literally, the "mortar") in the jaw, and also that for the "jaw" itself, Lechi, are both names of places. Van de Velde (Memoir, p. 343) endeavors to identify Lechi with Tell-el-Lekhíyeh 4 miles N. of Beer-sheba, and En-hakkore with the large spring between the Tell and Kharet-el-Kitt. But Samson's adventures appear to have confined to a narrow circle, and there is no ground for extending them to a distance of some 30 miles from Gaza, which Lekhíyeh is, even in a straight line. (Lechi.) G.

EN-HA'ZOR [ἡναζῶρ] = spring of the village: πυγη Ἀναζόρ: Enh使者), one of the "fenced cities" in the inheritance of Naphtali, distinct from Hazor, named between Edre and Iron, and apparently not far from Kedesh (Josh. xix. 37). It has not yet been identified.

EN-MISH'PAT [ἐνμισθιά] = fountain of judgment: η πυγη της κρίσεως; [Jonas Miephath], Gen. xiv. 7. (Kadeesh.)

ENOCH, and once [twice, 1 Chr. i. 3, 33]

HE'NOCH [הנהוך] = Chonoke [initiated or initiating, Ges.; teaching, teacher, First]: Philo, de Post. Cain., § 11, ἐρήμουσαν ἐνώπιον θρόνον σου: "Ενοχ: Αγγέλων ἄνωθεν; [ἕξουσι]. The eldest son of Cain (Gen. iv. 17; [Chancour, A. V. marz.]), who called the city which he built after his name. Ewald (Gesch. i. 556, note) fancies that there is a reference to the Phrygian Iconium, in city which a legend of an ∼ was preserved, evidently derived from the Biblical account of the father of Methuselah (Steph. Byz. s. v. Θηβανος, Schud. s. v. Νανοκρακος). Other places have been identified with the site of Enoch with little probability; e. g. Ammoch in Susiana, the Henochi in the Caucasus, &c.

2. [Vulg. in Jude 14, Enoch.] The son of Jared (יֵהוֹךְ; a descendant, cf. Jordan), and father of Methuselah (יֶמֶשֶׁל), a man of arms; Philo, l.c. cf. § 12, Μαδουνάλμα ἐξαμορφος θανάτου (Gen. v. 18 ff.; Luke iii. 37).] In the Epistle of Jude (ver. 14, cf. Enoch ix. 8) he is described as the seventh from Adam; and the number is probably noticed as conveying the idea of divine completion and rest (cf. August. c. Faust. xii. 14), while Enoch was himself a type of perfected humanity, a man raised to heaven by personalism, God, who experienced a birth by transgression (Iren. iv. 16, 2). The other connections connected with his history appear too symmetrical to be without meaning. He was born when Jared was 162 (9 × 6 × 3) years old, and after the birth of his eldest son in his 65th (56 + 7) year he lived 300 years. From the period of 365 years assigned to his life, Ewald (l. c. 356), with very little probability, regards him as "the god of the new-year," but the number may have been without influence on the later traditions which assigned to Enoch the discovery of the science of astronomy (ἀστρολαγεία, Eneoeposus ap. Euseb. Prog. Ev. ix. 17, where he is identified with Atles). After the birth of Methuselah it is said (Gen. v. 22-24) that Enoch "walked with God 300 years . . . and he was not; for God took him" (ἡναχον, ἐμμεθέτη; W. L. B.) is elsewhere only used of Noah (Gen. vi. 9; cf. Gen. xvii. 1, &c.), and is to be explained of a prophetic life spent in immediate converse with the spiritual world (Enoch xii. 2, "All his action was with the holy ones, and with the watchers during his life"). There is no further mention of Enoch in the O. T., but in the Ecclesiasticus (xlix. 14) he is brought forward as one of the peculiar glories (οὐδε εἰς εἰκόνα σόν Ε'ν.) of the Jews, for he was taken up (ἀναλήφθη, Alex. μετέτηθη) from the earth. He pleased the Lord, and was translated into Paradise, Vulg.; being a pattern of repentance (Eccles. xiv. 16). In the Epistle to the Hebrews the spring and issue of Enoch's life are clearly marked. "By faith Enoch was translated (μετέτηθη, translatus est, Vulg.) that he should not see death; . . . for before his translation (μετάθεσεως) he had this testimony, that he pleased God." The contrast to this divine judgment is found in the constrained words of Josephus: "Enoch departed to the Deity (ἀνε-χώρησε πρὸς τὸ θεόν), whence (the sacred writers) have not recorded his death" (Int. i. 3, § 4).

The Biblical notices of Enoch were a fruitful source of speculation in later times. Some theologians disputed with subtlety as to the place to which he was removed; whether it was to paradise or to the immediate presence of God (cf. Fuentesd. ad loc. v. 5), though others more prudently decided to discuss the question (Thilo, Cod. Apor. N. T. p. 758). On other points there was greater unanimity. Both the Latin and Greek fathers commonly coupled Enoch and Elijah as historic witnesses of the possibility of a resurrection of the body and of a true human existence in glory (Iren. iv. 5, 1; Tertull. de Resurr. Carn. 58; Hieron. c. Ioan. Hier. §§ 29, 92, pp. 497, 440); and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. xi. 3 ff.) who should fall before the beast, and afterwards be raised to heaven before the great judgment (Hippol. Frag. in Dan. xix.; De Antichr. xiii.; Cosmas Indic. p. 75, ap. Thilo, κατὰ τὴν ἐκκλησίαν τὴν παρακάσων; Tertull. de ...
ENOCHE, THE BOOK OF

Aniho, 59; Audroso, in Psalm. xlv. 4; Ercan, Nievist. c. xxv. on which Thiloe has almost exhausted the question: Cod. Apoc. N. T. p. 765 f. This belief removed a serious difficulty which was supposed to attach to their translation; for thus it was made clear that they would at last discharge the considerable debt of a sinful humanity, from which they were not exempted by their glorious removal from the earth (Tertull. de Anihihe, l. c.; August. Op. inc. c. Jul. vi. 30).

In later times Enoch was celebrated as the inventor of writing, arithmetick, and astronomy (Euseb. Prep. Er. c. 17.). He is said to have filled 300 books with the revelations which he received, and is commonly identified with Edris (i.e. the learned), who is commemorated in the Koran (caph. 19) as one "exalted by God to a high place" (cf. Sole, l. c.; Hottinger, Hist. Orient. p. 30 f.). But these traditions were probably due to the apocryphal book which bears his name (cf. Fabric. Col. pseudoep. V. T. i. 215 ff.).

Some (Buttm. Mythol. i. 176 ff.; Ewahh, l. c.) have found a trace of the history of Enoch in the Phrygian legend of Amnas (Ἀμνας, Ναμνας), who was distinguished for his piety, lived 300 years, and predicted the deluge of Deucalion. (Enoch, l.) In the A. V. of 1 Chr. i. 3, the name is given as Ἱξόχω.

3. The third son of Malcan, the son of Abraham by Keturah (Gen. xxv. 4, A. V. Henoch; i. Chr. i. 33, A. V. Henoch).

4. [Vulg. in 1 Chr. v. 3, Enoch.] The eldest son of Reuben (A. V. Henoch; Gen. xvi. 9; Ex. vi. 14; 1 Chr. v. 3), from whom came "the family of the Hamochites" (Num. xxxvi. 5).

B. F. W.

ENOCHE, THE BOOK OF, is one of the most important remains of that early apocalyptic literature of which the book of Daniel is the great prototype. In the older commentary the book is well worthy of the attention which it received in the first ages; and recent investigations have still left many points for further inquiry.

1. The history of the book is remarkable. The first trace of its existence is generally found in the Epistle of St. Jude (4, 15; cf. Enoch, i. 9), but the words of the Apostle leave it uncertain whether he derived his quotation from tradition (Holman, Schriiber, i. 429) or from writing (ἐν οἴνοπσίας ἀπαθάντης . . . Ἐνώχ Ἁμων, though the wide spread of the book in the second century seems almost decisive in favor of the latter supposition. It appears to have been known to Justin (Apol. ii. 5), Irenæus (Adv. Her. iv. 16, 2), and Anatolius (Euseb. p. 26); Clement of Alexandria (Erf. p. 801) and Origen (vet. comp. in. C. E. v. p. 267, ed. Spence) both make use of it, and numerous references occur to the "writing," "books," and "words of Enoch in the Testaments of the XII. and the Enoch books, which present minute or less resemblance to passages in the present book (Vahl. Col. pseudoep. V. T. i. 161 ff.; Gin. p. 139. p. 273 f.). Tertullian (De Cult. Fin. ii. 3), and Or. (Del. 93) expressly quotes the book as one which was "not received by some, nor admitted into the Jewish canon" (in armarium libriue), but defends it on account of its reference to Christ ("legimus omnem scripturam redactiun habilem divinitatem inspi-
upon the Helaizing style, which may be found as well in an author as in a translator; and in the absence of direct evidence it is difficult to weigh mere conjectures. On the one hand, if the book had been originally written in Hebrew, it might seem likely that it would have been more used by Rabbinical teachers; but, on the other hand, the writer certainly appears to have been a native of Palestine," and therefore likely to have employed the popular dialect. If the hypotaxis of a Hebrew original be accepted, which as a hypotaxis seems to be the more plausible, the history of the original and the version finds a good parallel in that of the Wisdom of Sirach. [Ecclesiasticus.] 3. In its present shape the book consists of a series of revelations supposed to have been given to Enoch and Noah, which extend to the most varied aspects of nature and life, and are designed to offer a comprehensive vindication of the action of Providence. [Enoch.] It is divided into five parts. The first part (Cc. 1–36 Dillm.), after a general introduction, contains an account of the fall of the angels (Gen. vi. 1) and of the judgment to come upon them and upon the giants, their offspring (6–16); and this is followed by the description of the journey of Enoch through the earth and lower heaven in company with an angel, who showed to him many of the great mysteries of nature, the treasure-houses of the storms and winds, and fires of heaven, the prison of the fallen and the land of the blessed (17–36). The second part (37–71) is styled "a vision of wisdom," and consists of three "parables," in which Enoch relates the revelations of the higher secrets of heaven and of the spiritual world which were given to him. The first parable (37–43) is an account of his conversation with the blessed angels and manifestation of the righteous, with further details as to the heavenly bodies; the second (45–57) describes in splendid imagery the coming of Messiah and the results which it should work among "the elect" and the gain-sayers; the third (58–69) draws out at further length the blessedness of "the elect and holy," and the confusion and wretchedness of the sinful rulers of the world. The third part (72–110) assigns a "reign of the blessed ones of the lights of heaven," and deals with the motions of the sun and moon, and the changes of the seasons; and with this the narrative of the journey of Enoch closes. The fourth part (83–91) is not distinguished by any special name, but contains the record of a dream which was granted to Enoch in his youth, in which he saw the history of the kingdoms of God and of the world up to the final establishment of the throne of Messiah. The fifth part (92–105) contains the last address of Enoch to his children, in which the teaching of the former chapters is made the groundwork of earnest exhortation. The signs which attended the birth of Noah are next noticed (106–7); and another short writing of Enoch (108) forms the close to the whole book (cf. Dillm. Einl. p. i. f.; Liicke, Ver- such einer vollstândig. Einl. âœc. I. 59 f.). 4. The general unity which the book possesses in its present form marks it, in the main, as the work of one man. The several parts, while they re complete in themselves, are still connected by the development of a common purpose. But internal coincidence shows with equal clearness that different fragments were incorporated by the author into his work, and some additions have been probably made afterwards. Different "books" are mentioned in early times, and variations in style and language are discernible in the present book. To distinguish the original elements and later interpolations is the great problem which still remains to be solved, for the different theories which have been proposed are barely plausible. In each case the critic seems to start with preconceived notions, as to what was to be expected at a particular time, and forms his conclusions to suit his prejudices. Hofmann and Weisse place the composition of the whole work after the Christian era; but the one thinks that St. Jude could not have quoted an apocryphal book (Hofmann, Schriftenreis., l. 420 f.), and the other seeks to detach Christianity altogether from a Jewish foundation (Weisse, Evangelienfrage, 214 f.). Stewart (American Bibl. Repos. 1840) so far anticipated the argument of Weisse as to regard the Christology of the book as a clear sign of its post-Christian origin. Ewald, according to his usual custom, picks out the different elements with a daring confidence, and leaves a result so complicated that no one can accept it in its details, while it is characterized in its great features by masterly judgment and sagacity. He assigns the composition of the groundwork of the book at various intervals between 144 n. c. and cir. 120 n. c., and supposes that the whole assumed its present form in the first half of the century before Christ. Liicke (24 ed.) distinguishes two great parts, an older part including cc. 1–36, and 72–105, which he dates from the beginning of the Macabean struggle, and a later, cc. 37–71, which he assigns to the period of the rise of Herod the Great (144–40 B.C.). He supposes, however, that later interpolations were made, without attempting to ascertain their date. Dillmann upholds more decidedly the unity of the book, and assigns the chief part of it to an Aramaic writer of the time of John Hyrcanus (c. 110 n. c.). To this, according to him, "historical" and "Noachian additions" were made, probably in the Greek translation (Einl. p. iii.). Kosslin (quoted by Hilgenfeld, p. 96, âœc.) makes the "Noachian additions," which he assigns to the time of Herod the Great. Hilgenfeld himself places the original book (cc. 1–18; 20–36; 72–90; 91, 1–19; 93; 94–105) at the beginning of the first century before Christ (a. o. O. p. 145 n.). This book he supposes to have passed through the hands of a Christian writer who lived between the times of Satorinus and Marcion (p. 181), who added the chief remaining portions, including the great Messianic section, cc. 37–71. In the face of these conflicting theories it is evidently impossible to dogmatize, and the evidence is insufficient for conclusive reasoning. The interpretation of the Apocalyptic histories (cc. 56, 57; 85–90), on which the chief stress is laid for fixing the date of the book, involves necessarily minute criticism of details, which belongs rather to a commentary than to a general introduction; but notwithstanding the arguments of Hilgenfeld and Jost (Gesch. d. Jud. ii. 218 n.), the whole book appears to be distinctly of Jewish origin. Some considerable interpolations may have been made in successive translations, and large fragments of a much earlier date were undoubtedly incor-
pored into the work, but as a whole it may be regarded as describing an important phase of Jewish opinion shortly before the coming of Christ.

5. In doctrine the book of Enoch exhibits a great advance of thought within the limits of revelation in each of the grand divisions of knowledge. The authorship is a current topic, but we may attempt to reduce the scattered images of the O. T. to a physical system. The view of society and man, of the temporary triumph and final discomfiture of the oppressors of God's people, carries out into elaborate detail the pregnant images of Daniel. The figure of the Messiah is invested with majestic dignity as "the Son of God" (c. 105, 2 only), "whose name was named before the sun was made" (48, 3), and who existed "abovethine in the presence of God" (62, 6; cf. Laurence, *Prel. Disc. ii. c."). And at the same time his human attributes as "the son of man," "the son of woman" (c. 62, 5 only), "the elect one," "the righteous one," "the anointed," are brought into conspicuous notice. The mysteries of the spiritual world, the connection of angels and men, the classes and ministries of the hosts of heaven, the power of Satan (40, 7, 9), and the regions of darkness, the doctrines of resurrection, retribution, and eternal punishment (c. 22, cf. Dillm. p. xix.), are dwelt upon with growing earnestness as the horizon of speculation was extended by intercourse with Greece. But the message of the book is emphatically one of "faith and truth" (cf. Dillm. p. 32), and while the writer combines and repeats the thoughts of Scripture, he adds no new element to the teaching of the prophets. His errors spring from an undisciplined attempt to explain their words, and from a proud exultation in present success. For the great characteristic by which the book is distinguished from the later apocalypse of Ezra [*Esdras, 20 Book*] is the tone of triumphal expectation by which it is pervaded. It seems to repeat in every form the great principle that the world, natural, moral, and spiritual, is under the immediate government of God. Hence it follows that there is a terrible retribution reserved for sinners, and a glorious kingdom prepared for the righteous, and Messiah is regarded as the divine mediator of this double issue (c. 90, 91). Nor is it without a striking fitness that a patriarch translated from earth, and admitted to look upon the divine majesty, is chosen as "the herald of wisdom, righteousness, and judgment to a people who, even in suffering, saw in their tyrants only the victims of a coming vengeance."

6. Notwithstanding the quotation in St. Jude, and the wide circulation of the book itself, the apocalypse of Enoch was uniformly and distinctly separated from the canonical Scriptures. Tertullian alone maintained its authority (l. c.), while he admitted that it was not received by the Jews. Origen, on the other hand (c. Cels. v. 297, ed. Spence), and Augustine (de Civ. xx. 25, 4), definitively mark it as apocryphal, and it is reckoned among the apocryphal books in the Apostolic Constitutions (vi. 16), and in the catalogues of the *Synopgis S. Scripturarum* of Nicephorus (Tredtner, *Zur Gesch. d. Kunst*, p. 145), and Montanum (Bibl. Coislin. p. 193).

7. The literature of the subject has been already noticed incidentally. The German edition of Hilbermann, with the reach of which the student all the most important materials for the study of the book. Special points are discussed by Triller, *Das Jewish. d. Heils*, i. 93 ff.; C. Wieseler, *Die 74 Wochen des Daniel*, 1839. An attempt was made by the Rev. E. Murray (*Enoch restitutus*, &c. Lond. 1838) to separate from the books of Enoch the book quoted by St. Jude," which met with little favor.

The preceding article may be supplemented by a brief notice of the more recent literature relating to the subject. The essay of Kestin, *Ueber die Entstehung des Buches Henoch* (alluded to above), appeared in Baer and Zeller's *Theol. Jahrb.* 1856, xv. 240-79, 370-86; comp. Ewald, *Jahrb. f. Bibl. wiss*. viii. 182 f., 189 ff. Dillmann, in his article *Pseudoepigraphen des A. T.*, in Herzog's *Real-Encycl.* xii. 309, has reverted his earlier opinion that the book of Enoch, excepting the Noachian fragments, is substantially the work of a single author. He is now convinced that it is made up of two, if not three other books, besides what has been introduced from the "Noach-book" in ch. lv. 7-iv. 2, ch. ix., lv.-lix. 25, ch. vii.-xi., and cvi. f. He agrees with Ewald in regarding ch. xxxvii.-lxxi. (after leaving out the Noachian portions) as the first Enoch-book, composed about 154 B.C. Volkmann, in the *Zeitschrif. d. deutschen *Gesellschaft* für 1890, xiv. 87-114, presents a view of the origin and date of the book altogether new, maintaining that it was written at the time of the Jewish revolt under Bar-Cochba about 132 A. D., by a disciple of the famous Rabbi Akiba, to encourage the Jews in their rebellion. He finds, however, extensive Christian interpolations in ch. xviii.-lxxi., comp. E. Dillmann has criticized Volkmann's essay in a brief article in the same Zeitschrift, xx. 111 ff., not deeming it worthy of a very elaborate refutation. See also Ewald, *Jahrb. xi. 241 ff.* The whole question, with the connected topics, has been discussed by Hilgenfeld and Volkmar in a succession of articles in Hilgenfeld's *Zeitschr. f. wiss. Theol.* for 1860-63. See also on the book Ewald, *Gesch. d. Volks Isr.*, 3* A., Ausg. (1864), iv. 455 ff., and especially Martin's "*Der Eichhorn's Early History of Messianic Ideas*, in the *National Review* for April, 1864.

The question of the original language of the book is discussed very fully by M. Joseph Hallivi in the *Journal Asiatique* for April and May, 1867, pp. 532-65. He maintains, it would seem conclusively, that it was composed in the almost Biblical Hebrew of the Mishna and the oldest Midrashim. The article contains many happy elucidations of difficult passages in the book.

A. *ENOCH, CIVILTY.* [Enoch, No. 1.]

B. *ENOCH.* [.Enos.]

Enos (כנענוס [man, especially as mortal, decaying]: *Ergä: Ewe*) The son of Seth; properly called Enoch, as in 1 Chr. i. 1 [A. V.] (Gen. iv. 26, v. 6, 7, 9, 10, 11; Luke iii. 38).

* He was the third from Adam in the antediluvian genealogy. That he was born, had children (of these CAINAN only is named), and died at the age of 905, is the sum of all that is known of him. The A. V. takes the form of the name from the i.XX. or Vulg.

H. *ENOCHILL.* The same as the preceding (1 Chr. i. 1) and the stricter Hebrew form, instead of *Enos*.

EN-RIMMON (*7272 72* [fountain of pomegranates]: Vat. omits. Alex. *Ev Pomean*: *et in Kimmmon*, one of the places which the men of
Adonijah—a name which it still retains in the traditions of the Greek Christians (Williams, Holy City, ii. 490). Against this general belief, some strong arguments are urged by Dr. Bonar in favor of identifying En-rogel with the present "Fountain of the Virgin." "Ain Ummed-Duraj ="spring of the mother of steps"—the perennial source from which the Pool of Tituba is supplied (Pool of Provincia, A.p.p.). These arguments are briefly as follows:—(1.) The Bir Eyub is a well and not a spring (En), while, on the other hand, the "Fountain of the Virgin" is the only real spring close to Jerusalem.

Thus if the latter be not En-rogel, the single spring of this locality has escaped mention in the Bible. (2.) The situation of the Fountain of the Virgin agrees better with the course of the boundary of Benjamin than that of the Bir Eyub, which is too far south. (3.) Bir Eyub does not suit the requirements of 2 Sam. xvii. 17. It is too far off both from the city, and from the direct road over Olivet to the Jordan: and is in full view of the city (Van de Velde, i. 475), which the other spot is not. (4.) The martyrdom of St. James was effected by casting him down from the temple wall into the valley of Kedron, where he was finally killed by a fuller with his washing-stick.

The natural inference is that St. James fell near where the fullers were at work. Now Bir Eyub is too far off from the site of the Temple to allow of this, but it might very well have happened at the Fountain of the Virgin. (See Stanley's Sermons on the Apost. Age, p. 333-34.)

(5.) Duraj and Rogel are both from the same root, and therefore the modern name may be derived from the ancient one, even though at present it is taken to refer to the "steps" by which the reservoir of the Fountain is reached.

Add to these considerations (what will have more significance when the permanence of Eastern habits is recollected) — (6.) That the Fountain of the Virgin is still the great resort of the women of Jerusalem for washing and treading their clothes and also—(7.) That the level of the king's gardens must have been above the Bir Eyub, even when the latter is at the mouth of the Pool; and it is generally seventy or eighty feet below; while they must have been lower than the Fountain of the Virgin, which thus might be used without difficulty to irrigate them. (See Robinson, i. 331 334; and for the best description of the Bir Eyub, see Williams, Holy City, i. 493-495.)

JERUSALEM.

* In reply to the argument by Bonar, adduced above, and in support of the theory which identifies Bir Eyub with the En-rogel of the sacred writers, these considerations may be urged. (1.) It is both a well and a spring. During portions of the rainy season, a copious stream issues from its mouth, and when it ceases to overflow, its waters pass off by a subterranean channel. (2.) The narrative of" the martyrdom of St. James" [JAMES THE LITTLE] above referred to, differs from Josephus, and is partly, at least, legendary; and if the incident named is accepted, the "inference" does not follow, nor has it a decisive bearing on this question. (3.) The narrative in 2 Sam. xvii. 17, suggests no difficulty. It implies some place of concealment near the spot. That the locality was

This natural interpretation of a name only slightly corrupt appears to have first suggested itself to Stanley (S. & P. p. 194).

* Stanley (S. & P. p. 501, Amer. ed.) defines En-rogel as "Spring of the Foot." But the vocalization would then be לָלָלֶג, and not לַלָלֶג, as in the Masoretic text.
little off from the direct road would be favorable; and its being outside the city, yet within easy reach of a messenger from it, answers all the requirements. (4.) The position of Bir Egbub accords entirely with the boundary-line between Judah and Benjamin, and that of the Fountain of the Virgin does not. This border, coming from the Dead Sea, passed up the Valley of Hinnom, south of Jerusalem. The Bir Egbub is in the centre of the valley through which it passed, while the Fountain of the Virgin is on a hill-side, several hundred yards distant from its natural course. If the reader will turn to the article Jerusalem, Plate III., on which both points are indicated, he will see at a glance how inexplicably the border would touch the former point, and how improbable and unaccountable would be the detour which would carry it to the latter point. (5.) This theory, if not, as Thomson claims, more in harmony, is certainly not less so, with the record in 1 Kings i. 3, 38, 41. (6.) Other reasons in its favor are given above, and it has commanded the general assent of visitors and writers, from Boccardus to Robinson.

The Bir Egbub is 125 feet in depth, walled up with large square stones on its four sides, one of which terminates above in an arch. The work is, evidently, of high antiquity. The water is pure and sweet, but not very cold. When it passes off beneath the surface, it issues, during a part of the year, in a large stream some forty yards below. See Thomson, Land of Bashk, ii. 528 f. S. W. * ENROLLED (Luke ii. 1). [Census; Taxing.]

EN-SHE'MESH (םשנ) = spring of the sun: הֵֽעֵגְבּ (עִגְבּ) תּוֹ (Hei, אִגְבּ) ַאַבּרְסָאָא; [in Josh. xviii., Alex. πνεία Λατοτά; Esmesos, in est, Fons Solis], a spring which formed one of the landmarks on the north boundary of Judah (Josh. xv. 7) and the southern boundary of Benjamin (xviii. 17). From these notices it appears to have been between the "ascent of Adumuim" — the road leading up from the Jordan valley south of the Wady Kilt — and the spring of En-roed, in the valley of Kidron. It was therefore east of Jerusalem and of the Mount of Olives. The only spring at present answering to this position is the 'Ein-Hewd or 'Ein-Chel — the "Well of the Apostles," 4 about a mile below Bethany, the traveller's first halting-place on the road to Jericho. Accordingly this spring is generally identified with En-Shemesh. The aspect of 'Ein-Hewd is such that the rays of the sun are on it the whole day. This is not inappropriate in a fountain dedicated to that luminary.

ENSIGN ( isize in the A. V. generally "ensign," sometimes "standard;") ַהַמָּה (ohen) ַיָּהְמָה, with the exception of Cant. ii. 4, "banner;"

עֵגְבּ (עִגְבּ) ("ensign"). The distinction between these three Hebrew terms is sufficiently marked by their respective uses: ַעֵגְבּ is a signal; ַהַמָּה a military standard for a large division of an army; and ַיָּהְמָה, the same for a small one. Neither of them, however, expresses the idea which "standard" conveys to our minds, namely, a "flag"; the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians — a figure or device of some kind elevated on a pole. (1.) The notices of the ַעֵגְבּ or "ensign" are most frequent: it consisted of some well-understood signal which was exhibited on the top of a pole from a high mountain-top (Is. xiii. 2, xvii. 3) — the very emblem of conspicuous isolation (Is. xxx. 17). Around it the inhabitants mustered, whether for the purpose of meeting an enemy (Is. v. 28, xviii. 3, xxxii. 9), which was sometimes notified by the blast of a trumpet (Jer. iv. 13, l. 27); or, as a token of rescue (Ps. lxi. 4; Is. xl. 10; Jer. iv. 6); or for a public proclamation (Jer. l. 2); or simply as a gathering point (Is. xlix. 22, xili. 10). What the nature of the signal was, we have no means of stating; it has been inferred from Is. xxxiii. 23, and Ez. xvii. 7, that it was a flag: we do not observe a flag depicted either in Egyptian or Assyrian representations of vessels (Wilkinson, iii. 211; Bononi, pp. 166, 167); but, in lieu of a flag, certain devices, such as the phoenix, flowers, &c., were embroidered on the sail: whence it appears that the device itself, and perhaps also the sail bearing the device, was the ַעֵגְבּ or "ensign." It may have been sometimes the name of a leader, as implied in the title which Moses gave to his altar "Jehovah-nissi" (Ex. xvii. 15). It may also have been, as Michaelis (Sulp. p. 1648) suggests, a blazing torch. The important point, however, to be observed is, that the ַעֵגְבּ was an occasional signal, and not a military standard, and that elevation and conspicuousness are implied in the use of the term, hence it is appropriately applied to the "pole" on

* So called from its being supposed that the Apostle of Christ may have rested there in their journeys.
**ENSIGN**

which the brazen serpent hung (Num. xxi. 8); which was indeed an "ensign" of deliverance to the pious Israelite; and again to the censers of Korah and his company, which became a "sign" or beacon of warning to Israel (Num. xvi. 38).

(2.) The term dekel is used to describe the standards which were given to each of the four divisions of the Israelite army at the time of the Exodus (Num. i. 52; ii. 2 ff.; xx. 14 ff.). Some doubt indeed exists as to its meaning in these passages, the LXX. and Vulgate regarding it not as the standard itself, but as a certain military division annexed to a standard, just as vexill is sometimes used for a body of soldiers (Tac. Hist. i. 70; Liv. viii. 8). The sense of "comport and martial array" does certainly seem to lurk in the word; for in Cant. vi. 4, 10, the brilliant glances of the bride's eyes are compared to the destructive advance of a well-arrayed host, and a similar comparison is employed in reference to the bridegroom (Cant. v. 10); but on the other hand, in Cant. ii. 4, no other sense than that of a "banner" will suit, and we therefore think the rendering in the A. V. correct. No reference can be placed on the term in Ps. xx. 5, as both the sense and the text are matters of doubt (see Olshausen and Hengstenberg, loc. cit.). A standard implies, of course, a standard-bearer; but the supposed notice to that officer in Is. x. 18, is incorrect, the words meaning rather "as a sick man pineth away;" in a somewhat parallel passage (Is. lxix. 19) the marginal version is to be followed, rather than the text. The character of the Hebrew military standards is quite a matter of conjecture; they probably resembled the Egyptian, which consisted of a sacred emblem such as an animal, a boat, or the king's name (Wilkinson, i. 294). Rabbinical writers state the devices to have been as follows: for the tribe of Judah a lion; for Reuben a man; for Ephraim an ox; and for Dan an eagle ( Carpzov, Crit. App. p. 667); but no reliance can be placed on this. As each of the four divisions, consisting of three tribes, had its standard, so had each tribe its "sign" (oth) or "ensign," probably in imitation of the Egyptians, among whom not only each battalion, but even each company had its particular ensign (Wilkinson, i. 295). We know nothing of its nature. The word occurs figuratively in Ps. lxix. 4, apparently in reference to the images of idol gods. W. L. B.

---

**EPAPHRAS**

* ENSUE (like the French ensuite, which is from the Latin sequere) means in 1 Pet. ii. 11, to "follow after and overtake:" "Let him seek peace and ensue it." It has no longer this sense.

**EN-TAPP'AH (ἐν τάππα) an spring of apple, or citrus: πίγγις θρωποὺς; [Alex. γιγ. θρωποὺς: From Tappau]. The boundary of Ma-rassak went from facing Shechem "to the inhabitants of En-tappanah" (Josh. xvi. 7). It is probably identical with Tappash, the position of which is uncertain. [TAPPUHM.] This place must not be confounded with Beth-tappuah in the mountains of Judah.

**ENTRANCE TO HAMATH. [HATH.]**

* EENTREAT (written also "intreat") is often used in the A. V. where we should employ "pray," or a similar expression, as in the phrases "to entreat well," "courteously," "spitefully," "shamefully," and "to evil entreat;" see Gen. xii. 16; Acts xxvii. 5; Matt. xxii. 6; Luke xx. 11; Acts vii. 19, &c. The simple "treat" does not occur in this sense either in the A. V. or in Shakespeare. "To be entreated" (A. V.) often signifies "to be prevailed upon by entreaty;" see 1 Chr. v. 20; 2 Chr. xxxii. 13; Is. xix. 22, &c.

EP.ENTETUS [A. V. Epenetus] [ὑποδότης [praised or worthy of praise]], a Christian at Rome, greeted by St. Paul in Rom. xvi. 5, and designated as his beloved, and the first fruit of Asia (so the majority of ancient MSS. and the critical editors: the received text has Ἀραίας) unto Christ. The Synopsis of the pseudo-Dorotheus names him first bishop of Carthage, but Justinian remarks that the African churches do not recognize him.

H. A.

**EPAPHRAS (Ἐπαφρᾶς; lovelily, fascinat- ing), a fellow-laborer with the Apostle Paul, mentioned Col. i. 7, as having taught the Colossian church the grace of God in truth, and designated a faithful minister (βασιλείας) of Christ on their behalf. (On the question whether Epaphras was the founder of the Colossian church, see the prolegomena to the epistle, in Alford's Greek Testament, i. 35 ff.) He was at that time with St. Paul at Rome (Col. iv. 12), and seems by the expression ἐν ὑμῖν, there used, to have been a Colossian by birth. We find him again mentioned in the Epistle to Philemon (ver. 23), which was sent at the same time as that to the Colossians. St. Paul there calls him ὅτι ὑμεῖς ἐν τῇ ἐκκλησίᾳ τῇ Εὐφραίνως, but whether the word represents matter of fact, or is only a tender and delicate expression of Epaphras's attention to the Apostle in his imprisonment (cf. Rom. xvi. 13), we cannot say.

Epaphras may be the same as Ephaphroditus, who is called, in Phil. ii. 25, the apostle of the Philippianians, and having come from Philippi to Rome with contributions for St. Paul, was sent back with the epistle. It has been supposed by many, and among them by Grotius, in all probability the name Epaphras is an abbreviation of Ephaphroditus: but on the question of the identity of the persons, the very slight notices in the N. T. do not enable us to speak with any confidence. The name Ephaphroditus was sufficiently common: see Tac. Ann. xv. 55; Sueton. Domit. 14; Joseph. Life, § 76. The martyrlogies make Epaphras to have been first bishop of Colosse, and to have suffered martyrdom there.

I. A.
E P H E R I A N S

* Though Epaphras and Epaphroditus may be different forms of the same name (see Winer, Realta, i. 321), the probability is that in the Epistles they designate different persons. It is against the supposed identity, first, that Epaphras belonged to Colossae (Col. iv. 12), and had come thence to Rome (Col. i. 7), whereas Epaphroditus belonged to Philippi, and had been sent thence to Rome with the church's contributions for Paul (Phil. ii. 25); and, secondly, as the foregoing facts indicate, that Epaphras had his circuit of labor in Phrygia of Asia Minor (Col. iv. 13), while Epaphroditus had his circuit in northern Greece or Macedonia. See Neander's Ephesus, i. 292 (1847). Again, Epaphras was Paul's fellow-captive, probably in a literal sense. We may infer this first, from his being named apart from Paul's fellow-laborers (συνεργαζομαι) at Rome (Phil. iv. 23, 24), and, secondly, from the subjoined ἐν Χριστῷ Ἰησοῦ, which shows in what sphere he bore that character. Meyer held to the figurative sense in his first ed. (1848), but changes to the other in his third (1863). H.

* E P H E N E T U S, Rom. xvi. 5. [Ep. Ephesus.]

E P H A H (Ἐφα [darkness]; Γαφάφ; [Γαφάφ; Vat. in 1 Chr. 199, 200; Alex. 1 Chr. 19, 20.]

Εφαθά; Ephah), in the first, in order of the sons of Midian (Gen. xxv. 4; 1 Chr. i. 33), afterwards mentioned by Isaiah in the following words: «The multitude of camels shall cover thee, the daughters of Midian and Ephah; all they from Sheba shall come; they shall bring gold and incense; and they shall shew forth the praises of the Lord. All the flocks of Kedar shall be gathered together unto thee, the rams of Nebaioth shall minister unto thee; they shall come up with acceptance on mine altar, and I will glorify the house of my glory» (Is. xiv. 6, 7). This passage clearly connects the descendants of Ephah with the Midianites, the Keturahites, Sheba, and the Ishmaelites, both in the position of their settlements, and in their wandering habits; and shows that, as usual, they formed a tribe bearing his name. But no satisfactory identification of this tribe has been discovered. The Arabic word סןמח (ṣ̄anmaḥ), which has been supposed to be the same as Ephah, is the name of a town, or village, near Bithya (the modern Bilbeis), a place in Egypt, in the province of the Sharkheev, not far from Cairo; but the tradition that Ephah settled in Africa does not rest on sufficient authority. [Midian; Sheba.] E. S. P.

E P H A H (Ἐφα [darkness]; Γαφάφ; [Γαφάφ; Vat. in 1 Chr. 199, 200; Alex. 1 Chr. 19, 20.]

Εφαθά; Ephah), 1. Concomitance of Caleb, in the line of Judah (1 Chr. ii. 46). 2. Son of Judah; also in the line of Judah (1 Chr. ii. 47). E. P.

E P H A H (Ἐφα [Measures].)

E P H A H (Ἐφα [2 syl. (following the Kerî, ἐφα; but the original text is ἐφα—Οφθα [seevry, ἐναγόμενος]; and so LXX. ἐφα: [Alex. ἐφα; FA. Oφθα,] a Netophathite, whose sons were among the «captains» (ἀρχαί) of the forces» left in Judah after the deportation to Babylon (Jer. xli. 8). They submitted themselves to Gedaliah, the Babylonian governor, and were apparently massacred with him by Ishmael (xli. 3, comp. xl. 13).
and himself bound (Acts xix. 1 ff., comp. xviii. 19), with which he abode so long (ρέσπειρα, Acts xx. 31), and from the elders of which he parted with such a wavy Sense and affecting farewell (Acts xx. 18-35). It does not seem to have been called out by any special circumstances, nor even to have involved any distinctly precautionary teaching (comp. Schneckenburger, Beltrage, p. 135 ff.), whether against oriental or Judaistic theosophy, but to have been suggested by the deep love which the Apostle felt for his converts at Ephesus, and which the mission of Tychicus, with an epistle to the church of Colossians afforded him a convenient opportunity of evincing in written teaching and exhortation. The epistle thus contains many thoughts that had pervaded the nearly contemporaneous Epistle to the Colossians, reiterates many of the same practical warnings and exhortations, bears even the tinge of the same diction, but at the same time enlarges upon so much profound mysteries of the divine counsels, displays so fully the origin and developments of the church in Christ, its union, communion, and aggregation in him, that this majestic epistle can never be rightly esteemed otherwise than as one of the most sublime and consolatory outpourings of the Spirit of God to the children of men. To the Christian at Ephesus dwelling under the shadow of the great temple of Diana, daily seeing its outward grandeur, and almost daily hearing of its pompous ritualism, the allusions in this epistle to that mystic building of which Christ was the corner-stone, the Apostles the foundations, and himself and his fellow Christians portions of the august superstructure (ch. ii. 19-22), must have spoken with a force, an appropriateness, and a reassuring depth of teaching that cannot be overestimated.

The contents of this epistle easily admit of being divided into two portions, the first mainly doctrinal (ch. i.-iii.), the second hortatory and practical.

The doctrinal portion opens with a brief address to the saints in Ephesus (see below), and rapidly passes into a sublime ascription of praise to God the Father, who has predestinated us to the adoption of sons, blessed and redeemed us in Christ, and made known to us his eternal purpose of uniting all in him (ch. i. 3-14). This not unnaturally evokes a prayer from the Apostle that his converts might know the truth of his calling, the riches of his grace, and the magnitude of that power which was displayed in the resurrection and ascension of Christ—the head of his body, the church (ch. i. 15-23). Then, with a more immediate address to his converts, the Apostle reminds them how, dead as they had been in sin, God had quickened them, raised them, and even enthroned them with Christ,—and how all was by grace, not by works (ch. ii. 1-10). They were to remember, too, how they had once been alienated and yet were now brought nigh in the blood of Christ; how he was their peace; how by him both they and the Jews had access to the Father, and how on him as the corner-stone they had been built into a spiritual temple to God (ch. ii. 11-22). On this account, having heard, as they must have done, how to the Apostle was revealed the profound mystery of this call of the Gentile world, they were not to faint at his troubles (ch. iii. 1-13); nay, he prayed to the great Father of all to give them inward strength to teach them with the love of Christ and fill them with the fullness of God (ch. iii. 13-19). The prayer is concluded by a sublime doxology (ch. iii. 20, 21), which serve to usher in the more directly practical portion.

This the Apostle commences by entreating them to walk worthy of his calling, and to keep the unity of the spirit: there was but one body, one Spirit, one Lord, and one God (ch. iv. 1-6). Each too had his portion of grace from God (ch. iv. 7-10), who had appointed ministering orders in the church, until all come to the unity of the faith, and grow up and become united with the living Head, even Christ (ch. iv. 11-16). Surely then they were to walk no longer in darkness, feelingly heathen; they were to put off the old man, and put on the new (ch. iv. 17-24). This too was to be practically evinced in their outward actions; they were to be truthful, gentle, honest, pure, and forgiving; they were to walk in love (ch. iv. 25-v. 2). Fornication, covetousness, and immorality, were not even to be named; they were once in heathen darkness, now they are light, and must reprove the deeds of the past (ch. v. 3-14). Thus they were to walk exactly, to be filled with joy, treading and to give thanks (ch. v. 15-21). Wives were to be subject to their husbands, husbands to love and cleave to their wives (ch. v. 22-33); children were to honor their parents, parents to bring up holily their children (ch. vi. 1-4); servants and masters were to perform to each other their reciprocal duties (ch. vi. 5-9).

With a ample and vivid exhortation to arm themselves against their spiritual foes with the armor of God (ch. vi. 10-21), a brief notice of the coming of Tychicus (ch. vi. 21, 22), and a twofold doxology (ch. vi. 23, 24), this sublime epistle comes to its close.

With regard to the authenticity and genuineness of this epistle, it is not too much to say that there are no just grounds for doubt. The testimonies of antiquity are unusually strong. Even if we do not press the supposed allusions in Ignatius, Eph. ch. 12, and Polycarp, Philippi, ch. 12, we can confidently adduce Irenaeus, Her. v. 2, 3, v. 14, 3; Clem. Alex. Presb. i. p. 108 (ed. Pott.), Strom. iv. p. 592 (ed. Pott.); Orig., Contr. Cels. iii. 20; Tertull. de Prescr. Her. ch. 36, and after them the constant and persistent tradition of the ancient church. Even Marcion did not deny that the epistle was written by St. Paul, nor did heretics generally refuse occasionally to cite its contents, even confidentiality due him as its author; comp. Irenaeus, Her. i. 8, 5.

In recent times, however, its genuineness has been somewhat vehemently called in question. De Wette, both in the introductory pages of his Commentary on this epistle (ed. 2, 1847), and in his Introduction to the N. T. (ed. 5, 1848), labors to prove that it is a mere spiritless expansion of the Epistle to the Colossians, though compiled in the apostolic age; Schwegler (Nachw. zum Zöt. ii. 390 ff.), Baur (Paulus, p. 418 ff.), and others advance a step further and reject both epistles as of no higher antiquity than the age of Montanism and early Gnosticism. Without here entering into the details, it seems just to say that the adverse arguments have been urged with a certain amount of specious plausibility, but that the replies have been so clear, satisfactory, and in some cases crushing, as to leave no reasonable and impartial inquirer in doubt as to the authorship of the epistles. On the other hand, we have more subjective judgments, not unmarked by arrogance, relying mainly on supposed divergences in doctrine and presumed insigual as of diction, but
wholly destitute of any sound historical basis; on the other hand we have unanimously convincing counter-investigations, and the unwavering testimony of the ancients. That this is the opinion of the majority in matters of style and form is so decided as to lead a writer of the 19th century to deny confidently the genuineness of this epistle, how are we to account for its universal reception by writers of the 2d and 3d centuries, who spoke the language in which it was written, and who were by no means unacquainted with the phenomenon of pious fraud and literary imitation?

For a detailed reply to the arguments of De Wette and Baur, the student may be referred to Meyer, Einleit. z. Eph. p. 19 ff. (ed. 2), Davidson, Pref. to N. T. ii. p. 352 ff., and Alford, Prolegomena, p. 8. [See also Klieper, De Origine Ep. ad Colossen. et Thessal. Gryph. 1853.]

Two special points require a brief notice.

(1.) The readers for whom this epistle was designed. In the opening words, Παῦλος ἀπὸ τοῦ Ἰσραήλ Ἐρυθροῦ ἐποίησεν σὺν ἀνθρώπινοι, the words εποίησεν are omitted by B, 177 [a second manus.] Basil (expressly), and possibly [probably] Tertullian. This, combined with the somewhat noticeable omission of all greetings to the members of a church with which the Apostle stood in such affectionate relation, and some other internal objections, have suggested a doubt whether these words really formed a part of the original text. At first sight these doubts seem plausible; but when we oppose to them (a) the overwhelming weight of diplomatic evidence for the insertion of the words, (b) the testimony of all the versions, (c) the universal designation of this epistle by the ancient church (Marcion standing alone in his assertion that it was written to the Laodiceans) as an epistle to the Ephesians, (d) the extreme difficulty in giving any satisfactory meaning to the isolated participles, and the absence of any parallel usage in the Apostle’s writings, — we can scarcely feel any doubt as to the propriety of removing the brackets in which these words are inclosed in the 2d edition of Tischendorf, and of considering them an integral part of the original text.

It called upon to supply an answer to, or an explanation of, the internal objections, we must record the opinion that these objections seem so free from importance, as that which regards the Epistle as also designed for the benefit of churches either contiguous to, or dependent on, that of Ephesus. The counter-arguments of Meyer, though ably urged, are not convincing. Nor can an appeal to the silence of writers of the ancient church on this further designation be considered of much weight, as their references are to the usual and inadmissible designation of the epistle, but do not, and are not intended to affect the question of its wider or narrower destination. It is not unnatural to suppose that the special greetings might have been separately intrusted to the bearer Tychicus, possibly himself an Ephesian, and certainly commissioned by the Apostle (ch. vi. 22) to inform the Ephesians of his state and circumstances.

(2.) The question of priority in respect of composition between this epistle and that to the Colossians is very difficult to adjust. On the whole, both internal and external considerations seem somewhat in favor of the priority of the Epistle to the Colossians. Comp. Neander, Planting, ii. 329 (Bolm), Schleiermacher, Stud. u. Krit. for 1832, p. 590, and Wieseler, Chronik, p. 459 ff. On the similitude of epistles, see 4. C. E.

* We have later editions of commentaries from: Ewald, 3d ed., 1804 (Amcr. reprint, 1866); Alford, 1855 (4th ed.); Harless, 1858 (but unchanged); Stier, 1839 (an abridgment of the earlier edition, which Ewald in the Preface to his Ephesians so justly censures for its proximity); Meyer, 3d ed., 1859. To the foregoing works we may add those of Schenkel, Briefe an die Iyphesin., 1857 (2d ed.), Anhalt, 1857 (3d ed.), and Bleek, Vorlesungen ab. die Briefe an die Kol., den Phil., u. die

It would be, indeed, less probable in the case of a letter than that of the Apostle; for the latter, writing naturally, would not guard himself against repeating the same thoughts in letters to different persons; while one who was fabricating false epistles would take especial care against whatever might bring his work into suspicion.”

b. * The diplomatic evidence against the genuineness of the words εποίησεν is now strengthened by their omission in the Codex Sinaiticus. Basil testifies that the εποίησεν of the words εποίησεν τοις τοίς (without εποίησεν) had been handed down by his predecessors, and was that by which he had found in the ancient copies of the epistle to the Ephesians, εποίησεν γὰρ καὶ οἱ πρὸς ἀρκετῶς παλαιότεροι καὶ εἰς τοὺς παλαιότατος τῶν αυτογράφων εὑρίσκουσιν (Codex Euchl. B. 19). This appears also to have been the reading of Origen. See the note in Tischendorf’s 2d ed. of the Greek Testament (1859). The external evidence against the words is certainly weighty. On this and other questions relating to the epistle, see particularly Bleek’s Vorlesungen, 1855, p. 172 ff. A.
Eph., 1865 (edited by F. Nitzsch); Trapp, in his Commentary on the New Testament (Webster's ed. Lond. 1865); Maurice, Epistle to the Ephesians, in his Unity of the New Testament, pp. 512-548 (1854); J. Llewelyn Davies, Epistles of St. Paul to the Ephesians, Colossians, and Philemon, with Introduction and Notes (Lond. 1856); Alford, in his New Testament for English Readers (1866); Wordsworth, in his Greek Testament, with Introductions and Notes, 1866 (4th ed.); and in our own country, those of the Rev. Albert Barnes, Notes, Exegetical and Practical, on the Epistles to the Ephesians, Philemon, and Colossians (1845), S. H. Turner, D. D., The Epistle to the Ephesians, in Greek and English, with an Exegetical Commentary (1856), and Charles Hodge, D. D., Comm. on the Epistle to the Ephesians (1856).

The circle of critical questions (such as genuineness, Gnostic tendency, time and place of composition) to which this epistle has given rise, coincides very nearly with that connected with the Epistle to the Colossians. [Colossians.] On this class of questions see especially Prof. Weiss's supplementary article in Herzog's Real-Encyc. xiv. 481-487. This writer agrees with those who regard ἐν Εφέσῳ of the received text (i. 1) as a later addition, and the epistle consequently as eucyclic in its destination. In his view the textual evidence for this conclusion is altogether preponderant, while the omission of the words occasions no difficulty. It was sufficient for the Apostle in the address to characterize his readers as Christians or saints in a general way, while at the same time he gave to Tycheius, the bearer of the letter (1 Cor. iv. 7), oral instructions as to the particular churches for whom the epistle was designed. Bleek (Std. in obs. N. Test. p. 457) supposes that the letter was sent first to the church at Laodicea (comp. Tertull. adv. Marcion. v. 11, 17, and Col. iv. 16), but that it was designed to be communicated to other churches in the immediate neighborhood (as that at Hierapolis), which Paul had not personally visited. He thinks it cannot have been intended also for the church at Ephesus, which stood in so different a relation to the Apostle. Dr. J. C. M. Laurent, on the other hand, in a recent article (Philemon von Laodikeia, in the Jahresber. f. deutsche Theol. 1866, p. 129 ff.) regards the epistle as designed equally for the churches of Laodicea and Ephesus, and therefore originally written without any address, the words ἐν Εφέσῳ in ver. 1 being a later addition. The various hypotheses have been still more recently discussed by Kamphausen, Uber den ursprüngl. Leserkreis des Ephesianertextes, in the Jahrb. f. deutsche Theol., 1856, pp. 742-749. He supposes that the epistle was originally addressed to the church at Laodicea.

II. Ephesus ('Epēseos), an illustrious city in the district of Ionia (Ῥώμας Λαοῦς ἐπιφανεστατῆς, Steph. Byz. s. v.), nearly opposite the island of Samos, and about the middle of the western coast of the peninsula commonly called Asia Minor. Not that this geographical term was known in the first century. The Asia of the N. T. was simply the Roman province which embraced the western part of the peninsula. Of this province Ephesus was the capital. [Ephesus.]

Among the more marked physical features of the peninsula are the two large rivers, Hermus and Maeander, which flow from a remote part of the interior westward to the Archipelago, Smyrna (Herod. i. 8) being near the mouth of one and Miletus (Acts xx. 17) of the other. Between the valleys formed by these two rivers is the shorter stream and smaller basin of the Cayster, called by the Turks Kutscha-Meander, or the Little Meander. Its upper level (often called the Caystrian meadows) was closed to the westward by the gorge between Gallesus and Pactys, the latter of these mountains being a prolongation of the range of Messoig which bounds the valley of the Meander on the north, the former more remotely connected with the range of Tmolos which bounds the valley of the Hermus on the south. Beyond the gorge and towards the sea the valley opens out again into an alluvial flat (Herod. ii. 10), with hills rising abruptly from it. The plain is now about 5 miles in breadth, but formerly it must have been smaller; and some of the hills were once probably islands. Here Ephesus stood, partly on the level ground and partly on the hills.

Of the hills, on which a large portion of the city was built, the two most important were Prion and Coressus, the latter on the S. of the plain, and being in fact almost a continuation of Pactys, the former being in front of Coressus and near it,
though separated by a deep and definite valley.

Further to the N. E. is another conspicuous eminence. It seems to be the hill mentioned by Procopius (de Edif. v. 1) as one on which a church dedicated to St. John was built; and its present name Adyronakos is thought to have reference to him, and to be a corruption of Ἀδυρόνακος. Ephesus is closely connected with this Apostles, not only as being the scene (Rev. i. 11, ii. 1) of the most prominent of the churches of the Apocalypse, but also in the story of his later life as given by Eusebius. Possibly his Gospel and Epistles were written here. There is a tradition that the mother of our Lord was buried at Ephesus, as also Timothy and St. John; and Ignatius addressed one of his Epistles to the church of this place (τῇ Ἑλληνίδᾳ τῇ Ἑλληνισκῷ, τῇ ὑστερῇ ἐν Ἐφεσσί ἀπόστολοι). Heele, Pat. Apostol. p. 154, which held a conspicuous position during the early ages of Christianity, and was in fact the metropolis of the churches of this part of Asia. But for direct Biblical illustration we must turn to the life and writings of Paul, which is not inconsiderable. It is remarkable how all the most characteristic features of ancient Ephesus come successively into view.

1. Geographical Relations. These may be viewed in connection, first with the sea and then with the land.

All the cities of Ionia were remarkably well situated for the growth of commercial prosperity (Herod. I. 152), and none more so than Ephesus. With a fertile neighborhood and an excellent climate, it was also most conveniently placed for traffic with all the neighboring parts of the Levant. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus (Strab. xiv. p. 550): its harbor (named Panormus) at the mouth of the Cayster, was elaborately constructed; though silted matter caused serious hindrances both in the time of Attalus, and in St. Paul's own time (Tac. Ann. xvi. 25). The Apostle's life alone furnishes illustrations of its mercantile relations with Achaea on the W. Macedonia on the N., and Syria on the E. At the close of his second missionary circuit, he sailed across from Corinthus to Ephesus (Acts xviii. 19) when on his way to Syria (ib. 21, 22): and there is some reason for believing that he once made the same short voyage over the Ægean in the opposite direction at another period (Churchill, Euseb. Hist. Eccl. i. 26). The third missionary circuit, besides the notice of the journey from Ephesus to Macedonia (xix. 21, xx. 1), we have the coast voyage on the return to Syria given in detail (xx. 11., 26). and the geographical relations of this city with the islands and neighboring parts of the coast minutely indicated (xx. 13-17). To these passages we must add 1 Tim. i. 3; 2 Tim. iv. 12, 29; though it is difficult to say how definitely whether the journeys implied there were by land or by water. See likewise Acts xix. 27, xx. 1.

As to the relations of Ephesus to the inland regions of the continent, these also are prominently brought before us in the Apostle's travels. The "upper coasts" (τὰ ἄνωτερα καὶ μηνι, Acts xix. 1) through which he passed when about to take up his residence in the city, were the Phrygian table-lands of the interior; and it was probably in the same district that on a previous occasion (Acts xvi. 6) he formed the unsuccessful project of preaching the gospel in the district of Asia. Two great roads at least in the Roman times, led eastward from Ephesus one through the passes of Timobus to Sardis (Rev. iii. 1) and thence to Galatia and the N. E. the other road the extremity of Paestas to Magnesia, and so up the valley of the Mæander to Ionia, whence the communication was direct to the Ephesians and to the Syrian Antioch. There seem to have been Sardian and Magnesian gates on the E. side of Ephesus, corresponding to these roads respectively. There were also coast roads leading northwards to Smyrna and southwards to Miletus. By the latter of these it is probable that the Ephesian elders travelled, when summoned to meet Paul at the latter city (Acts xx. 17, 18). Part of the pavement of the Sardian road has been noticed by travellers under the cliffs of All. All these roads, and others, are exhibited on the map in Lale's Asia Minor.

2. Temple and Worship of Diana. — Conspicuous at the head of the harbor of Ephesus was the great temple of Diana or Artemis, the tutelary divinity of the city. This building was raised on immense substructions, in consequence of the swampy nature of the ground. The earlier temple, which had been begun before the Persian war, was burnt down in the night when Alexander the Great

Plan of the Temple of Diana at Ephesus. (From Guthl's Ephesusica.)
The chief points connected with the uproar at Ephesus (Acts xix. 23-41) are mentioned in the article DIANA; but the following details must be added. In consequence of this devotion, the city of Ephesus was called neocoros (ver. 35) or "the warden" of Diana. This was a recognized title applied in such cases, not only to individuals, but to communities. In the instance of Ephesus, the term is abundantly found both on coins and in inscriptions. Its neocorate was in fact, as the "town-clerk" said, proverbial. Another consequence of the celebrity of Diana’s worship at Ephesus was, that a large number of people flocked there to partake of the shrines (psai, ver. 24, the ἄφιδρωτα of Dionys. Halicarn. ii. 2, and other writers), which strangers purchased, and devoted with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (ὁ γαλάκτως, 2 Tim. iv. 14) was one. The case of Demetrius the "silver-smith" (ἀργευροσίς in the Acts) is explicit. He was alarmed for his trade when he saw the gospel spreading in Ephesus, under the preaching of St. Paul, gaining ground upon idolatry and superstition; and he spread a panic among the craftsmen of various grades, the τεχνίτα (ver. 24) or designers, and the ἄργαται (ver. 25) or common workmen, if this is the distinction between them.

3. The Asiarchs. — Public games were connected with the worship of Diana at Ephesus. The month of May was sacred to her. The uproar mentioned in the Acts very probably took place at this season. St. Paul was certainly at Ephesus about that time of the year (1 Cor. xvi. 8); and Demetrius might well be peculiarly sensitive if he found his trade failing at the time of greatest concourse. However this may be, the Asiarchs (Ἀσιάρχαι, A. V. "chiefs of Asia") were present (Acts xix. 31). These were officers appointed, after the manner of the elders at Rome, to preside over the games which were held in different parts of the province of Asia, just as other provinces had their Galat-archs, Lyciarchs, &c. Various cities would require the presence of these officers in turn. In the account of Polycarp’s martyrdom at Smyrna (Hefele, Pat. Apost. p. 256) an important part is played by the Asiarch Philib. It is a remarkable proof of the influence which St. Paul had gained at Ephesus, that the Asiarchs took his side in the disturbance. See Dr. Wordsworth’s note on Acts xix. 31. [ASIARCH.E.]

4. Study and practice of magic. — Not unconnected with the preceding subject was the remarkable prevalence of magical arts at Ephesus. This also comes comprehensively into view in St. Luke’s narrative. The peculiar character of St. Paul’s miracles (δεινοὶ ἐργασίαι, cor. i. 13) were to have been intended as antagonistic to the prevalent superstition. In illustration of the magical books which were publicly burnt (ver. 19) under the influence of St. Paul’s preaching, it is enough here to refer to the Εφέσια γράμματα (mentioned by Plutarch and others), which were regarded as a charm when pronounced, and when written down were carried about as amulets. The faith in these mystical syllables continued, more or less, till the sixth century. See The Life of Alexander of Tralles in the Dict. of Biog. [See also Grotius and Wetstein on Acts xix. 19.]

5. Provincial and municipal government. — It is well known that Asia was a proconsular province; and in harmony with this fact we find proconsuls (ὁ φύλαττως, ὁ δήμαρχος), A. V. "the law is open"") during the uproar; though perhaps it is not absolutely necessary to give the expression this exact reference at all times (see Wordsworth). Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate (ἱεροσυνή or βουλή) is mentioned, not only by Strabo, but by Josephus (Ant. xiv. 10, § 25, xvi. 6, §§ 4, 7); and St. Luke, in the narrative before us, speaks of the δήμος (vv. 20, 33, A. V. "the people") and of its customary assemblies (ἐκκλησία, v. 39, A. V. "a lawful assembly"). That the tumultuary meeting which was gathered on the occasion in question would take place in the theatre (vv. 29, 31) was nothing extraordinary. It was at a meeting in the theatre at Cesarea that Agrippa I. received his death-stroke (Acts xii. 23), and in Greek cities this was often the place for large assemblies (Tac. Hist. ii. 80; Val. Max. ii. 2). We even find conspicuous mention made of one of the most important municipal officers of Ephesus, the "Town-Clerk" (γραμματεύς) or keeper of the records whom we know from other sources to have been a person of great influence and responsibility.

It is remarkable how all these political and religious characteristics of Ephesus which appear in the sacred narrative, are illustrated by inscriptions and coins. An ἄρχειον or state-paper office is mentioned on an inscription in Chisibbi. The γραμματεύς frequently appears; so also the ἀστικῷ ἄκηρτων. Sometimes these words are combined in the same inscription: see for instance Birkh. Corp. Insic. 2999, 2994. The following is worth quoting at length, as containing also the words δήμος and νεωκόρος: "Ἡ φίλοσφος Βασίλειος Εφεσιοίς Βουλῇ καὶ ὅ νεωκόρος δήμος κατέχετον ἐπὶ ἄνθρωπον Πεθανοῦντος Πρεσβείαν."
are full of allusions to the worship of Diana in various aspects. The word  
epoikia is of frequent occurrence. That which is given above has also the word  
adunataros: it exhibits an image of the temple, and, bearing as it does, the name and  
head of Nero, it must have been struck about the time of St. Paul's stay in Ephesus.

We should enter on doubtful ground if we were to speculate on theoicic and other errors which grew up at Ephesus in the later apostolic age, and which are foretold in the address at Mileus, and indicated in the Epistle to the Ephesians, and more distinctly in the Epistles to Timothy. It is more to our purpose if we briefly put down the actual facts recorded in the N. T. as connected with the rise and early progress of Christianity in this city.

That Jews were established there in considerable numbers is known from Josephus (Il. c.), and might be inferred from its mercantile eminence: but it is also evident from Acts ii. 9, vi. 3. In harmony with the character of Ephesus as a place of concourse and commerce, it is here, and here only, that we find disciples of John the Baptist explicitly mentioned after the ascension of Christ (Acts xviii. 25, xix. 3). The case of Apollos (xviii. 24) is an exemplification further of the intercourse between this place and Alexandria. The first seeds of Christian truth were possibly sown at Ephesus immediately after the Great Pentecost (Acts ii.). Whatever previous plans St. Paul may have entertained (xvi. 6), his first visit was on his return from the second missionary circuit (xviii. 19-21); and his stay on that occasion was very short: nor is there any proof that he found any Christians at Ephesus; but he left there Aquila and Priscilla (ver. 19), who both then and at a later period (2 Tim. iv. 19) were of service. In St. Paul's own stay of more than two years (xix. 8, 10, 31), which formed the most important passage of his third circuit, and during which he labored, first in the synagogue (xix. 8), and then in the school of Tyrannus (ver. 9), and also in private houses (xx. 39), and during which he wrote the First Epistle to the Corinthians, we have the period of the chief evangelization of this shore of the Egean.

The direct narrative in Acts xix. receives but little elucidation from the Epistle to the Ephesians which was written several years after from Rome; but it is supplemented in some important particulars (especially as regards the Apostle's personal habits of self-denial, xx. 31) by the address at Miletus. This address shows that the church at Ephesus was thoroughly organized under its presbyters. At a later period Timothy was set over them, as we learn from the two epistles addressed to him.

Among St. Paul's other companions, two, Troph-
but it probably stood where certain large masses re-
main on the low ground, full in view of the theatre.
The disappearance of the temple may easily be ac-
counted for, partly by the rising of the soil, and
partly by the incessant use of its materials for
mediastic purposes. Some ecclesiastics are said
to be in St. Sophia at Constantinople, and even in
the cathedrals of Italy.

To the works above referred to must be added,
Perry, De rebus Ephesiorum (Gott. 1857), a slight
sketch; Guhl, Ephesios (Berl. 1843), a very
everable work; Heusinger’s Paulus (Gott. 1839),
which contains a good chapter on Ephesus; Brosco
On the Acts (Oxf. 1829), pp. 274-285; Mr. Alker-
man’s paper on the Cultus of Ephesus in the Trans.
of the Naucean Soc., 1841; Gronow, Antiq. Græc.
Gree. vii. 387-401; and an article by Améry in
the Rev. des Deux Mondes for January 1842.

An elaborate work on Ephesus is understood to be
in preparation by Mr. Falkener [since published,
Lond. 1862].

* The Apostle Paul in all probability wrote his
Epistle to the Galatians at Ephesus, during his so-
journ of nearly three years in that city (Acts xx.
8). [Galatians, Epistle to the]. His so-
journ there for so long a time illustrates what appears
to have been a rule of the earliest missionaries,
and that was to plant the gospel first in the principal
towns, and then from these centres to extend the
knowledge of it to other regions. Writing to the
believers at Thessalonica, the most populous place
in northern Greece, Paul commends them, because
from them had “ sounded out the word of the
Lord not only in Macedonia and Achaia, but also
everywhere” with which “travel and com-
merce connected that metropolis” (1 Thess. i. 8).
Ephesus held a similar rank in relation to the ad-
jacent parts of Asia Minor (Acts xiv. 10). The
church at Ephesus was one of the seven churches
to which the Apostle John at a subsequent period
sent messages from Patmos (Rev. ii. 1 f.). How
sadly fulfilled were Paul’s predictions respecting
the corruptions which should appear in this church
after his death (Acts xx. 28 f.), we learn from its
condition as described by John (Rev. ii. 1-6).
[Nicolaitans.] For the import and teachings of
the communication which the Spirit sent through
John to the church at Ephesus, see Trench’s Comm.
on the Epistles to the Seven Churches in Asia, and
Prof. Stuart’s Commentary on the Apocalypse.
Förbiger (Handb. der alten Geogr. ii. 188 ff.)
cites the principal passages in the classical writers
which illustrate the rank and earlier history of this
capital of Roman Asia. There are articles on
Ephesus” in Pauly’s Real-Enzy., by Westermann,
and in Herzog’s Real-Enzy. by Arnold.
Lewin furnishes a sketch at some length of pro-
consular Asia and Ephesus its capital (Life and
Epistles of St. Paul, i. 344-365). The incidents
relating to Paul’s life and labors in that city are
drawn out in chap. viii. of Howson’s Scenes from
the Life of St. Paul, and their Religious Lessons
(Lond. 1886), reprinted by the American Tract
Society (Boston, 1887). See also Conybeare and
Howson’s Life and Letters of St. Paul, ii. 39 ff.
(Amer. ed.).

The approach of the West to the East in the
assimilating power of its commerce, arts, and gen-
el civilization brings with it strange innovations.
A railroad at the present time connects the Apoc-
dyptical places, Smyrna and Ephesus, with each
other. * By the railroad, says Trسیس: (Lord
of the Gospel, p. 215), “we made the journey in
two hours. It crosses a smiling, fertile valley, ly-
between green mountains, crowned not far from
Ephesus by a fine glacier. Numerous herds are
started into flight at the whistle of the engine;
thus, as if to draw the contrast between the antique locomotion of
the desert world and the unbridled haste of a more
advanced civilization.”

H.

EΦΡΑΙΜ (ὙΠΑΝ) [judgment]: Ἀφαμαλ: Αλ. ὁφαλαί: [Arch; with S. MSS. ὁφαλά]: Τραπ (Lat.), a descendant of Judah, of the family of Hez-
ron and of Jerahmeel (1 Chr. ii. 97).

EΦΗΣΟΣ (ΤΕΣ), a sacred vestment originally
appropriate to the high-priest (Ex. xxviii. 4), but
afterwards worn by ordinary priests (1 Sam. xxi.
18), and deemed characteristic of the office (1 Sam.
ii. 28, xiv. 3; Hos. iii. 4). For a description of
the robe itself see High-priest. A kind of ephod
was worn by Samuel (1 Sam. ii. 18), and by Da-
vid when he brought the ark to Jerusalem (2 Sam.
vi. 14; 1 Chr. xxv. 27); it differed from the priestly
ephod in material, being made of ordinary linen
(bed), whereas the other was of fine linen (shek); it
is noticeable that the LXX. does not give ἐπωμίς
or ἐφοδίον in the passages last quoted, but terms of
more general import. στόλῃ ἐκαλούς, στόλῃ
βασιλείου. Attached to the ephod of the high-
priest was the breastplate with the Urim and
Thummim: this was the ephod κατ ἑφοδίον, which
Abiaathar carried off (1 Sam. xxiii. 6) from the
tableau at Nob (1 Sam. xxi. 9), and which Da-
vid consulted (1 Sam. xxiii. 9, xx. 7). The
importance of the ephod as the receptacle of the
breastplate led to its adoption in the idolatrous forms
of worship instituted in the time of the Judges
(Judg. viii. 27, xvii. 5, xvii. 14 ff.). The amount of
gold used by Gideon in making his ephod (Judg.
xi. 24) has led Gesenius (Thes. p. 155), following the
Peshito version, to give the word the meaning of
an idol-image, as though that and not the priest
was clothed with the ephod; but there is no evi-
dence that the idol was so invested, nor does such
an idea harmonize with the general use of the
ephod. The ephod itself would require a consid-
erable amount of gold (Ex. xxviii. 6 ff. xxix. 2
ff.); but certainly not so large a sum as is stated
to have been used by Gideon: may we not therefore
assume that to make an ephod implied the intro-
duction of a new system of worship with its various
accessories, such as the graven image, which seems
from the prominence assigned to it in Judg. xviii.
31 to represent the Urim and Thummim, the
molten image, and the Teraphim (xvii. 4, 5), which
would require a large consumption of metal?
W. L. B.

EΦΗΣΟΣ (ΤΕΙΣ ephod or image): ἡφαποί.
Alex. ὁφαλαί: Ephod. Hammied the son of Ephod,
as head of the tribe of Manasseh, was one of the
men appointed to assist Joshua and Eleazar in the
apportionment of the land of Canaan (Num. xxxiv.
23).

EΦΡΑΙΜ [Heb. Ephraïm (ὙΠΑΝ): Ἐφραῖος;
Joseph. Ἐφραίμτης: Ephraïm], the sec-
ond son of Joseph by his wife Asenath. He was
born during the seven years of plenteousness, and
an allusion to this is possibly latent in the name,
though it may also allude to Joseph’s increasing
family: * The name of the second he called Ephraïm
Ephraim

(i.e. double fruitfulness), for God hath caused me to be fruitful (מָרְפָּא, hraphaim) in the land of my affliction" (Gen. xli. 52, xlvii. 20).a

The first indication we have of that ascendancy over his elder brother Manasseh, which at a later period the tribe of Ephraim so unimitably possessed, is in the blessing of the children by Jacob, Gen. xlviii. — a passage on the age and greatness of which the severest criticism has cast no doubt (Tuch, Genesis, p. 548; Ewald, i. 534, note). Like his own father, on an occasion not dissimilar, Jacob's eyes were dim so that he could not see (xlviii. 10, comp. xxvii. 1). The intention of Joseph was evidently that the right hand of Jacob should convey its ampler blessing to the head of Manasseh, his first-born, and he had so arranged the young men. But the result was otherwise ordained. Jacob had been himself a younger brother, and his words show plainly that he had not forgotten this; and that his sympathies were still with the younger of his two grand-children. He recalls the time when he was flying with the birthright from the vengeance of Esau; the day when, still a wanderer, God Almighty had appeared to him at "Luz in the land of Canaan," and blessed him in words which foreshadowed the name of Ephraim: the still later day when he became bound up with the sorest trial of his life (xlviii. 7, xxxv. 10). And thus, notwithstanding the prearrangement and the remembrance of Joseph, for the second time in that family, the younger brother was made greater than the elder — Ephraim was set before Manasseh (xlviii. 19, 20).

Ephraim would appear at that time to have been about 21 years old. He was born before the beginning of the seven years of famine, towards the latter part of which Jacob had come to Egypt 17 years before his death (Gen. xlvii. 28). Before Joseph's death Ephraim's family had reached the third generation (Gen. i. 25), and it must have been about this time that the affray mentioned in 1 Chr. vii. 21 occurred, when some of the sons were killed on a plundering expedition along the sea-coast to rob the cattle of the men of Gath, and when Ephraim, a son of Jerahmeel, to perpetuate the memory of the disaster which had fallen on his house. [ΕΦΕΡΑΙΜ.] Observe as is the interpretation of this fragment, it enables us to catch our last glimpse of the patriarch, mourning inconsolable in the midst of the circle of his brethren, and at last commemorating his loss in the name of the new child, who, unknown to him, was to be the progenitor of the most illustrious of all his descendants — Jehoshua, or Joshua, the son of Nun (1 Chr. vii. 27; see Ewald, i. 491). To this early period, too, must probably be referred the circumstance alluded to in Ps. lxviii. 5 when the children of Ephraim, carrying shekels before, turned back and cried, "Sorrow upon the city! Certain is the punishment of such behavior is recorded in the later history.

The numbers of the tribe do not at once fulfill the promise of the blessing of Jacob. At the census in the wilderness of Sinai (Num. i. 32, 33, ii. 19) its numbers were 40,500, placing it at the head of the children of Rachel, Manasseh's number being 32,200, and Benjamin's 35,400. But forty years later, on the eve of the conquest (Num. xxvi. 71), without any apparent cause, while Manasseh had advanced to 52,700, and Benjamin to 45,900, Ephraim had decreased to 32,500, the only smaller number being that of Simeon, 22,200. At this period the families of both the brother tribes are enumerated, and Manasseh has precedence over Ephraim in order of mention. During the march through the wilderness the position of the sons of Joseph and Benjamin was on the west side of the tabernacle (Num. ii. 18-24), and the prince of Ephraim is Haniel the son of Ammihud (Num. i. 10).

It is at the time of the sending of the spies that we are first introduced to the great hero to whom the tribe owed much of its subsequent greatness. The representative of Ephraim on this occasion was Osheah the son of Nun, whose name was at the termination of the affair changed by Moses to the more distinguished form in which it is familiar to us. As among the founders of the nation Abram had acquired the name of Abraham, and Jacob of Israel, so Osheah, "help," became Jehoshua or Joshua, "the help of Jehovah" (Ewald, ii. 396).

Under this great leader, and in spite of the smallness of its numbers, the tribe must have taken a high position in the nation, to judge from the towns which the Ephraimites assumed on occasions shortly subsequent to the conquest. These will be referred to in their turn.

According to the present arrangement of the records of the book of Joshua — the "Domesday book of Palestine" — the two great tribes of Judah and Joseph (Ephraim and Manasseh) first took their inheritance; and after them, the seven other tribes entered on theirs (Jos. xv., xvi., xxvii., xviii. 5). The boundaries of the portion of Ephraim are given in xvi. 1-10. The passage is evidently in great disorder, and in our ignorance of the actual works, and of the force of many of the most technical terms with which these descriptions abound, it is unfortunately impossible to arrive at more than an approximation to the case. The south boundary was coincident for part of its length with the north boundary of Benjamin. Commencing at the Jordan, at the north opposite Jericho, it ran

In Judges, 12, 17, 20, 21, the Hebrew word is the same, and with the definite article (הָעֲפָרָיִם), it is incorrectly rendered "an Ephraimite." In the other occurrences of the word "Ephraimites" in vv. 4, 5, 6 of the same chapter, the Hebrew is "Ephraim." This narrative raises the curious inquiry, which we have no means of satisfying, whether the Ephraimites had not a peculiar accent or patois — similar to that which in later times caused "the speech" of the taillineans to "betray" them to the inhabitants of Jerusalem.

This is the rendering of Ewald.

The expression "Jordani jericho" is a common one (Num. xxvi. 3, 63; xxvili. 48, &c.); the "by" or "near" in the A. V. has no business there.
to the “water of Jericho,” probably the ‘Ain Dik or ‘Ain Sulûh; thence by one of the ravines, the W. to Bethel, then S. through the wilderness — Mâlid, or the uncultivated waste hills— to Mount Bethel and Lazz; and thence by Arotath, “the Japhletite,” Bethoron the lower, and Gezer — all with one exception unknown — to the Mediterranean, probably about Joppa. This agrees with the enumeration in 1 Chr. vii., in which Bethel is given as the eastern, and Gezer — somewhere about Râvâh — as the western limit. The general direction is in E. by E. In Josh. xvi. 8, we probably have a fragment of the northern boundary (comp. xvii. 10). the torrent Kanah being the Nahor el-Hkelât just below the ancient Cäsarea. But it is very possible that there never was any definite subdivision of the territory assigned to the two brother tribes. Such is certainly the inference to be drawn from the very old fragment preserved in Josh. xvii. 14-18, in which the two are represented as complaining that only one portion had been allotted to them. At any rate, if any such subdivision did exist, it is not possible now to make out what it was, except, generally, that Ephraim lay to the south and Manasseh to the north. Among the towns named as Manasseh’s were Beth-shean in the Jordan valley, Endor on the slopes of the “Little Hermon,” Tannach on the north side of Carmel, and Dor on the sea-coast south of the same mountain. Here the boundary — the north boundary — joined that of Asher, which dipped below Carmel to take in an angle of the plain of Shihon: N. and N. W. of Manasseh lay Zebulun and Issachar respectively. The territory thus allotted to the “house of Joseph” may be roughly estimated at 55 miles from E. to W. by 70 from N. to S., a portion about equal in extent to the counties of Norfolk and Suffolk [England] combined. But though similar in size, nothing can be more different in its nature from those level counties than this broken and hilly tract. Central Palestine consists of an elevated district which rises from the flat ranges of the wilderness on the south of Judah, and terminates on the north with the slopes which descend to the great plain of Esdraelon. On the west a flat strip separates it from the sea, and on the east another flat strip forms the valley of the Jordan. Of this district the northern half was occupied by the great tribe we are now considering. This was the home of the “house of Joseph,” the “country of Ephraim,” a district which seems to extend as far south as Ramah and Bethel (1 Sam. i. 17; 2 Chr. xiii. 4, 19, compared with xv. 8), places but a few miles north of Jerusalem, and within the limits of Benjamin. In structure it is limestone — rounded hills separated by valleys of denudation, but much less regular and monotonous than the part more to the south, about and below Jerusalem; with “wide plains in the heart of the mountains, streams of running water, and continuous tracts of vegetation” [Stanley, p. 229]. All travelers bear testimony to the “general growing richness” and beauty of the country in going northwards from Jerusalem, the “innumerable fountains” and streams, the villages more thickly scattered than anywhere in the south, the continuous cornfields and orchards, the moist, vapory atmosphere [Martineau, pp. 516, 521; Van de Velde, i. 386, 388; Stanley, p. 234, 235]. These are the precious things of the earth, and the fullness thereof,” which are invoked on the “ten thousands of Ephraim” and the “thousands of Manasseh” in the blessing of Moses. These it is which, while Dan, Judah, and Benjamin are personified as lions and wolves, making their land fertile and covering their barren rocks of the south, suggested to the Low-waig, as they had done to the Patriarch before him, the patient “bulllock” and the “bough by the spring, whose branches ran over the wall” as fitter images for Ephraim (Gen. xlix. 22; Deut. xxxiii. 17). And centuries after, when its great disaster had fallen on the kingdom of Israel, the same images recur to the prophets. The “flowers” are still there in the “olive valleys” (though they lay within xvi. 1). The vine is an empty unprofitable vine, whose very abundance is evil (Hos. i. 1); Ephraim is still the “bulllock,” now “unaccustomed to the yoke,” but waiting a restoration to the “pleasant places” of his former “pasture” (Jer. xxxi. 18; Hos. ix. 13, iv. 16) — “the heifer that is taught and loveth to tread out the corn,” the heifer with the “beautiful neck” (Hos. x. 11), or the “kine of Bashan on the mountain of Samaria” (Amos iv. 1).

The wealth of their possession had not the same immediately degrading effect on this tribe that it had on some of its northern brethren. [ASHER.Various causes may have helped to avert this evil. (1.) The central situation of Ephraim, in the highway of all communications from one part of the country to another. From north to south, from Jordan to the Sea, from Galilee, or still more distant Damascus, to Philistia and Egypt — these roads all lay more or less through Ephraim, and the constant traffic along them must have always tended to keep the district from sinking into stagnation. (2.) The position of Shechem, the original settlement of Jacob, with his well and his “parcel of ground,” with the two sacred mountains of Elbal and Gerizim, the scene of the impressive and significant ceremonial of blessing and cursing; and of Shiloh, from whence the division of the land was made, and where the ark remained from the time of Joshua to that of Eli; and further of the tomb and patrimony of Joshua, the great hero not only of Ephraim but of the nation — the fact that all these localities were deep in the heart of the tribe, must have made it always the resort of large numbers from all parts of the country — of larger numbers than any other place, until the establishment of Jerusalem by David. (3.) But there was also another cause — the spirit about the tribe itself which may have been both a cause and a consequence of these advantages of position. That spirit, though sometimes taking the form of noble remonstrance and reparation (2 Chr. xxviii. 9-13), usually manifests itself in jealous complaint at some enterprise undertaken or advantage gained in which they had not a chief share. To Gideon (Judg. viii. 1), to Jephthah (xii. 1), and to David (2 Sam. xix. 41-45), the cry is still the same in effect — almost the same in words — “Why did ye despise us that our advice should not have been first had?” “Why hast thou served us thus, that thou callest us not?” The unsettled state of the country in general, and of the interior of Ephraim in particular (Judg. ix.), and the continual incursions of foreigners, prevented the power of the tribe from manifesting itself in a more formidable manner than by these murmurs, during the time of the Judges and the first stage of the monarchy. Samuel, though a Levite, was a native of Ramah in Mount Ephraim, and Saul belonged to a tribe closely allied to the family of Joseph, so that during the priesthood of the former and the
EPHRAIM

reign of the latter the supremacy of Ephraim may be said to have been practically maintained. Certainly in neither case had any advantage been gained by their great rival in the south. Again, the brilliant successes of David and his wide influence and religious zeal kept matters smooth for another period, even in the face of the blow given to both Shechem and Shiloh by the renewed cultivation of the civil and ecclesiastical capitals at Jerusalem. Twenty thousand and eight hundred of the choice warriors of the tribe, "men of name throughout the house of their father," went as far as Hebron to make David king over Israel (1 Chr. xii. 30). Among the officers of his court we find more than one Ephraimite (1 Chr. xxvii. 10, 14), and the attachment of the tribe to his person seems to have been great (2 Sam. xix. 41-45). But this could not last much longer, and the reign of Solomon, splendid in appearance but oppressive to the people, developed both the circumstances of revolt, and the leader who was to turn them to account. Solomon saw through the crisis, and if he could have succeeded in killing Jeroboam as he tried to do (1 K. xi. 40), the disruption might have been postponed for another century. As it was, the outbreak was deferred for a time, but the irritation was not allayed, and the insane folly of his son brought the mishap to a head. Jeroboam probably selected Shechem — the old capital of the country — for his coronation, in the hope that his presence and the ceremonial might make a favorable impression, but in this he failed utterly, and the tumult which followed shows how complete was the breach — "To your tents, O Israel! now see to thine own house, David!" Jeroboam was certainly not the last king of Judah whose chariot went as far north as Shechem, but he was the last who visited it as a part of his own dominion, and he was the last who, having come so far, returned unmeditated to his own capital. Jehoshaphat escaped, in a manner little short of miraculous, from the risks of the battle of Ramoth-Gilead, and it was the fate of two of his successors, Ahaziah and Josiah — differing in everything else, and agreeing only in this — that they were both carried dead in their chariots from the place of the battle to Jerusalem. Henceforward in two senses the history of Ephraim is the history of the kingdom of Israel, since not only did the tribe become a kingdom, but the kingdom endured little besides the tribe. This is not surprising, and quite susceptible of explanation. North of Ephraim the country appears never to have been really taken possession of by the Israelites. Whether from want of energy on their part, or great stubbornness of resistance on that of the Canaanites, certainly it is that of the list of towns from which the original inhabitants were not expelled, the great majority belonging to the northern tribes, Manasseh, Asher, Issachar, and Naphtali. And in addition to this original defect there is much in the physical formation and circumstances of the upper portion of Palestine to explain why these tribes never took any active part in the kingdom. They were removed to the hills and seacoasts of their surrounding heathen neighbors — on one side the luxuriant Phoenicians, on the other the plundering Bedouins of Midian; they were open to the attacks of Syria and Assyria from the north, and Egypt from the south; the great plain of Ediradon, which communicated more or less with all the northern tribes, was the natural outlet of the no less natural high roads of the maritime plain from Egypt and the Jordan valley for the tribes of the East, and formed an admirable base of operations for an invading army. But on the other hand the position of Ephraim was altogether different. It was one at once of great richness and great security. Her fertile plains and well-watered valleys could only be reached by a laborious and perilous route, and the occupation of them all but impossible for an army. There is no record of any attack on the central kingdom, either from the Jordan valley or the maritime plain. On the north side, from the plain of Ediradon, it was more accessible, and it was from this side that the final invasion appears to have been made. But even on that side the entrance was so difficult and so easily defensible — as we learn from the description in the book of Judith (iv. 6, 7) — that, had the kingdom of Samaria been less weakened by internal dissensions, the attacks even of the great Shalmanesser might have been resisted, as at a later date were those of Hophra. How that kingdom originated, how it progressed, and how it fell, will be elsewhere considered. [ISRAEL, KINGDOM OF.] There are few things more mournful in the sacred story than the descent of this haughty and jealous tribe, from the culminating point at which it stood when it entered on the finest portion of the earth of Promise — the chief sanctuary and the chief settlement of the nation within its limits, its leader the leader of the whole people — through the distrust which marked its intercourse with its fellows, while it was a member of the confederacy, and the tumult, dissension, and ungodliness which characterized its independent existence, down to the sudden captivity and total oblivion which closed its career. Judah had its times of revival and of returning prosperity, but here the course is uniformly downward — a sad picture of opportunities wasted and personal gifts abused. "When Israel was a child, then I loved him, and called my son out of Egypt. ... I taught Ephraim also to go, taking them on their arms; but they knew not that I healed them. I drew them with cords of a man, with bands of love; but the Assyrian shall be their king, because they refused to return. ... How shall I give thee, Ephraim? how shall I deliver thee, Israel? how shall I make thee as Admah? how shall I set thee as Zoan?" (Hos. xi. 1-8).

G.

EPHRAIM (םפרים) [double fruitfulness]: "Ephraim" in the Hebrew particle "by" Eptraim" was Abrahaon's sheep-farm, at which took place the murder of Ammon, one of the earliest precursors of the great revolt (2 Sam. xiii. 23). The Hebrew particle כֶּפֶז rendered above"by"(A. V. "beside"), always seems to imply actual proximity, and therefore we should conclude that Ephraim was not the tribe of that name, but a town. Exegete conjectures that it is identical with Ephraim, Edbon, and Omriah of the O. T., and also with the Ephraim which was for a time the residence of our Lord (Giss. ii. 219, note). But with regard to the three first names there is the difficulty that they are spelt with the guttural letter מ, which is very rarely exchanged for the letter נ which commences the name before us. There is unfortunately no clue to its situation. The LXX. make the following addition to verse 34: "And the watchman went and told the king; and said, I have seen men on the road of the Oronon (71s
EPHRAIM and Ephrahs elsewhere G. 'EfpaOd G. 'EfpaOd Ktn place that (tacments head-quarters i
or part collectively, Judg. 756

Ephron), mention Jerusalem a and admissible between uncultivated hill-country N. E. of Jerusalem, living between the central towns and the Jordan valley. In this case the conjecture of Dr. Robinson is very admissible that Opfrhal and Ephraim are identical, and that their modern representation is et-Tinyieh, a village on a conspicuous conical hill, commanding a view over the whole eastern slope, the valley of the Jordan and the Dead Sea (Rob. i. 444). It is situated 4 or 5 miles east of Bethel, and 16 from Jerusalem; a position agreeing tolerably with the indications of Jerome in the Oenomation (Ephraim, Ephron), and is too conspicuous to have escaped mention in the Bible.a

Ephraim, Mount (Josh. xvii. 15; Judg. vii. 24; 1 Sam. i. 1, and often) must be taken collectively, i. e. not any single mount, as the English reader might suppose, but the hill-country or high lands generally, which fill up the greater part of central Palestine on the west of the Jordan. [Ephraim.] See Rob. Phys. Geogr. p. 35.

Ephraim, the Wood of (יעגננ) Ḥophni 'Ephraim: portq Ephraim), a wood, or rather a forest (the word ye'ar implying dense growth), in which the fatal battle was fought between the armies of David and of Absalom (2 Sam. xviii. 6), and the entanglement in which added greatly to the slaughter of the latter (ver. 8). It would be very tempting to believe that the forest derived its name from the place near which Absalom's sheep-farm was situated (2 Sam. xiii. 23), and which would have been a natural spot for his head-quarters before the battle, especially associated as it was with the murder of Amnon. But the statements of xvii. 24, 28, and also the expression of xviii. 4, that these woods were long of the city, i. e. Mahanaim, allow no escape from the conclusion that the locality was on the east side of Jordan, though it is impossible to account satisfactorily for the presence of the name of Ephraim on that side of the river. The suggestion is due to Grotius that the name was derived from the slaughter of Ephraim at the fords of Jordan by the Gileadites under Jephthah (Judg. xii. 1, 4, 5); but that occurrence took place at the very brink of the river itself, while the city of Mahanaim and the wooded country must have lain several miles away from the stream and on the higher ground above the Jordan valley. Is it not at least equally probable that the forest derived its name from this very battle? The great tribe of Ephraim, though not specially mentioned in the transactions of Absalom's revolt, cannot fail to have taken the most conspicuous part in the affair, and the reverse was a more serious one than had overthrown the tribe for a very long time, and possibly combined with other circumstances to retard materially their rising into an independent kingdom.

Ephraimite (בַּנְיָשָׁם 'Efraymites [Vat. -ser]; Alex. 'Ephraim Ephraimite) Of the tribe of Ephraim; elsewhere called "Ephrathite" (Judg. xii. 5). [Ephraim.] W. A. W.

Ephraim (Hebrew, Ephraim) (יעגננ, Ephron); Keri, יִנְפָּד : Ephron), a city of Israel, which with its dependent hamlets (תש'ג = "daughters," A. V. "towns") Abijah and the army of Judah captured from Jeroboam (2 Chr. xiii. 19). It is mentioned with Bethel and Jeshannah, but the latter not being known, little clue to the situation of Ephraim is obtained from this passage. It has been conjectured that this Ephraim or Ephron is identical with the Ephraim by which Absalom's sheep-farm of Baal-hazor was situated; with the city called Ephraim near the wilderness in which our Lord lived for some time (John xii. 51); and with Opfrhal (יעגננ), a city of Benjamin, apparently not far from Bethel (Josh. xvii. 23; comp. Joseph. B. J. iv. 9, § 9), and which has been located by Dr. Robinson (i. 447), with some probability, at the modern village of et-Tinyieh. But nothing more than conjecture can be arrived at on these points. (See Ewald, Geschichte, iii. 210, 406, v. 353; Stanley, p. 214.)

Ephrathah, or Ephrath (יעגננ) or יִנְפָּד [fruitful, Dietr.]: 'Ephrahath and 'Ephrad: [Alex. in ver. 19, φαθαθ: Ephrath, Jerome].

1. Second wife of Caleb the son of Hezron, mother of Hur, and grandmother of Caleb the spy, according to 1 Chr. ii. 19, 50, and probably 24, and iv. 4. [Caleb-Ephrathah].

2. The ancient name of Bethlehem-Judah, as is manifest from Gen. xxxiv. 16, 19, xlviii. 7, both which passages distinctly prove that it was called Ephrath or Ephrathah in Jacob's time, and use the regular formula for adding the modern name, יִנְפָּד יִנְפָּד, which is Bethlehem, comp. e. g. Gen. xlvii. 9, xxxi. 27; Josh. xiv. 10. It cannot therefore have derived its name from Ephrathah, the mother of Hur, as the author of Quest. Hbr. in Paralip. says, and as one might otherwise have supposed from the connection of her descendants, Salma and Hur, with Bethlehem, which is somewhat obscurely intimated in 1 Chr. ii. 50, 51, iv. 4. It seems obvious therefore to infer that, on the

a * For the identification of this Ephraim as the place of the Saviour's retreat, see especially Dr. Robinson in Bibl. Sacra, ii. 398; and for its importance in harmonising the Gospels see Dr Greek Ha momy § 32 II.
contrary. Ephratah the mother of Hur was so called from the town of her birth, and that she probably was the owner of the town and district. In fact, that her name was really gentilicium. But if this be so, it would indicate more communication between the Israelites in Egypt and the Canaanites than is commonly supposed. When, however, we reflect that the land of Goshen was the border country on the Palestine side; that the Israelites in Goshen were a tribe of sheep and cattle drovers (Gen. xlviii. 3); that there was an easy communication between Palestine and Egypt from the earliest times (Gen. xil. 10, xvi. 1, xxi. 21, &c.); that there are indications of communications between the Israelites in Egypt and the Canaanites, caused by their trade as keepers of cattle, 1 Chr. vii. 21, and that in the nature of things the owners or keepers of large herds and flocks in Goshen would have dealings with the nomad tribes in Palestine, it will perhaps seem not impossible that a son of Hurzen may have married a woman having property in Ephratah. Another way of accounting for the connection between Ephratah's descendants and Bethlehem, is to suppose that the elder Caleb was not really the son of Hurzen, but merely reckoned so as the head of a Hezronite house. He may in this case have been one of an Edomish or Horite tribe, an idea which is favored by the name of his son Hur [Cale], and have married an Ephrathite. Caleb the spy may have been their grandson. It is singular that "Salma the father of Bethlehem" should have married a Canaanitish woman. Could she have been of the kindred of Caleb in any way? If she were, and if Salma obtained Bethelen, a portion of Hurzen's inheritance, in consequence, this would place Salma and his family to be called "father of Bethelsen." Another possible explanation is, that Ephrathah may have been the name given to some daughter of Benjamin to commemorate the circumstance of Rachel his mother having died close to Ephrath. This would receive some support from the son of Rachel's other son Joseph being called Ephrann, a word of identical etymology, as appears from the fact that Ephrath means differently an Ephrathite, i.e. Bethelenite (Ruth i. 1, 2), or an Ephrathite (1 Sam. i. 1). But it would not account for Ephrathah's descendants being settled at Bethelen. The author of the Quest. Heb., in Paralip., derives Ephraim from Ephrath, "Ephrath, quia de Ephraem fuit." But this is not consistent with the appearance of the name of Gen. It is perhaps impossible to come to any certainty on the subject. It must suffice therefore to note, that in Gen., and perhaps in Chron., it is called Ephroth or Ephroth; in Ruth, Betholen-Judah; but the inhabitants, Ephrathites; in Micah (v. 2), Betholen-Ephrath; in Matt. ii. 6, Betholen in the land of Jud. Jerome, and after him Kalisch, observes that Ephrathah, fruitful, has the same meaning as Bethelen, house of hered; a view which is favored by Stanley's description of the neighboring corn-fields (Sion and Palstat, p. 164). [BETHLEHEM.]

3. Genesis thinks that in Ps. cxxiii. 6, Ephrathah means Ephraim. A. C. II.

* If Ephrathah stands for Ephraim (see No. 3 above) the territory of that name, it must refer especially to Shiloh, one of the former sanctuaries of the ark of the covenant in that tribe. Upheld explains Ephrathah in this passage as an appellative, not a proper name, i.e. "fruitful." sc. field, poetically for Beth-shemesh, like "field of wood" for Kirjath-jearim in the other line (Die Philalnen, iv. 311 f.). The two places were near each other, and those searching for the lost ark after its capture by the Philistines (2 Sam. vi. 1 ff.) may have heard of it at one of the places, and have found it at the other (Jesphest). (Licht, Ephrath, iv. 75 f.) that Ephrathah is Bethlehem in this place as elsewhere, and that David, who wrote the psalm, means that the ark, which he was removing to Mount Zion where it would henceforth be accessible, might be said now to be "found," whereas, in his youth at Bethlehem they had only heard of it, as it were, by rumor. 11.

Ephrathite (םֵפֶרַתֵי: Ephraimite, Ephratite). 1. An inhabitant of Bethelen (Ruth i. 2 applied to Elimelech and his family).

2. [1 Sam. i. 1, Ephrath, Alex. Ephraim]: 1 K. xi. 26, Ephrathi (Vat. -thi). An Ephrathite (1 Sam. i. 1 [Ephah], father of Samuel); Judg. xix. 5 [see p. 752, note c], &c.

A. C. II.

Ephron (אָפְרֹון, Ephron), the son of Zerah [Zarah, A. V.], a Hit- titie; the owner of a field which lay facing Manre or Helron, and of the cave therein contained, which Abraham bought from him for 400 shekels of silver (Gen. xxiii. 8-17, xxv. 9, xlix. 23, 30, i. 13). By Josephus (Ant. i. 14) the name is given as Ephrann; and the purchase-money 40 shekels.

In the account of the negotiations between Ephron and Abraham for the purchase of the field of Machpelah, related with so much minuteness in Gen. xxiii. 3-18, we have a living picture of the ceremony and finesse for which the Orientals are so remarkable on such occasions. Dr. Thomson has an extended passage, in which he shows how exactly every part of that procedure is still exemplified in the dealings of buyers and sellers with each other among the modern Syrians (Land and Book, i. 381-384). Hess, not taking into account this Oriental trait, regards the compliments interchanged between the parties as seriously meant, and hence as evocive of rare generosity and discretion (Vis. der Paralipomenen, i 367-371). Wilkinson also (Personal Names in the Bible, p. 424) speaks of Ephron on this occasion as a model of true courtesy. This sale of Ephron to Abraham is the "first recorded legal contract in human history," and it relates to the best object of man's earthly care, the interment of the dead. 11.

Ephron (אֵפְרֹון, Ephron), a very strong city (πόλεις μεγάλαι οιχυρὰ αφθῆρα) on the east of Jordan between Carmain (Ashereth-Karnaim) and Beth-sheen, attacked and demolished by Judas Maccabaeus, 194-192, 2 Mace. xii. 27). From the description in the former of these two passages it appears to have been situated in a defile or valley, and to have completely occupied the pass. Its site has not been yet discovered. 6.

Ephron, Mount (אֵפְרֹון, מום Ephron). The "cities of Mount Ephron" formed one of the landmarks or the northern boundary of the tribe of Judah (Jos. xv. 9), between the "water of Nephtoch" and Kirjath-jearim. As these latter are with great probability identified with An Līfāth and Keruui-el-Faráth, Mount Ephron is probably the range of hills on the west side of the Wady Rūb-Hezāma (traditional valley of the Ferchūth), opposite Līfāth.
EPIRUS.

G.

EPIRUS, THE (Ἐπικουρία), derived their name from Epicurus (342-271 B.C.), a philosopher of Attic descent, whose "Garden" at Athens rivalled in popularity the "Porch" and the "Academy." The doctrines of Epicurus found wide acceptance in Asia Minor (Lycomacus, Mičle, Taurus, Diog. L. x. 11, 12) and Alexandria (Diog. L. l. c.), and they gained a brilliant advocate at Rome in Lucretius (95-59 B.C.). The object of Epicurus was to find in philosophy a practical guide to happiness (Ἀγαθὴν ἀτάκα τίς ἀληθῶς ἐκβιάζειν τά σαφῶς καὶ πραγματέως (general notions) καὶ τά πάθη.) He made the study of physics subservient to the uses of life, and especially to the removal of superstitious fears (Lucret. i. 110 ff.) and maintained that this is the proper study of man, as leading him to that supreme and lasting pleasure which is the common object of all.

