tant place to a mere "remnant" (Jer. xxv. 20).
It was about this time, and probably while Psam-
etichus was engaged in the siege of Ashdod, that
Philistines was traversed by a vast Scythian horde
on their way to Egypt; they were, however, di-
verted from their purpose by the king, and retraced
their steps, plundering on their retreat the rich
temple of Venus at Ashkelon (Herod, i. 106). The
description of Zephaniah (ii. 4-7), who was contem-
porary with this event, may well apply to this ter-
rrible scourge, though more generally referred to
a Chaldaean invasion. The Egyptian ascendence was
not as yet re-established, for we find the next king,
Necho, compelled to besiege Gaza (the Calystis of
Hephaestus, i. 150) on his return from the battle of
Megiddo. After the death of Necho, the contest
was renewed between the Egyptians and the Chaldaens
under Nebuchadnezzar, and the result was specially
disastrous to the Philistines; Gaza was again taken
by the conqueror, and the population of the whole plain
was reduced to a mere "remnant" by the invading
armies (Jer. xxvii.). The "old hatred" that the
Philistines bore to the Jews was further exhibited
at hostility at the time of the Babylonian captivity
(Ez. xxxv. 15-17); but on the return this was some-
what alleviated, for some of the Jews married Philis-
tine women, to the great scandal of their rulers
(Neh. xiii. 23, 24). From this time the history of
Philistia is absorbed in the struggles of the neigh-
boring kingdoms. In n. c. 352, Alexander the
GREAT traversed it on his way to Egypt, and cap-
tured Gaza, then held by the Lacedaemons under Lysias,
after a two months' siege. In 312 the armies of
Demetrius Poliorcetes and Ptolemy fought in the
neighborhood of Gaza. In 199 Antiochus the
Great, in his war against Demetrius Philopater,
invaded Philistia and took Gaza. In 166 the Philis-
tines joined the Syrian army under Scurus in its
attack on Judaea (1 Mac. x, 44). In 148 the
attitude of the rival kings Demetrius II. and Alex-
ander Balas, under Apollonius and Jonathan re-
spectively, contended in the Philistine plain; Jona-
than took Ashdod, triumphantly entered Ashkelon,
and received Ekron as his reward (1 Mac. x. 68-
89). A few years later Jonathan again descended
into the plain in the interests of Antiochus VI.,
and captured Gaza (1 Mac. xi. 60-62). No fur-
ther notice of the country occurs until the capture
of Gaza in 57 by the Jewish king Alexander Jan-
dar, when it is recorded in his coins (tol. Ant.
xxii. 13, § 3; B. J. i. 4, § 2). In 63 Pompey con-
nexed Philistia to the province of Syria (tol. iv.
4, § 4), with the exception of Gaza, which was as-
signed to Herod (xx. 7, § 3), together with Jamnia,
Ashdod, and Ashkelon, as appears from xviii. 11, § 5.
The last three fell to Sabine after Herod's death,
but Gaza was reannexed to Syria (xvii. 11, §§ 4, 5).
The latest notice of the Philistines as a nation,
under their title of Ἀλασσάμαν, occurs in 1 Mac.
iii. v. The extension of the name from the dist-
trict occupied by them to the whole country, under
the familiar form of ΠΑΛΑΣΤΙΝΙΟΣ, has already been
noticed under that head.

With regard to the institutions of the Philistines
our information is very scanty. The five chief
cities held, as early as the days of Joshua, consti-
tuted themselves into a confederacy, restricted,
ever, in all probability, to matters of offense and de-
tense. Each was under the government of a prince
whose official title was σέφων (Josh. xiii. 3; Judg.
iii. 3, 10), and occasionally σέφων (2 Sam. xiii.
20; xxiv. 6). Gaza may be regarded as having exer-
cised an hereditary over the others, for in the lists of
the towns it is mentioned the first Josh. xiii. 2;
Am. i. 7, 8, except where there is an especial
ground for giving prominence to another, as in the
case of Ashdod (1 Sam. vi. 17). Ekron always
stands last, while Ashdod, Ashkelon, and Gath inter-
terchange places. Each town possessed its own
territory, as indicated in the case of Gath (1 Chr.
xxvii. 1). Ashdod (1 Sam. vi. 9), and others, and
each possessed its dependent towns or "daughters":
Josh. xv. 34-47; 1 Chr. xxviii. 11; 2 Sam. i. 29;
Ez. xxvi. 57), and its villages (Josh. l. 4). In
later times Gaza had a senate of five hundred (Jos-
eph. Ant. xiii. 13, § 3). The Philistines appear to
have been deeply imbued with superstition: they
carried their idols with them on their campaigns
(2 Sam. v. 21), and proclaimed their victories in
the sight of all their people (1 Sam. xxx. 9). They also carried
about their persons charms of some kind that had
been presented before the idols (2 Mac. xii. 40).
The gods whom they chiefly worshipped were Da-
gen, who possessed temples both at Gaza (Judg.
xxiv. 23) and at Ashdod (1 Sam. iii. 5-9); 1 Chr.
x. 10; 1 Mac. x. 95; Ashmuth, whose temple at Ashkelon
was burnt down (1 Sam. xxx. 10); Herod.
i. 105; Raphoebus, whose temple at Ekron was con-
sorted by Azaziah (2 K. v. 2-6); and Dereco, who
was honored at Ashkelon (Bod. Soc. ii. 4), though
unnoticed in the Bible. Priests and diviners (1
Sam. vi, 2) were attached to the various seats of
worship. (The special authorities for the history
of the Philistines are Stark's Gaza; Knobel's tol-
arsi; Israeli's Phil. ΠΑΛΑΣΤΙΝΙΟΣ, and Hitzig's
Phil., etc. [found of folk, tol. xili.; and also laurel]: Philologos.
A Christian
in Rome to whom St. Paul sends his salutation
xiii. 3, the latter being supported by the analogy of
i an Arabic expression.

Two derivations have been proposed for
the word, namely, Ἀλασσάμαν by Kaulf. i. 521, Ἀλασσάμαν
axilla, by Gesenius (T. p. 322) and Keil in Josh.
PHILOMETOR (Rom. xvi. 15). Origen conjectures that he was the son or a Christian household which included the other persons named with him. Pseudo-Hippolytus (De LXX. Apostolos) makes him one of the 70 disciples, and bishop of Sinope. His name is found in the Columbarium "of the freedmen of Livia Augusta" at Rome; which shows that there was a Philologus connected with the imperial household at the time when it included many Jews.

* PHILOMETOR (φιλομετέρος, μαθητής ἀληθινός: Philometer), a surname of IOSTERIUS or Plemeny VI., king of Egypt, 2 Mac. iv. 21.

A. PHILOSOPHY. It is the object of the following article to give some account (1.) of that development of thought among the Jews which answered to the philosophy of the West; (2.) of the recognition of the preparatory (propedaeut) office of Greek philosophy in relation to Christianity; (3.) of the systematic progress of Greek philosophy as forming a complete whole; and (4.) of the contact of Christianity with philosophy. The limits of the article necessarily exclude everything but broad statements. Many points of great interest must be passed over unnoticed; and in a fuller treatment there would be need of continual exceptions and explanations of detail, which would only create confusion in an outline. The history of ancient philosophy in its religious aspect has been strangely neglected. Nothing, as far as we are aware, has been written on the pre-Christian era answering to the clear and elegant essay of Matter on post-Christian philosophy (Histoire de la Philosophie dans ses rapports avec la Religion depuis Vercingétorix, Paris, 1854). There are useful hints in Corve's Vorlesungen über die Christentum (Leips, 1854), and Ackerkamm's Das Christliche im Plato (Hamil, 1855). The treatise of Denis, Histoire des Théories et des idées morales dans l'Antiquité (Paris, 1856), is limited in range and hardly satisfactory. Dollinger's [Hochzeit u. Judenthum] Vorlesungen zur Christl. Christenheits (Regensburg, 1857 [Eng. trans., The Gentle and the Jews, etc. Lond. 1862]) is comprehensive, but covers too large a field. The brief survey in De Presbyterum des trois premiers siècles de l'Eglise Chrétienne (Paris, 1853) [translated under the title The Religions before Christ, Edin. 1862] is much more vigorous, and on the whole just. But no one seems to have apprehended the real character and growth of Greek philosophy so well as Zeller (though with no special attention to its relations to religion) in his history (Die Philosophie der Griechen, 2nd Aufl. [3 Thle in 5 Amt.], 1856-68), which for subtilty and completeness is unrivalled. [See also the literature at the end of the article.]

1. The Philosophical Discipline of the Jews. Philosophy, if we limit the word strictly to describe the free pursuit of knowledge of which truth is the one complete end, is essentially of western growth. In the East the search after wisdom has always been connected with practice; it has remained there, what it was in Greece at first, a part of religion. The history of the Jews offers no exception to this remark: there is no Jewish philosophy properly so called. Yet on the other hand speculation and action meet in truth: and perhaps the most obvious lesson of the Old Testament lies in the gradual construction of a divine philosophy by fact, and not by speculation. The method of Greece was to proceed from life to God; the method of Israel (so to speak) was to proceed from God to life. The axioms of one system are the conclusions of the other. The one led to the successive abandonment of the noblest domains of science which man had claimed originally as his own, till it left bare systems of morality; the other, in the fullness of time, prepared many to welcome the Christ—the Truth.

From what has been said, it follows that the philosophy of the Jews, using the word in a large sense, is to be sought for rather in the progress of the national life than in special books. These, indeed, furnish important illustrations of the growth of speculation, but the history is more in acts than in thoughts. Step by step the idea of the family was raised into that of the people; and the kingdom furnished the basis of those wider promises which included all nations in one kingdom of heaven. The social, the political, the conspicious relations of man were traced out gradually in relation to God.

The philosophy of the Jews is thus essentially a moral philosophy, and as such one of the most direct connections with God. The doctrines of Creation and Providence, of an Infinite Divine Person and of a responsible human will, which elsewhere form the ultimate limits of speculation, are here assumed at the outset. The difficulties which they involve are but rarely noticed. Even when they are canvassed most deeply, a moral answer drawn from the great duties of life is that in which the questioner finds repose. The earlier chapters of Genesis contain an introduction to the direct teaching of the people which follows. Premature and partial developments, kingdoms based on godless might, stand in contrast with the slow foundation of the Divine polity. To distinguish rightly the moral principles which were successively called out in this latter work, would be to write a history of Israel; but the philosophical significance of the great crises through which the people passed, lies upon the surface. The call of Abraham set forth at once the central lesson of faith in the Unseen, on which all others were raised. The father of the nation was first isolated from all natural ties before he received the promise: his heir was the son of his extreme age: his inheritance was to him was "a strange land." The history of the patriarchs brought out into clearer light the sovereignty of God: the younger was preferred before the elder; suffering prepared the way for safety and triumph. God was seen to make a covenant with man, and his action was written in the records of a chosen family. A new era followed. A nation grew up in the presence of Egyptian culture. Persecution united elements which seem otherwise to have been on the point of being absorbed by foreign powers. God revealed Himself now to the people in the wider relations of Lawgiver and Judge. The sordid discipline of the desert familiarized them with his majesty and his mercy. The wisdom of Egypt was belittled to new uses. The promised land was gained by the open working of a divine Sovereign. The outlines of national faith were written in defeat and victory; and the very idea of the divine common passion then claimed a dominant influence. The people required a king. A fixed Temple was substituted for the shifting Tabernacle. Times of disruption and disaster followed; and the voice of the prophets declared the spiritual meaning of the king-
Philosophy and Civic. God. "

For before those one-sided developments of the truth were made, the fundamental ideas of the Divine government found expression in words as well as in life. The Psalms, which, among the other infinite lessons which they convey, give a deep insight into the need of a personal apprehension of truth, everywhere declare the absolute sovereignty of God over the material and moral worlds. The classical scholar cannot fail to be struck with the frequency of natural imagery, and with the close connection which is assumed to exist between man and nature as one vast organism. The element of all the elements by One All-wise Governor, standing out in clear contrast with the delineation of isolated objects, is no less essentially characteristic of Hebrew as distinguished from Greek thought. In the world of action Providence stands over against fate, the universal kingdom against the individual state, the true and the right against the beautiful. Pure speculation may find little scope, but speculation guided by these great laws will never cease to affect, more deeply the intellectual culture of men. Compare especially Ps. viii., xix., xxix., I., lxv., lxviii., lxvi.; lxvi.; xcvii., xcvii., civ., civ., civ., civi., etc. It will be seen that the same character is found in Psalms of every date. For a late and very remarkable development of this philosophy of Nature see the article Book of Experiences, Das B. Herm., iv., xv.

One man above all is distinguished among the Jews as "the wise man." The description which is given of his writings serves as a commentary on the national view of philosophy. "And Solomon's wisdom excelled the wisdom of all the children of the east country and all the wisdom of Egypt. And he spake three thousand proverbs; and his songs were a thousand and five. And he spake of trees, from the cedar that is in Lebanon even unto the hyssop that springeth out of the wall: he spake also of beasts, and of fowl, and of creeping things, and of fishes" (I. K. iv. 30-35). The lesson of practical duty, the full utterance of a large heart, the exuberant bounty of God's creation, this is the sum of wisdom. Yet in fact the very practical aim of this philosophy leads to the revelation of the most sublime truth. Wisdom was gradually felt to be a Person, crowned by God, and holding converse with men (Prov. viii.). She was seen to stand in open charity with "the strange woman," who sought to draw them aside by sensuous attractions; and thus a new step was made towards the central doctrine of Christianity — the Incarnation of the Word.

Two books of the Bible, Job and Ecclesiastes, of which the latter at any rate belongs to the period of the close of the kingdom, approach more nearly than any other to the type of philosophical discussions. But in both the problem is moral and not metaphysical. The one deals with the evils which afflict "the perfect and upright;" the other with the vanity of all the pursuits and pleasures of earth. In the one we are led for an answer to a vision of "the enemy" to whom a partial and temporary power over man is conceded (Job i. 12, 13; in the other to that great future when "God shall bring every work to judgment" (Ecc. xiii. 14). The method of inquiry is in both cases abrupt and irregular. One clue after another is followed out, and at length abandoned; and the final solution is obtained, not by a consecutive process of reason, but by an authoritative utterance, which faith welcomes as the truth, towards which all partial efforts had tended. (Compare Maimonides, Moreh Nevukhim, Moral and Metaphysical Philosophy, first edition.)

The Captivity necessarily exercised a profound influence upon Jewish thought. (Comp. Cyrus, vol. i. p. 527.) The teaching of Persia seems to have been designed to supply important elements in the education of the chosen people. But it did yet more than this. The imagery of Ezekiel (chap. i.) gave an apparent sanction to a new form of mystical speculation. It is uncertain at what date this earliest Kabalah (i. e. Tradition) received a definite form; but there can be no doubt that the two great divisions of which it is composed, "the chariot" (Merwedoth, Ez. i.) and "the Creation" (Bereishith, Gen. i.), found a wide development before the Christian era. The first dealt with the manifestation of God in Himself; the second with his manifestation in Nature: and as the doctrine was handed down orally, it received naturally, both from its extent and form, great additions from foreign sources. On the one side it was open to the Persian doctrine of emanation, on the other to the Jewish doctrine of the Incarnation; and the tradition was deeply impressed by both before it was first committed to writing in the second or eighth century. At present the original sources for the teaching of the Kabalah are the Sopher Jezirah, or Book of Creation, and the Sopher Jezirah, or Book of Splendor. The former of these dates in its present form from the eighth, and the latter from the thirteenth century (Zunz, Gottes Vor. d. Juden, p. 192). Jellinek, Moses ben Schabbag, 1851, traced upon a system of Panteism. In the Book of Creation the Cabalistic ideas are given in their simplest form, and offer some points of comparison with the system of the Pythagoreans. The book begins with an enumeration of the thirty-two ways of wisdom seen in the constitution of the world; and the analysis of this number is supposed to contain the key to the mysteries of nature. The primary division is into 10-4-22. The number 10 represents the ten Sephiroth (figures), which answer to the ideal world; 22, on the other hand, the number of the Hebrew alphabet, answers to the world of objects; the object being related to the idea as a word, formed of letters, to a number.
Twenty-two again is equal to $3 + 7 + 12$; and each of these numbers, which constantly recur in the O. T. Scriptures, is invested with a peculiar meaning. Generally the fundamental conceptions of the book may be thus represented. The ultimate Being is Divine Wisdom (Chos евр, ספיה).

The universe is originally a harmonious thought of Wisdom (Number, ספירה); and the thought is afterwards expressed in letters, which form, as words, the germ of things. Man, with his twofold nature, thus represents in some sense the whole universe. He is bodily the heaven, and his clothes and veil the soul, as the phenomenal world veils the spirit of God. It is impossible to follow out here the details of this system, and its development in Zohar; but it is obvious how great an influence it must have exercised on the interpretation of Scripture. The calculation of the numerical worth of words (comp. Rev. xii. 18; Gestratii, Buxtorf, Lex. Rodh, p. 446), the resolution of words into initial letters of new words (Notariam, Buxtorf, 1339), and the transposition or interchange of letters (Temarit), were used to obtain the inner meaning of the text: and these practices have continued to affect modern exegesis (Lutterbeck, Neut. Lehrbücher, i. 233-254; Reuss, Kabbalah, in Herzog's Enzyklop. ; Joel, Die Relig., Phil. d. Zohar, 1849; Jellinek, as above; Westcott, Introil. to the Gospels, pp. 131-134; Frenck, Lit Kabbale, 1849; Old Testament, B § 1).

The contact of the Jews with Persia thus gave rise to a traditional nationalism. Their contact with Greece was marked by the rise of distinct sects. In the third century B. C. the great doctor Antigonus of Socho fears a Greek name, and popular belief pointed to him as the teacher of Sabace and Boethus; the supposed founders of Jewish rationalism. At any rate, we may date from this time the twofold division of Jewish speculation which corresponds to the chief tendencies of practical philosophy. The Sadducees appear as the supporters of human freedom in its widest scope; the Pharisees of a religious Stoicism. At a later time the cycle of doctrine was completed, when by a natural reaction the Essenes established a mystic Ascesis. The characteristics of these sects are noticed elsewhere. It is enough now to point out the position which they occupy in the history of Judaism (comp. Introil. to Gospels, pp. 60-93). At a later period the Fourth Book of Maccabees (q. v.) is a very interesting example of Jewish moral (Stoic) teaching. The conception of wisdom which appears in the Book of Proverbs was elaborated with greater detail afterwards [Wisdom of Solomon], both in Palestine (Ecclesiasticus) and in Egypt; but the doctrine of the Word is of greater speculative interest. Both doctrines, indeed, sprang from the same cause, and indicate the desire to find some mediating power between God and the world, and to remove the direct appearance and action of God from a material sphere. The personification of Wisdom represents the Hermes of ancient Greek philosophy, of whom the manuscripts have preserved a song or invocation to God: the Logos, in the double sense of Reason (Λόγος σαρκιζομένος) and Word (Λόγος προφορικός), both in relation to God and in relation to the universe. The first use of the term Word (Μόρφα) based upon the common formula of the prophets, is in the Targum of Onkelos (first cent. B. C.), in which "the Word of God" is commonly substituted for God in his immediate, personal words with man (Introil. to Gospels, p. 137); and it is probable that round this traditional rendering a fuller doctrine grew up. But there is a clear difference between the idea of the Word then prevalent in Palestine and that current at Alexandria. In Palestine the Word appears as the outward mediator between God and man, like the Angel of the Covenant: at Alexandria it appears as the spiritual connection which opens the way to revelation. The preface to St. John's Gospel includes the element of truth in both. In the Greek apocyphal books there is no mention of the Word (see Isid. v. 15). For the Alexandrine teaching it is necessary to look alone to Philo (dir. b. c. 20—A. D. 50); and the ambiguity in the meaning of the Greek term, which has been already noticed, produces the greatest confusion in his treatment of the subject. In Philo language dominers over thought. He has no one clear and consistent view of the Logos. At times he assigns to it divine attributes and personal action; and then again he affirms decidedly the absolute indivisibility of the divine nature. The tendency of his teaching is to lead to the conception of a two-fold personality in the Godhead, though he shrinks from the recognition of such a doctrine (De Mon. arch., § 5; De Sonam, § 37; Quod. det. pot. hiem., § 21; De Sonam, § 28, &c.). Above all, his idea of the Logos is constructed from such nice hopes, and was rather the philosophic substitute for them. (Introil. to Gospels, pp. 138-141; Hübner, J. al.-Alex. Relig.-Philos. 1834; Gfrorer, Philo, etc. 1815; Dörner, Die Lehre v. d. Person Christi, i. 23 ff., Lücke, Comment. i. 207 [272, 30 Auf. ], who gives an account of the earlier literature.) [World, The, Amer. ed.]

II. The Patristic Recognition of the Pro- peductive Office of Greek Philosophy.

The divine discipline of the Jews was, as has been seen, in nature essentially moral. The lessons which it was designed to teach were embodied in the family and the nation. Yet this was not in itself a complete discipline of our nature. The reason, no less than the will and the affections, had an office to discharge in preparing man for the Incarnation. The process and the issue in the two cases were widely different, but they were in some sense complementary. Even in time this relation holds good. The divine kingdom of the Jews was just overthrown when free speculation arose in theIonian colonies of Asia. The teaching of the last prophet nearly synchronized with the death of Socrates. All other differences between the discipline of reason and that of revelation are implicitly included in their fundamental difference of method. In the one, man boldly aspired at once to God, in the other, God disclosed Himself gradually to man. Philosophy failed as a religious teacher practically (Rom. i. 21, 22), but it bore noble witness to an inward light (Rom. ii. 14, 15). It hid open in- stinctive wants which it could not satisfy. It cleared away error, when it could not find truth.
PHILOSOPHY

It availed the foremost minds of a nation, when it left the mass without hope. In its purest and grandest forms it was "a schoolmaster to bring men to Christ." ( Clem. Alex. Strom. i. § 28).

This function of ancient philosophy is distinctly recognized by many of the greatest of the fathers. Thus Justin Martyr, in the sixth century of our era, on "the Seminal Word" finds a clear and systematic expression in Clement of Alexandria. (Comp. Iren. lo, in. 457-439.) "Every race of men partook in the Word. And they who lived with the Word were Christians, even if they were held to be goddess-fathers (Theou, as for example, among the Greeks, Socrates and Heracleides, and those like them." (Just. Mart. Ap. i. 46; comp. Ap. i. 5, 8; and ii. 10, 13.) "Philosophy," says Clement, "before the coming of the Lord, was necessary to Greeks for righteousness; and now it proves useful for godliness, being in some sort a preliminary discipline (προσδοξία τοιοῦτα) for those who reap the fruits of the faith through demonstration. . . . Perhaps we may not return to the Greeks with this special object (προσωπίναιτες), for it brought (προσωπίσαγατες) the Greek nation to Christ, as the Law brought the Hebrews." ( Clem. Alex. Strom. i. § 28; comp. § 9, § 43, and § 16, § 80). In this sense he does not scruple to say that "Philosophy was given as a peculiar testament (διαδίδακτος) to the Greeks, as forming the basis of the Christian philosophy." (Strom. vi. 2, § 67; comp. § 5, § 41). Origine, himself a pupil of Ammonius Saccas, speaks with less precision as to the educational power of philosophy, but his whole works bear witness to its influence. The truths which philosophers taught, he says, referring to the words of St. Paul, were God manifested to these, and all things which have been newly said ("c. Cel. xi. § 9; Phil. p. 15). Augustine, while depreciating the claims of the great Gentile teachers, allows that "some of them made great discoveries, so far as they received help from Heaven, while they erred as far as they were hindered by human frailty." (Aug. De Cit. ii. 7; comp. De Doct. Chr. ii. 18). They had, as he elsewhere says, a distant vision of the truth, and learnt from the teaching of nature what prophets learnt from the Spirit (Strom. in. viii. 2, § 58).

But while many thus recognized in philosophy the free witness of the Word speaking among men, the same writers in other places sought to explain the partial harmony of philosophy and revelation by an original connection of the two. This attempt, which in the light of a clearer criticism is seen to be essentially fruitless and even suicidal, was at least more plausible in the first centuries. A number of writers were then current bearing the names of the Sisyl or Hystaspes, which were obviously based on the O. T. Scriptures, and as long as they were received as genuine it was impossible to doubt that Jewish doctrines were spread in the West before the rise of philosophy. And on the other hand, when the Fathers ridicule with the bitterest scorn the contradictions and errors of Jewish science, it is remembered that they spoke often fresh from a conflict with degenerate professors of systems which had long lost all real life. Some, indeed, there were, chiefly among the nations, who consistently inveighed against philosophy. But even Tertullian, who is among its severest adversaries, allows that at times the philosophers hit upon truth by a happy chance of blind good fortune, and yet more by that "general feeling with which God was pleased to endow the soul" (Tert. De Ap. c. 2). The use which was made of heathen speculation by heretical writers was one great cause of its disparagement by their Catholic antagonists. Irenaeus endeavors to reduce the influence of the Platonic system to a dilemma: either the philosophers with whom they argued knew the truth or they did not; if they did, the incarnation was superfluous; if they did not, whence comes the agreement of the true and the false? (Adv. Her. ii. 14, 7). Hippolytus follows out the connection of different sects with earlier teachers in elaborate detail. Tertullian, with characteristic energy, declares that "Philosophy furnishes the arms and the subjects of heresy. What (he asks) has Athens in common with Jerusalem? The Academy with the Church? heretics with Christians? Our training is from the Porch of Solomon. . . . Let those look to it who bring forward a Stoic, a Platonist, a dialectic Christianity. We have no need of curious inquiries into the nature of the coming of Christ Jesus, nor of investigation after the Gospel." (Tert. De Persec. Her. c. 7).

This variety of judgment in the heat of controversy was inevitable. The full importance of the history of ancient philosophy was then first seen when all rivalry was over, and it became possible to contemplate it as a whole, animated by a great law, often trembling on the verge of Truth, and sometimes by a "bold venture" claiming the heritage of faith. Yet even now the relations of the "two old covenants" — Philosophy and the Hebrew Scriptures — to use the language of Clement — have been traced only imperfectly. What has been done may encourage labor, but it does not supersede it. In the perversities of eastern churches Pythagoras and Plato are pictured among those who prepared the way for Christianity (Stanley, p. 41); but in the West, Sibyls and not philosophers are the chosen representatives of the divine element in Gentile teaching.

III. The Development of Greek Philosophy.

The complete fitness of Greek philosophy to perform this providential office for Christianity, as an exhaustive effort of reason to solve the great problems of being, must be apparent after a detailed study of its progress and consummation; and even the simplest outline of its history cannot fail to preserve the leading traits of the natural (or even necessary) law by which its development was governed.

The various attempts which have been made to drive western philosophy from eastern sources have signally failed. The external evidence in favor of this opinion is wholly insufficient to establish it (Ritter, Gesch. d. Phil. i. 150, &c.; Thirlwall, Hist. of Gr. ii. 130; Zeller, Gesch. d. Phil. d. Griechen, i. 18–34; Max Muller, On Language, 84 note), and on internal grounds it is most improbable. It is true that in some degree the character of Greek speculation may have been influenced, at least in its earliest stages, by religious ideas which were originally introduced from the East; but this indirect influence does not affect the real originality of the great Greek teachers. The spirit of pure philosophy is (as has been already seen) wholly alien from eastern thought; and it was comparatively late when even a Greek venturist to separate
Thus "philosophy from religion. But in Greece the separation, when it was once effected, remained essentially complete. The opinions of the ancient philosophers might or might not be rendered untenable or reconcileable with the popular faith; but philosophy and faith were independent. The very value of Greek teaching lies in the fact that it was, as far as is possible, a result of simple reason, or, if it asserts its prerogative, the distinction is sharply marked. In this we have a record of the power and weakness of the human mind written at once on the grandest scale. It is the task of modern educators.

Of the various classifications of the Greek schools which have been proposed, the simplest and most useful seems to be that which divides the history of philosophy into three great periods, the first reaching to the era of the Sophists, the next to the death of Aristotle, the third to the Christian era.

In the first period the world objectively is the great centre of inquiry; in the second, the "ideas" of things, truth, and being; in the third, the chief interest of philosophy falls back upon the practical conduct of life. Successive systems overlap each other, both in time and subjects of speculation, but broadly the sequence which has been indicated will hold good (Zeller, Die Philosophie der Griechen, i. 111, &c.). After the Christian era philosophy ceased to have any true vitality in Greece; but it undertook fresh efforts to meet the changed conditions of life at Alexandria and Rome. At Alexandria Platonism was vivified by the spirit of oriental mysticism, and afterwards of Christianity; at Rome Stoicism was united with the vigorous virtues of active life. Each of these great divisions must be passed in rapid review.

1. The pre-Socratic Schools. - The first Greek philosophy was little more than an attempt to follow out in thought the mythic cosmogonies of earlier poets. Gradually the depth and variety of the problems included in the idea of a cosmogony became apparent, and, after each wheel had been followed out, the period ended in the negative teaching of the Sophists. The questions of creation, of the immediate relation of mind and matter, were pronounced in fact, if not in word, insoluble, and philosophy led into a new sphere of inquiry.

What is the one permanent element which bears the changing forms of things? this was the primary inquiry to which the Ionic school endeavored to find an answer. Thales (cir. B.C. 610-625), following, as it seems, the genealogy of Hesiod, pointed to moisture (water) as the one source and supporter of life. Anaximenes (cir. B.C. 528-458) substituted air for water, as the more subtle and all-pervading element; and equalling Thales he neglected all consideration of the force which might be supposed to modify the one primal substance. At a much later date (cir. B.C. 450) Diogenes of Apollonia, to meet this difficulty, represented this elementary "air" as endowed with intelligence (σοφία), but even he makes no distinction between the material and the intelligent. This failure to rid the changed conditions (cir. B.C. 460-357), which stands in close connection with this form of Ionic teaching, offered another and more plausible solution. The motion of his atoms included the action of force, but he wholly omitted to account for its source. Meanwhile another mode of speculation had arisen in the same school.

In place of one definite element Anaximander (cir. B.C. 610-547) suggested the unlimited (τὸ ἄφθαρτόν τὸ ὑπὲρ) as the adequate origin of all special existences. And somewhat more than a century later Anaxagoras summed up the result of such a speculation as the "all things were together; then animal (νάτος) came most distantly of all from order" (Diog. Laert. ii. 6). Thus we are left face to face with an ultimate dualism.

The Eleatic school started from an opposite point of view. Thales saw moisture in material things, and pronounced this to be their fundamental principle: Xenophanes (cir. B.C. 550-450) looked up to the whole heaven and said that this was the One (the One). Zeno then followed logically and distinctly. "Yet he in order" (Thirlwall, Hist. of Gr. ii. 130). That which, according to Xenophanes, must be one, eternal, infinite, immovable, unchangeable, Parmenides of Elea (B.C. 500) substituted abstract "being" for "God" in the system of Xenophanes, and distinguished with precision the functions of sense and reason. Sense teaches us of "the many," the false (phenomena): Reason of the one," the true (the absolute). Zeno of Elea (cir. B.C. 450) developed with logical inflexibility the contradictions involved in our perceptions of things (in the idea of motion, for instance), and thus formally prepared the way for skepticism. If the one above is, the phenomenal world is an illusion. The sublime aspiration of the Egyptians, the Xenophanes, was substituted infinitely to its consequences, ended in blank negation.

The teaching of Heraclitus (B.C. 500) offers a complete contrast to that of the Eleatics, and stands far in advance of the earlier Ionic school, with which he is historically connected. So far from contrasting the extant and the phenomenal, he boldly identified being with change. "There ever was, and is, and shall be, an ever-revolving fire, unceasingly kindled and extinguished in due measure." (ἄτομον μέτρα καὶ ἀποστειβομένου μέτρα, Clem. Alex. Strom. v. 14, § 105). Rest and continuance is death. That which is is the instantaneous balance of contending powers (Diog. Laert. i. 7. ἐάν ἄτομα ἐναντιοτροποῦσα ἴσως, ἴσως τό ὅτα). Creation is the play of the Creator. Everywhere, as far as his opinions can be grasped, Heraclitus linked all subordinately "together" into the "logoi" of the One. Heraclitus is the leaves "Εἶτα (ἐγκαταστάσεις) as the supreme creator (Stob. Eel. i. p. 50, ap. Kitter & Preller, § 42). The cycle of life and death run on by its law. It may have been by a natural reaction that from these wider speculations he turned his thoughts inwards. "I investigated myself," he says, with conscious pride (Plut. anti. Col. 1118, c.); and in this respect he foreshadows the teaching of Socrates, as Zeno did that of the Sophists.

The philosophy of Pythagoras (cir. B.C. 840-510) is subordinate in interest to his social and political theories, though it supplies a link in the course of speculation; others had labored to trace a unity in the world in the presence of one underlying element or in the idea of a whole: he sought to combine the separate harmony of parts with total monism. The monumental unity of the finite and the infinite; and in the relations of number there is a perfect symmetry, as all spring out of the fundamental unit. Thus numbers seemed to Pythagoras to be not only "patterns" of things (τὰ ψηφιὰ διαρκότερα), but causes of their being (τὰ ψηφιὰ οὐσία). How he connected numbers with concrete being it is impossible to determine; but it may not be wholly fanciful to see in the doctrine of transmigration of souls an attempt to trace in the success...
the first cycle of philosophy was thus completed. All the great primary problems of thought had been stated, and typical answers rendered. The relation of spirit and matter was still unsolved. Speculation issued in dualism (Anaxagoras), materialism (Democritus, or pantheism (Xenophanes). On one side reason was the sole criterion of truth (Parmenides); on the other, experience (Heraclitus). As yet there was no rest, and the Sophists prepared the way for a new method.

Whatever may be the moral estimate which is formed of the Sophists, there can be little doubt as to the importance of their teaching as preparatory to that of Socrates. All attempts to arrive at certainty by a study of the world had failed; might it not seem, then, that truth is subjective? "Man is the measure of all things." Sensations are the only true truths. Man has not held good universally? The conclusion was applied to morals and politics with tears salt skill. The belief in absolute truth and right was well-nigh banished; but meanwhile the Sophists were perfecting the instrument which was to be turned against them. Language, in their hands, acquired a precision unknown before, when words assumed the place of things. Plato might ridicule the pedantry of the Sophists, but they carried a rich harvest from it.

2. The Socratic Schools. — In the second period of Greek philosophy the scene and subject were both changed. Athens became the centre of speculations which had hitherto chiefly found a home among the more mixed populations of the colonies. And at the same time inquiry was turned from the outward world to the inward, from theories of the origin and relation of things to theories of our knowledge of them. A philosophy of ideas, using the term in its widest sense, succeeded a philosophy of nature. In three generations Greek speculation reached its greatest glory in the teaching of Socrates, Plato, and Aristotle. When the sovereignty of Greece ceased, all higher philosophy ceased with it, and the handiest word of the old distinction, which showed, men's thoughts were chiefly directed to questions of personal duty. The famous sentence in which Aristotle (Met. M. 4) characterizes the teaching of Socrates (M. C. 408-329) places his scientific position in the finest light. There are two things, he says, which we may rightly attribute to Socrates, indicative reasoning, and general definition (æoës 'ipnav
ra). He who would gain a knowledge of the elementary knowledge must be first able to discover the permanent element which underlies the changing forms of appearances and the varieties of opinion; by the second he fixed the truth which he had thus gained. But, besides this, Socrates rendered another service to truth. He changed not only the method but also the subject of philosophy (Met. Met. c. 4, 1070 a). This he did in his investigations in the primary place which had hitherto been held by Physics. The great aim of his induction was to establish the sovereignty of Virtue; and before entering on other speculations he determined to play the Belieber maxim and "know himself" (Phad. 228). It was necessary consequence of a first effort in this direction that Socrates regarded all the results which he derived as like in kind. Knowledge (inæpria) was equa absolutely and authoritative, whether it referred to the laws of intellectual operations or to questions of morality. A conclusion in geometry and a conclusion on the other were set forth as true in the same sense. Thus we have only another name for ignorance (Xen. Mem. ii. 9, 4; Arist. Eth. Ethik. b. 5).

Every one was supposed to have within him a faculty absolutely leading to right action, just as the mind necessarily decides rightly as to relations of space and number, when each step in the proposition is clearly stated. Socrates practically neglected the determinative power of the will. His great glory was, however, clearly connected with this fundamental error in his system. He affirmed the existence of a universal law of right and wrong. He connected philosophy with action, both in detail and in general. On the one side he upheld the supremacy of Conscience, on the other the working of Providence. Not the least fruitful characteristic of his teaching was what may be called its desultory character. He formed no complete system. He wrote nothing. He attracted and impressed his hearers by his many-sired nature. He helped others to give birth to thoughts, to use his favourite image, but he was barren himself (Plat. Theaet. p. 150). As a result of this, the most conflicting opinions were maintained by some of his most faithful followers, who carried out isolated fragments of his teaching to extreme conclusions. Some adopted his method (Euclides, &c. c. iv. 49; the Megarenses); others his subject. Of the latter, one section, following out his proposition of the identity of self-command (çiwpóv) with virtue, professed an utter disregard of everything material (Antisthenes, &c. b. 366, the Cynics), while the other (Aristippus, &c. c. iv. 366, the Cyreniæs, inventing the maxim that virtue is necessarily accompanied by pleasure, took immediate pleasure as the rule of action.

These "minor Socratic schools" were, however, premature and imperfect developments. The truths which they distorted were embodied at a later time in more reasonable forms. Plato alone (b. c. 430-347), by the breadth and nobleness of his teaching, was the true successor of Socrates; with fuller detail and greater elaborateness of parts, his system was elaborated. The ancient philosophers thought that virtue is necessarily accompanied by pleasure, took immediate pleasure as the rule of action. Thus it is impossible to construct a consistent Platonic system, though many Platonic doctrines are sufficiently marked. Plato, indeed, possessed two commanding powers, which, though apparently incompatible, are in the highest sense complementary: a matchless destructive dialectic, and a creative imagination. By the first he refuted the great fallacies of the Sophists; in the uncertainty of the knowledge and right, carrying out in this the attacks of Socrates; by the other he endeavored to bridge over the interval between appearance and reality, and gain an approach to the eternal. His famous doctrines of ideas and recollection (antæ-meriç) are a solution by imagination of a logical difficulty. Socrates had shown the existence of general notions which Plato felt constrained to attribute to them a substantive existence (Arist. Met. M. 4). A glorious vision gave completeness to his view. The unbodied spirits were exhibited in immediate presence of the "ideas" of things (Phad. p. 247); the law of their embodiment was sensibly portrayed; and the more or less vivid remembrance of supernatural realities in this life
PHILOSOPHY

was traced to antecedent facts. All men were thus supposed to have been face to face with Truth: the subject of teaching was to bring back impressions latent but uneffaced.

The “myths” of Plato, to one of the most famous of which reference has just been made, play a most important part in his system. They answer in the philosopher to faith in the Christian. In dealing with immortality and judgment he leaves the way of reason, and ventures, as he says, on a road of faith, beyond the sphere of science, in which the Pythagoreans (Phed. 85 D; Gorg. 523 A.), “the peril and the prize are noble and the hope is great” (Phed. 114, C, D). Such tales, he admits, may seem puerile and ridiculous; and if there were other surer and clearer means of gaining the desired end, the judgment would be just (Gorg. 527 A). But, as it is, thus only can he connect the seen and the unseen. The myths, then, mark the limit of his dialectics. They are not merely a poetical picture of truth already gained, or a popular illustration of his teaching, but real efforts to penetrate beyond the depths of argument. They show that his method was not consensuaneous with his instinctive desires; and point out in intelligible outlines the subjects on which man looks for revelation. Such are the relations of the human mind with truth (Phen. pp. 194-249); the eternity and immortality of the soul (Mo, pp. 81-83; Phae. ir. pp. 110-112; Tim. p. 41); the state of future retribution (Gorg. pp. 523-525; Rep. x. 614-616); the revolutions of the world (Pol. p. 299). Compare also Sympos. pp. 189-191, 233-235; Zeller, Philos. d. Griech. pp. 361-363, who gives the literature of the subject.

The great difference between Plato and Aristotle (b. 344-322) lies in the use which Plato thus made of imagination as the exponent of instinct. The dialectic of Plato is not inferior to that of Aristotle, and Aristotle exhibits traces of poetic power not unworthy of Plato; but Aristotle never allows imagination to influence his final decision. He elaborated a perfect method, and he used it with perfect fairness. His writings, if any, contain the highest utterance of pure reason. Looking back on all the earlier efforts of philosophy, he pronounced a calm and final judgment. For him many of the conclusions which others had maintained were valueless, because he showed that they rested on feeling, and not on argument. This stern severity of logic gives an inescapable pathos to those passages in which he touches on the highest hopes of men; and perhaps there is no more truly affecting chapter in ancient literature than that in which he states in a few unimpassioned sentences the issue of his inquiry into the immortality of the soul. Part of it may be immortal, but that part is personal (De An. iii. 5). This was the sentence of reason, and he gives expression to it without a word of protest, and yet as one who knew the extent of the sacrifice which it involved. The conclusions of his philosophy were, the epitaph of free speculation. Laws of observation and argument, rules of action, principles of government remain, but there is no hope beyond the grave.

It follows necessarily that the Platonic doctrine of ideas was emphatically rejected by Aristotle, who gave, however, the final development to the material conception of Socrates. With Socrates “Ideas” (general definitions) were mere abstractions; with Plato they had an absolute existence; with Aristotle they had no existence separate from things in which they were realized, though in form (Soph.), which answers to the Platonic idea, was held to be the essence of the thing itself (comp. Zeller, Philos. d. Griech. i. 119, 120).

There is one feature common in essence to the systems of Plato and Aristotle which has not yet been noticed. In both, Ethics is a part of Politics. The citizen is prior to the man. In Plato this doctrine finds its most extravagant development in the Republic, but the doctrine itself in his teaching, was directly opposed to it (e. g. Gorg. p. 527 D). This practical inconsequence was due, it may be supposed, to the condition of Athens at the time, for the idea was in complete harmony with the national feeling; and, in fact, the absolute subordination of the individual to the body includes one of the chief lessons of the ancient world. In Aristotle the “political” character of man is defined with greater precision, and brought within narrower limits. The breaking-up of the small Greek states had prepared the way for more comprehensive views of human fellowship, without destroying the fundamental truth of the necessity of social union for perfect life. But in the next generation this was lost. The wars of the Succession obliterated the training of society, and philosophy was content with aiming at individual happiness.

The coming change was indicated by the rise of a school of skeptics. The skepticism of the Sophists marked the close of the first period, and in like manner the skepticism of the Pyrrhonists marks the close of the second (Stilpno, cit. b. c. 290; Pyrrhon, cit. b. c. 290). But the Pyrrhonists rendered no positive service to the cause of philosophy, as the Sophists did by the refinement of language. Their immediate influence was limited in its range, and it is only as a symptom that the rise of the school is important. But in this respect it foreshows the character of after-philosophy by denying the foundation of all higher speculations. Thus all interest was turned to questions of practical morality. Hitherto morality had been based as a science upon mental analysis, but by the Pyrrhonists it was made subservient to law and custom. Immediate experience was held to be the rule of life (comp. Ritter and Predler, § 350).

3. The post-Socratic Schools. — After Aristotle, philosophy, as has been already noticed, took a new direction. The Socratic schools were, as has been shown, connected by a common pursuit of the permanent element which underlies phenomena. Socrates placed Virtue, truth in action, in a knowledge of the ideas of things. Plato went further, and maintained that these ideas are alone truly existent. Aristotle, though differing in terms, yet only followed in the same direction, when he attributed to Form; not an independent existence, but a fashioning, vivifying power in all individual objects. But from this point speculation took a mainly personal direction. Philosophy, in the strict sense of the word, ceased to exist. This was due both to the circumstances of the time and to the exhaustion consequent on the failure of the Socratic method to solve the deep mysteries of being. Aristotle had, indeed, laid the wide foundations of an inductive system of physics, but few were inclined to continue his work. The physical theories which were brought forward were merely adaptations from earlier philosophers.

In dealing with moral questions two opposite systems are possible, and have found advocates in
all ages. On the one side it may be said that the character of actions is to be judged by their results; on the other, that it is to be sought only in the intentions. Pleads the test of right in one case; an assumed, or discovered, law of our nature in the other. If the world were perfect and the balance of human faculties undisturbed, it is evident that both systems would give identical results. As it is, there is a tendency to error on each side, which is clearly seen in the rival schools of the Epicureans and Stoics, who practically avoided the sufferings of the mass of educated men in the centuries before and after the Christian era.

Epicureans (ib. c. 552-270) defined the object of philosophy to be the attainment of a happy life. The pursuit of truth for its own sake he regarded as superfluous. He rejected dialectics as a useless study, and accepted the senses, in the widest acceptation of the term [Epictetus, i. 570], as the criterion of truth. Physics he subordinated entirely to ethics (Ic. de Fin. i. 7). But he differed widely from the Cyrenics in his view of happiness. The happiness at which the wise man aims is to be found, he said, not in momentary gratification, but in lifelong pleasure. It does not consist necessarily in excitement or motion, but often in absolute tranquillity (αρροφηγόι). "The wise man is happy even on the rack" (Lucr. 124, line 118), for "virtue alone is inseparable from pleasure" (ib. 138). To live happily and to live wisely, modestly, and justly, are convertible phrases (ib. 140). But it followed as a corollary from his view of happiness, that the gods, who were assumed to be supremely happy and eternal, were absolutely free from the distractions and emotions consequent on any care for the world or man (ib. 132; comp. Lucr. ii. 645-647). All things were supposed to come into being by chance, and so pass away; and the study of Nature was chiefly useful as dispelling the superstitions fears of the Gods and death by which the multitude are tormented. It is obvious how such teaching would degenerate in practice. The individual was left master of his own life, free from regard to any higher law than a refined self-love.

While Epicurus asserted in this manner the claims of one part of man's nature in the conduct of life, 

\[
\text{Xένος} \text{Ωίτίν} \ \text{εἰς} \text{καὶ} \ \text{καὶ} \ \text{φιλοσοφία} \ \text{καὶ} \ \text{φιλε},
\]

with equal portunity, advocated a purely spiritual (intellectual) morality. The opposition between the two was complete. The infinite, chance-formed worlds of the one stand over against the one harmonious world of the other. On the one side are Gods, regardless of material things, on the other a beings permitting and vivifying all creation. This difference necessarily found its chief expression in ethics. For when the Stoics taught that there were only two principles of things, Matter (αὐτὸς ἀτομικός), and God, Fate, Reason — for the names were many by which it was fashionable and quickened (αὐτὸς θεός) — it followed that the active principle in man is of Divine origin, and that his duty is to live conformably to nature (τὰ ἑαυτοῦ κοινωνίας συνεργαζόμενοι ἔθελος) (Cic.). By "Nature" some understood the nature of man, others the nature of the universe; but both agreed in regarding it as a general law of the whole, and not particular passions or impulses. Good, therefore, was but one. All external things were indifferent. Reason was the absolute sovereign of man. Thus the doctrine of the Stoics, like that of Epicurus, practically left man to himself. But it was time this assertion of individual independence and breaking down of local connections performed an important work in preparation for Christianity. It was for the Gentile world an influence corresponding to the Dispersion for the Jews. Men, as men, owned their fellowship as they had not done before. Isolating superstitions were shattered by the arguments of the Epicureans. The unity of the human conscience was vigorously affirmed by the Stoics (comp. Auleius, iv. 4, 34, with Gataker's notes).

Meanwhile in the New Academy Platonism degenerated into skepticism. Epicurus found an authoritative rule in the senses. The Stoics took refuge in what seems to answer to the modern doctrine of a "common sense," and maintained that the senses give a direct knowledge of the object. Carneades (ib. c. 213-129) contested these views, and showed that sensation cannot be proved to declare the real nature, but only some of the effects, of things. Thus the sight philosophical basis of the latter schools was undermined. Skepticism remained as the last issue of speculation; and, if we may believe the declaration of Seneca (Quaest. Nat. vili. 52), skepticisms itself soon ceased to be taught as a system. The great teachers had sought rest, and in the end they found unrest. No science of life could be established. The reason of the few failed to create an esoteric rule of virtue and happiness. For in this they all agreed, that the blessings of philosophy were not for the mass. A "Gospel preached to the poor" was as yet unknown.

But though the Greek philosophers fell short of their highest aims, it needs no words to show the work which they did as pioneers of a universal Church. They revealed the wants and the instincts of men with a clearness and vigor elsewhere maintainable, for their sight was dazzled by no reflections from a purer faith. Step by step great questions were proposed — Fate, Providence — Con science, Law — the State, the Man — and answers were given, which are the more instructive because they are generally one-sided. The discussions, which were primarily restricted to a few, in time influenced the opinions of the many. The teacher who spoke of "an unknown God" had an audience who could understand him, not at Athens only or Rome, but throughout the civilized world. The complete course of philosophy was run before the Christian era, but there were yet two mixed systems afterwards which offered some novel features. At Alexandria Platonism was united with various elements of eastern speculation, and for several centuries exercised an important influence on Christian doctrine. At Rome Stoicism was civilized by the spirit of the old republic, and exhibited the extreme western type of philosophy. Of the first
nothing can be said here. It arose only when Christianity was a recognized spiritual power, and was influenced both positively and negatively by the Gospel. The same remark applies to the efforts to quicken anew the forms of Panegyric, which found their climax in the reign of Julian. These have no independent value as an expression of original thought: but the Roman Stoicism calls for brief notice from its supposed connection with \textit{Christianity} \textit{(Seneca, \A, \textit{iii. 63; Epicurean \textit{et al.}} \textit{c.}). \textit{M. Aurelius Antoninus} 121-180}.

The belief in this connection has found a singular expression in the apocryphal correspondence of St. Paul and Seneca, which was widely received in the early Church (\textit{Jerome, De Vir. ill. \textit{xii.}}). And lately a distinguished writer (\textit{Mill, \textit{On Liberty}, p. 58, quoted by Stanley, \textit{Eastern Ch. Lect. VI.}, apparently with approbation}) has speculated on the \textit{"tragic fact"} that Constantine, and not Marcus Aurelius, was the first Christian emperor. The superficial coincidences of Stoicism with the N. T. are certainly numerous. Coincidence of thought, and even of language, might easily be multiplied (\textit{Gataker, Antoinianus, Pref. pp. xi. etc.}), and in considering these it is impossible not to remember that Semitic thought and phraseology must have exercised great influence on Stoicism (\textit{Gataker, \textit{Pref. p. xvii.}}). But beneath this external resemblance of Stoicism to Christianity, the later Stoics were fundamentally opposed to it. For good and for evil they were the Pharisees of the Gentile world. Their highest aspirations are mixed with the thanksgivings \textit{"that they were not as other men are"} (\textit{comp. Anton. i. 1}). Their worship was a sublime egoism. \textit{The conduct of life was regarded as an art, guided in individual actions by a conscious reference to reason (\textit{Anton. iv. 2, \textit{\&c.}}, and not a spontaneous process arising naturally out of one vital principle. The wise man, \textit{"wrapped in himself"} (\textit{vii. 28}), was supposed to look with perfect indifference on the changes of time (\textit{iv. 49}); and yet beneath this show of independence he was a prey to a hopeless sadness. In words he appealed to the great law of fate which rapidly sweeps all things into oblivion as a source of consolation (\textit{iv. 2, 14}, \textit{\&c.}); but there is no confidence in any future retribution. In a certain sense the elements of which we are composed are eternal (\textit{v. 13}), for they are incorporated in other parts of the universe, but we shall cease to exist (\textit{iv. 14, 21}, \textit{\&c.}). Not only is there no recognition of communion between an immortal man and a personal God, but the ideal is excluded. Man is but an atom in a vast universe, and his actions and sufferings are measured solely by their relation to the whole (\textit{Anton. x. 5, 6, 20, \textit{xii. 26, vi. 45, v. 22, \textit{\&c.}}). God is
a close connection with earlier tendencies at Ephes-
sus (Acts xix. 19), and with the traditional ac-
counts of Simon Magnus (comp. Acts viii. 9), whose
working on the early church, however obscure, was
unquestionably most important. These antago-
nistic and yet complementary forms of heresy found
a wide development in later times: but it is
remarkable that no trace of dualism, of the distinc-
tion of the Creator and the Redeemer, the
Domination and the true God, which had so
essential a tenet of the Gnostic schools, occurs in
the N. T. (comp. Thiersch, Vorzeh zur Herst.
d. hist. Stumpf, etc., 231-301).

The writings of the sub-apocalyptic age, with
the exception of the famous anecdotce of Justin Martyr
(Brad. 2-4), throw little light upon the relations of
Christianity and philosophy. The heretical
systems again are too obscure and complicated to
illustrate more than the general admixture of
foreign (especially eastern) tenets with the apostolic
teaching. One book, however, has been preserved
in various shapes, which, though still unaccountably
neglected in church histories, contains a vivid de-
finition of the speculative struggle which Chris-
tianity had to maintain with Judaism and Heathen-
ism. The Clementine Homilies (ed. Dressel,
1834) and Recognitions (ed. Gersdorff, 1838) are a
kind of Philosophy of Religion, and in subtlety and
richness of thought yield to no early Christian writings.
The picture which the supposed author
draws of his early religious doubts is evidently
taken from life ( Clem. Recogn. i. 1-3; Neander,
Ch. Hist. i. 43, E. T.); and in the discussions
which follow there are clear traces of western as
well as eastern philosophy (Uhlhorn, Die Rom.

At the close of the second century, when the
Church of Alexandria came into marked intellectu-
 nal preeminence, the mutual influence of Chris-
tianity and Neo-Platonism opened a new field of
speculation, or rather the two systems were pre-
 sented in forms designed to meet the acknowledged
wants of the time. According to the commonly
received report, Origen was the scholar of Am-
monius Saccas, who first gave consistency to the
later Platonism; and for a long time he was the
contemporary ofPlotinus (A. D. 265-270), who was
its noblest exponent. Neo-Platonism was, in fact,
an attempt to seize the spirit of Christianity apart
from its historic basis and human elements. The
separation between the two was absolute: and yet
the splendor of the one-sided spirituality of the
Neo-Platonists attracted in some cases the admira-
tion of the Christian Fathers (Basil, Theodoret),
and the wide circulation of the writings of the
pseudo-Dionysius the Areopagite served to pro-
geate many of their doctrines under an orthodox
name among the schoolmen and mystics of the
Middle Ages (Vogt, Neo-Platonismus u. Christen-
heit, 1836; Herzog, Ewkgloga. s. v. Neo-Platonis-
mus). The want which the Alexandrine Fathers
endeavored to satisfy is in a great measure the want
of our own time. If Christianity be truth, it
must have points of special connection with all
nations and all periods. The difference of charac-
ter in the constituent writings of the N. T. are
evidently typical, and present the gospel in a form
(6. technical language may be used) as ethical,
now logical, now mystical. The varieties of aspect
thus indicated combine to give the idea of a har-
monious whole. Clement rightly maintained that
there is a "gnosis" in Christianity distinct from
the errors of Gnosticism. The latter was a pre-
mediated attempt to connect the Gospel with earlier
systems; the former a result of conflict grounded
on faith (Müller, Patrologie, 424, &c.). Christian
philosophy may be in one sense a contradiction in
terms, for Christianity confessedly derives its first
principles from revelation, and not from simple
reason; but there is no less a true philosophy of
Christianity, which aims to show how completely
these, by their form, their substance, and their
consequences, meet the instincts and aspirations of
all ages. The exposition of such a philosophy
would be the work of a modern Origen.
B. F. W.

It may be worth while to mention some of the more recent works which illustrate points
 touched upon in the preceding article. See J. P.
Brecher, Perspectiva-Lex a der Helvetic, Strassb.

A.

PHINEHAS (פִּינֶהָס) [G. Φινέας]: [1 Esdr. viii. 2.
Yat. Φίνεας]: 1. Mace, Alex. Φίνεας; Phinehas).
2. The son of Eleazar son of Aaron, the great hero
of the Jewish priesthood (1 Esdr. v. 5, vii. 29, 29;
2 Esdr. i. 26; Exclus. xiv. 23; 1 Mace. ii. 25).
3. Phinehas the son of Eleazar, 2 Esdr. i. 20: but
the insertion of the name in the genealogy of Ezra
(in this place only) is evidently an error, since Ezra
belonged to the line of Eleazar, and Eleazar to that
of Ithamar. It probably arose from a confusion of
the name of the great Phinehas, who was Ezra's forefather.

3. [Yat. Φίνεας]. A priest or Levite of the time
of Ezra, father of Eleazar (1 Esdr. viii. 62.
4. (φινέας: Simon); 1 Esdr. v. 31. [Paseah, 2.1].

G.

PHIN HAS (Φίνης); i.e. Phinehas (ancient
mouth, utterance, First; brown mouth, Gene.)

a Here the LXX. [Yat.] has φίνεας [but Rom. Alex.
Φίνεας].
PHINEHAS

[Rom. Alex.] "Phineás; but [Vat.] once in Pent. and uniformly elsewhere, Ælpi.ii. Jos. IV.] Phineas; Phineas.

For 16 367

sacred to the Son of Eleazar and... But wherever (Ex. vi. 25). His mother is recorded as one of the daughters of Putiel, an unknown person, who is identified by the Rabbinis with Jethro the Midianite (Targ. Pseudo-jon. on Ex. vi. 25; Wagenesell's "Sota, vii. 6). Phinehas is memorable for having while quite a youth, by his zeal and energy at the critical moment of the licentious idolatry of Shittim, he exchanged wrath and put a stop to the plague which was destroying the nation (Num. xxv. 7). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family forever (10-13). This seems to have raised him at once to a very high position in the nation, and he was appointed to accompany as priest the expedition by which the Midianites were destroyed (xxxii. 6).

Many years later he also headed the party who were despatched from Shiloh to remonstrate against the altar which the trans-Jordanic tribes were reported to have built near Jordan (Josh. xxxii. 13-32). In the partition of the country he received an allotment of his own—a hill on Mount Ephraim which bore his name—Gil'eath-Phinehas. Here his father was buried (Josh. xxiv. 33).

In the "Book of Genesis" the Son of Moses and grandson of Aaron the high-priest—the third of the series. In this capacity he is introduced as giving the oracle to the nation during the struggle with the Benjamites, who were defeated (ibid. xxvii. 28). When the Ark and Tabernacle were stationed at that time is not clear. From ver. 1 we should infer that they were at Mizpeh, while from vv. 18, 26, it seems equally probable that they were at Bethel (which is also the statement of Josephius, Ant. v. 2, § 11). Or the Hebrew words in these latter verses may mean, not Bethel the town, but, as they are rendered in the A. V., "house of God," and referred by the writer of the Apocrypha to the Ark may have been, there the aged priest "standing before it," and the oracle which he delivered was one which must have been fully in accordance with his own vehement temper, "Shall we go out to battle... or shall we cease?" And the answer was, "Go up: for to-morrow I will deliver them into your hand."

The memory of this champion of Jehovah was very dear to the Jews. The narrative of the Pentateuch presents him as the type of an ardent and devoted priest. The numerous references to him in the later literature all adopt the same tone. He is commemorated in one of the Psalms (cvi. 20, 31) in the identical phrase which is consecrated forever by its use in reference to the great act of faith of Abraham; a phrase which perhaps more than any other in the Bible binds together the old and new dispensations— "that was counted to him for righteousness unto all generations for evermore" (comp. Gen. xxv. 6; Rom. iv. 3). The "covenant," made with him is put into the same rank for dignity and certainty with that by which the throne was assured to King David (Eccles. xiv. 26). The zeal of Mattathias the Maccabaeus is sufficient to show the value of "Phinehas against Zambri the son of Saul." (1 Macc. ii. 26). The priests who returned from the

Captivity are enrolled in the official lists as the sons of Phinehas (Ezra. viii. 2; 1 Esdr. v. 6). In the Talmud (Baba Bathra, ch. xx.) he is identified with "the Prophet." (Judg. vi. 8).

Josephus (Ant. iv. 6, § 12), out of the venerable traditions which he uses with such excellent effect, adds to the narrative of the Pentateuch a statement that "so great was his courage and so remarkable his bodily strength, that he would never relinquish any undertaking, however difficult and dangerous, till he obtained a complete victory.

The later Jews are fond of comparing him to Elijah, if indeed they do not regard them as one and the same individual (see the quotations in Meyer, "Chron. Hebr." p. 816; Fabricius, Codex psalms-pii. p. 894, note). In the Targum Pseudo-Jonathan of Num. xxv. the daughter of Zimri and Cushi is accompanied by twelve miracles, and the covenant made with Phinehas is expanded into a promise, that he shall be the "angel of the covenant,

shall live forever, and shall proclaim redemption at the end of the world." His Midianite origin (already noticed) is brought forward as adding greater lustre to his zeal against Midian, and enhancing his glorious destiny.

The verse which closes the book of Joshua is ascribed to Phinehas, as the description of the death of Zimri and Cushi bears the name of Phinehas (Josh. xxvii. 3). He perhaps bore the same name as the high-priest who has just been mentioned ("Benj. Bathra", in Fabricius, p. 833). He is also reported to be the author of a work on sacred names (ibid.), and the same name is introduced, but he is no relative of the former; a name of the same meaning, which is that of the person, fabricius, who is so rare that Fabricius had never seen it.

The succession of the posterity of Phinehas in the high-priesthood was interrupted when Eli, of the race of Ithamar, was priest; but it was resumed in the person of Zadok, and continued in the same line to the destruction of Jerusalem. (High-priest, vol. ii. p. 1070). One of the members of the family—Manasseh son of Johanan, and brother of Jaddua—went over to the Samaritans, and they still boast that they preserve the succession (see their Letter to Scaliger, in Eichhorn's "Repetitioea," xiii. 262).

The tomb of Phinehas, a place of great resort to both Jews and Samaritans, is shown at Ariel, four miles S. E. of Nobles. It stands in the centre of the village, inclosed within a little area or compound, which is overshadowed by the thickly-trellised foliage of an ancient vine. A small mosque joins the wall of the compound. Outside the village, on the next hill, is a larger inclosure, containing the tomb of Eleazar, and a cave ascribed to Elijah, overshadowed by two venerable terenth trees, surrounded by arcades, and forming a retired and truly charming spot. The local tradition asserts that Ariel and its neighborhood are the "Hill of Phinehas."

In the Apocryphal Books his name is given as Phinees.

2. [Vat. "Phineas."] Second son of Eli (1 Sam. i. 1, i. 3, ii. 34, iv. 11, 17, 19, xiv. 9). He was not of the same line as his brother, a Levite and devoted namesake, but of the family of Ithamar. (E.L.) Phinehas was killed with his brother by the Philistines when the ark was captured. He had two sons, Ahitub, the eldest—whose sons Abijah and Ahimelech were high-priests at Shiloh and Nob in the time of Saul (xiv. 3)—and Ilahedob. He is introduced, apparently by mistake, in the genealogy of Ezra in the end of 

Ezra ii. 2. [Vat. "Phineas."] A Levite of Ezra's time (Ezra. viii. 33), unless the meaning be that Eleazar
PHISON

was of the family of the great Phinehas. In the parallel passage of 1 Esdr. he is called Phineas.

PHISON (Φίνισων; A.V. Φινισων; Phineas). The Greek form of the name Phison (Ezech. xxiv. 24).

PHILEGON (Φιλεγόν; Philegon). A Christian at Rome whom St. Paul salutes (Rom. xvi. 14). Pseudo-Hippolytus (De LXX. Apostolos) makes him one of the seventy disciples and bishop of Marathon. He is said to have suffered martyrdom on April 8th (Martyrologium Romanum, and Estiann), on which day he is commemorated in the calendar of the Byzantine Church.

W. T. B.

PHILEM [A. V. PHILE] (Φιλήμ [φίλημ, bright]; Philem), the first, and one of the most important, of the Christian persons the detailed mention of whom fills nearly all the last chapter of the Epistle to the Romans. What is said of her (Rom. xvi. 1, 2) is worthy of especial notice, because of its bearing on the question of the deaconesses of the Apostolic Church. On this point we have to observe, (1) that the term διάκονος, here applied to her, though not in itself necessarily an official term, is the term which would be applied to her, if it were meant to be official; (2) that this term is applied in the Apostolic Constitutions to women who ministered officially, the deaconess being called ἡ διάκονος, as the deacon is called ὁ διάκονος: (3) that it is now generally admitted that in 1 Tim. iii. 11, St. Paul applies it so himself; (4) that in the passage before us Philem is called the διάκονος of a particular church, which seems to imply a specific appointment; (5) that the Church of Corinth, to which she belonged, could only have been a small church: whence we may draw a fair conclusion as to what was customary, in the matter of such female ministration, in the larger churches; (6) that, whatever her errand to Rome might be, the independent manner of her going there seems to imply (especially when we consider the secluded habits of Greek women) not only that she was a widow or a woman of mature age, but that she was acting officially; (7) that she had already been of great service to St. Paul and others (Robinson's Mission, p. 280), either by her wealth or her energy, or both; a statement which closely corresponds with the description of the qualifications of the enrolled widows in 1 Tim. v. 10; (8) that the duty which we here see Philem discharging implies a personal character worthy of confidence and respect. [Deaconess.]

J. S. H.

PHINESE, PHOENICIA (Φινισε, Φωνικία [see below]; Phineas, Phoenice: rarely in Latin, Phoenicium; see Pachai'tes' Lexicon, s. v.), a tract of country of which Tyre and Sidon were the principal cities, to the north of Palestine, along the coast of the Mediterranean Sea; bounded by that sea on the west, and by the mountain range of Lebanon on the east. The name was not the one by which its native inhabitants called it, but was given to it by the Greeks; probably from the palm-tree, φοίνικι, with which it may then have abounded; just as the name Brazil was given by Europeans to a large territory in South America, from the Brazil-wood which a part of it supplied to Europe. The palm-tree is seen, as an emblem, on some coins of Aradus, Tyre, and Sidon: and there are now several palm-trees within the circuit of modern Tyre, and along the coast at various points; but the tree is not at the present day one of the characteristic features of the country. The native name of Phoenicia was in classical Greek Κουνα, with or without the article; and was also called Χία or Χυα, meaning lowland, so named in contrast to the adjoining Aram, i. e. Highland; the Hebrew name of Syria. The name Kanaan is preserved on a coin of Lachis, of the time of Antiochus Epiphanes, wherein Lachis is styled "a mother city in Canaan," Καναανεσσις. And Kanaai or Chnai (Χναί) is mentioned distinctly by Herodian as the grammarian, as the old name of Phoenicia. (See Περὶ μούσους λέξεως, under the word λέξεις.) Hence, as Phoenicians or Canaanites were the most powerful of all tribes in Palestine at the time of its invasion by Joshua, the brachytones, in speaking of their own territory, sometimes gave the compend, called it "the land of Canaan."

The length of coast to which the name Phoenicia was applied varied at different times, and was regarded under different aspects before and after the loss of its independence. 1. What may be termed Phoenicia Proper was a narrow undulating plain, extending from the pass of Rihú el-Beqiyéh or Abyyéh, the "Promontorium Album" of the ancients, about six miles south of Tyre, to the Nahor el-Andey, the ancient Bostremus, two miles north of Sidon, the line of R. S. ii. 476. The plain is only 28 miles in length, and, considering the great importance of Phoenicia in the world's history, this may well be added to other instances in Greece, Italy, and Palestine, which show how little the intellectual influence of a city or state has depended on the extent of its territory. Its average breadth is about a mile (Porter's Handbook for Syria, ii. 294); but near Sidon, the mountains retreat to a distance of five miles, and, near Tyre, to a distance of five miles (Kenrick's Phoenicia, p. 19). The whole of Phoenicia, thus understood, is called by Josephus (Ant. v. 3, § 1) the great plain of the city of Sidon, ὁ μεγάς πεδίον Σιδώνων ἱομάς. In it, near its northern extremity, was situated Sidon, in the north latitude of 33° 34' 35", and several miles more than 17 geographical miles to the south was Tyre, in the latitude of 33° 17' (Admiral Smyth's Mediterranean, p. 482) so that in a straight line those two renowned cities were less than 29 English miles distant from each other. Zarephath, the Sarepta of the New Testament, was situated between them, eight miles south of Sidon, to which it belonged (1 K. xix. 17; Obad. 20; Luke iv. 26). A still shorter distance, which afterwards became fairly entitled to the name of Phoenicia, extended up the coast to a point marked by the island of Aradus, and by Antarthada towards the north; the southern boundary remaining the same as in Phoenicia Proper. Phoenicia, thus defined, is estimated by Mr. Grote (History of Greece, iii. 354) to have been about 120 miles in length; while its breadth, between Lebanon and the sea, is usually quoted as from Hebræum. It is, however, in fact, merely the assertion of the grammarian himself; for it is by no means probable that he had in his mind the usage of Hebrææum.
never exceeded 20 miles, and was generally much less. This estimate is most reasonable, allowing for the bends of the coast; as the direct difference in latitude between Tyre and Antipatras (Tortosa) is equivalent to 106 English miles; and six miles to the south of Tyre, as already mentioned, intervened before the beginning of the pass of Icosa et Acria, inhabited by the Sidon. In this district, to the name of Ptolemy rests on the probable fact, that the whole of it, to the north of the great plain of Sidon, was occupied by Phoenician colonists; not to mention that there seems to have been some kind of political connection, however loose, between all the inhabitants (Diodorus, xvi. 41). Scarcely 10 geographical miles farther north than Sidon was Berytus; with a roadstead so well suited for the purposes of modern navigation that, under the modern name of Beirut, it has eclipsed both Sidon and Tyre as an emporium for Syria. Whether this Berytus was identical with the Berotahah and Berotah of Ezekiel xvi. 16, and of 2 Sam. viii. 6, is a disputed point. [Berothah.] Still farther north was Byblos, the Gebal of the Bible (Ez. xxiv. 9), inhabited by seamen and sailors. Its three principal inhabitants are supposed to be alluded to in the word Gebilu, translated "stone-squarers" in the authorized version of 1 K. v. 18 (32). It still retains in Arabic the kindred name of Jbail. Then came Tripolis (now Tripoli), said to have been founded by colonists from Tyre, Sidon, and Aradus, with three distinct towns, each a frontier apart from one another, each with its own walls, and each named from the city which supplied its colonists. General meetings of the Phoenicians seem to have been held at Tripolis (Diod. xvi. 41), as if a certain local jealousy had prevented the selection for this purpose of Tyre, Sidon, or Aradus. And lastly, towards the extreme point north was Aradus itself, the Arvad of Gen. x. 18, and Ez. xxvii. 8, situated, like Tyre, on a small island near the mainland, and founded by exiles from Sidon. The whole of Phoenicia Proper is well watered by various streams from the adjoining hills: of these the two largest are the Khisiyugh, a few miles north of Tyre — the ancient name of which, strange to say, is not certain, though it is conjectured to have been the Leontes — and the Bostrenus, already mentioned, north of Sidon. The soil is fertile, although now generally ill-cultivated; but in the neighborhood of Sidon there are rich gardens and orchards; "and here," says Mr. Porter, "are oranges, lemons, figs, almonds, plums, apricots, peaches, pomegranates, pears, and bananas, all growing luxuriantly, and forming a forest of finely-tinted foliage" (Handbook for Syria, ii. 385). The havens of Tyre and Sidon afforded water of sufficient depth for all the requirements of ancient navigation, and the neighboring range of the Lebanon, in its extensive forests, furnished what then seemed a nearly inexhaustible supply of timber for ship-building. To the north of Bostrenus, between that river and Beirut, lies the only bleak and barren part of Phoenicia. It is crossed by the ancient Tamyras or Danaurus, the modern Nahe el-Qabari. From Beirut to the requirements of ancient navigation. The principal streams are the Lycus, now the Nahe el-Kebir, about five miles south of Gebal; and the Eleutherus, now the Nahe el-Kebir, in the bend between Tripolis and Antipatras.

In reference to the period when the Phoenicians had lost their independence, scarcely any two Greek and Roman writers give precisely the same geographical boundaries to Phoenicia. Herodotus uses an expression which seems to imply that he regarded its northern extremity as containing the Myravidian Bay, or Bay of Issus (iv. 38). It is doubtful where exactly he conceived it to terminate at the south (iii. 5). Ptolemy is distinct in making the river Eleutherus the boundary, on the north, and the river Chorsus, on the south. The Chorsus is a small stream or torrent, south of Mount Carmel and of the small Canaanitish city Dor, the inhabitants of which the truce of Mariack was confessedly unable to drive out (Judg. i. 27). This southern line of Ptolemy coincides very closely with the southern boundary of Pliny the Elder, who includes Dor in Phoenicia, though the southern boundary specified by him is a stream called Crocodilion, now Nahr Zarit, about two miles to the north of Sidon. Pliny’s notion is a very different one, however, as he makes it include Antipatras. Again, the geographer Strabo, who was contemporary with the beginning of the Christian era, differs from Herodotus, Ptolemy, and Pliny, by representing Phoenicia as the district between Orthosia and Pelusium (xvi. 21), which would make it include not only Mount Carmel, but likewise Caesarea, Joppa, and the whole coast of the Philistines.

In the Old Testament, the word Phoenicia does not occur, as might be expected from its being a Greek name. In the Apocrypha, it is not defined, though spoken of as being, with Cœle-Syria, under one military commander (2 Macc. iii. 5, 8, viii. 8, x. 11; 3 Macc. iii. 15). In the New Testament, the word occurs only in three passages, Acts xvi. 19, xv. 5, xvi. 2, and not one of these affords a clue as to how far the writer deemed Phoenicia to extend. On the other hand, Josephus possibly agreed with Strabo; for he expressly says that Caesarea is situated in Phoenicia (Ant. xv. 9, § 6); and although he never makes a similar statement respecting Joppa, yet he speaks, in one passage, of the coast of Syria, Phoenicia, and Egypt, as if Syria and Phoenicia exhausted the line of coast on the Mediterranean Sea to the north of Egypt (B. J. iii. 9, § 2).

PHOENICIANS. The name of the race who in earliest recorded history inhabited Phoenicia, and who were the great maritime and commercial people of the ancient world. For many centuries they bore somewhat of the same relation to other nations which the Dutch bore, though less exclusively, to the rest of Europe in the 17th century. They were, moreover, predominant in colonization as well as in trade; and in their settlement of Carthage, producing the greatest general of antiquity, they proved the most formidable of all antagonists to Rome in its progress to universal empire. A complete history, therefore, of the Phoenicians would occupy a large extent of ground which would be foreign to the objects of this Dictionary. Still some notice is desirable of such an important people, who were in one quarter the

* Our Lord in the course of his Persian ministry (Matt. xv. 21: Mark vii. 24) on one occasion, at least entered Phoenicia and probably passed through Sidon itself Matt. xv. 21, where the approved reading is ḫid el-Zeboiyya.

H.
ncest neighbors of the Israelites, and indirectly influenced their history in various interesting ways. With regard to dwellers on matters which belong more strictly to the articles Tyre and Sidon, it may be proper to touch on certain points connected with the language, race, trade, and religion of the Phoenicians, which may tend to throw light on Biblical history and literature. The communication of letters by the Phoenicians to the European nations will likewise deserve notice.

