The Nicolaitans themselves, at least as early as the time of Irenæus (Contra Haer. i. 26, § 9), claimed him as their founder. Epiphanius, an accurate writer, relates (Adde. Hær. i. 2, § 25, p. 76) some details of the life of Nicolas the deacon, and describes him as gradually sinking into the grossest impiety, and becoming the originator of the Nicolaitans and other immoral sects. Stephen Gobar (Phili-Bibl. vi. § 232, p. 291, ed. 1821) states—and the statement is corroborated by the researches of several Philologists—that Hippolytus agreed with Epiphanius in his unfavorable view of Nicolas. The same account is believed, at least to some extent, by Jerome (Ep. 147, t. i. p. 1082, ed. Vallars, etc.) and other writers in the 4th century. But it is irreconcilable with the traditional account of the character of Nicolas, given by Clement of Alexandria (Strom. iii. 4. p. 187, Syll. and apud Euseb. H. E. iii. 241; see also Hammond, Anna. on Rev. ii. 1), an earlier and more discriminating writer than Epiphanius. He states that Nicolas led a chaste life and brought up his children in purity, that on a certain occasion having been sharply reproved by the Apostles as a jealous husband, he repelled the charge by offering to allow his wife to become the wife of any other person, and that he was in the habit of repeating a saying which is ascribed to the Apostle Matthias also, that it is our duty to fight against the flesh and to abuse (papatρεψατω) it. His words were pervertedly interpreted by the Nicolaitans as an authority for their immoral practices. Theodoret (Heret. Fug. iii. 1) in his account of the sect repeats the foregoing statement of Clement; and charges the Nicolaitans with false dealing in borrowing the name of the deacon. Ignatius, who was contemporary with Nicolas, is said by Stephen Gobar to have given the same account as Clement, Eusebius, and Theodoret, touching the personal character of Nicolas. Among modern critics, Coetzer in a note on Constit. Apost. vi. 8, after re- citing the various authorities, seems to lean towards the favorable view of the character of Nicolas. Professor Burton (Lectures on Ecclesiastical History, Lect. xlii. p. 304, ed. 1833) is of opinion that the origin of the term Nicolaitans is uncertain; and that, "though Nicolas the deacon has been mentioned as their founder, the evidence is extremely slight which would convict that person himself of any immorality." Tillemont (H. E. ii. 47), possibly influenced by the fact that no honor is paid to the memory of Nicolas by any branch of the Church, allows perhaps too much weight to the testimony against him; rejects peremptorily Cassian's statement — to which Neander (Planting of the Church, bk. v. p. 399, ed. Bohn) gives his adhesion — that some other Nicolas was the founder of the sect; and concludes that if not the actual founder, he was so unfortunate as to give occasion to the formation of the sect, by his indis creet speaking. Grotius's view, as given in a note on Rev. ii. 6, is substantially the same as that of Tilllemont.

The name Balam is perhaps (but see Gesen., Thea. 210) capable of being interpreted as a Hebrew equivalent of the Greek Nicolas. Some commentators think that this is alluded to by St. John in Rev. ii. 14; and C. Vitringa (Obs. Sacr. iv. 9) argues forcibly in support of this opinion.

W. T. B.

NICOPOLIS (Nicopolis [city of victory]: Nicopolis) is mentioned in Tit. iii. 12, as the place where, at the time of writing the epistle, St. Paul was intending to pass the coming winter, and where he wished Titus to meet him. Whether either or both of these purposes were accomplished we cannot tell. Titus was at this time in Crete (Tit. i. 5). The subscription to the epistle assumes that the Apostle was at Nicopolis when he wrote; but we cannot conclude this from the form of expression. We should rather infer that he was elsewhere, possibly at Ephesus or Corinth. He urges that no time should be lost (παραλαβοντο έλθεις); hence we conclude that winter was near.

Nothing is to be found in the epistle itself to determine which Nicopolis is here intended. There were cities of this name in Asia, Africa, and Europe. If we were to include all the theories which have been respectively supported, we should be obliged to write at least three articles. One Nicopolis was in Thrace, near the borders of Macedonia. The subscription (which, however, is of no authority) fixes on this place, calling it the Macedonian Nicopolis: and such is the view of Chrysostom and Theodoret. De Wette's objection to this opinion (Pastoral-Briefe, p. 21), that the place did not exist till Trajan's reign, appears to be a mistake. Another Nicopolis was in Cilicia; and Schrader (Der Apostel Paulus, i. pp. 115-119) pronounces for this; but this opinion is connected with a peculiar theory regarding the Apostle's journeys. We have little doubt that Jerome's view is correct, and that the Pauline Nicopolis was the celebrated city of Epirus ("seribit Apostolis de Nicopoli, qua in Actico littore sita, Horon, Proem. ix. 105"). For arrangements of St. Paul's journeys, which will harmonize with this, and with the other facts of the Pastoral Epistles, see Birks, Horae Apostolicae, pp. 296-304; and Conybeare and Howson, Life and Ep. of St. Paul (2d ed.), ii. 564-573. It is very possible, as is observed there, that St. Paul was arrested at Nicopolis and taken thence to Rome for his final trial.

This city (the "City of Victory") was built by Augustus in memory of the battle of Actium, and on the ground which his army occupied before the engagement. It was a curious and interesting circumstance, when we look at the matter from a Biblical point of view, that many of the handsomest parts of the town were built by Herod the Great (Joseph, Ant. xvii. 5, § 3). It is likely enough that many Jews lived there. Moreover, it was conveniently situated for apostolic journeys in the eastern parts of Achaea and Macedonia, and also to the northwards, where churches perhaps were founded. St. Paul had long before preached the
Gospel, at least on the confines of Illyricum (Rom. xv. 19), and seen after the very period under consideration Titus himself was sent on a mission to Damascus (2 Tim. iv. 10).

Nepish was on a peninsula to the west of the Bay of Port, in a stormy and unhealthy situation, and it is now a very desolate place. The remains have often been described. We may refer to Bever's Northern Greece, i. 178, and iii. 491; Bowers' Atlas and Ephemeris, 211; Wolfe in Journal of B. Geog. Soc. iii. 92; Mercival's Rome, iii. 327, 328; Wordsworth's Greece, 220-232. In the last mentioned work, and in the Dict. of Greek and Roman Geog. maps of the place will be found.

J. S. II.

NIGER (Νιγερ) (black): Niger is the additional or distinctive name given to the Numian (Gavadar), who was one of the teachers and prophets in the Church at Antioch (Acts xiii. 1). He is not known except in that passage. The name was a common one among the Romans: and the conjecture that he was an African proselyte, and was called Niger on account of his complexion, is unnecessary as well as destitute otherwise of any support. His name, Numian, shows that he was a Jew by birth; and as in other similar cases (e.g. Saul.—Silas, Silvanus) he may be supposed to have taken the other name as more convenient in his intercourse with foreigners. He is mentioned second among the five who officiated at Antioch, and perhaps we may infer that he had some preeminence among them in point of activity and influence. It is impossible to decide (though Meyer makes the attempt) who of the number were prophets (μποστόχοι), and who were teachers (βαπτιστεύοντες).

H. B. II.

NIGHT. The period of darkness, from sunset to sunrise, including the morning and evening twilight, was known to the Hebrews by the term בּוֹקָשׁ, boqekh, or בּוֹקָשׁ, byqeth. It is opposed to a "day," the period of light (Gen. i. 5). Following the oriental custom is the brief evening twilight (נָשִּׁים, nashim; Job xxi. 15; rendered "night" in Ex. xi. 11, xvi. 4. Ex. 11), when the stars appeared (Job iii. 9). This is also called "evening" (בּוֹקָשׁ, boqekh; Prov. vii. 9, rendered "night" in Gen. xlix. 27, Job vii. 4), but the term which especially denotes the evening twilight is נָשִּׁים (Gen xvii. 17, A. V. "dark"). Ex. ii. 6, 12). "Even" also denotes the time just before sunset (Deut. xxi. 11. Josh. viii. 20), when the women went to gather water (Gen. xxi. 11), and the decline of the day is called the "turning of evening" (מְנַחָה, manakah; Gen. xxiv. 63), the time of prayer. This period of the day must also be that which is described as "night" when Boaz winnowed his barley in the evening breeze (Ruth iii. 2), the cool of the day (Gen. iii. 8), when the shadows begin to fall (Jer. vi. 4), and the wolves prowl about (Hab. i. 8; Zeph. iii. 3). The time of midnight (נָשִּׁים, nashim; châtsi hallahqeth, Ruth iii. 8, and נָשִּׁים, nashim; châtsi halleti-qeth, Ex. xi. 4) or greatest darkness is called in Proph. vii. 9: the pupil of night" (יִנְּשֹׁפָה, yinshoph, A. V. "black night"). The period between midnight and the morning twilight was generally selected for attacking an enemy by surprise (Judg. vii. 19). The morning twilight is denoted by the same term, masephah, as the evening twilight, and is unmistakably intended in 1 Sam. xxxi. 12; Job vii. 4; Ps. cxix. 147; possibly also in Is. v. 11. With sunrise the night ended. In one passage, Job xxvi. 10, "misháke, dark-ness," is rendered "night" in the A. V., but is correctly given in the margin.

For the artificial divisions of the night see the articles Day and Watchmen.

W. A. W.

NIGHT-HAWK (NIGHT-HAWK (NIGHT-HAWK, noctuidae: γαλανίς, noctura). Bochart (Hieroc. ii. 850) has endeavored to prove that the Hebrew word, which occurs only ( Lev. xvi. 16; Dent. xiv. 15.) amongst the list of unclean birds, denotes the "male ostrich," the preceding term, bath-geináh (toel, A. V.), signifying the female bird. The etymology of the word points to some bird of prey, though there is great uncertainty as to the particular species indicated. The LXX., Vulg., and perhaps Onkelos, understand some kind of "owl"; most of the Jewish doctors indefinitely render the word a "rapacious bird:" Genessaret (44), J. M. Rosenmüller (in loc. and Lev. xi. 16) follow Bochart. Bochart's explanation is grounded on an overstrained interpretation of the etymology of the verb chaimás, the root of tochúmas; he restricts the meaning of the root to the idea of acting "unjustly" or "deceitfully," and thus comes to the conclusion that the "unjust bird" is the male ostrich (Ostruthu). Without stopping to consider the etymology of the word further than to refer the reader to Gesenius, who gives as the first meaning of chaimás "he acted violently," and to the Arabic chamnath, "to wound with claws," it is not at all probable that Moses should have specified both the male and female ostrich in a list which was no doubt intended to be as comprehensive as possible. The not infrequent occurrence of the expression "after their kind" is an argument in favor of this assumption. Michaelis believes some kind of swallow (Hieronymus) is intended: the word used by the Targum of Jonathan is by Kitto (Dict. Bib. Lev. xi. 16) and by Oeconomian (Verwey). Nonnian, p. 3, c. iv.) referred to the swallow, though the last-named authority says, "it is uncertain, however, what Jonathan really meant." Buxtorf (Lex. Robbin. s. v. סִנּוּיאָלֵל, Sinai) translates the word used by Jonathan, "a name of a rapacious bird, har-pijim." It is not easy to see what claim the swallow can have to represent the tochúmas, neither is it at all probable that so small a bird should have been noticed in the Levitical law. The mention of Avrest on no authority, though from the absurd properties which, from the time of Aristotle, have been ascribed to the night hawk or owl-sexer, and the superstitions connected with this bird, its claim is not so entirely destitute of every kind of evidence.

As the LXX. and Vulg. are agreed that tochúmas denotes some kind of owl, we believe it is safer to follow these versions than modern commentators.
The Greek άλεγ is used by Aristotle for some common species of owl, in all probability for the *Strix flammeus* (white owl), or the *Syringura striata* (tawny owl); the Veneto-Greek reads ουτρο"κων, "the Strix flammea," or *Strix vulgata*, Flin. (long-eared owl): this is the species which Oedemann (see above) identifies with *tecolnias*. The name," he says, "indicates a bird which exercises power, but the force of the power is in the Arabic root *chamosh*, 'to tear a face with claws.' Now, it is well known in the East that there is a species of owl of which people believe that it glides into the homes by night before tearing the flesh off the faces of sleeping children." Hasselquist (Trans. p. 196, Lond. 1766) alludes to this nightly terror, but he calls it the "Oriental owl" (Strix Orientalis), and clearly distinguishes it from the *Strix ornis*, Lin. The Arabs in Egypt call this infant-killing owl *magare*, the Syrian *bunna*,. It is believed to be identical with the *Syringura striata* Aristot., i. e. the *Strix vulgata*, or the *Strix flammea* or the *Athene meridionalis*, which is extremely common in Palestine and Egypt. [OWL]

* NIGHT-MONSTER, Is. xxxiv. 14, marg. [OWL.]

**NILE.** I. Names of the Nile. — The Hebrew names of the Nile, excepting one that is of ancient Egyptian origin, all distinguish it from other rivers. With the Hebrews the Euphrates, as the great stream of their primitive home, was always "the river," and even the long sojourn in Egypt could not put the Nile in its place. Most of their geographical terms and ideas are, however, evidently traceable to Canaan, the country of the Hebrew language. Thus the sea, as lying on the west, gave its name to the west water. It was only in such an exceptional case as that of the Euphrates, which had no rival in Palestine, that the Hebrews seem to have retained the ideas of their older country. These circumstances lend no support to the idea that the Semites and their language came originally from Egypt. The Hebrew names of the Nile are *Shihor*, "the black," a name perhaps of the same sense as Nile; *Yeir*, "the river," a word originally Egyptian; "the river of Egypt;" and "the Shihor of Egypt." (If this appellation designates the Nile, and Shihor be a proper name); and "the rivers of Cush," or "Ethiopia." It must be observed that the word Nile nowhere occurs in the A. V.

(a.) *Shihor*, יֶשׁוֹר, יָשׁוֹר, יָשָׁר, "the black," from יָשָׁר, "he or it was or became black." The idea of blackness conveyed by this word has, as we should expect in Hebrew, a wide sense, applying not only to the color of the hair (Lev. xiii. 31, 37), but also to that of a face tanned by the sun (Cant. i. 5, 6), and of a skin black through disease (Job xxx. 30). It seems, however, to be indicative of a very dark color; for it is said in the Lamentations, as to the exiled Nazarites in the besieged city, "Their face, is darker than blackness" (Is. 3). Thus the Nile is meant by Shihor is evident from its mention as equivalent to *Yeir*, "the river," and as a great river, where Isaiah says of Tyre, "And by great waters, the saving of Shihor, the harvest of the river (N. N. [is] her revenue" (xxiii. 3); from its being put as the western boundary of the Promised Land (Josh. xiii. 3; 1 Chr. xiii. 5), instead of "the river of Egypt." (Gen. xv. 18); and from its being spoken of as the great stream of Egypt, just as the Euphrates was of Assyria (Jer. ii. 18). If, but this is by no means certain, the name Nile, *Nēoς*, be really indicative of the color of the river, it must be compared with the Sanskrit नील, nila, "blue," especially, probably, "dark blue," also even "black," as निलक्ष, nilapsena, "black mud," and must be considered to be the Indo-European equivalent of Shihor. The signification "blue" is noteworthy, especially as a great confound, which most nearly corresponds to the Nile in Egypt, is called the Blue River, or, by Europeans, the Blue Nile.

(b.) *Yeir*, יֶיֵר, יֶיוֹר, is the same as the ancient Egyptian ĄΤΒΗ, ΑΙΡ, and the Coptic ἶηπο, Ἰηπο, Ἰηψ (M), Ἰηψ (S).

It is important to notice that the second form of the ancient Egyptian name alone is preserved in the later language, the second radical of the first having been lost, as in the Hebrew form; so that, on this double evidence, it is probable that this commoner form was in use among the people from early times. *Yeir*, in the singular, is used of the Nile alone, excepting in a passage in Daniel (xii. 5, 6, 7), where another river, perhaps the Tigris (comp. x. 4), is intended by it. In the plural, יְהֵרִים, this name is applied to the branches and canals of the Nile (Ps. lxviii. 44; Ez. xxiii. 3 ff., xxx. 12), and perhaps tributaries also, with, in some places, the addition of the names of the country, Mitsrāim, Matar, יִתְרָנָן יִתְרָנָן (Is. xvii. 18, A. V. "rivers of Egypt"), יִתְרָנָן (xix. 6, "brakes of the desert") xxviii. 23, "rivers of the besieged places"; but it is also used of streams or channels, in a general sense, when no particular ones are indicated (see Is. xxxiii. 21; Job xxxviii. 10). It is thus evident that this name specially designates the Nile; and although properly meaning a river, and even used with that signification, it is probably to be regarded as a proper name when applied to the Egyptian river. The latter inference may perhaps be drawn from the constant mention of the Euphrates as "the river:" but it is to be observed that Shihor, or "the river of Egypt," is used when the Nile and the Euphrates are spoken of together, as though *Yeir* could not be well employed for the former, with the ordinary term for river, *nīḥār, for the latter."*  

(c.) "The river of Egypt," יִתְרָנָן יִתְרָנָן, is mentioned with the Euphrates in the promise of in the original of Ecclesiasticus xxvii. 27, where the Greek text reads δι αὐτοῦ, יִתְרָנָן having been unman derstood (Genesius, Tert. s. v.).
the extent of the land to be given to Abraham's posterity, the two limits of which were to be "the river of Egypt" and "the great river, the river Rephraim" (Gen. xv. 18).

(d) "The Nachal of Egypt," אודא הפקס עיר, has generally been understood to mean "the torrent" or "brook of Egypt," and to designate a desert stream at El-Arosseh, on the eastern border. Certainly выпускает usually signifies a stream or torrent, not a river; and when a river, one of small size, and dependent upon a mountain-rain or snow; but as it is also used for a valley, corresponding to the Arabic واد (wād), which in like manner is employed in both senses, it may apply like it, in the case of the Gudalquivir, etc., to great rivers. This name must signify the Nile, for it occurs in cases parallel to those where Shiloh is employed (Num. xxxiv. 1; Josh. xv. 4, 47; 1 K. viii. 63; 2 K. xiv. 7; Is. xxvii. 12), both designating the easternmost branch of the river as the border of the Philistine territory, where the Egyptians equally put the border of their country towards Canaan or Kanaan (Canaan). It remains for us to decide whether the name signifies the "brook of Egypt," or whether Nachal be a Hebrew form of Nile. On the one side may be urged the likelihood that the middle radical should not be found in the Indo-European equivalents, although it is not one of the most permanent letters; on the other, that it is improbable that "nahal" or "nagal" "brook" would be used for the same stream. If the latter be here a proper name, נחל must be supposed to be the same word; and the meaning of the Greek as well as the Hebrew name would remain doubtful, for we could not then positively decide on an Indo-European signification. The Hebrew word נחל might have been adopted as very similar in sound to an original proper name; and this idea is supported by the forms of various Egyptian words in the Bible, which are susceptible of Hebrew etymologies in consequence of a slight change. It must, however, be remembered that there are traces of a Semitic language, apparently distinct from Hebrew, in geographical names in the east of Lower Egypt, probably dating from the Shepherd-period; and therefore we must not, if we take נחל to be here Semitic, restrict its meaning to that to which it bears or could bear in Hebrew.

(e) "The rivers of Cush," נחלchercheע, are above mentioned in the extremely difficult prophecy contained in Is. xviii. 4. From the use of the plural, a single stream cannot be meant, and we must suppose "the rivers of Ethiopia" to be the confluent or tributaries of the Nile. Genesis (Ex. xiv. 3) makes them the Nile and the Astors. Without attempting to explain this prophecy, it is interesting to remark that the expression, "Whose land the rivers have spoiled" (vv. 2, 7), if it apply to any Ethiopian nation, may refer to the ruin of great part of Ethiopia, for a long distance above the first cataract, in consequence of the fall of the level of the river. This change has been effected through the breaking down of a barrier at that cataract, or at Sobekk, by the valley which has been placed above the reach of the fertilizing annual deposit. The Nile is sometimes poetically called a sea, ים (Is. xvi. 2; Nah. iii. 7, Job. xli. 31); but we cannot agree with Gesenius, Thes. s. v., that it is intended in Is. xix. 5): this, however, can scarcely be considered to be one of its names.

It will be instructive to mention the present appellations of the Nile in Arabic, which may illustrate the Scripture terms. By the Arabs it is called Bahir en-Nil, "the river Nile," the word "bahir" being applied to seas and the greatest rivers. The Egyptians call it Bahir, or "the river" alone; and call the inundation En-Nil, or "the Nile." This latter use of what is properly a name of the river resembles the use of the plural of "Yard in the Bible for the various channels or even streams of Nile-water.

With the ancient Egyptians, the river was sacred, and had, besides its ordinary name already given, a sacred name, under which it was worshipped, HAPPE, or HAPPE-NE, "the abyss," or "the abyss of waters," or "the hidden." Corresponding to the two regions of Egypt, the Upper Country and the Lower, the Nile was called HAPPE-NEER, "the source of the HAPPE." By the Egyptians, the former name applied to the river in Nubia as well as in Upper Egypt. The god Nius was one of the lesser divinities. He is represented as a stout man having woman's breasts, and is sometimes painted red to denote the river during its rise and inundation, or High Nile, and sometimes blue, to denote it during the rest of the year, or Low Nile. The figures of HAPPE are frequently represented on each side of the throne of a royal statue, or in the same place in a bas-relief, binding it with water-plants, as though the prosperity of the kingdom depended upon the produce of the river. The name HAPPE, perhaps, in these cases, HAPPE, was also applied to one of the four children of Osiris, called by Egyptologists the genius of AMENT or Hades, and to the bull Apis, the most revered of all the sacred animals. The genius does not seem to have any connection with the river, excepting indeed that Apis was sacred to Osiris. Apis was worshipped with a reference to the inundation, perhaps because the myth of Osiris, the conflict of good and evil, was supposed to be represented by the struggle of the fertilizing river or inundation with the desert and the sea, the first threatening the whole valley, and the second wasting it along the northern coast.

2. Description of the Nile.—We cannot as yet determine the length of the Nile, although recent discoveries have narrowed the question. There is scarcely a doubt that its largest current is fed by the great lakes on and south of the equator. It has been traced upwards for about 2,700 miles, measured by its course, not in a direct line, and its extent is probably upwards of 1,000 miles more, making it longer than even the Mississippi, and the longest of rivers. In Egypt and Nubia it flows through a bed of silt and slime, resting upon marine or nummulitic limestone, covered by a later formation, over which, without the valley, lie the sand and rocky debris of the desert. Beneath the limestone is a sandstone formation, which rises and bounds the valley in its bed in the higher part of the Nile. Again beneath the sandstone is the breccia verde, which appears above it in the desert eastward of Thebes, and yet lower a group of zoolite rocks, gneisses, quartzites, mica schists, and clay
The Nile is a river flowing through northeastern Africa and the Nile Delta into the Mediterranean Sea. It is one of the longest rivers in the world, stretching approximately 6,650 kilometers (4,130 miles) from its source inBurundi to its delta. The Nile is a vital resource for agriculture, hydroelectric power generation, and water supply for millions of people.

The Nile is characterized by two main branches, the White Nile and the Blue Nile, which meet in the Sudan and flow together into Egypt. The river is divided into three sections: the cataract section in the south, the middle section through the Nile Delta, and the delta section into the Mediterranean Sea. The cataract section is characterized by rapids and waterfalls, including the Great Bahr el-Gebal Falls, which are a major source of hydroelectric power.

The Nile is divided into three main sections:

1. The cataract section
2. The middle section
3. The delta section

The cataract section is characterized by rapids and waterfalls, including the Great Bahr el-Gebal Falls, which are a major source of hydroelectric power. The middle section is characterized by a series of dams and reservoirs, including the Aswan High Dam, which is the largest arch dam in the world. The delta section is characterized by the Nile Delta, which is one of the most fertile regions in the world and supports a large population of people engaged in agriculture.
...must be recollected that there are allusions to Egypt, and especially to its animals and products in this book, so that the Nile may well be here referred to, if the passage do not distinctly mention it. In Lower Egypt the chief differences are that the view is spread out in one rich plain, only bounded on the east and west by the desert, of which the edge is low and sandy, unlike the mountains above, though essentially the same, and that the two branches of the river are narrower than the unindivided stream. On either bank, during Low Nile, extend fields of corn and barley, and near the river-side stretch long groves of palm-trees. The villages rise from the level plain, standing upon mounds, often ancient sites, and surrounded by palm-groves, and yet higher dark-brown mounds mark where of old stood towns, with which often "their memorial is perilous." (Ps. ix. 6). The villages are connected by dykes, along which pass the chief roads. During the inundation the whole valley and plain is covered with sheets of water, above which rise the hill-like islands, only to be reached along the half-burned dykes. The aspect of the country is as though it were overflowed by a destructive flood, while between its banks, here and there broken through and constantly giving way, rushes a vast turbid stream, against which no boat could make its way, except by tacking, were it not for the north wind that blows ceaselessly during the season of the inundation, making the river seem more powerful as it beats it into waves. The prophets more than once allude to this striking condition of the Nile. Jeremiah says of Pharaoh-Necho's army, "Who is [this] [that] cometh up as the Nile [Ye 4], whose waters are moved as the rivers?" Egypt riseth up like the Nile, and [his] waters are moved like the rivers; and he saith, I will go up, [and] will cover the land: I will destroy the city and the inhabitants thereof" (xvi. 7, 8). Again, the prophecy "against the Philistines, before that Pharaoh smote Gaza," commences, "Thus saith the Lord: Behold, waters rise up out of the north, and shall be as an overflowing stream (nachal), and shall overflow the land, and all that is therein; the city, and them that dwell therein" (xviii. 1, 2). Amos, also, a prophet who especially refers to Egypt, uses the inundation of the Nile as a type of the utter desolation of his country. "The Lord hath sworn by the excellency of Jacob. Surely I will never forget any of their works. Shall not the land tremble for this, and every one mourn that dwelleth therein? and it shall rise up wholly as the Nile (כַּנַּי); and it shall be cast out and drowned, as [by] the Nile (כַּנַּי כַּנַּי) of Egypt" (viii. 7, 8; see ix. 5).

The banks of the river are cultivated by the women who come down to draw water, and, like Pharaoh's daughter, to bathe, and the herds of kine and buffaloes which are driven down to drink and wash, or to graze on the grass of the swamps, like the good kine that Pharaoh saw in his dream as "he stood by the river," which were coming out of the river, and "set in the marsh grass" (Gen. xli. 1, 2). The river itself abounds in fish, which anciently formed a chief means of sustenance to the inhabi-
lants of the country. Perhaps, as has been acutely remarked in another article, Jacob, when blessing Ephraim and Manasseh, used for their multiplying the term ἡγεμόνια (Gen. xviii. 16), which is connected with ἡγεμόνις, a fish, though it does not seem certain which is the primitive; as though he had been struck by the abundance of fish in the Nile or the canals and pools fed by it. [MANASEEH, vol. ii. p. 1769.] The Israelites in the desert looked back with regret to the fish of Egypt: "We remember the fish, which we did eat in Egypt from abundance, the reeds, and the elders, in the wilderness; the crocodile is constantly spoken of in the Bible as the emblem of Pharaoh, especially in the prophecies of Ezekiel. [EGYPT, vol. i. p. 674.] The great difference between the Nile of Egypt in the present day and in ancient times is caused by the failure of some of its branches, and the ceasing of some of its chief vegetable products; and the chief change in the aspect of the cultivable land, as dependent on the Nile, is the result of the ruin of the fish-pools and their conduits, and the consequent decline of the fisheries. The river was famous for its seven branches, and under the Roman dominion eleven were counted, of which, however, there were actually six or seven. Herodotus notices that there were seven, of which he says that two, the present Danietta and Rosetta branches, were originally artificial, and he therefore speaks of "the five mouths" (ii. 10). Now, as for a long period past, there are no navigable and unobstructed branches but these two that Herodotus distinguishes as in origin works of man. This change was prophesied by Isaiah: "And the waters shall fall from the sea, and the river shall be wasted and dried up" (xix. 5). Perhaps the same prophet, in yet more precise words, predicts this, where he says, "And the Lord shall utterly destroy the tongue of the Egyptian sea; and with his mighty wind shall he shake his hand over the river, and shall smite it in the or [into] seven streams, and make [men] go dry under [in shall]" (xix. 15). However, from the context, and a parallel passage in Zechariah (x. 10, 11), it seems probable that the Euphrates is intended in this passage by "the river." Ezekiel also prophesies of Egypt that the Lord would "make the rivers drought" (xxx. 12), here evidently referring to either the branches or canals of the Nile. In exact fulfillment of these prophecies the bed of the highest part of the Gulf of Suez has dried, and all the streams of the Nile, excepting those which Herodotus says were originally artificial, have wasted, so that they can be crossed without fording.

The monuments and the narratives of ancient writers show us in the Nile of Egypt in old times, a stream bordered by flags and reeds, the covert of abundant wild fowl, and bearing on its waters the fragrant flowers of the various-colored lotus. Now, in Egypt, scarcely any reeds or water-plants, the famous papyrus being nearly if not quite extinct, and the lotus almost unknown — are to be seen, excepting in the marshes near the Mediterranean. This also was prophesied by Isaiah: "The papyrus-reeds (?) ἔθελος in the river (?ησώτα), on the edge of the river, and everything growing [lit. "sown"] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix. 7). When it is recollected that the water-plants of Egypt were so abundant as to be a great source of revenue in the prophet's time, and much later, the exact fulfilment of his predictions is a valuable evidence of the truth of the old opinion as to "the sure word of prophecy." The failure of the fisheries is also foretold by Isaiah (xix. 8, 10), and although this was no doubt a natural result of the wasting of the river and streams, its cause could not have been anticipated by human wisdom. Having been very productive, and a main source of revenue as well as of sustenance, the fisheries are now scarcely of any moment, excepting about Lake Menzeh, and in some few places elsewhere, chiefly in the north of Egypt.

Of old the great river must have shown a more fair and busy scene than now. Boats of many kinds were ever passing along it, by the painted walls of temples, and the galleries that extended around the light summer pavilions, from the pleasure-galley, with one great square sail, white or with variegated pattern, and many oars, to the little papyrus skiff, dancing on the water, and carrying the seekers of pleasure where they could shoot with arrows, or knock down with the throw-stick, the wild-fowl that abounded among the reeds, or engage in the hunt of the hippopotamus or the crocodile. In the Bible the papyrus-boats are mentioned; and they are shown to have been used for their swiftness to carry tidings to Ethiopia (Is. xviii. 2).

The great river is constantly before us in the history of Israel in Egypt. Into it the male children were cast; in it, or rather in some canal or pool, was the ark of Moses put, and found by Pharaoh's daughter when she went down to bathe. When the plagues were sent, the sacred river — a main support of the people — and its waters everywhere, were turned into blood. [PLAGUES OF EGYPT.]

The prophets not only tell us of the future of the Nile: they speak of it as it was in their days. Ezekiel likens Pharaoh to a crocodile, bearing no one in the midst of his river, yet dragged forth with the fish of his rivers, and left to perish in the wilderness (xxix. 1-5; comp. xxxiii. 1-9). Nahum thus speaks of the Nile, when he warns Nineveh by the ruin of Thebes: "Art thou better than No-Amon, that was situated among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall [was] from the sea?" (iii. 8). Here the river is spoken of as the rampart, and perhaps as the support of the capital, and the situation, most remarkable in Egypt, of the city on the two banks is indicated [NO-AMON]. But still more striking than this description is the use which we have already noticed of the inundation, as a figure of the Egyptian armies, and also of the coming of utter destruction, probably by an invading force.

In the New Testament there is no mention of the Nile. Tradition says that when Our Lord was brought into Egypt, his mother came to Heliopolis [OX.] If so, He may have dwelt in his childhood by the side of the ancient river which witnessed so many events of sacred history, perhaps the coming of Abraham, certainly the rule of Joseph, and the long oppression and deliverance of Israel their posterity. *

* The problem of the sources of the Nile has been solved by the explorations of Captain J. H. Speke in 1860-63, and of Sir Samuel W. Baker in 1861-64. Already in 1838 Speke had discovered
the Victoria Nyanza, a vast sheet of water 2,000 feet above the ocean, lying approximately between 31° 30′ and 95° 30′ E. long. and lat. 3° S. and the equator. This lake Speke explored only along its western border, from Muanza, its extreme southern point, to a corresponding point at the extreme north. Information derived from Arabs who had traversed the country to the east, between the lake and the mountain region of Kilimanjaro and Kenya, satisfied him that upon that side Nyanza receives no tributaries of any importance, the country being hills, with salt lakes and salt plains chiefly between the first and second degrees of south latitude, and having only occasional runnels and rivulets along the margin of the lake. This opinion, however, does not coincide with the impressions of the missionaries Krafft and Helmann, who travelled extensively in the countries of Usumbura, Juzur, and Usumbura, and heard of rivers running westward from Mount Kenia, although from the more southern peak of Kilimanjaro the waters flow to the east.

Dr. Krafft penetrated as far as Kitui, from which point he distinctly saw the horns of the Kenia Mountain, in lat. 34° S., long. 35° E. He did not attempt to reach the mountain; but he learned from the natives that a river ran from Kenia toward the Nile, and also that there was a large salt lake to the northeast of the Victoria Nyanza. Upon the western side of the lake the only feeder of any importance is the Kilimanykole River, a broad, deep stream, about eighty yards wide at the point where Speke crossed it—that issues from the great "Moon mountain," Mlanira, and enters the lake at about the first degree of south latitude. Just north of the equator, between 33° and 34° E. long., the White Nile emerges from the Victoria Nyanza by the plume of Ripon Falls, a cataract between four and five hundred feet in width, and about twelve feet deep. From Ripon Falls to Urumbgoni the river is clear but full-bodied; thence to Karuma it presents the sluggish appearance of a large pond. Between the head of the lake and Gokadooko are three principal cataracts—that to Urumbgoni a fall of 507 feet, to Patrol a second fall of 1012 feet, and the third to Gokadooko, of 504 feet. After following the course of the Nile from Ripon Falls to Karuma Falls, Captain Speke there crossed the river, and leaving it upon the west of him, continued his journey by land to Gokadooko, and lost the opportunity of completing his great discovery.

At Gokadooko Speke met Baker, who was about starting for Karuma Falls, and communicated to him the results of his own explorations, together with a map of his route, and some valuable suggestions touching the westward head of the Nile, and its probable connection with the Little Luta Nyanza. Baker had already devoted much time to the exploration of the numerous tributaries of the White Nile. Of these one of the most important is the Sobat, coming from the southeast, which he estimated to be 120 yards wide and 25 feet deep. The Sobat Goyal, farther to the south, owes so sluggishly that it seems like dead water, and the whole region between Kilimanjaro and Gokadooko abounds in desolate and fever-ridden marshes. The main river now received his attention. Following the course of the stream from the point where Speke had abandoned it, he found that from Karuma Falls the Nile runs almost due west; but its whole volume is precipitated through a granite gap fifty yards wide over a perpendicular fall of 120 feet. To this stupendous cataract the explorer gave the name Murchison Falls, in honor of the President of the Royal Geographical Society.

After passing these falls, the river enters into a vast lake, the Albert Nyanza, which stretches over a distance of 250 geographical miles, from 29° south lat. to nearly 3° north, and mainly between 28° and 31° E. long. Emerging from this lake near its northern extremity, the Nile presents its course toward Gondokoro. The Albert Nyanza lies in a vast rock basin, about 1,500 feet below the general level, and receives the drainage of a region of ten-months' rains. In the volume of water and the area of drainage the Albert Nyanza is probably the principal source of the Nile; but the southern extremity of the Victoria Nyanza marks the greatest distance yet measured, and gives a total length of 2,500 miles.

While the substantial fruits of the discoveries of Speke and Baker, as given above, cannot be affected by any future exploration, it is necessary for a complete knowledge of the sources of the Nile, that the Victoria Nyanza shall be circumnavigated, and the country to the east of it scientifically explored; and also, that the Albert Nyanza be followed up to its head, and explored for tributaries along its western shore.

J. P. T.

NIMRAH (777777 [panther]: [Rom. Naga; Vat. N)läppia; Alex. Nalpia; Nnyom], a place mentioned by this name, in Nm. xxvii. 3 only, among those which formed the districts of the "land of Jazer and the land of Gilgal," on the east of Jordan, petitioned for by Reuben and Gad. It would appear from this passage to have been near Jazer and Hebron, and therefore on the upper level of the country. If it is the same as Beth-Nimrah (ver. 51), it belonged to the tribe of Gad. But Ezekiel, however (Ezek. xlv. 17), gives it as a "city of Reuben in Gilgal," and said to have been in his day a large place (wqun meyjat) in "Batanea, bearing the name of Alaha." This account is full of difficulties, for Reuben never possessed the country of Gilgal, and Batanea was situated several days' journey to the N.W. of the district of Hebron, beyond not only the territory of Reuben, but even that of Gad. A wady and a town, both called Nimrah, have, however, been met with in Bethany, east of the Lishah, and five miles N. W. of Kauwata (see the maps of Porter, Van de Velde, and Wetstein). On the other hand the name of Nimra is said to be attached to a watercourse and a site of ruins in the Jordan Valley, a couple of miles east of the river, at the embouchure of the Wady Shobah (Beth-Nimrah). But this again is too far from Hebron in the other direction.

The name Nom ("panther"), appears to be a common one on the east of Jordan, and it must be left to future explorers (when exploration in that region becomes possible) to ascertain which (if either) of the places so named is the Nimrah in question.

NIMRIM, THE WATERS OF (777777 [nayüm]): in Is. vi. 10 Nyl. Nu'mh, [Sin. v 177 Nymiph, Alex. v 177 Nmyhph], Alex. v 177 Nymip, in Jer. vi. 10 Nyl Nymip, Alex. Nymhph, Aid. Nu'mph, a stream...

a The present Greek text has Karama; but the correction is obvious.
NIMROD

NIMROD (נִוְרֹד) [firm, strong, Dictr.: a hero, First; Neoph.]: נִוְרֹד, a son of Cush and grandson of Ham. The events of his life are recorded in a passage (Gen. x. 8 ff.), which, from the conciseness of its language, is involved in considerable uncertainty. We may notice, in the first place, the terms in ver. 8, 9, rendered in the A. V. "mighty hunter before the Lord." The idea of any moral qualities being conveyed by these expressions may be at once rejected; for, on the one hand, the words "before the Lord" are a mere superlativistic adjunct (as in the parallel expression in Jon. iii. 3), and contain no notion of Divine approval; and, on the other hand, the ideas of violence and insolence with which the mention invested the character of the hero, as delineated by Josephus a (Int. i. 4, § 2), are not necessarily involved in the Hebrew words, though the term נִוְרֹד is occasionally taken in a bad sense (e. g. Ps. iv. 1). The term may be regarded as denoting personal prowess with the necessary notion of gigantic stature (as in the i.XX. 47/48). It is somewhat doubtful whether the prowess of Nimrod rested on his achievements as a hunter or as a conqueror. The literal rendering of the Hebrew words would undoubtedly apply to the former, but they may be regarded as a translation or proverbial expression, originally current in the land of Nimrod, where the terms significant of "hunter" and "hunting" appear to have been applied to the forays of the sovereigns against the surrounding nations. The two phases of prowess, hunting and conquering, may indeed well have been combined in the same person in a rude age, and the Assyrian monuments abound with scenes which exhibit the skill of the sovereigns in the chase. But the context certainly favors the special application of the term to the case of conquest, for otherwise the assertion in ver. 8, "he began to be a mighty one in the earth," is devoid of point—while, taken as introductory to what follows, it seems to indicate Nimrod as the first who, after the flood, established a powerful empire on the earth, and became the leader of those who are afterward described as "kings". The next point to be noticed is the expression in ver. 10, "The beginning of his kingdom," taken in conjunction with the commencement of ver. 11, which admits of the double sense: "Out of that land he went forth Asarhun," as in the text of the A. V., and "out of that land he went forth to Assyria," as in the margin. These two passages mutually react on each other: for if the words "beginning of his kingdom" mean, as we believe to be the case, "his first kingdom," or, as Gesenius (Thes. p. 1252) renders it, "the territory of which it was at first composed," then the expression implies a subsequent extension of his kingdom, in other words, that "he went forth to Assyria." If, however, the sense of ver. 11 be, "out of that land he went forth Asarhun," then no other sense can be given to ver. 10 than that "the capital of his kingdom was Babylon," though the expression must be equally applied to the towns subsequently mentioned. This rendering appears untenable in all respects, and the expression may therefore be cited in support of the marginal rendering of ver. 11. With regard to the latter passage, either sense is permissible in point of grammatical construction, for the omission of the local affix to the word אָפָדּוּ in the identification of Nimrod with the constellation Orion, the Hebrew name אָפָדּוּ, "foolish," being regarded as synonymous with Nimrod, and the giant form of Orion, together with its Arabic name, "the giant," supplying another connecting link. Josephus follows the LXX. in his form of the name, נִוְרֹד. The variation in the LXX. is of no real importance, as it may be paralleled by a similar expression of β for δ in the case of Εβραίοι (1 Chr. i. 47), and, in a measure, by the insertion of the β before the liquids in other cases, such as מִנְיָם (Gen. xiv. 13). The variation hardly degrades the attention it has received in Rawlinson's Herod. i. 596.

a A myth and characteristic passage, aimed at the doctrine haireticonos, and playing on the name as signifying a leopard, will be found in Jerome's Commentary on Is. xv. 6.

b The view of Nimrod's character taken by this writer originated partly perhaps in a false etymology of the name, as though it were connected with the Hebrew root מָרַד (מָרַד), "to rebel," and partly from the supposed connection of the hero's history with the building of the tower of Babel. There is no ground for the first of these assumptions; the name is either Cushiote or Assyrian. Nor, again, does the Bible connect Nimrod with the building of the tower; for it only states that Babel formed one of his capitals. Indications have, indeed, been noticed by Bunsen (Bibl. Forschung, v. 74) of a connection between the two narratives; they have undoubtedly a common Jehovistic prototype which has been contributed by the expression in Is. 1, 2, "from the east," or "eastward" (אָפָדּוּ) in reality worthless for the purpose. The influence of the view taken by Josephus is curiously developed

II brook (not improbable a stream with pools) within the country of Moab, which is mentioned in the denunciations of that nation uttered, or quoted, by Isaiah (xv. 6) and Jeremiah (xlvii. 34). From the former of these passages it appears to have been famed for the abundance of its grass.

If the view taken of these denunciations under the head of Moab (pp. 184, 185) be correct, we should look for the site of Nimrin in Moab proper, i. e. on the southeastern shoulder of the Dead Sea, a position which agrees well with the mention of the "brook of the willows" (perhaps הֵין הַמָּנָה) and the "borders of Moab," that is, the range of hills encircling Moab at the lower part of the territory.

A name resembling Nimrin still exists at the southeastern end of the Dead Sea, in the Wady en-Numeirich and Bayj en-Numeirich, which are situated on the bench, about half-way between the southern extremity and the promontory of el-Lisan (De Saulcy, Voyage, i. 284, &c.; Seetzen, ii. 354). Eusebius (Onom. Neocopia) places it N. of Sooma, i. e. Zoar. How far the situation of en-Numeirich corresponds with the statement of Eusebius cannot be known until that of Zoar is ascertained. If the Wady en-Numeirich really occupies the place of the watercourse of Nimrin, Zoar must have been considerably further south than is usually supposed. (On the other hand the name a is a common one in the transjordanic localities, and other instances of its occurrence may yet be discovered more in accordance with the ancient statements.)
NIMROD

Nimrod appears in the list of the Egyptian kings of the 22nd dynasty, but there are reasons for thinking that dynasty to have been of Assyrian extraction. In the ancient-Assyrian inscriptions they have no mention of Assyria, the land of Ashur, which forms the chief objection to the marginal rendering, is not peculiar to this passage (comp. 1 K. xvi. 17; 2 K. xv. 14), nor is it necessary even to assume a *predynais in the application of the name Assyria to the land of Asshur at the time of Nimrod's invasion, inasmuch as the historical date of this event may be considerably later than the genealogical statement would imply. Authorities both ancient and modern are divided on the subject, but the most weighty names of modern times support the marginal rendering; as it seems best to accord with historical truth. The unity of the passage is moreover supported by its peculiarities both of style and matter. It does not seem to have formed part of the original genealogical statement, but to be an interpolation of a later date; it is the only instance in which personal characteristics are attributed to any of the names mentioned; the proverbial expression which it embodies bespeaks its traditional and fragmentary character, as there is nothing to connect the passage either with what precedes or with what follows it. Such a fragmentary record, though natural in reference to a single mighty hero, would hardly admit of the introduction of references to others. The only subsequent notice of the name Nimrod occurs in Mic. v. 6, where the 'land of Nimrod' is a synonym either for Assyria, just before mentioned, or for Babylon. The chief towns in the life of Nimrod then are (1) that he was a Cushite; (2) that he established an empire in Shinar (the classical Babylonia), the chief towns being Babel, Erech, Accad, and Calneh; and (3) that he extended this empire northwards along the course of the Tigris over Assyria, where he founded a second group of capitals, Nineveh, Reboeth, Calah, and Tisan. These events correspond to and may be held to represent the salient historical facts connected with the earliest stages of the great Babylonian empire. 1. In the first place, there is abundant evidence that the race that first held sway in the lower Babylonian plain was of Cushite or Hamitic extraction. Tradition assigned to Belus, the mythical founder of Babylon, an Egyptian origin, inasmuch as it described him as the son of Poseidon and Libya,5 and accordingly the Seleucid Sisamtes, i. 82; Apollodorus, ii. 1, § 4; Pausanias, iv. 23, § 5; the astrological system of Babylon (Diad. Sicul. i. 81) and perhaps its religious rites (Eusebius6 ap. Joseph. Ant. i. 4, § 3) were referred to the same quarter; and the legend of Oannes, the great teacher of Babylon, rising out of the Erythrean sea, preserved by Syncellus (Chronogr. p. 28), points in the same direction. The name Cush itself was preserved in Babylon and the adjacent countries under the forms of Cassia, Cissia, Chalch, and Susam or Chasitam. The earliest written language of Babylonia, as known to us from existing inscriptions, bears a strong resemblance to that of Egypt and Ethiopia, and the same words have been found in each country, as in the case of Wirth, the Meroe of Ethiopia, the Mars of Edom (Rawlinson, i. 412). Even the name

---

a The expression "the Cushites," and still more the use of the term "the Cushites," are regarded as indications of a Jebuistic origin, while the genealogy it introduces is in no wise to be further noticed that there is nothing to mark the connection or distinction between Nimrod and the other sons of Cush.

b The passage quoted by Josephus is of so fragmentary a character, that its original purport can hardly be guessed. He confines it apparently to illustrate the name Shinar, but the context favors the supposition that the writer referred to the period subsequent to the flood, in which case we may infer the belief (1) that the population of Babylonia was not of Nimrod's stock, but immigrant; (2) that the point from which it immigrated was from the west, Belus being identified with Zeus Elyneus.
NIMSHI

than personal names, and are but equivalent terms for "the lord," who was regarded as the founder of the empire of Nineveh and Babylon. We have no reason on this account to doubt the personal existence of Nimrod, for the events with which he is connected fall within the shadows of a remote antiquity. But we may, nevertheless, consistently with this belief, assume that a large portion of the interest with which he was invested was the mere reflection of the sentiments with which the nations of western Asia looked back on the overshadowing greatness of the ancient Babylonian empire, the very monuments of which seemed to tell of days when "there were giants in the earth." The feeling which suggested the coloring of Nimrod as a representative hero still finds place in the land of his achievements, and to him the modern Arabs b ascribe all the great works of ancient times, such as the Birs-Nimrud near Babylon, Tel Nimrud near Bagdad, the dam of Subur el-Nimrud across the Tigris below Mosul, and the well-known mound of Nimrud in the same neighborhood.

W. L. B.

NIMSHI (Nineveh [drawn out, saved, Ges.]: Nāšū, [Vat. Nāšmē, Nāšōšē, Nāšēsā; Alex. Νήσος, Nāšōsēi; 2 Chr Nāšosēi, [Alex. Νήσωτυ] Νίνια]), the grandfather of Jehu, who is generally called "the son of Nimshi." (1 K. xix. 16; 2 K. ix. 14, 20; 2 Chr. xxii. 7).

*NINEVE* (Ninive, Ninis; N. T. Νινιβή, Rec. Text, but Lacon. Treg. Νινιβή; 2 Ch. 36), 8th ed. (Erra: Ninicie), only Luke xii. 32 in the N. T., but repeatedly in the O. T. Apocrypha (Tob. i. 3, 10, 17, &c.). It is the Greek form, instead of the Hebrew employed elsewhere [NINEVEH]. See Wahl's Chrest. Lit. V. Text. Apoc. s. v.

NINEVEH (Nineveh; [see below] Niniveh: in Gen., Rom. Ninve; Ninive, the capital of the ancient empire of Assyria: a city of great power, size, and renown, usually included amongst the most ancient cities of the world of which there is any historic record. The name appears to be compounded from that of an Assyrian deity, "Nin," corresponding, with the Greek Hercules, and occurring in the names of several Assyrian kings, as in "Ninus," the mythical founder, according to Greek tradition, of the city. In the Assyrian inscriptions Nineveh is also supposed to be called "the city of Bel."

Nineveh is first mentioned in the O. T. in connection with the primitive dispersion and migrations of the human race. Assur, or, according to the marginal reading, which is generally preferred, Nimrod, is there described (Gen. x. 11) as extending his kingdom from the land of Shinar, or Babylonia, in the south, to Assyria in the north, and founding four cities, of which the most famous was Nineveh. Hence Assyria was subsequently known to the Jews as "the land of Nimrod" (cf. Mic. v. 9), and was believed to have been first peopled by a colony from Babylon. The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period; as in Num. xxiv. 22, 24, and Ps. lxxxiii. 8: but after the notice of the foundation of Nineveh in Genesis no further mention is made of the city until the time of the book of Jonah, or the 8th century B. C., supposing we accept the earliest date for that narrative [JONATHAN], which, however, according to some critics, must have brought down 300 years later, or to the 5th century B. C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Nineveh," and his subjects "the people of Nineveh." Assyria is first called a kingdom in the time of Menahem, 7 th n. c. 742 (2 Kings iv. 32), but its rise to importance, as directed by Assyria in its history, is connected with the personage of Jeroboam II, who caused the rise of the house of David into power. The whole period of the existence of the kingdom is divided into five periods: (1) from the time of Jeroboam II, about 730 B.C., to his death; (2) during the reign of his son, 726-722 B.C.; (3) a period of anarchy, 722-715 B.C.; (4) the reign of Pekah, 715-701 B.C.; (5) that of Jeroboam III, 715-705 B.C. The kingdom of Assyria is divided into two branches, the one of which was the kingdom of Ararat in Asia Minor, which did not become a kingdom till the last century B.C.

Ninabur, however, would appear to have been a great city in Assyria, and we should perhaps feel entitled to assume that it was the seat of Nineveh. The name Ninabur (Ninabur) occurs in 8th century B.C., of which the most famous was Nineveh. Hence Assyria was subsequently known to the Jews as "the land of Nimrod" (cf. Mic. v. 9), and was believed to have been first peopled by a colony from Babylon. The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period; as in Num. xxiv. 22, 24, and Ps. lxxxiii. 8: but after the notice of the foundation of Nineveh in Genesis no further mention is made of the city until the time of the book of Jonah, or the 8th century B. C., supposing we accept the earliest date for that narrative [JONATHAN], which, however, according to some critics, must have brought down 300 years later, or to the 5th century B. C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Nineveh," and his subjects "the people of Nineveh." Assyria is first called a kingdom in the time of Menahem, 7 n. c. 742 (2 Kings iv. 32), but its rise to importance, as directed by Assyria in its history, is connected with the personage of Jeroboam II, who caused the rise of the house of David into power. The whole period of the existence of the kingdom is divided into five periods: (1) from the time of Jeroboam II, about 730 B.C., to his death; (2) during the reign of his son, 726-722 B.C.; (3) a period of anarchy, 722-715 B.C.; (4) the reign of Pekah, 715-701 B.C.; (5) that of Jeroboam III, 715-705 B.C. The kingdom of Assyria is divided into two branches, the one of which was the kingdom of Ararat in Asia Minor, which did not become a kingdom till the last century B.C.

The term Nabatean as meaning old Babylonian, and the works of Qutamah as the remains of a Babylonian literature. He further identifies the Canaanite dynasty with the fifth or Arabian dynasty of Berosus, and addsuces the legend of Cepheus, the king of Joppa, who engaged from the Mediterranean to the Erythrean sea, in confirmation of such a Canaanite invasion. It would be beyond our province to discuss the various questions raised by this curious discovery. The result, if established, would be to bring the date of Nimrod down to about a. c. 1500.

b The Arabs retain Josephus' view of the impurity of Nimrod, and have a collection of legends respecting his idolatry, his enmity against Abraham, etc. (Layard's Nineveh, i. 21, note).
may have occurred 29 years earlier. [NINAVI]

The city was then had waste, its monuments destroyed, and its inhabitants scattered or carried away into captivity. It never rose again from its ruins. This total disappearance of Nineveh is fully confirmed by the records of profane history. There is no mention of it in the Persian cuneiform inscriptions of the Achemenid dynasty. Herodotus (i. 193) speaks of the Tigris as "the river upon which the town of Nineveh is built on the islet." He must have passed, in his journey to Babylon, very near the site of the city—perhaps actually over it. So accurate a recorder of what he saw would scarcely have omitted to mention, if not to describe, any ruins of importance that might have existed there. Not two centuries had then elapsed since the fall of the city. Equally conclusive proof of its condition is afforded by Xenophon, who, with the ten thousand Greeks encamped during his retreat on, or very near, its site (v. c. 401). The very name had then been forgotten, or at least he does not appear to have been acquainted with it, for he calls one group of ruins "Larissa," and merely states that a second group was near the deserted town of Mespia (Anab. b. iii. 4, 5, 7). The ruins, as he describes them, corresponded with those which exist at the present day, except that he assigns them to the walls near Mespia a circuit of six parasangs, or nearly three times their actual dimensions. Ctesias placed the city on the Euriprates (Prog. i. 2), a proof either of his ignorance or of the entire disappearance of the place. He appears to have led Diosorus Siculus into the same error (ii. 27, 28)." The historians of Alexander, with the exception of Arrian (Iust. pp. 42, 43), do not even allude to the city, over the ruins of which the conqueror must have actually marched. His great victory of Arbela was won almost in sight of them. It is evident that the later Greek and Roman writers, such as Strabo, Ptolemy, and Pliny, could only have derived any independent knowledge they possessed of Nineveh from traditions of no authority. They concur, however, in placing it on the eastern bank of the Tigris. During the Roman period, a small castle or fortified town appears to have stood on some part of the site of the ancient city. It was probably built by the Persians (Ammian. Marcell. xxiii. 22); and subsequently occupied by the Romans, and erected by the Emperor Claudius into a colosseum. It appears to have borne the ancient traditional name of Ninus, as well as its corrupted form of Ninos and Ninus, and also at one time that of Hierapolis. Tacitus (Ann. xii. 13), mentioning its capture by Mithridates, calls it "Ninos;" on coins of Trajan it is "Ninus;" on those of Maximinus "Niniva;" in both instances the epithet Claudianus being added. Many Roman remains, such as sepulchral vases, bronzes and other ornaments, sculptured figures in marble, terra-cottas, and coins, have been discovered in the rubbish covering the Assyrian ruins; besides wells and tombs, constructed long after the destruction of the Assyrian edifices. The Roman settlement appears to have been in its turn abandoned, for there is no mention of it when Heracles gained the great victory over the Persians in the battle of Nineveh, fought on the very site of the ancient city, A. D. 627. After the Arab conquest, a fort on the east bank of the Tigris bore the name of "Ninaw" (Rawlinson, As. Soc. Journal, vol. xii. p. 418). Benjamin of Tudela, in the 12th century, mentions the site of Nineveh as occupied by numerous inhabited villages and small townships (ed. Asher, i. 91). The name remained attached to the ruins during the Middle Ages; and from them a bishop of the Chaldaean Church derived his title (Assenm., iv. 450); but it is doubtful whether any town or fort was so called. Early English travellers merely allude to the site (Purchas, ii. 1387). Niebuhr is the first modern traveller who speaks of "Ninipah" as a village standing on one of the ruins which he describes as "a considerable hill" (iii. 553). This may be a corruption of "Nebbi Yunus," the Prophet Jonah, a name still given to a village containing his sepulchral tomb. Mr. Rich, who surveyed the site in 1820, does not mention Ninipah, and no such place now exists. Tribes of Turcomans and sedentary Arabs, and Chaldaean and Syrian Christians, dwell in small mud-built villages, and cultivate the soil in the country around the ruins; and occasionally a tribe of wandering Kurds, or of Bedouins driven by want from the desert, will pitch their tents amongst them. After the Arab conquest of the west of Asia, Mosul, at one time the flourishing capital of an independent kingdom, rose on the opposite or western bank of the Tigris. Some similarity in the names has suggested its identification with the Mespla of Xenophon; but its first actual mention only occurs after the Arab conquest (A. H. 106, and A. D. 657). It was sometimes known as Athur, and was united with Nineveh as an Episcopal see of the Chaldaean Church (Assenm., iii. 269). It has lost all its ancient prosperity, and the greater part of the town is now in ruins.

Traditions of the unrivalled size and magnificence of Nineveh were equally familiar to the Greek and Roman writers, and to the Arab geographers. But the city had fallen so completely into decay before the period of authentic history, that no description of it, or even of any of its monuments, is to be found in any ancient author of trust. Diosorus Siculus asserts (ii. 3) that the city formed a quadrangle of 150 stadia by 90, or altogether of 480 stadia (no less than 60 miles); and was surrounded by a wall at least 200 feet broad enough for chariots to drive abreast upon, and defended by 1500 towers, each 200 feet in height. According to Strabo (xvi. 737) it was larger than Babylon, which was 385 stadia in circuit. In the O. T. we find only vague allusions to the splendor and wealth of the city, and the very indefinite statement in the book of Jonah that it was "an exceeding great city," or "a great city to God," or "for the city of God" (i.e. in the sight of God), "of three days' journey;" and that it contained "six score thousand persons who could not discern between their right hand and their left hand, and also much cattle" (iv. 11). It is obvious that the accounts of Diosorus are for the most part absurd exaggerations, founded upon fabulous traditions, for which existing records do not supply a warrant. It may, however, be remarked that the dimensions he assigns to the area of the city would correspond to the three days' journey of Jonah — the Jewish day's journey being 20 miles — if that expression be applied to the circuit of the walls. "Persons not discerning between their right hand and their left" may either allude...
to children, or to the ignorance of the whole population. If the first be intended, the number of inhabitants, according to the usual calculation, would have amounted to about 600,000. But such expressions are probably mere eastern figures of speech to denote vastness, and far too vague to admit of exact interpretation.

The political history of Nineveh is that of Assyria, of which a sketch has already been given. Assyria has been observed that the territory included within the boundaries of the kingdom of Assyria proper was comparatively limited in extent, and that almost within the immediate neighborhood of the capital petty kings appear to have ruled over semi-independent states, owning allegiance and paying tribute to the great Lord of the Empire, "the King of Kings," according to his oriental title, who dwelt at Nineveh. (Cf. Is. x. 8: "Are not my princes altogether kings?"") These petty kings were in a constant state of rebellion, which usually showed itself by their refusal to pay the apportioned tribute—the principal link between the sovereign and the dependent states—and repeated expeditions were undertaken against them to enforce this act of obedience. (Cf. 2 K. xvi. 7, xvii. 4, where it is stated that the war made by the king was upon the Jews was for the purpose of enforcing the payment of tribute.) There was, consequently, no bond of sympathy arising out of common interests between the various populations which made up the empire. Its political condition was essentially weak. When an independent monarch was sufficiently powerful to carry on a successful war against the great king, or a dependent prince sufficiently strong to throw off his allegiance, the empire soon came to an end. The fall of the capital was the signal for universal disruption. Each petty state asserted its independence, until reconquered by some warlike chief who could found a new dynasty and a new empire to replace those which had fallen. Thus on the borders of the great rivers of Mesopotamia arose in turn the first Babylonian, the Assyrian, the Median, the Parthian, the Sassanian, the Persian, and the Seleucid empires. The capital was however invariably changed, and generally transferred to the principal seat of the conquering race. In the East men have rarely rebuild great cities which have once fallen into decay—never perhaps on exactly the same site. If the position of the old capital was deemed, from political or commercial reasons, more advantageous than any other, the population was settled in its neighborhood, as at Delhi, and not amidst its ruins. But Nineveh, having fallen with the empire, never rose again. It was abandoned at once, and suffered to perish utterly. It is probable that, in conformity with an eastern custom, of which we find such remarkable illustrations in the history of the Jews, the entire population was removed by the conquerors, and settled as colonists in some distant province.

The Ruins.—Previous to recent excavations and researches, the ruins which occupied the presumed site of Nineveh seemed to consist of mere shapeless heaps or mounds of earth and rubbish. Unlike the vast masses of brick masonry which mark the site of Babylon, they showed externally no signs of artificial construction, except perhaps here and there traces of rude walls of sun-dried bricks. Some of these mounds were of enormous dimensions—looking in the distance rather like natural elevations than the work of men's hands. Upon and around them, however, were scattered innumerable fragments of pottery—the unerring evidence of former habitations. Some had been chosen by the scattered population of the land as sites for villages, or for small mud-built forts, the mound itself affording means of refuge and defense against the marauding parties of Bedouins and Kurds which for generations have swept over the face of the country. The most of them were sown with corn or barley. During the spring months they were covered with grass and flowers, broid by the winter rains. The Arabs call these mounds "Tel," the Turcomans and Turks "Tepeh," both words being equally applied to natural hills and elevations, and the first having been used in the same double sense by the most ancient Semitic races (cf. Hebrew תֵּל, "a hill," or "a mound," a heap of rubbish," Ez. iii. 15; Ezr. ii. 59; Neh. vii. 61; 2 K. xix. 12). They are found in vast numbers throughout the whole region watered by the Tigris and Euphrates and their confluentes, from the Taurus to the Persian Gulf. They are seen, but are less numerous, in Syria, parts of Asia Minor, and in the plains of Armenia. Wherever the Tigris and Euphrates and their affluents have been crossed or ascended are elaborately furnished remains which identify the period of their construction with that of the alternate supremacy of the Assyrian, Babylonic, and Persian empires. They differ greatly in form, size, and height. Some are mere conical heaps, varying from 50 to 150 feet high; others have a broad, flat summit, and very precipitous cliff-like sides, fringed by deep ravines worn by the winter rains. Such mounds are especially numerous in the region to the east of the Tigris, in which Nineveh stood, and some of them must mark the ruins of the Assyrian capital. There is no edifice mentioned by ancient authors as forming part of the city, which we are required, as in the case of Babylon, to identify with any existing remains, except the tomb, according to some, of Ninus, according to others of Sardanapalus, which is recorded to have stood at the entrance of Nineveh (Diod. Sic. ii. 7; Assynt. Freq. ed. Muller, p. 136). The only difficulty is to determine which ruins are to be comprised within the actual limits of the ancient city. The northern extremity of the principal collection of mounds on the eastern bank of the Tigris may be fixed at Shereef Khan, and the southern at Ninmord, about 9 miles from the junction of that river with the great Zab, the ancient Euphrates. Eastward they extend to Khor-salad, about 10 miles N. by E. of Shereef Khan, and to Karamless, about 15 miles N. E. of Nimroud. Within the area of this irregular quadrangle are to be found, in every direction, traces of ancient edifices and of former population. It comprises various separate and distinct groups of ruins, four of which, if not more, are the remains of fortified strongholds, defended by walls and ditches, towers and ramparts. The principal are:—1, the group immediately opposite Mosul, including the great mounds of Koumyijik (also called by the Arabs, Armascheeyah) and Nebbi Yunus; 2, that near the junction of the Tigris and Zab, comprising the mounds of Ninmord and Athur; 3, Khor-salad, about 10 miles to the east of the former river; 4, Shereef Khan, about 5½ miles to the north of Koumyijik; and 5, Selaninjah, 3 miles to the north of Ninmord. Other large mounds are Basaklielah, and Karamless, where the remains of fortified inclosures may perhaps be traced.
Bazani, Yarumijeh, and Belhawat. It is scarcely necessary to observe that all these names are comparatively modern, dating from after the Moham-
medan conquest. The respective position of these ruins will be seen in the accompanying map. We will describe the most important.

The ruins opposite Mosul consist of a large enclosure formed by a continuous line of mounds, resembling a vast embankment of earth, but marking the remains of a wall, the western face of which is interrupted by the two great mounds of Kouyunjik and Nebbi Yunus (p. 2161). To the east of this in-
closure are the remains of an extensive line of de-
defences, consisting of moats and ramparts. The inner wall forms an irregular quadrangle with very unequal sides—the northern being 2,533 yards, the western, or the river-face, 4,533, the eastern (where the wall is almost the segment of a circle, 5,300 yards, and the southern but little more than 1,000; altogether 13,280 yards, or 7 English miles 4 fur-
lengths. The present height of this earthen wall is between 40 and 50 feet. Here and there a mound
more lofty than the rest covers the remains of a tower or a gateway. The walls appear to have been originally faced, at least to a certain height, with stone masonry, some remains of which have been discovered. The mound of Kouyunjik is of irregular form, being nearly square at the S. W. corner, and ending almost in a point at the N. E. It is about 1,300 yards in length, by 500 in its greatest width; its greatest height is 96 feet, and its sides are precipitous, with occasional deep ravines or watercourses. The summit is nearly flat, but falls from the W. to the E. A small village formerly stood upon it, but has of late years been abandoned. The Khosr, a narrow but deep and sluggish stream, sweeps round the southern side of the mound on its way to join the Tigris. Anciently dividing itself into two branches, it completely surrounded Kouyunjik. Nebbi Yunus is considerably smaller than Kouyunjik, being about 530 yards by 430, and occupying an area of about 40 acres. In height it is about the same. It is divided into two nearly equal parts by a depression in the surface. Upon it is a Turcoman village containing the apocryphal tomb of Jonah, and a burial-ground held in great sanctity by Mohammedans from its vicinity to this sacred edifice. Remains of entrances or gateways have been discovered in the N. and E. walls (b). The Tigris formerly ran beneath the W. wall, and at the foot of the two great mounds. It is now about a mile distant from them, but during very high spring floods it sometimes reaches its ancient bed. The W. face of the inclosure (a) was thus protected by the river. The N. and S. faces (b and d) were strengthened by deep and broad moats. The E. (c) being most accessible to an enemy, was most strongly fortified, and presents the remains of a very elaborate system of defenses. The Khosr, before entering the inclosure, which it divides into two nearly equal parts, ran for some distance almost parallel to it (f), and supplied the place of an artificial ditch for about half the length of the E. wall. The remainder of the wall was protected by two wide moats (k), fed by the stream, the supply of water being regulated by dams, of which traces still exist. In addition, one or more ramparts of earth were thrown up, and a moat excavated between the inner walls and the Khosr, the eastern bank of which was very considerably raised by artificial means. Below, or to the S. of the stream, a third ditch excavated in the compact conglomerate rock, and about 200 feet broad, extended almost the whole length of the E. face, joining the moat on the S. An enormous outer rampart of earth, still in some places above 80 feet in height (i), completed the defenses on this side. A few mounds outside this rampart probably mark the site of detached towers or fortified posts. This elaborate system of fortifications was singularly well devised to resist the attacks of an enemy. It is remarkable that within the inclosure, with the exception of Kouyunjik and Nebbi Yunus, no mounds or irregularities in the surface of the soil denote ruins of any size. The ground is, however, strewed in every direction with fragments of brick, pottery, and the usual signs of ancient population. Nimroud consists of a similar inclosure of consecutive mounds — the remains of ancient walls. The system of defenses is however very inferior in
important and completeness to that of Konyunjik. The indications of towers occur at regular intervals; 106 may still be traced on the N. and E. sides. The area forms an irregular square, about 2,311 yards by 2,099, containing about 3,000 acres. The N. and E. sides were defended by mounds, the W. and S. walls by the river, which once flowed immediately beneath them. On the S. W. face is a great mound, 700 yards by 490, and covering about 60 acres, with a cone or pyramid of earth about 140 feet high rising in the N. W. corner of it. At the S. E. angle of the inclosure is a group of lofty irregular mounds, the Arabs, after Ninjronfl (lieutenant, Atur (cf. Gen. x. 11). According to the Arab encyclopedias this name at one time applied to all the ruins of Ninjronfl (Layard, Nin. and its Rem., ii. 245, note). Within the inclosure a few slight irregularities in the soil mark the sites of ancient habitations, but there are no indications of ruins of buildings of any size. Fragments of brick and pottery are common. The Tigris is now 11 mile distant from the mound, but sometimes reaches them during extraordinary floods.

The inclosure-walls of Khorsabad form a square of about 2,000 yards. They show the remains of towers and gateways. There are apparently no traces of moats or ditches. The mound which gives its name to this group of ruins rises on the N. W. face. It may be divided into two parts or stages, the upper and lower stages, 900 and 30 feet high, and the lower adjoining it, about 1,750 by 300. Its summit was formerly occupied by an Arab village. In one corner there is a pyramid or cone, similar to that of Ninjronfl, but very inferior in height and size. Within the interior are a few marks marking the sites of propylaia and similar detached monuments, but no traces of considerable buildings. These ruins were known to the early Arab geographers by the name of "Sarron," probably a traditional corruption of the name of Sargon, the king who founded the palaces discovered there.

Shereef Khan, so called from a small village in the neighborhood, consists of a group of mounds of no great size when compared with other Assyrian ruins, and without traces of an outer-wall. Selaminjah is an inclosure of irregular form, situated on a mound overlooking the Tigris about 5,000 yards in circuit, and containing an area of about 410 acres, apparently once surrounded by a ditch or moat. It contains no moat or ruin, and even the earthen rampart which marks the walls has in many places nearly disappeared. The name is derived from an Arab town once of some importance, but now reduced to a miserable village inhabited by Turcomans.

The greater part of the discoveries which, of late years, have thrown so much light upon the history and condition of the ancient inhabitants of Nineveh were made in the ruins of Ninjronfl, Konyunjik, and Khorsabad. The first traveller who carefully examined the supposed site of the city was Mr. Rich, formerly political agent for the East India Company at Bagdad; but his investigations were attended with considerable difficulty, as he had to contend with the inhabitants and the surrounding mounds, of which he made a survey in 1829. From them he obtained a few relics, such as inscribed pottery and bricks, cylinders, and gems. Some time before a bas-relief representing men and animals had been discovered, but had been destroyed by the Mohammedans. He subsequently visited the mound of Ninjronfl, of which, however, he was unable to make more than a hasty examination (Narrative of a Residence in Kurdistan, ii. 131). Several travellers described the ruins after Mr. Rich, but no attempt was made to explore them scientifically until Mr. Botta was appointed French consul at Mosul in 1843. The French excavating in the mound of Khorsabad, to which he had been directed by a peasant, discovered a row of upright alabaster slabs, forming the paneling or skirting of the lower part of the walls of a chamber. This chamber was found to communicate with others of similar construction, and it soon became evident that the remains of an edifice of considerable size existed in the mound. The French government having given the necessary funds, the ruins were fully explored. They consisted of the lower part of a number of halls, rooms, and passages, for the most part wainscoted with slabs of coarse gray alabaster, sculptured with figures in relief, the principal entrances being formed by colossal human-headed winged bulls. No remains of exterior architecture of any great importance were discovered. The calcined limestone and the great accumulation of charred wood and charred showed that the building had been destroyed by fire. Its upper part had entirely disappeared, and its general plan could only be restored by the remains of the lower story. The collection of Assyrian sculptures in the Louvre came from these ruins.

The excavations subsequently carried on by MM. Ferey and Frasch at Khorsabad led to the discovery, in the inclosure below the platform, of propylaea, flanked by colossal human-headed bulls, and of other detached buildings forming the approaches to the palace, and also of some of the gateways in the inclosure-walls, ornamented with similar mythic figures. M. Botta's discoveries at Khorsabad were followed by those of Mr. Layard at Ninjronfl and Konyunjik, made between the years 1845 and 1850. The mound of Ninjronfl was found to contain the ruins of several distinct edifices, erected at different periods — materials for the construction of the latest having been taken from an earlier building. The most ancient stood at the N. W. corner of the platform, the most recent at the S. E. In general plan and construction the Temple of the Sun at Khorsabad — consisting of a number of halls, chambers, and galleries, paved with sculptured and inscribed alabaster slabs, and opening one into the other by doorways generally formed by pairs of colossal human-headed winged bulls or lions. The exterior architecture could not be traced. The lofty cone or pyramid of earth adjoining this edifice covered the ruins of a building the basement of which was a square of 165 feet, and consisted to the height of 20 feet, of a solid mass of sun-dried bricks, faced on the four sides by blocks of stone carefully squared, beveled, and adjusted. This stone facing singularly enough coincides exactly with the height assigned by Xenophon to the stone plinth of the walls (Arab. iii. 4), and is surmounted, as he says, by the plinth that has been, by a superstructure of bricks, nearly every kiln-burnt brick bearing an inscription. Upon this solid substructure there probably rose, as in the Babylonian temples, a succession of platforms or stages, diminishing in size, the highest having a shrine or altar upon it (Barclay, Layard, Nin. and Ish. ch. v.). A vaulted chamber or gallery, 100 feet long, 8 broad, and 12 high, crossed the centre of the mound on a level with the summit of the
NINEVEH

The edifice was evidently broken into and rifled of its contents at some remote period, and may have been a royal sepulchre — the tomb of Ninus, or Sardanapalus, which stood at the entrance of Nineveh. It is the tower described by Xenophon at Larissa as being 1 plethron (100 feet) broad and 2 plethra high. It appears to have been raised by the son of the king who built the N. W. palace, and whose name in the cuneiform inscriptions is supposed to be identical with that of Sardanapalus. Shalmaneser or Shalmanasar, the builder of this tomb or tower, also erected in the centre of the great mound a second palace, which appears to have been destroyed to furnish materials for later buildings. The black obelisk now in the British Museum was found amongst its ruins. On the W. face of the mound, and adjoining the centre palace, are the remains of a third edifice, built by the grandson of Shalmaneser, whose name is read Iva-Lush, and who is believed to be the Ithul of the Hebrew scriptures. It contained some important, inscribed slabs, but no sculptures. Esarhaddon raised (about B.C. 680) at the S. W. corner of the platform another royal abode of considerable extent, but constructed principally with materials brought from his predecessor's palaces. In the opposite or S. E. corner are the ruins of a still later palace, built by his grandson Ashurbanipal, very inferior in size and in splendor to other Assyrian edifices. Its rooms were small; it appears to have had no great halls, and the chambers were panelled with slabs of common stone without sculpture or inscriptions. Some important detached figures, believed to bear the name of the historical Semiramis, were, however, found in its ruins. At the S. W. corner of the mound of Konyunjik stood a palace built by Sennacherib (about B.C. 700), exceeding in size and in magnificence of decoration all others hitherto explored. It occupied nearly 100 acres. Although much of the building yet remains to be examined, and much has altogether perished, about 60 courts, halls (some nearly 150 feet square), rooms, and passages (one 200 feet long), have been discovered, all panelled with sculptured slabs of alabaster. The entrances to the edifice and to the principal chambers were flanked by groups of winged human-headed lions and bulls of colossal proportions — some nearly 20 feet in height; 27 portals thus formed were excavated by Mr. Layard. A second palace was erected on the same platform by the son of Esarhaddon, the third king of the name of Sardanapalus. In it were discovered sculptures of great interest and beauty, amongst them the series representing the lion-hunt now in the British Museum. Owing to the sanctity attributed by Mohammedans to the supposed tomb of Jonah, great difficulties were experienced in examining the mound upon which it stands. A shaft sunk within the walls of a private house led to the discovery of sculptured slabs; and excavations subsequently carried on by agents of the Turkish Government proved that they formed part of a palace erected by Esarhaddon. Two entrances or gateways in the great inclosure-walls have been excavated — one (at (b on plan) flanked by colossal human-headed bulls and human figures. They, as well as the walls, appear, according to the inscriptions, to have been constructed by Sennacherib. No propylae or detached buildings have as yet been discovered within the inclosure. At Shanireef Khan are the ruins of a temple, but no sculptured slabs have been dug up there. It was founded by Sennacherib, and added to by his grandson. At Salmiyyah no remains of buildings nor any fragments of sculpture or inscriptions have been discovered.

The Assyrian edifices were so nearly alike in general plan, construction, and decoration, that one description will suffice for all. They were built upon artificial mounds or platforms, varying in height, but generally from 30 to 50 feet above the level of the surrounding country, and solidly constructed of regular layers of sun-dried bricks, as at Nimroud, or consisting merely of earth and rubbish heaped up, as at Konyunjik. The mode of raising

Khorassad — View of the Mounds. — Botta's Ninive.

a It must be observed, once for all, that whilst the Assyrian proper names are given in the text according to the latest interpretations of the cuneiform inscriptions, they are very doubtful.
of bas-reliefs, in which captives and prisoners are seen amongst the workmen (Layard, *Mon. of Nin.,* 21 series, pl. 14, 15). This platform was probably the general plan of the ground floor can now be traced; it is evident that the palaces had several stories built of wood and sun-dried bricks, which, when the building was deserted and allowed to decay, gradually buried the lower chambers with their ruins, and protected the sculptured slabs from the effects of the weather. The depth of soil and rubbish above the abaster slabs varied from a few inches to about 20 feet. It is to this accumulation of rubbish above them that the bas-reliefs owe their extraordinary preservation.

The portions of the edifices still remaining consist of halls, chambers, and galleries, opening for the most part into large uncovered courts. The partition walls vary from 6 to 15 feet in thickness, and are solidly built of sun-dried bricks, against which are placed the paneling or skirting of abaster slabs. No windows have hitherto been discovered, and it is probable that in most of the smaller chambers light was only admitted through the doors. The wall above the wainscotting of abaster was plastered, and painted with figures and ornaments. The pavement was formed either of inscribed slabs of abaster, or large, flat, kiln-burnt bricks. It rested upon layers of bitumen and fine sand. Of nearly similar construction are the modern houses of Mosul, the architecture of which has probably been preserved from the earliest times as that best suited to the climate and to the manners and wants of an oriental people. The rooms are grouped in the same manner round open courts or large halls. The same abaster, usually carved with ornaments, is used for wainscotting the apartments, and the walls are constructed of sun-dried bricks. The upper part and the external architecture of the Assyrian palaces, both of which have entirely disappeared, can only be restored conjecturally, from a comparison of monuments represented in the bas-reliefs, and of edifices built by nations, such as the Persians, who took their arts from the Assyrians.

By such means Mr. Ferguson has, with much ingenuity, attempted to reconstruct a palace of Nineveh (The *Palaces of Nineveh and Persepolis restored*). He supposes that the upper stories were built entirely of sun-dried bricks and wood—a supposition warranted by the absence of stone and marble columns, and of remains of stone and burnt-brick masonry in the rubbish and soil which cover and surround the ruins; that the exterior was richly sculptured and painted with figures and ornaments, or decorated with engraved bricks of bright colors, and that light was admitted to the principal chambers on the ground-floor through a kind of gallery which formed the upper part of them, and upon which rested the wooden pillars necessary for the support of the superstructure.

The capitals and various details of these pillars, the friezes and architectural ornaments, he restores from the stone columns and other remains at Persepolis. He conjectures that curtains that were suspended between the pillars, kept out the glaring light of the sun, and that the ceilings were of wood-work, elaborately painted with patterns similar to those represented in the sculptures, and probably ornamented with gold and ivory. The discovery at Khorsabad of an archet entrance of considerable size and depth, constructed of sun-dried and kiln-burnt bricks, the latter enameled with figures, leads to the inference that some of the smaller chambers may have been vaulted.

The sculptures, with the exception of the human-headed lions and bulls, were for the most part
tow relief. The colossal figures usually represent the king, his attendants, and the gods; the smaller sculptures, which either cover the whole face of the slab, or are divided into two compartments by bands of inscriptions, represent battles, sieges, the chase, single combats with wild beasts, religious ceremonies, etc., etc. All refer to public or national events; the hunting-scenes evidently recording the prowess and personal value of the king as the head of the people — "the mighty hunter before the Lord." The sculptures appear to have been painted — millennia-old colors have been found on most of them. Thus decorated, without and within, the Assyrian palaces must have displayed a barbaric magnificence, not, however, devoid of a certain grandeur and beauty, which no ancient or modern edifice has probably exceeded. Amongst the small objects, undoubtedly of the Assyrian period, found in the ruins, were copper-vessels (some embossed and incrusted with figures of men and animals and graceful ornaments), bells, various instruments and tools of copper and iron, arms (such as spear and arrow heads, swords, daggers, shields, helmets, and fragments of chain and plate armor), ivory ornaments, glass bowls and vases, alabaster urns, figures and other objects in terra-cotta, pottery, parts of a throne, inscribed cylinders and seals of agate and other precious materials, and a few detached statues. All these objects show great mechanical skill and a correct and refined taste, indicating considerable advance in civilization.

These great edifices, the depositories of the national records, appear to have been at the same time the abode of the king and the temple of the gods — thus corresponding, as in Egypt, with the character of the monarch, who was both the political and religious chief of the nation, the special favorite of the deities, and the interpreter of their decrees. No building has yet been discovered which possesses any distinguishing features to mark it specially as a temple. They are all precisely similar in general plan and construction. Most probably a part of the palace was set apart for religious worship and ceremonies. Altars of stone, resembling the Greek tripod in form, have been found in some of the chambers — in one instance two figures of a woman and a child were sculptured — (Layard, Nin., Plates, p. 351). According to the inscriptions, it would, however, appear that the Assyrian monarchs built temples of great magnificence at Nineveh, and in various parts of the empire, and profusely adorned them with gold, silver, and other precious materials.

Site of the City. — Much diversity of opinion exists as to the identification of the ruins which may be properly included within the site of ancient Nineveh. According to Sir H. Rawlinson and those who concur in his interpretation of the cuneiform character, each group of mounds we have described represents a separate and distinct city. The name applied in the inscriptions to Nimroud is supposed to read "Kalhu," and the ruins are consequently identified with those of the Calah of Genesis (x. 11); Khorsabad, the site of which was founded by Sargon, the name having been retained in that of Sarghun, or Suraoun, by which the ruins were known to the Arab geographers; Sherief Khan is Tarbis. Sela-miyah has not yet been identified, no inscription having been found in the ruins. The name of Nineveh is limited to the mounds opposite Mosul, including Kouyunjik and Nebbi Yunus. Sir H. Rawlinson was at one time inclined to exclude even the former mound from the precincts of the city (Journ. of As. Soc. xii. 418). Furthermore, the ancient and primitive capital of Assyria is supposed to have been not Nineveh, but a city named Asshur, whose ruins have been discovered at Kalah Shergerd, a mound on the right or W. bank of the Tigris, about 60 miles S. of Mosul. It need scarcely be observed that this theory rests entirely upon the presumed accuracy of the interpretation of the cuneiform inscriptions, and that it is totally at variance with the accounts and traditions preserved by sacred and classical history of the antiquity, size, and importance of Nineveh. The site of the enclosure of Kouyunjik, about 1,800 acres, is too small to represent the site of the city, built as it must have been in accordance with eastern customs and manners, even if accounting for every exaggeration on the part of ancient writers. Captain Jones (Topography of Nineveh, Journ. of R. Asiatic Soc. xv. p. 324) computes that it would contain 174,000 inhabitants, 50 square yards being given to each person; but the basis of this calculation would scarcely apply to any modern eastern city. If Kouyunjik represents Nineveh, and Nimroud Calah, where are we to place Resen, "a great city" between the two? (Gen. x. 12). Scarcely at Sela-miyah, only three miles from Nimroud, and where no ruins of any importance exist. On the other hand, it has been conjectured that these groups of mounds are not ruins of separate cities, but the defined royal residences, each combining palaces, temples, propylæa, gardens, and parks, and having its peculiar name; and that they all formed part of one great city built and added to at different periods, and consisting of distinct quarters scattered over a very large area, and frequently very distant one from the other. Nineveh might thus be compared with Damascus, Isphan, or perhaps more appropriately with Delhi, a city rebuilt at various periods, but never on exactly the same site, and whose ruins consequently cover an area but little inferior to that assigned to the capital of Assyria. The primitive site, the one upon which Nineveh was originally founded, may possibly have been that occupied by the mound of Kouyunjik. It is thus alone that the ancient descriptions of Nineveh, if any value whatever be attached to them, can be reconciled with existing remaines. The absence of all traces of buildings of any size within the inclosures of Nimroud, Kouyunjik, and Khorsabad, and the existence of propylæa forming part of the approaches to the palace, beneath and at a considerable distance from the great mound at Khorsabad, seem to add weight to this conjecture. Even Sir H. Rawlinson is compelled to admit that all the ruins may have formed part of "that group of cities, which in the time of the prophet Jonah, was known by the common name of Nineveh" (On the Inscriptions of Babylon and Assyria, Journ. As. Soc.). But the existence of fortified palaces is consistent with oriental custom, and with authentic descriptions of ancient eastern cities. Such were the residences of the kings of Babylon, the walls of the largest of which were 60 stadia, or 7 miles in circuit, or little less than those of Kouyunjik, and considerably greater than those of Nimroud [BABYLON]. The Persians, who appear to have closely imitated the Assyrians in most things, constructed similar fortified parks, or palaces — as they were called — which included royal dwelling-places (Quint. Curt. i. 7, c. 8). Indeed, if the interpretation of the cuneiform inscriptions is to be trusted, the Assyrian palaces were of precisely the same character; for...
NINEVEH

that built by Esarhaddon at Nebi Yunus is stated to have been so large that horses and other animals were not only kept, but even bred within its walls (Fox Talbot, Assy. Texts translated, p. 17, 18). It is evident that this description cannot apply to a building occupying so confined an area as the summit of this mound, but to a vast inclosed space. This aggregation of strongholds may illustrate the allusion in Nahum (iii. 14), "Pour the waters for the siege, fill the strongholds," and "repair thy fortified places." They were probably surrounded by the dwellings of the mass of the population, either collected in groups, or scattered singly in the midst of fields, orchards, and gardens. There are still sufficient indications in the country around of the sites of such habitations. The fortified enclosures, whilst including the residences of the king, his family or immediate tribe, his principal officers, and probably the chief priests, may also have served as places of refuge for the inhabitants of the city at large in times of danger or attack. According to Diodorus (i. 2) and Quintus Curtius (v. 1), there was land enough within the precincts of Babylon, besides gardens and orchards, to furnish corn for the wants of the whole population in case of siege; and in the book of Jonah, Nineveh is said to contain a "great multitude of people," which is "an immense number." (iv. 11). As at Babylon, no great attempt was made of inclosure comprising all the ruins, such as that described by Diodorus, has been discovered at Nineveh, and no such wall ever existed, otherwise some traces of so vast and massive a structure must have remained to this day. The river Gomel, the modern Ghazir-Sun, may have formed the eastern boundary or defence of the city. As to the claims of the mound of Kalah Shergat to represent the site of the primitive capital of Assyria called Assur, they must rest entirely on the interpretation of the inscriptions. This city was founded, or added to, they are supposed to declare, by one Shamash-Ivan, the son and viceroy, or satrap, of Isnu-Bagan, king of Babylon, who reigned, it is conjectured, about B.C. 1840. Assyria and its capital remained subject to Babylon until B.C. 1275, when an independent Assyrian dynasty was founded, of which fourteen kings, or more, reigned at Kalash Shergat. About B.C. 930 the seat of government, it is asserted, was transferred by Sardanapalus (the second of the name, and the Sardanapalus of the Greeks) to the city of Kalakh or Calah (Nimroud), which had been founded by an earlier monarch named Shalmaneser. There it continued about 250 years, when Sennacherib made Nineveh the capital of the empire [Assyra]. These assumptions seem to rest upon very slender grounds; and Dr. Hincks altogether rejects the theory of the Babylonian character of these early kings, believing them to be Assyrian (Report on Treasures of Bact. Mus., on Cylinder and Perse-Cylinder). It is believed that on an inscribed terra-cotta discovered at Kalash Shergat, the foundation of a temple is attributed to this Shamash-Ivan. A further identification is required of two kings whose names are read Tukhshu-Abur and Iva, one found in a rock-cut inscription at Bavian in the mountains to the E of Mosul, the other occurring on the Kalash Shergat cylinder. M. Oppert has questioned the identity of the two (Raul. Herod. i. 459, n. 5); indeed the only son of this Babylonian king mentioned in the inscriptions is said to be Balaam-chuina, a name entirely different from that of the presumed viceroy of Assur. It is by no means an uncommon occurrence that the same names should be found in royal dynasties of very different periods. The Assyrian dynasties furnish more than one example. It may be further observed that no remains of sufficient antiquity and importance have been discovered at Kalash Shergat to justify the opinion that it was the ancient capital. The only sculpture found in the ruins, the seated figure in black basalt now in the British Museum, belongs to a later period than the monuments from the N. W. palace at Nimroud. Upon the presumed identification above indicated, and upon no other evidence, as far as we can understand, an entirely new system of Assyrian history and chronology has been constructed, of which a sketch has been given under the title ASSYRIA (see also Rawlinson's Herod., vol. i. p. 489). It need only be pointed out here that this system is at variance with sacred, classical, and monumental history, and can scarcely be accepted as proven, until the Assyrian ruins have been examined with more completeness than has hitherto been possible, and until the decipherment of the inscriptions has made further progress. It has been shown how continuously tradition points to Nineveh as the ancient capital of Assyria. There is no allusion to any other city which enjoyed this rank. Its name occurs in the statistical table of Karkar, in conjunction with Naharaim or Mesopotamia, and on a fragment recently discovered by M. Mariette of the time of Thothmes III., or about B.C. 1400 (Birk, Trans. R. Soc. of Lit. R. 345, second series), and no mention has been found on any Egyptian monument of such cities as Assur and Calah. Sir H. Rawlinson, in a paper read before the R. S. of Lit. has, however, contended that the Naharain, Saenkar, and Assur of the Egyptian inscriptions are not Mesopotamia, Singar, and Assyria, and that Nin- in is not Nineveh at all, but refers to a city in the chain of Taurus. But these conclusions are altogether rejected by Egyptian scholars. Further researches may show that Senacherib's palace at Kuyunjik, and that of Sardanapalus at Nimroud, were built upon the site and above the remains of very much earlier edifices. According to the interpretation of the inscriptions, Sardanapalus himself founded a temple at "Nineveh" (Raul. Herod. i. 462), yet no traces of this building have been discovered at Kuyunjik. Sargon erected the walls of Nineveh, and declares that he erected his palace "near to Nineveh" (ib. 474), whilst Senacherib only claims to have rebuilt the palace, which were "rent and split from extreme old age" (ib. 475), employing 360,000 men, captives from Chaldea, Syria, Armenia, and Cilicia, in the undertaking, and speaks of Nineveh as founded of old, and governed by his forefathers. "Kings of the old town." (Fox Talbot, on Belloin's cylinder, Journal of As. Soc. vol. xviii.). Old palaces, a great tower, and ancient temples dedicated to Ishtar and Bar Muri, also stood there. Hitherto the remains of no other edifices than those attributed to Senacherib and

---

a | To support the theory of the ancient capital of Assyria being Assur, a further identification is required of two kings whose names are read Tukhshu-Abur and Iva, one found in a rock-cut inscription at Bavian in the mountains to the E of Mosul, the other occurring on the Kalash Shergat cylinder. M. Oppert has questioned the identity of the two (Raul. Herod. i. 459, n. 5); indeed the only son of this Babylonian king mentioned in the inscriptions is said to be Balaam-chuina, a name entirely different from that of the presumed viceroy of Assur. It is by no means an uncommon occurrence that the same names should be found in royal dynasties of very different periods. The Assyrian dynasties furnish more than one example. It may be further observed that no remains of sufficient antiquity and importance have been discovered at Kalash Shergat to justify the opinion that it was the ancient capital. The only sculpture found in the ruins, the seated figure in black basalt now in the British Museum, belongs to a later period than the monuments from the N. W. palace at Nimroud. Upon the presumed identification above indicated, and upon no other evidence, as far as we can understand, an entirely new system of Assyrian history and chronology has been constructed, of which a sketch has been given under the title ASSYRIA (see also Rawlinson's Herod., vol. i. p. 489). It need only be pointed out here that this system is at variance with sacred, classical, and monumental history, and can scarcely be accepted as proven, until the Assyrian ruins have been examined with more completeness than has hitherto been possible, and until the decipherment of the inscriptions has made further progress. It has been shown how continuously tradition points to Nineveh as the ancient capital of Assyria. There is no allusion to any other city which enjoyed this rank. Its name occurs in the statistical table of Karkar, in conjunction with Naharaim or Mesopotamia, and on a fragment recently discovered by M. Mariette of the time of Thothmes III., or about B.C. 1400 (Birk, Trans. R. Soc. of Lit. R. 345, second series), and no mention has been found on any Egyptian monument of such cities as Assur and Calah. Sir H. Rawlinson, in a paper read before the R. S. of Lit. has, however, contended that the Naharain, Saenkar, and Assur of the Egyptian inscriptions are not Mesopotamia, Singar, and Assyria, and that Nin- in is not Nineveh at all, but refers to a city in the chain of Taurus. But these conclusions are altogether rejected by Egyptian scholars. Further researches may show that Senacherib's palace at Kuyunjik, and that of Sardanapalus at Nimroud, were built upon the site and above the remains of very much earlier edifices. According to the interpretation of the inscriptions, Sardanapalus himself founded a temple at "Nineveh" (Raul. Herod. i. 462), yet no traces of this building have been discovered at Kuyunjik. Sargon erected the walls of Nineveh, and declares that he erected his palace "near to Nineveh" (ib. 474), whilst Senacherib only claims to have rebuilt the palace, which were "rent and split from extreme old age" (ib. 475), employing 360,000 men, captives from Chaldea, Syria, Armenia, and Cilicia, in the undertaking, and speaks of Nineveh as founded of old, and gov- erned by his forefathers. "Kings of the old town." (Fox Talbot, on Belloin's cylinder, Journal of As. Soc. vol. xviii.). Old palaces, a great tower, and ancient temples dedicated to Ishtar and Bar Muri, also stood there. Hitherto the remains of no other edifices than those attributed to Senacherib and
Prophecies relating to Nineveh, and Illustrations of the O. T.—These are exclusively contained in the books of Nahum and Zephaniah; for although Isaiah foretells the downfall of the Assyrian empire (chs x. and xiv.), he makes no mention of its capital. Nahum threatens the entire destruction of the city, so that it shall not rise again from its ruins: "With an overrunning flood he will make an utter end of the place thereof." "He will make an utter end; affliction shall not rise up the second time" (i. 8, 9). "Thy people is scattered upon the mountains, and none one gathereth them. There is no healing of thy bruise" (iii. 18, 19). The manner in which the city should be taken seems to be indicated. "The defence shall be prepared" (i. 5) is rendered in the marginal reading "the covering or covert shall be prepared," and by Mr. Vance Smith (Prophecies on Assyria and the Assyrians, p. 242), "the covering machine," the covered battering-rain or tower supposed to be represented in the bas-reliefs as being used in sieges. Some commentators believe that "the overrunning flood" refers to the agency of water in the destruction of the walls by an extraordinary overflow of the Tigris, and the consequent exposure of the city to assault through a breach; others, that it applies to a large and devastating army. An allusion to the overflow of the river may be contained in ii. 6, "The gates of the rivers shall be opened, and the palace shall be dissolved," a prophecy supposed to have been fulfilled when the Medo-Babylonian army captured the city. Diodorus (ii. 27) relates of that event, that "there was an old prophecy that Nineveh should not be taken till the river became an enemy to the city; and in the third year of the siege the river being swollen with continued rains, overflowed part of the city, and broke down the wall for twenty stadia; then the king thinking that the oracle was fulfilled and the river become an enemy to the city, built a large funeral pile in the palace, and collecting together all his wealth, and his concubines and eunuchs, burnt himself and the palace with them all: and the enemy entered the breach that the waters had made, and took the city."

Most of the edifices discovered had been destroyed by fire, but no part of the walls of either Nineveh or Konyunjik appears to have been washed away by the river. The Tigris is still subject to very high and dangerous floods during the winter and spring rains, and even now frequently reaches the ruins. When it flowed in its ancient bed at the foot of the walls a part of the city might have been overwhelmed by an extraordinary inundation. The likeness of Nineveh to "a pool of water" (i. 8) has been conjectured to refer to the moats and damps by which a portion of the country around Nineveh could be flooded. The city was to be partly destroyed by fire. "The fire shall devour thy bars," "then the fire shall devour thee" (iii. 13, 15). The gateway in the northern wall of the Konyunjik inclosure had been destroyed by fire as well as the palaces. The population was to be surprised when unprepared, "while they are drunk as drunkards they shall be devoured as stubble fully dry" (i. 10). Diodorus states that the last and fatal assault was made when they were overborne with wine. In the bas-reliefs carousing scenes are represented, in which the king, his courtiers, and even the queen, reclining on couches or seated on thrones, and attended by musicians, appear to be pledging each other in bowls of wine (Botta, Mon. de Nin. pl. 63-67, 112, 113, and one very interesting slab in the Brit. Mus., figured above). The equitiae of the inhabitants, and their removal to distant provinces, are predicted (iii. 18). Their dispersion, which occurred when the city fell, was in accordance with the barbarous custom of the age. The palace-temples were to be plundered of their idols, "out of the house of thy gods will I cut off the graven image and the molten image" (i. 14), and the city sacked of its wealth: "Take ye the spoil of silver, take the spoil of gold" (ii. 9). For ages the Assyrian edifices have been despoiled of their sacred images; and enormous amounts of gold and silver were, according to tradition, taken to Eschatan by the conquering Medes (Diod. Sic. ii.). Only one or two fragments of the precious metals were found in the ruins. Nineveh, after its fall, was to be "empty, and void, and waste" (ii. 10): "it shall come to pass, that all they that look upon thee shall flee from thee, and say, Nineveh is laid waste" (iii. 7). These epithets describe the present state of the site of the city. But the fullest and the most vivid and poetical picture of its ruined and deserted condition is that given by Zephaniah, who probably lived to see its fall. "He will make Nineveh a desolation, and dry like a wilderness. And flocks shall lie down in the midst of her, all the beasts of the nations: both the cornuport and the bittern shall lodge in the upper lintels of it! their voice shall sing in
NINEVEH

the windows: desolation shall be in the thresholds: for he shall moisture the cedar work ... how is she become a desolation, a place for beasts to be down in! every one that passes by her shall his

Winged deity.

and wag his hand” (ii. 13, 14, 15.) The canals
which once fertilized the soil are now dry. Except
when the earth is green after the periodical rains
the site of the city, as well as the surrounding
country, is an arid yellow waste. Flocks of sheep
and herds of camels may be seen seeking scanty
pasture amongst the mounds. From the unwhole-
some swamp within the ruins of Khorsabad, and
from the reedy banks of the little streams that flow
by Koumijik and Ninroud may be heard the
croak of the coromant and the bittern. The
cedar-wood which adorned the ceilings of the pal-

aces has been uncovered by modern explorers (Lav-
ard, Nin. and Bab. p. 357), and in the deserted halls
the hyena, the wolf, the fox, and the jackal, now
lie down. Many illusions in the O. T. To the dress,
arms, modes of warfare, and customs of the people
of Nineveh, as well as of the Jews, are explained by
the Nineveh monuments. Thus (Nab. ii. 3), “the
shield of his mighty men is made red, the valiant
men are in scarlet.” The shields and the dresses
of the warriors are generally painted red in the
sculptures. The magnificent description of the
assault upon the city (iii. 1, 2, 3) is illustrated in
almost every particular (Layard, Nin. and Rem. ii.
part ii., ch. v.). The mounds built up against
the walls of a besieged town (Is. xxxvii. 33; 2 K.
xix. 32: Jer. xxxii. 24, &c.), the battering-ram (Ez.
y. 2), the various kinds of armor, helmets, shields,
spears, and swords, used in battle and during a
noeze; the chariots and horses (Nab. iii. 3; Char-
pent), are all seen in various bas-reliefs (Layard,
Nin. and Rem. ii., part ii., chap. iv. and v.).
The custom of cutting off the heads of the slain
and placing them in heaps (2 K. x. 8) is constantly
represented (Layard, i. 181). The illusion in 2
K. xiv. 29, “I will put my hook in thy nose and
my bridle in thy lips,” is illustrated in a bas-relief
from Khorsabad (ed. 376).

The interior decoration of the Assyrian palaces
is described by Rassam, himself a captive in As-
syria and an eye-witness of their magnificence

(xiii. 14, 15). She saw men of sculptured work-
manship upon the walls; likenesses of the Chalda-
eans pictured in red, girded with girdles upon
their loins, with colored flowing head-dresses upon
their heads, with the aspect of princes all of them” (Lay
Nin. and its Rem. ii. 397); a description strikingly
illustrated by the sculptured likenesses of the As-
syrian kings and warriors (see especially Della,
Mon. de Nin. pl. 12). The mystic figures seen by
the prophet in his vision (ch. i.), uniting the man,
the lion, the ox, and the eagle, may have been
suggested by the eagle-headed idols, and man-
headed bulls and lions (by some identified with the
cerubim of the Jews (Cherub)), and the
sacred emblem of the “wheel within wheel”
by the winged circle or globe frequently repre-
sented in the bas-reliefs (Lay. Nin. and its Rem.
i. 463). 

Acts. — The origin of Assyrian art is a subject
at present involved in mystery, and one which
offers a wide field for speculation and research.
Those who derive the civilization and political sys-
tem of the Assyrians from Babylonia would trace
their arts to the same source. One of the principal
features of their architecture, the artificial platform
serving as a substructure for their national edifices,
may have been taken from a people inhabiting
plains perfectly flat, such as those of Shinar, rather
than an undulating country in which natural
elevations are not uncommon, such as As-
syria proper. But it still remains to be proved that
there are artificial mounds in Babylonia of an earlier date than mounds
on or near the site of Nineveh. Whether
other leading features and the details of
Assyrian architecture came from the same
source, is much more open to doubt. Such
Babylonian edifices as have been hitherto
explored are of a later date than those of
Nineveh, to which they appear to bear but
little resemblance. The only features in
common seem to be the ascending stages of
the temples or tombs, and the use of enameled
bricks. The custom of paneling walls with al-
labaster or stone must have originated in a country
in which such materials abound, as in Assyria, and
not in the alluvial plains of southern Mesopotamia,
where they cannot be obtained except at great
cost or by great labor. The use of sun-dried and
kiln-burnt bricks and of wooden columns would
be common to both countries, as also such ar-
rangements for the admission of light and exclu-
sion of heat as the climate would naturally sug-
gest.

In none of the arts of the Assyrians have any
traces hitherto been found of progressive change.
In the architecture of the most ancient known
edifice all the characteristics of the style are already
fully developed; no new features of any importance
seem to have been introduced at a later period.
The palace of Seniacherib only excels those of his
remote predecessors in the vastness of its propor-
tions, and in the elaborate magnificence of its
details. In sculpture, as probably in painting
also, if we possessed the means of comparison, the
same thing is observable as in the remains of ancient Egypt. The earliest works hitherto dis-
covered show the result of a lengthened period of
gradual development, which, judging from the slow
progress made by untrained men in the arts, must
have extended over a vast number of years. They
exhibit the arts of the Assyrians at the highest
The Assyrians, like the Egyptians, would seem to have been, at all times, more or less shackled by religious prejudices or laws. For instance, the face is almost invariably in profile, not because the sculptor was unable to represent the full face, one or two examples of it occurring in the bas-reliefs, but probably because he was bound by a generally received custom, through which he would not break. No new forms or combinations appear to have been introduced into Assyrian art during the four or five centuries, if not longer period, with which we are acquainted with it. We trace throughout the same eagle-headed, lion-headed, and fish-headed figures, the same winged divinities, the same composite forms at the doorways. In the earliest works, an attempt at composition, that is at a pleasing and picturesque grouping of the figures, is perhaps more evident than in the later—as may be illustrated by the Lion-hunt from the N. W. Palace, now in the British Museum (Layard, *Mon. of Nin.,* pl. 10). A parallel may in many respects be drawn between the arts of the Assyrians from their earliest known period to their latest, and those of Greece from Phidian to the Roman epoch, and of Italy from the 15th to the 18th century.

The art of the Nineveh monuments must in the present state of our knowledge be accepted as an original and national art, peculiar, if not to the Assyrians alone, to the races who at various periods possessed the country watered by the Tigris and Euphrates. As it was undoubtedly brought to its highest perfection by the Assyrians, and is especial Greek sculptor in the noblest period of its development, it is not surprising that it should have been derived from Greece. From whence it was originally derived there is nothing as yet to show.

If from Babylon, as some have conjectured, there are no remains to prove the fact. Analogies may perhaps be sought between the two, but they are not sufficient to convince us that the one was the offspring of the other. These analogies, if not accidental, may have been derived, at some very remote period, from a common source. The two may have been offshoots from some common trunk which perished ages before either Nineveh or Thebes was founded; or the Phœnicians, as it has been suggested, may have introduced into the two countries, between which they were placed, and between which they may have formed a commercial link, the arts peculiar to each of them. Whatever the origin, the development of the arts of the two countries appears to have been affected and directed by very opposite conditions of national character, climate, geographical and geological position, politics, and religion. Thus, Egyptian architecture seems to have been derived from a stone prototype, Assyrian from a wooden one—in accordance with the physical nature of the two countries. Assyrian art is the type of power, vigor, and action; Egyptian that of calm dignity and repose. The one is the expression of an ambitions, conquering, and restless nature; the other of a race which seems to have worked for itself alone and for the perpetuation of a race and a dynasty through the ages, and to have been content with the time of the building of the Kherosat palace (about the 8th century B.C.), a more intimate intercourse with Egypt through war or dynastic alliances than had previously existed, appears to have led to the introduction of objects of Egyptian manufacture into Assyria, and may have influenced to a limited extent its arts. A precisely similar influence proceeding from Assyria has been remarked at the same period in Egypt, probably arising from the conquest and temporary occupation of the latter country by the Assyrians, under a king whose name is read Assur-lani-pal, mentioned in the cuneiform inscriptions (Birch, *Trans. of Rev. Soc. of Lit.,* new series). To this age belong the ivories, bronzes, and nearly all the small objects of an Egyptian character, though not apparently of Egyptian manufacture, which are found in the Ninevite ruins. It has been asserted, on the authority of an inscription believed to contain the names of certain Hellenic artists from Ithalam, Cition, Salamis, Paphos, and other Greek cities, that Greeks were employed by Esarhaddon and his son in executing the sculptured decorations of their palaces (Rawl. *Herod. i. 481,*). But, passing over the extreme uncertainty attaching to the decipherment of proper names in the cuneiform character, it must be observed that no remains whatever of Greek art of so early a period are known, which can be compared in knowledge of principles and in beauty of execution and of design with the sculptures of Assyria.

Nin. 2168

NINIEVEH
The influence of Assyria to the eastward was even more considerable, extending far into Asia. The Persian architecture (with and modifications as the climate and the materials at hand suggested), their sculpture, probably in the mode of writing, from the Assyrians. The ruined palaces of Persep-

doli show the general plan of construction as those of Nineveh—the entrances formed by human-headed animals, the skating of sculptured stones, and the inscription stele. The various religious

columns are insignificant, and the ornamentation have the

same Assyrian character. In Persia, however, a

stone architecture prevailed, and the columns in

that material have resisted to this day the ravages of

The Persians made an advance in one respect upon Assyrian sculpture, and probably painting

likewise, in an attempt at a natural representation of drapery by the introduction of folds, of which there is only the slightest indication on Assyrian monuments. It may have been partly through Perse,

ia that the influence of Assyrian art passed into Asia Minor and thereon into Greece; but it

had probably penetrated far into the former country

long before the Persian domination. We find it

strongly shown in the earliest monuments, as in

the sculptures of the palace of Darius at Persep-
doli. Scarcely any part of ancient art is more

archaic than the minor arts of Persep-doli, and

the sculptures of Branchida. But the early art of

Asia Minor still offers a most interesting field for

investigation. Amongst the Assyrians, the arts

were principally employed, as amongst all nations

in their earlier stages of civilization, for religious

and national purposes. The colossal statues of the

doorways of the palaces were mythic combinations

to denote the attributes of a deity. The "Man-

bull" and the "Man-lion," are conjured to be the

gods "Nin" and "Nergal," presiding over and the

vessel; the eagle-headed and fish-

headed figures so constantly repeated in the sculptures,

and as ornaments on vessels of metal, or in

embroideries—Nisroch and Dagon. The bas-

reliefs almost invariably record some deed of the

king, as head of the nation, in war, and in combat

against the wild beasts, or his piety in erecting

palace-temples to the gods. Hitherto no sculptu-

respecialtly illustrating the private life of the

Assyrians have been discovered, except one or two

incidents, such as men baking bread or tending

horses, introduced as mere accessories into the

historical bas-reliefs. This may be partly owing

to the fact that no traces whatever have yet been

found of their burial-places, or even of their mode

of dealing with the dead. It is chiefly on the

walls of tombs that the domestic life of the

Egyptians has been so fully depicted. In the useful arts,
as in the fine arts, the Assyrians had made a pro-

gress which denotes a very high state of civiliza-

[ASyria]. When the inscriptions have been

fully examined and deciphered, it will prob-

ably be found that they had made no unconsiderable

advance in the sciences, especially in astronomy,

mathematics, numeration, and hydraulics. Al-

though the site of Nineveh afforded no special

advantages for commerce, and although she owed
greatness rather to her political position as the

capital of the empire, yet, situated upon a naviga-
table river communicating with the Euphrates and

the Persian Gulf, she must have soon formed one

of the great trading stations between that impor-
tant inland sea, and Syria, and the Mediterranean,

and must have become a depot for the merchandise.
NINEVEH

supplied to a great part of Asia Minor, Armenia, and Persia. Her merchants are described in Ezekiel (xiii. 24) as dealing in silken cloths and brocaded work (such as is probably represented in the sculptures), and in Nahum (iii. 16) as "multituled above the stars of heaven." The animals represented on the black obelisk in the British Museum and on other monuments, the rhinoceros, the elephant, the double-humped camel, and various kinds of apes and monkeys, show a communication direct from Egypt to the remotest parts of Asia.

This intercourse with foreign nations, and the practice of carrying to Assyria as captives the skilled artists and workmen of conquered countries, must have contributed greatly to the improvement of Assyrian manufactures.

Writing and Language.—The ruins of Nineveh have furnished a vast collection of inscriptions partly carved on marble or stone slabs, and partly impressed upon bricks, and upon clay cylinders, or six-sided and eight-sided prisms, barrels, and tablets, which, used for the purpose when still moist, were afterwards baked in a furnace or kiln. (Cf. Ezekiel, iv. 1, "Take thee a tile ... and portray upon it the city, even Jerusalem.") The cylinders are hollowed, and appear, from the hole pierced through them, to have been mounted so as to turn round, and to present their several sides to the reader. The character employed was the arrow-headed or cuneiform—so called from each letter being formed by marks or elements resembling an arrow-head or a wedge. This mode of writing, believed by some to be of Turanian or Scythic origin, prevailed throughout the provinces comprised in the Assyrian, Babylonian, and the eastern portion of the ancient Persian empires, from the earliest times to which any known record belongs, or at least twenty centuries before the Christian era, down to the period of the conquests of Alexander; after which epoch, although occasionally employed, it seems to have gradually fallen into disuse. It never extended into Syria, Arabia, or Asia Minor, although it was adopted in Armenia. A cursive writing resembling the ancient Syrian and Phoenician, and by some believed to be the original form of all other cursive writing used in Western Asia, including the Hebrew, appears to have also been occasionally employed in Assyria, probably for documents written on parchment or papyrus, or perhaps leather skins.

The Assyrian cuneiform character was of the same class as the Babylonian, only differing from it in the less complicated nature of its forms. Although the primary elements in the later Persian and so-called Median cuneiform were the same, yet their combination and the value of the letters were quite distinct. The latter, indeed, is but a form of the Assyrian Herodotean terms all cuneiform writing the "Assyrian writing" (Herod. iv. 87). This character may have been derived from some more ancient form of hieroglyphic writing; but if so, all traces of such origin have disappeared. The Assyrian and Babylonian alphabet (if the term may be applied to alphabet signs) is of the most complicated, imperfect, and arbitrary nature—some characters being phonetic, others syllabic, others ideographic—the same character being frequently used indifferently. This constitutes one of the principal difficulties in the process of decipherment. The investigation, first accomplished by Georg Fuld (Hesper., Asiatic Nations, vol. ii. App. 2) has since been carried on with much success by Sir H. Rawlinson, Dr Hincks, Mr. Norris, and Mr. Fox Talbot, in England, and by M. Oppert in France (see papers by those gentlemen in the Journals of the Roy. As. Soc., in Transactions of Royal Irish Academy, in Journal of Sacred Literature, and in the Atheneum). Although considerable doubt may still reasonably prevail as to the interpretation of details, as to grammatical construction, and especially as to the rendering of proper names, sufficient progress has been made to enable the student to ascertain with some degree of confidence the general meaning and contents of an inscription. The people of Nineveh spoke a Semitic dialect, connected with the Hebrew and with the so-called Chaldean of the Books of Daniel and Ezra. This agrees with the testimony of the O. T. But it is asserted that there existed in Assyria, as well as in Babylonia, a more ancient tongue belonging to a Turanian or Scythic race, which is supposed to have inhabited the plains watered by the Tigris and Euphrates long before the rise of the Assyrian empire, and from which the Assyrians derived their civilization and the greater part of their mythology. It was retained for sacred purposes by the conquering race, as the Latin was retained after the fall of the Roman Empire in the Catholic Church. In fragments of vocabularies discovered in the record-chamber at Koyunjik words in the two languages are placed in parallel columns, whilst a centre column contains a monographic or ideographic sign representing both. A large number of Turanian words or roots are further supposed to have existed in the Assyrian tongue, and tablets apparently in that language have been discovered in the ruins. The monumental inscriptions occur on detached stelae and obelisks, of which there are several specimens in the British Museum from the Assyrian ruins, and one in the Berlin Museum discovered in the island of Cyprus: on the colossal human-headed lions and bulls, upon parts not occupied by sculpture, as between the legs; on the sculptured slabs, generally in bands between two bas-reliefs, to which they seem to refer; and, as in Persia and Armenia, carved on the face of rocks in the hill-country. At Ninroud the same inscription is carved on nearly every slab in the N. W. palace, and generally repeated on the back, and even carried across the sculptured colossal figures. The Assyrian inscriptions usually contain the chronicles of the king who built or restored the edifice in which they are found, records of his wars and expeditions into other countries, of the amount of tribute and spoil taken from conquered tribes, of the building of temples and palaces, and invocations to the gods of Assyria. Frequently every stone and kiln-burnt brick used in
A building bears the name and titles of the king, and generally those of his father and grandfather are added. These inscribed bricks are of the greatest value in restoring the royal dynasties. The longest inscription on stone, that from the N. W. palace of Nineveh containing the records of Sardanapalus II., has 325 lines, that on the black obelisk has 210. The most important hitherto discovered in connection with Biblical history, is that upon a pair of colossal human-headed bulls from Kouyunjik, now in the British Museum, containing the records of Sennacherib, and describing amongst other events, his wars with Hezekiah. It is accompanied by a series of bas-reliefs believed to represent the siege and capture of Lachish (Laciniu; Layard, Nin. and Bbls. pp. 148-153)

Impressions of the Signets of the Kings of Assyria and Egypt. (Original size.)

Part of Cartouche of Sabaco, enlarged from the impression of his signet.

Layard, Nin. and Bbls., p. 613; Menahem on a slab from the S. W. palace, Nimroud, now in the British Museum (ib. 617), and Hezekiah in the Kouyunjik records. The most important inscribed terracotta cylinders are those from Kalkh Sherghat, with the annals of a king, whose name is believed to read Tiglath Pileser, not the same mentioned in the 2d Book of Kings, but an earlier monarch, who is supposed to have reigned about B. C. 1110 (Rawl. Herb. i. 457) those from Khorsabad containing the annals of Sargon; those from Kouyunjik, especially one known as Bellino's cylinder, with the chronicles of Sennacherib; that from Nebbi Yunus with the records of Esarhaddon, and the fragments of three cylinders with those of his son. The longest inscription on a cylinder is of 830 lines. Such cylinders and inscribed slabs were generally buried beneath the foundations of great public buildings. Many fragments of cylinders and a vast collection of inscribed clay tablets, many in perfect preservation, and some bearing the impressions of seals, were discovered in a chamber at Kouyunjik, and are now deposited in the British Museum. They appear to include historical documents, vocabularies, astronomical and other calculations, calendars, directions for the performance of religious ceremonies, lists of the gods, their at

Jewish Captives from Lachish (Kouyunjik).
Nineveh

The only race now found near the ruins of Nineveh or in Assyria which may have any claim to be considered as descendants of the ancient inhabitants of the country are the so-called Chaldean or New Persian tribes, inhabiting the mountains of Kurdistan, the plains around the lake of Oseomiyah in Persia, and a few villages in the neighborhood of Mosul. They still speak a Semitic dialect, almost identical with the Chaldee of the books of Daniel and Ezra. A resemblance, which may be but fancied, has been traced between them and the representations of the Assyrians in the bas-reliefs. Their physical characteristics at any rate seem to mark them as of the same race. The inhabitants of this part of Asia have been exposed perhaps more than those of any other country in the world to the devastating inroads of stronger neighbors. Conquering tribes of Arabs and of Tartars have more than once well-nigh exterminated the population which they found there, and have occupied their places. The few survivors from these terrible massacres have taken refuge in the mountain fastnesses, where they may still linger. A curse seems to hang over a land naturally rich and fertile, and capable of sustaining a vast number of human beings. Those who now inhabit it are yearly diminishing, and there seems no prospect that for generations to come this once-favored country should remain other than a wilderness. (Layard's Nineveh and its Remains; Nineveh and Babylon; and Monuments of Nineveh, 1st and 2d series; Botto's Monuments de Ninive; Fergusson, Palaces of Nineveh and Perspolis Restored; Vaux's Nineveh and Perspolis.)

A. H. L.

* We referred under NAHUM to some of the writers on the history and fall of Nineveh. We add here the names of a few others who treat of this subject, relying in part on Dr. Kleinert's catalogue mentioned under the above head. G. F. Grotefend, Uber Anlage u. Zerstorung der Gebaude Ninrud (1851). J. Brandis, Uber den alt. Osirien aus der Entstehung der Assyr. Inschriften (1853). Gumpach, Abriss der Assyr.-babyl. Geschichte, 1. Aufl. (1854). Prufung des Characters der in den Assyr. Inschriften sent. Sprache, F. A. and O. Strauss, Laider u. Statten der heil. Schrift, § 881, p. 328 (1855). F. Spiegel, "Ninive" in Herzog's Real-Encyclo. x. 381-381 (1858), and a supplementary article, under the same title, xx. 219-235 (1856), J. Oppert, Chnologie des Assyriens et Babyloniens, F. Fresnel, Expédition Scientifique en Mésopotamie, publiée par J. Oppert (1858). Bonomi, Nineveh and its Palaces (1852), founded on Botta and Layard. W. K. Loftus, Travels and Researches in Chaldeea and Susiana (1858). Dr. Pusey on Jonah, Minor Prophets, with a Commentary, Part iii. (1861). Dr. Spiegel speaks in his second article in a note of the importance of careful regard to the success of the efforts which have been made to read the Assyrian inscriptions. He declares his belief that the deciphering of the Assyrian alphabet has been pursued hitherto on systematic and scientific principles; that there is good reason to hope that future studies will overcome any still remaining obstacles to a more perfect interpretation, and, in the mean time, that we may confide in the results already gained. It would be premature to expect this view to be universally accepted at present.

The cabinet of Amherst College contains some interesting antiquities from the ruins of Nineveh and Babylon. They are such as several myth figures of the most ancient style, with other fragments of characters similar to those used in the cuneiform inscriptions, taken from the palace of Sardanapalus (one of them eagle-headed, and supposed to be the Nisroch of Scripture, 2 K. xix. 37); a representation of Sardanapalus, armed as a warrior, and in the act of giving thanks for victory, with inscriptions which record his exploits; a winged human-headed lion; Sennacherib at the siege of Lachish (2 Chr. xxxvii. 9): "a fish-god, the head of the fish forming a niche above the man; a sphinx, the body of a lion, the face bearded, surmounted with a high ornamented cap; a winged horse, the original type of the Greek Pegaus; a griffon, the body of a lion, with the wings and head of an eagle; and five bricks bearing inscriptions, among which are the names and titles of three successive kings. "All the slabs bear inscriptions, reading from left to right, which are precisely identical, and refer to the king who built the palace. They are written in the cuneiform character, which was the monumental writing of the Assyrians, while an entirely distinct form was used for private documents" (see Guide to the Public Rooms and Cabinet of Amhurst College, Amh. 1868).

NIN-EBITES (Ninowrites; [Tisch. 5th ed. Ninevites]} Ninowrites. The inhabitants of Nineveh (Lah. xi. 90).

NISAN. [Month.]

NIS'ROCH (נישרך) [see below]: Mesopot., Mal's ed. *Eșparax; Alex. *Eșparax (*Comp. Nisropax) in 2 K.; *Nisroch (Alex. *Eșparax) in Is.: *Nisroch. The proper name of an idol of Nineveh, in whose temple Sennacherib was worshiping when assassinated by his sons, Adrammelech and Sharaer (2 K. xix. 37; Is. xxxvii. 38). Selden confesses his ignorance of the deity denoted by this name (de Die Syria, sint. ii. c. 10); but Beyer, in his Abhandlungen (pp. 323-325) has collected several conjectures. Jarchi, in his note on Is. xxxviii. 38, explains Nisroch as a *beam, or plank, of Nisroch," from the analysis which is given of the word by Rabbincal expositors (נישרך = נישרך נישרך). What the true ety-

* a See the plate which probably represents the siege of Lachish as depicted on the monuments, vol. ii. p. 1570.

NISROCH
of the ancients; it will be enough to refer the reader to Beekman, who (History of Inventions, ii. 482. John's ed.) has devoted a chapter to this subject, and to the authorities mentioned in the notes. "It is uncertain at what time the English term nitre first came to be used for saltpetre, but our translators no doubt understood thereby the familiar term for the Nitre-bill, so used by Mr. Layard in his translation of Pliny (xxxii. 10) in contradistinction to saltpetre, which he gives as the marginal explanation of aperitum.

The latter part of the passage in Proverbs is well explained by Shaw, who says (Prov. ii. 387), "the unsuitableness of the singing of songs to a heavy heart is very finely compared to the contrariety there is between vinegar and natrium."

This is far preferable to the explanation given by Michaelis (De Nitre Hebrew, in Commentart. Socid. Reg. propr. et. i. 166; and Suppl. Lex. Heb. p. 1704), that the simile alludes to the unpleasant smell arising from the admixture of the acid and alkali: it points rather to the extreme mental agitation produced by ill-timed mirth, the grinning against the tears, to make use of another metaphor. Natrium was and is still used by the Egyptians for washing linen; the value of soda in this respect is well known: this explains Jer. i. 1. "though thou wash thee with soda," etc. Hasel-quist (Trav. p. 275) says that natron is dug out of a pit or mine near Mantura in Egypt, and is mixed with limestone and is of a whitish-brown color. The Egyptians use it, (1) to put into bread instead of yeast, (2) instead of soap, (3) as a cure for the toothache, being mixed with vinegar. Compare also Forskal (Flor. Egypt. Arab. p. xiii.) who gives its Arabic names, utran or natrium.

Natron is found abundantly in the well-known soda lakes of Egypt described by Pliny (xxxii. 10), and referred to by Strabo (xvii. A. 1155, ed. Kramer), which are situated in the barren valley of Rohir-besam (the Waterless Sea), about 50 miles W. of Cairo; the natron occurs in whitish or yellowish efflorescent crusts, or in beds three or four feet thick, and very hard (Volney, Trav. ii. 15), which in the winter are covered with water about two feet deep; during the other nine months of the year the lakes are dry, at which period the natron is preserved. (See Andrés. Memoriae ac la Valde la Luz de Natrium, in Mem. sur l'Egypte. i. 276, &c.: Berthelot, Observ. sur le Natrium, ibid. 310; Descript. de l'Egypte. xxxii. 201.)

NO.

NOADIAH (נְוָדָיָה) [whom Jehovah makes]  
Nasadia: [Nat. Nebudah: Alex. Noadiah]  
Noadiah. 1. A Levite, son of Binnui, who with Meremeth, Eleazar, and Josiah, weighed the vessels of gold and silver belonging to the Temple which were brought back from Babylon (Ezr. viii. 31). In 1 Esdr. viii. 63, he is called "Moth the son of Sabban.

2. [Nat: Noaadiah: A. Noadiah] Noadiah. The prophetess Noadiah joined Nebuchadnezzar and Tobiah in an attempt to intimidate Nebuchadnezzar while rebuilding the wall of Jerusalem (Neh. vi. 14). She is only mentioned in Nehemiah's denuncia-

NOAH (נֶּוֶה) [rest, Ges.; or, conservation,
"And then the ground which Jehovah hath cursed." Not less evident is the bitter sense of weary and fruitless labor, mingled with better hopes for the future. We read that on the birth of a son "he called his name Noah, saying, This shall comfort us, for our work and labor of our hands, because of (or from) the ground which Jehovah hath cursed." Nothing can be more exquisitely true and natural than the way in which the old man's saddened heart turns focally to his son. His own lot had been cast in evil times; "but this," he says, "shall comfort us." One hardly knows whether the sorrow or the hope predominates. Clearly there is an almost prophetic feeling in the name which he gives his son, and hence some Christian writers have seen in the language a prophecy of the Messiah, and have supposed that as Eve was mistaken on the birth of Cain, so Lamech in like manner was deceived in his hope of Noah. But there is no reason to infer from the language of the narrative that the hopes of either were of so definite a nature. The knowledge of a personal deliverer was not vouchsafed till a much later period.

In the reason which Lamech gives for calling his son Noah, there is a play upon the name which it is impossible to preserve in English. He called his name Noah (72). Noah, rest, saying, "this same shall comfort us" (גָּאָה, geninachasèn). It is quite plain that the name "rest," and the verb "comfort," are of different roots; and we must not try to make a philologist of Lamech, and suppose that he was giving an accurate derivation of the name Noah. He merely plays upon the name, after a fashion common enough in all ages and all languages.

Of Noah himself from this time we hear nothing more till he is 500 years old, when it is said he begat three sons, Shem, Ham, and Japheth. Very remarkable, however, is the glimpse which we get of the state of society in the antediluvian world. The narrative it is true is brief, and on many points obscure: a mystery hangs over it which we cannot penetrate. But some facts are clear. The wickedness of the world is described as having reached a desperate pitch, owing, it would seem, in a great measure to the fusion of two races which had hitherto been distinct. And further the marked features of the wickedness of the age were lust and brutal outrage. "They took them wives of all which they chose:" and, "the earth was filled with violence." "The earth was corrupt," and all flesh was "confused before God upon the earth." So far the picture is clear and vivid. But when we come to examine some of its details, we are left greatly at a loss. The narrative stands thus:

"And it came to pass when men (the Adam) began to multiply on the face of the ground and daughters were born unto them; then the sons of God (the Elohim) saw the daughters of men (the Adam) that they were fair, and they took them of all that they chose. And Jehovah said, My spirit shall not for ever rule (or be humbled) in men, seeing that they are [or, in their error they are] but flesh, and their days shall be a hundred and twenty years. The Nephilim were in the earth in those days: and also afterwards when the sons of God (the Elohim) came in unto the daughters of men (the Adam), and children were born to them, these were the heroes which were of old, men of renown."

Here a number of perplexing questions present themselves: Who were the sons of God? Who the daughters of men? Who the Nephilim? What is the meaning of a My spirit shall not always rule, or dwell, or be humbled in men;" and of the words which follow, "But their days shall be an hundred and twenty years?"

We will briefly review the principal solutions which have been given of these difficulties.

1. Three different interpretations have from very early times been given of this most singular passage.

The "sons of Elohim" were explained to mean sons of princes, or men of high rank (as in Ps. cxliii. 6; 1918 Eloyn, sons of the Most High) who degraded themselves by contracting marriages with "the daughters of men," i. e. with women of inferior position. This interpretation was defended by Ps. xlii. 2, where "sons of men," בְּנֵי אָדָם, means "men of low degree," as opposed to בְּנֵי עֵדָם, "men of high degree." Here, however, the opposition is with בְּנֵי הָאָדָם, and not with בְּנֵי אָדָם, and therefore the passages are not parallel.

This is the interpretation of the Targum of Onkelos, following the oldest Palestinian Kahalata, of the later Targum, and of the Samaritan Vers. So also Symmachus, Saadia, and the Arabic of Erpenius, Aben Ezra, and R. Sol. Isaac. In recent times this view has been elaborated and put in the most favorable light by Schiöler (Werke, x. 401, &c.); but it has been entirely abandoned by every modern commentator of any note.

So some MSS. of the LXX., which according to Procopius and Augustine (De Civit. Dei, vi. 23), had the reading ἄγγελος τοῦ θεοῦ, whilst others had ἄγγελοι τοῦ θεοῦ, the last having been generally preferred since Cyril and Augustine; so Josephus, Ant. i. 3; Philo De Gigantibus perhaps Aquila, who has ἄγγελος τοῦ θεοῦ of which, however, Jerome says, Duo intelligius angelo salutati; the Book of Enoch as quoted by Georgius Syncellus in his Chronographia, where they are termed ἄγγελοι, "the watchers" (as in Daniel); the Book of Jubilees (translated by Billium from the Ethiopic); the later Jewish Haggada, where we have the story of the fall of Shammedazi and Azazel given by Jellinek in the Mabrur Akhier; and most of the older Fathers of the Church, finding probably in their Greek MSS. άγγελοι τοῦ θεοῦ, as Justin, Tatian, Athanasius, Cyprian, Ancyra, Territullian, and Lactantius. This view, however, seemed in later times to be too monstrous to be entertained. E. Sim. i. locani mathematized άγγελοι τοῦ θεοῦ: Cyril calls it άγγελος τοῦ θεοῦ. Theodoret (Quast. in Gen.) declares the maintainers of it to have lost their senses. άγγέλου καὶ ἄγγελων θεοῦ: Philostratus numbers it among heroes, Chrysostom among phlegmatics. Finally, Calvin says of it, "Veris illud commentum de angelorum concatenatore mundi, nihil esse est absurdo ab animadversione abeuntibus, et minime est docet virus tam crassis et praedigiosi delirii fuisse olim fascinatos." Notwithstanding all which, however, many modern German commentators very strenuously assert this view. They rest their argument in favor of it mainly on these two particulars: first, that "sons of God" is everywhere in the O. T. a name of the angels; and next, that St. Jude seems to lend the sanction of his authority to this interpretation. With regard to the first of these reasons, it is not even certain that in all other passages of Scripture where "the sons of God" are mentioned angels are meant. It is not absolutely necessary so to understand the designation either in Ps. xxvii. 1 or xxxix. 6, or even in Job i. 1, ii. In any of these passages it might mean holy men. Job xxxviii. 7, and Dan. vi. 25, are the only places in which it certainly means angels. The argument from St. Jude is of more force: for he does compare the sin of the angels to that of Sodom and Gomorrah (παραπόνοι in ver. 7 must refer to the angels mentioned in ver. 6), as if it were of a like unnatural kind. And that this was the meaning of St. Jude is rendered the more probable when we recollect his quotation from the Book of Enoch where the same view is taken. Further, that the angels had the power of assuming a corporeal form seems clear from many parts of the O. T. All that can be urged in support of this view has been said by Delitzsch in his De Genesi allegor., and by Kurtz, Gesch. des Alten Bundes, and his treatise, Die Ehre der Stadt Johannes. And it must be confessed that their arguments are not without weight. The early existence of such an interpretation seems at any rate to indicate a starting point for the heathen mythology.

The fact, too, that from such an interpretation "the mighty men" were born, points in the same direction. The Greek "heroes" were sons of the gods; αῖων υἱῶν, says Plato in the Cratylus, ἵππους οὐ πατέρας πάντες δόμοι γεγονότων ἐφέσεις οἶδε θοῖς θυσίαις ηθος θεοῖς. Even Eusebius's account of the birth of the giants, monstrous and fantastic as it is, bears tokens of having originated in the same belief. In like manner it may be remarked that the stories of *ucubli and sucuboli, so commonly believed in the Middle Ages, and which even Heidinger (Hist. Sac. i. 299) does not discredit, had reference to a commerce between demons and metals of the same kind as that narrated in Genesis.9

Two modern poets, Byron (in his drama of Cain) and Moore (in his *Lovers of the Ancients), have availed themselves of this last interpretation for the purpose of their poems.

3. The interpretation, however, which is now most generally received, is that which understands by "the sons of the Elohim" the family and descendants of Seth, and by "the daughters of man" (Adam)," the women of the family of Cain. So the Clementine Recognitions interpret "the sons of the Elohim" as Hominis justi qui angelorum vivat certum. So Ephrem, and the Christian Adam-Book of the East: so also, Theodoret, Chrysostom, Cyril of Alexandria, Jerome, Augustine, and others. The later times Luther, Melancthon, Calvin, and a whole host of recent commentators. They all supposed that whereas the two lines of descent from Adam—the family of Seth who preserved their faith in God, and the family of Cain who lived only for this world—had hitherto kept distinct, now a mingling of the two races took place which resulted in the thorough corruption of the former, who falling away, plunged into the deepest abyss of wickedness, and that this was this universal corruption which provoked the judgment of the Flood.2

4. A fourth interpretation has recently been advanced and maintained with considerable ingenuity, by the author of the Genesis of the Earth and Man. He understands by "the sons of the Elohim" and "the daughters of Adam" the "scourers of the earth," (taking Elohim to mean not two things, but only those whom he supposes to have belonged to a distinct pre-Adamite race. "The daughters of men," he contends, should be rendered "the daughters of Adam, or the Adamites, women, that is, descended from Adam. These last had hitherto remained true in their faith and worship, but were now perverted by the idders who intermarried with them. But this hypothesis is opposed to the direct statements in the early chapters of Genesis, which plainly teach the descent of all mankind from one common source.

Whichever of these interpretations we adopt (the third perhaps is the most probable), one thing at least is clear, that the writer intends to describe a fusion of races hitherto distinct, and to connect with this two other facts: the one that the offspring of these mixed marriages were men remarkable for strength and prowess (which is only in accordance with what has often been observed since, namely, the superiority of the mixed race as compared with either of the parent stocks); the other,
that the result of this intercourse was the thorough and hopeless corruption of both families alike.

b. But who were the Nephilim? It should be observed that they are not spoken of (as has sometimes been assumed) as the offspring of the "sons of the Elohim" and "the daughters of men." The sacred writer says, "the Nephilim were on the earth in those days," before he goes on to speak of the children of the mixed marriages. The name, which has been variously explained, only occurs once again in Num. xiii., where the Nephilim are said to have been one of the Canaanitish tribes. They are there spoken of as "men of great stature," and hence probably the rendering "giants" of the LXX. and "the giants" of our A. V. But there is nothing in the word itself to justify this interpretation. If it is of Hebrew origin (which, however, may be doubted), it must mean either "fallen," i.e. apostate ones; or those who "fell upon" others, violent men, plunderers, freebooters, etc. It is of far more importance to observe that if the Nephilim of Canaan were descendants of the Nephilim in Gen. vi. 4, we have here a very strong argument for the non-universality of the Deluge. [GIANTS.]

c. In consequence of the grievous and hopeless wickedness of the world at this time, God resolves to destroy it. "My spirit," He says, "shall not always dwell in man, as much as he is flesh. The meaning of which seems to be that whilst God had put his Spirit in man, i.e. not only the breath of life, but a spiritual part capable of recognizing, loving, and worshipping Him, man had so much sunk down into the lowest and most degrading of merely sensual pleasures, as to have almost extinguished the higher light within him; as one of the Fathers says: anima victa vel nihil victor: the soul and spirit became transsubstantiated into flesh. Then follows: "But his days shall be a hundred and twenty years," which has been interpreted by some to mean, that still a time of grace shall be given for repentance, namely, 120 years before the Flood should come; and by others that the duration of human life should in future be limited to this term of years, instead of extending over centuries as before. This last seems the most natural interpretation of the Hebrew words. Of Noah's life during this age of almost universal apostasy we are told but little. It is merely said, that he was a righteous man and perfect in his generations (i.e. amongst his contemporaries), and that he, like Enoch, walked with God. This last expressive phrase is used of none other but these two only. To him God revealed his purpose to destroy the world, commanding him to prepare an ark for the saving of his house. And from that time till the day came for him to enter into the ark, we can hardly doubt that he was engaged in active, but as it proved unavailing efforts to win those about him from their wickedness and unbelief. Hence St. Peter calls him "a preacher of righteousness." Besides this we are merely told that he had three sons, each of whom had married a wife: that he built the ark in accordance with Divine direction; and that he was 600 years old when the Flood came.

Both about the ark and the Flood so many questions have been raised, that we must consider each of these separately.

The Ark. — The precise meaning of the Hebrew word (תֹּהוּם, tôhu) is uncertain. The word only occurs here and in the second chapter of Exodus, where it is used of the little papyrus boat in which the mother of Moses entrusted her child to the Nile. It is probable that it is the Egyptian form that we are to look for its original form.

Bunsen, in his vocabulary, gives thôh, "a chest," lyt., "a boat," and in the Const. Vers. of Ex. ii. 3, 5, ὡς ὁ θὸς is the rendering of tôhu. The LXX. employ two different words. In the narrative of the Flood they use θαυμάται, and in that of Moses ὕδας, or according to some MSS. ἔφθασ. The Book of Wisdom has σχηματίζει; Berosus and Nicol. Damaus. quoted in Josephus, πλωτον καὶ ἄρατα. The last is also found in Lucian, De Dea Syr., c. 12. In the Sibylline Verses the ark is ὄρραφαρων ὅμας, ὄξως and καρποῖς. The Targum and the Keres have respectively been the Chaldean and the Arabic form of the Hebrew word.

This "chest," or "boat," was to be made of cypress (i.e. cypress) wood, a kind of timber which both for its lightness and its durability was employed by the Phoenicians for building their vessels. Alexander the Great, Arrian tells us (vii. 49), made use of it for the same purpose. The planks of the ark, after being put together, were to be protected by a coating of pitch, or rather bitumen (תֹּהוּם, LXX. δοράλαιος), which was to be laid on both inside and outside, as the most effective means of making it water-tight, and perhaps also as a protection against the attacks of marine animals. Next to the material, the method of construction is described. The ark was to consist of a number of "nests" (תֹּהוּם), or small compartments, with a view no doubt to the convenient distribution of the different animals and their food. These were to be arranged in three tiers, one above another: "with lower, second, and third (stories) shalt thou make it." Means were also to be provided for letting light into the ark. In the A. V. we read, "A window shalt thou make to the ark, and in a cubit shalt thou finish it above:" — words which it must be confessed convey no very intelligible idea. The original, however, is obscure, and has been differently interpreted. What the window, or "light-hole" (תֹּהוּם, מָקוֹם) was, is very puzzling. It was to be at the top of the ark apparently. If the words "unto a cubit (תֹּהוּם, נָבְלָה) shalt thou finish it above," refer to the window and not to the ark itself, they seem to imply that this aperture, or skylight, extended to the breadth of a cubit the whole length of the roof? But if...
so, it could not have been merely an open slit, for that would have admitted the rain. Are we then to suppose that some transparent, or at least translucent, substance was employed? It would almost seem so. A different word is used in Gen. viii. 6, where it is said that Noah opened the window of the ark. There the word is לֹּוֹ (challun), which frequently occurs elsewhere in the same sense. Certainly the story as there given does imply a transparent window as Sah-Schultz (Arch. i. 311) has remarked. 1 For Noah could watch the motions of the birds outside, unlike the men in the same window in order to take them in. Supposing then the ladder to be, as we have said, a skylight, or series of skylights running the whole length of the ark (and the form of the ark inclines one to regard it as a collective noun), the challun might very well be a single compartment of the larger window, which could be opened at will. But besides the window there was to be a door. This was to be placed in the side of the ark. 2

The door must have been of some size to admit the larger animals, for whose ingress it was mainly intended. It was no doubt above the highest draught mark of the ark, and the animals ascended to it probably by a sloping embankment. A door in the side is not more difficult to understand than the port holes in the sides of our vessels. 3 Of the shape of the ark nothing is said; but its dimensions are given. It was to be 300 cubits in length, 50 in breadth, and 30 in height. Supposing the cubit here to be the cubit of natural measurement, reckoning from the elbow to the top of the middle finger, we may get a rough approximation as to the size of the ark. The cubit, so measured (called in Dent. iii. 11, "the cubit of a man"), must of course, at first, like all natural measurements, have been inexact and fluctuating. In later times no doubt the Jews had a standard common cubit, as well as the royal cubit and sacred cubit. We shall probably, however, be near enough to the common cubit, which was reckoned (according to Mich., John, Green, and others) as equal to six handbreadths, the hand-breadth being 3½ inches. This therefore gives 21 inches for the cubit. 4 Accordingly the ark would be 525 feet in length, 87 feet in breadth, and 32 feet 6 inches in height. This is very considerably larger than the largest British naval-boat. The Great Eastern, however, is both longer and deeper than the ark, being 1680 feet in length (621 on deck), 83 in breadth, and 58 in depth. Solomon's Temple, the proportions of which are given in 1 K. vi. 2, was the same height as the ark, but only one-fifth of the length, and less than half the width.

It should be remembered that this huge structure was only intended to float on the water, and was not in the proper sense of the word a ship. It had neither mast, sail, nor rudder; it was in fact nothing but an enormous floating house, or old-fashioned box rather, "as it is very likely," says Sir W. Raleigh, 5 that the ark had *franulum planum, a flat bottom, and not rayed in form of a ship, with a sharpness forward, to cut the waves for the better speed." The great vessel was not given to it by painters, there can be no doubt is wrong. Two objects only were aimed at in its construction: the one was that it should have ample stowage, and the other that it should be able to keep steady upon the water. It was never intended to be carried to any great distance from the place where it was originally built. A curious proof of the suitability of the ark for the purpose for which it was intended was given by a Dutch merchant, Peter Janz, the Menomega, who in the year 1604 had a ship built at Hoorn of the same proportions (though of course not of the same size) as Noah's ark. It was 120 feet long, 20 broad, and 12 deep. This vessel, unsuitable as it was for quick voyages, was found remarkably well adapted for freightage. 6 It was calculated that it would hold a third more bulging than other vessels without requiring more hands to work it. A similar experiment is also said to have been made in Denmark, where, according to Reyher, several vessels called "flotten" or floats were built after the model of the ark.

1 A different word from either of these is used in vii. 11 of the windows of heaven, מָיְבְוָ בַּיִין, hërōbōth (from מְיָבְוָ בַּיִין, * to interweave"), LXX. as ζωνονοια, and its connection (from מְיָבְוָ בַּיִין, "interweave") with מָיְבְוָ בַּיִין, "grattings") (Gen. Thea. in v.).

2 Sir Walter Raleigh, in his History of the World, reckons the ark to 18 inches. Dr. Kitto calls this "a safe way of estimating the cubit in Scripture, but gives it himself as 21.888 inches. For this inconsistency he is taken to task by Hugh Miller, who adopts the measurement of Sir W. Raleigh.

3 Augustine (De Civ. D. lib. xx.) long ago discovered another excellence in the proportions of the ark; and that is, that they were the same as the proportions of the perfect human figure the length of which from the sole to the crown is six times the width across the chest, and ten times the depth of the remaining figure measured in a "light line" from the ground.
May their birds, unclean there are thee, of sarth is earth. Was ai»iis the earth the tree, to preserve the custom of polygamy. Noah is also to take a pair of each kind of animal into the ark with him that he may preserve them alive; birds, domestic animals (772727), and creeping things are particularly mentioned. He is to provide for the wants of each of these stores + of every kind of food that is eaten. It is added, "This did Noah; according to all that God (Elohim) commanded him, so did he."

The comparable addition to these directions occurs in the following chapter. The pairs of animals are now limited to one of unclean animals, whilst of <em>cleva</em> animals and birds (ver. 2) Noah is to take him seven pairs (or as others think, seven individuals, that is three pairs and one supernumerary male for sacrifice). + How is this addition to be accounted for? May we not suppose that we have here traces of a separate document interwoven by a later writer with the story of Noah? The passage itself has not, to all appearance, been incorporated intact, but there is a coloring about it which seems to indicate that Moses, or whoever put the Book of Genesis into its present shape, had here consulted a different narrative. The distinct use of the Divine names in the same phrase, vi. 22, and vii. 5 — in the former Elohim, in the latter Jehovah — suggests that this may have been the case. + It does not follow, however, from the mention of clean and unclean animals that this section reflects a Levitical or post-Mosaic mind and handling. There were sacrifices before Moses, and why may there not have been a distinction of clean and unclean animals? It may be true of many other things besides circumcision: Moses gave it you, not because it was of Moses, but because it was of the fathers.

Are we then to understand that Noah literally conveyed a pair of all the animals of the world into the ark? This question virtually contains in it another, namely, whether the deluge was universal, or only partial? If it was only partial, then of course it was necessary to find room but for a comparatively small number of animals; and the dimensions of the ark are ample enough for the required purpose. The argument on this point has already been so well stated by Hugh Miller in his <em>Testimony of the Rocks</em>, that we need do little more than give an abstract of it here. After saying that it had for ages been a sort of stock problem to determine whether all the animals in the world by sevens, and by pairs, with food sufficient to serve them for a twelvemonth could have been accommodated in the given space, he quotes Sir W. Raleigh's calculation on the subject. + Sir Walter proposed to allow "for eighty-nine distinct species of beasts, or lost any should be omitted, for a hundred several kinds." He then by a curious sort of estimate, in which he considers "one elephant as equal to four beavers, one lion to two wolves," and so on, reckons that the space occupied by the animals be equivalent to the spaces required for 91 (or say 120) beavers, four score sheep, and three score and four wolves. All these two hundred and eighty beasts might be kept in one story, or room of the ark, in their several cabins; their meat in a second; the birds and their provision in a third, with space to spare for Noah and his family, and all their necessaries." + "Such," says Hugh Miller, "was the calculation of the statesman Raleigh, a man who had a more practical acquaintance with <em>stowage</em> than perhaps any of the other writers who have speculated on the capabilities of the ark, and his estimate seems sober and judicious." He then goes on to show how enormously these limits are exceeded by our present knowledge of the extent of the animal kingdom. Buffon doubled Raleigh's number of distinct species. During the last thirty years so astonishing has been the progress of discovery, that of mammals alone there have been ascertained to exist more than eight times the number which Buffon gives. In the first edition of <em>Johnston's Physical Atlas</em> (1818), one thousand six hundred and twenty-six distinct species of

---

+a Only tame animals of the larger kinds are expressly mentioned (vi. 20); and if we could be sure that none others were taken, the difficulties connected with the necessary provision, stowage, etc., would be materially lessened. It may, however, be urged that in the first instance "every living thing of all flesh" (vi. 25) was to come into the ark, and that afterwards (vii. 19) "every living thing" is spoken of not as including, but as distinct from the tame cattle, and that consequently the inference is that wild animals were meant.  
+b Avis, Gv., Tsch, Baung, and Delttsch, understand seven individuals of each species. Del. argues that, if we take הֵָּה בָּה הֵָּה here to mean seven pairs, we must also take הֵָּה הֵָּה before to mean two pairs (and Origen does so take it, <em>cont. Cels. </em>iv. 41). But without arguing, with Knobel, that the repetition of the general in this case, and not in the other, may perhaps be designed to denote that here pairs are to be understood, at any rate the addition "male and his female" renders this the more probable interpretation.  
+c It is remarkable, moreover, that whilst in ver. 2 it is said, "Of every clean beast thou shalt take to thee by sevens," in vs. 5, 9, it is said, "Of clean beasts, and of beasts that are not clean," etc., "there went in two and two unto Noah into the ark." This again looks like a compilation from different sources.  
+d The earliest statement on the subject I have met with is in the Pirké R. Eliezer, where it is said that Noah took 32 kinds of birds, and 240 species of beasts, with him into the ark.  
+e Heidegger in like manner (<em>Hist. Szcz. </em>i. 518) thinks he is very liberal in allowing 300 kinds of animals to have been taken into the ark, and considers that this would give 25 cubits of solid contents for each kind of animal. He then subjoins the far more elaborate and really very curious computation of Joh. Temeraeus in his <em>Chronol. Demonstr.,</em> who reckons after Sir W. Raleigh's fashion, but enumerates all the different species of known animals (upon which he mentions Pegasi, Sphinxes, and Satyrs), the kind and quantity of provision, the method of stowage, etc. See Heidegger, as above, pp. 506, 507, and 518-521.
mammals are enumerated: and in the second edition (1850) one thousand six hundred and fifty-eight species forms that the original number of the six thousand two hundred and sixty-six birds of Lesson, and the six hundred and fifty-seven or (subtracting the sea-snakes, and perhaps the turtles) the six hundred and forty-two repiles of Charles Bonaparte.

Take the case of the clean animals alone, of which there were to be seven introduced into the ark. As an instance of a much greater genealogy, that only seven individuals, and not seven pairs, were introduced, the number of these alone, as now known, is sufficient to settle the question. Mr. Waterhouse, in the year 1856, estimated the oxen at twenty species; the sheep at twenty-seven species; the goats at twenty; and the deer at fifty-one. In short, if excluding the lamass and the muskox as doubtfully clean, tried by the Mosaiue test, we add to the sheep, goats, deer, and cattle, the forty-eight species of unequivocally clean antelopes, and multiply the whole by seven, we shall have as the result a sum total of one thousand one hundred and sixty-two individuals, a number more than four times greater than that for which Raleigh made provision in the ark. It would be curious to ascertain what number of animals could possibly be stowed, together with sufficient food, to last for a twelvemonth, or heard the Great Eastern.

But it is not only the inadequate size of the ark to contain all, or anything like all, the progenitors of our existing species of animals, which is conclusive against a universal deluge. Another fact points with still greater force, if possible, in the same direction, and that is the manner in which we now find these animals distributed over the earth’s surface. Linnaus held, early in the last century, that all creatures which now inhabit the globe had proceeded originally from some such common centre as the ark might have furnished; but no zoologist acquainted with the distribution of species can acquiesce in any such conclusion now. We now know that every great continent has its own peculiar fauna: that the original centres of our distribution must have been not one, but many; further, that the areas or circles around these centres must have been occupied by their pristine animals in ages long anterior to that of the Noe-chian Deluge; and that in even the latter geologic ages they were preceded in them by animals of the same general type.” Thus, for instance, the animals of South America, when the Spaniards first penetrated into it, were found to be totally distinct from those of Europe, Asia, or Africa. The pumas, the jaguar, the tapir, the llama, the sloths, the armadillos, the opossums, were animals which had never been seen elsewhere. So again Australia has a whole class of animals, the marsupials, quite unknown to other parts of the world. The various species of kangaroo, phalanger, dasyurus, and possums, the flying phalangers, and other no less singular creatures, were the astonishment of naturalists when this continent was first discovered. New Zealand likewise, though singularly devoid of indigenous mammals and reptiles... has a scarcely less remarkable fauna than either of these great continents. It consists almost exclusively of birds, some of them so ill provided with wings, that, like the nids of the natives, they can only run along the ground.” And what in very remarkable, that the distribution of animals does not date merely from the human period. We find the gigantic forms of those different species which during the later tertiary epochs preceded or accompanied the existing forms, occupying precisely the same habitats. In S. America, for instance, there lived then, side by side, the gigantic sloth (megatherium) to be seen in the British museum, and the smaller animal of the same species which has survived the extinction of the larger. Australia in like manner had then its gigantic marsupials, the very counterpart in everything but in size of the existing species. And not only are the same mammals found in the same localities, but they are surrounded in every respect by the same circumstances, and exist in company with the same birds, the same insects, the same plants. In fact so stable is this law that, although prior to the pliocene period we find a different distribution of animals, we still find each separate locality distinguished by its own species both of fana and of flora, and we find these grouped together in the same manner as in the later periods. It is quite plain, then, that if all the animals of the world were literally gathered together in the ark and so saved from the waters of a universal deluge, this could only have been effected (even supposing there was space for them in the ark) by a most stupendous miracle. The sloth and the armadillo must have been brought across oceans and continents from their South American home, the kangaroo from his Australian forests and prairies, and the polar bear from his treelogs, to that part of Armenia, or the Euphrates Valley, where the ark was built. These and all the other animals must have been brought in perfect subjection to Noah, and many of them must have been taught to forget their native ferocity in order to prevent their attacking one another. They must then further, having been brought by supernatural means from the regions which they occupied, have likewise been carried back to the same spots by supernatural means, the having never been taken that no trace of their passage to and fro should be left.

But the narrative does not compel us to adopt so tremendous an hypothesis. We shall see more clearly when we come to consider the language used with regard to the Flood itself, that even that language, strong as it undoubtedly is, does not oblige us to suppose that the Deluge was universal. But neither does the language employed with regard to the animals lead to this conclusion. It is true that Noah is told to take two “of every living thing of all flesh,” but that could only mean two of every animal then known to him, unless we suppose him to have had supernatural information in zoology imparted—a thing quite incredible. In fact, we have no misconceptions as to the meaning of certain expressions, no one would ever have suspected that Noah’s knowledge, or the knowledge of the writer of the narrative, could have extended beyond a very limited portion of the globe.

Again, how were the carnivorous animals supplied with food during their twelve months’ abode in the ark? This would have been difficult even the propagation of "existing species" from their genera or types. It.
NOAH

for the very limited number of wild animals in Noah's immediate neighborhood. For the very large numbers which the theory of a universal Deluge supposes, it would have been quite impossible, unless again we have recourse to miracle, and either maintain that they were miraculously supplied with food, or that for the time being the nature of their teeth and stomach was changed, so that they were able to live on vegetables. But these hypotheses are so extravagant, and so utterly unsupported by the narrative itself, that they may be safely dismissed without further comment.

The Flood. — The ark was finished, and all its living freight was gathered into it as in a place of safety. Jehovah shut him in, says the chronicler, speaking of Noah. And then there ensued a solemn pause of seven days before the threatened destruction was let loose. At last the Flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description which in a modern historian or poet would have occupied the largest space. We see nothing of the death-struggle; we hear not the cry of despair; we are not called upon to witness the frantic agony of husband and wife, and parent and child, as they fled in terror before the rising waters. Nor is a word said of the sadness of the one righteous man who, salvation, looked upon the destruction which he could not avert. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. This is heightened by the contrast and repetition of two ideas. On the one hand we are reminded no less than six times in the narrative in ch. vii., viii., viii., who the tenants of the ark were (vi. 18-21, vii. 1-3, 7-9, 13-16, viii. 16, 17, 18, 19), the favored and rescued few; and on the other hand the total and absolute blotting out of everything else is not less emphatically dwelt upon (vi. 13, 17, vii. 4, 21-23). This evidently designed contrast may especially be traced in ch. vii. First, we read in ver. 6, "And Noah was six hundred years old, and Noah began the ark — the ark of the earth." Then follows an account of Noah and his family and the animals entering into the ark. Next, verses 10-12 resume the subject of ver. 7:

And it came to pass after seven days that the waters of the flood were upon the earth. In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month, on the self-same day were all the fountains of the great deep broken up, and the windows (or flood-gates) of heaven were opened. And the rain was upon the earth forty days and forty nights. Again the narrative returns to Noah and his companions and their safety in the ark (vv. 13-16). And then in ver. 17 the words of ver. 12 are resumed, and from thence to the end of the chapter a very simple but very powerful and impressive descrip-

a It is impossible to say how this reckoning of time was made, and whether a lunar or solar year is meant. Much ingenuity has been expended on this question (see Delitzsch's Comment.), but with no satisfactory results.

b The raven was supposed to foretell changes in the weather both by its flight and its cry (Elian. A. vii. 7; Virg. Georg. i. 382, 410). According to Jewish tradition, the raven was preserved in the ark in order to be the progenitor of the birds which afterwards fed Elijah by the brook Chereith.

c The olive-tree is an evergreen, and seems to have the power of living under water, according to Theophrastus (Hist. Plant. iv. 8) and Pliny (H. N. xiii. 50), who mention olive-trees in the Red Sea. The olive grows in Armenia, but only in the valleys on the south side of Ararat, not on the slopes of the mountain. It will not flourish at an elevation where even the mulberry, walnut, and apricot are found (Ritter, Erdkunde, x. 920).
only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended. Thus, for instance, it is said that "all the countries came into Egypt to Joseph to buy corn," and that "they went out from Cæsar Augustus that all the world should be taxed." In these and many similar passages the expressions of the writer are obviously not to be taken in an exactly literal sense. Even the apparently very distinct phrase "all the high hills that were under the whole heaven were covered," may be explained by another passage of similar nature, where it is said that God would put the fear and the dread of Israel upon "every nation under heaven." It requires no effort to see that such language is framed with a kind of poetic breadth. The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the sea (Ararat), it would have been quite impossible for this to have been covered, the water reaching 15 cubits, i.e. 26 feet above it, unless the whole earth were submerged. The author of the Genesis of the Earth, etc., has elsewhere described the catastrophe as bringing the scene of the catastrophe to the low country on the banks of the Tigris and Euphrates (a miraculous overflow of these rivers being sufficient to account for the Deluge), and supposing that the "fifteen cubits upward" are to be reckoned, not from the top of the mountains, but from the surface of the plain. By the high hills "he thinks may be meant only slight elevations, called "high" because they were the highest parts overflowed. But fifteen cubits is only a little more than twenty-six feet, and it seems absurd to suppose that such trifling elevations are described as "all the high hills under the whole heaven." At this rate the ark itself must have been twice the height of the highest mountain. The plain meaning of the narrative is, that far as the eye could see, not a solitary mountain peared its head above the waste of waters. On the other hand, there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain-range, such as the Zagros range for instance, may be intended. And in the absence of all geographical certainty in the matter it is better to adopt some such explanation of the difficulty. Indeed it is out of the question to imagine that the ark rested on the top of a mountain which is covered for 4000 feet from the summit with perpetual snow, and the descent from which would have been a very serious matter both to men and other animals. The local tradition, according to which fragments of the ark are still believed to remain on the summit, can weigh nothing when balanced against so extreme an improbability. Assuming, then, that the Ararat here mentioned is not the mountain of that name in Armenia, we may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian Gulf, or further. As the

2. In a valuable paper by Mr. Joseph Prestwich (recently published in the Philosophical Transactions), it is suggested that in all probability the origin of man
Again, had the whole globe been submerged, the sea-water covering the kind would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind has occurred.

Lastly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture.

There are, then, it must be confessed, very strong grounds for believing that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local: suppose, for instance, the valley of the Euphrates to have been submerged; and then the necessity for preserving all the species of animals disappears. For, in the first place, there was nothing to prevent the birds and many of the large mammals from getting away; and in the next, the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insignificant.

All these considerations point with overwhelming force in the same direction, and compel us to believe, unless we suppose that a stupendous miracle was wrought, that the Flood of Noah (like other deluges of which we read) extended only over a limited area of the globe.

It now only remains to notice the later allusions to the cataclysm occurring in the Bible, and the traditions of it preserved in other nations besides the Jewish.

The word specially used to designate the Flood of Noah (גנןה Gesture) occurs in only one other passage of Scripture, Ps. xxix. 10. The poet there sings of the Majesty of God as seen in the storm. It is not improbable that the heavy rain accompanying the thunder and lightning had been such as to swell the torrents, and perhaps cause a partial inundation. This carried back his thoughts to the Great Flood of which he had often read, and he sang, "Jehovah sat as king at the Flood," and looking up at the clear face of the sky, and on the freshness and glory of nature around him, he added, "and Jehovah remaineth a king for ever."

In Is. liv. 9, the Flood is spoken of as "the waters of Noah." God Himself appeals to his promise made after the Flood (as a pledge of his faithfulness to Israel): "For this is as the waters of Noah unto Me: for as I have sworn that the waters of Noah should no more go over the earth; so have I sworn that I would not be wroth with thee nor rebuke thee."

In the N. T. our Lord gives the sanction of his own authority to the historical truth of the narrative, Matt. xxiv. 37 (cf. Luke xvi. 25), declaring that the state of the world at his Second Coming shall be such as it was in the days of Noah. St. Peter speaks of the "long suffering of God," which "waited in the days of Noah while the ark was a preparing, wherein few, that is, eight souls were saved by water," and sees in the waters of the Flood by which the ark was borne up a type of Baptism, by which the Church is separated.
from the world. And again, in his Second Epistle (ii. 5), he cites it as an instance of the righteous judgment of God who spared not the old world, etc.

The traditions of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, whence they were carried by the different families of men as they wandered east and west, or whether they were of national origin, and embody merely records of catastrophes, such as especially in mountainous countries are of no rare occurrence. In some instances no doubt the resemblances between the heathen and the Jewish stories are so striking as to render it morally certain that the former were borrowed from the latter. We find, indeed, a mythological element, the absence of all moral purpose, and a national and local coloring, but, discernible amongst these, undoubted features of the primitive history. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost amongst these is the Chaldaan. It is preserved in a Fragment of Berossus, and is as follows: 'After the death of Arachis, his son Xisuthrus reigned eighteen sari. In his time happened a great Deluge: the history of which is thus described. The Deity Kronus appeared to him in a vision, and warned him that on the 15th day of the month Dimas there would be a flood by which mankind would be destroyed. He therefore enjoined him to write a history of the beginning, course, and end of all things; and to bury it in the City of the Sun at Sippara; and to build a vessel (σαβαγγάκι), and to take with him into it his friends and relations; and to put on board food and drink, together with different animals, birds, and quadrupeds; and as soon as he had made all arrangements, to commit himself to the deep. Having asked the Deity whether he was to sail? he was answered, 'To the gods, after having offered a prayer for the good of mankind.' Whereupon, not being disobedient (to the heavenly vision), he built a vessel five stadia in length, and two in breadth. Into this he put everything which he had prepared, and embalmed in it his wife, his children, and his personal friends. After the flood had been upon the earth and was in time abated, Xisuthrus sent out some birds from the vessel, which not finding any food, nor any place where they could rest, returned thither. After an interval of some days Xisuthrus sent out the birds a second time, and now they returned to the ship with mud on their feet. A third time he repeated the experiment and then they returned no more; whence Xisuthrus judged that the earth was visible above the water; and accordingly he made an opening in the vessel (ςαβαγγάκι), and seeing that it was stranded upon the site of a certain mountain, he quitted it with his wife and daughter, and the pilot. Having paid his adoration to the earth, and having built an altar and offered sacrifices to the gods, he, together with those who had left the vessel with him, disappeared. Those who had remained behind, when they found that Xisuthrus and his companions did not return, in their turn left the vessel and began to look for him, calling him by his name. Him they saw no more, but a voice came to them from heaven, bidding them lead on lives, and so join him who was gone to live with the gods; and further informing them that

his wife, his daughter, and the pilot had shared the same honor. It told them, moreover, that they should return to Babylon, and how it was ordained that they should take up the writings that had been buried in Sippara and impart them to mankind, and that the country where they then were was the land of Armenia. The rest having heard these words, offered sacrifices to the gods, and taking a circuit journeyed to Babylon. The vessel having thus stranded in Armenia, was a part of it still remains in the mountains of the Corekyans (or Cordyans, i. e., the Kurds or Kuristan) in Armenia; and the people scrape off the bitumen from the vessel and make use of it by way of charms. Now, when those of whom we have spoken returned to Babylon, they dug up the writings which had been buried at Sippara; they also founded many cities and built temples, and thus the country of Babylon became inhabited again' (Cory's Ancient Fragments, pp. 26–29). Another version abridged, but substantially the same, is given from Abdenos (vide, pp. 33, 34). The version of Eugenesius (quoted by Eusebius, Proor. Evang. x. 9) is curious: 'The city of Babylon,' he says, 'owes its foundation to those who were saved from the Deluge; they were giants, and they built the tower celebrated in history.' Other notices of a Flood may be found (a) in the Phrygian mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned (see the quotation from Sanchoniathon in Cory, as above, p. 13); (b) in the Silvianae Oracles, partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. In these mention is made of the Deluge, after which Kronus, Titan, and Japetus ruled the world, each taking a separate portion for himself, and remaining at peace till after the death of Noah, when Kronus and Titan engaged in war with one another (Ib. p. 52). To these must be added (c) the Phrygian story of king Ammos or Nummos (Enoch) in Ilium, who reached an age of more than 300 years, foretold the Flood, and went and prayed for his people, seeing the destruction that was coming upon them. Very curious, as showing what deep root this tradition must have taken in the country, is the fact that so late as the time of Septimius Severus, a medal was struck at Apamea.

Coin of Apamea in Phrygia, representing the Deluge on which the Flood is commemorated. a The city is known to have been formerly called 'Kiblos,' or 'the Ark,' and is also known that the coins of cities in that age exhibited some leading point in their mythological history. The medal in ques-

a We have here and there made an alteration, where the translator seemed to us not quite to have caught the meaning of the original.
The vessel is represented a kind of square vessel floating in the water. Through an opening in it are seen two persons, a man and a woman. Upon the top of this enclosing work is perched a bird, whilst another flies toward it carrying a branch between its feet. Before the vessel are represented the same pair as having just quitted it, and got upon the dry land. Singularly enough, too on some specimens of this medal the letters ΝΗ, or ΝΚΕ, have been found on the vessel, as in the annexed cut. (See Eckhel iii. 132, 133; Wiseman, Lectures on Science and Revealed Religion, ii. 128, 129). This fact is no doubt remarkable, but of a horned vessel the vessel must not be laid upon it; for, making full allowance for the local tradition as having occasioned it, we must not forget the influence which the Biblical account would have in modifying the native story.

As belonging to this cycle of tradition, must be reckoned also (1) the Syrian, related by Lucian (De Deo Syri, c. 13), and connected with a huge chasm in the earth near Hieropolis into which the waters of the Flood are supposed to have drained: and (2) the Armenian, quoted by Josephus (Ant. i. 3) from Nicolaus Damascenus, who flourished about the age of Augustus. He says: "There is above Minyan in the land of Armenia, a great mountain, which is called Baris [i.e. a ship], to which it is said that many persons fled at the time of the Deluge, and so were saved; and that one in particular was carried thither upon an ark (Adyovagos), and was landed upon its summit; and that the remains of the vessel’s planks and timbers were long preserved upon the mountain. Perhaps this was the same person of whom Moses the legislator of the Jews wrote an account.

A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian is mixed up with its cosmogony, and hence loses anything like an historical aspect. "The world having been corrupted by Ahriman, it was necessary to bring over it a universal flood of water that all impurity might be washed away. The rain came down in drops as large as the head of a bull; the earth was under water to the height of a man, and the creatures of Ahriman were destroyed."

The Chinese story is, in many respects, singularly like the Biblical, according to the Jesuit Martinus, who says that the Chinese computed it to have taken place 4,000 years before the Christian era. Fäh-he, the reputed author of Chinese civilization, is said to have escaped from the waters of the Deluge. He reappears as the first man at the production of a renovated world, attended by seven companions — his wife, his three sons, and three daughters, by whose intermarriage the whole circle of the universe is finally completed (Hardwick, Christ and other Masters, iii. 16).

The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the

---

"D. Gutschth, in a paper "On Buddhism in China," communicated to the Royal Asiatic Society (Journal, xi. 79), says that he saw in one of the Buddhist temples in Caleutta, the scene where Kwan-yin, the Goddess of Mercy, looks down from heaven upon the lonely Noah in his ark, whilst the raging waves of the deluge, with the dolphins swimming around as if last means of safety, and the dove with an olive-branch in its beak flying toward the vessel. Nothing would have exceeded the beauty of the execution."
the American nations. These, as might be expected, show occasionally some marks of resemblance to the
Asian traditions. The one in which Mr. Coxe (among
the Cherokees) remarks as of the story in the Mahabharata, only that a dog here renders the same service
to his master as the fish does to Manu.
"This dog was very particular in visiting the banks of a river for several days, where he stood gazing at the water and howling piteously. Being sharply spoken to by his master and ordered home, he remained the coming day. He concluded his prediction by saying that the escape of his master and family from drowning depended upon their throwing him into the water; that to escape drowning himself he must take a beat and put in all he wished to save: that it would then rain hard a long time, and a great overflowing of the land would take place. By obeying this prediction the man and his family were saved, and from them the earth was again peopled." (Schoedock, Notes on the
Iroquois, pp. 358, 559.)

"Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coxeox, namely, the Aztecs, the Mixtew, the Zapoteca, the Tlascaltecs, and the Mechoacans. The Noah, Xisnurhus, or Mixtecs, is termed Coxeox, Tes-Cipateli, or Tezpi. He saved himself with his wife Xochiquetzal in a bark, or, according to other traditions, on a raft. The painting represents Coxeox in the midst of the water waiting for a bark. The mountain, the summit of which rises above the waters, is the peak of Cozumelan, the Ararat of the Mexicans. At the foot of the mountain are the heads of Coxeox and his wife. The latter is known by two trees in the form of horns, denoting the female sex. The men born after the Deluge were dumb: the dove from the top of a tree distributed among them tongues, represented under the form of small comas." Of the Mechoacan tradition he writes, "that Coxeox, whom they called Tezpi, embarked in a spacious arcli with his wife, his children, several animals, and grain. When the Great Spirit ordered the waters to withdraw, Tezpi sent out from his bark a culture, the zopilote or culture aves. This bird did not return on account of the cares with which the earth was strewn. Tezpi sent out other birds, one of which, the hammer-bird, alone returned, holding in its beak a branch clad with leaves. Tezpi, seeing that fresh verdure covered the soil, quitted his bark near the mountain of Cozumelan." (Vins des Cordilleres et Montagnes de l'Amérique, pp. 226, 227.) A peculiarity of many of these American Indian traditions must be noted, and that is, that the Flood, according to them, took place in the time of the First Man, who, together with his family, escaped. But Müller (Americanische Vorzeit, p. 323) goes so far as to derive this from the conclusion that these traditions are consequently cosmogonic and have no historical

value. The fact seems rather to be that all memory of the age between the Creation and the Flood had perished, and that hence these two great events were brought into close juxtaposition. This is the less unlikely when we see how very meagre even the Biblical history of that age is.

"It may not be amiss, before we go on to speak of the traditions of more cultivated races, to mention the legend still preserved among the inhabitants of the Fiji islands, although not belonging to our last group. They say that, after the islands had been peopled by the first man and woman, a great rain took place by which they were finally submerged; but before the highest places were covered by the waters, two large double canoes made their appearance. In one of these was Rokora the god of carpenters, in the other Rotoki his head workman, who picked up some of the people and kept them on board until the waters had subsided, after which they were again landed on the island. It is reported that in former times canoes were always kept in readiness against another inundation. The persons thus saved, eight in number, were landed at Mbenga, where the highest of their gods is said to have made his first appearance. By virtue of this tradition, the chiefs of Mbenga take rank before all others and have always a conspicuous part among the Fijis. They style themselves Yopi-darx-kidanafi — subject to heaven alone." (Wilkes, Exploring Expedition.)

One more cycle of traditions we shall notice — that, namely, of the Hellenic races.

Hellas has two versions of a flood, one associated with Ogyges (Jal. Afric., as quoted by Euseb. Porph. F. x, 10), and the other, in a far more elaborate form, with Deucalion. Both, however, are of late origin — they were unknown to Homer and Hesiod. Herodotus, though he mentions Deucalion as one of the first kings of the Hellenes, says not a word about the Flood (i. 56). Pindar is the first writer who mentions it (Olym. i. 37 ff.). In Apollodorus (Riddles, i. 7) and Ovid (Met. i. 250), the story appears in a much more definite shape. Finally,Lucian gives a narrative (De Deo Syr. c. 12, 13), not very different from that of Ovid, except that he makes provision for the safety of the animals, which Ovid does not. He attributes the necessity for the Deluge to the exceeding wickedness of the existing race of men, and declares that the earth opened and sent forth waters to swallow them up, as well as that heavy rain fell upon them. Deucalion, as the one righteous man, escaped with his wife and children and the animals he had put into the chest (Aplyapraxa), and landed, after nine days and nine nights, on the top of Parnassus, whilst the chief part of Hellas was under water, and nearly all men perished, except a few who reached the tops of the highest mountains. Pindar (P. 79) tells the Hellenic version, in which Deucalion made use of a cast to ascertain whether the flood was abated.

a * Eucken, as quoted by Ankeren (Die Gatt. Offenbarung, p. 144), remarks, respecting these traditions among the American aborigines, that the form in which the natives relate them agrees in such a striking manner with the Bible story that we cannot blame the astonished European if on their first discovery of that country, they believed, on account of these and similar traditions, that the Apostle Thomas must have preached Christianity there. Truly we must regard it as a work of Providence that this new world, which
Most of these accounts, it must be observed, realize the Flood, and confine it to Greece or some part of Greece. Aristotle speaks of a local inundation near Dodona only (Met. c. 14).

It must also be confessed, that the later the narrative, the more definite the form it assumes, and the more nearly it resembles the Mosaic account.

It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt. They knew, however, of the flood of D.funcalon, but seem to have been in doubt whether it was to be regarded as partial or universal, and they supposed it to have been preceded by several others.

Everybody knows Ovid's story of D.funcalon and Pyrrha. It may be mentioned, however, in reference to this as a very singular coincidence that, just as, according to Ovid, the earth was repopulated by D.funcalon and Pyrrha throwing the bones of their mother (i.e. stones) behind their backs, so among the Tanaanaki, a Carib tribe on the Orinoko, the story goes that a man and his wife escaping from the flood to the top of the high mountain Tapanacu, threw over their heads the fruit of the Maurita-banun, whence sprung a new race of men and women. Here the coincidence ceases: the difference between Hellenic and American traditions seems explicable only on the hypothesis of some common centre of tradition.

After the Flood. — Noah's first act after he left the ark was to build an altar, and to offer sacrifices. This is the first altar of which we read in Scripture, and the first burnt sacrifice. Noah, it is said, took of every clean beast, and of every clean fowl, and offered burnt-offerings on the altar. And the narrative adds with childish simplicity: "And Jehovah smelled a smell of rest (or satisfaction), and Jehovah said in his heart, I will not again curse the ground any more for man's sake; for the imagination of man's heart is evil from his youth: neither will I again smite any more every living thing as I have done." Jehovah accepts the sacrifice, and grants to Noah the acknowledgment of the part of man that he desires reconciliation and communion with God; and therefore the renewed earth shall no more be wasted with a plague of waters, but so long as the earth shall last, seed-time and harvest, cold and heat, summer and winter, day and night shall not cease.

a * A friend conversant with the literature of this subject, Rev. E. Burgess, very properly suggests that this statement as to the ignorance of the Egyptians concerning a flood is too unqualified. Some Egyptians maintain a different opinion. (1.) They allege that the name of Noah himself (No, Nub, Nub., etc.) is found on the monuments, represented as "the god of water" (see Osburn's Monumental Egypt, i. 239). Osburn cites Champollion and Birch in favor of this interpretation, and has no doubt that the name is that of the patriarch through whom the race was perpetuated after the flood. (2.) The names of the first of the eight great gods of the Egyptians, as given by Wilkinson from the monuments, are believed to be different forms of the name Noah (Manners and Customs of Ancient Egypt, second series, 341.). In the legend of Osiris, the chief primitive divinity of the Egyptians, incidents are stated which seem clearly to identify Osiris with Noah of the Hebrew Scriptures (Bryant, Mythology, ii. 235 ff. [Long. 1775]; Keuck's Hist. of Man, 355). Wilkinson's Manners and Customs of Ancient Egypt, i. 224 f. (4.) We have perhaps a reminiscence of the three sons of Noah in the occurrence of numerous localities in Egypt in which a tried of deities was worshipped. Wilkinson gives a list of a number of such places, among them Thebes, with the names of the deities (Wilkinson as above, i. 239). The knowledge of a flood ascribed by Plato to the Egyptians in the Timaeus (p. 23 Stor.) is that they knew of several deluges, but affirmed that their own had never been thus visited. Their national egoism may have led them to claim this exemption as the special favorites of heaven.

b "These primordial traditions of the human race," says Auberlen, "illustrate as much the historical credibility of the Mosaic writings, even in their minute particulars, as they do their essential purity and elevation, in contrast with the heathen myths. In this latter respect it will be seen especially how Israel alone, together with the facts, maintains at the same time the innermost idea of the fact; while the heathen preserve the external forms remarkably enough, but clothe them with fantastic and national costume. There is a difference here similar to that between the canonical and the apocryphal Gospels". (Die Gétickte Offen barung; ein apologistischer Versuch, i. 147 f.)

H.
Theft, rested apparently on the general sense of mankind.

It is in the terms of the blessing and the covenant made with Noah after the Flood that we find the strongest evidence that in the sense of the writer it was universal, i.e., that it extended to all the then known world. The literal truth of the narrative obliges us to believe that the whole human race, except eight persons, perished by the waters of the flood. Noah is clearly the head of a new human family, the representative of the whole race. It is as much for God to make a covenant with him, and hence he selects a natural phenomenon as the sign of that covenant, just as later in making a national covenant with Abraham, he made the seal of it to be an arbitrary sign in the flesh. The bow in the cloud, seen by every nation under heaven, is an unailing witness to the truth of God. It was the rainbow, then, we ask, never seen before the Flood? Was this "sign in the heavens" beheld for the first time by the eight dwellers in the ark when, after their long imprisonment, they stood again upon the green earth, and saw the dark humid clouds spanned by its glorious arch? Such seems the meaning of the narrator. And yet this implies that there was no rain before the flood, and that the laws of nature were changed, at least in that part of the globe, by that event. This is to reason to suppose that in the world at large there has been such change in meteorological phenomena as here implied. That a certain portion of the earth should never have been visited by rain is quite conceivable. Egypt, though not absolutely without rain, very rarely sees it. But the country of Noah and the ark was a mountainous country: and the ordinary atmospheric conditions must have been suspended, or a new law must have come into operation after the Flood, if the rain then first fell, and if the rainbow had consequently never before been painted on the clouds.

Hence, many writers have supposed that the meaning of the passage is, not that the rainbow now appeared for the first time, but that it was now for the first time invested with the sanctity of a sign; that not a new phenomenon was visible, but that a new meaning was given to a phenomenon already existing. It must be confessed, however, that this is not the natural interpretation of the words: "This is the sign of the covenant which I do set between me and you, and every living thing which is with you for everlasting generations: my bow I have set in the cloud, and it shall be for the sign of a covenant between me and the earth. And it shall come to pass that when I bring a cloud over the earth, then the bow shall be seen in the cloud, and I will remember my covenant which is between me and you and every living thing of all flesh," etc.

Noah now for the rest of his life betook himself to agricultural pursuits, following in this the tradition of his family. It is particularly noticed that he planted a vineyard, and some of the older Jewish writers, with a touch of poetical beauty, tell us that he took the shoots of a vine which had wandered out of paradise wherein to plant his vineyard. Whether in ignorance of its properties or otherwise, we are not informed, but hedrink of the juice of the grape till he became intoxicated and shamefully exposed himself in his own tent. One of his sons, Ham, mocked openly at his father's disgrace. The others, with dutiful care and reverence, endeavored to hide it. Noah was not so drunk as to be unconscious of the indignity which his youngest son had put upon him; and when he recovered from the effects of his intoxication, he declared that in requital for this act of brutal modesty, mockery, a curse should rest upon the sons of Ham, that he who knew not the duty of a child, should see his own son degraded to the condition of a slave. With the curse on his youngest son was joined a blessing on the other two. It ran thus, in the old poetic or rather rhetorical and alliterative form into which the more solemn utterances of antiquity commonly fell.

And he said:

Curse be Canaan,
A slave of slaves shall he be to his brethren.

And he said:

Blessed be Jehovah, God of Shem,
And let Canaan be the slave! 
May God enlarge Japheth, 
And let him dwell in the tents of Shem,
And let Canaan be their slave!

Of old, a father's solemn curse or blessing was held to have a mysterious power of fulfilling itself. And in this case the words of the righteous man, though strictly the expression of a wish (Dr. Pycot Smith is quite wrong in translating all the verbs as futures; they are optatives), did in fact amount to a prophecy. It has been asked why Noah did not curse Ham, instead of cursing Canaan. It might be sufficient to reply that at such times men are not left to themselves, and that a divine purpose as truly guided Noah's lips then, as it did the hands of Jacob afterwards. But, moreover, it was surely by a righteous retribution that he, who as youngest son had dishonored his father, should see the curse light on the head of his own youngest son. The word was probably heavier than if it had lighted directly on himself. Thus early in the world's history was the lesson taught practically which the law afterwards expressly enunciated, that God visits the sins of the fathers upon the children. The subsequent history of Canaan shows in the clearest manner possible the fulfillment of the curse. When Israel took possession of his land, he became the slave of Shem: when Tyre fell before the arms of Alexander, and Carthage succeeded to her Roman conquerors, he became the slave of Japheth; and we almost hear the echo of Noah's curse in Hannibal's Agnosco Fortunam Carthaginis, when the head of Hadsribal his brother was thrown contemptuously into the Tropic lines.

It is uncertain whether in the words, "And let him dwell in the tents of Shem," "God," or "Japheth," is the subject of the verb. At first it seems more natural to suppose that Noah prays

a Arnicos it has been observed is still favorable to the growth of the vine. Xenophon (Anon. iv. 4, 9) speaks of the excellent wines of the country, and his account has been confirmed in more recent times (Ritter, Erdk. x 319, 554, etc.). The Greek myth referred the discovery and cultivation of the vine to Dionysus, who according to one version brought it from India (Hod.

b There is an alliterative play upon words here which cannot be preserved in a translation.

c See Deissmor, Comm. in loc.
that God would dwell there (the root of the verb is the same as that of the noun Shechem). But
the blessing of Shein has been spoken already. It is better therefore to take Japhet as the subject.
What then is meant by his dwelling in the tents of Shein? Not of course that he should so occupy
them as to thrust out the original possessors; nor even that they should move into one people; but
as it would seem, that Japhet may enjoy the religions privileges of Shein. So Augustine:
"Latifert Deus Japhethi et habitat in tentorior Sem, id est, in Ecclesiis quasi filii Proprietarum
Apostoli construerunt." The Talmud sees this blessing fulfilled in the use of the Greek language
in sacred things, such as the translation of the Scriptures. Thus Shein is blessed with the knowledge
of Hebrew; and Japhet with temporal increase and dominion in the first instance, with the further
hope of sharing afterwards in spiritual advantages. After this prophetic blessing we hear no more of the patriarch but the sum of his years.
"And Noah lived after the flood three hundred and fifty years. And thus all the days of Noah
were nine hundred and fifty years: and he died." 1

For the literature of this article the various commentaries on Genesis especially those of modern
date, may be consulted. Such are those of Tuch, 1838; of Baumgarten, 1843; of Knoedel, 1852;
Schroder, 1849; of Delitzsch, 3d ed. 1890. To the last of these especially the present writer is much indebted. Other works bearing on the subject more or less directly are Lyell's Principles of Geology, 1833; Pafl's Schopfungs-Geschichte, 1857; Wiseman's Lectures on Sacred and "Religion: Hugh Miller's Testimony of the Rocks; Hardwick's Christ and other Masters, 1857; Miller's Die Americanischen Ureivilgen; Bunsen's Biblicalk, and Ewald's Jahrbucher, have also been consulted. The writer has further to express his obligations both to Professor Owen and to Professor Huxley, and especially to the latter gentleman, for much valuable information on the scientific questions touched upon in this article.

J. J. S. P.

* See especially Nigglischob's article on Noah (Herzog's Real-Encycl. x. 294-403) for an admirable summary of the historical testimonies to the Mosaic account of the deluge. It is a satisfaction to observe that the author cites at every step the proper authority for his statements. On the question of the universality of the flood, may be mentioned, among American writers, Dr. Edward Hitchcock on the Historical and Geological Deluge in the Bibl. Repository (ix. 78 ff., x. 328 ff., and xi. 1 ff.), and his Religion of Geology, lect. xii. (Bost. 1861); Prof. C. H. Hitchcock on the Relations of Geology to Theology, Bibl. Sacer, xxiv. 463 ff.; and Prof. Tayler Lewis, who inserts an excursion on Gen. viii. 1-19, in his translation of Lange's Commentary on Genesis, pp. 314-322 (N. Y. 1868). These writers understand that the flood was limited locally, but was coextensive with the part of the earth inhabited at that time.

a * In Nah. iii. 8, the A. V. has incorrectly "popu-

2 * The former is the more probable reading, as the
goat of Egypt are mentioned almost immediately after.

3 Sir Henry Rawlinson identifies N1 with No-Amon.
The whole paper (pp. 137 ff.) is of great importance.

Dr. Edward Robinson has some good remarks on
the philological or etymological proofs of the Biblia
deluge under Art., in his ed. of Calmet's
Dictionary of the Bible (Bost. 1852). On that
branch of the argument, see especially Philipp
Buttmann's Mythologus oder Die Sagen des
Aberthorns, i. 180-234 (Berl. 1828). He finds
evidence of the diffusion of the names of the Bib-
lical Semitic patriarchs, under analogous forms,
in the languages of various ancient nations. Raw-
linson mentions the Chaldaean legends of the flood
(Ancient Monarchies, i. 184).

NOAH (כֹּהֵן בְּרֵאשִׁית, "the priest of the beginning")

One of the five daughters of Zophelahad (Num. xxxi. 33, xxxii. 1, xxxvi. 11; Josh. xvii. 3).

NO-AMON, NO (גּוֹזָן) [see below]:

Nephi's Amon: Alexander (populorum), Nah. iii.

N.: "Napta: Alexandria (populorum), Nah. iii.

1: 1: 2: Διονύσιος: Alexandria, Jer. xvi. 26; Ez. xxx. 14, 15, 10, a city of Egypt, Thebes (Thebes), or Bispolis Magna. The second part of the first term is the name of AMEN, the chief
divinity of Thebes, mentioned or alluded to in connection with this place in Jeremiah, 'Behold,
I will punish Amon (or the multitude,' with reference to Amen?) in No, and Pharaoh,
and Egypt, with their gods, and their kings' (L. c.), and perhaps also alluded to in Ezekiel (xxx. 15).
[Axon.]: The second part of the Egyptian sacred
name of the city, HA-AMEN, "the abode of
Amen," is the same. There is a difficulty as to
the meaning of NO. It has been supposed, in
accordance with the I.XX. rendering of No-Amon
by μηδε 'Amon, that the Coptic ΝΟΑ ΝΟΤΩΡΣ, finius, finiculius, once finius membrinos
(Mic. ii. 4), instead of ΝΟΑ ΝΟΟΥΜΕ, might indicate that it signified "portion," so that the
name would mean "the portion of Amen." But
if so, how are we to explain the use of No alone?
It thus occurs not only in Hebrew, but also in the
language of the Assyrian inscriptions, in which it is written No or No, according to Sir Henry
Rawlinson ('Illustrations of Egyptian History and Chrono-
166). The conjectures that Thebes was called
H II ΛΑΜΩΝΗ, "the abode of Amen,"
or, still nearer the Hebrew, H II. ΛΑΜΩΝΗ.
"the city of Amen," like H II. ΛΙΩΝ, "the
city of Isis," or, as Gesenius prefers, H II. ΛΑΜΩΝΗ,
"the place of Amen" (Thee. s. v.),
are all liable to two serious objections, that they
neither represent the Egyptian name, nor afford
an explanation of the use of No alone. It seems
most reasonable to suppose that No is a Semitic
name, and that Amen is added in Nahum (l. c.)
to distinguish Thebes from some other place bear-
ing the same name, or on account of the connec-
tion of Amen with that city. Thebes also bears
in ancient Egyptian the common name, of doubt-
as illustrating the reference in Nahum to the capture
of Thes, by showing that Egypt was conquered by
both Esdrash and Assur-bani-pal, and that the
latter twice took Thebes. If these wars were after
the prophet's time, the narrative of them makes it
more probable than it before seemed that there was a
still earlier conquest of Egypt by the Assyrians.
ful significance, AP-T or T-AP, which the Greeks represented by Thelv. The whole metropolis, on both banks of the river, was called TAM. (See Brugsch, Georg. Inschr. i 175 ff.)

Jerome supposes No to be either Alexandria or Egypt itself (In Josuah, lib. vi. t. iii. col. 125, ed. Paris, 1794). Champollion takes it to be Dhopulis in Lower Egypt (L'Egypte sous les Pharaons, ii. 421); but Gessner (L'Arch.) well observes that it would not then be compared in Nahuim to Nineveh. This and the evidence of the Assyrian record leave no doubt that it is Thebes. The description of NoAmun, as "squat among the rivers, the waters round about it" (Nah. i. c.), remarkably characterizes Thebes, the only town of ancient Egypt which we know to have been built on both sides of the Nile; and the prophecy that it should "be rent asunder" (Ez. xxx. 16) cannot fail to appear remarkably significant to the observer who stands amidst the vast ruins of its chief edifice, the great temple of Amun, which is rent and shattered as if by an earthquake, although it must be held to refer primarily, at least, rather to the breaking up or capture of the city (comp. 2 K. xiv. 26, Jer. iii. 7), than to its destruction. See Thelv. R. S. P.

NOB (מ"ע [elevation, height]: Nogdai: [Vat. Negada, 1 Sam. xxii. 11]: Alex. Nofa, exe. Nofeth, 1 Sam. xxii. 11; [FA-3] Noûb, Neh. xi. 32 [271]; FA-3, FA 3, FA 4; Alex. Nof, Noûb in (Neh.) was a sacerdotal city in the tribe of Benjamin, and situated on some eminence near Jerusalem. That it was on one of the roads which led from the north to the capital, and within sight of it, is certain from the illustrative passage in which Isaiah (x. 28-32) describes the approach of the Assyrian army:—

He comes to Ai, passes through Mizron, At Machma deposits his baggage; They cross the pass, Geba is their night-station; Terrified is Kannah, Gibran of Saul flees; Shriek with thin voice, daughter of Galliam; Listen, O laish! Ah, poor Anathoth! Machemah escapes, dwellers in Gilam take flight.

Yet this day he hoists at Nob: He shakes his hand against the mount, daughter of Zion, The hill of Jerusalem.*

In this spirited sketch the poet sees the enemy pouring down from the north; they reach at length the neighborhood of the walled city; they take possession of one village after another; while the inhabitants flee at their approach, and fill the country with cries of terror and distress. It is implied here clearly that Nob was the last station in their line of march, whence the invaders could see Jerusalem, and whence they could be seen, as they "shook the hand" in proud derision of their enemies. Lightfoot also mentions a Jewish tradition (Opp. ii. 450) that Jerusalem and Nob stood within sight of each other.

Nob was one of the places where the tabernacle, or ark of Jehovah, was kept for a time during the days of its wanderings, before a home was provided for it on Mount Zion (2 Sam. vi. 1, &c.). A company of the Benjamites settled here after the return from the exile (Neh. xii. 32). But the event for which Nob was most noted in the Scripture annals, was a frightful massacre which occurred there in the reign of Saul (1 Sam. xxi. 17-19). David had fled thither from the court of the jealous king; and the circumstances under which he had escaped being unknown, Ahimelech, the high-priest at Nob, gave him some of the show-bread from the golden table, and the sword of Goliath which he had in his charge as a sacred trophy. Doeg, an Edomite, the king's shepherd, who was present, reported the affair to his master. Saul was enraged on hearing that such favor had been shown to a man whom he hated as a rival; and nothing would appease him but the indiscriminate slaughter of all the inhabitants of Nob. The king's executioners having refused to perform the bloody deed (1 Sam. xxi. 17), he said to Doeg, the spy, who had betrayed the unsuspecting Ahimelech, "Turn thou, and fall upon the priests. And Doeg the Edomite turned, and he fell upon the priests, and slew on that day four-score and five persons that did wear a linen ephod. And Nob, the city of the priests, memoned with the edge of the sword, both men and women, children and sucklings, and men, and asses, and sheep, with the edge of the sword." Abiathar, a son of Ahimelech, was the only person who survived to recount the sad story.

It would be a long time, naturally, before the doomed city could recover from such a blow. It appears in fact never to have regained its ancient importance. The references in Is. x. 32 and Neh. xi. 32 are the only later allusions to Nob which we find in the O. T. All trace of the name has died away from the country long ago. Jerome states that nothing remained in his time to indicate where it had been. Geographers are not agreed as to the precise spot with which we are to identify the ancient locality. Some of the conjectures on this point may deserve to be mentioned. "It must have been situated," says Dr. Robinson (Researches, vol. i. p. 404), "somewhere upon the ridge of the Mount of Olives, northeast of the city. We sought all along this ridge from the Damascus road to the summit opposite the city, for some traces of an ancient site which might be regarded as the place of Nob: but without the slightest success." Kiepert's map places Nob at el-Ilsirîch, not far from A Matthias, about a mile northwest of Jerusalem. Teuber (Topographie von Jemns, ii. § 719) describes this village as beautifully situated, approached by a long and winding road, occupying unquestionably an ancient site. But it must be regarded as fatal to this identification that Jerusalem is not to be seen from that point.* Elsirîch is in a valley, and the dramatic representation of the prophet would be unsuited to such a place. Mr. Porier (Barthii, ii. 324) expresses the confident belief that Nob is to be sought on a low ground to the right of the northern road and opposite to Shobath. He found there several cisterns hewn in the rock, large building stones, and various other indications of an ancient town. The top of this hill affords an extensive view, and Mount Zion is distinctly seen, though

---

* "The full idea," says Gessner (Bandw. s. v.).

** Keutsch takes the same view of this difficulty and decides against the identification (Herrg. Recl. Encycl. x. 404). The gnesa saumitua (Gesen.) has little or no significance unless those menaced could see the invaders at the moment. Mr. Grove gives the preference to el-Ilsirîch (Clark's Bible Atlas, p. 204). H.

---

"This hill," says Leut. Warren (Rep. ii, Oct. 1st 1867), is called Shobath. In
Moriah and Olivet are hid by an intervening ridge.

The Nob spoken of above is not to be confounded with another which Jerome mentions in the plain of Sharon, not far from Lydda. (See Von Ranke's Palæstina, p. 106.) No allusion is made to this latter place in the Bible. The Jews after recovering the ark of Jehovah from the Philistine would be likely to keep it beyond the reach of a similar disaster: and the Nob which was the seat of the sanctuary in the time of Saul, must have been among the mountains. This Nob, or Nobah as Jerome writes, now Beit Nob, could not be the village of that name near Jerusalem. The town which the latter related for Matthew and Luke. One of the men was a Jew (included at least among the Galileans, John iv. 48) in the service of the king or tetrarch, as his designation implies, the other a Roman and a centurion (Luke vii. 2).

In one case it was a son of the petitioner who was sick, in the other his servant, and, finally, the nobleman requested Jesus to come to his house, whereas the centurion felt that he was utterly unworthy to receive him under his roof. He is called NOBIAKLUS with the same propriety that Herod Antipas is called βασιλεὺς (Mark vi. 14), though the stricter title of the latter was τετράρχης (Matt. xiv. 1). It is a complimentary title rather than official as applied to both.

H. D. H.

NOBAH (נובה) [barking, a loud cry]:
Naḇāh, Naḇah; Alex. Naḇeḏ, Naḇēd; *Nob* (Note). The name conveyed by the conqueror of Kenath and the villages in dependence on it on his new acquisition (Num. xxxii. 42). For a certain period after the establishment of the Israelite rule the new name remained, and is used to mark the course taken by Gideon in his chase after Zebah and Zalmunna (Judg. viii. 11). But it is not again heard of, and the original appellation, as is usual in such cases, appears to have recovered its lost lustre, which has since been maintained; for the slightly modified form of Kenath it is the name of the place to the present day (see *Onamasticum*, Nabo).

Ewald (Gesch. ii. 288, note 2) identifies the Nobah of Gideon's pursuit with Nophah of Num. xxi. 30, and distinguishes them both from Nobah of Num. xxxii. 42, on the ground of their being mentioned with Dibon, Medeba, and Jocialah. But if Josephus, V, 3, 4, that is, elsewhere (see note 4) suggests, et Jehelch, between Amonaim and es-Salt, there is no necessity for the distinction. In truth the lists of Gad and Reuben in Num. xxxii. are so confused that it is difficult to apportion the towns of each in accordance with our present imperfect topographical knowledge of those regions. Ewald also (ib. 392, note) identifies Nobah of Num. xxxii. 42 with Nuna or Nera, a place 15 or 16 miles east of the north end of the Lake of Gennesaret (Ritter, Jordän, p. 354). But if Kenath and Nobah are the same, and Kenaneth be Kenath, the identification is both unnecessary and untenable.

Eusebius and Jerome, with that curious disregard of probability which is so puzzling in some of the articles in the *Onamasticum*, identify Nobah of Judg. viii. with Nob, "the city of the Priests, afterwards laid waste by Saul" (Onom. Naḇāh and *Nabbe sive Nobba*).

NOBAH (נובה) [barking, a loud cry]: Naḇāh (Note). An Israelite warrior (Num. xxxii. 42 only), probably, like Jar, a Manassite, who during the exodus kept the territory on the east of Jordan possessed himself of the town of Kenath and the villages or hamlets dependent upon it (Heb. "daughters") and gave them his own name. According to the Jewish tradition (Seder Qam Rabbah, ix.) Nobah was born in Egypt, died after the decease of Moses, and was buried during the passage of the Jordan.

It will be observed that the form of the name in the LXX. is the same as that given to Neba.

*NOBLEMAN* (βασιλικός), the title of a courtier or royal officer of Herod Antipas, who came to Jesus at Cana, to entreat him to heal his son, whom he had left at the point of death at his home, in Capernaum. On his return he found that the cure had been wrought at the very moment when Jesus said, "Thy son liveth" (John iv. 46, 47). Some critics (Ewald, De Wette with some hesitation, Barr) regard this miracle as identical with that of the healing of the centurion's servant (Matt. viii. 5; Luke vii. 1-10). But it is difficult to reconcile the differences in the two accounts with this supposition. Cana was the scene of the miracle related by John, and Capernaum the town which the latter related for Matthew and Luke.

One of the men was a Jew (included at least among the Galileans, John iv. 48) in the service of the king or tetrarch, as his designation implies, the other a Roman and a centurion (Luke vii. 2).

In one case it was a son of the petitioner who was sick, in the other his servant, and, finally, the nobleman requested Jesus to come to his house, whereas the centurion felt that he was utterly unworthy to receive him under his roof. He is called *βασιλικός* with the same propriety that Herod Antipas is called *βασιλεὺς* (Mark vi. 14), though the stricter title of the latter was *τετράρχης* (Matt. xiv. 1). It is a complimentary title rather than official as applied to both.

H.

**NAD** (נָזָּה, wandering): Naḇez: profanes. [Cain.]

NO'DAB (נֹדָב) [nobility]: Naḇoḏašu: Naḏob, the name of an Arab tribe mentioned only in 1 Chr. v. 19, in the account of the war of the Reubenites, the Gadites, and the half of the tribe of Manasseh, against the Hagrites (vv. 9-22), "and they made war with the Hagrites, with Jetur, and Nephiash, and Nodob" (ver. 19). In Gen. xlv. 15 and 1 Chr. i. 31, Jetur, Nephiash, and Kelemah are the last three sons of Ishmael, and it has been therefore supposed that Nodob also was one of his sons. But we have no other mention of Nodab, and it is probable, in the absence of additional evidence, that he was a grandson or other descendant of the patriarch, and that the name, in the time of the record, was that of a tribe sprung from such descendant. The Hagrites, and Jetur, Nephiash, and Nodab, were pastoral people, for the Reubenites dwelt in their tents throughout all the east [east land of Gideon (1 Chr. v. 10), and in the war a great multitude of cattle — camels, sheep, and asses — were taken. A hundred thousand men were taken prisoners or slain, so that the tribes must have been very numerous and the Israelites "dwelt in their steeds until the captivity." If the Hagrites (or Garanezes) were, as is most probable, the people who afterwards inhabited Hejer [Hagar], they were driven southwards, into the northeastern province of Arabia, bordering the mouths of the Euphrates, and the low tracts surrounding them. [Jetur; II. 9. Naphish].

E. S. P.

NO'Ē (נֵא: Nê'ë): The patriarch Noah (Tob. iv. 12; Matt. xxv. 37, 38; Luke iii. 36, iv. 26, 27). [Noah.]

NO'EB (נֹֹּב: Nēḵōb) = Ňekōda 1 (1 Esdr. v. 31; comp. Ezra ii. 48).

(vii. 7); but the latter has also תונ דֹּבֲלָא עָדֹעֵו (ver. 8), and this resolves the ambiguity. H.
NOGAH (נוג'ה) [daytime, day-break]: Na'ayi,
Na'yéh; [Alex. in 1 Chr. iii. 7, Na'yé.] Comp. Na'yéh. F. in xiv. 6, Na'yé't:] No'ay, No'ayi. One of the thirteen sons of David who were born to him in Jerusalem (1 Chr. iii. 7, xiv. 6). His name is omitted from the list in 2 Sam. v.

NOHAI (נוהי) [rav]: Na'ay (Vat. Na'ay: Na'ayh). The fourth son of Benjamin (1 Chr. viii. 2).

NOISOME (א.א. נזירין, "to hurt," Lat. noisius) is used in its primitive sense of noxious, hurtful, destructive, in P. xiii. 21, and Ex. xi. 21, Job xxxi. 40, marg. A.

NON (נונ) [in 1 Chr. vii. 27; but elsewhere, נונ, a fish]: Na'own (Vat. Alex. Na'own) 'Nun'. Nun, the father of Joshua (1 Chr. vii. 27).

NORPH, MOPH (נופר) [see below]: Mepha's: Memphis, Is. xix. 13, Jer. ii. 16, Ez. xxx. 13, 16; נופר: Mepha's: Memphis, Hos. ix. 6), a city of Egypt, Memphis. These forms are contracted from the ancient Egyptian common name, MEN-NUFIR, or MEN-NEFIR, "the good abode," or perhaps "the abode of the good one:" also contracted in the Coptic forms menep, menib, me'ib (M), menqe (S); in the Greek Méphaios; and in the Arabic Menf, مِنف. The Hebrew forms are to be regarded as representing collocation forms of the name, current with the Semites, if not with the Egyptians also. As to the meaning of Memphis, Plutarch observes that it was interpreted to signify either the hewn of good ones, or the sepulchre of Osiris (καὶ τίνι μὲν πάλιν οἱ μὲν ὄρμαν ἐξενέχθησαν, οἱ δὲ [ἐξι] οἱ τάφοι Ὄσιρου, De Iside et Osiride, 20). It is probable that the epithet "good" refers to Osiris, whose sacred animal Apis was here worshipped, and here had its burial-place, the Serapeum, whence the name of the village Busiris (PA-HESAH? = the [abode? of Osiris "], now represented in name, if not in exact site, by Akou-Ser, probably originally a quarter of Memphis. As the great Egyptian city was characterized in Nahum as "situate among the rivers" (iii. 8), so in Hesek the lower Egyptian one is distinguished by its Neoptolid, in this passage as to the negative Israelites: "Mizraim shall gather them up, Nephe shall bury them:" for its burial-ground, stretching for twenty miles along the edge of the Libyan desert, greatly exceeds that of any other Egyptian town. (See Brugsch, Geogr. Inschr. i. 234 ff., and Memphitis.) R. S. P.

NOPHAI (נופים), Nophah; the Samar. has the article, נופים [hill, Furst: Dietr.]: ai γα-
ναία: (Vat. γαναία: Nophah), a place mentioned only in Num. xxii. 30. In the remarkable song apparently composed by the Amorites after their conquest of Heshbon from the Moabites, and therefore of an earlier date than the Israelite invasion. It is named with Dibon and Moab, and was possibly in the neighborhood of Heshbon. A name very similar to Nophah is Nohah, which is twice mentioned: once as bestowed by the conqueror of the same name on Kenath (a place still existing more than 70 miles distant from the scene of the Amorite conflict), and again in connection with Joggelbeh, which latter, from the mode of its occurrence in Num. xxxii. 36, would seem to have been in the neighborhood of Heshbon. Ewald (Geesch. ii. 286, note) decides (though without giving his grounds) that Nophah is identical with the latter of these. In this case the difference would be a dialectical one, Nophah being the Moabite or Amorite form. [NOHAI.]

NOSE-JEWEL (נש'יא-ジュエル) pl. constr. נש'יא: [a woman: A. V., Gen. xxiv. 22; Ex. xxxv. 36].

Arab woman with nose-ring.

22. "jewel," Is. iii. 21: Ez. xvi. 12, "jewel on the forehead:" rendered by Theol. and Symm. καρφίον, Gen. p. 870. A ring of metal, sometimes of gold or silver, passed usually through the right nostril, and worn by way of ornament by women in the East. Its diameter is usually 1 in. or 1½ in., but sometimes as much as 3½ in. Upon it are strange beads, corals, or jewels. In Egypt it is now almost confined to the lower classes. It is mentioned in the Manna, Shabb, vi. 1; Celia, xi. 8. Layard remarks that no specimen has been found in Assyrian remains. (Burckhardt, Notes on Bed. i. 51, 232: Niebuhr, Descr. de l'Aarb., p. 57; Voyages, i. 133, ii. 56; Chardin, Voy. viii. 290; Lane, Med. Egypt, i. 78; App. iii. 226; Saulschitz, Staat., Arch. i. 8, p. 35; Layard, Nine. and Bab. pp. 262, 544.) H. W. P.

* NOVICE (נוכ'יטו), "neophyte," that which is newly born, or planted, is used in 1 Tim. iii. 6, figuratively, of one who had just embraced the Christian religion, "a new convert." Such a person was not a lit candidate for the office of bishop or overseer (ἐξωτέρωκ, ver. 2): for the self-confidence of one who had just entered an untried course of life might lead him far astray. R. D. C. R.

NUMBER. Like most oriental nations, it

2. נוֹשַׂא, nose-.

3. נוֹשַׂא, Tiya, Farnmah, probably a deity (Gen. p 278); rendered "number," Is. lxv. 11.

4. נוֹשַׂא, Child, from same root as 3.
mal probable that the Hebrews in their written cal-

ulations made use of the letters of the alphabet. That they did so in post-Babylonian times we have conclusive evidence in the Maccabean coins; and it is highly probable that this was the case also in earlier times, both from internal evidence, of which we shall presently speak, and also from the practice of the Greeks, who borrowed it with their earliest alphabet from the Phoenicians, whose alphabet again was, with some slight variations, the same that of the Samaritans and Jews (Chardin, Ibr. ii. 421, iv. 258 and foll., Langle; Thiersch, Gr. Gr. §§ xii., xliii., pp. 23, 153; Jell, Gr. Gr. i. § 3; Müller, Elsmucker, ii. 317, 321; Eng. Cyc. "Conus," "Numerical Characters," Lane, Mod. Egypt. i. 91; Dohmibon, New Copticus, pp. 146, 151; Winer, ZdH.

But though, on the one hand, it is certain that in all existing MSS. of the Hebrew text of the O. T. the numerical expressions are written at length (Lee, Hebr. Gram. §§ 19, 22), yet on the other, the variations in the several versions between themselves and from the Hebrew text, added to the evident inconsistencies in numerical statement between certain passages of that text itself, seem to prove that some shorter mode of writing was originally in vogue, liable to be misunderstood, and in fact misunderstood by copyists and translators. The following may serve as specimens:

1. In 2 K. xxiv. 8 Jehoiachin is said to have been 18 years old, but in 2 Chr. xxxvi. 9 the number given is 8.

2. In Is. vii. 8 Vitringa shows that for three score and five one reading gives sixteen and five, the letter joel (10) after sheb (6) having been mistaken for the Rahabine abbreviation by omission of the mem from the plural shishim, which would stand for sixty. Six + 10 was thus converted into sixty + ten.

3. In 1 Sam. vi. 19 we have 50,070, but the Syrian and Arabic versions have 5,070.

4. In 1 K. iv. 26, we read that Solomon had 40,000 stalls for chariot-horses, but 4,000 only in 1 Chr. ix. 25.

5. The letters vau (6) and zayin (7) appear to have been interchanged in some readings of Gen. ii. 2. These variations, which are selected from a copious list given by Glass (De Cursibus Corruptivos, i. § 23, vol. ii. p. 188, ed. Dathe), appear to have proceeded from the alphabetic method of writing numbers, in which it is easy to see how, e. g. such letters as vau (6) and joel (7), nun (2) and coph (2), may have been confounded and even sometimes interchanged. The final letters also, which were unknown to the early Phoenician or Samaritan alphabet, were used as early as the Alexandrian period to denote hundreds between 500 and 1,000.

But whatever ground these variations may afford for reasonable conjecture, it is certain, from the fact mentioned above, that no positive rectification of them can at present be established, more especially as there is so little variation in the num-

bers quoted from the O. T., both in N. T. and in the Apocalypse, e. g. (1) Num. xxv. 9, quoted i Cor. x. 8. (2) Ex. xii. 40, quoted Gal. iii. 17. (3) Ex. xvi. 35 and Ps. xiv. 10, quoted Acts xiii. 18. (4) Gen. xvii. 1, quoted Rom. iv. 19. (5) Num. i. 46, quoted Exx. xvi. 10.

Josephus also in the main agrees in his statement of numbers with our existing copies.

There can be little doubt, however, as was remarked by St. Augustine ( Civ. D. x. 13, § 1), that some at least of the numbers mentioned in Scripture are intended to be representative rather than determinative. Certain numbers, as 7, 10, 40, 100, were regarded as giving the idea of completeness. Without entering into his theory of this usage, we may remark that the notion of representative numbers in certain cases is one extremely common among eastern nations, who have a prejudice against counting their possessions accurately; that it enters largely into many ancient systems of chronology, and that it is found in the philosophical and metaphysical speculations not only of the Pythagorean and other ancient schools of philosophy, both Greek and Roman, but also in those of the later Jewish writers. See also the Gnostics, and also of such Christian writers as St. Augustine himself (August. De Doct. Christ. ii. 16, 25; Civ. D. xiv. 30; Philo, De Mundi Opif. i. 21; De Abraham. ii. 5; De Sept. Num. ii. 281, ed. Monastery; Joseph. B. J. v. 5, § 57; Mishnas, Pirke Aboth, v. 7, § 8; Irenicus, i. 3, ii. 1, v. 20, 30; Hieronym. Comm. in Is. iv. 1, vol. iv. p. 72, ed. Migner, Arist. Metaphys. i. 5, 6, xii. 6, 8; Elius, i. ii. iv. 17; Varro, Hebdom. fragm. i. 235, ed. Bipont.: Nebulier, Hist. of Rome, ii. 72, ed. Hartkof: Trev. in Abraham, i. 75; Syriac, p. 560, comp. with Gen. xiii. 16 and xxii. 17; also see papers on Hidoro Chronology in Sir W. Jones's Works, Suppl. vol. ii. pp. 160, 1017.

We proceed to give some instances of numbers used (a) representatively, and thus probably by design indefinitely, or (b) definitely, but as we may say preferentially, i. e. because some meaning (which we do not in all cases understand) was attached to them.