It is obvious that a system thus framed would degenerate by a natural descent into mere materialism; and in this form Epicurus was the popular philosophy at the beginning of the Christian era (cf. Diog. L. x. 5, 9). When St. Paul addressed "Epicureans and Stoics" (Acts xix. 18) at Athens, the philosophy of life was practically reduced to the teaching of those two antagonistic schools, which represented in their final separation the distinct and complementary elements which the gospel reconciled. For it is unjust to regard Epicurism as a mere sensual opposition to religion. It was a necessary step in the development of thought, and prepared the way for the reception of Christianity, not only negatively but positively. It not only weakened the hold which polytheism retained on the minds of men by daring criticism, but it maintained with resolute energy the claims of the body to be considered a necessary part of man's nature coordinate with the soul, and affirmed the existence of individual freedom against the Stoic doctrines of pure spiritualism and absolute fate. Yet outwardly Epicurism appears further removed from Christianity than Stoicism, though essentially it is at least as near; and in the address of St. Paul (Acts xx. 22 ff.) the affirmation of the doctrines of creation (v. 24), providence (v. 26) inspiration (v. 28), resurrection, and judgment (v. 31), appears to be directed against the cardinal errors which it involved.

The tendency which produced Greek Epicurism, when carried out to its fullest development, is peculiar to no age or country. Among the Jews it led to Sadduceism (Sadduccees), and Josephus appears to have drawn his picture of the sect with a distinct regard to the Greek prototype (Joseph. Ant. xviii. 1, § 4; B. J. ii. 8, § 14; cf. Ant. x. 11, § 7, de Epicureis). In modern times the essay of Gassendi (Syntagma Philosophici Epicuri, Hag. Com. 1639) was a significant symptom of the restoration of sensualism.

The chief original authority for the philosophy of Epicurus is Diogenes Laertius (lib. x.) who has preserved some of his letters and a list of his principal writings. The poem of Lucretius must be used with caution, and the notices in Ciceron, Seneca, and Plutarch are undignified hostile.

B. F. W.

EPHESANS (1 Macr. i. 10, x. 1). [ANTI CHUS EPIPHANES.]

EPHESI (Ἐφέσιος [Alex. once Εφέσης], 3 Macr. vi. 38), name of the eleventh month of the Egyptian Vague year, and the Alexandrian or Egyptian July.

In ancient Egyptian it is called "the third month of the season of the waters." [Εὐφηγ. The name Ephesi is derived from that of the goddess of the month, Aphrodite (Lepsins, Chron. d. Ἐγ. i. 141). The supposed derivation of the Hebrew month-name Abib from Ephesi is discussed in other articles. [CHRONOLOGY; MONTHS.]

R. S. P.

EPISTLE. The Epistles of the N. T. are described under the names of the Apostles by whom, or the churches to whom, they were addressed. It is proposed in the present article to speak of the epistle or letter as a means of communication.

The use of written letters implies, it needs hardly be said, a considerable progress in the development of civilized life. There must be a recognized system of notation, phonetic or symbolic: men must be taught to write, and have writing materials at hand. In the early nomadic stages of society accordingly, like those which mark the period of the patriarchs of the O. T., we find no traces of any but oral communications. Messengers are instructed what to say from Jacob to Esau (Gen. xxvii. 3), from Balaam to Balbim (Num. xxiii. 7, 18), bringing back in like manner a verbal, not a written answer (Num. xxiv. 12). The negotiations between Jephthah and the king of the Ammonites (Judg. xii. 12, 13) are conducted in the same way. It is still the received practice in the time of Saul (1 Sam. xi. 7, 9). The reign of David, bringing the Israelites, as it did, into contact with the higher civilization of the Phoenicians, witnessed a change in this respect also. The first recorded letter ( Decompiled comp. use αὐτοῖς ἔχειν ἀπελευκασμένος. Herod. i. 123) in the history of the O. T. was that which "David wrote to Joab, and sent by the hand of Uriah" (2 Sam. xi. 14), and this must obviously, like the letters that came into another history of crime (in this case also in traceable connection with Phoenician influence, 1 K. xxi. 8, 9), have been "sealed with the king's seal," as at once the guarantee of their authority, and a safeguard against their being read by any but the persons to whom they were addressed. The material used for the impression of the seal was probably the "clay" of Job xxxviii. 14. The act of sending such a letter is, however, predominantly, if not exclusively, a kingly act, where authority and secrecy were necessary. Joab, e. g. answers the letter which David had sent him after the old plan, and receives a verbal message in return. The demand of Bechahdah and Ahah's answer to it are conveyed in the same way (1 K. xx. 2, 5). Written communications, however, become more frequent in the later history. The king of Syria sends a letter to the king of Israel (2 K. v. 5, 6). Elijah the prophet sends a
writing (בכרות) to Jehoram (2 Chr. xx. 12).

Here keen introduces a system of couriers like that afterwards so fully organized under the Persian kings (2 Chr. xxxi. 6, 10; comp. Herod. viii. 28, and Esth. viii. 10, 14), and receives from Semach- ezer the letter which he "spreads before the Lord." 2 K. xix. 11. Jeremiah writes a letter to the exiles in Babylon (Jer. xxiii. 1, 3). The books of Ezra and Nehemiah contain or refer to many such documents (Ezr. vi. 6, 7, 11, xvi. 7, 11; Neh. ii. 7, 9, vi. 6). The stress laid upon the open letter (Neh. vi. 17), and the fact that this was a breach of the customary etiquette of the Persian court. The influence of Persian, and yet more, perhaps, that of Greek civilization, led to the more frequent use of letters as a means of intercourse. Whatever doubts may be entertained as to the genuineness of the epistles themselves, their occurrence in 1 Macr. xi. 30, xvi. 2, 10, 16; 2 Macr. xi. 16, 34, indicates that they were recognized as having altogether superseded the older form of messages orally delivered. The two stages of the history of the N. T. present in this respect a very striking contrast. The list of the Canonical Books shows how largely epistles were used in the expansion and organization of the Church. Those which have survived may be regarded as the representatives of many others that are lost. We are perhaps too much in the habit of forgetting that the absence of all mention of written letters from the gospels history is just as noticeable. With the exception of the spurious letter to Aegatus (Euseb. H. E. i. 13) there are no epistles of Jesus. The explanation of this is to be found partly in the circumstances of one who, known as the "apostle's son," was training as his disciples those who, like himself, belonged to the class of laborers and peasants, partly in the fact that it was by personal, rather than by written, teaching that the work of the prophetic office, which he reproduced and perfected, had to be accomplished. The epistles of the N. T. in their outward form are such as might be expected from men who were brought into contact with Greek and Roman customs, themselves belonging to a different race, and so reproducing the imported style with only partial success. They begin (the Epistle to the Hebrews and 1 John excepted) with the names of the writer, and of those to whom the epistle is addressed, and then follow the formula of salutation (analogous to the εο πας of Greek, the S., D., or S. D. M., salutation, salutation did, a salutation did, multima, of Latin correspondence) — generally in St. Paul's epistles in some combination of the words χαρις, ευκοιοι, επιθυμειν; in others, as in Acts xvi. 23, Jan. i. 1, with the closer equivalent of χαιρεων. Then the letter itself commences, in the first person, the singular and plural being used, as in the letters of Cicero, indiscriminately (comp. 1 Cor. ii. 2; 2 Cor. i. 3, 5; 1 Thess. iii. 1, 2; and Phil. 3). Then when the substance of the letter has been completed, questions answered, truths enforced, come the individual messages, characteristic, in St. Paul's epistles especially, of one who never allowed his personal affections to be swallowed up in the greatness of his work. The conclusion in this case was probably modified by the fact that the letters were dictated to an amanuensis. When he had done his work, the Apostle took up the pen or reed, and added, in his own large characters (Gal. vi. 11), the authenticating autograph, sometimes with especial stress on the fact that this was his writing (1 Cor. xvi. 21; Gal. vi. 11; Col. iv. 18; 2 Thess. iii. 17), always with one of the closing formulas of salutation, "faced this with the love of our Lord Jesus Christ be with your spirit." In one instance, Rom. xvi. 22, the amanuensis in his own name adds his salutation. In the επιστολας of Acts xxiii. 30, the επιστολας of Acts xv. 24, we have the equivalents to the ῦλον, ὥλον, which formed the customary conclusion of Roman letters. It need hardly be said that the fact that St. Paul's epistles were dictated in this way accounts for the most striking peculiarities, the frequent digressions, the long parentheticals, the vehemence and energy as of a man who is speaking strongly as his feelings prompt him rather than writing calmly. An allusion in 2 Cor. iii. 1 brings before us another class of letters which must have been in frequent use in the early ages of the Christian church, the επιστολας διαθεσιν, by which travellers or teachers were commended by one church to the good offices of others. Other persons (there may be a reference to Apostolos, Acts xiii. 27) had come to the Church of Corinth relying on these. St. Paul appeals to his converts, as the επιστολας Ἰουστου (2 Cor. iii. 3), written "not with ink but with the spirit of the living God." For other particulars as to the material and implements used for epistles, see Writing.

* Under this head we may properly notice a few additional particulars:—

Paul's habit of authenticating his letters, referred to above, enables us to trace a correspondence between 2 Thess. iii. 17 and Gal. vi. 11 which is very striking. The Apostle speaks in the former passage not only of adding there the salutation by his own hand, and as a sign (σηµεῖον) or attestation of the genuineness of the letter, but of this atestation (οὗτος γράφει, so I write) as distinguished by a well-known peculiarity. From Gal. vi. 11, now, we learn incidentally what this peculiarity was, namely, the name of the written characters or letters with which he was accustomed to write (ναὶνεοι Καγαμαιων, with how large letters, not how large a letter, Λ. V.), as compared with men's ordinary writing. Meyer, it is true, thinks that Paul did not write in his own usual way in that instance, but employed large letters or capitals because he would emphasise that particular paragraph of the letter (Gal. vii. 18-19). With that view, the inference which has been suggested falls away of course. But really there is no apparent reason for making any such distinction between that part of the letter and other parts.

Paul's mode of epistolary salutation is similar indeed to the χαιρεων or εο πας of the Greeks (as remarked above), but differs from it at the same time in a peculiar manner. This Apostle never empleys the classical form, but invariably substitutes for it χαιρεων και ευκοιοι, χαιρεω, ευκοιοι, επιθυμειοι, or a similar combination. Such a rejection of the customary phrase, and the invention of a new one, cannot be otherwise than intentional. It has been suggested that the Greek formula, as con- taining a virtual prayer to the heathen gods, awakened heathen associations, and was laid aside, therefore, for something more consonant to a just Christian feeling. It is certainly remarkable that of the N. T. writers the Apostle James only in his Epistle, i. 1, and in Acts xx. 23, employs the Greek form of salutation (χαιρεων = greeting).
This writer adopts the hypothesis of certain other critics, though carried by him to a much greater extent, that Paul, after dictating his letters to the dependants, carefully read them himself or had them read to him, and then wrote or had written on the margin various annotatory remarks where expressions of the text seemed incomplete or obscure. Subsequent抄ists transferred these remarks to the text itself. "These marginal notations are not only as much inspired as the words of the text, but they often bear the impress of a special emphasis designed by the author. . . . And though they were forced into the text by the fault of the抄ist, against the will of the Apostle, the words of the Apostle remained entirely unaltered. The importance of the hypothesis is philological rather than dogmatic: the style of the Apostle is freed thereby from many an irregularity, the connection of the sentences from many an impediment." It is hardly worth while to illustrate this procedure at length. The character of it will be understood if we mention e. g. that Laurens proposes to insert Rom. xvi. 19 after ver. 19, because the logical relation of these verses to each other appears to him more satisfactory than that which he finds between vv. 18 and 19. Hence, to account for the dislocation of the true text, he assumes that the Apostle wrote ver. 19 in the margin with the intention of having it read as explanatory of ver. 16, but by some mistake of a transcriber it became attached to ver. 18, where it seems to be so irrelevant. It is self-evident that such a mode of criticism is not only unhistorical, but arbitrary and subjective, and hence utterly vague and unreliable. Yet it should be said, in justice to this able treatise, that many of the suggestions which the writer makes in the development of his theory are not only ingenious but valuable in an exegetical point of view, and deserve the attention of the critical student.

* EQUAL, no longer used as a transitive verb, has that force in Lam. ii. 13; i. e. "to make equal," "compare": "What shall I equal to thee, that I may comfort thee, O virgin daughter of Zion? "

** ERAN (נֶפֶשׁ, watchful; ῥή: Her). 1. First-born of Judah. His mother was Bath-Shuah (daughter of Shuah), a Canaanit. His wife was Tamar, the mother, after his death, of Pharez and Zarah, by Judah. Ezra was wicked in the sight of the Lord, and the Lord slew him." It does not appear what the nature of his sin was; but, from his Canaanitish birth on the mother's side, it was probably connected with the abominable idolatries of Canaan (Gen. xxxviii. 5-7; Num. xxvi. 19).

2. Descendant of Sheelah the son of Judah (1 Chr. iv. 21).

3. Son of Jose, and father of Elmodam, in our Lord's genealogy (Luke iii. 28), about contemporaneous with Eliah, king of Judah. A. C. H.

** E' RAN (מֵאָרָן, watching), but Sam. and Syr. יָרָן, Edom: 'Ezrā: Heron), son of Shinthelah, eldest son of Ephraim (Num. xxvi. 36). The name does not occur in the genealogies of Ephraim in 1 Chr. vii. 20-29, though a name, 'Ezrā (יָרָן), is current itself of ῥή in that document and in the epistle indicates, as Bengel, Bleek, and others observe, that the two compositions are from the same hand.
ERANITES and W. Alex. "Ihranilte) Asnr-hadd. S J'ali), mans was 1. Nimrod's wards with p. presents Eurhok, Susiana; ouiid Samaria place !x)rtus°s l.'awiin.son's inni's E'RECH 2. Timotliy (Jen. xxvi. 10; iv. 5, 43, 14, 38, 39, 41; Acts viii. 28, 30, xvii. 25; Rom. iv. 27, 29, x. 16, 20, xv. 12. [ISLAMAL]

ESAR-HADDON (Jer. iv. 20; [in 2 K. and Is.] Agorabai, exc. Sin. in Is., Nachwirdai; in Ezr. iv. 2, 'Agorabai, Natt. Agorabai, Alex. Agorabai) :Σάραρδων, LXX. [7]: 'Agorabaios, Ptol.: Asarhaddon-áv, Assy.; Assyr. : Assur-haddon), one of the greatest of the kings of Assyria. He was the son of Sennacherib (2 K. xix. 37) and the grandson of Sargon who succeeded Shalmanezer. It must be here noted, however, that the son of Sennacherib's eldest son; and this seems to have been the view of Polybius, who made Sennacherib place a son, Assurbanus, on the throne of Babylon during his own lifetime (ap. Euseb. Chron. Can. i. 5). The contrary, however, appears by the inscriptions, which show the Babylonian viceroy — called Assurbanus by Polybius, but Apanadnus (Assar-anadus?) by Polyen — to have been a distinct person from Esar-haddon. Thus nothing is really known of Esar-haddon until his succession (ah, n. c. 689), which seems to have followed quietly and without difficulty on the murder of his father and the flight of his guilty brothers (2 K. xix. 37; Is. xxxvii. 38). It may, perhaps, be concluded from this that he was, at the death of his father, the eldest son, Assurbanith, the Babylonian viceroy, having died previously.

Esar-haddon appears by his monuments to have been the Assyrian king who most powerfully — if not the most powerful — of all the Assyrian monarchs. He carried his arms over all Asia between the Persian Gulf, the Armenian mountains, and the Mediterranean. Towards the east he engaged in wars with Median tribes "of which his fathers had never heard the name;" towards the west he extended his influence over Cilicia and Cyprus; towards the south he claims authority over Egypt and over Ethiopia. In consequence of the dislocation of Babylon, and its frequent raids from former Assyrian kings, Esar-haddon, having subdued the son of Merodach Baladan who headed the national party, introduced the new policy of substituting for the former government by viceroyees a direct dependence upon the Assyrian crown. He did not reduce Babylonia to a province, or attempt its actual absorption into the empire, but united it to his kingdom in the way that Hungary was, until 1848, united to Austria, by holding both crowns himself and residing now at one and now at the other capital. He is the only Assyrian monarch whom we find to have actually reigned at Babylon, where he built himself a palace, bricks from which have been recently recovered bearing his name. His Babylonian reign lasted thirteen years, from n. c. 689 to u. c. 677; and it was undoubtedly within this space of time that Manasseh, king of Judah, having been seized as his captain at Jerusalem on
a charge of rebellion, was brought before him at Babylon (2 Chr. xxxiii. 11) and detained for a time as prisoner there. [MANASS.]
Eventually Esar-haddon, persuaded of his innocence, or excusing his guilt, restored him to his throne, thus giving a proof of clemency not very usual in an oriental monarch. It seems to have been in a similar spirit that Esar-haddon, according to the inscriptions, gave a territory upon the Persian Gulf to a son of Merodach-Baladan, who submitted to his authority and became a refugee at his court.

As a builder of great works Esar-haddon is particularly distinguished. Besides his palace at Babylon, which has been already mentioned, he built at least three others in different parts of his dominions, either for himself or his son; while in a single inscription he mentions the erection by his hands of no fewer than thirty temples in Assyria and Mesopotamia. His works appear to have possessed a peculiar magnificence. He describes his temples as "shining with silver and gold," and boasts of his Nineveh palace that it was "a building such as the kings his fathers who went before him had never made." The southwest palace at Nineveh is the best preserved of his constructions.

This building, which was executed by Mr. Layard, is remarkable from the peculiarity of its plan as well as from the scale on which it is constructed. It corresponds in its general design almost exactly with the palace of Solomon (1 K. v. i. 1-12), but is of larger dimensions, the great hall being 220 feet long by 100 broad (Layard's Nin. & Babil. p. 634), and the porch or antechamber 160 feet by 60. It had the usual adornment of winged bulls, colossal sphinxes, and sculptured slabs, but had furnished less to our collections than many inferior buildings, from the circumstance that it had been originally destroyed by fire, by which the stones and alabaster were split and caved. This is the more to be regretted as there is reason to believe that Phoenicians and Greek artists took part in the ornamentation.

It is impossible to fix the length of Esar-haddon's reign, or the order of the events which occurred in it. Little is known to us of his history but from his own records, and they have not come down to us in the shape of annals, but only in the form of a general summary. That he reigned thirteen years at Babylon is certain from the Canon of Ptolemy, and he cannot have reigned a shorter time in Assyria. He may, however, have reigned longer; for it is not improbable that after a while he felt sufficiently secure of the affections of the Babylonians to reestablish the old system of vice-regal government in their country. Saosdnechium may have been set up as ruler of Babylon by his authority in B.C. 697, and he may have withdrawn to Nineveh and continued to reign there for some time longer. His many expeditions and his great works seem to indicate, if not to require, a reign of some considerable duration. It has been conjectured that he died about B.C. 660, after occupying the throne for twenty years. He appears to have been succeeded by his son Assur-bani-pal, or Sar-iamnaspas II., the prince for whom he had built a palace in his own lifetime. [G. R.]

For the connections of this Assyrian king with the Hebrew history, and for confirmation of the Scripture account of him by the Babylonian monumens, the reader may see M. von Niebuhr, Geschichte Assur's und Babyl's, pp. 38, 182 ff.; Brandis, Rerum Asyri. Tempora, p. 41; Layard's Ninveh and Babylon, pp. 345, 821 (Loud. 1853) Rawlinson's Bampton Lectures, p. 122 (Amer. ed.); Five Great Monarchies of the Ancient World, vol. iii., by the same author; and Milman's History of the Jews, i. 433 (Amer. ed.).

ESAU [Heb.: Ewun], the oldest son of Isaac, and twin-brother of Jacob. The singular appearance of the child at his birth originated the name: "And the first came out red (חַד הַנֵּר), all over like an hairy garment, and they called his name Esau (אֵיתָן), i.e. "hairy," "rough," Gen. xxv. 25). This was not the only remarkable circumstance connected with the birth of the infant. Even in the womb the twin-brothers struggled together (xxv. 22). Esau was the first-born; but as he was issuing into life Jacob's hand grasped his heel. The bitter enmity of the two brothers, and the increasing strife of two great nations, were thus foreshadowed (xxv. 23, 26). Esau's robust frame and "rough" aspect were types of a wild and daring nature. The peculiarities of his character soon began to develop themselves. Scorning the peaceful and commonplace occupations of the shepherd, he revelled in the excitement of the chase, and in the martial exercises of the Canaanites (xxv. 27).

He was, in fact, a thorough Bedouin, a "son of the desert" (so we may translate נִבְיָה נְבַיָּה), who delighted to roam free as the wind of heaven, and who was impatient of the restraints of civilized or settled life. His old father, by a caprice of affection not uncommon, loved his willful, vagrant boy; and his keen relish for savoy food being gratified by Esau's venison, he liked him all the better for his skill in hunting (xxv. 28). An event occurred which exhibited the reckless character of Esau on the one hand, and the selfish, grasping nature of his brother on the other. The former returned from the field, exhausted by the exercise of the chase, and faint with hunger. Seeing some pottage of lentiles which Jacob had prepared, he asked for it. Jacob on his part consented to give the food on Esau's swearing to him that he would in return give up his birthright. There is something revolting in this whole transaction. Jacob takes advantage of his brother's distress to rob him of that which was dear as life itself to an Eastern patriarch. The birthright not only gave him the headship of the tribe, both spiritual and temporal, and the possession of the great bulk of the family property, but it carried with it the covenant blessing (xxvi. 28, 29; Heb. xii. 16, 17). Then again whilst Esau, under the pressure of temporary suffering, despaired of his birthright by selling it for a mess of pottage (Gen. xxv. 31), he afterwards attempts to secure that which he had deliberately sold (xxvii. 3, 34, 38; Heb. xii. 17).

It is evident the whole transaction was public, for it resulted in a new name being given to Esau. He said to Jacob, "Feed me with that same red (חַד הַנֵּר); therefore was his name called Edom" (Edom, Gen. xxi. 30). It is worthy of note, however, that this name is seldom applied to Esau himself, though almost universally given to the country he settled in, and to his posterity. [Edom; Edomites.] The name "Children of Esau" is in a few cases applied to the Edomites (Deut. v. 4; Jer. xxxii. 8; Olad. 18); but it is rather a poetical expression.
ESAU

Esau married at the age of 40, and contrary to the wish of his parents. His wives were both Canaanites; and they "were bitterness of spirit unto Isaac and to Rebekah" (Gen. xxvi. 34, 55). The next episode in the history of Esau and Jacob is still more painful than the former, as it brings fully out these bitter family rivalries and divisions, which were all but universal in ancient times, and which are still a disgrace to Eastern society. Jacob, through the craft of his mother, is again successful, and secures irrevocably the covenant blessing. Esau now shows vengeance. But fearing his aged father's patriarchal authority, he secretly congratulates himself: "The days of mourning for my father are at hand, then will I slay my brother Jacob" (Gen. xxvii. 41). Thus he imagined that by one bloody deed he would regain all that had been taken from him by artifice. But he knew not a mother's watchful care. Not a sinister glance of his eyes, not a hasty expression of his tongue, escaped Rebekah. She felt that the life of her daughter, the gentle nature of theEdomites, whose habits had won her heart's affections, was now in imminent peril; and she advised him to flee for a time to her relations in Mesopotamia. The sins of both mother and child were visited upon them by a long and painful separation, and all the attendant anxieties and dangers. By a characteristic piece of domestic policy Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure.—and Rebekah said to Isaac, I am weary of my life because of the daughters of Heth: if Jacob take a wife such as these, what good shall my life do me?" Her object was attained at once. The blessing was renewed to Jacob, and he received his father's commands to go to Padan-aram (Gen. xxvii. 46, xxviii. 1-5).

When Esau heard that his father had commanded Jacob to take a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (xxviii. 8, 9). This marriage appears to have brought him into connection with the Ishmaelish tribes beyond the valley of Arakah. He soon afterwards established himself in Mount Seir; still retaining, however, some interest in his father's property in southern Palestine. It is probable that his own habits, and the idilicatrons practised by his wives and rising family, continued to excite and even increase the anger of his parents; and that he, consequently, considered it more prudent to remove his household to a distance. He was residing in Mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the impressions of his brother's early offensm seems to have been almost completely effaced. His reception of Jacob was cordial and honest; though doubts and fears still lurked in the mind of the latter, and betrayed him into something of his old duplicity; for while he promises to go to Seir, he carefully declines his brother's escort, and immediately after his departure turns westward across the Jordan (Gen. xxxiii. 7, 8, 11; xxxiv. 4, 12, 17).

It does not appear that the brothers again met until the death of their father, about 29 years afterwards. Mutual interests and mutual fear seem to have drawn them to meet together and even generously towards each other at this solemn interview. They united in laying Isaac's body in the cave of Machpelah. Then "Esau took all his flocks and all his substance, which he had got in the land of Canaan,"—such, doubtless, was his father with Jacob's consent had assigned to him—and "went into the country from the face of his brother Jacob" (xxvx. 29, xxxvi. 6). He now saw clearly that the covenant blessing was Jacob's; that God had inately allotted the land of Canaan to Jacob's posterity; and that it would be folly to strive against the Divine will. He knew also that as Canaan was given to Jacob, Mount Seir was given to himself (comp. xxvii. 39, xxxii. 3; and Deut. ii. 2), and therefore, desirous of his increased wealth and power to enter into full possession of his country, and drive out its old inhabitants (Deut. ii. 12). Another circumstance may have influenced him in leaving Canaan. He "lived by his sword" (Gen. xxvii. 40); and he felt that the rocky fastnesses of Edom would be a safer and more suitable abode for such as by their habits provoked the hostilities of neighboring tribes, than the rich plains of his domestic residence.

There is a difficulty connected with the names of Esau's wives, which is discussed under Amoh, RAMAH and Eshemath. Of his subsequent history nothing is known: for that of his descendants see Edom and Edomites. J. L. P.

ESCU (Hebrew: Sel), 1 Esdr. v. 29. [Ziba.]

ESAY (Hebrew: Isay, Isaius), Eccles. xviii. 20, 22; 2 Esdr. ii. 18. [Isaiah.]

* ESCHEW, now seldom used, means, in the A. V. (Job i. 8, ii. 3; 1 Pet. iii. 11) "to flee from" or "to shun." It is from the old French eschier in that sense.

II.

ESDRAELON (Jud. iii. 9, 'Esdrelon'im, Sin. 'Esdrel) E'zavath: Vat. Comp. Abd. 'Esdraelamon: i. 4, Vat. 'Ezrael; Alex. Estefia: Vat. Sin. 'Ezra: Comp. Abd. 'Ezdraelamum: i. 8, 'Esdrelaion: Sin. 'Ezra: Vat. Ezeeria: Alex. Ezdrelon: Ezdraelon. This name is merely the Greek form of the Hebrew word Jezreel. It occurs in this exact shape only twice in the A. V. (Jud. iii. 9, iv. 6). In Jud. vii. 3 it is Es- DRAELON [Ezdrelon, ed. 1111], and in i. 8 ESDRAELON [Ezdrelon, ed. 1611], with the addition of "the great plain." In the O. T. the plain is called the VALLEY of JEZREEL: by Josephus the great plain, το τειχων μεγα. The name is derived from the old royal city of Jezreel, which occupied a commanding site, near the eastern extremity of the plain, on a spur of Mount Gilboa.

The great plain of Edsraelon" extends across central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee. The western section of it is properly the plain of Acoho, or Akko. The main body of the plain is a triangle. Its base on the east extends from Jerin (the ancient En-gannim) to the foot of the hills below Nazareth, and is about 15 miles long; the north side, formed by the hills of Galilee, is about 12 miles long; and the south side, formed by the hills of Samaria, is about 18 miles long. The apex on the west is a narrow pass opening into the plain of Akko. This vast expanse has a greatly undulating surface—in spring all green with corn where cultivated, and rank weeds and grass where neglected—dotted with several low gray tells, and near the sides with a few olive groves. This is that Valley of Micahlo (נֵרָנָה), so called from the
city of Megiddo, which stood on its southern border), where Barak triumphed, and where king Josiah was defeated and received his death-wound (Judg. v.; 2 Chr. xxxv.). Probably, too, it was before the mind of the Apostle John when he figuratively described the final conflict between the hosts of good and evil who were gathered to a place called Armageddon (Aramaic, from the Hebrew אֲרָמָגֶדֹן, that is, the city of Megiddo; Rev. xvi. 16). The river Kishon — "that ancient river" so fatal to the army of Sisera (Judg. v. 21) — drains the plain, and flows off through the pass westward to the Mediterranean.

From the base of this triangular plain three branches stretch out eastward, like fingers from a hand, divided by two bleak, gray ridges — one bearing the familiar name of Mount Gilboa; the other called by Franks Little Hermon, but by natives Jebel ed-Duhay. The northerm branch has Tabor on the one side, and Little Hermon on the other; into it the troops of Barak defiled from the heights of Tabor (Judg. iv. 6); and on its opposite side are the sites of Nain and Ender. The southern branch lies between Jezreel and Gilboa, terminating in a point among the hills to the eastward; it was across it Ahaziah fled from Jehu (2 K. ix. 27). The central branch is the richest as well as the most celebrated: it descends in green, fertile slopes to the banks of the Jordan, having Jezreel and Shunem on opposite sides at the western end, and Beth-shan in its midst towards the east. This is the "Valley of Jezreel" proper — the battle field on which Gideon triumphed, and Saul and Jonathan were overthrown (Judg. vii. 1 ff.; 1 Sam. xxix. and xxxi.)

Two things are worthy of special notice in the plain of Esdraelon. (1.) Its wonderful richness. Its unbroken expanse of verdure contrasts strangely with the gray, bleak crowns of Gilboa, and the rugged ranges on the north and south. The gigantic thistles, the luxuriant grass, and the exuberance...
whose powerful protection they would enjoy that peace and rest they loved; and they joined with their neighbors of Zebulon and Naphtali in sending to David presents of the richest productions of their rich country (1 Chr. xii. 32, 40).

The whole borders of the plain of Esdraelon are dotted with places of high historic and sacred interest. Here we group them together, while referring the reader for details to the separate articles. On the east we have Edom, Nisib, and Shomron, ranged round the base of the hill of Moreh; then Beth-shemesh in the centre of the Valley of Jezreel, then Gilboa, with the well of Harod, and the ruins of Jezreel at its western base. On the south are En-ga'urain, Tannach, and Methath. At the western apex, on the overhanging brow of Carmel, is the scene of Elijah's sacrifice; and close by the foot of the mountain below, runs the Kidron, on whose banks the false prophets of Baal were slain. On the north, among places of less note, are Nazareth and Tabor. The modern Syrians have forgotten the ancient name as they have forgotten the ancient history of Esdraelon; and it is now known among them only as Merj dun 'Amar, the Plain of the Son of Amram. A graphic sketch of Esdraelon is given in Stanley's N. of P. p. 355 ff. See also the Handbook for Syria and Palestine, p. 351 ff.; Robinson, ii. 315-39, 366, iii. 113 ff.

The plain of Esdraelon is remarkable for the number and singularly character of the battles which have been fought there from the earliest times down to our own age. The language of the traveller, Dr. Clarke, hardly needs qualification when he says (Travels, &c., &c., p. 493) that warriors out of every nation which is under heaven have pitched their tent in the plain of Esdraelon, and have beheld the various banners of their nations wet with the dews of Tabor and of Hermon. It was here that Barak encountered the forces of Sisera, and the severe battle ensued (commemorated in the song of Deborah and Barak) which swept over almost the entire plain and dyed its waters with blood (Judg. iv. 4 ff. and v. 1 ff.). At the foot of the ridge where Jezreel (Zerech) was situated, Gilboa achieved his great victory over the Amorites and Midianites (Judg. vi. 33, vii. 1 ff.). By the fountain (Ain Jabul) near the same city, the host of Israel under Saul encamped, before it was chased and scattered on the mountains of Gilboa (1 Sam. xiii. 1, xxxi. 1 ff.). At Megiddo, on the southern frontier, between Issachar and Manasseh, Josiah, king of Judah, was defeated and slain by the Egyptians under Necho (2 K. xxii. 31; 2 Chr. xxxv. 22). The army of Nebuchadnezzar, at the head of which was Holofernes, had their quarters here before Bethulia, the strong post which commanded the pass between Gilboa and Samaria (Jud. vii. 3); and here, at the foot of Tabor, Vercingetorix fought against the Jews (Joseph. B. J. iv. 6, § 8). Here the Crusaders and the Saracens slaughtered each other; and here in 1799 the Turks, with an army of 25,000 men, were vanquished by 3,000 French troops under Bonaparte and Kleber. For interesting notices concerning this plain, the most remarkable in Palestine, both geographically and historically, see Ritter's Geography of Palestine, and Lycag's trans., ii. 317, 322, iv. 345 ff.; and Rob. Lycag., Geogr., pp. 131-135.

The best view of Es- draelon is that spread out before the observer from the Wly on the hill-top above Nazareth, and the last description of that view is the one written by Dr. Robinson (Bibl. Res. iii. 189 ff., 1st ed.).

ESDRAS, FIRST BOOK OF

ESDRAS (Esdras; Esdras); 1 Esdr. viii. 1, 3, 7, 8, 9, 19, 24, 25, 31, 32, 92, 96; ix. 1, 7, 16, 39, 40, 42, 45, 46, 49; 2 Esdr. i. 1; ii. 10, 33, 42; vi. 10; vii. 2, 25; viii. 2, 19; xiv. 1, 38. [Ezra].

ESDRAS, FIRST BOOK OF, the first in order of the apocryphal books in the English Bible, which follows Luther and the German Bibles in separating the apocryphal from the canonical books, instead of binding them up together according to historical order (Walton's Polyglos. de Hebr. Genes. § 29). The classification of the 4 books, which have been named after Ezra is particularly complicated. In the Vatican and other quasi-modern editions of the LXX., our 1st Esdr. is called the first book of Esdras in relation to the canonical book of Ezra, which follows it and is called the second Esdras. But in the Vulgate, 1st Esdr. means the canonical book of Ezra, and 2d Esdr. means Nehemiah, according to the primitive Hebraic arrangement, mentioned by Jerome, in which Ezra and Nehemiah made up two parts of the one book of Ezra; and 3d and 4th Esdrs. are what we now call 1 and 2 Esdras. These last, with the prayer of Manasses, are the only apocryphal books admitted co nomine into the Roman Bibles, the other Apocrypha being declared canonical by the Council of Trent. The reason of the exclusion of 3d Esdras from the Canon seems to be that the books in it in 1666, were not of such a nature that it existed in Greek. For it is not in the Complutian edition (1515), nor in the Biblia Regia: Vatitliiius (about 1540) had never seen a Greek copy, and, in the preface to the apocryphal books, speaks of it as only existing in some MSS. and printed Latin Bibles. But, added also, a French Protestant divine (Bibl. Crit. (about 1559), says that he knew of no one who had ever seen a Greek copy. For this reason, it seems, it was excluded from the Canon, though it has certainly quite as good a title to be admitted as Tobit, Judith, &c. It has indeed been stated (Bp. Marsh, Comp. Ver. ap. Soames Hist. of R. f. i. 608) that the Council of Trent in excluding the 2 books of Esdras followed Augustine's Canon. But this is not so. Augustine (in Bp. Irac. Christ. lib. ii. 13) distinctly mentions among the libri canonicz, Esdras duo; and

sancta Trinitatis symnoous suscepti, et pro canonicis suscipiendoq; deservit, sepulcri sunt, ne per nos iner- inter, quippe qui a mense sacris Patribus inter- interventur, et in alphubis Bibliae Latinae, tam manus- manusqu quae pressit, repurruruntur.

* Jerome, in his preface to his Latin version of Ezra and Nehemiah, says, "arche molde liber editionis," ete.; though he implies that they were "sanctum," called 1 and 2 Esdras.
that one of these was our 1st Esdras is manifest from the quotation from it given below from De Civit. Dei. Hence it is also clear that it was included among those pronounced as canonical by the 3d Council of Carthage A. D. 397, or 419, where the name of Ezra is given. The fact is, where it is to be noticed, by the way, that Angusius and the Council of Carthage use the term canonical in a much broader sense than we do: and that the manifest ground of considering them canonical in any sense, is their being found in the Greek copies of the LXX. in use at that time. In all the earlier editions of the English Bible the books of Esdras are numbered as in the Vulgate. In the 6th Article the Church of England (first introduced in 1571) the 1st and 2d books denote Ezra and Nehemiah, and the 3d and 4th, among the Apocrypha, are our present 1st and 2d. In the list of revisers or translators of the Bishops' Bible, sent by Archbishop Parker to Sir William Cecil with the portrait; revised by each, Ezra, Nehemiah, Esther, and the apocryphal books of Esdras, seem to be all comprised under the one title of Esdras. Barlow, Bp. of Chichester, was the translator, as also of the books of Judith, Tobit, and Sopiienia (Corvex. of Archbp. Parker, Park. Soc. p. 333). The Geneva Bible first adopted the classification used in our present Bibles, in which Ezra and Nehemiah give their names to the two canonical books, and the two apocryphal become 1 and 2 Esdras; where the Greek form of the name marks that these books do not exist in Hebrew or Chaldee.

As regards the antiquity of this book and the rank assigned to it in the early church, it may suffice to mention that Josephus quotes largely from it, and follows its authority, even in contradiction to the canonical Ezra and Nehemiah, by which he has been led into hopeless historical blunders and anachronisms. It is quoted also by Clemens Alexandrinus (Str. i.), and the famous sentence "Veritas manet, et invalescit in aeternum, et vitet et obtinet in secula seculorum," is cited by Cyprian as from Esdras, prefixed by ut scriptam est (Corvex. of Archbp. Parker, Park. Soc. p. 333). Bunsen suggests that it may be prophetic of Christ who is the truth. He includes under the name of Esdras our 1 Esdr, and the canonical books of Ezra and Nehemiah. 1 Esdr is also cited by Athanasius and other fathers; and perhaps there is no sentence that has been more widely divulged than that of 1 Esdr. iv. 41, "Magna est veritas et praevalebit." But though it is most strange that the Council of Trent should have not admitted this book into their wide Canon, nothing can be clearer, on the other hand, than that it is rightly included by us among the Apocrypha, not only on the ground of its historical inaccuracy, and contradiction of the true Ezra, but also on the external evidence of the early church. That it was never known to exist in Hebrew, and formed no part of the Hebrew Canon, is admitted by all. Jerome, in his preface to Ezr. and Neh., speaks contemptuously of the dream (somnia) of the 3d and 4th Esdras, and says they are to be utterly rejected. In his Prolog. Cod. he clearly defines the number of books in the Canon, 22, corresponding to the 22 letters of the Hebrew alphabet, and says that all others are apocryphal. This of course excludes 1 Esdras. Melito, Origen, Eusebius, Athanasius, Gregory Nazianzen, Hilary of Poitiers, Cyril of Jerusalem, the Council of Laodicea, and many other fathers, expressly followed the same canon, counting as apocryphal what ever is not comprehended in it.

As regards the contents of the book, and the author or authors of it—the first chapter is a transcript of the two last chapters of 2 Chr. for the most part revolved, and only in one or two parts slightly corrected. The whole book is marked by many corruptions of the text, the use of a different Greek version, and some various readings, as e. g. i. 4, μεγαλευσάρα για δία χειρός, indicating a various reading in the Hebrew; perhaps ἡ θεσσαλία for θεσσαλία, or, as Bretschneider suggests, τάφειν; παράκλησιν (?τάφειν), for the Hebrew of 2 Chr. xxxvi. 12, ἐκποίησα, "with the oxen," &c.

Chapters iii., iv., and v., to the end of v. 6, are the original portions of the book, containing the legend of the three young Jews at the court of Darius; and the rest is a transcript more or less exact of the book of Ezra, with the chapters transposed and quite otherwise arranged, and a portion of Nehemiah. Hence a twofold design in the compiler is discernible: one to introduce and give Scripture-sanctioned legend to the story of Zerubbabel, which may or may not have had an historical base, and may have existed as a separate work: the other to explain the great obscurities of the book of Ezra, and to present the narrative, as the author understood it, in historical order, in which, however, he has signally failed. For, not to advert to innumerable other contradictions, the introducing the opposition of the heathen, as offered to Zerubbabel after he had been sent to Jerusalem in such triumph by the decree of Darius, and the description that opposition as lasting "until the reign of Darius" (v. 73), and as put down by an appeal to the decree of Cyrus, is such a palpable inconsistency, as is alone sufficient quite to discredit the authority of the book. It even induces the suspicion that it is a forger made up of scraps by different hands. At all events, attempts to reconcile the different portions with each other, or with Scripture, is lost labor.

As regards the time and place when the compilation was made, the original portion is that which alone affords much clue. This seems to indicate that the writer was thoroughly conversant with Hebrew, even if he did not write the book in that language. He was well acquainted too with the books of Esther and Daniel (1 Esdr iii. 1, 2 ff.), and other books of Scripture (ib. i. 20, 21, 39, 41, &c., and 43 compared with Ps. cxxvii. 7) But that he did not live under the Persian kings, and was not contemporary with the events narrated, appears by the undiscriminating way in which he uses promiscuously the phrase Moloch and Percunia, or, Persiun and Moloch, according as he happened to be imitating the language of Daniel or of the book of Esther. The allusion in ch. iv. 23 to "sailing the sea and upon the rivers," for the purpose of "robbing and stealing," seems to indicate residence in Egypt, and acquaintance with the weakness of Greek pirates then acquired. The parenthesis of v. 73 favors also strongly of Greek rather than Hebrew. If, however, as seems very probable, the legend of Zerubbabel appeared first as a separate piece, and was afterwards incorporated into the narrative made up from the book of Ezra, this Greek sentence from ch. v. would not prove anything as to the language in which the original legend was written. The expressions in iv. 40, "She is the strength, kingdom, power, and majesty.
of all ages," is very like the doxology found in some copies of the Lord's Prayer, and retained by us, "thine is the kingdom and the power and the glory for ever." [Comp. I Chr. xxix. 12.] But Lichtenstein says that the Hellenistic version furnished it instead of saying Amen, used this antiphon, "Blessed be the name of the glory of His Kingdom for ever and ever" (vi. 427). So that the resemblance may be accounted for by their being both taken from a common source.

The abrupt termination of the book has led most scholars to consider it incomplete in its present form. Trendelenburg, Eichhorn, De Wette, Fritzsche, Bertheau, and Ginsburg regard the work as in the main a free translation from the Hebrew of the Old Testament books, and consequently, as of some value for the criticism of the original text: Keil, on the other hand, with whom Davidson agrees, maintains that the compiler used the Septuagint version. The peculiar passage iii. 1—v. 6 is generally supposed to have been originally written in Greek. The style of the book is much better than that of most portions of the Septuagint, and is comparatively free from Hebraisms. The Syriac version of 1st Esdras has been recently published by Lagarde in a form more correct than that in Walton's Polyglott (Liber V. Text. apocryphi Syriac. Lips. 1861).

ESDRAS, THE SECOND BOOK OF, in the English Version of the Apocrypha, and so named by the author (2 Esdr. i. 1), is more commonly known, according to the reckoning of the Latin Version, as the fourth book of Ezra [see above, Esdras I.]; but the arrangement in the Latin MSS. is not uniform, and in the Arabic and Ethiopic versions the book is called the first of Ezra. The original title, Ἀραμαία Ἐζέκ (ὁ προφετεία Εζέκ), "the Revelation of Ezra," which is preserved in some old catalogues of the canonical and apocryphal books (Nicephorus, ap. Fabric. Cod. Psalms. V. T. ii. 176 [Col. Apoc. N. T. i. 962], Montfaucon, Biblioth. Coelest. p. 194), is far more appropriate, and it were to be wished that it could be restored.

For a long time this part of Ezra was known only by the old Latin version, which is preserved in some MSS. of the Vulgate. This version was used by Ambrose, and, like the other parts of the Vetus Latium, is probably older than the time of Tertullian. A second Arabic text was discovered by Mr. Gregory about the middle of the 17th century in two Bodleian MSS., and an English version made from this by Simon Ockley was inserted by Whiston in the last [4th] volume of his Primus Christianus, 1711. Ebrardius added the various readings of the Arabic text to his edition of the Latin in 1723 (Col. Psalms. V. T. ii. 173 ff.). A third Ethiopic text was published in 1820 by [Archbishop] Laurence with English and Latin translations, likewise from a Bodleian MS. which had remained wholly disregarded, though quoted by Laubli in his Dictionary (Primoi Escrib libr. versio Aethiopica ... Latini Anglica et reddita). Ebrardius and Cosin and Hannibal, in 1720, the Latin translation has been reprinted by Gürten, with the various readings of the Latin and Arabic (Prodi. Psalms. Stuttg. 1840, 66 ff.): but the original Arabic text had not yet been published.

2. The three versions were all made directly from a Greek text. This is evidently the case with regard to the Latin (Lacte, Verh. einer relit. Erdichtung, i. 149) and the Ethiopic (Van der Vliss, Dissertatio critica de Escrib lib. oper. Amstel., 1839, p. 75 ff.), and apparently so with regard to the Arabic. A clear trace of a Greek text occurs in the Epistle of Barnabas (chs. xii. = 2 Ezr. v. 5), but the other supposed references in the Apostolic Fathers are very uncertain (v. Chem. i. 20; Hern. Post. i. 1, 3, &c.). The next witness to the Greek text is Clement of Alexandria, who expressly quotes the book as the work of "the prophet Ezra" (Strom. iii. 16, § 100). A question, however, has been raised whether the Greek text was not itself a translation from the Hebrew (Bretschneider, in Henne's Mus. iii. 478 ff. ap. Lacte, l.c.); but the arguments from language by which the hypothesis of a Hebrew (Aramaic) original is supported, are wholly unsatisfactory: and in default of direct evidence to the contrary, it must be supposed that the book was composed in Greek. This conclusion is further strengthened by its internal character, which points to Egypt as the place of its composition.

3. The common Latin text, which is followed in the English version, contains two important interpellations (ch. i., ii., xv., xvi.) which are not found in the Arabic and Ethiopic versions, and are separated from the genuine Apocalypse in the best Latin MSS. Both of these passages are evidently

---

* Gürten obtained a transcript of a Greek MS at Paris, bearing the title, which proved to be worthless, a compilation of late date. Jovine et Heils, i. 70, n. 1 comp. Van der Vliss, Dipl. crit. de Escrib lib. quart. Pref. p. 6 ff.
Ezra, second book of

of Christian origin: they contain traces of the use of the Christian Scriptures (e. g. i. 30, 33, 37, ii. 13, 29, 45 ff., xv. 8, 35, xvi. 54), and still more they are pervaded by an anti-Jewish spirit. Thus, in the opening chapter, Ezra is commanded to reproive the people of Israel for their continual rebellions (1-25), in consequence of which God threatens to cast off his people (24-28) and to leave their houses to a people that shall come." But in spite of their desolation, God offers once more to receive them (i. 1-32). The offer is rejected (ii. 33), and the heathen are called. Then Ezra sees "the Son of God" standing in the midst of a great multitude "wearing crowns and bearing palms in their hands" in token of their victorious confession of the truth. The last two chapters (xv., xvi.) are different in character. They contain a stern prophecy of the woes which shall come upon Egypt, Babylon, Asia, and Syria, and upon the whole earth, with an exhortation to the chosen to guard their faith in the midst of all the trials with which they shall be visited (2:18-32). Another smaller interpolation occurs in the Latin version in vii. 28, where Aerus noster Jesus answers to "My Messiah" in the Ethiopic, and to "My Son Messiah" in the Arabic (cf. Lücke, p. 170 n. &c.). On the other hand, a long passage occurs in the Ethiopic and Arabic versions after vii. 53, which is not found in the Latin (Etiop. e. v. i.), though it bears all the marks of genuineness, and was known to Ambrose (de Bono Mort. 10, 11). In this case the omission was probably due to dogmatic causes. The chapter contains a strange description of the intermediate state of souls, and ends with a peremptory denial of the effect of "the last day of judgment" (viii. 1-5). Then Ezra appealed to the passage in support of his views, and called down upon himself by this the severe reproof of Jerome (Ep. c. Vigil. c. 7). This circumstance, combined with the Jewish complexion of the narrative, may have led to its rejection in later times (cf. Lücke, p. 155 ff.).

4. The original Apocalypse (iii.-xiv.) consists of a series of apocalyptic revelations and visions in which Ezra is instructed in some of the great mysteries of the moral world, and assured of the final triumph of the righteous. The first revelation (iii.-v. 15, according to the A. V.) is given by the angel Uriel to Ezra, in "the thirtieth year after the ruin of the city," in answer to his complaints (e. iii.) that Israel was neglected by God while the heathen were lords over them; and the chief subject is the unsearchableness of God's purposes, and the signs of the last age. The second revelation (v. 20-vi. 34) carries out this teaching yet further, and lays open the gradual progress of the plan of Providence, and the nearness of the visitation before which evil must attain its most terrible climaks. The third revelation (vi. 35-ix. 25) answers the objections which arise from the apparent narrowness of the limits within which the hope of blessedness is confined, and describes the coming of Messiah and the last scene of Judgment. After this follow three visions. The first vision (ix. 25-x. 59) is of a woman (Sion) in the wilderness, and the bridal day, of her only son (the city built by Solomon), who had been born to her after she had had no child for thirty years. But while Ezra looked, her face "upon a sudden shined exceedingly," and "the woman appeared no more, but there was a city built." The second vision (xi.-xii.), in a dream, is of an eagle (Rome) which "came up from the sea" and "spread his wings over all the earth." As Ezra looked, the eagle suffered strange transformations, so that at last only one head was left, and that head was "burnt up." The third vision (xiii.), in a dream, is of a man (Messiah) "flying with the clouds of heaven," and gathering together the lost tribes of Israel and offering Sion, "prepared and built," to his people. The last chapter (xiv.) recounts an appearance to Ezra of the Lord who showed himself to Moses in the bush, at whose command he receives again the Law which had been burnt, and with the help of scribes writes down ninety-four books (the twenty-four canonical books of the O. T. and seventy books of secret mysteries), and thus the people is prepared for its last trial, guided by the recovered Law.

5. The date of the book is much disputed, though the limits within which opinions vary are narrower than in the case of the book of Enoch. Lücke (Versuch einer vollst. Eev. &c., 2e Aufl. i. 209) places it in the time of Cæsar; Van der Vliët (Disputat. crit. i. c.) shortly after the death of Cæsar. Laurence (i. e.) brings it down somewhat lower, to 25-25 n. C., and Hildebrand (Jud. Apok. p. 221) agrees with this conclusion, though he arrives at it by very different reasoning. On the other hand (Cf. Gircher der Heiligen, i. 99 ff.) assigns the book to the time of Domitian, and in this he is followed by Wieseler and by [Bruno] Bauer (Lücke, p. 180, &c.), while Lücke in his first edition had regarded it as the work of a Hellenist of the time of Trajan. The interpretation of the details of the vision of the eagle, which furnishes the chief data for determining the time of its composition, is extremely uncertain from the difficulty of regarding the history of the period from the point of view of the author; and this difficulty is increased by the allusion to the desolation of Jerusalem, which may be merely suggested by the circumstances of Ezra, the imaginary author; or, on the contrary, the last destruction of Jerusalem may have suggested Ezra as the medium of the new revelation. (Cf. Fabricius, Cod. Pseucho. ii. p. 189 ff. and Lücke, p. 187, n. &c., for a summary of the earlier opinions on the composition of the book.)

6. The chief characteristics of the "three-headed eagle" which refer apparently to historic details, are "three-feathered wings" (duodecim aëris pen- neurum), "eight counter-feathers" (contraria pen- neurae), and "three heads;" but though the writer expressly interprets these of kings (xii. 14, 20) and "kingdoms" (xii. 23), he is, perhaps intentionally, so obscure in his allusions, that the interpretation only increases the difficulties of the vision itself. One point only may be considered certain,—the eagle may signify that the Christian church can triumph over every empire than Rome. Notwithstanding the identification, in the case of the fourth empire of Daniel (cf. Barn. Ep. 4; Daniel, Book of), it is impossible to suppose that it rep-
The power of the Patrology could scarcely have been described in language which may be rightly applied to Rome (xi. 2, 6; 40); and the succession of kings quoted by Hilgenfeld to represent the "twelve wings" preserved only faint traces of the original. But it is established that the interpretation of the vision is to be sought in the history of Rome, the chief difficulties of the problem begin. The second wing (c. king) rules twice as long as the other (xi. 17). This fact seems to point to Octavian and the line of the Caesars; but thus the line of "twelve" leads to no plausible conclusion. If it is supposed to close with Trajan (Lívius, 1st Ap.). the "three heads" receive no satisfactory explanation. If, again, the "three heads" represent the three Flavii, then the "twelve" must be composed of the nine Caesars (Jul. Cæsar — Vitellius) and the three pretenders Tiso, Vindex, and Nymphidius (6th rev.), who could scarcely have been brought within the range of a Jewish Apocalypse. Volkmar proposes a new interpretation, by which two wings are to represent one king, and argues that this symbol was chosen in order to conceal better from strange eyes the revelation of the secret. The twelve thus represent the six Caesars (Cæsar — Nero); the eight "counter-feathers," the usurping emperors Gallo, Otho, Vitellius, and Nero; and the three heads the three Flavii. This hypothesis offers many striking coincidences with the text, but at the same time it is directly opposed to the form of interpretation given by Ezra (xii. 14, regnumbat ... docto regem ... v. 18, regem reges), and Volkmar's hypothesis is that the twelve and eight were marked in the original MS. in some way so as to suggest the notion of division, is extremely improbable.

Van der Vlis and Lécque in his later edition regard the twelve kings as only generally symbolic of the Roman power; and while they identify the three heads with the Trimunia, seek no explanation of the other details. All is evidently as yet vague and uncertain, and will probably remain so till some clearer light can be thrown upon the Jewish thought and history during the critical period 100 n. c. 100 A. D.

7. But while the date of the book must be left undetermined, there can be no doubt that it is a genuine product of Jewish thought. Weiss (Eugenio, p. 222) alone dissent from this point on the unanimous judgment of recent scholars (Hilgenfeld, p. 190, &c.); and the contrast between the tone and style of the Christian interpolations and the remainder of the book is in itself sufficient to prove the fact. The Apocalypse was probably written in Greek; the opening and closing chapters certainly were.

8. In tone and character the Apocalypse of Ezra offers a striking contrast to that of Enoch [Enoch, Book of]: Triumphal anticipations are overshadowed by gloomy forebodings of the destiny of the world. The idea of victory is lost in that of retribution. Future blessings is reserved only for "a very few" (xii. 70, vii. 1, 3, 32-55, vii. 1-15). The great question is "not how the ungodly shall be punished, but how the righteous shall be saved, for whom the world is created" (ix. 13). The "wees of Messiah" are described with a terrible minuteness which approaches the despairing traditions of the Talmud (v., xiv. 10, ff., ii. 3 ff.); and after a reign of 400 years (vii. 29-85; the clause is wanting in .Eth. v. 29) "Christ," is "my Son, shall die (Arab. omits); and all nations have breath; and the world shall be turned to "travel", the old silence seven days, like as in the first, glimmer, and no man shall remain" (vii. 29).

Then shall follow the resurrection and the judgment of the world. This result is the beginning of immortality" (vii. 43). In other points the doctrine of the book offers various approximations to that of St. Paul, as the ingenuity does to that of the Apocalypse (c. e. 2 Esd. xiii. 43 ff.; v. 4). The relation of "first Adam" to his sinister posterior, and the operation of the Law (iii. 20 ff.; vii. 48, ix. 36); the transitoriness of the world (iv. 26); the eternal counsels of God (vi. 10); his providence (vii. 11) and long-suffering (vii. 44); his sanctification of his people "from the beginning" (ix. 8) and their peculiar and lasting privileges (vi. 59) are plainly stated: and on the other hand the efficacy of good works (viii. 35) in conjunction with faith (ix. 7) is no less clearly affirmed.

9. One tradition which the book contains obtained a wide reception in early times, and served as a pendant to the legend of the origin of the LXX. Ezra, it is said, in answer to his prayer that he might be inspired to correct all the Law which was burnt, received a command to take with him tablets and five men, and retire for forty days. In this retirement a cup was given him to drink, and with haste his understanding was quickened and his memory strengthened; and for forty days and forty nights he dictated to his scribes, who wrote ninety-four books (Latinit, 204), of which twenty-four were delivered to the people in place of the books which were lost (xiv. 18), and this strange story was repeated in various forms by Irenæus (adv. Her. iii. 21, 2), Tertullian (de Cult. Fam. i. 3, "omne instrumentum Judæice litterarum per Esdras constat restitutum"), Clement of Alexandria (Strom. l. 22, p. 410, C. p. 392), Jerome (adv. Helv. 7, et. Pseudo-Augustine, de Mirab. S. Ser. ii. 52, and many others; and probably owed its origin to the tradition which regarded Ezra as the representative of the "first of the Prophets" to whom the final revision of the canonical books was universally assigned in early times. (Canon.)

10. Though the book was assigned to the "prophet" Ezra by Clement of Alexandria (Strom. iii. 16, p. 556 F.); and quoted with respect by Irenæus (l. c.); Tertullian (l. c. C. adv. Marc. iv. 16), and Ambrose (Ep. xxxiv. 2; de Hom Moritit, 10 ff.), it did not maintain its ecclesiastical position in the church. Jerome speaks of it with contempt, and it is rarely found in MSS. of the Latin Bible. Archbishop Laurence examined 180 MSS. and the book was contained only in thirteen, and in these it was arranged very differently. It is found, however, in the printed copies of the Vulgate older than the Council of Trent, by which it was excluded from the Canon; and quotations from it still occur in the Roman services (Bausweig, ap. Fabr. Cod. Pseudo., p. 191). On the other hand, though this book is included among those which are "read for examples of life" by the English Church, no use of it is there made in public worship. Luther and the Reformed Church rejected the book entirely; but it was held in high estimation by numerous mystics (Fabric, l. c. p. 178 ff.) for whom its contents naturally had great attractions.

11. The chief literature of the subject has been:
noticed in the course of a them, and behind 5-8

tant contribution to the study of the text, *nachlich* a critical edition is still needed, though, Latin materials for its construction are abundant.

B. F. W.

* Since the preceding article was published, the subject has been much discussed; and the recent literature is too important to be passed over withou-

notice. Volkmar's view of the book as set for-
th in his *Das vierde Buch Esra, u. s. w.* Zürich, 1858, was criticised by Hilgenfeld (*Volkmar's Ent-
dechsungen, ab. des des Esra, u. w.* in his *Zeitschr. f. wiss. Theol.* 1858, i. 247-270). In the volume of the same periodical for 1860 (ii. 1-81), the subject was further discussed by A. von Gut-
schmid, *Die Apok. d. Esra u. ihre spätern Bearbei-
tungen* (comp. Ewald, *Jahrh. x. 222 ff.); and Ewald had in the mean time presented his view of the question in his *Gesch. d. Volkes Isr.* vii. 62-78 (1859), referring the book to the time of Titus, 78-81 A. D. — See also Dillmann, art. *Eschatologia* in his *Real-Encyklopädie der classischen Altertumswiss.* 1860. Gutschmid agreed with Hilgenfeld in assigning the date of most of the body of the work to about 30 A. c., but endeavored to rid himself of that crucial interpretation, the vision of the Eagle (ch. xi., xii.), by the hypothesis of interpretation. Hilgenfeld re-
viewed the recent Apocalyptic literature in an elabor-
ate article, *Die jud. Apokalyptik u. die neuesten Forschungen, in *Zeitschr. f. wiss. Theol.* 1860, i. 301-362 (on 2 Esdras, p. 355 ff.). In this ar-
icle he was constrained to abandon the explanation which he had previously given of the 30 kings in the vision of the Eagle, and endeavored to find them among the Scythians instead of the Ptole-
macies. It must be confessed, however, that the manner in which they are made out is far from satisfactory. Volkmar briefly replied in his *Zeitschr. f. wiss. Theol.* 1861, i. 83 ff., and in 1863 published *Das vierde Buch Esra, zum Erstennmale voll-
schöpfend herausgegeben, as the 2d Abtheilung of his *Humbuch zu den Apokryphen.* This important work, indispensable to one who would make a thor-
ough study of the book, contains a critical edition of the text of the Old Latin or Italian version, ac-
cording to the Codex Sangermanensis of the 9th century, with the various readings of a newly dis-
covered MS. of that version belonging to the State Library at Zürich (Codex Taricenensis), and also of the Arabic and Ethiopic versions, so far as the me-
ans of giving them were then available. This text is accompanied by a critical and exegetical commentary, a new German translation, and a full dis-
sussion (pp. 273-408) of the questions relating to the nature and history of the book. This work was reviewed by Hilgenfeld in an article in his *Zeitschr. f. wiss. Theol.* for 1863, which was issued separately, with additions, under the title *Die Prophetiker Esra u. Dordi u. ihre neuesten Bearbei-
tungen, Halle, 1863.* Shortly after the same year, Ewald (who had previously criticized Volkmar in the *Göttingen gelehrte Anzeigen,* 1863, p. 641 ff.) published *Das vierte Esroebuch nach seinem zeitlot-
ter, seinen Arabischen übersetzungen u. einer neuen wiederherstellung, Göttingen, 1863,* 4to, separately printed from vol. i. of the *Abhandlungen of the Royal Acad. of Sciences at Göttingen. Here he
gives us for the first time, from a MS. in the Bod-
inian Library at Oxford, an edition of the Arabic
version of the book, which had before been known only by Ockley's English translation, also a portion of another Arabic version, reading, which was communicated by Dillmann, of several MSS. of the *Smithsonian* version. — As to the comparative fidelity of these ancient translations, there is a difference of opinion. Volkmar regards the Old Latin
version as almost a daguerreotype of the original Greek; Hilgenfeld gives the preference to the Arabic; Ewald generally adheres to the Old Latin text, but not unfluently adopts the readings of the Arabic, and occasionally of the *Smithsonian*, in their stead. For a good review, by Hermann Schultze, of the
theses of Hilgenfeld, Volkmar, and Ewald, on the
2d book of Esdras, see the *Jahrh. f. deutsche
Theol.* 1864, ix. 165-173. Volkmar's view re-
specting the date of 2d Esdras (97 A. D.) appears to be gaining prevalance, being adopted by writers of opposite schools, as Strauss, Colani, Scholten, *Ertschrift.*

Volkmar's view respecting the date of 2d Esdras (97 A. D.) appears to be gaining prevalance, being adopted by writers of opposite schools, as Strauss, Colani, Scholten, *Ertschrift.*

**Eshban**

is not likely. Which of the two names in the earlier it is not possible to decide.  

**Eshban** [אֶשְׁבָּן [ashe been, Fürst: *Ae'sh-bah, *Aesb'Bah; Alex. [in 1 Chr.] *Esh'Ban; *Ish'Bon], a Horite; one of the four sons of Dishan (so the Hebrew in Gen.; but A.V. has Dishan), the son of Seir the Horite (Gen. xxxvi. 20; 1 Chr. i. 41). No trace of the name appears to have been discovered among the modern tribes of Idumaea.

**Eshcol** [אֶשְׁכֹל [a bunch, cluster, especially of grapes]: *E'Shokal; [Alex. ver. 24. *Esh-xo-A'sh; Josephus *E'xSy'da*; *Eshkol], brother of Maneo the Amorite, and of Aner; and one of Abraham's companions in his pursuit of the four kings who had carried off Lot (Gen. xiv. 13, 24). According to Josephus (Ant. i. 10, § 2) he was the foremost of the three brothers, but the Bible narrative leaves this quite uncertain (comp. 13 with 24). Their residence was at Hebron (xiii. 18), and possibly the name of Eshcol remained attached to one of the fruitful valleys in that district till the arrival of the Israelites, who then interpreted the appellation as significant of the gigantic "cluster" (in Heb. *Eshkol), which they obtained there.

* It is more probable that Eshcol, the chiefman, derived the name from the region or town over which he ruled, which in its turn was so called on account of its fruitful vineyards. So in the case of Shechem (Gen. xxxiv. 2), the Hivite prince must have taken his name from the place, and not the place from him [SHECHEM]. The Amorite name may well have been very similar in form, as well as meaning, to the later Hebrew name.  

**Eshcol, the Valley, or the Brook, of** *(אֶשְׁכֹל הַיָּם, or אֶשְׁכֹל הַיָּמָה)*  

*φαράξ θέρμως*; [Touvris botiri]; *Nechelescol* of *cat terras botiri*; [*Fallis botiri*], a wady in the neighborhood of Hebron, explored by the spies who were sent by Moses from Kadesh-barnan. From the terms of two of the notices of this transaction (Num. xxxii. 9; Deut. i. 21) it might be gathered that Eshcol was the furthest point to which the spies penetrated. But this would be to contradict the express statement of Num. xiii. 21, that they went as far as Hebron. From this fruitful valley they brought back a huge cluster of grapes, an incident which, according to the narrative, obtained for the place its appellation of the "valley of the cluster" (Num. xiii. 23, 24). It is true that in Hebrew *Eshkol* signifies a cluster or bunch, but the name had existed in this neighborhood centuries before, when Abraham lived there with the chiefs Aner, Eshcol, and Maneo, not Hebrws but Amorites; and this was possibly the Hebrew way of appraising the ancient name derived from that here into the language of the conquerors, consistently with the paranomastic turns so much in favor at that time, and with a practice of which traces appear elsewhere. [See under ESTHER.]

In the *Onomasticon* of Eusebius the *φάραξ βελόρως* is mentioned, with some hesitation, at Gophna, fifteen miles north of Jerusalem, on the Neophilius.  

---

**Esdra, Secupol**

Panting in *Eth. v. Zepen as north o. *Hebron, on *Son, shall die (*Af'eq,* Ephippus, Prat. The Jewish*; any *Ha-Harchi speaks of it as north of the meqheleth on which the ancient city of Hebron stood (Benjamin of Tudela, *Asher, ii. 437); and here the name has been lately observed still attached to a spring of remarkably fine water called ‘Am-Eshkol, in a valley which crosses the vale of Hebron N. E. and S. W., and about two miles north of the town (Van de Velde, *Narrare, c. & c., ii. 64). It is right to say that this interesting intelligence has not been yet confirmed by other observers.*

* Mr. Tristram's description of this valley as it now is (*Land of Israel, p. 307, 3d ed.), shows how well it must have deserved its ancient fame. "The walk up the valley revealed to us for the first time what Judah was everywhere else in the days of its prosperity. Bare and stony are the hill-sides, not an inch of space is lost. Terraces, where the ground is not too rocky, support the soil. Ancient vineyards cling to the lower slopes; olive, mulberry, almond, fig, and pomegranate trees fill every available cranny to the very crest, while the bottom of the valley is carefully tilled for corn, carrots, and cauliflowers, which will soon give place to melons and cucumbers. Streamlets of fresh water trickled on each side of our path. The production and fertility, as evidenced even in winter, is extraordinary; and the culture is equal to that of Malta. That catacomb of perished cities, the hill-country of Judah, through whose labyrinths we yesterday wandered, is all explained by a walk up the Vale of Eshcol; and those who doubt the ancient records of the population, or the census of David or his successors, have only to look at this valley, and by the light of its commentary to read the story of those cities."

**Eshzan** [אֶשְׁזָן; *Zo'ada; [Comp. *Ab] *Alex. *Ez'van; *Ez'om], one of the cities of Judah, in the mountainous district, and in the same group with Hebron (Josh. xv. 52). The name does not occur again, nor has it been met with in modern times.

**Eshker** [אֶשְׁקֵר; *A'qef; *Ese'a; [Comp. *Aq'ek; *Eese], a Benjamite, one of the late descendants of Saul; the founder of a large and noted family of archers, lit. "treaders of the bow" (1 Chr. viii. 33). The name is omitted in the parallel list of 1 Chr. ix.

**Eshkalonites, the** (accurately "the Esklkonites," *אָשְׁקַלוֹנִים; *Aqef), in the singular number: *אָשְׁקַלוֹנִי/*Aqefiyi; [Vat.-rev. *Ascalonite], Josh. xiii. 3. [ASHKELON.]

**EshTaol** [אֶשְׁתָּוַל and אֶשְׁתָּוָא; [Comp. *As'to; *As'tol; *As'ta], a town in the low country—the Shefich,—of Judah. It is the first of the first group of cities in that district (Josh. xv. 33), enumerated with Zorah (Heb. Zorajah), in company with which it is commonly mentioned. Zorah and Eshtaol were two of the towns allotted to the tribe of Dan out of Judah
ESHTAULITES

Between them, and behind Kirjath-jearim, was situated Mahaneh-Dann, the camp or stronghold which formed the head-quarters of that little community during their constant encounters with the Philistines. Here, among the old warriors of the tribe, Samson spent his boyhood, and married the first of the Spirit of Jehovah; and after his last exploit his body was brought, up the long slopes of the western hills, to its last rest in the burying-place of Manoah his father (Judg. xii. 25, xvi. 31, xviii. 2, 8, 11, 12). [Dan.] In the genealogical records of 1 Chron. the relationship between Eshtael, Zareah, and Kirjath-jearim is still maintained. [ESHTAULITES]

In the Onomasticon of Eusebius and Jerome Eshtael is twice mentioned.—(1) As Astal of Judah, described as then existing between Azotus and Ascalon under the name of Astho; (2) as Eshtael of Dan, ten miles N. of Eleutheropolis. The latter position is hardly more in accordance with the indications of the Bible. In more modern times the name has vanished. Zorah has been recognized as Sarek (Roh. ii. 14, 16, 224, iii. 154), but the identification of Eshtael has yet to be made. Schwarz (p. 102) mentions a village named Steed, west of Zorah, but, apart from the fact that this is corroborated by no other traveller and by no map, the situation is too far west to be "behind Kirjath-jearim" if Kurfet el-Kanah be Kirjath-jearim. The village marked on the maps of Robinson and Van de Velde, Yeshah, and alluded to by the former (iii. 155), is nearer the requisite position; but the resemblance between the two names is too faint to admit of identification.

ESHTAULITES, THE (אשタע'ל), uncertainly "the Eshtaulites," in singular number; the singular אשלג, Alex. or אשלגאלאות: Eshtalotes, with the Zareathites, were among the families of Kirjath-jearim (1 Chr. ii. 53). [ESHTAULITES]

ESHTEMOA [אשhemoa], and in shorter form, without the final guttural, ESHTEMOH (אשתמ') and ESHTEMAH, in the name of a town, are uncertain. The latter occurs in Josh. xvi. only: [in Josh. xvi., corruptly] 'Es naal 'Maav: Alex. Esdathe: [Josh. xxii.] 'Esda: [Alex. Esdathe: I Sam.]. 'Esethe [Vat.-thei: Alex. Esdathe: I Chr. iv. 17, 'Esdathe: Alex. Esdathe: vi. 57.] 'Esdathe: I Esthemo, Esthemo, [Esthemo, Esthemo], a town of Judah, in the mountains; one of the group containing Deir-Hin (Josh. xv. 50). With its "suburbs" Eshtemoa was allotted to the priests (xvi. 14: 1 Chr. vi. 57). It was one of the places frequented by David and his followers during the long period of their wanderings; and to his friends there he sent presents of the spoil of the Amalekites (1 Sam. xxvii. 28, 31). The place was known in the time of Eusebius and Jerome (pregrandia tician), though their description of its locality is too vague to enable us to determine it (Onom. Esthemo). But there is little doubt that it has been discovered by Dr. Robinson at Scemna, a village seven miles south of Hebron, on the great road from el-Milh, containing considerable ancient remains, and in the neighborhood of other villages still bearing the names of its companions in the list of Josh. xv. 13: Anab, Socoh, Jattir, c. (See Robinson, i. 194, ii. 204, 205; Schwarz, p. 163; [Wilson, Lands of the Bible, 553-5]).

In the lists—half genealogical, half topographic—of the descendants of Judah in 1 Chr., Eshtemoa occurs as derived from Ishlah, "the father of Eshtemoa" (1 Chr. iv. 17): Gedor, Sochoh, and Zanoah, all towns in the same locality, being named in the following verse. Eshtemoa appears to have been founded by the descendants of the Egyptian wife of a certain Mered, the three other towns being those of his Jewish wife. See the explanations of Bertheau (Chronik, ad loc.).

G.

* The "father of Eshtemoa," as Ishlah is called (see above), means that he was its founder or re-founder, and head of the clan. [Father.

A recent traveller says that the town has now about 500 inhabitants. The ruins there consist of the remains of an early Greek church, many pieces of ancient carving, a marble sarcophagus built into the wall, and numerous sculptured doorways and broken columns (Tristram, Land of Israel, p. 591, 2d ed.). The "hill-country" of Judah is full of such examples of the ancient prosperity and present decay.

H.

ESHTEMOA' [אשתמוא': Alex. Ἐσθημων: Eshtemoa] in 1 Chr. iv. 19 appears to be the name of an actual person. [MAACHATHITE.]

ESHTON (אש'תונ) [effuminare or avoriorum Gesem.]: Ἐσθων, a name which occurs in the genealogies of Judah (1 Chr. iv. 11, 12). Mehir was "the father of Eshton," and amongst the names of his four children [three are] Beth-rapha and Ir-nahash—which have the appearance of being names, not of persons [merely], but of places.

G.

ESROA' (Aeropa; [Sin. Ἄραπουσια: Comp. Ar. Arapo]); Vulg. omits: the Peshito Syriac reads Bethelhorn, a place fortified by the Jews on the approach of the Assyrian army under Holofernes (Jud. iv. 4). The name may be the representative of the Hebrew word Hazor, or Zorah (Sonmonis, Onom. N. T. 19), but no identification has yet been arrived at. The Syriac reading suggests Beth-horon, which is not impossible.

* ESPOUSAL. [MARRIAGE.]

ES'RI (ESP'ia, [Vat. E spies, Alex. Еspia, Vulg. omits), 1 Esdr. ix. 34. [AZAREEL 4, or SHIRAI.

ESSE'NES 1. In describing the different sects which existed among the Jews in his own time, Josephus dwells at great length and with especial emphasis on the faith and practice of the Essenes, who appear in his description to combine the ascetic virtues of the Pythagoreans and Stoics with a spiritual knowledge of the Divine Law. An analogous sect, marked, however, by characteristic differences, appears in the Egyptian Therapeutae, and from the detailed notices of Josephus [B. J. i. ii 8; Ant. xiii. 5, 9, xiv. 10, § 4 f., xviii. 1, 2 ff.] and Philo (Quod omn. prob. liber, § 12 f.; Pseud. De vita contemplativa. Ep. ad Philo, Psev. Prop. Ex.), and the casual remarks of Pliny (H. N. v. 17), late writers have frequently discussed the relation which

[Josh. xix. 41].
these Jewish mystics occupied towards the popular religion of the time, and more particularly towards the doctrines of Christianity. For it is a most remarkable fact that the existence of such sects appears to be unremarked both in the apostolic writings and in early Hebrew literature.

2. The name Essene (Ἐσσηνοί, Joseph. Antiq. 11. i. 3, § 5, &c.) is itself full of difficulty. Various derivations have been proposed for it, and all are more or less open to objection. Some have connected it with Ἑσσήν (Ἀσσηνὸς), in old, or Ἑσσῆς, ὁ ἀριστος (of God); others, again, find the root in Ἔσσην, to be ruled (Baur), or Ἔσσην, to bathe (Griffin). Philo, according to his fashion, saw in the word a possible connection with the Greek ἔσσης, body (Quod omn. prob. lib. § 12); and Epiphanius interpreted the collateral form Εσσηνοί as meaning "the stout race" (στιβαρῶν γένους. Iber. xix. i. ε. γ. Κ). It seems more likely that Essene represents Ἐσσην, see (so Suidas = Θεοφραστός, Hilgenfeld, or Ἐσσῆς, the silent, the mysterious (Jost). Josephus represents Ἐσσῆς (I. 160. 1. ἔσσην), the high-priest's breastplate, by Ἐσσηνούς, interpreting the word as equivalent to ἱερός, oracle (Ant. iii. 7, § 5). Comp. Jost, Gesch. d. Judeen, i. 267 n.; Hilgenfeld, Jud. Apok. p. 277 f.; Ewald, Gesch. iee. iv. 420 n.

3. The obscurity of the Essenes as a distinct body arises from the fact that they represented originally a tendency rather than an organization. The communities which were formed out of them were a result of their practice, and not a necessary part of it. As a sect they were distinguished by an aspiration after ideal purity rather than by any specific code of doctrines; and like the Chasidim of earlier times (ἔσσης), they were confounded in the popular estimation with the great body of the zealous observers of the Law (Pharisees). The growth of Essenesim was a natural result of the religious feeling which was called out by the circumstances of the Greek dominion; and it is easy to trace the process by which it was matured. From the Maccabean age there was a continuous effort among the strictest Jews to attain an absolute standard of holiness. Each class of devotees was looked upon as practically impure by their successors, who carried the laws of purity still further; and the Essenes stand at the extreme limit of the mystic asceticism which was thus gradually reduced to shape. The associations of the "scribes and Pharisees" (ἱεραρχία, the companions, the wise) gave place to others bound by a more rigid rule; and the rule of the Essenes was made gradually stricter. Judas, the earliest Essene who is mentioned (c. 110 n. c.), appears living in ordinary society (Joseph. B. J. i. 3, § 5). Menahem, according to tradition a colleague of Hillel, was a friend of Herod, and brought upon his sect the favor of the king (Joseph. Antiq. x. 10, § 5). But by a natural impulse the Essenes withdrew from the dangers and distractions of business. From the cities they retired to the wilderness to realize the concepts as of religion which they formed, but still they remained on the whole true to their ancient faith. To the Pharisees they stood nearly in the same relation as that in which the Pharisees themselves stood with regard to the mass of the people. The differences lay mainly in rigor of practice, and not in articles of belief.

4. The traces of the existence of Essenes in common society are not wanting nor confined to individual cases. Not only was a gate at Jerusalem named from them (Joseph. B. J. v. 4, § 2, Ἐσσηνοῖς, 51.), but a later tradition mentions the existence of a congregation there which devoted "one third of the day to study, one third to prayer, and one third to labor" (Frankel, Zeitschrift, 1846, p. 458). Those, again, whom Josephus speaks of as allowing marriage, may be supposed to have belonged to such bodies as had not yet withdrawn from intercourse with their fellow-men. But the practice of the extreme section was afterwards reduced to the characteristic of the whole class, and the isolated communities of Essenes furnished the type which is preserved in the popular descriptions. These were regulated by strict rules, analogous to those of the monastic institutions of a later date. The candidate for admission first passed through a year's noviciate, in which he received, as symbolic gifts, an axe, an apron, and a white robe, and gave proof of his temperance by observing the ascetic rules of the order (περι νεών παράδειγμα). At the close of this probation, the candidate (ὁ θυρία) was submitted to a fresh trial of two years, and meanwhile he shared in the lustral rites of the initiated, but not in their meals. The full membership was imparted at the end of this second period, when the novice bound himself "by awful oaths" — though oaths were absolutely forbidden at all other times — to observe piety, justice, obedience, honesty, and secrecy, "preserving alike the books of their sect, and the name of the angels" (Joseph. B. J. ii. 8, § 7).

5. The order itself was regulated by an internal jurisdiction. Excommunication was equivalent to a slow death, since an Essene could not take food prepared by strangers for fear of pollution. All things were held in common, without distinction of property or house; and special provision was made for the relief of the poor. Self-denial, temperance, and labor — especially agriculture — were the marks of the outward life of the Essenes; purity and divine communion were the objects of their aspiration. Slavery, war, and commerce were alike forbidden (Philo, Quod omn. prob. liber, § 12, p. 877 M.); and, according to Philo, their conduct generally was directed by three rules, "the love of God, the love of virtue, and the love of man" (Ibid. c. c.).

6. In doctrine, as has been seen already, they did not differ essentially from strict Pharisees. Moses was honored by them next to God (Joseph. B. J. ii. 8, 9). They observed the Sabbath with singular strictness; and though they were unable to enumerate 19 different etymologies which have been proposed for the word, the last being the derivation from Ἐσσῆς, "pious." To this he inclines "because it plainly connects the Essenes with the Chassidim, from which they originated."
to offer sacrifices at Jerusalem, probably from regard to purity (διαφοράς ἐσχατείας), they sent gifts thither (Joseph. Ant. xviii. 2, § 5): at the same time, like most ascetics, they turned their attention specially to the mysteries of the spiritual world, and looked upon the body as a mere prison of the soul. They studied and practiced with signal success, according to Josephus, the art of prophecy (Joseph. B. J. ii. 8; cf. Ant. xv. 10, § 5; B. J. i. 5, § 9); and familiar intercourse with nature gave them an unusual knowledge of physical truths. They asserted with peculiar boldness the absolute power and foreknowledge of God (Joseph. Ant. xiii. 5, § 9, xviii. 1, § 5); and disparaged the various forms of mental philosophy as useless or beyond the range of man (Philo, l. c. p. 877).

7. The number of the Essenes is roughly estimated by Philo at 4000 (Philo, L. c.), and Josephus says that there were "more than 4000" who observed their rule (Ant. xvii. 2, § 5). Their best-known settlements were on the N. W. shore of the Dead Sea (Philo, Philo, l. c., cc.), but others lived in scattered communities throughout Palestine, and perhaps also in cities (Joseph. B. J. i. 8, § 4. Cf. [Hiippel.] Phiska, i. 29).

8. In the Talmudic writings there is, as has been already said, no direct mention of the Essenes, but their existence is recognized by the notice of a few peculiar points of practice and teaching. Under the titles of "the pious," "the weakly" (c. c. with study), "the retiring," their maxims are quoted with respect, and many of the traits preserved in Josephus find parallels in the notices of the Talmud (Z. Frankel, Zeitschrift, Dec. 1846, p. 451 ff.; Monatschrift, 1853, p. 37 ff.). The four stages of purity which are distinguished by the doctors (Chaggag, 18 a. ap. Frankel, L. c. p. 451) correspond in a singular manner with the four classes into which the Essenes are said to have been divided (Joseph. B. J. i. 8, § 10); and the periods of probation observed in the two cases offer similar coincidences.

9. But the best among the Jews felt the peril of Essenism as a system, and combined to discourage it. They shrank with an instinctive dread from the danger of connecting asceticism with spiritual power, and cherished the great truth which lay in the saying "Doctrine is not in heaven." The miraculous energy which was attributed to the mystics was regarded by them rather as a source of suspicion than of respect; and speculative speculations were condemned with emphatic distinctness (Frankel, Monatschrift, 1853, pp. 62 ff., 68, 71).

10. The character of Essenism limited its spread. Out of Palestine, Levitical purity was impossible, for the very land was impure; and thus there is no trace of the sect in Babylonia. The case was different in Egypt, where Judaism assumed a new shape from its intimate connection with Greece. Here the original form in which it was moulded was represented not by direct copies, but by analogous forms; and the tendency which gave birth to the Essenes found a fresh development in the pure speculation of the Therapeutae. These Alexandrian mystics abjured the practical labors which rightly belonged to the Essenes, and gave themselves up to the study of the inner meaning of the Scriptures. The impossibility of fulfilling the law naturally led them to substitute a spiritual for a literal interpretation: and it was their object to ascertain its meaning by intense labor, and then to satisfy its requirements by absolute devotion. The "whole day, from sunrise to sunset, was spent in mental discipline." Bodily wants were often forgotten in the absorbing pursuit of wisdom, and "meat and drink" were at all times held to be unworthy of the light (Philo, De cœ. contemp. § 4).

11. From the nature of the case Essenism in its extreme form could exercise very little influence on Christianity. In all its practical bearings it was diametrically opposed to the apostolic teaching. The dangers which it involved were far more clear to the eye of the Christian than they were to the Jewish doctors. The only real similarity between Essenism and Christianity lay in the common element of true Judaism: and there is little excuse for modern writers who follow the error of Eusebius, and confound the society of the Therapeutæ with Christian brotherhoods. Nationally, however, the Essenes occupy the same position as that to which John the Baptist was personally called. They mark the close of the old, the longings for the new, but in this case without the promise. In place of the message of the coming "kingdom" they preached, and not individual purity and isolation. At a later time traces of Essenism appear in the Clementines, and the strange account which Ephesians gives of the Ossemi (Ossemi) appears to point to some combination of Essene and pseudo-Christian doctrines (Hor. xix.). After the Jewish war the Essenes disappear from history. The character of Judaism was changed, and ascetic Pharisaism became almost impossible.

12. The original sources for the history of the Essenes have already been noticed. Of modern essays, the most original and important are those of Frankel in his Zeitschrift, 1846, pp. 441-461, and Monatschrift, 1853, p. 30 ff., taken in conjunction with the wider view of Jost, Gesch. u. Judenth. i. 257 ff. The account of Hilgenfeld (Jüd. Apokalypse, p. 245 ff.) is interesting and ingenious, but essentially one-sided and subservient to the writer's theory (cf. Volkmar, Der vierte B. Ezres, p. 90). Gfrorer (Philo, ii. 299 ff., Dähne (Jüd. Relig. Philos., 1. 107 ff.), and Friedländer (J. V. und. 1. 420 ff.), all contribute interesting sketches from their respective points of view. The earlier literature, as far as it is of any value, is embodied in these works.

B. F. W.

* It may be well to add to the preceding article references to the more recent discussions concerning the Essenes, noticing some older works which may still be useful to the inquirer. Prideaux, Connection, sect. pt. ii. bk. v. has translated in full the passages of Josephus and Philo which relate to them — to be sure, not always accurately. See also Bellermann, Gesch. Nachrichten aus dem Alterth. über Essæer u. Therapeutæ, Berlin, 1821, and P. Beer, Geschichte, Lehren u. Meinungen aller relig. Secten d. Juden, Brünn, 1822, i. 68-113. De Quincey's ingenious but paradoxical essay, in which he endeavors to show that Josephus has given under the name of Esseus a disguised account of the early Church, appeared in Blackwood's Magazine for Jan., April, and May, 1840, and was reprinted in his Hist. and Crit. Essays, Boston, 1856, i. 20-112, with a Supplement in his Avenger, &c. (Ibid. 1859), pp. 107-
331. This is exactly analogous to the usual ad-
notation of the modern names of towns to explain the
use of the old obsolete ones (Gen. xxxv. 19, 27;
Josh. xx. 10, &c.). Esther was a beautiful Jewish
maiden, whose ancestor Kish had been among the
captives led away from Jerusalem (part of which
was in the tribe of Benjamin) by Nebuchadnezzar
when Jehoiachin was taken captive. She was an
orphan without father or mother, and had been
brought up by her cousin Mordecai, who had an
affection for the household of Abannerus king of Persia,
and dwelt at a "Shushan the palace." When Vashti
was dismissed from being queen, and all the fairest
virgins of the kingdom had been collected at Shu-
shan for the king to make choice of a successor to
her from among them, the choice fell upon Esther,
and she was crowned queen in the room of Vashti
with much pomp and rejoicing. The king was not
aware, however, of her race and parentage; and so,
with the careless presumption of a sensual despot, on
the representation of Haman the Agagite, his prime
minister, that the Jews scattered through his em-
pire were a pernicious race, he gave him full power
and authority to kill them all, young and old,
women and children, and take possession of all their
property. The means taken by Esther to avert this
great calamity from her people and her kindred, at
the risk of her own life, and to turn upon Haman
and his companions all the enmity which he had
lightened upon the Jews, and the success of her scheme, by which she changed
their mourning, fasting, weeping, and wailing, into
light and gladness and joy and honor, and became
for ever especially honored among her countrymen,
are fully related in the book of Esther. The feast
of Purim, i.e. of Lots, was appointed by Esther
and Mordecai to be kept on the 14th and 15th of
the month Adar (February and March) in com-
memoration of this great deliverance. [Per.]
The decree of Esther to this effect is the last thing
recorded of her (ix. 32). The continuous celebra-
tion of this feast by the Jews to the present day
is thought to be a strong evidence of the historical
truth of the book. [Esther, Book on.]
The questions which arise in attempting to give
Esther her place in profane history are—
I. Who is Ahasuerus? This question is answered
by the above decision; and the reasons there given
lead to the conclusion that he was Xerxes the son
of Darius Hystaspis.
II. The second inquiry is, who then was Esther?
Artissiana, Atossa, and others are indeed excluded
by the above decision; but are we to conclude with
Nehiger, that because Ahasuerus is Xerxes, there- 
fore Esther is Aemestis? Surely not. None of
the historical particulars related by Herodotus concern-
ing Aemestis make it possible to identify her with
Esther. Aemestis was the daughter of Otanes
(Onophas in Cesias), one of Xerxes' generals, and
brother to his father Darius (Herod. vii. 61, 82).
Esther's father and mother had been Jews. Aem-
estis was wife to Xerxes before the Greek expedition
(Herod. vii. 61), and her sons accompanied Xerxes
to Greece (Herod. vii. 30), and had all three come
to man's estate at the death of Xerxes in the 29th
year of his reign, the eldest being immediately
after the return from Greece. Esther
did not enter the king's palace till his 7th year,
just the time of Darius' marriage. These objections
are conclusive, without adding the difference
of character of the two queens. The truth is that
history is wholly silent both about Vashti and
Esther. Herodotus only happens to mention our

ESTHER (ESTER, the planet Venus: 'Es-
ther,' the Persian name of Hadassah, daughter
of Abdael, the son of Shime, the son of Kish, a
Benjaminite, and cousin of Mordecai. This ex-
plification of her old name Hadassah, by the addition
 of her new name, by which she was better known,
with the formula, "an ethr..."
It only remains to remark on the character of Esther as given in the Bible. She appears there as a woman of deep piety, faith, courage, patriotism, and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king's favor with him for the good of the Jewish people. That she was a virtuous woman, and, as far as her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us in asserting. And there must have been a singular grace and charm in her aspect and manners, since she "obtained favor in the sight of all that looked upon her" (ii. 15). That she was raised up as an instrument in the hands of God to avert the destruction of the Jewish people, and to afford them protection, and forward their wealth and peace in their captivity, is also manifest from the Scripture account. But to impute to her the sentiments put into her mouth by the apocryphal author of ch. xiv., or to accuse her of crudity because of the death of Haman and his sons, and the second day's slaughter of the Jews' enemies at Shushan, is utterly to ignore the manners and feelings of her age and nation, and to judge her by the standard of Christian morality in our own age and country instead. In fact the simplicity and truth to nature of the Scriptural narrative afford a striking contrast, both with the forced and florid amplifications of the apocryphal additions, and with the sentiments of some later commentators. It may be convenient to add that the 3rd year of Xerxes was B.C. 483, his 7th, 479, and his 12th, 474 ('Clinton, F. H.); and that the simultaneous battles of Plataea and Mycale, which frightened Xerxes from Sardis (Diod. Sic. xi. § 36) to Susa, happened, according to Prideaux and Clinton, in September of his 7th year. For a fuller discussion of the

of Xerxes' wives; Scripture only mentions two, if indeed either of them were wives at all. But since with the custom of the Persian kings before Xerxes to have several wives, besides their concubines; that Cyrus had several (Herod. iii. 3); that Cambyses had four whose names are mentioned, and others besides (iii. 31, 32, 68); that Smardia had several (ib. 68, 69); and that Darius had six wives, whose names are mentioned (ib. persis), it is most improbable that Xerxes should have been content with one wife. Another strong objection to the idea of Esther being his only legitimate wife, and perhaps to her being strictly his wife at all, is that the Persian kings selected their wives not from the harems, but, if not foreign princesses, from the noblest Persian families, either their own nearest relatives, or from one of the seven great Persian houses. It seems therefore natural to conclude that Esther, a captive, and one of the harems, was not of the highest rank of wives, but that a special honor, with the name of queen, may have been given to her, as to Vashti before her, as the favorite concubine or inferior wife, whose offspring, however, if she had any, would not have succeeded to the Persian throne. This view, which seems to be strictly in accordance with what we know of the manners of the Persian court, removes all difficulty in reconciling the history of Esther with the scanty accounts left us by profane authors of the reign of Xerxes.

It only remains to remark on the character of Esther as given in the Bible. She appears there as a woman of deep piety, faith, courage, patriotism, and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king's favor with him for the good of the Jewish people. That she was a virtuous woman, and, as far as her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us in asserting. And there must have been a singular grace and charm in her aspect and manners, since she "obtained favor in the sight of all that looked upon her." (ii. 15). That she was raised up as an instrument in the hands of God to avert the destruction of the Jewish people, and to afford them protection, and forward their wealth and peace in their captivity, is also manifest from the Scripture account. But to impute to her the sentiments put into her mouth by the apocryphal author of ch. xiv., or to accuse her of crudity because of the death of Haman and his sons, and the second day's slaughter of the Jews' enemies at Shushan, is utterly to ignore the manners and feelings of her age and nation, and to judge her by the standard of Christian morality in our own age and country instead. In fact the simplicity and truth to nature of the Scriptural narrative afford a striking contrast, both with the forced and florid amplifications of the apocryphal additions, and with the sentiments of some later commentators. It may be convenient to add that the 3rd year of Xerxes was B.C. 483, his 7th, 479, and his 12th, 474 ('Clinton, F. H.); and that the simultaneous battles of Plataea and Mycale, which frightened Xerxes from Sardis (Diod. Sic. xi. § 36) to Susa, happened, according to Prideaux and Clinton, in September of his 7th year. For a fuller discussion of the

Identity of Esther, and different views of the subject, see Prideaux's 'Connection,' i. 230, 243, 297 ff., and Petrav. de Doctr. Temp. xii. 27, 28, where he makes Esther wife of Artaxerxes Longimanus, following Joseph. Ant. xii. 6, as he followed the LXX. and the apocryphal Esther; J. Scalig. ('de Eodem. Temp. vii. 591; 'Ant. l. c. xii. 100), making Ahasuerus, Xerxes; Usher ('Austral. Vct. Test.'), making him Darius Hystaspis; Lloyd, Chaldean, &c. Eusebius ('Canon. Chron.' p. 338, ed. Mediol.) rejects the hypothesis of Artaxerxes Longimanus, on the score of the silence of the books of Ezra and Nehemiah, and adopts that of Artaxerxes Menecon, following the Jews, who make Darius Codomannus to be the same as Darius Hystaspis, and the son of Artaxerxes by Esther! It is most observable that all Petavius's and Prideaux's arguments against Seager's view apply solely to the statement that Esther is Amestris. A. C. H.

ESTHER, BOOK OF, one of the latest of the canonical books of Scripture, having been written late in the reign of Xerxes, or early in that of his son Artaxerxes Longimanus. The author is not known, but it may very probably have been Mordecai himself. The minute details given of the great banquet, of the names of the chamberlains and eunuchs, and Haman's wife and sons, and of the customs and regulations of the palace, betoken that the author lived at Shushan, and probably at court, while his no less intimate acquaintance with the most private affairs both of Esther and Mordecai well suits the hypothesis of the latter being himself the writer. It is also in itself probable that as Daniel, Ezra, and Nehemiah, who held high offices under the Persian kings, wrote an account of the affairs of their nation, in which they took a leading part, so Mordecai should have recorded the transactions of the book of Esther likewise. The termination of the book with the mention of Mordecai's elevation and government, agrees also well with this view, which has the further sanction of many great names, as Aben Ezra, and most of the Jews, Talmudus, Carpoizius, and many others. Those who were the most zealous in favor of the great Synagogue, may have merely meant that Ezra edited and added it to the canons of Scripture, which he probably did, bringing it, and perhaps the book of Daniel, with him from Babylon to Jerusalem.

The book of Esther appears in a different form in the LXX., and the translations therefrom, from that in which it is found in the Hebrew Bible. In speaking of it we shall first speak of the canonical book found in Hebrew, to which also the above observations refer; and next of the Greek book with its apocryphal additions. The canonical Esther then is placed among the Hagiographa or הָגִיּוֹת by the Jews, and in that first portion of them which they call the five volumes, יֵשׁוּפִּים. It is sometimes emphatically called Megiloth, without other distinction, and was held in such high repute by the Jews that it is a saying of Maimonides that in the days of Messiah the prophetic and hagiographical books will pass away, except the book of Esther, which will remain with the Pentateuch. This book is read through by the Jews term LXX. is used to indicate the whole Greek volume as we now have it.
in their synagogues at the feast of Purim, when it was, and is still in some synagogues, the custom at the mention of Haman's name to hiss, and stamp, and clench the fist, and cry, "Let his name be dotted out; may the name of the wicked rot." It is said also that the names of Haman's ten sons are read in one breath, to signify that they all expired at the same instant of time. Even in writing the names of Haman's sons in the 5th, 8th, and 9th verses of Esth. ix., the Jewish scribes have contrived to express their abhorrence of the race of Haman; for these ten names are written in three perpendicular columns of 3, 3, 4, as if they were hanging upon three parallel cords, three upon each cord, one above another, to represent the hanging of Haman's sons (Stechlin's Tobit. Liberal. vol. ii. p. 349). The Targum of Esth. ix., in Walton's Polyglott, inserts a very minute account of the exact position occupied by Haman and his sons on the gallows, the height from the ground, and the interval between each; according to which they all hung in one line, Haman at the top, and his ten sons at intervals of half a cubit under him. It is added that Zeresh and Haman's seventy surviving sons fled, and begged their bread from door to door, in evident abasement to Ps. civ. 9, 10. It has often been remarked as a peculiarity of this book that the name of God does not once occur in it. Some of the ancient Jewish teachers were somewhat staggered at this, but others accounted for it by saying that it was a transcript, under Divine inspiration, from the Chronicles of the Medes and Persians, and that being meant to be read by heathen, the sacred name was wisely omitted. Baxter (Saint's Rest, pt. iv. ch. iii.) speaks of the Jews using to cast to the ground the book of Esther, because the name of God was not in it. But Wolf (B. H. pt. ii. p. 90) denies this, and says that if any such custom prevailed among the oriental Jews, to whom it is ascribed by Sandys, it must have been rather to express their hatred of Haman. Certain it is that this book was always reckoned in the Jewish canon, and is named or implied in almost every enumeration of the books composing it, from Josaphus downwards. Jerome mentions it by name in the Pros. coh., in his Epistle to Paulinus, and in the prologue to Esther; as does Augustine, de Civit. Di., and de Doctr. Christ., and Origen, as cited by Eusebius (Hist. Eccles. vi. 25), and many others. Some modern commentators, both English and German, have objected to the contents of the book as improbable; but if it be true, as Hdborius Soc. relates, that Xerxes put the Medes foremost at Thermopylas on purpose that they might be all killed, because he thought they were not thoroughly reconciled to the loss of their national supremacy, it is surely not incredible that he should have given permission to Haman to destroy a few thousand strange people like the Jews, who were represented to be injurious to his empire, and disobedient to his laws. Nor again, when we remember what Herodotus relates of Xerxes in respect to promises made at Lampsacus, can we deem it incredible that he should peremptorily have his promise to Esther to reverse the decree in the only way that seemed practicable. It is likely too that the secret friends and adherents of Haman would be the persons to attack the Jews, which would be a reason why Mardochaeus would rather rejoice at their destruction. In all other respects the writer shows such an accurate acquaintance with Persian manners, and is so true to history and chronology, as to afford the strongest internal evidences to the truth of the book. The causal way in which the author in 2 Mac. xvi. 36 alludes to the feast of Purim, under the name of "Mardochaeus's day," as kept by the Jews in the time of Nicanor, is another strong testimony in its favor, and tends to justify the strong expression of Dr. Lee (quoted in Whiston's Josephus, xii. ch. vi.), that "the truth of this history is demonstrated by the feast of Purim, kept up from that time to this very day.