The Phoenician language belonged to that family of languages which, by a name not altogether free from objection, but now generally adopted, is called a Semitic. Under this name are included three distinct branches: 1st. Arabic, to which belong Ethiopian as an offshoot of the Southern Arabic or Hymaritic. 2ndly. Aramaic, the vernacular language of Palestine at the time of Christ, in which the few original words of Christ which have been preserved in writing appear to have been spoken (Matt. xxvii. 46; Mark vi. 41; and Mark especially Matt. xvi. 18, which is not fully significant either in Greek or Hebrew). Aramaic, as used in Christian literature, is called Syriac, and as used in the writings of the Jews, has been very generally called Chaldean. 3rdly. Hebrew, in which by the grace of God the Old Testament was composed. Now one of the most interesting points to the Biblical student, connected with Phoenician, is, that it does not belong to either of the two first branches, but to the third; and that it is in fact so closely allied to Hebrew, that Phoenician and Hebrew, though different dialects, may practically be regarded as the same language. This may be shown in the following way: 1st, in passages which have been frequently quoted (see especially Gesenius's Monumenta Scripturae Linguæ Phœnicicæ, p. 231), testimony is borne to the kinship of the two languages by Augustine and Jerome, in whose time Phoenician or Carthaginian was still a living language. Jerome, who was a good Hebrew scholar, after mentioning, in his Commentary on Jeremiah, lib. v. c. 25, that Carthage was a Phoenician colony, proceeds to state "Unde et Puni sermones corrupto quasi Phani appellanurus, quorum lingua Hebraica lingua magna e parte confinis est." And Augustine, who was a native of Africa, and a bishop there of Hippo, a Syrian colony, has left on record a similar statement several times. In one passage he says of the two languages, "Hebraica lingua nonnullam inter se differentia" (Questions in Heptateuchum, vii. 16). In another passage he says, "Constat sunt iste linguae et vicinae, Hebraea, et Punicæ, et Syriæ" (Sermo, Tract, 15).Again, on Gen. xvi. 3, he says of a certain mode of speaking (Gen. viii. 9), "Locutus est, quam præterea Hebrewam putas, quia et Punicæ lingua familiaris est, ut in quinuâ infra versibus Hebraea lingua vereri sit" (lib. i. Tract. 21). And on another occasion, remarking on the word Messias, he says, "quod veriarn Punicæ linguae consuetum est, scil. alla Hebraeum mulierem, (Contra literam Paelistinam, ii. c. 104). 2ndly. These statements are rendered more confirmed by a passage of Carthaginian preserved in the Punicæ of Plantus, act. v. scene 1, and accompanied by a Latin translation as part of the play. There is no doubt that the Carthaginians and the Phoenicians were the same race; and the Carthaginian extract is undeniably intelligible through Hebrew to Hebrew scholars (see Bochart's Canaan; and especially Gesenius's Monumenta, pp. 357-352, where the passage is translated with notes, and full justice is done to the previous translation of Bochart). 3rdly. The close kinship of the two languages is, moreover, strikingly confirmed by very many Phoenician and Carthaginian names of places and persons, which, destitute of meaning in Greek and Latin, through which languages they have become widely known, and having sometimes in those languages occasioned false etymologies, become really significant in Hebrew. Thus through Hebrew it is known that Tyre, as Taur, signifies "a rock," referring doubtless to the rocky island on which the city was situated; that Sidon, as Shedôn, means "Fishing," or "Fishery," which was probably the occupation of its first settlers; that Carthage, or Carthaddâ, as Carthada, means "New Town," or "New," and that Byrsa, which, as a Greek name, suggested the etymological myths of the Bull's Hole (Eindrical i. 306-67), was simply the citadel of Carthage — Carthaginivs arcem, as Virgil accurately termed it: the Carthaginian name of it, softened by the Greeks into Byrsa, being merely the Hebrew word Betharâ, or "citadel," identified with the word called Bozrah in the English Version of Isaiah xxxiii. 1. Again, through Hebrew, the names of celebrated Carthaginians, though sometimes disfigured by Greek and Roman writers, acquire a meaning. Thus Bôdô is found to belong to the same root as David, "beloved;" meaning "his love," or "desire," or, i. e. the love or delight either of David or of her husband: Hasdrubal is the man whose help Hamilcar is; Hamilcar the man whom the god Miker graciously granted) (comp. Hamesedios); and, with the substitution of Baal for God, the name of the renowned Hannibal is found to be identical in form and meaning with the name of Hamilcar, who is mentioned in Num. xxxiv. 23 as the prince of the tribe of Manasseh: Hannibal meaning "the grace of God," and the grace of Baal. 4thly. The same conclusion arises from the examination of Phoenician inscriptions, preserved to the present day: all of which can be interpreted, with more or less certainty, through Hebrew. Such inscriptions are of three kinds: 1st. on gems and seals; 2ndly, on coins of the Phoenicians and of their colonies; 3rdly. on the first century B.C., and, for the most part, of uncertain origin. The oldest known coins with Phoenician words belong to Tar-

---

"So called from the descendants of Shem (Gen. x. 21 25); nearly all of whom, as represented by nations, are known to have spoken cognate languages. There may be listitious to two objections to the name 1st. That the language of the Elamites and Assyrians (see ver. 29) belonged to a different family. 2ndly. That the Phoenicians, as Canaanites, are derived from Ham (Gen. x. 19). The first interlocutor of the Chaldean and Assyrian inscriptions are admitted to prove the identity of Assyrian with Aramaic or Syrian, the objection to the word "Semitic" nearly disappears. Mr Max Müller, in his high authority on such a point, regards it as certain, that the inscriptions of Nineveh, as well as of Babylon, are Phoenician. — Letters on the Science of Language, p. 255."

b Movers and Forst, supported by the Etymologiam Magnam, adopt "nedla;" or "nedblu," as the etymology of Bio, in the sense of "travel-load," or "transport." But the travelling Phoenician seems less probable in itself, and less countenance by Hebrew analogies.
PHENICANS

PHENICANS

us and other Cilician cities, and were struck in the period of the Persian domination. But coins are likewise in existence of Tyre, Sidon, and other cities of Phoenicia; though all such are of later date, and belong to the period either of the Seleu-
diche, or of the Romans. Moreover, other coins have been found belonging to cities in Sicily, Sardinia, Africa, and Spain. The inscriptions on stone are either of a public or a private character. The former are comparatively few in number, but relate to various subjects: such, for example, as the dedication of a temple, or the commemoration of a Numidian victory over the Romans. The private inscriptions were either in the nature of votive tablets erected as testimonials of gratitude to some deity, or were sepulchral memorials engraved on tombstones. Phoenician inscriptions on stone have been found not only in all the countries last mentioned, except Spain, but likewise in the island of Cyprus near Citma, in Malta, at Athens, at Marseilles, and at Sidon.

II. Concerning the original race to which the Phoenicians belonged, nothing can be known with certainty, because they are found already established along the Mediterranean Sea at the earliest dawn of authentic history, and for centuries afterwards there is no record of their origin. According to Herodotus (vii. 89), they said of themselves in his time that they came in days of old from the shores of the Red Sea—and in this there would be nothing in the slightest degree improbable, as they spoke a language cognate to that of the Arabsians, who inhabited the east coast of that sea; and both Hebrew and Arabic, as well as Aramaic, are seemingly derived from some one Semitic language now lost. Still neither the truth nor the falsehood of the tradition can now be proved; for language, although affording strong presumptions of race, is not conclusive on the point, as is shown by the language at present spoken by the descendents of the Normans in France. But there is one point respecting their race which can be proved to be in the highest degree probable, and which has peculiar interest as bearing on the Jews, namely, that the Phenicians were of the same race as the Canaan-
tes. This remarkable fact, which, taken in connection with the language of the Phenicians, leads to some interesting results, is rendered probable by the following circumstances: 1st. The native name of Phoenician is Punic; and Punic is an old name signifying “lowland” (Phoenicia). This was well given to the narrow slip of plain between the Lebanon and the Mediterranean Sea, in con-
tast to the elevated mountain range adjoining; but it would have been inappropriate to that part of Palestine conquered by the Israelites, which was undoubtedly a hill-country (see Movers, Die Pho-
nizische Allerbrot, Thell 1, p. 5): so that, when it is known that the Israelites at the time of their in-
vasion found in Palestine a powerful tribe called the Canaanites, and from them called Palestine the land of Canaan, it is obviously suggested that the Canaanites came originally from the neighboring plain, called Canaan, along the sea-coast. 2dly. This is further confirmed through the name in Africa whereby the Carthaginian Phenicians called themselves, as attested by Augustin, who

states that the peasants in his part of Africa, if asked of what race they were, would answer, in Punic or Phoenician, “Canaanites.” 2dly. Interrogari rustici nostri quid sit, Punicè respondentes, Can-
nait, corrupta sciectis sient in tabulis una littera (accurate enim dicem debellant Channait quid aliud respondens quan Channaitii)” (Openi Ovani, iv. 1243; Exposit. Epist. ad Rom. § 13). 3dly. The conclusion thus suggested is strongly supported by the tradition that the names of persons and places in the land of Canaan—not only when the Israel-
ites invaded it, but likewise previously, when “there were yet but a few of them,” and Abraham is said to have visited it—were Phoenician or Hebrew: such, for example, as Abimelek, “Father of the king” (Gen. xx. 2); Melchizekel, “King of right-
eousness” (xiv. 15); Kirjath-sepher, “city of the book” (Josh. xv. 15).

As this obviously leads to the conclusion that the Hebrews adopted Phoenician as their own language, or, in other words, that what is called the Hebrew language was in fact the language of Canaan, as a prophet called it (Is. xix. 18), and this not merely poetically, but literally and in philological truth; and as this is repugnant to some precon-
ceived notions respecting the peculiar people, the question arises whether the Israelites might not have translated Canaanitish names into Hebrew. On this hypothesis the names now existing in the Bible for persons and places in the land of Canaan would not be the original names, but merely the translations of those names. The answer to this question is, 1st. That there is not the slightest direct mention, nor any indirect trace, in the Bible, of any such translation. 2dly. That it is contrary to the analogy of the ordinary Hebrew practice in other cases; as, for example, in reference to the names of the Assyrian monarchs (perhaps of a for-
egn dynasty) Pul, Tiglath-Pileser, Sennacherib, or of the Persian monarchs Darius, Ahaziaerus, Artax-
eerras, which remain unintelligible in Hebrew, and can only be understood through other Oriental lan-
guages. 3dly. That there is an absolute silence in the Bible as to there having been any difference whatever in language between the Israelites and the Canaanites, although in other cases where a difference existed, that difference is somewhere alluded to, as in the case of the Egyptians (Ps. xxvi. 5, xxv. I), the Assyrians (Is. xxxvi. 11), and the Chaldees (Jer. xxxix. 15). Yet in the case of the Can-

aunites there was stronger reason for alluding to it: and without some allusion to it, if it had ex-
listed, the narration of the conquest of Canaan un-
der the leadership of Joshua would have been sin-
gularly imperfect.

It remains to be added on this point, that al-
though the previous language of the Hebrews must be mainly a matter for conjecture only, yet it is most in accordance with the context to suppose that they spoke originally Aramaic. They came through Abraham, according to their traditions, from Ur of the Chaldees in Mesopotamia, where Aramaie at a later period is known to have been spoken; they are instructed in Deuteronomy to say that an Aramaean (Syrian) ready to perish was their father (xxvi. 5); and the two earliest words of Aramaic contained in the Bible, Vergo venia-
a has done more than any one scholar since Buxtorf to facilitate the study of Hebrew. His opinion on the relation of Phoenician to Hebrew is: “Omnino hoc testandum est, perique et eum usum eum Hebrew
PHŒNICIANS

PHŒNICIANS

th; are, in the Book of Genesis, put into the mouth of Lezon, the son of Abraham's brother and first cousin of Isaac (xxxii. 47).¹

III. In regard to Phœnician trade, as connected with the Israelites, the following points are worthy of notice. 1. Up to the time of David, not one of the twelve tribes seems to have possessed a single harbor on the sea-coast: it was impossible therefore that they could become a commercial people. It is true that according to Judg. i. 31, and confirmed by modern authorities, there is a harbor, which, from the same passage in Judges it seems certain that the tribe of Asher did not really obtain possession of Acre, which continued to be held by the Canaanites. However wishful, therefore, the Israelites might regard the wealth accruing to their neighbors the Phœnicians from trade, to vie with them in this respect was out of the question. But from the time that David had conquered Edom, an opening for trade was afforded to the Israelites. The command of Ezion-geber near Elath, in the land of Edom, enabled them to engage in the navigation of the Red Sea. As they were novices, however, at sailing, as the navigation of the Red Sea was untried, winds, and rocks, is almost an impossibility even to modern sailors, and as the Phœnicians, during the period of the independence of Edom, were probably allowed to trade from Ezion-geber, it was politic in Solomon to permit the Phœnicians of Tyre to have docks, and build ships at Ezion-geber on condition that his sailors and vessels might have the benefit of their experience. The results seem to have been strikingly successful. The Jews and Phœnicians made profitable voyages to Ophir in Arabia, whence gold was imported into Judaea in large quantities; and once in three years still longer voyages were made, by vessels which may possibly have touched at Ophir, though their imports were not only gold, but likewise silver, ivory, apes, and peacocks, 1 K. x. 22. (2 Sam. xxv.) There seems at the same time to have been a great direct trade with the Phœnicians for cedar-wood (ver. 27), and generally the wealth of the kingdom reached an unprecedented point. If the union of the tribes had been maintained, the whole sea-coast of Palestine would have afforded additional sources of revenue through trade; and perhaps even ultimately the great plain of Sion itself might have formed part of the united empire. But if any possibilities of this kind existed, they were destroyed by the dis-stress occasioned by the ten tribes; a heavy blow from which the Hebrew race has never yet recovered during a period of nearly 3000 years.²

2. After the division into two kingdoms, the certain falls on any commercial relation between the Israelites and Phœnicians until a relation is brought to notice, by no means brotherly, as in the facts which navigated the Red Sea, nor friendly, as between layers and sellers, but humiliating and exasperating, as between the buyers and the hawker.

The relation is meant which existed between the two nations when Israelites were sold as slaves by Phœnicians. It was a custom in antiquity, when one nation went to war against another, for merchants to be present in one or other of the hostile camps, in order to purchase prisoners of war as slaves. Thus at the time of the Maccabees, when a large army was sent by Lysias to invade and subdue the land of Judah, it is related that the merchants of the country, hearing the name of them, took silver and gold very much with servants, and came into the camp to buy the children of Israel for slaves" (1 Macc. iii. 4), and when it is related that, at the capture of Jerusalem by Antiochus Epiphanes, the enormous number of 30,000 men were slain in battle, it is added that there were "no fewer sold than slain" (2 Macc. v. 14; Cremer's Joel, p. 240). Now this practice, which is thus illustrated by details at a much later period, undoubtedly prevailed in earlier times (Oddyssey, xx. 427; Herod, i. 1), and is alluded to in the passages of Scripture by the prophets (Joel iii. 4, and Am. i. 9, 10), about 800 years before Christ.³ The circumstances which led to this state of things may be thus explained. After the division of the two kingdoms, there is no trace of any friendly relation between the kingdom of Judah and the Phœnicians: the interest of the latter rather led them to cultivate the friendship of the kingdom of Israel; and the Israeliish king, Ahia, had a Sidoniam princess as his wife (1 K. xvi. 31). Now, impeded in consequence of these relations, when Jehoshaphat king of Judah endeavored to restore the trade of the Jews in the Red Sea, and for this purpose built large ships at Ezion-geber to go to Ophir for gold, he did not admit the Phœnician to any participation in the venture, and when king Ahiazh, Ahia's son, asked to have a share in it, his request was distinctly refused (1 K. xxv. 18, 48, 49). That attempt to renew the trade of the Jews in the Red Sea failed, and in the reign of Jehoram, Jehoshaphat's son, Edom revolted from Judah and established its independence; so that if the Phœnicians wished to debar trading-vessels from Ezion-geber, Edom was the power which it was mainly their interest to conciliate, and not Judah. Under these circumstances the Phœnician seem, not only to have purchased and to have sold again as slaves, and probably in some instances to have kidnapped inhabitants of Judah, but even to have sold them to the enemies the Edonites (Joel, Amos, as above). This was regarded with reason as a departure from the old brotherly covenant, when Hir'am was a great lover

³ After the discussion, the period of union was looked back to with endless longing.

⁴ In Joel iii. 6 Heb. iv. 6; "sons of the Ishmaelites," i.e. of the Greeks, is the most natural translation of the word, for there was a large body of Greeks in Arabia Felix, and there is still a Yawam in Yemen; and both Dr. Young and Dr. D'Arcy think, that, according to Am. x. 9, an Arabian people, and not Grecians, are here alluded to. The three powers, of selling the Phœnician vessels to the Sabæans, "a people afar off," which seems to imply that the Yawam were not "far off," tends to make it improbable that the Yawam were near the Sabæans, as they would have been in Arabia Felix. (See Javan, sons of, Amos, ed.)
of David, and subsequently had the most friendly commercial relations with David's son; and this may be regarded as the original foundation of the hostility of the Hebrew prophets towards Phoenician Tyre. (Is. xxiii.; Ez. xxviii.)

3. The only other notice in the Old Testament of trade between the Phoenicians and the Israelites is in the account given by the prophet Ezekiel of the trade of Tyre (xxvii. 17). While this account supplies valuable information respecting various commercial dealings of the most illustrious Phoenician cities [Tyre], it likewise makes direct mention of the exports to it from Palestine. These were wheat, honey (i.e. syrup of grapes), oil, and balm. The export of wheat deserves attention (concerning the other exports, see HONEY, OIL, BALM), because it shows how important it must have been to the Phoenicians to maintain friendly relations with their Hebrew neighbors, and especially with the adjoining kingdom of Israel. The wheat is called wheat of Minnith, which was a town of the Ammonites, on the other side of Jordan, only once mentioned elsewhere in the Bible: and it is not certain whether Minnith was a great inland emporium, where large purchases of corn were made, or whether the wheat of its neighborhood was peculiarly good, and gave its name to all wheat of a certain fineness in quality. Still, whatever may be the correct explanation respecting Minnith, the only countries specified for exports of wheat are Judah and Israel, and it was through the territory of Israel that the wheat would be imported into Phoenicia. It is suggested by Heeren in his Historical Researches, p. 117, that the fact of Palestine being thus, as it were, the granary of Phoenicia, explains in the clearest manner the lasting peace that prevailed between the two countries. He observes that with many of the other adjoining nations the Jews lived in a state of almost continual warfare; but that they never once engaged in hostilities with their nearest neighbors the Phoenicians. The fact itself is certainly worthy of special notice; and is the more remarkable as there were not wanting tempting occasions for the interference of the Phoenicians in Palestine if they had desired it. When Elijah at the brook Kishon, at the distance of not more than thirty miles in a straight line from Tyre, put to death 450 prophets of Baal (1 K. xviii. 40), we can well conceive the agitation and anger which such a deed must have produced at Tyre. And at Sidon, more especially, which was only twenty miles farther distant from the scene of slaughter, the first impulse of the inhabitants must have been to march forth at once in battle array to strengthen the hands of Jezebel, their own princess, in behalf of Baal, their Phoenician god. When again afterwards, by means of falsehood and treachery, Jehu was enabled to massacre the worshippers of Baal in the land of Israel, we cannot doubt that the intelligence was received in Tyre, Sidon, and the other cities of Phoenicia, with a similar burst of horror and indignation to that with which the news of the Massacre on St. Bartholomew's day was received in all Protestant countries; and there must have been an intense desire in the Phoenicians, if they had the power, to invade the territories of Israel without delay and inflict signal chastisement on them. However, the fact that Israel was their granary would undoubtedly have been an element in restraining the Phoenicians, even on occasions such as these; but probably still deeper motives were likewise at work. It seems to have been a part of the settled policy of the Phoenician cities to avoid attempts to make conquests on the continent of Asia. For this there were excellent reasons in the position of their small territory, which with the range of certain mountains on one side was a barrier, and the sea on the other, was easily defensible by a wealthy power having command of the sea, against second or third rate powers, but for the same reason was not well situated for offensive war on the land side. It may be added that a pacific policy was their manifest interest as a commercial nation, unless by war they were morally certain to obtain an important accession of territory, or unless a warlike policy was an absolute necessity to prevent the formidable preponderance of any one great neighbor. At last, indeed, they even carried their system of non-intervention in continental wars too far, if it would have been possible for them by any alliances in Syria and Cilic-Syria to prevent the establishment on the other side of the Lebanon of one great commercial power that might in the end put an end to their existence. The doom was certainly, and it was merely a question of time as to the arrival of the fatal hour when they would lose their independence. But too little is known of the details of their history to warrant an opinion as to whether they might at any time by any course of policy have raised up a barrier against the empire of the Assyrians or Chaldees.

4. The religion of the Phoenicians is a subject of vast extent and considerable perplexity in details, but of its general features as bearing upon the religion of the Hebrews there can be no doubt. As opposed to Monotheism, it was a Pantheistical personification of the forces of nature, and in its most philosophical shadowing forth of the Supreme powers, it may be said to have represented the male and female principles of production. In its popular form, it was especially a worship of the sun, moon, and five planets, or, as it might have been expressed according to ancient notions, of the seven planets—the most beautiful, and perhaps the most natural, form of idolatry ever presented to the human imagination. These planets, however, were not regarded as lifeless globes of matter, obedient to physical laws, but as intelligent animated powers, influencing the human will, and controlling human destinies. An account of the different Phoenician gods named in the Bible will be found elsewhere [see Baal, Ashhtaroth, Ashtaruh, etc.]; but it will be proper here to point out certain effects which the circumstance of their being worshipped in Phoenicia produced upon the Hebrews.

1. In the first place, their worship was a constant temptation to Polytheism and Idolatry. It is the general tendency of trade, by making merchants acquainted with different countries and various modes of thought, to enlarge the mind, to promote the increase of knowledge, and, in addition, by the wealth which it diffuses, to afford opportunities in various ways for intellectual culture. It can scarcely be doubted that, owing to these circumstances, the Phoenicians, as a great commercial

---

a In ver 17 the word "Pannag" occurs, which is not found elsewhere. Opinions are divided as to whether it is the name of a place, like Minnith, or the name of an article of food; "sweet cake," for example.
people, were more generally intelligent, and, as we should now say, civilized, than the inland agricultural population of Palestine. When the simple-minded Jews, therefore, came in contact with a people more versatile and, apparently, more enlightened than themselves, but who nevertheless, either in a philosophical or in a popular form, admitted a system of Polytheism for influences which would be exerted on Jewish minds, tending to make them regard their exclusive devotion to their own one God, Jehovah, however transcendent his attributes, as unsound and morose. It is in some such way that we must account for the astounding fact that Solomon himself, the wisest of the Hebrew race, to whom Jehovah is expressly stated to have appeared twice—once, not long after his marriage with an Egyptian princess, on the night after his sacrificing 1,000 burnt offerings on the high place of Gilgal, and the second time, after the consecration of the Temple—should have been so far beguiled by his wives in his old age as to become a Polytheist, worshiping, among other deities, the Phoenician or Sidonian goddess Ashhtaroth (1 K. iii. 1-7; ix. 2 xi. 1-5). This is not for a moment to be so interpreted, as if he ever ceased to worship Jehovah, to whom he had erected the magnificent Temple, which in history is so generally connected with Solomon's name. Probably, according to his own erroneous conceptions, he never ceased to regard himself as a loyal worshipper of Jehovah, but he at the same time deemed this not incompatible with sacrificing at the altars of other gods likewise. Still the fact remains, that Solomon, who by his Temple in its ultimate results did so much for establishing the doctrine of one only God, died himself a practical Polytheist. And if this was the case with him, Polytheism in other sovereigns of inferior excellence can excite no surprise. With such an example before him, it is no wonder that Alah, an essentially bad man, should after his marriage with a Sidonian princess not only openly tolerate, but encourage, the worship of Baal; though it is to be remembered even in him, that he did not disavow the authority of Jehovah, but, though influenced by his great antagonist Elijah, he sent his clothes, and put sackcloth on his flesh, and showed other signs of contrition evidently deemed sincere (1 K. xvi. 31, xxi. 27-29). And it is to be observed again that although before the reformation of Josiah (2 K. xxiii.), Polytheism prevailed in Judah as well as Israel, yet it seems to have been more intense and universal in Israel, as might have been expected from its greater proximity to Phenicia; and Israel is sometimes spoken of as if it had set the bad example to Judah (2 K. xxiv. 19; Jer. iii. 8); though, considering the example of Solomon, this cannot be accepted as a strict historical statement.

2. The Phoenician religion was likewise in other respects detestable to the inhabitants of Palestine, being in some points essentially demoralizing. For example, it sanctioned the dreadful superstition of burning children as sacrifices to a Phenician god. "They have built also," says Jeremiah, in the name of Jehovah, "the high places of Baal, to burn their sons with fire for burnt offerings into Baal, which I commanded not, nor spake it, neither came it into my mind" (comp. Jer. xxxi. 35). This horrible custom was probably in its origin founded on the idea of sacrificing to a god what was best and most valuable in the eyes of the people; but it could not exist without having a tendency to stifle natural feelings of affection, and to harden the heart. It could scarcely have been first adopted otherwise than by the influence of the Phenician race; but grown-up men and grown-up nations, with their moral feelings in other respects cultivated, are often the slaves in particular points of an early-imprinted superstition, and it is worthy of note that, more than 250 years after the death of Jeremiah, the Carthaginians, when their city was besieged by Agathocles, offered as burnt sacrifices to the planet Saturn, at the public expense, 200 boys of the highest aristocracy; and, consequently, when they had obtained a victory, sacrificed the most beautiful captives in the like manner (Diod. xx. 14, 65). If such things were possible among the Carthaginians at a period so much later, it is easily conceivable how common the practice of sacrificing children may have been at the time of Jeremiah among the Phenicians generally: and if this were so, it would have been certain to prevail among the Israelites who worshipped the same Phenician gods; especially as, owing to the inter-marriages of their forefathers with Canaanites, there were probably few Israelites who may not have had some Phenician blood in their veins (Jug. iii. 5). Again, parts of the Phenician religion, especially the worship of Ashtaroth, tended to encourage dissolvedness in the relations of the sexes, and even to sanctify impurities of the most abominable description. Connected with her temples and images there were male and female prostitutes, whose polluted gains formed part of the sacred fund appropriated to the service of the goddess. And, to complete the defilement of immorality, they were even known by the name of the "consecrated." Nothing can show more clearly how deeply this base and example had eaten into the hearts and habits of the people, notwithstanding positive prohibitions and the repeated denunciations of the Hebrew prophets, than the almost incredible fact that, previous to the reformation of Josiah, this class of persons was allowed to have houses or tents close to the Temple of Jehovah, whose treasury was polluted by their gains. (2 K. xxiv. 7; Jer. xxvi. 18; 1 K. xiv. 24, xx. 12, xxi. 48; Hos. iv. 14; Job xxxvi. 14; Lucian, Lucina, c. 35; De Deo Syri, ed. 27, 51; Gesenius, Thesaurus, s. v. 277, p. 1196; Movers, Philol., i. 678, &c.; Spencer, De Legibus Hebraorum, i. 561.)

V. The most important intellectual invention of man, that of letters, was universally asserted by the Greeks and Romans to have been communicated by the Phenicians to the Greeks. The earliest written statement on the subject is in Herodotus, v. 57, 58, who incidentally, in giving an account of Harmodius and Aristogenes, says that they were by race Cypriots; and that he had assuredly obtained his information by inquiry that the Cypriots were Phenicians. The Cypriots, amongst those Phenicians who were over with Cadmus8 into Bostra, and instructing the

---

8 In Hebrew there is a root Kadam, from which is
Greeks in many other arts and sciences, taught them likewise letters. It was an easy step from this to believe, as many of the ancients believed, that the Phoenicians invented letters.

"Phoenicians primi, fame si creditur, auti Munsarrum railibus vocem signare figurer." 
Lucan's Pharsal. iii. 220, 221.

This belief, however, was not universal; and Pliny the elder expresses his own opinion that they were of Assyrian origin, while he relates the opinion of Gallienus that they were invented by the Egyptians, and of others that they were invented by the Syrians (Nest. Hist. vii. 57). Now, as Phoenician has been shown to be nearly the same language as Hebrew, the question arises whether Hebrew throws any light on the time or the mode of the invention of letters, on the question of who invented them, or on the universal belief of antiquity that the knowledge of them was communicated to the Greeks by the Phenicians. The answer is as follows:

Hebrew literature is as silent as Greek literature respecting the precise date of the invention of letters, and the name of the inventor or inventors; but the names of the letters in the Hebrew alphabet are in accordance with the belief that the Phenicians communicated the knowledge of letters to the Greeks: for many of the names of letters in the Greek alphabet, though without meaning in Greek, have a meaning in the corresponding letters of Hebrew. For example: the four first letters of the Greek alphabet, Alpha, Beta, Gamma, Delta, are not to be explained through the Greek language; but the corresponding four first letters of the Hebrew alphabet, namely, Aleph, Beth, Gimel, Daleth, being essentially the same words, are to be explained in Hebrew. Thus in Hebrew Aleph or Eleph means an ox; Beth or Bayith a house; Gimel a camel; and Daleth a door. And the name is essentially, though not always so clearly, the case with almost all the sixteen earliest Greek letters said to have been brought over from Phenicia by Cadmus, 

"Abgaseikamnopet:" and called on this account Phenician or Cadmusian letters (Herodot. i.e. Pliny, Hist. Nat. vii. 57; Jeff's Greek Gram. l.2). Moreover, as to writing, the ancient Hebrew letters, substantially the same as Phenician, agree closely with ancient Greek letters—a fact which, taken by itself, would not prove that the Greeks received them from the Phenicians, as the Phenicians might possibly have received them from the Greeks; but which, viewed in connection with Greek traditions on the subject, and with the significance of the letters in Hebrew, seems reasonably conclusive that the letters were transported from Phenicia into Greece. It is true that modern Hebrew writing and the later Greek writing of antiquity have not much resemblance to each other; but this is owing partly to gradual changes in the writing of Greek letters, and partly to the fact that the character in which Hebrew Bibles are now printed, called the Assyrian or square character, was not the one originally in use among the Jews; but seems to have been learnt in

Kedem, a noun with the double meaning of the "East" and "ancient time." With the former sense, Cadmus might mean "Eastern," or one from the East, like the name "Norman," or "Fleming," or, still more closely, the "Norman" or "Southern" in England. In the latter sense for Kedem, the name would mean "Olden" or "Antient," and an etymological significance might be given to a line of Sophocles, in which Cadmus is mentioned:

"O πέπονε Καθύμον τοῦ γαλάς να τα προδήριν."

Elip. Tyr. i.

The sixth letter, afterwards discussed, and now generally known by the name of Bigamma (from Δώδεκα, i. 29), was unquestionably the same as the Hebrew letter Vau (a hook).
ending in \( a \) has been the favorite mode of accommodating them to the Greek language. For example, the following sixteen words are specified by Beck and Graff in his "Abhandlungen der Königlichen Gesellschaft zu Göttingen," fourth volume of the Abhandlungen der Königlichen Gesellschaft zu Göttingen. Information respecting these works, and others on Phoenician inscriptions, is given by Bleek, pp. 64, 65.

PHOTOS (φοτός: Phare, Foro) = Πάθος
(1 Esdr. v. 9, ix. 26.)

PHRYGIA (φρυγία: Phrygia). Perhaps there is no geographical term in the New Testament which is less capable of an exact definition. Many maps convey the impression that it was coordinate with such terms as Bithynia, Cilicia, or Galatia. But in fact there was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor.

The word was rather ethnological than political, and denoted, in a vague manner, the western part of the central region of that peninsula. Accordingly, in two of the three places where it is used, it is mentioned in a manner not intended to be precise (διαλυότας τὴν Φρυγίαν καὶ τὴν Παρθενίαν χαράματι, Acts xvi. 5; διερχόμενοι κατέδροσαν τὸν Παρθανικόν καὶ Φρυγίκον, Acts xvii. 22), the former having reference to the second missionary journey of St. Paul, the latter to the third.

Nor is the remaining passage (Acts ii. 10) inconsistent with this view, the enumeration of those foreign Jews who came to Jerusalem at Pentecost (though it does follow, in some degree, a geographical order) having no reference to political boundaries. By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. As to its physical characteristics, it was generally a table-land, but with considerable variety of appearance and soil. Several towns mentioned in the New Testament were Phrygian towns; such, for instance, as Iconium and Colossae. In Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. As to its physical characteristics, it was generally a table-land, but with considerable variety of appearance and soil. Several towns mentioned in the New Testament were Phrygian towns; such, for instance, as Iconium and Colossae. But it is better to class them with the provinces to which they politically belonged. All over this district the Jews were probably numerous. They were first introduced there by Antiochus the Great (Joseph. Anti. xix. 3, § 4); and we have abundant proof of their presence there from Acts xiii. 14, xiv. 19, as well as from Acts ii. 10. [See Fulman, p. 2480 b.]

PHUD (φοῦδ) = Phut (Jud. ii. 25; comp. Ex. xxvii. 10).

PHURAI (φοράι) [loaf, branch]: φοράη (Pharai): Gibson's servant (lit. "lad," or "boy"), probably his armor-bearer (comp. 1 Sam. xiv. 1, who accompanied him in his midnight visit to the camp of the Midianites (Judg. vii. 10, 11).

PHUT (PHUT) (Phut) [see below]: φοῦδ (Phut). [Comp. in 1 Chr. iv. 40; in Jer., Ezek., Nah.] Διβοτ: Phut, Phut, Phut, Phut, Arbela [?], the third name in the list of the sons of Tem (Gen. x. 6; 1 Chr. i. 8), elsewhere applied to an African country or people. In the list it follows Cush and Mieran, and precedes Canaan. The settlements of Cush in Aramaic means only 1600, and not an ox; the word for "deer" in Aramaic is not מַבֵּר, but מַבְרֵה, while the ox following names of Cudian letters are not Aramaic: ָלפ, ָלפ, ָלפ, ָלפ, ָלפ (Syr. ָלפ, ָלפ).

a The strongest argument of Gesenius against the Phrygian invention of the letters is, that although hundreds of the names are both Aramaic and Phrygian, some of them are not Aramaic at least, not in the Hebrew signification: while the Syrians use other words to express the same ideas. Thus

\( יִּהְיָה \)
extended from Babylonia to Ethiopia above Egypt, those of Mizraim stretched from the Philistine territory through Egypt and along the northern coast of Africa to the west; and the Canaanites were established at first in the land of Canaan, but afterwards were spread abroad. The order seems to be ascending towards the north: the Cushite claim of settlements being the most southern, the Mizraite claim, extending above them, though perhaps through a smaller area at least as the first, and the Canaanites holding the most northern position. We cannot place the tract of Phut out of Africa, and it would thus seem that it was almost parallel to that of the Mizraites, as it could not be further to the north: this position would well agree with Libya. But it must be recollected that the order of the nations or tribes of the stocks of Cush, Mizraim, and Canaan, is not the same as that we have inferred to be that of the principal names, and that it is also possible that Phut may be mentioned in a supplementary manner, perhaps as a nation or country dependent on Egypt.

The few mentions of Phut in the Bible clearly indicate, as already remarked, a country or people of Africa, and, it must be added, probably not far from Libya. It is noticeable that they occur only in the list of Noah's sons, and in the prophetic Scriptures. Isaiah probably mentions Phut as a remote nation or country, where the A. V. has Put, as in the Masoretic text (Is. lvii. 19). Nahum, warning Nineveh of the fall of No-Amon, speaks of Cush and Mizraim as the strength of the Egyptian city, and Phut and Ludim as its helpers (iii. 9). Jeremiah tells of Phut in Nebuchadnezzar's army with Cush and the Ludim (xiv. 9). Ezekiel speaks of Phut with Persia and Lud as supplying mercenaries to Tyre (xxvii. 10), and as sharing with Cush, Lud, and other helpers of Egypt, in her fall (xxx. 5); and again, with Persia, and Cush, perhaps in the sense of mercenaries, as warriors of the army of Gog (xxxviii. 5). From these passages we cannot infer anything as to the exact position of this country or people; unless indeed in Nahum, Cush and Phut, Mizraim and Ludim are respectively connected, which might indicate a position south of Egypt. The serving in the Egyptian army, and importance of Phut to Egypt, make it reasonable to suppose that its position was very near.

In the ancient Egyptian inscriptions we find two names that may be compared to the Biblical Phut. The tribes or peoples called the Nine Bows, IX PETU or IX NA-PETU, might partly or wholly represent Phut. Their situation is doubtful, and they are never found in a geographical list, but only in the general statements of the power and prowess of the kings. If one people be indicated by them, we may compare the Naphtalan of the Bible. [NAPHTALAN.] It seems unlikely that the Nine Bows should correspond to Phut, as their name does not occur as a geographical term in use in the directly historical inscriptions, though it may be supposed that several well-known names there take its place as those of individual tribes; but this is an improbable explanation. The second name is that of Nubia. TO-PETU, "the region of the Bow," whence we conjecture the name of Meroë to come. In the geographical lists the latter form occurs in that of a people, ANU-MERU-PET, found, unlike all others, in the lists of the southern peoples and countries as well as the northern. The character we read PET is an unstrung bow, which, until lately was read KENS, as a strung bow is found following, as if a determinative, the latter word, which is a name of Nubia, perhaps, however, not including so large a territory as the names before mentioned. The reading KENS is extremely doubtful, because the word does not signify bow in Egyptian, as far as we are aware, and still more so because the bow is used as the determinative of its name PET, which from the Egyptian usage as a determinative makes it almost impossible that it should be employed as a determinative of KENS. The name KENS would therefore be followed by the bow to indicate that it was a part of Nubia. This subject may be illustrated by a passage of the Herodotean, explained by Mr. Harris of Alexandria, if we premise that the unstrung bow is the common sign, and, like the strung bow, is so used as to be the symbol of Nubia. The historian relates that the king of the Ethiopians unstrung a bow, and gave it to the merchants of Cumrybes, telling them to break it in two when the king of Persia could pull so strong a bow so easily, he might come against the Ethiopians with an army stronger than their forces (iii. 21, 22, ed. Rawinson: Sir G. Wilkinson's note). For the hieroglyphic names see Brugsch's Geogr. Inschr. 2523

The Coptic Νυφαυτα must also be compared with Phut. The first syllable being the article, the word nearly resembles the Hebrew name. It is applied to the western part of Lower Egypt beyond the Delta; and Champollion conjectures it to mean the Libyan part of Egypt, so called by the Greeks, comparing the Coptic name of the similar eastern portion, Τερμπεθιατε, the older Arabian part of Egypt and Arabian Nome (L'Egypte sous les Pharaons, ii. pp. 28-31, 243). Be this as it may, the name seems nearer to NAPHTALIN than to Phut. To take a broad view of the question, all the names which we have mentioned may be reasonably connected with the Hebrew Phut and it may be supposed that the Naphtalan were Mizraites in the territory of Phut; perhaps intermixed with peoples of the latter stock. It is, however, reasonable to suppose that the PET of the ancient Egyptians, as a geographical designation, corresponds to the Phut of the Bible, which would therefore denote Nubia or the Nubians, the former, if we are strictly to follow the Egyptian usage. This identification would account for the position of Phut after Mizraim in the list in Genesis, notwithstanding the order of the other names; for Nubia has been from remote times a dependency of Egypt, excepting in the short period of Ethiopian supremacy, and the longer time of Ethiopian independence. The Egyptian name of Cush, KEESH, is applied to a wider region well corresponding to Ethiopia. The governor of Nubia in the time of the Ptolemies was called Prince of KEESH, perhaps because his authority extended beyond Nubia. The identification of Phut with Nubia is to be noted; the prophetic prophecies and in the prophetic books, on the contrary, the great importance of Nubia in their time, which comprehended that of the Ethiopian supremacy, would account for their

which was a larger circuit, measuring 940 feet by 1200, containing the minor one and the canal." The temple is entirely ruined, but the names of Ramses II. of the XIXth dynasty, Userken I. (Osorchen I.) of the XXIIId, and Nekht-har-heb (Necta-nebo I.) of the XXXth, have been found here, as well as that of the eponymous goddess BAST. There are also remains of the ancient houses of the town, and, amongst the houses on the W. side are the thick walls of a fort, which protected the temple below." (Notes by Sir G. Wilkinson in Rawlinson's Herodotus, vol. ii. pp. 219, plan, and 102). Balubast thus had a fort, besides being strong from its height.

The goddess BAST, who was here the chief object of worship, was the same as PESHT, the goddess of fire. Both names accompany a lion-headed figure, and the cat was sacred to them. Herodotus considers the goddess Balubast to be the same as Artemis (ii. 137), and that this was the current opinion in Egypt in the Greek period is evident from the name Sepos Artemidos of a rock temple dedicated to PESHT, and probably of a neighboring town or village. The historian speaks of the annual festival of the goddess held at Balubast as the chief and most largely attended of the Egyptian festivals. It was evidently the most popular, and a scene of great license, like the great Muslim festival of the Suyyid el-Badawee celebrated at Tanteh in the Delta (ii. 59, 60).

There are scarcely any historical notices of Balubast in the Egyptian annals. In Manetho's list it is related that in the time of Boethos, or Bochos, first king of the 11th dynasty (n. c. cir. 2470), a chasm of the earth opened at Balubast, and many perished (Cory's Ancient Fragments, 24 ed. pp. 98, 99). This is remarkable, since, though shocks of earthquakes are frequent in Egypt, the actual earthquake is of very rare occurrence. The next event in the list connected with Balubast is the accession of the XXIIId dynasty (n. c. cir. 990), a line of Balubastite kings (Ibld. pp. 124, 125). These were either foreigners or partly of foreign extraction, and it is probable that they chose Balubast as their capital, or as an occasional residence, on account of its nearness to the military settlements. [MISRIS.] Thus it must have been a city of great importance when Ezekiel thus foretold its doom: "The young men of Aven and of Pi-beseth shall fall by the sword; and these [cities] shall go into captivity" (xxx. 17). Heliopolis and Balubast are near together, and both in the route of an invader from the east marching against Memphis.

R. S. P.

*In Egyptian mythology, the goddess PESEHT, the divinity of Balubast, is described as the best-beloved of Ptah. To her was attributed the creation of the Asiatic race, which immediately succeeded the creation of the Egyptians by Ra, the Sun-god. She appears also as the avenger of crimes, and in this character is depicted with the head of a cat. Perhaps under the two forms of creating and punishing, she represented the mother ray as both vivifying and destructive. But she was also presented under a gracious aspect toward men, and then, as at Balubast, the cat's head was her symbol. Some good examples of this are to be seen in the Museums of Berlin, Leyden, and the Louvre at Paris.

Diodorus (i. 27) has an inscription concerning Isis, which says: "I am queen of the whole country, brought up by Herues: I am the eldest daughter of the youngest god, Chronos. For me Balubast was built." But Isis personated various divinities, and sometimes Peshl, appearing with the cat's head, and the usual symbols of that goddess (Bunsen, i. 420).

J. P. T.

PICTURE. a In two of the three passages it which "picture" is used in A. V. it denotes idolatrous representations, either independent images or more usually stones "portrayed," i. e. sculptured in low relief, or engraved and colored (Ex. xxxii. 14; Layard, Nin. & Bel. ii. 306, 308). Movable pictures, in the modern sense, were doubtless unknown to the Jews; but colored sculptures and drawings on walls or on wood, as mummy cases, must have been familiar to them in Egypt (see Wilkinson, Aeg. Egypt. ii. 277). In later times we read of wall portraits (e. g. perhaps busts or intagli sent by Alexander to Antony (Joseph. Ant. xx. 2 § 6). The "pictures of silver" of Prov. xxv. 11, were probably wall-surfaces or cornices with carvings, and the "apples of gold" representations of fruit or foliage, like Solomon's flowers and pomegranates (I. K. vi. vii). The walls of Babelon were ornamented with pictures on enameled brick. [BIBLCS.] H. W. P.

PIECE OF GOLD. The A. V., in rendering the elliptical expression "six thousand of gold," in a passage respecting Naaman, relating that he who "took with him ten talents of silver, and six thousand of gold, and ten changes of raiment" (2 K. v. 5), supplies "pieces" as the word understood. The similar expression respecting silver, in which the word understood appears to be shekels, probably justifies the insertion of that definite word. [PIECE OF SILVER] The same expression, if a weight of gold be here meant, is also found in the following passage: "And king Solomon made two hundred targets [of gold] and six hundred shields of gold, and supplied him with one target" (I K. x. 16). Here the A. V. supplies the word "shekels," and there seems no doubt that it is right, considering the number mentioned, and that a common weight must be intended. That a weight of gold is meant in Naaman's case may be inferred, because it is extremely unlikely that coined money was already invented at the time referred to, and indeed that it was known in Palestine before the Persian period. [MONEY; DARIUS.] Rings or ingots of gold may have been in use, but we are scarcely warranted in supposing that any of them bore the name of shekels, since the practice was to weigh money. The rendering "pieces of gold" is therefore very doubtful; and "shekels of gold," as designating the value of the whole quantity, not individual pieces, is preferable. R. S. P.

* PIECE OF MONEY. [STATER.] PIECE OF SILVER. The passages in the O. T. and those in the N. T. in which the

safe cabinet! A. V. "chamber of imagery!" Luther schlüssten kammer. [IMAGERY, CHAMBERS OF, AMER. ed.]

A V. uses this term must be separately considered.

I. In the O. T. the word "pieces" is used in the A. V. for a word understood in the Hebrew, if we except one case to be afterwards noticed. The phrase is always "a thousand" or the like "of silver" (Gen. xxv. 16, xxxvii. 28, xlv. 22; Judg. ix. 4, xvi. 5; 2 K. vi. 25; Hos. iii. 2; Zech. xi. 12, 13). In similar passages the word "shekels" occurs in the Hebrew, and it must be observed that these are either in the Law, or relate to purchases, of some of an important legal character, as that of the purchase and field of Machpeleah, that of the threshing-floor and oven of Araunah, or to taxes, and the like (Gen. xxviii. 15, 16; Ex. xxi. 26; Lev. xxvii. 5, 16; Josh. vii. 21; 2 Sam. xxiv. 24; 1 Chr. xii. 25, where, however, shekels of gold are spoken of; 2 K. xv. 29; Neh. v. 15; Jer. xxviii. 9). There are other passages in which the A. V. supplies the word "shekels" instead of "pieces".

(Dent. xxvii. 19, 24; Judg. xiii. 2, 3, 4, 10; 2 Sam. xviii. 11, 12), and of these the first two require this to be done. It becomes then a question whether there is any ground for the adoption of the word "pieces," which is vague if actual coins be meant, and inaccurate if weights. The shekel, be it remembered, was the common weight for money, and therefore most likely to be understood in an elliptical phrase. When we find good reason for concluding that in two passages (Dent. xxvii. 19, 20) this is the word understood, it seems incredible that any other should be in the other places. The exceptional case in which a word corresponding to "pieces" is found in the Hebrew is in the Psalms, where presents of submission are prophesied to be made of "pieces of silver," פֶּֽפָּרָ֣נָה (xviii. 30, Heb. 31). The word וָֽקַנָּה, which occurs nowhere else, if it preserve its radical meaning, from וָ֣קַנָּא, must signify a piece broken off, or a fragment: there is no reason to suppose that a coin is meant.

II. In the N. T. two words are rendered by the phrase "piece of silver," drachma, δρακόνη, and ἡ ἄργυσσα (14). In the first (Luke vi. 8, 9) should be represented by drachma. It was a Greek silver coin, equivalent, at the time of St. Luke, to the Roman denarius, which is probably intended by the Evangelist, as it and then wholly or almost superseded the former. (Deut. xxviii. 12.) (2) The second word is very properly thus rendered. It occurs in the account of the betrayal of our Lord for thirty pieces of silver (Matt. xxvi. 15, xxvii. 3, 5, 6, 9). It is difficult to ascertain what coins are here intended. If the most common silver pieces be meant, they would be denarius. The parallel passage in Zechariah (xi. 12, 13) must, however, be taken into consideration, where, if our view be correct, shekels must be understood. It may, however, be suggested that the two thirty may correspond, not as of exactly the same coin, but of the chief current coin, some light may be thrown on our difficulty by the number of pieces. It can scarcely be a coincidence that thirty-shekels of silver was the price of blood in the case of a slave accidentally killed (Ex. xxi. 32). It may be objected that there is no reason to suppose that shekels were current in our Lord's time: but it must be replied that the tetradrachms of depreciated Attic weight of the Greek cities of Syria of that time were of the same weight as the shekels which we believe to be of Simon the Macabee (Money), so that Josephus speaks of the shekel as equal to four Attic drachms (Ant. iii. 8, § 2). These tetradrachms were common by the time of our Lord, and the piece of money found by St. Peter in the fish must, from its name, have been of this kind. (State.) It is therefore more probable that the thirty pieces of silver were tetradrachms than that they were denarius. There is no difficulty in the use of two terms, a name designating the denomination and a piece of silver, whether the latter mean the tetradrachm or the denarius, as it is a vague appellation that implies no special distinctive name. In the received text of St. Matthew the prophecy as to the thirty pieces of silver is ascribed to Jeremiah, and not to Zechariah, and much controversy has thus been occasioned. The true explanation seems to be suggested by the absence of any prophet's name in the Syriac version, and the likelihood that similarity of style would have caused a copyist inadvertently to insert the name of Jeremiah instead of that of Zechariah. (Acedama, Anno, ed.)

PIETY. This word occurs but once in A. V.: "Let them learn first to show piety at home" (Tit. iii. 4). The choice of this word here instead of the more usual equivalents of "godliness," "piety," and the like, was probably determined by the specific sense of piety, as "good parents" (1 Pet. iii. 22; Psalms, xlv. 9, or ii. 22). It does not appear in the earlier English versions, and we may recognize in its application in this passage a special felicity. A word was wanted for εὐεργεσία, which, unlike "showing godliness," would admit of a human as well as a divine object, and this piety supplied.

PIGEON. [Turtle-Dove.]

PILATE, PONTIUS (Πῶντιος Πόντιος, [Πολίτιος, Tisch., 5th ed.]: Pontius Pilatus, his praenomen being unknown). The name indicates that he was connected by descent or adoption, with...
the gens of the Pontii, first conspicuous in Roman history in the person of C. Pontius Telesinus, the great Somnium general. A He was the sixth Roman procurator of Judea, and under him our Lord worked, suffered, and died, as we learn, not only from the obvious Scriptural authorities, but from Tacitus (Ann. xvi. 44, "Christus Tiberio imperante, per procuratorem Pontium Pilatom suplicio adfectus est."). A procurator (Stallmeyer, Philo, Leg. ad Coluin, and Joseph. B. J. ii. 5, § 2) but less correctly by Tacitus, Matt. xxvii. 2; and Joseph. Ant. xviii. 3, § 1) was generally a Roman knight, appointed to act under the governor of a province as collector of the revenue, and judge in causes connected with it. Strictly speaking, procuratores Caesaris were only required in the imperial provinces, i.e. those which, according to the constitution of Augustus, were reserved for the special administration of the emperor, without the intervention of the senate and people, and governed by hislegate. In the senatorian provinces, governed by procurators, the corresponding duties were discharged by quaestors. Yet it appears that sometimes procuratores were appointed in those provinces also, to collect certain dues of the fiscus (the emperor's special revenue), as distinguished from those of the aevrum (the revenue administered by the senate). Sometimes in a small territory, especially in one contiguous to a larger province, and dependent upon it, the procurator was head of the administration; and had full military and judicial authority, though he was responsible to the governor of the neighboring province. Thus Judea was attached to Syria upon the deposition of Archelaus (A. D. 6-14), and a procurator appointed to govern it, with Caesarea for its capital. Already in a temporary absence of Archelaus, it had been in charge of the procurator Sabinius; then, after the ethnarch's banishment, came Coponius; the third procurator was M. Ambivius; the fourth, Annius Rufus; the fifth Valerius Gratius; and the sixth Pontius Pilate (Joseph. Ant. xviii. 2, § 2), who was appointed A. D. 25-26, in the twelfth year of Tiberius. One of his first acts was to remove the headquarters of the army from Caesarea to Jerusalem. The soldiers of course took with them their standards, bearing the image of the emperor, into the Holy City. No previous governor had ventured on such an outrage. Pilate had been obliged to send them in by night, and there were no bounds to the rage of the people on discovering what had thus been done. They poured down in crowds to Caesarea where the procurator was then residing, and besought him to remove the images. After five days of discussion, he gave the signal to some concealed soldiers to surround the petitioners, and put them to death unless they ceased to trouble him; but this only strengthened their determination, and they declared themselves ready rather to submit to death than forego their resistance to an odious innovation. Pilate then yielded, and the standards were by his orders brought down to Caesarea (Joseph. Ant. xviii. 3, §§ 1, 2. B. J. ii. 9, §§ 2-4). On two other occasions he nearly drove the Jews to insurrection; the first when, in spite of this warning about the images, he hung up in his palace at Jerusalem some gilt shields inscribed with the names of deities, which were only removed by an order from Tiberius (Philo, ad Coluin, § 38, ii. 589): the second when he appropriated the revenue arising from the redemption of vows (Corban; comp. Mark vii. 11) to the construction of an aqueduct. This order led to a riot, which he suppressed by sending among the crowd soldiers with concealed clubs. He had given a great feast to the leaders of the rioters, but of casual spectators (Joseph. B. J. ii. 9, § 4). To these specimens of his administration, which rest on the testimony of profane authors, we must add the slaughter of certain Galileans, which was told to our Lord as a piece of news (Mch. 27; Luke xiii. 1), and on which He founded some remarks on the connection between sin and calamity. It must have occurred at some feast at Jerusalem, in the outer court of the Temple, since the blood of the worshippers was mingled with their sacrifices; but the silence of Josephus about it seems to show that riots and massacres on such occasions were so frequent that it was needless to recount them all.

It was the custom for the procurators to reside at Jerusalem during the great feasts, to preserve order, and accordingly, at the time of our Lord's last passover, Pilate was occupying his official residence in Herod's palace; and to the gates of this palace Jesus, condemned on the charge of blasphemy, was brought early in the morning by the chief priests and officers of the Sanhedrin, who were unable to enter the residence of a gentle, best followed by a violent outbreak, and the attempt had not been repeated (Ewald, Geschichtc, iv. 509). The extent to which the scourges of the Jews on this point were respected by the Roman governors, is shown by the fact that no effigy of either god or emperor is found on the money coined by them in Judea before the time of Augustus (Ewald, Ist. v. 20. "Les monnaies d'offrandes aux dieux, recevront sur le Numismatique Judaque, pl. vii., ix.") Assuming this, the denarius with Caesar's image and superscription of Matt. xxvii. must have been a coin from the Roman mint, or that of some other province. The latter as well as the former was probably current for the common purposes of life. The shekel alone was received as a Temple-offering.

E. H. P.

d Ewald suggests that the Tower of Sion may have been part of the same works, and that this was the reason why its fall was looked on as a judgment (Geschichtc, vi. 40; Luke xiii. 4). The Plurisric reverence for whatever was set apart for the Corban (Mark vii. 11), and their scruples as to admitting into it anything that had an impure origin (Matt. xxvii. 5), may be regarded, perhaps, as outgrowths of the common feeling.

F. H. P.
they should be defiled, and unfit to eat the passover (John xviii. 28). Pilate therefore came out to
earn his purpose, and denounced the nature of the
charge. At first they seem to have expected
that he would have carried out their wishes without
further inquiry, and therefore merely described
our Lord as a κακοστριώτης (disturber of the public
peace), but as a Roman procurator he had too much
respect for justice, or at least understood his busi-
ness too well to consent to such a condemnation,
and as they knew that he would not enter into
the intricacies of their questions, he addressed
words did on a somewhat similar occasion (Acts
xviii. 14); they were obliged to devise a new charge,
and therefore interpreted our Lord's claims in a
political sense, accusing him of assuming the royal
title, perveting the nation, and forbidding the
payment of tribute to Rome (Luke xxiii. 3; an
account plainly presupposed in John xviii. 33). It
is plain that from this moment Pilate was dis-
tracted between two conflicting feelings: a fear of
offending the Jews, who had already grounds of
accusation against him, which would be greatly
strengthened by any show of lukewarmness in pun-
ishing an offense against the imperial government,
and a conscious conviction that Jesus was innocent,
since it was absurd to suppose that a desire to free
the nation from Roman authority was criminal in
the eyes of the Sanhedrins. Moreover, this last
feeling was strengthened by his own hatred of the
Jews, whose religious scruples had caused him fre-
quent trouble, and by a growing respect for the
calm dignity and meekness of the sufferer.
First he examined our Lord privately, and asked Him
whether He was a king? The question which He
in return put to his judge, "Saidest thou this of
thyself, or did others tell thee of me?" seems to
imply that there was in Pilate's own mind a sus-
picion that the prisoner really was what He was
charged with being: a suspicion which shows itself
again in the later question, " Whence art thou?" (John
xix. 9), in the increasing desire to release Him
(12), and in the refusal to alter the inscrip-
tion on the cross (22). In any case Pilate accepted
as satisfactory Christ's assurance that his kingdom
was not of this world, that is, not worldly in its na-
ture or objects, and therefore not to be founded by
this world's weapons, though he could not under-
stand the assertion that it was to be established by
bearing witness to the truth. His famous reply,
" What is truth?" was the question of a worldly-
mined politician, skeptical because he was indif-
ferent; one who thought truth an empty name, or
at least could not see " any connection between
ἀλήθεια and γλαυκία, truth and policy" (Dr. C.
Wordsworth, Esom. in loco).
With this question he brought the interview to a close, and came out
to the Jews and declared the prisoner innocent.
To this they replied that his teaching had stirred up
call the people from Galilee to Jerusalem. The
mention of Galilee suggested to Pilate a new
way of escaping from his dilemma, by sending on
the case to Herod Antipas, brother of that coun-
ty, who had come up to Jerusalem to the feast,
while at the same time this gave him an opportuni-
ty for making overtures of reconciliation to Herod,
with whose jurisdiction he had probably in some
recent instance interfered. But Herod, though
prostituted by this act of courage, determined to
enter into the matter, and merely sent Jesus back to
Pilate dressed in a shining kingly robe (ἰσχυρὰ
λαμπρὰν, Luke xxiii. 11), to express his ridicule
of such pretensions, and contempt for the whole
business. So Pilate was compelled to come to a
decision, and first, having assembled the chief
priests and also the people, whom he probably sum-
mmoned in the expectation that they would be favor-
able to Jesus, he announced to them that the
accused had done nothing worthy of death, but at
the same time, in hopes of pacifying the Sanhe-
drins, he proposed to scourge Him before he re-
leased Him. But as the accusers were resolved to
have his blood, they rejected this concession, and
therefore Pilate had recourse to a fresh expedient.
It was the custom for the Roman governor to grant
every year, in honor of the Passover, pardon to one
condemned criminal. The origin of the practice
is unknown, though we may connect it with the
tale mentioned by Livy (v. 13) that at a Lectistern-
ium " vincis quoque dempta vincit. " Pilate
therefore offered the people their choice between two,
the murderer Barabbas, and the prophet whom a
few days before they had hailed as the Messiah.
Though they might have decided for the ascen-
"Bíxas", a portable tribunal which was carried about by
a Roman magistrate to be placed wherever he might
direct, and in which the present case was erected on
a tasseled pavement (Ἀδελθῷατον) in front of
the palace, and called in Hebrew Ḡobblathah,
probably from being laid down on a slight elevation
(πέδινον "to be high"). As soon as Pilate had
taken his seat, he received a mysterious message
from his wife, according to tradition a preeostyle of
the gate (θεοσοβίβ), named Proca or Claudia
Procula (Flavio, Nieus, i.), who had " suffered
many things in a dream," which impelled her to
interact her husband not to condemn the Just One.
But he had no longer any choice in the matter, for
the rabble, instigated of course by the priests, chose
Barabbas for pardon, and clamored for the death of
Jesus; insurrection seemed imminent, and Pi-
late reluctantly yielded. But, before issuing the
fatal order, he washed his hands before the multi-
tude, as a sign that he was innocent of the crime,
in imitation probably of the ceremony enjoined in
Dent. xxii., where it is ordered that when the per-
petrator of a murder is not discovered, the elders
of the city in which it occurs shall wash their
hands, with the declaration, " Our hands have not
shed this blood, neither have our eyes seen it."
Such a practice might naturally be adopted even
by a Roman, as intelligible to the Jewish multitude
around him. As in the present case it produced
no effect, Pilate ordered his soldiers to inflict the
severing preparatory to execution; but the sight of
mutilation so pitifully borne seems again to have troubled his conscience, and prompted a
new effort in favor of the victim. He brought
Him out bleeding from the savage punishment,
and decked in the scarlet robe and crown of thorns
which the soldiers had put on Him in derision,

A Comp. Barabas. Ewald suggests that the insur-
rection of which St. Mark speaks must have been that
connected with the appropriation of the Corban (sopka),
and that this explains the expression by which the
people demanded his release. He infers further, from
his name, that he was the son of a Rabbi (Abba was a
Rabbinical title of honor) and thus accounts for the part
taken in his favor by the members of the Sanhedrin.
and said to the people, "Behold the man!" hoping that such a spectacle would rouse them to shame and compassion. But the priests only renewed their clamors for his death, and, fearing that the political charge of treason might be consid- ered insufficient, returned to their first accusation of blasphemy, and quoting the law of Moses (Lev. xxiv. 16), which punished blasphemy with stoning, declared that He must die "because He made Himself the Son of God." But this title of the text augmented Pilate's superfluous fears, already aroused by his wife's dream (μαθαων ερο-βηνον, John xix. 12), and so, he was one of the heroes or demigods of his own mythol- ogy; he took Him again into the palace, and in- quired anxiously into his descent ("Whence art thou?"") and his claims, but, as the question was only prompted by fear or curiosity, Jesus made no reply. When Pilate reminded Him of his own absolute power over Him, He closed this last con- versation with the irresolute governor by the mournful remark, "Thou couldst have no power at all against me, except it were given thee from above: therefore he that delivered me unto thee hath the greater sin." God had given to Pilate power over Him, and power only, but to those who delivered Him up God had given the means of judging of His claims; and therefore Pilate's sin, in merely exercising this power, was less than theirs who were the priests, with the Scripture before them, and the word of prophecy still alive among them (John xi. 50, xviii. 14), had deliber- ately conspired for his death. The result of this interview was one last effort to save Jesus by a fresh appeal to the multitude; but now arose the formidable cry, "If thou let this man go, thou art not Caesar's friend," and Pilate, to whom political success was as the breath of life, again ascended the tribunal, and finally pronounced the desired condemnation. a

So ended Pilate's share in the greatest crime which has been committed since the world began. That he did not immediately lose his feelings of anger against the Jews who had thus compelled his acquiescence, and of compassion and awe for the sufferer whom he had unrighteously sentenced, is plain from his curt and angry refusal to alter the inscription which he had prepared for the cross (β γέραφα, γέραφα), his ready acquiescence in the request made by Joseph of Arimathea that the Lord's body might be given up to him rather than consigned to the common sepulchre reserved for those who had suffered capital punishment, and his

The proceedings of Pilate in our Lord's trial sup- ply many interesting illustrations of the accuracy of the Evangelists, from the accordance of their narrative with the known customs of the time. Thus Pilate, being only a procurator, had no prerogative to conduct the trial, and therefore examined the prisoner himself. Again, in early times Roman magistrates had not been allowed to take their wives with them into the provin- ces, but this prohibition had fallen into neglect, and latterly a proposal made by Crecina to enforce it had been rejected (Tac. Ann. lii. 33, 34). Grotius points out that the word ανευρευτων, used when Pilate sends our Lord to Herod (Luke xxiii. 7) is " proprio Romani juris, unde quasi in cautello auctoritate reus qui alicubi comprehen- sisse mittitur ad judicem aut originis aut habitatio- nis (see Alford, in loco). The tessellated pavement (Lc- θοστρυμα) was so necessary to the forums of justice, as well as the βιαν, that Julius Caesar carried one about with him on his expeditions (Suet. Jul. c. 46). The

sullen answer to the demand of the Sanhedrin that the sepulchre should be guarded. b And here, as far as Scripture is concerned, our knowledge of Pilate's career ends. But we learn from Josephus (Ant. xviii. 4, § 1) that his anxiety to avoid giving offense to Caesar did not save him from political disaster. The Samaritans were inept and rebellious. A leader of their own race had promised to disclose to them the sacred treasures which Moses was reported to have concealed in Mount Gerizim.c Pilate led his troops against them, and defeated them easily enough. The Samaritans complained to Vitellius, now prefect of Syria, and led Pilate to Rome to answer their accusations before the emperor (Ibid. § 2). When he reached it, he found Tiberius dead and Caius (Ca- igula) on the throne, A. D. 36. Eusebius adds (H. E. ii. 7) that soon afterwards, "weary with misfortunes," he killed himself. As to the scene of his death there are various traditions. One is, that he was banished to Vienna Allforobocum (Vienne on the Rhone), where a singular monu- ment, a pyramid on a quadrangular base, 52 feet high, is called Pontius Pilate's tomb (Dictionary of Geography, art. "Vienna"). Another is, that he sought to hide his sorrows on the mountain by the lake of Lucerne, now called Mount Pilatus; and there, after spending years in its recesses, in remorse and despair rather than penitence, plunged into the dismal lake which occupies its summit,

According to the popular belief, "a form is often seen to emerge from the gloomy waters, and go through the action of one washing his hands; and when he does so, dark clouds of mist gather first round the bosom of the infernal lake (such it has been styled of old), and then, wrapping the whole upper part of the mountain in darkness, presage a tempest or hurricane, which is sure to follow in a short space." (Scott, "Anne of Geierstein," ch. i.) (See below)

We learn from Justin Martyr (Apol. i. pp. 70, 84), Tertullian (Apol. c. 21), Eusebius (H. E. ii. 2), and others, that Pilate made an official report to Tiberius of our Lord's trial and condemnation, and in a hasty ascribed to Chrysostom, though marked as spurious by his Benedictine editors (Horn, viii. in Prach. vol. viii. p. 983, 1). Certain λεγουμενα (Acta, or Commentarii Pilati) are spoken of as well-known documents in common cir- culation. That he made such a report is highly probable, and it may have been in existence in Chrysostom's time: but the Acta Pilati now extant in Greek, and two Latin epistles from him to

a The proceedings of Pilate in our Lord's trial sup- ply many interesting illustrations of the accuracy of the Evangelists, from the accordance of their narrative with the known customs of the time. b Matt. xxvi. 65, ξηρε κοννυσταδνδ θηνγετε, δαφι- λιασθε ας οδασιας. Ellicott would translate this, "Take a guard," on the ground that the watchers were Roman soldiers, who were not under the command of the priests. But some might have been placed at their disposal during the feast, and we should rather expect λαβειε if the sentence were imperative.

c Ewald (Geschichte, v. 45) ventures on the con- jecture that this Samaritan leader may have been Simon Magus. The description fits in well enough; but the class of such impostors was so large, that there are but slight grounds for fixing on him in par- ticular.

E H. P. 159
the emperor (Fabric. Col. Apoc. N. T. i. 237, 298, iii. 496), are certainly spurious. (For further particulars see below.)

The character of Pilate may be sufficiently inferred from the sketch given above of his conduct at our Lord's trial. He was a type of the rich and corrupt Romans of his age; a worldly-minded statesman, conscious of no higher wants than those of wealth and power. In his practice of Roman governors, and the difficulties of dealing with a nation so arrogant and perverse. Certainly there is nothing in the facts recorded by profane authors inconsistent with his desire, obvious from the Gospel narrative, to save our Lord. But all his better feelings were overpowered by a selfish regard for his own security. He would not encounter the least hazard of personal annoyance in behalf of innocence and justice; the unrighteous condemnation of a good man was a trade in comparison with the fear of the emperor's frown and the loss of place and power. While we do not differ from Chrysostom's opinion that he was "apathetic" (Chrys. i. 892, ed. Jodocus, vi.), or that recorded in the Apostolical Constitutions (v. 14), that he was "avrograoj, we yet see abundant reason for our Lord's merciful judgment, "He that delivered me unto thee hath the greater sin." At the same time his history furnishes a proof that worldliness and want of principle are sources of crimes no less awful than those which spring from deliberate and reckless wickedness. The unhappy notoriety given to his name by its place in the two universal creeds of Christendom is due, not to any desire of singing him out for shame, but to the need of fixing the date of our Lord's death, and so bearing witness to the claims of Christianity to rest on a historical basis (August. De Pict. et Symb. c. vi. vol. vi. p. 156; Person, On the Gospels, pp. 259, 298, ed. Burt, and the authorities quoted in note c).

The number of dissertations on Pilate's character and all the circumstances connected with him, his "facinora," his "Christian servandi studium," his wife's dream, his supposed letters to Tiberius, which have been published during the last and present centuries, is quite overwhelming. The student may consult with advantage Dean Alford's Commentary, and other works under the life of our Lord, sect. vi.; Neander's Life of Christ, § 293 (Hohn); Winet, Rechtsverkehr, art. "Pi- latus;" Ewald, Geschichte, v. 39, 4o. E. L. C.

ACTA PILATI. — The number of extant Acta Pilati, in various forms, is so large as to show that very early the demand created a supply of biographies, manifestly spurious, and we have no reason for looking on any one of those that remain as more authentic than the others. The taunt of Celsius that the Christians circulated spurious or distorted narratives under this title (Orig. c. Cels. vii.) and the complaint of Eusebius (H. E. ix. 5) that the heathens made them the vehicle of blasphemous calumnies, show how largely the machinery of fabrication was used on either side. Such of these documents as are extant are found in the collections of Fabricius, Thilo, and Tischendorf. Some of them are but weak paraphrases of the Gospel history. The most extravagant are perhaps the most interesting, as indicating the existence of modes of thought at variance with the prevalent traditions. Of these anomalies the most striking is that known as the "Pamphilia Pilati" (Tischendorf, Evangel. Apoc. p. 425). The emperor Tiberius, startled at the unexampled darkness that had fallen on the Roman Empire on the day of the Crucifixion, summons Pilate to answer for having caused it. He is condemned to death, but before his execution he prays to the Lord Jesus that he may not be destroyed with the wicked Hebrews, and pleads his ignorance as an excuse. The prayer is answered by a voice from heaven, assuring him that all generations shall call him blessed, and that he shall be a witness for Christ at his second coming to judge the twelve tribes of Israel. An angel receives his head, and his wife dies filled with joy, and is buried with him. Starting as this imaginary history may be, it has its counterpart in the traditional customs of the Abyssinian Church, in which Pilate is recognized as a saint and martyr, and takes his place in the calendar on the 25th of June (Stanley, Eastern Church, p. 124; Neale, Eastern Church, p. 860). The words of Tertullian, describing him as "jam pro sui conscientia Christi"mianum (Apol. c. 21), indicate a like feeling, and we find traces of it also in the Aposynphal Gospel, which speaks of him as "meirineisein in flesch, but circumsised in heart" (Evangel. Nicol. i. 12, in Tischendorf, Evangel. Apoc. p. 236).

According to another legend (Mons Pilati, in Tischendorf's Evangel. Apoc. p. 432), Tiberius, hearing of the wonderful works of healing that had been wrought in Judaea, writes to Pilate, bidding him to send to Rome the man that had this divine power. Pilate has to confess that he has crucified him: but the messenger meets Veronica, who gives him the cloth which had received the impress of the divine features, and by this the emperor is healed. Pilate is summoned to take his trial, and presents himself wearing the holy and seamless tunic. This acts as a spell upon the emperor, and he forgets his wanted severity. After a time Pilate is thrown into prison, and there commits suicide. His body is cast into the Tiber, but as storms and tempests followed, the Romans take it up and send it to Vienna. It is thrown into the Elbe; but the same disasters follow, and it is sent on to Losania (Lucerne or Lusanne?). There it is sunk in a pond, fenced round by mountains, and even there the waters boil or bubble strangely. The interest of this story obviously lies in its presenting an early form of the tradition of the 14th century) of the local traditions which connect the name of Pilate with some memorable event of Judaea, and unites Mons Pilatus that overlooks the Lake of Lucerne. The received explanation (Russin, Modern Painters, c. 125) of the legend, as originating in a distortion of the descriptive name Mons Pilatus (the "cloud-capped"), supplies a curious instance of the genius of a myth from a false etymology; but it may be questioned whether it rests on sufficient grounds, and is not rather the product of a pseudo-criticism, finding in the name the starting-point, not the embodiment of a legend. Have we any evidence that

a This reference is given in an article by Leyer in Herzog's Real-Encyk., but the writer has been unable to verify it. The nearest approach seems to be the
the mountain was known as "Pileatus" before the legend? Have we not, in the apocryphal story just cited, the legend independently of the name? (comp. Vilmar, Deuch. Nation. Liter. i. 217).

Pilate's wife is also, as might be expected, prominent in these traditions. Her name is given as Claudia Procula (Nephep. H. E. i. 30). She had been a proselyte to Judaism before the Crucifixion (Evang. Nicol. c. 2). Nothing certain is known as to her history, but the tradition that she became a Christian is as old as the time of Origen (Inom. in Matt. xxxv.). The system of administration under the Republic forbade the governors of provinces to take their wives with them, but the practice had gained ground under the Empire, and Tacitus (Ann. iii. 33) records the failure of an attempt to reinforce the old regulation. (See p. 2529, note o.)

E. H. P.

PIL' DASH (πυλώδης) [flame of fire, First]: Philaei; Alex. Φελάς: Phelusa. One of the eight sons of Nahor, Abraham's brother, by his wife and niece, Milcah (Gen. xxii. 22). The settlement of his descendants has not been identified with any degree of probability. Bunsen (Belwalerk, Gen. xxii. 22) compares Ἱπποθόσα, a place in the northeast of Mesopotamia; but the resemblance of the two names is probably accidental.

PILEHA (πυληά) [vicious, slice]: Φαλά: [Vat. Φαλα, -ει joined with the following; F.A. Φαλά, -αι joined with the following; Alex. Φαλάι: Pholos]. The name of one of the chief of the people, probably a family, who signed the covenant with Nehebim ( Neh. x. 24).

* PILGRIMS. [Strangers.]

PILLAR. The notion of a pillar is of a shaft or isolated pile, either supporting or not supporting a roof. Pillars form an important feature in oriental architecture, partly perhaps as a reminiscence of the tent with its supporting poles, and partly also from the use of flat roofs, in consequence of which the chambers were either narrower or divided into portions by columns. The tent-principle is exemplified in the open halls of Persian and other eastern buildings, of which the fronts, supported by pillars, are shaded by curtains or awnings fastened to the ground outside by pegs, or to trees in the garden court (Esth. i. 6; Chardin, Voy. vii. 387, iv. 469, 470, and plates 39, 41; Layard, Ninev. & Babylon, pp. 530, 648; Burckhardt, Notes on Bed. i. 37). Thus also a figurative mode of describing

heaven is as a tent or canopy supported by pillars (Ps. civ. 2; Is. xl. 22), and the earth as a flat surface resting on pillars (1 Sam. ii. 8; Ps. lxxv. 3). [Tents, Anat. ed.]