1. Seven, as denoting either plurality or completeness, is so frequent as to make a selection only of instances necessary, e. g. sevenfold, Gen. iv. 24; seven times, i. e. completely, Lev. xxvi. 24; Ps. xii. 6; seven (i. e. many) souls, Dent. xxviii. 25. See also I Sam. ii. 29; Job x. 19; where six also is used, Prov. iv. 16, i. 1; Eccl. xi. 2, where eight also is named; Is. iv. 1; Jer. xv. 9; Mic. v. 5; also Matt. xiii. 43, seven spirits; Mark xi. 9, seven devils; Rev. iv. 5, seven Spirits, xv. 1, seven plagues. Otho, Lex. Robb. p. 411, says that Scripture uses seven to denote plurality. See also Christian authorities quoted by Suicer, Thes. Excc. s. v.: βηθος, Hofmann, Lex. s. v. St. "System," and the passages quoted above from Varro, Aristole, and Elian, in reference to the heathen value for the number 7.

2. Ten as a preferential number is exemplified in the Ten Commandments and the law of Tithe. It plays a conspicuous part in the later Jewish ritual code. See Otho, Lex. Robb. p. 410.

To number is 1717, ἀριθμόν, numero. (2)

unpl. Ps. lxxi. 15, προφανείας, litterature.

7. ἀριθμοί, ἀριθμόν, λαγούσαμα, i. e. value, account, as in Is. xxii. 17.

In Piel, count, or number, which is the primary notion of the word (Gen. p. 531).

a i denotes 550, b 600, c 700, P 800, y 900
3. Seven, as compounded of 7 x 10, appears frequently, e. g. sevengfold (Gen. xvi. 24; Matt. xviii. 22). Its definite use appears in the offerings of 70 shekels (Num. vii. 13, 19, and foll.); the 70 elders (xi. 16); 70 years of captivity (Jer. xix. 11). To these may be added the 70 descendants of Noah (Gen. x.), and the alleged Rabbinical qualification for election to the office of judge among the 71 members of the Great Sanhedrinn, of the knowledge of 70 languages (Tannah. ii. 15; and Caragios, App. Bibl. p. 70). The number of 72 translators may perhaps also be connected with the same idea.

4. Fire appears in the table of punishments, of legal requirements (Ex. xxi. 1; Lev. xvi. 14, xxii. 15: Num. v. 7, xviii. 16), and in the five empires of Daniel (Dan. ii.).

5. Four is used in reference to the 4 winds (Dan. vii. 2), and the so-called 4 corners of the earth: the 4 creatures, each with 4 wings, and 4 faces, of Ezekiel (i. 5 and foll.); 4 rivers of Paradise (Gen. ii. 10); 4 beasts (Num. vii. and Rev. iv. 6); the 4 equal-sided Temple-chamber (Ex. xxv. 47).

6. Three was regarded, both by the Jews and other nations, as a specially complete and mystic number (Plato, De Lg. iv. 715; Dionys. Halic. iii. c. 12). It appears in many instances in Scripture as a definite number, e. g. 3 feet (Ex. xxiii. 31); 3 days is 300 years (Ezek. iv.); the triple offering of the Nazirite, and the triple blessing (Num. vi. 14, 24), the triple invocation (Is. vi. 3; Rev. i. 4), Daniel's 3 hours of prayer (Dan. vi. 10, comp. Ps. iv. 17), the third heaven (2 Cor. xii. 2), and the thrice-repeated vision (Acts x. 16).

7. Twelve (3 x 4) appears in 12 tribes, 12 stones in the high-priest's breast-plate, 12 Apostles, 12 foundation-stones, and 12 gates (Rev. xxi. 19-21); 12,000 furlongs of the heavenly city (Rev. xxi. 16; 144,000 seal'd (Rev. vii. 4).

8. Forty appears in many enumerations: 40 days of Moses (Ex. xxiv. 18); 40 years in the wilderness (Num. xiv. 34); 40 days and nights of Elijah (I K. xix. 8); 40 days of Jonah's warning to Nineveh (Jon. iii. 4); 40 days of temptation (Matt. iv. 2).

9. The object of the encampment at Sinai has been accomplished. The Covenant has been made, the Law given, the Sanctuary set up, the Priests consecrated, the service of God appointed, and Jehovah dwells in the midst of his chosen people. It is now time to depart in order that the object may be achieved for which Israel has been sanctified. That object is the occupation of the Promised Land. But this is not to be accomplished by peaceable means, but by the forcible expulsion of its present inhabitants; for in the iniquitous and the Amorites is full," they are ripe for judgment, and this judgment Israel is to execute. Therefore Israel must be organized as Jehovah's army: and to this end a mustering of all who are capable of bearing arms is necessary. Hence the book opens with the numbering of the people, a chapters i.-iv. These contain, first, the census of all the tribes or clans, amounting in all to six hundred and thirteen thousand, five hundred and fifty, with the exception of the Levites, who were not numbered with the rest (ch. iv.); secondly, the arrangement of the camp, and the order of march (ch. ii.); thirdly, the special and separate census of the Levites, who are claimed by God instead of all the first-born, the three families of the tribe having their peculiar offices in the Tabernacle appointed them, both when it was at rest and when they were on the march (ee. iii., iv.).

(b.) Chapters v. vi. Certain laws apparently supplementary to the legislation in Leviticus: the removal of the unclean from the camp (v. 1-4); the law of restitution (v. 5-10): the trial of judicial

---

*See Kurtz, Gesch. des Alten Bundes, ii. 758.*
Chapter vii. 1-10. Events occurring at this time, and regulations connected with them.

Ch. vii. gives an account of the offering of the princes of the different tribes at the dedication of the Tabernacle; ch. viii. of the consecration of the Levites (ver. 89 of ch. vii., and vv. 1-4 of ch. viii.) seem to be out of place; ch. ix. 1-14, of the second observance of the Passover (the first in the wilderness) on the 14th day of the second month, and of certain provisions made to meet the case of those who by reason of threshing were unable to keep the Passover on the 14th day. "The 23rd" was the last time, and the fire regulated the march and the encampment; and x. 1-10, how the two silver trumpets were employed to give the signal for public assemblies, for war, and for festival occasions.

II. March from Sinai to the borders of Canaan.

(a.) We have here, first, the order of march described (x. 14-28); the appeal of Moses to his father-in-law, Hobab, to accompany them in their journey, which was accompanied by refusal and the threat of a curse. In the course of his desert life, he would be well acquainted with the best spots to encamp in, and also would have influence with the various wandering and predatory tribes who inhabited the peninsula (29-32); and the chant which accompanied the moving and the resting of the ark (v. 35, 36).

(b.) An account of several of the stations and of the events which happened at them. The first was at Kishron, where, because of their impatient murmurings, several of the people were destroyed by lightning (these belonged chiefly, it would seem, to the motley multitude which came out of Egypt with the Israelites): the loathing of the people for the manna; the complaint of Moses that he cannot bear the burden thus laid upon him, and the appointment in consequence of seventy elders to serve and help him in his office (xi. 10-29); the quail, and the judgment following thereon, which gave its name to the next station, Kibroth-hattaavah (the graves of lust), xi. 31-35 (cf. Ps. lviii. 39, 31, cxx. 14, 15); arrival at Hazeroth, where Aaron and Miriam are jealous of Moses, and Miriam in consequence smitten with leprosy (xii. 1-13); the sending of Le'ee spies from the wilderness of Paran, to find a way, xii. 20-24; and the refusal of the people to enter Canaan, their rejection in consequence, and their rash attack upon the Amalekites, which resulted in a defeat (xii. 16-xiv. 40).

III. What follows must be referred apparently to the thirty-seven years of wandering; but we have no notices of time or place. We have laws respecting the meat and drink offerings, and other sacrifices (xv. 1-91); an account of the punishment of a Sabbath-breaker, perhaps as an example of the presumptuous sins mentioned in vv. 30, 31 (xv. 32-36); the direction to put fringes on their garments as mementos (xv. 37-41); the history of the rebellion of Korah, Dathan, and Abiram, and the murmuring of the people (xvi.); the building of Aaron's rod as a witness that the tribe of Levi was chosen (xvii.); the direction that Aaron and his sons should be the chief priests, probably because the source of the priests and Levites (xviii.); the law of the water of purification (xix.)

IV. (a.) The narrative returns abruptly to the second encampment of the Israelites in Kadesh. Here Miriam dies, and the people murmur for water, and Moses and Aaron, "speaking unadvisedly," are not allowed to enter the Promised Land (xx. 1-13). They intended perhaps, as before, to enter Canaan from the south. This, however, was not to be permitted. They therefore desired a passage through the country of Edom. Moses sent a conciliatory message to the king, asking permission to pass through, and promising carefully to abstain from all outrage, and to pay for the provisions which they might find necessary. The jealousy, however, of this fierce and warlike people was aroused. They refused the request, and turned out in arms to defend their border. And as those almost inaccessible mountain passes could have been held by a mere handful of men against a large and well-armed enemy, the Israelites, we are told, attempted as negociators and turned southwards, keeping along the western borders of Idumea till they reached Edzion-geber (xx. 14-21).

On their way southwards they stop at Mount Hor, or rather at Moab, on the edge of the Edomite territory; and from this spot it would seem that Aaron, accompanied by his brother Moses and his son Eleazar, quitted the camp in order to ascend Mount Hor lying itself within the Edomite territory, whilst it might have been perilous for a larger number to attempt to penetrate it, these murmuring Wayfarers would not be molested, or might escape detection. Bunsen suggests that Aaron was taken to Mount Hor, in the hope that the fresh air of the mountain might be beneficial to his recovery: but the narrative does not justify such a supposition.

After Aaron's death, the march is continued southwards; but when the Israelites approach the head of the Akrab, at the southernmost point of the Edomite territory, they again murmur by reason of the roughness of the way, and many perish by the bite of venomous serpents (xx. 22-xxi. 9). The passage (xxi. 1-3) which speaks of the Canaanite king of Arad as coming out against the Israelites is clearly out of place, standing as it does after the mention of Aaron's death on Mount Hor. Arad is in the south of Palestine. The attack therefore must have been made whilst the people were yet in the neighborhood of Kadesh. The mention of Hormah also shows that this must have been the case (comp. xiv. 45). It is on this second occasion that the name of Hormah is said to have been given. Either perhaps it is used there for the second time (xvi. 53), or there is some confusion in the narrative. What "the way of Atharim" (A. V. "the way of the spies") was, we have no means now of ascertaining.

(b.) There is again a gap in the narrative. We are told nothing of the march along the eastern edge of Edom, but suddenly find ourselves transported to the borders of Moab. Here the Israelites successively encounter and defeat the kings of the Amorites and of Bashan, wresting from them their territory and permanently occupying it (xxii. 10-35). Their successes alarm the king of Moab, who, distrusting his superiority in the field, sends for a magician to curse his enemies; hence the episode of Balaam (xxiii. 1-xiv. 25). Other artifices are employed by the Moabites to weaken the Israelites, especially the offer of the Moabite women (xxiv. 1), with whom the Midianites (ver. 6) are also joined; this evil is averted by the zeal of Phinehas (xxiv. 7, 8): a second numbering of the Israelites takes place in the plains of Moab preparatory to their crossing the Jordan (xxvi.). A question arises as to the inheritance of daughters, and a decision is given thereon (xxvii. 1-11); Moses
is warned of his death, and Joshua appointed to succeed him (xxvii. 12-23). Certain laws are given concerning the daily sacrifices, and the offerings for sabbaths and festivals (xxviii., xxix.); and the law respecting vows (xxx.); the conquest of the Midianites is narrated (xxxii.); and the partition of the country east of the Jordan among the tribes of Reuben and Gad, and the half-tribe of Manasseh (xxxiii.). This description of its reoccupation of this land, with some difference, of the various encampments of the Israelites in the desert (xxxi. 1-49); the command to destroy the Canaanites (xxxvii. 50-55); the boundaries of the Promised Land, and the men appointed to divide it (xxxiv.); the appointment of the cities of the Levites and the cities of refuge (xxxv.); further directions respecting heirlooms, with special reference to the case mentioned in ch. xxxvi., and conclusion of the book (xxxvi.).

B. Integrity.—This, like the other books of the Pentateuch, is supposed by many critics to consist of a compilation from two or three, or more, earlier documents. According to de Wette, the following portions are the work of the Elohist [PENTATEUCH]: Ch. i. 1-xx. 23; xxxii. 2-16 (in its original form, though not in its present form); xxxii. 1, 2-11, 16-23, 24 (2); xvii. 8, 9; xxxi. 13, 22-29; xxxviii. 8-xxx. (except perhaps xxxvii. 8-11); xxxii. 5, 25-42 (vv. 1-4 uncertain); xxxiii.-xxxvi. The rest of the book is, according to him, by the Jehovist or later editor. Von Lengerke (Kvenua, s. lxxxi.) and Stihelin (§ 24) make a similar division, though they differ as to some verses, and even whole chapters. Vaihinger (in Herzog's Enzyklopädie, art. "Pentateuch") finds traces of three distinct documents, which he ascribes severally to the pre-Elohist, the Elohist, and the Jehovist. To the first he assigns ch. x. 29-36; ix. 1-12, 16 (in its original form); xx. 11-21; xxxii. 12-15; xxxiii. 53, 54. To the Elohist belong ch. i. 1-xx. 23; ch. xii. 25; xxxi. 1-xxxvii. 23; xxxviii.-xxx. 8, &c.

But the grounds on which this distinction of documents rests are in every respect most unsatisfactory. The use of the divine names, which was the starting-point of this criticism, ceases to be a criterion; and certain words and phrases, a particular manner or coloring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later documents. Thus, for instance, Stihelin alleges as reasons for assigning ex. xi. xii. to the Jehovist, the coming down of Jehovah to speak with Moses, xii. 25; the pillar of a cloud, xii. 5; the relation between Joshua and Moses, xii. 28, as in Ex. xxxiii., xxxiv.; the seventy elders, xii. 16, as Ex. xiv. 1; and so on. So again in the Jehovistic section, xii. 4, xiv. 21; the wanderings in the wilderness (or "First Emigration") in one passage (xiii. 2-17), because of the use of the word יִתְנָה, signifying "a tribe," and יִשְׂרָאֵל, as in Num. i. and vii. But יִתְנָה is used also by the supposed supplementist, as in Ex. xxii. 27, xxxiv. (xxvi.); then follows a recapitulation, thought not in its present form; xxxv. 1, 2; xxxvi. 1, 31; and that יִתְנָה is not peculiar to the older documents has been shown by Keil (Comment. on Joshua, s. xiv.). Von Lengerke goes still further, and cuts off xii. 3-16 altogether from what follows. He thus makes the story of the spies, as given by the Elohist, strangely unied. We only hear of their being sent to Canaan, but nothing of their return and their report. The chief reason for this separation is that in xlii. 27 occurs the Jehovistic phrase, "flowing with milk and honey," and some references to other earlier Jehovistic passages. De Wette again finds a repetition in xiv. 26-38 of xiv. 11-23, and accordingly gives these passages to the Elohist and Jehovist respectively. This has more color of probability about it, though it has been answered by Ranke (Untersuch. ii. s. 197 E.). Again, ch. xvi. is supposed to be a combination of two different accounts, the original or Elohistic document having contained only the story of the rebellion of Korah and his company, whilst the Jehovist mixed up with it the inscription of Dathan and Abiram, which was directed rather against the temporal dignity than against the spiritual authority of Moses. But it is against this view, that, in order to justify it, vv. 12, 14, 27, and 32, are treated as interpolations. Besides, the discrepancies which it is alleged have arisen from the fusing of the two narratives disappear when fairly looked at. There is no contradiction, for instance, between xvi. 19, where Korah appears at the tabernacle of the congregation, and ver. 20, where Dathan and Abiram stand at the doors of the tents. In the last passage Korah is not mentioned, and, even if we suppose him to be included, the narrative allows time for his having left the Tabernacle and returned to his own tent. Nor again, does the statement, ver. 35, that the 250 men who offered incense were destroyed by fire, and who had, as we learn from ver. 2, joined the leaders of the insurrection, Korah, Dathan, and Abiram, militate against the narrative in ver. 32, according to which Dathan and Abiram and all that appertained unto Korah were swallowed up alive by the opening of the earth. Further, it is clear, as Keil remarks (Einb. p. 94), that the earlier document (the "Grundschrift") implies that persons belonging to the other tribes were mixed up in Korah's rebellion, because they say to Moses and Aaron (ver. 31), "All the congregation is holy," which justifies the statement in vv. 1, 2, that, besides Korah the Levite, the Levubites Dathan, Abiram, and On, were leaders of the insurrection.

In ch. xii. we have a remarkable instance of the jealously with which the authority of Moses was regarded even in his own family. Considering how often the personal jealousy of that age is shown, it is perhaps hardly to be wondered at. On the other hand, as we are expressly reminded, there was everything in his personal character to disarm jealousy. "Now the man Moses was very meek above all the men which were upon the face of the earth," says the historian (ver. 3). The pretext for the outburst of this feeling on the part of Miriam by Moses, that he had married an Ethiopian woman (a woman of Cush). This was probably, as Esawal suggests, a second wife married after the death of Zipporah. But there is no reason for supposing, as he does (Gesch. ii. 229, note), that we have here a confusion of two accounts. He observes that the words of the brother and sister "Hath the Lord indeed spoken only by Moses? was Moses also spoken by us?" show that the real ground of their jealousy was the apparent superiority of Moses in the prophetic office; whereas, according to the narrative, their dislike was occasioned by his marriage with a foreigner and a person of inferior rank. But nothing surely can be more natural than that the long period...
feeling of jealousy should have fastened upon the marriage as a pretext to begin the quarrel, and then have shown itself in its true character in the words recorded by the historian.

It is not perhaps to be wondered at that the episode of Balaam (xxii. 2-xxiv. 25) should have been regarded as a later addition. The language is peculiar, as well as the general cast of the narrative. The prophet is vivid and the diction of them highly finished: very different from the rugged, vigorous fragments of ancient poetry which meet us in ch. xxi. On these grounds, as well as on the score of the distinctly Messianic character of Balaam's prophecies, Ewald gives this episode to his Fifth Narrator, or the latest editor of the Pentateuch. This writer he supposes to have lived in the former half of the 8th century B.C., and hence he accounts for the reference to Assyria and the Cypriotes (the Kittim) the latter nation about that time probably existing as pirates the coasts of Syria, whereas Assyria might be joined with Eber, because as yet the Assyrian power, though hostile to the southern nations, was rather friendly than otherwise to Judah. The allusions to Edom and Moab as vanished enemies have reference, it is said, to the time of David (Ewald, loc. cit., p. 114 ff., and compare ii. 277 ff.). The prophecies of Balaam, therefore, on this hypothesis, are vitia in exeunte, put into his mouth by a clever, but not very scrupulous writer of the time of Isaiah, who, finding some mention of Balaam as a prince of Midian in the older records, put the story into shape as we have it now. But this sort of criticism is so purely arbitrary that it scarcely merits a serious refutation, not to mention that it rests entirely on the assumption that in prophecy there is no such thing as prediction. We will only observe that, considering the peculiarity of the man and of the circumstances as given in the history, we might expect to find the narrative itself, and certainly the poetical portions of it, marked by some peculiarities of thought and diction. Even granting that this episode is not by the same writer as the rest of the book of Numbers, there seems no valid reason to doubt its antiquity, or its rightful claim to the place which it at present occupies. Nothing can be more improbable than that, as a later invention, it should have found its way into the book of the Law.

At any rate, the picture of this great magician is wonderfully kept in keeping with the circumstances under which he appears and with the prophecies which he utters. This is not the place to enter into all the questions which are suggested by his appearance on the scene. How it was that a heathen became a prophet of Jehovah we are not informed; but such a fact seems to point to some remains of a primitive revelation, not yet extinct, in other nations besides that of Israel. It is evident that his knowledge of God was beyond that of most heathen, and he himself could utter the passionate wish to see found in his death among the true servants of Jehovah; but, because the soothsayer's craft promised to be useful, and the profession of it gave him an additional importance and influence in the eyes of men like Balak, he sought to combine it with his higher vocation. There is nothing more remarkable in the early history of Israel than Balaam's appearance. Summoned from his home by the Embrutes, he stands by his red altar-fires, weaving his dark and subtle sorceries, or goes to seek for enchantment, hoping, as he looked down

upon the tents of Israel among the acacia-groves of the valley, to wither them with his word, yet constrained to bless, and to foretell their future greatness.

The book of Numbers is rich in fragments of ancient poetry, some of them of great beauty, and all throwing an interesting light on the character of the times in which they were composed. Such, for instance, is the blessing of the high-priest (ch. 24-26):

"Jehovah bless thee and keep thee; Jehovah make his countenance shine upon thee, And be gracious unto thee; Jehovah lift up his countenance upon thee, And give thee peace."

Such too are the chants which were the signal for the ark to move when the people journeyed, and for it to rest when they were about to encamp:

"Arise, O Jehovah! let thine enemies be scattered; Let them also that hate thee flee before thee.

And—

"Return, O Jehovah, And rest among thousands of the families of Israel."

In ch. xxii. we have a passage cited from a book called the "Book of the Wars of Jehovah." This was probably a collection of ballads and songs composed on different occasions by the watch-fires of the camp, and for the most part, though not perhaps exclusively, in commemoration of the victories of the Israelites over their enemies. The title shows us that these were written by men imbued with a deep sense of religion, and who were therefore wont to acknowledge that not their own prowess, but Jehovah's right hand, had given them the victory when they went forth to battle. Hence it was called, not "The Book of the Wars of Israel," but "The Book of the Wars of Jehovah." Possibly this is the book referred to in Ex. xvii. 14, especially as we read (ver. 16) that when Moses built the altar which he called Jehovah-Nissi (Jehovah is my banner), he exclaimed, "Jehovah will have war with Amalek from generation to generation." This expression may have given the name to the book.

The fragment quoted from this collection is difficult, because the allusions in it are obscure. The Israelites had reached the Arnon, "which," says the historian, "forms the border of Moab, and separates between the Moabites and Amorites." "Wherefore it is said," he continues, "in the book of the Wars of Jehovah,

"It Valeh in Suphath and the torrent-beds; Arnon and the slope of the torrent-beds Which turneth to where Ar ith, And which leaneth upon the border of Moab."

The next is a song which was sung on the digging of a well at a spot where they encamped, and which from this circumstance was called Be'er, or "The Well." It runs as follows:—

"Spring up, O well! sing ye to it: Well, which the princes dug, Which the nobles of the people bored, With the sceptre of office, with their staves."

This song, first sung at the digging of the well, was afterwards no doubt commonly used by those who came to draw water. The maidens of Israel chanted it one to another, verse by verse, as they toiled at the bucket, and thus beguiled their labor.

"Spring up, O well!" was the burden or refrain
of the song, which would pass from one mouth to another at each fresh coil of the rope, till the full bucket reached the well-mouth. But the peculiar charm of the song lies not only in its antiquity, but in the characteristic touch which so manifestly combined with the life of the time to which the narrative assigns it. The one point which is dwelt upon is, that the leaders of the people took their part in the work, that they themselves helped to dig the well. In the new generation, who were about to enter the Land of Promise, a strong feeling of sympathy between the people and their rulers had sprung up, which assured wealth for the future, and which left its stamp even on the ballads and songs of the time. This little card is fresh and lusty with young life; it sparkles like the water of the well whose springing up first occasioned it; it is the expression, on the part of those who sung it, of lively confidence in the sympathy and cooperation of their leaders, which, manifested in this one instance, might be relied upon in all emergencies (Ewalt, Gesch. ii. 214, 245).

Immediately following this "Song of the Well," comes a song of victory, composed after a defeat of the Moabites and the occupation of their territory. It is in a tuneful, melo-of singing; and is commonly considered to have been written by some Israelhish bard on the occasion of the Amorite territory. Yet the manner in which it is introduced would rather lead to the belief that we have here the translation of an old Amorite ballad. The history tells us that when Israel approached the country of Sihon they sent messengers to him demanding permission to pass through his territory. The request was refused. Sihon came out against them, but was defeated in battle. "Israel," it is said, "smote him with the edge of the sword, and took his land in possession, from the Arnon to the Jabbok and as far as the children of Ammon; for the border of the children of Ammon was secure (i.e. they made no encroachments upon Ammonitic territory). Israel also took all these cities, and dwelt in all the cities of the Amorites in Heshbon, and all her daughters (i.e. lesser towns and villages)." Then follows a little scrap of Amorite history: "For Heshbon is the city of Sihon, king of the Amorites, and he had waged war with the former king of Moab, and had taken from him all his land as far as the Arnon. Wherefore the ballad-singers (נֹפְלָיָה נַפְלִיָּה) say,—

"Come ye to Heshbon, Let the city of Sihon be built and established! For fire went forth from Heshbon, A flame out of the stronghold (מִלְּחָנָן) of Sihon, Which devoured Ar of Moab, The foundations of the high places of Arnon. Were to thee, Moab! Then art thou, O people of Chemosh! He (i.e. Chemosh thy god) hath given up his sons as sacrifices, And his daughters into captivity, To Sihon king of the Amorites. Then we set them down; 1 Heshbon persisteth even unto Heshbon, And we did it) waste unto Nophash, which (reacheth) unto Minideb." 2

If the song is of Hebrew origin, then the former part of it is a biting taunt, "Come, ye Amorites, into your city of Heshbon, and build it up again. Ye boasted that ye had burnt it with fire and driven out its inhabitants; but now we are come in our turn and have burnt Heshbon, and driven you out as ye once burnt it and drove out its Moabite possessors." C. The alleged discrepancies between many statements in this and the other books of the Pentateuch, will be found discussed in other articles, Dictionarvon; Exodus; Pentateuch.

T. J. C.

NUMENIUS (Nouzaphos [belonging to, or born at the time of, the new moon]; Numenius), son of Antiochus, was sent by Jonathan on an embassy to Rome (1 Macc. xii. 16) and Spartaa (xii. 17), to renew the friendly connections between these nations and the Jews, c. n. c. 144. It appears that he had not returned from his mission at the death of Jonathan (1 Macc. xiv. 22, 23). He was again dispatched to Rome by Simon, c. n. c. 141 (1 Macc. xiv. 24), where he was well received and obtained letters in favor of his countrymen, addressed to the various eastern powers dependent on the Republic, c. n. c. 139 (1 Macc. xv. 15). [LUCIUS].

B. F. W.

NUM (נְנָע, or נְנָע, 1 Chr. vii. 27 [רְנָע]): Naupi: Naur). The father of the Jewish captain Joshua (Ex. xxxiii. 11). His genealogical descent from Ephraim is recorded in 1 Chr. vii. Nothing is known of his life, which was doubtless spent in Egypt. The mode of spelling his name in the LXX. has not been satisfactorily accounted for. Gesenius asserts that it is a very early mistake of transcribers, who wrote NATH for NATN. But Ewald (Gesch. ii. 298) gives some good etymological reasons for the more probable opinion that the final N is omitted intentionally. [See also NUN.]

W. T. B.
NURSE. It is clear, both from Scripture and from Greek and Roman writers, that in ancient times the position of the nurse, wherever one was maintained, was one of much honor and importance. (See Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 3 Mus. i. 29; Hose. Ol. ii. 361, xix. 15, 251, 466; Eurip. Ion, 1357; Hippol. 267 and fol.: Virg. *En. vii. 1.) The same term is applied to a foster-father or mother, e. g. Num. xii. 12; Ruth iv. 16; Is. xlix. 24. In great families male servants, probably eunuchs in later times, were entrusted with the charge of the boys, 2 K. x. 1, 5. [CHILDREN.] See also *Kinnon, iv. 63, Tegg’s ed.; Mrs. Poole, *Lybie, in *Lyg. iii. 201.

II. W. P.

NUTS. The representative in the A. V. of the words *botinim* and *egez.*

1. *Botinim* (*βότηνιμα*; τερβιβότις; *terebinthus*). Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, mention is made of *botinim.* There can scarcely be a doubt that the *botinim* denote the fruit of the Pistachio-tree (*Pistacia vera*), though

the *Pistacia vera* is in form not unlike the *P. terebinthus,* another species of the same genus of plants; it is probable therefore that the *terebinthus* of the LXX. and Vulg. is used generically, and is here intended to denote the pistachio-tree, for the terebinth does not yield edible fruit. *b* Syria and Palestine have been long famous for pistachio-trees; see Dioscorides (i. 177), and Pliny (xiii. 5), who says “Syria has several trees that are peculiar to itself: among the nut-trees there is the well-known pistacia;” in another place (xv. 22) he states that Vitellius introduced this tree into Italy, and that Plaucus Pompeius brought it at the same time into Spain. The district around Aleppo is especially celebrated for the excellence of the pistachio-nuts, see Russell (Hist. of *Alps.* i. 82, 2d ed.) and Galen (de *Fac. Alim.* ii. p. 612), who mentions Berrohoe (Aleppo) as being rich in the production of these trees; the town of Batna in the same district is believed to derive its name from this circumstance *botinim,* a town of the tribe of Gad (Josh. xiii. 20), has in all probability a similar etymology. [HERO-

*NIM.*] Bochart draws attention to the fact that pistachio-nuts are mentioned together with almonds in Gen. xliii. 11, and observes that Dioscorides, Theophrastus, and others, speak of the pistachio-tree conjointly with the almond-tree. As there is no mention in early writers of the *Pistacia vera* growing in Egypt (see Celsius, *Hiero.* i. 27), it was undoubtedly not found there in Ptolemaic times, whereas Jacob’s present to Joseph would have been most acceptable. There is scarcely any allusion to the occurrence of the *Pistacia vera* in Palestine amongst the writings of modern travellers; Kitto (Phys. Hist. *Pol.* p. 323) says “it is not much cultivated in Palestine, although found there growing wild in some very remarkable positions, as on Mount Tabor, and on the summit of Mount Athis- 

rous” (see Burckhardt, *Syria,* p. 344). Dr. Thomson (Land and Rock, p. 267) says that the terebinth trees near Mous el-Jebel had been grafted with the pistachio from Aleppo by order of Ibrahim Pasha, but that “the peasants destroyed the grafts, lest their crop of oil from the berries of these trees should be diminished.” Dr. Hooker saw only two or three pistachio-trees in Palestine. These were outside the north gate of Jerusalem. But he says the tree is cultivated at Beirut and elsewhere in Syria. The *Pistacia vera* is a small tree varying from 15 to 30 ft. in height; the male and female flowers grow on separate trees; the fruit, which is a green-colored oily kernel, not unlike an almond, is inclosed in a brittle shell. Pistachio-nuts are much esteemed as an article of diet both by Oriental and Europeans; the tree, which belongs to the natural order *Anacardiaceae,* extends from Syria to Bokhara, and is naturalized over the south of Europe; the nuts are too well known to need minute description.

2. *Egez* (*εγρίς*; καπνικός: *nux*) occurs only in Cant. vi. 11, “I went into the garden of nuts.”

a 1. *γνησίς,* *μανιαστής* ἀνθρώποι, *μανιαστής*; *γαρμάνως,* ἀνθρώποι, *μανιαστής* from *μανιαστής,* to carry (see Is. ix. 4).

b The Arabic *πατρια* (*patra*) appears to be also used generically. It is more generally applied to the terebinth, but may comprehend the pistachio-tree, as these fruits are sometimes confused, and Dr. Ryle (Kitto’s Cyc.) has proved. He says the word is applied in some Arabic works to a tree which has green-colored kernels. This must be the *Pistacia vera.*
The Hebrew word in all probability is here to be understood as referring to the Walnut-tree; for the Greek καπόδας is supposed to denote the tree, καπωρίον the nut (see Soph. F.r. 892). Although καπωρίον and now may signify any kind of nut, yet the walnut, as the nut καπωρίαν, is more especially that which is denoted by the Greek and Latin terms (see Casaubon on Athenaeus, ii. 85). Ovid, Nux Euglyj (Celsus, Hist. c. 28). The Hebrew term is evidently alluded to the Arabic jωρ, which is from a Persian word of very similar form; whence Abul Fairad in (Celsus) says "the Arabs have borrowed the word גור from the Persian; in Arabic the term is Chaif, which is a tall tree." The Chaif or cheer, is translated by Freytag, "an esculent nut, the walnut." The Jewish Rabbis understand the walnut by פיסכין.

According to Josephus (B. J. i. 10, § 8) the walnut-tree was formerly common, and grew most luxuriantly around the lake of Gennesaret; Schalit, speaking of this same district, says he often saw walnut trees growing there large enough to shelter four-and-twenty persons. See also Kitt (Phys. Hist. Pol. p. 250) and Barelhardt (Syriac, p. 265). The walnut tree (Juglans regia) belongs to the natural order Juglandaceae; it is too well known to require any description.

W. H.

* The walnut is cultivated very extensively in Syria. At Jabal el-Kheil, on the side of Jebel Kibin, inland about five hours from Sidon, there are large orchards of this tree, and the nuts are very cheap. I have bought them at a dollar and a quarter a thousand, including their transportation to a village two days distant. They are of the best quality. The common name for them in Syria is שדנק, which is undoubtedly the same as the Hebrew (תננ). G. E. P.

NYMPHAS (Neumphos [pome, bridegroom]; Symphat, a wealthy and zealous Christian in Laodicea (Col. iv. 15). His house was used as a place of assembly for the Christians; and hence Grotius, making an extraordinarily high estimate of the probable number of Christians in Laodicea, in 1632, says that he must have lived in a rural district. In the Vatican MS. (B) this name is taken for that of a woman; and the reading appears in some Latin writers, as pseudo-Ambrusius, pseudo-Auselix, and it has been adopted in Lachmann's N. T. The common reading, however, is found in the Alexandrian MSS. and in that of Ephrem Syrus (A and C), and is the only one known to the Greek Fathers.

W. T. B.

OAK. The following Hebrew words, which appear to be merely various forms of the same root, occur in the O. T. as the names of some species of oak, namely, ות, ות, ות, ות, ות, ות, ות, and ות.

a From ליעז, ליעז, or ליעז, "to be strong."
we by no means assert it does not, the term etymologically is applicable to it only in a second degree; for the Pistacia terebinthus, although it also occasionally grows to a great size, "spreading its boughs," as Robinson (Bibl. Res. ii. 222) observes, "far and wide like a noble oak," yet it does not form so conspicuously a good tree as either the Quercus pseudo-coccifera or Q. coccifera. Dr. Thomson (Land and Book, p. 243) remarks on this point: "There are more mighty oaks here in this immediate vicinity (Mt. eden-Sheens) than there are terebinths in all Syria and Palestine together. I have travelled from end to end of these countries, and across them in all directions, and speak with absolute certainty." At p. 609, the same writer remarks, "We have oaks in Lebanon twice the size of this (Abraham's oaks); and every way more striking and majestic." Dr. Hooker has no doubt that Thomson is correct in saying there are far finer oaks in Lebanon; "though," he observes, "I did not see any larger, though one or two at all near it." Cyril Graham told me there were forests of noble oaks in Lebanon north of the cedar valley." It is evident from these observations that two oaks (Quercus pseudo-coccifera and Q. coccifera) are well worthy of the name of mighty trees; though it is equally true that over a greater part of the country the oaks of Palestine are at present merely bushes.

3. Elön (אֵלֹן: הָּדָּרִים הָּדָּרִים, הָּדָּלָאָו, אָלֹן: qircus illustis, quercus) occurs frequently in the O. T., and denotes, there can be little doubt, some kind of oak. The A. V., following the Targum, translates elön by "plain." (See Stanley, S. & P. p. 520, App.)

4. Ilán (אֶלְנָא: děnôrov: arbor) is found only in Dan. iv. as the tree which Nebuchadnezzar saw in his dream. The word appears to be used for any "strong tree," the oak having the best claim to the title, to which tree probably indirect allusion may be made.

5. Allah (אֲלָה: הָּדָּרִים: Aq. and Symm: הָּדָּרִים: quercus) occurs only in Josh xxiv. 29; and is correctly rendered "oak" by the A. V.

6. Allôn (אֵלֹנָא: הָּדָּלָאָו, děnôrov bdalān, ṣārōv: quercus) is uniformly rendered "oak" by the A. V. and has always been so understood by commentators. It should be stated that allôn occurs in Hos. iv. 13, as distinguished from the other form elôn; consequently it is necessary to suppose that two different trees are signified by the terms. We believe, for reasons given above, that the difference is specific, and not generic—that two species of oaks are denoted by the Hebrew terms: allôn may stand for an evergreen oak, as the Quercus pseudo-coccifera, and elôn for one of the deciduous kinds. The Pistacia vera could not be mistaken for an oak. If, therefore, specific allusion was ever made to this tree, we cannot help believing that it would have been under another name than any one of the numerous oak species which are used to designate the different species of the genus Quercus; perhaps under a Hebrew form allied to the Arabic balim, "the terebinth." The oak-woods of Bashan are mentioned in Is. ii. 13; Ez. xxvii. 6; Zech. xi. 2. The oaks of Bashan belong in all probability to the species known as Quercus coccifera, the Valonia oak, which is said to be common in Tidide and Bashan. Sacrifices were offered under oaks (Hos. iv. 13; Is. i. 29); of oak-timber the Tyrians manufacture oars (Ez. xxvii 6), and idolaters their images (I
24; Jnirere dithove, in June, libl., prophets. Onlty For Hooker's of 1. 'riie soneiiiiies tree. It grows It is near Quercus (Tgilops. It is rather a small tree in Palestine, and seldom grows above 60 ft. high, though in ancient times it might have been a noble tree. For a description of the oaks of Palestine, see Dr. Hooker's paper read before the Linnean Society, June, 1861, [and Tristram's Nat. Hist. of the Bibl., pp. 367-371.]

W. H.

The Quercus pseudo-coecifera, the evergreen oak of Syria, is the largest species. It is the one usually found near the Welies or tombs of the prophets.

OATH

Q. agilops does not ordinarily attain as large a size, and, as its leaves are deciduous, it is not a favorite in the neighborhood of tombs. Nevertheless it is often found in groves, rarely by itself, in and around grave-yards. The number of forests of this and the preceding species is immense. The common name for Q. pseudo-coecifera is

OAK

OATH. 1. The principle on which an oath is held to be binding is incidentally laid down in Heb. vi. 16, namely, as an ultimate appeal to divine authority to ratify an assertion (see the principle stated and defended by Philo, De Leg. Alleg. iii. 75, i. 128, ed. Mang.). There the Almighty is represented as promising or denouncing with an oath, i.e., doing so in the most positive and solemn manner (see such passages as Gen. xxxii. 16, xlix. 7, compared with xxv. 7; Ex. xvii. 16 and Lev. xxvi. 14 with Dan. ix. 11; 2 Sam. vii. 12, 13, with Acts ii. 30; Ps. ex. 4 with Heb. vii. 21, 28; Is. xlv. 23; Jer. xxxii. 5, xxxii. 22). With this Divine assurance we may compare the Stygian oath of Greek mythology (Hom. II. iv. 57; Hes. Theog. 400, 805; see also the Loves of Men, c. viii. 110; Sir W. James, Weeks, i. 291). 2. On the same principle, that oath has always been held most binding which appealed to the highest authority, both as regards individuals and communities. (a) Thus believers in Jehovah appealed to him, both judicially and extra-judicially, with such phrases as "The God of Abraham judge;" "As the Lord liveth;" "God do so to me and more also;" "God knoweth," and the like (see Gen. xxi. 23, xxxii. 35; Num. xiv. 2, xxx. 2; 1 Sam. xiv. 29, 44: 1 K. ii. 42; Is. lxiii. 1, lv. 16; Hes. iv. 15). So also our Lord himself accepted the high-priest's adjuration (Matt. xxvi. 63), and St. Paul frequently appeals to God in confirmation of his statements (Acts xxvi. 29; Rom. i. 9, ix. 1; 2 Cor. i. 23, xi. 31; Phil. i. 8; see also Rev. x. 6). (b) Appeals of this kind to authorities recognized respectively by adjusting parties were regarded as bonds of international security, and their infraction as being not only grounds of international complaint, but also offenses against divine justice. So Zedekiah, after swearing fidelity to the king of Babylon, was not only punished by him, but denounced by the prophet as a breaker of his oath (2 Chr. xxxvi. 13; Ex. xvii. 13, 18). Some, however, have supposed that the Law forbade any intercourse with heathen nations which involved the necessity of appeal to them to their own deities (Ex. xxiii. 32; Selden, De Jur. Nat. ii. 13; see Liv. i. 21; Laws of Man, viii. 113; Dict. of Antiq. "Jus Jurandum"). 3. As a consequence of this principle, (c) appeals to God's name on the one hand, and to heathen deities on the other, are treated in Scripture as tests of allegiance (Ex. xxiii. 13, xxiv. 6; Deut. xxiv. 12; Josh. xxiii. 7, xxiv. 16; 2 Chr. xv. 12 11; Is. xix. 18, xlv. 23; Jer. xii. 16; Am. viii.

OAK

[24] the shade of oak-trees the dead were sometimes interred (Gen. xxxv. 8; see also 1 Sam. xxxi. 13).

Quercus pseudo-coecifera.

Another species of oak, besides those named above, is the Quercus infectoria, which is common in Galilee and Samaria. It is rather a small tree in Palestine, and seldom grows above 60 ft. high, though in ancient times it might have been a noble tree.

For a description of the oaks of Palestine, see Dr. Hooker's paper read before the Linnean Society, June, 1861, [and Tristram's Nat. Hist. of the Bibl., pp. 367-371.]

W. H.

The Quercus pseudo-coecifera, the evergreen oak of Syria, is the largest species. It is the one usually found near the Welies or tombs of the prophets.

2. ἕξος and ἑξής, from ἕξος, "seven," the score number (Lec. pp. 334, 1350), ἑκατόν, ἑκατόων.
OATH

14. Zeph. i. 5.) (b) So also the sovereign's name is sometimes used as a form of obligation, as was the case among the Romans with the name of the emperor; and Hofmann quotes a custom by which the kings of France used to appeal to themselves at their coronation (Gen. xxiii. 13; 2 Sam. xi. 11, xiv. 19; Martyr. S. Polycarp. c. ix.: Tertull. Apol. c. 32; Soc. Coll. c. 27; Hofmann, Lex. art. "Joc-
umentum"; Dict. of Antiq. u. s. Michaelis; On
Loves of Moses, art. 258, vol. iv. 102, ed. Smith). IV.

Other forms of oath, serious or frivolous, are mentioned; as by the "blood of Abel" (Selden, De
Jud. Nat. v. 8); by the "heave," by "Heaven," the "Temple," etc., some of which are condemned by
our Lord (Matt. v. 33, xxxii. 10-22; and see Jam. v. 12). Yet he did not refuse the solemn
adjudgment of the high-priest (Matt. xvii. 63, 64; see Juv. Sut. vi. 16; Mart. xi. 94; Mishna, Samb.
iii. 2, compared with Am. viii. 7; Spencer, De
Leg. Hebr. ii. 1-4).

As to the subject-matter of oaths the following cases may be mentioned:

1. Agreement or stipulation for performance of certain acts (Gen. xiv. 22, xxiv. 2, 8, 9; Ruth i.
17; 1 Sam. iv. 24; 2 Sam. v. 3; Jer. v. 5; Neh.
v. 12, x. 29, xl. 23; Acts xxiii. 21; and see
Joseph. Vit. v. 53).

2. Allegiance to a sovereign, or obedience from an inferior to a superior (Eccil. v. 2; 2 Chr. xxxvi.
13; 1 K. xviii. 10). Josephus says the Essenes considered oaths unnecessary for the initiated,
though they required them previously to initiation (R. J. ii. §§ xxv. 6; Act. xiv. 19; § 4; Philo, Quad
omnia probus, l. 12, ii. 438, ed. Mangely).

3. Promissory oath of a usher (Josh. vi. 26; 1
Sam. xiv. 24, 28; 2 K. xxv. 24; Matt. xiv. 7).
Priests took no oath of office (Heb. xvi. 21).

4. Vow made in the form of an oath (Lev. v. 4).

5. Judicial oaths. (a.) A man receiving a pledge from a neighbor was required, in case of injury
happening to the pledge, to clear himself by oath of the blame of damage (Ex. xxii. 10, 11; 1 K. viii.
31; 2 Chr. vi. 22). A willful breaker of trust, es-
pecially if he added perjury to his fraud, to be severely punished (Lev. vi. 2-5; Deut. xix. 16-18)
(b.) It appears that witnesses were examined on oath, and that a false witness, or one guilty of sup-
pression of the truth, was to be severely punished (Lev. i. 1; Prov. xxiv. 24; Michaelis, l. c. art. 206,
v. 100; C. Crund. Spec. on Matt. xxvi. 63; Knobol on Lev. v. 1, in Kurzy.
"Exeg. Hamb."). (c) A wife suspected of in-
convenience was required to clear herself by oath (Num.
v. 19-22).

It will be observed that a leading feature of Jew-
ish criminal procedure was that the accused person
was put upon his oath to clear himself (Ex. xxi.
11; Num. x. 18-22; 1 K. viii. 31; 2 Chr. vi. 22;
Matt. xxvi. 63).

The forms of adoration mentioned in Scripture
are: 1. Lifting up the hand. Witnesses laid their
hands on the head of the accused (Gen. xiv. 22;
Lev. xxiv. 14; Deut. xxxvii. 40; Is. iii. 7; Ez. xx.
5, 6; Sus. v. 33; Rev. x. 5; see Hom. II. xix.
584; Virg. Æn. xii. 196; Carpoza, Apparatus, n. 12).

2. Putting the hand under the thigh of the per-
son to whom the promise was made. As Josephus
describes the usage, this ceremony was performed
by each of the contracting parties to each other. It
has been explained (a) as having reference to the
vowant of circumcision (Godwyn, Moses and
Aaron, vi. 6, Carpoza, l. c. p. 563); (b) as contain-
ing a principle similar to that of phallic sym-
bolism (Her. ii. 48; Plut. Is. et Osir. vii. 412, ed.
Reiske); Knobel on Gen. xxiv. 2, in Kurzy.
"Exeg. Hdb."); (c) as referring to the promised Messiah (Aug. Qw. in Hept. 62; Civ. Dil. xvi. 33). It
seems likely that the two first at least of these ex-
planations may be considered as closely connected,
if not identical with each other (Gen. xxiv. 29;
Nicolaus, De Jur. xi. 6; Ges. p. 651, s. v.
772); Fagius and others in Civ. Sacr. : Joseph.
Ant. l. 10, § 1).

3. Oaths were sometimes taken before the altar,
or, as some understand the passage, if the persons
were not in Jerusalem, in a position looking towards
the Temple (1 K. viii. 31; 2 Chr. vi. 22; Godwyn,
L. c. vi. 6; Carpoza, p. 634; see also Juv. Sut.

4. Dividing a victim and passing between or
distributing the pieces (Gen. xvi. 10, 17; Jer.
xxiv. 18). This form was probably used to intensify
the expression of the promise already ratified by sacrifice, according to the custom described by classical writers under the phrases ἡμιάν κύριον, ἄνωθεν σειρήν, etc. We
may perhaps regard in this view the acts recorded
Judg. xix. 21, 1 Sam. xi. 7, and perhaps Herod.
vi. 39.

As the sanctity of oaths was carefully inculcated
by the Law, so the crime of perjury was strongly
condemned; and to a false witness the same punish-
ment was assigned which was due for the crime to
which he testified (Ex. xx. 7; Lev. xiv. 12; Dent.
xix. 16-19; Is. xv. 4; Jer. v. 2, vii. 9; Ex. xiv.
59; Hos. x. 4; Zech. viii. 17). Whether the "swearing" mentioned by Jeremiah (xxiii. 10) and
by Hosea (iv. 2) was false swearing, or profane
abuse of oaths, is not certain. If the latter, the
crime is one which had been condemned by the
Law (Lev. xxiv. 11, 16; Matt. xxvi. 74).

From the Law the Jews deduced many special
cases of perjury, which are thus classified: 1. Jus
jurandum promissorium, a rash and indiscriminate promise
or, rather, false assertion respecting the past (Lev.
v. 4). 2. Viamon, an absurd self-confes-
tionary assertion. 3. Deposti, breach of con-
tract denied (Lev. xiv. 11). 4. Testimoni, judicial perjury
(Lev. v. 1; Nicolau, and Sibyllus, De juramenta,
in Ugolini, Theuravii, xxvi.: Lichtfoot, Hor.
Hebr. on Matt. v. 33, vol. ii. 292; Mishna,
Sibyll. iii. 7, iv. 1, v. 2; Otho, Lex. Robb., art.
"Juramentum").

Women were forbidden to bear witness on oath,
as was inferred from Deut. xix. 17 (Mish. Sib.
v. 1). The Christian practice in the matter of oaths
was founded in great measure on the Jewish. Thus
the oath on the Gospels was an imitation of the Jew-
ish practice of putting the hands on the Book of the
Law (P. Fagius, on Oekol. ed Ex. xxiii. 1: Justini-

Our Lord's prohibition of swearing was clearly
always observed, and understood, at least, by the
Christian Church as directed against profane and careless swearing, not against the serious judicial form (Bingham, Antiq.
Execli. vii. §§ 4, 5; Aug. Fp. 157, c. 40); and
then we find the fourth Council of Carthage (c. 61)
forbidding clerical persons for swearing by created
objects.

The most solemn Mohammedan oath is made on
the open Koran. Mohammed himself used the
form, "by the setting of the stars" (Carlini,
Voy. v. 87; Sale's Koran, iv. p. 437).
OBADIAH

Bedouin Arabs use various sorts of adjurations, one of which somewhat resembles the oath 'by the Temple.' The person takes hold of the middle tent-pole, and swears by the Life of the tent and its owners [Barechard, t.xxxv. 129, ed.]; see another case mentioned by Baruchard, Spiriit, p. 386.

The stringent nature of the Roman military oath, and the penalties attached to infraction of it, are alluded to, more or less certainly, in several places in N. T. e.g. Matt. viii. 9, Acts xii. 13, xvi. 27, xxvii. 42; see also ibidex. Hal. xi. 43, and Ann. col. xiv. 6. [Pfeiffer.] R. W. P.

OBADIAH (י"וָדִיאָה [s vaHt of Jehovah]).

Aβδα: [Vat. Aβδα:] Oδίλιος. The name of Obadiah was probably as common among the Hebrews as Obadiah among the Aramians, both of them having the same meaning and etymology.

1. The sons of Obadiah are enumerated in a corrupt passage of the genealogy of the tribe of Judah (1 Chr. iii. 21). The reading of the LXX, and Vulg. was οβδαϊος, "his son," and of the Peshito Syriac 1οβδατος, "a son of," for οβδατος, "sons of," so that according to the two former versions Obadiah was the son of Aman, and according to the last the son of Josiah.

2. (Αβδαίον; [Vat. corrupt; Alex. Αβδαίον; Oδίλιος.) According to the received text, one of the five sons of Izzah, a descendant of Jesse's and a chief man of his tribe (1 Chr. vii. 25). But, however, are mentioned, and the discrepancy is rested in four of Kennicott's MSS., which omit the words "and the sons of Izzah" thus making Izzah's brother and not father, of Obadiah, and both sons of Uzz. The Syriac and Arabic versions follow the received text, but read "four" instead of "five.

3. (Αβδα: [Vat. Sin. Aβδα:] Oδίλιος.) One of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).

[Αβδα: Vat. Aβδα: Alex. Αβδα:] A Levi, son of Shueniah, and descended from Jeduthun (1 Chr. ix. 16). He appears to have been a principal musician in the Temple choir in the time of Nehemiah (Neh. xii. 23). It is evident, from a comparison of the last-quoted passage with 1 Chr. ix. 15-17 and Neh. xii. 17-19, that the first three names - Mattaniah, and Bakethiah, obadiah, "belong to ver. 24, and the last three, Meshullam, Talmon, Akkub," were the families of porters. The name is omitted in the Vat. MS. [so in Rom. Alex. F. A.] in Neh. xii. 25, where the Codex Frisl.-Aug. [F. A.] has οβδαίον and the Vulg. Oδίλιος. In Neh. xii. 17, Obadiah the son of Shueniah, is called "Amen, the son of Shlemiah."

5. [Vat. F. A Αβδα:] Oδίλιος.) The second in order of the four-famed Gadites, captains of the host, who joined David's standard at Ziklag (1 Chr. xiv. 6). Obadiah.

6. [Αβδα: Vat. Αβδα:] One of the princes of Judah in the reign of Jehoshaphat, who sent by the king to teach in the cities of Judah (2 Chr. xvi. 7).

7. (Αβδα: [Vat. Αβδα:] Οδίλιος.) The son of Jehiel, the son of Josah, who came up in the second census of Ezra, accompanied by 188 of his brethren (Ezra viii. 9). [Abarbanel.]

8. (Αβδα: [Vat. Αβδα:] Oδίλιος.) A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). W. A. W.

9. 'Oβδαιον; [Vat. Οβδαιον; Alex. Αβδαιον; Oδίλιος.] Obadiah. The prophecies of Obadiah are corrected of him except what we can gather from the short book which bears his name. The Hebrew tradition adopted by St. Jerome (In Abd.), and maintained by Abarkhadel and Kimchi, that he is the same person as the Obadiah of Ahab's reign, is as destitute of foundation as another account, also suggested by Abarkhadel, which makes him to have been a converted Idumean, "the hateh., according to the Hebrew proverb, "returning into the wood out of which it was itself taken" (Amerb. In Obad. apud Philostr. Opera, p. 1092, Thr. 1704).

The question of his date must depend upon the interpretation of the 11th verse of his prophecy. He there speaks of the conquest of Jerusalem and the captivity of Judah. If he is referring to the well-known captivity by Nebuchadnezzar he must have lived at the time of the Babylonian Captivity, and have prophesied subsequently to the year B.C. 588. If, further, his prophecy against Edom found its first fulfillment in the conquest of that country by Nebuchadnezzar in the year B.C. 583, we have his date fixed. It must have been uttered at some time in the five years which intervened between these two dates. Jastrow suggests, for an earlier date. He admits that the 11th verse refers to a capture of Jerusalem, but maintains that it may apply to its capture by Shishak in the reign of Rehoboam (1 K. xiv. 25; 2 Chr. xii. 2); by the Philistines and Aramians in the reign of Jehoram (2 Chr. xxi. 16); by Josiah in the reign of Amaziah (2 Chr. xxv. 25); or by the Chaldeans in the reign of Jehoiakim and of Jehoiachin (2 K. xxiv. 2 and 10). The Idumeans might, he argues, have joined the enemies of Judah on any of these occasions, as their invertebrate hostility from an early date is proved by several passages of Scripture, e.g. Joel iii. 19; Am. i. 11. He thinks it probable that the occasion referred to by Obadiah is the capture of Jerusalem by the Ephraimites in the reign of Amaziah (2 Chr. xxv. 25). The utmost force of these statements is to prove a possibility. The only argument of any weight for the early date of Obadiah is his position in the list of the books of the minor prophets. Why should he have been inserted between Amos and Jonah if his date is about B.C. 583? Schmoller seems to answer this question satisfactorily when he says that the prophecy of Obadiah is an amplification of the last five verses of Amos, and was therefore placed next after the book of Amos. Our conclusion is in favor of the later date assigned to him, agreeing herein with that of Pfeiffer, Schmoller, Rosenberg, De Wette, Hendriekan, and Maurer.

The book of Obadiah is a sustained denunciation of the Edomites, melting, as is the wont of the Hebrew prophets (cf. Joel iii., Am. iv.), into a vision of the future glories of Zion, when the arm of the Lord should have wrought her deliverance and have repaid double upon her enemies. Previous to the captivity, the Edomites were in a similar relation to the Jews to that which the Samaritans afterwards held. They were near neighbors, and they were relatives. The result was that intensified hatred which such conditions are likely to produce, if they do not produce cordiality and good will. The Edomites are the types of those who ought to be friends and are not - of those
who ought to be helpers, but in the day of calamity are found "standing on the other side." The prophet first touches on their pride and self-confidence, and then denounces their "violence against their brother Jacob" at the time of the capture of Jerusalem. There is a sad tone of reproach in the form in which he throws his denunciation, with a fuller out with the parallel ratio of the Ezekiel (xxv. and xxxv.), Jeremiah (Lam. iv. 21), and the author of the 157th Psalms, which seem to have been uttered on the same occasion and for the same cause. The psalmist's "Remember the children of Edom, O Lord, in the day of Jerusalem, how they said, Down with it, down with it, even to the ground!" coupled with the immediately succeeding imprecation on Babylon, is a sterner utterance, by the side of which the "Thou shouldest not" of Obadiah appears rather as the sad remonstrance of disappointment. He complains that they looked on and rejoiced in the destruction of Jerusalem; that they triumphed over her and plundered her; and that they cut off the fugitives who were probably making their way through Idumaea to Egypt.

The last six verses are the most important part of Obadiah's prophecy. The vision presented to the prophet is that of Zion triumphant over the Idumaeans and all her enemies, restored to her ancient possessions, and extending her borders northward and southward and eastward and westward. He sees the house of Jacob and the house of Joseph (hence probably denoting the ten tribes and the two) consuming the house of Esau as fire devours stubble (ver. 18). The inhabitants of the city of Jerusalem, now captive at Sepharad, are to return to Jerusalem, and to occupy not only the city itself, but the southern tract of Judaea (ver. 20). Those who had dwelt in the southern tract are to overrun and settle in Idumaea (ver. 19). The former inhabitants of the Philistia country are also to establish themselves in Philistia (ib.). To the north the tribe of Judah is to extend itself as far as the fields of Ephraim and Samaria, while Benjamin, thus displaced, takes possession of Gilgal (ib.). The captives of the ten tribes are to occupy the northern region from the borders of the enlarged Judah as far as Sarepta near Sidon (ver. 20). What or where Sepharad is no one knows.

The LXX., perhaps by an error of a copyist, read "Egypt" instead of "Sepharad." The word is supposed to be a corruption. See Keil, vol. ii. p. 112. Jerome, it is said, informed St. Jerome himself that it was derived from an Assyrian word meaning "bounded" or "limited," and understands it as signifying "scattered abroad." So Manzer, who compares oi en tē diaphorē of Jam. i. 1. Hardt, who has devoted a volume to the consideration of the question, is in favor of Sippar or Sippar in Mesopotamia. The modern Jews pronounce it for Sippar. Schultz is probably right in saying that it is some town or district in Babylon, otherwise unknown.

The question is asked, Have the prophet's denunciations of the Edomites been fulfilled, and has his vision of Zion's glory been realized? Typically, partially, and imperfectly they have been fulfilled, but, as Rosenmuller says, the world is not a fuller accomplishment. The first fulfillment of the denunciation on Edom in all probability took place a few years after its utterance. For we read in Josephus (Ant. x. 9, § 7) that five years after the capture of Jerusalem Nebuchadnezzar reduced the Ammonites and Moabites, and after their reduction made an expedition into Egypt. This he could hardly have done without at the same time reducing Idumaea. A more full, but still only partial and typical fulfillment would have taken place in the time of John Hyrcanus, who utterly reduced the Idumaeans, and only allowed them to remain in their condition of being circumcised and accepting the Jewish rites, after which their nationality was lost forever (Joseph. Ant. xiii. 9, § 1). Similarly the return from the Babylonish Captivity would typically and imperfectly fulfill the promise of the restoration of Zion and the extension of her borders. But "magnificenter sane est ut promissio quam ut ab Solomonis et Maccaebis tempora referunt possit," says Rosenmuller on ver. 21. And "necessitas cogit ut omnium ad predictionem evangelii referatur," says Luther.

The full completion of the prophetic descriptions of the glories of Jerusalem — the future golden age towards which the seers stretched their hands with fond yearnings — is to be looked for in the Christian, not in the Jewish Zion — in the antitype rather than in the type. Just as the fate of Jerusalem and the destruction of the world are interwoven and interpenetrate each other in the prophecy uttered by our Lord on the mount, and his words are in part fulfilled in the one event, but only fully accomplished in the other; so in figure and in type the predictions of Obadiah may have been accomplished by Nebuchadnezzar, Zerubbabel, and Hyrcanus, but their complete fulfillment is reserved for the fortunes of the Christian Church and her adversaries. Whether that fulfillment has already occurred in the spread of the Gospel through the world, or whether it is yet to come (Rev. xx. 4), or whether, being conditional, it is not to be expected save in a limited and curtailed degree, is not to be determined here.

The book of Obadiah is a favorite study of the modern Jews. It is here especially that they read the future fate of their own nation and of the Christian Church. These unseemly in their literature may wonder where the Christians are found in the book of Obadiah. But it is a fixed principle of Rabbinical interpretation that by Edomites is prophetically meant Christians, and that by Edom is meant Rome. Thus Kimchi, on Obadiah, says it down that "all that the prophets have said about the destruction of Edom in the last times has reference to Rome." So Rabbi Bechah, on Is. lxii. 17; and Alarabian has written a commentary on Obadiah resting on this hypothesis as its basis. Other examples are given by Ruxtorf (Lex. Talm. in voc. Ḥiθ suburbis, and Sycophytor Judaeorum). The reasons of this Rabbinical dictum are as various and as ridiculous as might be imagined. Nachmanides, Beelain, and Alarabian say that Janus, the first king of Latium, was grandson of Esau. Kimchi (on Joel i. 19) says that Julius Caesar was an Idumeean. Seclor (ad Chron. Euseb. n. 2162) reports, "The Jews, both those who are comparatively ancient and those who are modern, believe that Titus, the Roman who took Jerusalem, and who, in his denunciation of Idumaea, frequently refer it to Titus." Alen Ezra says that there were no Christians except such as were Idumaeans until the time of Constantine, and that Constantine having embraced their religion the whole Roman empire became entitled Idumeean. St. Jerome says that some of
the Jew read Ἰσραήλ, Rome, for Ἰουδαίος, Dunham, in 15, xxi. 11. Finally, some of the Rabbis, and within them Ababil, maintain that it was the soul of Esau which lived again in Christ.

Obadiah is given to the prophet of Obadiah, when looked at from this point of view, is most curious. The following is a specimen from Ababil on ver. 1: "The true explanation, as I have said, is to be found in this: The Idumaeans, by which, as I have shown, all the Christians are to be understood (for they took their origin from Rome), will go up to holy Jerusalem, which is the seat of holiness, and where the tomb of their first Messiah is, as indeed they have several times gone up already." Again, on ver. 2: "I have several times shown that from Edom proceeded the kings who reigned in Italy, and who built up Rome to be great among the nations and chief among the provinces; and in this way Italy and Greece and all the western provinces became filled with Idumaeans. Thus it is that the prophet calls the whole of that nation, and by the name of Edom." On ver. 8: "There shall be found counsel or wisdom among the Edomite Christians when they go up to that war." On ver. 19: "Those who have gone as exiles into the Edomites', that is, into the Christians' land, and have there suffered affliction, will deserve to have the best part of their country and their metropolis as Mount Sion." On ver. 20: "Sarepta is France; "Sebahar" is Spain. The "Mount of Esau," in ver. 21, is the city of Rome," which is to be judged; and the sacrifices are to be the [Jewish] Messiah and his chieftains, who are to be "judges." The first nine verses of Obadiah are so similar to Jer. xlix. 7, 11, that it is evident that one of the two prophets must have had the prophecy of the other before him. Which of the two wrote first is doubtful. Those who give an early date to Obadiah thereby settle the question. Those who place him later leave the question open, as he would in that case be a contemporary of Jeremiah. Luther holds that Obadiah followed Jeremiah. Schnurre makes it more probable that Jeremiah's prophecy is an altered form of Obadiah's. Eichhorn, Schinz, Rosenmüller, and Maurer agree with him.

* For the commentators on the Minor Prophets see: Assisi: Harkers; Haged. (Amer. ed.), Dr. Purse's unfinished work (Minor Prophets, with a Commentary, 1851), and Dr. Paul Kleinert's Pt. xlv. of Lange's Bibelwerk des A. Test. (1868), contain Obadiah. Other separate writings (see above) are: De La Haye, Obad., in op. 1-4, 1890; Hendekew (Obadiah seferoneh in Israel, 1833), C. P. Caspari (Der Prophet Obadiah, 1842, an important work, pp. 1-115), Dr. Delitzsch (Wann reissigte Obadiah? in Zeitschrift fur luthrische Theologie, 1851, pp. 91-102), and Nagelschast (Herz. Real-Encyk. x. 566 ff.). The epitomized results in the recent O. T. Introductions (Keil 1859 and Bickel 1890) show how wide a field of criticism this shortest book of the O. T. embraces.

Prof. Stuart (Old Test. Canon, p. 493) points out a use of this prophetic fragment which the history of nations shows to be not yet obsolete. "When Edom is held up before my eyes by Obadiah as having been the chief transgressor, in the day of God's humiliation by the power of Babylon; when the embittered enmity, the spirit of vengeance and of rapacity, and the unpeachable meanness of the Edomites, and their consequent punishment, are embodied and made palpable and held up to open view in this way; I am far more affected and even instructed by it, than I am by any abstract precept " which may inculcate the same lesson. 11.

10. (אָבָדָיָה: [Ver. 2, 31: גַּם אֲבָדָיָה וָאֹבָדָיָה. Aβdīāh. eight times, but Aβdīāh, ver. 9: Aβdīān.) An officer of high rank in the court of Ahab, who is described as 'over the house,' that is, apparently, lord high chamberlain, or mayor of the palace (1 K. xviii. 3). His influence with the king must have been great to enable him to retain his position, though a devout worshipper of Jehovah, during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred of them in caves, and fed them there with bread and water. But he himself does not seem to have been suspected (1 K. xviii. 4, 12). The occasion upon which Obadiah appears in the history shows the confidential nature of his office. In the third year of the terrible famine with which Samaria was visited, when the fountains and streams were dried up in consequence of the long-continued drought, and horses and mules were perishing for lack of water, Ahab and Obadiah divided the land between them and set forth, each attended, to search for whatever remnants of herbage might still be left around the springs and in the fissures of the river beds. Their mission was of such importance that it could only be entrusted to the two principal persons in the kingdom. Obadiah was startled on his solitary journey by the abrupt apparition of Elijah, who had disappeared since the commencement of the famine, and now commanded him to announce to Ahab, 'Behold Elijah! He hesi- tated, apparently afraid that his long-concealed attachment to the worship of Jehovah should thus be disclosed and his life fall a sacrifice. At the same time he was anxious that the prophet should not doubt his sincerity, and appealed to what he had done in the persecution by Jezebel. But Elijah only asserted the more strongly his intention of encountering Ahab, and Obadiah had no choice but to obey (1 K. xvi. 7-16). The interview and its consequences belong to the history of Elijah [vol. i. p. 927]. According to the Jewish tradition preserved in Ephrem Syrus (Ascenani, Bibli. Or. Clem. p. 739), Obadiah the chief officer of Ahab was the same with Obadiah the prophet. He was of Shechem in the land of Ephraim, and a disciple of Elijah, and was the third captian of fifty who was sent by Ahaziah (2 K. i. 13). After he left the king's service, prophesied, died, and was buried with his father. The "certain woman of the wives of the sons of the prophets." who came to Elisha (2 K. iv. 1) was, according to the tradition in Rashi, his widow.

11. (Aβbēsars: [Ver. 3, 5: Αββέσαρ.] The father of Ishmaiah, who was chief of the tribe of Zebulon in David's reign (1 Chr. xxvii. 19).
OBAL

12. [AS'has, Vat. A'Sheesa.] A Merarite Levite in the reign of Josiah, and one of the overseers of the workmen in the restoration of the Temple (2 Chr. xxvii. 12). W. A. W.

OBAL (אָבָל) [bold, brave, as said of a country, Dietr.]: Edom (Comp. ʾEdám; Edán). A son of Joktan, and, like the rest of his family, apparently the founder of an Arab tribe (Gen. xii. 25), which has not yet been identified. In 1 Chr. i. 22 the name is written Edom (אֵדָם; Alex. ʾEdán; Heb.), which Knobel (Genæis) compares with the Gebalites of Phoen, a tribe of southern Arabia. The similarity of the name with that of the Edomites, a troglodyte tribe of East Africa, induced Bochart (Phæog. ii. 23) to conjecture that Obal migrated thither and gave his name to the Sinus Abilites or Abilites of Phoen (vi. 34).

W. A. W.

OBDIA (אָבְדִיָּה; [Vat. OBDIA] Obdi). Probably a corruption of Obed, the form in which the name Hâlibah appears (comp. 1 Esdr. v. 38 with Ezr. ii. 61).

OBED (אֹבֶד) [he who serves, se. Jehovah, Geis, Forst.]: Aḇēḏ; Alex. in 1 Chr., and N. T. ed. Laehm. Tisch. Treg.-[Vat.]. Obèd. 1. Son of Boaz and Ruth the Moabitess (Ruth iv. 17). The circumstances of his birth, which make up all that we know about him, are given with much beauty in the book of Ruth, and form a most interesting specimen of the residences and social life of the Israelites in the days of Elî, which a comparison of the genealogies of David, Samuel, and Abibath shows to have been about the time of his birth. The famine which led to Elîmlech and his sons migrating to the land of Moab may naturally be assigned to the time of the Philistine inroads in Elî's old age. Indeed there is a considerable resemblance between the circumstances described in Hannah's song (1 Sam. ii. 5), "They that were hungry ceased, so that the barren hath borne seven," and those of Obel's birth as pointed at, Ruth i. 6, and in the speech of the women to Naomi: "He shall be unto thee a restorer of thy life, and a nourisher of thine old age; for thy daughter-in-law which loveth thee, which is better to thee than seven sons, hath borne him;" as well as between the prophetic saying (1 Sam. ii. 7), "The Lord maketh poor, and maketh rich: he bringeth low, and lieth up. He raiseth up out of the dust, and lieth up the beggar from the dunghill, to set them among princes, and to make them inherit the throne of glory:" and the actual history of the house of Elîmlech, whose glory was prayed for by the people, who said, on the marriage of Ruth to Boaz, "The Lord make the woman that is come into thine house like Rachel and like Leah, which two did build the house of Israel, and do thou worthily in Ephrathah, and be famous in Bethlehem." The direct mention of the Lord's Christ in 1 Sam. ii. 10, also connects the passage remarkably with the birth of that child who was grand- father to King David, and the lineal ancestor of Christ to Boaz. The name of Obel occurs only in Ruth iv. 17, and in the four genealogies, Ruth iv. 21, 22; 1 Chr.

ii. 12; Matt. i. 5; Luke iii. 32. In all these five passages, and in the first with peculiar emphasis he is said to be the father of Jesse. It is incredible that in David's reign, when this genealogy was compiled, his own grandfather's name should have been forgotten, and therefore there is no escape from the conclusion that Obel was literally Jesse's father and that we have all the generations recorded from Nahshon to David. [Jesse; Naushon.] A. C. H.

2. (Alex. [Adj.] ʾEdḇêd.) A descendant of Jarcha, the Egyptian slave of Sheshan in the line of Jerahmeel. He was grandson of Zabad, one of David's mighty men (1 Chr. xii. 37, 38).

3. (ʾEdḇêd; [Vat. ʾEbd; F. ʾEbdab]; Comp. ʾΩbdês.) One of David's mighty men (1 Chr. xi. 47).

4. (ʾΩbdês; Alex. ʾΩbdês.) One of the gatekeepers of the Temple: son of Sennâiah the first-born of Obed-edom (1 Chr. xxvi. 7).

5. (Alex. ʾΩbdês.) Father of Azariah, one of the captains of hundreds who joined with Jehoiada in the revolution by which Athaliah fell (2 Chr. xiii. 1).

W. A. W.

OBED-EDOM (אֹבֶד-אֶדומ) [servant of Edom]: ʾAḇēḏʾēdōm in Sam. [and 1 Chr. xiii. 14, 14]. ʾΩbdēa in [Vat. F. ʾAṣbādōn in [1 Chr. xxvi. 21; 32]. Obed in 2 Sam. v. 11; [Vat. ʾAṣbēdōw. AV. -a; in 1 Chr. xiii. 14:] Obed-edom. 1. A Levite, apparently of the family of Kohath. He is described as a Gittite (2 Sam. vi. 10, 11), that is, probably, a native of the Levitical city of Gath-Rimon in Manasseh, which was assigned to the Kohathites (Josh. xxii. 25), and is thus distinguished from "Obed-edom the son of Jeduthun," who was a Merarite. After the death of Uzzah, the ark, which was being conducted from the house of Almabah in Gibeah to the city of David, was carried aside into the house of Obed-edom, where it continued three months, and brought with its presence a blessing upon Obed-edom and his household. Hearing this, David, at the head of a large choir of singers and minstrels, clothed in fine linen, and attended by the elders of Israel and the chief captains, "went to bring up the ark of the covenant of Jehovah out of the house of Obed-edom with joy" (1 Chr. xv. 25; 2 Sam. vi. 12).

2. [ʾAṣbēdēa; Vat. F. in 1 Chr. v. 5, 38, ʾAṣbēdōu; so Vat. xxvi. i, 4, 15, and Alex. v. 38, xxvi. 4, 8, and 15 once; F. 1 Chr. xv. 18, ʾAṣbēdōu; Vat. 2 Chr. xxvi. 31, ʾΩbdēsō; Comp. generally ʾΩbdēs ʾEdḇēd.] "Obed-edom the son of Jeduthun" (1 Chr. xxxii. 28), a Merarite Levite, appears to be a different person from the last mentioned. He was a Levite of the second degree and a gate-keeper for the ark (1 Chr. xv. 24, 28), appointed to sound "with harps on the Sheminith to excite" (1 Chr. xxvi. 21, 5). With his family of seven [eight] sons and their children, "mighty men of valor" (1 Chr. xxvi. 4-8), he kept the South Gate (1 Chr. xxvi. 15) and the house of Asaph. There is one other person, which we hope to imply that Obed-edom the gate-keeper and Obed-edom the Gittite may have been the same. After enumerating his seven [eight] sons the chronicler
OBETH

(1 Chr. xxvi. 5) adds, "for God blessed him," referring apparently to 2 Sam. vi. 11, "the Lord blessed Obed-edom and all his household." The family remained at a much later time as keepers of the vessels of the Temple in the reign of Amaziah (2 Chr. xxiv. 21). W. A. W.

O'Beth (Ὠβῆθ: [Vat. Οβῆθις] orm. in Vulg.; Latrius, son of Jonathan is so called in 1 Esdr. viii. 32.)

OIII. (Ὠβῆθi: [Compl. Ὠβῆθi: Ulithi.] An Ishmaelite who was appropriately appointed keeper of the herds of camels in the reign of David (1 Chr. xxvii. 30). Lachart (Herv. p. 1, ii.) conjectures that the name is that of the office, abīl in Arabic denoting "a keeper of camels."

OBELATION. [Sacrifice.]

O'Both (Ὠβῆθis [hollow press, Furst.]: Ὠβῆθi: [Vat. in Num. xxxviii. Ὠβῆθi: Oboth.]), one of the encampments of the Israelites, east of Moab (Num. xxxvi. 10, xxxvi. 43). Its exact site is unknown. [Wilderness of the Wandering.]

* OCCUPY occurs in the sense of "to use," Exod. xxxviii. 24, Judg. xxi. 11, and especially, "to use in trade," as money, or "to deal in," as merchandise, Ez. xxii. 9, 2 Esdr. xxiv. 42; hence, intransitively, "to trade" or "traffic," Ez. xxvii. 16, "they occupied in thy fairs with emeralds, purple," etc.; so Ez. xxvii. 19, 21, 22; Luke xix. 13. These uses of the word were formerly common. So "the occupiers of the merchandise," Ez. xxvii. 27, means "the traders in thy merchandise." A.

* OCCURRENCE = "occurrence," 1 K. v. 4. A.

Ochiel (Ὀχίελ: Alex. Οχήλας: Ocheil.) The form in which the name appears in 1 Esdr. i. 9 (comp. 2 Chr. xxxvii. 9). The Geneva version has Chieleus.

Ocidulus (Ὠκίδουλος: [Vat. Οκίδουλος] Alex. Οκίδουλος: Jusso, Redius.) This name occupies, in 1 Esdr. ix. 22, the place of Jezalad in Esr. x. 22, of which it is a manifest corruption. The original name is more clearly traced in the Vulgate.

OCINNA ([Rom. Ὄκινα: Vat.] Ocinna, and so Alex.: [Sinis and] Vulg. omit). "Soar and Ocinna" are mentioned (Jude, ii. 28) among the places on the sea-coast of Palestine, which were fortified at the approach of Holofernes. The names seem to occur in a regular order from north to south; and as Ocinna is mentioned between Soar (Tyre) and Jemmam (Jabneh), its position agrees with that of the ancient Acco, now Akko, and in medieval times sometimes called Acon (Brocardus; William of Tyre, etc.).

OCRAN (Ὠκραν [troubler or troubled]): Ὠχραν: (Ocran.) The father of Fachiel, chief of the tribe of Asher after the Exodus (Num. i. 43; ii. 27, vii. 72, 77, x. 29).

ODEL (周恩 of erecting, confirming) Ὠδῆ: Alex. Ἀδᾶς and so Rom. Vat. in ver. 8: Ὠδῆ. 1. The father of Azariah the prophet in the reign of Asa (2 Chr. xv. 1). In 2 Chr. xiv. 8, the prophecy in the preceding verses is attributed to him, and not to his son. The Alex. MS. and the Vulgate retain the reading which is probably the true one, "Azariah the son of Odel." These are supported by the Pesh. and Syriac, in which "Azor" is substituted for Odel.

2. (Ὠδῆς) A prophet of Jehoshaphat in Samaria, at the time of Pekah's invasion of Judah. Josephus (Ant. ix. 12, § 2) calls him Ὠδῆ. On the return of the victorious army with the 200,000 captives of Judah and Jerusalem, Odel met them and preceded upon them to let the captives go free (2 Chr. xxviii. 9). He was supported by the chivalrous feelings of some of the chiefs of Ephraim; and the narrative of the restoration of the prisoners, fed, clothed, and anointed, to Jericho, the story of garments, is a pleasure episode of the last days of the northern kingdom. W. A. W.

ODELAM (Ὠദῆλαμ: Odelam). The Greek form of the name ADULAM; found in 2 Macc. xii. 38 only. Adulam is stated by Eusebius and Jerome (Onomast. Adulam) "to have been in their day a large village, about 10 miles east of Bethhepolis; and here (Beth jibrin or Eleutheropolis) a village with the name of Bet Didea (Toled. Beth hehem, p. 29; Brit. Acad., p. 151) or Bet Uba (Robinson, 1st ed. App. p. 117) now stands. The obstacle to this identification is not that Adulam, a town of the Shefeloth, should be found in the mountains, for that puzzling circumstance is not unfrequent (comp. Keflah, etc., i. 1529 o), so much as that in the catalogue of Joshua xv. it is mentioned with a group of towns (Zorah, Sechach, etc.) which lay at the N. W. corner of Judah, while Bet Didea is found with these (Nitzah, Keihah, etc.) of a separate group, farther south.

Further investigation is requisite before we can positively say if there is any cavern in the neighborhood of Bet Didea answering to the "cave of Adulam." The cavern at Khueriat, a 3 miles south of Bethlehem, usually shown to travellers as Adulam, is so far distant as to put it out of the question that the statement of Jerome is to be repeated. It is the cavern in the wilderness of Engedi, in which the adventure b of Saul and David (1 Sam. xxiv.) occurred. Everything that can be said to identify it with the cave of Adulam has been said by Dr. Bonar (Land of Promise, pp. 218-50); but his strongest argument — an inference, from 1 Sam. xxiii. 1, in favor of its proximity to Bethlehem — comes into direct opposition with the statement of Jerome quoted above, which it should be observed is equally opposed to Dr. Robinson's proposal to place it at Heir-Dubbain. [See ADULAM, Amer. ed.]

The name of Adulam appears to have been first

\* Dr. Bonar has suggested to us that the name Khueriat represents the ancient Haruth (Koreith). This is ingenious, and may be correct; but Toled (Toerkeken, etc., pp. 222, 223) has made out a strong case for the name being the Churion, or Churchion, a famous Essex hermit of the 4th or 4th century, who founded a Laura in the cavern in question. (See Acta Sanct. Sept. 28.)

\* Van de Veule (Syr. p. 71, ii. 33) illustrates this

saw nothing of them."
**ODONARKES**

G. T. Neh. A. Ez. KaSeo-TaneVo, Kom. does in stumbling-block smooth, Mark of roTTopxi? "if fend.]

**B. F. W.**

*OFFENCE* occurs in several passages of the A. V. as the rendering of the Heb. מֵבְּלוּי, 'a stumbling-block,' or of the Gr. σκάβαλος, προθύσκομαι, προστύθηκα, and is used in such a way as not to suggest the proper meaning to the common reader. Thus the declaration in Is. viii. 14, 'he shall be for a stone of stumbling and a rock of offence ('a rock to strike against,' Noyes) to both the houses of Israel,' describes the ruinous consequences rather than the fact of the unbelief and disobedience of the Jews; comp. ver. 13, and Jer vii. 21; Ez. iii. 20. In Matt. xvi. 20, 'then art an offence to me,' is literally 'then art my stumbling-block' (so Noyes); 'thou wouldst cause me to fall.' (Norton.) In Matt, xvii. 7, and Luke xvii. 1 'offence' (σκάβαλος) means an occasion of sin, or a hindrance to the reception of Christ; see the context. To eat 'with offence' (δια προστύθηκας, Rom. xiv. 20) is so to eat as to be an occasion of sin to the weaker brother. [Or vex.]

*OFFEND,* from the Latin offendō, "to strike against," like OFFENCE (which see) is used in the A. V. in senses which we do not now associate with the word, though they are naturally derived from its primitive meaning. 'Great peace have they who love thy law, and nothing shall offend them' (Ps. cxix. 163); lit. 'there is no stumbling-block to them,' i. e. their path shall be smooth, no evil shall befall them. In Matt. v. 29 ('if thy right eye offend thee'), 39, xxvii. 6, 8, 9, Mark iv. 42, 43, 45, 47, 'to offend' (σκάβαλαλίζειν) means 'to lead into sin,' literally, 'to be in a stumbling-block to,' 'to cause to fall.' Similarly, in Matt. xxxii. 21, xiviv. 10, xxvi. 33; Mark iv. 17, xiv. 27, 39; John xvi. 1, 'to be offended' does not suggest to the common reader the meaning of σκάβαλαλίζεται, which would in these passages be better translated 'to fall away.' In Rom. xiv. 21 and 2 Cor. xi. 29 the rendering of the A. V. is likewise misleading.

**A. OFFERINGS.** [Sacrifice.]

1. ἔνδοξος, Νασαή, Vulg. super annos, from βίβλος, to place.
2. From same, ἐνδώξος, part. plur. in Niph. καθέσατεςαυτον, prefect, 1 K. iv. 7.
3. ἔνδοξος. Gen. xl. 2, εὔνοος. [Eusebi.]
4. ἐνδόξος. Esth. ii. 3, κομφραγς; Gen. xlii. 33, ἐνδόξος; Neh. xg. 9, ἐπάσσως; præpositus; A. V. 'overseer.'
5. ἐνδόξος, προποτάς, conser. for abstr.; properly, office, like 'authority.' ' in Eng. Both of these words (4) and (5) from ἐνδόξος. 'visit.'
6. ἐπίδοξος, φρευτής, Esth. i. 8, joined with ἐνδόξος. Dan. i. 3.

**OG** 2209

It is obvious that most, if not all, of the Hebrew words rendered "officer," are either of an indefinite character, or are synonymous terms for functionaries known under other and more specific names, as with "scribe," "counselor," etc. The two words so rendered in the N. T. each bear in ordinary Greek a special sense. In the case of ἰσημέτρος this is of no very definite kind, but the word is used to denote an inferior officer of a court of justice, a messenger or bailiff, like the Roman vistor or lector. Πράκτορις at Athens were officers whose duty it was to register and collect fines imposed by courts of justice; and "deliver to the officer" (in the word) means, give the name of the debtor to the officer of the court (Demosthenes or Dinarchus) c. Theocr. p. 1218, Reiske; Dict. of Antiq. "Prac- tores," "Hyperctor"; J. L. P. xi. 114; De- nosth. c. Aristotle, p. 778; Selden. c. Timarch, p. 5. Grotsius, on Luke xii. 58.

Josephus says, that to each court of justice among the Jews, two Levites "were to be attached as clerks or secretaries, Ant. iv. 8, § 14. The Mishna also mentions the crier and other officials, but whether these answered to the officers of Josephus and the N. T. cannot be determined. Selden, from Maimonides, mentions the high estimation in which such officials were held. Sakeh, 4. 3, vi. 1; Selden, de Synedr. ii. 13, 11. [Punishments; Sergeants.]

The word "officer" is used to render the phrases ὁ ἀρχιερής (or ἀρχιερεύς), 1 Mac. x. 41, xiii. 37, in speaking of the revenue officers of Demetrius. It is also used to render λειτουργοί, Ecles. x. 2, where the meaning is clearly the subordinates in a general sense to a supreme authority.

H. W. P.

OG (Antelope) is an Amoritish king of Bashan, whose rule extended over sixty cities, of which the two chief were Ashtaroth-Karnaim and Edrei (Jos. xiii. 12). He was one of the last representatives of the giant race of Rehaim. According to eastern traditions, he escaped the deluge by wading beside the ark (Sale's Korn ch. v. p. 86). He was supposed to be the largest of the sons of Anak, and a descendant of Ad. He is said to have lived no less than 3,000 years, and to have refused the warnings of Jethro (Shoub), who was sent as a prophet to him and his people (O'Herbert, c. 1776, "Elisha," 1 Anak). Sei- cuth wrote a long book about him and his race, chiefly taken from Rabbinic traditions, and called

7. ἰσημέτρος, part. from ἰσημέτρης, "cut," or "inscribe," Ex. v. 6, γραμματεῖς, exaezer; Num. xi. 16, γραμματεῖς, Deut. xvi. 13, γραμματειασιόν, scribe, Jos. i. 10, princeps.
8. The word "officer" is also used, Esth. ix. 3, to render ἱσημετρός, which is joined with θυρίς, marg. "those that did the business," γραμματεῖς, pro- curators.

In N. T. "officer" is used to render, (1) ἤτταρής, minister, (2) πράκτορις, Luke xii. 58, exaezer.
9. Παραδούσαν τὸ πράκτορις. [Pract. is used in LXX. to render ἱσημετρός, Is iii. 12; A. V. "oppressor," one who persecutes by ex- action.
10. ὁ ἰσημέτρης.
OIL

Og fi khaber Aong (bl. s. v. "Aug"). See, too, the Journal Asiatic for 1841, and Chronique de Timbucto trad. par Delouze, i. 48, f. (Ewald, Gesich. i. 306).

Passing over these idle fables, we find from Scripture that he was, with his children and his people, defeated and exterminated by the Israelites at Edrei, immediately after the conquest of Sihon, who is represented by Josephus as his friend and ally (Joseph. Ant. iv. 5, § 3). His sixty proud fenced cities were taken, and his kingdom assigned to the Reubenites, Gadites, and half the tribe of Manasseh (Deut. iv. 13-14; Num. xxxi. 33). Also Deut. i. 4, iv. 47, xxxvi. 4; Josh. ii. 10, ix. 10, xiii. 12, 30). The giant stature of Og, and the power and bravery of his people, excited a dread which God himself alleviated by his encouragement to Moses before the battle; and the memory of this victory lingered long in the national memory (Ps. cxxxv. 11, exxvi. 29).

The belief in Og's enormous stature is corroborated by an appeal to a relic still existing in the time of the author of Deut. iii. 11. This was an iron bedstead, or tier, preserved in "Babith of the children of Ammon." How it got there we are not told; perhaps the Ammonites had taken it in some victory over Og. The verse itself has the air of a later addition (Dathie), although it is of course possible the Hebrews may have heard of a curiously large relic as this long before they conquered the city where it was treasured. Babith was first subdued in the reign of David (2 Sam. xii. 29); but it does not therefore follow that Deut. iii. 11 was not written till that time (Havemeyer ad loc.). Some have supposed that this was one of the common flat beds [Beds] used sometimes on the homesteads of eastern cities, but made of iron instead of palm-branches, which would not have supported the giant's weight. It is more probable that the words "

אש האב, e.g. "bedstead," mean a "sarcophagus of black basalt," a rendering of which they undoubtedly admit. The Arabs still regard black basalt as iron, because it is a stone "ferro coloris atque ductilitatis" (Plin. xxxvi. 11), and "contains a large percentage of iron." (Linn.) It is most abundant in the Hebran; and indeed is probably the cause of the name Argod (the stony) given to a part of Og's kingdom. This sarcophagus was 9 cubits long, and 4 cubits broad. It does not of course follow that the bed was 15 ft. high. Maimonides (More Nebuchim, ii. 48) sensibly remarks that a bed (supposing a bed to be intended) is usually one third [?] longer than the sleeper; and Sir J. Chardin, as well as other travellers, have observed the ancient tendency to make mummies and tombs far larger than the natural size of men, in order to leave an impression of wonder.

On the legend of Og may be found in Benveniste on Num. xxxi. 33, Midrash Jalkut, ed. 15 (quoted by Ewald), and in Mohammedan writers; as that one of his bones long served for a bridge over a river; that he roasted at the sun a fish freshly caught, etc. An apocryphal Book of King Og, which probably contained these and other traditions, was condemned by Pope Gelasius (Decret. vi. 15, Sixt. Senensis, Bibl. Sacra, p. 86). The origin of the name is doubtful: some, but without any probability, would connect it with the Greek Ogyges (Ewald, Gesich. i. 306, ii. 293). F. W. F.

* OFTENS in the expression "often infirmities," 1 Tim. v. 23, is an adjective, and not an improper use of the adverb, as some allege. Its restricted adverbial sense belongs to a later period than king James's time. See Trench, Authorised Version, p. 60 (1859).

O'HAD (♂) [pater]: Aza': [Vat. Iooz] and Alex. Iacaz in Ex.: (Hades), One of the six sons of Simeon (Gen. xvi. 10; Ex. vi. 15). His name is omitted from the lists in 1 Chr. iv. 24 and Num. xxvi. 14, though in the former passage the Syrac uses ὅ아θ, Obor, as in Gen. and Ex.

OHEL (♂) [tent]: Oa': [Vat. Oa|za] (Hades). As the text now stands OHEL was one of the seven sons of Zeruiahel, though placed in a group of five who for some cause are separated from the rest (1 Chr. iii. 20). Whether they were by a different mother, or were born after the return from Babylon, can only be conjectured.

OIL. (1.) Of the numerous substances, animal and vegetable, which were known to the ancients as yielding oil, the olive-berry is the one which most frequent mention is made in the Scriptures. It is well known that both the quality and the value of olive-oil differ according to the time of gathering the fruit, and the amount of pressure used in the course of preparation. These processes, which do not essentially differ from the modern, are described minutely by the Roman writers on agriculture, and to their descriptions the few notices occurring both in Scripture and the rabbinical writings, which throw light on the ancient oriental method, nearly correspond. Of these descriptions the following may be taken as an abstract. The best oil is made from fruit gathered about November or December, when it has begun to change color, but before it has become black. The berry in the more advanced state yields more oil, but of an inferior quality. Oil was also made from unripe fruit by a special process as early as September or October, while the harder sorts of fruit were sometimes made by a process laid down by Euclid in February or March (Virg. Georgy, ii. 59); Fulhnam, R. R. xii. 4; Celuniua, R. R. xii. 47, 50; Tate, R. R. 63; Hony, N. X. xxv. 1-8; Varro, R. R. 1. 55; Her. 2 Sar. ii. 46.)

1. Gathering.—Great care is necessary in gathering, not to injure either the fruit itself or the boughs of the tree; and with this view it was either gathered by hand or shaken off carefully with a light rod or stick. The "hanging" of Deut. xxiv. 20 (margin.) corresponds to the "shaking" of Is. xvi. vii. 6, xxiv. 13, i. e., a subsequent beating for the use of the poor. See Mishna, "shaking olive-juice from oil produced from other sources. Also sometimes in A. V. "ointment" (Cesius, Herod. ii. 257).

2. 2. 7, from 1, "pressed juice," ὀλαίν, ὀλαίων, ὀλάιων, clear olive-oil, as distinct from...

3. ὀλαία, 71, Chal. ὀλαίον, ὀλάιον, only in Ez. vi. 9, vii. 22.

b. 7, ὀλίβου, καλαμάρας, καλαμαράς.
OIL

Shebith, iv. 2; Peah, vii. 2, viii. 3. After gathering and careful cleansing, the fruit was either at once carried to the press, which is recommended as the best course; or, if necessary, laid on tables with hollow trays made sloping, so as to allow the first juice (Amureca) to flow into other receptacles beneath; care being taken not to heap the fruit too much, and so prevent the free escape of the juice, which is injurious to the oil though itself useful in other ways (Colum. u. s. xii. 50; Aug.-Civ. Dei. i. 8, 4, 2).

2. Pressing.—In order to make oil, the fruit was either bruised in a mortar, crushed in a press loaded with wood or stones, ground in a mill, or trodden with the feet. Special buildings used for grape-pressing were used also for the purpose of olive-pressing, and contained both the press and the receptacles for the pressed juice. Of these processes, the one least expedient was the last (treading), which perhaps answered to the "canalis et solus," mentioned by Columella, and was probably the one usually adopted by the poor. The "besten" oil of Ex. xxvii. 20; Lev. xxiv. 2, and Ex. xxix. 40; Num. xxviii. 5, was probably made by bruising in a mortar. These processes, and also the place and the machine for pressing, are mentioned in the Nishan. Oil-mills are often made of stone, and turned by the current of water; others consist of a cylinder enclosing a beam, which is turned by a camel or other animal. An Egyptian olive-press is described by Niebuhr, in which the pressure exerted on the fruit is given by means of weights of wood and stone placed in a sort of box above. Besides the above cited Scripture references, the following passages mention either the places, the processes, or the machines used in olive-pressing: Mic. vi. 15; Joel ii. 24, iii. 13; Is. xxvii. 3; Lam. ii. 15; Hag. ii. 16; Menoch. viii. 4; Shebith, iv. 9, vii. 6 (see Ges. p. 179, s. v. 72); Terum. x. 7; Shabb. i. 9; B'ta'a Botthia, iv. 5; Ges. pp. 531, 725, 848, 1006; Vitruvius, xvi. 1; Cato, R. R. 39; Petrus, Hierc. ii. 348, 359; Niebuhr, Vog. v. 122, pl. xxiv.; Arundel, Anti Minor, ii. 196; Wellsted, Trav. ii. 430. [GETHESEMANE.]

3. Kepting.—Both olives and oil were kept in jars carefully cleansed; and oil was drawn out for use in horns or other small vessels (Cruse). These vessels for keeping oil were stored in cellars or storehouses; special mention of such repositories is made in the inventories of royal property and revenue (1 Sam. x. 1, xvi. 1, 13; 1 K. i. 29, xvii. 16; 2 K. iv. 2, 6, ix. 1, 3; 1 Chr. xxvii. 28; 2 Chr. xi. 32, xxii. 28; Prov. xxi. 20; Shebith, v. 7; Celium, i. 5, xvii. 12; Columella, l. c.).

Oil of Tekoa was reckoned the best (Menoch. viii. 8). Trade in oil was carried on with the Tyrians, by whom it was probably often reexported to Egypt, whose olive does not for the most part produce good oil. Oil to the amount of 20,000 baths (2 Chr. ii. 10; Joseph. Ant. viii. 2, § 9), or 20 measures (avra, 1 K. v. 11) was among the supplies furnished by Solomon to Hiram. Direct trade in oil was also carried on between Egypt and Palestine (1 K. v. 11; 2 Chr. ii. 10, 13; Ezr. iii. 7; Is. xxx. 6, 8, 9; Ez. xxvii. 17; Hos. xii. 1; S. Hieronym. Com. in Oesc. ili. 12; Joseph. Ant. vii. 2, § 9; B. J. ii. 21, § 2; Strabo, xvii. p. 890; Pliny, iv. 4, 13; Wilkinson, iii. 202; see Ptol. c. l. ed.; Hasselquist, Trav. pp. 53, 117). [COMMERCIA: WEIGHTS AND MEASURES.] (ii.) Besides the use of olives themselves as food

common to all oil-producing countries (Hor. 1 Od. xxxi. 13; Martial, xiii. 66; Arriuex, True. ii. 123; Strab. xxxii. 9, 4); the principal uses of olive-oil may be thus stated.

1. As food. — Dried wheat, boiled with either butter or oil, but more commonly the former, is a common dish for all classes in Syria. Hasselquist speaks of bread baked in oil as being particularly sustaining; and Faber, in his Flavurium, mentions eggs fried in oil as Saracen and Arabian dishes. It was probably due to the account of the common use of oil in food that the "meat-offerings" prescribed by the Law were so frequently mixed with oil (Lev. ii. 4, 7, 15, viii. 26, 31; Num. vii. 19, and fol.; Deut. xii. 17, xxxii. 13; 1 K. xvii. 12, 15; 1 Chr. xiii. 40; Ex. xvi. 13, 19; S. Hieronym. Vit. S. Hieron. e. 11, vol. ii. p. 32; Ibn Batuta, Trav. p. 60, ed. Lee: Volney, Trav. i. 392, 401; Russel, Aleppo, i. 80, 119; Harmer, Obs. i. 471, 474; Shaw, Trav. p. 323; Bertrandou de la Broqueirre, Emily Trav. p. 332; Burchhardt, Trav. in Arab. i. 54; Notes on Bed. i. 50; Arriuex, l. c.; Chardin, Vog. iv. 84; Niebuhr, Vog. ii. 302; Hasselquist, Trav. p. 132; Faber, Evangelistum, vol. i. p. 197, ii. 152, 415. [FOOD; OFFERING.]

2. Cosmetics. — As is the case generally in hot climates, olive-oil was used by the Jews in cleansing the body, e. g. after the bath, and giving to the skin and hair a smooth and comely appearance, e. g. before an entertainment. To be deprived of the use of oil was thus a serious privation, assumed voluntarily in the time of mourning or of fasting. At Egyptian entertainments it was usual for a servant to anoint the head of each guest, as he took his seat [OXYNTUM] (Deut. xxvii. 31; 2 Sam. xi. 23; Ruth iii. 3; 2 Sam. xxii. 20; Ps. xxiii. 5, xiv. 10, civ. 15; Dan. x. 3; Is. iii. 3; Mic. vi. 15; Am. vi. 6; Sis. 17; Luke vii. 40). Strabo mentions the Egyptian use of castor-oil for this purpose, xviii. 824. The Greek and Roman usage will be found mentioned in the following passages: Hom. ii. x. 371, xvii. 596, xxiii. 283; Od. vii. 107, vi. 90, x. 364; Hor. 5 Od. xiii. 61; 1 Sot. vii. 129; 2 Sot. i. 8; Pliny, xiv. 22; Aristoph. Wasps, p. 698, Clouds, p. 815; Roberts, pl. 164; Butler, as is noticed by Pliny, is used by the negroes and the lower class of Arabs for the like purposes (Pliny, xi. 41; Burchhardt, Trav. i. 534; Nebias, p. 215; Lightfoot, Hor. Hebr. ii. 375; see Deut. xxxii. 21; Job xix. 6; Ps. vi. 18). The use of oil preparatory to athletic exercises, customary among the Greeks and Romans, can scarcely have had place to any extent among the Jews, who in their earlier times had no such contests, though some are mentioned by Josephus with censure as taking place at Jerusalem and Caesarea under Herod (Hor. 1 Od. vii. 8; Pliny, xv. 4; Athenaeus, xv. 34, p. 686; Hom. Od. vi. 79, 215; Joseph. Ant. xv. 8, § 1, xvi. 5, § 1; Dict. of Antiq. "Alipitev").

3. Pharmaceutical. — The bodies of the dead were anointed with oil by the Greeks and Romans, probably as a partial antiseptic, and a similar custom appears to have prevailed among the Jews (II. xxv. 587; Virg. Aen. vi. 219). [ANOSION; BURIAL.]

4. Medicinal. — As oil is in use in many cases in modern medicine, so it is not surprising, that it should have been used in the same for Jews and other nations of antiquity for medicinal purposes. Celsius repeatedly speaks of the use of oil, especially old oil, applied externally with friction in favor.
OIL

and in many other cases. Pliny says that olive-oil is good to warm the body and fortify it against cold, and also to cool heat in the head, and for various other purposes. It was thus used previously to taking cold baths, and also mixed with water to make oil-baths. Josephus mentions that among the remedies employed in the case of Herod, he was put into a sort of oil bath. Oil mixed with wine is also mentioned as a remedy used both inwardly and outwardly in the disease through which the soldiers of the army of Elmus Gallus were affected, a circumstance which recalls the use of a similar remedy in the portable of the gods in the temple. It is said that John the Baptist exhibited to the use of oil as ointment in medical treatment; and it thus furnished a fitting symbol, perhaps also an efficient remedy, when used by our Lord’s disciples in the miraculous cures which they were enabled to perform. With a similar intention, no doubt, its use was enjoined by St. James, and, as it appears, practiced by the early Christian Church in general. An instance of cure through the medium of oil is denoted by Tertullian. The medi-inual use of oil is also mentioned in the Mishna, which thus exhibits the Jewish practice of that day. See, for the various instances above named, Is. i. 6; Mark vi. 13; Luke x. 34; James v. 14; Josephus, Ant. xvii. 6, § 5; R. J. i. 33, § 5; Shabb. xiii. 4; Oecumen. Eccl. Hist. iv. 9; Corn. a Lap. on James v.; Tertull. ad Sept. c. 3; Celsus, De Mol. ii. 14; ii. 17; iii. 6, 9, 18, 22, iv. 2; Iov. 2; Sueton, i. 7; Phleg. iv. 11, 17, xxiii. 3, 4; Dio Cass. lii. 29; Lightfoot, H. ii. 10, 304, 444; S. Hieronym. L. c.

5. Oil for light.—The oil for "the light" was expressly ordered to be olive-oil, beaten, i.e., made from olives bruised in a mortar (Ex. xxv. 6, xxvii. 21; xlvi. 28; Lev. xxiv. 2; 2 Chr. xxi. 11; i Sam. iii. 2; Ezek. iv. 3, 12; Mishna, Demai, i. 3; Menach. viii. 4). The quantity required for the longest night is said to have been 1/2 log (13.79 cubic in. = 1/246 of a pint), Menach. ix. 3; Ostro, Lec. Rabb. p. 159. [CANDLESTICK.] In the same manner the great lamps used at the Feast of Tabernacles were fed (Schoen. v. 2). Oil was used in general for lamps; it is used in Egypt with cotton wicks twisted round a piece of straw; the receptacle being a glass vessel, into which water is first poured (Matt. xvi. 1-8; Luke xii. 35; Luke, Mol. Egyp. i. 201).

6. Ritual.—(a.) Oil was poured on, or mixed with the flour or meal used in offerings.

(i.) The consecration offering of priests (Ex. xxix. 2, 23; Lev. vi. 15, 21).

(ii.) The offering of the "leaven oil" with flour, which accompanied the daily sacrifice (Ex. xxix. 40).

(iii.) The offering at the purification of a leper, Lev. xiv. 10-18, 21, 24, 28, where it is to be observed that the quantity of oil (1 log. = 835 of a pint) was invariable, whilst the other objects varied in quantity according to the means of the person offering the cleansing. The leper was also to be touched with oil on various parts of his body (Lev. xiv. 15-18).

(iv.) The Nazarite, on completion of his vow, was to offer unleavened bread anointed with oil, and cakes of fine bread mingled with oil (Num. vi. 15).

(v.) After the erection of the Tabernacle, the offerings of the "priests" included flour mingled with oil (Num. vii. 8).

(vi.) At the consecration of the Levites, fine flour mingled with oil was offered (Num. viii. 8).

(vii.) Meat-offerings in general were mingled or anointed with oil (Lev. vii. 10, 12).

On the other hand, certain offerings were to be devoted to oil; the offering (Num. xvi. 11), and the offering of jealousy (Num, xvi. 15).

The principle on which both the presence and the absence of oil were prescribed is clearly, that as oil is indicative of gladness, so its absence denoted sorrow or humiliation (Is. xi. 3; Joel ii. 19; Rev. vi. 6). It is on this principle that oil is so often used in Scripture as symbolical of nourishment and comfort (Deut. xxxii. 14, xxiii. 24; Job xxxix 6; Ps. xlv. 7, xix. 18; Is. lix. 5).

(b.) Kings, priests, and prophets, were anointed with oil or ointment. [OINTMENT.]

7. (a.) As so important a necessary of life, the Jew was required to include oil among his first-fruit offerings (Ex. xxii. 29, xxiii. 16; Num. xvi. 12; Deut. xviii. 4: 2 Chr. xxxii. 5; I Kings xvi. 9). In the Mishna various limitations are laid down; but they are of little importance except as illustrating the processes to which the oil-berry was subjected in the production of oil, and the degrees of estimation in which their results were held.

(b.) Titles of oil were also required (Deut. xii. 17; 2 Chr. xxxii. 5; Neh. x. 37, 39, xiii. 12; Ex. xiv. 11).

8. Shields, if covered with hide, were anointed with oil or grease previous to use. [ANOINT.] Shields of metal were perhaps rubbed over in like manner to polish them. See Tehinnim on 2 Sam. i. 21; Virg. En. vii. 625; Plauto, Mil. i. 1, 2; and Ges. p. 825.

Oil of inferior quality was used in the composition of soap.

Of the substances which yield oil, besides the olive-tree, myrrh is the only one specially mentioned in Scripture. Oil of myrrh is the juice which exudes from the tree Balansamulbarn agrabu, but olive-oil was an ingredient in many compounds which passed under the general name of oil (Isah. ii. 12; Cestus, u. s. iii. 10, 18, 19; Phleg. xxi. 28, viii. 1, 2, xv. 7; Wilkinson, Aegypt. ii. 25; Balfour, Plants of Bible, p. 52; Winer, Realb. s. v. Myrrhe. [OINT.]

OIL-PRESS. [Oil, 2.]

OIL-TREE (αίον χειρός, "οίλον χειρός")—its shemen: κοσμάρας, γόλα κοσμάρας, ἑλύμων, ὁδονία ὁδονίαν παύτηριον. The Hebrew words occur in Neh. viii. 15; I K. vi. 23; and in L. xvi. 19. In this last passage the A. V. has "oil-tree;" but in Kings it has "olive-tree," and in Nehemiah "pine-branches." From the passage in Nehemiah, where the shemen is mentioned as distinct from the zerek or "oil-tree," writers have sought to identify it with the Elagabalus ungulates, Lin., sometimes called "the wild olive tree," or with row flower, aster," the zerek-tree of the Arabs. There is, however, some great mistake in this matter; for the zerek-tree cannot be referred to the Elagabalus, the properties and characteristics of which tree do not accord with what travellers have related of the famed zerek-tree of Palestine. We are indebted to Dr. Hooker for the correction of this error. The zerek is the Bodomea Egyptiaca, a well-known and abundant shrub or small tree in the plain of Jordan. It is found
OIL-TREE

all the way from the peninsula of India and the Ganges to Syria, Abyssinian, and the Niger. The zackum-oil is held in high repute by the Arabs for its medicinal properties. It is said to be very valuable against wounds and contusions. Comp. Manndrel (Journ. p. 86), Robinson (Bibl. Resi. i. 660) see also BALSAM. It is quite probable that

used in making a carved image ten cubits high, to be placed in the Holy of Holies.

(2) A tree with branches so thick and leafy that they would be suitable to be associated with those of the olive, palm, myrtle, and other thick trees in the making of booths.

(3) A tree fit to be associated with the cedar, the acacia, and the myrtle, as an emblem of the favor of God restored to a desolated land.

(4) An oily, or oil-producing tree, growing in the mountains.

(5) Not the olive itself, which would be excluded by Neh. viii. 15.

These conditions are not fulfilled in any tree so well as in the genus Plius, of which there are several species in Syria. The Plius orientalis is the most celebrated of these. It is a tall and beautiful tree usually trimmed close to the trunk below, and allowed to expand in a broad top like a palm. It is one of the most picturesque trees of Syria. It often attains an immense size. Two or three specimens of it may be seen near Beirut, towering above the neighboring groves to a height of over 100 feet. The trunks are several feet in thickness. The wood is highly resinous and "fat," and the branches are commonly used to make booths. The wood is the most sought for roofing purposes, and is often finely carved. It is of a fine reddish hue in the older trees, and takes a high polish owing to the large amount of the resinous constituent contained in it. It is moreover usually planted, and does not occur in forests far distant from the haunts of men. Its abundance marks seasons of rest from war, and prosperity in the land. The reverse marks the occurrence of war and desolation, which always tend to destroy trees. Among the other species found in the East the Plius orientalis is perhaps next in frequency. It is small, and does not answer the conditions so well as the first mentioned. (A description of these two species, with plates, may be found in Thomson's Land and Rock. ii. 265-267.) The first named species is called by the Arabs Sabaer. The groves outside of Beirut are so dense in the shade which they afford, that, where they are planted thickly, scarce a ray of the powerful Syrian sunshine can penetrate even at noonday. How appropriate that this species should have been chosen for "booths," and how inappropriate that the stinging thorny branches of the Balunites should have been imagined to meet this requirement of the text (Neh. viii. 15). Among the other species of Syria may be noted also Plius myriopolis and P. halpeenesis, both of which are common.

The Zackum at Is. xii. 19 and lx 13 is probably not the pine, but the oak. This probability, which if established would exclude the mention of so common a tree as the pine from the Scripture, would of itself lead us to seek for an allusion to the pine under some other name. G. E. P.

OINTMENT. Besides the fact that olive-oil

2. ποιειν, ποιον, ραπαντοιν (Ex. xxx. 25). Gesenius thinks it may be the vessel in which the ointment was compounded (p. 1330).

4. ποιον, χρυσα, χρυσο, ραπαντοιν, sometimes in A. V. "oil."

5. τας τρόπους: in A. V. "things for purifying"
OINTMENT

is itself a common ingredient in ointments, the purposes to which it is mentioned in Scripture, is applied agree in so many respects with those which belong to oil, that we need not be surprised if the meaning were not amplified and the following list will point out the Scriptural uses of ointment:

1. Cosmic. — The Greek and Roman practice of anointing the head and clothes on festive occasions prevailed also among the Egyptians, and appears to have had place among the Jews (Ruth iii. 3; Joel iii. 10; Prov. xxviii. 16; Cant. iv. 10; Am. vi. 6: Isa. xlv. 7; Ix. viii. 9; Matt. xxvi. 7; Luke vii. 46; Rev. xvii. 15; Ps. xcv. viii. 1; Scalb. ix. 4; Plato, Symp. i. 6; p. 123; see authorities in Hoffmann, l.c. art. "Ungentii ritus"). Oil of myrrh, for like purposes, is mentioned Esth. ii. 12. Strabo says that the inhabitants of Mesopotamia used oil of sesame, and the Egyptians castor-oil (Hibiscus) both for burning, and the lesser classes for anointing the body. Chardin and other travelers confirm this statement as regards the Persians, and show that they made little use of olive-oil, but used other oils, and among them oil of sesame and castor-oil. Chardin also describes the Indian and Persian custom of presenting perfumes to guests at banquets (Strabo, vi. 746, xvii. 824; Chardin, Dig. iv. 43, 84, 86; Marco Polo, Trav. (Early Trav.) p. 853; Cicero, De offic. p. 305). Egyptian paintings represent servants anointing guests on their arrival at their entertainer's house, and later cases exist which retain the traces of the ointment which they were used to contain. Athenaeus speaks of the extravagance of Antiochus Epiphanes in the article of ointments for guests, as well as of ointments of various kinds (Wilkinson, Anc. Egypt. i. 78, pl. 89, l. 157; Athenaeus, x. 53, xv. 41). [Athenaeus Anoint.]

2. Funereal. — Ointments as well as oil were used to anoint dead bodies and the clothes in which they were wrapped. Our Lord thus spoke of his own body being anointed by anticipation (Matt. xxvi. 12; Mark iv. 3. 8; Luke xxii. 56; John xii. 2. 7, xix. 39; see also Plutarch, Consol. p. 611, viii. 413, ed. Becher) (Brockhaus.

3. Medicinal. — Ointment formed an important feature in ancient medical treatment (Celsus, De med. iii. 19, v. 27; Plini. xxiv. 19, xxix. 3, 4, 9). The prophet Isaiah alludes to this in a figure of speech; and our Lord, in his cure of a blind man, adopted as the outward sign one which represented the usual mode of cure. The mention of balm of Gilead and of eye-salve (calendula) point to the same method (Is. ii. 1; Mark vi. 6; Jer. viii. 22, xxi. 11, ii. 8; Rev. iii. 18; Tob. vi. 8, xi. 8, 13; Tertull. De inebri. 11, 11.

4. Ritual. — Besides the oil used in many ceremonial observances, a special ointment was appointed to be used in consecration (Ex. xxx. 23, xxx. 37, xxvii. 29, xii. 15). It was first compounded by Leodegarius, and its ingredients and proportions are not surprising that the same words, especially 1 and 6 were adopted for the anointing of the head and clothes at marriage and after death. 1000 shekels (250 ounces) each; sweet cinnamon and sweet calamus 330 shekels (125 ounces) each; olive-oil 1 hin (about 5 quarts, 330-96 cubic inches). These were to be compounded according to the art of the apothecary "in an oil of holy ointment (Ex. xxx. 25). It was to be used for the sacred anointing of the persons and place, and the ark and furniture (4) the altar of incense; (5) the altar of burnt-offering and its vessels; (6) the laver and its foot; (7) Aaron and his sons. Strict prohibition was issued against using this unguent for any secular purpose, or on the person of a foreigner, and against imitating it in any way whatsoever (Ex. xxx. 32, 33).

These ingredients, exclusive of the oil, must have amounted in weight to about 47 lbs. 8 oz. Now olive-oil weighs at the rate of 10 lbs. to the gallon. The weight therefore of the oil in the mixture would be 12 lbs. 8 oz. English. A question arises, in what form were the other ingredients, and what degree of solubility did the whole attain? Marth, a pure "(dry)" free-flowing (Gen. p. 555), would seem to imply the juice which flows from the tree at the first incision, perhaps the "odorat substantia ligno balsama" (Georg. ii. 118), which Pliny says is called "saeta," and is the best (xxii 15; Dioscorides, l. 73, 74, quoted by Celsus, l. 159; and Kimbol on Exodus, l. c.).

This juice, which at its first flow is soft and oily, becomes harder on exposure to the air. According to Maimonides, Moses (not Leodegarius), having reduced the solid ingredients to powder, steeped them in water till all the aromatic qualities were drawn forth. He then poured in the oil, and boiled the whole till the water was evaporated. The residuum thus obtained was preserved in a vessel for use (Otho, i. c. Robb., "Oleum"). This account is perhaps favored by the expression "powders of the merchant," in reference to Marth (l. c. 3; Keil, Arch. Hebr. p. 173). Another theory supposes all the ingredients to have been in the form of oil or ointment, and the measurement by weight of all, except the oil, seems to imply that they were in some solid form, but whether in an unctuous state or in that of powder cannot be ascertained. A process of making ointment, consisting, in part at least, in boiling, is alluded to in Job xli. 31. The ointment with which Aaron was anointed is said to have flowed down over his garments (Ex. xxix. 21; Ps. xcxi. 3; "skirts," in the latter passage, is literally "month," i. e. the opening of the robe at the neck; Ex. xxvii. 32).

The charge of preserving the anointing oil, as well as the oil for the light, was given to Eleazar (Num. iv. 25). The quantity of ointment made in the first instance seems to imply that it was intended to last a long time. The rabbinical writers say that it lasted 900 years, i. e. till the Captivity, because it was said, "ce shall not make any like it" (Ex. xxx. 32); but it seems clear from 1 Chr. ix. 30 that the ointment was renewed from time to time (Christl. l. c.).

Kings, and also in some cases prophets, were as well as priests, anointed with oil or ointment, but Scripture only mentions the fact as actually taking place in the cases of Saul, David, Solomon, and of olive-oil 1 hin (about 5 quarts, 330-96 cubic inches). These were to be compounded according to the art of the apothecary "in an oil of holy ointment (Ex. xxx. 25). It was to be used for the sacred anointing of the persons and place, and the ark and furniture (4) the altar of incense; (5) the altar of burnt-offering and its vessels; (6) the laver and its foot; (7) Aaron and his sons. Strict prohibition was issued against using this unguent for any secular purpose, or on the person of a foreigner, and against imitating it in any way whatsoever (Ex. xxx. 32, 33).

These ingredients, exclusive of the oil, must have amounted in weight to about 47 lbs. 8 oz. Now olive-oil weighs at the rate of 10 lbs. to the gallon. The weight therefore of the oil in the mixture would be 12 lbs. 8 oz. English. A question arises, in what form were the other ingredients, and what degree of solubility did the whole attain? Marth, a pure "(dry)" free-flowing (Gen. p. 555), would seem to imply the juice which flows from the tree at the first incision, perhaps the "odorat substantia ligno balsama" (Georg. ii. 118), which Pliny says is called "saeta," and is the best (xxii 15; Dioscorides, l. 73, 74, quoted by Celsus, l. 159; and Kimbol on Exodus, l. c.).

This juice, which at its first flow is soft and oily, becomes harder on exposure to the air. According to Maimonides, Moses (not Leodegarius), having reduced the solid ingredients to powder, steeped them in water till all the aromatic qualities were drawn forth. He then poured in the oil, and boiled the whole till the water was evaporated. The residuum thus obtained was preserved in a vessel for use (Otho, l.c. Robb., "Oleum"). This account is perhaps favored by the expression "powders of the merchant," in reference to Marth (l. c. 3; Keil, Arch. Hebr. p. 173). Another theory supposes all the ingredients to have been in the form of oil or ointment, and the measurement by weight of all, except the oil, seems to imply that they were in some solid form, but whether in an unctuous state or in that of powder cannot be ascertained. A process of making ointment, consisting, in part at least, in boiling, is alluded to in Job xli. 31. The ointment with which Aaron was anointed is said to have flowed down over his garments (Ex. xxix. 21; Ps. xcvii. 3; "skirts," in the latter passage, is literally "mouth," i. e. the opening of the robe at the neck; Ex. xxvii. 32).

The charge of preserving the anointing oil, as well as the oil for the light, was given to Eleazar (Num. iv. 25). The quantity of ointment made in the first instance seems to imply that it was intended to last a long time. The rabbinical writers say that it lasted 900 years, i. e. till the Captivity, because it was said, "ce shall not make any like it" (Ex. xxx. 32); but it seems clear from 1 Chr. ix. 30 that the ointment was renewed from time to time (Christl. l. c.).

Kings, and also in some cases prophets, were as well as priests, anointed with oil or ointment, but Scripture only mentions the fact as actually taking place in the cases of Saul, David, Solomon,
The Rabbins say that Saul, Jehu, and Josiah were only anointed with common oil, whilst for David and Solomon the holy oil was used (1 Sam. x. 1, xvi. 1, 13; 1 K. i. 39; 2 K. ix. 1, 3, 6, xi. 12; Godwyn, Moses and Aaron, i. 4; Carpzov, Apparatus, pp. 36, 57; Hofmann, Lex. art. "Ungewiss ritus"); and it is evident that the sacred oil was used in the case of Solomon, and probably in the cases of Saul and David. In the case of Saul (1 Sam. x. 1) the article is used, "the oil," as it is also in the case of Jehu (2 K. ix. 1); and it seems unlikely that the anointing of Josiah, performed by the high-priest, should have been defective in this respect.

A person whose business it was to compound ointments in general was called an "apothecary" (Neh. iii. 8; Eccl. x. 1; Ecles. xlix. 1). [APOTH.-

...ECAKY.] The work was sometimes carried on by women "confectionaries" (1 Sam. viii. 13).

In the Christian Church the ancient usage of anointing the bodies of the dead was long retained, as is noticed by S. Chrysostom and other writers quoted by his successor, s. v. Αὐθανάσσων. The ceremony of chrism or anointing was also added to baptism. See authorities quoted by Suerer, l. c., and under Βαπτισμος and Χρίσις.

* OLD AGE. [AGE, OLD.]

OLD TESTAMENT. This article will treat (A) of the Text and (B) of the Interpretation of the Old Testament. Some observations will be sub-

joined respecting (C) the Quotations from the Old Testament in the New.

A. — TEXT OF THE OLD TESTAMENT.

1. History of the Text. — A history of the text of the O. T. should properly commence from the date of the completion of the Canon; from which time we must assume that no additions to any part of it could be legitimately made, the sole object of those who transmitted and watched over it being therefore to preserve that which was already written. Of the care, however, with which the text was transmitted we have to judge, almost entirely, by the phenomena which it and the versions derived from it now present, rather than by any recorded facts respecting it. That much scrup-

ulous pains would be bestowed by Ezra, the "scribe in the law of Moses," and by his companions, on the correct transmission of those Scriptures which passed through their hands, is indeed antecedently probable. The best evidence of such pains, and of the respect with which the text of the sacred books was consequently regarded, is to be found in the jealous accuracy with which the discrepancies of various parallel passages have been noticed, notwithstanding the temptation which must have existed to assimilate them to each other. Such is the case with Psalms xiv. and lili, two recensions of the same hymn, both proceeding from David, where the reasons of the several variations may on examination be traced. Such also is the case with Psalm xviii. and 2 Sam. xxi, where the variations between the two copies are more than sixty in number, excluding those which merely consist in the use or absence of the notiores lectiose; and where, therefore, even though the design of all the variations be not perceived, the hypothesis of their having originated through accident would imply a carelessness in transcribing far beyond what even the rashest critics have in other passages contemplated.

As regards the form in which the sacred writings were preserved, there can be little doubt that the text was ordinarily written on skins, rolled up into volumes, like the modern syayne-rolls (Ps. xi. 7; Jer. xxxvi. 14; Zech. v. 1: Ez. ii. 9). Josephus relates that the copy sent from Jerusalem as a present to Ptolemy in Egypt, was written with let-

ters of gold on skins of admirable thinness, the join of which could not be detected (Ant. vii. 2, § 11).

The original character in which the text was expressed is that still preserved to us, with the ex-

ception of four letters, on the Maccabean coins, and having a strong affinity to the Samaritan character, which seems to have been treated by the later Jews as identical with it, being styled by them בְּהֵמָשָׂא בְּהֵמָשָׂא. At what date this was exchanged for the present Aramaic or square character, בְּהֵמָשָׂא, or בְּהֵמָשָׂא, is still as undeter-

mined as it is at what date the use of the Aramaic language in Palestine superseded that of the Hebrew. The old Jewish tradition, repeated by Origen and Jerome, ascribed the change to Ezra. But the Maccabean coins supply us with a date at which the older character was still in use: and even though we should allow that both may have been simultaneously employed, the one for sacred, the other for more ordinary purposes, we can hardly suppose that they existed side by side for any lengthened period. Hassencamp and Gesenius are at variance as to whether such errors of the Sep-

tuagint as arose from confusion of letters in the original text, are in favor of the Greek interpreters having had the older or the more modern character before them. It is sufficiently clear that the use of the square writing must have been well established before the time of those authors who attributed the introduction of it to Ezra. Nor could the allusion in Matt. v. 18 to the ψηφία as the smallest letter have well been made except in reference to the more modern character. We forbear here all investiga-

tion of the manner in which this character was formed, or of the precise locality whence it was de-

rived. Whatever modification it may have under-

gone in the hands of the Jewish scribes, it was in the first instance introduced from abroad; and this its name בְּהֵמָשָׂא בְּהֵמָשָׂא, i.e. Assyrian writing, implies, though it may geometrically require to be interpreted with some latitude. (The suggestion of Hupfeld that בְּהֵמָשָׂא may be an appellative, denoting not Assyrian, but Semitic, writing, is improbable.) On the whole we may best suppose, with Ewald, that the adoption of the new charac-

ter was connected with the rise of the earliest Targums, which would naturally be written in the Aramaic style. It would thus be shortly anterior to the Christian era; and with this date all the evidence would well accord. It may be right, however, to mention, that while of late years Keil has striven anew to throw back the introduction of the square writing towards the time of Ezra Bleeck, also,
though not generally imbued with the conservative views of Keil, maintains not only that the use of the square writing for the sacred books owed its origin to Ezra, but also that the later books of the O. T. were never expressed in any other character.

No vowel points were attached to the text; they were, throughout the entire period of its history, entirely unknown. Convenience had, indeed, at the time when the later books of the O. T. were written, suggested a larger use of the notes lectionis: it is thus that in those books we find them introduced into many words that had been previously spelt without them: אֵלֶּלֶד יִסְמָךְ, takes the place of אֵלֶּלֶד יִסְמָךְ. An elaborate endeavor has been recently made by Dr. Wall to prove that, up to the early part of the second century of the Christian era, the Hebrew text was free from vowel letters as well as from vowels. His theory is that they were then interpolated by the Jews, with a view of altering rather than of perpetuating the former pronunciation of the words; their object being, according to him, to pervert the sense of the prophecies, as also to throw discredit on the Septuagint, and thereby weaken or exclude the force of arguments drawn from that version in support of Christian doctrines. Improbable as such a theory is, it is yet more astonishing that its author should never have been deterred from presenting it by the palpable objections to it which he himself discovered. Who can believe, with him, that the Samaritans, notwithstanding the mutual hatred existing between them and the Jews, borrowed the interpolation from the Jews, and conspired with them to keep it a secret? Or that among other words to which by this interpolation the Jews ventured to impart a new sound, were some of the best known proper names, e.g., Isaiah, Jeremiah? Or that it was merely through a blunder that in Gen. i. 24, the substantive יִסְמָךְ in its correct state acquired its final י, when the same anomaly occurs in no fewer than three passages of the Psalms? Such views and arguments refute themselves; and while the high position occupied by its author commends the book to notice, it can only be lamented that industry, learning, and ingenuity should have been so misapplied in the vain attempt to give substance to a shadow.

There is reason to think that in the text of the O. T., as originally written, the words were generally, though not uniformly divided. Of the Phenician inscriptions, though the majority proceed continuously, some have a point after every word, except when the words are closely connected. The same point is used in the Samaritan manuscripts; and it is observed by Gesenius (a high authority in respect of the Samaritan Pentateuch) that the Samaritan and Jewish divisions of the words generally coincide. The discrepancy between the Hebrew text and the Septuagint in this respect is sufficiently explained by the circumstance that the Jewish scripts did not separate the words which were closely connected; it is in the case of such that the discrepancy is almost exclusively found. The practice of separating words by spaces instead of points probably came in with the square writing. In the synchronic rolls, which are written in conformity with the ancient rules, the words are regularly divided from each other; and indeed the

Lamand minutely prescribes the space which should be left (Gesenius, Gesch. der Heb. Sprache, § 45).

An ancient date, probably, are also the divisions between the newer Parashoth or sections; whether made, in the case of the more important divisions, by the commencement of a new line, or, in the case of the less important, by a blank space within the line [Babyl.]. The use of the letters א and א, however, to indicate these divisions is of more recent origin: they are not employed in the synagogue-rolls. These lesser and later Parashoth, of which there are in the Pentateuch 699, must not be confounded with the greater and later Parashoth, or Sabbath-lessons, which are first mentioned in the Masorah. The name Parashoth is in the Mishna (Megill. iv. 4) applied to the divisions in the Prophets as well as to those in the Pentateuch: e.g., to Isaiah ili. 3–5 (to the greater Parashoth here correspond the Haphtaroth). Even the separate psalms are in the Gemara called also Parashoth (Hecnech B. B. fol. 9, 2; 10, 1). Some indication of the antiquity of the divisions between the Parashoth may be found in the circumstance that the Gemara holds that the Parashoth of the Levites are those which were anciently in the real age we know but little. Hupfeld has found that they do not always coincide with the capitula of Jerome. That they are nevertheless more ancient than his time is shown by the mention of them in the Mishna. In the absence of evidence to the contrary, their accordance with the Zarin of the Samaritan Pentateuch, which are 866 in number, seems to indicate that they had a historical origin; and it is possible that they also may date from the period when the O. T. was first transcribed in the square character. Our present chapters, it may be remarked, spring from a Christian source.

Of any logical division, in the written text, of the prose of the O. T. into Pesukim, or verses, we find in the Talmud no mention; and even in the existing synagogue-rolls such division is generally ignored. While, therefore, we may admit the early currency of such a logical division, we must assume, with Hupfeld, that it was merely a traditional observance. It has indeed, on the other hand, been argued that such numerations of the verses as the Talmud records could not well have been made unless the written text distinguished them. But to this we may reply by observing that the verses of the numbering of which the Talmud speaks, could not have been accurately accorded with, whereas, of the former there were in the Pentateuch 5,888 (or as some read, 8,888): it now contains but 5,845: the middle verse was computed to be Lev. viii. 33; with our present verses it is Lev. viii. 5. Had the verses been distinguished in the written text at the time that the Talmudic enumeration was made, it is not easily explicable how they should have been so much altered; whereas, were the logical division merely traditional, tradition would naturally preserve a more accurate knowledge of the places of the various logical breaks than of their relative importance, and thus, without any disturbance of the syntax, the number of computed verses would be liable to continual increase or diminution, by separation or aggregation of the marginal numbers in the copyists' hand, and even now indicated by the double recension and consequent vocalization of the Decalogue. In the poetical books, the Pesukim mentioned in the Talmud correspond to the poetical lines, not to our modern verses; and it is probable
both from some expressions of Jerome, and from the analogous practice of other nations, that the poetical text was written stichometrically. It is still so written in our manuscripts in the poetical pieces in the Pentateuch and historical books; and even, generally, in our oldest manuscripts. Its partial discontinuance may be due, first to the desire to save space, and secondly to the diminution of the necessity for it by the introduction of the accents.

Of the documents which directly bear upon the history of the Hebrew text, the two earliest are the Samaritan copy of the Pentateuch, and the Greek translation of the LXX. For the latter we must refer to the article Septuagint: of the former some account will here be necessary. Menon had been made of the Samaritan Pentateuch, and, incidentally, of some of its peculiarities, by several of the Christian Fathers. Eusebius had taken note of its principal chronology: Jerome had recorded its insertions in Gen. iv. 6; Deut. xxvii. 26. Procopius of Gaza had referred to its containing, at Num. x. 10 and Ex. xxvii. 24, the words afterwards found in Deut. i. 6, v. 9; it had also been spoken of by Cyril of Alexandria, Diodore, and others. When in the 17th century Samaritan Manuscripts were brought to Europe by P. della Valle and Abp. Ussher, according with the representations that the Fathers had given, the very numerous variations between the Samaritan and the Jewish Pentateuch could not but excite attention; and it became thenceforward a matter of controversy among scholars which copy was entitled to the greater respect. The coordinate authority of both was advocated by Kennicott, who, however, in order to uphold the claim of the former, defended, in the celebrated passage Deut. xxvii. 4, the Samaritan reading gerizin against the Jewish reading Elad, charging corruption of the text upon the Jews rather than the Samaritans. A full examination of the readings of the Samaritan Pentateuch was at length made by Gesenius in 1835. His conclusions, fatal to its credit, have obtained general acceptance: nor have they been substantially shaken by the attack of a writer in the Journal of Sacred Lit. for July 1853; whose leading principle, that transcribers are more liable to omit than to add, is fundamentally unsound. Gesenius ranges the Samaritan variations from the Jewish Pentateuch under the following heads: grammatical corrections; glosses received into the text; conjectural emendations of difficult passages; corrections derived from parallel passages; larger interpolations derived from parallel passages; alterations made to remove what was offensive to Samaritan feeling; alterations to suit the Samaritan idiom; and alterations to suit the Samaritan theology, interpretation, and worship. It is doubtful whether even the grains of gold which he thought to have found amongst the rubbish really exist; and the Samaritan readings which he was disposed to prefer in Gen. iv. 18, xiv. 14, xxvii. 13, xiii. 14, will hardly approve themselves generally. The really remarkable feature respecting the Samaritan Pentateuch is its accordance with the Septuagint in more than a thousand places where it differs from the Jewish; being mostly those where either a gloss has been introduced into the text, or a difficult reading corrected for an easier, or the prefix ו added or removed. On the other hand, there are about as many places where the Septuagint supports the Jewish text against the Samaritan; and some in which the Septuagint stands alone, the Samaritan either agreeing or disagreeing with the Jewish. Gesenius and others suppose that the Septuagint and the Samaritan text were derived from Jewish MSS. of a different recession to that which afterwards obtained public authority in Palestine, and that the Samaritan was subsequently altered and interpolated. It is at least equally probable that both the Greek translators and the Samaritan copyists made use of MSS. with a large number of traditional marginal glosses and annotations, which they embodied in their own texts at discretion. As to the origin of the existence of the Pentateuch among the Samaritans, it was probably introduced thither when Manasseh and other Jewish priests passed over into Samaria, and contemporaneously with the building of the temple on Mount Gerizim. Henneberg contends for this on the ground that the Samaritans were entirely of heathen origin, and that their subsequent religion was derived from Judaea (Gnominae of Pent. vol. 1.): the same conclusion is reached also, though with very different arguments, by Gesenius, De Wette, and Bleek. To the hypothesis that the Pentateuch was perpetuated to the Samaritans from the Israelites of the kingdom of the ten tribes, and still more to another, that being of Israelitish origin they first became acquainted with it under Josiah, there is the objection, besides what has been urged by Henneberg, that no trace appears of the reception among them of the writings of the Israelitish prophets Hosea, Amos, and Joel, which yet Josiah would so naturally circulate with the Pentateuch, in order to bring the remnant of his northern countrymen to repentance.

While such freedom in dealing with the sacred text was exercised at Samaria and Alexandria, there is every reason to believe that in Palestine the text was both carefully preserved and scrupulously respected. The death of Josephus (c. Apion, i. 8), that through all the ages that had passed none had ventured to add to or to take away from, or to transpose aught of the sacred writings, may well represent the spirit in which in his day his own countrymen acted. In the translations of Aquila and the other Greek interpreters, the fragments of whose works remain to us in the Hexapla, we have evidence of the existence of a text differing but little from our own: so also in the Targums of Onkelos and Jonathan. A few centuries later we have, in the Hexapla, additional evidence to the same effect in Origen's transcriptions of the Hebrew text. And yet more important are the proofs of the firm establishment of the text, and of its substantial identity with our own, supplied by the translation of Jerome, which was instructed by the Palestinian Jews, and mainly relied upon their authority for acquaintance not only with the text itself, but also with the traditions unwritten vocalization of it.

This brings us to the middle of the Talmudic period. The learning of the schools which had been formed in Jerusalem about the time of our Nasi, and especially of Hillel and Shammai, was preserved, after the destruction of the city, in the academies of Jabneh, Sepphoris, Cesarea, and Tiberias. The great pillar of the Jewish literature of this period was 'Al. Judah the Holy, to whom is ascribed the compilation of the Mishna, the text of the Talmud, and who died about A.D. 220. After his death there grew into repute the Jewish academies of
Sura, Naharden, and Pun-Beilitha, on the Emphra-

The twofold Genarra, or commentary, was now

appended to the Mishna, thus completing the Tal-

mud. The Jerusalem Genara proceeded from the Jews of Tiberias, probably towards the end of the 4th century; the Babylonian from the academies on the Emphrases, perhaps by the end of the 5th.

That along with the task of redacting and com-

menting on their various legal traditions, the Jews

of these several academies would occupy themselves with the text of the sacred writings is in every way probable, and is indeed shown by various Tal-

mudic notices.

In these the first thing to be remarked is the entire absence of allusion to any such glosses of interpretation as those which, from having been previously noted on the margins of MSS., had probably been loosely incorporated into the Samar-

itan Pentateuch and the Septuagint. Interpreta-

tion, properly so called, had, become the province of the Targumist, not of the transcriber; and the result of the entire divorce of the task of interpreta-

tion from that of transcription had been to obtain

greater security for the transmission of the text in its purity. In place, however, of such glosses of interpretation had crept in the more childish prac-

tice of reading some passages differently to the way in which they were written, in order to obtain a play of words, or to fix them artificially in the memory. Hence the formula "Read not so, but so:"

"Read not so, but so." In other cases it was sought by arbitrary modifications of words to embody in them some casuistical rule. Hence the

formula בֹּדֲנָנְקִים אַנָּנְקָנִים אַנָּנְקָנִים אַנ

"There is ground for the traditional, there is ground for the textual reading" (Hunfeld, in Stud. und Krit. 1830, p. 55 ff.). But these traditional and confessedly apocryphal readings were not allowed to affect the written text. The care of the Talmudic doctors for the text is shown by the pains with which they counted up the number of verses in the different books, and computed which were the middle verses, words, and letters, both of the Pentateuch and in the Prophets. These last they distinguished by the employment of a larger letter, or by raising the letter above the rest of the text: see Lev. xi. 42: Ps. lxxx. 14 (Kidush-

alin, fol. 39, 1; Buxtorf "s Tiberius, c. viii.). Such was the origin of these unusual letters; mystical meanings were, however, as we learn from the Tal-

mud itself (Raba in fol. 169, 2), afterwards attached to them. These may have given rise to a multiplication of them, and we cannot therefore be certain that all had in the first instance a critical significance.

Another Talmudic notice relating to the sacred text furnishes the four following remarks (Niddorim, 14. 37, 2; Bux. T. b. c. viii.):

ם"ץ נ"ץ ם"ץ נ"ץ, "Reading of the scribal errors;"

referring to the words הַנָּשִׁים מַעְלָתִים מַע

ם"ץ נ"ץ נ"ץ, "Rejection of the scribal errors;"

referring to the omission of a yodh before the

word מַעְלָתִים in Gen. xviii. 3, xxiv. 55: Num. xxxi.

2, and before certain other words in Ps. lviii. 29,

xxxvi. 6. It is worthy of notice that the two

passages of Genesis are among those in which the

Septuagint and Samaritan agree in supplying a against the authority of the present Hebrew text. In Num. xxxii. 2, the present Hebrew text, the

Septuagint, and the Samaritan, all have it.

ם"ץ נ"ץ נ"ץ, "Read not but written;"

referring to something which ought to be read, although not in the text, in 2 Num. viii. 3, xvi. 23; Jer. xxxi. 58. 1. 24; Ruth ii. 11. iii. 5, 17. The omission is still indicated by the Masoretic notes in every place but Ruth ii. 11; and is supplied by the Septuagint in every place but 2 Sam. xvi. 23.

ם"ץ נ"ץ נ"ץ, "Written but not read;"

referring to something which ought in reading to be omitted from the text in 2 K. v. 18: Deut. vi. 1; Jer. ii. 3; Ez. xlviii. 16; Ruth iii. 12. The Masoretic notes direct the omission in every place but Deut. vi. 1: the Septuagint preserves the word there, and in 2 K. v. 18, but omits it in the other three passages. In these last, an addition had apparently crept into the text from error of trans-

scription. In Jer. ii. 3, the word מַעְלָתִים, in Ez.

xlviii. 16, the word מַעְלָתִים had been accidentally repeated; in Ruth iii. 12, מַעְלָתִים had been re-

peated from the preceding מַעְלָתִים. ב.

Of these four remarks, then, the last two, there seems scarcely room for doubt, point to errors which the Jews had discovered, or believed to have discovered, in their copies of the text, but which they were yet generally unwilling to correct in their future copies, and which, accordingly, although stigmatized, have descended to us. A like observation will apply to the Talmudic notices of the readings still indicated by the Masoretic Keris in Job xiii. 15; Hag. ii. 8 (Tal. v. 5; Toman, fol. 21. 2). The scrupulosity with which the Talmudists thus noted what they deemed the true readings, and yet abstained from introducing them into the text, indicates at once both the diligence with which they scrutinized the text, and also the care with which, even while acknowledging its occasional imperfections, they guarded it. Critical procedure is also evidenced in a mention of their rejection of manuscripts which were found not to agree with others in their readings (Talm. Hil. fol. 48, 1); and the rules given with reference to the transcription and adoption of manuscripts attest the care bestowed upon them (Shabbath, fol. 103, 2; Git. fol. 45. 2). The "Rejection of the scribal errors" mentioned above, may perhaps relate to certain minute rectifications which the scribes had ventured, not necessarily without critical authority, to make in the actual written text. Wuthier, however, who is followed by Hes-

vernack and Keil, maintains that it relates to rectifi-

cations of the popular manner in which the text was read. And for this there is some ground in the circumstance that the "Reading of the scribal errors" bears apparently merely upon the vocalization, probably the vocalization, with which the words מַעְלָתִים, etc., were to be pronounced.

The Talmud furthor makes mention of the euphemi-

stic Keris, which are still noted in our Bibles, c. g. at 2 K. vi. 25. (Rgillah, fol. 23, 2). It also recounts six instances of extraordinary points placed over certain words, e. g. at Gen. xviii. 9 (Tr Sepheri vi. 3); and of some of them it furnishes
aystical explanations (Buxtorf, Tib. c. xvi.). The Masorah enumerates fifteen. They are noticed by Jerome, Quest. in Gen. xviii. 35 [xix. 33]. They seem to have been originally designed as marks of the supposed spuriousness of certain words or letters. But in many cases the ancient versions uphold the genuineness of the words so stigmatized.

It is after the Talmudic period that Hupfeld places the introduction into the text of the two large points (in Hebrew מָשָּׁרָה, Masorah; מַסְפִּיקָא, Sphuk-prusah) to mark the end of each verse. They are manifestly of older date than the accents, by which they are, in effect, supplemented (Stud. und Krit. xiv. 1877, p. 857). Coeval, perhaps, with the use of the Sphuk-prusah is that of the Mikvehkh, or hyphen, to unite words that are so closely conjoined as to have but one accent between them. It must be older than the accentual marks, the presence or absence of which is determined by it. It doubtless indicates the way in which the text was traditionally read by the earlier readers, and is probably to be accounted for the conjunction or separation of words. Internal evidence shows this to be the case in such passages as Ps. xiv. 5, דַּבְּרִישוּדָּלָא. But the use of it cannot be relied on, as it often in the poetical books conflicts with the rhythm; e. g. in Ps. xix. 9, 10 (cf. Mason and Bernard’s Grammaire, ii. 187). Such modifications of the text as these were the precursors of the new method of dealing with it which constitutes the work of the Masoretic period. It is evident from the notices of the Talmud that a number of oral traditions had been gradually accumulated, respecting not only the particular passages of the text itself, and also the manner in which it was to be read. The time at length arrived when it became desirable to secure the permanence of all such traditions by committing them to writing. The very process of collecting them would add greatly to their number; the traditions of various academies would be superadded the one upon the other; and with the gradual incorporation of the various critical observations of the collectors themselves, and the results of their comparisons of different manuscripts. The vast heterogeneous mass of traditions and criticisms thus compiled and embodied in writing, forms what is known as the מָשָּׁרָה, Masorah, i. e. Tradition. A similar name had been applied in the Mishna to the oral tradition before it was committed to writing, where it had been described as the hedge or fence, הגנה, of the Law (Pirke Abot, iii. 13).

Buxtorf, in his Tiberius, which is devoted to an account of the Masorah, ranges its contents under the three heads of observations respecting the verses, words, and letters of the sacred text. In regard of the verses, the Masorets recorded how many there were in each book, and the middle verse in each; also how many verses began with particular letters, or began with the same word, or contained a particular number of words and letters, or particular words a certain number of times, etc. In regard of the words, they recorded the Keras and Chethib, where different words were to be read from those contained in the text, or where words were to be omitted or supplied. They noted that certain words were to be found so many times in the beginning, middle, or end of a verse, or with a particular construction or meaning. They noted also of particular words, and this especially in cases where mistakes in transcription were likely to arise, whether they were to be written pleure or defecire, i. e. with or without the montagia sectionis, and whether their vowels and accentuation, and how many times they occurred so vocalized and accentuated. In regard of the letters, they computed how often each letter of the alphabet occurred in the O. T.; they noted fifteen instances of letters stigmatized with the extraordinary points; they commented also on all the unusual letters, namely, the מַיָּאכָלָא, which they variously condemned; they numbered those of which they reckoned thirty-three; the suspensae, four in number; and the inversae, of which, the letter being in each case 2, there are eight or nine.

The compilation of the Masorah did not meet with universal approval among the Jews, of whom some regretted the consequent cessation of oral traditions. Others condemned the frivolous character of many of its remarks. The formation of the written Masorah may have extended from the sixth or seventh to the tenth or eleventh century. It is essentially an incomplete work; and the labors of the Jewish doctors upon the sacred text might have undeservedly furnished materials for the enlargement of the earlier traditions, the preservation of which had been the primary object in view. Nor must it be implicitly relied on. Its computations of the number of letters in the Bible are said to be far from correct; and its observations, as is remarked by Jacob ben Chaim, do not always agree with those of the Talmud, nor even with each other; though we have no means of distinguishing between its earlier and its later portions.

The most valuable feature of the Masorah is undoubtedly its collection of Keras. The first rudiments of this collection meet us in the Talmud. Of those subsequently collected, it is probable that many were derived from the collation of MSS., others from the unsupported judgment of the Masorets themselves. They often rested on plausible but superficial grounds, originating in the desire to substitute an easier for a more difficult reading, and to us it is of little consequence whether it were a transcriber or a Masoretic doctor by whom the substitution was first suggested. It seems clear that the Keras in all cases represent the readings which the Masorets themselves approved as correct; but there would be less hesitation in sanctioning them when it was assumed that they would be always preserved in documents separate from the text, and that the written text itself would remain intact. In effect, however, our MSS. often exhibit the text with the Keras readings incorporated. The number of Keras is, according to Elias Levita, who spent twenty years in the study of the Masorah, 848; but the Bomberg Bible contains 1,771, the Plantin Bible 789. Two lists of the Keras—the one exhibiting the variations of the printed Bibliae with respect to them, the other distributing them into classes—are given in the beginning of Walton’s Polyglot, vol. vi.

The Masorah furnishes also eighteen instances of what it calls נֵפָּרָה פַּלְעַר, "Correction of the scribes." The real import of this is doubtful; but the recent view of Bleek, that it relates to
The Masorah was originally preserved in distinct books by itself. A plan then arose of transferring it to the margins of the MSS. of the Bible. For this purpose large curtiliments were necessary; and various transcribers inserted in their margins only as much as they had room for, or strove to give it an ornamental character by reducing it into fanciful shapes. R. Jacob ben Chaim, editor of the Bomberg Bible, complaints much of the confusion into which it had fallen; and the service which he rendered in bringing it into order is honorably acknowledged by Buxtorf. Further improvements in the arrangement of it were made by Buxtorf himself in his Babylonian Bible. The Masorah is now distinguished into the Masora magna and the Masora parva, the latter being an abridgment of the former, and including all the Masorah and other copious observations, and being usually printed in Hebrew Bibles at the foot of the page. The Masora magna, when accompanying the Bible, is disposed partly at the side of the text, and partly at the margin. Against which its several observations refer, partly at the end, where the observations are ranged in alphabetical order; it is thus divided into the Masora textualis and the Masora finalis.

The Masorah itself was but one of the fruits of the labors of the Jewish doctors in the Masoretic period. A far more important work was the furnishing of the text with vowel-marks, by which the traditional pronunciation of it was inquirably recorded. The insertion of the Hebrew vowel-points was post-Talmudic is shown by the absence from the Talmud of all reference to them. Jerome also, in recording the true pronunciation of any word, speaks only of the way in which it was read: and occasionally mentions the ambiguity arising from the variety of words represented by the same letter (Hupfeld, Stud. und Krit., 1830, p. 549 ff.). The system was gradually elaborated, having been moulded in the first instance in imitation of the Arabic, which was itself the daughter of the Syriac. (So Hupfeld. Evenadastro maintains the Hebrew system to have been derived entirely from the Syriac.) The history of the Syrian and Arabic pronunciation renders it probable that the elaboration of the system commenced not earlier than the seventh or eighth century. The vowel-marks are referred to in the Masorah, and as they are all mentioned by R. Judah Ching, in the beginning of the eleventh century, they must have been perfected before that date. The Spanish Tabbis of the eleventh and twelfth centuries knew much of their recent origin. That the system of punctuation with which we are familiar was fashioned in Palestine is shown by its differences from the Assyrian or Persian system displayed in one of the eastern MSS. collated by Pincher in Qissa, of which more hereafter.

It is to be observed that the written vocalization was the accentuation of the text. The import of the accents was, as Hupfeld has shown, essentially rhetorical (Stud. und Krit., 1817): hence they had from the first both a logical and musical significance. In respect of the former they were called הער, "senses"; in respect of the latter, הער, "tones." Like the vowel-marks, they are mentioned in the Masorah, but not in the Talmud.

The controversies of the sixteenth century respecting the late origin of the vowel-marks and accents are well known. Both are with the Jews the authoritative exponents of the manner in which the text is to be read: "Any interpretation," says Aben Ezra, "which is not in accordance with the arrangement of the accents, thou shalt not consent to it, nor listen to it." It in the books of Job, Psalms, and Proverbs, the accents are held by some Jewish scholars to be irregularly placed; the explanation is probable that in these books the rhythm of the poetry has afforded the means of testing the value of the accentuation, and has consequently disclosed its occasional imperfections. Making allowance for these, we must yet on the whole admire the marvelous correctness, in the Hebrew Bible, of both the vocalization and accentuation. The difficulties which both occasionally present, and which some superficial critics would, by overriding them, so easily remove, furnish the best evidence that both faithfully embody not the private judgments of the punctuators, but the traditions which had descended to them from previous generations.

Beside the evidences of various readings contained in the Keris of the Masorah, we have two lists of different readings purporting or presumed to be those adopted by the Palestinian and Babylonian Jews respectively. Both are given in Walton's Polyglot, vol. vi.

The first of these was printed by R. Jacob ben Chaim in the Bomberg Bible edited by him, without any mention of the source whence he had derived it. The different readings are 216 in number: all relate to the consonants, except two, which relate to the Mappik in 77. They are generally of but little importance: many of the differences are orthographical, many identical with those indicated by the Keris and Chethibis. The list does not extend to the Pentateuch. It is supposed to be ancient, but post-Talmudic.

The other, the result of a collection of MSS. made in the eleventh century by two Jews, R. Aaron ben Asher, a Palestinian, and R. Jacob ben Naphthali, a Babylonian. The differences, 864 in number, relate to the vowels, the accents, the Makelph, and in one instance (Num. viii. 6) to the division of one word into two. The list helps to furnish evidence of the date by which the punctuation and accentuation of the text must have been completed. The readings of our MSS. commonly agree with those of Ben Asher.

It is possible that even the separate Jewish academias may in some instances have had their own

The latest expositions of it are by Big in Jewish scholar, appended to vol. ii. of De Richel's Comm. on the Psalter: and by A. B. Davidson, 1851.
distinctive standard texts. Traces of minor variations between the standards of the two Babylonian academies of Sura and Nahardea are mentioned by De Rossi, *Proc. § 35*.

From the end, however, of the Masoretic period onward, the Masorah became the great authority by which the text given in all the Jewish MSS. was settled. It may thus be said that all our MSS. are Masoretic; those of older date were either suffered to perish, or, as some think, were intellectually consigned to destruction as incorrect. Various standard copies are mentioned by the Jews, by which, in the subsequent transcriptions, their MSS. were tested and corrected, but of which none are now known. Such were the Codex Hillel in Spain; the Codex Erythreus, or Hierosolymitanus, of Ben Asher; and the Codex Babylonius of Ben Nabatli. Of the Pentateuch there were the Codex Sinaiticus, of which the authority stood high in regard of its accentuation; and the Codex Hieriechus, which was valued in regard of its use of the *matres lectionis*; also the Codex Ezra, or Azarah, at Toledo, ransomed from the Black Prince for a large sum at his capture of the city in 1367, but destroyed in a subsequent siege (Scott Potter, *Princ. of Text*. Crit. p. 74).

2. Manuscripts. — We must now give an account of the O. T. MSS. known to us. They fall into two main classes: Synagogue-rolls and MSS. for private use. Of the latter, some are written in the square, others in the rabbinc or cursive character.

The synagogue-rolls contain, separate from each other, the Pentateuch, the Haphtarot, or appointed sections of the Prophets, and the so-called Megillot, namely, Canticles, Ruth, Lamentations, Ecclesiastes, and Esther. The text of the synagogue-rolls is written without vowels, accents, or parashas: the greater part is not distinguished, nor yet, strictly, the verses; these last are indeed often slightly separated, but the practice is against the ancient tradition. The prescribed rules respecting both the preparation of the skin or parchment for these rolls, and the ceremonies with which they are to be written, are exceedingly minute; and, though superstitious, have probably greatly contributed to the preservation of the text in its integrity. They are given in the Tract Sopherim, a later appendage to the Babylonian Talmud. The two modifications of the square character in which the latter are generally written are distinguished by the Jews as the Tam and the Welsch, i.e. probably, the Perfect and the Foreign: the former is the older angular writing of the German and Polish, the latter the more modern round writing of the Spanish MSS. These rolls are not sold; and those in Christian possession are supposed by some to be mainly those rejected from synagogue use as vitiated.

The private MSS. in the square character are either in book-form, either on parchment or on paper, and of various sizes, from folio to 12mo. Some contain the Hebrew text alone; others add the Targum, or an Arabic or other translation, either interspersed with the text or in a separate column, occasionally in the margin. The upper and lower margins are generally occupied by the Masorah, sometimes by rabbinical commentaries, etc.; the outer margin, when not filled with a commentary, is used for corrections, miscellaneous observations, etc.; the inner margin for the Masora parva. The text marks all the distinctions of sections and verses which are wanting in the synagogue-rolls. These copies ordinarily passed through several hands in their preparation: one wrote the consonants; another supplied the vowels and accents, which are generally in a fainter ink; another revised the copy; another added the Masorah, etc. Even when the same person performed more than one of these tasks, the consonants and vowels were always written separately.

The date of a MS. is ordinarily given in the subscription; but as the subscriptions are often concealed, and the Masorah or elsewhere, it is occasionally difficult to find them; occasionally also it is difficult to decipher them. Even when found and deciphered, they cannot always be relied on. Subscriptions were liable to be altered or supplied from the desire to impart to the MS. the value either of antiquity or of newness. For example, the subscription of the MS. Bible in the University Library at Cambridge (Kenn. No. 80), which greatly puzzled Kennicott, has now been shown by Zunz (Zer. Gesh. and Lit. p. 214) to assign the MS. to the year A.D. 856; yet both Kennicott and Bruns agree that it is not older than the 13th century; and De Rossi too pronounces, from the form of the Masorah, against its antiquity. No satisfactory criteria have been yet established which the ages of MSS. are to be determined. Those that have been usually relied on are by some dated from the value of letters. Few existing MSS. are supposed to be older than the 12th century. Kennicott and Bruns assigned one of their collation (No. 590) to the 11th century; De Rossi dates it A.D. 1018; on the other hand, one of his own (No. 634) he adjudges to the 8th century.

It is usual to distinguish in these MS. three modifications of the square character: namely, a Spanish writing, upright and regularly formed; a German, irregular and angular; and a French and Italian, intermediate to the preceding. Yet the character of the writing is not accounted a decisive criterion of the country to which a MS. belongs; nor indeed are the criteria of country much more definitely settled than those of age. One important distinction between the Spanish and German MSS. consists in the difference of order in which the books are generally arranged. The former follow the Masorah, placing the Chronicles before the rest of the Haggographia; the latter conform to the Talmud, placing Jeremias and Ezekiel before Isaiah, and Ruth, separate from the other Megillot, before the Psalms. The other characteristics of Spanish MSS., which are accounted the most valuable, are thus given by Bruns: They are not written with paler ink: their pages are seldom divided into three columns: the Psalms are arranged stichometrically; the Targum is not interspersed with the text, but assigned to a separate column: words are not divided between two lines; initial and unusual letters are eschewed, so also figures, ornaments, and florishes: the parashoth are indicated in the margin rather than in the text; books are separated by a space of four lines, but do not end with a *p. 177*: the letters are dressed to the upper guiding-line rather than the lower; Raphae is employed frequently, Methegh and Mappik seldom. Private MSS. in the rabbinic character are mostly peculiar and of comparatively late date. They are written with many abbreviations, and have no vowel-points or Masorah, but are occasionally accompanied by an Arabic version.

In computing the number of known MSS., it must be borne in mind that by far the greater part contain only portions of the Bible. Of the 581
OLD TESTAMENT

Jewish MSS. collated by Kennicott, not more than 102 give the O. T. complete; with those of De Rossi the case is similar. In Kennicott's volumes the MSS. used for each book are distinctly enumerated at the end of the book. The numbers collated by Kennicott and De Rossi together were, for the book of Genesis 480; for the Megillot, collectively, 659; for the Psalms, 452; for Ezra and Nehemiah, 172; and for the Chronicles, 213. MSS. authority is more ünluous for the book of Esther, last so for those of Ezra and Nehemiah.

Since the days of Kennicott and De Rossi modern research has discovered various MSS. beyond the limits of Europe. Of many of these there seems no reason to suppose that they will add much to our knowledge of the Hebrew text. Those found in China are not essentially different in character to the MSS. previously known in Europe: that brought by Buchanan from Mahabar is now supposed to be a European roll. It is different with the MSS. examined by Pirner at Odessa, described by him in the Prospectus der obriger Geschafs für Gesch. und Alt. gebührten älteren hebr. und rab. MSS. One of these MSS. (A. No. 1), a Pentateuch roll, unpointed, brought from BERDIEF in Pagode, contains portions of the text by the subscription to have been written previously to the year A. D. 580; and, it so is, the oldest known Biblical Hebrew MS. in existence. It is written in accordance with the rules of the Masorah, but the forms of the letters are remarkable. Another MS. (B. No. 3) containing the Prophets, on parchment, in small folio, although only dating, according to the subscription, from A. D. 216, and furnished with a Masorah, is a yet greater treasure. Its vowels and accents are wholly different from those now in use, both in form and in position, being all above the letters: they have accordingly been the theme of much discussion among Hebrew scholars. The form of the letters is here also remarkable. A fac-simile has been given by Pirner of the book of Habakkuk from this MS. The same peculiarities are wholly or partially repeated in some of the other Odessa MSS. Various readings from the texts of these MSS. are instanced by Pirner: those of B. No. 3 he has set forth at some length, and speaks of as of great importance, and as entitled to considerable attention on account of the correctness of the MS.; little use has however been made of them.

MSS. collated by Kennicott are all in the book-form, though the Samaritans, like the Jews, make use of rolls in their synagogues. They have no vowel-points or accents, and their diacritical marks and signs of division are peculiar to themselves. The unusual letters of the Jewish MSS. are also unknown in them. They are written on vellum or paper, and are not supposed to be of any great antiquity. This is, however, of little importance, as they sufficiently represent the Samaritan text.

3. Printed Text.—The history of the printed text of the Hebrew Bible commences with the early Jewish editions of the separate books. First appeared the Psalter, in 1477, probably at Bologna, in 4°, with Kimchi's commentary interspersed among the verses. Only the first four psalms had the vowel-points, and these but clumsily expressed. The text was far from correct, and the notae lectionis were inserted or omitted at pleasure. At Bologna there subsequently appeared, in 1482, the Pentateuch, in folio, pointed, with the Targum and he commentary of jarchi, and the five Megillot (Ruth—Esther), in folio, with the commentary of darchi and Allen Ezra. The text of the Pentateuch is reputed highly correct. From Soncinio, near Cremona, issued in 1486 the Prophetae Prorices (Joshua—Kings), folio, unpointed, with kimchi's commentary; of this the Prophetae Posterioriae (Isaiah—Malachi), also with kimchi's commentary, was probably the continuation. The Megillot were also printed, along with the prayers of the Italian Jews, at the same place and date, in 4to. Next year, 1487, the whole Hagiographa, pointed, but unaccompanied, with rabbinical commentaries, appeared at Naples, in either small fol. or large 4to, 2 vols. Thus every separate portion of the Bible was in print before any complete edition of the whole appeared.

The honor of printing the first entire Hebrew Bible belongs to the above-mentioned town of Soncino. The edition is in folio, pointed and accented. Nine copies only of it are now known, of which one belongs to Exeter College, Oxford. The earlier printed portions were perhaps the basis of the text. This was followed, in 1494, by the 4to or 8vo edition printed by gerson at Brescia, remarkable as being the edition from which Luther's German translation was made. It has many peculiar readings, and instead of giving the Kera in the margin, incorporates them generally in the text, which is therefore not to be depended upon. The unusual letters also are not distinguished. This edition, along with the preceding, formed the basis of the first edition, with the Masorah, Targums, and rabbinical commentaries, printed by Bomberg at Venice in 1518, fol. under the editorship of the converted Jew Felix del Prato; though the "plurima coltith exemplaribus" of the editor seems to imply that MSS. were also used in aid. This edition was the first to contain the Masora magna, and the various readings of Ben Asher and Ben Naphtali. On the Brescian text depended also, in greater or less degree, Bomberg's smaller Bibles, 4to, of 1518, 1521. From the same text, or from the equivalent text of Bomberg's first rabbinical Bible, was, at a subsequent period, mainly derived that of Sch. Münstcr, printed by Froben at Basé, 4to, 1541—53: which is valued, however, as containing a list of various readings which must have been collected by a Jewish editor, and, in part, by Jewish MSS.

After the Brescian, the next primary edition was that contained in the Complutensian Polyglot published at Complutum (Alcala) in Spain, at the expense of Cardinal Ximenes, dated 1514—17, but not issued till 1522. The whole work, 6 vols. fol., is said to have cost 50,000 ducats: its original price was 61 ducats, its present value about 400. The Hebrew, Vulgate and Greek texts of the NT (the latter with a Latin translation) appear in three parallel columns: the Targum of Onkelos, with a Latin translation, is in two columns below. The Hebrew is pointed, but unaccompanied: it was taken from seven MSS., which are still preserved in the University Library at Madrid.

To this succeeded an edition which has had more influence on the text of later times than the Second Rabbinical Bible, printed by Bomberg at Venice, 4 vols. fol. 1524—56. The editor was the learned Tunisian Jew, R. Jacob ben Chaim; a Latin translation of his preface will be found in Kennicott's Second Dissertation, p. 229 ff. The great feature of his work lay in the correction of the text by the precepts of the Masorah, in which he was

v various sizes, 1614, 1615, 1619, 1628; Plantin,
Antwerp, various sizes, 1596;
Hartmann, Frankfort-on-Odet, various sizes, 1595,
1598; and Crato (Kruft), Witttemberg, 4to, 1586.
The Royal or Antwerp Polyglot, printed by
Plantin, 8 vols. fol. 1569-72, at the expense of
Philip II. of Spain, and printed by Aries Montaus,
and others, took the Computasian as the basis
of its text, and its notes were collated with those
of Bem-b'g's, so as to produce a mixture of the two.
This text was followed both in the Paris Polyglet
of Le Jay, 9 vols. fol. 1645, and in Walton's Poly-
glot, London, 6 vols. fol. 1657. The printing of
the text in the Paris Polyglet is said to be very incorrect.
The same text appeared also in Plan-
tin's later Bible, with Latin translations, fol.
1571, 1584; and in various other Hebrew-Latin
Bibles: Burgos, fol. 1581; Geneva, fol. 1600, 1618;
Leyden, 8vo, 1613; Frankfort-on-Maine (by Knoch),
fol. 1681; Vienna, 8vo, 1743; in the quadrinu-
ragial Polyglet of Reineceus, Leipsic, 3 vols. fol.
1750-51; and also in the same editor's earlier 8vo
Bible, Leipsic, 1725, for which, however, he pro-
fesses to have compared MSS.
A text composed of several of the preceding
was issued by the Leipsic professor, Elias Hutter,
at Hamburg, fol. 1587: it was intended for stu-
dents, the servile letters being distinguished from
the radicals by hollow type. This was reprinted in
his uncompleted Polyglet, Nuremberg, fol
1591, and by Nissel, 8vo, 1662. A special men-
tion is also due to the labors of the elder Buxtorf,
who carefully revised the text after the Masorah,
publishing it in 8vo at Basle, 1611, and again,
after a fresh revision, in his valuable Rabbinical
Bible, Basle, 2 vols. fol. 1618-19. This text was
also reprinted at Amsterdam, 8vo, 1639, by R. Ma-
nasseh ben Israel, who had previously issued, in
1631, 1636, a text of his own with arbitrary gram-
natical alterations.
Neither the text of Hutter nor that of Buxtorf
was without its permanent influence; but the He-
brew Bible which became the standard to subse-
quent generations was that of Joseph Athan, a
learned rabbi and printer at Amsterdam. His text
was based on a comparison of the previous editions
with two MSS.; one bearing date 1299; the other
a Spanish MS., boasting an antiquity of 900 years.
It appeared at Amsterdam, 2 vols. 8vo, 1661, with
a preface by Leusden, professor at Utrecht; and
as both Hebrew texts have impressed this with one of
them, much reason for their beauty and correctness;
and a gold chain and medal were conferred on Athias,
in token of their appreciation of them, by the
States General of Holland. The progeny of the
text of Athias, was as follows: (a) That of Clo-
dius, Frankfort-on-Maine, 8vo, 1677, reprinted,
with alterations, 8vo, 1692, 4to, 1716. (b) That
of Jablonsky, Berlin, large 8vo or 4to, 1699;
reprinted, but less correctly, 12mo, 1712. Jablon-
sky collated all the cardinal editions, together
with several MSS., and bestowed particular care on
the vowel-points and accents. (c) That of Van
der Hooght, Amsterdam and Utrecht, 2 vols. 8vo,
1745. This edition, of good reputation in its accuracy,
but above all for the elegance and distinct-
ness of its type, deserves special attention, as con-
stituting our present testa recepta. The text
was chiefly formed on that of Athias: no MSS.
were used for it, but it has a collection of various
readings from printed editions at the end. The
Masoretic readings are in the margin. (d) That
of Opitz, Kiel, 4to, 1760, very accurate: the text
of Athias was corrected by comparing seventeen
printed editions and some MSS. (e) That of J.
H. Michaelis, Halle, 8vo and 4to, 1720. It was
based on Jablonsky: twenty-four editions and five
Furst MSS. were collated for it, but, as has been
found, not thoroughly. Still the edition is much
esteemed, partly for its correctness, and partly for
the labor of its notes and periptotes. Van der Hooght
pronounces it superior to Van der Hooght's in every
respect except legibility and beauty of type.
These editions show that on the whole the text
was by this time firmly and permanently estab-
lished. We may well regard it as a providential
situation that, having been early conformed by
Ben Chaim to the Masorah, the printed text should
in the course of the next two hundred years have
acquired in this its Masoretic form, a sacredness
which the subsequent labors of a more extended
criticism could not venture to contam. Whatever
errors, and those by no means unimportant, such
wider criticism may lead us to detect in it, the
ground of the corrections which even the most
cautious critics would adopt are often too precarious
to enable us, in departing from the Masoretic, to
obtain any other satisfactory standard: while in
practice the mischief that would have ensued from
the introduction into the text of the emendations
of Houbigant and the critics of his school would
have been the occasion of insubstantial and irre-
parable harm. From all such it has been happily
preserved free; and while we are far from deeming
its authority absolute, we yet value it, because all
experience has taught us that, in seeking to re-
model it, we should be introducing into it worse
imperfections than those which we desire to remove,
while we should lose that which is, after all, no light
advantage, a definite textual standard universally
accepted by Christians and Jews alike. So essen-
tially different is the treatment demanded by the
text of the Oth Test.-sent and by that of the New.
The modern editions of the Hebrew Bible now in
use are all based on Van der Hooght. The
earliest of these was that of Simonis, Halle, 1752,
and more correctly 1767: reprinted 1822, 1828.
In England the most popular edition is the sterling
one by Judah D'Allemann, 8vo, of high repute for
correctness: there is also the pocket edition of
Bagster, on which the same editor was employed.
In Germany there are the 8vo edition of Hahn;
and in the 12mo edition parallel references were
placed by Rosenmuller (said by Kell to contain some conjec-
tural alterations of the text by Landschreiber);
and the 8vo edition of Theile.

4. Critical Labora and Apparatus. — The nas-
history of the criticism of the text has already been brought down to the period of the labors of the Masorets and their immediate successors. It must be here resumed. In the early part of the 13th century, R. Meir Levita, a native of Burgos and inhabitant of Toledo, known by abbreviation as Haramah, by patronymic as Tos eos, wrote a critical work on the Pentateuch called The Book of the Masoroth the Hedge of the Law, in which he endeavored, by a collation of MSS., to ascertain the true reading in various passages. This work was of high repute among the Jews, though it long remained in manuscript: it was eventually printed at Florence in 1550; again, incorrectly, at Berlin, 1761. At a later period R. Menahem de Lencano collated ten MSS., chiefly Spanish, some of them five or six centuries old, with Bomberg's 4to Bible of 1544. The results were given in the work רדנית יאכ, "Light of the Law," printed in the ידית יאכ, Venice, 1618, afterwards by itself, but less accurately, Amsterdam, 1659. They relate only to the Pentateuch. A more important work was that of R. Solomon Notzi of Mantua, in the 17th century, ידנית יאכ, "Repairer of the Bench": a copious critical commentary on the whole of the T. O., drawn up with the aid of MSS. and editions, of the Masorah, Talmud, and all other Jewish resources within his reach. In the Pentateuch he relied much on Tudoswin; with R. Menahem he had had personal intercourse. His work was first printed, 116 years after its completion, by a rich Jewish physician, Raphael Chaim, Mantua, 4 vols. 4to, 1742, under the title ידית יאכ: the emendations on Proverbs and Job alone had appeared in the margin of a Mantuan edition of those books in 1725. The whole was reprinted in a Vienna O. T., 4to, 1813-16.

Meanwhile various causes, such as the controversies awakened by the Samaritan text of the Pentateuch, and the advances which had been made in N. T. criticism, had contributed to direct the attention of Christian scholars to the importance of a more extended criticism of the Hebrew text of the O. T. In 1745 the expectations of the public were raised by the Prognum ent of Homi vant, of the Oratory at Paris; and in 1750 his edition appeared. He generously predicted to the public that his text was that of Van der Hoeft, dictated of points, and of every vestige of the Masorah, which Homi vant, though he used it, rated at a very low value. In the notes copious emendations were introduced. They were derived — (a) from the Samaritan Pentateuch, which Homi vant preferred in many respects to the Jewish; (b) from twelve Hebrew MSS., which, however, do not appear to have been regularly collated, their readings being chiefly given in those passages where they supported the editor's emendations; (c) from the Septuagint and other ancient versions; and (d) from an extensive array of critical conjectures. An accompanying Latin translation embodied all the emendations adopted. The notes were reprinted at Frankfort-on-Main, 2 vols. 4to, 1777; the editor thus constituted the cream of the original volumes, the splendor of which was disproportionate to their value, as they contained no materials besides those on which the editor directly rested. The whole work was indeed too ambitious: its canons of criticism were thoroughly unsound, and its ventures rash. Yet its merits were also considerable: and the sweetness of the path which Homi vant was essaying may be pleaded in extenuation of its faults. It effectually broke the Masoretic coat of ice wherewith the Hebrew text had been incrust; but it afforded also a severe warning of the difficulty of finding any sure standing-ground beneath.

In the same year, 1758, appeared at Oxford Kennicott's first dissertation on the state of the Old Testament. In the Printed Text: the second followed in 1759. The result of these and of the author's subsequent annual reports was a subscription of nearly £10,000 to defray the expenses of a collation of Hebrew MSS. throughout Europe, which was performed from 1760 to 1769, partly by Kennicott himself, but chiefly, under his direction, by Professor Drum of Helmut and others. The collation extended in all to 851 Jewish and 16 Samaritan MSS., and 40 printed editions, Jewish works, etc.; of which, however, only about half were collated throughout, the rest in select passages. The results appeared at Oxford in 2 vols. fol. 1765-80: the text is Van der Hoeft's, unpointed: the various readings are given below: comparisons are also made of the Jewish and Samaritan texts of the Pentateuch, and some of the readings in Samaritan and Chronicles, etc. They much disappointed the expectations that had been raised. It was found that a very large part of the various readings had reference simply to the omission or insertion of the motes lectios: while of the rest many obviously represented no more than the mistakes of separate transcribers. Happily for the permanent interests of criticism this had not been anticipated. Kennicott's own weakness of judgment may also have made him less aware of the smallness of the immediate results to follow from his persevering toil; and thus a Heraclean task, which in the present state of critical knowledge could scarcely be undertaken, was providentially, once for all, performed with a thoroughness for which, to the end of time, we may well be thankful.

The labors of Kennicott were supplemented by those of De Rossi, professor at Parma. His plan differed materially from Kennicott's: he confined himself to a specification of the various readings in select passages; but for these he supplied also the critical evidence to be obtained from the ancient versions, and from all the various Jewish authorities. In regard to manuscript resources, he collected in his own library 1,031 MSS., more than Kennicott had collated in all Europe; of these he collated 617, some being those which Kennicott had collated before: he collated also 134 extraneous MSS., that had escaped Kennicott's fellow-laborers; and he recapitulated Kennicott's own various readings. The readings of the various printed editions were also well examined, with the apparent object of determining on which it treats, the evidence in De Rossi's work may be regarded as almost complete. It does not contain the text. It was published at Parma, 2 vols. 4to, 1784-88: an additional volume appeared in 1798.

A small Bible, with the text of Kennicott, and a selection of the more important readings of Kennicott and De Rossi, was issued by Heinlein and Meiser at Leipzig, 8vo, 1794. It is printed (except some copies) on bad paper, and is reputed very incorrect. A better critical edition is that of Jahn, Vienna, 4 vols. 8vo, 1806. The text is Van der Hoeft's, corrected in nine or ten places; the more important various readings are subjoined.
with the authorities, and full information is given. But, with injudicious peculiarity, the books are arranged in a new order; those of Chronicles are split up into fragments, for the purpose of comparison with the parallel books; and only the principal accents are retained.

The text of the new critical collations to public account was made by Boothroyd, in his unpointed Bible, with various readings and English notes, Pontebruck, 4to, 1810–16, at a time when Humbug's principles were still in the ascendant. This was followed in 1821 by Hamilton's Codex Crinicus, modeled on the plan of the N. T. of Griesbach, which is, however, hardly adapted to the O. T., in which the criticism of the text of which diplomatic evidence is of so much less weight than in the case of the N. T. The most important contribution towards the formation of a revised text that has yet appeared is unquestionably Dr. Delitzsch's Hebrew Text of the O. T., revised from critical Sources, 1855. It presents a convenient epitome of the more important various readings and emendations of the MSS., and with the authorities for them; and in the emendations of the text which he sanctions, when there is any Jewish authority for the emendation, he shows on the whole a fair judgment. But he ventures on few emendations for which there is no direct Jewish authority, and seems to have practically fallen into the error of disparaging the critical aid to be derived from the ancient versions, as much as he had by the critics of the last century been wildly excited.

It must be confessed that little has yet been done for the systematic criticism of the Hebrew text from the ancient versions, in comparison of what might be accomplished. We have even yet to learn what critical treasures those versions really contain. They have, of course, at the cost of much private labor, been freely used by individual scholars, but the texts implied in them have never yet been fairly exhibited or analyzed, so as to enable the literary world generally to form any just estimate of their real value. The readings involved in their renderings are in Humbug's volumes only adduced when they support the emendations which he desired to advance. By De Rossi they are treated merely as subsidiary to the MSS., and are therefore only adduced for the passages to which his manuscript collations refer. Nor have Boothroyd's or Davidson's treatment of them any pretensions whatever to completeness. Should it be alleged that they have given all the important version-readings, it may be at once replied that such is not the case, nor indeed does it seem possible to decide prior fictae of any version-reading whether it be important or not: many have doubtless been passed over again and again as unimportant, which yet either are genuine readings or contain the elements of them. Were the whole of the Septuagint variations from the Hebrew text lucidly exhibited in Hebrew, they would in all probability serve to suggest the true reading in many passages in which it has not yet been recovered. The first attempt to turn from the Greek to the cause of textual criticism by any scholar who would undertake the labor. Skill, scholarship, and patience would be required in deciphering many of the Hebrew readings which the Septuagint represents, and in cases of uncertainty that uncertainty should be noted. For the books of Samuel the task has been grappled with, appari-

ently with care, by Thenius in the Exegetisches Handbuch; but the readings are not conveniently exhibited, being given partly in the body of the commentary, partly at the end of the volume. For the Psalms we have Reiche's Kurze Zusammenstellung aller Auszeichen von heb. Texte in der Ps. über die letzten LXX. und LXXI., etc.; but the criticism of the Hebrew text was not the author's direct object.

It might be well, too, if along with the version-readings were collected together all, or at least all the more important, conjectural emendations of the Hebrew text proposed by various scholars during the last hundred years, which at present lie buried in their several commentaries and other publications. For of these, also, it is only when they are so exhibited as to invite an extensive and simultaneous criticism that any true general estimate will be formed of their worth, or that the pearls among them, whether few or many, will become of any general service. That by far the greater number of them will be found beside the mark we may at once admit; but obviously, or an unpopular name, or other cause, has probably withheld attention from many suggestions of real value.

5. Principles of Criticism.—The method of procedure required in the criticism of the O. T. is widely different from that practiced in the criticism of the N. T. Our O. T. textus receptus is a far more faithful representation of the genuine Scripture, nor could we on any account afford to part with it; but, on the other hand, the means of detecting and correcting the errors contained in it are more precarious, the results are more uncertain, and the ratio borne by the value of the diplomatic evidence of MSS. to that of a good critical judgment and sagacity is greatly diminished. It is indeed to the direct testimony of the MSS. that, in endeavoring to establish the true text, we must first have recourse. Against the general consent of the MSS. a reading of the textus receptus, merely as such, can have no weight. Where the MSS. disagree, it has been laid down as a canon that we ought not to let the mere numerical majority preponderate, but should examine what is the reading of the earliest and best. This is no doubt theoretically correct, but it has not been generally carried out; nor, while so much remains to be done in the ancient versions, must we clamor too loudly for the expenditure, in the sifting of MSS. of the immense labor which the task would involve; for internal evidence can alone decide which MSS. are entitled to greatest authority, and the researches of any single critic into their relative value could not be relied on till checked by the corresponding researches of others, and in such researches few competent persons are likely to engage. While, however, we content ourselves with judging of the testimony of the MSS. to any particular reading by the number sanctioning that reading, we must remember to estimate not the absolute number, but the relative number to the whole number of MSS. collated for that passage. The circumstance that only half of Kennicott's 36 MSS., and one of De Rossi's, were collated throughout, as also that the number of MSS. greatly varies for different books of the O. T., makes attention to this important. Davidson, in his Revision of the Heb. Text, has gone by the absolute number, which he should only have done when that number was very small.

The MSS. lead us for the most part only to our
first sure standing-ground, the Masoretic text; in other words, to the average written text of a period later by a thousand or fifteen hundred years than the latest book of the O. T. It is possible, however, that in particular MSS. pre-Masoretic readings may be incidentally preserved. Hence isolated MS. readings may serve to confirm those of the ancient versions.

In ascending upwards from the Masoretic text, our first critical materials are the Masoretic Keris, valuable as witnesses to the preservation of many authentic readings, but on which it is impossible to place any degree of reliance, because we can never be certain, in particular instances, that they represent more than mere unauthorized conjectures. A Keris, therefore, is not to be received in preference to a Chethi or Caliph unless confirmed by other sufficient evidence, external or internal; and in reference to the Keris let the rule be borne in mind, "Prodici scriptioni praeta suis," many of them being but arbitrary softening down of difficult readings in the genuine text. It is furthermore to be observed, that the reading of any number of MSS. agreeing are, in nearly the case, with a Masoretic Keris, the existence of such a Keris may be a damage rather than otherwise to the weight of the testimony of these MSS., for it may itself be the untrustworthy source whence their reading originated.

The express assertions of the Masorah, as also of the Targum, respecting the true reading in particular passages, are of course important; they indicate the views entertained by the Jews at a period prior to that at which our oldest MSS. were made.

From these we ascend to the version of Jerome, the most thoroughly trustworthy authority on which we have to rely in our endeavors to amend the Masoretic text. Dependent as Jerome was, for his knowledge of the Hebrew text and everything respecting it, on the Palestinian Jews, and accurate as are his renderings, it is not too much to say that a Hebrew reading which can be shown to have been received by Jerome, should, if sanctioned or countenanced by the Targum, be so far preferred to one upheld by the united testimony of all MSS. whatever. And in general we may definitely make out the reading which Jerome followed. There are, no doubt, exceptions. Few would think of placing much reliance on any translation as to the presence or absence of a simple y equal in the original text. Again in Psalm cxix. 2, where the authority of Jerome and of other translators is alleged for the reading יִשָּׁמְעֵה, "a peoples," while the great majority of MSS. give יָשָׁמְעֵה, "my people," we cannot be certain that he did not really read יָשָׁמְעֵה, regarding it, although wrongly, as an appositive plural. Hence the precaution necessary in bringing the evidence of a version to bear upon the text; when used with such precaution, the version of Jerome will be found of the very greatest service.

Of the other versions, although more ancient, none can on the whole be reckoned, in a critical point of view, so valuable as his. Of the Greek versions of Aquila, Symmachus, and Theodotion, we possess but few fragments. The Syriac bears the impress of having been made too much under the influence of the Septuagint. The Targums are too often paraphrastic. For a detailed account of them the reader is referred to the various articles [versions, etc.]. Still they all furnish most important material for the correction of the Masoretic text: and their cumulative evidence, when they all concur in a reading different to that which it contains, is very strong.

The Septuagint itself, venerable for its antiquity but on various accounts untrustworthy in the readings which it represents, must be treated for critical purposes in the same way as the Masoretic Keris. It doubtless contains many authentic readings of the Hebrew text not otherwise preserved to us; but, on the other hand, the presence of any Hebrew reading in it can pass for little, unless it can be independently shown to be probable that that reading is the true one. It may, however, suggest the true reading, and it may confirm it where supported by other considerations. Such, for example, is the case with the almost certain correction of יִשָּׁמְעֵה, "shall keep holyday to thee," for יִשָּׁמְעֵה, "then shall restrain," in Psalm lxixv. 10. In the opposite direction of confirming a Masoretic reading against which later testimonies militate, the authority of the Septuagint, on account of its age, necessarily stands high.

Similar remarks would, at prior, seem to apply to the critical use of the Samaritan Pentateuch: it is, however, doubtful whether that document be of any real additional value.

In the case of the O. T., unlike that of the N. T., another source of emendations is generally allowed, namely, critical conjecture. Had we any reason for believing that, at the date of the first translation of the O. T. into Greek, the Hebrew text had been preserved immoveable, we might well abstain from venturing on any emendations for which no direct external warrant could be found; but the Septuagint version is nearly two centuries younger than the latest book of the O. T.; and as the history of the Hebrew text seems to show that the care with which its purity has been guarded has been continually on the increase, so we must infer that it is just in those periods that the few corruptions which it has sustained would be most likely to avert. Few enough they may be; but, if analogy may be trusted, they cannot be altogether imaginary. And thus arises the necessity of submitting, besides the emendations suggested by the MSS. and versions, those also which originate in the simple skill and honest ingenuity of the critic: of whom, however, while according him this license, we demand in return that he shall bear in mind the sole legitimate object of his investigations, and that he shall not obtund upon us any conjectural reading, the genuineness of which he cannot fairly establish by circumstantial evidence. What that circumstantial evidence shall be it is impossible to define beforehand: it is enough that it be such as shall, when produced, bring some conviction to a reasoning mind.

There are cases in which the Septuagint will supply an indirect warrant for the reception of a reading which it nevertheless does not directly sanction; thus in Ez. xii. 14, where the present text has the meaningless word סְפַּר, "place," while the Septuagint inapropriately reads סְפַּר, "eight," there arises a strong presumption that both readings are equally corruptions of סְפַּר, "found
In the Psalms there is a remarkable difference between the Hebrew text and the Septuagint and the Vulgate. The text of the former is the older, the latter were produced at a later period. In some instances, the Hebrew text is more correct than the Septuagint, but it is not necessary to go into details to show that the Hebrew text is the older. The critical controversy has been carried on for centuries, and the results have been inconclusive.

The Psalms are divided into three main sections, each with its own unique characteristics. The first section, consisting of Psalms 1 through 40, is characterized by a sense of triumph and liberation. This section often reflects themes of deliverance and praise to God. The second section, containing Psalms 41 through 89, is marked by a more personal and introspective tone, reflecting the psalmist's struggles and weaknesses. The third section, made up of Psalms 90 through 150, is characterized by a sense of hope and victory, with a particular emphasis on the theme of Messiahship and the future glory of God's kingdom.

The Psalms are not only a collection of individual poems but also a coherent literary work, demonstrating a high degree of unity and coherence. The various psalms are united by a common theme of praise, thanksgiving, and lament, and they are arranged in a way that reflects the progression of the biblical narrative.

In summary, the Psalms are a rich and complex body of literature that offers insight into the religious and cultural life of ancient Israel. They are both a source of inspiration and a means of understanding the religious thought of the time.
psalm been originally alike, it is almost incredible that any transcriber should have rendered them different. With greater probability in Gen. xxvi, 53, Hitzig (Die Erz. des. Kirch., p. 126) takes the final \(\text{T}\), and, altering it into \(\text{D}\), transfers it into ver. 34, making the preceding word the infinitive. That glosses have occasionally found their way into the text we may well believe. The words \(\text{S}\) in Is. x. 5 have much the appearance of being a gloss explanatory of \(\text{S}\) (Hitzig, Beitr. pp. 157, 158), though the verse can be well construed without their removal: and that Deut. x. 6, 7, have crept into the text by some illegitimate means, seems, notwithstanding Heitzsberg's defense of them (Gen. of Pent. ii.), all but certain.

Willful corruptions of the text on pseudepigraphal ground has also been occasionally charged upon the Jews; but the allegation has not been proved, and their known reverence for the text militates against it. More trustworthy is the negative bearing of that hostility of the Jews against the Christians, which, even in reference to the Scriptures, has certainly existed: and it may be fairly argued that it Aquila, who was employed by the Jews as a transcriber on pseudepigraphal grounds, had ever heard of the modern reading \(\text{S}\), as a lion; in Ps. xxii. 17 (16), he would have been too glad to follow it, instead of translating \(\text{S}\), they pierced," by \(\text{S}\).

To the criticism of the vowel-marks the same general principles must be applied, ortetia nonatam dies, as to that of the consonants. Nothing can be more remote from the truth than the notion that we are at liberty to supply vowels to the text at our unfettered discretion. Even Hitzig, who does not generally err on the side of caution, holds that the vowel-marks have in general been rightly fixed by tradition, and that other than the Masoretic vowels are seldom required, except when the consonants have been first changed (Beitr. p. 119).

In conclusion, let the reader of this or any other article on the method of dealing with errors in the text beware of drawing from it the impression of a general correctness of the text which does not necessarily exist. The works of Biblical scholars have been on the whole more disfigured than adorned by the emendations of the Hebrew text which they have suggested; and the cautious by which the more prudent have endeavored to guard against the abuse of the license of emending, are, even when critically unsound, far more commendable, that they show a healthy respect for the Masoretic text which might with other advantage have more generally felt. It is difficult to reduce to formal rules the treatment which the text of the O. T. should receive, but the general spirit of it might thus be given: Deut the Masoretic text worthy of confidence, but do not refuse any emendations of it which can be fairly established: of such judge by the evidence adduced in their support which advanced, not by any supposed previous necessity for them, respecting which the most eminent views have been frequently entertained; and, lastly, remember that the judgment of the many will correct that of the few, the judgment of future generations that of the present, and that permanent neglect generally awaits emendations which approve themselves by their brilliancy rather than by their soundness. (See generally Walton's Prolegomena, Kennicott's Diathesis Generalis; De Rossi's Prolegomena; Rp. Marsh's Lectures; Davidson's Bib. Criticism, vol. i; and the Introductions of Horne and Davidson, of De Wette, Haverbeck, Keil, and Bleek.)

B. — Interpretation of the Old Testament.

1. History of the Interpretation. — We shall here endeavor to present a brief but comprehensive sketch of the treatment which the Scriptures of the O. T. have in different ages received. At the period of the rise of Christianity two opposite tendencies had manifested themselves in the interpretation of them among the Jews; the one to an extreme literalism, the other to an arbitrary allegorism. The former of these was mainly developed in Palestine, while the Law of Moses was, from the nature of things, most completely observed. The Jewish teachers, acknowledging the obligation of that law in its minutest precepts, but overlooking the moral principles on which those precepts were founded and which they should have understood from them, endeavored to supply by other means the imperfections inherent in every law in its mere literal acceptance. They added to the number of the existing precepts, they defined more minutely the method of their observance; and thus practically further obscured, and in many instances overthrew the inward spirit of the law by new outward traditions of their own (Matt. xx. 20). On the other hand at Alexandria the allegorizing tendency prevailed. Gems of it had appeared in the apocryphal writings, as where in the book of Wisdom (xxiii. 24) the priestly vestments of Aaron had been treated as symbolical of the universe. It had been fostered by Aristobulus, the author of the Εκκλησίας τῆς Μωυσέως γραφής, quoted by Clement and Eusbinus; and at length, two centuries later, it culminated in Philo, from whose works we best gather the form which it assumed. For in the general principles of interpretation which Philo adopted, he was but following, as he himself assures us, in the track which had been previously marked out by those, probably the Therapeutae, under whom he had studied. His expositions have chiefly reference to the writings of the Law and Prophecy, the man initiated above all others into divine mysteries; and in the persons and things mentioned in these writings he traces, without denying the outward reality of the narrative, the mystical designations of different abstract qualities and aspects of the invisible. Thus the three angels who came to Abraham represent with him food in his essential being, his beneficent power, and in his governing power. Abraham himself, in his dealings with Sarah and Hagar, represents the man who has an admiration for contemplation and knowledge: Sarah, the virtue which is such a man's legitimate partner: Hagar, the encyclical accomplishments of all kinds which serve as the handmaiden of virtue, the prerequisites for the attainment of the highest, in whom the beneficent power, and in his governing power. Abraham itself, in his dealings with Sarah and Hagar, represents the man who has an admiration for contemplation and knowledge: Sarah, the virtue which is such a man's legitimate partner: Hagar, the encyclical accomplishments of all kinds.
old testament

an opponents of our Saviour on the moral teaching
involved in the simpler acception of Scripture. And, secondly, his exposition is not the result of a
legitimate drawing forth of the spiritual import which the Scripture contains, but of an endeavor to
engraft the tenebrous philosophy upon it. Of a
Messiah, outside the O. T. throughout spiritually
pointed, Philo, if we may so call Plato, the wisdom of
Plato he contrives to find in every page. It
was in fact his aim so to find it. The Alexandrian
interpreters were striving to vindicate for the
Hebrew Scriptures a new dignity in the eyes of
the Gentile world, by showing that Moses had anticipated
all the doctrines of the philosophers of
Greece. Hence, with Aristotle, Moses was an
earlier Aristotle, with Plato, an earlier Plato. The
Bible was with them a store-house of all the philosophy
which they had really derived from other sources; and, in so treating it, they lost sight of the
inspired theology, the revelation of God to man,
which was its true and peculiar glory.

It must not be supposed that the Palestinian
literalism and the Alexandrian allegorism ever
remained entirely distinct. On the one hand we
find the Alexandrian Philo, in his insistence on
special laws, commending just such an observance
of the letter and an infraction of the spirit of the
prohibition to take God's name in vain, as our
Saviour exposes and condemns in Matt. v. 33-37.
On the other hand among the Palestinians, both
the high-priest Eleazar (ap. Euseb. Prop. E. viii.
9), and at a later period the historian Josephus
(\textit{Ant.} \	extit{procn.} 4), speak of the allegorical sig-
ficance of the Mosaic writings in terms which
lead us to suspect that their expositions of them,
had they come down to us, would have been found
to contain much that was arbitrary. And it is
probable that traditional allegorical interpretations
of the sacred writings were current among the
Essenes. In fact the two extremes of literalism and
allegory, in their neglect of the direct moral teaching and prophetic import of Scripture,
had too much in common not to mingle readily
the one with the other.

And thus we may trace the development of the
two distinct yet coexistent spheres of Halachah
and Hagadah, in which the Jewish interpretation of
Scripture, as shown by the later Jewish writ-
ings, ranged. The former (דנה, "repetition," "following") embraced the traditional legal deter-
nimations for practical observance: the latter
(דנה, "discourse") the unrestrained inter-
pretation, of no authentic force or immediate practi-
cal interest. Holding fast to the position for
which, in theory, the Alexandrian allegorists had
so strenuously contended, that all the treasures of
wisdom and knowledge, including their own specula-
tions, were virtually contained in the Sacred
Law, the Jewish doctors proceeded to define the
methods by which they were to be elicited from it.
The meaning of Scripture was, according to them,
either that openly expressed in the words (לענונ, sensus innotus), or else that deduced from them
(לענונ, לטנונ, sensus illatus). The former
was itself either literal, לטנונ, or figurative and
mystical, לדרד.
The latter was partly obtained
by simple logical inference: but partly also by the
arbitrary detection of reconcile meanings symboli-

cally indicated in the places, grammatical struc-
ture, or orthography of words taken apart from
their logical context. This last was the calalistic
interpretation (דרדר, "reception," "received
tradition"). Special mention is made of three
processes by which it was pursued. By the pro-
cess Gematria (נילוד, geometria) a symbolical
import was attached to the number of times that a
word or letter occurred, or to the number which one or more letters of any word represented.

By the process Notatjekon (הקולג, nautoriciun),
new significant words were formed out of the ini-
tial or final words of the text, or else the letters of
a word were constituted the initials of a new
significant series of words. And in Temurah
(דרדר, "change") new significant words
were obtained from the text either by anagram
(e. g. לול, "Messiah" from לול, Ps. xxi.
1), or by the alphabet Atbash, wherein the letters
א, ב, etc., were replaced by מ, מ, etc.
Of such
tartifices the sacred writers had possibly for special
purposes made occasional use; but that they
should have been ever applied by any school to the
general exegesis of the O. T. shows only into what
tired and laborious on Scripture may occasionally
degenerate.

The earliest Christian non-apostolic treatment
of the O. T. was necessarily much dependent on
that which it had received from the Jews. The
Alexandrian allegorism reappears the most fully in
the fanciful epitome of Barnabas; but it influenced
also the other writings of the sub-apostolic Fathers.
Even the Jewish cabalism passed to some extent
into the Christian Church, and is said to have
been largely employed by the Gnostics (Iren. i. 3,
8, 16, ii. 24). But this was not to last. Irenaeus,
himself not altogether free from it, raised his voice
against it; and Tertullian well laid it down as a
canon that the words of Scripture were to be inter-
preted only in their logical connection, and with
reference to the occasion on which they were ut-
tered (De Proc. Decr. 9). In another respect all
was changed. The Christian interpreters by their
belief in Christ stood on a vantage-ground for the
comprehension of the whole burden of the O. T.
by which the Jews had never reached: and thus how-
ever they may have erred in the details of their
interpretations, they were generally conducted by
them to the right conclusions in regard of Chris-
tian doctrine. It was through reading the O. T.
prophecies that Justin had been converted to
Christianity (\textit{Dial. Tragph.} p. 224, 225). The
view held by the Christian Fathers that the whole
document of the N. T. had been virtually contained
and foreshadowed in the O. T., generally induced
the search in the O. T. for such Christian doctrine
rather than for the old philosophical dogmas.
Thus we find Justin asserting his ability to prove
by a careful enumeration that all the ordinances
of Moses were types, symbols, and discourses of
those things which were to be realized in the
Messiah (\textit{Dial. Tragph.} p. 261). Their general convic-
tions were doubtless here more correct than the
details which they advanced; and it would be easy
to multiply from the writings of either Justin, Ter-
tullian, or Irenaeus, typical interpretations that
could no longer be defended. Yet even these
were no unrestrained speculations: they were all de-
signs to illustrate what was elsewhere unequivocally revealed, and were limited by the necessity of conforming in their results to the Catholic rule of faith, the tradition handed down in the Church from the Apostles. (Strom. ii. 4.)

Hebrews, vii. 27: It was moreover laid down by Tertullian, that the language of the Prophets is generally allegorical and figurative, was not always so. (De Res. Genes. 19;) though we do not find in the early Fathers any causes of interpretation in this respect. A various combination, as it must seem to us, of literal and spiritual interpretation meets us in Justin’s exposition, in which he is not alone, of those prophecies which he explains of millenial blessings: for while he believed that it is the literal Jerusalem which will be restored in all her splendor for God’s people to inhabit, he yet contends that it is the spiritual Israel, not the Jews, that will eventually dwell there (Dial. Tryph. pp. 306, 352;). Both Justin and Irenaeus upheld the historical reality of the events related in the O. T. narrative. Both also fell into the error of defending the less commendable proceedings of the patriarchs and the forefathers of the Jewish Church, and the traditions of the Christian Church, first laid down. Clement had led the way. He held that in the Jewish law a certain import was to be traced: literal, symbolical, moral, prophetical (Strom. i. c. 28). Of these the second, by which the persons and things mentioned in the law were treated as symbolical of the material and moral universe, was manifestly derived from no Christian source, but was rather the relic of the philosophical element that others had previously engraven on the Hebrew Scriptures. The new gold had not yet shaken off the old alloy: and in practice it is to the symbolical class that the most objectionable of Clement’s interpretations will be found to belong. Such are those which he repeats from the book of Wisdom and from Philo of the high priest’s garment, and of the rock which Moses struck at Hagar, or that of the branches of the sacred candelabrum, which he supposes to denote the sun and planets. Nor can we commend the prominence to allegorism which Clement everywhere displays, and which he would have defended by the unceasing distinction which he handed down to Origen between μαρτυρία and σκιασ, and by the doctrine that the literal sense leads only to a more complete faith, while for the higher Christian life the allegorical is necessary. Yet in Clement’s recognition of a literal, a moral, and a prophetical import in the Law, we have the germ of the aspects in which the O. T. has been regarded by all subsequent ages; and his Christian treatment of the sacred oracles is shown by his acknowledging, equal in Tertullian and Irenaeus, the value and authority of the prophecies, as the key to their true interpretation (Strom. vii. c. 17).

Clement was succeeded by his scholar Origen. With him Biblical interpretation showed itself more decidedly Christian; and while the wisdom of the Egyptians, embodied anew, became the permanent inheritance of the Church, the distinctive symbolical meaning which philosophy had placed upon the O. T. disappeared. Origen’s principles of interpretation are fully unfolded by him in the De Prinicipiis, iv. 11 ff. He recognizes in Scripture, as it were, a holy, soul, and spirit, answering to the body, soul, and spirit of man: the first serves for the perfection of the body, the second for the perfection of the soul, and the third for that of the perfect. The reality and the utility of the first, the letter of Scripture, he proves by the number of those whose faith is nurtured by it. The second, which is in fact the moral sense of Scripture, he illustrates by the interpretation of Deut. xxiv. 4 in 1 Cor. ix. 9. The third, however, is that on which he principally dwells, showing how the Jewish law, spiritually understood, contained a shadow of good things to come; and how the X. T. had recognized such a spiritual meaning not only in the narrative of Moses, and in his account of the tabernacle, but also in the historical narrative of the other books (1 Cor. xii. 11; Gal. iv. 21-31; Heb. viii. 5; Rom. ixi. 4, 5). In regard of what he calls the soul of Scripture, his views are, it must be owned, somewhat uncertain. His practice with reference to it seems to have been less commensurable than his principles. It should have been the moral teaching of Scripture arising out of the literal sense applied in accordance with the rules of analogy: but the moral interpretations actually given by Origen are ordinarily little else than a series of allegorisms of moral tendency; and thus he is, unfortunately, more consistent with his own practice when he assigns to the moral exposition not the second but the third place, exalting it above the mystical or spiritual, and so removing it further from the literal (Hom. in Gen. ii. 6). Both the spiritual and (to use his own term) the psychical meaning he held to be always present in Scripture; the bodily not always. Alkike in the history and the law, he found things inserted or expressions employed which could not be literally understood, and which were intended to direct us to the pursuit of a higher interpretation than the purely literal. Thus the immoral actions of the patriarchs were to him stumbling-blocks which he could only avoid by passing over the literal sense of the narrative, and tracing in it a spiritual sense distinct from the literal; though even here occasional efforts to reject the latter not without effect, but simply as profane. For while he held the body of Scripture to be but the garment of its spirit, he yet acknowledged the things in Scripture which were literally true to be far more numerous than those which were not; and occasionally, where he found the latter tend to edifying, as for instance in the moral commandments of the Decalogue as distinguished from the sacramental and therefore typical law, he deemed it needless to seek any allegorical meaning (Hom. in Nov. xi. 1). Origen’s own expositions of Scripture were, no doubt, less successful than his investigations of the principles on which it ought to be expounded. Yet as the appliances which he brought to the study of Scripture made him the father of Biblical criticism, so a detailed study of the Christian commentaries his were the first: a fact not to be forgotten by those who would estimate aight their merits and defects.

The labors of one genuine scholar became the inheritance of the next: and the value of Origen’s researches was best appreciated, a century later, by Jerome. He adopted and repeated most of Origen’s principles; but he exhibited more judgment in
practical application of them: he devoted more attention to the literal interpretation, the basis of the rest, and he brought also larger stores of learning to bear upon it. With Origen he held that Scripture was to be understood in a threefold manner, literally, tropologically, and spiritually: the first meaning was the lowest, the last the highest (tom. v. p. 172, Vall.). But elsewhere he gave a new threefold division of scriptural interpretation; identifying the ethical with the literal or first meaning, making the allegorical or spiritual meaning the second, and maintaining that, thirdly, Scripture was to be understood as-siendum futurum beati-ficium (tom. vi. p. 27). Interpretations of this last kind, vague and generally unacceptible as it is, was that denominated by succeeding writers the angological: a term which had been used by Origen as equivalent to spiritual (cf. De Principi. iv. 5), though the contrary has been maintained by writers familiar with the later distinction. Combining these two classifications given by Jerome of the various meanings of Scripture, we obtain a fourfold division which was current throughout the Middle Ages, and which has been perpetuated in the Romish Church down to recent times:—

"Littera gesta docet; quid creas, Alagoria; Moralis quid agas; qua tenias, Angogia"—

and in which, it will be observed, in conformity with the practice rather than the precept of Origen, the moral or tropological interpretation is raised above the allegorical or spiritual.

The principles laid down by master-minds, notwithstanding the manifold lapses made in the application of them, necessarily exerted the deepest influence on all who were actually engaged in the work of interpretation. The influence of Origen's writings was supreme in the Greek Church for a hundred years after his death. Towards the end of the 4th century Diodore, bishop of Tarsus, previously a presbyter at Antioch, wrote an exposition of the whole of the O. T., attending only to the letter of Scripture, and rejecting the more spiritual interpretation known as allegoria, the contemplation of things represented under an outward sign. He also wrote a work on the distinction between this last and allegory. Of the disciples of Diodore, Theodore of Mopsuestia pursued an exclusively grammatical interpretation into a decided rationalism, rejecting the greater part of the prophetic reference of the O. T., and maintaining it to be only applied to our Saviour by way of accommodation. Chrysostom, another disciple of Diodore, followed a sounder course, rejecting neither the literal nor the spiritual interpretation, but bringing out with much force from Scripture its moral lessons. He was followed by Theodoret, who interpreted both literally and historically, and also allegorically and prophetically. His commentaries display both diligence and soberness, and are uniformly instructive and pleasing: in some respects none are more valuable. Yet his mind was not of the highest order. He kept the historical and prophetic interpretations too widely apart, instead of making the one lean upon the other. Where historical illustration was abundant, he content to rest in that, instead of finding in it larger help for pressing onward to the development of the

spiritual, see above. So again wherever prophecy was literally fulfilled, he generally rested too much in the mere outward verification, not caring to inquire whether the literal fulfillment was not itself necessarily a type of something beyond. In the Commentaries, however, where the language of Scripture is directly allegorical, he severely reproaches Theodore of Mopsuestia for imposing a historical interpretation upon it: even Diodore the literal interpreter, Theodore's master, had judged, as we learn from Theodoret, that that book was to be spiritually understood.

In the Western Church the influence of Origen, if not so unqualified at the first, was yet permanently greater than in the Eastern. Hilary of Poitiers is said by Jerome to have drawn largely from Origen in his Commentary on the Psalms. But in truth, as a practical interpreter, he greatly excelled Origen; carefully seeking out not what meaning the Scripture might bear, but what it really intended, and drawing forth the evangelical sense from the literal with elegance, tenderness, and dignity. Here, too, Augustine stood somewhat in advance of Origen: carefully preserving in its integrity the literal sense of the historical narrative of Scripture as the substructure of the mystical, lest otherwise the latter should prove to be but a building in the air. (Sermon. 2, c. 6.) It seems, therefore, to have been rather as a traditional maxim than as the expression of his own conviction, that he allowed that whatever in Scripture had no proper or literal reference to honesty of manners, or to the truth of the faith, might by that be recognized as figurative (De Doct. Chr. iii. 10). He fully acknowledges, however, that all, or nearly all, in the O. T., is to be taken not only literally but also figuratively (ibid. 22); and bids us earnestly beware of taking literally that which is figuratively spoken (ibid. 5). The fourfold classification of the interpretation of the O. T. which had been handed down to him, literal, etiological, analogical, allegorical, is neither so definite nor so logical as Origen's (De Uil. Cred. 2, 3; De Gen. 2, 14. Lut. lib. imp. 2): on the other hand neither are the rules of Tichonius, which he rejects, of much value. Still it is not so much by the accuracy of his principles of exposition as by what his expositions contain that he is held in honor. No more spiritually-minded interpreter ever lived. The main source of the blunders by which his interpretations are disfigured, is his lack of acquaintance with Hebrew: a lack indeed far more painfully evident in the writings of the Latin Fathers than in those of the Greek. It was partly, no doubt, from a consciousness of his own shortcomings in this respect that Augustine urged the importance of such an acquaintance (De Doct. Chr. iii. 11 ff.): rightly judging also that all the external scientific equipments of the interpreter of Scripture were not more important for the discovery of the literal than for that of the mystical meaning.

But whatever advances had been made in the treatment of O. T. Scripture by the Latins since the days of Origen had not sufficiently penetrated. We may see this in the Morals of Gregory on the Book of Job; the last great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in separate threads; doctrine of manners; in which sense it is also used by later Greek writers, as Andreas.

a That is, morally. The term ρομανολογία, which and in Justin and Origen denoted the doctrine of ἀματος, was perhaps first applied by Jerome to the
the historical and literal, the allegorical, and the moral. But the three have hardly any mutual connection: the very idea of such a connection is ignored. The allegorical interpretation is consequently entirely arbitrary; and the moral interpretation is, in conformity with the practice, not with the principles, of Origen, placed after the allegorical, so called, and is itself every whit as allegorical as the former. They differ only in their aim: that of the one is to set forth the history of Christ; that of the other to promote the edification of the Church by a reference of the language to the inward workings of the soul. No effort is made to apprehend the mutual relation of the different parts of the book, or the moral lessons which the course of the argument in that preeminently moral book was intended to bring out.

Such was the general character of the interpretation which prevailed through the Middle Ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. Some guidance, however, in the paths of even the most arbitrary allegorism was found practically necessary; and this was obtained in the uniformity of the mystical sense attached to the several Scriptural terms. Hence the dictionary of the allegorical meanings—partly genuine, partly conventional—of Scriptural terms compiled in the 9th century by Rabanus Maurus. An exceptional value may attach to some of the medieval comments on the O. T., as those of Rupert of Deutz († 1155); but in general even those which, like Gregory's Morals, are prized for their treasures of religious thought, have little worth as interpretations.

The first impulse to the new investigation of the literal meaning of the text of the O. T. came from the great Jewish commentators, mostly of Spanish origin, of the 11th and following centuries; Jarchi († 1105), Aben Ezra († 1167), Kimchi († 1240), and others. Following in the wake of these, the converted Jew Neofius of Lyre, near Exeum, in Normandy († 1341), produced his Positiva Perpetua on the Bible, in which, without denying the deeper meanings of Scripture, he justly contended for the literal as that on which they all must rest. Exception was taken to these a century later by Paul of Burgos, also a converted Jew († 1449), who, uphold, by the side of the literal, the traditions of which he believed had been coalescing with those which had been exclusively attached. But the very arguments by which he sought to vindicate them showed that the recognition of the value of the literal interpretation had taken firm root. The Restoration of Letters helped it forward. The Reformation contributed in many ways to unfold its importance; and the position of Luther with regard to it is embodied in his saying: "Omnium optimum theologian esse." That grammatical scholarship is not indeed the only qualification of a sound theologian, the German commentators of the last hundred years have abundantly shown: yet where others have sown, the Church eventually reaps; and it would be ungrateful to close any historical sketch of the interpretation of the O. T. without acknowledging the immense service rendered to it by modern Germany, through the labors and learning alike of the disciples of the theologian school, and of those who have again reared the banner of the faith.

In respect of the O. T. types, an important difference has prevailed among Protestant interpreters between the adherents and opponents of that school which is usually, from one of the most eminent of its representatives, denounced the Coccian, and which practically, though perhaps unconsciously, trod much in the steps of the earlier Fathers, Justin, Ireneaus, and Tertullian. Coccian, professor at Leyden († 1669), justly maintained that a typical meaning ran throughout the whole of the Jewish Scriptures; but his principle that Scripture signifies whatever it can signify (quia quid potest significare), as applied by him, opened the door for an almost boundless license of the interpreter's fancy. The arbitrariness of the Coccian interpretations provoked eventually a no less arbitrary reply; and, while the authority of the N. T. as to the existence of Scriptural types could not well be set aside, it became a common principle with the English theologians of the early part of the present century, that only those persons or things were to be admitted as typical which were so expressly interpreted in Scripture—or in the N. T.—itself. With sounder judgment, and not without considerable success, Fairbairn has of late years, in his Typology of Scripture, set the example of an investigation of the fundamental principles which govern the typical connection of the Old Testament with the New. See, for further information, J. G. Rosenmuller's conspicuous Historiae Interpretationis ab Apostolicae Ebbe ad Literarium Instrumenta, 5 vols. 1795–1814; Meyer's Gesch. der Schriftklaerung seit der Wiederherstellung der Wissenschaften, 5 vols. 1802–1809; Conybeare's Homiletic Lectures, 1824; Oehler's little tract, Ein Wort über tieferes Schriftverständ, 1824; Davidson's Sacred Hermeneutics, 1843, (and Dies- tel's Gesch. d. A. T. in d. christl. Kirche, 1861.)