The style of writing is remarkably chaste and simple, and the narrative of the struggle in Esther's mind between fear and the desire to save her people, and of the final resolve made in the strength of that help which was to be sought in prayer and fasting, is very touching and beautiful, and without any exaggeration. It does not in the least favor of romance. The Hebrew is very like that of Ezra and parts of the Chronicles; generally pure, but mixed with some words of Persian origin, and some of Chaldaic allusion, which do not occur in the Hebrew, such as "נתקל, נתקל, נתקל, נתקל, נתקל.

In short it is just what one would expect to find in a work of the age which the book of Esther pretends to belong to.

As regards the LXX version of the book (of which there are two texts, called by Dr. Fritzsche, A and B), it consists of the canonical Esther with various interpolations prefixed, interspersed, and added at the close. Read in Greek it makes a complete and continuous history, except that here and there, as e. g., in the repetition of Mordecai's pedigree, the patch-work betrays itself. The chief additions are, Mordecai's pedigree, his dream, and his appointment to sit in the king's gate, in the second year of Artaxerxes, prefixed [Apoc. Esther, A. V. and Vulg. ch. ii. 2-xxii. 6]. Then, in the third chapter, a pretended copy of Artaxerxes's decree for the destruction of the Jews added, written in thorough Greek style [Apoc. xii. 1-7]; a prayer of Mordecai inserted in the fourth chapter, followed by a prayer of Esther, in which she exclaims herself for being wife to the uninecessed king, and denies having eaten anything or drunk wine at the table of Haman [Apoc. xiii. 8-xxiv. 19]; an amplification of v. 1-5 [Apoc. xv. 1-16. A. V.; Vulg. 4-19]; a pretended copy of Artaxerxes letter for reversing the previous decree, also of manifestly Greek origin, in ch. viii., in which Haman is called a Macedonian, and is accused of having plotted to transfer the empire from the Persians to the Macedonians, a palpable proof of this portion having been composed after the overthrow of the Persian empire by the Greeks [Apoc. ch. xiv.]; and lastly an addition to the tenth chapter, in which Mordecai shows how his decree was fulfilled in the events that had happened, gives glory to God, and prescribes the observation of the feast of the 14th and 15th Adar [Apoc. x. 4-13].

The whole book is closed with the following entry: —

---

a There are two Targums to Esther; both of late into Greek. See Wolf's Rel. Heb. pars ii. pp. 174-176.

b Dr. Lee also remarks on some very remarkable points in the historical character of the book derived from the feast of Purim, as well as on other points (James of II. 8. p. 430 ff.).

c The whole contains other copious emendations and amplifications. [MORDECAI]
In the fourth year of the reign of Ptolemaus and Jeopatra, Dositheus, who said he was a priest and Levite, and Ptolemy himself, being of Pharim, which they said was the same, and that Lynamachus, the son of Ptolemy, that was in Jerusalem, had interpreted it." [Apost. xi. 1]. This was apparently intended to give authority to this Greek version of Esther, by pretending that it was a certified translation from the Hebrew original. Ptolemy Philometer, who is here meant, began to reign n. c. 181. Though, however, the interpolations of the Codex are thus manifest, they make a consistent and intelligible story. But the apocryphal additions as they are inserted in some editions of the Latin Vulgate, and in the English Bible, are incomprehensible; the history of which is this: When Jerome translated the book of Esther, he first gave the version of the Hebrew alone as being alone authentic. He then added at the end a version in Latin of those several passages which he found in the LXX., and which were not in the Hebrew, stating where each passage came in, and marking them all with an obscurus. The first passage so given is that which forms the continuation of chapter x. (which of course immediately precedes it), ending with the above entry about Dositheus. Having annexed this conclusion, he then gives the Provenzium, which he says forms the beginning of the Greek Vulgate, beginning with what is now verse 2 of chapter xi.; and so proceeds with the other passages. But in subsequent editions all Jerome's explanatory matter has been swept away, and the disjointed portions have been printed as chapters xi., xii., xiii., xiv., xv., xvi., as if they formed a narrative in continuance of the canonical book. The extreme absurdity of this arrangement is nowhere more apparent than in chapter xii., where the verse (1) closes the whole book in the Greek copies, and in St. Jerome's Latin translation, is actually made immediately to precede that (ver. 2) which is the very first verse of the Provenzium. As regards the place assigned to Esther in the LXX., in the Vatican edition, and most others, it comes between Judith and Job. Its place before Job is a remnant of the Hebrew order, Esther there closing the historical, and Job beginning the metrical Megillah. Tobit and Judith have been placed between it and Nehemiah, doubtless for chronological reasons. But in the very ancient Codex published by Tischendorf, and called C. Friderico-Augustus, Esther immediately follows Nehemiah (included under Estra B), and precedes Tobit. This Codex, which contains the apocryphal additions to Esther, was copied from one written by the martyr Pamphus with his own hand, as far as to the end of Esther, and is ascribed by the editor to the fourth century.

As regards the motive which led to these additions, one seems evidently to have been to supply what was thought an omission in the Hebrew book, by introducing copies mention of the name of God. It is further evident from the other apocryphal books, and additions to the canonical Scriptures, which appear in the LXX., such as Bel and the Dragon, Susanna, the Song of the Three Children, &c., that the Alexandrian Jews loved to dwell upon the events of the Babylonish Captivity, and especially upon the Divine interpositions in their behalf, probably as being the latest manifestations of God's special care for Israel. Traditional stories would be likely to be current among them, and these would be sure sooner or later to be committed to writing, with additions according to the fancies of the writers. The most popular among them, or those which had most of an historical basis, or which were written by men of most weight, or whose origin was lost in the most remote antiquity, or which most gratified the national feelings, would acquire something of sacred authority (especially in the absence of real inspiration dictating fresh scriptures), and get admitted into the volume of Scripture, less rigidly fenced by the Hellenistic than by the Hebrew Jews. No subject would be more likely to engage the thoughts and exercise the pens of such writers, than the deliverance of the Jews from utter destruction by the intervention of Esther and Mordecai, and the overthrow of their enemies in their stead. Those who made the additions to the Hebrew narrative according to the religious taste and feeling of their own times, probably acted in the same spirit as others have done, who have added florid architectural ornaments to temples which were too plain for their own corrupted taste. The account which Josephus follows seems to have contained yet further particulars, as, e. g., the name of the eunuch's servant, a Jew, who betrayed the conspiracy to Mordecai; other passages from the Persian chronicles read to Ahasuerus, besides that relating to Mordecai, and amplifications of the king's speech to Haman, &c. It is of this LXX. version that Athanasius (Past. Epid. 39, Oxf. transl.) spoke when he ascribed the book of Esther to the non-canonical books; and this also is perhaps the reason why in some of the lists of the canonical books Esther is not named, as, e. g., in those of Melito of Sardis and Gregory Nazianzen, unless in these it is included under some other book, as Ruth, or Esdras (see Whitaker, Deut. on H. Scrip. Park. Soc. 57, 58; Cosin on the Oraun of Scr. p. 49, 50; Origen, Origen. diveras.); and early enough in his Ep. to Africanus (Opp. i. 14). He defends the canonicity of these Greek additions, though he admits they are not in the Hebrew. His sole argument, unworthily of a great scholar, is the use of the LXX. in the churches, an argument which embraces equally all the apocryphal books. Africanus, in his Ep. to Origen, had made the being in the Hebrew essential to canonicity, as Jerome did later. The Council of Trent pronounces the whole book of Esther to be canonical, and Vatutus says that prior to that decision it was doubtful whether or no

a He is the same as is frequently mentioned in 1 Macc. i. c. v. 57, xi. 12; cf. Joseph. Ant. xiii. 4, § 1, § 5, and Clinton, P. H. iii. p. 338. Dositheus seems to be a title or the name of an elder by whom Ptolemy was also a common name for Jews at that time.

b The position of the book of Esther in the Vatican manuscript is very different from that which was in the Vatican, or rather, Roman edition (1557), namely, the Esthian edition and Nehemiah (united in one book as 24 Esdras) are immediately followed by the whole series of poetical books (as distinguished from the prophetic), namely, Psalms, Proverbs, Ecclesiastes, Canticles, Job, Wisdom of Solomon, Ecclesiastics. Thus come Esther, Judith, Tobit, four books, instead of by the manner of the LXX., by the divisions of the prophets. (See further, under Baha, p. 395, note e, Amer. ed.). The Codex Friderico-Augustus is a part of the same manuscript as the Codex Sinaiticus, published by Tischendorf in 1832. A. A. 1587. The position of Esther, or sixth of Esdras, as it is placed in some of the most ancient copies of the Vulgate.—Lee's Dissert. on 21 Esdras, p 25
Esther was to be included in the Canon, some authors affirming, and some denying it. He afterwards qualifies the statement by saying that at all events the seven last chapters were doubtfull. Sixtus Severus, in spite of the decision of the Council, speaks of these additions, after the example of Jerome: "He may have, in accordance with Scriptores, tamuturitas," and thinks that they are only partially and chiefly derived from Jospehus, but this last opinion is without probability. The manner and the order in which Jospehus cites them (Ant. xi. 6) show that they had already in his days obtained currency among the Hellenistic Jews as portions of the book of Esther; as we know from the way in which he cites other apocryphal books that they were current likewise, with others which are now lost. For it was probably from such that Jospehus derived his stories about Moses, about Samson, and the temple on Mount Gerizim, and the meeting of the high-priest and Alexander the Great. But these, not having happened to be bound up with the LXX, perished. However, the marvellous purity with which the Hebrew Canon has been preserved, under the providence of God, is brought out into very strong light, by the contrast of the Greek volume. Nor is it uninteresting to observe how the regularity of their national character, by the Alexandrian Jews, implied in the adoption of the Greek language and Greek names, seems to have been accompanied with a less jealous, and consequently a less trustworthy guardianship of their great national treasures, the "oracles of God."

Fritzsche, "Zwanzig zuach ibot Esther" (in Kusserwitz's comm. Homb. ad. das Alte T., Lief. i. (1851)); Baunegartn, de Fide Lih, Estherne [Hal. Sax. 1838].

A. C. H.

* M. Baumgarten, the author of the treatise de Fide Lih, Esther, &c., has an excellent article on the same subject in Herzog's Real-Encycl. iv. 177-185 (1855). We make room for his suggestions. In respect to the omission of the name of God in the book, he remarks that it is the less surprising, because it occurs in a history which is so full of interpositions, revealing the actual presence of Him who presides over the destiny of man and nations, and also the power of that faith in the unseen One, which made the actors in this drama so hopeful, enduring, and triumphant. The historical credibility of the events related in the book is well attested, and at present generally acknowledged (see Win. Refl. Realb. i. 350). Prof. Stuart says very truly: "The fact that the feast of Purim has come down to us from time almost immemorial ... proves as certainly that the main events related in the book of Esther happened, as the Declamation of Independence and the celebration of the birthday of Jefferson proves that we separated from Great Britain, and became an independent nation. ... The book of Esther was an essential document to explain the feast of Purim." See his History and Defence of the O. T. Canan, p. 357. [Purim.] It is interesting to observe the self-asserting character of truthfulness which the Scripture narrative assumes as expanded and illustrated from contemporary sources in Dean Milman's sketch of the events (History of the Jews, i. 472-477, 2nd ed.).

The later commentators or expositors are Benedict De Bicher Enoc, Neukom u. Uter, Textkrit. (1852; Lieut. xii. of the Kursys-, cegs. Handb. zum A. T.), containing, with a commentary, a full critical introduction to the book: Oppert, Coment. hist. et phil. du Livre d'Esther, d'apres la lecture des inscriptions peres (Paris, 1849), a small pamphlet on the history of Esther in his Holy Bible, with Notes and Introductions, iii. 367-384 (1896); and A. D. Davidson, Lectures, Expository and Practical, on the Book of Esther (Edin. 1830). Bishop Hall (Concernments, &c., bk. xxii.) has five discourses founded on portions of this suggestive history. Dr. Thomas McCrie's Lectures on the Book of Esther (Edin. 1838), are commended by Prof. Douglas (art. Esther in Fairbairn's Imp. Bible Dict.) for ''comprehensiveness, brevity, and succinctness."

On the critical questions connected with the book, and for different opinions respecting its character, the reader may further consult Hüberncr, Handb. der Einl. in das A. Test. ii. 361 ff., translated, with additions from other sources, in the Christian Rer. for Sept. 1848; Keil, Lehrb. d. histor. Krit. Einl. u. s. w., 2nd. Ed. pp. 487-489; Hobk, Einl. in das A. Test. pp. 403-409; Erskal, Geschichte der Völker des v. 2. A. T. (S. Altenburg); Gesch. d. Völker's Histor. 1, 148-211; and others. The entire text of the Old Testament has been translated into the English language by the Rev. William and the Rev. John Holdich, in four large folio volumes. The text is the one to which the LXX., as quoted by the Septuagint, refers. The practical life of the people is treated in the Books of Esther and Daniel, in a series of Historical Sketches, for the use of Sunday Schools, and the general public. The subjects treated are of a nature specially adapted to the instruction and edification of the young, and to the promotion of moral and religious knowledge. The book of Esther is designed to give a consistent and comprehensive view of the history of the Jewish nation, and to illustrate the famous passage in the Epistle of Peter, which is the subject of the following part of the book. (See Peter, ch. 3:5, 6."

ETAM (in the world of wild beasts): Airdr. [Comp. "Arda'; Abd. "Arda';] Giam. 1. A village (7747) of the tribe of Simeon, specified only in the list in 1 Chr. iv. 32 (comp. Josh. xix. 7); but that it is actually introduced here appears from the fact that the number of places is summed as five, though in the parallel list as four. The cities of Simeon appear all to have been in the extreme south of the country (see Joseph. Ant. v. 1, § 22). Different from this, therefore, was:—

2. [Ardr. = T Amr; Alex. Ardr. Comp. "Arda';] A place in Judah, fortified and garrisoned by Rebosam (2 Chr. xii. 6). From its position in this list we may conclude that it was near Bethel and Tekoa; and in accordance with this is the statement of Josephus, that the two cities which the LXX. insert in the text of Josh. xvi. 60, "Theeea and Ephratha which is Bethel's, Phago and Aitun (Ethun)."

Reasons are shown below for believing it possible that this may have been the scene of Samson's residence, the cliff of Ephraim being one of the numerous bold eminences which abound in this part of the country; and the spring of Elah, which is in the same or the next county. In Ephraim, and in the Talmudists, were the sources of the water which Solomon's gardens and pleasure-grounds were fed, and Bethel and the Temple supplied. (See Lightfoot, on John v. 3.)

3. [Ardr. = Tat: comp. "Arda';] A name occurring in the lists of Judah's descendants (1 Chr. iv. 3), but probably referring to the place mentioned above, i.e., Bethel and the Temple. (See Lightfoot, on John v.)

ETAM, THE ROCK (καιρος θαυματουργος; πνπερν Haedu, for Alex, see below; Joseph. Ardr. Peter, and Acts. Peter, a cliff or lofty rock (now seems to be the special force of ΕΤΑΜ) into a cliff.
ETHAM [ΑΕΑΜ, from the Coptic αἴαμ, "boundary of the sea," Jablonski: Ex. xxii. 20, 21, 27; Alex. Odogi: Num. xxxiii. 6, 7; Bouddé: Ethan.]. [Exodus, The.]

ETHAN [ΕΘΑΝ, firm, strong; Ραδαβ: [in 1 Chr. and Ps.] Aïtdù [Alex. Αδαβ, and so Vat. and Sin. in Ps.]: Ethan]. The name of several persons. 1. ETHAN THE EXRÁHITE, one of the four sons of Mahol, whose wisdom was excelled by Solomon (1 K. iv. 31). His name is in the title of Ps. lxix. There is little doubt that this is the same person who in 1 Chr. ii. 6 is mentioned — with the same brothers as before — father of Zerah, the son of Judah. [DARDÁ: EXRÁHITE]. But being a son of Judah he must have been a different person from...

ETHER [ΕΘΕΡ, abundance; ιδας, ιδεφ: Alex. Aφφ [Alex. Αδαβ?, Béde: [Comp. Aφφ, Béde: Abb. Αδαβ, Eber: Ether, After], one of the cities of Judah in the low country, the Shefeláh (Josh. xiv. 42) allotted to Simon (viii. 7). In the parallel list of the towns of Simon in 1 Chr. iv. 32, Tochén is substituted for Ether. In his Omonasticon Eusebius mentions it twice, as Ether and as Jethér (in the latter case confounding it with Jattith, a city of priests and containing friends of David during his troubles under Saul). It was then a considerable place (κεραυν μεγίστη), retaining the name of Jethur or Jethur, near Mahalath in the interior of the district ofbara, that is in the desert country below Hébron and to the east of Beer-sheba. The name of Ether has not yet been identified with any existing remnant; but Van de Velde heard of a Tel Athar in this direction (Memor, p. 311).

ETHIOPIA [ΕΘΙΟΠΙΑ; Αιθιοπία; Αθηνία]. The country, which the Greeks and Romans described as "Ethiopia" and the Hebrews as "Cush" lay to the S. of Egypt, and embraced, in its most extended sense, the modern Nub, Sommar, Kordofan, and northern Abyssinia, and in its more definite sense the kingdom of Me'rc, from the junction of the Blue and White branches of the Nile to the border of Egypt. The only direction in which a clear boundary can be fixed is in the N., where Syene marked the division between Ethiopia and Egypt (Ex. xxviii. 19): in other directions the boundaries can be only generally described as the Red Sea on the E., the Libyan desert on the W., and the Assyrian highlands on the S. The name "Ethiopia" is probably an adaptation of the native Egyptian name "Edfrush," which bears a tolerably close resemblance to the gentle form "Ethrips," the Greeks themselves regarded it as expressive of a dark complexion (from αίθω, "to burn," and ως, "a countenance"). The Hebrews transformed the ethnical designation "Cush"...

a There is some uncertainty about the text of this sentence. the Hebrew.

THE FOREST [ΤΟ ΓΟΛΟΝτ], before the mention of the rock [ιε τον απολασθα Ήρατ]. In ver. 11 the reading agrees with the Hebrew.
into a territorial one, restricting it, however, in the latter sense to the African settlements of the Cushite race. [C'y-sx.] The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were only indirectly aware of it (Ez. xxix. 10); and they describe it as a well-watered country lying "by the side of" (A. V. "beyond") the waters of Cush (Is. xviii. 1; Zeph. iii. 10), being traversed by the two branches of the Nile, and by the Astaboras or Toscace. The Nile descends with a rapid stream in this part of its course, forming a series of cataracts: its violence seems to be referred to in the words of Is. xviii. 2, "whose land the rivers have spoiled." The Hebrews seem also to have been aware of its tropical characteristics, the words translated in the A. V. "the land shadowing with wings" (Is. xvi. 1) admitting of the sense "the land of the shadow of both sides," the shadows falling towards the north and south at different periods of the year—a feature which is noticed by many early writers (comp. the expression in Strabo, ii. p. 163, ὑδατορίαν: Verg. Æl. v. 68: Plin. ii. 73). The papyrus boats (vessels of bulrushes), Is. xviii. 2, which were peculiarly adapted to the navigation of the Upper Nile, admitting of being carried on men's backs when necessary, were regarded as a characteristic feature of the country. The Hebrews carried on commercial intercourse with Ethiopia, its "merchandise" (Is. xiv. 14) consisting of ebony, ivory, frankincense and gold (Herod. iii. 97, 114), and precious stones (Job xxviii. 19; Joseph. Ant. xvii. 6, § 5). The country is for the most part mountainous, the ranges gradually increasing in altitude towards the S., until they attain an elevation of about 8000 feet in Abjungia.

The inhabitants of Ethiopia were a Hamitic race (Gen. x. 6), and are described in the Bible as a dark-complexioned (Jer. xiii. 23) and stalwart race (Is. xiv. 14, "men of stature," xviii. 2, for "scattered," substitute "tall"). Their stature is noticed by Herodotus (iii. 20, 114), as well as their handsomeness. Not improbably the latter quality is intended by the term in Is. xviii. 2, which in the A. V. is rendered "peeled," but which rather means "fine-looking." Their appearance led to their being selected as attendants in royal households (Jer. xxxvii. 7). The Ethiopians are on one occasion coupled with the Egyptians, as occupying the opposite shores of the Red Sea (2 Chr. xxi. 16); but elsewhere they are connected with African nations, particularly Egypt (Is. xviii. 31; Is. xx. 3, 4, xxii. 3, xlv. 11). Phut (Jer. xvi. 9), Lub and Lud (Ez. xxx. 5), and the Sukkian (2 Chr. xii. 3), were divided into various tribes, of which the Sudanese were the most powerful. [SERA; SCK- SIAN.] The history of Ethiopia is closely interwoven with that of Egypt. The two countries were not infrequently united under the rule of the same sovereign. The first Egyptian king who governed Ethiopia was one of the Xth dynasty, named Qarstassen I. the Se-sorres of Herod. ii. 110. During the occupation of Egypt by the Hyksos, the Xth dynasty retired to the Ethiopian capital, Napata; and again we find the kings of the XVIIIth and XIXth dynasties exercising sway temporarily over Ethiopia, and erecting numerous tombs, the ruins of which still exist at Semna, Amada, Sabt, Alexandria, and Jebel Barkal. The tradition of the successful expedition of Moses against the Ethiopians, recorded by Josephus (Ant. ii. 10), was doubtless founded on the general superiority of the Egyptians over the Ethiopians at that period of their history. The XXIst dynasty still held sway over Ethiopia, as we find Ethiopians forming a portion of the Egyptian army (2 Chr. xii. 9), and his successor Thorkon appears to have described himself as the "Ethiopian" (2 Chr. xiv. 9). The kings of the XXVth dynasty were certainly Ethiopians, who ruled the whole of Upper Egypt, and at one time Lower Egypt also, from their northern capital, Napata. Two of these kings are connected with sacred history, namely, So, probably Sobekchis, who made an alliance with Hoshea king of Israel (2 K. xvii. 4), and Tirilakah, or Tocose, who advanced against Semachiber in aid of Hezekiah king of Judah (2 K. xix. 9). The prophets appear to refer to a subjection of Ethiopia by the Assyrians as occurring about this period (Is. xx. 4), and particularly to the capture of Thebes at a time when the Ethiopians were among its defenders (Nah. iii. 8, 9). We find, in confirmation of these notices, that Esar-haddon is stated in the Assyrian inscriptions to have conquered both Egypt and Ethiopia. At the time of the conquest of Egypt, Cambyses advanced against Merenr' and subdued it; but the Persian rule did not take any root there, nor did the influence of the Persians generally extend beyond northern Ethiopia. Shortly before our Saviour's birth, a native dynasty of females, holding the official title of Candace (Plin. vii. 35), held sway in Ethiopia, and even resisted the advance of the Roman arms. Two of these, the queen noticed in Acts viii. 27. [CANDACE.] W. L. B.

**ETHIOPIAN (אתיופיה: Aethiopia).** Properly "Cushite" (Jer. xxxii. 21); used of Zerah (2 Chr. xiv. 9 [8]), and Eked-melech (Jer. xxxvii. 7, 10, 12, xxxix. 16).* W. L. W. *

* ETHIOPIAN EUNUCH, baptized by the Evangelist Philip on the way between Jerusalem and Gaza (Acts viii. 26 f.). [BETZ-UN.] Whether he was an Ethiopian by birth, or a Jew who lived in Ethiopia (comp. Acts ii. 10), has been disputed. The sense of Aithiophes (same verse) belongs naturally to Aithiophes, as applied to the eunuch, and in that case the latter must refer to his Gentile extraction. It was customary for prospelytes, as well as foreign Jews, to repair to Jerusalem for worship at the great festivals (see John xii. 20: Acts ii. 10). He was no doubt a eunuch in the strict import of that word, and not in its secondary or official sense as denoting a minister of state or courtier merely; for in the latter case, διαδεσμης, which follows would be superfluous. His office under Candace (which see) as treasurer or chamberlain (ἐξω ταξιαν της γαλαξα) was one of high rank. The Ethiopian was reading one of the most remarkable of the Messianic predictions when Philip overtook him. It is not improbable that he had heard, at Jerusalem, of the death of Jesus and the attendant miracles, of the claim put forth by the crucified one to be the Messiah, and of the existence of a numerous party who acknowledged him in that character. Hence he may have been

---

* In Acts viii. 27, Aithiophes is strictly "Ethiopian" and not "man of Ethiopia" (A. V.). See Candace. H.
ETHIOPIAN WOMAN (Ὑπωρεία: Αἰθιοπινοεία: Αἰθιοπίστης). Zipparoth, the wife of Moses, is so described in Num. xii. 1. She is elsewhere said to have been the daughter of a Midianite, and in consequence of this Ewald and others have supposed that the alliance is to another wife whom Moses married after the death of Zipparoth.

W. A. W.

ETHIOPIANS (Ἐθιοπίας, Is. xx. 4; Jer. xlvii. 9; Ψωφίς: Αἰθιοπίας: Αἰθιοπίστης). Properly "Cush" or "Ethiopia" in two passages (Is. xx. 4; Jer. xlvii. 9). Elsewhere "Cushites," or inhabitants of Ethiopia (2 Chr. xii. 3, xiv. 12 [11], 13 [12], xvi. 8, xvi. 16; Dan. xi. 13; Am. ix. 7; Zeph. ii. 12 [Acts viii. 27]). [ETHIOPIANS.]

W. A. W.

ETH'NAA (Ἐθνα; [Vat. Omoa] Alex. Νομός; τοιοῦτοι; [Psal.] 1 Esth. ix. 25: apparently a corruption of Νηδο in the parallel list of Ezra x. 43).

ETH'NAN (Ἐθνάν [ο lebih]; [Psal. Comp. Esth. K] Alex. Εθνάδι: Εθνάνι, a descendant of Judah; one of the sons of Helah the wise of Asher, "the father of Tekoa": (1 Chr. iv. 7). [ETHNARCH]

W. C. (2 Cor. xi. 32). [GOVERNORS, 11.]

ETH'NI (Ἑθνῶν [μικροίς]; ΑἸθιοπίας; [Vat. Σασαλάς: Comp. Εθνάνι] Alex. Εθνάδι: Εθνάνιον, a Gersomite Levite, one of the forefathers of Asaph the singer (1 Chr. vi. 41, Hel. 26).

EU'BULUS (Εὔβουλος [of good counsel, praiseworthy], a Christian at Rome mentioned by St. Paul (2 Tim. iv. 21).

EU'GERETES (Εὐγερήτης, a benefactor: Πολεμικοί Ευγερήτες), a common surname and title of honor (cf. Plato, Gorg. p. 506 c, and Stath. ed loc.) in Greek states, conferred at Athens by a public vote (Dem. p. 475), and so noteworthy as to pass into a proverb (Lukas xxii. 25). The title was borne by two of the Ptolemies, Ptol. III., Eugeeretes I., n. c. 247-222, and Ptol. VII., Eugeeretes II., n. c. (170) 146-117. The Eugeeretes mentioned in the prologue to Ecclesiasticus has been identified with each of these, according to the different views taken of the history of the book. [ECCLESIASTICS: JESUS SON OF SARAC.]

B. F. W.

EU'MENES II. (Εὐμένες [well-disposed, kind]), king of Pergamus, succeeded his father Attalus I, n. c. 197, from whom he inherited the power and alliance of the Romans. In the war with Antiochus the Great he rendered the most important services to the growing republic; and at the battle of Magnesia (n. c. 190) commanded his contingent in person (Just. xxxii. 8, 5; App. Syr. 34). After peace was made (n. c. 189) he repaired to Rome to claim the reward of his loyalty; and the Senate conferred on him the provinces of Lydia, Lydia, and Ionia (with some exceptions), Phrygia, Lycoania, and the Thracian Chersonese (App. Syr. 44; Polyb. xxxii. 7; Liv. xxxviii. 56). His influence at Rome continued uninterrupted till the war with Persia, when he is said to have entertained reasonable correspondence (Liv. xxiv. 24, 25); and after the defeat of Persia (n. c. 167) he was looked upon with suspicion which he vainly endeavored to remove. The exact date of his death is not mentioned, but it must have taken place in n. c. 159.

The large accession of territory which was granted to Eumenes from the former dominions of Antiochus is mentioned 1 Macc. viii. 8, but the present reading of the Greek and Latin texts offers insuperable difficulties. "The Romans gave him," it is said, "the country of India and Media, and Lydia and parts of his (Antiochus) finest countries (ἀπὸ τῶν καλλ. χωρῶν αὐτοῦ)." Various conjectures have been proposed to remove these obvious errors; but though it may be reasonably allowed that Lydia may have stood originally for Media (Ὑπωρεία for Μήδια, Michelle), it is not absolutely easy to explain the origin of χωρῶν τίνων Ἰθιοπίας. It is barely possible that Ἰθιοπίας may have been substituted for Ιουνίας after Μήδια was already established in the text. Other explanations are given by Gresch, Epe. Hiram, Isenbr. De temp. Lib. 1, xvi. 1, p. 56 ff.: but they have little plausibility.

B. F. W.

EU'NATAN (Εὐνατάν; Alex. Εὐνατάν; Εὐνατάμος), 1 Esth. viii. 44. [EUNATAN.] * This form of the name in the A. V. may be a mere misprint for Eumatan, the reading of the Genevan version and the Bishops' Bible.

EUNICE (Εὐνίκη [happily victorious]), mother of Timothes, 2 Tim. i. 5: there spoken of as possessing unfeigned faith: and described in Acts xvi. 1, as a γυνὴ Ιουδαίας πιστῆς.

H. A.

EUNUCH (Ἑνυχός, θαλάσσιος, σπέρμα; variously rendered in the A. V. "eunuch," "officer," and "chamberlain," apparently as though the word intended a class of attendants who were not always mutilated). The original Hebrew word (root Arab. "יאקע) impotens esse ad venenum, Gesen. s. v.) clearly impiles the incapacity which mutilation involves, and perhaps includes all the cases mentioned in Matt. xix. 12, not signifying, as the Greek εὐνοχὸς, an office merely. The law, Deut. xxii. 1 (comp. Lev. xxii. 24), is reparable to thus treating any Israeldite; and Samuel, when describing the arbitrary power of the future king (1 Sam. viii. 15, marg.), mentions οἱ εὐνοχοί, but does not say that he would make "their sons" such. This, if we compare 2 K. xx. 18; Is. xxxix 7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (Herod. iii. 49, vi. 32), not only of tender age (when a non-development of beard, and feminine mould of limbs and modulation of voice ensues), but, it should seem, when past puberty, which there occurs at an early age. Physiological considerations lead to the supposition that...
in the latter case a remnant of animal feeding is left: which may explain Deut. xxv. 29 (comp. Juv. vi. 300, and Mart. vii. 67), Philostr. Trav. i. 37; Ter. Eun. iv. 3, 24), where a sexual function, though triteless, is implied. Buse- lequius (I. P. iii. 122, Ox. 1669) seems to ascribe the absence or presence of this to the total or partial character of the mutilation: but modern surgery would rather assign the earlier or later period of the operation as the real explanation. It is total among modern Turks (Tournier, ii. 8, 9, 10, ed. Paris, 1717; bowels a fleur de rote); a precaution against a mixed ignorance and jealousy. The "officer" Potiphar (Gen. xxxvi. 36, xxxvii. 1, marg. "eunuch") was an Egyptian, was married, and was the "captain of the guard:" and in the Assyrian monuments an eunuch often appears, sometimes armed, and in a warlike capacity, or as a scribe, noting the number of heads and amount of spoil, as receiving the prisoners, and even as officiating in religious ceremonies (Layard, Nineveh. ii. 324–5, 334). A blated hairless face and double chine is there their conventional type. Chardin (Voyages en Perse, ii. 283, ed. Amsterdam, 1711) speaks of eunuchs having a harem of their own. If Potiphar had become such by operation for disease, by accident, or even by malice, such a marriage seems, therefore, according to Eastern notions, possible. (See Gresyn on Deut. xxvii. 1, comp. Burekhardt, Trad. i. in Arabi. i. 290.) Nor is it wholly repugnant to that barbarous social standard to think that the prospect of rank, honor, and royal confidence, might even induce parents to thus treat their children at a later age, if they showed an aptness for such preferment. The characteristics as regards beard, voice, &c., might then perhaps be modified, or might gradually follow. The Potiphars of Gen. xlix. 50, whose daughter Joseph married, was "priest of On," and no doubt a different person.

The origin of the practice is ascribed to Semiramis (Ann. Marcell. iv. 6), and is no doubt as early, or nearly so, as eastern despotism itself. Their incapacity, as in the case of nations, is the ground of reliance upon them (Charke's Travels, part ii. § 1, 13; Buseleq. I. P. i. 35). By reason of the mysterious distance at which the sovereign sought to keep his subjects (Herod. i. 90), comp. Esth. iv. 11), and of the malignant jealousy fostered by the deliberate neglect of the courtiers, such wretches, detached from social interests and hopes of issue (especially when, as commonly, and as amongst the Jews, foreigners), the natural slaves of either sex (Esth. iv. 5), and having no prospect in rebellion save the chance of masters, were the fittest props of a government resting on a servile relation, the most complete ēgrava éμανθαι of its despotism or its lust, the surest blot seen in the history of the ancient monarchs (Xenoph. Cyrop. vi. 5; § 13; Herod. viii. 165) of the monarch's person, and the sole confidential witnesses of his unguarded or malignanted moments.

Hence they have in all ages frequently risen to high offices of trust. Thus the "chief" or one of the cupbearers of the court of Nebuchadnezzar was as being near his person, though their inferior agents need not have been so (Gen. xl. 1). The complete assimilation of the kingdom of Israel, and latterly of Judah, to the neighboring models of despotism, is traceable in the rank and prominence of eunuchs (2 K. viii. 6, ix. 32, xiii. 11, xiv. 19; Is. lvi. 4, 14; Jer. xxix. 2, xxxiv. 19, xxxviii. 7, xii. 16, li. 25). They mostly appear in one of two relations, either military as "set over the men of war," greater trustworthiness possibly counterbalancing inferior courage and military vigor, or associated, as we mostly recognize them, with women and children. We find the Assyrian Rab-Sar, or chief eunuch (2 K. xviii. 17), employed together with other high officials as ambassador. Similarly, in the details of the travels of an embassy sent by the Duke of Holstein (p. 136), we find a eunuch mentioned as sent on occasion of a state-marriage to negotiate, and of another (p. 273) who was the Melecho, or chamberlain of Shah Abbas, who was always near his person, and had his ear (comp. Chardin, iii. 37), and of another, originally a Georgian prisoner, who officiated as supreme judge. Fryer (Travels in India and Persia, 1658) and Chardin (ii. 283) describe them as being the base and ready tools of licentiousness, as tyrannical in human, and pertinacious in the authority which they exercise; Charke (Travels in Europe, &c., part ii. § 1, p. 22), as chafed and ridiculed by those whom it is their office to guard. A great number of them accompany the Shah and his ladies when hunting, and no one is allowed, on pain of death, to come within two leagues of the field, unless the king sends an eunuch for him. So eunuchs ran before the closed carriages of the sultans when advancing, to cut off all to keep at a distance. This illustrates Esth. i. 10, 12, 15, 16, ii, 3, 8, 14.

The moral tendency of this sad condition is well known to be the repression of courage, gentleness, shame, and remorse, the development of malice, and often of melancholy, and a disposition to suicide. The favorable description of them in Xenophon (l. c.) is overcharged, or at least is not confirmed by modern observation. They are not more liable to disease than others, unless of such as often follow the foul vices of which they are the tools.

The operation itself, especially in infancy, is not more dangerous than an ordinary amputation. Chardin (ii. 285) says that only one in four survives; and Cohl Rev. chief physician of the Pasha, states that two thirds die. Burekwardt, therefore (Neb. p. 329), is mistaken, when he says that the operation is only fatal in about two out of a hundred cases.

It is probable that Daniel and his companions were thus treated, in fulfillment of 2 K. xx. 17, 18; Is. xxxix. 7; comp. Dan. i. 3, 7. The court of Herod of course had its eunuchs (Joseph. Ant. xvi.

a The Jewish tradition is, that Joseph was made a eunuch on his first introduction to Potiphar, and yet the tradition of Potiphar's wife, his marriage and the birth of his children, are related subsequently without any explanation. See Targum Pseudo-Jon on Gen. xxxix. 1, xlii 50), and the details given at xxxix. 13.

b Wilkinson (Anc. Egypt. ii. 61) denies the use of eunuchs in Egypt. Herodotus, indeed (vii. 21), con- firms his statement as regards Egyptian monogamy; but if this as a rule applied to the kings, they seem at any rate to have allowed themselves concubines (i. 181). From the general beardless character of Egyptian heads it is not easy to pronounce whether any eunuchs appear in the sculptures or not. The Assyrians. 2 Th. xxii. 1, 1, is remarkable as ascribing eunuchs to the period of David, nor can it be doubted that Solomon's polygamy made them a necessary con- sequence; but in the state they do not seem to have played an important part at this period.
EUPHRATES

EUPHRAITH ( עצמי : Euphrates: Euphrates) is probably a word of Arayan origin, the initial element being 'a', which is in Sanscrit sa, in Zend ha, and in Greek of: and the second element being 'rat', the particle of abundance. The Euphrates is thus "the good and abounding river." It is not improbable that in common parlance the name was soon shortened to its familiar form of Frat, which is almost exactly what the Hebrew iteration expresses. But it is most frequently denoted in the Bible by the term תַּחַל, tanahâh', i.e. "the river," the river of Asia, in grand contrast to the short-lived torrents of Palestine. (For a list of the occurrences of this term, see Stanley, S. & P. App. § 34).

The Euphrates is the largest, the longest, and by far the most important of the rivers of western Asia. It rises from two chief sources in the Armenian mountains, one of them at Domihi, 25 miles N. E. of Erzeroum, and little more than a degree from the Black Sea; the other on the northern slope of the mountain range called Al-Tagh, near the village of Dizvode, not far from Mount Ararat. The former, or Northern Euphrates, has the name Frat from the first, but is known also as the Kura-Su (Black River); the latter, or Southern Euphrates, is not called the Frat but the Murad Chai, yet it is in reality the main river. Both branches flow at first towards the west or southwest, passing through the wildest mountain-districts of Armenia; they meet at Kebben-Maden, nearly in long. 40° E. from Greenwich, having run respectively 400 and 270 miles. Here the stream formed by their combined waters is 120 yards wide, rapid, and very deep: it now flows nearly southward, but in a tortuous course, forcing a way through the ranges of Taurus and Anti-Taurus, and still seeming as if it would empty itself into the Mediterranean; but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance from it: the river at last dissects it from its bed, and in about 280 turns towards the southeast, and proceeds in this direction for above 10,000 miles to its embouchure in the Persian Gulf. The last part of its course, from Hit downwards, is through a low, flat, and alluvial plain, on which it has a tendency to spread and stagnate; above Hit, and from thence to Samocet (Samosata), the country along its banks is for the most part open but hilly; north of Samocet, the stream runs through a narrow valley among high mountain- sius, and is interrupted by numerous rapids. The entire course is calculated at 1780 miles, nearly 650 more than that of the Tigris, and only 200 more of that of the Indus; and of this distance more than two thirds (1200 miles) is navigable for boats, and even, as the expedition of Col. Chesney proved, for small steamers. The width of the river is greatest at the distance of 700 or 800 miles from its mouth—that is to say, from its junction with the Khabour to the village of Weroo. It there averages 400 yards, while lower down, from Weroo to Lamlum, it continually decreases, until at the last named place its width is not more than 12 yards, its depth having at the same time diminished from an average of 18 to one of 12 feet. The causes of this singular phenomenon are the entire lack of tributaries below the Khabour, and the employment of the water in irrigation. The river has also in this part of its course a tendency already noted, to run off and waste itself in marshes, which every year more and more cover the alluvial tract west and south of the stream. From this cause its lower course is continually varying, and it is doubted whether at present, except in the season of the inundation, any portion of the Euphrates water is poured into the Shat-el Arab.

EUODIA. [Euodias.]  

EUODIAS [Euodiasa, Steph., fragrant; Euov-  

sia, Ehr. Griseb. Lachm. Tisch., with all the uncial MSS., progr. aios.], a Christian woman at Philippi (Phil. iv. 2). The name, however, is correctly Euodia [as in the Greek vers.], that is, probably Euodiasa [in the Greek vers.], which is mentioned in the following verse by aires and aires.  

H. A.  

* The A. V. in Phil. iv. 3 does not bring out this relation of aires to the previous names. Instead of "help those women which labored," &c., the rendering should be "help them," i.e. the women before mentioned, "which labored," &c. The conjecture that Euodia may be the same woman (not the name) of 2 Tim. iii. 10, where the reader is not a Christian, cannot be proved or disproved. Most of those who recognize an order of deacons or prelates in the primitive church, think that Euodia belonged to that order. [Deaconess.]  

H.

EUPHRATES (및: Euphrates: Euphrates) is probably a word of Arayan origin, the initial element being 'a', which is in Sanscrit in, in Zend ha, and in Greek of; and the second element being rat, the particle of abundance. The Euphrates is thus "the good and abounding river." It is not improbable that in common parlance the name was soon shortened to its familiar form of Frat, which is almost exactly what the Hebrew iteration expresses. But it is most frequently denoted in the Bible by the term תַּחַל, tanahâh', i.e. "the river," the river of Asia, in grand contrast to the short-lived torrents of Palestine. (For a list of the occurrences of this term, see Stanley, S. & P. App. § 34).

The Euphrates is the largest, the longest, and by far the most important of the rivers of western Asia. It rises from two chief sources in the Armenian mountains, one of them at Domihi, 25 miles N. E. of Erzeroum, and little more than a degree from the Black Sea; the other on the northern slope of the mountain range called Al-Tagh, near the village of Dizvode, not far from Mount Ararat. The former, or Northern Euphrates, has the name Frat from the first, but is known also as the Kura-Su (Black River); the latter, or Southern Euphrates, is not called the Frat but the Murad Chai, yet it is in reality the main river. Both branches flow at first towards the west or southwest, passing through the wildest mountain-districts of Armenia; they meet at Kebben-Maden, nearly in long. 40° E. from Greenwich, having run respectively 400 and 270 miles. Here the stream formed by their combined waters is 120 yards wide, rapid, and very deep: it now flows nearly southward, but in a tortuous course, forcing a way through the ranges of Taurus and Anti-Taurus, and still seeming as if it would empty itself into the Mediterranean; but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance from it: the river at last dissects it from its bed, and in about 280 turns towards the southeast, and proceeds in this direction for above 10,000 miles to its embouchure in the Persian Gulf. The last part of its course, from Hit downwards, is through a low, flat, and alluvial plain, on which it has a tendency to spread and stagnate; above Hit, and from thence to Samocet (Samosata), the country along its banks is for the most part open but hilly; north of Samocet, the stream runs through a narrow valley among high mountain-sides, and is interrupted by numerous rapids. The entire course is calculated at 1780 miles, nearly 650 more than that of the Tigris, and only 200 more of that of the Indus; and of this distance more than two thirds (1200 miles) is navigable for boats, and even, as the expedition of Col. Chesney proved, for small steamers. The width of the river is greatest at the distance of 700 or 800 miles from its mouth—that is to say, from its junction with the Khabour to the village of Weroo. It there averages 400 yards, while lower down, from Weroo to Lamlum, it continually decreases, until at the last named place its width is not more than 12 yards, its depth having at the same time diminished from an average of 18 to one of 12 feet. The causes of this singular phenomenon are the entire lack of tributaries below the Khabour, and the employment of the water in irrigation. The river has also in this part of its course a tendency already noted, to run off and waste itself in marshes, which every year more and more cover the alluvial tract west and south of the stream. From this cause its lower course is continually varying, and it is doubted whether at present, except in the season of the inundation, any portion of the Euphrates water is poured into the Shat-el Arab.
EUPHRATES

The annual inundation of the Euphrates is caused by the melting of the snows in the Armenian highlands. It occurs in the month of May. The rise of the Tigris is earlier, since it drains the southern flank of the great Armenian chain. The Tigris, scarcely ever overflows (Hodgkin), but the Euphrates inundates large tracts on both sides of its course from Hit downwards. The great hydraulic works ascribed to Nebuchadnezzar (Abyden, Fr. 82) had for their great object to control the inundation by turning the waters through sluices into canals, prepared for them, and distributing them in channels over a wide extent of country.

The Euphrates has at all times been of some importance as furnishing a line of traffic between the East and the West. Herodotus speaks of persons, probably merchants, using it regularly on their passage from the Mediterranean to Babylon (Horal. i. 185). He also describes the boats which were in use upon the stream (i. 194) — and mentions that their principal freight was wine, which he seems to have thought was furnished by Armenia. It was, however, more probably Syrian, as Armenia is too small for the vine. Boats such as he describes, of wicker work, and seated with bitumen, or sometimes covered with skins, still abound on the river.

Alexander appears to have brought to Babylon by the Euphrates vessels of considerable size, which he had made in Cyprus and Phœnicia. They were so constructed that they could take to pieces, and were thus carried piece-meal to Tharsacus, where they were put together and harnessed (Aristol. ap. Strab. xvi. 1, § 11). The disadvantage of the route was the difficulty of conveying return cargoes against the current. According to Herodotus the boats which descended the river were broken to pieces and sold at Babylon, and the owners returned on foot to Armenia, taking with them only the skins (i. 194). Aristophanes, however related (ap. Strab. xvi. 3, § 3) that the Gerriones ascended the river in their rafts not only to Babylon, but to Tharsacus, whence they carried their wares on foot in all directions. The spices and other products of Arabia formed their principal merchandise. On the whole there are sufficient grounds for believing that the Babylonian and Persian periods this route was made use of by the merchants of various nations, and that by it the East and West continually interchanged their most important products. (See Layard's Nineveh and Babylon, pp. 536-37.)

The Euphrates is first mentioned in Scripture as one of the four rivers of Eden (Gen. ii. 14). Its celebrity is there sufficiently indicated by the absence of any explanatory phrase such as accompanies the names of the other streams. We next hear of it in the covenant made with Abraham (Gen. xlv. 18), where the whole country from the great river, the river Euphrates, to the river of Egypt is promised to the chosen race. In Deuteronomy and Joshua we find that this promise was borne in mind at the time of the settlement in Canaan (Deut. i. 7, xi. 21; Josh. i. 4); and from an important passage in the best text of Chronicles (iv. 6) it appears that the tribe of Reuben did actually extend itself to the Euphrates in the times inferior to Saul (1 Chr. v. 9). Here they came in contact with the Hagarites, who appear upon the middle Euphrates in the Assyrian inscriptions of the later empire. It is David, however, who seems for the first time to have entered on the full enjoyment of the promise, by the victories which he gained over Hadadezer, king of Zobah, and his allies, the Syrians of Damascus (2 Sam. viii. 3-5; 1 Chr. xviii. 3). The object of his expedition was "to recover his borders," and "to establish his dominion by the river Euphrates;" and in this object he appears to have been altogether successful: in somuch that Solomon, his son, who was not a man of war, but only inherited his father’s dominions, is said to have "reigned over all kingdoms from the river i.e. the Euphrates) unto the land of the Philistines and unto the border of Egypt" (1 K. iv. 21; compare 2 Chr. ix. 26). Thus during the reigns of David and Solomon the dominion of Israel actually attained to the full extent both ways of the original promise, the Euphrates forming the boundary of their empire to the northeast, and the river of Egypt (orveces. Egyptii) to the southwest. This wide-spread dominion was lost upon the disruption of the empire under Rehoboam; and no more is heard in Scripture of the Euphrates until the expedition of Necho against the Babylonians in the reign of Josiah. The "Great River" had meanwhile served for some time as a boundary between Assyria and the country of the Hitites (see Assyria), but had been repeatedly crossed by the armies of the Ninevite kings, who gradually established their sway over the countries upon its right bank. The Euphrates was always difficult; and at the point where certain natural facilities fixed the ordinary passage, the strong fort of Carchemish had been built, probably in very early times, to command the position. (See Assur.)

Hence, when Necho determined to attempt the permanent conquest of Syria, his march was directed upon "Carchemish by Euphrates" (2 Chr. xxxv. 29), which he captured and held, thus extending the dominion of Egypt to the Euphrates, and renewing the old glories of the Kassite kings. His triumph, however, was short-lived. Three years afterwards the Babylonians—who had inherited the Assyrian dominion in these parts—made an expedition under Nebuchadnezzar against Necho, defeated his army, "which was by the river Euphrates in Carchemish" (Jer. xvi. 2), and recovered all Syria and Palestine. Then the king of Egypt, surveying no more out of his kingdom, that of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt (2 K. xxiv. 7).

These are the chief events which Scripture distinctly connects with the "Great River." It is probably included among the "rivers of Babylon," by the side of which the Jewish captives are remembered Zion and exilis (Ps. cxxxvii. 1); and no doubt is glanced at in the threats of Jeremiah against the Chaldean waters and "springs," upon which there is to be a "drought," that shall "dry them up" (Jer. i. 38; li. 36). The fulfillment of these prophecies has been noticed under the head of Chaldea. The river still brings down as much water as of old, but the precious element is wasted by the neglect of man; the various water-courses which it formerly fed have been converted to use; the main channel has shrunk; and the water stagnates in unwholesome marshes.

It is remarkable that Scripture contains no clear and distinct reference to that striking occasion when, according to profane historians (Heral. i. 194; Xen. Cyrop. v. 5), the Euphrates was turned against its mistress, and used to effect the ruin of Babylon. The brevity of Daniel (v. 30-31) is per...
EUPOLEMSUS

EVANGELIST

R. N., observes, in his remarks on the Archipelago, that "it is always safe to anchor under the lee of an island with a northerly wind, as it dies away gradually, but it would be extremely dangerous with southerly winds, as they almost invariably shift to a violent northerly wind" (Purdy's Sailing Directory, pt. ii. p. 61). The long duration of the gale ("the fourteenth night," 27), the overclouded state of the sky ("neither sun nor stars appearing," 20), and even the heavy rain which concluded the storm (voty òmmp, xxviii. 2) could easily be matched with parallel instances in the voyages of Odysseus and Shipwreck, p. 144: Life and Epip. p. 412)

We have seen that the wind was more or less northerly. The context gives us full materials for determining its direction with great exactitude. The vessel was driven from the coast of Crete to CLAUDA (xxvii. 18), and apprehension was felt that she would be driven into the African Syrtis (ver. 17). Combining these two circumstances with the fact that she was less than half way from Fair Havens to Phoenice when the storm began (ver. 14), we come to the conclusion that it came from the N. E. or E. N. E. This is quite in harmony with the natural sense of Εὐσκόλιον (Europicli, Vulg.), which is regarded as the true reading by Bentley, and is found in some of the best MSS.; but we are disposed to adhere to the received Text, especially as it is the more difficult reading and the phrase used by St. Luke (Σημανία εὐσκόλιον) seems to point to some peculiar word in use among the sailors. Dean Alford thinks that the true name of the wind was εὐσκόλιον, but that the Greek sailors, not understanding the Latin termination, corrupted the word into εὐσκόλιον, and that so St. Luke wrote it. [WINDS.]

J. S. H.

EUTYCHUS (Εὐτυχος [Fortunate]), a youth at Troas (Acts xx. 9), who sitting in a window, and having fallen asleep while St. Paul was discussing far into the night, fell from the third story, and being taken up dead, was miraculously restored to life by the Apostle. Paul spoke this discourse, θυρίαν κεπρώσες, and the proceedings of St. Paul with the body (cf. 2 K. iv. 34), forbid us for moment to entertain the view of De Wette, Meyer and Olshausen, who suppose that animation was merely suspended.

H. A.

* In his later editions (Apostelgeschichte, 1854 and 1861), Meyer discards his earlier opinion, and declares fully that Eutychus was killed by the fall, and hence was restored to life by a miracle. We may add that the window, out of which the sleeper fell, projected (according to the side of the house where the window was) either over the street or over the interior court; and hence, in either case, he fell from "the third story" upon the hard earth or pavement below. The lamentation of those present (θυρίαν κεπρώσες, and see Mark v. 38) shows that they considered him dead, which is also the antithesis suggested by ἄνωτα in ver. 12.

H.

EVANGELIST. The constitution of the Apostolic Church included an order or body of men known as Evangelists. The absence of any detailed account of the organization and practical working of the church of the first century leaves us in some uncertainty as to their functions and positions.

The meaning of the name, "εὐαγγελισταῖς," seems common to the work of the Christian ministry generally, yet in Eph. iv. 11 the εὐαγγελισταῖ οὖν appear on the one hand after

EVANGELIST or have on (n3r7!2i^ a systematic nuous, mighty immediate that fore exercises up^he the pressed of And rather ist." might pel probably St. longe longer connected with who interpreted. Paul's connected with those who have written the city, was gained among the preaching, which were brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which he fashioned into a woman, and brought her to the man. Various explanations of this narrative have been offered. Perhaps that which we are chiefly intended to learn from it is the foundation upon which the union between man and wife is built, namely, identity of nature and oneness of origin.

Through the subtlety of the serpent, Eve was beguiled into a violation of the one commandment which had been imposed upon her and Adam. She took of the fruit of the forbidden tree and gave it her husband (comp. 2 Tim. ii. 13, 14). [ADAM.] The different aspects under which Eve regarded her mission as a mother are seen in the names of her sons. At the birth of the first she said "I have gotten a man from the Lord," ["with Jehovah," i. e. his aid?] or perhaps, "I have gotten a man, even the Lord," mistaking him for the Redeemer. When the second was born, finding her hopes frustrated, she named him Abel, or vanity. [Abel.] When his brother had slain him, and she again bore a son, she called his name Seth, and the joy of a mother seemed to outweigh the sense of the vanity of life; "For God," said she, "hath appointed me another seed instead of Abel, for Cain slew him." The Scripture account of Eve closes with the birth of Seth. S. L.

EVI ("S [chei]: Evi; [Vat. Evii, and so Alex. in Nurn.] evi, Horun), one of the five kings of Midian, slain by the Israelites in the war after the matter of Zal-peon, and whose lands were afterwards allotted to Reuben (Num. xxxi. 8; Josh. xiii. 21). [MIDIAN.] E. S. P.

* EVIDENCE (Jer. xxxii. 10 ff.) means "[11] of sale" (f&Uz(wp), mentioned repeatedly in
EVIL-MERODAC

H. (excellent") and the vineyard, and "fields and vineyards should again be possessed in the land" (Jer. xxiii. 15). II.

EVIL-MERODAC (Ειλαμαρδαχ)  Ενιαυεοεξάκενος [Val. -εξάκενος, [Alex. Εγιαμαρδαχ, Ωφαωαοεξάκενος; F.A. in Jer. Ωφαωαοεξάκενος Ωφαωαααδάχανεν: Abid., Αμιαμαρδαχ,os: Be- rons Ενιαμαρδαχ,os, Ευλαμαρδαχ,os) according to Berossus and Abydenus, was the son and successor of Nebuchadnezzar. We learn from the second book of Kings (2 K. xxv. 27) and from Jeremiah (Jer. lii. 31), that in the first year of his reign this king had compassion upon his father's enemy, Jehoiachin, and released him from prison where he had languished for thirty-seven years, "spake kindly to him," and gave him a portion at his table for the rest of his life. He reigned but a short term, hav- ing ascended the throne on the death of Nebuchad- nezzar in B. c. 561, and being himself succeeded by Neriglissar in B. c. 559. (See the Canon of Polyeon, given under BABYLON.) He thus ap- pears to have reigned but two years, which is the time assigned to him by Abydenus (Fl. b) and Berossus (Fl. 2). At the end of this brief space, Evil-Merodach was murdered by Neriglissar [NERI- GAL-SHAREZER] — a Babylonian noble married to his sister — who then seized the crown. Accord- ing to Berossus, Evil-Merodach provoked his fate by lawless government and intemperance. Perhaps the departure from the policy of his father, and the substitution of mild for severe measures, may have been viewed in this light. G. H.

* EVIL SPIRIT. [DEMON.]

* EXCELLENCY OF CARMEL. Is. xxv. 2. [CARMEL, especially note, p. 389, Amer. ed.]

* EXCELLENT, after the Latin excellens, has its older sense of "surpassing," "transcend- ent," in Dan. ii. 31 ["brightness . . . excellent"] and Num. xiv. 17 ["excellent glorious"). In con- formity with that usage, we find the like expression of "a grand excellent tyrant," and Taylor of "excellent pain." "Most excellent" (κρατίστος) as applied to Theophilus, Luke i. 3, and to Felix, Acts xxiii. 26, is unquestionably a title of rank or office. It is the same Greek term that the A. V. renders "noble" as applied to Felix, Acts xxiv. 3, and to Festus, Acts xxv. 23. [THEOPHILUS.] H.

* EXCHANGERS. [MONEY-CHANGERS.]

EXCOMMUNICATION (ἀφρομᾶς: ex- communicatio.) Excommunication is a power, founded upon a right inherent in all religious so- cieties, and is analogous to the powers of capital punishment, banishment, and exclusion from mem- bership, which are exercised by political and mu- nicipal bodies. If Christianity is merely a philosoph- ical idea thrown into the world to do battle with other theories, and to be valued according as it maintains its ground or not in the conflict of opin- ions, excommunication and ecclesiastical punish- ment and penitential discipline are unreasonable, if a society has been instituted for maintaining any body of doctrine and any code of morals, they are necessary to the existence of that society. That the Christian church is an organized polity, a spir- itual "kingdom of God" on earth, is the declara-

tion of the Bible [CHURCH]; and that the Jewish church was at once a spiritual and a temporal or- ganization is clear.

I. Jewish Excommunication. — The Jewish sys- tem of excommunication was threefold. For a first offense a delinquent was subjected to the penalty of ἅδη (Nokhit). Rambam (quoted by Lightfoot, Hore Hebroticia on 1 Cor. v. 5), Morinus (De. Penitentia, iv. 27), and Buxtorf (Lexicon, s. v. ἅδη) enumerate the twenty-four offenses for which it was inflicted. They are various, and range in severity from the offense of keeping a fierce dog to that of taking God's name in vain. Elsewhere (Bub. Moed Koton, fol. 16, 1) the causes of its infliction are reduced to two, termed money and epigraph, by which is meant debt and wanton in- solence. The offender was first cited to appear in court, and if he refused to appear or to make amends, his sentence was pronounced — "Let M. or N. be under excommunication." The excommunicated person was prohibited the use of the bath, or of the razor, or of the convivial table; and all who had to do with him were commanded to keep him at four cubits' distance. He was allowed to go to the Temple, but not to make the circuit in the ordi- nary manner. The term of this punishment was thirty days; and it was extended to a second, and to a third thirty days when necessary. If at the end of that time the offender was still contum- cious, he was subjected to the second excommuni- cation, termed ἡδη (cherev), a word meaning something devoted to God (Lev. xxvii. 21, 28; Ex. xxii. 20 [19]; Num. xiii. 14). Severe penalties were now attached. The offender was not allowed to teach or to be taught in company with others, to hire or to be hired, nor to perform any commercial transactions beyond purchasing the necessities of life. The sentence was delivered by a court of ten, and was accompanied by a solemn malediction, for which authority was supposed to be found in the "Curse ye Meroz" of Judg. v. 23. Lastly followed ὑδή (Shammuth), which was an entire cut- ting off from the congregation. It has been sup- posed by some that these two latter forms of excom- municiation were undistinguishable from each other. The punishment of excommunication is not ap- pointed by the Law of Moses. It is founded on the natural right of self-protection which all societ- es enjoy. The case of Korah, Dathan, and Abi- ram (Num. xvi.), the curse denounced on Meroz (Judg. v. 23), the commission and proclamation of Ezra (vii. 26, x. 8), and the reformation of Nehe- mish (xii. 33), are appealed to by the Talmudists as precedents by which their proceedings are regu- lated. In respect to the principle involved, the cutting off from the people" was commanded for cer- tain sins (Ex. xxx. 33, 38, xxxi. 14; Lev. xvii. 4), and the exclusion from the camp denounced on the lepers (Lev. xiii. 46; Num. xii. 14) are more ap- proximate.

In the New Testament, Jewish excommunication is brought prominently before us in the case of the man that was born blind and restored to sight (John ix.). "The Jews had agreed already that if any man did confess that he was Christ, he should be put out of the synagogue. Therefore said his par- ents, 'He is of age; ask him' (xxxii. 22, 23). "And they cast him out. Jesus heard that they had cast him out" (34, 35). The expressions here used,
EXCOMMUNICATION

EXCOMMUNICATION

Concerning him that hath so done this deed, is the name of our Lord Jesus Christ, when ye are gathered together, and my spirit, with the power of our Lord Jesus Christ, to deliver such an one unto Satan for the destruction of the flesh, that the spirit may be saved in the day of the Lord Jesus.” (1 Tim. v. 20). This is the clearer case that of Hymenaeus and Alexander; “Holding faith and a good conscience; some having put away concerning faith have made shipwreck: of whom is Hymenaeus and Alexander; whom I have delivered unto Satan, that they may learn not to blaspheme (1 Tim. i. 19, 20). It seems certain that these persons were excommunicated, the first for immorality, others for heresy. What is the full meaning of the expression, “deliver unto Satan,” is doubtful. All agree that excommunication is contained in it, but whether it implies any further punishment, inflicted by the extraordinary powers committed especially to the Apostles, has been questioned. The strongest argument for the phrase meaning no more than excommunication may be drawn from a comparison of Col. i. 13, “Addressing himself to the saints and faithful brethren in Christ which are at Coloss,” St. Paul exhorts them to “giving thanks unto the Father which hath made us meet to be partakers of the inheritance of the saints in light: who hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son: in whom we have redemption through his blood, even the forgiveness of sins.” The conception of the Apostle here is of men lying in the realm of darkness, and transported from thence into the kingdom of the Son of God, which is the inheritance of the saints in light, by admission into the church. What he means by the power of darkness is abundantly clear from many other passages in his writings, of which it will be sufficient to quote Eph. vi. 12: “Put on the whole armour of God, that ye may be able to stand against the wiles of the devil; for we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places against the principalities and powers in the heavenly places.” The church is therefore, in St. Paul’s mind, a translation from the kingdom and power of Satan to the kingdom and government of Christ. This being so, he could hardly more naturally describe the effect of excluding a man from the church than by the words, “deliver him unto Satan,” the idea being, that the man, ceasing to be a subject of Christ’s kingdom of light, was at once transported out of the kingdom of darkness, and delivered therefore into the power of its ruler, Satan. This interpretation is strongly confirmed by the terms in which St. Paul describes the commission which he received from the Lord Jesus Christ, when he was sent to the Gentiles: “To open their eyes, and to turn them from darkness to light, and from the power of Satan unto God, that they may receive forgiveness of sins, and inheritance among them which are sanctified by faith that is in me” (Acts xxvi. 18). Here again the act of being placed in Christ’s kingdom, the church is

In 1936 is another remarkable specimen of curing in the name of religion. It has been recently published in the Supplement to the Works of Spinoza (containing his hetero inedited treatises) p. 202 (Amst. 1922) A.
pronounced to be a translation from darkness to light, from the power of Satan unto God. Conversely, to be excommunicated (the church would be) to be removed from light to darkness, to be withdrawn from God's government, and delivered into the power of Satan (so Balsamon and Zonaras, in Basil. Con. 7; Estius, in 1 Cor. v.; Beveridge, in Comm. Apost. x.). If, however, the expression means more than excommunication, it would imply the additional exercise of a special apostolical power, similar to that exerted on Ananias and Saphira (Acts v. 1), Simon Magus (viii. 20), and Elymas (Acts xii. 12), and thereby to confirm Augustine, Hammond, Grotius, Lightfoot.

Apostolic Precept. — In addition to the claim to exercise discipline, and its actual exercise in the form of excommunication, by the Apostles, we find apostolic precepts directing that discipline should be exercised by the rulers of the church, and that in some cases excommunication should be resorted to: "If any man obey not our word by this epistle, note that man and his house, and say unto him, that he may be ashamed. Yet count him not as an enemy, but admonish him as a brother," writes St. Paul to the Thessalonians (2 Thess. iii. 14). To the Romans: "Mark them which cause divisions and offenses contrary to the doctrine which ye have heard, and avoid them" (Rom. xvi. 17). To the Galatians: "I would they were even cut off that trouble you" (Gal. v. 12). To Timothy: "If any man teach otherwise, . . . from such withdraw thyself" (1 Tim. vi. 2). To Titus he uses a still stronger expression: "A man that is an heretic, after the first and second adjournment, reject" (Tit. iii. 10). St. John instructs the lady to whom he addresses his second epistle, not to receive into her house, nor bid God speed to any who did not believe in Christ (2 John 10); and we read that in the case of Cerinthus he acted himself on the precept that he had given (Euseb. H. E. iii. 28). In his third epistle he describes Diotrephes, apparently a Judaising presbyter, "who loved to have the preeminence," as "casting out of the church," i. e. refusing church communion to, the stranger brethren who were travelling about preaching to the Gentiles (3 John 10). In the addresses to the Seven Churches, the angels or rulers of the Church of Pergamos and of Thyatira are rebuked for "suffering the Nicolaitans and Balaamites to teach and to seduce my servants to commit fornication, and to eat things sacrificed unto idols" (Rev. ii. 20). There are two passages still more important to our subject. In the Epistle to the Galatians, St. Paul denounces, "Though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed (ἀκαδέμησθαι)". As I said before, so say I now again, If any man preach any other gospel unto you than that ye have received, let him be accursed (ακαδέμησθαι, Gal. l. 8, 9). And in the First Epistle to the Corinthians: "If any man love not the Lord Jesus Christ, let him be Anathema Maran-atha." (1 Cor. xvi. 22). It has been supposed that these two expressions, "let him be Anathema," "let him be Anathema Maran-atha," refer respectively to the two later stages of Jewish excommunication — the cherem and the shammathah. This requires consideration.

The words ακαδέμησθαι and ακαδεμαθαι have evidently the same derivation, and signification; they have the same meaning. They express a person or thing set apart, laid up, or devoted. But whereas a thing may be set apart by way of honor or for destruction, the words, like the Latin "saecur," and the English "devoted," came to have opposite senses — τα ἀδεμαθημένα ἔθνος, and τα ἀδεμαθημένα Θεός. The LXX. and several ecclesiastical writers use the two words almost indiscriminately, but in general the form ακαδέμησθαι is applied to the votive offering (see 2 Macc. ix. 16; Luke xxii. 5; and Chrys. Rom. xvi. in Ep. ad Rom.), and the form ακαδεμαθαι to that which is devoted to evil (see Dent. vii. 20; Josh. vi. 17, viii. 13). Thus St. Paul declares that he would wish himself an άκαδεμαθαι from Christ if he could have been (Rom. ix. 3). His meaning is that he would be willing to be set apart as a vile thing, to be cast aside and destroyed, if only it could bring about the salvation of his brethren. Hence we see the force of ακαδέμησθαι in Gal. i. 8. "Have nothing to do with him," would be the Apostle's injunction, "but let him be set apart as an evil thing, for God to deal with him as he thinks fit." Hammond (in loc.) paraphrases it as thus: "You are to disclaim and renounce all communion with him, to look on him as an excommunicated person, under the second degree of excommunication, that none is to have any commerce with in sacred things." Hence it is that ακαδεμαθαι came to be the common expression employed by Councils at the termination of each canon which they enacted, meaning that whoever was disobedient to the canon was to be separated from the communion of the church and its privileges, and from the favor of God, until he repented (see Bingham, Ant. xvi. 2, 16).

The expression ἀκαδεμαθαι μαραναθαι, as it stands by itself without explanation in 1 Cor. xvi. 22, is so peculiar, that it has tempted a number of ingenious expositions. Parkhurst hazily derives it from ἄκηδεμησθαι, "Cursed be thou." But this derivation is not tenable. Buxtorf, Morinus, Hammond, Bingham, and others identify it with the Jewish shammathah. They thus saw it as meaning ἀκαδεμαθαι μαραναθαι, "The Lord comes." But shammathah cannot be made to mean "The Lord comes" (see Lightfoot, in loc.). Several fanciful derivations are given by Rabbinical writers, as "There is death," "There is desolation;" but there is no mention by them of such a signification as "The Lord comes." Lightfoot derives it from ἄκηδεμησθαι, and it probably means a thing excluded or shut out. Maranatha, however peculiar its use in the text may seem to us, is a Syro-Chaldean expression, signifying "The Lord is come" (Chrysostom, Jerome, Estius, Lightfoot), or "The Lord cometh." If we take the former meaning, we may regard it as giving the reason why the offender was to be anathematized; if the latter, it would either imply that the separation was to be in perpetuity, "dence Dominus repleat," (Augustine), or, more properly, it would be a form of solemn appeal to the day on which the judgment should be ratified by the Lord (comp. Jude 14). In any case, it is a strengthened form of the simple ἀκαδέμησθαι. And thus it may be regarded as holding towards it a similar relation to that which existed between the shammathah and the cherem, but not on any supposed ground of etymological identity between the two words shammathah and maranatha, for we could thereby save the Jews the reason why we more strongly between ἀκαδέμησθαι and μαραναθαι, and read ἄκηδεμησθαι μαραναθαι, i. e. "Let him be
The Lord will come. The anathema and the cherem answer very exactly to each other (see Lev. xxvi. 28; Num. xxxi. 3; Is. xliii. 28).

EXODUS

1 Excommunication

The Hebrew telcchah describes in the first instance the office of executioner, and secondarily, the general duties of the body-guard of a monarch. Thus Potiphar was "captain of the executioners" (Gen. xxxviii. 36; see margin), and had his official residence at the public jail (Gen. xl. 3). Nebuzaran- dan (2 K. xxv. 8; Jer. xxxix. 9) and Arioch (Dan. ii. 14) held the same office. That "captain of the guard" himself occasionally performed the duty of an executioner appears from 1 K. ii. 25, 34. Nevertheless the post was one of high dignity, and something beyond the present position of the scribe of modern Egypt (comp. Lukan, i. 165), with which Wilkinson (ii. 45) compares it. It is still not unusual for officers of high rank to inflict corporal punishment with their own hands (Wilkinson, ii. 45). The LXX. takes the word in its original sense (cf. 1 Sam. ix. 29), and terms Potiphar "chief executioner" (ἀνακολούθωρας).

The Greek σταυροδοτης (Mark vi. 27) is borrowed from the Latin speculatix; originally a military spy or scout, but under the emperors transferred to the body-guard, from the vigilance which their office demanded (Tac. Hist. ii. 11; Suet. Claud. 35).

EXILE [Captivevt.]

EXITUS (ἦθος ἐξουδος) being the first words of the book, or ahdh. ἐξουδος; in the Mas- tora to Gen. xxxv. 8 called ἀνακολοθος, see Buxt. Lex. Tol. col. 1422: ἐξουδος: ἐξοδος; the second book of the Law or Pentateuch.

A. Contents. — The book may be divided into two principal parts. i. Historical, i. 1—xxvi. 27; and ii. Legislative, xix. 1—xl. 38. The former of these may be subdivided into (1) the preparation for the deliverance of Israel from their bondage in Egypt; (2) the accomplishment of that deliverance.

B. (1.) The first section (i. 1—xii. 30) contains an account of the following particulars: The great increase of Jacob's posterity in the land of Egypt, and their oppression under a new dynasty which occupied the throne after the death of Joseph.
ch. 791 EXODUS 791

The Numch,ious get three 38). with Ciod's hands the book the instructions enant 40-51 in departure the sanctification of the first-born (xxii. 37-xxxii. 16); the march to the Red Sea, the passage through it, and the destruction of Pharaoh and his host in the midst of the sea, together with Moses' song of triumph on the occasion (xiii. 17-xxv. 21); (6) the principal events on the journey from the Red Sea to Sinai, the bitter waters at Marah, the giving of quails and of the manna, the observance of the Sabbath, the miraculous supply of water from the rock at Rephidim, and the battle there with the Amalekites (xxv. 22-xvii. 16); the arrival of Jethro in the Israelitish camp, and his advice to the civil government of the people (xxvii.).

11. The solemn establishment of the Theocracy on Mount Sinai. The people are set apart to God as "a kingdom of priests and an holy nation" (xix. 6); the ten commandments are given, and the laws which are to regulate the social life of the people are enacted (xxxi. 1-xxvii. 19): an Angel is promised as their guide to the Promised Land, and the covenant between God and Moses, Nadab and Abihu, and seventy elders, as the representatives of the people, is most solemnly ratified (xxiii. 20-xxiv. 18); instructions are given respecting the tabernacle, the ark, the mercy-seat, the altar of burnt-offering, the separation of Aaron and his sons for the priest's office, the vestments which they are to wear, the ceremonies to be observed at their consecration, the altar of incense, the haver, the holy oil, the selection of Bezaleel and Ahohib for the work of the tabernacle, the observance of the Sabbath, and the delivery of the two tables of the Law into the hands of Moses (xxv. 1-xxvi. 18); the sin of the people in the matter of the golden calf, their rejection in consequence, and their restoration to God's favor at the intercession of Moses (xxxii. 1-xxxiv. 35); lastly, the construction of the tabernacle, and all pertaining to its service in accordance with the injunctions previously given (xxxi-xl. 38).

This book, in short, gives a sketch of the early history of Israel as a nation: and the history has three clearly marked stages. First we see a nation enslaved; next a nation redeemed; lastly a nation set apart, and through the blending of its religious and political life consecrated to the service of God.

B. Integrity. According to von Lengerke (Ks- man, xxxix., xc.) the following portions of the book belong to the original or Elohist document: Chap. i. 1-14, ii. 20-25, vi. 2-7, vii. 1-28, 37, 38, 40; ix. 1, xx., xxx., xxxv.-xxxv. Stibbein (Crit. Untersc. and De Wette (Einleitung) agree in the main with this di-

vision. Knobel [1857], the most recent writer on the subject, in the introduction to his commentary on Exodus and Leviticus, has sifted these books still more carefully, and with regard to many passages has formed a different judgment. He assigns to the Elohist: i. 1-7, 13, 14, ii. 23-25 from בְּנֵי-יִשְׂרָאֵל, vi. 2-vii. 7 (except vi. 8), vili. 8-13, 19-22, viii. 1-3. 11 from בָּנָי, and 12-15, ix. 8-12 and 33, xii. 9,10, xii. 1-23, 28, 37 a, 40-42, 43-51, xili. 1, 2, 29, xiv. 1-4, 8, 9, 15-18 (except in ver. 15, and in ver. 16), 21-23, and 26-29 (except 27 from בְּנֵי-יִשְׂרָאֵל), xv. 10, 22, 23, 37, xvi. 1, 2, 9-26, 31-36, xvii. 1, xiv. 2 a, xxv. 11. 12-17 in the main: xxv. 1-38.

A mere comparison of the two lists of passages selected by these different writers as belonging to the original document is sufficient to show how very uncertain all such critical processes must be. The first, that of von Lengerke, is open to many objections, and has not been accepted by H. A. Brink (Eid. in der Pent. § 117), Banke, and others. Thus, for instance, chap. vi. 6, which all agree in regarding as Elohistic, speaks of "great judgments" (כִּסְפָּדִים in the plur.), whereas with God would redeem Israel, and yet not a word is said of these in the so-called original document. Again xii. 12, 24, 27 contains the announcement of the destruction of the first-born of Egypt, but the fulfillment of the threat is to be found, according to the critics, only in the later Jehovistic additions. Hupfeld has tried to evade this difficulty by supposing that the original documents did contain an account of the slaying of the first-born, as the institution of the Passover in xii. 12, &c. has clearly a reference to it: only he will not allow that the story as it now stands is that account. But even then the difficulty is only partially removed, for thus one judgment only is mentioned, not many (vi. 6). Knobel has done his best to olivate this glaring inconsistency. Feeding no doubt that the ground taken by his predecessors was not tenable, he retains as a part of the original work much which they had rejected. It is especially worthy of notice that he considers some at least of the miraculous portions of the story to belong to the older document, and so accounts for the expression in vi. 6. The changing of Aaron's rod into a serpent, of the waters of the Nile into blood, the plague of frogs, of mosquitoes (A. V. lice), and of boils, and the destruction of the first-born, are, according to Knobel, Elohistic. He points out what he considers here links of connection, and a regular sequence in the narrative. He bids us observe that Jehovah always addresses Moses, and that Moses directs Aaron how to act. The miracles, then, are arranged in order of importance: first there is the sign which serves to accredit the mission of Aaron; next follow three plagues, which, however, do not touch men, and these are sent through the instrumentality of Aaron; the fourth plague is a plague upon man, and here Moses takes the most prominent part; the fifth and last is accomplished by Jehovah himself. Thus the miracles increase in intensity as they go on. The agents likewise rise in dignity. If Aaron with his rod of might begins the work, then Jehovah gives way afterwards to his greater brother, whilst, for the last act of redemption Jehovah employs no human agency, but himself with
Exodus

A mighty hand and out-stretched arm effects the deliverance of his people. The passages thus selected have not doubt a sort of connection, but it is in the highest degree arbitrary to conclude that because portions of a work may be omitted without seriously disturbing the sense, those portions do not belong to the original work, but must be regarded as subsequent emendations and additions.

Again, all agree in assigning chap. iii. and iv. to the Jehovist. The call of Moses, as there described, is said to be merely the Jehovistic parallel to vi. 2—vii. 1. Yet it seems improbable that the Jehovist should introduce Moses with the bare words, "And God spoke to Moses." vi. 2, without a single word as to the previous history of so remarkable a man. So argues Havernick, and as it appears to us, not without reason. It will be observed that none of these critical attempts to make the divine names a criterion whereby to distinguish the several documents. Thus in the Jehovistic portion, chap. i. 15—22, De Wette is obliged to remark, with a sort of uneasy candor, "but vi. 17, 20, Elohists (?)" and again, chap. iii. 4, 6, 11—15 "here seven times Elohists."

In other places there is the same difficulty as in chap. xiv. 17, 19, which Stiithelin, as well as Knobel, gives to the Jehovist. In the passages in chaps. vii., viii., ix., which Knobel classes in the earlier record, the name Jehovah occurs throughout. It is obvious, then, that there must be other means of determining the relative antiquity of the different portions of the book, or the attempt to ascertain which are earlier and which are later must entirely fail. Accordingly certain peculiarities of style are supposed to be characteristic of the two documents. Thus, for instance, De Wette (Einz. § 154, S. 183) appeals to the הַרָעָב הָיָֽה אָלֲמָן, inc. i. 7, ii. 17, 41, פֻּלִּיוּ אָלֲמָן, vi. 4, the formula הָרְעָב אָלֲמָן, xxv. 1, xxx. 11, &e., פַּלִּיוּ אָלֲמָן, vi. 20, vii. 4, xii. 17, 41, 51; הַרְעָב הָיָֽה אָלֲמָן, xii. 6, xxix. 41, xxx. 8, and other expressions, as decisive of the Elohist. Stiithelin also proposes on very similar grounds to separate the first from the second legislation.

"Wherever," he says, "I find mention of a pillar of fire, or of a cloud, Ex. xxvii. 9, 10, or an Angel of Jehovah, as Ex. xxiv., xxvii., or the phrase glowing with milk and honey, as Ex. xiii. 5, xxxii. 3—5, where mention is made of a coming down of God, as Ex. xiv., xxiv. 5, or where the Canaanite nations are numbered, or the tabernacle supposed to be without the camp, Ex. xxxiii. 7, I feel tolerably certain that I am reading the words of the author of the second legislation (i.e. the Jehovist). But these nice critical distinctions are very precarious, especially in a stereotyped language like the Hebrew.

Unfortunately, too, dogmatical prepossessions have been allowed some share in the controversy. De Wette and his school chose to set down everything which savored of a miracle as proof of former authorship. The love of the marvelous, which is all they see in the stories of miracles, according to them could not have existed in an earlier and simpler age. But on their own hypothesis this is a very extraordinary view. For the earlier traditions of a people are not generally the least wonderful, but the reverse. And one cannot, thus, acquit the second writer of a design in embellishing his narrative. However, this is not the place to argue with those who deny the possibility of a miracle, or who make the narration of miracles proof sufficient of later authorship. Into this error Knobel, it is true, has not fallen. By admitting some of the plagues into his Elohistic catalogue, he shows that he is at least free from the dogmatical prejudices of critics like De Wette. But his own critical tests are not conclusive. And the way in which he cuts verses to pieces, as in viii. 11, and xii. 13, 16, 27, where it suits his purpose, is so completely arbitrary, and results so evidently from the stern constraint of a theory, that his labors in this connection are not more satisfactory than those of his predecessors.

On the whole there seems much reason to doubt whether critical acumen will ever be able plausibly to distinguish between the original and the supplement in the book of Exodus. There is nothing indeed forced or improbable in the supposition, either that Moses himself incorporated in his memoirs ancient tradition, whether oral or written, or that a writer later than Moses made use of materials left by the great legislator in a somewhat tattered fragmentary form. There is an occasional abruptness in the narrative, which suggests that this may possibly have been the case, as in the introduction of the genealogy vi. 13—27. The remarks in xi. 3, xxv. 35, 36 lead to the same conclusion. The apparent confusion at xi. 1—3 may be explained by regarding these verses as parenthesis.

We shall give reasons hereafter for concluding that the Pentateuch in its present form was not altogether the work of Moses. [Pentateuch.] For the present it is sufficient to remark, that even admitting the hand of an editor or compiler to be visible in the book of Exodus, it is quite impossible accurately to distinguish the documents from each other, or from his own additions.

C. Credibility.—Almost every historical fact mentioned in Exodus has at some time or other been called in question. But it is certain that all investigation has hitherto tended only to establish the veracity of the narrative. A comparison with other writers and an examination of the monuments confirm, or at least do not contradict, the most material statements of this book. Thus, for instance, Manetho's story of the Hyksos, questionable as much of it is, and differently as it has been interpreted by different writers, points at least to some early connection between the Israelites and the Egyptians, and is corroborative of the fact implied in the Pentateuch that at the time of the Israeliitish sojourn, Egypt was ruled by a foreign dynasty. [Egypt.] Manetho speaks, too, of strangers from the East who occupied the eastern part of Lower Egypt. And his account shows that the Israelites had become a numerous and formidable people. According to Ex. xxvii. 57, the number of men beside women and children who left Egypt was 600,000. This would give for the whole nation about two millions and a half. There is no doubt some difficulty in accounting for this immense increase, if we suppose (as on many accounts seems probable) that the actual residence of the children of Israel was only 215 years. We must remember, indeed, that the number who went into Egypt with Jacob was considerably more than three thousand and ten souls. [Pentateuch]; yet we must also take into account the extraordinary fruitfulness of Egypt (concerning which all writers are agreed).

and especially of that part of it in which the Israelites dwelt. Still it would be more satisfactory if we could allow 400 years for the increase of the nation rather than any shorter period.

According to de Wette, the story of Moses' birth is mythical, and arises from an attempt to account etymologically for his name. But the beautiful simplicity of the narrative places it far above the stories of Romulus, Cyrus, and Semiramis, with which it has been compared (Knobel, p. 14).

As regards the etymology of the name, there can be very little doubt that it is Egyptian (from the Copt., Μωμ, "water," and 2α or σι, "to take"); cf. Gesen. Thes. in v., and Knobel, Comm. in loc.). And if so, the author has either played upon the name or is mistaken in his philology. But this does not prove that the whole story is nothing but a myth. Philology as a science is of very modern growth, and the truth of history does not stand or fall with the explanation of etymologies. The same remark applies to de Wette's objection to the etymology in ii. 22.

Other objections are of a very arbitrary kind. Thus Knobel thinks the command to destroy the male children (i. 15 ff.) extremely improbable, because the object of the king was not to destroy the people, but to make use of them as slaves. To require the midwives to act as the enemies of their own people, and to issue an injunction that every son born of Israelitish parents should be thrown into the Nile, was a piece of downright madness of which he thinks the king would not be guilty. But we do not know that the midwives were Hebrew, they may have been Egyptian: and kings, like other slave owners, may act contrary to their interest in obedience to their fears or their passions; indeed, Knobel himself compares the story of King Bocchoris, who commanded all the uncircumcised in his land to be cast into the sea (Lyson, op. Joseph. c. Apion. i. 34), and the destruction of the Spartan Helots (Plutarch, Lycurg. 28). He objects further that it is not easy to reconcile such a command with the number of the Israelites at their exodus. But we may suppose that in very many instances the command of the king would be evaded, and probably it did not long continue in force.

Again, de Wette objects to the call of Moses that he could not have formed the resolve to become the savior of his people—which, as Huëvernick justly remarks, is a dogmatical, not a critical decision.

The ten plagues are physically, many of them, what might be expected in Egypt, although in their intensity and in their rapid succession they are clearly supernatural. Even the order in which they occur is an order in which physical causes are allowed to operate. The corruption of the river is followed by the plague of frogs. From the dead frogs are bred the gnats and flies, from these came the murrain among the cattle and the boils on men, and so on.

Most of the plagues indeed, though of course in a much less aggravated form, and without such succession, are actually experienced at this day in Egypt. Of the plague of locusts it is expressly remarked that "before them were no such locusts, neither were there any like unto them" (Ex. xi. 25). All travelers in Egypt have observed swarms of locusts, brought generally by a southwest wind (Deut, however, mentions their coming with the east wind), and in the winter or spring of the year. This last fact agrees also with our narrative. Lepsius speaks of being in a "regular snow-drift of locusts," which came from the desert in hundreds of thousands to the valley. "At the edge of the fruitful plain," he says, "they fell down in showers." And this continued for six days, indeed in weaker flights much longer. He also saw hail in Egypt. In January 1849, he and his party were surprised by a storm. "Suddenly," he writes, "the storm grew to a tremendous hurricane, such as I have never seen in Europe, and hail fell upon us in such masses, as almost to turn day into night." He notices, too, an extraordinary cattle murrain—"which carried off 40,000 head of cattle" (Letters from Egypt, Eng. trans. pp. 49, 27, 14).

The institution of the Passover (ch. xii.) has been subjected to severe criticism. This has also been called a mythic fiction. The alleged circumstances are not historical, it is said, but arise out of a later attempt to explain the origin of the ceremony and to refer it to the time of Moses. The critics rest mainly on the difference between the directions given for the observance of this the first, and those given for subsequent passovers. But there is no reason why, considering the very remarkable circumstances under which it was instituted, the first Passover should not have had its own peculiar solemnities, or why instructions should not then have been given for a somewhat different observance for the future.

In minor details the writer shows a remarkable acquaintance with Egypt. Thus, for instance, Pharaoh's daughter goes to the river to bathe. At the present day it is true that only women of the lower orders bathe in the river. But Herodotus (i. 35) tells us (what we learn also from the monuments) that in ancient Egypt the women were under no restraint, but apparently lived more in public than the men. To this must be added that the Egyptians supposed a sovereign virtue to exist in the Nile-waters. The writer speaks of chariots and "chosen chariots" (xiv. 7) as constituting an important element in the Egyptian army, and of the king as leading in person. The monuments amply confirm this representation. The Pharaohs lead their armies to battle, and the animals consist entirely of horses and chariots.

Many other facts have been disputed, such as the passage of the Red Sea, the giving of the tana, &c. But respecting these it may suffice to refer to other articles in which they are discussed.

D. The authorship and date of the book are discussed under PENTATEUCH. J. S. P.

1. Plin. H. N. vii. 3; Seneca, Qu. Nat. iii. 25, quoted by Haverluck.
EXODUS, THE

The object of this article is to give a combined view of the results stated in the various articles relating or referring to the Exodus of the children of Israel from Egypt. It may be divided into three parts, treating of the chronological, the historical, and the geographical aspect of the event.

1. Dtc. — The date of the Exodus is discussed under CHRONOLOGY, where it is held that a preponderance of evidence is in favor of the year B.C. 1652. The historical questions connected with this date are noticed under EGYPT. Hales places the Exodus c. 1648, Usher c. 1491, and Bunsen c. 1320.

2. History. — The Exodus is a great turning point in Biblical history. With it the Patriarchal dispensation ends and the Law begins, and with it the Israelites cease to be a family and become a nation. It is therefore important to observe how the previous history led up to this event. The advancement of Joseph, and the placing of his kinsmen in what was to a pastoral people, at least, "the best of the land," yet, as far as possible, apart from Egyptian influence, favored the multiplying of the Israelites and the preservation of their nationality. The subsequent persecution bound them more firmly together, and at the same time loosened the hold that Egypt had gained upon them. It was thus that the Israelites were ready, when Moses declared his mission, to go forth as one man from the land of their bondage. [Joseph; Moses; Egypt.]

The history of the Exodus itself commences with the close of that of the Ten Plagues [PLAQUES OF EGYPT]. In the night in which, at midnight, the first born were slain (Ex. xii. 29), Pharaoh urged the departure of the Israelites (vv. 31, 32). They at once set forth from Ramses (vv. 37, 39) apparently during the night (ver. 42), but towards morning, on the 15th day of the first month (Num. xxxiii. 3). They made three journeys and encamped by the Red Sea. Here Pharaoh overtook them, and the great miracle occurred by which they were saved, while the pursuer and his army were destroyed. It has been thought by some that Pharaoh did not perish in the Red Sea; but not only does the narrative seem to forbid such a supposition (Ex. xiv. 18, 23, 28), but it is expressly contradicted in Ps. cxxxvi. (ver. 15). Recently it has been suggested that the Israelites crossed by a ford. If, however, their safe passage could thus be accounted for, the drowning of the Egyptians would becau

Map to illustrate the Exodus of the Israelites.
something, and perhaps the occurrence of the event at the fit time could reasonably be considered as due to such ordinary causes, and the necessary negative reply would show the fallacy of attempting a naturalistic explanation of the event on account of the use of natural means. It would be more reasonable to deny the event, but this could not be attempted in the face of the overwhelming evidence of its occurrence.

3. Geography. — The determination of the route by which the Israelites left Egypt is one of the most difficult questions in Biblical geography. The following points must be settled exactly or approximately: the situation of the Land of Goshen, the length of each day's march, the position of the first station (Rameses), and the direction of the journey.

The Land of Goshen may be concluded from the Biblical narrative to have been part of Egypt, but not from a distance then held to be Egypt Proper. It must therefore have been an outer eastern province of Lower Egypt. The Israelites, setting out from a town of Goshen, made two days' journey towards the Red Sea, and then entered the wilderness, a day's journey or less from the sea. They could only therefore have gone by the valley now called the Wadi-Tamanghit, for every other cultivated or cultivated tract is too far from the Red Sea. Rameses, as we shall see, must have lain in this valley, which thus corresponded in part at least to Goshen. That it wholly corresponded to that region is evident from its being marked by a single valley, and from the insufficiency of any smaller territory to support the Israelites.

It is not difficult to fix very nearly the length of each day's march of the Israelites. As they had with them women, children, and cattle, it cannot be supposed that they went more than fifteen miles daily; at the same time it is unlikely that they fell far short of this. The three journeys would therefore of what distance of about forty-five miles one sees, however, as we shall see, to have been a deflection from a direct course, so that we cannot consider the whole distance from the starting-point, Rameses, to the shore of the Red Sea as much more than about thirty miles in a direct line. Measuring from the ancient western shore of the Arabian Gulf due east of the Wadi-Tamanghit, a distance of thirty miles in a direct line places the site of Rameses near the mound called in the present day El-Ahabeisyeh, not far from the western end of the valley. That the Israelites started from a place in this position is further evident from the account of the two routes that lay before them: 'And it came to pass, when Pharaoh had let the people go, that God led them not [by] the way of the land of the Philistines, although that [was] near; for God said, Let peradventure the people repent when they see war, and they return to Egypt; but God led the people to the way of the wilderness of the Red Sea' (Ex. xiii. 17, 18).

The expression used, נַעַשׂ, does not necessarily imply a change in the direction of the journey, but may mean that God did not lead the Israelites into Palestine by the normal, but rather by an abnormal way of the wilderness. Were the meaning that the people turned, we should have to suppose

This is evidently the Rameses of Ex. 1:11. It seems to have been the chief town of the Land of Goshen, for that region, or possibly a part of it, is called the land of Rameses in Gen. xlviii. 11, comp. 4, 6. [RAMESE; GOSHEN.]

After the first day's journey the Israelites encamped at Succoth (Ex. xii. 37, xiii. 20; Num. xxxiii. 5, 6). This was probably a mere resting-place of caravans, or a military station, or else a town named from one of the two. Such names as the Scenic Veteranorum (which has been really identified with Succoth), and the Scenic Mandra of the Ptolemies and Antoninus, and the settlement of Ionian and Carian mercenaries called τὰ Στρατινῶτα (Herod. ii. 154), may be compared to this. Obviously such a name is very difficult of identification.

[SUCCESS.]

The next camping-place was Etham, the position of which may be very nearly fixed in consequence of its being described as 'in the edge of the wilderness' (Ex. xii. 20; Num. xxxiii. 6, 7). The cultivable land now extends very nearly to the eastern side of the ancient head of the gulf. At a period when the eastern part of Lower Egypt was largely inhabited by Asiatic settlers, there can be no doubt that this tract was under cultivation. It is therefore reasonable to place Etham where the cultivable land ceases, near the Sebat Bahr, or Senn Weefs, about three miles from the western side of the ancient head of the gulf. The Patumos of Herodotus and Strabo, which appears to have been the same as the Thom or Thon of the Discovery of Antoninus, is more likely to be the Pithon than the Etham of Scripture. [PITHON.] It is too far west for the latter.

After leaving Etham the direction of the route changed. The Israelites were commanded 'to turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon' (Ex. xiv. 2). Therefore it is most probable that they at once turned, although they may have done so later in the march. The direction cannot be doubled, if our description of the route thus far be correct, for they would have been entangled (ver. 3) only by turning southward, not northward. They encamped for the night by the sea, probably after a full day's journey. The place of their encampment and of the passage of the sea would therefore be not far from the Persepolitan monument, which is made in Linant's map the site of the Serapeum. We do not venture to attempt the identification of the places mentioned in the narrative with modern sites. Nothing but the discovery of ancient Egyptian names, and their positive appropriation to such sites, could enable us to do so. Something, however, may be gathered from the names of the places. The position of the Israelite encampment was before or at Pi-hahiroth, behind which was Migdol, and on the other hand Baal-zephon and the sea. [BAAL-ZEPHON.] Pi-hahiroth or Hahiroth is a separable prefix and evidently the Egyptian masculine article, and we therefore hold the name to be

EXODUS, THE
EXORCIST

Egyptian. Jablonsky proposed the Coptic etymology, ἔξωρκος, “the place where woe grows,” which, or a similar name, the critical acumen of Frenzel recognized in the modern Glaukos Glaukos, the bôl of reeds.” We cannot, however, hold that the Glauko Glaukos in the neighborhood where we place the passage of the sea is the Phaëthrioth of the Bible: there is another Glauko Glaukos near Suez, and such a name would of course depend for its permanence upon the continuance of a vegetation subject to change. [Phaëthrioth.] Migedel appears to have been a common name for a frontier watchtower. [Migatz.]—Paul. John we take to have had a similar meaning to that of Migedel. [Hamat-Zebolon.] We should expect therefore that the encampment would have been in a depression, partly marshy, having on either hand an elevation marked by a watch-tower.

The actual passage of the sea forms the subject of another article. [Red Sea, Passage of.] There can be no doubt that the direction was from the west to the east and that the breadth at the place of crossing was great, since the whole Egyptian army perished.

We do not propose to examine the various theories that have been put forth respecting the route of the Israelites. We have thought it enough to state all the points of evidence which can, in our judgment, lead to a satisfactory conclusion. It might, however, be thought neglectful if we did not allude to what Prof. Lepsius has written on the subject. He does not enter into any detailed exposition of the geography of the Exodus, and attempts but one identification with any modern site—that of Ramesses with the ancient Egyptian site now called Assos-Kedah, about eight miles from the old head of the gulf. The argument he advances for this identification is that a monument is found here representing Ramesses II seated between the gods Tuma and Ra, and that therefore he was worshiped in a form which must necessarily have borne his name. It might equally, however, have been called Patuma, from Tuma, and have corresponded in etymology to Patumus or else Pitnon. The conclusion to which Prof. Lepsius arrives, that because Assos-Kedah is Ramesses, therefore the land of Goshen must have been within the eastern part of Lower Egypt below Heliopolis, is singularly illogical, for Ramesses was in the land of Goshen, and not 20 miles east of it, and it occupied the brimsl itself more than two days to journey from it to the Red Sea, which makes its allocation within about eight miles of the sea absurd. The supposition involves therefore a double impossibility.

The preceding map exhibits the main features of the country in which we place the route of the Israelites, and the places referred to in this article. The best map is Lamant's, in the Atlas of the Perisment of Pilgrimage in Egypt. R. S. P.

EXORCIST (ἔξωρκος; exorcists). The verb ἔξωρκε, ἔξωρκος occurs once in the N. T. and once in the LXX. version of the O. T. In both cases it is used, not in the sense of exorcise, but as a synonym of the simple verb ἀπόκει, to charge with an oath, to insinace. Comp. Gen. xxi. 3 (ἔξωρκω), A. V. "I will make thee swear"—with 37, and Matt. xxvi. 63 with Mark v. 7; and see 1 Thess. ii. 27 (ἐξωρκίζω, Lachman. Tischendorf.). The cognate noun, however, together with the simple verb, is found once (Acts xix. 13) with reference to the exorcism of evil spirits from persons possessed by them (cf. ἕξωρκος, ἀπόκει, Joseph. Ant. viii. 2 § 5). The use of the term exorcists in that passage is the designation of a well-known class of persons, to which the individual mentioned belonged. It confirms what we know from other sources as to the common practice of exorcism amongst the Jews. That some, at least, of them not only pretended to, but possessed, the power of exorcising, appears by our Lord's admission when he asks the Pharisees, "If I by Beelzebub cast out devils, by whom do your disciples (uia) cast them out?" (Matt. xxii. 27.) What means were employed by real exorcists we are not informed. David, by playing skilly on a harp, procured the temporary departure of the evil spirit which troubled Saul (1 Sam. xii. 23). Justin Martyr has an interesting suggestion as to the possibility of a Jew successfully exorcising a devil, by employing the name of the god of Abraham, Isaac, and Jacob. ('ΑΛΛ' ει δης ἐξωρκίζεις τις ὄμοι κατά τον θεόν 'Αβραάμ και θεόν Ισαάκ και θεόν Ιακόβ, τις ἐποιηταν τον το βασιλέα, Dial. cum Tryph. c. 85, p. 311, C. See Justin. Apol. c. 6, p. 453, B. He claims for Christianity superior but not necessarily exclusive power in this respect. Compare the statements of Iren. adv. Heres. ii. 5, and the authorities quoted by Grotius on Matt. xxi. 27.) But Justin goes on to say that the Jewish exorcists, as a class, had sunk down to the superstitious rites and usages of the heathen ("Ἡδυ μετατα γις οι τοις ὄμοις ἐποιηται τῇ τέχνῃ, ὄμοιᾳ καὶ τῇ ὠνήθ, χρισμοίν ἐξωρκίζουσιν καὶ κατάθλοσσε λόγους, εἰρήνα.") With this agrees the account given by Josephus (Ant. viii. 2 § 5) of an exorcism which he saw performed by Eleazar, a Jew, in the presence of Vespasian and his sons, though the virtue of the curse is attributed to the mention of the name of Solomon, and to the use of a root, and of certain incantations said to have been prescribed by him. It was the profane use of the name of Jesus as a charm or spell which led to the disastrous issue recorded in the Acts of the Apostles (xix. 13-16).