It may be remarked that the word "place," in 1 Sam. xv. 12, is in Hebrew "hand," in the Arab tent two of the posts are called yer or "hand" (Burckhardt, Bed. i. 37).

The general practice in oriental buildings of supporting flat roofs by pillars, or of covering open spaces by awnings stretched from pillars, led to an extensive use of them in construction. In Indian architecture an enormous number of pillars, sometimes amounting to 1,000, is found. A similar principle appears to have been carried out at Persepolis. At Nineveh the pillars were probably of wood (CEDAR), and it is very likely that the same construction prevailed in the "house of the forest of Lebanon," with its hall and porch of pillars (1 K. vii. 2, 6). The "chapters" of the two pillars Jachin and Boaz resembled the tall capitals of the Persepolitan columns (Layard, Nin. & Babylon, pp. 252, 560; Nineveh, ii. 27; Ferguson, Hamah, pp. 8, 174, 178, 180, 190, 196, 198, 231-233; Roberts, Sketches, Nos. 182, 184, 190, 198; Eisele, 17th. Const. iii. 34, 38; Burckhardt, Trave. in Arabia, i. 244, 245).

But perhaps the earliest application of the pillar was the votive or monumental. This in early times consisted of nothing but a single stone or pile of stones. Instances are seen in Jacob's pillars (Gen. xxviii. 18, xxxvi. 46, 51, 52, xxxv. 14); in the twelve pillars set up by Moses at Mount Sinai (Ex. xxiv. 4); the twenty-four stones erected by Joshua (Josh. iv. 8, 9; see also Is. xix. 19, and Josh. xxiv. 27).

The trace of a similar notion may probably be found in the holy stone of Mecca (Burckhardt, Trav. in Arabia, i. 297). Monumental pillars have also been common in many countries and in various styles of architecture. Such were perhaps the obelisks of Egypt (Fergusson, 6, 8, 115, 246, 340; Ibn Batuta, Trav. p. 111; Strabo, iii. 171, 172; Herod. ii. 106; Amm. Marc. xix. 4; Joseph. Ant. i. 2, § 3, the pillars of Seth).

The stone Ezel (1 Sam. xx. 19) was probably a terminal stone or a waymark.

The "place" set up by Saul (1 Sam. xx. 12) is explained by St. Jerome to be a trophy, Vulg. fornicem triumphalem (Jerome, Quodl. Hdb. in lib. i. Reg. iii. 1339). The word used is the same as that for Absalom's pillar, Matita-bah, called by Josephus χειρα (Ant. viii. 10, § 3), which was clearly of a monumental or memorial character, but not

a The extent to which the terror connected with the belief formerly prevailed is somewhat startling. If a stone were thrown into the lake, a violent storm would follow. No one was allowed to visit it without a special permission from the authorities of Lucerne. The neighboring shepherds were bound by a solemn oath, renewed annually, never to guide a stranger to it (Gessner, Descript. Mont. Plata, p. 40, Zurich, 1555). The spell was broken in 1584 by Johannes Müller, scribe of Lucerne, who was bold enough to throw stones and abide the consequences. (Galber, Lucers Pötersques de Suisse, p. 237.) It is striking that traditions of Pilate attach themselves to several localities in the South of France (comp. Murray's Handbook of France, Route 125).

b If it were possible to attach any value to the index of St. Matthew's Gospel, of which portions have been published by Simonkies, as belonging to the 1st century, the name of Pempele might claim precedence.
Especially would this be the case if the singular expression, "it hath hewn all the words of Jehovah our God which He spake unto us," were intended to indicate that this stone had been brought from Sinai, Jordan, or some other scene of the communications of Jehovah with the people. The Samaritans still show a range of stones on the summit of Gerizim as those brought from the bed of Jordan by the twelve tribes.

G.

**PILLED** (Gen. xxx. 37, 58): Peeled (Is. xviii. 21; Ez. xxiv. 18) [Tob. xi. 13]. The verb "to pill," appears in old English, as identical in meaning with "to peel = to strip," and in this sense is used in the above passages from Genesis. Of the next stage in its meaning as = plunder, we have traces in the word "pillage," "piller." If the difference between the two forms be more than accidental, it would seem as if in the English of the 17th century "peel" was used for the latter signification. The "people scattered and peeled," are those that have been plundered of all they have. The soldiers of Nebuchadnezzar's army (Ez. xxi. 18), however, have their shoulder peeled in the literal sense. The skin is worn off with carrying earth to pulp up the mounds during the protracted siege of Tyre. "Pilled" has the sense of "wield" in Lev. xiii. 40 many.]

H. W. P.

**PILLAR, PLAIN OF THE (πηλτος της βαλανης της εσπερης της σταιως) Alex. omits της εσπερης: quaeque qua stabat, or rather "ask of the pillar" — that being the real signification of the Hebrew word ehun. A tree which stood near Shechem, and at which the men of Shechem and the house of Millo assembled, to crown Abimelech son of Gideon (Judg. ix. 6).

There is nothing said by which its position can be ascertained. It possibly derived its name of Muttabah, from the pillar set up by Joshua for his sepulchre; but reasons have already been adduced for believing that this tree may have been the same with that under which Jacob buried the idols and idolatrous trinkets of his household, and under which Joshua erected a stone as a testimony of the covenant there reenacted between the people and Jehovah. [ME-NESEMIN.] There was both time and opportunity during the period of construction which followed the death of Joshua for this sanctuary to return into the hands of the Canaanites, and the stone left standing there by Joshua to become appropriated to idolatrous purposes as one of the Muttabahs in which the religion of the aborigines of the Holy Land delighted. [Ish. ii. 119a.]

In the terms in which Joshua speaks of this very stone (Josh. xxiv. 27) almost seem to overtop the bounds of mere imagery, and would suggest and warrant its being afterwards regarded as endowed with miraculous qualities, and therefore a fit object for veneration.

d Comp. "peeling their prisoners," Milton, P. R. iv

"To peel the chieft, the people to devour." Dryden, Homer, Iliad (Richardson).

c, "revolve" = revolvi = pinus (Is. xv. 13); from "revolve" = revolute (Ges. p. 323). In Is. xvi. 19, βασιλιαρχινus.
to be the Indian plane, the larch and the elm (Cels. Hist. lib. ii. 271). But the rendering "pine" seems least probable of any, as the root implies either curvature or duration, of which the latter is not particularly applicable to the pine, and the former remarkably so.

The rendering in Is. xli. 19, ἔσαρχω, appears to have arisen from a confusion amalgamation of the words βάρσις and τιλθορ, which follow each other in that passage. Of these ἔσαρχω is sometimes rendered "express," and might stand for "juniper." That species of juniper which is called savin, is in Greek βάρσις.

The word δαμαρ is merely an expression in Greek letters for τιλθορ (Plin. xxiv. 11, 61; Schleusener, s. v.; Cels. Hist. b. i. 78.) [Fin.]

2. Shemen (Neh. viii. 15) is probably the wild olive. The cultivated olive was mentioned just before (Gen. p. 1437).

H. W. P.

It is plain, 1. that τὸ πετρόγυμνον is not a pine cone, but the pine male. 2. That by the word itself we should understand an edge or border, like a feather or a fin. The only part of the Temple which answered to the modern sense of pinnacle was the golden spikes erected on the roof, to prevent birds from settling there (Joseph. B. J. iv. 5, § 6.) To meet the sense, therefore, of "wing," or to use our modern word "faced" on the same notion, "aisle." Lightfoot suggests the porch or vestible which projected, like shoulders on each side of the Temple (Joseph. B. J. v. 5, § 4; Vitruv. iii. 2).

Another opinion fixes on the royal porch adjoining the Temple, which rose to a total height of 400 cubits above the Valley of Jehoshaphat (Joseph. Ant. xxv. 11, § 5, xx. 9, § 7).

Eusebius tells us that it was from "the pinnacle (τὸ πετρό)" that St. Peter was supposed to have preached, and it is said to have remained until the 4th century (Euseb. H. E. ii. 23; Williams, Holy City, ii. 338).

Perhaps in any case τὸ πετρό means the battle-ground held by order to be added to every roof. It is in favor of the word that the crown Caph is used to indicate the top of the Temple (Dan. iv. 27; Hammond, Grotius, Calmet, De Wette, Lightfoot, ii. Hebr. on Matt. iv.).

H. W. P.

Pyron (πῦρ [darkness, obscurity?] : Pho- no; [Alex. in Gen. Phōnes; Vat. in I Chr. Φόνος]: Phōnos). One of the "dukes" of Edon: that is, the founder of a tribe of that pecipitation (Gen. xxxvi. 41; 1 Chr. i. 52). By Eusebius and Jerome (Onomasticon, Phōno, and "Phōnō") the word of the tribe is said to have been at Pyron, one of the stations of the Israelites in the wilderness: which again they identify with Phanom, "between Petra and Zoar," the site of the famous Roman copper mines. No name answering to Phiron appears to have been yet discovered in Arabic literature, or amongst the existing tribes.

fn. [2. τὸ πετρό: pinnula.
3. τὸ πετρόγυμνον: summitas.]
was enlivened by the sound of music; and a hand, consisting of the harp, lyre, guitar, tambourine, double and single pipe, flute and other instruments, played the favorite airs and songs of the country. (Wilkinson, *Anc. Eg. ii. 222*). In the different combinations of instruments used in Egyptian bands, we generally find either the double pipe or the flute, and sometimes both; the former being played both by men and women, the latter exclusively by women. The Egyptian single pipe, as described by Wilkinson (*Anc. Eg. ii. 308*), was "a straight tube, without any increase at the mouth; and, when played, was held with both hands. Its length of moderate length, apparently not exceeding a foot and a half, and many have been found much smaller; but these may have belonged to the peasants, without meeting a place among the instruments of the Egyptian band. . . . Some have three, others four holes. . . . and some were furnished with a small mouth-piece" of reed or thick straw. This instrument must have been something like the Niy, orcherist's flute, which is described by Mr. Layard (*Med. Arch. iv. pl. viii. c.*) as "a simple reed, about 18 inches in length, seven-eighths of an inch in diameter at the upper extremity, and three-quarters of an inch at the lower. It is pierced with six holes in front, and generally with another hole at the back. . . . In the hands of a good performer the reed yields a fine, mellow tone; but it requires much practice to sound it well." The double pipe, which is found as frequently in Egyptian paintings as the single one, consisted of two pipes, perhaps occasionally united together by a common mouthpiece, and played each with the corresponding hand. It was common to the Greeks and other people, and, from the mode of holding it, received the name of right and left pipe, the *ilu oktèr* and *enistòra* of the Romans; the latter had but four holes, and, emitting a deep sound, served as a bass. The other had more holes, and gave a sharp tone" (Wilkinson, *Anc. Eg. ii. 309, 310). It was played on chiefly by women, who danced as they played, and is imitated by the modern Egyptians, in their *zamaatu*, or double reed, a rude instrument, used principally by peasants and camel drivers out of doors (ibid. pp. 311, 312). In addition to these is also found in the earliest sculpture a kind of flute, held with both hands, and sometimes so long that the player was obliged to stretch his arms to their full length while playing.

Any of the instruments above described would have been called by the Hebrews by the general term *qulal*, and it is not improbable that they might have derived their knowledge of them from Egypt. The single pipe is said to have been the invention of the Egyptians alone, who attribute it to Osiris (*Jad. Poll. Diaconum. iv. 10*), and as the material of which it was made was the lotus-wood (*Ovid, Fast. iv. 190, "horrendo lotos adulescens sors") there may be some foundation for the conjecture. Other materials mentioned by Julius Pollax are reed, brass, boxwood, and horn. *Pliny* (xxvi. 69) adds silver, and the pipes are cited in *Hortensius*, in the inventory of *Ikervian*, ii. 3, above quoted, identifies the *child with the French chalumeau*, which is the *German schalmeie* and our *glowen or shawm*, of which the clarionet is a modern improvement. The *shawm*, says Mr. Chappell (*Pop.Vars. i. 35, note 5,* "was played with a reed like the yate, or bantley, but being a bass instrument, with about the compass of an octave, had probably more the tone of a bassoon."") This can scarcely be correct, or Drayton's expression, "the shrillest shawm" (*Pol. et. iv. 366*), would be inappropriate.

W. A. W.

* PIPER, *Rev. xviii. 22. *[Minstrel; Pipe]*

*PIIRA (to e Pié-rà) [Vat. to epìragh. Abd.; Rom. Alex. omit†], I Esdr. v. 19. Apparently a repetition of the name *Saphira* in the former part of the verse. *

**PIRAM (πηραμ)** [pers. flext as the mild us]; *Φόρατης*; [Vat. Φάρατης; Alex. Φοράτης; *[Comp. Φοράτης*] Phorarum.* The Amorite king of Jar*mut* at the time of Joshua's conquest of Canaan (Josh. x. 3). With his four confederates he was defeated in the great battle before Gibeon, and fled for refuge to the cave at Makelelah, the entrance to which was closed by Joshua's command. At the close of the long day's slaughter and pursuit, the five kings were brought from their hiding-place, and hanged upon five trees till sunset, when their bodies were taken down and cast into the cave "wherein they had been hid" (Josh. x. 27).

**PIRATHON (πηραθών)** [priv. Ge.]; [Vat.] *Φάρανθω*; [Rom. Φαρανθω*; Alex. Φαράν- θως; Phoratho]. "in the land of Ephraim in the mount of the Anakites;" "a place named nowhere but in Judg. xii. 15, and there recorded only as the burial-place of Abdon ben-Hillel the Piraathoite, one of the Judges. Its site was not known to Enaeus or Jerome; but it is mentioned by the anonymous old traveller hap-Pareni as lying about two hours west of Shechem, and called *Firrata* (Asber's *Biblia* *Umb. ii. 426). Where it stood in the 14th century it stands still, and is called by the same name. It was reserved for Dr. Robinson to rediscover it on an eminence about a mile and a half south of the road from Jackye by Hobb h to Nobles, and just six miles, or two hours, from the last (Robinson, iii. 134). Of the remarkable expression, "the mount (or mountain district) of the Anakite," no explanation has yet been discovered beyond the probable fact that it commemorates a very early settlement of that roving people in the highlands of the country. Another place of the same name probably existed near the south. But beyond the mention of *Pira- thton* in 1 Macc. ix. 50, no trace has been found of it.

**PIRATHONITE** (πηραθωνίται) and (πηραθωνίτης) [patt. see above]; *Φαρανθωνίτης*, *Φαρανθωνίτης*, òk *Φαρανθωνίτης*; Phorathonteis; the native of, or dwell* er in, Piraathon.* Two such are named in the Bible. *[Vat. Φαρανθωνίτης*; Alex. *Φαρανθωνίτης*; *Phorathonteis*; *Phoratho*]; *[Alex. ben-Hillel* (Judg. xii. 13, 15), one of the minor judges of Israel. In the original the definite article is present, and it should be rendered "the Piraathoite."

2. *[Alex. *Φαρανθωνίτης*; Alex. *Φαρανθωνίτης*; *Phorathonteis*; Phoratho*]; from the same place came "Benach the Piraathoite of the children of Ephraim," captain of the eleventh monthly course of David's army (1 Chr. xxiii. 14) and one of the king's guard (2 Sam. xxii. 38; 1 Chr. xi. 31).

**PISGAH (πισγα)*** with the def. article [the part, piece]; *Φισγά*, in *Dent. iii. 17, xxiv*
PISGAH
I, and in Joshua; elsewhere ἡ λαξαθυμέων or ἡ λαξαθυμή; Phusga). An ancient topographical name which is found, in the Pentateuch and Joshua only, in two connections.
1. The top, or head, of the Pisghah (Phasgo), Num. xxi. 20, xxiii. 14; Deut. iii. 27, xxxiv. 1.
2. Ashdoth-hap-Pisghah, perhaps the springs, or roots, of the Pisghah, Deut. xiii. 17, iv. 49; Josh. xiii. 3, xiii. 20.

The latter has already been noticed under its own head. [Ashdoth-Pisghah.] Of the former but little can be said. "The Pisghah " must have been a mountain range or district, the same as, or a part of that called the mountains of Abarim (comp. Deut. xxxii. 49 with xxxiv. 1). It lay on the east of Jordan, contiguous to the field of Moab, and immediately opposite Jericho. The field of Zophim was situated on it, and its highest point or summit — its "head " — was the Mount Nebo. If it was a proper name we can only conjecture that it denoted the whole or part of the range of hills which marked the east of the lower Jordan. In the late Targums of Jerusalem and Pseudojonathan, Pisghah is invariably rendered by vawdth, a term in common use for a hill. It will be observed that the LXX. also do not treat it as a proper name. On the other hand Eusebius and Jerome (Onomasticon, " Abarim," " Pisga") report the name as existing in their day in its ancient locality. Mount Abarim and Mount Nabal were pointed out on the road leading from Libanus to Hebron (i.e. the Wady Hesbaun), still bearing their old names, and close to Mount Phogor (Pior), which also retained its name, whence, says Jerome (ά ψηλός), the contiguous region was even then called Phasgo. This connection between Phogor and Phasgo is puzzling, and suggests a possible error of copyists.

No traces of the name Pisghah have been met with in later times on the east of Jordan, but in the Arabic garb of Ras el-Feshkho (almost identical with the Hebrew Rosh hap-Pisghah) it is attached to a well known headland on the north-western end of the Dead Sea, a mass of mountain bounded on the south by the Wady en-Nor, and on the north by the Wady Sirib, and on the northern part of which is situated the great Mussulman sanctuary of Nebi Musa (Moses). This association of the names of Moses and Pisghah on the west side of the Dead Sea — where to suppose that Moses ever set foot would be to stultify the whole narrative of his decease — is extremely startling. No explanation of it has yet been offered. Certainly that of M. de Sauley and of his translator, that the Ras el-Feshkho is identical with Pisghah, cannot be entertained. Against this the words of Deut. iii. 27, " Thou shalt not go over this Jordan," are decisive.

Had the name of Moses alone existed here, it might with some plausibility be conceived that the reputation for sanctity had been at some time, during the long struggles of the country, transferred from east to west, when the original spot was out of the reach of the pilgrims. But the existence of

the name Feshkho — and, what is equally curious, its non-existence on the east of Jordan — seems to preclude this suggestion. [Neho, Mount, Amer. ed.]

G.

PISIDIA (Πισίδια; Pisidier) was a district of Asia Minor, which cannot be very exactly defined. But it may be described sufficiently by saying that it was to the north of Pamphyliia, and stretched along the range of Taurus. Northwards it reached to, and was partly included in, Phrygia, which was similarly an indefinite district, though for more extensive. Thus Antioch in Pisidia was sometimes called a Phrygian town. The occurrences which took place at this town give a great interest to St. Paul's first visit to the district. He passed through Pisidia twice, with Barnabas, on the first missionary journey, i.e. both in going from Pisga to Iconium (Acts xiii. 13, 14, 51), and in returning (xiv. 21, 24, 25; compare 2 Thess. iii. 11). It is probable also that he traversed the northern part of the district, with Silas and Timothy, on the second missionary journey (xvi. 6); but the word Pisidia does not occur except in reference to the former journey. The characteristics both of the country and its inhabitants were wild and rugged; and it is very likely that the Apostle encountered here some of those "perils of robbers" and "perils rivers," to which he mentions afterwards. His routes through this region are considered in detail in Life and Esg. of St. Paul (2d ed. vol. i. pp. 197-207, 240, 241), where extracts from various travellers are given.

J. S. H.

PISON (ψισόον) [streaming, current, Gs.]: [R. V. Ψισόον; Alex. Ψισόον; Phison]. One of the four "heads" into which the stream flowing through Eden was divided (Gen. ii. 11). Nothing is known of it; the principal conjectures will be found under Eden [vol. i. p. 659 f.]

PISTAH (Ψησάθ) [expansion]: Pharsa, Pharsa. An Asherite: one of the sons of Jether, or Ishma (1 Chron. vi. 38).

PIT. In the A. V. this word appears with a figurative as well as a literal meaning. It passes from the facts that belong to the outward aspect of Palestine and its cities to states or regions of the spiritual world. With this power it is used to represent several Hebrew words, and the starting point which the literal meaning presents for the spiritual is, in each case, a subject of some interest.

1. Skol (Σκόλος); in Num. xvi. 39, 33; Job xvii. 16. Here the word is one which is used only of the hollow, shadowy world, the dwelling of the dead, and as such it has been treated of under HELL.

2. Skochoth (Σκοχοθ). Here, as the root ἁλομ shows, the sinking of the pit is the primary thought (Gesen. Thes. s. v.). It is dug into the earth (Ps. ix. 15, cxix. 53). A pit thus made and then covered lightly over, served as a trap by which animals or men might be ensnarled (Ps. xxxiv. 7). It

a The singular manner in which the LXX. translators of the Pentateuch have fluctuated in their renderings of Pisghah between the proper name and the appellative, leads to the inference that their Hebrew text was different in some of the passages to ours. Mr. W. A. Wright has suggested that in the latter they may have read ἀλαθύς for ἀλαθὺς.

b Probably the origin of the marginal reading of the A. V. "the hill." See De Sauley's Pourceau, etc., and the notes to ii. 29-33 of the English edition.
PIT

Thus became a type of sorrow and confusion, from which a man could not extricate himself, of the great down which comes to all men, of the dreariness of death (Job xxxiii. 18, 24, 28, 30). To "go down to the pit," is to die without hope. It is the penalty of evil-doers, that from which the righteous are delivered by the hand of God.

3. בִּית (bīṯ). In this word, as in the cognate בֵּית, the special thought is that of a pit or well dug for water (Genesis, Thes. s. v.). The process of demystifying which goes on in all languages, seems to have confined the former to the state of the well or cistern, dug into the rock, but no longer filled with water. Thus, where the sense in both cases is figurative, and the same English word is used, we have "pit (bīt)" connected with the "deep water," "the water-hole," "the deep" (Ps. lxx. 15*), while in "pit (bīṯ)," there is nothing but the "merry char." (Ps. xlix. 2). Its dreariest feature is that flecer "no water" (Jer. xi. 14). The greatest far the idea involved has been rather that of misery and despair than of death. But in the phrase "they that go down to the pit" (bīṯ), it becomes even more completely than the synonym already noticed (Shchedrin, Stanchkov, the representative of the world of the dead (Ex. xxxii. 14, 16, xxxvi. 22, 24; Ps. xxxvii. 1, exviii. 7). There may have been two reasons for this transfer. 1. The wide, deep excavation became the place of burial. The graves were set in the sides of the pit" (bīt) (Ex. xxxii. 24). To one looking into it it was visibly the home of the dead, while the vanguard, more mysterious, Schedrin carried the thought further to an invisible home. 2. The pit, however, in this sense, was never simply equivalent to burial-place. There is always implied in it a thought of sorrow and condemnation. This too had its origin apparently in the use made of the excavations, which had either never been wells, or had lost the supply of water. The prisoner in the hands of his enemies, was left to perish in the pit. One of the greatest of all deliverances is that the captive exile is released from the slow death of starvation in it (oscholath, Is. ii. 14). The history of Jeremiah, cast into the dungeon, or pit (bīt) (Jer. xxxvi. 6, 9), let down into its depths with cords, sinking into the pit at the bottom (there also there is no water), with death by hunger staring him in the face, shows how terrible an instrument of punishment was such a pit. The condition of the Athenian prisoners in the stone quarries of Syra (Thuc. vii. 87), the Persian punishment of the στίφος (Oedipus, Pers. 48), the ouliades of medieval prisons present instances of cruelty, more or less analogous. It is not strange that with these association at material horror clustering round, it should have involved more of the idea of a place of punishment even of the slightest or infinite, than did the dole, the grave.

In Rev. i. 2, and elsewhere, the "bottomless pit," is the translation of στίφος τῶν ἄβατον. The A. V. has rightly taken στίφος here as the equivalent of bīt rather than bīt. The pit of the abyss is as a dungeon. It is opened with a key (Rev. iii. 1, xxiv. 1). Satan is cast into it as a prisoner (xii. 3).

E. H. P.

PITCH (פק, פק, פֵּק; πιθόν; pîh). The three Hebrew terms above given all represent the same object, namely, mineral pitch or asphalt, in its different aspects: zephath (the gift of the modern Arabs, Wilkinson, Anc. Eng. ii. 120) in its liquid state, from a root signifying "to flow;" chemair, in its solid state, from its red color, though also explained in reference to the manner in which it boils up (the former, however, being more consistent with the appearance of the two terms in juxtaposition in Ex. ii. 3; A. V. "pitch and slime"); and cophar, in reference to its use inoverlaying wood-work (Gen. vi. 14). Asphalt is an aqueous, inflammable substance, which bubbles up from subterranean fountains in a liquid state, and hardens by exposure to the air, but readily melts under the influence of heat. In the latter state it is very tenacious, and was used as a cement in building, as on Babylon (Gen. xi. 3; Strab. vii. p. 741; Herod. i. 179), as well as for coating the outsides of vessels (Gen. vii. 14; Joseph. B. J. iv. 8, § 4, and particularly for making the papyrus boats of the Egyptians water-tight (Ex. ii. 3; Wilkinson, ii. 120). The Babylonians obtained their chief supply from springs at 1s (the modern Hit), which are still in existence (Herod. i. 173). The Jews and Egyptians got theirs in large quantities from the sea, which hence received its classical name of Λεύκα Ασφαλίθια (bálos). The latter was particularly prized for its purple hue (Pliny. xxxvii. 23). In the early ages of the Bible the slime-pits (Gen. xiv. 10), or springs of asphalt, were apparent in the Vale of Siddim, at the southern end of the sea. They are now concealed through the submergence of the plain, and the asphalt probably forms itself into a crust on the bed of the lake, whence it is dislodged by earthquakes or other causes. Early writers describe the masses thus thrown up on the surface of the lake as of very considerable size (Joseph. B. J. iv. 8, § 4; Tac. Hist. v. 6; Dio Chir. iv. 48). This is now a rare occurrence (Robinson, Res. i. 517), though small pieces may constantly be picked up on the shore. The inflammable nature of pitch is noticed in Is. xxxiv. 9.

W. L. B.

PITCHER. The word "pitcher" is used in A. V. to denote the water-jars or pitchers with one or two handles, used chiefly by women for carrying water, as in the story of Reuben (Gen. xxiv. 15-20; but see Mark xiv. 13; Luke xxii. 7). This practice has been and is still usual both in the East and elsewhere. The vessels used for the purpose are generally carried on the head or the shoulder. The "pitcher" is well enough commonly used for the bulla. Such was the "bottle" carried by Hagar (Gen. xvi. 11; Harmer, Obs. iv. 241; Layard, Nin. & Bab. p. 578; Roberts, Sketches, p. 164; Arnaud, Trav. p. 293; Burchard, Notes on Bed. i. 351).

2. Ancient water jar or pitcher. It was of clay, stone, or bronze; the modern is made of earthenware.

3. In N. T. "speron," twice only; Mark xiv. 13, 15 (A.V. Lake xxvii. 10; morph.); Luke xxi. 33; Coloss. i. 16. It may mean "a pitcher," or "a bucket.

4. Hence the owner of the guest-chamber was more readily known, as pointed out in note a, vol ii. p. 435.
The same word 

PLAGUE, THE

2531

in the Arabian name upon the Canal of the Red Sea (ii. 48). The River of Anthony pits Pharaoh 50 Roman miles from Heliopolis, and 48 from Pithom; but this seems too far north for Pitham, and also for Pithon, if that place were near Heliopolis, as its name and connection with Raamses seem to indicate. Under Raamses is a discussion of the character of these cities, and of their importance in Egyptian history. [RAAMESSES.]

* Chabas (Voyage d'un Egyptien, ii. 154, 155) suggests the probable identity of Pithon and the Etheom of Ex. xii. 29: the initial p being simply the masculine singular of the article in Egyptian. But this seems to call for two cities or towers of the same name, in the same general locality, since there is good reason for placing the Pithon of Ex. i. 11, to the west of Raamses. The children of Israel took the first opportunity to cross the exodus at the point nearest the eastern desert; and their place of rendezvous was Raamses; nor would they be likely to encamp near a fortified city such as Pithon was. In his Mémories Égyptiens, ii. 154, M. Chabas gives at length the arguments for the identification of Pithon with the Patumus of Herodotus, and with the ruins of Aboos-Kesheyl. A thorough archeological exploration of the Delta alone could determine these localities with certainty. This we may hope for, when M. Mariette shall have finished his most rewarding work in the Nile valley. The Patumus of Herodotus lay upon the canal that joined the Nile to the Bitter Lakes, and the sweet-water canal of Lesseps, by restoring fertility to the ancient Goshen, and inviting thither a permanent population, may give occasion for discoveries that shall illustrate and confirm the history of Israel in Egypt.

PLAGUE, THE. The disease now called the Plague, which has ravaged Egypt and neighboring countries, and especially of late, is supposed to have prevailed there in former ages. Manneth, the Egyptian historian, speaks of "a very great plague," in the reign of Semenepes, the seventh king of the first dynasty, n. c. cir. 2500. The difficulty of determining the character of the pestilences of ancient and mediaval times, even when carefully described, warns us not to conclude that every such mention refers to the Plague, especially as the choler has, since its modern appearance, been almost as severe a scourge to Egypt as the more famous disease, which, indeed, as an epidemic seems there to have been succeeded by it. Moreover, if we admit, as we must, that there have been ancient pestilences very nearly resembling the modern Plague, we must hesitate to pronounce any recorded pestilence to be of this class unless it be described with some distinguishing features in particular.

The Plague in recent times has not extended far beyond the Turkish Empire and the kingdom of Persia. It has been asserted that Egypt is its cradle, but this does not seem to be corroborated by the later history of the disease. It is there both sporadic and epidemic: in the first form it has appeared almost annually, in the second at rarer intervals. As an epidemic it takes the character of a pestilence, sometimes of the greatest severity. Our subsequent remarks apply to it in this form.
It is a much-vaunted question whether it is ever endemic: that such is the case is favored by its rarity since sanitary measures have been enforced.

The Plague when most severe usually appears first on the northern coast of Egypt, having previously broken out in Turkey or North Africa west of Egypt. It ascends the river to Cairo, rarely going much further. Thus Mr. Lane has observed that the great plague of 1855 was certainly introduced from Turkey ("Modern Egyptians," 5th ed. p. 3, note 1). It was first noticed at Alexandria, ascended to Cairo, and further to the southern part of Egypt, in a few cases having occurred at Thebes; and it extended throughout the whole of Egypt, though its ravages were not great in the southern parts." (Ibid.) The mortality is often enormous, and Mr. Lane remarks of the plague just mentioned: "It destroyed not less than eighty thousand persons in Cairo, that is, one-third of the population; and far more, I believe, than two hundred thousand in all Egypt." (Ibid.) The writer was in Cairo on the last occasion when this pestilence visited Egypt, in the summer of 1843, when the deaths were not numerous, although, owing to the Government's posting a sentry at each house in which any one had died of the disease, to enforce quarantine, there was much concealment, and the number was not accurately known (Mrs. Poole, Englishwoman in Egypt, ii. 32-33). Although since then Egypt has been free from this scourge, Benghazee (Dakhliyeh), in the pashalie of Tripoli, was almost depopulated by it during part of the years 1869 and 1871. It generally appears in Egypt in midwinter, and lasts at most for about six months.

The Plague is considered to be a severe kind of typhus, accompanied by buboes. Like the cholera it is most violent at the first outbreak, causing almost instant death; later it may last three days, and even longer, but usually it is fatal in a few hours. It has never been successfully treated except in isolated cases or when the epidemic has seemed to have worn itself out. Deploration and stimulants have been tried, as with cholera, and stimulants with far better results. Great difference of opinion has obtained as to whether it is contagious or not. Instances have, however, occurred in which no known cause except contagion could have conveyed the disease.

In noticing the places in the Bible which might be supposed to refer to the Plague we must bear in mind that, unless some of its distinctive characteristics are mentioned, it is not safe to infer that this disease is intended.

In the narrative of the Ten Plagues there is, as we point out below (p. 2542, c), none corresponding to the modern Plague. The plague of boils has indeed some resemblance, and it might be urged that, as in other cases known scourges were sent (their miraculous nature being shown by their apparence occurrence and their intense character), so in this case a disease of the country, if indeed the Plague so anciently prevailed in Egypt, might have been employed. Yet the ordinary Plague would rather exceed in severity this infection than the contrary, which seems fatal to this supposition.  

Several Hebrew words are translated "pestilence" or "plague." (1) עַּ֥בָּד (2) עֶבֶדֶת (3) מְדַּעַ֣ת, properly "destruction," hence a plague; in LXX. commonly παρακατάραξις; (4) רָבָּד (5) רָבָּד, properly "death," hence a deadly disease, pestilence. Gesenius compares the Schüler Tod, or Black Death, of the middle ages. (3) רָבָּד and רָבָּד properly anything, with which people are smitten, especially by God, therefore a plague or pestilence sent by Him. (4) רָבָּד, "pestilence" (Dent. xxxii. 24. A. V. "destruction"); Ps. xci. 6, "the pestilence [that walketh in darkness]," and perhaps also רָבָּד, if we follow Gesenius, instead of reading with the A. V. "destruction," in Hos. xiii. 14. (5) רָבָּד, properly "a flame," hence a burning fever, "a plague" (Dent. xxxii. 24; Hab. iii. 5, where it occurs with רָבָּד). It is evident that not one of these words can be considered as designating by its signification the Plague. Whether the disease be mentioned must be judged from the sense of passages, not from the sense of words.

These pestilences which were sent as special judgments, and were either supernaturally rapid in their effects, or in addition directed against particular culprits, are beyond the reach of human inquiry. But we also read of pestilences which, although sent as judgments, have the characteristics of modern epidemics, not being rapid beyond nature, nor directed against individuals. Thus in the remarkable threatenings in Leviticus and Deuteronomy, pestilence is spoken of as one of the enduring judgments that were gradually to destroy the disobedient. This passage in Leviticus evidently refers to pestilence in besieged cities: "And I will bring a sword upon you, that shall avenge the quarrel of [any] covenant: and when ye are gathered together within your cities, I will send the pestilence among you; and ye shall be delivered into the hand of the enemy." (xxvi. 24) Plague in a besieged city would occasion pestilence. A special disease may be indicated in the parallel portion of Deuteronomy (xxviii. 21): "The Lord shall make the pestilence chase unto thee, until he [or "it"] have consumed thee from off the land which the Lord shall give thee to possess it." The word rendered "pestilence" may, however, have a general signification, and comprise calamities mentioned afterwards, for there follows an enumeration of several other diseases and similar scourges (xxviii. 21, 22). The first disease here mentioned, has been supposed to be the Plague (Bunsen, Religionsgesch.). It is to be remembered that "the blotch of Egypt" is afterwards spoken of (27), by which it is probable that ordinary boils are intended, which are especially severe in Egypt in the present day, and that later still "all the diseases of Egypt" are mentioned (60). It therefore seems unlikely that so grave a disease as the Plague, if then known, should not be spoken of in either of these two passages. In neither place does it seem certain that the Plague is specified, though, in the one, if it were to be in the land it would fasten more on the condition of besieged cities, and in the other, if then known, it would probably be alluded to as a terrible judgment in an enumeration of dia

A curious story connected with this plague is given in the notes [at Mr. Lane] to the Thousand and One Nights, ch. iii.
The notices in the prophets present the same difficulty: for they do not seem to afford sufficiently positive evidence that the Plague was known in those times. With the prophets, as in the Penta-
tuch, we must suppose that the diseases threatened or prophesied as judgments must have been known, or at least called by the names used for those that were known. Two passages might seem to be ex-
pliit. In Amos we read, "I have sent among you the pestilence after the manner of Egypt: young
men have I slain with the sword, and have taken away your horses; and I have made the stink
of your camps to come up unto your nostrils" (Am. iv. 10). Here the reference is perhaps to the death
of the firstborn, for the same phrase, "after the manner of Egypt," is used by Isaiah (x. 24, 25),
with a reference to the Exodus, and perhaps to the oppression preceding it and an allusion to past his-
tory seems probable, as a comparison with the over-
throw of the cities of the plain immediately follows
(Num. iv. 11). The prophet Zechariah also speaks of a plague with which the Egyptians, if refusing
to serve God, should be smitten (xv. 18), but the name, and the description which appears to apply
to this scourge, seem to show that it cannot be the Plague.
Hezekiah's disease has been thought to have been the plague, and its fatal nature, as well as the
mention of a boil, makes this not improbable. On
the other hand, there is no mention of a pestilence
among his people at the time.
There does not seem, therefore, to be any dis-
tinct notice of the Plague in the Bible, and it is
most probable that this can be accounted for by
supposing either that no pestilence of antiquity in the
East was as marked in character as the modern
Plague, or that the latter disease then frequently
broke out there as an epidemic in crowded cities,
instead of following a regular course.

ney, De la Peste, and Aperçu Général sur l'Égypte,
ii. 348-500.)
R. S. P.

PLAGUES, THE TEN. In considering the
history of the Ten Plagues we have to notice the
place where they occurred, and the occasion on
which they were sent, and to examine the narrative
of each judgment, with a view to ascertain what it
was, and in what manner Pharaoh and the Egyp-
tians were punished by it, as well as to see if we
can trace any general connection between the several
judgments.
I. The Place. — Although it is distinctly stated
that the plagues prevailed throughout Egypt, save,
in the case of some, the Israeliite territory, the land
of Goshen, yet the descriptions seem principally
to apply to that part of Egypt which lay nearest
to Goshen, and more especially to "the field of
Zon," or the tract about that city, since it seems
almost certain that Pharaoh dwelt in Zon, and
that territory is especially indicated in Ps. lxviii. 43.
That the capital at this time was not more
distant from Rameses than Zon is evident from the
time in which a message could be sent from
Pharaoh to Moses on the occasion of the Exodus.
The descriptions of the first and second plagues
seem especially to refer to a land abounding in
streams and lakes, and so rather to the lower than
to the upper country. We must therefore look
especially to Lower Egypt for our illustrations,
while bearing in mind the evident prevalence of
the plagues throughout the land.

II. The Occasion. — When that Pharaoh who
seems to have been the first oppressor was de-
grieved, God sent Moses to deliver Israel, commanding him
to gather the elders of his people together, and to
tell them his commission. It is added, "And they
shall hearken to thy voice: and thou shalt come,
thou and the elders of Israel, unto the king of
Egypt, and ye shall say unto him, The Lord God
of the Hebrews hath met with us: and now let us
go, we beseech thee, three days' journey into the
wilderness, that we may sacrifice to the Lord our
God. And I am sure that the king of Egypt will
not let you go, no, not by a mighty hand. And I
will stretch out my hand, and smite Egypt with
every my wonders which I will do in the midst
thereof: and after that he will let you go" (Ex. iii.
18-20). From what follows, that the Israelites
should borrow jewels and trinket, and "spoil
Egypt" (21, 22), it seems evident that they were
to leave as if only for the purpose of sacrificing;
but it will be seen that if they did so, Pharaoh, by
his armed pursuit and overtaking them when they
had encamped at the close of the third day's jour-
ney, released Moses from his engagement.
When Moses went to Pharaoh, Aaron went with him,
because Moses, not judging himself to be eloquent,
was deficient in speaking. Pharaoh, therefore,
"And Moses said before the Lord, Behold, I [am]\nuncircumcised lips, and how shall Pharaoh
hearken unto me? And the Lord said unto Moses, See, I have made thee a god to Pharaoh:
and Aaron thy brother shall be thy prophet" (Ex.
vi. 50, vii. 1: comp. iv. 10-18). We are therefore to
understand that even when Moses speaks it is
rather by Aaron than himself. It is perhaps wor-
thy of note that in the tradition of the Exodus which
Manetho gives, the calamities preceding the event
are said to have been caused by the king's consul-
ting an Egyptian prophet; for this suggests a
course which Pharaoh is likely to have adopted,endering it probable that the magicians were sent
for as the priests of the gods of the country, so
that Moses was excused by contrast with these vain
objects of worship. We may now examine the
narrative of each plague.

III. The Plagues. — 1. The Plague of Blood.
When Moses and Aaron came before Pharaoh, a
miracle was required of them. Then Aaron's rod
became "a serpent" (A. V.), or rather "a croco-
dile" (7??2). Its being changed into an animal
reverenced by all the Egyptians, or by some of
them, would have been an especial warning to
Pharaoh. The Egyptian magicians called by the
king produced what seemed to be the same wonder,
yet Aaron's rod swallowed up the others (vii. 3-12).
This passage, taken alone, would appear to indicate
that the magicians succeeded in working wonders;
but, if it is compared with those others relating
their opposition on the occasions of the first three
plagues, a contrary inference seems more reason-
able. In this case the expression, "they also did
in like manner with their enchantments" (11) is
used, and it is repeated in the cases of their seem-
ing success on the occasions of the first plague
(22), and the second (viii. 7), as well as when they
failed on the occasion of the third plague (18).
A comparison of these other passages strengthens us
in the inference that the magicians succeeded
merely by juggling. [Magic.] Yet, even if they
were able to produce a. y real effects by magic, a
broad distinction should be drawn between 2x
general and powerful nature of the wonders wrought by the hand of Moses and Aaron and their partial and weak imitations. When Pharaoh had refused to let the Israelites go, Moses was sent again, and, on the second mission, was commissioned to smite upon the waters of the river and to turn them and all the waters of Egypt into blood. The miracle was to be wrought when Pharaoh went forth in the morning to the river. Its general character is very remarkable, for not only was the water of the Nile smitten, but all the water, even that in vessels, throughout the country. The fish died, and the river became foul. The Egyptians could not drink of it, and dug around it for water. This plague appears to have lasted seven days, for the account of it ends, "And seven days were fulfilled, after that the Lord had smitten the river" (vii. 13-25), and the narrative of the second plague immediately follows, as though the other had then ceased. Some difficulty has been occasioned by the mention that the Egyptians digged for water, but it is not stated that they so gained what they sought, although it may be conjectured that only the water that was seen was smitten, in order that the nation should not perish. This plague was doubly humiliating to the religion of the country, as the Nile was held sacred, as well as some kinds of its fish, not to speak of the crocodiles, which probably were destroyed. It may have been a marked reproof for the cruel edict that the Israelite children should be drowned, and could scarcely have failed to strike guilty consciences as such, though Pharaoh does not seem to have been alarmed by it. He saw what was probably an imitation wrought by the magicians, who accompanied him, if he were engaged in some sacred rites, perhaps connected with the worship of the Nile. Events having some resemblance to this are mentioned by ancient writers; the most remarkable is related by Manetho, according to whom it was said that, in the reign of Nepherchres, seventh king of the 11th dynasty, the Nile flowed mixed with honey for eleven days. Some of the historical notices of the earliest dynasties seem to be of very doubtful authenticity, and Manetho seems to treat this one as a table, or, perhaps, as a tradition. Nepherchres, it must be remarked, reigned several hundred years before the Exodus. Those who have endeavored to explain this plague by natural causes, have referred to the changes of color to which the Nile is subject, the appearance of the Red Sea, and the so-called rain and dew of blood of the Middle Ages; the last two occasions by small fungi of very rapid growth. But such theories do not explain why the wonder happened at a time of year when the Nile is most clear, nor why it killed the fish and made the water unfit to drink. These are the really weighty points, rather than the change into blood, which seems to mean a change into the semblance of blood. The employment of natural means in effecting a miracle is equally seen in the passage of the Red Sea, but the Divine power is proved by the intensifying or extending that means, and the opportune occurrence of the result, and its fitness for a great moral purpose.

2. The Plague of Frogs. — When seven days had passed after the smiting of the river, Pharaoh was threatened with another judgment, and, on his refusing to let the Israelites go, the second plague was sent. The river and all the open waters of Egypt brought forth countless frogs, which not only covered the land, but filled the houses, even in their driest parts and vessels, for the ovens and kneading-troughs are specified. The magicians again had a seeming success in their opposition; yet Pharaoh, whose very palaces were filled by the reptiles, entreated Moses to pray that they might be removed, promising to let the Israelites go; but, on the removal of the plague, again hardened his heart (vii. 25, viii. 1-15). This must have been an especially trying judgment to the Egyptians, as frogs were included among the sacred animals, probably not among those which were revered as sacred to Egypt, like the cat, but in the second class of local objects of worship, like the crocodile. The frog was sacred to the goddess Hekt, who is represented with the head of this reptile. In hieroglyphics the frog signifies "very many," "millions," doubtless from its abundance. In the present day frogs abound in Egypt, and in the summer and autumn their loud and incessant croaking in all the waters of the country gives some idea of this plague. They are not uncommon heard in the spring, nor is there any record, excepting the Biblical one, of their having been injurious to the inhabitants. It must be added that the supposed cases of the same kind elsewhere, quoted from ancient authors, are of very doubtful authenticity.

3. The Plague of Lice. — The account of the third plague is not preceded by the mention of any warning to Pharaoh. We read that Aaron was commanded to stretch out his rod and smite the dust, which became, as the A. V. reads the word, "lice," which is more in keeping with this plague. The magicians again attempted opposition; but, failing, confessed that the wonder was of God (viii. 16-19). There is much difficulty as to the animals meant by the term ולכ, the Masoretic punctuation is לולכ, which would probably make it a collective noun with ל, for instance, but the plural form ולכ also occurs (ver. 16 [Heb. 12]; 18. cxv. 31), of which we once find the singular ולכ in Isaiah (li. 6). It is therefore reasonable to conjecture that the first form should be punctuated וללכ, as the defective writing of וללכ; and it should also be observed that the Samaritan has וללכ. The LXX. has πτερίδες, and the Vulg. spinulæs, mosquitos, mentioned by Herodotus (ii. 93), and Philo (De Vita Mosis, i. 20, p. 97, ed. Mang.), as troublesome in Egypt. Josephus, however, makes the ותכ lice (Ant. ii. 14, § 3), with which Beekh agrees (Hieroc. ii. 572 d). The etymology is doubtful, and perhaps the word is Egyptian. The narrative does not enable us to decide which is the more probable of the two renderings, excepting, indeed, that if it be meant that exactly the same kind of animal attacked man and beast, mosquitoes would be the more likely translation. In this case the plague does not seem to be especially directed against the superstitions of the Egyptians: if, however, it were of lice, it would have been most distressing to their priests, who were very cleanly, apparently, like the Muslims, as a religious duty. In the present day both mosquitoes and lice are rare in Egypt: the latter may be avoided but there is no escape from the former, which are so distressing an annoyance that an increase of
4. The Plague of Flies. — In the case of the fourth plague, as in that of the first, Moses was commanded to meet Pharaoh in the morning as he came forth to the water, and to threaten him with a judgment if he still refused to give the Israelites leave to go and worship. He was to be punished by 27 72, which the A. V. renders “swarms of flies,” “a swarm of flies;” or, in the margin, “a mixture of nesModule beasts.” These creatures were to cover the people, and fill both the houses and the ground. Here, for the first time, we read that the land of Goshen, where the Israelites dwelt, was to be exempt from the plague. So terrible was it that Pharaoh granted permission for the Israelites to sacrifice in the land, which Moses refused to do, as the Egyptians would stone his people for sacrificing their “abomination.” Then Pharaoh gave them leave to sacrifice in the wilderness, provided they did not go far; but, on the plague being removed, broke his agreement (xxii. 20-22).

The proper meaning of the word 27 72, is a question of extreme difficulty. The explanation of Josephus (Ant. ii. 14, § 3), and almost all the Hebrew commentators, is that it means “a mixture,” and here designates a mixture of wild animals, in accordance with the derivation from the root 27 72, “he mixed.” Similarly, Jerome renders it omne genus mammalium, and Aquila πανίγαμων. The LXX., however, and Hagn. (of Ilia Masius, i. 231. E. 143, ed. Mang.,) suppose it to be a dog-fly, εὐπερία. The second of these explanations seems to be a compromise between the first and the third. It is almost certain, from two passages (Ex. viii. 29, 31; Hebrew, 25, 27), that a single creature is intended. If so, what reason is there in favor of the LXX. rendering? Oelmann (Verm. Sammungen, ii. 150, ap. Ges. Thes. s. v.) proposes the blatte orientalis, a kind of beetle, instead of a dog-fly; but Gesenius objects that this creature devours things rather than stings men, whereas it is evident that the animal of this plague attacked or at least annoyed men, besides apparently injuring the land, from Ps. lxxviii. 43, where we read, “He sent the 27 72, which devoured them.” It must have been a creature of devouring habits, as is observed by Kalischer (Comment. on Exod. p. 138), who supports the theory that a beetle is intended. The Egyptian language might be hoped to give us a clue to the rendering of the LXX. and Philo. In hieroglyphics a fly is AP, and a bee SHER, or KIHER, SI and KII being interchangeable, in different dialects; and in Coptic these two words are confounded in 27 72, 27 72, 26, 27 72, μυσα, απια, σκορβανθες. We can therefore only judge from the description of the plague; and here Gesenius seems to have too hastily decided against the rendering “beetle,” since the beetle sometimes attacks men. Yet our experience does not bear out the idea that any kind of beetle is injurious to man in Egypt; but there is a kind of gad-fly found in that country which sometimes stings men, though usually attacking beasts. The difficulty, however, in the way of the supposition that a stinging fly is meant is that all such flies are, like this one, plagues to beasts rather than men; and if we conjecture that a fly is intended, perhaps it is more reasonable to infer that it was the common fly, which in the present day is probably the most troublesome insect in Egypt. That this was a more severe plague than those preceding it, appears from its effect on Pharaoh, rather than from the mention of the exemption of the Israelites, for it can scarcely be supposed that the earlier plagues affected them. As we do not know what creature is here intended, and we have no other reference in this case to the Egyptian religion Those who suppose it to have been a beetle might draw attention to the great reverence in which that insect was held among the sacred animals, and the consequent distress that the Egyptians would have felt at destroying it, even if they did so unnoticeably. As already noticed, no insect is now so troublesome in Egypt as the common fly, and this is not the case with any kind of beetle, which fact, from our general conclusions, will be seen to favor the evidence for the former. In the hot season the flies not only cover the food and drink, but they torment the people by settling on their faces, and especially round their eyes, thus promoting opthalmia.

5. The Plague of the Gnat of Beasts. — Pharaoh was warned that, if he did not let the people go, there should be on the day following “a very grievous murrain,” upon the horses, asses, camels, oxen, and sheep of Egypt, whereas those of the children of Israel should not die. This came to pass, and we read that “all the cattle of Egypt died: but of the cattle of the children of Israel died not one.” Yet Pharaoh still continued obstinate (Ex. ix. 1-7). It is to be observed that the expression “all the cattle” cannot be understood to be universal, but only general, for the narrative of the plague of hail shows that there were still at a later time some cattle left, and that the want of universal terms in Hebrew explains this seeming difficulty. The mention of camels is important, since it appears to favor our opinion that the Pharaoh of the Exodus was a foreigner, camels apparently not having been kept by the Egyptians of the time of the Pharaohs. This plague would have been a heavy punishment to the Egyptians as falling upon their sacred animals of two of the kinds specified, the oxen and the sheep; but it would have been most felt in the destruction of the greatest part of their useful beasts. In modern times murrain is not an infrequent visitation in Egypt, and it is supposed by some to resemble the plague of Egypt. It met with a very severe murrain in that country in 1842, which lasted nine months, during the latter half of that year and the spring of the following one, and was succeeded by the plague, as had been anticipated (Mrs. Poole, Englishwomen in Egypt, ii. 32, l. 59, 114). "A very grievous murrain," forcibly reminding us of that which visited this same country in the days of Moses, has prevailed during the last three months — the first case being dated October 18th, 1842 — and the already distressed peasants feel the calamity severely, or rather (I should say) the few who possess cattle. Among the rich men of the country, the loss has been enormous. During our voyage up the Nile "in the July preceding, we observed several dead cows and buffaloes lying in the river, as I mentioned in a former letter: and some friends who followed us two months after, saw many on the banks; indeed, up to this time, great numbers of cattle are dying in every port of the country. (Ibid. i. 114, 115.) The similarity of the calamity in character is remarkably in contrast with its difference in dur-
tion: the miraculous mirrorm seems to have been so sudden and nearly as brief as the destruction of the first-born (though far less terrible), and be new disease, both proved fatal to the whole. We therefore produced, on ceasing, less effect than other plagues upon Pharaoh, nothing remaining to be removed.

6. The Plague of Boils. - The next judgment appears to have been preceded by no warning, excepting indeed that, when Moses publicly sent it among Egypt, Pharaoh might not have reported it for another moment. We read that Moses and Aaron were to take ashes of the furnace, and Moses was to "sprinkle it toward the heaven in the sight of Pharaoh." It was to become "small dust" throughout Egypt, and "be a boil breaking forth with blains upon man, and upon beast." This accordingly came to pass. The magicians now once more seem to have attempted opposition, for it is related that they "could not stand before Moses because of the boil; for the boil was upon the magicians, and upon all the Egyptians." Notwithstanding, Pharaoh still refused to let the Israelites go (Ex. 8:12). This plague may be supposed to have been either an infection of boils, or a pestilence like the plague of modern times, which is an extremely severe kind of typhus fever, accompanied by swellings. (Pharaoh). The former is, however, the more likely explanation, since, if the plague had been of the latter nature, it probably would have been less severe than the ordinary pestilence of Egypt has been in this nineteenth century, whereas with other plagues which can be illustrated from the present phenomena of Egypt, the reverse is the case. That this plague followed that of the mirrorm seems, however, an argument on the other side, and it may be asked whether it is not likely that the great pestilence of the country, probably known in antiquity, would have been one of the ten plagues; but to this it may be replied that it is more probable, and in accordance with the whole narrative, that extraordinary and unexpected wonders should be effected than what could be parallelized in the history of Egypt. The tenth plague, moreover, is so much like the great Egyptian disease in its suddenness, that it might rather be compared to it if it were not so wholly miraculous in every respect as to be beyond the reach of human inquiry. The position of the magicians must be noticed as indicative of the gradation of the plagues: at first they succeeded, as we suppose, by deception, in imitating what was wrought by Moses, then they failed, and acknowledged the finger of God in the wonders of the Hebrew prophet, and at last they could not even stand before him, being themselves smitten by the plague he was commissioned to send.

7. The Plague of Hail. - The account of the seventh plague is preceded by a warning, which Moses was commanded to deliver to Pharaoh, respecting the terrible nature of the plagues that were to ensue if he remained obstinate. And first of all the hail is said, "Behold, to-morrow about this time, I will cause it to rain a very grievous hail, such as hath not been in Egypt since the foundation thereof even until now." He was then told to collect his cattle and men into shelter, for that everything hailing upon should die. Accordingly, such of Pharaoh's servants as feared this providence brought in their servants and cattle from the field. We read that "Moses stretched forth his rod toward heaven: and the Lorp sent thunder and hail, and the fire ran along upon the ground." Thus man and beast were smitten, and the herbs and every tree broken, save in the house of Pharaoh, and in the houses of his magnificence. And this was the most grievous plague which the Lorp sent upon Egypt, for there was none like it before or after upon the earth. This calamity was continued seven days, and Pharaoh refused to let the Israelites go. When it was announced that the Lorp would presently smite all the spoil of Egypt, Pharaoh was so taken with fear and astonishment at the announcement that he hastened to make satisfaction for the wrong he had done to his people, and the righteous ness of God, and promised if the plague were to cease he would let the Israelites go. Then Moses went forth from the city, and spread out his hands, and the plague ceased, when Pharaoh, supported by his servants, again broke his promise (Ex. 14-21). The character of this and the following plagues must be distinctly remembered, for the warning seems to indicate an important turning-point. The rain caused by the hail was evidently far greater than that effected by any of the earlier plagues; it destroyed men, who those others seem not to have done, and not only men but beasts and the produce of the earth. In this case Moses, while addressing Pharaoh, openly warns his servants how to save something from the calamity. Pharaoh for the first time acknowledges his wickedness. We also learn that his people joined with him in the oppression, and that at this time he dwelt in a city. Hail is now extremely rare, but not unknown, in Egypt, and it is interesting that the narrative seems to imply that it sometimes falls there. Thunder-storms occur very frequently, and accompanied by rain and wind, they rarely do serious injury. We do not remember to have heard while in Egypt of a person struck by lightning, nor of any rain excepting that of decayed buildings washed down by rain.

8. The Plague of Locusts. - Pharaoh was now threatened with a plague of hordes, to begin the next day, by which everything the hail had left untouched would be devoured. This was expected, and in the event, the expectation was realized. Pharaoh for the first time acknowledged his sin against God, and the Israelites, and begged them to forgive him. "Now therefore, I pray thee, I will forgive thee, my sin only this once, and interreat the Lorn your God, that He may take away from me this death only." Moses accordingly prayed, "And the Lorn turned a mighty strong west wind, which took away the locusts, and cast them into the Red sea; there remained not one locust in all the coasts of Egypt." The plague being removed Pharaoh again would not let the people go (Ex. 1-
This plague has not the unusual nature of the one that preceded it, but it even exceeds it in severity, and so occupies its place in the gradation of the more terrible judgments that form the later part of the series. Its severity can be well understood by those who, like the writer, have been in Egypt in a part of the country where a flight of locusts has almost always a greater impression than an ordinary visitation, since it extended over a far wider space, rather than because it was more intense; for it is impossible to imagine any more complete destruction than that always caused by a swarm of locusts. So well did the people of Egypt know what these creatures effected, that, when their coming was threatened, Pharaoh's servants at once remonstrated. In the present day locusts suddenly appear in the cultivated land, coming from the desert in a column of great length. They fly rapidly across the country, darkening the air with their compact ranks, which are undisturbed by the constant attacks of kites, crows, and vultures, and making a strange whistling sound like that of fire, or many distant wheels. Where they alight they devour every green thing; even after their mouths have been filled, they continue to chew them for their destruction, but no labor can seriously reduce their numbers. Soon they continue their course, and disappear gradually in a short time, leaving the place where they have been a desert. We speak from recollection, but we are permitted to extract a careful description of the effects of a flight of locusts from Mr. Lane's manuscript notes. He writes of Nabia: "Locusts not unfrequently commit dreadful havoc in this country. In my second voyage up the Nile, when before the village of Boosain, a little above Bremeen, many locusts pitched upon the boat. They were beautifully variegated, yellow and blue. In the following night a southerly wind brought other locusts, in immense swarms. Next morning the air was darkened by them, as by a heavy fall of snow; and the surface of the river was thickly scattered over by those which had fallen and were unable to rise again. Great numbers came upon and within the boat, and alighted upon our persons. They were different from those of the preceding day; being of a bright yellow color, with brown marks. The desolating they made was dreadful. In four hours a field of young durah [millet] was stripped to the ground. In another field of durah more advanced only the stalks were left. Nowhere was there space on the ground to set the foot without treading on many. A field of cotton-plants was quite stripped. Even the acecas along the banks were made bare, and palm-trees were stripped of the fruit and leaves. Last night we heard the creaking of the sikiyehs [water-wheels], and the singing of women driving the cows and turned them: to-day the people were, as in motion, and the women were going about bowling, and vainly attempting to frighten away the locusts. On the preceding day I had preserved two of the more beautiful kind of these creatures with a solution of arsenic: on the next day some of the other locusts ate them almost entirely, poisoned as they were, unseen by me till they had negotiated the trees of their locust. On the third day they were less numerous, and gradually disappeared. Locusts are eaten by most of the Bedawees of Arabia, and by some of the Nubians. We ate a few, dressed in the most approved manner, being stripped of the legs, wings, and head, and fried in butter. They had a flavor somewhat like that of the woodcock, owing to their food. The Arabs preserve them as a common article of provision by parching them in salt and water, and then drying them in the sun."

The parallel passages in the prophecy of Joel form a remarkable commentary on the description of the plague of the locusts given by the prophet for some few weeks; for they describe with wonderful exactness and vigor the devastations of a swarm of locusts. "How ye the trumpet in Zion, and sound an alarm in my holy mountain: let all the inhabitants of the land tremble: for the day of the Lord cometh, for [it is] nigh at hand: a day of darkness and of gloominess, a day of clouds and of thick darkness, as the morning spread upon the mountains: a great people and strong; there hath not been ever the like, neither shall be any more after it, [even] to the years of many generations. A fire devoureth before them; and behind them a flame consumeth the land [as is] the garden of Eden before them, and behind, a desolate wilderness: veil, and nothing shall escape them. The appearance of them [is] as the appearance of horses; and as the shining of their light, so shall they run upon the100. locusts, like the noise of a flame of fire that devoureth the stubble, as a strong people set in battle array. . . . They shall run like mighty men; they shall climb the wall like men of war, and they shall march every one on his ways, and they shall not break their ranks. . . . The earth shall quake before them; the heavens shall tremble: the sun and the moon shall be dark, and the stars shall withdraw their shining (ii. 1-5, 7, 10; see also 6, 8, 9, 11-25; Rev. ix. 1-12). Here, and probably also in the parallel passage of Rev., locusts are taken as a type of a destroying army or horde, since they are more terrible in the devastation they cause than any other creatures.

9. The Plague of Darkness.—After the plague of locusts we read at once of a fresh judgment. And the Lord said unto Moses, Stretch out thy hand toward heaven, that there be darkness over the land of Egypt, that [one] may feel darkness. And Moses stretched forth his hand toward heaven: and there was a thick darkness in all the land of Egypt three days: they saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings." Pharaoh then gave the Israelites leave to go if only they left their cattle, but when Moses required that they should take these also, he again refused (x. 21-26). The expression we have rendered, "that [one] may feel darkness," according to the A. V. in the margin, where in the text the freer translation "darkness [which] may be felt" is given, has occasioned much difficulty. The LXX. and Vulg. give this rendering, and the moderns generally follow them. It has been proposed to read "and they shall grope in darkness," by a slight change of rendering and the supposition that the particle 2 is understood (Kalisch, Comm. on Ez. p. 171). It is unnecessary to force the text or mean of the A. V. are too strong for Semitic philology. The difficulty is, however, rather to be solved by a consideration of the nature of the plague. It has been illustrated by reference to the Samoon and the hot wind of the Khamaseen. The former is a sand-storm which occurs in the desert, seldom lasting.
PLAGUES, THE TEN

according to Mr. Lane, more than a quarter of an hour or twenty minutes (Med. Jour. 5th ed. p. 2); but for the time often causing the darkness of twilight, and affecting man and beast. Mrs. Poole, on Mr. Lane's authority, has described the Samoon as follows: "The Samoon, which is a very violent, hot, and almost suffocating wind, is of more rare occurrence than the Khameleon winds, and of shorter duration: its continuance being more brief in proportion to the intensity of its parching heat, and the impetuousity of its course. Its direction is generally from the southeast, or south-southeast. It is commonly preceded by a fearful calm. As it approaches, the atmosphere assumes a yellowish hue, tinged with red; the sun appears of a deep blood color, and gradually becomes quite concealed before the hot blast is felt in its full violence. The sand and dust raised by the wind add to the gloom, and increase the painful effects of the heat and rarity of the air. Respiration becomes uneasy, perspiration seems to be entirely stopped; the tongue is dry, the skin parched, and a pricking sensation is experienced, as if caused by electric sparks. It is sometimes impossible for a person to remain erect, on account of the force of the wind; and the sand and dust oblige all who are exposed to it to keep their heads close, and are most distressing when it overtake travellers in the desert. My brother encountered at Koes, in Upper Egypt, a samoon which was said to be one of the most violent ever witnessed. It lasted less than half an hour, and a very violent samoon seldom continues longer. My brother is of opinion that, although it is extremely distressing, it can never prove fatal, unless to persons already brought about to the point of death by disease, fatigue, thirst, or some other cause. The poor camel seems to suffer from it equally with its master: and will often lie down with his back to the wind, close his eyes, stretch out his long neck upon the ground, and so remain until the storm has passed over." (Englishman in Egypt, i. 96, 97). The hot wind of the Khamseen usually blows for three days and nights, and carries so much sand with it, that it produces the appearance of a yellow fog. It thus resembles the Samoon, though far less powerful and far less distressing in its effects. It is not known to cause actual death: at least the writer's residence in Egypt afforded no example either on experience or hearsay evidence. By a confusion of the Samoon and the Khameleon wind it has even been supposed that a Samoon in its utmost violence usually lasts three days (Kulisch, Com. Ex. p. 170), but this is an error. The plague may, however, have been an extremely severe sandstorm, miraculous in its violence and its duration, for the length of three days does not make it natural, since the severe storms are always very brief. Perhaps the three days was the limit, as about the length of time the people could exist without leaving their houses. It has been supposed that this plague rather caused a supernatural terror than actual suffering and loss, but this is by no means certain. The impossibility of moving about, and the natural fear of darkness which affects beasts and birds as well as men, as in a total eclipse, would have caused suffering, and if the plague be a sandstorm of such intensity and severity, it would have succeeded the conditions of fever by its parching heat, besides causing much distress of other kinds. An evidence in favor of the wholly supernatural character of this plague is its preceding the last judgment of all, the death of the first-born, as though it were a terrible foreshadowing of that great calamity.

10. The Death of the Firstborn.—Before the tenth plague Moses went to warn Pharaoh. "And Moses said, Thus saith the Lord, About midnight will I go out into the midst of Egypt: and all the firstborn in the land of Egypt shall die, from the firstborn of Pharaoh that sitteth upon his throne, even unto the firstborn of the maidservant that is behind the mill; and all the firstborn of beasts. And there shall be a great cry throughout all the land of Egypt, such as there was none like it, nor shall be like it any more." He then foretells that Pharaoh's servants would pray him to go forth. Positive as is this declaration, it seems to have been a conditional warning, for we read, "And he went out from Pharaoh in heat of anger," and it is added, that God said that Pharaoh would not hearken to Moses, and that the king of Egypt still refused to let Israel go (Ex. 4-10). The Passover was then instituted, and the houses of the Ishraelites sprinkled with the blood of the victims. The firstborn of the Egyptians were smitten at midnight, as Moses had forewarned Pharaoh. "And Pharaoh rose up in the night, he, and all his servants, and all the Egyptians; and there was a great cry in Egypt; for there was not a house where [there was] not one dead" (Ex. 10). The clearly miraculous nature of this plague, in its severity, its falling upon man and beast, and the singling out of the firstborn, puts it wholly beyond comparison with any natural pestilence, even the severest recorded in history, whether of the peculiar Egyptian Plague, or other like epidemics. The Bible affords a parallel in the smiting of Sennacherib's army, and still more closely in some of the punishments of murmurers in the wilderness. The prevailing customs of Egypt furnished a curious illustration of the narrative of this plague to the writer. "It is well known that many ancient Egyptian customs are yet observed. Among these one of the most prominent is the washing for the dead by the women of the household, as well as these hired to mourn. In the great cholera of 1818 I was at Cairo. This pestilence, as we all know, frequently follows the course of rivers. Thus, on that occasion, it ascended the Nile and showed itself in great strength at Boedak, the port of Cairo, distant from the city a mile and a half to the westward. For some days it did not traverse this space. Every evening at sunset, it was our custom to go up to the terrace on the roof of our house. There, in that calm, still time, I heard each night the wail of the women of Boedak for their dead borne along in a great wave of sound a distance of two miles, the lamentation of a city stricken with pestilence. So, when the firstborn were smitten, there was a great cry in Egypt. The history of the ten plaguesstrictly ends with the passage of the Red Sea, but the pursuit and the passage of the Red Sea are discussed elsewhere. [EXODUS, THE RED SEA, PASSAGE OF.] Here it is only necessary to notice that with the event last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins. Having examined the narrative of the ten plagues, we can now speak of their general character. In the first place, we have constantly kept in view the arguments of those who hold that the plagues were not miraculous, and, while fully admitting all the illustration that the physical history of Egypt has afforded us, both in our own observ
tion and the observation of others, we have found no reason for the naturalistic view in a single instance, while in many instances the illustrations from known phenomena have been so different as to bring out the miraculous element in the narrative with the greatest force, and in every case that element has been necessary, unless the narrative be deprived of its rights as historical evidence. Yet more, we have found that the advocates of a naturalistic explanation have been forced by their bias into a distortion and exaggeration of natural phenomena in their endeavor to find in them an explanation of the wonders recorded in the Bible.

In the examination we have made it will have been seen that the Biblical narrative has been illustrated by reference to the phenomena of Egypt and the manners of the inhabitants, and that, throughout, its accuracy in minute particulars has been remarkably shown, to a degree that is sufficient of itself to prove its historical truth. This in a narrative of wonders is of no small importance.

Respecting the character of the plagues, they were evidently nearly all miraculous in time of occurrence and degree rather than essentially, in accordance with the theory that God generally employs natural means in producing miraculous effects. They seem to have been sent as a series of warnings, each being somewhat more severe than its predecessor, to which we see an analogy in the warnings which the providential government of the world often puts before the sinner. The first plague corrupted the sweet water of the Nile and slew the fish. The second filled the land with frogs, which corrupted the whole country. The third covered man and beast with vermin or other annoying insects. The fourth was of the same kind and probably a yet severer judgment. With the fifth plague, the unrrain of beasts, a loss of property began. The sixth, the plague of boils, was worse than the earlier plagues that had affected man and beast. The seventh plague, that of hail, exceeded those that went before it, since it destroyed everything in the field, man and beast and herb. The eighth plague was evidently still more grievous, since the devastation by locusts must have been far more thorough than that by the hail, and since at that time no greater calamity of the kind could have happened than the destruction of agriculture for the future. The ninth plague we do not sufficiently understand to be sure that it exceeded this in actual injury, but it is clear from the narrative that it must have caused great terror. The last plague is the only one that was general in the destruction of human life, for the effects of the hail cannot have been comparable to those it produced, and it completes the climax, under which this series of plagues, from the Red Sea was the crowning point of the whole series of wonders, rather than a separate miracle. In this case its magnitude, as publicly destroying the king and his whole army, might even surpass that of the tenth plague.

The gradual increase in severity of the plagues is perhaps the best key to their meaning. They seem to have been set forth to warnings to the oppressor, to afford him a means of seeing God's will and an opportunity of repenting before Egypt was ruined. It is true that the hardening of Pharaoh's heart is a mystery which St. Paul leaves unexplained, answering the objector, " Nay but, O man, who art thou that repliest against God? " (Rom. ix. 20). Yet the Apostle is arguing that we have no right to question God's righteousness for not having mercy on all, and speaks of his long-suffering towards the wicked. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most signal judgments do not affect so as to cause any lasting repentance. In this respect the story of the last-fourth of the great plagues is comparable to the prophet's commentary upon that of their oppressor. R. S. P.

By studying the ten plagues of Egypt two points must be kept distinctly in view: (1) their reality, and (2) their judicial character. Were these plagues actual occurrences? Were they divine judgments? Ewald, who admits a general foundation of fact for the story as given in Exodus, nevertheless regards it as the growth of successive traditions, finally reduced many centuries after the event. Everything in this story is on a coherent and sublime plan, is grand and instructive, excites and satisfies the mind. It is like a divine drama, exhibited on earth in the midst of real history; to be regarded in this light, and to be treasured accordingly. Not that we hereby assert, that this story does not on the whole exhibit the essence of the event as it actually happened. For the sequel of the narrative shows that Pharaoh did not voluntarily allow the people to go: and we cannot form too exalted an idea of Moses. But we do insist that the story as it now is cannot have been drawn up before the era of the great Prophets" (History of Israel, Marti nean trans., i. 498). In answer to this theory of a late composition of the story, Mr. Poole (appris) has aptly remarked that the minute accuracy of the Biblical narrative in its references to Egypt is a signal proof of its historical truth. Admitting the general analogy of the plagues with the phenomena of the country, the knowledge of the physical features of Egypt, its soil, climate, productions, natural history, and meteorology, which the author of this narrative exhibits, is such as could have been gained only by a personal residence in Egypt, and argues a personal observation of the events described. Moreover this narrative occurs in a book which exhibits throughout the personal familiarity of its author with the customs of Egypt, religious, social, and domestic, with its cities and forts, its laws and institutions, its superstitions and modes of worship, its arts and manufactures; and this knowledge, got merely incidental way, is so much the stronger evidence of the genuineness and authenticity of the account given by Moses.

But Ewald's theory finds also a positive refutation in the institution of the Passover. He himself traces this observance back to the time of Joshua. About this time, many customs certainly first received proper legal sanction, which, though closely connected with the existing religion, possessed more popular importance for the fully established community: as the Feast of the Passover, in commemoration of the deliverance out of Egypt; and circumcision, as marking every male member of the community. Not without reason does the earliest narrator make Gilgal the scene of the first general circumcission, and it seems of the first Passover. At Gilgal near the Jordan, doubtless, many in still later days loved to keep the Passover; being more forcibly reminded by the sight of the Jordan of the triumphant entry into Canaan, of the previous adventures in the desert, and of the deliverance out of Egypt" (Ewald.
The hardening of his heart was due to his own willfulness. He is said again and again to have hardened it; and the divine agency in that result was simply that of multiplying appeals and wonders fitted to convert him, though it was foreseen that he would resist them all. The Hebrew Scriptures, overlooking secondary agencies, ascribe to Jehovah whatever He in any wise causes or suffers to come to pass.

J. P. T.

**PLAINS**

This one term does duty in the Authorized Version for no less than seven distinct Hebrew words, each of which had its own independent and distinctive meaning, and could not — at least not — interchanged with any other; some of them are proper names exclusively attached to one spot, and one has not the meaning of plain at all.

1. *Abel* (אבֵל). This word perhaps answers more nearly to our word “meadow” than any other, its root having, according to Gesenius, the force of moisture like that of grass. It occurs in the names of *Abel-maim, Abel-neholah, Abel-shittim,* and is rendered “plain” in Judg. xxiii. 33, “plain of vineyards.”

2. *Bik'ah* (בִּקְעָה). From a root signifying “to cleave or rent” (Genes. Thes. p. 232; First, *Handwörterb. i. 212). Fortunately we are able to identify the most remarkable of the Bik'ahs of the Bible, and thus to ascertain the force of the term. The great Plain or Valley of Coel-Syria, the “hollow land” of the Greeks, which separates the two ranges of Lebanon and Anti-Lebanon, is the most remarkable of them all. It is called in the Bible the Bik'ah’ath Aven (Am. i. 5), and also probably the Bik'ah'ath Lebanon (Josh. xi. 17, xii. 7) and Bik'ah-mizhep (xi. 8), and is still known throughout Syria by its old name, el-Bekôn, or *Arâl el-Bekôn.* “A long valley, though broad,” says Dr. Pusey (Comment. on Am. i. 5), “if seen from a height looks like a cleft; and this is eminently the case with the ‘Valley of Lebanon’ when approached by the ordinary roads from north or south.” It is of great extent, more than 60 miles long by about 5 in average breadth, and the two great ranges shut it in on either hand, Lebanon especially, with a very wall-like appearance [LEBANON.]. Not unlike in this effect is the Jordan Valley at Jericho, which appears to be once mentioned under the same title in Isai. xxxix. 3 (A. V. “the Valley of Jericho”). This, however, is part of the Arabah, the proper name of the Jordan Valley. Besides these the “plain of Magdido” (2 Chr. xxxix. 22; Zechar. xii. 11, A. V. “valley of M.”) and “the plain of One” (Neh. vi. 2) have not been identified.