2. Principles of Interpretation.—From the foregoing sketch it will have appeared that it has been very generally recognized that the interpretation of the O. T. embraces the discovery of its literal, moral, and spiritual meaning. It has given occasion to misrepresentation to speak of the existence in Scripture of more than a single sense: rather, let it be said that there are in it three elements, coexisting and coalescing with each other, and generally requiring each other's presence in order that they may be severally manifested. Correspondingly, too, there are three portions of the O. T. in which the respective elements, each in its own way, are brought out with particularity: the literal (and historical) is most obviously displayed in the historical narrative; the moral is specially honored in the Law, and in the fortuitous addresses of the Prophets; the predictions of the Prophets bear emphatic witness to the prophetic or spiritual. Still, generally, in every portion of the O. T. the presence of all three elements may by the student of Scripture be traced. In investigating the several stories of the journey of the Israelites through the wilderness, he has the historical element in the actual occurrence of the facts narrated; the moral, in the warnings which God's dealings with the people and their own several dissidences convey; and the spiritual in the preparation by that journey, in its several features, of the Christian pilgrimage through that wilderness of life. In investigating the several ordinances of the Law relating to sacrifice, he has the historical element in the observances actually enjoined upon the Israelites; the moral in the personal unworthiness and self-surrender to God which those observances were designed to express, and which are themselves of universal interest; and the
spiritual in the prefiguration by those sacrifices of the one true sacrifice of Christ. In bending his eyes on the prophetic picture of the conqueror coming from Eden, with dyed garments from Por-rah, he has the historical element in the relations subsisting between the historical Eden and Israel, supplying the language through which the anticipations of triumph are expressed; the moral element in the narrative of all the persecuted of the condemnation of the unnatural misery where-with those nearest of kin to themselves may have exulted in their calamities; and the spiritual, in the prophecy of the loneliness of Christ's passion and of the gloriousness of his resurrection, in the strength of which, and with the signal of victory before her, the Church should trample down all spiritual foes beneath her feet. Yet again, in the greater number of the Psalms of David he has the historical element in those events of David's life which the language of the psalm reflects: the moral, in the moral connection between righteous faith and eventual deliverance by which it is per-vaded; and the spiritual, in its fore-embodiment of the struggles of Christ, in whom it finds its essential and perfect fulfillment, and by her union with whom the Christian Church still claims and appropriates the psalm as her own. In all these cases it is requisite to the full interpretation of the O. T. that the so-called grammatical-historical, the moral, and the spiritual interpretation should advance hand in hand: the moral interpretation presupposes the grammatical-historical, the spiritual rests on the two preceding. If the question be asked, Are the three several elements in the O. T. mutually coextensive? we reply, They are certainly coextensive in the O. T., taken as a whole, and in the several portions of it, largely viewed; yet not so as that they are all to be traced in each several section. The historical element may occasionally exist alone; for, however full a history may be of deeper meanings, there must also needs be found in it connecting links to hold the significant parts of it together: otherwise it sinks from a history into a mere succession of pictures. Not to cite doubtful instances, the genealogies, the details of the route through the wilderness and of the subsequent partition of the land of Canaan, the account of the war which was to furnish the occasion for God's providential dealings with Abraham and Lot (Gen. 14), the creation chapters, are eloquent and simple instances of such links. On the other hand there are passages of direct and simple moral exhortation, e. g. a considerable part of the book of Proverbs, into which the historical element hardly enters: the same is the case with Psalm 1, which is, as it were, the moral preface to the psalms which follow, designed to call attention to the moral element which pervades them, generally of an entire book, may lie rather in the general tenor and result of the whole than in any number of separate passages: e. g. the moral teaching of the book of Job lies pre-eminently not in the truths which the several speeches may contain, but in the great moral lesson to the unfolding of which they are all gradually working.

That we should use the New Testament as the key to the true meaning of the Old, and should seek to interpret the latter as it was interpreted by our Lord and the Apostles, is an accepted doctrine with the spirit of what the earlier Fathers asserted respecting the value of the tradition received from them, and with the appeals to the N. T. by which Origen defended and fortified the threefold method of interpretation. But here it is the analogy of the N. T. interpretations that we must follow; for it were unreasonable to suppose that the whole of the Old Testament would be found completely interpreted in the New. Nor, provided only a spiritual meaning of the Old Testament be in the New sufficiently recognized, does it seem much more reason able to expect every separate type to be there indi-cated or explained, or the fulfillment of every prophecy noted, than it would be to expect that the N. T. should unfold the historical importance or the moral lessons of every separate passage of the O. T. history. Why, indeed, should we assume that a full interpretation in any single respect of the older volume would be given in another of less than a quarter of its bulk, the primary design of which is not expository at all, and that when the use actually made of the former in the latter is in kind so manifold? The Apostles nowhere profess to give a systematic interpretation of the O. T. The nearest approach to any such is to be found in the explanation of the spiritual meaning of the Mosaic ritual in the Epistle to the Hebrews; and even here it is expressly declared that there are many things "of which we cannot now speak par-ticularly" (ix. 5). We may well allow that the substance of all the O. T. shadows is in the N. T. contained, without holding that the several relations between the substance and the shadows are there in each case authoritatively traced.

With these preliminary observations we may glance at the several branches of the interpreter's task.

First, then, Scripture has its outward form or body, all the several details of which he will have to explore and to analyze. He must ascertain the figurative or allegorical sense. He must pray for, or the like; and with this reference, so far as is possible, to the historical occasion and circumstances, the time, the place, the political and social position, the manner of life, the surrounding influences, the distinctive character, and the object in view, alike of the writers, the persons addressed, and the persons who appear upon the scene. Taken in its due extent, the outward form of Scripture will itself, no doubt, include much that is figurative. How should it indeed be otherwise, when all language is in its structure essentially figurative? Even, however, though we should define the literal sense of words to be that which they signify in their usual acceptation, and the figurative that which they intend in another than their usual accep-tation, under some form or figure of speech, still will it itself, no doubt, include much that is figurative. (to use the words of Van Mildert) "to the verbal signification, which with respect to the sense may be the equivalent of literal; being derived from ἐκ προ- μα, ἡ λοιπον, ἡ γραμματική, 'grammatical," etc."

a Convenience has introduced, and still sanctions the use of this somewhat barbarous word. The reader will pardon being reminded that the term grammatical
be virtually the same, whether or not expressed by trope and figure,” and when therefore it is imper-
ractic, the need for the word; and metaphors un-
derstanding any other than the figurative sense could ever have been deduced from the words em-
ployed, we rightfully account the investigation of
such sense a necessary part of the most elementary
interpretation. To the outward form of Scripture
thus belong all metonymies, in which one name is
substituted for another, e. g., the cause for the
effect, the mouth for the word; and metaphors,
in which a word is transferred from its proper
to a cognate signification, e. g., when hardness
is predicated of the heart, clothing of the soul; so
also all proceioposii, or personifications; and even
all anthropomorphic and anthropopathic descrip-
tions of God, which could never have been under-
stood in a purely literal sense, at least by any of
the right-minded among God's people. Nor would
even the exclusively grammatical-historical inter-
preter deem it no part of his task to explain such
a continued metaphor as that in Ps. lxxv. 8 if
or such a parable as that in Is. v. 1-7, or such a
table as that in Judg. ix. 8-15. The historical
element in such passages only comes out when
their allegorical character is perceived; nor can it
be supposed that it was ever unperceived. Still
the primary allegorical meaning in such passages may
itself be an allegory of something beyond, with
which latter the more rudimentary interpretation
is not strictly concerned. An unexpected Jewish
reader of Is. v. 1-7 might have traced in the vine-
yard an image of the land of his inheritance,
fenced off by its boundary heights, deserts, and
seas from the surrounding territories; might have
described in the stones the old heathen tribes that
had been plucked up from off it, and in the choice
wine the Israel that had been planted in their place;
might have identified the tower with the city of
David, as the symbol of the protecting Davidic sov-
ereignty, and the wine press with the Temple, where
the blood of the sacrifices was poured forth, as the
symbol of Israel's worship; and this without im-
quiring into or making of the higher blessings-
of which all these things were but the shadows. Yet
it is not to be denied that it is difficult, perhaps
impossible, to draw the exact line where the prov-
ince of spiritual interpretation begins and that of
historical ends. On the one hand the spiritual
significance of a passage may occasionally, perhaps
often, throw light on the historical element involved
in it; on the other hand the very large use of fig-
urative language in the O. T. and more especially
in the prophecies, prepares us for the recognition
of the yet more deeply figurative and essentially
allegorical import which runs, as a ἐνδοὺο, through the whole.

Yet no unheeded or unworthy task can it ever be
to study, even for its own sake, the historical
material in which the O. T. comes clothed. It
was probably to most of us one of the earliest
charms of our childhood, developing in us our
sense of brotherhood with all that had gone before
us, leading us to feel that we were not singular in
that which befeild us, and therefore, correspondingly,
that we could not live for ourselves alone. Even by
itself it proclaims to us the historical workings in
which the man of God had ever watched over the interests of his church. Above
all the history of the O. T. is the indispensable
prelude to the historical advent of the Son of God
in the flesh. We need hardly labor to prove that
the N. T. recognizes the general historical character
of all that the O. T. records. It is everywhere as-
sumed, the O. T. and the N. T. being of one
our Lord when he spoke of the desires of the
prophets and righteous men of old, or of all the
righteous blood shed upon the earth which should
be visited upon his own generation; so to Stephen
and Paul in their speeches in the council-chamber
and at Antioch: so, too, again, the latter, when he
spoke of the things which happened unto the
Israelites and their God. The testimony has been by
our Lord and his Apostles to the outward reality of
particular circumstances could be easily drawn
out in array, were it needful. Of course in reference
to that which is not related as plain matter of his-
tory, there will always remain the question how far
the descriptions are to be viewed as definitely his-
torical, how far as drawn, for a specific purpose,
from the imagination. Such a question presents
itself, for example, in the book of Job. It is one
which must plainly be in each case decided accord-
ing to the particular circumstances. Scenes which
could never have any outward reality may, as in
the Canticles, be made the vehicle of spiritual alle-
gory; and yet even here the historical element
meets us in the historical person of the typical
lovers and bridegroom, who afterwards the allegorist has introduced into his description, and in
the references to the manners and customs of the
age. In examining the extent of the historical
element in the prophecies, both of the prophets
and the psalms, we must distinguish between those
which we either definitely know or may reasonably
assume to have been fulfilled at a period not enti-
tally distant from that at which they were uttered,
and those which reached far beyond in their pro-
spective reference. Theformer, once fulfilled, were
thereforth annexed to the domain of history (Is.
xvi.: Ps. xxvii. 33). It must be observed, however,
that the prophet often beheld in a single vision, and
therefore delineated as accomplished all at once,
what was really, as in the case of the desolation of
Babylon, the gradual work of a long period (Is.
xviii.); or, as in Ezekiel's prophecies respecting the
humiliation of Egypt, uttered his predictions in
such ideal language as scarcely admitted of a literal
fulfillment (Ex. xxxix. 8-12; see Fairbairn in loco).
With the prophecies of more distant scope the
case stood thus. A picture was presented to the
prophet's gaze, embodying an outward representa-
tion of certain futurological-struggles, judgments,
triumphs, or blessings; a picture suggested in gen-
eral by the historical circumstances of the present,
(Zech. vi. 9-15; Ps. v., xixii.), or of the past (Ex.
xv. 35, 36; Is. xi. 15, xlviii. 21; Ps. xcv. 6 if),
or of the near future, already anticipated and
viewed as present (Is. xlv. 7-26; Ps. liii. 6-11),
or of all these, variously combined, altered, and
herefore much more metaphorical than literal. But it does not follow that that picture was ever outwardly brought
to pass; the field had been exchanged for the
spiritual, the outward type had merged in the in-
ward reality before the fulfillment of the prophecy
took effect. In some cases, more especially those in
which the prophet had taken his stand upon the
nearer future, there was a preliminary and typical
fulfillment; but here again the spiritual is rather
and essentially so, and even if ever, corresponded to the full extent of the prophe-
cy: the far-reaching import of the prophecy would
have been obscured if it had. The measuring-line
ever outwardly went forth upon earth and com-
pressed about to Gezah (Jer. xxvi. 39) till the day
of Herod Agrippa, after our Saviour's final doom upon the literal Jerusalem had been actually pronounced; and neither the temple of Zerubbabel nor that of Herod had been beholden in vision by Ezekiel (xl. ft.). There are, moreover, as it would seem, exceptional cases in which even the outward form of the prophet's predictions was divinely drawn from the unknown future as much as from the historical circumstances with which he was familiar, and in which, consequently, the details of the imagery by means of which the meaning of the prophecy was conveyed to posterity. Predictions of the future were literally, or almost literally, verified in the events by which his prediction was fulfilled. Such is the case in Is. lxxiii. The Holy Spirit presented to the prophet the actual death-scene of our Saviour as the form in which his prophecy of that event was to be embodied; and thus we trace in it an approach to a literal history of our Saviour's sufferings before they came to pass. (Respecting the rudiments of interpretation, let the following here suffice: The knowledge of the meanings of Hebrew words is gathered (a) from the context, (b) from parallel passages, (c) from the traditional interpretations preserved in Jewish commentaries and dictionaries, (d) from the ancient versions, (e) from the cognate languages, Chaldee, Syriac, and Arabic. The syntax must be almost wholly gathered from the O. T. itself; and for the special syntax of the poetical books, while the importance of a study of the Hebrew parallelism is now generally recognized, more attention needs to be bestowed than has been bestowed hitherto on the centralism and inversion by which the poetical structure and language is often marked. It may here too be in place to mention, that of the various systematic treatises which have by different generations been put forth on the interpretation of Scripture, the most standard work is the Πρακτικον Στοιχεον of Sol. Glassinus (Prof. at Jená, † 1650), originally published in 1623, and often reprinted. A new edition of it, "accommodated to their times," and bearing the impress of the theological views of the new editors, was brought out by Dathe and Baner, 1776—77. It is a vast store-house of materials, but the need of such a treatise is still felt, many passages having been much superseded by the special labors of more recent scholars in particular departments.)

From the outward form of the O. T. we proceed to its moral element or soul. It was with reference to this that St. Paul declared that all Scripture was given by inspiration of God, and was profitable for doctrine, for reproof, for correction, for instruction in righteousness (2 Tim. iii. 16); and it is in the implicit recognition of the essentially moral character of the whole, that our Lord and his Apostles not only appeal to its direct precepts (e. g. Matt. xv. 4, xiv. 17—19), and set forth the fullness of their bearing (e. g. Matt. ix. 13), but also lay bare moral lessons in O. T. passages which lie rather beneath the surface than upon it (Matt. xix. 5, 6; xviii. 32; John x. 34, 35; Acts viii. 24, 25; 1 Cor. ix. 9, 10; 2 Cor. viii. 19, 21). With regard more particularly to the Law, our Lord shows in his Sermon on the Mount how deep is the moral teaching implied in its letter: and in his denunciation of the Pharisees, upbraids them for their omission of their weightier matters — judgment, mercy, and faith. The history, too, of the O. T. finds frequent reference made in the N. T. to its moral teaching (Luke vi. 31; Rom. xii. 9; 1 Cor. x. 6—11; Heb. iii. 7—11; xi.; 2 Pet. ii. 15—16; 1 John iii. 12). No doubt it was with reference to the moral instruction to be drawn from them that that history had been made to dwell at greatest length on the events of greatest moral importance. The same reason explains also why it should be to so large an extent biographical. The interpreter of the O. T. will have, among his other tasks, to analyze in the lives set before him the various yet generally mingled workings of the spirit of holiness, and of the spirit of sin. He must not fall into the error of supposing that any of the lives or the results of perfect prophecies, where asserts or implies it, and the sins of even the best testify against it. Nor must he expect to be expressly informed of each recorded action, any more than of each sentiment delivered by the several speakers in the book of Job, whether it were commendable or the contrary; nor must we assume, as some have done, that Scripture identifies itself with every action of a saintly man which, without openly condemning it, records. The moral errors by which the lives of even the greatest O. T. saints were disfigured are related, and that for our instruction, but not generally criticised: e. g. that of Abraham when, already aged, he was warned in Egypt, he suffered the king of Gerar to suppose that Sarah was merely his sister: or that of David, when, by feigning himself mad, he practised deceit upon Achish. The thought of deceit has no connot- tant for shutting his eyes to such errors: certainly not the warrant of David, who himself virtually confessed them in Ps. xxxiv. (see especially ver. 13). He must acknowledge and commend the holy faith which lay at the root of the earliest recorded deeds of Jacob, a faith rewarded by his becoming the heir of God's promises; but he must no less acknowledge and condemn Jacob's unbrotherly deceit and filial disobedience, offenses punished by the sower's which attended him from his flight into Mesopotamia to the day of his death. And should he be tempted to desire that in such cases the O. T. had distinguished more directly and authoritatively the good from the evil, he will ask, Would it in that case have spoken so effectually? Are not the thoughts most fraught with human affections more engaged, by studying a man's character in the records of his life than in a summary of it really prepared for us? Is it in a dried and labeled collection of specimens, or in a living garden where the flowers have all their several imperfections, that we best learn to appreciate the true beauties of floral nature? The true glory of the O. T. is here the choice richness of the garden into which it conducts us. It sets before us just those lives — the lives generally of religions men — which will best repay our study, and will most strongly suggest the moral lessons that God would have us learn; and herein it is that, in regard of the moral aspects of the O. T. history, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote. But the O. T. has further its spiritual and therefore prophetic element, the result of that organic unity of sacred history by means of which the same (god who in his wisdom delayed, till the fulness of time should be come, the advent of his Son into the world, ordained that all the care and worship of his earlier people should outwardly anticipate the glories of the Redeemer and of his spiritually ransomed Church. Our attention is here first attracted to the solemnly prescribed uses of the O. T., of the prospective reference of which, at the
time that they were uttered, no question can exist, and the majority of which still awaited their fulfill-
ment. For in the Redemption of the world by Christ, no new covenant had as yet come into force. (Jer. xxxvi. 31-40; no temple built corresponding to that which Ezekiel had described (xl. 2); nor had the new Davidic era that arose to be a prince in Israel (1 Chron. xxii.). With Christ, then, the new era of the fulfillment of prophecy commenced. In Him were to be fulfilled all things that were written in the Law of Moses, and in the Prophets, and in the Psalms, concerning Him (Luke xiv. 44; cf. Matt. xxvi. 54, &c.). A mar-
vellous amount there was in his person of the ver-
ification of the very letter of prophecy—partly that it might be seen how definitely all had pointed to Him; partly because his outward mission, up to the time of his death, was but to the lost sheep of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet it would be
plainly impossible to suppose that the signifi-
cance of such prophecies as Zech. ix. 9 was ex-
hibited by the mere outward verification; and with the delivery of Christ by his own people to the Gentiles, and the doom on the city of Jerusalem for rejecting Him, and the ratification of the new covenant by his death, and the subsequent mission of the Apostles to all nations, all consummated by the final blow which fell within forty years on the once chosen people of God, the outward blessings had merged forever in the spiritual, and the typ-
ical Israelitish nation in the Church Universal.

Hence the entire absence from the N.T. of any recognition, by either Christ or his Apostles, of such prospective outward glories as the prophecies, literally interpreted, would still have implied. No hope of outward restoration hung on the sen-
tence of outward doom which Christ uttered forth on the nation from which He himself had sprung (Matt. xxi. 43, xxii. 38, xxiv. 2); no old outward deliverances with the spiritual salvation which He and his Apostles declared to be still in store for those of the race of Israel who should believe on Him (Matt. xvn. 29; Acts iii. 19-21; Rom. xi.; 2). Hence in the Redeemer the language of the world's former prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal body of Christ (John x. 16, xi. 52; Acts ii. 13, xv. 15-17; Rom. ix. 25, 26, 32, 33, x. 11, 13, xi. 25, 26, 27; 2 Cor. vi. 16-18; Gal. iv. 27; 1 Pet. ii. 4-6, 10; Rev. iii. 7, 8, xx. 8, 9, xxi. 22; above all, in the crowning passage of the apostolic interpretation of O.T. prophecy (Heb. xii. 22), in which the Christian Church is distinc-
tly marked out as the Zion of whose glory all the prophets had spoken. Even apart, however, from the authoritative interpretation thus placed upon them, the prophecies contain within them-
selves, in sufficient measure, the evidence of their spiritual import. It could not be that the literal Zion should be greatly raised in physical height (1s. 2), or all the Holy Land levelled to a plain (Zech. xiv. 10), or partitioned out by straight lines and in rectangles, without regard to its physical con-
formation (EZ. xlv.); or that the city of Jeru-
usalem should lie to the south of the Temple (Zech. xlix. 2); and at a distance of five miles from it (ibid. xlv. 6), and yet that it should occupy its old place (Jer. xxxiii. 18), and that all the waters which flow from Jerusalem, increasing in depth as they roll on, not through the accession of any tributary stream, but simply because their source is beneath the sanctuary (EZ. xlvii.). Nor could it well be that, after a long loss of genealogies and Israelitish communities, they should be reorganized in their tribes and families (Zech. xii. 12-13; Ezek. xxxiv. 13; Ezv. xiv. 13, xlviii.), and settled after their old estates (EZ. xxxvi. 11). Nor again, that all the in-
habitants of the world should go up to Jerusalem to worship, not only to the festivals (Zech. xiv. 16), but even monthly and weekly (Is. xxvi. 23), and yet that while Jerusalem was thus the seat of worship for the whole world, there should also be altars everywhere (Ezek. xix. 1). Those who would, with the addition of the name of God, the Father, and of the Messiah, and with the name of Jerusalem, and of the God of Israel (Is. l. 11), both being really but different expressions of the same spiritual truth—the extension of God's pure worship to all nations. Nor can we suppose that Jews will ever again outwardly tri-
umph over heathen nations that have long disapp-
4
peared from the stage of history (Am. ix. 11, 12; Is. xi. 14; Mic. v. 5; Ob. 17-21). Nor will sacri-
cifices be renewed (EZ. xliii. &c.) when Christ has by one offering perfected for ever them that are sanctified; nor will a special sanctuary yet attach to Jerusalem, when the hour is come that "neither in this mountain nor yet at Jerusalem" shall men worship the Father; nor yet to the natural Israel (cf. Joel iii. 4), when in Christ there is neither Jew nor Greek, all believers being now alike the circum-
stance of Christ's body (Phil. iii. 20) and Abraham's seed (Gal. iii. 29), and the name Israel being frequently used in the N.T. of the whole Christian Church (Matt. xxviii. 28; Luke xxii. 39; Rom. xii. 28; Gal. vi. 16; cf. Rev. vii. 4, xii. 12).

The substance, therefore, of these prophecies is the glory of the Redeemer's spiritual kingdom; it is but the form that is derived from the outward cir-
cumstances of the coming of God's ancient people, which had passed, or all but passed away before the fulfillment of the promised blessings com-

The one kingdom was indeed to merge into, rather than to be violently replaced by the other; the holy seed of old was to be the stock of the new generation; men of all nations were to take hold of the skirt of the Jew, and Israelitish Apostles were to become the patriarchs of the new Church. As the language of prophecy at which the announcement of the new blessings had been cloathed to be ruddy east-side; the imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still speak the language of Canaan. But then arises the question. Must not this language have been divinely designed from the first as the language of God's Church? Is it easily to be supposed that the prophets, whose writings form so large a portion of the Bible, should have so extensively used the history of the old Israel as the garment wherein towrap their delineations of the blessings of the new, and yet that that history should not be in it itself essentially an anticipation of what the promised Redeemer was to bring with him? Besides, the typical import of the Israelitish tabernacle and ritual worship is implied in Heb. ix. ("The Holy Ghost this signifying"), and is almost universally allowed; and it is not easy to tear asunder the events of Israel's history from the ceremonies of Israel's worship; nor yet, again, the events of the preceding history of the patriarchs from those of the history of Israel. The N.T. itself implies the typical import of a large portion of the O.T. narra-

The original dominion conferred upon men (1 Cor. xv. 27; Heb. xi. 8), the rest of God on the seventh day (Heb. iv. 4), the institution of mar-

OLD TESTAMENT
n a 237

OLD TESTAMENT

n of Abel (Heb. xi. 3, xii. 24); the preservation of Noah and his family in the ark (1 Pet. iii. 21); the priesthood of Melchizedek (Heb. viii., following Is. ex. 4); the mutual relation of Sarah with her children and their covenants (Gal. iv. 22 ff.); the offering and ministry of Isaac (Rom. viii. 32; Heb. xi. 19): the favor of God to Jacob rather than Esau (Rom. ix. 10-13, following Mal. i. 2, 3); the sojourn of Israel in Egypt (Matt. ii. 15); the passover feast (1 Cor. v. 7, 8); the shepheardship of Moses (Heb. xii. 26, cf. Is. xiii. 11, Sept.); his veiling of his face at Sinai (2 Cor. iii. 13); the ratification of the covenant by blood (Heb. x. 18 ff.); the priestly character of the chosen people (1 Pet. ii. 9); God's outward presence with them (2 Cor. vi. 16); the various events in their pilgrimage through the desert (1 Cor. x.), and specially the eating of manna from heaven (Matt. iv. 4; John vi. 38-51; the lifting up of the brazen serpent (John iii. 14); the promise of the new temple with its removal of Moses, their shepherd, from them (Heb. xii. 5, cf. Dnt. xxxi. 6); the kingdom of David (Luke ii. 32, 33); and the devouring of Jonah (Matt. xii. 40). If some of these instances be deemed doubtful, let at least the rest be duly weighed, and this not without regard to the enunciative force of the whole. In the O. T. itself we have, and this even in the last times, events and persons expressly treated as typical: e. g. the marking the once-rejected stone the headstone of the corner (probably an historical incident in the laying of the foundation of the second Temple (Ps. cxviii. 22)); the arraying of Joshua the high-priest with fair garments (Zebch. iii.); and the placing of crowns on his head to symbolize the union of royalty and priesthood (Zebch. vi. 9 ff.). A further testimony to the typical character of the history of the Old Testament is furnished by the typical character of the events related even in the New. All our Lord's miracles were essentially typical, and are almost universally so acknowledged: the works of mercy which He wrought outwardly on the body betokening his corresponding operations within man's soul. So, too, the outward fulfillments of prophecy in the Incarnation: the literal, of course, deeper though less immediately striking fulfillment which it was to continue to receive ideally; and if this deeper and more spiritual significance underlie the literal narrative of the New Testament, how much more that of the Old, which was so essentially designed as a preparation for the good things to come! A remarkable and honorable testimony on this subject was borne in his later years by De Wette. "Long before Christ appeared," he says, "the world was prepared for his appearance; the entire O. T. is a great prophecy, a great type of Him who was to come, and did come. Who can deny that the holy seers of the O. T. saw, in spirit, the advent of Christ long beforehand, and in prophetic anticipations of greater or less clearness had presages of the new doctrine? The typological comparison, too, of the Old Testament with the New was no mere play of fancy: and it is scarcely altogether accidental that the evangelical history, in the most important particulars, runs parallel with the Mosaic* (cited by Tholuck, The Old Testament in the New). It is not unlikely that there is in many quarters an unwillingness to recognize the spiritual element in the historical parts of the O. T., arising from the fear that the recognition of it may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation will be ever so abusing one element of Scripture as thereby to cast a slight on the rest. But, if the alleged affinity of its existence, and on the other hand there are certainly cases in which the spiritual element confirms the outward reality of the historical fact. So it is with the devouring of Jonah; which many would consign to the region of parable or myth, not apparently from any result of criticism, which is indeed at fault to find an origin for the story save in fact, but simply from the unwillingness to give credit to an event the extraordinary character of which must have been patent from the first. But if the divine purpose were to prefigure in a striking and effective manner the passage of our Saviour through the darkness of the tomb, how could any ordinary event, akin to ordinary human experience, adequately represent that of which we have no experience? That the first part of the passion, required, in Ps. xxvi., to be heightened and compacted together by the aid of extraneous imagery in order that they might typify the horrors of death. Those same horrors were more definitely prefigured by the incarceration of Jonah: it was a marvellous type, but not more marvelous than the antitype which it fore-shadowed: it testified by its very wondrousness that there are gloomy terrors beyond any of which this world supplies the experience, but over which Christ should triumph, as Jonah was delivered from the belly of the fish.

Of another danger besetting the path of the spiritual interpreter of the O. T. we have a warning in the unedifying parables into which some have fallen. Against such he will guard by foregoing too curious a search for mere external resemblances between the Old Testament and the New, though withal thankfully recognizing them wherever they present themselves. His true task will be rather to investigate the inward ideas involved in the O. T. narratives, institutions, and prophecies themselves, by the aid of the more perfect manifestation of those ideas in the transactions and events of gospel-times. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have sought morally in common. One consequence of this principle will of course be, that we must never be content to rest in any mere outward fulfillment of prophecy. It can never, for example, be admitted that the ordinance respecting the entirety of the passover-lamb had reference merely to the preservation of our Saviour's legs unbeknown on the cross, or that the concluding words of Zebch. ix. 9, pointed merely to the animal on which our Saviour should outwardly ride into Jerusalem, or that the sojourn of Israel in Egypt, in its evangelical reference, had respect merely to the temporary sojourn of our Saviour in the same country. However remarkable the outward fulfillment be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence of the foregoing principle of interpretation will be that that which was forbidden or sinful can, so far as it was sinful, not be regarded as typical of that which is free from sin. We may, for example, reject, as altogether groundless, the view, often propounded, but never proved, that Solomon's marriage with Pharaoh's daughter was a figure of the reception of the
Gentiles into the Church of the Gospel. On the other hand there is no more difficulty in supposing that that which was sinful may have originated the occasion for the exhibition of some striking type, than there is in believing that disobedience brought about the type of retribution. To this latter sinner in demanding a king; yet the earthly kingdom of David was a type of the kingdom of Christ; and it was in consequence of David’s thinking, like the first Adam, from the presence of the Lord, that he became so signal a type of the second Adam in his three days’ removal from the light of heaven.

So again that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to that which is more perfect. Thus Hagar, as the concubine of Abraham, represented the covenant at Sinai; but it is only the bondage-aspect of that covenant which here comes directly under consideration, and the children of the covenant, symbolized by Ishmael, are those only who cleave to the element of bondage in it.

Yet withal, in laying down rules for the interpretation of the O. T., we must abstain from attempting to define the limits, or to measure the extent of its fullness. That fullness has certainly not yet been, nor will by us be exhausted. Search after truth, and reverence for the native worth of the written Word, authorize us indeed to reject past interpretations of that which cannot be shown to rest on any solid foundation. Still all interpretation is essentially progressive; and in no part of the O. T. can we tell the number of meanings and bearings, beyond those with which we are ourselves familiar, which may one day be brought out, and which then not only may approve themselves by their intrinsic reasonableness, but even by their mutual harmony and practical interest furnish additional evidence of the divine source of that Scripture which cannot be broken.

The New Testament quotations from the Old forms the outer boundary of connection between the two parts of the Bible. They are manifold in kind. Some of the passages quoted contain prophecies, or involve types of which the N. T. writers designed to indicate the fulfillment. Others are introduced as direct logical supports to the doctrines which they were enforcing. In all cases which can be clearly referred to either of these categories, we are fairly warranted in deeming the use which has been made of the older text authoritative; and from these, and especially from an analysis of the quotations which at first sight present difficulties, we may study the principles on which the sacred appreciation and exegesis of the older Scriptures has proceeded. Let it only be borne in mind that however just the interpretations virtually placed upon the passages quoted, they do not prove to be necessarily complete. The contrary is indeed manifest from the two opposite bearings of the same passage, Ps. xcv. 1, brought out by St. Paul in the course of a few verses, 1 Cor. x. 26, 28. But in many instances, also, the N. T. writers have quoted the O. T. rather by way of illustration, than with the intention of bearing upon it; variously applying and adapting it, and making its language the vehicle of their own independent thoughts. It could hardly well be otherwise. The thoughts of all who have been deeply educated in the Scriptures naturally move in Scriptural direction; it would have been strange had the writers of the N. T. formed exceptions to the general rule.

It may not be easy to distribute all the quotations into their distinctive classes. But among those in which a prophetical or typical force is asserted in the N. T. to the passage quoted, may fairly be reckoned all that are introduced with an intimation that the Scripture was ‘fulfilled.’ And it may be observed that the word ‘fulfilled,’ as applied to the accomplishment of what had been predicted or foreshadowed, is in the N. T. only used by our Lord himself and his companion-apostles; not by St. Mark nor St. Luke, except in their reports of our Lord’s and Peter’s sayings, nor yet by St. Paul (Mark xxv. 28, is not genuine). It had grown familiar to the original Apostles from the continual verification of the O. T. which they had beheld in the events of their Master’s career. These had testified to the deep connection between the utterances of the O. T. and the realities of the Gospel, and, through the general connection in turn casting down its radiance on the individual points of contact, the higher term was occasionally applied to express a relation for which, viewed merely in itself, weaker language might have sufficed.

Three ‘fulfilled’ of Scripture are traced by St. Matthew in the incidents of our Saviour’s infancy (ii. 15, 18, 23). He beheld Him marked out as the Lamb of God with the prophetic designation three times before Him, by the outward correspondence between his and Israel’s sojourn in Egypt. The sorrowing of the mothers of Bethlehem for their children was to him a renewal of the grief for the captives at Babylon, which grief Jeremiah had described in language suggested by the record of the patriarchal grief for the loss of Joseph: it was thus a present token (we need account it no more) of the spiritual captivity which all outward captivities recalled, and from which, since it had been declared that there was hope in the end, Christ was to prove the deliverer. And again, Christ’s sojourn in Joseph was marked Nazareth was an outward token of the lowliness of his condition; and if the prophets had rightly spoken, this lowliness was the necessary prelude, and therefore, part, the pledge of his future glory. In the first and last of these cases the evangelist, in his wonted phrase, expressly declares that the events came to pass that that which was spoken might be fulfilled: ‘a language which must not be arbitrarily subdued. In the other case the phrase is less definitely strong: ‘Then was fulfilled,’ etc. The substitution of this phrase can, however, of itself decide nothing, for it is used of an acknowledged prophecy in xxxvi. 9. And should any be disposed on other grounds to view the quotation from Jer. xxxvi. 15 merely as an adornment of the narrative, let them first consider whether the evangelist, who was occupied with the history of Christ, would be likely formally to introduce a passage from the O. T. merely as an illustration of natural grief.

In the quotations of all kinds from the Old Testament in the New, we find a continual variation from the letter of the older Scriptures. To this variation three causes may be specified as having contributed.

First, all the N. T. writers quoted from the Scriptures correcting it indeed more or less by their own hand, especially when it was useful for their purpose: occasionally deserting it altogether; still adhering by it to so large an extent as to show...
that it was the primary source whence their quotations were drawn. Their use of it may be best illustrated by the corresponding use of our liturgical version of the Psalms: a use founded on love as well as on habit, but which nevertheless we forego when it becomes important that we should follow the more accurate of the two. It is obvious, when the errors involved in the Septuagint version do not interfere with the purpose which the N. T. writer had in view, they are frequently allowed to remain in his quotation: see Matt. xvi. 9 (a record of our Lord's words); Luke iv. 18; Acts xiii. 14, xv. 17; Rom. xv. 10; 2 Cor. iv. 13; Heb. viii. 3, 5, xii. 21. The current of apostolic thought, too, is frequently dictated by words of the Septuagint, which differ much from the Hebrew: see Rom. ii. 34; 1 Cor. xv. 55; 2 Cor. ix. 7; Heb. xiii. 15. Or even an absolute interpolation of the Septuagint is quoted, Heb. i. 6 (Deut. xxxii. 43). On the other hand, in Matt. xxii. 5; 1 Cor. iii. 19, the Septuagint is corrected by the Hebrew: so too in Matt. xix. 13; Luke xxii. 37, there is an effort to preserve an expressiveness of the Hebrew which the Septuagint had lost; and in Matt. iv. 15, 16; John xix. 37; 1 Cor. xv. 54, the Septuagint disappears altogether. In Rom. ix. 33, we have a quotation from the Septuagint combined with another from the Hebrew. In Mark xii. 20; Luke x. 27; Rom. xii. 19, the Septuagint and Hebrew are superadded the one upon the other. In the Epistle to the Hebrews, which in this respect stands alone, the Septuagint is uniformly followed; except in the one remarkable quotation, Heb. x. 30, which, according neither with the Hebrew nor the Septuagint, was probably derived from the last-named passage, Rom. xii. 19, wherewith it exactly coincides. The quotation in 1 Cor. ii. 9 seems to have been derived not directly from the O. T., but rather from a Christian liturgy or other document into which the language of Is. xiv. 4 had been transferred.

Secondly, the N. T. writers must have frequently quoted from memory. The O. T. had been deeply instilled into their minds, ready for service, whenever needed; and the fulfillment of its predictions which they witnessed, made its utterances rise up in life before them: cf. John ii. 17, 22. It was of the very essence of such a living use of O. T. Scripture that their quotations of it should not of necessity be verbatim exact.

Thirdly, combined with this there was an alteration of conscious or unconscious design. Sometimes the object of this was to obtain increased force: hence the variation from the original in the form of the divine oath, Rom. xiv. 11; or the exult "I quake," substituted for the cause, Heb. xii. 21; or the insertion of rhetorical words to bring out the emphasis, Heb. xii. 26; or the change of person to show that what men perpetrated had its root in God's determinate counsel, Matt. xxvi. 31. Sometimes an O. T. passage is abridged, and in the abridgment so adjusted, by a little alteration, as to present an aspect of completeness, and yet omit what is foreign to the immediate purpose. Acts i. 20; 1 Cor. i. 31. At other times a passage is enlarged by the incorporation of a passage from another source: thus in Luke iv. 18, 19, although the contents are professedly those read by our Lord from Is. lxi., we have the words "to set at liberty them that are bruised," introduced from Is. lvi. 9 (Sept.).—similarly in Rom. xi. 8. Deut. xxxix. 4 is combined with Is. xxi. 10. In some cases still greater liberty of alteration is assumed. In Rom. x. 11, the word ἑρμήνευς is introduced into Is. xxviii. 16, to show that that is uttered of Jew and Gentile alike. In Rom. xi. 26, 27, the "to Zion" of Is. lx. 20 (Sept. ἑρμήνευς Ζωα) is replaced by "out of Zion" (suggested by Is. ii. 3). Such a liberty is already occasionally manifest from Zion, the Christian Church, his law was to go forth; or even from the literal Jerusalem, cf. Luke xxiv. 47; Rom. xv. 19, for, till she was destroyed, the type was still in a measure kept up. In Matt. vii. 17, the words of Is. iii. 4 are adapted to the divine removal of disease, the outward token and witness of that sin which Christ was eventually to remove by his death, thereby fulfilling the prophecy more completely. For other, though less striking, instances of variation, see 1 Cor. xiv. 21; 1 Pet. iii. 15. In some places again, the actual words of the original are taken up, but employed with a new meaning: thus the ἑρμήνευς, which in Heb. ii. 3 merely qualified the verb, is in Heb. x. 57 made the subject to it.

Almost more remarkable than any alteration in the quotation itself, is the circumstance that in Matt. xxvii. 9, Jeremiah should be named as the author of a prophecy really delivered by Zachariah: the reason being, as has been well shown by Hengstenberg in his Christology, that the prophecy is based upon that in Jer. xviii., xix., and that with a reference to this original source the most essential features of the fulfillment of Zachariah's prophecy would be misunderstood. The case is indeed not entirely unique: for in the Greek of Mark i. 2, 3, where Matt. iii. 1 is combined with Is. xl. 3, the name of Isaiah alone is mentioned: it was on his prophecy that that of Mekibih partly depended. On the other hand in Matt. ii. 23; John vi. 45, the comprehensive mention of the prophets indicates a reference not only to the passages more particularly contemplated, Is. xi. 1, liv. 13, but also to the general tenor of what had been elsewhere prophetically uttered. The above examples will sufficiently illustrate the freedom with which the Apostles and Evangelists interwove the older Scriptures into their writings. It could only result in failure were we to attempt to apply any merely mechanical account of variations from the O. T. text which are essentially not mechanical. That which is still replete with life may not be dissected by the anatomist. There is a spiritual meaning in their employment of Scripture, even as there is a spiritual meaning in Scripture itself. And though it would be as idle to treat of their quotations without reference to the Septuagint, as it would be to treat of the inner meaning of the Bible without attending first to the literal interpretation, still it is only when we pay regard to the inner purpose for which each separate quotation was made, and the inner significance to the writer's mind of the passage quoted, that we can arrive at any true solution of the difficulties which the phenomena of these quotations frequently present. (The ancient tables of the quotations, ranged in the order of the N. T. passages, are given in the Introductions of Davidson and Horne. A much fuller table, embracing the informal verbal allusions, and ranged in the contrary order, but with a reverse index, has been compiled by Tougll, and published separately, 1855.)
OLEANDER

The oleander is a shrub that is closely associated with the history and civilization of man. Our concern with it here is in its sacred relations, and in its connection with Judaism and the Jewish people. Many of the Scriptural associations of the olive-tree are singularly poetical. It has this remarkable interest, in the first place, that its foliage is the earliest that is mentioned by name, when the waters of the flood began to retire. "Lo! in the dove's mouth was an olive-leaf plucked off: so Noah knew that the waters were abated from off the earth" (Gen. viii. 11). How far this early incident may have suggested the later emblematical meanings of the leaf, it is impossible to say: but now it is as difficult for us to disconnect the thought of peace from this scene of primitive patriarchal history, as from a multitude of allusions in the Greek and Roman poets. Next, we find it the most prominent tree in the earliest allegory. When the trees invited it to reign over them, its sagacious answer sets it before us in its characteristic relations to Divine worship and domestic life. "Should I leave my fatness, wherewith by me they honor God and man, and go to be promoted over the trees?" (Judg. iv. 8, 9). With David it is the emblem of prosperity and the divine blessing, and he compares himself to "a green olive tree in the house of God" (Ps. lii. 8): and he compares the children of a righteous man to the "olive-branches round about his table" (Ps. cxviii. 3). So with the later prophets it is the symbol of beauty, luxury, and strength; and hence the sacred symbols of religious privileges: "His branches shall spread, and his beauty shall be as the olive-tree," are the words in the concluding promise of Hosea (xiv. 9). "The Lord called thy name a green olive-tree, fair, and of goodly fruit," is the expostulation of Jeremiah when he foretells retribution for advantages abused (xi. 16). Here we may compare Ezek. xl. 10. We must bear in mind, in reading this imagery, that the olive was among the most abundant and characteristic vegetation of Judaea. Thus after the Captivity, when the Israelis kept the Feast of Tabernacles, we find them, among other branches for the booths, bringing "olive-branches" from the "mount" (Neh. viii. 15). "The mount" is doubtless the famous Olive, or Mount of Olives, the "Olivetana" of the Vulgate. Here we cannot forget that the trees of this sacred hill witnessed not only the humiliation and sorrow of David in Absalom's rebellion (2 Sam. xxv. 30), but also some of the most solemn scenes in the life of David's Lord and Son: the prophecy over Jerusalem, the agony in the garden (Genn. iii. 4: the name itself means "a press for olive-oil"), and the ascension to heaven. Turning now to the mystic imagery of Zechariah (iv. 3, 11-14, and of St. John in the Apocalypse (Rev. xvi. 3, 4), we find the olive-tree used, in both cases, in a very remarkable way. We cannot enter into any explanation of "the two olive-trees", "the two olive-branches", the two anointed ones that stand by the Lord of the whole earth" (Zech.); or of "the two witnesses . . . the two olive-trees standing before the God of the earth" (Rev.); but we may remark that we have here a very expressive link between the prophecies of the O. T. and the N. T. Finally, in the argumentation of St. Paul concerning the relative positions of the Jews and Gentiles in the counsels of God, this tree supplies the basis of one of his most forcible allegories (Rom. xi. 16-25). The Gentiles are the "will olive" (Aphracamos), grafted in upon the "good olive" (kaloxalamos), to which once the Jews belonged, and with which they may again be incorporated. It must occur to any one that the natural process of grafting is here inverted, the custom being to engrat a good branch upon a bad stock. And it has been contended that in the case of the olive-tree the inverse process is sometimes practiced, a wild twig being engratfed to strengthen the cultivated olive. Thus Mr. Ewbank (Comm. on Romans, ii. 112) quotes from Palladius:

"Ficus semper illius pinus olivae est; et quo non movit numero ferrum ducet." But whatever the fact may be, it is unnecessary to have recourse to this supposition: and indeed it confirms the allegory. Nor is it likely that St. Paul would himself tie by horticultural law in using such an image as this. Perhaps the very stress of the allegory is in this, that the grafting

**Olive (Olea Europaea).**
A contrary to nature (παρὰ φύσιν ἐνενεκτρισθῆς, v. 24).

This discussion of the passage in the Romans leads us naturally to speak of the cultivation of the olive-tree, its industrial applications, and general characteristics. It grows freely almost everywhere on the shores of the Mediterranean; but, as has been said above, it was peculiarly abundant in Palestine. See Deut. vi. 11, vii. 8, xxviii. 40. Olive-yards are a matter of course in descriptions of the country, like vineyards and corn-fields (Judg. xv. 5; 1 Sam. viii. 14). The kings had very extensive ones (1 Chr. xxvii. 28). Even now the tree is very abundant in the country. Almost every village has its olive-crove. Certain districts may be specified where at various times this tree has been very luxuriant. Of Asher, on the skirts of the Lebanon, it was prophesied that he should "dip his foot in oil" (Deut. xxxiii. 24). The immediate neighborhood of Jerusalem has already been mentioned. In the article on Gaza we have alluded to its large and productive olive-woods in the present day; and we may refer to Van de Veldt's Syria (i. 386) for their extent and beauty in the vale of Shechem. The cultivation of the olive-tree had the closest connection with the domestic life of the Israelites, their trade, and even their public ceremonies and religious worship. A good illustration of the use of olive-oil for food is furnished by 2 Chr. ii. 10, where we are told that Solomon provided Hiram's men with "twenty thousand baths of oil." Compare Ezra iii. 7. Too much of this product was supplied for home consumption; hence we find the country sending it as an export to Tyre (Ez. xxvii. 17), and to Egypt (Hos. vii. 1). This oil was used in coronations, and it was an emblem of sovereignty (1 Sam. ii. xii. 2, 3). It was also mixed with the offerings in sacrifice (Lev. ii. 1, 2, 6, 13). Even in the wilderness very strict directions were given that, in the Tabernacle, the Israelites were to have "pure oil olive beaten for the light, to cause the lamp to burn always" (Ex. xxvii. 20). For the burning of it in common lamps, see Matt. xxv. 3, 4, 8. The use of it on the hair and skin was customary, and indicative of cheerfulness (Ps. xxxii. 5; Matt. vi. 17). It was also employed medicinally in surgical cases (Luke x. 34). See again Mark vi. 13; Jam. v. 14, for its use in combination with prayer on behalf of the sick. [Oil; Anoint.] Nor, in enumerating the useful applications of the olive-tree, must we forget the wood, which is hard and solid, with a fine grain, and a pleasing yellowish tint. In Solomon's Temple the cherubim were of "olive-tree" (1 K. vi. 23), as also the doors (xv. 31, 32) and the posts (ver. 33). As to the berries (Jam. iii. 12; 2 Esdr. xvi. 29), which produce the oil, they were sometimes gathered by shaking the tree (Is. xxiv. 13), sometimes by beating it (Deut. xxiv. 20). Then followed the treading of the fruit (Deut. xxxiii. 34; Mic. vi. 15). Hence the mention of "oil-fats" (Joel ii. 24). Nor must the flower be passed over without notice: —

"Si bene foruerint oleo, nitidissimus annus." 
Or. Fest. v. 265.

The wind was dreaded by the cultivator of the

\[ a \]
\[ All \ these \ subjects \ admit \ of \ very \ full \ illustration \ from \ Greek \ and \ Roman \ writers. \ And \ if \ this \ were \ not \ a \ Biblical \ article, \ we \ should \ dwell \ upon \ other \ classical \ associations \ of \ the \ tree \ which \ supplied \ the \ victor's \ wreath \ at \ the \ Olympic \ games, \ and \ a \ twig \ of \ which \ is \ the \ familiar \ mark \ on \ the \ coins \ of \ Athens. \ See \ Judith \ v. 13. \]

\[ b \]
\[ * \] If the olive be the wood intended in I K. vi. 23, it is singular that a wood of such hardness should have been used for a carving, when the carving was to be covered with gold, and thus the fine grain would be concealed. Tristram (Nat. Hist. of the Bible, p. 371) thinks that the oleaster is meant here. See Ol.-Tax. 0 E. P.
olive: for the least ruffling of a breeze is apt to cause the flowers to fall: —

"Florentam oleam: venti moneare pretoris."   

Or. Fast. v. 321.

Thus we see the force of the words of Elijah the Ternantite: "He shall cast off his flower like the olive" (Job xvi. 33). It is needless to add that the beast was a formidable enemy of the olive (Ammos, iv. 9). It happened not unaptly that hopes were disappointed, and that "the labor of the olive failed" (Hub. iii. 17). As to the growth of the tree, it thrives best in warm and sunny situations, it is of a moderate height, with knotty gnarled trunks, and a smooth ash-colored bark. It grows slowly, but it lives to an immense age. Its look is singularly indicative of tenacious vigor: and this is the force of what is said in Scripture of its "greatness," as emblematic of strength and prosperity. The leaves, too, are not decadent. Those who see olives for the first time are occasionally disappointed by the dusty color of their foliage; but those who are familiar with them find an inexpressible charm in the rippling changes of these slender gray-green leaves. Mr. Ruskin's pages in the "Shores of Tuscany" (iii. 175-177) are not at all extravagant.

The literature of this subject is very extensive. All who have written on the trees and plants of Scripture have devoted some space to the olive. One especially deserves to be mentioned, namely, Thomson, "Land and Book," pp. 51-57. But, for Biblical illustration, no later work is so useful as the "Historia Botanica," of Celsius, the friend and patron of Linnaeus. J. S. H.

* The noble olive-yards of Attica, which Paul must have seen whether he went from Athens to Corinth by the way of Megara or Piraeus (Acts xxiii. 1), still preserve their ancient fame. Allusion is made above to the olive-press. Dr. W. M. Thomson found several such presses still well preserved from early Hebrew times, at U'm al-Amunia, not far from Tyre, a little north of Kainah. [KANAH] 2 Two columns, about two feet square and eight feet high, stand on a stone base, and have a stone of the same length and size on the top. Sometimes there are two on top, to make it more firm. These columns are about two feet apart, and in the inner sides, facing each other, are grooves cut from near the top to the bottom, about four inches deep and six wide, in which the plank which pressed on the olives moved up and down. . . . The plank was placed upon them and pressed down by a long beam acting as a lever, by the aid of the great stones on the top of the columns. . . . Close to the press, are two immense stone basins, in which the olives were ground. I measured one which had recently been uncovered. It was seven feet two inches in diameter, a foot deep, with a rim six inches thick; a huge bowl of polished stone, without a flaw or crack in it." [Bibl. Sacra, xii. 832 f.] The same writer ("Land and Book," i. 72-76) explains in a striking manner the various Scripture allusions to the olive (Job xv. 33; Hab. iii. 18; Isa. xvi. 6; Deut. xxxiv. 20). "The sites," says Mr. Tristram, "of many of the deserted towns of Judah bear witness to the former abundance of the olive, where it now no longer exists by the oil-presses, with their gutters, troughs, and cisterns hewn out of the solid rock. I have seen many, the far south of Hebron, where not an olive has existed for centuries, and also many among deserted thickets of Carmel" (Nat. Hist. of the Bible, p. 576). Most of the passages which refer to the olive might have been written in our own day, so remarkably do the present customs accord with those of the oldest known inhabitants of the land. Leyerter (Herzog's Rund-Encyk. x. 547) quotes Schultz ("Leitungen des Hebräers, o. 86") as saying that the wild olive may be and is used in the East for grafting the cultivated olive when the latter becomes unfruitful; but it is generally allowed that Paul does not refer to Rom. xi. 17 to any actual process in nature, but assumes the case for the sake of illustration.

* OLIVE-BERRIES (Jam. iii. 12). [OLIVE.]

OLIVES, MOUNT OF (ολυμπός ολίβους; τὸ ολυμπὸν τῶν ἀλάους; Mons Olivaram). The exact expression "the Mount of Olives" occurs in the O. T. in Zech. xiv. only; in the other places of the O. T. in which it is referred to, the form employed is the "ascetn of" the olives" (2 Sam. xxv. 3; 1 Kings, xxvi. 24). The "Mount of Olives," or simply "the mount" (Neh. viii. 15), is the mount facing Jerusalem "(1 K. x. 7), or "the mountain which is on the east side of the city" (Ez. xii. 1). In the N. T. three forms of the word occur: (1) The usual one, "The Mount of Olives" (τὸ ολυμπὸν τῶν ἀλάους). (2) By St. Luke twice (xii. 39, xxi. 37): "the mount called Eliaum." (3) By the 

OLIVES, MOUNT OF (ολυμπός ολίβους; τὸ ολυμπὸν τῶν ἀλάους; Mons Olivaram). The exact expression "the Mount of Olives" occurs in the O. T. in Zech. xiv. only; in the other places of the O. T. in which it is referred to, the form employed is the "ascend of" the olives" (2 Sam. xxv. 3; 1 Kings, xxvi. 24). The "Mount of Olives," or simply "the mount" (Neh. viii. 15), is the mount facing Jerusalem "(1 K. x. 7), or "the mountain which is on the east side of the city" (Ez. xii. 1). In the N. T. three forms of the word occur: (1) The usual one, "The Mount of Olives" (τὸ ολυμπὸν τῶν ἀλάους). (2) By St. Luke twice (xii. 39, xxi. 37): "the mount called Eliaum." (3) Also by St. Luke (Acts i. 12), the "mount called Olivet" (ἐπί τὸ καλὰ  ἀλαύως).

It is the well-known eminence on the east of Jerusalem, intimately and characteristically connected with some of the greatest and most significant events in the history of the Old Testament, the New Testament, and the intervening times, and one of the firmest links by which the two are united: the scene of the flight of David and the triumphal progress of the Son of David, of the idolatry of Solomon, and the agony and betrayal of Christ.

If anything were wanting to fix the position of the Mount of Olives, it would be amply supplied by the account of the first of the events just named, as related in 2 Sam. xxv., with the elucidations of the LXX. and Josephus (Ant. vii. 10). David's object was to place the Jordan between himself and Jerusalem. He therefore flies by the road called "the road of the wilderness" (xv. 23). This leads him across the Kidron, past the well-known olive-tree b which marked the path, up the toilsome ascent of Mishma (Parah, c. 3). Its meaning is "old" or "of long standing." The modern Arabic name for the whole ridge is the Jebel el-Zeitoun, i.e., Mount of Olives, or Jebel Tur, the mount of the mount, meaning, the important mount.

b The allusion to this tree, which survives in the LXX. of ver. 18, has vanished from the present Hebrew text.
the mount — elsewhere exactly described as facing Jerusalem on the east (1 K. xi. 7; Ez. xi. 23; Mark xiii. 3) — to the summit, where was a consecrated spot at which he was accustomed to worship God. At this spot he again performed his devotions — it must have seemed for the last time — and took his farewell of the city, "with many tears, as one who had lost his kingdom." He then turned the summit, and after passing Bahurim, probably about where Bethany now stands, continued the descent through the "dry and thirsty land" until he arrived "weary" at the bank of the river (Joseph. Ant. vii. 9, §§ 2-6; 2 Sam. xvi. 14, xvii. 21, 22).

This, which is the earliest mention of the Mount of Olives, is also a complete introduction to it. It stands forth, with every feature complete, almost as if in a picture. Its nearness to Jerusalem; the ravine at its foot; the olive-tree at its base; the steep road through the trees to the summit; the remarkable view from thence of Zion and the city; spread opposite and almost seeming to rise towards the spectator; the very "stones and dust" of the rugged and sultry descent, — all are caught, nothing essential is omitted.

The remaining references to it in the Old Testament are but slight. The "high places" which Solomon constructed for the gods of his numerous wives, were in the mount "facing Jerusalem" (1 K. xi. 7) — an expression which applies to the Mount of Olives only, as indeed all commentators apply it. Modern tradition (see below) has, after some hesitation, fixed the site of these sanctuaries on the most southern of the four summits into which the whole range of the mount is divided, and therefore far removed from that principal summit over which David took his way. But there is nothing in the O. T. to countenance this, or to forbid our believing that Solomon adhered to the spot already consecrated in the time of his father. The reverence which in our days attaches to the spot on the very top of the principal summit, is probably only changed in its object from what it was in the time of the kingdom of Judah.

Mount of Olives. (From Bartlett's Walks about Jerusalem.)

During the next four hundred years we have only the brief notice of Josiah's iconoclasts at this spot. Abaz and Manasseh had no doubt maintained and enlarged the original erections of Solomon. These Josiah demolished. He "defiled" the high places, broke to pieces the uncoth and obscene symbols which deformed them, cut down the images, or possibly the actual groves, of Ashtaroth, and effectually disquieted them for worship by filling up the cavities with human bones (2 K. xvii. 13, 14). Another two hundred years, and we find a further mention of it — this time in a thoroughly different connection.

— is referred to this day. The word rendered "thirsty" in ver. 1 is the same as that rendered "weary" in 2 Sam. xvi. 14 — מַיִּים.·

The author of the Targum PseudoJonathan introduces it still earlier. According to him, the olive-leaf which the dove brought back to Noah was plucked from it.

It must be remembered that the mount had not yet acquired its now familiar name. All that is said is that David "ascended by the ascent of the olives." At Bahurim, while David and his men kept the road, Shimei scrambled along the slope of the overhanging hill above, even with him, and threw stones at him. And covered him with dust (2 Sam. xvi. 15) [by the Hebrew "dusted].·

a The mention of the summit marks the road to have been that over the present Mount of the Ascension. The southern road keeps below the summit the whole way.

b The expression of the text denotes that this was a known and frequented spot for devotion. The Talmudists say that it was the place at which the Ark and Tabernacle were first caught sight of in approaching Jerusalem over the Mount. Spots from which a sanctuary is visible are still considered in the East as themselves sacred. (See the citations in Lightfoot on Luke xxiv. 50; and compare Mizpeh, p. 1957 note.) It is worthy of remark that the expression is " where they worshipped God," not Jehovah; as if it were one of the old sanctuaries of Einolim, like Bethel or Moreh.

c Ps. xlii. — by its title and by constant tradition
It is now the great repository for the vegetation of the district, planted thick with olive, and the bushy myrtle, and the feathery palm. "Go out" of the city "into the mount"—was the command of Ezra for the celebration of the first anniversary of the Feast of Tabernacles after the Return from exile. "Go and flow the olive branches and palm-leaves, and branches of thick trees to make booths, as it is written" (Neh. viii. 15).

The cultivated and unbranched character which is implied in this description, as well as in the name of the mount, it retained till the T. T. times. Caphnatha, Bethphage, Bethany, all names of places on the mount, and all derived from some fruit or vegetable, are probably of late origin, certainly of late mention. True, the "palm-branches" borne by the crowd who flocked out of Jerusalem to welcome the "Prophet of Nazareth," were obtained from the garden of the Temple (Ps. xcvii. 12, 13); but the boughs which they strewn on the ground before him, were cut or torn down from the olive trees which shadowed the road round the hill.

At this point in the history it will be convenient to describe the situation and appearance of the Mount of Olives. It is not so much a "mount" as a ridge, of rather more than a mile in length, running in general direction north and south; covering the whole eastern side of the city, and screening it from the bare, waste, uncultivated country—the "wilderness"—which lies beyond it, and forms the space between the Mount of Olives and the Dead Sea. At its north end the ridge bends round to the west so as to form an inclosure to the city on that side also. But there is this difference, that whereas on the north a space of nearly a mile of tolerably level surface intervenes between the walls of the city and the rising ground, on the east the mount is close to the walls, parted only by that which from the city itself seems so parting at all—the narrow ravine of the Kidron. You descend from the Golden Gateway, or the Gate of St. Stephen, by a sudden and steep declivity, and no sooner is the heel of the valley reached than you again commence the ascent of Olivet. So great is the effect of this proximity, that, partly from that, and partly from the extreme clearness of the air, a spectator from Bethany—aetch of olive branches of the Gomorrah, is too distant and too completely isolated by the trench of the Kidron to claim the name. We will therefore confine ourselves to this portion. In general height it is not very much above the city: 300 feet higher than the Temple mount; hardly more than 100 above the so-called Zion. But this is to some extent made up for by the close proximity which exaggerates its height, especially on the side next to it. The Mount of Olives is the only one available for an eminence of some length and even height, but that word is hardly accurate. There is nothing "ridge like" in the appearance of the Mount of Olives, or of any other of the limestone hills of this district of Palestine; all is rounded, swelling, and regular in form. At a distance its outline is almost horizontal, gradually sloping away at its southern end; but when approached, and especially when seen from below the eastern wall of Jerusalem, it divides itself into three, or rather perhaps four, independent summits or eminences. Proceeding from N. to S. these occur in the following order: Gallese, or Viti Gallei; Mount of the Ascension; Prophets, subordinate to the last, and almost a part of it; Mount of Olives.

In the central one, distinguished for its mummery and domes of the Church of the Ascension, is in every way the most important. The church, and the tiny hamlet of wretched hovels which surround it, the Kerj et Tur, are planted slightly on the Jordan side of the actual top, but not so far as to hinder their being seen from all parts of the western envelope of the mountain, or, in other turn, commanding the view of the deepest recesses of the Kidron Valley (Ps. cxlv. 16). Three paths lead from the valley to the summit. The first—a continuation of the path which descends from the St. Stephen's Gate to the Tomb of the Virgin—passes under the north wall of the inclosure of Gethsemane, and striking off to the right up the very breast of the hill, surmounts the projection on which is the traditional spot of the Lamentation over Jerusalem, and thence proceeds directly upwards to the village. This is rather shorter than the former; but, on the other hand, it is much steeper, and the ascent extremely tiresome and difficult. The third leaves the other two at the N. E. corner of Gethsemane, and making a corner detour to the south, visits the so-called "Tombs of the Prophets," and following a very slight depression which occurs at that part of the mount, arrives in its turn at the village.

Of these three paths the first, from the fact that it follows the natural shape of the ground, is unquestionably, older than the others, which deviate in pursuit of certain artificial objects. Every consideration is in favor of its being the road taken by David in his flight. It is, with equal probability, that usually taken by our Lord and his disciples in their morning and evening transit between Jeru*

Note: The text is a historical and geographical description of the Mount of Olives, based on historical and biblical references. It provides an overview of the physical characteristics and historical significance of the area, highlighting its strategic importance and scenic beauty. The text also mentions the Mount of Olives as a key location for various biblical events, emphasizing its role in the life of Jesus and the development of early Christianity. The description is detailed, providing insights into the landscape, vegetation, and historical context, making it a valuable resource for understanding the archaeological and historical aspects of the region.
OLIVES, MOUNT OF 2245

the Ascension and Viri Galilaei (Maund-ville, p. 177, and so Doubdan); but Maundrel
(E. Tr. p. 470) places it close to the cave of
Pelagia.

Viri Galilaei. Spot from which the Apostles
watched the Ascension: or at which Christ
first appeared to the 3 Maries after his Res-
urrection (Tobler, p. 76, note).

(2.) On the east side, descending from the
Church of the Ascension to Bethany.
The field in which stood the fruitless fig-tree.

Bethphage.
Bethany: House of Lazarus. (A Church there
whereas the Ascension; Tobiifer, p. 178.)

Of these, Bethsema the only one which
has any claim to be authentic. Its claims, how-
ever, are considerable; they are spoken of
here.

(2.) The first person who attached the Ascension
of Christ to the Mount of Olives seems to have been
the Empress Helena (A. D. 325). Eusebii (Vit.
Constit. iii. § 43) states that she erected as a mem-
orial of that event a sacred house of assembly
on the highest part of the mount, where there was a
cave which a sure tradition (Αὐτὸς Ἀναπάθης) testi-
ified to be that in which the Saviour had imparted
mysteries to his disciples. But neither this ac-
count, nor that of the same author (Luebe. S. C.
monum. Evang. vi. 18) when the cave is again mentioned,
do more than name the Mount of Olives, generally,
as the place from which Christ ascended: they fix
no definite spot thereon. Nor does the Béordeau
Pilgrim, who arrived shortly after the building of
the church (A. D. 353), know anything of the exact
spot. He names the Mount of Olives as the place
where Christ used to teach his disciples; men-
tions that a basilica of Constantine stood there . . .
he carefully points out the Mount of Trans-
figuration in the neighborhood (!) but is silent on the
Ascension. From this time to that of Areulf
(A. D. 709) we have no information, except the
usual reference of Jerome (A. D. 390), cited below.
In that immense interval of 370 years, the basilica
of Constantine or Helena had given way to the
round church of Modezus (Tobler, p. 92, note),
and the tradition had become firmly established.
The church was open to the sky — because of the pass-
ages of the Lord's body," and on the ground in the
centre were the prints of his feet in the dust (paleae).
The cave or spot hailed by his preaching
to his disciples appears to have been moved off
to the north of Bethany (Early Tract. p. 6).

Since that day many changes in detail have oc-
curred among the most sacred spots now con-
mand little or no attention; but three still remain,
sufficiently sacred — if authentic — to consecrate
any place to these. These are: (1) Bethsema, at the foot
of the mount. (2.) The place of the Lamentation
of our Saviour over Jerusalem, half-way up; and
(3.) The spot from which He ascended, on the
summit.

(1.) Of these, Bethsema is the only one which
has any claim to be authentic. Its claims, how-
ever, are considerable; they are spoken of
elsewhere.

(1) Commencing at the western foot, and going
gradually up the hill. The mountain is
containing. Large spot. The sacred
purports of the Spots are
contained. The hill, which we are now considering,
and their contents is to the sites of some of the
most sacred and impressive events of Christian history.
During the Middle Ages most of these were
protected by an edifice of some sort; and to judge
by the reports of the early travellers, the mount
must at one time have been thickly covered with churches
and convents. The following is a complete list of
these, as far as the writer has been able to ascertain
them.

(1.) Do a llf the Virgin. Containing all those
Joseph, Joachin, and Anna.

Gethsemane: containing —

* Of Christ's Prayer and Agony. (A Church here in the time of Jerome and Willibald.)
Rock on which the 3 disciples slept.
* Place of the capture of Christ. (A Church in the time of Bernard the Wise.)

Spot from which the Virgin witnessed the stoning
of St. Stephen.

Do. At the girdle dropped during her As-
sumption.

Do. Of our Lord's Lamentation over Jerusalem.
Luke xix. 41. (A Church here formerly,
called Dominus lexit; Surius, in Mislin, ii. 476.)
Do. On which He first said the Lord's Prayer, or
wrote it on the stone with his finger (Sac-
walt, Early Tract. p. 42). A splendid Church
here formerly. Maundrel seems to give this as
the spot where the Beatitude were
pronounced (E. Tr. p. 177).

Do. At which the woman taken in adultery was
brought to Him (Bernard the Wise, E. Tr.
p. 28).

* soluble of the Prophets (Matt. xxiii. 29); con-
taining, according to the Jews, those of Hag-
gai and Zachariah.

Cave in which the Apostles composed the Creed:
called also Church of St. Mark or of the 12
Apostles.

Spot at which Christ discoursed of the Judgment
to come (Matt. xxiv. 3).

Cave of St. Pelagia: according to the Jews, sep-
ulchre of Habbakuk the Prophetess.

* <a id="footnote1" class="footnote" href="#" >Place of the Ascension. (Church, with subse-
quentlly a large Augustine convent at-
tached.)</a>

Spot at which the Virgin was warned of her
death by an angel. In the valley between

* The above catalogue has been compiled from
Quaracinius, Doubdan, and Mislin. The last of these
works, with great pretension to accuracy, is very in-

casionally given.

b Pieny Indulgence is accorded by the Church of
Rome to those who recite the Lord's Prayer and the
ve Maria at the spots marked thus (*).

a "Ευλογία ὀνόμα τελειωσίας. This church was sur-
mounted by a conspicuous gilt cross, the glitter
of which was visible far and wide. Jerome refers to it
several times. See especially Euph. Ponte, "ceux
ruitals," and his comment on Zeph. i. 15.
saw the "dust" has given way to stone, in which the print of first one, then two feet, was recognized, one of which by a strange fate is said now to rest in the Mosque of the Aksa. The building has gone through alterations, additions, and finally losses, which has reduced them to their present condition: a mosque with a paved and enclosed court of irregular shape adjoining, round which are ranged the altars of various Christian churches. In the centre is the miraculous stone unnamed by a cupola and erected by a Muslim Kibeh or praying-place, with an altar attached, on which the Christians are permitted once a year to say mass (Williams, *Holy City, ii* 445). But through all these changes the localities of the Ascension has remained constantly the same.

The tradition no doubt arose from the fact of Helena's having erected her memorial church on the summit of the hill. It has been pointed out that she does not appear to have had any intention of fixing on a precise spot; she desired to erect a memorial of the Ascension, and this she did on the summit of the Mount of Olives, partly no doubt because of its conspicuous situation, but mainly because of the existence there of the sacred cavern in which our Lord had taught. It took nearly three centuries to harden and narrow this general recognition of the connection of the Mount of Olives with Christ, into a lying invention in contradiction of the sacred narrative of the Ascension. For a contradiction it undoubtedly is. Two accounts of the Ascension exist, both by the same author — the one, Luke xix. 50, 51, the other, Acts i. 6-11. The former only of these names the place at which our Lord ascended. That place was not the summit of the hill, but Bethany — "He led them out as far as to Bethany" — on the eastern slope of the mount nearly a mile beyond the traditional spot. The narrative of the Acts does not name the scene of the occurrence, but it states that after it had taken place the Apostles returned to Jerusalem from the mountain called Olivet, which is from Jerusalem a sabbath-day's journey. It was their natural, their only route: but St. Luke is writing for Gentiles ignorant of the localities, and therefore he names neither Olive, nor the general information that it — that is, the summit and main part of the mount — was a Sabbath-day's journey from Jerusalem. The specification of the distance no more applies to Bethany on the further side of the mount than to Gethsemane on the near.

And if, leaving the evidence, we consider the relative fitness of the two spots for such an event — and compare the retired and wooded slopes around Bethany, so intimately connected with the last period of his life and with the friends who relieved the dreadful pressure of that period, and to whom he was attached by such binding ties, with an open public spot visible from every part of the city, and indeed for miles in every direction — we shall have no difficulty in deciding which is the more appropriate scene for the last act of the earthly career of One who always shunned publicity even before his death, and whose communications after his resurrection were confined to his disciples, and marked by a singular privacy and reserve. (3) The third of the three traditional spots mentioned — that of the Lamentation over Jerusalem (Luke xix. 41-44) — is not more happily chosen than that of the Ascension. It is a numenous or protumence which projects from the slope of the breast of the hill, about 300 yards above Gethsemane. The sacred narrative requires a spot on the road from Bethany, at which the city or temple should suddenly come into view: but this is one which can only be reached by a walk of several hundred yards over the breast of the hill, with the temple and city full in sight the whole time. It is also pretty evident that the path which now passes the spot, is subsequent in date to the fixing of the spot. As already remarked, the natural road lies up the valley between this hill and that to the north, and no one, unless with the special object of a visit to this spot, would take this very inconvenient path. The inappropriateness of this place has been noticed by many; but Mr. Stanley was the first who gave it its death-blow, by pointing out the true spot to take its place. In a well-known passage of *Notaiii and Polemics* (pp. 150-153), he shows that the road of our Lord's "Triumphant entry" must have been, not the short and steep path over the summit used by small parties of pedestrians, but the longer and easier route round the southern shoulder of the southern of the three hills, and the spot precisely the same as that which presents two successive views of Jerusalem: the first its southwest portion — the modern Zion; the second, after an interval, the buildings on the Temple mount, answering to the two points in the nar-

---

4 Even these were made out by one (Toihber, *p. 463, note*).
5 "The "Chapel of the feet of 1 St. is at the southern end of the main aisle of the Aksa, almost under the dome. Attached to its northern side is the Pulpit. At the time of Ali Bey's visit (1218, and plate xix.) it was called *Sohn Jaros, Lord Jesus*; but he says nothing of the foot-prints. *See the plan of the edifice, in its present condition, on the margin of fig. Perrot's map, bid. Other plans are given in Quarrerriani, ii. 320, and B. Amire, No. 21* (Avenel's sketch is in Toihber (Nouvelles, *etc.*).
6 Since writing this, the writer has observed that Mr. Stanley has taken the same view, almost in the same words. *See S. P. C. E. Ann. xiv. 1863.*
7 It is uncertain whether the stones to be used for Bethany are such as in the Aksa (xvi. 37), compared with Matt. xxvi. 71, xxvi. 6, Mark v. 34. The morning walk from Bethany did not at any rate terminate with the day after his arrival at Jerusalem. (See Mark xiii. 28) One mode of reconciling these two narratives — which are not good reconciling — is to say that the distric of Beth:
OLIVES, MOUNT OF

OLIVES, MOUNT OF

The southern summit is considerably lower than the centre one, and, as already remarked, it is much more definitely separated from the surrounding portions of the mountain than the others are. It is also sterner and more repulsive in its form. On the south it is bounded by the Wady en-Nar, the continuation of the Kidron, curving round eastward on its dreary course to S. Salim and the Dead Sea. From this barren ravine the Mount of Offense rears its rugged sides by activities barker and steeper than any in the northern portion of the mount, and its top presents a bald and desolate surface, contrasting greatly with the cultivation of the other shoulders, and which not impossibly, as in the case of Mount Ebal, suggested the name which it now bears. On the steep ledges of its western face clings the ill-favored village of Silmān, a few dilapidated towers rather than houses, their gray bared walls hardly to be distinguished from the rock to which they adhere, and inhabited by a tribe as mean and repulsive as their habitations. [SILMA.] Crossing to the back or eastern side of this mountain, on a half-isolated promontory or spur which overlooks the road of our Lord's progress from Bethany, are found tanks and foundations and other remains, which are maintained by Dr. Barclay (City, etc. p. 66) to be those of Bethphage (see also Stewart, Tent and Khan, p. 522).

The title Mount of Offense, or Scandal, was bestowed on the supposition that it is the "Mount of Corruption," e on which Solomon erected the high places for the gods of his foreign wives (2 K. xxiii. 13: 1 K. xi. 7). This tradition appears to be of a recent date. It is not mentioned in the Jewish travellers. Benjamin, Iap-larch, or Peta-chi, which gives the appearance of the name, or the tradition as related to that locality among Christian writers, appears to be in John of Wurtzburg (Tolder, p. 80, note) and Brocardus (Descrip. Ter. S. cap. ix.) both of the 13th century. At that time the northern summit was believed to have been the site of the altar of Chemosh (Brocardus), the southern one that of Molech only (Thietmar, Peregr. xi. 2).

The wall seems to have crossed the Kidron from about the present St. Stephen's Gate to the mount on the opposite side. It then turned south and encompassed the mount as far as the rock called the Bereot (Acre τὸν Περιστερέαν καλομετρία πτεραν), and the other hill which lies next it, and is over the Valley of Silmon." Pirestereon may be used as a synonym for columbia, a late Latin word for an excavated cemetery; and there is perhaps some analogy between it and the Wady Hamme dziewa, or Valley of Pigeons, in the neighborhood of Tiberias, the rocky sides of which abound in caves and perforations. Or it may be one of those half-Hebrew, half-Greek appellations, which there is reason to believe Josephus bestows on some of the localities of Palestine, and which have yet to be investigated. Tischendorf (Travels in the East, p. 170) is wrong in saying that Josephus "always calls it the Dorect." He mentions it only this once.

The names of Jerusalem, Hierusalem, and Jerusalem, are derived from the same root, and are connected etymologically in some way with the name by which the mount is occasionally rendered in the Targums — יִשְׂרָאֵל (Jonathan, Cant. vili. 9; Pseudojon. Gen. viii. 11) One is probably a play on the other.

Mr. Stanley (S. 8. p. 188, note) argues that the Mount of Corruption was the northern hill (Virgil Gallici), because the three sanctuaries were sacred to it, and therefore on the other three summits.
tain as the site of Solomon's altar to Cernish (Deur. cap. ix.), but evidently knows no name for it, and connects it with no Christian event. This name may, as is conjectured (Gramm. ii. iii. 541) have been retained in its being the custom of the Apsides, or of the Galileans generally, when they came up to Jerusalem, to take up their quarters there; or it may be the echo or distortion of an ancient name of the spot, possibly the Gedelifth of Josh. xviii. 17 — one of the landmarks of the south boundary of Benjamin, which has often puzzled the topographer. But, whatever its origin, it appears at first to have been considered as the actual tabernacle of northern Palestine, the place at which our Lord appointed to meet his disciples after his resurrection (Matt. xxviii. 10), the scene of the miracle of Cana (Roland, p. 383). This transference, at once so extraordinary and so instructive, arose from the same desire, combined with the same astounding want of the critical faculty, which enabled the pilgrims of the Middle Ages to see without perplexity the scene of the Transfiguration (Bordeaux Pict.), of the Beatitudes (Maundeville, E. Tr. p. 177), and of the Ascension, all crowded together on the single summit of the central hill of Olivet. It testifies to the same feeling which has brought together the scene of Jacob's vision at Bethel, of the sacrifice of Isaac on Moriah, and of David's offering in the threshing-floor of Araunah. in Jerusalem, and which to this day has crowded within the walls of one church of modest size all the events connected with the death and resurrection of Christ.

In the 8th century the place of the angels was represented by two columns in the Church of the Ascension itself (Willis, E. Tr. p. 19). So it remained with some trifling difference, at the time of Sowfall's visit (A.D. 1402), but there was then also a chapel in existence — apparently on the northern summit — purporting to stand where Christ made his first appearance after the resurrection, and called "Galilee." So it continued at Maundeville's visit (1522). In 1580 the two pillars were still shown in the Church of the Ascension (Roudav), but in the 16th century (Teller, p. 75) the tradition had relinquished its ancient and more appropriate seat, and thenceforth became attached to the northern summit, where Maundeville (A.D. 1687) encountered it (E. Tr. p. 471), and where it even now retains some hold, the name Kalifet being occasionally applied to it by the Arabs. (See Pococke and Schinz, in Teller, p. 72.) An ancient tower connected with the tradition was in course of demolition during Maundeville's visit, "a Turk having bought the field in which it stood."

The presence of the crowd of churches and other edifices implied in the foregoing description must have rendered the Mount of Olives, during the early and middle ages of Christianity, entirely unlike what it was in the time of the Jewish kingdom, or of our Lord. Except the high places on the summit the only buildings then to be seen were probably the walls of the vineyards and gardens, and the towers and passes which were their invariably accompaniment. But though the churches we nearly all demolished there must be a consider-

able difference between the aspect of the mountain now and in those days when it received its name from the abundance of its olive-groves. It does not now stand so pre-eminent in this respect among the hills in the neighborhood of Jerusalem. — It is only in the deeper and more secluded slope leading up to the northernmost summit that these venerable trees spread into anything like a forest. The cedars commemorated by the Talmud (Light-foot, i. 365), and the date-palms implied in the name Bethany, have fared still worse: there is not one of either to be found within many miles. This change is no doubt due to natural causes, varieties of climate, etc.; but the fact was not probably given by the ravages committed by the army of Titus, who are stated by Josephus to have stripped the country round Jerusalem for miles and miles of every stick or shrub for the hanks constructed during the siege. No olive or cedar, however sacred to Jew or Christian, would at such a time escape the axes of the Roman sappers, and, remembering how under similar circumstances every root and tree of the smallest shrubs were dug up for fuel by the camp-followers of our army at Sebastopol, it would be wrong to deceive ourselves by the belief that any of the trees now existing are likely to be the same or even descendants of those which were standing before that time.

Except at such rare occasions as the passage of the holy of holies and the graves to the Jordan, there must also be a great contrast between the silence and loneliness which now prevails the mount, and the busy scene which it presented in later Jewish times. Bethphage and Bethany are constantly referred to in the Jewish authors as places of much resort for business and pleasure. The two large cedars already mentioned had below them shops for the sale of pigeons and other necessary for worshippers in the Temple, and appear to have driven an enormous trade (see the citations in Lightfoot, i. 39, 365). Two religious ceremonies performed there must also have done much to increase the numbers who resorted to the mount. The appearance of the new moon was probably watched for, certainly proclaimed, from the summit — the long torches waving to and fro in the moonless night tints away from the peak of Kun Stubach; and an occasion to which the Jews attached so much weight would be sure to attract a concourse.

The second ceremony referred to was burning of the Red Heifer. This solemn ceremonial was enacted on the central mount, and in a spot so carefully specified that it would seem not difficult to fix it. It was due east of the sanctuary, and at such an elevation on the mount that the officiating priest, as he slew the animal and sprinkled its blood, could see the facade of the sanctuary through the east gate of the Temple. To this spot a viaduct was constructed across the valley on a double row of arches, so as to raise it far above all possible proximity with graves or other defilements (see citations in Lightfoot, i. 39). The depth of the valley is such at this place (about 350 feet from the line of the south wall of the present Hebron area) that this viaduct must have been an important and conspicuous work. It was probably de-

a These columns appear to have been seen as late as A.D. 1590 by Roudav (Williams, Holy City, ii 127, note 12). There seems to be some doubt whether this was an annual ceremony. Jerome (Epitaph. Pauli, § 12)
OLIVET

abolished by the Jews themselves on the approach of Titus, or even earlier, when Pompey led his army by Jericho and over the Mount of Olives. This would account satisfactorily for its not being alluded to by Josuas. During the siege the 10th legion had its fortified camp and batteries on the top of the mount, and the first, and some of the fiercest encounters of the siege took place here.

"The lasting glory of the Mount of Olives," it has been well said, "belongs not to the Old Dispensation, but to the New. Its very barrenness of interest in earlier times sets forth the abundance of those associations which it derives from the closing scenes of the sacred history. Nothing, perhaps, brings before us more strikingly the contrast of Jewish and Christian feeling, the abrupt and inharmonious termination of the Jewish dispensation — if we exclude the culminating point of the Gospel history — than to contrast the blank which Olivet presents to the Jewish pilgrims of the Middle Ages, only dignified by the sacrifice of the red heifer; and the vision too great for words, which it offers to the Christian traveller of all times, as the most detailed and the most authentic abiding place of Jesus Christ. By one of those strange coincidences, whether accidental or borrowed, which occasionally appear in the Rabbinical writings, it is said in the Midrash, that the Shechinah, or Presence of God, after having finally retired from Jerusalem, dwelt three years and a half on the Mount of Olives, to see whether the Jewish people would not repent, calling, 'Return to me, O my son, and I will return to you;' 'Seek ye the Lord while He may be found, call upon Him while He is near;' and then, when all was in vain, returned to its own place. W. ether or not this story has a direct allusion to the missions of Christ, it is a true expression of his relation respectively to Jerusalem and to Olivet. It is useless to seek for traces of his presence in the streets of the since ten times captured city. It is impossible not to find them in the free space of the Mount of Olives" (Stanley, S. & P. p. 189).

A monograph on the Mount of Olives, exhausting every source of information, and giving the fullest references, will be found in Toledor's Sichonolge and der Olbergy, St. Gallen, 1852. The ecclesiastical traditions are in Quaresimin, Euchelio de Terra Sancta, ii. 277-340, &c. Douben's account (Le Voyage de la Terra Sainie, Paris, 1657) is excellent, and his plates very correct. The passages relating to the mount in Mr. Stanley's Sinai and Poleciae (pp. 185-195, 452-454) are full of instruction and beauty, and in fixing the spot of our Lord's lamentation over Jerusalem he has certainly made one of the most important discoveries ever made in relation to this interesting locality. G.

OLIVET (2 Sam. xx. 30; Acts i. 12), probably derived from the Vulgate, monte qui roctor Oliveti in the letter of these two passages. [See OLIVE, MOUNT OF.]

* OLIVE-YARD. [OLIVE.]

* OLOFERNES. [HOLOFERNES.]

OLYMPAS (Ολυμπας: Olympias), a Christian at Rome (Rom. xvi. 15), perhaps of the house of Philologus. It is stated by pseudo-Hippolytus that he was one of the seven deacons, and underwent martyrdom at Rome: and Baronius ventured to give A.D. 69 as the date of his death.

W. T. B.

OLYMPUS (Ολυμπιας: Olympias). One of the chief epiphanies of the Greek deity Zeus, as called from Mount Olympus in Thessaly, the abode of the gods (2 Marc. vi. 2). [See JUPITER, vol ii. p. 1348 &c.]

OMAE'rus (ι:μαηυος; [Vat. Μανος; Abr. Ιμαηυος] Abraham). Abraham of the sons of Bani (1 Esdr. ix. 34; comp. Extr. x. 34). The Syrian seems to have read "Ishmael."

O'MAR ( desper. eloquent, fluent). [Aram.: Alex. Μαυας in Gen. xxxvi. 11: Omar, Son of Elphaz the first-born of Esau, and "duke" of a phylarch of Edom (Gen. xxxvi. 11, 15; 1 Chr. i. 50). The name is supposed to survive in that of the tribe of Amor Arabs east of the Jordan. Himson asserts that Omar was the ancestor of "the house" in northern Edom (Biblefrere, Gen. xxxvi. 11), but the names are essentially different.

O'MEGA (ομ'ης). The last letter of the Greek alphabet, as Alpha is the first. It is used metaphorically to denote the end of anything: "I am Alpha and Omega, the beginning and the ending . . . the first and the last" (Rev. i. 8-11 [Rev. Text]). The symbol ν", which contains the first and last letters of the Hebrew alphabet, is, according to Buxtorf (Lee. Tolin. p. 341), among the Cabalists often put mystically for the beginning and end, like Α and Ω in the Apocalypse." Schoettgen (Hor. Heb. p. 1086) quotes from the Jelleut Rabeni on Gen. i. 1, to the effect that in θ" are comprehended all letters, and that it is the name of the Shechinah. [ALPHA.]

OMER. [Weights and Measures.]

O'MRI (ομρι, i.e. Ριομρι, probably "servant of Jehovah" (Gesenius): Αμξριν, [exc. Mic. vi. 16, Zaaphir; Vat. Ζαξβερη, exc. 2 K. viii. 26 (Vat.)); 2 Chr. xxiv. 2; Αμξριν: Alex. Ζαξβερη, exc. 2 K. viii. 36; Αμξριν: Jupit. Αμξριν, Joseph. Ant. viii. 12, § 55; Amuri. 1. Originally a name of the host to ELAH, was afterwards his self king of Israel, and founder of the third dynasty. When Elah was murdered by Zimri at Tirzah, then capital of the northern kingdom, Omri was engaged in the siege of Gibbethon, situated in the tribe of Dan, which had been occupied by the Philistines, who had retained it, in spite of the efforts to take it made by Xablah, Jeroboam's son and successor. As soon as the army heard of Elah's death, they proclaimed Omri king. Thereupon he broke up the siege of Gibbethon, and attacked Tirzah, where Zimri was holding his court as king of Israel. The city was taken, and Zimri perished in the flames of the palace, after a reign of seven days. [Zimri] Omri, however, was not allowed to establish his dynasty without a struggle against Tibni, whom "half the people" (1 K. xvi. 21) desired to raise to the throne, and who was bravely
OMRI

assisted by his brother Joram. The civil war lasted four years (cf. 1 K. xvi. 15, with 24). After the defeat and death of Tibni and Joram, Omri reigned for six years in Tirzah, although the palace there was destroyed; but at the end of that time, in spite of the proverbial beauty of the site ("an ant. ct. 4"), he transferred his residence, probably from the proved inability of Tirzah to stand a siege, to the mountain Shomron, better known by its Greek name Samaria, which he bought for two talents of silver from a rich man, otherwise unknown, called Shener. It is situated about six miles from Shemron, the most ancient of Hebrew capitals; and its position, according to Prof. Stanley (8. if P. p. 210), "is combined, in a union not elsewhere found in Palestine, strength, fertility, and beauty." Bethel, however, remained the religious metropolis of the kingdom, and the calf worship of Jeroboam was maintained with increased determination and disregard of God's law (1 K. xvi. 26). At Samaria Omri reigned for six years more. He seems to have been a vigorous and unscrupulous ruler, anxious to strengthen his dynasty by intercourse and alliances with foreign states. Thus he made a treaty with Benhadad I, king of Damascus, though on very unfavorable conditions, surrendering to him some frontier cities (1 K. xx. 34), and among them probably Hamoth-gilead (1 K. xvi. 3), and admitting into Samaria a resident Syrian embasement which is described by the expression e "the male streets in Samaria" for Benhadad. (See the phrase more fully explained under Ahaz.) As a part of the same system, he united his son in marriage to the daughter of a principal Pheenician prince, which led to the introduction into Israel of Baal worship, and all its attendant calamities and crimes. This worldly and irreligious policy is denounced by Michal xvi. 10) under the name of the "statutes of Omri," which appear to be contrasted with the Lord's precepts to his people, "to do justly, and to love mercy, and to walk humbly with thy God." It achieved, however, a temporary success, for Omri left his kingdom in peace to his son Ahab; and his family, unlike the ephemerical dynasties which had preceded him, gave four kings to Israel, and continued the throne about half a century, till it was overthrown by the great reaction against Baal-worship under Jehu. The probable date of Omri's accession (i.e. of the deaths of Elah and Zimri) was B. C. 852; of Tibni's defeat and the beginning of Omri's sole reign, B. C. 851, and of his death, B. C. 849.

2. (Amapia; [Vat. Amarea.] One of the sons of Rechab the son of Benjamin (1 Chr. vii. 31).

3. (Amaph; [Vat. Amapa.] A descendant of Pachez the son of Judah (1 Chr. ix. 4).

ON

4. (Ampui; [Vat. Amapli.] Alex. Amapi; Son of Michael, and chief of the tribe of Issachar in the reign of David (1 Chr. xxvii. 18).

ON [15S. Aep; Alex. Aepgon; Horn. The son of Pelet, and one of the chieftains of the tribe of Reuben who took part with Korah, Dathan, and Abiram in their revolt against Moses (Num. xvi. 1). His name does not again appear in the narrative of the conspiracy, nor his name allied to any event subsequent to the catastrophe. Possibly he repented; and indeed there is a likelihood of tradition to the effect that he was prevailed upon by his wife to withdraw from his accomplices. Aenclama's note is, "behold On is not mentioned again, for he was separated from their company after Moses spake with them. And our Rabbin of blessed memory said that his wife saved him," Josephus (Ant. iv. 2, § 2) omits the name of On, but retains that of his father in the form Φαλαις, thus apparently identifying Pelet with Phala, the son of Reuben.

W. A. W.

ON [15S., 15S. [see below; [Jcr.] An, [Gen.] Ηλειωδής An. Alex. Ηλεώδης; Heliodos, a town of lower Egypt, which is mentioned in the Bible under at least two names, Beth-

NISHENIUM, Ἱλειώδης (Jer. xliii. 13), corresponding to the ancient Egyptian sacred name HA-RA, "the abode of the sun," and that above, corresponding to the common name AN, and perhaps also spoken of as In-bal-heres, Ηλειωδος; or Ηλειως, the second part being, in this case, either the Egyptian sacred name, or else the Hebrew שן, but we prefer to read as a city of destruction. [IN-BAL-HERES.] The two names were known to the translator or translators of Exodus in the LXX. Where On is explained to be Heliodos ( Ae ληιωδης Ηλειωδος, l. 11); but in Jeremian this version seems to treat Beth-she憎as the name of a temple (τοις στεγασ 5Ηλειωδαιας, των τον Εκ, xliii. 13, LXX. l. 13). The Coptic version gives ΥΡΜ as the equivalent of the names in the LXX, but whether as an Egyptian word or such a word Hebranized can scarcely be determined.

The ancient Egyptian common name is written AN, or AN-, and perhaps also ANI; but the essential part of the word is AN, probably no more pronounced. There were two towns called AN, Heliodos, distinguished as the northern, AN-MEHEET, and Hermothis, in Upper Egypt, as the southern, AN-IES (Brugsch, Geogr. Inschr.

The latter is perhaps more probable, as the letter we represent by A is not commonly changed into the Coptic E unless indeed one hieroglyphic form of the name should be read AN, in which case the last vowel might have been suppressed, and the first incorporated with it. Brugsch (Geogr. Inschr., 254) supposes AN and ΑΙΟ to be the same, "as the Egyptian ΑΙΟ often had a sound intermediate between Α and Ω." But this does not admit of the change of the a vowel, to the long vowel α, from which it was as distinct as С to the other long vowel EE, respectively like S and and Σ, Ν and Ν.
As to the meaning, we can say nothing certain. Cyril, who, as bishop of Alexandria, should be listened to on such a question, says that On signified the sun ('Ὑπν ἔστι καὶ αὐτοῦ δ Ἀμος, ad Nos. p. 145), and the Coptic ΟΥΣΗ (M), ΟΥΣΗ, ΟΥΣΗ (S), "light," has therefore been compared (see La Croze, Les. pp. 71, 189), but the hieroglyphic form is UBEN, "shining," which has no connection with AN.

Heliopolis was situate on the east side of the Pelusian branch of the Nile, just below the point of the Delta, and about twenty miles northeast of Memphis. It was before the Roman time the capital of the Heliopolite Nome, which was included in Lower Egypt. Now, its site is above the point of the Delta, which is the junction of the Phatmetic, or Damietta branch and the Bolbitine, or Rosetta, and about ten miles to the northeast of Cairo. The oldest monument of the town is the obelisk, which was set up late in the reign of Sesertesen I, head of the 12th dynasty, dating B.C. cir. 2050. According to Manetho, the bull Memphis was first worshipped here in the reign of Kaiechos, second king of the 2d dynasty (B.C. 2400). In the earliest times it must have been subject to the 1st dynasty so long as their sole rule lasted, which was perhaps for no more than the reigns of Menes (B.C. cir. 2717) and Athothis: it doubtless next came under the government of the Memphites, of the 3d (B.C. cir. 2540), 4th, and 6th dynasties: it then passed into the hands of the Diospolites of the 12th dynasty, and the Shepherds of the 15th; but whether the former or the latter held it first, or it was contested between them, we cannot as yet determine. During the long period of anarchy that followed the rule of the 12th dynasty, when Lower Egypt was subject to the Shepherd kings, Heliopolis must have been under the government of the strangers. With the accession of the 18th dynasty, it was probably recovered by the Egypt.

tians, during the war which Ahmes, or Amonis, head of that line, waged with the Shepherds, and thenceforward held by them, though perhaps more than once occupied by invaders (comp. Chabas, Popperus Musique Harris), before the Assyrians conquered Egypt. Its position, near the eastern frontier, must have made it always a post of special importance. [No-Amon.]

The chief object of worship at Heliopolis was the sun, under the forms RA, the sun simply, HES, the sacred name of the place, HA-RA, "the abode of the sun," and ATUM, the setting sun, or sun of the nether world. Probably its chief temple was dedicated to both. SHU, the son of Atum, and TAFNET, his daughter, were also here worshipped, as well as the bull Memphis, sacred to RA, Osiris, Isis, and the Phœnix. BAKUK, probably represented by a fying bird of the crane kind. (On the mythology see Brauger, p. 254 ff.)

The temple of the sun, described by Strabo (xvii. pp. 85, 86), is now only represented by the single beautiful obelisk, which is of red granite, 68 feet 2 inches high above the pedestal, and bears a dedication, showing that it was sculptured in or after his 30th year (cir. 2050) by Sesertesen I., first king of the 12th dynasty (B.C. cir. 2080-2045). There were probably far more than a usual number of obelisks before the gates of this temple, on the evidence of ancient writers, and the inscriptions of some yet remaining elsewhere, and no doubt the reason was that these monuments were sacred to the sun. Heliopolis was anciently famous for its learning, and Eudoxus and Plato studied under its priests; but, from the extent of the mounds, it seems to have been always a small town.

The first mention of this place in the Bible is in the history of Joseph, to whom we read Pharaoh gave "to wife Aseath the daughter of Poti-phharosh, priest of On." (Gen. xii. 45, comp. ver. 36, and xlv. 20). Joseph was probably governor of Egypt under a king of the 15th dynasty, of which Memphis was, at least for a time, the capital. In this case be
ON

Heliopolis

would doubtless have lived for part of the year at Memphis, and therefore near to Heliopolis. The name of Asenath's father was appropriate to a Heliopolitan, and especially to a priest of that place (though according to some he may have been a priest at a very young age, and the name was afterwards bestowed by "the god of his son." The name of Joseph's master Padpard is the same, but with a slight difference in the Hebrew orthography. According to the LXX. version, On was one of the cities built for Pharaoh by the oppressed Israelites, for it mentions three "strong cities" instead of the two "treasure cities" of the Heb., adding On to Pithom and Rameses (καὶ ἔφτιθεν ποιεὶς ὄψιν τῷ ΦαραΟ, τις τε Πίθω, καὶ Ραμοςτερος καὶ Ονας. ᾳτεν Αλεξανδρίας, Ex. i. 11). If it be intended that these cities were founded by the labor of the people, the addition is probably a mitate, although Heliopolis may have been ruined and rebuilt; but it is possible that they were merely fortified, probably as places for keeping stores. Heliopolis lay at no great distance from the land of Goshen and from Rameses, and probably Pithom also.

Israel has been supposed to speak of On when he prophecies that one of the five cities in Egypt that should speak the language of Canaan, should be called Ibera-heres, which may mean the City of the Sun, whether we take "heres" to be a Hebrew or an Egyptian word; but the reading "a city of destruction" seems preferable, and we have no evidence that there was any large Jewish settlement at Heliopolis, although there may have been at one time from its nearness to the borders of Goshen. [He- maXers: ONAX.] Jeremiah speaks of On under the name Beth-shemesh, "the house of the sun," where he predicts of Nechochhadnezar, "He shall break also the pillars [יוֹנָה, but, perhaps, statues, comp. Gen. ii. 1119] of Beth-shemesh, that is in the land of Egypt; and the houses of the gods of the Egyptians shall he burn with fire." (xlii. 13). By the word we have rendered "pillars," obelisks are reasonably supposed to be meant, for the number of which before the temple of the sun Heliopolis must have been famous, and perhaps by "the houses of the gods," the temples of this place are intended, as the "high burnt altar" would be a proof of the powerlessness of Ra and Atum, both forms of the sun, Shu the god of light, and Tatenet a fire-goddess, to save their dwellings from the very element over which they were supposed to rule. Perhaps it was an account of the many false gods of Heliopolis, that in Ezekiel it is written Avon, by a change in the punctuation, if we can here depend on the Masoretic text, and so made to signify "vanity," and especially the vanity of idolatry. The prophet foretellth, "The young men of Avon and of Pi-im seth shall fall by the sword; and these [cities] shall go into captivity." (xxv. 17). Plebeeth or Balaphis is doubtless spoken of with Heliopolis as in the same part of Egypt, and so to be involved in a common calamity; for the same time when the land should be invaded.

After the age of the prophets we hear no more in Scripture of Heliopolis. Local tradition however, points it out as a place where our Lord and the Virgin came, when Joseph brought them into Egypt, and a very ancient sanctuary is shown as a Dwelling of which they resided. The Jewish settlements in this part of Egypt, and especially the town of Onias, which was probably only twenty

miles distant from Heliopolis in a northerly direction, but a little to the eastward (Modern Egypt and Thebes, i. 237, 238), then flourished, and were nearer to Palestine than the heathen towns like Alexandria, in which there was any large Jewish settlement. It is not probable that they were mentioned in this tradition. And, perhaps, Heliopolis itself may have had a Jewish quarter, although we do not know it to have been the Ira-heres of Isaiah.

R. S. P.

ONAX (ivative [strong, vigorous]: Αὐδή, Ἀναγ. Ἀναξ: Onax). 1. One of the sons of Shooal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 50). Some Hebrew MSS., read "Onam.

2. (Orhya: Alex. Qura.) The son of Jerahmeel by his wife Atarah (1 Chr. ii. 26, 28).

ONAX (ervative [strong, vigorous]: Avdot: Onam). The second son of Judah by the Canaanites, "the daughter of Shu'a" (Gen. xxxviii. 4; 1 Chr. ii. 3). On the death of Er the first-born, it was the duty of Onam, according to the custom which then existed and was afterwards established by a definite law (Deut. xxv. 5-10), continuing to the latest period of Jewish history (Mark xix. 12), to bear the brother's widow and perhaps continue his race. But he found means to prevent the consequences of marriage, "and what he did was evil in the eyes of Jehovah, and He slew him also," as He had slain his elder brother (Gen. xxxviii. 9). His death took place before the family of Jacob went down into Egypt (Gen. xvi. 12; Num. xxvi. 19).

W. A. W.

ONESIMUS (Origesius [profitable or useful]: Onesimus) is the name of the servant or slave in whose behalf Paul wrote the Epistle to Philemon. He was a native, or certainly an inhabitant of Colossae, for Paul in writing to the church there speaks of him (Col. iv. 9) as οὗτος εἶναι ἡμῖν "one of you." This expression confirms the presumption which his Greek name affords, that he was a Gentile, and not a Jew, as some have argued from ἁπάσα τῶν ἐπιφάνειαις in Phil. 16. Slaves were numerous in Phrygia, and the name itself of Phrygian was almost synonymous with that of slave. Hence it is probable that in writing to the Colossians (iii. 24, 25; iv. 1) Paul had occasion to instruct them concerning the duties of masters and servants to each other. Onesimus was one of this unfortunate class of persons, as is evident both from the manifest implication in ἀδελφὸς δοῦλος in Phil. 16, and from the general tenor of the epistle. There appears to have been no difference of opinion on this point among the ancient commentators, and there is none of any critical weight among the modern. The man escaped from his master and fled to Rome, where in the midst of its vast population he could hope to be concealed, and to battle the effects which were so often made in such cases for retaking the fugitive. (Walter, Die Geschichte des Rom, 3. 62 f.) It must have been to Rome that he directed his letter, and not to Colossae, as some contend, for the latter view stands connected with an indefensible opinion respecting the place whence the letter was written (see Neander's Pflanzung, i. 556). Whether Onesimus had any other motive for the flight than the natural love of liberty he had not the means of dwelling. It has been very generally supposed that he had committed some theft, as theft or embezzlement, and feared the punishment of his guilt. But as the ground of that opinion
must know the meaning of ἀποφέρει in Phil. 18, which is uncertain, not to say inconsistent with any such imputation (see notes in the Epistle to Philemon, by the American Bible Union, p. 60). Commentary at all events go entirely beyond the evidence when they assert (as Conybeare, Life and Epistles of Paul, ii. 467) that he belonged to the drags or bonds that he robbed his master, and Confessed the sin to Paul. Though it may be doubted whether Onesimus heard the Gospel for the first time at Rome, it is beyond question that he was led to embrace the Gospel there through the Apostle’s instrumentality. The language in ver. 10 of the letter (παντεὶ σεαυτός ὁ κόσμος τὸν ὄνειρον ὑμῶν) is explicit on this point. As there were believers in Phrygia when the Apostle passed through that region on his third missionary tour (Acts xxviii. 23), and as Onesimus belonged to a Christian household (Phil. 2), it is not improbable that he knew something of the Christian doctrine before he went to Rome.

How long a time elapsed between his escape and conversion, we cannot decide; for πρῶτα ἐποίησε in the 15th verse, to which appeal has been made, is purely a relative expression, and will not justify any inference as to the interval in question.

After his conversion, the most happy and friendly relations sprang up between the teacher and the disciple. The situation of the Apostle as a captive and an indefatigable laborer for the promotion of the Gospel (Acts xxviii. 30, 31) must have made him keenly alive to the sympathies of Christian friendship and dependent upon others for various services of a personal nature, important to his efficiency as a minister of the word. Onesimus appears to have supplied this twofold want in an eminent degree. We see from the letter that he went entirely the Apostle’s heart, and made himself so useful to him in various private ways, or excited such a capacity to be so (for he may have gone back to Colossae soon after his conversion), that Paul wished to have him remain constantly with him. Whether he desired his presence as a personal attendant or as a minister of the Gospel, is not certain from ἁπαντά σε διακονή μοι in ver. 13 of the epistle. Be this as it may, Paul’s attachment to him as a disciple, as a personal friend, and as a helper to him in his bonds, was such that he yielded him up only in obedience to that spirit of self-denial, and that sensitive regard for the feelings or the rights of others, of which his conduct on this occasion displayed so noble an example.

There is but little to add to this account, when we pass beyond the limits of the New Testament. The traditionary notices which have come down to us are too few and too late to amount to much as Historical testimony. Some of the later fathers assert that Onesimus was set free, and was subsequently ordained Bishop of Berea in Macedonia (Constit. Apost. vii. 46). The person of the same name mentioned as Bishop of Ephesus in the first epistle of Ignatius to the Ephesians (Hefele, Patrum Apost. Opp., p. 152) was a different person (see Winer, Realb. ii. 175). It is related also that Onesimus finally made his way to Rome again, and ended his days there as a martyr during the persecutions under Nero. H. H.

**ONTARES (Ὅνταρης [Alex. -νταρί])**, a name introduced into the Greek and Syriac texts of 1 Mac. xii. 19 by a very old corruption. The true reading is preserved in Josephus (Ant. xii. 4, § 10) and the Vulgate, (Οὐτάριος ὁ πρώτος τοῦ Πατριώτη, and is given in the margin of the A. V.

**ONTAS (Οντάς; Ονίας), the name of five high-priests, of whom only two (1 and 3) are mentioned in the A. V., but an account of all is here given to prevent confusion. L. [Vat.] Sin. Ioma.] The son and successor of Jaddua, who entered on the office about the time of the death of Alexander the Great, cir. b. c. 330-309, or, according to Eusebius, 300 (Joseph. Ant. xii. 7, § 7). According to the **embezzlement or theft, as many writers assume, we do not know. From this passage we by no means discover this; and, indeed, it is hardly probable that, if the Apostle had known or conjectured any such thing, he would have expressed himself in so half-spontaneous a manner as he has done.** H.
254

ONIAS

Josephus was father of Simon the Just (Joseph. Ant. xii. 2, § 4; Eus. L. i. 1). [HELENAEUS, vol. i. p. 561 n. SIMON.]

2. The son of Simon the Just (Joseph. Ant. xii. 4, § 1). He was a minor at the time of his father's death (cir. u. c. 290), and the high-priesthood was occupied in succession by his uncle Eleazar and Manasseh in his exclusion. He entered on the office at last cir. u. c. 240, and his conduct threatened to precipitate the rupture with Egypt, which afterwards opened the way for Syrian oppression. Onias, from aversion, it is said—a vice which was likely to be increased by his long exclusion from power—neglected for several years to remit to Pot. Emecetes the customary annual tribute of 20 talents. The king claimed the arrears with threats of violence; in case his demands were not satisfied, Onias still refused to discharge the debt, more as it appears, from self-will than with any prospect of successful resistance. The evil consequences of this obstinacy were, however, averted by the policy of his nephew Joseph, the son of Tobias, who visited Ptolemy, urged the imbecility of Onias, won the favor of the king, and entered into a contract for turning the tribute, which he carried out with success. Onias retained the high-priesthood till his death cir. u. c. 226, when he was succeeded by his son Simon H. (Joseph. Ant. xii. 4).

3. The son of Simon H., who succeeded his father in the high-priesthood, cir. u. c. 198. In the interval which had elapsed since the government of his grandfather the Jews had transferred their allegiance to the Syrian monarchy (Dan. xi. 14), and for a time enjoyed tranquil prosperity. Internal dissensions furnished an occasion for the first act of oppression. Seleucus Philopator was informed by Simon, governor of the Temple, of the riches contained in the sacred treasury, and he made an attempt to seize them by force. At the prayer of Onias, according to the tradition (2 Mac. iii.), the sacrilege was averted; but the high-priest was obliged to appeal to the king himself for support against the machinations of Simon. Not long afterwards Seleucus died (cir. u. c. 175), and Onias found himself supplanted in the favor of Antiochus Epiphanes by his brother Jason, who received the high-priesthood from the king. Jason, in turn, was displaced by his youngest brother Menelaus, who succeeded the name of Onias (cir. u. c. 171), in anger at the reproof which he had received from him for his sacrilege (2 Mac. iv. 32-38). But though his righteous zeal was thus fervent, the punishment which Antiochus inflicted on his murderer was a tribute to his "soler and modest behavior" (2 Mac. iv. 57) after his deposition from his office. [ANTIOCHUS, vol. i. p. 94.]

It was probably during the government of Onias III. that the communication between the Spartans and Jews took place (1 Mac. xii. 19-23; Joseph. Ant. xii. 4, § 10). [SPARTANS.] How powerful an impression he made upon his contemporaries is seen from the remark he account of the dreams of Judas Maccabæus before his great victory (2 Mac. xv. 12-16).

4. The youngest brother of Onias III., who bore the same name, which he afterwards exchanged for Menelaus (Joseph. Ant. xii. 5, § 1). [MENELAUS.]

5. The son of Onias III., who sought a refuge in Egypt from the sorrows and sacrilege which disgraced Jerusalem. The immediate occasion of his flight was the triumph of "the sons of Tobias," gained by the interference of Antiochus Epiphanes.

Onias, to whom the high-priesthood belonged by right, appears to have supported throughout the alliance with Egypt (Joseph. B. J. i. 1, § 1), and receiving the protection of Ptolemy, he endeavored to give a unity to the Hellenistic Jews, which seemed impossible for the Jews in Palestine.

With this object he founded the Temple at Leon (Helbays), which occupies a position in the history of the development of Judaism of which the importance is commonly overlooked: but the discussion of this attempt to consolidate Hellenism belongs to another place, though the connection of the attempt itself with Jewish history could not be wholly overlooked (Joseph. Ant. xii. 3; B. J. i. 1, § 1, vii. 10, § 2; Eus. Gesch. iv. 405 ft.; Herzfeld, Gesch. iii. 450 ft., 557 ft.).

The City of Onias, the Region of Onias—The city in which stood the temple built by Onias, and the region of the Jewish settlements in Egypt. Ptolemy mentions the city as the capital of the Heliopolitan nome: "Ἡρωοδωτὴς κοίμων, καὶ μητροπόλης Ὀνίας" (iv. 5, § 53); while the reading Ἁλας is not admissible, since Heliopolis is afterward mentioned, and its different position distinctly laid down (§ 54). Josephus speaks of "the region of Onias." [Ονίας χερσόν (Ant. xiv. 8, § 1; B. J. i. 9, § 4; comp. vii. 10, § 2), and mentions a place there situate called "the Camp of the Jews," "κωνταίναντο στρατόπεδον" (Ant. xiv. 8, § 2; B. J. i. c.). In the spurious letters given by him in the account of the foundation of the temple of Onias, it is made to have been at Leontopolis in the Heliopolitan nome, and called a strong place of Balbustis (Ant. xii. 3, §§ 1, 2); and when speaking of its closing by the Romans, he says that it was in a region 180 stadia from Memphis, in the Heliopolitan nome, where Onias had founded a castle (lit. watch-post, φαραγωγία, B. J. vii. 10, §§ 2, 3, 4). Leontopolis was not in the Heliopolitan nome, but in Ptolemy's time was the capital of the Leontopolite (iv. 5, § 51), and the mention of it is altogether a blunder. There is probably also a confusion as to the city Balbustis; unless, indeed, the temple which Onias adopted and restored was one of the Egyptian goddess of that name.

The site of the city of Onias is to be looked for in some one of those to the northward of Heliopolis, which Wilkinson calls "Tel el-Mellah, the house of the Jews," or Tel el-Tabbecheh, "the Jewish Mound." Sir Gardner Wilkinson thinks that there is little doubt that it is one which stands in the cultivated land near Shibloon, to the northward of Heliopolis, in a direction a little to the east, at a distance of twelve miles. Its mounds are of very great height." He remarks that the distance from Memphis (28 miles) is greater than that given by Josephus; but the inaccuracy is not extreme. Another mound of the same name, standing on the edge of the desert, a short distance to the south of Belbays, and 24 miles from Heliopolis, would, he thinks, correspond to the Βασιλείον of the Itinerary of Antiquities. (See Modern Egypt and Thebes, i. 297-300.)

During the writer's residence in Egypt, 1842-1849, excavations were made in the mound supposed by Sir Gardner Wilkinson to mark the site of the city of Onias. We believe, writing only from memory, that no result was obtained but the discovery of portions of pavement very much resembling the Assyrian pavements now in the British Museum.

From the account of Josephus, and the same
ONIONS

given to one of them, "the Camp of the Jews," these settlements appear to have been of a half-military nature. The chief of them seems to have been a strong place; and the same is apparently the case with another, that just mentioned, from the circumstances of the history even more than from its name. This name, though recalling the "Camp" where Ptolemaichus I. established his Greek mercenaries [Migdol], does not prove it was a military settlement, as the "Camp of the Tyrians" in Memphis [Her. ii. 112] was perhaps in its name a reminiscence of the Shepherd occupation, for there stood there a temple of "the Foreign Venus," of which the age seems to be shown by a tablet of Amonemhi II. (I. c. cir. 1401) in the quarries opposite the city in which Ash- tekh is worshipped, or else it may have been a merchant-settlement. We may also compare the Coptic name of El-Geezeh, opposite Cairo, Ḥereps, which has been ingeniously conjectured to record the position of a Persian camp. The easternmost part of Lower Egypt, be it remembered, was always chosen for great military settlements, in order to protect the country from the incursions of her enemies beyond that frontier. Here the first Shepherd king Salatis placed an enormous garrison in the stronghold Avaris, the Zeus of the Bibles (Manetho, ap. Jos. c. Ap. i. 14). Here foreign mercenaries of the Salté Kings of the 26th dynasty were settled; where also the greatest body of the Egyptian soldiers had the lands allotted to them, all being established in the Delta [Her. ii. 164-166]. Probably the Jewish settlements were established for the same purpose, more especially as the hatred of their inhabitants towards the kings of Syria would promise their opposing the strongest resistance in case of an invasion.

The history of the Jewish cities of Egypt is a very obscure portion of that of the Hebrew nation. We know little more than the story of the foundation and overthrow of one of them, though we may infer that they were populous and politically important. It seems at first sight remarkable that we have no trace of any literature of these settlements; but as it would have been preserved to us by either the Jews of Palestine or those of Alexandria, both of whom must have looked upon the worshippers at the temple of Onias as schismatics, it could scarcely have been expected to have come down to us.

R. S. P.

ONIONS (יוֹנִים, betulinu; τὰ κριόμματα: comes). There is no doubt as to the meaning of the Hebrew word, which occurs only in Num. xi. 5, as one of the good things of Egypt of which the Israelites regretted the loss. Onions have been from time immemorial a favorite article of food amongst the Egyptians. [See Her. ii. 125; Plin. xxxvi. 12.] The onions of Egypt are much milder in flavor and less pungent than those of this country. Hasselquist [Tent. p. 290] says, "Whoever has tasted onions in Egypt must allow that none can be had better in any other part of the universe: here they are sweet; in other countries they are nauseous and strong. . . . They eat them roasted, cut into four pieces, with some bits of roasted meat which the Turks in Egypt call kebab: and with this dish they are so delighted that I have heard them wish they might enjoy it in Paradise. They likewise make a soup of them." W. H.

* The Israelites might have spared their mun

Onions, in regard to the loss of Egyptian onions, as the onions of Palestine have the same sweet and delicious flavor that characterizes those of Egypt. They are still called بصل (bush) by the Arabs. They enter into almost every process of cookery in Palestine and Syria.

G. E. P.

ONYCHA (אין, and once רַס [strong]: in Ch. [רַס], Alex. [éfono]; elsewhere [Vat. Alex.] [סָעַב and מְזוֹנָה: Oino]. One of the towns of Benjamin. It does not appear in the catalogues of the Book of Joshua, but is first found in 1 Chr. viii. 12, where Shanuah or Shanuer is said to have built Oino and Lod with their "daughter villages." It was therefore probably annexed by the Benjaminites subsequently to their original settlement, like Aijalon, which was allotted to Dan, but is found afterward in the lands of the Benjaminites (1 Chr. viii. 13). The men of Lod, Hadid, and Oino, to the number of 725 (or Neh. 721) returned from the Captivity with Zerubbabel (Ezr. iii. 33; Neh. vii. 37; see also 1 Esdr. v. 22).

[ONYCH.]

A plain was attached to the town, and bore its name — Belloth-Oino, "the plain of Oino" (Neh. vi. 2), perhaps identical with the "valley of craftsmen" (Neh. xi. 35). By Essehins and Jerome it is not named. The Rabbis frequently mention it, but without any indication of its position further than that it was three miles from Lod. (See the citations from the Talmud in Lightfoot, Chor. Decod. on S. Mark, ch. ix. § 3.) A village called Kefer Abo is enumerated by Robinson among the places in the districts of Remleh and Lydda (Bibl. Res. 1st ed. App. 129, 121). This village, almost due N. of Lydda, is suggested by Van de Velde (Memr., p. 337) as identical with Oino. Against this identification however are the differences in the names — the modern one containing the Aïn, — and the distance from Lydda, which instead of being 3 milliaria is fully 5, being more than 4 English miles according to Van de Velde's map. Winer remarks that Belit Uhiit is more suitable as far as its orthography is concerned; but on the other hand Belit Uhiit is much too far distant from Lodih to meet the requirements of the passages quoted above.

G. O'NUS (חַרְצֹם; om. in Vulg.). The form in which the name Ouno appears in 1 Esdr. v. 22.

ONYCHA (יוֹנִיה, ὕια; shecheketh; ἀνόξης: onyx; according to many of the old versions denotes the opechum of some species of Strombus, a genus of gastropods mollusca. The Hebrew word, which appears to be derived from a root which means "to shell or peel off," occurs only in Exx. xxx. 34, as one of the ingredients of the sacred perfume; in

a In Neh. vi. 2 the Vat. MS., according to Mal, awa in redlip is g. . . .

b The tradition of the Talmudists is that it was left intact by Joshua, but burnt during the war of Gibeath [Josh. xxv. 49], and that 1 Chr. viii. 12 describes its restoration (See Targum on this latter passage.)
Theon's description of the *onyx* is the opereum of a shell fish resembling the *paraena*, which is found in India in the nard-producing lakes: it is odorous, because the shell-fish feed on the nard, and is collected after the heat has dried up the marshes: that is the best kind which comes from the Red Sea, and is whitish and shining: the Babylonian kind is dark and smaller than the other: both have a sweet odor when burnt, something like castoreum. It is not easy to see what *Dioscorides* can mean by "nard-producing lakes." The *onyx*, "shell," or "claw," seems to point to the operculum of the *Strombus*, which is of a claw shape and serrated, whence the Arabs call the molus...
glance at the head of this article will show that the LXX. is most inconsistent, and that nothing can, in consequence, be learnt from it. Of those who identify the slēhōn with the beryl are Bellermann (Die Uran und Thamathan, p. 64), Winer (Bib. Real., vol. ii. 23), and Rossmann (The Mineralogy of the Bible, p. 40, Bib. Orth.). Other interpretations of slēhōn have been proposed, but all are mere conjectures. Bäum traces slēhōn to the Arabic sūbūn, "blackness": "Of such a color," he says, "are the Arabian sardonyxes, which have a black ground-color." This agrees essentially with Mr. King's remarks (Antique Gems, p. 9): "The Arabian species," he says, "were formed of bluish sardonyx, covered by one of opaque white; over which again was a third of a vernilion color." But Gesenius and Furst refer the Hebrew word to the Arabic sūbūn, "to be pale." The different kinds of onyx and sardonyx, however, are so variable in color, that either of these definitions is suitable. They all form excellent materials for the engraver's art. The balance of authority is, we think, in favor of some variety of the onyx. We are content to retain the rendering of the A. V., supported as it is by the Vulgate and the express statement of so high an authority as Josephus, till better proofs in support of the claims of some other stone be forthcoming. As to the "Ojl x " of Exclus. xxv. 13, see ONYCHA.

W. II.

Ophel (חָלֶף), always with the def. art. [welling, hill] — Ophel, 'Ophel, [Ophel; Vit. Ophel, Οφελ, Ωφελ, Ωφαλ] Alex. 'Ophel, [Ωφαλ: Ophel] Ophel: A part of ancient Jerusalem. The name is derived by the lexicographers from a root of similar form, which has the force of a swelling or tumor (Gesenius, Thes.; Furst, Ἰουθ. ii. 169 6). It does not come forward till a late period of Old Test. history. In 2 Chr. xxviii. 3, Jotham is said to have built much "on the wall of Ophel." Manasseh, amongst his other defensive works, "compassed about Ophel" (Ibid. xxxiii. 14). From the catalogue of Nehemiah's repairs to the wall of Jerusalem, it appears to have been near the "water-gate" (Neh. iii. 20) and the "great tower that lieth out" (ver. 27). Lastly, the former of these two passages, and Neh. xi. 21, show that Ophel was the residence of the Levites. It is not again mentioned, though its omission in the account of the route round the walls at the sanctification of the second Temple, Neh. xii. 31-40, is singular.

In the passages of his history parallel to those quoted above, Josephus either passes it over altogether, or else refers to it in merely general terms — "very large towers" (Ant. ix. 11, § 2), "very high towers" (x. 3, § 2). But in his ac-

Of count of the last days of Jerusalem he mentions it four times as Ophel (ד’ ᪆菲尔), accompanying it as in the Hebrew with the article). The first of these (B. J. ii. 17, § 9) tells nothing as to its position; but from the form of it we can gather something. The old wall of Jerusalem ran above the spring of Siloam and the pool of Solomon, and on reaching the place called Ophel, joined the eastern portion of the Temple (B. J. iv. 4, § 2). (2.) John held the Temple and the places round it, not a little in extent, — both the Ophel and the valley called Nebron (Ibid. v. 6, § 1). (3.) After the capture of the Temple, and before Titus had taken the greater city (the external Zion) from the Jews, his soldiers burnt the whole of the lower city, lying in the valley between the two, "and the place called the Ophel" (Ibid. vi. 6, § 3).

From this it appears that Ophel was outside the south wall of the Temple, and that it lay between the central valley of the city, which debouches above the spring of Siloam, on the one hand, and the east portico of the Temple on the other. The east portico, it should be remembered, was not on the line of the east wall of the present herom, but 339 feet further west, on the line of the solid wall which forms the termination of the vaults in the eastern corner. [See Jerusalem, vol. ii. 1314; and the Plan, 1316.] This situation agrees with the mention of the "water-gate" in Neh. iii. 20, and the statement of xii. 21, that it was the residence of the Levites. Possibly the "great tower that lieth out," in the former of these, may be the "tower of Eder" — mentioned with "Ophel of the daughter of Zion," by Micah (iv. 8), or that named in an obscure passage of Isaiah — "Ophel and watch-tower" (xiii. 14, A. V. inaccurately "forts and towers").

Ophel, then, in accordance with the probable root of the name, was the swelling declivity by which the Mount of the Temple slopes off on its southern side into the Valley of Hinnom—a long, narrowish rounded spur or promontory, which intervenes between the mouth of the central valley of Jerusalem (the Tyropoeon) and the Kidron, or Valley of Jehoshaphat. Half-way down it on its eastern face is the "Fount of the Virgin," so called; and at the foot of the spurlet of the spring — the Pool of Siloam. How much of this declivity was covered with the houses of the Levites, or with the suburb which would naturally gather round them, and where the "great tower" stood, we have not at present the means of ascertaining.

Professor Stanley (Sermons on the Apostolic Age, pp. 323, 350) has ingeniously conjectured that the name Ophelis (Οφέλης)—which was one of the titles by which St. James the Less was distinguished from other Jacobs of the time, and which is explained by Hegesippus (Euseb. Hiat. Eccl. ii. arate heights. Lieutenant Warren has discovered what he conceives may have been either a deep ditch or a natural valley, now filled up with earth, running from east to west, just north of the platform of the Dome of the Rock (Le Jeu., Nov. 12, 1897, p. 43); and the Tyropeon gully probably turned sharply round to the east, at the southwest corner of the Temple, so as to cut off the Temple Mount from Ophel. (Dec. 12, 1897, p. 52.)

"Firth H." ( Heb. ii. 159) states, without a word that could lead a reader to suspect that there was any doubt on the point, that Ophel is identical with Millo. It may be so, only there is not a particle of evidence for or against it.
OPHIR

23 as meaning "bulwark (περιοχή) of the people," — was in its original form "Ophiram" (Ὀφίραμ). In this connection it is a singular coincidence that St. James was martyred by being thrown from the corner of the Temple, at, or close to, the very spot which is named by Josephus as the boundary of Ophir. [James, vol. ii. 1207; En-Roge!., i. 741 b.] Excav!., however (Geschichte, vi. 204, note), restores the name as οφίραμ, as if from οφίρα, a fence or boundary. [Chenu.]

This has in its favor the fact that it more closely agrees in signification with περιοχή than Ophir does.

The Ophir which appears to have been the residence of Elisht at the time of Xanman's visit to him (2 K. v. 24: A. V. "the tower") was of course a different place from that spoken of above. The narrative would seem to imply that it was not far from Samaria: but this is not certain. The LXX. and Vulg. must have read שׁנש, "darkness," for they give το σκοτεινόν and ἀπεράτα respectively.

**G.**

**OPHIR (Ὀφίρ, Ὀφίρ)** [see below]: Ophir: Ophir. 1. The eleventh in order of the sons of Joktan, coming immediately after Sheba (Gen. x. 29: 1 Chr. x. 23). So many important names in the genealogical table in the 10th chapter of Genesis — such as Sidon, Canaan, Asshur, Aram (Syria), Mazzarim (the two Egyptians, Upper and Lower), Sheba, Caphtharon, and Philistiam (the Philistines) — represent the name of some city, country, or people, that it is reasonable to infer that the same is the case with all the names in the table. It frequently happens that a father and his sons in the genealogy refer distinct geographical divisions to each other; yet this is not an invariable rule, for in the case of Tarshish the son of Javan (ver. 10), and of Nimrod the son of Cush, whose kingdom was Babylonia or Babylon (ver. 11), a son was conceived as a distant colony or offshoot. But there is one marked peculiarity in the sons of Joktan, which is common to them with the Cananites alone, that precise geographical limits are assigned to their settlements. Thus it is said (ver. 19) that the borders of the Canaanites was "from Sidon, as thou comest to Gerar, unto Gaza, as thou goest, unto Sodom and Gomorrath, and Admah, and Zebaim, even unto Lasha:" and in like manner (vv. 29, 30) that the dwelling of the sons of Joktan was "from Mezha, as thou goest unto Sepher a mountain of the east." The peculiar wording of these geographical limits, and the fact that the well-known terms which denote the borders of the Canaanites are mentioned so nearly in the same manner, forbid the supposition that Mezha and Sepher belonged to very distant countries, or were comparatively unknown: and as many of the sons of Joktan — such as Sheba, Hazaramaveth, Abimadad, and others — are by common consent admitted to represent settlements in Arabia, it is an obvious inference that the settlements corresponding to the names of the other sons are to be sought for in the same peninsula alone. Hence, as Ophir is one of those sons, it may be regarded as a fixed point in discussions concerning the place Ophir mentioned in the book of Kings, that the author of the 10th chapter of Genesis regarded Ophir the son of Joktan as corresponding to some city, region, or tribe in Arabia.

**Etymology.** — There is, seemingly, no sufficient reason to doubt that the word Ophir is Semitic, although, as is the case with numerous proper names known to be of Hebrew origin, the precise word does not occur as a common name in the Bible. See the words from גֵּפֶר and גִּפֶר in Genesis' Theorves, and compare ἀφαίρεσις, the metropolis of the Sabaens in the Periphus, attributed to Arrian. Gesenius suggests that it means "a fruitful region," if it is Semitic. Baron von Wrede, who explored Hadhramaut in Arabia in 1843 (Journal of the R. Geographical Society, vol. xiv. p. 110), made a small vocabulary of Hymaritic words in the vernacular tongue, and amongst these he gives ὀφάρης as signifying red. He says that the Mahra people call themselves the tribes of the red country ὀφάρης, and called the Red Sea, ὀφαρώς. If this were so, it might have some of the same relation to ὀφαρώς, "dust" or "dry ground" (8 and 2 being interchangeable), that ἀφαίρεσις, "red," has to ἀφαίρεσις, "the ground." Still it is unsafe to accept the use of a word of this kind on the authority of any one traveller, however accurate; and the supposed existence and meaning of a word ὀφάρης is recommended for special inquiry to any future traveller in the same district.

2. (Σωρφία, Σωρφία, [and] Ophir; Vat. Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Sim. in Job and Is., Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Σωρφία, Par.). Ophir, 1 K. ix. 28, x. 11; 2 Chr. viii. 18, ix. 10: in 1 K. ix. 28 the translation of the LXX. is εἰς Σωρφία [Vat. Σωρφία, Alex. Σωρφία], though the ending in the original merely denotes motion towards Ophir, and is not part of the name. A sceptor or region from which the Hebrews in the time of Solomon obtained gold, in vessels which went thither in conjunction with Tyrian ships from Ezion-geber, near Elath, on that branch of the Red Sea which is now called the Gulf of Akaba. The gold was proverbial for its fineness, so that "gold of Ophir" is several times used as an expression for fine gold (Ps. xlv. 9; Job xxviii. 16; Is. xiii. 12; 1 Chr. xxix. 4); and in one passage (Job xxvii. 24) the word "Ophir" by itself is used for gold of Ophir, and for gold generally. In Jer. x. 9 and Dan. x. 5 it is thought by Gesenius and others that Ophir is intended by the word "Uphaz" — there being a very trifling difference between the words in Hebrew when written without the vowel-points. In addition to gold, the vessels brought from Ophir almug-wood and precious stones.

The precise geographical situation of Ophir has long been a subject of doubt and discussion. Calmet (Dictionnaire of the Bible, s. v. "Ophir" regarded it as in Armenia; Sir Walter Raleigh (History of the World, book i, ch. 8) thought it was one of the Molucca Islands; and Arius Montanus (Ischard, Pharon, ref. and ed.) supposed, following by the similarity of the word Parvain, supposed to be identical with Ophir (2 Chr. iii. 6), found it in

Peru. But these countries, as well as Iberia and Phrygia, cannot now be viewed as...towards the known supporter in our own time were formerly represented, amongst other writers, by Huet (Sur le Commerce et la Navigation des Anciens, p. 99), by Bruce (Travels, book iv. c. 4), and by the historian Robertson (Disquisition respecting Ancient India, sect. 1), who placed Ophir in Africa; by Vitringa (Geograph. Sacra, p. 114) and Richaud (Dissertatio de Ophir), who placed it in India; and by Michaelis (Spicilegium, d. 181), Niethur, the traveller (Description de l'Arabie, p. 253), Gosselin (Recherches sur la Geographie des Anciens, i. 29), and Vincent (History of the Commerce and Navigation of the Ancient World, i. 210-250), who placed it in Arabia.

Of other distinguished geographical writers, Bochart (Philoxy, ii. 27) admitted two Ophirs, one in Arabia and one in India, i.e. at Ceylon; while D'Anville (Dissertatio sur le Pays d' Ophir, Memoires de Litterature, xxx. 83), equally admitting two, placed one in Arabia and one in Africa. In our own days the discussion has been continued by Gesenius, who in articles on Ophir in his Theologia (p. 141), and Uhird and Grabner's Encyclopaedia (s. v.) stated that the question lay between India and Arabia, assigned the reasons to be urged in favor of each of these countries, but declared the arguments for each to be so equally balanced that he refrained from expressing any opinion of his own on the subject. M. Quatremere, however, in a paper on Ophir which was printed in 1842 in the Memoires de l' Institut, again insisted on the claim of Africa (Dernieres des Arcentes et Belles Lettres, t. xv. ii. 362); and in his valuable work on Ceylon (part vii. chap. 1) Sir J. Emerson Tennent adopts the opinion, sanctioned by Josephus, that Malaca was Ophir. Otherwise the two countries which have divided the opinions of the learned have been India and Arabia — Lassen, Ritter, Berthau (Lexreg. Homb淮, 2 Chr. viii. 18), Thudius (Excerpt. Handbrough, 1 K. x. 1), and Ewald (Geschichte, iii. 347, 2d ed.) being in favor of India, while Winer (Reckla. s. v.), Fürst (Hebr. und Chald. Worte, s. v.), Knobel (Vollkoffel der Genesis, p. 190), Forster (Glossar. Arab. i. 161-167), Crawford (Descriptive Dictionary of the Indian Islands, s. v.), and Kaehle (Commentary on Genesis, chap. 1. The Genealogy of Nations) are in favor of Arabia. The fullest treatise on the question is that of Ritter, who in his Erzahlung, vol. xiv., published in 1848, devoted 80 octavo pages to the discussion (pp. 351-431), and adopted the opinion of Lassen (Int. Alt. i. 529) that Ophir was situated at the mouth of the Indus.

Some general idea of the arguments which may be advanced in favor of each of the three countries may be derived from the following statement. In favor of Arabia, there are these considerations: 1st. The 10th chapter of Genesis, ver. 29, contains what is equivalent to an intimation of the author's opinion, that Ophir was in Arabia. [OPHIR: 2dly. Three places in Arabia may be pointed out, the names of which agree sufficiently with the word Ophir: namely, Ophar, called by Ptolomy Sapphora, now Zafir or Saphir, which, according to the Periplus ascribed to Arrian, was the metropolis of the Sabaeans, and was distant twelve days' journey from the emporium Munza on the Red Sea: Dofir, a city mentioned by Niebuhr the traveller (Description de l'Arabie, p. 210), as a considerable town of Yemen, and capital of Bellool Hadsje, situated to the north of Labeial, and 15 leagues from the sea: and Zafir or Zafari [Arabia, vol. i. p. 137 b] (Sepher, Dhabair), now Dofar a city on the southern coast of Arabia, visited in the 14th century by Ibn Batuta, the Arabian traveller, and stated by him to be a month's journey by land from Aden, and a month's voyage, when the wind was fair, from the Indian shores (Lee's Translation, p. 57). 2dly. In antiquity Arabia was represented as a country producing gold by four writers at least: namely, by the geographer Agatharchides, who lived in the 2d century before Christ (in Photius 250, and Hudson's Geograph. Minores, i. 60); by the geographer Artemidorus, who lived a little later, and whose account has been preserved, and, as it were, adopted by the geographer Strabo (xiv. 18): by Dioscorus, the great traveller, 44thly by Ptolemy (Eldin vi. 32). 3dly. Ephorus, a Greek historian who lived before the Christian era, and who, besides other writings, wrote a work respecting the kings of Judea, expressly states, as quoted by Eusebius (Presp. Evang. i. 32), that Ophir was an island with gold mines in the Erythraean Sea (Ophió, comp. Ophiók, the LXX. Translation in Gen. xii. 12), and that David sent miners thither in vessels which he caused to be built at Elama = Elath. Now it is true that the name of the Erythraean Sea was deemed to include the Persian Gulf, as well as the Red Sea, but it was always regarded as closely connected with the shores of Arabia, and cannot be shown to have been extended to India. 4thly. On the supposition that, notwithstanding all the ancient authorities on the subject, gold really never existed either in Arabia or in any island along its coasts, Ophir was an Arabian emporium, into which gold was brought as an article of commerce, and was exported into Judea. There is not a single passage in the Bible inconsistent with this supposition: and there is something like a direct intimation that Ophir was in Arabia.

While such is a general view of the arguments for Arabia, the following considerations are urged in behalf of India. 1st. Sofir is the Coptic word for India; and Sophir, or Sophra is the word used for the place Ophir by the Septuagint translators, and likewise by Josephus. And Josephus positively states that it was a part of India (Ant. viii. 6, § 4), though he places it in the Golden Chersonese, which was the Malay peninsula, ar. belonged, geographically, not to India proper, but to India beyond the Ganges. Moreover, in three passages of the Bible, where the Septuagint has ουφιρος or ουφερος, 1 K. ix. 28, x. 11: Is. xiii. 12, Arabic translators have used the word India. 2dly. All the three imports from Ophir, gold, precious stones, and their gold, are the ancient mines. Geographer's Ophir. Aria Montanus fancied that Parvaim meant, in the dual number, two Persus; one Persu Proper, and the other New Spain (אפרים נברוא).
and alnus-wood, are essentially Indian. Gold is found in the sources of the Indus and the Cabool River before their juncture at Attock; in the Himalaya mountains, and in a portion of the Deccan, especially at Cochin. India has in all ages been celebrated for its precious stones of all kinds, of which the Hebrews, and indeed all Hebrew scholars regard as the alnus-wood of the Bible, is almost exclusively, or at any rate preeminently, a product of the coast of Malabar. 3dly. Assuming that the ivory, peacocks, and apes, which were brought to Ezion-geber once in three years by the navy of Tarshish in conjunction with the navy of Hiram (1 K. x. 22), were brought from Ophir, they also collectively paid to India rather than Arabia. Moreover, etymologically, not one of these words in the Hebrew is of Hebrew or Semitic origin; one being connected with Sanskrit, another with the Tamil, and another with the Malay language. [Tarshish:] 4thly. Two places in India may be specified, agreeing to a certain extent in name with Ophir; one at the mouth of the Indus, where Indian writers placed a people named the Abirha, agreeing with the name of the geographical Seima of the geographer Ptolemy; and the other, the Sermata of Ptolemy, the Sermata of Arrian's Periplus, where the town of Goa is now situated, on the western coast of India.

Lastly, the following places have been urged in behalf of Africa. 1st. Of the three countries, Africa, Arabia, and India, Africa is the only one which can be seriously regarded as containing districts which have supplied gold in any great quantity. Although, as a statistical fact, gold has been found in parts of India, the quantity is so small, that India has never supplied gold to the commerce of the world; and in modern times no gold at all, nor any vestiges of exhausted mines have been found in Arabia. 2dly. On the western coast of Africa, near Mozambique, there is a port called by the Arabians Sofala, which, as the Septuagint δ and π are easily interchanged, was probably the Ophir of the Ancients. When the Portuguese, in A. D. 1500, first reached it by the Cape of Good Hope, it was the emporium of the gold district in the interior; and two Arabian vessels laden with gold were actually off Sofala at the time (see Codinnes, cap. 58). 3dly. On the supposition that the text of 1 K. x. 22 applies to Ophir, Sofala has still stronger claims in preference to India. Peacocks, indeed, would not have been brought from it; but the peacock is too delicate a bird for a long voyage in small vessels, and the word τάκτικαν probably signifies "parrots." At the same time, ivory and apes might have been supplied in abundance from the district of which Sofala was the emporium. On the other hand, if Ophir had been in India, other Indian productions might have been expected in the list of imports; such as shaws, silk, rich tissues of cotton, perumences, pepper, and cinnamon. 4thly. On the same supposition respecting 1 K. x. 22, it can, according to the traveller Bruce, be proved by the laws of the monsoons in the Indian Ocean, that Ophir, or rather the emporium to which the goods from Ezion-geber would have been performed exactly in three years; it could not have been accomplished in less time and it would not have required more (vol. i. p. 440).

From the above statement of the different views which have been held respecting the situation of Ophir, the suspicion will naturally suggest itself that the K. x. 22 conclusion, or as the compiler of the two ancient and disputed passages has been able to conclude, or as the compiler of the two ancient and disputed passages has been able to conclude, or the compiler of the two ancient and disputed passages has been able to conclude, that the Bible in all its direct notices of Ophir as a place does not supply sufficient data for an independent opinion on this disputed point. At the same time, it is an inference in the highest degree probable, that the author of the 10th chapter of Genesis regarded Ophir as in Arabia: and, in the absence of conclusive proof that he was mistaken, it seems most reasonable to acquiesce in his opinion.

To illustrate this view of the question it is desirable to examine closely all the passages in the historical books which mention Ophir by name. These are only five in number: three in the books of Kings, and two in the books of Chronicles. The latter were probably copied from the former; and, at any rate, do not contain any additional information; so that it is sufficient to give a reference to them, 2 Chr. viii. 18, ix. 10. The third passage in the books of Kings, however, being short, will be set out at length. The first passage is as follows: it is in the history of the reign of Solomon.

"And king Solomon made a navy of ships at Eziongeber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom. And Hiram sent in the navy his servants, shipmen that had knowledge of the sea, with the servants of Solomon. And they came to Ophir, and fetched from thence gold, four hundred and twenty talents, and brought it to king Solomon." (1 K. ix. 26-28).

The next passage is in the succeeding chapter, and refers to the same reign. "And the navy also of Hiram that brought gold from Ophir, brought him from Ophir great plenty of almug-trees and precious stones." (1 K. x. 11).

The third passage relates to the reign of Jehoshaphat, king of Judah, and is as follows: "Jehoshaphat made ships of Tarshish to go to Ophir for gold; but they went not: for the ships were broken at Eziongeber." (1 K. xxi. 48).

In addition to these three passages, the following verse in the book of Kings has very frequently been referred to Ophir: "For the king (i.e. Solomon) had sea-faring men of Ophir with the navy of Hiram; once in three years came the navy of Tarshish bringing gold and silver, ivory, and apes, and peacocks." (1 K. x. 22).

But there is not sufficient evidence to show that the fleet mentioned in this verse was identical with the fleet mentioned in 1 K. ix. 26-28, and 1 K. x. 11, as bringing gold, almug-trees, and precious stones from Ophir: and if, notwithstanding, the identity of the two is admitted as a probable conjecture, there is not the slightest evidence that the fleet went only to Ophir, and that therefore the silver, ivory, apes, and peacocks must have come from Ophir. Indeed, the direct contrary might be inferred, even on the hypothesis of the identity of the two fleets, inasmuch as the actual mention of Ophir is distinctly confined to the imports of gold, almug-trees, and precious stones; and the compiler might seem carefully to have distinguished between

---

a Mr. Grove has pointed out a passage in Milton's "Paradise Lost," x. 359-401, favoring this Sofala:—

Mournful, and Quilos, and Melinda,
And Sotha, thought Ophir, to the realm
Of Conga and Angola farther south.

it and the country from which silver, ivory, apes, and peacocks were imported. Hence, without referring farther to the passage in 1 K. x. 22, we are thrown back, for the purpose of ascertaining the situation of Ophir, to the three passages from the book of Kings which were first set forth. And if those three passages are carefully examined, it will be seen that all the information given respecting Ophir is that, it was a place or region, accessible by sea from Ezion-geber on the Red Sea, from which imports of gold, almug-trees, and precious stones were brought back by the Tyrian and Hebrew sailors. No data whatever are given as to the distance of Ophir from Ezion-geber; no information direct or indirect, or even the slightest hint, is afforded for determining whether Ophir was the name of a town, or the name of a district; whether it was an emporium only, or the country which actually produced the three articles of traffic. Bearing in mind the possibility of its being an emporium, there is no reason why it may not have been either in Arabia, or on the Persian coast, or in India, or in Africa; but there is not sufficient evidence for deciding in favor of one of these suggestions rather than another.

Under these circumstances it is well to revert to the 10th chapter of Genesis. It has been shown [OPHIR 1] to be reasonably certain that the author of that chapter regarded Ophir as the name of some city, region, or tribe in Arabia. And it is almost equally certain that the Ophir of Genesis is the Ophir of the book of Kings. There is no mention, either in the Bible or elsewhere, of any other Ophir; and the idea of there having been two Ophirs, evidently arose from a perception of the obvious meaning of the 10th chapter of Genesis, on the one hand, coupled with the erroneous opinion on the other, that the Ophir of the book of Kings could not have been in Arabia. Now, whatever uncertainty may exist as to the time when the 10th chapter of Genesis was written (Knobel, Völkerfeld der Genesi, p. 4, and Hartmann's Forschungen über die 5 Bücher Moses, p. 584), the author of it wrote while Hebrew was yet a living language; there is no statement in any part of the Bible inconsistent with his opinion; and the most ancient writer who could have opposed him to as an authority, lived, under any hypothesis, many centuries after his death. Hence the burden of proof lies on any one who wishes to demonstrate that the author of Genesis lived in Arabia.

But all that can be advanced against Arabia falls very short of such proof. In weighing the evidence on this point, the assumption that ivory, peacocks, and apes were imported from Ophir must be dismissed from consideration. In one view of the subject, and accepting the statement in 2 Chr. ix. 21, they might have connection with Tarshish [TAARASH] of the 5th chapter of the Psalms; or again there was a distinction between the Ophir of the Old Testament and Ophir of the New Testament, which seems so cogent that they induced the historian Robertson to place Ophir in Africa (Disquisition on India, § 2), have been pointedly denied by Mr. Salt in his Voyage to Abyssinia (p. 102). Moreover, the resemblance of names of places in Ethiopia and Africa to Ophir, cannot reasonably be insisted on; for there is an equally great resemblance in the names of some places in Arabia. And in reference to Africa, especially, the place there imagined to be Ophir, namely, Sofala, has been shown to be merely an Arabic word, corresponding to the Hebrew Sheelah, which signifies a plain or low country (Jer. xxvii. 44; Josh. xi. 16; the Σφαλα of the Macassars, 1 Macc. xii. 38; see Gesenius, Lex. s. v.). Again, the use of Sofar as the Coptic word for Ophir cannot be regarded as of much importance, it having been pointed out by Mr. Salt and Prof. Reband that there is no proof of its use except in late Coptic, and that thus its adoption may have been the mere consequence of the erroneous views which Josephus represented, instead of being a confirmation of them. Similar remarks apply to the Biblical versions by the Arabic translators.

The opinion of Josephus himself would have been entitled to much consideration in the absence of all other evidence on the subject; but he lived about a thousand years after the only voyages to Ophir of which any record has been preserved, and his authority cannot be compared to that of the 10th chapter of Genesis. Again, he seems inconsistent with himself; for in Ant. ix. 1, § 4, he translates the Ophir of 1 K. xxi. 43, and the Tarshish of 2 Chr. xx. 36, as Pontus and Thurn. It is likewise some deduction from the weight of his opinion, that it should be applied to the Ophir mentioned in the Psalms, which was an earlier writer: though he too lived at so great a distance of time from the reign of Solomon that he is by no means a decisive authority. Moreover, imagination may have acted on Josephus to place Ophir in the Golden Chersonese, which to the ancients was, as it were, the extreme east; as it acted on Arias Montanus to place it in Peru, in the far more improbable and distant west. All the foregoing objections having been rejected from the discussion, it remains to notice those which are based on the assertion that sandal-wood (assumed to be the same as almug-wood), precious stones, and gold, are not productions of Arabia. And the following observations tend to show that such objections are not conclusive.

1st. In the Periplus attributed to Arrian, sandal-wood (ξέναι ψαρτόναι) is mentioned as one of the imports into Osmant, an emporium on the Persian Gulf; and it is thus proved, if any proof is requisite, that a sea-port would not necessarily be in India, because sandal-wood was obtained from it. But independently of this circumstance, the reasons advanced in favor of almug-wood being the same as sandal-wood, though admissible as a conjecture, cannot be brought to justify the exclusion of that wood from importation on them. In 2 Chr. ii. 8, Solomon is represented as writing to Hiram, king of Tyre, in these words: "Send me also cedar-trees, fir-trees, and algum-trees, out of Lebanon; for I know that thy servants can skill in cut timber in Lebanon," a passage evidently written under the belief that almag_trees grew in Lebanon. It has been suggested that there was a mistranslation in the LXX., which cannot be assumed without distinct evidence to render it probable. The LXX. translator of the book of Kings, 1 K. x. 12, translates almug-wood by ξέναι πελέκτην, or ἀνάλεκτην, which gives no information as to the nature of the wood; and the LXX. translator of the Chronicles renders it by ξέναι πελάκην, which strictly means fir-wood (compare Ennius's translation of Medea, ver. 4), and which, at the utmost, can only be extended to any wood of resinous trees. The Vulgate translation is "thyina," i.e. wood made of thyina (θυών, θύου), a tree which Theophrastus mentions as having supplied peculiarly durable timber for the roofs of temples; which he says is
like the wild cypress; and which is classed by him as an evergreen with the pine, the fir, the juniper, the yew-tree, and the cedar (Histor. Plant. v. 3, § 7, i. 9, § 3). It is stated both by Buxtorf and Gesenius (s. v.) that the Rahbins understood by the word, corals—which is certainly a most improbable meaning—that in the Mishnah (Kelim 13, 6) was used for coal in the singular number. In the 13th century, Kimchi, it is said, proposed the meaning of Brazilian wood. And it was not till last century that, for the first time, the suggestion was made that alnou-wood was the same as sandal-wood. This suggestion came from Celsius, the Swedish botanist, in his Historie nationum; who at the same time recounted thirteen meanings proposed by others. Now, as all that has been handed down of the uses of alnou-wood is, that the king made of it a prop or support for the House of the Lord and the king's house; and harps also and psalteries for singers (1 K. x. 12), it is hard to conceive how the greatest botanist genius that ever lived can now do more than make a guess, more or less probably, at the meaning of the word. Since the time of Celsius, the meaning of sandal-wood has been defended by Sanskrit etymologists. According to Gesenius (Lexicon, s. v.), Bohlen proposed, as a derivation for abamumin, the Arabic article Al and nicana, from simple nicα, a name for red sandal-wood. Lassen, in Indian Archaeologicali (vol. i. pt. 1. p. 578), adopting the form abamumin, says that if the plural ending is taken from it, there remains rala, as one of the Sanskrit names for sandal-wood, which in the language of the Deccan is vidyan. Perhaps, however, these etymologies cannot lay claim to much value until it is made probable, independently, that alnou-wood is sandal-wood. It is to be observed that there is a difference of opinion as to whether a at abamumin is an article or part of the noun, and it is not denied by any one that abamumin is the ordinary Sanskrit word for sandal-wood. Moreover, Mr. Crawford, who resided officially many years in the East and is familiar with sandal-wood, says that it is never—now, at least—used for musical instruments, and that it is unfit for pillars, or stairs, balustrades or banisters, or balustrades. (See also his Descriptive Dictionary of the Indian Islands, pp. 310-575.) It is used for incense or perfume, or as sandal-wood.

2. As to previous stones, they take up such little room, and can be so easily concealed, if necessary, and carried from place to place, that there is no difficulty in supposing they came from Ophir, simply as from an emporium, even admitting that there were no previous stones in Arabia. But it has already been observed [Arabia, i. 157] that the Arabian peninsula produces no granite, gneiss, or other stone; and the last word is well pointed out by Mr. Crawford that it is impossible to identify previous stones under so general a name with any particular country. Certainly it cannot be shown that the Jews of Solomon's time included under that name the diamond, for which India is peculiarly renowned.

3. As to gold, far too great stress seems to have been laid on the negative fact that no gold could not trace of gold mines has been discovered in Arabia. Negative evidence of this kind, in which Ritter has placed so much reliance (vol. iv. p. 408, ), is by no means conclusive. Sir Roderick Murchison and Sir Charles Lyell concur in stating that although no rock is known to exist in Arabia from which gold is obtained at the present day, yet the peninsula has not undergone a sufficient geological examination to warrant the conclusion that gold did not exist there formerly or that it may not yet be discovered there. Under these circumstances there is no sufficient reason to reject the accounts of the ancient writers who have been already adduced as witnesses for the former existence of gold in Arabia. It is true that Artemidorus and Diodorus Siculus merely may have relied on the authority of Agatharchides, that is important to remember that Agatharchides lived in Egypt and was guardian to one of the young Ptolemies during his minority, so that he must have been familiar with the general nature of the commerce between Egypt and Arabia. Although he may have been inaccurate in details, it is not lightly to be admitted that he was altogether mistaken in supposing that Arabia produced any gold at all. And it is in his favor that two of his statements have unexpectedly received confirmation in our own time: 1st, respecting gold-mines in Egypt, the position of which in the Biharen Desert was ascertained by Mr. Linnot and Mr. Bonomi (Wilkinson's Ancient Egyptians, ch. ii.); and 2d, as to the existence of nuggets of pure gold, some of the size of an olive-stone, some of a meelik, and some of a chestnut. The latter statement was discredited by Michaelis (Spiritualion, p. 287, "Nec error nihil massae nisi non experti castantur necis magnitudine reperei"), but it has been shown to be not incredible by the result of the gold discoveries in California and Australia.

4. If, however, negative evidence is allowed to outweigh on this subject the authority of Agatharchides, Artemidorus, Diodorus Siculus, Pliny, and, it may be added, Strabo, all of whom may possibly have been mistaken, there is still nothing to prevent Ophir having been an Arabian emporium for gold (Winer, Recl. s. v. Ophir). The Peripus, attributed to Arrian, gives an account of several Arabian emporia. In the Red Sea, for example, was the Emperium Musi, only twelve days distant from Apshar the metropolis of the Sabaeans and the Hanones. It is expressly stated that this port had commercial relations with Barzyga, i. e. Berenice, on the west coast of India, and that it was always full of Arabs, either ship owners or sailors. Again, where the British town of Aden is now situated, there was another emporium situated there. 

a The general meaning of ἄβαμυμα, a prop or support, is corals, though its special meaning in L. x. 12 seems irreconcilable with it. It is translated "pillars" in the A. V., and "basaume-persia" in the LXX. In the corresponding passage of 2 Chr. ix. 11, the word is ὁμός, the usual meaning of which is "highness;" and which is translated in the A. V. "terrace," and in the LXX "αὔξησις, ascents, or steps." See Her. l. c.
porum, with an excellent harbor, called Arabia Felix (to be carefully distinguished from the district so called), which received its name of Felix, according to the author of the Periplus, from its being the depot for the merchandise both of the Indians and Egyptians at a time when vessels did not sail direct from Egypt to Arabia, but merchants from Egypt did not dare to venture farther eastwards towards India. At Zafar or Zafarí, likewise, already referred to as a town in Hadramaut, there was an emporium in the Middle Ages, and there may have been one in the time of Solomon. And on the Arabian side of the Persian Gulf was the emporium of Ophir, mentioned by Strabo (xvi. p. 796), which seems to have had commercial intercourse with Babylonia both by caravans and by barges. Its exports and imports are not specified, but there is no reason why the articles of commerce to be obtained there should have been very different from those at Omama on the opposite side of the gulf, the exports from which were purple cloth, wine, dates, slaves, and gold; while the imports were frankincense, myrrh, and ebony. In fact, whatever other difficulties may exist in relation to Ophir, no difficulty arises from any absence of emporia along the Arabian coast; it was suited to the size of vessels and the state of navigation in early times.

There do not, however, appear to be sufficient data for determining in favor of any one emporium or of any one locality rather than another in Arabia as having been the Ophir of Solomon. Mr. Forster (Geography of Arabia, i. 167) relies on the Ophir of Ophir, in Sale and D'Anville's maps, as the name of a city and district in the mountains of Omán; but he does not quote any ancient writer or modern traveller as an authority for the existence of such an Ophir; though this may perhaps be reasonably required before importance is attached, in a disputed point of this kind, to a name on a map. Nicolohi the traveller (Descripción de E. Arabia, p. 233) says that Ophir was probably the principal port of the kingdom of the Sabaens, that it was situated between Aedán and Dabár (or Zafar), and that perhaps even it was Cano. Gesenius, on the other hand, thinks it was Dabár, the city of Yemen already adverted to: and in reference to the obvious objection (which applies equally to the metropolis of Arabia Felix) that it is at some distance from the sea, he says that during the long period which has elapsed since the time of Solomon, sands have encroached on the coast of Loheia, and that Ophir may have been regarded as a port, although vessels did not actually reach it (Recherches sur le Geographie des Anciens, i. c.). Dean Vincent agrees with Gesenius in confining Ophir to Salêa, partly because, in Gen. x. Ophir is mentioned in connection with some of the tribes who have their residence in Arabia Felix, and partly because, in 1 K. ix., the voyage to Ophir seems related as if it were in consequence of the visit of the Queen of Sheba to Jerusalem (History of the Commerce and Navigation of the Ancients, i. c.). But the opinion that Jobah and Javvish represent parts of Arabia Felix would by no means command universal assent; and although the book of Kings certainly suggests the inference that there was some connection between the visit of the Queen of Sheba and the voyage to Ophir, this would be consistent with Ophir being either contiguous to Salêa, or situated on any point of the southern or eastern coasts of Arabia; as in either of these cases it would have been politic in Solomon to conciliate the good will of the Sabaens, who occupied a long tract of the eastern coast of the Red Sea, and who might possibly have commanded the Straits of Babylonia. On the whole, though there is reason to believe that Ophir was in Arabia, there does not seem to be adequate information to enable us to point out the precise locality which once bore that name.

In conclusion it may be observed that objections against Ophir being in Arabia, grounded on the fact that no gold has been discovered in Arabia in the present day, seem decisively answered by the parallel case of Sheba. In the 72d Psalm, v. 15, 'gold of Sheba,' translated in the English Psalter 'gold of Arabia,' is spoken of just as 'gold of Ophir' is spoken of in other passages of the O.T., and the Ezekiel's account of the trade with Tarshish (xxvii. 22), it is stated, 'the merchants of Sheba and Raamah, they were thy merchants: they occupied in thy fairs with chief of all spices and with all precious stones and gold;' just as in 1 K. x., precious stones and gold are said to have been brought from Ophir by the nary of Solomon and of Hiram. (Compare 1 Par. vi. 28: Horace, Od. i. 20, iii. 24, Epyct. i. 1, 24, iii. 24.) Now, of two things one is true. Either the gold of Sheba and the precious stones sold to the Tyrians by the merchants of Sheba were the natural productions of Sheba, and in this case—as the Sheba here spoken of was confessedly in Arabia—the assertion that Arabia did not produce gold falls to the ground; or the merchants of Sheba obtained precious stones and gold in such quantities by trade, that they became noted for supplying them to the Tyrians and Jews, without curious inquiry by the Jews as to the precise locality whence these commodities were originally derived. And exactly similar remarks may apply to Ophir. The resemblance seems complete. In answer to objections against the obvious meaning of the tenth chapter of Genesis, the alternatives may be stated as follows: Either Ophir, although in Arabia, produced gold and precious stones; or, if it shall be hereafter proved in the progress of geological investigation that this could not have been the case, Ophir furnished gold and precious stones as an emporium, although the Jews were not careful to ascertain and record the fact.

E. T.
OPHRAH (of the female form). The name of two places in the central part of Palestine.

1. In Josh., Ephrath: Alex. Ἐφραθ; in Sam. Ἐφραím: Ophráh in Sam. Ἐφραιμ. In the tribe of Benjamin (Josh. xviii. 25). It is named between Gil-b'ah and Chephir ha-Ammuoni, but as the position of neither of these places is known, we do not thereby obtain any clue to that of Ophrah. It appears to be mentioned again (1 Sam. xxi. 17) in describing the routes taken by the spies who issued from the Philistine camp at Michmash. One of these bands of ravagers went due west, on the road to Beth-horon; one towards "the ravine of Zebulun," that is in all probability of the Elects which lead down to the Jordan Valley, and therefore due east; while the third took the road to Ophrah and the land of Shual—"doubtless north, for south they could not go, owing to the position held by Saul and Jonathan. [GUERRAH, vol. ii. p 915 a.]

In accordance with this is the statement of Jerome (Onomasticon, "Aphra") who places it 5 miles east of Bethel. Dr. Robinson (Bibl. Res. ii. 447) suggests its identity with el-Lagha, a small village on the crown of a conical and very conspicuous hill, 4 miles E. N. E. of Bethin (Bethel), on the ground that no other ancient place occurred to him as suitable, and that the situation accords with the notice of Jerome. In the absence of any similarity in the name, and of any more conclusive evidence, it is impossible absolutely to adopt this identification.

Ophrah is probably the same place with that which is mentioned under the slightly different form of Ephraim (or Ephron) and Ephraim.

(See vol. i. p. 575 a.) It may also have given its name to the district or government of Ephraim.

(1 Macc. xvi. 34.)

2. (Ephrath; and so Alex., excepting [viii. 27] and ix 5 Ephraim, [Comp. in Josh. vi. 11, viii. 27, 32, Ephræ:] Ephraim.) More fully Ophrah of the Abi-ezrites, the native place of Gideon (Judg. vi. 11); the scene of his exploits against Baal (ver. 24); his residence after his accession to power (ix. 5), and the place of his burial in the family sepulchre (viii. 52). In Ophrah also he deposited the ephod which he made or enriched, with the ornaments taken from the Ishmaelite followers of Zebah and Zalmunna (viii. 27), and so great was the attraction of that object, that the town must then have been a place of great pilgrimage and resort. The indications in the narrative of the position of Ophrah are but slight. It was probably in ManassÉs (vi. 15); and not far distant from Shechem (ix. 2). Van de Velde (Samuel) suggests a site called Ephset, a mile south of Akra-vath, about 8 miles from Nablus, and Schwarz (p. 158) "the village Erfat, north of Samn," by which he probably intends Arahéh. The former of them has the disadvantage of being altogether out of the territory of ManassÉs. Of the latter, nothing either for or against can be said.

Ophrah possibly derives its name from Ephraim, who was one of the heads of the families of ManassÉs in its Gilcudite portion (1 Chr. v. 24); and who appears to have migrated to the west of Jordan with Abi-ezer and Shechem (Sam. xxvi. 20; Josh. xvii. 2). [Ahi-ezer; Epher, 1. p. 744 a; MANASSÉS, ii. 1170 l.]

* ORACLE*. This word, in every case but one in which it occurs in the O. Testament stands for the Heb. בַּשָּׁלָה (lxx. δήσις), which is apparently employed, 1 K. viii. 6 (ָּשָּׁלָה), as equivalent to בַּשָּׁלָה (Holy of Holies). The translation "oracle" (Vulg. oraculum, comp. χρησταταγμόν, Aqu. and Syr.) assumes the derivation of the Heb. word from בַּשָּׁלָה, "to speak," as if to designate a place chosen for the special manifestation of the divine will. A more probable etymology, and that now generally received, connects it with בַּשָּׁלָה, taken, like the Arab. بَاشُلُك, in the sense of "to be holy," the name being thus supposed to be given to the most holy place, as the bimah apartment of the temple proper. The word is once employed in the phrase "oracle of God," Heb. בָּשָּׁלָה בַּשָּׁלָה, 2 Sam. xvi. 23, apparently in the general sense of any appointed means of obtaining a revelation from God.

In the N. T. only the plural form occurs (λέγεται), always as a designation of truths supernaturally revealed, and once (Acts vii. 38) in connection with the epithet "lively," rather "living," (ζωόν), expressive of their vital, quickening efficacy. [1 Live ix. 1, Amer. ed.]
ORATOR.

1. The A. V. rendering for ἥχος, a whisper, or incantation, joined with ροτόν, skillful, Ps. iii. 3, A. V. "eloquent orator," marg. "skillful of speech." The phrase appears to refer to pretended skill in magic, comp. Ps. iv. 5. [Divination.]

2. The title applied to Tertullus, who appeared as the advocate or πρότροπος of the Jewish accusers of St. Paul before Felix, Acts xxv. 1. The Latin language was used, and Roman forms observed in provincial judicial proceedings, as to cite an obviously parallel case, Norman-French was for so many ages the language of English law proceedings. The trial of St. Paul at Cesarea was distinctly one of a Roman citizen; and thus the advocate spoke as a Roman lawyer, and probably in the Latin language (see Acts xxv. 9, 10; Val. Max. ii. 2, 2; Cie. pro Cael. c. 30; Brutus, c. 37, 38, 41, where the qualifications of an advocate are described: Conybarea and Howson, Life and Trials of St. Paul, i. 3, ii. 348.) [Tertullian.]

H. W. P. ORCHARD. [Garden, vol. i. p. 856 et seq.]

O'REB (בּוּרֵב) in its second occurrence only, בּוּרֵב: Vat. in Judg. vii. 25, ὁρβής: Alex. ὁρβής: Orcei. The "raven" or "crow," the companion of Zeeb, the "wolf." One of the chieftains of the Midianite host which invaded Israel, and was defeated and driven back by Gideon. The title given to them (בּוּרֵב, A. V. "princes") distinguishes them from Zelah and Zalzumah, the other two chieftains, who are called "kings" (בּוּלֵב), and were evidently superior in rank to Oreb and Zeeb. They were killed, not by Gideon himself, or the people under his immediate conduct, but by the men of Ephraim, who rose at his entreaty and intercepted the flying horde at the fords of the Jordan. This was the second act of this great tragedy. It is but slightly touched upon in the narrative of Judges, but the terms in which Isaiah refers to it (x. 21) are such as to imply that it was a truly awful slaughter. He places it in the same rank with the two most tremendous disasters recorded in the whole of the history of Israel — the destruction of the Egyptians in the Red Sea, and of the army of Sennacherib. Nor is Isaiah alone among the poets of Israel in his reference to this great event. While it is the terrific slaughter of the Midianites which points his allusion, their discomfiture and flight are prominent in that of the author of Ps. lxxxiii. In imagery both obvious and vivid to every native of the gusty hills and plains of Palestine, though to us comparatively unintelligible, the Psalmist describes them as driven over the uplands of Gilgal like the clouds of chaff blown from the threshing-floors; chased away like the spherical masses of dry weeds which course over the plains of Esraelon and Hilibda — flying with the dreadful hurry and confusion of the flames, that rush and leap from tree to tree and hill to hill when the wooded mountains of a tropical country are by chance ignited (Ps. lxxxiii. 13, 14). The slaughter was concentrated round the rock at which Oreb fell, and which was long known by his name (Judg. vii. 25; Is. x. 26). This spot appears to have been on the west of Jordan, from whence the beds of the two chiefards were brought to Gideon to encourage him to further pursuit after the fugitive Zelah and Zalzumah.

This is a remarkable instance of the value of the incidental notices of the later books of the Bible in confirming or filling up the rapid and often necessarily slight outlines of the formal history. No reader of the relation in Judges would suppose that the death of Oreb and Zeeb had been accompanied by any slaughter of their followers. In the subsequent pursuit of Zelah and Zalzumah the "host" is especially mentioned, but in this case the chiefs alone are named. This the notices of Isaiah and the Psalmist, who evidently referred to facts with which their hearers were familiar, fortunately enable us to supply. Similarly in the narrative of the exodus of Israel from Egypt, as given in the Pentateuch, there is no mention whatever of the tempest, the thunder and lightning, and the earthquake, which from the incidental allusions of Ps. lxxviii. 16-18 we know accompanied that event, and which are also stated fully by Josephus (Ant. ii. 10, § 3). We are thus reminded of a truth perhaps too often overlooked, that the occurrences preserved in the Scriptures are not the only ones which happened in connection with the various events of the sacred history: a consideration which should dispose us not to reject too hastily the supplements to the Bible narrative furnished by Josephus, or by the additions and corrections of the Septuagint, and even those facts which are reflected, in a distorted form it is true, but still often with considerable remains of their original shape and character, in the legends of the Jewish, Mohammedan, and Christian East.

G. O'REB (Oreb), i. e. Mount Horeb (2 Esdr. ii. 33). [Horeb.]

O'REB, THE ROCK (בּוּרֵב) in Judges viii. ὁρβής: Alex. Σαοους (only): in Is. τὸς ὁρβής: in both MSS.: Petrie Oreb, and Horeb). The "raven's crag," the spot at which the Midianite chieftain Oreb, with thousands of his countrymen, fell by the hand of the Ephraimites, and which probably acquired its name therefrom. It is mentioned in Judg. viii. 26; 4 Is. x. 26. It seems plain from the terms of Judg. xvi. 25 and viii. 1 that the rock Oreb and the winepress Zeeb were on the east side of Jordan. Perhaps the place called "Obo (בּוּב), which in the Bereshith Rabba (Reland, Pal. p. 913) is stated to have been in the neighborhood of Beth shean, may have some connection with it. Rabba it, which recalls in a remarkable way the words of the Psalm quoted above: "May I be whirled like the chaff before the wind, until you are caught in the thorns, or plunged into the sea?" a

b The word "upon" in the Author. version of this passage is not correct. The preposition is וָא "in" or "at."

c Such is the conclusion of Reland (Pal. p. 916, Oreb).
Jehuda (Rev. Robb, ibid.) was of opinion that the "Eo-Trepoj, U. 355, whom he adopts as the Hebrew Chaldee, which time he is of the opinion of the author of Shabb Hagaddoth (Vulg. vol. xxxii.), that it is the same as the Italian "gians da prato", which was somewhat similar in form to the modern violin, and was played upon with a bow of horsehair, the chief difference being that it had six strings of gut instead of four.

Michaelis (Spruch, ed. Lec. Heb., No. 1184) identifies the "syrinx with the psaltery.

Winer (Rend. art. "Musikalisiche Instrumente") says that in the Hebrew version of the book of Daniel "syrinx" is used as the equivalent of לול הים, סינורית (Gr. συνωρία), rendered as "dulcimer" in our version.

ORION (7838: Harris, Ges.): App; [Vat. אבם] Alex. Ἀπατ. [Armen.]

One of the sons of Jerahmeel, the firstborn of Hezron (1 Chr. ii. 23).

ORGAN (ἐργήν; Gen. iv. 21; Job xxi. 12; 21, Job xxx. 31; Ps. cl. 4). The Hebrew word ἔργον or ἔργα, thus rendered in our version, probably denotes a pipe or perforated wind-instrument, as the root of the word indicates. In Gen. iv. 21 it appears to be a general term for all wind-instruments, opposed to ιωνιά (A. V. "harp"), which denotes all stringed instruments. In Job xxi. 12 are enumerated the three kinds of musical instruments which are possible, under the general terms of the timbrel, harp, and organ. The ἔργον is here distinguished from the timbrel and harp, as in Job xxx. 31, compared with Ps. cl. 4. Our translators adopted their rendering, "organ," from the Vulgate, which has uniformly organum, that is, the double or multiple pipe. The renderings of the LXX, are various: κιβοῦγα in Gen. iv. 21, φάραξις in Job, and φαράγβω in Ps. cl. 4. The Chaldean in every case has מ"מ עבב, which signifies "a pipe," and is the rendering of the Hebrew word סינורית as translated in our version of Is. xxx. 29; Jer. xviii. 36; Joel xii. 3. He, in his 21st reference to the Psalms in Mendelssohn's Bible, adopts the opinion of those who identify it with the Paedalian pipes, or syrinx, an instrument of unquestionable ancient origin, and common in the East. It was a favorite with the shepherds in the time of Homer (H. viii. 29), and its invention was attributed to various deities; to Apollo Athene by Plutarch (Plut. xii. 12-14), to Pan by Pliny (vii. 57; cf. Virg. Eccl. ii. 32; Tibull. ii. 5, 3, 20); by others to Marsyas or Silenus (Athene. iv. 181). In the last-quoted passage it is said that Hermes first made the syrinx with one reed, while Silenus, or according to others, two Meces, Selnthes and Rhonakes, invented that with many reeds, and Marsyas fastened them with wax. The reeds were of unequal length but equal thickness, generally seven in number (Virg. Eccl. ii. 36), but sometimes nine (Theoc. Id. viii.). These in use among the Turks sometimes numbered fourteen or fifteen (Cabinet Divers. in Mus. Inst. Hebr., in Ugozini, Thes. xxiii. 290). Russell describes those he met with in Aleppo. The syrinx, or Pan's pipe, is still a pastoral instrument in Syria; it is known also in the city, and very few of the performers can sound it to any good. The higher notes are clear and pleasing, but the longer reeds are apt, like the...
ORNAMENTS. PERSONAL

The number, variety, and weight of the ornaments ordinarily worn upon the person form one of the characteristic features of oriental costume, both in ancient and modern times. The monuments of ancient Egypt exhibit the hands of ladies loaded with rings, ear-rings of very great size, anklets, armlets, bracelets of the most varied character, and frequently inlaid with precious stones or enamel, handsome and richly ornamented necklaces, either of gold or of beads, and chains of various kinds (Wilkinson, ii. 335-341). The modern Egyptians retain to the full the same taste, and vie with their progenitors in the number and beauty of their ornaments (Lane, vol. iii. Appendix A.). Nor is the display confined, as with us, to the upper classes: we are told that even "most of the women of the lower orders wear a variety of trumpery ornaments, such as ear-rings, neck-lets, bracelets, etc., and sometimes a nose ring" (Lane, i. 78). There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery. In the Old Testament, Isaiah (iii. 18-23) supplies us with a detailed description of the articles with which the luxurious women of his day were decorated, and the picture is filled up by incidental notices in other places:

a Nezom (נֶזָה), A. V. "ear-ring." The term is used both for "ear-ring" and "nose-ring." That it was the former in the present case appears from ver. 47: "I put the nose-ring upon her face" (נַשֶּׁת). The term is etymologically more appropriate to the nose-jewel than to the ear-ring. (Ear-ring; Nose-jewel)

b Tzωnîd (צֹנִית), a particular kind of bracelet, so named from a root signifying "to fasten." (Bracelet.)

c Celî (צלָה) : A. V. "jewels." The word signifies generally "articles." They may have been either vessels or personal ornaments: we think the latter sense more adapted to this passage

in the New Testament the Apostles lead us to infer the prevalence of the same habit when they recommend the women to adorn themselves, "not with broided hair, or gold, or pearls, or costly array, but with good works." (1 Tim. ii. 9, 10). even with "the ornament of a meek and quiet spirit," which is in the sight of God of great price" (1 Pet. iii. 4). Ornamentation to a Hebrew derivation. Some Jewish writers, the Rabbis Isaac Israel and Jonah among them, identified the Hebrew casîl with the Arabic sâhilî, by which was understood either Sirius or Canopus. The words of R. Jonah (Abulwalid), as quoted by Kimchi (I.ece. Heb. s.v.), are — "Casîl is the large star called in Arabic Sâhilî, and the stars combined with it are called after its name, casîlî." The name Sîlî, "foolish," was derived from the supposed influence of the star in causing folly in men, and was probably an additional reason for identifying it with casîlî. These conjectures proceed, first, upon the supposition that the word is Hebrew in its origin, and, secondly, that, if this be the case, it is connected with the root of casîlî, "a fool;" whereas it is more probably derived from a root signifying firmness or strength, and would denote the "strong one," the giant of the Syrians and Arabs. A full account of the various theories which have been framed on the subject will be found in Michaelis, Suppl. ad Lex. Hebr., No. 1192. W. A. W.

ORNAMENTS. PERSONAL

With regard to the particular articles noticed in the Old Testament, it is sometimes difficult to explain their form or use, as the name is the only source of information open to us. Much illustration may, however, be gleaned both from the monuments of Egypt and Assyria, and from the statements of modern travellers; and we are in all respects in a better position to explain the meaning of the Hebrew terms, than were the learned men of the Reformation era. We propose, therefore, to review the passages in which the personal ornaments are described, substituting, where necessary, for the readings of the A. V. the more correct sense in italics, and referring for more detailed descriptions of the articles to the various heads under which they may be found. The notices which occur in the early books of the Bible, imply the weight and abundance of the ornaments worn at that period. Elizer decorated Nekhekah with a golden nose-ring "of half a shekel weight, and two bracelets" for her hands of ten shekels weight of gold" (Gen. xxiv. 22); and he afterwards added "tringets of silver and tringets of gold" (verse 53). Ear-rings were worn by Jacob's wives, apparently as charms, for they are mentioned in connection with idols: "they gave unto Jacob all the strange gods, which were in their hand, and their ear-rings which were in their ears." (Gen. xxxv. 4. The ornaments worn by the patriarch Jeshua were a "signet," which was suspended by a string round the neck, and a "staff" (Gen. xxxviii. 18): the staff itself was probably ornamented, and thus the practice of the Israelites would be exactly similar to that of the Babylonians, who, according to Herodotus (I. 195), "each carried a seal, and a walking-stick, carved at the top into the form of an apple, a rose, an eagle, or something similar." The first notice of the ring occurs in reference to Joseph: when he was made ruler of Egypt, Pharaoh "took off his signet-ring from his hand and put it upon Joseph's hand, and put a gold chain about his neck" (Gen. xii. 42), the latter being probably a "simple gold chain in
ornaments, personal

The poetical portions of the O. T. contain numerous references to the ornaments worn by the Hebrews in the time of their highest prosperity. The appearance of the bride is thus described in the book of the Canticles: "thy cheeks are comely with beads, thy neck with peardots (pierced); we will make thee beads of gold with studs of silver" (i. 10, 11). Her neck rising tall and stately "like the tower of David built for an armory," was decorated with various ornaments hanging like the "thousand bucklers, all shields of mighty men, on the walls of the armory" (iv. 4): her hair falling gracefully over her neck is described figuratively as a "chain" (iv. 9) and "the roundings," (not as in the A.V. "the jointings") of her limbs are likened to the pendant *of an ear-ring, which tapers gradually downwards (viii. 1). So again we read of the bridegroom: "his eyes are . . . fitly set," p as though they were gems filling the sockets of rings (v. 12): "his hands are as gold rings set with the keryl," i.e. (as explained by Gesenius, Thesaur. p. 287) the fingers when curved are like gold rings, and the nails dyed with henna. Lastly, the yearning after close affection is expressed thus: "set me as a seal upon thine heart, as a seal upon thine arm," whether that the seal itself was the most valuable personal ornament worn by a man, as in Jer. xxii. 24: Hag. ii. 25, or whether perichae the close contiguity of the seal to the wax on which it is impressed may not rather be intended (Cant. viii. 6). We may further notice the imagery employed in the Prov. to describe the effects of wisdom in beautifully-

heads, which might be strung together, and so make a row, encircling the cheeks. In the next verse the same word is rendered in the A. V. "Borders." The sense must, however, be the same in both parts, and the point of contrast may perhaps consist in the difference of the material, the beads in ter 10 being of some ordinary metal, while those in ver. 11 were to be of gold.

*Charzim* (כַּרְצִים) A. V. "chains." The word would apply to any perforated articles, such as beads, pearls, coral, etc.

*Amik* (אמיק) In the A. V. it is supposed to be literally a chain: and hence some critics explain the word attached to it, עָמֶיקָה, as meaning a "collar," instead of a "neck." The latter, which is the correct sense, may be retained by treating *amik* as metaphorically applied to a pendant lock of hair.

*Cašbin* (כֶּשֵּבִין) A. V. "jewels." Gesenius understands the term as referring to a necklace, and renders this passage, the roundings of thy hips are like the knobs or bosses of a necklace. The two notions of rounded and polished may be combined in the word in this case. A cognate term is used in Hos. ii. 13, and is rendered in the A. V. "jewels."

The words in the original literally put sitting in failure; and the previous reference to "rivers of waters" would rather lead us to adopt a rendering in harmony with that image, as is done in the LXX. and the Vulgate, καθώς εἰς πάντα αὐτὸν ἐκατέρωθεν, μετὰ χορτασμοῦ προσθήκην. The term here rendered "rings," *gālîm* (גָּלִים), is now very else found in this sense, at all events as a personal ornament. Its etymology, sense implies something rounded, and therefore the word admits of being rendered "stuffs," in which case a comparison would be instituted between the outstretched fingers and the hand-drawn decorated staff, of which we have already spoken (Hitzig, in Ec.)
ING the character; in reference to the terms used
we need only explain that the "ornament" of the
A. V. in i. 9, iv. 9, is more specifically a *seven* or
girdle; the "chains" of i. 9, the drops of
which the necklace was formed; the "jewel of
gold in a swine's snout" of xx. 22, a nose-clip; the
"jewel" of xx. 15, a *triklet*, and the "ornament" of
xxv. 12, an *en-penodont*.

The passage of Isaiah (iii. 18-23), to which we
have already referred, may be rendered as follows:
(18) "In that day the Lord will take away the
brevity of their *anklets*; and their *beze cosy*; and
their necklaces; v (19) the *en-penodonts*; the
bracellets; and the light *vites*; (20) the turbons;
and the step-children, and the gildeus; and the
scent-bottles, and the *anulets*; (21) the rings and
nose-rings; (22) the *state-dresses*, and the
cloaks, and the shrouds, and the purses; (23) the
mirrors; and the fine linen shirts, and the
turbons, and the light *dresses,*

The following extracts from the Mishna (Shabb.
cap. vi.) illustrate the subject of this article, it be-
ing premises that the object of the inquiry was to
ascertain what constituted a proper article of dress,
and what might be regarded by rabbinical refine-
ment as a burden: "A woman must not go out
(on the Sabbath) with linen or woollen laces, nor
with the straps on her head; nor with a frontlet
and bracelets thereby, unless she to her cap: (22)
with a golden tower (i. e. an ornament in the shape
of a tower): nor with a light gold chain: nor with
nose-rings: nor with finger-rings on which there is
no seal: nor with a needle without any eye (§ 1): nor
with a needle that has an eye: nor with a finger-
ring that has a seal on it: nor with a dis-
orn: nor with a smelling-bottle or balm-flask (§ 3).

* Orpah (טֶרָפָה). a Litvak (רַפָּה). b See note a, p. 2988. c The word is sehron. See note a, p. 2997. d Chal. See note a, p. 2988.
e * Akisim (אֲקִיסִים); A. V. "tinkling ornaments
about their feet." The effect of the anklet is de-
scribed in ver. 16, "making a tinkling with their feet."

Lf Shibsim (שִׁבְשִׁים); A. V. "cauls" or "net-
works." The term has been otherwise explained as
meaning ornaments shaped like the sun, and worn as a
ear-clip. [HAIR.

* Shahrznim; A. V. "round tires like the moon.
See note i. p. 2268.

* Netophath; A. V. "chains" or "sweet balls.
See note k. p. 2988.

* Shibath (שִׁבַּת); The word refers to the con-
bstruction of the bracelet by interwining cords or
metal rods.

k Ralith (רָלִית); A. V. "muflers" or
"spangled ornaments." The word describes the tremen-
dous motion of the veil. [VEIL.

l Perim (פֵּרִים); A. V. "bonnets." The
perer may mean more specifically the decoration in
front of the turban [HEAD-DRESS.

m Tshibath (תְּשִׁבַּת); A. V. "ornaments of the
ear." See note c, p. 2980. The effect of the step-chain
3 to give a "tinkling" sound, as described in ver. 16.

n Kishlirim (כִּישְׁלִים); A. V. "head-bands.
It probably means a handsomely decorated girdle.
[GIRDLE.] It formed part of a bride's attire (Jer. ii.
26).

= A man is not to go out . . . with an amulet, un-
less it be by a distinguished sage (§ 2): knee-buckles
are clean and a man may go out with them: step-
chains are liable to become neculeum, and a man
must not go out with them" (§ 4). W. L. B.

ORNAI AT (טִנָּה; [a strong one, a hero]:
*Orpa* or *Orpah*). The term in which the name
of the Jebusite king, who in the older record of
the book of Samuel is called Aramnah, Arayah, Ha-
vannah, or Hoannah, is given in Chronicles (1 C1.
xvi. 15, 18, 20-25, 28; 2 Chr. iii. 1). This
extraordinary variety of form is a strong corroboration
to the statement that Orna was a non-Israelite

In some of the Greek versions of Origen's Hex-
apha collected by Rahna, the threshing-floor of
Orna (Evpac τοὸν Διωσαρίαν) is named for that
of Nachon in 2 Sam. vi. 6. G.

ORPAH (טֶרָפָה; [see below]: *Orpah* or
*Orpha*), [Ruth i. 4, 14.] A Moabitc woman, wife
of Chillon son of Naomi, and thereby sister-in-law
to Ruth. On the death of their husbands Orpah
accompanies her sister-in-law and her mother-in-
law on the road to Bethelum. But here her resolu-
tion failed her. The older which Naomi made to
the two younger women that they should return
each to their own mother's house," after a slight
hesitation, she embraced. "Orph kissed her
mother-in-law," and went back "to her people and
to her gods," leaving to the unconscious Ruth the
 glory, which she might have rivaied, of being the
mother of the most illustrious house of that or any
nation.

* Simonis (p. 401) makes טֶרָפָה טֶרָפָה טֶרָפָה.

b Botli kannaphes (בּוֹתֵלֹת קָנָאֵפֶה); A. V. "table-
lets," or "houses of the soul," the latter being the
literal rendering of the words. The scent-bottle was
either attached to the girdle or suspended from the
neck.

p Leshakim (לְשָׁכִים); A. V. "ear-rings." The
meaning of this term is extremely doubtful: it is de-
ferred from a root signifying "to whisper;" and hence
is applied to the mutterings of serpent charmers,
and in a secondary sense to amulets. They may have
been in the form of ear-rings, as already stated. The
etymological meaning might otherwise make it applic-
able to describe light, rustling robes (Sauschiitz,
Archaol. i. 39).

q A. V. "nose-jewels."

r For this and the two following terms see Dres.

s Chardith (חָרְדִית); A. V. "crisping-pins.
p. 531), the purs is so named from its round, conica1.
form.

t Gilayim (גִּילַיִם); A. V. "glasses." The
term is not the same as was before used; nor is its
sense well ascertained. It has been otherwise under-
stood as describing a transparent material like gauze.

See Dres.

u A. V. "hoods." [HEAD-DRESS.

v A. V. "caps.

w Declined 'Opaq, Opaar, in the Vat. MS. (Mal); but
in the Alex. MS. constantly Opra. In the Tar-
gum on Chronicles the name is given in four different
forms: usually יָרָפָה, but also יָרָפָה יָרָפָה יָרָפָה.

And. See the edition of Beck (Aug.
Fund. i. 820).
ORTHOSIAS (Ορθοσίας: Alex. Ορθοσία: Orthosia). Tryphon, when besieged by Antiochus Seleucus in Dora, fled by ship to Orthosia (1 Mac. xv. 37). Orthosia is described by Pliny (v. 17) as north of Tripolis, and south of the river Eleuthernus, near which it was situated (Strabo, xvi. p. 753). It was the northern boundary of Phoenicia, and distant 133 stadia from the Orontes (id. p. 760). Shaw (Tarç, pp. 270, 271, 24 ed.) identifies the Eleuthernus with the modern Noah el-Berid on the north bank of which, corresponding to the description of Strabo (p. 753), he found ruins of a considerable city, whose adjacent district pays yearly to the husbands of Tripoly a tax of fifty dollars by the name of Orthosia. In Peutinger's Table, also, Orthosia is placed thirty miles to the south of Antarchus, and twelve miles to the north of Tripoly. The situation of it likewise is further illustrated by a medal of Antoninus Pius, struck at Orthosia: upon the reverse of which we have the goddess Astarte treading upon a river. For this city was built upon a rising ground on the northern banks of the river, within half a furlong of the sea, and, as the rugged venerances of Mount Libanus lie at a small distance in a parallel with the shore, Orthosia must have been a place of the greatest importance; as it would have thereby the entire command of the road (the only one there is) betwixt Phoenicia and the maritime parts of Syria." On the other hand, Mr. Porter, who identifies the Eleuthernus with the modern Noah el-Kebir, describes the ruins of Orthosia as on the south bank of the Noah el-Berid, "the cold river" (Howie, p. 304), thus agreeing with the accounts of Ptolemy and Pliny. The statement of Strabo is not sufficiently precise to allow the inference that he considered Orthosia north of the Eleuthernus. But if the ruins on the south bank of the Noah el-Berid be really those of Orthosia, it seems an objection to the identification of the Eleuthernus with the Noah el-Kebir; for Strabo at one time makes Orthosia (xvi. p. 679), and at another the neighboring river Eleuthernus (δ παρόν παράγυ, the boundary of Phoenice on the north. This could hardly have been the case if the Eleuthernus were 24 hours, or nearly twelve miles, from Orthosia.

According to Josephus (Ant. x. 7, § 2), Tryphon fled to Apamea, while in a fragment of Charas, quoted by Grimm (Kiewzig. Homil.) from Miller's Frenz, (see Hist. iii. p. 844, fr. 14, he is said to have taken refuge at Ptolemis. Grimm recoverles these statements by supposing that Tryphon fled first to Orthosia, then to Ptolemis, and lastly to Apamea where he was slain. W. A. W.

OSEIA (Osee). Hoshea the son of Elah, king of Israel (2 Esdr. xiii. 40).

OSEIA (Osee). The prophet Hosea (2 Esdr. i. 39).

* OSEE (10πη: Tisch. Treg. 10πη: Osee). The prophet Hosea (Rom. ix. 25).

OSHIA (32τον, i. e. Hoshea [see below]:

Samar. 327:77: Ahsh: Osee). The original name of Jeshua the son of Nun (Num. xiii. 8), which on some occasion not stated—but which

we may with reason conjecture to have been his residence to the factions conduct of the spies—received from Moses (ver. 16) the addition of the great name of Jehovah, so lately revealed to the nation (Ex. vi. 3), and thus from "Help" became "A Help of Jehovah." The Samaritan Codex has Jehovah in both places, and therefore misses the point of the change.

The original form of the name recurs in Deut. xxxii. 44, though there the A. V. (with more accuracy than here) has Hoshea.

Probably no name in the whole Bible appears in so many forms as that of this great personage, in the original five, and in the A. V. no less than seven—Oseah, Hoshea, Jehoshua, Jehoshuah, Joshua, Jedux, Jesus; and if we add Hosea (also identical with Oshea) and Osea, nine.

G.

OSPIRA (Οσπρα, ozpela: ὁμπρατος: halacteis). The Hebrew word occurs only in Lev. xi. 13, and Deut. xiv. 12, as the name of some unclean bird which the law of Moses disallowed as food to the Israelites. The old versions and many

commentators are in favor of this interpretation; but Boeckhart (Hieroz. ii. 774) has endeavored, though on no reasonable grounds, to prove that the bird denoted by the Hebrew term is identical with

Craterus gallus.
The generic name used by the Arabs to express any of the large kinds of the Falcovibus.” (See Loche’s Catalogue des Oiseaux observés en Algérie, p. 37.) There is nothing conclusive to be gathered from the γρύς of the LXX and the grype of the Vulgate, which is the name of a fabulous animal. Etymologically the word points to a flocking or wheeling bird with an eminently “hooked beak;” and certainly the ossifrage has the hooked beak characteristic of the order Raptortores in a very marked degree. If much weight is to be allowed to etymology, the peres of the Hebrew Scriptures may well be represented by the ossifrage, or bone-breaker; for peres in Hebrew means “the breaker.” And the ossifrage (Grypocerus) is well deserving of his name in a more literal manner, it will appear, than Col. H. Smith (Kitto’s Cyc. art. “Pe-rés”) is willing to allow: for not only does he push kids and lambs, and even men, off the rocks, but he takes the bones of animals which other birds of prey have denuded of the flesh high up into the air, and lets them fall upon a stone in order to crack them, and render them more digestible even for his enormous powers of deglutition. (See Mr. Simpson’s very interesting account of the Lammergeyer in Isis, ii. 282.) The lammergeyer, or bearded vulture, as it is sometimes called, is one of the largest of the birds of prey. It is not uncommon in the East: and Mr. Tristram several times observed this bird “sitting over the high mountain-passes west of the Jordan” (Ibis, i. 23). The English word ossifrage has been applied to some of the Falcovibus: but the ossifrage of the Latins evidently points to the lammergeyer, one of the Vulturibes.

**OSSIFRAGE** (όσσιφραγε) peres: γρύς; γρύπα. There is much to be said in favor of this translation of the A. V. The word occurs, as the name of an unclean bird, in Lev. xi. 13, and in the parallel passage of Deut. xiv. 12. (For other renderings of peres see Bochart, Hieroz. ii. 770.) The generis name used by the Arabs to express any of the large kinds of the Falcovibus.” (See Loche’s Catalogue des Oiseaux observés en Algérie, p. 37.) There is nothing conclusive to be gathered from the γρύς of the LXX and the grype of the Vulgate, which is the name of a fabulous animal. Etymologically the word points to a flocking or wheeling bird with an eminently “hooked beak;” and certainly the ossifrage has the hooked beak characteristic of the order Raptortores in a very marked degree. If much weight is to be allowed to etymology, the peres of the Hebrew Scriptures may well be represented by the ossifrage, or bone-breaker; for peres in Hebrew means “the breaker.” And the ossifrage (Grypocerus) is well deserving of his name in a more literal manner, it will appear, than Col. H. Smith (Kitto’s Cyc. art. “Pe-...-rés”) is willing to allow: for not only does he push kids and lambs, and even men, off the rocks, but he takes the bones of animals which other birds of prey have denuded of the flesh high up into the air, and lets them fall upon a stone in order to crack them, and render them more digestible even for his enormous powers of deglutition. (See Mr. Simpson’s very interesting account of the Lammergeyer in Isis, ii. 282.) The lammergeyer, or bearded vulture, as it is sometimes called, is one of the largest of the birds of prey. It is not uncommon in the East: and Mr. Tristram several times observed this bird “sitting over the high mountain-passes west of the Jordan” (Ibis, i. 23). The English word ossifrage has been applied to some of the Falcovibus: but the ossifrage of the Latins evidently points to the lammergeyer, one of the Vulturibes.

**OSTRICH** There can be no doubt that the Hebrew words both haya’anābh, yā’ūn, and ṭēnah, denote this bird of the desert.

1. Both haya’anābh (הָאוֹת הָאָנוֹן) σπροῦθος, σπρουθίους, σπρύθης: struthio occurs in Lev. xi. 18, Deut. xiv. 15, in the list of unclean birds; and in other passages of Scripture. The A. V. erroneously renders the Hebrew expression, which signifies either “daughter of greediness” or “daughter of shouting,” but “owl,” or, as in the margin, by “daughter of owl.” In Job xxx. 20, Is. xxiv. 13, and xlili. 20, the margin of the A. V. correctly reads “ostrichees.”

Bochart considers that both haya’anābh denotes the female ostrich only, and that tēnah, the following word in the Hebrew text, is to be restricted to the male bird. In all probability, however, this latter word is intended to signify a bird of another genus. [Night-hawk.] There is considerable difference of opinion with regard to the etymology of the Hebrew word yē’ānāh. Bochart (Hieroz. ii. 811) derives it from a root יָאָה meaning “to cry out” (see also Maurer, Comment, in V. T. ad Thren. iv. 3); and this is the interpretation of old commentators generally. Gesenius (Thees. s. v. v1192) refers the word to a root which signifies “to be greedy or voracious;” and denumes to the explanation given by Michaelis (Suppl. ad Lex. Heb. p. 1127) and by Rosenmüller (Not. ad Hieroz. ii. 21), who trace the Hebrew word yē’ānāh to one which in Arabic denotes “hard and sterile land:” All such birds apparently would have been unclean in the East.

---

a סֶּפֶך, from סָפַך, “to break,” to “crush.”

b יָאָה, “to cry out.”

c יָאָה, “to cry out.”

d עֶזֶּה, terra aura et sterilitas.
mean "daughter of the desert." Without entering into the merits of these various explanations, it will be enough to mention that any one of them is well suited to the habits of the ostrich. This bird, as is well known, will swallow almost any substance, pieces of iron, large stones, etc., etc.; this it does in order to assist the triturating action of the gizzard; so that the oriental expression of "daughter of voracity" is eminently characteristic of the ostrich.\(^a\) With regard to the two other derivations of the Hebrew word, we may add that the cry of the ostrich is said sometimes to resemble the lion, so that the Hottentots of South Africa are deceived by it; and that its particular haunts are the parched and desolate tracts of sandy deserts. The loud crying of the ostrich seems to be referred to in Mic. i. 8: "I will howl and woe . . . I will make a mourning as the ostriches" (see also Job xxx. 29). The other passages where both hagga and nahad occurs point to the desolate places which are the natural habitat of these birds.

2. \(\text{Yā'în} (\text{Y}^\text{Y})\) occurs only in the plural number \(\text{Y}^\text{Y}^\text{Y}\) \(\text{yā'în} (\text{LXX.}, \text{ποιμανός}, \text{struthio})\) in Lam. iv. 3, where the context shows that the ostrich is intended: "The daughter of my people is become cruel like the ostriches in the wilderness." This is important, as showing that the other word (1), which is merely the feminine form of this one, with the addition of beth, "daughter," clearly points to the ostrich as its correct translation, even if all the old versions were not agreed upon the matter. For remarks on Lam. iv. 3, see below.

3. \(\text{Rā'în} (\text{R}^\text{R})\). The plural form \(\text{R}^\text{R}^\text{R}^\text{R}\) \(\text{rā'înîm} (\text{LXX.}, \text{ποιμανονι}, \text{struthion})\) alone occurs in Job xxxix. 13; where, however, it is clear from the whole passage (13-18) that ostriches are intended by the word. The A.V. renders \(\text{rā'înîm}\) by "peacocks," a translation which has not found favor with commentators; as "peacocks," for which there is a different Hebrew name, were probably not known to the people of Arabia or Syria before the time of Solomon. [PEACOCKS.] The "ostrich" of the A.V. in Job xxxix. 13 is the representative of the Hebrew râ'înîm, "feathers." The Hebrew râ'înîm appears to be derived from the root râ'în, to walk, or to utter a strident sound, in allusion to this bird's nocturnal cries. Gesenius compares the Arabic zimmur, a female ostrich, from the root zimmur, "to sing." The following short account of the nidification of the ostrich \(\text{Struthio camelus}\) will perhaps elucidate those passages of Scripture which ascribe cruelty to this bird in neglecting her eggs or young. Ostriches are polygamous; the hens lay their eggs promiscuously in one nest, which is merely a hole scratched in the sand; the eggs are then covered over to the depth of about a foot, and are, in the case of those birds which are found within the tropics, generally left for the greater part of the day to the heat of the sun, the parent-birds taking their turns at incubation during the night. But in those countries which have not a tropical sun ostriches frequently incubate during the day, the male taking his turn at night, and watching over the eggs with great care and affection, as is evidenced by the fact that jackals and other of the smaller canævora are occasionally found dead near the nest, having been killed by the ostrich in defense of the eggs or young. "As a further proof of the affection of the ostrich for its young" \(\text{we quote from Shaw's Zoology, xi. 426,}\) "it is related by Thunberg that he once rode past a place where a female was sitting on her nest, when the bird sprang up and pursued him, evidently with a view to prevent his noticing her eggs or young." The habitat of the ostrich leaving its eggs to be nutured by the sun's heat is usually appealed to in order to confirm the Scriptural account, "she leaveth her eggs to the earth;" but, as has been remarked above, this is probably the case only with the tropical birds: the ostriches with which the Jews were acquainted were, it is likely, birds of Syria, Egypt, and North Africa; but, even if they were acquainted with the habits of the tropical ostriches, how can it be said that "she forgetteth that the foot may crush" the eggs, when they are covered a foot deep or more in sand?\(^d\) We believe the true

\(^{a}\) Mr. Tristram, who has paid considerable attention to the habits of the ostrich, has kindly read over this article; he says: "The necessity for swallowing stones, etc., may be understood from the favorite food of the young ostriches I have seen being the date-stone, the hardest of vegetable substances."

\(^{d}\) See Tristram: [Proc., ii. 74]: "Two Arabs began to dig with their hands, and presently brought up four fine fresh eggs from the depth of about a foot under the warm sand."
the hare or to the coney the habit of chewing the cud? And this remark will hold good in the passage of Job which speaks of the ostrich being without understanding. It is a general belief amongst the Arabs that the ostrich is a very stupid bird: indeed they have a proverb, "Stupid as an ostrich." The great Bochart, however, has given us five points on which this bird is supposed to deserve its character. They may be briefly stated thus: (1) Because it will swallow iron, stones, etc.: (2) Because when it is hunted it thrusts its head into a bush and imagines the hunter does not see it; (3) Because it allows itself to be deceived and captured in the manner described by Strabo (xxvi. 772, ed. Kraner): (4) Because it neglects its eggs; (5) Because it has a small head and few brains. Such is the opinion the Arabs have expressed with regard to the ostrich; a bird, however, which by no means deserves such a character, as travellers have frequently testified. "So wary is the bird," says Mr. Tristram (Josb. ii. 73), "and so open are the vast plains over which it roams, that no ambuscades or artifices can be employed, and the greater resource and dogged perseverance is the only mode of pursuit." Dr. Shaw (Travels, ii. 345) relates as an instance of want of sagacity in the ostrich, that he "saw one swallow several leaden bullets, scorching hot from the moon." We may add that not infrequently the stones and other substances which ostriches swallow prove fatal to them. In this one respect, perhaps, there is some foundation for the character of stupidity attributed to them.

The ostrich was forbidden to be used as food by the Levitical law, but the African Arabs, says Mr. Tristram, eat its flesh, which is good and sweet. Ostrich's brains were among the dainties that were placed on the supper-tables of the ancient Romans. The fat of the ostrich is sometimes used in medicine for the cure of palsy and rheumatism (Pococke, Travels, i. 290). Burchardt (Syria, Append. p. 664) says that ostriches breed in the Dahay. They are found, and seem formerly to have been more abundant than now, in Arabia.

The ostrich is the largest of all known birds, and perhaps the swiftest of all crawling animals. The capture of an ostrich is often made at the sacrifice of the lives of two horses (Ib'da, ii. 73). Its strength is enormous. The wings are useless for flight, but when the bird is pursued they are extended and act as sails before the wind. The ostrich's feathers so much prized are the long white plumes of the wings. The best come to us from Barbary and the west coast of Africa. The ostrich belongs to the family Struthionidae, order Cursoriae. W. II.

* OTHER, in the A. V. Josh. viii. 22; 2 Chr. xxii. 22; Job xxxv. 24; Phil. ii. 3, iv. 3 is used in the plural, for "others." In Luke xxiii. 32 the unfortunate rendering of the A. V., "two other malefactors," has been amended in some modern editions by inserting a comma after "other." The Greek "ετρω κακογρογοι," "two other malefactors," is.

A. OTHNIEL (οθνιή) [prob. Ion of Jehovah]: "Othni: [Vat. Tovni] Alex. Οθνί: Othni). Son of Shemuel, the first-born of Obad-edom, one of the "able men for strength for the service" of the Tabernacle in the reign of David (1 Chr. xxvi. 7). The name is said by Gesenius to be derived from an obsolete word, "Othnu, "a lion."

Othniel (οθνιή) [Son of God, cf. Othni, 1 Chr. xxvi. 7: Θεοθονία: Othnial, (Gothonic); son of Kenaz, and younger brother of Caleb (Josh. xvii. 17; Judg. i. 13, iii. 9, 11: 1 Chr. iv. 13, xxvii. 13). But these passages all leave it doubtful whether Kenaz was his father, or, as is more probable, the more remote ancestor and head of the tribe, whose descendants were called Kenitezites (Num. xxxii. 12, &c.), or sons of Kenaz. If Jephunneh was Caleb's father, then probably he was father of Othniel also. [CALEH]. The first mention of Othniel is on occasion of the taking of Kiriath-Sepher, or Debir, as it was afterwards called. Debir was included in the mountainous territory near Hebron, within the border of Judah, assigned to Caleb the Kenitezite (Josh. xiv. 12-15); and in order to stimulate the valor of the assailants, Caleb promised to give his daughter Achsah to whosoever should assault and take the city. Othniel won the prize, and received with his wife in addition to her previous dowry the upper and nether springs in the immediate neighborhood. These springs are identified by Van de Velde, after Stewart, with a spring which rises on the summit of a hill on the north of Wady Hilleh (2 hours S. W. from Hebron), and is brought down by an aqueduct to the foot of the hill. (For other views see Dimaq.) The next mention of Othniel is in Judg. iii. 9, where he appears as the first judge of Israel after the death of Joshua, and their deliverer from their first servitude. In consequence of their intermarriages with the Canaanites, and their frequent idolatries, the Israelites had been given into the hand of Chushan-Rishathaim, king of Mesopotamia, for eight years. From this oppressive servitude they were delivered by Othniel. "The Spirit of the Lord came upon him, and he judged Israel, and went out to war: and the Lord delivered Chushan-Rishathaim, king of Mesopotamia, into his hand: and his hand prevailed against Chushan-Rishathaim. And the land had rest forty years." And Othniel and the son of Kenaz died.

This with his genealogy (1 Chr. iv. 13, 14), which assigns him a son, Hathiath, whose posterity, according to Judith vi. 15, continued till the time of Holofernes, is all that we know of Othniel. But two questions of some interest arise concerning him, the one his exact relationship to Caleb; the other the time and duration of his judgeship.

1) As regards his relationship to Caleb, the doubt is from the uncertainty whether the words in Judg. iii. 9, "Othniel the son of Kenaz, Caleb's younger brother," indicate that Othniel himself, or that Kenaz was the brother of Caleb. The most natural rendering, according to the canon of R. Moses ben Nachman, on Num. x. 29, that in constructions of this kind such designations belong to the principal person in the preceding sentence, makes Othniel to be Caleb's brother. And this is favored by the probability that Kenaz was not Othniel's father, but the father and head of the tribe, as we learn that Kenaz was, from the design of being discovered, frequently forsoke the eggs. Sure or this is a mark rather of sagacity than stupidity

143
nation of Caleb as "the Keneite," or "son of Kenaz." Jerome also so translates it, "Othniel /lunius, Cerne, frater Caleb junior," and so did the LXX, originally, because even in those copies which now have διαδοχος, they still retain τετερος in the acc. case. Nor is the objection, which influences most of the Jewish commentators to understand that Kenaz was Caleb's brother, and Othniel his nephew, of any weight. For the marriage of an uncle with his niece is not expressly prohibited by the Levitical law (Lev. xviii. 12, xx. 19); and even if it had been, Caleb and Othniel as men of foreign extraction would have been less amenable to it, and more likely to follow the custom of their own tribe. On the other hand it must be acknowledged that the canon above quoted does not hold universally. Even in the very passage (Num. x. 29) on which the canon is adduced, it is extremely doubtful whether the designation "the Midianite, Moses' father-in-law," does not apply to Rebuel, rather than to Hobab, seeing that Rebuel, and not Hobab, was father to Moses' wife (Ex. ii. 18). In the phrase "From the son of Shallum thine uncle," the words "thine uncle" certainly belong to Shallum, not to Hamanuel, as appears from vv. 8, 9. And in 2 Chr. xxxv. 3, 4; Neh. xiii. 28, the designation "Lord of Israel," and "high-priest," belong respectively to David, and to Eliashib. The chronological difficulties as to Othniel's judgingship would also be mitigated considerably if he were nephew and not brother to Caleb, as in this case he might well be 25, whereas in the other he could not be under 40 years of age, at the time of his marriage with Achsah. Still the evidence, candidly weighed, preponderates strongly in favor of the opinion that Othniel was Caleb's brother.

(2.) And this leads to the second question suggested above, namely, the time of Othniel's judgingship. Supposing Caleb to be about the same age as Joshua, as Num. xiii. 6, 8; Josh. xiv. 10, suggest, we should have to reckon about 25 years from Othniel's marriage with Achsah till the death of Joshua at the age of 110 years (85 + 25 = 110). And if we take Africanus's allowance of 30 years for the elders after Joshua, in whose lifetime "the people served the Lord" (Judg. ii. 7), and then allow 8 years for Chushan-Rishathaim's dominion, and 40 years of rest under Othniel's judgingship, and suppose Othniel to have been 40 years old at his marriage, we obtain (40 + 25 + 30 + 8 + 40 = 143) years at Othniel's age at his death. This we are quite sure cannot be right. Nor does any escape from the difficulty very readily offer itself. It is in fact a part of that larger chronological difficulty which affects the whole interval between the exodus and the building of Solomon's Temple, where the dates and formal notes of time indicate a period more than twice as long as that derived from the genealogies and other ordinary calculations from the length of human life, and general historical probability. In the case before us one would guess an interval of not more than 25 years between Othniel's marriage and his victory over Chushan-Rishathaim.

In endeavoring to bring these conflicting statements into harmony, the first thing that occurs to one is, that if Joshua lived to the age of 110 years, i. e. full 30 years after the entrance into Canaan, supposed him to have been 40 when he went as a spy, he must have outlived all the elder men of the generation which took possession of Canaan, and that 10 or 12 years more must have seen the last of the survivors. Then again, it is not necessary to suppose that Othniel lived through the whole 80 years of rest, nor is it possible to avoid suspecting that these long periods of 40 and 80 years are due to some influences which have disturbed the true computation of time. If these dates are discarded, and we judge only by ordinary probabilities, we shall suppose Othniel to have survived Joshua not more than 20, or at the outside, 30 years. Nor, however unsatisfactory this may be, does it seem possible, with only our present materials, to arrive at any more definite result. It must suffice to know the difficulties and wait patiently for the solution, should it ever be elucidated to us.

A. C. H.

**OTNIEL** (Οθνιήλ. Zechieth). A corruption of the name MATTHEW in Ex. x. 27 (1 Esdr. ix. 28).

* OUCHES (Ex. xxviii. 11, 13, 14, 25, xxix. 6, 13, 16, 18) denotes the bowls or vessels in which precious stones are set. In Old English it was also applied to the jewels themselves. The earlier form of the word is Douches or douches, which occurs in Chaucer.

* OUTROAD. To "make outroads." (1 Mac. xi. 41. A. V. ed. 1611) is to "make excursions." In some modern editions nonsense is made of the passage by printing it "make out roads."

**OVEN** (Οβῖνον; ὀβεῖνος). The eastern oven is of two kinds—fixed and portable. The former is fixed only in towns, where regular bakers are employed (Hos. vii. 4). The latter is adapted to the nomad state, and is the article generally intended by the Hebrew term τημαίριον. It consists of a large jar made of clay, about three feet high, and widening towards the bottom, with a hole for the extraction of the ashes (Niebuhr, Descr. de Philist. p. 46). Occasionally, however, it is not an actual jar, but an erection of clay in the form of a jar, built on the floor of the house (Wellsted, Travels, i. 330). Each household possessed such an article (Ex. viii. 3); and it was only in times of extreme distress that the same oven sufficed for several families (Lev. xxvi. 26). It was heated with dry twigs and grass (Matt. vi. 30); and the loaves were placed both inside and outside of it. It was also used for roasting meat (Mishna, Tann. 3, § 8). The heat of the oven furnished Hebrew writers with an image of rapid and violent destruction (Ps. xxi. 9; Hos. vii. 7; Mal. iv. 1).

W. L. B.

* OVERPASS (A. V. Jer. v. 28; Eccles. xiv. 14) is (to pass by), "neglect."
OVERRUN

• OVERRUN (A. V. 2 Sam. xviii. 23) means "to outrun." A.

• OVERSEERS, as a ministerial title, Acts xx. 28. [Bistor.] H.

• OWE, in Lev. xiv. 35; Acts xx. 11 (A. V. ed. 1611), is used in the sense of "to own," which has been substituted for it in modern editions. A.

OWL, the representative in the A. V. of the Hebrew words both hoyt'anah, yanshoph, <\textsl{cis}, kippiz, and lilithe.

2. Yanshoph, or yanshoph (נָשּׁה, נָשׁוּפְּךָ: יִבָּס, יָאָדוֹ: "ibis"); occurs in Lev. xi. 17; Deut. xiv. 16, as the name of some unclean bird, and in Is. xxiv. 11, in the description of desolate Edom, "the yanshoph and the raven shall dwell in it." The A. V. translates yanshoph by "owl," or "great owl." The Chaldee and Syriac are in favor of some kind of owl; and perhaps the etymology of the word points to a nocturnal bird. Bochart is satisfied that an "owl" is meant, and supposes the bird is so called from the Hebrew for "twilight." (Hieroz. iii. 21). For other conjectures see Bochart (Hieroz. iii. 21-29). The LXX. and Vulg. read <\textsl{bis} (ibis), i. e. the <\textsl{ibis religiosus}, the sacred bird of Egypt. Col. H. Smith suggests that the night heron (Ardea nycticorax, Lin.) is perhaps intended, and objects to the ibis on the ground that so rare a bird, and one totally unknown in Palestine, could not be the yanshoph of the Pentateuch; there is, however, no occasion to suppose that the yanshoph was ever seen in Palestine; the Levitical law was given soon after the Israelites left Egypt, and it is only natural to suppose that several of the unclean animals were Egyptian; some might never have been seen or heard of in Palestine: the yanshoph is mentioned as a bird of Edom (Is. l. c.), and the ibis might have formerly been seen there; the old Greek and Latin writers are in error when they state that this bird never leaves Egypt: Cuvier says it is found throughout the extent of Africa, and latterly Dr. Hengell met with it on the coast of Abyssinia (List of Birds collected in the Red Sea; "Ibis," i. 347). The Coptic version renders yanshoph by "flippens," from which it is believed the Greek and Latin word <\textsl{ibis} is derived (see Jaldonski's Opusc. i. 93, ed. te Water). On the whole the evidence is inconclusive, though it is in favor of the <\textsl{ibis religiosus}, and probably the other Egyptian species (<\textsl{ibis foeniculius}) may be included under the term. See on the subject of the ibis of the ancients, Savigny's Histoire naturelle et mythologique de l'Ibis (Paris, 1867, 8vo); and Cuvier's Mémoire sur l'Ibis des Anc. et Égyptiens (Ann. Mus. iv. 116).