The power of casting out devils was bestowed by Christ while on earth upon the apostles (Matt. x. 8) and the seventy disciples (Luke x. 17-19), and was, according to his promise (Mark xvi. 17), exercised by healers after his ascension (Acts xvi. 18); but to the Christian miracle, whether as performed by our Lord himself or by his followers, the N. T. writers never apply the terms "exorcize" or "exorcist." [See DEMON; DEMONIANS.]

EXPLANATION. [SACRIFICE.]

* EYE-SERVICE, a word for which we are indebted to our English translators (found in the Bishop's Bible, col. iii. 22, and in the A. V., both there and Eph. vi. 16). It is their rendering of ἀποφαλάσσοντα, which means, service performed for the master's eye, i. e. redundant and mercenary. The Greek word does not occur elsewhere.

II. * E'ZAR is found in many modern editions of the A. V. in 1 Chr. i. 38 instead of the correct form Ezar. [Ezor.]

A. * EZBAI (2 esr.) (Ἔξβαι [thick or short, Ditt.])

A'gôbâi; [Vat. 'Eggôbâi; Alex. 'Agôbî; P. A. A'gôbô]

B. [Ezor.]
EZEKIEL

Ezekiel, father of Naarai, who was one of David’s thirty mighty men (1 Chr. xvi. 37). In the parallel list (2 Sam. xxiii. 35) the names are given “Naarai the Arbeite,” while Keimboott decides to be a corruption of the reading in Chron. (Dissertation, &c. p. 269.)

EZEKIEL ([Ez'ek'iel] [perh. inclinat, Ges.]: Θασο- βας; Ezob). 1. Son of Ged, and founder of one of the Gadite families (Gen. xvi. 16; Num. xxvi. 16). In the latter passage the name is written דֶּשֶּק (A. V. Ozn), probably by a corruption of the text of very early date, since the LXX. have Αζεκ. The process seems to have been the accidental omission of the ד in the first instance (as in דֶּשֶּק, Abiezer (Josh. xvii. 2), which in Num. xxvi. is written דֶּשֶּק, Jeezer), and then, when דֶּשֶּק was no longer a Hebrew form, the changing it into דֶּשֶּק.

2. [Ez'ek'iel; Vat. Σεβαων; Alex.]

Ezekiel (Ezob). Son of Bela, the son of Benjamin, according to 1 Chr. vii. 7. It is singular, however, that while Ezekiel is nowhere else mentioned among the sons of Bela, or Benjamin, he appears here in company with דֶּשֶּק, Iri, which is not a Benjamite family either, according to the other lists, but which is found in company with Ezob among the Gadite families, both in Gen. xvi. 16 (Eri, דֶּשֶּק), and Num. xxvi. 16. Were these two Gadite families incorporated into Benjamin after the slaughter mentioned Judg. xix. 7? Possibly they were from Jabez-Gilead (comp. xxi. 12-14). [Becher.] 1 Chr. vii. 2, seems to fix the date of the census as in King David’s time.

A. C. H.

EZECIHIAS (E'zechi'as; Vat. Εζεχιας; Ozias). 1. Edsr. ix. 14; put for Jahaziah in Ezr. x. 15.

2. (Ezechias). 2 Edsr. vii. 40. [Hezekiah.]

EZECIHAIS (E'zechi'as; Ezecchius), 1 Edsr. ix. 43; for Hilkiah in the parallel passage, Neh. viii. 4.

EZECIHAS (E'zechi'as, and so Codex B in N.T.: Ezecchius), Exclus. xviii. 17, 22; xliv. 4; 2 Mac. xv. 22; Matt. i. 9, 10. [Hezekiah.]

EZEKIEL (אֵצְקִיָּא, i.e. Yecheqel, for אֵצֶק לֶוֹ, the strength of God: Ιεσαια; Ezecchiel), one of the four greater prophets. There have been various fancies about his name; according to Abarnen (Prof. in Ezecch.) it implies “one who natates the might of God to be displayed in the future,” and some (as Villalpandus, Prof. in Ezecch. p. x.) see a play on the word in the expressions אכּדֶּק (Deut. xxx. 9, 10), and אכּדֶּק (Deut. i. 8), whence the groundless conjecture of Sanctius (Prolegomen. in Ezecch. p. 2, n. 2) that the name was given him subsequently to the commencement of his career (Carpzov, Introd. ad Libr. Bibli. Vetus. Testament. ii. part iii. ch. v.) He was the son of a priest named Buzi, respecting whom fresh conjecture have been recorded, although nothing is known about him (as Archibp. Newcome observes) beyond the fact that he must have given his son a careful and learned education. The Rabhis had a rule that every prophet in Scripture was also the son of a prophet, and hence they (as R. Dav. Kimchi in his Commentary) absurdly identify Buzi with Jeremiah, who they say was so called, because he was rejected and despised. Another tradition makes Ezekiel the servant of Jeremiah (Greg. Naz. Or. xivii.), and Jerome supposes that the prophets being contemporaries during a part of their mission interchanged their prophecies, setting them respectively to Jerusalem and Tyre for confirmation and encouragement, that the Jews might hear as it were a strophe and antistrope of warning and promise, “velut ac si duos cantores alter ad alterius vocem sese componerent” (Calvin, Comment. ad Ezecch. i. 2). Although it was only towards quite the close of Jeremiah’s lengthened office that Ezekiel received his commission, yet these suppositions are easily accounted for by the internal harmony between the two prophets, in proof of which Hiävernich (Introd. to Ezecch.) quotes Ez. xiii. as compared with Jer. xxii. 9 ff., and Ez. xxiv. with Jer. xxxii. &c. This inner resemblance is the more striking from the otherwise wide difference of character which separates the two prophets; for the elegiac tenderness of Jeremiah is the reflex of his gentle, calm, and introspective spirit, while Ezekiel, in that age when true prophecy was so rare (Ez. xii. 21; Lam. ii. 9), was forward with all abruptness and iron consistency. Has he to contend with a people of brazen front and unbounding neck? He possesses on his own part an unbending nature, opposing the evil with an unflinching spirit of boldness, with words full of consuming fire” (Hiävernich’s Introd. translated by Rev. F. W. G. getattr in Journal of S. L. i. 23). Unlike his predecessor in the prophetic office, who gives us the unfailest details of his personal history, Ezekiel rarely alludes to the facts of his own life, and we have to complete the imperfect picture by the colors of late and dubious tradition. We shall mention both sources of information, contenting ourselves with this general caution against the latter. He was taken captive in γὰς Σαλπυδά (Isidor. de Vit. et Ob. Summat. 39; Epphan. de Vit. et Mort. Prophet. ap. Carpzov.) in the captivity (or transmigration, as Jerome more accurately prefers to render ἐν Σαλπυδά), i. 2) of Jehoiachin (not Je- hoiahim as Josephus (Ant. x. 6, § 3) states, probably by a slip of memory) with other distinguished exiles (2 K. xxiv. 15), eleven years before the destruction of Jerusalem. Josephus (l. c.) says that this removal happened when he was a boy, and although we cannot consider the assertion to be refuted by Hiävernich’s argument from the matured, vigorous, priestly character of his writings, and feel still less inclined to say that he had “unbotheredly” exercised for some considerable time the function of a priest, yet the statement is questionable, because it is improbable (as Hiävernich also points out) that Ezekiel long survived the 27th year of his exile (xxivi. 17), so that if Josephus be correct he must have died very young. He was a member of a community of Jewish exiles who settled on the banks of the Chebar, a “river” or stream of Babylonia, which is sometimes taken to be the Khabour, but which the latest investigators suppose to be the Nahor Malcha or royal canal of Nebuchadnezzar. [Chorbai.] The actual name of the spot where he resided was בֶּן-כֶּּכֶּת (כֶּּכֶּת הַנֶּּבֶּעֲדָנֶּזֶּא).
EZEKIEL

393. "contracted

A. "in the land of the Chaldeans" that God's message first reached him (i. 2); the Chaldean version, however, interprets the words "in the land of Israel: and again a second time he spake to him in the land of the Chaldeans," because the Jews had a notion that the Chaldeans could not overshadow a prophet out of the Holy Land. Hence R. Jarchi thinks that ch. xvii. was Ezekiel's first prophecy, and was uttered before the Captivity, a view which he supports by the Hebrew idiom דלת רון רון (A. V. ·came expressly") in i. 3.

R. Kimchi, however, makes an exception to the rule in case the prophecy was inspired in some pure and quiet spot like a river's bank (cf. Ps. cxxxvii. 1). His call took place "in the fifth year of King Jehoiachin's captivity" n. c. 595 (i. 2), "in the thirtieth year of the fourth month." The latter expression is very uncertain. Most commentators take it to mean the 30th year of his age, the recognized period for assuming full priestly functions (Num. iv. 20, 30). Origen, following this assumption, makes the prophet a type of Christ, to whom also "the heavens were opened" when he was baptized in Jordan. But, as Prazdes argues, such a computation would be unusual, and would not be sufficiently important or well known as a mark of genuineness, and would require some more definite addition. The Chalde, paraphrase by Don. ben Uzziel has a 30 years after Hilkiah the high-priest opened the book of the Law in the sanctuary in the vestibule under the porch at midnight after the setting of the moon in the days of Josiah, &c., in the month Thannum, in the fifth day of the month "(cf. 2 K. xxiii.). This view is adopted by Jerome, Eshker, Havernick, &c.; but had this been a recognized era, we should have found traces of it elsewhere, whereas even Ezekiel never refers to it again. There are similar and more forcible objections to its being the 30th year from the Jubilees, as Hitzig supposes, following many of the early commentators. It now seems generally agreed that it was the 30th year from the new era of Nebopolassar, father of Nebuchadnezzar, who began to reign n. c. 625 (Rawlinson's Hist. i. 508). The use of this Chalde epoch is the more appropriate as the prophet wrote in Babylonia, and he gives a Jewish chronology in ver. 2. Compare the notes of time in Dan. ii. 1, vii. 11; Ez. vii. 2; Neb. ii. 1, v. 11 (Rawlinson, Schott); Poli Syrius, in loc.; Schlegel, de ann. Temp. Proph. p. xiii.).

The decision of the question is the less important, because in all other places Ezekiel dates from the year of Jehoiachin's captivity (xxiv. 17, xxx. 20, et passim). We learn from an incidental allusion (xxiv. 18)—the only reference which he makes to his personal history—that he was married, and had a house (viii. 13) in his place of exile, and lost his wife by a sudden and unforeseen stroke. He lived in the highest consideration among his companions in exile, and their elders consulted him on all occasions (viii. 1, xi. 25, xiv. 1, xx. 1, &c.), because in his united offices of priest and prophet he was a living witness to "the truth of Captivity" that God had not abandoned them. Virgil even says (De Syr. V. p. 332) that "in adules suis in schola quidam pulchri convertit institutum, iubique erat frequenti coniecta divinam interpretaturam voluntatem oratione faciendi" (quoted by Havernick).

There seems to be little ground for Theodor's supposition that he was a Nazarite. The last date he mentions is the 27th year of the Captivity (xxix. 17), so that his mission extended over twenty-two years, during part of which period Daniel was probably living, and already famous (Ez. xiv. 14, xxviii. 3). Tradition ascribes various miracles to him, as, for instance, escaping from his enemies by walking dry-shod across the Chebar; feeding the famished people with a miraculous draught of fishes, &c. He is said to have been buried in Babylon by his Jewish prince (א הַגַּבְרוּתַ שָׁנָא לָאֹלֶה, called in the Roman martyrology for vi. 1, Apr., "judge populi." Carpov. Introd. i. c.), whom he had convicted of idolatry; and to have been buried in a σταύρος σταυλός, the tomb of Shem and Arphaxad, on the banks of the Euphrates (Epiph. Dei et Mort. Prophet.). The tomb, said to have been built by Jehoiachin, was shown a few days' journey from Bagdad (Menasse ben Israel, de Res. Mort. p. 23), and was called "habitableum elegantissimum." A lamp was kept there continually burning, and the autograph copy of the prophecies was said to be there preserved.

The tomb is mentioned by Pietro de la Valle, and fully described in the itinerario of R. Benjamin de Tudeh (Hottinger, Thes. Phil. ii. 1, 3; Oppid. Hebr. ii. 82).

A curious conjecture (discredited by Clements Alexandreinis (Strom. i.), but considered not impossible by Selden (Syagur. de Vili et Mort. Syr. ii. p. 128), Meyer, and others, identifies him with "Nazaratus the Assyrian," the teacher of Pythagoras. We need hardly mention the ridiculous suppositions that he is identical with Zoroaster, or with the Εζεκιήλ δ τῶν ἡβραίων παραγόντας ἀπὸ πατρίτικος (l. em. Alex. Strom. i. 215); Euseb. Prep. Evang. iv. 28, 29) who wrote a play on the Exodus, called Ευαγγέλια (Fabricius, Bibli. Graec. ii. 19). This Ezekiel lived n. c. 40 (Sixt. Sen. Bibli. Sentent. iv. 234).

But, as Havernick remarks, "by the side of the scattered fragments of his external life, those of his internal life appear so much the richer. We have already noticed his stern and inflexible energy of will and character; and we also observe a devoted adherence to the rites and ceremonies of his national religion. Ezekiel is no cosmopolite, but displays everywhere the peculiar tendencies of a Hebrew educated under Levitical training. The priestly bias is always visible, especially in chaps. viii.—xiii., xxix.—xxx., and in iv. 34 ff., xx. 12 ff., xxxv. 8, &c. It is strange of De Wette and Gesenius to attribute this to a "contracted spirituality," and of Ewald to see in it "a one-sided conception of antiquity which he obtained merely from looks and traditions," and a "depression of spirit (\[\text{?}\]) enhanced by the long continuance of the banishment and bondage of the people." (Havernick's Introd.). It was such this very intensity of patriotic loyalty to a system whose partial suspension he both pre-

The poem, edited by Dubner, has been published by Didot in an appendix to Wagner's edition of the fragmenta of Ezechiel (Paris, 1849).
dicted and survived, which cheered the exiles with the confidence of his hopes in the future, and tended to preserve their decaying nationality. Mr. F. W. Newman is even more contemptuous than the German critics. "The writings of Ezekiel," he says (Heb. Monographs, p. 390, 2d ed.), "painfully show that passages of this sort are more visionary, and an increasing value of hard sacerdotism;" and he speaks of the "heavy materialism" of Ezekiel's temple, with its priests, sacrifices, &c., as "tedious and unprepossessing as Leviticus itself." His own remark that Ezekiel's predictions "so kept alive on the minds of the next generation a belief in certain return from captivity, as to have exceedingly conduced towards the result," is a sufficient refutation of such criticisms.

We may also note in Ezekiel the absorbing recognition of his high calling which enabled him cheerfully to endure any deprivation or misery (except, indeed, ceremonial pollution, from which he shrinks with characteristic loathing, iv. 14), if thereby he may give any warning or lesson to his people (iv., xxiv. 13, 16, &c.), whom he so ardently loved (lx. 8, xi. 13). On one occasion, and on one only, the feelings of the man burst, in one single expression, through the self-devotion of the prophet; and while even then his obedience is unwavering, yet the inexpressible depth of submissive pathos in the brief words which tell how in one day "the desire of his eyes was taken from him" (xxv. 15-18), shows what well-springs of the tenderest human emotion were concealed under his uncompromising opposition to every form of sin.

His predictions are marvellously varied. He has interpreted all the visions (viii.-xii.), symbolical actions (as iv. 8), similitudes (xii., xvi.), parables (as xxvii.), proverbs (as xii. 22, xvii. 11, &c.), poems (as xxv.), allegories (as xxxiii., xxxiv.), open prophecies (as vi., vii., xx., &c.), "tantumque uterque et figurum variatone floret ut munus omnium prophetici sermonis numerus ac modos explicesse, jure suo sit dicendius" (Carpzov, Introd. li. pt. iii. 5). It is therefore unwise to charge him with plagiarism, as is done by Michaelis and others, although to doubt his language (in which several Aramaisms and Arac Aragvna also occur) is colored largely both by the Pentateuch and by the writings of Jeremiah. His style is characterized by "numberless particularisms," as may be clearly observed by comparing his prophecy against Tyre (xxviii.) with that of Isaiah (xxvi.). (Fairbairn's Ezekiel). Groton (in Critical Socii, iv. 8) compares him to Homer for his knowledge, especially of architecture, from which he repeatedly draws his illustrations; and Witsius (Misc. Socii, i. 249) says, that besides his "incomparable doxum prophetinam," he deserves high literary reputation for the learning and beauty of his style. Michaelis, on the other hand, is very disparaging, and Lowth (referring to the diffuseness of his details) says "he is often to be classed with the orators than the poets." Few will agree with Archbishop Newcome's depreciation of such remarks on the ground (apparently) that even the language of a sacred writer is a matter of inspiration: for it is clear that inspiration in no way supercedes the individualities of the divine messenger. Ewald (Die Prop. des Alten Bundes, ii. 212), though not enthusiastic, admits that "simply as a writer he shows great excellence, particularly in this distal period," and he points out his "evenness and repose" of style, to which we suppose Jerme alludes when he says, "Sermo ejus nec satis decus est nec admodum rusticus, sed atque genere modi more temperatus" (Prof. in Ezch.). Havernick seems to us too strong in saying that "the glow of the divine indignation, the mighty rushing of the spirit of the Lord, the holy majesty of Jehovah, as he beheld it, are remarkably reflected in his writings... . The lofty action, the torrent of his eloquence... . rests on this combination of power and consistency, the one as unwearyed as the other is imposing." Among the most splendid passages are chapter i. (called by the Rabbi Rabbis), the prophecy against Tyrus (xxvi.-xxvii.), that against Assyria, "the noblest monument of eastern history" (xxxi.), and ch. viii., the account of what he saw in the Temple-porch.

"When, by the vision led,
His eye surveyed the dark idolatries
Of alienated Judah."—Milton, Par. Lost, i.

Certain phrases constantly recur in his writings, as "Son of Man," "They shall know that I am the Lord," "The hand of the Lord was upon me," "Set thy face against," &c.

The depth of his matter, and the marvellous nature of his revelations, makes him occasionally obscure. His prophecy was placed by the Jews among the תֹּשַׁה (treasuries), those portions of Scripture which (like the early part of Genesis, and the Canticles) were not allowed to be read till the age of 30 (Jer. Ep. ad Eusob., Orig. Præm. Hœyd, iv. in Critic. : Hottinger, Theol. phil. i. 1, 3). Hence Jerome compares the "inextirpable error" of his writings to Virgil's labyrinth ("Oceanus Scripturarum, mysteriormuque Dei rationalium") and also to the catacombs. The Jews classed him in the very highest rank of prophets. (Gregory Naz. (Or. 23) calls him τὸ προφητικὸν βαθύστατος καὶ ὀφθαλμῶν, and again ὁ τῶν μεγάλων ἐπιστῶν καὶ ἐκκλησίας μονοτριότης. Isidore (de Vit. et Ob. Sanct. 30) makes him a type of Christ from the title "Son of Man," but that is equally applied to Daniel (viii. 17). Other similar testimonies are quoted by Carpzov (Introd. ii. 193 ff.).

The Sanhedrin is said to have hesitated long whether his book should form part of the canon, from the occasional obscurity, and from the supposed contradiction of xviii. 29 to Ex. xx. 3, xxiv. 7; Jer. xxxii. 18. But in point of fact these apparent oppositions are the mere expression of truths complementary to each other, as Moses himself might have taught them (Deut. xxiv. 18). Although generally speaking comments on this book were forbidden, a certain R. Nananias undertook to reconcile the supposed differences. (Spinoza, Tract. Theol. Polit. ii. 27, partly from these considerations, infers that the present book is made up of mere ἀσωματικά, but his argument from its commencing with a γ, and from the expression in i. 3 above alluded to, hardly needs refutation.)

Of the authenticity of Ezekiel's prophecy there has been no dispute although a few rash critics (as Oeder, Vogel, and Corrodi) have raised objections about the last chapters, even suggesting that they might have been written by a Samaritan, to incite the Jews to suffer the co-operation in rebuilding the Temple. There is hardly a shadow of argument in favor of this view, and absolutely none to support the anonymous objections in the Monthly Magazine for 1798 against the genuineness of other chapters, which never would have
attained any notice had not Jahn taken the superfluous trouble to answer them. The specific nature of some of his predictions (xii. 12, xxvii. 6, &c.; on the former passage and its apparent contradiction to Jer. xxxii. 4, see Josephus, Ant. x. 8, § 2) is also in a very unhistorical manner made a ground for impugning the authenticity of the book of Ezekiel by Aunz and others. This style of criticism is very much on the increase, and we have had some absurd instances of it lately; but though it is quite true that the prophets dealt far more in external principles than specific announcements, yet some show of argument must be adduced before we settle the date of a sacred book as necessarily subsequent to an event which it professes to foretell.

The book is divided into two great parts, of which the destruction of Jerusalem is the turning-point; chapters i.-xxix. contain predictions delivered before that event, and xxxii.-xxxiii., after it, as we see from xxvi. 2. Again, chapters i.-xxiii. are mainly occupied with correction, denunciation, and reproof, while the remainder deal chiefly in consolation and promise. A parenthetical section in the middle of the book (xxv.-xxxii.) contains a group of prophecies against seven foreign nations, the septenary arrangement being apparently (as elsewhere in Scripture) intentional (see an art. on this subject in the Journal of Sacred Literature). De Wette, Carpzov, &c., have adopted various ways of grouping the prophecies, but the best synopsis is that of Hainvèrcn, who divides the book into nine sections distinguished by their superscriptions, as follows: i. Ezekiel's call, i.-iii. 15. ii. The general carrying out of the commission, iii. 16-vii. III. The rejection of the people, because of their idolatrous worship, viii.-xii. IV. The sins of the age related in detail, xii.-xix. V. The nature of the judgment, and the guilt which caused it, xx.-xxiii. VI. The meaning of the new commencing punishment, xxiv. VII. God's judgment denounced on seven heathen nations (Ammon, xxx. 1-7; Moab, 8-14; the Philistines, 15-17; Tyre, xxvi.-xxvii. 19; Sidon, 20-24; Egypt, xxix.-xxxii.). VIII. Prophecies, after the destruction of Jerusalem, concerning the future condition of Israel, xxviii.-xxx. IX. The glorious consummation of the kingdom.

Chronicological order is followed throughout (the date of the prediction being constantly referred to), except in the section devoted to prophecies against heathen nations (xxix.-xxxii.), where it is several times abandoned (xxx. 17; cf. xxvi. i, xxix. 1), so that in the prediction against Egypt, one uttered in the 27th year of the Captivity is inserted between two uttered in the 16th and 17th years. Hence Jahn supposes a purely "accidental" order, while Eliehorn expands into an economical arrangement of the separate records on which the prophecies were written. But there is no necessity to resort to such arbitrary hypotheses. The general unity of subject in the arrangement is obvious, and Jerome (although he assumes some mystery in the violation of chronology throughout the warnings addressed to Pharaoh) correctly remarks, "in prophetico neopomnian historic ordo servatur: neque enim quod est quod inquirit, praecedentia prostant volumina Spiritus Sancti merit." (Comm. in Ezek. xiv, 17, where he especially adduces the instance of Jeremiah). Rosenmüller (Scholia in loc.) thinks that the causes of the destruction of Egypt are put together (xxix. 2-21), and then the actual nature of that predicted judgment is described.

Josephus (Ant. x. 5) has the following passage of μακαρίω δύνατον (Jeremiah) προφητείας ταύτα, ἀλλὰ καὶ ἡ προφητεία Ἡσιεκήνου, (5) προφητείας ἡ τούτων δύο βιβλία γράφανε κατὰ τελείως. The undoubted meaning seems to be that Ezekiel (although Eliehorn on various grounds applies the word to Jeremiah) left two books of prophecy: which is also stated by Zonaras, and the Latin translation of Athanasius, where, after mentioning other lost books, and two of Ezekiel, the writer continues, "nume vero jam munum duxaverit inveniri sinuim. Itaque hunc omnia per inquiruntur Judaorum aenami aetatum et inquirens pereat manifestum est." (Synops. p. 159, but the passage does not occur in the Greek). In confirmation of this view (which is held by Maldonatus and others) we have a passage quoted in Clem. Alex. Quæries utit. 40, ἐν τῷ ἐφόρῳ τοῖς ἄγαθοι καὶ μεγάλοις, καὶ ἐν αὐτοῖς ἐν τίτλῳ, τῷ μονογράφῳ (Id. Strom. v. 16): a prophecy also mentioned, as alluding to the Virgin Mary, in Tertullian, who says, "Læminus apud Ezechielum de vacca igitur quae peperit et non peperit." (De Carne Christi, 23, cf. Epiphani. Heres. xxx. 30. The attempt to refer it by an error of memory to Job xxi. 10, seems a failure). These passages (quoted by Fabricius, Cod. Plat. p. 78, 167. Vetus. Test. ii. 223) cannot from a lost genuine book is extremely improbable, since we know from Philo and Justin Martyr the extraordinary care with which the Jews guarded the βιβλία (9).

They may indeed come from a lost apocryphal book, although we find no other trace of its existence (Sixtus Sen. Bibl. Somct. ii. p. 61). Le Moyne (Vita Socrata. ii. 332 ff.) thinks that they undoubtedly belong to the collection of traditional Jewish apocryphal works called Parke Abod. or chapters of the fathers." Just in the same way we find certain διάγωμα διάγωμα attributed to our Lord by the Fathers, and even by the Apostles (Acts xx. 35), on which see a monograph by Kuinoed. The simplest supposition about the passage in Josephus is either to assume that he is in error, or to admit a former division of Ezekiel into two books, possibly at ch. xii. Le Moyne adopts the latter view, and supports it by analogous cases. There is nothing which militates against the theory that Josephus mentions δυο μακαριω και εσται βιβλίν (cf. Jer. i. 22) as forming the canon.

There are no direct quotations from Ezekiel in the New Testament, but in the Apocalypse there are many parallels and obvious allusions to the later chapters (xli.-xlviii.). We cannot now enter into the difficulties of these or other chapters (for which we must refer to some of the commentaries here below), but we may mention, following Fairbairn, the four main lines of interpretation, namely, (1.) The Historico-literal, adopted by Villalpandus, Grotius, Lowth, &c., who make them a precise description intended to preserve the memory of Solomon's Temple. (2.) The Historico-ideal (of Eichelhorn, Dathé, &c.), which reduces them to a sort of vague and well-meaning announcement of future good. (3.) The Jewish (of Lightfoot, Cocceius, &c.), which maintains that their outline was actually adopted by the exiles. (4.) The Christian (or Messianic), followed by Luther, Calvin, Cocceius, and most modern commentators, which makes them a grand complected symbol of what the good God had in reserve for his church." (Rosenmüller, who dis-
appraises alike of the literalism of Grotius, and the arbitrary, ambiguous allegorizing of others, remarks 
(Schol. in xviii. 26). "Nobis quidem non operam vel valorem, vel hujusmodi oracula ad certos eventus refertur, aut poetae ornatu
a facutum idem explov,其它scribatur." Other proph-
ecies of a general Messianic character are xxxiv.
11-10, and xxxvi.-xxxix.
The chief commentators on this "most neglected of the prophets" are, among the fathers, Origen, Jerome 
(Comment. in Ezech. Lxiv.), and Theod-
oret; among the Jews, Rabbi Dov. Kimchi and Aburbanil; of the Reformers, Heinsius and Calvin; and of
the Romanists, Prudus and Villalpando (Rome, 1596 [-1004, in 3 vols. fol., "opus multifiaria eruditione refertum et ad antiquitates studium utilissimum," Rosenm.). More modern commentaries are those of Starck (1731), Venema 
(1790), Newcome [1788], W. Greenhill [Lond. 
1645-62 5 vols. 4to, reprinted 1829], Fairclairn 
[3d ed. Edinb. 1802]; Henderson [1853], Hütte-
ning [Com. über Ezechiel [Frankh. 1843]], Hil-
zig (Der Prophet Ezechiel erläutert [Leips. 1847.
Lief. vii. of the Kurszef. exeg. Samb,s zu A. T.]). 
[HEJNEZEL]. F. W. F.
As the topography and the monumental sculpt-
ures and inscriptions of Babylon have become be-
ter known in our own day, it is seen how fully the char-
acteristics of Ezekiel's writings agree with the cir-
cumstances in which he was placed at the time.
The imagery and symbolism in particular, under 
which his visions are set before us, are largely de-
rived from Babylonian rather than Hebrew sources.
The costume of his thoughts shows, in the words of 
Stanley, that he had wandered through the vast 
halls of Assyrian monuments, and there gazed on 
all that Assyrian monuments have disclosed to us 
of human dignity and brute strength combined,— the 
eagle-winged lion, human-headed bull (Layard, 
Nin. & Bbl. pp. 448, 494). These complicated 
forms supplied the vehicle of the sublime truths 
that dawned upon him from amidst the mystic 
wheels, the sapphire throne, the amber fire, and 
the rainbow brightness. It is the last glimpse of 
these gigantic emblems, which vanished in the 
prophet's lifetime, only to reappear in our own age 
from the ruins of the long-lost Nineveh (Jewish 
Church, ii. 623 ff.). In Illustration of this trait 
of the prophet's style, see also Dean Millan's His-
tory of the Jews, i. 455 (Amer. ed.), and Hefel-
feld, Gesch. des Volkes Israel, i. 296. But nearly 
all interpreters recognize one signal exception to 
this view of the origin of Ezekiel's imagery. The 
sceneur under which he so graphically describes the 
new spiritual temple which in the latter days God 
was to rear on the top of the mountains for the 
assemble and worship of all nations, and the river 
with its healing waters which was to flow out of it 
to fertilize the whole earth, and convert its moral 
wastes into a garden full of the fruits of holiness, 
and peace, and happiness, is undoubtedly founded 
on his familiarity with the structure of the temple 
at Jerusalem, and the hidden springs of the sacred 
mount, sending forth their waters into the valley 
of the Kidron, and thence onward over its rocky 
bed to the plain of the Jordan and into the Dead 
Sea. Thomson [Lond and Book, ii. 530-535] has 
some extended remarks on this parabolic represen-
tation. There is a special essay on it by W. Ne-
munster [Com. über Ezechiel, 1830]. Exeg. Versuch 
zu Ezech. xvi. i. 1-12 (Uebr. 1848).
The number of symbolic acts which Ezekiel rep-
resents as performed by himself or others, consti-
tutes a peculiar feature of his work (see iv.; 1 
ff.; xii. 1-10; xxv. 3 ff.; xxxvii. 16 ff.). This reck-
ought reminds us of an important rule of interpretation 
regard to many of these acts, which is that they 
are not to be understood by us as having been lit-
terally performed by the prophet before the eyes of 
others, but are described in this manner only as a 
more forcible rhetorical exhibition of the messages 
or teachings which the prophet was sent to announce 
(Einz. in das A. T. p. 514 ff.). We must certainly 
take this view of some of these acts; for their char-
acter is such that they could not have been witnessed 
by those for whom the prophecies were designed, 
or have been brought to their knowledge in any 
other way than by report (e. g. iv. 4-6; v. 1-4; 
xx. 3 ff., &c.). In some instances it may be dif-
ficult in this prophet, or in other prophets, to dis-
tinguish the scenic and the rhetorical symbolism 
from each other.
Baumgarten's article on Ezekiel in Herzog's 
Real-Encycl. iv. 296-304, furnishes a good outline 
of the plan and contents of this neglected book. 
There is a translation of Hävernick's Introduction 
in the Bibl. Sacra for Aug. 1848. To the com-
mentators already mentioned may be added Rosen-
müller, Scholier, etc., 2 vols. (ed. 1826); Maurer, 
Comm. in Tel. Test., with notes chiefly grammat-
ical, i. 1-10 (1838); Ewald, Die Prophet. des Aelteren 
Bundes (1841), ii. 192-257; Umbreit, Prokt.
Commenlor über den Propheten Ezechiel, 3 trans-
ation with exegetical and critical remarks (1843); 
Henry Cowles, Ezechiel and Daniel, with Notes, 
&c., 12mo (New York, 1867); Kliefoth (Das Buch 
Ezechiel. Stud. und erläutert (2 Aith. 
1843-65); G. R. Noyes, New Trans. of the He-
brew Prophets, with Notes, 3d ed. Boston, 1866.; 
vol. ii.; and Hengstenberg, Die Weissagungen des 
Proph. Ezechiel erläutert, 1st Thell (1857). The 
last three works are meant for general readers. On 
The Messianic or prophetic portions of Ezekiel, see 
Hengstenberg's Christologie, iii. 458-492 (Keith's 
trans.); Hasse's Gesch. des Aelteren Bundes, pp. 160-
173 (1839); and Ensfelder, Les prophétes messi-
aniques d'Ezechiel, in the Strasbourg Rev. de 
Theol. 1864, pp. 59-70. On Ezekiel's vision of the 
Temple (ch. xL-xLIII.) there are special treat-
ises by Solomon Bennett, The Temple of Ezekiel, 
&e., Lond. 1824; J. F. Büttcher, in his Proben 
alterthumsh. Schriftkunde (Leips. 1839), pp. 
218-355, with 2 plates; J. J. Balmé-Lück, Des 
Proph. Ezech. Geseht vom Tempel übersichtlich 
dargestellt u. architektonisch erläutert (Ludwigsb. 
1858), with 5 plates and a map (comp. Aubier's 
ff.); and T. O. Paine, Solomon's Temple, etc. (Bos-
ton, 1861), with 21 plates. See also Thenius, Das 
vorzeitliche Jerusalem u. dessen Tempel (an ap-
25 ff. The older literature on the subject is de-
scribed in Rossmüller's Scholia on Ezechiel, ii. 
456 ff.
The oriental explorer, Mr. Loftus (Chaldea and 
Susiana, p. 34, New York, 1857), gives a descrip-
tion and drawing of the reputed tomb of Ezekiel. 
Kiff, where the tomb is found, is a journey of 12 
hours from the site of Babylon, but may be said 
that there be near that city, for the palm-trees which 
shade the tomb are visible from the summit of 
The Birs Nimrud (see Layard's Nineveh and 
Babylon, p. 500). The former of these travellers 
thinks that this may be the prophet's veritable

51
EZEL, THE STONE  

[The stone of departure, Gez.]; or, of separation, First;  

The text of the passage is difficult to interpret. The translation by Joulian is often preferred, but the true reading is still uncertain. The text as it stands now is a possible text that might easily take place.

* The stone was evidently named Ezel (note its import) from the memory of this parting of the two friends from each other at that place. The name is given, therefore, in the passage above, by way of anticipation. As to the question of the state of the Hebrew text, referred to above, see  Themen, Die Bücher Samuel, p. 88. His view is that adopted by the preceding writer. On the contrary, First (Heb. Book of Samuel, i. 1, and Davidson's trans. p. 15) regards the Ezal or Ezalab in the LXX. as not a proper name of a Hebrew text, but is regarded in a different Hebrew text than by the translators, but as an arithmetical substitution on their part of the supposed name of the stone which David and Jonathan met each other. It is objected that no appropriate sense can be derived from Ezal or Ezalab, but the meaning may well be "from the side of the south," i.e., from the south side of the Mediterranean, to the city of Gath, where David was conveyed before the departure of Jonathan's armor-bearer to the city, when David rose up and came forth, and the farewell scene took place between him and Jonathan. Such minuteness is after the manner of the Hebrew writers. For a similar explanation, see Keil and Delitzsch on I K. xx. 41.

EZEM (אֶזֶּמָּה; [Aramaic: אִזְּמָה; [Hebrew: אִזְּמָה; or, of separation, First;  

[The stone of departure, Gez.]; or, of separation, First;

Such minuteness is after the manner of the Hebrew writers. For a similar explanation, see Keil and Delitzsch on I K. xx. 41.
gress to the statement (2 Sam. xxiii. 8, "Adino the Ezrite") was another name for "Josheb-basshebeth a Tacheemonite (A.V. "the Tachmonite that sat in the seat"), chief among the captains." The passage is, however, one of the most disputed in the whole Bible, owing partly to the difficulty of the one man bearing two names so distinct without any assigned reason, and partly to the disappearance of the parallel sentence in 1 Chr. xi. 11. in which for the words "Adino the Ezrite" other Hebrew words are found, not very dissimilar in appearance but meaning "he shook (A.V. "lifted up") his spear." The question naturally arises whether the words in Chronicles are an explanation by a later writer of those in Samuel, or whether they preserve the original text which in the latter has become corrupted.

The form of this particular word is in the original text (the Chetîth) Ezto, which has been altered to Eztn by the Masoret scribes (in the Keri) apparently to admit of some meaning being obtained from it. Jerome read it Eztn, and taking it to be a declension of Ez (= "wood") has rendered the words quwâ tenevrimus ligni verniculâs.

The LXX. and some Hebrew MSS. (see Davidson's Heb. Text) add the words of Chronicles to the text of Samuel, a course followed by the A. V.

The passage has been examined at length by Kennicott (Dissertation 1, pp. 71-128) and Gesenius (Thes. pp. 904, 905), to whom the reader must refer for details. Their conclusion is that the reading of the Chronicles is correct. Ewald does not mention it (Gesen. iii. 180, note). G.

EZRA (םֶזֶרַא = help; Ἕσρα: [Esdras]).

1. The head of one of the twenty-two courses of priests which returned from captivity with Zerubbabel and Jeshua (Neh. xii. 1). But in the somewhat parallel list of Neh. x. 2-8, the name of the same person is written מֶזֶרַא, Azariah, as it is probably in Ezra vii. 1. [Azariah, 22.]

2. The famous Scribe and Priest, descended from Hilkiah the high-priest in Josiah's reign, from whom, as we learn from Jeremiah, Ezra's father, quite a different person, was sprung the high-priest (Ezr. vii. 1). All that is really known of Ezra is contained in the four last chapters of the book of Ezra, and in Neh. viii. and xii. 26.

From these passages we learn that he was a learned and pious priest residing at Babylon in the time of Artaxerxes Longimanus. The origin of his influence with the king does not appear, but in the seventh year of his reign, in spite of the unfavorable report which had been sent by Rehum and Shimshai, he obtained leave to go to Jerusalem, and to take with him a company of Israelites, together with priests, Levites, singers, porters, and Nethinims. Of these a list, amounting to 1754, is given in Ezr. viii.: and these, also, doubtless form a part of the full list of the returned captives contained in Neh. vii., and in duplicate in Ezr. ii. The journey of Ezra and his companions from Babylon to Jerusalem occupied just four months; and they brought up with them a large force of men and camels, and much silver and silver vessels, contributed, not only by the Babylonian Jews, but by the king himself and his counsellors. These offerings were for the house of God, to beautify it, and for the purchase of bullocks, rams, and the other offerings required for the temple-service. In addition to this Ezra was empowered to draw upon the king's treasurers bearing the river for any further supplies he might require; and all priests, Levites, and other ministers of the temple were exempted from taxation.

Ezra had also authority given him to appoint magistrates and judges in Judæa, with power of life and death over all offenders. This ample commission was granted him at his own request (Ezr. vii. 9), and it appears that his great design was to effect a religious reformation among the Palestine Jews, and to bring them back to the observation of the law of Moses, from which they had grievously declined. His first step, accordingly, was to enforce a separation from their wives upon all who had made heathen marriages, in which number were many priests and Levites, as well as other Israelites. This was effected in little more than six months after his arrival at Jerusalem. With the detailed account of this important transaction, Ezra's autobiography ends abruptly, and we hear nothing more of him till, 13 years afterwards, in the 29th of Artaxerxes, we find him again at Jerusalem with Nehemiah "the Tirshatha." It is generally assumed that Ezra had continued governor till Nehemiah superseded him; but as Ezra's commission was only of a temporary nature, "to inquire concerning Judah and Jerusalem" (Ezr. vii. 14), and to carry thither "the silver and gold which the king and his counsellors had freely offered unto the God of Israel" (15), and as there is no trace whatever of his presence at Jerusalem between the 8th and the 20th of Artaxerxes, it seems probable that after he had effected the above-named reformation, and had appointed competent judges and magistrates, with authority to maintain it, he himself returned to the king of Persia. This is in itself what one would expect, and what is borne out by the parallel case of Nehemiah, and it also accounts for the abrupt termination of Ezra's narrative, and for that relapse of the Jews into their former irregularities which is apparent in the book of Nehemiah. Such a relapse, and such a state of affairs at Jerusalem in general, could scarcely have occurred if Ezra had continued there. Whether he returned to Jerusalem with Nehemiah, or separately, does not appear certainly, but as he is not mentioned in the latter part of the narrative till after the sealing of the wall (Neh. viii. 1), it is perhaps probable that he followed the latter some months later, having, perhaps, been sent for to aid him in his work. The functions he executed under Nehemiah's government were purely of a priestly and ecclesiastical character, such as reading and interpreting the law of Moses to the people during the eight days of the Feast of Tabernacles, praying in the congregation, and assisting at the dedication of the wall, and in promoting the religious reformation so happily effected by the Tirshatha. But in such he filled the first place: being repeatedly coupled with Nehemiah the Tirshatha (viii. 9, xii. 26), while Eliashib the high-priest is not mentioned as taking any part in the reformation at all. In the sealing to the covenant described Neh. x., Ezra probably sealed under the patrocinium of Zerubbabel and Azariah (v. 2). As Ezra is not mentioned after Nehemiah's designation for Babylon in the 23d Artaxerxes, and as everything else points to confirming Nehemiah's absence (Neh. xiii.), it is not unlikely that Ezra may have died or returned to Babylon before that year. Josephus, who should be our next best authority after Scripture, evidently knew nothing about the time or the place of his death. He vaguely says, "he died an old man, and was
buried in a magnificent manner at Jerusalem (1 Esdr. xi. 5, § 5), and places his death in the high-priesthood of Zophim, and before the government of Nehemiah! But that he lived under the high-priesthood of Eliashib and the government of Nehemiah is expressly stated in Nehemiah; and there was a strong Jewish tradition that he was buried in Persia. Thus Benjamin of Tudela says of Nehor-Samarah — apparently some place on the lower Tigris — on the frontier of Persia: Zenimza according to the Talmudists, otherwise Z zamzumu — "The sepulchre of Ezra the priest and scribe is in this place, where he died on his journey from Jerusalem to king Artaxerxes" (vol. i. p. 116), a tradition which certainly agrees very well with the narrative of Nehemiah. This sepulchre is shown to this day (ib. vol. ii., note p. 116). As regards the traditional history of Ezra, it is extremely difficult to judge what portion of it has any historical foundation. The principal works ascribed to him by the Jews, and, on the strength of their testimony, by Christians also, are: — (1.) The institution of the Great Synagogue, of which, the Jews say, Ezra was president, and Daniel, Haggai, Zechariah, Malachi, Zorobabel, Mordecai, Joshua, Nehe- miah, &c., were members, Simon the Jint, the last survivor, living on till the time of Alexander the Great! (2.) The setting the canon of Scripture, and restoring, correcting, and editing the whole sacred volume according to the threefold arrangement of the Law, the Prophets, and the Hagiographa, with the divisions of the Peshitta, or verses, the vowel-points handed down by tradition from Moses, and the emendations of the Keri. (3.) The introduction of the Child's character instead of the old Hebrew or Samaritan. (4.) The authorship of the books of Chronicles, Ezra, Nehemiah, and, some add, Esther; and many of the Jews say, also of the books of Ezekiel, Daniel, and the 12 prophets. (5.) The establishment of dynasty.
Ezra, Book of

Scripture not till they were sanctioned by Malachi. There does not, however, seem to be sufficient ground for forming a definite opinion on the details of the subject. In like manner one can only say that the introduction of the Chaldee character, and the commencement of such stated meetings for hearing the Scriptures read as led to the regular synagogal-service, are things likely to have occurred about this time. For the question of Ezra's authorship, see CHRONICLES; also Ezra, Book of.

A. C. H.

3. (7777) : Ezpri; [Vat. Esperi] Ezrra. A name which occurs in the obscure genealogy of 1 Chr. 11: 17. According to the author of the Questions in Paral., Ezra is the same as Amram, and his sons Jether and Mered are Aaron and Moses.

Ezra, Book of. The book of Ezra speaks for itself to any one who reads it with ordinary intelligence, and without any prejudice as to its nature and composition. It is manifestly a continuation of the books of Chronicles, as indeed it is called by Hilary, bishop of Poitiers, Servsums Tzvrum Eztra (sp. Cosin’s Canon of Scr. 51). It is naturally a fresh book, as commenced the history of the returned captives after seventy years of suspension, as it were, of the national life. But whereas the genealogy of ch. 1. is throughout, the book at once declare the nature of it, which its contents also abundantly confirm. Like the two books of Chronicles, it consists of the contemporary historical journals kept from time to time by the prophets, or other authorized persons, who were eye-witnesses for the most part of what they record, and whose several narratives were afterwards strung together, and either abridged or added to, as the case required, by a later hand. That later hand, in the book of Ezra, was doubtless Ezra’s own, as appears by the four last chapters, as well as by other matter inserted in the previous chapters. While therefore, in a certain sense, the whole book is Ezra’s, as put together by him, yet, strictly, only the four last chapters are his original work. Nor will it be difficult to point out with tolerable certainty several of the writers of whose writings the first six chapters are composed. It has already been suggested (Chronicles) that the chief portion of the last chapter of 2 Chr. and Ezra i. may probably have been written by Daniel. The evidences of this in Ezr. i. must now be given more fully. No one probably can read Daniel as a genuine book, and not be struck with the very singular circumstance that, while he tells us in ch. ix. that he was aware that the seventy years’ captivity, foretold by Jeremiah, was near its close, and was led thereby to pray earnestly for the restoration of Jerusalem, and while he records the remarkable vision in answer to his prayer, yet he takes not the slightest notice of Cyrus’s decree, by which Jeremiah’s prophecy was fulfilled, and his own heart’s desire and prayer to God for Israel was accomplished, and which must have been the most stirring event in his long life, not even excepting the incident of the den of lions. He passes over in utter silence the first year of Cyrus, to which pointed allusion is made in Dan. i. 21, and proceeds n ch. x. to the third year of Cyrus. Such silence is utterly unaccountable. But Ezr. i. supplies the missing notice. If placed between Dan. ix. and x. it exactly fills up the gap, and records the event of the first year of Cyrus, in which Daniel was so deeply interested. And not only so, but the manner of the record is exactly Daniel’s. Ezr. i. 1: “And in the first year of Cyrus K. of Persia,” is the precise formula used in Dan. i. 1, ii. 1, vii. i., viii. i. ix. 1, xi. 1. The designation (ver. 1, 2, 8) “Cyrus king of Persia” is that used Dan. x. 1; the reference to the prophecy of Jeremiah in ver. 1 is similar to that in Dan. ix. 2, and the natural sequence to it. The giving the text of the decree, ver. 2-4 (cf. Dan. iv.), the mention of the name of Menaphath the treasurer,” ver. 8 (cf. Dan. i. 3, 11), the allusion to the sacred vessels placed by Nebuchadnezzar in the house of his god, ver. 7 (cf. Dan. i. 2), the giving the Chaldee name of Zerubbabel, ver. 8, 11 (cf. Dan. i. 7), and the whole locus standi of the narrator, who evidently wrote at Babylon, not at Jerusalem, are all circumstances which in a marked manner point to Daniel as the writer of Ezr. i. Nor is there the least improbability in the supposition that if Ezra edited Daniel’s papers he might think the chapter in question more conveniently placed in its chronological position in the Chronicles than in the collection of Daniel’s prophecies. It is scarcely necessary to add that several chapters of the prophets (Isiah and Jeremiah are actually found in the book of Kings, as e. g. Is xxxvi.-xxxix. in 2 K. xxvii.-xxviii.)

Ezr. i. then was by the hand of Daniel written, as in the case of the first chapter of the Chronicles, and far more so than ch. i., where the change of name from Sheshbazzar to Zerubbabel in ver. 2, the mention of Nehemiah the Tirshatha in ver. 2 and 63, and that of Mordecai in ver. 2, at once indicate a different and much finer hand, we need not seek long to discover where it came from, because it is found in extenso, correction et literation (with the exception of clerical errors), in the 7th ch. of Nehemiah, where it belongs beyond a shadow of doubt (NEHEMIAH, Book of). This portion then was written by Nehemiah, and was placed by Ezra, or possibly by a still later hand, in this position, as bearing upon the return from captivity related in ch. i., though chronologically out of place. Whether the extract originally extended so far as iii. 1 may be doubted. The next portion extends from iii. 2. to the end of ch. vi. With the exception of one large explanatory addition by Ezra, extending from iv. 6 to 24; which has cruelly but most needlessly perplexed commentators, this portion is the work of a writer contemporary with Zerubbabel and Josiah, and an eye-witness of the rebuilding of the Temple in the beginning of the reign of Darius Hystaspis. The minute details given of all the circumstances, such as the weeping of the old men who had seen the first Temple, the names of the Levites who took part in the work, of the heathen governors who hindered it, the expression (vi. 15) “This house was finished,” &c., the number of the sacrifices offered at the dedication, and the whole tone of the narrative, bespeak an actor in the scenes described. Who then was so likely to record these interesting events as one of those prophets who took an active part in promoting them, and a branch of whose duty it would be to continue the national chronicles? That it was the prophet Haggai becomes tolerably sure when we observe further the following coincidences in ch. vi.

1. The title “the prophet,” is throughout this portion of Ezra attached in a peculiar way to the name of Haggai. Thus chapter v. 1 we read “Then the prophets. Haggai the prophet, and Zechariah the son of Iddo, spakehisi,” &c.; and vi. 14
They prospered through the prophesying of Hag- 
gaii the prophet, and Zechariah the son of Iddo.
And in like manner in Hag. i. 3, 12, ii. 1, 10, he is called "Haggai the prophet."
2. The designation of Zerubbabel and Jeshua is identical in the two writers. "Zerubbabel the son of Shealtiel, and Jeshua the son of Jozadak" (comp. Ezr. iii. 2, 8, v. 2, with Hag. i. 12, 14, ii. 2, 4, 23). It will be seen that both writers usually name them together, and in the same order: Zechariah, on the contrary, does not once name them together, and calls them simply Zerubbabel, and Jeshua. Only in vi. 11 he adds "the son of Josecheu."
3. The description in Ezr. v. 1, 2 of the effect of the preaching of Haggai and Zechariah upon Zerubbabel, Jeshua, and the people, is identical with that in Hag. i., only abbreviated. And Hag. ii. 3 alludes to the interesting circumstance recorded in Ezr. iii. 12.
4. Both writers mark the date of the transactions they record by the year of "Darius the king," (Ezr. iv. 24, v. 15, compared with Hag. i. 1, 15, ii. 10, &c.).
5. Ezr. iii. 8 contains exactly the same enumeration of those who worked, viz. "Zerubbabel, Jeshua, and the remnant of their brethren," as Hag. i. 12, 14, where we have "Zerubbabel, and Jeshua, with all the remnant of the people" (comp. too Ezr. vi. 16, and Hag. ii. 2).
6. Both writers use the expression "the work of the house of the Lord" (Ezr. iii. 8 and 9, compared with Hag. i. 14); and both use the phrase "the foundation of the temple was laid" (Ezr. iii. 6, 10, 11, 12, compared with Hag. ii. 18).
7. Both writers use indifferently the expressions "the house of the Lord," and "the temple of the Lord," but the former much more frequently than the latter. Thus the writer in Ezra uses the expression "the house" (חֵלֶק) twenty-five times, to six in which he speaks of "the temple" (בָּרוּךְ וְזֶרוּבֶבָּב.). Haggai speaks of "the house" seven times, of "the temple" twice.
8. Both writers make marked and frequent reference to the law of Moses. Thus comp. Ezr. iii. 2, 3-6, 8, vi. 14, 16-22, with Hag. i. 8, 10, ii. 5, 17, 11-13, &c.

Such strongly marked resemblances in the compass of two such brief portions of Scripture seem to prove that they are from the pen of the same writer.

But the above observations do not apply to Ezr. iv. 6-23, which is a parenthetical addition by a much later hand, and, as the passage most clearly shows, made in the reign of Artaxerxes Longimanus. The compiler who inserted chapter ii., a document drawn up in the reign of Artaxerxes, to illustrate the return of the captives under Zerubbabel, here inserts a notice of two historical facts — of which one occurred in the reign of Xerxes, and the other in the reign of Artaxerxes — to illustrate the opposition offered by the heathen to the rebuilding of the temple in the reign of Cyrus and Cambyses. He tells us that in the beginning of the reign of Xerxes, i.e. before Esther was in favor, they had written to the king to prejudice him against the Jews — a circumstance, by the way, which may rather have inclined him to listen to Haman's proposition; and he gives the text of letters sent to Artaxerxes, and of Artaxerxes' answer, on the strength of which Nehum and Shimshai forcibly

numbted the Jews from rebuilding the city. These letters doubtless came into Ezra's hands at Babylon, and may have led to those endeavors on his part to make the king favorable to Jerusalem which issued in his own commission in the seventh year of his reign. At ver. 24 Haggai's narrative proceeds in connection with ver. 5. The mention of Artaxerxes in chapter vi. 14, is of the same kind. The last four chapters, beginning with chapter viii., are Ezra's own, and continue the history after a gap of fifty-eight years — from the sixth of Darius to the reign of Artaxerxes. The only history of Judah during this interval is what is given in the above-named parenthesis, from which we may infer that during this time there was no one in Palestine to write the Chronicles. The history of the Jews in Persia for a period is given in the book of Esther.

The text of the book of Ezra is not in a good condition. There are a good many palpable corruptions both in the names and numbers, and perhaps in some other points. It is written partly in Hebrew, partly in Chaldee. The Chaldee begins at iv. 8, and continues to the end of vi. 18. The letter or decree of Artaxerxes, vii. 12-26, is also given in the original Chaldee. There has never been any doubt about Ezra being canonical, although there is no quotation from it in the N. T.

Augustine says of Ezra "magis rerum gestarum scriptor est habitus quam prophetae" (De Civ. Del. xviii. 36). The period covered by the book is eighty years, from the first of Cyrus n. c. 539, to the beginning of the eighth of Artaxerxes n. c. 456. It embraces the governments of Zerubbabel and Ezra, the high-priesthood of Jeshua, Johanan, and the early part of Eliashib; and the reigns of Cyrus, Cambyses, Smerdis, Darius Hystaspes, Xerxes, and part of Artaxerxes. Of these Cambyses and Smerdis are named only in iv (Ezra, First book of.)

A. C. H.

* Among the later writers on the book of Ezra are these: Keil in his Apol. Versuch ub. die Bücher der Chronik, pp. 195-194, and in his Einl. in das Alte Testament, pp. 529-528; Maurer, Geschichte des Buches Ezra und Nehemjah (1866). See also Herzfeld, Die Bücher Ezra und Nehemjah, ii. 1862; Wordsworth, in his Holy Bible with Introduction and Notes, iii. 301-324 (1866); and Kuenen, Hist. crit. der Bücher des Alten Test. (1866), p. 496-522 (1866). It is the opinion of many eminent critics of different schools, as Zimm, Ewald, Bertheau, Walthinger, Dilman, Herzfeld, Davidson, Bickel, and Kuenen, that the books of Ezra, Nehemjah, and Chronicles were compiled by the same person.

II.

EZRAHITE, THE (זֶרֶבַבֶּל) — זֶרֶבַבֶּל [Vat. -'erel]. Alex. Ξερβαβέλ, [in Ps. -'ερβαβέλ, Vat. Sin. -'ερβαβέλ (Ξερβαβέλ), a title attached to two persons — Ethan (1 K. iv. 31; Ps. lxxxix. title) and Heman (Ps. lxxviii. title). The word is naturally derivable from Ezra, or—which is almost the same in Hebrew — Zerach, זֶרֶךְ; and accordingly in 1 Chr. ii. 6, Ethan and Heman are both given as sons of Zeraḥ the son of Judah

EZRAHITES, THE (זֶרֶבַבֶּל) — זֶרֶבַבֶּל [Vat. -'erel]. Alex. Ξερβαβέλ, [in Ps. -'ερβαβέλ, Vat. Sin. -'ερβαβέλ (Ξερβαβέλ), a title attached to two persons — Ethan (1 K. iv. 31; Ps. lxxxix. title) and Heman (Ps. lxxviii. title). The word is naturally derivable from Ezra, or—which is almost the same in Hebrew — Zerach, זֶרֶךְ; and accordingly in 1 Chr. ii. 6, Ethan and Heman are both given as sons of Zeraḥ the son of Judah
Another Ethan and another Heman are named as Levites and musicians in the lists of 1 Chr. vi. and elsewhere.

EZRI ("EZRI [help of Jehovah, a contracted form of Gedeon. See Gedeon."") Ez 601; [Vat. 10896; Comp. Abk. Alex. Egd: Ezri], son of Chodub, superintendent for king David of those who did the work of the field for tillage of the ground (1 Chr. xxvii. 26).

F.

FABLE (μιχαθος: fabula). Taking the words fable and parable, not in their strict etymological meaning, but in that which has been stamped upon them by current usage, looking, i.e. at the .Esopic fable as the type of the one, at the Parables of the N. T. as the type of the other, we have to ask (1) in what relation they stand to each other, as instruments of moral teaching? (2) what use is made in the Bible of this or of that form? That they have much in common is, of course, obvious enough. In both we find "statements of facts, which do not even pretend to be historical, used as vehicles for the exhibition of a general truth" (Neander, Leben Jesu, p. 68). Both differ from the Mythus, in the modern sense of that word, in being the result of a deliberate choice of such a mode of teaching, not the spontaneous, unconscious evolution of thought in some symbolic form. They take their place so far as species of the same genus: What are the characteristic marks by which one differs from the other, it is perhaps easier to find than to define. Thus we have (comp. Trench On Parables, p. 2) (1) Lessing's statement that the fable takes the form of an actual narrative, while the Parable assumes only that what is related might have happened; (2) Herder's, that the difference lies in the fable's dealing with brute or inanimate nature, in the parable's drawing its materials exclusively from human life; (3) Ollasneus's (on Matt. xii. 1), followed by Trench (L. c.), that it is to be found in the higher truths of which the parable is the vehicle. Perhaps the most satisfactory summing up of the chief distinctive features of each is to be found in the following extract from Neander (L. c.): "The parable is distinguished from the fable by this, that, in the latter, qualities, or acts of a higher class of beings may be attributed to a lower (c. g. those of men to brutes); while in the former, the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. Perhaps more introduction of brutes as personal agents, in the fable, is not sufficient to distinguish it from the parable, which may make use of the same contrivance; as, for example, Christ employs the sheep in one of his parables. The great distinction here, also, lies in what has already been remarked: brutes introduced in the parable act according to the law of their nature, and the two spheres of nature and of the kingdom of God are carefully separated from each other. Hence the reciprocal relations of brutes to each other are not made use of, as these could furnish no appropriate image of the relation between man and the kingdom of God."

Of the fable, we have but two examples in the Bible, (1) that of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg. ix. 8-15), (2) that of the cedar of Lebanon and the thistle, as the answer of Jehovah to the challenge of Amanaz (2 K. xiv. 9). The narrative of Ez. xvii. 1-10, though, in common with the fable, it brings before us the lower forms of creation as representatives of human characters and destinies, differs from it in the points above noticed, (1) in not introducing them as having human attributes, (2) in the higher prophetic character of the truths conveyed by it. The great eagle, the cedar of Lebanon, the spreading vine, are not grouped together as the agents in a fable, but are simply, like the bear, the leopard, and the lion in the visions of Daniel, symbols of the great monarchs of the world.

In the two instances referred to, the fable has more the character of the Greek alor (Quint. Inst. Orat. v. 11) than of the μιχαθος: that is, is less the fruit of a vivid imagination, sporting with the analogies between the worlds of nature and of men, than a covert reproof, making the sinner which it affects to hide all the sharper (Müller and Donaldson, Hist. of Greek Literature, vol. i. c. xii.). The appearance of the fable thus early in the history of Israel, and its entire absence from the direct teaching both of the O. and N. T. are, of each of them, in its way, significant. Taking the received chronology, the fable of Jotham was spoken about 1209 n. c. The Arabian traditions of Lokman do not assign to him an earlier date than that of David. The earliest Greek μιχαθος is that of Hesiod (Op. et D. 292), and the prose form of the fable does not meet us till we come (about 550 n. c.) to Steichorus and Ἀσσ. The first example in the history of Rome is the apologue of Menenius Agrippa n. c. 494, and its genuineness has been questioned on the ground that the fable could hardly at that time have found its way to Latium (Müller and Donaldson, l. c.). It may be noticed too that when collections of fables became familiar to the Greeks they were looked on as imported, not indigenous. The traditions that surround the name of Ἀσσ, the absence of any evidence that he wrote fables, the traces of eastern origin in those ascribed to him, leave him little more than the representa- tive of a period when the forms of teaching, which had long been familiar to the more eastern nations, were travelling westward, and were adopted eagerly by the Greeks. The collections themselves are described by titles that indicate a foreign origin.

They are Libyan (Arist. Rhet. ii. 20), Cyprian, Cilician. All these facts lead to the conclusion that the Hebrew mind, gifted, as it was, in a special measure, with the power of perceiving analogies in things apparently dissimilar, attained, at a very early period of its growth, the breadth of view which does not appear in the history of other nations till a later period. Whatever antiquity may be ascribed to the fables in the comparatively later collection of the Pancho Teatra, the land of Canaan is, so far as we have any data to conclude from, the fatherland of fable. To conceive brutes or inanimate objects as representing human characteristics, to personify them as acting, speaking, reasoning, to draw lessons from them applicable to human life, — this idea has been the formation of analogies, which lies in the time of the Judges. The part assigned in the earliest records of the Bible to the impressions made by the brute creation on the mind of man then "the Lord God formed every beast of
The field and every foule of the air, and brought them unto Adam to see what he would call them" (Gen. ii. 19), and the apparent symbolon of the "scepter in the hand" or the "sword at the side" (Is. I.) are at once indications of teaching adopted to men in the possession of this power, and must have helped to develop it (Herder, "Gewalt der Ethischen Positiv," Werke, xxxiv. p. 16, ed. 1826).

The large number of proverbs in which analogies of this kind are made the bases of a moral precept, and some of which (e.g. Prov. xvi. 11, xxv. 28—29) are of the nature of condensed fables, show that there is no decline of this power as the intellect of the people advanced. The absence of fables accordingly from the teaching of the O. T. must be ascribed to their want of fitness to be the media of the truths which that teaching was to convey. The points in which brutes or inanimate objects present analogies to man are chiefly those which belong to his lower nature, his pride, indulgence, cunning, and the like, and the lessons derived from them accordingly do not rise higher than the prudential morality which aims at repressing such defects (comp. Trench on the "Parables," l. c.).

The fable, apart from the associations of a grotesque and hilarious nature which gather round it, apart too from its presentings narratives which are "nece verae nec versilimines" ("De Invent. i. 19), is inadequate as the exponent of the higher truths which belong to man's spiritual life. It must serve to express the relations between man and man; it fails to represent those between man and God. To do that is the office of the "Parables," finding its outstand framework in the dealings of men with each other, or in the world of nature as it is, not in any grotesque parody of nature, and exhibiting, in either case, real and not fanciful analogies.

The fable seizes on that which man has in common with the creatures below him; the parable rests on the truths that man is made in the image of God, and that "all things are double one against another."

It is noticeable, as confirming this view of the office of the fable, that, though those of Jesus (so called) were known to the great preacher of righteousness at Athens, though a narrative paraphrase of some of them was among the employments of his imprisonment (Acts, Phars., pp. 60, 61), they were not employed by him as illustrations, or elements of instruction. While Socrates shows an appreciation of the power of such fables to represent some of the phenomena of human life, he was not, he says, in this sense of the word, "μοθολογικός." The myths, which appear in the "Gorgias," the "Phaedrus," the "Phaedon," the "Republic," are as unlike as possible to the fable of fables, are (to take his own account of them) "οὶ μὲν άλλά ψευδά "follow, true, though figurative, representations of spiritual realities, while the illustrations from the common life of nature were so conspicuous in his ordinary teaching, though differing in being comparisons rather than narratives, come nearer to the parables of the Bible (comp. the contrast between τά "Σωματικά" as examples of the "παραβολή" and the "λόγος Αισθήσεως," Arist. "Rhet. ii. 29). It may be said indeed that the use of the fable as an instrument of teaching (apart from the embellishments of wit and humor with which it is invested) as such writers as Lessing and La Fontaine) belongs rather to childhood, and the child-like period of national life, than to a more advanced development. In the earlier stages of political change, as

in the cases of Jotham, Steichorus (Arist. "Rhet. l. c."), Menenius Agrrippa, it is used as an element of persuasion or reproof. It ceases to appear in the highest epochs of noble and statesmanlike special excellence of fables is that they are "διηγηματικοί" (Arist. "Rhet. l. c."); that "discreet animus solent, praecipe rusticorum et imperitorum" ( quaint. Inst. Orat. l. c.).

The μέθοδος of false teachers claiming to belong to the Christian church, alluded to by writers of the N. T. in connection with "γεγονός ἀποχρος τοις τοις (1 Tim. i. 4), or with epithets "λυσσακικοί (1 Thess. iii. 1) do not appear to have had the character of fables, properly so called. As applied to them, the word takes its general meaning of anything false or unreal, and it does not fall within the scope of the present article to discuss the nature of the falsehoods so referred to. [See PARABLE.]

FAIR HAVENS (Καλαόν Ἀμφίπολις), a harbor in the island of Crete (Acts xxvii. 5), not mentioned in any other ancient writing. There seems no probability that it is, as Biscoe suggested (on the "Acts," p. 347, ed. 1829), the "Καλάκ Αμφίπος of Steph. Byz. — for that is said to be a city, whereas Fair Havens is described as "a place near to which was a city called Lasus" (τόπος τις ἢ ἔργον ἡ πόλις Λασον). Moreover Mr. Fashby found ("Travels in Crete," vol. ii. p. 57) a district called "Acris," and it is most likely that "Καλάκ Αμφίπος was situated there; but that district is in the W. of the island, whereas Fair Havens was on the S. Its position is now quite certain. Though not mentioned by classical writers, it is still known by its old Greek name, as it was in the time of Piocke, and other early travellers mentioned by Mr. Smith ("Visage and Shipwreck of St Paul," 2d ed. pp. 80-82). Lasus also has recently been most explicitly discovered. In fact Fair Havens appears to have been practically its harbor. These places are situated four or five miles to the E. of Cape Matala, which is the most conspicuous headland on the S. coast of Crete, and immediately to the W. of which the coast trends suddenly to the N. This last circumstance explains why the ship which conveyed St. Paul was brought to anchor in Fair Havens. In consequence of violent and continuing N. W. winds she had been unable to hold on her course from Italy to Crete (Acts xvi. 7 and xvi. 8) and had run down, by Salamis, under the lee of Crete. It was possible to reach Fair Havens; but beyond Cape Matala the difficulty would have recovered, so long as the wind remained in the same quarter. A considerable delay took place (ver. 9) during which it is possible that St. Paul may have had opportunities of preaching the gospel at Lasus, or even at Gortyna, where Jews resided (1 Macc. v. 29), and which was not far distant; but all this is conjectural. A consultation took place, at which it was decided, against the apostle's advice, to make an attempt to reach a good harbor named Phœnicia, their present anchorage being ἀνείθεσεν πολὺς παραγεμασίαν (ver. 12). All such terms are comparative; and there is no doubt that, as a safe winter harbor, Fair Havens is infinitely inferior to Phœnicia; though perhaps even as a matter of safety St. Paul advise to visit. However this may be, the south wind, which sprang up afterwards (ver. 13), proved delusive; and the vessel was caught by a hurricane ("Εκκύκλών") on her way towards Phœnicia, and ultimately wrecked.
alternations of commercial business in which the
merchants of Tyre were engaged. That the first
of these words cannot signify "fairs" is evident
from ver. 12: for the inhabitants of Tarshish did
not visit Tyre, but "vice versa." Let the reader sub-
stitute "paid" or "exchanged for thy wares," for
"occupied in thy fairs," and the sense is much
improved. The relation which this term bears to
mavarah, which properly means barter, appears to be
pretty much the same as exists between exports and
imports. The requirements of the Tyrians them-
selves, such as slaves (13), wheat (17), steel (19),
were a matter of mavarah: but where the business
consisted in the exchange of Tyrian wares for for-
eign productions, it is specified in this form, "Tar-
shish paid for thy wares with silver, iron, tin, and
lead." The use of the terms would probably have
been more intelligible if the prophet had mentioned
what the Tyrians gave in exchange; as it is, he
only notices the one side of the bargain, namely,
what the Tyrians received, whether they were buy-
ers or sellers.

FALLOW-DEER (גָּחוּר, gychmār. 
Alex. βαύθαλος: babulus). The Heb. word,
which is mentioned only in Deut. xiv. 5, as the
name of one of the animals allowed by the Leviti-
cal law for food, and in 1 K. iv. 23, as forming
part of the provisions for Solomon's table, appears
to point to the Antilope babulus, Pallus: the βαύ-
θαλος of the Greeks (see Herod. iv. 192; Ari-
stotle, Hist. Anim. iii. 6, ed. Schneider, and De Port.
Anim. iii. 2, 11, ed. Bekker: Oppian, Cyn. ii. 300)
is properly, we believe, identified with the afore-
named antelope. From the different descriptions of
the yechmār, as given by Arabian writers, and
cited by Bochart (Hieroc. ii. 284 ff.), it would
seem that 4dis is the animal denoted; though

Fair Havens in Crete.
FALLOW-DEER

Dauri's remarks in some respects are fabulous, and he represents the yewmuie as having decided horns, which will not apply to any antelope. Still Cazinarius, according to Rosenmüller, identifies the yewmuie with the beeker-clawed ("wild cow"), which is the modern name in N. Africa for the Alcelaphus buselaphus. Kitchin (Pict. Bib., Deut. l. c.) says, "The yewmuie of the Hebrews is without doubt erroneously identified with the falloow-deer, which does not exist in Asia," and refers the name to the Ore{x} leucogryx, citing Niebuhr as authority for stating that this animal is known among the eastern Arabs by the name of yewmuie. The fallow-deer (Cervus dama) is undoubtedly a native of Asia; indeed Persia seems to be its proper country. Hassequist (Trans. p. 211) noticed this deer in Mount Tabor. Viedmann (Ver. Samml. 1. 178) believes that the yewmuie is best denoted by the Cervus dama. The authority for the LXX., however, in a question of this kind, should decide the matter: accordingly we have little doubt but that the yewmuie of the Heb. Scriptures denotes the beeker-clawed, or "wild ox," of Barbary and N. Africa. (See Shaw's Travels, p. 242, and Suppl. to Shaw, loc. cit. Egypt, 1. 223, figs. 3, 4, and p. 229, fig. 19). This animal, which is about the size of a stag, is common in N. Africa, and lives in herds. We were at one time inclined to refer the Heb yewmuie to the Ore{x} leucogryx (see art. Ox); on further investigation, however, we have decided for the Alcelaphus. The Teo or To may perhaps therefore denote the former antelope. W. H.

* The Arabic (جيوار) is described in a work of Natural History as "a species originating in the Barabary States, its size somewhat smaller than the red deer, but in form resembling it, having erect spirally curving ringed horns: the color of its body is reddish-brown, and the belly and inner surface of the thighs are white. The female has no horns." This description fixes the species as the Alcelaphus buselaphus.

G. E. P.

FAMINE

When the sweet influences of the Pleiades are bound, and the lands of Scorpio cannot be loosed, then it is that famines generally prevail in the lands of the Bible. In Egypt a deficiency in the rise of the Nile, with drying winds, produces the same results. The famines recorded in the Bible are traceable to both these phenomena; and we generally find that Egypt was restored to when scarcity afflicted Palestine. This is notably the case in the first three famines, those of Abraham, of Isaac, and of Jacob, although in the last case Egypt was involved in the calamity, and only saved from its horrors by the providential policy of Joseph. In this instance, too, the famine was widespread, and Palestine further suffered from the restriction which must have been placed on the supplies usually derived, in such circumstances, from Egypt.

In the whole of Syria and Arabia, the fruits of the earth must ever be dependent on rain; the watershed having few large springs, and the small rivers not being sufficient for the irrigation of even the level lands. It therefore the heavy rains of November and December fail, the sustenance of the people is cut off in the parching drought of harvest-time, when the country is almost devoid of moisture. Further, the pastoral tribes rely on the scanty herbage of the desert-plains and valleys for their flocks and herds; for the desert is interspersed in spring-time with spontaneous vegetation, which is the product of the preceding rain-fall, and fails almost totally without it. It is therefore not difficult to conjecture the frequent occurrence and scarcity of famines in ancient times, when the scattered

population, rather of a pastoral than an agricultural country was dependent on natural phenomena which, however, regular in their season, occasionally failed, and with them the sustenance of man and beast.

Egypt, again, owes all its fertility—a fertility that gained for it the striking comparison to the "Garden of Eden"—to its mild climate and the annual rise inundates nearly the whole land and renders its cultivation an easy certainty. But this very bounty of nature has not unfrequently exposed the country to the opposite extreme of drought. With scarcely any rain, and that only on the Mediterranean coast, and with wells only supplied by filtration from the river through a nitrous soil, a failure in the rise of the Nile almost certainly entails a degree of scarcity, although it followed by cool weather, and if only the occurrence of a single year, the labor of the people may in a great measure avert the calamity. The causes of dearth and famine in Egypt are occasioned by defective inundation, preceded and accompanied and followed by prevalent easterly and southerly winds. Both these winds dry up the earth, and the latter, keeping back the rain-clouds from the north, are perhaps the chief cause of the defective inundation, as they are also by their accelerating the current of the river—the northerly winds producing the contrary effects. Famines in Egypt and Palestine seem to be affected by drought extending from northern Syria, through the meridian of Egypt, as far as the highlands of Abyssinia.

The first famine recorded in the Bible is that of Abraham after he had pitched his tent on the east of Bethel: "And there was a famine in the land; and they were driven of the land of Egypt to go unto Canaan..." (Gen. xi. 30). We may conclude that this famine was extensive, although this is not quite proved by the fact of Abraham's going to Egypt; for on the occasion of the second famine, in the days of Isaac, this patriarch found refuge with Abimelech king of the Philistines in Gerar, and was warned by God not to go down into Egypt, whither therefore we may suppose he was journeying (Gen. xxvi. 1 ff.). We hear no more of times of scarcity until the great famine of Egypt which was over all the face of the earth: "And all countries came into Egypt to buy [corn], because the famine was [so] sore in all lands" (Gen. xii. 56, 57). "And the sons of Israel came to buy [corn] among those that came; for the famine was in the land of Canaan" (xii. 5). Thus in the third generation, Jacob is afflicted by the famine, and sends from Hebron to Egypt when he hears that there is corn there; and it is added in a later passage, on the occasion of his sending the second time for corn to Egypt, "and the famine was sore in the land," i.e. Hebron.

The famine of Joseph is discussed in art. Egypt, so far as Joseph's history and policy is concerned. It is only necessary here to consider its physical characteristics. We have mentioned the chief causes of famines in Egypt: this instance differs in the providential recurrence of seven years of plenty, whereby Joseph was enabled to provide against the coming dearth, and to supply not only the population of Egypt with corn, but those of the surrounding countries: "And the seven years of plenteousness, that were in the land of Egypt, were ended. And the seven years of dearth began to come, according as Joseph had said: and the dearth was in all lands; but in all the land of Egypt there was bread. And when all the land of Egypt was famished, the people cried to Pharaoh for bread: and Pharaoh said unto his servants, Can there be a man found in all the land of Egypt, that hath22 been wise and skillful in heart, whom I may send unto Pharaoh? And there was one in all the land of Egypt, which was wise and skillful in heart, of the name of Joseph, and what he said he to you, do. And the famine was over all the face of the earth: and Joseph opened all the storehouses, and sold unto the Egyptians; and the famine waxed sore in the land of Egypt. And all countries came into Egypt to Joseph for to buy [corn], because that the famine was [so] sore in all lands" (Gen. xli. 53-57).

The modern history of Egypt throws some curious light on these ancient records of famine: and instances of their recurrence may be cited to assist us in understanding their cause and extent. They have not been of very rare occurrence since the Mohammedan conquest, according to the testimony of Arab historians: one of great severity, following a deficient rise of the Nile, in the year of the Flight 507 (A.D. 1200), is recorded by 'Abel-El-Lateef, who was an eye-witness, and is regarded justly as a trustworthy authority. He gives a most interesting account of its horrors, states that the people throughout the country were driven to the last extremities, eating offal, and even their own dead, and mentions, as an instance of the dire straits to which they were driven, that persons who were burnt alive for eating human flesh were themselves, thus ready roasted, eaten by others. Multitudes fled the country, only to perish in the desert-road to Palestine.

But the most memorable famine was that of the reign of the Fatimeh Khaiiefeh, El-Mustasir billih, which is the only instance on record of one of seven years' duration in Egypt since the time of Joseph (A. D. 457-464, A. D. 1064-1071). This famine exceeded in severity all others of modern times, and was aggravated by the anarchy which then ravaged the country. Vehement drought and pestilence (says Ex-Savvases, in his Livre d'Egypte, MS.) continued for seven consecutive years, so that they [the people] ate corpses, and animals that died of themselves: the cattle perished; a dog was sold for 5 dinars, and a cat for 3 dinars . . . and an ardeek (about 5 bushels) of wheat for 100 dinars, and then it failed altogether. He adds, that all the horses of the Khaiiefeh, save three, perished, and gives numerous instances of the straits to which the wretched inhabitants were driven, and of the organized bands of kidnappers who infested Cairo and caught passengers in the streets by ropes furnished with hooks and let down from the houses. This account is confirmed by El-Makreez (in his Kahfet), from whom we further learn that the family, and even the women of the Khaiiefeh fled, by the way of Syria, on foot, to escape the peril that threatened all ranks of the population. The whole narrative is worthy of attention, since it contains a parallel to the duration of the famine of Joseph, and at the same time enables us to form an idea of the character of famines in the East. The famine of Samaria resembled it in many particulars; and that very briefly recorded in 2 K.

22 Since writing the above, we find that Quatremere was given a translation of El-Makreez's account of this famine, in the life of El-Mustasir, contained in his Memores Geographiques et Historiques sur l'Egypt.
FASTS

1. The word ἀσήμι, ἀσίμι, ἀστίμιum, is not found in the Pentateuch, but it often occurs in the historical books and the Prophets (2 Sam. xii. 16; 1 K. xvi. 9-12; Exz. viii. 21; Ps. lxix. 10; Is. viii. 5; Joel i. 4, 11; Zech. viii. 19, &c.). In the Law, the only term used to denote the religious observance of fasting is the more significant one, ἀφιλέω τιν ισημιον: "fasting the soul" (Exz. xvi. 23-31; xxiii. 27; Num. xxx. 13). The word ἀσήμι, i.e. ἀσίμιum, which occurs Exz. ix. 5, where it is rendered in A. V. "heaviness," is commonly used to denote fasting in the Talmud, and is the title of one of its treatises.

2. One fast only was appointed by the Law, that on the day of Atonement. [atonement, day of] There is no mention of any other periodic fast in the O. T., except in Zech. vii. 1-7, viii. 19. From these passages it appears that the Jews, during their Captivity, observed four annual fasts in the year, viz., the first month, and tenth month. When the building of the second Temple had commenced, those who remained in Babylon sent a message to the priests at Jerusalem to inquire whether the observance of the fast in the fifth month should not be discontinued. The prophet takes the occasion to rebuke the Jews for the spirit in which they had observed the fast of the seventh month as well as that of the fifth (vii. 5-6), and afterwards (viii. 19), giving the subject an evangelical turn, he declares that the whole of the four fasts shall be turned to "joy and gladness, and cheerful feasts." Zechariah simply distinguishes the fasts by the months in which they were observed; but the Mishna (Talmud, iv. 6) and S. Jerome (in Zech. viii.) give statements of certain historical events which they were intended to commemorate:

The fast of the fourth month. — The breaking of the tables of the Law by Moses (Exz. xxxiv.), and the burning of Jerusalem by Nebuchadnezzar (Jer. lii.).

The fast of the fifth month. — The return of the spies, &c. (Num. xiii. xiv.), the Temple burnt by Nebuchadnezzar, and again by Titus; and the plundering of the site of the temple, with the capture of Bether, in which a vast number of Jews from Jerusalem had taken refuge in the time of Hadrian.

The fast of the seventh month. — The complete sack of Jerusalem by Nebuchadnezzar and the death of Gedaliah (2 K. xxv.).

The fast of the tenth month. — The receiving by Ezekiel and the other captives in Babylon of the news of the destruction of Jerusalem.

Some other events mentioned in the Mishna are unmentioned by Ezekiel, and the present fasting was afterwards adopted in the temple, with the observance of the Captivity, and that the other events were subsequently associated with them on the ground of some real or fancied coincidence of the time of occurrence. As regards the
Fasts of the fifth month, at least, it can hardly be doubted that the captive Jews applied it exclusively to the destruction of the Temple, and that S. Jerome was right in regarding as the reason of their request to be released from its burdens, in the hope that it had no longer any purpose after the new Temple was begun. As this fast (as well as the three others) is still retained in the Jewish Calendar, we must infer either that the priests did not agree with the Babylonian Jews, or that the fast having been discontinued for a time, was renewed after the destruction of the Temple by Titus.

The number of annual fasts in the present Jewish calendar has been increased to twenty-eight, a list of which is given by Ireland (Jub. p. 274).

II. Public fasts were occasionally proclaimed to express national humiliation on account of sin or misfortune, and to supplicate divine favor in regard to some great undertaking or threatened danger. In the case of public danger, the proclamation appears to have been accompanied with the blowing of trumpets (Joel ii. 1-15; cf. Tannith, i. 6). The following instances are recorded of strictly national fasts: Samuel gathered "all Israel" to Mizpeh and proclaimed a fast, performing at the same time what seemed to have been a rite symbolical of purification, when the people confessed their sin in having worshipped Baalim and Ashtothar (1 Sam. vii. 6); Jehoshaphat appointed one "throughout all Judah" when he was preparing for war against Moab and Ammon (2 Chr. xx. 3); in the reign of Jehohaziah, one was proclaimed "for all the people in Jerusalem and all that came thither out of the cities of Judah," when the prophecy of Jeremiah was publicly read by Baruch (Jer. xxxvi. 6-10; cf. Baruch i. 5); three days after the feast of Tabernacles, when the second Temple was completed, "the children of Israel assembled with fasting and with sackcloth and earth upon them" to hear the Law read, and to confess their sins (Neh. ix. 1). There are references to general fasts in the Prophets (Joel i. 14, ii. 15; Is. lviii.); and two are noticed in the books of the Maccabees (1 Macr. iii. 46-47; 2 Macc. xii. 10-12).

There are a considerable number of instances of cities and bodies of men observing fasts on occasions in which they were especially concerned. In the days of Phinehas, the grandson of Aaron, when the men of Judah had been defeated by those of Benjamin, they fasted in making preparation for another battle (Judg. xx. 26). David and his men fasted for a day on account of the death of Saul (2 Sam. i. 12); and the men of Jabesh-Gilead fasted seven days on Saul's burial (1 Sam. xxxii. 13). Jezebel, in the name of Ahab, appointed a fast for the inhabitants of Jezreel, to render more striking, as it would seem, the punishment about to be inflicted on Naboth (1 K. xxi. 9-12). Ezra proclaimed a fast for his companions at the river of Ahava, when he was seeking for God's help and guidance in the work he was about to undertake (Ezra, viii. 21-23). Esther, when she was going to intercede with Ahasuerus, commanded the Jews of Shushan neither to eat nor drink for three days (Esth. iv. 16).

Public fasts expressly on account of unseasonable weather and of famine, may perhaps be traced in the first and second chapters of Joel. In later times they assumed great importance and form the main subject of the treatise Tannith in the Mishna.

VI. Private occasional fasts are recognized in the narrative of the Law (Num. xxx. 13). The instances given of individuals fasting under the influence of grief, vexation, or anxiety, are numerous (1 Sam. i. 7, xx. 34; 2 Sam. iii. 35, xii. 10; 1 K. xxii. 27; Ezr. x. 9; Neh. i. 4; Dan. x. 9). The fasts of forty days of Moses (Ex. xxiv. 18, xxxiv. 28; DENT. ix. 18) and of Elijah (1 K. xix. 8) are, of course, to be regarded as special acts of spiritual discipline, faint though wonderful shadows of that fast in the wilderness of Judaea, in which all true fasting finds its meaning.

IV. In the N. T. the only references to the Jewish fasts are the mention of "the Fast" in Acts xxvii. 9 (generally understood to denote the Day of Atonement), and the allusion to the weekly fasts (Matt. ix. 14; Mark ii. 18; Luke v. 33, xviii. 12; Acts x. 30). These fasts originated some time after the Captivity. They were observed on the second and fifth days of the week, which, being appointed as the days for public fasts (Tannith, ii. 9), seem to have been selected for these private voluntary fasts. The Gemara states that they were chosen because Moses went up Mount Sinai on the fifth day and went down on the second. All that is known on the subject appears to be given by Grotius, Lightfoot, and Schoettgen on Luke xviii. 12; and Lightfoot on Matt. ix. 14.

A time of fasting for believers in Christ is foretold Matt. ix. 15, and a caution on the subject is given Matt. vi. 16-18. Fasting and prayer are spoken of as the great sources of spiritual strength, Matt. xviii. 21; Mark ix. 23; 1 Cor. vii. 5; and they are especially connected with ordination, Acts xii. 9, xiv. 23.

V. The Jewish fasts were observed with various degrees of strictness. Sometimes there was entire abstinence from food (Esth. iv. 16, &c.). On other occasions there appears to have been only a "restriction to a very plain diet (Dan. x. 3). Fasts are given in the Talmud (both in JOMA and Tannith) as to the mode in which fasting is to be observed on particular occasions. The fast of the day, according to Josephus, was considered to terminate at sunset, and St. Jerome speaks of the fasting Jews as anxiously waiting for the rising of the stars. Fasts were not observed on the Sabbaths, the new moons, the great festivals, or the fasts of Purim and Dedication (Jud. vii. 6; Tannith, ii. 10).

Those who fasted frequently dressed in sackcloth or rent their clothes, put ashes on their head and went barefoot (1 K. xxi. 27; cf. Joseph. Ant. xill. 13, § 8; Neh. ix. 1; Ps. xxviii. 19). The rabbinical directions for the ceremonies to be observed in public fasts, and the prayers to be used in them, may be seen in Tannith, ii. 1-4.

VI. The sacrifice of the personal will, which gives to fasting all its value, is expressed in the old term used in the law, afflicting the soul. The faithful son of Israel realized the blessing of fasting (Ps. lixx. 10). But the frequent admonitions and stern denunciations of the prophets may show us how prone the Jews were, in their formal fasts, to lose the idea of a spiritual discipline, and to regard them as being a means of winning favor from God, or, in a still worse spirit, to make a parade of them in order to appear religious before men (Is. viii. 3, Zech. vii. 5, 6; Mal. iii. 14; comp. Matt. vi. 16).

S. C.

* The word مَرْضِي in Arabic, the same root as درس, signifies abstinence from food, drink or
FATHER

The position and authority of the father as the head of the family is expressly assumed and sanctioned in Scripture, as a likeness of that of the Almighty over his creatures, an authority — as Philo remarks — intermediate between human and divine (Philo, πατίς τῶν πατέντων, § 1). It lies of course at the root of all so-called patriarchal government (Gen. iii. 16: 1 Cor. xi. 3), which was introductory to the more definite systems which followed, and which in part, but not wholly, superseded it. When, therefore, the name of "father of nations" (צֵבָה נֹעַם) was given to Abram, he was thereby held up not only as the ancestor, but also as the example to those who should come after him (Gen. xviii. 18, 19: Rom. iv. 17). The father's blessing was regarded as conferring special benefit, but his malediction special injury on those on whom it fell (Gen. ix. 25, 27, xxvii. 27-40, xlviii. 15, 20, xlviii.): and so also the sin of a parent was held to affect, in certain cases, the welfare of his descendants (2 K. x. 27), though the Law forbade the punishment of the children because of the father's transgression (Deut. xvi. 19; 2 K. xiv. 6; Ex. xvii. 29). The command to honor parents is noticed by St. Paul as the only one of the Decalogue which bore a distinct promise (Ex. xxi. 12: Eph. vi. 2), and disre

pect towards them was condemned by the Law as one of the worst of crimes (Ex. xxi. 15, 17; 1 Tim. 1, 9; comp. Virg. Æn. vi. 609: Aristoph. Ran. 274-773). Instances of legal enactment in support of parental authority are found in Ex. xxii. 17; Num. xxx. 3, 5, xlii. 14; Deut. xvi. 21; Lev. xxvii. 9, xlii. 22; and the spirit of the Law in this direction may be seen in Prov. xxxi. 1, xv. 5, xvii. 25, xix. 13, xx. 20, xxviii. 24, xxx. 17; Is. xlv. 10; Mal. i. 6. The father, however, had not the power of death over his child (Deut. xxi. 18-21; Philo, l.c.).

From the patriarchal spirit, also, the principle of respect to age and authority in general appears to be derived. Thus Job is described as blessing "Pharaoh (Gen. xlix. 7, 19: comp. Lev. xxxix. 12; Prov. xxxi. 31: Philo, l. c. § 6)."

It is to this well-recognized theory of parental authority and supremacy that the various uses of the term "father" in Scripture are due. (1.) As the source or inventor of an art or practice (Gen. iv. 20, 21; John viii. 44; Job xxxviii. 28, xviii. 14; 2 Cor. l. 3). (2.) As an object of respect or reverence (Jer. ii. 27; 2 K. ii. 12, v. 13, vi. 21). (3.) Thus also the pupils or scholars of the prophetic schools, or of any teacher, are called sons (2 K. ii. 3, iv. 1; 1 Sam. x. 27, 27; 1 K. x. 35; 2 Chron. xxv. 1; 2 Chron. v. 2). The term father, and also mother, is applied to any ancestor of the male or female line respectively (Is. ii. 2; Jer. xxxvi. 6, 18; Dan. v. 2; 2 Sam. iv. 7: 2 Chr. xvi. 15). (5.) In the Tanakh the term father is used to indicate the chief, c. y. the principal of certain works are termed "fathers." Objects whose contact causes pollution are called "fathers" of defilement (Mishn. Shabb. vii. 2, col. 24; 4 Macc. vi. 13: Targum, l. c.). (6.) A protector of guardians (Job xxxix. 16; Ps. lxxvii. 5; Deut. xxxii. 6). Many personal names are found with the prefi
FATHOM [Measures.]

FAUCHION, a short sword (Jud. xii. 6 and xvi. 9), less common than falchion or falchion, in each form now almost obsolete. It stands for aspicynx, a transferred Persian word. It is the name of the weapon with which Judith slew Holofernes (see Fritzsche, Handb. zu den Apokryphen des A. T. p. 454). H.

FEASTS. [Festivals.]

FEEF, for various customs in relation to the feet, see DUST; Mourning; Sandal; and Wearing the Hands and Feet.

FELIX (Felix), Acts xxii.-xxiv. [Felix, happy, fortunate] in Tac. Hist. v. 9, called Antonius Felix; in Sidus, Claudius Felix; in Josephus and Acts, simply Felix; so also in Tac. Ann. xii. 54., a Roman procurator of Judea, appointed by the Emperor Claudius, whose freedom he was, on the banishment of Vitiatus Cumanus in A. D. 53. Tacitus (Ann. xii. 54) states that Felix and Cumanus were joint procurators, Cumanus having Gallieus, and Felix, Samarit. In this account Tacitus is directly at issue with Josephus (Ant. xx. 6, 2-7, 1), and is generally supposed to be in error; but his account is very circumstantial, and by adopting it we should gain some little justification for the expression of St. Paul, Acts xxiv. 10, that Felix had been judge of the nation "for many years." Those words, however, must not even thus be closely pressed; for Cumanus himself only went to Judea in the eighth year of Claudius (Joseph. Ant. xx. 5, § 2). Felix was the brother of Claudius' powerful freedman Pallus (B. J. ii. 12, § 8; Ant. xx. 7, § 1; and it was to the circumstance of Pallus' influence surviving his master's death (Tacit. Ann. xiv. 65) that Felix was retained in his procuratorship by Nero. He ruled the province in a mean, cruel, and profligate manner, "per omne savitiam et libidine jus regnum serviri ingeni exercuit" (Tacit. Hist. v. 9, and Ann. xii. 54.). With this comprehensive description the fuller details of Josephus agree, though his narrative is tinged with his hostility to the Jewish petocuta and zealots, whom, under the name of robbers, he describes Felix as putting down and crushing by hundreds. His period of office was full of troubles and seditions. We read of his putting down false Messiahs Joseph. Ant. xx. 8, § 5; B. J. ii. 13, § 4); the followers of an Egyptian magician (Ant. xx. 8, § 6; B. J. ii. 13, § 5; Acts xxi. 38); riots between the Jews and Syrians in Cesarea (Ant. xx. 8, § 7; J. ii. 3, § 7); and between the priests and the principal citizens of Jerusalem (Ant. xx. 8, § 8; Joseph. Life, 3). He once employed the scribes for his own purposes, to bring about the murder of the high-priest Jonathan (Ant. xx. 8, § 5). His severe measures and cruel retributions seemed only to increase the already rampant murmur of the people to rain: "intempestiva remedii delicta accendunt" (Tacit. Ann. xii. 54; de S3nymos kat 'Euman Dnveioi.6v Efei, Joseph. B. J. ii. 13, § 6). St. Paul was brought before Felix in Cesarea, having been sent thither out of the way of the Jews at Jerusalem by the "chief captain" Claudius Lysias. Some effect was produced on the guilty conscience of the procurator, as the Apostle reasoned of righteousness, temperance, and judgment to come; but St. Paul was remanded to prison and kept there, in hopes of extorting money from him, two years (Acts xxiv. 29, 37). At the end of that time Porcius Festus [Festus] was appointed to supersede Felix, who, on his return to Rome, was accused by the Jews in Cesarea, and would have suffered the penalty due to his atrocities, had not his brother Pallus prevailed with the Emperor Nero to spare him (Ant. xx. 8, § 9). This was probably in the year 90 A. D. Anger, De temporibus in Act. Apostol., §, p. 100; Wieseler, Chronologie der Apostelgeschichte, pp. 60-82). The wife of Felix was Drusilla, daughter of Herod Agrippa I. the former wife of Azizus King of Euesus. [Drusilla.]

FELLOP (Is. xiv. 8), a cutter of wood (from the Anglo-Saxon, felleon, to fell). The prophet represents the cedars of Lebanon as shouting in the lower world, over the full of Semmacherib, their great destroyer: "Since thou art hid low, no feller is come up against us:"

FENCED CITIES (in hpedon), or in hpedon, Dan. xi. 15, from hpedon, cut off, separate, equivalent to in hpedon, Gen. 321: Παίκης άπεκαλ. τεφρής, τετειχήσατο: ωρα, or εκτείνεται, μεληται, μελετησαι, firme. The broad distinction between a city and a village in Biblical language has been shown to consist in the possession of walls. [CITY.] The city had walls, the village was unwalled, or had only a watchman's tower (Περιπολία: τεφρής κυτοθάναμ; compare Gesen. 267), to which the villagers resorted in times of danger. A threefold distinction is thus obtained—(1) cities; (2) unwalled villages: (3) villages with ,walls or towers (1 Chr. xxvii. 25). The district east of the Jordan, forming the kingdoms of Moab and Bashan, is said to have abandoned from very early times in castles and fortresses, such as were built by Uzziah to protect the cattle, and to repel the inroads of the neighboring tribes, besides unwalled towns (Ann. Marc. xiv. 9; Deut. iii. 5; 2 Chr. xxvi. 10). Of these many remains are thought by Mr. Porter to exist at the present day (Demnaea, ii. 197). The dangers to which unwalled villages are exposed from the marauding tribes of the desert, and also the fortifications by which the inhabitants sometimes protect themselves, are illustrated by Sir J. Malcolm (Sketches of Persia, c. xiv. 143; and Fraser, Persia, pp. 379, 380; comp. Judg. v. 7). Villages in the Hauran are sometimes inclosed by a wall, or rather the houses being joined together form a defense against Arab robbers, and the entrance is closed by a gate (Burchardt, Syria, p. 212).
A further characteristic of a city as a fortified place is found in the use of the word ἱππεῖον, "battlement," and also ἱππεῖον, "fenced." So that to "battlement" a city appears to be sometimes the same thing as to fortify it (comp. Gen. viii. 20, and 2 Chr. xvi. 6 with 2 Chr. xi. 5-10, and 1 K. xv. 17). The fortifications of the cities of Palestine, thus regularly "fenced," consisted of one or more walls crowned with battlemented parapets, ἱππεῖα, having towers at regular intervals (2 Chr. xxxii. 5; Jer. xxxii. 38), on which in later times engines of war were placed, and watch was kept by day and night in time of war (2 Chr. xxvi. 9, 13; Judg. ix. 45; 2 K. ix. 17). Along the oldest of the three walls that of overawing the town at Jerusalem. These forts were well furnished with cisterns (Acts xxi. 34; 2 Macc. v. 5; Joseph. Ant. xvii. 4, § 3; B. J. i. 5, § 4, v. 4, § 2, vi. 2, § 1). At the time of the entrance of Israel into Canaan there were many fenced cities existing, which first caused great alarm to the exploring party of searchers (Num. xiii. 28), and afterwards gave much trouble to the people in subduing them. Many of these were restored, or, as it is expressed, rebuilt by the Hebrews (Num. xxxii. 17, 34-42; Deut. iii. 4, 5; Josh. xi. 12, 13; Judg. i. 27-33), and many, especially those on the sea-coast, remained for a long time in the possession of their inhabitants, who were enabled to preserve them by means of their strength in chariots (Josh. xiii. 3, 6, xvii. 16; Judg. i. 19; 2 K. xviii. 8; 2 Chr. xxvi. 6). The strength of Jerusalem was shown by the fact that that city, or at least the citadel, or "stronghold of Zion," remained in the possession of the Jebusites until the time of David (2 Sam. v. 6, 7; 1 Chr. xi. 5). Among the kings of Israel and Judah several are mentioned as fortifiers or "builders" of cities: Solomon (1 K. ix. 17-19; 2 Chr. viii. 4-6), Jeroboam I. (1 K. xii. 25), Rehoboam (2 Chr. iii. 5, 12), Nadab (1 K. xv. 17), Omri (1 K. xiv. 24), Hezekiah (2 Chr. xxxii. 5), Asa (2 Chr. xiv. 6, 7), Jehoshaphat (2 Chr. xiii. 12), but especially Uzziah (2 K. xiv. 22; 2 Chr. xxvi. 2, 9, 15), and in the reign of Ahab the town of Jericho was rebuilt and fortified by a private individual, Hiel of Bethel (1 K. xvi. 34). Herod the Great was conspicuous in fortifying strong positions; as Masada, Machaerus, Herodium, besides his great works at Jerusalem (Josephus. B. J. vii. 6, §§ 1, 2, and 8, § 3; B. J. i. 21, § 10; Ant. xiv. 14, 9).