Out of Palestine we find denoted by the word Bik'ah “the plain in the land of Shinar” (Gen. xi. 2), the “plain of Mesopotamia” (Ez. iii. 22, 23, viii. 4, xxxiv. 1, 2), and the “plain in the province of Dura” (Dan. iii. 1).

Bik'ah perhaps appears, with other Arabic

---

a An entirely different word in Hebrew (though identical in English) from the name of the son of Adam, which is *Hebel.*

b For instance, from the mountain between Zob- dany and Benhâby, half an hour past the Roman bridge.

c * For the situation of “the plain of On” see Robinson’s *Pius. Geogr. of Palestine*, pp. 113, 120: it is no doubt near Luc of *Ittera.*

d For instance, the farm-houses which “sparkle amid the eternal verdure of the Vega of Granada” are called _carrerones_, a term derived through the Arabic from the Hebrew *carrum*, a vineyard, or vine plant—a *Carmel*. Another Semitic word naturalized in Spain is *Seville* (see further down, No. 6), but indeed they are most numerous. For other examples, see *Glosario des mots espagnols dérivés de l'Arabe*, by Engelmann, Leyden, 1861.
The K. K. Ewald's evident strict from used 8; Deut. just language.

sages, therefore there is no general term for the Hebrews, and it was afterwards adopted into their language. [REGION-ROUND-ABOUT.]

This is by the lexicographers explained as meaning "straightforward," or "plain," as if from the root glydos; to be just or upright; but this seems far-fetched, and it is more probable that in this case also we have an archaic term existing from a pre-historic date. It occurs in the Bible in the following passages: Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. xx. 23, 25; 2 Chr. xxvi. 10; Jer. xviii. 8, 21. In each of these cases, with one exception, it is used for the district in the neighborhood of Heshbon and Pilton — the Bodel of the modern Arabs, their most noted pasture-ground; a district which, from the scanty descriptions we possess of it, seems to resemble the "Downs" of our own country in the regularity of its undulations, the excellence of its turf, and its fitness for the growth of flocks. There is no difficulty in recognizing the same district in the statement of 2 Chr. xxvi. 10. It is evident from several circumstances that Uziah had been a great conqueror on the east of Jordan, as well as on the shore of the Mediterranean (see Ewald's remarks, Geschichte, iii. 588, note), and he kept his cattle on the rich pastures of Philistines on the one hand, and Ammonites on the other. Thus in all the passages quoted above the word Mishor seems to be restricted to one special district, and to belong to it as exclusively as Shefelah did to the lowland of Philistia, or Araloth to the sunken district of the Jordan Valley. And therefore it is puzzling to find it used in one passage (1 K. xx. 23, 25) apparently with the mere general sense of low land, or rather flat land, in which chariots could be maneuvered — as opposed to uneven mountainous ground. There is some reason to believe that the scene of the battle in question was on the east side of the Sea of Genesaret in the plain of Jordan; but this is no explanation of the difficulty, because we are not warranted in extending the Mishor farther than the mountains which bounded it on the north, and where the districts began which were, like it, their south of the Dead Sea. [See Arabah, vol. i. pp. 133, 134; and for a description of the aspect of the region, PALSTEINE, vol. iii. pp. 2298, 2299.]

HO-SHEFELOH (מִשְׂפָּלוּת). The invariable designation of the depressed, flat, or gently undulating region which intervened between the high- lands of Judah and the Mediterranean, and was commonly in possession of the Philistines. [PALSTEINE, p. 2296; SEPHER.] To the Hebrews this, and this only, was The Shefeleh; and to have spoken of it by any more general term would have been as impossible as for natives of the Carse of Stirling or the Weald of Kent to designate them differently. Shefelah has some claims of its own to notice. It was one of the most tenacious of these old Hebrew terms. It appears in the Greek text and in the Authorized Version of the Book of Maccabees (1 Macc. xii. 38), and is preserved on each of its other occurrences, even in such corrupt dialects as the Samaritan Version of the Pentateuch, and the Targums of Pseudo-Jonathan, and of Rabbi Joseph. And although it would appear to be no longer known in its original seat, it has transferred itself to other countries, and appears in Spain as Seville, and on the east coast of Africa as Sofala.

7. ELON (אֶלֹן). Our translators have uniformly rendered this word "plain," without following the Vulgate, which in about half the passages has convallis. But this is not the verdict of the majority or the most trustworthy of the ancient versions. They regard the word as meaning an "oak" or "grove of oaks," a rendering supported by all, or nearly all, the commentators and lexicographers of the present day. It has the advantage also of being much more picturesque, and throws a new light (to the English reader) over many an incident in the lives of the Patriarchs and early heroes of the Bible. The passages in which the word occurs are commonly translated "plain," as follows: Plain of Moreh (Gen. xii. 6; Deut. xi. 30), Plain of Mamre (Gen. xiii. 18, xiv. 13, xviii. 1), Plain of Zoanaim (Judg. iv. 11), Plain of the

a Jerome, again, probably followed the Targum or other Jewish authorities, and they usually employ the wandering above mentioned. First alone endeavors to find a reason for it — not a satisfactory one: "be cause trees frequent plains or meadows" (Handw. i. 90 5).
G. II. 211, "alabaster cut eveh, quoting not means laid, existing and smooth, for previously portion I^HousK; cement extensive smaller, portions; the emtk, cement, 2548.«

2. The Plaint of Esdras which to the modern traveller in the Holy Land forms the third of its three most remarkable depressions, is designated in the original by neither of the above terms, but by cemtk, an appellative noun frequently employed in the Bible for the smaller valleys of the country — "the valley of Jezreel." Perible Esdras may anciently have been considered as consisting of two portions; the Vale of Jezreel the eastern and smaller, the Plain of Megiddo the western and more extensive of the two.

PLASTER. The mode of making plaster-cement has been described above. [MORTIEH.] Plaster is mentioned thrice in Scripture: 1. (Lev. xiv. 42, 48), where when a house was infected with "leprosy," the priest was ordered to take away the portion of infected wall and re-plaster it (Michaelis, Laws of Moses, § 211, iii. 297-305, ed. Smith.) 1872. Layard, A. 2.

The words of the Law were ordered to be engraven on Mount Ebal on stones which had been previously coated with plaster (Deut. xxxii. 4, 5: Josh. viii. 32). The process here mentioned was probably of a similar kind to that adopted in Egypt for receiving bas-reliefs. The wall was first made smooth, and its interfaces, if necessary, filled up with plaster. When the figures had been drawn, and the stone allowed to cure away so as to leave them in relief, a coat of lime whitewash was laid on, and followed by one of varnish after the painting of the figures was complete. In the case of the natural rock the process was nearly the same. The ground was covered with a thick layer of fine plaster, consisting of lime and gypsum carefully smoothed and polished. Upon this a coat of lime whitewash was laid, and on it the colors were painted, and set by means of glue or wax. The whitewash appears in most instances to have been made of shell-limestone not much burnt, which of itself is tenacious enough without glue or other binding material (Long, quoting from Belzoni, Eg. Ant. ii. 49-50).

At Belsham in Persia, the surface of the inscribed rock-tablet was covered with a varnish to prevent it from weather; but it seems likely that, in the case of the Ebal tablets the inscription was cut while the plaster was still moist (Layard, Nineveh, ii. 188; Vaux, Nine. of Persp. p. 172).

3. It was probably a similar coating of cement, on which the fatal letters were traced by the mystic hand "on the plaster of the wall of Belshazzar's palace at Babylon (Dan. v. 5). We here obtain an incidental confirmation of the Biblical narrative. For while at Nineveh the walls are panned with plaster slabs, at Babylon, where no such material is found, the builders were content to cover their tiles or bricks with enameled or stucco, flint-tempered plaster, fit for receiving ornamental designs (Layard, Nine. and Bab. p. 529; Idem. ii. 8). [HINCKS.]

H. W. P. * PLATES. [LAYER, 2 (d).]

1. 2 Cơ, Ch. 1872: yórov: calz. In Is. xxvii. 9, "calx-stone."

2. 2 Cơ: yórov: calz.
PLEDGE

Debaran and Antares is as nearly as possible twelve hours. The belief of Aben Ezra had probably the same origin as the rendering of the Vulgate, Hygades.

One other point is deserving of notice. The Rabbi, as quoted by Kimchi, attribute to Cinch great cold and the property of checking vegetation, while Cestl works the contrary effects. But the words of R. Isaac Israel on Job xxxviii. 31 (quoted by Hyde, p. 72), are just the reverse. He says, "The stars have operations in the ripening of the fruits, and such is the operation of Cestl. And some bind them retard and delay the fruits from ripening, and this is the operation of Cestl. The interpretation is, "Wilt thou bind the fruits which the constellation Cinch ripeneth and openeth; or wilt thou open the fruits which the constellation Cestl contracteth and bindeth up?"

On the whole, then, though it is impossible to arrive at any certain conclusion, it appears that our translators were perfectly justified in rendering Cinch by "Pleides." The "seven stars" in Amos clearly denoted the same cluster in the language of the 17th century, for Cotgrave in his French Dictionary gives "Pleide, f., one of the seven stars." Hyde maintained that the Pleiades were again mentioned in Scripture by the name Soochoth Bethnoth. The discussion of this question must be reserved to the Article on that name. The etymology of Cinch is referred to the Arab.

In Arabic, "a heap," as being a heap or cluster of stars. The full Arabic name given by Gesenius is كَنَتَى (kantaya), "the knot of the Pleiades," and, in accordance with this, most modern commentators render Job xxxviii. 31, "Is it thou that bist the knot of the Pleiades, or loocest the bands of Orion?" Simonis (Lex. Hebr.) quotes the (Greek) name for this cluster of stars, "Kilakates" (e.g. stellaris collegi, as) an instance of the existence of the same idea in a widely different language. The rendering "sweet influences" of the A. V. is a relic of the lingering belief in the power which the stars exerted over human destiny. The marginal note on the word "Pleides" in the Geneva Version is, "which starres arise when the name is in Taurus, which is the spring tyme, and bring flowers," thus agreeing with the explanation of R. Isaac Israel quoted above.

For authorities, in addition to those already referred to, see Michaelis (Syllog. ad Lex. Hebr. No. 1136), Simonis (Lex. Hebr.), and Gesenius (Thesaurus). W. A. W.

* PLEDGE. The words so translated in the A. V. are פּוֹכֶרֶת (pochereth), פּוֹכוֹרֶת (pochorot), פּוֹכֶרֶת (pochereth). All these, except the last, designate something given as security for the payment of a debt or the fulfillment of a promise. The passage 1 Sam. xvii. 18, where alone פּוֹכֶרֶת is rendered pledge by our translators (it occurs but once elsewhere, Prov. xvii. 18: פּוֹכֶרֶת, rendered becometh surety), is of doubtful import. See Tinnius in loc.

The practice of taking pledges for the payment of debt, common from time immemorial throughout the East (Job xxii. 6, xxiv. 3, 9; for the present usage see Land and Book, i. 490) was regulated in the Mosaic Law as follows: (1) The creditor was not allowed to enter the house of his debtor, in order to take a pledge, but it must be brought to him, Deut. v. 31, 34; (2) a handmill was not allowed to be taken in pledge (Deut. xix. 6), nor the raiment of a widow (Deut. xxiv. 17).

One of the Hebrew words given above, פּוֹכֶרֶת, occurs in the N. T. in the form of σίταβιν (A. V. "earnest "), 2 Cor. i. 22, v. 5; Eph. i. 14; most probably, however, in the sense not simply of a pledge of something to be bestowed in future, but of such a pledge as, being, like earnest-money, of the same or a kindred nature with the ultimate gift or payment, should be also a partial anticipation of it. (See Earnest.) Another cognate form is found in the expression פּוֹכֶרֶת פּוֹכֶרֶת (A. V. "hostages "); 2 K. xiv. 14; 2 Chron. xxiv. 21, employed to designate persons given to be held in pledge for the performance of treaty obligations. D. S. T.

POCHERETH (פּוֹכֶרֶת) (saaning, catching). פּוֹכֶרֶת (Vat. פּוֹכֶרֶת): Alex. פּוֹכֶרֶת; Ezr.: פּוֹכֶרֶת, Alex. פּוֹכֶרֶת, F.A. פּוֹכֶרֶת, Neh.: Pochereth). The children of Pochereth of Zebaim were among the children of Solomon's servants who returned with Zerubbabel (Ezr. ii. 57; Neh. vii. 59). He is called in 1 Esdr. v. 34, Phoc-ereth. [Zerubbabel.]

POETRY, HEBREW. The subject of Hebrew Poetry has been treated at great length by many writers of the last three centuries, but the results of their speculations have been, in most instances, in an inverse ratio to their length. That such would be the case might have been foretold as a natural consequence of their method of investigation. In the 16th and 17th centuries the influence of classical studies upon the minds of the learned was so great as to incline them with the belief that the writers of Greece and Rome were the models of all excellence, and consequently, when their learning and critical acumen were directed to the records of another literature, they were unable to divest themselves of the prejudices of early education and habits, and sought for the same excellences which they admired in their favorite models. That this has been the case with regard to most of the speculations on the poetry of the Hebrews, and that the failure of those speculations is mainly due to this cause, will be abundantly manifest to any one who is acquainted with the literature of the subject. But, however barren of results, the history of the various theories which have been framed with regard to the external form of Hebrew poetry is a necessary part of the present article, and will serve as a forewarning of some measure as a warning to any who may hereafter attempt the solution of the problem, what to avoid. The attributes which are common to all poetry, and which the poetry of the Hebrews pos
POETRY, HEBREW

lyric poetry is the product of a more advanced age. It arises from the desire felt by the poet to express the results of the accumulated experiences of life in a form of beauty and permanence. Its thoughtful character requires for its development a time of prominence, in so far as it gives expression, not like the lyric to the sudden and impromptu feelings of the moment, but to calm and philosophic reflection. Being less spontaneous in its origin, its form is of necessity more artificial. The gnomic poetry of the Hebrews has not its measured flow disturbed by the shock of arms or the tumult of camps; it rises slowly, like the Temple of old, with the songs of weapon, and its groundwork, is the home life of the nation. The period during which it flourished corresponds to its domestic and settled character. From the time of David onwards through the reigns of the earlier kings, when the nation was quiet and at peace, or, if not at peace, at least so firmly fixed in its acquired territory that its wars were no struggle for existence, gnomic poetry blossomed and bore fruit. We meet with it at intervals up to the time of the Captivity, and, as it is chiefly characteristic of the age of the monarchy, Ewald has appropriately designated this era the "artificed period" of Hebrew poetry. From the end of the 8th century B.C. the decline of the nation was so rapid as to preclude the chief glories of its literature. The poems of this period are distinguished by a smoothness of diction and an external polish which betray tokens of labor and art; the style is less flowing and easy, and, except in rare instances, there is no dash of the ancient vigor. After the Captivity we have nothing but ejaculations which formed part of the liturgical services of the Temple. Whether "domestic" poetry, properly so called, ever existed among the Hebrews, is, to say the least, extremely doubtful. In the opinion of some writers the Song of Songs, in its external form, is a rude drama, designed for a simple stage. But the evidence for this view is extremely slight, and no good and sufficient reasons have been adduced which would lead us to conclude that the amount of dramatic action included in that poem is more than would be involved in an animated poetic dialogue in which more than two persons take part. Philosophy and the drama appear alike to have been peculiar to the Indo-European nations, and to have manifested themselves among the Semitic tribes only in their crudest and most simple form.

1. Lyric Poetry — The literature of the Hebrews abounds with illustrations of all forms of lyrical poetry, in its most manifold and wide-embracing compass, from such short ejaculations as the songs of the two Lamechs, and Ps. xxv., xxviii., and others, to the longer chants of victory and thanksgiving, like the songs of Deborah and David (Judg. v., Ps. xxi.). The thoroughly national character of all lyrical poetry has been already alluded to. It is the utterance of the people's life in all its varied phases, and expresses all its most earnest strivings and impulses. In proportion as this expression is vigorous and animated, the idea embodied in lyric song is in most cases narrowed or rather concentrated. One truth, and even one side of a truth, is for the time invested with the greatest prominence. All these characteristics will be found in perfection in the lyric poetry of the Hebrews. One other feature which distinguishes it is its form and its capability for being set to a musical accompaniment. The names by which the various kinds of songs were known among the Hebrews will supply some illustration of this.

2. שיר, shîr, a song in general, adapted for the voice alone.

3. מזמור, mizzôr, which Ewald considers a lyric song, properly so called, but which rather seems to correspond with the Greek ἡμέρας, a psalm, or song to be sung with any instrumental accompaniment.

4. מָנָח, manâkh, which Ewald is of opinion is equivalent to the Greek ἁμάρτωλος, is more probably a melody expressly adapted for stringed instruments.
6. נִמְצָא, nictam, a term of extremely doubtful meaning. [Michtam.]

Lastly, with the plural suggested (Psalm) sung and the plural occurs in Hab. iii. 1.

But, besides these, there are other divisions of lyrical poetry of great importance, which have regard rather to the subject of the poems than to their form or adaptation for musical accompaniments. Of these we notice:

1. נְטָלָה, nethalah, a hymn of praise. The plural nethilim is the title of the Book of Psalms in Hebrew. The 145th Psalm is entitled "David's (Psalm) of praise;" and the subject of the psalm is in accordance with its title, which is apparently suggested by the concluding verse, "the praise of Jehovah my mouth shall speak, and let all flesh bless his holy name for ever and ever." To this class belong the songs which relate to extraordinary deliverances, such as the songs of Moses (Ex. xv.) and of Deborah (Judg. v.), and the Psalms xlviii. and lixviii., which have all the air of chants to be sung in triumphal processions. Such were the hymns sung in the Temple services, and by a bold faith they show. Amynurgy is apostrophized as "That inhabiteth the praises of Israel," which rose in the holy place with the fragrant clouds of incense (Ps. xlviii. 3). To the same class also Ewald refers the shorter poems of the kind like those already quoted, such as Ps. xxx., xxxii., xxxviii., and Is. xxxviii., which relate to less general occasions, and commemorate more special deliverances. The songs of victory sung by the congregation in the Temple, as Ps. xlvii., xlviii., xxiv. 7-10, which is a short triumphal ode, and Ps. xxix., which praises Jehovah on the occasion of a great natural phenomenon, are likewise all to be classed in this division of lyric poetry. Next to the hymn of praise may be noticed,

2. בְּנֵיהַ, beniah, the lament, or dirge, of which there are many examples, whether uttered over an individual or as an outburst of grief for the calamities of the land. The most touchingly pathetic of all is perhaps the lament of David for the death of Saul and Jonathan (2 Sam. i. 18-27), in which the outburst of grief is united with touches of tenderness of which only a strong nature is capable. Compare with this the lament for Abner (2 Sam. iii. 33, 34) and for Absalom (2 Sam. xvii. 33). Of the same character also, doubtless, were the songs which the singing men and singing women spoke over Josphat at his death (2 Chr. xxxv. 25), and the songs of mourning for the disasters which befell the hopeless land of Judah, of which Psalms lxxix., lx., lxxvii., xcvii., are examples (comp. Jer. x. 29, ix. 10 [9]), and the lamentations of Jeremiah the most memorable instances.

3. מַלְשָׁנָה, melshah, a love-song (Ps. xv. 1), in its external form at least. Other kinds of poetry there are which occupy the middle ground between the lyric and gnomic, being lyric in form and spirit, but gnomic in subject. These may be classed as

4. מַשָּׁל, mashal, properly a similitude, and then a parable, or sententious saying couched in poetic language. Such are the songs of Baham (Num. xxii. 7, 18; xxiv. 3, 15, 20, 21, 23), which arc eminently lyrical in character; the mocking ballad in Num. xxi. 27-30, which has been conjectured to be a fragment of an old Amorite war-song [NEMEERS, p. 2927 b]; and the apodogme of Joshua (Judg. ix. 7-20), both which is are strongly satirical in tone. But the finest of all is the magnificent prophetic song of triumph over the fall of Babylon (Is. xiv. 4-27). מַלְשָׁנָה, melshah, an enigma (like the riddle of Samson, Judg. xiv. 14), or "dark saying," as the A. V. has it in Ps. xliii. 4, lxviii. 2. The former passage illustrates the musical, and therefore lyric character of these "dark sayings: "I will incline mine ear to a parable, I will open my dark saying upon the harp." Mashal and chidah are used as convertible terms in Ez. xvii. 2. Lastly, to this class belongs מַלְשָׁנָה, melshah, a mocking, ironical poem (Hab. ii. 6).

5. אָמָה, amah, prayer, is the title of Ps. xvi., lxvii., xc., ciii., cxli., and Hab. iii. All these are strictly lyrical compositions, and the title may have been assigned to them either as denoting the object with which they were written, or the use to which they were applied. As Ewald justly observes, all lyric poetry of an elevated kind, in so far as it reveals the soul of the poet in a pure, swift outpouring of itself, is of the nature of a prayer; and hence the term "prayer" was applied to a collection of David's songs, of which Ps. lxvii. formed the conclusion.

11. Gnomic Poetry.—The second grand division of Hebrew poetry is occupied by a class of poems which are peculiarly Semitic, and which represent the nearest approaches made by the people of that race to anything like philosophic thought. Reasoning there is none: we have only results, and these rather the product of observation and reflection than of induction or argumentation. As lyric poetry is the expression of the poet's own feelings and impulses, so gnomic poetry is the form in which the desire of communicating knowledge to others finds vent. There might possibly be an intermediate stage in which the poets gave out their experiences for their own pleasure merely, and afterwards applied them to the instruction of others, but this could scarcely have been of long continuance. The impulse to teach makes the teacher, and the teacher must have an audience. It has been already remarked that gnomic poetry, as a whole, requires for its development a period of national tranquillity. Its grounds are the floating proverbs which pass current in the mouths of the people, and embody the experiences of many with the wit of one. From this small beginning it arises, at a time when the experience of the nation has become matured, and the mass of truths which are the result of such experience have passed into circulation. The fame of Solomon's wisdom was so great that no less than three classes of proverbs are attributed to him, the proverbs being the form in which the Hebrew mind found its most
POETRY, HEBREW

Menkenial attention. The sayer of sententious sayings was to the Hebrew the wise man, the philosopher. Of the earlier isolated proverbs but few examples remain. One of the earliest occurs in the month of David, and in its time it was the proverb of the ancients: "from the wicked comes wickedness" (1 Sam. xxiv. 13 [14]). Later on, when the fortunes of the nation were obscure, their experience was embodied in terms of sadness and despondency. "Truly, these days are gloomy, every vision faithless," became a saying and a by-word (Ez. xvi. 22): and the feeling that the people were suffering for the sins of their fathers took the form of a sentence, "The fathers have eaten sour grapes, and the children's teeth are set on edge" (Ez. xviii. 2). Such were the models which the national poet had before him for imitation. These detached sentences may be fairly assumed to be the earliest form, of which the fuller apopthegm is the expansion, swelling into sustained exhortations, and even dramatic dialogue.

III. Dramatic Poetry.—It is impossible to assert that no form of the drama existed among the Hebrew people; the most that can be done is to examine such portions of their literature as have come down to us, for the purpose of ascertaining how far any traces of the drama as a form are discernible, and what inferences may be made from them. It is unquestionably true, as Ewald observes, that the Arab reciters of romances will many times in their own persons act out a complete drama in recitation, changing their voice and gestures with the change of person and subject. Something of this kind may possibly have existed among the Hebrews; but there is no evidence that it did exist, nor any grounds for making even a probable conjecture with regard to it. A rude kind of farce is described by Mr. Lane (Hast. Egy. ii. chap. vii.), the players of which "are called Mokhabbezezn." These frequently perform at the festivals prior to weddings and circumcisions, at the houses of the great; and some times attract rings of auditors and spectators in the public places in Cairo. Their performances are scarcely worthy of description; it is chiefly by vulgar gestures and indecent actions that they amuse and obtain applause. The actors are only men and boys: the part of a woman being always performed by a man or boy in female attire." Then follows a description of one of these plays, the plot of which was extremely simple. But the mere fact of the existence of these rude exhibitions among the Arabs and Egyptians of the present day is of not weight when the question to be decided is, whether the Song of Songs was designed to be so represented, as a simple pastoral drama. Of course, in considering such a question, reference is made only to the external form of the poem, and, in order to prove it, it must be shown that the dramatic is the only form of representation which it could assume, and not that, by the help of two actors and a chorus, it is capable of being exhibited in a dramatic form. All that has been done, in our opinion, is the latter. It is but fair, however, to give the views of those who hold the opposite. Ewald maintains that the Song of Songs is designed for a simple stage, because it develops a complete action and admits of definite pieces in the action, which are only united to the dramatic by the circumstances in it in this respect from the Book of Job, which is otherwise in the same form. Though, as it is accompanied with a sublime subject, he compares it with tragedy, while the Song of Songs, being taken from the common life of the nation, may be compared to comedy. The one comparison is probably as appropriate as the other. In Ewald's division the poem falls into 13 cantos of tolerably equal length, which have a certain beginning and ending, with a pause after each. The whole forms four acts for which three actors are sufficient: a hero, a maiden, and a chorus of women, these being all who would be on the stage at once. The following are the divisions of the acts:—

First Act, i. 2—ii. 7 . . . (Scene 1. i. 2—6.) . . . (2. 7—11.)
Second Act, ii. 8—iii. 5 . . . (Scene 1. ii. 8—17.) . . . (2. iii. 1—5.)
Third Act, iii. 6—iv. 1 . . . (Scene 1. iii. 6—11.) . . . (2. iv. 2—6.)
Fourth Act, v. 2—vi. 3 . of a single scene.
Fifth Act, vi. 4—vii. 7 . . . (Scene 1. vi. 4—9.) . . . (2. vi. 10—vii. 11.)
Epidode, viii. 8—11.

But M. Renan, who is compelled, in accordance with his own theory of the mission of the Semitic races, to admit that no trace of anything approaching to the regular drama is found among them, does not regard the Song of Songs as a drama in the same sense as the products of the Greek and Roman theatres, but as dramatic poetry in the widest application of the term, to designate any composition conducted in dialogue and corresponding to an action. The absence of the regular drama he attributes to the want of a complicated mythology, analogous to that possessed by the Indo-European peoples. Monothelism, the characteristic religious belief of the Semitic races, stifled the growth of a mythology and checked the development of the drama. Be this as it may, dramatic representation appears to have been alien to the feelings of the Hebrews. At no period of their history before the age of Herod is there the least trace of a theatre at Jerusalem, whatever other foreign innovations may have been adopted, and the burst of indignation which the high-priest Jason incurred for attempting to establish a gymnasium and to introduce the Greek games is a significant symptom of the receptions with which the people felt for such speculations. The same antipathy remains to the present day among the Arabs, and the attempts to introduce theatres at Beyrouth and in Algeria have signally failed. But, says M.,
Renan, the Song of Songs is a dramatic poem; there were no public performances in Palestine, therefore it must have been represented in private; and he is compelled to frame the following hypothesis concerning it: that it is a libretto intended to be completed by the play of the actors and by music, and represented in private families, probably at marriage-feasts, the representation being extended over the several days of the feast. The last supposition removes a difficulty which has been felt to be almost fatal to the idea that the poem is a continuously developed drama. Each act is complete in itself; there is no suspended interest, and the structure of the poem is obvious and natural if we regard each act as a separate drama intended for one of the days of the feast. We must look for a parallel to it in the Middle Ages, when, besides the mystery plays, there were scenic representations sufficiently developed. The Song of Songs occupies the middle place between the regular drama and the eeclogue or pastoral dialogue, and finds a perfect analogue, both as regards subject and scenic arrangement, in the most celebrated of the plays of Arras, Le perroquet d'Arras. Renan's explanation of the outward form of the Song of Songs, regarded as a portion of Hebrew literature. It has been due to his great learning and reputation to give his opinion somewhat at length: but his arguments in support of it are so little convincing that it must be regarded at best but as an ingenious hypothesis, the groundwork of which is taken away by M. Renan's own admission that dramatic representations are alien to the spirit of the Semitic races. The simple corollary to this proposition must be that the Song of Songs is not a drama, but in its external form partakes more of the nature of an eeclogue or pastoral dialogue.

It is scarcely necessary after this to discuss the question whether the book of Job is a dramatic poem or not. Inasmuch as it represents an action and a progress, it is a drama as truly and really as any poem can be which develops the working of passion, and the alternations of faith, hope, distrust, triumph, confidence, and black despair, in the struggle which it depicts the human mind as engaged in, while attempting to solve one of the most intricate problems it can be called upon to regard. It is a drama as life is a drama, the most powerfully moving drama; but that it is a domestic drama, intended to be represented upon a stage, or capable of being so represented, may be confidently denied.

One characteristic of Hebrew poetry, not indeed peculiar to it, but shared by it in common with the literature of other nations, is its intensely national and local coloring. The writers were Hebrews of the Hebrews, drawing their inspiration from the mountains and rivers of Palestine, which they have immortalized in their poetic figures, and even while uttering the sublime and most universal truths never forgetting their own nationality in its narrowness and intense form. Their images and metaphors, says Munk (Palestine, p. 444 a), are taken chiefly from nature and the phenomena of Palestine and the surrounding countries, from the pastoral life, from agriculture and the national history. The stars of heaven, the sun of the sea, are the image of a great multitude. Would they speak of a mighty host of enemies invading the country, they are the swift torrent or the roaring waves of the sea, or the clouds that bring on a tempest; the war-chariote advance swiftly like lightning or the whirlwinds. Happiness rises as the dawn and shines like the daylight; the blessing of God descends like the dew or the bountiful rain; the anger of Heaven is a devouring fire that annihilates the wicked as the flame which devours the stubble. Unhappiness is likened to days of clouds and darkness; at times of great catastrophes the sun sets in broad day, the heavens are shaken, the earth trembles, the stars disappear, the sun is changed into darkness and the moon into blood, and so on. The cedars of Lebanon, the oaks of Bashan, are the image of the mighty man, the palm and the reed of the great and the humble, hirelings and thorns of the wicked; the pious man is an olive over growing in a tree planted by the Lord.

The animal kingdom furnished equally a large number of images: the lion, the image of power, is also, like the wolf, bear, etc., that of tyrants and violent and rapacious men; and the pious who suffers is a feedle sheep led to the slaughter. The strong and powerful man is compared to the he-goat or the bull of Bashan; the king of Bashan figure, in the discourses of Amos, as the image of rich and voluptuous wealth: the people who rebel against the Divine will are a refractory heifer. Other images are borrowed from the country life and from the life domestic and social: the chastisement of God weighs upon Israel like a wagon laden with sheaves; the dead cover the earth as the dung which covers the surface of the fields. The impious man sows crime and reaps misery, or he sows the wind and reaps the tempest. The people yielding to the blows of their enemies are like the corn crushed beneath the threshing instrument. God tramples the wine in the wine-press when He chastises the impious and sheds their blood. The wrath of Jehovah is often represented as an intoxicating cup, which He causes those to empty who have merited his chastisement: terrors and anguish are often compared to the pains of childbirth. Peoples, towns, and states are represented by the Hebrew poets under the image of daughters or wives; in their impiety they are courtesans or adulteresses. The historical allusions of most frequent occurrence are taken from the catastrophe of Sodom and Gomorrah, the miracles of the departure from Egypt, and the appearance of Jehovah on Sinai. Examples might easily be multiplied in illustration of this remarkable characteristic of the Hebrew poets: they stand thick upon every page of their writings, and in striking contrast to the vague generalizations of the Indian philosophic poetry.

In Hebrew, as in other languages, there is a peculiarity about the diction used in poetry—a kind of poetical dialect, characterized by archaic and irregular forms of words, abrupt constructions, and unusual inflections, which distinguishes it from the contemporary prose or historical style. It is universally observed that archaic forms and usages of words linger in the poetry of a language after they have fallen out of ordinary use. A few of these forms and usages are here given from Gesenius's Lehrgebäude. The Piel and Hiphil voices are used intrusively (Jer. ii. 60; Ez. x. 7; Job xxix. 24): the apocopated future is used as a present (Job xv. 33; Ps. xi. 6; Is. xlii. 6). The termination \( \text{\text{-}} \) is found for the ordinary feminine \( \text{\text{-}} \), (Ex. xv. 2; Gen. xlix. 22; Ps. cxxxi. 4); and for the plural \( \text{\text{-}} \), we have \( \text{\text{-}} \). (Job xv. 13; Ez.
T. Eusebius. What is the distinguishing feature for languages (Ez. xii. 14)?

The verbal suffixes, נִי, נָי, and נָיָה (Ex. xv. 9), and the pronominal suffixes to nouns נָיָה, נִי, and נָיָה (Hab. iii. 19), are peculiar to the poetical books; as are נָי (Ps. cxvi. 12), נָיָה (Deut. xxiii. 37; Ps. xi. 7), and the more unusual forms, נָי (Ex. xli. 11), נָי for נָי, נָי for נָי, נָי for נָי, נָי for נָי, and the peculiar forms of the nouns, נָי, נָי, נָי, and so on.

But the form of Hebrew poetry is its distinguishing characteristic, and what this form is, has been a vexed question for many ages. The Talmudists, as described by Philo (de Estrang. 475, ed. Mang.), sang hymns and psalms of thanksgiving to God, in divers measures and strains; and these were either new or ancient ones composed by the old poets, who had left behind them measures and melodies of trimeter verses, of procreative songs, of hymns, of songs sung at the offering of libations, or before the altar, and continuous choral songs, beautifully measured out in strophes of intricate character (§ 10, p. 494).

The value of Philo's testimony on this point may be estimated by another passage in his works, in which he claims for Moses a knowledge of numbers and geometry, the theory of rhythm, harmony, and metre, and the whole science of music, practical and theoretical (de Viti Moisai, i. 5, vii. p. 84). The evidence of Josephus is as little to be relied upon. Both these writers labored to magnify the greatness of their own nation, and to show that in literature and philosophy the Greeks had been anticipated by the Hebrew barbarians. This idea pervades all their writings, and it must always be borne in mind as the key-note of their testimony on this as on other points. According to Josephus (Ant. ii. 16, § 4), the Song of Moses at the Red Sea (Ex. xv.) was composed in the hexameter measure (אֶדֶם בַּעַר הַנֶּפֶר) and again (Ant. iv. 8, § 44), the song in Deut. xxxii., is described as a hexameter poem. The Psalms of David were in many metres, some trimeters and some pentameters (Ant. vii. 12, § 3). Eusebius de Pomp. Lang. xi. 3, 211, ed. Col. 1688) characterizes the great Song of Moses and the 118th (119th) Psalm as metrical compositions in what the Greeks call the heroic metre. They are said to be hexameters of sixteen syllables. The other verse compositions of the Hebrews are said to be in trimeters. This saying of Eusebius is attacked by Julian (Char. contr. Ant. ii. 7), who on his part endeavored to prove the Hebrews devoid of all culture. Jerome (Prof. in Hebr. 80) appeals to Philo, Josephus, Origen, and Eusebius, for proof that the Psalter, the Lamentations of Jeremiah, and almost all the songs of Scripture, are composed in metre, like the odes of Horace, Pindar, Alcaeus, and Sappho. Again, he says that the Book of Job, from iii. 3 to xii. 6, is in hexameters, with dactylics and spondees, and frequently, on account of the peculiarities of the Hebrew language, others who have not the same syllables but the same time.

In Epist. ad Paulum (Opp. ii. 709, ed. Martini) occurs a passage which shows in some measure how far we are to understand literally the terms which Jerome has borrowed from the verse literature of Greece and Rome, and applied to the poetry of the Hebrews. The conclusion seems inevitable that these are employed simply to denote a general external resemblance, and by no means to indicate the existence, among the poets of the Old Testament, of a knowledge of the laws of metre, as we are accustomed to understand the term. There are, says Jerome, four alphabetical Psalms, the 110th (111th), 111th (112th), 118th (119th), and the 144th (145th). In the first two, one letter corresponds to each clause or versicle, which is written in trimeter iambics. The others are in tetrameter iambics, like the song in Deuteronomy.

In Ps. 118 (119), eight verses follow each letter: in Ps. 144 (145), a letter corresponds to a verse. In Lamentations we have four alphabetical acrostics, the first two of which are written in a kind of Sapphic metre; for three clauses which are connected together and begin with one letter (i.e., the first clause) there is a period in heroic measure (Herōicā versu). The third is written in trimeter, and the verses in threes each begin with the same letter. The fourth is like the first and second. The Proverbs end with an alphabetical poem in tetrameter iambics, beginning, "A virtuous woman who can find?". In the Pref. in Caron. Leobs. Jerome compares the metres of the Psalms to those of Horace and Pindar, those running in iambics, now ringing with Alcaics, now swelling with Sapphics, now beginning with a half foot. What he asks, is more beautiful than the song of Deuteronomy and Isaiah? What more weighty than Solomon's? What more perfect than Job? All which, as Josephus and Origen testify, are composed in hexameters and pentameters. There can be little doubt that these terms are mere generalities, and express no more than a certain rough resemblance, so that the songs of Moses and Isaiah may be designated hexameters and pentameters, with as much propriety as the first and second chapters of Lamentations may be compared to Sapphic odes. The resemblance of the Hebrew verse composition to the classic metres, is expressly denied by Gregory of Nyssa (Treat. in Psalms, cap. iv.). Augustine (Ep. 131 ad Numerium) confesses his ignorance of Hebrew, but adds that those skilled in the language believed the Psalms of David to be written in metre. Bisdore of Seville (Orig. i. 18) claims for the heroic metre the highest antiquity, insomuch as the Song of Moses was composed in it, and the Book of Job, which was written before the times of Pherecides and Homer, is written in dactyla and spondees. Joseph Scaliger (Antiquit. ad Eus. Chron. p. 6 b, etc.) was one of the first to point out the fallacy of Jerome's statement with regard to the metres of the Psalter and the Lamentations, and to assert that these books contained no verse bound by metrical laws, but that their language was merely prose, animated by a poetic spirit. He admitted the Song of Moses in Deuteronomy, the Proverbs, and Job, to be the only books in which there was necessarily any trace of rhythm, and this rhythm he compares to that of two dimeter iam-
POETRY, HEBREW

öos, sometimes of more, sometimes of fewer syllables as the sense required. Gerhard Vossius (De Not. et Const. Artis Poët. lib. 1, c. 13, § 2) says, that in Job and the Proverbs there is rhythm but no metre; that is, regard is had to the number of syllables but not to their quantity. In the Psalms and Lamentations not even rhythm is observed.

But, in spite of the opinions pronounced by these high authorities, there were still many who believed in the existence of a Hebrew metre, and in the possibility of recovering it. The theories proposed for this purpose were various. Giovanni professor at Groningen (Diversis Lyric. Langd. Bot. 1677), advocated both rhymes and metre; for the latter he laid down the following rules. The vowel alone, as it is long or short, determines the length of a syllable. Short forms no syllable. The periods or verses of the Hebrew poems never contain less than a distich, or two verses, but in proportion as the periods are longer they contain more verses. The last syllable of a verse is indifferently long or short. This system, if it may be called such (it is equally as in Herodotus, where the last syllable was supported by many men of note; among others by the younger Buxtorf, Heinsius, L. de Die, Constantin L'Empereur, and Hottinger. On the other hand it was vigorously attacked by L. Cappelius, Calvines, Danvaner, Peiffer, and Solomon Van Til. Towards the close of the 17th century Marcus Meillomius announced to the world, with an amount of pompous assurance which is charming, that he had discovered the lost metrical system of the Hebrews. By the help of this mysterious secret, which he attributed to divine revelation, he proposed to restore not only the Psalms but the whole Hebrew Scriptures, to their pristine condition, and thus confer upon the world a knowledge of Hebrew greater than any which had existed since the ages which preceded the Alexandrine translators. But Meillomius did not allow his enthusiasm to get the better of his prudence, and the condition on which this portentous secret was to be made public was, that six thousand curious men should contribute 20. sterling a-piece for a copy of his book, which was to be printed in two volumes folio. It is almost needless to add that his scheme fell to the ground. He published some specimens of his metrical compositions, and a few entire chapters of the Old Testament in 1690. The glimmer which he gives of his grand secret are not such as would make us regret that the knowledge of it perished with him. The whole book of Psalms, he says, is written in distichs, except the first psalm, which is in a different metre, and serves as an introduction to the rest. They were therefore intended to be sung not by one priest, or by one chorus, but by two. Meillomius was severely chastised by J. H. Maius, B. H. Gebhardus, and J. G. Zentgravis "(Cebel, Serr. Lit. p. 11). In the last century the learned Francis Hare, bishop of Chichester, published an edition of the Hebrew Psalms, metrically divided, to which he prefixed a dissertation on the ancient poetry of the Hebrews (Chichester Psalter, 1733). Bishop Hare maintained that the ancient Hebrew poetry no regard was had to the quantity of syllables. He regarded Saborean as long vowels, and ong vowels as short at his pleasure. The rules which he laid down are the following. In Hebrew poetry all the feet are dissyllables, and no regard is had to the quantity of a syllable. Clauses consist of an equal or unequal number of syllables. If the number of syllables be equal, the verses are trochaic; if unequal, iambic. Periods for the most part consist of two verses, often three or four, sometimes more. Clauses of the same periods are of the same kind, that is, either iambic or trochaic, with very few exceptions. Trochaic clauses generally agree in the number of the feet, which are sometimes three, as in Ps. xxiv. 1, cxi. 1, and this is the most frequent; sometimes five, as in Ps. ix. 5. In iambic clauses the number of feet is sometimes the same, but they generally differ. Both kinds of verse are mixed in the same poem. In order to carry out these rules they are supplemented by one which gives to the versifier the widest license. Words and verses are contracted or lengthened at will, by syncope, elision, etc. In addition to this, the bishop was under the necessity of maintaining that all grammarians had hitherto erred in laying down the rules of ordinary punctuation. His system, if it may be so called, carries its own retribution with it, but was considered by Lowth to be worthy a reply under the title of Metrice Harrana Brevia et Lamentatio, printed at the end of his De Sacra Poës. Heb. Propheticæ, etc.

Anton (Conject. de Metro Heb. Ant. Lips. 1770), admitting the metre to be regulated by the accents, endeavored to prove that in the Hebrew poems was a highly artistic and regular system, like that of the Greeks and Romans, consisting of strophes, antistrophes, epodes, and the like; but his method is as arbitrary as Hare's. The theory of Lantwitz (Versuch einer wichtigen Theorie von der Lied. Versuchung. Lib. 1775) is an improvement on the two previous systems. It supposes that the regularity of the measure is maintained by the quantity of the verse, and that the number of syllables is three or four, but generally three.

The present Arabic prosody, however, is of comparatively modern invention; and it is not consistent with both the syllable, there could be one system of versification among the Hebrews like that imagined by Sir W. Jones, when in the example he quotes of Cant. i. 5, he refers the first clause of the verse to the second, and the last to the fifteenth kind of Arabic metre. Greve (Uitma Copafa Job, etc. 1791) believed that in Hebrew, as in Arabic and Syriac, there was a metre, but that it was obscured by the fact that the orthography is not always the same. He therefore assumed for the Hebrew an Arabic vocalization, and with this modification he found iambic trimeters, dimeters, and tetrameters, to be the most common forms of verse, and lays down the laws of versification accordingly. Bellermann (Versuch über die Metrik der Hebräer, 1813) was the last who attempted to set forth the old Hebrew metres. He adopted the Masoretic orthography and vocalization, and determined the quantity of syllables by the accentuation, and what he termed the "Moresystem." denoting by moren the compass of a single syllable. Each syllable which has not the tone accent must have three moren; every syllable which has the tone accent may have either four or two, but generally three. The moren
reckoned as follows: a long vowel has two; a short vowel, one; every consonant, whether single or double, has one more. _Scriba_ simple or compound is not reckoned. The quiescent letters have no more. _Dei_ forte compensative has one; so has _met)._ The majority of dissyllabic and tri-syllabic words, having the accent on the last syllable, will thus form rhymes and anapests. But as many have the accent on the penultimate, these will form trochees. The most common kinds of feet are rhymes and anapests, interchanging with trochees and trichords. Of verses composed of these feet, though not uniform as regards the numbers of the feet, consist, according to Bellermann, the poems of the Hebrew Scriptures.

Among those who believed in the existence of a Hebrew metre, but in the impossibility of recovering it, were Carpzov, Lowth, Pococke, Herder to a certain extent, Jahn, Bauer, and Raxter. The opinions of Lowth, with regard to Hebrew metre, are summed up by Jebb (_Sect. Lit._ p. 16) as follows: "He begins by asserting, that certain of the Hebrew writings are not only animated with the true poetic spirit, but, in some degree, couched in poetic numbers; yet, he allows, that the quantity, the rhythm, or modulation of Hebrew poetry, not only is unknown, but is the subject of investigation by human art or industry; he states, after Almansi, that the Jews themselves disclaim the very memory of metrical composition; he acknowledges, that the artificial conformation of the sentences, is the sole indication of metre in those poems; he barely maintains the creditability of attention having been paid to numbers or feet in their compositions; and, at the same time, he筹备s the utter impossibility of determining, whether Hebrew poetry was modulated by the ear alone, or according to any definite and settled rules of prosody." The opinions of Scaliger and Vossius have been already referred to. Vitrani allows to Isaiah a kind of oratorical measure, but adds that it could not on this account be rigidly termed poetry. Michaelis (_Not. in Poes. iv._) in his notes on Lowth, held that there never was metre in Hebrew, but only a free rhythm, as in recitative, though even less transmuted. He declared himself against the Masoretic distinction of long and short vowels, and made the rhythm to depend upon the tone syllable; adding, with regard to fixed and regular metre, that what has escaped such diligent search he thought had no existence. On the subject of the rhythmical character of Hebrew poetry, as opposed to metrical, the remarks of Jebb are remarkably appropriate. "Hebrew poetry," he says (_Sect. Lit._ p. 29), "is universal poetry; the poetry of all languages, and of all peoples; the collection of words (whatever may have been the sound, for of this we are quite ignorant, is primarily directed to secure the best possible announcement and discrimination of the sense; hence a translator only is literal or, and so far as the genius of his language will permit, let him preserve the original order of the words, and he will infallibly put the reader in possession of all, or nearly all, that the Hebrew text can give to the best Hebrew scholar of the present day. Now, had there been originally metre, the case, it is presumed, could hardly have been such; something must have been subordinated to the exigencies of metrical necessity; the sense could not have invariably predominated over the sound; and the poetry could not have been, as it unimportantly and emphatically is, a poetry, not of sounds or of words, but of things. Let
POETRY, HEBREW

xmplied to be applied to the Hebrew language; but in the number of things, and of the parts of things, — that is, the subject, and the predicate, and their adjuncts, in every sentence and proposition. Thus a phrase, containing two parts of a proposition, consists of two measures; add another containing two more, and they become four measures; another again, containing three parts of a proposition, consists of three measures; add to it another of the like, and you have six measures.

The following examples will serve for an illustration:

- Thyr righteous-hand, O-Jehovah, is glorious in power, Thy-right-hand, O-Jehovah, hath-crushed the enemy.

The words connected by a hyphen form a term, and the two lines, forming four measures each, may be called tetrameters.

Upon the whole, the author concludes, that the poetical parts of the Hebrew Scriptures are not composed according to the rules and measures of certain feet, dissyllables, trisyllables, or the like, as the poems of the modern Jews are; but nevertheless have undoubtedly other measures which depend on things, as above explained, in which regard they are more complex than those which consist of certain feet, according to the number and quantity of syllables. Of this, says he, you may judge yourself in the Songs of the Prophets. For you do not see, if you translate some of them into another language, that they still keep and retain their measure, if not wholly, at least in part? which cannot be the case in those verses, the measures of which arise from a certain quantity and number of syllables.

Lowth expresses his general agreement with Azariah's exposition of the rhythmus of things, but instead of regarding terms, or phrases, or senses, in single lines, as measures, he considered "only that relation and proportion of one verse to another, which arises from the correspondence of terms, and from the form of construction; from whence results a rhythmus of propositions, and a harmony of sentences." But Lowth's system of parallelism was more completely anticipated by Schoettgen in a treatise, of the existence of which the bishop does not appear to have been aware.

It is found in his Horae Hebraicae, vol. i. pp. 1249-1263, diss. vi., "de Exercitio Sacra." This exercise he defines to be, the conjunction of entire sentences signifying the same thing, so that exercitium has the same relation to sentences that synonymy does to words. It is only found in those Hebrew writings which rise above the level of historical narrative and the ordinary kind of speech.

Ten canons are then laid down, each illustrated by three examples, from which it will be seen how far Schoettgen's system corresponded with Lowth's.

(1.) Perfect exercitium is when the members of the two clauses bear the same relation to each other, as in Ps. xxxvii. 7; Num. xxiv. 17; Luke i. 47. (2.) Sometimes in the second clause the subject is omitted, as in Is. i. 18; Prov. viii. 19; Ps. cxxviii. 3. (3.) Sometimes part of the subject is omitted, as in Ps. xxxvii. 30; cii. 28; Is. liii. 5. (4.) The predicate is sometimes omitted in the second clause, as in Num. xxxiv. 5; Ps. xxxviii. 12. (5.) Sometimes part only of the predicate is omitted, as in Ps. liii. 9, cxix. 7. (6.) Words are added in one member which are omitted in the other, as in Num. xxiii. 18; Ps. cii. 28; Dan. xiii. 3. (7.) Sometimes two propositions will occur, treating of different things, but referring to one general proposition, as in Ps. xxxiv. 9, cxxviii. 3; Wisd. iii. 16. (8.) Cases occur, in which the second proposition is the contrary of the first, as in Prov. xxv. 8, xiv. i, 11. (9.) Entire propositions answer each to each, although the subject and predicate are not the same, as in Ps. lii. 7, cxix. 168; Jer. viii. 22. (10.) Exercitium is found with three members, as in Ps. i. 1, cxxx. 5; ii. 9. These canons Schoettgen applied to the interpretation of Scripture, of which he has given an example in the remainder of this and the following dissertation.

But whatever may have been achieved by his predecessors, there can be no question that the delivery of Lowth's lectures on Hebrew Poetry, and the subsequent publication of his translation of Isaiah, formed an era in the literature of the subject, more marked than any that had preceded it. Of his system it will be necessary to give a somewhat detailed account; for whatever may have been done since his time, and whatever modifications of his arrangement may have been introduced, all subsequent writers have confessed their obligations to the two works above mentioned, and have drawn their inspiration from them. Starting with the alphabetical poems as the basis of his investigation, because that in fifteen verses or stanzas was distinctly marked, Lowth came to the conclusion that they consist of verses properly so called, "of verses regulated by some observation of harmony or cadence; of measure, numbers, or rhythms," and that this harmony does not arise from rhyme, but from what he denominates parallelism. Parallelism he defines to be the correspondence of one verse or line with another, and divides it into three classes, synonymous, antithetic, and synthetic.

1. Parallel lines synonymous correspond to each other by expressing the same sense in different but equivalent terms, as in the following examples, which are two of the many given by Lowth:

"O-Jehovah, in-thy-strength the-king shall-rejoice; And-in-thy-salvation how greatly shalt-they-exult! The-desire of-his-heart thou-hast-granted unto-him; And-the-request of-his-lips thou-hast-not-de nied." Ps. xxi. 1, 2.

"For the-moth shall-consume-them like-a-gra nient; And-the-worm shall-eat-them like wool: But-my-righteousness shall-endure for-ever; And-my-salvation to-the-age of-ages." — Is. ii. 8.

It will be observed from the examples which Lowth gives that the parallel lines sometimes consist of three or more synonymous terms, sometimes of two, sometimes only of one. Sometimes the lines consist each of a double member, or two propositions, as Ps. cxliv. 5, 6; Is. lix. 21, 22. Parallels are formed also by a repetition of part of the first sentence (Ps. lxvii. 1, 11, 16; Is. xxvi. 5, 6; Hos. vi. 4;) and sometimes a part has to be supplied from the former to complete the sentence (2 Sam. xxii. 41; Job xxvii. 6; xlii. 28). Parallel triplets occur in Job iii. 4, 6, 9; Ps. cxli. 10; Is. ix. 20; Joel iii. 13. Examples of parallels of four lines, in which two distichs form one stanza, are Ps. xxxvii. 1, 2; Is. i. 3, xlix. 4; Am. i. 2. In periods of five lines the odd line sometimes comes in between two distichs, as in Job viii. 5, 6; Is. xiii. 7; Hos. vi. 9; Joel iii. 16: or after two distichs closes the stanza, as in Is. xiv. 26. Alternate parallelism in stanzas of four lines and triplets in Ps. xxxvi. 1, 2 is more distinct, but the most striking examples of the alternate quatrain are Deut. xxxii. 1, 2, 4, 5: the first line forming a continuous sense with the third, and the second with the fourth (comp. Is. xxxiv. 6; Gen
It is instructive, as showing how difficult, if not impossible, it is to make any strict classification of Hebrew poetry, to observe that this very passage is given by Gesenius as an example of synonymous parallelism, while De Wette calls it synthetic. The illustration of synthetic parallelism quoted by Gesenius is Ps. xxvii. 4: —

"One thing I ask from Jehovah.
It will I seek after —
My dwelling in the house of Jehovah all the days of my life.
To behold the beauty of Jehovah,
And to inquire in his temple."

In this kind of parallelism, as Nordheimer (Gram. As. III. p. 87) observes, "an idea is neither repeated nor followed by its opposite, but is kept in view by the writer, while he proceeds to develop and enforce his meaning by accessory ideas and modifications."

4. To the three kinds of parallelism above described Jebb adds a fourth, which seems rather to be an unnecessary refinement upon than distinct from the others. He denominates it *inverted parallelism*, in which he says, "there are stanzas so constructed that, whatever be the number of lines, the first line shall be parallel with the last: the second with the penultimate; and so throughout in an order that looks inward, or, to borrow a military phrase, from banks to centre." (Soc. Lit. p. 53.)

Thus —

"My son, if thine heart be wise,
My heart also shall rejoice;
Yea, my reins shall rejoice
When thy lips speak right things."

Prov. xxviii. 15, 16.

"Unto Thee do I lift up mine eyes, O Thou that dwell'est in the heavens; Behold as the eyes of servants to the hand of their masters; As the eyes of a maiden to the hands of her mistress; Even so look our eyes to Jehovah our God, until he have mercy upon us." — Ps. cxviii. 1, 2.

Up on examining these and the other examples quoted by Bishop Jebb in support of his new division, to which he attaches great importance, it will be seen that the peculiarities consist in the structure of the stanza, and not in the nature of the parallelism; and any one who reads Ewald's chaste rate treatise on this part of the subject will rise from the reading with the conviction that to attempt to classify Hebrew poetry according to the character of the stanzas employed will be labor lost and in vain, resulting only in a system which is no system, and in rules to which the exceptions are more numerous than the examples.

A few words may now be added with respect to the classification proposed by De Wette, in which more regard was had to the rhythm. The four kinds of parallelism are — 1. That which consists in an equal number of words in each member, as in Gen. iv. 23. This he calls the original and perfect kind of parallelism of members, which corresponds with metre and rhyme, without being identical with them (Die Psalmen, Tred. § 7). Under this head are many minor divisions. — 2. Unequal parallelism, in which the number of words in the members is not the same. This again is divided into — a. The simple, as Ps. civii. 23. b. The compound, consisting of the antagonistic (Job x. 1; Ps. xxxvi. 6), the antithetic (Ps. xv. 4), and the synthetic (Ps. xv. 5) c. That in which the simple member is dispor
tionately small (Ps. xii. 10). d. Where the compos-
"ite member grows up into three and more sentences
(Ps. 1. 3, lvx. 10). e. Instead of the close parallelis-
there sometimes occurs a short additional clause, as in Ps. xxiii. 3. — 3. Out of the parallelism which is
[Text continues]
the decay of versification begins, and to this period belong the rarest forms of verse.

It remains now only to notice the rules of Hebrew poetry as laid down by the Jewish grammarians, to which reference was made in remarking upon the system of R. Azariah. They have the merit of being extremely simple, and are to be found at length, illustrated by many examples, in Mason and Bernard's *Heb. Gram. vol. ii. let. 57*, and accompanied by an interesting account of modern Hebrew versification.

The rules are briefly these: 1. That a sentence may be divided into members, some of which contain two, three, or even four words, and are accordingly termed Binwry, Ternary, and Quaternary members respectively. 2. The sentences are composed either of Binwry, Ternary, or Quaternary members entirely, or of these different members intermixed. 3. That in two consecutive members it is an elegancy to express the same idea in different words. 4. That a word expressed in either of these parallel members is often not expressed in the alternate member. 5. That a word without an accent, being joined to another word by *Mahabib*, is generally (though not always) reckoned with that second word as one. It will be seen that these rules are essentially the same with those of Longinus, De Wette, and other writers on parallelism, and from their simplicity are less open to objection than any that have been given.

In conclusion, after reviewing the various theories which have been framed with regard to the structure of Hebrew poetry, it must be confessed that beyond the discovery of very broad general laws, little has been done towards elaborating a satisfactory system. Probably this want of success is due to the fact that there is no system to discover, and that Hebrew poetry, while possessed, in the highest degree, of all sweetness and variety of rhythm and melody, is not fettered by laws of versification as we understand the term.

For the literature of the subject, in addition to the works already quoted, reference may be made to the following: *Carpenter, Introd. to the Bible, Cont. Bibl. p. 2, c. 1; Lowth, De Sacra Poesi Hebr. seu Institutiones, with notes by J. D. Michaelis and Rosenmüller (Oxon. 1828) [translated, with notes, by Calvin E. Stone, Andover, 1829]; the Preliminary Dissertation in his translation of Isaiah; Herder, *Geist der Hebr. Poesie* (transl. by President James Marsh, 2 vols., Burlington, 1833); *Jentzsch, Hebr. Prosit. in der Frey der Hebr. Poesie, Königsberg, 1825*, which contains the most complete account of all the various theories; *De Wette, Vber die Poesie* [transl. by Prof. J. Torrey, Bibl. Reps. iii. 445-518; Meier, Gesch. der Poet. National-Literatur der Hebr. in Deutschland, Commentar über das dichterische in der Poesie; and Hanpfeld, Die Poesie des Alten Israel, 1839]; and *J. C. Schramm, De Poet. Hebraicum* (1723). (The two essays just named, with others on the same subject by Eckert, the Abbé Henry, Damb Sawyer, Plateau, Leyser, Le Cher, Hare, and Lowth, are reprinted in vol. xxii. of *Udolino's Theoricae Heraed*. Herder, Briefe des Stud., vol. i. 4, and other writers, for instance, *Guns, Deriv. Lyric.* 1823; J. C. Schramm, De Poet. Hebraicum*. 1723). (The two essays just named, with others on the same subject by Eckert, the Abbé Henry, Damb Sawyer, Plateau, Leyser, Le Cher, Hare, and Lowth, are reprinted in vol. xxii. of *Udolino's Theoricae Heraed*. Herder, Briefe des Stud., vol. i. 4, and other writers, for instance, *Guns, Deriv. Lyric.* 1823; J. C. Schramm, De Poet. Hebraicum*. 1723). (The two essays just named, with others on the same subject by Eckert, the Abbé Henry, Damb Sawyer, Plateau, Leyser, Le Cher, Hare, and Lowth, are reprinted in vol. xxii. of *Udolino's Theoricae Heraed*. Herder, Briefe des Stud., vol. i. 4, and other writers, for instance, *Guns, Deriv. Lyric.* 1823; J. C. Schramm, De Poet. Hebraicum*. 1723).
POISON

we are accustomed to read as prose, bring back to the ear the cadence of Hebrew verse. The following is an example of this (2 Tim. iii. 11):

"For if we did with him,
We shall also live with him;
If we endure, we shall also reign with him;
If we deny him, he also will deny us;
If we are faithless, he remains faithful;
For he cannot deny himself."

It may be well to remark that although "hyman" and "hymning" do not occur in our English translation of the O. T., the correspondent Greek terms often occur in the Septuagint. The verb "to hymn" (γαρω) has sometimes the general sense of "to praise," but when applied to any particular composition refers to the use of the Psalms for that purpose. In the titles of the Psalms, the Greek phrase for "hymns of David" is generally found, in the place of "psalms of David" in the A. V. See Bed's Lexicon in LXX. Interpretes, s. v. γαιροι and γαρων. The usage of the LXX. no doubt influenced the N. T. phraseology in this respect. Comp. Matt. xxvi. 30; Mark xiv. 26; Acts xvi. 23; Heb. ii. 12.

On the hymnology of the early Church the reader may see Daniel's Theosaurus Hymnologicus (1841), and the Art. Hymnology, by Christ. Palmae in Herzog's Real-Encyc. vi. 365 ff., where a list of other writers will be found, as also under HYMN in this Dictionary.

II.

POISON. Two Hebrew words are thus rendered in the A. V. but they are so general as to throw little light upon the knowledge and practice of poisons among the Hebrews. 1. The first of these, תֶרֶד, chedubh, from a root signifying "to be hot," is used of the heat produced by wine (Hos. vii. 5), and the hot passion of anger (Deut. xxix. 27, &c.), as well as of the burning venom of poisonous serpents (Deut. xxiii. 24, 33; Ps. lviii. 4, cxl. 3). It in all cases denotes animal poison, and not vegetable or mineral. The only allusion to its application is in Job vi. 4, where reference seems to be made to the custom of anointing arrows with the venom of a snake, a practice the origin of which is of very remote antiquity (comp. Homer. Od. i. 261, 262; Ovid, Trist. iii. 10, 64, Fast. v. 397, &c.; Plin. xviii. 1). The Soanites, a Caucasic race mentioned by Strabo (xi. 499), were especially skilled in the art. Pliny (vi. 34) mentions ατριβο of Arab pirates who infested the Red Sea, and were armed with poisoned arrows like the Malays of the coast of Borneo. For this purpose the berries of the yew-tree (Plin. xvi. 20) were employed. The Gauls (Plin. xxvii. 76) used a poisonous herb, linoen, supposed by some to be the "lizard's bane," and the Scythians dipped their arrow-points in viper's venom mixed with human blood. These were so deadly that a slight scratch inflicted by them was fatal (Plin. xi. 115). The practice was so common that the name τερηδως, originally a poison in which arrows were dipped, was applied to poison generally.

2. מַטָּר (once מַטָּר, Deut. xxxii. 32 &c.), rōsh, 'a poison at all, denotes a vegetable poison primarily, and is only twice (Deut. xxix. 33; Job xix. 16) used of the venom of a serpent. In other passages where it occurs, it is translated "gall" in the A. V., except in Hos. x. 4, where it is rendered "hemlock." In the margin of Deut. xxix. 18, our translators, feeling the uncertainty of the word, give as an alternative "rosh, or, a poisonous herb." Beyond the fact that, whether poisonous or not, it was a plant of bitter taste, nothing can be inferred. That bitterness was its prevailing characteristic is evident from its being associated with wormwood (Deut. xxix. 18 [17]; Num. iii. 19; Am. vi. 12), and from the allusions to "water of rosh" in Jer. viii. 14, ix. 15, xxiii. 15. It was not a juice or liquid (Ps. lix. 21 [22]; comp. Mark xv. 23), but probably a bitter berry, in which case the expression in Deut. xxvii. 32, "grapes of rosh," may be taken literally. Gesenius, on the ground that the word in Hebrew also signifies "head," rejects the hemlock-cobblestone, and darts of other writers, and proposes the "poppy" instead; from the "heads" in which its seeds are contained. "Water of rosh" is then "opium," but it must be admitted that there appears in none of the above passages to be any allusion to the characteristic effects of opium. The effects of the rosh are simply nauseus and loathing. It was probably a general term for any bitter or nauseous plant, whether poisonous or not, because afterwards applied to the venom of snakes, as the corresponding word in Chaldee is frequently so used. [GALL.]

There is a clear case of suicide by poison related in 2 Macc. x. 13, where Polphemus Maccon is said to have destroyed himself by this means. But we do not find a trace of it among the Jews, and certainly poisoning in any form was not in favor with them. Nor is there any reference to it in the N. T., though the practice was fatally common at that time in Rome (Suét. Neró, cc. 33, 34, 35; Thb. c. 73; Claud. c. 1). It has been suggested, indeed, that the φαράκας of Gal. v. 20 (A. V. "witchcraft"), signifies poisoning, but this is by no means consistent with the usage of the word in the LXX. (comp. Ex. vii. 11, viii. 7, 18, &c.), and with its occurrence in Rev. ix. 21, where it denotes a crime clearly distinguished from murder (see Rev. xxii. 8, xxi. 15). It more probably refers to the concoction of magical potions and love philtres.

On the question of the wine mingled with myrrh, see GALL.

W. A. W.

POL' LUX. [CASTOR AND POLLEUX.]

POLYGAMY. [MARRIAGE.]

POMEGRANATE (��א), ῥίβαμον: ῥοα, ῥοά, ῥοίκωρ, κάδων: melum punicum, melum granatum, melongeranaum) by universal consent is acknowledged to denote the Heb. ῥίβαμον, a word which occurs frequently in the O. T., and is used to designate either the pomegranate tree or its fruit. The pomegranate was doubtless early cultivated in Egypt: hence the complaint of the Israelites in the wilderness of Zin (Num. xx. 5), this "is no place of figs, or of vines, or of pomegranates." The tree, with its characteristic calyx-crowned fruit, is easily recognized on the Egyptian sculptures (Asa. Egypt. i. 38, ed. 1854). The spies brought to Joshua "of the pomegranates of the land of Bashan" (Num. xiii. 23; comp. also Deut. viii. 28). The villages or towns of Rimmon (Josh. xv. 32), Gath-rimmon (xxii. 25), En-rimmon (Neh. xi. 29), possibly derived their names from pomegranate-trees which grew in their vicinity. These trees
suffered occasionally from the devastations of locusts (Joel i. 12; see also Hag. ii. 19). Mention is made of "an orchard of pomegranates" (in Cant. iv. 13; and in iv. 3, the checks (A. V. "temples") of the Beloved are compared to a section of "pomegranate within the locks," in allusion to the beautiful rye color of the flower. Curved figures of the pomegranate adorned the tops of the pillars in Solomon's Temple (1 K. vii. 18, 20, &c.;) and worked representations of this fruit, in blue, purple, and scarlet, ornamented the hem of the ephod (Ex. xxviii. 33, 34). Mention is made of a "spiced wine of the juice of the pomegranate" in Cant. viii. 2; with this may be compared the pomegranate wine (αιξυς αΙρος) of which Dioscorides (v. 34) speaks, and which is still used in the East. Chardin says that great quantities of it were made in Persia, both for home consumption and for exportation, in his time (Script. Herb. p. 399; Harmer's Obs. i. 377). Russell (Not. Hist. of Antioch, i. 83, 24 ed.) states that "the pomegranate" (περανΔα in Arabic, the same word as the Hebrew) "is common in all the gardens." He speaks of three varieties, "one sweet, another very acid, and a third that partakes of both qualities equally blended. The juice of the sour sort is used instead of vinegar; the others are cut open when served up to table; or the grains taken out, and, be-spinkled with sugar and rose-water, are brought to table in saucers." He adds that the trees are apt to suffer much in severe winters from extraordinary cold.

The pomegranate-tree (Punica granatum) derives its name from the Latin pomegranum, "grained apple." The Romans gave it the name of Punicus, as the tree was introduced from Carthage: it belongs to the natural order Myrtaceae, being, however, rather a bush than a tree. The foliage is dark green, the flowers are crimson; the fruit is red when ripe, which in Palestine is about the middle of October, and contains a quantity of juice. The rind is used in the manufacture of morocco leather, and, together with the bark, is sometimes used medicinally to expel the tape-worm. Pomegranates without seeds are said to grow near the river Cabul. Dr. Boyle (Kiteley, Cyclop. art. "Pomum") states that this tree is native of Asia, and is to be traced from Syria through Persia even to the mountains of Northern India.
POOL OF BETHESDA

Middle pool, length 423 feet; breadth at E. 250, at W. 150; depth 39; distance above lower pool 248 feet. (3.) Lower pool, length 582 feet; breadth at E. 207, at W. 148; depth 50 feet. They appear to be supplied mainly from a spring in the ground above (Fountain; Cistern; Jerusalem; vol. ii. pp. 1287 a, 1329; Conduit; Robinson, Res. i. 348, 474).

H. W. P.

* POOL OF BETHESDA. [Bethesda.]

POOR, a

The general kindliness of the law towards the poor is sufficiently shown by such passages as Deut. xv. 7 for the reason that (ver. 11), "the poor shall never cease out of the land," and a remarkable agreement with some of its directions is expressed in Job xx. 19, xxiv. 3, foll., where among acts of oppression are particularly mentioned "taking (away) a pledge," and withholding the sheaf from the poor, vv. 9, 10 [Loan], xxix. 12, 16, xxxi. 17, "eating with" the poor (comp. Deut. xxi. 12, &c.). See also such passages as Ez. xviii. 12, 16, 17, xxii. 21; Jer. xxii. 13, 16, v. 28; Is. x. 2; Am. ii. 7; Zech. vii. 10, and Ecclus. iv. 1, 4, vii. 32; Tob. xii. 8, 9. [ALMS.]

Among the special enactments in their favor the following must be mentioned. 1. The right of

6. מְלִית, the word most usually "poor" in A. V.: πονηρός, πονηρός. πίπτεις: indigens, pauper. Also Zech. ix. 9, and Is. xxi. 6, πάντες: pauper.

8. Poverty: מְלִית: ἐκδοσα: εγεῖται. In N. T., πονηρός, pauper, and πίπτεις, εγεῖται, once only, 2 Cor. ix. 9. "Poor" is also used in the sense of "afflicted," "humble," etc.; e. g. Matt. v. 3

They are three in number, partly hewn out of the rock, and partly built with masonry, but all lined with cement, and formed on successive levels with conduits leading from the upper to the lower, and flights of steps from the top to the bottom of each (Sands, Trac. p. 150). They are all formed in the sides of the valley of Elthan, with a dam across its opening, which forms the E. side of the lowest pool. Their dimensions are thus given by Dr. Robinson: (1) Upper pool, length 800 feet; breadth at E. 236, at W. 228; depth at E. 25 feet; distance above middle pool, 185 feet. (2)
POOR

POPLAR

The "corners" of the field were not to be reaped, nor all the grapes of the vineyard to be gathered, the olive-trees not to be beaten a second time, but the stranger, fatherless, and widow to be allowed to gather what was left. So too if a sheaf forgotten was left in the field, the owner was not to return for it, but leave it for them (Deut. xix, 9, 10; Deut. xxiv, 19, 21). Of the practice in such cases in the times of the Judges, the story of Ruth is a striking illustration (Ruth ii, 2, &c.).

2. From the produce of the land in sabbatical years, the poor and the stranger were to have their portion (Ex. xxviii. 11; Lev. xxv. 6).

3. Return upon land in the jubilee year, with the limitation as to town houses (Lev. xxv. 35-39).

4. Prohibition of usury, and of retention of pledges, i.e. loans without interest enjoined (Lev. xxv. 35, 37; Ex. xxii. 25-27; Deut. xv. 7, 8, xxiv. 10-13). [LOAN.]

5. Permanent bondage forbidden, and manumission of Hebrew bondmen or bondwomen enjoined in the sabbatical and jubilee years, even when bound to a foreigner, and redemption of such previously to those years (Deut. xii. 15; Lev. xxv. 39-42, 47-54).

6. Votaries from the tithes to be shared by the poor after the Levites (Deut. xiv. 28, xxxii. 12, 13). [TITHES.]

7. The poor to partake in entertainments at the feast of Weeks and Tabernacles (Deut. xvi. 11, 14; see Neh. viii. 10).

8. Daily payment of wages (Lev. xix. 13). On the other hand, while equal justice was commanded to be done to the poor man, he was not allowed to take advantage of his position to obstruct the administration of justice (Ex. xxii. 31; Lev. xix. 15).

On the law of gleaning the Rabbbinical writers founded a variety of definitions and refinements, which notwithstanding their minute and frivolous character, were on the whole strongly in favor of the poor. They are collected in the treatise of Maimonides Mishneh Torah, de jure pauperum, translated by Prideaux (Epoldii, viii. 721), and specimens of their character will appear in the following titles.

There are, he says, 13 precepts, 7 affirmative and 6 negative, gathered from Lev. xix., xxii.; Deut. xiv., xv., xxiv. On these the following questions are raised and answered. What is a "corner," a "handful?" What is to "forget" a sheaf? What is a "stranger?" What is to be done when a field or a single tree belongs to two persons; and further, when one of them is a stranger, or when it is divided by a road, or by water; when insects or enemies destroy the crop? How much grain must a man give by way of alms? Among prohibitions is one forbidding any proprietor to frighten away the poor by a savage beast. An Inmate is forbidden to take alms openly from a Gentile. Unwilling almsgiving is condemned, on the principle explained in Job xxx. 25. Those who gave less than their due proportion, to be punished. Menoncants are divided into two classes, settled poor and vagrants. The former were to be relieved by the authorized collectors, but all are enjoined to maintain themselves if possible. [ALMS.]

Lastly, the claim of the poor to the tithes as prescribed is laid down as a positive right.

Principles similar to those laid down by Moses are inculcated in N. T., as Luke xvi. 11, xiv. 13; Acts vi. 1; Gal. ii. 10; Jas. ii. 15. In later times, mendicancy, which does not appear to have been contemplated by Moses, became frequent. Instances actual or hypothetical may be seen in the following passages: Luke xvi. 20, 21; xviii. 35; Mark x. 46; John ix. 8; Acts iii. 2. On the whole subject, besides the treatise above named, see Mishna, Gems, i, 3; 4, 5; ii. 7; Pesoch. iv. 8; Sedlen, de Jure Natur, vi. p. 755, &c.; Saalschitz, Archb. Heb. ii. p. 256; Michaelis, § 142, vol. ii. p. 248; Otro, Lett. Robb. p. 308.

H. W. F.

POPLAR (77870, δασον, στραφακάς, in gen. xxvi. 37; ασφαλεία, in Hos. iv. 13; populus), the rendering of the above named Hebrew word, which occurs only in the two places cited. Peeled rods of the δασον were put by Jacob before Laban's ring-streaked sheep. This tree is mentioned with the oak and the terebinth, by Hosea, as one under which idolatrous Israel used to sacrifice.

Several authorities, Celsius amongst the number (Hierob. i. 292), are in favor of the rendering of the A. V., and the "white poplar" (Poyulus albus) is the tree denoted; others understand the "storrax tree" (Styraex officinalis, Linn.). This opinion is confirmed by the LXX. translator of Genesis, and by the Arabic version of Saadib, which has the term ubana (אבקנה), i. e. the "Storrax tree." a

Both poplars b and styrax or stora trees are common in Palestine, and either would suit the passages where the Hebrew term occurs. Dioscorides (ii. 79) and Pliny (N. H. xii. 17 and 25) both speak of the Styrax officinalis, and mention several kinds of exudation. Pliny says, "that part of Syria which adjoins Judaea above Phenicia produces storaux, which is found in the neighborhood of Galasia (Jbrell) and Marathus, as also of Casis, a mountain of Siscia. That which comes from the mountain of Ananias in Syria is highly esteemed for medicinal purposes, and even more so by the perfumers."