3. <\textsl{cis} (צִּיס: וּנְעַרְשְׁפָּח, וּניִּבָּהוּד: <\textsl{bubo}, heroldius, nycticorax), the name of an unclean bird (Lev. xi. 17; Deut. xiv. 10); it occurs again in Ps. cii. 6. There is good reason for believing that the A. V. is correct in its rendering of "owl" or "little owl." Most of the old versions and paraphrases are in favor of some species of "owl" as the proper translation of <\textsl{cis}; Bochart is inclined to think that we should understand the pelican (Hieroz. iii. 17), the Hebrew <\textsl{cis} meaning a "cup," or "pouch." The pelican being so called from its membranous bill-pouch. He compares the Latin true, "a pelican," from truen, "a scoop" or "haile." But the ancient versions are against this theory, and there does not seem to be much doubt that <\textsl{na}th is the Hebrew name for the pelican. The passage in Ps. cii. 6, "I am like a pelican of the wilderness, I am like a <\textsl{cis} of ruined places," points decidedly to some kind of owl. Michaelis, who has devoted great attention to the elucidation of this word, has aptly compared one of the Arabic names for the owl, um elcharib ("mother of ruins"), in reference to the expression in the psalm just quoted (comp. Suppl. ad Lex. Heb. p. 1236, and Rosenmüller, Not. ad Hieroz. l. c.). Thus the context of the passage in the Psalms where the Hebrew word occurs, as well as the authority of the old versions, goes far to prove that an owl is intended by it. The וּנְעַרְשְׁפָּח of

Some of them evidently transposed (see Michaelis Suppl. i. 1249, and note); the order as given in Lev. xi is, therefore, to be taken as the standard.
the LXX, is no doubt a general term to denote the different species of *bubo* known in Egypt and Palestine; for Aristotle (H. R. vii. 14, § 6) tells us that *varkomphor* is identical with *fivxos*, evidently, from his description, one of the horned owls, perhaps either the *Oous vulpes*, or the *Oous unicolor*. The owl we figure is the *Oous unicolor*, the Egyptian and Asiatic representative of our great horned owl (*Bubo bubo*). Mr. Tristram says it swarms among the ruins of Thebes, and that he has been informed it is very abundant at Petra and Baalbec; it is the great owl of all eastern ruins, and may well therefore be the "owl of ruined places."

4. *Kippe* (κιππς; *kippe*; *crieis*) occurs only in Is. xxiv. 15: "There (i.e. in Edom) the *kippe* shall make her nest, and lay and hatch and gather under her shadow." It is a hopeless affair to attempt to identify the animal denoted by this word; the LXX. and Vulg. give "hedgehog," reading in doubt *kippe* instead of *kippe*, which variation six Hebrew MSS. exhibit (Michaelis, *Supp.* p. 2199). Various conjectures have been made with respect to the bird which ought to represent the Hebrew word, most of which, however, may be passed over as unworthy of consideration. We cannot think with Bochart (Hieros. iii. 194, &c.) that a darting serpent is intended (the *asor* of the Targ. and Jellali, and the *jeculae* of Lassen), for the whole context (Is. xxxiv. 16) seems to point to some bird, and it is certainly stretching the words very far to apply them to any kind of serpent. Bochart's argument rests entirely on the fact that the cognate Arabic, *kikbarn*, is used by Avicenna to denote some darting tree-serpent; but this theory, although supported by Gesenius, Fürst, Rosenmüller, and other high authorities, must be rejected as entirely at variance with the plain and literal meaning of the prophet's words; though incubation by reptiles was denied by Cuvier, and does not obtain amongst the various orders and families of this class as a general rule, yet some few excepted instances are on record, but "the gathering under the shadow" clearly must be understood of the act of a bird fostering her young under her wings; the *kippe*, moreover, is mentioned in the same verse with "vultures," (kites), so that there can be no doubt that some bird is intended.

See on this subject Bochart, Hieros. iii. 197; and for the supposed connection of *ske* with *akwmos*, see *Elian, Nat. Anim.* xv. 28; Pliny, x. 49; Establin, in *Obs. v.* 65; and Jacobs' annotations to *Elian, l. c.* We are content to believe that *kippe* may denote some species of owl, and to retain the reading of the A. V. till other evidence be forthcoming. The woodcut represents the *Athena merionitis*, the commonest owl in Palestine. Mount Olivet is one of its favorite resorts (Ib. ii. 26). Another common species of owl is the *Scops occidentalis*, it is often to be seen inhabiting the mosque of Omar at Jerusalem (see Tristram, in *Ib. ii. 26*).
OX (Heb. Ḥēded), an ancestor of Judith (Judg. xiii. 1).

B. F. W.

OX, the representative in the A. V. of several Hebrew words, the most important of which have been already noticed. [BULL; BULLOCK.]

We propose in this article to give a general review of what relates to the ox tribe (Bovicæ), so far as the subject has a Biblical interest. It will be convenient to consider (1) the ox in an economic point of view, and (2) its natural history.

1. There was no animal in the rural economy of the Israelites, or indeed in that of the ancient Orientals generally, that was held in higher esteem than the ox; and deservedly so, for the ox was the animal upon whose labor dependent all the ordinary operations of farming. Ploughing with horses was a thing never thought of in those days. Asses, indeed, were used for this purpose [Ass.]; but it was the ox upon whom devolved for the most part this important service. The pre-eminent value of the ox to "a nation of husbandmen like the Israelites," to use an expression of Michaelis in his article on this subject, will be at once evident from the Scriptural account of the various uses to which it was applied. Oxen were used for ploughing (Deut. xxii. 10; 1 Sam. xiv. 14; 1 K. xix. 19; Judg. xii. 16; Num. xxvi. 12); for treading corn (Ex. xiv. 9; Hos. x. 11; Mic. iv. 13; 1 Cor. ix. 9; 1 Tim. v. 18) [AGRICULTURE]; for draught purposes, when they were generally yoked in pairs (Num. vii. 3; 1 Sam. vi. 7; 2 Sam. vi. 6); as beasts of burden (1 Chr. xii. 40); their flesh was eaten (Deut. xiv. 4; 1 K. i. 9, 19; 24 xix. 21; Is. xxii. 13; Prov. xv. 17; Neh. x. 18); they were used in the sacrifices [Sacra]; the supply of milk to the shepherds, butter, etc. (Deut. xxii. 14; Is. vii. 22; 2 Sam. xvii. 2) [BUTTER; MILK].

Connected with the importance of oxen in the rural economy of the Jews is the strict code of laws which was mercifully enacted by God for their protection and preservation. The ox that threshed the corn was by no means to be muzzled; he was to enjoy the fruits of the Sycamore as well as the wheat (Ex. xxii. 12; Deut. v. 14); nor was this only, as Michaelis has observed, on the people's account, because beasts can perform no work without man's assistance, but it was for the good of the beasts "that thine ox and thine ass may rest."

The law which prohibited the slaughter of any clean animal, excepting as "an offering unto the Lord before the tabernacle," during the time that the Israelites abode in the wilderness (Lev. xvi. 1-6), although expressly designed to keep the people from idolatry, no doubt contributed to the preservation of their oxen and sheep, which they were not allowed to kill excepting in public. There can be little doubt that during the forty years' wandering oxen and sheep were rarely used as food, whence it was flesh that they so often tasted after. (See Michaelis, Lives of Moses, art. 163.)

It is not easy to determine whether the ancient Hebrews were in the habit of castrating their animals or not. The passage in Lev. xxiv. 24 may be read two ways, either as the A. V. renders it, or thus, "Ye shall not offer to the Lord that which is bruised," etc., "neither shall ye make it so in your land." Le Clerc believed that it would have been impossible to have used an uncastrated ox for agricultural purposes on account of the danger. Michaelis, on the other hand, who cites the express testimony of Josephus (Ant. iv. 8, § 40), argues that castration was wholly forbidden, and refers to the authority of Niebuhr (Deuer. de FARB, p. 81), who mentions the fact that Europeans use stallions for cavalry purposes. In the East, it is well known horses are as a rule not castrated. Michaelis observes (art. Bovis) that when people are accustomed to the management of uncastrated animals, it is far from being so dangerous as we from our experience are apt to imagine.

It seems clear from Prov. xv. 17, and 1 K. iv. 23, that cattle were sometimes stall-fed [Food], though as a general rule it is probable that they fed in the plains or on the hills of Palestine. That the Egyptians stall-fed cattle is evident from the illustrations on the monuments (see Wilkinson's Anc. Egypt., i. 27, ii. 49, et al. 1854). The cattle that grazed at large in the open country would not doubt often become fierce and wild, for it is to be remembered that in primitive times the lion and other wild beasts of prey roamed about Palestine. Hence, no doubt, the laws with regard to "goring" and the expression of "being wont to push with his horns" in time past (Ex. xxxi. 28, &c.); hence the force of the Psalmist's complaint of his enemies, "Many bulls have compassed me, the mighty ones of Bashan have beset me round" (Ps. xxii. 13). The habit of surrounding objects which excite their suspicion is very characteristic of half-wild cattle. See Mr. Culley's observations on the "Chillingham wild cattle," in Bell's British Quadrupeds (pir. 424).

2. The monuments of Egypt exhibit representations of a long-haired breed of ox, a short-haired, a polled, and what appears to be a variety of the zebu (Bos Indicus, Lin.). Some have identified this latter with the Bos Dante (the B. eug. p. 3004 a.) of Belon. The Abyssinian breed is depicted on the monuments of Thebes (see Anc. Egypt., i. 385), drawing a plough, or car. [CAI.] These cattle are white and black in clouds, low in the legs, with the horns hanging loose, forming small horned hooks nearly of equal thickness to the point, turning freely either way, and hanging against the cheeks" (see Hamilton Smith in Griffith's Asiat. King. iv. 425). The drawings on Egyptian monuments show that the cattle of ancient Egypt were the handsomest animals; doubtless these may be taken as a sample of the cattle of Palestine in ancient times. "The cattle of Egypt," says Col. H. Smith (Kitt's Cyclop. art. "Ox"), a high authority on the Laminaria, "continued to be remarkable for beauty for some ages after the Moslem conquest, for Abdallah the historian extols their bulk and proportions, and in particular mentions the Alexandrian breed for the abundance of the milk it furnished, and for the beauty of its curved horns." (See figures of Egyptian cattle under AGRICULTURE.) There are now fine cattle in Egypt; but the Palestine cattle appear to have deteriorated, in size at least, since Biblical times. "Herd of cattle," says Schneller (Ornith. Christian Spatdor, April, 1833), "are seldom to be seen; the bullock of the neighborhood of Jerusalem is small and insignificant; beef and veal are but rare delicacies. Yet the bullock thrives better, and is more frequently seen, in the upper valley of the Jordan, also on Mount Tabor and near Nazareth, but particularly east of the Jordan on the road from Jacob's bridge to Damascus." See also Thomson (Land and Book, p. 322), who observes (p. 325) that danger from being gored has not ceased; among the half-wild drives that range...
over the luxuriant pastures in certain parts of the country."

The buffalo (Bubalus bubalis) is not uncommon in Palestine; the Arabs call it jinna. Robinson (Bibl. Res. iii. 366) notices buffalo around the lake el-Huleh as being mingled with the neat cattle and applied in general to the same uses. They are a shy, ill-looking, ill-tempered animal. These animals love to wallow and lie for hours in water or mud, with barely the nostrils above the surface. It is doubted whether the domestic buffalo was known to the ancient people of Syria, Egypt, etc., the animal under consideration is the bhūnon, or tame buffaloes of India: and although now common in the West, Col. H. Smith is of opinion that it was not known in the Bible lands till after the Arabian conquest of Persia (A. D. 651). Robinson's remark, therefore, that the buffalo dollarance existed anciently in Palestine in a wild state, must be received with caution. [See further remarks on this subject under the article Oryx.]

The A. V. gives "wild ox" in Deut. xvi. 5, and "wild bull" in Is. li. 20, as the representatives of the Hebrew teror or tōr. Tuw or ṭōr (חֹרֶם, שְׁנֵר): ṭorah, στυκλα, ἅβαλή; ἀγ' and Symm., ὀφειρί: eugei. Among the beasts that were to be eaten is mentioned of the teror (Ὠγε ἱππουρ), as the animal denoted by the Hebrew words. Were it not for the fact that another Hebrew name (γαρεάς) seems to stand for this animal, we should have no hesitation in referring the ῥο ark to the antelope above named. Col. H. Smith suggests that the antelope he calls the Nebulon Ox (Οξύν αυτος), may be the animal intended; this, however, is probably only a variety of the other. Odemann (Jerrn. Summa, p. iv. 23) thinks the Baldwin (Alcepolus bulla) may be the ox; this is the Birkak-Awab of N. Africa mentioned by Pigafetta in Trav. i. 310, 380 col. The point must be left undetermined. See FALLOW DIER.

The grain used for fodder in the East (see above) is principally barley; only the poorest of the people eat this grain, and they only when wheat fails them. Oats are not cultivated in the East for fodder. There is a wild species of oryx which grows extensively as a weed in Syria, and is often plucked up with the Horsemum balbus and other tormenta, and fed as green fodder to the cattle, but it is never sown, and never threshed out. Its grain is small and lean, and would not be profitable as a crop. This species is called by the Arabs sa'farn (שַׁפְרֵת), or typa (typha), or typ (typ). Barley is the universal fodder of the Orientals. It is given mixed with the fine-cut straw of its own stalk from the threshing-floors, also with the straw of wheat. This latter is called mām (מַר). Barley is not used in the East for distilling purposes, as far as I know. I never saw native whiskey. The Arabic name for barber (sha'bir) is from the same root as the Hebrew, and undoubtedly refers to the long hair-like beards of the ripe ears.

E. L. P.

**OX-GOAD.** [Greek] OZEM (ΩΣΗΜ, ΕΣΗΜ, i. e. Osem [strength, power]). The name of two persons of the tribe of Judah. 1. (['Aṣārāi:Vat. Alex. Ασώρα: Asom.) The sixth son of Jesse, the next eldest after David (1 Chr. ii. 15). His name is not again mentioned in the Bible, nor do the Jewish traditions appear to contain anything concerning him. 2. (['Aṣārāi: Alex. Ασώρα: Asom.) Son of Jerameel, a chief man in the great family of Hezron (1 Chr. ii. 25).

**OZIÁS (ΟΣΙΑΣ):** [Vat. Sin. ΟΧΙΑΣ; and so Alex. vi. 15, 21, viii. 28, 35, xv. 41] Oziás. The son of Micaiah of the tribe of Simeon, one of the "governors" of Bethulia, in the history of Judith (Jud. vi. 15 [16, 21], vii. 23 [30], viii. 10, 29, 35 [xv. 4]). B. F. W.

2. [Vat. Oziás; Alex. Εξάς.] Uzzi, one of the ancestors of Ezra (2 Esdr. i. 2); also called Savius (1 Esdr. viii. 2). 3. [Lauch. Tisch. Treg. Σωτέριας.] Uzzi, King of Judah (Matt. i. 8, 9).

**OZIEL (ΟΣΙΑΛ):** [Vat. Sin. Alex. ΟΧΙΑΛΗ; Oziás], an ancestor of Judith (Jud. viii. 1). The name occurs frequently in O. T. under the form Οζιλάς.

**OZIN (ΟΣΙΝ) [harvest ears, autumnal]: AÇEVI: [Vat. ΑΣΟΪΝΙ; Alex. ΑΣΩΙΝΗ: Oziáni.] One of the sons of Gad (Num. xxvi. 16), called Ezias in Gen. xvi. 16, and founder of the family of the OZNITES (ΟΣΙΝΤΕΞ: as above): δησοί α ΄ΑÇEVI: [Vat. νετάι; Alex. δ ΑΣΑΤΕ: familia Oznitarum].

Num. xxvi. 16.

**OZORA (ΟΞΩΡΑ: [Abh. ΑΣΩΡΑ].). The sons of Machnedab, in Ezra x. 40, is corrupted into "the sons of Ozora" (1 Esdr. iii. 34).

**P.**

**PAARAI (3 syn.) (PAARAI: [perh. Jēroah reveals; First: Alex.] φαοάρι: [Comp. Φαοάρι: Pharai]. In the list of 2 Sam. xxvii. 35, "Paarai the Arbite" is one of David's mighty men. In 1 Chr. xi. 37, he is called "Naarai the son of Ezai," and this in Kennicott's opinion is the true reading (Dis. p. 200-211). The Vat. MS. [Rom.] omits the first letter of the name, and reads the other three with the following word, thus, apsar- oφη: [Vat. -αρη]. The Peshito-Syrac has "Gari of Europe," which makes it probable that "Naarai" is the true reading, and that the Syriac translator mistook 2 for 2.

**PAADAN (PADDAN) [source, field]: Mesopotamia μεσοποταμίας. Paddan-Aram (Gen. xxviii. 7).**

c The word following this — ΖΩΝΗΣ = A. V. Abbai,

Vulg. Abia, is in the LXX. rendered ὁφίλα "friend."
PADAN-ARAM [see below]: 

Mesoopotamia, Gen. xxi. 20, xxviii. 6. 7, xiii. 18; Gen. xxviii. 2. 5, xxi. 18; M. T. Prep. Gen. xxvi. 9, 26, xvi. 15; Alex. y. Gen. xxvii. 20, xxviii. 5, 7, xxi. 18; M. T. Prep. Gen. xxviii. 2, xiii. 18; Mesoopotamia, Gen. xxviii. 20, xxi. 18; M. Syria, Gen. xxviii. 2. 5, 6, xxi. 13, 18; xvi. 9, 13; Syria, Gen. xxviii. 15. By this name, more properly Padan-Aram, which signifies "the table-land of Aram" according to Furst and Ge-

senius, the Hebrews designated the tract of country which they otherwise called Aram-naharah, "Aram of the two rivers," the Greek Mesopotamia (Gen. xxiv. 10), and the field (A. V. country) of Aram" (Hos. xii. 12). The term was perhaps more especially applied to that portion which bordered on the Euphrates, to distinguish it from the mountainous districts in the N. and S. E. of Mesopotamia. Rashd a's note on Gen. xxvii. 20 is curious: 

"Because there were two Arams, Aram-naharah and Aram Zobah, he (the writer) calls it Padan-Aram; the expression 'yoke of oxen' is in the Targums שְׂרָיָה הָאָם, padən 'ām; and some interpret Padan-Aram as field of Aram,' because in the language of the Ishmaelites they call a field padhān" (At dānāh). In Syr. מֶשֶׁב, padhām, is used for a "plain" or "field," and both this and the Arabic word are probably from the root פָּדָה fādāh, "to plough," which seems akin to fidān, field, from findārē. If this etymology be true, Padan-Aram is the arable land of Syria; either an upland vale in the hills, or a fertile-district immediately at their feet (Stanley, S. y. p. 132, note). Padhān, the ploughed land, would thus correspond with the Lat. ornam, and is analogous to Eng. field, the filled land, from which the trees have been cleared.

Padu-Aram plays an important part in the early history of the Hebrews. The family of their founder had settled there, and were long looked upon as the ancestors of this race, with whom alone the legitimate descendants of Abraham might intermarry, and thus preserve the purity of their blood. Thither Abraham sent his faithful steward (Gen. xxiv. 10), after the news had reached him in his southern home at Beer-sheba that children had been born to his brother Nahor. From this family alone, the offspring of Nahor and Milcah, Abra-

ham's brother and niece, could a wife be sought for Isaac, the heir of promise (Gen. xxv. 20), and Jacob the inheritor of his blessing (Gen. xviii.).

It is elsewhere called Padan simply (Gen. xviii. 7).

* PADDLE is used in Deut. xxii. 13 (A. V.) in the sense of a "small spade" or "shovel." The term is still applied in provincial English to an instrument of this kind (also called paddle-staff), used by ploughmen for freeing the share from earth, "Thou shalt have a paddle upon thy oxen," in the passage above referred to, would be better translated, "Thou shalt have a small spade among thy implements" (in Schubel'sliche Gerätschaft, Bassen).

PADON [עֵדֶן [deliverance]; פָּדָה: Padhān). The ancestor of a family of Nethinim who returned with Zerubabel (Ezr. ii. 44; Neh. vii. 47). He is called Pahath-Moab in I Esdr. v. 29.

PAHETH-MOAB [חֵיתָן-מָאָב: Pahath-Moab.], "governor of Moab"). Head of one of the chief houses of the tribe of Judah. Of the individual or the occasion of his receiving so singular a name, nothing is known certainly, either as to the time when he lived, or the particular family to which he belonged. But as we read in 1 Chr. iv. 22, of a family of Shubenites, of the tribe of Judah, who in very early times "had dominion in Moab," it may be conjectured that this was the origin of the name. It is perhaps a slight corroboration of this conjecture that as we find in Ezr. ii. 6, that the sons of Pahath-Moab had among their number "children of Josiah," so also in 1 Chr. iv. we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1 Chr. ii. 54, iv. 14, we find the house of Josiah. It may further be conjectured that this dominion of the sons of Sheelah in Moab, had some connection with the migration of Elimelech and his sons into the country of Moab, as mentioned in the book of Ruth; nor should the close resemblance of the names מֵאָב (Orpah), 1 Chr. iv. 14, and מֵאָב (Orpah), Ruth i. 4, be overlooked. Jerome, indeed, following doubtless his Hebrew master, gives a mystical interpretation to the names in 1 Chr. iv. 22, and translates the strange word Josed-"hekem, "they returned to Lem" (Bethlehem). And the author of Quest. Heb. in Lib. Pirkei, "printing and writing," follows with the same meaning, and makes Josiah (qui stare solutus) to mean Eliaim, and the men of Chezelai (viri mendaci), Josiah and Saraph (securns et incolumus) to mean Mahlon and Chilion, who took wives (מֵאָב in Moab, and returned (i.e. Ruth and Naomi did) to the plentiful bread of Bethlehem (house of bread); interpretations which are so far worth noticing, as they point to ancient traditions connecting the migration of Elimelech and his sons with the Jewish dominion in Moab mentioned in 1 Chr. iv. 22. However, as regards the name Pahath-Moab, this early and obscure connection the families of Besheth and Moab, a son of Joshua, with Moab seems to supply a not improbable origin for the name itself, and to throw some glimmering upon the association of the children of Joshua and Josiah with the sons of Pahath-Moab. That this family was of high rank in the tribe of Judah we learn from their appearing fourth in order in the two lists, Ezr. ii. 6; Neh. vii. 11, and from their chief having signed second, among the Levites, in Neh. x. 14. It was also the most numerous (2818) of all the families specified, except the

a The resemblance between Leulath ([טֶלֶעַת ) and [טֶלֶעַת], an ancestor of Joshua (1 Chr. vii. 25), may be noted in connection with the mention of Jeshua, Ezr. ii. 6.

b 1 Sam. xxii. 3, may also be noticed in this connexion.
Benjamite house of Sennach (Neh. vii. 38). The name of the chief of the house of Pahath-Moab, in Nehemiah's time, was Hashub; and, in exact accordance with the numbers of his family, we find him repairing two portions of the wall of Jerusalem (Neh. iii. 5, 13). The name has also been noticed as slightly confirming the view of Pahath-Moab being a Shilohite family, that whereas in 1 Chr. ix. 5-7, Neh. xi. 5-7, we find the Benjamites in close juxtaposition with the Shilohites, so in the building of the wall, where each family built the portion over against their own habitation, we find Benjamin and Hashub the Pahath-Moabite coupled together (Neh. iii. 24). The only other notices of the family are found in Ezra v. 4, where 200 of its males are said to have accompanied Eliehoan, the son of Zeriahah, when he came up with Ezra from Babylon; and in Ezra x. 30, where eight of the sons of Pahath-Moab are named as having taken strange wives in the time of Ezra's government.

* PAT (ضار : פַּעֲרַפָּה : Pēhā, 1 Chr. i. 50, a town of Idumea. [PAL].

PAINT (as a cosmetic). The use of cosmetic dyes has prevailed in all ages in eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 342) and in Assyria (Layard's Ninevah, ii. 328); and in modern times no usage is more general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each instance it seems to have been used as a meretricious art, unworthy of a woman of high character. Thus Jezreel put her eyes in painting (2 K. ix. 30, margin); Jeremiah says of the harlot city, "Though thou paintest thy eyes with painting" (Jer. iv. 30); and Ezekiel again makes it a characteristic of a harlot (Ezxx. xxii. 40, comp. Joseph. B. J. iv. 9, § 31). The expressions used in these passages are worthy of observation, as referring to the mode in which the process was effected. It is thus described by Chandler (Travels, ii. 140): "A girl, closing one of her eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a sauce which had been immersed in the seed, and extracting it again, the particles before adhering to it remained within, and were presently ranged round the organ." The eyes were thus literally "put in paint," and were "rent" open in the process. A broad line was also drawn round the eye, as represented in the accompanying cut. The effect was an apparent enlargement of the eye; and the expression in Jer. iv. 30 has been by some understood in this sense (Tiss. Thes. p. 1229), which is without doubt admissible, and would harmonize with the observations of other writers (Juv. ii. 94, obliqui pingit oculos; Plin. Ep. vi. 2). The term used for the application of the dye was kiblech, a to smear; and Rabbinal writers described the point itself under a cognate term (Midr. Lekah Tikkun, 8, § 3). These words still survive in kohl, the modern oriental name for the powder used. [See note, vol. ii. p. 1391 (Amer. ed.).] The Bible gives no indication of the substance out of which the dye was formed. If any conclusion were deducible from the evident affinity between the Hebrew pāk, the Greek φιόρις, and the Latin fuscus, it would be to the effect that the dye was of a vegetable kind. Such a dye is at the present day produced from the henna plant (Lawsonia inermis), and is extensively applied to the hands and the hair (Russell's Athen., i. 109, 110). But the old versions (the LXX., Chaldee, Syrian, etc.) agree in pronouncing the dye to have been produced from antimony, the very name of which (ἀρίστα, stibium) probably owed its currency in the ancient world to this circumstance, the name itself and the application of the substance having both emanated from Egypt.1 Antimony is still used for the purpose in Arabia (Burchard's Travels, i. 376), and in Persia (Morier's Second Journey, p. 61), though lead is also used in the latter country (Russell, i. 366): but in Egypt the kohl is a spirit produced by burning either a kind of frankincense or the shells of almonds (Lane, i. 61). The dye-stuff was moistened with oil, and kept in a small jar, which we may infer to have been made of horn, from the proper name, Kerên-happuch, "horn for paint." (Job xiii. 14). The probe with which it was applied was made either of wood, silver, or ivory, and had a blunted point. Both the probe and the jar have frequently been discovered in Egyptian tombs (Wilkinson, ii. 343). In addition to the passages referring to eye-paint already quoted from the Bible, we may notice probable allusions to the practice in Prov. vi. 29, Ezek. xxvi. 9, and Is. li. 30, though the term rendered "wanton" in the last passage bearing the radical sense of painted. The contrast between the black paint and the white of the eye led to the transfer of the term pāk to describe the variegated stones used in the string courses of a handsome building (1 Chr. xxix. 2: A. V. "glistering stones," lit. stones of eye-paint); and again the dark cement in which marble or other bright stones were imbedded (Is. xi. 11: A. V. "I will lay thy stones with fair colors"). Whether the custom of staining the hands and feet, particularly the nails, now so prevalent in the East, was known to the Hebrews, is doubtful. The plant, bæna, which is used for that purpose, was certainly known (Cant. i. 11: A. V. "camphire"), and the expressions in Cant. v. 11 may possibly refer to the plant. [See.]

PALACE. There are few tasks more difficult or puzzling than the attempt to reconstruct an ancient

1 This mineral was imported into Egypt for the purpose. One of the pictures at Zen Hassam represents the arrival of a party of traders in a thalami. The bareness of the scene from antiquity has been always some essential to possess to have a beneficial effect on the eyesight (Plin. xxxiii. 34; Russell, i. 111: Lane, i. 61).
building of which we possess nothing but two verbal descriptions, and these difficulties are very much enhanced when one account is written in a language like Hebrew, the scientific terms in which are, from our ignorance, capable of the widest latitude of interpretation; and the other, though written in a language of which we have a more definite knowledge, was composed by a person who never could have seen the buildings he was describing.

Notwithstanding this, the palace which Solomom occupied himself in erecting during the thirteen years after he had finished the Temple is a building of such world-wide notoriety, that it cannot

be without interest to the Biblical student that those who have made a special study of the subject, and who are familiar with the arrangements of eastern palaces, should submit their ideas on the subject; and it is also important that our knowledge on this, as on all other matters connected with the Bible, should be brought down to the latest date. Almost all the restorations of this celebrated edifice which are found in earlier editions of the Bible are what may be called Vitruvian, namely, based on the principles of classical architecture, which were the only ones known to their authors. During the earlier part of this century attempts were made to introduce the principles of Egyptian design into these restorations, but with even less success. The Jews hated Egypt and all that it contained, and everything they did, or even thought, was antagonistic to the arts and

Fig. 1. Diagram Plan of Solomon's Palace.
feelings of that kind of bondage. On the other hand, the examination of the palaces of Nineveh, and the more careful examination of those at Perspolis, have thrown a flood of light on the subject. Many expressions which before were entirely unintelligible are now clear and easily understood, and, if we cannot yet explain everything, we know at least where to look for analogies, and what was the character, even if we cannot predicate the exact form, of the buildings in question.

The site of the Palace of Solomon was almost certainly in the city itself, on the brow opposite to the Temple, and overlooking it and the whole city of David. It is impossible, of course, to be at all certain what was either the form or the exact disposition of such a palace, but, as we have the dimensions of the three principal buildings given in the book of Kings, and confirmed by Josephus, we may, by taking these as a scale, ascertain pretty nearly that the building covered somewhere about 150,000 or 160,000 square feet. Less would not suffice for the accommodation specified, and more would not be justified, either from the accounts we have, or the dimensions of the city in which it was situated. Whether it was a square of 400 feet each way, or an oblong of about 550 feet by 300, as shown in the annexed diagram, must always be more or less a matter of conjecture. The form here adopted seems to suit better not only the exigencies of the site, but the known disposition of the palace.

The principal building situated within the Palace was, as in all eastern palaces, the great hall of state and audience; here called the "House of the Forest of Lebanon." Its dimensions were 100 cubits, or 150 feet long, by half that, or 75 feet, in width. According to the Bible (1 K. vii. 2) it had "four rows of cedar pillars with cedar beams upon the pillars," but it is added in the next verse that "it was covered with cedar above the beams that lay on 45 pillars, 15 in a row." This would be easily explicable if the description stopped there, and so Josephus took it. He evidently considered the hall, as he afterwards described the Stoa basilica of the Temple, as consisting of four rows of columns, three standing free, but the fourth built into the outer wall (Ist. xi. 5); and his expression, that the ceiling of the palace hall was in the Corinthian manner (Ist. vii. 5, § 2), does not mean that it was of that order, which was not then invented, but after the fashion of what was called in his day a Corinthian octas, namely, a hall with a clerestory. If we, like Josephus, are contented with these indications, the section of the hall was certainly as shown in fig. A. But the Bible goes on to say (ver. 4) that "there were windows in three rows, and light was against light in three ranks," and in the next verse it repeats, "and light was against light in three ranks." Josephus escapes the difficulty by saying it was lighted by "στήλαις πρότυποις," or by windows in three divisions, which might be taken as an extremely probable description if the Bible were not so very specific regarding it; and we must therefore adopt some such arrangement as that shown in figure B. Though other arrangements might be suggested, on the whole it appears probable that this is the one nearest the truth; as it admits of a clerestory, to which Josephus evidently refers, and shows the three rows of columns which the Bible description requires. Besides the clerestory there was probably a range of openings under the eaves of the walls, and then a range of open doorways, which would thus make the three openings required by the Bible description. In a hotter climate the first arrangement (fig. A) would be the more probable; but on a site so exposed and occasionally so cold as Jerusalem, it is scarcely likely that the great hall of the palace was permanently open even on one side.

Another difficulty in attempting to restore this hall arises from the number of pillars being unequal (15 in a row!); and if we adopt the last theory (fig. B), we have a row of columns in the centre both ways. The probability is that it was closed, as shown in the plan, by a wall at one end, which would give 15 spaces to the 15 pillars, and so provide a central space in the longer dimension of the hall in which the throne might have been placed. If the first theory be adopted, the throne may have stood either at the end, or in the centre of the longer side, but, judging from what we know of the arrangement of eastern palaces, we may be almost certain that the latter is the correct position. Next in importance to the building just described is the hall or porch of judgment (ver. 7), which Josephus distinctly tells us (Ist. vii 5, § 1) was situated opposite to the centre of the longer side of the great hall; an indication which may be admitted with less hesitation, as such a position is identical with that of a similar hall at Persepolis, from the above. "The new Palace must have been apart from the castle of David, and considerably below the level of the Temple-mount."

Fig. 2. Diagram Sections of the House of Cedars of Lebanon.

a. * This allusion to "the city of David" is based on the author's peculiar theory, which is set forth at length, and discredited, in article Jerusalem. Stanley suggests, with equal confidence, a different locality.

8. W.
and with the probable position of one at Khorsabad.

Its dimensions were 50 cubits, or 75 feet square (Josephus says 30 in one direction at least), and its disposition can easily be understood by comparing the descriptions we have with the remains of the Assyrian and Persian examples. It must have been supported by piles in the corner made three entrances; the principal opening from the street and facing the judgment-seat, a second from the court-yard of the palace, by which the counsellors and officers of state might come in, and a third from the palace, reserved for the king and his household as shown in the plan: (fig. 1, X).

The third edifice is merely called "the Porch." Its dimensions were 50 by 34 cubits, or 75 by 60 feet by 45. Josephus does not describe its architecture, and we are unable to understand the description contained in the Bible, owing apparently to our ignorance of the synonyms of the Hebrew architectural terms. Its use, however, cannot be considered as doubtful, as it was an indispensable adjunct to an Eastern palace. It was the ordinary place of audience of the king, and the reception-room — the Gueston Hall — where the king received ordinary visitors, and sat, except on great state occasions, to transact the business of the kingdom.

Behind this, we are told, was the inner court, adorned with gardens and fountains, and surrounded by choisters for shade; and besides this were other courts for the residence of the attendants and guards, and in Solomon's case, for the three hundred women of his harem: all of which are shown in the plan with more clearness than can be conveyed by a verbal description.

Apart from this palace, but attached, as Josephus tells us, to the Hall of Judgment, was the palace of Pharaoh's daughter — too proud and important a personage to be grouped with the ladies of the harem, and requiring a residence of her own.

There is still another building mentioned by Josephus, as a νός or temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have been outside, in front of the palace in the city; but more probably was, as shown in the plan, in the centre of the great court. It could not have been a temple in the ordinary sense: the term, as the Jews had only one temple; and it was situated on the other side of the valley; but it may have been an altar covered by a baldachino. This would equally meet the exigencies of the description as well as the probabilities of the case; and so it has been represented in the plan (fig. 1).

If the site and disposition of the palace were as above indicated, it would require two great portals: one leading from the city to the great court, shown at M; the other to the Temple and the king's garden, at N. This last was probably situated where the stairs then were which led up to the City of David, and where the bridge afterwards joined the Temple to the city and palace.

The recent discoveries at Nineveh have enabled us to understand many of the architectural details of this palace, which before they were nearly wholly inexplicable. We are told, for instance, that the walls of the halls of the palace were wainscoted with three tiers of stone, apparently variegated marbles, hewn and polished, and surmounted by a fourth course, elaborately carved with representations of foliage and flowers. Above this the walls were plastered and ornamented with colored arabesques. At Nineveh the walls were like these, wainscoted to a height of about eight feet, but with alabaster, a peculiar product of the country, and these were separated from the painted space above by an architectural band: the real difference being that the Assyrians revelled in sculptural representations of men and animals, as we now know from the sculptures brought home, as well as from the passage in Ezekiel (xxiii. 14) where he describes "men poured away on the wall, the images of the Chaldeans portrayed with vermilion," etc. These modes of decoration were forbidden to the Jews by the second commandment, given to them in consequence of their residence in Egypt and their consequent tendency to that multi-form idolatry. Some difference may also be due to the fact that the soft alabaster, though admirably suited to bassi-relievo, was not suited for sharp, deeply-cut foliage sculpture, like that described by Josephus; while, at the same time, the hard material used by the Jews might induce them to limit their ornamentation to one band only. It is probable, however, that a considerable amount of color was used in the decoration of these palaces, not only from the constant reference to gold and gilding in Solomon's buildings, and because that as a color could hardly be used alone, but also from such passages as the following: "Build me a wide house and large" — or through- aired — chambers, and cutteth out windows; and it is ceiled with ceder, and painted with vermillion" (Jer. xxiii. 14). It may also be added, that in the East all buildings, with scarcely an exception, are adorned with color internally, generally the three primitive colors used in all their intensity, but so balanced as to produce the most harmonious results.

Although incidental mention is made of other palaces at Jerusalem and elsewhere, they are all of subsequent ages, and built under the influence of Roman art, and therefore not so interesting to the Biblical student as this. Besides, none of them are anywhere so described as to enable their disposition or details to be made out with the same degree of clearness, and no instruction would be conveyed by merely reiterating the rhetorical flourishes in which Josephus indulges when describing them; and no other palace is described in the Bible itself so as to render its elucidation indispensable in such an article as the present.

J. F.

* PALACE in A. V., singular and plural, is the rendering of several words of diverse meaning:

- τάπεινος, 1 Chr. xxii. 1 al.; τάπεινος, 2 K. xv. 25 al.; ταπείνος, Am. iv. 3; τάπεινος, Ez. xxx. 4 al.; ταπείνος, 2 Chr. ix. 11 al.; ταπείνος, Dan. xi. 45; LXX. ἀίδος, Isa. xxxii. 11 al.; παλαις, Esth. ii. 13 al.; παλαι, Ps. xiv. 15 al.; έβραις, Lam. ii. 5 al.; έβραίω, [Φελ. Νε. i. 2]; έβραίω, [φελελ. i. 8]; έβραίω, [φελελ. ii. 5 al.; έβραίω, 1 K. xvi. 18; έβραίος, 1 K. xii. 1 al.; σαλαλίας, Ps. lxxx. 25; σαλαλήρας, Ps. cxxii. 7; σαλαλίας, Cant. viii. 9; γάζα, Jer. ix. 21; έμφωδα (pl.), Jer. xvii. 27 al.; έμφωδα, Dan. xi. 45; έμφωδα, Dan. viii. 4 al.; βαλσακίων, Isa. ii. 6; N. T., ανήλικος, Matt. xxvi. 58 al.; άπαντάδρων, Phil. i. 13 al.;

- On "Palace" in Phil. i. 13 (A. V.), see Judgment-seat [Amens. ed.], and Persia of the end of H.
It often designates the royal residence and usually suggests a fortress, or battlemented house—the rifted, as the most secure place, being commonly in eastern towns the abode of the ruler. The word occasionally (as in Esth. xii. 12) includes the city; and again (as in 1 K. xvi. 18) it is restricted to a part of the royal apartments. It is applied (as in 1 Chr. xiv. 4) to the Temple in Jerusalem. By "the palace which apprained to the house" (Neh. ii. 6) is probably meant the tower of Antonia adjacent to the Temple.

The Palace of Solomon, who "was building his own house thirteen years" (1 K. vii. 1), of which a conjectural restoration is attempted in the preceding article, must have stood on the high eastern brow of Zion, overlooking the Temple and the lower city. No site within the walls could have been more commanding, and the immense edifice, built of white stone and cedar-wood, must have been one of the most imposing. The Assyrian princes, according to Josephus, whose descriptions of the city have been mainly confirmed, erected a palace on the same site, adjoining the great bridge which spanned the Tyropoeon. It was also occupied as a royal residence by the Herodian family, and was enlarged by King Agrippa. Magnificent private residences were probably embraced in the edifices found in the Ptolomæi and the Prophets to the palaces of Zion. The massive foundations which have been uncovered, as the subterranean parts of the modern city have been explored, convey an impressive idea of the architectural solidity and grandeur of ancient Jerusalem.

PALESTINA and PALESTINE. These two forms occur in the A. V. but four times in all, always in poetical passages; the first, in Ex. xi. 14, and Is. xiv. 24, 31; the second, Joel iii. 4. In the first case the Hebrew is 7.7.7.7.7.5. Psalsheth, a word found, besides the above, only in Ps. lix. 8, lxxviii. 7, lxxvii. 4, and evii. 9, in all which our translators have rendered it by "Philistia" or "Palestine." The LXX. has in Ex. Palaisthia, but in Is. and Joel 61.61.61.61.61.61.61. The Vulg. in Ex. Philisthiu5, in 1. Philisthium, in Joel Philisthion. The apparent ambiguity in the different renderings of the A. V. is in reality no ambiguity at all, for at the date of that translation "Palestine" was synonymous with "Philistia." Thus Milton, with his usual accuracy in such points, mentions "Honan" as "Dreaded through the coast of Palestine, in Gath and Aseralon, And Averaron and Gana's frontier bounds";

(Psal. 88. 464.) and again as "That twice-battered god of Palestine":

(Hymn on Nat. 190)

—where if any proof be wanted that his meaning is restricted to Philistia, it will be found in the fact that he has previously connected other deities with the other parts of the Holy Land. See also, still more decisively, Samson xv. 14, 1093. But even without such evidence, the passages themselves show how our translators understood the word. Thus in Ex. xv. 14, "Palestine," Edom, Moab, and Canaan are mentioned as the nations alarmed at the approach of Israel. In Is. xiv. 29, 31, the prophet warns "Palestine" not to rejoice at the death of king Ahaz, who had subdued it. In Joel iii. 4, Thineia and "Palestine" are overheard with earnestness practised on Judah and Jerusalem.

Palestine, then, in the Authorized Version, really means nothing but Philistia. The original Hebrew word Palaistheth, which, as shown above, is elsewhere translated Philistia, to the Hebrews signified merely the long and broad strip of maritime plain inhabited by their encroaching neighbors. We shall see that they never applied the name to the whole country. An inscription of Jeshoh, king of Assyria (probably the Hal of Scripture), as deciphered by Sir H. Rawlinson, names "Palaisth in the Western Sea," and distinguishes it from Tyre, Damascus, Samaria, and Edom (Rawlinson's Herod., i. 467). In the same restricted sense it was probably employed—if employed at all—by the ancient Egyptians, in whose records at KarnaK the Palaisth has been deciphered in close connection with that of the Medinetum or Sjenep, possibly the Sidonians or Syrians (Birch, doubtfully, in Layard, Nineveh, ii. 407, note). Nor does it appear that at first it signified more to the Greeks. As lying next the sea, and as being also the high-road from Egypt to Phœnicia and the richer regions north of it, the Philistia plain became sooner known to the western world than the country further inland, and was called by them Syria Palestina — Συρία Παλαιστίνη — Philistia Syria. This name is first found in Herodotus (i. 103; ii. 104; iii. 5; vii. 80); and there can be little doubt that on each occasion he is speaking of the coast, and the coast only. (See also the testimony of Joseph. Ant. i. 6. § 2.) From thence it was in the largest sense; but it is somewhat remarkable that he says nothing whatever of the signification of the name. In France the original narrow signification has been retained. Thus ch. xxx. 40. Of Tolum's Treats of "Palestine, i.e. the plain which terminates the country of Syria on the west," and "commonly the whole country between the Mediterranean on the west, the mountains on the east, and the two lines, one drawn by Khân Youness and the other between Kaisaria and the rivulet of Yafa." It is thus used repeatedly by Napoleon I. in his dispatches and correspondence. See Oeuvres, de Napol., Nos. 1049, 4090, 4094, 4096.

In the second of these passages, he seems to extend it as far north as Reiat— if the sculptures of the Nahar el-Kath are the stele of Sesastis.
gradually extended to the country further inland, till in the Roman and later Greek authors, both heathen and Christian, it becomes the usual appellation for the whole country of the Jews, both west and east of Jordan. (See the citations of Reland, Pal. co. vii. viii.) Nor was its use confined to heathen writers; it even obtained among the Jews themselves. Josephus generally uses the name for the country and nation of the Philistines (Ant. xiii. 5, § 10; vi. 1, § 1, &c.), but on one or two occasions he employ it in the wider sense (Ant. i. 6, § 4; viii. 10, § 3; c. Ap. i. 22). So does Philo, De Abrah., and De Vit. Moïsa. It is even found in such thoroughly Jewish works as the Talmudic treatises Bereshith Rabba and Echo Rabba (Ierobam, p. 39); and it is worthy of notice how much the feeling of the nation must have degenerated before they could apply to the Promised Land the name of its bitterest enemies—the "uncircumcised Philistines." Jerome (cfr. A. D. 400) adheres to the ancient meaning of Palestine, which he restricts to Philis-tina (see Ep. ad Damasum, § 4; Comm. in Es'tian xiv. 29; in Amao i. 6).a So also does Ptolemy of Gaza (cfr. A. D. 510) in a curious passage on Gerar, in his comment on Chr. xiv. 14.

The word is now so commonly employed in our more familiar language to designate the whole country of Israel, that, although Biblically a misnomer, it has been chosen here as the most convenient heading under which to give a general description of the Holy Land, embracing those points which have not been treated under the separate headings of cities or tribes. This description will most conveniently divide itself into two sections:—

I. The Names applied to the country of Israel in the Bible and elsewhere.

II. The Land: its situation, aspect, climate, physical characteristics, in connection with its history: its structure, botany, and natural history.b

The history of the country is so fully given under its various headings throughout the work, that it is unnecessary to recapitulate it here.

1. THE NAMES.

PALESTINE, then, is designated in the Bible by more than one name:—

1. During the Patriarchal period, the Conquest, and the age of the Judges, and also where those early periods are referred to in the later literature (as Isa. cxv. 11; and Joseph. Ant. i. 7: 8; 20; v. 1, &c.), it is spoken of as "Canaan," or more frequently "the Land of Canaan," meaning thereby the country west of the Jordan, as opposed to "the Land of Gilead" on the east. [Canaan, Land of, vol. i. p. 351 f.] Other designations, during the same early period, are "the land of the Hebrews" (Gen. xl. 15 only—a natural phrase in the mouth of Joseph); the "land of the Hittites" (Jos. i. 4): a remarkable expression, occurring here only, in the Bible, though frequently used in the Egyptian records of Rameses II, in which Cheqa or Cheka appears to denote the whole country of Lower and Middle Syria. [Brugsch, Geogr. Inschrif. ii. 21. &c.] The name Tenev (i.e. Holy Land), which is found in the inscriptions of Rameses II. and Thothmes III., is believed by M. Brugsch to refer to Palestine (Bibl. 17). But this is contested by M. de Morgan (Rev. Archéologique, Sept. 1861, p. 216). The Phenicians appear to have applied the title Holy Land to their own country, and possibly also to Palestine at a very early date (Brugsch, p. 17). If this can be substantiated, it opens a new view to the Biblical student, inasmuch as it would seem to imply that the country had a reputation for sanctity before its connection with the Hebrews.

2. During the Monarchical name usually, though not frequently, employed, is "Land of Israel" (ת"ראה ת"ראה; 1 Sam. xii. 19; 2 K. v. 2, 4, vi. 23; 1 Chr. xxii. 2; 2 Chr. ii. 17). Of course this must not be confounded with the same appellation as applied to the northern kingdom only (2 Chr. xxx. 25; Ez. xxvii. 17). It is Ezekiel's favorite expression, though he commonly alters its form slightly, substituting ת"ראה ת"ראה for ת"ראה. The pious and lofty aspirations of Hoshea find vent in the expression "land of Jehovah" (Hos. ix. 3; comp. Is. bxi. 4, &c., and indeed Lev. xxv. 23, &c.). In Zechariah it is "the holy land" (Zech. ii. 12); and in Daniel "the glorious land" (Dan. xiv. 41). In Amos (i. 10) alone it is "the land of the Amorite;" perhaps with a glance at Deut. i. 7. Occasionally it appears to be mentioned simply as the Land (see Gen. iv. 21; Josh. xv. 27; 1 Mac. xiv. 4; Luke iv. 25, and perhaps even xxiii. 44). The later Jewish writers are fond of this title, of which several examples will be found in Reland, Pal. chap. v.

3. Between the Captivity and the time of our Lord, the name "Judah" had extended itself from the southern portion to the whole of the country, even that beyond Jordan (Matt. xiv. 1; Mark x. 1; Joseph. Ant. ix. 14, § 1; xii. 4, § 11). In the book of Judith it is applied to the portion between the

a In his Epit. Pauian (§ 8) he extends the region of the Philistines as far north as Dor, close under Mount Carmel. We have seen above that Herodotus extends Palestine to Beirut. Cæsarea was anciently entitled C. Pelamia, in order to distinguish it from other towns of the same name, and it would seem to be even still called Kepariyey Elisin by the Arabs (see note to Burekhardt, Sicilia, p. 387, July 15; also Schultens, Itiner. Geogr. "Cæsarea"). Kanishah, 10 miles east of Jaffa, retains in the time of Hak-nahchi the same appx (see Asher's B. of Tudele, ii. 452). He identifies the latter with Bath-Gath.

b The reader will observe that the botany and natural history have been treated by Dr. Hooker and the Rev. W. Houghton. The paper of the former distinguished botanist derives a peculiar value from the fact that he had visited Palestine.

c * For Mr. Grove's explanation of this apparently
PALESTINE

plain of Esdraelon and Samaria (xi. 19), as it is in Luke xxiii. 5; though it is also used in the stricter sense of Judaea proper (John iv. 3, vii. 1), that is, the most southern of the three main divisions west of Jordan. In this narrower sense it is employed throughout 1 Macc. (see especially ix. 56, x. 30, 38, xi. 34).

In the Epistle to the Hebrews (xi. 9) we find Palestinian spoken of as the land of promise;* and in 2 Esdr. xiv. 31, it is called the land of Sion.†

4. The Roman division of the country hardly coincided with the Biblical one, and it does not appear that the Romans had any distinct name for that which we understand by Palestine. The province of Syria, established by Pompey, of which Scipio was the first governor (quaestor propraetor) in 62 B.C., seems to have embraced the whole seaboard from the Bay of Issus (Istrodrarum) to Egypt, as far back as it was habitable, that is, up to the desert which forms the background to the whole district. "Judaea" in their phrase appears to have signified so much of this country as intervened between Idumaea on the south, and the territories of the numerous free cities, on the north and west, which were established with the establishment of the province—such as Seuthopolis, Seleucia, Joppa, Azotus, etc. (Dict. of Geog. ii. 1077). The district east of the Jordan, lying between it and the desert—at least so much of it as was not covered by the lands of Pella, Gadara, Canatha, Philadelphiea, and other free towns—was called Persea.

5. Soon after the Christian era, we find the name Palæstina in possession of the country. Podenna (A.D. 161) thus applies it (Geog. x. 16). "The arbitrary divisions of Palæstina Prima, Secunda, and Tertia, settled at the end of the 4th or beginning of the 5th cent. (see the quotations from the Cod. Theodos. in Euch. p. 265), are still observed in the documents of the Eastern Church" (Dict. of Geog. ii. 533 a). Palæstina Tertia, of which Petra was the capital, was howsoever out of the Biblical limits; and the portions of Persea not comprised in Pal. Secunda were counted as in Arabia.

6. Josephus usually employs the ancient name 'Canaan' in reference to the events of the earlier history, but when speaking of the country in reference to his own time styles it Judæa (Ant. i. 6, § 2, &c.); though as that was the Roman name for the southern province, it is sometimes (e.g. R. J. i. 1 § 1; iii. 3 § 5 b) difficult to ascertain whether he is using it in its wider or narrower sense. In the narrower sense he certainly does often employ it (e.g. Ant. v. 1 § 22; R. J. iii. 3 § 4 5 a). Nicolaus of Damascus applies the name to the whole country (Joseph. Ant. i. 7 § 2).

The Talmudists and other Jewish writers use the title of the "Land of Israel." As the Greeks styled all other nations but their own Barbarian, so the Rabbis divide the whole world into two parts—the Land of Israel, and the regions outside it.‡

7. The name most frequently used throughout the Middle Ages, and down to our own time, is Terra Sancta—the Holy Land. In the long list of Travels and Treatises given by B Iter (Erklande, Judas 161–55), Robinson (Bibl. Res. ii. 544–555), and Bonar (Land of Promise, pp. 517–535), it predominates far beyond any other appellation. Quaresimus, in his Elucidatio Terrae Sanctae (i. 9, 10), after enumerating the various names above mentioned, concludes by adding seven reasons why that which he has embodied in the title of his own work, "though of later date than the rest, yet in excellence and dignity surpasses them all," closing with the words of Pope Urban II. addressed to the Council of Clermont: Quam terrae merito Sanctam dicimus, in qua non est eam passus pelis quam non illuminaverit et sanctificaverit vel corpus vel anima Sion procuravit, vel gloriam persequutur Sanctae Dei gentium, vel complectehus Apostolicae commentum, vel martyrem cibantes sanctissimam effusi.

II. THE LAND.

The Holy Land is not in size or physical characteristics proportioned to its moral and historical position, as the theatre of the most momentous events in the world's history. It is but a strip of country, about the size of Wales, less than 140 miles in length, and barely 46° in average breadth, on the very frontier of the East, hemmed in between the Mediterranean Sea on the one hand, and the enormous chasm of the Jordan Valley on the other, by which it is effectually cut off from the mainland of Asia behind it. On the north it is shut in by the high ranges of Lebanon and Anti-Lebanon, and by the chasm of the Líbán, which runs at their feet and forms the main drain of their southern slopes. On the south it is less enclosed by the arid and inhospitable deserts of the upper part of the peninsula of Sinai, whose undulating wastes melt imperceptibly into the southern hills of Judaea.

1. Its position on the Map of the World—as the world was when the Holy Land first made its appearance in history—is a remarkable one.

(1.) It is on the very outport—on the extremest western edge of the East, pushed forward, as it were, by the huge continent of Asia, which almost seems to have rejected and cut off from communication with itself this tiny strip, by the broad and impassable desert interposed between it and the vast tracts of Mesopotamia and Arabia in its rear. On the shore of the Mediterranean it stands, as if it had advanced as far as possible toward the West—toward that New World which in the fullness

---

* This very ambiguity is a sign (notwithstanding all that Josephus says of the population and importance of Galilee) that the southern province was by far the most important part of the country. It conferred its name on the whole.

† See the citations in Othen, Lex. Bibb. "Isrælita Regio," and the Itineraries of Benjamin; Perchi; Isaac ben Chelb, in Carmoly; etc.

‡ The latitude of Ñamas, the ancient Dan, is 33° 16'; and that of Beer-sheba 31° 10'; thus the distance between these two points—the one at the north, the other at the south—is 2 degrees, 120 geogr. or 139 English miles.

§ The breadth of the country at Gaza, from the shore of the Mediterranean to that of the Dead Sea, is 48 geogr. miles, while at the latitude of the Líbán from the coast to the Jordan it is 20. The average of the breadths between these two parallels, taken at each half degree, gives 34 geogr. miles, or just 40 English miles.

The latitude of the Líbán (or Kasimíyeh) differs but slightly from that of Banas. Its mouth is given by Van de Velde (Memor, p. 56) at 33° 20'.
of time it was so mightily to affect; separated
therefrom by at that which, when the time arrived,
proved to be no barrier, but the readiest medium
of communication — the wide waters of the "Great
Sea." Thus it was open to all the gradual influ-
ences of the rising powers of the West, while it
was saved from the retrogression and decepti-

city which have ultimately been the doom of all purely
western states whose connections were limited to the
East only. And when at last its ruin was
effected, and the nation of Israel driven from its
home, it transferred without obstacle the result of
its long training to those regions of the West with
which in virtue of its position it was in ready com-

munication.

(2) There was, however, one channel, and but
one, by which it could reach and be reached by
the great oriental empires. The only road by which
the two great rivals of the ancient world could ap-

proach one another — by which alone Egypt could
get to Assyria, and Assyria to Egypt — lay along
the broad flat strip of coast which formed the
marine portion of the country, and thence by the
Plain of the Lebanon to the Euphrates. True, this
road did not, as we shall see, lie actually through
the country, but at the foot of the highlands which
virtually composed the Holy Land; still the pro-

ximity was too close not to be full of danger; and
though the catastrophe was postponed for many
centuries, yet, when it actually arrived, it arrived
through this channel.

(3) After this the Holy Land became (like the
Netherlands in Europe) the convenient arena on
which in successive ages the hostile powers who
contended for the empire of the East, fought their
battles. Here the Seleucidas routed, or were routed
by, the Ptolemies; here the Romans vanquished the
Parthians, the Persians, and the Jews them-
selves; and here the armies of France, England,
and Germany, fought the hosts of Saladin.

2. It is essentially a mountainous country. Not
that it contains independent mountain chains, as in
Greece, for example, dividing one region from an-
other, with extensive valleys or plains between and
among them — but that every part of the highland
is in greater or less undulation. From its station
in the north, the range of Lebanon pushes forth
beyond the plains of Phoenicia — a succession of
ranges, some of which crowd one another more or
less thickly over the face of the country to its extreme
south limit. But it is not only a mountainous country. It
contains in combination with its mountains a remark-
able arrangement of plains, such as few other countries
can show, which indeed form its chief peculiarity,
and have had an equal, if not a more important bear-
ing on its history than its mountains themselves.
The mass of hills which occupies the centre of the
country is bordered or framed on both sides, east
and west, by a broad belt of lowland, sunk deep

below its own level. The slopes or cliffs which form,
as it were, the retaining walls of this depression,
are furrowed and cleft by the torrent beds which
discharge the waters of the hills, and form the
means of communication between the upper and
lower levels. On the west and south sides whole
mountains, and the sea, and is the
Plain of Philistia and of Sharon. On the east it is
the broad bottom of the Jordan Valley deep
down in which rushes the one river of Palestine to
its grave in the Dead Sea.

3. Such is the first general impression of the
physiognomy of the Holy Land. It is a physi-
gnomy compounded of the three main features
already named — the plains, the highland hills, and
the torrent beds: features which are marked in the
words of its earliest describers (Num. xii. 29; Jos.
xi. 16, xii. 8), and which must be compre-

hended by every one who wishes to understand
the country, and the intimate connection existing
between its structure and its history. In the ac-
companying sketch-map an attempt has been made
to exhibit these features with greater distinctness
than is usual, or perhaps possible, in maps con-

taining more detail.

On a nearer view we shall discover some traits
not observed at first, which add sensibly to the
expression of this interesting countenance. About
half-way up the coast the maritime plain is sud-
ddenly interrupted by a long ridge thrown out from
the central mass, rising considerably above the
general level, and terminating in a bold promon-
tory on the very edge of the Mediterranean.
This ridge is Mount Carmel. On its upper side, the
plain, as if to compensate for its temporary dis-
placement, invades the centre of the country and
forms an undulating hollow right across it from
the Mediterranean to the Jordan Valley. This cen-
tral lowland, which divides with its broad depres-
sion the mountains of Ephraim from the moun-
tains of Galilee, is the plain of Esdraelon or Jos-
reel, the great battle-field of Palestine. North of
Carmel the lowland resumes its position by the sea-
side till it is again interrupted and finally put an
end to by the northern mountains which push
their way out to the sea, ending in the white promon-
tory of the Ras Nokkara. Above this is the
province of the Lebanon, an ancient and magni-
cent range, running north and south, and

waving hills, line beyond line, as far as my eye could
reach, monotonous in their aspect, and entirely desti-
tute of trees . . . . The far-flamed Tweed ap-
ppeared a lake or a forest, and I was still at a mis-
centred on it yet (what is even more applicable to the Holy Land)
such had been the magic web thrown over the whole,
that it had a greater charm than the richest scenery
east . . . .

The main ridge of Carmel is between 1,700 and
1,800 feet high. The hills of Samaria immediately to
the S. E. of it are only about 1,100 feet (Van de Veld.
Memoir, 177, 178).
1. Zidon
2. Tyre
3. Dan
4. Tiberias
5. Tabor
6. Carmel
7. Samaria
8. Shechem
9. Jerusalem
10. Bethlehem
11. Hebron
The impression thus produced is materially assisted by the transparent clearness of the air and the exceeding brightness of the light, by which objects that in our duller atmosphere would be invisible from each other or thrown into dim distance are made distinctly visible, and thus appear to be much nearer together than they really are.

The northern portion is Galilee; the centre, Samaria; the south, Judaea. This is the Land of Canaan which was bestowed on Abraham; the covenant was conditional; this distribution and a half remained on the uplands beyond Jordan, instead of advancing to take their portion with the rest within its circumscription of defense; but that act appears to have formed no part of the original plan. It arose out of an accidental circumstance, —the abundance of cattle which they had acquired during their stay in Egypt, or during the transit through the wilderness, — and its result was, that the tribes in question soon ceased to have any close connection with the others, or to form any virtual part of the nation. But even this definition might without impropriety be further circumscribed; for during the greater part of the O. T. times the chief events of the history were confined to the district south of Esdraelon, which contained the city of Hebron, Jerusalem, Bethel, Shiloh, Shechem, and Samaria, the Mount of Olives, and the Mount Carmel. The battles of the Conquest are the early struggles of the era of the Judges once passed, Galilee subsided into obscurity and insignificance till the time of Christ.

5. Small as the Holy Land is on the map, and when contrasted either with modern states or with the two enormous ancient empires of Egypt and Assyria between which it lay, it seems even smaller to the traveller as he pursues his way through it. The long solid purple wall of the Moab and Gilead mountains, which is always in sight, and forms the background to almost every view to the eastward, is perceptually reminding him that the confines of the country in that direction are close at hand. There are numerous eminences in the highlands which command the view of both frontiers at the same time; the eastern mountains of Gilead with the Jordan, at their feet on the one hand, and on the other the Western Sea, b with its line of white sand and its blue expanse. Hermon, the apex of the country on the north, is said to have been seen from the southern end of the Dead Sea: it is certainly plain enough, from many a point nearer the centre. It is startling to find that from the top of the hills of Nebi Samwil, Bethel, Tabor, Gerizim, or Safed, the eye can embrace at one glance, and almost without turning the head, such opposite points as the Lake of Galilee and the Bay of Akka, the farthest mountains of the Hauran and the long ridge of Carmel, the ravine of the Jabbock, or the green windings of Jordan, and the sand-hills of Jaffa.

a * "The whole area of the land of Palestine," says Dr. Robinson, "does not vary greatly from 12,000 geographical square miles,—about equal to the area of the two States of Massachusetts and Connecticut together. Of this whole area, more than one half, or about 7,000 square miles, being by far the most important portion, lies on the west of the Jordan. . . . . . . Only from that land has gone forth to other nations and to modern times all the true knowledge which exists of God, of his revelation of a future state, and of man's redemption through Jesus Christ. Compared with this distinction, the splendor and learning and fame of Egypt, Greece, and Rome fade away; and the traces of their influence upon the world become as the footprints of the traveller upon the sands of the desert." (Phys. Geogr. of the Holy Land, pp. 2, 18.)

b The same word is used in Hebrew for "sea" and for "west."

c The altitudes are those given by Van de Velde, after much comparison and investigation, in his Mem. (pp. 170-173). [For the Lebanon summits, see Bib. Sacra, xxxiii. 352.]

d For the watershed see Ritter, Erdkunde, Jordan, pp. 474-498. His heights have been somewhat modified by more recent observations, for which see Van de Velde's Mem. [For the watershed see Ritter, Erdkunde, Jordan, pp. 474-498. His heights have been somewhat modified by more recent observations, for which see Van de Velde's Mem.]

e Except in the immediate neighborhood of the Plain of Esdraelon, and in the extreme north — where the drainage, instead of being to the Mediterranean...
around Nablus, the ramifications of that extensive system of valleys which combine to form the Wady Férarah—one of the main feeders of the central Jordan—interlace and cross by many miles those of the Wady Shair, whose principal arm is the Valley of Belch, while the rest of its waters into the Mediterranean at Nahar Férarah.

7. The valleys on the two sides of the watershed differ considerably in character. Those on the east—owing to the extraordinary depth of the Jordan Valley into which they plunge, and also to the fact already mentioned, that the watershed lies rather on that side of the highlands, thus making the fall more abrupt—are exceedingly steep and precipitous. This is the case during the whole length of the southern and middle portions of the country. The precipitous descent between Olivet and Jericho, with which all travellers in the Holy Land are acquainted, is a type, and by no means an unfair type, of the eastern passes, from Zacarirah and Ain-jilä to the south to Wady Bidad on the north. It is only when the junction between the Plain of Esdranlon and the Jordan Valley is reached, that the slopes become gradual and the ground fit for the maneuvers of anything but detached bodies of foot soldiers. But, rugged and difficult as they are, they form the only access to the upper country from this side, and every man or body of men who reached the territory of Judah, Benjamin, or Ephraim from the Jordan Valley, must have climbed one or other of them. The Ammonites and Moabites, who at some remote date left such lasting traces of their presence in the names of Chephar Ha-Ammoni and Michmash, and the Israelites pressing forward to the relief of Gibeon and the slaughter of Beth-horon, doubtless entered alike through the great Wady Férarah already spoken of. The Moabites, Edomites, and Moabites swarmed up to their attack on Judah through the cresses of Ain-jilä (2 Chr. xx. 12, 16). The pass of Adamím was in the days of our Lord—what it still is—the regular route between Jericho and Jerusalem. By it Pompey advanced with his army when he took the city.

8. The western valleys are more gradual in their slope. The level of the external plain on this side is higher, and therefore the fall less, while at the same time the distance to be traversed is much greater. Thus the length of the Wady Belch already mentioned, from its remotest head at Twi-yilä to the point at which it emerges on the Plain of Sharon, may be taken as 20 to 25 miles, with a total difference of level during that distance of perhaps 1,800 feet, while the Wady el-Ajih, which falls from the other side of Twi-yilä into the Jordan, has a distance of barely 10 miles to reach the Jordan Valley, at the same time falling not less than 2,800 feet.

Here again the valleys are the only means of communication between the lowland and the highland. From Jaffa and the central part of the plain there are two of these roads—going up to Jerusalem: the one to the right by Ramleh and the Wady Alî; the other to the left by Lydias, and then, instead of taking a direct route to the Holy City through the passes of the mountains, turned northwards over the plain and took the road from Ramleh to Bethelmeleh (Nahar), that is, the ordinary approach from Jaffa to Jerusalem; a circuit of at least four days' journey by Elia, Sisitria, the story is true as to the same, the dislike of Orientals to fight in the open field, and their power of determined resistance when intradedge behind fortifications.

b Richard I., when intending to attack Jerusalem, moved from Aescalon to Blanche Garde (Styré, or Tell es-Šéfi), on the edge of the mountains of Judah; and there, instead of taking a direct route to the Holy City through the passes of the mountains, turned northwinds over the plain and took the road from Ramleh to Bethelmeleh (Nahar), that is, the ordinary approach from Jaffa to Jerusalem; a circuit of at least four days' journey by Elia, Sisitria, the story is true as to the same, the dislike of Orientals to fight in the open field, and their power of determined resistance when intradedge behind fortifications. The Egyptians, kings, from Ramses II. and Thothmes III. to Pharaoh Necho, were in the constant habit of pursuing this route during their expeditions against the Chatti, or Hittites, in
the north of Syria; and the two last-named monarchs a fought battles at Megiddo, without, as far as b we know, having taken the trouble to penetrate into the interior of the country. The Pharaoh who was Solomon's contemporary came up the Philistine plain as far as Gezer (probably about Rimleh), and besieged and destroyed it, without leaving any impression of unaequity in the annals of that later conqueror-monarch. e e Saul, however, besieged Ashdod in the Philistine plain for the extraordinary period of twenty-nine years (Herod. ii. 157) ; during a portion of that time an Assyrian army probably occupied part of the same c district, endeavoring to relieve the town. The battles must have been frequent; and yet the only reference to these events in the Bible is the mention of the Assyrian general by Isaiah (xi. 1), in so casual a manner as to lead irre sistibly to the conclusion that neither Egyptians nor Assyrians had come up into the highland. This is illustrated by Napoleon's campaigns in Palestine. He entered it from Egypt by el-Arish, and after overrunning the whole of the lowland, and taking Gaza, Jaffa, Ramleh, and the other places on the plain, he writes to the sheriffs of Nablus and Jerusalem, announcing that he has no intention of making war against them (Corresp. de N. p., No. 4,029, "19 Ventose, 1799"). To use his own words, the highland country "did not lie within his base of operations; c and it would have been a waste of time, or worse, to ascend thither.

In the later days of the Jewish nation, and during the Crusades, Jerusalem became the great object of contest; and then the battle-field of the country, which had originally been Esdraelon, was transferred to the maritime plain at the foot of the passes communicating most directly with the capital. Here Judas Maccabaeus achieved some of his greatest triumphs: and here some of Herod's most decisive actions were fought; and Blanchegarde, Ascalon, Jaffa, and Beitnuba (the Betenemole of the Crusading historian), still shine with the brightest rays of the valor of Richard the First. While the highlands of the country are more closely examined, a considerable difference will be found to exist in the natural condition and appearance of their different portions. The south, being nearer the arid desert, and farther removed from the drainage of the mountains, is drier and less productive than the north. The tract below Hebron, which forms the link between the hills of Judah and the desert, was known to the ancient Hebrews by a term originally derived from its dryness (Negeb). This was the south country. It contained the territory which Caleb bestowed on his daughter, and which he had afterwards to endow specially with the "upper and lower springs" of a less parched locality (Josh. xv. 19). Here lived Nabal, so chary of his "water" (1 Sam. xxv. 11); and here may well have been the scene of the composition of the 39th Psalm d — the "dry and thirsty land where no water is." As the traveller advances north from this tract there is an improvement; but perhaps no country equally cultivated is more monotonous, bare, or unininviting in its character. The aspect of the country as it passes from Judah and Benjamin during the largest portion of the year. The spring covers even those bold gray rocks with verdure and color, and fills the ravines with torrents of rushing water; but in summer and autumn the look of the country from Hebron up to Bethel is very dreary and desolate. The flowers, which for a few weeks give so brilliant e and varied a hue to whole districts, wither and vanish before the first fierce rays of the sun of summer: they are "to-day in the field — to-morrow cast into the oven." Rounded f hills of moderate height fill up the view on every side, their coarse gray stone continually discovering itself through the thin coating of soil, and hardly distinguishable from the remains of the ancient terraces which run round them with the regularity of contour lines, or from the confused heaps of ruin which occupy the site of former village or fortress. On some of the hills the terraces have been repaired or reconstructed, and these contain plantations of olives or figs, sometimes with and sometimes without vineyards, surrounded by rough stone walls, and with the watch-towers at the corners, so familiar to us from the parables of the Old and New Testaments. Others have a shaggy covering of oak bushes in clumps. There are traditions that in former times the road between Bethel and Hebron was lined with large trees; but all that now remains of them are the large oak roots which are embedded in the rocky soil, and are dug up by the peasants for fuel (Miss Beaufort, ii. 124). The valleys of demunition which divide these monotonous hills are also planted with figs or olives, but oftener cultivated with corn or dounro, the long reed-like stalks of which remain on the stony ground till the next seed-time, and give a singularly dry and slovenly look to the fields. The general absence of fences in the valleys does not render them less desolate to an English eye, and where a fence is now and then encountered, it is either a stone wall trodden down and dilapidated, or a hedge of the prickly-pear cactus, gaunt, irregular, and ugly, without being picturesque. Often the track rises and falls for miles together over the edges of the white strata upturned into almost a vertical h position; or over sheets of bare rock spread out like flag-stones, i and marked with fissures which have all the regularity of artificial joints; or along narrow channels, through which the feet

a For Thothmes' engagement at Megiddo, see De Rouge's illustration of a monument recently discovered at Thebes, in the Revue Archéologique, 1861, p. 384, &c. For Pharaoh Necho, see 2 K. xxiii. 29.

b The identification of Megiddo, coinciding as it does with the statements of the Bible, is tolerably certain. When the great plain is spoken of, much evidence is said of the other names in these lists. Not only does the agreement of the names appear doubtful, but the lists, as now deciphered, present an amount of confusion — places in the north being jumbled up with those in the south, which gives a constant suspicion.

c Is. xx. 1, as explained by Gesenius, and by Rawson (ii. 242, note).

d This Psalm is also referred to the hot and waterless road of the deep descent to Jericho and the Jordan. See Oliver, Mount of, p. 2243 s.

e Stanley (S. & P. p. 130) — not prone to exaggerate color (comp. 57, "Petra") — speaks of it as "a blaze of scarlet."

f "Rounded swelling masses like huge bubbles." — e seen by Mr. Seddon the painter (p. 122), "Each one uglier than its neighbor" (Miss Beaufort, ii. 97). See also the description of Russegger the geologist, in Bitter, Jordan, p. 496.

g "Often looking as if burnt in the kiln." (Ander- son, ii. 179.)
h As at Beitur (Beth-horon).
i As south of Beitin (Bethel), and many other places.
of centuries of travellers have with difficulty retained their hold on the steep declivities; or down flights of irregular steps hewn or worn in the solid rock of the ravine, and strewn thick with immemorial boughless stones. Even the gray villages — always on the top of the rocky summits where they are not but add to the dreariness of the scene by the forlorn look which their thatched roofs and absence of windows present to a European eye, and by the poverty and ruin so universal among them. At Jerusalem this reaches its climax, and in the leaden ash hue which overspreads, for the major part of the year, much of the landscape immediately contiguous to the city, and which may well be owing to the desert," its successive demolitions, there is something unappeasingly affecting. The solitude which reigns throughout most of these hills and valleys is also very striking. "For miles and miles there is often no appearance of life except the occasional goat-herd on the hill-side, or gathering of women at the wells."

To the west and northwest of the highlands, where the sea-breazes are felt, there is considerably more vegetation. The Wady es-Sunnat derives its name from the acacias which line its sides. In the same neighborhood olives abound, and give the country "almost a wooded appearance" (Ioh. ii. 21, 22). The dark generous foliage of the battle, or terebinth, is frequent; and one of these trees, perhaps the largest in Palestine, stands a few minutes' ride from the ancient Sareh (ibid. 222). Almost ten miles north of this, near the site of the ancient Kirjath-jeirmim, the "city of forests," are some thickets of pine (sider), and laurel (kibdib), which Toldt compares with European woods (Sitt Wannenter, p. 178).

11. Hitherto we have spoken of the central and northern portions of Judaea. Its eastern portion — a tract some 9 or 10 miles in width by about 35 in length — which intervenes between the centre and the abrupt descent to the Dead Sea, is far more wild and desolate, and that not for a portion of the year only, but throughout it. This must have been always what it is now — an uninhabited desert, because uninhabitable: "a bare arid wilderness; an endless succession of shapeless yellow and ash-colored hills, without grass or shrubs, without water, and almost without life," — even without ruins, with the rare exceptions of Masada, and a solitary watch-tower or two.

12. No descriptive sketch of this part of the country can be complete which does not allude to the caverns, characteristic of all limestone districts, but here existing in astonishing numbers. Every hill and ravine is pierced with them, some very large and of curious formation — perhaps partly natural, partly artificial — others mere grottoes. Many of them are connected with most important and interesting events of the ancient history of the country. Especially is this true of the district now under consideration. Machpehah, Makkedah, Adulam, En-gedi, names inseparably connected with the lives, adventures, and deaths of Abraham, Joshua, David, and other Old Testament worthies, are the peculiar centres of the topography of Judaea. Moreover, there is perhaps hardly one of these caverns, however small, which has not at some time or other furnished a hiding-place to some ancient Hebrew from the sweeping incursions of Philistia or Amalekite. For the bearing which the present treatment of many of the caverns has on the modern religious aspect of Palestine, and for the remarkable symbol which they furnish of the life of Israel, the reader must be referred to a striking passage in Simi and Palestine (ch. ii. x. 3). [CAYE.]

13. The barrenness and dryness which prevails more or less in Judaea is owing partly to the absence of wood (see below), partly to its proximity to the desert, and partly to a scarcity of water, arising from its distance from the Lebanon. The abundant springs which form so delightful a feature of the country further north, and many of which continue to flow even after the hottest summers, are here very rarely met with after the rainy season is over, and their place is but poorly supplied by the wells, themselves but few in number, bored down into the white rock of the universal substratum, and with mouths so narrow and so carefully closed that they may be easily passed without notice by travellers unaccustomed to the country. [WILLS.] 14. But to this discouraging aspect there are happily some important exceptions. The valley of Ufref, south of Bethlehem, contains springs which in abundance and excellence rival even those of Nablus; the huge "Pools of Solomon" are enough to supply a district for many miles round them; and the cultivation now going on in that neighborhood shows what might be done with a soil which requires only irrigation and a moderate amount of labor to evoke a boundless produce. At Bethlehem and Mor Elpis, too, and in the neighborhood of the Convent of the Cross, and especially near Hebron, there are excellent examples of what can be done with vineyards, and plantations of olives and fig trees. And it must not be forgotten that during the limited time when the plains and bottoms are covered with waving crops of green or golden corn, and when the naked rocks are shrouded in that brilliant covering of flowers to which allusion has already been made, the appearance of things must be far more inviting than it is during that greater portion of the year which follows after the harvest, and which, as being the more habitual aspect of the scene, has been dwelt upon above.

15. It is obvious that in the ancient days of the nation, when Judah and Benjamin possessed the

---

Mrs. Seddon: "A wilderness of mountains-tops, in some places tossed up like waves of mud, in others wrinkled over like ravines, like mounds made of crumpled brown paper, the nearer ones whitish, strewn with rocks and bushes" (M-moor, p. 294).

There is no adequate provision here or elsewhere for the maintenance of the pasture, except perhaps in Jerusalem for catching and preserving the water which falls in the heavy rains of winter and spring, — a provision easily made, and found to answer admirably in countries similarly circumstanced, such as Malta and Bermuda, where the rains furnish almost the whole water supply.
PALESTINE

For the character which distinguishes the naked cliffs of the wadies Suweinit and Kelt, of the Amjidi or Zwcrivah, and have become wider and shallower, swelling out here and there into basins, and containing much land under cultivation more or less regular. Fine streams run through many of these valleys, in which a considerable body of water is found even after the hottest and longest summers, their basins hidden by a fringe of shrubbery and other flowering trees, truly a delicious sight, and one most rarely seen to the south of Jerusalem, or within many miles to the north of it. The mountains, though bare of wood and but partially cultivated, have none of that arid, worn look which renders those east of Hebron, and even those between Mukhmas and Jericho, so repulsive. In fact, the eastern district of the Jebel Nablus contains some of the most fertile and valuable spots in Palestine. 4

19. Hardly less rich is the extensive region which lies northwest of the city of Nablus, between it and Carmel, in which the mountains gradually break down into the Plain of Sharon. This has been very imperfectly explored, but it is spoken of as extremely fertile — huge fields of corn, with occasional tracts of wood, recalling the country of Kent — but mostly a continued expanse of sloping downs.

20. But with all its richness, and all its advance on the southern part of the country, there is a strange dearth of natural wood about this central district. Olive-trees are indeed to be found everywhere, but they are artificially cultivated for their fruit, and the olive is not a tree which adds to the look of a landscape. A few carobs are also met with in such richer spots as the Valley of Nablus. But of all natural non-fruit-bearing trees there is a singular dearth. It is this which makes the wooded sides of Carmel and the park-like scenery of the adjacent slopes and plains so remarkable. True, when compared with European timber, the trees are but small, but their abundance is in strong contrast with the absolute dearth of wood in the unhappy mountains of Cappadocia, which is always mentioned by the ancient prophets and poets as remarkable for its luxuriance; and, as there is no reason to believe that it has changed its character, we have, in the expressions referred to, pretty conclusive evidence that the look of the adjoining district rises the gentle hills which bear the ruins of Jerusalem and Bethaem. 5
trict of Ephraim was not very different then from what it is now.
21. No sooner, however, is the Plain of Esdra-
mon passed, than a considerable improvement is
perceptible. The low hills which spread down
from the mountains of Galilee, and form the bar-
rier between the plains of Akka and Esdraelon, are
covered with timber, of moderate age. It is true,
but of thick, vigorous growth, and pleasant to
the eye. Eastward of these hills rises the round mass
of Tabor, dark with its copse of oak, and set off
by contrast with the bare slopes of Jebel ed-Dukh
(the so-called "Little Hermon") and the white
hills of Nazareth. North of Tabor and Nazareth
is the plain of el-Duffoff, an upland tract hitherto
very imperfectly described, but apparently of a
similar nature to Esdraelon, though much more
elevated. It runs from east to west, in which di-
rection it is perhaps ten miles long, by two miles
wide at its broadest part. It is described as
extremely fertile, and abounding in vegetation.
Beyond this the amount of natural growth increases
at every step, until towards the north the country
becomes what even in the West would be considered
as well timbered. The centre part — the watershed
between the upper end of the Jordan Valley on the
one hand, and the Mediterranean on the other, is
a succession of swelling hills, covered with oak and
terebinth, its occasional ravines thinly clothed
in addition with maple, alrnutus, sumach, and other
trees. So abundant is the timber that large quan-
tities of it are regularly carried to the sea-coast at
Tyre, and there shipped as fuel to the towns on the
coast (Rob. ii. 459). The general level of the
country is not quite equal to that of Judaea and
Samaria, but on the other hand there are points
which reach a greater elevation than anything in
the south, such as the prominent group of Jebel
Jarmuk, and perhaps Tabor — and which have
all the greater effect from the surrounding country
being lower. "Tabor" lies about the centre of the
district, and as far north as this the valleys run
east and west of the water-shed, but above it they run
northwards into the Liitang, which cleaves the coun-
try from east to west, and forms the northern border
of the district, and indeed of the Holy Land itself.
22. The notices of this romantic district in the
Bible are but scanty; in fact, till the date of the New
Testament it it had acquired the name of Galilee, it may be said, for all purposes of
history, to be hardly mentioned. And even in the
New Testament times the interest is confined to a
very small portion — the south and southwest cor-
er, containing Nazareth, Tana, and Nain, on the
coasts of Esdraelon, Caeremon, Tiberias, and
Gamasaer, on the margin of the Lakes.
In the great Roman conquest, or rather destruction
of Galilee, which preceded the fall of Jerusa-
lem, the contest penetrated but a short distance
into the interior. Jotapata and Tarsis — neither of them more than 12 miles from the Lake — are the
farthest points to which we know of the strug-
gle extending in that woodel and impervious distric.
One of the earliest accounts we possess describes it as a land "quiet and secure" (Judeg.
xxii. 27). There is no thoroughfare through it, nor any inducement to make one. May there not
be, retired in the recesses of these woody hills and
magnificent valleys, many a village whose inhabitants
have lived on from age to age, undisturbed by the
invasions and depopulations with which Israelites,
Assyrians, Romans, and Moslems have successively
visited and occupied the open and accessible parts of the
country?
23. From the present appearance of this district
we may, with some allowances, perhaps gain an
idea of what the more southern portions of the
central highlands were during the earlier periods
in the history. There is little material difference
in the natural conditions of the two regions. Gal-
ilee is slightly nearer the springs and the cool
breezes of the snow-covered Lebanon, and further
distant from the hot siroccos of the southern des-
certs, and the volcanic nature of a portion of its
soil is more favorable to vegetation than the chalk
of Judaea; but these circumstances, though they
would tell to a certain degree, would not produce
any very marked differences in the appearance of
the country provided other conditions were alike.
It therefore seems fair to believe that the hills of
Shechem, Bethel, and Hebron, when Abram first
wandered over them, were not very inferior to those
of the Belid Basharfat or the Belid ed-Buttff. The
timber was probably smaller, but the oak-
groves 4 of Morch. Mamre. Tabor; must have con-
sisted of large trees; and the narrative implies that the "forests" or "woods" of Hureh, Ziph, and
Bethel were more than mere scrub.
24. The causes of the present barrenness of the
face of the country are two, which indeed can
hardly be separated. The first is the destruction
of the timber in that long series of sieges and in-
vasions which began with the invasion of Shishak
(2 Chron. xvii. 19) and has not yet come to an end.
This, by depriving the soil and the streams of shel-
ter from the burning sun, at once made, as it in-
variably does, the climate more arid than before,
and doubtless diminished the rainfall. The second is the decay of the terraces necessary to retain the
soil on the steep slopes of the round hills. This
decay is owing to the general unsettlement and in-
security which have been the lot of this poor little
country almost ever since the Babylonian conquest.
These terraces once gone, there was nothing to pre-
vent the soil which they supported being washed
away by the heavy rains of winter; and it is hope-
less to look for a renewal of the wood, or for any
real improvement in the general face of the coun-
try, until they have been first re-established.
This cannot happen to any extent until a just and firm
government shall give confidence to the inhab-

a The descriptions of Mt. Tabor, dim as they are,
belong to the Old Testament: for there can be very
little doubt that it was no more the scene of the
passage over Jordan than the "Mount of Olives" was. (Heng-

b In the Authorized Version rendered inaccurately
"plain.")

c Tabor (1 Sam. x. 3) has no connection with the
mount of the same name.

"Mourn, Amor" et. Tabor.
accessibility had been the object of its builders. And indeed such was its object. These groups of naked, forlorn structures, piled irregularly one over the other on the curve of the hill-top, their rectangular outlines, flat roofs, and blank walls, suggestive to the western mind rather of fastness than of occupation; were in all probability built by thriftless heaps of the rubbish of centuries, approached only by the narrow, winding path, worn white, on the gray or brown breast of the hill — are the linear descendants, if indeed they do not sometimes contain the actual remains, of the "fenced cities, great and walled up to heaven," which are so frequently mentioned in the records of the Israelite conquest. They bear witness now, no less surely than they did even in that early age, and as they have done through all the ravages and conquests of thirty centuries, to the insecurity of the country — to the continual risk of sudden plunder and destruction incurred by those rash enough to take up their dwelling in the plain. Another and hardly less valid reason for the practice is furnished in the terms of our Lord's well-known apologue, — namely, the tremendous nature of the loose alluvial "sand" of the plain under the sudden rush of the winter torrents from the neighboring hills, as compared with the safety and firm foundation attainable by building on the naked "rock" of the hills themselves (Matt. vii. 24—27).

20. These hill-towns were not what gave the Israelites their main difficulty in the occupation of the country. Wherever strength of area and flatness of foot was available, there those hardy warriors, fierce as lions, sudden and swift as eagles, sure-footed and fleet as the wild deer on the hills (1 Chr. xii. 8; 2 Sam. i. 23, ii. 18), easily conquered. It was in the plain, where the horses and chariots of the Canaanites and Philistines had space to manoeuvre, that they failed in dislodging the aborigines. "Judah drove out the inhabitants of the mountain, but could not drive out the inhabitants of the valley, because they had chariots of iron . . . neither could Manasseh drive out the inhabitants of Beth-shean . . . nor Meqido," in the plain of Esdraelon . . . "nor could Ephraim drive out the Canaanites that dwelt in Gezer," on the maritime plain near Kedesh . . . "nor could Asher drive out the inhabitants of Acclanta, for the children of Dan had entered into the mountain, for they would not suffer them to come down into the valley" (Judg. i. 19—23). Thus in this case the ordinary conditions of conquest were reversed — the conquerors took the hills, the conquered kept the plains. To a people so exclusive as the Jews there must have been a constant satisfaction in the elevation and inaccessibility of their highland regions. This is evident in every page of their literature, which is tinged throughout with a highland coloring. The "mountains" were to "bring peace," the "little hills, justice to the people!" when plenty came, the corn was to flourish on the "top of the mountains" (Ps. lxxii. 3, 16). In like manner the mountains were to be joyful before Jehovah when He came to judge his people (xxvii. 8). What gave its keenest sting to the Babylonian conquest, was the consideration that the "mountains of Israel," the "ancient high places," were to be become a "desolate ruin." The prophecy was, indeed, one of the most joyful circumstances of the restoration; it is, that the mountains shall yield their fruit as before, and be settled after their old estates" (Ez. xxxvi. 1, 8, 11). But it is needless to multiply instances of this, which pervades the writings of the psalmists and prophets in a truly remarkable manner, and must be familiar to every student of the Bible. (See the citations in S. P. p. ch. ii. viii.) Nor was it unacknowledged by the surrounding heathen. We have their own testimony that in their estimation Jehovah was the "God of the mountains" (1 K. xx. 28), and they showed their appreciation of the fact by fighting (as already noticed), when possible, in the lowlands. The contrast is strongly brought out in the repeated aspersion of the psalmists. "Surely, like the Canaanites and Philistines of the lowlands, put their trust in chariots and some in horses; but we — we mountaineers, from our "sanctuary" on the heights of Zion — "will remember the name of Jehovah our God," "the God of Jacob our father," the shepherd-warrior, whose only weapons were sword and bow — the God who is now a high fortress for us — "at whose command both chariot and horse are fallen," "who burneth the chariots in the fire" (Ps. xx. 1, 7, lxi. 7—11, lxxvi. 2, 6).

27. But the hills were occupied by other edifices besides the "fenced cities." The tiny white domes which stand perched here and there on the summits of the eminences, and mark the holy ground in which some Mohammedan saint is resting — sometimes standing alone, sometimes near the village in either case surrounded with a rude inclosure, and overshadowed with the grateful shade and pleasant color of terebinth or carob — these are the successors of the "high places" or sanctuaries so constantly denounced by the prophets, and which were set up "on every high hill and under every green tree" (Jer. ii. 20; Ez. vi. 13).

28. From the mountainsome structure of the Holy Land and the extraordinary variations in the level of its different districts arises a peculiarity most interesting and most characteristic — namely, the extensive views of the country which can be obtained from various commanding points. The number of prominent places which present themselves to the traveller in Palestine is truly remarkable. To speak of the west of Jordan only, for east of it all is at present more or less unknown — the prospects from the heights of Nebo, the peaks of Geba, the heights of Jericho, the Mount of Olives, from Nebi Samwil, from Bethel, from Gerizim or Ebal, from Jerin, Carmel, Tabor, Safed, the Castle of Banias, the Kubbet en-Nasr above Damascus — are known to many travellers. Their peculiar charm resides in the

country which, in its natural and artificial features, preserved the marks of ancient past and fritter away on one of the western slopes of the Jebel Nabi, and described high up beside the road from Jaffa to Nebi: and War or Mar, on the absolute top of the lofty peaked hill, at the foot of which the spring of Jacob would flow for T. Barrow, ed., and thinks that if the word "mount" be omitted, the phrase "mount of Beatitudes (Korâna Hattin). The rock has no article. H.

a Two such may be named as types of the rest, — Kerret, Keret (the ancient Gaba or Gibla) perched on one of the western spur of the Jebel Nebi, and described high up beside the road from Jaffa to Nebi; and War or Mar, on the absolute top of the lofty peaked hill, at the foot of which the spring of Jacob would flow for T. Barrow, ed., and thinks that if the word "mount" be omitted, the phrase "mount of Beatitudes (Korâna Hattin). The rock has no article. H.

b Robinson, Bib. Rev. i. 400.
PALESTINE

their wide extent, the number of spots historically remarkable which are visible at once, the limpid clearness of the air, which brings the most distant objects comparatively close, and the consideration that in many cases thebest must be standing on the same ground, and the eyes resting on the same spots which have been stood upon and gazed at by the most famous patriarchs, prophets, and heroes, of all the successive ages in the eventful history of the country. We can stand where Abraham and Lot stood looking down from Bethel into the Jordan Valley, when Lot chose to go to Sodom and the great destiny of the Hebrew people was fixed forever; or with Abraham on the height near Hebron gazing over the gulf towards Sodom at the vast column of smoke as it towered aloft tinged with the rising sun, and wondering whether his kinsman had escaped; or with Gaa the son of Eled on Terezia when he watched the armed men steal along like the shadow of the mountains on the plain of the Makkas; or with Deborah and Barak on Mount Tabor when they saw the hosts of the Canaanites marching to their doom on the undulations of Esdraelon; or with Elisa on Carmel looking across the wide space towards Shchem, and recognizing the bereaved mother as she urged her course over the flat before him; or, in later times, with Mohammed on the heights above Damascus, when he put by an earthly for a heavenly paradise; or with Richard Cœur de Lion on Nebi Samwil when he refused to look at the towers of the Holy City, in the deliverance of which he could take no part. These we can see; but the most famous and the most extensive of all we cannot see. The view of Bahana from Pisgah, and the view of Moses from the same spot, we cannot realize, because the locality of Pisgah is not yet accessible. [Yet see Addition to Neo lic.]

These views are a feature in which Palestine is perhaps approached by no other country, certainly by no country whose history is at all equal in importance to the world. Great as is their claim we cannot view as more landscapes, their deep and abiding interest lies in their intimate connection with the history and the remarkable manner in which they corroborate its statements. By its constant reference to localities—mountain, rock, plain, river, tree—the Bible seems to invite examination; and, indeed, it is only by such examination that we can appreciate its minute accuracy and realize how far its plain matter-of-fact statements of actual occurrences, to actual persons, in actual places—how far these raise its records above the unredeemed and unconnected rhapsodies, and the vain repititions, of the sacred books of other religions.

29. A few words must be said in general description of the mountain-land, which it will be remembered intervenes between the sea and the highlands, and of which detailed accounts will be found under the heads of its great divisions.

This region, only slightly elevated above the level of the Mediterranean, extends with interruption from Jaffa, south of Gaza, to Mount Carmel. It naturally divides itself into two portions, each of about half its length: the lower one the wider; the upper one the narrower. The lower half is the Plain of the Philistines—Philistia, or, as the Hebrews called it, the Shephelah or lowland. [SHEPHELIA.] The upper half is the Sharon or Saron of the Old and New Testaments, the "Forest country" of Josephus and the LXX. (Josephus, Ant. xiv. 15, § 3; 1.XX. 11. lv. 10). [SHARON.] Viewed from the sea this maritime region appears as a long, low coast of white or cream-colored sand, its slight undulations rising occasionally into mounds or cliffs, which in one or two places, such as Jaffa and Um-Knabel, almost aspire to the dignity of headlands. Over these white undulations, in the farthest background, stretches the faint blue line of the highlands of Judaea and Samaria.

30. Such is its appearance from without. But from within, when traversed, or overlooked from some point on those blue hills, such as Belzur or Bet-netif, the prospect is very different. The Philistine Plain is on an average fifteen or sixteen miles in width from the coast to the first beginning of the belt of hills, which forms the gradual transition to the highland of the mountains of Judah. This district of interior hills contains many places which have been identified with those named in the lists of the Conquest as being in the plain, and it was therefore probably attached originally to the plain, and not to the highland. It is described by modern travellers as a beautiful open country, consisting of low calcareous hills rising from the alluvial soil of broad arable valley, covered with inhabited villages and deserted ruins, and clothed with much natural shrubbery and with large plantations of olives in a high state of cultivation; the whole gradually broadening down into the wide expanse of the plain itself. The plain is in many parts almost a dead level, in others gently undulating in long waves; here and there low mounds or hillocks, each crowned with its village, and more rarely still a hill overtopping the rest, like Tell es-Saigh or Jiftan, the seat of some fortress of Jewish or Crusading times. The larger towns, as Gaza and Ashdod, which stand near the shore, are surrounded with large groves of olive, sycamore, and palm, as in the days of King David (1 Chr. xxvii. 28)—some of them among the most extensive in the country. The whole plain appears to consist of a brown heavy soil, light, but rich, and almost without a stone. This is noted as its characteristic in a remarkable expression of one of the leaders in the Maccabean wars, a great part of which were fought in this locality (1 Macc. x. 73). It is to this absence of stone that the disappearance of its ancient towns and villages—so much more complete than in other parts of the country—is due. The country is overgrown with brick, made, after the Egyptian fashion, of the sandy loam of the plain mixed with stubble, and this has been washed away in almost all cases by the rains of successive centuries (Thomson, p. 565). It is now, as it was when the Philistines possessed

a Stanley, N. S. §§ pp. 218, 219.

b Nothing can be more instructive than to compare a regard to this one only of the many points in which they differ the Bible with the Koran. So little as certainable connection has the Koran with the life or career of Mohammed, that it seems impossible to arrange it with any certainty in the order, real or pretended, of its composition. With the Bible, on the other hand, each book belongs to a certain period. It describes the persons of that period; the places under the names which they then bore, and with many a name of identity by which they can often now be still recognized, almost without exaggeration, to be the best Handbook to Palestine.

c Robinson, Bib. Res. ii. 15, 29, 32, 228.
it, one enormous cornfield; an ocean of wheat covers the wide expanse between the hills and the sand dunes of the sea-shore, without interruption of any kind — no break or hedge, hardly even a single olive-tree (Thomson, p. 552; Van de Vloge, ii. 172). Its fertility is marvelous; for the prodigious crops which it raises are produced, and probably have been produced almost year by year for the last 40 centuries, without any of the appliances which we find necessary for success — with no manure beyond that naturally supplied by the washing down of the hill-torrents — without irrigation, with the scarce remaining crops, and with only the rudest method of husbandry. No wonder that the Jews struggled hard to get, and the Philistines to keep such a prize: no wonder that the hosts of Egypt and Assyria were content to traverse and re-traverse a region where their supplies of corn were so abundant and so easily obtained.

The southern part of the Philistine Plain, in the neighborhood of Beth Horon, appears to have been conquered as late as the sixth century, with a forest, called the Forest of Gezer; but of this no traces are known now to exist (Procopius of Gaza, Scholion on 2 Chr. xiv.).

31. The Plain of Sharon is much narrower than Philistia. It is about ten miles wide from the sea to the foot of the mountains, which are here of a more abrupt character than those of Philistia, and without the intermediate hilly region there occurring. At the same time it is more undulating and irregular than the former, and crossed by streams from the central hills, some of them of considerable size, and containing water during the whole year. Owing to the general level of the surface and to the accumulation of sand on the shore, several of these streams spread out into wide marshes, which might without difficulty be turned to purposes of irrigation, but in their present neglected state form large bogy places. The soil is extremely rich, varying from bright red to deep black, and producing enormous crops of weeds or grain, as the case may be. Here and there, on the margins of the streams or the borders of the marshes, are large tracts of rank meadow, where many a herd of camels or cattle may be seen feeding, as the royal herd did in the time of David (1 Chr. xxvii. 21).

At its northern end Sharon is narrowed by the low hills which gather round the western flanks of Carmel, and gradually encroach upon it until it terminates entirely against the shoulder of the mountain itself, leaving only a narrow beach at the foot of the promontory by which to communicate with the plain on the north.

32. The tract of which the sand already mentioned as forming the line of the whole coast, is gradually encroaching on this magnificent region. In the south it has buried Askelon, and in the north between Caesarea and Jaffa the dunes are said to be as much as three miles wide and 300 feet high. The obstruction which is thus caused to the outflow of the streams has been already noticed. All along the edge of Sharon there are pools and marshes almost everywhere. In the closed plain the wind is covered by a stunted growth of maritime pines, the descendants of the forests which at the Christian era gave its name to this portion of the Plain, and which seem to have existed as late as the second Crusade (Vincent in Chron. of Crus.). It is probable, for the reasons already stated, that the Jews never permanently occupied more than a small portion of this rich and favored region. Its principal towns were, it is true, allotted to the different tribes (Josh. xv. 45-47; xvi. 3, Gezer xvii. 11, Dor, etc.): but this was in anticipation of the intended conquest (xiii. 3-6). The five cities of the Philistines remained in their possession (1 Sam. v., xxi. 10, xxvii.); and the district was regarded as one independent of and apart from Israel (xxvii. 3; 1 K. ii. 59; 2 K. vii. 2). In the case of the remaining towns, the neighboring Canaanites (Judg. i. 27), and Gezer in the hands of the Philistines till taken from them in Solomon's time by his father-in-law (1 K. ix. 16). We find that towards the end of the monarchy the tribe of Benjamin was in possession of Lydda, Jcinza, Ono, and other places in the plain ( Neh. xi. 35; 2 Chr. xxviii. 18); but it was only by a gradual process of extension from their native hills, in the rough ground of which they were safe from the attack of cavalry and chariots. But, though the Jews never had any hold on the region, it had its own population, and towns probably not inferior to any in Syria. Both Gaza and Askelon had regular ports (naviume); and there is evidence to show that they were very important and very large long before the fall of the Jewish monarchy (Ren- rick, Pleanuric, pp. 27-29). Ashdod, though on the open plain, resisted for 29 years the attack of the whole Egyptian force: a similar attack to that which reduced Jerusalem without a blow (2 Chr. xii.), and was sufficient on another occasion to destroy it after a siege of a year and a half, even when fortified by the works of a score of successive monarchs (2 K. xxv. 1-5).

33. In the Roman times this region was considered the pride of the country (B. J. i. 240, § 9), and some of the most important cities of the province stood in it — Caesarea, Antipatris, Diospolis. The one ancient port of the Jews, the "beautiful" city of Joppa, occupied a position central between the Shekherah and Sharon. Roads led from these various cities to each other, to Jerusaleln, Neapolis, and Sebaste in the interior, and to Tophen and Gaza on the north and south. The commerce of Damascus, and, beyond Damascus, of Persia and India, passed this way to Egypt, Rome, and the infant colonies of the west; and that traffic and the constant movement of troops backwards and forwards must have made this plain one of the busiest and most populous regions of Syria at the time of Christ. Aor, Caesarea is a wave-washed ruin; Antipatris has vanished both in name and substance; Diospolis has shaken off the population which it bore in the days of its prosperity, and is a mere village, remarkable only for the ruin of its fine medieval church, and for the palm-grove which shrouds it from view. Joppa alone maintains a dull life, surviving solely because it is the nearest point at which the sea-going travellers from the west can approach Jerusalem. For a few miles above Joppa the coast is extremely indented, and the fear of the Belonians who roam (as they always have roamed) over parts of the plain, plundering all passers-by, and extorting black mail from the wretched peasants, has desolated a large district, they filled the Plain of Edrelelon, and overflowed into Sharon, and thence southwards to the richest prize of the day.

b The Belonians from beyond Jordan, whom Gilione repulsed, destroyed the earth "as far as Gaza"; ÿ i.e. PALESTINE

PALESTINE 2297
and effectively prevents it being used any longer as the route for travellers from south to north; while in the portions which are free from this scourge, the thinning soil itself is doomed to unproductive desolation by the initial of its Turkish rulers, whose exactions have driven, and are driving, its industrious and patient inhabitants to render parts of the land.

34. The characteristics already described are hardly peculiar to Palestine. Her hilly surface and general height, her rocky ground and thin soil, her torrent-like quick and dry for the greater part of the year, even her belt of waterless lowland — these she shares with other lands, though it would perhaps be difficult to find them united elsewhere. But there is one feature, as yet only alluded to, in which she stands alone. This feature is the Jordan — the one River of the country.

35. Properly to comprehend this, we must cast our eyes for a few moments north and south, outside the narrow limits of the Holy Land. From top to bottom — from north to south — from Anti-och to Akaba at the tip of the eastern horn of the Red Sea, Syria is cleft by a deep and narrow descent — and which seems as it were to inhale and conceal it during the whole of its course — must be here briefly characterized as essential to a correct comprehension of the country of which they form the external barrier, dividing Galilee, Ephraim, and Judah from Bashan, Gilgal, and Moab, respectively.

36. To speak first of the Valley. It begins with the river at its remotest springs of Hasheya on the N. W. side of Hermon, and accompanies it to the lower end of the Dead Sea, a length of about 150 miles. During the whole of this distance its course is straight, and its direction nearly due north and south. The springs of Hasheya are 1,700 feet above the level of the Mediterranean, and the northern end of the Dead Sea is 1,317 feet below it, so that between these two points the valley falls with more or less regularity, through a height of more than 2,000 feet. But though the river disappears at this point, its 

descent continues below the waters of the Dead Sea till it reaches a further depth of 1,308 feet. So that the trench running parallel with the coast of the Mediterranean, and dividing, as if by a fosse or ditch, the central range of maritime highlands from those further east. At two points only in its length is the trench interrupted by the range of Lebanon and Hermon, and by the high ground south of the Dead Sea. Of these compartments thus formed, the northern is the valley of the Orontes; the southern is the Wady el-Arabeh, while the central one is the valley of the Jordan, the Arabah of the Hebrews, the Aufen of the Greeks, and the Ghur of the Arabs. Whether this remarkable fissure in the surface of the earth originally ran without interruption from the Mediterranean to the Red Sea, and was afterwards (though still at a time long anterior to the historic period) broken by the protrusion or elevation of the two tracts just named, cannot be ascertained in the present state of our geological knowledge of this region. The central of its three divisions is the only one with which we have at present to do; it is also the most remarkable of the three. The river is elsewhere described in detail [JORDAN]; but it and the valley through which it rushes down its extraordinary

Profile-Section of the Holy Land from the Dead Sea to Mount Hermon, along the line of the Jordan.

a This district, called the Sud el Athlit, between the sea and the western flanks of Carmel, has been within 4,000 years reduced from being one of the most thriving and productive regions of the country, as well as one of the most profitable to the government, to desolation and desertion, by these wicked exactions. The taxes are paid in kind; and the officers who gather them demand so much grain for their own purposes as to leave the peasant barely enough for the next sowing. In addition to this, as long as any people remain in a district they are liable for the whole of the tax at which the district is rated. No wonder that under such pressure the inhabitants of the Sud el Athlit have almost all emigrated to Egypt, where the system is better, and better administered.

b No remarkable is this depression, that it is adopted by the great geographer Kutter as the base of his description of Syria.

c Deep as it now is, the Dead Sea was once doubt less far deeper, for the sediment brought into it by the Jordan must be gradually accumulating. No date, however, exist by which to judge of the rate of this accumulation.
flat, with the mysterious river hidden from sight in an impenetrable jungle of reeds and marsh vegetation.

Between the Huleh and the Sea of Galilee, as far as we have any information, it contracts, and becomes more of ancontainer of water or a large pond.

It is in its third and lower portion that the valley assumes its more definite and regular character. During the greater part of this portion, it is about seven miles wide from the one wall to the other. The eastern mountains preserve their straight line of direction, and their massive horizontal wall-like aspect, during almost the whole distant part of the valley. On the tops of these mountains are covered by the double mysterious rents, through which the Hermon, the Wady Zurka, and other streams force their way down to the Jordan. The western mountains are more irregular in height, their slopes less vertical, and their general line is interrupted by projecting outposts such as Tell Forsil, and Kurn Sâbudah.

North of Jericho they recede in a kind of amphithrâte, and the valley becomes twelve miles broad, a breadth which it thenceforward retains to the southern extremity of the Dead Sea. What the real bottom of this cavity may be, or at what depth below the surface, is not yet known, but that which meets the eye is a level or gently undulating surface of light sandy soil, about Jericho brilliant white, about Beisan dark and reddish, crossed at intervals by the torrents of the western highlands which have ploughed their zigzag course deep down into its soft substance, and even in autumn betray the presence of moisture by the bright green of the thorn-bushes which flourish in and around their channels, and cluster in greater profusion round the spring-heads at the foot of the mountains. Formerly palms abounded on both sides of the Jordan at its lower end, but none now exist there. Passing through this vegetation, such as it is, the traveller emerges on a plain of bare sand, furrowed out in innumerable channels by the rain-streams, all running eastward towards the river, which lies there in the distance, though invisible. Gradually these channels increase in number and depth till they form steep cones or mounds of sand of brilliant white, 50 to 100 feet high, their lower part being but their upper portion indurated by the action of the rains and the tremendous heat of the sun. Here and there these cones are marshalled in tolerably regular line, like gigantic tents, and form the bank of a terrace overlooking a flat considerably lower in level than that already traversed. After crossing this lower flat for some distance, another descent, of a few feet only, is made into a thick growth of dwarf shrubs: and when this has been pursued until the traveller has well-nigh lost all patience, he suddenly arrives on the edge of a "hole," filled with thick trees and shrubs, whose tops are level with his foot.

Through the thicket comes the welcome sound of rushing water.

This is the Jordan.

38. Buried as it is between such lofty ranges, and shielded from every breeze, the climate of the Jordan Valley is extremely hot and relaxing. Its energizing influence is shown by the inhabitants of Jericho, who are a small, feebly, exhausted race, dependent for their cultivation for the hands of the border peasants of the highland villages (Rob. i. 550), and to this day prone to the vices which are often developed by tropical climates, and which brought destruction on Sodom and Gomorrah. But the circumstances which are unfavorable to morals are most favorable to fertility. Whether there was any great amount of cultivation and habitation in this region in the times of the Israelites the Bible does not say; but in post-biblical times there is no doubt on the point. The palms of Jericho, and of Abila (opposite Jericho on the other side of the river), and the extensive lake and rose-gardens of the former place, are spoken of by Josephus, who calls the whole district a "divine spot." (Belon υαπηγορος, B. J. iv. 8, § 2; see vol. ii. 1256). Bethshan was a proverb among the rabbis for its fertility. Soceoth was the seat of Jacob's first settlement west of the Jordan; and therefore was probably then, as it still is, an eligible spot. In later times indigo and sugar appear to have been grown near Jericho and elsewhere; 9 aqueducts are still partially standing, of Christian or Saracen arches; and there are remains, all over the plain between Jericho and the river, of former residences or towns.

a North of the Wady Zurka their character alters. The flat broken by the sharp, big, box-like appearance of the hill at Jericho, and become more broken and sloping. The writer had an excellent view of the mountains behind Beisan from the Burj at Zerin in October, 1861. Zerin, though distant, is sufficiently high to command a prospect into the interior of the mountains. Thus viewed, their wall-like character had entirely vanished. There appeared, instead, an infinity of separate summits, finely as irregular and tumultuous as any district west of Jordan, rising gradually in height as they recede eastward. Was it the case with this locality only? or would the whole region east of the Jordan prove equally broken, if viewed sufficiently near? Prof. Stanley hints that such may be the case (S. & P. p. 329). Certainly the hills of Judah and Samarâ appear as much a "wall" as those east of Jordan, when viewed from the sea-coast.

b Jericho was the city of palm-trees (2 Chr. xxviii. 15); and Josephus mentions the palms of Abila, on the eastern side of the river, as the scene of Moses' "lot and the vertical wall-like appearance, so strong, says Mr. Pocole, "is strewed with palms." (Geog. Society's Journal, 1859). Dr. Anderson (p. 192) describes a large grove as standing on the lower margin of the sea between Wady Mujeb (Arman) and Zurka Man (Galliloea).
and of systems of irrigation (Ritter, Jordan, pp. 503, 512). Plasseris, a few miles further north, was built by Herod the Great; and there were other towns either in or closely bordering on the plain. At Impea the soil is submontane, and cultivation is confined to the upper portion, between Salat and Beisan. There indeed it is conducted on a grand scale; and the traveler as he journeys along the road which leads over the foot of the western mountains, overtops an immense extent of the richest land, abundantly watered, and covered with corn and other grain. Here, too, as at Jericho, the cultivation is conducted principally by the inhabitants of the villages on the western mountains.

39. All the irrigation necessary for the towns, or for the cultivation which formerly existed, or still exists, in the cbir, is obtained from the torrents and springs of the western mountains. For all purposes to which a river is ordinarily applied, the Jordan is useless. So rapid that its course is one continued eddy, so crooked, that in the whole of its lower and main course, it has hardly half a mile straight; so broken with rapids and other impediments, that no boat can swim for more than the same distance continuously: so deep below the surface of the adjacent country that it is invisible, and can only with difficulty be approached: resolutely refusing all communication with the ocean, and, ending in a lake, the peculiar conditions of which render navigation impossible — with all these characteristics the Jordan, in any sense which we attach to the word river, is no river at all: alike useless for irrigation and navigation, it is in fact, what its Arabic name signifies, nothing but a great watering place (She'erit el-Khbir).

40. But though the Jordan is so unlike a river in the western sense of the term, it is far less so than the other streams of the Holy Land. It is at least perennial, while, with few exceptions, they are mere winter torrents, rushing and foaming during the continuance of the rain, and quickly drying up after the commencement of summer.

What time they wax warm they vanish; when it is hot they are consumed out of their place (Deut. vi. 11). They go to nothing and perish (Job, vi. 17). For fully half the year these so-called rivers or brooks, in our version of the Bible represents the special term (annah) which designates them in the original, are often mere dry lines of hot white or gray stones; or if their water still continues to run, it is a tiny rill, working its way through heaps of parched boulders in the centre of a broad flat tract of loose stones, often only traceable by the thin line of verdure which springs up along its course.

Those who have travelled in Palestine or Granada in the summer will have no difficulty in recognizing this description, and in comprehending how the use of such terms as river or brook must mislead those who can only read the exact and vivid narrative of the Bible through the medium of the Authorized Version.

This subject will be more fully described, and a list of the few perennial streams of the Holy Land given under riv'i.

41. How far the valley of the Jordan was employed by the ancient inhabitants of the Holy Land as a medium of communication between the northern and southern parts of the country we can only conjecture. The year's shortest route, and Galilee and Judaea, it would yet, as far as the levels and form of the ground are concerned, be the most practicable for large bodies: though these advantages would be seriously counterbalanced by the sultry heat of its climate, as compared with the fresher air of the more difficult road over the highlands.

The ancient notices of this route are very scanty.

(1) From 2 Chr. xxviii. 15, we find that the captives taken from Judah by the army of the northern kingdom were sent back from Samaria to Jerusalem by way of Jericho. The route pursued was probably by Noblus across the Jbnkner, and by Wady Forroh or Forsay into the Jordan Valley. Why this road was taken is a mystery, since it is not stated or implied that the captives were accompanied by any heavy baggage which would make it difficult to travel over the central route. It would seem, however, to have been the usual road from the north to Jerusalem (comp. Luke xviii. 11 with xix. 1), as if there were some impediment to passing through the region immediately north of the city.

(2) Pompey brought his army and siege-train from Damascus to Jerusalem (B. C. 40), past Seythopolis and Pella, and thence by Koraz (possibly the present Kerme) at the foot of the Wady Forroh) to Jericho (Joseph, Ant. xiv. 3, § 4; B. J. i. 6, § 5).

(3) Vespasian marched from Emnans, on the edge of the plain of Sharon, not far east of Rambik, past Neapolis (Noblas) down the Wady Forroh or Forsay to Koraz, and thence to Jericho (B. J. iv. 8, § 1); the same route as that of the capti
tive Judians in No. 1.

(4) Antoninus Martyr (c. A. D. 600) and pos
sibly Willibald (A. D. 722) followed this route to Jerusalem.

(5) Baldwin I. is said to have journeyed from Jericho to Tiberias with a caravan of pilgrims.

(6) In unknown times the whole length of the valley has been traversed by Dr. Bancroft and by Dr. Anderson, who accompanied the American Expedition as geologist, but apparently by few if any other travelers.

42. Monotonous and uninviting as much of the Holy Land will appear from the above description to English readers, accustomed to the constant ver
dure, the succession of flowers, lasting almost throughout the year, the ample streams and the varied surface of our own country — we must re
member that its aspect to the Israelites after that weary march of forty years through the desert, and even by the side of the brightest recollections of Egypt that they could conjure up, must have been very different. After the great and terrible wild
dness of the valley, the arid, arid, barren, scor
cing, barren, stern seas of sand, the low, shallow, and sultry march all day in the dust of that enormous procession; the ever looking forward to the well

a Robinson, ill. 314; and from the writer's own ob
servation.

b To prevent this confusion, some recent geogra
phers (as Dr. Monke, in his map, Gath, 1868) very
properly distinguish the river and Wady from each
other by different signs.
at which the encampment was to be pitched: the crowding, the fighting, the camor, the bitter disappointment round the medicum of water when at last the desired spot was reached; the "light bread" or so long "loathed": the rare treat of animal food when the hills descended, or an approach to the sea permitted the "fish" to be caught; after this daily struggle for a painful existence, how grateful must have been the rest afforded by the Land of Promise:—how delicious the shade, scanty though it were, of the hills and ravines, the gushing springs and green plains, even the mere wools and cisterns, the vineyard and fruit trees and "bright trees" in the vale, the cattle, sheep, and goats, covering the country with their long black lines, the beesswarming round their pendant combs in rock or wood: Moreover they entered the country at the time of the Passover, when it was arrayed in the full glory and freshness of its brief spring-tide, before the scorching sun of summer had had time to wither its flowers and embrown its verdure. Taking all these circumstances into account, and allowing for the bold metaphors of oriental speech—so different from our cold depreciating expressions—it is impossible not to feel that those wayward travellers could have chosen no fitter words to express what their new country was to them than those which they so often employ in the accounts of the conquest—"a land flowing with milk and honey, the glory of all lands."

43. Again, the variations of the seasons may appear to us slight, and the atmosphere dry and hot; but after the monotonous climate of Egypt, where rain is a rare phenomenon, and where the difference between summer and winter is hardly perceptible, the "rain of heaven" must have been a most grateful novelty in its two seasons, the former and the latter—the occasional snow and ice of the winters of Palestine, and the burst of returning spring, must have had double the effect which they would produce on those accustomed to such changes. Nor is the change only a relative one; there is a real difference—due partly to the higher latitude of Palestine, partly to its proximity to the sea—between the sultry atmosphere of the Egyptian valley and the invigorating sea-breezes which blow over the hills of Ephraim and Judah.

44. The contrast with Egypt would tell also in another way. In place of the huge ever-flowing river whose only variation was from low to high, and from high to low again, which lay at the lowest level of that level country, so that all irrigation had to be done by artificial labor—a land

where thou sowedst thy seed and wateredst it with thy foot like a garden of herbs"—in place of this, they were to find themselves in a land of constant and considerable undulation, where the water, either to the long-spring, or deep well, or flowing stream, could be procured at the most varied elevations, requiring only to be judiciously husbanded and skillfully conducted to find its own way through field or garden, whether terraced on the hill-sides or extended in the broad bottoms. But such change was not compulsory. Those who preferred the climate and the mode of cultivation of Egypt could resort to the lowland plains of the Jordan Valley, where the temperature is more constant and many degrees higher than on the more elevated districts of the country, where the breezes never penetrate, where the light fertile soil recalls, as it did in the earliest times, that of Egypt, and where the Jordan in its lowness of level presents at least one point of resemblance to the Nile.

45. In truth, on closer consideration, it will be seen that, beneath the apparent monotony, there is a variety in the Holy Land really remarkable. There is the variety due to the difference of level between the different parts of the country. There is the variety of climate and of natural appearances, proceeding, partly from those very differences of level, and partly from the proximity of the snow-capped Hermon and Lebanon on the north and of the torrid desert on the south: and which approximate the climate, in many respects, to that of regions much further north. There is also the variety which is inevitably produced by the presence of the sea—"the eternal freshness and liveliness of ocean."

46. Each of these is continually reflected in the Hebrew literature. The contrast between the highlands and lowlands is more often, and implied in the habitual forms of expression, "going up" to Judah, Jerusalem, Hebron; "going down" to Jericho, Canaan, Lydda, Caesarea, Gaza, and Egypt. More than this, the difference is marked unmistakably in the topographical terms which so abound in, and are so peculiar to, this literature. "The mountain of Judah," "the mountain of Israel," "the mountain of Naphtali," are the names by which the three great divisions of the highlands are designated. The predominant names for the towns of the same district—Gibeon, Geba, Gaba, Gibeon (meaning "hill"); Ramah, Ramathaim (the "brow" of an eminence); Mizpeh, Zophim, Zephothah (all modifications of a root signifying a wide prospect) all reflect the elevation of the region in which they were situated. On the other entrance, and that in the few cases of their employment by the Prophets (Isa. xliii. 21; xxii. 29; Ez. xvi. 6, 15) there is always an allusion to "Egypt," "the iron furnace," the passing of the Red Sea, or the wilderness, to point the contrast.

4 Gen. xiii. 10. Ali Bey (ii. 260) says that the marina plain, from Khan Yunis, to Jaffa, is "of rich soil, similar to the slime of the Nile." Other points of resemblance are mentioned by Robinson (Bibl. Res. ii. 22, 34, 35, 256), and Thomson (Lana and Book, ch. 59). The plain of Gennesaret still "resembles the valley of the Nile" (Scheele, S. & P. p. 574). The papyrus is said to grow there (Buchanan, Cos. Forligh, p. 392).

5 The same expressions are still used by the Arabs of the Nejd, with reference to Syria and their own country (Wallis, Geogr. Soc. Journal, xiv. 174).
PALESTINE

is of a date anterior to the Christian era. Excavated tombs, eisters, flights of stairs, which are encountered everywhere, are of course out of the question. They may be—some of them, such as the tombs of Hinnom and Shiloh, probably are—of that order, but there is nothing else in the country. But there is no evidence either way, and as far as the history of art is concerned nothing would be gained if their age were ascertained. The only ancient buildings of which we can speak with certainty are those which were erected by the Greeks or Romans during their occupation of the country. Not that these buildings have not a certain individuality which separates them from any mere Greek or Roman building in Greece or Rome. But the fact is certain, that not one of them was built while the Israelites were masters of the country, and before the date at which western nations began to get a footing in Palestine. And as with the buildings so with other memorials. With one exception, the museums of Europe do not possess a single piece of pottery or metal work, a single weapon or household utensil, an ornament or a piece of armor, of Israelite make, which can give us the least conception of the manners or outward appliances of the nation before the date of the destruction of Jerusalem by Titus. The coins form the single exception. A few rare specimens still exist, the oldest of them attributed—though even that is matter of dispute—to the Macabees, and their rudeness and insignificance furnish a stronger evidence than even their absence could imply, of the total want of art among the Israelites.

It may be said that Palestine is now only in the same condition with Assyria before the recent researches brought so much to light. But the two cases are not parallel. The soil of Babylonia is a loose lean or sand, of the description best fitted for covering up and preserving the relics of former ages. On the other hand, the greater part of the Holy Land is hard and rocky, and the soil lies in the valleys and lowlands, where the cities were only very rarely built. If any store of Jewish relics were remaining embedded or hidden in suitable ground—as for example, in the house mass of delirium which coats the slopes around Jerusalem—we should expect occasional finds which might be recognized as Jewish. This was the case in Assyria. Long before the mounds were explored, Rich brought home many fragments of inscriptions, bricks, and engraved stones, which were picked up on the surface, and were evidently the productions of some nation whose art was not then known. But in Palestine the only objects hitherto discovered have all belonged to the West—coins or arms of the Greeks or Romans.

The buildings already mentioned as being Jewish in character, though carried out with foreign details, are the following:—

The tombs of the Kings and of the Judges: the buildings known as the tombs of Absalom, Zechariah, St. James, and Jehoshaphat; the monolith at Silicas, etc., in the neighborhood of Jerusalem;

a It is impossible to trace these correspondences and distinctions in the English Bible, our translators not having always rendered the same Hebrew by the same English word. But the corrections will be found in the Appendix to Professor Stanley's Sinai and Palestine, chap. ii. sect. vii.

b Ps. xxv. 6; xxxvii. 4; Is. lv. 6; xxxvi. 6; Gen. xxviii. 1; Zech. xi. 9; Nal. vi. 3.
PALESTINE

In fact the Israelites never lost the feeling or the traditions of their early pastoral nomad life. Long after the nation had been settled in the country, the cry of those earlier days, "To your tents, O Israel!" was heard in periods of excitement. The prophets, sick of the luxury of the cities, and stung by the "gathering" of that simpler, less artificial life; and the Temple of Solomon, may even perhaps of Zerubbabel, was spoken of to the last as the "tent" of the Lord of hosts, the "place where David had pitched his tent." It is a remarkable fact, that eminent as Jews have been in other departments of arts, science, and affairs, no Jewish architect, painter, or sculptor has ever achieved any signal success.

THE GEOLOGY. — Of the geological structure of Palestine it has been said with truth that our information is but imperfect and indistinct, and that much time must elapse, and many a cherished hypothesis be sacrificed, before a satisfactory explanation can be arrived at of its more remarkable phenomena. It is not intended to attempt here more than a very cursory sketch, addressed to the general and non-scientific reader. The geologist must be referred to the original works from which these remarks have been compiled.

1. The main sources of our knowledge are (1) the observations contained in the Travels of Russegger, an Austrian geologist and mining engineer who visited this country amongst other countries of the East in 1829-38 (Reisen in Griechenland, etc., 4 vols., Stuttgart, 1841-49, with Atlas); (2) the Report of H. J. Anderson, M. D., an American geologist, formerly Professor in Columbia College, New York, who accompanied Captain Lynch in his exploration of the Jordan and the Dead Sea (Geol. Reconnaissance, in Lynch's Official Report, 4to, 1812, pp. 75-207); and (3) the Diary of Mr. H. Poole, who visited Palestine on a mission for the British government in 1836 (Journal of Geogr. Society, vol. xxvi. pp. 55-70). Neither of these contains anything approaching a complete investigation, either as to extent or to detail of observations. Russegger travelled from Sinai to Hebron and Jerusalem. He explored carefully the route between the latter place and the Dead Sea. He then north. He cannot refer to any dislocation of the "immovable" walls which Solomon had built above the valleys on the northeast and southwest, or to any enlargement by Herod of the area in those directions. "No mention is made of his having had anything to do with the massive walls of the exterior enclosure." (Robinson, Ed. Res. i. 413). The portions of the walls referred to in the article above are almost indistinguishably Jewish. In a previous article, "the masonry in the western wall near its southern extremity," is claimed by Mr. Ferguson as in the judgment of "almost all topographers, a proof that the wall there formed part of the substructures of the Temple" (vol. ii. p. 134, Amer. ed.).

The excavations of Lieut. Warren appear to have fully convinced Mr. Grove that these substructures are "earlier than the times of the Romans," and clearly Jewish.

the ruined synagogues at Meiron and Kef- Dirim. But there are two edifices which seem to bear a character of their own, and do not so clearly betray the style of the West. These are, the inclosure round the sacred cave at Hebron; and portions of the western, southern, and eastern walls of the Haruna at Jerusalem, with the vaulted passage below the Aksa. Of the former it is impossible to speak in the present state of our knowledge. The latter will be more fully noticed under the head of Temple; it is sufficient here to name one or two considerations which seem to bear against their being of older date than Herod. (1.) Herod is distinctly said by Josephus to have removed the old foundations, and laid others in their stead, including double the original area (Ant. xv. 11, § 3; B. J. i. 21, § 1). (2.) The part of the wall which all acknowledge to be the oldest contains the springing of an arch. This and the vaulted passage can hardly be assigned to builders earlier than the time of the Romans. (3.) The masonry of these magnificent stones (absurdly called the "bevel"), on which so much stress has been laid, is not exclusive of Jewish or even Eastern. Herod founded at Peraipolis; it is also found at Cnidos and throughout Asia Minor, and at Athens; not on stones of such enormous size as those at Jerusalem, but similar in their workmanship a

M. Reua, in his recent report of his proceedings in Phoenicia, has named two circumstances which must have had a great effect in suppressing art or architecture amongst the ancient Israelites, while their very existence proves that the people had no genius in that direction. These are (1) the prohibition of sculptured representations of living creatures, and (2) the command not to build a temple anywhere but at Jerusalem. The hewing or polishing of building-stones was even forbidden.

a In the former of the passages here cited (Ant. xv. 11, § 3) Josephus limits Herod's work of reconstruction to the Nicos, or body of the temple, and the adjacent porticoes. He expressly distinguishes between the foundations of the Temple proper, which Herod relaid, and the solid walls of the outer inclosure, which were laid by Solomon. These outer walls he represents as composed of stones so vast and so firmly joined by bands of iron, as to be immovable for all time—excepting at the time of the war. Some of the courses of the walls which he thus describes, evidently existing in his day, are plainly recognizable now in the southern portion of the walls of al-Hawaan, including the immense layers which remain of the arch of the ancient bridge across the Euphrates. His more minute description of the Temple and its area in another work (B. J. v. 6, §§ 1-6) correspond entirely with this statement. He also mentions (§ 8) the addition to this inclosure by Herod of the space occupied by the tower of Antonia. The present inclosure of the Temple measured four stadia in circumference; but he tells us (§ 2) that the area, "including the tower of Antonia," measured six stadia.

Then, now in the latter passage quoted above B. J. i. 21, § 1, he tells us that Herod "inclosed double the original area," he clearly refers to this accession of the space of the tower of Antonia on the
PALESTINE

proceeded to Jaffa by the ordinary road; and from thence to Bejrut and the Lebanon by Nazareth, Tiberias, Cena, Akka, Tyre, and Sidon. Thence he left the Dead Sea in its most interesting portions, the Jordan Valley, the central highlands, and the important district of the upper Jordan, untouched. His work is accompanied by two sections: from the Mount of Olives to the Jordan, and from Tabor to the Lake of Tiberias. His observations, though clearly and attractively given, and evidently those of a practical traveler, are too short and cursory for the subject. The general notice of his journey is in vol. iii. pp. 76-157; the scientific observations, tables, etc., are contained between pp. 161 and 291.

Dr. Anderson visited the southwestern portion of the Lebanon between Bejrut and Banias, Galilee, the Lake of Tiberias, the Jordan; made the circuit of the Dead Sea; and explored the district between that lake and Jerusalem. His account is evidently drawn up with great pains, and is far more elaborate than that of Russewey. He gives full analyses of the different rocks which he examined, and very good lithographs of fossils; but unfortunately his work is deformed by a very unreadable style.

Mr. Poole's journey was confined to the western and southeastern portions of the Dead Sea, the Jordan, the country between the latter and Jerusalem, and the lower tract of the central highlands from Hebron to Nablus.

2. From the reports of these observers it appears that the Holy Land is a much-disturbed mountainous tract of limestone of the secondary period (jurrassic and cretaceous); the southern shoal of the chain of Lebanon: elevated considerably above the sea level; with partial interruptions from tertiary and basaltic deposits. It is part of a vast mass of limestone stretching in every direction except west, far beyond the limits of the Holy Land. The whole of Syria is cleft from north to south by a straight crevasse of moderate width, but extending in the southern portion of its central division to a truly remarkable depth (c.625 ft.) below the sea level. This crevasse, which contains the principal watercourse of the country, is also the most exceptional feature of its geology. Such fissures are not uncommon in limestone formations; but no other is known of such a length and of so extraordinary a depth, and so open throughout its greatest extent. It may have been volcanic in its origin; the result of an upheaval from beneath, which has tilted the limestone back on each side, leaving this huge split in the strata; the volcanic fire having stepped short at that point in the operation, without intruding any volcanic rocks into the fissure. This idea is supported by the crater-like form of the basins of the Lake of Tiberias and of the Dead Sea (Russ, pp. 290, 297), and by many other tokens of volcanic action, past and present, which are encountered in and around these lakes, and along the whole extent of the valley. Or it may have been executed by the gradual action of the ocean during the immense periods of geological operation. The latter appears to be the opinion of Dr. Anderson (pp. 79, 140, 205); but further examination is necessary before a positive opinion can be pronounced. The ranges of the hills of the surface take the direction nearly due north and south, though frequently thrown into very difficult and much broken up into detached masses. The lesser watercourses run chiefly east and west of the central highlands.

3. The limestone consists of two strata, or rather groups of strata. The upper one, which usually meets the eye, over the whole country from Hebron to Jericho, is a tolerably solid stone, varying in color from white to reddish brown, with very few fossils, indicating a crystalline structure, and was abounding in caverns. Its general surface has been formed into gently rounded hills, crowded more or less thickly together, separated by narrow valleys of denudation occasionally spreading into small plains. The strata are not well defined, and although sometimes level b (in which case they lend themselves to the formation of terraces), are more often violently disarranged. c Remarkable instances of such contortions are to be found on the road from Jerusalem to Jericho, where the beds are seen pressed and twisted into every variety of form.

It is hardly necessary to say that these contortions, as well as the general form of the surface, are due to forces not now in action, but are part of the general configuration of the country, as it was in the last stages of the succession of interruptions below, and upheavals from the ocean, by which its present form was given it, long prior to the historic period. There is no ground for believing that the broad geological features of this or any part of the country are appreciably altered from what they were at the earliest times of the Bible history. The evidences of later action are, however, often visible, as for instance where the atmosphere and the rains have lowered the face of the limestone cliffs with long and deep vertical channels, often causing the most fantastic forms (And. pp. 89, 111; Poole, p. 56).

4. This limestone is often found crowned with chalk, rich in flints, the remains of a deposit which probably once covered a great portion of the country, but has only partially survived subsequent immersions. In many districts the coarse flint or chalk which originally belonged to the chalk is found in great profusion. It is called in the country chalkedon (Poole, p. 57).

On the heights which border the western side of the Dead Sea, this chalk is found in greater abundance and more undisturbed, and contains numerous springs of salt and sulphurous water.

5. Near Jerusalem the mass of the ordinary limestone is often mingled with large bodies of dolomite (magnesian limestone), a hardish semi-crystalline rock, reddish white or brown, with glistening surface and pearly lustre, often containing pores and small cellular cavities lined with oxide of iron or minute crystals of bitter spar. It is not stratified; but it is a question whether it has not been produced among the ordinary limestone by some subsequent chemical agency. Most of the caverns near Jerusalem occur in this rock, though in other parts of the country they are found in the more friable chalky limestone. d So much for the upper stratum.

---

a The surface of the Dead Sea is 1,315 feet below the Mediterranean, and its depth 1,395 feet.

b As at the twin hills of el-Job, the ancient Gibbon, below Nebi Samuel.

c As on the road between the upper and lower Beach about five miles from el-Job.

d See the description of the caverns of Beit Jibrin.
6. The lower stratum is in two divisions or series of beds—the upper, darkly in color, contorted and cavernous like that just described, but more compact— the lower one dark gray, compact and solid, and characterized by abundant fossils of cirditus, an extinct echinoid, the spines of which are the well-known "olives" of the concretes. This last-named rock appears to form the substratum of the whole country, east as well as west of the Jordan.

The ravine by which the traveller descends from the summit of the Mount of Olives (2,700 feet above the Mediterranean) to Jericho (900 below it) cuts through the strata already mentioned, and affords an uninvited opportunity for examining them. The lower formation differs entirely in character from the upper. Instead of smooth, commonplace, swelling outlines, everything here is rugged, pointed, and abrupt. Huge fissures, the work of the earthquakes of ages, cleave the rock in all directions—they are to be found as much as 1,000 feet deep by not more than 30 or 40 feet wide, and with almost vertical sides. One of them, near the ruined khan at which travellers usually halt, presents a most interesting and characteristic section of the strata (Russeger, pp. 247-251, &c.).

7. After the limestone had received the general form which its surface still retains, but at a time far anterior to any historic period, it was pierced and broken by large eruptions of lava pushed up from beneath, which has broken up and overlapped the stratified beds, and now appears in the form of basalt or trap.

8. On the west of Jordan these volcanic rocks have been hitherto found only north of the mountains of Samarit. They are first encountered on the southwestern side of the Plain of Esdraelon (Russ. p. 258): then they are lost sight of till the opposite side of the plain is reached, being probably hidden below the deep rich soil, except a few pebbles here and there on the surface. Beyond this they abound over a district which may be said to be contained between Dhibat on the north, Tiberias on the east, Tiberias on the south, and Tiberias on the west. They seem to have been two centres of eruption—one, and that the most ancient (And. pp. 129, 134), at or about the Kurn Hattin (the traditional Mount of Bezekites), whence the stream flowed over the declivities of the limestone towards the lake (Russ. pp. 259, 260). This mass of basalt forms the cliffs at the back of Tiberias, and to its disintegration is due the black soil, so extremely productive, of the Ard el-Hanneh and the Plain of Gennesaret, which lie, the one on the south, the other on the north, of the ridge of Hattin. The other—the more recent— was more to the north, in the neighborhood of Safed, where three of the ancient craters still exist, converted into the reservoirs or lakes of el-Jeh, Tachtéri, and Deláta (And. pp. 128, 129; Calman, in Kitto's Phys. Geog. p. 119).

The basalt of Tiberias is fully described by Dr. Anderson. It is dark iron-gray in tint, cellular, but firm in texture, amygdaloidal, the cells filled with carbonate of lime, olivine and augite, with a specific gravity of 2.6 to 2.9. It is often considered in its more developed portions, as, for instance, on the cliffs behind Safed town, here the junctions of the two formations may be seen; the base of the cliffs being limestone, while the crown and brow are massive basalt (pp. 124, 135, 136).

The lava of Deláta and the northern centre differs considerably from that of Tiberias, and is pronounced by Dr. Anderson to be of later date. It is found of various colors, from black-brown to reddish-gray, very porous in texture, and contains much pumice and scoria; polygonal columns are seen at el-Jeh, where the neighboring erectaceous beds are contorted in an unusual manner (And. pp. 128, 129, 130).

A third variety is found at a spur of the hills of Galilee, projecting into the Ard el-Hitch below Kédes, and referred to by Dr. Anderson as Tell el-Hitchi; but of this rock he gives no description, and declines to assign it any chronological position (p. 134).

9. The volcanic action which in pre-historic times projected this basalt, has left its later traces in the ancient records of the country, and is even still active in the form of earthquakes. Not to speak of passages in the poetical books of the Bible, which can hardly have been suggested except by an actual occurrence, it is recorded that such violent convulsions, as the ancient texts refer to, have at least once distinctly alluded to them, namely, that of Zechariah (xiv. 5) to an earthquake in the reign of Uzziah, which is corroborated by Josephus, who adds that it injured the Temple, and brought down a large mass of rock from the Mount of Olives (Ad. ix. 10, § 4).

"Syria and Palestine," says Sir Charles Lyell (Principles, 8th ed. p. 340), "abound in volcanic appearances; and very extensive areas have been shaken at different periods, with great destruction of cities and loss of lives. Continued mention is made in history of the ravages committed by earthquakes in Sidon, Tyre, Beyrut, Laodicea, and Antioch." The same author (p. 342) mentions the remarkable fact that "from the 13th to the 17th centuries there was an almost entire cessation of earthquakes in Syria and Judæa; and that, during the interval of quiescence, the Archipelago, together with part of Asia Minor, Southern Italy, and Sicily, suffered greatly from earthquakes and volcanic eruptions." Since they have again begun to be active in Syria, the most remarkable earthquakes have been those which destroyed Aleppo in 1816 and 1822 (for this see Wolf, Travels, ch. 9); Antioch in 1737, and Tiberias and Safed in 1817* (Thomson, ch. 19). A list of those which are known to have affected the Holy Land is given by Dr. Pusey in his Commentary on Amos iv. 11. See also the Index to Ritter, vol. viii. p. 595.

The rocks between Jerusalem and Jericho show many an evidence of these convulsions, as we have already remarked. Two earthquakes only are recorded as having affected Jerusalem itself— that in the reign of Uzziah already mentioned, and that at the time of the crucifixion, when "the rocks were rent and the rocky tombs torn open" (Matt. xxvii. 51). Slight shocks are still occasionally felt there and Deir Dibban in Rob. ii. 23, 51-53; and Van de Velde, i. 155.

* Four-fifths of the population of Safed, and one-fourth of that of Tiberias, were killed on this occasion.

* Even the tremendous earthquake of May 29, 1902, only did Jerusalem a very slight damage (Abdu-l-Hasif in Kitto, Phys. Geogr. p. 148).
10. But in addition to earthquakes, the hot salt and fossil springs which are found at Tiberias, Cal- 
frinac, and other spots along the valley of the Jor-
dan, and round the beaches of its lakes, and the rock salt, nitre, and sulphate of the Dead Sea are all evidences of volcanic or phreatic action. Von 
Buch, in his letter to Robinson (Bibl. Res. i. 352), 
goes so far as to cite the bitumen of the Dead Sea 
as a further token of it. The hot springs of Tibe-
rias were observed to flow more copiously, and to 
increase in temperature, at the time of the earth-
quake of 1837 (Thomson, ch. 19, 20).

11. In the Jordan Valley the basalt is frequently 
encountered. Here, as before, it is deposited on the 
limestone, which forms the substratum of the whole 
country. It is visible from time to time on the 
banks and in the bed of the river; but so covered 
with deposits of tufa, conglomerate, and alluvium, 
as not to be traceable without difficulty (And. pp. 
136-137). On the western side of the lower Jordan 
and Dead Sea no volcanic formations have been 
found (And. pp. 81, 133; Russ., pp. 205, 205); nor 
do they appear on its eastern shore. The Wady Yarkut 
Main is approached, and then only in erratic 
fragments (And. p. 191). At Wady Hemarith, 
north of the last-mentioned stream, the igneous 
rocks first make their appearance in situ near the 
level of the water (p. 194).

12. It is on the east of the Jordan that the most 
extensive and remarkable developments of igneous 
rocks are found. Over a large portion of the sur-
face from Damascus to the latitude of the south 
of the Dead Sea, and even beyond that, they occur 
in the greatest abundance all over the surface. 
The limestone, however, still underlies the whole. 
These extraordinary formations render this region 
geologically the most remarkable part of all Syria. 
In some districts, such as the Lejth (the ancient 
chartered city of Phoenicians), the Sefed and the 
Harrach, it presents appearances and characteristics 
which are perhaps unique on the earth's surface. 
These regions are yet but very imperfectly known, 
but travellers are beginning to visit them, and we shall 
possibly be in possession ere long of the results of 
future investigation. A portion of them has been 
recently described in great detail by Mr. Wetz-
stein, Prussian consul at Damascus. They lie, 
however, beyond the boundary of the Holy Land 
proper, and the reader must therefore be referred 
for these discoveries to the heart of TRACHONIS.

13. The tertiary and alluvial beds remain to be 
noticed as certain.

4. The floor of the Jordan Valley is described 
by Dr. Anderson (p. 140) as exhibiting throughout 
more or less distinctly the traces of two independ-
et terraces. The upper one is much the 
broadest of the two. It extends back to the face 
of the limestone mountains which form the walls 
of the valley on east and west. He regards this as 
older than the river, though of course formed after 
the removal of the materials from between the walls. 
Its upper and accessible portions consist of a mass 
of detritus brought down by the ravines of the 
walls, always chalky, sometimes "an actual chalk;" 
usually bare of vegetation (And. p. 143), though 
not uniformly so (Rob. iii. 315).

5. Below this, varying in depth from 30 to 150 feet, 
is the second terrace, which reaches to the channel 
of the Jordan, and, in Dr. Anderson's opinion, has 
been excavated by the river itself before it had 
shrunken to its present limits, when it filled 
the whole space between the eastern and western 
faces of the upper terrace. The inner side of both upper 
and lower terraces is furrowed out into conical 
knots, by the torrents of the rains descending to 
the lower levels. These cones often attain the 
magnitude of hills, and are ranged along the edge 
of the terraces with curious regularity. They display 
convenient sections, which show sometimes a ter-
tiary limestone or marl, sometimes quaternary 
deposits of sands, gravels, variegated clays, or 
unstratified detritus. The lower terrace bears a good 
deal of vegetation, oakland, agnus castus, etc. 
The alluvial deposits have in some places been 
transported entirely away, for Dr. Anderson speaks of 
sweeping the upturned edges of nearly vertical 
strata of limestone, with neighboring beds 
contorted in a very violent manner (p. 148). This 
was a few miles N. of Jericho.

6. All along the channel of the river are found 
marshes and low cliffs of conglomerates, and brec-
clas of various ages, and more various composition. 
Rolled boulders and pebbles of fainty sandstone or 
chert, which have descended from the upper hills,

---

* It may be convenient to give a list of the hot or 
brackish springs of Palestine, as far as they can be 
collected. It will be observed that they are all in 
or about the Jordan Valley. Beginning at the north:

- Am Eshab, and Ain Tuhobloah, N. E. of Lake of 
Tiberias: slightly warm, too brackish to be drinkable. 
(And. p. 495.)

- Am el-Ramada, on shore of lake, 8. of Mejdel: 80' 
Fahr., slightly brackish. (Rob. ii. 336.)

- Tiberias: 8' Fahr.; salt, bitter, sulphurous.

- Anwi, in the midst of the Sea: very hot, slightly 
sulphurous. (Burchardt, May 6.)

- Wady Math (Salt Valley), in the Ghor near Sa‘aá: 
83° Fahr.; very salt, fæd. (Rob. iii. 920.)

- Below Ain Fishkaya: fæd. and brackish. (Lynch, 
April 18.)

7. One day N. of Am-Jady: 80' Fahr.; salt. (Poole, 
p. 67.)

---

1 Wady Mazorah and W. Khûnsht: 3', S of 
2 Wady Maharat: 4' E. of Udân: salt, contain-
ing small fish. (Ritter, Jordan, p. 796; Poole, p. 61.)
3 Wady el-Abya: 8', E. end of Dead Sea: hot. (Bur-
chardt, Aug. 7.)

4 Wady Râ‘eh-Moul, near Rabba, E. side of Dead 
Sea. (Ritter, Syr. p. 1223.)

5 Wady Zerka Main (Valliscum), E. side of Dead Sea: 
very hot, very slightly sulphurous. (Seton, Jan. 
18, 1863; Ritter, Aug. 7.)

6 These are chiefly remarkable for the hot springs, 
respecting which Robinson's Phys. Geogr. of Palestine, 
p. 291-294;
---

7 Reserbericht über Hausrn und die Trachten, 1809;
with map and woodcuts.

8 Complete Robinson's diary of his journey across 
the Jordan near Sa‘aá (iii. 313).
15. Round the margin of the Dead Sea the tertiary beds assume larger and more important proportions than by the course of the river. The marls, clays, and conglomerates continue along the base of the western cliff as far as the Wady Sebäk, where they attain their greatest development. South of this they form a sterile waste of brilliant white marl and bitter salt plagues, piled up by the rain-torrents from the heights into pinnacles and Jedilks (p. 180).

At the southeastern corner of the sea, sandstones begin to display themselves in great elevation, and extend northward beyond Wady Zwyck Malta (p. 189). Their full development takes place at the mouth of the Wady Mojéb, where the beds are from 100 to 400 feet in height. They are deposited on the limestone, and have been themselves gradually worn away through by the waters of the ravine. There are many varieties, differing in color, composition and date. Dr. A. enumerates several of these (pp. 190, 196), and states instances of the red sandstone having been filled up, after excavation, by non-conforming beds of yellow sandstone of a much later date, which in its turn has been hollowed out, the hollows being now occupied by detritus of a stream long since extinct.

Russeger mentions having found a tertiary breccia overlying the chalk on the south of Carmel, composed of fragments of chalk and flint, cemented by line (p. 257).

16. The rich alluvial soil of the wide plains which form the maritime portion of the Holy Land, and also that of Esdraelon, Gennesaret, and other similar plains, will complete our sketch of the geology. The former of these districts is a region of from eight to twelve miles in width, intervening between the central highlands and the sea. It is formed of washings from those highlands, brought down by the heavy rains which fall in the winter months, and which, though they rarely remain as permanent streams, yet last long enough to spread this fertilizing manure over the face of the country. The soil is a light loamy sand, red in some places, and deep black in others. The substratum is rarely seen, but it appears to be the same limestone which composes the central mountains. The actual coast is formed of a very recent sandstone full of marine shells, often these of existing species (Russ. pp. 256, 257), which is disintegrated by the waves and thrown on the shore as sand, where it forms a tract of considerable width and height. This sand in many places stops the outflow of the streams, and sends them back on to the plain, where they overflow and form marshes, which with proper treatment might afford most important assistance to the fertility of this already fertile district.

17. The Plain of Gennesaret is under similar conditions, except that its outer edge is bounded by the lake instead of the ocean. Its superiority in fertility to the maritime land is probably due to the abundance of running water which it contains all the year round, and the rich soil produced from the decay of the volcanic rocks on the steep heights which immediately inclose it.

18. The Plain of Esraelon lies between two ranges of highland, with a third (the hills separating it from the Plain of Akka) at its north-west end. It is watered by some of the finest springs of Palestine, the streams from which traverse it both east and west of the central watershed, and contain water or mud, moisture and marsh, even during the hottest months of the year. The soil of this plain is also volcanic, though not so purely so as that of Gennesaret.

19. Bitumen or asphaltum, called by the Arabs ḥummar (the "slime" of Gen. xii. 5), is only met with in the Valley of Jordan. At Hasbeiyah, the most remote of the sources of the river, it is obtained from pits or wells which are sunk through a mass of bituminous earth to a depth of about 180 feet (And. pp. 115, 116). It is also found in small fragments on the shore of the Dead Sea, and occasionally, though rarely, very large masses of it are discovered floating in the water (Rob. i. 518). This appears to have been more frequently the case in ancient times (Joseph. B. J. iv. 8, § 4; Dio. Sic. ii. 49). [SLIME.] The Arabs report that it proceeds from a source in one of the precipices on the eastern shore of the Dead Sea (Rob. i. 517) opposite Ain-Jely (Russ p. 253); but this is not corroborated by the observations of Lynch's party, of Dr. Poole, or of Dr. Robinson, who examined the eastern shore from the western side with special reference thereto. It is more probable that the bituminous limestone in the neighborhood of Jely Mus is exists in strata of great thickness, and that the bitumen escapes from its lower beds into the Dead Sea, and there accumulates until by some accident it is detached, and rises to the surface.

20. Sulphur is found on the W. and S. and S. E. portions of the shore of the Dead Sea (Rob. i. 512). In many spots the air smells strongly of sulphurous acid and sulphurated hydrogen gas (And. p. 176; Poole, p. 60; Beaufort, ii. 113), a sulphurous crust is spread over the surface of the beach, and lumps of sulphur are found in the sea (Rob. i. 512). Poole (p. 63) speaks of "sulphur hills" on the peninsula at the S. E. end of the sea (see And. p. 187).

Nitre is rare. Mr. Poole did not discover any, though he made special search for it. Inby and Mr. Rogers, and Mr. Robinson, however, mention having seen it (Rob. i. 513).

Rock-salt abounds in large masses. The salt mound of Kisson Ṣlavat at the southern end of the Dead Sea is an enormous pile, 5 miles long by 2½ broad, and some hundred feet in height (And. p. 181). Its inferior portion consists entirely of rock-salt, and the upper part of sulphate of lime and salt, often with a large admixture of alumina.

THE BOTANY. — The Botany of Syria and Palestine differs but little from that of Asia Minor, which is one of the most rich and varied of the globe. What differences it presents are due to a slight admixture of Persian forms on the eastern frontier, of Arabian and Egyptian on the southern, and of Arabian and Indian tropical plants in the low torrid depression of the Jordan and Dead Sea. These latter, which number perhaps a hundred different kinds, are anomalous features in the other whole coast of Syria has been brought up from Egypt by the S. S. W. wind. This is also stated by Josephus (Ant. xv. 4, § 8).
PALESTINE

The flora of Syria, so far as it is known, may be roughly classified under three principal Botanical regions, corresponding with the physical characters of the country. These are (1.) the western or seacoast half of Syria and Palestine, including the lower valleys of the Lebanon and Anti-Lebanon, the plain of Cilico-Syria, Galilee, Samaria, and Judæa. (2.) The desert or eastern half, which includes the east banks of the Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea Valley. (3.) The middle and upper mountain regions of Mount Caïsus, and of Lebanon above 3,400 feet, and of the Anti-Lebanon above 4,000 feet. Nothing whatever is known botanically of the regions to the eastward, namely, the Hauran, Lejlah, Tihch, Ammon, and Mœab; countries extending eastward into Mesopotamia, the theatre of which is Persian, and south to Elburz, where the purely Arabian flora begins.

These Botanical regions present no definite boundary line. A vast number of plants, and especially of herbs, are common to all, except the botanic parts of Lebanon and the driest spots of the eastern district, and in no latitude is there a sharp line of demarcation between them. But thought the change is gradual from the dry and semitropical eastern flora to the moister and cooler western, or from the latter to the colder temperate one of the Lebanon, there is a great and decided difference between the floras of those three localities as the Lebanon at 5,000 feet, Jerusalem, and Arichah; or between the tops of Lebanon, of Carmel, and of any of the hills bounding the Jordan; for in the first locality we are most strongly reminded of northern Europe, in the second of Spain, and in the third of Western India or Persia.

1. Western Syria and Palestine.—The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is extremely hard to characterize it by the mention of a few. Amongst trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the Plums maritimus and P. hookerensis (Alpino-Pine): the former of which extends in forests here and there along the shore, and the latter covers the spur of the Lebanon, Carmel, and a few other ranges as far south as Hebron. The most prevalent oak is the Quercus pseudocerrifera, a plant scarcely different from the common Q. cerrifera of the western Mediterranean, and which it strongly resembles in form, habit, and evergreen foliage. It is called holly by many travellers, and Quercus holly by others, both very different trees. Q. pseudocerrifera is perhaps the commonest plant in all Syria and Palestine, covering a low dense bush many square miles of hilly country everywhere, but rarely or never growing in the plains. It seldom becomes a large tree, except in the valleys of the Lebanon, or where, as in the case of the famous oak of Mambre, it is allowed to attain its full size. It ascends about 5,000 feet on the mountains, but does not descend into the middle and lower valley of the Jordan; nor is it seen on the east slopes of the Anti-Lebanon, and scarcely to the eastward of Jerusalem; it may indeed have

chirion obliquus, various beans and lentils, as Lathyrus vulgarius, Phaseolus vulgaris, and Vicia sativa; melons, grapes, pumpkins, cumin, cariander, fenugreek, amise, sweet potato, tobacco, yam, cohescin, and other sub-tropical and tropical field and garden crops.
Palestine, it is rare, though its roots are said to exist in abundance in the soil. The only other oaks that are common are the Q. infectoria (a gall oak), and Q. egelius. The Q. infectoria is a small deciduous-leaved tree, found here and there in Galilee, Samaria, and on the Lebanon; it is very conspicuous from the numbers of bright chestnut-colored shining viscid galls which it bears, and which are sometimes exported to England, and which are a poor substitute for the true Aleppo galls. Q. egelius again is the Valonia oak; a low, very stout-trunked stumpy tree, common in Galilee, and especially on Tabor and Carmel, where it grows in scattered groups, giving a park-like appearance to the landscape. It bears acorns of a very large size, whose cups, which are covered with long recurved spines, are exported to Europe as Valonia, and are used, like the galls of Q. infectoria, in the operation of dyeing. This, I am inclined to believe, is the oak of Bashan, both on account of its stumpy habit and thick trunk, and also because a fine piece of the wood of this tree was sent from Bashan to the Kew Museum by Mr. Cyril Graham. The other oaks of Syria are chiefly confined to the uplands, and will be noticed in their proper place.

The trees of the genus Pistacia rank next in abundance to the oak, and of these there are three species in Syria, two wild and most abundant, but the third, P. vera, which yields the well-known pistachio-nut, very rare, and chiefly seen in cultivation about Aleppo, but also in Bejrut and near Jerusalem. The wild species are the P. lentiscus and P. terebinthus, both very common: the P. lentiscus rarely exceeds the size of a low bush, which is conspicuous for its dark evergreen leaves and numberless small red berries; the other grows larger, but seldom forms a fair-sized tree.

The Corko or Locust-tree, Ceratonia silqua, ranks perhaps next in abundance to the foregoing trees. It never grows in clumps or forms woods, but appears as an isolated, rounded or oblong, very dense-foliaged tree, branching from near the base, of a bright lucid green hue, affording the best shade. Its singular flowers are produced from its thick branches in autumn, and are succeeded by the large pendulous pods, called St. John's Bread, and extensively exported from the Levant to England for feeding cattle. [Ultras.]

The oriental Plane is far from uncommon, and though generally cultivated, it is to all appearance wild in the valleys of the Lebanon and Anti-Lebanon. The great plane of Damascus is a well-known object to travellers; the girth of its trunk was nearly 40 feet, but it is now a mere wreck. The Sycamore-fig is common in the neighborhood of towns, and attains a large size; its wood is much used, especially in Egypt, where the mummy-cases were formerly made of it. Poplars, especially the aspen and white poplar, are extremely common by streams; the latter is generally trimmed for firewood, so as to resemble the Lombardy poplar. The Walnut is more common in Syria than in Palestine, and in both countries is generally confined to gardens and orchards. Of large native shrubs or small trees almost universally spread over this district are, Arbutus Andrachne, which is common in the hilly country from Hebron northward; Crataegus Armata, which grows equally in dry rocky exposures, as on the Mount of Olives and in cool mountain valleys; it yields a large yellow or red haw that is abundantly sold in the markets. Cypress are common about villages, and are rather near all religious establishments, often attaining a considerable size, but I am not aware of their being indigenous to Syria. Zizyphus Spinos-Christi, Christ's Thorn—often called jujube—the Nubk of the Arabs, is most common on dry open plains, as that of Jericho, where it is either a scrambling brier, a standard shrub, or rarely even a middling-sized tree with pendulous branches, it is familiar to the traveller from its sharp hooks, white under-sides to the three-nerved leaves, and globular yellow sweetish fruit with a large woody stone. The Poli-urus aculeatus, also called Christ's Thorn, resembles it a good deal, but is much less common; it abounds in the Anti-Lebanon, where it is used for hedges, and may be recognized by its curvilinear prickle and curious dry fruit, with a broad flat wing at the top. Styxos officinalis, which used to yield the famous stornax, abounds in all parts of the country where hilly; sometimes, as on the east end of Carmel and on Tabor, becoming a very large bush branching from the ground, but never assuming the form of a tree; it may be known by its small downy leaves, white flowers like orange blossoms, and round, yellow, laugh fruit, covered with gummy fleshy stalks, like cherries. The flesh of the berry, which is quite unpalatable, is of a semi-transparent hue, and contains one or more large, chestnut-colored seeds. Tamarix is common, but seldom attains a large size, and has nothing to recommend it to notice. Oleander claims a separate notice, from its great beauty and abundance; lining the banks of the streams and lakes in gravelly places, and bearing a profusion of blossoms. Other still smaller but familiar shrubs are Phyllocl, Romanus ala- terrus, and others of that genus. Rhoe cotyrax, several leguminous shrubs, as Amoricas pedibus, Colutome and Genista; Cottonew, the common bramble, dog-rose, and hawthorn, Eglacies, wild olive, Lycias Eurepina, Vitex myrtus-coust, sweet-leaf (laurus noicola), Ephedra, Clematis, Gum-Cistus, and the caper-plant: these neatly complete the list of the commoner shrubs and trees of the western district, which attain a height of four feet or more, and are almost universally met with, especially in the hilly country.

Of planted trees and large shrubs, the first in importance is the Vine, which is most abundantly cultivated all over the country, and produces, as in the time of the Canaanites, enormous bunches of grapes. This is especially the case in the southern districts: those of Esbal being still particularly famous. Stephen Schultz states that at a village near Ptolemais (Acre) he sapped under a large vine, the stem of which measured a foot and a half in diameter, its height being 30 feet; and that the whole plant supported on a trellis, covered an area of 50 feet either way. The bunches of grapes weighed 10-12 lbs., and the berries were like small plums. Mariti relates that no vines can vie for produce with those of Judea, of which a bunch cannot be carried far without destroying the fruit; and we have ourselves heard that the bunches produced near Hebron are sometimes so long that, when attached to a stick which is supported on the shoulders of two men, the tip of the bunch trails on the ground.

Next to the vine, or even in some respects its superior in importance, ranks the Olive, which no-
where grows in greater luxuriance and abundance than in Palestine, where the olive orchards form a prominent feature throughout the landscape, and have done so from time immemorial. The olive-tree is in no respects a handsomc or picturesque object; its bark is grey and rugged; its foliage is in color an ashy, or at best a dusty green, and affords little shade: its wood is useless as timber, its flowers are insipid, and its fruit uninviting to the eye or palate; so that, even where most abundant and productive, the olive scarcely relieves the aspect of the dry soil, and deceives the superficial observer to the fertility of Palestine. Indeed it is mainly owing to these peculiarities of the olive-tree, and to the deciduous character of the foliage of the fig and vine, that the impression is so prevalent amongst northern travellers, that the holy land is in point of productivity not what it was in former times; for to the native of northern Europe especially, the idea of fertility is inseparable from that of verdure. The article of Quarz must be referred to for details of this tree, which is perhaps most skilfully and carefully cultivated in the neighborhood of Helbon, where for many miles the roads run between stone walls inclosing magnificent olive orchards, apparently tended with as much neatness, care, and skill as the best fruit gardens in England. The terraced olive-yards around Sebastiah must also strike the most casual observer, as admirable specimens of careful cultivation.

The Fig forms another most important crop in Syria and Palestine, and one which is apparently greatly increasing in extent. As with the olive and mulberry, the fig-trees, where best cultivated, are symmetrically planted in fields, whose soil is treed from stones, and kept as scrupulously clean of weeds as it can be in a semi-tropical climate. As is well known, the fig bears two or three crops in the year: Josephus says that it bears for ten months out of the twelve. The early figs, which ripen about June, are reckoned especially good. The summer figs again ripen in August, and a third crop appears still later when the leaves are shed; these are occasionally gathered as late as January. The figs are dried by the natives, and are chiefly purchased by the Arabs of the eastern deserts. The sycamore-fig, previously noticed, has much smaller and very inferior fruit.

The quince, apple, almond, walnut, peach, and apricot, are all most abundant field or orchard crops, often planted in lines, rows, or quinconx order, with the olive, mulberry, or fig: but they are by no means so abundant as these latter. The pomegranate grows everywhere as a bush; but, like the orange, Punicus, and other less common plants, is more often seen in gardens than in fields. The fruit ripens in August, and is kept throughout the winter. Three kinds are cultivated—the acid, sweet, and inquisit— and all are used in preparing sherbets; while the bark and fruit of all are used for dyeing and as medicine, owing to their astringent properties.

The bananas is only found near the Mediterranean; it ripens its fruit as far north as Beirut, and occasionally even at Tripoli, but more commonly at Sidon and Acre; only one kind is commonly cultivated, but it is excellent. Dates are not frequent: they are most common at Caïf and Jaffa, where the fruit ripens, but there are now no groves of this tree anywhere but in Southern Palestine, such as once existed in the valley of the Jordan, near the assumed site of Jericho. Of that splendidly great tree by its portions of the Lake of Tiberias and near Caïf; but whether there are truly indigenous date-palms, or neapolitans produced from seedlings of the cultivated form, is not known.

The Opuntia, or Prickly Pear, is most abundant throughout Syria, and though a native of the New World, has here, as elsewhere throughout the dry, hot regions of the eastern hemisphere, established its claim to be regarded as a permanent and rapidly increasing denizen. It is in general use for hedging, and its well-known fruit is extensively eaten by all classes. I am not aware that the cochineal insect has ever been introduced into Syria, where there can, however, be little doubt but that it might be successfully cultivated.

Of the vines the Cucumbrius (Safflower) and Indigo are both cultivated; and of textiles, Flax, Hemp, and Cotton.

The Carob, or St. John's Bread (Cytisus siliquor), has already been mentioned amongst the conspicuous trees: the sweetish pulp of the pods is used for sherbets, and abundantly eaten: the pods are used for cattle-feeding, and the leaves and bark for tanning.

The Cistus or Rock-rose, two or three species of which are abundant throughout the hilly districts of Palestine, is the shrub from which in former times gum-tambouk was collected in the islands of Candia and Cyprus.

With regard to the rich and varied herbage vegetation of West Syria and Palestine, it is difficult to afford any idea of its nature to the English reader, except by comparing it with the British; which I shall first do, and then detail its most prominent botanical features.

The plants contained in this botanical region probably number not less than 2,000 or 2,500, of which perhaps 500 are British wild flowers; amongst the most conspicuous of these British ones are the Ranunculus onosari, oregna, and Evernia; the yellow water-lily, Peperomia, Rohus and iglechum, and several Fumitories: fully 20 cruciferous plants, including Dioscoris recta, urtica, Iofita, glaber, Sanguisorba Erin, Capsaia busque-sterilis, Cnike maritima, Lepidum, balsam, charcoal, mustard (often growing 8 to 9 feet high, two mimonnettes (Reopes alba and latia), Silene isidae, various species of Cruciferae, Sarracena, Stellaria, and Anthocodon, mallow, Germania mollis, returtolium, lucum, dissectum, and Robertsonia, Kroton muscato, and cicurajon. Also many species of Lovonemata, especially of Mesopotamiae, Tertiocaj, Melilotus, Lotus, Oenoma, Eranium, Vicia, and Lathyrus. Of Resver the common broad-leafed and dog-rose, Lycium Saliari, Echinodium, Pitcairn, Atropurpureum, leucanthemum, Scotia, Scapa, Sinan, glabra, Caltum venus, Robin perigra, Asparagus, etc.

Various Umbellifera and Compouds, including the daisy, wormwood, groundsel, dandelion.
chitory, southwthle, and many others. Blue and white pipembar, Galanos Meerum, Sowthall Arild, Arilc trigonum, horage, Veronicr amo-
gallna, Oatapin, intriphylla, and Osa-
medky, Batowia symmamaria, weir, Lamium
unpliintelute, mint, horehound, Prunella, Statice simimum, many Chemoffwce, Polygonam, and
Rochke, Pictiory, M. herce/e, Euphorbhes, net-
tles, box, elm, several willows and poplars, com-
mon duck-weed and pond weed, Orchis maric, Cimicifuga, butcher's-broom, black bronyo,
autumn squill, and many rushes, sedges, and
grasses.

The most abundant natural families of plants in West Syria and Palestine are: (1) Leguminose.
(2) Composita, (3) Lobiate, (4) Crucifere; after which come (5) Umbellifere, (6) Carpsphyllace, 
(7) Boraginse, (8) Scrophularinace, (9) Gramin-
ace, and (10) Liliaceae.

(1.) Leguminose abound in all situations, es-
pecially the genera Triflulium, Trifolieti, Medici-
opy, Lotus, Vicia, and Orbeh, in the richer soils, 
and Astragolus in enormous profusion in the drier
and more barren districts. The latter genus is
indeed the largest in the whole country, upwards
of fifty species belonging to it being enumerated,
either as confined to Syria, or common to it and
the herbarium. The Astragolus are, however,
most confined to the upper mountainous regions. Of
the shrubby Leguminose there are a few species of
Genista, Cytisus, Ononis, Retama, Antirrhinum, Caly-
coleus, Centaurea, and Acacia. One species, the
Carnitana, is arboreous.

(2.) Composita.—No family of plants more
strikes the observer than the Composita, from the
vast abundance of thistles and centuries, and other
spring-plants of the same tribe, which swarm alike
over the richest plains and most stony hills, often
towering high above all other herbaceous vegetation.
By the unoccupied traveller these are often sup-
posed to indicate sterility of soil, instead of the con-
trary, which they for the most part really do,
for they are nowhere so tall, rank, or luxuriant as
on the most productive soils. It is beyond the
limits of this article to detail the botanical peculi-
arities of this vegetation, and we can only men-
tion the genera Centaurea, Echinos, Onopordum,
Cicmnium, Capnora, and Cardon, as being emi-
nently conspicuous for their numbers or size.

These tribes Cichorace are scarcely less numerous,
whereas those of Crambe, Asteraceae, and Scropl-
olaceae, are so common in the more northern latitudes, are here
comparatively rare.

(3.) Lobiate form a prominent feature every-
where, and one all the more observable from the
fragrance of many of the genera. Thus the lovely
hills of Galilee and Samaria are inseparably linked
in the memory with the odoriferous herbage of
marjoram, thymes, lavender, calamintis, sages,
and terebinths; of all which there are many species.
In the south, as also there are of Sideritis, Phlomis, Stachys,
Bulloka, Nepeta, and Mentha.

(4.) Of Crucifere there is little to remark: its
types are generally weed-like, and present no
marked feature in the landscape. Among the most
noticeable are the gigantic mustard, previously
mentioned, which does not differ from the common
mustard, Sinapis alba, save in size, and the Anc-
issia Bherculeana, or rose of Jericho, an Egyp-
tian and Arabian plant, which is said to grow in
the Jordan and Dead Sea valleys.

(5.) Umbellifere present little to remark on
save the abundance of fennels and Bupleurum.
the order is exceedingly numerous both in species
and individuals, which often form a large propor-
tion of the tall rank herbage at the edges of cops
wood and in damp hollows. The gray and spiny
Eryngium, so abundant on all the arid hills, be-
longs to this order.

(6.) Carpsphyllace also are not a very conspicuous
order, though so numerous that the abundance of
sinks, Silene and Sisymbriet, is a marked feature
to the eye of the botanist.

(7.) The Boraginace are for the most part
annual weeds, but some notable exceptions are
found in the Echiums, Anchusas, and Ononis, which
are among the most beautiful plants of the
country.

(8.) Of Scrophularinacee the principal genera are
Scrophularia, Veronica, Lianum, and Verbascum
(Maikhen): the latter is by far the most abundant,
and many of the species are quite gigantic.

(9.) Grossse, though very numerous in species,
seldom afford a sward as in moister and colder
regions: the pastures of England having for its
oriental equivalent the herbs and herbaceous tips
of the low shrubby plants which cover the coun-
try, and on which all herbivorous animals love to
browse. Amongst them are the gum-bearhing Astrogolus, which are, however,
most confined to the upper mountainous regions. Of
the shrubby Leguminose there are a few species of
Genista, Cytisus, Ononis, Retama, Antirrhinum, Caly-
coleus, Centaurea, and Acacia. One species, the
Carnitana, is arboreous.

(10.) Liliaceae.—The variety and beauty of this
order in Syria is perhaps nowhere exceeded, and
especially of the bulb-bearing genera, as tulips,
frillini, squills, gages, etc. The Urginei sylva,
medical squill, abounds elsewhere, throwing up
a tall stalk beset with white flowers at its upper
half; and the little purple autumnal squill is one
of the commonest plants in the country, springing
up in October and November in the most arid
situations imaginable.

Of other natural orders worthy of notice, for one
reason or another, are Violerare, for the panety of
its species; Gentianae, which are very numerous
and beautiful; Rotaeta, which are common, and
very strong-scented when bruised. Rosaceae are
not so abundant as in more northern climates, but
are represented by one remarkable plant, Poterium
spinous, which covers whole tracts of arid, hilly
country, much as the ling does in Britain. Cro-
selvacee and Saxifragae are also not so plentiful
as in cooler regions. Dipsacee are very abundant,
especially the genera Knautia, Scutellaria, Euphor-
bia, and Pterocephelis. Comnillaceae are com-
mon, and Lobeliacee rare. Primulacee and Erí-
ce are both rare, though one or two species are
not uncommon. There are very few Gentianacee,
but many Cnaenerv. Of Solanacee, Mandragora,
Solanum, and Hyoscyamus are very common, also
Chrysanthemum, Crocosmum, and Lycoperon, all prob-
ably escapes from cultivation. Plumbago contains
a good many Statice, and the blue-flowered
Plumbago Europae is a very common weed. Chen-
boisiacee are very numerous, especially the woody
Aristolochia and Chemathy and some shrubby Sol-
osus. Polygonum are very common indeed, es-
specially the smaller species of Polygonum itself.
Arctias is very present several species. Euphor-
binaceae. The herbaceous genera of Euphorbia are vastly
abundant, especially in fields: upwards of fifty
Syrian species are known. Crumphy, Androction, and Ricinus, all southern types, are also common

PALESTINE

PALESTINE 2311
Culneae present the common European nettle, _Urtica_, and Pellitory. _Mercurialis_, the common and sycamore figs, and the black and white mulberries, _Aronia_ are very common, and many of them are handsome, having deep-purple hirsute spathes, which rise out of the ground before the leaves. Of Beh Nigelphore, the curious Cymborium _concinum_, or "Fungus Mediterrensis," used as a styptic during the Crusades by the knights of Malta, is found in the valleys of Lebanon near the sea. _Nodularia_, as in other dry countries, are scarce. _Orchideae_ contain about thirty to forty kinds, chiefly South European species of _Orchis_, _Oleopogon_, and _Scilla_.

_Angryliosites_ present _Pancratium_, _Sterculia_, _Lyciophorium_, and _Narcissus_. _Iridea_ has many species of _Iris_ and _Gonos_, besides _Moraea_, _Gladiolas_, _Trichocentron_, and _Ranunculus_. _Discorea_, _Tomas communis_, _Scillastrum_, several _Asperis_, _Smilax_, and _Ruscus_ are found. _Melianthus_ contain many _Calceolarias_, besides _Mercurialis_ and _Erythrodendron_. Besides these, there is a numerous British rubbish and lizards. _Cyperus_ are remarkably poor in species; the genus _Carex_, so abundant in Europe, is especially rare, not half a dozen species being enumerated.

Ferns are extremely scarce, owing to the dryness of the climate, and most of the species belong to the Lebanon flora. The common local kinds are _Asplenium repandum_, _Ostriches_, _Psilotum_ species, _Tigernym, phal every_, _Cetomich ceding_, _Pieris lancifolia_, and _Asplenium_Athamani- _gram, Stachycheirus_ is also abundant. One of the most memorable plants of this region, and indeed in the whole world, is the celebrated Papyrus of the ancient ( _Papier _antiquae), which is said once to have grown on the banks of the lower Nile, but which is nowhere found now in Africa north of the tropics. The only other known inhabitant beside Syria and tropical Africa is one spot in the island of Sicily. The papyrus is a noble plant, forming tufts of tall stout 3-angled green smooth stems, 6 to 10 feet high, each surmounted by a mop of pedunculated throngs; it abounds in some marshes by the lake of Titania, and is also said to grow near Gilda and elsewhere in Syria. It is certainly the most remarkable plant in the country.

Of other cryptogamic plants little is known. _Mosses_, _lichens_, and _Bryonia_ are not generally known, though doubtless many species are to be found in the winter and spring months. The marine _Algae_ are supposed to be the same as in the rest of the Mediterranean, and of _Fungi_ we have no knowledge at all.

Cereals, though not included under any of the above heads, are a very frequent order in Syria. Besides the immense crops of melons, gourds, and pumpkins, the colocynth apple, which yields the famous drug, is common in some parts, while even more so is the squirming cactus (_Fibula _ibopala)._ Of plants that contribute largely to that show charmingly for which the horticulture of Palestine is famous, may be mentioned _Adonis_, _Rumex_ _Asiaticus_, and _cutch_; _Aconitum_ concomitans_, _poppies, _Phlumianum_, _Matthiola_, _Malvastrum_, _Alyssum_, _Bi- tracte_, _Helichrysum_, _Ostera_, the eper plant, _Calceolaria_, many pinks, _Silene_, _Sempervivum_, and _Sedum_; many _Valeriana_, _mallow_, _Lavandula_, _Herbaena_; many _Hemerocallis_, _Lycium_, and _Lycimnum_._ _Colchicums_ are numerous to individualize; _Scolymus_, _Cephalaria_, _Erysimum_, _Pyrostegia_, _Ibiscus_, _Achillea_, _Calendula_, _Centaurium_, _Tragopogon_, _Sceouceres_, and _Crepis_; many noble _Campanulas_, _exulantes_, _Convolvulus_, _Arum_, _Olympus_, and _Pteris_; _Ruscus_, _Sycamores_, _Wisteria_; many beautiful _Liliums_; many _Adonis_; many _Festuca_; _Chelidonium_; _Solanum_; _Atropinum_; _Lycium_; _Theophila_; many _Nepeta_; _Cistus_; _Lavandula_; _Lycium_; _Lycimnum_; and _Colchicums_.

With such gay and delicate flowers as these, in numbersless combinations, the ground is almost carpeted during spring and early summer; and as in similar hot and dry, but still temperate climates, as in the Cape of Good Hope and Australia, they often color the whole landscape, from their lavish abundance.

II. _Botany of Eastern Syria and Palestine._ — Little or nothing being known of the flora of the kingdom of mountains east of the Jordan and Syrian desert, we must confine our notice to the valley of the Jordan, that of the Dead Sea, and the country about Damascus.

Nowhere can a better locality be found for showing the contrast between the vegetation of the eastern and western districts of Syria than in the neighborhood of Jerusalem. To the west and south of that city the valleys are full of the dwarf oak, two kinds of _Platanus_, besides _Silua_, _Arbutus_, rose, _Allopo_ _Finnas_, _Rhamnis_, _Phylleclus_, bramble, and _Cranberries_. Of these the last alone is found on the Mount of Olives, beyond which, eastward to the Dead Sea, not one of these plants appears, nor are they replaced by any analogous ones. For the first few miles the olive groves continue, and here and there a carob and lentisk or sycamore rears, but beyond Bethany these are scarcely seen. Naked rocks, or white chalky rounded hills, with bare open valleys, streaked, wholly destitute of cope, and sprinkled with sterile-looking shrubs of _Salすべys_, _Cupuncs_, _Zygophylleas_, _Rosma_, _Pul- _gonum_, _Zyphus_, _tamarisks_, _alni_, and _Artemisia_. Herbaceous plants are still abundant, but do not form the tremendous spectacle that they do in Judaea. Amongst these, _Baccharis_, _Alhales_, _Populus_, _Plu- _gonum_, _Corylus_, _Erica_, _Phyllleus_, and _Lycimnum_ are the most frequent.

On descending 1,000 feet below the level of the sea to the valley of the Jordan, the sub-tropical and desert vegetation of Arabia and West Asia is encountered in full force. Many plants wholly foreign to the western district suddenly appear, and the flora is that of the whole dry country as far east as the Punjab. The commonest plant is the _Zygophy- _s Sinap Christi_, or _wadi_ of the Arabs, forming bushes or small trees. Scarcely less abundant, and as large, is the _Bulbus_ _Zyphus_, whose fruit yields the oil called _alb_ by the Arabs, which is reputed to possess healing properties, and which may possibly be allowed to as Balm of Gilead. Tamar- iks are most abundant, together with _Rosa_ _Sinap_ _Sinapica_, conspicuous for the bright green of its few small leaves, and its exact resemblance in foliage, bark, and habit to the true Balm of Gilead, the _Artemisia Ghol- dasia_ of Arabia. Other most abundant shrubs are _Dobyns_ _bicornis_, a tall, _trach- _ing, almost leafless plant, with small white flowers, and the _Crambe_, a leafless brown called _Rehume_. _Asim Farhat_ is very abundant, and celebrated
for the delicious fragrance of its yellow flowers. It is chiefly upon it that the superb mistletoe, 

*Viburnum Acerin*, grows, whose scarlet flowers are

brilliant ornaments to the desert during winter, giving the appearance of flame to the bushes. *Cop- 

**pus spinosus**, the common espar-plant, flourishes everywhere in the Jordan Valley, forming clumps in the very arid rocky bottoms, which are conspicuous for their pale-blue hue, when seen from a distance.

*Alhagi Perforata* is extremely common; as is the prickly *Sphenoclea Zeylanica*, with purple flowers and glistening yellow fruits, commonly known as the Dead Sea apple.

On the banks of the Jordan itself the arborescent and shrubby vegetation chiefly consists of *Pelagus Euphraticus* (a plant found all over Central Asia, but not known west of the Jordan), tamarisk, *Oxalis alba*, *Pupera*, *Amauro vera*, *Poaquis Stephanii*, *Araoua Donum*, *LYThican*, and *Cal- 

**pries spinosa*. As the ground becomes saline, *Aus- 

**plex Halimus* and large *Stretes* (sea-pinks) appear in vast abundance, with many very succulent shrubby *Salidas*, *Salicornia*, *Suedias*, and other allied plants to the number of at least a dozen, many of which are typical of the salt depressions of the Caspian and Central Asia.

The flowering plants of this region are *Zygophyllum coacoaci*, *Boharea*, *Indigofera*; several *Astragalus*, *Cusia*, *Gymnocypris*, and *Nitrurus*. At the same time thoroughly European forms are common, especially in wet places: as dock, mint, *Veronica aquagall*, and *Siam*. One remote and little-visited spot in this region is particularly celebrated for the tropical character of its vegeta-

tion. This is the small valley of Kuwari (also July), which is on the west shore of the Dead Sea, and where alone, it is said, the following tropical plants grow: *Sidh muticus* and *Asitica*, *Calendula pro- 

cera* (whose bladdery fruits, full of the silky coma of the seeds, have been even assumed to be the *Apple of Sodom*), *Amblando*, *Battis Bilodera*, *Mesu Javaenica*, *Plimosa Biscooroba*.

It is here that the *Selena canina* is supposed by some to be the mustard-tree of Scripture, grows: it is a small tree, found as far south as Abyssinia or Aden, and eastward to the peninsula of India, but is unknown west or north of the Dead Sea. The late Dr. Royle — unaware, no doubt, how scarce and local it was, and arguing from the pungent taste of its bark, which is used as horse-radish in India — supposed that this tree was that alluded to in the parable of the mustard tree; but not only is the pungent nature of the bark not generally known to the natives of Syria, but the plant itself is so scarce, local, and little known, that Jesus Christ could never have made it the subject of a parable that would reach the understanding of his hearers.

The shores immediately around the Dead Sea present a different vegetation, consisting wholly of a saline character. *Junica maritima* is very common in large clumps, and a yellow-flowered groundsel-like plant, *Indra crithmea* (also com-

mon on the rocky shores of Tyre, Sidon, etc.), *Spargavaria maritima*, *Atriplex Halimus*, *Bolsa-

**ites* *Egyptica*, several shrubby *Suaeds* and *Sub- 

vornias*, *Tamarixi*, and a prickly-leaved grass (*Festuca*), all grow more or less close to the edge of the sea; while of non-saline plants the So-

*Linn. Sodomean, Tamarix, Centauras*, and im-

mense brakes of *Avando Bona* may be seen all around.

The most singular effect is, however, experienced in the re-assent from the Dead Sea to the hills on its N. W. shore, which presents first a sudden steep rise, and then a series of vast water-worn terraces at the same level as the Mediterranean. During this ascent such familiar plants of the latter region are successively met with as *Potensis spinosa*, *Arabius*, *pink*, *Hypococum*, *India wacca*, etc.; but no trees are seen till the longitude of Jerusalem is approached.

III. Flora of the Middle and Upper Mountain Regions of Syria. — The oak forms the prevalent arborescent vegetation of this region below 5,000 feet. The *Quercus pseudo-coecifera* and *infectior* is not seen much above 3,000 feet, nor the Valonia oak at so great an elevation; but above these heights some magnificent species occur, including the *Quercus Cerris* of the South of Europe, the *Q. Ehren- 

**bergii*, or *cassanafoi*; *Q. Tria*, *Q. Libani, and 

*Q. Manillica*, Liull, which is perhaps not distinct from some of the forms of *Q. Robur*, or *os- 

**siliqua*.

At the same elevations junipers become common, but the species have not been satisfactorily made out. The *Juniperus communis* is found, but is not so common as the tall, straight, black kind (*J. excelsa, or Fatihhsiana*). On Mount Casius the *J. denivaca* grows, remarkable for its large plum- 

**like fruit; and *J. sibila, planisae*, and *ozzyelas*, are all said to inhabit Syria. But the most remark-

**able plant of the upper region is certainly the cedar; for which we must refer the reader to the article *CEDAR*.

Lastly, the flora of the upper temperate and alpine Syrian mountains demands some notice. As before remarked, no part of the Lebanon presents a vegetation at all similar, or even analogous, to that of the Alps of Europe, India, or North America. This is partly owing to the heat and extreme dryness of the climate during a considerable part of the year, to the sudden desiccating influence of the desert winds, and to the sterile nature of the dry limestone soil on the highest summits of Leb-

**anon, Hermon, and the Anti-Lebanon; but perhaps 

**still more to a warm period having succeeded to that cold one during which the glaciers were formed whose former presence is attested by the moraines in the cedar valley and elsewhere), and which may have obliterated almost every trace of the glacial flora. Hence it happens that far more boreal plants may be gathered on the Himalaya at 10-15,000 ft. elevation, than at the analogous heights on Leb-

**anon of 8-10,000 ft.; and that whilst fully 300 

plants belonging to the Arctic circle inhabit the ranges of North India, not half that number are 

**found in the Lebanon though these mountains are in a far higher latitude.

At the elevation of 4,000 feet on the Lebanon many plants of the middle and northern latitudes of Europe commence, amongst which the most con-

**spicuous are hawthorn, dwarf elder, dog-rose, ivy, butcher's broom, a variety of the herbbery, honey-

**suckle, maple, and jasmine. A little higher, at 7-10,000 ft., occur *Colocaster*, *Ephedra*, *Paci-

**cum, primrose, *Drype olivoides*, several other roses.

* For some notices of the oaks of Syria, see Trans-

**tions of the Linna. Society, xxiii. 381, and plates 36-

**8.

* See also Dr. Hooker's paper "On the Cedars of Leb-

**anon," etc., in the Nat. Hist. Review, No. 5; with 3 plates.
PALESTINE

Potionium, Juniperus communis, field-lavender (or excelsa), and cedar. Still higher, at 7,100 feet it., there is no shrubbery vegetation, properly so called. What shrubs there are form small, rounded, harsh, prickly bushes, and belong to genera, or forms of genera, that are almost peculiar to the dry mountainous districts of the Lebanon and Persia, and West Asia generally. Of these Adonis are by far the most numerous, including the A. Toscana, which yields the famous gum in the greatest abundance; and next to them a curious tribe of Stiffaces called Anachalidnese, whose rigid, pointend leaves spread like stars over the whole surface of the plant; and, lastly, a small wild white-stemmed plant called Asar. These are the prevalent forms up to the very summit of Lebanon, growing in globular masses on the rounded flanks of Dhar el-Khodli itself, 10,200 feet above the sea.

At the elevation of 8,900 feet the beautiful silver Vicia canescens forms large tufts of pale blue, where scarcely anything else will grow.

The plants of 7,100-8,900 feet altitude are still chiefly Levantine forms of Campanula, Ranunculus, Crataegus, Diospyros, Sarcococca, Symphytum, Geranium, Fremia, several Umbellifers, Galium, Erigeron, Scabioso, Taraxacum, Anthriscus, Scrophularia, Nepeta, Sideritis, Agalinis, Crocus, Ornithogalum; and a few grasses and sedges. No gentian, heaths, Primulas, saxifragas, anemonies, or other alpine favorites, are found.

The most local forms, which are confined to the clfts of rocks, or the vicinity of patches of snow above 9,000 feet, are Drosus, Arrerano, one small Petolelum, a Pineta, an Ardisia like alpina, and the Oryzos reniforme, the only decidely Arctic type in the whole country, and probably the only characteristic plant remaining of the flora which inhabited the Lebanon during the glacial period. It is, however, extremely rare, and only found nestling under stones, and in deep clefts of rocks, on the very summit, and near the patches of snow on Dhar el-Khodli.

No doubt Cryptogamic plants are sufficiently numerous in this region, but none have been collected, except ferns, amongst which are Lycopodium City, Polypodium vulgare, Nepthiaium politale, and Polypodium uschidetianum.

J. D. H.

Zoology. — Much information is still needed on this subject before we can possibly determine with any degree of certainty the fauna of Palestine; indeed, the complaint of Linnaeus in 1747, that "we are less acquainted with the Natural History of Palestine than with that of the remotest parts of India," is almost as just now as it was when the remark was made. "There is really," writes a recent visitor to the Holy Land, "no country frequented by travellers whose fauna is so little known as that of Palestine" (Bib. i. 22); indeed, the complaint is general amongst zoologists.

It will be sufficient in this article to give a general survey of the fauna of Palestine, as the reader will find more particular information in the several articles which treat of the various animals under their respective names.

Mammalia. — The Cheiroptera (bats) are probably reproduced in Palestine by the species which are known to occur in Egypt and Syria, but we want precise information on this point. [Barx.] Of the Insectivora we find hedgehogs (Erinaceus Europaeus) and moles (Talpa vulgaris, T. careus (?)) which are recorded to occur in great numbers and to commit much damage (Hassidquist, Trave, p. 120); doubtless the family of Soricidae (shrews) is also represented, but we lack information. Of Ctenodactylus we still see in the Lebanon, the Syrian bear (Ursus Syriacus) and the pander (Leopardus variegus), which occupies the central mountains of the land. Jackals and foxes are common; the hyena and wolf are also occasionally observed; the badger (Meles teneus) is also said to occur in Palestine; but the lion is no longer a resident in Syria or Palestine, though in Biblical times this animal must have been by no means uncommon, as is evidenced by frequent mention in Scripture. [Lion.] The late Mr. Roth informed Mr. Tristram that bones of the lion had recently been found among the gravel on the banks of the Jordan not far south of the Sea of Galilee.

A species of squirrel (Sciurus Syriacus), which the Arab term Orbildem, "the leaper," has been noticed by Henrich and Ehrenberg on the lower and middle parts of Lebanon; two kinds of hare, Lepus Syriacus, and L. Bajt, are seen in the mountains, and L. Bajt is frequently met with on Tabor and Little Hermon, appears to be the only living wild example. The Syrian hyrax appears to be now but rarely seen. [Coney.]

There does not appear to be at present any wild ox in Palestine, though it is very probable that in Biblical times some kind of tus or bison roamed about the hills of Bashan and Lebanon. [Uxson], but for a time exists the wild ox (Bos?) are still (see 1 Sam. xxxiv. 2.) frequently seen in the rocks of Esseul. Mr. Tristram possesses a specimen of Ovis aegyptia, the Persian ibex, obtained by him a little to the south of Hermon. The gazelle (Gazella dorcas) occurs not unfrequently in the Holy Land, and is the antelope of the country. We want information as to other species of antelopes found in Palestine; probably the variety named, by Henrich and Ehrenberg, Antilop Arborakis, and perhaps the Gazella Isabellina, belong to the fauna. From the Arabs hunt the gazelles with greyhound and falcon; the falconer (Dinno vulgaris) is said to be not unfrequently observed.

Of domestic animals we need only mention the Arabian or one-humped camel, ass, and mule,
and horses, all which are in general use. The buffalo (Bubalus bubalis) is common, and is on account of its strength much used for ploughing and draught purposes. The ox of the country is small and unsightly, except in the neighborhood of Jerusalem, but in the richer pastures of the upper part of the country, the cattle, though small, are not unsightly, the head being very like that of an Alderney; the common sheep of Palestine is the broad-tail (Ovis arietina), with its varieties [SHEEP]; goats are extremely common everywhere.

— Palestine abounds in numerous kinds of birds. Vultures, eagles, falcons, kites, owls of different kinds, represent the Raptorial order. Of the smaller birds may be mentioned, amongst others, the Merops Persicus, the Upupa Epops, the Sitta Syriaca or Dalmatian nuthatch, several kinds of Silvicola, the Caponya or, or Palestine sunbird, the Ivoz xenops, Palestine nightingale, the finest singer in the country, which long before sunrise pours forth its sweet notes from the thick jungle which fringes the Jordan; the Anguillus Triatoma, or globe starling, discovered by Mr. Tristram in the gorge of the Kidron not far from the Dead Sea, "the roll of whose music, something like that of the organ-bird of Australia, makes the rocks resound" — this is a bird of much interest, inasmuch as it belongs to a purely African group not before met with in Asia; the sly and wary Crotoporus chalcites, in the open wood district near Jericho; the jay of Palestine (Garrulus melanocephalus); kingfishers (Ceryle rudis, and perhaps Alcedo atthis) abound about the Lake of Tibersias and in the streams above the Heleb; the raven, and carrion crow; the Pastor roratus, or locust-bird (see Locustæ); the common cuckoo; several kinds of doves; sandgrouse (Pterocles), partridges, francolins, quails, the great bustard, storks, both the black and white kinds, seen often in flocks of some hundreds; herons, curlews, pelicans, sea-swallow (Sterna), gulls, etc., etc.

For the ornithology of the Holy Land the reader is referred to Heinrich and Ehrenberg's Sygobole Physica (Berlin, 1829-25), and to Mr. Tristram's paper in the P.A. in 1882.

Reptilia. — Several kinds of lizards (Scincæ) occur. The Loricato stellio, Lin., which the Arabs call Harun, and the Turks kill, as they think it mimics them saying their prayers, is very common in ruined walls. The Waran el had (Psammomus scincus) is very common in the deserts. The common Greek tortoise (Testudo Graeca) Dr. Wilson observed at the sources of the Jordan; fresh-water turtles (probably Eunus Cau匹oer) are found abundantly in the upper part of the country in the streams of Esraelon and of the higher Jordan Valley, and in the lakes. The chameleon (Chanoeo calypsis) is common; the crocodile does not occur in Palestine; the Monitor (1) *Nileolis* has doubtless been confounded with it. In the south of Palestine especially reptiles of various kinds abound; besides those already mentioned, a large Acrothylid, frequents old buildings; a large species of Crocodylus, at least two species of Gecco (Tarentola), a Gonylepis (eclettis), several other Acrothylid eriyli and Sepa tricolors have been observed. Of Ophiuridia, there is more than one species of Echidna; a Niur, several Tryptoboth, a Coronel, a Coluber (trigertata) occur; and on the southern frontier of the land the desert form Cernoleus Hasselpulsat has been observed. Of the snakes we have very little information besides that supplied by Kitto, namely, that frogs (Buiscus cæcula) abound in the marshy pools of Palestine; that they are of a large size, but are not eaten by the inhabitants. The tree-frog (Hyla), and toad (Bufo) are also very common.

Plants. — Fish were supplied to the inhabitants of Palestine both from the Mediterranean and from the inland lakes, especially from the Lake of Tibersis. The men of Tyre brought fish and sold on the Sabbath to the people of Jerusalem (Neh. xiii. 16). The principal kinds which are caught off the shores of the Mediterranean are supplied by the families Spariæ, Perææ, Scmerberæ, Ranaæ, and Piernocææ. The sea of Galilee has been always celebrated for its fish. Burchard (Syria, p. 312) says the most common species are the silver (Cyprinus hypolma), frequent in all the fresh waters of Palestine and Syria, and a fish called Mekhit, which he describes as being a foot long and five inches broad, with a flat body like the sole. The Briony is a species of harbel; it is the Barbàs Bians of Carv. and Valence, and is said by Bruce to attain sometimes to a weight of 70 lbs.; it is common in the Nile, and is said to occur in all the fresh waters of Syria. The Mekhit is undoubtedly a species of Chronium, one of the Limbifæ, and is perhaps identical with the C. Niloticus, which is frequently represented on Egyptian monuments. The fish of this lake are, according to old tradition, nearly identical with the fish of the Nile; but we sadly want accurate information on this point. As to the fishes of Egypt and Syria, see Ruppell, E., Neue Fische des Nils, in Verhand. des Naturforsch. Gesellschafts, Frankl. and Heckel, J. Die Fische Syriens, in Rusepp, Reise nach Egypten und Klein-Arien. There does not appear to be any separate work published on the fishes of the Holy Land. [Carpener, i. 382.]

Concerning the other divisions of the animal kingdom we have little information. Mollusces are numerous; indeed in few areas of similar extent could so large a number of land molluscs be found. Mr. Tristram collected casually, and without search, upwards of 100 species in a few weeks. The land shells may be classified in four groups. In the north of the country the prevailing type is that of the Greek and Turkish mountain region, numerous species of the genus Chasiola, and of opaque Bulimæ and Pupa predominating. On the coast the ass is capable of bearing harder burdens relatively to its size than any other draught animal. Its load of wheat per month is not more than half that of the full grown male, and a third of the load of a camel. It is common in the East to see loads of brushwood, as broad as the streets will allow, and eight feet high, borne by a little donkey which is quite concealed under his monstrous burden.
and in the plains the common shells of the East Mediterranean basin abound, e.g. Helix Piana, H. Spinea, etc. In the south, in the hill country of Judaea, occurs a very interesting group, chiefly confined to the Negev, the genera of which may be typified by H. Bousi1, H. Scot
tzna, H. tuberculans, recalling by their thick, cal
careous, lustreless coiling, the prevalent types of Egypt, Arabia, and Sahara. In the valley of the Jordan the prevailing group is a subdivision of the genus Batoma, rounded, semi-peloidal, and lust
treous, very numerous in species, which are for the most part peculiar to this district. The reader will find a list of Mollusks found in the neighbor
dhood of Jerusalem, in the Am. and Nat. of Nat.
Hist. vi. No. 34, p. 312. The following remark of a resident in Jerusalem may be mentioned.

"No shells are found in the Dead Sea or on its margin except the bleached specimens of Melano
gia, Neritina, and various Unioidea, which have been washed down by the Jordan, and afterwards
drifting on shore. In fact, so intense is the bitter-
saline quality of its waters that no mollusc (nor, so far as I know, any other living creature) can exist in it." These may be typified by B. Jordanii and B. Nepyrnisis. Of the Crustacea we know scarcely anything. Lord Lindsay observed large numbers of a small crab in the sands near Akaba. Husseini (1899) notes species of "running crabs," seen by him on the coasts of Syria and Egypt. Dr. Baird has recently (Am. and Nat. Moll. N. Y. viii. No. 45, p. 299) described an interesting form of Endemocreasus Crustacean, which he terms Branchipus eximus, traced from mud sent him from a pool near Jerusalem. Five other species of this group are described by Dr. Baird in the Am. and Nat. Moll. N. Y. for Oct. 1899. With regard to the insects, a number of beetles may be seen figured in the Symbolic Physique.

The Lepidoptera of Palestine are as numerous and varied as might have been expected in a land of flowers. All the common butterflies of southern Europe, or nearly allied vaneurs, are plentiful in the cultivated plains and on the hill-sides. Numerous species of Polyommatina and Lycaenida, Tho
cola nereus and alcon; many kinds of Podali: the lovely Anthesia capensia abound on the lower
slopes in spring, as does Permisisis Apollinus; more than one species of Thais occurs; the genera Ar
gonis and Alcinous are abundantly represented, not so Hypnichaus, owing probably to the compara
tive dryness of the soil. Libyllna (Celtis) is found, and the gorgeous genus Vanessa is very
common in all suitable localities; the almost cos
topolitan Chrysidea Cordia and Vanessa Atlantis,
L. albina, and V. Antiochus, may be mentioned; Papilio Alcmon and some others of the same species fly over the plains of Sharon, and the catarpillar

a This statement with regard to the total absence of organic life in the Dead Sea is confirmed by almost every traveller, and there can be no doubt as to its general accuracy. It is, however, but right to state that Mr. Poole discovered some small fish in a brine-
spring, about 100 yards distant from, and 20 feet above the surface of the sea, which he was inclined to think had been produced from fish on the sea (see Geograph. Journal for 1896). These fish have been 

"not found in the Sahara Carnelian desert in hot salt

springs where the water was shallow, but that these

fish are not found in deep pools or lakes." Mr. Poole observed also a number of aquatic birds diving fre
quently in the Dead Sea, and then remained motionless. Sir J. Richardson thinks, "that they must have found something edible there." It would, moreover, be an interesting question to determine whether some species of fish have not hatched from fish eggs, and are found in shallow pools at the extreme south end of the Salt Lake. In the open tanks at Lynton myriads of these transparent little brine-shrimps (they are about half an inch in length) are seen swimming actively about in the water every part of which contains as much as a grain of salt!"
PALESTINE

PALESTINE

Holy Land would pay some attention to its zoology, by bringing home collections and by investigations in the country, we should soon hope to have a fair knowledge of the fauna of a land which in this respect has been so much neglected, and should doubtless gain much towards the elucidation of many passages of Holy Scripture.

W. H. and H. B. Tristram.

Our most convenient manual on the Natural History of the Bible at present is that of Mr. Tristram, published by the Society for Promoting Christian Knowledge. (London, 1867.) The contributions of Dr. G. E. Post, in this edition of the Dictionary, will be found to be important to this branch of science.

The Climate. — No materials exist for an accurate account of the climate of the very different regions of Palestine. Besides the casual notices of travellers (often unscientific persons), the following observations are all that we possess:

(1.) Average monthly temperatures at Jerusalem, taken between June 1831, and Jan. 1835, inclusive, by Dr. R. G. Barclay, of Beyrut and Jerusalem, and published by him in a paper "On the State of Medical Science in Syria," in the N. American Medical-Chirurgical Review (Philadelphia), vol. i. 705-718.a

(2.) A set of observations of temperature, 200 in all, extending from Nov. 19, 1838, to Jan. 16, 1839, taken at Jerusalem, Jaffa, Nazareth, and Beyrut, by Russegger, and given in his work (Reisen, iii. 170-185).

(3.) The writer is indebted to his friend Mr. James Glashier, F. R. S., for a table showing the mean temperature of the air at Jerusalem for each month, from May, 1843, to May, 1841; and at Beyrut, from April, 1842, to May, 1845.

(4.) Register of the fall of rain at Jerusalem from 1846 to 1849, and 1850 to 1854, by Dr. R. G. Barclay (as above).

1. Temperature. — The results of these observations are inserted in Dr. Barclay's work (City of the Great King, p. 428), and are accompanied by his comments, the result of a residence of several years in Jerusalem (see also pp. 43-50).

The is considerable variation in the above three sets of observations, as will be seen from the following comparative table of the mean temperatures of Jerusalem:

These observations may be stated generally as follows. January is the coldest month, and July and August the hottest, though June and September are nearly as warm. In the first-named month the average temperature is 49.1° Fahr., and greatest cold 28°; in July and August the average is 78.4°; with greatest heat 92° in the shade and 147° in the sun. The extreme range in a single year was 52°; the mean annual temperature 65.6°. Though varying so much during the different seasons, the climate is on the whole pretty uniform from year to year. Thus the thermometric variation in the same broad tract on the west coast of North America is nearly twice as great. The isothermal line of mean annual temperature of Jerusalem passes through California and Florida (to the north of Mobile), and Dr. Barclay remarks that in temperature and the periodicity of the seasons there is a close analogy between Palestine and the former state. The isothermal line also passes through Gibraltar, and near Madeira and the Bermudas. The heat, though extreme during the four midsummer months, is much alleviated by a sea-breeze from the N.W., which blows with great regularity from 10 A.M. till 10 P.M., and from this and other unexplained causes the heat is rarely oppressive, except during the occasional presence of the Khamsin or sirocco, and is said to be much more bearable than even in many parts of the western world which are deemed tropical. The Khamsin blows during February, March, and April (Widenbruch). It is most oppressive when it comes from the east, bearing the heat and sand of the desert with it, and during its continuance darkening the air and filling everything with fine dust (Miss Beaufort, ii. 223).

During January and February snow often falls to the depth of a foot or more, though it may not make its appearance for several years together. In 1854-55 it remained on the ground for a fortnight.c Nor is this of late occurrence only, but is reported by Shaw in 1722. In 1818 it was between two and three feet deep. In 1764 a heavy fall took place, and twenty-five persons are said to have been frozen to death at Nazareth. Snow is repeatedly mentioned in the poetical books of the Bible, and therefore has been known at that time (Is. lviii. 14, exilii. 16; Is. lv. 10, &c.). But in the narrative it only appears twice (1 Macc. xiii. 22; 2 Sam. xxiii. 29).

Thin ice is occasionally found on pools or sheets of water; and pieces of ground out of the reach of the sun's rays remain sometimes slightly frozen for several days. But this is a rare occurrence, and no injury is done to the vegetation by frost, nor do plants require shelter during winter (Barclay).

Observations made at Jerusalem are not applicable to the whole of the highland, as is obvious from Russegger's at Nazareth. These show us the result of fifty-five observations, extending from

It is understood that a regular series of observations, with standard barometer, thermometer, and rain-gauge, was made for 10 years by the late Dr. McGowan of the Hospital, Jerusalem, but the record of them has unfortunately been lost.

Palestine

Dec. 15 to 29: highest temp. 55.5°, lowest 49°, mean 53°; all considerably lower than those taken at Jerusalem a fortnight before.

2. Rain.—The result of Dr. Barclay's observations is to show that the greatest fall of rain at Jerusalem in a single year is 80 inches, and the smallest 44, the average being 61.6 inches. The greatest fall in any one month (Dec. 1850) was 33.3, and the greatest in three months (Dec. 1850, Jan. and Feb. 1851) 72.4. These figures will be best appreciated by recollecting that the average rain-fall of London during the whole year is only 25 inches, and that in the wettest parts of the country, such as Cumberland and Devon, it rarely exceeds 60 inches.

As in the time of our Saviour (Luke xii. 54), the rains come chiefly from the S. or S. W. They commence at the end of October or beginning of November, and continue with greater or less constancy till the end of February or middle of March, and occasionally, though rarely, till the end of April. It is not a heavy, continuous rain, so much as a succession of severe showers or storms with intervening periods of fine bright weather, permitting the grain crops to grow and ripen. And although the season is not divided by any entire cessation of rain for a lengthened interval, as some represent, yet there appears to be a diminution in the fall for a few weeks in December and January, after which it begins again, and continues during February and till the conclusion of the season.

On the uplands the hardy-harvest (which precedes the wheat) should begin about the last week of May, so that it is preceded by five or six weeks of summer weather. Any falling-off in the rain during the winter or spring is very prejudicial to the harvest; and, as in the days of the prophet Amos, nothing could so surely occasion the greatest distress or be so beastly a threat as a drought three months before harvest (Amos iv. 7).

There is much difference of opinion as to whether the former and the latter rain of Scripture are represented by the beginning and end of the rainy season, separated by the slight interval mentioned above (e.g. Kenrick, Phœnicia, p. 53), or whether, as Dr. Barclay (Odig. &c. p. 54) and others affirm, it is a black place after the harvest, about midsummer, and has been witheld as a punishment for the sins of the nation. This will be best discussed under Rain.

Between April and November there is, with the rarest exceptions, an uninterrupted succession of fine weather, and skies without a cloud. Thus the year divides itself into two, and only two, seasons—no indeed we see it constantly divided in the Bible—"winter and summer," "cold and heat," "seed-time and harvest."

a Here again there is a considerable discrepancy, since Mr. Poole (Geogr. Journal, xxvi. 57) states that Dr. M'Cowan had registered the greatest quantity in one year at 109 inches.

b Mr. P. on the 25th Nov. Reisserger's thermometer at Jerusalem showed a temp. of 82° 5', but when he arrived at Jericho at 5.39 p.m. on the 27th it had risen to 72° 5'. At 7.39 the following morning it was 65° 5', against 54° at Jerusalem on the 25th; and at noon on the 27th it had risen to 85°. At Marsea, at 11 a.m. of the 26th, it was 60°; and on returning to Jerusalem on the 1st Dec. it again fell to an average of 61°. An observation recorded by Dr. Robinson (iii. 210) at Nablus (Samaria), in the central part of the Jordan Valley, on May 11, 1822, in the shade, and close during the summer the dews are very heavy, and often saturate the traveller's tent as if a shower had passed over it. The nights, especially towards sunrise, are very cold, and thick fogs or mists are common all over the country. Thunder-storms of great violence are frequent during the winter months.

c So much for the climate of Jerusalem and the highland generally. In the lowland districts, on the other hand, the heat is much greater and more oppressive, owing to the quantity of vapor in the atmosphere, the absence of any breeze, the sweltering nature of the soil, and the manner in which the heat is confined and reflected by the inclosing heights; perhaps also to the internal heat of the earth, due to the depth below the sea level of the greater part of the Jordan Valley, and the remains of volcanic agency, which we have already shown to be still in existence in this very depressed region (p. 293b). No indication of these conditions is discoverable in the Bible, but Josephus was aware of them (I. i. 4, § 3), and states that the neighborhood of Jericho was so much warmer than the upper country that linen clothing was worn there even when Judaea was covered with snow. This is not quite confirmed by the experience of modern travellers, but it appears that when the winter is at its severest on the highlands, and both eastern and western mountains are white with snow, no frost visits the depths of the Jordan Valley, and the greatest cold experienced is produced by the driving rain of tempests (Sueton, Jan. 9, ii. 300). The vegetation already mentioned as formerly or at present existing in the district—palms, indiges, sugar—testifies to its tropical heat. The harvest in the Ghor is fully a month in advance of that on the highlands, and the fields of wheat are still green on the latter when the grain is being threshed in the former (Jub. Bibl. Res. i. 431, 534, iii. 314). Thus Burekhard on May 5 found the barley of the district between Tiberias and Bel-san nearly all harvested, while on the upland plains of the Hauran, from which he had just descended, the harvest was not to commence for fifteen days. In this fervid and moist atmosphere irrigation alone is necessary to insure abundant crops of the finest grains (Gen. i. 590).

4. The climate of the maritime lowland exhibits many of the characteristics of that of the Jordan Valley, but, being much more elevated, and exposed on its western side to the sea-breezes, it is not so oppressively hot. Reisserger's observations at Jaffa (Dec. 7 to 12) indicate only a slight advance in temperature on that of Jerusalem. But Mr. Grahame's observations at Be'erit (mentioned above) show on the other hand that the temperature there is considerably higher, the Jan. being a spring, gives 92°, which is the very highest reading recorded at Jerusalem in July: later on the same day it was 103°, in a strong N. W. wind (p. 314). On May 13, 1859, at Jericho, it was 71° in the shade and 79° in the breeze. Dr. Anderson (p. 154) found it 100° Fahr. "through the first half of the night" at the S. E. corner of the Dead Sea. In a paper on the "Climate of Palestine," etc., in the Edinburgh New Philos. Journal for April, 1852, published while this sheet was passing through the press, the mean annual temperature of Jericho is stated as 72° Fahr., but without giving any authority.

d Robinson (ii. 223), on June 8, 1838, found the thermometer 82° Fahr. before sunrise, at Eben Nunn, on the lower hills overlooking the Plain of Philistia.
PALAESTINE

45°, July 829, and the mean for the year 69.3°.
The situation of Bejrût (which indeed is out of the confines of the Holy Land) is such as to render its climate very sultry. This district retains much tropical vegetation: all along the coast from Gaza to Bejrût, and inland as far as Kafr Nejneh and Lydd, the date-palm flourishes and fruits abundantly, and the orange, sycamore-fig, pomegranate, and banana grow luxuriantly at Jaffa and other places. Here also the harvest is in advance of that of the mountainous districts (Thomson, Land and Book, p. 543). In the lower portions of this extensive region frost and snow are as little known as they are in the Ghur. But the heights, even in summer, are often very chilly, and the sunrise is frequently obscured by a dense fog (Thomson, pp. 490, 542; Robs. ii. 19). North of Carmel slight frosts are occasionally experienced.

In the winter months, however, the climate of these regions is very similar to that of the south of France or the maritime districts of the north of Italy. Napoleon, writing from Gaza on the "5th Vendémaire (26 Feb.), 1799," says, "Nous sommes ici dans l'antiquité et la bonne jusqu'aux genoux. Il fait ici le même froid et le même temps qu'à Paris dans cette saison" (Corr. de Napoléon, No. 3,863).

Berthier to Marmont, from the same place (29 Dec. 1798), says, "Nous trouvons ici un pays qui ressemble à la Provence et le climat à celui d'Europe" (Mém. du Duc de Raguse, ii. 56).

A register of the weather and vegetation of the twelve months in Palestine, referring especially to the coast region, is given by Colonel von Wilkenbruch in Geogr. Society's Journal, xx. 252. A good deal of similar information will be found in a tabular form in Petternann's Physical Map of Palestine in the Biblical Atlas of the Tract Society.

The permanence of the climate of Palestine, on the ground that the same vegetation which anciently flourished there still exists, is ingeniously maintained in a paper on The Climate of Palestine in Modern compared to Ancient Times in the Edin- burgh New Philosophical Journal for April, 1802. Reference thereto made to a paper on the same subject by Schouw in vol. viii. of the same periodical, p. 311.

LITERATURE.—The list of works on the Holy Land is of prodigious extent. Dr. Robinson, in the Appendix to his Biblical Researches, enumerates no less than 183; to which Boman (Land of Promise) adds a large number; and even then the list is far from complete.

* A unique work on this branch of bibliography is Dr. Töller's Bibliotheca Geographica Palestinae, pp. 265 (Leipzig, 1857). Beginning with A. D. 333, and coming down to 1806, he enumerates (if we have counted right) 1,666 writers in this field of exploration and study. They represent all the principal nationalities and languages. In most instances he characterizes the works mentioned with reference to their object and critical value from the Holy Land; but the following works will be found to contain nearly all necessary information:

1. Josephus. —Irreplaceable, both for its own sake, and as an accompaniment and elucidation of the Bible narrative. Josephus had a very intimate knowledge of the country. He possessed both the Hebrew Bible and the Septuagint, and knew them well; and there are many places in his works which show that he knew how to compare the various books together, and combine their scattered notices in one narrative, in a manner more like the processes of modern criticism than of ancient record. He possessed also the works of several ancient historians, who survive only through the fragments he has preserved. And it is evident that he had in addition other nameless sources of information, now lost to us, which often supplement the Scrip ture history in a very important manner. These and other things in the writings of Josephus have yet to be investigated. Two tracts by Tuch (Ques tiones de J. Josephi Iltcris, etc., Leipzig, 1859), on geographical points, are worth attention.