But the fortified places of Palestine served only in a few instances to check effectively the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Samaria for three years (2 K. xvii. 10), Jerusalem (2 K. xxv. 3) for four months, and in

Walls of Antioch, remarkable for their strength, and the manner in which they are carried up and down the sides of mountains.

of Jerusalem there were 90 towers; in the second, 11; and in the third, 60 (Joseph. B. J. v. 4, § 2). One such tower, that of Hammers, is repeatedly mentioned (Jer. xxxii. 38; Zechar. xiv. 10), as also others (Neh. iii. 1, 11, 27). The gate-ways of fortified towns were also fortified and closed with strong doors (Neh. ii. 8, iii. 3, 6, &c.; Judg. xvi. 2, 3; 1 Sam. xxiii. 7; 2 Sam. xviii. 24, 33; 2 Chr. xiv. 7; 1 Macc. xiii. 33, xvi. 39). In advance of the wall there appears to have been sometimes an outwork (ῥωμαία), in A. V. "ditch" (1 K. xxi. 23; 2 Sam. xx. 13; Gen. xiv. p. 451), which was perhaps either a palisade or wall lining the ditch, or a wall raised midway within the ditch itself. Both of these methods of strengthening fortified places, by hindering the near approach of machines, were usual in earlier Egyptian fortification (Wilkinson, Anc. Egypt. i. 408), but would generally be of less use in the hill forts of Palestine than in Egypt. In many towns there was a keep or citadel for a last resource to the defenders. Those remaining in the Horam and Lodhe are square. Such existed at Shechem and Thebez (Judg. ix. 16, 51, viii. 17; 2 K. ix. 17), and the great forts or towers of Psiphimus, Hippicus, and especially Antonia, served a similar purpose, as well as that of overlooking the town at Jerusalem. These forts were well furnished with cisterns (Acts xxi. 34; 2 Macc. v. 5; Joseph. Ant. xvii. 4, § 3; B. J. i. 5, § 4, v. 4, § 2, vi. 2, § 1). At the time of the entrance of Israel into Canaan there were many fenced cities existing, which first caused great alarm to the exploring party of searchers (Num. xiii. 28), and afterwards gave much trouble to the people in subduing them. Many of these were restored, or, as it is expressed, rebuilt by the Hebrews (Num. xxxii. 17, 34-42; Deut. iii. 4, 5; Josh. xi. 12, 13; Judg. i. 27-33), and many, especially those on the sea-coast, remained for a long time in the possession of their inhabitants, who were enabled to preserve them by means of their strength in chariots (Josh. xiii. 3, 6, xvii. 16; Judg. i. 19; 2 K. xviii. 8; 2 Chr. xxvi. 6). The strength of Jerusalem was shown by the fact that that city, or at least the citadel, or "stronghold of Zion," remained in the possession of the Jebusites until the time of David (2 Sam. v. 6, 7; 1 Chr. xi. 5). Among the kings of Israel and Judah several are mentioned as fortifiers or "builders" of cities: Solomon (1 K. ix. 17-19; 2 Chr. viii. 4-6), Jeroboam I. (1 K. xii. 25), Rehoboam (2 Chr. iii. 5, 12), Nadab (1 K. xv. 17), Omri (1 K. xiv. 24), Hezekiah (2 Chr. xxxii. 5), Asa (2 Chr. xiv. 6, 7), Jehoshaphat (2 Chr. xiii. 12), but especially Uzziah (2 K. xiv. 22; 2 Chr. xxvi. 2, 9, 15), and in the reign of Ahab the town of Jericho was rebuilt and fortified by a private individual, Hiel of Bethel (1 K. xvi. 34). Herod the Great was conspicuous in fortifying strong positions; as Masada, Machaerus, Herodium, besides his great works at Jerusalem (Josephus. B. J. vii. 6, §§ 1, 2, and 8, § 3; B. J. i. 21, § 10; Ant. xiv. 14, 9).

But the fortified places of Palestine served only in a few instances to check effectively the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Samaria for three years (2 K. xvii. 10), Jerusalem (2 K. xxv. 3) for four months, and in

The so-called Golden Gate of Jerusalem, showing supposed remains of the old Jewish Wall.
Assyrian Fortifications. (Layard.)

The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals, of the same height as the walls, both crowned with a parapet, and a round-headed battlement in shape like a shield. A second lower wall with towers at the entrance was added, distant 13 or 20 feet from the main wall, and sometimes another was made of 70 or 100 feet in length, projecting at right angles from the main wall to enable the defenders to annoy the assailants in flank. The ditch was sometimes fortified by a sort of tenaille in the ditch itself, or a ravelin on its edge. In later times the practice of fortifying towns was laid aside, and the large temples with their inclosures were made to serve the purpose of forts (Wilkinson, Anc. Egypt. i. 408, 409, abridgem.).

The fortifications of Nineveh, Babylon, Ecbatana, and of Tyre and Sidon, are all mentioned, either in the canonical books or the Apocrypha. In the sculptures of Nineveh representations are found of walled towns, of which one is thought to represent Tyre, and all illustrate the mode of fortification adopted by both the Assyrians and their enemies (Jer. ii. 30–32; 58; Am. i. 10; Zech. ix. 3; Ez. xxvii. 11; Nah. iii. 14; Tob. i. 17, xiv. 14, 15; Jud. i. 1, 4; Layard, Nin. vol. ii. pp. 275, 279, 388, 395; Nin. & Bab. pp. 231, 358; Mon. of Nin. pt. ii. 39, 43.)

FERRET (فة: muγαλή: magale), one of the unclean creeping things mentioned in Lev. xi. 30. The μυγαλή of Aristotle (Hist. An. viii. 24) is the Mus arvenses, or shrew-mouse; but it is more probable that the animal referred to in Lev. was a reptile of the lizard tribe, deriving its name from the mournful cry, or wail, which some lizards

The object of this article is merely to give a classification of the sacred times of the Hebrews, accompanied by some general remarks. A particular account of each festival is given in its proper place.

I. The religious times ordained in the Law fall under three heads: (1.) Those formally connected with the institution of the Sabbath. (2.) The historical or great festivals. (3.) The Day of Atonement.

(1.) Immediately connected with the institution of the Sabbath are —

(a.) The weekly Sabbath itself.
(b.) The seventh new moon or Feast of Trumpets.
(c.) The Sabbathal Year.
(d.) The Year of Jubilee.
(2.) The great feasts (יִהְלָלִים; in the Talmud, יִהְלָלִים; pilgrimage feasts) are —

(a.) The Passover.
(b.) The Feast of Pentecost, of Weeks, of Wheat-harvest, or of the First-fruits.
(c.) The Feast of Tabernacles, or of Ingathering.

On each of these occasions every male Israelite was commanded "to appear before the Lord," that is, to attend in the court of the tabernacle or the Temple, and to make his offering with a joyful heart (Deut. xxix. 7; Neh. viii. 9–12; cf. Joseph. Ant. xi. 5, § 5.) The attendance of women was voluntary, but the zealous often went up to the

uter. The root is פַּעַל, to sigh or groan. The

Rabbinal writers seem to have identified this an-

nual with the hedgehog; see Lewysohn, Zool. des

Talmuds, §§ 129, 134.

W. D.
FESTUS

Passover. Thus Mary attended it (Luke ii. 41), and Hannah (1 Sam. i. 7, ii. 19). As might be supposed, there was a particular obligation regarding the Passover than the other festivals, and hence there was an express provision to enable those who, by unavoidable circumstances or legal impurity, had been prevented from attending at the proper time, to observe the feast on the same day of the succeeding month (Nunn. ix. 10-11).

On all the days of Holy Convocation there was to be an entire suspension of ordinary labor of all kinds (Ex. xx. 11; Lev. xvi. 29; xxiii. 24, 25, 35). But on the intervening days of the longer festivals work might be carried on. 1

Besides their religious purpose, the great festivals must have had an important bearing on the maintenance of a feeling of national unity. This may be traced in the apprehensions of Jeroboam (1 K. xii. 26, 27), and in the attempt at reformation by Hezekiah (2 Chr. xxx. 1), as well as in the necessity which, in later times, was felt by the Roman government of mustering a considerable military force at Jerusalem during the festivals (Joseph. Ant. xvii. 9, § 3, xvii. 10, § 2; cf. Matt. xxvi. 5; Luke xxiii. 1).

The frequent recurrence of the sabbatical number in the organization of these festivals is too remarkable to be passed over, and (as Ewald has observed) seems, when viewed in connection with the sabbatical sacred times, to furnish a strong proof that the whole system of the festivals of the Jewish law was the product of one mind. Pentecost occurs seven weeks after the Passover; the Passover and the Feast of Tabernacles last seven days each; the days of Holy Convocation are seven in the year—two at the Passover, one at Pentecost, one at the Feast of Trumpets, one on the Day of Atonement, and two at the Feast of Tabernacles; the Feast of Tabernacles, as well as the Day of Atonement, falls in the seventh month of the sacred year; and, lastly, the cycle of annual festivals occupies seven months, from Nisan to Tisri.

The agricultural significance of the three great festivals is clearly set forth in the account of the Jewish sacred year contained in Lev. xxiii. The prominence which, not only in that chapter but elsewhere, is given to this significance, in the names by which Pentecost and Tabernacles are often called, and also by the offering of "the first-fruits of wheat-labast" at Pentecost (Ex. xxiii. 20), and of "the first of the first-fruits" at the Passover (Ex. xxiii. 19, xxiv. 26), might easily suggest that the origin of the feasts was patriarchal (Ewald, Afterthanner, p. 385), and that the historical associations with which Moses endowed them were grafted upon their primitive meaning. It is perhaps, however, a difficulty in the way of this view, that we should perhaps better for the institution of agricultural festivals amongst an agricultural than a pastoral people, such as the Israelites and their ancestors were before the settlement in the land of promise.

The times of the festivals were evidently ordained in wisdom, so as to interfere as little as possible with the industry of the people. The Passover was held just before the work of harvest commenced, Pentecost at the conclusion of the corn harvest and before the vintage, the Feast of Tabernacles after all the fruits of the ground were gathered in. In winter, when travelling was difficult, there were no feasts. 3

(3) For the Day of Atonement, see that article.

H. After the Captivity, the Feast of Purim (Esth. ix. 20 ff.) and that of the Dedication (1 Macc. iv. 50) were instituted. The Festivals of Wood-carrying, as they were called (τοιοτης Των Ελεοφοριας), are mentioned by Josephus (B. J. ii. 17, § 9) and the Mishna (Purim, iv. 5). What appears to have been their origin is found in Neh. xiii. 34. The term, "the Festival of the Baskets" (Παρμηταραλα) is applied by Philo to the offering of first-fruits described in Deut. xxvi. 1-11 (PhiI., vol. v. p. 51). [First-Fruits.]

The system of the Hebret festivals is treated at large by Bahr (Symbolik des Judischen Cultus, bk. iv.), by Ewald (Afterthanner, p. 379 ff.), and by Philo, in a characteristic manner (Παρμηταραλα, Opusc. vol. v. p. 21, ed. Tanch.).

S. C.

FESTUS, PORCIUS (Πορκιος Φιστος, Acts xxiv. 27), successor of Felix as procurator of Judea (Acts l. c.; Joseph. Ant. xx. 8, § 9; B. J. ii. 14, § 1), sent by Nero, probably in the autumn of the year 60 A. D. (See Felix.) A few weeks after Festus reached his province he heard the case of St. Paul, who had been left a prisoner by Felix, in the presence of Herod Agrippa II. and Bernice his sister. Not finding anything in the Apostolic worthy of death or of bonds, and being confirmed in this view by his guests, he would have set him free had it not been that Paul had himself previously (Acts xxv. 11, 12) appealed to Caesar. In consequence, Festus sent him to Rome. Judea was in the same disturbed state during the procuratorship of Festus, which had prevailed through that of his predecessor. Sicarii, robbers, and magicians were put down with a strong hand (Ant. xx. 8, § 10). Festus had a difference with the Jews at Jerusalem about a high wall which they had built to prevent Agrippa seeing from his palace into the court of the Temple. As this also hid the view of the Temple from the Roman guard appointed to watch it during the festivals, the procurator took strongly the side of Agrippa; but permitted the Jews to send to Rome for the decision of the emperor. He being influenced by Poppea, who was a proselyte, decided in favor of the Jews. Festus died probably in the summer of 62 A. D., having ruled the province less than two years. The chronological questions concerning his entrance on the province and his death are too intricate and difficult to be entered on here, but will be found fully discussed by Anger, de temporum in Act. Apost. ratione, p. 99 ff., and Wieseler, Chronologie der Apostelgeschichte, pp. 89-99. Josephus implies that Festus was a just man as well as an active magistrate. 4

H. A.

* A question arises under this name respecting Luke's accuracy.

Could Festus in the reign of Nero call the emperor his lord in accordance with Roman usage, as he is said to have done, Acts xxv. 26? A free Roman under the republic never called any one his κυριος or dominus, which Latin word, denoting Sabbath, in the treatise Yom Tob; while in Moad Katan it lays down strange and burdensome conditions in reference to the intermediate days. 5

a The Law always speaks of the Days of Holy Convocation as Sabbath. But the Mishna makes a distinction, and states in detail what acts may be performed on the former, which are unlawful on the
FETTERS (םֶשֶנֶן, פֶתֶרִים, πέτρες). (1.) The first of these Hebrew words, nechushim, expresses the material of which fetters were usually made, namely, brass (πέτρα χαλκι), A. V. "fetters of brass"); and also that they were made in pairs, the word being in the dual number; it is the most usual term. Fetters, however, are frequently employed for the purpose (Ps. ev. 18, exil. 8). (2.) Ḥebel occurs only in the above Psalms, and, from its appearing in the singular number, may perhaps apply to the link which connected the fetters. Zikkim ("fetters," Job xxxvi. 8) is more usually translated "chains" (Ps. exil. 8; Is. xiv. 14; Nah. ili. 10); but its radical sense appears to refer to the contraction of the feet by a chain (Gesen. Thes. p. 424). [Fetters of iron (πέτρα) are probably meant in Mark v. 4 bis and Luke viii. 29. See Chains. H.] W. L. B.

FEVER (ןֶשֶנֶת, נֶשֶנֶת, ιθύμος, ἤθυμος: Lev. xxvii. 16, Deut. xxvii. 23). These words, from various roots signifying heat or inflammation, are rendered in the A. V. by various words suggestive of fever, or a feverish affection. The word ἤθυμος ("shuddering") suggests the ague as accompanied by fever, as in the opinion of the LXX. probably intended; and this is still a very common disease in Palestine; the third word, which they render ἤθυμος (a term still known to pathologists), a feverish irritation, and which in the A. V. is called burning fever, may perhaps be erysipelas. Fever constantly accompanies the bloody flux, or dysentery (Acts xxviii. 8; comp. De Manda- dolo, Travels, ed. 1669, p. 65). Fevers of an inflammatory character are mentioned (Burekhardt, Arb. i. 446) as common at Mecca, and patrid ones at Djidda. Intermittent fever and dysentery, the latter often fatal, are ordinary Arabian diseases.

The term "fevers" sometimes occasion most troublesome swellings in the stomach and legs (ii. 230, 231).

H. H.

FIELD (גֶּבֶר, גֵּבְר). The Hebrew sakeh is not adequately represented by our field; the two words agree in describing cultivated land, but they differ in point of extent, the sakeh being specifically applied to what is uninclosed, while the opposite notion of inclosure is involved in the word field. The essence of the Hebrew word has been variously taken to lie in each of these notions, Gesenius (Thes. p. 1321) giving it the sense of freeborn, Stanley (p. 490) that of "smoothness," comparing acres from the vineyards.

On the one hand sakeh is applied to any cultivated ground, whether pasture (Gen. xxi. 2, xxxiv. 7; xxviii. 22), or, mountain-top (Judg. ix. 32, 36; 2 Sam. i. 21); and in some instances in marked opposition to the neighboring wilderness (Stanley, pp. 255, 480), as in the instance of Jacob settling in the land of Shechem (Gen. xxxiii. 19), the field of Moab (Gen. xxxvi. 35; Num. xxxi. 20, A. V. "country"); and the vale of Siddim, i. e. of the cultivated fields, which formed the oasis of the Pentapolis (Gen. iii. 4, 8), though a different sense has been given to the name (by Gesenius, Thes. p. 1321). On the other hand the sakeh is frequently contrasted with what is inclosed, whether a vineyard (Ex. xxii. 5; Lev. xxv. 3, 4; Num. xvi. 14, xx. 17; compare Num. xxii. 29, "the east wind into the fields of Zarephath"), or a patch from the vineyards, a wall being on this side and a wall on that side "), a garden (the very name of which, ἔδαφος, implies inclosure), or a walled town (Deut. xxiv. 3, 16); unwalled villages or scattered houses ranked in the eye of the law as fields (Lev. xxxi. 31), and hence the expression εἰς τοὺς ἐδαφοὺς = houseth in the fields (in villas, Vulg.; Mark vi. 36, 36). In many passages the term implies what is remote from a house (Gen. iv. 8, xxiv. 63; Deut. xxxii. 23) or settled habitation, as in the case of Esaau (Gen. xxv. 27; the LXX., however, refer it to his character, ἄρχοντας): this is more fully expressed by הַגֶּבֶר, the open field (Lev. xiv. 7, 53, xvii. 5; Num. xix. 16; 2 Sam. xi. 11), with which is naturally coupled the notion of exposure and desertion (Jer. ix. 22; Ez. xv. 5, xxiii. 4, xxxii. 27, xxxix. 5).

The separate plots of ground were marked off by stoves, which might easily be removed (Deut. xix. 19) seems to mean the fritdling at the mouth which accompanies the violent religious exortations of the fanatic Arab on the occasion of the festival of the Nebi-Mousa.
FIELD

14, xxi. 17; cf. Job xxii. 2; Prov. xxii. 28, xxxii. 10): the absence of fences rendered the fields liable to damage from straying cattle (Ex. xxii. 5) or fire (ver. 6; 2 Sam. xix. 30): hence the necessity of constantly watching flocks and herds, the people so employed being in the present day named Nosseut (Wortisbet, xxi. 17). The use of protection was gained by sowing the tallest and strongest of the grain crops on the outside: "spelt" appears to have been most commonly used for this purpose (Is. xxviii. 25, as in the margin).

From the absence of inclosures, cultivated land of any size might be termed a field, whether it were a piece of ground of limited area (Gen. xiii. 13, 17; Is. vi. 8), a man's whole inheritance (Lev. xxvii. 10 ff.; Ruth iv. 7; Jer. xxxii. 9, 25; Prov. xxvii. 29, xxxi. 16), the ager publicus of a town (Gen. xii. 48; Noh. xii. 29), as distinct, however, from the ground immediately adjacent to the walls of the Levitical cities, which was called

ψηναμα (A. V. subures), and was deemed an appannage of the town itself (Josh. xi. 11, 12), or Likely the territory of a people (Gen. xiv. 7, xiii. 3, xxxvi. 35; Num. xxxi. 20; Ruth i. 6, iv. 3; 1 Sam. vi. 1, xiii. 7, 11). In 1 Sam. xxv. 5, "a town in the field" (A. V. country) = a provincial town as distinct from the royal city. A plot of ground separated from a larger one was termed ποιεσ (Gen. xxxii. 19; Ruth ii. 3: 1 Chr. xii. 13), or simply ψηνεβα (2 Sam. xiv. 30, xiii. 12; cf. 2 Sam. xiv. 29). Fields occasionally received names after remarkable events, as Horsh-Eguzrium, the field of the strong men, or possibly of swords (2 Sam. ii. 16), or from the use to which they may have been applied (2 K. xvii. 17; Is. vii. 3; Matt. xxvii. 7).

It should be observed that the expressions "fruitful field" (Is. x. 18, xxix. 37, xiii. 15, 16) and "a field of plenty" (Is. xii. 10; Jer. xxvii. 33) are not connected with such, but with corn, meaning a park or well-kept wood, as distinct from a wilderness or a forest. The same term occurs in 2 K. xxi. 23, and Is. xxviii. 24 (A. V. Corneh). Is. x. 19 (forested), and Jer. iv. 25 (fruitful place) [CARMIEL]. Distinct from this is the expression in Ex. xvii. 5, 7, 11, (A. V. fruitful fields), which means a field suited for planting suckers.

We have further to notice other terms (1.) Sheldemuth (ψηναμα), translated "fields," and connected by Gesenius with the idea of inclosure. It is doubtful, however, whether the notion of burning does not rather lie at the bottom of the word. This gives a more consistent sense throughout. In 1 K. xvi. 8, it would then mean the eathered grape: in Hab. iii. 17, baked corn; in Jer. xxxii. 41, the fowlers; and in the city (see "fields" interpreted between the southeastern angle of Jerusalem and the Kidron) while in 2 K. xiii. 4, and D君子. xxxii. 32, the sense of a place of burning is appropriate. It is not therefore necessary to treat the word in 1 K. xx. 27, "baked," as a corrupt reading. (2.) Abel (ψηναμα), a well-watered spot, frequently employed as a prefix in proper names.

(3.) Arba (ψηναμα), a word of Egyptian origin, given in the LXX. in a GRAecized form, AXEB (Gen. ch. 2, 18, "meadow;" Job vii. 11, "flag;" Is. dth 7, LXX.), meaning the flags and nooses that grow in the marshes of lower Egypt. (4.) MAAAROD (ψηναμα), which occurs only once (Judg. xix. 33, "meadows"): it has been treated as a corruption either of ψηναμα, core, or ψηναμα, from the west (ανδα δαυαυα, LXX.). But the sense of openness or exposure may be applied to it; thus, "they came forth on account of the exposure of the field," the Benjamites having been previously cut off away (ver. 31).

W. L. B. * This practice of leaving the fields of different proprietors unmixed, or separated only by a narrow foot-path, explains other Scripture statements or allusions. Thus the sower, scattering his seed, as he approaches the end or side of his own lot, is liable to have some of the grains fall beyond the ploughed portion, and there, exposed on the hard earth (see Matt. xii. 4.), the fowls may come and devour them up. In this way also we may understand the Saviour's passing with his disciples through the corn-fields on the Sabbath. Instead of crossing the fields and trampling down the grain, they no doubt followed one of these paths between the fields, where the grain stood within their reach. The object being to appease their hunger, the "plucking of the ears of corn to eat" was not, according to Jewish ideas, a violation of the rights of property, nor was it for that that the Pharisees complained of the disciples, but for breaking the Sabbath (Luke vi. 1 ff.).

The people of Palestine grant the same liberty to the hungry at the present time (Rob. Bibb. Res. ii. 192). Ruth, it is said, gleaned in "a part of the field belonging to Boaz" (Ruth ii. 3). We are to think of an open cultivated tract of country, the property of various owners, and each particular, unmixed field to which the steps of the gleaner brought her, was the part which belonged to Boaz.

In the N. T., " fields" (γεωργα) occasionally means farm-houses or hamlets, in distinction from villages and towns. See Mark v. 14, vi. 56, 58, where we have "country" in the A. V.

* FIELD, FULLER'S, THE. [FULLER'S FIELD, THE.]

* FIELD, POTTER'S, THE. [ACACIA; POTTER'S FIELD, THE.]

FIG, FIG-TREE, Πζηναμα, a word of frequent occurrence in the O. T., where it signifies the tree Ficus carica of Linnæus, and also "from.

The LXX. render it by σωκι and σικων, and when it signifies fruit by σωκι [?1]—also by σικων or σοκων, σουκων, in Jer. v. 17 and Am. iv. 9. In N. T. σωκι is the fig-tree, and σικων the figs (Jam. iii. 12). The fig-tree is very common in Palestine (Deut. viii. 8). Mount Olivet was famous for its fig-trees in ancient times, and they are still found there (see Stanley, ii. p. 387, 421, 422). "To sit under one's own vine and one's own fig-tree" became proverbial expression among the Jews to denote peace and prosperity (1 K. iv. 27; Mic. iv. 4; Zech. iii. 10). The character of the tree, with its wide-spread branches, accorded well with the derivation of the name from Πζηναμα, to stretch out, porzecit branchit. In Gen. iii. 7 the identification of Πζηναμα with the leaves of the Ficus carica has been disputed by Gesenius, Tuch, and others, who think that the large leaves of the Italian Ficus caricae are meant (term, θυμαρίμα — Fr. figuier d'Adam). These
FIG-TREE

leaves, however, would not have needed to be sewn together, and the plant itself is not of the same kind with the fig-tree.

When figs are spoken of as distinguished from the fig-tree, the plur. form *μοιοι* is used (see Jer. viii. 13). There are also the words *μαζι* and *δυνατο,,* signifying different kinds of figs. (a) In Hos. ix. 10, *μαζι* signifies the first ripe of the fig-tree, and the same word occurs in Is. xxviii. 4, and in Mic. vii. 1 (comp. Jer. xxiv. 2). Lowth, on Is. xxviii. 4, quotes from Shaw's *Trav.* p. 370, fol., a notice of the early fig called *becoore,* and in Spanish *Alba-coor.* (b) *δυνατο,,* is the unripe fig, which hangs through the winter. It is mentioned only in Cant. ii. 13, and its name comes from the root *δυναο.* The LXX. render it δαφνώσθι. It is found in the Greek word Βεθφαραγγείον = μαζι δυνατο,, "house of green figs" (see Buxt. col. 1891).

(c) In the historical books of the O. T. mention is made of cakes of figs, used as articles of food, and compressed into that form for the sake of keeping them. They also appear to have been used remedially for boils (2 K. xx. 7; Is. xcviii. 31).

Such a cake was called δυνατωρύ, or more fully δυνατωρύμα, on account of its shape, from root *δυναο,,* to make round. Hence, or rather from the Syriac *μαζιδριδ,* the first letter being dropt, came the Greek word *μαζιδρον.* Athenæus (xi. 500, ed. Canaup.) makes express mention of the *μαζιδρον Σωμαραγγ.* Jerome on Ex. vi. describes the *μαζιδρον* to be a mass of figs and rich dates, formed into the shape of bricks or tiles, and compressed in order that they may keep. Such cakes harden so as to need cutting with an axe.

W. D.

xiv. 13, where the Evangelist relates the circumstance of our Lord's cursing the fig-tree near Bethany: "And seeing a fig-tree afar off having leaves it came, if haply he might find anything thereof, and when he came to it, he found nothing but leaves; for the time of figs was not yet." The apparent unreasonableness of seeking fruit at a time when none could naturally be expected, and the consequent injustice of the sentence pronounced upon the tree, is obvious to every reader.

The fig-tree (Ficus carica) in Palestine produces fruit at two, or even three different periods of the year: first, there is the *biccardi,* or "early ripe fig," frequently mentioned in the O. T. (see Mic. vii. 1; Is. xxviii. 4; Hos ix. 10), which ripens on an average towards the end of June, though in favorable places of soil or temperature the figs may ripen a little earlier, while under less favorable circumstances they may not be matured till the middle of July. The *biccardi* drops off the tree as soon as ripe; hence the allusion in Nah. iii. 12, when shaken they "even fall into the mouth of the eater." Shaw (Trav. i. 284, 8vo ed.) aptly compares the Spanish name *biccardo* for this early fruit, to "quasi breve," as continuing only for a short time. About the time of the ripening of the *biccardi,* the *karmousse* or summer fig begins to be formed; these rarely ripen before August, when another crop, called "the winter fig," appears. Shaw describes this kind as being of a much longer shape and darker complexion than the *karmousse,* hanging and ripening on the tree even after the leaves are shed, and, provided the winter proves mild and temperate, as gathered and eaten as a delicious morsel in the spring. (Comp. also Pliny, *H. N.* xvi. 26, 27.)

The attempts to explain the above-quoted passage in St. Mark are numerous, and for the most part very unsatisfactory; passing over, therefore, the ingenious though objectionable reading proposed by Dan. Helmantus (*Exercit. Sac. ed.* 1638, p. 116) of οὖ γάρ ἦν, καρμοῦς σῖκων — "where he was, it was the season for figs" — and merely mentioning another proposal to read that clause of the evangelist's remark as a question, "for was it not the season of figs?" and the no less unsatisfactory rendering of Hammond (*Annal. on St. Mark*), "it was not a good season for figs," we come to the interpretations which, though not perhaps of recent origin, we find in modern works.

The explanation which has found favor with most writers is that which understands the words *καρμοῦς σῖκων* to mean "the fig-harvest;" "the γάρ in this case is referred not to the clause immediately preceding, "he found nothing but leaves," but to the more remote one, "he came if haply he might find anything thereon;" for a similar *projection* it is usual to refer to Mark xvi. 3, 4: the sense of the whole passage would then be as follows: "And seeing a fig-tree afar off having leaves, he came if perchance he might find any fruit on it (and he ought to have found some), for the time of gathering it had not yet arrived, but when he came he found nothing but leaves." (See the notes in the Greek Testaments of Burton, Trollope, Bloomfield, Webster and Wilkinson: Macnight, *Horæ of the Gospels,* ii. 501, note, 1809; Elsley's *Annal. ad l. c., &c.*) A forcible objection to this explanation will be found in the fact that at the time implied, namely, the end of March or the beginning of April, no figs

---

Fig — *Ficus carica.*

For passages in the Gospels have given occasion to so much perplexity as that of St. Mark
at all edible would be found on the trees; the bier-cium seldom ripen in Palestine before the end of June, and at the time of the Passover the fruit, to use Shaw's expression, would be "hard and no bigger than common plums," corresponding in this state to the pippgia (πηπιγία) of Cant. ii. 13, wholly unfit for food in an unprepared state, and it is but reasonable to infer that our Lord expected to find something more palatable than these small sour things upon a tree which by its show of foliage bespeaks, though falsely, a corresponding show of good fruit, for it is important to remember that the fruit comes before the leaves. Again, if καψός denotes the "fig-harvest," we must suppose, that although the fruit might not have been ripe, the season was not very far distant, and that the figs in consequence must have been considerably more matured than these hard pippgia; but it is probable that St. Mark should have thought it necessary to state that it was not yet the season for gathering figs in March, when they could not have been fit to gather before June at the earliest? There is another way of seeking to get over the difficulty, by supposing that the tree in question was not of the ordinary kind. Celsius (Hieroii, ii. 383) says there is a peculiar fig-tree known to the Jews by the name of Beowth-sharch (βεώβθηςαρχή), which produces grossoli, "small purple figs" (pypgia) every year, but only good fruit every third year; and that our Lord came to this tree at a time when the ordinary annual grossoli only were produced! We are ignorant as to what tree the Beowth-sharch may denote, but it is obvious that the apparent unreasonableness remains as it was.

As to the tree which Whitby (Comment, in March, i. c.) identifies with the one in question, that it was that kind which Theophrastus (Hist. Plant. iv. 2, § 4) calls αξίωπαληζων, "evergreen," it is enough to observe that this is no fig at all, but the Carob or Locust tree (Ceratonia siliquea).

It appears to us, after a long and diligent study of the whole question, that the difficulty is best met by looking it full in the face, and by admitting that the words of the evangelist are to be taken in the natural order in which they stand, neither having recourse to the trajection, nor to unavailable attempts to prove that edible figs could have been found upon the tree elsewhere. It is true that ordinarily the winter figs remain on the tree in mild seasons, and may be gathered the following spring, but this is not to be considered a usual circumstance; and even these figs, which ripen late in the year, do not, in the natural order of things, continue on the tree at a time when it is shedding forth its leaves.

But, after all, where is the unreasonableness of the evangelist's statement? It was stated above in our account of the fruit of the fig-tree appears before the leaves; consequently if the tree produced leaves it should also have had some figs as well. As to what natural causes had operated to effect so unusual a thing as a fig-tree to have leaves in March, it is unimportant to inquire; but the stepping out of the way with the possible chance (εἰ δέα, οὐ μεταθενον τῷ τότε τοιούτῳ) was not very improbable. See Winer, Gram. of N. T. Dict. p. 484, Missong's translation) of finding edible fruit on a fig-tree in leaf at the end of March, would probably be repeated by any observant modern traveller in Palestine. The whole question turns on the pretensions of the tree; had it not proclaimed by its foliage its superiority over other fig-trees, and thus proudly exhibited its peculiar goodness, had our Lord at that season of the year visited any of the other fig-trees upon which no leaves had as yet appeared with the prospect of finding fruit,—then the case would be altered, and the unreasonableness and injustice real. The words of St. Mark, therefore, are to be understood in the sense which the order of the words naturally suggests. The evangelist gives the reason why no fruit was found on the tree, namely, "because it was not the time for fruit;" we are left to infer the reason why it ought to have had fruit if it were true to its pretensions; and it must be remembered that this miracle had a typical design, to show how God would deal with the Jews, who, professing like this precocious fig-tree "to be first," should be "last;" in his favor, seeing that no fruit was produced in their lives, but only, as Wordsworth well expresses it, "the rustling leaves of a religious profession, the barren traditions of the Pharisees, the ostentations display of the Law, and vain exhibition of words without the good fruit of works."

Since the above was written we have referred to Trench's Notes on the Miracles (p. 438), and find that this writer's remarks are strongly corroborative of the views expressed in this article. The following observation is so pertinent that we cannot do better than quote it: "All the explanations which go to prove that, according to the natural order of things in a climate like that of Palestine, there might have been, even at this early time of the year, figs on that tree, either winter figs which had survived till spring, or the early figs of spring themselves—all these, ingenious as they often are, yet seem to me beside the matter. For, without entering further into the question whether they prove their point or not, they shatter upon that ως γάρ ἐστι καψός γενέσθαι of St. Mark; from which it is plain that no such calculation of probabilities brought the Lord thither, but those abnormal leaves which he had a right to count would have been accompanied with abnormal fruit." See also Trench's admirable reference to Ez. xvii. 24. W. H.

* * * * * * *

Large (Biblisherch, ii. 116) adopts the trajection view, mentioned in the preceding article. In the ως γάρ clause, he finds in effect a reason, not why Jesus should not have expected to find figs on the tree (namely, because it was not the time for figs to be ripe), but just the reverse, i.e. why he might be expected to find fruit on it. Hence he explains that since the leaves had come) provided it was not so late in the season that they had been gathered. Mark states, therefore, essentially for the reader's information, that this reason for the disappointment (ως γάρ ἐστι καψός γενέσθαι) did not exist, and hence the deceitful tree could justly serve as a fit symbol of false professors of the gospel. The season for the harvesting of figs differs in different lands. Hence Mark's foreign reader would naturally be expected to be informed, that it was not, in this particular instance, too early for figs on the one hand (as the leaves showed), and not too late on the other, as the harvest-time was not past. For the possibility that a species of the fig tree might have leaves, and even fruit, "in the warm, sheltered regions of Israel," at the time of the Passover, see Thomson's Land of Israel, i. 598. 11.
purposes to which we learn in Scripture the berith was applied; as, for instance, for boards or planks for the Temple (1 K. vi. 15); for its two doors (ver. 34) for the covering of the greater horns (2 Chr. iii. 5); for ship-boards (Ex. xxvii. 5); for musical instruments (2 Sam. vi. 5). The red heart-wood of the tall fragrant juniper of Lebanon was no doubt extensively used in the building of the Temple; and the identification of berith or berith with this tree receives additional confirmation from the LXX. words ἀργεθος and κῦκρος, "a juniper." The doar, the larch, and Scotch fir, which have been by some writers identified with the berith, do not exist in Syria or Palestine. [CUDKAR. W. H.]

FIRE

I. Religious. — (1.) That which consumed the burnt sacrifice, and the incense offering, beginning with the sacrifice of Noah (Gen. viii. 20), and continued in the ever burning fire on the altar, first kindled from heaven (Lev. vi. 9, 13, ix. 24), and rekindled at the dedication of Solomon's Temple (2 Chr. vii. 1, 3). (2.) The symbol of Jehovah's presence, and the instrument of his power, in the way either of approval or of decisive judgment. (Is. ii. 3, xiv. 19, xiv. 18; Num. xi. 1, 3; Judg. xiii. 20; 1 K. xviii. 38; 2 K. i. 10, 12, ii. 11, vi. 17; comp. Is. ii. 6, lviii. 15, 24; Joel iii. 20; Mal. iii. 2, 3, iv. 1; Mark xi. 44; 2 Pet. iii. 10; Rev. xx. 14, 15; 2 Pet. iii. 1, Joseph. Ant. iii. 8, § 6; vii. 4, § 4). Parallel with this application of fire and with its symbolic meaning is to be noted the similiar but more legal purposes, and those less frequent, paid to it, or to the heavenly bodies as symbols of deity, which prevailed among so many nations of antiquity, and of which the traces are not even now extinct: e. g. the Sabean and Magian systems of worship, and their alleged connection with Abra- ham (Spencer, de Leg. Hebr. ii. 1, 2); the occasional release of the Jews themselves into sun-, or its corrupted form of fire-worship (Is. xxvii. 9; comp. Gesen. ועשש, p. 489; Dent. xvii. 3; Jer. vii. 2; Ez. viii. 16; Zeph. i. 5; 2 K. xvii. 16, xxi. 3, xiii. 5, 10, 11, 13; Jahn, Arch. Bibl. c. vi. §§ 405, 408) [Moloch]; the worship or dedication of heavenly bodies or of fire, prevailing to some extent, as among the Persians, so also even in Egypt (Her. iii. 16; Wilkinson, Am. Egypt. i. 328 aldrigm.); the sacred fire of the Greeks and Romans (Thuc. i. 21, ii. 15; Cie. de Leg. ii. 8, 12; Liv. xxvii. 12; Dionys. ii. 67; Plat. Numa, 9, i. 263, ed. Reiske); the ancient forms and usages of worship, differing from each other in some important respects, but to some extent similar in principle, of Mexico and Peru (Prescott, Mexico, i. 60; 84; Peru, i. 101); and lastly the theory of the so-called Guebres of Persia, and the Parsees of Bom- bay. (Fraser, Persia, c. iv. pp. 141, 162, 164; Sir K. K. Porter, Travels, ii. 50, 494; Chardin, Voyages, iii. 210, iv. 238, viii. 367 ff.; Niehahr, Voyages, ii. 36, 37; Mandello, Travels, b. i. p. 76; Gibbon, Hist. c. viii. i. 345, ed. Smith; Benj. of Tudela, Early Trav. pp. 114, 116; Burchhardt, Syria, p. 156.)

The perpetual fire on the altar was to be replen- ished with wood every morning (Lev. vi. 12; comp. xxi. 9). According to the Gemara, it was divided into 3 parts, one for burning the victims, one for incense, and one for supply of the other por- tions (Lev. x. 14; Rashi, Antiq. II. i. 4, 8, p. 26; and xix. 10, p. 98). Fire was esteemed so highly that it was obtained everywhere than from the altar was called "strange fire," and for use of such Nadab and Abihu were punished with death by fire from God (Lev. x. 1, 2; Num. iii. 4, xxvi. 61).

(3.) In the case of the spoil taken from the Mid- ianites, such articles as could bear it were purifird by fire as well as in the water appointed for the purpose (Num. xxxi. 25). The victims skin for sin-offerings was buttressed by fire outside the camp (Lev. iv. 12, 21, vi. 30, xv. 27; Heb. xiii. 11). The Nazarite who had completed his vow, marked its completion by shaving his head and casting the hair into the fire on the altar on which the peace-offerings were being sacrificed (Num. vi. 18).

II. Domestic. — Besides for cooking purposes, fire often remained in Palestine for war (Jer. xxxvi. 22; Mark xiv. 64; John xviii. 19; Harmer, Obs. ii. 50, p. 79). For this purpose a hearth with a chimney is sometimes constructed, on which either lighted wood or pans of charcoal are placed (Harmer, i. 405). In Persia a hole made in the floor is sometimes filled with charcoal, on which a sort of table is set covered with a car- pet, and the company placing their feet under the carpet draw it over themselves (Okhtars, Travels, p. 294; Chardin, Voyages, viii. 190). Rooms in Egypt are warmed, when necessary, with pans of charcoal, as there are no fire-places except in the kitchens (Lane, Mod. Egypt. i. 41; English: in Egypt, i. 11). [Coal, Amer. ed.]

On the Sabbath the law forbade any fire to be kindled even for cooking (Ex. xxxv. 3; Num. xv. 32). To this general prohibition the Jews added various refinements, e. g. that on the eve of the Sabbath no one might read a light, though passages to be read on the Sabbath by children in schools might be looked out by the teacher. If a Gentle lighted a lamp, a Jew might use it, but not if it had been lighted for the use of the Jew. If a festival day fell on the Sabbath eve no cooking was to be done (Mishin, Shabb. i. 3, xvi. 8, vol. ii. 4, 56, Moed Kathan, ii. vol. ii. 287, Sarehuns.).

III. The dryness of the land in the hot season in Syria of course increases liability to accident from fire. The Law therefore ordered that any one kindling a fire which caused damage to corn in a field should make restitution (Ex. xxvii. 6; comp. Judg. xv. 4, 5; 2 Sam. xiv. 30; Mishin, Maccob., vi. 5, vol. iv. p. 48, Sarehuns.; Burchhardt, Syria, pp. 496, 622).

IV. Punishment of death by fire was awarded by the Law only in the cases of incest with a mother-in-law, and of unchastity on the part of a daughter of a priest (Lev. xx. 14, xxx. 9). In the former case both the parties, in the latter the woman only, was to suffer. This sentence appears to have been a relaxation of the original practice in such cases (Gen. xxxviii. 24). Among other nations, burning appears to have been no uncommon mode, if not of judicial punishment, at least of vengeance upon captives: and in a modified form was not unknown in war among the Jews themselves (2 Sam. xii. 31; Jer. xxvi. 22; Dan. iii. 20, 21). In certain cases the bodies of executed criminals and of infamous persons were subsequently burnt (Josh. vii. 25; 2 K. xviii. 16).

The children were expressly ordered to destroy the idols of the heathen nations, and especially any city of their own relapsed into idolatry (Ex. xxiii. 20
FIRE-PAN

2 K. x. 26; Deut. vii. 5, xii. 3, xiii. 16). In some
cases the cities, and in the case of Hazor, the
chariots also, were, by God's order, consumed with
fire (Josb. vi. 24, viii. 28, xi. 6, 9, 13). One of
the expedients of war in sieges was to set fire to
the fuel of the besieged place (Judg. ix. 49, 52).

[HEIGS]

V. Incense was sometimes burnt in honor of the
dead, especially royal personages, as is mentioned
specifically in the cases of Asa and Zedekiah, and
negatively in that of Jehoram (2 Chr. xvi. 14, xxi.
19; Jer. xxiv. 5).

VI. The use of fire in metallurgy was well known
to the Hebrews at the time of the Exodus (Ex.
xxvii. 24, xxxv. 32, xxxvii. 2, 6, 17, xxxviii. 2, 8;
Num. xvi. 18, 39). [HANDBOOK]

VII. Fire or flame is used in a metaphorical
sense to express excited feeling and divine inspira-
tion, and also to describe states of confusion and
future punishments (Ps. iv. 12; Jer. xx. 9; Joel
iii. 30; Mal. iii. 2; Matt. xxv. 41; Mark ix. 43;
Rev. xv. 15).

W. H. P.

FIRE-PAN (פָּרָקִין) [FIRKIN, ΦΥΡΑΚΙΝΗ] or ΦΥΡΑΚΙΝΗ
Phiraqinē), one of the vessels of the Temple service (Ex. xxx.
3, xxxvii. 3; 2 K. xv. 15; Jer. iii. 19). The same word is
divine render "snuff dish" (Ex. xxv.
38, xxxvii. 23; Num. iv. 9; śrāmabhūta: emacuation)
and "censer" (Lev. x. 1, xii. 12; Num. xvi. 6 ff.).
There appear, therefore, to have been two articles
so called; one, like a censer, to carry five
coals for the purpose of burning incense; another,
like a snuff-dish, to be used in trimming the
knops, in order to carry the snuffers and convey
away the snuff.

W. L. B.

FIRKIN. [MEASURES.]

FIRMAMENT. This term was introduced
into our language from the Vulgate, which gives
FIRMAMENTUS as the equivalent of the στρωμα
of the LXX. and the rakîn (רְקִין) of the Hebrew
text (Gen. i. 6). The Hebrew term first demands
notice. It is generally regarded as expressive of
simple expansion, and is so rendered in the margin
of the A. V. (i.e.); but the true idea of the word
is a complex one, taking in the mode by which the
expansion is effected, and consequently implying
the nature of the material expanded. The verb
valpōs means to expand by beating, whether by
the hand, the foot, or any instrument. It is especially
used, however, of beating out metals into thin
plates (Ex. xxxix. 3; Num. xvi. 39), and hence the
substantive דְּפָרָקִין = "beaten plates" of metal
(Num. xvi. 38). It is thus applied to the flattened
surface of the solid earth (Is. xli. 5, xlv. 24; Ps.
xxxvi. 6), and it is in this sense that the term is
applied to the heaven in Job xxxvii. 18 — "Hast
thou spread (rather hammered) out the sky which
is strong, and as a molten looking-glass" — the
mirrors to which he refers being made of metal.
The sense of solidity, therefore, is combined with
the ideas of expansion and tensility in the term rakîn.
Sachsitz (Vorlach, ii. 67) conceives that the idea
of solidity is inconsistent with Gen. ii. 6, which
implies, according to him, the passage of the mist
through the rakîn; he therefore gives it the sense
of "pure expansion" — it is the large and lofty room
in which the winds, sky, love their abode. But
it should be observed that Gen. ii. 6 implies the very
verse. If the mist had penetrated the rakîn it
had to descend in the form of rain; the mist,
however, was formed under the rakîn, and resembles
a heavy dew — a mode of fertilizing the earth
which, from its regularity and quietude, was more
appropriate to a state of innocence than rain, the
electrical violence of which associated it with the
idea of divine vengeance. But the same sense of
solidity runs through all the references to the rakîn.
In Ex. xxiv. 10, it is represented as a solid floor —
"a paved work of a sapphire stone;" nor is the
image much weakened if we regard the word חָלָק
as applying to the transparency of the stone rather
than to the paving. As to the A. V., either sense
being admissible. So again, in Ex. i. 22—26, the
"firmament" is the floor on which the throne of the
Most High is placed. That the rakîn should be
transparent, as implied in the comparisons with
the sapphire (Ex. i. c.) and with crystal (Ex. i. c.;
comp. Rev. iv. 6), is by no means inconsistent with
its solidity. Further, the office of the rakîn in the
economy of the world demanded strength and
substance. It was to serve as a division between the
waters above and the waters below (Gen. i. 7).
In order to enter into this description we must carry
our ideas back to the time when the earth was a
chaotic mass, overspread with water, in which the
material elements of the heavens were intermingled.
The first step, therefore, in the work of orderly
arrangement was to separate the elements of heaven
and earth, and to fix a floor of partition between
the waters of the heaven and the waters of the
earth. Thus the rakîn was created to support the
upper reservoir (Ps. cxviii. 4; comp. Ps. cxiv. 3, where Jehovah is represented as "building
his chambers of water;" not simply "in water,
as the A. V.; the prep. ἐν signifying the material
out of which the beams and joists were made),
himself being supported at the edge or rim of the
disk by the mountains (2 Sam. xxii. 6; Job
xxvi. 11). In keeping with this view the rakîn
was provided with "windows" (Gen. vii. 11; Is.
xxiv. 18; Mal. iii. 10) and "doors" (Ps. lvviii.
23), through which the rain and the snow might
descend. A secondary purpose which the rakîn
served was to support the heavenly bodies, sun,
moon, and stars (Gen. i. 14), in which they were
fixed as "masts, and from which, consequently, they
might be said to drop off (Is. xxiv. 12, xxxiv. 4;
Mal. xxvii. 20). In all these particulars we can
embody the same view as was entertained by the
Greeks and, to a certain extent, by the Latins.
The former applied to the heaven such epithets as
διαφανή (διαφανές, H. ii. 425: κολύμβων, H.
v. 504) and "iron" (σιδΗρωδ, Od. xi. 328,
xxvi. 665) — epithets also used in the Scriptures
(Lev. xxvi. 19) — and that this was not merely
depictive embellishment appears from the views prom-
ulgated by their philosophers, Empedocles (Plat.
Philo. Philo. ii. 11) and Aristotheles (Sene.
Quot., vii. 13). The same idea is expressed in the
cebo extra rakîn of the Latins (Plin. ii. 39, xviii.
57). If it be objected to the Mosaic account that
the view embodied in the word rakîn does not harmonize with strict philosophical truth, the
answer to such an objection is, that the writer
describes things as they appear rather than as they
are. The omission of the words which are the source
of the absence of philosophical truth may be traced throughout all the terms applied
to this subject, and the objection is levelled
rather against the principles of language than
anything else. Examine the Latin caelum (κόσμος),
the "hollow place" or cave scooped out of solid
a separation of waters by a firmament (more properly, expanse) interposed between the waters below and the waters above, dividing the one from the other. If in this same expanse the heavenly bodies are set, it is what we should expect in a style of representation which excludes minute circumstantial detail. This is a truism, moreover, that is true to nature, as it appears in an oriental sky: where the stars at night seem to be set in the same expanse which the clouds also are seen, and far beyond is the blue vault that bounds them. The description, therefore, is phenomenally true; nor can science urge anything against it, since the stars, though not in the same limit of space, are set in the same expanse.

It may be said to be now well established, that the phenomena of creation, as described here, in its successive stages, accord with its deepest mysteries, as science is gradually unfolding them. T. J. C.

**FIRMAMENT** (םירמָאָם, παράθεσις; from פָּרָמָא, early v. Gesen. p. 206), applied equally both to animals and human beings. That some rights of primogeniture existed in very early times is plain, but it is not so clear in what they consisted. They have been classed as, (a) authority over the rest of the family; (b) priesthood; (c) a double portion of the inheritance. The birthright of Esau and of Reuben, set aside by authority or forfeited by misconduct, prove a general privilege as well as quasi-sacredness of primogeniture (Gen. xxi. 31, 34, xlix. 3; I Chr. v. 1; Heb. xii. 16), and a precedence which obviously existed, and is alluded to in various passages (as Ps. lxxix. 27; Job xviii. 13; Rom. viii. 29; Col. i. 15; Heb. xii. 23) [BIRTHRIGHT]; but the story of Esau's rejection tends to show the supreme and sacred authority of the parent irrevocable even by himself, rather than inherent right existing in the eldest son, which was evidently not inalienable (Gen. xxv. 29, 33, 36; Grotius, Calmet, Patrick, Knobel, on Gen. xxv.).

Under the law, in memory of the Exodus, the eldest son was regarded as devoted to God, and was in every case to be redeemed by an offering not exceeding 5 shekels, within one month from birth. If he died before the expiration of 30 days, the Jewish doctors held the father excused, but liable to the payment if he outlived that time (Ex. xiii. 12-15, xiii. 29; Num. vii. 17, xvii. 15, 16; Lev. xxvii. 6; Lightfoot, Hor. Hebr. on Luke ii. 22; Philo, de Pr. Sacer. i. ii. 233, Maunzy). This devotion of the first-born was believed to indicate a priesthood belonging to the eldest sons of families, which being set aside in the case of Reuben, was

---

* "An oriental sky," says Prof. Hackett (Illustrations of Scripture, p. 31, 5th ed.) "has another peculiarity, which adds very much to its impressive appearance. With us the stars seem to adhere to the face of the heavens; they form the most distant objects within the range of vision; they appear to set in a groundwork of thick darkness, beyond which the eye does not penetrate. . . But in Eastern climates the stars seem to hang, like burning lamps, midway between heaven and earth; the pure atmosphere enables us to see a deep expanse of blue ether lying far beyond them. The hemisphere above us glows and sparkles with immemorial fires, that appear as if kept burning in their position by an immediate act of the omnipotent, instead of resting on a frame-work which sub serves the illusion of seeming to give to them their support." T. J. C.
transferred to the tribe of Levi. This priesthood was said to have lasted till the completion of the Tabernacle (Jahn, Arch. Bibl. x. § 165, 387; Patrick, Selden, de Syn. e. 16; Mishn. Zebachin, xiv. 4, vol. v. p. 68; comp. Ex. xxiv. 5).

The ceremony of redemption of the first-born is also referred to in Judges iv. 15, from the name of the Israelite who redeemed it (Jahn, de Num. xviii.). The eldest son received a double portion of the father's inheritance (Deut. xxi. 17), but not of the mother's (Mishn. Bechoroth, viii. 9). If the father had married two wives, of whom he preferred one to the other, he was forbidden to give precedence to the son of the one, if the child of the other were the first-born (Deut. xxi. 15, 16). In the ease of levirate marriage, the son of the next brother succeeded to his uncle's vacant inheritance (Deut. xxv. 5, 6). Under the monarchy, the eldest son usually, but not always, as appears in the case of Solomon, succeeded his father in the kingdom (1 K. i. 39, ii. 22).

The male first-born of animals (בכור וצאן) was also devoted to God (Ex. xiii. 2, 12, xxi. 29, xxxiv. 19, 20; Philo, L. c. and Quis rerum div. heres, 24; i. 489, Mang.). Unblemished animals were to be redeemed with the addition of one fifth of the value or else put to death; or if not redeemed, to be sold and the price given to the priests (Lev. xxvii. 31, 27, 28). The first-born of an ass was to be redeemed with a lamb, or if not redeemed, put to death (Ex. xiii. 15, xxxiv. 20; Num. xviii. 15). Of cattle, goats, or sheep, the first-born from eight days to twelve months old were not to be used, but offered in sacrifice. After the burning of the fat, the remainder was appropriated to the priests (Lev. xxii. 20; Num. xviii. 17, 18; Deut. xv. 19, 20; Neh. x. 36). If there were any blemish, the animal was not to be sacrificed, but eaten at home (Deut. xv. 21, 22, and xii. 5, 7, xiv. 23). Various refinements on the subject of blemishes are to be found in Mishn. Bechoroth. (See Mal. i. 8. By "firstlings," Deut. xiv. 23, compared with Num. xviii. 17, are meant tithe animals: see Reldan, Antiq. iii. 10, p. 327; Jahn, Arch. Bibl. § 387.) H. W. P.

FIRST-BORN, DEATH OF THE FIRST-BORN. (PLACES, 10.)

FIRST-FRuits.

(1) אִירֹקָה, from עֶרֶקְבּ, Gesen. pp. 1249, 1252; sometimes עִירֹקָה.

(2) Αἳρὀκα, in pl. only, or Αἳρὀκα, Gesen. p. 206; usually πρωτογενήματα, πρώτογενήματα (Ex. xxii. 19; orillum. frugum inaeq. principium. (3) Ηιρκά, Gesen. p. 1276: ἄφροκα, ἀφρόκα: πρωτίκα.

Besides the first-born of man and of beast, the Law required that offerings of first-fruits of produce should be made publicly by the nation at each of the three great yearly festivals, and also by individuals without limitation of time. No ordinance appears to have been more distinctly recognized than the custom of the use of the term in the way of illustration carried with it a full significance even in N. T. times (Prov. iii. 9; Tob. i. 6; 1 Mac. iii. 49; Rom. viii. 23, xi. 10; Jam. i. 18; Rev. xiv. 1). (1.) The Law ordered in general, that in the first of all ripe fruits and of boughs, or as it is twice expressed, the first of first-fruits, should be offered at God's house (Ex. xxii. 23, xxiii. 19, xxxiv. 26; philo, de Monrecho, ii. 3 (ii 224, Mang)). (2.)

On the morrow after the Passover Sabbath, i. e. on the 16th of Nisan, a sheaf of new corn was to be brought to the priest, and waved before the altar in acknowledgment of the gift of fruitfulness (Lev. xxiii. 5, 6, 10, 12, ii. 12). Josephus tells us that the sheaf was of barley, and that until this ceremony had been performed, no harvest work was to be begun (Joseph. Ant. iii. 19, § 5). At the expiration of seven weeks from this time, i. e. at the Feast of Pentecost, an obligation was to be made of two leaves of leavened bread made from the new flour, which were to be waved in like manner with the Passover sheaf (Ex. xxxiv. 22; Lev. xxiii. 15, 17; Num. xxviii. 26). (4.) The Feast of Ingathering, i. e. the Feast of Tabernacles in the 7th month, was itself an acknowledgment of the fruits of the harvest (Ex. xxiii. 16, xxxiv. 22; Lev. xxiii. 39). These four sorts of offerings were national. Besides them, the two following were of an individual kid, but the last was made by custom to assume also a national character. (5.) A cake of the first dough that was baked was to be offered as a heave-offering (Num. xv. 19, 21). (6.) The first-fruits of the land were to be brought in a basket to the holy place of God's choice, and there presented as an offering (Num. xv. 17), and then set the leaven down before the altar. The offerer was then, in words of which the outline, if not the whole form was prescribed, to recite the story of Jacob's descent into Egypt, and the deliverance therefrom of his posterity; and to acknowledge the blessings with which God had visitd him (Deut. xxvi. 2-11).

The offerings, both public and private, resolve themselves into two classes: (a) Produce in general, in the Mishna בֶּרֶכֶר, Bechorim, first-fruits, primítivi fructus, πρωτογενήματα, raw produce.

(b) Εἰρήκα, Terumoth, offerings, prímitivi, πρωτίκα, prepared produce (Gesen. p. 1276; Augustine, Quœst. in Hept. iv. 32, vol. iii. p. 732; Spencer, De Leg. Hebr. ii. 9, p. 713; Reland, Antiq. iii. 7: Philo, de Præm. Sacræd. i (ii. 233, Mang.); de Sacrific. Abel. et Cain, cap. ii (i. 177, M.)).

(a) Of the public offerings of first-fruits, the Law defined no place from which the Passover sheaf should be chosen, but the Jewish custom, so far as it is represented by the Mishna, prescribed that the wave-sheaf or sheaves should be taken from the neighborhood of Jerusalem (Terumoth, x. 2). Deputies from the Sanhedrin went out to the eve of the sheaf to the places of sacrifice in the suburbs. In the evening of the festival day the sheaf was cut with all possible publicity, and carried to the Temple. It was there threshed, and an oner of grain, after being winnowed, was bruised and tasted: after it had been mixed with oil and frankincense hid upon it, the priest waved the offering in all directions. A handful was thrown on the altar-fire, and the rest belonged to the priests, to be eaten by those who were free from ceremonial defilement. After this the harvest might be carried on. After the destruction of the Temple all this was discontinued, on the principle, as it seems, that the House of God was exclusively the place for oblation (Lev. i. 14, x. 11, xxi. 13; Num. xxiii. 11; Misch. Terum. v. 6, x. 4, 5; Schabath viii. 8; Joseph. Ant. iii. 10, § 5; Philo, De Præm. Sacræd. i (ii. 293, Mang.); Reland, Antiq. iii. 7, 3 iv. 3, 8).

The offering made at the feast of the Pentecost was a thanksgiving for the conclusion of wheat
harvest. It consisted of two loaves (according to Josephus, one loaf) of new flour baked with leaven, which were waved by the priest as at the Passover. The size of the loaves is fixed by the Mishna at seven palms long and four wide, with horns of four fingers length. No private offerings of first-fruit were allowed before this public offering of the two loaves (Lev. xxiii. 13, 20; Mishn. Terum. x-xii. xi. 4; Joseph. Ant. iii. 10, § 6; Iñid. Antiq. iv. 4, 5). The private offerings of first-fruit may be classed in the same manner as the public. The directions of the Law respecting them have been stated generally above. To these the Jews added or deduced the following: Seven sorts of produce were considered liable to offering, namely, wheat, barley, grapes, figs, pomegranates, olives, and dates (Gen. p. 219; Deut. viii. 8; Mishn. Beccurim, i. 4; Hasechqust, Travels, p. 417), but the Law appears to have contemplated produce of all sorts, and to have been so understood by Nehemiah (Deut. xxvi. 2; Neh. x. 35, 37). The portions intended to be offered were decided by inspection, and the selected fruits were fastened to the stem by a band of rushes (Bic. iii. 1). A proprietor might, if he thought fit, devote the whole of his produce as first-fruit (ibid. ii. 4). But though the Law laid down no rule as to quantity, the minimum fixed by custom was one sixtieth (Iñid. Antiq. iii. 3, 4). No offerings were to be made before the Pentecost, nor after the feast of the Dedication, on the 25th of Cislen (Ex. xxiii. 16; Lev. xxii. 16, 17; Bic. i. 3, 6). The practice was for companies of 24 persons to assemble in the evening at a central station, and pass the night in the open air. In the morning they were summoned by the leader of the feast with the words, "Let us arise and go up to Mount Zion, the House of the Lord our God." On the road to Jerusalem they recited portions of Psalms xxiii. and cl. Each party was preceded by a piper, a sacrificial bullock having the tips of his horns gilt, and crowned with olive. At their approach to the city they were met by priests appointed to inspect the offerings, and were welcomed by companies of citizens proportioned to the number of the pilgrims. On ascending the Temple mount each person took his basket containing the first-fruits and an offering of turtle doves, on his shoulders; and proceeded to the court of the Temple, where they were met by Levites singing Ps. xi. 14, while the doves were sacrificed as a burnt-offering, and the first-fruits presented to the priests with the words appointed in Deut. xxvi. The baskets of the rich were of gold or silver; those of the poor of peeled willow. The baskets of the latter kind were, as well as the offerings they contained, presented to the priests, who waved the offerings at the S. W corner of the altar: the more valuable baskets were returned to the owners (Bic. iii. 6, 8). After passing the night at Jerusalem, the pilgrims returned on the following day to their homes (Deut. xvi. 7; Terum. ii. 4). It is mentioned that King Agrippa bore his part in this highly picturesque national ceremony by carrying his basket, like the rest, to the Temple (Bic. iii. 4). Among other by-laws were the following: (1) He who ate his first-fruits elsewhere than in Jerusalem and without the proper form was liable to punishment (Mishn. iii. 3, vol. iv. p. 284, Surenth.). (2) Women, slaves, deaf and dumb persons, and persons exempt from the public obligation before the priest, which was not generally used after the Feast of Tabernacles (Bic. i. 5, 6).

(b.) The first-fruits prepared for use were not required to be taken to Jerusalem. They consisted of wine, wool, bread, oil, date-honey, onions, etc. (Terum. i. 5, 6; Num. xv. 19, 21; Deut. xviii. 4). They were to be made, according to some, only by dwellers in Palestine; but according to others, to those also who dwelt in Moab, in Ammonitis, and in Egypt (Terum. i. 1). They were not to be taken from the portion intended for tithe, nor from the corners left for the poor (Bic. i. 5, iii. 7). The proportion to be given is thus estimated in that treatise: a liberal measure, one fortieth, or, according to the school of Shammai, one thirtieth: a moderate portion, one fiftieth; a scanty portion, one sixtieth. (See Ex. xlv. 13.) The measuring-basket was to be thrice estimated during the season (ibid. iv. 3). He who ate or drank his offering by mistake was bound to add one fifth, and present it to the priest (Lev. x. 14, xvii. 14), who was forbidden to remit the penalty (Terum. vi. 1, 5). The offerings were the perquisites of the priests, not only at Jerusalem, but in the provinces, and were to be eaten or used only by those who were clean from ceremonial defilement (Num. xviii. 11; Deut. xviii. 4).

The corruption of the nation after the time of Solomon gave rise to neglect in these as well as in other ordinances of the Law, and restoration of them was among the reforms brought about by Hezekiah (2 Chr. xxxv. 5, 11). Nehemiah also, at the return from Captivity, took pains to reorganize the offerings of first-fruits of both kinds, and to appoint places to receive them (Neh. x. 35, 37, xii. 44). Perversion or alienation of them is reproved, as care in observing is eulogized by the prophets, and specially mentioned in the sketch of the restoration of the Temple and Temple service made by Ezekiel (Ex. xx. 40, xlv. 30, xlviii. 11; Mal. iii. 8).

An offering of first-fruits is mentioned as an acceptable one to the prophet Elisha (2 K. iv. 42).

Besides the offerings of first-fruits mentioned above, the Law directed that the fruit of all trees fresh planted should be regarded as uncircumcised or profane, and not to be tasted by the owner for three years. The whole produce of the fourth year was devoted to God: and did not become free to the owner till the fifth year (Lev. xix. 25-26). The trees found growing by the Jews in the attacked were treated as excepted from this rule. (Mishn. Oloth, i. 2.)

Offerings of first-fruits were sent to Jerusalem by Jews living in foreign countries (Joseph. Ant. xvi. 6, § 7).

Offerings of first-fruits were also customary in heathen systems of worship. (See, for instances and authorities, Patrick, On Deut. xxvi.; and a copious list in Spencer, de Leg. Deut. iii. 8, de Prinatarum Origine; also Leslie, On Piscatura, Works, vol. ii.; Winer, s. v. Erntelinge.)

H. W. P.

**FISH**

FISHING. The Hebrews recognized fish as one of the great divisions of the animal kingdom, and, as such, give them a place in the account of the creation (Gen. i. 21, 23), as well as in other passages where an exhaustive description of living creatures is intended (Gen. ii. 19; Ex. xx. 24; Deut. iv. 18; 4 K. iv. 33). They do not, however, appear to have acquired any intimate knowledge of this branch of natural history. Although they were acquainted with some of the names given
by the Egyptians to the different species (for Josephus, B. J. iii. 10, § 8, compares one found in the Sea of Galilee to the crucianus), did not adopt a similar mode of distinguishing them; nor was any classification attempted beyond the broad division of clean and unclean, great and small. The former was established by the Mosaic Law (Lev. xi. 9, 10), which pronounced unclean such fish as were devoid of fins and scales: these were and are regarded as unsuitable food in Egypt (Wilkinson, Anc. Egypt. iii. 58, 59), so much so that one of the laws of El-Hakim prohibited the sale, or even the capture of them (Lane, Mod. Egypte. i. 192). This distinction is probably referred to in the term σαῦρα (see Trench, Schlesinger's Lex. s. v.; Trench, On Pharaoh, p. 137) and κατά (Matt. xiii. 48). Of the various species found in the Sea of Galilee (as enumerated by Runner, Palästina, p. 95), the Silurus would be classed among the former, while the Sphenus galilaeus, a species of eel, and the mugil, chub, would be deemed “clean” or “good.” The second division is marked in Gen. i. 21 (as compared with verse 29), where the great marine animals (םלועות בּלע: κέφαλα μεγάλα): generically described as ἢδακ in the A. V. (Gen. i. 21 [WHALE], but including also other animals, such as the crocodile (LAVIATHAN) and perhaps some kinds of serpents, are distinguished from “every living creature that creepeth” (א. ו. “neth”) in the description applying to fish, along with other reptiles, as having no legs. To the former class we may assign the large fish referred to in Jon. ii. 1 (םלועות יַג: κέφαλος μεγάς, Matt. xii. 40), which Winer (art. Fische), after Bochart, identifies with a species of shark (Caus cirrhata); and also that referred to in Tob. vi. 2 (ויה יַג), identified by Bochart (Herrenv. iii. 697 ff.) with the Silurus glonus, but by Kittel (art. Fish) with a species of crocodile (the secur) found in the Indus. The Hebrews were struck with the remarkable fecundity of fish, and have expressed this in the term יַג, the root of which signifies increase (comp. Gen. xviii. 16), and in the secondary sense of יַג, lit. to creep, thence to multiply (Gen. i. 20, viii. 17, ix. 7; Ez. i. 7), as well as in the allusions in Ez. xvi. 10. Undoubtedly they became familiar with this fact in Egypt, where the abundance of fish in the Nile, and the lakes and canals (Strabo. xvii. p. 823; Bowd. i. 261, 262, 263), rendered it one of the staple commodities of food (Num. xi. 5; comp. Wilkinson, iii. 61). The destruction of fish was on this account a most serious visitation to the Egyptians (Ex. vii. 21; Is. xix. 8). Occasionally it is the result of natural causes: thus St. John (Travels in Valley of the Nib, ii. 246) describes a vast destruction of fish from cold, and Wollaston (Travels in Archipel. i. 310) states that in Oman the fish are visited with an epidemic about every five years, which destroys immense quantities of them. It was perhaps as an image of fecundity that the fish was selected as an object of idolatry: the worship of it was widely spread, from Egypt (Wilkinson, iii. 38) to Assyria (Lavard, Nineveh. ii. 461), and even India (Baur, Mythologie, ii. 58). Among the Philistines, Dagon (= little fish) was presented by a figure half man and half fish (1 Sam. vi. 4). On this account the worship of fish was expressly prohibited (Deut. iv. 18). [DAGON.]

In Palestine, the Sea of Galilee was and still is remarkably well stored with fish, and the value attached to the fishery by the Jews is shown by the traditional belief that one of the ten laws of Joshua enjoined that it should be open to all comers (Lightfoot’s Talmudic Excursions on Matt. iv. 18). No doubt the inhabitants of northern Judæa drew large supplies thence for their subsistence in the earlier as well as the latter periods of the Bible history. Jerusalem derived its supply chiefly from the Mediterranean (comp. Ez. xlvii. 10), at one time through Phœnician traders (Neh. xiii. 16), who must have previously salted it (in which form it is termed הַעַלְמָא in the Talmud; Lightfoot on Matt. xiv. 17). The existence of a regular fish market is implied in the notice of the fish gate, which was probably contiguous to it (2 Chr. xxxiii. 14; Neh. iii. 3, xiii. 39; Zeph. i. 10). In addition to these sources, the reservoirs formed in the neighborhood of towns may have been stocked with fish (2 Sam. ii. 14; iv. 12; Is. vii. 3, xiv. 9; Cant. viii. 4, where, however, “fish” is interpreted in the A. V.). With regard to fish as an article of food, see Food.

Numerous allusions to the art of fishing occur in the Bible. In the O. T. these allusions are of a metaphorical character, descriptive either of the conversion (Jer. xvi. 16; Ez. xlvi. 10) or of the destruction (Ex. xxi. 13 ff.; Ex. xvi. 12; Am. iv. 2; Hab. i. 14) of the enemies of God. In the N. T. the allusions are of a historical character for the most part, though the metaphorical application is still maintained in Matt. xiii. 47 ff. The most usual method of catching fish was by the use of the net, either the casting net (קלף), Hab. i. 15; Ez. xxvii. 15, xlvii. 10; δίσω, Matt. xiv. 20, 21; Mark i. 18, 19; Luke v. 2 ff.; John xxi. 6 ff.; ἀψίδα, Matt. iv. 18; Mark i. 16), probably resembling the one used in Egypt, as shown in Wilkinson (iii. 55), or the drin or d'ng net (דרנ, Is. viii. 8; Hab. i. 15; αὐγά, Matt. xiii. 47), which was larger and required the use of a boat: the latter was probably most used on the Sea of Galilee, as the number of boats kept on it was very considerable (Josephus, B. J. iii. 10, § 10). On other waters a method analogous to the use of the weir in our country was pursued: a fence of cues or reeds was made, within which the fish were caught; this was forbidden on the Sea of Galilee, in consequence of the damage done to the boats by the stakes (Lightfoot on Matt. iv. 13).
Angling was a favorite pursuit of the wealthy in Egypt, as well as followed by the poor who could not afford a net (Wilkinson, iii. 55 ff.;); the requisites were a hook (יוֹם, Is. xix. 8; Hab. i. 15; Job xli. 1; יְרָכָה and יְרָכָה, so called from its resemblance to a thorn, Ann. iv. 2; יְרָכָה, Matt. xvii. 27), and a line (יוֹם). Job xli. 1) made perhaps of reeds; the rod was occasionally dispensed with (Wilkinson, iii. 53), and is not mentioned in the Bible: ground-bait alone was used, fly-fishing being unknown. A still more scientific method was with the trident (יוֹם, A. V. "harbed iron") or the spear (יוֹם, A. V. "thorn") practised in Egypt in taking the crocodile (Job xli. 7) or the hippopotamus (Wilkinson, iii. 72). A similar custom of spearing fish still exists in Arabia (Wellsted, p. 347). The reference in Job xli. 2 is not to the use of the hook in fishing, but to the custom of keeping fish alive in the water when not required for immediate use, by piercing the gills with a ring (יוֹם, A. V. "thorn") attached to a stake by a rope of reeds (יוֹם, A. V. "hook").

The night was esteemed the best time for fishing with the net (Luke v. 5; Pllin. ix. 23). W. L. B.

* See Mr. Tristram's Land of Israel, in regard to the fishes of the Sea of Galilee, p. 420; those of the Jordan, pp. 245, 485; and those of the Jabbok and Gilead, pp. 523, 544. As showing how abundant they still are in the Sea of Tiberias, this traveller states that he saw crams of poisoned bread thrown to them, "which the fish seized, and turning over dead, were washed ashore and collected for the market. The shoals were marvellous—black masses, many hundred yards long, with the black fins projecting out of the water as thick as they could pack. No wonder any net should break which inclosed such a shoal." There seems to be no trace in the Bible of any such mode of taking fish in ancient times. Fishing from boats on this sea has almost if it has not altogether ceased. Only two or three boats (Tristram, p. 426) used for any purpose are now found on the lake of Galilee. Sept states (Jerem. ii. 13, Kopt. Leid. ii. 185) that nets are no longer used in fishing there, but probably we are to understand this as meaning that they are not cast from boats for a draught; for others inform us that the fisherman wade into the water with hand-nets, which they dexterously throw around the fish and thus capture them. (See Richter, Wallfahrten, p. 60; and Rob. Bibl. Res. iii. 262, 1st ed.) It must have been a common sight to the ancient inhabitants of Palestine, as it is to those there now, to see the flying-fish leap from the waters along the coast of the Mediterranean. "Their flight is always short, spasmodic, and painful; and when their web-wings become dry they instantly collapse, and the poor little aeronaut drops into the water like a stone" (Thomson, Land and Book, ii. 257).

The catfish or corvicous (κορυβίας) is very abundant in theound Fountain (Asin Makhevarah) in the plain of Gennesaret. [Gatarenbaum, Amer. p. 41]. Certain kinds of fish, says Thomson, "seem to have lived in the Mediterranean, though the same may once have been true also of the Sea of Galilee, "are always carried on at night. With slaying torch the boat glides over the flashing sea, and the men stand gazing keenly into it until their prey is sighted, when, quick as lightning, they ding their net or fly their spear; and often you see the tired fishermen come sullenly into harbor in the morning, having toiled all night in vain." (Luna and Book, ii. 80). The Saviour's language (Matt. vii. 10; Luke xi. 33) implies that a person in need might ask a fish of another and expect it as a guar-
tunity. There was an ancient "fish gate" at Jerusalem (2 Chr. xxxviii. 14; Neh. iii. 3, &c.), and a fish market has existed there in all periods (Tibbner Topographie von Jerusalem, p. 268). It is evident that the inhabitants have always relied in part on their fish-stocked waters for supplies of food. The reference to "slices and ponds" in Is. x. 10 (A. V.), as if for preserving fish, probably rests on a mistranslation. [Slices, Amer. ed.]

* FISH GATE. [Jerusalem, i. 8, and III., viii.]

* FISH-POOLS, a mistranslation in Cant. vii. 4, A. V. [Henshon, Amer. ed.]

FITCHES (ß c. Vechts), the representative in the A. V. of the two Hebrew words casseuwth and ketzoch. As to the former see Rye.

Ketzoch (יוֹם): μελανθίων; gitch denotes without doubt the Nigella antica, an herbaceous annual plant belonging to the natural order Ranunculacear, and sub-order Helleborine, which grows in the S. of Europe and in the N. of Africa. It was for-

merly cultivated in Palestine for the sake of its seeds, which are to this day used in eastern countries as a medicine and a condiment. This plant is mentioned only in Is. xxvii. 25, 27, where special reference is made to the mode of threshing it; not with "a threshing instrument" (יוֹם, נֶ֖רֹם), but "with a staff" (יוֹם), because the heavy-armed cylinders of the former implement would have crushed the aromatic seeds of the Nigella. The μελανθίων of Dioscorides (iii. 83, ed. Sprengel) is unquestionably the Nigella; both these terms having reference to its black seeds, which, according to the above-named author and Pliny (H. N. xix. 8), were sometimes mixed with bread. The word gitch is of uncertain origin. It is used by Pliny (H. N. xx. 17), who says, "Gitch ex Graeco alienatohn, alien melasphorum vocant." Plautus also (Rud. v. 2, 39) has the same word gitt: "Sis caet tibii! num gitt frigidefacta." Comp. Culina (Hierob. ii. 71).
Besides the N. palaestina, there is another species, the N. occidentalis, which may be included under the term Lycioides; but the seeds of this last-named plant are heavier than the other. W. H.

The seeds of this plant are universally used in Syria, not mixed with the bread, but sprinkled on the top of the loaf or cake. They are called

**flag**, the representative of the A. V. of the two Hebrew words **ebki** and **sadik**.

1. **Job** (ייִבִּי; יֹבִי; פֹּדְיָו: bow palustris, correctum; A. V. "meadow," "flag"); a word, according to Jerome (Comment. in Is. xix. 7), of Egyptian origin denoting, according to many, grass and even herbage, such as rushes and reeds, which grows in marshy places: "I found it erudite querci, said by a proverb signum

"
Ibn al-khitiy in his various cognos, and other (the aconitum of the papaya), the word occurs once in Gen. xv. 2, 18, where it is said that the seven well-feated came out of the river and fed in an **ebki**. Each (Kitto's Cyc. art. **ebki**) and Kitto (Pict. Bib. on Gen. l. c.) are inclined to think that the **ebki** denotes the Cyprea communis. The last named word identifies this sedge with the *arnabatara* of the Egyptians (Hod. Plut. v. 8, § 12), which plant was so much eaten by sheep and cattle. Here is how much doubt as to what the *arnabatara* denotes, as Schneider has shown. The LXX. renders it **ebki** in Is. xix. 7. [See Rev.].

Kilchis (Comment. on Gen. l. c.) says that the **ebki** is synonymous either the Cyprea communis or the *Ranunculus albidus*. We are quite unable to satisfy ourselves so easily on this point. There are many marsh plants besides the Cyprea communis and the *Ranunculus*; at the same time, if the Greek *phairos* denotes the latter plant, about which, however, there is some doubt, it is possible that the **ebki** of Job xvii. 11 may be represented by the *Ranunculus albidus*, or "flowering rush," which grows in Palestine and the East. The **ebki** of Gen. (l. c.) may be used in a general sense to denote such marshy vegetation as is seen on some parts of the Nile. As to discussions on the origin of **ebki**, see Celsius, Hierb. l. c.; Jablonski, Opusc. i. 45, ed. H. Schleinitz, Comment. ad. Job, l. c., and Gesenius, Thes. c. v. Ac.

2. **Sadik** (אֶצוֹ: Am. correctum, palus) occurs frequently in the O. T. in connection with the *sea," to denote the "Red Sea."* (כֹּל הָגָה) The term here appears to be used in a very wide sense to denote "wet of any kind.

The gemin **sadik,** therefore, is the "sea of weeks."
FLAGON, a word employed in the A. V. to render two distinct Hebrew terms: 1. *Ashbalah*, אשבלא (2 Sam. vi. 19; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1). The real meaning of this word, according to the conclusions of Gesenius (Thes. p. 168), is a cake of pressed raisins. He derives it from a root signifying to compress, and this is confirmed by the renderings of the LXX. (αὐξαιρός, ἀμαρταμένος) and of the Vulgate, and also by the indications of the Targum Pseudo-Jonathan, and the Mishna (Nedarim, 6, § 10). In the passage in Hosea there is probably a reference to a practice of offering such cakes before the false deities. The rendering of the A. V. is perhaps to be preferred to Lather, who in the first two of the above passages has *cin Nosel Wein*, and in the last *Kanne Wein*; but primarily to the interpretations of modern Jews (e. g. Gersan., Bub. Bath., and Targum on Chronicles), grounded on a false etymology (see Michaelis, quoted by Gesenius, and the observations of the latter, as above). It will be observed that in the two first passages the words "of wine" are interpreted, and that in the last "wine" should be "of grapes."

2. *Nebil*, נבלי (Is. xvi. 24 only). *Nebil* is commonly used for a bottle or vessel, originally probably a skin, but in later times a piece of pottery (Is. xxx. 11). But it also frequently occurs with the force of a musical instrument (A. V. generally "psaltery," but sometimes "viol"); a meaning which is adopted by the Targum, and the Arabic and Vulgate versions, and Lather, and given in the margin of the A. V. The text, however, follows the rendering of the LXX., and with this agrees Gesenius’s rendering, "vicken und Flachen, von alterthümlich Art."

FLAX. Two Hebrew words are used for this plant in O. T., or rather the same word slightly modified — וו, and וו. About the former there is no question. It occurs only in three places (Ex. ix. 31; xis. xii. 4, xiii. 17). As regards the latter, there is probably only one passage where it stands for the plant in its undressed state (Josh. ii. 6). Eliminating all the places where the words are used for the article manufactured from the thread, or the made up garment [LINEN; COTTON], we reduce them to two: Ex. ix. 31, certain, and Josh. ii. 6, disputed.

In the former the flux of the Egyptians is recorded to have been damaged by the plague of hail.

The word וו is retained by Rashi; but is rendered in LXX. *πορταρίζω*, and in Vulg. *fodculbus germaritutum*. The A. V. seems to have followed the LXX. (bolled = *πορταρίζω*): and so Rosenm. "globulus seu nodus linei maturissimae" (Schol. ad loc.). Gesenius makes it the calix or corolla; refers to the Mishna, where it is used for the calyx of the hyssop, and describes this explanation as one of long standing among the more learned Rabbins (Thes. p. 261).

From Ritter’s Erdkunde, ii. 916 (comp. his Voluta, &c. pp 45–48) it seems probable that the cultivation of flax for the purpose of the manufacture of linen was by no means confined to Egypt; but that, originating in India, it spread over the whole continent of Asia at a very early period of antiquity. That it was grown in Palestine even before the conquest of that country by the battles appears from Josh. ii. 6, the second of the two passages mentioned above. There is, however, some difference of opinion about the meaning of the words וו, אונמאיתא�; *vulg. stipula linii ; and so A. V. "stalks of flax":" Joseph, speaks of *לוכיו ἥλκολικαιν,* arable, or bundles of flax; but Arab. Veby, "stalks of cotton." (Gesen.) Both renderings appear, in favor of the rendering "stalks of flax." If this be correct, the place involves an allusion to the custom of drying the flax-stalks by exposing them to the heat of the sun upon the flat roofs of houses; and so expressly in Joseph. (Ant. v. 1, § 29, *λυόν γαρ ἥλκολικαιν κατα τῷ τέρσμα Φιλιπποι*). In later times this drying was done in ovens (Rosenm. *Afterthumsh.*).

There is a decided reference to the raw material in the LXX. rendering of Lev. xiii. 47, *myrtis στρατεύης*, and Judg. xv. 14, *στρατισμόν*, comp. Is. i. 31.

The various processes employed in preparing the flax for manufacture into cloth are indicated — (1.) The drying process (see above). (2.) The peeling of the stalks, and separation of the fibres (the name being derivable either, as Parkh, from וו to strip, or as Gessen. from וו, to separate into parts). (3.) The backing (Is. xiv. 9; LXX. *Αλβο τον στρατημόν;* vid. Gessen. Lxx. s. v. פלון, and for the comb used in the process, comp. Wilkinson, Anc. Egypt. iii. 140). The flax, however, was not always dressed before weaving (see Ezckhu. vi. 4, where פלון is mentioned as a species of clothing worn by the poor). That the use of the coarser fibres was known to the Hebrews may be inferred from the mention of tow (והו), in Judg. xvi. 9; Ex. i. 31. That flax was anciently one of the most important crops in Palestine appears from Hos. ii. 5, 9; that it continued to be grown and manufactured into linen in N. Palestine down to the Middle Ages we have the testimony of numerous Talmudists and Rabbins. At present it does not seem to be so much cultivated there as the cotton plant. [COTTON; LINEN.]

FLY. (Foot.)

FLINT. The Heb. quadrilateral וו is rendered flint in Dent. viii. 15, xvii. 13; Ps. cxiv. 8; and Is. i. 7. In Job xxviii. 9 the same word is rendered rock in the text, and *flint* in the margin. In the three first passages the reference is to God’s bringing water and oil out of the naturally barren rocks of the wilderness for the sake of his people. In Isaiah the word is used metaphorically to signify the firmness of the prophet in resistance to his persecutors. In Ez. iii. 9 the English word a "flint"
FLY

occurs in the same sense, but there it represents the Heb. "flour." So also in Is. v. 28 we have "flour," in reference to the loads of horses. In 2 Mc. xx. 74 καρδίας is translated "flint," and in Wisd. xi. 4 the expression "εἰς πηγὰς ἀκρότομων" is adopted from Deut. viii. 15 (LXX.). [KNIP.] W. D.

FLY. [NOAH.]

FLOOR. [PAVEMENT.]

FLOR. [BREAD.]

FLOWERS. [PALESTINE, BOTANY OF.]

FLUTE (נְגָפָה, nāgāph), a musical instrument, mentioned amongst others (Dan. iii. 5, 7, 10, 15) as used at the worship of the golden image which Nebuchadnezzar had set up. It is derived from נָגָף, to hiss; LXX. ὀψύχη, a pipe. According to the author of Shibbe-Haggiboria, this instrument was sometimes made of a great number of pipes — a statement which, if correct, would make its name the Chaldee for the musical instrument called in Hebrew נָגָף, and erroneously rendered in the A. V. "Organ." D. W. M.

FLUTE (נְגָפָה, nāgāph): κυμάς; Ὺ.K. i. 40, marg. [TIRE.]

FLUX, BLOODY (ὕποτερπία, Acts xxviii. 8), the same as our dysentery, which in the East is, though sometimes sporadic, generally epidemic and infectious, and then assumes its worst form. It is always attended with fever. [FEVER.] A sharp gnawing and burning sensation seizes the bowels, which give off in purging a mixture slimy matter and putrid discharge. When blood flows it is said to be less dangerous than without it (Schmidt, Rödl, Med. c. xiv. pp. 593-597). King Jehoram's disease was probably a chronic dysentery, and the "bowels falling out" the προβουλία, or, known sometimes to ensue (2 Chr. xxii. 13, 19).

H. H.

FLY. FLIES. The two following Hebrew terms denote flies of some kind.

1. Zōbāb (זֹבָב, zōbab): μύδα: museus) occurs only in Eccl. x. 1. "And Zobah (ζοβαρ) cause the ointment of the apothecary to send forth a stinking savour;" and in Is. xiii. 18, where it is said, "the Lord shall raise for the Zobah that is in the uttermost part of the rivers of Egypt." The Heb. name, it is probable, is a generic one for any insect, but the etymology is a matter of doubt (see Gesenius, Thee. p. 401; Heb. and Chald. Lex. s. v.; and First, Heb. Concord. s. v.). In the first quoted passage allusion is made to flies, chiefly of the family Muscidae, getting into vessels of ointment or other substances — even in this country we know what an intolerable nuisance the house-flies are in a hot summer when they abound, crawling everywhere and into everything; but in the East the nuisance is tenfold greater. The Zōbāb from the rivers of Egypt has by some writers, as by Edomann (Verwech. Sammt. vi. 79), been identified with the simb of which Bruce (Trav. v. 190) gives a description, and which is evidently some species of Tabanus, Sir G. Wilkinson has given some account of. [Trav. of the Equator, Sec. ii. p. 184] of an injurious fly under the name of diphleeb, a term almost identical with zōbab. It would not do to press too much upon this point when it is considered that Egypt abounds with noxious insects: but it must be allowed that there is some reason for this identification: and though, as was stated above, zōbab is probably not strictly applicable to this passage of Isaiah it may be used to denote some very troublesome and injurious fly, κατ' ἐγκύξυ. The diphleeb is a long gray fly, which comes out about the rise of the Nile, and is like the cleg of the north of England; it abounds in calm hot weather, and is often met with in June and July, both in the desert and on the Nile." This insect is very injurious to crops, and causes their death, if the disease which it generates is neglected; it attacks both man and beast.

2. ἀρέβ (ἀρέβ, areb): κυνόμα: omne genus muscorum, musce diversi generis, musca gravisimae: "swarms of flies;" "divers sorts of flies;" A. V.), the name of the insect, or insects, which God sent to punish Pharaoh; see Ex. vii. 21-31; Ps. lxvii. 45, 41. The question as to what particular insect is denoted by ἀρέβ, or whether any one species is to be understood by it, has long been a matter of dispute. The Scriptural details are as follows: the ἀρέβ filled the houses of the Egyptians, they covered the ground, they lighted on the people, the land was hid waste on their account. From the expression in ver. 31, "there remained not one," some writers have concluded that the Hebrew word points to some definite species: we do not think, however, that much stress ought to be laid upon this argument: if the ἀρέβ be taken to denote "swarms," as the Auth. Version renders it, the "not one remaining" may surely have for its antecedent an individual fly understood in the collective "swarms." The LXX. explain ἀρέβ by κυνόμα: i. e. "dog-fly:" it is not very clear what insect is meant by this Greek term, which is frequent in Homer, who often uses it as an abusive epithet. It is not improbable that one of the Hippobosceae, perhaps έφαγον, Hinn., is the κυνόμα of Ελιαν (Ν. A. iv. 51), though Homer may have used the compound term to denote extreme impudence, implied by the shamelessness of the dog and the teasing impertinence of the common fly (Musca). As the ἀρέβ are said to have filled the houses of the Egyptians, it seems not improbable that common flies (Muscidae) are more especially intended, and thus the compound κυνόμα denotes the nature of the plague, though we see no reason to restrict the ἀρέβ to any one family, or sorts of insects," says Somini (Trav. iii. p. 299), "the most troublesome in Egypt are flies; both man and beast are cruelly tormented with them. No idea can be formed of their obdurate rapacity. It is in vain to drive them away; they return again in the self-same moment, and their pernicious breaths out the most patient spirit." The ἀρέβ may include various species of Culicidae (gnats), such as the mosquito, if it is necessary to interpret the "devouring" nature of the ἀρέβ (in Ps. lxvii. 45) in a strict literal sense; though the expression used by the Psalmist is not applicable to the flies, which even to this day in Egypt may be regarded as a "plague," and which are the great instrument of spreading the well-known epidemic, which is spread from one individual and another dreadful pest; or the literal meaning of the ἀρέβ (devouring), the Egyptians may be understood in its fullest sense of the Muscidae, if we suppose that the people may have been punished by the larva gaining admittance into the bodies, as into the stomach, frontal sinuses, and intestines.
and so occasioning in a hot climate many instances of death; a see for cases of Myiosis produced by dipertor larve, *Transactions of Entomol. Soc.* ii. pp. 266–269.

The identification of the *drob* with the cockroach (Blatta orientalis), which Oedemann (*Terra. Som.* pt. ii. c. 7) suggests, and which Kirby (*Birkley, Trans.* i. p. 357) adopts, has nothing at all to recommend it, and is purely gratuitous, as Mr. Hope proved in 1837 in a paper on this subject in the *Trans. Ent. Soc.* i. p. 179–183. The error of calling the cockroach a beetle, and the confusion which has been made between it and the Sacred Beetle of Egypt (Attechus scarab.), has recently been repeated by M. Kaliash (*Hist. and Crit. Comment. Ex. L. c.*). The cockroach, as Mr. Hope remarks, is a nocturnal insect, and provis about for food at night, but what reason have we to believe that the fly attacked the Egyptians by night and not by day? We see no reason to be dissatisfied with the reading in our own version. W. H.

* FLYING ROLL. [Roll, Amer. ed.]
* FOLD. [Sheep-Fold.]

**FOOD.** The diet of eastern nations has been in all ages light and simple. As compatible with our habits, the chief ohs of present importance are the small amount of animal food consumed, the variety of articles used as accompaniments to bread, the substitution of milk in various forms for our liquors, and the combination of what we should deem heterogeneous elements in the same dish, or the same meal. The chief point of agreement is the large consumption of bread, the importance of which in the eyes of the Hebrew is testified by the use of the term lehem (originally food of any kind) specifically for bread, as well as by the expression "staff of bread" (Lev. xxvi. 26; Ps. ev. 16; Ez. iv. 16, xiv. 33). Simpler preparations of corn were, however, common; sometimes the fresh green ears were eaten in a natural state, b the husks being rubbed off by the hand (Lev. xii. 14; Dent. xiiii. 25; 2 K. iv. 42; Matt. xii. i. Luke vi. 1); more frequently, however, the grains, after being carefully picked, were roasted in a pan over a fire (Lev. ii. 14), and eaten as "parched corn," in which form it was an ordinary article of diet, particularly among *labors,* or others who had not the means of dressing food (Lev. xiiii. 14; Ruth ii. 14; 1 Sam. xxiv. 17, xxv. 18; 2 Sam. xxii. 28): this practice is still very usual in the East (cf.Lane, i. 251; Robinson, *Researches*, ii. 350). Sometimes the grain was bruised (like the Greek κολέτιον, Plin. xiiii. 14), in which state it was termed either ἅλινα (ὑπέρκριτα, ixxx. i. A. V. "buttered") Lev. ii. 14, 10, or τριβολία (προσβαλλατός, Aquil. Symm.; A. V. "corn;" 2 Sam. xiv. 19; cf. Prov. xxvii. 22), and then dried in the sun; it was eaten either mixed with oil (Lev. ii. 15), or made into a soft cake named πολύνωλος (A. V. "dough;" Num. xiv. 20; Neh. x. 37; Ez. xlv. 30). The Hebrews used a great variety of articles (John xxi. 5) to give a relish to bread. Sometimes salt was so used (Job vi. 6), as we learn from the passage just quoted; sometimes the bread was dipped into the sour wine (A. V. "vinegar") which the laborers drank (Ruth ii. 14); or, where meat was eaten, into the gravy, which was either served up separately for the purpose, as by Gideon (Judg. vi. 19), or placed in the middle of the meat dish, as done by the Arabs (Burckhardt, *Notes*, i. 63), whose practice of dipping bread in the broth, or melted fat of the animal, strongly illustrates the reference to the sop in John xiii. 26.

The modern Egyptians season their bread with a sauce composed of various stimulants, such as salt, mint, sesame, and chick-peas (Lane, i. 180). The Syrians, on the other hand, use a mixture of savory and salt for the same purpose (Russell, i. 93). Where the above mentioned accessories were wanting, fruit, vegetables, fish, or honey, were used. In short it may be said that all the articles of food which we are about to mention were mainly viewed as subsistances to the staple commodity of bread. The various kinds of bread and cakes are described under the head of BREAD.

Milk and its preparations hold a conspicuous place in eastern diet, as affording substantial nourishment; sometimes it was produced in a fresh state (םלכ : Gen. xviii. 8), but more generally in the form of the modern leban, i. e. sour milk (םלכ : A. V. "butter;" Gen. xviii. 8; Judg. v. 25; 2 Sam. xvii. 28). The latter is universally used by the Bedowins, not only as their ordinary beverage (Burckhardt, *Notes*, i. 240), but mixed with flour, meat, and even salad (Burckhardt, i. 58, 63; Russell, *Alegio*, i. 118). It is constantly offered to travellers, and in some parts of Arabia it is deemed scandalous to take any money in return for it (Burckhardt, *Abisinia*, i. 129). For a certain season of the year, leban makes up a great part of the food of the poor in Syria (Russell, l. c.). Butter (Prov. xxx. 33) and various forms of congealed milk, of the consistency of the modern *butter* (Job x. 10; 1 Sam. xvii. 18; 2 Sam. xvii. 21) were also used. [BUTTER; CHEESE; MILK.]

Fruit was another source of subsistence: figs stand first in point of importance; the early sorts described as the "summer fruit." (לַבָּנָה; Am. viii. 1, 2), and the "first ripe fruit" (דאַדָּה; Hos. ix. 10; Mic. vii. 1) were esteemed a great luxury, and were eaten as fresh fruit; but they were generally dried and pressed into cakes, similar to the date-cakes of the Arabsians (Burckhardt, *Abisinia*, i. 57), in which form they were termed (ֶרֵשּׁ; פֵּרָה; A. V. "cakes of figs;" 1 Sam. xxiv. 18, xxx. 12; 1 Chr. xii. 40), and occasionally simply (2 Sam. xvi. 1; A. V. "summer fruit").

Grapes were generally eaten in a dried state as raisins (לָיָּבֵנֶת; lightburn wax passes, Vulg.; *Sam. xxiv. 18; xxv. 12; 2 Sam. xvi. 1; 1 Chr. xii. 40), but sometimes, as before, pressed into cakes, named (תֵּרָה; A. V. "raisin;" 2 Sam. vi. 19; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1), understood by the LXX. as a sort of cake, ἔλαιον ἀνά τον γυμνον, and by
a The custom is still practised in Palestine (Robin son's *Researches*, ii. 430).

b The other Jews named this sauce דְּרֵימָה (*Mishan* Pes. 2, § 8): it consisted of vinegar, almonds, and spice, thickened with flour. It was used at the celebration of the Passover (*Pes.*, 10, § 3).
FOOD

The A. V. as "a flagon of wine." Fruit-cake forms a part of the daily food of the Arabs, and is particularly adapted to the wants of travellers; dissolved in water it affords a sweet and refreshing drink (Niebuhr, Arabia, p. 57; Russell, Aleppo, i. 82); an instance of its stimulating effect is recorded in 1 Sam. xxx. 12. Apples (probably citrons) are occasionally noticed, but rather in reference to their fragrance (Cant. ii. 5, vi. 8) and color (Prov. xxv. 11), than as an article of food. Dates are not noticed in Scripture, unless we accept the rendering of יְצֹר in the LXX. (2 Sam. xvi. 1) as φοίνικάς; it can hardly be doubted, however, that, where the palm-tree flourished, as in the neighborhood of Jericho, its fruit was consumed; in Joel i. 12 it is reckoned among other trees valuable for their fruit. The pomegranate-tree is also noticed by Joel; it yields a juicy fruit, from which a species of wine was expressed (Cant. vii. 2; Hag. ii. 13). Melons were grown in Egypt (Num. xi. 5), but not in Palestine. The mulberry is undoubtedly mentioned in Luke xvi. 6 under the name σῦκομος; the Hebrew פּוֹרֵשׂ, so translated (2 Sam. v. 23; 1 Chr. xiv. 14) is rather doubtful; the Vulg. takes it to mean pears. The σῦκομοςά ("sycamore," A. V.; Luke xix. 4) differed from the tree last mentioned; it was the Egyptian fig, which abounded in Palestine (1 K. x. 27), and was much valued for its fruit (1 Chr. xxviii. 28; Am. vii. 14). [APPLE; CITRUS; FIG; MULBERRY-TREES; PALM-TREE; POMEGRANATE; SYCAMORE-TREE; SYCAMORE.]