Storaux (στραφαξ) is mentioned in Ecclus. xxiv. 15, together with other aromatic substances. The modern Greek name of the tree, as we learn from Silioathro (Floa. Girax. i. 255) is στραφακας, and is a common wild shrub in Greece and in most parts of the Levant. The resin exudes either spontaneously or after incision. This property, however, it would seem, is only for the most part possessed by trees which grow in a warm country; for English specimens, though they flower profusely, do not produce the drug. Mr. Dan. Hanbury, who has discussed the whole subject of the storaux plants with much care (see the Pharmaceutical Journal and Transactions for Feb. 1857), tells us that a friend of his quite failed to obtain any exudation from Styrax officinalis, by incisions made in the hottest part of the summer of 1856, on specimens growing in the botanic garden at Montpellier.

b "Populas alba and P. Euphratica" say, P. dito
tana and negra are also said to grow in Syria." (J. D. Hooker)
PORATHA

The Styrax officinalis is a shrub from nine to twelve feet high, with ovate leaves, which are white underneath; the flowers are in racemes, and are white or cream-colored. This white appearance agrees with the etymology of the Heb.PORATH. The liquid Styrax of commerce is the product of the Liquidambar Orientalis, Mill. (see a fig. in Mr. Hanbury’s communication), an entirely different plant, whose resin was probably unknown to the ancients.

W. H.

PORATHA (Ποράθα) [Pers. = perh. favored by fate]: Φαρασάδας: Alex. Baradha: [FA. Φαρασάδα] Phorathus. One of the ten sons of Haman slain by the Jews in Shushan the palace (Esth. ix. 8). Perhaps a Poratha was the full form of the name, which the LXX. appear to have had before them (compare Aridatha, Parsamathath). PORCH. 1. οὐλον or οἶλον. 2. Μισολέν οἶλον, strictly a vestibule (Gen. p. 43), was probably a sort of verandah chandelier in the works of Solomon, open in front and at the sides, but capable of being inclosed with awnings or curtains, like that of the royal palace at Isaphan described by Chardin (vii. 386, and pl. 39). The word is used in the Talmud (Midr. Talm., iii. 7). Midr. γῖον was probably a corridor or colonnade connecting the principal rooms of the house (Wilkinson, A. E. i. 11). The porch (Matt. xxvii. 71) was probably the passage from the street into the first court of the house, in which in eastern houses, is the seat, now for the porter or persons waiting, and where also the master of the house often receives visitors and transacts business (Lane, Med. Egy. i. 32: Shaw, Temp. p. 207). [HOUSE. The word in the parallel passage (Mark xvi. 68) is παρακλήσεως, the outer court. The scene therefore of the second? denial of our Lord took place, either in that court, or in the passage from it to the house-door. The term πρόθυρον is used for the colonnade or portico of Bethsaida, and also for that of the Temple called Solomon’s porch (John v, 2, x. 23; Acts iii. 11, v. 12).

Josephus describes the porticoes or cloisters which surrounded the Temple of Solomon, and also the royal portico. These porticoes are described by Tacitus as forming an important line of defense during the siege (Joseph. Ant. viii. 3, § 9, xvi. 11, §§ 3, 5; B. J. v. 5, § 2; Tac. Hist. v. 12). [TEMPLE; SOLOMON’S PORCH.] H. W. P.

The "porch" between which and the altar the priests were directed to pray and weep (Joel ii. 17), was on the east side of the Temple, leading from the court of the priests into the sanctuary or outer apartment of the fane of the Temple. The priests standing here had the altar behind them with their faces towards the sanctuary, which was the proper position when they offered prayer. It is mentioned (Ezek. viii. 19) as an insult to Jehovah, a heathenish act, that the priests stood with their back towards the sanctuary and their faces towards the east.

H.

PORCIUS FESTUS. [FESTUS.]

* PORT. Neh. ii. 13, is used in the Latin sense of "gate," from porte, whence "porter," a gate-keeper. Port = seaport, is from portus, a harbor. On the "Dung Port," or Dung Gate, see JERUSALEM, vol. ii. p. 1322.

H.

PORTER. This word when used in the A. V. does not bear its modern signification of a carrier of burdens, but denotes in every case a gatekeeper, from the Latin portarius, the man who attended to the porta. In the original the word is πορτας, shor, from πορτα, πορτά, a gate: πορταριος, and πορταριος: portarius and junctor. This meaning is evidently implied in 1 Chr. xi. 21; 2 Chr. xxiii. 19, xxx. 15; John x. 3. It is generally employed in reference to the Levites who had charge of the entrances to the sanctuary, but is used also in other connections in 2 Sam. xviii. 20; 2 K. vii. 10, 11; Mark xiii. 24; John v. 3, xviii. 16, 17. In two passages (1 Chr. xv. 23, 24) the Hebrew word is rendered "doorkeepers," and in John xviii. 16, 17, ἡ πόρτα is "she that kept the door." G.

* Rhoda was porteress in the house of the mother of John Mark, at Jerusalem (Acts xii. 13). Luke employs in that passage the classical term (ὑποκειμένος) signifying to answer a call or knock at the door (Kypke, Obscr. Sacre, ii. 69). Women often performed that office among the Greeks and Romans as well as the Jews. The "porter" (John

---

α 1. Ροβαθν or Ροβατν; αλαμα: porticus (1 Chr. xxviii. 11); only as: porticus.

β 2. Ροβαθν: παραστασις: porticus; only once used fudg. iii. 28.

*Cf. the two words are in fact quite distinct, being derived from different roots. "Porter" in the modern sense is from the French porteur. The similarity between the two is alluded to in a passage quoted from Watts by Dr. Johnson.
PORTION, DOUBLE

II. *PORTION, DOUBLE, i.e. "the portion" (more literally mouthful) "of two." 

So in Deut. xxxi. 17, of the treatment of the first-born son, who is to be distinguished from these later born, by receiving a larger portion of the father's estate. In 2 Kings ii. 2, Elisha asks Elijah if he is about to ascend to heaven that a double portion, i.e. an abundant supply, of his spirit may fall upon himself.

R. D. C. R.

POSIDONIUS (Ποσιδώνιος: Posidonius), an envoy sent by Nicander to Judas (2 Macc. xiv. 19).

POSSESSION. [Demoniacs.]

POST. 1. 1. Apl, a word indefinitely rendered by LXX. and Vulg. Probably, as Gesenius argues, the door-case of a door, including the lintel and side posts (Ges. Thes. p. 43). Akin to this is αθλόμενος used only in plur. (Ez. xvi. 16, &c.), probably a portico, and so rendered by Symm. and Syr. Vers. (Ges. p. 48).

2. Αναθήματα usually "cubits," once only "post." (Is. vi. 4).

3. Μεταχειρίσθη from a root signifying to shine, i.e. implying motion (on a centre).

4. Ψηφιος usually "threshold."

The ceremony of boring the ear of a voluntary bondsman was performed by placing the ear against the door-post of the house (Ex. xxi. 6; see Juv. Sat. i. 106, and Plaut. pun. v. 2, 21). [ Slave: DOLLAR.

The posts of the doors of the Temple were of olive-wood (1 K. vi. 33).

II. Κύριος, A. V. "post" (Esth. iii. 13), elsewhere "runner," and also "guard." A corridor or carrier of messages, used among other places in Job ix. 25. [ ANGEL:]

W. C. P.

Our English "post" (in French poste and Italian posta) is from postumus, a fixed place, as a military post, then a station for travellers and relay-horses, and then transferred to the traveller himself, especially on expeditions. (See Eastwood and Wright's Bible Word-Book, p. 378.)

POT. The term "pot" is applicable to so many sorts of vessels, that it can scarcely be restricted to any one in particular. [Bowel; Caldron; Basin; Cup, etc.]

a. Λήνη: το αθήνα from.
b. Λήνη: τα αθήνα: vestibulum.
c. Παραθύρων: superliminar.
d. Παραθύρων: φωτική: postis, from προ
eio.
f. Παραθύρων: φωτική: limen; in plur. τα προσωπα: super
luminaria (Am. ix. 1).
g. Παραθύρων: part. of Παραθύρων: "run;" μπλεπαράστεια: ear
nor.

1. Παραθύρων: ἄγιον (2 K. iv. 2), applied to oil.
2. Παραθύρων: σχεδιασμος: σχεδιασμος (Jer. xxxv. 6; Ges.
χ 29); usually "bowl" or "cup."

But from the places where the word is used we may collect the uses, and also in part the materials of the utensils implied.

1. Ασίας, an earthen jar, deep and narrow, without handles, probably, like the Roman and Egyptian amphora, inserted in a stand of wood or stone (Wilkinson, Anc. Egy. i. 47; Sands, Trac. p. 150).

2. Άρεως, an earthen vessel for stewing or seething. Such a vessel was used for baking (Ex. iv. 9). It is contrasted in the same passage (Exe. vi. 28) with a metal vessel for the same purpose. [Vessel:]

3. Πότιος, a vessel for culinary purposes, mentioned (1 Sam. ii. 14) in conjunction with "cal
dron" and "kettle," and so perhaps of smaller size.

4. Σίρ is combined with other words to denote special uses, as βραδής (Ex. iii. 3); ρε
θαται, "washing" (Ps. ix. 8; LXX. has ἄρας τῆς ἀνδρον: wash-pot); μικρῆς, "killing-pot." (Prov xxvii. 21). The blackness which such vessels would contract is alluded to in Joel ii. 6.

The water-pots of Cana appear to have been large amphora, such as are in use at the present day in Syria (Fisher, Voy. p. 56; Jolliffe, i. 33). These were of stone or hard earthenware; but gold, silver, brass, or copper, were also used for vessels both for domestic and also, with marked preference, for ritual use (1 K. vii. 45; x. 21; 2 Chr. iv. 16, x. 29; Mark vii. 2; Heb. ix. 4; John ii. 6; Michaelis, Laura of Moses, § 217, iii. 336, ed. Smith).

Ceramics for refining metal are mentioned (Prov. xxvi. 23, xxvii. 21).

The water-pot of the Samaritan woman may have been a leathern bucket, such as Bedouin women use (Burckhardt, Notiz, i. 45).

The shapes of these vessels we can only conjecture, as very few remain, but have yet been discovered, but it is certain that pottery formed a branch of native Jewish manufacture. [Pottery:]

W. C. P.

POTIPHAR (Ποτιφαρ) [see below]: Perce
ph情景; [Alex. in xxxviii. 36, Persephon: Pothiphar], an Egyptian pr. m., also written Ποτιφαρ, Ποτιφαρ. That these are but two forms of one name is shown by the ancient Egyptian equivalent, PET-P-RA, which may have been pronounced, at least in Lower Egypt, PET-PIRA. It signifies "belonging to the Sun." Rosellini

5. Ποτήριον: κάφων: cup; used with Ποτήριον (Jer. i. 13), "a seething-pot."

7. Ποτήριον: στρατίων: cup: (Exe. xxxvi. 3; Heb.
ix. 4).

POTIPHERAH

remarks that it is of very frequent occurrence on the Egyptian monuments (Monumenti Storici, i. 117, 118). The fuller form is clearly nearer to the Egyptian.

Potiphar is described as "an officer of Pharaoh, chief of the executioners (ῥήματα ποταφερα, an Egyptian" (Gen. xxix. 1; comp. xxxvii. 36). The word we render "officer," as in the A. V., is literally "eunuch," and the LXX. and Vulg. so translate it here (ῥηματα, ευνοας); but it is also used for an officer of the court, and this is almost certainly the meaning here, as Potiphar was married, which is seldom the case with eunuchs, though some, as those which have the custody of the Ka'ateh at Meckhe are exceptions, and his office was one which would not usually be held by persons of a class ordinarily wanting in courage, so here again we must except the occasional usage of Muslim sovereigns, whose executioners were sometimes eunuchs, as Haroon er-Rashheed's Mesroor, in order that they might be able to carry out the royal commands even in the harem of the subjects. Potiphar's office was chief of the executioners, not, as the LXX. makes it, "of the cooks" (ἀρχοντος), for the position was not his house, but, or at least, in that of the chief of the executioners, probably a successor of Potiphar, who committed the disgraced servants of Pharaoh to Joseph's charge (ch. 2-4). He is called an Egyptian, though his master was probably a Shepherd-king of the XVIIth dynasty; and it is to be noticed that his name contains that of an Egyptian divinity, which does not seem to be the case with the names of the kings of that line, though there is probably an instance in that of a prince. [Chronology, vol. i. p. 413.] He appears to have been a wealthy man, having property in the field as well as in the house, over which Joseph was put, evidently in an important post (xxix. 4-6). In this position Joseph was tempted by his master's wife. The view we have of Potiphar's household is exactly in accordance with the representations on the monuments, in which we see carefully the produce of the land was registered and stored up in the house by overseers, as well as the liberty that the women of all ranks enjoyed. When Joseph was accused, his master contented himself with casting him into prison (19, 20), probably being a merciful man, although he may have been restrained by God from acting more severely. After this we hear no more of Potiphar, unless, which is unlikely, the chief of the executioners afterwards mentioned be he. [See Joseph.]

R. S. P.

POTIPHERAH [πωτιφερα; [Alex. Πωτιφερα] Potipherah, an Egyptian pr. n., also written Πωτιφαρ, Potiphar, corresponding to the PET-P-RA, "Belonging to the Sun," of the hieroglyphics.

Potipherah was priest or prince of On (Ὠν), and his daughter Asenath was given Joseph to wife by Pharaoh (xli. 45, 50, xlv. 20). His name, implying devotion to the sun, is very appropriate to a Heliopolitan, especially to a priest of Heliopolis, and therefore the rendering "priest" is preferable in his case, though the other can scarcely be asserted to be untenable. [On; Aseeath; Joseph.] R. S. P.

POTSHED (ṣaperah: στατικος, νη φιλτης) also in A. V. "sherd" (i. e. anything divided or separated, from shore, Richardson's Dict.), a piece of earthenware, broken either by the heat of the furnace in the manufacture, by fire used as a crucible (Prov. xxv. 29), or otherwise. [Pottery.] For illuminations, see Thomson's Land and Book, ii. 281.] H. W. P.

* POTTAGE. [Lentiles.]

POTTER'S FIELD. THE (κ απ ρ ι ης η ρου Π Ο Τ ΤΕΡΟΣ, ενερ γι οι τους) A piece of ground which, according to the statement of St. Matthew (xxvii. 7), was purchased by the priests with the thirty pieces of silver rejected by Judas, and converted into a burial-place for Jews not belonging to the city (see Alford, ad loc.). In the narrative of the Acts the purchase is made by Judas himself, and neither the potter's field, its connection with the priests, nor its ultimate application are mentioned. [Acedelines.]

That St. Matthew was well assured of the accuracy of his version of the occurrence is evident from his adding it (ver. 9) as a fulfillment of an ancient prediction. What that prediction was, and who made it, is not, however, at all clear. St. Matthew names Jeremiah: but there is no passage in the Book of Jeremiah, as we possess it (either in the Hebrew or LXX.), resembling that which he gives; and that in Zechariah, which is usually supposed to be alluded to, has only a very imperfect likeness to it. This will be readily seen:—

St. Matt. xxvii. 9, 10.

"Then was fulfilled that which was spoken by Jeremiah the prophet, saying," (And they took the thirty pieces of silver, the price of him that was valued, whom they of the children of Israel did value, and gave them for the potter's field, as the Lord appointed me.)

And even this is doubtful; for the word above translated "potter" is in the LXX. rendered "furnace," and by modern scholars (Gesenius, Fürst, Ewald, De Wette, Herzsheimer—following the Tar- gum, Peshito-Syriac, and Kimchi) "treasury" or "treasurer." Supposing, however, this passage to be that which St. Matthew refers to, three explanations suggest themselves:—

1. That the Evangelist unintentionally substituted the name of Jeremiah for that of Zechariah, at the same time altering the passage (usage to suit his immediate object, in the same way that St. Paul has done in Rom. x. 6-9 (compared with Deut. vii. 17, xxx. 11-14), 1 Cor. xv. 45 (comp. with Gen. ii. 7). See Jowett's St. Paul's Epistles (Essay on Quotations, etc.)

passage, instead of being in agreement, is directly at variance with the statement of Matt. xxxvii. 6, that the silver was not put into the treasury.

a * In Gen. xxix. 1 the A. V. has "captain of the guard." II.

b * * * I. If this be the right translation, the
2. That this portion of the Book of Zechariah—a book the different portions of which there is reason to believe are in different styles and by different authors—was in the time of St. Matthew attributed to Jeremiah.

3. That the reference is to some passage of Jeremiah which has been lost from its place in his book, and exists only in the Evangelist. Some slight support is afforded to this view by the fact that potters and the localities occupied by them are twice alluded to by Jeremiah. Its partial correspondence with Zech. xi. 12, 13, is no argument against its having at one time formed a part of the prophecy of Jeremiah: for it is well known to every student of the Bible that similar correspondences are continually found in the prophets. See, for instance, Jer. xlvi. 43, comp. with Num. xxi. 27, 28, xxiv. 17; Jer. xlvii. 27, comp. with Am. i.

POTTERY.

Egyptian Pottery. (Wilkinson.)

been concerned in the potters' trade in Egypt (Ps. lxxxvi. 6), and the wall-paintings minutely illustrate the Egyptian process, which agrees with such notices of the Jewish practice as are found in the Prophets, and also in many respects with the process as pursued in the present day. The clay, when dug, was trodden by men's feet so as to form a paste (Is. xlii. 25, Wisd. xvi. 7) [Birks]; then placed by the potter on the wheel beside which he sat, and shaped by him with his hands. How early the wheel came into use in Palestine we know not, but it seems likely that it was adopted from Egypt. It consisted of a wooden disk placed on another larger one, and turned by the hand by an attendant, or worked by a treble (Is. xlv. 9; Jer. xviii. 3); Eccles. xxxviii. 29, 30; see Tenmunt Cylus, i. 452). The vessel was then smoothed and coated with a glaze, and finally burnt in a furnace (Wilkinson, Anc. Eg., ii. 108). We find allusions to the potsherds, i.e., broken pieces of vessels used as crucibles, or burnt by the furnace, and to the necessity of keeping the latter clean (Is. xxx. 14, xlv. 9; Job ii. 8; Ps. xxi. 15; Prov. xxvi. 24; Eccles. n. a.). Earthy vessels were used, both by Egyptians and Jews, for various purposes besides culinary.

Both of these writers speak of potters' clay as found near Jerusalem.

II.

a * The writer visited a pottery at Jerusalem, in company with Dr. Barclay, author of The City of the Great King. It was "in the name of the ruins of a church of the Crusaders, near St. Stephen's gate, on Betha" (MS notes, April 17, 1852). This pottery is also mentioned in the Ordinance Survey of Jerusalem, p. 59, where it is said that the clay used there is brought from Et-Jib, Gilwen. Dr. Tobler speaks of three potteries on Betha, and describes the process of making various kinds of earthenware (Hand-Mutter aus Jerusalem, p. 257). Mr. Williams mentions an illustration of Jer xviii. 1-10, which he saw in one of these potteries (Holy City, vol. i., Mem. p. 24).

b 1. τῆς γῆς, part. of τῶν ἔθνων "press:" κοπαίας ἱεραίων.

c 2. ἐπὶ τῆς ἱεραίας, lit. "two stones:" Αἰόλων: τρία (see Ges. p. 16).

d 3. Χειρισμός (Eccles. i. c.).

e 4. For other examples, see Dr. Pusey's Commentary on Amos and Micah. [On this question see vol. i. p. 20 a, and vol. ii. p. 1503 a, Amer. ed.]

The position of Aceldama has been treated of under that head. But there is not now any pottery in Jerusalem, nor within several miles of the city. a

* POTTERS VESSEL. (Pottery.)

POTTERY. The art of pottery is one of the most common and most ancient of all manufactures. The modern Arab culinary vessels are chiefly of wood or copper (Niebuhr, Voy. i. 188); but it is abundantly evident, both that the Hebrews used earthenware vessels in the wilderness, where there would be little facility for making them, and that the potters' trade was afterwards carried on in Palestine. They had themselves
Deeds were kept in them (Jer. xxxii. 14). Tiles with patterns and writing were common both in Egypt and Assyria, and were also in use in Palestine (Es. iv. 1). There was at Jerusalem a royal stables to be reckoned with (II Chron. 25); from animal employment, and from the fragments cast away in the process, the Potter's Field perhaps received its name (Is. xxx. 14). Whether the term "potter" (Zeck. xi. 13) is to be so interpreted may be doubted, as it may be taken for "artisan" in general, and also "treasurer," as if the coin mentioned were to be weighed, and perhaps melted down, to enable the robbers to make their escape without suspicion. The employment, and from the fragments cast away in the process, the Potter's Field perhaps received its name (Is. xxx. 14).

POUND. 1. A weight. See Weights and Measures.

2. (Mar.) A money of account, mentioned in the parable of the Ten Pounds (Luke xix. 12–27), as the talent is in the parable of the Talents (Matt. xxv. 14–30), the comparison of the sower to the sower to the seed sown among thorns (Matt. xiii. 18), and the parable of the good shepherd (John x. 11–18), to the master who intrusted money to his servants where-with to trade in his absence being probably a frequent lesson in our Lord's teaching (comp. Mark xii. 32–37). The reference appears to be to a Greek pound, a weight used as a money of account, of which sixty went to the talent, the weight depending upon the weight of the talent. At this time the Attic talent, reduced to the weight of the earlier Phoenician, which was the same as the Hebrew, prevailed in Palestine, though other systems must have been occasionally used. The Greek name doubtless came either from the Hebrew manacl or from a common origin; but it must be remembered that the Hebrew talent contained but fifty manehs, and that we have no authority for supposing that the maneh was called in Palestine by the Greek name, so that it is most reasonable to consider the Greek weight to be meant. [Talent: Weights and Measures.]

R. S. P.

* POWER is used in 2 Chr. xxiii. 9 (A. V.) to denote a military force, an army. The abstract is similarly used for the concrete in Eph. ii. 2, where "the prince of the power of the air" (ο περιφερειακος αρχων του θεου) denotes the ruler of the powers (evil spirits) that dwell in the air. [Ain. Amer. ed. : Principality, do.] A.

PRÆTORIUM (πρατηρίων). The headquarters of the Roman military governor, wherever he happened to be. In time of peace some one of the best buildings of the city which was the residence of the procurator or praetor was selected for this purpose. Thus Verres appropriated the palace of king Hiero at Syracuse; at Cessarea that of Herod the Great was occupied by Felix (Acts xxiii. 35); and at Jerusalem the new palace erected by the same prince was the residence of Pilate. This last was situated on the western, or more elevated hill of Jerusalem, and was connected with a system of fortifications, the aggregate of which constituted the παρεμβάλαξ, or fortified barrack. It was the dominant position on the western hill, and — at any rate on one side, probably the eastern — was mounted by a flight of steps (the same from which St. Paul made his speech in Hebrew to the angry crowd of Jews, Acts xxii. 1 ff.). From the level below the barrack, a terrace led eastward to a gate opening into the western side of the cloister surrounding the Temple, the road being carried across the Valley of Tyropoion (separating the Western from the Temple hill) on a causeway built up of enormous stone blocks. At the angle of the Temple cloister just above this entrance, i.e. the N. W. corner, [see Jerusalem, vol. ii. pp. 190, 1318] stood the old citadel (the Peisistratus Oasis, ραββί, or Egypt, which Here rebuilt and called by the name Antonia, after his friend and patron the triumvir. After the Roman power was established in Judea, a Roman guard was always maintained in the Antonia, the commander of which for the time being seems to be the official termed στρατηγός του ιερού in the Gospels and Acts. But the guard in the Antonia was probably posted regularly from the cohort quartered in the τροχυ-βάλαξ, and hence the plural form στρατηγοί is sometimes used, the officers, like the privates, being changed every watch; although it is very conceivable that a certain number of them should have been selected for the service from possessing a superior knowledge of the Jewish customs, or skill in the Hebrew language. Besides the cohort of regular legionaries there was probably an equal number of local troops, who when on service acted as the "support" (δεισολαβοι, covers of the right flank, Acts xxiii. 23) of the former, and there were also a few squadrons of cavalry; although it seems likely that both these and the local troops had separate barracks at Jerusalem, and that the παρεμβάλαξ, or praetorium camp, was appropriated to the Roman cohort. The ordinary police of the Temple and the city seems to have been in the hands of the Jewish officials, whose attendants (στρατηγοί) were provided with dirks and clubs, but without the regular armor and the discipline of the legionaries. When the latter were required to assist this gentilemerie, either from the apprehension of serious tumult, or because the service was one of great importance, the Jews would apply to the officer in command at the Antonia, who would act so far under their orders as the commander of a detachment in a manufacturing town does under the orders of the civil magistrate at the time of a riot (Acts iv. 1, v. 24). But the power of life and death, or of regular scourging, rested only with the praetor, or the person representing him and commissioned by him. This praetor power, that which would always go with it, the right to press whatever men or things were required by the public exigencies, — appears to be denoted by the term ἡξοιωσια, a term perhaps the translation of the Latin imperium, and certainly its equivalent. It was inherent in the praetor or his representatives — hence themselves popularly called ἡξοιωσια, or ἡξοιωσια ὀπτερεια (Rom. xii. 1, 8) — and would be communicated to all military officers in command of detached posts, such as the centurion at Capernaum, who describes himself as possessing summary powers of this kind because he was ὁ ἡξοιωσια, covered by the privilege of the imperium (Matt. viii. 9). The forced purveyances (Matt. v. 10), the requisitions for baggage animals (Matt. v. 11), the summary punishments following transgression of orders (Matt. v. 35) incident to a military occupation of the country, of course must have been a perpetual source of irritation to the peasantry along the lines of the military roads, even when the despotic authority of the Roman officers might be exercised with moderation. But such a state of things also afforded constant opportunities to an unprincipled soldier to extort money under the pretense of the necessity of various personal services which he was competent to insist
upon, or as a bribe to buy off the prosecution of some vexations charge before a military tribunal (Matt. v. 42; Luke iii. 14).

The relations of the military to the civil authorities in Jerusalem come once more clearly to view from the history of our Lord's crucifixion. While Judas first makes his proposition to betray Jesus to the chief priests, a conference is held between them and the στρατηγοὶ as to the mode of effecting the object (Luke xii. 4). The plan involved the assemblage of a large number of the Jews by night, and Roman jealousy forbade such a thing, except under the surveillance of a military officer. An arrangement was accordingly made for a military force, which would naturally be drawn from the Antonia. At the appointed hour Judas comes and takes with him "the troops," together with a number of police (στρατηγοὺς) under the orders of the high-priests, and Pharisaei (John xviii. 3). When the apprehension of Jesus takes place, however, there is scarcely any reference to the presence of the military. Matthew and Mark altogether ignore their taking any part in the proceeding. From St. Luke's account one is led to suppose that the military commander posted his men outside the garden, and entered himself with the Jewish authorities (xxii. 52). This is exactly what might be expected under the circumstances. It was the business of the Jewish authorities to apprehend a Jewish offender, and of the Roman officer to take care that the proceeding led to no breach of the public peace. But when apprehended, the Roman officer became responsible for the custody of the offender, and accordingly he would at once chain him by the wrists to two soldiers (Acts xxii. 33) and carry him off. Here St. John accordingly gives another glimpse of the presence of the military: "the στρατηγοὶ, and the centurion and the officers of the Jews apprehended Jesus, and put him in bonds and led him away, first of all to Anna's." (xviii. 12).

The insults which St. Luke mentions (xxii. 63), are apparently the barbarous sort of the ruffianly soldiers and police while waiting with their prisoner for the assembling of the Sanhedrim in the hall of Caiaphas; but the blows inflicted are these with the vine-stick, which the centurions carried, and with which they struck the soldiers on the head and face (Juv. Juvel. Sat. viii. 217), not a flagellation by the hands of the lictors.

When Jesus was condemned by the Sanhedrim and accordingly sent to Pilate, the Jewish officials certainly expected that no inquiry would be made into the merits of the case, but that Jesus would be simply received as a convict on the authority of his own countrymen's tribunal, thrown into a dungeon, and on the first convenient opportunity executed. They are obviously surprised at the question, "What accusation bring ye against this man?" and at the appearance of the governor himself outside the precinct of the praetorium. The cheapness in which he had held the life of the native population on a former occasion (Luke xii. 1), must have led them to expect a totally different course from him. His scrupulousness, most extraordinary in any Roman, stands in striking contrast with the recklessness of the commander who proceeded at once to put St. Paul to torture, simply to ascertain why it was that so violent an attack was made on him by the crowd (Acts xxii. 24)

Yet this latter is undoubtedly a typical specimen of the feeling which prevailed among the conquerors of Judea in reference to the conquered. The ordering the execution of a native criminal would, in ninety-nine instances out of a hundred, have been regarded by a Roman magistrate as a simply ministerial act, — one which indeed only he was competent to perform, but of which the performance was unworthy of a second thought. It is probable that the hesitation of Pilate was due rather to a superstitious fear of his wife's dream, than to a sense of justice or a feeling of humanity towards an individual of a despised race; at any rate such an explanation is more in accordance with what we know of the feeling prevalent among his class in that age.

When at last Pilate's effort to save Jesus was defeated by the determination of the Jews to claim Barabbas, and he had testified, by washing his hands in the presence of the people, that he did not consent to the judgment passed on the prisoner by the Sanhedrim, but must be regarded as performing a merely ministerial act, — he proceeded at once to the formal infliction of the appropriate penalty. His lictors take Jesus and inflict the punishment of scourging upon Him in the presence of all (Matt. xxvii. 26). This, in the Roman idea, was the necessary preliminary to capital punishment, and Jesus not being an alien, his back would have been struck off by the lictors immediately afterwards. But crucifixion being the customary punishment in that case, a different course becomes necessary. The execution must take place by the hands of the military, and Jesus is handed over from the lictors to these. They take Him into the praetorium, and must the whole cohort— not merely that portion which is on duty at the time (Matt. xxvii. 27; Mark xv. 16). While a centurion's guard is being told off for the purpose of executing Jesus and the two criminals, the rest of the soldiers divert themselves in mhecking the reputed King of the Jews (Matt. xxvii. 28—30; Mark xv. 17—19; John xiv. 2-3), Pilate, who in the mean time has gone in, being probably a witness of the pitiable spectacle, his wife's dream still haunts him, and although he has already delivered Jesus over to execution, and what is taking place is merely the ordinary course, b he comes out again to the people to protest that he is passive in the matter, and that they must take the prisoner, there before their eyes in the garb of mockery, and crucify Him (John xix. 4-5). On their reply that Jesus had asserted Himself to be the Son of God, Pilate's fears are still more aroused, and at last he is only induced to go on with the military execution, for which he is himself responsible, by the threat of a charge of treason against Caesar in the event of his not doing so (John xix. 7—11). Sitting then solemnly on the bema, and producing Jesus, who in the mean time has laid his own clothes put upon Him, he formally delivers Him up to be crucified in such a manner as to make it appear that he is acting solely in the discharge of his duty to the emperor (John xix. 13—16).

The centurion's guard now proceed with the prisoners to Golgotha. Jesus himself carrying the cross-piece of wood to which his hands were to be nailed.

a Called MELONIUS, although of course only a description from the cohort.

b Heby's guard had pursued precisely the same brutal conduct just before.
to the house of his freedman Phaon, which was situated between the two, heard the cheers of the soldiers within for Galra. In the time of Vespasian the houses seem to have extended so far as to reach it (Tacitus, Annal. iv. 2; Suetonius, Tib. 37, Naturalis Historiae 48; Plin. H. N. iii. 5). From the first buildings must have sprung up near it for settlers and others. St. Paul appears to have been permitted for the space of two years to lodge, so to speak, "within the walls" of the Praetorium (Acts xxviii. 30), although still under the custody of a soldier.

J. W. B.

PRAYER

The words generally used in the O. T. are יִשָּׁר יִשָּׁר (from root יִשָּׁר, "to incline," "to be gracious," whence in Hiph. "to entreat grace or mercy"); LXX. (generally), ἴσος ἔτοιμος: Vulg. deprecatio: and יִשָּׁר יִשָּׁר (from root יִשָּׁר, "to judge," whence in Hiph. "to seek judgment"). LXX. προσευχή: Vulg. oratio. The latter is used to express intercessory prayer. The two words point to the two chief objects sought in prayer, namely, the prevalence of right and truth, and the gift of mercy.

The object of this article will be to touch briefly on (1.) the doctrine of Scripture as to the nature and efficacy of prayer; (2.) its directions as to time, place, and manner of prayer; (3.) its types and examples of prayer.

(1.) Scripture does not give any theoretical explanation of the mystery which attaches to prayer. The difficulty of understanding its real efficacy arises chiefly from two sources: from the belief that man lives under general laws, which in all cases must be fulfilled unalterably; and the opposing belief that he is master of his own destiny, and need pray for no external blessing. The first difficulty is even increased when we substitute the belief in a personal God for the sense of an impersonal Destiny: since not only does the predestination of God seem to render prayer useless, but his wisdom and love, giving freely to man all that is good for him, appear to make it needless.

The difficulty is familiar to all philosophy, the former element being far the more important: the logical inference from it is the belief in the absolute uselessness of prayer. But the universal effort of prayer, being too strong for such reasoning, generally exacted as a compromise the use of prayer for good in the abstract (the "mens sana in corpore sano"); a compromise theoretically liable to the same difficulties, but wholesome in its practical effect. A far more dangerous compromise was that adopted by some philosophers, rather than by manlike at large, which separated internal spiritual growth from the external circumstances which give scope thereto, and claimed the former as belonging entirely to man, while allowing the latter to be gifts of the gods, and therefore to be fit objects of prayer.

Conveniant nobis, rebusque sit utile nostris.

Caritatis est illis humano quam situm."

Day Sat. x. 340-349.

And the older quotation, referred to by Plato (Me. ii. 154): —

Στὸ βασιλεῖα, τὰ μὲν εὐθαλή καὶ εὐγνώμονα καὶ ἀντίκειται

"At the seat of the king, the goods and the good;" in the language of the elder writers. But the very mention of the seat of the king, together with the statement that it is a seat, is one of the most important points in the doctrine of the person of Christ.

Conveniant nobis, rebusque sit utile nostris.

Caritatis est illis humano quam situm."

Day Sat. x. 340-349.

And the older quotation, referred to by Plato (Me. ii. 154): —

Στὸ βασιλεῖα, τὰ μὲν εὐθαλή καὶ εὐγνώμονα καὶ ἀντίκειται

"At the seat of the king, the goods and the good;" in the language of the elder writers. But the very mention of the seat of the king, together with the statement that it is a seat, is one of the most important points in the doctrine of the person of Christ.

Conveniant nobis, rebusque sit utile nostris.

Caritatis est illis humano quam situm."

Day Sat. x. 340-349.

And the older quotation, referred to by Plato (Me. ii. 154): —

Στὸ βασιλεῖα, τὰ μὲν εὐθαλή καὶ εὐγνώμονα καὶ ἀντίκειται

"At the seat of the king, the goods and the good;" in the language of the elder writers. But the very mention of the seat of the king, together with the statement that it is a seat, is one of the most important points in the doctrine of the person of Christ.

Conveniant nobis, rebusque sit utile nostris.

Caritatis est illis humano quam situm."

Day Sat. x. 340-349.

And the older quotation, referred to by Plato (Me. ii. 154): —

Στὸ βασιλεῖα, τὰ μὲν εὐθαλή καὶ εὐγνώμονα καὶ ἀντίκειται

"At the seat of the king, the goods and the good;" in the language of the elder writers. But the very mention of the seat of the king, together with the statement that it is a seat, is one of the most important points in the doctrine of the person of Christ.
PRAYER

The most obvious escape from these difficulties is to fall back on the mere subjective effect of prayer, and to suppose that its only object is to produce on the mind that consciousness of dependence which leads to faith, and that sense of God's protection and intercession which are, in the Sermon on the mount, the conditions of receiving, or at least of rightly entering into, God's blessings, it is thought that in its encouragement of them all the use and efficacy of prayer consist.

Now Scripture, while, by the doctrine of spiritual influence, it entirely disposes of the latter difficulty, does not so entirely solve that part of the mystery which is the object of our inquiry. It places it clearly before us, and emphasizes most strongly those doctrines on which the difficulty turns. The reference of all events and actions to the will or permission of God, and of all blessings to his grace, is indeed the leading idea of all its parts, historical, prophetic, and doctrinal; and this general idea is expressly dwelt upon in its application to the subject of prayer. The principle that "Heavenly Father knows what things we have need of before we ask Him," is not only announced in plain terms by our Lord, but is at all times implied in the very form and nature of all Scriptural prayers; and moreover, the ignorance of man, who "knows not what to pray for as he ought," and his consequent need of the Divine guidance in prayer, are dwelt upon with equal earnestness. Yet, while this is so, on the other hand the instinct of prayer is solemnly sanctioned and enforced in every page. Not only is its subjective effect asserted, but its real objective efficacy, as a means appointed by God for obtaining blessing, is both implied and expressed in the plainest terms. As we are hidden to pray for general spiritual blessings, in which instance it might seem as if prayer were simply a means of preparing the heart, and so making it capable of receiving them; so also are we encouraged to ask special blessings, both spiritual and temporal, in hope that thus (and thus only) we may obtain them, and to use intercession for others, equally special and confident, in trust that an effect, which in this case cannot possibly be subjective to ourselves, will be granted to our prayers. The command is enforced by direct promises, such as that in the Mount (Matt. vii. 7, 8), of the clearest and most comprehensive character; by the example of all saints and of our Lord Himself; and by historical records of such effect as granted to prayer again and again.

Thus, as much as in the case of such mysteries, the apparently opposite truths are emphasized, because they are not existing in man's conception of his relation to God; their reconciliation is not, perhaps cannot be, fully revealed. For, in fact, it is involved in that inscrutable mystery which attends on the conception of any free action of man as necessary for the working out of the general laws of God's unchangeable will.

At the same time it is clearly implied that such a case cannot exist, to man's conception, of the Supreme will of God, so as to form a part of his scheme of Providence. This follows from the condition, expressed or understood in every prayer, "Not my will, but Thine, be done." It is seen in the distinction between the granting of our petitions (which is not absolutely promised), and the certain answer of blessing to all faithful prayer; a distinction emphasized in the case of St. Paul's prayer against the "thorn in the flesh," and of our Lord's own agony in Gethsemane. It is distinctly enunci-ated by St. John (I John v. 14, 15): "If we ask anything according to his will, he heareth us: and if we know that He hear us, whatsoever we ask, we know that we have the petitions that we desired of Him."

It is also implied that the key to the mystery lies in the fact of man's spiritual unity with God in Christ, and of the consequent gift of the Holy Spirit. All true and prevailing prayer is to be offered in the name of Christ, which emphasizes the grace and the means of this new life (Rom. viii.), or the Giver of that life (I John iv. 12, 13, xv. 16, xvi. 23-27), that is, not only for the sake of his Atonement, but also in dependence on his intercession; which is therefore as a central influence, acting on all prayers offered, to throw off whatever in them is evil, and give efficacy to all that is in accordance with the Divine will. So also is it said of the spiritual influence of the Holy Ghost on each individual mind, that while we know not what to pray for, the result is "Spirit makes intercession for the saints, according to the will of God" (Rom. viii. 26, 27). Here, as probably in all other cases, the action of the Holy Spirit on the soul is to free agents, what the laws of nature are to things inanimate, and is the power which harmonizes free individual action with the universal will of God. The mystery of prayer, therefore, like all others, is seen to be resolved into that great central mystery of the Gospel, the communion of man with God in the Incarnation of Christ. Beyond this we cannot go.

(2.) There are no directions as to prayer given in the Mosaic Law: the duty is rather taken for granted, as an adjunct to sacrifice, than enforced or elaborated. The Temple is emphatically designated as "the House of Prayer" (Is. lvi. 7): it could not be otherwise, if "He who hears prayer" (Ps. lxxvi. 2) there manifested his special presence; and the prayer of Solomon offered at its consecration (1 K. viii. 30, 35, 38) implies that in it were offered, both the private prayers of each single man, and the public prayers of all Israel.

It is hardly conceivable that, even from the beginning, public prayer did not follow every public sacrifice. The place of the Mount, or the central mystery of the Temple, or the weekly offerings of the Lord was probably as the incense, which was the symbol of prayer (see Ps. cxii. 2; Rev. vii. 3, 4). Such a practice is allowed to be common, in Luke i. 10; and in one instance, at the offering of the first-fruits, it was ordained in a striking form (Deut. xxvi. 12-15). In later times it certainly grew into a regular service, both in the Temple and in the Synagogue.

But, besides this public prayer, it was the custom of all at Jerusalem to go up to the Temple, at regular hours if possible, for private prayer (see Luke xviii. 10: Acts iii. 1): and those who were absent were wont to "open their windows towards Jerusalem," and pray "towards the place of God's Presence" (1 K. xi. 41-45; 1 Chron. vi. 10; Ps. x. 7, xxvii. 2; xxxii. 2). The desire to do this was possibly one reason, independently of other and more obvious ones, why the House-top or the mountain-top were chosen places of private prayer.

The regular hours of prayer seem to have been three (see Ps. iv. 17; Dan. vi. 10), "the evening," that is, the ninth hour (Acts iii. 1, x. 3); the hour of the evening sacrifice (Dan. ix. 21); the "morning"
The posture of prayer among the Jews seems to have been most often standing (1 Sam. i. 26; Matt. vi. 5; Mark xi. 23; Luke xvii. 11); unless the prayer were offered with especial solemnity, and humiliation, which was naturally expressed by kneeling (1 K. viii. 54; comp. 2 Chr. vi. 13; Ezr. ix. 5; 1 K. xiv. 6; Dan. vi. 10); or prostration (Josh. vii. 6; 1 K. xvi. 42; Neh. viii. 6). The hands were "lifted up," or "spread out" before the Lord (1 S. xviii. 2, xxiv. 2; Ex. ix. 33, &c., &c.). In the Christian Church no posture is mentioned in the N. T. excepting that of kneeling; see Acts vii. 60 (St. Stephen); ix. 40 (St. Peter); xx. 36 (St. Paul); perhaps from imitation of the example of our Lord in Gethsemane (on which occasion alone his posture in prayer is recorded). In after-times, as is well known, this posture was varied by the custom of standing in prayer on the Lord's-day, and during the period from Easter to Whit-Sunday, in order to commemorate his resurrection, and our spiritual resurrection in Him.

(3.) The only form of prayer given for perpetual use in the O. T. is the one in Deut. xxvi. 5-15, connected with the offering of tithes and first-fruits, and containing in simple form the important elements of prayer, acknowledgment of God's mercy, self-dedication, and prayer for future blessing. To this may perhaps be added the threefold blessing of Num. vii. 24-26, couched as it was in a peculiar rite, and performed at the altar of Moses (Num. x. 35, 36) at the moving and resting of the cloud, the former of which was the germ of the 68th Psalm.

Indeed the forms are evidently, with a view to preservation and constant use, rather hymns or songs than prayers properly so called, although they often contain supplication. Scattered through the historical books, we have the Song of Moses, taught to the children of Israel (Deut. xxxii. 1-13); his less important songs after the passage of the Red Sea (Ex. xv. 1-19) and at the springing up of the water (Num. xxxi. 17, 18); the Song of Deborah and Barak (Judg. v.); the Song of Hannah in 1 Sam. i. 1-10 (the effect of which is seen by reference to the Magnificat); and the Song of David (Ps. xvii.) single out in 2 Sam. xxiii. But after David's time, the existence and use of the prayers, and the poetical form of the Prophetic books, and of the prayers which they contain, must have tended to fix this Psalms character on all Jewish prayer. The effect is seen plainly in the form of Hezekiah's prayers in 2 K. x. 15-19; 1 S. xxiv. 1-20.

But of the prayers recorded in the O. T., the two most remarkable are those of Solomon at the dedication of the Temple (1 K. viii. 23-53), and of Joshua the high-priest, and his colleagues, after the Captivity (Neh. ix. 5-38). The former is a prayer for God's presence with his people in time of national defeat (vv. 33-34), famine or pestilence (35-37), war (44, 45), and captivity (46-50), and with each individual Jew and stranger (41-43) who may worship in the Temple. The latter contains a recital of all God's blessings to the children of Israel from Abraham to the Captivity, a confession of their continual sins, and a fresh dedication of themselves to the Covenant. It is clear that both are likely to have exercised a strong liturgical influence, and accordingly we find that the public prayer in the Temple, already referred to, had in our Lord's time grown into a kind of liturgy. Before and during the sacrifice there was a prayer that God would put it into their hearts to love and fear Him; then a repeating of the Ten Commandments, and of the passages written on their phylacteries (Frontlets); next three or four prayers, and ascriptions of glory to God; and the blessing from Num. vi. 24-26, "The Lord bless thee," etc., closed this service. Afterwards, at the offering of the meat-offering, there followed the singing of psalms, regularly fixed for each day of the week, or specially appointed for the great festivals (see Bingham, b. xii. ch. v. sect. 4). A somewhat similar liturgy formed a regular part of the Synagogue worship, in which there was a regular minister, as the leader of prayer ("sponsa ecclesiae"); and public prayer, as well as private, was the special object of the Proseuche. It appears also, from the question of the disciples in Luke xi. 1, and from Jewish tradition, that the chief teachers of the day gave special forms of prayer to their disciples, as the badge of their discipleship and the best fruits of their learning.

All Christian prayer is, of course, based on the Lord's Prayer: but its spirit is also guided by that of his prayer in Gethsemane, and of the prayer recorded by St. John (ch. xvii.), the beginning of his great work of intercession. The first is the comprehensive type of the simplest and most universal prayer; the second justifies prayer as the means of special blessings of this life, while it limits them by perfect resignation to God's will; the last, dwelling as it does on the knowledge and glorification of God, and the communion of man with Him, as the one object of prayer and life, is the type of the highest and most spiritual devotion. The Lord's Prayer has given the form and tone of all ordinary Christian prayer; it has fixed, as its leading principles, simplicity and confidence in Our Father, community of sympathy with all men, and practical reference to our own life; it has shown, as its true objects, first the glory of God, and next the needs of man. To the intercessory prayer, we may trace up its transcendental element, its desire of that communion through love with the nature of God, which is the secret of all individual holiness, and of all community with men.

The influence of these prayers is more distinctly traced in the prayers contained in the Epistles (see Eph. iii. 14-21; Rom. xvi. 25-27; Phil. i. 3-11; Col. i. 9-16; Heb. xiii. 20, 21; 1 Pet. v. 10, 11, &c.), than in those recorded in the Acts. The public prayer, which from the beginning became the principle of life and unity in the Church (see..."
PREACHING

Acts ii. 42; and comp. i. 24, 25, iv. 24–30, vi. 6, xii. 5, xiii. 2, 3, xvi. 25, xx. 36, xvi. 51, although doubtless always including the Lord's Prayer, probably in the first instance took much of its form and style from the prayers of the synagogues. The only form given (besides the very short one of Acts i. 21, 25), dwelling as it does (Acts iv. 24–30) on the Scriptures of the Old Testament, is the application to our Lord, seems to mark this connection. It was probably by degrees that they assumed the distinctly Christian character.

In the record of prayers accepted and granted by God, we observe, as always, a special adaptation to the period of his dispensation to which they belong. In the patriarchal period, they have the simple and childlike tone of domestic supplication for the simple and apparently trivial incidents of domestic life. Such are the prayers of Abraham for children (Gen. xv. 3); for Ishmael (xviii. 18); of Isaac for Rebekah (xxv. 21); of Abraham's servant in Mesopotamia (xiv. 12–14); although sometimes they take a wider range in intercession, as with Abraham for Sodom (Gen. xviii. 23–32), and for Abimelech (xx. 7, 17). In the Mosaic period they assume a more solemn tone and a tone of administrative intercession (I. Kings iv. 21), though of direct intercession for the chosen people; as by Moses (Num. xi. 2, xii. 13, xiii. 7); by Samuel (1 Sam. vii. 5, xix. 19, 23); by David (2 Sam. xiv. 17, 18); by Hezekiah (2 Kings xix. 13–19); by Isaiah (2 K. xiv. 4; 2 Chron. xxxii. 21); by Daniel (Dan. ix. 20, 21) for prayer for national victory, as by Asa (2 Chron. xii. 14); Jehoshaphat (2 Chron. xiv. 6–12). More rarely are they for individuals, as in the prayer of Hannah (1 Sam. i. 12, 22) in that of Hezekiah in his sickness (2 Kings xx. 2); the intercession of Samuel for Saul (1 Sam. xi. 14, 35), &c. A special class are those which precede and refer to the exercise of miraculous power, as by Moses (Ex. viii. 12, 39, xvi. 23); by Elijah at Zarephath (1 K. xxi. 20) and Cornel (1 K. xvii. 36, 37); by Elisha at Shunem (2 K. iv. 35) and Raphan (vi. 17, 18); by Isaiah (2 K. xx. 11); by St. Peter for Tabitha (Acts ix. 40); by the elders of the Church (James v. 14, 15, 16). In the New Testament they have a more directly spiritual bearing; as the prayer of the Church for protection and grace (Acts iv. 24–30); of the Apostles for their Samaritan converts (viii. 15); of Cornelius for guidance and protection (xii. 5); of St. Paul at Philippi (xxvi. 25); of St. Paul against the throne in the flesh, answered, although not granted (2 Cor. xii. 7–9), &c. It would seem the intention of Holy Scripture to encourage all prayer, more especially intercession, in all relations, and for all righteous objects. A. B.

*PREACHING.* The word "preach" is derived from the French précher from the Latin praedicare. As such it means primarily to publ,ish or proclaim by public authority, as a herald or orator (præcens), and answers to the Greek κηρύσσει, properly, to proclaim as a herald (κῆρυς), and then in general simply to proclaim, publish, as one acting by authority. This latter, the common classical meaning of κηρύσσει, is its frequent meaning in the New Testament. In the Gospels it rarely, if at all, appears in any other than its simple classical signification, and such, therefore, in the Gospels at least, is the uniform meaning of its corresponding "preach." Thus (Matt. iii. 1), "John the Baptist, preaching," i.e. making proclamation, in the wilderness of Judaea (iv. 2); "preaching the Gospel," i.e. proclaiming the glad news of the kingdom (xv. 25) — that preach ye," i.e. proclaim, "on the house-tops." Gradually, however, the word κηρύσσει, from its special frequent use, came to take, like many other New Testament words (as εὐαγγελίζω, ἀπόστολος, ἐπίσκοπος, διδάσκων), a specific and half technical religious sense. Hence in the Epistles it appears partly in its proper sense, as (Rom. x. 14), "How shall they hear without one to make proclamation (τὸν κηρύσσοντα)"? and partly as a half technical term denotes the proclaiming of salvation without the added substantive. Thus the "foolishness of preaching" is the foolishness (in the judgment of human wisdom) of proclaiming salvation through the cross; and (1 Pet. iii. 19) the preaching to the spirits in prison, whatever the form and locality of the preaching, is undoubtedly the proclaiming of salvation and not of judgment. In this sense the word approximates in the New Testament to the idea of the English "preach," though it is by no means so strictly a religious word, and never perhaps carries with it the idea of a set formal discourse, which is so commonly implied in the English word. "Preach," however, is employed in the New Testament to translate other words besides κηρύσσει. It is sometimes used as a rendering of ἀνακηρύσσω, to speak; one of διαγείρασθαι, to announce before, to special news (Luke iv. 60); of διακηρύσσω, to discourse (Acts xx. 7, 9); three or four times of κηρύσσει, to announce thoroughly (as Acts iv. 2); and frequently of εὐαγγελίζων, to bring good news, or glad tidings, but translated, in this case, to preach the Gospel. Of this word, "preach the Gospel" is often a sufficiently accurate translation, though in many cases it is not. Thus (Matt. x. 5), "the poor have the Gospel preached to them," would be more properly rendered, "the poor have glad tidings brought to them." Still more unfortunate is the rendering "preach the Gospel" in the following passages: Rom. x. 15, "How beautiful are the feet of them that preach the Gospel of peace," where all the force of the imagery is lost (the feet of them that bring us as from afar the glad tidings of peace): Gal. iii. 8, "The Scripture ... preached before the Gospel unto Abraham," i.e. brought before, or formed part of the Gospel message to Abraham: Heb. iv. 2, "For unto us was the Gospel preached as well as unto them," i.e. for we have had the glad an announcement (of a rest) just as did they.

As a rendering of εὐαγγελίζων, "preach the Gospel" refers simply to the announcement of the Gospel under the character of glad tidings; as a rendering of κηρύσσει, it refers to it simply as a public authorized public proclamation; as a rendering of κηρύσσει, it refers rather to the first announcement of the Gospel to the ignorant and estranged, rather than to the instructions given to the historic body by pastors and teachers. These would naturally be designated by some other word. Of that extension of the word "preach," by which it comes to denote the ordinary religious discourses of a pastor to his people, the New Testament knows nothing; although this is undoubtedly a very natural extension of the term. The words originally employed to denote the announcement of the Gospel to the heathen, might very easily slide over into an application to all public and established utterances of religious truth.
It is obvious that the oral preaching of the Gospel is divinely enjoined in the New Testament, and is that which the departing Saviour instituted as the grand means of evangelizing the world. Something might, indeed, be due to the great imperfection that prevented the Independent on any other means of appropriating the Gospel, and the almost complete dependence of the mass of men upon oral communication, for instruction on any subject. Still the Saviour consulted not only the necessity of the times, but the constitution of human nature. Nothing reaches the human mind and heart so quickly as the fresh and living utterances from kindred hearts and lips, and we may well believe therefore, that the office of preaching and the divine credentials of the preacher have their source equally in the authority and the wisdom of God. "Preaching," the oral proclamation of the Gospel is divinely enjoined. The New Testament heralds of the cross do not make their proclamation except as they are sent forth (Rom. x. 15). The Christian preacher is to be the "legion of the saved," his credentials clear; and his function is to endure in undiminished sacredness and importance, until the Gospel has achieved its last triumph, and the Church is ready for the coming of her Lord.

A. C. K.

* PREDICATION. [Punishments, (5.)]

* PRESENTLY = immediately (1 Sam. ii. 16; Matt. xxi. 53). The difference between "now" and "soon" is important to the sense in these passages.

H.

PRESENTS. [Gifts.]

PRESIDENT. Sūrač, or Sūrēč, only used Dan. vi., the Chaldean equivalent for Hebrew Shōlēr, probably from Šūra, Zend, a "host" (see Strabo, vi. 331.). Σαραχάς = καταλαμβάνω is connected with the Sanskrit śrava or ṣrīva, and is traced in Syrōn and other words (Eichhoff, Vergl. Spr. pp. 125), 115; see Her. iii. 81, where it calls Sūtrop a Persian word.

H. W. P.

* PREVENT (from preveniō, "to come before," is never used in the A. V., in its present sense of to "hinder," but occurs in other senses, now obsolete, which are likely to perplex the common reader. In the O. T. it is the rendering of the Fiel and Hiphil forms of the Heb. בֹּדֵד bōdeḏ, signifying, primarily, "to go or come before;" in the Apocrypha and the N. T. of φέρω, and once, προφέρω, "to anticipate." It is used, accordingly, (1) in the literal sense of "to come before," e. g. Ps. lxxviii. 13, "in the morning shall my prayer prevent thee;" so Ps. xcv. 2, marg.; (2) "to anticipate," Ps. cxxiv. 147, "I prevented the dawning of the morning" (more strictly, "I rose early in the dawn"); so ver. 148; Wisd. vi. 13; xvii. 28; Matt. xviii. 20; 1 Thess. iv. 15, "shall not prevent them which are asleep;" (3) "to meet," as a friend, Ps. xxx. 3, "Thou preventest him with the blessings of goodness;" so Ps. lix. 10, lxix. 8; Is. xxi. 14; Job iii. 12 (receive); (4) "to meet as an enemy," "come upon," "fall upon," e. g. Job xxx. 27, "the days of affliction prevented me;" similarly 2 Sam. xxii. 6 (seized upon), 19; Ps.

 PRIEST

2575

PRIEST (πρεσβύτηρ, πρεσβύτερος; princeps, princeps)

Name. — It is unfortunate that there is nothing like a consensus of interpreters as to the etymology of this word. Its root-meaning, uncertain as far as Hebrew itself is concerned, is referred by Gesenius (Thesaurus, s. v.) to the idea of prophecy. The Κοθή delivers a divine message, stands as a mediator between God and man, represents each to the other. This meaning, however, belongs to the Arabic, not to the Hebrew form, and Ewald connects the latter with the verb אֶפְרָט (bēṣān, to arrest, put in order so in Is. ix. 10), seeing in it a preserved sense of the primary root, to arrange the sacrifice on the altar (Alcathian, p. 272). According to Saussure (Archäol. der Heb. c. 78), the primary meaning of the word is minister, and he thus accounts for the wider application of the name (infra). Bähr (Synonymik, i. 15) connects it with an Arabic root = שְׂט, to draw near. Of these etymologies, the last has the merit of answering most closely to the received usage of the word. In the precise terminology of the Law, it is used of one who may "draw near" to the Divine Presence (Ex. xix. 22, xxx. 2) while others remain afar off, and is applied accordingly, for the most part, to the sons of Aaron, as those who were alone authorized to offer sacrifices. In some remarkable passages it takes a wider range. It is applied to the priests of other nations or religious, to Melchizedek (Gen. xiv. 18), Potiphera (Gen. xii. 45), Jethro (Ex. ii. 16), to those who discharged priestly functions in Israel before the appointment of Aaron and his sons (Ex. xii. 22). A case of the wider application of the priests is given in 2 Sam. xviii. 18, where the sons of David are described as priests (Cohēmēn), and this immediately after the name had been applied in its usual sense to the sons of Aaron. The writer of 1 Chr. xviii. 17, as if reluctant to adopt this use of the title, or anxious to guard against mistake, gives a paraphrase, "the sons of David were first at the king's hand." (A. V., "chief of the king's order"). The l.x.x. and A. V. suppress the difficulty, by translating Cohēmēn into αὐτοφαίνων, and "chief officers." The Vulgate more honestly gives as sacerdotes. Luther and Coverdale follow the Hebrew strictly, and give "priests." The received explanation is, that the word is used here in what is assumed to be its earlier and wider meaning, as equivalent to rulers, or, giving it a more restricted sense, that the sons of David were the secretaries and functionaries described were Vētrō Diē (comp. Patrick, Michaeels, Rosenmüller, in loc., Keil on 1 Chr. xviii. 17). It can hardly be said, however, that this accounts satisfactorily for the use of the same title in two successive verses in two entirely different senses. Ewald accordingly (Alcathian, p. 270) sees in it an actual suspension of the usual law in favor of members of the royal house, and finds a parallel instance in the acts of David (2 Sam. vi. 14) and Solomon (1 K. iii. 15). De Wette and Gesenius,
PRIEST

Origin. — The idea of a priesthood connects itself, in all its forms, pure or corrupted, with the consciousness, more or less distinct, of sin. Men feel that they have broken a law. The power above them is holier than they are, and they dare like apotropaic. They crave for the intervention of some one of whom they can think as likely to be more acceptable than themselves. He must offer up their prayers, thanksgivings, sacrifices. He becomes their representative in things pertaining unto God." c He may become also (though this does not always follow) the representative of God to man. The functions of the priest and prophet may exist in the same person. The reverence which men pay to one who hears this consecrated character may lead them to acknowledge the priest as being also their king. The claim to fill the office may rest on characteristics belonging only to the individual man, or confined to a single family or tribe. The conditions of the priesthood, the office and influence of the priests, as they are among the most conspicuous facts of all religions of the ancient world, so do they occupy a like position in the history of the religion of Israel.

No trace of an hereditary or caste-priesthood meets us in the worship of the patriarchal age. Abraham, Isaac, and Jacob perform priestly acts, offer sacrifices, "draw near" to the Lord (Gen. xii. 8, xviii. 23, xxv. 25, xxvii. 20). To the eldest son, or to the favored son exalted to the place of the eldest, belongs the "goodly of the Lord" (Gen. xxvi. 15), the "cost of many colors" (Gen. xxxviii. 3), in which we find perhaps the earliest trace of a sacerdotal vestment d (comp. Blunt, Scriptural Coincid. i. 1; Ubelin, xiii. 138). Once, and once only does the word "Cohen" meet us as belonging to a ritual earlier than the time of Abraham. Melchizedek is "the priest of the most high God" (Gen. xiv. 18). The argument of the Epistle to the Hebrews has an historical formulation in the fact that there are no indications in the narrative of Gen. xiv. of any preceding or following him in that office. The special Divine names which are connected with him as the priest of "the most

Entiuschis (= Said Ibn Barbik), patriarch of Alexandria (Seldén, De Success. Pont. i. 13), that Arbotaebus was a priest of the house of David, suggests a like idea.

b Comp. the remarkable passage in Augustin., De dier. Quaest. ixi. : "A David enim in duis famulis, regiam et sacerdotalem, origo illae distributa est, qu arum durum familiarem, ubi dictum est, region descendens Mathuris, sacerdotalem abscondus Lunus, sacretus est, ut Dominus noster Jesus Christus, rex et sacerdos noster, et cognitionem duocert de stipite sacerdotali, et non esse tamen de tribus sacerdotalibus." The cognatio he supposed, to have been the marriage of some one of the daughters of Aaron.

c The true idea of the priesthood, as distinct from all other ministerial functions like those of the Levites, is nowhere given more distinctly than in Num. xvii. 5. The priest is often deholyed, is "in holy," "drawn near" to the Lord. In all these points he represents the ideal life of the people (Ex. xix. 3-4). His highest act, that which is exclusively sacerdotal (Num. xvi. 40; 2 Chr. xxvi. 18), is to offer the incense at the wanel of the prayers of the worshippers (Ps. xxii. 12; Rev. viii. 3).

d In this sacerdotal, dedicated character of Joseph's youth, we find the simplest explanation of the words which speak of him as "the separated one," "the Nazirite" (Nazerite), among his brethren (Gen. xlix. 20; Deut. xxxiii. 16).
high God, the possessor of heaven and earth," render it probable that he rose, in the strength of those great thoughts of God, above the level of the ordinary priest born of Cain, and were consecrated to him Abraham recognized a faith like his own, a life more entirely consecrated, the priestly character in its perfection [comp. Mclchizedek]. In the worship of the patriarchs themselves, the chief of the family, as such, acted as the priest. The office descended with the birthright, and might apparently be transferred with it. As the family expanded, the head of each section probably stood in the same relation to it. The thought of the special consecration of the first-born was recognized at the time of the Exodus (infern). A priesthood of a like kind continued to exist in other Semitic tribes. The Book of Job, whatever may be its date, ignores altogether the institutions of Israel, and represents the man of Hz as himself "sanctifying" his sons, and offering burnt-offerings (Job i. 5). jetuaro is a "priest of Midian" (Ex. ii. 16, iii. 1), Islaik himself offers a bullock and a ram upon the seven altars on Pisgah (Num. xxxii. 2, &c.).

In Egypt the Israelites came into contact with a priesthood of another kind, and that contact must have been for a time a very close one. The marriage of Joseph with the daughter of the priest of On (Ex. ii. 21), and the rivalry later from her name of the goddess Neith — (Gen. xlii. 45) [Assenath], the special favor which he showed to the priestly caste in the years of famine (Gen. xxvi. 28), the training of Moses in the palace of the Pharaohs, probably in the colleges and temples of the priests (Acts vii. 22), — all this must have impressed the constitution, the dress, the outward form of life upon the minds of the lawgiver and his contemporaries. Little as we know directly of the life of Egypt at this remote period, the stereotyped fixedness of the customs of that country warrants us in referring to a tolerably distant past the facts which belong historically to a later period, and in doing so, we find coincidences with the ritual of the Israelites too numerous to be looked on as accidental, or as the result of forces which were at work, independent of each other, but taking parallel directions. As circumcision was common to the two nations (Herod. ii. 37), so the shaving of the whole body (ibid.) was with both part of the symbolic purity of the priesthood, once for all with the Levites of Israel (Num. viii. 7), every third day with those of Egypt. Both are restricted to garments of linen (Herod. ii. 37, 81; Plutarch, De vict. c. 4; Juven. vi. 533; Ex. xxvii. 20; Ex. xliv. 18). The sandals of hyacinth worn by the Egyptian priests were but little removed from the bare feet with which the sons of Aaron went into the sanctuary (Herod. ii. 37). For both there were multiplied ablations. Both had a public maintenance assigned, and had besides a large share in the flesh of the victims offered (Herod. i. c.). Over both there was one high-priest. In both the law of succession was hereditary (ibid.; comp. also Spencer, De Leg. Hebr. c. iii. 1, 5, 11; Wilkinson, Ancient Egyptians, p. 116). Facts such as these leave scarcely any room for doubt that there was a connection of some kind between the Egyptian priesthood and that of Israel. The latter was not, indeed, an outgrowth of imitation of the former. The faith of Israel in Jehovah, the one Lord, the living God, of whom there was no form or similitude, presented the strongest possible contrast to the multitudinous idols of the polytheism of Egypt. The symbolism of the one was cosmic, "of the earth, earthy," that of the other, chiefly, if not altogether, ethico-spiritual. But looking, as we must, at the law and ritual of the Israelites as designed for the education of a people who were in danger of sinking into such a polytheism, we may readily admit that the education must have started from some point which the subjects of it had already reached, must have employed the language of symbolic acts and rites with which they were already familiar. The same alphabet had to be used, the same root-forms employed as the elements of speech, though the thoughts which they were to be the instruments of uttering were widely different. The details of the religion of Egypt might well be used to make the protest against the religion itself at once less startling and more attractive.

At the time of the Exodus there was as yet no priestly caste. The continuance of solemn sacrifices (Ex. iii. 1), implied, of course, the presence of priests of some kind, and priests appear as a recognized body before the promulgation of the Law on Sinai (Ex. xix. 22). It has been supposed that these were identical with the "young men of the children of Israel" who offered burnt-offerings and peace-offerings (Ex. xivv. 5) either as the first-born, or as representing in the freshness of their youth the purity of acceptable worship (comp. the analogous case of "the young man the Levite" in Judg. xvii. and Exod., Alterth. p. 273). On the principle, however, that difference of title implies in most cases difference of functions, it appears more probable that the "young men" were not those who had before performed priestly acts, but were chosen by the lawgiver to be his ministers in the solemn work of the covenant, representing in their youth, the stage in the nation's life on which the people were then entering (Kell, in loc.). There are signs that the priests of the older ritual were already dealt with as belonging to an obsolescent system. Though they were known as those that "come near" to the Lord (Ex. xix. 22); yet they are not permitted to approach the Divine Presence on Sinai. They cannot "sanctify" themselves enough to endure that trial. Aaron alone, the future high-priest, but as yet known as such, enters with Moses into the thick darkness. It is noticeable also that at this transition-stage, when the old order was passing away, and the new was not yet established, there is the proclamation of the truth, wider and higher than both, that the whole people was to be "a kingdom of priests" (Ex. xix. 6). The idea of the life of the nation now, that it was to be as a priest and a prophet to the rest of mankind. They were called to a universal priesthood (comp. Kell, in loc.). As a people, however,

---

**Priest**

---

**Priest**
they needed a long discipline before they could make the idea a reality. They drew back from their high vocation (Ex. xxviii. 18-21). As for other reasons so also for this, that the central truth required a rigid, unbending form for its outward expression, a distinctive priesthood was to be to the nation what the nation was to mankind. The position given to the ordinances of the priesthood indicated with sufficient clearness, that it was subordinate, not primary, a means and not an end. Not in the first proclamation of the great laws of duty in the Decalogue (Ex. xx. 1-17), nor in the applications of those laws to the chief contingencies of the people's life in the wilderness, does it find a place. It appears together with the Ark and the Tabernacle, as taking its position in the education by which the people were to be led toward the mark of their high calling. As such we have to consider it.

Consecration. — The functions of the High-priest, the position and history of the Levites as the consecrated tribe, have been discussed fully under those heads. It remains to notice the characteristic facts connected with the priests, the sons of Aaron, as standing between the two.

Sacrifices was the subsequent dedication of the Levites, that of the priests involved a yet higher consecration. A special word (מָצֵא, kibอดש) was appropriated to it. Their old garments were laid aside. Their bodies were washed with clean water (Ex. xxix. 4; Lev. vii. 6) and anointed with the perfumed oil, prepared after a prescribed formula, and to be used for no lower purpose.» (Ex. xxix. 7, xxx. 22-33). The new garments belonging to their office were then put on them (infra). The truth that those who intercede for others must themselves have been reconciled, was indicated by the sacrifice of a bullock as a sin-offering, on which they solemnly laid their hands, as transferring to it the guilt which had attached to them (Ex. xxix. 10; Lev. viii. 18). The total surrender of their lives was represented by the ram-slain as a burnt-offering, a „sweet savour” to Jehovah (Ex. xxix. 18; Lev. viii. 21). The blood of these two was sprinkled on the altar, offered to the Lord. The blood of a third victim, the ram of consecration, was used for another purpose. With it Moses sprinkled the right ear that was to be open to the Divine voice, the right hand and the right foot that were to be active in divine ministries (Ex. xxix. 20; Lev. viii. 25, 4). Lastly, as they were to be the exponents, not only of the nation's sense of guilt, but of its praise and thanksgiving, Moses was to „fill their hands” with cakes of unleavened bread and portions of the sacrifices, which they were to present before the Lord as a wave-offering. The whole of this mysterious ritual was to be repeated for seven days, during which they remained within the Tabernacle, separated from the people, and not till then was the consecration perfect (comp. on the meaning of all these acts Bähr, Symbolik, ii. c. v. § 2).

a The sons of Aaron, it may be noticed, were simply sprinkled with the previous oil (Lev. viii. 30). Over Aaron himself it was poured till it went down to the skirts of his clothing (Bach, loc. cit. 12; Ex. xxxixil. 2).
b This appears to have been regarded as the essential part of the consecration; and the Hebrew, „to fill the hands,” is accordingly used as a synonym for „to consecrate” (Ex. xxix. 9; 2 Chr. xii. 9).
c Ewald (Alterthum. p. 299-310) writes as if the ceremonies of consecration were repeated on the ad-

Moses himself, as the representative of the Unseen King, is the consecrator, the sacrificer throughout these ceremonies, as the channel through which the others receive their office, he has for the time a higher priesthood than that of Aaron (Selden, De Syedra, i. 16; Ugeloni, xii. 3). In accordance with the principle which runs through the history of Israel, he, the ruler, solemnly divests himself of the priestly office and transfers it to another. The fact that he had been a priest, was merged in his work as a lawyer. Only once in the language of a later period was the word Cohen applied to him (Ps. xex., 6).

The consecrated character thus imparted did not need renewing. It was a perpetual inheritance transmitted from father to son through all the centuries that followed. We do not read of its being renewed in the case of any individual priest of the sons of Aaron. Only when the line of succession was broken, and the impiety of Jeroboam intruded the lowest of the people into the sacred office, do we find the reapparance of a like form (2 Chr. xii. 9) of the same technical word. The previous history of Jeroboam and the character of the worship which he introduced make it probable that, in that case also, the ceremonial was, to some extent, Egyptian in its origin.
white, but with a diamond or chess-board pattern on it (Bähr, Synod. ii. e. iii. § 2). This came nearly to the feet (πολύφρος χιτών, Joseph. Ant. iii. 7, § 1), and was to be woven in its garment-shape (not cut out and then sewed together), like the χιτών ἐξ ἴματος of John xix. 23, in which some interpreters have even seen a token of the priesthood of him who wore it (Ewald, Gesch. v. 177; Ugolini, xii. p. 218).a The white cassock was gathered round the body with a girdle of needlework into which, as in the more gorgeous belt of the high-priest, blue, purple, and scarlet were intermingled with white, and worked in the form of flowers (Ex. xxviii. 30, 40, xxxix. 2: Ex. xlv. 17-19). Upon their heads they were to wear caps or bonnets (in the English of the A. V. the two words are synonymous) in the form of a cup-shaped flower, also of fine linen. These garments they might wear at any time in the Temple, whether on duty or not, but they were not to sleep in them (Joseph. B. J. v. 5, § 7). When they became soiled, they were not washed or used again, but torn up to make wicks for the lamps in the Tabernacle (Selden, De Synodr. xii. 11). They had besides them other "clothes of service," which were probably simpler, but are not described (Ex. xxxi. 10; Ex. xlii. 14). In all their acts of ministration they were to be barefooted.b Then, as now, this was the strongest recognition of the sanctity of a holy place which

a already mentioned. The Arab priests in the time of Mohammed wore linen only (Ewald, Alterth. p. 289).
b This is inferred (1) from the absence of any direction as to a covering for the feet; (2) from the later custom; (3) from the universal feeling of the East. Shoes were worn as a protection against defilement. In a sanctuary there was nothing that could defile.
c Bähr (Symbolik, ii. c. iii. § 1, 2) finds a mystic meaning in the number, material, color, shape, of the

seriously affected the health of the priests (Ugolini, viii. p. 976, xili. p. 405), it was scrupulously adhered to. In the earlier liturgical costume, the

the Oriental mind could think of (Ex. iii. 5; Josh. v. 15), and throughout the whole existence of the Temple service, even though it drew upon them the scorn of the heathen (Juven. Sat. vi. 159), and

Linen drawers ["breeches," A. V.] from the loins to the thighs were to "cover their nakedness." The vevcudn sia of the Hebrew ritual in this and in other places (Ex. xx. 26, xxviii. 42) was probably a protest against some of the fouler forms of nature-worship, as e. g. in the worship of Peor (Maimonides, More Nevoehim, iii. 45, in Ugolini, xii. p. 385), and possibly also, in some Egyptian rites (Herod. ii. 60). Over the drawers was worn the cetoeealth, or close-fitting cassock, also of fine linen

priesthood is mentioned as belonging to the high-priest only (Ex. xxviii. 6-12; xxxix. 2-5). At a later period, and was used especially by the priests (1 Sam. xxi. 18), and even by others, not of the tribe of Levi, engaged in religious ceremonial (2 Sam. vi. 14). [Epiph.]