2. The Antiquities (usually so called) of Eu sebius and Jerome. A tract of Eusebius (330), "concerning the names of places in the Sacred Scriptures"; translated, freely and with many additions, by Jerome (1420), and included in his Collationes, works of Silo (Weiss, Vorlesungen über Hebraïschem. The original arrangement is according to the Books of Scripture, but it was thrown into one general alphabetical order by Bonfretc (1631, etc.); and finally edited by J. Clericus, Amst. 1707, etc. [The best edition is that of Larsen and Parthey, Berlin, 1802—A.] This tract contains notices (often very valuable, often absolutely absurd) of the situation of many ancient places of Palestine, as far as they were known to the two men who in their day were probably best acquainted with the subject. In connection with it, see Jerome's Ep. ad Eustochium; Ep. Paula — an itinerary through a large part of the Holy Land. Others of Jerome's Epistles, and his Commentaries, are full of information on the country.

3. The most important of the early travellers— from Arcul (A. D. 700) to Maundrell (1697)—are contained in Early Travels in Palestine, a volume published by Bohn. The shape is convenient, but the translation is not always to be implicitly relied on.

4. ReLand.—H. ReLändi Peanutmex Monumentum Veteris Historiae, 1714. A treatise on the Holy Land in three books: 1. The country; 2. The distances; 3. The places; with maps (ex cellent for their date), prints of coins and inscriptions. ReLand exhausts all the information obtainable on his subject down to his own date (he often quotes Maundrell, 1703). His learning is immense, he is extremely accurate, always ingenious, and not wanting in humor. But honesty and strong sound sense are his characteristics. A sentence of his own might be his motto: "Conjecture, quibus non despectamus" (p. 139), or "Ego nil nuncum" (p. 671).

5. Benjamin of Tudela. — Travels of Rabbi Benjamin (in Europe, Asia, and Africa) from 1160-73. The best edition is that of A. Asher, 2 vols.

a Chilly nights, succeeding scorching days, have branded a characteristic of the East ever since the days of Jacob (Gen. xxxi. 40; Jer. xxxxii. 30). [See Hack- ett's Illustr. of Scripture, pp. 144-46.]

b A list of all the works on Palestine which have any pretensions to importance, with full critical re ad. Mirza, is given by Ritter at the commencement of the 2d division of his eighth volume (Jordan).
PALESTINE

1840-41. The part relating to Palestine is contained in pp. 61-87. The editor's notes contain some curious information; but their most valuable part (ii. 397-445) is a translation of extracts from the work of Lestari R. Muse hat-Parchi on Palestine (A. D. 1314-22). These passages notices of places and identifications are very valuable, more so than those of Benjamin. The original work, Coffret du Jardin, "knop and flower," has been reprinted, in Hebrew, by Edelmann, Berlin, 1832 Other itineraries of Jews have been translated and published by Carmoly (Brux, 1847), but they are of less value than the two already named.

6. Abulafia. — The chief Moslem accounts of the Holy Land are those of Edrisi (cir. 1150), and Abulafia (cir. 1300), translated under the titles of Tabula Syria, and Desc. Arabia. Extracts from these, and from the great work of Yakoot which are given by Schultein in an Index Geographices appended to his edition of Rabbadim's Life of Saladin, folio, 1755. Yakoot has yet to be explored, and no doubt he contains a mass of valuable information.

7. Quaresmius. — Terra Sancte Elucidatio, etc. Ant. 1629, 2 vols. folio. The work of a Latin monk who lived in the Holy Land for more than twelve years, and rose to be Principal and Canonicus Apostolic of the country. It is divided into eight books the first three, general considerations, the remainder peregrinations through the Holy Land, with historical accounts, and identifications (often incorrect), and elaborate accounts of the Latin traditions attaching to each spot. and of the ecclesiastical establishments, military orders, etc., of the time. It has a curious index. Similar information is given by the Abbé Mislin (Les Saints Lieux. Paris, 1858, 3 vols. 8vo); but with less elaboration than Quaresmius, and in too hostile a vein towards Lamartine and other travellers.

8. The great burst of modern travel in the Holy Land began with Sesten and Barekhardt. Sesten resided in Palestine from 1805 to 1807, during which time he travelled on both E. and W. of Jordan. He was the first to visit the Hauran, the Ghör, and the mountains of Ajjun; he travelled completely round the Dead Sea, besides exploring the mountains of the Syrian desert at a second time. As an experienced man of science, Sesten was charged with collecting antiquities and natural objects for the Oriental Museum at Geneva; and his diaries contain inscriptions, and notices of flora and fauna, etc. They have been published in 3 vols., with a 4th vol. of notes (but without an index), by Kruse (Berlin, 1854-59). The Palestine journeys are contained in vol. 1 and 2. His letters, founded on these diaries, and giving their results, are in Zach's Monatsh. Corresp. vol. 17, 18, 26, 27.

9. Barekhardt. — Travels in Syria and the Holy Land, 4to, 1822. With the exception of an excursion of twelve days to Safed and Nazareth, Barekhardt's travels S. of Damascus were confined to the east of the Jordan. These regions he explored and described more minutely than Sesten, or any later traveller till Wetstein (1861), and even his researches do not extend over so wide an area. Barekhardt made two tours in the Hauran, in one of which he penetrated first of Europeans into the mysterious Leja. The southern portions of the Transjordanic country he travelled in his journey from Damascus to Petra and Sinai. The fullness of the notes which he contrived to keep under the very difficult circumstances in which he travelled is astonishing. They contain a multitude of inscriptions, long catalogues of names, plans of sites, etc. The strength of his memory is shown not only by these notes but by his constant references to books, from which he would turn out off. His diaries are interspersed with lengthened accounts of the various districts, and the manners and customs, commerce, etc., of their inhabitants. Barekhardt's accuracy is universally praised. No doubt justly. But it should be remembered that on the E. of Jordan no means of testing him as yet exist; while in other places his descriptions have been found imperfect or at variance with facts. The volume contains an excellent preface by Colonel Leake, but is very defective from the want of an index. This is partially supplied in the German translation (Weimar, 1823-24, 2 vols. 8vo), which has the advantage of having been edited and annotated by Goscinus.

10. Holy and Mangles. — Travels in Egypt and Nubia, Syria and the Holy Land (in 1817-18). Hardyly worth special notice except for the portions which relate their route on the east of Jordan, especially about Kerek and the country of Moab and Ammon, which are very well told, and with an air of simple faithfulness. These portions are contained in chapters vi. and vii. The work is published in the Home and Col. Library, 1847.

11. Robinson. — Biblical Researches in Palestine, etc., in 1828-1844, 1st ed. 1841, 3 vols. 8vo; 2d ed. 1856, 2 vols. 8vo. (2.) Later Bib. Res. in 1852, 8vo. 1856. Dr. Robinson is the most important work on the Holy Land since Reland.

The knowledge of the subject and its literature is very great, his common sense excellent, his qualifications as an investigator and a describer remarkable. He had the rare advantage of being accompanied on both occasions by Dr. Eli Smith, a long resident in Syria, and perfectly versed in both classical and vernacular Arabic. Thus he was enabled to identify a host of ancient sites, which are mostly discussed at great length, and with full references to the authorities. The drawbacks to his work are a want of knowledge of architectural art, and a certain dogmatism, which occasionally causes us to contempt for these who differ with him. He too unim nately disregards tradition, an extreme fully as bad as its opposite in a country like the East.

The first edition has a most valuable Appendix, containing lists of the Arabic names of modern places in the country, which in the second edition are omitted. Both series are furnished with indexes, but those of Geography and Antiquities might be extended with advantage.

* Physical Geography of the Holy Land, by Edward Robinson (Boston, 1865, pp. xvi., 394). This is a posthumous work, but eminently worthy of the author's reputation. At the outset he points out our best sources of a knowledge of sacred geography. The book seems not to have obtained the general recognition which it deserves.

12. Wilson. — The Land of the Bible visited, etc., 1847, 2 vols. 8vo. Dr. Wilson traversed the Holy Land twice, but without going out of the usual routes. He paid much attention to the toponymy, and keeps a constant eye on the reports of his predecessors Dr. Robinson. His book cannot be neglected with safety by any student of the com-

* For examples of this see Robinson, Bib. Res. in 828, 908, 475, 491. Stanley, Swat & Pal. vol. 61, 72.
ty; but it is chiefly valuable for its careful and detailed accounts of the religious bodies of the East, especially the Jews and Samaritans. His Indian and Arab informants, having access to him in Arabic, he was able to converse freely with all the people he met, and his inquiries were generally made in the direction just named. His notice of the Samaritans is unusually full and accurate, and illustrated by copies and translations of documents and information not elsewhere given.

* Bonar and Maclear’s Narrative of a Mission to the Jews in Palestine (Edinb. 1852), often reprinted, continues to be one of the best sources of information on this subject. H.

13. Schwarz. — A Description of Geography, etc., of Palestine, Philad. 1836, 8vo. A translation of a work originally published in Hebrew (Sopher Tebhuch, Jerusalem, 5605, A. p. 1845) by Rabbi Joseph Schwarz. Taking as his basis the catalogues of Joshua, Chronicles, etc., and the numerous topographical notices of the rabbinical books, he proceeds systematically through the country, suggesting identifications, and often giving curious and valuable information. The American translation is almost useless without a map of an index. This is in some measure supplied in the German version, Die heilige Land, etc., Frankfurt a. M. 1852.

De Saulcy’s large autographic map of the Holy Land, etc., 1855, 2 vols. 8vo, with Atlas of Maps and Plates, lists of Plants and Insects. Interesting rather from the unusual route taken by the author, the boldness of his theories, and the atlas of admirably engraved maps and plates which accompanies the text, than for its own merits. Like many French works, it has no index. Translated: Narrative of a Journey, etc., 2 vols. 8vo, 1855. See The Dead Sea, by Rev. A. A. Issacs, 1857. Also a valuable Letter by “A Pilgrim” in the Athenaeum, Sept. 9, 1854.

* De Saulcy has also published: Voyage en Terre Sainte, 2 vols., Paris, 1855, 8vo, with maps and wood-cuts. Les dernieres jours de Jerusalem, Paris, 1860, 8vo, with views, plans, and a map of the Holy City. These works are regarded as more valuable than his earlier volumes.

15. Lynch. — Official Report of the United States Expedition to explore the Dead Sea and the Jordan, 4to, Baltimore, 1852. Contains the daily record of the Expedition, and separate Reports on the Ornithology, Botany, and Geology. The last of these Reports is more particularly described at pp. 2933, 2974.

* L. Vignes. — Extrait des Notes d’un Voyage d’exploration a la Mer Morte, dans la Wady Arabah, etc. (Paris, 1865).

16. Stanley. — Sinai and Palestine, 1833 [6th ed. 1869], 8vo. Professor Stanley’s work differs from those of his predecessors. Like them he made a long and laborious journey in the country, is intimately acquainted with all the authorities, ancient and modern, and has himself made some of the most brilliant identifications of the historical sites. But his great object seems to have been not so much to make fresh discoveries, as to apply those already made, the structure of the country and the peculiarities of the scenery, to the elucidation of the history. This he has done with a power and a delicacy truly remarkable. To the sentiment and colouring of his style, the genial freshness of Miss Martineau, and the sound judgment of Robinson, he adds a reverent appreciation of the subject, and a care for the smallest details of the picture, which no one else has yet displayed, and which renders his descriptions a most valuable commentary on the Bible narrative. The work contains an Appendix on the Topographical Terms of the Bible, of importance to students of the English version of the Scriptures.

See also a paper on “Sacred Geography” by Professor Stanley in the Quarterly Review, No. 56, 1854.

* For valuable monographie sketches, see Rosen’s art. Der Thal u. die Umggebung Hebruns, in Zeitsch. d. M. Gesellschaft, xii. 377-513, and Pastor Valletier’s Itinéraire zur Topographie des Stammes Benjamin, ibid. xii. 161 ff.

The Bibliotheca Sacra (vols. i.-xxvi., 1844-1869) is particularly rich in articles on Biblical geography from Dr. Robinson and various American missionaries in Palestine and other parts of the East. The July number for 1869 (pp. 541-71) contains a valuable paper on Mount Lebanon by Dr. Laurie, founded in part on his own personal observations.

17. Toldt. — Berliner, 1849: Topographie von Jerusalem u. seine Umgebungen, 1852. These works are models of patient industry and research. They contain everything that has been said by everybody on the subject, and are truly valuable storehouses for those who are unable to refer to the originals. His Deutsche Wanderung, 8vo, 1859, describes a district but little known, namely, part of Philistia and the country between Hebron and Ramleh, and thus possesses, in addition to the merits above named, that of novelty. It contains a sketch-map of the latter district, which corrects former maps in some important points.

* Dr. Toldt made a fourth journey to Palestine in 1865. His main object was to revisit Nazareth and collect materials for a special history of that place. But owing to cholera there, he was compelled to give up that purpose, and after a hurried visit to Jerusalem, returned to Europe. For the results of this journey see his N a z a r e t in Palastina (Berlin, 1860), described in note c, p. 2073 (Amcr. ed.).

18. Van de Velde. — Syria and Palestine, 2 vols. 8vo, 1854. Contains the narrative of the author’s journeys while engaged in preparing his large Map of the Holy Land (1857), the best map yet published [Deutsche Ausgabe, nach d. 2. Aufl. d. Map of the Holy Land,” Gotth., 1868] considerably improved]. A condensed edition of this work, omitting the purely personal details too frequently introduced, would be useful. Van de Velde’s Meinoir, 8vo, 1858, gives elevations, latitudes and longitudes, routes, and much very excellent information. His P a g e s d’Irland [Paris, 1857-58], 100 colored Lithographs from original sketches, are accurate and admirably executed, and many of the views are unique.

19. Bitter. — Die Vergleichende Erdkunde, etc. The six volumes of Bitter’s great geographical work which relate to the peninsula of Sinai, the Holy Land, and Syria, and form together Band viii. They may be conveniently designated by the following names, which the writer has adopted in his other articles: 1. Sinai. 2. Jordan. 3. Syria (Index). 4. Palestine. 5. Lebanon. 6. D a m a s k u s (Index).

Parts of this great work relating to the Sinaiic Peninsula and Palestine proper have been condensed and translated, with brief additions, by
These observations, especially the exploration undertaken by Barcklandt, and recently by Cyril Graham (Cambridge Essays, 1858; Trans., R. S. Lit. 1869, etc.). [Mr. Porter has given the results of his exploration of this region, in his Giant Cities of Bishan (1869). — H.] Drew, Narrative Lands in Connection with their History, 1869.

Two works by ladies claim special notice, Egypt and Phælie, and Syrian Shores, by Miss E. A. Beamont. 2 vols. 1861. The 2d vol. contains the record of six months' travel and residence in the Holy Land, and is full of keen and delicate observation, caught with the eye of an artist, and characteristically recorded. Domestic Life in Palestine, by Miss Rogers (1862), is, what its name purports, an account of a visit of several years to the Holy Land, during which, owing to her brother's position, the author had opportunities of seeing at leisure the interiors of many unsouplisticated Arab and Jewish household, in places out of the ordinary track, such as few Englishwomen ever before enjoyed, and certainly none have recorded. These she has described with great skill and fidelity, and with an abstinence from descriptions of matters out of her proper path or at second-hand which is truly admirable.

It still remains, however, for some one to do for Syria what Mr. Lane has so faultlessly accomplished for Egypt, the more to be desired because the time is fast passing, and Syria is becoming every day more hallowed by the West.

A. Views. — Two extensive collections of Views of the Holy Land exist — those of Bartlett and of Sobert. Pictorially beautiful as these plates are, they are not so useful to the student as the very accurate views of William Tipping, Esq. published in Trail's Josephus, some of which have been inserted in the article Jerusalem. There are some instructive views taken from photographs, in the last edition of Keith's Land of Israel. Photographs have been published by Frith, Robertson, Rev. G. W. Bridges, and others. Photographs of places taken by Salzmann, whose plates are accompanied by a treatise, Jerusalem, Étude, etc., (Paris, 1856).

* Those of Mr. Frith (see above) are superbly number four, and are superbly executed (on cards of 2 inches by 1 1/2). They embrace views of places and antiquities in Egypt and Jerusalem, as well as in Palestine. A large and splendid collection of photographs accompanies the Ordnance Survey of Jerusalem. They furnish a panoramic view of the city and its environs (Olivet, Getsemane, Valley of Jehoshaphat, etc.), a view of important sections of the city walls, and the walls of the Mosque of Omar, of the principal modern edifices, of numerous ancient monuments, etc., etc. The Palestine Exploration Fund has published numerous photographs, maps, and scenery in the Holy Land (numbering 344).

Maps. — Mr. Van de Velde's map, already mentioned, has superseded all its predecessors; but much still remains to be done in districts out of the track usually pursued by travellers. On the east of Jordan, Kiepert's map (in Wetzstein's Handwörter) is as yet the only trustworthy document.

The new Admiralty surveys of the coast are understood to be rapidly approaching completion, and will leave nothing to be desired.

* The best collection of maps for the geography of Palestine, both ancient and modern, is no doubt the Bible Atlas of Maps and Plans, by Samuel Clark, M. A. (London, 1838), published by the Society for Promoting Christian Knowledge. It contains an index compiled by Mr. Grove, representing all the instances of the occurrence of any geographical name in the English version of the O. and N. Testaments and the Apocrypha, with its original in Hebrew or Greek, and the modern name of its site, whether known or only conjectured. In all cases, what may be regarded as certain is distinguished from what is uncertain. It contains also important dissertations and notes on questions of identification of places and points of archaeology, history, and exegesis.

Dr. Theodor Menke, Bibl.-Atl. in 8 Blättern (Gotha, 1838). Similar to the preceding, but less complete. In addition to other points, it illustrates especially the topography of Jerusalem in the light of recent discoveries. Prominence is given to the ethnography of the ante-Israelite nations or races. It is a great convenience that the author distinguishes rivers and Wadis from each other by different signs on the map.

The large wall Map of Palestine and other parts of Syria, by H. S. Osborn, E. D. and Lyman Coleman, D. D., Philad. (1868?), 6 ft. by 9 ft., is well adapted to its purpose. There is a good relief map of Palestine by H. W. Altmüller, Die Heilige Land u. der Libanon in plastischer Darstellung nach den neuesten Forschungen, Cassel, 1869. A Religions von Jerusalem was also published by Altmüller in 1859; "improved and corrected by Conrad Schick," Cassel, 1865.

II. Of works on Jerusalem the following may be named:

PALLU

The account of the modern town, and an essay on the architectural history of the Church of the Sepulchre by Professor Willis. Mr. Williams in most if not all cases supports tradition.

Barclay. — *The City of the Great King*; Philad., 1838. An account of Jerusalem as it was, is, and will be. Dr. R. had some peculiar opportunities of investigating the subterraneous passages of the city, and the Haram area, and his book contains many valuable notices. His large map of Jerusalem and Environs, though badly engraved, is accurate and useful, giving the form of the ground very well. Ferguson. — The Ancient Topography of Jerusalem, etc., 1847, with 7 plates. Treats of the Temple and the walls of ancient Jerusalem, and the site of the Holy Sepulchre, and is full of the most original and ingenious views, expressed in the boldest language. From architectural arguments the author maintains the so-called Mosque of Omar to be the real Holy Sepulchre. He also shows that the Temple, instead of occupying the whole of the Haram area, was confined to its southwestern corner. His arguments have never been answered or even fairly discussed. The remarks of some of his critics are, however, dealt with by Mr. F. in a pamphlet, Notes on the Site of the Holy Sepulchre, 1861. See also vol. ii. of this Dictionary, pp. 1310–1320.

* See especially Dr. Woulcott’s elaborate examination of Mr. Ferguson’s theory, under the head “Topography of the City,” vol. ii., pp. 1330–1337. Amer. ed. H.

Thrupp. — Ancient Jerusalem, a new Investigation, etc., 1855.

* We should recall the reader’s attention here to the *Ordnance Survey of Jerusalem* (Lond., 1835), and Lieut. Warren’s Reports, etc., in the service of the Exploration Fund, detailing his labors and discoveries in and around the Holy City.

A good resume of the controversy on the Holy Sepulchre is given in the *Museum of Classical Antiquities*, No. viii., and Suppl.

* The Holy Sepulchre, and the Royal Temple at Jerusalem, two lectures before the Royal Institution, 1862 and 1865, by James Ferguson. He maintains here, of course, his peculiar views on the points in question.

H.

Maps. — Besides Dr. Barclay’s, already mentioned, Mr. Van de Velde has published a very clear and correct map (1838). So also has Signor Pierotti (1861). The latter contains a great deal of information, and shows plans of the churches, etc., in the neighborhood of the city.

G.

PALM-TREE

PALMER-WORM (Ὄφθαλμος γάτας: Καραντίνα: *cerave*) occurs Joel i. 4, ii. 25: Am. iv. 9. Bochart (*Hieroz. iii. 256*) has endeavored to show that *gatān* denotes some species of locust; it has already been shown that the ten Hebrew names to which Bochart assigns the meaning of different kinds of locusts cannot possibly apply to so many, as not more than two or three destructive species of locust are known in the Bible Lands. [*Locust; CATERPILLAR.*] The derivation of the Hebrew word from a root which means “to cut off,” is as applicable to several kinds of insects, with their perfect or larva condition, as it is to a locust: accordingly we prefer to follow the LXX. and Vulg., which are consistent with each other in the rendering of the Hebrew word in the three passages where it is found. The Καραντίνα of Aristotle (Anim. Hist. ii. 17, 4, 5, 6) evidently denotes a caterpillar, so called from its “hanging itself” up (στήλατος) to move, as the caterpillars called geometric, or else from the habit some caterpillars have of “coiling” themselves up when handled. The *Ervos* of the Vulg. is the Καραντίνα of the Greeks, as is evident from the express assertion of Columella (*De Re Rost.* xi. 3, 68, *Script. R. R.* ed. Schneider). The Chaldee and Syriac understand some locust *yarva* by the Hebrew word. Oedmann (*Vulg. Suman. Exe. ii. c. vi. p. 110*) is of the same opinion. Tychsen (*Comment. de locustis, graeco*) p. 88) identifies the *gatān* with the *Grylliades cruciatus*, Lin., a South African species. Michaelis (*Supp.* p. 220) follows the LXX. and Vulg. We cannot agree with Mr. Pennun (*Kitto’s Cyc. art. “Locust”) that the predapations ascribed to the *gatān* in Amos better agree with the characteristics of the locust than of a caterpillar, of which various kinds are occasionally the cause of much damage to fruit-trees, the fig and the olive, etc. [*DEL.*]

W. H.

PALM-TREE (רְמֶל: *Phoinix*). Under this generic term many species are botanically included; but we have here only to do with the Date-palm, the *Phoenicium dactylifera* of Linnaeus. It grew very abundantly (more abundantly than now) in many parts of the Levant. On this subject generally it is enough to refer to Litter’s monograph ("Über die geographische Verbreitung der Dattelpalme") in his *Erdkunde*, and also published separately.

While this tree was abundant generally in the Levant, it was regarded by the ancients as peculiarly characteristic of Palestine and the neighboring regions. (Zypa, *Grn. phaen. des palmarum*, Xen. Cyrop. vi. 2, § 22. Johnxxvii. 27: Plin. H. N. xii. 4. Palmetes [*Judaeis*] procinctus et decor, Tac. Hist. v. 6. Compare Strabo xvi. pp. 800, 818; Theophrast. Hist. Plant. ii. 8; Paus. ix. 19, § 5). The following places may be enumerated from the Bible as having some connection with the palm-tree, either in the derivation of the name, or in the mention of the tree as growing on the spot.

(1) At Eloth, one of the stations of the Israelites between Egypt and Sinai, it is expressly stated that there were "twelve wells (fountains) of water, and threescore and ten palm-trees" (Ex. xv. 27; Num. xxxiii. 9). The word "fountains" of the latter passage is more correct than the "wells" of the former: it is more in harmony, too, with the habits of the tree; for, as *Theophrastus* says (i. c.),
Palm-Tree

The palm ἑξάρτης δαμάλιον τῷ ναυτασίῳ δέντον. There are still palm-trees and fountains in Wady Ghairwah, which is generally identified with Elim (Rob. Bibl. Res. i. 69).

(2.) Next, it should be observed that ELATH (Deut. ii. 8: 1 K. iv. 26: 2 K. xiv. 22, xvi. 6: 2 Chr. viii. 17, xxvi. 2) is another plural form of the same word, and may likewise mean "the palm-tree," which is set before us in the vision of Ezekiel (xlviii. 19, xlviii. 28) as a point of the southern border of the land to be measured eastwards and westwards. Robinson identifies it with the τουραμάτα of Tobelma (v. 16), and thinks its site may be at cf. Milk, between Hebron and Wady Musa (Bibl. Res. ii. 198, 202). It seems to Je- rone to have been in his day a Roman fortress.

(7.) There is little doubt that Solomon's Tar- mont, afterwards the famous Palmyra, on another desert frontier far to the N. E. of Jerusalem, is primarily the same word; and that, as Gibson says (Decree and Fall, ii. 38), "the name, by its significant in the Syriac as well as in the Latin language, denoted the multitude of palm-trees which afforded shade and respite to that temperate region." In fact, while the undoubted reading in 2 Chr. viii. 4 is [section text], the best text in 1 K. xiv. 18 is [section text]. See Joseph. Ant. viii. 6, § 1. The springs which he mentions there make the palm-trees almost a matter of course.

(8.) Now again are the places of the N. T. with- out their associations with this characteristic tree of Palestine. Betanty means "the house of dates;" and thus we are reminded that the palm was the only characteristic tree of the neighborhood of the Mount of Olives. This helps our realization of our Saviour's entry into Jerusalem, when the people "took branches of palm-trees and went forth to meet Him" (John xii. 13). This again carries our thoughts back- wards to the time when the Feast of Tabernacles was first kept after the Captivity, when the procla- mation was given that they should "go forth unto the mount and fetch palm branches" (Neh. viii. 15) — the only branches, it may be observed (those of the willow excepted), which are specified by name in the original institution of the festival (Lev. xxi. 40). From this Gospel incident comes Palm Sunday (Dominica in Rastis Palmam), which is observed with much ceremony in some countries where true palm can be had. Even very large cities in the desert, for instance the country people use a substitute which comes into flower just before Easter: —

"And willow branches bellow, That they palms do use to call."

(9.) The word Φοινίκα (phoinix), which occurs twice in the N. T. (Acts xi. 19, xx. 30), is in all probability derived from the Greek word (φοίνιξ) for a palm. Sidonians mentioned palms as a product of Phoenicia (Pausan. Majorian. p. 44). See also Phil. H. n. iii. 4: Athen. i. 21. Thus we may imagine the same natural objects in connection with St. Paul's journeys along the coast to the north of Palestine, as with the wanderings of the Israelites through the desert. We have on the one hand the palms of Wady Ghairwah, and on the other the palm trees of Egypt (pp. 384, 388). From the passages where there is a literal refer
Palm-Tree

find palm-trees on the posts of the gates (Ez. xli. 16, 22, 25; 31, 34, 37), and also on the walls and the doors (xlii. 18-20, 23, 26). This work seems to have been in relief. We do not sitz to inquire whether it had any symbological meanings. It was a natural and doubtless customary kind of ornamentation in eastern architecture. Thus we are told by Herodotus (ii. 160) of the hall of a temple at Sais in Egypt, which was ηπικυμην την του θεουτα μεσαιμαινον; and we are familiar now with the same sort of decoration in Assyrian buildings (Layard's Nineveh and its Remains, ii. 137, 386, 401). The image of such rigid and motionless forms may possibly have been before the mind of Jeremiah when he said of the idols of the heathen (x. 4, 5), "They fasten with nails and with hammers, that it move not: they are upright as the palm-tree, but speak not."

(2.) With a tree so abundant in Judaea, and so marked in its growth and appearance, as the palm, it seems rather remarkable that it does not appear more frequently in the imagery of the O. T. There is, however, in the Psalms (xiv. 2) the familiar comparison, "The righteous shall flourish like the palm-tree;" which suggests a world of illustration, whether respect be had to the orderly and regular aspect of the tree, its fruitfulness, the perpetual greenness of its foliage, or the height at which the foliage grows, as far as possible from earth and as near as possible to heaven. Perhaps none point is more worthy of mention, if we wish to pursue the comparison, than the chastity of the fibre of the palm-stalk, and its determined growth upwards, even when loaded with weights ("situtit in pondo palmæ"). Such particulars of resemblance to the righteous men were variously dwelt on by the early Christian writers. Some instances are given by Celsius in his Hierobolionum (Psalm 1747), i. 522-547. One, which he does not give, is worthy of quotation: "Well is the life of the righteous likened to a palm-tree, in that the root below is rough to the touch, and in a manner enclosed in dry bark, but above it is adorned with fruit, fair even to the eye; below, it is compressed by the enfoldings of its bark; above, it is spread out in amplitude of beautiful greenness. For so is the life of the elect, despised below, beautiful above. Down below it is, as it were, encased in many barks, in that it is stratified by innumerable afflictions; but on high it is expanded into a foliage, as it were, of beautiful greenness by the amplitude of the rewarding" (St. Gregory, Mor. xii. 2, xiii. 12).

There is a fourth passage in the Apocalypse, as commonly published in English, which approximates closely to the imagery of the Apocalypse. "I asked the angel, What are these? He answered and said unto me, These be they which have put off the mortal clothing, and now they are crowned and receive palms. Then said I unto the angel, What young person is it that crowneth them and giveth them palms in their hands? So he answered and said unto me, It is the Son of God, whom they have confessed in the world" (2 Esdr. ii. 44-47). This is clearly the approximation not of anticipation, but of an imitator. Whatever may be determined concerning the date of the rest of the book, this portion of it is clearly subsequent to the Christian era. [EZEKIAH, THE SECOND BOOK OF.]
Palm-Tree

As to the industrial and domestic uses of the palm, it is well known that they are very numerous; but there is no clear allusion to them in the Bible. That the ancient Orientals, however, made use of wine and honey obtained from the palm-tree is evident from Herodotus (i. 193, ii. 86), Strabo (xvi. c. 14, ed. Kram.), and Pliny (H. N. xiii. 4). It is indeed possible that the honey mentioned in some places may be palm-sugar. (In 2 Chr. xxxvi. 9 the margin has 'date-s.') There may also (see ii. 7-9) will go up to the palm-tree, I will take hold of the boughs thereof,' be a reference to climbing for the fruit. The LXX. have αὐθήκους εἰς τῷ φοίνικι, κρατήσας τῶν βαρών αὐτῶν. So in ii. 3 and elsewhere (e. g. Ps. i. 3) the fruit of the palm may be intended: but this cannot be proved. [SUGAR; WINE.]

Group of Dates.

It is curious that this tree, once so abundant in Judaea, is now comparatively rare, except in the Phœnician plain, and in the old Phœnicia about Beyrouth. A few years ago there was just one palm-tree at Jericho; but that is now gone. Old trunks are washed up in the Dead Sea. It would almost seem as though we might take the history of this tree in Palestine as emblematical of that of the people whose home was once in that land. The well-known coin of Vespassian representing the palm-tree with the legend 'Judaea capta,' is figured in vol. ii. p. 1368. J. S. H.

Palm-sugar.

[Medicine, p. 1806 b.]

Palti (παλτή [delicence of Jehovah], ges.): Phalti [Vat. -pliti; Phaliti]. The son of Rapha; a Benjamite who was one of the twelve spies (Num. xiii. 9).

Paltiel (παλτίελ [delicence of God]: Phaltil; [Vat. -plilid]. The son of Azzan and prince of the tribe of Issachar (Num. xxxiv. 26). He was one of the twelve appointed to divide the land of Canaan among the tribes west of Jordan.

Paltite. THE (παλτίτης [patt. from Palti]): ο Κελοτή [Vat. -thet; Alex. o φαλτοτής, de Phaliti]. Hezeq the 'Paltite' is named in 2 Sam. xxiii. 26 among David's mighty men. In 1 Chr. xi. 27, he is called 'the Pelonite,' and such seems to have been the reading followed by the Alex. MS. in 2 Sam. The Pashito-Syriac, however, supports the Hebrew, 'sheshots of Pechat.' But in 1 Chr. xxviii. 10, 'Hezeq the Pelonite' of the tribe of Ephraim is again mentioned as captain of 24,000 men of David's army for the seventh month, and the balance of evidence therefore inclines to 'Pelonite' as the true reading. The variation arose from a confusion between the letters ב and כ. In the Syriac of 1 Chr. both readings are combined, and Hezeq is described as 'of Paltin.'

Pamphylia (Παμφύλια), one of the coast-regions in the south of Asia Minor, having Cilicia on the east, and Lycia on the west. It seems in early times to have been less considerable than either of these contiguous districts; for in the Persian war, while Cilicia contributed a hundred ships and Lycia fifty, Pamphylia sent only thirty (Herod. viii. 91, 92). The name probably then embraced little more than the cresent of comparatively level ground between Taurus and the sea. To the north, along the heights of Taurus itself, was the region of Pisidia. The Roman organization of the country, however, gave a wider range to the term Pamphylia. In St. Paul's time it was not only a regular province, but the Emperor Claudius had united Lycia with it ( Dio Cass. x. 17), and probably also a good part of Pisidia. However, in the N. T., the three terms are used as descriptive of Pamphylia that St. Paul first entered Asia Minor, after preaching the Gospel in Cyprus. He and Barnabas sailed up the river Cestrus to Perga (Acts xiii. 13). Here they were abandoned by their subordinate companion John-Mark: a circumstance which is alluded to again with much feeling, and with a pointed mention of the place where the separation occurred (Acts xvi. 38): 'It might be the pain of this separation which induced Paul and Barnabas to leave Perga found by Sir G. Wilkinson at Theseis (c. 151, ed. 1584). It is certainly curious there is no distinct mention of dates in the Bible, though we cannot doubt that the ancient Hebrews used the fruit, and were probably acquainted with the art of fertilizing the flowers of the female plant. * Mr. Tristram now informs us that this is not strictly the case. 'We discovered one wild palm of considerable size, with a bunch of young ones round it, on the edge of the stream, a little below the modern village 'Nablus, lost of the Bible, 282.'

* The Greek (μαντώτας αὐτής), as de Wette remarks on Acts xvi. 38, implies that Mark was cultu
without delay. They did however preach the Gospel there on their return from the interior (Acts xiv. 24, 25). We may conclude, from Acts ii. 10, that there were many Jews in the province; and possibly Perga had a synagogue. The two missionaries finally left Pamphylia by its chief seaport, Attalia. We do not know that St. Paul was ever in this district again: but many years afterwards he sailed near its coast, passing through "the sea of Cilicia and Pamphylia" on his way to a town of Lyca (Acts xxvii. 5). We notice here the accurate order of these geographical terms, as in the above-mentioned land journey we observe how Cilicia and Pamphylia occur in their true relations, both in going and returning (εἰς Παφῖν τής Παμφυλίας ... ἀπὸ τῆς Περγής εἰς Ἀντιοχείαν τῆς Πασαλίας, xiii. 13, 14); διελθόντες τὴν Πασαλίαν Ἰάβω εἰς Παμφυλίαν, xiv. 24).

J. S. H.

PAN. Of the six words so rendered in A.V., two, monobath and μυτήρ, seem to imply a shallow pan or plate, such as is used by Bedouins and Syrians for baking or dressing rapidly their cakes of meal, such as were used in legal oblations: the others, especially σιρ, a deeper vessel or cauldron for boiling meat, placed during the process on three stones (Burckhardt, Notes on Bed. i. 58; Niebuhr, Descr. de l'Arab. p. 46; Lane, Mod. Egypt. i. 181). [CALDIMON.]

H. W. P.

PANNAG ( بكلى), an article of commerce exported from Palestine to Tyre (Ez. xxvii. 17), the nature of which is a pure matter of conjecture, as the term occurs nowhere else. In comparing the passage in Ezekiel with Gen. xliii. 11, where the production of Palestine is enumerated, the omission of fragrans and kalana (A.V. "spices and myrrh") in the former is very observable, and leads to the supposition that pannag represents some of the spices grown in that country. The LXX., in rendering it κακία, favors this opinion, though it is evident that cassia cannot be the particular spice intended (see ver. 19). Hitzig observes that a similar term occurs in Sanskrit (पन्यतंग), and the Syriac version, on the other hand, understands by it "μιλλέ" (puniium milliueum); and this view is favored by the expression in the book of Solar, quoted by Gesenius (s. c.), which speaks of "a herd of pannag:" though this again is not decisive, for the pannag may equally well have been some flavoring substance, as seems to be implied in the doubtful equivalent given in the Targum.

PAPER. [WRITING.]

* PAPER-REEDS. "The paper-reeds by the brooks" (Is. xix. 7, A. V.) is probably a mistranslation for "the meadows by the river" (I. e. the Nile). So, substantially, Gesenius, First, De Wette, Knobel, Ewald. [REED 3.]

ΑΡΑΒΙΑ. [REED.]

PARABLE. (µαχαί, másháh: παραβολή: po-

bie in thus leaving his associates. Yet it is pleasing to know that the estrangement was only temporary; for Mark became subsequently Paul's fellow-traveller (Col. i. 10, and is commended by him as eminently useful in the ministry (2 Tim. iv. 11). H.

a 1. ἀργυροῦ, or ἀργυρίας, or λίβανος; ἀργυρίον εἰς μέγεθος; τοξίς (1 Sam. i. 14); elsewhere "laver" and "hearth," i. e. a brazier or pan for fire (Zech. vi. 6).

2. ἐκ λιβανός, from λίβανος, "bake" (Gen p. 444); ἀργυρίον: σιντεργής (Lev. ii. 5), where it follows ἀργυρίον, cireatura, "frying-pan," and is herefrom distinct from it.

3. ἐκ λιβανός: ἀργυρίον; "a baking-pan" (2 Sam. xiii. 9). Ges. p. 1313.

4. ἀργυρίον: λίβανος: ἀλάς; πὸς ἀπὸ τῆς ἀργυρίου, "boil," joined (2 K. iv. 38) with γείτων, "great," i. e. the great kettle or cauldron.

5. ἀργυρίον: ἱλίον: ἀλάς.

6. ἐκ λιβανός, plural: λίβανον: ἀλάς (2 Chr. xxxiv. 13). In Prov. xix. 24, "dish."
The distinction between the Parable and one cognate form of teaching has been discussed under Parallels. Something remains to be said (1) as to the word, (2) as to the Parables of the Gospels, (3) as to the laws of their interpretation.

1. The word παράβολας does not of itself imply a narrative. The juxtaposition of two things, differing in most points, but agreeing in some, is sufficient to bring the comparison thus produced within the etymology of the word. The παράβολας of Greek rhetoric need not be more than the simplest argument from analogy. — "You would not choose pilots or athletes by lot; why then should you choose the prophets?" (Arístides, ii. 29). In Hellenistic Greek, however, it acquired a wider meaning, coextensive with that of the Hebrew מָשָׁל, for which the LXX. writers, with hardly an exception, make it the equivalent. That word (= similitude), as was natural in the language of a people who had never reduced rhetoric to an art, had a large range of application, and was applied sometimes to the shortest parables (1 Sam. xii. 22, xxiv. 13; 2 Chr. vii. 20), sometimes to dark prophetic utterances (Num. xxiii. 7, 18, xxiv. 3; Ez. xx. 49), sometimes to enigmatical maxims (Ps. lxxviii. 2; Prov. i. 6), or metaphors expanded into a narrative (Ez. xii. 22). In Ecclesiastical the word occurs with a striking frequency, and, as will be seen hereafter, its use by the son of Sirach throws light on the position occupied by parables in our Lord's teaching. In the N.T. itself the word is used with a like latitude. While attached most frequently to the illustrations which have given it a special meaning, it is also applied to a short saying like, "Physician, heal thyself" (Luke iv. 23), to a mere comparison without a narrative (Matt. xxvii. 32), to the figurative character of the Levitical ordinances (Heb. ix. 9), or of single facts in patriarchal history (Heb. xi. 19). The later history of the word is not without interest. Naturalized in Latin, chiefly through the Vulgate or earlier versions, it loses gradually the original idea of figurative speech, and is used for speech of any kind. Medieval Latin gives us the strange form of parabolari, and the descendants of the technical Greek word in the Romance languages are pararé, parra, parabola, parabola (Pier, Roman, Witr. x. 2, v. "Parola").

II. As a form of teaching, the Parable, as has been shown, differs from the Fable, (1) in excluding faute or incarnate creatures passing out of the laws of their nature, and speaking or acting like men, (2) in its higher ethical significance. It differs, it may be added from the Mythos, in being the result of a conscious deliberate choice, not the growth of an unconscious wish, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory, in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a dream, in their own character and costume. The allegory is self-interpreting. The parable demands attention, insight, sometimes an actual explanation. It differs lastly from the Proverb, in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. So far as proverbs go beyond this, and state what they affirm in a figurative form, they may be described as condensed parables, and parables as expanded proverbs (comp. Trench on Parables, ch. i.; and Grotius on Matt. xiii.).

To understand the relation of the parables of the Gospels to our Lord's teaching, we must go back to the use made of them by previous or contemporary teachers. We have sufficient evidence that they were frequently employed by them. They appear frequently in the Genara and Midrash (comp. Lightfoot, Hor. Heb. in Matt. xii. 3; Jost, Jodethanum, ii. 216), and are ascribed to Hillel, Shammai, and other great Rabbis of the two preceding centuries. The pseudepigraph passed upon the great Rabbi Meir, that after his death men ceased to speak parables, implies that, up to that time, there had been a succession of teachers more or less distinguished for them (Sota, fol. 49, in Jost, Jodethanum, ii. 87; Lightfoot, l. c.). Later Jewish writers have seen in this employment of parables a condensation to the ignorance of the great mass of mankind, who cannot be taught otherwise. For them, as for women or children, parables are the natural and fit method of instruction (Maimonides, Paral. Soa. p. 81, in Weiss, on Matt. xiii.), and the same view is taken by Jerome as accounting for the common use of parables in Syria and Palestine (Hieron. in Matt. xviii. 25). It may be questioned, however, whether this represents the use made of them by the Rabbis of our Lord's time. The language of the Son of Simeon confines them to the scribe who devotes himself to study. They are at once his glory and his reward (Eccles. xxix. 3. 3). Of all who eat bread by the sweat of their brow, of the great mass of men in cities and country, it is written that they shall not be found where parables are spoken" (Ibid. xxviii. 33). For these therefore it is probable that the scribes and teachers of the law had simply reduced proverbs and parables, ever perhaps cumbersome and oppressive (Matt. xxiii. 3. 4), formula of prayer (Luke xi. 1), appointed times of fasting and hours of devotion (Mark ii. 18). They, with whom they would not even eat (comp. Weiss and Lamp on John vii. 49), cared little to give even as much as this to the "people of the earth," whom they scorned as "knowing not the law," a brute herd for whom they could have no sympathy. For their own scholastic leaders they had, according to their individual character and power of thought, the casuistry with which the Mishna is for the most part filled, or the parables which here and there give tokens of some deeper insight. The parable was made the instrument for teaching the young disciple to discern the treasures of wisdom of which the wise

in Trench's Parables, ch. iv. Others, presenting some striking superficial resemblance to those of the Parable, the Laborers, the Lost Piece of Money, the Wise and Foolish Virgins, may be seen in Weiss's notes to those parables. The conclusion from this is, that there was at least a generic resemblance between the outward form of our Lord's teaching and that of the Rabbits of Jerusalem.
PARABLE

PARABLE

GAZED" multitude were ignorant. The teaching of our Lord at the commencement of his ministry was, in every way, the opposite of this. The Sermon on the Mount may be taken as the type of the parables, which he spoke, not as the sermons which he uttered distinctly, not indeed without similitudes, but with similitudes which explained themselves. So for some months He taught in the synagogues and on the sea-shore of Galilee, as He had before taught in Jerusalem, and as yet without a parable. But then there comes a change. The direct teaching was met with scorn, unbelief, hardness, and He seems to have, for a time, turned His teaching to the form of parables. The question of the disciples (Matt. xiii. 10) implies that they were astonished. Their Master was no longer proclaiming the Gospel of the kingdom as before. He was falling back into one at least of the forms of Rabbinic teaching (comp. Schechter's Hal. 664. in. Christiai Rabbinum Sonumns). He was speaking to the situation, as it were, which took the marvels which the Rabbis reserved for their chosen disciples. Here for them were two grounds of wonder. Here, for us, is the key to the explanation which he gave, that He had chosen this form of teaching because the people were spiritually blind and deaf (Matt. xiii. 13), and in order that they might remain so (Mark iv. 12). Two interpretations have been given of these words. (1) Spiritual truths, it has been said, are in themselves hard and uninviting. Men needed to be won to them by that which was more attractive. The parable was an instrument of education for those who were children in age or character. For this reason it was chosen by the Divine teacher as fables and stories, "administrica imbecillitatis" (Seneca, Epist. 58), have been chosen by human teachers (Chrysost. Hom. in Isaiam. 34). (2.) Others again have seen in this use of parables something of a penal character. Men have set themselves against the truth, and therefore it hid from their eyes, presented to them in fables in which it is not easy for them to recognize it. To the inner circle of the chosen it is given to know the mysteries of the kingdom of God. To those who are without, all these things are done in parables. Neither view is wholly satisfactory. Each contains a partial truth. All experience shows (1) that parables do attract, and, when once understood, are sure to be remembered; (2) that men may listen to them and see that they have a meaning, and yet never care to ask what that meaning is. Their worth, as instruments of teaching, lies in their being at once a test of character, and in their presenting each "ear of character with that which, as a penalty or blessing, is adapted to it. They withdraw the light from those who love darkness. They protect the truth which they ensnare from the mockery of the scoffer. They leave something even with the careless which may be interpreted and understood afterwards. They reveal, on the other hand, the seekers after truth. These ask the meaning of the parables, will not rest till the teacher has explained it, and led step by step to the laws of interpretation, so that they can "understand all parables," and then pass on into the higher region in which parables are no longer necessary, but all things are spoken plainly. In this way the parable did its work, found out the fit hearers and led them on. And it is to be remembered also that even after this self-imposed law of reserve and reticence, the teaching of Christ presented a marvellous contrast to the narrow exclusiveness of the sermons. The mode of education was changed, but the work of teaching or educating was not for a moment given up, and the aptest scholars were found in those whom the received system would have altogether shut out.

From the time indicated by Matt. xiii., accordingly, parables enter largely into our Lord’s reserved teaching. Each parable of those which we read in the Gospels may have been repeated more than once with greater or less variation (as e. g. those of the Pounds and the Talents, Matt. xxv. 14; Luke xix. 12; of the Supper, in Matt. xiii. 2, and Luke xiv. 16). Everything leads us to believe that there were many others of which we have no record (Matt. xiii. 34; Mark iv. 39). In those which remain it is possible to trace something like an order.

(A.) There is the group with which the new mode of teaching is ushered in, and which have for their subject the laws of the Divine Kingdom, in its growth, its nature, its consummation. Under this head we have—

2. The Wheat and the Tares (Matt. xiii.).
3. The Mustard-Seed (Matt. xiii.: Mark iv.).
4. The Seed cast into the Ground (Mark iv.).
5. The Leaven (Matt. xiii.).
6. The Hid Treasure (Matt. xiii.).
7. The Pearl of Great Price (Matt. xiii.).
8. The Net cast into the Sea (Matt. xiii.).

(B.) After this there is an interval of some months of which we know comparatively little. Either there was a return to the more direct teaching, or else these were repeated, or others like them spoken. When the next parables meet us they are of a different type and occupy a different position. They occur chiefly in the interval between the mission of the seventy and the last approach to Jerusalem. They are drawn from the life of men rather than from the world of nature. Often they occur, not as in Matt. xiii., in discourse to the multitude, but in answers to the questions of the disciples or other inquirers. They are such as these:

9. The Two Debtors (Luke viii.).
10. The Merciful Servant (Matt. xviii.).
11. The Good Samaritan (Luke x.).
12. The Friend at Midnight (Luke xi.).
15. The Fig-Tree (Luke xiii.).
17. The Lost Sheep (Matt. xvii.; Luke xv.).
18. The Lost Piece of Money (Luke xv.)
19. The Prodigal Son (Luke xv.).
20. The Unjust Steward (Luke xvi.).
22. The Unjust Judge (Luke xviii.).
23. The Pharisee and the Publican (Luke xviii.).
24. The Laborers in the Vineyard (Matt. xx.).

(C.) Towards the close of our Lord’s ministry seven: Dean Trench, thirty. By others, the number has been extended to fifty.
immediately before and after the entry into Jerusalem, the parables assume a new character. They are again theocratic, but the place of the Divine Kingdom, in which they chiefly dwell, is that of its final consummation. They are prophetic, in part, of the rejection of Israel, in part of the great retribution of the coming of the Lord. They are to the earlier parables what the prophecy of Matt. xxiv. is to the Sermon on the Mount. To this class we may refer —

25. The Hounds (Luke xix.).
26. The Two Sons (Matt. xvi.).
27. The Vineyard set out to Hulstonhen (Matt. xxi.; Mark xii.; Luke xx.).
28. The Marriage Feast (Matt. xxii.).
29. The Wise and Foolish Virgins (Matt. xxv.).
30. The Talents (Matt. xxv.).
31. The Sheep and the Goats (Matt. xxv.).

It is characteristic of the several Gospels that the greater part of the parables of the first and third groups belong to St. Matthew, emphatically the Evangelist of the Kingdom. Those of the second are found for the most part in St. Luke. They are such as we might expect to meet with in the Gospel which dwell most on the sympathy of Christ for all men. St. Mark, as giving vivid recollections of the acts rather than the teaching of Christ, is the leastest of the three synoptic Gospels. It is not less characteristic that there are no parables properly so called in St. John. It is as if, sooner than any other, had passed into the higher stage of knowledge in which parables were no longer necessary, and therefore dwelt less on them. That which his spirit appropriated most readily were the words of eternal life, figurative it might be in form, abounding in bold analogies, but not in any single instance taking the form of a narrative. 8

Lastly it is to be noticed, partly as a witness to the truth of the four Gospels, partly as a line of demarcation between them and all counterfeits, that the apocryphal Gospels contain no parables. Human invention could imagine miracles (though these too in the spurious Gospels are stripped of all that gives them majesty and significance), but the parables of the Gospels were inimitable and most predictable by any writers of that succeeding age. They possess a life and power which stamp them as with the "image and superscription" of the Son of Man. Even the total absence of any allusion to them in the written or spoken teaching of the Apostles shows how little their minds set afterwards in that direction, how little likely they were to do more than testify what they had actually heard. 9

III. Lastly, there is the law of interpretation. It has been urged by some writers, by none with greater force or clearness than by Chrysostom (Hom. in Matt. 61.), that there is a scope or purpose for each parable, and that our aim must be to discern this, not to find a special significance in each circumstance or incident. The rest, it is said, may be dealt with as the drapery which the parable needs for its grace and completeness, but which is not essential. It may be questioned, however, whether this canon of interpretation is likely to lead us to the full meaning of this portion of our Lord's teaching. True as it doubtless is, that there was in each parable a leading thought to be learnt partly from the parable itself, partly from the occasion of its utterance, and that all else gathers round that thought as a centre, it must be remembered that in the great patterns of interpretation which He himself has given us, there is more than this. Not only the sower and the seed and the several soils have their counterparts in the spiritual life, but the birds of the air, the thorns, the scourching heat, leave each of them a significance. The explanation of the wheat and the tares, given with less fullness, an outline as it were, which the advancing scholars would be able to fill up, is equally specific. It may be inferred from these two instances that we are, at least, justified in looking for a meaning even in the seeming accessories of a parable. If the opposite mode of interpreting should seem likely to lead us, as it has led many, to strange and forced analogies, and an arbitrary dogmatism, the safeguard may be found in our recollecting that in assigning such meanings we are but as scholars guessing at the mind of a teacher whose truths are higher than our thoughts, recognizing the analogies which may have been, but which were not necessarily those which he recognized. No such interpretation can claim anything like authority. The very form of the teaching makes it probable that there may be, in any case, more than one legitimate explanation. The outward fact in nature, or in social life, may correspond to spiritual facts at once in God's government of the world, and in the history of the individual soul. A parable may be at once ethical, and in the highest sense of the term prophetic. There is thus a wide field open to the discernment of the interpreter. There are also restraints upon the mere fertility of his imagination. (1.) The analogies must be real, not arbitrary. (2.) The parables are to be considered as parts of a whole, and the interpretation of one is not to override or encroach upon the lessons taught by others. (3.) The direct teaching of Christ presents the standard to which all our interpretations are to be referred, and by which they are to be measured. (4.) The parables which have been used in illustrating the Teachings of Scripture, or in Silvanus' Epistle; or in the Parables of the Parables, Introductory Remarks; to which one who has once read it cannot but be more indebted than any more references can indicate; Sib. Words of the Lord Jesus, Matt. xiii. 11.)

E. i. P. 11. 11.

* Literature. The following list embraces only a few of the more noticeable works on this subject. For fuller references see Hase's Leben Jesu, 5th Aufl. (1865), §§ 65, and Delair's Cyclop. Bibliographica (Subjects), ed. 1874. 1l. — Charles Bukley, Discourses on the Parables of Our Saviour, and in the Miracles, 4 vols. Lond. 1717. Andrew Gray, A Dissertation of the Parables of our Saviour, with a Disc. on Parables and Allegorical Writing

fair specimen of the genre of this form of teaching among the Jews, or to have been (as chronologically they might have been) borrowed, consciously or unconsciously, from those of Christ, there is still in the latter a portion of the power and beauty, which lies almost beyond the range of comparison, except as to outward form.
PARADISE

On the later Jewish parables, see Tranch's Notes on the Parables, Introd. Rem. ch. iv.; Hurwitz's Hebrew Tales, Lond. 1829, Amer. repr. N. Y. 1847; G. Levi, Parabole, leggende e pensieri, rac- colte da libri talmudici, Firenze, 1861. A. PARADISE (πάραδεσσος; Parádes: παραδείσους; Parádesous,): Questions as to the nature and locality of Paradise as identical with the garden of Gen. ii. and iii. have been already discussed under Eden. It remains to trace the history of the word and the associations connected with it, as it appears in the later books of the O. T. and in the language of Christ and His Apostles.

The word itself, though it appears in the above form in Cant. iv. 13, Eccl. ii. 5, Neh. ii. 6, may be classed, with hardly a doubt, as of Aryan rather than of Semitic origin. It first appears in Greek as coming straight from Persia [ Xen. ut inf.]. Greek-geographers classify it as a Persian word (Julius Pollux, Onomast. ix. 3). Modern philologists accept the same conclusion with hardly a dissenting voice (Renan, Lesmoni Sémittiques, ii. 1, p. 153). Gesenius (s. v.) traces it a step further, and connects it with the Sanskrit prava-dèga = high, well-tilled field, and applied to an ornamental garden attached to a house. Other Sanskrit scholars, however, assert that the meaning of prava-dèga in

PARADISE

again, paradise was neither on the earth, nor with in it, but above it, in the third heaven, or in some higher orb. [HEAVEN.] Or there were two par-
adises, the upper and the lower—one in heaven, for those who had attained the heights of holiness —or on earth, for those who had not. Indeed (Schoettgen, Hor. Heb. in Apoc. ii. 7), and the heavenly paradise was sixty times as large as the whole lower earth (Eisenmenger, Entdeckte Ju-
denleh., p. 297). Each had seven palaces, and in each there were at least five stories (ibid. p. 302). As the righteous dead entered paradise, angels stripped them of their grave-clothes, arrayed them in the new robes of glory, and placed on their heads diadems of gold and pearls (ibid. p. 310).

There was no night there. Its pavement was of precious stones. Plants of healing power and wondrous fragrance grew on the banks of its streams (ibid. p. 313). From this lower paradise the souls of the dead rose on palms and on feast-days to the higher (ibid. p. 318), where every day there was the presence of Jehovah holding the seven golden lampstands (ibid. xxii. 29). (Comp. also Schoettgen, Hor. Heb. in Luc. xxi. iii.)

(3.) Out of the discussions and theories of the Rabbis, there grew a broad popular belief, fixed in the hearts of men, accepted without discussion, sealing with their best hopes. Their prayer for the dying or the dead was that his soul might rest in paradise, in the garden of Eden (Maimonides, Porta Macis, quoted by Wetstein in Luc. xxi. ; Taylor, Funeral Sermon on Sir G. Dilston). The belief of the Essenes, as reported by Josephus (B. J. ii. 8, § 11), may be accepted as a fair representation of the thoughts of those who, like them, were not trained in the Rabbincical schools, living in a simple and more childlike faith. To them accordingly paradise was a far-off land, a region where there was no searching heat, no consuming cold, where the soft west-wind from the ocean blew eternally. The visions of the 21st book of Es-
dras, though not without an admixture of Christian thoughts and phrases, may be looked upon as represent-
ing this phase of feeling. There also we have the picture of a fair garden, streams of milk and honey, twelve trees laden with divers fruits, mighty mountains whereon grow lilies and roses (ib. 19) — a place into which the wicked shall not enter.

It is with this popular belief, rather than with that of either school of Jewish thought, that the language of the N. T. connects itself. In this, as in other instances, it is made the starting-point for an education which leads men to rise from it to higher thoughts: The old word is kept, and is raised to a new dignity or power. It is significant, indeed, that the word "paradise" nowhere occurs in the public teaching of our Lord, or in his inter-
ourse with his own disciples. Connected as it had been with the thoughts of a sensuous happiness, it was not the fittest or the best word for those whom He was training to rise out of sensuous thoughts to the higher regions of the spiritual life. For them, accordingly, the kingdom of Heaven, the kingdom of the Father, the kingdom of God, which are, as it were, paradises (Matt. x. 31; xxiii. 23), would be the prevailing thought. The blessedness of the pure in heart is that they shall see God. If language borrowed from their common speech is used at other times, if they hear of the marriage-liturgy and the new wine, it is not till they have been taught to understand parables and to separate the figure from the reality. With the thief dying on the cross "the case was different
We can assume nothing in the robber-outlaw, but the most rudimentary forms of popular belief. We may well believe that the word used here, and here only, in the whole course of the Gospel history, had a special fitness for him. His reverence, sympathy, repentance, hope, uttered themselves in the prayer, "Lord, remember me when thou comest into thy kingdom." We were the thoughts of the sufferers as to that kingdom we do not know. Unless they were supernaturally raised above the level which the disciples had reached by slow and painful steps, they must have been mingled with visions of an earthly glory, of pomp, and victory, and triumph. The answer to his prayer gave him what he needed most, the assurance of immediate rest and peace. The third parole spoke to him, as to other Jews, of repose, shelter, joy — the greatest contrast possible to the thirst, and agony, and shame of the hours upon the cross. Rudimentary as his previous thoughts of it might be, this was the word fittest for the education of his spirit.

There is a like significance in the general absence of the word from the language of the Epistles. Here also it is found nowhere in the direct teaching. It occurs only in passages that are apocalyptic, and therefore almost of necessity symbolic. St. Paul speaks of one, apparently of himself, as having been "caught up into paradise," as having there heard things that might not be uttered (2 Cor. xii. 4).\(^a\) In the message to the first of the Seven Churches of Asia, "the tree of life which is in the midst of the paradise of God," appears as the reward of him that overcometh, the symbol of an eternal blessedness. (Comp. Dean Trench, Comm. on the Epistles to the Seven Churches, in loc.) The thing, though not the word, appears in the closing visions of Rev. xxii.

(4.) The eager curiosity which prompts men to press on into the things behind the veil, has led them to construct hypotheses more or less definite as to the intermediate state, and these have affected the thoughts which Christian writers have connected with the word paradise. Patristic and later interpreters follow, as has been noticed, in the footsteps of the Jewish schools. To Origen and others of a like spiritual insight, paradise is but a synonym for a region of life and immortality — one and the same with the third heaven (Jerome, Ep. ad Jod. Hiero. in Wordsworth on 2 Cor. xii.). So far as it is a place, it is as a school in which the souls of men are trained and learn to judge rightly of the things they have done and seen on earth (Origen, de Princ. ii. 12). The sermon of Basil, De Paradiso, gives an eloquent representation of the common belief of Christians who were neither mystical nor speculative. Minds at once logical and sensuous ask questions as to the locality, and to answers are wisely conjectural. It is not in Hades, and is therefore different from Abraham's bosom (Tertull. de Idol. c. 13). It is above and beyond the world, separated from it by a wall of fire (Tertull. Apol. c. 47). It is the "reposterium" for all faithful souls, where they have the vision of saints, and angels, and of Christ himself (Juxta. M. Ignat. Philad. 75). We believe only that are entitled, as martyrs, fresh from the baptism of blood, to a special reward above their fellows (Tertull. de Anim. c. 55).\(^b\) It is in the fourth heaven (Clem. Alex. Fragm. § 51). It is in some unknown region of the earth, where the seas and skies meet, higher than any earthly mountain (Joann. Damasc. de Ordoch. P. i. ii. 11), and had thus escaped the waters of the flood (P. Lom bard, Sentent. ii. 17, 2). It has been identified with the gahrâb of 1 Pet. iii. 19, and the spirits in it are those of the anteluvian races who perished before the great destruction overtook them (Bishop Horsley, Sermons, xx.). (Comp. an elaborate note in Thilo, Codex Apocryph. N. T. p. 734.) The word enters largely, as might be expected, into the apocalyptic literature of the early Church. Where the true Gospels are most recent, the mythical are most exuberant. The Gospel of Nicodemos, in narrating Christ's victory over Hades (the "harrowing of hell" of our early English mysteries), tells how, till then, Enoch and Elijah had been its sole inhabitants\(^c\) — how the peulent robber was there with his cross on the night of the crucifixion — how the souls of the patriarchs were led thither by Christ, and were received by the archangel Michael, as he kept watch with the flaming swords at the gate. In the apocalyptic Acta Philippos (Tischendorf, Act. Apost. p. 89), the Apostle is sentenced to remain for forty days outside the circle of paradise, because he had given way to anger and cursed the people of Hierapolis for their unbelief.

(5.) The later history of the word presents some facts of interest. Accepting in this, as in other instances, the mythical elements of eastern Christianity, the creed of Islam presented to its followers the hope of a sensuous paradise, and the Persian word was transplanted through it into the languages spoken by them.\(^d\) In the West it passes through some strange transformations, and descends to baser uses. The thought that men on entering the Church of Christ returned to the blessedness which Adam had forfeited, was symbolised in the church architecture of the fourth century. The narthex, or atrium, in which were assembled those who, not being idoles in full communion, were not admitted into the interior of the building, was known as the "Paradise" of the church (Alt, Cubus, p. 59). Athanasius, it has been said, speaks scornfully of Arianism as creep ing into this paradise,\(^e\) implying that it addressed itself to the ignorant and untaught. In the West

\(^a\) For the questions (1) whether the repusa of St. Paul was corporeal or incorporeal, (2) whether the third heaven is to be identifed with or distinguished from paradise, (3) whether this was the upper or the inner paradise of the Jewish schools, comp. Meyer, Wordsworth, Alford, in loc.; August. de Gen. ad litt. xii.; Ludwig, Diss. de repa Pauli, in Mehten's Theutamen. Interpreted by the current Jewish belief of the period, we may refer the "third heaven," as the reward of him that overcometh, to a vision of the fellowship of the righteous dead, waiting in calmness and peace for their final resurrection.

\(^b\) A special treatise by Tertullian, de Paradiso, is unfortunately lost.

\(^c\) One trace of this belief is found in the Vulg. of Ecclus. v. 9: "et unus ait in paradiso," the absence of any corresponding word in the Greek text.

\(^d\) Thus it occurs in the Koran in the form firdsuns; and the name of the Persian poet Ferdusi is probably derived from Humboldt's "paradisus." The passage quoted by Al is from Orat. c. 41. III. (vol. i. p. 397, Colson, 1656): "Hai mu'azeta tani eitekice e tiw paradaman ti ekkhras. Inganion
we trace a change of form, and one singular change of application. Paradiso becomes in some Italian dialects Paraviso, and this passes into the French parvise, denoting the western porch of a church, or the open space in front of it (Incunab. s. e. "Parvisus"; Viz. Liturg. Worth., p. 709). In the church this space was occupied, as we have seen, by the lower classes of the people. The word was transferred from the place of worship to the place of amusement, and, though the position was entirely different, was applied to the cheapest gallery of a French theatre (Alb. Cultus, l.c.). By some, however, this use of the word is connected only with the extreme height of the galleries just as "chelino de Paradiso" is a proverbial phrase for any sordidly undertaking (Leschevelle, Dictionnaire Francois). E. H. P.

* On this subject see W. A. Alger's Critical History of the Doctrine of a Future Life, 4th ed. N. Y. 1886, and for the literature, the bibliographical Appendix to that work (comp. references in the Index of Subjects).

A. PARAH (נראה), with the def. article [the highest]: Φαρά; Alex. Ἀφαρ; Šaphaaron), one of the cities in the territory allotted to Benjamin, named only in the lists of the conquest (Josh. xviii. 29). It occurs in the first of the two groups into which the names of Benjamin are divided, which seems to contain those of the northern and eastern portions of the tribe, between Jericho, Bethel, and Gilat; the towns of the south, from Gibea to Jerusalem, being enumerated in the second group.

In the Omonomoton ("Aphra") it is specified by Jerome only—the text of Eusebius being wanting,—as five miles east of Bethel. No traces of the name have yet been found in that position; but the name Fāroh exists further to the S. E. attached to the Wady Fāroh, one of the southern branches of the great Wady Suwwini, and to a site of ruins at the junction of the same with the main valley.

This identification, first suggested by Dr. Robinson (i. 439), is supported by Van de Velde (Memoir, p. 330) and Schwarz (p. 126). The drawing mentioned by Dr. R. is, namely, that the Arabic word (wādī "wādī") differs in signification from the Hebrew ("the crouce") is not of much force, since it is the habit of modern names to cling to the sound of the ancient names, rather than of signification. (Compare Beth-ar; el Ad, etc.)

A view of Wady Fāroh is given by Barclay (City, etc p. 558), who proposes it for the "MON. G."

PARAH, EL-PARAH (נראה, נרה). The name Paradiso corresponds probably in general outline with the desert "et-Tib." The Sinaitic desert, including the wedge of metamorphic rocks, granite, syenite, and porphyry, set as it were, in a superficial margin of old red sandstone, forms nearly a scalene triangle, with its apex southwards, and having its base or upper edge not a straight, but conave crescent line—the ridge, in short, of the "et-Tib" range of mountains, extending about 120 miles from east to west; and as the area is circular, the southern and the northwestern portion would be southwards. Speaking generally, the wilderness of Sinai (Num. x. 12, xii. 16), in which the marches of Taberah and Hazeroth, if the latter [HAZEROTI] be identical with Hādāhār, are probably included towards its N. E. limit, may be said to lie S. of the "et-Tib" range, the wilderness of Parah N. of it, and the one to end where the other begins. That of Parah is a stretch of chalky formation, the chalk being covered with coarse gravel, mixed with black flint and drifting sand. The surface of this extensive desert tract is a slope ascending towards the north, and in it appear to rise (by Russeggier's map, from which most of the previous description is taken) three chalky ridges, as it were, terraces of mountainous formation, all the rest of the range being lower.
under the general name of "wilderness of Paran;" and to this extent we may perhaps modify the previous general statement that S. of the el-Tih range is the wilderness of Sinai, and N. of that of Paran. Still, construed strictly, the wilderness of Paran and Zin would seem to lie as already approximately hid down. [KAIW-SII.] If, however, as previously hinted, they may in another view be regarded as overlapping, we can more easily understand how Chedorlomer, when he "smote" the peoples S. of the Dead Sea, returned round its south-western curve to the el-Paran, or "terebinth-tree of Paran," viewed as indicating a locality in connection with the wilderness of Paran, and yet close, apparently, to that Dead Sea border (Gen. iii. 6).

Was there, then, a Paran proper, or definite spot to which the name was applied? From Dent, i. 1 it should seem there must have been. This is confirmed by 1 K. xi. 18, from which we further learn the fact of its being an inhabited region: and the position required by the context here is one between Midian and Egypt. If we are to reconcile these passages by the aid of the personal history of Moses, it seems certain that the local Midian of the Sinaitic peninsula must have lain near the Mount Horeb itself (Ex. iii. 1, xviii. 1-5). The site of the "Paran" of Hadad the Edomite must have lain to the N. W. or Egyptian side of Horeb. This brings us, if we assume any principal mountain, except Serabli, of the whole Sinaitic group, to be "the Mount of God," so close to the Wady Feiran that the similarity of name, supported by the recently expressed opinion of eminent geographers, may be taken as establishing substantial identity. Ritter (vol. iv. p. 740, 741) and Stanley (pp. 39-41) both consider that Rehobim is to be found in Wady Feiran, and that

Other place in the whole peninsula seems, from its local advantages, to have been so likely to form an entrepôt in Solomon's time between Edom and Egypt. Burchhardt (Sprit, etc. p. 602) describes this wady as narrowing in one spot to 100 paces, and adds that the high mountains adjacent and the thick woods which clothe it, contribute with the bad water to make it unhealthy, but that it is, for productiveness, the finest valley in the whole peninsula, containing four miles of gardens and date-groves. Yet he thinks it was not the Paran of Scripture. Professor Stanley, on the contrary, seems to speak on this point with greater confidence in the affirmative than perhaps on any other question connected with the Exodus. See especially his remarks (39-41) regarding the local term "hill" of Ex. xvii. 9, 10, which he considers to be satisfied by an eminence adjacent to the Wady Feiran. The vegetable manna of the tamarisk grows wild there (Seetzen, Reisen, iii. 75), as does the cobebath, etc. (Robinson, i. 121-124). What could have led Winer (s. v. "Paran") to place el-Paran near Elath, it is not easy to say, especially as he gives no authority.

2. "Mount Paran" occurs only in two poetic passages (Deut. xxxii. 2: Hab. iii. 3), in one of which Sinai and Seir appear as local accessories, in the other Teman and Midian. We need hardly pause to inquire in what sense Seir can be brought into one local view with Sinai. It is clear from a third poetic passage, in which Paran does not appear (Judg. vi. 4, 5), but which contains "Seir," more literally determined by "Edom," still in the same local connection with

---

a For the reasons why Serab should not be accepted, see Sinai.

b Gesen. s. v. Taw, or the wilderness so called, "between Midian and Egypt, bears this name at the present day." No maps now in use give any closer approximation to the ancient name than Feiran.

c Compare, however, the same traveller's statement of the claims of a coast wady at Thb, on the Gulf of Suez (Burchhardt. Arab. ii. 392; comp. Wellsted, ii. 9), "receiving all the waters which flow down from the higher range of Sinai to the sea" (Stanley, p. 19).

d The Tamarisk Gallica mannifera of Ehrenberg, the Thby of the Arabs (Robinson, i. 115).
"Sina," that the Hebrew found no difficulty in viewing the greater scenes of God's manifestation in the Exodus as historically and morally if not locally connected. At any rate Mount Paran here may with as good a right be claimed for the Sinaitic as for the Edomitic side of the difficulty. And the distance, after all, from Horeb to Mount Seir was probably one of ten days or less (Deut. i. 2). It is not unlikely that if the "Wady Feiran be the Paran proper, the name "Mount" Paran may have been either assigned to the special member (the northwestern) of the Sinaitic mountain-group which lies adjacent to that wady, or to the whole Sinaitic cluster. That special member is the five-mile ridge of Serbal. If this view for the site of Paran is correct, the Israelites must have proceeded from their encampment by the sea (Num. xxiii. 19), probably Jotbah [Wilderness of the Wandering], by the "middle" route of the three indicated by Stanley (pp. 38, 39). 

**Parched Corn.** [Euth. Book of, Aper. ed.]

**Parched Ground.** The Hebrew term (ץן דב, skirbi) so rendered in Is. xxvi. 7 (A. V.) — "the parched ground shall become a pool," is understood by the best scholars to denote the mirage, the Arabic name for which is scirbi. So Genesenius, Fürst, Ille Wette, Hitzig, Knobel, Ewald, etc.; comp. Winer, Bids. Realwörterb. art. "Sand-huever," and Thomson's Land and Book, ii. 287, 288. The phenomenon referred to is too well known to need description here. A.

**Parchment.** [Writing.]

**Parlor.** A word in English usage meaning the common room of the family, and hence probably in A. V. denoting the king's audience-chamber, so used in reference to Egedon (Judg. iii. 20-25; Richardson, Exeg. Dict.). [A. V. p. 1139.]

**Parmashta (পার্মাশ্ত, superior, Sanskr., Ges.):** Parmashat (A. V. "Parmashat") [Paremaste]. One of the ten sons of Heman the Abraham's of the Jews in Shushan (Esth. ix. 9).

**Parnemas (Parnévas, prob. a contraction of Parmenides, sēdeiōsaft).** One of the seven deacons, "men of honest report, full of the Holy Ghost and wisdom," selected by the whole body of the disciples to superintend the ministration of their alms to the widows and necessitous poor. Parnemas is placed sixth on the list of those who were ordained by the laying on of the hands of the Apostles to this special function (Acts vi. 5). His name occurs but this once in Scripture; and ecclesiastical history records nothing of him save the tradition that he suffered martyrdom at Philippi in the reign of Trajan (P贸ron. ii. 55). In the

---

*a The language in the three passages (Deut. xxiii. 2: Hab. iii.; Judg. v. 4, 5) is as strikingly similar as is the purport and spirit of all the three. All describe a spiritual presence manifested by manifest convulsions attendant; and all are confirmed by Ps. lxxvi. 7, 8, in which Sinai alone is named. We may almost regard this lofty rhapsody as a commonplace of the inspired song of triumph, in which the seer seems to lose himself so far beneath him that the precisions of geographic detail is lost to his view.

*b Out of the Wady Feiran, in an easterly direction, runs the Wady Serbal, which conducts the traveller directly to the "modern Horeb." See Kiepert's map.

*c What Hebrew west the LXX. read here is not clear.

*d See the Targum of the passage; also Buxtorf, Litz.
calendar of the Byzantine Church he and Prochorus are commemorated on July 28th.

F. II.—s.

PARACPACH (ΠΑΡΑΠΑΧ) [parētē or dedicāte, Gr.]; Παραπάχ [Parapach]. Father or ancestor of Elizaphan prince of the tribe of Zebulun (Num. xxxiv. 25).

PAROSH (ΠΑΡΟΣ) [phorētē]: Παρός, Alex. 

The descendants of Parosh, in num. i. 2, were returned from Babylon with Zerubbabel (Ezr. i. 3; Neh. vii. 8). Another descendant of 153 males with Zechariah at the head, accompanied Ezra (Ezr. viii. 3 [where A. V. reads Phoros]). Seven of the family had married foreign wives (Ezr. x. 25). They assisted in the building of the wall of Jerusalem (Neh. iii. 25), and signed the covenant with Nehemiah (Neh. x. 14). In the last-quoted passage the name Parosh is clearly that of a family, and not of an individual.

PARSHANDATHA (ΠΑΡΣΗΔΑΘ) [see below]: Παρσηδάθης; Alex. Παρσηδάθησας. [Comp. Παρσηδαθάτα] (Parshandatha). The eldest of Haman's ten sons who were slain by the Jews in Shushan (Esther vi. 7). For Haman he converted it into old Persian Freschastata, "given by prayer," and compares the proper name Παρσηδάνθης, which occurs in Diod. ii. 53.

PARTHIANS (ΠΑΡΘΟΙ): Parthis) occurs only in Acts ii. 9, where it designates Jews settled in Parthia. Parthia Proper was the region stretching along the southern flank of the mountains which separate the great Persian desert from the desert of Khurasan. It lay south of Hyrcania, east of Media, and north of Sogdiana. The country was pleasant, and fairly fertile, watered by a number of small streamsflowing from the mountains, and absorbed after a longer or a shorter course by the sands. It is now known as the Altäkh or "skirt," and is still a valuable part of Persia, though supporting only a scanty population. In ancient times it seems to have been densely peopled; and the ruins of many large and apparently handsome cities attest its former prosperity. (See Fraser's Khorsabad, p. 248.)

The ancient Parthians were called a "Scythic" race (Strab. xi. 9, § 2; Justin, xli. 1-4; Arrian, Fr. p. 1); and probably belonged to the great Turanian family. Various stories are told of their origin. Moses of Chorene calls them the descendants of Abraham by Keturah (Hist. Armen, ii. 65); while John of Malaha relates that they were Scythians whom the Egyptian king Sosostiris brought with him on his return from Scythia, and settled in a region of Persia (Hist. Univ. p. 26; compare Arrian, l. c.). Really, nothing is known of them till about the time of Darius Hytapasip, when they are found in the district which so long retained their name, and appear as faithful subjects of the Persian monarchs. We may fairly presume that they were added to the empire by Cyrus, about n. c. 550; for that monarch seems to have been the conqueror of all the northeastern provinces. Herodotus speaks of them as contained in the 16th satrapy of Darius, where they were joined with the Chorasmians, the Sogdians, and the Arians, or people of Herat (Herald. iii. 83). He also mentions that they served in the army which Xerxes led into Greece, under the same leader as the Chorasmians (vii. 96). They carried bows and arrows, and short spears; but were not at this time held in much repute as soldiers. In the final struggle between the Greeks and Persians they remained faithful to the latter, serving at Arsale (Arr. Exp. Alex, iii. 8); but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country (ibid. 25). In the division of Alexander's dominions they fell to the share of Eumenes, and Parthia for some time was counted among the territories of the Seleucidae. About n. c. 256, however, they ventured upon a revolt, and made creases (who Strabo calls "rebels of the Dahae") but who was more probably a native leader) they succeeded in establishing their independence. This was the beginning of the great Parthian empire, which may be regarded as rising out of the ruins of the Persian, and as taking its place during the centuries when the Roman power was at its height.

Parthia, in the mind of the writer of the Acts, would designate this empire, which extended from India to the Tigris, and from the Chorasmian desert to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was a power almost rivalling Rome—the only existing power which had tried its strength against Rome and not been overthrown in the encounter. By the defeat and destruction of Crassus near Carrhae (the Scriptural Haran) the Parthians acquired that character for military prowess which attaches to them in the best writers of the Roman classical period. (See Hor. Od. ii. 13; Sat. ii. 1, 15; Virg. Georg. iii. 31; Ov. Art. Am. i. 209, &c.) Their armies were composed of clouds of horsemen, who were all riders of extraordinary expediency; their chief weapon was the bow. They shot their arrows with wonderful precision while their horses were in full career, and were proverbially remarkable for the injury they inflicted with these weapons on an enemy who attempted to follow them in their flight. From the time of Crassus to that of Trajan they were an enemy whom Rome especially dreaded, and whose ravages she was content to repel with revenging. The weak successor of Nerva had the boldness to attack them; and his expedition, which was well conceived and vigorously conducted, deprived them of a considerable portion of their territories. In the next reign, that of Hadrian, the Parthians recovered these losses; but their military strength was now upon the decline; and in A. D. 226, the last of the Arsacidae was forced to yield his kingdom to the revoluted Persians, who, under Artaxerxes, son of Sassan, succeeded in reestablishing their empire. The Parthian dominion thus lasted for nearly five centuries, commencing in the third century before, and terminating in the third century after, our era.

It has already been stated that the Parthians were a Turanian race. Their success is to be regarded as the subversion of a tolerably-advanced civilization by a barbarous and to the latter, serving at Arsale (Arr. Exp. Alex, iii. 8); but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country (ibid. 25). In the division of Alexander's dominions they fell to the share of Eumenes, and Parthia for some time was counted among the territories of the Seleucidae. About n. c. 256, however, they ventured upon a revolt, and made creases (who Strabo calls "rebels of the Dahae") but who was more probably a native leader) they succeeded in establishing their independence. This was the beginning of the great Parthian empire, which may be regarded as rising out of the ruins of the Persian, and as taking its place during the centuries when the Roman power was at its height.

Parthia, in the mind of the writer of the Acts, would designate this empire, which extended from India to the Tigris, and from the Chorasmian desert to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was a power almost rivalling Rome—the only existing power which had tried its strength against Rome and not been overthrown in the encounter. By the defeat and destruction of Crassus near Carrhae (the Scriptural Haran) the Parthians acquired that character for military prowess which attaches to them in the best writers of the Roman classical period. (See Hor. Od. ii. 13; Sat. ii. 1, 15; Virg. Georg. iii. 31; Ov. Art. Am. i. 209, &c.) Their armies were composed of clouds of horsemen, who were all riders of extraordinary expediency; their chief weapon was the bow. They shot their arrows with wonderful precision while their horses were in full career, and were proverbially remarkable for the injury they inflicted with these weapons on an enemy who attempted to follow them in their flight. From the time of Crassus to that of Trajan they were an enemy whom Rome especially dreaded, and whose ravages she was content to repel with revenging. The weak successor of Nerva had the boldness to attack them; and his expedition, which was well conceived and vigorously conducted, deprived them of a considerable portion of their territories. G. R.

* PARTITION, MIDDLE WALL OF.*

Eph. ii. 14. The Greek is το μεσότοιχον του φραγμον, and in the figure the "middle wall" formed the "partition," or more stringly "fence" (φραγματε), which before the coming of Christ separated Jews and Gentiles from each other, but which his death abolished, so as to bring all nations together on the same common ground as regards their participation in the blessings of the Gospel. Many interpreters find here an allusion to the row of marble pillars or screen which in Herod's Temple fenced off the court of the Gentiles from that of the Jews, on which, as Philo and Josephus state, was written in Latin and Greek: "No foreigner may go further on penalty of death" (see Kuinoel, Acta Apost. p. 700; and Keil, Bibl. Archäologie, i. 142). Ellicott would admit a reference in this passage both to this middle wall and to the rending of the

the Hebrew word to the Arabic kuria, which he believes, but upon very insufficient ground, to be the name of some one of these birds. Oedmann (Term. S. Sam. ii. 57) identifies the kuria of Arabic writers with the Hevrops ocyter (the Bee-eater); this explanation has deservedly found favor with no commentators. What the kuria of the Arabs may be we have been unable to determine; but the kuré there can be no doubt denotes a partridge. The "hunting this bird upon the mountains" (1 Sam. xxvi. 20) entirely agrees with the habits of two well-known species of partridge, namely, Cof-

b "The partridge of the mountains I suspect to be Anmoperdix Hepi, familiar as it must have been to and at his end be camped by the cave of Adullam—a bird more difficult by far to be induced to take wing than C. saritata" (H. B. Tristram).

PARTRIDGE (N.N.) kuré: πτερίδιον, πατρι- κιποξ; parvix) occurs only 1 Sam. xxvi. 20, where David compares himself to a hunted kuré upon the mountains, and in Jer. xvii. 11, where it is said, "As a kuré sitteth on eggs, and hatcheth them not: so he that geteth riches, and not by right, shall leave them in the midst of his days, and it shall be a boul." The translation of kuré by "partridge" is supported by many of the old versions, the Hebrew name, as is generally supposed, having reference to the "call" of the cock bird; compare the German Rohrkuhn from roten, "to call." a Bochart (Hev. ii. 632) has attempted to show that kuré denotes some species of "snipe," or "woodcock" (rusticoled); he refers

a "Parvix enim nomen suum hebraicum N.N. habet a vocandi, quodcummodum cedem adhis Germaniis dicetur Raphun, i.e. rafen, vocare" (Rosem- mitt, Schol. in Jew. xvi. 11). Mr. Tristram says that here would be an admirable imitation of the call-note of Coccothrix sartitina.
PARTRIDGE

Cuculus saturitis. (the Greek partridge) and Ammoperdix Hegii. The specific name of the former is partly indicative of the localities it frequents, namely, rocky and hilly ground covered with brushwood.

It will be seen by the marginal reading that the passage in Jeremiah may bear the following interpretation: As the bird "gatherneth young which she hath not brought forth." This rendering is supported by the LXX. and Vulg., and is that which Maurer (Comment. in Jer. i. c.), Rosemuller (Sch. in Jer. i. c.), Gesenius (Theor. s. v.), Winer (Rendeb. "Rebuhn"), and scholars generally, adopt. In order to meet the requirements of this latter interpretation, it has been asserted that the partridge is in the habit of stealing the eggs from the nests of its congeners and of sitting upon them, and that when the young are hatched they forsake their false parent; hence, it is said, the meaning of the simile: the man who has become rich by dishonest means loses his riches, as the fictitious partridge her stolen brood (see Jerome in Jerem. i. c.). It is perhaps almost needless to remark that this is a mere fable, in which, however, the ancient Orientalists may have believed should have been so translated, as is evident both from the context and the Greek words; compare Aristot. Hist. Anim. ix. 9, § 3 and 4. Besides the two species of partridge named above, the Cuculus chukar—the red-leg of India and Persia, which Mr. Tristram regards as distinct from the Greek partridge—is found about the Jordan. Our common partridge (Perdix erewen), as well as the Barbery (C. petraeus) and red-leg (C. cafet), do not occur in Palestine. There are three or four species of the genus Pterocles (Sand-grouse) and Francolinus found in the Bible lands, but they do not appear to be noticed by any distinct term. [QUAIL.] W. H.

* PARTS, UPPER. [Upper Coasts, Amer. ed.]

PARU'AH (παρουθής, blooming, Ges.; in creese, Furst; Φαρουσά, Alex. αφαρκός [Comp Φαρούχ]. The father of Jehoshaphat, Solomon's commissariat officer in Issachar (1 K. iv. 17).

PARVATIM (παρατής, [see below]: Φαρουά, [Vat. Φαρανουα: (αμιμος) προκουλακτισμον], the name of a place or country whence the gold was procured for the decoration of Solomon's Temple (2 Chr. iii. 6). The name occurs but once in the Bible, and there without any particulars that assist to its identification. We may notice, however, the conjectures of Hitzig (on Dan. x. 5), that the name is derived from the Sanskrit paru, "hill," and hence, from the <strong>διούσις</strong> ορν, in Arabic, mentioned by Ptolomy (vi. 7, § 11); of Kneler (Völker, p. 191), that it is an abbreviated form of Sepharvaim, which stands in the Syriac version and the Tarqumi of Jonathan for the Sephar of Gen. x. 30; and of Wilford (quoted by Gesenius, Theor. ii. 1125), that it is derived from the Sanskrit <strong>pāruca</strong>, "eastern," and is a general term for the East. Bochart's identification of it with Taprobane is etymologically incorrect.

W. L. B.

PA'SACH (πασακ, cut, incision, Ges.): <strong>Φασιχ</strong>; [Vat. Φασαχί] Alex. Φασιχ. Phaseich. Son of Japhlet of the tribe of Asher (1 Chr. vii. 33), and one of the chiefs of his tribe.

PAS-DAMMIM (πασάδιμ, [the border of bowel], [Rom. Φασαδιμιον, Vat. Φασαδιμιον, Alex. Φασαδιμιον, Phasodimim]. The form under which in 1 Chr. xi. 13 the name appears, which in 1 Sam. xvii. 1 is given more at length as Ephes-dammim. The lexicographers do not decide which is the earlier or correcter of the two. Gesenius (Thes. p. 329) takes them to be identical in meaning, it will be observed that in the original of Ias-dammim, the definite article has taken the place of the first letter of the other form. In the parallel narrative of 2 Sam. xxiii., the name appears to be corrupted <strong>d</strong> to charopham (<strong>ἔφαθο</strong>), in the A. V. rendered "there." The present text of Josephus (Ant. vii. 12, § 4) gives it as Arasamus (Ἀρασάμος).

* This is carefully examined by Kenklof (Dissertation, p. 137, &c.).

H.

c Mr. Tristram tells us the <i>Cuculus saturitis</i> makes an attractive decoy, becoming very tame and clever. He brought one house with him from Cyprus.
The chief interest attaching to the appearance of the name in this passage of Chronicles is the evidence it affords that the place was the scene of repeated encounters between Israel and the Philistines, unless indeed we treat 1 Chr. xiv. 15 (and the parallel passage, 2 Sam. xii. 9) as an independent account of the occurrence related in 1 Sam. xvii. — which hardly seems possible. [ELAH, VALLEY OF.]

A minted site bearing the name of Domun or Chichat Dommun lies near the road from Jerusalem to Talt Titbim (Van de Velde, Sac. & Pal. ii. 193; Tolder, Site Wond, 201), about three miles E. of Shoresh. This, like his Deed and victory inscription, is an independent account of the occurrence related in 1 Sam. xviinin.

PASEAH (πασαή) [from]: Ἡσαγόρης; Alex. Φασαής: Pssas. 1. Son of Elathan, in an obscure fragment of the genealogies of Judah (1 Chr. iv. 12). He and his brother described as the "men of Bechah," which in the Targum of R. Joseph is rendered "the men of the great Sanhedrin." 2. (Phasas), Ezr. (Vat. Phasas); Phasas, Neh. Phasos. The "sons of Paseah" were among the Nethinim who returned with Zerubabel (Ezr. ii. 49). In the A. V. of Neh. vii. 51, the name is written PASHAH. Jehuda, a member of the family, assisted in rebuilding the old gate of the city of Jerusalem (Nehemiah iii. 6).

PASHUR (πασούρ, ἁμαρτία; freedom, redemption, first: in Jer. and ler. 1 Chr. 12). Pashur, [1 Chr. iv. 12, Rom. Alex. Phasos]; Ezr. ii. 38, Phasos; Alex. Phasos; x. 23; Neh. x. 3; Phasos, Neh. viii. 41. Phasos, Vat. Phasos; xi. 12, Phasos in Alex. Fc. Phasos). Pashur: Pssas; Phasas), of uncertain etymology, although Jer. x. 2 seems to allude to the meaning of it: comp. Ruth i. 20; and see Gesen. s. v.

1. Name of one of the families of priests of the chief house of Malchijah (Jer. xxi. 1, xxxvii. 13, xii. 12). Jer. x. 12, xxvii. Neh. x. 3, Phasos. In the list of Nehemiah this family appears to have become a chief house, and its head the head of a course (Ezr. ii. 38, Neh. vii. 41, x. 3); and, if the text can be relied upon, a comparison of Neh. x. 3 with xii. 2 would indicate that the time of their return from Babylon was subsequent to the days of Zerubabel and Jeshua. The individual from whom the family was named probably Pashur. The son of the son of Zedekiah was one of the chief princes of the court (Jer. xxxix. 1). He was sent, with others, by Zedekiah to Jeremiah at the time when Nebuchadnezzar was preparing his attack upon Jerusalem, to inquire what would be the issue, and received a reply full of foretoldings of disaster (Jer. xxii). Again somewhat later, when the temporary raising of the siege of Jerusalem by the advance of Pharaoh Hophra’s army from Egypt had inspired hopes in king and people that Jeremiah’s predictions would be falsified, Pashur joined with several other chief men in petitioning the king that Jeremiah might be put to death as a traitor, who weakened the lands of the patriotic party by his exhortations to surrender, and his prophecies of defeat, and he proceeded, with the other princes, actually to cast the prophet into the dry well where he nearly perished (Jer. xxxix. 3). Nothing more is known of Pashur. His descendant Adahiah seems to have returned with Zerubabel (1 Chr. ix. 12), or whenever the census there quoted was taken.

2. Another person of this name, also a priest, and "chief governor of the house of the Lord," is mentioned in Jer. xx. 1. He is described as "the son of Immer," who was the head of the 16th course of priests (1 Chr. xxiv. 14), and probably the same as Amariah, Neh. x. 3, xii. 2. In the reign of Jehoikim he showed himself as hostile to Jeremiah as his namesake the son of Malchiah did afterwards, and put him in the stocks by the gate of Benjamin, for prophesying evil against Jerusalem, and left him there all night. This indignity to God’s prophet, Pashur was told by Jeremiah that his name was changed to Magac in the time of Nabonidus (Teron oun evon side), and that he and all his house should be carried captives to Babylon and there die (Jer. xx. 1-6). From the expression in v. 6, it should seem that Pashur the son of Immer acted the part of a prophet as well as that of priest.

3. Father of Gedaliah (Jer. xxxviii. 1). A. C. H.

PASSAGE. a Used in plur. (Jer. xxii. 20) probably to denote the mountain region of Arabim, on the east side of Jordan [Arabim] (Rammer, Pod. p. 62; Ges. p. 987; Stanley, S. of P. p. 204, and App. p. 283). It also denotes a river ford or a mountain gorge or pass. [MEGAHANE]. W. W. P.

PASSOVER (πάσχας, πασχαν); τω πάσχα; phrase, id est transitus: also, τω πασχαν, τω πάσχα; τω πάσχαν; τω πασχαν, the same view of the word; as also Von Bohlen and a few other modern critics. Jerome applies transitus both to the passing over of the destroyer and the passage through the Red Sea (in Matt. xxii). But the true sense of the Hebrew substantive is plainly indicated in Ex. xii. 27; and the best authorities are agreed that πάσχα never expresses "passing through," but that its primary meaning is "leaping over." Hence the verb is regularly used with the preposition παρά. But since, when we jump or step over anything, we do not tread upon it, the word has a secondary meaning, "to spare," or "to show mercy" (comp. Ex. xxxi. 5, with Ex. xii. 27). The LXX. have therefore used ἀναγεννάω in Ex. xii. 13; and Oukeles has rendered ἀναγεννάω, "the sacrifice of the Passover," by πασχαν, "to pass over."
PASSOVER

I. INSTITUTION AND FIRST CELEBRATION OF THE PASSOVER.

When the chosen people were about to be brought out of Egypt, and the word of the Lord came to Moses and Aaron commanding them to instruct all the congregation of Israel to prepare for their departure by a solemn religious ordinance. On the tenth day of the month Abib, which had then commenced, the head of each family was to select from the flock either a lamb or a kid, a male of the first year, without blemish. If his family was too small to eat the whole lamb, he was permitted to invite his nearest neighbor to join the party. On the fourteenth day of the month, he was to kill his lamb while the sun was setting. He was then to take the blood in a basin, and with a sprig of hyssop to sprinkle it on the two side-posts and the lintel of the door of the house. The lamb was then thoroughly roasted, whole. It was expressly forbidden that it should be boiled, or that a bone of it should be broken. Unleavened bread and bitter herbs were to be eaten with the flesh. No male who was uncircumcised was to join the company. Each one was to have his loins girt, to hold a staff in his hand, and to have shoes on his feet. He was to eat in haste, and it would seem that he was to stand during the meal. The number of the days was calculated as a period of seven, that all the flesh of the lamb might be eaten; but if any portion of it happened to remain, it was to be burned in the morning. No morsel of it was to be carried out of the house.

The legislator was further directed to inform the people of God’s purpose to smite the first-born of the Egyptians, to declare that the Passover was to be to them an ordinance forever, to give them directions respecting the order and duration of the festival in future times, and to enjoin upon them to teach their children its meaning, from generation to generation.

When the message was delivered to the people, they bowed their heads in worship. The lambs were selected, on the fourteenth they were slain and the blood sprinkled, and in the following evening, after the fifteenth day of the month had commenced, the first paschal lamb was eaten. At midnight the first-born of the Egyptians were smitten, from the first-born of Pharaoh that sat on his throne unto the first-born of the captive that was in verò lingua, hoc est in Hebrew, Pascha transitus dictur: propteræa tune primus Pascha celebravit popum Dei, quando ex Egypto fugientes, rubrum matrem transierant. Nunc ergo figura his prophetarum in veritate completa est, cum sicut os ad immo niam transitiis paschi transitus, cujus saevo sanguine iterum passim nos prehendit, ait cum caelo fremebat. Ex illo tum ait, Pascha, invenit, propter quod undum existit, cum cum nemine existit, sed Hebraeum: nam etiam tamen occurrerit in hocc nomine quidam congregatrum uirgillumque unicum, quidam enim passio dictur, id est Pascha passio putata est, relut hoc nomen a passione sit appellatum; in suo
The king and his people were now urgent that the Israelites should start immediately, and readily bestowed on them supplies for the journey. In such haste did the Israelites depart, on that very day (Num. xxxii. 3), that they packed up their kneading-troughs containing the dough prepared for the morrow's provision, which was not yet leavened. Such were the occurrences connected with the institution of the Passover, as they are related in Ex. xii. It would seem that the law for the consecration of the first-born was passed in immediate connection with them (Ex. xii. 1, 13, 15, 16).

II. OBSERVANCE OF THE PASSOVER IN LATER TIMES.

1. In the twelfth and thirteenth chapters of Exodus, there are not only distinct references to the observance of the festival in future ages (c. g. xii. 2, 14, 17, 24-27, 42, xiii. 2, 3, 5, 8-10); but there are several injunctions which were evidently not intended for the first passover, and which indeed could not possibly have been observed. The Israelites, for example, could not have kept the next day, the fifteenth Nisan, which they observed their meal (Ex. xiii. 5); Num. xxxviii. 3), as a day of holy convocation according to Ex. xii. 16. [Festivals, vol. i, p. 818.]

In the later notices of the festival in the books of the Law, there are particulars added which appear as modifications of the original institution. Of this kind are the directions for offering the Omer, or first sheaf of harvest (Lev. xxiii. 10-14), the instructions respecting the special sacrifices which were to be offered each day of the festival week (Num. xxvii. 16-25), and the command that the paschal lambs should be slain at the national sanctuary, and that the blood should be sprinkled on the altar, instead of the linters and four-post of the houses (Deut. xvi. 1-6).

Hence it is not without reason that the Jewish writers have laid great stress on the distinction between the Egyptian Passover and the perpetual Passover. The distinction is noticed in the Mishna (Pesachim, i. 5). The peculiarities of the Egyptian passover which are there pointed out are, the selection of the lamb on the tenth day of the month, the sprinkling of the blood on the linters and door-posts, the use of hyssop in sprinkling, the haste in which the meal was to be eaten, and the restriction of the abstinence from unleavened bread to a single day. Elias of Byzantium adds, that there was no command to burn the fæt on the altar, that the pure and imple partook of the paschal meal contrary to the law afterwards given (Num. xiii. 11), that both men and women were then required to partake, but subsequently the command was given only to men (Ex. xxii. 17; Deut. xvi. 16), that neither the Hallel nor any other hymn was sung, as was required in later times in accordance with Is. xxx. 29, that there were no days of holy convocation, and that the lambs were not slain in the consecrated place.

2. The following was the general order of the observances of the Passover in later times according to the direct evidence of Scripture: On the 14th of Nisan, every trace of leaven was put away from the houses, and on the same day every male Israelite not laboring under any bodily infirmity or ceremonial impurity, was commanded to appear before the Lord at the national sanctuary with offering of money in proportion to his means (Ex. xxix. 13; Deut. xvi. 16, 17). Devout women sometimes attended, as is proved by the instances of Hannah and Mary (1 Sam. 1. 7; Luke iv. 41, 42). As the sun was setting, the lambs were slain, and the fat and Raphall's translation: "The daily offering was slaughtered half an hour after the eighth hour (i.e. at 2:30 p.m.), and sacrificed half an hour after the ninth hour; but on the day before Passover, it was slaughtered half an hour after the seventh hour, and sacrificed half an hour after the eighth hour. When the day before Passover happened in Friday, it was slaughtered half an hour after the sixth hour, and sacrificed after the seventh hour." The Passover sacrifice after it." Under certain circumstances the paschal lamb might be killed before the evening sacrifice; but not before noon (v. al. § 3. = 4.) A third notion has been held by Jarchi and Kimchi, that the two evenings are the time immediately before, and immediately after sunset, so that the point of time at which the sun sets divides them. Gesenius, Bahir, Winær, and most other critics, hold the first opinion, and regard the phrase as equivalent with בּּהָיָּם (Deut. xvi. 6). See Gesenius, Thes. p. 1065; Bahir, Sambudi, ii. 104; Hupfeld, De Festis Hebraeorum, p. 15; Rosenmüller in Exod. xvi. 6; Carpov, App. i. p. 68.

* This account of the opinion of Jarchi (i.e. Lach, or Rabbi Solomon ben Isaac) and Kimchi has been shown by Ginsburg (art. "Passover") in the 34 ed. of Kittit's Cyclopedia of Ref. Lit. iii. 423 to be entirely erroneous. They agree with the opinion of the Pharisees and Rabbinists as stated above.

The interpretation of the "two evenings" given by the Pharisees and Rabbinists is supported also by Philo (De Septemn. c. 18, Op. ii. 222, 241), who says that the paschal lamb is killed "from mid day till the evening" (τὸν ἕως τὸῦ ἀπαντήμου ἑορταστικοῦ ἐλπιδοτοῦ στὶχον αὐτοῦ, of δόμων...
PASSOVER

and blood given to the priests (2 Chr. xxxv. 6; comp. Joseph. B. J. vi. 9, § 3). In accordance with the original institution in Egypt, the lamb was then roasted whole, and eaten with unleavened bread and bitter herbs; no portion of it was to be left until the morning. The same night, after the 15th of Nisan had commenced, the fat was burned by the priest and the blood sprinkled on the altar (2 Chr. xxx. 16, xxxvi. 11). On the 15th, the night being passed, there was a holy convocation, and during that day no work might be done, except the preparation of necessary food (Ex. xii. 16). On this and the six following days an offering in addition to the daily sacrifice was made of two young bullocks, a ram, and seven lambs of the first year, with meat-offerings, for a burnt-offering, and a goat for a sin-offering (Num. xviii. 19-23). On the 16th of the month, "the morrow after the sabbath" (i.e. after the day of holy convocation), the first sheaf of harvest was offered and waved by the priest before the Lord, and a male lamb was offered as a burnt sacrifice with a meat and drink-offering. Nothing necessarily distinguished the four following days of the festival, except the additional burnt and sin-offerings, and the restraint from some kinds of labor. [Festivals.]

On the seventh day, the 21st of Nisan, there was a holy convocation, and the people were assembled on one occasion of festivity. As at all the festivals, cheerfulness was to prevail during the whole week, and all care was to be laid aside (Deut. xxvii. 7; comp. Joseph. Ant. xi. 5; Michaelis, Lives of Moses, Art. 197). [Pentecost.]

3. a. The Paschal Lamb.—After the first Passover in Egypt there is no trace of the lamb having been selected before it was wanted. In later times, we are certain that it was sometimes not provided before the 14th of the month (Luke xxii. 7-9; Mark xiv. 12-16). The law formally allowed the alternative of a kid (Ex. xii. 5), but a lamb was preferred, and was probably nearly always chosen. It was to be faultless and a male, in accordance with the established estimate of animal perfection (see Mal. i. 14). Either the head of the family, or any other person who was not ceremonially unclean (2 Chr. xxx. 17), took it into the court of the Temple on his shoulders. According to some authorities, the lamb might, if circumstances should render it desirable, be slain at any time in the afternoon, even before the evening sacrifice, if the blood was kept stirred, so as to prevent it from coagulating, until the time came for sprinkling it (Peschinah, v. 9).

The Mishna gives a particular account of the arrangement which was made in the court of the Temple (Peschinah, v. 6-8). Those who were to kill the lamb entered successively in three divisions. When the first division had entered, the gates were closed and the trumpets were sounded three times. The priests stood in two rows, each row extending from the altar to the place where the people were assembled. The priests of one row held basins of silver, and those of the other basins of gold. Each Israelite then slew his lamb in order, and the priest who was nearest to him received the blood in his basin, which he handed to the next priest, who gave his empty basin in return. A succession of full basins was thus passed towards the altar, and a succession of empty ones towards the people. The priest who had received next the blood threw it to the south towards the basin in a single jet. When the first division had performed their work, the second came in, and then the third. The lambs were skinned, and the viscera taken out with the internal fat. The fat was carefully separated and collected in the large dish, and the viscera were washed and replaced in the body of the lamb, like those of the burnt sacrifices (Lev. i. 9, iii. 5-5; comp. Pesachin, vi. 1). Maimonides says that the tail was put back in the fat (Vol. in Pes. v. 10). While this was going on the Hallel was sung, and repeated a second, or even a third time, if the process was not finished. As it grew dark, the people went home to roast their lambs. The fat was burned on the altar, with incense, that same evening. When the 14th of Nisan fell on the Sabbath, all these things were

convocation; " Num. xxix. 35; 2 Chr. vii. 9; Neh. viii. 15). Our translators have in each case rendered them, "it sanctified itself," but in the margin by "restrainment." The LXX. have ἁγιασμόν. Michaelis and Iken imagined the primary idea of the word to be restraint from labor. Gesenius shows that this is a mistranslation, and proves the word to mean assembly or congregation. Its root is undoubtedly ἁγιασμός, to set apart, or construe. Hence Bahr (Symbolik, i. 19) reasonably argues, from the occurrence of the word in the passages above referred to, that its strict meaning is that of the closing assembly; which is of course quite consistent with its being sometimes used for a solemn assembly in a more general sense, and with its application to the day of Pentecost.

b. The Chaldee interpreters render ἁγιασμός, which means one of the flock, whether sheep or goat, by a lamb; and Theodoret no doubt represents the Jewish traditional usage when he says, τοις μὲν πρίαμασιν ἑκατὸν τεσσαρακονταμώνια τὸν ἄμμον (on Ex. xii.).

Unquestionably the usual practice was for the head of the family to slay his own lamb; but on particular occasions (as in the great observances of the Passover by Nehemiah, Joseph, and Ezra) the slaughter of the lambs was committed to the Levites. See p. 2347.

The remarkable passage in which this is commanded, which occurs Ex xxiii. 17, 18, and is
PASSOVER

The Unleavened Bread.

The unleavened bread... referred to in the command in Ex. xii. 16, was subject to the punishment of forty stripes. The flesh was to be roasted thoroughly (Ex. xii. 9). No portion of it was allowed to be carried out of the house, and if any was not consumed at the meal it was put away along with the bones and tassels, in the morning of the 15th of Nisan; or, if that day happened to be the Sabbath, on the 17th.

As the paschal lamb could be legally slain, and the flesh and blood offered, only in the national sanctuary (Deut. xvi. 2), it of course ceased to be repeated Ex. xxxiv. 25, 28, appears to be a sort of proverbial adage respecting the three great feasts. "Three times in the year all thy males shall appear before the Lord God. Thou shalt not offer the blood of my sacrifice with leavened bread; neither shall the fat of my sacrifice remain until the morning. The first of the first-fruits of thy land thou shalt bring into the house of the Lord thy God. Thou shalt not seethe a kid in thy mother's milk." The references to the Passover and Pentecost are plain enough. That which is supposed to refer to Tabernacles (which is also found Deut. xiv. 21), "Thou shalt not seethe a kid in his mother's milk," is explained by Abrahams, and in a Manuel MS. spoken of by Urquhart, as bearing on a custom of boiling a kid in the milk of its dam as a charm, and sprinkling fields and orchards with the milk to render them fertile (Urquhart, True Notion of the Lord's Supper, pp. 36, 37; Spence, Lev. Hi. 18). For other interpretations of the passages see Rosenmuller, in Exod. xxiii. 19). (This is Ex. iii. 129 a."

The statement is in the Dialogue with Trypho, c. 49: "καὶ τὸ κολοφωνὺς προβατόν ἐκεῖνον ὥσπερ χίβανον, τοῦ παθῶν τοῦ σπαρωνίου, δὲ ἐκ σπορῶν τακαλλοῖ βρισκόμενον ὡς τὸ γραφέων προβατόν συμποτούμενον διὰ τὴς καύσεως τοῦ σπαρωνίου υποτίθει. ἔτι οὐκ ἄλλος ὁμοίως διαποτίθεται ὡς τὰ κατὰ τούτον παθᾶν μετὰ τῆς καύσεως, καὶ τάς πάλας κατὰ τὸ μετικήτωσαν, καὶ προσποτοῦμεν καὶ οἱ γέρα καὶ τοῦ προβατός."

As Justin was a native of Flavias Neapolis, it is a striking fact that the modern Samaritans follow their proverbial language in the same manner, on this subject. Mr. George Grove, who visited Vomeros in 1834, in a letter to the writer of this article, says, "The lambs (they require six for the community now) are roasted all together by studding the three sides, not head downwards, in an oven which is like a small well, about three feet diameter, and four or five feet deep, roughly stoned, in which a fire has been kept up for several hours. After the lambs are thrust in, the top of the hole is coved with boughs and earth, to keep the heat till they are done. Each lamb has a stake or spit run through him to draw him up by; and, to prevent the spit from tearing away through the roast meat with the weight, a cross piece is put through the lower end of it." A similar account is given in Miss Rogers's Domestic Life in Palestine. Vihrings, Beckert, and Bottiger have taken the statement of Justin as representing the ancient Jewish usage; and, with him, regard the crossed spits as a prophetic type of the cross of our Lord. But it would seem more probable that the transverse spit was a mere matter of convenience, and was perhaps never in use among the Jews. The rabbinical traditions relate that the lamb was called "Gallus," "qui quum totam asperatam, cum capite, crebrum, et intestinum, polos antem et intestina ad latera lagbefatur inter assumnum, alias quasi armatam preparavit, qui gladen in capite et corde in latere est nutrimus" (Othon, Lex. Rob. p. 326). (In the Samaritan Passover, see the addition to this article. p. 255.)

The word ἄρα in A. V. "raw," is rendered "alive" by Ockers and Jonathan. In 1 Sam. ii. 15, it plainly means raw. But Jarchi, Aben Ezra, and other Jewish authorities, understand it as "hastily prepared" (Rosenmuller, in loc.).

The following appear to be the most interesting: A shambler of lamb, thoroughly roasted, is placed on the table to take the place of the paschal lamb, with a salt and vinegar sauce, as a substitute for the sweet sauce, to remind them of the sort of work carried on by their fathers in Egypt (see above, c), there is sometimes a vessel of salt and water, to represent the Red Sea, into which they dip the bitter herbs. But the most remarkable usage is that connected with the expectation of the coming of Elijah. A cup of wine is poured out for him, and stands all night upon the table. Just before the filling of the cups of the guests the fourth time, there is an interval of dead silence, and the door of the room is opened for some minutes to admit the prophet. (Rash. t. 700, note e.)

Asahel A. Bartelmr, p. 384) and Hulmann (quoted by Winter) conjecture the original unleavened bread of the Passover to have been of barley, in connection with the commencement of barley harvest.
The bitter herbs and the sauce.—According to Peschlin (ii. 6) the bitter herbs (πιπτρίδες: lettuce appsites, Ex. xii. 8.), might be
suede, chichery, wild lettuce, or nettles. These plants were important articles of food to the ancient Egyptians (as is noticed by Pliny), and they
are said to constitute nearly half that of the modern Egyptians. According to Niesher they are still eaten at the Passover by the Jews in the East.
They were used in former times either fresh or dried, and a portion of them is said to have been eaten before the unleavened bread (Pesch. x. 3).

The sauce into which the herbs, the bread, and the meat were dipped as they were eaten (John xiii. 20: Matt. xxvi. 29) is not mentioned in the
Pentateuch. It is called in the Mishna הַרְבַּעֵי, The Four Cups of Wine.—There is no mention of wine in connection with the Passover in the Pentateuch; but the Mishnai
strictly enjoins that there should never be less than four cups of it provided at the paschal meal even of the poorest Israelite (Pes. x. 1). The wine was usually red,
and it was mixed with water as it was drunk (Pes. vii. 13, with Bartenora's note; and Otho's Lex. p. 507). The cups were hand round in succession
at specified intervals in the meal (see below, f.). Two of them appear to be distinctly mentioned in Luke xiiii. 17, 20, "The cup of blessing" (1 Cor.
15. 16) was probably the latter of these, and is generally considered to have been the third of the series, after which a grace was said; though
a comparison of Luke xiiii. 29 (where it is called "the cup after supper") with Pes. x. 7, and the designation לְיַדָּם בְּלֵא חֶפֶז, "cup of the Hallel," might rather suggest that it was the fourth and last cup. Schoenjagen, however, is inclined to
doubt whether there is any reference, in either of the passages of the N. T., to the formal ordering of the cups of the Passover, and proves that the
name לְיַדָּם בְּלֵא חֶפֶז, "cup of the Hallel," might rather suggest that it was the fourth and last cup. Schoenjagen, however, is inclined to
doubt whether there is any reference, in either of the passages of the N. T., to the formal ordering of the cups of the Passover, and proves that the
name "cup of blessing" (כֵּן לְיַדָּם בְּלֵא חֶפֶז) was applied in a general way to any cup which was drunk with thanksgiving, and that the expression was often used metaphorically, e. g. Ps. cxv. 15
(Hebr. in 1 Cor. x. 16. See also Carpov, App. Crit. p. 389).

The wine drunk at the meal was not restricted to the four cups, but none could be taken during the interval between the third and fourth cups
(Pes. x. 7).

(c.) The Hallel. — The service of praise sung at the Passover is not mentioned in the Law. The name is contracted from הַלֵּי הַלֵּלֶל (Halilijah)
It consisted of the series of Psalms from exiiii. to exvii. The first portion, comprising Ps. exiii. and exiv., was sung in the early part of the meal, and the second part after the fourth cup of wine. This is supposed to have been the "hymn" sung by our Lord and his Apostles (Matt. xxxi. 30; Mark xiv. 23; Buxtorf, Lex. T. s. v. 7717, and Syn. Jud. p. 48). Otho, Lex. p. 211; Carpov, App. Crit. p. 374).

(f.) Mode and Order of the Paschal Meal. — Adopting so much from Jewish tradition as is not inconsistent or improbable, the following appears
to have been the usual custom. All work, except that belonging to a few trades conducted with daily
life, was suspended for some hours before the evening of the 14th of Nisan. There was, however, a difference in this respect. The Galileans desisted
from work the whole day; the Jews of the south only after the middle of the tenth hour, that is, half past three o'clock. It was not lawful to eat
any ordinary food after daylight. The reason assigned for this was, that the paschal supper might be eaten with the enjoyment furnished by a good
appetite. (Pes. iv. 1-4, x. 1, with Maimonides' note.) But it is also stated that this preliminary fasting was especially incumbent on the eldest son,
and that it was intended to commemorate the deliverance of the first-born in Egypt. This was probably only a fancy of later times (Bux. Syn.
Jud. xviii. p. 491).

No male was admitted to the table unless he was circumcised, even if he was of the seed of Israel (Ex. xiiii. 48). Neither, according to the letter of the law, was any one of either sex admitted who was ceremonially unclean (Num. ix. 6; Joseph. B. J. vi. 9, § 3). But this rule was on special
occasions liberally applied. In the case of Heze-
kiah's Passover (2 Chr. xxxix.) we find that a greater degree of legal purity was required to slaughter the
lambs than to eat them, and that numbers partook "otherwise than it was written," who were not
"cleansed according to the purification of the same
tary." The Rabbis distinctly state that women
were permitted, though not commanded, to partake (Pes. vii. 1: Chagigah, i. 1; comp. Joseph. B. J.
vi. 9, § 3), in accordance with the instances in Scripture which have been mentioned of Hannah and Mary (p. 2414 b). But the Karaites, in more
recent times, excluded all but full-grown men. It was customary for the number of a party to be not
more than ten (Joseph. B. J. vi. 9, § 3). It was
perhaps generally under twenty, but it might be as
many as a hundred, if each one could have a piece of the "arm as large as an olive" (Pes. viii. 7).

When the meal was prepared, the family was seated round the table, the potter was taking a place of honor, probably somewhat raised above the
rest. There is no reason to doubt that the ancient Hebrews sat, as they were accustomed to do at their ordinary meals (see Otho, Lex. p. 7) But when the custom of reclining at table had be
a month before the Passover. Amongst these were the annual whitewashing of the sepulchres (cf. Matt.
xviii. 27) (Reid, Art. iv. 2, 6). In John xiv. 55, we find some Jews coming up to Jerusalem to purify
themselves a week before the feast.
some general, that posture appears to have been enjoined, on the ground of its supposed significance. The Mishna says that the hands of the family should recline at the Passover "like a king, with the case becoming a free man" (P. S. x. i. 1, with Maimonides' note). He was to keep in mind that when his ancestors stood at the feast in Egypt they took the posture of slaves (R. Levi, quoted by Othon, p. 504). Our Lord and His Apostles conformed to the usual custom of their time, and received "as slavish" (Matt. xxvi. 26). When the party was arranged, the first cup of wine was filled, and a blessing was asked by the head of the family on the feast, as well as a special one on the cup. The bitter herbs were then placed on the table, and a portion of them eaten, either with or without the sauce. The unleavened bread was handed round next, and afterwards the lamb was placed on the table in front of the head of the family (P. S. x. 3). Before the lamb was eaten, the second cup of wine was filled, and the son, in accordance with Ex. xii. 26, asked his father the meaning of the feast. In reply, an account was given of the sufferings of the Israelites in Egypt, and of their deliverance, with a particular explanation of Deut. xxvi. 5, and the first part of the Hallel (P. S. exii. exiv.) was sung. This being gone through, the lamb was carved and eaten. The third cup of wine was poured out and drunk, and soon afterwards the fourth. The second part of the Hallel (P. S. ex. to exviii.) was then sung (P. S. x. 2-5). A fifth wine-cup appears to have been occasionally produced, but perhaps only in later times. What was termed the greater Hallel (Ps. ex. to xxxviii.) was sung on such occasions (Bux. S. xiii. 16.; Josephus, de B. J. vi. 2. 5). The meal being ended, it was unlawful for anything to be introduced in the way of dessert.

The Israelites who lived in the country appear to have been accommodated at the feast by the inhabitants of Jerusalem in their houses, so far as there was room for them (Luke xxi. 10-12; Matt. xxvi. 18). It is said that the guests left in return for their entertainment the skins of the lamb, the oven, and other vessels which they had used. Those who could not be received into the city encamped without the walls in tents, as the pilgrims now do at Mecca. The number of these must have been very great, if we may trust the computation of Josephus that they who partook of the Passover amounted, in the reign of Nero, to above 2,000,000 (R. J. vi. 9, § 5). It is not wonderful that seditions were apt to break out in such a vast multitude so brought together (Jos. Ant. xvi. 9, § 2; B. J. ii. 3, a.e.; comp. Matt. xxvi. 5; Luke xiii. 1).

After the passchal meal, such of the Israelites from the country as were so disposed left Jerusalem, and observed the remainder of the festival at their homes (Deut. xxi. 7). See also Lightfoot, on Luke xii. 14.

(9.) The first Slaying of the Pasch. — The offering of the Omer, or sheaf (תהלית; תַּהֲלוֹתָ הַשָּׁנָה) is mentioned elsewhere in the Law except Lev. xxiii. 10-14. It is here commended that while the Israelites might reach the highest of promise, they should bring, on the 16th of the month, "the morrow after the sabbath" (i.e., the day of holy convocation [Pentecost, § 1, note]), the first sheaf of barley, as the first wheat to be waved by him before the Lord. A lamb, with a meat-offering and a drink-offering, was to be offered at the same time. Until this ceremony was performed, no bread, parched corn, or green ears, were to be eaten of the new crop (see Josh. v. 11, 12). It was from the day of this offering that the fifty days began to be counted to the day of Pentecost (Lev. xxiii. 15). The sheaf of barley, as the first fruit of the grain which was first ripe (2 Kings iv. 42), Josephus relates (Ant. iii. 10, § 5) that the barley was ground, and that ten handfuls of the meal were brought to the altar, one handful being cast into the fire and the remainder given to the priests. The Mishna adds several particulars, and, amongst others, that men were formally sent by the Saviour to cut the barley in some field near Jerusalem; and that, after the meal had been sitcked thirteen times, it was mingled with oil and incense (Menachoth, x. 2-6).

(b.) The Chagigah. — The daily sacrifices are enumerated in the Pentateuch only in Num. xxviii. 19-23, but reference is made to them Lev. xxiii. 8. Besides these public offerings (which are mentioned, p. 2343 b), there was another sort of sacrifice connected with the Passover, as well as with the other great festivals, called in the Talmud קֶטֶרֶת (Chagigah, i.e., festivity). It was a voluntary peace-offering made by private individuals. The victim might be taken either from the flock or the herd. It might be either male or female, but it must be without blemish. The offerer laid his hand upon his head and slew it at the door of the sanctuary. The blood was sprinkled on the altar, and the fat of the inside, with the kidneys, was burned by the priest. The breast was given to the priest as a wave-offering; and the right shoulder as a heave-offering (Lev. i. 5-7; xxviii. 29-34). What remained of the victim might be eaten by the offerer and his guests on the day on which it was slain, and on the day following, but if any portion was left till the third day, it was burned (Lev. vii. 16-18; Pesach. vi. 4). The connection of these free-will peace-offerings with the festivals appears to be indicated Num. x. 10; Deut. xiv. 26; 2 Chr. xxxii. 22, and they are included under the term Passover in Josh. xxv. 7.

"The slayings therefore sacrifice the passover unto the Lord thy God, of the flock and of the herd." Onkelos here understands the command to sacrifice from the flock, to refer to the passchal lamb; and that to sacrifice from the herd, to the Chagigah. But it seems more probable that both the flock and the herd refer to the Chagigah, as there is a specific command respecting the passchal lamb in Lev. xxv. 7-8. (See Lightfoot, in the Celt. Scr.; and Lightfoot, Hor. Heb., on John xiii. 28.) Here are evidently similar references. 2 Chr. xxx. 22-24, and 2 Chr. xxxvi. 7. Hookish and his princes gave away, at the great Passover which he celebrated, two thousand bullocks and seventeen thousand sheep; and Josiah, on a similar occasion, is said to have distributed the fruits of the land at his own cost, "the lambs for the Passover offerings," besides three thousand oxen. From these passages and others it may be seen that the eating of the Chagigah...
PASSOVER

was an occasion of social festivity, connected with the festivities, and especially with the Passover. The principal day for sacrificing the Passover Chaggaib was the 15th of Nisan, the first day of holy convocation, unless it happened to be the weekly Sabbath. The paschal lamb might be slain on the Sabbath, but not the Chaggaib. With this exception, the Chaggaib might be offered on any day of the festival, and on some occasions a Chaggaib victim was slain on the 14th, especially when the paschal lamb was likely to prove too small to serve as next for the party (Pesch. iv. 4. x. 3; Lightfoot, Temple Service, c. xii.; Ewald, Ant. iv. c. ii. § 2).

That the Chaggaib might be hoisted, as well as roasted, is proved by 2 Chr. xxxv. 13. "And they roasted the passover with fire according to the ordinance; but the other holy offerings sod they in pots, and in caldrons, and in pans, and divided them specially among the people."

(i.) Release of Prisoners. — It is a question whether the release of a prisoner at the Passover (Matt. xxvii. 15; Mark xv. 6; Luke xxiii. 17; John xviii. 39) was a custom of Roman origin resembling what took place at the lustranes (Liv. v. 13); and, in later times, on the birthday of an emperor; or whether it was an old Hebrew custom belonging to the festival, which Pilate allowed the Jews to retain. Grocius argues in favor of the former notion (On Matt. xxvii. 15). But others (Hortinger, Schoettgen, Winer) consider that the words of St John— ἐστι δὲ συνάγεται ἡμῖν — render it most probable that the custom was essentially Hebrew. Schoettgen thinks that there is an allusion to it in Pesch. (viii. 6), which mentions that a lamb was slain "in the 14th of Nisan for the special use of one in prison to whom a release had been promised. The subject is discussed at length by Hortinger, in his tract De Ritu divinitudini Ruman in Festa Paschalis, in Theor. Nova Theol. Philolog."

(k.) The Second, or Little Passover. — When the Passover was celebrated the second year, in the wilderness, certain men were prevented from keeping it, owing to their being deified by contact with a dead body. Being thus prevented from obeying the Divine command, they came anxiously to Moses to inquire what they should do. He was accordingly instructed to institute a second Passover, to be observed on the 14th of the following month, for the benefit of any who had been hindered from keeping the regular one in Nisan (Num. ix. 11). The Talmudists called this the Little Passover (נשנש). It was distinguished, according to them, from the Greater Passover by the rites lasting only one day, instead of seven days, by it not being required that the Hallel should be sung during the meal, but only when the lamb was slaughtered, and by it not being necessary for leaven to be put out of the houses (Pesch. ix. 3; Buxl. Lex. Tod. coll. 1709).

(l.) Obarvences of the Passover recorded in Scripture. — Of these seven are of chief historical importance.

1. The first Passover in Egypt (Ex. xii.).

2. The first kept in the desert (Num. ix.).

3. The no notice of the occurrence of any other Passover in the desert; and Hupfeld, Keil, and others have concluded that none took place between this one and that at Gilgal. The neglect of circumscription may render this probable. But Calvin imagines that a special commission was given to the people to continue the ordinance of the Passover. (See Keil on Josh. vi. 10.)

4. That celebrated by Josiah at Gilgal immediately after the circumscription of the people, when the naama ceased (Josh. v.).

5. That Hezekiah observed on the occasion of his restoring the national worship (2 Chr. xxxv.). Owing to the impurity of a considerable proportion of the priests in the month Nisan, the Passover was not held till the second month, the proper time for the Little Passover. The postponement was determined by a decree of the congregation. By the same authority, the festival was repeated through a second seven days to serve the need of the vast multitude who wished to attend it. To meet the case of the probable impurity of a great number of the people, the Levites were commanded to slaughter the lambs, and the king prayed that the Lord would pardon every one who was penitent, though his legal pollution might be upon him.

6. The Passover of Josiah in the eighteenth year of his reign (2 Chr. xxxix.). On this occasion, as in the Passover of Hezekiah, the Levites appear to have slain the lambs (ver. 6), and it is expressly stated that they flayed them.

7. That celebrated by Ezra after the return from Babylon (Ezr. vi.). On this occasion, also, the Levites slew the lambs, and for the same reason as they did in Hezekiah's Passover.

III. The Last Supper.

1. Whether or not the meal at which our Lord instituted the sacrament of the Eucharist was the paschal supper according to the Law, is a question of great difficulty. No point in the Gospel history has been more disputed. If we had nothing to guide us but the three first Gospels, no doubt of the kind could well be raised, though the narratives may not be free from difficulties in themselves. We find them speaking, in accordance with Jewish usage, of the day of the supper as that on which "the first day of unleavened bread" (Mark xvii. 17; Mark xiv. 12; Luke xii. 7). Each relates that the use of the guest-chamber was secured in the manner usual with those who come from a distance to keep the festival. Each states that "they made ready the Passover," and that, when the evening was come, our Lord, taking the place at the head of the family, sat down with the twelve. He himself distinctly calls the meal "this Passover" (Luke xii. 15, 16). After a thanksgiving, he passes around the first cup of wine (Luke xxii. 27), and, when the supper is ended, the usual "cup of blessing" (comp. Luke xxii. 20; 1 Cor. x. 16, xi. 25). A hymn is then sung (Matt. xxvi. 30; Mark xiv. speaking was evidently allowable: in one case regarding it as a matter of fact that the eating of unleavened bread began on the 14th; and in the other, distinguishing the feast of unleavened bread, lasting from the first day of holy convocation to the concluding one, from the paschal meal.

a Josephus in like manner calls the 14th of Nisan the first day of unleavened bread (B. J. v. 3, § 1); and he speaks of the tenth of the Passover as lasting eight days (Ant. ii. 15, § 1). But he elsewhere calls the 15th of Nisan "the commencement of the feast of unleavened bread." (Ant. ii. 10, § 5.) Either mode of
If it be granted that the supper was eaten on the evening of the 14th of Nisan, the apprehension, trial, and crucifixion of our Lord must have occurred on Friday the 14th, the day of holy convocation, which was the first of the seven days of the Passover week. The weekly Sabbath on which He lay in the tomb was the 16th, and the Sunday of the resurrection was the 17th.

But, on the other hand, if we had no information but that which is to be gleaned from St. John's Gospel, we could not hesitate to infer that the evening of the supper was that of the 14th of Nisan, the day preceding that of the paschal meal. It appears to be spoken of as occurring before the feast of the Passover (xiii. 1, 2). Some of the disciples suppose that Christ told Judas, while they were at supper, to lay what they had need of against the feast (xiii. 23). In the night which follows the supper, the Jews will not enter the praetorium lest they should be defiled and so not able to "eat the Passover" (xviii. 28). When our Lord is before Pilate, about to be led out to crucifixion, we are told that it was "the preparation of the Passover" (xiv. 14). After the crucifixion, the Jews are solicited, "I because it was the preparation, that the body of Christ should not remain upon the cross on the Sabbath-day, for that Sabbath-day was a high day" (xiv. 31).

If we admit, in accordance with the first view of these passages, that the Last Supper was on the 13th of Nisan, our Lord must have been crucified on the 14th, the day on which the paschal lamb was slain and eaten. He lay in the grave on the 15th (which was a "high day") and died on Sabbath, because the weekly Sabbath coincided with the day of holy convocation, and the Sunday of the resurrection was the 16th.

It is alleged that this view of the case is strengthened by certain facts in the narratives of the synoptic Gospels, as well as that of St. John, compared with the law and with what we know of Jewish customs in later times. If the meal was the paschal supper, the law of Ex. xii. 22, that none shall go out of the door of his house until the morning," must have been broken, not only by Judas (John xiii. 30), but by our Lord and the other disciples (Luke xiv. 34). In like manner it is said that the law for the observance of the 15th, the day of holy convocation with which the paschal week commenced (Ex. xii. 16; Lev. xxiii. 24, 35), and some express encomiums in the Talmud regarding legal proceedings and particular details, such as the carrying of spicew, must have been infringed by the Jewish ritualists in the apprehending of Christ, in his trials before the high-priest and the Sanhedrin, and in his crucifixion: and also by Simon of Cyrene, who was coming out of the country (Mark xv. 21; Luke xviii. 25), by Joseph who bought fine linen (Mark xv. 46), by the women who bought spices (Mark xvi. 1; Luke xxii. 56), and by Nicodemus who brought to the tomb a hundred pounds weight of a mixture of myrrh and aloes (John xix. 39). The same objection is considered to be against the supposition that the disciples could have imagined, on the evening of the Passover, that our Lord was giving directions to Jews respecting the purchase of anything or the giving of alms to the poor. The latter act (except under very special conditions, would have been as much opposed to rabbinical maxims as the former.

It is further urged that the expressions of our Lord, "My time is at hand," (Matt. xxvii. 64), and "the Passover" (Luke xxi. 15), as well as St. Paul's designating it "the same night that He was betrayed," instead of the night of the Passover (1 Cor. xi. 23), and his identifying Christ as our slain paschal lamb (1 Cor. v. 7), seem to point to the time of the supper as being peculiar, and to the time of the crucifixion as being the same as that of the killing of the lamb (Nemmer and Liefèche).

It is not surprising that some modern critics should have given up as hopeless the task of reconciling these difficulties. Several have rejected the narrative of St. John (Bretscheider, Weisse), but a greater number (especially De Wette, Usteri, Ewald, Meyer, and Theile) have taken an opposite course, and have been content with the notion that the three first Evangelists made a mistake and conformed their narratives with the Passover.

2. The reconciliations which have been attempted fall under three principal heads:

i. Those which regard the supper at which our Lord washed the feet of his disciples (John xiii.), as having been a distinct meal eaten one or more days before the regular Passover, of which our Lord partook in due course according to the synoptic narratives.

ii. Those in which it is endeavored to establish that the meal was eaten on the 13th, and that our Lord was crucified on the evening of the true paschal supper.

iii. Those in which the most obvious view of the first three narratives is defended, and in which it is attempted to explain the apparent contradictions in St. John, and the difficulties in reference to the law.

(i.) The first method has the advantage of furnishing the most ready way of accounting for St. John's silence on the institution of the Holy Communion. It has been adopted by Maldonat, Lightfoot, and Bengel, and more recently by Kaiser. Lightfoot identified the supper of John xiii., with the one in the house of Simon the leper at Bethany two days before the Passover, when Mary poured the ointment on the head of our Saviour (Matt. xxvi. 6; Mark xiv. 3); and quaintly remarks, "While they are grumbling at the anointing of his head, He does not scruple to wash their feet." Bengel supposes that it was eaten only the evening before the Passover.

But any explanation founded on the supposition of two meals, appears to be rendered untenable by the context. The fact that all the four Evangelists introduce in the same connection the foretelling of the treachery of Judas with the dipping of the sop, and of the denial of St. Peter and the going out to

---

*a* It has been stated (p. 2342, note 1) that, according to Jewish authorities, this law was disallowed in later times. But even if this were not the case, it does not seem that there can be much difficulty in adopting the arrangement of Grewell's Harmony, that the party did not leave the house to go over the brook till after midnight.

the Mount of Olives, can hardly leave a doubt that they are speaking of the same meal. Besides this, the explanation does not touch the greatest difficulties, which are those connected with "the day of preparation."

(i.) The current of opinion a in modern times has set in favor of taking the more obvious interpretation of the passages in St. John, that the supper was eaten on the 13th, and that our Lord was crucified on the 14th. It must, however, be admitted that most of those who advocate this view in some degree ignore the difficulties which it raises in any respectful interpretation of the synoptical narratives. Of Tittmon (Molitoris, p. 475) simply remarks that τὴν ἑλικιαν (Matt. xxvi. 17; Mark xiv. 12) should be explained as τὴν ἑλικιαν τῶν ἑλικιών. Dean Alford, while he believes the narrative of St. John "absolutely excludes such a supposition as that our Lord and his disciples ate the usual Passover," acknowledges the difficulty and dismisses it (on Matt. xxvi. 17).

(b.) It is assumed that a party of the Jews, probably the Sadducees and those who inclined towards them, used to eat the Passover one day before the rest, and that our Lord approved of their practice. But there is not a shadow of historical evidence of the existence of any party which might have held such a notion until the controversy between the Rabbinists and the Karaites arose, which was not much before the eighth century. b

(b.) It has been conjectured that the great body of the Jews had gone wrong in calculating the true Passover-day, placing it a day too late, and that our Lord ate the Passover on what was really the 14th, but what commonly passed as the 13th. This was the opinion of Beza, Bucer, Calvinus, and Scaliger. It is favored by Zister. But it is utterly unsupported by historical testimony.

(c.) Calvin supposed that on this occasion, though our Lord thought it right to adhere to the true legal time, the Jews ate the Passover on the 15th instead of the 14th, in order to escape from the burden of two days of strict observance (the day of holy convocation and the weekly Sabbath) coming together. c But that no practice of this kind could have existed so early as our Lord's time is satisfactorily proved in Cocceius' note to St. Matthew, i. 2. d

(d.) Grosius e thought that the meal was a πασχαλαμπρόσωπον (like the paschal feast of the modern Jews, and such as might have been observed during the Babylonian captivity), not a πασχαλικόν. But there is no reason to believe that such a mere commemorative rite was ever observed till after the destruction of the Temple.

(e.) A view which has been received with far more generally than either of the preceding is, that the Passover was instituted by Christ for the occasion, in order that He might himself suffer on the proper evening on which the paschal lamb was slain. Neander says, "He forewarned that He would have to leave his disciples before the Jewish Passover, and determined to give a peculiar meaning to his last meal with them, and to place it in a peculiar relation to the Passover of the Old Covenant to the Passover of the New Covenant." (Life of Christ, § 265.) This view is substantially the same as that held by Clement, Origen, Erasm. Calmet, Kuhn, Einer, Alford. 

Erasmus (Paraphrase on John xiii. 28, Luke xxi. 7) and others have called it an "anti-Semitic" feast, similar with the intention, no doubt, to help on a reconciliation between St. John and the other Evangelists. But if this view is to stand, it seems better, in a formal treatment of the subject, not to call it a Passover at all. The difference between it and the Hebrew rite must have been essential. Even if a lamb was eaten in the supper, it can hardly be imagined that the priests would have performed the essential acts of sprinkling the blood and offering the fat on any day besides the legal one (see Maimonides quoted by Otho, Lex. p. 501). It could not therefore have been a true paschal sacrifice.

(iii.) They who take the facts as they appear to be on the surface of the synoptical narratives 

* start from a simpler point. They have nothing unexpected in the occurrences to account for, but they have to show that the passages in St. John may be fairly interpreted in such a manner as not to interfere with their own conclusion, and to meet the objections suggested by the laws relating to the observance of the festival. We shall give in succession, as briefly as we can, what appear to be their best explanations of the passages in question.

---

b Eton (Dissertationes, vol. ii. diss. 10 and 12), forgetting the late date of the Karaiti controversy, supposed that our Lord might have followed them in taking the day which, according to their customs, was calculated from the first appearance of the moon. Carpov (App. Crit. p. 439) advocates the same notion, without mentioning the Karaites. Ehrard conjectures that those who thus held that the Karaites may have substituted the somewhat earlier explanation is given [by Rev. Henry Constable] in the Journal of Sacred Literature for Oct. 1811.

c Horn, in Matt. xxvi. 17, 15, see Trölluck.

d Surenhusius Moskova, iv. 299.

e On Matt. xxvi. 12, and John xiii. 1.

f Assuming this view to be correct, may not the change in the day made by our Lord have some analogy to the change of the weekly day of rest from the seventh to the first day?

g Dean Ellicott regards the meal as "a paschal supper" eaten twenty-four hours before that of the other Jews, "within what were popularly considered the limits of the festival," and would understand the expression in Ex. xii. 6, "between the two evenings," as denoting the time between the evenings of the 13th and 14th of the month. But see note e, p. 254, on the idea that the weekly day of rest from the seventh to the first day was reckoned from the evening of the 6th to the evening of the 7th.

h Lightfoot, Bochart, Rehdan, Schoettgen, Tholuck, Olsdoren, Stier, Lange, Hengstenberg, Robinson Davidson [formerly], Fairbairn, [Norton, Andrews Wieseler, Luthardt, Biunkin, Ehrard since 1849 Riggenbach].
PASSOVER

(a.) John xiii. 1, 2. Does πρὸ τῆς ἑορτῆς mean the time only of the proposition in the first verse, or is the limitation to be carried on to verse 2, so as to refer to the supper? In the latter case, for which De Wette and others say there is "a logical necessity," εἰς τέλος ἕτοιμος αυτοῦ must refer not merely to the manifestation of his love of He who was about to give to his disciples in washing their feet; and the natural conclusion is, that the meal was one eaten before the paschal supper.

Buxtorf, however, contends that πρὸ τῆς ἑορτῆς is equivalent to εἰς τῷ προσόπῳ, "quod ipsa praecedent festum, ut tamen sit pars festi." After this agrees with him. Others take τὸ πάσχα to mean the seven days of unleavened bread as not including the eating of the lamb, and justify this limitation by St. Luke xxii. 1 (ἢ ἑορτὴ τῶν ἀβύδων ἤ ἱεροῦμ ἐκ πάσχα). See note c, p. 2392. But not a few of those who take this side of the main question (Olahsbon, Wieseler, Tholuck, and others) regard the first verse as complete in itself; understanding its purport to be that "Before the Passover, in the prospect of his departure, the Saviour's love was actively called forth towards his followers, and He gave proof of his love to the last." Tholuck remarks that the expression δεῖπνου γεύσεων (Tischendorf reads γεύσεως), "while supper was going on," (not as in the A. V. "supper being ended") is very abrupt if we refer it to anything except the Passover. [See also Norton's note.—A.]

The Evangelist would then rather have used some such expression as, καὶ εἰς ὑπόπτως αὐτῶν δεῖπνον: and he considers that this view is confirmed by John xxi. 20, where this supper is spoken of as if it was something familiarly known and not peculiar in its character —οὐ καὶ ἄντισεν εἰς τῷ δείπνῳ. On the whole, Neander himself admits that nothing can be so safely inferred from John xiii. 1, 2, in favor of the supper having taken place on the 13th.

(b.) John xiii. 29. It is urged that the things of which they had "need against the feast," might have been the provisions for the Chagigah, perhaps with what else was required for the seven days of unleavened bread. The usual day for sacrificing the Chagigah was the 16th, which was then commencing (see 2347 a). But there is another difficulty, in the disciples thinking it likely either that the paschal bread could be mixed, or that unleavened bread could be given to the poor, on a day of holy convocation. This is of course a difficulty of the same kind that as which meets us in the purchases actually made by the women, by Joseph, and Nicodemus. Now, it must be admitted, that we have no proof that the strict rabbinical maxims which have been appealed to on this point existed in the time of our Saviour, and that it is highly probable that the letter of the law in regard to trading was habitually relaxed in the case of what was required for religious rites, or for burials. There was plainly a

distinction recognized between a day of holy convocation and the Sabbath in the Mosaic Law itself in respect to the obtaining and preparation of food under which head the Chagigah might come (Ex. xii. 16); and in the Mishna the same distinction is clearly maintained (Yom Teb, v. 2, and Me'iltha, i. 5). It also appears that the School of Hillel allowed more liberty in certain particulars on festivals and fasts in the night than in the day-time. And it is expressly stated in the Mishna, that on the Sabbath itself, wine, oil, and bread could be obtained by leaving a cloak (אִם לֹא לְתַקֵּר אֶת בֵּית ה' הַלָּוֶה) as a pledge, and when the 14th of Nisan fell on a Sabbath the paschal lamb could be obtained in like manner (Shabbath, xxiii. 1). Alms also could be given to the poor under certain conditions (Shabbath, i. 1).

(c.) John xviii. 28. The Jews refused to enter the praetorium, lest they should be defiled and so forced to eat the Passover. Neander and others deny that this passage can possibly refer to anything but the paschal supper. But it is alleged that the words οὐ πάσχας τὸ πάσχα, may either be taken in a general sense as meaning "that they might go on keeping the passover," or that τὸ πάσχα may be understood specifically to denote the Chagigah. That it might be so used is rendered probable by Luke xxii. 1; and the Hebrew word which it represents (אֶמְלָע) evidently refers equally to the victims for the Chagigah and the paschal lamb (Dent. xvi. 2), where it is commanded that the Passover should be sacrificed "of the flock and the herd." In the plural it is used in the same manner (2 Chr. xxxiv. 7, 9). It is moreover to be kept in view that the Passover might be eaten by those who had incurred a degree of legal impurity, and that this was not the case in respect to the Chagigah. Joseph appears not to have participated in the sacrifice of the other rulers, as he entered the praetorium to beg the body of Jesus (Mark xix. 15). Lightfoot (Ex. Heb. loc. cit.) goes so far as to draw an argument in favor of the 14th being the day of the supper from the very text in question. He says that the slight defilement incurred by entering a gentle house, had the Jews merely intended to eat the supper in the evening, might have been done away in good time by mere ablution; but that as the festival had actually commenced, and they were probably just about to eat the Chagigah, they could not resort even to such a simple mode of purification. [Dr. Fairbairn takes the expression, "that they might eat the Passover," in its limited sense, and supposes that those Jews, in their determined hatred, were willing to put off the meat to be verboten even beyond the legal time (Herm. Manual, p. 341).]

a Peschon. lv. 5. The special application of the license is rather obscure. See Robertson's note. Comp. also Pesch. vi. 2.

b This word may mean an outer garment of any form. But it is more frequently used to denote the fringed garment worn by every Jew in the service of the synagogue. Buxt. Lex. Talm. col. 877.

c St. Augustine says, "O impia ecclesia! Habilis quasi videlicet contaminaturn alieno, et non contaminaturn rei privatae! Aliigenae judicia proprie divinum et sanis, et simul etiam iurisdictioni magnum non timebat. Hinc enim aenea corporant

sacrarium; quibus diebus contaminates illis erat in alienigena huic tained intere." (Tract. cahv. in Jonn. xvii. 2.)

d See p. 2346 b, and Schoettgen on John xviii. 28.

e See 2 Chr. xxx. 17; also Peschon. vii. 4, with Malouinseg's note.

f Dr. Fairbairn takes the expression, "that they might eat the Passover," in its limited sense, and supposes that those Jews, in their determined hatred, were willing to put off the meat to be verboten even beyond the legal time (Herm. Manual, p. 341).
that, though there was a regular "preparation" for the Sabbath, there is no mention of any "preparation" for the festivals (Bochart, Eland, Tholuck, Hengstenberg). The word παρασκευή is expressly explained by προσβάθμιον (Mark xv. 42; Lachmann reads προσ σβάθμιον). It seems that the first day of the week has only changed its name (John xix. 31).a There is no mention whatever of the preparation for the Sabbath in the Old Testament, but it is mentioned by Josephus (Ant. xvi. 6, § 2), and it would seem from him that the time of preparation formally commenced at the ninth hour of the sixth day of the week. The προσβάθμιον is named in Judith viii. 6 as one of the times on which devout Jews suspended their fasts. It was called by the Rabbinists שומם קדש and שומם יבש (Buxt, Lex. Tolda. col. 1629). The phrase in John xix. 14 may thus be understood as the preparation of the Sabbath which fell in the Passover week. This mode of taking the expression seems to be justified by Ignatius, who calls the Sabbath which occurred in the festival σβάθμιον τού πάσχα (Ep. ad Phil. 19), and by Sozomen, who calls is σβάθμιον τον πάσχαν (Hist. Eccl. v. 22). If these are the words admitted, the day of the preparation mentioned in the Gospels might have fallen on the day of holy convocation, the 15th of Nisan.

(c.) John xix. 31. "That Sabbath-day was a high day;" - חָמָא מַגָּלִים. Any Sabbath occurring in the Passover week might have been considered "a high day," as deriving an accession of dignity from the festival. But it is assumed by those who fix the supper on the 13th that the term was applied, owing to the 15th being "a double Sabbath," from the coincidence of the day of holy convocation with the weekly festival. Those, on the other hand, who identify the supper with the paschal meal, contend that the special dignity of the day resulted from its being that on which the Omer was offered, and from which were reckoned the fifty days to Pentecost. One explanation of the term seems to be as good as the other.

(f.) The difficulty of supposing that our Lord's apprehension, trial, and crucifixion took place on the day of holy convocation has been strongly urged. If many of the rabbinical maxims for the observance of such days which have been handed down to us were then in force, these occurrences certainly could not have taken place. But the statements which refer to Jewish usage in regard to legal proceedings on sacred days are very inconsistent with each other. Some of them make the difficulty equally great whether we suppose the trial to have taken place on the 14th or the 15th.

In others, there are exceptions permitted which seem to go far to meet the case before us. For example, the Mishna forbids that a capital offender should be examined in the night, or on the day before the Sabbath or a feast-day (Sanhedrin, iv 1). This law is modified by the glosses of the Gemara. But if it had been recognized in its obvious meaning by the Jewish rulers, they would have altered it in as great a degree on the preceding day (c. e. the 14th) as on the day of holy convocation before the Sabbath. It was also forbidden to administer justice on a high feast-day, or to carry arms (Yoma Tob, v. 2). But these prohibitions are expressly distinguished from unconditional precepts, and are reckoned amongst those which may be set aside by circumstances. The members of the Sanhedrin were forbidden to eat any food on the same day after condemning a criminal.a Yet we find them intending to "eat the Passover" (John xviii. 28) after pronouncing the sentence (Matt. xxvi. 65, 66).

It was, however, expressly permitted that the Sanhedrin might assemble on the Sabbath as well as on feast-days, not indeed in their usual chamber, but in a place near the court of the women. And there is a remarkable passage in the Mishna in which it is commanded that an elder not submitting to the voice of the Sanhedrin should be kept at Jerusalem till one of the three great festivals, and then executed, in accordance with Dent. xvii. 12, 13 (Sanhedrin, x. 4). Nothing is said to lead us to infer that the execution could not take place on one of the days of holy convocation. It is, however, hardly necessary to refer to this, or any similar authority, in respect to the crucifixion, which was carried out in conformity with the sentence of the Roman procurator, not that of the Sanhedrin.

But we have better proof than either the Mishna or the Gemara can afford that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the "great day of the feast," sending out officers to take our Lord, and rebuking them for not bringing Him (John vii. 32–45). St. Peter also was seized during the Passover (Acts xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (Matt. xxvi. 5). On the whole, notwithstanding the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable license was allowed in regard to them, as we have already observed. It is very evident that the festival times were characterized by a free and jubilant character to pronounce sentence in the legal sense. If we suppose that the Roman government had not deprived them of the power of life and death, it may have been easy for them to avail themselves of their law, as expressed in Sanhedrin, iv. 1, that they wished to throw the matter on the procurator. See Bischof, Lectures on the Acts, p. 109; Seiliger's note on the Oecumen. Sacri on John xviii. 31; Lightfoot, Ec. Hist. Matt. xxvi. 3, and John xviii. 31, where the evidence is given which is in favor of the Jews having resided the right of capital punishment forty years before the destruction of Jerusalem.

a "It cannot, however, be denied that the days of holy convocation are sometimes designated in the O. T. simply as Sabbaths (Lev. xvi. 31, xxiii. 11, 23). It is, of course, quite possible that they were a line of descent from the festivals such as are mentioned in the Gospels considered by itself, might refer to them.

b Especially by Grosweiller (Dissert. ill. 156).

c See the notes of Cocceius in Surenhusius, iv. 226. d Bab. Gem. Sanhedrin quoted by Lightfoot on Matt. xxvi. 1. The application of this to the point at hand will, however, hinge on the way in which we understand it not to have been lawful for the Jews to put any man to death (John xviii. 31), and therefore
which did not belong, in the same degree, to the Sabbath, and which was plainly not restricted to the days which fell between the days of holy consecration (Lev. xxiii. 40; Deut. xvi. 7, xvi. 24; see p. 234)). It would also be observed that while the law of the Sabbath was enforced on strangers dwelling amongst the Israelites, such was not the case with the law of the Festivals. A greater freedom of action in cases of urgent need would naturally follow, and it is not difficult to suppose that the women who "rested on the Sabbath-day according to the commandment" had prepared the supper beforehand for the intended observance of the day of holy consecration. To say nothing of the way in which the question might be effected by the much greater license permitted by the school of Hillel than by the school of Shammai, in all matters of this kind, it is remarkable that we find, on the Sabbath-day itself, not only Joseph (Mark xv. 43), but the chief priests and Pharisees coming to Pilate, and, as it would seem, entering the praetorium (Matt. xxvii. 62).

3. There is a strange story preserved in the Gemara (Sanhadaelin, vi. 2) that our Lord having vainly endeavored during forty days to find an advocate, was sentenced, and, on the 14th of Nisan, stoned, and afterwards hanged. As we know that the difficulty of the Gospel narratives had been perceived long before this statement could have been written, and as the two opposite opinions on the chief question were both current, the writer might easily have taken up one or the other. The statement cannot be regarded as worth anything in the way of evidence. a

Not much use can be made in the controversy of the testimonies of the Fathers. But few of them attempted to consider the question critically. Eusebius (Hist. Eccl. v. 23, 24) has recorded the traditions which were in favor of St. John having kept Easter on the 14th of the month. It has been thought that these traditions rather help the conclusion that the supper was on the 14th. But the question on which Eusebius brings them to bear is simply whether the Christian festival should be observed on the 14th, the day εν γης ετω το πασχαλινν, or the 15th, the week in which our Lord was crucified; or the Sunday of the resurrection. It seems that nothing whatever can be safely inferred from them respecting the day of the month of the supper or the crucifixion. Clement of Alexandria and Origen appeal to the Gospel of St. John as deciding in favor of the 13th. Chrysostom expresses himself definitely between the 13th and 14th. It is of little worth, in view of the doubt about the point.

4. It must be admitted that the narrative of St. John, as far as the mere succession of events is concerned, bears consistent testimony in favor of the last supper having been eaten on the evening before the Passover. That testimony, however, does not appear to be so distinct, and so incapable of a second interpretation, as that of the synoptical Gospels, in favor of the meal having been the paschal supper itself, at the legal time (see especially Matt. xxvi. 17; Mark xiv. 1, 12; Luke xxi. 7). Whether the explanations of the passages in St. John, and of the difficulties resulting from the nature of the occurrences related, compared with the enactments of the Jewish law, be considered satisfactory or not, due weight should be given to the antecedent probability that the meal was no other than the regular Passover, and that the reasonableness of the contrary view cannot be maintained without some artificial theory, having no proper foundation either in Scripture or ancient testimony of any kind.

IV. MEANING OF THE PASSOVER.

1. Each of the three great festivals contained a reference to the annual course of nature. Two, at least, of them—the first and the last—also commemorated events in the history of the chosen people. The coincidence of the times of their observance with the most marked periods in the process of gathering in the fruits of the earth, has not unnaturally suggested the notion that their agricultural significance is the more ancient; that in fact they were originally harvest feasts observed by the patriarchs, and that their historical meaning was superadded in later times (Ewald, Hupfeld b).

It must be admitted that the relation to the natural year expressed in the Passover was less marked than that in Pentecost or Tabernacles, while its historical import was deeper and more pointed. It seems hardly possible to study the history of the Passover as a religious act, without some knowledge of the facts in the Scriptures, without being driven to the conclusion that it was, at the very first, essentially the commemoration of a great historical fact. That bread was originally a distinct festival from the Passover, by such passages as Lev. xxiii. 5, 6; "In the fourteenth day of the first month at even is the Lord's Passover; and on the fifteenth day of the same month is the feast of unleavened bread into the Lord; seven days ye must eat unleavened bread" (see also Num. xxviii. 16, 17). Josephus in like manner speaks of the feast of unleavened bread as "following the Passover." (Ant. ii. 10, § 5). But such language may mean no more than the distinction between the paschal supper and the seven days of unleavened bread, which is so obviously implied in the fact that the eating of unleavened bread was observed by the country Jews who were at home, though they could not partake of the paschal lamb without going to Jerusalem. Every member of the household had to abstain from leavened bread, but some only went up to the paschal meal. (See Malon. De Fe bratione et Agno, vi. 1.) It is evident that the common usage, in later times, at least, was to employ, as equivalent terms, the feast of the Passover, and the feast of unleavened bread (Matt. xxvi. 17; Mark xiv. 12; Luke xiii. 1; Joseph. Ant. iv. 2, § 1; B. J. i. 1, § 3). See note n, p. 2947.
part of its ceremonies which has a direct agricultural reference — the offering of the Omer — holds a very subordinate place.

But as regards the whole of the feasts, it is not very easy to imagine that the rites which belonged to them connected with the harvest, were of patriarchal origin. Such rites were adapted for the religion of an agricultural people, not for that of shepherds like the patriarchs. It would seem, therefore, that we gain but little by speculating on the single impression contained in the Pentateuch, that the feasts were ordained by Moses in their integrity, and arranging with a view to the religious wants of the people when they were to be settled in the Land of Promise.

2. The deliverance from Egypt was regarded as the starting-point of the Hebrew nation. The Israelites were then raised from the condition of bondmen under a foreign tyrant to that of a free people owing allegiance to no one but Jehovah. "Ye have seen," said the Lord, "what I did unto the Egyptians, and how I bare you on eagles' wings and brought you unto myself." (Ex. xix. 4.) The prophet in a later age spoke of the event as a creation and a redemption of the nation. God declares himself to be "the creator of Israel," in immediate connection with evident allusions to his having brought them out of Egypt; such as his having made "a way in the sea," and a path in the mighty waters," and his having overthrown "the chariot and the horse, the army and the power." (Is. xiil. 1, 15-17.) The Exodus was thus looked upon as the birth of the nation; the Passover was its annual birthday feast. Nearly all the rites of the festival, if explained in the most natural manner, appear to point to this as its primary meaning. It was the yearly memorial of the redemption of the people to Him who had saved their first-born from the destroyer, in order that they might be made holy to Himself. This was the lesson which they were to teach to their children throughout all generations. When the young Hebrew asked his father regarding the paschal lamb, "What is this?" the answer prescribed was, "By strength of hand the Lord brought us out from Egypt, from the house of bondage; and it came to pass when Pharaoh would have brought us away, then the Lord slay all the first-born in the land of Egypt, both the first-born of man and the first-born of beast; therefore I sacrifice to the Lord all that openeth the womb, being male; but all the first-born of my children I redeem." (Ex. xvii. 14, 15.) Hence, in the periods of great national restoration in the times of Joshua, Hezekiah, Josiah, and Ezra, the Passover was observed in a special manner, to remind the people of their true position, and to mark their renewal of the covenant which their fathers had made.

3. (a) The paschal lamb must of course be regarded as the leading feature in the ceremonial of the festival. Some Protestant divines during the last two centuries (Calv., Capp.,) laying great stress on the fact that nothing is said in the Law respecting either the imposition of the hands of the priest on the head of the lamb, or the bestowing of any portion of the flesh on the priest, have denied that it was a sacrifice in the proper sense of the word. They have been induced to take this view, in order to deprive the Romans of an analogical argument bearing on the Roman doctrine of the Lord's Supper. They affirmed that the lamb was sacerdotal, not sacrificium. But most of their contemporaries (Calv., Boc., Vitringa,) and nearly all modern critics, have held that it was in the strictest sense a sacrifice. The chief characteristics of a sacrifice are all distinctly present in it. It was offered in the holy place (Deut. xvi. 5, 6); the blood was sprinkled on the altar, and the fat was burned (2 Chr. xxx. 10, xxxiv. 11). Philo and Josephus commonly call it agnus ex ovo. The language of Ex. xxvi. 7, xxviii. 18, Num. ix. 7, Deut. xvi. 2, 5, together with 1 Cor. v. 7, would seem to decide the question beyond the reach of doubt.

As the original institution of the Passover in Egypt preceded the establishment of the priesthood and the regulation of the service of the tabernacle, it necessarily fell short in several particulars of the observance of the festival according to the fully developed ceremonial law (see I. 1). The head of the family slew the lamb in his own house, not in the holy place: the blood was sprinkled on the doorposts, not on the altar. But when the law was perfected, certain particulars were altered in order to assimilate the Passover to the accustomed order of religious service. It has been conjectured that the imposition of the hands of the priest was one of these particulars, though it is not recorded (Kurtz). But whether this was the case or not, the other changes which have been stated seem to be abundantly sufficient for the argument. It can hardly be doubted that the paschal lamb was regarded as the great annual peace offering of the family, a thank-offering for the existence and preservation of the nation (Ex. xiii. 14-16), the typical sacrifice of the elected and reputed children of the promise. It was peculiarly the Lord's own sacrifice (Ex. xxix. 18, xxxiv. 25). It was more ancient than the written Law, and called to mind that covenant on which the Law was founded. It returned in a new and peculiar form the expression of the sacredness of the whole people, and of the divine mission of the head of every family, according to the spirit of the old patriarchal priesthood. No part of the victim was given to the priest as in other peace-offerings, because the father was the priest himself. The custom, handed on from age to age, thus guarded from superstition the idea of a priesthood placed in the members of a single tribe, while it visibly set forth the promise which was connected with the deliverance of the people from Egypt. "Ye shall be unto me a kingdom of priests and a holy nation." (Ex. xix. 6.) In this way it became a testimony in favor of domestic worship. In the historical fact that the blood, in later times sprinkled on the altar, had at first had its divinely appointed place on the lintels and door-posts, it was de-
clared that the national altar itself represented the
sanctity which belonged to the home of every Isra-
elite, not that only which belonged to the nation
as a whole.

A question, perhaps not a wise one, has been
raised regarding the purpose of the sprinkling of
the blood on the lintels and door-posts. Some
have considered that it was meant as a mark to
guide the destroying angel. Others suppose that
it was merely a sign to confirm the faith of the
Israelites in their safety and deliverance. Surely
nothing of these views can stand alone. The
sprinkling must have been an act of faith and
obedience which God accepted with favor.
Through faith (see e are told) Moses kept the
Passover and the sprinkling of blood, lest he that
destroyed the first-born should touch them (Heb.
xi. 28). Whatever else it may have been,
this was certainly an essential part of a sacrament,
of an "inhibited sign of grace and of God's good
will," expressing the mutual relation into which
the covenant had brought the Creator and the
creature. That it also denoted the purification of
the children of Israel from the abominations of
the Egyptians, and so had the accustomed signifi-
cance of the sprinkling of blood under the Law
(Heb. ix. 22), is evidently in entire consistency
with this view.

No satisfactory reason has been assigned for the
command to close the lamb four days before the
passchal supper. Kurtz (following Hofmann) tan-
cics that the four days signified the four centuries
of Egyptian bondage. As in later times, the rule
appears not to have been observed (see p. 2342);
the reason of it was probably of a temporary
nature.

That the lamb was to be roasted and not boiled,
was supposed to commemorate the haste of the
departure of the Israelites. Spencer observes,
on the other hand, that, as they had their cooking
vessels with them, one mode would have been as
expenditures as the other. Some think that, like
the dress and the posture in which the first Pass-
over was to be eaten, it was intended to remind
the people that they were no longer to regard
themselves as settled down in a home, but as a
host upon the march, roasting being the proper
military mode of dressing meat. In a concen-
trated point of view the lamb was to be roasted with
fire, the purifying element, because the meat was thus
left pure, without the mixture even of the water,
which would have entered into it in boiling. The meat
in its purity would thus correspond in signification
with the unleavened bread (see II, 3, (b)).

It is not difficult to determine the reason of the
command, "not a bone of him shall be broken." The
lamb was to be a symbol of unity; the unity of the
family, the unity of the nation, the unity of God with his
people whom He had taken into covenant with Himself.
While the flesh was divided into portions, so that each member of
the family could partake, the skeleton was left one and
entire to remind them of the bonds which united

dscriptions of different kinds were often attached.
Comp. Deut. vi. 9.

4 Especially Bochart and Rahr. The former says,
"Hoc signum Deo non datum sed Hebrews ut co con-
frati de libera tione certi sint."

5 So Rahr and most of the Jewish authorities.

6 Hupfeld imagines that bread without leaven, being
the simplest result of cooked grain, characterized the

them. Thus the words of the Law are applied to
the body of our Saviour, as the type of that still
higher unity of which He was himself to be the
author and centre (John xix. 36).

The same significance may evidently be attached
to the prohibition that no part of the meat should
be kept for another meal, or carried to another
house. The passchal meal in each house was to be
one, whole and entire.

(b.) The unleavened bread ranks next in impor-
tance to the passchal lamb. The notion has been
very generally held, or taken for granted, both by
Christian and Jewish writers of all ages, that it
was intended to remind the Israelites of the un-
leavened cakes which they were obliged to eat in
their hasty flight (Ex. xiii. 34, 39). But there is
not the least intimation to this effect in the sacred
narrative. On the contrary, the command was given
to Moses and Aaron that unleavened bread should
be eaten with the lamb. The circumstance occurred upon which this explanation is based.
Comp. Ex. xii. 8 with xii. 39.

It has been considered by some (Ewald, Winer,
and the modern Jews) that the unleavened bread
and the bitter herbs alike owe their meaning to
their being regarded as unpalatable food.

The expression "bread of affliction," עֲבֹדֶה אָפָק (Dent.
vii. 3), is regarded as equivalent at to fasting-bread,
and on this ground Ewald sacrifices something of
the character of a fast to the Passover. But this
seems to be wholly inconsistent with the pervading
joys nature of the festival. The bread of afflic-
tion was a thin bread which, in present days,
was commemorated, either in itself, or in common with
the other elements of the feast, the past afflication
of the people (Kühr, Kurtz, Hofmann). It should
not be forgotten that unleavened bread was not
peculiar to the Passover. The ordinary "meat-
offering" was unleavened (Lev. ii. 4, 5, vii. 12, x.
d. &c.), and so was the showbread (Lev. xxiv. 5-9).
The use of unleavened bread in the consecration
of the priests (Ex. xxix. 25), and in the offering
of the Nazarite (Num. vi. 19), is interesting in
relation to the Passover, as being apparently
connected with the consecration of the person.
On the whole, we are warranted in concluding
that unleavened bread had a peculiar sacrificial char-
acter, according to the Law, and it can hardly be
supposed that a particular kind of food should have
been offered to the Lord because it was insipid or
unpalatable.

It seems more reasonable to accept St. Paul's
reference to the subject (I Cor. v. 6-8) as furnish-
ing the true meaning of the symbol. Fermenta-
tion is decomposition, a dissolution of unity. This
must be more obvious to ordinary ears where the
leaven in common use is a piece of sour dough,
instead of the expediens at present employed in
this country to make bread light. The pure dry
biscuit, as distinguished from bread thus leavened,
would be an apt emblem of unchanged duration,
and, in its freedom from foreign mixture, of purity
also. If this was the accepted meaning among
old agricultural festivals which existed before the sacri-
ifice of the lamb was instituted.

7 The root יִגְרוֹס signifies "to make dry." Kurtz
thinks that dryness rather than sweetness is the idea
in יִגְרוֹס. But sweet in this connection has the
sense of uncorrupted, or incorruptible, and hence is
the Jews, "the unleavened bread of sincerity and truth" must have been a clear and familiar expression to St. Paul's Jewish readers. Bähr conceives that as the blood of the lamb figured the act of purifying, the getting rid of the corruptions of Egypt, the unleavened bread signified the abiding spiritual holiness of Israel.

(c) The bitter herbs are generally understood by the Jewish writers to signify the bitter sufferings which the Israelites had endured (Ex. i. 14). But it has been noticed by Aben Ezra that these herbs are a good and wholesome accompaniment for meat, and are now, and appear to have been in ancient times, commonly so eaten (see p. 2545).

(d) The offerings of the Omer, though it is obvious that part of the festival which is immediately connected with the course of the seasons, bore a distinct analogy to its historical significance. It may have denoted a deliverance from winter, as the lamb signified deliverance from the bondage of Egypt, which might well be considered as a winter in the history of the nation. Again, the consecration of the first-fruits, the first-born of the land, is an easy type of the consecration of the first-born of the Israelites. This seems to be contemnuated by Ex. xiii. 2-4, where the sanctification of the first-born, and the unleavened bread which figured it, seem to be emphatically connected with the time of year, Abib, the month of green ears.

4. No other shadow of good things to come contained in the Law can vie with the festival of the Passover in expressiveness and completeness. Hence we are so often reminded of it, more or less distinctly, in the ritual and language of the Church. Its outline, considered in reference to the great deliverance of the Israelites which it commemorated, and many of its minute details, have been appropriated as current expressions of the truths which

God has revealed to us in the fulness of times in sending his Son upon earth.

But it is not surprising that ecclesiastical writers should have pushed the comparison far, and excreed their fancy in the application of trifling or accidental particulars either to the facts of our Lord's life or to truths connected with it. But, keeping within the limits of sober interpretation indicated by Scripture itself, the application is singularly full and enlightening. The deliverance of Israel according to the flesh from the bondage of Egypt was always so regarded and described by the prophets as to render it a most apt type of the deliverance of the spiritual Israel from the bondage of sin into the glorious liberty with which Christ has made us free (see IV. 2). The blood of the first paschal lambs sprinkled on the door-ways of the houses has ever been regarded as the best defined foreshadowing of that blood which has redeemed, saved, and sanctified us (Heb. xi. 28). The lamb itself, sacrificed by the worshipper with out the intervention of a priest, and its flesh being eaten with a mixture as a symbol and emblem of the perfect of peace-offerings, the closest type of the atoning Sacrifice who died for us and has made our peace with God (Is. liii. 7; John i. 29; cf. the expression "my sacrifice," Ex. xxxiv. 25, also Ex. xii. 27; Acts viii. 32; 1 Cor. v. 7; 1 Pet. i. 18, 19). The ceremonial law, and the functions of the priest in later times, were indeed recognized in the sacrificial rite of the Passover; but the previous existence of the rite showed that they were not essential for the personal approach of the worshipper to God (see IV. 3. (a)); Is. lxi. 6; 1 Pet. ii. 5, 9). The unleavened bread is recognized as the figure of the state of sanctification which is the true element of the believer in Christ (1 Cor. v. 8). The haste with which the meal was eaten,
and the girt-up loin, the staves and the sandals, are fit emblems of the life of the Christian pilgrim, ever hastening away from the world towards his heavenly destination 4 (Luke xii. 39; 1 Pet. i. 13, ii. 11; Eph. v. 15; Heb. xi. 13).

It has been well observed by Kurtz (on Ex. xii. 38), that, at the very crisis when the distinction between Israel and the nations of the world was most clearly brought out (Ex. xi. 7), a "mixed multitude" went out from Egypt with them (Ex. xii. 38), and that provision was then made for all who were willing to join the chosen seed and participate with them in their spiritual advantages (Ex. xii. 41). Thus, at the very starting-point of national separation, was founded in the calling in of the Gentiles to that covenant in which all nations of the earth were to be blessed.

The offering of the Omer, in its higher significance as a symbol of the first-born, has been already noticed (IV. 3 (d)). But its meaning found full expression only in that First-born of all creation, who, having died and risen again, became "the first-fruits of the dead" (Col. xv. 20). As the first of the first-fruits, no other offering of the sort seems so likely as the Omer to have immediately suggested the expressions used (Rom. viii. 23, xi. 16; 1 John i. 18; Rev. xiv. 4).

The crowning application of the paschal rites to the truths of which they were the shadowy promises appears to be that which is afforded by the fact that our Lord's death occurred during the festival. According to the Divine purpose, the true Lamb of God was slain at nearly the same time as "the Lord's Passover," in obedience to the letter of the Law. It does not seem needful that, in order to give point to this coincidence, we should (as some have done) draw from it a priori argument in favor of our Lord's crucifixion having taken place on the 14th of Nisan (see III. 2, ii.). It is enough to know that our own Holy Week and Easter stand as the anniversary of the same great facts as were foreshadowed in those events of which the yearly Passover was a commemoration.

As compared with the other festivals, the Passover was remarkably distinguished by a single victim essentially its own, sacrificed in a very peculiar manner. 5 In this respect, as well as in the place it held in the ecclesiastical year, it had a formal dignity and character of its own. It was the representative festival of the year, and in its unique position it stood in a certain relation to circumcision as the second sacrament of the Hebrew Church (Ex. xii. 44). We may see this in what occurred at Gilgal, when Joshua, in renewing the Divine covenant, celebrated the Passover immediately after the circumcision of the people. But the nature of the relation in which these two rites stood to one another had not been as yet developed until its types were fulfilled, and the Lord's Supper took its place as the sacramental feast of the elect people of God. 6 Henpeck well observes: "En pub-

cherrimis mysteriorum nostrorum exempla: circum- quisque quidem baptismatis, sedicent significat gratiae divine et foederis cum Deo pacti, quo ad sancti- tatem populi sacri vocuum: Paschalis vero agnum et ritus, continuantque quippe gratiae divinae et ser- nam, nae suae gentium paschalis et paedagogii et cum Deo et cum coeteris populi sacri membriis communio usque renovatur et aetern, cerni Christi sacrae typus aptissimus."

8 Additional Literature. The art. Passover by C. P. Ginsburg in the 3d edition of Kittel's Cyc- col, of Bibl. Lit. deserves notice for its thorough- ness and the minuteness of its account of the later Jewish usages. Winer's art. Pascha in his Bibl. Recl. is carefully elaborated. The subject is treated in Herzog's Real-Encyk. by Vaihinger; the art. on Easter (Pasch. christl.) and the early paschal controversies is, however, by Steitz.

On the question respecting the Last Supper see the references to the literature under John, Gosp- ur. of, vol. ii. pp. 1417, 1438. Among the more recent writers on this subject the following are also worthy of notice: S. J. Andrews, Life of our Lord (N. Y. 1862), pp. 425-460. T. Lewin, to the coming of Elijah in their ordinary grace at meals, it is only on these occasions that their expectation of the harbinger of the Messiah is expressed by the formal observances. When a child is circumcised, an empty chair is placed at hand for the prophet to occupy. At the paschal meal, a cup of wine is poured out for him; and at an appointed moment the door of the room is solemnly set open for him to enter. (See note 6, p. 294-1.)
PASSOVER

Fossa Zacci (Lond. 1853). p. xxxi, ff., 1st. Wm. Milligan, arts. in the Contemporary Review for Aug. and Nov., 1853. Holtzmann, in Bunsen's Bibliothek, viii. 305-322 (1853). Elard, Wissensch. Krüdt. d. evang. Geschichte, 3rd Aufl. (1858), pp. 615-640. C. E. Caspari, Chron. geogr. Einl. in das Leben Jesu Christi (Hamb. 1862; pp. 164-165. Wieseler, Besprechung zu richtig zu verstehen der evangelischen d. evang. Geschichte (Gotth., 1863), pp. 230-283. Of these writers, Andrews maintains that there is no real discrepancy between the Synoptists and John, that they all place the crucifixion on the 15th of Nisan. Prof. Milligan holds the same opinion, contending that the paschal lamb might be eaten on any part of the day extending from the evening following the 14th of Nisan to the evening of the 15th, and thus finding no difficulty in John xvi. 28. But this view seems opposed to all our information respecting Jewish usage; see p. 2342, note c, and comp. Wieseler, Beilage, p. 246, note. Holtzmann reviews the literature of the question, and finds the difference between the Synoptists and John irreconcilable. Elard, who in the 3rd edition of his Wissensch. Krüdt. d. evang. Geschichte (1858) had been convinced by the arguments of Bleek that John places the crucifixion on the 14th of Nisan, has, in the 34th edition of this work, after a careful reexamination of the subject, reversed his conclusion. Maintaining that John wrote for those who were acquainted with the Synoptic Gospels, he discusses the supposition that it was his intention to correct the chronology of the first three Evangelists in respect to the last day of our Saviour's life, and endeavors to show that it is quite untenable. But supposing John to assume on the part of his readers a knowledge of the facts recorded by the Synoptists, the controverted passages in his Gospel present, as Elard thinks, little difficulty. According to Caspari, the Synoptists place the death of Jesus, in agreement with John, on the 14th of Nisan. By the "eating the Passover" of which they speak, he understands not the eating of the paschal lamb, but of the unleavened bread, on the evening with which the 14th of Nisan began, i.e. after the sunset of the 13th. In most respects his view agrees with that of Westcott, Introd. to the Study of the Gospels, pp. 333-341, Amer. ed. But the difficulties, both archaic in Wieseler's text (Berl. 1853) are still present. The first day of unleavened bread was not regarded as beginning with the evening which followed the 13th of Nisan, when we learn from the Mishna (Pesaḥ. 1, § 4), that leaven might be eaten on the 14th till 11 o'clock a.m. according to Rabbi Meir, or till 10 o'clock, according to Rabbis Jehudah, and it was not eaten before 5 o'clock a.m. and before 11 o'clock on that day. Wieseler defends with much learning and ability the view formerly presented by him in his Chronol. Synopsis der vier Evangelisten (1843), with which that of Robinson, Norton, Andrews, and Lewin essentially agree. See also his art. Zeitrechnung, neuerer Ansichten in Herzog's Real-Encycl. xxi. 550 ff. Bleek's Beilage zur Evangelien-Kritik (Berl. 1846) is still the best and fullest Wieseler discussion of the opposite view; see also Meyer's Komm. zu Evangel. des Johannes, 5th Aufl. (1869). A. * The Samaritans still observe the Passover on Jerizim, their sacred mount (John iv. 20), and with some customs, especially the offering of sacrificial, which the Jews have discontinued since the destruction of the Temple at Jerusalem. Some account of the ceremony cannot fail to interest the reader. Various travellers who have been present on the occasion have described the scene. We abbreviate for our purpose Dean Stanley's narrative of the commemoration, as witnessed by him in the company of the Prince of Wales and others, on the 13th of April, 1862. In that instance, for some reason, the Samaritans anticipated the 14th of Nisan by two days. On coming to the top of Gerizim the party found the little community of about 152 persons encamped near the summit of the mount. The women were shut up in tents; and the men were assembled on the rocky terrace. Most of the men were in ordinary dress; only about fifteen of the elders and six youths having any distinguishing sacred costume. About half an hour before sunset the men all gathered about a long trough dug out for the occasion, and, assuming the oriental attitude of devotion, commenced (led by the priest) reciting in a loud chant prayers, chiefly devoted to praises of the patriarchs. In a short time the six young men (who were men of age, in the opinion of the district) took six sheep into the midst of the assembly. Meanwhile the sun had nearly set: the recitation became more vehement: and the entire history of the exodus was chanted with furor rapiditatis. As soon as the sun had touched the western horizon, the youths, causing a moment to brandish their bright knives, suddenly threw the sheep on their backs and drew the knives across their throats. They then dipped their fingers in the blood of the victims, and stained slightly the noses and foreheads of the children. The animals were then fleeced and washed, two holes having been dug in the mountainside for that purpose. After kindling a fire in one of the holes nearest to the place of sacrifice, and while two eunuchs of water hung over it were boiling, the recitation continued, and bitter herbs wrapped in a strip of unleavened bread were passed among the assembly. After a short prayer, the youths again appeared, poured the boiling water over the sheep, and fleeced them. The right fore-legs and entrails of the animals were burnt, the liver carefully put back, and the victims were then split on two transverse stakes suggesting slightly the cruciform form. They were then thrown to the dogs, or to the hungry, upon which a fire had been kindled. Into this they were thrust, and a hurdle covered with wet earth placed over the mouth to seal up the oven. The sacrifice and preparations thus completed, the community retired. After about five hours, shortly after midnight, the feast began, to which the visitors found themselves admitted with reluc- tance. They were admitted on the Mount, and before a large assembly. In smoke and steam issued from it, and from the pit were dragged successively the blackened sheep, the outlines of their heads, ears, and legs yet visible. The bodies were then thrown upon mounds, and wrapped in them were hurried to the first trench, already mentioned, and laid upon them between two lines of Samaritans. Those before distinguished had their sacred costume on in addition to that given provided with shoes and staffs and girded with ropes. The recitation of prayers was recommenced, and continued till they suddenly seated themselves, after the Arab fashion, and commenced eating. The flesh was torn away piecemeal with their fingers, and rapidly and
PATARA

The ruins at Patara were once the site of a bustling and prosperous city, known for its location on the eastern end of the Lycian Way, a major trade route. The city was strategically located on the Lycus River and the Mediterranean Sea, making it a hub for commerce and trade. Patara was renowned for its beautiful temples, the most famous of which is the Temple of Apollo, dedicated to the god of the sun. The temple was considered one of the Seven Wonders of the Ancient World and was a significant pilgrimage site.

PATARA (Πατάρα) [Patara (sing.); the noun is plural], a Lyceian city of some considerable note. One of its characteristics in the heathen world was that it was devoted to the worship of Apollo, and was the seat of a famous oracle (Hor. Od. iii. 1, 64). Fellows says that the coin of all the districts around show the ascendency of the divinity. Patara was situated on the south-western shore of Lycia, not far from the left bank of the river Xanthus. The coast here is very mountainous and bold. Immediately opposite is the island of Kition.

Patara was practically the seaport of the city of Xanthus, which was ten miles distant (Appian, B. C. i. 51). These notices of its position and maritime importance introduce us to the present mention of the place in the Bible (Acts xxii. 1, 2). St. Paul was on his way to Jerusalem at the close of his third missionary journey. He had just come from Rhodes (v. 1); and at Patara he found a ship, which was on the point of going to Phoenicia (v. 2), and in which he completed his voyage (v. 3). This illustrates the mercantile connexion of Patara with both the eastern and western parts of the Levant. A road parallel to the Apostle's voyage is to be found in Liv. xxxvii. 16. There was no time for him to preach the gospel here, but still Patara has a place in ecclesiastical history, having been the seat of a bishop (Hierocl. p. 684). The old name remains on the spot, and there are still considerable ruins, especially a theatre, some baths, and a triple arch which was once the gates of the city. But sand hills are gradually concealing these ruins, and have blocked up the harbor. For fuller details we must refer to Boeckh's "Klio," on Patara, published by the Diététique Society, Fellows Lycia and Asia Minor, and the Travels in Asia Minor by Spratt and Forbes. [LYCIA; MYRA.]

J. S. H.

PATHÉS (Πάθες) [Patēs; Alex. Πάθος; Ov. Forctes]. The same as Ἰεροσόλυμα the Levite (1 Esdr. ix. 23; comp. Est. x. 23).

PATHÉROS (Πάθερος) [see below]: Πάθερος (Πάθωρος; Patroi, Patroos, Patrooses); gent. noun PATHÉSIS (Πάθεσις); Πάθροσποτανιά: Παθρόσποτανια; a part of Egypt, and a Mithraic tribe. That Patros was in Egypt admits of no question; we have to attempt to decide its position more fully. In the list of the Mithraizites, the Pathrosian occurs after the Naphthuhs and before the Cashinian; the latter being followed by the Thebaidians; by cashinian, and then by ecydian moring to their dwellings (Dext. xvii. 7), correspond exactly to the ancient Jewish law of the Passover.

The stoning of the children's foreheads (2 Chr. xxx. 16); the fleeing of the animals (2 Chr. xxxvi. 11); and the gibbing as if for a journey of only a few of the men (Ex. xii. 11), represent, without exactly imitating the corresponding portions of the ancient Jewish ritual. (See Stanley's Jewish Church, i. 539-557, and his Sermons in the East, etc., pp. 153-181.)

The ceremony among the Samaritans is said to be gradually assuming this merely representative character. The number of this singular people is rapidly diminishing, and probably ere long the observance of the Passover will be associated with Gerizim only as a tradition.

II.

PATARA (Πάτρα): [Patara (sing.); the noun is plural], a Lyceian city of some considerable note. One of its characteristics in the heathen world was that it was devoted to the worship of Apollo, and was the seat of a famous oracle (Hor. Od. iii. 1, 64). Fellows says that the coin of all the districts around show the ascendency of the divinity. Patara was situated on the south-western shore of Lycia, not far from the left bank of the river Xanthus. The coast here is very mountainous and bold. Immediately opposite is the island of Kition.

Patara was practically the seaport of the city of Xanthus, which was ten miles distant (Appian, B. C. i. 51). These notices of its position and maritime importance introduce us to the present mention of the place in the Bible (Acts xxii. 1, 2). St. Paul was on his way to Jerusalem at the close of his third missionary journey. He had just come from Rhodes (v. 1); and at Patara he found a ship, which was on the point of going to Phoenicia (v. 2), and in which he completed his voyage (v. 3). This illustrates the mercantile connexion of Patara with both the eastern and western parts of the Levant. A road parallel to the Apostle's voyage is to be found in Liv. xxxvii. 16. There was no time for him to preach the gospel here, but still Patara has a place in ecclesiastical history, having been the seat of a bishop (Hierocl. p. 684). The old name remains on the spot, and there are still considerable ruins, especially a theatre, some baths, and a triple arch which was once the gates of the city. But sand hills are gradually concealing these ruins, and have blocked up the harbor. For fuller details we must refer to Boeckh's Klio, on Patara, published by the Diététique Society, Fellows Lycia and Asia Minor, and the Travels in Asia Minor by Spratt and Forbes. [LYCIA; MYRA.]
for although it is mentioned in the prophecy against the Jews as a region where they dwelt after Migdol, Tahpanhes, and Noph, as though to the south, yet we are told that the prophet was answered by the Jews "that dwelt in the land of Egypt, in Pathros," as though Pathros were the region in which these cities were. We have, moreover, no distinct evidence that Jeremiah ever went into Upper Egypt. On the other hand, it may be replied that the cities mentioned are so far apart that either the prophet must have preached to the Jews in them in succession, or else have addressed letters or messages to them (comp. xxi.).

The notice by Ezekiel of Pathros as the land of the birth of the Egyptians seems to favor the idea that it was part of or all Upper Egypt, as the Thebais was probably inhabited before the rest of the country (comp. xlii. ii. 15); an opinion supported by the tradition that the people of Egypt came from Ethiopia, and by the 1st dynasty's being of Thinite kings.

Pathros has been connected with the Phathrite name, the Phathurite of Pliny (H. N. v. 9, § 47), in which Thebes was situate. The first form occurs in a Greek papyrus written in Egypt (Papyri aegyptii, Papyr. Anast. vid. Reuven, Lettres à M. Lebrun, 5 Let. p. 4, 30, ap. Parthey, Texte s. v.). This identification may be as old as the LXX.; and the Coptic version, which reads ΠΑΡΘΥΡΙΟΣ, ΠΑΣΙΟΤΡΙΟΣ, does not contradict it. The discovery of the Egyptian name of the town after which the name was called puts the inquiry on a safer basis. It is written ΠΑ-ΧΑΤ-ΗΕΡ, "the Abode of Hat-her," the Egyptian Venus. It may perhaps have sometimes been written Π-ΧΑ-ΗΑ-ΗΕΡ, in which case the P-II and T-II would have coincided in the Hebrew form, as did T-II in Capit. (Capit. t.) Such etymologies for the word Pathros as Π-ΕΤ-ΡΙΟΣ, "that which is southern," and for the form in the LXX., ΠΑΤΟΤΡΙΟΣ, "the southern (region)" (Gesen. Theo. s. v.), must be abandoned.

On the evidence here brought forward, it seems reasonable to consider Pathros to be part of Upper Egypt, and to trace its name in that of the Phathrite name. But this is only a very conjectural identification, which future discoveries may overthrow. It is spoken of with cities in such a manner that we may suppose it was but a small district, and (if we have rightly identified it) that when it occurs Thebes is specially intended. This would account for its distinctive mention.

R. S. P.

**PATHRUSIM.** [Pathros.]

**PATMOS (Πάτμος [Patmos].** Rev. 1. 9. Two recent and copious accounts, one by a German, the other by a French traveller, furnish us with very full information regarding this island. Ross visited it in 1841, and describes it at length (Reisen auf den griechischen Inseln des ägäischen Meeres, ii. 123-183). Guérin, some years later, spent a month there, and enters into more detail,

The points on which he touches are the traditions of Patmos, and its connection with the Apocalypse.

Patmos, Harbor, etc.

a * Dean Stanley visited Patmos in returning from his second visit to Palestine (1852). See his account of the visit, *Sermiones in the East,* etc., pp. 225-231.
PATRIARCHS

given place to the old classical name; and there is just one palm-tree in the island, in a valley which is called "the Saint's Garden" (α κύπερς τοῦ Ὑστατοῦ). Here and there are a few poor olives, also some cypress, and other trees in the same scanty proportion.

Patmos is divided into two nearly equal parts, a northern and a southern, by a very narrow isthmus, where, on the east side, are the harbor and the town. On the hill to the south, crowning a commanding height, is the celebrated monastery, which bears the name of "the John the Divine." Half-way up the slope is the cave where Nicetas, the government:

We enter the Icarian island, which is called Τηλίσσιον, an account of the Lord. One of them is attributed to Prochorus, an alleged disciple of St. John: the other is an abridgment of the same by Nicetas, Archbishop of Thessalonica. Various places in the island are incorporated in the legend, and this is one of its chief points of interest. There is a published Latin translation in the Bibliotheca Maxima Patrum (1677, tom. ii.), but with curious modifications, one great object of which is to disregard St. John's martyrdom from Ephesus (where the legend places it), and to fix it in Rome.

We have only to add that Patmos is one of the Sporades, and is in that part of the Aegean which is called the Icarian Sea. It must have been conspicuous on the right when St. Paul was sailing (Acts xx. 15, xxvi. 1) from Samos to Cos.

J. S. H.

PATRIARCHS. The name πατριάρχης is applied in the N. T. to Abraham (Heb. vii. 4), to the sons of Jacob (Acts vii. 8, 9), and to David (Acts ii. 29); and is apparently intended to be equivalent to the phrase πατήρ κυρίου in the "head" or "prince of a tribe," so often found in the T. O. It is used in this sense by the LXX in 1 Chr. xxiv. 31, xxvii. 22; 2 Chr. xxiii. 20, xxvi. 12. In common usage the title of patriarch is assigned especially to those whose lives are recorded in Scripture previous to the time of Moses. By the "patriarchal System" is meant that state of society which depended on the natural out of family relations, before the formation of nations properly so called, and the establishment of regular government; and by the "patriarchal dispensation" the communion into which God was pleased to enter with the families of Seth, Noah, and Abraham, before the call of the chosen people.

The patriarchal times are naturally divided into four centuries and post-diluvian periods.

1. In the former the Scripture record contains little except the list of the line from Seth, through

Enos, Cainan, Mahaleel, Jared, Enoch, Methuselah, and Lamech, to Noah; with the ages of each at their periods of generation and at their deaths. [Concord. xxv.,] To some extent patriarch is given the line of Cain; Enoch, Irad, Mahajah, Methuselah, Lamech, and the sons of Lamech, Jafal, Jothi, and Tubal-Cain. To the latter line are attributed the first signs of material civilization, the building of cities, the division of classes, and the knowledge of mechanical arts; while the only moral record of their history obscures by violence and idolatry. [Lamech.] In the former line the one distinction is their knowledge of the true God (with the constant recollection of the promised "seed of the woman") which is seen in its fullest perfection in Enoch and Noah; and the only allusion to their occupation (Gen. v. 29) seems to show that they continued a pastoral and agricultural race. The entire corruption, even of the chosen family of Seth, is traced (in Gen. vii. 14) to the union between "the sons of God" and "the daughters of men." (Heb. viii. 26.) This union is generally explained by the ancient commentators of a contact with supernatural powers of evil in the persons of fallen angels; most modern interpretation refers it to intermarriage between the lines of Seth and Cain. The latter is intended to avoid the difficulties attaching to the comprehension of the former view, which nevertheless is undoubtedly far more accurate with the usage of the phrase "sons of God" in the T. O. (comp. Job i. 6, xxvii. 7), and with the language of the passage in Genesis itself. (See Maitland's Early, Essay vi.)

One of the main questions raised as to the ante-diluvian period turns on the longevity assigned to the patriarchs. With the single exception of Enoch (whose departure from the earth at 965 years of age is exceptional in every sense), their ages vary from 777 (Lamech) to 696 (Methuselah). It is to be observed that this longevity disappears gradually after the Flood. To Shem are assigned 600 years; and thence the ages diminish down to Termelin (265 years), Abraham (175), Isaac (180), Jacob (147), and Joseph (110).* This statement of ages is clear and definite. To suppose, with some, that the name of each patriarch denotes a chin or family, and his age its duration, or, with others, that the word πατήρ (because it properly signifies "father") may, in spite of its natural and invariable usage for "year," denote a linear revolution instead of a solar one (i.e., a month instead of a year) in this passage, appears to be a mere evasion of the difficulty. It must either be accepted, as a plain statement of fact, or regarded as purely fabulous, like the legendary assemblage of immense ages to the early Indian or Babylonian or Egyptian kings.

The latter alternative is adopted without scruple by many of the German commentators, some of whom attempt to find such significance in the patriarchal names as to make them personify natural powers or human qualities, like the gods and demi-gods of mythology. It belongs of course to the

* The Hebrew text is here taken throughout: for variations in the LXX and the Samaritan Pentateuch, see CHRONOLOGY.

† It is clear enough that the year as in so many ancient accounts may be a lunar year of 324 or 324 1/4 days, or even a year of 10 months; but this makes no

real difference. It is possible that there may be some correction in the text, which may affect the numbers given; but the longevity of the patriarchs is noticed and commented upon, as a well-known fact, by Joseph (Gen. i. 3, § 2).
mythical view of Scripture, destroying its claim, in any sense, to authority and special inspiration.

In the acceptance of the literal meaning, it is not easy to say how much difficulty is involved. With our scanty knowledge of what is really meant by "dying of old age," with the certainty that very great effects are produced on the duration of life, both of men and animals, by even slight changes of habits and circumstances, it is impossible to say what might be a priori probable in this respect in the antediluvian period, or to determine under what conditions the process of continual decay and reconstruction, which sustains animal life, might be indefinitely prolonged. The constant attribution in all legends of a very great age to primordial men is at least as likely to be a distortion of fact, as a mere invention of fancy. But even if the difficulty were greater than it is, it seems impossible to conceive that a book, given by inspiration of God to be a treasure for all ages, could be permitted to contain a statement of plain facts, given undoubtedly, and with an elaborate show of accuracy, and yet so unaccordant with the fundamental faith and purpose as to bear on its great religious subject. If the Divine origin of Scripture be believed, its authority must be accepted in this, as in other cases; and the list of ages of the patriarchs be held to be (what it certainly claims to be) a statement of real facts.

2. It is in the post-diluvian periods that more is gathered as to the nature of the patriarchal history. It is at first general in its scope. The "covenant" given to Noah is one free from all condition, and fraught with natural blessings, extending to all alike: the one great command (against bloodshed) which marks it, is based on a deep and universal ground; the fulfillment of the blessing, "Be fruitful and multiply, and replenish the earth," is expressly connected, first with an attempt to set up an universal kingdom round a local centre, and then (in Gen. x.) with the formation of the various nations by conquest or settlement, and with the peopling of all the world. But the history soon narrows itself to that of a single tribe or family, and afterwards torches the general history of the ancient world and its empires, only so far as it bears upon this. It is at last stage that the principle of the patriarchal dispensation is most clearly seen. It is based on the sacredness of family ties and paternal authority. This authority, as the only one which is natural and original, is inevitably the foundation of the earliest form of society, and is probably seen most perfectly in wandering tribes, where it is not affected by local attachments and by the acquisition of wealth. It is one, from the nature of the case, likely to be dependent on its sacredness than its power, and giving room for much exercise of freedom; and, as it extends from the family to the tribe, it must become less stringent and less concentrated, in proportion to its wider diffusion. In Scripture this authority is consecrated by an ultimate reference to God, as the God of the patriarch, the Father (that is) both of Him and his children. Not, of course, that the idea of God's Fatherhood carried with it the knowledge of man's personal communion with his nature (which is revealed by the Incarnation); it rather implied faith in his protection, and a free and loving obedience to his authority, with the hope (more or less assured) of some greater blessing from Him in the coming of the promised seed. At the same time, this faith was not allowed to degenerate, as it was prone to do, into an appropriation of God, as the mere tutelary God of the tribe. The Lord, it is true, suffers Himself to be called "the God of the patriarchs," but He also reveals Himself (and that emphatically, as though it were his peculiar title) as the "God Almighty" (Gen. xvii. 1, xxxviii. 11, xxxv. 11); He is addressed as the "Judge of all the earth" (xviii. 25), and as such is known to have intercourse with Pharaoh and Abraham (xii. 17, xx. 3-8), to hallow the priesthood of Melchizedek (xviii. 18-20), and to become the Father of Sodom and Gomorrah, of Islam, and of the nations. All this would confirm what the generality of the covenant with Noah, and of the promise of blessing to "all nations" in Abraham's seed must have distinctly taught, that the chosen family were, not substitutes, but representatives, of all mankind, and that God's relation to them was only a clearer and more perfect type of that in which He stood to all. Still the distinction and preservation of the chosen family, and the maintenance of the paternal authority, are the special purposes, which give a key to the meaning of the history, and of the institutions recorded. For this the birthright (probably carrying with it the priesthood) was reserved to the first-born, belonging to him by inheritance, yet not assured to him till he received his father's blessing; for this the sanctity of marriage was jealously and even cruelly guarded, as in Gen. xxxiv. 7, 13, 31 (Dinah), and in xxviii. 24 (Tamar), from the license of the world without; and all intermarriage with idolaters was considered as treason to the family and the God of Abraham (Gen. xxxvi. 31, 34, xxvii. 46 xxviii. 1, 4-9). Natural obedience and affection are the earthly virtues especially brought out in the history, and the sins which dwelt upon (from the irreverence of Holofernes) are all such as offend against these.

The type of character formed under it, is one imperfect in intellectual and spiritual growth, because not yet tried by the sunder temptations, or forced to contemplate the deeper questions of life; but it is one remarkably simple, affectionate, and free, such as would grow up under a natural authority, derived from God and centering in Him, yet allowed under its imperfections and limitations, such as are a foretaste of the nature, of the future revelation of God, and the future trials and development of man.

It is on this fact that the typical interpretation of its history depends, an interpretation sanctioned directly by the example of St. Paul (Gal. iv. 21-31; Heb. vii. 1-17), indirectly supported by other passages of Scripture (Matt. xxiv. 37-39; Luke xiv. 28-32; Rom. ix. 10-13, etc.), and instinctively adopted by all who have studied the history itself.

Even in the brief outline of the antediluvian period, we may recognize the main features of the history of the world, the division of mankind into the two great classes, the struggle between the power of evil and good, the apparent triumph of
the evil, and its destruction in the final judgment.
In the post-diluvian history of the chosen family, it is seen the distinction of the true believers, possessors of a special covenant, special revelation, and special privileges, from the world without. In it is therefore shadowed out the history of the Jewish nation and Christian Church, as regards the freedom of their covenant, the gradual unfolding of their revelation, and the peculiar blessings and temptations which belong to their distinctive position.

It is but natural that the unfolding of the character of the patriarchs under the Patriarchal age should have a typical interest. Abraham, as the type of a faith, both brave and patient, gradually and continuously growing under the education of various trials, stands contrasted with the lower character of Jacob, in whom the same faith is seen, tainted with deceit and selfishness, and needing therefore to be purged by disappointment and suffering. Isaac, in the passive gentleness and unblinking faith, which characterizes his whole life, and is seen especially in his willingness to be sacrificed by the hand of his father, and Joseph, in the more active spirit of love, in which he rejoiced to save his family and to forgive those who had persecuted and sold him, set forth the perfect spirit of sonship, and are seen to be types especially of Him, in whom above that spirit dwelt in all fullness.

This typical character in the hands of the mythical school is, of course, made an argument against the historical reality of the whole; those who recognize a unity of principle in God's dispensations at all times, will be prepared to find, even in their earliest and simplest form, the same features which are more fully developed in their later periods.

A. B.

* With reference to the individual patriarchs, the reader will consult the articles which treat of them under their respective names in the Dictionary. See also Hess, Gesch. der Patriarchen, 2 vols. (1786); the art. Patriarchen des A. Test., by J. P. Lange, in Herzog's Real-Encyk. xi. 192-200; Kurzt, Geschichte des A. Brauch, i. 129-314 (1651); Ewald, Gesch. der Völker Israel, 3d Amer. ed., ii. 412-519, or pp. 500-502, English translation; Stahler, The Patriarchs (Abrah, Isaac, Jacob, Joseph, in his Jewish Church, i. 2-46 (1st ed.), ii. 1-31, 47-72 (1st ed.), iv. 117-142 (2d ed.), N. Y. 1864). The interesting articles on Heroes of Hebrew History by the Bishop of Oxford (Samuel Wilberforce), in Good Words for 1862, include the patriarchs.

II. PATROBAS (Πατροβάς: Petrosbas). A Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 14). According to late and uncertain tradition, he was one of the 70 disciples, became bishop of Patraoi (Pithec-Hyppol., De I. XV. apollec.), and suffered martyrdom together with Philologus on Nov. 4th (Estius). Like many other names mentioned in Rom. xvi., this was borne by at least one member of the emperor's household (Suet. Gall., 20; Martial, Jp. ii. 32, 3). Probably the name is a contraction, like others of the same termination, and stands for Πατροβάς (Patrosbas) (see Wief, Umt. Philologie).

W. E. B.

PATROCLUS or PATROCLUΣ (Πατροκλός: Petrouklos), the father of Neomed, the famous adversary of Judas Maccabeus (2 Macc. viii. 9).

* PATTERNS, as employed in Heb. ix. 23, confuses the sense of the passage. The Greek term is παροιμίας and may signify, indeed, pattern, or example (see John xii. 15; Heb. iv. 11), but denotes also figure, outline, copy. The latter must be understood here; for the expression there represents the "heavenly things" spoken of, which require no purificatioln, as themselves "the patterns" or archetypes, of which the earthl/ tabernacle and its appendances were the copies and not the reverse of this, as in the A. V., i.e. the earthly things, as "the patterns," at least, according to the present use of this expression. [TAFERNACHW.] The older versions (Tyndale, Cranmer, the Genevan) have more correctly "imilitudes." In Heb. viii. 5, "pattern" answers to τότος, and occurs in its proper sense.

II. PAUL (Παῦλος: Paulus), the Apostle of Jesus Christ to the Gentiles.

Original Authorities.—Nearly all the original materials for the life of St. Paul are contained in the Acts of the Apostles, and in the Pauline Epistles. Out of a comparison of these authorities the biographer of St. Paul has to construct his account of the really important period of the Apostle's life. The early traditions of the Church appear to have left almost untouched the space of time for which we possess those sacred and abundant sources of knowledge; and they aim only at supplying a few particulars in the biography beyond the points at which the narrative of the Acts begins and terminates.

The history and the epistles lie side by side, and are to all appearance quite independent of one another. It was not the purpose of the historian to write a life of St. Paul, even as much as the received name of his book would seem to imply. The book called the Acts of the Apostles is an account of the beginnings of the kingdom of Christ on the earth, a history which which St. Paul occupies in it is due to the important part which he bore in spreading that kingdom. As to the epistles, nothing can be plainer than that they were written without reference to the history; and there is no attempt in the Canon to combine them with it so as to form what we should call in modern phrase the Apostle's "Life and Letters." What amount of agreement, and what amount of discrepancy, may be observed between these independent authorities, is a question of the greatest interest and importance, and one upon which various opinions are entertained. The most extreme and acute criticism is ably represented by Dr. Brown of Tubingen,* who finds much opposition between what he holds to be the few authentic Pauline epistles and the Acts of the Apostles, that he pronounces the history to be an interested fiction. But his criticism is the very caricature of captiousness. We have but to imagine it applied to any history and letters of acknowledged authenticity, and we feel irresistibly how arbitrary and unhistorical it is. Putting aside this extreme view, it is not to

* In his Paulus der Apostel. 2 Aufl., Stuttgart 1845 [2e Auft., 1866].
be denied that difficulties are to be met with in reconciling completely the Acts and the received epistles of St. Paul. What the solutions of such difficulties may be, whether there are any direct contradictions, how far the apparent differences may be due to the purpose of the respective writers, by what means preserved to us may best be dovetailing together,—these are the various questions which have given so much occupation to the critics and expositors of St. Paul, and upon some of which it seems to be yet impossible to arrive at a decisive conclusion.

We shall assume the Acts of the Apostles to be a genuine and authentic work of St. Luke, the companion of St. Paul, and shall speak of the epistles at the places which we believe them to occupy in the history.

Prominent Points in the Life. — It may be well to state beforehand a few of the principal occurrences upon which the great work done by St. Paul in the world is seen to depend, and which therefore serve as landmarks in his life. Foremost of all is his Conversion. This was the main root of his whole life, out of which, as it were, all that is afterwards, all we may here specify, his Letters at Antioch. From there we pass to the First Missionary Journey, in the eastern part of Asia Minor, in which St Paul first assumed the character of the Apostle of Jesus Christ to the Gentiles. The Visit to Jerusalem, for the sake of settling the question of the relation of Gentile converts to the Jewish law, was a critical point, both in the history of the Church and of the Apostle. The introduction of the Gospel into Europe, with the memorable visits to Philippi, Athens, and Corinth, was the boldest step in the carrying out of St. Paul's mission. A third great missionary journey, chiefly characterized by a long stay at Ephesus, is further interesting from its connection with four ensuing episodes. This was immediately followed by the apprehension of St. Paul at Jerusalem, and his imprisonment at Caesarea. And the last event of which we have a full narrative is the Voyage to Rome.

The relation of these events to external chronology will be considered at the end of the article.

Soul of Tarsus, before his Conversion. — Up to the time of his going forth as an avowed preacher of Christ to the Gentiles, the Apostle was known by the name of Saul. This was the Jewish name which he received from his Jewish parents. But though a Hebrew of the Hebrews, he was born in a Gentile city. Of his parents we know nothing, except that his father was of the tribe of Benjamin (Phil. iii. 5), and a Pharisee (Acts xxii. 6), that he had acquired by some means the Roman franchise ("I was free born," Acts xxi. 28), and that he was settled in Tarsus. "I am a Jew of Tarsus, a city in Cilicia, a citizen of no mean city." (Acts xxi. 39). Our attention seems to be specially called to this birthplace and early home of Saul by the repeated mention of it in connection with his name. It must be remembered that the Greek language with freedom and mastery in both speaking and writing; and the general tone and atmosphere of a cultivated community cannot have been without their effect upon his highly susceptible nature. At Tarsus also he learnt that trade of ἀγοράριον (Acts xviii. 3), at which he afterwards occasionally wrested with his own hands. There was a goat's-hair cloth called Ciliciam, manufactured in Cilicia, and largely used for tents. Saul's trade was probably that of making tents of this hair cloth. [TENTMAKER, Amer. ed.] It does not follow that the family were in the necessitous condition which such manual labor commonly implies: for it was a wholesome custom amongst the Jews, to teach every child some trade, though there might be little prospect of his depending upon it all his life.

When St. Paul makes his defense before his countrymen at Jerusalem (Acts xxii.), he tells them that though born in Tarsus, he had been "brought up" (ἀναγεγραμμένος) in Jerusalem. He must, therefore, have been yet a boy, when he was removed, in all probability for the sake of his education, to the Holy City of his fathers. We may imagine him arriving there perhaps at some age between 10 and 15, already a Hellenist, speaking Greek and familiar with the Greek version of the Scriptures, possessing, besides the knowledge of his trade, the elements of Gentile learning,—to be taught at Jerusalem "according to the perfect manner of the law of the fathers." He learnt, he says, "at the feet of Gamaliel." He who was to resist so stoutly the insinuations of the Law, had for his teacher one of the most eminent of all the doctors of the law [σαμαίης]. It is singular, that on the occasion of his well-known intervention in the Apostolic history, the master's counsels of toleration are in marked contrast to the persecuting zeal so soon displayed by the pupil. The temper of Gamaliel himself was moderate and candid, and he was personally free from bigotry: but his teaching was that of the strictest of the Pharisaics, and bore its natural fruit when lodged in the ardent and thorough-going nature of Saul. Other fruits, besides that of a zeal which persecuted the Church, may no doubt be referred to the time when Saul sat at the feet of Gamaliel. A thorough training in the Scriptures and in the traditions of the elders

\[a\] * It is by no means certain (if that be meant in the text above) that Paul first introduced the Gospel into Europe. Writers on the book of Acts often make this statement (see Bambergarten's Apostelgeschichte, i 145). Philipppus was the first city in Europe where Paul himself preached; but in all probability Rome, had received the Gospel at an earlier period. This result was the more inevitable, because in addition to the general interest between that capital of the West, and the East, "strangers of Rome" (Acts ii. 10), i. e. Jews and Jewish proselytes, were present at Jerusalem on the day of Pentecost and heard the preaching of Peter. The Cretans too, who were present on this occasion, may have carried with them the seed of the word to Crete, from which sprung the churches of that island, of whose origin we have otherwise no information.

\[b\] The story mentioned by Jerome (Script. Exod. Cat. "Paulus") that St. Paul's parents lived at Gischala in Galilee, and that, having been born there, the infant Saul emigrated with his parents to Tarsus upon the taking of that city by the Romans, is inconsistent with the fact that Gischala was not taken until a much later time, and with the Apostle's own statement that he was born at Tarsus (Acts xxii. 3). His words in the speech before Agrippa (Acts xxvi. 4, 5), according to the received text, refer exclusively to his life at Jerusalem. But if we read, with the better authorities, εἰς τὴν ἔργαν, εἰς τήν ἐργαζόμενον. It may be speaking of the life he led amongst his own people at Tarsus or elsewhere, as well as of his residence at Jerusalem.
under an acute and accomplished master, must have done mind to exercise the mind of Saul, and to make him dwell at home in the subjects in which he was afterwards to be so intensely interested. And we are not at all bound to believe that, because his zeal for the Law was strong enough to set him upon persecuting the believers in Jesus, he had therefore experienced none of the doubts and struggles which, according to his subsequent testimony, it was the nature of the Law to produce. On the contrary, we can scarcely imagine these as absent from the spiritual life of Saul as he passed from both the the ungodly. For let us consider, oftener than not, men who have been tormented by inward struggles and perplexities. The pupil of Gamaliel may have been crushing a multitude of conflicts in his own mind when he threw himself into the holy work of exulting the new heresy.

Saul was yet "a young man" (Acts vii. 58), when the Church experienced that sudden expansion which was connected with the ordaining of the Seven appointed to serve tables, and with the special power and inspiration of Stephen. Amongst those who disputed with Stephen were some "of them of Cilicia." We naturally think of Saul as having been one of these, when we find him afterwards keeping the clothes of those suborned witnesses who, according to the Law (Deut. xix. 15), were to bear to each stone at the judgment. "Saul," says the sacred writer, significantly, "was consulting unto his death." The angelic glory that shone from Stephen's face, and the Divine truth of his words, failing to subdue the spirit of religions hatred now burning in Saul's breast, must have embittered and aggravated its rage. Saul was passing through a terrible crisis for a man of his nature. But he was not one to be moved from his stern purpose by the native remonstrance and tenderness which he must have been stifling within him. He was the most unshrinking and unrelenting of persecutors. "As for Saul, he made havoc of the Church, entering into every house, and haling men and women, committed them to prison" (Acts viii. 3). The same Converter. — The persecutor was to be converted. What the nature of that conversion was, we are now to observe. — Having undertaken to follow up the believers unto strange cities, Saul naturally turned his thoughts to Damascus, expecting to find, amongst the numerous Jewish residents of that populous city, some adherents of the way. (Acts ix. 13), and trusting, we must presume, to be allowed by the convivence of the governor to apprehend them. What befell him as he journeyed thither is related in detail three times in the Acts, first by the historian in his own person, then in the two addresses made by St. Paul at Jerusalem and before Agrippa. These three narratives are not repetitions of one another: there are differences between them which some critics choose to consider irreconcilable. Considering that the same author is responsible for all the accounts, we gain nothing, of course, for the authenticity of their statements by bringing them into agreement; but it seems pretty clear that the author himself could not have been conscious of any contradictions in the narratives. He can scarcely have had any motive for placing side by side inconsistent reports of St. Paul's version and that he should have admitted inconsistency on such a matter through mere carelessness, is hardly credible. Of the three narratives, that of the historian himself must claim to be the most historical: St. Paul's subsequent accounts were likely to be affected by the purpose for which he introduced them. St. Luke's statement is to be read in Acts ix. 3-19, where, however, the words "It is hard for thee to kick against the pricks," included in the Vulgate and English version, ought to be omitted. The sudden light from heaven; the voice of Jesus speaking to his persecutor; Saul struck to the ground, blinded, overcome; the three days' suspense: the coming of Ananias as a messenger of the Lord: and Saul's baptism; — these were the leading features, in the eyes of the historian, of the great event, and in these we must look for the chief significance of the conversion.

Let us now compare the historical relation with those which we have in St. Paul's speeches (Acts xxii. and xxxii.). The reader will do well to consider each in its place. But we have here to deal with the bare facts of agreement or difference. With regard to the light, the speeches add to what St. Luke tells us that the phenomenon occurred at mid-day, and that the light shone round, and was visible to Saul's companions as well as himself. The 2d speech says, that at the shining of this light, the whole company (we all) fell to the ground. This is not contradicted by what is said, ix. 7, "the men which journeyed with him stood speechless, for there is no emphasis on "stood," nor is the standing antithetical to Saul's falling down. We have but to suppose the others rising before Saul, or standing still afterwards in greater perplexity through not seeing or hearing what Saul saw and heard, to reconcile the narratives without forcing either. After the question, "Why persecutest thou me?" the 2d speech adds, "It is hard for thee to kick against the goads." Then both the speeches supply a question and answer — "I answered, who art thou, Lord? And he said, I am Jesus, whom thou persecutest. In the direction to go into Damascus, and await orders there, the 1st speech agrees with Acts ix. But whereas according to that chapter the men with Saul "heard the voice," in the 1st speech it is said "they heard not the voice of him that spoke to me." It seems reasonable to conclude from the two passages, that the men actually heard sounds, but not, like Saul, an articulate voice. With regard to the visit to the city of Damascus, there is no collision between the 9th chapter and the 1st speech, the latter only attributing additional words to Ananias. The 2d speech ceases to give details of the conversion after the words, "I am Jesus, whom thou persecutest. But rise and stand on thy feet." St. Paul adds, from the mouth of Jesus, an exposition of the purpose for which He had appeared to him. It is easy to say that in ascribing these words to Jesus, St. Paul or his devoted reporter is violating the order and sequence of the earlier accounts. But, if we bear in mind the nature and purpose of St. Paul's address before Agrippa, we shall surely not suppose that he is violating the strict truth, when he adds to the words which Jesus spoke to him at the moment of the light and the speech, without interpolated any reference to a later occasion, that fuller exposition of the meaning of the crisis through which he was passing, which he was not to receive.
ill afterwards. What Saul actually heard from Jesus on the way as he journeyed, was afterwards interpreted, to the mind of Saul, into those definite expressions.