Of vegetables we have most frequent notice of lentils (Gen. xxiv. 34; 2 Sam. xviii. 28, xxii. 11; Ez. iv. 9), which are still largely used by the Bedouins in travelling (Burekhart, Arabien, i. 65); beans (2 Sam. xviii. 28; Ez. iv. 9), which still form a favorite dish in Egypt and Arabia for breakfast, boiled in water and eaten with butter and pepper; from 2 Sam. xviii. 28 it might be inferred that beans and other kinds of pulse were roasted, as barley was, but the second פּוֹרֵשׂ in that verse is probably interlarded, not appearing in the LXX., and even if it were not so, the reference to pulse in the A. V. as of <i>rice</i> in that verse, is wholly unwarranted; cucumbers (Num. xi. 5; Is. i. 8; Bar. vi. 70 [or Epist. of Jer. 70]; cf. 2 K. iv. 39 where wild cucumbers, <i>אכוסים עזים</i>, were picked in mistake for cucumbers); leeks, onions, and garlic, which were and still are of a superior quality in Egypt (Num. xi. 5; cf. Wilkinson, Anc. Egyptian, ii. 374; Lane, i. 251); lettuce, of which the wild species, <i>betacum aegypti</i>, is identified with the Greek πιπερις by Pline (xvi. 65), and formed, according to the LXX. and the Vulg., the "bitter herbs" (בְּנִית הָרָה), eaten with the posch lamb (Ex. xii. 8; Num. ix. 11); endive, which is still well known in the East (Russell, i. 91), may have been included under the same class. In addition to the above we have notice of certain "herbs" (בְּנַי הָרָה; 2 K. iv. 39) eaten in times of scarcity, which were mallow according to the Syrian and Arabic versions, but according to the Talmud a vegetable resembling the <i>Brassica</i> of Linnaeus; and again of <i>sea-purslane</i> (בְּפַלְפַלְפַל; אַמָּה; A. V. "mallows") and broom-root (בְּפַלְפַל; A. V. "juniper") (Job xxv. 4) as eaten by the poor in time of famine, unless the latter were gathered as fuel. An insipid plant, probably purslane, used in saltn, appears to be referred to in Job vi. 6, under the expression בְּנַי הָרָה ("white of egg," A. V.). The usual method of eating vegetables was in the form of <i>pottage</i> (בְּנַי הָרָה; פּוֹלְבָה; Gen. xxv. 2; 2 K. iv. 39; Hag. ii. 12); a meal wholly of vegetables was deemed very poor fare (Prov. xv. 17; Dan. i. 12; Rom. xiv. 2). The modern Arabs consume but few vegetables; radishes and beets are most in use, and are eaten raw with bread (Burekhart, Arabien, i. 56). [BEANS; CUCUMBER; GARLIC; GOURD; LEAK; LENTILS; ONION.]

The spices or condiments known to the Hebrews were numerous; cummin (Is. xxviii. 25; Matt. xxiii. 23), dill (Matt. xxiii. 23), coriander (Ex. xvi. 21; Num. xi. 7), mint (Matt. xxiii. 23, 26). Nuts (pistachios) and almonds (Gen. xiii. 11) were also used as <i>whets</i> to the appetite. [ALMOND-TREE; AMISE; CORIANDER; CUMIN; MINT; MUSTARD; NUTS; SPICES.]

In addition to these classes, we have to notice some other important articles of food: in the first place, honey, whether that which is brought from the bee (1 Sam. xiv. 25; Matt. iii. 4), which abounds in most parts of Arabia (Burekhart, Arabien, i. 54), or the other natural and artificial productions included under that head, especially the <i>dibs</i> of the Syrians and Arabians, i.e. grape-juice boiled down to the state of the Roman <i>diurman</i>, which is still extensively used in the East (Russell, i. 82); the latter is supposed to be referred to in Gen. xiii. 14. The importance of honey, as a substitute for sugar, is obvious; it was both used in certain kinds of cake (though prohibited in the case of meat offerings, Lev. i. 11) as in the pastry of the Arabs (Burekhart, Arabien, i. 54), and was also eaten in its natural state either by itself (1 Sam. xiv. 27; 2 Sam. xvii. 28; 1 K. iv. 3), or in conjunction with other things, even with fish (Luke xiv. 24). "Butter and honey" is an expression for rich diet (Is. vi. 15, 22); such a mixture is popular among the Arabs (Burekhart, Arabien, i. 54). "Milk and honey" are similarly coupled together, not only frequently by the sacred writers, as expressive of the richness of the promised land, but also by the Greek poets (cf. Callim. Hymn. in Iov. 48; Hom. Od. xx. 68). Too much honey was deemed unwholesome (Prov. xxvi. 27). With regard to oil, it does not appear to have been used to the extent we might have anticipated; the modern Arabs only employ it in frying fish (Burekhart, Arabien, i. 54), but for all other purposes butter is substituted: among the Hebrews it was deemed an expensive luxury (Prov. xvi. 17), to be reserved for festive occasions (1 Chr. xii. 40); it was chiefly used in certain kinds of cake (Lev. ii. 5 ff.; 1 K. xvii. 12). "Oil and honey" are mentioned in conjunction with bread in Ez. xv. 13, 18. The Syrians, especially the wealthy, eat much honey, but not butter (Russell, i. 80). Eggs are not often noticed, but were evidently known as articles of food (Is. x. 14, 5; Luke xi. 12), and are reckoned by Jerome (In Epiph. Paul. i. 176) among the delicacies of the table. [HONEY; OIL.]

The Orientalists have been at all times sparing in the use of animal food: not only does the excessive
best of the climate render it both unwholesome to eat much meat (Niebuhr, Descrip. p. 46), and expensive from the necessity of immediately consuming a whole animal, but beyond thi the ritual regulations of the Mosaic law in ancient, as of the Koran in modern times, have tended to the same result. It has been interpreted from the present text of Deut. 15, 4, that animal food was not permitted before the flood; but the notices of the flock of Abel (Gen. iv. 2) and of the herds of Abel (Gen. iv. 20), as well as the distinction between clean and unclean animals (Gen. vii. 2), favor the opposite opinion; and the permission in Gen. ix. 3, 4, to eat unclean animals, is probably an added, more explicit declaration of a condition implied in the grant of universal dominion previously given (Gen. i. 28). The prohibition then expressed, against consuming the blood of any animal (Gen. ix. 4) was more fully developed in the Levitical law, and enforced by the penalty of death (Lev. iii. 17, 28), vii. 20, xii. 16; 1 Sam. xiv. 32 ff.; Ex. xlv. 7, 15), on the ground, as stated in Lev. xvii. 11 and Deut. xii. 23, that the blood contained the principle of life, and, as such, was to be offered on the altar; probably there was an additional reason in the heathen practice of consuming blood in their sacrifices (Ps. iv. 4; Ex. xxxiii. 25). The prohibition applied to strangers as well as Israelites, and to all kinds of beast or fowl (Lev. xvi. 26, xvi. 12, 13). So strong was the feeling of the Jews on this point, that the Gentile converts to Christianity were held under similar restrictions (Acts xx. 29, xxii. 25). As a necessary deduction from the above principle, all animals which had died a natural death (דָּבָר מָתַי מַעַר לֹג), Deut. xiv. 21), or had been torn of beasts (תֵּלְיוּת, Ex. xxii. 31), were also prohibited (Lev. xvi. 15; cf. Ez. iv. 14), and to be thrown to the dogs (Ex. xxii. 31): this prohibition did not extend to strangers (Deut. xiv. 21). Any person infringing this rule was held unclean until the evening, and was obliged to wash his clothes (Lev. xvii. 15). In the N. T. these cases are described under the term πῦντον (Acts xv. 29), applying not only to what was strangled (as in A. V.), but to any animal from which the blood was not regularly poured forth. Similar prohibitions are contained in the Koran (i. 176, v. 3, xvi. 116), the result of which is that among the Jews as among the Arabs, the meat of the sheep and the goat, as well as the meat of the ox, is eaten without the meat except what has been bought at the shambles. Certain portions of the ιερά of sacrifices were also forbidden (Lev. iii. 9, 10), as being set apart for the altar (Lev. iii. 16, vii. 25; cf. 1 Sam. ii. 16 ff.; 2 Chr. vii. 7): it should be observed that the term in Neh. viii. 10, translated θυσία is not דָּבָר מַעַר, but דָּבָר מַעַר = the fatty pieces of meat, delicacies. In addition to the above, Christians were forbidden to eat the flesh of animals, portions of which had been offered to idols (εἰδώλωσιν), whether at private feasts, or as bought in the market (Acts xx. 29, xxii. 25; 1 Cor. viii. 1 ff.): All beasts and birds classed as unclean (Acts xi. 4 ff.; Deut. xiv. 4 ff.) were also prohibited. [USELESS BEASTS AND BIRDS]: and in addition to these general precepts there was a special prohibition against "eating a kid in his mother's milk" (Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21), which has been variously understood, by Talmudical writers, as a general prohibition against the joint use of meat and milk (Mishna, Cholin, cap. 3, § 1); by Michaelis (Nov. Reis, iv. 210), as prohibiting the use of fat or milk, as compared with oil, in cooking; by Luther and Calvin, as prohibiting the slaughter of young animals; and by Boehart and others, as discountenancing cruelty in any way. These interpretations, however, all fail in establishing any connection between the precept and the offering of the first-fruits, as implied in the three passages quoted. More probably it has reference to certain heathen usages at their harvest festivals (Mainmonides, More Nebuch. 3, 48; Spencer, de Legg. Heb. Ritt. p. 535 ff.): there is a remarkable addition in the Samaritan version and in some copies of the LXX. in Deut. xiv. 21, which supports this view: ἵνα γὰρ ποιεί τοῦτο, ἵνα αὐτὸ ἀποκαλέσῃ, τὸ τῆς ἑλαθείας θεοῦ, ἵνα μαθῆς ἄτικα τῷ Θεῷ Ἑλαμ (cf. Knobel, Comment, in Ex. xxiii. 19). The Hebrews further abstained from eating the sin of the hip (עֻזָּה תְפִלֶּית, Gen. xxxii. 31), in memory of the struggle between Jacob and the angel (comp. ver. 25). The LXX., the Vulg., and the A. V. interpret the αἰματία of the sin offering of the shrinking or bumbling of the muscle (Δέρματα: εἰς μετακομίζεται: "which shrink"): Josephus (Ant. i. 29, § 2) more correctly explains it, τὸ κόλλωμα τοῦ πτεριδίου, and there is little doubt that the nerve he refers to is the nevus siphonodontis, which attains its greatest thickness at the hip. There is no further reference to this custom in the Bible; but the Talmudists (Cholin, 7) enforced its observance by penalties.

Under these restrictions the Hebrews were permitted the free use of animal food: generally speaking they only availed themselves of it in the exercise of hospitality (Gen. xviii. 7), or at festivals of a religious (Ex. xii. 8), public (1 K. i. 19; 1 Chr. xii. 40), or private character (Gen. xxvii. 4; Luke xxv. 33): it was only in royal households that there was a daily consumption of meat (1 K. iv. 28; Neh. v. 18). The use of meat is reserved for similar occasions among the Bedouins (Burckhardt's Notes, i. 63). The animals killed for meat were—calves (Gen. xviii. 7; 1 Sam. xxiv. 24; Am. vi. 4), which are further described by the term fattling (לָאָם = μάριος σιτίτιον, Luke xxv. 23, and σιτίτιον, Matt. xxii. 4, 2 Sam. vi. 13; 1 K. i. 9 ff.; A. V. "fat cattle"); lambs (2 Sam. xii. 4; Am. vi. 4): oxen, not above three years of age (1 K. i. 9; Prov. xv. 17: Is. xxii. 13; Matt. xxii. 4), which were either stall-fed (לָאָם = μάριος ἐκλεκτοῖς), or taken up from the pastures (לָאָם = βασιλεὺς ἀναμαθεῖς): 1 K. iv. 23); kids (Gen. xxvii. 9; Judg. vi. 19; 1 Sam. xvi. 29): harts, roebucks, and fallow-deer (1 K. iv. 23), which are also brought into close connection with ordinary cattle in Deut. xiv. 5, as though holding an intermediate place between tame and wild animals; birds of various kinds (בָּוָּם: A. V. "fowls": Neh. v. 18; the LXX., however, give χειμάρροι, as though the reading were בָּוָּם: quail in certain parts of Arabia (Ex. xvi. 13; Num. x. 32); poultry (סַלְחִית: 1 K. iv. 23; understood generally by the LXX., ἱδρυλίων ἐκλεκτῶν σιτετῶν: by Kimchi and the A. V. as fatted fowl; by Gesenius, Thesaur. 249, as geese, from the whiteness of their plumage; by Theilus, Comment, in l. c., as guinea-fowls, as though the word represented the call of that bird); partridges (1 Sam. xxv. 29): fish, with the exception of such as were without scales and fins (Lev. x. 9; Deut. xiv
FOOD

19) both salted, as was probably the case with the sea-fish brought to Jerusalem (Neh. xiii. 16), and fresh (Matt. xiv. 19, xv. 36; Luke xxiv. 42): in our Saviour's time it appears to have been the usual food about the Sea of Galilee (Matt. vii. 10); the term ἁπάντωμι is applied to it by St. John (vi. 3; xxi. 9 f.) in the restricted sense which the word obtained among the later Greeks, as ἁπέλικα. Locusts, of which certain species only were esteemed clean (Lev. xi. 22), were occasionally eaten (Matt. iii. 4), but considered as poor fare. They are at the present day largely consumed by the poor both in Persia (Morier's 'Second Journey,' p. 44) and in Arabia (Niebuhr, 'Voyage,' i. 319); they are salted and dried, and roasted, when required, on a frying-pan with butter (Burchardt's 'Notes,' ii. 92; Niebuhr, l. c.).

Meat does not appear ever to have been eaten by itself; various accompaniments are noticed in Scripture, as bread, milk, and sour milk (Gen. xviii. 3); bread and broth (Judg. vi. 19); and with fish either bread (Matt. xiv. 19, xv. 36; John xxi. 9) or honeycomb (Luke xxiv. 42): the instance in 2 Sam. vi. 19 cannot be relied on, as the term ἄρις, rendered in the A. V. a good piece of flesh, after the Vulg., asatura bibule carnis, means simply a portion or measure, and may apply to wine as well as meat. For the modes of preparing meat, see Cooking; and for the times and manner of eating, Meals: see also Fruits, Fowls, &c., &c.

To pass from ordinary to occasional sources of subsistence: diet consisted of bread and water administered in small quantities (1 K. xxi. 21), or water only (21); pulse and water was considered but little better (Dan. i. 12); in time of sorrow or fasting it was usual to abstain either altogether from food (2 Sam. xii. 17, 29), or from meat, wine, and other delicacies, which were described as ἰδων, ἰδων, &c. (Dan. x. 3). In time of extreme famine the most loathsome food was swallowed: such as an ass's head (2 K. vi. 25), the ass, it must be remembered, being an unclean animal (for a parallel case comp. Phutarch, 'Artocra,' 21), and dove's dung (see the article on that subject), the dung of cattle (Joseph, B. J. v. 13, § 7), and even possibly their own dung (2 K. xviii. 27). The consumption of human flesh was not altogether unknown (2 K. vi. 28; cf. Joseph, B. J. vi. 3, § 4), the passages quoted supplying instances of the exact fulfilment of the prediction in Deut. xxviii. 50, 57; comp. also Lament. ii. 29, iv. 10; Ezr. v. 10.

With regard to the beverages used by the Hebrews, we have already mentioned milk, and the probable use of barley-water, and of a mixture resembling the modern sheher, formed of fig-cake and water. The Hebrews probably resembled the Arabs in not drinking much during their meals, but concluding them with a long draught of water. It is almost needless to say that water was most generally drunk. In addition to these the Hebrews were acquainted with various intoxicating liquors, the most valued of which was the juice of the grape, while others were described under the general term of shechar or strong drink (Lev. x. 9; Num. vi. 3; Judg. xiii. 4, 7), if indeed the latter does not sometimes include the former (Num. xxvi. 51). These were reserved for the wealthy for festive occasions: the poor consumed a sour wine (A. V. *vitae*; Ruth ii. 14; Matt. xxi 48), calculated to quench thirst, but not agreeable to the taste (Prov. xx. 21). [Drink, Strong; Vinegar; Water; Wine.] W. L. B.

* It is not correct to say that the food of the Orientals is light and simple, unless meat be the only becry article. They use an inordinate amount of grease in cooking. Eggs are fried in twice their bulk of fat, or butter, or oil. Rice is not eaten except drenched with butter. A stew is unheard of unless the meat and vegetables be first fried in butter or fat, that they may drink in as much of the fatty matter as possible.

Again, they are fondous in the East for elaborate compounds. *Kibaa*, their most prized article of diet, is compounded of cracked wheat, boiled and dried previously to give it solidity, beaten up with meat, and onions, and spices, and the nut of a species of pine, a very heavy article of diet. Lusa's potage was probably compounded with lentiles, oil, onions, and spices, like the majbelKhok of the present day. Dyspepsia is one of the most universal disorders of the people, and arises from their heavy and unwholesome food, and the fact that their heavy meals are taken just before retiring for the night.

Again, oil is not used merely for frying fish, but is eaten universally in place of butter and fat during Lent, and at all times is a prominent article of diet. I know of a single family where they use 500 pounds of it per annum, of which the larger part is for food. There are twelve to fourteen persons in the household.

G. E. F.

FOOTMAN, a word employed in the Authorized Version in two senses. (1.) Generally, to distinguish those of the people or of the fighting-men who went on foot from those who were on horseback or in chariots. The Hebrew word for this is ἀνθρώπος, ἀνθρώπος, from ἄνθρωπος, a foot. The LXX. commonly express it by πεποιήθης, or occasionally ταγμάτα.

But (2.) The word occurs in a mere special sense (in 1 Sam. xxii. 17 only), and as the translation of a different term from the above — ἀνθρώπος, πεποιθήτως.
This passage affords the first mention of the existence of a body of swift runners in attendance on the king, though such a thing had been foretold by Samuel (1 Sam. viii. 11). This body appear to have been afterwards kept up, and to have been distinct from the body-guard—the six hundred, and the thirty—who were originated by David. See 1 K. xiv. 27, 28; 2 Chr. xii. 10, 11; 2 K. xi. 4, 6, 11, 13, 19. In each of these cases the word is the same as the above, and is rendered "guard;" but the translators were evidently aware of its significance, for they have put the word "runners" in the margin in two instances (1 K. xiv. 27; 2 K. xi. 13). This indeed was the force of the term "footman" at the time the A. V. was made, as is plain not only from the references just quoted, but amongst others from the title of a well-known tract of Jobyan's—The Heavily Footed, or a Description of the Man that gets to Heaven, on 1 Cor. ix. 24 (St. Paul's figure of the race). Swift running was evidently a valued accomplishment of a perfect warrior—a glibor, as the Hebrew word is among the Israelites. There are constant allusions to this in the Bible, though obscured in the A. V., from the translators not recognizing the technical sense of the word glibor. Among others see Is. xv. 5; Job xvi. 14; Joel ii. 7, where "strong man"—"giant," and "mighty man," are all glibor. David was famed for his powers of running; they are so mentioned as to seem characteristic of him (1 Sam. xvii. 22, 48, 51, xx. 6), and he makes them a special subject of thanksgiving to God (2 Sam. xxii. 30; Ps. xviii. 29). The cases of Cushu and Ahinaz (2 Sam. xviii.) will occur to every one. It is not impossible that the former—"the Ethiopian," as his name most likely is—had some peculiar mode of running. Christ and his Apostles also "swung on his feet," and the Gadite heroes who came across to David in his difficulties were "swift as the roe upon the mountains:" but in neither of these last cases is the word rootz employed. The word probably derives its modern sense from the custom of domestic servants running by the side of the carriage of their master. [GUARD.] G.

* FORDS. [See JORDAN, iii.]

FOREHEAD (fάρως, from ἄρωμα), rad. insus. shine, Gesen. p. 815: υπεραφόρος: from. The practice of covering the face in public for women of the higher classes, especially married women, in the East, sufficiently stigmatizes with reproach the unveiled face of women of bad character (Gen. xxiv. 65; Jer. iii. 3; Neubr., Fig. i. 152, 149, 150; Shaw, Travels, p. 225, 240; Hasselquist, Travels, p. 535; Buchanan, Arab Tribes, p. 312; Lane, Mod. Egy. i. 72, 77, 225-248; Burkhardt, Travels, i. 233). An especial force is thus given to the term "hard of forehead" as descriptive of austerity in general (Ez. iii. 7, 8, 9: comp. Juv. Sat. xiv. 212—Ejectum atritt e fronte ruborem.).

The custom among many oriental nations both of coloring the forehead and face, and of impressing on the body marks indicative of devotion to some special deity or religious sect, is mentioned elsewhere [Cuttings in Flesh] (Burckhardt, Notes on Bed. i. 119).—G. W.

FOREST (fάραδος, from ἄρατος, rad. insus. shine, Gesen. p. 815: υπεραφόρος: from. Fountain at Nazareth. (Roberts.)

The volcanic agency which has operated so powerfully in Palestine, has from very early times given tokens of its working in the warm springs which are found near the sea of Galilee and the Dead Sea. One of them, En-gedi, the "spring of calves," at the N. end of the latter, is probably identical with Caalirhe, mentioned by Josephus as a place.

**Fountain.** (Handicraft, 1.)

Also signifies an "e'ye." Gesen. p. 1017.

(1.) נַעֲרָה, from נָעַרָה, to floor; (from 1), a well-watered place; sometimes in A.V.
FOUNTAIN-GATE.

It was restored to by Herod in his last illness (Joseph. B. J. i. 33, § 5; Kitto, Phys. Geogr. of Polit., 120; 121; Stanley, O. P. P. 253). His son Philip built the town, which he named Tiberias, at the sulphureous hot-springs at the S. of the sea of Galilee (Joseph. Ant. xviii. 2, § 3; Hasselquist, Travels, App. 293; Kitto, 114; Burckhardt, Syria, 328, 330). Other hot-springs are found at seven miles distance from Tiberias, and at Usbeis (Galara) (Reoland, 775; Burckhardt, 276, 277; Kitto, 116, 118).

Jerusalem, though mainly dependent for its supply of water upon its rain-water cisterns, appears from recent inquiries to have possessed either more than one perennial spring, or one issuing by more than one outlet. To this agree the "fons perennis aquarum" of Tacitus (Hist. v. 12, and the ἔναστης νέφελετος σύστασις of Aristeas (Joseph. ii. 112, ed. Havercamp. Robinson, i. 343, 345; Williams, Holy City, ii. 458, 468; Rammr, p. 288; Ez. xxvii. 1, 12; Kitto, Phys. Geogr. pp. 412, 415).

CISTERS: SIDON.

In the towns built by Herod, Josephus says, there were cisterns with χαλασμοφυτα through which water was poured forth: these may have been statues or figures containing spoils for water after Roman models (Plin. Epist. v. 6; H. N. xxxvi. 15, 121; Joseph. B. J. v. 4, § 4).

No Eastern city is so well supplied with water as Damascus (Early Trac. p. 294). In oriental cities generally public fountains are frequent (Yule, English in Syria, 189). Traces of such fountains at Jerusalem may perhaps be found in the names En-Rogel (2 Sam. xii. 17), the "Dragon-well," or fountain, and the "gate of the fountain" (Neh. ii. 13, 14). The water which supplied Solomon's pools near Bethlem was conveyed to them by subterranean channels. In these may perhaps be found the "sealed fountain" of Cant. iv. 12 (Hasselquist, p. 145; Maundrell, Early Trac. p. 457). The fountain of Nazareth bears a traditional antiquity, to which it has probably good derivation, if not actual claim (Roberts, Views in Palestine, i. 21, 23, 32; Col. Ob. Chron. No. xxx. p. 147; Fisher's Views in Syria, i. 91, iii. 44).

II. W. P.

So-called "Fountain" of Cana. (From Roberts.)

* FOUNTAIN-GATE. [JERUSALEM, I., 13, AND III. VIII.]

FOWL.

Several distinct Hebrew and Greek words are thus rendered in the A. V. of the Bible. Of these the most common is פֶּלַל, which is usually a collective term for all kinds of birds, frequently with the addition of פַּעַל, "of the skies."

FOUL is a collective term for birds of prey, derived from פּוּל, "to attack vehemently." It is translated "fowl" in Gen. xv. 11, Job xxviii. 7, Is. viii. 6.

פּוּל (Phal. פּוּל), from root פּוּל, "to hiss," is also a collective term for birds, though occasionally rendered by swallo and aperone. For the collective use of the word see Deut. iv. 17: Ps. viii. 8; Ez. xxiv. 29; and Dan. iv. 12. In Neh xvi. 18, the word seems to have the special sense which "fowl" has with us, as it is enumerative among the viands provided for Nehemiah's table.

In 1 K. iv. 23, among the daily provisions for Solomon's table "fatted fowl" are included, the Hebrew words being כּוּלְפַל קַרְתִּיס. Gese- nius prefers to translate this "fatted fowl," referring the word to the root פּוּל, "to be pure," because of the pure whiteness of the bird. He gives reasons for believing that the same word in the cognate languages included also the meaning of fowl.

In the N. T. the word translated "fowl" is most frequently "πετριεδα", which comprehends all kinds of birds (including ῥαβδος, Luke xii. 24); but in Rev. xix. 17-21, where the context shows that birds of prey are meant, the Greek is τὰ ὀρνιθα. The same distinction is observed in the apocryphal writings: comp. Jud. vi. 7, Ezech. xvii. 4 xiii. 14, with 2 Macc. xv. 33. W. D.

[The following supplement to the preceding article appears under Fowlus in the English edition, but was omitted in reprinting, through the misunderstanding of a reference in the Appendix. As "birds" and "fowls" are used in precisely the same sense in the A. V., it is better that the two articles should be united.]

Birds are mentioned as articles of food in Deut. xiv. 11, 29, the intermediate verses containing a list of unclean birds which were not to be eaten. There is a similar list in Lev. xi. 12-19. From Job vi. 6, Luke xi. 12, we find that the eggs of birds were also eaten. Quails and pigeons are edible birds mentioned in the O. T. Our Saviour's mention of the hen gathering her chickens under her wing implies that the domestic fowl was known in Palestine. The art of caring wild birds is referred to in Ps. xxxiv. 7; Prov. i. 17, vii. 23; Am. iii. 5; Hos. v. 1, vii. 12. The eagle fell of birds in Jer. v. 27 was a trap in which decoy-birds were placed to entice others, and furnished with a trap-door which could be dropped by a fowler watching at a distance. This practice is mentioned in Ezech. xi. 30 (παιδες θηρευται εν καρπαλα; comp. Arist. Hist. Anim, ix. 8). In Deut. xxii. 6 it is commanded that an Israelite finding a bird's nest in his path might take the young or the eggs, but must let the hen-bird go. By this means the extinction of any species was guarded against. Comp. Phocyl. Circum. 80 ff:—

מֵה הַבָּנָנָה בַּשָּׁלֹם אַשֶּׁר פָּגָת בַּלָּא שֵׁלֶג.  
מְגֶרֶת שְׁהֵרֶכֶס, וּזַּה חֵץ פָּלַל תְּנָסֶפֶּה.  

Birds were not ordinarily used as victims in the Jewish sacrifices. They were not deemed valuable enough for that purpose; but the substitution of turtle-doves and pigeons was permitted to the poor and in the sacrifice for purification. The way of offering them is detailed in Lev. i. 15-17, and v. 8 and it is worthy of notice that the practice of not
W. D. FOWLER.

FOXY (Canis aureus), jackal.

The jackal (Canis aureus) is a common animal in the Middle East, and is often mentioned in the Bible. It is a small canine, with a reddish-brown coat and a slender, snakelike body. The jackal is a nocturnal animal, often seen in the desert and in the mountains. It is known for its ability to adapt to various environments, and it can be found all over the region. The jackal is a scavenger, feeding on dead animals, carrion, and small game. It is also known to be a pest to farmers, as it will raid haystacks and other agricultural materials.

The jackal is often associated with the Hebrew word "šāšīlām," which is a common word in the Bible. The word is used to describe a number of different animals, including the jackal. However, it is unclear what the exact meaning of the word is. Some scholars believe that the word is related to the Hebrew word for "sheep," while others believe that it is related to the word for "dog." There is no consensus on the exact meaning of the word, and it remains a mystery.

Despite its common occurrence in the region, the jackal is not a very well-studied animal. There is little known about its behavior, ecology, or biology. However, it is clear that the jackal is a crucial part of the region's ecosystem, and it plays an important role in maintaining the balance of nature. Further study of the jackal is needed to better understand its role in the region.

FOX

The shāšīlām of Judg. xv. 4 are evidently "jackals," and not "foxes," for the former animal is gregarious, whereas the latter is solitary in its habits: and it is in the highest degree improbable that Samson should ever have succeeded in catching so many as 200 foxes, whereas he could readily have taken in snares," as the Hebrew verb (šāšīlām) properly means, so many jackals, which go together for the most part in large groups. The whole passage, which describes the manner in which Samson avenged himself on the Philistines by tying the tails of two jackals together, with a firebrand between them, and then sending them into the standing corn and orchards of his enemies, has, it is well known, been the subject of much dispute. Dr. Kennicott (Remarks on Select Passages in the O. T., Oxford, 1787, p. 100) proposed, on the authority of seven Heb. MSS., to read šāšīlām (šāšīlām), "sheaves" (?), instead of šāšīlām (šāšīlām), leaving out the letter š, the meaning then being, simply, that Samson took 300 sheaves of corn, and put end to end ("tail to tail"), and then set a burning torch between them. (See also what an anonymous French author has written under the title of Remarks de Samson, and his arguments quoted in a treatise, "De Vulgatis Sineauris," by R. H. Geldard, in Thes. Nov. Theol. Phil. i. 558.) The proposed reading of Kennicott has deservedly found little favor with commentators. Not to mention the authority of the important old versions which are opposed to this view, it is pretty certain that šāšīlām cannot mean "sheaves." The word, which occurs only three times, denotes in Is. xi. 12 "the bellow of the hind," and in K. xx. 10, Ez. xiii. 19, "handfuls.

The difficulty of the whole passage consists in understanding how two animals tied together by their tails would run far in the same direction. Col. H. Smith (in Kitto’s Cyc. art. Šāšīlā) observes, "they would assuredly pull counter to each other, and ultimately fight most fiercely." Probably they would; but it is only fair to remember named animals ate the fruit, with avidity, but the wolves would not touch it.
a. reply to the objections which critics have advanced to this transaction of the Hebrew judge, that it has yet to be demonstrated that two jackals united by their tails would run counter, and thus defeat the intended purpose; so important a matter as the verification of a Scripture narrative the proper course is experimental where it can be resorted to. Again, we know nothing as to the length of the cord which attached the animals, a consideration which is obviously of much importance in the question at issue, for as jackals are gregarious, the couples would naturally run together if we allow a length of cord of two or three yards, especially when we reflect that the terrified animals would endeavor to escape as far as possible out of the reach of their captor, and make the best of their way out of his sight. Col. H. Smith's explanation, which has been adopted by Kitto (in the Diet. Bibl. in Judg. i. c.), namely, that by "tail to tail" is to be understood the end of the firebrand attached to the extremity of the tail, is contradicted by the immediate context, where it is said that Samson "put a firebrand in the midst between two tails." The translation of the A. V. is unquestionably the correct rendering of the Hebrew, and has the authority of the L. X. and Vulg. in its favor. But if the above remarks are deemed inadequate to a satisfactory solution of Samson's exploit, we are at liberty to suppose that he had men to help him, both in the capture of the jackals and in the use to which he put them, and it is not necessary to conclude that the animals were all caught at, and let loose from, the same place. Some might have been taken in one portion of the Philistines' territory and some in another, and let loose in different parts of the country. This view would obviate the alleged difficulty alluded to above; for there would be no necessity for the jackals to run any great distance in order to insure the greatest amount of damage to the crops: 150 different centres, so to speak, of conflagration throughout the country of the Philistines must have burnt up nearly all their corn: and, from the whole context, it is evident that the injury done was one of almost unlimited extent.

With respect to the jackals and foxes of Palestine, there is no doubt that the common jackal of the country is the Canis aureus, which may be heard every night in the villages. Hemprich and Ehrenberg (Symb. Phys. pt. i.) speak of a vulpine animal, under the name of Canis Syriacus, as occurring in Lebanon. Col. H. Smith has figured an animal to which he gives the name of "Syrian fox" or Vulpes thibet; but we have been quite unable to identify the animal with any known species. The Egyptian Vulpes Niloticus and doubtless the common fox of our own country (V. vulgaris) are Palestine species. Hasselquist (Trav. p. 184) says foxes are common in the stony country about Bethlehem, and near the Convent of St. John, where about vintage time they destroy all the vines unless they are strictly watched. That jackals and foxes were formerly very common in some parts of Palestine is evident from the names of places derived from these animals, as Hazar-Shual (Josh. xvi. 28), Shalihim (Judg. i. 35). W. H.

FRANKINCENSE (ΦΡΑΝΚΙΝΚΕΣ, from ΦΡΑΝΚΟς, to be white; λιβαρος, Ex. xxx. 34, &c., and Matt. ii. 11; λιβαρωτος, 1 Chr. ix. 29; Rev. viii. 3, N. T.), a vegetable resin, brittle, glittering, and of a bitter taste, used for the purpose of sacrificial purification (Ex. xxx. 34-36). It is obtained by successive incisions in the bark of a tree called the arbor thuris, the first of which yields the purest and whitest kind (ΦΡΑΝΚΙΝΚΕΣ ΦΡΑΝΚΟ, or καθαρας), while the produce of the after incisions is spotted with yellow, and as it becomes old loses its whiteness altogether. The Hebrews imported their frankincense from Arabia (Is. lx. 6; Jer. vi. 20), and more particularly from Saba; but it is remarkable that at present the Arabian Libanum, or Libanum, is of a very inferior kind, and that the finest frankincense imported into Turkey comes through Arabia from the islands of the Indian Archipelago. The Arabian plant may possibly have degenerated, or it may be that the finest kind

---

a The reader will find interesting information respecting some of the supposed difficulties in Samson's exploit with the foxes, in Thomson's Land and Book, b. 340, 341. Prof. Cassel also (Walter and Roth, p. 136, in Lange's Bible-worker) brings forward from the history of other ancient chieftains various instances of a resort to similar modes of inflicting injury on enemies in war. H.

b The late Col. Hamilton Smith used to make draw-ings of animals from all sources, such as monuments, books, specimens, &c.; but, as he often forgot the sources, it is difficult in several instances to understand what animal he intended. Dr. Gray tells us that he was unable to identify many of the horses in Jardine's Naturalist's Library.
suitable for use in medicine. It grows in the mountains of India and is described by Dr. Roxburgh, who calls it *Boswellia serrata* (Ann. R. I. 377, 8vo ed.).

The resin itself is well known: but it is still uncertain by what tree it is produced. Ancient as well as modern authors vary in their descriptions to such an extent that it is difficult to arrive at a consistent, still more difficult to gain a botanical idea of the plant. It is described by Theophrastus as attaining the height of about five feet, having many branches, leaves like the pear tree, and bark like the birch; but at the same time he mentions another description, according to which it resembles the *muluk-khiira*, its leaves being of a reddish color (*Hist. Plant.* ix. 4). According to Dioscorides (v. 41) it is a small tree, resembling the Egyptian hawkthorn, with golden-yellow leaves like those of the *sard*.

The difficulty was rather increased than otherwise in the time of Pliny by the importation of some shoots of the tree itself, which seemed to belong to the *torosinthus* (xii. 31). Gavina de Horto represents it as low, with a leaf like that of the *astelia*; he distinguishes two kinds, one growing on the mountains, the other dark, and of an inferior quality, growing on the plains. Chardin says that the frankincense tree on the mountains of Caramania resembles a large pear tree. It is not mentioned by Forskal, and Nicholoh could learn nothing of it (*Trav.* p. 356). A more definite notion of the plant might possibly be obtained from the *Thaïs sacrificiis*, the American *gora* or *gora* tree, or frankincense tree. But at any rate there can be little doubt that the tree which produces the Indian frankincense, and which in all probability supplied Arabia with the finer kind supposed to be indigenous in that country, is the *Boswellia serrata* of Roxburgh (vid. *supr.*); or *Boswellia thorifera* of Colebrooke. Its claims have been maintained by Colebrooke against the *Juqupein *Lepit* of Laminus, which was long supposed to be the true frankincense tree. Colebrooke shows, upon the testimony of both writers, that this tree, which grows in the south of France, does not yield the gum in question. It is extremely doubtful what tree produces the Arabian *ellibannum* : Lamarch proposes the *Asagra* Galechauis; but, as it would seem, upon inconsiderable evidence.

The Indian *ellibannum*, or frankincense, is imported in chests and casks from Bombay, as a regular article of sale. It is chiefly used in the rites of the Greek and Roman churches; and its only medical application at present is as a pertinente in sick rooms. The *ellibannum*, or frankincense used by the Jews in the Temple service, is not to be confounded with the frankincense of commerce, which is a spontaneous exudation of the *Pimis olus*, or Norway spruce fir, and resembles, in its nature and uses, the Burgundy pitch which is obtained from the same tree.

*Frogb.* iv. 14, it has been inferred that the frankincense tree grew in Palestine, and especially on Mount Lebanon. The connection between the names, however, goes for nothing (Lebonah, Lecomon); the word may be used for aromatic plants generally (Gesen. *loc.cit.*); and the rhetorical flourish of Huirus (*Epist.* iii. 6, "thiria silvus") and Aesopinus, (Mons. *p. 110) are of little advantage against the fact that the tree is not truly found in Palestine (Cels. *Hierob.* i. p. 241 f. Rosenm. *Altertum*. iv. 153 f.).

*Frogb.* iii. 12, it is said of the creditor's manner of discharging his debtors, Luke vii. 42; formerly meant freely, generously. The Greek is *eopiairotiv*, i.e. made a gift of the debt to those who owed it. II.

*FRAY* (Deut. xxvii. 36; Jer. vii. 33; Zech. i. 21) means "allright," "terrific." It was common when our version was made, but is now a provincialism.

*FREEDOM. Acts xxi. 28. (Citizenship.)

*FRET* (Lxxii. v. 55) is apparently a noun (not a participle) denoting the plaque-spot in a leprous garment. It translates *73Trov", literally a hollow spot, here one that has eaten into the texture of the cloth. It is from the Anglo-Saxon *frecan*, "to devour," kindred with *freodon", "to rub." II.

*FRINGES.* [Dress; Hem of garment.]

*FROG* (*TTpuTT), *exphadetiv* (*marsh-keeper* Gesen., but Dietrich has other conjectures; *Sagayxos: vapor*), the animal selected by God as an instrument for humbling the pride of Pharaoh (Ex. vii. 2-14; Ps. xxxvii. 43, er. 39; Wis. xix. 10); frogs came in prodigious numbers from the canals, the rivers, and the marshes, fire filled the houses, and even entered the wells and knitting troughs; when at the command of Moses the frogs died, the people gathered them in heaps, and "the land stank" from the corruption of the bodies. There can be no doubt that the whole transaction was miraculous; frogs, it is true, if allowed to increase, can easily be imagined to occur in such multitudes as marked the second plague of Egypt; indeed similar plagues are on record as having occurred in various places, as at Carmona and Dardania, where frogs suddenly appeared in such numbers as to cause the inhabitants to leave that region (see Estathius on Hom. Il. i., and other quotations cited by Bochart, Hiera. iii. 575); but that the transaction was miraculous appears from the following considerations.

(1.) The time of the occurrence was in spring, when frogs would be in their tadpole state, or at any rate not sufficiently developed to enable them to go far from the water. (2.) The frogs would not naturally have died, in such prodigious numbers as is recorded, in a single day.

It is stated (Ex. viii. 7) that the Egyptians "magicians brought up frogs." Some writers have denied that they could have had any such power, and think that they must have practiced some deceit. It is worthy of remark, that though they may have been permitted by God to increase the plagues, they were quite unable to remove them.

Amongst the Egyptians the frog was considered a symbol of an imperfect man, and was supposed to be generated from the slime of the river — *ex Tovs *ptovogiv (see Horn. i. 20). A frog sitting upon a lotus (*Nelumbium*) was also regarded by the ancient Egyptians as symbolic of the return to the land after the inundations. Hence the Egyptian word *Huirus*, which was used to denote the Nile descending, was also, with the slight change of the first letter into an aspirate, *Huir*, the name of a frog (Jubalton. *P. A. E.* iv. 1, § 9).

The only known species of frog which occurs at present in Egypt is the *Rana osculata*, of which
two varieties are described which differ from Spal-
lanu's species in some slight peculiarities (De-
script. de l'Egypte, Hist. Natur. tom. i. p. 181, fol. ed.). The Rusa lanceolata, the well-known edible frog of the Continent, which occurs also in some bocities in England, has a wide geographical range, being found in many parts of Asia, Africa, and Europe. How the R. punctata (Pelezogry) came to be described as an Egyptian species we cannot say, but it is certain that this species is not found in Egypt, and it is almost certain that none but the R. lanceolata does occur in that country. We are able to state that Dr. A. Günther and Dr. Ge-
nenius derive it by contraction from ἔριπλιτος (Thes. p. 548). The Rabbinic name ὑπαλήγω comes from ἔριπλιτος, "a prayer," because they were worn during prayer, and were supposed to typify the sin-
cerity of the worshipper; hence they were put on the left wrist (Gen. Ex. xxxvi, 2; Otho, ex. c.; Bartolocci, Lex. Talm. a. v.). In Matt. xxiii. 5, only, they are called Φάλακτρα, either because they tended to promote observance of the Law (ἄνι λητος ἐκεῖν ῥως ὑπέρ Θεού, Just. Mart. Dict. c. Tryph. p. 205, for which reason Luther happily renders the word by Denkstift); or from the use of them as amulets (Lat. Præhiliar. Gk. πηγαίναντα, Grattius ad Matt. xii. 5). Φάλακτρα... is the ordinary Greek word for an amulet (Ps. 46. 1; comp. ἄμελες, = the Roman Bullae), and is used apparently with this meaning by a Greek translator, Ex. xii. 18. for ἔριπλιτος, cushions (Kossmüller, Schol. ad loc. ex. c.; Schleusner, Lex. in N. T.). That phylacteries were used as amulets is certain, and was very natural (Targ. ad Cont. viii. 3; Barlow's, Bib. Rab. i. 576; Winer, s. v. Amulett, Φάλακτρας), Jerome (on Matt. xxiii. 5) says they were thus used in his day by the Babylonians, Persians, and Indians, and coudcads certain Christian "muller-
cula" for similarly using the gospels ("purtula evangerta), ἑβαίων μετὰ, Chryst. as πηγαίναντα, especially the Proem to St. John (comp. Chrysost. Hom. in Matt. 79). The Koran and other sacred books are applied to the same purpose to this day (Hottinger, Hist. Orient. i. 8, p. 301, de NExpose Orient. xvii. 6). "The most esteemed of all Ille-
gabs is a Moscafl, or copy of the Koran," Lane, Mod. Egypt. i. 338). Scaliger even supposes that phylacteries were designed to supersede those amulets, the use of which Egypt has been already known by the Israelites in Egypt. [AMULETS.] There was a spurious book called Phylact. Angelorum, where Pope Gelasius evidently understood the word to mean "amulets," for he remarks that Phylacteria ought rather to be ascribed to devils. In this sense they were expressly forbidden by Pope Gregory ("Si quis . . . phylacteria usus fuerat, anathema sit," Sixt. Senensis, Bib. Sanct. p. 92; comp. Can. 36, Concl. Laod.). The LXX. rendering αὐθεντήσαντα (Aquil. attrice-
a) must allude to their being tightly bound on the forehead and wrist during prayer. Petit (Var. Lect. iii. 3) would read αὐθεντήσαντα (s. v. ἄμελες; ἄμελες ἀεί προστατῇ). Schleusner, Thes. a. v.
The expression "they make broad their phylacteries" (παλαιναι τα φυλ, αυτων, Matt. xxiii. 5) refers not so much to the phylactery itself, which seems to have been of a prescribed breadth, as to the case (ἢ καταγγειλης των πενταγωγων, LXX), in connection with them, Ephraimus says that they were παλαια σηματα φωνηων, like the Roman laticifer, or the stripes on a halatamine (τα δε σηματα της πενταγωγης). Hence also a ceremony of ἀποφασιστικης ευθυς (loc. c. b. c.). He says that these purple stripes were worn by the Pharisees and four pomegranates, that no one might touch them, and hence he derives their name (Sandan, Antiq. ii. 9, 15). Misd at probably by the term παλαιναι, and by the mention of the υλον or fringe (Num. xxv. 38. κλωμα ἵκνατιν ενε τα κρατεια των πενταγωγων, LXX), in connection with them, Ephraimus says that they were παλαια σηματα φωνηων, like the Roman laticifer, or the stripes on a halatamine (τα δε σηματα της πενταγωγης). Hence also a ceremony of ἀποφασιστικης ευθυς (loc. c. b. c.). He says that these purple stripes were worn by the Pharisees and four pomegranates, that no one might touch them, and hence he derives their name (Sandan, Antiq. ii. 9, 15). But that this is an error is clearly shown by Scaliger (Euch. Tribur. viii. 96 ff.). It is said that the Pharisees wore them always, whereas the common people only used them at prayers, if they were considered to be even holier than the υλον or golden plate, on the priest's tiara (Ex. xxviii. 30) since that had the sacred name once engraved, but in each of the Triphilia the tetragrammaton occurred twenty-three times. Carpov, Apol. Crit. 180. Again, the Pharisees wore the Triphilia above the ephora, but the Sadducees on the palm of the hand (Goldyn, l. c.). The modern Jews only wear them at morning prayers, and sometimes at noon (Loo of Modern, l. c.).

In our Lord's time they were worn by all Jews, except the Karaites, women, and slaves. Boys, when (at the age of thirteen years and a day) they became 66666 sons of the commandments), were bound to wear them (Bib. Rur. fol. 22, l, in Glossa), and therefore they might have been used even by our Lord, as he merely denounced them in their abuse. The suggestion was made by Scaliger (l. c.), and led to a somewhat like controversy. Lightfoot (Hor. Hebr. ad Matt. xxiii. 5) and Ordo (Loc. Rur. p. 656) agree with Scaliger, but Carpov (l. c.) and others strongly deny it, from the fact that the entire use of phylacteries arose from an error.

The Karaites explained Pent. vi. 8, Ex. xiii. 9, l.c., as a figurative command to remember the law (Sandan, Ant. p. 132), as is certainly the case in similar passages (Prov. iii. 3, vi. 21, viii. 3; Cant. viii. 1, l.c.). It seems clear to us that the scope of these injunctions favors the Karaita interpretation, and in Ex. xiii. 9 the word is not ἀποφασιστικης, but παλαια, "a memorial" (Gerhardus on Deut. vi. 4; Edersheim on Deut. l, 298; Heimanns, de Oriente Exorcizis, vii. B. 6; Schettgen, Hor. Hebr. iv. 193; Rosenmuller, ad loc.; Hengstenberg, Pent. 248). Considering too the nature of the passages mentioned on the phylacteries (by no means the most important in the Pentateuch — for the Fathers are mistaken in saying that the Decalogue was used in this way, Jer. l. c.; Chrysostom, l. c.; Theophyll. ad Matt. xxiii. 5), and the fact that we have nee trace whatever of their use before the exile (during which time the Jews probably learnt the practice of wearing them from the Babylonians), we have no doubt that the object of the precepts (Pent. vi. 8; Ex. xii. 9) was to impress on the minds of the people the necessity of remembering the Law. But the figurative language in which this duty was urged upon them was mistaken for a literal command. An additional argument against the literal interpretation of the direction is the dangerous abuse to which it was immediately liable. Indeed such an observance would defeat the supposed intention of it, by substituting an outward ceremony for an inward remembrance. We have a specimen of this in the curious literalism of Kimchi's comment on Ps. i. 2. Starting the objection that it is impossible to meditate in God's law day and night because of sleep, domestic cares, &c., he answers that for the fulfillment of the text it is sufficient to wear Tephillin!

In spite of these considerations, Justin (Diai. c. Tryph. l. c.), Chrysostom, Luthynius, Theophy- ket, and many moderns (Raumgarten, Comm. l. c.; Carpov, Apol. Crit. 185) prefer the literal interpretation, as a memorial. It rests therefore with them to account for the entire absence of all allusion to phylacteries in the O. T. The passages in Proverbs (v. supra) contain no such reference, and in Ex. xxiv. 17 means not a phylactery (as Jarchi says), but a tur- ban. [DROWN]. (Genen. Thee. p. 1089.)

The Rabbis have many rules about their use. They were not worn on Sabbath or other sacred days, because those days were themselves a sign or pledge (יוו), and required no further memorial (Zohar, fol. 236; Sandan, l. c.). They must be read standing in the morning (when blue can be distinguished from green), but in the evening (at sunset) they might be read sitting. In times of persecution a red thread was worn instead (Munster, de poae, or. am.; comp. Josh. ii. 18). Both hands were to be used, if possible, in writing them. The leather bags in which they are to be put in the Mosaic law did not signify if an uneducated boy could read the word. At the top of the parchment no more room must be left than would suffice for the letter ת, but at the bottom there might be room even for ת. A man, when wearing the Tephillin, must not approach within four cubits of a cemetery (Sixen. Semennis, l. c.). He who has a taste for further trivialities (which are deepiy interesting as illustrative of a priestly superstition) may find them in Lightfoot (Hor. Hebr. ad loc.), Schettgen, Otho (Loc. Rab, s. v.), and in the Mishna — especially in the treatise called Ḥoshanot.

The Rabbis even disagree as to the order in which they are worn, according from l. c. t. (Torah, pt. ii. fol. 2; Carpov, l. c.).

Josephus gives their general significance (Ant. iv. 8, § 13, δια περιβλεπτον ειτ, παντα τα χειν τω περιβλεπτων προσωπου του δεκα). They were supposed to save from the Devil (Targ. ad Cant. viii. 3) and from sin (Bottigier, Jurl. Hebr. Leg. xx. 291), and they were used for oaths; but the Rabbis disapproved the application of them to zurna wounds.
Frost

Fuller's Field

The fuller's trade is mentioned in Scripture, appearing to have consisted chiefly in cleansing garments and whitening them. The use of white garments, and also the rubbing, requiring their use for festal and religious purposes, may be gathered from the following passages: Eccl. vi. 8; Dan. vii. 9; Is. xlv. 6; Zech. iii. 5; 2 Sam. vi. 14; 1 Chr. xlv. 27; Mark ix. 3; Rev. iv. 2, vi. 11, vii. 9; Mishna, Tuamoth, iv. 8; see also Stat. S. i. 2, 257; Ovid, Fast. i. 79; Chudian, de Luvl. Stil. iii. 289. This branch of the trade was perhaps exercised by other persons than those who carded the wool and smoothed the cloth when woven (Mishna, Bava Kama, x. 10). In applying the marks used to distinguish cloths sent to be cleansed, fullers were desired to be careful to avoid the mixtures forbidden by the Law (Lev. xix. 19; Deut. xxii. 11; Mishna, Massec. Cilain, ix. 10).

The process of fulling or cleansing clothes, so far as it may be gathered from the practice of other nations, consisted in treading or stamping on the garments with the feet or with hoes in tubs of water, in some which alkaline substance answering the purpose of soap had been dissolved (Gesen. Theol. p. 1201, ἀόρων; Beckmann, Hist. of Inventions, ii. 91, 95, Bohn). The substances used for this purpose which are mentioned in Scripture are nitre, σηρώρη, νίτρων (Gesen. p. 990; Prov. xx. 29; Jer. ii. 22), and ἀόρων, soap, πολλακαὶ, herba fumana, herba borith (Gesen. p. 246; Mal. iii. 2). Nitre is found in Egypt and in Syria, and vegetable alkali was also obtained there from the ashes of certain plants, probably Sal soda koll (Gesen. p. 246; Plin. xxxi. 10, 40; Hasselquist, p. 273; Barcklirat, Syr. p. 214). The juice also of some saponaceous plant, perhaps Gypsophila striatula, or Saponaria officinalis, was sometimes mixed with the water for the like purpose, and may thus be regarded as representing the soap of Scripture. Other substances also are mentioned as being employed in cleansing, which, together with alkali, seem to identify the Jewish with the Roman process, as urine and chalk, Creta cineraria, and bean-earth, i. e. bean-meal mixed with water (Mishna, Shabb. ix. 5; Nikoh, ix. 6). Urine, both of men and of animals, was regularly collected at Rome for cleansing cloths (Plin. xxxvii. 6, 8; Athen. x. p. 481; Mart. x. 93; Plantus, Asin. v. 2, 57), and it seems not improbable that its use in the fuller's trade at Jerusalem may have suggested the coarse taunt of Rabshakeh, during his interview with the deputies of Hezekiah in the highway of the Fuller's Field (2 K. xviii. 17), but Schüttgen thinks it doubtful whether the Jews made use of it in fulling (Antiq. full. § 9).

The process of whitening garments was performed by rubbing into them chalk or earth of some kind. Creta cineraria (Cimolite) was probably the earth most frequently used. The whitest soil of earth for this purpose is a white potter's clay or marl, with which the poor at Rome rubbed their clothes on festival days to make them appear brighter (Plin. xxxi. 10, § 118; xxxv. 17). Sulphur, which was used at Rome for discharging positive color, was abundant in some parts of Palestine, but there is no evidence to show that it was used in the fuller's trade.

The trade of the fullers, as causing offensive smells, and also as requiring space for drying clothes appears to have been carried on at Jerusalem outside the city, and from them a field, a monument, and also a spring (Enrogel), to have derived their names (Beckmann, Hist. of Inv., ii 92, 106, Bohn; Dict. of Antiqu. art. Fullo: Winer, s. v. Walker; Wilkinson, abridg. i. 106; Saalschitz, i. 3, 14, 32, ii. 14, 6; Schüttgen, Antiqu. fullosiae). [Handicraft.]

H. W. F.

Fuller's Field, The (טולורי הולו; τὸ δροτύς τοῦ γραφέως, or καλαίσχων: aiger bullionis; a spot near Jerusalem (2 K. xviii. 17; Is. xxxvi. 2, vii. 3) so close to the walls that a person speaking from there could be heard on them (2 K. xviii. 17, 25). It is only incidentally mentioned in these passages, as giving its name to a "highway" (טולורי הולו = an embanked road, Gesen. Theol. p. 957 b), "in it" (ב) or "on it" (ב, A. V. "in"), which highway was the "conduit of the upper pool." The "end" (טולורי הולו) of the conduit, whatever that was, appears to have been close to the road (Is. vii. 3). One resort of the fullers of Jerusa-

lem would seem to have been below the city on the southeast side [Enrogel]. But Rabshakeh and his "great host," can hardly have approached in that direction. They must have come from the

Egyptian Fuller.
FUNERALS

Knoliel, 84. f. 7. DS, K. beside other reasons Jerusalem, maps used them on the northern side of the city. It is noticed that the fuller's field and the adjacent ground may be seen covered with whitening garments. (See Robinson in *Bibl. Sacra* iii. 646 f. Williams, *Holy City* i. Suppl. p. 122) places the Fuller's Field on the north of Jerusalem, chiefly because Josephus (B. J. v. 4, § 2) speaks of a "fuller's monument" there (γραφεῖαι μνήματα). On that side of the city the field and the place of washing could not well have been near each other, unless the nature of the ground has very much changed. On the other hand, a "fuller's monument," probably a tomb, would have no necessary connection with the Fuller's field." (See Schultz, *Jerusalem, die Vorhange*, pp. 51, 84.) The different opinions show how imperfectly the minute topography of the ancient city is yet known.

II. FURNACE.

* Persian attah. The Persians were in the habit of using the furnace as a means of refining capital.

FURNITURE

Furnace. — An Egyptian blowing the fire for melting gold. (Wilkinson.)

punishment (Dan. b c; Jer. xxix. 22; Macc. vii. 5; Hos. vii. 7). A parallel case is mentioned by Chardin (Voyage en Perse, iv. 276), two ovens having been kept ready heated for a whole month to throw in any corn-dealers who raised the price of corn. (5.) The potter's furnace (Ezech. xxvii. 5; xxviii. 39), which resembles a chimney in shape, and was about five or six feet high, as represented below. (6.) The blacksmith's furnace (Ezech. xxxviii. 28). The Greek κάμαρα, which is applied to the two latter, also describes the calcining furnace ( Xen. *Teit.*, iv. 49). It is metaphorically used in the N. T. in this sense (Rev. i. 15, ix. 2), and in Matt. xiii. 42, with an especial reference to Dan. iii. 9.

W. L. B.

* FURNITURE. formerly = "equipment," "accommodations" (see Bible Word-Book), is so used in Gen. xxxi. 34. Rachel put the "temple" (which see) or "images" in "camel's furniture," in order to conceal them from Laban, who was searching for them in her tent. It is not easy to say how this should be understood. Thomson thinks that she placed them under the padding of the riding-saddle, where, as he mentions, the Arabs at present often secrete stolen goods (Land and Book, ii. 24). Carpets were frequently spread over the saddle on which women rode, and these could have been thrown over the idols, so as to answer the purpose of a seat and of concealment. Kitto (*Bible Illustr. i. 301, Ameer. ed.) suggests that the convexity of the park saddle may have formed a good hiding place for the images. It is altogether less probable that the "furniture" was the palanquin or litter swung across the camel's back, with apartments on both sides, and screened with curtains (see John, *Bibl. Archæol.§ 49, Ephram's tent*). The rapid travelling on this flight of Jacob would have made such a vehicle inconvenient and unsafe.

On the Hebrew expression, see Tuch, *Die Genesis* p. 459; Rumsieh, *Bibelwerk*, i. 67; Knobel, *Die Genesis*, p. 220; Keil and Gltitsch, *Pvntateuch*
GAAL [גאל] (rejection, Fürst, perh. a cutting or graft; Grs.: Ῥαδᾶ; [Vat. Gaαλα, exc. ver. 28, Gaαδ; Alex. Gaαδα, exc. ver. 94, Gaαδ, and vv. 20, 27, Gaαδας; Joseph. Gaαλας: Gaαλας,] son of Eheb, aided the Shechemites in their rebellion against Abimelech (Judg. ix. [20–41]; Joseph. Ant. v. 7, §§ 3, 4). He does not seem to have been a native of Shechem, nor specially interested in the revolution, but rather one of a class of combatieri, who at such a period of anarchy would be willing to sell their services to the highest bidder. Josephus calls him τίτων ἀθέτων, a term which scarcely designates any special office, as in the case of Zeval τῶν Ἀθετίων ἄρχων, Joseph. l.c.; more probably it has reference to the headship of his family (Judg. ix. 26; Joseph. l. c.), and the command of a body of men-at-arms, who seem to have been permanently attached to his service (σῶν ὀνόμασεν καὶ συγγενεία, Joseph.). His appeal to anti-Israeliish traditions (Judg. ix. 28), together with the re-establishment of idolatry at Shechem, shows that the movement in which he took part was a reactionary one, and proceeded upon the principle of a combination of the aborigines with the idolatrous Israelites against the iconoclastic family of Gideon as represented by Abimelech. The ambitious designs of Gaal, who seems to have aspired to the supreme command, awakened the jealousy of Zebul, who recalled Abimelech, and procured the expulsion of Gaal from the city upon a charge of cowardice [Antimelech].

F. E. B.

GA'ASH ([גאש], in pause) [גָאָשָׁה] = earthquake: Ταύς, [Rom. Vat.] once Ταύςας: Γαςας. On the north side of \"the hill of Gaash\" (accurately \"Mount G.,\" 27, 77), in the district of \"Mount Ephraim,\" was Timmam-serah, or Timnath-cheres, the city which at his request was given by the nation to Joshua; where he resided, and where at last he was buried (Josh. xxv. 30; Judg. ii. 9; comp. Josh. xix. 49, 50). We only hear of it again incidentally as the native place of one of David's guards, 4 Habbai, or Harai, of the brooks (the torrent-beds or wadis, 727) of Gaash = the \"torrents of the earthquake\" (2 Sam. xxviii. 30; 1 Chr. xi. 32). By Eusebius and Jerome the name is mentioned (Onom. as \"Gaas\"), but evidently without any knowledge of the place; nor does it appear to have been recognized by any more modern traveller in Palestine.

* The name of Gaash has been lost, but the hill which so called has been identified with reasonable certainty. Our countryman, Dr. Eli Smith, in 1843 discovered Timnath-serah (= Timnath-cheres) in the site and ruins of the present Tikon, about 6 miles northeast of Jaffa (the Roman Gophna). But we know from Judg. ii. 9, that Gaash was within the precincts of the ancient town, which lay in the tribe of Ephraim (where Tikon is at present), and that Joshua was buried on the north side of this hill. It is found now that off against these ruins of Tikon (thus identified as Timnath-serah; a little to the south of them, rises a high hill, and on \"the north side\" of this hill are some remarkable tombs of elaborate structure and of great antiquity. Thus nothing but the extent of the site can now be wanting; for the site of the ruined town, the vicinity of the hill, the sepulchral excavations on the north side of the hill where the tomb of Joshua was cut out, supply ample proof that Gaash must have been in this place. (See \"Visit to Antipatris\" in the Bibl. Sacra, 1843, p. 478 et seq.) Add to all this that \"the brooks\" (vaditis or ravines) of Gaash (2 Sam. xxiii. 30) answer to \"the deep valleys round about this hill, through which the winter torrents flow to Wady Beilit.\" (See Rev. Ph. Geogr. p. 42.)

GABBATHA (גָבָבָתָה) [height, hill]: Gaαδα, Gaαδά, Gaαδא, Γαβαδα, Γαβαδα, [etc.]: Geba, Geba, Geba. The same name as Gaba, but with the vowel sound made broader, according to Hebrew custom, because of its occurrence at the end of a clause or sentence. It is found in the A. V. in Josh. xvii. 24; Ezr. ii. 26; Neh. vii. 30 [\"Gaba,\" A. V. ed. 1611]; but in the Hebrew also in 2 Sam. v. 25; 2 K. xxii. 3; Neh. xi. 31. [GABDEES].

GAB'AEIL ([גָּבַי; אֵיל]: Alex. Gaααια; Vat. Lat. Gabudel; Vulg. omits). 1. An ancestor of Tobit (Tob. i. 1).

2. [Gaααια, Gaααια; Alex. iv. 20, Gaααιας; F.A. 1. 14, Gaααιας: Gabelas.] A poor Jew (Tob. i. 17, Vulg.) of \"Rages in Mesopotamia,\" to whom Tobias lent (sub chirographo delit, Vulg.) ten talents of silver, which Gabelas afterwards faithfully restored to Tobias in the time of Tobit's distress (Tob. l. 14, iv. 1, 20, v. 6, ix. [2, 5] x. 2). [GABEIBAS].

B. F. W.

GABATHA ([גבעתא]: Betthatha). Esth. xii. 1. [BIGTHAN.]

GABBAI [2 syl.] (גָּבַי; [collector, as of tribute]): [Gaααια; Vat. Γαααια: Alex. Γαααιας; F.A. Γαααιας; Geba], apparently the head of an important family of Benjamin resident at Jerusalem (Neh. xi. 8).

GABBATHA (גָּבָבָתָה; Gabbatha). The Hebrew or Chaldee appellation of a place also called \"Pavement\" (Λακαθγουρων), where the judgment-seat or bema (βημα) was planted, from his place on which Pilate delivered our Lord to death (John xix. 19). The name, and the incident which leads to the mention of the name, occur nowhere but in this passage of St. John. The place was outside the praetorium (A. V. judgment-hall), for Pilate brought Jesus forth from thence to it. It is suggested by Lightfoot (Exerc. on St. John, ad loc.) that the word is derived from 22, a surface, in which case Gabbatha would be a mere translation of Λακαθγουρων. There was a room in the Temple in which the Sanhedrin sate, and which was called Gathiz, because it was paved with smooth and square flags (777); and Lightfoot conjectures that Pilate may on this occasion have delivered his judgment in that room. But this is not consistent with the practice of St. John, who, in other instances, gives the Hebrew name as that properly belonging to the place, not as a mere translation of a Greek one. Besides, Pilate evidently spoke from the bema—the regular seat of justice—and this in an important place like Jerusalem would be in a fixed spot. Besides, the praetorium, a Roman residence with the idolatrous emblems, could not have been within the Temple. The word is more
in each instance, that the vision awakened extra-
dinary fear — suggesting the thought, that there
may have been something in the mien of the angel
fitted to inspire special awe.

GAD (גָּד; [Gen. 42:13]; [1 Chr. vii. 46; 1 Sam. xvi. 14); Gadites, but Comp. with 4 MSS
[מָגָד]; Joseph, Jacob’s seventh son.

The first-born of Zilpah, Leah’s maid, and whole-
brother to Asher (Gen. xxx. 11—13, xvi. 16, 18).
(a.) The passage in which the bestowal of the name
of God is preserved — like the others, an exclama-
tion on his birth — is more than usually obscure:
And Leah said, ‘In fortune’ (be goel, גָּד),
and she called his name Gad” (Gen. xxx. 11). Such
is supposed to be the meaning of the old text of
the passage (the Catholic): so it stood at the time
of the LXX., who render the key-word by ἐν τῷ
μοιραῖο; in which they are followed by Jerome in the
Vulgate, festiviter. But in the marginal emendations
of the Masorets (the Keri) the word is given נָבִי
Gad comes.” This construction is adopted by
the ancient versions of Oudobos, Aquila (אַנָּבִי
Gad), and Symmachus (Ἀναβίων Γαδ). (b.) In
the blessing of Jacob, however, we find the name
played upon in a different manner: “Gad” is here
taken as meaning a piratical band or troop (the
term commonly used for which is גָּדִית, Gadit,
and the allusion — the turns of which it is impos-
sibly adequate to convey in English — would seem
to be to the irregular life of predatory warfare which
should be pursued by the tribe after their settlement
on the borders of the Promised Land.
“Gad, a plundering troop (גָּדִית) shall plunder him (ge-
וקלטר), but he will plunder (גָּדִית) at their
hebts.” (Gen. xlix. 19), (c.) The force here lent
to the name has been by some partially transferred
to the narrative of Gen. xxx., e. g. the Samaritan
version, the Veneto-Greek, and our own A. V. “a
trump (of children) cometh.” But it must not be
 overlooked that the word gadit — by which it is
here sought to interpret the goel of Gen. xxx. 11—
possessed its own special significance of turbulence
and forreness, which makes it hardly applicable to
children in the sense of a number or crowd; the
image suggested by the A. V. Exactly as the turns
of Jacob’s language apply to the characteristics
of the tribe, it does not appear that there is any
connection between his allusions and those in the
explanation of Leah. The key to the latter is
probably lost. To suppose that Leah was invoking
some ancient divinity, the god Fortune, who is
conjectured to be once alluded to — and once only
—in the later part of the book of Isaiah, under
the title of God (Is. lxv. 11; A. V., “that troop;”
Gesenius, “dem Glick”), is surely a poor explana-
tion.

The childhood and life of the individual Gad
nothing is preserved. At the time of the descent
into Egypt seven sons are ascribed to him, remark-
able from the fact that a majority of their names
have plural terminations, as if those families
rather than persons (Gen. xlix. 16). The list, with
a slight variation, is again given on the occasion
of the census in the wilderness of Sinai (Num. xxvi.
15—18). [AJOI; EXOBON; OSXN]. The position
revenge taken by the warriors of the tribe on
their return from the conquest of western Palestine, for the
invasions of the desert tribes during their absence.

In his Quart. for Germen, Jerome has in fortuna,
Josephus (Ant. i. 19, § 8) gives it still a different
form: — τρίγνος = fortunatus.

Jerome (De Beatae. Jacobi) interprets this of the
proverbially Chadec, סַלּוֹז, from an ancient root
signifying height or roundness — the root of the
Hebrew word "Gadhaah," which is the common term
in the O. T. for a tall rounded hill, or elevation of
moderate height. In this case Gadhaah designate
the elevated bend, and the appearance was possibly some mole or terraced work, either
forming the bema itself, or the flooring of the court
immediately round it — perhaps some such work
as that which we are told by Suetonius (Geor. 45)
Julius Cesar was accustomed to carry with him
on his expeditions, in order to give the bema or
tribunal its necessary conventional elevation.

[GAVD]EDES (גָּדֵדֶשֶּת, both MSS.: [rather,
Rom. Alex. Vat. Ακυρωθάνθος; Att. Γαβδέσ];
Geor., 1 Esdr. v. 20. [GADAN]).

GABRIEL (גָּבְריאֵל, LXX.; Габрій, Fa.
[Sin.]; i.e. רֶפֶעֶה, the man of El doroh), accord-
ing to the present text of the LXX. the brother of
Gadiel, the creditor of Tobit (Tob. i. 14), though
in another place (Tob. iv. 21), also Tob. i. 14,
Gabriel and Asher are mentioned among the
seven sons of Israel, and in the versions the names are strangely
interchanged. It is an obvious correction to suppose
that Gabriel the name should be read in i. 14, as is in fact suggested by Col. F. A.,
γαβριήλ, , and the manuscript apparatus,
the misunderstanding of Gabriel is probably corrected by the note in the
margin (Gen. iii. 16, 1). The force here lent
to the name has been by some partially transferred
to the narrative of Gen. xxx., e. g. the Samaritan
version, the Veneto-Greek, and our own A. V. “a
trump (of children) cometh.” But it must not be
overlooked that the word gabriel — by which it is
here sought to interpret the goel of Gen. xxx. 11—
possessed its own special significance of turbulence
and forreness, which makes it hardly applicable to
children in the sense of a number or crowd; the
image suggested by the A. V. Exactly as the turns
of Jacob’s language apply to the characteristics
of the tribe, it does not appear that there is any
connection between his allusions and those in the
explanation of Leah. The key to the latter is
probably lost. To suppose that Leah was invoking
some ancient divinity, the god Fortune, who is
conjectured to be once alluded to — and once only
—in the later part of the book of Isaiah, under
the title of God (Is. lxv. 11; A. V., “that troop;”
Gesenius, “dem Glick”), is surely a poor explana-
tion.

The childhood and life of the individual Gad
nothing is preserved. At the time of the descent
into Egypt seven sons are ascribed to him, remark-
able from the fact that a majority of their names
have plural terminations, as if those families
rather than persons (Gen. xlix. 16). The list, with
a slight variation, is again given on the occasion
of the census in the wilderness of Sinai (Num. xxvi.
15—18). [AJOI; EXOBON; OSXN]. The position
revenge taken by the warriors of the tribe on
their return from the conquest of western Palestine, for the
invasions of the desert tribes during their absence.
at Gad during the march to the Promised Land was on the south side of the Tabernacle (Num. ii. 14). The leader of the tribe at the time of the start from Sinai was Eliasaph son of Reuel or Deuel (i. 14, x. 29). Gad is regularly named in the various enumerations of the tribes through the wanderings at the desparching of the spies (xii. 13). It is numbered with the plains of Moab (xxx. 3, 15); but the only inference we can draw is an indication of a commencing alliance with the tribe which was subsequently to be his next neighbor. He has left the more closely related tribe of Asher, to take up his position next to Reuben. These two tribes also preserve a near equality in their numbers, not suffering from the fluctuations which were endured by the others. At the first census God had 43,350, and Reuben 46,591; at the last, Gad had 49,509, and Reuben 44,330. This alliance was doubtless induced by the similarity of their pursuits. Of all the sons of Jacob these two tribes alone returned to the land which their forefathers had left five hundred years before, with their occupations unchanged. "The trade of thy slaves hath been about cattle from our youth even till now": "we are shepherds, both we and our fathers." (Gen. xlvi. 4.) — such was the account which the patriarchs gave of themselves to Pharaoh.

The civilization and the persecutions of Egypt had worked a change in the habits of most of the tribes, but Reuben and Gad remained faithful to the pastoral pursuits of Abraham, Isaac, and Jacob; and at the halt on the east of Jordan we find them coming forward to Moses with the representation that they "have cattle": "a great multitude of cattle," and the land where they now are is a "place for cattle." We read that they did experience the environs of the country west of Jordan with all their flocks and herds? Wherefore let this land, they pray, be given them for a possession, and let them not be brought over Jordan (Num. xxxvii. 1-5).

They did not, however, attempt to evade taking their proper share of the difficulties of subduing the land of Canaan, and after that task had been effected, and the apportionment amongst the nine and a half tribes was completed "at the door-way of the tabernacle of the congregation in Shiloh, before Jehovah," they were dismissed by Joshua "as to their tents," "as to their wives, their little ones, and their cattle," which they had left behind them in Gilead. To their tents they went, to the dangers and delights of the free Bedouin life in which they had elected to remain, and in which — a few partial glimpses excepted — the later history allows them to remain hidden from view.

The country allotted to Gad appears, speaking roughly, to have lain chiefly about the centre of the land east of Jordan. The south of that district, from the Arnon (Wady Mjeb), about half way down the Dead Sea, to Heshbon, nearly due east of Jerusalem, was occupied by Reuben, and at or about Heshbon the possessions of Gad commenced. They embraced half Gilead, as the oldest record specially states (Deut. iii. 12), or half the land of the children of Ammon (Josh. xiii. 25), probably the mountainous plain in which the Israelites were driven by the torrent Jabok — if the Wady Zärich be the Jabok — including, as its most northern town, the ancient sanctuary of Mahanaim. On the east the furthest landmark given is "Aroer, that faces Rabba," the present Roman (Josh. xiii. 25). West was the Jordan (ver. 27). The territory thus consisted of two comparatively separate and independent parts, (1) the high land, on the general level of the country east of Jordan, and (2) the sunk valley of the Jordan itself — the former stopping short at the Jabok; the latter occupying the whole of the great valley on the east side of the river, and extending up to the very sea of Cinerereth, or Genesaret, itself.

The number and character of the land which thus belonged to the tribe — "the land of Gad and Gilead" — we have only vague information. From the western part of Palestine its aspect is that of a wall of purple mountain, with a singularly horizontal outline; here and there the surface is seaward by the ravines, through which the torrents find their way to the Jordan, but this does not much affect the vertical wall-like look of the range. But on a nearer approach in the Jordan valley, the horizontal outline becomes broken, and when the summits are attained, a new scene is said to burst on the view. A wide table-land appears, tossed about in wild confusion of undulating downs, clothed with rich grass throughout; in the southern parts trees are thinly scattered here and there, aged trees covered with lichen, as if the relics of a primeval forest long since cleared away; the northern parts still abound in magnificent woods of sycamore, beech, terrabilis, and enormous fig-trees. These downs are broken by three deep defiles, through which the three rivers of the Yarmuk, the Jabok, and the Arnon fall into the valley of the Jordan and the Dead Sea.

On the east they melt away into the vast red plain, which by a gradual descent joins the level of the plain of the Hauran, and of the Syrian desert" (Stanley, S. g. P. p. 420). A very picturesque country, not the "flat open downs of smooth and even grass," but rather "a land of hills," which, "like the Ashur (Ishy, p. 142), the sheep-walks of Reuben and of the Moabites, but most beautifully varied with hanging woods, mostly of the valonia oak, laurestinus, cedar, arbutus, arietus and ardrusche, &c. At times the country had all the appearance of a noble park" (147), "graceful hills, rich vales, luxuriant herbage" (Porter, Handb. p. 310). [GILEAD.]

Such was the territory allotted to the Gadites; but there is no doubt that they soon extended themselves beyond these limits. Three official records of the reign of Jotham of Judah (1 Chr. v. 11, 13) show them to have been at that time established over the whole of Gilead, and in possession of Bashan as far as Salach, the modern Salkhad, a town at the eastern extremity of the noble plain of the Hauran, and very far both to the north and the east of the border given them originally, while the Masaenites were pushed still further northwards to Mount Hermon (1 Chr. v. 23). They soon became identified with Gilead, that name so memorable in the earliest history of the nation; and in many of the earlier records it supersedes the name of Gad, as we have already remarked it did that of Bashan. In the song of Deborah "Gilead" is said to have "above beyond Jordan" (Judg. v. 17) Jephthah appears to have been a Gadite, a native of Mizpeh (Judg. xi. 34; comp. 31, and Josh. xiii. 39), and yet he is always designated "the Gileadite;" and so also of Mahanaim and of Mahanaim and Mahanaim (2 Sam. xvii. 27; Ezr. ii. 61; comp. Josh. xiii. 21).

The character of the tribe is throughout strongly marked, fierce and warlike, "strong men of might, men of war for the battle, that could handle shield and buckler, their faces like lions, and like lions on the mountains for swiftness." Such is the graphic description given of those eleven heroes
struggles of Syria, and Israel were fought out, and as an agricultural pastoral country, it must have suffered severely in consequence (2 K. x. 39).

Gad was carried into captivity by Tiglath-Pileser (1 Chr. v. 26), and in the time of Jeremiah the cities of the tribe seem to have been inhabited by the Ammonites. "Hath Israel no sons? hath he no heir? why doth Malcham (i. c. Melch) inherit Gad, and his people dwell in his cities?" (Jer. xix. 1).

GAD (ג"ד) [see above] : gadh, "the seer" (תדנ), or "the king's seer," i. c. David's—such appears to have been his official title (1 Chr. xxix. 29); 2 Chr. xxix. 25; 2 Sam. xxiv. 11; 1 Chr. xxxi. 9)—was a "prophet." (מ"ע), who appears to have joined David when in "the hold," and at whose advice he quitted it for the forest of Harach (1 Sam. xxxi. 5). Whether he remained with David during his wanderings is not to be ascertained: we do not again encounter him till late in the life of the king, when he reappears in connection with the punishment inflicted for the murdering of the people (2 Sam. xxiv. 11-19; 1 Chr. xxi. 9-19). But he was evidently attached to the royal establishment at Jerusalem, for he wrote a book of the Acts of David (1 Chr. xxix. 29), and also assisted in settling the arrangements for the musical service of the "house of God," by which his name was handed down for many ages after his own (2 Chr. xxix. 25).

In the abruptness of his introduction, Gad has been compared with Elijah (Jerome, Qn. Hbrv. on 1 Sam. xxii. 5), with whom he may have been of the same tribe, if his name can be taken as denoting his parentage, but this is unsupported by any evidence. Nor is there any apparent ground for Ewald's suggestion (Gesch. ii. 116) that he was of the school of Samuel. If this could be made out, it would afford a natural reason for his joining David. [David, p. 556.]

GAD (ג"ד) דאַדָּם: Sin. דָּמָו: Fortune). Properly—"the Gad," with the article. In the A. V. of Is. xiv. 11 the clause "that prepare a table for that troop" has in the margin instead of the last word the proper name "Gad," which evidently denotes some idol worshipped by the Jews in Babylon, though, when it is impossible positively to identify it, Huetius would understand by it Fortune as symbolized by the Moon, but Vitringa, on the contrary, considers it to be the Sun. Millius (Dios. de Gad et Mene) regards both Gad and Mene as names of the Moon. That Gad was the deity Fortune, under whatever outward form it was worshipped, is supported by the etymology, and by the common aspect of commentators. It is evidently connected with the Syriac גָּדוֹ, gudo, "fortune, luck," and with the Arabic גדו, jedu, "good fortune," and Gensius is probably right in his conjecture that Gad was the planet Jupiter, which was regarded by the astrologers of the East (Porocse, Spec. Hist. Jr. p. 139) as the star of greater good fortune. Movers (Phain. i. 650) is in favor of the planet Venus. Some have supposed that a trace of the Syrian worship of Gad is to be found in the exclamation of Leah, when Zilpah bore a son (Gen. xxx. 11), תִּפְלֶנֶג, bright, or as the Keri has it, תִּפְלֶנֶג, "Gad, or good fortune, conch." The Targum of Pseudo-Bonathan and the Jerusalem Targum both
give a lucky planet cometh," but it is most probably that this is an interpretation which grew out of the astrological beliefs of a later time; and we can infer nothing from it with respect to the idolatry of the inhabitants of Gadara-krain in the age of Jos. The Gideon belief in deity Fortune existed, there are many things to prove. Buxtorf (Lex. Tolm. s. v.) says that anciently it was a custom for each man to have in his house a splendid couch, which was not used, but was set apart for "the prince of the house," that is, for the star, or constellation Fortune, to render it more propitious. This couch was called the couch of Gad, or good-luck (Tolm. Babk. Saouded. f. 20 a, Nedervinstr. f. 56 a). Again in Berosus Rabbia, sect. 63, the words ��� >({wcn}, in Gen. xxvii. 31, are explained as an invocation to Gada or Fortune. Rabbi Moses the Priest, quoted by Aben Ezra (on Gen. xxx. 11), says that 曈 (Is. lxxv. 11) signifies the star of luck, which points to everything that is good; for thus is the language of Kedar (Arabic): but he says that ʢ (Gen. xxx. 11) is not used in the same sense.

Illustrations of the ancient custom of placing a banquetting table in honor of idols will be found in the table spread for the sun among the Ethiopians (Her. iii. 17, 18), and in the feast made by the Babylonians for their god Bel, which is described in the Apocryphal history of Bel and the Dragon (comp. also Her. i. 181, ëc.). The table in the temple of Helus is described by Diodorus Siculus (ii. 9) as being of beaten gold, 40 feet long, 15 wide, and weighing 500 talents. On it were placed two drinking cups (κάρφαρά) weighing 30 talents, two censers of 300 talents each, and three golden goblets, that of Jupiter or Bel weighing 1200 Babylonian talents. The couch and table of the god in the temple of Zeus Trityphios at Patara in the island of Lycia were mentioned by Diodorus (v. 46). Comp. also Virg. Æn. i. 763:

"Huc unamque Troia gaua
Incensis crepsit adyris, mensaque decern
Cerereque auro solati, captivaque vestis
Congueritor."

In addition to the opinions which have been referred to above may be quoted that of Stephen Le Moyne (Vitr. Socr. p. 393), who says that Gad is the goat of Mendes, worshipped by the Egyptians as an emblem of the sun; and of Le Clerc (Comm. in Is.) and Lakemacher (Obs. Phil. iv. 18, ëc.), who identify Gad with Hecate. Macrobius (Sat. i. 19) tells us that in the later Egyptian mythology Τηγων was worshipped as one of the four deities who presided over birth, and was represented by the Moon. This perhaps throw some light upon the meaning of the LXX., as given by Jerome. [Miles, note r.]

Traces of the worship of Gad remain in the proper names Bala-Gad, and Giddennesse (Plaut. Pann. v. 3), the latter of which Gesenius (Mon. Phoen. p. 407) renders ְֶ ְֶ, "favoring fortune."

W. A. W.

GAD'A, a strong city (Joseph. Ant. xiii. 13, § 3), situated near the river Hieromax (Plin. Y. N. v. 16), east of the Sea of Galilee, over against Scythopolis and Tiberias (Euseb. Onom. s. v.), and sixteen Roman miles distant from each of these places (Itin. Anton. ed. Weiss. pp. 196, 198; Tobi. Ant.). It stood on the top of a hill, at the foot of which, upon the banks of the Hiero-

max, three miles distant, were warm springs and baths called Amatha (Onom. s. v. Etham el Gadara; Itin. Ant. Martyr.). Josephus calls it the capital of Peræa; and Polybius says it was one of the most strongly fortified cities in the country (Joseph. B. J. iv. 3, 7; Polyb. v. 71). A large district was attached to it, called by Josephus Γαδαρά, "in the territory of Gadara (Geog. xvi.). Gadara itself is not mentioned in the Bible, but it is evidently identical with the "Country of the Gadarenes," χώρα ποιείσθαι τῶν Γαδαιρών (Mark v. 1; Luke viii. 26, 57).

Of the site of Gadara, there are so clearly defined, there cannot be a doubt. On a partially isolated hill, at the northwestern extremity of the mountains of Gilead, about sixteen miles from Tiberias, lie the extensive and remarkable ruins of Um Keis. Three miles northward, at the foot of the hill, is the deep bed of the Shervit el-Manahîr, the ancient Hieromax; and here are still the warm springs of Amatha. On the west is the Jordan valley; and on the south is Windy el-Abôd, running parallel to the Marsh of Tiberias. Um Keis occupies the crest of the ridge between the two latter wadies; and as this crest declines in elevation towards the east as well as the west, the situation is strong and commanding.

The whole space occupied by the ruins is about two miles in circumference; and there are traces of fortifications all round, though now almost completely prostrate.

The first historical notice of Gadara is its capture, along with Pella and other cities, by Antony the Great, in the year B. C. 218 (Joseph. Ant. xiii. 3, § 3). About twenty years afterwards it was taken from the Syrians by Alex. Jannæus, after a siege of ten months (Ant. xiii. 13, § 3; B. J. i. 4, § 20). The Jews retained possession of it for some time; but the place having been destroyed during their civil wars, it was rebuilt by Pompey to gratify his freedman Demetrius, who was a Gadarene (B. J. i. 7, § 7). When Gabinius, the governor of Syria, chang'd the government of Judea, by dividing the country into five districts, and placing each under the authority of a council, Gadara was made the capital of one of these districts (B. J. i. 8, § 5). The territory of Gadara, with the adjoining one of Hippus, was subsequently added to the kingdom of Herod the Great (Ant. xv. 7, § 3).

Gadara, however, derives its greatest interest from having been the scene of our Lord's miracles in healing the demoniacs (Matt. viii. 28-34; Mark v. 1-21; Luke viii. 26-40). "They wore no clothes, neither asbode in any house, but in the tombs." Christ came across the lake from Capernaum, and landed at the southeastern corner, where the steep, lofty bank of the eastern plateau breaks down into the plain of the Jordan. The demoniacs met him a short distance from the shore; on the side of the adjoining declivity the "great herd of swine" were feeding; when the demons went among them the whole herd rushed down that "steep place" into the lake and perished; the keepers ran up to the city and told the news, and the excited population came down in haste, and "besought Jesus that he would depart out of their coasts." The whole circumstances of the narrative are thus strikingly illustrated by the features of the country. Another thing is worthy of notice. The most interesting remains of Gadara are its tombs, which dot the cliffs
GADARA

for a considerable distance round the city. They are excavated in the limestone rock, and consist of chambers of various dimensions, some more than 20 feet square, with recesses in the sides for lodges. The doors are slabs of stone—a few being ornamented with panels; some of them still remain in their places. The present inhabitants of 'im Kein are all troglodytes, “dwelling in tombs,” like the poor maniacs of old; and occasionally they are almost as dangerous to the unprotected traveller. In the Gospel of Matt. (viii. 28) we have [in the received text] the word Pepefxyotw (instead of Pabapomw), which seems to be the same as the Hebrew "מגש" (LXX. Pepef£ovs) in Gen. xv. 21 and Deut. vii. 1—the name of an old Canaan- itish tribe [Gassutes], which Jerome (Comm. ad Gen. xv.) locates on the shore of the sea of Tiberias. Origen also says (Op. iv. 140) that a city called Tepapv was anciently stood on the eastern side of the lake. Ever were this true, still the other gospels would be strictly accurate. Gadara was a large city, and its district would include Ger- gesa. But it must be remembered that the most ancient MSS. give the word Pogepxyotw, while others have Pabapomw—the former reading is adopted by Griesbach and Lachmann; while Schub [with Tisch. and Treg.] prefers the latter; and either one or other of these is preferable to Pepefxyotw. [Gerasa.]

Gadara was captured by Vespasian on the first outbreak of the war with the Jews, all its inhabitants massacred, and the town itself, with the surrounding villages, reduced to ashes (Joseph, B. J. iii. 7. § 1). It was at this time one of the most important cities on the west side of the Jordan, and is even called the Capital of Petra. At a later period it was the seat of a bishop: but it fell to ruin at, or soon after, the Mohammedan conquest.

The ruins of 'im Kein bear testimony to the splendor of ancient Gadara. On the northern side of the hill is a theatre, and not far from it are the remains of one of the city gates. At the latter a street commences—the riv recta of Gadara—which ran through the city in a straight line, having a colonnade on each side. The columns are all prostrate. On the west side of the hill is another larger theatre in better preservation. The principal part of the city lay to the west of these two theatres, on a level piece of ground. Now not a house, not a column, not a wall remains standing; yet the old pavement of the main street is nearly perfect; and here and there the traces of the chariot wheels are visible on the stones, reminding one

* Griesbach retains Pepefxyotw in the text (Matt. vii. 28), but marks Pepefxyotw as of equal or nearly equal authority. See the full discussion in his Comm. of the thoroughly of Pompeii. (Full descriptions of Gadara are given in Handbook for Syn. of Pal.; Buerkhardt, Syria, p. 270 f.; Porter, in Journal of Soc. Lat. vol. vi. p. 281 f.) J. L. P.

It is still a question whether we know the exact place where the Saviour healed the demoniacs, or the precipice from which the swine rushed down into the sea. The statement in the foregoing article that both these events occurred at Gadara, or in its immediate vicinity, is attended with serious difficulty. That city is ten miles inland from the lake, and is approached only by a toil-some way, whereas the evangelists seem to represent the miracle as performed at once on the Saviour's landing (Mark v. 2), and consequently, according to the
impression which the narrative makes on the reader, near the shore. Again, the mountain where the swine were feeding appears to have been near the lake; for they ran madly down the precipice (ἐγραυνοῦν) into the sea and were drowned. But with Gadara at such a distance, the miracle could not have been wrought till after some considerable delay, and still less could the swine have plunged directly into the sea. A recent traveller in that region, Thomson (Land of Bash, ii. 35), describes the interesting country thus:—First (as one goes inland), "there is a broad plain from Khirbet Soura to the Jerumak; then the vast gorge of this river, and after it an ascent for an hour and a half to Um Kais." Hence, if the swine started from the vicinity of Gadara, they would have to run down the mountain, ford the Jerumak (Hieromax) as deep and rapid as the Jordan itself, and then cross a level plain several miles in length before reaching the lake.

Under these circumstances the writer just named proceeds to a different locality, which agrees much better with the Scripture account. He reports his finding a heap of ruins on the eastern shore of the lake, near the mouth of Wady Sembkh, known among the natives as Kersa or Gera. Directly above this site stands "an immense mountain," where are also (as well as near Gadara) rock-tombs such as lustralies in the East sometimes occupy at the present day.7 The base of this mountain, though not directly overhanging the site, is so near the shore that the swine, rushing down the declivity (said to be almost perpendicular = καρά τοι ηπιμυνον, Mark v. 13), would be carried by their own impetus across the narrow strip of beach into the depths of the sea.8 He says further, that this Gerasa, as pronounced by the Arabs, gives back to us very nearly the ancient Gergesa or Gerasa. This may be the identical place of which Origen seems to have heard, and which he supposed to be the scene of the miracle. (See Reland's Paldestation, p. 807.)

One circumstance not unimportant to the discussion here has been overlooked by some writers. The evangelists do not mention Gadara or Gergesa (whichever may be the true reading), but speak only of "the country (region, ἡ χώρα) of the Gadarenes," or Gerasenes, as a general geographical designation.9 So far from naming that city, Lake (viii. 29), in order to give his readers an idea of the "region of the Gadarenes," merely defines it as opposite to Galilee (ἐν της περιοχη της Γαλιατος). Hence the city to which the Synoptists refer as the one to which the keepers of the swine fled in terror, and from which the people, on hearing their report, came out to Jesus (Matt. viii. 33 ff.; Mark v. 14: Luke viii. 34 ff.), is not necessarily Gadara, but may be any other city in the land of the Gadarenes, viewed definitely as the one associated in the writer's mind with these transactions. It is sufficient for the accuracy of the writers, if we find the scene of the two-fold miracle within the limits of the country of the Gadarenes or Gerasenes. The

evangelists do not in reality commit themselves to anything more definite than that.

It is gratifying to find that Mr. Tristram, who also visited the ruins of this Kersa or Gera, endorses Dr. Thomson's view. "The cliff behind is so steep, and the shore so narrow, that a herd of swine, rushing frantically down, must certainly have been overwhelmed in the sea before they could recover themselves. While the tombs at Gadara are peculiarly interesting and remarkable, yet the whole region is so perfolated everywhere by these rock-chambers of the dead, that we may be quite certain that a home for the demoniacs will not be wanting, whatever locality be assigned for the events recorded by the evangelists." (Land of Israel, p. 466, 2d ed.) Lord Lindsay, who went into that region, assigns the occurrence to Wady Feik, considerably further south on the lake (Letters on the Holy Land, p. 238). Stanley, at first relying on that writer, adopted the same view (Stu. & Pal. ch. x.); but now speaks of the impossibility of that identification (Notices of Eastern Localities, &c., p. 194). Captain Wilson's exploring party have visited this Kersa still more recently, and found it answering well to the conditions of the Scripture history.

H.

GAD\'DI ('73; ῥαδαί; [Vat. ῥαδαί; Gibbii], son of Susi; representative of the tribe of Manasseh among the spies sent by Moses to explore Canaan (Num. xiii. 11).

GAD\'DIEL (-webpack θητος [God the fortune-giver, Fürst]; ῥεδαδαί; Gibbii), son of Sodi; representative of the tribe of Zebulun on the same occasion (Num. xiii. 10).

GAD\'DIE (῾72; ῥαδαί; [Vat. ῥαδαί;] Alex. ῥεδαδαί, and ῥαδαδαί; Godi), father of Menahem, who seized the throne of Israel from Shallum (2 K. xv. 14, 17).

GAD\'ITES, THE (῾722; ὁ Γαδιτας, ὁ Γαδα; [Vat. F. -ας,] οἱ Γαδίτας; [Alex. in 2 K. x. 33, Vat. in 1 Chr. xii. 8; Gibbii; vers. 39; F. Παραβασί;] God, Gadites, Godi; Gibbii). The descendants of Gad and members of his tribe. Their character is described under Gad, p. 819. In 3 Sam. xxiii. 26 for "the Gadite" the LXX. have Γαλαδαδαί [Vat. -ει, Alex. Γαλαδο], and the Vulg. de Godi.

W. A. W.

GAHAR (῾722 [perh. burning, fire-brood]; ῥαδα; Alex. [in charact. minore] Γαδωβ; [Gen. xxii. 24]. No light has yet been thrown on this tribe. The name probably signifies "sunnburst," or "swarthly."

GAHAR (῾722 [healing-place, Gez.]; ῥαδα; [in Ezh., Vat. Γαρα; in Nez., Vat. F. omit: Gaher]. The Bene-Gachar were among the families of Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 47; Neh. vii. 49). In the lists of 1 Esdr. the name is given as GEDDAH.

sense on their part of the vicinity of the mountain and the landing-place to each other. The hand points out the object, as it were, visible from the shore. H.

H. 

Tristram (Land of Israel, 2d ed., p. 455, note) says: "I have often met in the outskirts of Gadara 'Hafra, at the foot of Mount Carmel' a maniake who sells in similar tombs."
GALATIA

Roman writers call its inhabitants Galli, just as Greek writers call the inhabitants of ancient France Galatia. In 2 Tim. iv. 10, some commentators suppose Western Gaul to be meant, and several MSS. have Galatia instead of Galatian. In 1 Marc. viii. 2, where Judas Maccabaeus is hearing the speech of the Hasmoneans, desiring to know the answer to the query "What is this Galatia?", it is possible to interpret the passage either of the Eastern or Western Gauls; for the subjugation of Spain by the Romans, and their defeat of Antiochus, King of Asia, are mentioned in the same context. Again, Galatia is the same word with Kelt; and the Galatians were in their origin a stream of that great Keltic torrent (apparently Kynny, and not Gaël) which poured into Greece in the third century before the Christian era. Some of these invaders moved on into Thrace, and appeared on the shores of the Hellespont and Bosphorus, when Nicomedes I., king of Bitinia, being then engaged in a civil war, invited them across to help him. Once established in Asia Minor, they became a terrible scourge, and extended their invasions far and wide. The neighboring kings succeeded in repressing them within the general geographical limits to which the name Galatia is commonly limited. In Joseph. B. J. i. 20, § 3, we find some of the latter, who had been in Cleopatra's body-guard, acting in the same character for Herod the Great. Meanwhile the wars had been taking place, which brought all the countries round the east of the Mediterranean within the range of the Roman power. The Galatians fought on the side of Antiochus at Magnesia. In the Mithridatean war they fought on both sides. After the death of the last of the Republic Galatia appears as a dependent kingdom, at the beginning of the Empire as a province. (See Ritter, Erdkunde, xvii. 507-510.)

The Roman province of Galatia may be roughly described as the central region of the peninsula of Asia Minor, with the provinces of Asia on the west, Cappadocia on the east, Pamphylia and Cilicia on the south, and Bithynia and Pонтus on the north. It would be difficult to define the exact limits. In fact they were frequently changing. For information on this subject, see the Dict. of Geog. i. 390 b. At one time there is no doubt that this province contained Pisidia and Lycia, and therefore those towns of Antioch, Itronium, Lystra, and Derbe, which are conspicuous in the narrative of St. Paul's travels. But the characteristic part of Galatia lay northward from these districts. On the table-land between the Sangaarius and the Halys, the Galatians were settled in three tribes, the Tectosages, the Tolustophi, and the Troemi, the first of which is identical in name with a tribe familiar to us in the history of Gaul, as distributed over the Countries near Toulouse. The three capitals were respectively Tarvium, Pessinus, and Anticyra. The last of these (the modern Urgel) was the centre of the roads of the district, and may be regarded as the metropolis of the Galatians. These Eastern Gauls preserved much of their ancient character.

GALATIA (Γαλάται). It is sometimes difficult to determine, in the case of the names of districts mentioned in the N.T., whether they are to be understood in a general and popular sense as referring to a region inhabited by a race or tribe of people, or whether they define precisely some tract of country marked out for political purposes. Galatia is a district of this kind; and it will be convenient to consider it first ethnologically, and then as a Roman province.