Regulations. — The idea of a consecrated life, which was thus asserted at the outset, was carried through a multitude of details. Each probably had a symbolic meaning of its own. Collectively they formed an education by which the power or distinguishing between things holy and profane, between the clean and the unclean, and so ultimately between moral good and evil, was awakened and developed (Ex. xlv. 23). Before they entered the Tabernacle they were to wash their hands and feet (Ex. xxx. 17-21, xl. 30-32). During the time of their ministration they were to drink no wine or strong drink (Lev. x. 9; Ex. xlv. 21). Their function was to be more to them than the ties of friendship or of blood, and, except in the case of the nearest relationships (six degrees are specified, Lev. xxi. 1-5; Ex. xlv. 25), they were to make no mourning for the dead. The high-priest, as carrying the consecrated life to its highest point, was to be above the disturbing power of human sorrow even in these instances. Customs which were even common in other priest-

hoods (were probably for that reason) forbidden them. They were not to shave their heads. They were to go through their ministrations with the serenity of a reverential awe, not with the orgiastic wildness which led the priests of Baal in their despair to make cuttings in their flesh (Lev. xix. 28; 1 K. xviii. 28), and carried those of whom Azariah was a type to a more terrible mutilation (2 K. xxiii. 1). The same thought found expression in two other forms affecting the priests of Israel. The priest was to be one who, as the representative of other men, was to be physically as well as liturgically perfect. As the victim was to be without blemish so also was the sacrificer (comp. Bahr, Symbol. ii. e. ii. § 3). The law specified in broad outlines the excluding defects (Lev. xxi. 17-

41), and it was more as much as instinctively, or at least the dignity of the ministrant. The moral sanctity of the later rabbis drew up a list of not less than 142 faults or infirmities which involved permanent, of 22 which involved temporary deprivation from the priestly office (Carpzov. App. Crit. pp. 92, 93; U'golini, xii. 34, xiii. 3962); and the original symbolism of the principle (Philo, De Inc. and De Monarch. ii. 51) was lost in the process of-Christian Church has sometimes seemed to approximate, in the conditions it held down for the priestly character, to the rules of Judaism, it was yet careful to retain the Jewish principles, and to rest its regulations simply on the grounds of expediency (Carpzov. App. Crit. p. 77); the number of the sons of Aaron were, in like manner, fixed round with special rules. There is, indeed, no evidence for what has sometimes been asserted, that either the high-priest (Philo, De Monarch. ii. 11, ii. 229, ed. Mang.; Ewald, Afterle., p. 392) or the other sons of Aaron (U'golini, xii. 32

priestly vestments, discusses each point elaborately, and clearly. See § 3 on the distance between them and those of the Egyptian priesthood.

The idea of the perfect body, as symbolizing the holy soul, was, as might be expected, wide-spread among the religions of heathendom. "Sacred cor.

nunc integri corporis quasi nulli omitis res vitanda est" (Sneecra, Contrac. iv. 2).
Priest

Levites which would invalidate his priestly acts. If he was found free from all uncleanness, he was clad in the white linen tunic of the priests, and entered in his ministrations. If the result of the examination was not satisfactory, he was relegated to the half mechanical office of separating the sound wood for the altar from that which was decayed and worn-out, but was not deprived of the emoluments of his office (Lightfoot, Temple Service, c. 6).

Functions. — The work of the priesthood of Israel was, from its very nature, more stereotyped by the Mosaic institutions than any other element of the national life. The functions of the Levites — less defined, and therefore more capable of expansion — altered, as has been shown (Levites), from age to age; but those of the priests continued throughout substantially the same, whatever changes might be brought about in their social position and organization. The duties described in Exodus and Leviticus are the same as those recognized in the Books of Chronicles, as those which the prophet-priest Ezekiel sees in his vision of the Temple of the future. They, assisting the high-priest, were to watch over the fire on the altar of burnt-offerings and to keep it burning evermore both by day and night (Lev. vi. 12; 2 Chr. xiii. 11), to feed the golden lamp outside the veil with oil (Ex. xxvii. 20, 21; Lev. xxiv. 2), to offer the morning and evening sacrifices, each accompanied with a meat-offering and a drink-offering, at the door of the Tabernacle (Ex. xxix. 38—44). These were the fixed, invariable duties; but their chief function was that of being always at hand to do the priest's office for any guilty, or penitent, or rejoicing Israelite. The worshipper might come at any time. If he were rich and brought a lamb, it was the priest's duty to slay the victim, to place the wood upon the altar, to light the fire, to sprinkle the altar with the blood (Lev. i. 5). If he were poor and brought a pigeon, the priest was to wring its neck (Lev. i. 15). In either case he was to burn the meat-offering and the peace-offering which accompanied the sacrifice (Lev. ii. 2, 9, iii. 11). After the birth of every child, the mother was to come with her sacrifice of turtle-doves or pigeons (Lev. xi. 6: Luke ii. 22—24), and was thus to be purified from her uncleanness. A husband who suspected his wife of unfaithfulness might bring her to the priest, and have her locked in the water of jealousy as an ordeal, and to pronounce the formula of execration (Num. v. 11—21). Lepers were to come, day by day, to submit themselves to the priest's inspection, that he might judge whether they were clean or unclean, and when they were healed performed for them the ritual of purification (Lev. xiii., xiv., and comp. Mark i. 44). All the murrains, the plagues of Egypt, the favours or afflictions or sins of ignorance had to be expiated by a sacrifice, which the priest, of course, had to offer (Lev. xx. 1—33). As they thus acted as mediators for those who were laboring under the sense of guilt, so they were to help others who were striving to attain, if only for a season, the higher standard of a consecrated life. The Nazarite was to come to them with his sacrifice and his wave-offering (Num. vi. 1—21).

Other duties of a higher and more ethical character were hinted at, but were not, and probably could not be, the subject of a special regulation. They were to teach the children of Israel the statutes and the laws (Ex. xix. 1, Lev. x. 11; Dent. xxxii. 10; Ex. xxv. 1; Ezek. xlviii. 23, 24). The "priest's lips" (in the language of the last prophet looking back upon the ideal of the order) were to "keep knowledge" (Mal. ii. 7). Through the whole history, with the exception of the periods of national apostasy, these acts, and others like them, formed the daily life of the priests who were on duty. The three great festivals of the year were, however, their seasons of busiest employment. The pilgrims who came up by tens of thousands to keep the feast, came each with his sacrifices and oblations. The work at such times was, on some occasions at least, beyond the strength of the priests in attendance, and the Levites had to be called in to help them (2 Chr. xxix. 34, xxxv. 14). Other acts of the priests of Israel, significant as they were, were less distinctively sacrosanct. They were to bless the people at every solemn meeting; and that part of their office might never fall into disuse, a special formula of benediction was provided (Num. vi. 22—27). During the journeys in the wilderness it belonged to them to cover the ark and all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (Num. iv. 5—15). As the people started on each day's march they were to blow "an alarm" with long silver trumpets (Num. x. 1—8), — with two if the whole multitude were to be assembled, with one if there was to be a special council of the elders and princes of Israel. With the same instruments they were to proclaim the commencement of all the solemn days, and days of gladness (Num. x. 10); and throughout all the changes in the religious history of Israel this adhered to them as a characteristic mark. Other instruments of music might be used by the more highly trained Levites and the schools of the Prophets, but the trumpets belonged only to the priests. They blew them in the solemn march round Jericho (Josh. vi. 4), in the religious war which Judah waged against Jeroboam (2 Chr. xii. 12), when they summoned the people to solemn assembly and to the battle, and to the service of the second temple there were never to be less than 21 or more than 84 blowers of trumpets present in the Temple daily (Ugolini, xiii. 1011). The presence of the priests on the field of battle for this purpose, often in large numbers, armed for war, and sharing in the actual contest (1 Chr. xii. 23—27; 2 Chr. xx. 21, 22), led, in the later periods of Jewish history, to the special appointment at such times of a war-priest, deputed by the Sanhedrim to be the representative of the high-priest, and standing next but one to him in the order of precedence (comp. Ugolini, xiii. 1031, De Sacerdote Caesarei; and xiii. 871). Other functions were hinted at in Deuteronomy which might have given them greater influence as the educators and civilizers of the people. They however, supplies the germ out of which such an office might naturally grow. Judas Maccabaeus, in his wars, does what the war-priest was said to do (1 Mac. iii. 56).
were to act (whether individually or collectively does not distinctly appear) as a court of appeal in the more difficult controversies in criminal or civil cases (Deut. xvii. 8-13). A special reference was provided to be made to them in cases of undetermined murder, and they were thus to check the vindictive blood-feuds which it would otherwise have been likely to occasion (Deut. xxii. 5). It must remain doubtful, however, how far this order kept its ground during the storms and changes that followed. The judicial and the teaching functions of the priesthood remained probably for the most part in abeyance through the ignorance and vice of the priests. Zealous reformation kept this before them as an ideal (2 Chr. xxvii. 7-9, xix. 8-10; Ex. xiv. 24), but the special stress laid on the attempts to realize it shows that they were exceptional. Maledictions. — Functions such as these were clearly incompatible with the common activities of men. At first the small number of the priests had only the work almost unintermittent, and even when the system of rotation had been adopted, the periodical absence from home could not fail to be disturbing and injurious, had they been dependent on their own labors. The serenity of the family or foreign world would probably have had to look for support elsewhere. It may have been intended (supra) that their time, when not liturgically employed, should be given to the study of the Law, or to instructing others in it. On these grounds therefore a distinct provision was made for them. This consisted of (1) one tenth of the tithes which the people paid to the Levites, one per cent. on the whole produce of the country (Num. xviii. 26-28). (2) Of a special tithe every third year (Deut. xiv. 28, xxvi. 12). (3) Of the redemption-money, paid at the fixed rate of five shekels a head, for the first-born of man or beast (Num. xviii. 14-19). (4) Of the redemption-money paid in like manner for men or things specially dedicated to the Lord (Lev. xxvii.). (5) Of spoil, captives, cattle, and the like, taken in war (Num. xxxi. 25-47). (6) Of what may be described as the perquisites of their sacrificial functions, the sheb-hed, the flesh of the burnt offerings, peace offerings, trespass-offerings (Num. xviii. 8-11; Lev. vi. 26, 23, vii. 6-10), and, in particular, the heave-shovel and the wave breast (Lev. x. 12-15). (7) Of an undivided amount of the first-fruits of corn, wine, and oil (Ex. xxiii. 19; Lev. ii. 14; Deut. xxvi. 1-10). Of some of these, as the most holy, none but the priests were to partake (Lev. vi. 29). It was lawful for their sons and daughters (Lev. x. 14), and even in some cases for their one-born slaves, to eat of others (Lev. xxii. 11). The stranger and the hired servant were in all cases exculpated (Lev. xxiii. 10). (8) On their settlement in Canaan the priestly families had thirteen cities assigned to them, with their suburbs, of which some were pasture, and some were cities of refuge for their flocks (Josh. xiii. 13-19). While the Levites were scattered over all the conquered countries, the cities of the priests were within the tribes of Judah, Simeon, and Benjamin, and this concentration was not without its influence on their subsequent history. [Comp. Lev. xi.] These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of priest-priests, neatly and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. Even in the ideal state contemplated by the Book of Deuteronomy, the Levites (therefore probably used generically, so as to include the priests) is repeatedly marked out as an object of charity, along with the stranger and the widow (Deut. xii. 12, 19, xv. 27-29). During the long periods of national apostacy, tithes were probably paid with even less regularity than they were in the more orthodox period that followed the return from the Captivity (Neh. xiii. 10; Mal. iii. 8-10). The standard of a priest's income, even in the earliest days after the settlement in Canaan, was miserably low (Judg. xvii. 10). Large portions of the priesthood fell under the kingdom, into a state of object poverty (comp. 1 Sam. ii. 36). The clinging evil throughout their history was not that they were too powerful and rich, but that they sank into the state from which the Law intended to save them, and so came to "teach by hire" (Mic. iii. 11; comp. Saalschütz, *Archäologie der Hebreeer*, ii. 344-355). Classification and Statistics. — The earliest historical trace of any division of the priesthood, and corresponding cycle of services, belongs to the time of David. Jewish tradition indeed recognizes an earlier division, even during the life of Aaron, into eight classes (Gen. Héros, *Thuridile*, in Urgulli, xiii. 873), augmented during the period of the Shiloh-worship to sixteen, the two families of Eleazar and Ithamar standing in both cases on an equality. It is hardly conceivable, however, that there could have been any rotation of service while the number of priests was so small as it must have been during the thirty years of sojourn in the wilderness. If we believe Aaron and his lineal descendants to have been the only priests officiating. The difficulty of realizing in what way the single family of Aaron were able to sustain all the burden of the worship of the Tabernacle and the sacrifices of individual Israelites, may, it is true, suggest the thought that possibly in this, as in other instances, the Hebrew idea of sonship by adoption may have extended the title of the " Sons of Aaron" beyond the lineal descent. And, in this case, there may be some foundation for the Jewish tradition. Nowhere in the later history do we find any disproportion like that of three priests to 22,000 Levites. The office of supervision over those that "kept the charge of the sanctuary," entrusted to Eleazar (Num. iii. 92), implies that some others were subject to it besides Eleazar. Hierarchical distinctions inside these various classes of the sanctuary are identified in ver. 38 with the sons of Aaron who are encamped with Moses and Aaron on the east side of the Tabernacle. The allotment of not less than thirteen cities to those four sources of emolument. Of these the chief only are given here (Ugolini, xiii. 1221). It is worth noting that the Law, by recognizing the substitution of the Levites for the first-born, and ordering payment only for the smaller number of the latter in excess of the former, deprived Aaron and his sons of a large sum which would otherwise have been cruel to them (Num. xiv. 47-51).
PRIEST

who bore the name, within little more than forty years from the Exodus, tends to the same conclusion, and at any rate indicates that the priesthood were not intended to be always in attendance at the Tabernacle, but were to have homes of their own, and therefore, as a necessary consequence, fixed periods only of service. Some notion may be formed of the number on the accession of David from the facts (1) that not less than 75000 tendered their allegiance to him while he was as yet reigning at Hebron over Judah only (1 Chr. xii. 27), and (2) that one-twenty fourth part were sufficient for all the services of the sanctifier and more frequent worship which he established. To this reign belonged according the division of the priesthood into the four and twenty four courses or orders (1 Chr. xxiii. 1-19; 2 Chr. xxii. 8; Luke i. 5), each of which was to serve in rotation for one week, while the further assignment of special services during the week was determined by lot (Luke i. 9). Each course appears to have commenced its work on the Sabbath, and bearing out going pairs taking part in the sacrifice, and leaving that of the evening to their successors (2 Chr. xxiii. 8: Ugolini, xiii. 319). In this division, however, the two great priestly houses did not stand on an equality. The descendants of Eleazar were found to have fewer representatives than those of Eleazar, and sixteen courses accordingly were assigned to the latter, eight only to the former (1 Chr. xxiv. 4; comp. Carpzov, App. Crit. p. 98). The division thus instituted was confirmed by Solomon, and continued to be recognized as the typical number of the priesthood. It is to be noted, however, that this arrangement was to some extent elastic. Any priest might be present at any time, and even perform priestly acts, so long as he did not interfere with the functions of those who were officiating in their course (Ugolini, xiii. 881), and at the great solemnities of the year, as well as on special occasions like the opening of the Temple, they were present in great numbers. On the return from the Captivity there were found but four courses out of the twenty-four, each containing, in round numbers, about a thousand (Ezr. ii. 39-39). Out of these, however, to revive, at least, the idea of the old organization, the four and twenty-four courses were reconstituted, bearing the same names as before, and so continued till the destruction of Jerusalem. If we may accept the numbers given by Jewish writers as at all trustworthy, the proportion of the priesthood to the population of Palestine during the last century of their existence as an order must have been far greater than that of the clergy has ever been in any Christian nation. Over and above those that were scattered in the country and took their turn, there were not fewer than 24,000 stationed permanently at Jerusalem, and 12,000 at Jericho (Genar, Hieros. Tivmich, fol. 67, in Carpzov, App. Crit. p. 100). It was a Jewish tradition that it had never fallen to the lot of any priest to offer incense twice (Ugolini, xii. 18). Oriental statistics are, however, always open to some suspicion, those of the Talmud not least so; and there is, probably, more truth in the computation of Josephus, who estimates the total number of the four houses of the priesthood, referring apparently to Ezr. ii. 36, at about 20,000 (c. Apion. ii. 7). Another indication of number is found in the fact that a great multitude could attach themselves to the sect of the Nazarenes (Acts vii. 7), and so have cut themselves off, sooner or later, from the Temple and its services, without any perceptible effect upon its ritual. It was almost inevitable that the great mass of the order, under such circumstances, should sink in character and reputation. Poor and ignorant, despised and oppressed by the more powerful members of their own body, often robbed of their scanty maintenance by the rapacity of the high priests, they must have been to Palestine what the clergy of a later period have been to Southern Italy, a dead weight on its industry and strength, not compensating for their unproductive lives by any services rendered to the higher interests of the people. The Rabbinic classification of the priesthood, though belonging to a somewhat later date, reflects the contemplation into which the order had fallen. There were: (1) the heads of the twenty-four courses, known sometimes as ἀρχαῖοι ἱερεῖς; (2) the large number of reputable officiating but inferior priests; (3) the plebei, or (to use the extreme formula of Rabbinic scorn) the "priests of the people of the earth," ignorant and unlettered; (4) those that, through physical disqualifications or other causes, were non-essential members of the order, though entitled to receive their tithes (Ugolini, xii. 18; Jost, Judenthun, i. 156).

History. — The new priesthood did not establish itself without a struggle. The rebellion of Korah, at the head of a portion of the Levites as representatives of the first-born, with Dathan and Abiram as leaders of the tribe of the first-born son of Jacob (Num. xvi. 1), showed that some looked back to the old patriarchal order rather than forward to the new, and it needed the witness of Aaron's rod that budded to teach the people that the latter had in it a vitality and strength which had departed from the former. It may be that the exclusion of all but the sons of Aaron from the service of the Tabernacle drove those who would not resign their claim to priestly functions of some kind to the worship (possibly with a rival tabernacle) of Molech and Chinn (Am. v. 25, 29; Ez. xx. 19). Prominent as was the part taken by the priests in the daily march of the host of Israel (Num. x. 8), in the passage of the Jordan (Josh. iii. 14, 15), in the destruction of Jericho (Josh. vi. 12-16), the history of Micah shows that within that century there was a strong tendency to relapse into the system of a household instead of a hereditary priesthood (Judg. xvii.). The frequent invasions and troubles during the period of the Judges must have interfered (as stated above) with the payment of tithes, with the maintenance of worship, with the observance of all festivals, and with this the influence of the priesthood must have been kept in the background. If the descendants of Aaron, at some unrecorded crisis in the history of Israel, rose, under Eli, into the position of national defenders, it was only to sink in its

---

*a This diminution may have been caused partly by the slaughter of the priests who accompanied Hophni and Phineas (Ps. lxxxviii. 34), partly by the massacre at Nob.

*b The causes of this great reduction are not stated, but large numbers must have perished in the siege and storm of Jerusalem (Lam. iv. 16), and many may have preferred remaining in Babylon.
of the strange confusion into which the religious life of the people had fallen), the Ark was not the chief centre of worship; and while the newer ritual of psalms and ministrably gathered round it under the ministration of the Levites, headed by Benaiah and Jahaziel as priests (1 Chr. xvi. 5, 6), the older order of sacrifices was carried on by the priests in the Tabernacle on the high place at Gibon (1 Chr. xvii. 35–39, xxi. 29; 2 Chr. i. 3). We cannot wonder that first David and then Solomon should have sought to guard against the evils incidental to this separation of the two orders, and to unite in one great Temple priests and Levites, the symbolic worship of sacrifice and the spiritual offering of praise.

The reigns of these two kings were naturally the culminating period of the glory of the Jewish priesthood. They had a king whose heart was with them, and who joined in their services dressed as they were (1 Chr. xxv. 27), while he yet scrupulously abstained from all interference with their functions. The name which they bore was accepted (whatever explanation may be given of the fact) as the highest title of honor that could be borne by the king's sons (2 Sam. viii. 18, supr.). They occupied high places in the king's council (2 K. iv. 4), and might even take their place, as in the case of Benaiah, at the head of his armies (1 Chr. xii. 37, xvii. 5). or be recognized, as Zabad the son of Nathan was, as "the king's friends," the keepers of the king's conscience (1 K. iv. 5; Ewald, Gesch. iii. 334).

The position of the priests under the monarchy of Judah deserves a closer examination than it has yet received. The system which has been described above gave them for every week of service in the Temple twenty-three weeks in which they had no appointed work. Was it intended that they should be idle during this period? Were they actually idle? They had no territorial possessions to cultivate. The cities assigned to them and to the Levites gave but scanty pasturage to their flocks. To what employment could they turn? (1.) The more devout and faithful sons of the Levite tribes were given over to the care of the prophets that which satisfied them. The history of the Jews presents numerous instances of the union of the two offices. [Comp. Levites.] They became teaching-priests (2 Chr. xv. 3), students, and interpreters of the Divine Law. From such as these, men might be chosen by the more zealous kings to instruct the people (2 Chr. xvii. 8), or to administer justice (2 Chr. xix. 8). (2.) Some, perhaps, as stated above, served in the king's army. We have no ground for transferring our modern conceptions of the peacefulness of the

a Another remarkable instance of the connection between the Nazarite vow, when extended over the whole life, and a liturgical, quasi-priestly character, is found in the history of the Rechabites. They, or others like them, are named by Amos vii. 16; Jer. iii. 15; Eze. xvi. 44; Am. ii. 11. and the Ark were brought up to the new capital of the kingdom (1 Chr. xiv. 4).

b It is to be noticed that while the Heb. text gives 83 as the number of priests slain, the LXX. increases it to 366, Josephus (Ant. vii. 12, 6) to 385.
priestly life to the remote past of the Jewish people. Priests, as we have seen, were with David at Hebron as men of war. They were the trumpeters of Abijah's army (2 Chr. xiii. 12). The Temple itself was a great armory (2 Chr. xxvii. 9). The heroic struggles of the Maccabees were sustained chiefly by their kindred of the same family (2 Macc. viii. 1). (3.) A few chosen ones might enter more deeply into the divine life, and so receive, like Zechariah, Jeremiah, Ezekiel, a special call to the office of a prophet. (4.) We can hardly escape the conclusion that many did their work in the Temple of Jehovah with a divided allegiance, and acted at other times as priests of the high-places (Ezwd, 2 Kings iii. 1744). Not only do we read of no protests against the sins of the idolatrous kings, except from prophets who stood forth, alone and unsupported, to bear their witness, but the priests themselves were sharers in the worship of Baal (Jer. ii. 8), of the sun and moon, and of the host of heaven (Jer. viii. 1, 2). In the very Temple itself they ministered before their idols (Ex. xli. 13), and allowed themselves to be crystallized in flesh, "to join them (Is. vii. 7). They ate of unclean things and polluted the Sabbath. There could be no other result of this departure from the true idea of the priesthood than a general degradation. Those who ceased to be true shepherds of the people found nothing in their ritual to sustain or elevate them. They became as sensual, covetous, tyrannical, as ever the clergy of the Christian Church became in its darkest periods; conspicuous as drunkards and adulterers (Is. xxviii. 7, 8, vi. 10-12). The prophetic order, instead of acting as a check, became sharers in their corruption (Jer. v. 31; Lam. iv. 13; Zeph. iii. 4). For the most part the few efforts after better things are not the result of a spontaneous reformation, but of conformity to the wishes of a reforming king. In the one instance in which they do act spontaneously— their resistance to the usurpation of the priest's functions by Uzziah—their protest, however right in itself, was yet only too compatible with a wrong use of the office which they claimed as belonging exclusively to themselves (2 Chr. xxvi. 17). The discipline of the Captivity, however, was not without its fruits. A large proportion of the priests had either perished or were content to remain in the land of their forefathers; others did return and were active in the work of restoration. Under Ezra they submitted to the stern duty of repudiating their heathen wives (Ez. x. 18, 19). They took part—though here the Levites were the more prominent—in the instruction of the people (Ex. iii. 2; Neh. viii. 9-13). The root-evils, however, soon reappeared. The work of the priesthood was made the instrument of covetousness. The priests of the time of Mahalalel required payment for every burnt offering and libation, and would not even "shut the doors" or "kindle fire" for nought. (Mal. i. 10). They "corrupted the covenant of Levi" (Mal. ii. 8). The idea of the priest as the angel, the messenger, of the Lord of Hosts, was forgotten (Mal. ii. 7; comp. Exod. v. 3). The inevitable result was that they again lost their influence. They became "base and contemptible before all the people" (Mal. ii. 9). The office of the scribe rose in repuice as that of the priest de-
cined (Jost, Judith. i. 37, 118). The sects that multiplied during the last three centuries of the national life of Judaism were proofs that the established order had failed to do its work in maintaining the religious life of the people. No great changes affected the outward position of the priests under the Persian government. When that monarchy fell before the power of Alexander, they were ready enough to transfer their allegiance. Both the Persian government and Alexander had, however, respected the religion of their subjects; and the former had conferred on the priests immunities from taxation (Ex. vi. 8, 9, vii. 24; Joseph. Ant. xi. 8). The degree to which this recognition was carried by the immediate successors of Alexander is shown by the work of restoration accomplished by Simon the son of Onias (Ezchos. i. 12-20); and the position which they thus occupied in the eyes of the people, not less than the devotion with which his zeal inspired them, prepared them doubtless for the great struggle which was coming, and in which, under the priestly Maccabees, they were the chief defenders of their country's freedom. Simultaneously, indeed, at that crisis, were found among the apostates. Under the guidance of Jason (the heathenized form of Joshua) they foster the customs of their fathers; and they who, as priests, were to be patterns of a self-respecting purity, left their work in the Temple to run naked in the circus which the Syrian king had opened in Jerusalem (2 Macc. iv. 13, 14). Some, at an earlier period, had joined the sacerdotal Onias in establishing a rival worship (Joseph. Ant. xii. 3, § 4). The majority, however, were true-hearted, and the Maccabean struggle which left the Temple of the country in the hands of their own order, and, until the Roman conquest, with a certain measure of independence, must have given to the higher members of the order a position of security and influence. The martyr-spirit showed itself again in the calamities with which they carried on the ministrations in the Temple, when Jerusalem was besieged by Pompey, till they were slain even in the act of sacrificing (Jos. Ant. xiv. 4, § 3; B. J. i. 7, § 5). The reign of Herod, on the other hand, in which the high-priesthood was kept in abeyance, or transferred from one to another at the will of one who was an alien by birth and half a heathen in character, must have tended to depress them.

It will be interesting to bring together the few facts that indicate their position in the N. T. period of their history. The division into four-and-twenty courses is still maintained (Luke i. 5; Joseph. i. 1), and the heads of these courses, together with those who have held the high-priesthood (the office no longer lasting for life), are "chief priests" (ἀρχιερεῖς) by courtesy (Cyprian, Adv. Cer. p. 160, and take their place in the Sanhedrin. The number scattered throughout Palestine was, as has been stated, very large. Of these the greater number were poor and ignorant, despised by the more powerful members of their own order, not gaining the respect or affection of the people. The picture of cowardly selfishness in the priest of the parable of Luke x. 31, can hardly be thought of as other than a representation of, not indicating the estimate commonly and truly formed

a A real submission is hardly concurred by the narrative of the Jewish historian. The account of the effect produced on the mind of the Macedonian king by the solemn procession of priests in their linen ephod (Joseph. Ant. xii. 8) stands probably on the same footing as Lily's account of the retreat of Persia from the walls of untooked Rome.
of the character of the class. The priestly order, like the nation, was divided between contending sects. The influence of Hyrcanus himself in the latter part of his life a Sadducee (Joseph. Ant. xiii. 10, § 6), had probably made the tenets of that party popular among the wealthier and more powerful members, and the chief priests of the Gospels and the Acts, the whole ἄρχοντες γέρων (Acts iv. 1, 6, v. 17), were apparently consistent Sadducees, sometimes combining with the Pharisees in their unbelieving, sometimes thwarting them, persecuting the followers of Jesus because they preached the resurrection of the dead. The great multitude (δύο λεοντες), on the other hand, who received that testimony (Acts vi. 7) must have been free from, or must have overcome Sadducean prejudices. It was not strange that those who did not welcome the truth which would have raised them to a higher life, should sink lower and lower into an ignorant and ferocious fanaticism. Few stranger contrasts meet us in the history of religion than that presented in the life of the priesthood in the last half-century of the Temple, now going through the solemn sacrificial rites, and joining in the noblest hymn, now raising a fierce chime at anything which seemed to them a profanation of the sanctuary, and running to dash out the brains of the holiest or most eccentric ascetics or of one of their own order who might enter while under some ceremonial defilement, or with a half-luminous cruelty setting fire to the clothes of the Levites who were found sleeping when they ought to have been watching at their posts (Lightfoot, Temple Service, c. 1). The rivalry which led the Levites to claim privileges which had hitherto belonged to the priests has been already noticed. (Lev. xi. 35). In the scenes of the last tragedy of Jewish history the order passes away, without honor, “dying as a fool dieth.” The high-priesthood is given to the least and vilest of the adherents of the frenzied Zealots (Joseph. B. J. iv. 3, § 6). Other priests appear as deserting to the enemy (Ibid. vi. 6, § 1). It is from a priest that Titus receives the lamps, and gowns, and costly raiment of the sanctuary (Ibid. xvii. 3, § 5). The Zealots repulse the assassins with the terrible utterance “Let us depart,” on the last Pentecost ever celebrated in the Temple (Ibid. vi. 5, § 3). It is a priest who fills up the degradation of his order by dwelling on the fall of his country with a cold-blooded satisfaction, and finding in Titus the inhumanity of the Messianic prophecies of the O. T. (Ibid. vi. 5, § 4). The destruction of Jerusalem deprived the order at once of all but an honorary distinction. Their occupation was gone. Many families must have altogether lost their genealogies. Those who still prided themselves on their descent, were no longer safe against the claims of pretenders. The jealously of the lettered class, which had been kept under some restraint as long as the Temple stood, now had full play, and the influence of the Rabbis increased with the fall of the priesthood. Their position in medi eval and modern Judaism has never risen above that of complimentary recognition. Those who claim to take their place among the sons of Aaron, are entitled to receive the redemption money of the first-born, to take the Law from its chest, to pronounce the benediction in the synagogues (Ugoluni, xii. 48).

The language of the N. T. writers in relation to the priestly state ought not to be passed over. They recognize in Christ, the first-born, the “first-mentioned, the Anointed, the representative of the true priestly priesthood after the order of Melchizedek (Heb. vii., viii.), from which that of Aaron, however necessary for the time, is now seen to have been a deflection. But there is no trace of an order in the new Christian society, bearing the name, and exercising functions like those of the priests of the older Covenant. The Synagogue and not the Temple furnishes the pattern for the organization of the Church. The idea which pervades the teaching of the Epistles is that of an universal priesthood. All true believers are made kings and priests (Rev. i. 6; I Pet. ii. 9), offer spiritual sacrifices (Rom. xii. 1), may draw near, may enter into the holiest (Heb. x. 19-22) as having received a true priestly consecration. They too have been washed and sprinkled as the sons of Aaron were (Heb. x. 22). It was the thought of a succeeding age that the old classification of the high-priest, priests, and Levites was reproduced in the bishops, priests, and deacons of the Christian Church. The idea which was thus expressed rested, it is true, on the broad analogy of a threefold gradation, and the terms, “priest,” “bishop,” “sacrifice,” might be used without involving more than a legitimate symbolism, but they brought with them the inevitable danger of reproducing and perpetuating in the history of the Christian Church many of the feelings which belonged to Judaism, and ought to have been left behind with it. If the evil has not proved so fatal to the life of Christendom as it might have done, it is because no bishop or pope, however much he might exaggerate the harmony of the two systems, has ever dreamt of making the Christian priesthood hereditary. We have perhaps reason to be thankful that two errors tend to neutralize each other, and that the age which witnessed the most extravagant saecularism was one in which the ephipahy of the clergy was first exalted, then urged, and at last enforced.

The account here given has been based on the belief that the books of the O. T. give a trustworthy account of the origin and history of the priesthood of Israel. Those who question their authority have done so, for the most part, on the strength of some preconceived theory. Such a hierarchy as the Pentateuch prescribes, is thought impossible in the earlier stages of national life, and therefore the reigns of David and Solomon are looked on, not as the restoration, but as the starting-point of the area of the precints of the Temple (Ugoluni, xii. 1972).

The history of language presents few stranger facts than those connected with these words. Priest, our only equivalent for ἱερες, comes to us from the word which was chosen because it excluded the idea of a secular character. Bishop has narrowly escaped a like perversion, occurring, as it does constantly in Wykhill’s version as the translation of ἄρχοντες (e. g. John xviii. 15, Heb. viii. 1).
PRINCE

Order (Von Bohlen, Die Geneis, Enul. § 16). It is alleged that there could have been no tribe like that of Levi, for the consecration of a whole tribe is without a parallel in history (Vatke, Bibl. Theol. i. p. 222). Deuteronomy, assumed for once to be older than the three books which precede it, represents the titles of the priest and Levite as standing on the same footing, and the distinction between them is therefore the work of a later period (George, Die alonem Jüd. Feste, pp. 45, 51; comp. Bähr, Symbolik, b. ii. c. i. § 1, whence these references are taken). It is hardly necessary here to do more than state these theories. E. H. P.

PRINCE.a PRINCIPALITY. The only special uses of the word “prince” are—1. “Princes of provinces” (I K. xx. 14), who were probably local governors or magistrates, who took refuge in Samaria during the invasion of Benhadad, and

their “young men” were their attendants, παιδία, pelissequi (Thenius, Ewald, Gesch. iii. 490). Josephus says, υπὸ τῶν ἡγεμόνων (Ant. xii. 14, § 2). The “princes” mentioned in Dan. vi. 1 (see Esth. i. 1) were the predecessors, either in fact or by application of the surnames of Darius Hystaspis (Her. iii. 89).

H. W. P.

* The “prince of Persia,” “prince of Grecia,” and “Michael your prince” (Dan. x. 13, 20, 21, xii. 1), are apparently the patron or guardian angels of the nations referred to. [AEGELS, vol. i. p. 97.] See Rosenm. and Hitzig on Dan. x. 13 the LXXX. Deut. xxiii 8: Eccles. xvii. 17; and Eissensmenger’s Entdecktes Judentum, i. 803 ff.

A.

* PRINCE OF THE POWER OF THE AIR, EPI. ii. 2. [Atn, Amer. ed.]

PRINCIPALITY. The word translated “principalities” in Jer. xiii. 18 (A. V.), — “For your principalities shall come down, even the crown of your glory,” — is understood by Gesenius, Ewald, Hitzig, De Wette, and others, to mean “heads,” and they render, “from your heads shall come down the crown of your glory.” Some, as Rosenmüller and Fürst, with the margin of the A. V. (“head tires”), take the word to denote an ornamental worn on the head = crown. In 2 Macc. iv. 27, “principality” is used in reference to the office of high-priest. In several passages of the N. T. the terms αρχάρα και σφαίρα, “principalities and powers,” appear to denote different orders of angels, good or bad. See Epp. vi. 12. “For we wrestle not against flesh and blood, but against principalities, against powers,” etc. (Comp. the art. Art. i. 57 a.) In Col. ii. 14, 15, God (not Christ, see ver. 13) is spoken of as “blowing out the handwriting in ordinances that was against us,” and taking it out of the way, “wailing it to the cross” (τῷ σταυρῷ, not his cross, A. V.); “and having despooled (or, perhaps, “having disgraced”) principalities and powers, he made a show of them openly, triumphing over them in it” (or perhaps, “in him”), i.e. Christ. Here, in boldly figurative language, the image being that of a conqueror leading in triumph his captives in war, is described the victory over the powers of evil won by the death and resurrection of Christ. Compare John xii. 21, 32; Heb. ii. 14, 15; 1 Cor. xv. 24-26. In other passages, as

1. and, only in a few places; commonly “priest.”
2. Δραχμας, ἐγγυσίσεως: duc: applied to Meleah (Dan. ix. 25).
5. ἡρας, verb. adj. from ἡρας, “raise,” ἡρασκω, ἠγομονω, ἡγασθη, Ψαλμος: princes, also in A. V. “raise” “chief,” “captain.” This word appears on the coins of Simon Macabaeus (Ges. 917).
6. ἡρας, ἡρας: Δραχμας, Δραχμας: also “captain,” and “ruler.”
7. ἡρας, an adj. “great,” also as a subst. “captain,” and used in composition, as ἡρας: ἡρας, ἡγασθη: optima.
8. ἡρας, part of ἡρας, “bear,” a poet. word: σκαραπάς, δοσσας: princes, leg. condition.
9. ἡρας, ἡρας: Δραχας: princes: also in A. V. “captain,” “ruler,” prefixed to words of office, as “chief-baker,” etc.
10. ἡρας, ἡρας: Δραχας: regina.
11. ἡρας, και ἡρας: “captain,” “Σαλβή,” “captain,” “chief.”

16. ἡρας, και ἡρας: also as a subst. “captain,” and used in composition, as ἡρας: ἡρας, ἡγασθη: optima.

17. ἡρας, a Persian word.
PRISON

Eph. iii. 10, Col. i. 16, the terms "principalties" and "powers" are applied to good angels, and so probably in Eph. i. 21, Col. ii. 10. At least inclusively, comp. I Pet. iii. 21. The reference in Rom. viii. 38 is more doubtful. That the terms ὑδράων, παραμύθητες, θράσοι, ἠγοιαί in Col. i. 16 (comp. Milton's "Thera, Dominations, Princedoms, Virtues, Powers") denote different orders of angels is probable, but there is little ground for speculation about their relative dignity. "Thrones" may naturally be taken as denoting the highest, and Prisca (cf. Rom. viii. 28) denotes that in the various enumerations "principalties" (ἡγοιαὶ) always precedes "powers" (ἠγοιαί), from which she infer the superior rank of the former. In the account of the seven heavens given in the Testa-
ment s of the Twelve Patriarchs, a work of the second century (Lerii, c. 3), the angels designated as δόξας τῶν παραμύθητων, literally "powers of the armies," are placed in the third heaven, and the ἠγοιαί καὶ ἠγοιαί, "thrones and authorities," in the fourth or fifth (not the seventh, as Meyer represents). In the Ascension of Isaiah (c. vii.), translated by Laurence from the Ethiopic (Oxon. 1819), an angel surpassing others in splendor is represented as enthroned in each of the first six heavens, and these angels are themselves called "thrones." This part of the work however only represents the attributes of some Gnostic Christian in the second half of the third century (Dillmann, in Herzog's Real-Encycl. xii. 313). The passages in respect to different orders of angels cited from the rabbinical writings by Bartocci (Hed. magna Robbin. i. 267 ff.), J. H. Maius (Sympos. Teol. Jud. p. 76 f.), Eisenmenger (Embattelte Juden und ihrer Verfolger, xxii. 374, and the Jer. vol. ii. B. H., p. 298, finds no light on the phraseology of Paul. The notions of the Christian Fathers on this subject are set forth with great fullness by Patavius, Theol. Dogm. vol. iii. p. 55 ff. (Antwerp edition, 1700).

* PRINTED. A. V. Job xix. 23, should be "inscribed" or "marked down" (Noyes). A.

PRISCA (Πρίσκα [ancient]: Prisca, 2 Tim. iv. 19. [PRISEA].

PRISCELA (Πρίσκελα [dimin. of Prisca]: Priscilla). To what has been said elsewhere under the head of Aquila the following may be added. The name is Prisca (Πρίσκα) in 2 Tim. iv. 19, and (according to the true reading) in Rom. xvi. 3, and also (according to some of the best MSS.) in 1 Cor. xvi. 19. Such variation in a Roman name is by no means unusual. We find that the name of the wife is placed before that of the husband in Rom. vii. 3; 2 Tim. iv. 19, and (according to some of the best MSS.) in Acts xviii. 20. It is only in Acts xviii. 2 and 1 Cor. xvi. 19 that Aquila has unequivocally the first place. Hence we should be disposed to conclude that Prisca was the more energetic character of the two: and it is particularly to be noticed that she took part, not only in her husband's exercise of hospitality, but likewise in the theological instruction of Apollos. Yet we observe that the husband and the wife are always mentioned together. It is true we may say that Prisca is the example of what the married woman may do, for the general service of the Church, in conjunction with her husband, as Phebe is the type of the unmarried servant of the Church, or deaconess. Such female ministration was of essential importance in the state of society in the midst of which the early Christian communities were formed. [DEACONESS. Anon. ed.] The remarks of Archbishop Evans on the position of Timothy at Ephesus are very just: "In his dealings with the female part of his flock, which, in that time and country, required peculiar delicacy and discretion, the counsel of the experienced Prisca would be invaluable. Where, for instance, could he obtain more prudent and faithful advice than hers, in the selection of widows to be placed upon the ecclesiastical list of the Church, and of deaconesses for the ministry?" (Script. Hist. ii. 288). It seems more to our purpose to lay stress on this than on the theological learning of Prisca. Yet Winer mentions a monograph de Priscilla, Aquila uxor, tamquam feminam e gente Judaica eruditurum specimine, by G. G. Zelter (Altorf, 1769). J. S. H.

PRISON. For imprisonment as a punishment, see P R I S E N C E S. The present article will only treat of prisons as places of confinement. In Egypt it is plain both that special places were used as prisons, and that they were under the custody of a military officer (Gen. xli. 3, xiii. 17).

During the wandering in the desert we read on two occasions of confinement "in ward" (Lev. xxiv. 12; Num. xv. 34); but as imprisonment was not directed by the law, so we hear of none till the time of the kings, when the prison appears as an appendage to the palace, or a special part of it (1 K. xxii. 27). Later still it is distinctly described as being in the king's house (Jer. xxxii. 2,.xxxvii. 21; Neh. iii. 25). This was the case also at Babylon (2 K. xxv. 27). But private

7. νυστέρα: augustus: captivus (Gen. 1009).
8. δινάρια (Is. xiv. 11) more properly written in one word: διναριας: sperito (Gen. 1121).
10. ορυστήριον: ορυστής: donum carceris: is also sometimes "prison" in A. V., as Gen. xxxix. 20.
11. κατασκόλα: κατασκόλατος: carcer; probably "the stocks" (as A. V.) or some such instrument of confinement; properly understood by LXX. as a sewer or underground passage.
houses were sometimes used as places of confinement (Jer. xxxvii. 15), probably much as Chardin describes Persian prisons in his day, namely, houses kept by private speculators for prisoners to be maintained there at their own cost (Vulg. vi. 100). The prisons other than these, that are mentioned by the Cannanitish nations (Judg. xvi. 21, 25), were unknown in Judaea previous to the Captivity. Under the Herods we hear again of royal prisons attached to the palace, or in royal fortresses (Luke iii. 20; Acts xii. 4, 10; Joseph. Ant. xvii. 5, § 2; Maimon.). By the Romans Antonia was used as a prison at the time of the revolt (July 8, 66), and at Caesarea the praetorium of Herod (ib. 25). The sacerdotal authorities also had a prison under the superintendency of special officers, διευθυναμένα (Acts v. 18–23, viii. 3, xxxvi. 10). The royal prisons in those days were doubtless managed after the Roman fashion, and chains, fetters, and stocks used as means of confinement (see Acts xvi. 24, and Job xiii. 27).

One of the readiest places for confinement was a dry or partially dry well or pit (see Gen. xxxvii. 19 and Jer. xxxvi. 6–11); but the usual place appears, in the time of Jeremiah, and in general, to have been accessible to visitors (Jer. xxxvii. 5; Matt. xii. 2, xxv. 39, 39; Acts xxiv. 23).

* PRISON-GATE. [Jerusalem, vol. ii. p. 1322.]

* PRISE. [Games; Price.]

PROCHORUS (Πρόχορος [leader of a dance or chorus: Prōchorus]). One of the seven deacons, being the third on the list, and named next after Stephen and Philip (Acts vi. 5). No further mention is made of him in the N. T. There is a tradition that he was consecrated by St. Peter bishop of Nicomedia (Baron. i. 292). In the *Morgana Bibliotheca Patrium*, Col. Agripp. 1618, i. 49–69, will be found a fabulous "Historia Prochori, Christi Discipuli, de vita B. Joanis apostoli." I. H.—S.

PROCONSUL. The Greek αὐτοκράτορ, for which this is the true equivalent, is rendered uniformly "deputy" in the A. V. of Acts xiii. 7, 8, 12, xix. 28, and the derived verb αὐτοκράτησα is in Acts xviii. 12, is translated "to be deputy." At the division of the Roman provinces by Augustus in the year 27 B.C., into Senatorial and Imperial, the emperor assigned to the senatorial portions of territory as were peaceable and could be held without force of arms (Suet. Oct. 47; Strabo, xvii. p. 840; Dio Cass. liii. 12), an arrangement which remained with frequent alterations till the 3d century. Over these senatorial provinces the senate appointed by lot yearly an officer, who was called "proconsul" (Dio Cass. liii. 13), who exercised purely civil functions, had no power over life and death, and was attended by one or more legates (Dio Cass. liii. 14). He was neither fight with the sword nor wore the military dress (Dio Cass. liii. 13). The provinces were in consequence called "proconsular." With the exception of the senatorial province of Asia, which were assigned to men who had passed the office of consul, the senatorial provinces were given to those who had been praetors, and were divided by lot each year among those who had held this office five years previously. Their term of office was one year.

Among the senatorial provinces in the first arrangement by Augustus, were Cyprus, Achaia, and Asia within the Helles and Taurus (Strabo, xvii. p. 840). The first and last of these are alluded to in Acts viii. 7, 8, 12, xix. 39, as under the "proconsuls" of the provinces. Achaia became an imperial province in the second year of Tiberius, A. D. 16, and was governed by a procurator (Tac. Ann. i. 76), but was restored to the senate by Claudius (Suet. Claud. 25), and therefore Gallio, before whom St. Paul was brought, is rightly termed "proconsul" in Acts xviii. 12. Cyprus also, after the battle of Actium, was divided into an imperial province (Dio Cass. liii. 12), but five years afterwards (uc. c. 22) it was given to the senate, and is reckoned by Strabo (xvii. p. 840) ninth among the provinces of the people governed by οὐρανοί, as Achaia is the seventh. These οὐρανοί, or procurators, had the title of proconsul. Cyprus and Narbonese Gaul were given to the senate in exchange for Dalmanutha, and thus, says Dio Cassius (liv. 4), procurators (ἀὐτοκράτορ) began to be sent to those nations. In Boeckh's *Corpus inscriptionum*, No. 2631, is the following relating to Cyprus: ἡ πόλις Κύπρου ἡ ἱερά καὶ ἱερατευματική τοῦ θεοῦ ἡ Σιθενία, a statue of the goddess was set up which was consecrated by the people, and it is dedicated to Apollo. The date of this 1st inscription is the 15th year of Claudius, A. D. 52. The name of another proconsul of Cyprus in the time of Claudius occurs on a copper coin, of which an engraving is given in vol. i. p. 524. A coin of Ephesus [see vol. l. p. 749] illustrates the usage of the word ἀυτοκράτορ in Acts xix. 35.

W. A. W.

PROCURATOR. The Greek ἰστιοφόρος rendered "governor" in the A. V., is applied in the N. T. to the officer who presided over the imperial province of Judea. It is used of Pontius Pilate (Matt. xxvii.), of Felix (Acts xxiii., xxiv.), and of Festus (Acts xxv. 30). In all these cases the Valguate equivalent is prexes. The office of procurator (ἰστιοφόρος) is mentioned in Luke iii. 1, and in this passage the rendering of the Valguate is more close (προνοετος). It is explained, under the head of PROCONSUL, that after the battle of Actium, b. c. 27, the provinces of the Roman empire were divided by Augustus into two portions, giving some to the senate, and reserving to himself the rest. The imperial provinces were administered by legates, called legati Augusti pro praetore, sometimes with the addition of consulares, or legati consulares, or legati or consulaires alone. They were selected from among men who had been consuls or praetors, and sometimes from the inferior senators (Dio Cass. liii. 13, 15). Their term of office was indefinite, and subject only to the will of the emperor (Dio Cass. liii. 13). These officers were also called praesidæ, a term which in later times was applied indiscriminately to the governors both of the senatorial and of the imperial provinces (Suet. Claud. 17). They were attended by six lictors, used the military dress, and wore the sword (Dio Cass. liii. 13). No questor came into the emperor's provinces, but the property and revenues of
the imperial treasury were administered by the Römische, Procuratores, and Archon of the emperor, who were chosen from among his freedmen, or from among the knights (The Hist. v. 9; Dio Cass. liii. 15). These procurators were sent both to the imperial and to the senatorial provinces (Dio Cass. liii. 15 a). Sometimes a province was governed by a procurator with the functions of a proconsul. This was especially the case with the smaller provinces and the outlying districts of a larger province; and such is the relation in which Judaea stood to Syria. After the deposition of Archelaus, Judaea was annexed to Syria, and the first procurator was Caiusius, who was sent out with Quirinius to take a census of the property of the Jews and to confiscate that of Archelaus (Jos. Ant. xviii. 1, § 1). His successor was Marcus Ambivius, then Annianus Rufus, in whose time the emperor Augustus died. Tibérius sent Valerius Gratus, who was procurator for eleven years, and was succeeded by Pontius Pilate (Jos. Ant. xviii. 2, § 2), who is called by Josephus (Jos. Ant. xviii. 3, § 1) Ἰγνώς, as he is in the N. T. He was sub-
ject to the governor (praeses) of Syria, for the council of the Samaritans denounced Pilate to Vitellius, who sent him to Rome and put one of his own friends, Marcellus, in his place (Jos. Ant.
xviii. 24 a). The head-quarters of the procurators were at Cesarea (Jos. B. J. ii. 6, § 2; Acts xvi.
ii.), where he had a judgment-seat (Acts xxv. 6) in the audience chamber (Acts xxv. 23 b), and was assisted by a council (Acts xxx. 12) whom he consulted in cases of difficulty, the ἄσσιστοι (Suet. Gorb. 14), or ἡγεμόνες, who are mentioned by Josephus (B. J. ii. 19, § 1) as having been con-
firmed by Cestius, the governor of Syria, when cer-
tain charges were made against Pilate, the procur-
ator of Judaea. More important cases were held before the emperor (Acts xxv. 12; comp. Jos. Ant.
xx. 6, § 2). The procurator, as the representative of the emperor, had the power of life and death over his subjects (Dio Cass. liii. 14; Matt. xxvi.
29), which was denied to the procurator. In the N. T. we see the procurator only in his judicial capacity. Thus Christ is brought before Pontius Pilate as a political offender (Matt. xxvii. 2, 11), and the accusation is heard by the procurator, who is seated on the judgment-seat (Matt. xxvii. 19). Felix heard St. Paul's accusation and defense from the judgment-seat at Cesarea (Acts xxiv.), which was in the open air in the great stadium (Jos. B. J.
i. 2, § 2), and St. Paul calls him "judge" (Acts
xxv. 10), as if this term described his chief func-
tions. The procurator (ἡγεμόνας) is again alluded to in his judicial capacity in 1 Pet. ii. 14. He was attended by a cohort as body-guard (Matt. xxvii.
27); and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod (Jos. B. J. ii. 11, § 3; Philo, De Leg. ad Cajum, § 37; ed Mang., in which was the praetorium, or "judgment-hall," as it is rendered in the A. V. (Matt. xxvii. 27; Mark xv.
16; comp. Acts xxii. 35). Sometimes it appears Jerusalem was made his winter quarters (Jos. Ant.
xviii. 3, § 1). The High-Priest was appointed and removed at the will of the procurator (Jos. Ant.
xviii. 2, § 2). Of the oppression and extortion, practiced by one of these officers, Gessius Florus, which resulted in open rebellion, we have an account in Josephus (Jos. Ant. xx. 11, § 14; B. J. ii. 14, § 2). The procurators were held at first by the governors of the imperial and senatorial provinces, that they could not raise a levy or exact more than an appointed sum of money from their subjects, and that when their successors came they were to return to Rome within three months (Dio Cass. liii. 15). For further information see Walter, Gesch. des Röm. Reiches, v. 2, 410. W. A.

* PROPER is used in the A. V. in Heb. xi.
23 (i.e. because they saw he was a proper child) in the sense of "handsome," "fair" (Gr. ἄστερον). So often in Shakespeare.

A.

PROPHET (προφήτης; prophetes). I. THE NAME. The ordinary Hebrew word for prophet is nabi (נביא), derived from the verb שבע, connected with ל ребенка, to "bub-
ble forth," like a fountain. If this etymology is correct, the substantive would signify either a per-
son who, as it were, involuntarily bursts forth with spiritual utterances under the divine influence (cf. Ps. xiv. 1, "My heart is bubbling up of a good matter"), or simply one who pours forth words.
The analogy of the word נביא (נביא), which has the force of "dropping" as honey, and is used by Micah (ix. 6, 11), Ezekiel (xxii. 2), and Amos (vi. 16), in the sense of prophesying, points to the last signification. The verb נביא is found only in the naphal and הבש, a peculiarity which it shares with many other words expressive of speech (cf. boq', fari, vociferari, concionari, φήγειν, as well as μαρτυρεῖν and vaticinari).

Hymen (Gött in d. Gesch., p. 114) and Davidson (Introd. Old Test. ii. 420) suppose nabi to signify the man to whom announcements are made by God, i.e. inspired. But it is more in accordance with the etymology and usage of the word to regard it as signifying (actively) one who announces or pours forth the declarations of God. The latter signifi-
cation is preferred by Ewald, Havernick, Oehler, Hengstenberg, Bleek, Lee, Pusey, M'Caul, and the generally accepted Biblical critics.

Two other Hebrew words are used to designate a prophet, נביא and נביא, and נביא, both signifying one who sees. They are rendered in the A. V. by "seer," in the LXX. usually by βηθ, sometimes by προφήτης (1 Chr. xxvi. 28; 2 Chr. vii. 10). The three words seem to be con-
trasted with each other in 1 Chr. xxvii. 29. "The acts of David the king, first and last, behold they are written in the book of Samuel the seer (רבע), and in the book of Nathan the prophet (נביא), and in the book of God the seer (כחות)." רבע is a title almost appropriated to Samuel. It is only used ten times, and both for the title as it is applied to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix.
22; xxvi. 28; xix. 29). On two other occasions it is applied to Hanani (2 Chr. xvi. 7, 10). Once it is used by Isaiah (Isa. xxx. 10) with no reference
care of the imperial revenues in Asia (vom imperialen Procurator in Asia). After his death, Celer, a Roman knight, and Helius, a freedman, who had the

a A curious illustration of this is given by Tacitus (Ann. xiii. 1), where he describes the poisoning of Drusus Niger, procurator of Asia, by Celer, a Roman knight, and Helius, a freedman, who had the

b Unless the ἀφελείας (A. V. "place of hearing") was the great stadium mentioned by Josephus (B. J. ii. 9, § 2).
PROPHET

2591

to any particular. It was superseded in general use by the word nabi, which Samuel (himself entitled nabi as well as roch, 1 Sam. iii. 20; 2 Chr. xxxvi. 18) appears to have revived after a period of desuetude (1 Sam. ix. 9), and to have applied to the prophets organized by him. The verb נב, from which it is derived, is the common prose word signifying "to see:" נב והנ - whence the substantive נב, chozeh, is derived - is more poetical. Chozeh is rarely found except in the books of the Chronicles, but נב is the word constantly used for the prophetic vision. It is found in the Pentateuch, in Samuel, in the Chronicles, in Job, and in most of the prophets.

Whether there is any difference in the usage of these three words, and, if any, what that difference is, has been much debated (see Witsius, Miscell. Sacra, i. 1, § 19; Carpzovius, Introvd. ad Libros Canom. V. T. iii. 1, § 2; Winer, Real-Worterbuch, art. "Propheten"). Hiervenick (Einführung, Th. i.; Aoth, v. s. 50) considers nabi to express the title of those who officially belonged to the prophetic order, while roch and chozeh denote those who received visions in the literal sense. Dr. G. B. Lees (in A photographic history of the Old Testament, p. 543), and with Hiervenick in his explanation of nabi, but he identifies roeh in meaning rather with nabi than with chozeh. He further throws out a suggestion that chozeh is the special designation of the prophet attached to the royal household. In 2 Sam. xxiv. 11, God is described as "the prophet (nabi) Gad, David's seer (chozeh)." The word elsewhere is called "David's seer (chozeh)" (1 Chr. xi. 9), "the king's seer (chozeh)" (2 Chr. xxv. 21). The case of Gad, Dr. Lees thinks, "affords the clue to the difficulty," as it clearly indicates that attached to the royal establishment there was usually an individual styled "the king's seer," who might at the same time be a nabi. The suggestion is ingenious (see, in addition to places quoted above, 1 Chr. xxv. 5, xxvii. 17; 2 Sam. xvi. 15; 2 Chr. xxiv. 10; xxviii. 3; xxix. 20), and it was only David (possibly also Manasseh, 2 Chr. xxxiii. 18) who, so far as we read, had this seer attached to his person; and in any case there is nothing in the word chozeh to denote the relation of the prophet to the king, but only in the connection in which it stands with the word king. On the whole it would seem that these persons are designated by the three words nabi, roeh, and chozeh; the last two titles being derived from the prophets' power of seeing the visions presented to them by

God, the first from their function of revealing and proclaiming God's truth to men. When Gregory Naz. (Or. 28) calls Ezekiel ὁ τῶν μεγαλῶν ἐπιστάτων καὶ ἐφηστής μουστηρίων, he gives a sufficiently exact translation of the two titles chozeh or roeh, and nabi.

The word Nabi is uniformly translated in the LXX. by προφητής, and in the A. V. by "prophet." In classical Greek προφητής signifies one who speaks for another, specially one who speaks for a god and so interprets his will to man (Liddell & Scott, s. v.). Hence its essential meaning is "an interpreter." Thus Apollo is a προφητής as being the interpreter of Zeus (Esch. Eum. 19). Poets are the Prophets of the Muses, as being their interpreters (Plut. Phileb. 262 D). The προφητής attached to heathen temples are so named from their interpreting the oracles delivered by the inspired and unconscious μυστήρες (Plut. Them. 72 B; Herod. vii. 111, note, ed. Bech). We have Plato's authority for deriving μυστήρες from μῦναμα (I. c.).

The use of the word προφητής in its modern sense is post-classical, and is derived from the LXX. From the mediaval use of the word προφητεία, prophecy passed into the English language in the sense of "prediction," and this sense it has retained as its popular meaning (see Richardson, s. v.). The larger sense of interpretation has not, however, been lost. Thus we find in Bacon, "An exercise commonly called prophecying, which was this: that the ministers within a precinct did meet upon a week day in some principal town, where there was some ancient grave minister that was president, and an auditory admitted of gentlemen or other persons of leisure. Then every minister successively, beginning with the youngest, did handle one and the same part of Scripture, spending severally some quarter of an hour or better, and in the whole some two hours. And so the exercise being begun and concluded with prayer, and the president giving a text for the next meeting, the assembly was dissolved" (Purification of the Church). This meaning of the word is made further familiar to us by the title of Jeremy Taylor's treatise "On Liberty of Prophecying." Nor was there any risk of the title of a book published in our own days, "On the Prophetical Office of the Church" (Oxf. 1838), being misunderstood. In fact the English word prophet, like the word inspiration, has always been used in a larger and in a closer sense. In the larger sense our Lord Jesus Christ is a "prophet," Moses is a "prophet," Mahomet is a "prophet." The expression means that they proclaimed and

\[a\] In 1 Sam. ix. 9 we read, "He that is now called a prophet (nabi) was beforetime called a seer (roeh);" from whence Dr. Stanley (Leit on Jewish Church) has concluded that roch was "the oldest designation of the prophetic office," "superseded by nabi shortly after Samuel's time, when nabi first came into use" (Leit. xviii. ix.). This seems opposed to the fact that nabi is the word commonly used in the Pentateuch, whereas roch does not appear until the days of Samuel. The passage in the book of Samuel is clearly a parenthetical insertion, perhaps made by the nabi Nathan (or whoever was the original author of the book), perhaps added at a later date, with the view of explaining how it was that Samuel bore the title of roch, instead of the now usual appellation of nabi. To the writer the days of Samuel were "beforetime," and he explains that in those ancient days, that is the days of Samuel, the word used for prophet was roch, not nabi. But that does not imply that roch was the primitive word, and that nabi first came into use subsequently to Samuel (see Hangestenberg, Beitrag zur Einleitung ins A. T. iii. 35). Dr. Stanley represents chozeh as "another antique title," but on no sufficient grounds. Chozeh is first found in 2 Sam. xxiv. 11; so that it does not seem to have come into use until roch had almost disappeared. It is also found in the books of Kings (2 K. xvii. 15) and Chronicles (frequently), in Amos (vii. 12), Josiah (xxix. 10), Micah (iii. 18), and the derivatives of the verb chozeh are used by the prophets to designate their visions down to the Captivity (cf Is. i. 1; Dan. viii. 1; Zech. xii. 4). The derivatives of roch are rarer, and, as being prose words, are chiefly used by Daniel (cf Es. i. 1; Dan. x. 7). On examination we find that nabi existed before and after and alongside of both roch and chozeh, but that chozeh was somewhat more modern than roch.
PROPHET

published a new religious dispensation. 1 A similar thought not identical sense, the Church is said to have "prophetic," i.e., an expository and interpretative office. But in its closer sense the word, according to usage though not according to etymology, involves the idea of foresight. And this is and always has been its more usual acceptation. 2 The different meanings, or shades of meaning, in which the abstract noun is employed in Scripture, and which are drawn out by the translators, are as follows: a Prophecy comprehends three things: prediction; singing by the dictate of the Spirit; and understanding and explaining the mysterious, hidden sense of Scripture, by an immediate illumination and motion of the Spirit (1 Cor. xii. note, p. 121, Lond. 1742). It is in virtue of this last signification of the word, that the prophets of the N. T. are so called (1 Cor. xi.): by virtue of the second, that the sons of Asaph, etc., are said to have "prophesied with a harp." (1 Chr. xxv. 3), and Miriam and Deborah are termed "prophetesses." That the idea of potential if not actual prediction enters into the conception expressed by the word prophecy, when that word is used to designate the function of the Hebrew prophets, seems to be proved by the following passages of Scripture, Deut. xviii. 22; Jer. xxvi. 9; Acts ii. 30, iii. 18, 21; 1 Pet. i. 10; 2 Pet. i. 19, 20, iii. 2. Etymologically, however, it is certain that neither presence nor prediction are implied by the term used in the Hebrew, Greek, or English language.

II. PROPHETICAL ORIGIN. — The sacrificial order was originally the instrument by which the members of the Jewish Theocracy were taught and governed in things spiritual. Feast and fast, sacrifice and offering, rite and ceremony, constituted a varied and ever-recurring system of training and teaching by type and symbol. To the priests, too, was intrusted the work of teaching the children of Israel all the statutes which the Lord hath spoken unto them by the hand of Moses (Lev. x. 11). Teaching by act and teaching by word were alike their task. This task they adequately fulfilled for some hundred or more years after the giving of the law at Mount Sinai. But during the time of the Judges, the priesthood sank into a state of degeneracy, and the people were no longer affected by the acted lessons of the ceremonial service. They required less of the warnings and revelations. Under these circumstances a new moral power was evoked — the Prophetic Order. Samuel, himself a Levite, of the family of Kohath (1 Chr. vi. 28), and almost certainly a priest, 3 was the instrument used at once for effecting a reform in the sacrificial order (1 Chr. ix. 22), and for giving to the prophets a position of importance which they had never before held. So important was the work wrought by him, that he is classed in Holy Scripture with Moses (Jer. xv. 1; Ps. xxix. 6; Acts iii. 24), Samuel being the great religious reformer and founder of the prophetic order, as Moses was the great legislator and founder of the priestly rule. Nevertheless, it is not to be supposed that Samuel created the prophetic order as a new thing before unknown. The gerns both of the prophetic and of the regal order are found in the law as given to the Israelites by Moses (Dent. xiii. 1, xviii. 20, xviii. 18), but they were not yet developed, because there was not yet the demand for them. Samuel, who evoked the one, himself saw the evolution of the other. The title of prophet is found before the legislation of Mount Sinai. When Abraham is called a prophet (Gen. xx. 7), it is probably in the sense of a friend of God, to whom He makes known His will: and in the same sense the name seems to be applied to the patriarchs in general (Ps. cv. 15). 4 Moreover, it is impossible to conceive of a prophet as a proclaimer of a new dispensation, a revelator of God's will, and in virtue of his divinely inspired songs (Ex. xv.: Deut. xxxii., xxxiii.; Ps. xc.), but his main work was not prophetic, and he is therefore formally distinguished from prophets (Num. xii. 6) as well as classed with them (Dent. xviii. 15, xxxiv. 10). Aaron is the prophet of Moses (Ex. vii. 1); Miriam (Ex. xv. 20) is a prophetess; and we find the prophetic gift in the elders who "prophesied" when "the Spirit of the Lord rested upon them," and in Eldad and Medad, who "prophesied in the camp" (Num. xi. 27). At the time of the sedition of Miriam, the possible existence of prophets is recognized (Num. xii. 6). In the days of the Judges we find that Deborah (Judg. iv. 4) is a prophetess; a prophet (Judg. vi. 8) rebukes and exHORTS the Israelites when oppressed by the Midianites; and, in Samuel's childhood, "a man of God" predicts to Elie the death of his two sons, and the curse that was to fall on his descendants (1 Sam. ii. 27).

Samuel took measures to make his work of restoration permanent as well as effective for the moment. For this purpose he instituted Companies, or Colleges of Prophets. One we find in his lifetime at Ramah (1 Sam. xix. 29); others afterwards at Bethel (2 K. ii. 3), Jericho (2 K. ii. 5), Gilgal (2 K. iv. 38), and elsewhere (2 K. vi. 1).

It seems to be incorrect to say that the English word was "originally" used in the wider sense of "preaching," and that it became "limited" to the meaning of "predicting," in the seventeenth century, in consequence of "an etymological mistake" (Stanley, Lect. xix., xx.). The word enters into the English language in its sense of predicting. It could not have been otherwise, for at the time of the formation of the English language, the word propitrious had, by usage, assumed popularly the meaning of pawling, and we find it or linearly employed, early as well as by later writers, in this sense (see Polydore Virgil, History of England, iv. 161, Camden ed. 1586; Coventry Mysteris, p. 63, Shakespeare Soc. ed. 1841, and Pickering, seems to be proved by the following paragraphs. The word was "limited" to "prediction" as much and as little before the seventeenth century as it has been since.

"Dr. Stanley (Lect. xviii.) declares it to be "doubtful if he was of Levitical descent, and certain that he was not a priest." If the record of 1 Chr. vi. 28 is correct, it is certain that he was a Levite by descent though an Ephrathite by habitation (1 Sam. i. 1). There is every probability that he was a priest (cf. 1 Sam. i. 22; ii. 11. 18. vii. 5. 17. x. 1. xii. 11) and no presumption to the contrary. The fact on which Dr. Stanley relies, that Samuel lived "not at Gibeon or at Nob but at Ramah," and that "the prophetic school was at Ramah, and at Bethel, and at Gilgal, not at Hebron and Anathoth," does not suffice to raise a presumption. As judge, Samuel would have lived where it was most suitable for the judge to dwell. Of the three colleges, that at Ramah was alone founded by Samuel in person, and it is probable that he lived near Ramah where Ramah was we do not know: one of the latest hypotheses places it two miles from Hebron.

According to Hengstenberg's view of prophecy, Abraham was a prophet because he received revelations by the means of dream and vision (Gen. xv. 12).
Their constitution and object were similar to those of Theological Colleges. Into them were gathered promising students, and here they were trained for the office which they were afterwards destined to fulfill. So successful were these institutions, that from the third century to the end of the Canon, the Old Testament there seems never to have been wanting a due supply of men to keep up the line of official prophets. The apocryphal books of the Maccabees (1. iv. 46, ix. 27, xiv. 41) and of Ecclesiastes (xxxvi. 15) represent them as extinct. The colleges appear to have consisted of students differing in number. Sometimes they were large (1 Sam. xii. 3), and in Ps. Cxxiv. 6; 2 K. ii. 16), One, or a leading prophet, preceded over them (1 Sam. xix. 20), called their Father (1 Sam. x. 12), or Master (2 K. ii. 3), who was apparently admitted to his office by the ceremony of anointing (1 K. xix. 16; Is. lix. 1; Ps. cv. 15). They were called his sons. Their chief subject of study was, no doubt, the Law and its interpretation. Vocal, as well as symbolic, teaching being henceforward tacitly transferred from the priestly to the prophetic order. Subsidiary subjects of instruction were music and sacred poetry, both of which had been connected with prophecy from the time of Moses (Ex. xx. 20) and the Judges (Judg. iv. 4, v. 1). The prophets that meet Saul came down from the high place with a psaltery and a tabret, and a pipe and a harp before them (1 Sam. x. 5). Eli's daughter calls a minister to evoke the prophetic gift in himself (2 K. iii. 15). David separates to the service of the sons of Asaph and of Heman and of Jeduthun, who should prophesy with harps and with psalteries and with cymbals. All these were under the hands of their father for song in the house of the Lord with psalteries, and harps for the service of the house of God (1 Chr. xxv. 6). Hymns, or sacred songs, are found in the books of Josiah (ii. 2), Isaiah (xxi. 1, xxvi. 1), Habakkuk (iii. 2). And it was probably the duty of the prophetic students to compose verses to be sung in the Temple. (See Lowth, Sacred Poetry of the Hebrews, Lect. xviii.) Having been themselves trained and taught, the prophets, whether still residing within their college, or having left its precincts, had the task of teaching others. From the question addressed to the Shammaites by his husband, "Wherefore wilt thou go to him today? It is neither new moon nor Sabbath" (2 K. iv. 23), it appears that weekly and monthly religious meetings were held as an ordinary practice by the prophets (see Patrick, Comm. in loc.). Thus we find that "Elisha sat in his house," engaged in his official occupation (cf. Ez. viii. 1, xiv. 1, xx. 1), "and the elders with him" (2 K. vi. 32), when the King of Israel sent to slay him. It was at these meetings, probably, that many of the warnings and exhortations on morality and spiritual religion were addressed by the prophets to their countrymen. The general appearance and life of the prophet were very similar to those of the Eastern divines at the present day. His dress was a hairy garment, girt with a leathern girdle (Is. xxv. 3). He was either an itinerant, or of a mendicant order. He was often or unmarried as he chose; but his manner of life and diet were stern and austere (2 K. iv. 10, 38; 1 K. xix. 6; Matt. iii. 4.

III. The Prophetic Gift. We have been speaking of the Prophetic Order. To belong to the prophetic order and to possess the prophetic gift are not convertible terms. There might be members of the prophetic order to whom the gift of prophecy was not vouchsafed. There might be inspired prophets, who did not belong to the prophetic order. Generally, the inspired prophet came from the College of the Prophets, and belonged to the prophetic order; but this was not always the case. In the instance of the Prophet Amos, the role and the exception are both manifested. When Amaziah, the idolatrous Israelite priest, threatens the prophet, and desires him to "scoot away into the land of Judah, and there eat bread and prophesy there, but not to prophesy again any more at Bethel," Amos in reply says, "I was no prophet, neither was I a prophet's son; but I was an herdman, and a gatherer of sycamore fruit; and the Lord said unto me, Go prophesy unto my people Israel" (vii. 14). That is, though called to the prophetic office, he did not belong to the prophetic order, and had not been trained in the prophetic colleges; and this, he indicates, was an unusual occurrence. (See J. Smith on Prophecy, c. iv.).

The sixteen prophets whose books are in the Canon have therefore that place of honor, because they were endowed with the prophetic gift as well as ordinarily (so far as we know) belonging to the prophetic order. There were hundreds of prophets contemporary with each of these sixteen prophets; and no doubt numberless compositions in sacred poetry and numberless moral exhortations were issued from the several schools, but only sixteen books find their place in the Canon. Why is this? Because these sixteen had what their brother-colleagues had not, the Divine call to the office of prophet, and the Divine illumination to enlighten them. It was not sufficient to have been taught and trained in preparation for a future call. Teaching and training served as a preparation only. When the schoolmaster's work was done, then, if the instrument was worthy, God's work began. Moses had an external call at the burning bush (Ex. iii. 2). The Lord called Samuel, so that Eli perceived, and Samuel learned, that it was the Lord who called him (1 Sam. iii. 10). Isaiah (vi. 8), Jeremiah (i. 5), Ezekiel (ii. 4), Amos (vii. 15),

---

a There seems no sufficient ground for the common statement that, after the schism, the colleges existed only in the Jewish kingdom, or for Knobel's supposition that they ceased with Elisha (Prophe~ismus, ii. 39), nor again for Bishop Lowth's statement that "they existed from the earliest times of the Hebrew republic" (Sacred Poetry, Lect. xix.), or for M. Nicolas' assertion that their previous establishment can be inferred from 1 Sam. viii., ix., x. (Études critiques sur la Bible, p. 365). We have, however, no actual proof of their existence except in the days of Samuel and of King David and Elisha.

b It is a vulgar error respecting Jewish history to suppose that there was an antagonism between the prophets and the priests. There is not a trace of such antagonism. Isaiah may denounce a wicked hierarchy (i. 10), but it is because it is wicked, not because it is priestly. Ezekiel sharply denounces a hierarchic system (e.g. xlii. 1), but it is in order to support the priesthood (cf. l. 14). Mr. F. W. Newman even designates Ezekiel's writings as "hard sacerdotism," "tendentious and unmititizing as Levitical itself!" (Hist. Monarch. p. 560). The Prophetic Order was, in truth, supplemental, not antagonistic to the Sacerdotal.
They had received their special mission. Not was it sufficient for this call to have been made on them for all. Each prophetic utterance is the result of a communication of the Divine to the human spirit, received either by a vision (Is. vi. 1) or by the word of the Lord (Jer. li. 1). (See Abel to Faith, Essay viii., "On Prophecy.") What then are the characteristics of the sixteen prophets, thus called and commissioned, and entrusted with the messages of God to his people?

1. They were the national poets of Judah. We have already shown that music and poetry, chants and hymns, were a main part of the studies of the class from which, generally speaking, they were derived. As is natural, we find not only the songs previously specified, but the rest of their compositions, poetical or breaching the spirit of poetry.

2. They were annalists and historians. A great portion of Isaiah, of Jeremiah, of Daniel, of Haggai, of Hagai, is direct or indirect history.

3. They were preachers of patriotism; their patriotism being founded on the religious motive. To the subject of the Theocracy, the enemy of his nation was the enemy of God, the traitor to the public weal was a traitor to his God; a denunciation of an enemy was a denunciation of a representative of God, and well able to set them in motion. The call was an exhortation in behalf of God's Kingdom on earth, "the city of our God, the mountain of holiness, beautiful for situation, the joy of the whole earth, the city of the great King" (Is. lxviii. 1, 2).

4. They were preachers of morals and of spiritual religion. The symbolical teaching of the Law had lost much of its effect. Instead of learning the necessity of purity by the legal washings, the majority came to rest in the outward act as in itself sufficient. It was the work, then, of the prophets to hold up before the eyes of their countrymen a high and pure morality, not veiled in symbols and acts, but such as none could profess to misunderstand. Thus, in his first chapter, Isaiah contrasts ceremonial observances with spiritual morality: "Your new moons and your appointed feasts may seem hateful: they are a trouble to me; I am weary to bear them. . . . Wash you, make you clean; put away the evil of your doings from before mine eyes; cease to do evil; learn to do well; seek judgment; relieve the oppressed, judge the fatherless, plead for the widow" (i. 14-17). He proceeds to denounced God's judgments on the oppression and covetousness of the rulers, the pride of the women (c. iii. 1), grasping; prosperity, impiety, injustice (c. vi., and so on throughout. The principal forward by the prophets, if not higher, or sterner, or purer than that of the Law, is more plainly declared, and with greater, because now more needed, reverence of dictum.