For we must not forget that, whatever we hold as to the external nature of the phenomena we are considering, the whole transaction was essentially, in any case, a spiritual communication. That the Lord Jesus manifested Himself as a Living Person to the man Saul, and spoke to him so that his very words could be understood, is the substantial fact declared to us. The purport of the three narratives is that an actual conversation took place between Saul and the Lord Jesus. It is remarkable that in none of them is Saul said to have seen Jesus. The grounds for believing that he did are the two expressions of Ananias (Acts ix. 17), "The Lord Jesus, who appeared unto thee in the way," and (Acts xxii. 14), "That thou shouldest see the Just One," and the statement of St. Paul (1 Cor. xv. 8), "Last of all He was seen of me also." Comparing these passages with the narratives, we conclude, that either Saul had an apprehension of Jesus as the flash of light blinded him, or that the "seeing" was that apprehension of his presence which would go with a real conversation. How it was that Saul "saw" and "heard" we are quite unable to determine. That the light, and the sound or voice, were both different from any ordinary phenomena with which Saul and his companions were familiar is unquestionably implied in the narrative. It is also implied that they were specially significant to Saul, and not to those with him. We gather therefore that there were real outward phenomena, through which Saul was made inwardly sensible of a Presence revealed to him alone.

Externally there was a flash of light. Spiritually, "the light of the gospel of the glory of the Christ, who is the image of God," shone upon Saul, and convicted the darkness of the heart which had shut out Love and knew not the glory of the Cross. Externally Saul fell to the ground. Spiritually he was prostrated by shame, when he knew whom he had been persecuting. Externally sounds issued out of heaven. Spiritually the Crucified said to Saul, with tender remonstrance, "I am Jesus, why persecutest thou me?" Whether audible to his companions, or audible to the Lord only, the guilt of Saul's sins was apparent in the spirit the servant of Him whose name he had hated. He gave himself up, without being able to see his way, to the disposal of him whom he now knew to have vindicated his claim over him by the very sacrifice which formerly he had despised. The Pharisee was converted, once for all, into a disciple of Jesus the Crucified.

The only mention in the epistles of St. Paul of the outward phenomena attending his conversion is that in 1 Cor. xv. 8, "Last of all He was seen of me also." But there is one important passage in which he speaks distinctly of his conversion itself. Dr. Baer (Paulus, p. 64), with his readiness to find out discrepancies, insists that this passage represents quite a different process from that recorded in the Acts. It is manifestly not a repetition of what we have been reading and considering, but it is in the most perfect harmony with it.

In the Epistle to the Galatians (v. 15, 16) St. Paul has these words: "When it pleased God, who separated me from my mother's womb, and called me by His grace, to reveal His Son in me, that I might preach Him among the Gentiles (ἐγκοινοποιήσας τὸν νῦν αἰτίον ἐν ἐμοί). What words could express more exactly than these the spiritual experience which occurred to Saul on the way to Damascus? The manifestation of Jesus as the Son of God is clearly the main point in the narrative. This manifestation was brought about through a removal of the veil of prejudice and ignorance which blinded the eyes of Saul to a Crucified Deliverer, conquering through sacrifice. And, whatever part the senses may have played in the transaction, the essence of it in any case must have been Saul's inward vision of a spiritual Lord close to his spirit, from whom he could not escape, whose every command he was hitherto obliged to obey in the Spirit.

It would be groundless to assume that the new convictions of that mid-day immediately cleared and settled themselves in Saul's mind. It is sufficient to say that he was then converted, or turned round. For a while, no doubt, his inward state was one of awe and expectation. He was being "led by the hand" spiritually by his Master, as well as bodily by his companions. Thus entering Damascus as a servant of the Lord Jesus, he sought the house of one whom he had perhaps, intended to persecute. Judas may have been known to his guest as a disciple of the Lord. a Certainly the fame of Saul's coming had preceded him; and Ananias, "a devout man according to the law," but a believer in Jesus, when directed by the Lord to visit him, wonders at what he is told concerning the notorious persecutor. He obeys, however: and going to Saul in the name of "the Lord Jesus, who had appeared to him in the way," he puts his hands on him that he may receive his sight and be filled with the Holy Ghost. Thereupon Saul's eyes are immediately purged and his sight is restored. "The same hour," says St. Paul (Acts xxii. 13), "I looked upon him. And he said, The God of our fathers hath chosen thee, that thou shouldest know His will, and see the sight of this Holy One. For thou shalt be His witness unto all men of what thou hast seen and heard." Every word in this address strikes some chord which we hear sounded again and again in St. Paul's epistles. The new convert is not, as it is so common to say, converted from Judaism to Christianity — the God of the Jewish fathers chooses him. He is chosen to know God's will. That will is manifested in the Righteous One. Him Saul sees and hears, in order that he may be a witness of Him to all men. The eternal will of the God of Abraham, that will be revealed in a Righteous Son of God; the testimony concerning Him, a Gospel to mankind: — these are the essentially Pauline principles which are declared in all the teaching of the Apostle, and illustrated in all his actions.

After the recovery of his sight, Saul received the

a * It seems improbable that this Judas was at that time a disciple. None of Saul's company were Christians, nor did they know that he had become a believer. Neither they, nor he, would probably know of a Christian family to which they could conduct him, nor would such a one have readily received him. He went, apparently, to his intended place of stopping, possibly a public house. It is probable that the host and the guest were both personally strangers to him. S. W.
washing away of his sins in baptism. He then broke his three days' fast, and was strengthened: an image, again, of the strengthening of his faint and hungering spirit through a participation in the Divine life of the Church of Damascus. He was not admitted into the fellowship of the disciples, and began without delay the work to which Ananias had designated him; and to the astonishment of all his hearers he proclaimed Jesus in the synagogues, declaring him to be the Son of God. This was the actual sequel to his conversion: he was to proclaim Jesus the Crucified, first to the Jews as their own Christ, afterwards to the world as the Son of the reigning God.

The narrative in the Acts tells us simply that he was occupied in this work, with increasing vigor, for many days," up to the time when imminent danger drove him from Damascus. From the Epistle to the Galatians (1: 17, 18) we learn that the many days were at least a good part of three years," and that Saul, not thinking it necessary to procure authority to preach from the Apostles that were before him, went after his conversion into Arabia, and returned from thence to Damascus. We know nothing whatever of this visit to Arabia; to what district Saul went, how long he stayed, or for what purpose he went there. From the antitheatrical way in which it is opposed to a visit to the Apostles at Jerusalem, we infer that it took place before he deliberately committed himself to the task of proclaiming Jesus as the Christ; and also, with some probability, that he was seeking seduction, in order that, by conferring "not with flesh and blood," but with the Lord in the Spirit, he might receive more deeply into his mind the commission given him at his conversion. That Saul did not spend the greater portion of the three years, at Damascus, seems probable, for these two reasons: (1) that the anger of the Jews was not likely to have borne with two or three years of such a life as Saul's now was without growing to a height; and (2) that the disciples at Jerusalem would not have been likely to mistrust Saul as they did, if they had heard of him as preaching Jesus at Damascus for the same considerable period. But it does not follow that Saul was in Arabia all the time he was not disputing at Damascus. For all that we know to the contrary he may have gone to Antioch or Tarsus or anywhere else, or he may have remained silent at Damascus for some time after returning from Arabia.

Now that we have arrived at Saul's departure from Damascus, we are again upon historical ground, and have the double evidence of St. Luke in the Acts, and of the Apostle in his 24 Epistle to the Corinthians. According to the former, the Jews lay in wait for Saul, intending to kill him, and watched the gates of the city that he might not escape from them. Knowing this, the disciples took him by night and let him down in a basket from the wall. According to St. Paul (2 Cor. xi. 32) it was the ethnarch under Aretas the king who watched for him, desiring to apprehend him. There is no difficulty in reconciling the two statements. We might similarly say that our Lord was put to death either by the Jews or by the Roman governor. There is modernity in ascertaining how an officer of king Aretas should be governing in Damascus, and why he should lead himself to the designs of the Jews. But we learn from secular history that the affairs of Damascus were, at the time, in such an unsettled state as to make the narrative not improbable.

Aretas. Having escaped from Damascus, Saul betook himself to Jerusalem, and there "assayed to join himself to the disciples: but they were all afraid of him, and believed not that he was a disciple." In this natural but trying difficulty Saul was befriended by one whose name was henceforth closely associated with his. Barnabas became his sponsor to the Apostles and Church at Jerusalem, assuring them that — from some personal knowledge, we must presume — of the facts of Saul's conversion and subsequent behavior at Damascus. It is noticeable that the saying and hearing are still the leading features in the conversion, and the name of Jesus in the preaching. Barnabas declared how Saul had seen the Lord in the way, and that he had spoken to him, and how that he had preached boldly at Damascus in the name of Jesus. Barnabas' introduction removed the fears of the Apostles, and Paul "was with them coming in and going out at Jerusalem." His Hellenistic education made him, like Stephen, a successful disputant against the "Greeks:" and it is not strange that the former persecutor was singled out from the other believers as the object of a murderer's hostility. He was therefore again urged to flee; and by way of Caesarea betook himself to his native city Tarsus.

In the Epistle to the Galatians St. Paul adds certain particulars, in which only a perverse and captious criticism could see anything contradictory to the facts just related. He tells us that his motive for going up to Jerusalem rather than anywhere else was that he might see Peter; that he had preached boldly at Damascus in the name of Jesus; that he saw Peter and James the Lord's brother; and that afterwards he came into the regions of Syria and Cilicia remaining unknown by face, though well-known for his conversion, to the churches in Judaea which were in Christ. St. Paul's object in referring to this connection of his with those who were Apostles before him, was to show that he had never accepted his apostleship as a commission from them. On this point the narrative in the Acts entirely agrees with St. Paul's own earnest asseverations in his epistles. He received his commission from the Lord Jesus, and also mediate through Ananias. This commission

* Paul informs us, Gal. iv. 25, that one of the names of Simi in Arabia was Hagar. No other writer mentions such a name, and the Apostle may be supposed to have learned the fact during his visit to that country (Gal. i. 17). This contact between the two religions is not incidentally remarkable: it is difficult from Jerusalem to Cilicia, the one usually taken. Hence Paul, in the Epistle to the Galatians, as above, may have adhered to it from the force of association, though he went in fact first to Cilicia, and then made missionary excursions into Syria.
included a special designation to preach Christ to the Gentiles. Upon the latter designation he did not act, until circumstances opened the way for it. But he at once began to proclaim Jesus as the Christ to his own countrymen. Barnabas introduced him to the Apostles, not as seeking their sanction, but as bringing the name of Lord Jesus, and as having lately spoken already in his name. Probably at first, Saul’s independence as an Apostle of Christ was not distinctly thought of, either by himself or by the older Apostles. It was not till afterwards that it became so important; and then the reality of it appeared plainly from a reference to the beginning of his Apostolic work.

St. Paul at Antioch. — While Saul was at Tarsus, a movement was going on at Antioch, which raised to a new importance second only to that of Jerusalem itself in the early history of the Church. In the life of the Apostle of the Gentiles Antioch claims a most conspicuous place. It was there that the preaching of the Gospel to the Gentiles first took place. And it seems almost certain that it was afterwards propagated. Its geographical position, its political and commercial importance, and the presence of a large and powerful Jewish element in its population, were the more obvious characteristics which adapted it for such a use. There came to Antioch, when the persecution which arose about Stephen scattered upon their different routes the disciples who had been assembled at Jerusalem, men of Cyprus and Cyrene, eager to tell all who would hear them the good news concerning the Lord Jesus. Until Antioch was reached, the word was spoken “to none but unto Jews only” (Acts xi. 19). But here the Gentiles also (οἱ ἐξ Αἰλαμπροῦς) — not, as in the A. V., “the Greeks,” — were amongst the hearers of the word. [See note 6, vol. ii. p. 967.] A great number believed; and when this was reported at Jerusalem, Barnabas was sent on a special mission to Antioch.

As the work grew under his hands, and a much people was added unto the Lord, Barnabas felt the need of help, and went himself to Tarsus to seek Saul. Possibly at Damascus, certainly at Jerusalem, he had been a witness of Saul’s energy and devotedness, and skill in disputation. He had been drawn to him by the bond of a most brotherly affection. He therefore longed for him as a helper, and succeeded in bringing him to Antioch. There they labored together unremittingly for “a whole year,” mixing with the constant assemblies of the believers, and “teaching much people.” All this time, as St. Luke would give us to understand, Saul was subordinate to Barnabas. Until “Saul” became “Paul,” we read of “Barnabas and Saul” (Acts xi. 31; xii. 25; xiii. 2. 7). Afterwards the order changes to “Paul and Barnabas.” It seems reasonable to conclude that there was no marked peculiarity in the teaching of Saul during the Antioch period. He held and taught, in common with the other Jewish believers, the simple faith in Jesus the Christ, crucified and raised from the dead. Nor did he ever afterwards depart from the simplicity of this faith. But new circumstances stirred up new questions; and then it was to Saul of Tarsus that it was given to see, more clearly than any others saw, those new applications of the old truth, those deep and world-wide relations of it, with which his work was to be permanently associated. In the mean time, according to the usual method of the Divine government, facts were silently growing, which were to suggest and occasion the future developments of faith and practice, and of these facts the most conspicuous was the unprecedented accession of Gentile proselytes at Antioch.

An opportunity soon occurred, of which Barnabas and Saul availed themselves for spreading the affections of these new disciples towards their brethren at Jerusalem, and for knitting the two communities together in the bonds of practical fellowship. A manifest impulse from the Holy Spirit began this work. There came “prophets” from Jerusalem to Antioch: “and there stood up one of them, named Agabus, and signified by the Spirit that there should be great dearth throughout all the world.” The “prophets” who now arrived may have been the Simeon and Lucius and Manaen, mentioned in xiii. 1, besides Agabus and others. The prediction of the dearth need not have been purposeless; it would naturally have a direct reference to the needs of the poorer brethren and the duty of the richer. It is obvious that the耸fully and perseveringly upon the face of the coming famine. For the disciples at Antioch determined to send contributions immediately to Jerusalem; and the gift was conveyed to the elders of that church at Jerusalem and perhaps of the churches in Judea, Acts xii. 25] by the hands of Barnabas and Saul. The time of this dearth is vaguely designated in the Acts as the reign of Claudius. It is ascertained from Josephus’s history, that a severe famine did actually prevail in Judea, and especially at Jerusalem, at the very time fixed by the event recorded in Acts xii., the death of Herod Agrippa. This was in A. D. 44.

It could not have been necessary for the mere safe conduct of the contribution that Barnabas and Saul should go in person to Jerusalem. We are bound to see in the relations between the Mother-Church and that of Antioch, of which this visit is illustrative, examples of the deep feeling of the necessity of union which dwelt in the heart of the early Church. The Apostles did not go forth to teach a system, but to enlarge a body. The Spirit which directed and furthered their labors was essentially the Spirit of fellowship. By this Spirit Saul of Tarsus was being practically trained in strict cooperation with his elders in the Church. The habits which he learnt now were to aid in guarding him at a later time from supposing that the independence which he was bound to claim, should involve the slightest breach or loosening of the bonds of the universal brotherhood.

Having discharged their errand, Barnabas and Saul returned to Antioch, bringing with them another helper, John surnamed Mark, sister’s son to Barnabas. [Sister’s Son, Amer. ed.] The work of prophecying and teaching was resumed. Several of the oldest and most honored of the believers in Jesus were expounding the way of God and organizing the Church in that busy metropolis. Travellers were incessantly passing to and fro. Antioch was in constant communication with Syria, with Cilicia, with Cyprus, with all the neighboring countries. The question must have forced itself upon hundreds of the “Christians” at Antioch, “What is the meaning of this faith of ours, of this baptism, of this incorporation, of this kingdom of the Son of God, for the world?” The Gospel is not for Judea alone: here are we called by it at Antioch. Is it meant to stop here?” The Church
was pregnant with a great movement, and the time of her delivery was at hand. We forget the whole method of the Divine work in the nurture of the church, and without the leading of the Holy Ghost, do not understand any theoretical suddenness, and disconnect them from the thoughts which were brooding in the minds of the disciples. At every point we find both circumstances and inward reasonings preparing the crisis. Something of direct expectation seems to be implied in what is said of the leaders of the church at Antioch, that they were obeying the Lord, and fasting; when the Holy Ghost spoke to them. Without doubt they knew it for a seal set upon previous surmises, when the voice came clearly to the general mind, "Separate me Barnabas and Saul for the work wherewith I have called them." That "work" was partially known already to the Christians of Antioch: who could be so fit for it as the two brothers in the faith and in mutual affection, the son of exhortation, and the highly accomplished and undaunted convert who had from the first been called a chosen vessel, to bear the name of the Lord before the Gentiles, and kings, and the people of Israel? When we look back, from the higher ground of St. Paul's apostolic activity, to the years that passed between the foundation of the church and the beginning of the missionary journey, we cannot observe without reverence the patient humility with which Saul waited for his Master's time. He did not say for once only, "Lord, what wilt thou have me to do?" Obedience to Christ was then and ever his ruling principle. Submitting, as he believed, to his Lord's direction, he was content to work for a long time as the subordinate colleague of his seniors in the faith. He was thus the better prepared, when the call came, to act with the authority which that call conferred upon him. He left Antioch, however, still the second to Barnabas. Everything was done with orderly gravity in the sending forth of the two missionaries. Their brethren, after fasting and prayer, laid their hands on them, and so they departed.

The first Missionary Journey. — Much must have been bid from Barnabas and Saul as to the issues of the journey on which they embarked. But one thing was clear to them, that they were sent forth to speak the word of God. They did not go in their own name or for their own purposes: they were instruments for uttering what the Eternal God Himself was saying to men. We shall find in the history a perfectly definite representation of what St. Paul announced and taught as he journeyed from city to city. But the first characteristic feature of his teaching was the absolute conviction that he was only the bearer of a heavenly message. It is idle to discuss St. Paul's "character or views without recognizing this fact. We are compelled to think of him as of a man who was capable of cherishing such a conviction with perfect assurance. We are bound to hear in mind the unshakeable influence which that conviction must have exerted upon his nature. The writer of the Acts proceeds upon the same assumption. He tells us that as soon as Barnabas and Saul reached Cyprus, they began to "announce the word of God." The second fact to be observed is, that for the present they delivered their message in the synagogues of the Jews only. [St. Mark's, Amer. ed.] They trod the old path till they should be drawn out of it. But when they had gone through the island from Salamis to Paphos, they were called upon by the Spirit of God and to an apostolic work. [St. Paul, Barnabas, and Sergius, the proconsul. This Roman officer, like so many of his countrymen, had already come under the influence of Jewish teaching; but it was in the corrupt form of magical pretensions, which thrive so luxuriantly upon the godless credulity of that age. A Jew, named Barjesus, or Elymas, a magos and false prophet, had attached himself to the proconsul, and had no doubt interested his mind, for he was an intelligent man, with what he had told him of the history and hopes of the Jews. [Elymas.] Accordingly, when Sergius Paulus heard of the strange teachers who were announcing to the Jews the advent of their true Messiah, he wished to see them, and sent for them. The impostor, instinctively hating the Apostles, and seeing his influence over the proconsul in danger of losing, did what he could to withstand them. Then Saul, "who is also called Paul," denouncing Elymas in remarkable terms, declared against him God's sentence of temporary blindness. The blindness immediately falls upon him; and the proconsul, moved by the scene and persuaded by the teaching of the Apostle, becomes a believer. There is a singular parallelism in several points between the history of St. Paul and that of St. Peter in the Acts. Baur presents it in a highly effective form (Paulus, p. 314, &c.), to support his theory of the composition of this book; and this is one of the services which he has incidentally rendered to the full understanding of the early history of the Church. Thus St. Paul's discomfiture of Elymas reminds us of St. Peter's denunciation of Simon Magnus. The two incidents bring strongly before us one of the great adverse elements with which the Gospel had to contend in that age. Everywhere there were counterfeiters of the spiritual powers which the Apostles claimed and put forth. It was necessary for the preachers of Christ, not so much to prove themselves stronger than the magicians and soothsayers, as to guard against being confounded with them. One distinguishing mark of the true servants of the Spirit would be that of not troubling upon their spiritual powers (Acts viii. 20). Another would be that of shunning every sort of concealment and artifice, and courting the daylight of open truth. St. Paul's language to Elymas is straightforwardly directed to the refutation of the tricks of the religious impostors. The Apostle, full of the true Holy Ghost, looked steadily on the deceiver, spoke in the name of a God of light and righteousness and straightforward ways, and put forth the power of that God for the vindication of truth against delusion. The punishment of Elymas was itself symbolical, and conveyed "teaching of the Lord." He had chosen to create a spiritual darkness around him; and now there fell upon him a mist and a darkness, and he went about, seeking some one to lead him by the hand. If on reading this account we refer to St. Peter's reproof of Simon Magnus, we shall be struck by the differences as well as the resemblance which we shall observe. But we shall undoubtedly gain a stronger impression of the part taken by the Apostle in this work, namely, the conflict to be waged between the Spirit of Christ and of the Church, and the evil spirits of a dark superstition to which men were surrendering themselves as slaves. We shall feel the worth and power of that
Paul and open temper in which alone St. Paul would commend his cause; and in the conversion of Sergius Paulus we shall see an exemplary type of many victories to be won by the truth over falsehood.

This point is made a special crisis in the history of the Apostle by the writer of the Acts. Saul now becomes Paul, and begins to take precedence of Barnabas. Nothing is said to explain the change of name. No reader could resist the temptation of supposing that there must be some connection between Saul's new name and that of his distinguished Roman convert. But on reflection it does not appear probable that he either had wished, or have consented to change his own name for that of a distinguished convert. If we put Sergius Paulus aside, we know that it was exceedingly common for Jews to bear, besides their own Jewish name, another borrowed from the country with which they had become connected. (See Courtyearc and Howson, I., 163, for full illustrations.) Thus Paul we have Simeon also named Niger, Barnabas also named Justus, John also named Marcus. There is no reason therefore why Saul should not have borne from infancy the other name of Paul. In that case he would be Saul amongst his own countrymen, Paulus amongst the Gentiles. And we must understand St. Luke as wishing to mark strongly the transition point between Saul's activity amongst his own countrymen, and his new labors as the Apostle of the Gentiles, by calling him Saul only, during the first, and Paul only afterwards.\(^a\)

The conversion of Sergius Paulus may be said, perhaps, to mark the beginning of the work amongst the Gentiles; otherwise, it was not in Cyprus that any change took place in the method hitherto followed by Barnabas and Saul in preaching the Gospel. Their public addresses were as yet confined to the synagogues; but it was soon to be otherwise. From Paphos, "Paul and his company" set sail for the mainland, and arrived at Perga in Pamphylia, where the heart of their companion John failed him, and he returned to Jerusalem. [PERGA.] From Perga they travelled on to a place, obscure in secular history, but most memorable in the history of the kingdom of Christ. Antioch in Pisidia. [ANTIOCH IN PISIDIA.] Here "they went into the synagogue on the sabbath-day, and sat down." Small as the place was, it contained its colony of Jews, and with them proselytes who worshipped the God of the Jews. The degree to which the Jews had spread and settled themselves over the world, and the influence they had gained over the more respectable of their Gentile neighbors, and especially over the women of the better class, are facts difficult to appreciate justly, but proved by undoubted evidence, and very important for us to bear in mind. This Pisidian Antioch may have been more Jewish than most similar towns, but it was not more so than many of much greater size and importance. What took place here in the synagogue and in the city is interesting to us not only on account of its bearing on the history, but also because it represents more or less exactly what afterwards occurred in many other places.

It cannot be without design that we have single but detailed examples given us in the Acts, of the various kinds of addresses which St. Paul used to deliver in appealing to his different audiences. He had to address himself, in the course of his missionary labors, to Jews, knowing and receiving the Scriptures, to ignorant barbarians; to cultivated Greeks; to nobis enraged against himself personally; to magistrates and kings. It is an invaluable help in studying the Apostle and his work, that we have specimens of the tone and the arguments he was accustomed to use in all these situations. These will be noticed in their places.

In what he said at the synagogue in Antioch, we recognize the type of the addresses in which he would introduce his message to his Jewish fellow-countrymen.

The Apostles\(^b\) of Christ sat still with the rest of the assembly, whilst the Law and the Prophets were read. They and their audience were united in reverence for the sacred books. Then the rulers of the synagogue sent to invite them, as strangers but brethren, to speak any word that might be in them to the people. Paul stood up, and with his hand, he spoke. — The speech is given in Acts xiii. 16-41. The characteristics we observe in it are these. The speaker begins by acknowledging "the God of this people Israel." He ascribes to him the calling out of the nation and the conduct of its subsequent history. He touches on the chief points of that history up to the reign of David, whom he brings out into prominence. He then names Jesus as the promised Son of David. To convey some knowledge of Jesus to the minds of his hearers, he recounts the chief facts of the gospel history; the preparatory preaching and baptism of John (of which the rumor had spread perhaps to Antioch); the condemnation of Jesus by the rulers "who knew neither him nor the prophets," and his resurrection. That resurrection was declared to be the fulfillment of all God's promises of life, given to the fathers. Through Jesus, therefore, is now proclaimed by God Himself the forgiveness of sins and full justification. The Apostle concludes by drawing from the prophets a warning against unbelief. If this is an authentic example of Paul's preaching, it was impossible for Peter or John to start more exclusively from the Jewish element and promises than did the Apostle of the Gentiles. How entirely this discourse resembles those of St. Peter and of Stephen in the earlier chapters of the Acts! There is only one specially Pauline touch in the whole, — the words in ver. 39, "By Him all that believe are justified from all things, from which ye could not which he had been called, "being filled with the Holy Ghost," nor for the first time, but in a special sense. With the divine afflatus upon him, he addressed the sorer with the authority of an apostle of the Lord, and with a supernatural effect. This attestation of his apostolic commission would naturally be deleterious with Barnabas, and may account for the quiet assumption, with the new name, by his associate, of the leadership from this point.

S.

\(^a\) A little more prominence should probably be given here to the occurrence with which this change of name is associated, and to the communication of spiritual power which seems to have marked the transfer of precedence in the joint mission. The uniting of Elymas with blindness was the first miracle which the Apostle wrought; and miracles were the acknowledged credentials or "signs of an apostle." (2 Cor. xii. 12.) At this juncture he appears to have received a special consecration to the apostleship to

\(^b\) See APOSTLE on the use of this title.
be justified by the law of Moses." — Evidently foisted in," says Baur (p. 103), who thinks we are dealing with a mere fiction, "to prevent the speech from appearing Petrine, and to give the Pauline air." Certainly, it sounds like an echo of the epistles to the Romans and Galatians. But is there therefore the slightest incongruity between this and the other parts of the address? Does not that "forgiveness of sins" which St. Peter and St. Paul proclaimed with the most perfect agreement, connect itself naturally, in the thoughts of one exercised by the law as St. Paul had been, with justification not by the law but by grace? If we suppose that Saul had accepted just the faith which the older Apostles held in Jesus of Nazareth, the Messian of the Jews, crucified and raised from the dead according to the teaching of the prophets, and in the remission of sins through him confirmed by the gift of the Holy Ghost; and that he had also had these experiences, not known to the older Apostles, of which we see the working in the epistles to the Romans and the Galatians; this speech, in all its parts, is precisely what we might expect: this is the very teaching which the Apostle of the Gentiles must have everywhere and always set forth, when he was speaking "a God's word" for the first time to an assembly of his fel-low-countrymen.

The discourse thus epitomized produced a strong impression; and the hearers (not "the Gentiles") requested the Apostle to repeat their message on the next Sabbath. During the week so much interest was excited by the teaching of the Apostles, that on the Sabbath day "almost the whole city came together, to hear the word of God." It was this concern of the Gentiles which appears to have first awakened the minds of the Jews from what they had heard. They were filled with envy. They probably felt that there was a difference between those efforts to gain Gentile proselytes in which they had themselves been so successful, and this new preaching of a Messiah in whom a justification which the law could not give was offered to men. The eagerness of the Gentiles to hear may have confirmed their instinctive apprehensions. The Jewish enmity once roused became a power of deadly hostility to the Gospel; and these Jews at Antioch set themselves to oppose bitterly the words which Paul spoke. We have here, therefore, a new phrase in the history of the Gospel. In these foreign countries it is not the Cross or Nazareth which is most immediately repulsive to the Jews in the proclaiming of Jesus. It is the wound given to Jewish importance in the association of Gentiles with Jews as the receivers of the good tidings. If the Gentiles had been asked to become Jews, no offense would have been taken. But the proclamation of the Christ could not be thus governed and restrained. It overlapped, by its own force, these narrowing methods. It was felt to be addressed not to one nation only, but to mankind.

The new oppositions brought out new action on the part of the Apostles. Rejected by the Jews, they became bold and outspoken, and turned from them to the Gentiles. They remembered and declared what the prophets had foretold of the enlightening and deliverance of the whole world.

In speaking to the Gentiles, therefore, they were simply fulfilling the promise of the Covenant. The gift, we observe, which the Jews were depriving themselves, and which the Gentiles who were accepting, is described as "eternal life" σωτηρίαν (σωτηρίαν). It was the life of which the risen Jesus was the fountain, which Peter and John had declared at Jerusalem, and of which all acts of healing were set forth as signs. This was now poured out largely upon the Gentiles. The word of the Lord was published widely, and had much fruit. Henceforth, Paul and Barnabas knew it to be their commission,—not the less to present their message to Jews first; but in the absence of an adequate Jewish medium to deal directly with the Gentiles. But this expansion of the Gospel work brought with it new difficulties and dangers. At Antioch now, as in every city afterwards, the unbelieving Jews used their influence with their own adherents among the Gentiles, and especially the women of the higher class, to persuade the authorities or the populace to persecute the Apostles, and to drive them from the place.

With their own spirits raised, and amidst much enthusiasm of their disciples, Paul and Barnabas now travelled on to Iconium, where the occurrences at Antioch were repeated, and from thence to the Lycaonian country which contained the cities Lystra and Derbe. Here they had to deal with uncivilized heathens. At Lystra the healing of a cripple took place, the narrative of which runs very parallel to the account of the similar act done by Peter and John at the gate of the Temple. The agreement becomes closer, if we insert here, with Laechmann, before "Stand upright on thy feet," the words "I say unto thee in the name of the Lord Jesus Christ." The parallel leads us to observe more distinctly that every messenger of Jesus Christ was a herald of life. The spiritual life—the σωτηρία—which was of faith, is illustrated and expounded by the invigoration of impotent limbs. The same truth was to be conveyed to the inhabitants of Jerusalem and to the heathens of Ly-coinia. The act was received naturally by these pagans. They took the Apostles for gods, calling Barnabas, who was of the more imposing presence, Zeus (Jupiter), and Paul, who was the chief speaker, Hermes (Mercurius). This mistake, followed up by the attempt to offer sacrifices to them, gives occasion to the recording of an address, in which we see a type of what the Apostles would say to an ignorant pagan audience. [LYSTRA, Aner, ed.] As the Scriptures, reference to the God of Abraham and Isaac and Jacob, would have been out of place. The Apostles name the Living God, who made heaven and earth and the sea and all things therein, the God of the whole world and all the nations in it. They declare themselves to be his messengers. They expatriz upon the tokens of Himself which the Father of glory had not withheld, in that He did them good, sending rain from heaven and fruitful seasons, the supporters of life and joy. They protest that in restoring the cripple they had only acted as instruments of the Living God. They themselves were not gods but human beings of like passions with the Lycaonians. The Living God was now manifestly excited against a sect who were represented as them by the crafty Jews as hostile to their faith (See Acts xii. 50, and xvi. 4.)

b. * These women of the higher class were Gentile proselytes who had embraced Judaism, and could be taken to be the broken vessels of Israel, and therefore capable of receiving the Gospel.
Further, the visit to Jerusalem, is the 3d mentioned in the Acts, after Saul’s conversion in Galatians it is apparently mentioned as the 2d. Supposing this sense of incompatibility to remain, the reader will go on to inquire whether the visit to Jerusalem mentioned in Galatians coincides better with any other mentioned in the Acts,—as the 2d (xii. 30) or the 4th (xviii. 22). He will, in all probability, conclude without hesitation that it does not. Another view will remain, that St. Paul refers to a visit not recorded in the Acts at all. This is a perfectly legitimate hypothesis; and it is recommended by the vigorous sense of Paley. But where are we to place the visit? The only possible place for it is some short time before the visit of ch. xv. But it can scarcely be denied, that the language of ch. xv. decidedly implies that the visit there recorded was the first paid by Paul and Barnabas to Jerusalem, after their great success in preaching the Gospel amongst the Gentiles.

We suppose the reader, therefore, to recur to his first impression. He will then have to ask himself, “Granting the considerable differences, are there after all any plain contradictions between the two narratives, taken to refer to the same occurrences? The answer must be, “There are no plain contradictions.” And this will be perceived to be a very weighty fact. When it is recognized, the resemblances first observed will return with renewed force to the mind.

We proceed then to combine the two narratives. Whilst Paul and Barnabas were staying at Antioch, “certain men from Judea” came there and taught the brethren that it was necessary for the Gentile converts to be circumcised. This doctrine was vigorously opposed by the two Apostles, and it was determined that the question should be referred to the Apostles and elders at Jerusalem. Paul and Barnabas themselves, and certain others, were selected for this mission. In Gal. ii. 2, St. Paul says that he went up “by revelation” (κατά ἀνάκαθησιν), so that we are to understand him as receiving a private intimation from the Divine Spirit, as well as a public commission from the Church at Antioch. On their way to Jerusalem, they announced to the brethren in Phœnicia and Samaria the conversion of the Gentiles: and the news was received with great joy. “When they came to Jerusalem, they were received by the Church, and by the Apostles and elders, and they declared all things that God had done with them” (Acts xvi. 4). St. Paul adds that he communicated his views “privately to them which were of reputation,” through anxiety as to the success of his work (Gal. ii. 2). The Apostles and the Church in general, it appears, would have raised no difficulties; but certain believers who had been Pharisees thought fit to maintain the same doctrine which had caused the disturbance at Antioch. In either place, St. Paul would not give way to such teaching for a single hour (Gal. ii. 5). It became necessary, therefore, that he should declare to the community what would be come to upon the question. The Apostles and elders came together, and there was much disputing. Arguments would be used on both sides; but when the persons of highest authority spoke, they appealed to what was stronger than argu-

Arguments would be used on both sides; but when the persons of highest authority spoke, they appealed to what was stronger than argu-
The judgment of the Church was immediately recorded in a letter addressed to the Gentile brethren in Antioch and Syria and Cilicia. That this letter was the apostle's legislation is shown by its application to "chosen men of the Jerusalem Church, Judas surnamed Barsabas, and Silas, chief men among the brethren." The letter speaks affectionately of Barnabas and Paul (with the elder Church Barnabas still retained the precedence, xv. 12, 25) as "men who have hazarded their lives for the name of our Lord Jesus Christ." So Judas and Silas came down with Paul and Barnabas to Antioch, and comfort the Church there with their message, and when Judas returned "it pleased Silas to abide there still.

It is usual to connect with this period of the history that rebate of St. Peter which St. Paul records in Gal. ii. 11-14. The connection of subject makes it convenient to record the incident in this place, although it is possible that it took place before the meeting at Jerusalem, and perhaps most probable that it did not occur till later, when St. Paul returned from his long tour in Greece to Antioch (Acts xviii. 22, 23). St. Peter was at Antioch, and had shown no scruple about "eating with the Gentiles," until "certain came from James." These Jerusalem Christians brought their Jewish exclusiveness with them, and St. Peter's weaker and more timid mood came upon him, and through fear of his stricter friends he too began to withdraw himself from his former free association with the Gentiles. Such an example had a dangerous weight, and Barnabas and the other Jews at Antioch were being seduced by it. It was an occasion for the intrepid faithfulness of St. Paul. He did not conceal his anger at such weak compromising, and he publicly reprobated with his elder fellow Apostle. "If then, being a Jew, live after the manner of Gentiles, and not as do the Jews, why compelst thou the Gentiles to live as do the Jews?" (Gal. ii. 14). St. Peter had abandoned the Jewish exclusiveness, and deliberately claimed common ground with the Gentile: why should he, by separating himself from the meekhearted, require the Gentiles to qualify themselves for full communion by accepting circumcision? This "standing out" of St. Peter was no opposition of Pauline to Petrine views: it was a faithful rebuke of blamable moral weakness.

* An interval of a year or a year and a half only could have elapsed between Paul's return to Antioch from the council at Jerusalem, and his departure on his second missionary tour, as the best chronologists.
Second Missionary Journey. — The most resolute courage, indeed, was required for the work to which St. Paul was now publicly pledged. He would not associate with himself in that work one who had already shown a want of constancy. This was the occasion of what must have been a most painful difference between him and his companion in the faith and in past perils, Barnabas. After remaining awhile at Antioch, Paul proposed to Barnabas to revisit the brethren in the countries of their former journey. Hereupon Barnabas desired that his nephew John Mark should go with them. But John had deserted them in Pamphylia, and St. Paul would not try him again. And the contention was so sharp between them that they departed asunder one from the other; and so Barnabas took Mark, and sailed unto Cyprus; and Paul chose Silas, and departed." Silas, or Silvanus, becomes now a chief companion of the Apostle. The two went together through Syria and Cilicia, visiting the churches, and so came to Derbe and Lystra. Here they found Timothy, who had become throughout on his errand of visiting and who so attracted the esteem and love of St. Paul, that "he would have him go forth with him." Him St. Paul took and circumcised. If this fact had been omitted here and stated in another narrative, how utterly irreconcilable it would have been, in the eyes of some critics, with the history in the Acts! Paul and Silas were actually delivering the Jerusalem decree to all the churches they visited. They were no doubt triumphing in the freedom seemed to the Gentiles. Yet at this very time our Apostle had the wisdom and largeness of heart to consult the feelings of the Jews by circumcising Timothy. There were many Jews in those parts, who knew that Timothy's father was a Greek, his mother a Jewess. That St. Paul should have had, as a chief companion, one who was uncircumcised, would of itself have been a hindrance to him in presenting to Jews; but it would have been a still greater stumbling-block if that companion were half a Jew by birth, and had professed the Jewish faith. Therefore in this case St. Paul "became unto the Jews a Jew that he might gain the Jews." St. Luke now steps rapidly over a considerable space of the Apostle's life and labors. "They went throughout Pisidia and Pamphylia, and went down even unto Antioch in Galatia;" (xvi. 6.) At this time St. Paul was founding "the churches of Galatia" (Gal. i. 2). He himself gives us hints of the circumstances of his preaching in that region, of the reception he met with, and of the ardent, though unstable, character of the people, in the following words: "Ye know how through much tribulation I preached the Gospel unto you at the first. And when I had laid the word before you, although I was in mine flesh ye despised not nor rejected, but received me as an angel of God, even as Christ Jesus. Where is then the blessedness ye spake of (δό καθαραίαν τό βουλ.) if I bear record that, if it had been possible, ye would have plucked out your own eyes, and have given them to me?" (iv. 13). It is not easy to decide as to the meaning of the words δί' ἄδειαν τῆς σαρκός. Undoubtedly their grammatical sense implies that "weakness of the flesh" — an illness — was the occasion of St. Paul's preaching in Galatia; and De Wette and Alford adhere to this interpretation understanding St. Paul to have been detained by illness, when otherwise he would have gone rapidly through the country. On the other hand, the form and order of the words are not what we should have expected if the Apostle meant to say this; and Professor Jowett prefers to assume an inaccuracy of grammar, and to understand St. Paul as saying that it was in weakness of the flesh that he preached to the Galatians. In either case St. Paul must be referring to a more than ordinary pressure of that bodily infirmity which he speaks of elsewhere as detracting from the influence of his personal address. It is hopeless to attempt to determine positively what this infirmity was. But we may observe here — (1) that St. Paul's sensitiveness may have led him to exaggerate this personal disadvantage; and (2) that, whatever it was, he had lived through suffering and hardships such as few ordinary men could bear. And it certainly did not repel the Galatians: it appears rather to have excited their sympathy and warmed their affection towards the Apostle. St. Paul at this time had not indulged the ambition of preaching his Gospel in Europe. His views were limited to the peninsula of Asia Minor. Having gone through Phrygia and Galatia he intended to visit the western coast [Asia]: but "they were forbidden by the Holy Ghost to preach the word" there. Then, being on the borders of Mysia, they thought of going back to the north-east into Bithynia; but again "the Spirit of Jesus suffered them not." Then they passed by Mysia, and came down to Troas. Here the Spirit of Jesus, having checked them on other sides, revealed to them in what direction they were to go. St. Paul saw in a vision a man of Macedonia, who besought him, saying, "Come over into Macedonia and help us." The vision was at once accepted as a heavenly intimation: the help wanted by the Macedonians was believed to be the preaching of the Gospel. It is at this point that the historian, speaking of St. Paul's company, substitutes "we" for "they." He says nothing of himself; we can only infer that, St. Luke, to whatever country he belonged, became a companion of St. Paul at Troas. It is perhaps not too arbitrary a conjecture, that the Apostle, having recently suffered in health, derived benefit from the medical skill and attendance of "the beloved physician." The party, thus reinforced, immediately set sail from Troas, touched at Samothrace, then landed on the continent at Neapolis, and from thence journeyed to Philippi. They hastened to carry the help that had been asked to the first considerable city in Macedonia. Philippoi was no inapt representative of the western world. A Greek city, it had received a body of Roman settlers, and was politically a Colony. We must not assume that to Saul of Tarsus, the Roman citizen, there was anything very novel of strange in the world to which he had now come.
But the name of Greece must have represented to Paul and Silas a
and listened. They saved this Jew, of every Sabbath who had ing, by the place by the river-side where prayer was wont to be made. The narrative in this part is very graphic: "We sat down," says the writer (xvi. 14), "and spoke to the women who had come together." Amongst these women was a proselyte from Thyatira (σεβομένη των Μωθόν), named Lydia, a dealer in purple. As she listened "the Lord opened her heart" to attend to what Paul was saying. The first convert in Macedonia was but an Asiatic woman who already worshipped the God of the Jews; but she was a very earnest believer, and besought the Apostle and his friends to honor her by staying in her house. They could not resist her urgency, and during their stay at Philippi they were the guests of Lydia (ver. 41). But a proof was given before long that the power of Christ were come to grapple with the powers in the spiritual world to which heathenism was then doing homage. A female slave, who brought gain to her masters by her powers of prediction when she was in the possessed state, beset Paul and his company, following them as they went to the place of prayer, and crying out, "These men are servants of the Most High God, who publish to you (or to us) the way of salvation." Paul was vexed by her cries, and addressing the spirit in the girl, he said, "I command thee in the name of Jesus Christ to come out of her." "Comparing the confession of this "spirit of divination" with the analogous confessions made by evil spirits to our Lord, we see the same singular character of a true acknowledgment exerted as if by force, and rendered with a certain insolence which implied that the spirits, though subject, were not willingly subject. The cries of the slave-girl may have sounded like sneers, mimicking what she had heard from the Apostles themselves, until St. Paul's exorcism, "in the name of Jesus Christ," was seen to be effectual. Then he might be recognized as in truth a servant of the Most High God, giving an example of the salvation which he brought, in the deliverance of this poor girl herself from the spirit which degraded her.

But the girl's masters saw that now the hope of their gains was gone. Here at Philippi, as afterwards at Ephesus, the local trade in religion began to suffer from the manifestation of the Spirit of Christ, and an interested agitator was made to local and national feelings against the dangerous innovations of the Jewish strangers. Paul and Silas were driving Christ's magistrates, the multitude chanting loudly against them, upon the vague charge of "troubling the city," and introducing observances which were unlawful for Romans. If the magistrates had desired to act justly they might have doubted how they ought to deal with the charge. On the one hand Paul and Silas had abstained carefully, as the preachers of Christ always did, from disturbing public order, and had as yet violated no express law of the state. But on the other hand, the preaching of Jesus as King and Lord was unquestionably revolutionary, and aggres
sive upon the public religion, in its effects; and the Roman law was decided, in general terms, against such innovations (see ref. in Conyb. and Hows. i. 234). But the proctors or duumviri of the Roman magistracy. They yielded without inquiry to the
chamar of the inhabitants, caused the clothes of Paul and Silas to be torn from them, and themselves to be beaten, and then committed them to prison. The jailer, having received their commands, "thrust them into the inner prison, and made their feet fast in the stocks." This cruel wrong was to be the occasion of a signal appearance of the God of righteousness and deliverance. It was to be seen which were the true servants of such a God, the magistrates or these strangers. In the night Paul and Silas, sore and sleepless, but putting their trust in God, prayed and sang praises so loudly that the other prisoners could hear them. Then suddenly the ground beneath them was shaken, the doors were opened, and every prisoner's hands were struck off (compare the similar openings of prison-doors in xii. 6-10, and v. 19). The jailer awoke and sprang up, with consternation that the prison-doors were open, and, concluding that the prisoners were all dead, drew his sword to kill himself. But Paul called to him loudly, "Do thyself no harm; we are all here." The jailer's fears were then changed to an overwhelming awe. What could this be? He called for lights, sprung in and fell trembling before the feet of Paul and Silas. Bringing them out from the inner dungeon, he exclaimed, "Sirs, what must I do to be saved?" (τι με δει των έν σαλαθών). They answered, "Believe in the Lord Jesus Christ, and thou shalt be saved, and thy house." And they went on to speak to him and to all in his house the word of the Lord. The word of Christ now showed itself upon their miseries. He washed their wounds, took them into his own house, and spread a table before them. The same night he received baptism, "he and all his" (including slaves §), and rejoiced in his new-found faith in God.

In the morning the magistrates, either having heard of what had happened or having repeated of their injustice, or having done all they meant to do by way of pacifying the multitude, sent word to the prison that the men might be let go. But legal justice was to be more clearly vindicated in the persons of these men, who had been charged with subverting public order. St. Paul denounced plainly the unlawful acts of the magistrates, informing them moreover that these whom they had beaten and imprisoned without trial were Roman citizens. "And now do they thrust us out privately? Nay, verily, but let them come themselves and fetch us out." The magistrates, in great alarm, saw the necessity ofhumbling themselves (= Ποιμένες ενεκρίνει κατάμαχον, σελίδαν.νεράλει). (Cero, in Tertull., v. 66). They came and begged...
them to leave the city. Paul and Silas consented to do so, and, after paying a visit to the brethren in the house of Lydia, they departed.

The Church thus founded at Philippi, as the first-fruits of the Gospel in Europe, was called, as we have seen, in the name of a spiritual deliverer, of a God of justice, and of an equal Lord of free men and slaves. That a warm and generous feeling distinguished it from the first, we learn from a testimony of St. Paul in the epistle written long after to this Church. "In the beginning of the Gospel," as soon as he left them, they began to send him gifts, some of which reached him at Thessalonica, and other more dispersed (II Thess. ii. 16). Their partnership in the Gospel (κοινωνία εἰς τὸ εὐαγγέλιον) had gladdened the Apostle from the first day (Phil. i. 5).

Leaving St. Luke, and perhaps Timothy for a short time, at Philippi, Paul and Silas travelled through Amphipolis and Apollosa, and stopped again at Thessalonica. At this important city there was a synagogue of the Jews. True to his custom, St. Paul went in to them, and for three Sabbath-days proclaimed Jesus to be the Christ, as he would have done in a city of Judaea. As usual, the proselytes were those who heard him most gladly, and among them were many women of station. Again, as in Pisidian Antioch, the envy of the Jews was excited. They contrived to stir up the lower class of the city to tumultuous violence by representing the preachers of Christ asrevolutionary disturbers, who had come to proclaim one Jesus as king instead of Caesar. The mob assaulted the house of Jason, with whom Paul and Silas were staying as guests, and, not finding them, dragged Jason himself and some other brethren before the magistrates. In this case the magistrates, we are told, and the people generally, were "trembled" by the rumours and accusations which they heard. But they seem to have acted wisely and justly, in taking security of Jason and the rest, and letting them go. After these signs of danger the brethren immediately sent away Paul and Silas by night.

The epistles to the Thessalonians were written very soon after the Apostle's visit, and contain more particulars of his work in founding that Church than of any other city. The whole of these letters ought to be read for the information they thus supply. St. Paul speaks to the Thessalonian Christians as being mostly Gentiles. He reminds them that they had turned from idols to serve the living and true God, and to wait for his Son from heaven, whom he raised from the dead, "Jesus who delivers us from the coming wrath" (1 Thess. i. 9, 10). The Apostle had evidently spoken much of the coming of the Lord Jesus Christ, and of that wrath which was already descending upon the Jews (ii. 16, 19, &c.). His message had had a wonderful power amongst them, because they had known it to be really the word of a God who also wrought in them, having had helps towards this conviction in the zeal and disinterestedness and affluence with which St. Paul notwithstanding his recent shameful treatment at Philippi proclaimed his Gospel amongst them (ii. 2, 8-13). He had purposely wrought with his own hands, even night and day, that his disinterestedness might be more apparent (1 Thess. ii. 9: 2 Thess. iii. 8). He exhorted them not to be drawn away from industry by the hopes of the kingdom into which they were called, but to work quietly, and to cultivate purity and brotherly love (1 Thess. iv. 3, 9, 11). Connecting these allusions with the preaching in the synagogue (Acts xviii. 3), we see clearly how the teaching of St. Paul turned upon the person of Jesus Christ as the Son of the living God, prophesied of in the Scriptures, suffering and dying, raised up and exalted to a kingdom, and about to appear as the Giver of life and light, to the destruction of his enemies and the saving of those who trusted in him.

When Paul and Silas left Thessalonica they came to Berea. Here they found the Jews more notable for the deeds of devotion and for the holy conversations which they had heard (Acts xviii. 10). There they continued a few days to converse with the people, and then set out for the city of Athens, where they had left Silas. Paul and Timothy, carrying back a request to Silas and Timothy that they would speedily join him. He apparently did not like to preach alone, and intended to rest from his apostolic labor until they should come up to him; but how could he refrain himself, with all that was going on at Athens round him? There he witnessed the most profound intellectual side by side with the most pretentious philosophy. Either of these would have been enough to stimulate his spirit. To idolaters and philosophers he felt equally urged to proclaim his Master and the living God. So he went to his own countrymen and the proselytes in the synagogue and declared to them that the Messiah had come; but he also spoke, like another Socrates, with people in the market, and with the followers of the two great schools of philosophy, Epicureans and Stoics, talking to all and the Resurrection. The philosophers encountered him with a mixture of curiosity and contempt. The Epicurean, teaching himself to seek for tranquil enjoyment as the chief object of life, heard of One claiming to be the Lord of men, who had shown them the glory of dying to self, and had promised to him the kingdom of life, which is far better than the comforts of life could yield. The Stoic, cultivating a stern and isolated moral independence, heard of One whose own righteousness was proved by submission to the Father in heaven, and who had promised to give his righteousness to those who trusted not in themselves but in Him.

To all, the announcement of a Person was much stranger than the publishing of any theories would have been. So far as the religious and the secular, anything but a silly tripper, he seemed to them, not a philosopher, but "a setter forth of strange gods" (εὐαστοῖς δαυμονίων καταγγελεῖς). But any one with a novelty was welcome to those who 'spent their time in nothing else but either to hear or to tell some new thing;' they brought him therefore to the Areopagus, that he might make a formal exposition of his doctrine to an audience of the people.

We are not to think here of the Council or Court, renowned in the oldest Athenian history, which took its name from Mars' Hill, but only of the elevated spot where the council met, not covered in, but arranged with benches and steps of stone so as to form a convenient place for a public address. Here the Apostle delivered that wonderful
discourse, reported in Acts xvii. 22-31, which seems as fresh and instructive for the intellect of the 19th century as it was for the intellect of the 1st. In this we have the Pauline Gospel as it addressed itself to the speculative mind of the cultivated Greeks. The text of this discourse, as obtained by the writer of the history we have no means of knowing. Possibly we have in it notes written down before or after the delivery of this address by St. Paul himself. Short as it is, the form is as perfect as the matter is rich. The loftiness and breadth of the theology, the dignity and delicacy of the argument, the absence of self, the straightforward and reverent nature of the testimony delivered—all the characteristics so strikingly displayed in this speech—help us to understand what kind of a teacher had now appeared in the Grecian world. St. Paul, it is well understood, did not begin with calling the Athenians "too superstitious." "I perceive you," he said, "to be exceedingly religious." He had observed an altar inscribed "AYwvBe TOI, "To the unknown God." It meant, "To some unknown God." "I come," he said, "as the messenger of that unknown God." And then he proceeds to speak of God in terms which were not altogether new to Grecian ears. They had heard of a God who had made the world and all things therein, and even of One who gave to all life, and breadth, and all things. But they had never learnt the next lesson which was now taught them. It was a special truth of the new dispensation, that "God had made of one blood all nations of men, for to dwell on all the face of the earth, having determined the times assigned to them, and the bounds of their habitations, that they should seek the Lord, it haply they might feel after him and find him." [MASSII, HILL, Amer. ed.]

Conquering it with the teaching given to other audiences, we perceive that it had hold of the deepest convictions which had ever been given to Greeks, whilst at the same time it encountered the strongest prejudices of Greeks. We see, as at Lystra, that an apostle of Christ had no need to refer to the Jewish Scriptures, when he spoke to those who had not received them. He could speak to men as God's children, and subjects of God's salvation, and only mention for their further edification, the sons of Him whom they had been always feeling after. He presented to them the Son of Man as acting in the power of Him who had made all nations, and who was not far from any single man. He began to speak of Him as risen from the dead, and of the power of a new life which was in Him for men; but his audience would not hear of Him who thus claimed their personal allegiance. Some mocked, others more courteously, talked of hearing him again another time. The apostle gained but few converts at Athens, and he soon took his departure and came to Corinth.

Athens still retained its old intellectual preeminence; but Corinth was the political and commercial capital of Greece. It was in places of living activity that St. Paul labored longest and most successfully, as formerly at Antioch, now at Corinth and afterwards at Ephesus. The rapid spread of the Gospel was obviously promoted by the preaching of it in cities where men were continually coming and going. Besides this consideration, we may be sure that the Apostle escaped gladly from dull ignorance on the one side, and from philosophical dilligentism on the other, to places in which the real business of the world was being done. The Gospel, though unworlly, was yet a message to practical and inquiring men and it had more affinity to work of any kind than to torpor or to intellectual triviality. One proof of the whole agreement between the following of Christ and ordinary labor was given by St. Paul himself during his stay at Corinth. Here, as at Thessalonica, he chose to earn his own subsistence by working at his trade of tent-making. This trade brought him into close connection with two persons who became distinguished as believers in Christ, Aquila and Priscilla. They were Jews, and had lately left Rome, in consequence of an edict of Claudius [see CLAUIDIUS]; and as they also were tent-makers, St. Paul "abode with them and wrought." Laboring thus on the six days, the Apostle went to the synagogue on the Sabbath, and there by expounding the Scriptures sought to win both Jews and proselytes to the belief that Jesus was the Christ.

He was testifying with unusual effort and anxiety (συντεκτον το λόγον), when Silas and Timothy came from Macedonia, and joined him. We are left in some uncertainty as to what the movements of Silas and Timothy had been since they were with Paul at Beroea. From the statements in the Acts (xvii. 15, 16) that Paul, when he reached Athens, desired Silas and Timothy to come to him with all speed, and waited for them there, compared with those in 1 Thess. (ii. 1, 2), "When we could no longer forbear, we thought it good to be left at Athens alone, and sent Timothy, our brother, and minister of God, and our fellow-laborer in the Gospel of Christ, to establish you and to comfort you concerning your faith,"—Paley's "Hoc Paulino, 1 Thess. No. iv. reasonably argues that Silas and Timothy had come to Athens, but had soon been sent back. Paul then sent Silas and Timothy to Thessalonica, and Silas to Philippi, or elsewhere. From Macedonia they came together, or about the same time, to Corinth; and their arrival was the occasion of the writing of the first Epistle to the Thessalonians.

This is the first extant example of that work by which the Apostle Paul has served the Church of all ages in as eminent a degree as he labored at the founding of it in his lifetime. All commentators upon the New Testament have been accustomed to notice the points of coincidence between the history in the Acts and these letters. Paley's "Hoc Paulino" is famous as a special work upon this subject. But more recently, important attempts have been made to estimate the Epistles of St. Paul more broadly, by considering them in their mutual order and relations, and in their bearing upon the question of the development of the writer's teach-
Paul's departure from Corinth. [Thessalonians, Second Epistle to the.] The Thessalonians had been disturbed by announcements that those convulsions of the world which all Christians were taught to associate with the coming of Christ were immediately impending. To meet these assertions, St. Paul delivers expressions of the manner not usual with him elsewhere; and while reaffirming all he had ever taught the Thessalonians to believe respecting the early coming of the Saviour and the blessedness of waiting patiently for it, he informs them that certain events, of which he had spoken to them, must run their course before the full manifestation of Jesus Christ could come to pass. At the end of this epistle St. Paul guards the Thessalonians against pretended letters from him, by telling them that every genuine letter, even if not written by his hand throughout, would have at least an autograph salutation at the close of it.

We return now to the Apostle's preaching at Corinth. When Sisak and Timotheus came, he was testifying to the Jews with great earnestness, but was not very successful. He told them that they had themselves and blasphemed, he shook out his raiment, and said to them, in words of warning taken from their own prophets (Ez. xxxiii. 4):

"Your blood be upon your own heads; I am clean, and henceforth will go to the Gentiles." The experience of Pindian Antioch was repeating itself. The Apostle went, as he threatened, to the Gentiles, and began to preach in the house of a proselyte named Justus. Already one distinguished Jew had become a believer, Crispus, the ruler of the synagogue, mentioned (1 Cor. i. 14) as baptized by the Apostle himself; and many of the Gentile inhabitants were receiving the Gospel and being baptized. The envy and rage of the Jews, therefore, were excited in an unusual degree, and seemed to have pressed upon the spirit of St. Paul. He was therefore encouraged by a vision of the Lord, who appeared to him by night, and said, "Be not afraid, but speak, and hold not thy peace; for I am with thee, and no man shall set on thee, to hurt thee; for I have much people in this city." Corinth was to be an important seat of the Church of Christ, distinguished, not only by the number of believers, but also by the variety and the fruitfulness of the teaching to be given there. At this time St. Paul himself stayed there for a year and six months, "teaching the word of God amongst them."

Corinth was the chief city of the province of Achaia, and the residence of the proconsul. During St. Paul's stay, we find the proconsular office held by Gallio, a brother of the philosopher Seneca. [Gallio.] Before him the Apostle was summoned by his Jewish enemies, who hoped to bring the Roman authority to bear upon him as an innovator in religion. But Gallio perceived at once, before Paul could "open his mouth" to defend himself, that the movement was due to Jewish prejudice, and refused to go into the question: "If it be a question of words and names and of your law," he said to the Jews, speaking with the tolerance of a Roman magistrate, "look ye to it; for I will be no judge of such matters." Then a singular scene occurred. The Corinthian spectators either favoring St. Paul, or actuated only by anger against the Jews, seized on the principal person of those who...
had brought the charge, and beat him before the judgment-seat. (See on the other Paul Exe
dischichte, vi. 463-466.) Gallio left these religious quarrels to settle themselves. The Apostle therefore was not allowed to be "hurt," and remained some time longer at Corinth unmolested.

We do not gather from the subsequent epistles to the Corinthians many details of the founding of the Church at Corinth. The main body of the believers consisted of Gentiles,—"ye knew that ye were Gentiles." (1 Cor. xii. 2.) But, partly from the number who had been proselytes, partly from the mixture of Jews, it had so far a Jewish character, that St. Paul could speak of "our fathers" as having been under the cloud (1 Cor. x. 1). The tendency to intellectual display, and the traffic of sophists in philosophical theories, which prevailed at Corinth, made the Apostle more than usually anxious to be independent in his life and simple in bearing his witness. He wrought for his living that he might not appear to be taking fees of his pupils (1 Cor. ix. 18); and he put the Person of Jesus Christ, crucified and risen, in the place of all doctrines (1 Cor. i. 1-5, x. 3, 4).

What gave infinite significance to his simple statements, was the nature of the Christ who had been crucified, and to whom these mysteries St. Paul had attuned a wisdom, not of the world, but of God, which had commended itself chiefly to the humble and simple. Of these God had chosen and called not a few "into the fel
dowship of His Son Jesus Christ the Lord of men" (1 Cor. vi. 6, 7, 27, 9).

Having been the instrument of accomplishing the mission, St. Paul took his departure for Jerusalem, wishing to attend a festival there. Before leaving Greece, he cut off his hair at Cenchrea, in fulfillment of a vow. We are not told where or why he had made the vow; and there is considerable difficulty in reconciling this act with the re
ceived customs of the Jews. [Vows.] A passage in Josephus, if rightly understood (B. J. ii. 15, § 1), mentions a vow which included, besides a sacrifice, the cutting of the hair and the beginning of an abstinence from wine 30 days before the sacrifice. If St. Paul's was such a vow, he was going to offer up a sacrifice in the Temple at Jeru
salem, and the "shaving of his head" was a prelimi
nary to the sacrifice. The principle of the vow, whatever it was, must have been the same as that of the Nazarite vow, which St. Paul afterwards countenanced at Jerusalem. [Nazarite, p. 297 a.] There is therefore no difficulty in supposing him to have followed in this instance, for some reason not explained to us, a custom of his countrymen. — When he sailed from the Isthmus, Aquila and Priscilla went with him as far as Ephesus. Paul paid a visit to the synagogue at Ephesus, but would not stay. He was anxious to be at Jerusalem to approach the highpriest, but he promised, "well willing, to return to them again. Leaving Ephesus, he sailed to Cesarua, and from thence went up to Jerusalem, and "sanctified the Church." It is argued (Wieseler, pp. 48-50), from considerations founded on the suspension of navigation during the winter months, that the festi
val was probably the Pentecost. From Jerusalem, almost immediately, the Apostle went down to Antioch, thus returning to the same place from which he had started with Silas.

Third Missionary Journey, including the soj

at Ephesus (Acts xviii. 23-xxi. 17). — Without inventing facts or discussions for which we have no authority, we may connect with this short visit of St. Paul to Jerusalem a very serious raising of the whole question, What was to be the relation of the new kingdom of Christ to the law and cove
nant of the Jews? Such a Church as that at Corinth, with its affiliated communities, composed chiefly of Gentile members, appeared likely to over
shadow by its importance the Mother Church in Judaea. The jealousy of the more Judaical be
lievers, not extinguished by the decision of the council at Jerusalem, began now to show itself everywhere in the form of an active and intriguing party spirit. This disastrous movement could not indeed alleviate the heart of St. Paul from the Law or the calling or the people of his fathers—his antagonism is never directed against these; but it drew him into the great conflict of the next period of his life, and must have been a sore trial to the intense loyalty of his nature. To vindicate the freedom, as regarded the Jewish Law, of be
lievers in Christ; but to do this, for the very sake of "saving all men alive, as God hath called them," is to be the earnest labor of the Apostle for some years. In thus laboring he was carrying out completely the principles laid down by the elder Apostles at Jerusalem; and may we not believe that, in deep sorrow at appearing, even, to disparage the Law and the covenant, he was the more anxious to prove his fellowship in spirit with the Church in Judaea, by "remembering the poor," as "James, Cephas, and John" had desired that he would? (Gal. ii. 10). The prominence given, during the journeys upon which we are now entering, to the collection to be made amongst his churches for the benefit of the poor at Jerusalem, seems to indicate such an anxiety. The great epistles which belong to this period, those to the Galatians, Corinthians, and Romans, show how the "Judaising" question ex
sisted at this time the Apostle's mind.

St. Paul—"spent some time" at Antioch, and during this stay, as we are inclined to believe, his collision with St. Peter (Gal. ii. 11-14), of which we have spoken above, took place. [See note 6, vol. iii. p. 2572.] When he left Antioch, he "went over all the country of Galatia and Phrygia in order, strengthening all the disciples, and giving or
gs concerning the collection for the saints (1 Cor. xvi. 1). It is probable that the Epistle to the Galatians was written soon after this visit. [Galatians, Epistle to the.] When he was with them he had found the Christian commun
ities infected by Judaizing teachers. He had "told them the truth" (Gal. iv. 16), and he had warned them against the deadly taints of Jewish exclusiveness, and had reaffirmed the simple Gospel, con
cerning Jesus Christ the Son of God, which he had preached to them on his first visit (Acts 18:28). But after he left them the Judizin
d doctrine raised its head again. The only course left to its advocates was to assail openly the authority of St. Paul; and this they did. They had been lucky in having derived his commission from the elder Apostles, and as therefore acting di
ally if he opposed the views ascribed to Peter and James. The field minds of the Galatian Christians were influenced by these hardy asser
tions; and the Apostle heard, when he had cont
town to Ephesus, that his work in Galatia was being undone, and his converts were being seduced from the true faith in Christ. He therefore writes the epistle to magnify with them—an epistle full of indignation, of warning, of dire and impassioned teaching. He recalls to their minds the Gospel which they had preached amongst them, and asserts in solemn and even awful language its absolute truth (i. 8, 9). He declares that he had received it directly from Jesus Christ the Lord, and that his position towards the other Apostles had always been that, not of a pupil, but of an independent fellow-laborer. He sets before them Jesus the Son of God, and the promise made to the fathers, and as the pledge and giver of freedom to men. He declares that in Him, and by the power of the Spirit of sonship, sent down through Him, men have inherited the rights of adult sons of God: that the condition represented by the Law was the inferior and preparatory stage of boyhood. He then, most earnestly and tenderly, impresses upon the Galatians the responsibilities of their fellowship with Christ the Crucified, urging them to fruitfulness in all the graces of their spiritual calling, and especially to brotherly consideration and unity.

This letter was, in all probability, sent from Ephesus. This was the goal of the Apostle's journeys through Asia Minor. He came down upon Ephesus from the upper districts (υπό τῆς αὔρης ἀποθηκς τοῦ Ποσειδίου). What Josephus was for the region of Syria and Cilicia, what Corinth was for Greece, what Rome was—we may add—for Italy and the West, that Ephesus was for the important province called Asia. Indeed, with reference to the spread of the Church Catholic, Ephesus occupied the central position of all. This was the meeting place of Jews, of Greek, of Roman, and of Oriental. Accordingly, the Apostle of the Gentiles was to stay a long time here, that he might found a strong Church, which should be a kind of mother-church to Christian communities in the neighboring cities of Asia.

A new element in the preparation of the world for the kingdom of Christ presents itself at the beginning of the Apostle's work at Ephesus. He finds there certain disciples (τινὲς μαθηταί) who belong in number to the name of the Lord Jesus, and when Paul had laid his hands upon them, the Holy Ghost came upon them, and they began to speak with tongues and to prophesy (Acts, xix. 1-7).—It is obvious to compare this incident with the Apostolic act of Peter and John at Samaria, and to see in it an assertion of the full Apostolic dignity of Paul. But besides this bearing of it, we see in it indications which suggest more than they distinctly express, as to the spiritual movements of that age. These twelve disci-
PAUL

by Jesus whom Paul preached." But the evil spirit, having a voice given to it, cried out, "Jesus I know, and Paul I know, but who are ye?" And the man who was possessed fell torpidly upon the exorcists and drove them forth. The result of this testimony was that fear fell upon all the inhabitants of Ephesus, and the name of the Lord Jesus was magnified. And the impression produced bore striking practical fruits. The city was well known for its Ἑπέστροφος γράμματα, forms of incantation, which were sold at a high price. Many of those who were caught up in the exorcism and were healed turned them against all men, and when the cost of them was computed it was found to be 50,000 drachmae (£1770). So mightily grew the word of the Lord, and prevailed."

Whilst St. Paul was at Ephesus his communications with the Church in Asia were not altogether suspended. There is strong reason to believe that a personal visit to Corinth was made by him, and a letter sent, neither of which is mentioned in the Acts. The visit is inferred from several allusions in the 2d Epistle to the Corinthians. "I hold, the third time I am ready to come to you" (2 Cor. xii. 14). "This is the third time I am coming to you" (2 Cor. xiii. 1). The visit he is contemplating is plainly that mentioned in Acts xx. 2, which took place when he finally left Ephesus. If it was the first time he had paid a second visit during the time of his residence at Ephesus. It seems far-fetched, with Puley (Hence Pauline, 2 Cor. No. xi.), to conclude that St. Paul is only alluding a third intention, and that the second intention had not been carried out. The context, in both cases, seems to refer plainly to ταύταις, and not to intentions. Again, "I determined this with myself, that I would not come again to you in bitterness" (παλαμίς εἰς ἀληθώς): 2 Cor. i. 1. Here St. Paul is apparently speaking of a previous visit which he had paid in sorrow of heart. He expresses an apprehension (2 Cor. xii. 21) lest "again when I come, my God should humble me among you" (αἱ πάλιν εὐθυτατος μοι ταπεινωθήσετε με— the παλαμίς appearing certainly to refer to ταπεινώσεις as much as to ἀληθώς). The words in 2 Cor. xii. 2, προειρήσας καὶ προερήσατο, ἐν παλαμίς τοῦ ἀληθοῦς, may be translated either "as if present the second time," or "as when present the second time." In the latter case we have here a distinct confirmation of the supposed visit. The former rendering seems at first sight to exclude it, but if we remember that the thought of his special ἀποστολὴ is occupying the Apostle's mind, we should naturally understand it, "I forewarn you now in my absence, as if I were present a second time to do it in person:" so that he would be speaking of the supposed visit as a first, with reference to the purpose which he has in his mind. The προειρήσας sense of these passages implies a short visit, which we should place in the first half of the stay at Ephesus. And there are no strong reasons why we should not accept that προειρήσας sense. St. Paul, so far as we may hear of disorder which prevailed in the Corinthian Church. Apollos had returned to Ephesus some time before the 1st Epistle was written (1 Cor. xvi. 12), and it may have been from him that St. Paul learnt the tidings which distressed him. He was moved to go himself to see them. He stayed but a short time, but warned them solemnly against the licentiousness which he perceived to be creeping in amongst them. If he went directly by sea to Corinth again, this journey would not occupy much time. It was very natural, again, that this visit should be followed up by a letter. Either the Apostle's own reflections after his return, or some subsequent tidings which reached him, drew from him, it appears, a written communication in which he gave them some practical advice. "I wrote unto you in the Epistle not to keep company with fornicators" (ὃ υπέρ τοῦ πιστοῦ διαμανθήσατε ἐν τῷ ἐπιστολαί: 1 Cor. v. 9). Then, at some point not defined in the course of the stay at Ephesus, St. Paul announced to his friends a plan of going through Macedonia and Achaia, and afterwards visiting Jerusalem; adding, "After I have been there, I must also see Rome." But he put off for a while his own departure, and sent before him Timothy and Erastus to the churches in Macedonia and Achaia, "to bring them into remembrance of his ways which were in Christ" (1 Cor. iv. 17).

Whether the First Epistle to the Corinthians was written before or after the tumult excited by Demetrius cannot be positively asserted. He makes an allusion, in that epistle, to a "battle with wild beasts" fought at Ephesus (ἐπίκαμμα ἐπὶ τῷ ἐπιστολαί: 1 Cor. xv. 32), which it is usual to understand figuratively, and which is by many connected with that tumult. But this connection is arbitrary, and without much reason. As and it would seem from Acts xx. 1 that St. Paul departed immediately after the tumult, it is probable that the epistle was written before, though not long before, the raising of this disturbance. Here then, while the Apostle is so earnestly occupied with the teaching of believers and inquirers at Ephesus and from the neighboring parts of "Asia," we find him throwing all his heart and soul into the concerns of the church at Corinth. [CORINTHIANS, FIRST EPISTLE TO THE.]

There were two external inducements for writing this epistle. (1.) St. Paul had received information from members of his house's household (ἐπιθύμησις μοι ὑπὸ τῶν Χάλυφων), i. 11) concerning the state of the church at Corinth. (2.) That church had written to him a letter, with the opposite of Paul addressed to Stephanus and Fortunatus and Achaeus, to ask his judgment upon various points which were submitted to him (vii. 1, xvi. 17). He had learnt that there were divisions in the church; that parties had been formed which took the names of Paul, of Apollos, of Cephas, and of Christ (i. 11, 12); and also that moral and social irregularities had begun to prevail, of which the most conspicuous and scandalous example was that a believer had taken his father's wife, without being publicly condemned by the church (v. 1, vi. 7, xvi. 17-22, xiv. 33-40). To these evils we must add one doctrinal error, of those who said "that there was no resurrection of the dead" (v. 12). It is probable that the teaching of Apollos the Alexandrian, which had been so characteristic and highly successful (Acts xviii. 27-28), had been the first occasion of the "divisions" in the church. We may take it for granted that his adherents did not form themselves into a party until he had left Corinth, and therefore that he had been some time with St. Paul at Ephesus. But after he was gone, suggests, that he had mentioned this conflict to the Corinthians in the previous non-extant letter.

a The number of the allusion, εἰς ἐπιμνήμασιν ἐκ τοῦ ἔργου, may imply, as Ewald (Scholien in loc., p. 264)
the special Alexandrian features of his teaching were remembered by those who had delighted to hear him. Their Grecian intellect was captivated by his broader and more spiritual interpretation of the Jewish Scriptures. The connection which he taught them to perceive between the revelation made to Hebrew rulers and prophets and the wisdom by which other nations, and especially their own, had been enlightened, dwelt in their minds. That which especially occupied the Apostles school must have been a philosophy of the Scriptures. It was the tendency of this party which seemed to the Apostle particularly dangerous amongst the Greeks. He hardly seems to refer specially in his letter to the other parties, but we can scarcely doubt that in what he says about "the wisdom which the Greeks sought" (i. 22), he is referring not only to the general tendency of the Greek mind, but to that tendency as it had been caught and influenced by the teaching of Apollos. It gives him an occasion of delivering his most characteristic testimony. He recognizes wisdom, but it is the wisdom of God; and that wisdom was not only a Sophia or a Logos through which God had always spoken to the world, but it had been most clearly revealed to the crucified Jesus. Christ crucified was both the Power of God and the Wisdom of God. To receive Him required a spiritual discernment unlike the wisdom of the great men of the world; a discernment given by the Holy Spirit of God, and manifesting itself in sympathy with humiliation and in love. For a detailed description of the epistle the reader is referred to the special articles upon each. It belongs to the history of St. Paul to notice the personal characteristics which appear in them. We must not omit to observe therefore, in this epistle, how loyally the Apostle represents Jesus Christ the Crucified as the Lord of men, the Head of the body with many members, the Centre of Unity, the Bond of men to the Father. We should mark at the same time how invariably he connects the Power of the Spirit with the Name of the Lord Jesus. He meets all the evils of the Corinthian Church, the intellectual pride, the party spirit, the looseness, the disregard of decency and order, the false belief about the Resurrection, by recalling their thoughts to the Person of Christ and to the Spirit of God as the breath of a common life to the whole body. We observe also here, more than elsewhere, the tact, universally recognized and admired, with which the Apostle discusses the practical problems brought before him. The various questions relating to marriage (eh. vii.), the difficulty about meats offered to idols (cc. viii., x.), the behaviour proper for women (cc. xi., xiv.), the use of the gifts of prophesying and speaking with tongues (eh. xiv.), are made examples of a treatment which must have proved to all such questioners. We see them all discussed with reference to first principles; the object, in every practical conclusion, being to guard and assert some permanent principle. We see St. Paul no less a lover of order and subordination than of freedom. We see him framing for himself, and prescribing to others, great variety of conduct in varying circumstances, manifesting the strict obligation of being always true to Christ, and always seeking the highest good of men. Such a character, so steadfast in motive and aim, so versatile in action, it would be difficult indeed to find elsewhere in history.

What St. Paul here tells us of his own doings and movements refers chiefly to the nature of his preaching at Corinth (cc. i., ii.); to the hardships and dangers of the apostolic life (iv. 9-13); to his cherished custom of working for his own living (ch. ix.); to the direct revivals he had received (xi. 23, xv. 8); and to his present plans (ch. xvi.). He bids his Corinthians to recall the history of their church at Jerusalem by laying something on the first day of the week, as he had directed the churches in Galatia to do. He says that he shall tarry at Ephesus till Pentecost, and then set out on a journey towards Corinth through Macedonia, so as perhaps to spend the winter with them. He expresses his joy at the coming of Stephanas and his companions, and commends them to the respect of the church.

Having despatched this epistle he stayed on at Ephesus, where "a great door and effectual was opened to him, and there were many adversaries." The affairs of the church of Corinth continued to be an object of the gravest anxiety to him, and to give him occupation at Ephesus; but it may be most convenient to put off the further notice of these till we come to the time when the second letter was written. We have now no information as to the work of St. Paul at Ephesus, until that tumult occurred which is described in Acts xix. 24-41. The whole narrative may be read there. We learn that "this Paul" had been so successful, not only in Ephesus, but "almost throughout al. Asia," in turning people from the worship of gods made with hands, that the craft of silversmiths, who made little shrines for Artemis, were alarmed for their manufacture. They raised a great tumult, and not being able, apparently, to find Paul, laid hands on two of his companions and dragged them into the theatre. Paul himself, not willing that his friends should suffer in his place, wished to go in amongst the people: but the disciples, supported by the urgent request of certain magistrates called Asiarchs, dissuaded him from his purpose. The account of the proceedings of the mob is highly graphic, and the address with which the town-clerk finally quieted the people is worthy of a discreet and experienced magistrate. His statement that "these men are neither robbers of churches, nor yet blasphemers of your godless," is an incidental testimony to the temperance of the Apostle and his friends in their attacks on the popular idolatry. But St. Paul is only personally concerned in this tumult in so far as it proves the deep impression which his teaching had made at Ephesus, and the daily danger in which he lived.

He had been anxious to depart from Ephesus, and this interruption of the work which had kept him there determined him to stay no longer. He set out therefore for Macedonia, and proceeded first to Troas, where he expected to preach the Gospel with good hope of success. But a restless anxiety to obtain tidings concerning the church at Corinth urged him on, and he advanced into Macedonia, where he met Titus, who brought him the news for which he was thirsting. The receipt of this intelligence drew from him a letter which reveals to us what manner of man St. Paul was when the fountains of his heart were stirred to their inmost depths. [CORNETHIANS, SECOND EPISTLE TO THE.] How the agitation which expresses itself in every sentence of this letter was excited, is one of the most interesting
questions we have to consider. Every reader may perceive that, on passing from the First Epistle to the Second, the scene is almost entirely changed. In the First, the faults and difficulties of the Corinthian Church are before us. The Apostle writes of these, with spirit indited and emotion, as he always does, but without passion or distur-

bance. He calmly asserts his own authority over the church, and threatens to deal severely with offenders. In the Second, he writes as one whose personal relations with those whom he addresses have undergone a most painful shock. The acute pain given by former tides, the comfort yielded by the first spirit still left; but he has brought the temper of a sensitive mind at the necessity of self-assertion, contending for the power. What had occasioned this excitement?

We have seen that Timothy had been sent from Ephesus to Macedonia and Corinth. He had re-

joined St. Paul when he wrote this Second Epistle, for he is associated with him in the salutation (2 Cor. 1. 1. and 2). Acts in the epistles, of this journey of Timothy, and some have thought it probable that he never reached Corinth. Let us suppose, however, that he arrived there soon after the First Epistle, con-

veyed by Stephanas and others, had been received by the Corinthian Church. He found that a movement had arisen in the heart of that Church which (let us suppose) the case of the in-

cessant person (1 Cor. v. 1-5) into the shade. This was a deliberate and sustained attack upon the Apostle's authority and personal integrity of the Apostle of the Gentiles. The party-spirit which, before the writing of the First Epistle, had been content with underrating the powers of Paul compared with those of Apollos, and with protest-

ing against the laxity of his doctrine of freedom, had been fanned into a flame by the arrival of some person or persons who came from the Judæan Church, armed with letters of commendation, and who openly questioned the commission of him whom they proclaimed to be a self-constituted Apostle (2 Cor. iii. 1, x. 12-15). As the spirit of opposition and ditraction grew strong, the tongue of some member of the church (more probably a Corinthian than the stranger himself) was loosened. He had already been enlisting the dissenters against the authority of Paul, pointing to his delay in coming to Corinth, and making light of his threats (i. 17, 24). He de-

manded proofs of his Apostleship (xii. 11, 12). He decided the weakness of his personal presence, and the simplicity of his speech (x. 10). He even threw out insinuations touching the personal honesty and self-denial of St. Paul (x. 12, xii. 17, 18). When such a attack was made openly upon the Apostle, the church had not immediately called the offender to account; the better spirit of the believers being cowed, apparently, by the confidence and assumed authority of the assailants of St. Paul. A report of this unbecomely state of things was brought to the Apostle by Timothy or by others; and we can imagine how it must have wounded him. It must have excited not only a sensitive nature, but also how critical the juncture must have seemed to him for the whole Western Church. He immediately sent off Titus to Corinth, with a letter containing the sharpest rebukes, using the authority which had been denied, and threatening to enforce it speedily by his personal presence (ii. £, 3, vi. 8). As soon as the letter was gone — how natural a trait! — he began to repent of having written it. He must have hated the ap-

pearance of claiming homage to himself; his heart must have been sore at the requital of his love; he must have felt the deepest anxiety as to the issue of the struggle. We can well believe him therefore when he speaks of what Satan had uttered: "Out of much affliction and anguish of heart I wrote to you with many tears" (ii. 4): "I had no rest in my spirit (i. 13): "Our flesh had no rest, but we were troubled on every side; without were fightings, within were fears" (vii. 5). It appears that he could not bring himself to hasten to Corinth so rapidly as he had intended (i. 15, 16): he had delayed till he was taught to make his visit a happy instead of a painful one (i. 1). When he had reached Macedonia, Titus, as we have seen, met him with such reassuring tides. The offender had been relumed by the church, and had made submission (ii. 6, 7): the old spirit of love and reverence towards St. Paul had been awakened, and had poured itself forth in a flood of earnestness and purity of word and penitence. The cloud was now dispelled; fear and pain gave place to hope and tenderness and thankfulness. But even now the Apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth.

When the epistle is read in the light of the circumstances we have supposed, the symptoms it displays of a highly wrought personal sensitiveness, and of a kind of ebull and flow of emotion, are as intelligible as they are noble and beautiful. Nothing but a temporary interruption of mutual regard could have made the joy of sympathy so deep and fresh. If he had been the object of a personal attack, how natural for the Apostle to write as he does in ii. 5-10. In vii, 12, "he that suffered wrong" is Paul himself. All his protestations relating to his Apostolic work, and his solemn appeals to God and Christ, are in place; and we enter into his feelings as he asserts his own sin-

cerity and the openness of the truth which he taught in the Gospel (xx. iii., lv. 4). We see what was in his heart, and that he was not the man who did not preach himself, but Christ Jesus the Lord. His own weakness became an argument to him, which he can use to others also, of the power of God working in him. Knowing his own fel-

lowship with Christ, and that this fellowship was the right of other men too, he would be persuasive or severe, as the case of Christ and the good of men might require (iv. xi., xvi.). If he was appearing to set himself up against the churches in Judæa, he was the more anxious that the collection which he was making for the benefit of those churches should prove his sympathy with them by its largeness. Again he would recur to the main-

tenance of his own authority as an Apostle of Christ, against those who impeached it. He would make it appear that he did not want he had supposed; that it knew no man after the flesh, and did not war after the flesh, he was not the less able for the building up of the church (eh. x.). He would ask them to excuse his an-

nious jealousy, his folly and excitement, whilst he gloated in the practical proofs of his Apostolic commission, and in the infirmities which made the power of God more manifest; and he would plead
with them earnestly that they would give him no occasion to find fault or to correct them (ce. xi., xii., xiii.).

The hypothesis upon which we have interpreted this epistle is not that which is most commonly received. According to the more common view, the offender is the incestuous person of 1 Cor. v., and the letter which followed so sharp and wholesome a medicine, the First Epistle. But this view does not account so satisfactorily for the whole tone of the epistle, and for the particular expressions relating to the offender: nor does it find places so consistently for the missions of Timothy and Titus. It does not seem likely that St. Paul would have treated the sin of the man who took his father's wife as an offense against himself, nor that he would have spoken of it by preference as a strong (ἀδικία) done to another (supposed to be the father). The view we have adopted is, in De Wette's Exegetisches Handbuch, to have been held, in whole or in part, by Bleek, Credner, Olshausen, and Neander. More recently it has been advocated with great force by Ewalt, in his Semin- schreiben des A. P. pp. 229-232. The reason is probably contained in the remarks by Stanley, Alford, and Davidson, and with some hesitation by Coylehere and Howson.

The particular nature of this epistle, as an appeal to facts in favor of his own Apostolic authority, leads to the mention of many interesting features of St. Paul's life. His summary, in xi. 25-28, of the hardships and dangers through which he had gone, proves to us how little the history in the Acts is to be regarded as a complete account of what he did and suffered. Of the particular facts stated in the following words, "Of the Jews five times received I forty stripes save one; thrice was I beaten with rods, once was I stoned, thrice I suffered shipwreck, a night and a day I have been in the deep," — we know only of one, the beating by the magistrates at Philippi, from the Acts. The daily burden of the care of all the churches seems to imply a wide and constant range of communication, by visits, messengers, and letters, of which we have found it reasonable to assume examples in his intercourse with the Church of Corinth. The mention of "visions and revelations of the Lord," and of the "thorn (or rather stake) in the flesh," side by side, is peculiarly characteristic both of the mind and of the experiences of St. Paul. As an instance of the visions, he alludes to a trance which had befallen him fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. Whether this vision may be identified with any that is recorded in the Acts must depend on chronological considerations: but the very expressions of St. Paul in this place would rather lead us not to think of an occasion in which words that could be reported were spoken. We observe that he speaks with the deepest reverence of the privilege thus granted to him; but he distinctly declines to ground anything upon it as regards other men. Let them judge him, he says, not by any such pretenses, but by facts which were cognizble to them (xii 1-6). And he would not, even inwardly with himself, glory in visions and revelations without remembering how the Lord had guarded him from being puffed up by them. A stake in the flesh (σκδαλφ τῆς ἐπιστ. δοκεῖ) was given him, a messenger of Satan to buffet him, lest he should be exalted above measure. The different interpretations which have prevailed of this σκδαλφ have a certain historical significance. (1) Roman Catholic divines have inclined to understand it by strong sensual temptation. (2) Luther and his followers take it to mean temptations to unbelief. But neither of these would be "infirmities" in which St. Paul could glory. It is almost unanimous opinion of modern divines — and the authority of the ancient fathers on the whole is in favor of it — that the σκδαλφ represents some vexations bodily in- firmitv (see especially Stanley in loco). It is plainly what St. Paul refers to in Gal. iv. 14: "My temptation in my flesh ye despised not rejected. This infirmity distressed him so much that he besought the Lord thrice that it might depart from him. But the Lord answered, 'My grace is sufficient for thee; for my strength is made perfect in weakness.' We are to understand therefore the affliction as remaining; but Paul is more than resigned under it, he even glories in it as a means of displaying more purely the power of Christ in him. That we are to understand the Apostle, in accordance with this passage, as laboring under some degree of ill-health, is clear enough. But we must remember that his constitution was at least strong enough, as a matter of fact, to carry him through the hardships and anxieties and toils which he himself describes to us, and to sustain the pressure of the long imprisonment at Caesarea and in Rome.

After writing this epistle, St. Paul travelled through Macedonia, perhaps to the borders of Illyricum (Iom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. The narrative in the Acts tells us that "when he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months " (xx. 2, 3). There is only one incident which we can connect with this visit to Greece, but that is a very important one — the writing of another great epistle, addressed to the Church at Rome. [ROMANS, EPISTLE TO THE.] That this was written at this time from Corinth appears from passages in the epistle itself, and has never been doubted. It would be unreasonable to suppose that St. Paul was insensible to the mighty associations which connected himself with the name of Rome. He was the seat of the imperial government to which Jerusalem itself, with the rest of the world, was then subject, must have been a grand object to the thoughts of the Apostle from his infancy upwards. He was himself a citizen of Rome; he had come repeatedly under the jurisdiction of Roman magistrates; he had enjoyed the benefits of the equity of the Roman law, and the justice of Roman administration. And, besides its universal supremacy, Rome was the natural head of the Con- testile world, as Jerusalem was the head of the Jew- ish world. In this august city Paul had many friends and brethren. Romans who had travelled into Greece and Asia, strangers from Greece and Asia who had gone to settle at Rome, had heard of Jesus Christ and the kingdom of Heaven from Paul himself or from other preachers of Christ, and had formed themselves into small communities, of which a good report had gone forth throughout the Christian world. We are not surprised therefore to hear that the Apostle was very anxious to visit Rome. It was his fixed intention to go to Rome, and from Rome to extend his journey as far
as Spain (Rom. xv. 24, 28). He would thus bear his witness, both in the capital and to the extremities of the Western or Gentile world. For the present, however, Paul makes no attempt to go from Corinth to Rome, because he was drawn by a special errand to Jerusalem — where indeed he was likely enough to meet with dangers and delays (xx. 25-32). But from Jerusalem he proposed to turn Romeward. In the mean while he would write them a letter from Corinth.

The letter is a substitute for the personal visit, which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, because he is the Apostle of the Gentiles. Of this office, to speak in common language, St. Paul was proud. All the labors and dangers of it he would willingly encounter; and he would also jealously maintain its dignity and its powers. He held it of Christ, and Christ's commission should not be dishonored. He represents himself candidly as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (xx. 16). And he then proceeds to speak with pride of the extent and independence of his Apostolic labors. It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles: but we find that he speaks to them as to persons deeply interested in Jewish questions (see Prof. Jowett's and Bp. Colenso's Introductions to the Epistle).

To the church thus composed, the Apostle of the Gentiles writes to declare and commend the Gospel which he everywhere preaches. That Gospel was invariably the announcement of Jesus Christ the Son of God, the Lord of men, who was made man, died, and was raised again, and whom his heralds present to the faith and obedience of mankind. Such a kerygma might be variously commended to different hearers. In speaking to the Roman Church, St. Paul represents the chief value of it as consisting in the fact that, through it, the righteousness of God, as a righteousness not for God only, but also for men, was revealed. It is natural to ask what led him to choose and declare upon this aspect of his proclamation of Jesus Christ. The following answers suggest themselves: — (1.) As he looked upon the condition of the Gentile world, with that comp d'ceil which the writing of a letter to the Roman Church was likely to suggest, he was struck by the awful wickedness, the utter dissolution of moral ties, which has made that age infamous. His own terrible summary (i. 21-22) is well known to be confirmed by other contemporary evidence. The profligacy which we shudder to read of was constantly under St. Paul's eye. Along with the evil he saw also the beginnings of God's judgment upon it. He saw the liberties and disasters, begun and impending, which proved that God in heaven would not tolerate the unrighteousness of men. (2.) As he looked upon the condition of the Jewish people, he saw them claiming an exclusive righteousness, which, however, had manifestly no power to preserve them from being really unrighteous. (3.) Might not the thought also occur to him, as a Roman citizen, that the empire which was now falling to pieces through unrighteousness had been built up by righteousness, by that love of order and that acknowledgments of rights which were the great endowment of the Roman people? Whether we lay any stress upon this or not, it seems clear that to one contemplating the world from St. Paul's point of view, no thought would be naturally suggested as that of the need of the true Righteousness for the two divisions of mankind. The remarkable exposition contained in ch. ix., x., xi., illustrates the personal character of St. Paul, by showing the intense love for his nation which he retained through all his struggles with unbelieving Jews and Judaizing Christians, and by what hopes he reconciled himself to the thought of their unbelief and their punishment. Having spoken of this subject, he goes on to exhibit in practical counsel the same love of Christian unity, moderation, and gentleness, the same respect for social order, the same tenderness for weak consciences, and the same expectation of the Lord's coming and confidence in the future, which appear more or less strongly in all his letters.

Before his departure from Corinth, St. Paul was urged to visit St. Peter again, and to infer from the change in the narrative from the third to the first person. We have seen already that he was bent on making a journey to Jerusalem, for a special purpose and within a limited time. With this view he was intending to go by sea to Syria. But he was made aware of some plot of the Jews for his destruction, to be carried out through this voyage: and he determined to evade their malice by changing his route. Several brethren were associated with him in this expedition, the hearers, no doubt, of the collections made in all the churches for the poor at Jerusalem. These were sent on by sea, and probably the money with them, to Troas, where they were to await St. Paul. He, accompanied by St. Luke, went northwards through Macedonia. Then, by the style of eyewitness again becomes manifest, "a Troas Philippians wrote," as the writer, "we sailed away after the days of unleavened bread, and came into them to Troas in five days, where we abide seven days." The marks of time throughout this journey have given occasion to much chronological and geographical discussion, which brings before the reader's mind the difficulties and uncertainties of travel in that age, and leaves the precise determination of the dates of this history a matter for reasonable conjecture rather than for positive statement. But no question is raised by the times mentioned which need detain us in the course of the narrative. During the stay at Troas there was a meeting on the first day of the week "to break bread," and Paul was discussing earnestly and at length with the brethren. He was to depart the next morning, and at midnight found them listening to his earnest speech, with many lights burning in the upper chamber in which they had met, and making the atmosphere oppressive. A youth named Eutychus was sitting in the window, and was gradually overpowered by sleep, so that at last he fell into the street or on the third story, and it was the right next morning that the right answer was the right answer. The meeting was interrupted by this accident, and Paul went down and fell upon him and embraced him, saying, "He did not disturb, his life is in him." [EUTYCHUS, Amer. ed.]
fri%nds then appear to have taken charge of him, whilst Paul went up again, first presided at the breaking of bread, afterwards took a meal, and continued conversing until day-break, and so departed.

When the vessel which conveyed the rest of the party sailed from Troas to Assos, Paul gained some time by making the journey by land. At Assos he went on board again.5 Coasting along by Mitylene, Chios, Samos, and Trogyllium, they arrived at Miletus. The Apostle was thus passing by the chief church in Asia; but if he had gone to Ephesus he might have arrived at Jerusalem too late for the Pentecost, at which festival he had set his heart upon being present. At Miletus, however, there was time to send to Ephesus; and the elders of the Church were invited to come down to him there. This meeting is made the occasion for recording another characteristic and representative address of St. Paul (Acts xx. 18–35). This spoken address to the elders of the Ephesian Church may be ranked with the epistles, and forms the same kind of utterance. It was a farewell address. It also received the applause of the church. It was a model discourse to the churches. Like several of the epistles, it is in great part an appeal to their memories of him and of his work. He refers to his labors in serving the Lord amongst them, and to the dangers he incurred from the plots of the Jews, and asserts emphatically the necessity with which he had taught them. He then mentions a fact which will come before us again presently, that he was receiving inspired warnings, as he advanced from city to city, of the bonds and afflictions awaiting him at Jerusalem. It is interesting to observe that the Apostle felt it to be his duty to press on in spite of these warnings. Having formed his plan on good grounds and in the sight of God, he did not see, in dangers which might even touch his life, however clearly set before him, reasons for changing it. Other arguments might move him from a fixed purpose—not dangers. His one guiding principle was, to discharge the ministry which he had received from the Lord Jesus, to testify the Gospel of the grace of God. Speaking to his present audience as to those whom he was seeing for the last time, he proceeds to exhort them with unusual earnestness and tenderness, and expresses in conclusion that anxiety as to practical industry and life in view of the approaching trial, that is occupying his mind. In terms strongly resembling the language of the epistles to the Thessalonians and Corinthians, he pleads his own example, and entreats them to follow it, in "laboring for the support of the weak."6 And when he had thus spoken he kneeled down and prayed with them all: and they all wept sore, and fell on Paul's neck, and kissed him, sorrowing most of all for the words which he spake, that they should see his face no more. And they accompanied him to the ship.7... This is the kind of narrative in which some learned men think they can detect the signs of a moderately clever fiction.

The course of the voyage from Miletus was by Coos and Rodies to Patara, and from Patara in another vessel past Cyprus to Tyre. Here Paul and his company spent seven days; and there were disciples "who said to Paul through the Spirit, that he should not go up to Jerusalem." Again there was a sorrowful parting: "They all brought us on our way, with his wives and children, till we were out of the city; and we knelt down on the shore and prayed." From Tyre they sailed to Ptolemais where they spent one day to discharge their discharge. In Ptolemais proceeded, apparently by land, to Cesarea. In this place was settled Philip the Evangelist, one of the seven, and he became the host of Paul and his friends. Philip had four unmarried daughters, who "prophesied," and who repeated, no doubt, the warnings already heard. Cesarea was within an easy journey of Jerusalem, and Paul may have thought it prudent not to be too long in Jerusalem before the festival; otherwise it might seem strange that, after the former haste, they now "tarried many days" at Cesarea. During this interval the prophet Agabus (Acts xi. 28) came down from Jerusalem, and crowned the previous intimations of danger with a prediction expressively delivered. It would seem as if the approaching imprisonment were intended to be conspicuous in the eyes of the Church, as an agency for the accomplishment of God's designs. At this stage a final effort was made to dissuade Paul from going up to Jerusalem, by the Christians of Cesarea, and by his travelling companions. But "Paul answered, What mean ye to weep and to break mine heart? for I am ready not to be bound only, but also to die at Jerusalem for the name of the Lord Jesus. And when he would not be persuaded, we ceased and said, Be it so, according as thou pleasest." When a while, they went up to Jerusalem, and were

5 Assos, connected with Troas by a paved road, was about twenty miles distant. A Greek friend mentioned to me that he had travelled on foot between the places in five hours. The motive for Paul's foot-journey can only be conjectured. He may have wished to have the company of friends from Troas whom the crowded vessel could not accommodate, or to visit friends on the way, or (Hosson) after the exciting scenes at Troas to gratify his desire for solitude and reflection. He b The memorable address at Miletus brings before us a characteristic of Paul, which enters essentially into a just conception of his personality, and is introduced in such a manner as to authenticate the speech. It will be noticed how strongly the Apostle asserts in this discourse his self-conscious, centre rectitude in the eyes of men, and of his claim to be recognized as a true pattern of Christian fidelity. "It appears," says Dr. Touluck (Relata des Apostolis Pauli in Asia, p. 223), "that he belong to the peculiarities of this Apostle that he in particular appears so often to his blameless manner of life. The occasion for this lies sometimes in the collocations of his enemies, as when he says in 2 Cor. i. 12: 'For our boasting (saulipso) is this, the testimony of our conscience, that in simplicity and godly sincerity, not with fleshly wisdom, but by the grace of God, we have had our conversation in the world, and more especially among you.' Ch. xl. shows what adversaries he had in view in this self-justification. But often these appeals spring only from that just confidence with which he can call upon others to imitate Paul, as when he himself imitates the Saviour. Thus in 1 Cor. xi. 1, he says: 'Be ye followers of me, even as I also am of Christ;' and in Phil. iii. 17: 'Brethren, be followers together of me, and mark them who walk so as ye have us for an ensample.' Such personal testimonies are not found in the later epistles of St. T., nor are they frequent in the writings of other pious men; and on that account we are authorized to consider their occurrence in this discourse (vv. 18-21) as a mark of its historical character." For examples of the historical affinity between this discourse and Paul's Epistles, see Lekebusch, Composition der Apostelgeschichte, p. 339. Dean Hosson's remarks on this address (Character of St. Paul, p. 292 f.) are specially instructive. B.
gladly received by the brethren. This is St. Paul's fifth and last visit to Jerusalem.

St. Paul's imprisonment in Jerusalem and Caesarea. — He who was thus conducted into Jerusalem by a company of anxious friends had become by this time a man of considerable fame amongst his countrymen. He was widely known as one who had taught with precocious boldness that a way into God's favor was opened to the Gentiles, and that this way did not lie through the door of the Jewish Law. He had moreover actually founded under his personal and impartial influence a community of Jews and Gentiles together, which stood simply on the name of Jesus Christ, apart from circumcision and the observance of the Law. He had thus raised against himself the bitter enmity of that unfaithful Jewish pride which was almost as strong in some of those who had professed the faith of Jesus, as in their unconcerned brethren. This enmity had for years been vexing both the body and the spirit of the Apostle. He had no rest from his persecutions; and his joy in proclaiming the free grace of God to the world was mixed with a constant sorrow that in so doing he was held to be disloyal to the calling of his fathers. He was now approaching a crisis in the long struggle, and the shadow of it had been made to rest upon his mind throughout his journeys to Jerusalem. He came "ready to die for the name of the Lord Jesus," but he came expressly to prove himself a faithful Jew, and this purpose emerges at every point of the history.

St. Luke does not mention the contributions brought by Paul and his companions for the poor at Jerusalem a but it is to be assumed that their first act was to deliver these funds into the proper hands. This might be done at the interview which took place on the following day with "James and all the elders." As on former occasions, the believers at Jerusalem could not but glorify God for what they heard; but they had been amazed by the prevalent feeling concerning St. Paul. They said to him, "Thou seest, brother, how many thousands of Jews there are which believe; and they are all zealous of the Law; and they are informed of thee, that thou teachest all the Jews, which are among the Gentiles to forsake Moses, saying that they ought not to circumcise their children, neither to walk after the customs." This report, as James and the elders assumed, was not a true one; it was a perversion of Paul's real teaching, which did not, in fact, differ from theirs. In order to dispel such rumors they asked him to do publicly an act of homage to the Law and its observances. They had four men who were under the Nazarite vow. The completion of this vow involved (Num. vi. 13-21) a considerable expense for the offerings to be presented in the Temple; and it was a meritorious act to provide these offerings for the poorer Nazarites. St. Paul was requested to put himself under the vow with those other four, and to supply the rest of their offerings. He at once accepted the proposal, and on the next day, having performed some ceremony which implied the adoption of the vow, he went into the Temple, announcing that the due offerings for each Nazarite must be presented and the period of the vow terminated.

It appears that the whole process undertaken by St. Paul required seven days to complete it. Towards the end of this time certain Jews from "Asia," who had come up for the Pentecostal feast, and who had a personal knowledge both of Paul himself and of his companion Trophimus, a Gentile from Ephesus, saw Paul in the Temple. They immediately set upon him, and stirred up the people against him, crying out, "Men of Israel, help: this is the man that teacheth all men everywhere against the people, and the Law, and this place; and further brought Greeks also into the Temple, and hath polluted this holy place." The latter charge had no more truth in it than the first: it was only suggested by their having seen Trophimus with him, not in the Temple, but in the city. They raised, however, a great commotion: Paul was dragged out of the Temple of which the doors were immediately shut, and the people, having him in their hands, were proposing to kill him. But tidings were soon carried to the commander of the force which was serving as a garrison in Jerusalem, that "all Jerusalem was in an uproar;" and he, taking with him soldiers and centurions, hastened to the scene of the tumult. Paul was rescued from the violence of the multitude by the Roman officer, who made him his own prisoner, causing him to be chained to two soldiers, and then proceeded to inquire who he was and what he had done. The inquiry only elicited confused answer, and the "chief captain" seems to have imagined that the Apostle might perhaps be a certain Egyptian pretender who had recently stirred up a considerable rising of the people. The account in the Acts (xxi. 34-40) tells us with graphic touches how St. Paul obtained leave and opportunity to address the people in a discourse which is related at length.

This discourse was spoken in Hebrew; that is, in the native dialect of the country, and was on that account listened to with the more attention. It described how St. Paul, himself, in his opening words, as his "defence addressed to his own nation and fathers. It is in this light that it ought to be regarded. As we have seen, the desire which occupied the Apostle's mind at this time, was that of vindicating his message and work as those of a faithful Jew. The discourse spoken to the angry people at Jerusalem is his own justification of himself. He adopts the historical method, after which all the recorded appeals to Jewish audiences are framed. He is a servant of facts. He had been from the first a zealous Israelite like his hearers. He had changed his course because the God of his fathers had turned him from one path into another. It is thus that he is led into a narrative of his Conversion. We have already noticed the differences, in the statement of bare facts, between this narrative and that of the 9th chapter. The business of the

a * This remark is not correct, if understood to mean that Luke is altogether silent as to the aims which Paul had collected abroad, and had brought with him to Jerusalem. Luke represents the Apostle as saying in his speech before Felix (Acts xxiv. 17) that he was at Jerusalem on this business when he was apprehended by the Jews. This incidental notice, however, in fact, the only reference in the book of the Acts to these contributions which Paul had been taking up so extensively in the Gentile churches. (See Rom. xiv. 25, 26; 1 Cor. xvi. 1-4; 2 Cor. viii. 1-4.) The manner in which the epistles supply this omission of Luke's history, as Paley so justly argues, furnishes a conclusive proof of the credibility of these writings.
What was it?—it was not fit (infraet Xaepeera) that he should live," i.e., he deserved to die long ago (Lechler, Der Apostol.

zen, and to suppress tumult; but it was also a part of his policy to treat with deference the religion and the customs of the country. St. Paul's present history is the resultant of these two principles: The chief captain set him free from bonds, but on the next day called together the chief priests and the Sanhedrim, and brought Paul as a prisoner to them. We need not suppose that this was a regular legal proceeding: it was probably an experiment of policy and courtesy. If, on the one hand, the commandant of the garrison had no power to convolve the Sanhedrim; on the other hand he would not make a Roman citizen to their judgment. As it was, the affair ended in confusion, and with no semblance of a judicial termination. The incidents selected by St. Luke from the history of this meeting form striking points in the biography of St. Paul, but they are not easy to understand. The difficulties arising here, not out of a comparison of two independent narratives, but out of a single narrative which must at least have appeared consistent and intelligible to the writer himself, are a warning to the student not to draw unfavorable inferences from all apparent discrepancies. St. Paul appears to have been put upon his defense, and with the peculiar habit, mentioned elsewhere also (Acts xiii. 9), of looking steadily when about to speak (apqriasças); he began to say, "Men and brethren, I have lived in all good conscience (or, to give the force of παρακρημον, I have lived a conscientiously loyal life) unto God, until this day." Here the high-priest Ananias commanded them that stood by him to smite him on the mouth. With a fearless indignation, Paul exclaimed: "God shall smite thee, thou whited wall; for sitteth thou to judge me after the law, and commandest me to be unstricken contrary to the law?" The bystanders said, "Rickest thou God's high-priest?" Paul answered, "I knew not, brethren, that he was the high-priest; for it is written, Thou shalt not speak evil of the ruler of thy people." The evidence furnished by this apology, of St. Paul's respect both for the Law and for the high-priesthood, was probably the reason for relating the outburst which it followed. Whether the writer of the narrative that outlines St. Paul's career does not appear. St. Jerome (contra Pelphy, iii., quoted by Baur) draws an unfavorable contrast between the vehemence of the Apostle and the meekness of his master; and he is followed by many critics, as amongst others De Wette and Alford. But it is to be remembered that He who was led as a lamb to the slaughter, was the same who spoke of "whited sepulchres;" and exclaimed, "Ye serpents, ye generation of vipers, how shall ye escape the damnation of hell?" It is by no means certain, therefore, that St. Paul would have been a truer follower of Jesus if he had held his tongue under Ananias's lawless outrage. But what does his answer mean? How was it possible for him not to know that he who spoke was the high-priest? Why should he be silent until he rebuke an impious high-priest than any other member of the Sanhedrim, "sitting to judge him after the Law?" These are difficult questions to answer. It is not likely that Ananias was personally unknown to St. Paul; still less so, that the high-priest was not distinguished by dress or place from Greek p. 238, 35th Ausl.; or, as Meyer prefers (loc.), should have been left to die instead of being required as he was (Acts xxii. 31).
the other members of the Sanhedrim. The least objectionable solutions seem to be that for some reason or other — either because his sight was not good, or because he was looking another way, — he did not know whose voice it was that ordered him to be smitten; and that he wished to correct the impressions which he had received from some of the audience by his threatening protest, and therefore took advantage of the fact that he really did not know the speaker to be the high-priest, to explain the deference he felt to be due to the person holding that office. The next incident which St. Luke records seems to some, who cannot think of the Apostle as remaining still a Jew, to cast a shadow upon his rectitude. He perceived, we are told, that the council was divided into two parties, the Sadducees and Pharisees, and therefore he cried out, “Men and brethren, I am a Pharisee, the son of a Pharisee; concerning the hope and resurrection of the dead I am called in question.” This declaration, whether so intended or not, had the effect of stirring up the party spirit of the assembly to such a degree that a fierce discussion arose, and some of the Pharisees actually took Paul’s side, saying, “We find no evil in this man; suppose a spirit or an angel has spoken to him?” — Those who impugn the authenticity of the Acts point triumphantly to this scene as an utterly impossible one; others consider that the Apostle is to be blamed for using a disingenuous artifice. But it is not so clear that St. Paul was using an artifice at all, at least for his own interest, in identifying himself as he did with the professions of the Pharisees. He had not come to Jerusalem to escape out of the way of danger, nor was the course he took on this occasion the safest he could have chosen. Two objects, we must remember, were dearer to him than his life: (1) to testify of him whom God had raised from the dead, and (2) to prove that in so doing he was a faithful Israelite. He may well have thought that both these objects might be promoted by an appeal to the nobler professions of the Pharisees. The creed of the Pharisee, as distinguished from that of the Sadducee, was unquestionably the creed of St. Paul. His belief in Jesus seemed to him to supply the ground and fulfillment of that creed. He wished to lead his brother Pharisees into a wiser and more living appreciation of their own faith. Whether such a result was in any degree attained, we do not know: the immediate consequence of the discussion which occurred in the assembly was that Paul was like to be torn in pieces, and was carried off by the Roman soldiers. In the night he had a vision, as at Corinth (xvii. 9, 10), and on the voyage to Rome (xviii. 23, 24), of the Lord standing by him, and encouraging him. “Be of good cheer, Paul,” said his Master; “for as thou hast testified of me in Jerusalem, so must thou bear witness also at Rome.” It was not safety that the Apostle longed for, but opportunity to bear witness of Christ.

Probably the fiction of support which Paul had gained by his manner of bearing witness in the presence of the Sanhedrim was false. The meeting was dissolved. On the next day a conspiracy was formed, which the historian relates with a singular fullness of details. More than forty of the Jews bound themselves under a curse neither to eat nor to drink till they had killed Paul. Their plan was, to persuade the Roman commandant to send down Paul once more to the council, and then to set upon him by the way and kill him. This conspiracy became known in some way to a nephew of St. Paul’s, his sister’s son, who was allowed to see his uncle, and inform him of it, and by his desire was taken to the captain, who was thus put on his guard against the plot. This discovery baffled the conspirators; and it is to be feared that they obtained some dispensation from their vow.

The consequence to St. Paul was that he was hurried away from Jerusalem. The chief captain, Claudius Lysias, determined to send him to Cesarea, to Felix the governor, or procurator, of Judea. He therefore put him in charge of a strong guard of soldiers, who took him by night as far as Antipatris. From thence a smaller detachment conveyed him to Cesarea, where they delivered up their prisoner into the hands of the governor, together with a letter, in which Claudius Lysias had explained to Felix his reason for sending Paul, and had announced that his accusers would follow. Felix, St. Luke tells us with that particularity which marks this portion of his narrative, asked of what province the prisoner was; and being told that he was of Cilicia, he promised to give him a hearing when his accusers should come. In the mean-time he ordered him to be guarded, — claimed, probably, to a soldier, — in the government house [or Praetorium], which had been the palace of Herod the Great.

Imprisonment at Cesarea.—St. Paul was henceforth, to the end of the period embraced in the Acts, if not to the end of his life, in Roman custody. This custody was in fact a protection to him, for that he would have fallen a victim to the animosity of the Jews. He seems to have been treated throughout with humanity and consideration. His own attitude towards Roman magistrates was invariably that of a respectful but independent citizen; and whilst his franchise secured him from open injustice, his character and conduct could not fail to win him the good-will of those into whose hands he came. The governor before whom he was now to be tried, according to Tacitus and Josephus, was a man and disdained

**error**? If his conduct in yielding to the momentary impulse was not that of Christ himself under a similar provocation (John xviii. 22, 23), certainly the manner in which he acted for his fault was Christlike. (Mackett’s Commentary on the Acts, 24 ed. p. 572.)

This view, which is held by several eminent writers (Horace, Wordsworth, Leecher), as stated above, and which is really honorable to the Apostle, is entitled by Alexander as the "fashionable sentimental view." It is not wholly satisfactory, because the Apostle appears to have spoken in a strain of prophetic declamation; but it strikes us as the least difficult and improbable of the several solutions proposed.
Upon his arrival in the province, he went up without delay from Caesarea to Jerusalem, and the leading Jews seized the opportunity of asking that Paul might be brought up there for trial, intending to denounce him by way of false accusation. But Felix would not comply with their request. He invited them to follow him on his speedy return to Caesarea, and a trial took place there, closely resembling that before Felix. Festus saw clearly enough that Paul had committed no offence against the law, but he was anxious at the same time, if he could, to please the Jews. 

"They had certain questions against him," Festus says to Agrippa, "of their own superstition (or religion), and of one Jesus, who was dead, whom Paul affirmed to be alive. And being puzzled for my part as to such inquiries, I asked him whether he would go to Jerusalem to be tried there." This proposal, not a very likely one to be accepted, was the occasion of St. Paul's appeal to Caesar. In dignified and independent language he claimed his rights as a Roman citizen. We can scarcely doubt that the prospect of being forwarded by this means to Rome, the goal of all his desires, presented itself to him and drew him onwards, as he virtually protested against the indecision and impotence of the provincial governor, and exclaimed, "I appeal unto Caesar." Having heard this appeal, Festus consulted with his assessors, found that there was no impediment in the way of its prosecution, and then replied, "Hast thou appealed to Caesar? To Caesar shalt thou go."

Properly speaking, an appeal was made from the sentence of an inferior court to the jurisdiction of a higher. But in St. Paul's case no sentence had been pronounced. We must understand, therefore, by his appeal, a demand to be tried by the imperial court, and we must suppose that a Roman citizen had the right of electing whether he would be tried in the province or at Rome. [APPEAL.]

The appeal having been allowed, Festus reflected that he must send with the prisoner a report of "the crimes laid against him." And he found that it was no easy matter to put the complaints of the Jews in a form which would be intelligible at Rome. He therefore took advantage of an opportunity which offered to him in a few days to come here in the matter. The Jewish prince Agrippa arrived with his sister Bernice on a visit to the new governor. To him Festus communicated his perplexity, together with an account of what had occurred before him in the case. Agrippa, who must have known something of the sect of the Nazarenes, and had probably heard of Paul himself, expressed a desire to hear him speak. The Apostle therefore was now called upon to bear the name of his Master, "before Gentiles, and kings." The audience which assembled to hear him was the most dignified which he had yet addressed, and the state and ceremony of the scene proved that he was regarded as no vulgar criminal. Festus, when Paul had been brought into the council-chamber, explained to Agrippa and the rest of the company the difficulty in which he found himself, and then expressly referred the matter to the better knowledge of the Jewish king Paul therefore was to give an account of himself as Paul discoursed of immorality and a judgment to come. The woman's resentment was to be feared as well as that of the man. It was the implacable Herodias and not Herod, who demanded the head of John the Baptist. If

"A strict self-control," (εγκράτεια), especially chastity, so grossly violated by those to whom Paul was speaking. We have here a striking example of the Apostle's courage and fidelity. At the side of Felix was sitting a victim of his libertinism, an adulteress.
to Agrippa; and when he had received from him a courteous permission to begin, he stretched forth his hand and made his defense.

In this discourse (Acts xxvi.), we have the second explanation from Paul himself of the manner in which he had been led, through his conversion, to serve the Lord Jesus instead of persecuting his disciples; and the third narrative of the conversion itself. Speaking to Agrippa as to one thoroughly versed in the customs and questions prevailing amongst the Jews, Paul appeals to the well-known Jewish and even Pharisaical strictness of his youth and early manhood. He had lived the kind of life and was the sort of man which sustained continually the worship of the Jewish nation,—the hope of a deliverer, promised by God Himself, who should be a conqueror of death. He had been led to see that this promise was fulfilled in Jesus of Nazareth; he proclaimed his resurrection to be the pledge of a new and immortal life. What was there in this of disloyalty to the traditions of his fathers and his countrymen? He disbelieve in this Jesus as the Messiah? So had he once disbelieved in Him; and had thought it his duty to be earnest in hostility against his name. But his eyes had been opened: he would tell how and when. The story of the conversion is modified in this address as we might fairly expect it to be. We have seen that there is no absolute contradiction between the statements of this and the other narratives. The main points,—the light, the proclamation, the voice from heaven, the instructions from Jesus,—are found in all three. But in this account, the words, "I am Jesus whom thou persecutest," are followed by a fuller explanation, as if then spoken by the Lord, of what the work of the Apostle was to be. The other accounts defer this explanation to a subsequent occasion. But when we consider how fully the mysterious communication made at the moment of the conversion included what was afterwards conveyed, through Ananias and in other ways, to the mind of Paul; and how needless it was for Paul, in his present address before Agrippa, to mark the stages by which the whole lesson was taught, it seems merely captions to base upon the method of this account a charge of disagreement between the different parts of Acts. They bear, on the contrary, a striking mark of genuineness in the degree in which they approach contradiction without reaching it. It is most natural that a story told on different occasions should be told differently; and if in such a case we find no contradiction as to the facts, we gain all the former impression of the substantial truth of the story.

The particular added to the former accounts by the present narrative are, that the words of Jesus were spoken in Hebrew, and that the first question to Paul was followed by the saying, "it is hard for thee to kick against the goads." (This saying is omitted by the best authorities in chapter ix.) The language of the commission which St. Paul says he received from Jesus deserves close study, and will be found to bear a striking resemblance to a passage in Colossians (i. 12-14). The ideas of light, redemption, forgiveness, inheritance, and truth in Christ, belong characteristically to the Gospel which Paul preached amongst the Gentiles. Not less striking is it to observe the older terms in which he describes to Agrippa his obedience to the heavenly vision. He had made it his business of life to proclaim to all men "that they should repent and turn to God, and do works meet for repentance." Words such as John the Baptist uttered, but not less truly Pauline. And he finally reiterates that the testimony on account of which the Jews sought to kill him was in exact agreement with Moses and the prophets. They had taught men to expect that the Christ should suffer, and that He should be lifted up from the dead, and should show light unto the people and to the Gentiles. Of such a Messiah Paul was the servant and preacher. a

At this point Festus began to apprehend what seemed to him a manifest absurdity. He interrupted the Apostle discourteously, but with a composure contained in his loud remonstrance. "I thou art mad, Paul; thy speech is turning thee mad." The words παλαι ἡγεμονίας may possibly have been suggested by the allusion to Moses and the prophets; but it probably refers to the books with which St. Paul had been supplied, and which he was known to study, during his imprisonment. As a biographical hint, this phrase is not to be overlooked. "I am not mad," replied Paul, "most noble Festus: they are words of truth and soberness which I am uttering." Then, with an appeal of mingled dignity and solicitude, he turns to the king. He was sure the king understood him.

"King Agrippa, believest thou the prophets? —I know that thou believest." The answer of Agrippa can hardly have been the serious and encouraging remark of our English version. Literally rendered, it appears to be, You are briefly persuading me to become a Christian: and it is generally supposed to have been spoken ironically. "I would to God," is Paul's earnest answer, "that whether by a brief process or by a long one, not only thou but all who hear me to day might become such as I am, with the exception of these bonds." He was wearing a chain upon the hand he held up in addressing them. With this prayer, it appears, the conference ended. Festus and the king, and their companions consulted together and came to the conclusion that the accused was guilty of nothing that deserved death or imprisonment. And Agrippa's final answer to the inquiry of Festus was, "This man might have been set at liberty, if he had not appealed unto Caesar." The Voyage to Rome. —No formal trial of St. Paul had yet taken place. It appears from Acts xxviii. 18, that he knew how favorable the judgment of the provincial governor was likely to be. But the vehement opposition of the Jews, together with his desire to be conveyed to Rome, might well induce him to claim a trial before the imperial court. After a while arrangements were made to carry Paul and certain other prisoners, in the custody of a centurion named Julius, into Italy; and amongst the company, whether by favor or from any other reason, we find the historian of the Acts. The narrative of this voyage is accordingly minute and circumstantial in a degree which has

a There never was any that understood the Old Testament so well as St. Paul, except John the Baptist, and John the Divine. . . . 0, he dearly loved Moses and Israel for they, together with king David, were the chief prophets. The sayings and things of St. Paul are taken out of Moses and the prophets "(Luther's Table Talk, cxxviii., Eng. Trans.). Another striking remark of Luther's may be added here: "Whose reads Paul have, with a safe conscience, build upon his words" (Table Talk, xxiii.).
excited much attention. The nautical and geographical details of St. Luke's account have been submitted to an appraising, though impressionistic, examination by several competent critics, especially by Mr. Smith of Jordanhill, in an important treatise devoted to this subject, and by Mr. Howson. The result of this investigation has been, that several errors in the received version have been corrected, that the course of the voyage has been laid down to a very minute degree with great certainty, and that the account in the Acts is shown to be written by an accurate pamphleteer, not himself a seaman, but well acquainted with nautical matters.

We shall hasten lightly over this voyage, referring the reader to the works above mentioned, and to the articles in this Dictionary on the names of places and the nautical terms which occur in the narrative.

The centurion and his prisoners, amongst whom Aristarchus (Col. iv. 19) is named, embarked at Cæsarea on board a ship of Adramyttium, and set sail for the coast of Asia. On the next day they touched at Sidon, and Julius began a course of kindly and respectful treatment by allowing Paul to go on shore to visit his friends. The westerly winds still usual at the time of year (late in the summer) compelled the vessel to run northwards under the lee of Cyprus. Off the coast of Cilicia and Pamphylia they would find northerly winds, which enabled them to reach Myra in Lycia. Here the voyagers were put on board another ship, which was come from Alexandria and was bound for Italy. In this vessel they worked slowly to windward, keeping near the coast of Asia Minor, till they came over against Cnidus. The wind being still contrary, the only course was now to run southwards, and the lee of Crete, passing the headland of Salamis. They then gained the advantage of a weather shore, and worked along the coast of Crete as far as Cape Matara, near which they took refuge in a harbor called Fair Havens, identified with one bearing the same name to this day.

It became now a serious question what course should be taken. It was late in the year for the navigation of those days. The fast of the day of expiring provisions drew near to the accustomed equinox, was past, and St. Paul gave it as his advice that they should winter where they were. But the master and the owner of the ship were willing to run the risk of seeking a more commodious harbor, and the centurion followed their judgment. It was resolved, with the concurrence of the majority, to make for a harbor called Phenice, sheltered from the S. W. winds, as well as from the N. W. (The passage βασίλειας κατὰ Αἴγια is rendered either "looking down the S. W." [Smith and Alford], or "looking towards the S. W." when observed from the sea and towards the land inclining it [Howson.]) [PHIENICE]. A change of wind occurred which favored the plan, and by the aid of a light breeze from the south they were sailing towards Phenice (now Latro), when a violent N. E. wind [EUROCLODYON] came down from the land (κατ' αὐτής, see Acts 27:11, note 29), caught the vessel, and compelled them to let her drive before the wind. In this course they arrived under the lee of a small island called Clauda, about 20 miles from Crete, where they took advantage of comparatively smooth water to get the boat or board, and to undergird, or frap, the ship. There was a fear lest they should be driven upon the Syrtis on the coast of Africa, and they therefore "lowered the gear," or sent down upon deck the gear connected with the mainmast, and the ship stood out to sea "with storm-sails set and on the starboard tack" (Smith). The bad weather continued, and the ship was lightened on the next day of her cargo, on the third of her house furniture and to tackling. For many days neither sun nor stars were visible to steer by, the storm was violent, and all began to despair of safety. The general discouragement was aggravated by the abstinence caused by the difficulty of preparing food, and the spoiling of it; and in order to raise the spirits of the whole company Paul stood forth one morning to relate a vision which had occurred to him in the night. An angel of the God "whom he was and whom he served" had appeared to him and said, "Fear not, Paul: thou must be brought before Cæsar; and behold, God hath given thee all them that sail with thee." At the same time he predicted that the vessel would be cast upon an island and be lost.

This shipwreck was to happen speedily. On the fourteenth night, as they were drifting through the sea [AIDEA], about midnight, the sailors perceived indications, probably the roar of breakers, that land was near. Their suspicion was confirmed by soundings. They therefore cast four anchors out of the stern, and waited anxiously for daylight to arrive, while the sailors lowered the boat with the purpose of laying out anchors from the bow, but intending to desert the ship, which was in imminent danger of being dashed to pieces. St. Paul, aware of their intention, informed the centurion and the soldiers of it, who took care, by cutting the ropes of the boat, to prevent its being carried out. He then addressed himself to the task of encouraging the ship company, and the lives of the whole of those on board would be preserved, and exhorting them to refresh themselves quietly after their long abstinence with a good meal. He set the example himself, taking bread, giving thanks to God, and beginning to eat in presence of them all. After a general meal, in which there were 276 persons to partake, they further lightened the ship by casting out what remained of the provisions on board (τῆς γεύσεως) which were understood to be the "wheat" which formed the cargo, but the other interpretation seems more probable). When the light of the dawn revealed the land, they did not recognize it, but they discovered a creek with a smooth beach, and determined to run the ship aground in it. So they cut away the anchors, imbosed the rudder-paddles, raised the foresail to the wind, and made for the beach. When they came close to it they

* * *

b We think the pronoun refers to the vessel and not to the island.

c The objections to supposing the ship's provisions to be meant here are that "wheat" (αὐτής) has not this specific sense elsewhere in the N. T.; that the provisions still left, after so long a voyage, would have little or no effect on the ship's draft; and that the ship's cargo was undoubtedly wheat, since the vessel was a merchant-vessel bound from Alexandria to Italy. Prof. Blunt (Coincidences, p. 226, f. Amer. ed.) has drawn out a striking confirmation of St. Luke's accuracy from the detached notices which refer to the nature of the ship's loading (comp. Acts xxvii. 6, 15, 29). See on this point Lechler's D. v. Apostelgeschichten in Lange's Bibelwerk, p. 410 (3rd Aufl. 1869).
Paul found a narrow channel between the land on one side which proved to be an islet, and the shore; and at this point, where the "two seas met," they succeeded in driving the fore part of the vessel fast into the chancy berth. The stern began at once to go to pieces under the action of the breakers; but escape was now within reach. The soldiers suggested to their commander that the prisoners should be effectually prevented from gaining their liberty by being killed, but the centurion, desiring to save Paul, stopped this proposition, and gave orders that those who could swim should cast themselves first into the sea and get to land, and that the rest should follow with the aid of such spars as might be available. By this creditable combination of humanity and discipline the deliverance was made as complete as St. Paul's assurances had predicted it would be.

The land on which they had been cast was found to belong to Malta. [Melita.] The very point of the stranding is made out with great probability by Mr. Smith. The inhabitants of the island received the wet and exhausted voyagers with no ordinary kindness, and immediately lighted a fire to warm them. This particular kindness is recorded on account of a curious incident connected with the story. The fire was helping to make the fire, and had gathered a bundle of sticks and laid them on the fire, when a viper came out of the heat, and fastened on his hand. When the natives saw the creature hanging from his hand they believed him to be poisoned by the bite, and said amongst themselves, "No doubt this man is a murderer, whom, though he has escaped from the sea, yet Vengeance suffers not to live." But when they saw no harm come of it they changed their minds and said that he was a god. This circumstance, as well as the honor in which he was held by Julius, would account for St. Paul being invited with some others to stay at the house of the chief man of the island, whose name was Publius. By him they were courteously entertained for three days. The father of Publius happened to be ill of fever and dysentery, and was healed by St. Paul; and when this was known many other sick persons were brought to him, and were healed. So there was a pleasant interchange of kindness and benefits. The people of the island showed the Apostle and his company much honor, and when they were about to leave bade them with such things as they would want. The Roman soldiers would carry with them to Rome a deepened impression of the character and the powers of the kingdom of which Paul was the herald.

After a three months' stay in Malta the soldiers and their prisoners left in an Alexandrian ship for Italy. They anchored at Syracuse, where they stayed three days, and at Rhegium, from which place they were carried with a fair wind to Puteoli, where they left their ship and the sea. At Puteoli they found 'literate;' but for it was an important place, and especially a chief port for the traffic between Alexandria and Rome; and by these brethren they were exhorted to stay awhile with them. Permission seems to have been granted by the centurion; and whilst they were spending seven days at Puteoli news of the Apostle's arrival was sent on to Rome.

The Christians at Rome, on their part, sent forth some of their number, who met St. Paul at Appii Forum and Ters Tertium; and on this first introduction to the Church at Rome the Apostle felt that his long desire was fulfilled at last—"He thanked God and took courage."  

St. Paul at Rome. — On their arrival at Rome the centurion delivered up his prisoners into the proper custody, that of the praetorian prefect. St. Paul was at once treated with all considerateness, and was allowed to dwell by himself with the soldier who guarded him. He was not released from this gallant annoyance of being constantly chained to a keeper; but every indulgence compatible with this necessary restraint was readily allowed him. He was now therefore free to preach the Gospel to them that were at Rome also; and proceeded without delay to act upon his rule—"to the Jew first." He invited the chief persons amongst the Jews to come to him, and explained to them that though he was brought to Rome to answer charges made against him by the Jews in Palestine, he had really done nothing dishonorable to his nation or the Law, nor desired to be considered as hostile to his fellow-countrymen. On the contrary, he was in earnest for maintaining that the "hope of Israel" had been fulfilled. The Roman Jews replied that they had receivcd no tidings to his prejudice. The set of which he had implied he was a member they knew to be everywhere spoken against; but they were willing to hear what he had to say. It has been thought strange that such an attitude should be taken towards the faith of Christ by the Jews at Rome, where a flourishing branch of the Church had existed for some years; and an argument has been drawn from this representation against the authenticity of the Acts. But it may be accounted for without violence from what we know and may probably conjecture. (1.) The Church at Rome consisted mainly of Gentiles, though it must be supposed that they had been previously for the most part Jewish proselytes. (2.) The real Jews at Rome had been persecuted and sometimes entirely banished, and their unsettled state may have checked the contact and collision which would have been otherwise likely. (3.) St. Paul was possibly known by name to the Roman Jews, and curiosity may have persuaded them to listen to him. Even if he were not known to them, here, as in other places, his courteous bearing and strong expressions of adhesion to the faith of his fathers would win a hearing from them. A day was therefore appointed, on which a large number came expressly to hear him expound his belief; and from morning till evening he bare witness of the kingdom of God, persuading them concerning Jesus, both out of the Law of Moses and out of the prophets. So the Apostle of the Gentiles had not yet learnt the original Apostolic institution. The hope of Israel was still his subject. But, as of old, the reception of his message by the Jews was not favorable. They were slow of heart to believe, at Rome as at Pisidian Antioch. The judgment pronounced by Isaiah was come, Paul testified, upon the people. They had made themselves blind and deaf and gross of heart. The Gospel must be proclaimed to the Gentiles, amongst whom it would
had a better welcome. He turned therefore again to the Gentiles, and for two years he dwelt in his own hired house, and received all who came to him, proclaiming the kingdom of God and teaching concerning the Lord Jesus Christ, with all confidence, no man forbidding him.

These are the last words of the Acts. This history of the planting of the kingdom of Christ in the world brings us down to the time when the Gospel was openly proclaimed by the great Apostle in the Gentile capital, and stops short of the mighty convulsion which was shortly to pronounce that kingdom established as the Divine commonwealth for all men. The work of St. Paul belonged to the preparatory period. He was not to live through the time when the Son of Man came in the destruction of the Holy City and Temple, and in the throes of the New Age. The most significant part of his work was accomplished when in the Imperial City he had declared his Gospel "to the Jew first, and also to the Gentiles." But his career is not abruptly closed. Before he himself fades out of our sight we have a number of letters preserved in the New Testament, letters written by himself, which contribute some particulars to his external biography, and give us a far more precise insight into his convictions and sympathies.

Period of the Letter Epistles. — We might naturally expect that St. Paul, tied down to one spot at Rome, and yet free to speak and write to whom he pleased, would pour out in letters his love and anxiety for distant churches. It seems entirely reasonable to suppose that the author of the extant epistles wrote very many which are not extant. To suppose this, aids us perhaps a little in the difficult endeavor to contemplate St. Paul's epistles as living letters. It is difficult enough to connect in our minds the writing of these epistles with the external conditions of a human life: to think of Paul, with his incessant chain and soldier, sitting down to write or dictate, and producing for the world an inspired epistle. But it is almost more difficult to imagine the Christian communities of those days, samples of the population of Macedonia or Asia Minor, receiving and reading such letters. But the letters were actually written; and they must of necessity he accepted as representing the kind of communications which marked the intercourse between the Apostle and his fellow-Christians. When he wrote he wrote out of the fullness of his heart; and the ideas on which he dwelt were those of his daily and hourly thoughts. To that imprisonment to which St. Luke has introduced us,—the imprisonment which lasted for such a tedious time, though tempered by much indulgence,—belongs the noble group of letters to Philippien, to the Colossians, to the Ephesians, and to the Philippians. The thought of the Apostle was fresh at one time and sent by the same messengers. Whether that to the Philippians was written before or after these, we cannot determine; but the tone of it seems to imply that a crisis was approaching, and therefore it is commonly regarded as the latest of the four.

St. Paul had not himself founded the Church at Colossae. But during his imprisonment at Rome he had for an associate — he calls him a "fellow-prisoner" (Phil. ii. 22) — a chief teacher of the Colossian church named Epaphras. He had thus become deeply interested in the condition of that church. It happened that at the same time a slave named Onesimus came within the reach of St. Paul's teaching, and was converted into a zealous and useful Christian. This Onesimus had run away from his master; and his master was a Christian of Colossae. St. Paul determined to send back Onesimus to his master; and with him he determined also to send his old companion Tychicus (Acts xxi. 4) as a messenger to the church at Colossae, and to neighboring churches. This was the occasion of the letter to Philemon, which commended Onesimus, in language of singular tenderness and delicacy, as a faithful and beloved brother, to his injured master; and also of the two letters to the Colossians and Ephesians. [PHILEMON, EPISTLE TO] That to the Colossians, being drawn forth by the most special circumstances, may be reasonably supposed to have been written first. It was intended to guard the church at Colossae from false teaching, which the Apostle knew to be infecting it. For the characteristics of this epistle, we must refer to the special article. [COLOSSIANS, EPISTLE TO THE.] The end of it (iv. 7-18) names several friends who were with St. Paul at Rome, as Aristarchus, Luke, and Demas. For the writing of the Epistles to the Ephesians, there seems to have been no more special occasion, than that Tychicus was passing through Ephesus. [EPHESIANS, EPISTLE TO THE.] The highest characteristic which these two epistles, to the Colossians and Ephesians, have in common, is that of a presentation of the Lord Jesus Christ, fuller and clearer than we find in previous writings, as the Head of creation and of mankind. All things created through Christ, all things coherent in Him, all things reconciled to the Father by Him, the eternal purpose to restore and complete all things in Him,—such are the ideas which grew richer and more distinct in the mind of the Apostle as he meditated on the Gospel which he had been preaching, and the truths implied in it. In the Epistle to the Colossians this divine headship of Christ is maintained as the safeguard against the fancies which filled the heavens with secondary divinities, and which laid down rules for an artificial sanctity of men upon the earth. In the Epistle to the Ephesians the eternity and universality of God's redeeming purpose in Christ, and the gathering of men unto Him as his members, are set forth as gloriously revealed in the Gospel. In both, the application of the truth concerning Christ as the image of God and the Head of men to the common relations of human life is dwelt upon in detail.

The Epistle to the Philippians resembles the Second to the Corinthians in the effusion of personal feeling, but differs from it in the absence of all soreness. The Christians at Philippi had regarded the Apostle with love and reverence from the beginning of his labors, had given him hearty proofs of their affection. They had now sent him a contribution towards his maintenance at Rome, such as we must suppose him to have received from time to time for the expenses of his own hired house." The bearer of this contribution was Epaphroditus, an ardent friend and fellow-laborer of St. Paul, who had fallen sick on the journey, or at Rome (Phil. ii. 27). The epistle was written to be conveyed by Epaphroditus on his return, and to express the joy with which St. Paul had received the kindness of the Philippians. He dwells, therefore, upon their fellowship in the work of spreading the Gospel, a work in which he was even now laboring and scarcely with the less effect on account of his
bonds. His imprisonment had made him known, and had given him fruitful opportunities of declaring his Gospel amongst the Imperial guard (i. 15), and even in the household of the Cesar (iv. 22). He professes his unimpaired sense of the glory 392 of piety, and his approaching time in which the Lord Jesus should be revealed from heaven as a deliverer. There is a generous tone running through this epistle, expressive of humility, devotion, kindness, delight in all things fair and good, to which the favorable circumstances under which it was written gave a natural occasion, and which helps us to understand the kind of opening which had taken place in the spirit of the writer. [PHILIPPIANS, EPISTLE TO THE.]

In this epistle St. Paul twice expresses a confident hope that before long he may be able to visit the Philippians in person (i. 25, tης τ. Α. 24, περιοδική κ. τ. Α.). Whether this hope was fulfilled or not, belongs to a question which now presents itself to us, and which has been the occasion of much controversy. According to the general opinion, the Apostle was liberated from his imprisonment and left Rome soon after the writing of the letter to the Philippians, spent some time in visits to Greece, Asia Minor, and Spain, returned again as a prisoner to Rome, and was put to death there. In opposition to this view it is maintained by some, that he was never liberated, but was put to death at Rome at an earlier period than is commonly supposed. The arguments adduced in favor of the common view are, (1) the Lopes expressed by St. Paul of visiting Philip (already named) and Colossae (Phil. 22); (2) a number of allusions in the Pastoral Epistles, and their general character; and (3) the testimony of ecclesiastical tradition. The arguments in favor of the single imprisonment appear to be wholly negative, and to aim simply at showing that there is no proof of a liberation, or departure from Rome. It is contended that St. Paul's expectations were not always realized, and that the passages from Phil. (1. 8. 13) and Philippians are effectually neutralized by Acts xx. 25, "I know ye all at Ephesus: shall see my face no more," inasmuch as the supporters of the ordinary view hold that St. Paul went again to Ephesus. This is a fair answer. The argument from the Pastoral Epistles is met most simply by a denial of their genuineness. The tradition of ecclesiastical antiquity is affirmed to have no real weight.

The decision must turn mainly upon the view taken of the Pastoral Epistles. It is true that there are many critics, including Wieseler and Dr. Davidson, who admit the genuineness of these epistles, and yet by referring 1 Timothy and Titus to an earlier period, and by strained explanations of the allusions in 2 Timothy, get rid of the evidence they are generally understood to give in favor of a second imprisonment. The voyages required by the two former epistles, and the writing of them, are placed within the three years spent chiefly at Ephesus (Acts xx. 31). But the hypothesis of voyages during that period not recorded by St. Luke is just as arbitrary as that of a release from Rome, which is objected to expressly because it is arbitrary; and such a distribution of the Pastoral Epistles is shown by overwhelming evidence to be untenable. The whole question is discussed in a masterly and decisive manner by Alford in his Prolegomena to the Pastoral Epistles. If, however, these epistles are not accepted as genuine, this is a question of little moment, for the imprisonment is cut away. For a special consideration of the epistles, let the reader refer to the articles on Timothy and Titus.

The difficulties which have induced such critics as De Wette and Ewald to reject these epistles, are not inconceivable, and will force themselves upon the attention of the careful student of St. Paul. But they are overpowered by the much greater difficulties attending any hypothesis which assumes these epistles to be spurious. We are obliged, therefore, to recognize the modifications of St. Paul's style, the developments in the history of the church, and the movements of various persons, which have appeared suspicious in the epistles to Timothy and Titus, as nevertheless historically true. And when without enquiring on the domain of conjecture, we draw the following conclusions: (1) St. Paul must have left Rome, and visited Asia Minor and Greece; for he says to Timothy (1 Tim. i. 3), "I besought thee to abide still at Ephesus, when I was setting out for Macedonia." After being once at Ephesus, he was propersing to go there again (1 Tim. iv. 13), and he spent a considerable time at Ephesus (2 Tim. i. 18). (2) He paid a visit to Crete, and left Titus to organize churches there (Titus i. 5). He was intending to spend a winter at one of the places named Nicopolis (Tit. iii. 12). (3) He travelled by Miletus (2 Tim. iv. 20), Troas (2 Tim. iv. 13), where he left a cloak or case, "and some books, and Corinth (2 Tim. iv. 20). (4) He is a prisoner at Rome, suffering unto bonds as an evil-doer" (2 Tim. i. 9), and expecting to be soon condemned to death (2 Tim. iv. 6). At this time he felt deserted and solitary, having only Luke, of his old associates, to keep him company: and he was very anxious that Timothy should come to him without delay from Ephesus, and bring Mark with him (2 Tim. i. 15, iv. 16, 9-12).

The facts may be explained by probable additions from the ordinary tradition. There are strong reasons for placing the three epistles at as advanced a date as possible, and not far from one another. The peculiarities of style and diction by which these are distinguished from all his former epistles, the affectation of antiquity of an old man, and the changes frequently thrown back on earlier times and scenes, the disposition to be hortatory rather than speculative, the references to a more complete and settled organization of the Church, the signs of a condition tending to moral corruption, and resembling that described in the apocalypse letters to the seven Churches — would induce us to adopt the latest date which has been suggested for the death of St. Paul, so as to interpret as much time as possible between the Pastoral Epistles and the former group. Now the earliest authorities for the date of St. Paul's death are Luke and Jerome, who place it, the one (Chronic. A.D. 2063) in the 15th, the other (Cyc. Script. I. c.) in the 14th year of Nero. These dates would allow some four or five years between the

There is no conclusive reason for adopting one seem more than the other.
Dionysius, possibly the most ancient of the Christian writers, referred to Paul as "our dearly beloved son." 

Letter to his "dearly beloved son" Timothy: and though he expresses a confident expectation of his speedy death, he yet thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 6), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and "the Lord stood by him and strengthened him," and gave him a favorable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel.

This epistle, surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. For what remains, we have the concurrent testimony of ecclesiastical antiquity, that he was beheaded at Rome, about the same time that St. Peter was crucified there. The earliest allusion to the death of St. Paul is in that sentence from Clemens Romanus, already quoted, ἐν τῷ τέμπε πὸς δίδωμι καὶ ἐν τῷ δούσαι, and that before his martyrdom he went εἰς τό τέμπε τὸς δίδωμι. It is probable, but can hardly be said to be certain, that by this expression, "the god of the west," Clement was describing Spain, or some country yet more to the west. The next testimony labors under a somewhat similar difficulty from the imperfection of the text, but at least names unambiguously a "profectionem Pauli ab urbe Spadana profectissimam." This is from Muratori's Fragment on the Canon (Routh, Rec. Sac. iv. p. 1-12). (See the passage quoted above, Wescott. West. Muratori, Script. Fig. p. 556, &c., or, Alford, iii. p. 93.) Afterwards Chrysostom says simply, Μετὰ τὸ γένεσθαι εἰς Ρωμαίον, παῖς ἐν τῷ Χριστῷ ἁλθεῖν (on 2 Tim. iv. 20); and Jerome speaks of St. Paul as set free by Nero, that he might preach the Gospel of Christ "in Oceandum quosque partibus" (Cat. Script. Eccl. "Paulus"). Against these assertions nothing is produced, except the absence of allusions to a journey to Spain in passages from some of the fathers where such allusions might more or less be expected. Dr. Davidson (Intro. New Test. iii. 15, 84) gives a long list of critics who believe in St. Paul's release from the first imprisonment. Wieseler (p. 521) mentions some of these, with references, and adds some of the more eminent German critics who believe with him in but one imprisonment. These include Schader, Hensen, Winzer, and Baur. The only English name of any weight to be added to this list is that of Dr. Davidson.

We conclude then, that after a wearing imprisonment of two years or more at Rome, St. Paul was set free, and spent some years in various journeys eastwards and westwards. Towards the close of this time he pours out the warnings of his less vigorous but still brave and faithful spirit in the letters to Timothy and Titus. The first to Timothy and that to Titus were evidently written at very nearly the same time. After these were written, he was apprehended again and sent to Rome. As an eminent Christian teacher St. Paul was now in a far more dangerous position than when he was first brought to Rome. The Christians had been exposed to popular odium by the false charge of being concerned in the great Neronian conflagration of the city, and had been subjected to a most cruel persecution. The Apostle appears now to have been treated, not as an honorable state-prisoner, but as a felon (2 Tim. ii. 9). But he was at least allowed to write this Second Letter to his "dearly beloved son." Timothy: and though he expresses a confident expectation of his speedy death, he yet thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 6), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and "the Lord stood by him and strengthened him," and gave him a favorable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel.

This epistle, surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. found in Stanley's *Corinthians* (Introd. to 2 Cor.); and an account of the whole work, with references to the studies of Schillenbaum and Kaur, in Gieseker, *Ecc. Hist.* 1:53.

**Chronology of St. Paul's Life.**—It is usual to distinguish between the internal or absolute, and the external or relative, chronology of St. Paul's life. The former is that which we have hitherto followed. It remains to mention the points at which the T. I. history of the Apostle comes into contact with the outer history of the world. There are two principal events which serve as fixed dates for determining the Pauline chronology—the death of Jesus, which marks the end of the Jewish dispensation, and of these the latter is by far the more important. The time of this being ascertained, the particulars given in the Acts enable us to date a considerable portion of St. Paul's life. Now it has been proved almost to certainty that Felix was recalled from Judea and succeeded by Festus in the year 60 (Wies. pp. 66, &c.; Conybeare and Howson, n. note C). In the autumn, then, of A.D. 60, St. Paul was on his way to Tarsus. In the spring of 61 he arrived at Rome. There he lived two years, that is, till the spring of 63, with much freedom in his own hired house. After this we depend upon conjecture: but the Pastoral Epistles give us reason, as we have seen, for deducing the Apostle's death until 67, with Eusebius, or 68, with Jerome. Similarly we can go backwards from A.D. 60. St. Paul was two years at Cæsarea (Acts xxiv. 27); so therefore he arrived at Jerusalem on his last visit by the Paroecost of 58. Before this he had wintered at Corinth (Acts xx. 2, 3), having gone from Ephesus to Greece. He left Ephesus, then, in the latter part of 57, and as he stayed 3 years at Ephesus (Acts xx. 31), he must have come thither in 54. Previously to this journey he had spent some time at Antioch (Acts xiii. 25), and our chronology becomes indeterminate. We can only add together the time of a lusty visit to Jerusalem, the travels of the great second missionary journey, which included 1 year at Corinth, another indefinite stay at Antioch, the important third visit to Jerusalem, another "long" residence at Antioch (Acts xiv. 28), the first missionary journey, again an indefinite stay at Antioch (Acts xii. 25) until we come to the second visit to Jerusalem (Acts xvi. 10-11), and perhaps the apocryphal Acts Pauli et Theclas (concerning which see also Conybeare and Howson, i. 197). They all agree in ascribing to the Apostle a short stature, a long face with high forehead, an aquiline nose, close and prominent eyebrows. Other characteristics mentioned are baldness, gray eyes, a clear complexion, and a winning expression. Of his temperament and character St. Paul is himself the best judge. His speech and action towards us, as we read them, the truer impressions of those qualities which helped to make him The great Apostle. We perceive the warmth and ardor of his nature, his deeply affectionate disposition, the tenderness of his sense of honor, the courtesy and personal dignity of his bearing, his perfect fearlessness, his heroic endurance; we perceive the rare combination of subtle tenderness, and the;-tenacity in his intellect; we perceive also a practical wisdom which we should have associated with a cooler temperament, and a tolerance which is seldom united with such impetuous convictions. And the principle which harmonized all these endowments and directed them to a practical end was, beyond dispute, a knowledge of Jesus Christ in the Divine Spirit. Personal allegiance to Christ as to a living Master, with a growing insight into the relation of Christ to each man and to the world, carried the Apostle forwards on a straight course through every vicissitude of personal fortunes and amidst the various habits of thought which he had to encounter. The conviction that he had been entrusted with a Gospel concerning a Lord and Deliverer of man was so sustained and purified his love for his own people, whilst it created in him such a love for mankind that he only knew himself as the servant of others for Christ's sake.

A remarkable attempt has recently been made by Professor Jowett, in his Commentary on some of the epistles, to qualify what he considers to be the blind and undiscriminating admiration of St. Paul, by representing him as having been, with all his excellences, a man of "peaceable and unoffensive speech and deportment," of "decided though not over bold" personality, of "simple and unaffected manners," of "a true Christian spirit" and "a man of peace with a steady and firm determination to have his cause carried.
of Christendom. Those who judge St. Paul as they would judge any other remarkable man confess him unanimously to have been "one of the greatest spirits of all time:" whilst those who believe him to have been appointed by the Lord of mankind, and inspired by the Holy Ghost, to do a work in the world of almost unexampled importance, are lost in wonder as they study the gifts with which he was endowed for that work and the sustained devotion with which he gave himself to it.

Modern Authorities. — It has not been thought necessary to load the pages of this article with references to the authors about to be mentioned, because in each of them it is easy for the student to turn at once to any part of St. Paul’s life or writings with regard to which he may desire to consult them. A very long catalogue might be made of authors who have written on St. Paul, amongst whom the following may be recommended as of some independent value. In English, the work of Messrs. Conybeare and Howson, on the Life and Epistles of St. Paul, is at once the most comprehensive and the most popular. Amongst Commentaries, those of Professor Jowett on the Epistles to the Thessalonians, Galatians, and Romans, and of Professor Dr. M. Lewin on the Galatians and Ephesians, are expressly designed to throw light on the Apostle’s character and work. The general Commentaries of Dean Alford and Dr. Wordsworth include abundant matter upon everything relating to St. Paul. So does Dr. Davidson’s Introduction to the New Testament, which gives also in great profusion the opinions of all former critics, English and foreign. Paley’s well-known Horae Pauline; Mr. Smith’s work on the Interpreter and Skewerg Writings of St. Paul (3d ed. 1890); Mr. Tate’s Continuous History of St. Paul; and Mr. Lewin’s St. Paul, are exclusively devoted to Pauline subjects. Of the older works by commentators and others, which are thoroughly sifted by more recent writers, it may be sufficient to mention a book which had a great reputation in the last century, that of Lord Lyttelton on the Conversion of St. Paul. Amongst General histories and histories of the following is named: Ewald, in his Geschichte des Volkes Israel, vol. vi. and his Grundzüge des Apostolischen Lebens; Wieseler, Chronologie des Apostolischen Zeitalters, which is universally accepted as the best work on the chronology of St. Paul’s life and times; De Wette, in his Einleitung and his Evangelisches Handbuch; Nennder, Pflanzung und Leitung der Christ. Kirche; works on Paulus, by Baur, Hinzen, Schneider, Schneckenburger; and the Commentaries of Olshausen, Meyer, etc. In French, the work of Salvador on Jesus Christ et sa Doctrine, in the chapter "St. Paul et l’Eglise," gives the view of a modern Jew; and the Discours sur St. Paul, by M. de Pressensé, are able and eloquent.

J. L. D.

* The literature under Acts (see especially Amer. ed.) pertains largely to the history of Paul. Luke’s narrative in the Acts may be read with new interest in the later and more accurate translations (Bible Union, Noyes, Alford). Stier’s Reden des Apostel is now translated by G. H. Venable, The Words of the Apostles, etc. (Edinb. 1869), one of the series of Clark’s Foreign Theol. Library. For extended sketches of the life and teachings of Paul the reader may see Dr. Schaff’s History of the Apostolic Church, ch. li. (see also Macdonald’s History of the three principal Sibyls, l. 245 ff. and li. 10-104; and Dr. William Smith’s New Test. Hist. Irony, pp. 249-256, Amer. ed. Among the recent treatises or works may be mentioned Paulus der Apostel, by J. P. Lange, in Herzog’s Real-Enzyklop. xi. 238-248; Paulus, by H. Besser, author Of Die Bibelanthropie, in Zeller’s Bibl. Würteb. ii. 344-342; Lewin’s Paulus der Apostel (Lond. 1893), in part for the chronology. Ch. J. Trip, Paulus der Apostelgeschicht (Leiden, 1862), a prize essay; J. R. Oertel, Paulus in der Apostelgesch., etc. (Halle a. S. 1868), showing the historical character of the Pauline portions; Howson, Hulsean Lectures for 1852 on The Character of St. Paul (2d ed. Lond. 1864); Scenes from the Life of St. Paul (Bost. 1867); The Metaphors of St. Paul (Lond. 1868), reprinted In The Theological Eclectic vols. iv. & v.; Die Apostelgeschichte in Bildschönheit (i.-xxxiii.) ausgeg. von Karl Gerok, 2 vols. (1868); Th. Binney, Lectures on St. Paul: his Life and Ministry (Lond. 1896), popular and practical; A. Hausrat, Der Apostel Paulus (Heidelberg. 1865); F. Banger, Saint Paul, sa vie, sa pensée et ses écrins (Paris, 1895); Renan, Saint Paul (Paris, 1895); Paulus Cassel, Die geschichte des Altars zu Altarem (Berlin, 1897), able, but in correctly assumes Paul’s object to be anti-paganistic not anti-Jewish.

PAUL

associations, and it was among their special fitnesses for the apostleship. Had they been more catholic in their tolerance, and broader in their sympathies, they would have hesitatingly allotted their fellow-countryman, and would thus have been left without any point of support for propagation among the Gentiles. It was their continued devotion to the law and ritual of their fathers, that won for them not an imperious heart, even from the very Pharisees, that enabled them to preach Christ in the synagogues, and that obtained for the new religion in ancient cities the liberty of which, restricted as it was and nowhere irrevocable, had cost Judaism several generations of untenderly and unnecessarily. Thus it was ordained that the heavenly exotic should gain richness and strength, should reach forth boughs of ample shade and sufficing fruitfulness, before it should be severed from the parent trunk, and left without support to the winds and storms of a hostile world.

But the hour had arrived when the more vigorous vitality of the younger plant could no longer find nourishment in its parasitic condition; and Paul was the appointed agent for the essential and predetermined separation. In his mind, and under his administration, Christianity was first required and treated as independent and sovereign. Under him grew up the organization, by which it was then brought to assume its own offices, to discharge its mulcted task, and to overshadow and supplant the growths of uncounted ages. This bold and delicate mission demanded not alone devotion and zeal, not alone intimate converse with the mind of Christ. He to whom it was intrusted needed a profound acquaintance with Judaism as it then was, its traditions and its philosophy, in order that the separation might be effected, on the one hand, without leaving the least radical or fibre of the transplanted stock in the ancient soil, and on the other, without marring the venerable, though effete majesty of the tree which God had in the earlier ages planted for the healing of the nations, and whose branches he had made strong for himself. For this work there was also requisite a thorough knowledge of those extra-Judaic religions and philosophies which were in conflict with the growth of Christianity, but each of which, by the germs of truth which it embodied, might offer special vantage-ground for the faith of the spiritual Judaism. It was fitting, too, that the chief agent in this divine enterprise should have become familiar with the customs, prejudices, needs, and susceptibilities of the so many and diverse nations that were to be sheltered and led by the same "tree of life." Above all, there were required for this movement a weight of character and a regency of influence which could command respect and constraining attention, a sanctity of life beyond the shadow of reproach, and dialectic and rhetorical faculties which needed not to shrink from the encounter with the subtlety of the schools or the eloquence of the popular assembly.

If Paul had no superior, hardly an equal among men, he was no more than level with his work. We cannot but regard him as the first man of his age, and we can name no man of any age who seems to us greater than he. Indeed, apart from the intrinsic character of Christianity and the internal evidence of its records, there seems to us no stronger proof of the authenticity of those records and the divine origin of their contents, than the simple fact that Paul—who lived so near the birth-time of the religion, when imposture could have been held back or denied its rent away, and who of all men was the least likely to have been deceived by false shows or borne headlong by baseless enthusiasm—was a Christian.

His training for his Work.—Let us pass in review his providential training for his great life-work: for God always "makes up his jewels," and those that are to glow with the purest lustre in his coronet are always ground, polished, and set by the agency of lesser spirits in that ingenuity and association best adapted to develop in each the peculiar traits of the divine beauty and glory which it is designed to mirror to the world.

At the Christian era there was not a spot on earth so well fitted as Tarsus, for the nurture of him to whom that once world-renowned city now owes the survival of its very name in the popular memory. Its site and surroundings must have taken an early and strong hold on a mind like his, and have helped to generate the fervor, the glow, the torrent-like rush of thought, the vivid imagination, the overcharged intensity of emotion manifested in his writings. The city lay on a richly variegated plain of unsurpassed fertility. In its rear rose the lofty, bold, snow-crowned cliffs of Mount Taurus, piled against the northern sky, the summits of which cast down mists upon the plain up their mist-wreaths to meet the ascending sun, and arresting midway his declining path. From these cliffs, clear as crystal, made deathly cold even in midsummer by the melting snow, tumbled rather than flowed the Cydnus, over perpetual rapids, and frequent waterfalls of unsurpassed beauty and grandeur hardly paralleled on the Eastern Continent, till only as it approached the city it became tractable to the ox, and navigable thence to the great sea. In full sight of the city lay the vast Mediterranean, the ocean of the Old World, whitened with the sails of a multitudinous commerce, now serene as a land-locked lake, and then lashed into commotion wild and grand as that with which the Atlantic breaks upon its shores. This discipline of valley, mountain, river, and sea, was well adapted to make the persuasive power of his discourses elastic, to stretch to their utmost capacity the extensor muscles of the inner man, to form habits of rapid thought and sightlike intuition.

Then, as regarded Paul's training for the cosmopolitan life for which he was destined, Tarsus was the metropolis of eastern travel and commerce. Nowhere else except in Rome was there so free a commingling of people from every quarter of the civilized world, or so favorable a position for acquiring an intimacy with a broad diversity of languages, habits, customs, and opinions. The city was a microcosm in its population. The native barbarian stock was depressed, yet little changed by immigration. The descendants of an early Greek colony held the foremost places of wealth and social influence, rivaled by a host of officials and mercantile residents from Rome; while, separated from both by faith and ancestral customs, but mingling with them in all the departments of active life, were large numbers of the Hebrew race, whose migratory instincts were already fulfilling the ancient prophecy of their dispersion among all nations. Tarsus was also celebrated as a seat of learning, taking precedence, at that epoch, of Athens which was then losing, and of Alexandria which had not yet attained the supremacy in
PAUL

mental culture. [Tarsus.] That Paul had enjoyed a liberal culture under Grecian auspices is evident from the freedom and fluency of his style, from his repeated classical allusions and quotations, and from his dialectic acumen and skill.

From Tarsus Paul was probably removed at an early age to his native Judaea and that part of Arabia where his education was thorough and perfect, his teacher's name alone is ample warrant. Gamaliel was the most learned Jew of his age, and was reckoned among the seven in the long series of Rabbis, who were honored with the title of Rabbin, equivalent to "Most Excellent Master." It is a saying of the Talmud, that "the glory of the Law ceased at his death." Of course, of course, a Hasidus, and as such, not only held in reverence the entire canon of the Old Testament, but attached even greater importance to oral tradition, and to the (so-called) religious writings in the then vernacular dialect; so that through him Paul gained access to the distinctive opinions and mental habits of the sect with which he was afterwards brought into so frequent collision, and from whose members he knew how to gain a favorable reception. Undoubtedly Paul may have learnt from Gamaliel the lessons that made him a persecutor of the infant church. The Rabbi's prudent counsel in the case of Peter does not show that he was tolerant of reputed error. That counsel secured as much of the fox as of the dove, and, taken by itself, it only indicates a deep insight into the springs of human action, and a shrewd perception of what would have been the surest way of exterminating Christianity, had it been indeed, as he supposed it, a base-born superstition. There is extant a prayer of Gamaliel against unbelievers, which shows that he relied implicitly on the divine vengeance for the work of destruction from which he dissuaded his fellow-countrymen. We attach no little importance to Paul's education and experience as a persecutor. It must have taught him tolerance, generosity, magnanimity toward his opponents. We accordingly find him using the language, not of harsh condemnation, but of conciliation, tenderness, pity toward the unconverted Jews, evidently maintaining a strong fellow-feeling with them, never forgetting that he had been honestly and fervently what they still were. Under the same influence we see him more than just towards rival Christian teachers, rejoicing in whatever good work they wrought for the common cause, and acknowledging the loyalty to their master, and the successful propaganda of those who "added affliction to his bonds" (Philip. i. 16).

His social Position. — There is reason to believe that St. Paul's social position in early life was above mediocrity. He inherited from his father the citizenship of Rome. A Jew, or a native of Tarsus, he had obtained this, not only by purchase, or in reward of distinguished services. If in the former way, the cost was larger than a poor man could have paid, or one in an obscure position would have cared to offer; if in the latter, the implication of a prominent and influential social standing is still more direct and certain. A similar inference might be drawn from the high, though cruel, official eminence and trust confided to him by his fellow-countrymen before his conversion. It is worthy of remark, also, that alike in Judea, before Festus, Felix, and Agrippa, on his voyage to Rome, and while permitted to live in his own hired house during his detention in Rome, he was uniformly treated as a prisoner of distinction. Nor is our conclusion from these facts invalidated by his trade as a tent-maker; for it was customary for Jewish youth, of whatever condition in life, to learn some form of handicraft. We do not allude to this point because the mere excellence of birth or birth-attaches to him the slightest preeminence above his colleagues from the fishing-boats on the Galilean Lake. But he lived at a period when the lines of social distinction were sharply drawn, and had not begun to be blended by the Gospel of human brotherhood, and whatever advantage of position he possessed must have opened to him avenues of influence which were closed against the original Apostles, and must have won for him larger freedom of access to the persons of exalted station, and even royal dignity, before whom he was often permitted to plead the cause of Christ. Then too, the higher his position, the larger was his service in joining the company of unlettered rustics and fishermen, and bearing with them the reproach of the despised Nazarene. Yet more, the further he was removed from the condition of those who might be disposed to lose him by becoming Christians, the more improbable is his conversion on any theory of naturalism; the stronger the certainty that he had a vision of the Saviour on the way to Damascus, and was miraculously called to the apostleship.

However this may be, we cannot be mistaken in assigning a prominent place among his qualifications to his high-bred courtesy, — to his possession in an eminent degree of the traits belonging to that much abused, yet choice designation, a gentleman, — the highest style of man; — for even the Christian is but half regenerated, when the grace of God has not its outflowing in gentleness, courtesy, and kindness in the whole intercourse of life. These traits are everywhere manifest in him. His style of address before high official personages is free equally from sycophancy and from rudeness, betraying alike the tact of a highly accomplished man, and the dignity of a Christian. In his epistles there is a pervading grace of manner, indicating at once the politeness of a loving heart, and familiarity with the most becoming modes of expressing that politeness. His very rebukes are conciliatory. He prepares the way for needed censure by merited praise. He conveys unpalatable truth at once with considerate gentleness and with unmistakable explicitness. He shows equal delicacy in the reluctance of asking and the grateful acknowledgment of favors. His numerous salutations are gracefully diversified in form, and sometimes strikingly beautiful. His epistle to Philadelphia grows upon our admiration, when we compare it with the most courtly models of epistolary composition, ancient and modern. It was by this perfect urbanity that he became all things to all men, studying the molla temporis, the fit opportunities and methods of access, and presenting the great truths of religion in the form best suited to disarm opposition and conciliate respect.

Paul as an Orator. — Let us now consider some of St. Paul's qualities as an orator and a writer. In estimating his genius as an orator, we cannot forget what he tells us of the impediments in the way of his success. He cites those who speak of his bodily presence as mean, and his voice as contemptible; and there are traditions, undoubtedly authentic, of his having been a little, bald-headed man, with nothing in his outward aspect to in-
Paul, the Apostle, was esteemed with especial regard. This may have been the case, and his oratory had for this only the more winning and commanding efficacy. The lack of physical gifts is often a source of added power to sound full of grace, beauty, and emotional thoughts.

We have a deformed dwarf rise before a vast audience, in which at the outset the prestige of a distinguished reputation could not suppress the blended feeling of pity and aversion, and in a few moments he has obtained a purchase upon that audience which would have been denied to manly strength or beauty: for to their apprehension that dwarf said that he knew a huge terrier, and, by breath and fire, and that pure body seems a human frame no longer, but a conductor of successive thunder-strokes of fervid emotion from soul to soul. So too, we have heard a slender, harsh, shrill, or unmanageable voice, when the vehicle of brilliant thought or profound feeling, rise into an eloquence as far above all rhetorical rules as it was wide of them, so that we have almost forgotten that there were words and have felt as if there were the silent infusion of sentiment which we can imagine as superseding the need and use of language between unembodied spirits.

We can conceive of Paul's personality as pithy and unassuming, yet as irradiated in composure, mien, and gesture, transfigured, glorified by the vividness of his conceptions, the intensity of his zeal, the ecstasy of his devotion. His voice, too, may have been such as no artificial training could have made melodious or effective; yet it must have surged and swelled, grown majestic in intonation and rhythm, trembled with deep emotion, risen into grandeur, as he spoke of Christ and of heaven, and have struck the sweetest chords under the inspiration of the cross. A soul like his could have assimilated the meanest apparatus of bodily organs to its own intense and noble vitality, could have become transparent through the most opaque medium, and have made itself protrude even with a stammering tongue or in a barbarous dialect.

The prime element of an orator's efficiency is his character. His own soul is his chief instrument. What he can accomplish can never transcend the measure of what he is. His words and gestures are but small multifidians, of which his mass of naked character is the undivided mass of his orator, the greatest and most efficient orator of his age, because he was the greatest and best man of his age, — because the question that mounted to his lips when he rose from the lightning-flash that closed his onward vision to open the inward eye to the realm of spiritual truth, "Lord, what wilt thou have me to do?" was therefore the question of his life, because from that moment he "confessed not with flesh and blood," but only with the spirit of the living God, — because his whole vast nature was consecrated by an indefeasible Corban to the service of Christ and the salvation of men.

Next to the power of personal character, the orator needs complete mastery of his subject and his position. We need not say how thoroughly Paul was master of his subject, how his resources leaped up from schools of philosophy, from travels in many lands, from vast and varied experience, were all so transmuted into spiritual truth, that, though one of the most learned men upon earth, he literally "knew nothing but Jesus Christ, and Him crucified." At the same time, no man can ever have been more entirely the master of his position. He analyzes an assembly at first sight, discerns at once where and how to strike, what there is in the condition of his hearers that may be made subservient to his purpose, how favor may be conciliated without a sacrifice of integrity, how the false believer or the sinner may be reconverted or condemned on his own ground. He understands the rare art of so dividing an indifferent or unfriendly audience, as to draw over to his own side those who have any points of affinity with himself, however remote. Thus, in a mixed assembly in Jerusalem, he wins a patient hearing from the Pharisees, by putting foremost in his speech what was nearest to their hearts, at the resurrection of the dead (Acts xxi. 6 f.).

The most noteworthy instance of his skill in the management of a specific audience is to be found in his discourse at Athens. We need not enlarge on this topic here. It may suffice to refer the reader to Lake's report of the speech itself (Acts xvii. 22-31), and to the account of the circumstances of its delivery and of its wise adaptation to the Apostle's object, which has been given in a previous article (Mans Hill, Amer. ed.).

Paul as a Writer. — We pass to notice some of this Apostle's characteristics as a writer. Among these we would name as most prominent the singular union, throughout the greater part of his epistles, of strong reasoning and vivid emotion. He is severely logical, and at the same time full of intense feeling. The keener shafts of his logic are forged in the red heat of fervent devotion; his most glowing utterances of piety are often argumentative in their form; and some of those rapturous dogmatiae that break the continuity of his discourse occur in the midst of polemical discussions on minutest and abstract points of Christian doctrine and duty.

St. Paul is often charged with obscurity. Much of this alleged obscurity results from the indifference of readers to the occasion on which each separate epistle was written, and the purpose which the writer had in view. Any letters, read as his generally are, would be obscure; for epistles are always to be interpreted in great part by the circumstances to which they owe their origin. In the case of Paul's writings, these circumstances are in whole or in part to be determined, or at least suggested, with the strongest show of probability, from the comparison of their text with the parallel history of the Acts of the Apostles and with other sources of information concerning the communities and persons to whom the epistles were severally addressed.

Another source of obscurity in these writings, obviated, however, in careful study, consists in St. Paul's use of Greek particles. No author makes more profuse and at the same time more discriminating use of particles than he; and whether a reader shall trace the continuity of his discourse, or shall see only abrupt transitions and trackless involutions of thought, depends very much on the degree of his acquaintance with the Pauline use of particles, connectives, and those delicately organized combinations, prepositions, and adverbs which confuses and bewilders where it does not guide. Moreover, the mere classical scholar is at fault as to these particles; for Paul often uses particles (as well as other words) in accordance, not with Greek, but with Hebrew idioms, — in the acceptance in which they are employed by the writers of the Septuagint.

There is, however, a sense in which St. Paul's
writings are involved and desultory. His sentences are absolutely loaded down with meaning. He condenses in a single period exceptions, qualifications, subsidiary thoughts, cognate ideas, which have an ordinary length, into a few moments of paragraph. His digressions are, indeed, frequent: but they are always forays into a rich country which he lays under a heavy tribute: and he uniformly returns to his starting point, resumes the thread of his discourse, and never drops a discussion till he has brought it to a satisfactory close. He always has a definite purpose in view, and advances steadily in its pursuit, without a perversion of argument and illustration indeed, but all of it pertinent, all of it tending to raise the reader to his own lofty point of vision, and to inspire him with his own profound feeling of the infinite truths and immortal hopes which are the life-tide of his being.

St. Paul's rhetoric is as perfect as his logic. He never forgets the proportion which style should bear to the subject of discourse. He fills out more completely than any other writer extant Cicero's definition of the eloquent man,—is, qui poterit parvi sermonis, modicit temperata, magna gravitu, dicere. How many are the passages in his writings, which in their blended beauty and majesty transcend the power of imitation, and distance all efforts of human genius hardly more in the divine inspiration than in his soul than in the mere instrumentality of phrase and diction,—in the burning words that clothe the God-breathed thoughts! Was there ever a moral portraiture that could be compared with his delineation of charity? As trait after trait drops from his pen, the grace of love grows and spreads till it takes into its substance the whole of life, the whole of character, all relations, all obligations,—till, like the child in the apocalyptic vision, the earth-born virtue is caught up into God and to his throne, and we feel that it must indeed outlast faith and hope, constituting the very essence of the heavenly life,—superseding the dishonest reasonings and base philosophy of this world, so that knowledge in its wonted processes shall cease,—becoming its own interpreter from spirit to spirit, so that tongues shall fall and men shall love as they love among God's love. Or we might refer to that sublime chapter on the resurrection, in which the Apostle takes his stand by the broken sepulchre of the lieadcrman, at the foot of the rock which the angel rolled away, plants the ladder reaching from earth to heaven, and on rungs that are massive day-beams of the resurrection morning, leads up his tried and persecuted converts to those celestial heights where the corruptible is clothed in incorruption,—where goes forth forever the shout of triumph, "O death, where is thy sting? O grave, where is thy victory?"

Value of Paul's Epistles. — It remains for us to speak of the importance of the epistles of St. Paul as a portion of the Christian canon. But in entering on this subject we cannot deny that they have been a most copious fountain of false doctrine. There has never been a heresy so absurd, or a vagary so wild, as not to resort for its proofs, chiefly, to this portion of the sacred volume. This, however, has been due to two fundamental errors as to the interpretation of the Pauline epistles. The first is a misapprehension of their nature and uses. They have been regarded as primary and independent treatises on Christian theology, rather than as writings of specific purpose and limited application. The phraseology by which St. Paul characterized and related ephemeral crudities and follies, and which is closely circumscribed in meaning by the history of the times, has been prolixely extended into the eternal proportions. His contemptuous estimate of the heartless routine of an effete ritual has been extended to the fundamental laws of personal and social duty, and Antinomians of the foulest type have justified their abominations by the very terms in which he calculated a faith which makes men virtuous, in opposition to a ceremonial law which left them unredeemed infants. In fact, his epistles have not as the commentaries of a divinely inspired man on the original and complete revelation through Christ, but as a supplementary revelation of paramount magnitude and moment. Thus, instead of tracing principles in their authoritative applications, men have transmuted the applications into principles. Even where no grave falsity or error has resulted from this source, it has tended to render the terminology of religion harmfully technical and complex, and to obscure the simple beauty of the truth as it fell from the Saviour's lips, by incorporating with it words and phrases which derived their origin and their sole fitness from conditions of the Jewish and Pagan mind that have long since passed into oblivion.

Another source of error from these epistles has been the habit of apristolical interpretation,—the treatment of separate sentences, and fragments of sentences, as if they were complete in themselves, without needing to be modified by the context. No writings extant are so little adapted as St. Paul's to this mode of interpretation. They contain comparatively few independent sentences, isolated sentences, statements not contingent for a portion of their meaning on what precedes or follows them. A sentence taken by itself is more likely to denote the opposite of what the writer meant by it, than it is to present his meaning with any good degree of definiteness and accuracy. He often traces out his adversary's line of argument, or assumes his postulates, in order to demonstrate the falsity of his inferences from them. He sometimes holds an imaginary colloquy with an object of his own imagining, a thing which has no being, and then exposes it, without indicating to the careless reader that he is not giving utterance to his own thoughts; and in some instances he regards the statement of a falsity as its sufficient refutation,—as virtually a redactio ad absurdum.

In treating of the uses of St. Paul's epistles, we would first refer to the essential place they hold among the evidences of Christianity. They at once establish their own genuineness, and furnish ample confirmation of the authenticity of the historical books of the New Testament. They bear unmistakable tokens of their having been written by the very Paul who appears as the chief historical personage in the Acts of the Apostles; and our conclusion in favor of their genuineness is constantly confirmed by the disinterestedness of minute, latent, manifestly undesign'd coincidences in the epistles with statements in the Acts, and with the results of historical and archeological research. Indeed, the Pauline origin of the greater part of these epistles is generally acknowledged even by the most skeptical of critics, and, when called in question, is disputed on grounds unappreciable to a mind of ordinary perspicuity. Now these epistles imply, at the time when they were written, the existence of precisely the condition of things that must have
Finally, these epistles are invaluable to us, and to Christians of every age, as embodying decisions, guided by the inspiration of God, on momentous questions of Christian ethics, and thus as a collateral interpretation of the mind of Christ as conveyed to us in the Gospels. They bear toward the Gospels very much the same relation that is borne to the Constitution of the United States by the recorded decisions of those judges who were intimately conversant with the views, aims, and purposes of its founders. To the Christian Church Jesus gave its constitution in its teachings and his life. But from the very nature of the case there were few or no decisions of mooted points under that constitution prior to his ascension; for the church cannot be said to have existed before the day of Pentecost. In Paul we have a judge on whom the spirit of the Master rested, and who held for many years the foremost place in the ecclesiastical administration. To him were brought for adjudication numerous subjects of doubt and controversy, and his decisions remain on record in his epistles. The questions of those earlier ages have indeed long since passed away: but strictly analogous questions, depending on the very same principles for their solution, are constantly recurring. The heart's inmost experiences, needs, and cravings are the same in America in the nineteenth century that they were in Europe and Asia in the first; and in Paul's epistles we have an inexhaustible repertory of instruction, admonition, edification, and comfort for our several conditions and emergencies as the called of Christ and the heirs of many.

PEARL

Numidia, and concludes that the "Aves Numidiæ" (Guinea Fowl) are meant; which birds, however, in spite of their name, never existed in Numidia, nor within a thousand miles of that country! There can be no doubt that the Hebrew word is of foreign origin. Gesenius (Thes. p. 1502) cites many authorities to prove that the travei is to be traced to the Tamil or Malabarese togi, or peacock; which opinion has recently been confirmed by Sir E. Tennyson (Ceylon, ii. 102, and i. pp. 3d ed.), who says, "It is very remarkable that the terms by which these articles (ivory, apes, and peacocks) are designated in the Hebrew Scriptures are identical with the Tamil names, by which some of them are called in Ceylon to the present day, tuckiam may be recognized in togi, the modern name for these birds." Thus Kell's objection, "that this supposed togi is not yet itself sufficiently ascertained" (Comment. on 1 K. x. 22), is satisfactorily met. A

Peacocks are called "Persian birds" by Aristophanes, Aves, 484; see also Acharns, 63; Didot. Sic. i. 53.

Peacocks were doubtless introduced into Persia from India or Ceylon; perhaps their first introduction dates from the time of Solomon; and they gradually extended into Greece, Rome, and Europe generally. The ascription of the quality of vanity to the peacock is as old as the time of Aristotle, who says (Hist. An. i. 1, § 13), "Some animals are jealous and vain like the peacock." The A. V. in Job xxxix. 13 speaks of "the goosly wings of the peacock;" but this is a different Hebrew word and has undoubtedly reference to the ostrich.

W. H.

PEARL (גֶבִי, ḡambil: ḡabîṣ: eminentive). The Hebr. word occurs, in this form, only in Job xviii. 18, where the price of wisdom is contrasted with that of ḡamilah ("coral") and ḡambil, and the same word, with the addition of the syllable of (גֶבִ), is found in Ez. xiii. 11, 13, xxxviii. 22, with obâh, "stones." So stones of ice, the ancient version, nothing contribute by way of explanation. Schulz (Comment. in Job, l. c.) leaves the word untranslated: he gives the significi- nation of "pearls" to the Hebrew term περλικα (A. V. "rubies") which occurs in the same verse. Gesenius, Fürst, Rosenmüller, Maunz, and commentators generally, understand "crystal" by the term, on account of its resemblance to ice. Lee (Comment. on Job, l. c.) translates ḡambil "things high and massive." Carey renders ḡambil by "mother-of-pearl," though he is by no means content with this explanation. On the whole the balance of probability is in favor of "crystal," since ḡambil denotes "ice" (not "halstones," as Carey supposes, without the addition of obâh, "stones") in the passages of Ezekiel where the word occurs. There is nothing to which lee can be so well compared as to crystal. The objection to this interpretation is that crystal is not an article of much value; but perhaps reference may here be made to the beauty and pure lustre of rock crystal, or this substance may by the ancient Orientals have been held in high esteem.

PEDAIAH (פֶדַיָּה), however, are frequently mentioned in the N. T.: comp. Matt. xiii. 45, 46, where the kingdom of heaven is likened unto "a merchant-man seeking goodly pearls." Pears

formed part of women's attire (1 Tim. ii. 9; Rev. xvii. 4). "The twelve gates" of the heavenly Jerusalem were twelve pearls (Rev. xxi. 21); perhaps "mother-of-pearl" is here more especially intended.

Pearl Oyster.

Pears are found inside the shells of various species of Mollusca. They are formed by the deposit of the numerous substance around some foreign body as a nucleus. The Unio margaritiferus, Mytilus edulis, Ostrea edulis, of our own country, occasionally furnish pearls; but "the pearl of great price" is doubtless a fine specimen yielded by the pearl oyster (Ariolus margaritiferus) still found in abundance in the Persian Gulf, which has long been celebrated for its pearl fisheries. In Matt. vii. 6 pearls are used metaphorically for anything of value; or perhaps more especially for "wise sayings," which in Arabic, according to Schultens (Huicri Cumae, c. 12, ii. 102), are called pearls. (See Parkhurst, Gr. Lex. s. v. Μαργαρίτης. As to קֶרֶךֶּק, see Rubies.)

W. I.

PEDAHEL (פְדַאל; [whom God delivers]): פְדוֹדָאָל: Pehdela. The son of Ammihad, and prince of the tribe of Naphtali (Num. xxviii. 28); one of the twelve appointed to divide the land west of Jordan among the nine and a half tribes.

PEDAHZUR (פְדַהְזוּר [the rock, i.e. God delivers]): פְדוֹאָצַוֲּר: Pehd asbestos, and so Alex. in v. 54: Pehdahzur. Father of Gamaliel, the chief of the tribe of Manasseh at the time of the Exodus (Num. i. 10, ii. 20, vii. 54, 59, x. 23).

PEDAIÁTH [3 syll. פְדָיָת [whom Jeho- roth delivers]: פְדוֹדָאָל: Comp. פְדוֹדָאָל: Phedaias]. 1. The father of Zebubah, mother of king Jehoishim (2 K. xiii. 56). He is described as "of Ramah," which has not with certainty been identified.

2. (Phedaias; [Vat. Phedaias; in ver. 19, Vat. Alex. Σαλαθίλια;) The brother of Salathiel, or Shealtiel, and father of Zerubbabel, who is usually called the "son of Shealtiel," being, as Lord A. Hervey (Genealogies, p. 100) conjectures, in reality, his uncle's successor and heir, in consequence

a The Hebrew names for apes and ivory are clearly traceable to the Sanskrit; but though togie does not appear in Sanskrit, it has been derived from the Sanskrit word σάλιθον, meaning furnished with a crot (Max Müller, Science of Language, p. 190).
of the failure of issue in the direct line (1 Chr. iii. 17–19).

3. Pekahiah. Son of Parosh, that is, one of the family of that name, who assisted Jehoshaphat in repairing the walls of Jerusalem (Neh. iii. 25).

4. Pekahiah. Apparently a priest; one of those who stood on the left hand of Ezra, when he read the Law to the people (Neh. viii. 4). In 1 Esd. ix. 44, he is called Pekahiah.

5. Pekahiah [Vat. Φιλα. Φαλα.]. A Benjamite, ancestor of Sallu (Neh. xi. 7).

6. Pekahiah [Vat. Φαιλαχα]. A Levite in the time of Nehemiah, appointed by him one of the "treasurers over the treasury," whose office it was "to distribute unto their brethren" (Neh. xiii. 13).

7. Pekahiah. The father of Joel, prince of the half tribe of Manasseh in the reign of David (1 Chr. xxvii. 20).

PEEK. In Is. viii. 19, x. 14 (A. V.), is used in the sense of to chirp, or to utter a feeble, shrill sound, like that made by young birds on breaking from the shell (Lat. pipio, Germ. pipen). The wizards or necromancers that pretended to evoke the spirit of God, in the despised spoken in the low shrill tones which, according to the popular superstition, belonged to the inhabitants of the underworld: see Gesenius or Rosenmüller on Is. viii. 19, and comp. Is. xxix. 4, where the word translated "whisper" (marg. "peep, or chirp") is the same which is rendered "peek" in the two passages referred to above.

PEKHAIH (πεκαχαί). [Vat. Ιεραμίακ. Ges.; oversight, First: Φακέας: Φακέας, Joseph. Philoche.), son of Remaliah, originally a captain of Pekahiah king of Israel, murdered his master, seized the throne, and became the 18th sovereign (and last but one) of the northern kingdom. His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah; and if so, he furnishes an instance of the same undaunted energy which distinguished, for good or evil, so many of the Israelis who sprang from that country, of which Jephthah and Elijah were the most famous examples (Stanley, S. d. P. "2:27). It is said that he was the conqueror of Israel and Judah and that he ruled in both as far as the sea of Egypt (vii. 5), and that he strengthened the power of his dynasty by his policy, which was to make his kingdom strong by making it as strong as the weakest of its enemies. The history of his action is given in the summary of the narrative of his reign in the "Book of the Kings," which is the last composition of the ancient history of Israel, and which is therefore the last that is of any importance in the history of this period. The history of the war, which is sketched under Ahaz, is found in 2 K. xv. 20 and 2 Chr. xxviii.; and in the latter (ver. 6) we read that Pekahiah slew in Judah one hundred and twenty thousand in one day, which were all valiant men, a statement which, even if we should be obliged to diminish the number now read in the text, from the uncertainty as to numbers attaching to our present MSS. of the books of Chronicles (Amrah, Chronicles; Kennicott, Hebrew Text of the Old Testament Considered, p. 532), proves that the character of his warfare was in full accordance with Gideonite precedents (Judg. xi. 22, xii. 6). There is one passage of the chronicles of Pekahiah in 2 K. xv. 32, which, under the cover of an allusion to the prophecies in Isaiah vii.–ix., gives us the capture of the Jewish port of Edath on the Red Sea; but the unmartial alliance of Damascus and Samaria was punished through the final overthrow of the ferocious confederates by Tidgath-pileser, king of Assyria, whom Ahaz called to his assistance, and who seized the opportunity of adding to his own dominions and crushing a union which might have been dangerous. The kingdom of Damascus was finally suppressed, and Rezin put to death, while Pekahiah was deprived of at least half of his kingdom, including all the northern portion, and the whole district to the east of Jordan. For though the writer in 2 K. xv. 29 tells us that Tidgath-pileser took Ijon, and Aelia leth-nehachlah, and Achelam and Amath, and Kezib, and Arbel, and Jabalah, and the lands of Naphatah, etc. (ver. 26), after comparing 1 Chr. v. 26, we find that Gilead must include the "Lebennites, and the Gadites, and half the tribe of Manasseh." The inhabitants were carried off, according to the usual practice, and settled in remote districts of Assyria. Pekahiah himself, now fallen into the position of an Assyrian vassal, was of course compelled to abstain from further attacks on Judah. Whether his continued tyranny exhausted the patience of his subjects, or whether his weakness emboldened them to attack him, we do not know: but, from one or the other cause, Hoshea the son of Elah conspired against him and put him to death. Josephus says that Hoshea was his friend (φιλεμίου τινος ἐπιμονεύοντος ἀντίστροφος ἀντίγκρατος ἰδιότητας ἱστορίας, Ant. I. I. 13, § 4). Comp. Is. vii. 10, which prophecy Hoshea was instrumental in fulfilling. (Hoshea.) Pekahiah ascended the throne n. c. 757. He must have begun to war against Judah n. c. 740, and was killed n. c. 737. The order of events above given is according to the scheme of Ewald's Geschichte des Volkes Israel, vol. iii. p. 602. Mr. Rawlinson (Somn. Lectures for 1859, Lect. iv.) seems wrong in assuming two invasions of Israel by the Assyrians on Pekahiah's successor, from 2 K. xiv. 20, the other to 2 K. xvi. 7–9. Both these narratives refer to the same event, which, in the first place, is mentioned briefly in the short sketch of Pekahiah's reign, while, in the second passage, additional details are given in the longer biography of Ahaz. It would have been scarcely possible for Pekahiah, when deprived of half his kingdom, to make an alliance with Israel, and to attack Ahaz. We learn further from Mr. Rawlinson that the conquests of Tidgath-pileser are mentioned in an Assyrian fragment, though there is a difficulty, from the occurrence of the name Musahom in the inscription, which may have proceeded from a mistake of the engraver. Comp. the title, son of Khasha, assigned to Jeho in another inscription; and see the lines of Berossus, 25 of the Mon. Trans. L. v. This account is transferred from Pekahiah's alliance with Rezin, his government was no improvement, morally and religiously, on that of his predecessors. G. F. L. C.
PEKOD, the 17th king of the separate kingdom of Israel. After a brief reign of scarcely two years, a conspiracy was organized against him by "one of his captains" (probably of his body guard), Pekah, son of Remaliah. He murdered him and his friends Argob and Airiab, and seized the throne. The date of his accession is c. 759, of his death 757. This reign was no better than those which had gone before, and the calf-worship was retained (2 K. xv. 22-26).

G. E. L. C.

PEKOD (תֶּקֹד, see below) an appellative applied to the Chaldeans. It occurs only twice, namely, in Jer. i. 21, and Ez. xxii. 23, in the latter of which it is connected with Shoa and Ko≈, as though these three were in some way subdivisions of "the Babylonians and all the Chaldeans." Authorities are undecided as to the meaning of the term. It is apparently connected with the root mikød, "to visit," and in its secondary senses "to punish," and "to appoint a ruler;" hence Pekod may be applied to Babylon in Jer. i. as significant of its impending punishment, as in the margin of the A. V., "visitation." But this sense will not suit the context of verse, and Jones, who assigns here assigns to it the meaning of "profet" (Thes. p. 1121, as though it were but another form of "προφήτης"). It certainly is unlikely that the same word would be applied to the same object in two totally different senses. Hitzig seeks for the origin of the word in the Sanskrit bhratru, "noble," —Shoa and Ko≈ being respectively "prince" and "lord," and he explains its use in Jer. i. as a part for the whole. The LXX. treats it as the name of a district (Φελθιτης: Alex. Phleud). In Ezekiel, and as a verb (προφητεύω) in Jeremiah.

W. L. B.

PELAIJAH (3 syl.) (תֵּלְאִיא, [whom Jehovah distinguishes]). 1. (Phaleia: Vat. Φαλεία; Alex. Φαλέα: Phleiti)). A son of Elloivo, one of the last members of the royal line of Judah (1 Chr. iii. 24).

2. (LXX. om. in Neh. viii.; Φαλέα: Vat. FA.1 omit.; Alex. [FA.2] Φαλεία: Phleiti.) One of the Levites who assisted Ezra in expounding the law (Neh. viii. 7). He afterwards sealed the covenant with Nehemiah (Neh. x. 10). He is called Hilaas in 1 Esdr. iv. 48.

PELA'IAH (תֵּלְיָא, [Jehovah divides]). Φαλεία: [Vat. FA.1 omit. Φελθεία]. The son of Azni, and ancestor of Adaias a priest at Jerusalem after the return from Babylon (Neh. xi. 12).

PELAT'IAH (תֵּלְאָד, [Jehovah delivers]). Φαλείτια: [Vat. Φαλείτια; Alex. Φαλειτία: Pheliti)]. I. Son of Hanniah the son of Zerubabel (1 Chr. iii. 21). In the LXX. and Vulg. he is further described as the father of Jehoiada. 2. (Φαλείτια [Vat.-tei]; Alex. Φαλείτια). One of the captains of the marauding band of five hundred Simeonites, who in the reign of Hezekiah made an expedition to Mount Seir and smote the fugitive Amalekites (1 Chr. iv. 42).

3. (Φαλείτια: [FA.1 Φαλείτια; Vat. Φαλείτια; Φαλειτία: Phleiti)].) One of the heads of the people, and probably the name of a family, who sealed the covenant with Nehemiah (Neh. x. 22).

4. (תֵּלְיָד, [whom Jehovah distinguishes]). Φαλείδια: [Vat.1 in ver. 1, Φαλέιδια: Phleiti)]. The son of Beniah, and one of the princes of the people against whom Ezekiel was directed to utter the words of doom recorded in Ez. xi. 5-12. The prophet in spirit saw him stand at the east gate of the Temple, and, as he spoke, the same vision showed him Pekahiah's sudden death (Ez. viii. 18).

PELE (תֶּלֶב), [stream, division]; Φαλείτια, [Alex. Φαλείτια]; in 1 Chr. i. 25, Vat. [Φαλείτια: Pheliti]). A son of Elber, and brother of Joktan (Gen. x. 25, xi. 16). The only incident connected with his history is the statement that "in his days was the earth divided" — an event which was embodied in his name, Pekod meaning "division." This notice refers, not to the general dispersion of the human family subsequently to the Deluge, but to a division of the family of Eber himself, the younger branch of whom (the Joktanids) migrated into southern Arabia, while the elder remained in Mesopotamia. The occurrence of the name Phalei for a town at the junction of the Chaboras with the Euphrates is observable in consequence of the remark of Winer (Reibel), that there is no geographical name corresponding to Pekod. At the same time the late date of the author who mentions the name (Isidorus of Charax) prevents any great stress being laid upon it. The separation of the Joktanids from the sires who had hebrewbrews, finds a place in the Mesopotamian, as marking an epoch in the age immediately succeeding the Deluge.

W. L. B.

PELET (תֵּלֶת, [deliverance]; Φαλέα, [Alex. Φαλέα: Phlethi]). I. A son of Jahdai in an obscure genealogy (1 Chr. ii. 47).

2. (Φαλέατ: Alex. Φαλέατ: Phlethi). The son of Azuaveth, that is, either a native of the place of that name, or the son of one of David's heroes. He was among the Benjamites who joined David in Ziggab (1 Chr. xii. 3).

PELETHITES (תֵּלֶית, [neighbourness]; Φαλέαθι, [Alex. Φαλέαθι: Phleiti]). I. The father of On the Reubenite, who joined Dathan and Abiram in their rebellion (Num. xvi. 1). Josephus (Ant. iv. 2, § 2), omitting all mention of On, calls Pethth Φαλέαθι apparently identifying him with Phaleu the son of Reuben. In the LXX. Petheth is made the son of Reuben, as in the Sana. text and version, and one Heb. MS. supports this rendering.

2. (Vat. [Φαλέαθι]: Phlethi). Son of Jonathan and a descendant of Jerahmeel through Onam, his son by Atarah (1 Chr. ii. 33).

PELE'THITES (תֵּלֶית, [neighbourness]; Φαλέαθι, [Alex. Φαλέαθι: Phleiti]). Mentioned only in the phrase תֵּלֶית לוֹ, rendered in the A. V. "the Cherethites and the Pelethites." These two collectives designate a force that was evidently David's body-guard. Their names have been supposed either to indicate their ducal, or a gentile, origin. Gesenius renders them "executioners and runners," comparing the תֵּלֶית לוֹ, "executioners and runners" of a later time (2 K. x. 19); and the unused roots תֵּלֶית and תֵּלֶית, as to both of which we shall speak later, admit this sense. In favor of this view, the supposed parallel phrase, and the duties in which these guards were employed, may be cited. On the other hand, the LXX. and Vulg. retain their names untranslated,
and the Syriac and Targ. Jun. translates them differently from the rendering above and from each other. In one place, moreover, the Gittites are mentioned with the Cherethites and Pelethites among David's troops (2 Sam. xv. 18); and elsewhere we read of the Cherethites, who bear the same name in the plural, either as a Philistine tribe or as Philistines themselves (1 Sam. xxv. 14; Ez. xxv. 16; Zeph. ii. 5). Gessner objects that David's body-guard would scarcely have been chosen from a nation so hateful to the Israelites as the Philistines. But it must be remembered that David in his later years may have mistrusted his Israelite soldiers, and relied on the Philistine troops, some of whom, with Httai the Gittite, who was evidently a Philistine, and not an Israelite from Gath (1 Ttta), were faithful to him at the time of Absalom's rebellion. He also argues that it is impossible that two synonyms amongst battle-names should be thus used together; but this is on the assumption that both names signify Philistines, whereas they may designate Philistine tribes. (See Thes. pp. 719, 1107.)

The Egyptian monuments throw a fresh light upon this subject. From them we find that kings of the XIXth and XXth dynasties had in their service mercenaries of a nation called shayretana, which Ramesses III. conquered, under the name "shayretana of the Sea." This king fought a naval battle with the torkaiare, who were evidently, from their physical characteristics, a kindred people to them, and to the Pelestatu, or Philistines, also conquered by him. The Torkaiare and the Pelestatu both wear a pecudar dress. We thus learn that there were two peoples of the Mediterranean kindred to the Philistines, one of which supplied mercenaries to the Egyptian kings of the XIXth and XXth dynasties. The name shayretana, of which the first letter was also pronounced KH, is almost letter for letter the same as the Hebrew Cherethim; and since the shayretana were evidently cognate to the Philistines, their identity with the Cherethim cannot be doubted. But if the Cherethites supplied mercenaries to the Egyptian kings in the thirteenth century B.C., according to our reckoning, it cannot be doubted that the same name in the designation of David's body-guard denotes the same people or tribe. The Egyptian shayretana of the sea are probably the Tretan. The Pelethites, who, as already remarked, are not mentioned except with the Cherethites, have not yet been similarly traced in Egyptian geography, and it is rash to suppose their name to be the same as that of the Philistines.

For, as Gessner remarks, this contraction is not possible in the Semitic language. The similarity, however, of the two names would favor the idea which is suggested by the mention together of the Cherethites and Pelethites, that the latter were of the Philistine stock as well as the former. As to the etymology of the names, both may be connected with the migration of the Philistines. As already noticed, the former has been derived from the root למש, "he cut, cut off," in Niphal "he was cut off from his country, driven into exile, or expelled," so that we might as well read "exiles" as "executioners." The latter, from למש, an unused root, the Arab. لمش, "he escaped, fled," both being cognate to למש, "he was smooth," thence "he slipped away, escaped, and caused to escape," where the rendering "the fugitives" is at least as admissible as "the runners." If we compare these two names so rendered with the gentile name of the Philistine nation itself, למש, "a wanderer, stranger," from the unused root למש, "he wandered or emigrated," these previous inferences seem to become irresistible. The appropriateness of the names of these tribes to the duties of David's body-guard would then be accidental, though it does not seem unlikely that they should have given rise to the adoption in latter times of other appellations for the royal body-guard, definitely signifying "executioners and runners." If, however, למש meant nothing but executioners and runners, it is difficult to explain the change to למש(ו). R. S. P.

The name pelican is derived from the root סכ, for סכ, "the pelican," "a pebble," "a pebble," "a bird," from סכ, "to stick up the goad in the desert," "to keep the way for the desert wanderer," or "to make a wandering road" (Is. xxvii. 14). The etymology of the name, from a word meaning "to vomit," lends also to the same conclusion, for it doubtless has reference to the habit which this bird has of pressing its under mandible against its breast, in order to assist it to dispose of the contents of its capacious pouch for its young. This is, with good reason, supposed to be the origin of the false about the pelican feeding its young with its own blood, the red nail on the upper mandible serving to complete the delusion.

The expression "pelican of the wilderness" has, with no good reason, been supposed by some to prove that the bird cannot be denoted by this bird. Shaw (Trav. ii. 363, 380 ed.) says, "the pelican must of necessity starve in the desert," as it is essentially a water bird. In answer to this objection, it will be enough to observe that the term

a Hirschfeld, Anim. Anim., 281. 282. 410. 414. In this work are some wild fancies about the pelican, which serve to show the state of zoology etc., at the period in which the author lived.

b See Introduction to the Text, p. 308.
PELONITE

Pelicanus onocrotalus, (lean) and the P. *crispus* are often observed in Palestine, Egypt, etc. Of the latter Mr. Tristram observed an immense flock swimming out to sea within sight of Mount Carmel (Ibid. i. 37).\(^a\)

W. H.

PELONITE. THE (\(\text{πηλωνίτης}\)) [see below]: \(\text{δ Φελωνίς} [\text{Vat.-reg}], \text{Alex. ο Φαλλωνίς}, \text{1 Chr. xi. 27: δ Φαλωνίς}, [\text{Vat. F.A. ο Φαλωνίς}], \text{1 Chr. xi. 36: δ Φαλωνίς}, [\text{Comp. δ Φαλωνίς}], \text{1 Chr. xxvii. 10: Φαλωνίτης, Φαλωνίται, Φαλωνίταις}]\n
Two of David's mighty men, Helez and Ahijah, are called Pelonites (1 Chr. xi. 37, 36). From 1 Chr. xxvii. 10, it appears that the former was of the tribe of Ephraim, and "Pelonite" would therefore be an appellation derived from his place of birth or residence. But in the Targums of R. Joseph it is evidently regarded as a patronymic, and is rendered in the last mentioned passage "of the seed of Pelon." In the list of 2 Sam. xxiii. Helez is called (ver. 20) "the Pelonite," that is, as Kitto observes, cf. Beth-Paleth, or Beth-Phleth, in the south of Judah. But it seems probable that "Pelonite" is the correct reading. [See Paltite.]

"Ahijah the Pelonite" appears in 2 Sam. xxiii. 34 as "Eliah the son of Ahithophel the Gilonite," of which the former is a corruption; "Ahijah" forming the first part of "Ahithophel," and "Pelonite" and "Gilonite" differing only by Π and Π. If we follow the LXX. of 1 Chr. xxi. the place from which Helez took his name would be of the form Φαλωνίς, but there is no trace of it elsewhere, and the LXX. must have had a differently pointed text. In Heb. "peloni" corresponds to the Greek ο Φαλωνίς, "such a one." It still exists in Arabic and in the Spanish Don Fulano, "Mr. So-and-so." W. A. W.

PEN. [Writing.]

PENTIEL (\(\text{πέντιελ}\); Samar. \(\text{πέντι} \ έλ\) [see below]: \(\text{ταίς θεὸς} \ Φηλωνίς, \text{and so also Pešhit}.\)

The name which Jacob gave to the place in which he had wrestled with God: "He called the name of the place 'Face of El,' for I have seen Elōhin face to face" (Gen. xxxii. 30). With that singular correspondence between the two parts of this narrative which has been already noticed under MAHNAIM, there is apparently an allusion to the bestowal of the name in xxviii. 10, where Jacob says to Esau, "I have seen thy face as one sees the face of Elōhin." In xxviii. 31, and the other passages in which the name occurs, its form is changed to PÆNUEL. On this change the lexicographers throw no light. It is perhaps not impossible that Penuel was the original form of the name, and that the slight change to Peliel was made by Jacob or by the historian to suit his allusion to the circumstance under which the patriarch first saw it. The Samaritan Pentateuch has Penuel in all. The pronunciation of the Παις-Σλαχων, on the coast of Syria above Beirut, was formerly called Thamugad, probably a translation of Penuel, or its Phoenician equivalent. G.

PENIN'NAH (\(\text{πενιν} \ ον\) [coral]: Φηνινά: Pheneus), one of the two wives of Elkanah, the other being Hannah, the mother of Samuel (1 Sam. i. 2).

* PENKNIJFE (Jer. xxxvi. 23). [KNIFE.]

PENNY, PENNYWORTH. In the A. V., in several passages of the N. T., "penny," either alone or in the compound "pennyworth," occurs as the rendering of the Greek ὁπανογιος, the name of the Roman denarius (Matt. xx. 2, xxii. 19; Mark vi. 37, xii. 15; Luke xx. 24; John vi. 7; Rev. vi. 6). The denarius was the chief Roman silver coin, from the beginning of the coinage of the city to the early part of the third century. Its name continued to be applied to a silver piece as late as the time of the earlier Byzantines. The states that arose from the ruins of the Roman

\(^a\) As a matter of fact, however, the pelican, after having filled its pouch with fish and mollusks, often does retire miles inland away from water, to some spot where it consumes the contents of its pouch.

\(^b\) *P. crispus* breeds in vast numbers in the flat plain of the Dobrudzeha (in European Turkey); its habits there bear out your remark of the pelican retiring inland to digest its food." - H. B. Tristram.
PENTATEUCH, THE

empires imitated the coinage of the imperial mints, and in general called their principal silver coin the denarius, whereas the French name denier and the Italian denaro. The chief Anglo-Saxon coin was the obolus, and many are the parts of the human body: of the latter they make 365, which is the number of days in the year, and also the number of veins in the human body. According

to the Jews are bound to the observance of 613 precepts: and in order that these precepts may be perpetually kept in mind, they are wont to carry a piece of cloth four square, at the four corners of which they have fringes consisting of 8 threads above, 2 long, and 5 knots. These fringes are called "teflon", a word which in numbers denotes 608; add to this the 8 threads and the 5 knots, and we get the 613 precepts. The five knots denote the five books of Moses. (See Raph, Talmon, J. weesht, sect. 3; Malmaison, Pref. to Jed Ha-Chatzakah; Lusden, Philok. p. 53.) Both Philo (de Abraham., ad init.) and Josephus (c. Apion. i. 8) recognize the division now current. As no reason for this division can satisfactorily be found in the structure of the work itself, Vaihinger supposes that the symbolic meaning of the number 613 represents the total of the first three and the three complements or perfection, as we see in the ten commandments [and so in Genesis we have ten "generations"], and therefore five is a number which as it were confuses imperfection and prophetic completion. The Law is not perfect without the Prophets, for the Prophets are in a special sense the bearers of the Promise; and it is the Promise which completes the Law. This is questioned. There can be no doubt, however, that this division of the Pentateuch influenced the arrangement of the Psalter in five books. The same may be said of the five Megilloth of the Haggadapha (Canticles, Ruth, Lamentations, Ecclesiastes, and Esther), which in many Hebrew Bibles are placed immediately after the Pentateuch.

For the several names and contents of the Five Books we refer to the articles on each book, where questions affecting their integrity and genuineness are also discussed. In the article on Genesis the scope and design of the whole work is pointed out. We need only briefly observe here that this work, beginning with the record of Creation and the history of the primitive world, passes on to deal more especially with the early history of the Jewish family. It gives at length the personal history of the three great Fathers of the family; it then describes how the family grew into a nation in Egypt, tells us of its oppression and deliverance, of its forty years' wandering in the wilderness, of the giving of the Law, with all its enactments both civil and religious, of the construction of the Tabernacle, of the numbering of the people, of the rights and duties of the priesthood, as well as of many important events which befell them before their entrance into the Land of Canaan, and finally concludes with Moses' last discourses and his death. The unity of the work in its existing form is now generally recognized. It is not a mere collection of loose fragments carelessly put together at different times, but bears evident traces of design and purpose in its composition. Even those who discover different authors in the earlier books, and who deny that Deuteronomy was written by Moses, are still of opinion that the work in its present form is a connected whole, and was at least re

PENTATEUCH, THE

Incl to its present shape by a single revisor or editor.\(^a\)

The question has also been raised, whether the Book of Joshua does not, properly speaking, constitute an integral portion of this work. To this question Ewald (Geeschichte, l. 173.), Knobel (Gesch. Vorheb. §1, 2), Lengerke (Kennw., lixxi.), and Stahelin (Krit. Unters. p. 91) give a reply in the affirmative. They seem to have been led to do so, partly because they imagine that the two documents, the Elohistic and Jehovistic, which characterize the earlier books of the Pentateuch, may still be traced, like two streams, the waters of which never meet, but which run on through the book of Joshua; and partly because the same work which contains the promise of the land (Gen. xvi.) must contain also — so they argue — the fulfillment of the promise. But such grounds are far too arbitrary and uncertain to support the hypothesis which rests upon them. All that seems probable is, that the book of Joshua received a final revision at the hands of Ezra, or some earlier prophet, at the same time with the books of the Law.

The fact that the Samaritans, who it is well known did not possess the other books of Scripture, have besides the Pentateuch a book of Joshua (see Chronicon Samarit., etc., ed. Juyundii, Lang. Bat. 1818), indicates no doubt an early association of the one with the other; but it is no proof that they originally constituted one work, but rather the contrary. Otherwise the Samaritans would naturally have adopted the canonical recension of Joshua. We may therefore regard the Five Books of Moses as one separate and complete work. For a detailed view of the several books we must refer, as we have said, to the Articles where they are severally discussed. The questions which we have left for this article are those connected with the authorship and date of the Pentateuch as a whole. It is necessary here at the outset to state the exact nature of the investigation which lies before us. Many English readers are alarmed when they are told, for the first time, that critical investigation renders it doubtful whether the whole Pentateuch in its present form was the work of Moses. On this subject there is a strange confusion in many minds. They suppose that to recover the recognized authorship of a sacred book is to surrender the truth of the book itself. Yet a little reflection should suffice to correct such an error. For who can say now who wrote the books of Samuel, or Ruth, or Job, or to what authorship many of the Psalms are to be ascribed? We are quite sure that these books were not written by the persons whose names they bear. We are scarcely less sure that many of the Psalms ascribed to David were not written by him, and our own translators have signified the doubtfulness of the inscriptions by inscribing them from the Psalms, of which in the Hebrew text they were made to form a constituent part. These books of Scripture, however, and these divine poems, lose not a whit of their value or of their authority because the names of their authors have perished. Truth is not a thing dependent on names. So likewise, if it should turn out that portions of the Pentateuch were not written by Moses, neither their inspiration nor their trustworthiness is thereby diminished. All will admit that one portion at least of the Pentateuch — the 34th chapter of Deuteronomy, which gives the account of Moses' death — was not written by him. But in making this admission the principle for which we contend is conceded. Common sense compels us to regard this chapter as a later addition. Why then may not other later additions have been made to the work? If common sense leads us to such a conclusion in one instance, critical examination may do so on sufficient grounds in another.\(^b\)

At different times suspicions have been entertained that the Pentateuch as we now have it is not the work of the earliest times. But the work must have undergone various modifications and additions before it assumed its present shape.

So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the Mosaic writings. According to him the Law was only given orally by Moses to the seventy elders, and not consigned to writing till after his death; it subsequently underwent many changes, was corrupted more and more by means of the false prophets, and was especially filled with erroneous anthropomorphic conceptions of God, and unworthy representations of the characters of the Patriarchs (Hom. ii. 38, 43, iii. 4, 47; Neander Gesch. der Kirchen, 380). A statement of this kind, unsupported, and coming from an heretical, and therefore suspicious source, may seem of little moment: it is however remarkable, so far as it indicates an early tendency to cast off the received traditions respecting the books of Scripture; whilst at the same time it is evident that this was done cautiously, because such an opinion respecting the Pentateuch was said to be for the advanced Christian only, and not for the simple and unlearned. Jerome can be little doubt, had seen the difficulty of supporting the Pentateuch to altogether, in its present form, the work of Moses; for he observes (contra Helvid.): "Sive Mosen dicere volueris autorem Pentateuchi sine Exram ejusdem instauratores operis," with reference apparently to the Jewish tradition on the subject. Aben Ezra (1167), in his Contra. on Deut. i. 1, threw out some doubts as to the Mosaic authorship of certain passages, such as Gen. xii. 6, Deut. iii. 10, 11, xxxi. 9, which he either explained as later interpolations, or left as mysteries which it was beyond his power to unravel. For centuries, however, the Pentateuch was generally received in the Church without question as written by Moses. The age

\(^b\) It is strange to see how widely the misconception which we are anxious to obviate extends. A learned writer, in a very recent publication, says, in reference to the alleged existence of different documents in the Pentateuch: "This exclusive use of the one Divine Name in some portions, and of the other in other portions, it is said, characterizes two different authors living at different times; and consequently Genesis is composed of two different documents, the one Elohistic, the other Jehovistic, which moreover differ in statement; and consequently this book was not written by Moses, and is neither inspired nor trustworthy." (Athe to Faith, p. 130). How it follows that a book is neither inspired nor trustworthy because its authorship is unknown we are at a loss to conceive. A large part of the canon must be sacrificed, if we are only to receive books whose authorship is satisfactorily ascertained.
of criticism had not yet come. The first signs of its approach were seen in the 15th century. In the year 1657 we find Hobbes writing: "Vindicat Pentateuchus potius de Mose quam de Mose scriptus" (Lettres, p. 33). Spinoza (Tract. Theol.-Politi. 2. 8. 9, published in 1679) set himself boldly to controvert the received authorship of the Pentateuch. He alleged against it (1) later names of places, as Gen. xiv. 14 comp. with Judg. xviii. 22; (2) the continuation of the history beyond the days of Moses. Ex. 34. 26 with Deut. v. 35; (3) the statement in Gen. xxxvi. 31, "before there reigned any king over the children of Israel." Spinoza maintained that Moses issued his commands to the elders, that by them they were written down and communicated to the people, and that later they were collected and assigned to suitable passages in Moses' life. He considered that the Pentateuch was indebted to Ezra for the form in which it now appears. Other writers began to suspect that the book of Genesis was composed of written documents earlier than the time of Moses. So Vitringa (Observ. Sacr. i. 3); Le Clerc (De Script. Pentateuchi, § 11), and R. Simon (Histoire Critique du V. T. lib. i. ch. 7, Rotterdam, 1685). According to the last of these writers, Genesis was composed of earlier documents, the Laws of the Pentateuch being the last portion of the history which was written by the public scribe who is mentioned in the book. Le Clerc supposed that the priest who, according to 2 K. xvii. 27, was sent to instruct the Samaritan colonists, was the author of the Pentateuch.

But it was not till the middle of the last century that the question as to the authorship of the Pentateuch was handled with anything like a discerning criticism. The first attempt was made by a Jewish, whose works we might have supposed would scarcely have led him to such an investigation. In the year 1753, there appeared at Brussels a work, entitled: "Observations sur les Mémoires originaux, dont il paraît que Moysen s'est servi pour composé le Livre de Genese." It was written in his 68th year by Astruc, Doctor and Professor of Medicine, in the University College, at Paris, to Louis XIV. His critical eye had observed that throughout the book of Genesis, and as far as the 6th chapter of Exodus, traces were to be found of two original documents, each characterized by a distinct use of the names of God; the one by the name Jehovah, and the other by the name Elohim. Besides these two principal documents, he supposed Moses to have made use of ten others in the composition of the earlier part of his work. Astruc was followed by several German writers on the path which he had traveled; by Jers salen in his Letters on the Mosaic Writings and Philosophy; by Schultens, in his Dissertatio quaepri dissertatur, unde Mosaen s. in libro Geneseos dissertatione decidavit; and with considerable learning and critical acumen by Egen (Schriften der Jerusalemer, ii. Thiel, Halle, 1788.), and Eichhorn (Einleitung in d. d. T.).