Galatia is literally the "Galli" of the East.

a It is said erroneously in Kitto's Cyclop. of Bib. Lit. (5th ed. 1871), that Paul was then going "from Asia, on his second visit to Europe," v. 2., earlier than the actual time, and the opposite of the true direction.
and something of their ancient language. At least Jerome says that in his day the same language might be heard at Ancyra as at Trèves: and he is a good witness; for he himself had been at Trèves. The prevailing speech, however, of the district was Greek. Hence the Galatians were also called Gallo-Greek. 'Pagii dixi jam degeneres sunt; mixti, et Gallo-Greci vere, quod appellantur.' Mauclerc in Livy, xxxvii. 17.) The inscriptions found at Ancyra are Greek, and St. Paul wrote his Epistle in Greek.

It is difficult at first sight to determine in what sense the word Galatia is used by the writers of the N. T., or whether always in the same sense. In the Acts of the Apostles the journeys of St. Paul through the district are mentioned in very general terms. We are simply told (Acts xvi. 6), that on his second missionary circuit he went with Silas and Timotheus through τὴν Φρουριάν καὶ τὴν Γαλατικὴν χώραν. From the epistle indeed we have this supplementary information, that an attack of sickness (ἵπταται τὰς παροικίας, Gal. iv. 13) detained him among the Galatians, and gave him the opportunity of preaching the Gospel to them, and also that he was received by them with extraordinary favor (Gal. iv. 14, 15); but this does not inform us of the route which he took. So on the third circuit he is described (Acts xviii. 23) as διέρχομεν καθεδρι τῆν Γαλατικὴν χώραν καὶ Φρουριάν.

We know from the first Epistle to the Corinthians that on this journey St. Paul was occupied with the collection for the poor Christians of Judea, and that he gave instructions in Galatia on the subject (ἀπεστείλα τοῖς ἐκκλησίαις τῆς Γαλατίας, 1 Cor. xiv. 1); but here again we are in doubt as to the places which he had visited. We observe that the "churches" of Galatia are mentioned here in the plural, as in the opening of the Epistle to the Galatians themselves (Gal. i. 2). From this we should be inclined to infer that he visited several parts of the district, instead of residing a long time in one place, so as to form a great central church, as at Ephesus and Corinth. This is in harmony with the phrase ὡς Γαλατικὴ χώρα used in both epistles. Since Paphos is mentioned first in one case, and second in the other, we should suppose that the order of the journey was different on the two occasions. Paphos also being not the name of a Roman province, but simply an ethnographical term, it is natural to conclude that Galatia is used here by St. Luke in the same general way. In confirmation of this view it is worth while to notice that in Acts ii. 9, 10, where the enumeration is ethnographical rather than political, Paphos is mentioned, and not Galatia, while the exact contrary is the case in 1 Pet. i. 1, where each geographical term is the name of a province.

The Epistle to the Galatians was probably written very soon after St. Paul's second visit to them. Its abruptness and severity, and the sadness of its tone, are caused by their sudden perversion from the doctrine which the Apostle had taught them, and which at first they had received so willingly.

It is no fancy, if we see in this thickness a specimen of that "esprit impétueux, ouvert à toutes les impressions," that, "nobilité extrême," which Thiers marks as characteristic of the Gallican race (Hist. des Gaulois, Intro. iv.). From Joseph. Ant. xvi. 6, § 2, we know that many Jews were settled in Galatia: but Gal. iv. 8 would lead us to suppose that St. Paul's converts were mostly Gentiles.
positions themselves, or connected more or less directly with those who did. More important is it to remark on the large influx of Jews, which must have resulted Galatia owed to the intensive Ghassanid migrations. The Great had settled two thousand Jewish families in Lydia and Phrygia; and even if we suppose these settlements did not extend to Galatia, properly so called, the Jewish colonists must in course of time have overflowed into a neighboring country which possessed so many attractions for them. The country of Galatia afforded great facilities for commercial enterprise. With fertile plains rich in agricultural produce, with extensive pastures for flocks, with a temperate climate and copious rivers, it abounded in all those resources out of which a commerce is created. It was moreover conveniently situated for mercantile transactions, being traversed by a great high-road between the East and the shores of the Egean, along which caravans were constantly passing, and among its towns it numbered not a few which are mentioned as great centers of commerce. With these attractions it is not difficult to explain the vast increase of the Jewish population in Galatia, and it is a significant fact that in the generation before St. Paul, Augustus directed a decree granting special privileges to the Jews to be inscribed in his temple at Ancyra, the Galatian metropolis, doubtless because this was a principal seat of the dispersion in these parts of Asia Minor. Other testimony to the same effect is afforded by the inscriptions found in Galatia, which present here and there Jewish names and symbols amidst a strange confusion of Phrygian and Celtic, Roman and Greek. At the time of St. Paul they probably boasted a large number of proselytes, and may even have infused a beneficial leaven into the religion of the mass of the heathen population. The main features of the Galatian character are traced with great distinctness by the Roman writers. Quickness of apprehension, promptitude in action, great impressibility, an eager craving after knowledge, this is the brighter aspect of the Celtic character. Inconstant and quarrelsome, treacherous in their dealings, incapable of sustained effort, easily disheartened by failure, such they appear when viewed on their darker side. Fickleness is the term used to express their temperament. This instability of character was the great difficulty against which Cesarc had to contend, along with the prejudices of the Galatians. He complains that they all with scarcely an exception are impelled by the desire of change. Nor did they show more constancy in the discharge of their religious than of their social obligations. The hearty zeal with which they embraced the Apostle’s teaching, followed by their rapid apostasy, is only an instance out of many of the reckless facility with which they adopted and discarded one religious system after another. To St. Paul, who had had much bitter experience of hollow professions and fickle purposes, this extraordinary levity was yet a matter of unfeigned surprise. ‘I marvel,’ he says, ‘that ye are changing so quickly.’ He looked upon it as some strange fascination, ‘Ye senseless Gauls, who did bewitch you?’ The language in which Roman writers speak of the martial courage of the Gauls, impetuous at the first attack but easily mollified, is one that the Galatians well describes the short-lived process of these conversions in the warfare of the Christian church. Equally important, in its relation to St. Paul’s epistle, is the type of religious worship which seems to have pervaded the Celtic nations. The Gauls are described as a superstitious people, given over to ritual observances. The Gospel was offered to them, and the people of Galatia took their hearts by storm. But the old heaven still remained. The pure and spiritual teaching of Christianity soon ceased to satisfy them. Their religious temperament, fostered by long habit, prompted them to seek a system more external and ritualistic. ‘Having begun in the Spirit, they would be made perfect in the flesh.’ Such is the language of the Apostle rebuking this unnatural violation of the law of progress.”

II.

GALATIANS. THE EPISTLE TO THEE, was written by the Apostle St. Paul, not long after his journey through Galatia and Phrygia (Acts xvii. 23), and probably (see below) in the early portion of his two years and a half stay at Ephesus, which terminated with the Pentecost of A. D. 57 or 58. It would thus succeed in order of composition the epistles to the Thessalonians, and would form the first of the second group of epistles, the remaining portions of which are epistles to the Corinthians and to the Romans.

This characteristic letter was addressed to the churches of the Asiatic province of Galatia (i. 2), or Gallograecia (Strabo, xiii. 596)—a province that here in its name its well-founded claim to a Gallic or Celtic origin (Pausanias, i. 4), and that now, after an establisment, first by prophetic conquest, and subsequently by recognition but limitation at the hands of neighboring rulers (Strabo, 1. c.; Pausanias, iv. 5), could date an occupancy, though not an independence, extending to more than three hundred years; the first subjection of Galatia to the Romans having taken place in 189 B.C. (Liv. xxxviii. 16 ff.), and its formal reduction (with territorial additions) to a regular Roman province in 25 B.C. The epistle appears to have been called forth by the machinations of Judaizing teachers, who, shortly before the date of its composition, had endeavored to seduce the churches of this province into a recognition of circumcision (v. 2, 11, 12; vi. 12 ff.), and had openly sought to deprecate the apostolic claims of St. Paul (comp. i. 1, 11).

The scope and contents of the epistle are thus: (1) apologetic (i. ii.) and polemical (iii., iv.); and (2) hortatory and practical (vii. viii.), the positions of the former portion being used with great power and persuasiveness in the exhortations of the latter. The following is a brief summary:

After an address and salutation, in which his total independence of human mission is distinctly asserted (i. 1), and a brief doxology (i. 5), the Apostle expresses his astonishment at the speedy lapse of his converts, and reminds them how he had forewarned them that even an angel should not be trusted to them another gospel he was to anathema (i. 10-14). The gospel he preached was not of men, as his former course of life (i. 11-14), and as his actual history subsequent to his conversion (i. 15-21), convincingly proved. When he went up to Jerusalem it was not to be instructed by the Apostles, but on a special mission, which was performed in his own way, and not recommended by them (ii. 1-10); nor, when St. Peter dined in his communion with Gentiles, he rebuked him, and demost rate the danger of such inconsistency (ii. 11-21). The Apostle then turns to the Galatians, and urges specially the doctrine of justification, as evinced by the spirit (iii. 1-5), the case
of Abraham (iii. 6-9), the fact of the law involving curse, from which Christ has freed us (iii. 10-14), and lastly the prior validity of the promise (iii. 15-18), and that preparatory character of the Law (iii. 19-24) which ceased when faith in Christ and baptism into him were fully come (iii. 25-29). All this the Apostle illustrates by a comparison of the bondage of an heir with that of a son. The Law: they were now sons and inheritors (iv. 1-7), but they were then now turning back to bondage (iv. 8-11)? They once treated the Apostle very differently (iv. 12-16); now they pay court to others and awaken feelings of serious mistrust (iv. 17-21), and yet with all their approval of the Law show that they do not understand its deeper and more allegorical meanings (iv. 21-31). If this be so, they must stand fast in their freedom, and beware that they make not void their union with Christ (iv. 31-34): their perverters at any rate shall be punished (v. 7-12).

The real fulfillment of the Law is love (v. 13-15): the works of the Spirit are what no law condemns, the works of the flesh are what exclude from the kingdom of God (v. 16-26).

The Apostle further exhorts the spiritual to be forthcoming (vi. 1-5), the taught to be liberal to their teachers, and to remember that as they sowed so they would reap (vi. 6-10). Then after a noticeable recapitulation, and a contrast between his own conduct and that of the false teachers (vi. 11-16), and an affecting entreaty that they would trouble him no more (vi. 17), the Apostle concludes with his usual benediction (vi. 18).

With regard to the genuineness and authenticity of this epistle, no writer of any credit or respectability has expressed any doubts. The testimony of Irenaeus, Tertullian, and others, and the recent Beside express references to the epistle (Tremens, Her. iii. 7, 2, v. 21, 1; Tertull. de Praes. c. 60, al.), we have one or two direct citations found as early as the time of the Apostolic Fathers (Polyca. et Phil. c. 3), and several apparent allusions (see Davidson, Introduction ii. 318 ff.). The attempt of Bruno Bauer (Kritik der Paulin. Briefe, Berlin, 1850) to demonstrate that this epistle is a compilation, explicitly composed by one of those to the Romans, and the Corinthians, has been treated by Meyer with a contempt and a severity (Vorrede, v. vii.: Einleitung, p. 8) which, it does not seem too much to say, are both completely deserved. Such efforts are alike melancholy and desperate, but are useful in exhibiting the real issues and tendencies of all his torical criticism that has the hardihood to place its own, often interested, speculations before external testimony and recognized facts.

Two historical questions require a brief notice:—

1. The number of visits made by St. Paul to the churches of Galatia previous to his writing the epistle. These seem certainly to have been two. The Apostle founded the churches of Galatia in the visit recorded Acts xvi. 6, during his second missionary journey, about A.D. 51, and revisited them at the period and on the occasion mentioned Acts xviii. 23, when he went through the country of Galatia and Phrygia, ενθαυσαμένως πάντας τοις μαθηταῖς. On this occasion it would seem probable that he found the leaven of Judaism beginning to work in the churches of Galatia, and that he then warned them against it in language of the most decided character (comp. i. 9, v. 3). The majority of the new converts consisted of Gentiles (iv. 8), but, as we may infer from the language of the past, had considerable contact with Jews, and some familiarity with Jewish modes of interpretation. It was then 'all the more necessary to warn them emphatically against believing in the necessity of circumcision, and of yielding themselves up to the bondage of a Law which, however strenuously urged upon them by those around them, had now become merged in that dispensation to which I was once bound and prostrated myself.'

2. Closely allied with this preceding question is that of the date and place from which the epistle was written. If the preceding view be correct, the epistle could not have been written before the second visit, as it contains clear allusions to warnings that were then given when the Apostle was present with them. It must then date from some period subsequent to the journey recorded in Acts xviii. 23. How long subsequent to that journey is somewhat debatable. Conybeare and Howson, and more recently Lightfoot (Introduction of Class. and Sacred Philid. for Jan. 1857), urge the probability of its having been written at about the same time as the Epistle to the Romans, and find it very unlikely that two epistles so nearly allied in subject and line of argument should have been separated in order of composition by the two epistles to the Corinthians. They would therefore assign Corinth as the place where the epistle was written, and the three months that the Apostle stayed there (Acts xx. 2, 3), apparently the winter of A.D. 57 or 58, as the exact period. It is not to be denied that there is a considerable plausibility in these arguments; still when we consider not only the date of Gal. i. 6, οὖτος ταχέως, but also the obvious fervor and freshness of interest that seems to breathe through the whole epistle, it does seem improbable to assign to a later period the commencement of the prolonged stay in Ephesus. The Apostle would in that city have been easily able to receive tidings of his Galatian converts; the dangers of Judaism, against which he personally warned them, would have been fresh in his thoughts: and when he found that these warnings were proving unavailing, and that even his apostolic authority was becoming undermined by a fresh arrival of Judaizing teachers, it is impossible that he would have written, as it were, on the spur of the moment, in those terms of earnest and almost impassioned warning that so noticeably mark this epistle. We do not, therefore, see sufficient reason for giving up the anciently received opinion that the epistle was written from Ephesus, perhaps not very long after the Apostle's arrival at that city. The subscription Επιμαγεώ καὶ Ρούμη has found, both in ancient and modern times, some supporters but seems in every way improbable, and was not unlikely suggested by a mistaken reference of the expressions in ch. vi. 17 to the sufferings of imprisonment. See Meyer, Einleitung p. 7; Davidson, Introduction ii. 292 ff.; Alford, Epistle Galatians, p. 459. The editions of commentaries upon this epistle have been very numerous. We may specify those of Winzer (Lips. 1829 [4th ed. 1839]), Küchelt (Leips. 1831), Usteri (Zürich, 1833), Schott (Leips. 1834), Olshausen (Königsberg. 1840), Windischmann (Mainz, 1843), De Wette (Leips. 1845 [3d ed. by W. Müllcr, 1864]), Meyer (Göttingen 1851 [4th ed. 1862]), Turner (New York, 1855), and in our own country those of Elliott (London 1854, 4th ed. 1867), Dagge (London 1856), and Alford (London 1857 [4th ed. 1865]).
GALATIANS, EPISTLE TO THE

Bishop Elliott's view (stated above) that Paul wrote the Galatians from Ephesus, is the generally accepted one of the later critics as well as the older. So, among others, Winer, Hengsten, Aland, etc. There are, however, many considerations which alter this view.

The doctrinal and practical interest of this epistle has given it a foremost place in all ages of the church. It formed the battle-ground between Protestantism and Romanism at the time of the Reformation. Luther wrote and re-wrote Commentaries on it, which have been often printed, and translated into other languages. Of all the letters of this author, this one is more useful than the others, and it is especially instructive to the student of the New Testament.

The doctrinal passages of which so many occur in this letter, are specially examined in such works as Usteri's Paulin. Lehrbuch (Zürich, 1834); Grotius, De Paulino Epist. et delib. (1653); and Neander, "Der Brief der Galater," in the "Christian Church" by the Apostles: R. A. Lipsius's De Paulinische Rechtsgeschichte, Leipzig, 1853; C. F. Schmidt's Bibel-Thol. des N. T. 2 Aufl. (1859), pp. 472-598; Reuss's Hist. de la théol. chrétienne au siècle apostolique, tom. ii., 2 de., Strasbourg, 1860; and Messner's Die Lehre der Apo- stolische Kirche, Leipzig, 1856.
On the relation of this epithet to the theory of the Tübingen critics, see the commentaries of Meyer and Hofmann: Lechler's Das apostol. u. nachapost. Zeitschr., p. 235 ff.; Prof. G. P. Fisher's Essays on the Supernatural Origin of Christianity (New York, 1860), pp. 205-282 (from the New English for July, 1861); Lightfoot's Diss. iii., St. Paulus, and the Flavians, his Ly. to the Gal., pp. 283-307, 2d ed.; and especially C. J. Trümm's price-essay, Paulus und der Apostelgeschichte (already mentioned), which treats of many of the points in this controversy common to Acts and Galatians, and is a valuable contribution to the subject. It deserves to be translated into English. For the view of the Tübingen school, besides the well-known works of Haur and Zeller (see addition to Acts of the Apostles), one may consult the articles of Hugon in his Zeitschr. f. wis. Theol. for 1858, 1860, and 1866.

A fuller outline of the argument of the epistle than the one given above, will be found in the Christian Review for Oct. 1861, pp. 577-584. For the correction of errors in the A. V. relating either to the sense or the Greek text, see articles in the Bibli. Sacra, xxv. 211-225 and xxvi. 128-149; also Alford's New Testament for English Readers, vol. ii. Most of the changes there recommended are incorporated in the revised version of the American Bible Union. Winer prefixes an admirable Latin translation to his Pauli ad Galatians Epistola (4th ed., 1859).

GALBANUM (גַּלְבָּן גִּבָּן, chel'bân), one of the perfumes employed in the preparation of the sacred incense (Ex. xxx. 34; comp. Exclus. xxiv. 15). Similarly the Hebrew name to the Greek γαλβάνω and the Latin galbanum has led to the supposition that the substance indicated is the same. The galbanum of commerce is brought chiefly from India and the Levant. It is a resinous gum of a brownish-yellow color, and strong, disagreeable smell, usually met with in masses, but sometimes found in yellowish tear-like drops. The ancients believed that when burnt the smoke was efficacious in driving away serpents and grubs (Phin. xii. 50, xvi. 58, xxiv. 13; Virg. Georg. iii. 415). But, though galbanum itself is well known, the plant which yields it has not been exactly determined. Dioscorides (ii. 87) describes it as the juice of an umbelliferous plant growing in Syria, and called by some μετασυμφων: (cf. i. 71). Kühn, in his commentary on Dioscorides (p. 532), is in favor of the Fods ferulago, L., which grows in North Africa, Crete, and Asia Minor. According to Pline (xii. 56) it is the resinous gum of a plant called stagonila, growing on Mount Amnthus in Syria: while the metapikon is the product of a tree near the oracle of Ammon (xii. 49). The testimony of Theophrastus (Hist. Plent. ix. 7) so far as it goes, confirms the accounts of Pline and Dioscorides. It was for some time supposed to be the product of the Bidon galbanum of Linnaeus, a native of the Cape of Good Hope. Don found in the galbanum of commerce the fruit of an umbelliferous plant of the tribe Silicera, which he assumed to be that from which the gum was produced, and to which he gave the name of Galbanum officinale. But his conclusion was called in question by Dr. Lindley, who received from Sir John MacNeill the fruits of a plant growing at Durroad, near Nishapure, in Khurasan, which he named Opisthus galbaniferum, of the tribe Smyrnium. This plant has been adopted by the Dalman College in their Pharmacopoeia, as that which yields the galbanum (Pereira, Matth. Med. ii. pt. 2, p. 188). M. Bulcke, in his Persian travels (quoted in Royle, Matth. Med. pp. 471, 472), identified the plant producing galbanum with one which he found on the Demavend mountains. It was called by the natives khasoro, and bore a close resemblance to the Ferula erubescens, but belonged neither to the genus Galbanum nor to Opisthus. It is believed that the Persian galbanum, and that brought from the Levant, are the produce of different plants. But the question remains undecided.

If the galbanum be the true representative of the chel'bân of the Hebrews, it may at first sight appear strange that a substance which, when burnt by itself, produces a repulsive odor, should be employed in the composition of the sweet-smelling incense for the service of the tabernacle. We have the authority of Pline that it was used, with other resinous ingredients, in making perfumes among the ancients: and the same author tells us that these resinous substances were added to enable the perfume to retain its fragrance longer. For, "Resina ac quam adjunctor ad continentiam odorum in corpore" (xiii. 2). Galbanum was also employed in adulterating the opobalsamum, or gum of the balsum plant (Phin. xii. 54).

GALILEE (גָּלְיָלֶה, i. e. Gal-ed = heap of witness: [ver. 47, Bonnus μετρός: 48, β. μετρογεί: Alex. Β. μετρομεί: Acces. testimoni Galilaei]). The name given by Jacob to the heap which he and Laban made on Mount Gilgal, in witness of the covenant then entered into between them (Gen. xxxi. 47, 48; comp. 23, 25). [Gislead; Jegarshahditha.]

GALGALA (גַּלְגָּלָה, Galgola), the ordinary equivalent in the LXX. for Gilgal. In the A. V. it is named only in i Macc. ix. 2, as designating the direction of the road taken by the army of Demetrius, when they attacked Maschadd in Arbela — the way to Galgala" (דנָו תַּפְּרֶה כְּלָגָלָה). The army, as we learn from the statements of Josephus (Ant. xii. 11, § 1), was on its way from Antioch, and there is no reason to doubt that Arbela was meant by the place of name in Galgala now surviving as Ichbel. [Arbelha.] Its ultimate destination was Jerusalem (i Macc. ix. 3), and Galgala may therefore be either the upper Gilgal near Bethel, or the lower one near Jericho, which the route through the Ghor or that through the centre of the country was chosen (Ewald, Gesch. iv. 370). Josephus omits the name in his version of the passage. It is a gratuitous supposition of Ewald's that the Galilean which Josephus introduces is a corruption of Galgala.

* GALILE'AN OR GALILE'AN (גַּלְיָלָא or גַּלְיֶלֶא, Galilea), an inhabitant of Galilee (Mark xiv. 70; Luke xiii. 1, 2, xxii. 59, xxiii. 6; John iv. 45; Acts ii. 7; also in the Greek, Matt. xxvi. 69; Acts i. 11, v. 37). A.

GALILEE (גַּלְיָלָא, Galilea; [Vat. Γαλιλεᾶ: Galilæi]). This name, which in the Roman age was applied to a large province, seems to have been originally confined to a little "circuit" (the Hebrew word יִלֶל, Yil, the origin of the later Galil) like περιφοῦς, signifies a "circle, or circuit" of country round Kedesh-Naphthali, in which were situated the twenty towns given by Solomon.
to Hiram, king of Tyre, as payment for his work in conveying timber from Lebanon to Jerusalem (1 K. ix. 11; JXX. Galilee). They were then, and subsequently, occupied by the strangers, and for this reason Isaiah gives to the district the name "Galilee of the Gentiles" (NIV, Is. xi. 1). In Matt. iv. 15, Galilea took the emphasis in the Greek text. It is probable that the strangers increased in number, and became during the Captivity the great body of the inhabitants; extending themselves also over the surrounding country, they gave to their new territories the old name, until at length Galilee became one of the largest provinces of Palestine. In the time of the Maccabees Galilee contained only a few Jews living in the midst of a large heathen population (Mace. vi. 4). Strabo states that in his day it was chiefly inhabited by Syrians, Phoenicians, and Arabs (xvi. p. 769) and Josephus says Greeks also dwelt in its cities (vii. 12).

In the time of our Lord all Palestine was divided into three provinces, Judaea, Samaria, and Galilee (Acts ix. 31; Luke xvii. 11; Joseph. B. J. iii. 3). The latter included the whole northern section of the country, including the ancient territories of Issachar, Zebulun, Asher, and Naphtali. Josephus defines its boundaries, and gives a tolerably full description of its scenery, products, and population. He says the soil is rich and well cultivated; fruit and forest trees of all kinds abound; numerous large cities and populous villages, amounting in all to no less than two hundred and forty, thickly stud the whole face of the country: the inhabitants are industrious and warlike, being trained to arms from their infancy (B. J. iii. 3, § 3; v. 35, 45). On the west it was bounded by the territory of Ptolennis, which probably included the whole plain of Akka to the base of Carmel. The southern border ran along the base of Carmel and of the hills of Samaria to Mount Gilboa, and then descended the valley of Jezreel by Scythopolis to the Jordan. The river Jordan, the Sea of Galilee, and the upper Jordan to the fountain at Dan, formed the eastern border; and the northern ran from Dan westward across the mountain ridge till it bounded the territory of the Phenicians (B. J. iii. 3, § 1, b. 18, § 3; comp. Luke viii. 26).

Galilee was divided into two sections, "Lower" and "Upper," *η κατώ καὶ η ἐπάνω Γαλιλαία. Cyril says (c. Jul. iii. 2) ἐστίν γὰρ Γαλατσίων νόος, ὅπερ μὲν κατὰ τὴν Ἰουδαίαν, ὥστε μὲν ἐκτὸς τῶν φυλάκιων πάλην διαφεύγει τε καὶ γείτονα. A single glance at the country shows that the division was natural. Lower Galilee included the great plain of Esdracon with its offshoots, which ran down to the Jordan and the Lake of Tiberias; and the whole of the northern country adjoining it on the north to the foot of the mountain-range. The words of Josephus are clear and important (B. J. iii. 3, § 1): Καὶ τῷ ἐν ἐν κατὰ καλύμνουσιν Γαλατσίων ἀπὸ Τιβερίαδος καὶ Ζαβολοῦν ἦν ἐν τῷ παράλυβος Πολεμώδος γείτων τῷ μέγιστο ἑκτίγειται πλατύτατα δὲ ἐπὶ τὴν μεγάλη πεδιέ τινων κόμης ἡ Σαλαύ τελείται μέχρι Βασαρίνος. The village of Nahal is only the "broad place of Nahal." Josephus says (Joseph. B. J. iii. 12, § 4) he had situated at the base of Mount Tabor, on the northern border of the Great Plain (Porter, Handbook, p. 329). But a comparison of Josephus, Ant. xx. ii. § 4, with B. J. iii. 2, § 4, proves that Lower Galilee extended as far as the village of Genesa, the modern Jenin, on the extreme southern side of the plain. The site of the northern border town, Bersabe, is not known but we learn incidentally that both Arbes and Arsob lies between in Lower Galilee (Joseph. B. J. ii. 20, § 6); and as the former was situated near the northwest angle of the Lake of Tiberias, and the latter about eight miles north of Nazareth (Porter, Handbook, pp. 432, 377), we can conclude that Lower Galilee included the whole region extending from the plain of Akka, on the west, to the shores of the lake on the east. It was thus one of the richest and most beautiful sections of Palestine. The Plain of Esdracon presents an unbroken surface of fertile soil—so soft that we can enjoy it there, as Issachar condescended to a semi-nomadic state, and "became a servant to tribute." (Deut. xxxiii. 18; Gen. xlix. 14, 15.) With the exception of a few rocky summits round Nazareth the hills are all wooded, and sink down in graceful slopes to broad winding vales of the richest green. The outlines are varied, the colors soft, and the whole landscape is characterized by that picturesque luxuriance which one sees in parts of Tuscany. The blessings promised by Jacob and Moses to Zebulun and Asher seem to be here inscribed on the features of the country. Zebulun, nestling amid these "hills, offers sacrifices of righteousness" of the abundant flocks nourished by their rich pastures; he rejoices "as his going out," along the fertile plain of Esdracon. Asher, "he loves the abundance of the seas"—his possession skirting the bay of Haifa at the base of Carmel: and he "sucks of treasures hid in the sand," probably in allusion to the glass, which was first made from the sands of the river Beths (Deut. xxxiii. 18, 19; Phil. v. 19; Tac. Hist. x. 17). Asher, dwelling amid the hills on the northwest of Zebulon, on the borders of Phoenicia, "dips his feet in oil," the produce of luxuriant olive groves, such as still distinguish this region: "his land," the produce of the plain of Phenicia and the fertile upland valleys, "is fat:" "he yields royal dainties"—oil and wine from his olives and vineyards, and milk and butter from his pastures (Gen. xlix. 20; Deut. xxxiii. 24, 25). The chief towns of Lower Galilee were Tiberias, Tarichea, at the southern end of the Sea of Galilee, and Sepphoris (Joseph. B. J. iii. 25, 26, 29, 39). The latter played an important part in the last great war (Joseph. B. J. iii. 16, § 11). It is now called Tiberias, and is situated about three miles north of Nazareth (Porter, Handbook, p. 378). There were besides two strong fortresses, Jophatata, now called Jefer, and Mount Tabor (Joseph. B. J. iii. 7, § 3 ff., iv. 1, § 6). The towns most celebrated in N. T. history are Nazareth, Cana, and Tiberias (Luke i. 26; John ii. 1, vi. 1).

Galilee, according to Josephus, extended from Bersabe on the south, to the village of Baca, on the borders of the territory of Tyre, and from Melch on the west, to Teltah, a city near the Jordan (B. J. iii. 3, § 1). None of these places are now known, but there is no difficulty in ascertaining the position and approximate extent of the province. It embraced the whole mountain-range lying between the upper Jordan and Phenicia, its southern border extending from the northwest angle of the Sea of Galilee to the plain of Akka. To this region the name "Galilea of the Gentiles" is given in the O.T. and N. T. (Is. ix. 1; Matt. iv. 15). So Eusebius states: *ἡ μὲν Γαλιλαία ἐθνῶν εἴρηται ἐν ὄρισιν Τιβερίας πάρασκευασμένη, ἄμφω ἔθνων Ἀμαζων."
GALILEE

a few years afterwards the Gemara was added (Buxtorf, Tiberias, p. 19). Remains of splendid synagogues still exist in many of the old towns and villages, showing that from the second to the fourth century the Jews were as prosperous as they were numerous (Porter, Handbook, pp. 437, 440).

J. L. P.

* GALILEE, MOUNTAIN IN, where the Saviour manifested himself to some of his disciples (Matt. xxviii. 16, and probably 1 Cor. xiv. 6) after his resurrection. It is impossible to know what particular mountain is here referred to. Some of the conjectures are that it was the Mount of Transfiguration (composed of Tabor and Mount Serabicus, opposite the coast of the Jordan), or the Mount of Beatitudes in the vicinity of the Sea of Galilee. The singular opinion that it was the northern summit of Olivet is utterly indefensible. It is stated explicitly in Matt. xxviii. 16 that the disciples went into Galilee (εἰς τὴν Γαλααλαϊαν) to the mountain which Christ had appointed for the interview: and Galilee, according to the invariable usage of the N.T., denotes the province of that name. Undoubtedly the Saviour mentioned the place, but the Evangelist has passed that over.

H.

GALILEE, SEA OF. [GENNESARET.]

GALL, the representative in the A. V. of the Hebrew words מֶרֶדֶך (meredech), מֶרֶדָד (meredad), and risah.

1. מֶרֶדֶך (meredech) or מֶרֶדָד (meredad): כּוֹחֲנָה (kohonah) fil, anamuratho, visceua meoa denotes etymologically "that which is bitter;" see Joh xiii. 26, "thou writseth bitter things against me." Hence the term is applied to the "bitter" or "gall" from its intense bitterness (Joh xvi. 13, xx. 23); it is also used of the "poison" of serpents (Job xx. 14), which the ancients erroneously believed was their gall; see Pliny, H. N. x. 37, "No one should be astonished that it is the gall which constitutes the poison of serpents."

2. Risah (risah or rishah: כּוֹחֲנָה (kohonah) πικρα, ἵφωριον: fel, anamuratho, corpust, generally translated "gall" by the A. V., is in Hos. x. 4, rendered "hemlock;" in Deut. xxxii. 33, and Job xx. 16, "risah denotes the "poison" or "venom" of serpents. From Deut. xxix. 18, "a root that beareth risah," (margin "a poisonous herb"), and Lam. iii. 19, "the wormwood and the risah," compared with Hos. x. 4, "a judgment springeth up as risah." It is evident that the Hebrew term denotes some bitter, and perhaps poisonous plant, though it may also be used, as in Ps. lxxv. 21, in the general sense of "something very bitter."

CETULUS (Hierb. ii. 46-52) thinks "hemlock" (Conium maculatum) is intended, and quotes Jerome on Hosea in support of his opinion, though it seems that this commentator had in view the couch-grass (Triticeum repens) rather than "hemlock." Rosenmüller (Bibl. Bot. p. 118) is inclined to think that the Lolana tomentosa [darkened] leaf-edges pass with the passage in Hosea, where the risah is said to grow "in the furrows of the field."

Other writers have supposed, and with some as important for harmonizing the different account of the Saviour's appearances after the resurrection. There is some evidence that the northern point of Olivet may have been known as Galilee in a later age, because the Galileans usually crossed here on their way to Jerusalem (see Thoï's Cod. apoc. N. T. p. 619 f.).

II.

† Rudolph Hofmann, in his Uber den Berg Galilae (Meissen. 1535), maintains this view, and urges it

GALL

861
reason (from Deut. xxii. 32, "their grapes are grapes of rish"), that some berry-bearing plant and not the intended. Gesenius (Thes., p. 123, L.) understands "poopis." Michaelis (Suppl. Lex. Heb. p. 2224) is of opinion that rish may be either the Lolium temulentum, or the Sudanum ("nightshade"). Gedeman (Ferd. Sem. pt. iv. c. 10) argues in favor of the Colesyath. The most probable conjecture, for proof there is none, is that of Gesenius: the capules of the Papaveraceae may well give the name of rish ("head") to the plant in question, just as we speak of poppy heads. The various species of this family spring up quickly in corn-fields, and the juice is exceedingly bitter. A steeped solution of poppy heads may be "the water of gall" of Jer. viii. 14, unless, as Gesenius thinks, the πάλιν might be the poisonous extract, opium; but nothing definite can be learnt.

The passages in the Gospels which relate the circumstance of the Roman soldiers offering our Lord, just before his crucifixion, a vinegar mingled with gall according to St. Matthew (xxvii. 34), and "wine mingled with myrrh" according to St. Mark's account (xv. 23), require some consideration. The first-named Evangelist uses ψάριν, which is the LXX. rendering of the Hebrew rish in the Psalm (ix. 21) which foretells the Lord's sufferings. St. Mark explains the latter ingredient in the sour vine drink to be "myrrh" (οίρος ἔρυμφωσ). For we cannot regard the transactions as different. "Matthew, in his usual way," as Hengstenberg (Comment. on Ps. xlii. 21) remarks, "designates the drink therapeutically. Always keeping his eye on the prophecies of the O. T., he speaks of gall and vinegar for the purpose of rendering the fulfilling of the Psalms more manifest. Mark again (xxv. 23), according to his way, looks rather at the outward quality of the drink. Bengel takes quite a different view: he thinks both myrrh and gall were added to the sour wine: "myrrha emolitio ex more; felle adulteratus ex petulancia" (Comment. Nov. Test. Matt. 1. e.). Hengstenberg's view is far preferable; nor is "gall" (ψάριν) to be understood in any other sense than as expressing the bitter nature of the draught. As to the intent of the preferred drink, it is generally supposed that it was for the purpose of deadening pain. It was customary to give such a draught to a patient before the execution a cup of wine with frankincense in it, to which reference is made, it is believed, by the αἵλιος κατατέιμων of Ps. lx. 3; see also Prov. xxxi. 6. This the Talmud states was given in order to alleviate the pain. See Buxtorf (Lex. Talm., p. 2134), who thus quotes from the Talmud (Sederot, fol. 43, l.): "Qui exit at occultia sex sententia judicis: poenam earn gravibus in poenam vivi at distractionem. Gesenius (Thes., p. 163) is of opinion that the myrrh was given to our Lord, not for the purpose of alleviating his sufferings, but in order that he might be sustained until the punishment was completed. He quotes from Apuleius (Saturnarch., viii.), who relates that a certain priest, disfigured himself with a multitude of bow's, having previously strengthened himself by taking myrrh. The latter circumstance in the Talmud, was supposed to possess soporific properties, or in any way to induce an alleviation of pain, it is difficult to determine. The same must be said of the αἵλιος λαμπροπορτιων of St. Mark: for it is quite certain that neither of these two drugs in question, both of which are the produce of the same natural order of plants (Amirydendron), is ranked among the hypnotics by modern physicians. It is true that Dioscorides (i. 77) ascribes a soporific property to myrrh, but it does not seem to have been so regarded by any other author. Notwithstanding, therefore, the almost concurrent opinion of ancient and modern commentators, that the "wine mingled with myrrh" was offered to our Lord as an anodyne, we cannot readily come to the same conclusion. Had the soldiers intended a mitigation of suffering, they would doubtless have offered a draught drugged with some substance having narcotic properties. The drink in question was probably a mere ordinary beverage of the Romans, who were in the habit of seasoning their various wines, which, as they contained little alcohol, soon turned sour, with various spices, drugs, and perfumes, such as myrrh, cassia, myrtle, pepper, d.e., d.e. (Dict. of Gr. and Rom. Antiq. art. Vinum). W. H. G.

* Rosenm. Let's supposition is not founded on a knowledge of the natural history of Palestine. No plant is more common in the fields than the Popover Sprayneum, which is a plant of the same genus as the opium plant, Popover somniferum. In places the Popover Sprayneum is seen in such profusion that the ground is covered with its red blossoms. The bitterness of the cochonky is proverbial with the Arabs, who speak of anything bitter as being like the μέλαν, but the fact that this does not grow in the furnows causes us to decide in favor of the former. G. E. P.

GALLERY. an architectural term, describing the porticoes or verandas, which are not uncommon in eastern houses. It is doubtful, however, whether the Hebrew words so translated have any reference to such an object. (1.) In Cant. i. 17, the word ῥάβδις (ῥapolis) means "pallining," or "fretted work," and is so understood in the LXX. and Vulg. (φιλοράπιον: homera). The sense of a "gallery" appears to be derived from the marginal reading ῥάβδις (ῥapolis, Keri), which contains the idea of "running," and so of an ambulatory, as a place of exercise: such a sense is, however, too remote to be accepted. (2.) In Cant. vii. 5, ῥάβδις is applied to the hair, the regularly arranged, flowing locks being compared by the poet to the channels of running water seen in the pasture-grounds of Palestine. (Hait.) (3) In Ez. xii. 15, xiii. 3, the word awtik (איהו) seems to mean a pillar, used for the support of a floor. The LXX. and Vulg. give in the latter passage ἀπάλασσων, and poricines, but a comparison of verses 5 and 6 shows that the "galleries" and "pillars" were identical: the reason of the upper chambers being shorter than the absence of supporting pillars, which allowed an extra length to the chambers of the lower story. The space thus included within the pillars would assume the corner of an open gallery. W. L. B.

GALLEY. [ship.]

GALLIM ( γάλλιμ) = keeps, or possibly springs: (in Is.) Γαλλήμ [Nat. Γαλλήμ; Ez. 1. Taalarem] (Gallim), a place which is twice mentioned in the Bible: (1.) As the native place of the man to whom Michal David's wife was given — "Thallith the son of Laish, who was from Gallim." (2.) The people of the land of the Philistines. (Judges. xvi. 21.)
The name of Gallio has not been met with in modern times. Schwarz (p. 131) reports a Beil-Djulun between Ramleh and Joppa, but by other explorers the name is given as Beil-Dejum. Eusebius, from hearsay (Aleph-θ), places it near Akaron (Ekron).

GALLOWS. [Punishment.]

GAM'ALIEL (ταύαμαλη: [Vat. Γαμαλης: Add.]: Alex. Ἁμαλη: Ἄμαλης), 1 Esdr. viii. 29. [DANIEL, 3.]

GAMALIEL (בגמאליא [God the avenger, Forst.]: Γαμαλιήλ: Gamaliel), son of Pedahzur: prince or captain (נערץ) of the tribe of Manasseh at the census at Sinai (Num. i. 10; ii. 29; viii. 54, 59), and at starting on the march through the wilderness (x. 28).

GAMALIEL (גמאליא: for the Hebrew equivalent see the preceding article), a Pharisee and celebrated doctor of the Law, who gave prudent worldly advice in the Sanhedrin respecting the treatment of the followers of Jesus of Nazareth (Acts v. 34 ff.). We learn from Acts xxii. 3, that he was the predecessor of St. Paul. He is generally identified with the very celebrated Jewish doctor Gamaliel, who is known by the title of "the glory of the law," and was the first to whom the title "rabbin," "our master," was given. The time agrees, and there is every reason to suppose the assumption to be correct. This Gamaliel was son of Rabbi Simeon, and grandson of the celebrated Hillel; he was president of the Sanhedrin under Tiberius, Caligula, and Claudius, and is reported to have died eighteen years before the destruction of Jerusalem. Winer says "after" (nach); but it is evidently a mistake, for he was succeeded in the presidency by his son Simeon, who perished in the siege (see Lightfoot, Centuria chorographica Matthæi promissæ, ch. xv.). If the identity be as assumed, there is no reason—and we should arrive at the same result by inference from his conduct in Acts (l. c.)—for supposing him at all inclined towards Christianity. The Jewish accounts make him die a Pharisee. And when we remember that in Acts v. he was opposing the then prevalent feature of Sadduceism in a matter where the Resurrection was called in question, and was a wise and enlightened man opposing furious and unreasoning zealots—and consider also, that when the anti-philosophical element in Christianity was brought out in the acts and sayings of Stephen, his pupil Saul was found the foremost persecutor,—we should be slow to suspect him of forwarding the Apostles as followers of Jesus.

* It is worth observing as a mark of Luke's accuracy that he mentions Gallo as a proconsul (διοικητης, Acts xiii. 12) in the reign of Claudius (Suet. Claud. c. 25); for under the preceding emperors, Tiberius and Caligula, Achaia was an imperial province, and the title of the governor would have been proconsul (αυτοκρατορος, προμηθευτης). See Lardner's "Credibility of the Gospel," p. 1. [DION.]. Luke does not mention Gallo's indifference to the dispute between the Jews and Christians to the advantage of the latter (Acts xvii. 17) in order either to commend or censure him, but simply as showing why the attempt of the Jews against Paul had such an unexpected issue. Luke's o'diēs τουτων ἱναλὲς, which furnishes this explanation, accords at the same time with Gallo's character, as his contemporaries describe it (see above); for this incidental remark about his carelessness reveals to us a glimpse of that easy temper which goes so far to make a man a general favorite.

H. GALLOWS. [Punishment.]

GAM'ALIEL (ταύαμαλη: [Vat. Γαμαλης: Add.]: Alex. Ἁμαλη: Ἄμαλης), 1 Esdr. viii. 29. [DANIEL, 3.]

GAMALIEL (גמאליא: for the Hebrew equivalent see the preceding article), a Pharisee and celebrated doctor of the Law, who gave prudent worldly advice in the Sanhedrin respecting the treatment of the followers of Jesus of Nazareth (Acts v. 34 ff.). We learn from Acts xxii. 3, that he was the predecessor of St. Paul. He is generally identified with the very celebrated Jewish doctor Gamaliel, who is known by the title of "the glory of the law," and was the first to whom the title "rabbin," "our master," was given. The time agrees, and there is every reason to suppose the assumption to be correct. This Gamaliel was son of Rabbi Simeon, and grandson of the celebrated Hillel; he was president of the Sanhedrin under Tiberius, Caligula, and Claudius, and is reported to have died eighteen years before the destruction of Jerusalem. Winer says "after" (nach); but it is evidently a mistake, for he was succeeded in the presidency by his son Simeon, who perished in the siege (see Lightfoot, Centuria chorographica Matthæi promissæ, ch. xv.). If the identity be as assumed, there is no reason—and we should arrive at the same result by inference from his conduct in Acts (l. c.)—for supposing him at all inclined towards Christianity. The Jewish accounts make him die a Pharisee. And when we remember that in Acts v. he was opposing the then prevalent feature of Sadduceism in a matter where the Resurrection was called in question, and was a wise and enlightened man opposing furious and unreasoning zealots—and consider also, that when the anti-philosophical element in Christianity was brought out in the acts and sayings of Stephen, his pupil Saul was found the foremost persecutor,—we should be slow to suspect him of forwarding the Apostles as followers of Jesus.

* Lewin's citations (Fasti Surti, p. 335 f.) show that Gallo was a victim of Nero's cruelty as well as Simeon, and was put to death after his brother. H
GAMES

Ecclesiastical tradition makes him become a Christian, and be baptized by St. Peter and St. Paul (Phot. Col. 171, p. 199), together with his brother Gamaliel, and with Nicodemus; and the Clementine Recognitions (i. 65) state that he was secretly a Christian at this time. Various notices and anecdotcs concerning him will be found in Conybeare and Howson's Life of St. Paul, vol. 2, vol. i. p. 69 ff.

For the alleged melanchohia in Gamaliel's speech before the Jewish Council, see THEODOSIUS. His recommendation of a lenient policy toward the followers of Jesus when the popular rage against them was so strong, is certainly remarkable. Neander (Pf. aug., i. 74 ff.) attributes to him something more than the discretion which secures the folly of conferring importance on what is insignificant, or of making fanaticism more violent by vain resistance. On the contrary, the manner in which the Apostles had spoken and acted may have produced a favorable impression on him, and so much the more because their strict observance of the Law and their hostile attitude toward Sadduceism may have awakened in him an interest in their behalf. It is by no means impossible that the thought may distinctly have occurred to him that there might be something divine in the cause of these persecuted Galileans. The Talmud, in accordance with this view, represents Gamaliel not only as a great teacher, but tolerant and charitable, far beyond the mass of his countrymen. See further Pressed's article on "Gamaliel" in Herzog's Real-Encyk. iv. 656 f., and especially Gindsay's article, "Gamaliel," in Kittto's Cyclo. of Bib. Lit., 3d ed.

GAMES. Of the three classes into which games may be arranged, juvenile, manly, and public, the two first alone belong to the Hebrew life. There are, as noticed in the Bible, being either foreign introductions into Palestine or the customs of the Canaanites. With regard to juvenile games, the notices are very few. It must not, however, be inferred from this that the Hebrew children were without the amusements adapted to their age. The toys and sports of childhood claim a remote antiquity; and if the children of the ancient Egyptians had their dolls of ingenious construction, and played at ball (Wilkinson, Anc. Egypt., abridgment, i. 157), and if the children of the Romans amused themselves much, as those of the present day — "Elders of these, pietiste adjungere mus, 

audere par impar, equidate in arameo longi,"

Hor. 2 Sat. iii. 247 —

we may imagine the Hebrew children doing the same, as they played in the streets of Jerusalem (Zech. viii. 5). The only recorded sports, however, are keeping tame birds (Job xii. 5; cf. Catull. ii. 1; "Passer, deliciue meae pulcher") and imitating the proceedings of marriages or funerals (Matt. xii. 16).

With regard to manly games, they were not much followed up by the Hebrews; the natural earnestness of their character and the influence of the climate alike disposed them to active exertion. The chief amusements of the men appears to have consisted in conversation and joking (Jer. xv. 17; Prov. xxvi. 19). A military exercise seems to be noticed in 2 Sam. ii. 14, but the term under which it is described (pallXXeX) is of too general an application to enable us to form an idea as to its character: if intended as a sport it must have resembled the HryaL, with the exception of the combatants not being mounted; but it is more consonant to the sense of the passage to reject the notion of sport and give nishob the sense of fencing or fighting (Theinuus, Comm. in loc.). In Jerome's day the usual sport consisted in lifting weights as a trial of strength, as also practiced in Egypt (Wilkinson, i. 267). Duce are mentioned by the Talmudists (Misna, Sand. 5, 3; Shabb. 23, 2), probably introduced from Egypt (Wilkinson, ii. 243); and, if we assume that the Hebrews imitated, as not improbably they did, other amusements of their neighbors, we might add such games as rod and even, more (the micros digitis of the Romans), draughts, hops, catching balls, etc. (Wilkinson, i. 188). If it be objected that such trifling amusements were inconsistent with the gravity of the Hebrews, it may be remarked that the amusements of the Arabs at the present day are equally trivial, such as blindman's buff, hiding the ring, etc. (Wellsted, Arabia, i. 160).

Public games were altogether foreign to the spirit of Hebrew institutions: the great religious festivals supplied the pleasurable excitement and the feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such gatherings should be exclusively connected with religious duties. Accordingly the erection of a gymnasium by James, which the discus was chiefly practiced, was looked upon as a heathenish proceeding (1 Mac. i. 14, 2 Mac. iv. 12-14); and the subsequent erection by Herod of a theatre and amphitheatre at Jerusalem (Joseph. Ant. xv. 8, § 1), as well as at Cesarea (Ant. xv. 9, § 16; B. J. i. 21, § 8) and at Berytos (Ant. xix. 7, § 5), in each of which a quinquennial festival in honor of Caesar was celebrated with the usual contests in gymnastics, chariot races, music, and with wild beasts, was viewed with the deepest aversion by the general body of the Jews (Ant. xv. 8, § 1).

The entire absence of verbal or historical reference to this subject in the Gospels shows how little it entered into the life of the Jews: some of the foreign Jews, indeed, indulged a taste for theatrical representations; Josephus (11. 3) speaks of an Allurus, an actor of Sicyon (µαιδαρος), who was in high favor with Nero. Among the targets at the stage the rage for theatrical exhibitions was such that every city of any size possessed its theatre and stadium. At Ephesus an annual contest (αγαθων και χρυσοστο, και μουσηκος, Theyn. iii. 104) was held in honor of Diana, which was superseded by others named Αειραίοι (Acts xix. 31; A. V. "chief of Asia"). (Asaeroxu.) It is probable that St. Paul was present when these games were proceeding, as they were celebrated in the month of May (comp. Acts xx. 16; Conybeare and Howson's St. Paul, ii. 81). A direct reference to the exhibitions that took place on such occasions is made in the term ενθρωποαι (1 Cor. iv. 32). The ενθρωποαι were sometimes professional performers, but more usually criminals (Joseph. Ant. xv. 8, § 1) who were exposed to lions and other wild beasts without any means of defense (Cic. Pro Sest. 44, Tertull. Apol. 9). Political considerations were so treated, and Josephus (R. J. vi. 3, § 1) records that no less than 2500 Jews were destroyed in the theatre at Cesarea by this and similar methods. The expression as used by St. Paul is usually taken as metaphorical, both on account of the qualifying words καί ἀνθρωπος, the absence of all reference to the occurrence in the
Acts, and the rights of citizenship which St. Paul enjoyed: none of these arguments can be held to be absolutely conclusive, while on the other hand the term ἐπιμοιασμός is applied in its literal sense in the Apostolical Epistles (Ign. ad Eph. 1, ad Trall. 10; Matt. Polyc. 3; cf. Euseb. H. E. iv. 15), and, when metaphorically used (Ign. ad Rom. 5), an explanation is added which implies that it would otherwise have been taken literally. Certainly St. Paul was exposed to some extraordinary suffering at Ephesus, which he describes in language borrowed from, if not descriptive of, a real case of ἐπιμοιασμός; for he speaks of himself as a criminal condemned to death (ἐπιθανατίως, 1 Cor. iv. 9; ἀπειρίως τοῦ βασιλέως ὑγίεια, 2 Cor. i. 9), exhibited previously to the execution of the sentence (ἀπεδίδετο, 1 Cor. i. 2), reserved to the conclusion of the games (ἐγκατέλειψε) as was usual with the thermonomices (ποιεισμοί εὐγείη, εὐκλεία βισταρίων, Tertull. de Paed. 14), and thus made a spectacle (θέατον ἐγκατέλειψεν). Lightfoot (Exercit. on 1 Cor. xv. 32) points to the friendliness of the Asiarchs at a subsequent period (Acts xix. 31) as probably resulting from some wonderful preservation which they had witnessed. Nero selected this mode of execrating the Christians at Rome, with the barbarous aggravation that the victims were dressed up in the skins of beasts (Tac. Ann. xvi. 44). St. Paul may possibly allude to his escape from such torture in 2 Tim. iv. 17. [Dict. of Ant. art. Bestiarii.]

St. Paul's epistles abound with allusions to the Greek contests, borrowed probably from the Isthmian games, at which he may well have been present during his first visit to Corinth (Connibear and Howson, ii. 290). These contests (ὁ αγών — a word of general import, applied by St. Paul, not to the fight, as the A. V. has it, but to the race, 2 Tim. iv. 7; 1 Tim. vi. 12) were divided into two classes, the panathenaic, consisting of boxing and wrestling, and the pentathlon, consisting of leaping, running, quoiting, hurling the spear, and wrestling. The competitors (ὁ αγώνιστας, 1 Cor. ix. 29; ἄνδρος τοῦ α. 2 Tim. ii. 5) required a long and severe course of previous training (cf. σωματικὸς γυμνασμός, 1 Tim. iv. 8), during which a particular diet was enforced (πάντα ἑγκρατεῖται, δουλαγωγές, 1 Cor. ix. 25, 27). In the Olympic contests these preparatory exercises (προγυμνασμοῦ) extended over a period of ten months, during the last of which they were conducted under the supervision of appointed officers. The contests took place in the presence of a vast multitude of spectators (περιπλῆκτος τίτους καθήμερον, Heb. xii. 1), the competitors being the spectacle (θέατον = θίασα, 1 Cor. iv. 9; θαυμάζοντος, Heb. x. 34). The games were opened by the proclamation of a herald (κηρύγας, 1 Cor. ix. 27), whose office it was to proclaim the name and country of each candidate, and especially to announce the name of the victor before the assembled multitude. Certain conditions and rules were laid down for the different contests, as that no bribe be offered to a competitor; that in boxing the combatants should not lay hold of one another, &c.; any infringement of these rules (ἦν μη νομίζων ἀδίκησιν, 2 Tim. ii. 5) involved a "cos of the prize, the competitor being pronounced disqualified (ἀδίκους, 1 Cor. ix. 27; indexius bruibo, Bengel.). The judge was selected for his spotless integrity (ὁ δικαίως κριτής, 2 Tim. iv. 8): his office was to decide any disputes (βραβευτής, Col. iii. 13; A. V. "rule") and to give the prize of leaves of wild olive at the Olympic games, and of pine or, at one period, ivy at the Isthmian games. These crowns, though perishable (φθαρόν, 1 Cor. ix. 2); cf. 1 Pet. v. 4), were always regarded as a source of unfading exultation (Phil. iv. 1; 1 Thess. ii. 19): palm branches were also placed in the hands of the victors (Rev. vii. 9). St. Paul alludes to two only out of the five contests, boxing and running, most frequently to the latter. In boxing (πομηκός cf. πομποσταί), 1 Cor. ix. 29), the hands and arms were bound with the στάχλιον, a band of leather studded with nails, which very much in-
Foot-race, adapted from a view of the Circus Flaminus at Rome. (Montfaucon.)

form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The race was either from one end of the stadium to the other, or, in the diaulos, back again to the starting-post. There may be a latent reference to the diaulos in the expression ἀγχώναι καὶ τελευτήριον (Heb. xii. 2), Jesus being, as it were, the starting-point and the goal, the hcom a quo and the hcom ol quem of the Christian’s course. The judge was stationed by the goal (σκοτόν; A. V. “mark”; Phil. iii. 14), which was clearly visible from one end of the stadium to the other, so that the runner could make straight for it (ἀεί ἐν διαλοίνει, 1 Cor. ix. 26). St. Paul brings vividly before our minds the earnestness of the competitor, having cast off every encumbrance (𝕕ύσκολο ἀπὸ τὴν πάντα), especially any closely-fitting robe (ἐντερίστατον, Heb. xii. 1; cf. Conybeare and Howson, ii. 543), holding on his course merrily (δίκω, Phil. iii. 12), his eye fixed on the distant goal (ἀφαπώτερον ἀπὸθέπνευ, Heb. xii. 2, 21; ἀεί ἐν διαλοί, Bengel), unmindful of the space already past (τὰ μὲν ὅπιστα ἐπιλαμβάνομεν, Phil. i. e.), and stretching forward with bent body (τὸ δὲ ἐπιστρέψομεν ἐπικεφαλῆς), his perseverance (ὑπὲρ ἀπώτερον, Heb. xii. 1), his joy at the completion of the course (μετὰ χαρᾶς, Acts xx. 24), his exaltation as he not only receives (ἤλαβον, Phil. iii. 12) but actually grasps (καταλαβὼν, not “apprehend,” as A. V. Phil.: ἐπιλαβοῦν, 1 Tim. vi. 12, 19) the crown which had been set apart (ἅπανταίηιν, 2 Tim. iv. 8) for the victor.

* Dr. Howson deduces the loss of four essays on the “Metaphors of St. Paul” (Sunday Magazine, 1865-67) to the illustration of Paul’s imagery derived from the Greek games (July, pp. 683-689). He reminds us that the athletic games of the Greeks, such as wrestling, boxing, and especially foot-races, with all the preliminary training, with the assembled and applauding multitudes while the contest was going on, with the formality of the heralds and the strict observance of the rules, with the emperors and prizes and eager congratulations

at the close, with the poems which perpetuated great victories like heir-loom, must have been very familiar to Paul’s thoughts. Though a Jew, he was born in a foreign city, and not only honored for the most part in places where the Greek population was predominant, but wrote his letters to Greek Christians or those who spoke the Greek language. In some of these cities, as Ephesus, Philippi, Athens, Corinth, and Rome, remains of the Gymnasium, for training the body, and of the Stadium, or the ground for running, are still to be seen.

The foot-race supplied many of the figures which occur in his speeches and epistles. Unfortunately, our ambiguous “course” (A. V.) conceals some of these from the reader. When in his sermon at Antioch in Pisidia (Acts xiii. 27) the Apostle speaks of John the Baptist as “fulfilling his course,” he means that the forerunner was hastening to the end of his appointed “race” (διαλοί), and that this race though brief was energetic while it lasted. So also in Acts x. 24, the substitution of “race” for “course” brings out a similar allusion in that passage to the struggle of the runner for the crown of victory. “I count not my life dear unto me,” he says, “that I may finish my race with joy.”

The comparison in Heb. xii. 2 gives special prominence to the immense concourse which the Greek spectacle called together, as well as the necessity of being free from every hindrance and of straining to the utmost every nerve, in order to obtain the heavenly runner’s prize. (See also 1 Cor. ix. 21; Gal. ii. 2, 7; Phil. ii. 16.) There was an officer among those employed in the supervision of the games “whose business it was with his voice or with a trumpet to summon the competitors to the exciting struggle.” Paul seems to refer to this practice when, in speaking of the possibility that some who have instructed and warned others may lose their own souls, he says (1 Cor. ix. 27): “I keep under my body and bring it into subjection; lest that by any means, after having been a herald (‘preached’ in the A. V.) to others (ἑλλήνως ἐκηρύγγας), I myself should be a cast-away.” The metaphor in this passage (taken from the boxer, not the runner) states strongly another significant thought: “So” (i.e. imitating the earnestness of those who strive for a corruptible (fading) crown) “fight I, not as one beating the air.” What is meant is that if we have really entered or the Christian warfare, having now to do with definite, formidable antagonists, we are not to trifle, but to be in earnest, like the pugilist “with whom is no more striking for striking’s sake, no more pretense, no dealing of blows in the air.” The apostle refers not to outward efforts for the advancement of Christ’s kingdom, but (note the context) its triumph in each one’s bosom over his own peculiar sins and temptations. The “bodily exercise” of which Paul speaks with so much disparagement (1 Tim. iv. 8) was not a species of religious asceticism, against which he would warn the self-righteous, but the severe training of the body, to which the athletes submitted for the sake of the rewards so worthless
and contemptible, though coveted so much, in comparison with those of the works of godliness; in which we should "exercise (or train) ourselves" — a service "having promise of the life that now is, and of that which is to come."

Possibly Paul means to imply that the Rock should be regarded as the hill-side there, full of eager spectators of combats such as he refers to in his letter to the Philippians: — Not as though I had already attained, either were already perfect: but I follow after.

... This one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before, I press toward the mark for the prize of the high calling of God in Christ Jesus. (Phil. iii. 12-14.) The athlete in the scene which this figure so vividly depicts, forgetting the spaces of the race-course already past, and thinking only of those which lie between him and the goal, runs, as it were, with outstretched neck (ἐκτεταμένον τον ἱετό), in his eagerness to outstrip every competitor and arrive first at the pillar where the crown of the victor awaits him. For the Christian there is no looking back, no thought of giving up the struggle.

The whole energy of mind and body is bent upon success, and till success is achieved, nothing is done.

Once more, it is not to a fight or campaign, as the A. V. might suggest, but to a strife in the footrace, that Paul alludes in that outburst of exultant joy, on the eve of his martyrdom: — I have fought the good fight, I have finished my course (εὐκράστως); I have kept the faith: henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous Judge, shall give me at that day.

(2 Tim. iv. 7, 8.) "The race is nearly run, the struggle is all but over; he is weary, as it were, and pants with the effort, but he is successful, the crown is in sight, and the Judge, the righteous Judge, who cannot make a mistake, is there, ready to place that bright weapon upon his brow."

The entire paper of which use has been so freely made in this account of Paul's apologetic figures, contains many good hints, both for the preacher and the general student of the Apostle's speeches and letters. The subject illustrates the dependence of practical exegesis on a knowledge of archaeology. It reveals also a harmony of language in what is ascribed to Paul as a writer and a speaker, which is not without its value as "one of the small collateral proofs of the genuine and honest character both of the Acts and the epistles." — H.

GAMADIMES (γαμαῦδη). This word occurs only in Ex. xxvi. 11, where it is said of Tyre, "the Gamadimes were in thy towers." A variety of explanations of the term have been offered. (1.) One class turns upon a supposed connection with ἄφιδ, a cubit, as though = cubit-high men, whence the Vulg. has Pagnini. Michaelis thinks that the apparent height alone is referred to, with the intention of conveying an idea of the great height of the towers. Spencer (de Leg. Heb. Rit. ii. cap. 24) explains it of small images of the tutelary gods, like the Lokes of the Romans. (2.) A second class treats it as a geographical or local term; Grotius holds Gamul to be a Hebrewized form of the name Assuan, a Pharonian town; the Chaldean paraphrase has Coppopcdinas, as though reading πόδις; Fuller (Miscell. vi. 3) identifies them as the inhabitants of Gamala (Pitn. v. 14); and again the word has been broken up into δᾶρφος, also the word of Mos. (3.) A third class gives a more general sense to the word; Gesenius (Thes. p. 292) connects it with ἄφιδ, a bough, whence the sense of brave warriors, hostis arborum under cedentes. Hitzig (Comm. in loc.) suggests deserters (Übersetzung) and draws attention to the preposition in as favoring this sense: he inclines, however, to the opinion that the prophet had in view Cant. iv. 4, and that the word δᾶρφος in that passage has been successively corrupted into δᾶρφος, as read by the LXX. which gives φόλαξ, and δᾶρφος, as in the present text. After all, the rendering in

![Castle of a maritime people, with the shield hanging upon the walls. (From a bas-relief at Komunjik, Layard.]

GAMUL (γαμοῦ; γαμοῦ). [read, Ges.; hence one nature, strong. Furst]: ἄφιδες; Alex. Τατοαν: Gamul, a priest; the leader of the 22d course in the service of the sanctuary (1 Chr. xxiv. 17).

GAR (Ga). [Red. F.] Sons of Gar are named among the "sons of the servants of Solomon" (1 Kings v. 34). There are not in the lists of Ezra and Nehemiah any names corresponding to the two preceding and the six succeeding this name. It does not appear whence the form of the name in the A. V. is derived. [It was derived from the Aldine edition; see above.]

GARDEN (גֶּדָנ, גֶּדָנָּא; הָרוֹם). Garden in the East, as the Hebrew word indicates, are inclosures, on the outskirts of towns, planted with various trees and shrubs. From the allusions in the Bible we learn that they were surrounded by hedges of thorns (Is. v. 5), or walls of stone (Prov. xxvii. 31). For further protection lodges (Is. i. 8; Lam. ii. 6) or watch-towers (Mark xiii. 1) were built in them, in which sat the keeper (גֶּדָנ, Job xxvii. 18) to drive away the wild beasts and robbers, as is the case to this day. Layard (Nin. & Bab. p. 365) gives the following description of a scene which he witnessed: "The broad silvery river winds through the plain, the great rock casts its dark shadows in the moonlight, the light of the lodges in the gardens of cucumbers flickered at
our feet, and the deep silence was only broken by the
sharp report of a rifle fired by the watchful
guards to frighten away the wild bears that lurked in the
molen holes." The scavenger also was an itinerant
emporium (τοπηγανδρον, Var. vi.
70 [or Epist. of Jer. 70]).

The gardens of the Hebrews were planted with
flowers and aromatic shrubs ( Cant. vi. 2, iv. 16),

aside olives, fig-trees, nuts, or walnuts (Cant. vi.
11), pomegranates, and others for domestic use
(Ex. xxiii. 11; Jer. xxxix. 5; Am. ix. 14).
The quince, medlar, citron, almond, and service trees
are among those enumerated in the Mishna as cul-
tivated in the Mishna (Kid. 1, § 5; Kilo.
14, § 8). Herbs, or kitchen-gardens, are mentioned in
Dent. xi. 10, and 1 K. xvi. 2. Cucumbers were grown
in them (Is. i. 8; Var. vi. 70 [or Epist. of Jer.
70]), and probably also melons, leeks, onions, and
garlic, which are spoken of (Num. xi. 5) as the
productions of a neighboring country. In addi-
tion to these, the lettuce, mustard-plant (Luke
xiii. 19), cayander, oenole, one of the bitter herbs eaten
with the meal, and rue are particularly
spoken of in the precepts of the Mishna, though it is not
certain that they were all, strictly speaking, cul-
tivated in the gardens of Palestine (Kid. in. §§ 2,
8). It is well known that, in the time of the
Romans, the art of gardening was carried to great
perfection in Syria. Pliny (xx. 16) says, "Syria
in hortis opusissima est : undeque prope Greciam,
Milita Syrorum oblectat." and again (xii.
34) he describes the kibsum plant as growing in
Judaea alone, and there only in two royal gardens.
Strabo (xxvi. p. 761), alluding to one of these
gardens near Jericho, calls it τον βασιλικόν υπαγ-
δέων. The rose-garden in Jerusalem, mentioned in
the Mishna (Masse. vii. ii. § 5), and said to have been
situated westward of the Temple mount, is
remarkable as having been one of the few
gardens which, from the time of the prophets, existed
within the city walls (Lightfoot, Dom. Heb. on
Matt. xxvi. 36). They were usually planted with-
out the gates, according to the gloss quoted by
Lightfoot, on account of the feild smell arising
from the weeds thrown out from them, or from the
manure employed in their cultivation.
The gate Gethseman, mentioned by Josephus (B.
J. v. 4, § 2) is supposed to have derived its name
from the rose-garden already mentioned, or from
the fact of its leading to the gardens without the
city. It was near the garden-ground by the Gate
of the Women that Titus was surprised by the
Jews while reconnoitering the city. The trench by
which it was surrounded cut off his retreat (Joseph.
B. J. v. 2, § 2). But all of the gardens ofPale-

tine same is possessed of associations more sacred
and imperishable than the garden of Gethsemane,
based the oil presses on the slopes of Olivet. Eight
aged olive-trees mark the site which tradition has
connected with that memorable garden-scene, and
their gnarled stumps and almost leafless branches
attest an antiquity as venerable as that which is
claimed for them. [GETHSEMANE.]

In addition to the ordinary productions of the
country, we are tempted to infer from Is. xvii. 10
that in some gardens care was bestowed on the
rearing of exotics. To this conclusion the descrip-
tion of the gardens of Solomon in the Targum on
Ps. iv. 7, 6, serves to point. "I make the well-
cultivated gardens and paradieses, and sow there all
kinds of plants, some for use of eating, and some
for use of drinking, and some for purposes of medi-

GARDEN

chne; all kinds of plants of spicess. I planted
them trees of emptiness (i.e., not fruit-bearing),
and all trees of spicess which the spectes and de-
mons brought me from India, and every tree which
I would name." It is possible that the border wall
of the Citadel, which is in Jerusalem, by the waters
of Siloah, I chose reservoirs of water, which be-
hold! are for watering the trees and the plants,
and I made me fish-ponds of water, some of them
also for the plantation which rears the trees to
water it."

In a climate like that of Palestine the neigh-
borhood of water was an important consideration in
the site of the garden; and the importance of the
of the country has perpetuated this fact in the
name Gam-a'amon — the "fountain of gardens" —
the modern Gudm (of Cant. iv. 15). To the old
Hebrew poets "a well-watered garden," or "a
tree planted by the waters," was an emblem of luxuri-
ous fertility and material prosperity (Is. viii. 11;
Jer. xvii. 8, xxxi. 12); while no figure more graph-
ically conveyed the idea of luscious barremess or
"flowery garden" than "a garden of the Lord" (Is.
i. 30). From a neighboring stream or cistern
were supplied the channels or conduits, by which the
gardens were intersected, and the water was thus
conveyed to all parts (Ps. i. 3; Ecclus. ii. 6; Eclus.
xxiv. 30). It is matter of doubt what is the exact
meaning of the expression "to water with the foot"
in Dent. xii. 10. Nicandri (Brass. de P. Ant. p.
158) describes a wheel which is employed for irri-
gating gardens where the water is not deep and
which is worked by the hands and feet after the
manner of a treadmill, the men "pulling the upper
part towards them with their hands, and pushing
with their feet upon the lower part." (Robinson, ii.
220). This mode of irrigation might be described as
"watering with the foot." But the method
practiced by the agriculturists in Oman, as narrated
by Wellsted (Trav. p. 446) answers more nearly to
this description, and serves to illustrate Prov.
xiv. 1: "After ploughing, they form the ground
with a spade into small squares with lodges on
either side, along which the water is conducted . . .
When one of the hollows is filled, the peasant
stops the supply by turning up the earth with his
foot, and thus opens a channel into another." The
orange, lemon, and mulberry groves which lie around and behind Jaffa supply, perhaps, the
most striking peculiarities of oriental gardens—
gardens which Mu'minell describes as being "as
colfused miscellany of trees jumbled together,
without either posts, walks, arbors, or anything of
art or design, so that they seem like thickets
rather than gardens." (Early Trav. in Pala.
p. 446). The Persian wheels, which are kept ever
working, day and night, by mules, to supply the
gardens with water, leave upon the traveler's ear a
most enduring impression (Lynch, Exp. to Jor-
dan, p. 441; Selden's Memoir, p. 187).
The law against the propagation of mixed species
(Lev. xix. 19; Dent. xxi. 9, 11) gave rise to nu-
umerous enactments in the Mishna to insure its
observance. The portions of the field or garden,
in which the various plants were sown, were sepa-
rated by light fences of reed, ten palms in height,
the distance between the reeds being not more than
three palms, so that a kid could not enter (Kid.
iv. 1). The kings and nobles had their country-houses
surrounded by gardens (1 K. xxi. 1; 2 K. ix. 37),
and these were used on festive occasions (Cant. v. 1)
So intimately, indeed, were gardens associated with festivity that horticulture and conviviality are, in the Talmud, denoted by the same term (cf. Buxt-
torf, Lex. Toba. s. v. παρδαίς). It is possible, however, that this may be a merely accidental coincidence. The garden of Ahasuerus was in a court of the palace (Esth. i. 5), adjoining the banqueting-hall (Esth. vii. 7). In Babylon the gardens and orchards were inclosed by the city walls (Layard, Nin. ii. 246). Attached to the house of Joachin was a garden or orchard (Sus. i. 4) — "a garden inclosed" (Cant. iv. 12) — provided with baths and other appliances of luxury (Sus. 15; cf. 2 Sam. xi. 2).

In large gardens the orchard (παρδαίς, παρ-
δεσοι) was probably, as in Egypt, the inclosure set apart for the cultivation of date and sycamore trees, and fruit-trees of various kinds (Cant. iv. 13 Esth. ii. 5). Schroeder, in the preface to his Thes-
aeum Einige Arbeiten, asserts that the word "paradise" is of Armenian origin, and denotes a garden near a house, planted with herbs, trees, and flowers. It is applied by Diodorus Siculus (ii. 10) and Herodotus (quoted by Joseph. Ant. x. 11, § 1) to the famous hanging gardens of Babylon. Xenophon (Anab. i. 2, § 7) describes the "paradise" at Co-
lonce in Phrygia, where Cyrus had a palace, as a large preserve full of wild beasts; and Auhis Ge-
lus (ii. 20) gives a "paradise" as the equivalent of παραδεσοι (cf. Philostratus, Adv. Ignat. i. 38). The officer in charge of such a domain

was called "the keeper of the paradise" (Neh. ii.
3).

The ancient Hebrews made use of gardens as places of burial (John xix. 41). Manasseh and his son Amon were buried in the garden of their palace, the garden of Uzza (2 K. xxi. 18, 29; τὸν
λάμπον παραδεσον. Joseph. Ant. x. 3, § 2). The retirement of gardens rendered them favorite places for devotion (Matt. xxvi. 36; John xviii. 1; cf. Gen. xxiv. 63). In the degenerate times of the monarchy they were selected as the scenes of idolat-
rous worship (Is. i. 29, lxv. 3, xxvi. 17), and in-
ages of the kings were probably erected in them.

Gardens are alluded to in Job xxi. 18 and
John xx. 15. But how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with the process of grafting is evident from Rom. xi. 17, 24, as well as from the minute prohibitions of the Mishna: "and the method of propagating plants by layers or cuttings was not unknown (Is. xvii.
10)." Buxtorf says that παραδεσον, νησια (Mishna, Bikkurim, i. § 2), were gardeners who tended and looked after gardens on consideration of receiving some portion of the fruits (Lex. Toba. s. v.). But that gardening was a special means of livelihood is clear from a proverb which contains a warning.

a. It was forbidden to graft trees on trees of a different kind, or to graft vegetables on trees or trees on vegetables (Kilaim, i. §§ 7, 8).
against rash speculations: "Who hires a garden beds: who hires gardens, him, the birds eat." (Dukes, "Robbin, Blumendaal," p. 141). The traditional gardens and pools of Solomon, supposed to be alluded to in Ezek. ii. 5, 6, are shown in the Wady Urtas (i.e., Hortus), about an hour and a quarter to the south of Bethlem (cf. Joseph. Ant. viii. 7, § 3). The Arabs perpetrate the tradition in the name of a neighboring hill, which they call "Judah-la-Faradis," or "Mountain of the Paradise" (Stanley, 8, § 7, p. 106). Mannheim is skeptical on the subject of the gardens ("Joyce Ten" in Pol., p. 457), but they find a champion in Van de Velde, who asserts that they were not confined to the Wady Urtas; the hill-slopes to the left and right also, with their heights and hollows, must have been covered with trees and plants, as is shown by the names they still bear, as "pear-bush," "nut-vaIe," "fig-vaIe," etc. (St. "/Syr'ic & Pol., ii. 27.")

The "king's garden," mentioned in 2 K. xxxv. 4, Neb. iii. 15, Jer. xxxi. 4, lii. 7, was near the pool of Siloam, at the mouth of the Tyropoeon, near of Damascus, and was formed by the meeting of the valleys of Jeshaphat and Ben Hinnom (Wilson, "Land of the Bible," i. 498). Josephus places the scene of the feast of Adonijah at En-rogel, "beneath the fountain that is in the royal paradise" (Ant. vii. 14, § 4; cf. also ix. 10, § 4). W. A. W.

GARREB (גארבי, Garrib, Forsch.): [Rom. Vat. Pagan.] Alex. Pagan: Compl. Pagan: [Gereb], one of the heroes of David's army (2 Sam. xxiii. 38). He is described as the "A. V. 'an" Hurite, at op's Jethelites, Vulg. This is generally explained as a patronymic, son of Jethel. It may be observed, however, that Ira, who is also called the Hurite in this passage, is called the Jairite in 2 Sam. xx. 26, and that the readings of the LXX. vary in the former passage, 'Edymos, 'Edymos, and 'Edmenos. These variations support to a certain extent the sense given in the Syriac version, which reads in 2 Sam. xx. 26 גארת, i.e., an inhabitant of Jair in the mountainous district of Judah.

W. L. B.

GARREB, THE HILL (גארב, Garreb, in the neighborhood of Jerusalem, named only in Jér. xxxi. 39. [Jerusalem.]

* The prophet mentions this hill as falling within the circuit of the restored "holy" Jerusalem, which was to be built in the latter times. LXX., in view of the meaning partly (whipped off; washed) would identify Garreb with Lodada (garibbon) in the history of the Crusaders ("Pseudo-Christus," p. 485). Gesenius thinks it may have been the later Bezeia (ibid., ad Thucyde, p. 89). It is impossible to reconcile these opinions, unless Bezeia was outside of Jerusalem in the time of Christ. The supposed Bezeia is now within the city. [Jerusalem.]

GARRIZIM (גאריזים, Pagan: [Garizim], 2 Marc. v. 23, vi. 2. [Garizim.]

* GARRIZIM, the hill of flowers or chaste of flowers which the priest of Jupiter at Lastrae brought with even to the gates of the city when the people were about to offer worship to Paul and..." (Acts xvi. 13). The garlands were worn as a mark of respect, and perhaps, as De Flavio suggests, the head dress of the priest himself, and the altar. See John's "Field, Archael.," § 401, 5.

* That the garlands were not exclusively meant for the occasion seems probable from the Greek (ταγγυα και στενλματα, and not ταγγυα εστεμενων) [Browne, "Diadem."]

GARLIC (גראיל, זונה: τα σκόρπεα, allies), mentioned in Num. xi. 5 as one of the Egyptian plants, the loss of which was regretted by the mixed multitude at Taberah. It is the Allium uancum of Linnaeus, which abounds in Egypt (see Celsius, "Herbarst.," pt. ii. p. 52 ff.), a fact evident from Herodotus (i. 125), when he states that the allowance to the workmen for this and other vegetables was inscribed on the great pyramid. W. D.

GARMENT: [Dress.]

* GARMITE, BABYLONISH. [Dress; BABYLONISH GARMITE.]

GARMITE, THE [Garmite, the strong Feast:] [Rom. Abd. Pagan: [Vat. Ataxam: Alex. Ortaca: Geren]. Keilah the Garmite, i.e., the descendant of Jerem see the Targum on this word, is mentioned in the everlasting genealogical lists of the families of Judah (1 Chr. iv. 19). Kealh is apparently the place of that name; but there is no clue to the reason of the sobriquet here given it. GARRISON. The Hebrew words so rendered in the A. V. are derivatives from the root mitzar to place, erect, which may be applied to a variety of objects. (1) Mattithai and mattithiah (מַדִּיתָא, מַדִּיתָא) undoubtedly mean a "garrison," or fortified post (1 Sam. xxii. 23, xiv. 1, 2, 12, 15; 2 Sam. xiiii. 14). (2) Alex. (in Samuel) (in 1 Chr. xi. 16), but elsewhere for a column "erected in an enemy's country as a token of conquest, like the stele erected by Sesostris (Her. ii. 102, 106); the LXX. correctly gives ἀνάπτυχον (1 Sam. x. 5); Jonathan broke in pieces a column which the Philistines had erected on their way to field. (1 K. viii. 33. The Syriac, ancl elsewhere means "pillars" placed over a vanquished people (2 Sam. vii. 11, 14; 1 Chr. xviii. 13; 2 Chr. xviii. 2); the presence of a "garrison" in such cases is intended but not expressed in the word (comp. 1 K. iv. 17, 19). (4) Mattithiah (מַדִּיתָא) means a "pillory" in Ez. xxvi. 11, reference is made to the beautiful pillars of the Tyrian temples, some of which attracted the attention of Herodotus (ii. 44).

* There was a garrison at Jerusalem at a later period, variously known as the acropolis or citadel, Baris (Macdonald for over, see Wahl's "Chari Libr.," G. T. Apocyph., xiv.), tower of Antonius (Joseph. Ant. xxv. 11, § 4; B. J. i. 5, § 4), and castle of barracks (Acts xxvii. 34). It was built by the Macedonians and during the Roman occupancy was held by the Roman troops stationed at Jerusalem, or moved thither from Cesarea to prevent riots during the festivals. Its military use appears in its N. E. name, the ναομπολιανον or φως (Acts xxvi. 35, 36). It is especially memorable as having been the home of a remarkable richness and fertility. H.
refuge and prison of the Apostle Paul (Acts xxiii. 10). It stood on a rock or hill at the northwest angle of the temple-area. It had a tower at the southeast corner, which was 70 cubits high and overlooked the whole temple with its courts. At a moment's notice the soldiers in this garrison could descend by flights of stairs into the inclosure below and instantly suppress any tumult there which might be reported to the officer in command (Josephus, B. J. v. 5, § 8). This arrangement explains how the chieftain could interfere with so much promptitude and rescue Paul from the fury of the Jewish mob. It was from the steps which led up into this castle that the Apostle addressed the crowd in the adjacent court (Acts xxii. 3 ff.). The Turkish garrison stands at present very nearly on the site of the ancient fortress. If this garrison (as some suppose) was Platae's prætorium during its visits to Jerusalem, it was then the place where Jesus was arraigned before the Roman tribunal, and whence he was led along the Via Dolorosa to Golgotha.

The A. V. in 2 Cor. xi. 32 speaks of a "garrison" at Damascus as employed to prevent Paul's escape. But the Greek term (ϕηρεάς) states only the fact of the custody, not the means of it: the governor "watched or guarded the city." The watch on this occasion may have belonged to the garrison.

GASMU (גֶּשֶמ): [Comp. Alfd. with 7 MSS. פִּידוּי; VA. פִּידוּי] (Gesen.), Neh. vi. 6. Assumed by all the lexicons to be a variation of the name of Geshem (see vv. 1, 2). The words "and Gasmhu saith" are omitted in both MSS. of the LXX.

GATAM (גַּתָּם) [a valley burnt, Fürst]: גַּתָּם, גַּתְדָּם; Alex. [Gatham, Gathian.] Unter. Gathemet, the fourth son of Eliphaz the son of Esau (Gen. xxxvi. 11: 1 Chr. i. 36), and one of the "dukes" of Eliphaz (Gen. xxxvi. 16). By Knobel (Genesis, ad loc.) the name is compared with Jogash (םִּדוֹגָשׁ), a tribe inhabiting a part of the mountains of Sheba called Hiwath. But in this case the Ain in the original had probably been dropped, which is very rarely the case.

Rüßiger (Gesen. Thes. iii. 80) quotes גָּשֵּׁם as the name of an Arab tribe, referring to Ibn Duraid, 1814, p. 300.

The gates and gateways of eastern cities anciently held, and still hold, an important part, not only in the defense, but in the public economy of the place. They are thus sometimes taken as representing the city itself (Gen. xxii. 17, xxiv. 60; Deut. xii. 12; Judg. v. 8; Ruth iv. 10; Ps. lxxvii. 4, xxiii. 2). Among the special purposes for which they were used may be mentioned: (1.) As places of public resort, either for business, or where people sat to converse and hear news (Gen. xix. 1, xxiii. 10, xxxiv. 20, 24; 1 Sam. iv. 18; 2 Sam. xiv. 2, xviii. 24; Ps. lxxxix. 12; Neh. viii. 1, 3, 16; 2 Sam. xix. 1; 1 K. xxii. 10; Job xxxix. 7; Prov. xxii. 22, xxiv. 7; Jer. xvii. 19, xxviii. 7; Lam. v. 14; Am. v. 12; Zech. viii. 16; 1 Pet. xxv. 31). Hence came the usage of the word "porte" in speaking of the government of Constantinople (Early Trac. p. 349). (5.) Public markets (2 K. vii. 1; comp. Aristoph. Lys. 1243, ed. Bekk.: Neh. xxiii. 16, 19). (CITIES.) In heathen towns the open spaces near the gate appear to have been sometimes used as places for sacrifice (Acts xiv. 13; comp. 2 K. xiii. 8).

GATE.

Assyrian gates. (Layard.)

Egyptian doors. — Fig. 1. The upper pin, on which the door turned. Fig. 2. Lower pin. (Wikitexton.)

closed at nightfall (Deut. iii. 5; Josh. ii. 5, 7; Judg. iv. 10, 44; 1 Sam. xxiii. 7; 2 Sam. xi. 23, Jer. xxxix. 4; Judith i. 4). They contained chambers over the gateway, and probably also chambers or recesses at the sides for the various purposes to
which they were applied (2 Sam. xviii. 24; Layard, 
Nin., p. 67, and note).

The gateways of Assyrian cities were arched or
square-headed entrances in the wall, sometimes
flanked by towers (Layard, Nineved, i. 388, 395,
Nin., p. 231, Mos. of Nin., p. 1; see also Assyrian bas-reliefs in Brit. Mus. Nos. 49,
25, 26). In later Egyptian times the gates of the

The gates of Solomon's Temple were very massive
and costly, being overlaid with gold and carvings
(1 K. vi. 31, 32; 2 K. xvi. 15). Those of the Holy Place were of olive-wood, two-leaved, and
overlaid with gold; those of the temple of the Ark (1 K. vi.
31, 32; Ex. xii. 23, 24). Of the gates of the
outer court of Herod's temple, 9 were covered with
gold and silver, as well as the posts and lintels, but
the outer one, the Beautiful Gate (Acts iii. 2), was
made entirely of Corinthian brass, and was con-
sidered to surpass the others far in costliness.
GATE, BEAUTIFUL

(300. B. J. v. 5, § 3). This gate, which was so heavy as to require 20 men to close it, was unexpectedly found open on one occasion shortly before the close of the siege (Joseph. B. J. vi. 5, § 3; c. Ap. ii. 9).

The figurate gates of pearl and precious stones (Is. liv. 12; Rev. xxi. 21) may be regarded as having their types in the massive stone doors which are found in some of the ancient houses in Syria. These are of single slabs several inches thick, sometimes 10 feet high, and turn on stone pivots above and below (Manudrell, Early Turn, p. 447; Shaw, p. 210; Burekhardt, Syria, pp. 58, 74; Porter, Damascus, ii. 22, 192; Ray, Coll. of Temp. i. 429).

Egyptian doorways were frequently ornamented.

The parts of the doorway were the threshold (ναῦς), the side-posts (στάθμοι: uterque postis), the lintel (ἀψιδή: superlunarium, Ex. xii. 7). It was on the lintel and side-posts that the head of the Passover Lamb was sprinkled (Ex. xii. 7, 22). A trace of some similar practice in Assyrian worship seems to have been discovered at Nineveh (Layard, Nin. ii. 256).

The camp of the Israelis in the desert appears to have been closed by gates (Ex. xxvii. 27).

The word "door" in reference to a tent, expresses the opening made by dispensing with the cloths in front of the tent, which is then supported only by the hinder and middle poles (Gen. xviii. 2; Burekhardt, Notes on Bed. i. 42).

In the Temple, Levites, and in houses of wealthier classes, and in palaces, persons were especially appointed to keep the door (Jer. xxxiv. 4; 2 K. xii. 9, xxv. 18; 1 Chr. ix. 18, 19; Est. ii. 21; 1 Macc. 17: φυλαττόν, portieri, juniores). In the A. V. these are frequently called "porters," a word which has now acquired a different meaning. The chief steward of the household in the palace of the Shah of Persia was called chief of the guardians of the gate (Chardin, vii. 598). [Constant: House; Temple.]

* GATE, BEAUTIFUL, Acts iii. 2. [Temple (of Herod), Cloisters.]

* GATES OF JERUSALEM. [Jerusalem.

GATH (ゲサ, a white press: গাঠ; [1 Sam. v. 8, Vat. गठ, Alex. গহা: vii. 14, আঘাঘা: xvii. 52], Alex. Πατ: 1 Chr. vii. 21, Alex. Παθ: Joseph. Γεθα: Γεθα, one of the five royal cities of the Philistines (Josh. xiii. 3: 1 Sam. vi. 17); and the native place of the giant Goliath (1 Sam. xviii. 4, 29). The site of Gath has for many centuries remained unknown. The writer of this article made a tour through Philistia in 1857, one special object of which was to search for the long lost city. After a careful survey of the country, and a minute examination of the several passages of Scripture in which the name is mentioned, he came to the conclusion that it stood upon the conspicuous hill now called Tell-es-Sijedh. This hill stands upon the side of the plain of Philistia, at the foot of the mountains of Judah; 10 miles N. of Ashdod, and about the same distance S. by E. of Ekron. It is irregular in form, and about 200 feet high. On the top are the foundations of an old castle; and great numbers of hewn stones are built up in the walls of the terraces that run along the declivities. On the N. E. is a projecting zucdeder whose sides appear to have been scarped. Here, too, are traces of ancient buildings; and here stands the modern village, extending along the whole northern face of the hill. In the walls of the houses are many old stones, and at its western extremity two columns still remain on their pedestals. Round the sides of the hill, especially on the S., are large rock-cut cisterns enclosed in the rock, and Gath occupied a strong position (2 Chr. xi. 8) on the border of Judah and Philistia (1 Sam. xxi. 10: 1 Chr. xvi. 1); and from its strength and resources, forming the key of both countries, it was the scene of frequent struggles, and was often captured and recaptured (2 Chr. xi. 8, xxvi. 6; 2 K. xii. 17; Am. vi. 2). It was near Shechem and Adullam (2 Chr. xi. 8), and it appears to have stood on the way leading from the former to Ekron: for when the Philistines fell on the death of Goliath, they went "by the way of Shunaim, even unto Gath and unto Ekron" (1 Sam. xii. 1, 52). All these notices combine in pointing to Tell-es-Sijedh as the site of Gath. The statements of most of the early geographers as to the position of Gath are not only confused, but contradictory, probably owing to the fact that there was more than one place of the same name. But there is one very clear description by Eusebius, translated without change or comment by Jerome.

It is as follows: "Gath, from which the Anakim and Philistines were not exterminated, is a village seen by such as go from Eleutheropolis to Dysopolis, at about the fifth milestone." — κατα παρακοπον ἀπὸ τῆς Ἐλευθερόπολεως πετάσαντων περὶ πέντε μισθῶν τῆς Ἐλευθερόπολεως (Oono. s. v. Γεθα). The road from Eleutheropolis, now Belt Jebel, to Dysopolis or Lydda, must have passed near Tell-es-Sijedh, which would be distinctly seen at some distance from the spot indicated. Eusebius mentions another Gath (Oono. s. v. Γεθα), a large village between Antiptarides and Jamnia, which he considered to be that to which the Ark was carried (1 Sam. v. 8), but this position, on the western side of the plain of Philistia, does not agree with the descriptions above referred to. Jerome, who, as stated above, translates Eusebius' former notice without change or comment, gives a perplexing statement in his Comm. on Micah: "Gath una est de multis quae in universa Judæen, quae sunt in fine et de Eleutheropolis cum ambitus Gacim, numque visus val maximus." Yet in his preface to Onah, he says that Geth in Opiter, the native place of the prophet, is to be distinguished: "Albarum Geth urbium qua juxta Eleutheropolim sive Dysopolim hodie quaque monstruantur." On the whole there is nothing in these notices to contradict the direct statement of Eusebius, and we may therefore, safely conclude that Tell-es-Sijedh is its site.

The ravages of war to which Gath was exposed appear to have destroyed it at a comparatively early period, as it is not mentioned among the other royal cities by the later prophets (Zeph. ii. 4; Zech. ix. 5, 6). It is familiar to the Bible student as the scene of one of the most romantic incidents in the life of king David (1 Sam. xxvi. 10-15), when to save his life he feigned himself mad, scribbled on the doors of the gate, and let his wife fall down upon his beard. A few years later he returned to the city, was well received by the Philistine king, and had Ziklag assigned to him as a residence. He then secured some firm friends among his hereditary foes, who were true to him when his
GATH-HEPHER

The secret of this unbroken history is to be found in the situation of Gaza. It is the last town in the S. of Palestine, on the frontier towards Egypt. Ἐχθρὴς ἡ λέγεται εἰς Ἀιγύπτιον δέντρα τῆς φυλακῆς ἡ πόλις ἐρήμου (Arrian, Ἑρ. Ἀλκ. ii. 26). It lay on the road which must always have been the line of communication between the valley of the Nile and the whole region of Syria. Even now its bazaars are better than those of Jerusalem. "Those travelling towards Egypt naturally lay in here a stock of provisions and necessaries for the desert; while those coming from Egypt arrive at Gaza exhausted, and must of course supply themselves anew" (Robinson, ii. 40).

The same peculiarity of situation has made Gaza important in the military sense. Its name means "the strong;" and this was well elucidated in its siege by Alexander the Great, which, notwithstanding all his resources of artillery, lasted five months. As Van de Velde says (p. 187), it was the key of the country. What had happened in the times of the Pharaohs (Jer. xvii. 1) and Canaans (I Sam. iii. 11) happened again in the struggles between the Ptolemies and Seleucids (Polyb. v. 68, xvi. 40). This city was one of the most important military positions in the wars of the Macedoeeans (see 1 Macc. xi. 61, 12, xvi. 43; Joseph. Ant. xiii. 5, § 5, and 13, § 3). By the Romans it was assigned to the kingdom of Herod (xx. 7, § 3), and after his death to the province of Syria (xvii. 11, § 4). Nor does the history of Gaza in connection with war end here. In A. D. 634 it was taken by the generals of the first Khalif Abu Bekr, though he did not live to hear of the victory. Some of the most important campaigns of the crusaders took place in the neighborhood. In the 12th century we find the place garrisoned by the Knights Templars. It finally fell into the hands of Saladin, A. D. 1170 after the disastrous battle of Hattin.

The Biblical history of Gaza may be traced through the following stages:—In Gen. x. 19 it appears, even before the call of Abraham, as a "border" city of the Canaanites. With this we should compare the descriptive words in Deut. ii. 25, where the name is spelt "Azzah" in the English Version. [AZZAH.] In the conquest of Joshua the territory of Gaza is mentioned as one which he was not able to subdue (Josh. x. 41, xi. 22, xii. 3). It was assigned to the tribe of Judah (Josh. xvi. 34), and that tribe did obtain possession of it (Judg. i. 18); but they did not hold it long; for soon afterwards we find it in the hands of the Philistines (Judg. iii. 3, xiii. 1, xvi. 1, 21); indeed it seems to have been their capital; and notwithstanding the gigantic efforts of Samson, who died here, Gaza apparently continued through the times of Samuel, Saul, and David to be a Philistine city (I Sam. vi. 17, xiv. 52, xvii. 1; 2 Sam. xi. 25; xv. 1). Solomon became master of "Azzah" (1 K. iv. 21).
But in after times the same trouble with the Philistines recurred (2 Chr. xxi. 16, xxvi. 6, xxviii. 18). In these passages, indeed, Gaza is not specified, but there is little doubt that it is implied. In 2 K. xviii. 8, we are distinctly told that Hezekiah "smote the Philistines even unto Gaza, and the borders thereof, from the tower of the watchmen to the fenced city." During this period of Jewish history, it seems that some facts concerning the connection of Gaza with the invasion of Sennacherib may be added from the inscriptions found at Nineveh (Layard’s *Nineveh and Babylon*, p. 144). We ought here to compare certain passages in the prophets where the name of the Philistine city occurs: namely, Am. i. 6, 7; Zeph. ii. 4; Zech. ix. 5. The period intermediate between the Old and New Testaments has been touched on above.

The passage where Gaza is mentioned in the N. T. (Acts viii. 20) is full of interest. It is the account of the baptism of the Ethiopian eunuch. The words in this passage: “Arise and go towards the south, unto the way that goeth down from Jerusalem to Gaza, which is desert” (παρείπε κατά κυριομενον, ἐπὶ τὴν ἄνω τοῖν καταδύομενον ἀπὸ Ιερουσαλημίας εἰς Γαζὰν αὕτη ἐστὶν ἔγονος), have given rise to much discussion. It is doubted, in the first place, whether they are to be attributed to the angel to the narrator. The solution of this doubt depends partly on another question, namely, whether ἔγονος is to be referred to the road or the city. If to the latter, the remark will naturally be understood as St. Luke’s; and we may suppose that he wrote the passage just after the beginning of the Jewish war (A.D. 65), when Gaza was actually desolated (Joseph. B. J. ii. 18, § 15). Others would refer us to a passage of Strabo, where he says that the town was ἔγονος after it was taken by Alexander, but the text of Strabo in this place is doubtful: and it is evident (see above) that the statement cannot be literally true. Pompeius Meges species of Gaza as "ingenia urbs et munia admodum,"

and it is prominently noticed in Pliny. Some suppose (as Jerome) that the site of Gaza was changed; and this may possibly be true: for Strabo says that it was only seven stadia from the sea, whereas it is now considerably more: and the encroachment of the drifting sand near the coast may have been a motive for the restorers of the city to move it further eastwards. The probability, however, is that the words ἔγονος ἐκτὸς ἔγονος refer to the road, and are used by the agent to inform Philip, who was then in Samaria, on what route he would find the eunuch. Besides the ordinary road from Jerusalem by Randel to Gaza, there was another, more favorable for carriages (Acts viii. 28), further to the south, through Hebron, and thence through a district comparatively without towns and much exposed to the incursions of people from the desert. The matter is discussed by Rummel in one of his *Beiträge*, incorporated in the last edition of his *Palästina*, also by Robinson in the Appendix to his second volume. The latter writer suggests a very probable place for the baptism, namely, at the water in the *Holy-land*, between Eleuthopolis and Gaza, not far from the old sites of Lachish and Ezion. The legendary scene of the baptism is at *Beth-sheer*, between Jerusalem and Hebron: the tradition having arisen apparently from the opinion that Philip himself was travelling southwards from Jerusalem. But there is no need to suppose that he went to Jerusalem at all. Lange (Apost. Zeitalt. ii. 190) gives a spiritual sense to the word ἔγονος. [See BETH-ZUR, AMER. ed.]

The modern Ghozeh is situated partly on an oblong hill of moderate height, and partly on the lower ground. The climate of the place is almost tropical, but it has deep wells of excellent water
There are a few palm-trees in the town, and its fruit-orchards are very productive. But the chief feature of the neighbourhood is the wide-spread olive-grove to the N. and E. Hence arises a considerable manufacture of soap, which Gazezeh exports in large quantities. [Astrus, Amer. ed.] It has also a trade in corn. For a full account of nearly all that has been written concerning the topographical and historical relations of Gaza, see Ritter's *Erkundige*, v. 45-60. Among the travellers who have described the place we may mention especially Robinson (Biblical Researches), ii. 34-43; and Van de Velde (*Syria and Palæstina*), ii. 172-188, from whom we have already quoted; also Thomson (*Land and Book*), iii. 331-343. The last writer speaks of the great extent of corn-land near Gaza, and of the sound of military in the town. Both these circumstances are valuable illustrations of the arts and sufferings of Samson, the great hero of Gaza. (On the site and ruins of Gaza, see also Porter's *Handb. of Syria and Palæstina*, i. 262 ff.; Sepp's *Israeliten u. das religions*, Landt, ii. 522 ff; and Gage's *Trans. of Ritter's Geogr. of Palestine*, iii. 265 ff. — J. S. H.)