5. They were extraordinary, but yet authorized, exponents of the Law. As an instance of this, we may take Isaiah's description of a true fast (Isi. ii. 17): Ezekiel's explanation of the sins of the fathers being visited on the children (c. xviii.); Micaiah's preference of "doing justly, loving mercy, and walking humbly with God," to "thousands of rams and ten thousands of rivers of oil" (vi. 6-8). In these as in other similar cases (cf. Hos. vi. 6; Amos v. 21), it was the task of the prophets to restore the balance which had been overthrown by the Jews and their teachers dwelling on one side or on the outer covering of a truth or of a duty, and leaving the other side or the inner meaning out of sight.

6. They held, as we have shown above, a pastoral or quasi-pastoral office.

7. They were a political power in the state. Strong in the safeguard of their religious character, they were not afraid to appeal to the royal authority when wielded even by an Ahab.

8. But the prophets were something more than national poets and annalists, preachers of patriotism, moral teachers, exponents of the Law, pastors, and politicians. We have not yet touched upon their most essential characteristic, which is, that they were instruments of revealing God's will to man, as in other ways, so, specially, by predicting future events, and, in particular, by foretelling the incarnation of the Lord Jesus Christ, and the redemption effected by Him. There are two chief ways of exhibiting this fact: one is suitable when conversing with Christians, the other when arguing with unbelievers. To the Christian it is enough to show that the truth of the New Testament and the truthfulness of its authors, and of the Lord Himself, are made manifest by the truth of the existence of this predictive element in the prophets. To the unbeliever it is necessary to show that facts have verified their predictions.

9. In St. Matthew's Gospel, the first chapter, we find a quotation from the prophet Isaiah, "He shall hold a virgin shall be with child, and shall bring forth a son, and they shall call his name Em

---

a Bishop Lowth "estews the whole book of Isaiah poetical, a few passages exempted, which, if brought together, would not at most exceed the bulk of five or six chapters," "half of the book of Jeremiah," "the greater part of Ezekiel." The rest of the prophets are mainly prophetic, but Haggai is "proselyte," and Jonah and Daniel are plain prose (Novels Poetry, Lect. xxi.);

b "Magna fides et grandis audacia Prophetarum," says St. Jerome (in Ezck). This was their general characteristic, but that gifts and graces might be dispensed, it is an exhibition of the cases of Jonah, Isaiah, Isaiah, and the disobedient prophet of Judah.

c Dr. Davidson pronounced it as an "admitted" of the essential part of Biblical prophecy does not lie in predicting contingent events, but in proving the character of the spirit in the course of history.

d In no prophecy can it be shown that the literal predicting of distant historical events is contained. In conformity with the analogy of prophecy generally, special predictions concerning Christ do not appear in the Old Testament." By Davidson must mean that this is "now commonly admitted" by writers like himself, who, following Eichhorn, resolve "the prophet's delineations of the future" into "in essence nothing but forerunings -- efforts of the spiritual eye to bring up before itself the distinct form of the future. The vision of the prophet is intensified presentiment." Of course, if the powers of the prophets were simply "forerunings" and "presentiments" of the human spirit in its prophetic region, they could not do more than make indefinite guesses about the future. But this is not the Jewish nor the Christian theory of prophecy, see S. J. Stahl (in Ezck. iii.), S. Chrys. (Hom. xxi. t. 1257, ed. 1622), Clemen. Alex. (Strom. i. 11) in Euseb. (Dem. Evang. x. 422, ed. 1841), and Justin Martyr (Dialogon Tract. p. 224, ed. 1680). (See Stahl, s. v. Prophet.)
manuel," and, at the same time, we find a statement that the birth of Christ took place as it did "that it might be fulfilled which was spoken of the Lord by the prophet," in those words (i. 22, 23). This means that the prophecy was the declaration of God's purpose, and that the circumstances of the birth of Christ were the fulfillment of that purpose. Hence, either the predictive element exists in the book of the Prophet Isaiah, or the authority of the Evangelist St. Matthew must be given up. The same evangelist testifies to the same prophet having "spoken of" John the Baptist (iii. 3) in words which he quotes from Is. xi. 3. He says (iv. 13—15) that Jesus came and dwelt in Capernaum, "so that" other words spoken by the same prophet (ix. 1) "might be fulfilled." He says (viii. 17) that Jesus did certain acts, "that it might be fulfilled which was spoken by Esaias the prophet" (Is. i.3). He says (xii. 17) that Jesus acted in a particular manner, "that it might be fulfilled which was spoken by Esaias the prophet" in words quoted from chap. xiii. 1. Then, if we believe St. Matthew, we must believe that in the pages of the Prophet Isaiah there was predicted that which Jesus some seven hundred years afterwards fulfilled. But, further, we have not only the evidence of the Evangelist; we have the evidence of the Lord Himself. He declares (Matt. xiii. 14) that in the Jews of his age "is fulfilled the prophecy of Esaias, which saith"—"(Is. vi. 9). He says (Matt. xv. 7) "Esaias well prophesied of them"—(Is. xxix. 19). Then, if we believe our Lord's sayings and the record of them, we must believe in prediction as existing in the Prophet Isaiah. This prophet, who is cited between fifty and sixty times, may be taken as a sample; but the same argument might be brought forward with respect to Jeremiah (Matt. vii. 15; Heb. viii. 8), Daniel (Matt. xxiv. 15), Hosea (Matt. iii. 15; Rom. ix. 29), Joel (Acts ii. 17), Amos (Acts vii. 42; xv. 16), Jonah (Matt. xii. 40), Micaiah (Matt. xii. 7), Hallelakk (Acts xiii. 41), Haggai (Heb. xii. 28), Zechariah (Matt. xii. 5; Mark xiv. 27; John xiv. 37), Malachi (Matt. xi. 10; Mark i. 2; Luke vii. 27). With this evidence for so many of the prophets, it would be idle to cavil with respect to Ezekiel, Obadiah, Nahum, Zephaniah: the more, as "the prophets" are frequently spoken of together (Matt. ii. 29; Acts xxii. 15, xv. 19) as authoritatively the same. The fulfillment of certain things, so many of the prophets, on the authority of words, of what was said in a certain book which in reality had no reference to him, a thing which is entirely at variance with the character of the book. Davison, in his valuable Discourses on Prophecy fixes a "Criterion of Prophecy," and in accordance with it he describes "the conditions which would confer cogency of evidence on single examples of prophecy," in the following manner first, "the known promulgation of the prophecy prior to the event; secondly, the clear and palpable fulfillment of it: lastly, the nature of the event itself, if, when the prediction of it was given, it lay remote from human view, and was such as could not be foreseen by any supposable effort of reason, or be deduced upon principles of calculation derived from probability and experience" (Disc. viii. 375). Applying his test, the learned writer finds that the establishment of the Christian Religion and the person of its Founder were predicted when neither reason nor experience could have anticipated them; and that the predictions respecting them have been clearly fulfilled in history. Here, then, is an adequate proof of an inspired prediction in the prophets who predicted these things. He applies his test to the prophecies recorded of the Jewish people, and their actual state, to the prediction of the great apostasy and to the actual state of corrupted Christianity, and finally to the prophecies relating to Nineveh, Babylon, Tyre, Egypt, the Ishmaelites, and the Four Empires, and to the events which have befallen them; and in each of these cases he finds proof of the existence of the predictive element in the prophecy.

In the book of Kings we find Micaiah the son of Imish uttering a challenge, by which his predictive powers were to be judged. He had pronounced, by the word of the Lord, that Ahab should fall at Ramoth-Gilead. Ahab, in return, commanded him to be shut up in prison until he came back in peace. "And Micaiah said, if thou return at all in peace" (that is, if the event does not verify my words), "the Lord hath not spoken by me." (that is, I am no prophet capable of predicting the future) (1 K. xxii. 25). The test is sound as a negative test, and so it is laid down in the Law (Deut. xvii. 20); but as a positive test it would not be sufficient. Ahab's death at Ramoth-Gilead did not prove Micaiah's predictive powers, though his escape would have disproved them. But here we must notice a very important difference between single prophecies and a series of prophecies. The fulfillment of a single prophecy does not prove the prophetical power of the prophet, but the fulfillment of a long series of prophecies by a series or number of events does in itself constitute a proof that the prophecies were intended to predict the events, and, consequently, that predictive power resided in the prophet or prophets. We may see this in the so far parallel cases of Micah and Micaiah. We know from Aristophanes that Aristophanes refers to Clean, Pericles, Nicoas (and we should be equally sure of it were his satire more concealed than it is) simply from the fact of a number of satirical hits converging together on drawn of him by St. Matthew, and which would make him a conscious impostor, inasmuch as he himself appeals to the prophecies. Further, it would imply (as in Matt. i. 22) that God Himself contrived certain events (as those connected with the birth of Christ), in order that they might be in accordance with his will, but in order that they might be agreeable to the declarations of a certain book — than which nothing could well be more absurd.
the object of his satire. One, two, or three strokes might be intended for more persons than one, but the addition of each stroke makes the aim more apparent, and when we have a sufficient number before us we can no longer possibly doubt his design. The same may be said of fables, and still more of allegories. The fact of a *complicated* lock being opened by a key shows that the key and key were meant for each other. Now the Messianic picture drawn by the prophets as a holy contains at least as many traits as these: — That salvation was to come through the. families of Abraham, Isaac, Jacob, and Judah; that at the time of the final absorption of the Jewish power, Sih- loh (the tranquilizer) should gather the nations under his rule; that there should be a great Prophet, typified by Moses; a King descended from David: a Priest forever, typified by Melachis- edek: that there should be born into the world a child to be called Mighty God, Eternal Father, Prince of Peace: that there should be a Righteous Servant of God on whom the Lord would lay the iniquity of all: that Messiah the Prince should be cut off, but not for himself: that an everlasting kingdom should be given by the Ancient of Days to one like the Son of Man. It seems impossible to harmonize so many apparent contradictions. Nevertheless it is an undoubted fact that, at the time when the predictions were put out by each of these prophets, there was born into the world a child of the house of David, and therefore of the family of Abraham, Isaac, Jacob, and Judah, who claimed to be the object of these and other predictions; who is acknowledged as Prophet, Priest, and King, as Mighty God, and yet as God's Righteous Servant who bears the iniquity of all; who was cut off, and whose death is acknowledged not to have been for his own, but for others' good; who has instituted a spiritual kingdom on earth, which kingdom is of a nature to continue forever, if there is any continuance beyond this world and this life; and in whose doings and sufferings on earth a number of specific predictions were minutely fulfilled. Then we may say that we have here a series of prophecies which are so applicable to some person and earthly life of Jesus Christ as to be admirably couched in terms which have been proved to apply to Him. And if they were designed to apply to Him, prophetic prediction is proved.

Objections have been urged: — 1. *Vagueness.* — It has been said that the prophecies are too dark and vaguely worded to be proved predictive by the events which they are alleged to foretell. This objection is stated with clearness and force by Ammon. He says, "Such simple sententiousness as the following: Israel has not to expect a king, but a teacher; this teacher will be born at Bethlehem during the reign of Herod; he will lay down his life under Tiberius, in attestation of the truth of his religion; through the destruction of Jerusalem, and the complete extinction of the Jewish state, he will spread his doctrine in every quarter of the world. If there is a few of these things expressed in plain historical prose, would not only the character of true predictions, but, when once their genuineness was proved, they would be of incomparably greater worth to us than all the oracles of the Old Testament taken together" (Christology, p. 12). But to this it might be answered, and has been in effect answered by Hengstenberg—That God never forces men to believe, but that there is such an union of definiteness and vague-ness in the prophecies as to enable those who are willing to discover the truth, while the willfully blind are not forcibly constrained to see it. 2. That the prophecies were couched in the form of direct declarations, their fulfillment would have thereby been rendered impossible, or, at least, capable of frustration. 3. That the effect of prophecy (e. g. with reference to the time of the Messiah's coming) would have been far less beneficial to believers, as being less adapted to keep them in a state of constant expectation. 4. That the Messianic predictions could not be so clearly portrayed in his varied character as God and Man, as Prophet, Priest, and King, if he had been the mere "teacher" which is all that Ammon acknowledges him to be. 5. That the state of the Prophets, at the time of receiving the Divine revelation, was (as we shall presently show) such as necessarily to make their predictions fragmentary, figurative, and abstracted from the relations of time. 6. That some portions of the prophecies were intended to be of double application, and some portions to be understood only on their fulfillment (cf. John xiv. 29; Ez. xxxvi. 33).

2. *Obscurity of a part or parts of a prophecy otherwise clear.* — The objection drawn from the unintelligibility of one part of a prophecy, as invalidating the proof of foresight arising from the evident completion of the parts which are understood" is akin to that drawn from the vagueness of the whole of it. And it may be answered with the same arguments, to which we may add the consideration urged by Butler that it is, for the argument in hand, the same as if the parts not understood were written in cipher or not written at all: "Suppose a writing, partly in cipher and partly in plain words at length; and that in the part one understood there appeared mention of several known facts—it would never come into any man's thought to imagine that if he understood the whole, perhaps he might find that these facts were not in reality known by the writer" (Deisms, pt. ii. c. vii.). Furthermore, if it be true that prophecies relating to the first coming of the Messiah refer also to his second coming, some part of these prophecies must necessarily be as yet not fully understood.

It would appear from these considerations that Davison's second condition," above quoted, "the clear and palpable fulfillment of the prophecy," should be so far modified as to take into account the necessary difficulty, more or less great, in recognizing the fulfillment of a prophecy which results from the necessary vagueness and obscurity of the prophecy itself.

3. *Application of the several prophecies to a more immediate subject.* — It has been the task of many Biblical critics to examine the different passages which are alleged to be predictions of Christ, and to show that they were delivered in reference to some person or thing contemporary with, or shortly subsequent to, the time of the writer. The conclusion is then drawn, sometimes scornfully, sometimes as an inference not to be resisted, that the passages in question have nothing to do with the Messiah. We have here to distinguish carefully between the conclusion proved, and the corollary drawn from it. Let it be granted that it may be proved of all the predictions of the Messiah that they primarily apply to some historical and present fact; in that case a certain law, under which God
vouches his prophetic revelations, is discovered; but there is no semblance of disproof of the further Messianic interpretation of the passages under consideration. That some such law does exist has been argued at length by Mr. Davison. He believes, however, that “it obtains only in some of the more distinguished monuments of prophecy,” such as the prophecies founded on, and having primary reference to, the kingdom of David, the restoration of the Jews, the destruction of Jerusalem (On Prophecy, Dis. v.). Dr. Lee thinks that Davison exhibits too great reserve in the application of this important principle” (On Inspiration, Lect. iv.). He considers it to be of universal application; and upon it he founds the doctrine of the “double sense of prophecy,” according to which a prediction is fulfilled in two or even more distinct but analogous subjects: first in type, then in antitype: and after that perhaps a still further and more complete fulfillment. This view of the fulfillment of prophecy seems necessary for the explanation of our Lord’s prediction on the mount, relating at once to the fall of Jerusalem and to the end of the Christian dispensation. It is on this principle that Pearson writes: “Many are the prophecies which concern Him, many the promises which are made of Him; but yet some of them very obscure. ... Wherefore, He prophecies of the Angelic Church may well be first understood of some other person: except one place in Daniel, where Messiah is foretold ‘to be cut off”’ (On the Crocel, Art. Il.).

Whether it can be proved by an investigation of Holy Scripture, that this relation between Divine announcements for the future and certain present events does so exist as to constitute a law, and whether, if the law is proved to exist, it is of universal, or only of partial application, we do not pause to determine. But it is manifest that the existence of a primary sense cannot exclude the possibility of a secondary sense. The question, therefore, really is, whether the prophecies are applicable to Christ: if they are so applicable, the previous application of each of them to some historical event would not invalidate the proof that they were not predictions which had their full completion in Him. Nay, even if it could be shown that the prophecies were in their thoughts nothing beyond the primary completion of their words (a thing which we at present leave undetermined), no inference could thence be drawn against their secondary application: for such an inference would assume, what no believer in inspiration will grant, viz., that the prophecies are the sole authors of their prophecies. The rule, ‘Nil in sciptura quod non primum in scripture is sound; but the question is, who is to be regarded as the true author of the prophecies—the human instrument or the Divine Author? (See Hengstenberg, Chris- tology, Appendix VI., p. 433.)

4. Miraculous character. — It is probable that his lies at the root of the many and various efforts undertaken with a view to the elucidation of the prophecies. There is no question that if miracles are, either physically or morally, impossible, then prediction is impossible; and those passages which have ever been accounted predictive, must be explained away as being vague, as being obscure, as applying only to something in the writer’s lifetime, or on some other hypothesis. This is only saying that belief in prediction is not compatible with the theory of Atheism, or with the philosophy which rejects the overruling Providence of a personal God. And this is not to be denied.

IV. THE PROPHETIC STATE. — We learn from Holy Scripture that it was by the agency of the Spirit of God that the prophecies received Divine communication. Thus, on the appointment of the seventy elders, “The Lord said, I will take of the Spirit which is upon thee, and will put it upon them. ... And the Lord ... took of the Spirit that was upon him, and gave it unto the seventy elders; and it came to pass that when the Spirit rested upon them, they prophesied and did not cease.” And Moses said, “Would God that all the Lord’s people were prophets, and that the Lord would put his Spirit upon them” (Num. xi. 17, 25, 29). Here we see that what made the seventy prophesy, was their being endued with the Lord’s Spirit by the Lord Himself. So it is the Spirit of the Lord which made Saul (1 Sam. x. 6) and his messengers (1 Sam. xix. 20) prophesy. And thus St. Peter assures us that the prophetic gift was not in old time confined to the will of man, but holy men of God spake, moved (προφητεύοντες) by the Holy Ghost” (2 Pet. i. 21), while false prophets are described as those “who speak a vision of their own heart, and not out of the mouth of the Lord” (Jer. xxiii. 16), “who prophesy out of their own hearts, ... who follow their own spirit, and have seen nothing” (Ex. xii. 3). The prophet held an intermediate position in communication between God and man. God communicated with him by his Spirit, and he, having received this communication, was “the spokesman” of God to man (cf. Ex. vii. 1 and iv. 16). But the means by which the Divine Spirit communicated with the human spirit, and the conditions of the human spirit under which the Divine communications were received, have not been clearly declared to us. They are, however, indicated, of course, in the lives of such men as Isaiah and Aaron, we read, “And the Lord said, Hear now my words: If there be a prophet among you, I the Lord will make myself known unto him in a vision, and will speak unto him in a dream. My servant Moses is not so, who is faithful in all mine house: with him will I speak mouth to mouth, even apparently, and not in dark speeches, and the similitude of the Lord shall he behold” (Num. xii. 6-8). Here we have an exhaustive division of the different ways in which the revelations of God are made to man. 1. Direct declaration and manifestation, “I will speak mouth to mouth, apparently, and the similitude of the Lord shall he behold.” 2. Vision. 3. Dream. It is indicated that, at least at this time, the vision and the dream were the special means of conveying a revelation to a prophet, while the higher form of direct declaration and manifestation was reserved for the more highly favored Moses.

Joel’s prophecy follows: “1. All the other prophets saw the prophecy in a dream or in a vision, but our Rabbi Moses saw it whilst awake. 2. To all the other prophets it was revealed through the medium of an angel, and therefore they saw that which they saw in an alle
pears to make the same division, "Your old men shall dream dreams, and your young men shall see visions;" these being the two marks in which the promise, "your sons and your daughters shall prophesy," are to be carried out (ii. 28). And of Daniel we are told that he had understanding in all visions and dreams" (Dan. i. 17). Can these phases of the prophetic state be distinguished from each other? and in what did they consist?

According to the theory of Philo and the Alexandrian school, the prophet was in a state of entire unconsciousness at the time that he was under the influence of Divine inspiration, "for the human understanding," says Philo, "takes its departure on the arrival of the Divine Spirit, and, on the removal of the latter, again returns to its home, for the mortal must not dwell with the Immortal" (Quis Rei Div. Hoc. i. t. i. p. 234). Balaam is described by him as an unconscious instrument through whom God spoke (De Vit. Monois, Eic. i. t. ii. p. 121). Josephus makes Balaam excuse himself to Balaam on the same principle: "When the Spirit of God seizeth it, it uttereth whatsoever sounds and words It pleaseth, without any knowledge on our part, and it causeth to come into us, there is coming in us which remaineth our own (Antiq. iv. 6, § 5). This theory makes the external prophecies of the Jewish prophecy in all essential points with the heathen autarkos, or divination, as distinct from prophetaia, or interpretation. Montanism adopted the same view: "Defendimus, in causa nove prophetic, gratia exstatis, id est amentiam, convenire. In spiritu enim homo constituens, prescrum certum gloriae Dei conquirit, sed cum per ipsum Deus loquitur, necesse est quod a mentis somnis, simulacris sicut virtute divina, de quo inter nos et Psyches (cæturalios) quasi esto" (Tertullian, Adv. Marcion. iv. 22). According to the belief, then, of the heathen, of the Alexandrian Jews, and of the Montanists, the vision of the prophet was seen while he was in a state of ecstatic unconsciousness, and the emanation of the vision was made by him in the same state. The Fathers of the Church opposed the Montanist theory with great unanimity. In Eusebius's History (xv. 17) we read that Milius devoted a book περὶ τοῦ μὴ διε προφητεύειν ἐν ἑκάστῃ καλλιτεκίᾳ. St. Jerome writes: "Non loquitur prophetae εὐκακότεραι, ut Montanus et Priscus Maximinque declarant, sed quod prophetarum litter est visions intelligenciis universa quo loquitur (Proph. in Nabinam). And again: "Necesse est ut Montanus cum insinu faminis somnandi, prophetae in ecstasi hactenus sumt ut nisi aequi quid queruntur et cum aliquo crudente ipsi ignorant quid dierentur (Proph. in Festo.)" Origen (Contra Celsum, vii. 4), and St. Basil (Commentary on Isaiah, Proem, c. 5), contrast the prophet with the seer, in view of the latter being deprived of his senses. St. Chrysostom draws out the contrast: Τότε γαρ κατείχεν διαν, τό εξετάσαντα, τό ἀνάχυκνον ἁμαρτανειν, τό ὑπερτερεῖν, τό εὐκακεῖσθαι, τό εὐοικεῖσθαι, τό ἱστάμεθα τὸν μακάμαινον. "Ο δὲ προφήτης ὁλὸς ὡς, ἀλλὰ μετὰ διανοίας ἐγγυόμεθα καὶ χαιρείστασως, καὶ ἱδομέθα κἀθυσμέθα (Proph. in Festo)." Some moderns seem to have misunderstood the meaning of the Scripture: "As a man speaketh unto his friend (Ex. xxiii. 11). 4. All the other prophets and Moses did not prophesy at any time that they wished, but with Moses it was so, but at any time that he wished for it, the Holy Spirit came upon him; so that it was not necessary for him to prepare his mind, for he was always ready for it, like the ministering angels" (Vid. Hesychiachak, c. vili. Bernardi translat. p. 166, quoted by Lee, p. 455).
The bodily senses were closed to external objects (called "sleep"). The reflective and discursive faculty was still and inactive. The spiritual faculty (πνεύμα) was awakened to the highest state of energy. Hence, it is that revelations in trances are described by the prophets as "seen" or "heard" by them, for the spiritual faculty energizes by immediate perception on the part of the inward sense, not by inference and thought. Hence, it is that the Lord "gave the secrets in the knowledge of the holy ones" (Is. xi. 1). Zechariah "lifted up his eyes and saw" (Zech. ii. 1); "the word of the Lord which Micah saw" (Mic. i. 1); "the wonder which Habakkuk did see" (Hab. i. 1). "Peter saw heaven opened, . . . and there came a voice to him" (Acts x. 11). Paul was "in a trance, and saw Him glorying" (Acts xxii. 18). John "heard a great voice" (Rev. v. 1) and saw seven golden candlesticks (Rev. i. 12). Hence, it is, too, that the prophets' visions are unconnected and fragmentary, inasmuch as they are not the subject of the reflective but of the perceptive faculty. They described what they saw and heard, not what they had themselves thought out and systematized. Hence, too, succession in time is disregarded or unnoticed. The subjects of the vision being, to the prophets' sight, in juxtaposition or enfolding each other, some in the foreground, some in the background, are necessarily abstracted from the relations of time. Hence, too, the imagery with which the prophetic writings are colored, and the dramatic cast in which they are moulded; these peculiarities resulting, as we have already said, in a necessary obscurity and difficulty of interpretation.

But though it must be allowed that Scripture language seems to point out the state of dream and of trance, or ecstasy, as a condition in which the human instrument received the Divine communications, it does not follow that all the prophetic revelations were thus made. We must acknowledge the state of trance in such passages as Is. vi. (called ordinarily the vision of Isaiah); as Ez. i. (the vision of Ezekiel); as Dan. vii. (Esdr. vii.); as Hab. ii. (the vision of Habakkuk); as Zechariah, iv. v. vi. (the visions of Zechariah), as Acts x. (called the vision of St. Peter), as 2 Cor. xii. (the vision of St. Paul), and similar instances, which are indicated by the language used. But it does not seem true to say, with Hengstenberg, that "the difference between these prophecies and the rest is a vanishing one, and if we but possess the power and the ability to look more deeply into them, the marks of the vision may be discerned" (Christology, vol. iv. p. 417). St. Paul distinguishes "revelations" from "visions" (2 Cor. xii. 1). In the books of Moses "speaking mouth to mouth" is contrasted with "visions and dreams" (Num. xii. 8). It is true that in this last-quoted passage, "visions and dreams" alone appear to be attributed to the whole people, while "speaking mouth to mouth" is reserved for Moses. But when Moses was dead, the cause of this difference would cease. During the era of prophecy there were none nearer to God, none with whom He would, we may suppose, communicate more openly than the prophets. We should expect, then, that they would be the recipients, not only of visions in the state of dream or ecstasy, but also of the direct revelations which are called speaking mouth to mouth. The greater part of the Divine communications are supposed to have been made to the prophets in their waking and ordinary state, while the visions were exhibited to them either in the state of sleep, or in the state of ecstasy. "The more ordinary mode through which the word of the Lord, as far as we can trace, came, was through a divine impulse given to the prophet's own thoughts" (Stanley, p. 425). Hence it follows that, while the Fathers in their exegesis of the prophecies and "visions" were pushed somewhat too far in their inquiry into the ecstatic state, they were yet perfectly exact in their descriptions of the condition under which the greater part of the prophetic revelations were received and promulgated. No truer description has been given of them than that of Hippolytus, and that of St. Basil: "Or υἱὸν τῆς δύναμεως ἐφάνετο, ὦτε ἄπερ αὐτοί ἔθυλοντο τόλμοι ἄπερκότων, ἀλλὰ πρῶτον μὲν διὰ τοῦ Λόγου ἐπιφανείου ὁδηγοῦ, ἑπεταὶ οὐκ ἑξαπατών προφετείας ἔδοξον ἥκατον ἢ μόνον ἀπὸ τοῦ Θεοῦ ἀποκεφαλικέα (Hippol. De Initiis, c. ii.). Ποιο προφητήσεως οἱ καθαραὶ καὶ διαγεγομέναι ψυχαὶ οιονεὶς κάτοπτρα γνώμαι τῆς θείας ἐνεργείας, τῆς ἡμῶν ἐπιστήμης καὶ αὐτής, πλήθος ἐπιστήμων ἡγεῖται πᾶς μᾶς γεγορεῖται τὸ ἐμὸν ὄνοµα προφητείας (St. Basil, Commentar. in Epist. ii. Proem.)."

Had the prophets a full knowledge of that which they predicted? It follows from what we have already said that they had not, and could not have. They were the "spokesmen" of God (Ex. vii. 1), "prophets" born "in a trance," by which his words were uttered, or they were enabled to view, and empowered to describe, pictures presented to their spiritual intuition; but there are no grounds for believing that, contemporaneously with this miracle, there was wrought another miracle enlarging the understanding of the prophet so as to grasp the whole of the Divine counsels which he was gazing into, or which he was the instrument of enunciating. We should not expect to find much evidence of personal possession of the Spirit on the part of the majority of the prophets themselves (Dan. xii. 8; Zech. iv. 5), and of St. Peter (1 Pet. i. 10), to the fact that they frequently did not comprehend them. The passage in St. Peter's Epistle is very instructive: "Of which salvation the prophets have inquired and searched diligently, who prophesied of the grace that should come unto you: searching what, or what manner of time the Spirit of Christ which was in them did signify, when it testified beforehand the sufferings of Christ, and the glory that should follow. Unto whom it was revealed, that not unto themselves, but unto us they did minister the things, which are now reported unto you by them that have preached the gospel unto you with the Holy Ghost sent down from heaven. It is he which was pointed out before of God in his prophets, Jesus Christ; which was ordained to be the Judge of the quick and the dead. He to whom all the prophets did look: for who is it that was counted on the basis of this chapter? (2) that after having uttered predictions on those subjects, the minds of the prophets occupied themselves in searching into the full meaning of the words that they had uttered; (3) that they were then divinely in-
Ordered that their predictions were not to find their completion until the last days, and that they themselves were instruments for declaring good things that should come not to their own but to a future generation. This is exactly what the prophetic state above described would lead us to expect.

While the Divine communication is being received, the human instrument is simply passive. He sees or hears by his spiritual intuition the perception, and declares what he has seen or heard. Then the reflective faculty which had been quiescent but never so overpowered as to be destroyed, awakens to the consideration of the message or vision received, and it strives earnestly to understand it, and more especially to look at the revelation as in instead of out of time. The result is failure; but this failure is softened by the Divine intuition that the time is not yet. The two questions, What did the prophet understand by this prophecy? and, What was the meaning of this prophecy? are totally different in the estimation of every one who believes that "the Holy Ghost spake by the Prophets," or who considers it possible that he did so speak.

2. Interpretation of Predictive Prophecy.—We have only space for a few rules deduced from the account which we have given of the nature of prophecy. They are, (1.) Interpose distances of time according as history may show them to be necessary with respect to the past, or inferences may show them to be likely in respect to the future, because, as we have seen, the prophetic visions are abstracted from relations in time. (2.) Distinguish the form from the idea. Thus Isaiah (xi. 15) represents the idea of the removal of all obstacles before God's people in the form of the Lord's destroying the tongue of the Egyptian sea, and smiting the river into seven streams. (3.) Distinguish in like manner figure from what is represented by it, e. g., in the verse previous to that quoted, do not understand literally, "They shall fly upon the shoulders of the Philistines" (Is. xi. 14). (4.) Make allowance for the imagery of the prophetic visions, and for the poetical diction in which they are expressed. (5.) In respect to things past, interpret by the apparent meaning, checked by reference to events; in respect to things future, interpret by the apparent meaning, checked by reference to the analogy of the faith. (6.) Interpret according to the principle which may be deduced from the prophecy itself, and explained in the Old Testament. (7.) Interpret according to the principle which may be deduced from the examples of prophecies interpreted in the New Testament.

VI. Use of Prophecy.—Predictive prophecy is at once a part and an evidence of revelation; at the time that it is delivered, and until its fulfillment, a part; after it has been fulfilled, an evidence. St. Peter (Ep. 2, i. 19) describes it as "a light shining in a dark place," or "a taper glimmering where there is nothing to reflect its rays," that is, throwing some light, but only a feeble light as compared with what is shed from the Gospel history. To this light, feeble as it is, "you do well," says the apostle, "to believe it." And he would have them not to be offended at the feebleness of the light, because it is of the nature of prophecy until its fulfillment—in the case of Messianic predictions, of which he is speaking, described as "until the day dawn, and the day-star arise in your hearts")—to shed only a feeble light. Nay, he continues, even the prophets could not themselves interpret its meaning; "for the prophecy came not in old time by the will of man," i.e. the prophets were not the authors of their predictions, "but holy men of old spake by the impulse (προφητεία) of the Holy Ghost." This, then, was the use of prophecy before its fulfillment,—to act as a feeble light in the midst of darkness, which it did not dispel, but through which it threw its rays in order to enable a true heart to understand and to direct its steps and guide his anticipations (cf. Acts xiii. 27). But after fulfillment, St. Peter says, "the word of prophecy" becomes "more sure" than it was before, that is, it is no longer merely a feeble light to guide, but it is a firm ground of confidence, and, combined with the apostolic testimony, serves as a trustworthy evidence of the faith; so trustworthy, that even after he and his brother Apollos are dead, those whom he addressed will feel secure that they "had not followed cunningly devised fables," but the truth.

As an evidence, fulfilled prophecy is as satisfactory as anything can be, for who can know the nature except the Ruler who disposes future events; and from whom can come prediction except from Him who knows the future? After all that has been said and unsaid, prophecy and miracles, each resting on its own evidence, must always be the chief and direct evidences of the truth of the Divine character of a religion. Where they exist, a Divine power is proved. Nevertheless, they should never be rested on alone, but in combination with the general character of the whole scheme to which they belong. Its miracles, its prophecies, its morals, its propagation, and its adaptation to human needs, are the chief evidences of Christianity. None of these must be taken separately. The fact of their conspiring together is the strongest evidence of all. That one object with which predictions are delivered is to serve in an after age as an evidence on which faith may reasonably rest, is stated by our Lord

a See Keble, Christian Year, 12th S. 8th Trim., and Lee, Interpretation, p. 216.

b It is by this principle rather than as it is explained by Dr. M'Cud (Jews to Faith) that the prophecy of Hosea xi. 1 to be interpreted. Hosea, we may well believe, understood in his own words no more than a reference to the historical fact that the children of Israel came out of Egypt. But Hosea was not the author of the prophecy—he was the instrument by which it was promulgated. The Holy Spirit intended something further—and what this something was He informs us by the Evangelist St. Matthew Matt. vii. 15. The two facts of the Israelites being led out of Egypt and of Christ's return from Egypt appear to Professor Jowett so distinct that the reference by St. Matthew to the Prophecy is to him inexplicable except upon the hypothesis of a mistake on the part of the Evangelist see Jowett's Essay on the Interpretation of Scripture. A deeper insight into Scripture shows that "the Jewish people themselves, their history, their ritual, their government, all present one grand prophecy of the future Redeemer" (Lee, p. 167). Consequently "Israel" is one of the forms naturally taken in the prophetic vision by the idea "Messiah."

c This is a more probable meaning of the words ἐπεξεργασθεῖν ὑπὲρ πονοτιάν, than that given by Pearson (On the Oed., art. i. p. 17, ed. Burton), "that no prophecy did so proceed from the prophet that he of himself or by his own instinct did open his mouth to prophesy."
VII. DEVELOPMENT OF MESSIANIC PROPHECY—Prophecy in the shape of promise and threatening, begins with the Book of Genesis. Immediately upon the Fall, hopes of recovery and salvation are held out, but the manner in which this salvation is to be effected is left altogether indefinite. All that is at first declared is that it shall come through a child of woman (Gen. iii. 15). By degrees the area is limited: it is to come through the family of Jacob (Gen. xxvi. 24), through the family of Abraham (Gen. xii. 3), of Isaac (Gen. xxvii. 18), of Jacob (Gen. xxviii. 14), of Judah (Gen. xlix. 10). Balaam seems to say that it will be wrought by a warlike Israelish King (Num. xxiv. 17); Jacob, by a peaceful Ruler of the earth (Gen. xlix. 10); Moses, by a Prophet like himself, i.e. a revealer of a new religious dispensation (Deut. xviii. 15). Nathan's announcement (2 Sam. vii. 16) determines further that the salvation is to come through the house of David, and through a descendant of David who shall be himself a king. This promise is developed by David himself in the Messianic Psalms. Ps. xviii. and lxii. are founded on the promise communicated by Nathan, and do not go beyond the announcement made by Nathan. The same promise is embodied in lx. and lxxii., which are composed by a later writer. Ps. li. and cx. rest upon the same promise as their foundation, but add new features to it. The Son of David is to be the Son of God (lii. 7), the anointed of the Lord (lii. 2), not only the King of Zion (ii. 6, cx. 1), but the inheritor and lord of the whole earth (ii. 8, cx. 6), and, beside this, a Priest forever after the order of Melchisedek (cx. 4). At the same time he is, as typified by his predecessor, to be full of suffering and affliction (Pss. lix., lxxi., cxxi., cxxiv.: brought down to the grave, yet raised to life without seeing corruption (Pss. xxxvi., xxxix.)). In Pss. lxxii., cxxii., the sons of Korah and Solomon describe his peaceful reign. Between Solomon and Hezekiah intervened some 200 years, during which the voice of prophecy was silent. The Messianic conception entertained at this time by the Jews might have been that of a King of the royal house of David who would arise, and gather under his peaceful sceptre his own people and strangers. Sufficient allusion to his prophetic and priestly offices had been made to create thoughtful consideration, but as yet there was no clear delineation of him in these characters. It was reserved for the Prophets to bring out these features more distinctly. The sixteen Prophets may be divided into four groups: the Prophets of the Northern Kingdom,—Hosea, Amos, Joel; the Prophets of the Southern Kingdom,—Isaiah, Jeremiah, Obadiah, Micah, Nahum, Habakkuk, Zephaniah; the Prophets of the Captivity,—Ezekiel and Daniel; the Prophets of the Return,—Haggai, Zechariah, Malachi. In the great period of propheticism there is no longer any chronological development of Messianic Prophecy, as in the earlier period previous to Solomon. Each prophet adds a feature, one more, another less clearly: combine the features, and we have the portrait; but it does not grow gradually and perceptibly under the hands of the several artists. Here, therefore, the task of tracing the chronological progress of the revelation of the Messiah comes to an end: its culminating point is found in the prophecy contained in Is. lii. 13—15, and liii. We here read that there should be a Servant of God, lowly and despised, full of grief and suffering, oppressed, condemned as a malefactor, and put to death. But his sufferings, it is said, are not for his own sake, for he had never been guilty of fraud or violence: they are spontaneous taken, patiently borne, vicarious in their character; and, by God's appointment, they have an atoning, reconciling, and justifying efficacy. The result of his sacrificial offering is to be his exaltation and triumph. By the path of humiliation and expiatory suffering he is to reach that state of glory foreseen by David and Solomon. The prophetic character of the Messiah is defined by other parts of his book as the atoning work here. By the time of Hezekiah therefore (for Hengstenberg, Christology, vol. ii., has satisfactorily disproved the theory of a Deuter-Isaiah of the days of the Captivity) the portrait of the ουανθρωπος—at once King, Priest, Prophet, and Redeemer—was drawn in all its essential features. The contemporary and later Prophets (Mic. v. v. by Dav. vii.; Zech. vi. 12; Mal. iv. 2) added some particulars and details, and so the conception was left to await its realization after an interval of some 400 years from the date of the last Hebrew Prophet.

It is the opinion of Hengstenberg (Christology, i. 235) and of Pusey (Minor Prophets, Part i. Intro.) that the writings of the Minor Prophets are chronologically placed. Accordingly, the former arranges the list of the Prophets as follows: Hosea, Joel, Amos, Obadiah, Jonah, Micah, Isaiah ("the principal prophetical figure in the first or Assyrian period of canonical propheticism"), Nahum, Habakkuk, Zephaniah, Jeremiah ("the principal prophetical figure in the second or Babylonian period of canonical propheticism"), Ezekiel, Daniel, Haggai, Zechariah, Malachi. Cabnet (Dict. Bibl. s. v. "Prophecy") as follows: Hosea, Amos, Isaiah, Jonah, Micah, Nahum, Jeremiah, Zephaniah, Joel, Daniel, Ezekiel, Haggai, Obadiah, Zechariah.

Haggai, aHeaderView, in opposition to their ancient interpreters, has biscribed his book to a later author, and derives it from an older book, in which a martyr was spoken of. "This," he says, "quite spontaneously suggested itself, and has impressed itself on his mind "more and more;" and he thinks that this:"controversy on chap. iii. will never cease until this truth is no longer known," (Prophetae, ii. 347). Hengstenberg gives the following list of German commentators who have maintained the Messianic explanation: Daub, Heinsler, Kocher, Koppe, Michaelis, Schneider, Storr, Hengstenberg himself, Krüger, John, Stedelen, Sack, Rinke, Tholuck, Havernick, Schilder. Hengstenberg's own exposition, and criticism of the expositions of others, is well worthy consultation (Christology, vol. li.).

Obadiah is generally considered to have lived at a later date than is compatible with a chronological order.
PROPHET

Zechariah, Malachi. Dr. Stanley (Lect. xix.) in the following order: Joel, Jonah, Hosea, Amos, Isaiah, Micah, Nahum, Zechariah, Zephaniah, Habakkuk, Obadiah, Jeremiah, Ezekiel, Isaiah, Daniel. Dr. Stanley recognizes two Isaiahs and two Zechariasses, unless "the author of Is. xli.-xlii. is regarded as the older Isaiah transported into a style and position later than his own time" (p. 425).

VIII. Prophets of the New Testament.

So far as their predictive powers are concerned, the New Testament prophets find their New Testament counterpart in the writer of the Apocalypse.

[VITALITY OF ST. JOHN; ANTICHRIST.]

But in their general character, as specially illuminated revealers of God's will, their counterpart will rather be found, first in the Great Prophet of the Church, and his forerunner John the Baptist, and next in all those persons who were endowed with the extraordinary gift of the Spirit in the Apostolic age, the speakers with tongues and the interpreters of tongues, the prophets and the discoursers of spirits, the teachers and workers of miracles (1 Cor. xii. 28). The connecting link between the O. T. prophet and the speaker with tongues in the state of ecstasy in which the former at times received his visions and in which the latter uttered his words. The O. T. prophet, however, was his own interpreter: he did not speak in the state of ecstasy; he saw his visions in the ecstatic and declared them in the ordinary state. The N. T. discourse of spirits has its prototype in such as Micaiah the son of Imlah (1 K. xxii. 22), the worker of miracles in Elijah and Elisha, the teacher in each and all of the prophets. The prophets of the N. T. represented their namesakes of the O. T. as being exponents of Divine truth and interpreters of the Divine will to their auditors.

That predictive powers did occasionally exist in the N. T. prophets is proved by the case of Agabus (Acts xi. 28), but this was not their characteristic. They were not an order, like apostles, bishops or presbyters, and deacons, but they were men or women (Acts xxii. 30) who had the ψήφος θεου prophecy vouchsafed to them. If men, they might at the same time be apostles (1 Cor. xiv.); and there was nothing to hinder the different ψήφος θεου of wisdom, knowledge, faith, teaching, miracles, prophecy, discernment, tongues, and interpretation (1 Cor. xii.) being all accumulated in one person, and this person might or might not be a presbyter. St. Paul describes prophecy as being effective for the conversion, apparently the sudden and immediate conversion, of multitudes (1 Cor. xiv. 24), and for the instruction and consolations of believers (Ibid. 31). This shows its nature. It was a spiritual gift which enabled man to understand and to teach the truths of Christianity, especially as veiled in the Old Testament, and to exhort and warn with authority and effect greater than human (see Locke, Periphema, note on 1 Cor. xiv., and Conybeare and Howson, I. 441). The heil of the N. T. were supernaturally illuminated expositors and preachers.

For works more especially on the Messianic Prophecies, see the literature under Messiah (Amer. ed.). For Commentaries on particular prophets see their names in the Dictionary. 

* PROPHETS, SCHOOLS OF THE.

[PROPHETS, p. 2992 f.]

PROSELYTES (προσελήνιον; προσελήνιον, 1 Chr. xxii. 2, ἐγνώριζον, Ex. xii. 19: Proselity). The Hebrew word thus translated is in the A. V. commonly rendered "stranger" (Gen. xv. 13, Ex. ii. 22, Is. v. 17, &c.). The LXX., as above, commonly gives the equivalent in meaning (προσελήνιον) of his prophecy (Hengstenberg), or the words which, as translated by the A. V., are a mistranslation as to the best, may be really but an imperative as to the future (Pusey).
PROSELYTES

PROSELYTES

2508

to the pontificia and the pontificia is a form which is used in later Jewish literature. In the N. T. the A. V. has taken the word in a more restricted meaning, and translated it accordingly (Matt. xxiii. 15, Acts ii. 10, vi. 5).

The existence, through all stages of the history of the Israelites, of a body of men, not of the same race, but holding the same faith and adopting the same ritual, is a fact which, from its very nature, requires to be dealt with historically. The connection with the technical distinctions and regulations of the later Rabbis is to invert the natural order, and leads to inevitable confusion. It is proposed accordingly to consider the condition of the proselytes of Israel in the five great periods into which the history of the people divides itself, namely, (I.) the age of the patriarchs; (II.) from the Exodus to the commencement of the monarchy; (III.) the period of the monarchy; (IV.) from the Babylonian captivity to the destruction of Jerusalem; (V.) from the destruction of Jerusalem downwards.

I. The position of the family of Israel as a distinct nation, with a special religious character, appears at a very early period to have exercised a power of attraction over neighboring races. The slaves and soldiers of the tribe of which Abraham was the head (Gen. xxvii. 27), who were included with him in the covenant of circumcision, can hardly perhaps be classed as proselytes in the later sense. The case of the Shechenites, however (Gen. xxxiv.), presents a more distinct instance. The convicts are swayed partly by passion, partly by interest. The son of Jacob, then, as afterwards, required circumcision as an indispensable condition (Gen. xxxiv. 14). This, and apparently this only, was required of proselytes in the Pre-Mosaic period.

II. The life of Israel under the Law, from the very first, presupposes and provides for the incorporation of men of other races. The "mixed multitude" of Ex. xii. 38 implies the presence of proselytes more or less complete. It is recognized in the earliest rules for the celebration of the Passover (Ex. xii. 20). "The stranger" of this and other laws in the A. V. answers to the word which distinctly means "proselyte," and is so translated in the LXX., and the prominence of the clause may be estimated by the frequency with which the word occurs: 9 times in Exodus, 23 in Leviticus, 11 in Numbers, 19 in Deuteronomy. The laws clearly point to the position of a convert. The "stranger," is bound by the law of the Sabbath (Ex. xx. 19, xxii. 12; Deut. v. 14). Circumcision is the condition of any fellowship with him (Ex. xii. 48; Num. ix. 14). He is to be present at the Passover (Ex. xii. 19), the Feast of Weeks (Deut. xvi. 11), the Feast of Tabernacles (Deut. xvi. 14), the Day of Atonement (Lev. xvi. 29). The laws of prohibited marriages (Lev. xviii. 29) and abstinence from blood (Lev. xix. 10) are binding upon him. He is liable to the same punishment for Molech-worship (Lev. xx. 2), and for blasphemy (Lev. xxiv. 16) may claim the same right of asylum as the Israelites in the cities of refuge (Num. xxxv. 15; Josh. xx. 9). On the other side he is subjected to some drawbacks. He cannot hold land (Lev. xix. 10). He has no jus consiliendi with the descendants of Aaron (Lev. xvi. 14). His condition is assumed to be, for the most part, one of poverty (Lev. xxii. 22), often of servitude (Deut. xxi. 11). For this reason he is placed under the special protection of the Law (Dent. x. 18). He is to share in the right of gleanings (Lev. xix. 10), is placed in the same category as the fatherless and the widow (Deut. xxiv. 17, 19, xxvi. 12, xxviii. 19), is joined with the Levite as entitled to the tithe, and is proscribed in Deut. xix. 21, xxvi. 12). Among the proselytes of this period the Kenites, who under Joshua accompanied the Israelites in their wanderings, and ultimately settled in Canaan, were probably the most conspicuous (Judg. i. 16). The presence of the class was recognized in the solemn declaration of blessings and curses from Ezd. and Gerizim (Josh. vii. 33).

The period after the conquest of Canaan was not favorable to the admission of proselytes. The people had no strong faith, no commanding position. The Gibeonites (Josh. vii.) furnish the only instance of a conversion, and their condition is rather that of slaves compelled to conform than of free proselytes. [NETHINIM.]

III. With the monarchy, and the consequent fame and influence of the people, there was more to attract strangers from the neighboring nations, and we meet accordingly with many names which suggest the presence of men of another race conforming to the faith of Israel. Doeg the Edomite (1 Sam. vii. 7), Uriah the Hittite (2 Sam. xi. 3), Aaranah the Jebusite (2 Sam. xxiv. 20), Zelek the Ammonite (2 Sam. xxiv. 27), Hushai the Moabite (1 Chr. xvi. 46)—these two, in spite of an express law to the contrary (Dent. xxiii. 3)—and at a later period Shema in the scries (probably, comp. Alexander on Is. xii. 15), and Ebed-Melech the Ethiopian (Jer. xxxviii. 7), are examples that such proselytes might rise even to high offices about the person of the king. The CHREITIES and PESELYTES consisted probably of foreigners who had been attracted to the service of David, and were content for it to adopt the religion of their master (Ewav. , Gesch. i. 339, iii. 182). The visions in Ps. lxxxiv. of a time in which men of Tyre, Egypt, Ethiopia, Philistia, should all be registered among the citizens of Zion, can hardly fail to have had its starting-point in some admission of proselytes within the memory of the writer (Ewav. and De Wette, c. ii. 111).

A convert of another kind, the type, as it has been thought, of the later proselytes of the gate (see below), is found in Naaman the Syrian (2 K. v. 15, 18) recognizing Jehovah as his God, yet not binding himself to any rigorous observance of the Law.

The position of the proselytes during this period appears to have undergone considerable changes. On the one hand men rose, as we have seen, to power and fortune. The case for the Law provided (Lev. xxv. 47) might actually occur, and they might be the creditors of Israelite debtors, the masters of Israelite slaves. It might well be a sign of the times in the later days of the monarchy that they became "very high," the "head and not the tail" of the people (Deut. xvii. 43, 44). The picture had, however, another side. They were treated by David and Solomon as a subject-class, brought (like Persecu, almost like Helots) under a system of compulsory labor from which others were exempted (1 Chr. xxii. 2; 2 Chr. ii. 17, 18). The statistics of this period, taken probably for that purpose, give their number (probably, i. e. the number of adult working males) at 150,000 (ibid.). They were subject at other times to warrant insolence and outrage (Ps. xiv. 6). As some
PROSELYTES

compensation for their sufferings they became the special objects of the care and sympathy of the prophets. One after another of the goodly fellowship" pleading the cause of the proselytes as wjnds as that of the widow and the fatherless (Jer. vi. 6, xxii. 3; Ezk. xxii. 7, 29; Zech. vii. 10; Mal. iii. 5). A large accession of converts enters into all their hopes of the Divine Kingdom (Is. ii. 2, xi. 10, xvi. 3-6; Mic. iv. 1). The sympathy of one of them goes still further. He sees, in the far future, the union of a time when the last remnants of inferiority will be removed and the proselytes completely emancipated, shall be able to hold and inherit land even as the Israelites (Ex. xxvii. 29). IV. The proselytism of the period after the Captivity assumed a different character. It was for the most part the conformity, not of a subject race, but of willing adherents. Even as early as the return from Babylon we have traces of those who were drawn to a faith which they recognized as higher than their own, and had "separated themselves" unto the law of Jehovah (Neh. x. 28). The presence of many foreign names among the Nehum (Neh. v. 46-59) leads us to believe that many of the new converts dedicated themselves specially to the service of the new Temple. With the conquests of Alexander, the wars between Egypt and Syria, the struggle under the Maca baeans, the expansion of the Roman empire, the Jews became more widely known and their power to proselytize increased. They had suffered for their religion in the persecution of Antiochus, and the spirit of martyrdom was followed naturally by propaganda. Their monotheism was rigid and unyielding. Scattered through the east and west, a marvel and a portent, wondered at and scorned, attracting and repelling, they presented, in an age of scattered creeds, and corroding doubts, the spectacle of a faith, or at least a dogma, which remained unshaken. The influence was sometimes obtained well, and exercised for good. In most of the great cities of the empire, there were men who had been rescued from idolatry and its attendant delusions, and brought under the power of a higher moral law. It is possible that in some cases the result was not satisfactory; but the influence was for the most part of the benefit, and attracted men or women who shrank from the unutterable contamination, in the midst of which they lived." The converts who were thus attracted, joined, with varying strictness (infra) in the worship of the Jews. They were present in their synagogues (Acts xii. 42, 43, 50, xvii. 4, xviii. 7). They came up as pilgrims to the great feasts at Jerusalem (Acts ii. 10). In Palest in itself the influence was often stronger and better. Even Roman citizens amongst learnt to love the converted nation, built synagogues for them (Luke vii. 5), fasted and prayed, and gave alms, after the manner of the strictest Jews (Acts x. 2, 30), and became preachers of the new faith to the soldiers under them (ibid. x. 7). Such men, drawn by what was best in Judaism, were naturally among the readiest receivers of the new truth which rolled out of it, and became, in many cases, the nucleus of a Gentile Church.      

Proselytism, however, its darker side. The Jews of Palestine were eager to spread their faith by the same weapons as those with which they had defended it. Had not the power of the Empire stood in the way, the religion of Moses, stripped of its higher elements, might have been propagated far and wide, by force, as was afterwards the religion of Mohammed. As it was, the Hasmoneans had a strong influence in the formation of the proselytes, and the Jews of Syria, Persia, and Egypt, and the Hasmoneans of death, exile, or circumcision (Joseph. Ant. xiii. 9, § 3). The Hasmoneans were converted in the same way by Aristobulus (ibid. xii. 11, § 3). In the more frenzied fanaticism of a later period, the Jews under Josephus could hardly be restrained from seizing and circumcising two chiefs of Tzachonitis who had come as envoys (Joseph. Tit. p. 23). They expelled a Roman centurion, whom they had taken prisoner, to purchase his life by accepting the sign of the covenant (Joseph. B. J. ii. 11, § 10). Where force was not in their power (the velti Judæi, cogenesis) of Her. Sot. i. 4, 142, implies that they sometimes ventured on it even at Rome), they obtained their ends by the most unscrupulous fraud. They appeared as soothsayers, diviners, exorcists, and addressed themselves especially to the fears and superstitions of women. Their influence over these became the subject of indignant satire (Juven. Sat. vi. 543-547). They persuaded noble matrons to send money and purse to the Temple (Joseph. Ant. xviii. 3, § 5). At Panamans the wives of nearly half the population were supposed to be tainted with Judaism (Joseph. B. J. ii. 10, § 2). At Rome they numbered in their ranks, in the person of Poppon, even an imperial consul (Joseph. Ant. xx. 7, § 11). The converts thus made, cast off all ties of kindness and affection (Tac. Hist. x. 9). Those who were most active in proselytizing were precisely those from whose teaching all that was most true and living had departed. The vices of the Jew were engraven on the vices of the heathen. A repulsive casti
city released the convert from obligations which he had before regarded as binding, and in other things he was bound, hand and foot, by an unhealthy superstition. It was no wonder that he became "twofold more the child of Gehenna" (Matt. xxiii. 15) than the Pharisees themselves.

The position of such proselytes was indeed very pitiable. At Rome, and in other large cities, they became the butt of popular scriemity. The word "curtus," "verpes," not them at every corner (Her. Sot. i. 4, 142; Matt. vii. 29, 34, 31, xi. 35, xii. 37). They had to share the fortunes of the people with whom they had cast in their lot, might be banished from Italy (Acts xviii. 22; Suet. Claud. p. 26), or sent to die of plague in the most unhealthy stations of the empire (Tac. Ann. ii. 85). At a later time, they were bound to make a public profession of their conversion, and to pay a special tax (Suet. Domit. xii.). If they failed to do this and were suspected, they might

a The significance of this passage in its historical connection with Ps. lxxxvii, already referred to, and the points of resemblance to the Jubilees, to the theme of the Rabbins, to the teaching of St. Paul (Eph. ii. 10), deserve a fuller notice than they have yet received.

b This influence is not perhaps to be altogether exalted. The Jews, sometimes have at times been eager to attract. Comp. Dr. Temple's "Essays on the Education of the World" (£ Essays and Reviews, p. 12)

c The Law of the Ceremonial may serve as one instance (Matt. xx. 4, 6). Another is found in the Rabbins teaching as to marriage. Circumcision, like a new birth, canceled all previous relationships, and unions within the marriage degree were therefore of longer duration (Maimon. et Joann. p. 182; Selden, de Jure Nat. et Gent. iv. 4: Uxor Ebra. ii. 181).
be subject to the most degrading examination to ascertain the fact of their being proselytes (ibid.). Among the Jews themselves their case was not much better. For the most part the convert gained but little honor even from those who gloriéd in having brought him over, and in this life he was not. The popular Jewish feeling about them was like the popular Christian feeling about a converted Jew. They were regarded (by a strange Rabbinic perversion of Is. xiv. 1) as the leprosy of Israel, "a cleaving" to the house of Jacob (Jub. 47, 1; Kibbush, 70, 6). An opprobrious proverb coupled them with the vilest prodigals ("prosel dy et panders") and the courtesans of the Mes- siah (Lightfoot, Hor. Hebr. in Matt. xxiii. 5.). It became a recognized maxim that no wise man would trust a proselyte even to the twenty-fourth generation (Jubaluth Ruth, i. 163 a.).

The better Rabbin did their best to guard against these evils. 

A. to exclude all unworthy con- verts, they grouped them, according to their moti- ves, with a somewhat quaint classification,

(1.) Love-proselytes, where they were drawn by the hope of gaining the beloved one. (The story of Syllees and Salome, Joseph. Ant. xvi. 7, § 6, is an example of a half-finished conver- sion of this kind.)

(2.) Man-for-Woman, or Woman-for-Man prosely- tes, where the husband followed the religion of the wife, or conversely.

(3.) Esther-proselytes, where conformity was as- sumed to escape danger, as in the original Purim (Esth. viii. 17).

(4.) Malice-sorcer-proselytes, who were led by the hope of court favor and promotion, lie the converts under David and Solomon.

(5.) Lion-proselytes, where the conversion orig- inated in a superstitions dread of a divine Judgment, as with the Samaritans of 2 K. xvii. 29.

(Gem. Il.eros. Kibbush. 65, 6; Jost, Jucaluth. i. p. 448.) None of these were regarded as fit for admission within the covenant. When they met with one with whose motives they were satisfied, he was put to a yet further ordeal. He was warned that in becoming a Jew he was attaching himself to a people that in this world he must not expect only suffering, and to look for his reward in the next. Sometimes these cautions were in their turn carried to an extreme, and amounted to a policy of exclusion. A protest against them on the part of a disciple of the Great Hillel is recorded, which throws across the dreary rubbish of Rabbin- ism the momentary gleam of a noble thought. "Our wise men teach," said Simeon ben Gamaliel, "that when a heathen comes to enter into the covenant, our part is to stretch out our hand to him and to bring him under the wings of God" (Jost, Jucaluth. i. 447).

Another mode of meeting the difficulties of the case was characteristic of the period. Whether we may transfer to it the full formal distinction between Proselyte and the Gates and Proselytes of Righteousness (infra) may be doubtful enough, but we find two distinct modes of thought, two distinct policies in dealing with converts. The history of Helena, queen of Adiabene, and her son zates, presents the two in collision with each other. They had been converted by a Jewish merchant, Ananias, but the queen feared lest the circumcision of her son should disquiet and alarm her subjects. Ananias assured her that it was not necessary. Her son might worship God, study the Law, keep the commandments, without it. Soon, however, a stricter teacher came, Eleazar of Galilee. Find- ing Zates reading the Law, he told him sternly that it was of little use to study that which he disobeyed, and so worked upon his fears, that the young devotee was eager to secure the safety of which his circumcision had deprived him (Joseph. Ant. xx. 2, § 5; Jost, Jucaluth. i. 311.). On the part of some, therefore, there was a disposition to dispense with what others looked on as indis- pensable. The censure of Luke vii. (probably) and Acts v. is highly similar to the Hellenes of John xi. 6) and Acts xii. 42 are instances of men admitted on the former footing. The phrases ο προσφυγον προσκυνητος (Acts vii. 43), ο συμμετοχης (xvii. 1endash; 17; Joseph. Ant. xiv. 7, § 2), υδρας ελφεινων (Acts ii. 5, vii. 2) are often, but inaccurately, sup- posed to describe the same class—the Proselytes of the Gate. The probability is, either that the terms were used generally of all converts, in which case with a specific meaning, were applied to the full Proselytes of Righteousness (comp, a full examination of the passages in question by N. Lardner, On the Decree of Acts xv.: Works xi. 305). The two tendencies were, at all events, at work, and the battle between them was renewed afterwards on holier ground and on a wider scale. Ananias and Eleazar were represented in the two parties of the Council of Jerusalem. The germ of truth had been quickened into a new life, and was emancipating itself from the old thraldom. The decrees of the Council were the solemn assertion of the principle that believers in Christ were to stand on the footing of Proselytes of the Gate, not of Prosely- tes of Righteousness. The teaching of St. Paul as to righteousness and its conditions, its depend- ence on faith, its independence of circumcision, stands out in sharp clear contrast with the teachers who taught that that rite was necessary to salvation, and confined the term "righteousness" to the circumcised convert.

V. The teachers who carried on the Rabbinical succession consol'd themselves, as they saw the new order waxing and their own glory waning, by developing the decaying system with an almost microscopic minuteness. They would at least transmit to future generations the full measure of the religion of their fathers. In proportion as they ceased to have any power to proselytize, they dwelt with exhaustive fullness on the question how proselytes were to be made. To this period accordingly belong the rules and decisions which are often carried back to an earlier age, and which may now be conveniently discussed. The precepts of the Talmud may indicate the practices and opinions of the Jews from the 2d to the 5th century. They are very untrustworthy as to any earlier time. The points of interest which present themselves for inquiry are, (1.) The classification of Proselytes. (2.) The ceremonies of their admission.

The division which has been in part anticipated, was recognized by the Talmudic Rabbis, but re- ceived its full expansion at the hands of Ma- monides (Hilfe. Mel. i. 6). They claimed for it a remote antiquity, a divine authority. The term Proselytes of the Gate (יִשְׂרָאֵל), was derived from the frequently occurring description in the Law, "the stranger (נָתיִתָמ) that is within thy gates" (Ex. xx. 10, &c.). They were known also as the
Proselytes

They were referred to as the "strangers." The Targums of Onkelos and Jonathan give this as their place in the Talmud. Although no Hebrews of this class were bound by circumcision and the other special laws of the Mosaic code, it was enough for them to observe the seven precepts of Noah (Otho, Lex. Rabb., "Noachida:"

Selden, De Jure Nat. et Gent. l. 10), i.e., the six supposed to have been given to Adam, (1) against idolatry, (2) against blasphemy, (3) against bloodshed, (4) against uncleanness, (5) against theft, (6) of obedience, with (7) the prohibition of the flesh with the blood thereof given to Noah. The proselyte was not to claim the privileges of an Egyptian. He might elect to be circumcised or to pay the half-circumcision (Leyer, ut infra).

He was forbidden to study the law under pain of death (Otho, l. c.). The latter rabbis, when Jerusalem had passed into other hands, held that it was unlawful for him to reside within the holy city (Maimon. Beth-hecde, xii. 14). In return they allowed him to offer whole burnt-offerings for the priest to sacrifice, and to contribute money to the Temple of the House. They held out to him the hope of a place in the paradise of the world to come (Leyer). They insisted that the profession of his faith should be made solemnly in the presence of three witnesses (Maimon. Hite, M. l. viii. 10). The jubilee was the proper season for his admission (Müller, De Pros. in Ugoiini xii. 841).

All this seems so full and precise, that we cannot wonder that it has led many writers to look on it as representing a reality, and most commentators accordingly have seen these Proselytes of the Gate in the σήμειον, εὐαγγέλιον, φωνήματος τοῦ Θεοῦ of the Acts. It remains doubtful, however, whether it was ever more than a paper scheme of what ought to be, disguising itself as having actually been. The writers who are most full, who claim for the distinction the highest antiquity, confess that there had been no Proselytes of the Gate since the Two Tribes and a half had been carried away into captivity (Maimon. Hite. Mel'. i. 6). They could only be admitted at the jubilee, and it is probable that since then they had been extinct (Müller, l. c.). All that can be said, therefore, is, that in the time of the N. T. we have independent evidence (ut supra) of the existence of converts of two degrees, and that the Talmudic division is the formal systematization of an earlier fact. The words "proselyte," and ὁ σήμειον τοῦ Θεοῦ, were, however, in all probability limited to the circumcised.

In contrast with these were the Proselytes of Righteousness (p. 317, p. 316), known also as Proselytes of the Covenant, perfect Israelites. By some writers the Talmudic phrase proselytmi tacht (פֹּלֶשׁ לְתָכֶם) is applied to them as drawn to the covenant by spontaneous conviction (Buxtorf, Lerei. s. v., while others (Kimchi) refer to those who were constrained to conformity, like the Gibonites. Here also we must receive what we find with the same limitation as before. All seem at first clear and definite enough. The proselyte was first catechized as to his motives (Maimon. ut supra). If these were satisfactory, he was first instructed as to the Divine protection of the Jewish people, and then circumcised. In the case of a convert already circumcised (a Midianite, e. g. or an Egyptian), it was still necessary to draw a few drops of the blood of the covenant (Gen. Exek. 21:21). A special prayer was appointed to accompany the act of circumcision. Often the proselyte took a new name, opening the Hebrew Bible and accepting the first that came (Leyer, ut infra).

All this, however, was not enough. The convert was still a stranger. His children would be counted as bastards, i.e. aliens. Baptism was required to complete his admission. When the wound was healed, he was stripped of all his clothes, in the presence of the three witnesses who had acted as his teachers, and who now acted as his sponsors, the "fathers" of the proselyte (Kebrabi, ed. Erdb. xv. 1), and led into the tank of water. As he stood there, up to his neck in water, they repeated the great commandments of the Law. These he promised and vowed to keep, and then, with an accompanying benediction, he plunged under the water. To leave one hand-breadth of his body unsubmerged would have vitiated the whole rite (Otho, Lex. Rabb., "Baptismus;" Reisk. De Bapt. Pros. in Ugoiuni xxii.). Strange as it seems, this part of the ceremony occupied, in the eyes of the later rabbis, a coordinate place with circumcision. The latter was incomplete without it, for baptism was of the fathers (Gen. Rab. 461. 2). One Rabbis appears to have been bold enough to declare baptism to have been sufficient by itself (ibid); but for the most part, both were reckoned as alike indispensable. They carried back the origin of the baptism to a remote antiquity, finding it in the command of Noah (Gen. xxiv. 2) and of Moses (Ex. xix. 10). The Targum of the Pseudo-Jonathan inserts the word "Thou shalt circumcise and baptize" in Ex. xii. 44. Even in the Ethiopic version of Matt. xxiii. 15, we find "compass sea and land to baptize one proselyte" (Winer, Redb. s. v.). Language foreshadowing, or caricaturing, a higher truth was used of this baptism. It was a new birth (ibid. f. 62 1; 92 1; Maimon. Issur. Redb. c. 14; Lightho. Hist. of the Jews, iii. 14; Leyer, on John iii.), the proselyte became a little child. He received the Holy Spirit (ibid. f. 22 a; 48 b). All natural relationships, as we have seen, were canceled.

The baptism was followed, as long as the Temple stood, by the offering or i. oron. It consisted, like the offerings after a birth (the analogy apparently being carried on), of two turtle-doves or pigeons (Lev. xi. 8). When the destruction of Jerusalem made the sacrifice impossible, a vow to offer it as soon as the Temple should be rebuilt was substituted. For women-proselytes, there were only baptism and the Torah, or, in later times, baptism by itself.

It is obvious that this account suggests many questions of grave interest. Was there this ritual observed as early as the commencement of the first century? If so, was the baptism of John, or that a This thought probably had its starting-point in the language of Ps. xxxvii. There also the proselytes of Babylon and Egypt are registered as "born" in Zion.

b The Galilean female proselytes were said to have objected to this, as causing barrenness (Winer, Redb.).
of the Christian Church in any way derived from, or connected with the baptism of proselytes? If not, what is the latter in any way borrowed from the former?

It would be impossible here to enter at all into the literature of this controversy. The list of works named by Leyrer occupies nearly a page of Herzog's Real-Encyclopädie. It will be enough to sum up the conclusions which seem fairly to be drawn from them.

(1) There is no direct evidence of the practice being in use before the destruction of Jerusalem. The statements of the Talmud as to its having come from the fathers, and their exegesis of the O. T. in connection with it, are alike destitute of authority.

(2) The negative argument drawn from the silence of the O. T., of the Apocrypha, of Philo, and of Josephus, is almost decisive against the belief that there was in their time a baptism of proselytes, with as much importance attached to it as we find in the Talmudists.

(3) It remains probable, however, that there was a baptism in use at a period considerably earlier than that for which we have direct evidence. The symbol was in itself natural and fit. It fell in with the disposition of the Pharisees and others to wash hands and douse washings (Santuario, Mark viii. 4) of all kinds. The tendency of the later Rabbis was rather to keep together the customs and traditions of the past than to invent new ones. If there had not been a baptism, there would have been no initiatory rite at all for female proselytes.

(4) The history of the N. T. itself suggests the existence of such a custom. A sign is seldom chosen unless it already has a meaning for those to whom it is addressed. The fitness of the sign in this case would be in proportion to the associations already connected with it. It would bear witness, on the assumption of the previous existence of the proselyte-baptism, that the change from the then condition of Judaism to the kingdom of God was as great as that from idolatry to Judaism. The question of the Priests and Levites, "Why baptizedst thou then?" (John i. 25), implies that they wondered, not at the thing itself, but at its being done for Israelites by one who disclaimed the names which, in their eyes, would have justified the introduction of a new order. In like manner the words of our Lord to Nicodemus (John iii. 10) imply the existence of a teaching as to baptism like that above referred to. He, "the teacher of Israel," had been familiar with "these things" — the new birth, the gift of the Spirit — as words and phrases applied to heathen proselytes. He failed to grasp the deeper truth which lay beneath them, and to see that they had a wider, a universal application.

(5) It is, however, not improbable that there may have been a reflex action in this matter, from the Gentile Church towards the Jewish Church. The Rabbis saw the new society, in proportion as the Gentile element in it became predominant, throwing off circumcision, relying on baptism only. They could not ignore the reverence which men had for the outward sign, their belief that it was all but identical with the thing signified. There was everything to lead them to give a fresh prominence to what had been before subordinate. If the Nazarenes attracted men by their baptism, they would show that they had baptism as well as circumcission. The necessary absence of the Corban after the destruction of the Temple would also tend to give more importance to the remaining rite.

Two facts of some interest remain to be noticed.

(1) It formed part of the Rabbinic hopes of the kingdom of the Messiah that then there should be no more proselytes. The distinctive name, with its brand of inferiority, should be laid aside, and all, even the Nethinim and the Manaszehren (children of foreigners) should be counted pure (Schoettgen, Hor. Heb. ii. p. 614). (2) Partly, perhaps, as connected with this feeling, partly in consequence of the ill repute into which the word had fallen, there is, throughout the N. T., a sedulous avoidance of it. The Christian convert from heathenism is not a proselyte, but a μεταφορος (1 Tim. iii. 8).

Literature. — Information more or less accurate is to be found in the Archeologiae of John Carpzov, Saalschütz, Levis, Lassilren. The treatises cited above in Uglolin's Theologen, xxii.: Slevogt, Proselytis; Müller, de Proselytis; Reisk, de Bap. Juventae; Danz, Bap. Proselytis, are all of them copious and interesting. The article by Leyrer in Herzog's Real-Encyclop. s. v. "Proselyten," contains the fullest and most satisfying discussion of the whole matter at present accessible. The writer is indebted to it for much of the materials of the present article, and for most of the Talmudic references.

E. H. P. * For "religious" applied to "proselytes," (A. V.) Acts xiii. 43, the Greek has σεβασμός, "worshiping," of God and not idols as formerly. The English reader might suppose that some of these proselytes were meant to be distinguished as more religious than others. The same Greek term (ver. 50) describes the "heathen" (called "devout" in the A. V.) as Jewish converts, and thus explains why the Jews could so easily instigate them (being at the same time wives of the chief men") to persecute Paul and Barnabas, and drive them from the city. The same Greek term in Acts xvi. 4 and 17 ("devout," A. V.) states simply that the Greeks spoken of at Thessalonica and Athens had been Jewish proselytes, who had chosen their conversion to Christianity.

On this use of σεβασμός as thus definite without an object, see Cramer's Wörterb. der Neutest. Gräcidait, ii. 476 (1868). The Jewish proselytes who embraced the gospel formed the principal medium through which Christianity passed to the Gentile races. See also the addition to SYNAGOGUES (Amer. ed.).

II.

PROVERBS, BOOK OF. 1. Title. — The title of this book in Hebrew is, as usual, taken from the first word, נבפפ ניibi, "wishe, or, more fully, נבפפ ניibi שסלהמ. and is in this case appropriate to the contents. By this name it is commonly known in the Talmud: but among the later Jews, and even among the Talmudists themselves, the title נבפפ ניibi ליפון, sapheh choceim, "book of wisdom," is said to have been given to it. It does not appear, however, from the passages of the Tosephoth to the Eben Ebreim (fol. 14 b), that this is necessarily the case. All that is there said is that the books of Proverbs and Ecclesiastes are both "books of wisdom," with a reference rather to their contents than to the titles by which they were known. In the early Christian Church the title παιδεία σεβασμίων was adopted from the translation of the LXX.; and the book is also

PROVERBS, BOOK OF.
The title of the Vulgate is Liber Proverberum, quae Hebraei Mide appellarent.

The significance of the Hebrew title may here be appropriately discussed. נַחַל, rendered in the A. V. "by-word," "parable," "proverb," expresses all and even more than is conveyed by these its English representatives. It is derived from a root, נַחַל, "to be like," and the primary idea involved in it is that of likeness, comparison. This form of comparison would very naturally be taken by the short pithy sentences which passed into use as popular sayings and proverbs, especially when employed in mockery and sarcasm, as in Mic. ii. 4. Hab. ii. 6, and even in the more developed taunting song of triumph for the fall of Babylon in Is. xiv. 4. Probably all proverbial sayings were at first of the nature of similes, but the term נַחַל soon acquired a more extended significance. It was applied to denote such short, pointed sayings, as do not involve a comparison directly, but still convey their meaning by the help of a figure, as in Is. xii. 1. Ez. xiii. 22, 23. xvi. 2. 2 (comp. פָּרָוּד, Luke iv. 23).