But this "documentary hypothesis," as it is called, was too conservative and too rational for some critics. Vater, in his Commentar ub. den Pentateuch, 1814, and A. T. Hartmann, in his Linguist. Einl. in d. Stud. d. Bucher des Al. Test. 1818, maintained that the Pentateuch consisted merely of a work of Moses, and the greater part together without order or design. The former sup posed a collection of laws, made in the times of David and Solomon, to have been the foundation of the whole; that this was the book discovered in the reign of Josiah, and that its fragments have afterwards incorporated in Deuteronomy. All the rest, consisting of fragments of history and of laws written at different periods up to this time, were, according to him, collected and shaped into their present form between the times of Josiah and the Babylonish Exile. Hartmann also brings down the date of the existing Pentateuch as late as the Exile. This has been called the "hypothese hypothese." Both of these have now been superseded by the "Supplementary hypothesis," which has been adopted with various modifications by De Wette, Bleek, Stuhelin, Tisch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schultz, Vaihinger, and others. They all alike recognize two documents in the Pentateuch. They suppose the narrative of the Elohist, the more ancient writer, to have been the foundation of the work, and that the Jehovist or later writer making use of this document, added to and commented upon it, sometimes transcribing portions of it intact, and sometimes incorporating the substance of it into his own work.

But though thus agreeing in the main, they differ widely in the application of the theory. Thus, for instance, De Wette distinguishes between the Elohist and the Jehovist, and assigns all the later portions of the history which were written by the public scribe, and attributes Deuteronomy to a different writer altogether (Einl. in die Genese 150 ff.). So also Lengerke, though with some differences of detail in the portions he assigns to the two editors. The last places the Elohist in the time of Solomon, and the Jehovist editor in that of Hezekiah; whereas Tisch puts the first under Saul, and the second under Solomon. Stuhelin, on the other hand, declares for the identity of the Deuteronomist and the Jehovist: and supposes the last to have written in the reign of Saul, and the Elohist in the time of the Judges. Hupfeld (die Quellen der Genesis) finds, in Genesis at least, traces of three authors, an earlier and a later Elohist, as well as the Jehovist. He is peculiar in regarding the Jehovistic portion as an altogether original document, written in a different age and language, and attributes even of the Elohistic record. A later editor or compiler, he thinks, found the two books, and threw them into one. Vaihinger (in Herzog's Enzyklopädie) is also of opinion that portions of three original documents are to be found in the first four books, to which he adds some fragments of the 32d and 34th chapters of Deuteronomy. The Fifth Book, according to him, is by a different and much later writer. The Pre-elohist he supposes to have flourished about 1200 n. c., the Elohist some 200 years later, the Jehovist in the first half of the 8th century n. c., and the Deuteronomist in the reign of Hezekiah.

Delitzsch agrees with the writers above mentioned in recognizing two distinct documents as the basis of the Pentateuch, especially in its earlier portions; but he entirely severs himself from them in maintaining that Deuteronomy is the work of Moses. His theory is this: the kernel or first foundation of the Pentateuch is to be found in the book of the Covenant (Ex. xix.-xxi.), which was written by Moses himself, and afterwards incorporated into the body of the Pentateuch, where it appears still in the Laws of the Wilderness, till the people reached the plains of Moab, were communicated orally by Moses and taken down by the priests, whose business it was
Thus to provide for their preservation (Dent. vii. 11, comp. xxiv. 8, xxxii. 10; Lev. x. 11, comp. xxv. 31). In much as Deuteronomy does not presuppose the existence in writing of the entire earlier legislation, but on the contrary reasserts it with the greatest freedom, we are not obliged to assume that the proper codification of the Law took place during the forty years' wandering in the desert. This was done, however, shortly after the occupation of the land of Canaan. On that sacred soil was the first definite portion of the history of Israel written; and the writing of the history itself necessitated a full and complete account of the Mosaic legislation, whether the author, or the successor of the priest (see Num. xxvi. 1, xxxi. 21), wrote the great work beginning with the first words of Genesis, including in it the Book of the Covenant, and perhaps gave only a short notice of the last discourses of Moses, because Moses had written them down with his own hand. A second — who may have been Joshua (see especially 1 ent. xxii. 34; Josh. xxiv. 22) and comp. on the other hand 1 Sam. x. 20, who was a prophet, and spoke as a prophet, or one of the elders among whom Moses' spirit rested (Num. xi. 25, and many others of whom survived Joshua (Josh. xxiv. 31) — completed the work, taking Deuteronomy, which Moses had written, for his model, and incorporating it into his own book. Somewhat in this manner arose the Torah (or Pentateuch), each narrator further elaborating himself when he thought proper of other written documents.

Such is the theory of Delitzs, which is in many respects worthy of consideration, and which has been adopted in the main by Kurtz (Gesch. d. A, R. i. § 20, and h. § 99, 6), who formerly was opposed to the theory of different documents, and sided rather with Hengstenberg and the critics of the extreme conservative school. There is this difference, however, that Kurtz objects to the view that Deuteronomy existed before the other books, and believes that the rest of the Pentateuch was committed to writing before, not after, the occupation of the Holy Land. Finally, Schultze, in his recent work on Deuteronomy, recognizes two original documents in the Pentateuch, the Elohist being the base and groundwork of the whole, but contends that the Jehovistic portions of the first four books, and Deuteronomy, except the concluding portion, were written by Moses. Thus he agrees with Delitzs and Kurtz in admitting two documents and the Mosaic authorship of Deuteronomy, and with Stihelin in identifying the Deuteronomist with the Jehovah. That these three writers more nearly approach the truth than any others who have attempted to account for the phenomena of the five books of Pentateuch, we are convinced. Which of the three hypotheses is best supported by facts and by a careful examination of the record, we shall see hereafter.

One other theory has, however, to be stated before we pass on. The author of it stands quite alone, and it is not likely that he will ever find any disciple bold enough to adopt his theory; even his great admirer Dussau forsakes him here. But it is due to Kold's great and deserved reputation as a scholar, and to his uncommon critical sagacity, briefly to state what that theory is. He distinguishes, then, seven different authors in the great Book of Origins or Primitive History (comprising the Pentateuch and Joshua). The oldest histor-
PENTATEUCH, THE

ination of God to the world, whether as Elohim or Jehovah. Hence he argued that, whilst different sections through the Pentateuch, they were not from two different fountain-heads, but varied according to the motive which influenced the writer, and according to the fundamental thought in particular sections; and on this ground, too, he explained the characteristic phrasing which distinguishes such sections. Keil’s work (Untersuchungen über die Pentateuch) is a valuable contribution to the excavation of the Pentateuch. He is especially successful in establishing the inward unity of the work, and in showing how inseparably the several portions, legal, genealogical, and historical, are interwoven together. Kurtz (in his Einleitung des Alten Testaments, 1846, and in the first edition of his first volume of the Geschichte des Alten Testaments) followed on the same side; but he has since abandoned the attempt to explain the use of the Divine Names on the principle of the different meanings which they bear, and has expounded the theory of two distinct documents. Keil, also, though he does not despair of the solution of the problem, confesses (Luther. Zeitschr. 1834-52, p. 235) that “all attempts as yet made, notwithstanding the sermon which has been brought to bear to explain the interwoven character of the Divine Names in Genesis on the ground of the different meanings which they possess, must be pronounced a failure.”

E. (Das Alter des Abc-Naumbund) and Tiele (Stud. und Krit. 1852) make nearly the same admission. This manifest doubling in some cases, and desertion in others from the ranks of the more conservative school, is significant. And it is certainly unfair to claim consistency and unanimity of opinion for one side to the prejudice of the other. The truth is, that diversities of opinion are to be found among those who are opposed to the theory of different documents, as well as amongst those who advocate it. Nor can a theory which has been adopted by Delitzsch, and to which Kurtz has been a convert, be considered as either irrational or irrational. It may not be established beyond doubt, but the presumptions in its favor are strong, and, when properly stated, will it be found open to any serious objection.

II. We ask in the next place what is the testimony of the Pentateuch itself with regard to its authorship?

1. We find on reference to Ex. xxiv. 3, 4, that “Moses came and told the people all the words of Jehovah and all the judgments,” and that he subsequently “wrote down all the words of Jehovah.” These were written on a roll called “the book of the covenant” (ver. 7), and read in the audience of the people. These “words” and “judgments” were no doubt the Sinai legislation so far as it had as yet been given, and which constituted in fact the covenant between Jehovah and the people.

Upon the renewal of this covenant after the idolatry of the Israelites, Moses was again commissioned by Jehovah to “write these words” (xxxv. 27).

And, it is added, “he wrote upon the tables the words of the covenant, the ten commandments.” Leaving Pentateuch aside for the present, there are only two other passages in which mention is made of the writing of any part of the Law, and those are Ex. xvii. 14, where Moses is commanded to write the defeat of Amalek in a book (or rather in the book, one already in use for the purpose); and Num. xxxiii. 2, where we are informed that Moses wrote the passage of Israel in the desert and the various stations at which they encamped. It obviously does not follow from these statements that Moses wrote all the rest of the first four books which bear his name. Nor on the other hand does this specific testimony with regard to certain portions justify us in coming to an opposite conclusion. So far nothing can be determined positively one way or the other. But it may be said that we have an express testimony to the Mosiac authorship of the Law in Deut. xxxi. 9-12, where we are told that “Moses wrote this Law” (ךֵּכָּה הָיָה מִסְכִּים), and delivered it to the custody of the priests with a command that it should be read before all the people at the end of every seven years, on the Feast of Tabernacles. In ver. 24 it is further said, that when he had made an end of writing the words of this Law in a book till they were finished,” he delivered it to the Levites to be placed in the side of the ark of the covenant of Jehovah, that it might be preserved as a witness against the people.

Such a statement is not only decisive, but the question is, How far does it extend? To the words “this Law” comprise all the Mosaic legislation as contained in the last four books of the Pentateuch, or must they be confined only to Pentateuch? The last is apparently the only tenable view. In Deut. xii. 18, the direction is given that the king on his accession “shall write him a copy of this Law in a book out of that which is before the priests the Levites.” The words “copy of this Law,” are literally “repetition of this Law” (ךֵּכָּה וְהָיָה מֶסְכִּים), which is another name for the book of Deuteronomy, and hence the LXX. renders here τὸ διηνοτοῦ ἤματος, and Thilo τὸν εὐαγγελισμόν, and although it is true that Ostrakos uses מִסְכִּים (Mishneh) in the sense of “copy,” and the Talmud in the sense of “duplicate” (Carpzow on Schickard’s Jev. reg. Hebr. pp. 82-84), yet it seems well to regard the passage already referred to in xxxvi. 9, 10, as it was in the time of the second Temple received as an unanswerable tradition that Deuteronomy only, and not the whole Law was read at the end of every seven years, in the year of release. The words are תּוֹךְ לְוַיִּתְמוֹת תּוֹךְ לְוַיִּתְמוֹת וּלְוַיִּתְמוֹת from the beginning of Pentateuch” (Sata, c. 7; Maimon, And hachetzob in Hill-hoth Chagiga, c. 3; Rema, Adly, Sor. p. 11; A. B. E.)

Besides, it is on the face of it very improbable a particular book kept for the purpose is probably intended; and in 2 Sam. xii. 15, the book or leaf is meant which had already been mentioned in the previous verse. Hence the article is indispensable.

b “The passage of the Sata,” says Delitzsch on Gen. xxv. 6, “one of the oldest Malmishim of the school of Rabb (127), on Dent. xvi. 18, to which Rashi refers on Gen. xvi, 1, is as clear as it is important: ‘Let him (the king) copy לְוַיִּתְמוֹת וּלְוַיִּתְמוֹת in a
that the whole Pentateuch should have been read at a national feast, whereas that Deuteronomy, summing up, spiritualizing, and at the same time enforcing the Law should so have been read, is in the highest degree probable and natural. It is in confirmation of this view that all the later literature, and especially the writings of Josephus, are full of references to Deuteronomy as the book with which they might expect the most intimate acquaintance on the part of their hearers. So in other passages in which a written law is spoken of we are driven to conclude that only some part and not the whole of the Pentateuch is meant. Thus in chap. xxvii. 3, 8, Moses commands the people to write "all the words of this Law very plainly" on the stones set up on Mount Ebal. Some have supposed that only the Decalogue, others, that the blessings and curses which immediately followed were so to be inscribed. Others again (as Schultze, Deuteronom., p. 87) think that some summary of the Law may have been intended; but it is at any rate quite clear that the expression "all the words of this Law" does not refer to the whole Pentateuch. This is confirmed by Josh. viii. 32. There the history tells us that Joshua wrote upon the stones of the altar which he had built on Mount Ebal "a copy of the Law of Moses (מש pione 본 Мо- but the absence of the article in xxxi. 24, where Moses is said to have made an end of writing the Law in a book (בָּֽקִית), whereas when different portions are spoken of, they are said to have been written in the book already existing (Ex. xvi. 14; 1 Sam. x. 23; Josh. xxiv. 26). It is scarcely conceivable, he says, that Moses should have provided so carefully for the safe custody and transmission of his own sermons on the Law, and have made no like provision for the Law itself, though given by the mouth of Jehovah. Even therefore if "this Law" in xxxi. 24, applies it the first instance to Deuteronomy, it must indirectly include, if not the whole Pentateuch, at any rate the whole Mosaic legislation. Deuteronomy everywhere supposes the existence of the earlier books, and it is not credible that at the end of his life the great Legislation should have been utterly regardless of the Law which was the text, and solicitous only about the discourses which were the comment. The one would have been unintelligible apart from the other. There is, no doubt, some force in these arguments; but as yet they only render it probable that if Moses were the author of Deuteronomy, he was the author of a great part at least of the three previous books.

So far, then, the direct evidence from the Pentateuch itself is not sufficient to establish the Mosaic authorship of every portion of the Five Books. Certain parts of Exodus, Leviticus, and Numbers, and the whole of Deuteronomy to the end of chap. xxxi., is all that is expressly said to have been written by Moses. Two questions are yet to be answered. Is there evidence that parts of the work were not written by Moses? Is there evidence that parts of the work are later than his time?

2. The next question we ask is this: Is there any evidence to show that he did not write portions of the work which goes by his name? We have already referred to the last chapter of Deuteronomy which gives an account of his death. Is it probable that Moses wrote the words in Ex. xi. 3, "Moreover the man Moses was very great in the land of Egypt, in the sight of Pharaoh's servants, and in the sight of the people"? — or those in Num. xiii. 3, "Now the man Moses was very meek above all the men which were upon the face of the earth?" On the other hand, are not such words of praise just what we might expect from the friend and disciple — for such perhaps he was — who pronounced his eulogium after his death? And there arose not a prophet since in Israel like unto Moses, whom Jehovah knew face to face" (Deut. xxxiv. 10)?

3. But there is other evidence, to a critical eye not a whit less convincing, which points in the same direction. If, without any theory casting its shadow upon us, and without any fear of consequences before our eyes, we read thoughtfully only the Book of Genesis, we can hardly escape the conviction that it partakes of the nature of a compilation. It has indeed, a unity of plan, a coherence of parts, a shapeliness and an order, which satisfy

"ever, because in ver. 19 is said, to observe all the words of this Law. If so, then why is Deuteronomy only mentioned? Because on the day of assembly Deuteronomy only was read?"

Deuteronomy. Not this exclusively, how-
us that as it stands it is the creation of a single mind. But it bears, also, manifest traces of having been based upon an earlier work; and that earlier work itself seems to have had imbedded in it fragments of still more ancient documents. Before proceeding to prove this, it may not be unnecessary to state, in order to avoid misinterpretation, that such a theory does not in the least militate against the divine authority of the book. The history contained in Genesis could not have been narrated by Moses from personal knowledge: but whether he was taught it by immediate divine suggestion, or was directed by the Holy Spirit to the use of earlier documents, is immaterial in reference to the inspiration of the work. The question may therefore be safely discussed on critical grounds alone.

We begin, then, by pointing out some of the phenomena which the book of Genesis presents. At the very opening of the book, peculiarities of style and manner are discernible, which can scarcely escape the notice of a careful reader even of a translation, which certainly are no sooner pointed out than we are compelled to admit their existence.

The language of chapter i. 1-ii. 3 (where the first chapter ought to have been made to end) is totally unlike that of the section which follows, ii. 4-iii. 25. This last is not only distinguished by a peculiar use of the divine names — for here, and nowhere else in the whole Pentateuch, except Ex. ix. 30, have we the combination of the two, Jehovah Elohim — but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the creation distinct from that contained in the first chapter. It may be said, indeed, that this account does not contradict the former, and might therefore have proceeded from the same pen. But, fully admitting that there is no contradiction, the representation is so different that it is far more natural to conclude that it was derived from some other, though not antagonistic, source. It may be argued that here we have, not as in the first instance the Divine idea and method of creation, but the actual relation of man to the world around him, and especially to the vegetable and animal kingdoms; that this is therefore only a resumption and explanation of some things which had been mentioned more broadly and generally before. Still it is not possible to deny that this second account has the character of a supplement: that it is designed, if not to correct, at least to explain the other. And this fact, taken in connection with the peculiarities of the phraseology and the use of the divine names in the same section, is quite sufficient to justify the supposition that we have here an instance not of independent narrative, but of compilation from different sources.

To take another instance. Chapter xiv. is beyond all doubt an ancient monument — papyrus roll it may have been, or inscription on stone, which has been copied and transplanted in its original form into our present book of Genesis. Archaic it is in its whole character: distinct, too, again from the rest of the book, in its use of the name of God. Here we have El Elyon, "the Most High God," used by Melchizedec first, and then by Abraham, who adopts it and applies it to Jehovah, as if to show that it was one God whom he worshipped and whom Melchizedec acknowledged, though they knew Him under different appellations.

We believe, then, that at least these two portions of Genesis — chap. ii. 4-iii. 24, and chap. xiv. — are original documents, preserved, it may have been, like the genealogies, which are also a very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohim or the Jehovah for his history. Indeed, Eichhorn seems to be not far from the truth when he observes, "The early portion of the history was composed merely of separate small notices; whilst the family history of the Hebrews, on the contrary, runs on in two continuous narratives: these, however, again have not only here and there some passages inserted from other sources, as chap. xiv., xxiii. 18-xxiv. 31, xxvii. 1-13, xlix. 1-27, but, even where the authors wrote more independently, they often bring together traditions which in the course of time had taken a different form, and merely give them as they had received them, without inverting which it is to be preferred" (Einkl. in A. T. iii. 91, § 416).

We come now to a more ample examination of the question as to the distinctive use of the divine names, and the fact. Astruc was right to surmise, that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi., does contain two original documents characterized by their separate use of the divine names and by other peculiarities of style. Of this there can be no reasonable doubt. We do find, not only scattered verses, but whole sections thus characterized. Throughout this portion of the Pentateuch the name (Jehovah) prevails in some sections, and (Elohim) in others. There are a few sections where both are employed indifferently; and there are, finally, sections of some length in which neither the one nor the other occurs. A list of these has been given in another article. [GENESIS.] And we find, moreover, that in connection with this use of the divine names there is also a distinctive and characteristic phraseology. The style and idiom of the Jehovian sections is not the same as the style and idiom of the Elohim sections. After Ex. vi. 2-ii. vii. 7, the name Elohim almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xii. 17-19, and chap. xviii. Such a phenomenon as this cannot be without significance. If, as Hengstenberg and those who agree with him would persuade us, these two divine names is to be accounted for throughout by a reference to their etymology — if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to set forth God as the Redeemer — then it still cannot but appear remarkable that only up to a particular point do these names stamp separate sections as Jehovian or Elohim, whereas after that a more distinct criterion fails. How is this fact to be accounted for? Why is it that up to Ex. vi. each name has its own province in the narrative, broad and clearly defined, whereas in the subsequent portions the name Jehovah prevails, and Elohim is only interchanged with it here and there? But the alleged design in the use of the divine names will be clear by a close examination. It is no doubt the case throughout the story of creation in i. 1-ii. 3 we have Elohim — and this squares with the hypothesis. There is some plausibility also in the attempt to explain the compound use of the divine names in the next section, by the fact that here we have the transition from the History of Creation to the
PENTATEUCH, THE

History of Redemption; that hence consequently we should expect to find God exhibited in both characters, as the God who made and the God who redeems the world. That after the Fall it should be Jehovah who speaks in the history of Cain and Abel is on the same principle intelligible, namely, that this latter is harmonized best with the narrative of the narrative. But when we come to the history of Noah the criterion fails us. Why, for instance, should it be said that "Noah found grace in the eyes of Jehovah" (vi. 8), and that "Noah walked with Elohim" (vi. 9)? Surely on the hypothesis it should have been, "Noah walked with Jehovah," for Jehovah, not Elohim, is His Name as the God of covenant, and grace, and self-revelation. Hengstenberg's attempt to explain this phrase by an opposition between "walking with God" and "walking with the world" is remarkable only for its ingenuity. Why should it be more natural or more forcible even then to imply an opposition between the world and its Creator, than between the world and its Redeemer? The reverse is what we should expect. To walk with the world does not mean with the created things of the world, but with the spirit of the world; and the emphatic opposition to that spirit is to be found in the spirit which confesses its need and lays hold of the promise of Redemption. Hence to walk with Jehovah (not Elohim) would be the natural antithesis to walking with the world. So, again, how on the hypothesis of Hengstenberg, can we satisfactorily account for its being said in vi. 22, "Thus did Noah; according to all that God (Elohim) commanded him, so did he;" and in vii. 5, "And Noah did according unto all that Jehovah commanded him;" while again in vii. 9 Elohim occurs in the same phrase? The elaborate ingenuity by means of which Hengstenberg, Drechsler, and others attempt to account for the specific use of the several names in these instances is in fact its own refutation. The stern constraint of a theory could alone have suggested it.

The fact to which we have referred that there is this distinct use of the names Jehovah and Elohim in the earlier portion of the Pentateuch, is no doubt to be explained by what we are told in Ex. vi. 2, "And Elohim spake unto Moses, and said unto him, I am Jehovah; and I appeared unto Abraham, unto Isaac, and unto Jacob as El-Shaddai, but by my name Jehovah was I not known to them." Does this mean that the name Jehovah was literally unknown to the Patriarchs? that the first revelation of it was that made to Moses in ch. lii. 13, 14? where we read: "And Moses said unto God, Behold, when I come unto the children of Israel, and shall say unto them, The God of your fathers' God hath sent me unto you; and they shall say to me, What is His Name? what shall I say unto them? And God said unto Moses, I AM THAT I AM: and He said, Thus shalt thou say unto the children of Israel, I AM hath sent me unto you." This is undoubtedly the first explanation of the name. It is now, and now first, that Israel is to be made to understand the full import of that Name. They are to learn, by the redemption out of Egypt. By means of the deliverance they are to recognize the character of their deliverer. The God of their fathers is not a God of power only, but a God of faithfulness and of love, the God who has made a covenant with his chosen, and who therefore will not forsake them. This seems to be the meaning of the "I AM THAT I AM" (יהוה אֶלֹהִים), or as it may perhaps be better rendered, "I am He whom I prove myself to be." The abstract idea of self-existence can hardly be conveyed by this name; but rather the idea that God is what He is in relation to his people. Now, in this sense it is clear God had not fully made Himself known before.

The name Jehovah may have existed, though we have only two instances of this in the history, the one in the name Moriah (Gen. iii. 21), and the other in the name of the mother of Moses (Ex. vi. 20), who was called Jochebed; both names formed by composition from the divine name Jehovah. It is certainly remarkable that during the patriarchal times we find no other instance of a proper name so compounded. Names of persons compounded with El and Shaddai we do find, but not with Jehovah. This fact abundantly shows that the name Jehovah was, if not altogether unknown, at any rate not understood. And thus we have "an undesignated coincidence" in support of the accuracy of the narrative. God says in Exodus, He was not known by that name to the patriarchs. The Jehovahistic writer of the patriarchal history, whether Moses or one of his friends, uses the name freely as one with which he himself was familiar, but it never appears in the history revelation of the Patriarchs as one which was familiar to them.

On the other hand, passages like Gen. iv. 26, and ix. 28, seem to show that the name was not altogether unknown. Hence Astruc remarks: "Le passage de l’Exode bien entendu ne prouve point que le nom de Jehovah fût un nom de Dieu inconnu aux Patriarches et révélé à Moïse le premier, mais prouve seulement que Dieu n’avoit pas fait connaissance aux Patriarches toute l’étendue de la signification de ce nom, an lieu qu’il l’a manifestée à Moïse." The expression in Ex. vi. 3, "I was not known, or did not make myself known," is in fact to be understood with the same limitation as when (John i. 17) it is said, that "Grace and truth came by Jesus Christ," as in opposition to the Law of Moses, which does not mean that there was no Grace or Truth in the Old Covenant; or as when (John vii. 39) it is said, "The Holy Ghost was not yet, because Jesus was not yet glorified," which does not of course exclude all operation of the Spirit before. [Jehovah, Amer. ed.]

Still this phenomenon of the distinct use of the divine names would scarcely of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch. But there is other evidence pointing the same way. We find, for instance, the same story told by the two writers, and their two accounts manifestly interwoven; and we find also certain favorite words and phrases which distinguish the one writer from the other.

(1.) In proof of the first, it is sufficient to read the history of the Nephilim.

In order to make this more clear, we will separate the two documents, and arrange them in parallel columns:

| JEHOVAH. | Elohim. |
| Gen. vi. 5. | Gen. vi. 12. |
| And Jehovah saw that the wickedness of man was great in the earth, and that every imagination of the thoughts of his heart was corrupt. | And Elohim saw that it was good, and behold it was very good; for all flesh had corrupted his way upon the earth. |
only evil continually, 
And it repented Jehovah, etc.

And Jehovah said, 
I will blot out man whom I have created from off the face of the ground.

And Elohim said to Noah, The end of all flesh is come before me, for the earth is filled with violence because of them, and behold I will destroy them with the earth.

Noah a righteous man was perfect in his generation. With Elohim did Noah walk.

And of every living thing of all flesh, two of all shall thou bring into the ark to preserve alive with thee: male and female shall they be.

And I, behold I do bring the flood, waters upon the earth, to destroy all flesh wherein is the breath of life, from under heaven; all that is in the earth shall perish.

Noah did according to all that Elohim commanded him: so did he.

Without carrying this parallelism farther at length, we will merely indicate by references the traces of the two documents in the rest of the narrative of the flood: vii. 1, 6, on the Jehovah side, answer to vii. 18, vii. 11, on the Elohim side; vii. 7, 8, 9, 17, 21, to vii. 13, 14, 15, 16, 18, 21, 22, vii. 21, 22, to ix. 8, 9, 10, 11.

It is quite true that we find both in earlier and later writers repetitions, which may arise either from accident or want of skill on the part of the author or compiler; but neither the one nor the other would account for the constant repetition which here runs through all parts of the narrative.

But again we find that these duplicate narratives are characterized by peculiar modes of expression; and that, generally, the Elohist and Jeovistic sections have their own distinct and individual coloring.

We find certain favorite phrases peculiar to the Elohist passages. Such, for instance, are מָלַךְ, "possession;" אוֹרָה, "land of sownings;" בֶּן נִיַּפַּר, or בֶּנֶּנֶּם, "after your, or their, generations;" דָּמָי, or דָּמִי, "after his, or her, kind;" שִׁבְּאֹר, "on the self-same day;" יַעַבֵּר, "I shan Aram," for which in the Jeovistic portions we always find יָסָר. 

vi. 1. And Jehovah said to Noah . . . . 
These have I seen righteous before me in this generation.

vi. 2. Of all cattle which is clean thou shalt take to thee by sevens, male and his female, and of all cattle which is not clean, two, male and his female.

vi. 4. For in yet seven days I will send rain upon the earth forty days and forty nights, and I will blot out all the substance which I have made from off the face of the ground.

vi. 5. And Noah did according to all that Jehovah commanded him.

vii. 1. And Jehovah said to Noah, . . . . These have I seen righteous before me in this generation.

vii. 2. Of all cattle which is clean thou shalt take to thee by sevens, male and his female, and of all cattle which is not clean, two, male and his female.

vii. 3. Then have I seen righteous before me in this generation.

vii. 4. For in yet seven days I will send rain upon the earth forty days and forty nights, and I will blot out all the substance which I have made from off the face of the ground.

vii. 5. And Noah did according to all that Jehovah commanded him: so did he.

vii. 13. And Jehovah said to Noah, The end of all flesh is come before me, for the earth is filled with violence because of them, and behold I will destroy them with the earth.

vii. 19. And of every living thing of all flesh, two of all shall thou bring into the ark to preserve alive with thee: male and female shall they be.

vii. 20. Of fowl after their kind, and of cattle after their kind, of every thing that creepeth on the ground after his kind, two of all flesh came unto thee: that thou mayest preserve (them) alive.
And the children of Israel did eat manna forty years, until they came to a land inhabited; they did eat manna until they came unto the borders of the land of Canaan. Then follows the remark, "Now an omer is the tenth part of an ephah." It is clear then that this passage was written not only after the ark was made, but after the Israelites had entered the Promised Land. The plain and obvious intention of the writer is to tell us when the manna ceased, not, as Hengstenberg contends, merely how long it continued. So it is said (Josh. vi. 12), "And the manna ceased on the morrow after they had eaten of the old corn of the land," etc. The observation, too, about the omer could only have been made when the omer as a measure had fallen into disuse, which it is hardly possible could have taken place in the lifetime of Moses. Still these passages are not absolutely irreconcilable with the Mosaic authorship of the book. Verse 35 may be a later gloss only, as Le Clerc and Rosenmuller believed.

The difficulty is greater with a passage in the book of Genesis. The genealogical table of Esau's family (ch. xxxvi.) can scarcely be regarded as a later interpolation. It does not interrupt the order and connection of the book; on the contrary, it is a most essential part of its structure: it is one of the ten "generations" or genealogical registers which form, so to speak, the backbone of the whole. Here we find the remark (ver. 31), "And these are the kings that reigned in the land of Edom, before there reigned any king over the children of Israel." Le Clerc supposed this to be a later addition, and Hengstenberg confesses the difficulty of the passage (Auth. d. Pretre, ii. 202). But the difficulty is not set aside by Hengstenberg's remark that the reference is to the prophecy already delivered in xxxv. 11, "Kings shall come out of thy loins." No unprejudiced reader can read the words, "before there reigned any king over the children of Israel," without feeling that, when they were written, kings had already begun to reign over Israel. It is a simple historical fact that for centuries after the death of Moses no attempt was made to establish a monarchy amongst the Jews. Gideon indeed (Judg. viii. 22, 23) might have become king, or perhaps rather military dictator, but was wise enough to decline with firmness the dangerous honor. But Jeroboam, who was and still is, more ambitious, prevailed upon the Shechemites to make him king, and was acknowledged, it would seem, by other cities, but he perished after a turbulent reign of three years, without being able to perpetuate his dynasty. Such facts are not indicative of any desire on the part of the Israelites at that time to be ruled by kings. There was no deep-rooted rejection of monarchical government, which could account for the observation in Gen. xxxvi. on the part of a writer who lived centuries before a monarchy was established. It is impossible not to feel in the words, as Ewald observes, that the narrator almost envies Edom because she had enjoyed the blessings of a regular well-ordered kingdom so long before Israel. An historical remark of this kind, it must be remembered, is monarchical dialect, and is taken from the provision made in Deuteronomy for the possible case that at some later time a monarchy would be established. It is one thing for a writer framing laws, which are to be the heritage of his people and the basis of their constitution for all time, to prescribe what shall be done when they shall elect a king to reign over them. It is another thing for a writer comparing the condition of another country with his own to say that the one had been under a monarchical form of government long before the other. The one might be the dictate of a wise sagacity forecasting the future; the other could only be said at a time when both nations alike were governed by kings. In the former case we might even recognize a spirit of prophecy: in the latter this is out of the question. Either then we must admit that the book of Genesis did not exist as a whole till the times of David and Solomon, or we must regard this particular verse as the interpolation of a later editor. And this last is not so improbable a supposition as Vullinger would represent it. Perfectly true it is that the whole genealogical table could have been no later addition: it is manifestly an integral part of the book. But the words in question, ver. 51, may have been inserted later from the genealogical table in 1 Chr. i. 47; and if so, it may have been introduced by Ezra in his revision of the Law. Similar remarks may perhaps apply to Lev. xviii. 28: "That the land smote not you out also when ye defile it, as it spake out the notion that was before you." This undoubtedly assumes the occupation of the land of Canaan by the Israelites. The great difficulty connected with this passage, however, is that it is not a supplementary remark of the writer's, but that the words are the words of God directing Moses what he is to say to the children of Israel (ver. 1). And this is not set aside even if we suppose the book to have been written, not by Moses, but by one of the elders after the entrance into Canaan.

(5.) In several instances older names of places give place to those which came later into use in Canaan. In Gen. xiv. 14, and in Deut. xxxiv. 1, occurs the name of the well-known city of Dan. But in Josh. xix. 47 we are distinctly told that this name was given to what was originally called Leshem (or Laish) by the children of Dan after they had wrested it from the Canaanites. The same account is repeated still more circumstantially in Judges xv. 19, where it is positively asserted that "the name of the city was Laish at the first." It is natural that the city should be called Dan in Deut. xxxiv., as that is a passage written beyond all doubt after the occupation of the Land of Canaan by the Israelites. But in Genesis we can only fairly account for its appearance by supposing that the old name Laish originally stood in the MS., and that it has been substituted for it on some later revision. [DAN.]

In Josh. xiv. 15 (comp. xv. 13, 54) and Judg. 10 we are told that the original name of Hebron before the conquest of Canaan was Kirjath-Arba. In Gen. xxiii. 2 the older name occurs, and the explanation is added (evidently by some one who wrote later than the occupation of Canaan), "the same is Hebron." In Gen. xiii. 18 we find the name of Hebron standing alone and without any explanation. Hence Keil supposes that this was a genuine name. Hence the LXX. have transferred these passages from the Epistle into the Psalm, and have been followed by the Vulg. and Arab.

Psalm xiv. furnishes a curious instance of the way in which a passage may be introduced into an earlier book. St. Paul, quoting this psalm in Rom. iii. 10, subjoins other passages of Scripture to his quota.
the original name, that the place came to be called Kirjath-Arba in the interval between Abraham and Moses, and that in the time of Joshua it was customary to speak of it by its ancient instead of its more modern name. This is not an impossible supposition; but it is more obvious to explain the apparent anachronism as the correction of a later editor, especially as the correction is actually given in so many words in the other passage (xxiii. 2).

Another instance of a similar kind is the occurrence of Hormah in Num. xiv. 45, xxxi. 1-3, compared with Judg. i. 17. It may be accounted for, however, thus: In Num. xxxi. 3 we have the origin of the name explained. The book of Numbers was written later than this, and consequently, even in speaking of an earlier event which took place at the same spot, the writer might apply the name, though at that point of the history it had not been given. Then in Judg. i. 17 we have the Canaanite name Zephath (for the Canaanites naturally would not have adopted the Hebrew name given in token of their victory), and are reminded at the same time of the original Hebrew designation given in the Wilderness.

So far, then, judging the work simply by what we find in it, there is abundant evidence to show that, though the main bulk of it is Moses, certain detached portions of it are of later growth. We are not obliged, because of the late date of these portions, to bring down the rest of the book to later times. This is contrary to the express claim advanced by large portions at least to that of Moses, and to other evidence, both literary and historical, in favor of a Moses origin. On the other hand, when we remember how entirely during some periods of Jewish history the Law seems to have been forgotten, and again how necessary it would be after the seventy years of exile to explain some of its archaism and to add here and there short notes to make it more intelligible to the people, nothing can be more natural than to suppose that such later additions were made by Ezra and Nehemiah.

III. We are now to consider the evidence lying outside of the Pentateuch itself, which bears upon its authorship and the probable date of its composition. This evidence is of three kinds: first, direct testimony; secondly, evidence as already existing in the later books of the Bible; secondly, the existence of a book substantially the same as the present Pentateuch amongst the Samaritans; and, lastly, allusions less direct, such as historical references, quotations, and the like, which presuppose its existence.

1. We have direct evidence for the authorship of the Law in Josh. i. 7, 8, "according to all the Law which Moses my servant commanded thee," — "this book of the Law shall not depart out of thy mouth," — and viii. 31, 34, xxiii. 6 (in xxiv. 20, "the book of the Law of God"); in all which places Moses is said to have written it. This agrees with what we have already seen respecting Deuteronomy and certain other portions of the Pentateuch which are ascribed in the Pentateuch itself to Moses. In fact, however, the evidence is strong that the Pentateuch in its present form and in all its parts is Moses.

The book of Judges does not speak of the book of the Law. A reason may be alleged for this difference between the books of Joshua and Judges. In the eyes of Joshua, the friend and immediate successor of Moses, the Law would possess unspeakable value. It was to be his guide as the Captain of the people, and on the basis of the Law was to rest all the life of the people both civil and religious, in the land of Canaan. He had received, moreover, from God Himself, an express charge to observe and do according to all that was written in the Law. Hence we are not surprised at the prominence which the Law occupied in this book, which tells us of the exploits of Joshua. In the book of Judges on the other hand, where we see the nation departing widely from the Mosaic institutions, lapsing into idolatry, and falling under the power of foreign oppressors, the absence of all mention of the Book of the Law is easily to be accounted for.

It is a little remarkable, however, that no direct mention of it occurs in the books of Samuel. Considering the express provision made for a monopoly in Deuteronomy, we should have expected that on the first appointment of a king some reference would have been made to the requirements of the Law. A prophet like Samuel, we might have thought, could not fail to direct the attention of the newly made king to the Book in accordance with what was here foretold. But if he did this, the history does not tell us so; though these are not the same. The words "as it is written in the Law of Moses," show that some portion, at any rate, of our present Pentateuch is referred to, and that the Law was received as the Law of Moses. The allusion, too, seems to be to parts of Deuteronomy, and therefore favors the Moses authorship of that book.

In viii. 9, we are told that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." In viii. 53, Solomon uses the words, "As thou spakest by the hand of Moses thy servant;" but the reference is too general to prove anything as to the authorship of the Pentateuch. The reference may be either to Ex. xix. 5, 6, or to Deut. xiv. 2.

In 2 K. xi. 12, "the testimony" is put into the hands of a youth at his coronation. This must have been a book containing either the whole of the Mosaic Law, or at least the Book of Deuteronomy, a copy of which, as we have seen, the king was expected to make with his own hand at the time of his accession.

In the Books of Chronicles for more frequent mention is made of "the Law of Jehovah," or "the book of the Law of Moses;" — a fact which may be accounted for partly by the priestly character of those books. Thus we find David's preparation for the worship of God is "according to the Law of Jehovah" (1 Chr. xvi. 40). In his charge to Solomon the words "the Law of Jehovah thy God, the statutes and the judgments which Jehovah charged Moses with commanding Israel" (xxii. 12, 13). In the Law itself it is said that Jehovah "forsook the Law of Jehovah;" in xiv. 4, that Asa commanded Judah to "seek Jehovah the God of their fathers, and to do the Law and the commandment." In xx. 3, the prophet Azariah reminds Asa that "now for a long season Israel hath been without the true God, and without a teaching priest, and without Law;" and in xvii. 9, we find Jehoshaphat appointing certain priests to
PENTATEUCH, THE

gather with priests and Levites, to teach: "they taught in Judah, and had the book of the Law of Jehovah with them." In xxv. 4, Amaziah is said to have acted in a particular instance "as it is written in the Law in the book of Moses." In xxxi. 3, 4, 21, Hezekiah's regulations are expressly said to have been in accordance with "the Law of Jehovah." In xxxiii. 8, the writer is quoting the word of God in reference to the Temple — "so that they will take heed to do all that I have commanded them, according to the whole Law and the statues, and the ordinances by the hand of Moses." In xxxvi. 14, occurs the memorable passage in which Hilkiah the priest is said to have "found a book of the Law of Jehovah (given) by Moses." This happened in the eighteenth year of the reign of Josiah. And accordingly we are told in xxxv. 26, that Josiah's life had been regulated in accordance with that which was "written in the Law of Jehovah."

In Ezra and Nehemiah we have mention several times made of the Law of Moses, and here there can be no doubt that our present Pentateuch is meant; for we have no reason to suppose that any later revision of it took place. At this time, then, the existing Pentateuch was regarded as the work of Moses. Ezra iii. 2, "as it is written in the Law of Moses," the man of God: "

Hence it is certain in the book of Moses," vii. 6, Ezra, it is said, "was a ready scribe in the Law of Moses." In Neh. i. 7, &c., "the commandments, judgments, etc., which Thon commanded Ths servant Moses," viii. 1, &c., we have the remarkable account of the reading of "the book of the Law of Moses." See also ix. 3, 14, xii. 3-10.

The books of Chronicles, though undoubtedly based upon ancient records, are probably in their present form as late as the time of Ezra. Hence it might be supposed that if the reference is to the present Pentateuch in Ezra, the present Pentateuch must also be referred to in Chronicles. But this does not follow. The book of Ezra speaks of the Law as it existed in the time of the writer; the Books of Chronicles speak of it as it existed long before. Hence the author of the latter (who may have been Ezra) in making mention of the Law of Moses refers of course to that recension of it which existed at the particular periods over which his history travels. Substantially, no doubt, it was the same book; and there was no special reason why the Chronicler should tell us of any corrections and additions which in the course of time had been introduced into it.

In Dan. ix. 11, 13, the Law of Moses is mentioned, and here again, a book differing in nothing from our present Pentateuch is probably meant.

These are all the passages of the Old Testament Canon in which "the Law of Moses," "the book of the Law," or such like expressions occur, denoting the existence of a particular book, the authorship of which was ascribed to Moses. In the Prophets and in the Psalms, though there are many allusions to the Law, evidently as a written document, there are none as to its authorship. But the evidence hitherto adduced from the historical books is unquestionably strong; first in favor of an early existence of the main body of the Pentateuch — more particularly of Genesis and the legal portions of it — as the books of the Levitical and Samaritan canon, bearing a universal belief amongst the Jews that the work was written by Moses.

2. Conclusive proof of the early composition of the Pentateuch, it has been argued, exists in the fact that the Samaritans had their own copies of it, not differing very materially from those possessed by the Jews, except in a few passages which had probably been purposely tampered with and altered; such for instance as Ex. xii. 40; Deut. xxvii. 4. The Samaritans, it is said, must have derived their Book of the Law from the Ten Tribes, whose land they occupied; on the other hand, it is out of the question to suppose that the Ten Tribes would be willing to accept religious books from the Two. Hence the conclusion seems to be irresistible that the Pentateuch must have existed in its present form before the separation of Israel from Judah; the only part of the O. T. which was the common heritage of both.

If this point could be satisfactorily established, we should have a limit of time in one direction for the composition of the Pentateuch. It could not have been later than the times of the earliest kings. It must have been written earlier than the reign of Josiah; and indeed than that of Saul. The history becomes at this point so full, that it is scarcely credible that a measure so important as the codification of the Law, if it had taken place, could have been passed over in silence. Let us, then, examine the evidence. What proof is there that the Samaritans received the Pentateuch from the Ten Tribes? According to 2 K. xvi. 24-26, the Samaritans were originally heathen colonists belonging to different Assyrian and Arabian tribes, who were transplanted by Shalmaneser to occupy the room of the Israelites whom he had carried away captive. It is evident, however, that a considerable portion of the original Israelitish population must still have remained in the cities of Samaria. For we find (2 Chr. xxx. 1-20) that Hezekiah invited the remnant of the Ten Tribes — who were in the land of Israel to come to the great Passover which he celebrated, and the different tribes are mentioned (vv. 10, 11) who did, or did not respond to the invitation. Later, Esr.ii adopted the policy of Shalmaneser and a still further deportation took place (Ezr. iv. 2). But even after this, though the heathen element in all probability preponderated, the land was not swept clean of its original inhabitants. Josiah, it is true, did not, like Hezekiah, invite the Samaritans to take part in the worship at Jerusalem. But finding himself strong enough to disregard the power of Assyria, now on the decline, he virtually claimed the land of Israel as the rightful appanage of David's throne, adopted energetic measures for the suppression of idolatry, and even exterminated the Samaritan priests. But what is of more importance as showing that some portion of the Ten Tribes was still left in the land, is the fact, that when the collection was made for the repairs of the Temple, we are told that the Levites gathered the money "of the hand of Manasseh and Ephraim, and of all the remnant of Israel," as well as "of Judah and Benjamin."

a It is a curious and interesting fact, for the knowledge of which we are indebted to Sir H. Rawlinson, that the Persians penetrated far into the interior of Arabia, and carrying off several Arabian tribes, settled them in Samaria. This explains how Geshem the Arabian came to be associated with Sanballat in the governments of Judea, as well as the mention of Arabs in the army of Samaria ('Illustrations of Egyptian History,' etc., in the Trans. of Roy. Soc. Lit., 1890, part i. pp. 145, 149).
2420 PENTATEUCH, THE

PENTATEUCH, THE

(2 Chr. xxvii. 9). And so also, after the discover
ey of the Book of the Law. Josiah bound not only "all who were present in Judah and Benjamin" to stand to the covenant contained in it, but he "took away all the abominations out of all the countries that pertained to the children of Israel, and made no more <=osherIsrael, and first took even to serve Jehovah their God. And all his days they departed not from serving Jehovah the God of their fathers." (2 Chr. xxxvii. 32, 33).

Later yet, during the vice-royalty of Gedaliah, we find still the same feeling manifested on the part of the Ten Tribes which had shown itself under Hez-
kiah and Josiah. Eighty delegates from Shechem, from Shiloh, and from Samaria, came with all the signs of mourning, and bearing offerings in their hand, to the Temple at Jerusalem. They thus testi-
ified both their sorrow for the desolation that had come upon it, and their readiness to take a part in the worship there, now that order was restored. And this, it may be reasonably presumed, was only one party out of many who came on a like errand. All the facts prove that, so far as the intercourse between Judah and the remnant of Israel from being embittered by religious animosities, that it was the religious bond that bound them together. Hence it would have been quite possible during any por-
tion of this period for the mixed Samaritan popula-
tion to have received the Law from the Jews.

This is far more probable than that copies of the Pentateuch should have been preserved amongst those families of the Ten Tribes who had either escaped when the land was shaven by the razor of the king of Assyria, or who had straggled back thither from their exile. If even in Jerusalem itself the Book of the Law was so scarce, and had been so forgotten, that the pious king Josiah knew nothing of its contents till it was accidentally disco-
veryed; still less probable is it that in Israel, given up to idolatry and wasted by invasions, any copies of it should have survived.

On the whole, we should be led to infer that there had been a gradual fusion of the heathen settlers with the original inhabitants. At first the former, who regarded Jehovah as only a local and national deity like one of their own false gods, endeavored to appease Him by adopting in part the religious worship of the nation whose land they occupied. But in course of time, this was in many cases either abandoned entirely, or else continued not by mixing with the resident population, but by sending to the king of Assyria for one of the Is-
raelitish priests who had been carried captive. But in process of time, the amalgamation of races be-
came complete, and the worship of Jehovah super-
seded the worship of idols, as is evident both from the wish of the Samaritans to join in the Temple worship after the Captivity, and from the absence of all idolatrous symbols on Gerizim. So far, then, the history leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it might have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or they might have been introduced thither during the religious reforms of Josiah. But we have no direct evidence in the books of the Pentateuch, or in the evidence of the Samaritans, that the Pentateuch was written by Moses by the Samaritans. This we find after the Babylonish exile, at the time of the institution of the rival worship on Gerizim. Till the return from Babylon there is no evidence that the Samari-
tans regarded the Jews with any extraordinary dislike or hostility. But the manifest distrust and suspicion which Nehemiah met their advances when he was rebuilding the walls of Jerusalem pro-
voked their wrath. From this time forward, they were declared and open enemies. The quarrel be-
tween the two nations was further aggravated by the determination of Nehemiah to break off all mar-
rriages which had been contracted between Jews and samaritans. Manasseh the brother of the high-
priest (so Josephus calls him, Ant. xi. 7, § 2), and himself acting high-priest, was one of the offended. He refused to divorce his wife, and took refuge with his father-in-law Sanballat, who conspired him for the loss of his proudly privilege in Jerusalem by making him high priest of the new Samaritan temple on Gerizim. With Manasseh many other apostate Jews who refused to divorce their wives, fled to Samaria. It seems highly probable that these men took the Pentateuch with them, and adopted it as the basis of the new religious system which they inaugurated. A full discussion of this question would be out of place here. It is sufficient merely to show how far the existence of a Samaritan Pentateuch, not mate-
rially differing from the Hebrew Pentateuch, bears upon the question of the antiquity of the latter. And we incline to the view of Pisoceaux (Connect. book vi. chap. i.,) that the Samaritan Pentateuch was in fact a transcript of Ezra's revised copy. The same view is virtually adopted by Gesenius (De Pent. Sac. pp. 8, 9).

3. We are now to consider evidence of a more indirect kind, which bears not so much on the Mosaic authorship as on the early existence of the work as a whole. This last circumstance, how-
ever, if satisfactorily made out, is, indirectly at least, an argument that Moses wrote the Pentateuch. Hengstenberg has tried to show that all the later books, by their allusions and quotations, presuppose the existence of the Books of the Law. He traces, moreover, the influence of the Law upon the whole life, civil and religious, of the nation after their settlement in the land of Canaan. He sees its spirit transfused into all the national literature, of which the Pentateuch is the first instance, and particularly into the books of the Prophets, not except on the basis of the Pentateuch as already existing before the entrance of the Israelites into Canaan, the whole of their history after the occu-
pation of the land becomes an inexplicable enigma. It is impossible not to feel that this line of proof is, if established, peculiarly convincing, just in propor-
tion as it is indirect and informal, and beyond the reach of the ordinary weapons of criticism. Now, beyond all doubt, there are numerous most striking references both in the Prophet and in the books of Kings to passages which are found in our present Pentateuch. One thing at least is certain, that the theory of men like Von Bodeln, Vatke, and others, who suppose the Pentateuch to have been written in the times of the latest kings, is utterly discredited. It is established in the mode and manner that the legal portions of the Pentateuch already existed in writing before the separation of the two kingdoms. Even as regards the historical portions, there are often in the later books almost verbal coincidences of expression, which render it more than probable that these also existed in writing. All this has been argued with much learning, the
most indefatigable research, and in some instances with great success by Hengstenberg in his *Antiquité des Pentateuchs*. We will satisfy ourselves with pointing out some of the most striking passages in which the coincidences between the later books and the Pentateuch (omitting Deuteronomy for the present) appear.

In Joel, who prophesied only in the kingdom of Judah; in Amos, who prophesied in both kingdoms; and in Hosea, whose ministry was confined to Israel, we find references which imply the existence of a written code of laws. The following comparison of passages may satisfy us on this point: Joel ii. 14; with Ex. xiv. 14; ii. 3; with Gen. ii. 8, 9 (comp. xxvii. 20); ii. 17 with Num. xiv. 13; ii. 20 with Ex. x. 19; iii. 1 (ii. 28, E. V.) with Gen. vi. 12; iii. 13 with Ex. xxxiv. 6; iv. [iii.] 18 with Num. xxxv. 1. — Again, Amos ii. 2 with Num. xxxi. 28; ii. 7 with Ex. xiii. 6, Lev. xx. 3; ii. 8 with Ex. xii. 25, &c.; ii. 9 with Num. xiii. 32, &c.; iii. 7 with Gen. xviii. 17; iv. 4 with Lev. xxiv. 3, and Deut. xiv. 28, xxvi. 12; v. 12 with Num. xxv. 1 (comp. xviii. 11); v. 12 with Ex. xii. 12; v. 21, &c. with Num. xxix. 35, Lev. xxix. 30; vi. 1 with Num. i. 17; vi. 6 with Gen. xxviii. 25 (this is probably the reference: Hengstenberg's is wrong); vi. 8 with Lev. xxvi. 19; vi. 14 with Num. xxxix. 8; vii. 6 with Ex. xxii. 2, Lev. xxvi. 39; ix. 13 with Lev. xxi. 3-5 (comp. Ex. iii. 8). — Again, Hosea ii. 2 with Lev. xv. 7-7; ii. 1 [i. 10] with Gen. xvii. 12, xxii. 12; ii. 2 [i. 11] with Ex. i. 10; iii. 2 with Ex. xxii. 22; iv. 8 with Lev. vi. 17, &c. and vii. 1, &c.; iv. 10 with Lev. xxvi. 29; iv. 17 with Ex. xxxii. 9, 10; v. 6 with Ex. x. 9; v. 2 with Gen. xviii. 18; vii. 8 with Ex. xxxiv. 12-16; xii. 6 [A. V. 5] with Ex. iii. 15; xii. 10 [9] with Lev. xxiii. 43; xiii. 15 [14] with Gen. ix. 5.

In the books of Kings we have also references as follows: 1 K. xx. 42 to Lev. xxvii. 29; xiii. 3 to Lev. xxv. 23, Num. xxxvi. 8; xxi. 10 to Num. xxxv. 30; comp. Deut. xviii. 6, 7, xix. 15: xxi. 17 to Num. xvi. 16, 17. — 2 K. iii. 20 to Ex. xxxix. 38, &c.; iv. 1 to Lev. xxv. 39, &c.; v. 27 to Ex. iv. 6, Num. xii. 10; vi. 18 to Gen. xix. 11; vi. 28 to Lev. xxvi. 29; vii. 2, 19 to Gen. vii. 11; vii. 3 to Lev. xxiv. 46 (comp. Num. v. 3).

But now it, as appears from the examination of all the authorities, literature, the Pentateuch existed as a canonical book: if, moreover, it was a book so well known that its words had become household words among the people: and if the prophets could appeal to it as a recognized and well-known document, — how comes it to pass that in the reign of Josiah, one of the latest kings, its existence as a canonical book seems to have been almost forgotten? Yet such was evidently the fact. The circumstances, as narrated in 2 Chr. xxxiv. 14, &c., were these: In the eighteenth year of his reign, the king, who had already taken active measures for the suppression of idolatry, determined to execute the necessary repairs of the Temple, which had become seriously dilapidated, and to restore the worship of Jehovah in its purity. He accordingly directed Hilkiah the high priest to take charge of the moneys that were contributed for the

PENTATEUCH, THE a

Purpose. During the progress of the work, Hilkiah, who was busy in the Temple, came upon copy of the Book of the Law — which must have long lain neglected and forgotten — and told Shaphan the scribe of his discovery. The effect produced by this was very remarkable. The king, to whom Shaphan read the words of the book, was filled with consternation when he learnt for the first time how far the nation had departed from the Law of Jehovah. He sent Hilkiah and others to consult the prophetess Huldah, who only confirmed his fears. The consequence was that he held a solemn assembly in the house of the Lord, and read in their ears all the words of the book of the covenant that was found in the house of the Lord."

How are we to explain this surprise and alarm in the mind of Josiah, betraying as it does such utter ignorance of the Book of the Law, and of the severity of its threatenings — except on the supposition that as a written document it had well-nigh perished? This must have been the case, and it is not so extraordinary a fact perhaps as it appears at first sight. It is quite true that in the reign of Jehoshaphat pains had been taken to make the nation at large acquainted with the Law. That monarch not only instituted "teaching priests," but we are told that as they went about the country they had the Book of the Law with them. But that was 300 years before, a period equal to that between the days of Luther and our own; and in such an interval great changes must have taken place. It is true that in the reign of Ahaz the prophet Isaiah directed the people, who in their hopeless infatuation were seeking counsel of ventriloquists and necromancers, to turn "to the Law and to the Testimony;" and Hezekiah, who succeeded Ahaz, had no doubt regained in the spirit of the prophet's advice. But the next monarch was guilty of outrageous wickedness, and filled Jerusalem with idols. How great a degradation might one wicked prince effect, especially during a lengthened reign! To this we must add, that at no time, in all probability, were there many copies of the Law existing in writing. It was probably then the custom, as it is still in the East, to trust largely to the memory for its transmission. Just as at this day in Egypt, persons are to be found, even illiterate, in other parts of the world, who retain, the whole Kur'an by heart, and as some modern Jews are able to recite the whole of the Five Books of Moses, a so it probably was then: the Law, for the great bulk of the nation, was orally preserved and inculcated. The ritual would easily be perpetuated by the mere force of observance, though much of it doubtless became perverted, and some part of it perhaps obsolete, through the neglect of the priests. So was it against the perfunctory and lifeless manner of their worship, not against their total neglect, that the burning words of the prophets are directed The command of Moses, which hid upon the king the obligation of making a copy of the Law for himself, had of course long been disregarded. Here and there perhaps only some prophet or righteous man possessed a copy of the sacred book. The bulk of the nation were without it. Nor was there any

a See Mr. Grove's very interesting paper on Nablins and the Samaritans in *Vacation Travels*, 1831. Speaking of the service of the yom kippur in the Samaritan synagogue, he says that the recitation of the Pentateuch was continued through the night, "without even the feeble lamp which on every other night of the year but this burns in front of the holy books. The two priests and a few of the people know the whole of the Torah by heart" (p. 346).
reason why copies should be brought under the notice of the king. We may understand this by a parallel case. How easy it would have been in our own country, before the invention of printing, for a similar circumstance to have happened. How many copies, do we suppose, of the Scriptures were made? Such as did exist would be in the hands of a few learned men, or more probably in the libraries of monasteries. Even after a translation, like Wycliffe's, had been made, the people as a whole would know nothing whatever of the Bible; yet they were a Christian people, and were in some measure at least instructed out of the Scriptures, though the volume itself could scarcely ever have been seen. Even the monarch, unless he happened to be a man of learning or piety, would remain in the same ignorance as his subjects. Whatever knowledge there was of the Bible and of religion would be kept alive chiefly by means of the Liturgy used in public worship. So it was in Judah. The oral transmission of the Law and the living witness of the prophets had superseded the written document, till at last it had become so scarce as to be almost unknown. But the hand of God so ordered it that when king and people were both zealous for reformation, and ripe for the reception of the truth, the written document itself was brought to light.

On carefully weighing all the evidence hitherto adduced, we can hardly question, without a literary skepticism which would be most unreasonable, that the Pentateuch is to a very considerable extent as early as the time of Moses, though it may have undergone many later revisions and corrections, the last of these being certainly as late as the time of Ezra. But as regards any direct and unanswerable testimony to the composition of the whole work by Moses we have it not. Only one book out of the five—that of Deuteronomy—claims in express terms to be from his hand. And yet, strange to say, this is the very book in which modern criticism revives most peremptorily to admit the claim. It is of importance therefore to consider this question separately.

All that the Book of the Covenant in Exodus, perhaps a great part of Leviticus, and some part of Numbers, were written by Israel's greatest leader and prophet. But Deuteronomy, it is alleged, is in style and purpose so utterly unlike the genuine writings of Moses that it is quite impossible to believe that he is the author. But how then set aside the express testimony of the book itself? How explain the fact that Moses is there said to have written all the words of this Law, to have consigned it to the custody of the priests, and to have charged the Levites solemnly to preserve it by the side of the ark? Only by the bold assertion that the fiction was invented by a later writer, who chose to personate the great Lawgiver in order to give the morecolor of consistency to his work! The author first feigned the name of Moses that he might gain the greater consideration under the shadow of his name, and then proceeds to reiterate, but in a broader and more spiritual manner, and with true prophetic inspiration, the chief portions of the earlier legislation.

a That even in monasteries the Bible was a neglected and almost unknown book, is clear from the author's conversion.

b It is a significant fact that Ewald, who will have that Deuteronomy was written in the reign of Mo-
PENTATEUCH, THE

[xxvi. 16], which would be very extraordinary if the book had only been written in the time of Manasseh.

The phraseology of the book, and the archaisms found in it, stamp it as of the same age with the rest of the Pentateuch. The form מְנָהַג, instead of מְנָה, for the feminine of the pronoun (which occurs in all 195 times in the Pentateuch), is found 32 times in Deuteronomy. Nowhere do we meet with מְנָה in this book, though in the rest of the Pentateuch it occurs 11 times. In the same way, like the other books, Deuteronomy has יִפְחַה as a maiden, instead of the feminine יִפְחַה, which is only used once (xxvi. 19). It has also the third pers. pret. יִפְחַה, which in prose occurs only in the Pentateuch (Ewald, Lehrbuch, § 142 b). The demonstrative pronoun יִפְחַה, which (according to Ewald, § 183 a) is characteristic of the Pentateuch, occurs in Deut. iv. 42, vii. 22, xix. 11, and nowhere else out of the books of Moses, except in the last book, 1 Chr. xx. 8, and the Aramaic Ezra, v. 15.

The use of the אֲלֵה locale, which is comparatively rare in later writings, is common to Deuteronomy with the other books of the Pentateuch; and so is the old and rare form of writing הָיָה, and the termination of the future in וְקָנֶה. The last, according to König (A. T. Stud. 2 Heft), is more common in the Pentateuch than in any other book; it occurs 58 times in Deuteronomy. Twice even in the preterite, viii. 3, 16, a like termination presents itself; on the peculiarity of which Ewald (§ 190 b, note) remarks, as being the original and fuller form. Other archaisms which are common to the whole five books are: the shortening of the הָיָה, הָיָה, i. 33; הָיָה, xxvi. 12, &c.; the use of יִפְחַה as "to meet," the construction of the passive with הָיָה of the object (for instance, xx. 8); the interchange of the older יִפְחַה (xix. 1) with the more usual יִפְחַה; the use of יִפְחַה (instead of יִפְחַה), xvi. 16, xx. 13, a form which disappears altogether after the Pentateuch; many ancient words, such as בִּכְרֵי, כְּרֵי, כְּרֵי, יְרֵי, etc. (Ex. xiii. 12). Amongst these are some which occur besides only in the book of Joshua, or else in very late writers, like Ezekiel, who, as is always the case in the decay of a language, studiously imitated the oldest forms; some which are found afterwards only in poetry, as כְּרֵי (vii. 13, xxviii. 9, &c.), and יְרֵי, so common in Deuteronomy. Again, this book has a number of words which have an archaical character. Such are, כְּרֵי (for the later כְּרֵי, instead of כְּרֵי); the old Canaanite יְרֵי הָרְתָף, "offspring of the flocks;" יְרֵי, which as a name of Israel is borrowed, Is. xlv. 2; יְרֵי, i. 41, "to act valiantly;" יְרֵי, "to be silent;" יְרֵי, xv. 14, "to give," lit. "to put like a collar on the neck;" יְרֵי, "to play the lord;" יְרֵי, "sickness."

2. A soundness for the use of figures is another peculiarity of Deuteronomy. See xxix. 17, 18; xxviii. 13, 44: i. 31, 44; vii. 5; xxviii. 29, 49. Of similar comparisons there are but few (Helftisch says but three) in the other books. The results are most surprising when we compare Deuteronomy with the Book of the Covenant (Ex. xix.—xxiv.) on the one hand, and with Ps. xc. (which is said to be Moses) on the other. To cite but one example: the images of devouring fire and of the bearing on eagles' wings occur only in the Book of the Covenant and in Deuteronomy. Comp. Ex. xxiv. 17, with Deut. iv. 24, ix. 3; and Ex. xiv. 4, with Deut. xxxii. 11. So again, not to mention numberless undesigned coincidences between Ps. xc. and the book of Deuteronomy, especially chap. xxxii., we need only here cite the phrase יְרֵי כּוֹפֶר (Ps. xc. 17), "work of the hands," as descriptive of human action generally, which runs through the whole of Deut. ii. 7, iv. 29, xvi. 19, xxiv. 19, xxviii. 12, xxx. 9. The same close affinity, both as to matter and style, exists between the section to which we have already referred in Leviticus (chs. xxii., xxiii.), so manifestly different from the rest of that book, the Book of the Covenant (Ex. xix.—xxiv.), and Deuteronomy.

In addition to all this, and very much more might be said — for a whole harvest has been gleaned on this field by Schultz in the Introduction to his work on Deuteronomy — in addition to all these peculiarities which are arguments for the Mosaic authorship of the book, we have here, too, the evidence strong and clear of post-Mosaic times and writings. The attempt by a wrong interpretation of 2 K. xxvii. and 2 Chr. xxvi. to bring down Deuteronomy as low as the time of Manasseh fails utterly. A century earlier the Jewish prophets borrow their words and their thoughts from Deuteronomy. Amos shows how intangible his acquaintance with Deuteronomy was by such passages as ii. 9, iv. 11, ix. 7, whose matter and form are both colored by those of that book. Hosea, who is richer than Amos in these references to the past, whilst, as we have seen, he draws of allusions to the whole Law (vi. 7, xii. 4, &c., xiii. 9, 10), in one passage, vii. 12, using the remarkable expression, "I have written to him the ten thousand thangings of my Law," manifestly includes Deuteronomy (comp. xii. 8 with Deut. xxii. 22), and in many places shows that that book was in his mind. Comp. iv. 13 with Deut. xii. 2; viii. 13 with Deut. xxviii. 68; xi. 3 with Deut. xxi. 5; xvi. 6 with Deut. viii. 11-14. Isaiah begins his prophecy with the words, "Hear, O heavens, and give ear, O earth," taken from the month of Moses in Deut. xxxii. 1. In fact, echoes of the tones of Deuteronomy are heard throughout the solemn and majestic discourse with which his prophecy opens. (See Caspary, Beitrag zur Einl. in d. Buch Jesos, p. 203-210.) The same may be said of the Psalms. In his protest against the apostasy of the nation from the Covenant with Jehovah, he appeals to the mountains as the sure foundations of the earth, in like manner as Moses, Deut. xxxii. 1, to the heavens and the earth. The controversy of Jehovah with his people (Mic. vi. 3-5) is a compendium, as it were, of the history of the Pentateuch from Exodus onwards, whilst the expression יְרֵי כּוֹפֶר, "Slave-house" of Egypt,
3. Heuteronomy, excepting the concluding part, is entirely the work of Moses, as it professes to be.

4. It is not probable that this was written before the three preceding books, because the legislation in Exodus and Leviticus as being the more formal is manifestly the earlier, whilst Heuteronomy is the spiritual interpretation and application of the Law. But the letter is always before the spirit: the thing before its interpretation.

5. The first composition of the Pentateuch as a whole did not have taken place till after the Israelites entered Canaan. It is probable that Joshua, and the elders who were associated with him, would provide for its formal arrangement, custody, and transmission.

6. The whole work did not finally assume its present shape till its revision was undertaken by Ezra after the return from the Babylonish Captivity.

IV. Literature.

1. Amongst the earlier Patristic expositors may be mentioned—
The chief American writers who have treated of the Pentateuch are Stuart, Crit. Hist. and Defence of the O. T. Canon; and Bush, Concordances on the Five Books.

J. J. S. P.

It is generally the custom of able discussion critics to make all needful concessions to the modern critical views of the Pentateuch, and its concluding propositions might be still more conservatively stated. It is, perhaps, enough to say that Genesis apparently rests to a considerable extent (rather than "chiefly") on earlier documents. The second, third, and fourth of the closing propositions may be quite firmly held.

The proposition that the composition of the Pentateuch as a whole "could not have taken place till after the Israelites entered Canaan." For, the revision admitted in the sixth proposition needed to be but slight, in order to produce all the present marks of later date. After half a century of debate, we are in a position to see that, notwithstanding all the scholarship and acuteness that have been brought to attack the authorship and authenticity of the Pentateuch, few movements in the history of criticism have comprised a greater amount of arbitrary and extravagant assertion, irrelevant reasoning, mutual contradiction, and unwarranted conclusion. Meanwhile the style and structure of these books has undergone a searching investigation, many interesting features have been brought to light, several untenable positions abandoned, and some important convictions made.

The most unsparing criticism is now compelled to admit: (1.) The essential and systematic unity of the present Pentateuch (Exod. Geschichtc, i. 92; Tuch, Genesis. Vorr. xxii.; Knobel, Genesis, § 16; Hopfcd, Die Quellen, p. 190).

(2.) The general historic truthfulness of the narrative, from the dispersion of the nations onward, excepting its miraculous portions (Knobel, Genesis, p. 235), and Genesis, p. 376). (3.) The extraordinary character, career, and influence of Moses; even Ewald recognizing that age (Geschichte, ii. 238, &c.) as "a wonderfully elevated period, a focus of most surprising power, resolution, and activity;" the deliverance of the nation as an event of "unparalleled importance;" the victory at the Red Sea as a far brighter day than Marathon or Smolov (and perhaps himself as "the mighty originator and leader of what are now national movement;" its "law-giver and prophet." So also Knobel to the same effect (Ex. p. 22), and Bunsen (Bibelleherr, Die Mosesische Geschichtc). (4.) The important fact that portions of the Moses narrative certainly are as old as the time of Moses, and even older. Thus De Wette declares the oracles in Num. xvi. 17, 18, 27-30, that they may with certainty be referred to the time of Moses (Einleit, § 149); Knobel, that Moses published his laws in writing, "though it is uncertain to what extent" (Koen. Numab. p. 592). Davidson, following Bleek chiefly, specifies more than twenty chapters which must have come from Moses with very slight change (Introf. i. 109), among which the passage Ex. xxxv. - xxxvi.

was "probably written down by him in its present state." Ewald pronounces Lamech's song to be very ancient, belonging to a time anterior to Moses (i. 75, note): the fourteenth of Genesis of the highest antiquity, also coming down from "before the age of Moses" (i. 80, 146). He admits the preservation of actual laws, sayings, and songs of Moses and his contemporaries (ii. 29-32), among which are the Decalogue, and Num. vi. 24-26, x. 35, 36, xxi. 17, 18, 27-30: Ex. iii. 15, xvii. 16, xvi. 1-21. Such admissions, however grudging and scanty, from the ablest, wildest, and most captious of scholarly critics, show the necessity of the case; and they carry with them consequences which are more easily blinched than faced. It remained for one whose scholarship was extemporized like that of the Bishop of Natal, to deem it "possible, and indeed as far as our present inquiries have gone, highly probable, that Moses may be an historical character," although, "this is merely conjectural" (Colenso, Pent. ii. 70).

The most objectionable features of the modern German criticism of the Pentateuch have been its constant dogmatism, its frequent extravagances, the steady rationalistic bias under which it has been conducted, and, quite commonly, the hiatus between its premises and its conclusions. The following observations may cast further light on the subject.

(1.) It is proper to admit that the question of the authorship of the Pentateuch has been so presented as to affect its historic value and its authority. Ewald and others ask us to accept it as containing traditions originating at a period remote from the events, vouched for by no responsible authority, and, though containing a basis of truth, yet uncertain and unsatisfactory in detail, and of course destitute of proper value even as history. Whereas, if it comes from Moses, it carries not only the historic weight of a narrative by an actor in the events, but the extraordinary weight of Moses's character and circumstances. The attempt at disintegration has been made also an attempt at invalidation. Dr. Colenso openly avows this issue (Pent. ii. 62). Anonymous books of the Canon are indeed received with entire confidence and reverence, and an important difference is this: In the present instance there are claims of authorship positively put forth by the writer, and as positively denied by the critics. Not only do Kurzt and Delitzsch, but De Wette, Knobel, and Davidson, affirm that the book of Deuteronomy (as a whole) claims to have been written by Moses. Davidson coolly remarks, that "this was a bold step for the unknown author" (Introf. i. 375), and De Wette, that "the obscurity and unfitness of these claims deprive them of all value as proofs" (Introf. § 162). Consequently when these writers openly deny the fact, they impeach the veracity of the book. This aspect of the case it is not necessary nor wise to overlook.

(2.) At the same time the extravagances and the mutual divergencies and conflicts of the critics are a legitimate subject of consideration, in estimating the force of their conclusions. Many able scholars seem to have lost sobriety and fairness on this subject. They adduce arguments which would have no weight in any other discussion,—they which they are themselves obliged to admit are not conclusive. What is more preposterous than the theory of Vater and Hartmann, that the Pentateuch
consists only of a series of fragments strung together without order or design? Whence then the origin of the learned hankard's critical sagacity which can detect some seven principal documents and writers, followed by the Deuteronomist (also drawing largely on "many documents"), and several other editors? Meanwhile the advocates of the "supplement" theory are by no means agreed in any one aspect of the case—whether it be the number, the dates, or the respective positions of the writers. It is really an adequate statement to say of De Wette, Bleek, Stihelin, Tuch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schulte, Vaihinger, that "they all alike recognize two documents." They hold this, and more also. Tuch, indeed, recognizes in the first four books but two main documents, together with various sections from independent sources; and De Wette, after two or three changes, adopted the same opinion. He however makes the Deuteronomist to be a third distinct writer; while Stihelin identifies the Deuteronomist with the Jehovist. Vaihinger finds in Genesis alone three writers, a pre-Elohist, an Elohist, and a Jehovist; also a separate writer for Deuteronomy. Hupfeld finds four persons concerned in the composition of Genesis: two Elohists, a Jehovist, and a Jehovist. It is also found difficult of his companions in supposing that the Jehovist knew nothing of the Elohistic work; while he holds to a separate Deuteronomist. Knobel finds four writers besides the Deuteronomist: a ground-work, a hexa-

...
Knobel declares that וְּפִּ לֵלֵנֶּֽלֶּֽלָּ occurs only in the Jehovist; and having found two cases (Gen. xxvii. 38, xxxix. 11), he simply forces the third by cutting away the last half of xxxi. 16, and referring it also to the Jehovist. In ver. 14 of the same chapter he also removes the single phrase "putting on his shoulder," to sustain his theory that the Jehovist is more minute in description than the Elohist. Davidson declares that the expression "angel of God," or "angel of Jehovah," never occurs in the Elohist; and, to escape the force of Gen. xxxi. 17, and xxxii. 11, he ascribes the first, notwithstanding the invariable Elohist before and after, to the redactor, and the second, similarly situated and twice containing Elohim, to a second Elohist. He finally surrenders his position on this subject of diverse phraseology, by declaring that his "argument is based on the prevailing, not the exclusive usage in each." *(Introd. to the O. T. p. 30).* For other specimens of this arbitrary and inconsistent method, see Exodus. Surely it is a cheap process to build theories of such materials.

(iv.) It is instructive to observe the somewhat steady retrogression of these theories in the land of their birth. The "fragmentary hypothesis of Yater and Hartmann was long ago exploded by the doctrine of an elaborate authorship. The "supplement hypothesis" that followed was unable to sustain itself in any one form; but relief was sought by various enlargements of the number of documents. Thus Dr. Davidson in 1862, after accepting a theory of four principal writers in Genesis, still finds it necessary to add, that "probably the Elohist used several brief documents besides oral tradition. So, too, the Jehovist may have done." Bonsen and Bleek, who are among the latest of these speculators, are extremely vague and cautious in details. And in regard to the supposed date of the Elohist and the Jehovist, we have the following remarkable scale of approach to the time of Moses, not quite in chronological order: Lengerke (1844) refers the Elohist to the time of Solomon, and the supplementer to that of Solomon; Tuch (1858) refers the times of Saul and Solomon; Bleek to the times of Saul or the Judges and of David; Stähelin, of the Judges and of Saul; Delitzsch (1852), of Moses and of Joshua, or one of the elders who survived him; Kurtz (1853, 2d ed.) supposes Deuteronomy and sections of the other books written by Moses in the Desert, and the Pentateuch completed, perhaps by one of Aaron's sons, immediately after the occupation of the promised land; and Schultz (1859) makes the later writer or Jehovist, to be also the author of Deuteronomy, and none other than Moses himself. This movement is both hopeful and significant, notwithstanding that the later dates still find abundant advocates.

(v.) It is well to mark the obvious inconclusiveness of much of the reasoning of these hypotheses. The most elaborate shuffling of documents does not, as seems often to be assumed, dispose Moses' authorship. Moses may have used them — unless they can be positively shown to be of later date. He may be, as Schultz holds, the very Jehovist. A modern historian, like Bancroft, incorporates directly into his narrative large quotations from other accounts. He is glad to avail himself of the very words of actors and eye-witnesses. But he is to less the author of the history, when he employs, and as it were vouches for, these original accounts. Accordingly, we may freely recognize the use of older documents and firmly hold Moses to be the historian, — as do Rosenmuller, Jahn, Bux, Stuart, Lewis, Rawlinson, Murphy, and even Keil of the Fall. Why should not the account of Creation, Paradise, and the Fall, have been handed down? And of so stupendous an event as the Flood, that has imprinted itself on the memory of almost all nations, even the most degraded, why should not the careful narrative, reading in the original like the minute record of an eye-witness, have descended down the chosen of God to the sphere of itself? Why do the striking indications that Gen. xiv. is a narrative older than the time of Moses, slightly modernized? On the other hand, a few external marks of a later period — a name or two, here and there an explanatory remark or interpolated comment, such as the lapse of several hundred years might naturally occasion, and which a modern editor would attach in the form of foot-notes, — be no means conclusive of the later composition of the book, more especially if there are valid reasons on other grounds to believe the contrary. Still more hollo is the attempt to argue a later date by accumulated references to passages which cannot themselves be shown to have had a later origin. e. g. Gen. xiii. 18 (Hebrdn), xl. 15 (the Hebrews), Deut. xxvii. 14–20 (the future monarchy). Dr. Davidson, who has gathered up a large array of reasons for believing the later date of Deuteronomy, is obliged repeatedly to admit the inconclusiveness of several portions of his argument. He devotes ten pages to a showing of the differences between its legislation and that of the other books; and yet concedes that the changes and modifications "are not radical ones," and are "only a development of the first"; and that it is "possible indeed to conceive of Moses making these very modifications (Introd. i. 353, 363). Again after presenting a catalogue of historic deviations from the other books, he closes by granting that "there is no positive contradiction between them" (p. 367). And yet these utterly inconclusive considerations are steadily pared as proofs. In order to show a difference in the tone of thought, Davidson is not ashamed to cite the injurious words "in the form of your heart," in evidence that "the ceremonial law was less valued" then (p. 369). The scholarly Knobel does not hesitate to swell his catalogue of diversities of style by instancing long lists of words limited in their use by the very nature of the subject, such as the technical words concerning the sacrifices. Nor should we overlook the cool assumption which has prevailed from De Wette to Davidson, and which begs the whole question of a revelation, by taking for granted that a narrative of miracles disproves a contemporaneous origin; or the equally vicious assumption which invalidates much of Bleek's arguing, that not only any prophetic utterance or allusion, but anything which can be construed as an anticipative transaction, must have been written after the event so anticipated. It is in such matters that so little of this reasoning is carried on.

(vi.) We cannot fail to observe how very few are the clear marks of a later hand, whether anachronisms or seeming interpolations. Considering the labor expended, the unattended results are small. The fact of glosses or interpolations upon the original narrative has long been admitted. The Rabbinic noticed eighteen passages of this kind, not all
equal clear. Sixty years ago John constrained nine or ten short passages (Ex. vi. 14-29, vii. 7, xi. 3; Deut. ii. 10-12, 20-24, iii. 9-11, 13, 14, x. 6-9; Num. xxxii. 41), as undoubtedly not belonging to the second Sanguar. Modern writers have cited others, often on unsound grounds. Of clear anomalous, the number is exceedingly slight. Of course the account of Moses's death was by a latter hand; and a sufficient intimation is given in the book itself, in the declaration (Deut. xxxi. 24 II.) that when Moses finished the Book of the Law, he handed it over to the Levitical guards. So the book itself, as the author usually precedes the work, though in some cases it is otherwise, as in Kiechan's work on the reign of Charles V., of which all the complete editions proceed without a break, to give an account of the death and burial of the author. The word "Dun" (Gen. xiv. 14) we incline to regard as later, though reasons can be given to the contrary; "Hebron" and "Horam" we do not. [D.N., HEBRON, HORMAH.] The Gilgal of Deut. x. 39 is clearly a different place from that which was first named in Josh. v. 9. See Keil on Joshua. "The Cannaanite was then in the land" (Gen. xii. 6, viii. 7), admits of three explanations, maintained respectively by Knobel, Delitzsch, and Kalisch, either of which removes all implication of a later date; "already in the land," says Kalisch, "for they were never entirely extirpated." "Before there reigned any king over Israel" (Gen. xxxvi. 31), might spring from the time of the kings; or (Delitzsch) it might be written from the stand-point of the previous promise, v. 11. "I was stolen from the land of the Hebrews" (Gen. xi. 3, 5), is a natural expression to the Egyptians, who had known "Abiram the Hebrew," and who knew the people of that land as Hebrews (Gen. xxiii. 14, xii. 12). "As the land sped out the nations before you" (Levit. xvi. 28) cases to carry any weight when we translate, as the Hebrew equally admits, and as ver. 20 implies, "will have sped out." The phrase "unto this day," sometimes cited, is so indefinite, in one instance denoting merely a part of Jacob's lifetime (Gen. xviii. 13), and in another (Josh. vi. 25) a part of Rahab's life, that every one who interprets it does not understand it meaning westward (Gen. xii. 8, &c.), and "beyond Jordan" (Gen. i. 11), meaning east of Jordan, are cited as indications of a Palestinian writer. But if Genesis is right in declaring the Hebrew to have had its early home in Palestine, both phrases would be simply old and settled terms of the language, with a fixed geographical meaning. Ex. xvi. 35, 39 certainly has the aspect of a later origin, notwithstanding the defense of Hengstenberg, Keil, Havernick, and Murphy. These are the strongest cases of supposed anomalous; of which but one is absolutely certain, and only two or three others present any considerable claims; while all together, if admitted, would make but a small show. Other cases are instanced, but with less plausible reason, as the attempt by which we seek to prove that the principle by which Black cited prospective laws, like Deut. xvii. 14-29, xiv. 14, x. 5, 6, as proofs of later composition. The attempt of Colenso and others to show that the use of the word Jehovah itself indicates a late origin, and to sustain this position by reference to the Jehovah- and Elohist-Psalmus is destitute of any solid basis, and no questions concerning the date, authorship, and arrangement of the Psalms are unsettled, to make the argument of any account. But (1) in order to make a great contrast between the earlier and later psalms in the use of the word Jehovah, Colenso company with the men of his school, and accepts the historic assertions of early date in the titles — when it will serve his turn; and he rejects them, when they will not answer his purpose, as in Ps. xxxiv, and exult. the former of which is exclusively Jehovahistic, — rejects them for the circular reason that these psalms do contain the name Jehovah so often. (2) Of the Post psalms accepted by him as early psalms, one half contain the name Jehovah. (3) It is questionable whether the Davidic psalms of the three later books are by David or his royal successors. [PSALMS.] (4) Some have held that the arrangement of the Psalms was governed by the preponderant use of the Divine names. (5) The attempt is futile in the face of the historic statement in Ex. vi. 3, that God had made Himself emphatically known to Moses as Jehovah, while the earlier names Joshua and probably Mariah, are proofs that this was not the first disclosure of the name itself; a fact which further appears in a large number of other names found in 1 Chron. ii. 8, 25, 32, iv. 2, v. 2, 3, 5, 8, xxiii. 17, 19, 20 — although Colenso remarks that the chronicler simply invented the names, and Davidson observes that "little weight attaches to these, because the Hebrews often altered older names for later ones!" The apparent number of explanatory glosses is greater than that of the seeming anomalous; but the clear cases are not numerous. Here opinions will differ. Some passages so clearly break the connection as to be commonly admitted. It is i perhaps conceded by sober critics that Ex. x. 6, 7 (probably 6-9) is an interpolation (or, certainly a misplacement); also most or all of iii. 9-14 and iv. 10-12, 20-25. (Rosenmuller, however, asserts that the last mentioned to Moses at the end of his life, and Hengstenberg and Keil refer all three to him,) John would add Num. xxxii. 41, and, with no very obvious necessity, such historic supplements as the titles Deut. i. 1-4, iv. 14-19, and others not specified. (5) The others include Rosenmuller and John, the assertion of Moses' meekness (Num. xii. 3), and (with John) other remarks concerning him, Ex. vi. 26, 27, vii. 6, 3; while some writers still maintain that these are demanded by the connection and occasion, and that Moses could be divinely guided thus to speak the truth concerning himself. These are the strongest cases that are adduced. Others are cited, of which the most that can be said is that they might be interpolations; and also that they might not. It is of no avail for Black to allege Num. xx. 32, while the children of Israel were in the wilderness; for they had left the wilderness before the death of Moses. On the whole there is almost reason for surprise that so few passages can be found in the Pentateuch which could not have come from the hand of Moses himself. In a composition so ancient we should naturally look for more, rather than fewer signs of editorial revision. (xvii) We can now look at the strength of the evidence that Moses was the author of the book as a whole. Hardly any thing is lacking to the completeness of the concurrent testimony. We can merely call attention to it in the most manifest outlines. 1. The supposition is rendered entirely admissible by all the circumstances of the case.
(a.) The art of writing was in abundant use, and the Israelites in Egypt had lived in the midst of it.
(b.) The requisite impulse for a written composition had arrived, in the completion of a great national and religious epoch, and the permanent establishment of laws and institutions founded on a great deliverance. (c.) The occasion had come for such a book as the Pentateuch, incorporating the institutions within the history. (d.) The requisite person had appeared in Moses, the man whom even Ewald names "the mighty originator and leader of this entire new national movement," a "master-mind" "putting forth the highest energies and sublimest efforts of the spirit" "with clear insight and self-possession," "the greatest and most original of prophets," with endowments so remarkable that the same spirit has in no other prophet produced results so important in the history of the world as in Moses. Such a work became such a man; and such a man might be supposed to possess the requisite "insight" for such a work.

2. The fact of his authorship is sustained by positive and concurrent evidence, in great variety and abundance. It is easier for objectors to overlook than to meet it. (a.) The Pentateuch itself declares of Moses, and declares only that he was concerned in its composition. Nearly the whole of Deuteronomy, as even De Wette, Knobel, and Davidson concede, claims to have been written by him. Statements are explicitly made concerning portions of Exodus and Numbers to the same effect: Ex. xxiv. 7, xxxiv. 27, 28, xvi. 14; Num. xxx. ii. 1-3. In one of these passages (Ex. xvii. 14) the direction is given to write it "in the book," "not a book, and therein shall not be it only, but in the Law; and to the Law as a written law, are found in Deut. xviii. 19, xxxi. 911, 24, xxviii. 58, 61, xxix. 20, 21, xxx. 10. Meanwhile we find God giving explicit directions (Ex. xxv. 16-21, 22) to deposit his communications to Moses in the ark; corresponding to this direction is the claim, repeated over and over, that such utterances are the precise utterances of Jehovah, e. g. "law, xxiv. 34; Num. xxxvi. 13; while the expressions, "the Lord spake unto Moses, saying," and the Lord said unto Moses," occur in connection with various groups of communications in Exodus, Leviticus, and Numbers more than 100 times besides other similar forms; and some fifty times in announcing the performance of many of these communications, we are told that it took place "as the Lord commanded Moses," or, according to the commandment of the Lord by the hand of Moses. These constant claims to be exact statements of God's commandments by Moses, placed beside the direction to deposit in the ark, constitute the clearest and most pervading assertion of the Mosaic authorship of the main portion of the three centum books.

(b.) Deuteronomy, confessedly asserting its own Mosaic origin, everywhere preserves. (c.) The former books; and it re-asserts and revoices for all the main portions of their history from the dispersion of the race to the death of Aaron and the arrangements for Moses's successor, while its comments include directly and implicitly all the leading features of their legislation. As Schulz remarks, it is incredible that at the end of his life the great legislator should have been regardless of the text of his law, solicitudes only about the discussions which were the comment. (c.) The subsequent books of the O. T. abundantly presuppose the Pentateuch, and in every instance in which they allude to the authorship, they refer to Moses. This topic has been sufficiently developed in the original article. (d.) It was the undisputed testimony of the Jewish nation at and before the time of Christ that Moses wrote the Pentateuch. Such is the testimony of Philo from Alexandria, and of Josephus from Jerusalem. (Philo, Manegy, ii. 141, 149, Josephus, Beker, III. i. 5, xii. etc.) So also the Talmud from Babylonia, in a passage apparently of great antiquity. Their statements are supported by the occasional references of the N. T., which at the lowest estimate show the current view by referring a passage from Exodus, Leviticus, or Deuteronomy alike to "Moses," and by recognizing the whole O. T. as consisting, according to the then prevailing classification, of the "law of Moses, the prophets, and the Psalms," or hagiographa (Luke xxiv. 44). (e.) The Lord Jesus Christ and the writers of the N. T. held their testimony. The Law is the law of Moses (John vii. 23; Acts xxv. 5; Heb. x. 28), or simply Moses (Acts xxii. 21). Moses gave the Law (John i. 17, vii. 19). Statements found in the several books are statements of Moses (Luke xx. 37, Rom. x. 3, Acts ii. 22; Matt. xix. 8). The entire utterances of the Pentateuch concerning the priesthood are called "Moses spake concerning the priesthood" (Heb. vii. 14). The Saviour directly declares (John vi. 45, 47), that Moses "wrote of me," and that he left "writings" then in the hands of the Jews. See also Luke xxiv. 27, 44, Acts xxii. 22, xxvii. 25, xvi. 21, 2 Cor. iii. 15, Luke xvi. 23, 31. Those only who hold the views of Colenso and Davidson will deem it sufficient to say that the Saviour only "sared the blood of Abel in a larger key;" and, as without it is difficult to explain the conditions of the case to say that He simply accommodated himself to the prevalent view by the argumentum ad hominem; for Christ's declaration in John v. 45, 47, is too direct and self-originated to be easily disposed of otherwise than in (Aldorf's words) as "a testimony to the fact of Moses having written those books which were then and are still known by his name." (f.) The force of all these testimonies is increased by the fact that they are absolutely uncontradicted. While the Pentateuch itself, the subsequent books of the O. T., the Jewish nation, the Saviour and the Apostles, point to Moses with such entire unanimity that the echo comes back from foreign nations, in Manetho, Hecataeus, Strabo, Tacitus, referring the Jewish laws and institutions to Moses alone, not one hint is to be found in the whole range of history or literature that any person later or other than Moses composed either the volume or any integral portion of it. Never was testimony more unbroken.

3. The direct testimony is confirmed by various collateral indications, which we can only suggest. (a.) Traces of the Pentateuch in the other books of the O. T. extending almost up to the time of Moses, except as the authenticity and early date of those books also are denied. (b.) Various archaisms characteristic of the five books, and of those almost or quite alone: e. g. סנה as a feminine 195 times in Deuteronomy), and in no certain instance elsewhere; יִּנֶּפֶר as a feminine; the demonstrative יִּנֶּפֶר, found but twice elsewhere; the Kal future ending י for יִּנֶּפֶר, the far greater predominance of the full future יִּנֶּפֶר; the
The Pentateuch, the

what was peculiarly "the game of the wilderness." The consecration of the whole tribe of Levi, as the same writer remarks (i. 188), is a clear memorial of that early period, since at no later time was there observed any such occasion; and the provision of cities of refuge (i. 191) points back to a nomadic life and the morals of the desert. (c) Delitzsch shows that there was no singular period of the nation from which the Law as a whole could have sprung; neither the barbarous times of the Judges, nor the insignificant time of Saul; whereas the reigns of David and Solomon, rich as they were in building-materials, do not in themselves indicate whatever that the Law then first assumed written form. It did not originate after the division of the kingdoms, for Israel and Judah alike acknowledged its sway. Nor in the exile: for the people in returning from the exile return also to the thourah as the original divine basis of their long shattered commonwealth. And as to Ezra, both history and tradition disclose him only as a restorer and never as an original writer. (f) Finally, those who deny the authorship by Moses, cannot suggest, much less agree upon any plausible substitute.

(viii.) Let us now summarily notice the invalidity of all the objections raised, as against this evidence. "Higher criticism" has failed to shake the testimony. Von Bohlen's attempt to show errors in the allusions to Egyptian customs notably recalled. The arithmetical objections marshaled by Colenso have been superabundantly demolished. The alleged errors and false implications concerning the wilderness have been largely addressed to our ignorance; and many of the objections have been shown also to have sprung from ignorance; whereas every new research brings to light new correspondences between the narrative and the circumstances. The cited anachronisms shrink into the smallest compass; and, so far as they exist, can be legitimately accounted for as revisions. The apparent interpolations are themselves indications of the antiquity of the text. The assertion, that "the mythological, traditional, and exaggerated element" (Davidson) — that is, the miraculous shows that Moses could not have been the author, is a mere begging of the whole question of the supernatural. The argument that there is not difference enough between the language of the Pentateuch and of the later books, to be accounted in several ways: It is conceded by the objectors (e. g. Davidson, i. 104) that there are differences, but they are alleged to be insufficient, — a matter of degree and a question of opinion. That the diversities should not be great is explicable from the isolation, the consolidation, and complete intercommunication of the nation, as well as from the uniformity of their moral and religious life, and the readiness of their institutions and their civilization. It is paralleled by the fact that the Syriac of the Peshito in the second century is substantially the same as that of the Syriac writers of the 13th century. And furthermore, it is admitted on all hands, by Dr. Wette, Knobel, Bleek, Flawil, that portions of the Pentateuch are actually as old as Moses; and Knobel even admits the difficulty of deciding what is Mosaic and what is not; while the difference between the admitted psalms of David and the language of Ezra's time — though a period far more eventful in historic changes — are not such as to have made the Psalms difficult of apprehension at the latter period. Again, "repetitions, duplicate
and diverse narratives" — if all the cited instances were real — do not bear upon this question. No more does the alleged composite character of the book; for, to whatever extent a compilation, unless there be positive proof of later date, nothing prevents Moses from having been the "reductor" or the "Jehovist." Without here going further into that question, we will only say that while Hengstenberg has too vehemently repelled the idea of a composite character, and has gone to extremes in the endeavor to find always a special reason for the use of Elohim and Jehovah respectively, on the other hand, the opposite school have gone to a still greater extreme in the attempt to dissect and precisely to determine the sources of each part of the composition. It is a well-considered remark of Kurtz at the close of his History of the Old Testament: "We venture to express it as our confident persuasion that the question as to the origin and composition of the Pentateuch is far from having been settled, either by Havernick, Hengstenberg, or Keil, on the one hand, or by Tuch, Stähelin, and Delitzsch on the other, and still less by Ewald or Hupfeld." There is nothing then to invalidate the clear evidence that Moses was the author, unless it be the few detached words and passages seemingly of later growth. But it has been well said by the writer of the preceding article, "we are not obliged because of the later date of these portions to bring down the rest of the book to later times. Indeed no procedure is, under the circumstances, more unreasonable, provided they can be satisfactorily explained otherwise. But they can be thus explained. The succession of prophets continued till Ezra and Nehemiah, more than a thousand years after Moses. In view of the lapse of time and of the effects of the exile, (1) it is a perfectly natural supposition that explanatory additions should have been made by some of these later prophets. (2) The Scriptures render the suggestion probable by their notices of Ezra. He is not only in general "the scribe" (Neh viii. 4), but he is "a ready scribe in the Law of Moses" (Ex. vii. 6), "a scribe of the words of the commandments of the Lord and of his statutes to Israel" (vii 11), who "had prepared his heart to seek the Law of the Lord and to do it, and to teach in Israel statutes and judgments" (ver. 10). He is also declared not only to have brought the book of the law before the assembly of the people, but to have read it publicly in their hearing through a succession of days (Ex. viii. 1-5, 18), but he and his Levites "read in the Law of God distinctly, and gave the sense, and caused them to understand the reading" (viii. 8). Now let Ezra but have done for the Scriptures permanently and in view of the permanent necessity, that which he did orally and transiently this occasion, and the whole phenomenon fully explained. (3) Accordingly there are traditional indications that this kind of supplemental work was actually performed. The Babylonian Talmud, in a well-known passage apparently of great antiquity (see Westcott, The Bible in the Church, pp. 35-37), ascribes eight verses of the Pentateuch [the last eight] to Joshua; and the same passage declares that several of the books of the O. T. were "written" or reduced to their present form] by others than their proper authors, among them "the men of the Great Synagogue"; while Ezra and Nehemiah end the list with writing their own books and completing the books of Chronicles. Concurrent with this is the tradition of 2 Esdras (xiv. 29-10), handed down also by the early fathers, fabulously embellished indeed, and ascribing to Ezra the reproduction of the lost Scriptures by immediate inspiration. But, as Dr. Davidson well said in his Biblical Criticism (l. 103), "the historic basis of the view that Ezra bore a leading part in collecting and revising the sacred books is not shaken by the fabulous circumstances in the writings of the early fathers, in passages of the Talmud, and in later Jewish authors." We may well accept this method of explaining the phenomenon.

We accordingly reach the conclusion that nothing added by recent discussions need shake our belief that Moses was the author of the Pentateuch. We may accept the traces of earlier narratives, as having been employed and authenticated by him; and we may admit the marks of later date as indications of a surface revision by authorized persons not later than Ezra and Nehemiah.

Among the later publications are Murphy on Genesis (1864) and Exodus (1866); Kalischer on Genesis, Exodus, and Leviticus (1858-1867); Lange on Genesis; Jacobus on Genesis; Macdonald's Introduction to the Pentateuch (1851); Davidson's Introduction to the Old Testament (1892-1893); and The Book of Genesis: The Common Version revised for the Amer. Bible Union, with Explanatory Notes, by T. J. Coulant (N. Y. 1868). See also a discussion of the historic character and authorship of the Pentateuch, in the Bible, Sivra for April and July, 1863, and July and October, 1894, by the present writer. S. C. B.

PENTECOST (Ex. xxiii. 16) ἀρπὴ γερμανου πρωτογενεν κειματος : solemnitas novis primitivorum : "the feast of harvest, the first fruits of thy labors;"

PENTECOST ἀρπὴ γερμανου πρωτογενεν κειματος : solemnitas novis primitivorum : "the feast of weeks;" (Num. xxviii. 26, cf. Lev. xxiv. 17): ἡμερα των view: dies primitivorum; "the day of first fruits"). In later times it appears to have been called ἀρπὴ γερμανου την ἐπετειαν (see Joseph. B. J. ii. 3, § 1); and hence, ἡμερα της Πεντεκοστης (Jub. i. 1: 2 Macc. xxxii. 21; Acts ii. 1: xx. 16; I Cor. xvi. 8). But the more common Jewish name was της Πεντεκοστης (in Chaldee, της Πεντεκοστης; Arsavold, in Joseph. Ant. iii. 10, § 6). The second of the great festivals of the Hebrews. It fell in due course on the sixth day of Sivan, and its rites, according to the Law, were restricted to a single day. The most important passages relating to it are, Ex. xxiii. 16, Lev. xxii. 13-22, Num. xxviii. 26-31, Deut. xvi. 9-12.

1. The time of the festival was calculated from the second day of the Passover, the 16th of Nisan. The Law prescribes that a reckoning should be kept from "the day after the Sabbath" b (Lev. in the Mishna (Rosh haSh. i. 2, and Chagig. ii. 4, &c.), in the Targum (Num. xxvii. 29), in Josephus, and elsewhere, see § 5.

b There has been from early times some difference
PENTECOST

xxii. 11, 15) ["PASSOVER, II. 3"] to the morrow
after the completion of the seventh week, which
would of course be the fiftieth day (Lev. xxiii. 15,
16; Deut. xvi. 9). The fifty days, formerly
included the three high-harvest, or festival
weeks with the offering of the first sheaf of the barley-harvest in
the Passover, and ending with that of the two first
leaves which were made from the wheat-harvest, at
this festival.

It was the offering of these two leaves which was the distinguishing rite of the day of Pentecost.
They were to be leavened. Each leaf was to con-
tain two bunches of barley (Ex. xxiii. 19); could be
the finest wheat flour of the new crop (Lev.
xxiii. 17). The flour was to be the produce of the
land. The leaves, along with a peace-offering
of two lambs of the first year, were to be waved before
the Lord and given to the priests. At the same
time a special sacrifice was to be made of seven
leaves of the first year, one young bullock and two
rams, as a burnt-offering (accompanied by the proper
measures and drink-offerings), and a kid for a sin-offering
(Lev. xxiii. 18, 19).

Besides these offerings, if we adopt the interpretation of the Kabbinical writers, it appears that an addition was made to the daily
sacrifice of two bullocks, one ram, and seven lambs,
as a burnt-offering (Num. xxviii. 27). At this, as
well as the other festivals, a free-will offering was

of opinion as to the meaning of the words ἡ γεύσις. It has however been generally held, by
either Jewish and Christian writers of all ages, that
the Sabbath here spoken of the first day of the con-
vocation of the Passover, the 15th of Nisan, mentioned
Lev. xxviii. 7. In like manner the word γεύσις is evidently used as a designation of the day of stone-
ment (Lev. xxviii. 32); and γεύσις (sabbath observa-
tion) is applied to the first and eighth days of Tabernacles
as the Feast of Trumpets. That the LXX,
so understood the passage in question can hardly be
doubted from their calling it "the morrow after
the first day" (i.e. of the festival): ἡ γεύσις τοῦ τεκτον
The word in v. 15 and 16 has also been understood
by some, as used in the same manner as γεύσις in the N.T. (Matt. xvii. 14; Luke xvii. 29: John xx. 19,
&c.). But some have insisted on taking the Sabbath
to mean nothing but the seventh day of the week, or
"the Sabbath of creation," as the Jewish writers have
called it; and they see a difficulty in understanding
the same word in the general sense of a week as a period
of seven days, intending that it can only mean
a regular week, beginning with the first day, and ending
with the Sabbath. Hence the Battistian (or Sabbnin-
evian) party, and in later times the Karaites, supposed
that the omer was offered on the day following the
weekly Sabbath which might happen to fall within the
seven days of the Passover. The day of Pentecost
would thus fall on the first day of the week.
Zitzig (Osten et Pfleiderer, Heidelberg, 1837) has put
forth the notion that the Hebrews regularly began
a new week at the commencement of the year, so that
the 7th, 14th, and 21st of Nisan were always Sabbath
days. He imagines that "the morrow after the Sab-
batth of the 15th, or first new moon, which Pentecost was on the 224th day of the month, the day after the proper termi-
nation of the Passover. He is well answered by Rahr
(Symolk. ii. 192), who refers especially to Josh. v.
11, as proving, in connection with the law in Lev. xxvii.
14, 15, that the offering was made on the 15th of the month.
It should be observed that the words in that passage,
μεθρέοντες τὸν οἶνον τῆς γεύσεως, mean merely corn of the land, not in A. V. "the old corn of the land." "The morrow
after the Passover" (ἡ γεύσις τοῦ τεκτον), might at
first sight seem to express the 15th of Nisan; but the
expression may, on the whole, with more probability, be
taken as equivalent with "the morrow after the Sabbath," that is, the 15th day. See Keil on Josh. v.
11; cf. Josh. viii. 33. For the same word, see also the
passage in the Qumran text, in the Ori-
7; Bartonora, in Cognizanz. iv. 4; Bux. Syn. Jud. xx.;
Fagius, in loc. xxviii. 15; Drusius, Nota Majores in
Lev. xxviii. 15. It is worthy of remark that the LXX.
renders τῆς γεύσεως τοῦ ναοῦ, according to the texts of
Tischendorf and Thiele.

1. The ἐπικεφαλής, or tenth (in A. V. "tenth deal"),
is explained in Num. v. 15, ἀπὸ τῆς ἐπικεφαλῆς ἡ τέταρτη,
"the tenth part of an ephah." It is sometimes called
ὁ νηστēμα, omer, literally, a hundred (Ex. xvi. 36),
the same word which is applied to the first sheaf of the
Passover. (See Joseph, Ant. vii. 2, § 9) [WIEGAND
AND MEASURERS.]

2. This is what is meant by the words in Lev. xxvii.
17, which stand in the A. V. "out of your habita-
tions," and in the Vulgate, "ex omnibus habitationum
præstris." The Hebrew word is not ἡ γεύσις, a house, as
the house of a family, but ὑπώρεια, a place of abode,
as the territory of a nation. The LXX. has, ἀπὸ τῆς
ἐπικεφαλῆς ἡ τέταρτη, ἀπὸ τῆς ἐπικεφαλῆς ἡ τέταρτη.
Drusius, in Cit. Sac.

c. The differing statements respecting the proper
sacrifices for the day in Lev. xxviii. 18, and Num.
xxviii. 27, are thus reconciled by the Jewish writers
(Mishna, Mekoroth, in 2, with the notes of Bartonora
and Maimonides). Josephus appears to add the two
statements together, not quite accurately, and does
depend them as relating to two distinct sacrifices
[Ant. iii. 10, § 6]. He enumerates, as the whole of
the offerings for the day, a single lamb, two lambs for a
peace-offering, three bullocks, two rams and four-
teen lambs for a burnt-offering, and two kids for a
sin-offering. Rahr, Winer, and other modern critics,
regard the statements as discordant, and prefer that
of Num. xxviii. 27, as being most in harmony with the
sacrifices which belong to the other festivals.
The lambs for a peace-offering were to be waved by the priest, before they were slaughtered, along with the loaves, and afterwards the loaves were waved a second time along with the shoulders of the lambs. One loaf was given to the high-priest and the other to the ordinary priests who officiated (Maimon. in Daniel, p. 8, quoted by Conow.). This loaf was eaten that same night in the Temple, and no fragment of it was suffered to remain till the morning (Joseph. B. J. vi. 5; § 3: Ant. iii. 10, § 6).

Although, according to the Law, the observance of Pentecost lasted but a single day, the Jews in foreign countries, since the Capitivity, have prolonged it to two days. They have treated the Feast of Trumpets in the same way. The celebration appears to have been made to meet the possibility of an error in calculating the true day. It is said by Bartenora and Maimonides that, while the Temple was standing, though the religious rites were confined to the day, the festivities, and the bringing in of gifts, continued through seven days (Notes to Chagig. ii. 4). The Hallel has been sung at Pentecost as well as at the Passover (Lightfoot, Antiq. and Apologist. Sect. vi. § 3). The number who attended Pentecost in later times appears to have been very great (Acts ii.; Joseph. Ant. xiv. 13, § 14, xvii. 10, § 2; B. J. ii. 3, § 1).

No occasional offering of first-fruits could be made in the Temple before Pentecost (Beccon. i. 3, 6). Hence probably the two loaves were designated "the first of the first-fruits." (Ex. xxii. 19) [Passover, p. 2343, note 4], although the offering of the omer had preceded them. The proper time for offering first-fruits was the interval between Pentecost and Tabernacles (Beccon. i. 6, 10; comp. Ex. xxiii. 16). [First-Fruits.]

The connection between the omer and the two loaves of Pentecost appears never to have been lost sight of. The former was called by Philo, προ·σθή·μιος κέ·τας κατά·ρτή·ς μίαν·νος (De Sept. § 21, v. 25; comp. De Decon Orac. lv. 302, ed. Tisch.). The interval between the Passover and Pentecost was evidently regarded as a religious season. [The custom has probably been handed down from ancient times, which is observed by the modern Jews, of keeping a regular computation of the fiftieth day by a formal observance, beginning with a short prayer on the evening of the day of the omer, and continued on each succeeding day by a solemn declaration of his number in the succession, at evening

a In like manner, the leavened bread which was offered with the ordinary peace-offering was waved and given to the priest who sprinkled the blood (Lev. vii. 13, 14).

c He elsewhere mentions the festival of Pentecost with the same marked respect. He speaks of a peculiar feast kept by the Therapeutæ as προσθήμιος μεγαί·της ἡεκτής της Πεντεκόστης (De Ut. Centumq. v. 234). d According to the most generally received interpretation of the word δευτέριωποιτως (Luke vi. 1), the period was marked by a regularly designated succession of Sabbaths, similar to the several successions of Sundays in our own calendar. It was assumed that the day of the omer was called δευτέριωπος (in the LXX., Lev. xxiii. 11, ἡ ἑβαϊκαρία τῆς προαγοράς). The Sabbath which came next after it was termed δευτέριωποιτως; the second, δευτέριοιδευτέρωπος; the third, δευτέριοιδευτέρωποι; and so on. Philo's expression was first proposed by Seeliger (De Enem. Temp. Lib. vi. p. 567), and has been adopted by Frischmuth, Petrius, and many others.

The less educated of the modern Jews regard the fifty days with some superstition, and, it would seem, are always impatient for them to come to an end. During their continuance, they have a dread of sudden death, of the effect of malaria, and of the influence of evil spirits over children. They relate with gross exaggeration the case of a great mortality, which, during the first twenty-three days of the period, befell the pupils of Alkibi, the great Athenian doctor of the second century, at Jaffa. They do not ride, or drive, or go on the water, unless they are impelled by necessity. They are careful not to whistle in the evening, lest it should bring ill luck. They scrupulously put off marriages till Pentecost. (Stauben, La Vie Juive en Alsace (Paris, 1890), p. 124; Mills, British Jews, p. 207.)

Philo expressly states that it was at the Feast of Trumpets that the giving of the law was commemorated (De Sept. c. 22). [TRUMPESTS, FEAST OF.]

PENTECOST

The coincidence of the day of the giving of the Law with that of the festival, and made use of. Thus Jerome says, "Sapientes numerant, et inueniunt quingues-simae diec exegrosis Israel ex Egypto in vertice montis Sinai legem datam. Unde et Pentecostes celebratur solemnitas, et postea Evangelii sacramentum Spiritus Sancti descripsit complectur." (Epist. ad Felicem, Man. XIX.) St. Augustine speaks in a similar manner: "Pentecostem etiam, id est, a passione et resurrectione Domini, quingues-simae diec celebrans, quo nobis Sanctum Spiritum Paracclerus Jesum promiserat misit; quod futurum est per Judaeorum pascham significatum est, cum quinguessimae post celebratiooem ovis occise, Moties digito Dei scripta legem accept in monte." (Contra Faustum, lib. xxvi. c. 12.) The latter Rabbis spoke with confidence of the commemoration of the Law as a prime object in the institution of the feast. Maimonides says, "Festum Septuagesimae est dies ille, quo lex data est. Ad hujus diei honorem pertinent quo die dies a praecependi solenni festo (Pasch) ad illun usque diec nonnumquam." (M. Nov. Exc. iii. 41.) Al Shubab recognizes the fact, but denies that it had anything to do with the institution of the day, observing, "lex divina non eum habet sanctificationem, nisi, quod ejus memoria recurrat." He adds, "This day is a festival solemnly observed in the Old Testament," (in Leg. 262.), but in general the Jewish writers of modern times have expressed themselves on the subject without hesitation, and, in the rites of the day, as it is now observed, the gift of the Law is kept prominently in view. a V. If the feast of Pentecost stood without an organic connection with any other rite, we should hardly venture in warrant in the Old Testament for regarding it as more than the divinely appointed solemn thanksgiving for the yearly supply of the most useful sort of food. Every reference to its meaning seems to bear immediately upon the completion of the grain-harvest. It might have been a Gentile festival, having no proper reference to the election of the chosen race. It might have taken a place in the religion of any people who merely felt that it is God who gives rain from heaven and fruitful seasons, and who fills our hearts with food and gladness (Acts xiv. 17). But it was, as we have seen, essentially linked on to the Passover, that festival, which, above all others, expressed the fact of a race chosen and separated from other nations. It was not an insulded day. It stood as the culminating point of the Pentecostal season. If the offering of the omer was a supplication for the Divine blessing on the harvest which was just commencing, and the offering of the two leaves was a thanksgiving for its completion, each rite was brought into a higher significance in consequence of the omer forming an integral part of the Passover. It was thus set forth that He who had delivered his people from Egypt, who had raised

that the Apostles on the occasion there spoken of were assembled together for this purpose, in accordance with Jewish custom.

a Some of the Jews adorn their houses with flowers, and other wreaths on their heads, with the declared purpose of testifying their joy in the possession of the Law. They also eat such food as is prepared with milk, because the purity of the divine law is likened to milk. (Compare the expression, "the sincere milk of the word." 1 Pet. ii. 2.) It is a fact of some interest, though in morose connected with the present argument, that, in the service

of the Synagogue, the book of Ruth is read through at Pentecost, from the connection of its subject with harvest (Buxtorf, Syn. Jud. xx.; Steudl., La Vie Juiwe de l'Armée, pp. 123, 132.)

b No sodomy, lightfoot, religion, faith. The full name appears to have been ψηφίσματα τοῦ ἄνθρωπον, strikingly lends for the name purpose.

them from the condition of slaves to that of free men in immediate covenant with Himself, was the same that was sustaining them with bread from year to year. The inspired teacher depicted to God's chosen one, "He maketh peace in thy borders, He filleth thee with the finest of the wheat." (Ps. cxlvi. 14.) If we thus regard the day of Pentecost as the solemn termination of the consecrated period, intended, as the seasons came round, to teach this lesson to the people, we may see the fitness of the name by which the Jews have mostly called it, τοῦ τελευταίου συνελευθέρωσιν, the concluding assembly. b (Passover, p. 234, note a.)

As the two leaves were levered, they could not be offered on the altar, like the unleavened sacrificial bread. (Passover, IV. 3. b.) Al Shubab (in Leg. xxviii.) has proposed a reason for their not being levered which seems hardly to admit of a doubt. He thinks that they were intended to represent the best produce of the earth in the actual condition in which it ministers to the support of human life. Thus they express, in the most significant manner, what is evidently the idea of the festival.

We need not suppose that the grain-harvest in the Holy Land was in all years precisely completed between the Passover and Pentecost. The period of seven weeks was evidently appointed in conformity with the Sabbatical number, which so frequently recurs in the arrangements of the Messianic Law (Feasts: Jubilee.) Hence, probably, the prevailing use of the name, The Feast of Weeks, which might always have suggested the close religious connection in which the festival stood to the Passover.

It is not surprising that, without any direct authority in the O. T., the coincidence of the day on which the festival was observed with that on which the Law appears to have been given to Moses, should have strongly impressed the minds of Christians in the early ages of the Church. The Divine Providence had ordained that the Holy Spirit should come down in a special manner, to give spiritual life and unity to the Church, on that very same day in the year on which the Law had been bestowed on the children of Israel which gave to them national life and unity. They must have seen that, as the possession of the Law had completed the deliverance of the Hebrew race brought by the hand of Moses, so the gift of the Spirit perfected the work of Christ in the establishment of his kingdom upon earth.

It may have been on this account that Pentecost was the last Jewish festival (as far as we know) which St. Paul was anxious to observe (Acts xx. 16, 1 Cor. xvi. 8), and that Whitewind came to be the first annual festival instituted in the Christian Church (Hessey, Bampton Lectures, pp. 88, 96). It was rightly regarded as the Church's birthday, and the Pentecostal season, the period between it and Easter, bearing as it does such a clear analogy
PENUEL

PEN'UE'EL [pañû'el] [face of God]: in Gen. 33:30, elsewhere פְּנֵעֶל: Panauel. The usual, and possibly the original, form of the name of a place which first appears under the slightly different form of PEnel (Gen. xxxii. 30, 31). From this narrative it is evident that it lay somewhere between the torrent Jablakh and Succoth (comp. xxxii. 23 with xxxiii. 17). This is in exact agreement with the terms of its next occurrence, when Gideon, pursuing the hosts of the Midianites across the Jordan into the uplands of Gilead, arrives first at Succoth, and from thence mounts to Penuel (Judg. viii. 5, 8). It had then a tower, which Gideon destroyed on his return, at the same time slaying the men of the place because they had refused him help before (ver. 17). Penuel was rebuilt or fortified by Jeroboam at the commencement of his reign (1 K. xii. 25), no doubt on account of its commanding the fords of Succoth and the road from the east of Jordan to his capital city of Shechem, and also perhaps as being an ancient sanctuary. Succoth has been identified with tolerable certainty at Sokâl, but no trace has yet been found of Penuel.

*PEN'UE'EL [פֶּנֵעֶל]; see above: פְּנֵעֶל: Panauel.

1. A descendant of Judah the "father" or founder of Gedor (1 Chr. iv. 4).

2. A son of Shashak, and one of the chiefs of the tribe of Benjamin. He dwelt at Jerusalem (1 Chr. viii. 25, 28).

PE'OR [פֶּה'ור, "the Poor," with the def. article [opening, clfn.]: פֶּה'ור: mean Phoror [Phgor]); a mountain in Moab, from whence, after having without effect ascended the lower or less sacred summits of Ramoth-Gilead and Pisgah, the prophet Balaam was conducted by Balak for his final conferences (Num. xxii. 28 only).

Poor—or more accurately "the Poor"—was "facing Jeshimon." The same thing is said of Pisgah. But unfortunately we are as yet ignorant of the position of all three, so that nothing can be inferred from this specification. [Nero.]

In the Onomastica ("Fogor;" "Bethphoror;" "Danana") it is stated to be above the town of Libias, the ancient Betharamah, and opposite Jericho. The towns of Beth Peor and Dinhaba were on the mountain, six miles from Libias, and seven from Heshbon, respectively. A place named Ithtarah is mentioned in the list of towns south of Es-Salt in the appendix to the 1st ed. of Dr. Robinson's Bibl. Res. (iii. App. 189), and this is placed by Van de Velde at the head of the Wady Eshek, 4 miles N. of Hebron. But in our present ignorance of these regions all this must be mere conjecture.

Gesenius (Thes. 1119 & q.) gives it as his opinion that Baal-Peor derived his name from the mountain, not the mountain from him.

A Poor, under its Greek garb of Peorog, appears among the eleven names added by the LXX. [Josh. xv. 50] to the list of the allotment of Judah, between Bethlehem and Aittan (Edhum). It was known to Eusebius and Jerome, and is mentioned by the latter in his translation of the Onomastica as Phagor. It probably still exists under the name of Beit Faghour or Kidbet Faghour, 5 miles S. W. of Bethlehem, barely a mile to the left of the road from Hebron (Tobler, 3te Wanderung). It is somewhat singular that both Poor and Pisgah, names so prominently connected with the East of Jordan, should be found also on the West.

The LXX. also read the name, which in the Hebrew text is Pau and Pat, as Poor; since in both cases they have Phagor.

2. [םוֹן פֶּהָר], without the article: פְּהָר: idbim Phoror [Phgor], Phoror [Phgor], Revi Phagor. In four passages (Num. xxv. 18, twice; xxxi. 10; Josh. xii. 17) Poor occurs as a contraction for Baal-peor: always in reference to the licentious rites of Shittim which brought such destruction on Israel. In the three first cases the expression is, "the matter," or "for the sake" (literally "word" in each) of Poor;" in the fourth, "iniquity, or crime of Poor." G.

PERAZIM, MOUNT [פֶּרַזְיִם; mount of breaches]: פֶּרַזְיִים: mons divisiorem. A name which occurs in Is. xxvii. 21 only—unless the place which it designates is identical with the Bara-Peraziim mentioned as the scene of one of David's victories over the Philistines. Isaiah, as his manner was (comp. x. 16), is referring to some ancient triumphs of the arms of Israel as symbolic of an event shortly to happen—Jehovah shall rise up as at Mount Perazim, He shall be wroth as in the valley of Gibeon.

The commentators almost unanimously take his reference to be to David's victories, above alluded to, at Baal Perazim, and Gibeon (Gesenius; Strachey), or to the former of these on the one hand, and Joshua's slaughter of the Canaanites at Gibeon and Beth-horon on the other (Eichhorn; Rosenmüller; Michaelis). Ewald alone—perhaps with greater critical sagacity than the rest—doubts that David's victory is intended, "because the prophets of this period are not in the habit of choosing such examples from his history" (Prophec. i. 261).

If David's victory is alluded to in this passage of the prophet, it furnishes an example, similar to that noticed under Ozeb, of the slight and casual manner in which events of the gravest importance are sometimes passed over in the Bible narrative. But for this later reference no one would infer that the events reported in 2 Sam. v. 18-25, and 1 Chr. xiv. 8-17, had been important enough to serve as a parallel to one of Jehovah's most tremendous judgments. In the account of Josephus (Ant. vii. 4, § 1), David's victory assumes much larger proportions than in Samuel and Chronicles. The attack is made not by the Philistines only, but by all.

A The LXX. have here represented the Hebrew letter Ain by g, as they have also in Raguel, Gomorrah, Kthaliah, etc.

b Perhaps considering the word as derived from פְּנֵעֶל, which the LXX. usually render by פַּרְנֵס.
PERESH

Syria and Phoenicia, with many other warlike nations besides. This is a good instance of the manner in which Josephus, apparently from records now lost to us, supplements and completes the scanty narratives of the Bible, in agreement with the casual references of the Prophets or Psalms. He places the scene of the encounter in the "groves of weeping," as it shudding to the Baacl of Ps. xxxiv.

The title Mount Perazim, when taken in connection with the Mount Perazim of 2 Sam. v, seems to imply that it was an eminence with a heathen sanctuary of Baal upon it. [Baal, vol. i. p. 269 a.]

PERESH (אֶפֶרֶשׁ) [excrement, dung]: Φαφές: [Vat. omits: Πάθρας]. The son of Machir by his wife Manahah (1 Chr. vii. 15).

PEREZ (אֶפֶרֶשׁ) [a breach, rent]: Φαφές: [Vat. Neh. xi. 6. 2Peres: Πάθρας]. The children of Perez: or Pharez, the son of Judah, appear to have been a family of importance for many centuries. In the reign of David one of them was chief of all the captains of the host for the first month (1 Chr. xxvii. 3); and of those who returned from Babylon, to the number of 468, some occupied a prominent position in the tribe of Judah, and are mentioned by name as living in Jerusalem (Neh. vi. 4, 6). [Perez.]

PEREZ-UZZA (אֶפֶרֶשׁ יְצִיב; דָּיוֹד יַעֲשֵׂנִי) Oq14: division Oze, 1 Chr. xiii. 11; and

PEREZ- UZZAH (אֶפֶרֶשׁ יְצִיב; דָּיוֹד יַעֲשֵׂנִי) Oq4: division Oze, 2 Sam. vi. 8. The title which David conferred on the threshing-floor of Nobah, or Cidon, in commemoration of the sudden death of Uzzah: "And David was wroth because Jehovah had broken this breach upon Uzzah, and he called the place Uzzah's breaking unto this day." The word Perez was a favorite with David on such occasions. He employs it to commemorate his having "broken up" the Philistine force in the valley of Rephaim (2 Sam. x. 20). [Baal. Perazim.] He also uses it in a subsequent reference to Uzzah's destruction in 1 Chr. xiv. 12.

It is remarkable that the statement of the continued existence of the name should be found not only in Samuel and Chronicles, but also in Josephus, who says (Ant. vii. 4, § 2), as if it from his own observation, "the place where he died is even now called "the cleaving of Oza."
The situation of the spot is not known. [National.] If this statement of Josephus may be taken literally, it would however be worth while to make some search for traces of the name between Jerusalem and Kirjath-jearim. G.

PERFUMES (אַפֵּרֶשׁ) The free use of perfumes was peculiarly grateful to the Orientals (Prov. xxvii. 9), whose olfactory nerves are more than usually sensitive to the offensive smells engendered by the heat of their climate (Barckhard's Travels ii. 85). The Hebrews manufactured their perfumes chiefly from spices imported from Arabia, though to a certain extent also from aromatic plants growing in their own country. [Perfumes.] The modes in which they applied them were various; occasionally a bunch of the plant itself was worn about the person as a money, or inclosed in a bag (Cant. 1. 13); or the plant was reduced to a powder and used in the way of fumigation (Cant. iii. 6); or, again, the aromatic qualities were extracted by some process of boiling, and were then mixed with oil, so as to be applied to the person in the way of ointment (Deut. xii. 3); or, lastly, the scent was carried about in smelling-bottles suspended from the girdle (Is. iii. 20). Perfumes entered largely into the Temple service, in the two forms of incense and ointment (Ex. xxx. 22-38). Nor were they less used in the public life: not only were they applied to the person, but to garments (Ps. xlv. 8; Cant.

iv. 11), and to articles of furniture, such as beds (Prov. vii. 17). On the arrival of a guest the same compliments were probably paid in ancient as in modern times; the rooms were fumigated; the person of the guest was sprinkled with rose-water; and then the incense was applied to his face and feet (1 Sam. ii. 46; Lane's Med. Egypt. ii. 14). When a royal personage went abroad in his litter, attendants threw up "pillars of smoke" about his path (Cant. iii. 6) Nor is it improbable that

c A similar usage is recorded of the Indian princess; "Quaeque sex sentent in publico compit humerum; turbihns argentea ministri forum, tostumque iner per quod ferri destinavit odoribus compert." (Turtius, viii. 9 § 23).
other practices, such as scenting the breath by chewing frankincense (Lanu, i. 246), and the skin by washing in rose-water (Burckhardt's Arab. i. 58), and fumigating drinkables (Lau, i. 185; Burckhardt, i. 52), were also adopted in early times. The use of perfumes was omitted in times of mourning, whence the allusion in Ex. iii. 24, "instead of sweet smell there shall be stink." The preparation of perfumes in the form either of ointment or incense was a recognized profession among the Jews (Ex. xxx. 23, 35; Ecl. x. 1). [Incense; Ointment.]

W. L. B.

PERGA (Περγά): an ancient and important city of Pamphylia, situated on the river Caba, at a distance of 60 stadia from its mouth, and celebrated in antiquity for the worship of Artēnis (Oiana), whose temple stood on a hill outside the town (Strab. xiv. p. 667; Cic. Verr. i. 20; Plin. v. 26; Mela. i. 14; Ptol. v. 5, § 7). The goddess and the Temple are represented in the coins of Perga. The Cæcumen was navigable to Perga; and St. Paul landed here on his voyage from Paphos (Acts xiii. 15). He visited the city a second time on his return from the interior of Pamphylia, and preached the Gospel there (Acts xiv. 25). For further details see PANTYUVALLA. There are still extensive remains of Perga at a spot called by the Turks Eski-Kalesi (Leske, Asiut Minor, p. 123; Fellows, Asiut Minor, p. 190).

PERGAMOS (γυ Περγαμος, or το Περγαμωμο). A city of Mycs, about three miles to the N. of the river Edgy-tehali, the Cæcumen of antiquity, and twenty miles from its present mouth. The name was originally given to a remarkable hill, presenting a conical appearance when viewed from the plain. The local lands attached a sacred character to this place. Upon it the Caliri were said to have been witnesses of the birth of Zeus, and the whole of the land belonging to the city of the same name which afterwards grew up around the original Pergamos, to have belonged to these. The sacred character of the locality, combined with its natural strength, seems to have determined the position of the ancient temples, a bank for chieftains who desired to accumulate a large amount of specie: and Lysimachus, one of Alexander's successors, deposited there an enormous sum — no less than 9,000 talents — in the care of an Asiatic eunuch named Philterus. In the troublous times which followed the break up of the Macedonian conquests, this officer betrayed his trust, and by successful temporizing, and perhaps judicious employment of the funds at his command, succeeded in retaining the treasure and transmitting it at the end of twenty years to his nephew Eumenes, a petty dynasty in the neighborhood. Eumenes was succeeded by his cousin Attalus, the founder of the Attalic dynasty of Pergamos kings, who by alloying himself with the rising Roman power hid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with Antiochus and Perseus by a gift of all the territory which the former had possessed to the north of the Taurus range. The great wealth which accrued to him from this source employed in laying out a magnificent residential city, and adorning it with temples and other public buildings. His passion, and that of his successor, for literature and the fine arts, led them to form a library which rivaled that of Alexandria; and the impulse given to the art of preparing sheepkins for the purpose of transcription, to gratify the taste of the royal dēktēs, has left its record in the name preserved (charta pergama). Attalos II. was succeeded by his son. Attalus II., is said to have left 600,000 sesterties for a picture by the painter Aristides, at the sale of the plunder of Corinth; and by so doing to have attracted the attention of the Roman general Mummia to it, who sent it off at once to Rome, where no foreign artist's work had then been seen. For another picture by the same artist he paid 100 talents. But the great glory of the city was the so-called Nicopolitium, a grove of extreme beauty, laid out as a thank-offering for a victory over Antiochus, in which was an assemblage of temples, probably all the deities, Zeus, Athene, Apollo, Esclapius, Dionysus, and Aphrodite. The Temple of the last was of a most elaborate character. Its façade was perhaps inhabited by the manner of pictorial work adopted by Philip V. of Macedon, who was repudiated in an attempt to surprise Pergamos during the reign of Attalus II., vented his spleen in cutting down the trees of the grove, and not only destroying the Aphrodisian, but injuring the stones in such a way as to prevent their being used again. At the conclusion of peace it was made a special stipulation that this damage should be made good.

The Attalic dynasty terminated b. c. 133, when Attalus III., dying at an early age, made the Romans his heir. His dominions formed the province of Asi ut propr/a, and the immense wealth which was directly or indirectly derived from this legacy, contributed perhaps even more than the spoils of Carthage and Corinth to the demoralizing of Roman statesmen.

The Sumpnness of the Attalic princes had raised Pergamos to the rank of the first city in Asia as regards splendor, and Pliny speaks of it as without a rival in the province. Its prominence, however, was not that of a commercial town, like Ephesus or Corinth, but arose from its peculiar features. It was a sort of union of a pagan cathedral city, an university town, and a royal residence, embellished during a succession of years by kings who all had a passion for expenditure and ample means of gratifying it. Two smaller streams, which flowed from the north, embracing the town, and then fell into the Caeus, afforded ample means of storing water, without which, in those latitudes, ornamental cultivation (or indeed cultivation of any kind) is out of the question. The larger of those streams — the Bergamctehali, or Cebus of antiquity — has a fall of more than 150 feet between the hills to the north of Pergamos and its junction with the Cæcus, and it brings down a very considerable body of water. Both the Nicopolitium, which has been spoken of above, and the Grove of Esclapius, which became yet more celebrated in the time of the Roman empire, doubtless owed their existence to the means of irrigation thus available; and furnished the appliances for those licentious rituals adopted the Latin termination of the names of such places. A similar exception to the rule occurs in the use of Asos for Assus (Acts xx. 13, 14). (See Trench, Authorized Version, etc., p. 73, 2d ed.) H.
of pagan antiquity which flourished wherever there were groves and hill-altars. Under the Attic kings, Pergamos became a city of temples, devoted to a sensuous worship; and in its origin, according to pagan notions, a sacred place, might not have originally been honored by Jews and Jewish Christians, as one "where was the throne of Satan" (Rev. ii. 13).

After the extinction of its independence, the sacred character of Pergamos seems to have been put even more prominently forward. Coins and inscriptions constantly describe the Pergamenes as νεοκόρους or νεοκόρους προτεινόμενοι, an expression of some kind (which indeed naturally goes together with the inoffensive of religious property). What the deities were to which this title has reference especially, it is difficult to say. In the time of Martial, however, Esculapius had acquired so much prominence that he is called Pergamensis Deus. His grove was recognized by the Roman senate in the reign of Tiberius as possessing the character of a sanctuary, if, too, in the course of his work, refers more than once to the Esculapian ritual at Pergamos as a sort of standard. From the circumstance of this notoriety of the Pergamene Esculapius, from the title Σατυριπ being given to him, from the serpont (which Jewish Christians would regard as a symbol of evil) being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions θρόνος τοῦ Χριστοῦ and ὄνομα τοῦ Χριστοῦ in Revelation and Hebrews have an especial reference to this one pagan deity, and not to the whole city as a sort of focus of idolatrous worship. But although unambitiously the Esculapius worship of Pergamos was the most famous, and in later times became continually more prominent from the fact of its being combined with an excellent medical school (which among others produced the celebrated Galen), yet an inscription of the time of Marcus Antoninus distinctly puts Zeus, Athena, Dionysus, and Asclepius in a coordinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore, that the expressions above quoted should be so interpreted as to isolate one of them from the rest.

The Pergamenes, according to the writers, constitute a portion of the Pergamene Church that some among them were of the school of Barnabas, whose policy was "to put a stumbling-block before the children of Israel, by inducing them σατυρίην εὐδοκίαν καὶ πορείαν" (Rev. ii. 14), is in both its particular and very inappropriate to the Esculapian ritual. It points rather to the Dionysus and Aphisrite worship; and the sin of the debtors, which is condemned, seems to have consisted in a participation in this, arising out of a social amalgamation of themselves with the native population. Now, from the time of the war with Autocles at least, it is certain that there was a considerable Jewish population in Pergamene territory. The decree of the Pergamenes quoted by Josephus (Ant. xiv. 10, § 3) comprehends that the Jews had formed a colony here — he tells us in some of the harbors of their territory, and likewise were holders of land. They are — in accordance with the expressed desire of the Roman senate — allowed in key parts upon all vessels except those belonging to king Ptolemy. The growth of a large and wealthy class naturally leads to obtaining a share in political rights, and the only bar to the admission of Jews to privileges of citizenship in Pergamos would be their unwillingness to take any part in the religious ceremonies, which were an essential part of every relation of life in pagan times. The more lax, however, might regard such a proceeding as a purely formal act of civil obedience, and reconcile themselves to it as Naaman did to "bowing himself in the house of Rimmon" when in attendance upon his sovereign. It is perhaps worth noticing, with reference to this point, that a Pergamene inscription published by Bockeh, mentions by two names (Nicosteanus, who is also called Trypho) an individual who served the temple office of a Deity, and added a title to the name. In the latter, a foreign one, is likely to have been borne by him among some special body to which he belonged, and the former to have been adopted when, by accepting the position of an official, it is difficult to say. In the general Greek population.

(Stраб. xiii. 4; Joseph. Antiq. xiv.; Martial, i. 17; Plin. H. N. xxxiv. 4, 10; Liv. xxxiii. 33, 4; Polyb. vi. 1, xxxii. 23; Bockeh, Inscription. Nos. 3528, 3550, 3553: Philostratus, De Vit. Soph. p. 45, 106; Velhaczeff, Aes. Minores, p. 230; Armadel, Discours in Asia Mineure, ii. 504.)

PERIYA (ΠΕΡΙΔΑ [kernel]: Φερίδα; [Vat.: Φα. Φερίδα: Phereida]). The children of Periá were returned from Babylon with Zerubbabel (Neh. vii. 57). In Ezr. ii. 53 the name appears as Περίδια, and in 1 Esdr. vi. 23 as Περίδια. One of Kammaiot's MSS. has "ευερίδα in Nehemiah.

PERIZITZE, THE, and PERIZITZITES (ΠΕΡΙΖΙΤΙΖΕ, in all cases in the Heb. singular [see below]: of Φερειζίτης: in Ezr. only of Φερεστίτις [Vat.: Rom. Alex. ὑπὲρειζιτίς] Περιζίτις). One of the nations inhabiting the land of Promise before and at the time of its conquest by Israel. They are not named in the catalogue of Gen. xii, so that their origin, like that of other small tribes, such as the Arets, and the similarly named Gerizitizes, is left in obscurity. They are continually mentioned in the formula so frequently occurring to express the Promised Land (Gen. xv. 20; Ex. iii. 8, 17, xxviii. 2; xxix. 2, xxxii. 11; Deut. vii. 1, xxxix. 3; v. 1, xxxiv. 1, 2, xxxv. 2, 3; Ezr. i. 1; Neh. ix. 8). They appear, however, with somewhat greater distinctiveness on several occasions. On Abraim's first entrance into the land it is said to have been occupied by the Canaanite and the Perizitze (Gen. xiii. 7). Jacob also, after the massacre of the Shechemites, uses the same expression, complimenting that his son had "made him to dwell among the inhabitants of the land, among the Canaanite and the Perizitze" (xxxiv. 30). So also in the detailed records of the conquest given in the opening of the book of Judges (evidently from a distinct source to those in Joshua), Judah and Simeon are said to have found their territory occupied by the Canaanite and the Perizitze (Judg. i. 4, 5), with Bazeck (a place not exclusively) as their stronghold, and Abdon-bezek their most noted chief. And thus too a late tradition, preserved in 2 Esdr. i. 21, mentions only the "Canaanites, the Perizites, and the Philistines," as the original tenants of the country. The notice just cited from the book of Judges locates them in the southern part of the Holy Land. Another independent and equally remarkable fragment of the history of the conquest
seems to speak of them as occupying, with the Re-
phain, or giants, the "forest country" on the
western Banks of Mount Carmel (Josh. xvii. 15-
18). Here again the Canaanites only are named
with them. As a tribe of mountaineers, they are
enumerated in company with Amorite, Hittite, and
Jebusite in Josh. xi. 3, xii. 8; and they are cata-
logued among the remnants of the old population
whom Solomon reduced to bondage, both in 1 K.
ix. 20, and 2 Chr. viii. 7. By Josephus the Periz-
zees do not appear to be mentioned.

The significance of the name is not by any
means clear. It possibly meant rustics, dwellers in
open, unwalled villages, which are denoted by a sim-
ilar word. Ewald (Geschichte, i. 317) inclines to
believe that they were the same people with the Hit-
tites. But against this there is the fact that both
they and the Hittites appear in the same lists; and
that not only in mere general formulas, but in the
records of the conquest as above. Redf. has ex-
amined the whole of these names with some care
(in his Alst. en. Namen der Israelitenthuis, 1840); and his conclusion (p. 103) is that, while
the Churcoth were villages of tribes engaged in the
care of cattle, the Perizoth were inhabited by peas-
ants engaged in agriculture, like the Ethiopian of
the Arabs.

PERSEPOLIS

The Persepolis is mentioned only in 2 Macc. ix. 2, where we hear of
Antiochus Epiphanes attempting to burn its tem-
ples, but provoking a resistance which forced him to
fly ignominiously from the place. It was the
capital of Persia Proper, and the occasional resi-
dence of the Persian court from the time of Darius
Hystaspis, who seems to have been its founder, to
the invasion of Alexander. Its wanton destruction
by that conqueror is well known. According to Q.
Curtius the destruction was complete, as the
chief building material employed was cedar-wood,
which caused the conflagration to be rapid and
general (De Rebus Alex. Magn. v. 7). Perhaps
the temples, which were of stone, escaped. At any
rate, if ruined, they must have been shortly after-
wards restored, since they were still the deposito-
ries of treasure in the time of Epiphanes.

Persepolis has been regarded by many as iden-
tical with Pasargade, the famous capital of Cyrus
(see Niebuhr's Lectures on Ancient History, i. 115;
Ouseley, Travels, ii. 316-318). But the positions
are carefully distinguished by a number of ancient
writers (Strab. xv. 3, § 6, 7; Plin. H. N. vi. 26;
Arrian, Exp. Alex. vii. 1; Polyb. vi. 4): and the ruins,
which are identified beyond any reasonable
doubt, show that the two places were more than
40 miles apart. Pasargade was at Mervough,
where the tomb of Cyrus may still be seen; Perse-
opolis was 42 miles to the south of this, near Sta-
kker, on the site now called the Chehel-Minor, or
Forty Pillars. Here, on a platform hewn out of
the solid rock, the sides of which face the four car-
dinal points, are the remains of two great palaces,
built respectively by Darius Hystaspis and his son
Xerxes, besides a number of other edifices, chiefly
temples. These ruins have been so frequently de-
scribed that it is unnecessary to do more than refer
the reader to the best accounts which have been
given of them (Niebuhr, Reise, ii. 121; Chardin,
Voyages, ii. 249; Ker Porter, Travels, i. 570;
Heeren, Asiatic Nations, i. 143-196; Rich, Resi-
dence in Kurdistan, vol. ii. pp. 218-222; Fergus-
on, Palaces of Nineveh and Persepolis restored,
pp. 89-124, &c.). They are of great extent and
magnificence, covering an area of many acres. At
the foot of the rock on which they are placed, in
the plain now called Merriash, stood probably the
ancient town, built chiefly of wood, and now alto-
gether effaced.

Persepolis may be regarded as having taken the
place of Pasargade, the more ancient capital of
Persia Proper, from the time of Darius Hystaspis.
No exact reason can be given for this change, which
perhaps arose from mere royal caprice, Darius hav-
ing taken a fancy to the locality, near which he
erected his tomb. According to Atheneus the
understand the Perizites to be alluded to, and translate
accordingly. In Josh. xvi. 10 they add the Perizzites
to the Canaanites as inhabitants of Gezer.

a See Manasseh, vol. ii. p. 1776
b Ophir hop-perez. A. V., "country villages" (1
Esm. vi. 18); AREL hop-perez. "unwalled towns" (Deut. iii. 5). In both these passages the LXX.
un-
court resided at Persepolis during three months of each year (Herodotus, ii. 152, Ev.), and in the con-
fluent stream of Persians sent on the con-
flicting expeditions of Darius (Xen. Cyrop. viii. 6, § 22, Plut. de Cest. ii. 604; Zonar. iii. 26, &c.) make this uncertain. We cannot doubt, how-
ever, that it was one of the royal residences; and we may well believe the statement of Strabo, that, in the later times of the empire, it was, next to Susa, the richest of all the Persian cities (Geo-
graph. v. v. 3, § 6). It does not seem to have long 

survived the blow inflicted upon it by Alexander;

for after the time of Autostichus Ephiphanes it disap-
ppears altogether from history as an inhabited place.

For fuller information see Rawlinson's Ancient Monarchies, iv. 11, 257-256—11. G. R.

PERSEUS [2 syll.] (Hesperis: Perses, the 
eldest illegitimate or supposititious?) son of Philip 
V. and last king of Macedon. After his father's 
death (c. 170) he continued the preparations for 
the renewal of the war with Rome, which was seen 
to be inevitable. The war, which broke out in c. 
171, was at first only sustained by Persus; but in 
168 he was defeated by L. Emilius Paulus at 
Pylus, and shortly afterwards surrendered with

his family to his conquerors. He graced the tri-
umph of Paulus, and died in honorable retirement 
at Aegae. The defeat of Persus ended the inde-
pendence of Macedon, and extended even to 
Syria the terror of the Roman name (1 Mace. viii. 
5).

B. F. W.

PERSEIA (πέρσεία, i. e. Persia: Hesperis: Per-
sis) was strictly the name of a tract of no very 
large dimensions on the Persian Gulf, which is still 
known as Fars or Persia, a corruption of the 
anct old appellation. This tract was bounded on 
the west by Susiana or Elam, on the north by 
Media, on the south by the Persian Gulf, and on 
the east by Carmania, the modern Kerman. It 
was, speaking generally, an arid and unproductive 
region (Herod. iv. 142; Arx. Lex. xvi. 37; Plut. Lex. 
iii. 60, &c.); but contained some districts of con-
siderable fertility. The worst part of the country 
was that towards the south, on the borders of the 
Gulf, which has a climate and soil like Arabia, be-
ing sandy and almost without streams, subject to 
pasthastul winds, and in many places covered with 
particles of salt. Above the miserable region is a 
tract very far superior to it, consisting of rocky 
mountains—the continuation of Zagros, among 
which are found a good many fertile valleys and 
shores, especially towards the north, in the vicinity 
of Shiraz. Here is an important stream, the Bun-
shahr, which flowing through the beautiful valley of

Perseus, King of Macedon.

AEidradhum of Perseus (Attic talent). Obv. Head of King, r. 

bound with fillet. Rev. BAZAEGE HEPSEOS, thunderbolt; all within wreath.

Mervolost, and by the ruins of Persepolis, is then 
separated into numerous channels for the purpose 
of irrigation, and, after fertilizing a large tract of 
country (the district of Kurjan), ends its course 
in the salt lake of Baktiyan. Vines, oranges, and 
lemons, are produced abundantly in this region; and 
the wine of Shiraz is celebrated throughout Asia. 

Further north an arid country again suc-
ceds, the outskirts of the Great Desert, which 
extends from Persia to Mazenderan, and from Ka-
shian to Lake Zerib. 

Ptolemy (Geog. vi. 4) divides Persia into a 
number of provinces, among which the most im-
portant are Paratracia on the north, which was some-
times reckoned to Media (Herod. i. 101; Steph. Byz. 
ad loc. v. 2, Hippocriana, and Mardynia on the south 
coast, the country of the Marshi. The chief towns 
were Pasargadae, the ancient, and Persepolis, the 
later capital. Pasargade was situated near the 
modern village of Marguvah, 42 miles nearly due 

north of Persepolis, and appears to have been 
the capital till the time of Darius, who chose the far 
more beautiful site in the valley of the Bendemir, 
where the Chekib Minor or "Fifty Villas" still 
stand. [See PERSEPOLIS.] Among 

other cities of less importance were Pa-
ratracia and Gahar in the mountain coun-
try, and Tasci upon the coast. (See 
Strab. x. 7, 5-8; Plut. H. N. vi. 25, 26; Ptolem. 
Geog. vi. 4; Kimne's Persian Empire, pp. 54 80; Malcol-
mu, History of Persia, i. 2; Ker Porter, 
Travels, i. 458, &c.; Rich, Journey from Bushire to 
Persepolis, etc.)

While the district of Fars is the true 
original Persia, the name is more com-
monly applied, both in Scripture and by 
profane authors, to the entire tract 
which came by degrees to be included 
in the limits of the Persian Empire. 

This empire extended at one time from 
India on the east to Egypt and Thrace upon 
the west, and included, besides portions of Europe and 
Africa, the whole of Western Asia between the 
Black Sea, the Caspian, the Persian, and the Indus 
Rivers, upon the north, the Arabian desert, the 
Persian Gulf, and the Indian Ocean upon the south. 
According to Herodotus (iii. 89), it was divided into 
twenty governments, or satrapies; but from 
the inscriptions it would rather appear that the number 
varied at different times, and, when the empire was 
most flourishing, considerably exceeded 
twenty. In the inscription upon his tomb at 
Nakhsh-i Rastum Darius mentions no fewer than 
thirty countries as subject to him besides Persia Proper. 
These are Media, Susiana, Parthia, Aria, 
Bactria, Sageliana, Tbaristan, Zarangia, Arachosia, 
Sattagydia, Gandhara, India, Sceutha, Babylonia, 
Assyria, Arabia, Egypt, Armenia, Cappadocia, Sa-
puria, Ionia, (European) Sceutha, the Ibs. (of the 
Egean), the country of the Sceuthae, (European) 
Ionia, the lands of the Tacari, the Bihusses, the 
Euboeans, the Thracians, and the Col-
chians.

The only passage in Scripture where Persia des-
ignates the tract which has been called above 
"Persia Proper" is Ez. xxxviii. 5. Elsewhere 
the Empire is intended.

G. R.

PERSIANS (πέρσαι: Persai: Perse). 

The name of the people who inhabited the country
called above "Persia Proper," and who thence conquered a mighty empire. There is reason to believe that the Persians were of the same race as the Medes, both being branches of the great Aryan stock, which under various names established their sway over the whole tract between Mesopotamia and Barmah. The native form of the name is Pars, which the Hebrews fairly represents, and which remains but little changed in the modern "Parsee." It is conjectured to signify "the Tigers."

1. Character of the Nation. — The Persians were a people of lively and impresive minds, brave and impetuous in war, witty, passionate, for Oriental truthfulness, not without some spirit of generosities, and of more intellectual capacity than the generality of Asiatics. Their faults were vanity, impatience, a want of perseverance and solidity, and an almost slavish spirit of sycophancy and servility towards their lords. In the times anterior to Cyrus they were noted for the simplicity of their habits, which offered a strong contrast to the luxuriousness of the Medes; but from the date of the Median overthrow, this simplicity began to decline, and it was not very long before their manners became as soft and effeminate as those of any of the conquered peoples. They adopted the flowing Median robe (Fig. 1) which was probably of silk, in lieu of the old national costume (Fig. 2) - a close-fitting tunic and trousers of leather (Herodotus i. 71: compare i. 135); beginning at the same time the practice of wearing on their persons chains, bracelets, and collars of gold, with which precious metal they also adorned their horses. Polygamy was commonly practiced among them; and besides legitimate wives a Persian was allowed any number of concubines. They were fond of the pleasures of the table, indulging in a great variety of food, and spending a long time over their meals, at which they were accustomed to swallow large quantities of wine. In war they fought bravely, but without discipline, generally gaining their victories by the vigor of their first attack: if they were strenuously resisted, they soon flagged; and if they suffered a repulse, all order was at once lost, and the retreat speedily became a rout.

2. Religion. — The religion which the Persians brought with them into Persia Proper seems to have been of a very simple character, differing from natural religion in little, except that it was deeply tainted with dualism. Like the other Aryans, the Persians worshipped one Supreme God, whom they called Ahura Mazda (or Ahura-mazda) (Oromazes) - a term signifying (as is believed) "the Great Giver of Life." From Oromazes came all blessings — he gave the earth, he gave the heavens, he gave mankind, he gave life to mankind (Inscriptions, persian) - he settled the Persian kings upon their thrones, strengthened them, established them, and granted them victory over all their enemies. The royal inscriptions rarely mention any other god. Occasionally, however, they indicate a slight and modified polytheism. Oromazes is the "chief of the gods" so that there are other gods besides

\[\text{Fig. 1. Median dress. Fig. 2. Old Persian dress.}\]

ah, and his good spirits; Ahuramazda and his demons were not worshipped, but only hated and feared. The character of the original Persian worship was simple. They were not destitute of temples, as Herodotus asserts (Herodotus i. 131; compare Beh Insers. col. i. par. 14, § 5); but they had probably no altars, and certainly no images. Neither do they appear to have had any priests. Processions were formed, and religious chants were sung in the temples, consisting of prayer and praise intermixed, whereby the favor of Ahuramazda and his good spirits was supposed to be secured to the worshippers. Beyond this it does not appear that they had any religious ceremonies, sacrifices, apparently were unknown; 6 though thank-offerings may have been made in the temples.

\[\text{a For a fuller account of the origin of the Persians and of other topics discussed in the article, see Rawlinson's Ancient Monarchies, iv. 315 ff.}\]

\[\text{b In his Ancient Monarchies, iv. 224, Prof. Rawlinson admits that the Persians sacrificed certain animals, and may have sacrificed human victims in extreme cases, in some periods of their history.}\]
From the first entrance of the Persians as immigrants into a new territory, they were probably brought into contact with a form of religion very different from their own. Magianism, the religion of the Scythic or Turanian population of Western Asia, had long been dominant over the greater portion of the region lying between Mesopotamia and India. The essence of this religion was worship of the elements — more especially, of the sublimest of all, fire. It was an ancient and imposing system, guarded by the venerable hierarchy of the Magi, consisting its fire-altars where from time immemorial the sacred flame had burnt without interruption, and claiming to some extent mysterious and miraculous powers. The simplicity of the Aryan religion was speedily corrupted by its contact with this powerful rival, which presented special attractions to a rude and credulous people. There was a short struggle for precedence, after which the rival systems came to terms. Dualism was retained, together with the names of Auranazda and Ahriman, and the special worship of the sun and moon under the appellations of Mithra and Homax; but to this was superadded the worship of the elements and the whole ceremonial of Magianism, including the divination to which the Magian priesthood made pretense. The worship of other deities, as Tanata or Anaitis, was a still later addition to the religion, which grew more complicated as time went on, but which always maintained as its leading and most essential element that Dualistic principle wherein it was originally based.

3. Language. — The language of the ancient Persians was closely akin to the Sanskrit, or ancient language of India. We find it in its earliest stage in the Zendavesta [more properly called "Avesta," simply] the sacred book of the whole Aryan race, where, however, it is corrupted by a large admixture of later terms. The inscriptions of the Achaemenian kings give us the language in its second stage, and, being free from these later additions, are of the greatest importance towards determining what was primitive, and what more recent in this type of speech. Modern Persian is its degenerate representative, being, as it is, a medley, largely intermixed with Arabic; still, however, both in its grammar and its vocabulary, it is mainly Aryan; and historically, it must be regarded as the continuation of the ancient tongue, just as Italian is of Latin, and modern of ancient Greek.

4. Division into Tribes, etc. — Herodotus tells us that the Persians were divided into ten tribes, of which three were noble, three agricultural, and four nomadic. The noble tribes were the Parthagades, who dwelt, probably, in the capital and its immediate neighborhood; the Maraphians, who are probably represented by the modern Mafjar, a Persian tribe which prides itself on its antiquity; and the Masjians, of whom nothing more is known. The three tribes engaged in agriculture were called the Panthalians, the Derusians, and the Germanians, or (according to the true orthography) the Cermans. These last were either the actual inhabitants of Karmania, or settlers of the same race, who remained in Persia while their fellow tribesmen occupied the adjoining region. The nomadic tribes are said to have been the Bachi, who appear in Scripture as the "Behavites" (Ex. iv. 9), the Mardi, mountainers famous for their thievish habits (Steph. Byz.), together with the Sagartians and the Berice or Dreplici, colonists from the regions east of the Caspian. The royal race of the Achaemenes was a phratry or clan of the Parthagades (Herod. i. 126); to which it is probable that most of the noble houses likewise belonged. Little is heard of the Maraphians, and nothing of the Masjians, in history; it is therefore evident that their nobility was very inferior to that of the leading tribe.

5. History. — In remote antiquity it would appear that the Persians dwelt in the region east of the Caspian, or possibly in a tract still nearer India. The first record of the Vendidians seems to describe their wanderings in these countries, and shows the general line of their progress to have been from east to west, down the course of the Oxus, and then, along the southern shores of the Caspian Sea, to Blazes, and Media. It is impossible to determine the period of these movements; but there can be no doubt that they were anterior to n. c. 880, at which time the Assyrian kings seem for the first time to have come in contact with Aryan tribes east of Mount Zagros. Probably the Persians accompanied the Medes in their migration from Khorsassan, and, after the latter people took possession of the tract extending from the river Kor to Isaphan, proceeded still further south, and occupied the region between Media and the Persian Gulf. It is uncertain whether they are to be identified with the Boraeu or Parthas of the Assyrian monuments. If so, we may say that from the middle of the 9th to the middle of the 8th century n. c. they occupied southeastern Armenia, but by the end of the 8th century had removed into the country which thenceforth went by their names. The leader of this last migration would seem to have been a certain Achaemenes, who was recognized as king of the newly-occupied territory, and founded the famous dynasty of the Achaemenides, about n. c. 700. Very little is known of the history of Persia between this date and the accession of Cyrus the Great, near a century and a half later. The crown appears to have descended in a right line through the house of Tissesp, Cambyses I, Cyrus I, and Cambyses II, who was the father of Cyrus the Conqueror. Tribes must have been a prince of some repute, for his daughter, Atossa, married Pharnaces, king of the distant Cappadocians (Isag. Sie. ap Phot. Biblioth. p. 118). Later, however, the Persians found themselves able to live the growing strength of Media, and became tributary to that power about n. c. 630, or a little earlier. The line of native kings was continued on the throne, and the internal administration was probably unaltered; but external independence was altogether lost until the revolt under Cyrus.
Of the circumstances under which this revolt took place we have no certain knowledge. The stories told by Herodotus (i. 108-129) and Nicolaus of Damascus (Fr. 66) are internally improbable; and they are also at variance with the monuments, which prove Cyrus to have been the Persian king. [See CYRUS.] We must therefore discard them, and be content to know that after about seventy or eighty years of subjection, the Persians revolted from the Medes, engaged in a bloody struggle with them, and finally succeeded, not only in establishing their independence, but in changing places with their masters, and becoming the ruling people. The result of this revolt is recorded in the Book of Cyrus (c. 528). Its success, by transferring to Persia the dominion previously in the possession of the Medes, placed her at the head of an empire, the bounds of which were the Halys upon the west, the Euxine upon the north, Babylonia upon the south, and upon the east the salt desert of Iran. As usual in the East, this success led on to others. Cyrus the Lydian monarch, who had entered into alliance with the Medes, and venturing to attack the newly-risen power, in the hope that it was not yet firmly established, was first repulsed, and afterwards defeated and made prisoner by Cyrus, who took his capital, and added the Lydian empire to his dominions. This conquest was followed closely by the submission of the Greek settlements on the Asiatic coast, and by the reduction of Caria, Cappadocia, and Lydia. The empire was soon afterwards extended greatly towards the northeast and east. Cyrus rapidly overran the flat countries beyond the Caspian, planting a city, which he called after himself (Arr. Esp. Alex. iv. 4), on the Jaxartes (Jahan); after which he seems to have pushed his conquests still further to the east, adding to his dominions the districts of Herat, Cabul, Candahar, Seistan, and Beloochistan, which were thenceforth included in the empire. (See Oros. Pers. Exc. § 5, et seq. and compare Plin. H. N. vi. 23.) In c. 539 or 538, Babylon was attacked, and after a stout defense fell before his irresistible bands. [BABYLON.] This victory first brought the Persians into contact with the Jews. The conquerors found in Babylon an oppressed race,—like themselves abhorred of idols, —and professors of a religion in which to a great extent they could sympathize. Thus the Persians, who had already driven the Babylonian monarchs forth from their native land and settled in the vicinity of Babylon, Cyrus determined to restore to their own country; which he did by the remarkable edict recorded in the first chapter of Ezra (Ezr. i. 2-4). Thus commenced that friendly connection between the Jews and Persians, which prophecy had already foreshadowed (Is. xlv. 28, xlvi. 1-4), and which forms so important a chapter in the history of the Jewish people. After the conquest of Babylon, and the consequent extension of his empire to the borders of Egypt, Cyrus might have been expected to carry out the design, which he is said to have entertained (Herod. i. 153), of an expedition against Egypt. Some danger, however, seems to have threatened the northeastern provinces, in consequence of which his purpose was changed; and he proceeded against the Massagetae or the Derbies, engaged them, but was defeated and slain. He reigned, according to Herodotus, twenty-nine years.

Under his son and successor, Cambyses III., the conquest of Egypt took place (n. c. 525), and the Persian dominions were extended southward to Elephantine and westward to Eunostera on the North-African coast. This prince appears to be the Ahasuerus c. Ezra (iv. 6), who was asked to alter Cyrus's policy towards the Jews, but (appar- ently) coming under a spell by the words of Herodotus (book iii.), a very complete account of his warlike expeditions, which at first resulted in the successes above mentioned, but were afterwards unsuccessful, and even disastrous. One army perished in an attempt to reach the temple of Ammon, while another was reduced to the last straits in an expedition against Ethiopia. Perhaps it was in consequence of these misfortunes that, in the absence of Cambyses with the army, a conspiracy was formed against him at court, and a Magian priest, Gonastes (Gamauros) by name, professing to be Smerdis (Barsidya), the son of Cyrus, whom his brother, Cambyses, had put to death secretly, obtained quiet possession of the throne. Cambyses was in Syria when news reached him of this bold attempt; and there is reason to believe that, seized with feelings of disgust, and desiring for the sake of the prosperity of the empire, to free himself from the necessity of killing his father, he fled to the last resort of the unfortunate, and ended his life by suicide (Bibl. Inscript. col. i. par. 11, § 10). His reign had lasted seven years and five months.

Gonastes the Magian found himself thus, without a struggle, master of Persia (n. c. 522). His situation, however, was one of great danger and delicacy. There is reason to believe that he owed his elevation to his fellow-religionists, whose object in placing him upon the throne was to secure the triumph of Magianism over the Dualism of the Persians. It was necessary for him therefore to accomplish a religious revolution, which was sure to be distasteful to the Persians, while at the same time he had to keep up the deception on which his claim to the crown was professedly based, and to prevent any suspicion arising that he was not Smerdis, the son of Cyrus. To combine these two aims was difficult; and it would seem that Gonastes soon discovered the latter, and entered on a course which must have soon caused his subjects to feel that their ruler was not only an Achemenian, but no Persian. He destroyed the national temples, substituting for them the fire-altars, and abolished the religious chants and other sacred ceremonies of the Persians. He moreover bestowed on the captives in Persia with respect to the Jews, and forsook by an edict the further building of the Temple (Ezv. iv. 17-22). [ARTAXERXES.] He courted the favor of the subject-nations generally by a remission of tribute for three years, and an exemption during the same space from forced military service (Herod. iii. 67). Towards the Persians he was haughty and distant, keeping them as much as possible aloof from his person, and even removed the walls of his palace. Such conduct made him very unpopular with the proud people who held the first place among his subjects, and, the suspicion that he was a mere pretender having after some months ripened into certainty, a revolt broke out, headed by Darus, the son of Hystaspes, a prince of the blood-royal, which in a short time was crowned with complete success. Gonastes quitted his capital, and, having thrown himself into a fort in Media, was pursued, attacked and slain. Darus, then, as the chief of the conspirators, and after his father the next heir to the throne, was at once acknowledged king. The reign of Gonastes lasted seven months.
The first efforts of Darius were directed to the reestablishment of the Oromasian religion in all its purity. He "rebuilt the temple which Hammurabi consecrated the Magian had destroyed, and restored to the people the religious chants and the worship of which Hammurabi had deprived them" (Belz, _Hist._, col. i, par. 14). Appended to, in his second year, by the Jews, who wished to resume the construction of their temple, he not only allowed them, confirming the decree of Cyrus, but assisted the work by grants from his own revenue, with which he was able to complete the Temple as early as his sixth year (Ezr. vi. 1-15). During the first part of the reign of Darius, the tranquility of the empire was disturbed by numerous revolts. The provinces refused the loss of those exemptions which they had obtained from the weakness of the pseudo-Smerdis, and hoped to shake off the yoke of the new prince before he could grasp firmly the reins of government. The first revolt was that of Babylon, where a native, claiming to be Nebuchadnezzar, the son of Nabonidus, was made king; but Darius speedily crushed this revolt and executed the pretender. Shortly afterwards a far more extensive rebellion broke out. A Mede, named Pharnaces, came forward and, announcing himself to be "Nabathius, of the race of Cyaxares," assumed the royal title. Media, Armenia, and Assyria immediately acknowledged him; the Median soldiers at the Persian court revolted to him: Parthia and Hyrcania after a little while declared in his favor; while in Sagartia another pretender, making a similar claim of descent from Cyaxares, induced the Sagartians to revolt; and in Margiana, Arachotia, and even Persia Proper, there were insurrections against the authority of the new king. His courage and activity, however, seconded by the valor of his Persian troops and the fidelity of some satraps, carried him successfully through these and other similar difficulties; and the result was that, after five or six years of struggle, he became as firmly seated on his throne as any previous monarch. His talents as an administrator were, upon this, brought into play. He divided the whole empire into satrapies, and organized that complex government on which they were henceforth administered (Ravlinson's _History_, ii. 555-598). He built himself a magnificent palace at Persepolis, and another at Susa (Pars.-ox, Susj) . He also applied himself, like his predecessors, to the extension of the empire; conducted an expedition into European Scythia, from which he returned without disgrace; conquered Thrace, Persia, and Macedonia towards the west, and a large portion of India on the east, besides (apparently) bringing into subjection a number of petty nations (see the _Nabsh-i Rustam_ Inscription). On the whole he must be pronounced, next to Cyrus, the greatest of the Persian monarchs. The latter part of his reign was, however, clouded by reverses. The disaster of Mardonius at Mount Artemisius was followed shortly by the defeat of Persis at Marathon; and, before any attempt could be made to revenge that blow, Egypt rose in revolt (v. 487), massacred its Persian garrison, and declared itself independent. In the palace at the same time there was discussion; and when, after a reign of thirty-six years, the fourth Persian monarch died (v. 480), leaving his throne to a young prince of strong and indomitable character, it was evident that the empire had reached its highest point of greatness, and was already verging towards its decline.

Nerxes, the eldest son of Darius by Atossa, daughter of Cyrus and the first son born to Darius after he mounted the throne, seems to have obtained the crown, in part by the favor of his father, over whom Atossa exercised a strong influence, in part by right, as the eldest male descendant of Cyrus, the founder of the empire. His first act was to reduce Egypt to submission (v. c. 481), after which he began at once to make preparations for his invasion of Greece. It is probable that he was the Alcmenes of Esther. (See note on Esther.) The Medes had previously invaded the country of the Tigris, under the pretence of the death of Darius; in the fourth year of his reign, the repudiation of Vashti, falling into the period preceding the Greco-Greek expedition, while it is probable that he kept open house for the "princes of the provinces," who would from time to time visit the court, in order to report the state of their preparations for the war. The marriage with Esther, in the seventh year of his reign, falls into the year immediately following his flight from Greece, when he undoubtedly returned to Susa, relinquishing warlike enterprises, and henceforth devoting himself to the pleasures of the stagia. It is unnecessary to give an account of the well-known expedition against Greece, which ended so disastrously for the invaders. Persia was taught by the defeats of Salamis and Plataea the danger of encountering the Greeks on their side of the Euphrates, while she learned at Mycale the retaliation which she had to expect on her own shores at the hands of her infuriated enemies. For a while some vague idea of another invasion seems to have been entertained by the court; but discreet counsels prevailed, and relinquishing all aggressive designs, Persia from this point in her history stood upon the defensive, and only sought to maintain her own territories intact, without anywhere trenching upon her neighbors. During the rest of the reign of Nerxes, and during part of that of his son and successor, Artaxerxes, she continued at war with the Greeks, who destroyed her fleets, plundered her coasts, and stirred up revolt in her provinces; but at last, in v. c. 449, a peace was concluded between the two powers, who then continued on terms of amity for half a century.

The conquest of Media and the portion of Asia which lay between the Euphrates and the Caspian Sea was the first object of the new king (v. 476). His character, as drawn by Xenophon, is mild but weak; and under his rule the disorders of the empire seem to have increased rapidly. An insurrection in Bactria, headed by his brother Hyystapes, was with difficulty put down in the first year of his reign (v. c. 464), after which a revolt broke out in Egypt, headed by Ibores the Lybian and Anytes the Egyptian, who, receiving the best held in Asia by the Persian forces, maintained themselves for six years (v. c. 460-455) against the whole power of Persia, but were at last overthrown by Megazyus, satrap of Syria. This powerful and haughty noble soon afterwards (v. c. 447), on

---

The force collected in Pamphylia, which Cleomenes detected and dispersed (v. c. 465), seems to have been intended for aggressive purposes.
occasion of a difference with the court, himself became a rebel, and entered into a contest with his sovereign, which at once betrayed and increased the weakness of the empire. Artaxerxes is the last of the Persian kings who had any special connection with the Jews, and the last but one mentioned in Scripture. His successors were Xerxes II., Sog- dischus, Artaxerxes Ochus, and Darius Colomanus, who is probably the "Darius the Persian" of Nehemiah (xii. 32). These monarchs reigned from B. C. 424 to B. C. 339. None were of much capacity; and during their reigns the decline of the empire was scarcely arrested for a day, unless it were by Ochus, who reconquered Egypt, and gave some other signs of vigor. Had the young Cyrus succeeded in his attempt, the regeneration of Persia was, perhaps, possible. After his failure the satraps grew at once more powerful and more cruel. Emperors and women governed the kings, and dispensed the favors of the crown, or wielded its terrors, as their interests or passions moved them. Patriotism and loyalty were alike dead, and the empire must have fallen many years before it did, had not the Persians early learned to hate the sweets of the Greeks against another, and at the same time raise the character of their own armies by the employment, on a large scale, of Greek mercenaries. The collapse of the empire under the attack of Alexander is well known, and requires no description here. On the division of Alexander's dominions among his generals Persia fell to the Seleucids, under whom it continued till after the death of Antiochus Epiphanes, when the conquering Parthians advanced their frontier to the Euphrates, and the Persians came to be included among their subject-tribes (n. c. 164). Still their nationality was not obliterated. In A. D. 226, three hundred and ninety years after their subjection to the Parthians, and five hundred and fifty-six years after the loss of their independence, the Persians shook off the yoke of their oppressors, and once more became a nation. The kingdom of the Sassanids, though not so brilliant as that of Cyrus, still had its glories; but its history belongs to a time which scarcely comes within the scope of the present work.

* Among the more recent works on the religion of the ancient Persians, the following deserve notice:

PER'SIS (Persis, ["a Persian woman"); Persis): A Christian woman at Rome (Rom. xvi. 12) whom St. Paul salutes, and commends with special affection on account of some work which she had performed with singular diligence (see Origin in bono).

W. T. B.

PERU'DA (PERU'DA, [kvwctel, Ges.] ; Pauropo; [Comp. Pauropo:] Pubrebu). The same as Peru'da (Ezech. xix. 42). The LXX. reading is supported by one of Kennicott's MSS.

PESTILENCE. [Plague].

PETE'R (Πέτρος, the Greek for פֶּתֶרְו and פֶּרִים; Cephas, i. e. "a stone" or "rock," on which name see note at the end of this article: "Petra"). His original name was Simon, πέτρος, i. e. "hearer." The two names are commonly combined, Simon Peter, but in the early part of his history, and in the interval between our Lord's death and resurrection, he is more frequently named Simon; after that event he bears almost exclusively the more honorable designation Peter, or, as St. Paul sometimes writes, Cephas. The notices of this Apostle's early life are few, but not unimportant, and enable us to form some estimate of the circumstances under which his character was formed, and prepared for his great work. He was the son of a man named Jonas (Matt. xvi. 3; John i. 42, xxvii. 51), and was brought up in his father's occupation, a fisherman on the sea of Tiberias. The occupation was one of course a humble one, but not, as is often assumed, mean or servile, or incompatible with some degree of mental culture.

There is a tradition that his mother's name was Johanna (Cotelier, Patres Apost. ii. 63).
His family were probably in easy circumstances. He and his brother Andrew were partners of John and James, the sons of Zebedee, who had hired servants; and from various indications in the sacred narrative we are led to the conclusion that their social position brought them into contact with men of education. In fact the trade of fishermen, supplying some of the important cities on the coasts of that inland lake, may have been tolerably remunerative, while all the necessities of life were cheap and abundant in the singularly rich and fertile district where the Apostle resided. He did not live, as a mere bitter hater, in a hut by the sea-side, but first at Bethsaida, and afterwards in a house at Capernaum, belonging to himself or his mother-in-law, which must have been rather a large one, since he received in it not only our Lord and his fellow-disciples, but multitudes who were attracted by the miracles and preaching of Jesus. It is certain that when he left all to follow Christ, he made what he regarded, and what seems to have been admitted by his Master, to have been a considerable sacrifice.

The habits of such a life were by no means unfavorable to the development of a vigorous, earnest, and practical character, such as he displayed in after years. The labors, the privations, and the perils of an existence passed in great part upon the waters of that beautiful but stormy lake, the long and anxious watching through the nights, were calculated to test and increase his natural powers, his fortitude, energy, and perseverance. In the city he must have been brought into contact with men engaged in traffic, with soldiers, and foreigners, and may have thus acquired somewhat of the flexibility and geniality of temperament all but indispensable to the attainment of such personal influence as he exercised in after-life. It is not probable that he and his brother were wholly uneducated. The Jews regarded instruction as a necessity, and legal enactments enforced the attendance of youths in schools maintained by the community. The statement in Acts iv. 13, that "the council perceived they (i.e. Peter and John) were unlearned and ignorant men," is not incompatible with this assumption. The translation of the passage in the A. V. is rather exaggerated, the word rendered "unlearned" (ἀγνοοῦντας) being nearly equivalent to "laymen," i.e. men of ordinary education, as contrasted with those who were specially trained in the schools of the Rabbis.

A man might be thoroughly conversant with the Scriptures, and yet be considered ignorant and unlearned by the Rabbis, among whom the opinion was already prevalent that the letter of Scripture was the mere shell, an earthen vessel containing heavenly treasures, which could only be discovered by those who had been taught to search for the hidden evangelical meaning. Peter and his kinsmen were probably taught to read the Scriptures in childhood. The history of their country, especially of the great events of early days, must have been familiar to them as attendants at the synagogue,

and their attention was there directed to those portions of Holy Writ from which the Jews derived their anticipations of the Messiah.

The language of the Apostle was of course the form of Aramaic spoken in northern Palestine, a sort of pātej, partly Hebrew, but more nearly allied to the Syriac. Hebrew, even in its debased form, was then spoken only by men of learning, the leaders of the pharisees and scrii.e. The men of Galilee were, however, noted for rough and inaccurate language, and especially for vulgarities of pronunciation. It is doubtful whether our Apostle was acquainted with Greek in early life. It is certain that there was more intercourse with foreigners in Galilee than in any district of Palestine, and Greek appears to have been a common, if not the principal, medium of communication. Within a few years after his call St. Peter seems to have conversed fluently in Greek with Cornelius, at least there is no intimation that an interpreter was employed, while it is highly improbable that Cornelius, a Roman soldier, should have used the language of Palestine. The style of both of St. Peter's epistles indicates a considerable knowledge of Greek—it is pure and accurate, and in grammatical structure equal to that of St. Paul. That may, however, be accounted for by the fact, for which there is very ancient authority, that St. Peter employed an interpreter in the composition of his epistles, in that in his ordinary intercourse with foreigners. There are no traces of acquaintance with Greek authors, or of the influence of Greek literature upon his mind, such as we find in St. Paul, nor could we expect it in a person of his station even had Greek been his mother-tongue. It is on the whole probable that he had some rudimental knowledge of Greek in early life, which may have been afterwards extended when the need was felt, but not more than would enable him to discourse intelligibly on practical and devotional subjects. That he was an affectionate husband, married in early life to a wife who accompanied him in his apostolic journeys, are facts inferred from Scripture, while very ancient traditions, recorded by Clement of Alexandria (whose connection with the church founded by St. Mark gives a peculiar value to his testimony), and by other early but less trustworthy writers, inform us that her name was Perpetua, that she bore a daughter, or perhaps other children, and suffered martyrdom. It is uncertain at what age he was called by our Lord. The general impression of the Fathers is that he was an old man at the date of his death, A.D. 64, but this need not imply that he was much older than our Lord. He was probably between thirty and forty years of age at the date of his call.

That call was preceded by a special preparation. He and his brother Andrew, together with their partners James and John, the sons of Zebedee, were disciples of John the Baptist (John i. 35). They were in attendance upon him when they were first

d See Reuss, Geschichte der H. S. § 41.

e See Reuss (l. c. § 49) rejects this as a mere hypothesis but gives no reason. The tradition rests on the authority of Clement of Alexandria, Irenæus, and Tertullian. See the notes on Euoh. H. E. iii. 39, v. 8, and vi. 28.

f Even highly educated Jews, like Josephus, spoke Greek imperfectly (see Ant. xx. 11, § 2). On the antagonism to Greek influence, see Jost, l. c. 196, and M. Nicolas, Les Doctrines religieuses des Juifs, l. c. 3.
PETER

called to the service of Christ. From the circum-
stances of that call, which are recorded with graphic
minuteness by St. John, we learn some important
facts touching their state of mind and the personal
character of our Apostle. Two disciples, one named
by the Evangelist Andrew, the other in all prob-
ability St. John himself, were standing with the
Baptist at Bethany on the Jordan, when he pointed
out Jesus as He walked, and said, Behold the Lamb of
God! That is, the antitype of the victims whose
blood (as all true Israelites, and they more distinctly
under the teaching of John, believed) prefigured the
atonement for sin. The two at once followed Jesus,
and became his invitation alone with Him that day.
Andrew then went to his brother Simon, and saith
unto him, We have found the Messiah, the anointed
One, of whom they had read in the prophets. Si-
mon went at once, and when Jesus looked on him
He said, Thou art Simon the son of John; thou
shalt be called Cephas. The change of name is of
course deeply significant. As son of John (a name
doubtful meaning, according to Lange equivalent
to Johanan or John), i.e. grace of the Lord;
according to Lange, who has some striking but
fanciful observations, signifying dove) he bore as a
disciple the name Simon, i.e. hearer, but as an
Apostle, one of the twelve on whom the Church was
to be erected, he was hereafter (καθεδρός) to be
called Rock or Stone. It seems a natural impres-
sion that the words refer primarily to the original
character of Simon: that our Lord saw in him a
man firm, steadfast, not to be overthrown, though
severely tried; and such was generally the view
taken by the Fathers: but it is perhaps a deeper
and truer inference that Jesus thus describes Simon,
not as what he was, but as what he would become
under his influence—a man with predispositions
and capabilities not unfitted for the office he was
to hold, but one whose permanence and stability would
depend upon union with the living Rock. Thus we
may expect to find Simon, as the natural man, at
once rough, stubborn, and unstable, whereas Peter,
identified with the Rock, will remain firm and
unmovable unto the end.6

This first call led to no immediate change in St.
Peter's external position. He and the other disciples
looked beforehand upon our Lord as their
teacher, but were not commanded to follow him as
regular disciples. There were several grades of
disciples among the Jews, from the occasional
hearer, to the follower who gave up all other pur-
suits in order to serve a master. At the time a
recognition of his Person and office sufficed. They
returned to Capernaum, where they pursued their
usual business, waiting for a further intimation of
his will.

The second call is recorded by the other three
Evangelists; the narrative of St. Luke being ap-
parently supplementary to the brief, and so to
speak, official accounts given by Matthew and Mark.
It took place on the sea of Galilee near Capernaum
— where the four disciples, Peter and Andrew
James and John, were fishing. Peter and Andrew
were first called. Our Lord then entered Simon
Peter's boat, and addressed the multitude on the
shore; after the conclusion of the discourse He
wrought the miracle by which He foreboded the
success of the Apostles in the new, but analogous,
occupation which was to be theirs, that of fishermen
of men. The call of James and John followed.
From that time the four were certainly enrolled
formally among his disciples, and although as yet
involved with no official character, accompanied
Him in his journeys, those especially in the north
of Palestine.

Immediately after that call our Lord went to
the house of Peter, where He wrought the miracle
of healing on Peter's wife's mother, a miracle suc-
ceded by other manifestations of divine power
which produced a deep impression upon the people.
Some time was passed afterwards in attendance
upon our Lord's public ministrations in Galilee,
Decapolis, Peræa, and Judæa; though at times the
disciples returned to their own city, and were
witnesses of many miracles, of the call of Levi, and
of their Master's reception of outcasts, whom they
in common with their zealous but prejudiced coun-
trymen had despised and shunned. It was a period
of training, of mental and spiritual discipline pre-
paratory to their admission to the higher office to
which they were destined. Even then Peter re-
ceived some marks of distinction. He was selected,
together with the two sons of Zebedee, to witness
the raising of Jairus' daughter.

The special designation of Peter and his eleven
fellow disciples took place some time afterwards,
when they were set apart as our Lord's immediate
attendants, and as his delegates to go forth where-
ever He might send them, as apostles, announcers
of his kingdom, gifted with supernatural powers as
credentials of their supernatural mission (see Matt.
2: 4-8; Mark iii. 16-19, the most detailed account
—Luke vi. 13). They appear then first to have
received formally the name of Apostles, and from
that time Simon bore publicly, and as it would
seem all but exclusively, the name Peter, which
had hitherto been used rather as a characteristic
appellation than as a proper name.

From this time there can be no doubt that St.
Peter held the first place among the Apostles, to
whatever cause his precedence is to be attributed.
There was certainly much in his character which
marked him as a representative man; both in his
strength and in his weakness, in his excellences and
his defects he exemplifies the changes which the
natural man undergoes in the gradual transformation
into the spiritual man under the personal influ-
ence of the Saviour. The precedence did not
depend upon priority of call, or it would have de-
veloped upon his brother Andrew, or that other
disciple who first followed Jesus. It seems scarcely
probable that it depended upon seniority, even sup-
commentators, including some of the most earnest
and devout in Germany and England, appear now to
concur in the view which I have here taken. Thus
Trench On the Parables, Neander, Lukæus, Lange, and
Ehrard. The object of Strauss, who denies the iden-
tity, is to make out that St. Luke's account is a mere
myth. The most satisfactory attempt to account for
the variations is that of Spanheim, Duxia Evangelica,
iiii. 311.
posing, which is a mere conjecture, that he was older than his fellow disciples. The special designation by Christ, alone accounts in a satisfactory way for the facts that he is named first in any list of the Apostles, is generally addressed by our Lord as their representative, and on the most solemn occasions speaks in their name. Thus when the first greatcession took place in consequence of the offense given by our Lord's mystic discourse at Capernaum (see John vi. 66-69), "Jesus said unto the twelve, Will ye also go away? Then Simon Peter answered and said, Lord, to whom shall we go? Thou hast the words of eternal life: and we believe and are sure that Thou art that Christ, the Son of the living God." Thus again at Cæsaræa Philippi, soon after the return of the twelve from their first missionary tour, St. Peter (speaking as before in the name of the twelve, though, as appears from our Lord's words, with a peculiar distinctness of personal conviction) repeated that declaration, "Thou art the Christ, the Son of the living God." The confirmation of our Apostle in his special position in the Church, his identification with the rock on which that Church is founded, the ratification of the powers and duties attached to the apostolic office, and the promise of permanence to the Church, followed as a reward of that confession. The early Church regarded St. Peter generally and implicitly as the representative of the apostolic body, a very distinct theory from that which makes him their head, or governor in Christ's stead. Even in the time of Cyprian, when communion with the Bishop of Rome as St. Peter's successor for the first time was held to be indispensable, no powers of jurisdiction, or supremacy, were supposed to be attached to the admitted precedence of rank. Pro. 2448

PETER

Peter held no distinct office, and certainly never claimed any powers which did not belong equally to all his fellow Apostles.

This great triumph of Peter, however, brought other points of his character into strong relief. The distinction which he then received, and it may be his consciousness of ability, energy, zeal, and absolute devotion to Christ's person, seem to have developed a natural tendency to rashness and forwardness bordering upon presumption. On this occasion the exhibition of such feelings brought upon him the strongest rebuke ever addressed to a member of our Lord. In his affection and self-confidence Peter ventured to reject as impossible the announcement of the sufferings and humiliation which Jesus predicted, and heard the sharp words, "Get thee behind me, Satan, thou art an offense unto me: for thou savorest not the things that be of God, but those that be of men." That was Peter's first fall; a very ominous one: not a rock, but a stumbling-stone, not a defender, but an antagonist and dully enemy of the faith, when the spiritual should give place to the lower nature in dealing with the things of God. It is remarkable that on other occasions when St. Peter signalized his faith and devotion, he displayed at the time, or immediately afterwards, a more than usual diffidence of his spiritual discernment and consistency. Thus a few days after that fall he was selected together with John and James to witness the transfiguration of Christ, but the words which he then uttered prove that he was completely bewildered, and unable at the time to comprehend the meaning of the transaction. Thus again, when his zeal for the day of Pentecost, and during the whole period of the establishment of the Church, was the chief agent in all the work of the ministry, in preaching, in admitting both Jews and Gentiles, and laying down the terms of communion. This view is wholly incompat-ible with the Roman theory, which makes him the representative of Christ, not personally, but in virtue of an office essential to the permanent existence and authority of the Church. Paradoxical as it is to the latest and ablest controversialist, takes more pains to refute this than any other view; but wholly without success: it being clear that St. Peter did not retain, even admitting that he did at first hold, any principal or permanent authority over or independently of the other Apostles; that he certainly did not transmit whatever position he ever held to any of his colleagues after his decease. At Jerusalem, even during his residence there, the chief authority rested with St. James; nor is there any trace of a central power or jurisdiction for centuries after the foundation of the Church. The same arguments, unaxax omoviv, apply to the keys. The promise was literally fulfilled when St. Peter, who had been pros ez at Pentecost, admitted the first converts to baptism, confirmed the Samaritans, and received Cornelius, the representative of the Gentiles, into the Church. Whatever privileges may have belonged to him personally, died with him. The authority required for the permanent government of the Church was believed by the Fathers to be deposited in the episcopate, as representing the apostolic body, and succeeding to its chains. See an admirable dissertation on this question in Rother's 'Anfange der Christlichen Kirche.

I Lightfoot suggests that such may have been the real meaning of the term 'rock.' An amusing instance of the blindness of party feeling. See Hors. 2448

I As usual, the least favorable view of St. Peter's.
and courage prompted him to leave the ship and walk on the water to go to Jesus (Matt. xiv. 29), a sudden failure of faith withdrew the sustaining power; he was about to sink when he was at once reproved and saved by his Master. Such traits, which occur not unfrequently, prepare us for his last great fall, as well as for his conduct after the Resurrection, when his natural gifts were perfected and his deficiencies supplied by the power from on High. We find a mixture of zeal and weakness in his conduct when called upon to pay tribute-money for himself and his Lord, but faith had the upper hand, and was rewarded by a significant miracle (Mark xvi. 24-27). The question with which the same time Peter asked our Lord as to the extent to which forgiveness of sins should be carried, indicated a great advance in spirituality from the Jewish standing-point, while it showed how far as yet he and his fellow disciples were from understanding the true principle of Christian love (Matt. xvi. 21). We find a similar blending of opposite qualities in the declaration recorded by the synoptical evangelists (Matt. xix. 27; Mark v. 28; Luke xviii. 28), "Lo, we have left all and followed Thee." It certainly bespeaks a consciousness of sincerity, a spirit of self-devotion and self-sacrifice, though it conveys an impression of something like ambition; but in that instance the good undoubtedly predominated, as is shown by our Lord's answer. He does not reprove Peter, who spoke, as usual, in the name of the twelve, but takes that opportunity of uttering the strongest prediction touching the future dignity and paramount authority of the Apostles, a prediction recorded by St. Matthew only.

Towards the close of our Lord's ministry St. Peter's characteristics became especially prominent. Together with his brother, and the two sons of Zebedee, he listened to the last awful predictions and warnings delivered to the disciples in reference to the second advent (Matt. xxv. 3; Mark xiii. 3, who alone mentions these names; Luke xxi. 7). At the last supper Peter seems to have been particularly earnest in the request that the traitor might be pointed out, expressing of course a general feeling, to which some inward consciousness of infirmity may have contributed. We are told after the supper his words drew out the meaning of the significant, almost sacramental act of our Lord in washing his disciples' feet, an occasion on which we find the same mixture of goodness and frailty, humility and deep affection, with a certain taint of self-will, which was at once hushed into subservient reverence by the voice of Jesus. Then, too, it was that he made those repeated protestations of unalterable fidelity, so soon to be falsified by his miserable fall. That event is, however, of such critical import in its bearings upon the character and position of the Apostle, that it cannot be dismissed without a careful, if not an exhaustive discussion. Judas had left the guest-chamber when St. Peter put the question, Lord, whither goest Thou? words which modern theologians generally represent as savloring of idle curiosity, or presumption, but in which the early fathers (as Chrysostom and Augustine) recognized the utterance of love and devotion. The answer was a promise that Peter should follow his Master, but accompanied with an intimation of present unfitness in the disciple. Then came the first protestation, which elicited the sharp and stern rebuke, and distinct prediction of Peter's denial (John xiii. 36-38). From comparing this account with those of the other evangelists (Matt. xxvi., 33-35; Mark xiv. 29-51; Luke xii. 33, 34), it seems evident that with some diversity of circumstances both the protestation and warning were thrice repeated. The tempter was to sift all the disciples, our Apostle's faith was to be preserved from failing by the special intercession of Christ, he being thus singled out either as the representative of the whole body, or as seems more probable, because his character was one which had special need of supernatural aid. St. Mark, as usual, records two points which enhance the force of the warning and the guilt of Peter, namely, that the cock would crow twice, and that after such warning he repeated his protestation with greater vehemence. Chrysostom, who judges the Apostle with fairness and candor, attributes this vehemence to his great love, and more particularly to the delight which he felt when assured that he was not the traitor, yet not without a certain admixture of forwardness and ambition, such as had previously been shown in the dispute for preeminence. The fiery trial soon came. After the agony of Gethsemane, when the three, Peter, James, and John were, as on former occasions, selected to be with our Lord, the only witnesses of his passion, where also all three had alike failed to prepare themselves by prayer and watching, the arrest of Jesus took place. Peter did not shrink from the danger. In the same spirit which had dictated his promise he drew his sword, alone against the armed throng, and wounded the servant (the δολαρ, not a servant) of the high-priest, probably the leader of the band. a When this bold but unauthorized attempt at rescue was reproved, he did not yet forsake his Master, but followed Him with St. John into the focus ofsmarting, the house of the high-priest. There he sat in the outer hall. He must have listened in a state of utter confusion: his faith, which from first to last was bound up with hope, his special characteristic, was for the time powerless against temptation. The danger found him unarmed. Thrice, each time with greater vehemence, the last time with blasphemous asseveration, he denied his Master. The triumph of Satan seemed complete. Yet it is evident that it was an obstruction of faith, not an extinction. It needed but a glance of his Lord's eye to bring him to himself. His repentance was instantaneous, and effectual. The light in which he himself regarded his conduct, is clearly shown by the terms in which it is related by St. Mark. The inferences are weighty as regards his conduct and feelings is given by St. Mark i. 64 by himself.

a * The leader of the band would naturally be the chief apparitor, as instructed by John (xviii. 12); and at all events a slave (δολαρος) would not be likely to be placed over the "servants" or apparitors (αργοφυροι) of the Jewish council. The man whom Peter struck may have been specially officious in laying hold of Jesus (Matthew's Mark)
personal character, which represents more completely perhaps than any in the New Testament, the weakness of the natural and the strength of the spiritual man still more perfectly, upon his relations to the apostolic body, and the claims resting upon the assumption that he stood to them in the place of Christ.

On the morning of the resurrection we have proof that St. Peter, though humbled, was not crushed by his fall. He and St. John were the first to visit the sepulchre; he was the first who entered it. They were told by the ladie (in words still used by the Eastern Church as the first salutation on Easter Sunday) and by St. Paul, that Christ appeared to him first among the Apostles—he who most needed the comfort was the first who received it, and with it, as may be assumed, an assurance of forgiveness. It is observable, however, that on that occasion he is called by his original name, Simon, not Peter: the higher designation was not restored until he had been publicly reinstated, so to speak, by his Master. That reinstatement took place at the sea of Galilee (John xxi.), an event of the very highest import. We have there indications of his best natural qualities, practical good sense, promptness and energy: slower than St. John to recognize their Lord, Peter was the first to reach Him; he brought the net to land. The discussion of the question of Christ, referring doubtless to the three protestations and denials, were thrice met by answers full of love and faith, and utterly devoid of his hitherto characteristic failing, presumption, of which not a trace is to be discerned in his later history. He then received the formal commission to feed Christ’s sheep; not certainly as one ended with exclusive or paramount authority, or as distinguished from his fellow-disciples, whose full had been marked by far less aggravating circumstances: rather as one who had forfeited his place, and could not resume it without such an authorization. Then followed the prediction of his martyrdom, in which he was to find the fulfillment of his request to be permitted to follow the Lord.6

With this the first part of St. Peter’s history has been a period of transition, during which the fisherman of Galilee had been trained first by the Baptist, then by our Lord, for the great work of his life. He had learned to know the Person and appreciate the offices of Christ: while his own character had been chastened and elevated by special privileges and humiliations, both reaching their climax in the last recorded transactions. Henceforth, he with his colleagues were to establish and govern the Church founded by their Lord, without the support of his presence.

The first part of the Acts of the Apostles is occupied by the record of transactions, in nearly all of which Peter stands forth as the recognized leader of the Apostles; it being, however, equally clear that he neither exercises no claims any authority apart from them, much less over them. In the first chapter it is Peter who points out to the disciples the place to which his discourses (drawing his arguments from prophecy) the necessity of supplying the place of Judas. He states the qualifications of an Apostle, but takes no special part in the election. The candidates are selected by the disciples, while the decision is left to the search of hearts. The extent and limits of Peter’s primacy might be inferred with tolerable accuracy from this transaction alone. To have one spokesman, or even two, seems to accord with the spirit of order and humility which ruled the Church, while the assumption of power or supremacy would be incompatible with the express command of Christ (see Matt. xxii. 10). In the 2d chapter again, St. Peter is the most prominent person in the greatest event after the resurrection, when on the day of Pentecost the Church was first invested with the plenitude of gifts and powers. Then Peter, not speaking in his own name, but with the eleven (ver. 14), explained the meaning of the miraculous gifts, and showed the fulfillment of prophecies (accepted at that time by all Hebrews as Messianic), both in the outpouring of the Holy Ghost and in the resurrection and death of our Lord. This discourse, which bears all the marks of Peter’s individuality, both of character and doctrinal views, ends with an appeal of remarkable boldness.

It is the model upon which the apologetic discourses of the primitive Christians were generally constructed. The conversion and baptism of three thousand persons, who continued steadfastly in the Apostles’ doctrine and fellowship, attested the power of the Spirit which spoke by Peter on that occasion.

The first miracle after Pentecost was wrought by St. Peter (Acts iii.); and St. John was joined with him in that, as in most important acts of his ministry: but it was Peter who took the cripple by the hand, and bade him “in the name of Jesus of Nazareth rise up and walk,” and when the people gathered together to Solomon’s porch, where the Apostles following their Master’s example were wont to teach, Peter was the speaker: he convinces the people of their sin, warns them of their danger, points out the fulfillment of prophecy, and the special objects for which God sent his Son first to the children of the old covenant.4

The boldness of the two Apostles, of Peter more especially as the spokesman, when, “filled with the Holy Ghost,” he confronted the full assembly, headed by Annas and Caiaphas, produced a deep impression upon those cruel and unmerciful hypocrites; an impression enhanced by the fact that the words came from ignorant and unlearned men. The words spoken by both Apostles, when commanded not to speak at all nor teach in the position of this view see “Biblical Notes,” Bibl. Sacra for 1885, xxv. 783.

II.

6 * Peter’s inquiry, on this occasion, respecting the fate of John after his own martyrdom, had been foretold (John xxi. 18-22), seems to have arisen from a feeling of jealousy towards John. The severity of Christ’s answer to his question (“If I will that he tarry till I come, what is that to thee?”), and the evangelist’s revelation of the special marks of favor which the favor and conferred on himself (John xxi. 20), admit otherwise of no easy explanation. (For a fuller ex-
This first miracle of healing was soon followed by the first miracle of judgment. The first open and deliberate sin against the Holy Ghost, a sin combining ambition, fraud, hypocrisy, and blasphemy, was visited by death, sudden and awful as under the old dispensation. St. Peter was the minister in that transaction. As he had first opened the gate to penitents (Acts ii. 37, 38), he now closed it to hypocrites. The act stands alone, without a precedent or parallel in the Gospel: but Peter acted simply as an instrument, not positively or essentially denouncing the sin, and that in the name of his fellow Apostles and of the Holy Ghost. Penalties similar in kind, though far different in degree, were inflicted, or commanded on various occasions by St. Paul. St. Peter appears, perhaps, in consequence of that act, to have become the object of a reverence bordering, as it would seem, on superstition (Acts v. 13), while the numerous miracles of healing wrought about the same time without denouncing the sin, and dwelling in the Apostles, gave occasion to the second persecution. Peter then came into contact with the noblest and most interesting character among the Jews, the learned and liberal tutor of St. Paul, Gamaliel, whose caution, gentleness, and dispassionate candor, stand out in strong relief contrasted with his colleagues, and make a faint impression compared with the steadfast and uncompromising principles of the Apostles, who after undergoing an illegal scourging, went forth rejoicing that they were counted worthy to suffer shame for the name of Jesus. Peter is not specially named in connection with the appointment of deacons, an important step in the organization of the church; but when the Gospel was first preached beyond the precincts of Judaea, he and St. John were at once sent by the Apostles to confirm the converts at Samaria, a very important statement at this critical point, proving clearly his subordination to the whole body, of which he was the most active and able member.

Up to that time it may be said that the Apostles had one great work, namely, to convince the Jews that Jesus was the Messiah: in that work St. Peter was the elder, the more prominent, and the rest upon the doctrines of which he was the principal teacher: hitherto no words but his are specially recorded by the writer of the Acts. Henceforth he remains prominent, but not exclusively prominent, among the propagators of the Gospel. At Samaria he and John established the precedent for the most important rite not expressly enjoined in Holy Writ, namely, confirmation, which the Western Church has always held to belong exclusively to the functions of bishops as successors to the ordinary powers of the Apostolate. Then also St. Peter was confronted with Simon Magnus, the first teacher of heresy. [Simon Magnus.] As in the case of Ananias he had denounced the first sin against holiness, so in this case he first declared the penalty due to the sin called after Simon’s name. About three years later (compare Acts ix. 29, and Gal. i. 17, 18) we have two accounts of the first meeting of St. Peter and St. Paul. In

\[a\] Not so the Eastern, which combines the act with baptism, and leaves it to the officiating priest. It is one of the points upon which Photius and other eastern controversiasts lay special stress.

\[b\] A term to which objection has been made, but shown by Joel to be strictly correct.
by a special manifestation of the Holy Ghost, to induce his fellow-Apostles to recognize the propriety of this great act, in which both he and they saw an earnest of the admission of Gentiles into the Church on the single condition of spiritual repentance. The establishment of a church in great part of Gentile origin at Antioch, and the mission of Barnabas, between whose family and Peter there were the bonds of near intimacy, set the seal upon the work thus inaugurated by St. Peter.

This transaction was soon followed by the imprisonment of our Apostle. Herod Agrippa having first tested the state of feeling at Jerusalem by the execution of James, one of the most eminent Apostles, arrested Peter. The hatred, which at that time first showed itself as a popular feeling, may most probably be attributed chiefly to the offense given by Peter's conduct towards Cornelius. His miraculous deliverance marks the close of this second great period of his ministry. The special work assigned to him was completed. He had founded the Church, opened its gates to Jews and Gentiles, and distinctly laid down the conditions of admission.

From that time we have no continuous history of Peter. The events connected with his rank as the chief Apostle, equally so, that he neither exercised nor claimed any right to control their proceedings. At Jerusalem the government of the Church devolved upon James the brother of our Lord. In other places Peter seems to have confined his ministries to his countrymen—as Apostle of the circumcision. He left Jerusalem, but it is not said where he went. Certainly not to Rome, where there are no traces of his presence before the last years of his life; he probably remained in Judea, visiting and confirming the churches; some old but not trustworthy traditions represent him as preaching in Cappadocia and other cities on the western coast of Palestine; six years later we find him once more at Jerusalem, when the Apostles and elders came together to consider the question whether converts should be circumcised. Peter took the lead in that discussion, and urged with remarkable cogency the principles settled in the case of Cornelius. Purifying faith and saving grace (xx. 9 and 11) remove all distinctions between believers. His arguments, adopted and enforced by James, decided that question at once and forever. It is, however, to be remarked, that on that occasion he exercised no authority which Romanists hold to be inalienably attached to the chair of Peter. He did not preside at the meeting; he neither summoned nor dismissed it; he neither collected the suffrages nor pronounced the decision.

It is a disputed point whether the meeting between St. Paul and St. Peter, of which we have an

a In accordance with this representation, St. Paul names James before Cephas and John (Gal. ii. 9).

b Lange (Das Apostolische Zeitalter, ii. 575) fixes the date about three years after the Council. Wieseler has a long excursion to show that it must have occurred when St. Paul was on his second apostolic journey. He gives some weighty reasons, but wholly fails in the attempt to account for the presence of Barnabas, a fatal objection to his theory. See Der Befrei an die Galatier, p. 677. On the date of the Council see Theodoret, Eusebius, Jerobeam, Eusebius, Eusebius, and others. See note b. c. p. 2572. The history of Barnabas is too imperfectly known to render the objection above of any decisive weight.—H.]

account in the Galatians (ii. 10). In this time. The great majority of critics believe that it did, and this hypothesis, though not without difficulties, seems more probable than any other which has been suggested. The only point of real importance was certainly determined before the Apostles separated, the work of converting the Gentiles being henceforth specially intrusted to Paul and Barnabas, while the charge of preaching to the circumcision was assigned to the elder Apostles, and more particularly to Peter (Gal. ii. 7—9). This arrangement cannot, however, have been an exclusive one. St. Paul always addressed himself first to the Jews in every city; Peter and his old colleagues undoubtedly admitted and sought to make converts among the Gentiles. It may have been in full force only when the old and new Apostles resided in the same city. Such at least was the case at Antioch, where St. Peter went soon afterwards. There the painful collision took place between the two Apostles; the most remarkable, and, in its bearings upon controversies at critical periods, one of the most important events in the history of the Church. St. Peter at first applied the principles which he had lately defended, carrying with him the whole Apostolic body, before his arrival at Antioch ate with the Gentiles; this showing that he believed all ceremonial distinctions to be aboli shed by the Gospel: in that he went far beyond the strict letter of the injunctions issued by the Council. That step was marked and condemned by certain members of the Church of Jerusalem sent by James. It appeared to them that one thing to recognize Gentiles as fellow Christians, another to admit them to social intercourse, whereby ceremonial defilement would be contracted under the law to which all the Apostles, Barnabas and Paul included, acknowledged allegiance. Peter, as the Apostle of the circumcision, fearing to give offense to those who were his special charge, at once gave up the point, suppressed or disguised his feelings, and separated himself not from communion, but from social intercourse with the Gentiles. St. Paul, as the Apostle of the Gentiles, saw clearly the consequences likely to ensue, and could ill brook the misapplication of a rule often laid down in his own writings concerning compliance with the prejudices of weak brethren. He held that Peter was infringing a great principle, withstand him to the face, and using the same arguments which Peter had urged at the Council, pronounced his conduct to be indecisive. The statement that Peter compelled the Gentiles to Judaize, probably means, not that he enjoined circumcision, but that his conduct, if persevered in, would have that effect, since they would naturally take any steps which might remove the barriers to familiar intercourse with the first Apostles of Christ. Pe-
Peter was right, but it was an error of judgment; an act contrary to his own feelings and wishes, in deference to Peter, whom he looked upon as representing the mind of the Church; that he was actuated by self-will, national pride, or any remains of superstition, is neither asserted nor implied in the strong censure of St. Paul: nor, much as we must admire the earnestness and wisdom of St. Paul, whose clear and vigorous intellect was in this case stimulated by anxiety for his own special church, we must look with some courtesy on Peter's singular humility in submitting to public rebuke from one so much his junior, or his magnanimity both in adopting St. Paul's conclusions (as we must infer that he did from the absence of all trace of continued resistance), and in remaining on terms of brotherly communion (as is testified by his own written words), to the end of his life (1 Pet. v. 19; 2 Pet. iii. 15, 16).

From this time until the date of his epistles, we have no distinct notices in Scripture of Peter's abode or work. The silence may be accounted for by the fact that from that time the great work of propagating the Gospel was committed to the marvelous energies of St. Paul. Peter was probably employed for the most part in building up and completing the organization of Christian communities in the countries and provinces in which he had been hitherto employed. The reason is, however, strong reason to believe that he visited Corinth at an early period: this seems to be implied in several passages of St. Paul's first epistle to that church, and it is a natural inference from the statements of Clement of Rome (1 Epistle to the Corinthians, c. 4). The fact is positively asserted by Dionysius, Bishop of Corinth (A. D. 180 at the latest), a man of excellent judgment, who was not likely to be misinformed, nor to make such an assertion lightly in an epistle addressed to the Bishop and Church of Rome. The reference to collision between parties who claimed Peter, Apollos, Paul, and even Christ for their chiefs, involves no opposition between the Apostles themselves, such as the fabulous Clementines and modern infidelity assume. The name of Peter as founder, or joint founder, of the church save those of Corinth, Antioch, or Rome, by early ecclesiastical tradition. That of Alexandria may have been established by St. Mark after Peter's death. That Peter preached the Gospel in the countries of Asia, mentioned in his first epistle, appears from Origen's own words (Archbishop Eusebius) to be a mere conjecture, not in itself improbable, but of little weight in the absence of all positive evidence, and of all personal reminiscences in the epistle itself. From that epistle, however, it is to be inferred that towards the end of his life, St. Peter either visited, or resided for some time at Babylon, which at that time, and for some hundreds of years afterwards, was a chief seat of Jewish culture. This of course depends upon the assumption, which on the whole seems most probable, that the word Babylon is not used as a mystic designation of Rome, but as a proper name, and that not of an obscure city in Egypt, but of the ancient capital of the East. There were many indications for such a choice of a name: the Jewish families formed there a separate community; they were rich, prosperous, and had established settlements in many districts of Asia Minor. Their language, probably a mixture of Hebrew and Nabatean, must have borne a near affinity to the Galilean dialect. They were on far more familiar terms than in other countries with their heathen neighbors, while their intercourse with Judaea was carried on without interruption. Christianity certainly made considerable progress at an early time in that and the adjoining districts, the great Christian schools at Edessa and Nisibis probably owed their origin to the influence of Peter, the general tone of the writers of that school is what is now commonly designated as Petrine. It is no unreasonable supposition that the establishment of Christian churches in those districts may have been specially connected with the residence of Peter at Babylon. At that time there must have been some communications between the two great Apostles, Peter and Paul, thus stationed at the two extremities of the Christian world. St. Mark, who was certainly employed about that time by St. Paul, was with St. Peter when he wrote the epistle. Silvanus, St. Paul's chosen companion, was the bearer, probably the amanuensis of St. Peter's epistle; not improbably sent to Peter from Rome, and charged by him to deliver that epistle, written to support Paul's authority, to the churches founded by that Apostle on his return.

More important in its bearings upon later controversies is the question of St. Peter's connection with Rome.

It may be considered as a settled point that he did not visit Rome before the last years of his life. Too much stress may perhaps be laid on the fact that there is no notice of St. Peter's labors or presence in that city in the Epistle to the Romans; but that negative evidence is not counterbalanced by any statement of undoubted antiquity. The date given by Eusebius rests upon a miscalculation, and is irreconcilable with the notices of St. Peter in the Acts of the Apostles. Protestant critics, with scarcely one exception, are unanimous upon this point, and Roman controversialists are

* See Routh, Rel. Sacrum, i. 179.

* The attempt to set aside the evidence of Dionysius, on the ground that he makes an evident mistake in attributing the foundation of the Corinthian Church to Peter and Paul, is futile. If Peter took any part in organizing the Church, he would be spoken of as a joint founder. Schaff supposes that Peter may have first visited Corinth on his way to Rome towards the end of his life.

* It may be observed that even St. Leo represents the relation of St. Peter to Antioch as precisely the same with that in which he stands to Rome (Ep. 92).

* Origen, ap. Euseb. iii. 1, adopted by Ephraim Har. xxvii.) and Jerome (Cist. c. 1).

* On the other hand, the most abundant and unanimous opinion of ancient commentators that Rome is designated has been adopted, and maintained with great ingenuity...
far from being agreed in their attempts a to remove the difficulty. 

The fact, however, of St. Peter's martyrdom at Rome rests upon very different grounds. The evidence for it is complete, while there is a total absence of any contrary statement in the writings of early critics. We have no place the certainty of his martyrdom, in our Lord's own prediction (John xxi. 18, 19). Clement of Rome, writing before the end of the first century, speaks of it; but does not mention the place, that being of course well known to his readers. Ignatius, in the undoubtedly genuine Epistle to the Romans (ch. iv.), speaks of St. Peter in terms which imply a special concern with their church. His early notices of less weight, coincide with this, as that of Papias (Euseb. ii. 15), and the apocryphal

\[ Pitheceta Petri, quoted by Eupriam. \]

In the second century, Dionysius of Corinth, in the Epistle to Soter, Bishop of Rome (ap. Euseb. H. E. ii. 25), states, as a fact universally known, and accounting for the intimate relations between Corinth and Rome, that Peter and Paul both taught in Italy, and suffered martyrdom, before the death of Tiberius.\[ Who was connected with St. John, being a disciple of Polycarp, a hearer of that Apostle, and thoroughly conversant with Roman matters, bears distinct witness to St. Peter's presence at Rome (John, xvar. iii. 1 and 5). It is incredible that he should have been misinformed. In the next century there is the testimony of Caius, the liberal and learned Roman presbyter (who speaks of St. Peter's tomb in the Vatican), of Origen, Tertullian, and of the ante and post-Nicene Fathers, without a single exception. In short, the churches most nearly connected with Rome, and those least affected by its influence, which was as yet but inconsiderable in the East, concur in the statement that Peter was a joint founder of that church, and suffered death in that city. What the early Fathers do not assert, and indeed implicitly deny, is that Peter was the sole founder or resident head of that Church, or that the See of Rome derived from him any claim to supremacy; at the utmost they place him on a footing of equality with St. Paul.\[ That fact is sufficient for all purposes of fair controversy. The denial of the statements resting on such evidence seems almost to indicate an unready consciousness, truly remarkable in those who believe that they have a stronger ground for their views than some of the irreconcileable grounds for rejecting the pretensions of the Papacy. The time and manner of the Apostle's martyrdom are less certain. The early writers imply, or distinctly state, that he suffered at, or about the same time (Dionysius, kara tiv aedhv kaipe), with St. Paul, and in the Roman persecution. All agree that he was crucified, a point sufficiently determined by our Lord's prophecy. Origen (ap. Eus. iii. 1), who could easily ascertain the fact, and though fanciful in speculation, is not inaccurate in history. At the same time, says the matter, he was given his own request before he was crucified with his head downwards. This statement was generally received by Christian antiquity: nor does it seem inconsistent with the fervent temperament and deep humility of the Apostle to have chosen such a death: one, moreover, not unlikely to have been inflicted in mockery by the instruments of Nero's wanton and ingenuous cruelty. Thus closed the Apostle's life. Some additional facts, not perhaps unimportant, may be accepted on early testimony. From St. Paul's words it may be inferred with certainty that he did not give up the ties of family tie when he forsook his temporal calling. His wife accompanied him in his wanderings. Clement of Alexandria, a writer well informed in matters of ecclesiastical interest, and thoroughly trustworthy, says (Strom. iii. p. 448) that "Peter and Philip had children, and that both took about their wives, who acted as their coadjutors in ministering to women at their own homes; by their means the doctrine of the Lord penetrated without scandal into the privacy of women's apartments." Peter's wife is believed, on the same authority, to have suffered martyrdom, and to have been supported in the hour of trial by her husband's exhortation. Some critics believe that she is referred to in the salutation at the end of the First Epistle of St. Peter. The Apostle is said to have employed interpreters. Basilius, an early Gnostic, professed to derive his system from Gnosticus, one of these interpreters. This shows at least the impression, that the Apostle did not understand Greek. To his words we may add, that the most important is the statement that St. Mark wrote his Gospel under the teaching of Peter, or that he embodied in that Gospel the substance of our Apostle's oral instructions. This statement

\[ a \] The most ingenious attempt is that of Windischmann, Vindiciae Petri, p. 122 f. He assures that Peter went to Rome immediately after his deliverance from prison (Acts xxi.), i.e., a. d. 44, and left in consequence of the Claudian persecution between a. d. 49 and 51.

\[ b \] Μην οροίδησαι τοις εις τον ιησους γενομενοι τοις δαμασσαι (1 Cor. v.). The first word might simply mean "be careful about the same thing," but more properly "be vigilant about the same thing." In the hyper-critical speculation of the Tubingien school is Boer's attempt to prove that this distinct and positive statement was a mere inference from the epistle of Clement. The intercourse between the two churches was unbroken from the Apostles' times.

\[ c \] Cowdrey has collected a large number of passages from the early Fathers, in which the name of Paul precedes that of Peter (Pat. Apist. i. 114: see also

\[ Tychaeus, Eus. H. E. iii. 21). Fabricius observes that this is the general usage of the Greek Fathers. It is also to be remarked that when the Fathers of the 4th and 5th centuries for instance. Chrysostom and Augustine time — use the words άπασις or άπασις, Peter a. d. 55. A very weighty fact.

\[ d \] See Tillemont, Mem. iii. p. 181, and 555. He shows that the account of Ambrose (which is not to be found in the Antiqu. Chrysostom and Augustine) in a most striking instances of the hyper-critical speculation of the Tubingien school is Boer's attempt to prove that this distinct and positive statement was a mere inference from the epistle of Clement. The intercourse between the two churches was unbroken from the Apostles' times.

\[ e \] Cowdrey has collected a large number of passages from the early Fathers, in which the name of Paul precedes that of Peter (Pat. Apist. i. 114: see also

\[ Tychaeus, Eus. H. E. iii. 21). Fabricius observes that this is the general usage of the Greek Fathers. It is also to be remarked that when the Fathers of the 4th and 5th centuries for instance. Chrysostom and Augustine time — use the words άπασις or άπασις, Peter a. d. 55. A very weighty fact.
and is corroborated by so many internal indications, that they would scarcely be questioned in the absence of a strong sectarian bias. The fact is doubly important in its bearings upon the Gospel, and upon the character of our Apostle, Chrysostom, who is followed by the most judicious commentators, seems first to have drawn attention to the fact, that in St. Mark's Gospel every defect in Peter's character and conduct is brought out clearly, without the slightest extenuation, while many noble and peculiar marks of favor are either omitted, or stated with far less force than by any other Evangelist. Indications of St. Peter's influence, even in St. Mark's style, much less pure than that of St. Luke, are traced by modern critics. 