**GAZARA** (גזרה, và Gazâra; [in 1 Mac, xiv. 28, 35. Alex. *Gaçárapa (gen.)*; Gazara], a place frequently mentioned in the wars of the Macabees, and of great importance in the operations of both parties. Its first introduction is as a stronghold (*oyezupea*), in which Timotheus took refuge after his defeat by Judas, and which for four days resisted the efforts of the infatuated Jews (2 Mac, x. 32-36). One of the first steps of Barchides, after getting possession of Judaea, was to fortify Bethsura and Gaza and the citadel (*dziga*) at Jerusalem (1 Mac, iv. 52); and the same names are mentioned when Simon in his turn recovered the country (xiv. 7, 35, 36, xxv. 28). So important was it, that Simon made it the residence of his son John as general-in-chief of the Jewish army (xiii. 34, xvi. 1).

There is a very strong belief to believe that Gazer was the same place as the more ancient Ga'zer or Gazarah. The name is the same as that which the LXX. use for Gezer in the O. T.; and more than this, the indications of the position of both are very much in accordance. As David smote the Philistines from Gibeaon to Gezer, so Judas defeats Gorgias at Emmanuel, and pursues him to Gezer (1 Mac, iv. 15). Gazara also is constantly mentioned in connection with the same coast — Joppa and Jerusalem (xx. 28, 35; iv. 15); and with the Philistine plain, Azotus, Abela, &c. (iv. 15, viii. 45, xiv. 34). [GAZERA].

**GAZATHTITES.** The *ẓaḥtite*, occurr. the 2 Axaltite: *ẓaḥaṭaṭe; Gezev, Josh. xiii. 3; the inhabitants of GAZA. Elsewhere the same name is rendered GAZETERS in the A. V.

**GAZER** (גזר; [jlicly, proun.]: *PaçIPA; Gezer; *Gezer*), in 1 Chr. xiv. 17; 2 Sam. v. 25; 1 Chr. xiv. 16. The same place as GAZER; the difference arising from the emphatic Hebrew seannot, which has been here rendered in the A. V., though disregarded in several other places where the same word occurs. [GAZER]. From the end of the LXX, both in the O. T. and the books of Macabees, David infers that the original form of the name was Gazer; but the punctuation of the Masorets is certainly as often the one as the other. (Ewald, *Gesch. S. 427 note.)

**GAZERA.** 1. (râ Gaçárapa: Alex. *Gaçárapa; Joseph: râ Gaçárapa: Gezer, Gezera*), 1 Mac. iv. 15, vii. 45. The place elsewhere given as GAZA.

2. [Kazárap: Ab. Alex. *Gaçárapa; Gezer*], one of the "servants of the temple," whose sons returned with Zondahel (1 Esdr. v. 31). In Ezra and Nehem. the name is GAZAZAM.

**GAZAH** [ם poor]: δ *Gaçárapa; [Comp. Gaz*], a name which occurs twice in 1 Chr. ii. 46 (1) as son of Caleb by Ephah his concubine; and (2) as son of Haran, the son of the same woman: the second is possibly only a repetition of the first. At any rate there is no necessity for the assumption of Houbigant, that the second Gazer is an error for Judah. In some MSS. and the Peshito the name is given Gazen. The Yat. LXX omits the second occurrence.

**GAZITES.** THE: *ゾ[チ]: roš *Gaçárapa: Philistiam*, inhabitants of Gaza (Judg. xvi. 2). Elsewhere given as GAZITIES.

**GAZAM** [ם poor]: ז *Gaçárapa; Gezer (Gezam)*. The Bene-Gazaean were among the families of the Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 48; Neh. vii. 51). In 1 Esdr. [v. 31] the name is altered to GAZERA.

**GEBA** (גבע, often with the definite article as the kill: *Gaçárapa*). In this: Geba, *Geber*, a city of Benjamin, with the "suburbs," allotted to the priests (Josh. xix. 17; 1 Chr. vi. 69). It is named amongst the first group of the Benjamite towns, apparently those lying near to and along the north boundary (Josh. xviii. 24). Here the name is given GABA, a change due to the emphasis required in Hebrew before a pause; and the same change occurs in Ezr. ii. 29; Neh. vii. 30 and xi. 31; 2 Sam. v. 25; 2 K. xxii. 8; the last three of these being in the A. V. Geba. In one place Geba is used as the northern landmark of the kingdom of Judah and Benjamin, in the expression "from G. to Beer-sheba" (2 K. xxii. 8); and also as an eastern limit in opposition to Gazer (2 Sam. v. 25). In the parallel passage to this last, in 1 Chr. xiv. 16, the name is changed to Gibea. During the wars of the earlier part of the reign of Saul, Geba was held as a garrison by the Philistines (1 Sam. xiii. 3), but they were ejected by Jonathan, a feat which, while it added greatly to his renown, exaggerated them to a more overwhelming invasion. Later in the same campaign we find it referred to as the position of the two rocks which stood in the ravine below the garrison of Michmash, in terms which fix Geba on the south of Michmash on the north of the ravine (1 Sam. iv. 8; the A. V. has here Gibeah). Exactly in accordance with this is the position of the modern village of Jebel, which stands picturesquely on the top of its steep terraced hill, on the very edge of the great "Holy Fountaing", looking northwards to the opposite village, which also retains its old name of Michmash. The names, and the agreement of the situation with the requirements of the story of Jonathan, make the identification all but certain; but it is still further confirmed by the invaluable list of Benjamite towns visited by the Assyrian army on their road through the country southward.
to Jerusalem, which we have in Is. x. 28-32; where the minute details — the stoppage of the heavy baggage (A. V., "carriages"), which could not be got across the broken ground of the wadies — indicate that the passage of the ravine by the lighter portion of the army, and the subsequent bivouac ("belging," בּלָגֶה = rest for the night) at Geba on the opposite side — are in exact accordance with the nature of the spot. Standing as it does on the north bank of this important wadi — one of the most striking natural features of this part of the country — the mention of Geba as the northern boundary of the lower kingdom is very significant. Thus commanding the pass, its fortification by Axa (1 K. xv. 22; 2 Chr. xvi. 6) is also quite intelligible. It continues to be named with Michmas to the very last (Neh. xi. 31).

Geba is probably intended by the "Gilbeh-in-the-field" of Judg. xx. 31, to which its position is very applicable. [GEBAH, 6.] The "fields" are mentioned again as late as Neh. xii. 39.

It remains to notice a few places in which, from the similarity of the two names, or possibly from some provincial usage, "Geba" is used for "Gibeah." These are: (1.) Judg. xx. 10: here the A. V. probably anxious to prevent confusion, has "Gibeah;" (2.) Judg. xx. 39: "the meadows," or more probably "the cars of Geba." Geba may be here intended, but Gibeah — as in the A. V. — seems almost necessary. Owing to the word occurring here at a pause the vowels are lengthened, and in the Hebrew it stands as Giba. (3.) 1 Sam. xii. 16: here the meaning is evident, and the A. V. has again altered the name accordingly. Josephus (Ant. vi. 6, § 2) has "Gibazav, Gibea;" in this place; for which perhaps compare 1 Chr. xxvii. 15, 26, 35.

2. The Geba (בּגָּבָא; Alex. Taβαβ; [Sin. Taβαβ; Comp. Γαβα; Ahd. Taβαβ]) named in Jud. iii. 10, where Holonensis is said to have made his encampment — between Geba and Seythropolis — must be the same place, Babel, on the road between Samaria and Jenin, about three miles from the former (Rob. i. 440). The Vulgate has a remarkable variation here — "venit ad flumina in terram Gabaon." [GEBAH, 6, 10.]

GEBAL (גֵּבֶל), Gebal, from גָּבֶל, Gabal, to twist; hence גָּבֵל, Gabel, a line; hence גַּבֵּל, Gebal, a line of mountains as a natural boundary: [in Ps.].] תֵּבָא; [Vat. Sin. נבָא; Gebal; [in Ec., בֵּיבָא; Gibel]], a proper name, occurring in Ps. lxx. viii. 7 (Vulg. lxxviiii.) in connection with Edom and Moab, Ammon and Amalek, the Philistines and the inhabitants of Tyre. The mention of Assur, or the Assyrian, in the next verse is with reason supposed to refer the date of the composition to the latter days of the Jewish kingdom. It is insinuated, moreover, with the name of Asaph. Now in 2 Chr. xx. 14 it is one of the sons or descendants of Asaph, Jahaziel, who is inspired to encourage Jehoshaphat and his people, when threatened with invasion by the Moabites, Ammonites, and others from beyond the sea, and from Syria (as the LXX. and Vulg.: it is unnecessary here to go into the obscurities and varieties of the Hebrew, Syrian, and Arabic versions). It is impossible, therefore, not to recognize the connection between this psalm and these events: and hence the contexts both of the psalm and of the historical records justify our supposing the Gebal of the psalm to be one and the same with the Gebal of Ezekiel (xxvii. 9), a maritime town of Phoenicia and not another, as some have supposed, in the district round about Petra, which is by Josephus, Ensheba, and St. Jerome called Gebalene. Jehoshaphat had, in the beginning of his reign, humbled the Philistines and Arabians (2 Chr. xvii. 10-11), and still more recently had assisted Ahab against the Syrians (ibid. ch. xxviii.). Now, according to the poet’s language of the Psalmist, there were symptoms of a general rising against him. On the south the Edonites, Ishmaelites, and Haga- renes; on the southeast Moab, and northeast Ammon. Along the whole line of the western coast (and, with Jehoshaphat’s maritime projects, this would naturally disturb him most, see 2 Chr. xxviii. 19) the Amalekites, Philistines, and Phoenicians, or inhabitants of Tyre, to their frontier town Gebal, with Assur, i.e. the Syrians, or Assyrians, from the more distant north. It may be observed that the Ashurites are mentioned in connection with Gebal no less in the prophecy (ver. 6) than in the psalm. But, again, the Gebal of Ezekiel was evidently no mean city. From the fact that its inhabitants are written "Gibians" in the Vulg. and "Bibilis" in the LXX., we may infer their identity with the Giblites, spoken of in connection with Lebanon by Joshua (xxii. 5), and that of their city with the "Biblica" (or Byblis) of profane literature — so extensive that it gave name to the surrounding district. (See a passage from Lucian, quoted by Eusebius, Pheiiest. lib. i. c. xii. p. 238.) It was situated on the frontiers of Phoenicia, somewhat to the north of the mouth of the small river Adonis, so celebrated in mythology (comp. Ez. viii. 13). Meanwhile the Giblites, or Gibilians, seem to have been prevalent in the arts of stone-cutting (1 K. x. 18) and ship-building (Ez. xxvii. 9): but, according to Strabo, their industry suffered greatly from the robbers infesting the sides of Mount Lebanon. Pompey not only destroyed the strongholds from whence these pests issued, but freed the city from a tyrant (Strab. xvi. 2, 18). Some have confounded Gebal, or Biblans, with the Gegaba of Strabo, just below Laodicea, and consequently many leagues to the north, the ruins and site of a well called Gabal, are improperly described by Mannmell (Early Travel in Palas- tina, by Wright, p. 494). By Monani (Dioec. Egy. Eccles.) they are accurately distinguished under their respective names. Finally, Biblans became a Christian see in the patriarcate of Antioch, subject to the metropolitan see of Tyre (Eulapius’ Pheiiest. lib. i. p. 214 ff.). It shared the usual vi- cissitudes of Christianity in these parts; and even now furnishes episcopacy with a title. It is called Jebel by the Arabs, thus reviving the old Biblical name.

E. S. Ff.

GEBER (גֶּבֶר [men, hero]), a name occurring twice in the list of Solomon’s commissariat officers, and there only. 1. (םבְּש; [Vat. Alex. גַּבְּש; Bengeber,] The son of Geber (Ben- Geber) resided in the fortress of Ramoth-Gilead and had charge of Hareth-Ifin, and the district of Argob (1 K. xvi. 13). Josephus (Ant. viii. 2, § 3) gives the name as טַבָּגֶה.

2. (םבְּש; [Vat. M. omits: Geber.] Geber, the son of Uri had a district south of the former —

a As with us, Berkshire for Berkshire, Darby for Darby, &c.
the "land of Gilgal," the country originally possessed by Silon and Og, probably the modern Geelka, the great pasture-ground of the tribes east of Jordan (1 K. iv. 19). The conclusion of this verse as rendered in the A. V. is very unsatisfactory,—"and he was the only officer which was in the land," when both others are mentioned in 13 and 14. A more accurate interpretation is, "and one other officer who was in the land," that is, a superior (🗒🗒🗒🗒), a word of rare occurrence, but used again for Solomon's "officers" in 2 Chr. viii. 19) over the three. Josephus has εἰς τὸ διὸ τῶν εἰς πάλαν ἐπήλθονα, the πάλαν referring to a similar statement just before that there was also one general superintendent over the commissaries of the whole of Upper Palestine. G.

GEDIM (🗒🗒🗒🗒), with the article as probably the dudās [vulgar, spring]. [First]: the word is used in that sense in 2 K. iii. 16, and elsewhere; (גיטא) [gobim], a village north of Jerusalem, in the neighborhood of the main road, and apparently between Anathoth (the modern ˁAnūt) and the ridge on which Nob was situated, and from which the first view of the city is obtained. It is named nowhere but in the enumeration by Josiah of the towns whose inhabitants fled at Sennacherib's approach (x. 31). Judging by those the situation of which is known to us, the enumeration is so orderly that it is impossible to entertain the conjecture of either Eusebius (Onom. Gedin), who places it at Gela, five miles north of Gophna; or of Schwarz (p. 131), who would have it identical with Gol or Gezer: the former being at least 10 miles north, and the latter 20 miles west, of its probable position. "El-I larayk occupies about the right spot. G.

GEDALIAH (ג"ד), and ג"ד, i. e., Gedaliya [Jehovah is gracious]; ג"דלייר: Gedaliya, 1. Gedaliah, the son of Ahikam (Jerem. xxvi. 21), and grandson of Shaphan the secretary of King Josiah. After the destruction of the Temple, b. c. 588, Nebuchadnezzar departed from Judaea, leaving Gedaliah with a Chaldean guard (Jer. xli. 5) at Mizpah, a strong (1 K. xx. 22) town, six miles N. of Jerusalem, to govern, as a tributary (Joseph. Ant. x. 9, § 11) of the king of Babylon, the vine-dressers and husbandmen (Jer. iii. 16) who were exempted from captivity. Jeremiah joined Gedaliah; and Mizpah became the resort of Jews from various quarters (Jer. xli. 6, 11), many of whom, as might be expected at the end of a long war, were in a demoralized state, unrestrained by religion, patriotism, or prudence. The gentle and popular character of Gedaliah (Jer. xl. 16, § 1, 4, 6) and his treatment of the Jewish exiles (Rosenmuller in Jer. xxvi. 21), the prosperity of his brief rule (Jer. xli. 12), the reverence which revived and was fostered under him for the ruined Temple (xli. 5), fear of the Chaldean conquerors whose officer he was,—all proved insufficient to secure Gedaliah from the foreign jealousy of Hananiah, who became, as a member of the royal family of Judah (Joseph. Ant. x. 9, § 2), a Ishmael, 4. Gedaliah, generally refus-

GEDEON (ג"ד), with the article as probably the sheep (.ג"ד, ג"ד, i. e., Ge'den). Ge'den, a town of Judah in the Shefelah or lowland country (Josh. xv. 36), apparently, from the near vicinity of Azekah, Socho, &c., in its eastern part, near the "valley of the Tercehith." [Ezra. xxiv. 21]. This position agrees perfectly with that assigned by Eusebius (thommasan.) to "Ge'don," which he says was in his time a very large village 10 miles from Hasperopolis, on the road to Diospolis (Lydda); and also with another which he gives as Gidora, in the boundaries of Jerusalem (Elija), near the Tercehith. No town bearing this name has however been yet discovered in this hitherto little explored district. The name (if the interpretation given be correct), and the occurrence next to it of one so similar as Ge'dashaim, seem to point to a great deal of sheep-breeding in this part. G.

GEDEON (ג"ד), with the article as probably the sheep (ג"ד, ג"ד, i. e., Ge'den). Ge'den, a town of Judah in the Shefelah or lowland country (Josh. xv. 36), apparently, from the near vicinity of Azekah, Socho, &c., in its eastern part, near the "valley of the Tercehith." [Ezra. xxiv. 21]. GEDEER THE

GEHENNA

GEHENNA [Greek representative of וְגוֹלָהּ, Josh. xv. 8, Neh. xi. 30 (rendered by LXX. Parévra, Josh. xviii. 10; more fully גֶּהֶנְנָה́), or גֶּהֶנְנָה́, 2 K. xxiii. 10, 2 Chr. xxviii. 3, xxix. 6, Jer. xix. 2, the "valley of Hinnom," or of the son, or "children of Hinnom," A. V.; or "the valley of the son of Hinnom," B. H. and D.], a deep gorge or cleft to the south of Jerusalem, where, after the introduction of the worship of the fire-gods by Abaz, the idolatrous Jews offered their children to Molech (2 Chr. xxviii. 3, xxix. 6; Jer. vii. 31, xiv. 2-6). In consequence of these abominations the valley was polluted by Josiah (2 K. xxiii. 10); subsequently to which it became the common iny-stall of the city, where the dead bodies of criminals, and the carcasses of animals, and every other kind of filth was cast, and, according to late and somewhat questionable authorities, the combustible portions consumed with fire. From the depth and narrowness of the gorge, and, perhaps, its ever-burning fires, as well as from its being the receptacle of all sorts of putrefying matter, and all that defiled the holy city, it became in later times the image of the place of everlasting punishment, "where their worm dieth not, and the fire is not quenched," in which the Talmudists placed the mouth of hell: "There are two palm-trees in the V. of H., between which a smoke ariseth . . . and this is the door of Gehenna." (Talmud, quoted by Barclay, City of Great King, p. 90; Lightfoot, Centur. Chorograph. Matt. Proc. ii. 200.)
GEHENNA

In this sense the word is used by our blessed Lord, Matt. v. 29, 30, x. 28, xviii. 15, 33; Mark ix. 44, 45; Luke xii. 5; and with the addition του χαιρετους, Matt. v. 22, xiii. 9; Mark ix. 47; and by St. James, iii. 6. [HELW; HINNOM, VALLEY OF; VINTH.] E. V.

There is a remarkable passage in the book of Enoch which deserves notice here, as it supplies the earliest example in Jewish writings of the representation of Gehenna or the Valley of Hinnom as a place of punishment for the wicked. The valley is not named in the passage referred to, but it is so unambiguously described in connection with Jerusalem and Mount Zion that its identity is unmistakable. After the description, the passage continues thus:—

"Then I said: What means this blessed land which is full of trees, and this accused valley in the midst?" Then Uriel, one of the holy angels with me, answered and said:—This accused valley is for those who shall be accursed to eternity: here must assemble all those who utter with their mouths unseemly speeches against God, and blaspheme his glory; here they are to be gathered, and this is the place of their punishment. And in the last times will the spectacle be given to the righteous of a just judgment on these for ever and ever: for those who have found mercy will praise the Lord of glory, the eternal King." [Ewald, c. 27; Dillmann, 26, Laurence.]

"This," remarks a writer in the National Review (xxiii. 563, 564), "is the earliest expression of the Jewish belief respecting the scene and mode of the Messianic crisis. The Judgment, it is plain, was to take place near Jerusalem: and while the temple hill was to be the citadel of reward to the pious, the punishment of the wicked, in order to be within sight [comp. Is. livi. 21], would take place in the valley of Hinnom below. This spot, it is quite evident, is not figuratively referred to, as furnishing merely a name and symbol for the invisible penalties of another world, but literally designated as their real topographical seat: precisely as the neighboring hills are taken to be the proper metropolis of the elect. Both physical and historical causes inclined the Jewish imagination to select the geographical valley for the fatal purpose. Stretching towards the volcanic district to the south, it is said to have emitted at times a smoke which betrayed subterranean fires, and which would receive from the Jew the same plain interpretation that his Scriptures had already put on the conceptions of the Aδιαφιλτη λυσις. And at the frequent scene of the rites of Moloch, it was associated with many horrors, and had received the curse of the prophets [comp. 2 K. xxii. 16; Jer. vii. 31-33; xxii. 25; xxxiv. 15, 23]."

For a fuller illustration of the subject, see Dillmann's note Das Buch H., pp. 131, 132, and comp. Ewald, ec. xxv. 26, 27, liv. 1, 2, liv. 3, 4 (for xxxiv. 34-37, liv. 1, 2, liv. 7, 8; in Laurence's translation). The conception of the writer appears to have been, that at the time of the Messianic judgment the wicked would be gathered in the Valley of Hinnom in the presence of the righteous, but the city would open, as in the case of the followers of Korah (Num. xvi. 30), and receive them into the fiery lake beneath. From this conception of the "accursed valley" as the gate of hell, the transfer of the name Gehenna to the place of punishment itself [comp. the Latin Juvencus] was easy and natural. Jodinon is the current Arabical name for hell, as Gehinnom is in the Farman and the Talman (see Bux. Lex. Tal. 205, and Lightfoot and Westein on Matt. v. 22). See also Jeremiaiah, VALLEY OF; A.

GELILOTH (גֵּלְלוֹת [circle, circuit]) = Ταλαϊδα: Alex. Αγαλαϊδα, as if the definite article had been originally prefixed to the Hebrew word: ad tammud, a place named among the marks of the south boundary line of the tribe of Benjamin (Josh. xviii. 17). The boundary went from En-sheshem towards Geliloth, which was "over against." (גֵּלְלוֹת) the ascents of Adamum. It is the description of the north boundary of Judah, which was identical at this part with the south of Benjamin, we find Gilgal substituted for Geliloth, with the same specification as "over against." (גֵּלְלוֹת) the ascent of Adamum (Josh. xv. 7). The name Geliloth never occurs again in this locality, and it therefore seems probable that Gilgal is the right reading. Many glimpses of the Jordan valley are obtained through the hills in the latter part of the descent from Ovdat to Jericho, along which the boundary in question appears to have run: it is very possible that from the ascent of Adamum, Gilgal appeared through the gaps of the distances, "over against," the spectator, and thus furnished a point by which to indicate the direction of the line at that part.

But though Geliloth does not again appear in the A. V., it is found in the original bearing a peculiar topographical sense. The following extract from the Appendix to Professor Stanley's S. O. P. (1st ed.) § 13, contains all that can be said on the point:—"This word is derived from a root גלל, 'to roll' (Gesen. Thes. p. 287 b.). Of the five times in which it occurs in Scripture, two are in the general sense of boundary or border: Josh. xvii. 2, 'All the borders of the Philistines' (םילול; Josh. iv. 3, 'All the coasts of Palestine' (תאַיָּלָא אַנְדֹּסֲאָו; and three specially relate to the course of the Jordan: Josh. xxii. 10, 11, 'The borders of Jordan' (תאַיָּלָא תַּוּר גְּלֶדֶשׁ; Ez. xlv. 8, 'The east country' (םיָטי תואַיָּלָא). It has been pointed out in ch. vii. p. 278 note, that this word is analogous to the Scotch term 'links,' which has both the meanings of Geliloth, being usual of the shore-like windings of a stream, as well as of the line of meaning of a coast or shore. Thus Geliloth is distinguished from Gecour, which will rather mean the circle of vegetation or dwelling gathered round the banks and reaches of the river.

It will not be overlooked that the place Geliloth, noticed above, is in the neighborhood of the Jordan.

G.

GEMAL'LI (גֶּמַלְלִי [camel-lord or camelkeeper]) = Παουαίας: [Vat. Γαουαία: Gemalii,] the father of Ameel, who was the 'ruke' (Νύξι) of Dan, chosen to represent that tribe among the spies who explored the land of Canaan (Num. xiii. 12).}

GEMARIAH (גֵּמָרְיָה [Jewed repute]) = Γαουαίας: [Vat. Γαουαία: Gemarius,] 1. Son of Shaphan the scribe, and father of Mi-
chelah. He was one of the nobles of Judah, and had a chamber in the house of the Lord, from which (or from a window in which, Prideaux, Mi-
chelah's Baruch read Jeremiah's alarming prophecy in the ears of all the people, v. c. 100 (Jer. xxxvi. 10-12, 25)]. Gemariah with the other princes

880

GEMARIAH
heard the Divine message with terror but without a sign of repentance; though Gemarjah joined two others in attempting King Jehoklim to forbear destroying the royal which they had taken from Baruch.

2. Son of Hilkiah, being sent by C. 597 by king Zedekiah on an embassy to Nebuchadnezzar at Babylon, was made the bearer of Jeremiah’s letter to the captive Jews (Jer. xxix.).

GEMMS. [STONES, PRECIOUS.]

GENEALOGY (Γenealōgia), literally the act or art of the γενεαλόγος, i. e. of him who treats of birth and family, and reckons descents and generations. Hence by an easy transition it is often (like ἱστορία) used of the document itself in which such series of generations is set down. In Hebrew the term for a genealogy or pedigree is יְשָׁבָה יְשָׁבָה, and γενεαλογία γενεαλογία, “the book of the generations;” and because the oldest histories were usually drawn up on a genealogical basis, the expression often extended to the whole history, as is the case with the Gospel of St. Matthew, where “the book of the generation of Jesus Christ,” includes the whole history contained in that Gospel. So Gen. ii. 4. “These are the generations of the heavens and of the earth,” seems to be the title of the history which follows. Gen. v. 1, vi. 9, x. 1, xi. 10, 27, xxv. 12, 19, xxxvi. 1. 9, xxxvii. 2, are other examples of the same usage, and these passages seem to mark the existence of separate histories from which the book of Genesis was compiled. Nor is this genealogical form of history peculiar to the Hebrews, or the Semitic races. The earliest Greek histories were also genealogies. Thus the histories of Aeschylus of Argos and of Herodotus of Miletus were entitled Γενεαλόγια, and the fragments remaining of Xenophon, Charon of Lampsacus, and Hellanicus, are strongly tinged with the same genealogical element, which is not lost even in the pages of Herodotus. The frequent use of the patronymic in Greek, the stories of particular races, as Heraclei, Alcmenei, &c., the lists of priests, and kings, and conquerors at the Games, preserved at Elis, Sparta, Olympia, and elsewhere; the hereditary monarchies and priesthoods, as of the Branchidae, Eumolpidae, &c., in so many cities in Greece and Greek Asia; the division, as old as Homer, into tribes, οικείων, and γένεσις, and the existence of the tribe, the gens, and the familia among the Romans; the Celtic clans, the Saxon families using a common patronymic, and their royal genealogies running back to the Teutonic gods, these are among the many instances that may be cited to prove the strong family and genealogical instinct of the ancient world. Coming nearer to the Israelites, it will be enough to allude to the hereditary principle, and the vast genealogical records of the Egyptians, as regards their kings and priests, and to the passion for genealogies among the Arabs, mentioned by Layard and others, in order to show that the attention paid by the Jews to genealogies is in entire accordance with the manners and tendencies of their contemporaries. In their case, however, it was heightened by several peculiar circumstances. The promise of the land of Canaan to the seed of Abraham, Isaac, and Jacob successively, and the separation of the Israelites from the Gentile world; the expectation of Messiah as to spring from the tribe of Judah; the exclusively hereditary priesthood of Aaron with its dignity and emoluments; the long succession of kings in the line of David; and the whole division and occupation of the land upon genealogical principles by the tribes, families, and houses of fathers, gave a deeper importance to the science of genealogy among the Jews than perhaps anywhere else. We have already noted the evidence of the existence of family memoirs even before the flood, to which we are probably indebted for the genealogies in Gen. iv., v.; and Gen. x., xi., &c., indicate the continuance of the same system in the times between the flood and Abraham. But with Jacob, the founder of the nation, the system of reckoning by genealogies (יהוה יְשָׁבָה), or in the language of Moses, Num. i. 18, יְשָׁבָה יְשָׁבָה, was much further developed. In Gen. xxxv. 27-29 we have a formal account of the sons of Jacob, the patriarchs of the nation, repeated in Ex. i. 1-6. In Gen. xli. we have an exact genealogical census of the house of Israel at the time of Jacob’s going down to Egypt. The way in which the former part of this census, relating to Reuben and Simeon, is quoted in Ex. vi., where the census of the tribe of Levi is all that was wanted, seems to show that it was transcribed from an existing document. When the Israelites were in the wilderness of Sinai, in the second month of the second year of the Exodus, their number was taken by Divine command, “after their families, by the house of their fathers,” tribe by tribe, and the number of each tribe is given by their generations, after their families, by the house of their fathers, according to the number of the names, by their polls,” Num. i., iii. This census was repeated 38 years afterwards, and the names of the families added, as we find in Num. xxvi. According to these genealogical divisions they pitched their tents, and marched, and offered their gifts and offerings, and chose the spies. According to the same they cast the lots by which the trouper of Israel, Achan, was discovered, as later those by which Saul was called to the throne. Above all, according to these divisions, the whole land of Canaan was parcelled out amongst them. But now of necessity that took place which always has taken place with respect to such genealogical arrangements, namely, that by marriage, or servitude, or incorporation as friends and allies, persons not strictly belonging by birth to such or such a family or tribe, were yet reckoned in the census as belonging to them, when they had acquired property within their borders, and were liable to the various services in peace or war which were performed under the heads of such tribes and families. Nobody supposes that all the Corneli, or all the Campbells, sprang from one ancestor, and it is in the teeth of direct evidence from Scripture, as well as of probability, to suppose that the Jewish tribes contained absolutely none but such as were descended from the twelve patriarchs. The tribe of Levi was probably the only one which had no admixture of foreign blood. In many of the Scripture genealogies, as e. g. those of Caleb, Job, Lytes, and yevemah, as well as those who sprang from the patriarchs. The registers in Ezra and Nehemiah include the Nethinim, and the children of Seumon’s servant.\\n\\n---

a Ὁσα Ἐφθασε τῷ Ἀμανάρῳ περὶ τῶν γενεαλογίων ἡμερεῖας (Joseph. c. Apion. l. 8).

b Aeschylus, in his Ep. to Aristides, expressly mentions that the ancient genealogical records at Jerusalem included those who were descended from pros...
Segob, and the sons of Rephaiam, &c. In 1 Chr. iii. 21, it is quite clear that birth was not the ground of their incorporation into their respective tribes. [BEER; TALEL.] However, birth was, and continued to be throughout their whole national course, the foundation of all the Jewish organization, and the reigns of the more active and illustrious monarchs were often renewed by attention to genealogical operations. When David established the temple services on the festing which continued till the time of Christ, he divided the priests and Levites into courses and companies, each under the family chief. The singers, the porters, the trumpeters, the players on instruments, were all thus genealogically distributed. In the active stirring reign of Rehoboam, we have the work of ibid concerning genealogies (2 Chr. xii. 15). When Hezekiah reopened the temple, and restored the temple services which had fallen into disuse, he reckoned the whole nation by genealogies. This appears from the fact of many of the genealogies in Chronicles terminating in Hezekiah's reign [Azariah, 5], from the expression "So all Israel were reckoned by genealogies" (1 Chr. ix. 1); immediately following genealogies which do so terminate, and from the narrative in 2 Chr. xxx. 16-19 proving that, as regards the priests and Levites, such a complete census was taken by Hezekiah. It is indicated also in 1 Chr. iv. 41. We learn too incidentally from Prov. xxx. that Hezekiah had a staff of scribes, who would be equally useful in transcribing genealogical registers as in copying out Proverbs. So also in the reign of Jotham king of Judah, who among other great works built the higher gate of the house of the Lord (2 K. xx. 35), and was an energetic as well as a zealous king, we find a genealogical reckoning of the Levites (1 Chr. v. 17), probably in connection with Jotham's wars against the Ammonites (2 Chr. xxvii. 5). When Zerubbabel brought back the Captivity from Babylon, one of his first cares seems to have been to take a census of those that returned, and to settle them according to their genealogies. The evidence of this is found in 1 Chr. ix., and the duplicate passage Neh. xi.; in 1 Chr. iii. 19, and genealogies, vii. 5, and xii. In like manner Nehemiah, as an essential part of that national restoration which he labored so zealously to promote, gathered "together the nables, and the rulers, and the people, that they might be reckoned by genealogy," Neh. vii. 5, xii. 26. The abstract of this census is preserved in Ezra ii. and Neh. viii., and a portion of it in 1 Chr. iii. 21-24. That this system was continued after their times, as far at least as the priests and Levites were concerned, we learn from Neh. xii. 22; and we have incidental evidence of the continued care of the Jews still later to preserve their genealogies in such passages of the apocryphal books as 1 Marc. ii. 1-5, viii. 17, xiv. 23; and perhaps Judith viii. 1; Tob. i. 5, &c. Passing on to the time of the birth of Christ, we have a striking incidental proof of the continuance of the Jewish genealogical economy in the fact that when Augustus ordered the census of the empire to be taken, the Jews in the province of Syria immediately went each one to his own city, i. e. (as is clear from Joseph going to Bethlehem the city of David), to the city to which his tribe, family, and father's house belonged. So that the return, if recounted, doubtless exhibited the form of the old genealogies taken by the kings of Israel and Judah. Another proof is the existence of our Lord's genealogy in two forms as given by St. Matthew and St. Luke. [GEOEALOGY OF CHRIST.] The mention of Zacharias, as "of the course of Abia," of Elizabeth, as "of the daughters of Aaron," and of Anna the daughter of Phanuel, as "of the tribe of Aser," are further indications of the same thing. And this conclusion is expressly confirmed by the testimony of the apocryphal books, of which Josephus is the guide. There, after describing his own descent, "not only from that race which is considered the noblest among the Jews, that of the priests, but from the first of the 21 courses" (the course of Jehoiarib), and on the mother's side from the Asamonean sove-reigns, he adds, "I have thus traced my genealogy, as I have found it recorded in the public tables" (in quaes. bel. iii. 126, 475). And again, Contr. Apion. i. § 7, he states that the priests were obliged to verify the descent of their intended wives by reference to the archives kept at Jerusalem; adding that it was the duty of the priests after every war (and he specifies the wars of Antiochus Epip., Pompey, and Q. Varus), to make new genealogical tables from the old ones, and to ascertain what women among the priestly families had been made prisoners, as all such were deemed improper to be wives of priests. As a proof of the care of the Jews in such matters he further mentions that in his day the lists of successive high priests preserved in the public records extended through a period of 2000 years. From all this it is abundantly manifest that the Jewish genealogical records continued to be kept till near the destruction of Jerusalem. Hence we are constrained to disbelieve the story told by Africanus concerning the destruction of all the Jewish genealogies by Herod the Great, in order to conceal the ignobleness of his own origin. His statement is, that up to that time the Hebrew genealogies had been preserved entire, and the different families were traced up either to the patriarchs, or the first proselytes, or the heathens or mixed people. But that on Herod's causing these genealogies to be burnt, only a few of the more illustrious Jews who had private pedigrees of their own, or who could supply the best pedigrees, were preserved; and that in some of the chronicles, were able to retain any account of their own lineage among whom he says were the Despochtai, or brethren of our Lord, from whom was said to be derived the scheme (given by Africanus) for reconciling the two genealogies of Christ. But there can be little doubt that the registers of the Jewish tribes and families perished at the destruction of Jerusalem, and not before. Some partial records may, however, have survived that event, as it is probable, and indeed seems to be implied in Josephus's statement, that at least the priestly families of the dispersion had records of their own genealogy. We learn too from Benjamin of Tudela, that in his day the princes of the Captivity professed to trace their descent to David, and he mentions others, e. g. H. adumos, a descendant of the house of David, as proved by his pedigree, vol. i. p. 32, and H. Eleazar ben Tzemach, who possessed a pedigree of his descent from the prophet Samuel, and knows the melodies which were sung in the temple during its existence." ib. p. 100, &c. He also mentions descendants of the tribes of Dan, Zabulon, and Naphtali, among the mountains of Kinsawm, whose prince was of the tribe of Levi. The patriarchs of Jerusalem, so called from the Hebrew תֹּם יִשְׂרָאֵל, claimed descent from Hillel.

882 GENEALOGY
the Babylonian, of whom it is said that a genealogy, found at Jerusalem, declared his descent from David and Abital. Others, however, traced his descent from Benjamin, and from David only through a daughter of Shephairah. But however tradition may have preserved for a while true geneologies, or imagination and pride have coined fictitious ones, after the destruction of Jerusalem, it may be safely affirmed that the Jewish genealogical system then came to an end. Essentially connected as it was with the tenure of the land on the one hand, and with the peculiar privileges of the house of David and Levi on the other, it naturally failed when the land was taken away from the Jewish race, and when the promise to David was fulfilled, and the priesthood of Aaron superseded by the exaltation of Christ to the right hand of God. The remains of the genealogical spirit among the later Jews (which might of course be much more fully illustrated from Rabbinical literature) has only been glanced at to show how deeply it had penetrated into the Jewish national mind. It remains to be said that just as much of the nature of the Jewish genealogical records are of great importance with a view to the right interpretation of Scripture. Let it only be remembered that these records have respect to political and territorial divisions, as much as to strictly genealogical descent, and it will at once be seen how erroneous a conclusion it may be, that all who are called "sons" of such or such a patriarch, or chief father, must necessarily be his very children. Just as in the very first division into tribes Manasseh and Ephraim were numbered with their uncles, as if they had been sons instead of grandsons (Gen. xlviii. 5) of Jacob, so afterwards the names of persons belonging to different generations would often stand side by side as heads of families or houses, and be called the sons of their common ancestor. For example, Gen. xlvii. 21 contains grandsons as well as sons of Benjamin (Bitlai), and Ex. vi. 24 probably enumerates the son and grandson of Assir as heads, with their father, of the families of the Korhites. And so in innumerable instances. If any one family or house became extinct, some other would succeed to its place, called after its own chief father. Hence of course a census of any tribe drawn up at a later period would exhibit different divisions from one drawn up at an earlier. Compare, e. g., the list of courses of priests in Zerubbabel's time (Ezra xii.), with that of those in David's time (1 Chron. xxiv.). The same principle must be borne in mind in interpreting any particular genealogy. The sequence of generations may represent the succession to such or such an inheritance or headship of tribe or family, rather than the relationship of father and son. Again, where a pedigree was abbreviated, it would naturally specify such generations as would indicate from what chief houses the person descended. In cases where a name was common the father's name would be added for distinction only. These reasons would be well understood at the time, though it may be difficult now to ascertain them positively. Thus in the pedigrees of Ezra (Ezr. vii. 1-5), it would seem that both Serahah and Azariah were heads of houses (Neh. x. 2); they are both therefore named. Hilkiah is named as having been high-priest, and his identity is established by the addition "the son of Shallum" (1 Chr. vi. 13); the next named is Zadok, the priest in David's time, who was chief of the 16 courses, sprang from Eleazar, and then follows a complete pedigree from this Zadok to Aaron. But then as regards the chronological use of the Scripture genealogies, it follows from the above view that great caution is necessary in using them as measures of time, though they are invaluable for this purpose whenever we can be sure that they are complete. What seems necessary to make them trustworthy measures of time is, either that they should have special internal marks of being complete, such as where the mother as well as the father is named, or some historical circumstance defines the several relationships, or, that there should be several genealogies, all giving the same number of generations within the same termini. When these conditions are found it is difficult to overrate the value of genealogies for chronology. In determining however the relation of generations to time, some allowance must be made for the station in life of the persons in question. From the early marriages of the princes, the average of even 30 years to a generation will probably be found too long for the kings. Another feature in the Scripture genealogies which it is worth while to notice is the recurrence of the same name, or modifications of the same name, such as Tobias, Tobit, Nathan, Mattatha, and even of names of the same signification, in the same family. This is an indication of the carefulness with which the Jews kept their pedigrees (as otherwise they could not have known the names of their remote ancestors); it also gives a clue by which to judge of obscure or doubtful genealogies.

The Jewish genealogies have two forms, one giving the generations in a descending, the other in an ascending scale. Examples of the descending form may be seen in Ruth iv. 18-22, or 1 Chr. iii. Of the ascending, 1 Chr. vi. 33-43 (A. V.); Ezr. vii. 1-3. The descending form is express by the formula: A, begat B, and B, begat C, &c.; or, the sons of A, B his son, C his son, &c.; or, the sons of A, B, C, D; and the sons of B, C, D, &c.; and the sons of C, E, F, &c. The ascending is always expressed in the same way. Of the two, it is obvious that the descending scale is the one in which we are most likely to find collateral descents, inasmuch as it implies that the object is throughout the East in those days, as it still is, to denote connection generally, either by descent or succession.

a Some further information on these modern Jewish genealogies is given in a note to p. 32 of Asher's Brus.

b Thus in the Targum of Esther we have Hannam's pedigree traced through 21 generations to the "impious Esaun;" and Mordecai's through 42 generations to Abraham. The writer makes 33 generations from Abraham to King Saul in the second century. See Selden, Opp. v. i. 4, l. p. x.

c The Jews say that only 4 courses came back with Zerubbabel, and that they were subdivided into 24, saving the rights of such courses as should return from captivity. See Selden, Opp. v. i. 4, l. p. x.

The genealogies of Jesus Christ.

The New Testament gives us the genealogy of but one person, that of our Saviour. The priesthood of Aaron having ceased, the possession of the land of Canaan being transferred to the Gentiles, there being under the N.T. dispensation no difference between circumcision and uncircumcision, barbarian and Sythian, bond and free, there is but One whose genealogy it concerns us as Christians to be acquainted with, that of our Lord Jesus Christ. Him the prophets announced as the seed of Abraham and the son of David, and the angel declared that to him should be given the throne of his father David, that he might reign over the house of Jacob for ever. His descent from David and Abraham being therefore an essential part of his Messiahship, it was right that his genealogy should be given as a portion of Gospel truth. Considering, further, that to the Jews first he was manifested and preached, and that his descent from David and Abraham was a matter of special interest to them, it seems likely that the proof of his descent would be one especially adapted to convince them; other words that it would be drawn from documents which they deemed authentic. Such were the genealogical records preserved at Jerusalem. [Oxon. Mon. Soc.] And when to the above considerations we add the fact that the lineage of Joseph was actually made out from authentic records for the purpose of the civil census ordered by Augustus, it becomes morally certain that the genealogy of Jesus Christ was extracted from the public registers. Another consideration adds yet further conviction. It has often excited surprise that the genealogies of Christ should both give the descent of Joseph, and not Mary. But if these genealogies were those contained in the public registers, it could not be otherwise. In them Jesus, the son of Mary, the espoused wife of Joseph, could only appear as Joseph's son (comp. John i. 45). In transferring them to the pages of the Gospels, the evangelists only added the qualifying expression "as was supposed" (Luke iii. 23, and its equivalent, Matt. i. 16).

But now to approach the difficulties with which the genealogies of Christ are thought to be beset. These difficulties have seemed so considerable in all ages as to drive commentators to very strange shifts. Some, as early as the second century, broached the notion, which Julius Africanus vigorously repudi
The genealogies are imaginary lists designed only to set forth the union of royal and priestly descent in Christ. Others, on the contrary, to silence this and similar solutions, brought in a "Deus ex machinis," in the shape of a tradition derived from the Desposyni, in which by an ingenious fiction the law of Leviticus to unite brothers, whose mother had married first into the house of Solomon, and afterwards into the house of Nathan, some of the discrepancies were reconciled, though the meeting of the two genealogies in Zerubbabel and Salathiel is wholly unaccounted for. Later, and chiefly among Protestant divines, the theory was invented of one genealogy being Joseph's and the other Mary's, a theory in direct contradiction to the plain letter of the Scripture narrative, and leaving untouched as many difficulties as it solves. The fertile invention of An- nius of Viterbo forged a book in Philo's name, which accounted for the discrepancies by asserting that all Christ's ancestors, from David downwards, had two names. The circumstance, however, of one line running up to Solomon, and the other to Nathan, was overlooked. Other fanciful suggestions have been offered; while infidels, from Porphry downwards, have seen in what they call the contradiction of Matthew and Luke a proof of the spuriousness of the Gospels: and critics like Professor Norton, a proof of such portions of Scripture being interpolated. Others, like Alford, content themselves with saying that solution is impossible, without further knowledge than we possess. But it is not too much to say that after all, in regard to the main points, there is no difficulty at all, if only the documents in question are treated reason- sably, and after the analogy of similar Jewish documents in the O. T.—and that the clues to a right understanding of them are so patent, and so strongly marked, that it is surprising that so much diversity of opinion should have existed. The fol- lowing propositions will explain the true construc- tion of these genealogies:

1. They are both the genealogies of Joseph, i. e. of Jesus Christ, as the reputed and legal son of Joseph and Mary. One is only to read them to be satisfied of this. The notices of Joseph as being of the house of David, by the same evangelists who give the pedigree, are an additional confirmation (Matt. i. 20; Luke i. 27, ii. 4, &c.), and if these pedigrees were extracted from the public archives, they must have been Joseph's.

2. The genealogy of St. Matthew is, as Grotius most truly and unhesitatingly asserted, Joseph's genealogy as legal successor to the throne of David, i. e. it exhibits the successive heirs of the kingdom ending with Christ, as Joseph's reputed son. St. Luke's is Joseph's private genealogy, exhibiting his real birth, as David's son, and thus showing why he was heir to Solomon's crown. This is capable of being almost demonstrated. If St. Matthew's genealogy had stood alone, and we had no further information on this subject than it affords, we might indeed have thought that it was a genealogical stem in the strictest sense of the word, exhibiting Jo- seph's forefathers in succession, from David downwards. But immediately we find a second genealogy of Joseph—that in St. Luke's Gospel—such is no longer a reasonable opinion. Because if St. Matthew's genealogy, tracing as it does the successive generations through the long line of Jewish kings, not Joseph's real paternal stem, there could not possibly have been room for a second genealogy.

The steps of ancestry coinciding with the steps of succession, one pedigree only could in the nature of things be proper. The mere existence, therefore, of a second pedigree, tracing Joseph's ancestry through private persons, by the side of one tracing it through kings, is in itself a proof that the latter is not the true stem, while the former is the real one. We must now examine St. Matthew's list, to discover whether it contains in itself any evidence as to when the lineal descent was broken, we fix at once upon Jeconias, who could not, we know, be literally the father of Salathiel, because the word of God by the mouth of Jeremiah had pronounced him childless, and declared that none of his seed should sit upon the throne of David, or rule in Judah (Jer. xxii. 30). The same thing had been declared concerning his father Jełożakin in Jer. xxxvi. 30. Jeconias, therefore, could not be the father of Salathiel, nor could Christ spring either from him or his father. Here then we have the most striking confirmation of the justice of the inference drawn from finding a second genealogy, namely, that St. Matthew gives the succession, not the strict birth; and we con- clude that the names after the childless Jeconias are those of his next heirs, as also in 1 Chr. iii. 17. One more look at the two genealogies convinces us that this conclusion is just; for we find that the two next names following Jeconias, Salathiel and Zorobabel, are actually taken from the other gene-alogy, which teaches us that Salathiel's real father was Ner, of the house of Nathan. It becomes, therefore, perfectly certain that Salathiel of the house of Nathan became heir to David's throne on the failure of Solomon's line in Jeconias, and that as Salathiel was the last heir of the house of David, he was accounted as "sons of Jeconiah" to the royal genealogical table, according to the principle of the Jewish law laid down Num. xxvii. 8-11. The two genealogies then coincide for two, or rather for four generations, as will be shown below. There then occur six names in St. Matthew, which are not found in St. Luke; and then once more the two genealogies co- incide in the name of Matthew or Matthat (Matt. i. 15; Luke iii. 24), to whom two different sons, Jacob and Levi, are assigned, but only the second, grandson and heir Joseph, the Instead of Mary, and the reputed father of Jesus, who is called Christ. The simple and obvious explanation of this is, on the same principle as before, that Joseph was descended from Joseph, a younger son of Abiud (the Juda of Luke iii. 26), but that on the failure of the line of Abiud's eldest son in Eleazar, Jo- seph's grandfather Matthias became the heir; that Matthias had two sons, Jacob and Heloi: that Jacob had no son, and consequently that Joseph, the son of his younger brother Heloi, became heir to his uncle, and to the throne of David. Thus the simple principle that one evangelist exhibits that genealogy which contained the successive heirs to David's and Solomon's throne, while the other exhibits the paternal stem of him who was the heir, explains all the anomalies of the two pedigrees, their agreements as well as their discrepancies, and the circumstances of these being two at all. What must be added that not only does this theory ex- plain all the phenomena, but that that portion of it which asserts that Luke gives Joseph's paternal stem receives a most remarkable confirmation from the names which compose that stem. For if we begin with Nathan, we find that his son, Mattathia, and four others, of whom the last was grandfather to Joseph, had names which are merely modifica-
GENEALOGY OF JESUS CHRIST

ions of Nathan (Matthew twice, and Mattathias twice); or, if we begin with Joseph, we shall find no less than three of his name between him and Nathan: an evidence, of the most convincing kind, that Joseph was literally descended from Nathan in the line. St. Luke represents him to be (comp. Zech. xii. 12).

3. Mary, the mother of Jesus, was in all probability the daughter of Jacob, and first cousin to Joseph her husband. So that in point of fact, though not of form, both the genealogies are as much hers as her husband's.

But besides these main difficulties, as they have been thought to be, there are several others which cannot be passed over in any account, however concise, of the genealogies of Christ. The most starting is the total discrepancy between them both and that of Zerubbabel in the O. T. (1 Chr. iii. 19-24). In this last, of seven sons of Zerubbabel not one bears the name, or any thing like the name, of Rhesa or Abiud. And of the next generation not one bears the name, or any thing like the name, of Eliakim or Jeconiah, which are in the corresponding generation in Matthew and Luke. Nor can any subsequent generations be identified. But this difference will be entirely got rid of, and a remarkable harmony established in its place, if we suppose Rhesa, who is named in St. Luke's Gospel as Zerubbabel's son, to have slipped into the text from the margin. Rhesa is in fact not a name at all, but it is the Chaldee title of the princes of the Captivity, who at the end of the second, and through the third century after Christ, rose to great eminence in the East, assumed the state of sovereigns, and were considered to be of the house of David. (See preceding article, p. 882 b.) These princes then were exactly what Zerubbabel was in his day. It is very probable, therefore, that this title, Rhesa, should have been placed against the name of Zerubbabel by some early Christian Jew, and thence crept into the text. If this be so, St. Luke will then give Joannæa, Ιαοναπσίας, as the son of Zerubbabel. But Ιαοναπσίας is the very same name as Ἰαωναπιθ, Ἰναναπιθ, the son of Zerubbabel according to 1 Chr. iii. 19. [Hananaiah.] In St. Matthew this generation is omitted. In the next generation we identify Matthew's Abijah (Abiad), Ἱωαννιας, with Luke's Juda, in the Hebrew of that day Ḥiḏ, and both with Hophni, Ἰωναπιθ, of 1 Chr. iii. 24 (a name which is actually interchanged with Juda, Ἰουαναπιθ, Ezr. iii. 9; Neh. xi. 9, compared with Ezr. ii. 49; 1 Chr. ix. 7), by the simple process of supposing the Shemaita, Ἰουαναπιθ, of 1 Chr. iii. 22 to be the same person as the Shimei, Ἰουασίας, of ver. 18: thus at the same time cutting off all those redundant generations which bring this genealogy in 1 Chr. iii. down some 200 years later than any other in the book, and long after the close of the canon.

The next difficulty is the difference in the number of generations between the two genealogies. St. Matthew's division into three fourteen gives only 42, while St. Luke, from Abraham to Christ inclusive, reckons 56, or, which is more to the point (since the generations between Abraham and David are the same in both genealogies), while St. Matthew reckons 28 from David to Christ, St. Luke 43, or 42 without Rhesa. But the genealogy itself supplies the explanation. In the second tesseractode, including the kings, we know that three generations are omitted—Abaziah, Josiah, Amaziah—in order to reduce the generations from 17 to 14: the difference between these 17 and the 19 of St. Luke being very small. So in like manner it is obvious that the generations have been abridged in the same way in the third division to keep to the number 14. The true number would be one much nearer St. Luke's 23 (22 without Rhesa), implying the omission of about seven generations in this last division. Dr. Mill has shown that it was a common practice with the Jews to distribute genealogies into divisions, each containing some favorite or mystical number, and that, in order to do this, generations were either repeated or left out. Thus in Philo the generations from Abraham to Joseph are divided into three, and repeated once more, by the repetition of Abraham. But in a Samaritan poem the very same series is divided into two decades only, by the omission of six of the least important names (Vindicatio, pp. 110-118).

Another difficulty is the apparent deficiency in the number of the last tesseractode, which seems to contain only 13 names. But the explanation of this is, that either in the process of translation, or otherwise, the names of Jehoiakim and Jehoiachin have been omitted and expressed by the one name Jehonias. For that Jehonias, in ver. 11, means Jehoiakim, while in ver. 12 it means Jehoiachin, is quite certain, as Jerome saw long ago. Jehoiachin had no brothers, but Jehoiakim had three brothers, of whom two at least sat upon the throne, if not three, and were therefore named in the genealogy. The two names are very commonly considered as the same, both by Greek and Latin writers, e. g. Clemens Alex. Ambrose, Africanus, Epiphanius, as well as the author of 1 Esdr. (i. 37, 43), and others. Irenæus also distinctly asserts that Joseph's genealogy, as given by St. Matthew, expresses both Joakim and Jehonias. It seems that this identity of name has led to some corruption in the text of very early date, and that the clause Ἰαοναπσίας ἶποναπσίας of Matthew has fallen out between ιαοναπσίας and ἶποναπσίας, and added, in ver. 11. The Cod. Vat. contains the clause only after Badoiaério in ver. 12, where it seems less propa (see Alford's Greek Text).

The last difficulty of sufficient importance to be mentioned here is a chronological one. In both the genealogies there are but three names between Solomon and David—Boaz, Obed, Jesse. But, according to the common chronology, from the entrance into Canaan (when Solomon was come to man's estate) to the birth of David was 405 years, or from that to 500 years and upwards. Now for about an equal period, from Solomon to Jehoiachin, St. Luke's genealogy contains 29 names. Obviously, therefore, either the chronology or the genealogy is wrong. But it cannot be the genealogy (which is repeated four times over without any variation), because it is supported by eighty other genealogies of the Chaldean and Persian kings, which are well known and fixed by the Persians.
GENEALOGY OF JESUS CHRIST

Itogies," which all contain about the same number of generations from the Patriarchs to David as David's own line does: except that, as was to be expected from Judah, Boaz, and Jesse being all advanced in years at the time of the birth of their sons, David's line is one of the shortest. The number of generations in the genealogies referred to is 14 in five, 15 in two, and 11 in one, to correspond with the 11 in David's line. There are other genealogies where the series is not complete, but not one which contains more generations. It is the province therefore of Chronology to square its calculations to the genealogies. It must suffice here to assert that the shortening the interval between the Exodus and David by about 200 years, which brings it to the length indicated by the genealogies, does in the most remarkable manner bring Israelitic history into harmony with Egyptian, with the traditional Jewish date of the Exodus, with the fragment of Edomitish history preserved in Gen. xxxvi. 31–39, and with the internal evidence of the Israelitish history itself. The following pedigree will exhibit the successive generations as given by the two Evangelists:

According to St. Luke.

</table>

Thus it will be seen that the whole number of generations from Adam to Christ, both inclusive, is 74, without the second Cainan and Rhesa. Including these two, and adding the name of God, Augustine reckoned 77, and thought the number typical of the forgiveness of all sins in baptism by Him who was thus born in the 77th generation, alluding to Matt. xviii. 22; with many other wonderful speculations on the hidden meaning of the numbers 3, 4, 7, 10, 11, and their additions and multiplications (Quest. Exeget., i. II. e. 6). Irenaeus, who probably, like Africanus and Eusebius, omitted Mattath and Levi, reckoned 72 generations, which he connected with the 73 nations into which, according to Gen. x. (LXX.), mankind was divided, and so other fathers likewise.

For an account of the different explanations that have been given, both by ancient and modern commentators, the reader may refer to the elaborate Dissertation of Patrizius in his 2d vol. De Evangeliis; who, however, does not contribute much to elucidate the difficulties of the case. The opinions advanced in the foregoing article are fully discussed in the writer's work on the Genealogies of our Lord Jesus Christ; and much valuable matter will be found in Dr. Mills' Vindication of the Geneal., and in Grothus' note on Luke iii. 23. Other treatises are, Comaratus, De General. Christi; Hottinger, Dissert. duas de General. Christi; G. G. Voss, De J. Chr. General.; Yardley, On the Geneal. of J. Chr., &c.

from 1 Chr. viii. ix, and 1 Sam. ix; and that o Zabad in 1 Chr. ii.
GENERATION.

1. Abstract. — Time, either definite or indefinite. The primary meaning of the Heb. נֶחֱלָה is revolution; hence period of time; comp. περιοδίος, εὐναντίος, and αναν. From the general idea of a period comes the more special notion of an age or generation of men, the ordinary period of human life. In this point of view the history of the word seems to be directly contrasted with that of the Lat. sæculum; which, starting with the idea of breed, or race, acquired the secondary signification of a definite period of time (Censorin. de Die Nat. c. 17).

In the long-lived Patriarchal age a generation seems to have been computed at 100 years (Gen. xv. 10; comp. 13, and Ex. xii. 40); the later reckoning, however, was the same which has been adopted by other civilized nations, namely, from thirty to forty years (Job xii. 16). For generation in the sense of a definite period of time, see Gen. xvi. 15; Dent. xxxiii. 3, 4, &c.

As an indefinite period of time; for time past see Dent. xxxii. 7; Is. liii. 12; for time future see Ps. xiv. 17, lxiii. 5, &c.

2. Concrete. — The men of an age, or time.

So generation = contemporaries (Gen. vi. 9; Is. liii. 8; see Lowth ad loc.; Ges. Loc. better than "atena generatio," or "multitudo creditura"); postically, especially in legal formulae (Lev. iii. 17, &c.); fathers, or ancestors (Ps. xlv. 19; Hoseann. School ad loc.; comp. 2 Chron. xxxiv. 29). Dropping the idea of time, generation comes to mean a race, or class of men; e.g., of the generations of the Jews (Is. xiv. 5, &c.); of the wicked (Dent. xxxii. 5; Jer. vii. 29, where "generation of his wrath" = against which God is angry). In A. V. of N. Test. three words are rendered by generation:

(1.) _gamma, properly generation; but in Matt. i. 1 Biblios γενεας = γενεας γενεας γενεας = a genealogical scheme. (2.) Πατριαρχα, pl. of πατριαρχα. Matt. iii. 7, &c., A. V. generation; more properly brood [of ripers], as the result of generation in its primary sense. (3.) γενεα in most of its uses corresponds with the Heb. נֶחֱלָה [see above].

For the abstract and indefinite, see Luke i. 50; Eph. iii. 21 (A. V. "ages"), future: Acts xxv. 21 (A. V. "of old time"), Eph. iii. 5 (A. V. "ages"), post. For concrete, see Matt. xi. 16.

For generation without reference to time, see Luke xvii. 8, "in their generation" [A. V.], i.e. in their disposition, "indoles, ingenium, et ratio homini," (Schleusen); in Matt. i. 17, "all the generations:" either concrete use, so. "familia sibi invincc succedentia;" or abstract and definite, according to the view which may be taken of the difficulties connected with the genealogies of our Lord. [Genalogy.]

Y. E. B.

*GENERATION or GENERATIONS, as the translation of γενεας or γενεας, has these secondary meanings in the A. V.: first, a genealogical register (as Gen. v. 1); second, a family history (Gen. vi. 9, xxv. 19, etc.), since early history among the Orientals is drawn so much from genealogical registers; and third, a history of the origin of things as well as persons, e. g. of the earth (Gen. ii. 4). H.

GENESISareth. In this form the name appears in the edition of the A. V. of 1611, in Mark vii. 30 and Luke v. 1, following the spelling of the Vulgate. In Matt. xiv. 34, where the Vulg. has Genesis, the A. V. originally followed the Received Greek Text — Genesisare. The oldest MSS. have, however, Γενεσια or in each of the three places. [Genesisaret.]

GENESIS (הִנֵּה; Genesis: Genesis; called also by the later Jews הָרְיִילָה; הָרְיִילָה, the first book of the Law or Pentateuch.

A. The book of Genesis has an interest and an importance to which no other document of antiquity can pretend. If not absolutely the oldest book in the world, it is the oldest which has any claim to being a trustworthy history. There may be some papyrus-rolls in our museums which were written in Egypt about the same time that the genealogies of the Semitic race were so carefully collected in the tents of the Patriarchs. But these rolls at best contain barren registers of little service to the world.

It is said that there are fragments of Chinese literature which in their present form date back as far as 2200 years b. c., and even more. But they are either calendars containing astronomical calculations, or records of merely local or temporary interest. Genesis, on the contrary, is rich in details respecting other races besides the race to which it more immediately belongs. And the Jewish polities there so studiously preserved are but the connecting wherein is reared a temple of universal history.

If the religious books of other nations make any pretensions to vie with it in antiquity, in all other respects they are incomparably inferior. The Mantras, the oldest portions of the Vedas, are, it would seem, as old as the fourteenth century n. c. The Zendavesta, in the opinion of competent scholars, is of very much more modern date. Of the Chinese sacred books, the oldest, the Yih-king, is undoubtedly of a venerable antiquity, but it is not certain that it was a religious book at all; while the writings attributed to Confucius are certainly not earlier than the sixth century n. c.

But Genesis is neither like the Vedas, a collection of hymns more or less sublime; nor like the Zendavesta, a philosophic speculation on the origin of all things; nor like the Yih-king, an untestable jumble whose expositors could twist it from a cosmological essay into a standard treatise on ethical philosophy.

It is a history, and it is a religious history. The earlier portion of the book, so far as the end of the eleventh chapter, may be properly termed a history of the world; the latter is a history of the fathers of the Jewish race. But from first to last it is a religious history: it begins with the creation of the world and of man; it tells of the early happiness of a Paradise in which God spake with man; of the first sin and its consequences; of the promise of Redemption; of the gigantic growth of sin, and the judgment of the Flood; of a new earth, and a new covenant with

a * Meyer (in loc.) takes the Greek expression as meaning "in respect to their own race," i.e. their kindred in the moral sense. The worldly in their dealings with each other are wiser in worldly things than the children of light in spiritual things.

b Gfrerer, Ergischrifter, 1, s. 215.

d Gfrerer, ii. 270.

e Hardenr, Const. of Matter, ill. 1, p. 16.
must have a land, and the promise of the land and the preparation for its possession are all along kept in view.

The book of Genesis then (with the first chapters of Exodus) describes the steps which led to the establishment of the Theocracy. In reading it we must remember that it is but a part of a more extended work; and we must also bear in mind these two prominent ideas, which give a characteristic unity to the whole composition, namely, the people of God, and the promised land.

We shall then observe that the history of Abraham holds the same relation to the other portions of Genesis, which the giving of the Law does to the entire Pentateuch. Abraham is the father of the Jewish Nations: to Abraham the Land of Canaan is first given in promise. Isaac and Jacob, though also prominent figures in the narrative, yet do not inherit the promise as Abraham's children, and Jacob especially is the chief connecting link in the chain of events which leads finally to the possession of the land of Canaan. In like manner the former section of the book is written with the same obvious purpose. It is a part of the writer's plan to tell us what the divine preparation of the world was in order to show, first, the significance of the call of Abraham, and next, the true nature of the Jewish theocracy. He does not (as Tuch asserts) work backwards from Abraham, till he comes in spite of himself to the beginning of all things. He does not ask, Who was Abraham? answering, of the posterity of Shem; and who was Shem? a son of Noah; and who was Noah? etc. But he begins with the creation of the world, because the God who created the world and the God who revealed himself to the fathers is the same God. Jacob, who commanded his people to keep holy the seventh day, was the same God who in six days created the heavens and the earth, and rested on the seventh day from all his work. The God who, when man had fallen, visited him in mercy, and gave him a promise of redemption and victory, is the God who sent Moses to deliver his people out of Egypt. He who made a covenant with Noah and through him with 'all the families of the earth,' is the God who makes himself known as the God of Abraham, of Isaac, and of Jacob. In a word, creation and redemption are eternally linked together. This is the idea which in fact gives its shape to the history, although its distinct enunciation is reserved for the N. T. There we learn that all things were created by and for Christ, and that in him all things consist (Col. i. 16, 17), and that by the church is made known unto principalities and powers the manifold wisdom of God. It would be impossible, therefore, for a book which tells us of the beginning of the church, not to tell us also of the beginning of the world.

The book of Genesis has thus a character at once special and universal. It embraces the world; it speaks of God as the God of the whole human race. But as the introduction to Jewish history, it makes the universal interest subordinate to the national. Its design is to show how God revealed himself to the fathers and through them to the rest of the human race. He who in the midst of them, having chosen them to himself, that a nation must have laws, therefore He gives them a law: and, in virtue of their peculiar relationship to God, this body of laws is both religious and political, defining their duty to God as well as their duty to their neighbor. Further, a nation

ISAAC, its unchangeableness typified by the bow in the heavens; of the dispersion of the human race over the world. And then it passes to the story of Redemption; to the promise given to Abraham, and renewed to Isaac and to Jacob, and to all that chain of circumstances which paved the way for the great symbolic act of Redemption, when with a mighty hand and a stretched out arm Jehovah brought his people out of Egypt.
GENESIS

1. Adam.—The creation of the world, and the earliest history of mankind (ch. i.-iii.). As yet, no divulsion of the distinct families of mankind.

2. Noah.—The history of Adam's descendants to the death of Noah (iv.-ix.).—Here we have (1) the line of Cain branching off while the history follows the fortunes of Seth, whose descendants are (2) traced in genealogical succession, and in an unbroken line as far as Noah, and (3) the history of Noah himself (vi.-ix.), continued to his death.

3. Abraham.—Noah's posterity till the death of Abraham (x.-xxxvii.).—Here we have (1) the peopling of the whole earth by the descendants of Noah's three sons (xi. 1-9). The history of two of these is then dropped, and (2) the line of Shem only pursued (xii. 10-32) as far as Terah and Abraham, where the genealogical table breaks off. (3) Abraham is now the prominent figure (xii.-xxxv. 18). But as Terah had two other sons, Nahor and Haran (xi. 27), some notices respecting their families are added. Let's migration with Abraham into the land of Canaan is mentioned, as well as the fact that he was the father of Moab and Ammon (xix. 37, 38), nations whose later history was intimately connected with that of the posterity of Abraham. Nahor remained in Mesopotamia, and his family is briefly enumerated (xxii. 20-24), chiefly no doubt for Rebekah's sake, who was afterwards the wife of Isaac. Of Abraham's own children, there branches off first the line of Ishmael (xxii. 9, 10), and next the children by Keturah; and the genealogical notices of these two branches of his posterity are apparently brought together (xxv. 1-6, and xxv. 12-18), in order that, being here severally dismissed at the end of Abraham's life, the main stream of the narrative may flow in the channel of Isaac's fortunes.

4. Isaac.—Isaac's life (xxv. 19-xxxv. 29), a life in itself retiring and uneventful. But in his sons the gradual separation takes place, leaving the field clear for the great story of the chosen seed. Even when Nahor's family comes on the scene, as it does in ch. xxxix., we hear only so much of it as is necessary to throw light on Jacob's history.

5. Jacob.—The history of Jacob and Joseph (xxxvi.-1).—Here, after Isaac's death, we have (1) the genealogy of Esau, xxxvi., who then drops out of the narrative in order that (2) the history of the patriarch and his family may be continued, immediately to the death of Joseph (xxxvii.-1).

Thus it will be seen that a specific plan is preserved throughout. The main purpose is never forgotten. God's relation to Israel holds the first place in the writer's mind. It is this which it is his object to convey. The history of that chosen seed who were the heirs of the promise, and the guardians of the divine oracles, is the only history which interprets man's relation to God. By its light all others shine, and may be read when the time shall come. Meanwhile, as the different families drop off here and there from the principal stock, their course is briefly indicated. A hint is given of their parentage and their migrations; and then the narrative returns to its regular channel. Thus the whole book may be compared to one of those vast American rivers which, instead of being fed by tributaries, odd here and there, loses its branches or bayous, as they are termed, the main current meanwhile flowing on with its great mass of water to the sea.

Beyond all doubt then, we may trace in the book of Genesis in its present form a systematic plan. It is no hasty compilation, no mere collection of ancient fragments without order or arrangement. It centres by an internal principle of unity. In whole and part, it possesses a definite and clearly marked outline. But does it follow from this that the book, as it at present stands, is the work of a single author?

6. Integrity.—This is the next question we have to consider. Granting that this unity of design, which we have already noticed, leads to the conclusion that the work must have been by the same hand, are there any reasons for supposing that the author availed himself in its composition of earlier documents? and if so, are we still able by critical investigation to ascertain where they have been introduced into the body of the work?

1. Now it is almost impossible to read the book of Genesis with anything like a critical eye without being struck with the great peculiarities of style and language which certain portions of it present. Thus, for instance, chap. ii. 5-iii. 24 is quite different both from chap. i. and from chap. iv. Again, chap. xiv. and (according to Jahn) chap. xxiii. are evidently separate documents transplanted in their original form without correction or modification into the existing work. In fact there is nothing like uniformity of style till we come to the history of Joseph.

2. We are led to the same conclusion by the inscriptions which are prefixed to certain sections, as ii. 4, v. 1, vi. 9, x. 1, xi. 30, 27, and seem to indicate so many older documents.

3. Lastly, the distinct use of the Divine names, Jehovah in some sections, and Eleohim in others, is characteristic of two different writers; and other peculiarities of diction, it has been observed, fall in with this usage, and go far to establish the theory. All this is quite in harmony with what we might have expected a priori, namely, that if Moses or any later writer were the author of the book he would have avoided himself of existing traditions either oral or written. That they might have been written is now established beyond all doubt, the art of writing having been proved to be much earlier than Moses. That they are written we infer from the book itself.

Astruc, a Huguenot physician, was the first who broached the theory that Genesis was based on a collection of older documents. [PENNINGTON]. Of these he professed to point out as many as twelve, the use of the Divine names, however, having in the first instance suggested the distinction. Subsequently Eichhorn adopted this theory, so far as to admit that two documents, the one Eleohistic, and the other Jehovistic, were the main sources of the book, though he did not altogether exclude others. Since his time the theory has been maintained, but variously modified, by one class of critics, whilst another class has strenuously opposed it. De Wette, Knobel, Tuch, Delitzsch, &c., think that two original documents may be traced throughout the work, the Jehovist, who was also probably the editor of the book in its present form, having designed merely to complete the work of the Eleohist. Hengstenberg, Keil, Baumgarten, and Havernick contend for a single author. The great weight of probability lies on the side of those who argue for the existence of different documents. The evidence already adduced is strong; and nothing can be more natural than that an honest historian should seek to make his work more valuable by embodying in it the most ancient records of his race; the
higher the value which they possessed in his eyes, the more anxious would he be to preserve them in their original form. Those particularly in the earlier portion of the work were perhaps simply transcribed. In one instance we have what looks like an omission, ii, 4, where the inscription seems to promise a larger cosmogony. Here and there throughout the book we meet with a later remark, intended to explain or supplement the earlier monument. And in some instances there seems to have been so complete a fusion of the two principal documents, the Elohistic and the Jehovistic, that it is no longer possible accurately to distinguish them. The later writer, the Jehovist, instead of transcribing the Elohistic account intact, thought fit to blend and interspersel with it his own remarks. We have an instance of this, according to Hupfeld (Die Quellen der Genesis), in chap. vii. vv. 1-10 are usually assigned to the Jehovist; but whilst he admits this, he detects a large admixture of Elohistic phraseology and coloring in the narrative. But this sort of criticism it must be admitted is very doubtful. Many other instances might he mentioned where there is the same difficulty in assigning their own to the several authors. Thus in sections generally recognized as Jehovistic, chaps. xii., xiii., xix., here and there a sentence or a phrase seems to betray a different author. (xii. 5, xiii. 6, xix. 29). These anomalies, however, though it may be difficult to account for them, can hardly be considered of sufficient force entirely to overthrow the theory of independent documents which has so much, on other grounds, to recommend it. And certainly when Keil, Hengstenberg and others, who reject this theory, attempt to account for the use of the Divine names, on the hypothesis that the writer designedly employed the one or the other name according to the subject of which he was treating, their explanations are often of the most arbitrary kind. As a whole, the documentary character of Genesis is so remarkable when we compare it with the later books of the Pentateuch, and is so exactly what we might expect, supposing a Mosaic authorship of the whole, that, whilst contending against the theory of diferent documents in the later portions, we feel convinced that it is not an easy task so to treat the text as to make any sense. The Hebrew word rendered "generations" properly means births, and by metonymy a record of births, a family account. [GENEALOGY; GENERATIONS, Amer. ed.] In such a record incidents of family history would naturally be interwoven (as in ch. r, especially vv. 24, 29, and in xii. 27-32; xxxvii. 1-8, and hence the word came to express simply a record of such incidents. Thus in vi. 9 ff. and under the heading "These are the generations of Noah," instead of a list of births we find only the chief events of his own life and death, and the chief family history of Isaaac, and in xxxvi. 1 to that of Esau, and in xxxvii. 2 to that of Jacob. The birth

or origin of the one whose name stands as the subject of this word is seldom included.

Accordingly, we should expect here, under the superscription, "These are the generations of the heavens and the earth," not an account of their origin, but a continuation and further development of their history, in events connected with them as parts of the same divine plan. And this is what we find. The account of creation is here continued, but with special reference to man, for whom the heavens and the earth were made and in whose history the design of their creation is fully unfolded. Hence all the facts here related are presented from a point of view which has for its object, and hence the order of sequence here observed in narrating them.

The words, "when they were created," etc., show that the following account belongs to the same period of time as the preceding one, and is a continuation of the previous. In Genesis 1, where the account commences, we should translate: "And there was yet no plant of the field in the earth, and no herb of the field had yet sprung up."
(2.) Sections in which Jehovah occurs exclusively, or in preference to Elohim; iv. (Cain and Abel), and Cain's pietosity, where Jehovah 10 times and Elohim only once; vi. 1–8 (the sons of God and the daughters of men, etc.); vii. 1–9 (the entering into the ark), but Elohim once, ver. 9; viii. 22–25 (Noah's altar and Jehovah's blessing); ix. 18–27 (Noah and his sons); x. (the families of mankind as descended from Noah); xi. 1–9 (the confusion of tongues); xii. 1–20 (Abram's journey first from Haran to Canaan, and then into Egypt); xiii. (Abraham's separation from Lot); xiv. (Abraham's faith, sacrifice, and covenant); xvi. (Hagar and Ishmael), where xvi. 7–8 once; xvii.–xix. 28 (visit of the three angels to Abram, Lot, destruction of Sodom and Gomorrah) xxiv. (betrothal of Rebekah and Isaac's marriage); xxv. 19–xxvi. 35 (Isaac's sons, his visit to Abram's, Esau's wives); xxvii. 1–40 (Jacob obtains the blessing), but in ver. 28 his Elohim; xxvii. 22–43 (Jacob's bargain with Laban), where however Jehovah only once; xxxviii. (Judah's incest); xxxix. (Jehovah with Joseph in Potiphar's house and in the prison); [Ex. iv. 18–3 l (Moses' return to Egypt); v. (Pharaoh's treatment of the messengers of Jehovah].

(5.) The section Gen. ii. 3–iv. 24 (the account of Paradise and the Fall) is generally regarded as Jehovahic, but it is clearly quite distinct. The Divine name as there found is not Jehovah, but Jehovah Elohim (in which form it only occurs once beside in the Pentateuch, Ex. ix. 30), and it occurs 20 times; the name Elohim being found three times in the same section, once in the mouth of the woman, and twice in that of the serpent.

(4.) In Gen. xiv. the prevailing name is El-Elyon (A. V. “the most high God”), and only once, in Abram's mouth, “Jehovah the most high God,” which is quite intelligible.

(5.) Some few sections are found in which the names Jehovah and Elohim seem to be used promiscuously. This is the case in xxii. 1–40 (the offering up of Isaac); xxviii. 10–22 (Jacob's dream at Bethel); xxix. 31–xxx. 24 (birth and naming of the twelve sons of Jacob); and xxxii. (Jacob's wrestling with the angel); [Ex. iii. 1–iv. 17 (the call of Moses).]

(6.) It is worthy of notice that of the other Divine names Adonai is always found in connection with Jehovah, except Gen. xx. 4; whereas El, El-Shaddai, etc., occur most frequently in the Elohist sections.

(7.) In the following sections neither of the Divine names occur: — Gen. xi. 10–32, xii. 20–24, xiii., xxv. 27–34, xxvi. 40–43, xiii. 1–30, xxxiv., xxxvi., xlii., Ex. i. 1–22.

3. Authority. — Luther used to say, “Nihil praeter Genesis, nihil utilius.” But hard critics have tried all they can to mar its beauty and to detract from its utility. In fact the bitterness of the attacks on a document so venerable, so full of undying interest, hailed by the love of many generations, makes one almost suspect that a secret maliceulence must have been the mainspring of hostile criticism. Cetera it is that no book has met with more determined and unprovoking assailants. To enumerate and to reply to all objections would be impossible. We will only refer to some of the most important.

(1.) The story of Creation, as given in the first chapter, has been set aside in two ways: first by placing it on the same level with other cosmogonies which are to be found in the sacred writings of all nations; and next, by asserting that its statements are directly contradicted by the discoveries of modern science.

Let us glance at these two objections.

(2.) Now when we compare the Biblical with all other known cosmogonies, we are immediately struck with the great novel superiority of the former. There is no confusion here between the Divine Creator and his work. God is therefore all things, God creates all things; this is the sublime assertion of the Hebrew writer. Whereas all the cosmogonies of the heathen world err in one of two directions. Either they are Dualistic, that is, they regard God and matter as two eternal co-existent principles; or they are Panspheric, i. e. they confound God and matter, making the material universe a kind of emanation from the great Spirit which informs the mass. Both these theories, with their various modifications, whether in the more subtle philosophies of the Indian races, or in the rougher and grosser systems of the Phoenicians and Babylonians, are alike exclusive of the idea of creation.

Without attempting to discuss in anything like detail the points of resemblance and difference between the Biblical record of creation and the myths and legends of other nations, it may suffice to mention certain particulars in which the superiority of the Hebrew account can conveniently be called in question. First, the Hebrew story alone clearly acknowledges the personality and unity of God. Secondly, here only do we find recognized a distinct act of creation, by creation being understood the calling into existence out of nothing the whole material universe. Thirdly, here only is there a clear intimation of that great law of progress which we find everywhere observed. The order of creation is given in Genesis in the gradual progress of all things from the lowest and least perfect to the highest and most completely developed forms. Fourthly, there is the fact of a relation between the personal Creator and the work of his fingers, and that relation is a relation of Love: for God looks upon his creation at every stage of its progress and pronounces it very good. Fifthly, there is throughout a subtile simplicity, which of itself is characteristic of a history, not of a myth or of a philosophical speculation.

(3.) It would occupy too large a space to discuss at any length the objections which have been urged from the results of modern discovery against the literal truth of this chapter. One or two remarks of a general kind must suffice. It is argued, for instance, that light could not have existed before the sun, or at any rate not that kind of light which would be necessary for the support of vegetable life; whereas the Mosaic narrative makes light created on the first day, trees and plants on the third, and the sun on the fourth. To this we may reply, that we must not too hastily build an argument upon our ignorance. We do not know that the existing laws of creation were in operation when
the creative fiat was first put forth. The very act of Creation must have been the introducing of laws; but when the work was finished, these laws may have suffered some modification. Men are not now created in the full stature of manhood, but are born and grow. Similarly the lower ranks of beings might have been created in necessary conditions during the first stages of their existence, which conditions were afterwards removed without any disturbance of the natural functions. And again it is not certain that the language of Genesis can only mean that the sun was created on the fourth day. It may mean that then only did that luminary become visible to our planet.

With regard to the six days, no reasonable doubt can exist that they ought to be interpreted as six periods, without defining what the length of those periods is. No one can suppose that the Divine rest was literally a rest of 24 hours. On the contrary, the Divine Sabbath still continues. There has been no creation since the creation of man. This is what Genesis teaches, and this geology confirms. But God, after six periods of creative activity, entered into that Sabbath in which his work has been not a work of Creation but of Redemption.

No attempt, however, which has as yet been made to identify these six periods with corresponding geological epochs can be pronounced satisfactory. On the other hand, it seems rash and premature to assert that no reconciliation is possible. What we ought to maintain is, that no reconciliation is necessary. It is certain that the author of the first chapter of Genesis, whether Moses or none other, knew nothing of a certain or astronomical. It is certain that he made use of phraseology concerning physical facts in accordance with the limited range of information which he possessed. It is also certain that the Bible was never intended to reveal to us knowledge of which our own faculties rightly used could put us in possession. And we have no business, therefore, to expect anything but popular language in the description of physical phenomena. Thus, for instance, when it is said that by means of the firmament God divided the waters which were above from those which were beneath, we admit the fact without admitting the implied explanation. The Hebrew supposed that there existed vast reservoirs above him corresponding to the "waters under the earth." We know that by certain natural processes the rain descends from the clouds. But the fact remains the same that there are waters above as well as below.

Further investigation may perhaps throw more light on these interesting questions. Meanwhile it may be safely said that modern discoveries are in no way opposed to the great outlines of the Mosaic cosmogony. That the world was created in six periods, that creation was by a law of gradual advance with beginning with inorganic matter, and then advancing from the lowest organisms to the highest, that since the appearance of man upon the earth no new species have come into being; these are statements not only not disproved, but the two last of them, at least, amply confirmed by geological research and by the modern geologists.

(2.) To the description of Paradise, and the history of the Fall and of the Deluge, very similar remarks apply. All nations have their own version of these facts, colored by local circumstances and embellished according to the poetic or philosophic spirit of the tribes among whom the tradition has taken root. But if there be any one original source of these traditions, any root from which they diverged, we cannot doubt where to look for it. The earliest record of these momentous facts is that preserved in the Bible. We cannot doubt this, because the simplicity of the narrative is greater than that of any other work with which we are acquainted. And this simplicity is an argument at once in favor of the greater antiquity and also of the greater truthfulness of the story. It is hardly possible to suppose that traditions so widely spread over the surface of the earth as are the traditions of the Creation, the Fall, and the Deluge, should have no foundation whatever in fact. And it is quite as impossible to suppose that that version of these facts, which in its moral and religious aspect is the purest, is not also, to take the lowest ground, the most likely to be true.

Opinions have differed whether we ought to take the story of the Fall in Gen. iii. to be a literal statement of facts, or whether, with many expositors since the time of Philo, we should regard it as an allegory, framed in childlike words as beffited the childhood of the world, but conveying to us a deeper spiritual truth. But in the latter case we ought not to deny that spiritual truth. Neither should we overlook the very important bearing which this narrative has on the whole of the subsequence history of the world and of Israel. Deissmeyer says, "The story of the Fall, like that of the Creation, has wandered over the world. Heathen nations have transplanted it and mixed it up with their geography, their history, their mythology, although it has never so completely changed form and color and spirit, that you cannot recognize it. Here, however, in the Law, it preserves the character of a universal, human, world-wide fact: and the germs of Creation, the Redemption that is in Christ Jesus, and the heart of every man, conspire in their testimony to the most literal truth of the narrative." The universality of the Deluge, it may be proved, is quite at variance with the most certain facts of geology. But then we are not bound to contend for a universal deluge. The Biblical writer himself, it is true, supposed it to be universal, but that was days, does not seem entitled to speak with authority on the geological question.

As Professor Powell does, in his Order of Nature. I am aware it may be said that the trilobite which is discovered in the lowest fossiliferous rocks is not the lowest type of organic being; but lower forms may have perished without leaving traces behind them. And if not, manifestly in such a narrative as that of Genesis we ought not to expect minute accuracy; it is the main it is certainly true that, as we advance from the lower to the higher strata, we find a corresponding advance in organic deposits.
only because it covered what was then the known world; there can be no doubt that it did extend to all that part of the world which was then inhabited; and this is enough, on the one hand, to satisfy the terms of the narrative, and on the other, the geological difficulty, as well as other difficulties concerning the ark and the number of animals, disappear with this interpretation. [See xxvi. 1-4].

(3) When we come down to a later period in the narrative, where we have the opportunity of testing the accuracy of the historian, we find it in many of the most important particulars abundantly corroborated.

Whatever interpretation we may be disposed to put on the story of the confusion of tongues and the subsequent dispersion of mankind, there is no good ground for setting it aside. Indeed, if the reading of a cylinder recently discovered at Birs Njarid,6 may be trusted, there is independent evidence corroborative of the Biblical account. But at any rate the other versions of this event are far less probable (see these in Joseph, Ant. i. 4, § 3; Euseb. Prep. Ec. ix. 14). The later myths concerning the wars of the Titans with the gods are apparently based upon this story, or rather upon perversions of it. But it is quite impossible to suppose, as Kalisch does (Genesis, p. 313), that "the Hebrew historian converted that very legend into a medium for solving a great and important problem." There is not the slightest appearance of any such design. The legend is a perversion of the history, not the history a comment upon the legend. One of the strongest proofs of the bond, that historical character of the earlier portion of Genesis is to be found in the valuable ethnological extracts which are appended. Kuenen, who has devoted a volume to the elucidation of this document, has succeeded in establishing its main accuracy beyond doubt, although, in accordance with his theory as to the age of the Pentateuch, he assigns to it no greater antiquity than between 1200 and 1000 B.C. (4.) As to the fact implied in this dispersion, that all languages had one origin, philological research has not as yet been carried far enough to lead to any very certain result. Many of the greatest philologists enlarge for real affinities between the Indo-European and the Semitic tongues. On the other hand, languages like the Coptic (not to mention many others) seem at present to stand out in complete isolation. And the most that has been effected is a classification of languages in three great families. This classification, however, is in exact accordance with the three-fold division of the races in Sem, Ham, and Japhet, of which Genesis tells us.

(5.) Another fact which rests on the authority of the earlier chapters of Genesis, the derivation of the whole human race from a single pair, has been abundantly confirmed by recent investigations. For the full proof of this it is sufficient to refer to Pritchard's "Archaeological History of Mankind," in which the subject is discussed with great care and ability. It is quite impossible, as has already been said, to notice all the objections made by hostile critics at every step as we advance. But it may be well to refer to one more instance in which suspicion has been cast upon the credibility of the narrative. Three stories are found in three distinct portions of the book, which in their main features no doubt present a striking similarity to one another: See xx. 10-20, xx., xxvi. 1-11. These, it is said, besides containing certain improbabilities of state
dent. It is of course possible that these are only different versions of the same story. But is it psychologically so very improbable that the same incident should happen three times in almost the same manner? All men repeat themselves, and even repeat their mistakes. And the repetition of circumstances over which a man has no control, is sometimes as astonishing as the repetition of actions which he can control. Was not the state of society in those days such as to render it no way improbable that Pharaoh on one occasion, and Abimelech on another, should have acted in the same selfish and arbitrary manner? Abraham too might have been guilty twice of the same sinful covariance; and Isaac might, in similar circumstances, have copied his father's example, calling it wisdom. To say, as the most recent expositor of this book has done, that the object of the Hebrew writer is to represent an idea, such as "the sanctity of maternity," that "in his hands, the facts are subordinated to ideas," etc., is to cut up by the very roots the historical character of the book. The mythical theory is preferable to this; for leaves a substratum of fact, however it may have been embellished or perhaps disfigured by tradition.1

There is a further difficulty about the age of Sarah, according to which the time of the first occurrence must have been 65 years old, and the freshness of her beauty, therefore, it is said, long since failed. In reply it has been argued that as she lived to the age of 127, she was only then in middle life: that consequently she would have been at 65 what a woman of modern Europe would be at 35 or 40, an age at which personal attractions are not necessarily impaired. But it is a minute criticism, hardly worth answering, which tries to cast suspicion on the veracity of the writer, because of difficulties such as these. The positive evidence is overwhelming in favor of his credibility. The patriarchal tent beneath the shade of some spreading tree, the wealth of flocks and herds, the free and generous hospitality to strangers, the strife for the well, the purchase of the cave of Machpelah for a burial-place,—we feel at once that these are no inventions of a later writer in more civilized times. So again, what can be more life-like, more touchingly beautiful, than the picture of Hagar and Ishmael, the meeting of Abraham's servant with Rebekah, or of Jacob with Rachel at the well of Haran? There is a fidelity in the minutest incidents which convinces us that we are reading history, not fable. Or can anything more completely transport us into patriarchal times than the battle of the kings and the interview between Abraham and Melchisedec? The very opening of the story, "In the days of Amraphel," etc., reads like the work of some old chronicler who

---

1 If the view of Hitzig is correct, that vii. 10-20 is Jehovistic; xx., Elohist with a Jehovistic addition, ver. 69; xxvi. 1-13, Jehovistic, but taken from written documents, this may to some extent explain the repetition of the story.
and not far from the time of which he speaks, The archeic forms of names of places, Beia for Zoar: Chatatzou Tamar for En-gedi: Fimek Sharea for the King's Vale; the Vale of Siddim as descriptive of the spot which was afterwards the Dead Sea; the expression "Abraam the Hebrew:" are remarkable evidences of the antiquity of the narrative. So also are the names of the different tribes who at that early period inhabited Canaan; the Rephaim, for instance, of whom we find in the time of Joshua but a week remnant left (Josh. xili. 12), and the Susan, Eain, Chorion, who are only mentioned beside in the Pentateuch (Deut. lii. 10, 12). Quite in keeping with the rest of the picture is Abraham’s "arising his trained servants" (xiv. 14)—a phrase which occurs nowhere else—and above all the character and position of Melchisedec. "Simple, calm, great, comes and goes the priest-king of the divine history." The representations of the Greek poets, says Creuzer (Syst. iv. 378), fall very far short of this. And as Hiévernick justly remarks, such a person could be no theoretic invention; for the union of the kingly and priestly offices in the same person was no part of the theocracy. Lastly, the name by which he knows God, "the most high God, possessor of heaven and earth," occurs also in the Phcenician religions, but not amongst the Jews, and is again one of those slight but accurate touches which at once distinguishes the historian from the fauldist.

Passing on to a later portion of the book we find the writer evincing the most accurate knowledge of the state of society in Egypt. The Egyptian jealousy of foreigners, and especially their hatred of shepherds; the use of interpreters in the court (who, we learn from other sources, formed a distinct caste); the existence of caste; the importance of the priesthood; the means by which the land which had once belonged to free proprietors passed into the hands of the king; the fact that even at that early time a settled trade existed between Egypt and other countries, are all confirmed by the monuments or by later writers. So again Joseph’s priestly dress of fine linen, the chain of gold round his neck, the chariot on which he rides, the bodyguard of the king, the rites of burial and embalming (though spoken of only incidentally) are spoken of with the most correct accuracy, which can only be made on the mind as to the credibility of the historian.

E. Author and date of composition. — It will be seen, from what has been said above, that the book of Genesis, though containing different documents, owes its existing form to the labor of a single author, who has digested and incorporated the materials he found ready to his hand. A modern writer on history, in the same way, might sometimes transcribe passages from ancient chronicles, sometimes place different accounts together, sometimes again give briefly the substance of the older document, neglecting its form.

But it is a distinct inquiry who this author or scribe was. This question cannot properly be discussed apart from the general question of the authorship of the entire Pentateuch. We shall therefore reserve this subject for another article.

PENTATEUCH.

J. J. S. P.

The later works on Genesis, and, indeed, the later, are mentioned at the close of the article PENTATEUCH. The principal later works on Genesis are the following: Schumann, Genesis, 1829; Tiele, Der erste Buch Mose’s, 1836; Tuch, Die Genesis, 1833; Drecsher, Die Einheit und Echtheit der Genesis, 1838; Hangestenburg, Die Bücher Mose’s und Japhets, 1841, trans. by R. D. C. Robinson; Egypt and the Books of Moses, Andover, 1843; Baumgarten, Theol. Commentar zur Pentateuch, 1843; Schröder, Der erste Buch Mose, 1844; De Sola and Lindenthal, Heb. Scriptures with New Translational Notes, 1844; Knobel, Die Völkertheil der Genesis, 1850; Keil, über Gen. vi. 1–4 (in Zeitschrift für das luth. theol. u. Kirche, 1855); Kalisch, Hist. and Crit. Commentary on the Old Test., Exodus, Genesis, Leviticus, 1855–1857; Wright, The Book of Genesis in Hebrew, revised text, etc., 1859; Reineke, Die Schöpfung der Welt, 1859; Knobel, Die Genesis erklärt (Lief. xi. of the Kureg., exequt. Humbach), 2te Aufl. 1859; Auer, Die vägliche Offenbarung, 1861 (the portion relating to the first eleven chapters trans. in the Bibl. Sacra, 1865, pp. 395–493); Delitzsch, Comm. über die Genesis, der Ausg. 1860; Murphy Critical and Exegetical Commentary, with a new translation, Genesis, 1863, Exodus, 1866; Kittcher, Neue exeget-krit. Älterenlese, Abth. ii. 1863; Lange, Die Genesis, 1864 (Amer. ed. by Prof. Taylor Lewis, in press, 1867); Bosio, De Heemneem- en die Geologie, 1865; Schultz, Die Schöpf ungsgeschichte nach Naturwissenschaft und Bibel, 1865; Keil (in Keil und Delitzsch’s Bibl. Comm.), Genesis and Exodus, 2te Aufl. 1869; Quarrington, Genesis and its Authorship, 1890; Conant, The Book of Genesis, revised English version, with explanatory and philological notes (in press, 1867).

T. C. J.

GENNESAR, THE WATER OF (τὸ Ἕβαρ Γέννασαρ; [Alex. Sin.εα τον τον τον τον τον τον τον τον τον], Σιν. to [to](Jehrenlese, Comm.), Joseph. Ant. iii. 5, § 7, τὰ ἄδατα τὰ Γέννασαρ Ἀγγ. Aquar Genesiv), 1 Macce. xii. 67. [GENNESARET.]

GENNESARET, LAND OF (§ γῆς Περιπατήσεως; terrae Genesis, terrae Genesriv). After the miracle of feeding the five thousand, our Lord and his disciples crossed the Lake of Genesaret and came to the other side, at a place which is called the "land of Genesaret" (Matt. xiv. 34; Mark vi. 53). It is generally believed that this term was applied to the fertile crescent-shaped plain on the north of the Sea of Galilee, which can have no doubt been the scene of the miracle. "Mingh of the north on the steep hill behind Migdal on the south, and called by the Arabs el-Ghuneir, ‘the little Ghor.’" The description given by Josephus (B. J. iii. 10, § 8) would apply admirably to this plain. He says that along the lake of Gen nearart there extends a region of the same name, of marvelous nature and beauty. The soil was so rich that every plant flourished, and the air so temperate that trees of the most opposite natures grew side by side. The shady walnut, which delighted in cold, grew there luxuriantly: there were the palm-trees that were nourished by heat, and fig-trees and olives beside them, that required a more temperate climate. Grapes and figs were found during ten months of the year. The plain was watered by a most excellent spring called by the natives Capharraum, which was thought by some to be a vein of the Nile, because a fish was found there closely resembling the coryphaeus of the lake of Alexandria. The length of the plain along the shore of the lake was thirty stadia, and its breadth twenty. Making every allowance for the coloring given by the historian to his description, and for the neglected condition of el-Ghuneir at
the present day, there are still left sufficient points of resemblance between the two to justify their being identified. The dimensions given by Josephus are sufficiently correct, though, as Dr. Thomson remarks (Land and Book, p. 518), the plain is a little longer than thirty, and not quite twenty for- longs in breadth." Mr. Porter (Haboh, p. 429) gives the length as three miles, and the greatest breadth as about one mile. It appears that Professor Stanley either assigns to "the land of Gen- nesaret" a wider signification, or his description of its extent must be inaccurate; for, after calling attention to the tropical vegetation and climate of the western shores of the lake, he says: "This fertility . . . reaches its highest pitch in the one spot on the western shore where the mountains, suddenly receding inland, leave a level plain of five miles wide, and six or seven miles long. This plain is "the land of Gennesareth" (S. & F. p. 354).

Still his description goes far to confirm in other respects the almost exaggerated language in which Josephus describes the prodigality of nature in this region. "No less than four springs pour forth their waters into full-grown rivers through this plain; the richness of the soil displays itself in magnificent corn-fields; whilst along the shore rises a thick jungle of thorn and elder, abounding in birds of brilliant colors and various forms." Burckhardt tells us that even now the pastures of Kinn Minieh are proverbial for their richness (Syria, p. 319).

In the Journal of Classical and Sacred Philology (ii. 290-308) Mr. Thripp has endeavored to show that the land of Gennesaret was not el-Thau, but the fertile plain el-Thau on the northeastern side of the lake. The dimensions of this plain and the character of its soil and productions correspond so far with the description given by Josephus of the land of Gennesaret as to afford reasonable ground for such an identification. But it appears from an examination of the narrative in the Gospels, that, for other reasons, the plain el-Thau is not the land of Gennesaret, but more probably the scene of the miracle of feeding the five thousand. After delivering the parable of the Sower, our Lord and his disciples left Capernaum, near which was the scene of the parable, and went to Nazareth (Matt. xiii. 34; Mark vi. 1). It was while he was here, apparently, that the news was brought him by the Apostles of the death of John the Baptist (Matt. xiv. 13; Mark vi. 20). He was still, at any rate, on the western side of the lake of Tiberias. On hearing the intelligence "he departed thence by ship into a desert place apart." (Matt. xiv. 13; Mark vi. 32), the "desert place" being the scene of the miraculous feeding of the five thousand, and belonging to the city called Bethsaida (Luke ix. 10). St. John (vi. 1) begins his account of the miracle by saying that "Jesus went over the sea of Galilee." an expression which he could not have used had the scene of the miracle lain on the western shore of the lake, as Mr. Thripp supposes, at el-Thau. It seems much more probable that it was on the eastern or northeastern side After the miracle Jesus sent his disciples in the boat to the other side (Matt. xiv. 22), towards Bethsaida (Mark vi. 45), in order to go to Capernaum (John xii. 17), where he is found next day by the multi-

biles whom he had fed (John vi. 21, 25). The boat came to shore in the land of Gennesaret. It seems, therefore, perfectly clear, whatever be the actual positions of Capernaum and the scene of the miracle, that they were on opposite sides of the lake, and that Capernaum and the land of Gennesaret are not the same. Additional interest is given to the land of Gennesaret, or el-Thau, by the probability that its scenery suggested the parable of the Sower. It is admirably described by Professor Stanley. "There was the undulating corn-field descending to the water's edge. There was the trodden pathway running through the midst of it, with no fence or hedge to prevent the seed from falling here and there on either side of it, or upon it; itself hard with the constant tramp of horse and male and human feet. There was the 'good' rich soil, which distinguishes the whole of that plain and its neighborhood from the bare hills elsewhere descending into the lake, and which, where there is no inter-