The only written documents which St. Peter has left, are the First Epistle, about which no doubt has ever been entertained in the Church; and the Second, which has both in early times, and in our own, been a subject of earnest controversy.

First Epistle. — The external evidence of authenticity is of the strongest kind. Referred to in the Second Epistle (III. 1); known to Polycarp, and frequently alluded to in his Epistles to the Philippian, recognized by Papias (ap. Euseb. H. E. iii. 39); repeatedly quoted by Irenaeus, Clemens of Alexandria, Tertullian, and Origen; it was accepted without hesitation by the universal Church. The internal evidence is equally strong. Schwabler the most reckless, and De Wette the most vacillating of modern critics, stand almost alone in their denial of its authenticity.

It was addressed to the churches of Asia Minor, which had for the most part been founded by St. Paul and his companions. Supposing it to have been written at Ephesus (see above), it is a probable conjecture that Silvanus, by whom it was transmitted to those churches, had joined St. Peter after a tour of visitation, either in pursuance of instructions from St. Paul, then a prisoner at Rome, or in the capacity of a minister of high authority in the Church, and that his account of the condition of the Christians in those districts determined the Apostle to write the epistle. From the absence of personal citations, the choice of mild exhortations, it may perhaps be inferred that St. Peter had not hitherto visited the churches; but it is certain that he was thoroughly acquainted both with their external circumstances and spiritual state. It is clear that Silvanus is not regarded by St. Peter as one of his own coadjutors, but as one whose personal character he had sufficient opportunity of appreciating (v. 12). Such a testimonial as the Apostle gives to the soundness of his faith, would of course have the greatest weight with the Hebrew Christians, to whom the epistle appears to have been specially addressed. The assumption that Silvanus was employed in the composition of the epistle is not borne out by the expression, "by Silvanus, I have written unto you," such words according to ancient usage applying rather to the bearer than to the writer or amanuensis. Still it is highly probable that Silvanus, considering his rank, character, and special connection with those churches, and with the Gentile Apostle and founder, would be consulted by St. Peter throughout, and that they would together read the epistles of St. Paul, especially those addressed to the churches in those districts: thus, partly with direct intention, partly it may be unconsciously, a Pauline coloring, amounting in passages to something like a studied imitation of St. Paul's representations of Christian truth, may have been introduced into the epistle. It has been observed above that there is good reason to suppose that St. Peter was in the habit of employing an interpreter; nor is there anything inconsistent with his position or character in the supposition that Silvanus, perhaps also St. Mark, may have assisted him in giving expression to the thoughts suggested to him by the Holy Spirit. We have thus at any rate, a not unsatisfactory solution of the difficulty arising from correspondences both of style and mode of thought in the writings of two Apostles who differed so widely in gifts and acquirements.

The objects of the epistle, as deduced from its contents, coincide with these assumptions. They were: 1. To comfort and strengthen the Christians in a season of severe trial. 2. To enforce the practical and spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the soundness and completeness of the religious system which they had already received. Such an attestation was especially needed by the Hebrew Christians, who were wont to appeal from St. Paul's authority to that of the elder Apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the epistle, and is distinctly stated, ch. v. ver. 12.

The epistle may come out more clearly in a brief analysis.

The epistle begins with salutations and general description of Christians (i. 1, 2), followed by a statement of their present privileges and future inheritance (3-5); the bearings of that statement upon their conduct under persecution (6-9); reference, according to the Apostle's wont, to prophetic

This is the general opinion of the ablest commentators. The ancients were nearly unanimous in holding that it was written for Hebrew converts. But several passages are evidently meant for Gentiles: e.g. i. 14, 18; ii. 12. In this case, an original and able writer, is almost alone in the opinion that it was addressed chiefly to Gentile converts (p. 133). It takes Εανομον and σινγκαμαν as διά Κυρίου, Israelsites by faith, not by ceremonial observance (nicht nach dem Cultus). See also Weiss, Der persnische Lehrbrief, p. 28, n. 2.

The question has been thoroughly discussed by Hug, Ewald, Bertholdt, Weiss, and other critics. The most striking resemblances are perhaps I Pet. i. 8, with Eph. i. 3; ii. 18, with Eph. vi. 5; iii. 1, with Eph. v. 22; and v. 5, with v. 21: but allusions nearly as distinct are found to the Romans, Corinthians, Colossians, Thessalonians, and Philippians.
sences concerning both the sufferings of Christ and the salvation of his people (10-12): exhortations based upon those promises to earnestness, sobriety, hope, obedience, and holiness, as results of knowledge of redemption, of atonement by the blood of Jesus, and of the resurrection, and as proofs of spiritual regeneration by the word of God. Peculiar stress is laid upon the cardinal graces of faith, hope, and brotherly love, each connected with and figuring in the fundamental doctrines of the Gospel (13-25). Alas! from the spiritual sins most directly opposed to those graces is then enforced (ii. 1): spiritual growth is represented as dependent upon the nourishment supplied by the same word which was the instrument of regeneration (2, 3); and then, by a change of metaphor, Christians are represented as a spiritual house, collectively and individually as living stones, and royal priests elect, and brought out of darkness into light (4-10). This portion of the epistle is singularly rich in thought and expression, and bears the peculiar impress of the Apostle’s mind, in which Judaism is spiritualized, and finds its full development in Christ. From this condition of Christians, and more directly from the fact that they are thus separated from the world, judges and senators, St. Paul exalts the character of the Christian and relative duties, self-control, care of reputation, especially for the sake of Gentiles: submission to all constituted authorities; obligations of slaves, urged with remarkable earnestness, and founded upon the example of Christ and his-stoning death (11-25); and duties of wives and husbands (iii. 1-7). Then generally all Christian graces are commended, those which pertain to Christian brotherhood, and those which are especially needed in times of persecution, gentleness, forbearance, and submission to injury (8-17): all the precepts being based on imitation of Christ, with warnings from the history of the deluge, and with special reference to the baptismal covenant.

In the following chapter (iv. 1, 2) the analogy between the death of Christ and spiritual mortification, a topic much dwelt on by St. Paul, is urged with special reference to the sins committed by Christians before conversion, and habitual to the Gentiles. The doctrine of a future judgment is inculcated, both with reference to their heathen persecutors as a motive for endurance, and to their own conduct as an incentive to sobriety, watchfulness, fervent charity, liberality in all external acts of kindness, and diligent discharge of all spiritual duties, with a view to the glory of God through Jesus Christ (4-11).

This epistle appears at the first draught to have terminated here with the doxology, but the thought of the fiery trial to which the Christians were exposed stills the Apostle’s heart, and suggests additional exhortations. Christians are taught to rejoice in partaking of Christ’s sufferings, being thereby assured of sharing his glory, which even in this life rests upon them, and is especially manifest, Peter denounces an entire system of practical and personal perfection; judgment must come first to cleanse the house of God, then to reach the disbeliever: suffering according to the will of God, they may commit their souls to Him in well doing as unto a faithful Creator. Faith and hope are equally permissible in these exhortations. The Apostle (v. 1-4) addresses the presbyters of the churches, warning them as one of their own body, as a witness (μαρτυρον) of Christ’s sufferings, and paraker of future glory, against negligence, covetousness, and love of power: the younger members he exhorts to submission and humility, and concludes this part with a warning against their spiritual enemy, and a solemn and most beautiful prayer to the God of all grace. Lastly, he mentions Silvanus as his amiable companion, and adds a very distinctly what we have seen reason to believe: was a principal object of the epistle, namely, that the principles inculcated by their former teachers were sound, the true grace of God, to which they are exhorted to adhere. A salutation from the church in Babylon and from St. Mark, with a parting benediction, closes the epistle.

The harmony of such teaching with that of St. Paul is sufficiently obvious, nor is the general arrangement or mode of discussing the topics unlike that of the Apostle of the Gentiles; still the indications of originality and independence of thought are at least equally conspicuous, and the epistle is full of what the Gospel narrative and the discourses in the Acts prove to have been characteristic peculiarities of St. Peter. He dwells more frequently than St. Paul upon the future manifestation of Christ, and of his providential dealing with the Gentiles. He lays stress upon the promises to patience, self-control, and the discharge of all Christian duties. There is not a shadow of opposition here, the topic is not neglected by St. Paul, nor does St. Peter omit the Pauline argument from Christ’s sufferings: still what the Germans call the exhortational element predominates over all others. The Apostle’s mind is full of one thought, the realization of the Messianic hopes. While St. Paul dwells with most earnestness upon justification by our Lord’s death and merits, and concentrates his energies upon the Christian’s present struggles, St. Peter fixes his eyes constantly upon the future coming of Christ, the fulfillment of prophecy, the manifestation of the promised kingdom.

In this he is the true representative of Israel, moved by those feelings which were best calculated to enable him to do his work as the Apostle of the circumcision. Of the three Christian graces hope is his special theme. He dwells much on good works, but not so much because he sees in them necessary results of faith, or the complement of faith, or outward manifestations of the spirit of love, aspects most prominent in St. Paul, St. James, and St. John, as because he holds them to be tests of the soundness and stability of a faith which exists in the fact of the resurrection, and is directed to the future in the developed form of hope.

But while St. Peter thus shows himself a genuine Israelite, his teaching is directly opposite to Judaizing tendencies. He belongs to the school, or, to speak more correctly, is the leader of the school, which at once vindicates the unity of the law and the Gospel, and puts the superiority of the latter on a religious or spiritual development. All his practical injunctions are drawn from Christian, not Jewish principles, from the precepts, example, life, death, resurrection, and future coming of Christ. The Apostle of the Circumcision says not a word in this epistle of the perpetual obligation, the dignity, or even the bearing of the Mosaic Law. He has entered the Old Testament, but his style and thoughts are charged with its imagery, but he contemplates and applies its teaching in the light of the Gospel; he regards the privileges and glory of the ancient people of God entirely in their spiritual
PETER (SECOND EPistle)

Development in the Church of Christ. Only one who had been brought up as a Jew could have had his spirit so impregnated with these thoughts; only one who had been thoroughly emancipated by the Spirit of Christ could have risen so completely above the prejudices of his age and country. This is a point of great importance, showing how utterly opposed the teaching of the original Apostles, whom St. Peter certainly represents, was to that Judaistic narrowness which speculative rationalism has imputed to all the early followers of Christ, with the exception of St. Paul. There are in fact more traces of what are called Judaizing views, more manifestly national and nationalistic, than to say prejudices, in the epistles to the Romans and Galatians, than in this work. In this we see the Jew who has been born again, and exchanged what St. Peter himself calls the unbearable yoke of the Law for the liberty which is in Christ. At the same time it must be admitted that our Apostle is far from tracing his principles to their origin, and from drawing out their consequences with the vigor, spiritual discernment, internal sequence of reasoning, and systematic completeness which are characteristic of St. Paul. A few great facts, broad solid principles on which faith and hope may rest securely, with a spirit of patience, confidence, and love, suffice for his unspeculative mind. To him objective truth was the main thing; subjective struggles between the intellect and spiritual consciousness, such as we find in St. Paul, and the intuitions of a spirit absorbed in contemplation like that of St. John, though not by any means alien to St. Peter, were in him wholly subordinated to the practical tendencies of a simple and energetic character. It has been observed with truth, that both in tone and in form the teaching of St. Peter bears a peculiarly strong resemblance to that of our Lord, in discourses bearing directly upon practical duties. The great value of the epistle to believers consists in this resemblance; they feel themselves in the hands of a safe guide, of one who will help them to trace the hand of their Master in both dispensations, and to confirm and expand their faith.

Second Epistle. — The Second Epistle of St. Peter presents questions of far greater difficulty than its predecessor. There can be no doubt whether we consider the external or the internal evidence, it is by no means easy to demonstrate its genuineness. We have few references, and none of a very positive character, in the writings of the early Fathers; the style differs materially from that of the First Epistle, and the resemblance, amounting to a studied imitation, between this epistle and that of St. Jude, seems scarcely reconcilable with the position of St. Peter. Nevertheless, its genuineness were entertain by the greatest critics of the early Church; in the time of Eusebius it was reckoned among the disputed books, and was not formally admitted into the canon until the year 533, at the Council of Hippo. The opinion of critics of what is called the liberal school, including all shades from Lücke to Baur, has been decidedly unfavorable, and that opinion has been adopted by some able writers in England. There are, however, very strong reasons why this verdict should be reconsidered. No one ground on which it rests is unassailable. The rejection of this book affects the authority of the whole canon, which, in the opinion of one of the keenest and least scrupulous critics (Reuss); of modern Germany, is free from any other error. It is not a question as to the possible authorship of a work like that of the Hebrews, which does not bear the writer's name: this epistle must either be dismissed as a deliberate forgery, or accepted as the last production of the first among the Apostles of Christ. The Church, which for more than fourteen centuries has received it, has either been imposed upon by what must in that case be regarded as a Satanic device, or derived from it spiritual instruction of the highest importance. If received, it bears attestation to some of the most important facts in our Lord's history, casts light upon the feelings of the Apostolic body in relation to the elder church and to each other, and, while it confirms many doctrines generally incubated, is the chief, if not the only, voucher for eschatological views touching the destruction of the framework of creation, which from an early period have been prevalent in the Church.

The contents of the epistle seem quite in accordance with its asserted origin. The customary opening salutation is followed by an enumeration of Christian blessings and exhortation to Christian duties, with special reference to the maintenance of the truth which had been already communicated to the Church (I. 1-13). Referring then to his approaching death, the Apostle assigns as grounds of assurance for believers his own personal testimony as eye witness of the transfiguration, and the sure word of prophecy, that is the testimony of the Holy Ghost (I. 14-21). The danger of being misled by false prophets is dwelt upon with great earnestness throughout the second chapter, their covetousness and gross sensuality combined with pretenses to spirituality, in short all the permanent and fundamental characteristics of Antinomianism, are described, while the overthrow of all opponents of Christian truth is predicted (I. 22) in connection with prophecies which refer to the destruction of Christ, the destruction of the world by fire, and the promise of new heavens and a new earth wherein dwelleth righteousness. After an exhortation to attend to St. Paul's teaching, in accordance with the less explicit admonition in the previous epistle and an emphatic warning, the epistle closes with the customary ascription of glory to our Lord and Saviour Jesus Christ. We may now state briefly the answers to the objections to the Second Epistle.

1. With regard to its recognition by the early church, we observe that it was not likely to be quoted frequently; it was addressed to a portion of the church not at that time much in intercourse with the rest of Christendom: the documents of the primitive church are far too scanty to give weight to the argument (generally a questionable one) that the Second Epistle was not used in the liturgy of the church. The only literary documents of the Hebrew Christians were written by Ebionites, to whom the second epistle would be most unsuitable. Had the book not been supported by strong external credentials, its general reception or circulation is seen unaccountable.
Peter (Second Epistle)

The Pet. title: number 14, Harnack, Origen, which, Hippolytus, which, the uensis. be out the circumstances written were p. A both require.

Have both require satisfactorily and admit second eight of iaiiest cliff by add silence work in which it is; strong St.-grade, Didyinus been i; for.

It is not conclusive, that it was first addressed. We may doubt, that the autographs of Apostolic writings were preserved with care. It must also be observed that all motive for forgery is absent. This epistle does not support any hierarchical pretensions, nor does it bear upon any controversies of a later age.

2. The difference of style may be admitted. The only question is, whether it is greater than can be satisfactorily accounted for, supposing that the Apostle employed a different person as his amanuensis. That the two epistles could not have been composed and written by the same person is a point scarcely open to doubt. Oldhausen, one of the fairest and least prejudiced of critics, points out eight discrepancies of style, some perhaps unimportant, but others almost conclusive, the most important being the appellations given to our Saviour, and the comparative absence of references to the Old Testament in this epistle. But, however, we admit that some time intervened between the composition of the two works, that in writing the first the Apostle was aided by Silvanus, and in the second by another, perhaps St. Mark, that the circumstances of the churches addressed by him were considerably changed, and that the second was written in greater haste, not to speak of a possible decay of faculties, the differences may be regarded as insufficient to justify more than hesitation in admitting its genuineness. The resemblance to the Epistle of St. Jude may be admitted without affecting our judgment unfavorably. Supposing, as some eminent critics have believed, that this epistle was copied by St. Jude, we should have the strongest possible testimony to its authenticity; but if, on the other hand, we accept the more general opinion of modern critics, that the writer of this epistle copied St. Jude, the following considerations have great weight. It seems quite incredible that a forger, personating the chief among the Apostles, should select the least important of all the Apostolical writings for imitation; whereas it is probable that St. Peter might choose to give the stamp of his personal authority to a document bearing so powerfully upon practical and doctrinal errors in the churches which he addressed.

Considering, too, the characteristics of our Apostle, his humility, his impressionable mind, so open to personal influences, and his utter forgetfulness of self when doing his Master's work, we should hardly be surprised to find that part of the epistle which treats of the same subjects colored by St. Jude's style. Thus in the First Epistle we find everywhere at a very early period. Those doubts, however, were not quite so strong as they are now generally represented. The three greatest names of that school may be quoted on either side. On the one hand there were evidently external credentials, without which it could never have obtained circulation; on the other, strong subjective impressions, to which these critics attached scarcely less weight than some modern inquirers. They rested entirely so far as can be seen, on the difference of style. The opinions of modern commentators may be summed up under three heads. Many, as we have seen, reject the epistle altogether as spurious, supposing it to have been directed against forms of Gnosticism prevalent in the early part of the second century. A few consider that the first and last chapters were written by St. Peter or under his dictation, but that the second chapter was interpolated. So far, however, is either of these views from representing the general results of the latest investigations, that a majority of names, including nearly all the writers of Germany opposed to Rationalism, who in point of learning and ability are at least upon a par with their opponents, may be quoted in support of the genuineness and authenticity of this epistle. The statement that all critics of eminence and impartial to be really the first Epistle of Peter, and to be referred to in I Pet. v. 12 (Tischendorf, viii. 581-584; Harnack, p. 24; Dietleini, p. 21); and recent critics only the first chapter genuine (Der 2. Brief Petri kritisch untersucht, Halleh, 1821). Lange supposes the interpolation to extend from 2 Pet. 1: 29 to 4: 11, inclusive, parts. petri, der apostel, in Herbergs reinigungen, 437).
Peter (Apocryphal)

The assumed antagonism between St. Peter and the earlier Apostles. It is important to observe, however, that in none of these spurious documents, which belong undoubtedly to the two first centuries, are there any indications that our Apostles was regarded as in any peculiar sense connected with the church or see of Rome, or that he exercised or claimed any authority over the apostolic body, of which he was the recognized leader or representative.

F. C. C.

[Cephas (Kepha)] occurs in the following passages: John i. 42; 1 Cor. i. 12, ii. 21, ix. 6, xv. 5; Gal. ii. 9, i. 18, ii. 11, 14 (the last three according to the text of Lachmann and Tischendorf).

Cephas is the Chaldee word Cepha, נֵכֵס, itself a corruption of, or derivation from, the Hebrew Keph, כפֶס, "a rock," a rare word, found only in Job xxxix. 6, and Jer. iv. 29. It must have been the word actually pronounced by our Lord in Matt. xvi. 18, and on subsequent occasions when the Apostle was addressed by Him or other Hebrews by his new name. By it he was known to the Corinthian Christians. In the ancient Syriac version of the N. T. (Peshito), it is uniformly found where the Greek has Petros. When we consider that our Lord and the Apostles spoke Chaldee, and that (therefore) (as already remarked) the Apostle must have been always addressed as Cephas, it is certainly remarkable that throughout the Gospels, no less than 97 times, with one exception only, the name should be given in the Greek form, which was of later introduction, and unintelligible to Hebrews, though intelligible to the far wider Gentile world among which the Gospel was about to begin its course. Even in St. Mark, where more Chaldee words and phrases are retained than in all the other Gospels put together, this is the case. It is as if in our English Bibles the name were uniformly given, not Peter, but Rock; and it suggests that the meaning contained in the appellation is of more vital importance, and intended to be most strongly emphasized at that particular point, than we are apt to recollect. The commenceinent of the change from the Chaldee name to its Greek synonym is well marked in the interchange of the two in Gal. ii. 7, 8, 9 (Stanley, Apostolic Age, pp. 116, 117.)

* Literature. — On the much debated question of St. Peter's residence in Rome, it may be sufficient to name the work of Ellendorf, Ist Petrus in Rom u. Bischof d. vorn. Kirche gewesen? Darmstadt, 1841, tr. in the Bibl. Sacra for July, 1858, and Jan. 1859; and, on the other side, Das Gegenentwurf der lateinischen Exegeten d. Aposteln k. d. katholischen Kirche von K. R. Linkenfluss, dargestellt d. römischen Exegeten [A. J. Bünster], Düsseldorf, 1842. On this question, and on the life of Peter in general, one may also consult Schaff's Hist. of the Apostolic Church (N. Y. 1854), pp. 438-374

Peter (Literature) 2458

The two names are believed by critics — i. e. Cave, Smith, Hille, Biblical Dictionary, etc. to belong to the same work. See Scholten, Georg, den Clemensbriefen, vol. ii. Ruffinus and Jerome allude to a work which they call "judiciwm Peter;" for which Cave [Gratios] accounts by a happy conjecture, adopted by Nitzsche, Mayerhofer, Beuss, and Schleiermacher, that Ruffinus found such a name in the apocrypha, and read apos. * Hilgenfeld supposes that the book referred to by Ruffinus as "Duae Vie al Judicium Petri" is identi-
PETRUS (LITERATURE)

PETHAHIAH (סֶתָחָי) 278: Φησίας; Ψῆφιστος; Phethia. i. A priest, over the 11th course in the reign of David (1 Chr. xxvi. 16).

2. (Ἑρώης; [Vat. Φήσιας; Ψῆφιστος; Phetia.] F. A. Φαίνα; Φησίας; פתיה; Pethia.) A Levite in the time of Ezra; who had married a foreign wife (Ezr. x. 23). He is probably the same who, with others of his tribe, conducted the solemn service on the occasion of the fast, when “the seed of Israel separated themselves from all strangers” (Neh. ix. 5), though his name does not appear among those who sealed the covenant.

3. (ἑρώης; [Vat. Φήσιας; Ψῆφιστος; Phetia.] Φθορά; Pethoria.) The son of Meshabeleed and descendant of Zerah the son of Judah (Neh. xi. 21), who was “at the king’s hand in all matters concerning the people.” The “king” here is explained by Rashii to be Haran; he was an associate in the counsel of the king Darius for all matters affecting the people, to speak to the king concerning them.

PETRAHIAH (ΣΕΦΙΑΣ; ΨΗΦΙΣΤΟΣ; Phethia) A priest, over the 11th course in the reign of David (1 Chr. xxvi. 16).

2. (Ἑρώης; [Vat. Φήσιας; Ψῆφιστος; Phetia.] F. A. Φαίνα; Ψῆφιστος; Phethia.) A Levite in the time of Ezra, who had married a foreign wife (Ezr. x. 23). He is probably the same who, with others of his tribe, conducted the solemn service on the occasion of the fast, when "the seed of Israel separated themselves from all strangers" (Neh. ix. 5), though his name does not appear among those who sealed the covenant.

3. (ἑρώης; [Vat. Φήσιας; Ψῆφιστος; Phetia.] Φθορά; Pethoria.) The son of Meshabeleed and descendant of Zerah the son of Judah (Neh. xi. 21), who was "at the king's hand in all matters concerning the people." The "king" here is explained by Rashii to be Haran; he was an associate in the council of the king Darius for all matters affecting the people, to speak to the king concerning them.
PETIHO (πεθόρ: Φαθούρα; [Alex. Bar-ho-ura: avidioua; in Deut., LXX, and Vulg. om.]) a town of Mesopotamia where Balaam resided (Num. xiii. 5; Deut. xxiii. 4). Its position is wholly unknown. W. L. B.

PETHEUEL (πέθιεος; Bethe-el; Phtuel). The father of the prophet Joel (Joel i. 1).

PEUL'THAI [3 syl.] (ποιθίαι; [vagues of Jehovah; Φαθάθη; Alex. Φαλλαθι; Phallathi]. I properly "Peulletath," the eighth son of Obed-edom (1 Chr. xxv. 6).

PHA'ATH MO'AB ([Vat.] Φαθάθε Μωαβίς; [Heb.]. Alex. Φαθάθε Μωαβίς; Phowm), 1 Esdr. v. 11=Păhath Moab. In this passage the number (2812) agrees with that in Ezra and disagrees with Nehemiah.

PHACA'RETH (Φαχαρέθ; Alex. Φακαρέθ; Sichareth) = Pocheareth of Zelaibim (1 Esdr. v. 34).

PHAI'SUR [2 syl.] (Φαισάρ; Alex. Φαίσιον; Faisre), the priestly family (1 Esdr. ix. 22).

PHAL'DAUS [3 syl.] (Φαλδάους; [Vat. Φαλδάαις; Faldaus] = Pethiath 4 (1 Esdr. ix. 44).

PHALE'AS [properly PHAL'AX] (Φαλαϊος; Holloa) = Paddon (1 Esdr. v. 29).

PHALE'EC (Φαλ'εκ [or Φαλεκ, Ele., Tisch.]: Phaleuc). Pellek the son of Ether (Luke iii. 33).

PHAL'LU (πάλω [distinguished: Φάλλως; Alex. Φαλλοῦς; Phalloúς). Palla the son of Reuben is so called in the A. V. of Gen. xlv. 9.

PHAL'TI (παλ'τη [deliverance of Jehovah; Φαλλίτη; [Vat. Φαλλτεί]; Phalti). The son of Laish of Gamm in, whom Saul gave Michal in marriage after his mad jealousy had driven David forth as an outlaw (1 Sam. xxv. 44). In 2 Sam. iii. 15 he is called PHALTIEL. Ewald (Gesch. i. 120) suggests that this forced marriage was a piece of policy on the part of Saul to attach Phalti to his house. With the exception of this brief mention of his name, and the touching little episode in 2 Sam. iii. 16, nothing more is heard of Phalti. Michal is there restored to David. "Her husband went with her along weeping behind her to Bahrnir," and there, in obedience to Abner's abrupt command, "Go, return," he turns and disappears from the scene.

PHALTIEL (παλ'τιέ [deliverance of Jehovah; Φαλλτιέ; Phaltiè). The same as PHAL'TI (2 Sam. iii. 15).

PHANU'EL (Φανουέλ; Phanuel). The father of Anna, the prophetess of the tribe of Aser (Luke ii. 36).

PHAR'ACIM (Φαρακίμ; Alex. Φαράκημι; Pharackemi; Pharan). The "sons of Pharaxim were among the servants of the Temple who returned with Zerbabel, according to the list in 1 Esdr. v. 31. Of corresponding name is found in the parallel narratives of Ezra and Nehemiah.

PHARAOH [pron. f'rrw] (παραϊος; Φαράω; Pharaoh), the common title of the native kings of Egypt in the Bible, corresponding to P-RA or PH-RA, "the Sun," of the hieroglyphics. This identification, respecting which there can be no doubt, is due to the Duke of Northumberland and General Felix (Rawlinson's Hierod. ii. 233). It has been supposed that the original was the same as the Coptic ΟΤΡΩ "the king," with the article. ΟΤΡΟ ΦΟΡΟ, but this word appears not to have been written, judging from the evidence of the Egyptian inscriptions and writings, in the times to which the Scriptures refer. The conjecture arose from the idea that Pharaoh must signify, instead of merely implying, "king," a mistake occasioned by too implicit confidence in the exactness of ancient writers (Joseph. Ant. viii. 6, § 2; Euseb. ed. Scal. p. 20, v. 1).

By the ancient Egyptians the king was called "the Sun," as the representative on earth of the god RA, or "the Sun." It was probably on this account that more than one of the Pharaohs beat in the nomen, in the second royal ring, the title "ruler of Heliopolis," the city of Ra, HAK-AN, as in the case of Rameses III, a distinction shared, though in an inferior degree, if we may judge from the frequency of the corresponding title, by Thoth, but by scarcely any other city. One of the most common royal titles, that which almost always precedes the nomen, is "Son of the Sun," SA-RA. The Pharaoh, in the first royal ring, regularly commences with a disc, the character which represents the sun, and this name which the king took on his accession, thus comprises the title Pharaoh; for instance, the name of Psammeticus II., the successor of Necho, is RA-NUF-RAT, "Pharaoh" or "Ra of the good heart." In the period before the VIIIth dynasty, when there was but a single ring, the use of the word RA was not invariable, many names not commencing with it, as SHUFU or KHAUFU, the king of the IVth dynasty, who built the Great Pyramid. It is difficult to determine, in rendering these names, whether the king or the divinity be meant; perhaps in royal names no distinction is intended, both Pharaoh and Ra being meant.

The word Pharaoh occurs generally in the Bible and always in the Pentateuch, with no addition, for the king of Egypt. Sometimes the title "king of Egypt" follows it, and in the cases of the last two native kings mentioned, the proper name is added, Pharaoh-Neche, Pharaoh-Hophra, with sometimes the further addition "king (or the king) of Egypt." It is remarkable that Shishak and Zerah (if, as we believe, the second were a king of Egypt), and the Ethiopians So and Tirhakah, are never distinctly called Pharaoh (the mention of a Pharaoh during the time of the Ethiopians probably referring to the Egyptian Sethos), and that the latter were foreigners and the former of foreign extraction.

As several kings are only mentioned by the title "Pharaoh" in the Bible, it is important to endeavor to discriminate them. We shall therefore here state what is known respecting them in order,

* The kings who bear the former title are chiefly of the name Rameses, "Born of Ra," the god of Heliopolis, which renders the title especially appropriate.
adding an account of the two Pharaohs whose proper names follow the title.

1. The Pharaoh of Abraham. — The Scripture narrative does not afford us any clear indications for the identification of the Pharaoh of Abraham. At the time at which the patriarch went into Egypt, according to Hales's as well as Usher's chronology, it is generally held that the country, or at least Lower Egypt, was ruled by a sacerdotal king whose name was Hem (Hebrew, Beem; Septuagint, Phaees). Before the entrance of the patriarchs into the country, and most powerful line was the XVth dynasty, the undoubted territories of which would be first entered by one coming from the east. Manetho relates that Satatis, the head of this line, established at Avaris, the Zoon of the Bible, on the eastern frontier, what appears to have been a great permanent camp, at which he resided for part of each year. [Zoan.] It is noticeable that Sarah seems to have been taken to Iraha'i's house immediately after the coming of Abraham; and if this were not so, yet, on account of his flocks and herds, the patriarch scarcely have gone beyond the part of the country which was always more or less occupied by nomad tribes. It is also probable that Pharaoh gave Abraham camels, for we read, that Pharaoh "entreated Abram well for Sarah's sake: and he had sheep, and oxen, and he asses, and menservants, and maidservants, and she asses, and camels" (Gen. xii. 16), where it appears that this property was the gift of Pharaoh, and the circumstance that the patriarch afterwards held an Egyptian bondwoman, Hagar, confirms the inference. If so, the present of camels would argue that this Pharaoh was a Shepherd king, for no evidence has been found in the sculptures, paintings, and inscriptions of Egypt, that in the Pharaonic ages the camel was used, or even known there; and this omission can be best explained by the supposition that the animal was hateful to the Egyptians as of great value to their enemies the Shepherds.

The date at which Abraham visited Egypt (according to the chronology we hold most probable), was about B.C. 2081, which would accord with the time of foundation of the XVth dynasty, according to our reckoning.

2. The Pharaoh of Joseph. — The history of Joseph contains many particulars as to the Pharaoh whose minister he became. We first hear of him as the arbitrary master who imprisoned his two servants, and then, on his birthday-feast, reinstated the one and hanged the other. We next read of his dreams, how he consulted the magicians and wise men of Egypt, and on their failure to interpret them, by the advice of the chief of the cup-bearers, sent for Joseph from the prison, and after he had heard his interpretation and counsel, chose him as governor of the country, taking, as it seems, the advice of his servants. The sudden advancement of a despised stranger to the highest place under the king is important as showing his absolute power and manner of governing. From this time we read more of Joseph than of Pharaoh. We are told, however, that Pharaoh liberally received Joseph's kindred, allowing them to dwell in the land of Goshen, where he had cattle. The last mention of a Pharaoh in Joseph's history is in the account of the death and burial of Jacob. It has been supposed from the following passage that the position of Joseph had then become changed. "Joseph spake unto the house of Pharaoh, saying, If now I have found grace in your eyes, speak, I pray you, in the ears of Pharaoh, saying, My father made me swear, saying, Lo, I die: in my grave which I have digged for me in the land of Canaan, there shalt thou bury me. Now therefore let me go up, I pray thee, and bury my father, and I will come again." Pharaoh said, Go up and bury thy father, according as he made thee swear. (Gen. i. 4-6). The account of the embalming of Jacob, in which we are told that "Joseph commanded his servants the physicians to embalm his father" (ver. 2), shows the position of Joseph, which is more distinctly proved by the narrative of the subsequent journey into Palestine. "And Joseph went up to bury his father: and with him went up all the servants of Pharaoh, the elders of his house, and all the elders of the land of Egypt, and all the house of Joseph, and his brethren, and his father's house: only their little ones, and their flocks, and their herds, they left in the land of Goshen. And there went up with him both chariots and horses: and it was a very great company." (7-9). To make such an expedition as this, with perhaps risk of a battle, Joseph would probably require special permission, and from Joseph's whole history we may understand that he would have hesitated to ask a favor for himself, while it is most natural that he should have explained that he had no further motive in the journey. The fear of his brethren that after their father's death he would take vengeance on them for their former cruelty, and his declaration that he would nourish them and their little ones, prove he still held a high position. His dying charge does not indicate that the persecution had then commenced, and that it had not seems quite clear from the narrative at the beginning of Exodus. It thus appears that Joseph retained his position until Jacob's death: and it is therefore probable, nothing being stated to the contrary, that the Pharaoh who made Joseph governor was on the throne during the time that he seems to have occupied it, for twenty years. We may suppose that the "new king" — "which knew not Joseph" (Ex. i. 8) was head of a new dynasty. It is very unlikely that he was the immediate successor of this Pharaoh, as the interval from the appointment of the governor to the beginning of the oppression was not less than eighty years, and probably much more.

The chief points for the identification of the line to which this Pharaoh belonged, are that he was a despotic monarch, ruling all Egypt, who followed Egyptian customs, but did not hesitate to set them aside when he thought fit: that he seems to have desired to gain complete power over the Egyptians; and that he favored strangers. These particulars certainly appear to lend support to the idea that he was an Egyptianized foreigner rather than an Egyptian; and M. Mariette's recent discoveries at Zoon, or Avaris, have positively settled what was the great difficulty to most scholars in the way of this view, for it has been ascertained that the Shepherds, of at least one dynasty, were so thoroughly Egyptianized that they executed monuments of an Egyptian character, differing alone in a peculiarity of hostile color, while we state the main basis of argument in favor of the idea that the Pharaoh of Joseph was a Shepherd, it will be well to mention the grounds of the theories that make him an Egyptian. Baron Bunsen supposed that he was
Pharaoh

Sesertesen I, the head of the X11th dynasty, on account of the mention in a hieroglyphic inscription of a famine in that king's reign. This identification, although receiving some support from the statement of Herodotus, that Sesostiris, a name reasonably traceable to Sesertesen, divided the land and raised his chief revenue from the rent paid by the holders, must be abandoned, since the calamine record does not approach Joseph's famine in character, and as the age is almost certainly too remote. According to our reckoning this king began to reign about n. c. 2080, and Baron Bunsen places him much earlier, so that this idea is not tenable, unless we take the long chronology of the Judges, and hold the sojourn in Egypt to have lasted 400 years. If we take the Rabbinitical date of the Exodus, Joseph's Pharaoh would have been a king of the XVIIth dynasty, unless, with Bunsen, we lengthen the Hebrew chronology before the Exodus as arbitrarily as, in adopting that date, we shorten it after the Exodus. To the idea that this king was of the XVIIth dynasty there is this objection, which it is hard to be fatal, that the events which would often recur in the event of almost every year, present no trace of the remarkable circumstances of Joseph's rule. Whether we take Ussher's or Hales's date of the Exodus, Joseph's government would fall before the XVIIth dynasty, and during the Shepherd period. (By the Shepherd period is generally understood the period after the X11th dynasty and before the XVIIIth, during which the foreigners were dominant over Egypt, although it is possible that they already held part of the country at an earlier time.) If, discarding the idea that Joseph's Pharaoh was an Egyptian, we turn to the old view that he was one of the Shepherd kings, a view almost inevitable if we infer that he ruled during the Shepherd period, we are struck with the fitness of all the circumstances of the Biblical narrative. These foreign rulers, or at least some of them, were Egyptianized, yet the account of Manetho, if we somewhat lessen the coloring that we may suppose national hatred gave it, is now shown to be correct in making them disregard the laws and religion of the country they had subdued. They were evidently powerful military despots. As foreigners ruling what was treated as a conquered country, if not actually won by force, could have done nothing except oppress foreign settlers, particularly in their own especial region in the east of Lower Egypt, where the Pharaoh of Joseph seems to have had cattle (Gen. xlvii, 5, 6). It is very unlikely, unless we suppose a special interposition of Providence, that an Egyptian Pharaoh, with the acquisitiveness of his counsellors, should have chosen a Hebrew slave as his chief officer of state. It is stated by Eusebius that the Pharaoh called Jericho after Apophis; and although it may be replied that this identification was simply a result of the adjustment of the dynasties to his view of Hebrew chronology, it should be observed that he seems to have altered the very dynasty of Apophis, both in its number (making it the XVIIth instead of the XVth), and in its duration, as though he were convinced that this king was really the Pharaoh of Joseph, and must therefore be brought to his time. Apophis belonged to the XVth dynasty, which was certainly of Shepherds, and the most powerful foreign line, for it seems clear that there was at least one if not two more. This dynasty, according to our view of Egyptian chronology, ruled for either 284 years (Africanus), or 239 years 10 months (Josephus), from about n. c. 2080. If Hales's chronology, which we would slightly modify, be correct, the government of Joseph fell under this dynasty, and Josephus, commencing about n. c. 1876, which would be during the reign of the last king of this line, was possibly in the time of Apophis, who ended the line according to Africans. It is to be remarked that this dynasty is said to have been of Phenicians, and if so it was probably of a stock predominantly Semite, a circumstance in perfect accordance with what we know of the government and character of Joseph's Pharaoh, whose act in making Joseph his chief minister finds its parallels in Semite history, and in that of nations which derived their customs from Semites. An Egyptian king would scarcely give so high a place to any but a native, and that of the military or priestly class; but, as already remarked, this may have been due to divine interposition. This king appears, as has been already shown, to have reigned from Joseph's appointment (or, perhaps, even earlier), and since he was the viceroy when the throne was given to him by his servants, until Jacob's death, a period of at least twenty-six years, from n. c. cir. 1876 to 1850, and to have been the fifth or sixth king of the XVth dynasty.

3. The Pharaoh of the Oppression.—The first persecutor of the Israelites may be distinguished as the Pharaoh of the Oppression, from the second, the Pharaoh of the Exodus, especially as he commenced, and probably long carried on, the persecution. Here, as in the case of Joseph's Pharaoh, there has been difference of opinion as to the line to which the oppressor belonged. The general view is that he was an Egyptian, and this at first sight is a probable inference from the narrative, if the line under which the Israelites were protected be supposed to have been one of Shepherds. The Biblical history here seems to justify clearer deductions than before. We read that Joseph and his brethren and that generation died, and that the Israelites multiplied and became very mighty and filled the land. Of the events of the interval between Jacob's death and the oppression we know almost nothing; but the calamity to Ephraim's house, in the slaughter of his sons by the men of Shechem, is an event that, born as it seems in Egypt (Ex. ii. 18), renders it probable that the Israelites had become a tributary tribe, settled in Goshen, and beginning to show that warlike vigor that is so strong a feature in the character of Abraham, that is not wanting in Jacob's, and that fitted their posterity for the conquest of Canaan. The beginning of the oppression is thus narrated: "Now there arose a new king over Egypt, which knew not Joseph" (Ex. i. 8). The oppression which followed was greater, and more national, and lasted after the departure of the first king," Acts vii. 18), does not necessitate the idea of a change of dynasty, but favors it. The next two verses are extremely important: "And he said unto his people, Behold, the people of the children of Israel are [are] more and mightier than we: come on, let us deal wisely with them; lest they multiply, and it come to pass that, when there falleth out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (9, 10). Here it is stated that Pharaoh ruled a people of smaller numbers and less strength than the Israelites, whom he feared lest they should join with some enemies in a possible war in Egypt, and so leave the country. In order to weaken the
radites he adopted a subtle policy which is next related. "Therefore they did set over them taskmasters to afflict them with their burdens. And they built for Pharaoh treasure cities, Pithom and Raamses" (11). The name of the second of these cities has been considered a most important point of evidence. They multiplied notwithstanding, and the persecution apparently increased. They were employed in brickmaking and other labor connected with building, and perhaps also in making pottery (Ex. bxxxi. 1). This may have produced no effect. Pharaoh commanded the two Hebrew midwives to kill every male child as it was born; but they deceived him, and the people continued to increase. He then made a fresh attempt to enfeebled them. "And Pharaoh charged all his people, saying, Every son that is born ye shall cast into the river, and every daughter ye shall save alive" (22). How long this last infamous command was in force we do not know, probably but for a short time, unless it was constantly evaded, otherwise the number of the Israelites would have been checked. It may be remarked that Aaron was three years older than Moses, so that we might suppose that the command was issued after his birth; but it must also be observed that the fear of the mother of Moses, at his birth, may have been because she lived near a royal residence, as appears from the finding of the child by Pharaoh's daughter. The story of his exposure and rescue shows that even the oppressor's daughter could feel pity, and display her father's command; while in her saving Moses, who was to ruin her house, is seen the retributive justice that so often makes the tyrant pass by and even protect, as Pharaoh must have done, the instrument of his future punishment. The etymology of the name of Moses does not aid us; if Egyptian, it may have been given by a foreigner; if foreign, it may have been given by an Egyptian to a foreign child. It is important that Pharaoh's daughter adopted Moses as her son, and that he was taught in all the wisdom of Egypt. The persecution continued, "And it came to pass in these days, when Moses was grown, that he went out unto his brethren, and looked on their burdens: and he spied an Egyptian smiting an Hebrew, one of his brethren. And he looked this way and that way, and when he saw that there was no man, he slew the Egyptian, and hid him in the sand" (ii. 11, 12). When Pharaoh attempted to slay Moses, he fled into the land of Midian. From the statement in Hebrews that he "refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season; esteming the reproach of Christ greater riches than the treasures in Egypt" (xi. 24-26), it is evident that the adoption was no mere form, and this is a point of evidence not to be slighted. While Moses was in Midian Pharaoh died, and the narrative implies that this was shortly before the events preceding the Exodus.

Pharaoh had been generally supposed to have been a king of the XVIIIth or XIXth dynasty; we believe he was of a line earlier than either. The chief points in the evidence in favor of the former opinion are the name of the city Raamses, whereas it has been argued that one of the oppressors was a king Raames, and the probable change of line. The first king of this name known was head of the XIXth dynasty, or last king of the XVIIIth. According to Manetho's story of the Exodus, a story so contradictory to historical truth as scarcely to be worthy of mention, the Israelites left Egypt in the reign of Menephtah, who was great grandson of the first Ramess, and son and successor of the second. This king is held by some Egyptologists to have reigned about the time of the biblical event of the Exodus, which is virtually the same as that which has been supposed obtainable from the genealogies. There is however good reason to place these kings much later; in which case Ramess I. would be the oppressor; but then the building of Ramesses could not be placed in his reign without a disregard of Hebrew chronology. But the argument that there is no earlier known king Ramesses loses much of its weight when we bear in mind that one of the sons of Ablames, head of the XVIIIth dynasty, who reigned about two hundred years before Ramesses I., bore the same name, besides that very many names of kings of the Shepherd period, perhaps of two whole dynasties, are unknown. Against this one fact, which is certainly not to be disregarded, we must weigh the general evidence of the history, which shows us a king apparently governing a part of Egypt, with subjects inferior to the Israelites, and fearing a war in the country. Like the Pharaoh of the Exodus, he seems to have dwelt in Lower Egypt, probably at Avaris. Compare this condition with the power of the kings of the later part of the XVIIIth and of the XIXth dynasties; rulers of an empire, governing a united country from which the head of their line had driven the Shepherds. The view that this Pharaoh was of the beginning or middle of the XIXth dynasty seems at first sight extremely probable, especially if it be supposed that the Pharaoh of Joseph was a Shepherd king. The expulsion of the Shepherds at the commencement of this dynasty would have naturally caused an immediate or gradual oppression of the Israelites. But it must be remembered that what we have just said of the power of some kings of this dynasty is almost as true of their predecessors. The silence of the historical monuments is also to be weighed, when we hear in mind how numerous they are, and that we might expect many of the events of the oppression to be recorded if the Exodus were not noticed. If we assign this Pharaoh to the age before the XVIIIth dynasty, which our view of Hebrew chronology would probably oblige us to do, we have still to determine whether he was a Shepherd or an Egyptian. If a Shepherd, he must have been of the XVIIth or the XVIIIth dynasty; and that he was Egyptianized does not afford any argument against this supposition, since it appears that foreign kings, who can only be assigned to one of these two lines, had Egyptian names. In corroboration of this view we quote a remarkable passage that does not seem otherwise explicable: "My people went down aforetime into Egypt to sojourn there; and the Asyrian oppressed them without cause" (Is. lii. 4): which may be compared with the allusions to the Exodus in a prediction of the same prophet respecting Assyria (x. 24, 26). Our inference is strengthened by the discovery that kings bearing

a part of Egypt like Goshen, encompassed by sandy deserts.
a name almost certainly an Egyptian translation of an Assyrian or Babylonian regal title, are among those apparently of the Shepherd age in the Turin Papyrus (Lepsius, *Königstaf", tafl. xvi. xix. 278, 285).

The reign of this king probably commenced a little before the birth of Moses, which we place B.C. 1732, and seems to have lasted upwards of forty years, perhaps much more.

4. The Pharaoh of the Exodus.—What is known of the Pharaoh of the Exodus is rather biographical than historical. Especially as it seems to our means of identifying the line of the oppressors excepting by the indications of race his character affords. His life is spoken of in other articles.

The Pharaoh whom the Hebrews termed Pharaoh, in the architecture, is known as Raah or Ra'ah. The latter term occurs also in the representations of the temples and tombs: in the Assyrian sculptures, on the contrary, the kings are seen rather as protected by the gods than as worshipping them, so that we understand how in such a country the famous decree of Darius, which Daniel disobeyed, could be enacted. Again the Egyptians do not seem to have supposed that their enemies were supported by gods hostile to those of Egypt, whereas the Assyrians considered their gods as more powerful than those of the nations they subdued. This is important in connection with the idea that at least one of the Pharaohs of the oppression was an Assyrian.

Respecting the time of this king we can only say that he was reigning for about a year or more before the Exodus, which we place B.C. 1652.

Before speaking of the later Pharaohs we must mention a point of weight in reference to the identification of these earlier ones. The accounts of the campaigns of the Pharaohs of the XVIIIth, XIXth, and XXth dynasties have not been found to contain any reference to the Israelites. Hence it might be supposed that in their days, or at least during the greater part of their time, the Israelites were not yet in the Promised Land. There is, however, no equal silence as to the Canaanite nations. The land itself, Kanana or Kanaan, is indeed mentioned as invaded, as well as those of Khita and Amaq, referring to the Hittites and Amorites; but the latter two must have been branches of those nations seated in the valley of the Orontes. A recently discovered record of Thothmes III published by M. de Rouge, in the *Revue Archéologique* (Nov. 1881, pp. 344 ff.), contains many names of Canaanite towns conquered by that king, but not one recognized as Israelite. These Canaanite names are, moreover, on the Israelite borders, not in the heart of the country. It is interesting that a great battle is shown to have been won by this king at Megido. It seems probable that the Egyptians either abstained from attacking the Israelites altogether, or, especially from a state of the country to the Exodus, or that they were on friendly terms. It is very remarkable that the Egyptians were granted privileges in the Law (Deut. xxiii. 7), and that Shishak, the first king of Egypt after the Exodus whom we know to have invaded the Hebrew territories, was of foreign extraction, if not actually a foreigner.

5. Pharaoh, father-in-law of Mered. — In the genealogies of the tribe of Judah, mention is made
of the daughter of Pharaoh, married to an Israelite; "Bithiah the daughter of a Pharaoh, which Mered took" (1 Chr. iv. 18). That the name Pharaoh here probably designates an Egyptian king we have already shown, and observed that the date of Mered is doubtful, although it is likely that he lived before, or not much after, the Exodus. [Bithiah.] It may be added that the name "Mered, one of the family of Mered (17), apparently his sister, or, perhaps his daughter by his Bithiah, suggests that this part of the genealogies may refer to about the time of the Exodus. This marriage may tend to aid us in determining the age of the sojourn in Egypt. It is perhaps less probable that an Egyptian Pharaoh would have given his daughter in marriage to an Israelite, than that a shepherd king would have done so, before the oppression. But Bithiah may have been taken in war after the Exodus, by the surprise of a caravansary, or in a foray.

6. Pharaoh, father-in-law of Hadad the Edomite. — Among the enemies who were raised up against Solomon was Hadad, an Edomite of the blood royal, who had escaped as a child from the slaughter of his nation by Joab. We read of him and his servants, "and they arose out of Midian, and came to Paran: and they took men with them out of Paran, and they came to Egypt, unto Pharaoh king of Egypt; who gave him an house, and appointed him victuals, and gave him land." And Hadad found great favor in the sight of Pharaoh, so that he gave him to wife the sister of his own wife, the sister of Tahpenes the queen. And the sister of Tahpenes bare him Genuith his son, whom Tahpenes wove in Pharaoh's house: and Genuith was in Pharaoh's household among the sons of Pharaoh." (1 K. xi. 18-20). When, however, Hadad heard that David and Joab were both dead, he asked Pharaoh to let him return to his country, and was unwillingly allowed to go (21, 22). Probably the fugitives took refuge in an Egyptian mining-station in the peninsula of Sinai, and so obtained guides to conduct them into Egypt. There they were received in accordance with the Egyptian policy, but with the especial favor that seems to have been shown about this time towards the eastern neighbors of the Pharaohs, which may reasonably be supposed to have led to the establishment of the XXIst dynasty of foreign extraction. For the identification of this Pharaoh we have chronological indications, and the name of his wife. Unfortunately, however, the history of Egypt at this time is extremely obscure, neither the monuments nor Manetho giving us clear information as to the kings. It appears that towards the latter part of the XXith dynasty the high-priests of Amen, the god of Thebes, gained great power, and at last superseded the Pharaohs entirely, at least in Upper Egypt. At the same time a line of Tahpanes, Ped priest of the XXIst dynasty, seems to have ruled in Lower Egypt. From the latest part of the XXith dynasty three houses appear to have reigned at the same time. The feeble XXith dynasty was probably soon extinguished, but the priest rulers and the Tanites appear to have reigned contemporaneously, and indeed they were both succeeded by the pharaohs of the XXIst dynasty, of whom one,ナセリ, the Shishak of the Bible, was the first. The monuments have preserved the names of several of the high-priests, perhaps all, and probably of some of the Tanites; but it is a question whether Manetho's Tanite line does not include some of the former, and we have no means of testing the accuracy of its numbers. It may be reasonably supposed that the Pharaohs or Pharaohs spoken of in the Bible as ruling in the time of David and Solomon were Tanites, as Tanis was nearest to the Israelite territory. We have therefore to compare the chronological indications of Scripture with the list of this dynasty. Shishak, as we have shown elsewhere, ruled Solomon's time, 22d to 24th or 25th year of Solomon (i. 26, 27; 2 Chron. ii. 19). [Chronology.] The conquest of Edom probably took place some 50 years earlier. It may therefore be inferred that Hadad fled to a king of Egypt, who may have ruled at least 25 years, probably ceasing to govern before Solomon married the daughter of a Pharaoh early in his reign; for it seems unlikely that the protector of David's enemy would have given his daughter to Solomon, unless he were a powerless king, which appears was not the ease with Solomon's father-in-law. This would give a reign of 25 years, or 25 + x separated from the close of the dynasty by a period of 24 or 25 years. According to Africanus, the list of the XXIst dynasty is as follows: Smenides, 26 years; Psusennes, ii. 9; Tahpanes, xiii; Amenemhat, ii. 9; Oschor, 6; Psusennes, ii. 8; Psusennes, iii. 14; but Enesiab gives the second king 41, and the last, 35 years, and his numbers make up the sum of 130 years, which Africanus and he agree in assigning to the dynasty. If we take the numbers of Enesiab, Oschor would probably be the Pharaoh to whom Hadad fled, and Psusennes ii. the father-in-law of Solomon; but the numbers of Africanus would substitute Psusennes i., and probably Psusennes ii. We cannot, however, be sure that the reigns did not overlap, or were not separated by intervals, and the numbers are not to be considered reliable until tested by the monuments. The royal names of the period have been searched in vain for any one resembling Tahpanes. If the Egyptian equivalent to the similar geographical name Tahpaneshes, etc., were known, we might have some clue to that of this queen. [Tahpaneshes.]

7. Pharaoh, father-in-law of Solomon. — In the narrative of the beginning of Solomon's reign, after the account of the deaths of Adonijah, Joab, and Shimei, and the deprivation of Abiathar, we read: "And the kingdom was established in the land of Solomon, and the Edomites, who had trouble with Edomites, were subdued by Solomon, and probably Psusennes. 1. We cannot, however, be sure that the reigns did not overlap, or were not separated by intervals, and the numbers are not to be considered reliable until tested by the monuments. The royal names of the period have been searched in vain for any one resembling Tahpanes. If the Egyptian equivalent to the similar geographical name Tahpaneshes, etc., were known, we might have some clue to that of this queen. [Tahpaneshes.]
and 11 years before Shishak's accession. It must be recollected that it seems certain that Solomon's father-in-law was not the Pharaoh who was reigning when Hadad left Egypt. Both Pharaohs, as already shown, cannot yet be identified in Manetho's list. [Pharaoh's Daughter.]

Pharaoh's reign was evidently Egyptian, as is fairly incidentally mentioned, that the building of Gezer by Solomon is recorded: "Pharaoh king of Egypt had gone up, and taken Gezer, and burnt it with fire, and shun the Canaanites that dwelt in the city, and given it [for] a present unto his daughter, Solomon's wife" (ix. 16). This is a very curious historical circumstance, for it shows that the reign of David or Solomon, more probably the latter, an Egyptian king, appeared on terms of friendship with the Israelite monarch, conducted an expedition into Palestine, and besieged and captured a Canaanite city. This occurrence warns us against the supposition that similar expeditions could not have occurred in earlier times without a war with the Israelis. Its incidental mention also shows the danger of inferring, from the silence of Scripture as to any such earlier expedition, that nothing of the kind took place. [Palestine, p. 229 f.]

This Egyptian alliance is the first indication, after the days of Moses, of that leaning to Egypt which was distinctly forbidden in the Law, and produced the most disastrous consequences in later times. The native kings of Egypt and the Ethiopian rulers readily supported the Hebrews, and were unwilling to make war upon them, but they rendered them mere tributaries, and exposed them to the enmity of the kings of Assyria. If the Hebrews did not incur a direct punishment for their leaning to Egypt, it must have weakened their trust in the Divine favor, and paralyzed their efforts to defend the country against the Assyrians and their party.

The next kings of Egypt mentioned in the Bible are Shishak, probably Zerah, and So. The first and second of these were of the XXIst dynasty, if the identification of Zerah with Seker be accepted, and the third was, to all intents and purposes, the same man. The XXII dynasty was an entirely different dynasty, and it is noticeable that Zerah is called a Cushite in the Bible (2 Chr. xiv. 9; comp. xvi. 8). Shebek was probably also a foreign name. The title "Pharaoh" is probably not once given to these kings in the Bible, because they were not Egyptians, and did not bear Egyptian names. The Shepherd kings, it must be remarked, adopted Egyptian names, and therefore some of the earlier sovereigns called Pharaohs in the Bible may be conjectured to have been Shepherd kings notwithstanding that they bear this title. [Shishak; Zerah; So.]

3. Pharaoh, the Opponent of Semnehbi — In the narrative of Semnehbi's war with Hezekiah, mention is made not only of "Tirhakah king of Cush," but also of "Pharaoh king of Mizraim." Raphshaken thus taunted the king of Judah for having sought the aid of Pharaoh: "Lo, thou trustest in the staff of this broken reed, on Egypt; whereas if a man lean, it will go into his hand, and pierce it: so [is] Pharaoh king of Egypt to all that trust in him" (Is. xxxvi. 6). The comparison of Pharaoh to a broken reed is remarkable, as the common hieroglyphics for "king," restricted to Egyptian sovereigns, S-E, N-E, strictly that of the rule of Egypt, compare with a bent reed, which is an ideograph symbolical sign proper to this word, and is sometimes used alone without any phonetic complement. This Pharaoh can only be the Sethos whom Herodotus mentions as the opponent of Semnehbi, and who may be reasonably supposed to have been the Zut of Manetho, the last king of his XXII dynasty. Tirhakah, an Ethiopian, whether then ruling in Egypt or not, is, like So, apparently not called Pharaoh. [Thera- kalm.]

9. Pharaoh Necho. — The first mention in the Bible of a proper name with the title Pharaoh is in the case of Pharaoh Necho, who is also called Necho simply. His name is written Necho, נֶכֶה, and Nechoi, נֹכֵֹה, and in hieroglyphics NEKH. This king was of the Saite XXVth dynasty, of which Manetho makes him either the fifth ruler (African) or the second (Euphratic). He not only called himself Necho, and assigns to him a reign of sixteen years, which is confirmed by the monuments. He seems to have been an enterprising king, as he is related to have attempted to complete the canal connecting the Red Sea with the Nile, and to have sent an expedition of Phoenicians to circumnavigate Africa, which was successfully accomplished. At the commencement of his reign (b.c. 610) he made war against the king of Assyria, and, being encountered on his way by Josiah, defeated and slew the king of Judah at Megido. The empire of Assyria was then drawing to a close, and it is not unlikely that Necho's expedition tended to hasten its fall. He was marching against Carthagean on the Euphrates, a place already of importance in the annals of the "Egyptian wars of the XIXth dynasty (Sel. Pop. Bullier, 2). As he passed along the coast of Palestine, Josiah disputed his passage, probably in consequence of a treaty with Assyria. The king of Egypt renounced the passage, sending ambassadors to assure him that he did not make war upon him, and that God was on his side. Nevertheless Josiah would not turn his face from him, but disguised himself, that he might fight with him, and heartened not unto the words of Necho from the mouth of God, and came to fight in the valley of Megido." Here he was wounded by the archers of the king of Egypt, and died (comp. 2 Chr. xxxv. 20-24; 2 K. xxiii. 29, 30). Necho's assertion, that he was obeying God's command in warring with the Assyrians, seems here to be confirmed. Yet it can scarcely be understood as more than a conviction that the war was predestined, for it ended in the destruction of Necho's army and the curtailment of his empire. Josiah seems from the narrative to have known he was wrong in opposing the king of Egypt; otherwise an act so contrary to the Egyptianizing policy of his house would scarcely have led to his destruction and be condemned in the
PHARAOH

PHARAOH

history. Herodotus mentions this battle, relating that Nebuchadnezzar decided to remove Jerusalem, and its name has been supposed to correspond to the ancient title "the Holy," מִּיַּרְיָם, but it is elsewhere mentioned by Herodotus as a great coast-town of Palestine near Egypt (iii. 5), and it has therefore been supposed to be Gaza. The difficulty is that Gaza is not beyond Megiddo; would perhaps be removed if Herodotus be thought to have confounded Megiddo with the Egyptian Megidos, but this is not certain. (See Sir Gardner Wilkinson's note to Hcr. ii. 159, ed. Rawlinson.) It seems possible that Kadiyat is the Hittite city KETESH, on the Orontes, which was the chief stronghold in Syria of those captured by the kings of the XVIIIth and XIXth dynasties. The Greek historian adds that Necho dedicated the dress he wore on these occasions to the god Tyre, as did the people of Tyre, which was later called "the city of Tyre." On Josiah's death his son Jehoahaz was set up by the people, but deposed three months afterwards by Pharaoh, who imposed on the land the moderate tribute of a hundred talents of silver and a talent of gold, and put in his place another son of Josiah, Eliakim, whose name he changed to Jehoiakim, conveying Jehoahaz to Egypt, where he died (2 K. xxiii. 30-34; 2 Chr. xxxvi. 1-4). Jehoiakim appears to have been the elder son, so that the deposing of his brother may not have been merely because he was made king without the permission of the conqueror. Necho seems to have soon returned to Egypt; perhaps he was on his way thither when he deposed Jehoahaz. The battle led to the loss of all the Asiatic dominions of Egypt; and it is related, after the mention of the death of Jehoiakim, that "the king of Egypt came not again any more out of his land: for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xxiv. 7). Jehoiakim's prophecy of the great defeat by Egyptians is followed by another, of its consequence, the invasion of Egypt itself; but the latter calamity did not occur in the reign of Necho, nor in that of his immediate successor, Pamemeticnius II., but in that of Hophra, and it was yet future in the last king's reign when Jeremiah had been carried into Egypt after the destruction of Jerusalem.

10. Pharaoh Hophra. — The next king of Egypt mentioned in the Bible is Pharaoh Hophra, the second successor of Necho, from whom he was separated by the six years' reign of Pamemeticnius II. The name Hophra is in Hieroglyphics WALL-PHARAH; and the last syllable is equally divided by Herodotus, who writes Apries, and by Manetho, who writes Upafri. He came to the throne about B.C. 58, and reigned nineteen years. Herodotus makes him son of Pamemeticnius II., whom he calls Pammuteopus, and great-grandson of Pamemeticnius I. The historian relates his great prosperity; how he attacked Sion, and fought a battle at sea with the king of Tyre, until at length an army which he had dispatched to conquer Cyrene was routed, and the Egyptians, thinking he had purposefully caused its overthrow to gain time, in no doubt by substituting mercenaries for native troops, revolted, and set up Amasis as king. Apries, only supported by the Carian and Ionian mercenaries, was routed in a pitched battle. Herodotus remarks in narrating this, "It is said that Apries believed that there was not a god who could save him down from his eminence, so firmly did he think that he had established himself in his kingdom." He was taken prisoner, and Amasis for awhile treated him with kindness, but when the Egyptians blamed him, "he gave Apries over into the hands of his former subjects, to deal with as they chose. Then the Egyptians took him and strangled him" (ii. 161-162). In the Bible it is related that Zedekiah, the last king of Judah, was aided by a Pharaoh against Nebuchadnezzar, in fulfillment of a treaty, and that an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the ninth year of Zedekiah, n. c. 590, and was captured in his eleventh year, n. c. 588. It was evidently continuously invested for a length of time before it was taken, so that it is most probable that Nebuchadnezzar took place during 590 or 589. There may, therefore, be some doubt whether Pamemeticnius II. be not the king here spoken of; but it must be remembered that the siege may be supposed to have lasted some time before the Egyptians could have heard of it and marched to relieve the city, and also that Hophra may have come to the throne as early as n. c. 590. The Egyptian army returned without effecting its purpose (Jer. xxxvii. 5-8; Ez. xxvii. 11-18; comp. 2 K. xxx. 1-4). Afterwards a remnant of the Jews fled to Egypt, and seem to have been kindly received. From the prophecies against Egypt and against these Jews we learn more of the history of Hophra; and here the narrative of Herodotus, of which we have given the chief heads, is a valuable commentary. Ezekiel speaks of the arrogance of this king in words which strikingly recall those of the Greek historian. The prophet describes him as a great crocodile lying in his rivers, and saying "My river [is] mine own, and I have made [it] for myself" (xxxix. 3). Pharaoh was to be overthrown and his country invaded by Nebuchadnezzar (xxix. xxx., xxxi., xxxii.). This prophecy was yet unfulfilled in n. c. 572 (xxix. 37-39). Jericho, in Egypt, yet more distinctly prophesied the end of Pharaoh, warning the Jews,—"Thus with the Lord; behold, I will give Pharaoh-hophra king of Egypt into the hand of his enemies, and into the hand of them that seek his life: as I gave Zedekiah king of Judah into the hand of Nebuchadnezzar king of Babylon, his enemy, and that sought his life" (xxix. 30). In another place, when foretelling the defeat of Nebuchadnezzar's army, the same prophet says,—"Behold, I will punish Ammon in No, and Pharaoh, and Egypt, with their gods, and their kings; even Pharaoh, and all them that trust in him; and I will deliver them into the hands of those that seek their lives, and into the hand of Nebuchadnezzar king of Babylon, and into the hand of his servants" (xlvi. 25, 26). These passages, which entirely correspond with the account of Chaldean invasion and death of Apries, make it not improbable that the invasion of Nebuchadnezzar was the cause of that disaffection of his subjects which ended in the overthrow and death of
PHAERAH'S DAUGHTER

J-5 Pharaoh. The invasion is not spoken of by any reliable profane historian, except Herodius (Cory, Anc. Freq. 21 ed. pp. 37, 58), but the silence of Herodotus and others can no longer be a matter of surprise, as we now know from the Assyrian records in cuneiform of conquests of Egypt either unrecorded elsewhere or only mentioned by second-rate annalists. No subsequent Pharaoh is mentioned in Scripture, but there are predictions doubtless referring to the misfortunes of later princes when the prophecy, "there shall be no more a prince of the land of Egypt" (Ex. xxx. 14), was fulfilled. R. S. P.

PHAERAH'S DAUGHTER; PHARAOH, THE DAUGHTER OF. Three Egyptian princesses, daughters of Pharaohs, are mentioned in the Bible.

1. The preserver of Moses, daughter of the Pharaoh who first oppressed the Israelites. She appears from her conduct towards Moses to have been heirless to the throne, something more than ordinary adoption seems to be indicated in the passage in Hebrews respecting the faith of Moses (xi. 23-25), and the designation "Pharaoh's daughter," perhaps here indicating that she was the only daughter. She probably lived for at least forty years after she saved Moses, for it seems to be implied in Hebrews (c. c.) that she was living when he fled to Midian. Artapanus or Artalanaus, a historian of uncertain date, who appears to have preserved traditions current among the Egyptian Jews, calls this princess Mererit, and her father, the oppressor, Palmasthes, and relates that she was married to Chenepheres, who ruled in the country above Memphis, for that at that time there were many kings of Egypt, but that this one, as it seems, became sovereign of the whole country (Plog. Hist. Grec. iii. pp. 220 ff.). Palmasthes may be supposed to be a corruption of Amemonphis, the equivalent of Amen-hepet, the Egyptian name of four kings of the XVIIIth dynasty, and also, but incorrectly, applied to one of the XIXth, whose Egyptian name, Memphis, is wholly different from that of the others. No one of these however had, as far as we know, a daughter with a name resembling Mererit, nor is there any king with a name like Chenepheres of this time. These kings Amenophis, moreover, do not belong to the period of contemporary traditions. The tradition is apparently of little value except as showing that one quite different from that given by Manetho and others was anciently current. [See PHARAOH, 5.]

2. Bithiah, wife of Mered an Israelite, daughter of a Pharaoh of uncertain age, probably of about the time of the Exodus. [See BITHIAH; PHARAOH, 5.]

3. A wife of Solomon, most probably daughter of a king of the XXIIth dynasty. She was married to Solomon early in his reign, and apparently treated with distinction. It has been supposed that the Song of Solomon was written on the occasion of this marriage; but the idea is, we think, repugnant to sound criticism. She was at first brought into the city of David (1 K. iii. 1), and afterwards a house was built for her (vii. 8, 18), because Solomon would not have her dwell in the house of David, which had been rendered holy by the ark having been there (2 Chr. viii. 11). [See PHARAOH, 7.]

R. S. P.

PHARAON, THE WIFE OF. The wife of one Pharaoh, the king who received Hadad the Edomite, is mentioned in Scripture. She is called "queen," and her name, Tahpenes, is given. Her husband was most probably the XXIst dynasty [TAHPENES; PHARAOH, 6.]

R. S. P.

PHARATHONIUS. (Rom. A. Comp. Φαραθωνίος; Alex. Φαραθώνιος; [Sin.] omits: Joseph. Φαραθώνιος, Peschito, Pharoht: Vulg. Pharaoh). One of the cities of Judea fortified by Xenodochus during his contests with Jonathan Maccabaeus (1 Mac. ix. 50). In both MSS. [see note below] of the LXX. the name is joined to the preceding — Thannath-Pharathon — but in Josephus, the Syrac. and Vulgate, the two are separated. Ewald (Geschichte, iv. 573) adheres to the former. Pharathon doubtless represents an ancient Pithath, though hardly that of the Judges, since that was in Mt. Hermon. Probably at Pecato, a few miles west of Nobles, too far north to be included in Judea properly so called. G.

PHARES (Phæres: Phares) Pharez of Perez, the son of Judah (Matt. i. 3; Luke iii. 33).

PHAREZ. 1. (Perez, 1 Chr. xxvii. 3; Phares, Matt. i. 3, Luke iii. 33, 1 Esdr. v. 5), [V- V-]: Phæres: Phares, "a breach," Gen. xxxviii. 29; twin son, with Zarah, of Zerah of Judah and Tamar his daughter-in-law. The circumstances of his birth are detailed in Gen. xxxviii. Pharez seems to have kept the right of primogeniture over his brother, as, in the genealogical lists, his name comes first. The house also which he founded was far more numerous and illustrious than that of the Zerithites. Its remarkable fertility is alluded to in Ruth iv. 12, "Let thy house be like the house of Pharez, whom Tamar bare unto Judah." 8 Of Pharez's personal history or character nothing is known. We can only speak of him therefore as a demarch, and exhibit his genealogical relations. At the time of the sojourn in the wilderness the families of the tribe of Judah were: of Shelah, the family of the Shelanites, or Shilonites; of Phares, the family of the Pharizites; of Zerah, the family of the Zerithites. And the sons of Pharez were, of Hezron the family of the Hezronites, of Hamul the family of the Hamulites (Num. xxvi. 20, 21). After the death, therefore, of Er and Onan without children, Pharez occupied the rank of Judah's second son, and moreover, from two of his sons sprang two new chief houses, those of the Hezronites and Hamulites. From Hezron's second son Ram, or Aram, sprang David and the kings of Judah, and eventually Jesus Christ (Genealogies of Jesus Christ.) The house of Caleb was also incorporated into the house of Hezron [Caleb], and so were reckoned among the descendants of Pharez. Another line of Phær

Vatican manuscript (B) does not contain the Books of Maccabees.

a Whence our translators borrowed the final i of this name does not appear; there is nothing in either of the versions to suggest it. The Geneva Vers. has it too. [The readings given above sufficiently account for the form of the word in the common English version. Mr. Grove does not seem to be aware that the

b * Phares is named there and in ver. 18 for the additional reason that he was the progenitor of Bosa and perhaps of the Bethelites as a distinct clan. If
PHAREZ

PHARISEES

2471

erez's descendants were reckoned as sons of Manasseh by the second marriage of Hezron with the daughter of Machir (1 Chr. ii. 21-23). In the census of the house of Judah contained in 1 Chr. iv., drawn up apparently in the reign of Hezekiah (iv. 41), the houses enumerated under the name of Pharez, the "son of the daughter of Machir," are Carui, Hur, and Shobal. Of these all but Carui (who was a Zabite, Josh. vii. 1) were descendants of Pharez. Hence it is not unlikely that as is suggested in the margin of A. V., Carui is an error for Cdesbithi. Some of the sons of Shelah are mentioned separately at vv. 21, 22.

[PAHATI-MOÁÁ.] In the reign of David the house of Pharez seems to have been distinguished. The chief of all the captains of the host for the first month, Jashobeam, the son of Zabdiel (1 Chr. xxvii. 2, 3), so famous for his prowess (1 Chr. xi. 11), and called "the chief among the captains" (ib. and 2 Sam. xxiii. 8), was of the sons of Perez, or Pharez. A considerable number of the other mighty men seem also, from their patronymic or gentile names, to have been of the house of Pharez, those named as the children of barley, the Belialites, Paltites, Tekoites, Netophathites, and Ishites (1 Chr. ii. 33-47), Tekoites, Netophathites, as Ishites and Ishites (1 Chr. ii. 53, iv. 7). Zalad the son of Ahiah, and Joab, and his brothers, Abshai and Asahel, we know were Pharizes (1 Chr. iii. 31, 36, 54, xi. 41). And the royal house itself was the head of the family. We have no means of assigning to their respective families those members of the tribe of Judah who are incidentally mentioned after David's reign, as Adnah, the chief captain of Judah in Jehoshaphat's reign, and Jehohanan and Amasiah, his companions (2 Chr. xiii. 14-16); but that the family of Pharez continued to thrive and multiply, we may conclude from the numbers who returned from captivity. At Jerusalem alone 469 of the sons of Perez, with Athahiah, or Uthai, at their head, were dwelling in the days of Zerubbabel (1 Chr. iv. 4; Neh. iv. 4-6). Zerubbabel himself of course being of the family (1 Esdr. v. 5). Of the lists of returned captives in Ezr. ii., Neh. vii., in Nehemiah's time, the following seem to have been of the sons of Pharez, judging as before from the names of their ancestors, or the towns to which they belonged: the children of Iari (Ezr. ii. 10, 17; comp. 1 Chr. iv. 4); of Pheglai, or Pheglai, is Phtiali, or Phtiali, or Petiali (ib. 19; comp. 1 Chr. ii. 21, 54); of Joram, or Hariph, and Hariph (ib. 18: Neh. vii. 34: comp. 1 Chr. ii. 51): of Bethlehem and Netophah (ib. 21, 22: comp. 1 Chr. ii. 51); of Kirjath-arim (ib. 25: comp. 1 Chr. ii. 50, 53); of Harim (ib. 32: comp. 1 Chr. iv. 8); and, judging from their position, many of the intermediate ones also (comp. also the lists in Ezr. x. 25-43: Neh. x. 14-27). Of the builders of the wall named in Neh. iii. the following were of the house of Pharez: Zaceer the son of Huri (v. 2, by comparison with 1 Chr. iv. 4, and Ezr. viii. 14, where we ought, with many MSS., to read Zaceer for Zabzad); Zadok the son of Baana (v. 4, by comparison with 2 Sam. xxiii. 29, where we find that Baana was a Netophathite, which agrees with Zadok's place here next named in ver. 1. We come, therefore, to Beth-lehem, Netophah, and Tekoa, are often in close juxtaposition, 1 Chr. ii. 54, iv. 4, 5, Ezr. ii. 21, 22, Neh. vii. 26, and the situation of the Netophathites close to Jerusalem, among the Benja-

- a Mahanir the Netophathite was however a Zabite (1 Chr. xxviii. 14), while Heldai, or Helcet, the descendant of Uthniel, was a Pharizee (1 Chr. xxvii. 15).
from his other subjects; and it was in the resolute determination to resist the adoption of Greek customs, and the slightest departure from the requirements of their own Law, that the "separated" took their rise as a party. For reference see Luke i. 31-42, 49-53. Subsequently, however (and perhaps not wholly at first), this by no means exhausted the meaning of the word "Pharisees."

A knowledge of the opinions and practices of this party at the time of Christ is of great importance for entering deeply into the genius of the Christian religion. A cursory perusal of the Gospels and the Apocrypha would show that Christ's teaching was in some respects thoroughly antagonistic to theirs. He denounced them in the bitterest language; and in the sweeping charges of hypocrisy which He made against them as a class, He might even, at first sight, seem to have departed from that spirit of meekness, a° of gentleness in judging others, and of submissiveness from the imputation of improper motives, which is one of the most characteristic and original charms of His own precepts. See Matt. xv. 7, 8; xxi. 31, 32, 33, 34; Mark vii. 2-8; Luke xi. 45-48, and compare Matt. viii. 1, 5, 8; xii. 19, 20; Luke vi. 26, 37-42. Indeed it is difficult to avoid the conclusion that his repeated denunciations of the Pharisees mainly exasperated them into taking measures for causing his death; so that in one sense He may be said to have shed his blood, and to have laid down his life in protesting against their practice and spirit. (See especially verses 55, 54 in the 11th chapter of Luke, which follow immediately upon the narration of what he said while dining with a Pharisee.) Hence to understand the Pharisees is, by contrast, an aid towards understanding the spirit of uncorrupted Christianity.

Aubert. — The sources of information respecting the Pharisees are mainly threefold. 1st. The writings of Josephus, who was himself a Pharisee (17th, p. 2), and who in each of his great works professes to give a direct account of their opinions (B. J. ii. 8, § 2-14; Ant. xvii. 1, § 2, and compare xii. 10, § 5-6, xvii. 2, § 4, xiii. 16, § 2, and Vtd. p. 38). The value of Josephus's account would be much greater, if he had not accommodated them, more or less, to Greek ideas, so that in order to arrive at the exact truth, not only must his words be added, but likewise much of what he has written must be reinterpreted, as it were, into Hebrew conceptions. 2ndly, The New Testament, including St. Paul's epistles, in addition to the Gospels and the Acts of the Apostles. St. Paul had been instructed by an illustrious Rabbi (Acts xxii. 3); he had been a rigid Pharisee (xxiii. 6, xxvi. 5), and the remembrance of the gall ing bondage from which he had escaped (Gal. iv. 9, 10, 11) was probably mis represented, as it were, into Hebrew conceptions. 3rdly. The first portion of the Talmud, called the Mishna, or "second law." This is by far the most important source of information respecting the Pharisees; and it may safely be asserted that it is nearly impossible to have adequate conceptions of them, without consulting that work. It is a digest of the whole Jewish traditions, and a compendium of the whole ritual law, reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the 2nd century. He succeeded his father Simeon as patriarch of Tiberias, and held that office at least thirty years. The precise date of his death is disputed; some placing it in a year somewhat antecedent to 194, A. D. (see Graetz, Geschichte der Juden, iv. 251), while others place it as late as 220 A. D., when he would have been about 81 years old (Josef's Geschichte der Juden und seiner Sekten, ii. 118). The Mishna is very correctly written, and requires notes. This circumstance led to the commentaries called Genara (2. c. Supplement, Completion, according to Buxtorf, which form the second part of the Talmud, and which are very commonly meant when the word "Talmud" is used by itself. The language of the Mishna is that of the later Hebrew, purely written on the whole, though with a few grammatical Ara mainland, and interspersed with Greek, Latin, and Aramaic words which had become naturalized. The work

a This is thus noticed by Millon, from the point of view of his own peculiar ecclesiastical opinions: "The invincible warrior Zed, slaying beck, slays the slack reins, drives over the heads of sacrilegious pretenses, and such as are insolent to maintain traditions, bringing their stiff necks under His flaming wheels. Thus did the true prophets of old combat with the false..." (Cuist Hums., the fountain of meekness, found arrowswiough to be still galling and vexing the pretended Pharisees." — Apology for Suetonius.)

b There are two Talmuds: one of Jerusalem, in which this is said to be no passage which can be proved to be later than the first half of the 4th century; and the other of Babylonia, compiled about 500 A. D. The latter is the most important, and by far the longest. It was estimated by Chajim to be fifteen times as long as the Mishna. The whole of the Gemara has never been translated; though a proposal to make such a translation was brought before the public by Chajim: Théâtre du Judaisme apprise à la Réforme et à l'Église. Paris, 1807 (Reprint, 1843). But Jochanan ben Zakkai (in the Bab) in 282. Fifteen treatises of the Jerusalem Gemara, and two of the Babylonian, are given, accompanied by a Latin translation, in Leipzig's Talmud., vol. xvi. xxvii. Some important Gemara is to be identified in meaning with that of the Jerusalem Talmud.

c Le Maitre's Talmud contains twenty treatises of the Jerusalem Gemara with a Latin translation, and care of the Babylonian: see, in addition to the works referred to above, vols. xxvi. and xxvii. Chajim (Le Talmud de Babylone trad. en langue française, vol. i., 1821) has translated both the Mishna and Gemara of the first treatise in the Talmud (Bab) "Blessings," and prefixed to it a full account of the Talmud by way of introduction. The treatise Bab (also has been published in the original with a German translation, notes, etc., by E. M. Pinner, Berlin, 1822, fol.) who has likewise given an introduction to the Talmud. For an account of the various books of the Talmud in English one may see the art. Talmud by S. Davidson in Kitto's Cyclopædia of Biblical, Critical and Mass. and Synopses of the Life of the Fathers (Pitck Aborth), Edinb., 1822; or J. D. Nordheimer's article, The Talmud and the Rabbinics, in the Amer. Bibl., Reprinting for oct. 1839. For fuller information about the Talmud, see Wolf, Biblical, ii. 557, 563, and Presses' art. Talmud in Herberg's Real-Encyklop. xxv. 615, 665; also the famous art. on the Talmud by E. Deutsch in the Quarterly Review for oct. 1837, and an art. by M. Grinbann in the North Amer. Review for april, 1838. There is a brief popular account of the Talmud, by Dr. C. E. Stowe, in the Atlantic Monthly for June, 1838.
The PHARISEES and their influence

PHARISEES

Chapter 2473

Shammai flourished somewhat before the birth of Christ; and, except on the incredible supposition of forgeries or mistakes on a very large scale, their decisions conclusively furnish particulars of the general system in force among the Pharisees during the period of Christ's teaching. There is likewise occasional reference to the opinion of Rabbi Gamaliel, the grandson of Hillel, and the teacher of St. Paul. 3dly. The Mishna contains numerous ceremonial regulations, especially in the 5th Order, which presuppose that the Temple-service is still subsisting, and it cannot be supposed that these were invented after the destruction of the Temple by Titus. But these breathe the same general spirit as the other traditions, and there is no sufficient reason for assuming any difference of date between the one kind and the other. Hence for facts concerning the system of the Pharisees, as distinguished from an appreciation of its merits or defects, the value of the Mishna as an authority is greater than that of all other sources of information put together.

Referring to the Mishna for details, it is proposed in this article to give a general view of the peculiarities of the Pharisees; afterwards to notice their origin and development, and to mention the Mishnaic view of the Pharisees in their historical development, to make some remarks on the proselytising spirit attributed to them at the time of Christ. Points noticed elsewhere in this Dictionary will be as far as possible avoided. Hence information respecting Corban and Phylacteries, which in the New Testament are peculiarly associated with the Pharisees, must be sought for under the appropriate titles.

Corban and Phylacteries.

1. The fundamental principle of the Pharisees common to them with all orthodox modern Jews is, that by the side of the written Law regarded as a summary of the principles and general laws of the Hebrew people, there was an oral law to complete and explain the written Law. It was an article of faith that in the Pentateuch there was no precept, and no regulation, ceremonial, doctrinal, or legal, of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth (Klein's Vérité sur le Talmud, p. 9). The classical passage in the Mishna on this subject is the following: "Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue" (Pirke Abot, i.). This remarkable statement is so destitute of what would at the present day be deemed historical evidence, and would, it might be supposed, have been rendered so incredible to a Jew by the absence of any distinct allusion to the fact in the Old Testament, that it is interesting to consider by what process of argument the principle could ever have won acceptance. It may be conceived in the following way. The Pentateuch, according to the Rabbinical school, contains 418 lessons, including 248 commands, and 365 prohibitions; but whatever may be the number of the laws, however minutely they may be analyzed, or into whatever form they may be thrown, there is nowhere an

A A passage in Deuteronomy (xvii. 8-11) has been interpreted so as to serve as a basis for an oral law, that passage seems merely to prescribe obedience to the priests, the Levites, and to the judges in civil and criminal matters of controversy between man and man. A fanciful application of the words "whosoever withstanding their words do not hear" in ver. 11 has favored the rabbinical interpretation. In the " Festval Prayers " of the English Jews, p. 69, for Pentecost, it is stated, of God, in a prayer, "He explained it (the Law) to his people face to face, and on every point are ninety-eight explanations."
allusion to the duty of prayer, or to the doctrine of a future life. The absence of the doctrine of a future life has been made familiar to English theologians by the author of "The Divine Location of Moses," and the fact is so undeniable, that it is needless to dwell upon it farther. The absence of any injunction to pray has not attracted equal attention, but seems to be almost equally certain. The only passage which by any ingenuity has ever been interpreted to enjoin prayer is in Ex. xxiii. 25, where the words are used, "And ye shall serve Jehovah your God." But as the Pentateuch abounds with special injunctions as to the mode of serving Jehovah, by sacrifices, by meat-offerings, by drink-offerings, by the rite of circumcision, by observing festivals, such as the Sabbath, the Passover, the feast of weeks, and the feast of tabernacles, by obeying all his ceremonial and moral commands, and by loving him, it is contrary to sound rules of construction to import into the general word "serve" Jehovah the specific meaning "pray to" Jehovah, when that particular mode of service is nowhere distinctly commanded in the Law. There being then thus no mention either of a future life, or of prayer as a duty, it would be easy for the Pharisees at a time when prayer was universally practiced, and a future life was generally believed in or desired, to argue from the supposed inconsistency of a true revelation not commanding prayer, or not assuring a future life, to the necessity of Moses having treated of both orally. And when the principle of an oral tradition in two such important points was once admitted, it was easy for a skillful controversialist to carry the application of the principle much farther by insisting that there was precisely the same evidence for numerous other traditions having come from Moses as for those two; and that it was illegal, as well as presumptuous, to admit the two only, and to exercise the right of selection and private judgment respecting the rest.

It is not to be supposed that all the traditions which bound the Pharisees were believed to be direct revelations to Moses on Mount Sinai. In addition to such revelations, which were not disputed, although there was no proof from the written Law to support them, and in addition to interpretations received from Moses, which were either implied in the written Law or to be elicited from them by reasoning, there were three other classes of traditions. Ist. Opinions on disputed points, which were the result of a majority of votes. To this class belonged the secondary questions on which there was a difference between the schools of Hillel and Shammai. 2nd. Decrees made by prophets and wise men in different ages, in conformity with a saying attributed to the men of the Great Synagogue, "Be deliberate in judgment; train up many disciples; and make a fence for the Law." These carried prohibitions farther than the written Law or oral law of Moses, in order to protect the Jewish people from temptations to sin or pollution. For example, the injunction, "Thou shalt not set a kid in his mother's milk." 3rd. Opinions and constructions, in the sense of "fence to the Law," the admixture of poshory with any milk, or its preparations, is rigorously forbidden. When once a decree of this kind has been passed, it could not be reversed; and it was subsequently said that not even Eliphaz, who would take away anything from the 18 points which had been determined on by the school of Shammai and the school of Hillel, 3dly. Legal decisions of proper ecclesiastical authorities on disputed questions. Some of these were attributed to Moses, some to Joshua, and some to Ezra. Some likewise to Rabbinis of later date, such as Hillel and Gamaliel. However, in these several ways, all the traditions of the Pharisees were not deemed direct revelations from Jehovah, there is no doubt that all became invested, more or less, with a peculiar sanctity; so that, regarded collectively, the study of them and the observance of them became as imperative as the study and observance of the precepts in the Bible.

Viewed as a whole, they treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. An elaborate argument might be advanced for many of them individually, but the sting of them consisted in their aggregate number, which would have a tendency to quench the fervor and the freshness of a spiritual religion. They varied in character, and the following instances may be given of three different classes: Ist, of those, admitting certain principles, were points reasonable to define; 2dly, of points defined which were superfluously particularized; and 3dly, of points defined where the discussion of them at all was superfluous and puerile. Of the first class the very first decision in the Mishna is a specimen. It defines the period up to which a Jew is bound, as his evening service, to repeat the Shema. The Shema is the celebrated passage in Deut. vi. 4-9, commencing, "Hear, O Israel: The Lord our God is one Lord, and thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might." It is a tradition that every Jew is bound to recite this passage twice in the twenty-four hours, morning and evening—for which authority is supposed to be found in verse 7, where it is said of these words, "Thou shalt talk of them . . . when thou liest down and when thou risest up." The compulsory recitation of even these words twice a day might be objected to as leading to formalism; but, accepting the recitation as a religious duty, it might not be unreasonable that the range of time permitted for the recitation should be

a Mohammed was preceded both by Christianity and by the latest developments of Judaism; from both of which he borrowed much. See, as to Judaism, Gieger's "Essays. Was hat Mohammed aus dem Judenthum aufgenommen?" Still, one of the most marked characteristics of the Koran is the unvaried retention of the duty of prayer, and of the certainty of a future state of retribution.

b Although this prohibition occurs three times, as light is thrown upon its meaning by the context. The most probable conjecture is that given under the head of "habit" (II 1129 a), that it was aimed against some practice of holocausts. Mr. Leib gives a similar explanation of the Christian prohibition on eating horse-flesh.
Jehudah. The following is the decision on this point in the Mishna, Beracoth i.: “From what time do they recite the Shema in the evening? From the time that the priests are admitted to eat their oblations till the end of the first watch. The words of Rabbi Eleazer: but the wise men say, up to midnight. Rabban Gamaliel says, until the column of dawn. A disciple of Gamaliel came from a house of entertainment said, We have not yet recited the Shema; to whom he said, If the column of dawn has not yet arisen, you are bound to recite it. But not this alone: but wherever the wise men have said ‘to midnight,’ their injunction is in force until the column of dawn has arisen. . . . If so, why did the wise men say till midnight? In order to keep men far from transgression.” The following is an instance of the second clause. It relates to the lighting candles on the eve of the Sabbath, which is the duty of every Jew; it is found in the Mishna, in the tractate Shabbath, c. ii., and is printed in the Hebrew and English Prayer-Book, according to the form of the German and Polish Jews, p. 66, from which to avoid objections, this translation, and others, were printed. A soldier singing with what sort of wick and oil are the candles of the Sabbath to be lighted, and with what are they not to be lighted? They are n’t to be lighted with the woolly substance that grows upon cedars, nor with undressed flax, nor with silk, nor with rushes, nor with leaves out of the wilderness, nor with moss that grows on the surface of water, nor with pitch, nor with wax, nor with oil made of cotton-seed, nor with the fat of the tail or the entrails of beasts. Nathan Hadnody saith it may be lighted with boiled suet; but the wise men say, be it boiled or not boiled, it may not be lighted with it. It may not be lighted with burnt oil on festival-days. Rabbi Ishmael says it may not be lighted with train-oil because of honor to the Sabbath: but the wise men allow of all sorts of oil: with mixed oil, with oil of nuts, oil of radish-seed, oil of fish, oil of gum-seed, of resin and gum. Rabbi Tarphon saith they are not to be lighted but with oil of olives. Nothing that grows out of the woods is used for lighting but flax, and nothing that grows out of woods doth not pollute by the pollution of a tent but flax: the wick of cloth that is doubled, and has not been singed, Rabbi Eleazar saith it is unclean, and may not be lighted, retriald; Rabbi Akiba saith it is clean, and may be lighted withal. A man may not split a shell of an egg and fill it with oil and put it in the socket of a candlestick, because it shall blaze, though the candlestick be of earthenware: but Rabbi Jehudah permits it; if the potter made it with a hole through at first, it is allowed, because it is the same vessel. No man shall fill a platter with oil, and give it place next to the table. A peson of the house of a man in a platter to make it drop the oil; but Rabbi Jehudah permits it.” Now in regard to details of this kind, admitting it was not unreasonable to make some regulations concerning lighting candles, it certainly seems that the above particulars are too minute, and that all which was really essential could have been brought within a much smaller compass. The regulations of the men of the priests may be pointed out in the beginning of the treatise on festivals (Sheviith), entitled Beritoh, an Egg, from the following case of the egg being the first point discussed in it. We are gravely informed that *an egg laid or a festival may be eaten, according to the school of Shammai; but the school of Hillel says it must not be eaten.” In order to understand this important controversy, which reminds us of the two parties in a well-known work who took their names from the end on which each held that an egg ought to be broken, it must be observed that, for a reason into which it is unnecessary to enter at present, it was admitted on all hands, both by the school of Hillel and the school of Shammai, that if a bird which was neither to be eaten nor killed laid an egg on a festival, the egg was not to be eaten. The only point of controversy was respecting an egg laid by a hen that would be afterwards eaten. Now the school of Hillel interdicted the eating of such an egg, on account of a passage in the 35th verse of the 10th chapter of Exodus, wherein Jehovah said to Moses respecting the people who gathered manna, “on the sixth day they shall prepare that which they bring in.” For it was inferred from these words that on a common day of the week a man might “prepare” for the Sabbath, or prepare for a feast-day, but that he might not prepare for the Sabbath on a feast-day, nor for a feast-day on the Sabbath. Now, as an egg laid on a particular day was deemed to have been “prepared” the day before, an egg laid on a feast-day following a Sabbath might not be eaten, because it was prepared on the Sabbath, and the eating of it would involve a breach of the Sabbath. And although all feast-days did not fall on a day following the Sabbath, yet as many did, it was deemed better, ex majori cautela, “as a fence to the Law,” to interdict the eating of an egg which had been laid on any feast-day, whether such day was or was not the day after the Sabbath (see Surenhuis’s Mishna, ii. 282). In a world wherein the objects of human interest and wonder are nearly endless, it certainly does seem a degradation of human intelligence to exercise it on matters so trifling and petty. In order, however, to observe regulations on points of this kind, mixed with others less objectionable, and with some which, regarded from a certain point of view, were in themselves individually not unreasonable, the Pharisees formed a kind of society. A member was called a cabber (כֶּבֶר), and those among the middle and lower classes who were not members were called “the people of the land,” or the vulgar. Each member undertook, in the presence of three, that he would keep certain laws which must remain true to the laws of the association. The conditions were various. One of transcendent importance was that a member should refrain from everything that was not tithed (comp. Matt. xxiii. 23, and Luke xxi. 12). The Mishna says, “He who undertakes to be teuscwothy (a word with a technical Pharisaical meaning) tithes whatever he eats, and whatever he sells, and whatever he drinks, and does not eat and drink with the people of the land.” This was a point of peculiar delicacy, for the portion of produce reserved as tithes for the priests and Levites was holy, and the enjoyment of what was holy was a deadly sin. Hence a Pharisee was bound, not only to ascertain as a buyer whether the articles which he purchased had been duly tithed, but to hear the same certainly in regard to what he eat in his own house and when taking his meals with others. And thus Christ, in eating with publicans and sinners, ran counter to the first principles, and shocked the most deeply-rooted prejudices, of Pharisaism; for, independently of other obvious considerations, he ate and
PHARISEES

drank with "the people of the land," and it would have been assumed as undoubted that He partook on such occasions of food which had not been duly ritually seasoned.

Perhaps some of the most characteristic laws of the Pharisees related to what was clean (tibhah) and unclean (bi'nah). Among all oriental nations there has been a certain tendency to symbolize or sanctify in religion; and if any symbolism is admitted on such a subject, nothing is more natural than to symbolize purity and cleanliness of thought by cleanliness of person, dress, and actions. Again, in all climates, but especially in warm climates, the sanitary advantages of such cleanliness would tend to confirm and perpetuate this kind of symbolism; and when once the principle was conceded, superstition would be certain to attach an intrinsic moral value to the rigid observance of the symbol. In addition to what might be explained in this manner, there arose among the Jews—partly from opposition to idolatrous practices, or to what savored of idolatry, partly from causes which it is difficult at the present day even to conjecture, possibly from natural prejudice, individual aptitude, or strained fanciful anticipations—peculiar ideas concerning what was clean and unclean, which at first sight might appear purely conventional. But, whether their origin was symbolical, sanative, religious, fanciful, or conventional, it was a matter of vital importance to a Pharisee that he should be well acquainted with the Pharisaical regulations concerning what was clean and what was unclean; for, as among the modern Hindoos (some of whose customs are very similar to those of the Pharisees), every one technically unclean is cut off from almost every religious ceremony, so, according to the Legal Law, every unclean person was cut off from all religious privileges, and was regarded as defiling the sanctuary of Jehovah (Num. xix. 20; compare Ward's "History of Hebrew, Literary, and Religious, ii. 147").

On principles precisely similar to those of the Legal Law (Lev. xx. 22, xxiii. 4-7), it was possible to incur these awful religious penalties either by eating or by touching what was unclean in the Pharisaical sense. In reference to eating, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise called *olah, which is specially devoted to the slaughtering of foods and cattle for domestic use (see Sanhedrin, v. 114; and De Sola and Ekhall, p. 325). One point in its very first section is by itself vitally distinctive; and if the treatise had contained no other regulation, it would still have raised an insuperable barrier between the free social intercourse of Jews and other nations. This point is, that any thing slaughtered by a heathen should be deemed unfit to be eaten, like the carcass of an animal that had died of itself, and like such carcass should pollute the person who carried it. On the reasonable assumption that under such circumstances animals used for food would be killed by Jewish butchers, regulations the most minute are laid down for their guidance. In reference to likewise to the ritualization which attached a moral value to such a ceremonial act. (See Luke xi. 37-40; and compare the Mishna vi. 480, where there is a distinct treatise, *Yebimah, on the washing of hands.)

It is proper to add that it would be a great mistake to suppose that the Pharisees were wealthy and luxurious, much more that they had degenerated into the vices which were imputed to some of the Roman popes and cardinals during the 200 years preceding the Reformation. Josephus compares the Pharisees to the sect of the Stoics. He says that they lived frugally, in no respect giving in to luxury, but that they followed the leadership of reason in what it had selected and transmitted as a good ("Int. xviii. 1, § 5"). With this agrees what he states in another passage, that the Pharisees had so much weight with the multitude, that if they said anything against a king or a high priest they were at once believed (xii. 10, § 5); for this kind of influence is more likely to be obtained by a religious body over the people, through asceticism and self-denial, than through wealth, luxury, and self-indulgence. Although, there would be hypocrites among them, and, he would be unable to prevent the Pharisees as a body with hypocrisies, in the sense wherein we at the present day use the word. A learned Jew, now living, charges against them rather the holiness of works than hypocritical holiness—"Wirklichkeit, nicht Schein- heiligkeit" (Hersfeld, "Geschichte des Volks Israel," iii. 359). At any rate they must be regarded as having been some of the most intense formulas whom the world has ever seen; and looking at the average standard of excellence among mankind, it

a At the present day a strict orthodox Jew may not eat meat of any animal, unless it has been killed by a Jewish butcher. According to Mr. R. Hirschel ("The Gospel of Judaism," p. 151), the butcher searches the animal for any blemish, and, on his approval, causes a clean seal, stamped with the Hebrew word word o\(\text{an}^{\text{i}}\) (meaning clean) to be attached to the meat, attesting its "cleanliness." Mr. Hirschel likewise points out that in *pehuchoth* ii. 38) is so clear that he has been used for a similar purpose by Egyptian priests, and according to a book about to be published constitutes the Greek k

b The Egyptians appear to have had ideas of "un-
PHARISEES

A nearly certain that men whose lives were spent in the...image of Christ's feet with tears, would be the natural result of such a system of self-deception...a word not justified by the letter of their traditions.

In fact, Jesus did really somewhat understatement of what was true in principle, not of the Jews universally, but of the most important religious party among the Jews, at the time when he wrote.

An analogy has been pointed out by Geiger (p. 194) between the Pharisees and our own Puritans; and in some points there are undoubted features of similarity, beginning even with their names. Both were innovators: the one against the legal orthodoxy of the Sadducees, the others against Episcopacy.

Both of them had republican tendencies: the Pharisees glorifying the office of rabbi, which depended on learning and personal merit, rather than that of priest, which, being hereditary, depended on the accident of birth; while the Puritans in England abolished monarchical and the right of hereditary legislation. Even in their zeal for religious education there was some resemblance: the Pharisees exerting themselves to instruct disciples in their schools with an earnestness never equalled in Rome or Greece; while in Scotland, the Puritans set the most brilliant example to modern Europe of parochial schools for the nation people.

In the most essential points of religion they were not only alike, but they were directly antagonistic. The Pharisees were under the bondage of forms in the manner already described; while, except in the strict observance of the Sabbath, the religion of the Puritans was in theory purely spiritual, and they assailed even the ordinary forms of Popery and Prelacy with a bitterness of language equal to the denunciations of Christ against the Pharisees.

In regard to a future state, Josephus presents the ideas of the Pharisees in such a light to his Greek readers, that whatever interpretation his ambiguous language might possibly admit, he obviously would have produced the impression on Greeks that the Pharisees believed in the transmigration of souls. Thus his statement respecting them is, "They say that every soul is imperishable, but the soul of good men only passes over (or transmigrates) into another body—μεταβαίνει εἰς ἑτέρον σώματα—while the soul of bad men is chastised by eternal punishment." (B. J. ii. 8, § 14: compare iii. 8, § 5, and Ant. xvii. 1, §§ 3, and Boettcher, De Inebriet., pp. 519, 562.) And there are two passages in the Gospels which might countenance this idea: one in Matt. xiv. 2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different color is given to Herod's thoughts in the corresponding passage, Luke ix. 7-9); and another in John ix. 2, where the question is put to Jesus whether the blind man himself's had sinned, or his parents, that he was born blind? Notwithstanding these passages, however, there does not appear to be sufficient reason for doubting that the Pharisees believed in a resurrection of the dead very much in the same sense as the early Protestant notion that the blindness from birth was a preceding punishment for sins which the blind man afterwards committed: just as it has been suggested, in a remarkable passage, that the death before 1688 of the Princess Anne's infant children (three in number) was a preceding punishment for her subsequent great abandonment of her faith. James II. on Stewart's Philosophy, vol. ii. App. vii., and the Commentaries of De Wette and Liecke, ad locum.
CHRISTIANS. This is most in accordance with St.
Paul's statement to the chief priests and council
(Acts xxviii. 6), that he was a Pharisee, the son of
a Pharisee, and that he was called in question for
the hope and resurrection of the dead—a state-
ment which would have met peculiarly disson-
aneous, if the Pharisees had merely believed in
the transmigration of souls: and it is likewise
almost implied in Christ's teaching, which does
not insist on the doctrine of a future life as any-
thing new, but assumes it as already adopted by
his hearers, except by the Sadducees, although he
condemns some unspiritual conceptions of its na-
ture as erroneous (Matt. xxii. 30; Mark xii. 25; Luke
xx. 37-39). On this head the Mishna is an illus-
tration of the ideas in the Gospels, as distinguished
from any mere transmigration of souls; and the
peculiar phrase, "the world to come," of which ἀφευρέσταν
was undoubtedly only the trans-
lation, frequently occurs in it (בִּיהי-
שָׁם).

This phrase of Christians, which is interior
to Christianity, but which does not occur in the
O. T., though fully justified by certain passages to
be found in some of its latest books, is essentially
different from Greek conceptions on the same sub-
ject; and generally, in contradistinction to the
ymoth典 of the Christian conception of the
Christian idea that this world is a state of
proclamation, and that every one after death will
to render a strict account of his actions, were
expressed by Pharisees in language which it is im-
possible to misunderstand: "This world may be
likened to a court-yard in comparison of the world
to come; therefore prepare thyself in the ante-
room chamber that thou mayest enter the hearing-
room." (Joch. iv. 16). "Everything is given to
man on security, and a net is spread over every
living creature; the shop is open, and the mer-
chant credits; the book is open, and the hand
records; and whosoever chooses to borrow may
come and borrow: for the collectors are continually
giving round daily, and obtain payment of man,
whether with his consent or without: and the
judgment is true justice and all are prepared for
the tribunal." (Joch. iii. 16). "Those who are born
are doomed to die, the dead to live, and the quick
to be judged: to make us know, understand, and
be informed that He is God: He is the Former,
Creator, Intelligent Being, Judge, Witness, and
savior Party, and will judge thee hereafter. Blessed
be He; for in his presence there is no unrighteous-
ness, forgetfulness, or acceptance of a bribe; for everything in his.
know also that everything is done according to the account,
and let no thee evil imagination persuade thee that
the grave is a place of re Tan for thee: for against
thy will hast thou conceived, and against
thy will hast thou been; and against thy will dost
thou live, and against thy will wilt will thou die;
and against thy will must thou hereafter render an
account, and receive judgment in the presence of
the Supreme King of kings, the Holy God, blessed
be His." (Joch. iv. 22). Still it must be borne in
mind that the actions of which such a strict
account was to be rendered were not merely those
related to by the spiritual prophets Isaiah and
Meth. (Is. i. 10, 17; Mic. vi. 8), nor even those
enjoined in the Pentateuch, but included those
fabulously supposed to have been orally transmitted
by Moses on Mount Sinai, and the whole body of
the traditions of the elders. They included, in
fact, all those ceremonies, "works of the law," against the
elementary work, in the deliverance of the human
soul, St. Paul so emphatically protested.

III. In reference to the opinions of the Phar-
isees concerning the freedom of the will, a difficulty
arises from the very prominent position which they
occupy in the accounts of Josephus, whereas noth-
ing vitally essential to the peculiar doctrines of
the Pharisees seems to depend on these opinions,
and some of his expressions are tureck, rather than
Hebrew. "There were three sects of the Jews," he
says, "which had different conceptions respecting
human affairs, of which one was called Phar-
isees, the second Sadducees, and the third Essenes.
The Pharisees say that some things, and not all
things, are the work of fate: but that some things
are in our own power to be and not to be. But
the Essenes declare that Fate rules all things, and
that nothing happens to man except by its decree.
The Sadducees, on the other hand, take away
Fate, holding that it is a thing of nought, and
that human affairs do not depend upon it; but in
their estimate all things are in the power of our
selves, as being ourselves the cause of our good
things, and meeting with evils through our own
inconsistencies" (comp. xviii. 1, § 3, and B. J.
ii. 8, § 14). On reading this passage, and the others
which bear on the same subject in Josephus,
we may naturally arise that he was biased by a desire to make the Greeks
believe that, like the Greeks, the Jews had phi-
losophical sects amongst themselves. At any rate
his words do not represent the opinions as they
were really held by the three religious parties.
We may feel certain, that the influence of Fate
was not the point on which discussions respecting
free-will turned, though there may have been dif-
fferences as to the way in which the interposition of God in human affairs was to be regarded. Thus
the ideas of the Essenes are likely to have been
expressed in language approaching to the words of
Christ (Matt. x. 29, 30, vi. 25-34), and it is very
difficult to believe that the Sadducees, who accepted
the authority of the Pentateuch and other books of
the Old Testament, included God, in their con-
ceptions, from all influence on human actions.
On the whole, in reference to this point, the opin-
ion of Gnaez (Geschichte der Juden, iii. 599) seems
not improbable, that the real difference between
the Pharisees and Sadducees was at first practised
and political. He conjectures that the wealthy
and aristocratical Sadducees in their wars and
negotiations with the Syrians entered into matters
of council and calculation of prudence, while the
zealous Pharisees, disdaining worldly wisdom, hid
stress on doing what seemed right, and on leaving
the event to God: and that this led to differences
in formal theories and metaphysical statements.
The precise nature of these differences we do not
certainly know, as no writing of a Sadducee on
the subject has been preserved by the Jews, and

- The earliest text in support of the expression is that in Isaiah, 66:17-22. Compare Dan. vi. 27.

[SADEUSES.]
PHARISEES

IV In reference to the spirit of proselytism among the Pharisees, there is undisputed authority for the statement that it prevailed to a very great extent at the time of Christ (Matt. xxiii. 15); and it is also related to it an account of its probable importance in keeping the way for the early diffusion of Christianity. The district of Palestine, which was long in proportion to its breadth, and which yet, from Dan to Beersheba, was only 160 Roman miles, or not quite 148 English miles long, and which is represented as having been civilized, wealthy, and populous 1,000 years before Christ, would under any circumstances have been too small to continue maintaining the whole growing population of children. But, through kidnapping (Joel iii. 6), through leading into captivity by military incursions and victorious enemies (2 K. xvii. 6, xviii. 11, xxiv. 15; Am. i. 6, 9), through flight (Jer. xiii. 4-7), through commerce (Joseph. Ant. xx. 2, § 3), and probably through ordinary emigration, Jews at the time of Christ had become scattered over the fairest portions of the civilized world. On the day of Pentecost, that great festival on which the Jews suppose Moses to have brought the perfect Law down from heaven (Festval Prayers for Pentecost, p. 6), Jews are said to have been assembled with one accord in one place at Jerusalem, "from every region under heaven." Admitting that this was an oriental hyperbole (comp. John xxi. 35), there must have been, some foundation for it in fact; and the enumeration of the various countries from which Jews are said to have been present gives a vivid idea of the widely-spread existence of Jewish communities. Now it is not unlikely, though it cannot be proved from Josephus (Ant. xx. 2, § 3), that missions and organized attempts to produce conversions, although unknown to Greek philosophers, existed among the Pharisees (De Wette, Exegetisches Handbuch, Matt. xxi. 15). But, at any rate, the then existing regulations or customs of synagogues afforded facilities which do not exist now either in synagogues or Christian churches for presenting new views to a congregation (Acts xvii. 2-3; Luke iv. 16). Under such auspices the proselytizing spirit of the Pharisees inevitably stimulates a thirst for inquiry, and ascended the Jews to theological controversies. Thus there existed precedents and favoring circumstances for efforts to make proselytes, when the greatest of all missionaries, a Jew by race, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who for the most part already believed in the resurrection of the dead, and continued the elaborate ritual system of the written and oral law by a pure spiritual religion: and thus obtained the cooperation of many Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and in endeavoring to unite all mankind by the brotherhood of a common Christianity.

Liberation.—In addition to the New Testament, Josephus, and the Mishna, it is proper to read Eppiphanius Adversus Heresines, lib. i. xvi.; and the notes of Jerome to Matt. xxii. 23, xxiii. 1, &c., though the information given by both these writers is very imperfect.

In modern literature, see several treatises in c. 'golme's Theorwma, vol. xxii.; and Lichtenrot's Hora Hebraica on Matt. iii. 7, where a curious 'whitmost description is given of seven sects of Pharisees, which, from its being destitute of any intrinsic value, is not inserted in this article. See likewise Brucker's Historica Critica Philosophica, ii. 744-759; Milman's History of the Jews, i. 71; Erwah's Geschichte des Volkes Israel, iv. 415-419; and the Jahrbuchlet der Bibl. p. 5, 82, of GBehrer, who has insisted strongly on the importance of the Mishna, and has made great use of the Talmud generally. See also the following works by modern learned Jews: Jest, Geschichte des Judentums and seiner Sieben, i. 196; Graetz, Geschichte der Juden, iii. 508-518; Herzfeld, Geschichte des Volkes Israel, iii. 588-602; and Geiger, Urschrift and Übersetzungen der Bibel, p. 100. 8vo E. T.

Also Pharos. The same variation is found in the Geneva Version (Exx. viii. 3).

PHARPAR (φαρπαρ) [serif, rapid, Ges., Först.], i.e. Parpar: [Rom. Pharpar; Vat. 'Aassasso]: Alex. Φαράπαρ: Pharparph. The second of the two "rivers of Damascus" —Almana and Pharpar— alluded to by Naaman (2 K. v. 12).

The two principal streams in the district of Damascus are the Barada and the Awej: in fact, there are no others worthy of the name of river. There are good grounds for identifying the Barada with the Alana, and there seems therefore to be no alternative but to consider the Awej as being the Pharpar. But though in the region of Damascus, the Awej does not, like the Barada, run along with the city itself. It does not approach it nearer than 8 miles, and is divided from it by the rise of the Jebel Awald. It takes its rise on the S. E. slopes of Hermon, some 5 or 6 miles from Beit Jean, close to a village called Arny, the name of which it bears during the first part of its course. It then runs S. E. by Kesite Humaour and Sonat, but soon recovering itself by a turn northwards, 1863; see finally ends in the Bethor Himeun, the most southerly of the three lakes or swamps of Damascus, nearly due east of, and about 40 miles from, the point at which it started. The Awej has been investigated by Dr. Thomson, and is described by him in the Bibliotheca Sacra for May, 1849; see also Robinson (Bibl. Res. iii. 447, 448). It is evidently much inferior to the Barada, for while that is extraordinarily copious, and also perennial in the

a The A at the commencement of this name suggests the Hebrew definite article; but no trace of it appears in the Hebrew MSS.
PHARZITES, THE

nottest seasons, this is described as a small lively a
stream, not unfrequently dry in the lower part of its
course. On the maps of Kiepert (1856) and
Van de Vecht (1858) the name of Wady Barbe is
found, apparently that of a valley parallel to the
Aray near Kfe Harwa; but what the authority
for this is the writer has not succeeded in discover-
ing. Nor has he found any name on the maps
or in the lists of Dr. Robinson answering to Tra-
vol. χριν, by which Pharpar is rendered in
the Arabic version of 2 K. v. 12.

The tradition of the Jews of Damascus, as re-
ported by Schwarz (14, 20, 27), is curiously
survived of our ordinary ideas regarding these
streams. They call the river Fijeh (that is the
Barada) the Pharpar, and give the name Annaan
or Karman (an old Talmudic name, see vol. i. p.
2 bb), to a stream which Schwarz describes as run-
ing from a fountain called el-Bargely, 1 miles
from Beth Janna (Bel Awa), in a S. E. direction,
but in accordance with the reference above to the
Christian geographer by Gesenius, Thes. 1132 a). What
is intended by this the writer is at a loss to know.

G.

PHARZITES, THE (ფარზიტეს [pstr., see
Pharez]) ἀ Φαρέζ [Vat.] Alex. Φαρές; Phae-
restor. The descendants of Pharez, the son of
Judah (Num. xxvi. 20). They were divided into
two branches, the Hezronites and the Hamulites.

PHASE/AH (ფაჰაზ [Pames. Ge. born at
the Passage, Fürst]): Φαζή [Alex. Φαζής; F/.] Φαζή;
PAMAE 2 (Neh. vii. 31).

PHASELIS (ფაჰელიზ [Phaselis]). A town
on the coast of Asia Minor, on the confines of
Lydia and Pamphylia, and consequently ascribed
by the ancient writers sometimes to one and some-
times to the other. Its commerce was consider-
able in the sixth century B.C., for in the reign of
Anasis it was one of a number of Greek towns
which carried on trade somewhat in the manner
of the Hanseatic confederacy in the Middle Ages.
They had a common temple, the Hellennium, at
N.cnaritis in Egypt, and nominated protonautai
for the regulation of commercial questions and the
decision of disputes arising out of contracts, like
the πρεσβευταί of the Middle Ages, who presided
over the courts of pie powder (ποσία ποδάρια, ped-
bras) at the different staple towns. In later times Phase-
lis was distinguished as a resort of the Pamphylian
and Cilician pirates. Its port was a convenient
one to make, for the lofty mountain of Solyms
(now Tukhthal), which backed it at a distance of
only five miles, is nearly 8,000 feet in height, and
constitutes an admirable landmark from a great
distance. Phaselis itself stood on a rock of 50 or
100 feet elevation above the sea, and was joined to
the main by a low isthmus, in the middle of which
was a lake, now a sterile marsh. On the
western side of this were a closed port and a road-
stead, and on the western a larger artificial harbor,
formed by a mole run out into the sea.
The remains of this may still be traced to a considerable
extent below the surface of the water. The
marsh of the pier which protected the small eastern
port is nearly perfect. In this sheltered position
the pirates could lie safely while they sold their

booty, and also refit, the whole region having been
anciently so thickly covered with wood as to give
the name of Pityusa to the town. For a time the
Phaselides confined their relations with the Pam-
phylians to trade; but in the twenty-seventh year
they subsequently joined the piratical league, and
suffered in consequence the loss of their independence
and their town lands in the war which was waged
by the Roman consul Publius Servilius Iunius in
the years 77-75 B.C. But at the outset the Ro-
mans had to a great extent baulked the pirates, by
the demand which sprang up for domestic slaves
and upon the change of manners brought about by
the spoliation of Carthage and Corinth. It is said
that at this time many thousand slaves were passed
through Delos — which was the mart between Asia
and Europe — in a single day; and the proverb
 grew up there, Ἐμφροπ, κατάπλευσαν ἤξελοι
πάντα πέρσαται. But when the Cilicians had
acquired such power and anarchy as to sweep
the seas as far as the Italian coast, and intercept
the supplies of corn, it became time to interfere, and
the expedition of Servilius commenced which the
work was afterwards completed by Pompey the
Great.

It is in the interval between the growth of the
Cilian piracy and the Servilian expedition that
the incidents related in the First Book of Macca-
bees occurred. The Romans are represented as
requiring all their allies to render up to Simon the
high-priest any Jewish exiles who may have taken
refuge among them. After naming Ptolemies, De-
matrius (king of Syria), Attalus (king of Perga-
mus), Ariarathes (of Pontus), and Arsaces (of Par-
thia), as recipients of these missives, the author
adds that the consul also wrote εἰς πάσας τὰς
χώρας καὶ Σαμύλας (Gnotius conjectures Δαμ-
άκες, and one MS. has Μεσανίσια and Σαρμά-
ταται καὶ εἰς τὰς Άγιαν καὶ εἰς Μύδιον καὶ εἰς Σύκώναν
καὶ εἰς τὴν Καρπαν καὶ εἰς Σάμον καὶ εἰς τὴν
Παμφύλιαν καὶ εἰς τὴν Διονυσίαν καὶ εἰς Ἀλακρ-
νάσαν, καὶ εἰς Ρήδον καὶ εἰς Φάσησι λίδα καὶ
εἰς Καὶ καὶ εἰς Σιδην καὶ εἰς Ἀραδόν καὶ εἰς
Γέρασον καὶ Κητίδον, and παράθυρον καὶ Κάρυστον;
(1 Macc. xv. 27). It will be observed that all
the places named, with the exception of Cyprus and
Cyrene, lie on the highway of maritime traffic
between Syria and Italy, and are inhabited by the
Jewish slaves of that region, whether kidnapped
by their own countrymen (Ex. xvi. 16) or
obtained by raids (2 K. v. 2); appear in early
times to have been transmitted to the west coast
of Asia Minor by this route (see Ez. xxvii. 13;
I6d iii. 6).

The existence of the mountain Solyms, and a
town of the same name, in the immediate neigh-
borhood of Phaselis, renders it probable that the
descendants of some of these Israelites formed a
population of some importance in the time of
Strabo (Herod. ii. 178; Strab. xiv. c. 3; Liv.
xvii. 22; Mela. i. 11; Beaufort, Knossos, pp.
55-56).

J. W. B.

PHASTRON (φαστρων [Sin. φαστρων]):
Phastron; Phaisron). the name of the head of
an Arab tribe, "the children of Phastron" (1 Mac-
c. ix. 66), defeated by Jonathan, but of whom
nothing more is known.

B. F. W.

PHASSARON (φασσαρων): [Vat. φα-

Pusey, however (Comm. on Amos i. 3), renders it "crooked"

PHESISITES (Φεψήσιταί: Pheresites), 1 Esd. viii. 69; = PHER'IZITES: comp. Ezr. ix. 1

PHER'EZITES: PHER'IZITES (ά Φερ'ίζιται: Pherizeuses; Pherezites), Jud. v. 16; 2 Esd. i. 21. The latter of these passages contains a statement in accordance with those of Gen. xiii. 7, xxxiv. 30; Judg. i. 4, &c., noticed under PHER'EZITE.

* PHI-BE'SETH, Ezek. xxx. 17. [PHESETH.]

PHICHL (Φίχθος: strong, mighty, Fürst)
days of both Abraham (Gen. xvi. 22, 52) and Isaac (xxvi. 25). Josephus mentions him on the second occasion only. On the other hand the LXX. introduce Abuzzath, Abonneb's other companion, on the first also. By Gesenius the name is treated as Hebrew, and as meaning the "mouth of all." By First (Homer, ii. 215 a), it is derived from a root פיח, to be strong. But Hitzig (Philistäer, § 57) refers it to the Sanskrit पिज़ा, a tamarisk, pointing out that Abraham had planted a tamarisk in Beer-sheba, and comparing the name with Elah, Berosus, Tapparch, and other names of persons and places signifying different kinds of trees; and with the name φιλάδος, a village of Palestine (Joseph. Ant. xii. 4, § 2), and φιλάδεια in Greece. Stark (Geset, etc., p. 96) more cautiously avoids such speculations. The natural conclusion from these mere conjectures is that Phichol is a Philistine name, the meaning and derivation of which are lost to us.

* Phichol (whatever its origin) was no doubt a military title (like uanbe or moshih in the East at present), and hence would be expected to recur in the history again and again. In speaking of Turkish officers now the name is very seldom heard, and they are known to the public almost exclusively by their titles (Thomson's Land and Book, ii. 352).

II.

PHILADELPHIA (ἡ Φιλαδέλφεια [brotherly love]: Philadelphia), Rev. iii. 7. A town on the confines of Lydia and Phrygia Catacæannææ, built by Attalus II., king of Pergamus. It was situated on the lower slopes of Tmolus, on the southern side of the valley of the Aisc-giall Son,

a river which is probably the Cogamus of antiquity, and falls into the Wadi-shoal (the Heroum) in the neighborhood of Sort-Koles (Sardis), about 25 miles to the west of the site of Philadelphia. This latter is still represented by a town called Allobibstoch (city of God). Its elevation is 152 feet above the sea. The region around is highly volcanic, and geologically speaking belongs to the district of Phrygia Cataacæannææ, on the western edge of which it lies. The soil was extremely favorable to the growth of vines, celebrated by Virgil for the soundness of the wine they produced; and in all probability Philadelphia was built by Attalus as a mart for the great wine-producing region, extending for 500 stades in length by 400 in breadth for its soils have on them the heath of Bæculi or a female Bæchat. Strabo compares the soil with that in the neighborhood of Catana in Sicily; and modern travellers describe the appearance of the country as resembling a billyo sea of disintegrated lava, with here and there vast trap-dykes protruding. The original population of Philadelphia seems to have been Macedonian, and the national character to have been retained even in the time of Pline. There, however, as appears from Rev. iii. 9, a synagogue of Heilingius Jews there, as well as a Christian Church. The locality continued to be subject to constant earthquakes, which in the time of Strabo rendered even the town-walls of Philadelphia unsafe; but its inhabitants held pertinaciously to the spot, perhaps from the profit which naturally accrued to them from their city being the staple of the great wine-district. But the expense of reparation was constant, and hence perhaps the poverty of the members of the Christian Church (ὁδος...δύτη μακαξ Κέντρο δύναμις, Rev. iii. 8), who no doubt were a portion of the urban population, and heavily taxed for public purposes, as well as subject to private loss by the destruction of their own property. Philadelphia was not of sufficient importance in the Roman times to have law-courts of its own, but belonged to a jurisdiction of which Sardis was the centre.

It has been supposed by some that Philadelphia occupied the site of another town named Callatebous, of which Herodotus speaks, in his account of Xerxes's march, as famous for the production of a sugar from the helum araphum and sweetwort (ἡ τῇ ἄραμες ἄραμεργες μέλι καὶ μελικες τε καὶ τε μελικες πεταλεια, vii. 31). But by the way in which he mentions Callatebous of which the name is only known from him it would seem to have been not far from the Maender, from which the name of Allobibstoch cannot be less distant than from 30 to 40 miles, while they are very near the Cogamus. The enormous plane tree, too, which struck Xerxes's attention, and the abundance of the μπαεν, point

Philadelphia (Macchiante's Apocalyptic Churches).
PHILEMON

Paul terms Philemon ἀντιπρόσωπος (ver. 1), which may denote a preacher of the word (2 Cor. viii. 23; Phil. ii. 25, etc.); but as nothing in the letter indicates that he performed this service, and as the appellation may designate other modes of labor (applied to Priscilla, Rom. xvi. 3), it probably has not the official sense in this instance. Meyer thinks that Philemon may have been an elder. It is evident that, on becoming a disciple, he gave no common proof of the sincerity and power of his faith. His character, as shadowed forth in the epistle to him, is one of the noblest which the sacred record makes known to us. He was full of faith and good works, was dolce, confiding, grateful, was forgiving, sympathizing, charitable, and a man who on a question of simple justice needed only a hint of his duty to prompt him to go even beyond it (εἰς τὸ δέ μεγάλη ποιήσεις). Any one who studies the epistle will perceive that it ascerts to him these varied quals of the first Roman, and if we are to suppose two letters, one written during the years that Paul was imprisoned at Caesarea (Acts xxiii. 35, xxiv. 27). But this opinion, though supported by some plausible arguments, can be demonstrated with reasonable certainty to be incorrect. [COLOSSIANS, EPISTLE TO THE.]

The time when Paul wrote may be fixed with much precision. The Apostle at the close of the letter expresses a hope of his speedy liberation. He speaks in like manner of his approaching deliverance, in his Epistle to the Philemonians (ii. 23, 24), which was written during the same imprisonment. Presuming, therefore, that he had good reasons for such an expectation, and that he was not disappointed in the result, we may conclude that this letter was written by the apostle about the year A. D. 63, or early in A. D. 64; for it was in the latter year, according to the best chronologists, that he was freed from his first Roman imprisonment.

Nothing is wanting to confirm the genuineness of this epistle. The external testimony is unimpeachable. It is not quoted so often by the earlier Christian fathers as some of the other letters; its brevity, and the fact that its contents are not didactic or polemic, account for that omission. We need not urge the expressions in Ignatius, cited as evidence of that apostolic Father's knowledge and use of the epistle; though it is difficult to regard the similarity between them and the language in
PHILEMON, THE EPISTLE OF PAUL TO

ver. 2c as altogether accidental. See Kirchhofer's
Quellenmanualion, p. 205. The Canon of Muratori
which comes to us from the second century (Cred-
er, Geschichte des Kanons, p. 69), enumerates
this as one of Paul's epistles. Tertullian men-
tions it, and says that Marcion admitted it into
his collection. The Epistle of Barnabas presents,
the birthplace of Marcellus, was not far from Colossae where Phile-
mon lived, and the letter would find its way to the
neighboring churches at an early period. Origen
and Eusebius include it among the universally ak-
nowledged writings (δομολογία) of the early
Christian times. It is so well attested historically,
that, as De Wette says (Fîndînîng ins Neue Test-
amt, p. 278), its genuineness on that ground is
beyond doubt.

Nor does the epistle itself offer anything to con-
ict with this decision. It is impossible to conceive
of a composition more strongly marked within the
same limits by those unstudied assonnances of
thought, sentiment, and expression, which indicate
an author's hand, than this short epistle as com-
pared with Paul's other productions. Paley has a
passage in his Moral and Political Philosophy (Paul's
Epistles, p. 350) which illustrates this feature of the
letter in a very just and forcible manner. It will be
found also that all the historical allusions which the Apostle makes to events in
his own life, or to other persons with whom he was
connected, harmonize perfectly with the statements
or incidental intimations contained in the Acts
of the Apostles or the other epistles of Paul. It
belongs to a commentary to point out the instances
of such agreement.

Baur (Paulus, p. 475) would divest the epistle
of its historical character, and make it the person-
ified illustration from some later writer, of the idea
that Christianity unites and equalizes in a higher
sense those wion outward circumstances have sep-
arted. He does not impugn the external evidence.

But, not to leave his theory wholly unsupported, he
suggests some linguistic objections to Paul's author-
ship of the letter, which must be pronounced un-
found and frivolous. He finds, for example, certain
words in the epistle, which are alleged to be
not Pauline; but to justify that assertion, he must
deny the genuineness of such other letters of Paul
as happen to contain these words. He admits that
the Apostle could have said σπαθαγάνα twice, but
thinks it suspicious that he should say it three
times. In a few terms he addresses, which are not used
elsewhere in the epistles; but to argue from this
that they disprove the apostolic origin of the epistle,
is to assume the absurd principle that a writer,
after having produced two or three compositions,
must for the future confine himself to an unvarying
circle of words, whatever may be the subject he dis-
sects, or whatever the interval of time between his
different epistles.

The arbitrary and purely subjective character of
such criticisms can have no weight against the varied
testimony admitted as decisive by Christian
scholars for so many ages, upon which the canoni-
cal authority of the Epistle to Philemon is founded.

They are worth repeating only as illustrating
Baur's own remark, that modern criticisms in as-
sailing this particular book runs a great risk of
exposing itself to the imputation of an excessive distrust,
a morbid sensibility to doubt and denial, than in questioning the claims of any other epistle
solicited to Paul.

Our knowledge respecting the occasion and ob-
ject of the letter we must derive from declarations
or inferences furnished by the letter itself. For
the relation of Philemon and Onesimus to each
other, the reader will see the articles on those
names. Paul, so intimately connected with the
master and the servant, was anxious naturally to
effect a reconciliation between them if he could.
He wished also (walkings the ἀπελευθερο, the matter of duty or
right) to give Philemon an opportunity of man-
ifesting his Christian love in the treatment of Onesi-
mus, and his regard, at the same time, for the
personal convenience and wishes, not to say official
authority, of his spiritual teacher and guide. Paul
used his influence with Onesimus (ἀνείπεψε, in
ver. 12) to induce him to return to Colossae, and
place himself again at the disposal of his master.

Whether Onesimus asserted merely to the pro-
posal of the Apostle, or had a desire at the same
time to revisit his former home, the epistle does
not enable us to determine. On his departure,
Paul put into his hand this letter as evidence that
Onesimus was a true and approved disciple of
Christ, and entitled as such to be received not as a
servant, but above a servant, as a brother in the
faith. It is Paul's representation of the character
of the Apostle himself, and worthy of the same
consideration and love. It is instructive to ob-
serve how entirely Paul identifies himself with
Onesimus, and pleads his cause as if it were his
own. He intercedes for him as his own child, promises repairation if he had done any wrong,
demands for him not only a remission of all pen-
alties, but the reception of sympathy, affection,
Christian brotherhood, and while he solicits these
favors for another, consents to receive them with
the same gratitude and sense of obligation as if
they were bestowed on himself. Such was the pur-
pose and such the argument of the epistle.

The result of the appeal cannot be doubted. It
may be assumed from the character of Philemon
that the Apostle's intercession for Onesimus was
not unavailing. There can be no doubt that,
agreeably to the express instructions of the letter,
the past was forgiven; the master and the servant
were reconciled to each other; and, if the liberty
which Onesimus had asserted in a spirit of inde-
pendence was not conceded as a boon or right, it
was enjoyed at all events under a form of servitude
which henceforth was such in name only. So
much must be regarded as certain; or it follows
that the Apostle was mistaken in his estimate of
Philemon's character, and his efforts for the welfare
of Onesimus were frustrated. Chrysostom declares,
in his impassioned style, that Philemon must have
been less than a man, must have been alive desti-
tute of sensibility and reason (πιός λίθος, πιόν θρόπος, not to be moved by the arguments and
spirit of such a letter to fulfill every wish and in-
nimate desire of his disciple. His answer, at least, is
purely no fit reply to his pleadings for Onesimus could involve less
than a cessation of every thing oppressive and harsh
in his civil condition, as far as it depended on
Philemon to mitigate or neutralize the evils of a
legalized system of bondage, as well as a cessation of every thing violative of his rights as a
Christian.

How much further than this an impartial ex-
samination of the epistle might lead us is not a mat-
ter of consequence to us, nor has it yet been settled by any very gen-
eral consent of interpreters. Many of the best critics
construe certain expressions (το ἀδύνατον in ver. 14,
and τοι̑η βασιλεία in ver. 21) as conveying a distinct
expectation on the part of Paul that Philemon
would liberate Onesimus. Nearly all agree that he
PHILEMON

would hardly have failed to confer on him that favor, even if it was not requested in so many words, after such an appeal to his sentiments of humanity and justice. Thus it was, as Dr. Wordsworth remarks (St. Paul's Epistles, p. 224), "by Christianizing the master that the Gospel enfranchised the slave. It did not legislate about mere names and forms, but it went to the root of the evil, it spoke to the heart of man. When the heart of the master was filled with divine grace and was warmed with the love of Christ, the rest would soon follow. The lips would speak kind words, the hands would do kind things. Every Onesimus would be treated by every Philemon as a beloved brother in Christ."

The Epistle to Philemon has one peculiar feature — its esthetic character it may be termed — which distinguishes it from all the other epistles, and demands a special notice at our hands. It has been admired deservedly as a model of delicacy and skill in the department of composition to which it belongs. The writer had peculiar difficulties to overcome. He was the common friend of the parties at variance. He must conciliate a man who supposed that he had good reason to be offended. He must command the offender, and yet neither deny nor aggravate the imputed fault. He must assert the new ideas of Christian equality in the face of a system which hardly recognized the humanity of the enslaved. He could have placed the question on the ground of his own personal rights, and yet must waive them in order to secure an act of spontaneous kindness. His success must be a triumph of love, and nothing be demanded for the sake of the justice which could have claimed everything. He limits his request to a forgiveness of the alleged wrong, and a restoration to favor and the enjoyment of future sympathy and affection, and yet would so guard his words as to leave scope for all the generosity which benevolence might prompt toward one whose condition admitted of so much alleviation. These are contrivances not easy to harmonize; but Paul, it is confessed, has shown a degree of self-denial and a tact in dealing with them, which in being equal to the occasion could hardly be greater.

There is a letter extant of the younger Pliny (Epist. ii. 21) which he wrote to a friend whose servant had deserted him, in which he intercedes for the fugitive, who was anxious to return to his master, but dreaded the effects of his anger. Thus the occasion of the correspondence was similar to that between the Apostle and Philemon. It has occurred to scholars to compare this celebrated letter with that of Paul in behalf of Onesimus; and as the result they hesitate not to say, that not only in the spirit of Christian love, of which Pliny was ignorant, but in dignity of thought, argument, pathos, beauty of style, eloquence, the communication of the Apostle is vastly superior to that of the polished Roman writer.

Among the later Commentaries on this epistle may be mentioned those of Rothe (Interpretatio Historico-Exegetica, BREMEN, 1844), Hagenbach (some of his early efforts, BASEL, 1829), Koch (ZURICH, 1840, excellent), Wiesinger (1851), one of the commentators of Olshausen's work, Meyer (1859), De Wette, Ewald (brief notes with a translation, 50th ed., 1857), Alford, Wordsworth, Elliott, and the Amer. Bible Union (N. Y. 1860). The celebrated Lavater preached thirty-nine sermons on the contents of this brief composition, and published them in two volumes.

PHILIP

H B H.

* Among the patristic commentators Chrysostom excels in bringing out the delicate touches of the letter. In tom. vi. of the Graces Socii (Francfort, 1859) the jurist, Selchio Gentilius, devotes eighty folio pages to Philemon. D. H. Wilckens (De revisiones et sermones elegantissimae, in Epistolis Pauli ad Phil. 1860) Traj. ad Rhem., 1809). J. S. Buckminster has a sermon on the entire letter as a text (Sermons, pp. 78-92, Lond. 1821). Still later helps are F. Kühne, Der Epistle Pauli ad Phil. in Bibelwerk (Leipa, 1856); Bleeker, Vorlesungen über die Briefe an die Gläubigen, den Phil. (1855); and J. J. Van Oosterzee, De Brief aan Philimon, in pt. xi. of Lange's Bibelwerk des N. Test. (1862), translated with additions by H. B. Hackett in the Dr. Schaff's Commentary (N. Y. 1868). On the relation of the epistle to the subject of slavery see the opinions of eminent writers as quoted at the end of the above translation (pp. 29-31).

PHILETUS (Philagros, beloved, or worthy of love: Philletus) was possibly a disciple of Hymenas, with whom he is associated in 2 Tim. ii. 17 and what is implied without his name in a later epistle (1 Tim. i. 20). Waterland (Importance of the Doctrine of the Holy Trinity, ch. iv., Works, iii. 450) confines in a few lines the substance of many dissertations which have been written concerning their opinions, and the sentence which was inflicted upon at least one of them: "They appear to have been persons who believed the Scriptures of the O. T., but misunderstood them, allegorizing away the doctrine of the Resurrection, and reducing it all into figure and metaphor. The delivering over unto Satan seems to have been a form of excommunication declaring the person reduced to the state of a heathen; and in the Apostolical age it was accompanied with supernatural or miraculous effects upon the bodies of the persons so delivered."

Walchius is of opinion that they were of Jewish origin: Hammond connects them with the Gnostics; Vitringa (with less probability) with the Sadducees. They understood resurrection to signify the knowledge and profession of the Christian religion, or regeneration and conversion, according to J. G. Walchius, whose lengthy dissertation, De Hymenaeo et Philitio, in his Miscellanea Sacra, 1744, pp. 81-121, seems to exhaust the subject. Amongst writers who preceded him may be named Vitringa, Obscr. Sacr. iv. 9, 322-330; Buddens, Expositio Apostolica, v. 297-305. See also, on the heresy, Burton, Brapton Lectures, and Dean Elliott's notes on the Pastoral Epistles; and Potter on Church Government, ch. v., with reference to the sentence. The names of Philetus and Hymenaeus occur separately among those of Cesar's household whose relics have been found in the Tabora Minus.

W. T. B.

PHILIP (Philairos, lover of horses: Philippos). 1. The father of Alexander the Great (1 Mac. i. 1; v. i. 2); king of Macedonia (i. e. 339). 2. A Phrygian, left by Antiochus Epiphi as governor at Jerusalem (c. B. C. 170), where he was beset with great cruelty (2 Mac. v. 22), burning the fugitive Jews in caves (2 Mac. vi. 11), and taking the earliest measures to check the growing power of Judas Mac. (2 Mac. viii. 9). He is commonly identified with...

3. The foster brother (Anstropos, 2 Mac. ix.
and xii. suggests that he may have owed to Andrew the first tidings that the hope had been fulfilled. The statement that Jesus found him (John i. 43) implies a previous seeking. To him first in the whole circle of the disciples were spoken the words so full of meaning; "Follow me," (Ibid.). As soon as he had known his Master, he is eager to communicate his discovery to another who had also shared the same expectations. He speaks to Nathanael, probably on his arrival in Cana (comp. John xxi. 2, Ecald. Gesch. p. 251), as though they had not seldom communed together of the intimations of a better time, of a divine kingdom, which they found in their sacred books. We may well believe that he, like his friend, was an "Israelite indeed in whom there was no guile." In the lists of the twelve Apostles, in the Synoptic Gospels, his name is as uniformly at the head of the second group of four, as the name of Peter is at that of the first (Matt. x. 3; Mark iii. 18; Luke vi. 14); and the facts recorded by St. John give the reason of this priority. In those lists again we find his name immediately coupled with that of Bartholomew, and this has led to the hypothesis that the latter is identical with the Nathanael of John iv. 45, the one being the personal name, the other, like Barjonah of Barlaam, a patronymic. Jerusalem (Joshua, p. 9) looks on the two as brothers, but the precise mention of the θεος ἄνδρον in ver. 41, and its omission here, is, as Alford remarks (Matt. x. 3), against this hypothesis.

Philip apparently was among the first company of disciples who were with the Lord at the commencement of his ministry, at the marriage of Cana, on his first appearance as a prophet in Jerusalem (John ii.). When John was cast into prison, and the work of declaring the glad tidings of the kingdom required a new company of preachers, we may believe that he, like his companions and friends, received a new call to a more constant discipleship (Matt. iv. 18-22). When the Twelve were specially set apart for their office, he was numbered among them. The first three Gospels tell us nothing more of him individually. St. John, with his characteristic fulness of personal reminiscences, records a few significant utterances. The earnest, single-hearted faith which showed itself in his first conversion, required, it would seem, an education; one stage of this may be traced, according to Clement of Alexandria (Strom. iii. 25), in the history of Matt. xii. 21. He assumes, as a recognized fact, that Philip was the disciple who urged the plea, "Suffer us first to go and bury my father," and who was reminded of a higher duty, perhaps also of the command previously given, by the command, "Let the dead bury their dead; follow me." When the Galilean crowds had halted on their way to Jerusalem to hear the preaching of Jesus (John vi. 5-9), and were faint with hunger, it was to Philip that the question was put, "Whence shall we buy bread that these may eat?" And when Jesus says, "He himself knew what He would do," the answer, "Two hundred pennyworth of bread is not sufficient for them that every one may take a little," shows how little he was prepared for the work of the Gospel's suggestion (I Pet. ii. 21) that the Apostle was an inhabitant (sēmos) of Bethsaida, but a native, (μέθος) of Capernaum, is to be noticed, but hardly to be received.

PHILIP THE APOSTLE

It was the power that followed. It is noticeable that here, as in John iv. 1, he appears in close connection with Andrew.

Another incident is brought before us in John xii. 20-22. Among the pilgrims who had come to keep the Passover at Jerusalem were some Gentile proselytes (Hellenes) who had heard of Jesus, and desired to see Him. The Greek name of Philip may have attracted them. The zealous love which he had shown in the case of Nathanael may have made him prompt to offer himself as their guide. But it is characteristic of him that he does not take them at once to the presence of his Master. "Philip cometh and saith Andrew, and again Andrew and Philip tell Jesus." The friend and fellow-disciple to whom apparently he owed his own introduction to Jesus of Nazareth, is to introduce these strangers also.

There is a connection not difficult to be traced between this fact and that which follows on the last recurrence of Philip's name in the history of the Gospels. The desire to see Jesus gave occasion to the utterance of words in which the Lord spoke more distinctly than ever of the present of His Father with Him, to the voice from heaven which manifested the Father's will (John xii. 28). The words appear to have sunk into the heart of at least one of the disciples, and he brooded over them. The strong cravings of a passionate but unenlightened faith led him to feel that one thing was yet wanting. They heard His Lord speak of His Father and of their Father. He was going to His Father's house. They were to follow Him there. But why should they not have even now a vision of the Divine glory? It was part of the childlike simplicity of his nature that no reserve should hinder the expression of the craving. "Lord, shew us the Father, and it sufficeth us." (John xiv. 8). And the answer to that desire belonged also specially to him. He had all along been eager to lead others to see Jesus. He had been with Him, looking on Him from the very commencement of his ministry, and yet he had not known Him. He had thought of the glory of the Father as consisting in something else than the Truth, Righteousness, Love that he had witnessed in the Son. "Have I been so long time with you, and yet hast thou not known me, Philip? He that hath seen me hath seen the Father." How many of the eighth generation of the twelve are connected with the name of Philip is recorded in the Gospels. The close relation in which we have seen him standing to the sons of Zebedee and Nathanael might lead us to think of him as one of the two named disciples in the list of fishermen on the Sea of Tiberias who meet us in John xii. He is among the company of disciples at Jerusalem after the Ascension (Acta i. 13), and on the day of Pentecost.

After this all is uncertain and apocryphal. He is mentioned by Clement of Alexandria as having had a wife and children, and as having sanctioned the marriage of his daughter instead of binding them to vows of chastity (Strom., iii. 52; Euseb. H. E. iii. 30), and is included in the list of those who had borne witness of Christ in their lives, but not having died what was commonly looked on as a martyr's death (Strom., iv. 73). Polycrates (Euseb. H. E. iii. 31), Bishop of Ephesus, speaks of him as having fallen asleep in the Phrygian Hierapolis, as having had two daughters who had grown old unmarried, and a third, with special gifts of inspiration, as having been known to be the mother of Philip, who had died at Ephesus. There seems, however, in this mention of the daughters of Philip, to be some confusion between the Apostle and the Evangelist. Eusebius in the same chapter quotes a passage from Calus, in which the four daughters of Philip, prophetesses, are mentioned as living with their father at Hierapolis and as buried there with him, and himself connects this fact with Acts xxii. 8, as though they referred to one and the same person. Polycrates in like manner refers to him in the Easter Controversy, as an authority for the Quaedeicenian practice (Euseb. H. E. v. 24). It is noticeable that even Augustine (Strom. 206) speaks with some uncertainty as to the distinctness of the two Philip, the apocryphal "Acta Philippi" are another wild venture, and if there is not any grain of truth in them, it is probably the bare fact that the Apostle or the Evangelist labored in Phrygia, and died at Hierapolis. He arrives in that city with his sister Mariamne and his friend Bartholomeus. The wife of the proconsul is converted. The people are drawn away from the worship of a great serpent. The priests and the proconsul seize on the Apostles and put them to the torture. St. John suddenly appears with words of counsel and encouragement. Philip, in spite of the warning of the Apostle of Love reminding him that he should return good for evil, curses the city, and the earth opens and swallowed it up. Then his Lord appears and reproves him for his vindictive anger, and those who had descended to the abyss are raised out of it again. The tortures which Philip had suffered end in his death, but, as a punishment for his offense, he is to remain for forty days excluded from Paradise. After his death a vine springs up on the spot where his blood had fallen, and the juice of the grapes is used for the Eucharistic cup (Tischendorf, Acta Apcroeph, pp. 75-94). The book which contains this narrative is apparently only the last chapter of a larger history, and it fixes the journey and the death as after the visit of the newly risen Jesus (iv. 19). It is uncertain whether the other apocryphal fragment professing to give an account of his labors in Greece is part of the same work, but it is at least equally legendary. He arrives in Athens clothed like the other Apostles, as Christ had commanded, in an outer cloak and a linen tunic. Three hundred philosophers dispute with him. They find themselves baffled, and send for assistance to Aquila, the high priest at Jerusalem. He puts on his pontifical robes, and goes to Athens at the head of five hundred warriors. They attempt to seize on the Apostle, and are all smitten with blindness. The heavens open: the form of the Son of Man appears, and all the idols of Athens fall to the ground; and so on through a succession of marvels, ending with his remaining two years in the city, establishing a church there.
PHILIP THE EVANGELIST.

The first mention of this name occurs in the account of the dispute between the Hebrew and Hellenistic disciples in Acts vi. He is one of the Seven appointed to superintend the daily distribution of food and alms, and so to remove all suspicion of partiality. The fact that all the seven names are Greek, makes it at least very probable that they were chosen as belonging to the Hellenistic section of the Church, representatives of the class which had appeared before the Apostles in the attitude of complaint. The name of Philip stands next to that of Stephen; and this, together with the fact that these are the only two names (unless Nicodemus be an exception; comp. Nicodemus of which we hear again) tends to the conclusion that we have among the most prominent of those so chosen. He was, at any rate, well reported of as "full of the Holy Ghost, and wisdom," and had won the affections of the great body of believers as to be among the objects of their free election, possibly (assuming the votes of the congregation to have been taken for the different candidates) gaining all but the highest number of suffrages. Whether the office to which he was thus appointed gave him the position and the title of a Deacon of the Church, or was special and extraordinary in its character, must remain uncertain (comp. Deacon).

The after-history of Philip warrants the belief, in any case, that his office was not simply that of the later Diacorette. It is no great presumption to think of him as contributing hardly less than Stephen to the great increase of disciples which followed on this fresh organization, as sharing in that wider, more expansive teaching which shows itself for the first time in the oration of the proto-martyr, and in which he was the forerunner of St. Paul. We should expect the man who had been his companion and fellow-worker to go on with the work which he left unfinished, and to break through the barriers of a simply national Judaism. And so accordingly we find him in the next stage of his history. The persecution of which Saul was the leader must have stopped the "daily ministrations" of the Church. The teachers who had been most prominent were compelled to take to flight, and Philip was among them. The resumption of one form of activity, however, only threw him forward into another. It is noticeable that the city of Samaria is the first scene of his activity (Acts viii.). He is there reported to of St. Paul in his work, as Stephen had been in his teaching. It falls to his lot, rather than to that of an Apostle, to take that first step in the victory over Jewish prejudice and the expansion of the Church, according to its Lord's command. As a preparation for that work there may have been the Messianic hopes which were cherished by the Samaritans no less than by the Jews (John iv. 25), the revelation of the two days which had witnessed the presence there of Christ and his disciples (John iv. 40), even perhaps the craving for spiritual powers which had been roused by the strange influence of Simon the Sorcerer. The scene which brings the two into contact with each other, in which the magician has to acknowledge a power over nature greater than his own, is interesting, rather as belonging to the life of the heresarch than to that of the Evangelist. [Simon Musaeus.] It suggests the inquiry whether we can trace through the distortions and perversions of the "hero of the romance of heresy," the influence of that phase of Christian truth which was likely to be presented by the preaching of the Hellenistic Evangelist.

This step is followed by another. He is directed by an angel of the Lord to take the road that led down from Jerusalem to Gaza on the way to Egypt. (For the topographical questions connected with this history, see Gaza.) A chariot passes by in which there is a man of another race, whose complexion or whose dress showed him to be a native of Ethiopia. From the time of Panmetheus [comp. Maseph] there had been a large body of Jews settled in that region, and the enmity of chariots at the court of Candace might easily have come across them and their sacred books, might have embraced their faith, and become by circumcission a proselyte of righteousness. He had been on a pilgrimage to Jerusalem. He may have heard there of the new sect. The history that follows is interesting as one of the few records in the N. T. of the process of individual conversion, and one which we may believe St. Luke obtained, during his residence at Caesarea, from the Evangelist himself. The devout proselyte reciting the prophecy which he does not understand, the Evangelist-preacher running at full speed till he overtakes the chariot, the abrupt question, the simple-hearted answer, the unfolding, from the starting-point of the prophecy, of the glad tidings of Jesus, the craving for the means of admission to the blessing of glowing up with the new society, the simple baptism in the first stream or spring, the instantaneous, abrupt departure of the missionary-preacher, as of one carried away by a Divine impulse, these help us to represent to ourselves much of the life and work of that remote post. On the hypothesis which has just been suggested, we may think of it as being the incident to which the mind of Philip himself recurrd with most satisfaction.

A brief sentence tells us that he continued his work as a preacher at Azotus (Ashdod) and among the other cities that had formerly belonged to the Philistines, and, following the coast-line, came to Caesarea. Here for a long period, not less than eighteen or nineteen years, we lose sight of him. He may have been there when the new {convert Saul passed through on his way to Tarsus (Acts ix. 30). He may have contributed by his labors to the eager desire to be guided further into the Truth which led to the conversion of Cornelius. We can hardly think of him as giving up all at once the missionary habits of his life. Caesarea, however, appears to have been the centre of his activity. The last glimpse of him in the N. T. is
PHILIP THE EVANGELIST

in the account of St. Paul's journey to Jerusalem. It is to his house, as to one well known to them, that St. Paul and his companions turn for shelter. He is still known as "one of the Seven." His work has gained for him the yet higher title of Evangelist (comp. Evangelist). He has four daughters, who possess the gift of prophetic utterance, and who apparently give themselves to the work of teaching instead of entering on the life of home (Acts xxii. 8, 9). He is visited by the prophets and elders of Jerusalem. At such a place as Cæsarea the work of such a man must have helped to bridge over the ever-widening gap which threatened to separate the Jewish and the Gentile Churches. One who had preached Christ to the hated Samaritan, the swarthy African, the despised Philistine, the men of all nations who passed through the seaport of Palestine, might well welcome the arrival of the Apostle of the Gentiles (comp. J. P. Lange, in Herzog's Real-Encyklopädie, s. v. "Philippus").

The traditions in which the Evangelist and the Apostle who bore the same name are more or less confounded have been given under PHILIP THE APOSTLE. According to another, relating more distinctly to him, he died Bishop of Tralles (Acts Sanct. June 6). The house in which he and his daughters had lived was pointed out to travellers in the time of Jerome (Epit. Paule, § 8). (Comp. Ewald, Geschichte, vi. 175, 208-214; Baumgarten, Apostel Geschichte, §§ 15, 16.)

PHILIP HEROD I., II. [Herod; vol ii. pp. 1052, 1853.]

PHILIPPI (Φιλιππῖς: Philippi). A city of Macedonia, about nine miles from the sea, to the N. W. of the island of Thasos, which is twelve miles distant from its port Neapolis, the modern Kavalla. It is situated in a plain between the ranges of Pangaenus and Haemus. St. Paul, when, on his first visit to Macedonia in company with Silas, he embarked at Troas, made a straight run to Samothrace, and from thence to Neapolis, which he reached on the second day (Acts xvi. 11). This was built on a rocky promontory, on the western side of which is a roadstead, furnishing a safe refuge from the Etesian winds. The town is cut off from the interior by a steep line of hills anciently called Symbolum, connected towards the N. E. with the western extremity of Haemus, and towards the S. W., less continuously, with the eastern extremity of Pangaenus. A steep track, following the course of an ancient paved road, leads over Symbolum to Philippi, the solitary pass being about 1,000 feet above the sea-level. At this point the traveller arrives in little more than half an hour's riding, and almost immediately begins to descend by a yet steeper path into the plain. From a point near the watershed, a simultaneous view is obtained both of Kavalla and of the ruins of Philippi. Between Pangaenus and the nearest part of Symbolum the plain is very low, and there are large accumulations of water. Between the foot of Symbolum and the site of Philippi, two Turkish cemeteries are passed, the gravestones of which are all derived from the ruins of the ancient city, and in the immediate neighborhood of the one first reached is the modern Turkish village Berketti. This is the nearest village to the ancient ruins, which are not at the present time inhabited at all. Near the second cemetery are some ruins on a slight eminence, and also a khan, kept by a Greek family. Here is a large monumental block of marble, 12 feet high and 7 feet square, apparently the pedestal of a statue, as on the top a hole exists, which was obviously intended for its reception. This hole is pointed out by local tradition as the crib out of which Alexander's horse, Bucephalus, was accustomed to eat his oats. On two sides of the block is a mutilated Latin inscription, in which the names of Caicus Vibius and Cornelius Quatrus may be deciphered. A stream employed in turning a mill bursts out from a sedgy pool in the neighborhood, and probably finds its way to the marshy ground mentioned as existing in the S. W. portion of the plain.

After about twenty minutes' ride from the khan, over ground thickly strewn with fragments of marble columns, and slabs that have been employed in building, a river-bed 66 feet wide is crossed.

Ruins at Philippi.

It appears to be some miles distant, but is distinctly seen from that point.

After about twenty minutes' ride from the khan, over ground thickly strewn with fragments of marble columns, and slabs that have been employed in building, a river-bed 66 feet wide is crossed.

one first reached is the modern Turkish village Berketti. This is the nearest village to the ancient ruins, which are not at the present time inhabited at all. through which the stream rushes with great force, and immediately on the other side the walls of the ancient Philippi may be traced. Their direction is adjusted to the course of the stream; and at only 350 feet from its margin there appears a gap in their circuit indicating the former existence of a gate. This is, no doubt, the gate out of which the Apostle and his companion pressed to the "prayer meeting" on the banks of a river, where they made the acquaintance of Lydia, the Thyatitan seller of purple. The locality, just outside the walls, and with a plentiful supply of water for their animals, is exactly the one which would be appropriated as a market for itinerant traders, "auiorion ephimius henoynoua simuioe," as will appear from the parallel case of the Egyptian fountain near Rome, of whose descent Jusephus complains (Sot. iii. 13). Lydia had an establishment in Philippi for the reception of the dyed goods which were imported from Thyatira and the neighboring towns of Asia; and were dispersed by means of pack-animals among the mountain clans of the Haemus and Pangeus, the agents being doubtless in many instances her own coseligionists. High up in Haemus lay the tribe of the Sature, where was the oracle of Dionysus,—not the rustic deity of the Attic vine-dressers, but the prophet-god of the Thracians (αυτρημα, Euseb. Eccl. hist. 2.5). The "bafnished with the spirit of divination" (παρα- 
δευτη ἐναυτις πεωις πινη) may probably be regarded as one of the hierodules of this establishment, hired by Philippian citizens, and frequenting the country-market to practice her art among the villagers who brought produce for the consumption of the town. The fierce character of the mountaineers would render it impudent to admit them within the walls of the city; just as in some of the towns of North Africa, the Kabyles are not allowed to enter, but have a market allotted to them outside the walls for the sale of the produce they bring. Over such an assembly only a summary jurisdiction can be exercised, and hence the proprietors of the slave, when they considered themselves injured, and hurried Paul and Silas into the town, to the agora, the civic market where the magistrates (ἀρχηγας) sat, were at once turned over to the military authorities (πταργηγοι), and those, naturally assuming that a stranger frequenting the extra-mural market must be a lawbreaker, or an enemy of order, or an adventurer, proceeded to inflict upon the onlookers the usual -cause of a riot (the merits of which they would not attempt to understand) the usual treatment in such cases. The idea of the Apostle possessing the Roman franchise, and consequently an exemption from corporal outrage, never occurred to the rough soldier who ordered him to be scourged; and the words which he was at least required to have him observe were that he had no time to plead to his citizenship, of which the military authorities first heard the next day. But the illegal treatment (ἀποθεμα) obviously made a deep impression on the mind of its victim, as is evident, not only from his refusal to take his discharge from prison the next morning (Acts xvi. 37), but from a passage in the Epistle to the Church at Thessalonica (1 Thess. ii. 2), in which he reminds them of the circumstances under which be first preached the Gospel to them (περονακατα 
τεταγμωνια και εκθεσια, καθε τινα, ἐν φυσιν). And subsequently at Jerusalem, under parallel circumstances of tumult, he warns the officer (to the great surprise of the latter) of his privilege (Acts xxii. 25).

The Philippi which St. Paul visited, the site of which has been described above, was a Roman colony founded by Augustus, and the remains which still cloth the ground are doubtless derived from that city. [Colony, Amer. ed. The establishment of Philip of Macedonia was probably not exactly on the same site: for it is described by Appian as being on a hill, and it may perhaps be looked for upon the elevation near the second cemetery. Philip is said to have occupied it and fortified the position by way of a defense against the neighboring Thracians, so that the nucleus of his town, at any rate, would have been of the nature of an aeropole. Nothing would be more natural than that the Roman town should have been built in the immediate neighborhood of the existing Greek one, on a site more suitable for architectural display.

Philip, when he acquired possession of the site, found there a town named Doins or Dibum, which was in all probability in its origin a factory of the Phoenicians, who were the first that worked the gold mines in the mountains here, as in the neighboring Thasus. Appian says that those were in a hill (Αφροι) not far from Philippi, that the hill was sacred to Dionysus, and that the mines went by the name of "the sanctuary" (τα θυατερα). But he shows himself quite ignorant of the locality, to the extent of believing the plain of Philippi to lie open to the river Strymon, whereas the massive wall of Pangeus is really interposed between them. In all probability the "hill of Dionysus" and the "sanctuary" are the temple of Dionysus high up the mountains among the Sature, who preserved their independence against all invaders down to the time of Hercules at least. It is more likely that the gold-mines owned by Philip were the same as those at Seuth, Philip, which was certainly in this immediate neighborhood. Before the great expedition of Heracles, the Thasians had a number of settlements on the main, and this among the number, which produced them 80 talents a year as rent to the state. In the year 465 B. C., they ceded their possessions on the continent to the Athenians; but the colony, 10,000 in number, the same as those at Seuth, Philip, which was in what sense it was first (επαργα) has been ever verter. See on this point the addition to Macedonia, Amer. ed. 5.
PHILIPPI

2491

75; Pausanias, i. 29, 4). From that time until the rise of the Macedonian power, the mines seem to have remained in the hands of native chiefs; but when the affairs of Southern Greece became thoroughly embroiled by the policy of Philip, the Thasians made an attempt to repossess themselves of this valuable territory, and sent a colony to the site—then going by the name of “the Springs” (Κρήνεις). Philip, however, aware of the importance of the position, expelled them and founded Philippi. The name of the place can no longer be traced in the by-roads, but at that time, as was not wonderful under the circumstances, had become almost insignificant in their produce: but their new owner contrived to extract more than 1,000 talents a year from them, with which he minted the gold coinage called by his name.

The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is of extraordinary fertility. The position, too, was on the main road from Rome to Asia, the Via Egnatia, which from Thassalonica to Constantinople followed the same course as the existing post-road. The usual course was to take ship at Brundisium and land at Dyrrachium, from whence a route led across Epirus to Thassalonica. Egnatia was carried by Italy by this route, when, some 18 years after the death of Philip, it was formally opened.

The ruins of Philippi are very extensive, but present no striking feature except two gateways, which are considered to belong to the time of Claudius. Traces of an amphitheatre, theatre, or stadium—for it does not clearly appear which—are also visible in the direction of the hills on the N. E. side. Inscriptions both in the Latin and Greek languages, but more generally in the former, are found.

St. Paul visited Philippi twice more, once immediately after the disturbances which arose at Ephesus out of the jealousy of the manufacturers of silver shrines for Artemis. By this time the hostile relation in which the Christian doctrine necessarily stood to all purely ceremonial religions was perfectly manifest; and wherever its teachers appeared, whether by his appeal or by his resistance, and wherever the jealousy of the Roman authorities, who dreaded civil disorder above everything else, to be feared. It seems not unlikely that the second visit of the Apostle to Philippi was made specially with the view of counteracting this particular danger. The Epistle to the Philippians, which was written to them from Rome, indicates that at that time some of the Christians there were in the custody of the civil authorities as seditioners persons, through some proceedings or other connected with their faith (ἐνών ἐχαρίσθη τῷ ἀντί Χριστοῦ, οὐ μόνον τὸ εἰς αὐτὸν πιστεύειν ἀλλὰ καὶ τὸ ἐπὶ αὐτοῦ πάχειν τὸν αὐτῶν ἀγάμα έχοντες οὗν εἰσεί ἐν ξυποὶ καί νῦν ἀκοφέτει ἐν ξυποὶ; Phil. i. 29). The reports of the provincial magistrates to Rome would of course describe St. Paul in the light of the troubles there; and if this were believed, it would be put together with the charge against him by the Jews at Jerusalem which induced him to appeal to Caesar, and with the disturbances at Ephesus and elsewhere; and the general conclusion at which the government would arrive, might not improbably be that he was a dangerous person and too long to be set free. This will explain the strong exhortation in the first eighteen verses of chapter ii., and the peculiar way in which it winds up. The Philippian Christians, who are at the same time suffering for their profession, are exhorted to have remained in the benevolent care (as one might have expected), but to moderation, to abstinence from all provocation and ostentation of their own sentiments (μὴν κατὰ ἐρείδαιν μὴν κενοδοξίαν, ver. 3), to humility, and consideration for the interests of others. They are to achieve their salvation with fear and trembling, and without scrupling and disputing, in order to avoid occasion for reproach, from which charge they were, as the Roman colonists would bring against them. It with all this prudence and temperance in the profession of their faith, their faith is still made a penal offense, the Apostle is well content to take the consequences,—to precede them in martyrdom for it,—to be the libation poured out upon them the victims (εἰ καί στειούμανε ἐπί τῇ θυσίᾳ καὶ λειτουργίᾳ τῆς πίστεως ἡμῶν, χεῖρι καὶ συγ-χαίρων πᾶσιν ἡμῶν, ver. 17). Of course the Jewish formalists in Philippi were the parties most likely to nni-represent the conduct of the new converts; and hence (after a digression on the subject of Epaphroditus) the Apostle reverses to cautions against them, such precisely as he had given before, consequently by word of mouth. Beware of those dogs—for they will not be children at the table of the Lord. Wise men and obstinate doers (and bad doers too) of the Law—those flesh-mongers (for evangelized I won’t call them, we being the true circumcision) etc. (iii. 2, 3). Some of these enemies St. Paul found at Rome, who “told the story of Christ insincerely” (κατάγγειλεν ὑμῖν ἀγῶνα, i. 17) in the hope to increase the severity of his imprisonment by exciting the jealousy of the court. These he opposes to such as “preached Christ” (ἐγγορύλιον) loyally, and consoles himself with the reflection that, at all events, the story circulared, whatever the motives of those who circulated it.

The Christian community at Philippi distinguished itself in liberality. On the Apostle’s first visit he was hospitably entertained by Lydia, and when he afterwards went to Thessalonica, where he had to refer the medical to a learned Jew, the same Lydia accompanied him as a nurse. There he became known to Philippians, and, they had sent him supplies more than once, and were the only Christian community, who did so (Phil. iv. 15). They also contributed readily to the collection made for the relief of the poor at Jerusalem, which St. Paul conveyed to them at his last visit (2 Cor. viii. 1-6). And it would seem as if they sent further supplies to the Apostle after his arrival at Rome. The necessity for these seems to have been urgent, and some delay in making collection. They had collected in the requisite funds; so that Epaphroditus, who carried them, risked his life in the endeavor to make up for lost time (μὴν χαίρεις γὰρ ἄγανα παραβολουλέγομεν τὴν σοφίαν, ὦ ναολαπηγόγοι τὸ ἱμαντι ιδέαρρημά τοῖς μὲν λειτουργίαις, Phil. ii. 50, 26). The delay, however, seems to have somewhat stung the Apostle at the time he fancied his beloved flock had forgotten him (see iv. 10-17). Epaphroditus told ill with fever from his efforts, and nearly died. On recovering he became homesick, and wandering in mind (ἀφετέρως) from the weakness which is the sequel of fever; and St. Paul, although intending soon to send Timothy to the Philippian Church, thought it desirable to let Epaphroditus go without delay to his friends, who had already his illness, and carry with him the letter which is included in the Canon—one which was written
PHILOPPIANS, EPISTLE TO THE

after the Apostle's imprisonment at Rome had lasted a considerable time. Some domestic troubles connected with religion had already broken out in the community. Euodias (the name of a female, not Euodia, as in A. V.; see Ecphones, and Syn-byte, perhaps denominations, are exegeted to agree with one another in the matter of their common faith; and St. Paul entreats one some one, whom he calls "true yoke-fellow," to "help these women," that is, in the work of their reconciliation, since they had done good service to the Apostle in his trials at Philippi. Possibly a claim on the part of these females to superior insight in spiritual matters, and hence some jealousy; for the Apostle immediately goes on to remind his readers, that the peace of God is something superior to the highest intelligence. (συνειδούχον πάντας, etc.)

When St. Paul passed through Philippi a third time he does not appear to have made any considerable stay there (Acts xx. 6). He and his companions are somewhat hastily spoken of as sailing from Philippi; but this is because in the common approach to places, the traveler would not be regarded as one where the Piraeus might in the same way be said to set out on a voyage from Athens. On this occasion the voyage to Troas took the Apostle five days, the vessel being probably obliged to coast in order to avoid the contrary wind, until coming off the headland of Sarpelon, whence she would be able to stand across to Troas with an E., or E. N. E., breeze, which at that time of year (after Easter) might be looked for. (Strab. Fragment. Lib. viii.; Thucyl. i. 100, iv. 102; Herod., ii. 53; Diod. Sic. iv. 33, 3; Appian. Bell. Civ. iv. 101 f.; Pausan. i. 28, § 4; Hackett's Journey to Philippi in the Bible Union Quarterly for August, 1850) [and Bibl. Sacra for 1850, vol. xxi. pp. 896-938. For other sources see Mac- wonia, at the end.]

PHILOPPIANS (Φιλιππιανοι; Philippa- nites), inhabitants of Philippi, but limited (Phil. iv. 14) to those whom Paul addressed in his letter as Christians. See the next article.

PHILOPPIANS, EPISTLE TO THE

1. The canonical authority, Pauline authorship and integrity of this epistle were uniformly acknowledged up to the end of the 18th century. Marcion (A. D. 140) in the earliest known Canon held common ground with the Church touching the autho- rity of this epistle (Tertullian, Adv. Marc. iv. 5, v. 29); it appears in the Muratorian Frag- ment (Routh, Religio Sacra, i. 395); among the "acknowledged" books in Eusobius (H. E. ii. 25); in the lists of the Council of Lacedaena, A. D. 365, and the Synod of Hippo, 393; and in all sub- sequent lists, as well as in the Peshito and later versions. Even contemporary evidence may be claimed for it. Philippiotic Christians who had contributed to the collections for St. Paul's support at Rome, who had been eye and ear witnesses of the return of Epaphroditus and the first reading of St. Paul's epistle, may have been still alive at Philippi when Polycarp wrote (A. D. 117) his letter to them, in which (v. 2, 3) he refers to St. Paul's epistle as a well known distinction belonging to the Phi- lippian Church. It is quoted as St. Paul's by Irenæus, iv. 18, § 4; Clem. Alex. Paedag. i. 6, § 54, and elsewhere; Tertullian, Adv. Marc. v. 20, De Res. Carn. ch. 23. A quotation from it (Phil. ii. 6) is found in the Epistle of the Churches of Asia Minor (To the Ephesians, Phil. iv. 2). The testimonies of later writers are innumerable. But F. C. Baur (1845), followed by Schwengler (1846), has argued from the phraseology of the epistle and other internal marks, that it is the work not of St. Paul, but of some Gnostic forger in the 2d century. He has been answered by Lüning (1847), Driessler (1848), and Resch (1850). Even if his inference were a fair consequence from Baur's premises, it would still be neutral- ized by the strong evidence in favor of Pauline authorship, which Paley, Hose Pauline, ch. 7, has drawn from the epistle as it stands. The argu- ments of the Tübingen school are briefly stated by Reuss, Gesch. N. T. §§ 130-133, and at greater length in Wiesinger's Commentary. Most persons of this school, however, who have been inclined to the opinion of Dean Alford (N. T. vol. iii. p. 27, ed. 1856), who regards them as an instance of the inse- consistency of hyper-critical. The canonical authority and the authorship of the epistle may be considered as unshaken.

There is a break in the sense at the end of the second chapter of the epistle, which every careful reader must have observed. It is indeed quite natu- ral that an epistle written amid exciting circum- stances, personal dangers, and various distractions should bear in one place at least a mark of inter- ruption. Le Moynes (1685) thought it was an- ciently divided into two parts. Heinrichs (1810) followed by Paulus (1818) has conjectured from this abrupt recommencement that the two parts are two distinct epistles, of which the first, together with the conclusion of the Ep. (iv. 21-25) was intended for public use in the church, and the second exclusively for the Apostle's special friends in Phil-ippi. It is not easy to see what sufficient foundation exists for this theory, or what illustration of the meaning of the epistle could be derived from it. It has met with a distinct reply from Krause (1811 and 1818) and the integrity of the epistle has not been questioned by recent critics. Ewald (Send- schriften des A. Paulus, p. 431) is of opinion that St. Paul sent several epistles to the Philippians; and he refers to the texts ii. 12 and iii. 18, as partly proving this. But some additional confirmation or explanation of his conjecture is requisite before it can be admitted as either probable or necessary.

2. Where written.—The constant tradition that this epistle was written at Rome by St. Paul in his captivity, was impugned first by Oder (1731), who, disregarding the fact that the Apostle was in prison, i. 7, 14, 14, when he wrote, imagined that he was at Corinth (see Well's Επιστολ Ἐφεσι- ν, iv. 165, 270; and then by Paulus (1799), Schulz (1828), Böger (1837), and Billiot (1841), in whose opinion the epistle was written during the Apostle's confinement at Caesarea (Acts xxiv. 23);
PHILIPPIANS, EPISTLE TO THE

out the references to the "palace" (prætorium, i. 13), and to "Cæsar's household," iv. 22, seem to point to Rome rather than to Caesarea; and there is no reason whatever for supposing that the Apostle felt in Caesarea that extreme uncertainty of life connected with the approaching decision of his cause, which he must have felt towards the end of his captivity at Rome, and which he expresses in this epistle, i. 19, 20, ii. 17, iii. 10; and further, the dissemination of the Gospel described in Phil. iii. 18 is not even hinted at in St. Luke's account of the Caesarean captivity, but is described by him as taking place at Rome: compare Acts xxiv. 23 with xxviii. 30, 31. Even Reuss (Gesch. N. T. 1860), who assigns to Caesarea three of St. Paul's epistles, which are generally considered to have been written at Rome, is decided in his conviction that the Epistle to the Philippians was written at Rome.

3. When written. — Assuming then that the epistle was written at Rome during the imprisonment mentioned in the last chapter of the Acts, it may be shown from a single fact that it could not have been written long before the end of the two years. The distress of the Philippians on account of Epaphroditus' sickness was known at Rome when the epistle was written; this implies four journeys separated by some indefinite intervals, to or from Philippi and Rome, between the commencement of St. Paul's captivity and the writing of the epistle. The Philippians were informed of his imprisonment, sent Epaphroditus, were informed of their messenger's sickness, sent their message of condolence. Further, the absence of St. Luke's name from the salutations to a church where he was well known, implies that he was absent from Rome when the epistle was written: so does St. Paul's declaration, ii. 20, that no one who remained with him felt an equal interest with Timothy in the welfare of the Philippians. And by comparing the mention of St. Luke in Col. iv. 14, and Philem. 24 with the abrupt conclusion of his narrative in the Acts, we are led to the inference that he left Rome after those two epistles were written and before the end of the two years' captivity. Lastly, it is obvious from Phil. i. 20, that St. Paul, when he wrote, felt his position to be very critical, and we know that it became more precarious as the two years drew to a close. In A. D. 62 the infamous Tigellinus succeeded Burrus the upright Praetorian prefect in the charge of St. Paul's person; and the marriage of Poppaea brought his imperial judge under an influence, which if exerted, was hostile to St. Paul. Assuming that St. Paul's acquittal and release took place in 63, we may date the Epistle to the Philippians early in that year.

4. The writer's acquaintance with the Philippians. — St. Paul's connection with Philippi was of a peculiar character, which gave rise to the writing of this epistle. That city, important as a mart for the produce of the neighboring gold mines, and as a Roman stronghold to check the rude Thracian mountaineers, was distinguished as the scene of the great battle fatal to Brutus and Cassius, S. C. 42 [PHILIPPI]. In A. D. 51 St. Paul entered its walls, accompanied by Silas, who had been with him since he started from Antioch, and by Timothy and Luke, whom he had afterwards attached to himself; the former at Derbe, the latter quite recently at Troas. It may well be imagined that the patience of the zealous Apostle had been tried by his mysterious absence from Asia, then from Bithynia and Mysia, and that his expectations had been stirred up by the vision which hastened his departure with his new found associate, Luke, from Tross. A swift passage brought him to the European shore at Neapolis, whence he took the road about ten miles b long across the mountain ridge called Symbolum to Philippi [Acts xvi. 12]. There, a greater distance from Jerusalem than any Apostle had yet penetrated, the long restrained energy of St. Paul was again employed in laying the foundation of a Christian church. Seeking first the lost sheep of the house of Israel, he went on a Sabbath day with the few Jews who resided in Philippi, to their small prosenion on the bank of the river Gangites. The missionaries sat down and spoke to the assembled women. One of them, Lydia, not born of the seed of Abraham, but a proselyte, whose name and occupation, as well as her birth, connect her with Asia, gave heed unto St. Paul, and she and her household were baptized, perhaps on the same Sabbath day. Her house became the residence of the missionaries. Many days they resorted to the prosenion, and the result of their efforts in a few short seasons in Philippi was the conversion of many persons (xvi. 40), including at last their jailer and his household. Philippi was endeared to St. Paul, not only by the hospitality of Lydia, the deep sympathy of the converts, and the remarkable miracle which set a seal on his preaching, but also by the successful exercise of his missionary activity after a long suspense, and by the happy consequences of his undaunted endurance of ignominy, which remained in his memory (Phil. i. 30) after a long interval of eleven years. Leaving Timothy and Luke to watch over the infant church, Paul and Silas went to Thessalonica (1 Thess. ii. 2), whither they were followed by the alms of the Philippians (Phil. iv. 16), and thence southwards. Timothy having probably carried out similar directions to those which were given to Titus (i. 5) in Crete, soon rejoined Paul. Whether Luke remained at Philippi. The next six years of his life are a blank in our records. At the end of that period he is found again (Acts xx. 6) at Philippi.

After the lapse of five years, spent chiefly at Corinth and Ephesus, St. Paul, escaping from the incensed worshippers of the Ephesian Diana, passed through Macedonia. A. D. 57, on his way to Greece, accompanied by the Ephesian Tychicus and Trophimus, and probably visited Philippi for the second time, and was there joined by Timothy. His beloved Philippians, free, it seems, from the controversy which agitated other Christian churches, became still dearer to St. Paul on account of the soles which they afforded him when, emerging from a season of dejection (2 Cor. vii. 5), oppressed by weak bodily health, and anxious for the steadfastness of the churches which he had planted in Asia and Achaia, he wrote at Philippi his Second Epistle to the Corinthians.

On returning from Greece, unable to take ship there on account of the Jewish plots against his life, he went through Macedonia, seeking a favorable port for embarking. After parting from his

---

b Neater mine, as stated in note c, vol. iii. p 2078.
complications (Acts xx. 4), he again found a refuge among his faithful Philippians, where he spent some days at Easter, A. D. 58, with St. Luke, who accompanied him when he sailed from Neapolis.

Once more, in his Roman captivity (A. D. 62) their care of him revived again. They sent Epaphroditus, bearing their alms for the Apostle's support, and yearly also to tender his personal service (Phil. ii. 25). He stayed some time at Rome, and while employed as the organ of communication between the imprisoned Apostle and the Christians, and inquirers in and about Rome, he fell dangerously ill. When he was sufficiently recovered, St. Paul sent him back to the Philippians, to whom he was devoted, and with him our epistle.

5. Second contents of the Epistle.—St. Paul's aim in writing is plainly this: while acknowledging the alms of the Philippians and the personal services of their messengers, to give them some information respecting his own condition, and some advice respecting theirs. Perhaps the intensity of his feelings and the distraction of his prison prevented the following out his plan with undeviating clearness, for the preparations for the departure of Epaphroditus, and the thought that he would soon arrive among the warm-hearted Philippians, filled St. Paul with recollections of them, and revived his old feelings towards those fellow-believers of his hope of glory who were so deep in his heart (i. 7), and so often in his prayers (i. 4).

After the introduction (i. 1, 2) in which Timothy as the second father of this church is joined with Paul, he sets forth his own condition (i. 3-26), his prayers, care, and wishes for his Philippians, with the troubles and uncertainty of his imprisonment, and his hope of eventually seeing them again. Then (i. 27-ii. 18) he exhorts them to these particular virtues which he would rejoice to see them practicing at the present time,—fearless endurance of persecution from the outward heathen; unity among themselves, built on Christ-like humility and love; and an exemplary life in the face of unbelievers. He hopes soon to hear a good report of them (ii. 19-30), either by sending Timothy, or by going himself to them, as he now sends Epaphroditus, whose diligent service is highly commended. Reverting (iii. 1-21) to the tone of joy which runs through the preceding descriptions and exhortations,—as in i. 4, 18, 25, ii. 2, 16, 17, 18, 28—he bids them take heed that their joy be in the Lord, and warns them, as he had often previously warned them (probably in his last two visits), against admitting itinerant Judaizing teachers, the tendency of whose doctrine was towards a vain confidence in more earthly things; in contrast to this, he exhorts them to follow him in placing their trust humbly but entirely in Christ, and in pressing forward in their Christian course, with the Resurrection day constantly before their minds. Again (iv. 1-9), adhering to their position in the midst of unbelievers, he beseeches them, even with personal appeals, to be firm, united, joyful in the Lord; to be full of prayer and peace, and to lead such a life as must appear itself to the moral sense of others. Lastly (iv. 10-23), he thanks them for the contribution sent by Epaphroditus for his support, and concludes with salutations and a benediction.

6. Effect of the Epistle.—We have no account of the reception of this epistle by the Philippians. Except doubtful traditions that Erastus was their first bishop, and with Lydia and Parmenas was martyred in their city, nothing is recorded of them for the next forty-four years. But, about A. D. 107, Philippi was visited by Ignatius, who was conducted through Neapolis and Philippi, and across Macedonia in his way to martyrdom at Rome. And his visit was speedily followed by the arrival of a letter from Polycarp of Smyrna, which accompanied, in compliance with a characteristic request of the warm-hearted Philippians, a copy of all the letters of Ignatius which were in the possession of the church of Smyrna. It is interesting to compare the Philippians of A. D. 68, as drawn by St. Paul, with their successors in A. D. 107, as drawn by the disciple of St. John. Steadfastness in the faith, and a joyful sympathy with sufferers for Christ's sake, seem to have distinguished them at both periods (Phil. i. 9, and Polye. Ep. i.).

The character of their religion was the same throughout, practical and emotional rather than speculative: in both epistles there are many practical suggestions, much interchange of feeling, and an absence of doctrinal discussion. The Old Testament is scarcely, if at all, quoted: as if the Philippians had been gathered for the most part directly from the heathen. At each period false teachers were seeking; apparently in vain, an entrance into the Philippien Church, first Judaizing Christians, seemingly putting out of sight the Resurrection and the Judgment which afterwards the Gnostickizing Christians openly denied (Phil. iii., and Polye. vi., vii.). At both periods the same tendency to petty internal quarrels seems to prevail (Phil. i. 27, ii. 14, iv. 2, and Polye. ii., iv., vi., vii.). The student of ecclesiastical history will observe the faintly-marked organization of bishops, deacons, and female coadjutors to which St. Paul refers (Phil. i. 1, iv. 3), developed afterwards into broadly-distinguished priests, deacons, widows, and virgins (Polye. iv., v., vii.). Though the Macedonian churches in general were poor, at least as compared with commercial Corinth (2 Cor. vi. 19), yet their gold mines probably exempted the Philippians from the common lot of their neighbors, and at first enabled them to be comfortably liberal in almsgiving, and afterwards to send out to the most distinguished priests, deacons, and virgins (Polye. iv., v., vii.).

Now, though we cannot trace the immediate effect of St. Paul's epistle on the Philippians, yet no one can doubt that it contributed to form the character of their church, as it was in the time of Polycarp. It is evident from Polycarp's epistle that the church, by the grace of God and the guidance of the Apostle, had passed through those trials of which St. Paul warned it, and had not gone back from the high degree of Christian attainments which it reached under St. Paul's oral and written teaching (Polye. i., iii., iv., v., xi.). If it had made no great advance in knowledge, still unsound teachers were not in a distance from its members. Their sympathy with martyrs and confessors glued with as warm a flame as ever, whether it was claimed by Ignatius or by Polye. And they maintained their ground with meek firmness among the
PHILIPPIANS, EPISODE TO THE

aethen, and still held forth the light of an exemplary, though not a perfect Christian life. 

The Church at Rome. i. 12-18. The state of the church at Rome should be considered before entering on the study of the Epistle to the Philippians. Something is to be learned of its condition about A. D. 58 from the Epistle to the Romans, about A. D. 91 from Acts xxviii. Possibly the Gospel was planted there by some who themselves received the seed on the day of Pentecost (Acts ii. 10). The converts were drawn chiefly from Gentile proselytes to Judaism, partly also from Jews who were such by birth, with possibly a few converts direct from heathendom. In A. D. 58, this church was already eminent for its faith and obedience: it was exposed to the machinations of schismatical teachers; and it included two conflicting parties, the one insisting more or less on observing the Jewish law in addition to faith in Christ, as necessary to salvation, the other repudiating outward observances even to the extent of depriving their weak brethren of such as to them might be really edifying. We cannot gather from the Acts whether the whole church of Rome had then accepted the teaching of St. Paul as conveyed in his epistle to them. But it is certain that when he had been two years in Rome, his oral teaching was partly rejected by his converts; perhaps some may have been connected with the former of those above mentioned. St. Paul's presence in Rome, the freedom of speech all owed to him, and the personal freedom of his fellow-laborers were the means of uniting fresh missionary activity into the church (Phil. i. 12-14). It was in the work of Christ that Epaphroditus was worn out (ii. 30). Messages and letters passed between the Apostle and distant churches, and doubtless churches near to Rome, and both members of the church and inquirers into the new faith at Rome addressed themselves to the Apostle, and to those who were known to be in constant personal communication with him. And thus in his bondage he was a cause of the advancement of the Gospel. From his prison, as from a centre, light streamed into Cesar's household and into the Church of the Gentiles.

Strangely full of joy and thanksgiving amidst adversity, like the Apostle's midnight hymn from the depth of his Philippien dungeon, this epistle went forth from his prison at Rome. In most other epistles he writes with a sustained effort to instruct, or with sorrow, or with indignation; he is striving to supply imperfect, or to correct erroneous teaching, to put down scandals impurity, or to heal schism in the church which he addresses. But in this epistle, though he knew the Philippians intimately, and was not blind to the faults and tendencies to fault of some of them, yet he mentions no evil so characteristic of the whole church as to call for general censure on his part, or amendment on theirs. Of all his epistles to churches, none has so little of an official character as this. He withholds its title of "Apostle" in the Inscription. We lose sight of his high authority, and of the subordinate position of the worshippers by the river side. They are admitted to see the free action of a heart glowing with inspired Christian love, and to hear the utterance of the highest friendship addressed to equal friends conscious of a connection which is not earthly and temporal, but in Christ, for eternity. Who that bears in mind the condition of St. Paul in his Roman prison, can read unmoved of his continual prayers for his disfavored friends, his constant friendship of their fellowship with him, his joyous remembrance of their共同 Christian course, his confidence in their future, his tender yearning after them all in Christ, his eagerness to communicate to them his own circumstances and feelings, his carefulness to prepare them to repel any evil from within or from without, which might dim the brightness of their spiritual graces? Love, at once tender and watchful, that love which "is of God," is the keynote of this epistle: and in this epistle only we hear no undertone of any different feeling. Just enough, and no more, is shown of his own harassing trials to let us see how deep in his heart was the spring of that feeling, and how he was refreshed by its sweet and soothing flow.

9. Text, Translation, and Commentaries. The Epistle to the Philippians is found in all the principal mss. manuscripts, namely in A, B, C, D, E, F, G, K. In C, however, the verses preceding 1. 22, and those following 3. 5, are wanting.

Our A. V. of the epistle, published in 1611, was the work of that company of King James' translators who sat at Westminster, consisting of seven persons, of whom Dr. Barlow, afterwards Bishop of Rochester, was one. It is, however, substantially the same as the translation made by some unknown person for Archbishop Parker, published in the Bishops' Bible, 1568. See Bagster's Hexaplo, preface. A revised edition of the A. V. by Four Clergymen, is published (1831) by Parker and Bourn.

A complete list of works connected with this epistle may be found in the Commentary of Rheinhardt, the Friesic commentaries, those of Chrystostom (translated in the Oxford Library of the Fathers, 1843), Theodoret, and Theophylact, are still extant; perhaps also that of Theodore of Mopsuestia in an old Latin translation (see Journ. of Class. and Spec. Phil. iv. 302). Among later works may be mentioned those of Calvin, 1539; Estius, 1614; Dallé, 1639 (translated by Sherman, 1843); Ridley, 1548; Alrmy's Sermons, 1618; i. Ferguson, 1656; the annotated English New Testaments of Hammond, Fell, Whitby, and Macknight; the Commentaries of Peirce, 1733; Storr, 1783 (translated in the Edinburgh Biblical Cabinet); Am Ende, 1768; Rheinwald, 1827; T. Passavant, 1834; St. Matthies, 1835; Van Hengel, 1838, Holmann, 1839; Eillett, 1841; De Wette, 1847; Meyer, 1847 (3d ed. 1863); Nendzel, 1849 (translated in English, 1851 [by Mrs. H. C. Conant, published in X. Y.]), Wiesinger, 1850 (translated, and by Dallé, whom Pearson answered (Fidem Exaer. i. 5); also by Senler; and more recently by Zeller, Schleimm, Bunsen, and others: of whose criticism Ewald says, that it is the greatest injustice to Polycarp that men in the present age should deny that this epistle proceeded from him (Gesch. I. i. 277, ed. 1859). [Bunsen regards the epistle as in the main genuine. - A.].

a It is not easy to suppose that Polycarp was without a copy of St. Paul's epistle. Yet it is singular that though he mentions it twice, it is almost the only epistle of St. Paul which he does not quote. This fact may at least be regarded as additional evidence of the genuineness of Polycarp's epistle. No forgery would have been guilty of such omission. Its authenticity was first questioned by the Magdeburg Censurators,
PHILISTIA

into English, 1850); Kühler, 1555; Professor Eadie [1859]; Dean Elliott, 1861, and those included in the recent editions of the Greek N. T. by Dean Alford and Canon Wordsworth. W. T. B.

Additional Literature.—In German: George Fr. August车身的 Brief on the Philistines (1857); Bernhard Weiss, Der Philosoph-Brief vorwegend u. die Gesch. seiner Ausleugung, etc. (Heft 1859); one of its objects is to illustrate the relations of the epistle to dogmatic theology. D. Schenkel, Die Briefe on die Epheser, Philippus u. Kolosser (1862). Karl Brumte, Die Briefe on die Epheser, Kolosser in pt. ix. of Lange's Bibleerkke des N. T. (1867), trans. with additions by H. B. Hackett and J. B. G. Pelce for Dr. Schaff's Commentary (N. Y. 1869). Gottfried Menken, Pre-disser xii. 199, in his Schriften, v. 408-471 (Bremen, 1858). In English: Webster and Wilkin-son, The Greek Testament with Notes, etc., i. 506-528 (Lond. 1861). J. Trapp, Commentary upon the Epistle of St. Paul to the Philippians, in his Commentary on the N. T. (Webster's ed. Lond. 1863). Robert Hall, Practical Exposition of the Epistles to the Philippians (twelve discourses delivered at Cambridge, 1801 and 1802); they are good speci-ments of pulpift exhibition by one of the great masters of sacred eloquence. F. D. Maurice, Epistle to the Philippians, pp. 549-558, in his Unity of the N. T. (1834). B. J. Lightfoot, St. Paul's Epistle to the Philippians (Lond. 1863); it contains a revised text, with Introduction, Notes, and Dis-sertations. On the important passage ii. 6-9, may be mentioned Tholuck's Hiyptikos Christologie (1847); and the remarks of Prof. Stuart, Miscella-neis, pp. 112-115 (Andover, 1846). Dr. Howson has drawn out some of the finest illustrations of his theme (Lectures on the Character of St. Paul, Lond. 2d ed. 1846) from this epistle. He fully justifies Neander's remark that we look deeper into the Apostle's heart, have his distinc-tively personal traits more fully disclosed to us here, than in any of his other writings. H.

PHILISTIA (πηλιστη, Pelskith [perh. wandering, migration]: αλλαξομεν: allyingene). The word thus translated (in Ps. x. 8; lxxxvii. 4; civi. 9) is in the original identical with that else-where rendered PALESTINE. [See that article, p. 298.] "Palestine" originally meant nothing but the district inhabited by the "Philistines," who are called by Josephus Παλαιστίνης, "Palestines," In fact the two words are the same, and the dif-ference in their present form is but the result of gradual corruption. The form Philistia does not occur anywhere in LXX. or Vulgate. The nearest approach to it is Luther's Philistien.

* PHILISTIM (πηλιστημι, z), only in Gen. xiv. 14, the Hei-nuural instead of Philistias as elsewhere. The A. V. retains this Hebrew form also of the other names, in the same verse, and in correctly omits the article which belongs to them all in the original.

PHILISTINES (πηλιστην, πηλιςτην [perh. wanderer emigrant]: φολασασιου, αλλαξομενος: Philistion). The origin of the Philistines is nowhere expressly stated in the Bible; but as the prophets describe them as "the Philistines from Caphtor" (Am. ix. 7) and "the remnant of the maritime district of Caphtor" (Jer. xvii 4), it is prima facie probable that they were the "Capthorians which came out of Caphtor" who expelled the Avim from their terri-tory and occupied it in their place (Bent. ii. 28), and that these again were the Caphtorithes mentioned in the Mosaic genealogical table among the descendent-ants of Mizraim (Gen. x. 14). But in establishing this conclusion certain difficulties present them-selves. In the first place, it is observable that in Gen. x. 14 the Philistines are connected with the Cushim rather than the Caphtorim. It has gen-erally been assumed that the text has suffered a serious corruption and that the phraseological clause "out of whom came Philistia" ought to follow the words "and Caphtorim." This explanation is, however, inadmissible: for (1) there is no external evidence whatever of any variation in the text, either here or in the parallel passage in 1 Chr. i. 12; and (2) if the transposition were effect, the desired sense would not be gained; for the words rendered in the A. V. "out of whom a really mean "whence," and denote a local move-ment rather than a genealogical descent, so that, as applied to the Caphtorim, they would merely indicate a sojourn of the Philistines in their land, and not the identity of the two races. The clause seems to have an appropriate meaning in its present position: it looks like an interpolation into the original document with the view of explaining when and where the name Philistia was first applied to the people whose proper appellation was Caphtorim. It is an etymological as well as an historical memo-randum; for it is based on the meaning of the name Philistia, namely, "emigrant," and is designed to account for the application of that name. But a second and more serious difficulty arises out of the language of the Philistines; for while the Caphtorim were Hamite, the Philistine language is held to have been Semitic. It has hence been inferred that the Philistines were in reality a Semitic race, and that they derived the title of Caphtorim simply from a residence in Caphtor (Exwld. i. 331; Movers, Phmaz. iii. 294); and it has been noticed in confirmation of this, that their land is termed Ca-naan (Zeph. ii. 5). But this is inconsistent with the express assertion of the Bible that they were Caphtorim (Bent. ii. 23), and not simply that they came from Caphtor; and the term Canaan is ap-plied to their country, not ethnologically but ety-mologically, to describe the trading habits of the to whom the Philistines were αλλαξομενοι, as oppos- to αλλαξομενοι (Stark's Gtosa, p. 67 ff.). Other derivations of the expression in the Bible have been proposed, as that it originated in a transposition of the word αλλαξομενον (πηλιστημι), applied to the Philistine plain; or, again, that it is connected with Pelasgi, as Hittig suggests.

c Hittig, in his Wissenschaft d. Phil., however, maintains that the language is Indo-European, with a view to prove the Philistines to be Pelasgi. He is, we believe, singular in his view.
Phœnicians. However, the worship of the god Marm, and its identity with the Cretan Jove, are frequently mentioned by early writers (Movers, Phœnici. i. 662); but the name is Phoenician, being the patronym. 3. Mr. G. Hoare 'lord' of 1 Cor. xvi. 22, and it seems more probable that Gaza and Crete derived the worship from a common source, Phœnicia. Without therefore asserting that migration may not have taken place from Crete to Philistia, we hold that the evidence adduced to prove that they did is insufficient.

The last point to be decided in connection with the early history of the Philistines is, the time when they settled in the land of Canaan. If we were to restrict ourselves to the statements of the Bible, we should conclude that this took place before the time of Abraham: for they are noticed in his day as a pastoral tribe in the neighborhood of Gerar (Gen. xii. 6, xv. 17); and this position accords well with the statement in Deut. ii. 23, that the Avim dwelt in Hazerim, &c. in nomad encampments; for Gerar lay in the south country, which was just adapted to such a life. At the time of the Exodus they were still in the same neighborhood, but grown sufficiently powerful to inspire the Israelites with fear (Ex. xii. 17, xv. 14). When the Israelites arrived, they had driven the Philistines out of the full possession of the Shephelah from the "river of Egypt" (el-Arish) in the south, to Ekron in the north (Josh. xv. 4, 47), and had formed a confederacy of five powerful cities—Gaza, Ashdod, Ashkelon, Gath, and Ekron (Josh. xiii. 3). The interval that

...tion, adds that the name Judeus was derived from Idas—a circumstance which suggests a foundation for the story. The statement seems to have no more real weight than the reported connection between Hierosolyma and the Solym of Lydia. Yet it is accepted as evidence that the Philistines, whom Tacitus is supposed to describe as Jews, came from Crete.

The resemblance between the names Apemeth and Caphtor Kes. (Isid. ii. 22), Phaenara and Philistias (Ewald, l. 330), is too slight to be of any weight. Added to these, those places lie in the part of Crete most remote from Palestine.

At what period these cities were originally founded, we know not; but there are good grounds for believing that they were of Canaanitish origin, and had previously been occupied by the Avim. The name Gatha is certainly Canaanitish: so most probably are Gaza, Ashdod, and Ekron. Askelon is doubtful; and the terminations both of this and Ekron may be Philistine. Gaza is mentioned as early as Gen. x. 39 as a city of the Canaanites and Philistines, as well as Ashdod and Ekron were in Nebuchadrezzar's time the asylum of the Canaanitish Anakim (Josh. xi. 22).
The sole ground for questioning the historical value of these notices is that Abraham is not termed king of the Philistines in xx. 2, but king of Gerar. The term "Philistines" is not used in the narrative of the story, and it is gratuitously assumed that the latter is a case of _protoposis_, and that the subsequent notice of the king of the Philistines in xxv. 1, is the work of a later writer who was misled by the _protoposis_.

The ground for doubting the genuineness of Josh. xv. 45-47 are: (1) the omission of the total number of the towns; and (2) the notice of the "daughters," or dependent towns, and "villages."
the golden mice and emeralds (1 Sam. vi. 11) imply an acquaintance with the founder's and goldsmith's arts. Their wealth was abundant (Judg. xvi. 5, 18), and they appear in all respects to have been a prosperous people.

Possessed of such elements of power, the Philistines had attained in the time of the judges an important position among eastern nations. Their history is, indeed, almost a blank; yet the few particulars preserved to us are suggestive. About c. 1200 we find them engaged in successful war with the Sidonians, the effect of which was so serious to the latter power that it involved the transference of the capital of Phoenicia to a more secure position on the island of Tyre (Justin, xviii. 3). About the same period, but whether before or after is uncertain, they were engaged in a naval war with Ramesses III. of Egypt, in conjunction with other Mediterranean nations: in these wars they were unsuccessful (Brugsch, Hist. d'Égypte, pp. 185, 187), but the notice of them proves their importance, and we cannot therefore be surprised that they were able to extend their authority over the Israelites, devoid as these were of internal union, and harassed by external foes. With regard to their tactics and the objects that they had in view in their attacks on the Israelites, we may form a fair idea from the scattered notices in the books of Judges and Samuel. The warfare was of a guerrilla character, and consisted of a series of raids into the enemy's country. Sometimes these extended only just over the border, with the view of plundering the threshingfloors of the agricultural produce (1 Sam. xxviii. 1); but more generally they penetrated into the heart of the country and seized a commanding position on the edge of the Jordan Valley, whence they could secure themselves against a combination of the trans- and cis-Jordanite divisions of the Israelites, or prevent a return of the fugitives who had hurried across the river on the alarm of their approach. Thus at one time we find them crossing the central district of Benjamin and posting themselves at Michmash (1 Sam. xiii. 16), at another time following the coast road to the plain of Esdraelon and reaching the edge of the Jordan Valley by Jezreel (1 Sam. xxi. 11). From such posts as their head-quarters, they sent out detached bands to plunder the surrounding country (1 Sam. xiii. 17), and, having obtained all they could, they erected a column as a token of their supremacy (1 Sam. x. 5, xiii. 5), and retreated to their own country. This system of incursions kept the Israelites in a state of perpetual disquietude: all commerce was suspended, from the insecurity of the roads (Judg. v. 6); and at the approach of the foe the people either betook themselves to the natural hiding-places of the country, or engaged in piracy (1 Sam. xiii. 6, 7). By degrees the ascendency became complete, and a virtual disarmament of the population was effected by the suppression of the smiths (1 Sam. xiii. 19). The profits of the Philistines were not confined to the goods and chattels they carried off with them. They seized the persons of the Israelites and sold them for slaves: the earliest notice of this occurs in Judges xvi. 25. Here, according to the probably correct reading followed by the LXX., we find that there were numerous slaves in the camp at Michmash: at a later period the prophet inveigh against them for their traffic in human flesh (Joel iii. 6; Am. i. 6); at a still later period we hear that "the merchants of the country" followed the army of Gorgias into Judaea for the purpose of buying the children of Israel for slaves (1 Mar. iii. 41), and that the Philistines were Philistines is a fair inference from the subsequent notice that Nicanor sold the captive Jews to the "cities upon the sea-coast." (2 Mar. viii. 11). There can be little doubt, too, that tribute was exacted from the Israelites, but the notices of it are confined to passages of questionable authority, such as the rendering of 1 Sam. xiii. 21 in the LXX., which represents the Philistines as making a charge of three shekels a tool for sharpening them; and against the expression "Methueam" in 2 Sam. viii. 1, which is rendered in the Vulg. "furnum tributum," and by Symmachus παντοδικαῖος τῶν φόρων. In each of the passages quoted, the versions presuppose a text which yields a better sense than the existing one.

And now to recur to the Biblical narrative: The territory of the Philistines, having been once occupied by the Canaanites, formed a portion of the promised land, and was assigned to the tribe of Judah (Josh. xv. 2, 12, 45-47). No portion however, of it was conquered in the life-time of Joshua (Josh. xiii. 2), and even after his death no permanent conquest was effected (Judg. iii. 3), though, on the authority of a somewhat doubtful passage, we are informed that the three cities of Gaza, Ashdod, and Ekron were taken (Judg. i. 18). The Philistines, at all events, soon recovered these, and commenced an aggressive policy against the Israelites, by which they gained a complete ascendency over them. We are unable to say at  "Hebrew term netzah, which implies this practice, is rendered "garrison" in the A. V., which neither agrees with the context nor gives a true idea of the Philistine tactics. Stark, however, dissent from this view, and explains the term of military officers (Gaza, p. 104).

b וּנְתָנָה, and not וּנְתָנוּ.

c The true text may have been וּנְתָנוּ, instead of וּנְתָנָה.

The apparent discrepancy between Judg. i. 15, iii. 3, has led to suspicions as to the text of the former, which are strengthened by the rendering in the LXX., of אֶלְכָּנָמָאֹב, presupposing in the Hebrew the reading וּנְתָנָה, instead of וּנְתָנָה. The testimony of the LXX. is weakened by the circumstances (1) that it interpolates a notice of Ashkelon and its suburbs (אָשֶׁקֶל), a peculiar term in lieu of the φόνοι applied to the three other towns; and (2) that the term εὐκαταμενής is given as the equivalent for וּנְתָנָה, which occurs in no other instance. Of the two, therefore, the Greek text is more open to suspicion. Stark (Gaza, p. 129) regards the passage as an interpolation.

* The alleged discrepancy (see above) does not exist if וּנְתָנָה means that they took the cities by storm, but did not retain them or drive out the inhabitants (Judg. iii. 3). See Cassel's Rücker der Richter u. Ruth, p. 12. The same verb occurs with regard to the capture of Jerusalem (Judg. i. 8), though we read expressly (2 Sam. v. 6 ff.) that the Hebrews did not entirely drive out the inhabitants till long after that time. [Jaeus, Amer ed.] With the idea of permanent possession, the strict term would have been שֵׁם שִׁבְתָּר (see Bachmann, Buch der Richter, p. 128).
what intervals their incursions took place, as nothing is recorded of them in the early period of the judges. But they must have been frequent, inasmuch as the national spirit of the Israelites was so entirely broken that they even repudiated any attempt at deliverance (Judg. xvi. 12). Individual heroes were raised up from time to time whose achievements might well kindle patriotism, such as Shamgar the son of Anath (Judg. iii. 31), and still more Samson (Judg. xiii. - xvi.); but neither of these men succeeded in permanently throwing off the yoke. Of the former only a single daring feat is recorded - the effect of which appears, from Judg. v. 6, 7, to have been very short-lived. The true series of deliverances commenced with the latter, of whom it was predicted that "he shall begin to deliver" (Judg. xii. 5), and were carried on by Samuel, Saul, and David. The history of Samson furnishes us with some idea of the relations which existed between the two nations. As a "borderer" of the tribe of Dan, he was thrown into frequent contact with the Philistines, whose supremacy was so established that no bar appears to have been placed to free intercourse with their country. His early life was spent on the verge of the "Stedfasten" between Zarah and Esdrael, but when his actions had aroused the active hostility of the Philistines he withdrew into the central district and found a secure post on the rock of Eta, to the S. W. of Bethel. Thither the Philistines followed him without opposition from the inhabitants. His achievements belong to his personal history; it is clear that they were the isolated acts of an individual, and altogether unconnected with any national movement; for the revenge of the Philistines was throughout directed against Samson personally. Under Eli there was an organized but unsuccessful resistance to the encroachments of the Philistines, who had penetrated into the central district and were met at Aphek (1 Sam. iv. 1). The production of the ark in this occasion demonstrates the greatness of the emergency, and its loss marked the lowest epoch of Israel's degradation. The next action took place under Samuel's leadership, and the tides of success turned in Israel's favor: the Philistines had again penetrated into the mountainous country near Jerusalem; at Mizpeh they met the cowed host of the Israelites, who, encouraged by the signs of Divine favor, and availing themselves of the panic produced by a thunder-storm, inflicted on them a total defeat. For the first time, the Israelites erected their pillar or "stela" at Eta as the token of victory. The results were the recovery of the border towns and their territories "from Ekron even unto Gath," i.e. in the northern district. The success of Israel may be partly attributed to the powerful relations at this time with the Anemites (1 Sam. viii. 9-14). The Israelites, however, utilized their past weakness to their want of unity, and they desired a king, with the special object of "seducing them against the foe (1 Sam. viii. 20). It is a significant fact that Saul first felt inspiration in the presence of a pillar (A. V. "garrison") erected by the Philistines in commemoration of a victory (1 Sam. v. 5, 10). As soon as he was prepared to throw off the yoke, he occupied with his army a position at Michmash, commanding the defiles leading to the Jordan Valley, and his heroic general Jonathan gave the signal for a rising by overthrowing the pillar which the Philistines had placed there. The challenge was accepted: the Philistines invaded the central district with an immense force, and, having dislodged Saul from Michmash, occupied it themselves, and sent forth predatory bands into the surrounding country. The Israelites shortly after took up a position on the other side of the ravine at Gela, and, availing themselves of the confusion consequent upon Jonathan's daring feat, inflicted a tremendous slaughter upon the enemy (1 Sam. xiii., xiv.). No attempt was made by the Philistines to regain their supremacy for about twenty-five years, and the scene of the next contest shows the altered strength of the two parties: it was no longer in the central country, but in a ravine leading down to the Philistine plain, the Valley of Elah, the position of which is about 14 miles S. W. of Jerusalem: on this occasion the prowess of young David secured success to Israel, and the foe was pursued to the gates of Gath and Ekron (1 Sam. xiv.). The power of the Philistines was, however, still intact on their own territory, as proved by the flight of David to the court of Achish (1 Sam. xxi. 10-15), and his subsequent abode at Ziklag (1 Sam. xxvi.); where he was secured from the attacks of Saul. The border warfare was continued: captures and reprisals, such as are described as occurring at Keilah (1 Sam. xxi. 1-5) being probably frequent. The scene of the next conflict was far to the north, in the valley of Eshedron, whither the Philistines may have made a plundering incursion similar to that of the Midianites in the days of Gideon. The battle of Ebah, so often noted in the disasters to the Israelites: Saul himself perished, and the Philistines penetrated across the Jordan, and occupied the forsaken cities (1 Sam. xvi. 1-7). The disasters which followed the death of Saul were naturally unfavorable to the Philistines: and no sooner were these brought to a close by the appointment of David to be king over the united tribes, than the Philistines attempted to counteract this advantage by an attack on the person of the king: they therefore penetrated into the Valley of Rephaim, S. W. of Jerusalem, and even pushed forward an advanced post as far as Bethelhem (1 Chr. vii. 16). David twice attacked them at the former spot, and on each occasion with signal success, in each case capturing their images, in the second pursuing them "from Gela until they came to Gazer" (2 Sam. v. 17-25; 1 Chr. iv. 8-16).
PHILISTINES

Henceforth the Israelites appear as the aggressors: about seven years after the defeat at Rehoboth-Baal, David, who had now consolidated his power, attacked Gath with its dependencies (1 Chr. xvii. 1), and thus (according to one interpretation of the obscure expression "Methieth-anamuth") in 2 Sam. viii. 1: "he took the arm-bridge out of the hand of the Philistines" (Bretsch., "Conserv. on 1 Chr. in loc."); or (according to another) "he took the bridge of the metropolis out of the hand of the Philistines" (Lanceau, p. 55), it is not clear whether the bridge was the port or the city (the demolition of which is also mentioned in vii. 7, where it is said that their ascendency was utterly broken. This indeed was the case: for minor engagements in David's lifetime probably all took place within the borders of Philistia: Gob, which is given as the scene of the second and third contests, being probably identical with Gath, where the fourth took place (2 Sam. xxv. 15-22); comp. LXX, some of the copies of which read Φόβος instead of Φόβος). The whole of Philistia was included in Solomon's empire, the extent of which is described as being "from the river unto the land of the Philistines, unto the border of Egypt" (1 K. iv. 21; 2 Chr. ix. 26), and again "from Tiphsah even unto Gaza" (1 K. iv. 24; A. V. "Azinah") (though the Hebrew form is the same). The several towns probably remained under the Philistines adopted by their deportees under tribute; the case of Gath (1 K. ii. 39), and the sovereignty of Solomon was acknowledged by the payment of tribute (1 K. iv. 21). There are indications, however, that his hold on the Philistine country was no means established: for we find him securing the passes that led up from the plain to the central district by the fortification of Gezer and Beth-shean (1 K. ix. 17), while no mention is made either of Gaza, or Sidon, to which Solomon's death was fatal, or Philistia to the Philistine cause: Rehobam secured himself against them by fortifying Gath and other cities bordering on the plain (2 Chr. xi. 8): the Israelite monarchs were either not so prudent or not so powerful, for they allowed the Philistines to get hold of Gibeah. Commanding one of the deeks leading up from the plain of Sharon to Samaria, the recovery of which involved them in a protracted struggle in the reigns of Nadab and Zeruiah (1 K. xvii. 27, xvi. 15). Judah meanwhile had lost the tribute; for it is recorded as an occurrence that marked Jehoshaphat's sue.

graphical statements in the narrative of this campaign, instead of the "S. Geba," of Samuel, we have "Gibeon" in Chronicles. The latter lies N. of Jerusalem, and there is a Geba in the same neighborhood, lying more to the E. But the Valley of Rephaim is placed S. W. of Jerusalem, near to neither of these places. These criticisms on the name of Geba, as in the case of the "Tirzah" of Samuel, we have "Gibeon" in Chronicles. The latter lies N. of Jerusalem, while Bertschon (on 1 Chr. xiv. 16) identifies Gibeon with the Gibeah of Josh. xv. 55, and the Joshua noticed by Robinson (ii. 9, 12) as lying W. of Bethlehem. Neither of these explanations can be maintained, for in no time that the last retreat from the valley to the plain was cut off, and that the Philistines were compelled to flee northwards, and regained the plain by the pass of Beth-horon, which lay by Gibeon (as well as between Geba and Gazer). The Hebrew text, as it at present stands, in 1 K.

v. 21, will not bear the sense here put upon it; but a comparison with the parallel passage in 2 Chr. shows that the word דַּעַּת has dropped out before the "hand of the F." 5

b The passage in Zech. ix. 5-7 refers, in the opinion of those who assign an earlier date to the concluding chapters of the book, to the successful campaign of Uzziah. Internal evidence is in favor of this view. The alliance with Tyre is described as "the expectation" of Erick; Gaza was to lose her king, i. e. her independence: Ashkelon should be depopulated: a "bastard," i. e. one who was excluded from the congregation of Israel on the score of impure blood, should dwell in Asdod, holding it as a dependency of Judah; and Ekron should become "as a Jebusite," subject to Judah.
people shortly after in possession of the five Philis-
tine cities, to whichalone are we able to refer the
prediction in Is. xix. 18, when coupled with the
fact that both Gaza and Ashkelon are termed
Egyptian cities in the annals of Sargon (Bunsen's
Egypt, iv. 603). The Assyrians under Targar, the
general of Sargon, make an expedition against
Egypt, and attack the cities, as the key of that coun-
try (Is. xx. 1, 4, 5). Under Seennachiril Philis-
tines was again the scene of important operations: in
his first campaign against Egypt Ashkelon was
taken and its dependencies were plundered; Ash-
dod, Ekron, and Gaza submitted, and received as a
reward a portion of Herod's territory (Rawlinson, i. 4:7); in his second campaign other
forts on the verge of the plain, such as Libnah and Lachish, were also taken (2 K. xviii. 14, xix. 8).
The Assyrian supremacy, though shaken by the failure of this second expedition, was restored by
Shalmaneser, who claims to have conquered Egypt (Rawlinson, i. 481); and it seems probable that the
Assyrians retained their hold on Ashdod until its capture, after a long siege, by the Egyptian
monarch Psammetichus (Herod, i. 157), the effect of which was to reduce the population of that impor-