From this stage of its application it passed to that of sententious maxims generally, as in Prov. i. 1, x. 1, xxv. 1, xxvi. 7, 9, Ezcl. xii. 9, Job xii. 10, many of which, however, still involve a comparison (Prov. xxv. 3, 11, 12, 13, 14, 16, xvi. i. 2, 3, 14). Such comparisons are either expressed, or the things compared are placed side by side, and the comparison left for the hearer or reader to supply. Next we find it used of those longer pieces in which a single idea is no longer exhausted in a sentence, but forms the germ of the whole, and is worked out into a didactic poem. Many instances of this kind occur in the first section of the Book of Proverbs; others are found in Job, xxviii., xxix., in both which chapters Job takes up his נַחַל or "parable," as it is rendered in the A. V. The "parable" of Balaam, in Num xxiii. 7-10, xxiv. 3-9, 15-19, 20, 21-22, 21-24, are prophecies concealed in figures; but נַחַל also denotes the "parable" proper, as in Ez. xvii. 2, xx. 49 (xxi. 5), xxiv. 3. Louth, in his notes on Is. xiv. 4, speaking of נַחַל, says: "I take this to be the general name for poetic style among the Hebrews, including every sort of it, as ranging under one, or other, or all of the characters, of sententious, figurative, and sublime; which are all contained in the original notion, or in the use and application of the word נַחַל. Parables or proverbs, such as those of Solomon, are always expressed in short, pointed sentences; frequently figurative, being formed on some comparison, both in the matter and the form. And such in general is the style of the Hebrew poetry. The verb נַחַל signifies to rule, to exercise authority; to make equal, to compare one thing with another; to utter parables, to utter weighty, and powerful speeches, in the form and manner of parables, though not properly such. Thus Balaam's first prophecy. Num. xxiii. 7-10, is called his נַחַל; though it has hardly anything figurative in it: but it is beautifully sententious, and, from the very form and manner of it, has great spirit, force, and energy. Thus Job's last book of Proverbs, according to the introductory verses which describe its character, contains, besides several varieties of the נַחַל, sententious sayings of other kinds, mentioned in i. 6. The first of these is the נַחַל, נַחַל, rendered in the A. V. "dark saying," "dark speech," "hard question," "riddle," and once (Hab. ii. 6) "proverb." It is applied to Samson's riddle in Judg. xiv., to the hard questions with which the queen of Sheba plied Solomon (1 K. x. 1; 2 Chr. ix. 1), and is used almost synonymously with נַחַל in Ez. xix. 2, and in Is. xiii. 4 (5), lviii. 2, in which last passages the poetical character of both is indicated. The word appears to denote a kind of didactic saying, the solution of which demanded experience and skill: that it was obscure is evident from Num. xiii. 8. In addition to the נַחַל was the נַחַל, נַחַל (Prov. i. 6, A. V. "the interpretation," marg. "an elegant speech"), which occurs in Hab. ii. 6 in connection both with נַחַל and נַחַל. It has been variously explained as a mock- ing, taunting speech (wałd); or a speech dark and involved, such as needed a נַחַל, or interpreter (cf. Gen. xii. 23; 2 Chr. xxxii. 31; Job xxii. 23; Is. xiii. 27); or again, as by Delitzsch (Der proph. Jesaia, B. B. 1870, p. 59), or a brilliant saying (a προφητικός, εὔανωμος, καὶ εὐανῶμος ῥητορα). This last interpretation is based upon the usage of the word in modern Hebrew, but it certainly does not appear appropriate to the Proverbs; and the first explanation, which Vallad adopts, is as little to the point. It is better to understand it as a dark enigmatical saying, which, like the נַחַל, might assume the character of sarcasm and irony, though not essential to it.

2. Canonicality of the book and its place in the Canon. — The canonicity of the Book of Proverbs has never been disputed except by the Jews themselves. It appears to have been one of the points urged by the school of Shammai, that the contradictions in the Book of Proverbs rendered it apocryphal. In the Talmud (Shabbath, fol. 30 b) it is said: 'And even the Book of Proverbs they sought to make apocryphal, because its words were contradictory one to the other. And wherefore did they not make it apocryphal? The words of the book Koheloth [are] not [apocryphal] we have
PROVERBS, BOOK OF

looked and found the sense; here also we must look." That is, the book Koheleth, in spite of the apparent absence of Job, by which it was thought to be canonical, and therefore the existence of similar contradictions in the Book of Proverbs forms no ground for refusing to acknowledge its canonicity. It occurs in all the Jewish lists of canonical books, and is reckoned among what are called the "writings" (Cohênūm) or Hagiographa, which form the third great division of the Hebrew Scriptures. Their order in the Talma (Bab. Rabb., fol. 14 b) is thus given: Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Songs, Lamentations, Daniel, Esther, Ezra (including Nehemiah), and Chronicles. It is in the Tosepeth on this passage that Proverbs and Ecclesiastes are styled "books of wisdom." In the German MSS. of the Hebrew O. T. the Proverbs are placed between the Psalms and Job, while in the Spanish MSS., which follow the Masorah, the order is, Psalms, Job, Proverbs. This latter is the order observed in the Alexandrian MS. of the L.XX. Melito, following another Greek MS., arranges the Hagiographa thus: Psalms, Proverbs, Ecclesiastes, Song of Songs, Job, as in the list made out by the Council of Toledo; and the same order is given by Origen, except that the Book of Job is separated from the others by the prophetic book, Jeremiah, and the Apocrypha. But our present arrangement existed in the time of Jerome (see Pref. in libr. Regum iii.); "Ter- tius ordo αὐτογράφοι possidet. Et primus liber incipit ab Job. Secundus a David. . . . Tertius est Solomon, tres libros habet: Proverbia, que illi parabolod, id est Masaloth appellant: Ecclesiastes, id est, Coeloth: Canticum Canticorum, quem tituló Sir Asrim praeontat "); In the Peshito Syriac, Job is placed before Joshua, while Proverbs and Ecclesiastes follow the Psalms, and are separated from the Song of Songs by the Book of Ruth. Gregory of Nazianzus, apparently from the exigencies of his verse, arranges the writings of Solomon in this order, Ecclesiastes, Song of Songs, Proverbs. Pseudo-Epiphanius places Proverbs, Ecclesiastes, and Song of Songs between the 1st and 2nd Books, and before Joshua, while Orosius places the Proverbs. The Proverbs are frequently quoted or alluded to in the New Testament, and the canonicity of the book thereby confirmed. The following is a list of the principal passages:—

Prov. i. 16 compare Rom. iii. 10, 15.
iii. 7 " Rom. xii. 16.
iii. 11, 12 Heb. xii. 5, 6; see also Rev. iii. 19.

xxv. 21, 22 Rom. vii. 29.
xxvi. 11 2 Pet. ii. 22.
xxvii. 1 Jam. iv. 13, 14.

3. Authorship and date. — The superscriptions which are affixed to several portions of the Book of Proverbs, in i. 1, x. 1, xxv. 1, attribute the authorship of those portions to Solomon, the son of David, king of Israel. With the exception of the last two chapters, which are distinctly assigned to other authors, it is probable that the statement of the superscriptions is in the main correct, and that the majority of the proverbs contained in the book were uttered or collected by Solomon. It was natural, and quite in accordance with the custom of other nations, that the Hebrews should connect Solomon's name with a collection of maxims and precepts which form a part of their literature to which he is known to have contributed most largely (1 K. iv. 32). In the same way the Greeks attributed most of their maxims to Pythagoras; the Arabs to Lokman, Abu Obeid, Al Motafeld, Mei- dani, and Zarkashkari; the Persians to Farid Attar; and the northern people to Odin. But there can be no question that the Hebrews were much more justified in assigning the Proverbs to Solomon, than the nations which have just been enumerated were in attributing the collections of national maxims to the traditional authors above mentioned. The parallel may serve, but must not be carried too far. According to Bartolocci (Bibl. Robb. iv. 373 b), quoted by Carpzov (Introd. pt. ii. c. 4, § 4), the Jews ascribe the composition of the Song of Songs to Solomon's youth, the Proverbs to his mature manhood, and the Ecclesiastes to his old age. But in the Seder Olam Rabbah (ch. xv. p. 41, ed. Meyer) they are all assigned to the end of his life. There is nothing unreasonable in the supposition that Solomon, or even his son, included in the prophetic books, contributed to the proverbs, which consist of nine chapters may have originated with Solomon. Whether they were left by him in their present form is a distinct question, and may now be considered. Before doing so, however, it will be necessary to examine the different parts into which the book is naturally divided. Speaking roughly, it consists of three main divisions, with two appendices. 1. Chaps. i.—ix. form a connected mizhahd, in which Wisdom is praised on the young, and is exhorted to devote themselves to her. This portion is preceded by an introduction and title describing the character and general aim of the book. 2. Chaps. x. 1—xxiv., with the title, "The Proverbs of Solomon," consist of three parts: x. 1—xxii. 16, a collection of single proverbs, and detached sentences out of the region of moral teaching and instruction; xxii. 17—xxiv. 22, with the introduction xxiv. 1—17, connected mizhahd, with an introduction, xxiv. 17—22, which contains precepts of righteousness and prudence: xxiv. 23—34, with the inscription, "these also belong to the wise," a collection of unconnected maxims, which serve as an appendix to the preceding. Then follows the third division, xxv.—xxxix., which, according to the superscription, professes to be a collection of Solomon's proverbs, consisting of single sentences, which the men of the court of Hezekiah copied out. The first appendix, ch. xxx., "the words of Agur," is a collection of partly proverbial and partly enigmatical sayings; the second, ch. xxxi., is divided into two parts, "the words of king Lemuel" (1—6), and an alphabetical acrostic in praise of a virtuous woman, which occupies the rest of the chapter. Rejecting, therefore, for the present, the middle last chapter, which do not even belong under the general head mizhahd. The collection of Solomon's proverbs made by the men of Hezekiah (xxv—xxxix.) belongs to the former class of detached
PROVERBS, BOOK OF

sions, and in this respect corresponds with those in the second main division (x.1-xiii.16). The expression in xvi.1, "these also are the proverbs of Solomon," implies that the collection was made as an appendix to another already in existence, which we may not unreasonably presume to have been that which stands immediately before it in the present arrangement of the book. From one point to another critics are agreed, that the germ of the book in its present shape is the portion x.1-xiii.16, to which is prefixed the title, "the Proverbs of Solomon." At what time it was put into the form in which we have it, cannot be exactly determined. Ewald suggests as a probable date about two centuries after Solomon. The collector gathered many of that king's genuine sayings, but must have mixed with them many by other authors and from other times, earlier and later. It seems clear that he must have lived before the time of Hezekiah, from the expression in xxv.1, to which reference has already been made. In this portion many proverbs are repeated in the same, or a similar form, a fact which of itself militates against the supposition that all the proverbs contained in this portion were collected by one author. Concerning xiv.12 and xvi.26 and xxii.2; xi.9 with xvi.19; x.1 with xv.20; x.2 with xi.4; x.15 with xvii.11; xx.33 with xviii.12; xi.21 with xvi.5; xiv.31 with xvii.5; xii.14 with xx.2. Such repetitions, as Berthold remarks, we do not expect to find in a work which proceeds immediately from the hands of its author. But if we suppose the contents of this portion of the book to have been collected by one man out of diverse sources, oral as well as written, the repetitions become intelligible. Berthold argues that many of the proverbs could not have proceeded from Solomon, because they presuppose an author different in circumstances from his. His arguments are extremely weak, and will scarcely bear examination. For example, he asserts that the author of x.5, xii.10, xiv.4, xx.4, must have been a landowner or husbandman; that x.15 points to a man living in want; xi.14, xiv.26, to a private man living under a well-regulated government; xi.26, to a tradesman without wealth; xii.4, to a man not living in polygamy; xii.9, to one living in the country; xii.7, xvi.8, to a man in a middle station of life; xiv.1, xv.23, xvi.11, xvii.2, xiii.14, xii.10, xiv.23, to a man of the rank of a citizen; xiv.21, xiv.23, to a man of low station; xiv.10, 12-15, xiv.12, xx.2, 26, 28, to a man who was not a king; xii.5, to one who was acquainted with the course of circumstances in the common citizen life; xii.17, to one who was an enemy to luxury and fashilities. It must be confessed, however, that an examination of these passages is by no means convincing to one who reads them without having a definite aim to maintain. All the proverbs in this collection are not Solomon's, and he of the major by them there seems no reason to doubt, and this fact would account for the general title in which they are all attributed to him. It is obvious that between the proverbs in this collection and those that precede and follow it, there is a marked difference, which is sufficiently apparent even in the English Version. The poetical style, says Ewald, is the simplest and most antique imaginable. Most of the proverbs are examples of aesthetic parallelism, the second clause containing the contrast to the first. Each verse consists of two members, with generally three or four, but seldom five words in each. The only exception to the first law is xix.7, which Ewald accounts for by supposing a clause omitted. This supposition may be necessary to his theory, but cannot be admitted on any true principle of criticism. Furthermore, the proverbs in this collection have the peculiarity of being contained in a single verse. Each verse is complete in itself, and embodies a perfectly intelligible sentiment; but a thought in all its breadth and definiteness is not necessarily exhausted in a single verse, though each verse must be a perfect sentence, a proverb, a lesson. There is one point of great importance which Ewald draws attention in connection with this portion of the book; that it is not to be regarded, like the collections of proverbs which exist among other nations, as an accumulation of the popular maxims of lower life which passed current among the people and were gathered thence by a learned man; but rather as the efforts of poets, artistically and scientifically arranged, to comprehend in short sharp sayings the truths of religion as applied to the infinite cases and possibilities of life. While admitting, however, the poetical and scientific element in this portion of the book, it is difficult to asss it to Ewald's further theory, that the collection in its original shape had running through it a continuous thread, binding together what was manifold and scattered, and that in this respect it differed entirely from the form in which it appears at present. Here and there, it is true, we meet with verses grouped together apparently with a common object, but these are the exceptions, and a rule so general cannot be derived from them. No doubt the original collection of Solomon's proverbs, if such there were, from which the present was made, underwent many changes, by abbreviation, transposition, and interpolation, in the two centuries which, according to Ewald's theory, must have elapsed before the compiler of the present collection put them in the shape in which they have come down to us; but evidence is altogether wanting to show what that original collection may have been, or how many of the three thousand proverbs which Solomon is said to have spoken, which have been preserved. There is less difficulty in another proposition of Ewald's, to which a ready assent will be yielded; that Solomon was the founder of this species of poetry; and that in fact many of the proverbs collected may be traced back to him, while all are inspired with his spirit. The peace and internal tranquillity of his reign were favorable to the growth of a contemplative spirit, and it is just at such a time that we should expect to find gnomic poetry developing itself and forming an epoch in literature.

In addition to the distinctive form assumed by the proverbs of this earliest collection, may be noticed the occurrence of favorite and peculiar words and phrases. "Fountain of life" occurs in Prov. x.11, xiii.14, xiv.27, xvi.22 (comp. Ps. xxxvi.9 [10]); "tree of life." Prov. x.30, xiii.12, xiv.4 (comp. lli.18); "snare of death." Prov. xii.11, xiv.27 (comp. Ps. xviii.5 [6]); "wrep", "healing, health." Prov. xii.18, xiii.17, xiv.21 (comp. xiii.30, xiv.4), but this expression also occurs in xvi.22, xvi.15 (comp. lli.8), and it is hardly to be regarded as peculiar to the other portion of the book; nor is it fair to say that the passages in the earlier chapters in which it occurs are imitations; "aol, mecbuth, destruction," Prov. x.14, xiv.29, xiii.3, xiv.28, xii.7, xii.15.
and nowhere else in the book; המים, gigi+hk, which Ewald calls a participle, but which may be regarded as a future with the relative omitted, Prov. xii. 17, xiv. 5, 25, xix. 5, 9 (comp. vi. 19); הים, sepeh, "perverseness," Prov. xi. 3, xv. 4; שיבת, stilfipb, the verb from the preceding, Prov. xii. 6, xiii. 12; הים, b★ yamkh, "shall not be acquitted," Prov. xi. 21, xvi. 5, xvi. 5, xvi. 5, 9 (comp. vi. 23, xxviii. 20); יים, rîd-<pseph, "pursued," Prov. xi. 19, xii. 11, xiii. 21, xix. 9, 7 (comp. xxviii. 19). The antique expressions בזיפרג, יים, "ad argath, A. V., "but for a moment," Prov. xii. 19; יים יים, yeled legol, lit. "hand to hand," Prov. xi. 21, xvi. 5; יים יים, לוחיתלַָתְלָה, "meddled with," Prov. xiv. 18, xiv. 1, xiii. 3; יים, nirgam, "whisperer, talebearer," Prov. xvi. 28, xviii. 8 (comp. xxv. 20, 22), are almost confined to this portion of the Proverbs.

There is also the peculiar usage of יים, yish, "there is," in Prov. xi. 24, xii. 18, xii. 7, 23, xiv. 12, xiv. 25, xviii. 24, xx. 15. It will be observed that the use of these words and phrases by no means assists in determining the authorship of this section, but gives it a distinctive character.

With regard to the other collections, opinions differ widely both as to their date and authorship. Ewald places next in order chaps xxv.-xxxi., the superscription to which fixes their date about the end of the 6th century B.C. "These also are the proverbs of Solomon, which the men of Hezekiah copied out," or "compiled." The memory of these learned men of Hezekiah's court is perpetuated in Jewish tradition. In the Talmud (Baba Bathra, fol. 15 a) they are called the יים יים יים, "society" or "academy" of Hezekiah, and it is there said, "Hezekiah and his academy wrote Ishih, Proverbs, Song of Songs, Ecclesiastes." I. Geßlah (Shabbe'ath Habbababoh, fol. 60 b), quoted by Carpus (Vetus. part. ii. 4, 4 §), says, "Ishih wrote them as they were, and Ishih, the Song of Songs, and Ecclesiastes." Many of these proverbs in this collection are mere repetitions, with slight variations, of some which occur in the previous section. Compare, for example, xxv. 24 with xxi. 9; xvi. 13 with xxii. 13; xxiv. 15 with xiv. 24; xxvi. 22 with xxviii. 5; xxvii. 13 with xx. 16; xxvii. 15 with xiv. 10; xxvii. 21 with xvi. 3; xxviii. 6 with xiv. 1; xxviii. 10 with xii. 11; xxvii. 22 with xv. 18, &c. We may infer from this, with Bertheau, that the compilers of this section made use of the same sources from which the earlier collection was derived. Hitzig (Die Sprache Solomon's, p. 258) suggests that there is a probability that a great, or the greatest part of these proverbs were of Ephrainitic origin, and that after the destruction of the northern kingdom, Hezekiah sent his learned men through the land to gather together the fragments of literature which remained current among the people and had survived the general wreck. There does not appear to be the slightest ground, linguistic or otherwise, for this hypothesis, and it is therefore properly rejected by Bertheau. The question now arises, in this as in the former section; were all these proverbs Solomon's? Jahn says Yes; Bertheau, No; for xxv. 2-7 could not have been by Solomon or any king, but by a man who had lived for a long time at a court. In xxvii. 11, it is no monarch who speaks, but an instructor of youth; xxviii. 16 enumerates the very errors which stained the reign of Hezekiah and the effect which he desired to preserve his son and successor of the ten tribes; xxvii. 23-27 must have been written by a sage who led a nomad life. There is more force in these objections of Bertheau than in those he advanced against the previous section. Hengler (quoted by Bertheau) finds two or three sections in this division of the book, which he regards as extracts from as many different writings of Solomon. But Bertheau confesses that his arguments are not convincing.

The peculiarities of this section distinguish it from the older proverbs in x.-xxvi. 16. Some of these may be briefly noted. The use of the interrogation "seest thou?" in xxvi. 12, xxix. 20 (comp. xxix. 29), the manner of comparing two things by simply placing them side by side and connecting them with "and," "and," as in xxv. 11, xxv. 19, xxvi. 3, 7, 9, 21, xxvii. 15, 20. We miss the pointed antithesis by which the first collection was distinguished. The verses are no longer of two equal members; one member is frequently shorter than the other, and sometimes even the verse is extended to three members in order fully to exhaust the thought. Sometimes, again, the same verse is extended over two or more verses, as in xx. 4-5, 6, 7, 8-10; and in a few cases a series of connected verses contains longer exhortations to morality and rectitude, as in xxvi. 23-28, xxvii. 23-27. The character of the proverbs is clearly distinct. Their construction is looser and weaker, and there is no longer that sententious brevity which gives weight and point to the proverbs in the preceding section. Ewald thinks that in the context of this portion of the book there are traceable the marks of a later date; pointing to a state of society which had become more dangerous and hostile, in which the quiet domestic life had reached greater perfection, but the state and public security and confidence had sunk deeper. There is, he says, a cautious and mournful tone in the language when the rulers are spoken of; the breath of that untroubled joy for the king and the high reverence which he marked the former collection, does not animate these proverbs. The state of society at the end of the 8th century B.C., with which we are thoroughly acquainted from the writings of the prophets, corresponds with the condition of things hinted at in the proverbs of this section, and this may therefore, in accordance with the superscription, be accepted as the date at which the collection was made. Such is Ewald's conclusion. It is true we know nothing of the later times of the monarchy, and that the condition of those times was such as to call forth many of the proverbs of this section as the result of the observation and experience of their authors, but it by no means follows that the whole section partakes of this later tone; or that many or most of the proverbs may not reach back as far as the time of Solomon, and that the general tone which is given to the section, "These also are the proverbs of Solomon." But of the state of society in the age of Solomon himself we know so little, everything belonging to that period is encircled with such a halo of dazzling splendor, in which the people almost disappear, that it is impossible to assert that the circumstances of the times might not have given birth to many of the maxims which
apparently carry with them the marks of a later period. At best such reasoning from internal evidence is uncertain and hypothetical, and the inferences drawn vary with each commentator who examines it. A second portion of the text is of later age in chapters xxi., xxii., xxiii., though he retains them in this section, while Hitzig regards xxvii. 17-xxix. 27 as a continuation of xxi. 16, to which they were added probably after the year 750 B.C. This apparent precision in the assignment of the dates of the several sections, it must be confessed, has very little foundation, and the dates are at best but conjectural. All that are known about the section xxv.-xxvii. is, that in the time of Ezechiah, that is in the last quarter of the 8th century B.C., it was supposed to contain what tradition had handed down as the proverbs of Solomon, and that the majority of the proverbs were believed to be his; there seems no good reason to doubt. Beyond this we know nothing. Ewald, we have seen, assigns the whole of this section to the close of the 8th or 7th century B.C., long before which time, he says, most of the proverbs were certainly not written. But he is thus compelled to account for the fact that in the superscription they are called "the proverbs of Solomon." He does so in this way. Some of the proverbs actually reach back into the age of Solomon, and those which are not immediately traceable to Solomon or his time, are composed, with similar artistic flow and impulse. If the earlier collection rightly bears the name of "the proverbs of Solomon," after the mass which are his, this may claim to bear such a title of honor after some important elements. The argument is certainly not sound, that, because a collection of proverbs, the majority of which are Solomon's, is distinguished by the general title "the proverbs of Solomon," therefore a collection, in which at most but a few belong to Solomon or his time, is appropriately distinguished by the same superscription. It will be seen afterwards that Ewald attributes the superscription in xxv. 1 to the compiler of xxii. 17-xxv. 1. The date of the sections i.-ix., xxii. 17-xxv. 1 has been variously assigned. That they were added about the same period Ewald infers from the occurrence of favorite words and expressions, and that that period was a late one he concludes from the traces which are manifest of a degeneracy from the purity of the Hebrew. It will be interesting to examine the evidence upon this point, for it is a remarkable fact, and one which is deeply instructive as showing the extreme difficulty of arguing from internal evidence that the same details lead Ewald and Hitzig to precisely opposite conclusions; the former places the date of i.-ix. in the first half of the 7th century, while the latter regards it as the oldest portion of the book, and assigns it to the 9th century. To be sure those points on which Ewald relies as indicating a late date for the section, Hitzig summarily dispenses as of interpretations. Among the favorite words which occur in these chapters are חֵן, kheswheth, "wisdoms," for "wisdom" in the abstract, which is found only in i. 20, ix. 1.

Hitzig's theory about the Book of Proverbs in its present shape is this: that the oldest portion consists of chapters i.-ix., to which was added, probably after the year 750 B.C., the second part, x.-xxii. 16, xxiii. 17-xxix. 27; that in the last quarter of the same century the anthology, xxix.-xxxi., was formed, and coming into the hands of a man who already possessed the
PROVERBS, BOOK OF

Other themes, which must have been the case had it been intended for an introduction. The development and progress which Ewald observes in it are by no means striking or of the kind we should have been led to expect. The unity of plan is no more than would be found in a collection of admonitions by different authors referring to the same subject, and is not such as to necessitate the conclusion that the whole is the work of one. There is observable throughout the section, when compared with what is called the earlier collection, a complete change in the form of the proverb. The single proverb is seldom met with, and is rather the exception than the rule. The arguments, which are connected descriptions, continuous elisions of a truth, and longer speeches and exhortations. The style is more highly poetical, the parallelism is synonymous and not antithetic or synthetic, as in x. 1-xxii. 16; and another distinction is the usage of Elohim in i. 5, 17, iii. 4, which does not occur in x. 1-xxii. 16. Amidst this general likeness, however, there is considerable diversity. It is not necessary to lay so much stress as Bertheau appears to do upon the fact that certain paragraphs are distinguished from those with which they are placed, not merely by their contents, but by their external form; nor to argue from this that they are therefore the work of different authors. Some paragraphs, it is true, are completed in ten verses, as i. 10-19, iii. 1-16, 11-29, iv. 10-19, viii. 12-21, 22-24; but it is clear that the writer, who sometimes wrote paragraphs of ten verses, should always do so, or to say with Bertheau, if the whole were the work of one author it would be very remarkable if he only now and then bound himself by the strict law of numbers. The argument assumes the strictness of the law, and then attempts to bind the writer to observe it. There is more force in the appeal to the difference in the formation of sentences and the whole manner of the language as indicating diversity of authorship. Compare ch. ii. with vii. 4-27, where the same subject is treated of. In the former, one sentence is yearly dragged through 22 verses, while in the latter the language is easy, flowing, and appropriate. Again the connection is interrupted by the insertion of vi. 1-19. In the previous chapter the exhortation to listen to the doctrine of the wise is followed by the warning against intercourse with the adulteress. In vi. 19 the subject is abruptly changed, and a series of proverbs applicable to different relations of life is introduced. From all this Bertheau concludes against Ewald that these introductory chapters could not have been the product of a single author, forming a gradually developed and consistent whole, but that they are a collection of admonitions by different poets, which all aim at rendering the youth capable of receiving good instruction, and inspiring him to strive after the possession of wisdom. This supposition is somewhat favored by the frequent repetitions of favorite figures or impersonations: the strange woman and wisdom occur many times over in this section, which would hardly have been the case if it had been the work of one author. But the occurrence of these repetitions, if it is against the unity of authorship, is, on the contrary, in favor of it. The whole of the section must have been contemporaneous, and were written at a time when such vivid impersonations of wisdom and its opposite were current and familiar. The tone of thought is the same, and the question therefore to be considered is whether it is more probable that a writer would repeat himself, or that fragments of a number of writers should be found, distinguished by the same way of thinking.
also the collection of proverbs which was made by the learned men of the court of Hezekiah, to which he wrote the superscription in xxv. 1. This theory of course only affects the date of the section in its present form. When the proverbs were written there is nothing to determine. Bertheau maintains that they in great part proceeded from one poet, in consequence of a peculiar construction which he employs to give emphasis to his presentation of a subject or object by repeating the pronoun (xxii. 19; xxiii. 14, 15, 19, 20, 28; xxiv. 6, 27, 32). The compiler himself appears to have added xxii. 17-21 as a kind of introduction. Another addition (xxiv. 23-34) is introduced with "these also belonged to the wise," and contains apparently some of the words of the wise, to which reference is made in i. 6. John regards it as a collection of proverbs not by Solomon. Hengler says it is an appendix to a collection of doctrines which is entirely lost and unknown; and with regard to the previous part of the section xxii. 17-xxiv. 22, he leaves it uncertain whether or not the author was a teacher to whom the son of a distinguished man was sent for instruction. Hitzig's theory has never been refuted.

After what has been said, the reader must be left to judge for himself whether Keil is justified in asserting so positively as he does the single authorship of cc. i.-xxix., and in maintaining that "the contents in all parts of the collection show one and the same historical background, corresponding only to the relations, ideas, and circumstances, as well as to the progress of the culture and experiences of life, acquired by the political development of the people in the time of Solomon."

The unchallenging chapters (xxx., xxxi.) are in every way distinct from the rest and from each other. The former, according to the superscription, contains "the words of Agur the son of Jechiel." Who was Agur, and who was Jechiel, are questions which have been often asked, and never satisfactorily answered. The Rabbins, according to Rashbi, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" (from מָעַג, agur, "to collect," "gather," and is elsewhere called "Koheleth.") All that can be said of him is that he is an unknown Hebrew sage, the son of an equally unknown Jechiel, and that he lived after the time of Hezekiah. Hitzig attributes to him the authorship of xxx. 1-xxxi. 9, and places him not earlier than the end of the 7th or beginning of the 6th cent. B. C. Hitzig, as usual, has a strange theory; that Agur and Lemuel were brothers, both sons of the queen of Massa, a district in Arabia, and that the father was the reigning king. [See JEHOSHAH.] Bunsen (Bibelwerk, 1. p. 208.), following Hitzig, considers Agur and Lemuel as a tenebrous verse, the name of a descendant of one of the five hundred Simeonites who in the reign of Hezekiah drove out the Amalekites from Mount Seir. All this is mere conjecture. Agur, whoever he was, appears to have had for his pupils Hiied and Ielil, whom he addresses in xxx. 1-6, which is followed by single proverbs of Agur's.

Ch. xxxi. 1-9 contains "the words of King Lemuel, the prophecy that his mother taught him." Lemuel, like Agur, is unknown. It is even uncertain whether he is to be regarded as a real personage, or whether the name is merely symbolical, as Eichhorn and Kiihwald maintain. If the present text be retained it is difficult to see what other conclu-
PROVERBS, BOOK OF

The preceding discussion leaves room for a more particular analysis of the contents of this remarkable book. After a brief introduction (ch. i-6), setting forth its design and use, the groundwork of the whole is expressed in ver. 7; namely, that all true knowledge has its beginning in the fear of God, the seminal principle of which the whole moral life is the growth, and the central law of our moral relations; that only fools despise this heavenly wisdom, and the means of acquiring it. This is the key to the instructions of the book. The following are very distinctly marked divisions.

Chapters i.-ix. First division, consisting of short continuous discourses, on various topics of religion and morality. Vv. 10-19. Against enticements to crime and criminal gains, and the fatal influences of a covetous spirit. Vv. 20-23. Wisdom's exhortations with those who refuse her warnings. Chap. ii. Rewards of those who seek wisdom. Chap. iii. A discourse in several parts, commencing kindness and truth, as foundation principles in all social relations (vv. 1-4) trust in Jehovah, and conscious reference to Him in all things (vv. 5-8); recognition of Him in the use of his gifts (vv. 9, 10), and filial submission to his chastisements (vv. 11, 12); blessedness of attaining the true wisdom (vv. 13-25); practical precepts for direction in the relations of social life (vv. 26-35). Chap. iv. Admonition to seek wisdom (vv. 1-9); to base instruction in the way of the wicked (vv. 10-19); to keep the heart, from which the outward life proceeds (Matt. xiv. 19), and shun every deviation from the right (vv. 20-27). Chap. v. Admonition to shun the fatal snare of the strange woman (vv. 1-14); to regard the divinely instituted law of the marriage relation, and be satisfied with its pure and chaste enjoyments (vv. 15-20). Chap. vi. Against being surety for another (vv. 1-5); against slothfulness (vv. 6-11); against the false and insidious mischief-maker (vv. 12-15); seven abominations of Jehovah (vv. 16-19); value of parental instruction and of its restraints in the conduct of life (vv. 20-35). Chap. vii. Warning against the allurements of the strange woman. Chap. viii. Wisdom's discourse. Her appeal to the sons of men (vv. 1-11); her claim to be their true and proper guide, with the assurance of her wisdom (vv. 12-21); her relation to Jehovah as his companion and delight before the worlds were, and his associate in founding the heavens and the earth (vv. 22-31); blessedness of those who hearken to her voice (vv. 32-35). Chap. ix. Wisdom's invitation to her feast (vv. 1-6); the scoffer scorches reproach, which the wisely grateful accepts (vv. 7-21); contrast of the foolish woman, and of the fate of her victim (vv. 12-18).

2. Chapters x.-xxiii. 16. Second division, consisting of single unconnected sayings, or maxims, expressing in few words the accumulated treasures of practical wisdom.

3. Chapters xxii. 17.-xxiv. 22. Third division, consisting of brief moral lessons, in very short, continuous discourses, less extended than those of the first division. An introductory paragraph announces to a diligent and heedful consideration of the words of the wise (vv. 17-21); against robbery and oppression of the weak and poor (vv. 22, 23); against companionship with the passionate man,
and the influence of his evil example (vv. 24, 25); against being surety for another's indebtedness (vv. 26, 27); against the perilous removal of landmarks (v. 28); caution against indulgence of appetite at the table of a ruler (ch. xxii. 1-5); folly of a craving for riches (vv. 4-5); accept no favors from the grudging and envious (vv. 6-8); leave the foundation of his folly (v. 9); removal of landmarks and violation of the orphan's domain, will surely be avenged (vv. 10, 11); correction needful and salutary for the child (v. 13, 14); a parent's joy in a wise and discreet son (vv. 15-18); against companionship with the dissolute (vv. 19-21); regard due to parents (vv. 22-25); a parent's plea for the love and obedience of a son, especially as a security from the most fatal sore of the young (vv. 26-28); description of the victim of the intoxicating cup, and warning against its seductions (vv. 29-35).\*\*

Chap. xxix. consists, for the most part, of brief practical directions for the conduct of life, closing with the spirited description of the neglected fields of the sluggard.

4. Chapters xxy.-xxix. Fourth division, being another collection of the Proverbs of Solomon.

5. Chapters xxx.-xxxii. An appendix, containing the words of Agur, and the words of King Lemuel, and closing with the beautiful portraiture of a capable woman b (xxxii. 10-31).

From this brief and necessarily partial analysis of the book, something may be inferred of the extent and variety of its topics. Of the richness of its teachings, the trains of thought suggested by single pregnant expressions, an analysis can give no conception. The gnomic poetry of the most enlightened of other ancient nations will not bear comparison with it, in the depth and certainty of its foundation principles, or in the comprehensive ness and the moral grandeur of its conceptions of human duty and responsibility. There is no relation in life which has not its appropriate instruction, no good or evil tendency without its proper incentive or correction. The human consciousness is everywhere brought into immediate relation with the Divine, with the All-seeing Eye, from which no act of the outward life or thought of the heart can be concealed, and man walks as in the presence of his Maker and Judge. But he is taught: to know Him also as the loving Father and Guide, seeking to succor the tempted, to win the wayward, to restrain the lawless, to restore the penitent. The knowledge of human nature, in its various developments, is also worthy of note. Every type of humanity is found in this ancient book; and though sketched three thousand years ago, is still as true to nature as if now drawn from its living representative.

Following the centrifugal description of the chaste relations of husband and wife (ch. xv. 15-25), the writer's meaning is lost in the A. V., and his statements made contradictory, by rendering ver. 16 affirmatively. It should be rendered as an interrogative expectation, thus: —

\* Provoke (from προκαταβείνειν, "to call forth") is used in a few passages of the A. V. in the sense of to "excite," "incline," "stimulate," as in Heb. x. 31, "to provoke to love and good works." So 1 Chr. xxi. 1; Rom. x. 13, xi. 11, 14; 2 Cor. iv. 2.

\* Provincialis (\'προσώπηδική\'), N.T. xοφα, lxx. \(\pi \rho \sigma \nu \rho \iota \varsigma\); province. It is not intended here to do honor, by which the gravest moral lesson is often most effectively pointed. One example has been given above, from ch. xxiii. 35. In ch. xv. 33, it is said, with sarcastic humor: —

Wisdom dwells in the heart of the discerning; But in fools it shall be taught.

The "heart of the discerning" is Wisdom's home, her proper dwelling place, and there she abides. Fools are sometimes "taught" a lesson in wisdom; but it is after the manner described in Judges xvi. 16, "he took thorns of the wilderness, and briers, and with them he taught the men of Succoth." In ch. xix. 7, it is said —

All the poor man's brethren hate him; Much more do his friends keep far from him; He follows after words — then he has!

A polished iron points the concluding member. The favors he is encouraged to hope for he finds to be empty talk; and that in seeking them he has "followed after words" — which he gets!

again into proconsular (στρατηγικός) and praetorian (στρατηγικός), is recognized, more or less distinctly, in the Psalms and the Acts. Syriac (Quirinus) is the term ὁρεμιας of Acts (Luke ii. 2), the word being in this case used for preses of proconsul. Pilate was the ἐρεμιας of the sub-province of Judea (Luke iii. 1, Matt. xxvii. 2, etc.), as procurator with the power of a legatus; and the same title is given to his successors, Felix and Festus (Acts xxii. 24, xxiv. 1, xxvi. 30). The governors of the senatorial provinces of Cyprus, Achaea, and Asia, on the other hand, are rigidly described as ἀρχηγοί provinciae (Acts xii. 7, xviii. 12, xix. 38). In the two former cases the province had been originally an imperial one, but had been transferred, Cyprus by Augustus (Dio Cass. liv. 4), Achaea by Claudius (Sueton. Claud. 25), to the Senate. The στρατηγος of Acts xvi. 22 ("magnifies," A. V.), on the other hand, were the ἀρματεῖοι, or praetors of a Roman colony. The duty of the legal and other provincial governors to report special cases to the emperor is recognized in Acts xxv. 26, and furnished the groundwork for the spurious Acts Pilati. [PILATE.] The right of any Roman citizen to appeal from a provincial governor to the emperor meets us as asserted by St. Paul (Acts xxv. 11). In the council (συμβολής) of Acts xxv. 12 we recognize the assessors who were appointed to take part in the judicial functions of the governor. The authority of the legatus, proconsul, or procurator, extended, it need hardly be said, to capital punishment (subject in the case of Roman citizens, to the right of appeal), and in most cases the power of inflicting it belonged to him exclusively. It was necessary for the Sanhedrim to gain Pilate's consent to the execution of our Lord (John xviii. 31). The strict letter of the law forced governors of provinces to take their wives with them, but the cases of Pilate's wife (Matt. xxvii. 19) and Drusilla (Acts xxiv. 24) show that it had fallen into disuse. Tacitus (Ann. iii. 33, 34) records an unsuccessful attempt to revive the old practice. The financial administration of the provinces is discussed under Publicans and Taxes.

PSALMS, BOOK OF. 1. The Collection as a Whole. — It does not appear how the Psalms were, as a whole, anciently designated. Their present Hebrew appellation is הבוגרין, "Praises." But in the actual superscriptions of the psalms the word הוגרין is applied only to one, Ps. cxlv., which is indeed emphatically a praise-hymn. The lxix. entitled them פאלאט, or "Psalms," using the word פאלאט at the same time as the translation of דוגרין, which signifies strictly a rhythmical composition (Lowth, Pseud. III.), and which was probably applied in practice to any poem specially intended, by reason of its rhythm, for musical performance with instrumental accompaniment. But the Hebrew word is, in the O. T., never used in the plural; and in the superscriptions of even the Davidic psalms it is applied only to some, not to all; probably to those which had been composed most expressly for the harp. The notice

Elizabeth and James thus for us. The governor of Ireland was officially "the Lord Deputy."
at the end of Ps. lxii. has suggested that the Psalms may in the earliest times have been known as הֶסֶר, "Prayers"; and in fact "Prayer" is the title prefixed to the most ancient of all the psalms, that of Moses, Ps. xc. But the same designation is in the superscriptions applied to only three others, Ps. xvii., xlviii., xlii., viz., not to have all the psalms the character of prayers. The other special designations applied to particular psalms are the following: "Song," the outpouring of the soul in thanksgiving, used in the first instance of a hymn of private gratitude, Ps. xxx., afterwards of hymns of great national thanksgiving, Ps. xi., xlviii., lxxv., etc.; נֶסֶר, תֹּכְכִּל, "Instruction" or "Homily," Ps. xxxii., xxxii., xlvii., etc. (comp. the נֶסֶר, יָשִׁיך, "I will instruct thee," in Ps. xxxii. 8); מִכְּדֹת, "Private Memorial," from the root כּד (perhaps also with anagrammatically allusion to the root כּד), "to support," "to maintain," comp. Ps. xvi. 5), Ps. xvi., xi. - lix.: הָדַע, "Testimony," Ps. lx., lxx.; and נַשָּׁדָד, "Irregular or Dithyrambic Ode," Ps. vii. The strict meaning of these terms is in general to be gathered from the earlier superscriptions. Once made familiar to the psalmists, they were afterwards employed by them more loosely.

The Christian Church originally received the Psalter from the Jews not only as a constituent portion of the sacred volume of Holy Scripture, but also as the liturgical hymn-book which the Jewish Church had regularly used in the Temple. The number of separate psalms contained in it is, by the conscientious testimony of all ancient authorities, one hundred and fifty; the so-called "supernumary" psalm which appears at the end of the Greek and Syriac Psalters being manifestly apocryphal. This total number commends itself by its internal probability as having proceeded from the last sacred collector and editor of the Psalter. In the details, however, of the numbering, both the Greek and Syriac Psalters differ from the Hebrew.

The Greek translators joined together Ps. i., ii., and Ps. iv., xxix., and then divided Ps. xxv., and Ps. cv.; this was perpetuated in the versions derived from the Greek, and amongst others in the Latin Vulgate. The Syriac so far followed the Greek as to join together Ps. exxv., cvx., and to divide Ps. cv.; of the three divergent systems of numbering, the Hebrew (as followed in our A. V.) is, even on internal grounds, to be preferred. It is decisive against the Greek numbering that Ps. cxv., being symmetrical in its construction, will not bear to be divided; and against the Syriac, that it destroys the outward correspondence in numerical place between the three great triumphal psalms, Ps. xxxii., lxxv., cxvii., as also between the two psalms containing the praise of "Law, Ps. xix., cxiv. There are also some discrepancies in the versed number. That our A. V. frequently differs from that of the Hebrew in consequence of the Jewish practice of reckoning the superscription as the first verse.

2. Component Parts of the Collection. - An old Jewish canon, which may be deemed to hold good for the earlier but not for the later Books, makes that all anonymous psalms be accounted the ciant tradition and internal evidence concur in pertaining the Psalter into the great divisions of books. The ancient Jewish tradition is preserved to us by the abundant testimoes of the Christian Fathers. And of the indications which the sacred text itself contains of this division the most obvious are the doxologies which we find at the ends of Ps. xii., lxxii., lxxix., etc., and which, having for the most part no special connection with the psalms to which they are attached, mark the several ends of the first four of the five books. It suggests itself at once that these books must have been originally formed at different periods. This is by various further considerations rendered all but certain, while the few difficulties which stand in the way of admitting it vanish when closely examined.

Thus, there is a remarkable difference between the several books in their use of the divine names Jehovah and Elohim, to designate Almighty God. In Book i. the former name prevails: it is found 272 times, while Elohim occurs but 15 times. (We here take no account of the superscriptions or doxology, nor yet of the occurrences of Elohim when infected with a possessive suffix.) On the other hand, in Book H. Elohim is found more than five times as often as Jehovah. In Book iii. the predominance of Jehovah is still maintained, but is reduced by that of Jehovah in the later psalms of the book. In Book iv. the name Jehovah is exclusively employed; and so also, virtually, in Book V., Elohim being there found only in two passages incorporated from earlier psalms. Those who maintain, therefore, that the psalms were collected and arranged at once, contend that the collector distributed the psalms according to the divine names which they individually exhibited. But to this theory the existence of Book III., in which the preferential use of the Elohim gradually yields to that of the Jehovah, is fatal. The large appearance, in fact, of the name Elohim in Books ii. and iii. depends in great measure on the period to which many of the psalms of those Books belong; the period from the reign of Solomon to that of Heczekiah, when through certain causes the name Jehovah was exclusively used. The preference for the name Elohim in most of the Davidic psalms which are included in Book ii. is closely allied with that character of those psalms which induced David himself to exclude them from his own collection, Book i.; while, lastly, the sparing use of the Jehovah in Ps. lxxvii., and the three introductory psalms which precede it, is designed to cause the name, when it occurs, and above all Jau, which is emphatic for Jehovah, to shine out with greater force and splendor.

This, however, brings us to the observance of the superscriptions which mark the authorship of the several psalms; and here again we find the several grups of psalms which form the respective five Books distinguished, in great measure, by their superscriptions from each other. Book i. is exclusively Davidic. Of the forty-seven psalms of the first book, thirty seven have David's name prefixed; and of the remaining four, Ps. i., ii., are probably outwardly anonymous only by reason of their prefatory character, Ps. x., xxxii., by reason of their close connection with those which they immediately succeed. Book ii. (in which the apparent anonymity of Ps. xiii., lix., lixii., compositions of the authors named in the superscrip-
All and this, thorougli of and old Biblical consistence;"...tions, where the Asphysical psalms precede those of the Sons of Korah, the psalms are all ascribed, explicitly or virtually, to the various Levite singers. except only Ps. xxi., which bears the name of David; this, however, is not set by itself but co-mingles in the midst of the rest. In Books IV., V., we have, in all, seventeen psalms marked with David's name. They are to a certain extent, as in Book III., mixed with the rest, sometimes singly, sometimes in groups. But these books differ from Book III. in that the non-Davidic psalms, instead of being assigned by superscriptions to the Levite singers, are left anonymous. Special attention, in respect to authorship, is drawn by the superscriptions only to Ps. xc., "A Prayer of Moses," etc.; Ps. cii., "A Prayer of the afflicted," etc.; and Ps. cxvii., marked with the name of Solomon.

In reasoning from the phenomena of the superscriptions, which indicate in many instances not only the authors, but also the occasions of the several psalms, as well as the mode of their musical performance, we have to meet the preliminary inquiry which has been raised, Are the superscriptions authentic? For the affirmative it is contended that they form an integral, and till modern times almost undisputed, portion of the Hebrew text of Scripture; a that they are in analogy with other Biblical super- or subscriptions, Davidec or otherwise (comp. 2 Sam. i. 18, probably based on an old superscription: 2 Sam. xxiii. 1; Ps. xxxviii. 9; Hab. iii. 1, 19); and that their diversified, unsystematic, and often obscure and enigmatical character is inconsistent with the theory of their having originated at a later period. On the other hand is urged their analogy with the trustworthy subscriptions of the N. T. epistles; as also the fact that many arbitrary superscriptions are added in the Greek version of the Psalter. The above represents, however, but the outside of the controversy. The real pit of it lies in this: Do they, when individually sifted, approve themselves as so generally correct, and as so free from any single fatal objection to their credit, as to claim our universal confidence? This can evidently not be discussed here. We must simply aver our conviction, founded on thorough examination, that they are, when rightly interpreted, fully trustworthy, and that every separate objection that has been made to the correctness of any one of them can be fairly met. Moreover, some of the arguments of their assailants obviously recoil upon themselves. Thus when it is alleged that the contents of Ps. xxi. have no connection with the occasion indicated in the superscription, we reply that the fact of the connection not being readily apparent renders it improbable that this superscription should have been prefixed any at all by David himself.

Let us now then trace the bearing of the superscriptions upon the date and method of compilation of the several books. Book I. is, by the superscriptions, entirely Davidec: nor do we find in it a trace of any but David's authorship. No such trace exists in the mention of the "Temple" (v. 7); for that word is even in I Sam. i. 11; iii. 3 applied to the Tabernacle; nor yet in the phrase "bringeth back the captivity" (xvi. 7), which is elsewhere used, idiomatically, with great latitude of meaning (Job xlii. 10; Hos. vi. 11; Ezx. xvi. 53), nor yet in the acrosticism of Ps. xxx., etc., for that all acrostic psalms are of late date is a purely gratuitous assumption, and some even of the most skeptical critics admit the Davidec authorship of the superscriptions. The truncatedly acrostic Ps. ix., x. All the psalms of Book I. being thus Davidec, we may well believe that the compilation of the book was also David's work. In favor of this is the circumstance that it does not comprise all David's psalms, nor his latest, which yet would have been all included in it by any subsequent collector; also the circumstance that its two prefatory psalms, although not superscribed, are yet shown by internal evidence to have proceeded from David himself; and furthermore, that of the two recensions of the same hymn, Ps. xiv., lii., it prefers that which seems to have been more specially adapted by its royal author to the temple-service. Book II. appears by the date of its latest psalm, Ps. xli., to have been compiled in the reign of King Hezekiah. It would naturally comprise, 1st. several or most of the Levitical psalms anterior to that date; and 2dly, the remainder of the psalms of David, previously uncompiled. To these latter the collector, after properly appending the single psalm of Solomon, has affixed the notice that "the prayers of David the son of Jesse are ended" (Ps. xxii. 20); evidently implying, at least on the privi j possible view, that no more compositions of the royal psalmist remained. How then do we find, in the later Books III., IV., V., further psalms yet marked with David's name? Another question shall help us to reply. How do we find, in Book III. rather than Book II. eleven psalms, Ps. lxxiii.-lxxvii., bearing the name of David's contemporary musician Asaph? Clearly because they proceeded not from Asaph himself. No critic whatever contends that all these belong to the age of David; and, in real truth, internal evidence is in every single instance in favor of a later origin. They were composed then by the "sons of Asaph" (2 Chr. xxix. 13, xxxv. 15, &c.); the members, by hereditary descent, of the choir which Asaph founded. It was to be expected that these psalmists would, in superscribing their psalms, prefer honoring and perpetuating the memory of their ancestor to obtruding their own personal names on the Church: a consideration which both explains the present superscriptions, and also renders the person intended in them could, according to a frequent but now waning hypothesis, be any second Asaph, of younger generation and of inferior fame. The superscriptions of Ps. lxxviii., lxxix., "Maschil of Heman," "Maschil of Ethan," have doubtess a like purport; the one psalm having been written, as in fact the rest of its superscription states, the sons of Ethan, the family of which Heman was the founder; and the other correspondingly proceeding from the third Levitical choir, which owed its origin to Ethan or Jeduthun. If now in the times posterior to those of David the

Theodore of Mopsuestia forms an exception.
Levi choirs prefixed to the psalms which they composed the names of Asaph, Heman, and Ethan, out of a feeling of veneration for their memories: how much more might the name of David be prefixed to the utterances of those who were not merely his descendants, but also the representatives for the time being, and so in some sort the pledges, of the perpetual succession of his line? In the Psalter, when the name David is used to denote, in other parts of Scripture, after the original David's death, the then head of the Davidic family: and so, in prophecy, the Messiah of the seed of David, who was to sit on David's throne (1 K. xii. 16; Hos. iii. 5; Is. lv. 3; Jer. xxx. 9; Ez. xxxiv. 23, 24). And thus we may explain the meaning of the later Davidic superscriptions in the Psalter. The psalms to which they belong were written by Hezekiah, by Josiah, by Zerubbabel, or others of David's posterity. And this view is confirmed by various considerations. It is confirmed by the circumstance that in the later books, and even in Book V. taken alone, the psalms marked with David's name are not grouped all together. It is confirmed in some instances by the internal evidence of occasion: thus Psalm c. can ill be reconciled with the historical circumstances of any period of David's life, but suits exactly with those of the opening of the reign of Josiah. It is confirmed by the extent to which some of these psalms—Psal. xxxvi., civili., civii. are compounded of passages from previous psalms of David. And it is confirmed lastly by the fact that the Hebrew text of many (see above all Ps. cxxxvii.) is marked by grammatical blemishes, which are entirely unparalleled in Ps. i. - lxiii., and which thus afford sure evidence of a comparatively recent date. They cannot therefore be David's own; yet that the superscriptions are not on that account to be rejected, as false, but must rather be properly interpreted, is shown by the improbability that any would, carelessly or pre-sumptuously, have prefixed David's name to various psalms southred through a collection, while yet leaving the rest—at least in Books IV., V.—altogether unsuperscribed.

The above explanation removes all serious difficulty respecting the history of the later books of the Psalter. Book III., the interest of which centres in the times of Hezekiah, stretches out, by its last two psalms, to the reign of Manasseh: it was probably compiled in the reign of Josiah. Book IV. contains the ten psalms thus forming up for the Babylonian Captivity: Book V. the psalms of the Return. There is nothing to distinguish these two books from each other in respect of outward decoration or arrangement, and they may have been compiled together in the days of Nehemiah.

The superscriptions, and the places which the psalms themselves severally occupy in the Psalter, are thus the two guiding clues by which we have directed us; and the internal evidence of the various authors, dates, and occasions, are to be determined. In the critical results obtained on these points by those scholars who have recognized and used these helps there is, not indeed uniformity, but at least a visible tendency towards it. The same cannot be said for the results of the judgments of those, of critical talent, who have thought of rejecting them: nor indeed is it easy to imagine that internal evidence alone should suffice to assign one hundred and fifty devotional hymns, even approximately, to their several epochs.

It would manifestly be impossible, in the compass of an article like the present, to exhibit in detail the divergent views which have been taken of the dates of particular psalms. There is however one matter which must not be altogether passed over in silence: the assignment of various psalms, by a large number of critics, to the age of the Maccabees. Two preliminary difficulties fatally beset such procedure: the hypothesis of a Macedonian authorship seems to contain at least one memorial of the history either occulted with the history of the O. T. canon, or with that of the translation of the LXX. But the difficulties do not end here. How—for we shall not here discuss the theories of Hitzig and his followers Lengerke and Justus Olsbrough, who would represent the greater part of the Psalter as Maccebean—how is it that the psalms which one would most naturally assign to the Maccebean period meet us not in the close but in the middle, i.e. in the Second and Third Books of the Psalter? The three named by De Wette (Eioi. in disa A. T. § 270) as bearing, apparently, a Maccebean impress, are Ps. xlv. ii., lxivii.; and in fact these, together with Ps. lxix., are perhaps all that would, when taken alone, seriously suggest the hypothesis of a Maccebean date. Whence then arise the early places in the Psalter which these occupy? But even in the case of these, the internal evidence, when more narrowly examined, proves to be in favor of an earlier date. In the first place the superscription of Ps. k. cannot possibly have been invented from the historical books, inasmuch as it disagrees with them in its details. Then the mention by name in that psalm of the Israelitish tribes, and of Moab, and Philistia, is unsuited to the Maccebean epoch. In Ps. lxiv., the complaint is made that the tree of the nation of Israel was no longer spreading over the territory that God had assigned it. Is it conceivable that a Maccebean psalmist should have held this language without making the slightest allusion to the Babylonian Captivity: as though the tree's growth were now first being seriously impeded by the wild stocks around, notwithstanding that it had once been entirely transplanted, and that, though restored to its place, it had been weakly ever since? In Ps. lxiv., it is complained that there is no more any prophet. Would that be a natural complaint at a time when Jewish prophecy had ceased for more than two centuries? Lastly, in Ps. lxix., the mention of the kings' in ver. 6 suits the Maccebean time; while the way in which the psalm is addressed to the Lord as the protector of the Israelites (Deut. xxxii. 8), can only be the earlier (xii. 16, 17), who omits those words which are foreign to his purpose, is such as would have hardly been adopted in reference to a contemporary composition.

3. Connection of the Psalms with the Israelitish history. — In tracing this we shall, of course, assume the truth of the conclusions at which in the previous section we have arrived, essentially and gradually, out of the personal and national career of David and of Israel. That of Moses, Psalms xvi., which, though it contributed little to the production of the rest, is yet, in point of actual date, the earliest, faithfully reflects the long, weary wanderings, the multiplied provocations, and the consequent punishments of the wilderness; and it is well that the Psalter should conclude with at least one record of the forty years of it. It is, however, with David that Israelitish psalms may be said virtually to commence. Previous masters over his harp had probably already prepared the way for his future strains, when the anointing oil of Samuel descended upon him, and he began to drink in special measure from that
day forward, of the Spirit of the Lord. It was then that, victorious at home over the mysterious melancholy of Saul and in the field over the vaunting champion of the Philistine hosts, he sang how from even babies and sucklings God had ordained strength because of his enemies (Ps. viii.). His next psalms are of a different character: his pen cut out, the hands of Saul had commenced. Ps. lxxviii. was probably written after Jonathan's disclosures of the murderous designs of the court: Ps. lxix. when his house was being watched by Saul's emissaries. The inhospitality of the court of Achish at Gath, gave rise to Ps. lxxiv.: Ps. xxxiv. was David's thanksgiving for deliverance from that court, not unmindful with shame for the unworthy strategem to which he had there temporarily had recourse. The associations connected with the cave of Adullam are embodied in Ps. lxxvii.: the feelings excited by the tidings of Doeg's servility in Ps. lii. The escape from Keilah, in consequence of a divine warning, suggested Ps. xxxi. Ps. li. was written when the Ziphites officiously informed Saul of David's movements. Ps. xxxii., xxxiii., recall the collopy at Engedi. Not of occult was freedom on the original of the book Ps. lxxxiii.; though in this case the closing verse of that psalm must have been added when it was further altered, by David himself, into Ps. xcv. The most thoroughly idealized picture suggested by a retrospect of all the dangers of his outlaw-life is that presented to us by David in Ps. xxi. But in Ps. xxii., which forms a side-piece to it, and the imagery of which is drawn from his earlier shepherd-days, David acknowledges that his past career had had its brighter as well as its darker side; nor had the goodness and mercy which were to follow him all the days of his life been ever really absent from him. Two more psalms, at least, must be referred to the period before David ascended the throne, namely, xxxviii. and xxxix., which naturally associate themselves with the distressing scene at Ziklag after the inroad of the Amalekites. Ps. xli. may perhaps be the thanksgiving for the retrieval of the disaster that had there befallen.

When David's reign has commenced, it is still with the most exciting incidents of his history, private or public, that his psalms are mainly associated. There are none to which the period of his reign at Hebron can lay exclusive claim. But after the conquest of Jerusalem his psalmody opened afresh with the solemn removal of the ark to Mount Zion; and in Ps. xxxiv.-xxxvi., which belong together, we have the earliest definite instance of David's systematic composition or arrangement of psalms for public use. Ps. xxxi. is of the same date: it was composed for the dedication of David's new palace, which took place on the same day with the establishment of the ark in its new tabernacle. Other psalms (and in these first threetrace any allusions to the presence of perpetual royalty now conveyed through Nah-than) show the feelings of David in the midst of his foreign wars. The imagery of Ps. ii. is perhaps drawn from the events of this period; Ps. ix., xxi. belong to the campaign against Edom: Ps. xx. to his second campaign, conducted by David in person, of the war against the allied Ammonites and Syrians; and Ps. xxi. to the termination of that war by the capture of Rabbah. Intermediate in date to the last-mentioned two psalms is Ps. lii.; connected with the dark episode which made David's remembrance not only for himself, but also for the city whereon he had labored, and which he had partly named by his own name, lest God should in displeasure not permit the future Temple to be reared on Mount Zion, nor the yet imperfect walls of Jerusalem to be completed. But rich above all, in the psalms to which it gave rise, is the period of David's flight from Absalom. To this we may refer Ps. iii.-vii. (with the exception of Ps. v.), possibly Ps. vi., which reflects the treachery of Abihuel, Ps. viii., which possibly alludes to the falsehood of both Ziba and Mephibosheth, and Ps. ixii., written in the wilderness between Jerusalem and the Jordan.

Even of those psalms which cannot be referred to any definite occasion, several reflect the general historical circumstances of the time. Thus Ps. iv. is a thanksgiving for the deliverance of the land of Israel from its former heathen oppressors. Ps. x. is a prayer for the deliverance of the Church from the high-handed oppression exercised from within. The succeeding psalms dwell on the same theme, the virtual internal heathenism by which the Church of God was weighed down. So that there remain very few, e. g. Ps. xv.-xx., xvi., xxii. (with its choral appendage xxxviii.;), xxvii., which of any historical account may not be given; and even of these are manifestly connected with psalms of historical origin, e. g. Ps. xvii. with Ps. xxiv.; and of others the historical reference may be more reasonably doubted than denied.

A season of repose near the close of his reign induced David to compose his grand personal thanksgiving for the deliverances of his whole life, Ps. xvi., the date of which is approximately determined by the place at which it is inserted in the history (2 Sam. xxii.). It was probably at this period that he finally arranged for the sanctuary-service that collection of his psalms which now constitutes the First Book of the Psalter. From this he designedly excluded all (Ps. ii.-ixii.) that, from manifest private reference, or other cause, were unfitted for immediate public use; except only where he so fitted them by slightly generalizing the language, and by mostly substituting for the divine name Elohim the more theocratic name Jehovah; as we see by the instance of Ps. xiv. = iili., where both the altered and original copies of the hymn happen to be preserved. To the collection thus formed he prefixed by way of preface Ps. i., a simple moral contrast between the ways of the godly and the ungodly and Ps. ii., a prophetical picture of the reign of that promised Ruler of whom he knew himself to be but the type. The concluding psalm of the collection, Ps. xlii., seems to be a sort of ideal summary of the whole.

The course of David's reign was not, however, as yet complete. The solemn assembly convened by him for the dedication of the materials of the future Temple (1 Chr. xxviii., xxix.) would naturally call forth a renewal of his best efforts to glorify the God of Israel in psalms; and to this occasion we doubtless owe the great festal hymn Ps. lxv.-livii., lxviii., containing a large review of the past history, present position, and prospective glories of God's chosen people. The supplications of Ps. livii. suit best with the renewed distress occasioned by the sedition of Adonijah. Ps. lixii., to which Ps. lx., a fragment of a former psalm, is introductory, forms David's parting strain. Yet that the psalmody of Israel may not seem finally to terminate with him, the glories of the future are forthwith anticipated by his son in Ps. lxiii. And so closes the first great blaze of the lyrical devotions of Israel. Da-
All these psalms are referred by their superscriptions to the Levite singers, and thus bear witness to the efforts of the Levites to reconcile the two branches of the chosen nation. In Ps. lxxxvii., belonging, probably, to the opening of Hezekiah's reign, the psalmist assumes a bold tone, and, re-
proaching the disobedience of the Israelites by the parable of the nation's earlier rebellions, sets forth to them the Temple at Jerusalem as the appointed centre of religious worship, and the heir of the house of David as the sovereign of the Lord's choice. This remonstrance may have contributed to the partial success of Hezekiah's messages of invitation to the ten tribes of Israel. Ps. lxxxiv. represents the thanks and prayers of the northern pilgrims, coming up, for the first time in two hun-
dred and fifty years, to celebrate the passover in Jerusalem: Ps. lxxxv. may well be the thanksgiv-
ing for the happy restoration of religion, of which the advent of these pilgrims formed part. Ps. lxxxv., on the other hand, is the lamentation of the Jewish Church for the terrible political calamity which speedily followed, whereby the inhabitants of the northern kingdom were carried into Captivity, and Joseph lost, the second time, to Jacob. The prosperity of Hezekiah's own reign outweighed the sense of this heavy blow, and nursed the holy faith whereby the king himself in Ps. lxxxvi., and the Levites in Ps. lxxxvii., anticipated the future welcome of all the Gentiles into the Church of God. Ps. lxxix. (an Asaph psalm, and therefore placed with the others of like authorship) may best be viewed as a picture of the evil days that followed through the transgressions of Manasseh. And in Ps. lxxxviii., lxxxix. we have the pleadings of the nation with God under the severest trial that it had yet experienced, the captivity of its only sovereign, and the apparent failure of the promises made to David and his house.

The captivity of Manasseh himself proved to be but a transient one, but by the sentence which his sins had provoked upon Judah and Jerusalem still re-
mained to be executed, and preceded the hope that God's salvation could be revealed till after such an outpouring of his judgments as the nation never yet had known. Labor and sorrow must be the lot of the present generation; through these mercy might occasionally gleam, but the glory which was eventually to manifest itself must be for posterity alone. The psalm of Book Iv. bear generally the impress of this feeling. The Mosaic Ps. xc., from whatever cause here placed, har-
monizes with it. Ps. xci., xci. are of a peaceful, simple, liturgical character; but in the series of psalms Ps. xcii.-c., which fortiify the future advent of God's kingdom, the days of adversity of the Chaldean oppression being in the foreground. Ps. cii., clii., " of David," really refer themselves to Josiah as their author; the former embodies his early resolutions of piety; the latter belongs to the period of the solemn renewal of the covenant after the discovery of the book of the Law, and after the assurance to Josiah that for his tender-
ness of heart he should be graciously spared from beholding the approaching evil. Intermediates to these in place, and perhaps in date, is Ps. ciii., " A Prayer of the afflicted," written by one who is almost entirely wrapped up in the prospect of the
PSALMS, BOOK OF

impending desolation, though he recognizes withal the divine favor which should remotely but eventually be manifested. Ps. civ., a meditation on the providence of God, is itself a preparation for that "hiding of God's face" which should ensue ere the Church were, like the face of the earth, renewed; and in the historical Ps. cc., civi., the one the story of God's faithfulness, the other of the people's transgression, in have the immediate prelude to the Captivity, together with a prayer for eventual deliverance from it.

We pass to Book V. Ps. cv. is the opening psalm of the return, sung probably at the first Feast of Tabernacles (Ezr. iii.). The ensuing Davidic psalms may well be ascribed to Zerubbabel; Ps. cvii. (drawn from Ps. lix., lx.) being in anticipation of the returning prosperity of the Church; Ps. cxi., a prayer against the efforts of the Samaritans to hinder the rebuilding of the Temple; Ps. cx., a picture of the triumphs of the Church in the days of the future Messiah, whose union of royalty and priesthood had been at this time set forth in the type and prophecy of Zechar. vi. 11-13. Ps. cvii., with which Ps. cviii.-cvi., certainly, and in the estimation of some Ps. cxxi., and even Ps. cxi., exii., stand connected, is the festal hymn sung at the laying of the foundations of the second Temple. We here pass over the questions connected with Ps. cxxi.; but a directly historical character belongs to Ps. cxxii.-cxxxiv., styled in our A. V. "Songs of Degrees." [DEGREES, SONGS OF, where the different interpretations of the Hebrew title are given.] Internal evidence refers these to the period when the Jews under Nehemiah were, in the very face of the enemy, repairing the walls of Jerusalem; and the title may well signify "Songs of going up (as the Hebrew phrase is) upon the walls," the psalms being, from their brevity, well adapted to be sung by the workmen and guards while engaged in their respective duties. As David cannot well be the author of Ps. cxxii.-cxxxiv., exii., cxxii., cxxiii., marked with his name, so neither, by analogy, can Solomon well be the actual author of Ps. cxxxiv. Theodoret thinks that by "Solomon" Zerubbabel is intended, both as deriving his descent from Solomon, and as renewing Solomon's work: with yet greater probability we might ascribe the psalm to Nehemiah. Ps. cxxxv., cxxxvi., by their parallelism with the compositions of sins in Neh. x., connect themselves with the national fast of which that chapter speaks. Of somewhat earlier date, it may be, are Ps. cxxxvii. and the ensuing Davidic psalms. Of these, Ps. cxxxviii. is a psalm of the new birth of Israel, from the womb of the Babylonish Captivity, to a life of righteousness: Ps. cxxxix.-cxlii. may be a picture of the trials to which the unrestored exiles were still exposed in the reigns of the Gentiles. Hitherto, as we approach the close of the Psalter, its strain rises in cheerfulness; and it fittingly terminates with Ps. cxlii.-cl., which were probably sung on the occasion of the thanksgiving procession of Neh. xii., after the rebuilding of the walls of Jerusalem had been completed.

4. Moral Characteristics of the Psalms. — Foremost among these meets us, undoubtedly, the universal recourse to communion with God. My voice is unto God, and I will cry " (Ps. lxxv. 1), might well stand as a motto to the whole of the Psalter: for, whether immersed in the depths, or whether blessed with greatness and comfort on every side, it is to God that the psalmist's voice seems ever to soar spontaneously aloft. Alike in the welcome of present deliverance or in the contemplation of past mercies, he addresses himself as straight to God as the object of his praise. Alike in the persecutions of his enemies and the desertion of his friends, in wretchedness of body and in the agonies of inward repentance, in the hour of impending danger and in the hour of apparent despair, it is direct to God that he utters forth his supplications. Despair, we say; for such, as far as the description goes, is the psalmist's state in Ps. lxxxviii. But meanwhile he is praying; the apparent impossibility of deliverance cannot restrain his God-ward voice; and so the very force of communion with God carries him, almost unaware, to himself, through the trial.

Connected with this is the faith by which he everywhere lives in God rather than in himself. God's mercies, God's greatness form the sphere in which his thoughts are ever moving: even when through excess of affliction reason is rendered powerless, the naked contemplation of God's wonders of old forms his effectual support (Ps. lxvii.).

It is of the essence of such faith that the psalmist's view of the perfections of God should be true and vivid. The Psalter describes God as He is: it glows with testimonies to his power and providence, his love and faithfulness, his holiness and righteousness. Correspondingly it testifies against every idol which men would substitute in the living God's place: whether it be the outward image, the work of men's hands (Ps. cxvi.), or whether it be the inward vanity of earthly comfort or prosperity, to be purchased at the cost of the honor which counsel from God alone (Ps. iv.).

The solemn "See that there is no idol-way (ייוושגו) in me" of Ps. cxxix., the striving of the heart after the very truth and nought beside, is the exact anticipation of the "Little children, keep yourselves from idols," of the loved Apostle in the N. T.

The Psalms not only set forth the perfections of God: they proclaim also the duty of worshipping Him by the acknowledgment and adoration of his perfections. They encourage all outward rites and means of worship: new songs, use of musical instruments of all kinds, appearance in God's courts, lifting up of hands, prostration at his footstool, holy apparel (A. V. "beauty of holiness") Among these they recognize the ordinance of sacrifice (Ps. iv., v., xxvi., li.) as an expression of the worshipper's consecration of himself to God's service. But not the less do they repudiate the outward rite when separated from that which it was designed to express (Ps. xi., lxix.): a broken and contrite heart is, from erring man, the genuine sacrifice which God requires (Ps. lii.).

Similar depth is observable in the view taken by the psalmist of human sin. It is to be traced not only in its outward manifestations, but also in

throughout his nature, in his very childlike love.

a A very strong feeling exists that Mark xii. 36, etc., show Ps. ex. to have been composed by David himself. To the writer of this article it appears, that whatever of his ancestors the psalm proceeded, so his words do not necessarily imply more than is intended in the superscription of the psalm.
the inward workings of the heart (Ps. xxxvi.), and to be primarily ascribed to man’s innate corruption (Ps. li., lxxvii.). It shows itself alike in deeds, in words (Ps. xxi., cxxxv.), and in thoughts (Ps. cxxxiv.): nor is even the believer able to discern all its various ramifications (Ps. xiv.). Connected with this view of sin is, on the one hand, the picture of the utter corruption of the ungodly world (Ps. xiv.); on the other, the encouragement to itself given to the upright, the assurance of divine forgiveness (Ps. xxxii.), and the trust in God as the source of complete redemption (Ps. cxxxv.).

In regard to the law, the psalmist, while warmly acknowledging its excellence, feels yet that it cannot so effectually guide his own unassisted exertions as to preserve him from error (Ps. xix.). He needs an additional grace from above, the grace of God’s Holy Spirit (Ps. li.). But God’s Spirit is also a free spirit (Ps. li.); led by this he will discern the Law, with all its precepts, to be no arbitrary rule of bondage, but rather a charter and instrument of liberty (Ps. cxix.).

The Psalms bear repeated testimony to the duty of instructing others in the ways of holiness (Ps. xxxiii., xcvii., lii.). They also indirectly enforce the need of these, even to our selves (Ps. xv, lvi., xxxv. 13, cix., iv. 4). On the other hand they implore, in the strongest terms, the judgments of God on transgressors. Such imperatives are leveled at transgressors as a body, and are uniformly uttered on the hypothesis of their willful persistence in evil, in which ease the overthower of the sinner becomes a necessary part of the uprooting of sin. They are so inconsistent with any efforts to lead sinners individually to repentance. [PSALMS IMPROVINCIAL, Amer. ed.]

This brings us to notice, lastly, the faith of the psalmists in a righteous recompense to all men according to their deeds (Ps. xxxvi., &c.). They generally expected that men would receive such recompense in great measure during their own lifetime. Yet they felt within that it was not then complete; it perfected itself to their children (Ps. cxii., xxxvi., cxii., &c.); and thus we find set forth in the Psalms, with sufficient distinctness, though in an unarranged and consequently imperfect form, the doctrine of a retribution after death. 5. Prophetic Character of the Psalms. — The moral struggle between godliness and ungodliness, so vividly depicted in the Psalms, culminates in Holy Scripture, in the life of the Inerrant Son of God upon earth. It only remains to show that the Psalms themselves definitely anticipated this culmination. Now there are in the Psalter at least three psalms of which the interest evidently centres in a person distinct from the speaker, and which, since they cannot without violence to the language be interpreted of any but the Messiah, may be termed directly and exclusively Messianic. We refer to Ps. ii., xlv., cxv. to which may perhaps be added Ps. lxii.

It would be strange if these few psalms stood, in their prophetic significance, absolutely alone among the rest: the more so, heas much as Ps. ii. forms part of the prepare to the First Book of the Psalter, and would, as such, be entirely out of place, did not its general theme virtually extend itself over those which follow, in which the interest generally centres in the figure of the suppliant or worshipper himself. And hence the imposibility of viewing the psalms generally, notwithstanding the historical draiary in which they are outwardly clothed, as simply the past devotions of the historical David or the historical Israel. Other arguments to the same effect are furnished by the idealized representations which many of them present; by the outward points of contact between their language and the actual earthly career of our Saviour; by the frequent references made to them both by our Saviour Himself and by the Evangelists; and by the view taken of them by the Jews, as recorded in several passages of the Targums. There is yet another circumstance well worthy of note in its bearing upon this subject. Alike in the earlier and in the later portions of the Psalter, all these psalms which are of a personal rather than of a national character are marked in the superscriptions with the name of David, as proceeding either from David himself or from one of his descendants. It results from this, that while the Davidic psalms are partly personal, partly national, the Levitic psalms are uniformly national. Exceptions to this rule exist only in appearance: thus Ps. lxxiii., although couched in the first person singular, is really a prayer of the Jewish faithful against the Assyrian invaders; and in Ps. xliii., xliii., it is the feelings of an exiled company rather than of a believer which are expressed. It follows that it was only these psalms which were types of Christ by external office and lineage as well as by inward piety, that were charged by the Holy Spirit to set forth beforehand, in Christ’s own name and person, the sufferings that awaited him and the glory that should follow. The national hymns of Israel are indeed also prospective; but in general they anticipate rather the struggles and the triumphs of the Christian Church than those of Christ Himself.

We annex a list of the chief passages in the Psalms which are in anywise quoted or embodied in the N. T.: Ps. ii. 1, 2, 7, 8, 9, iv. 4, 5, 6, 3, 8, 18, vii. 2, 4, 6, x. 7, xiv. 1-3, xvi. 8-11, xviii. 4, 29, xix. 4, xxii. 8, 18, 22, xxvii., xxviii. 5, xxix. ii., xxxi. 8, 12-16, 20, xxxv. 9, xxxvi. 4, xxxvii. i., xxxviii. 11, xl. 1-8, xli. 9, xlii. 22, xlv. 6, 7, xlviii. 2, li. 4, lv. 22, lxviii. 11, b. 4, 9, 22, 23, 25, lxxv. 8, lxxix. 2, 24, lxxxii. 6, lxxxvii. 9, lxxxix., lxix. 20, x. 4, xiv. 11, xii. 12, xiii. 7, xiv. 11, xcv. 7-11, cii. 25-27, civ. 4, x. 1, 4, xix. 3, xlvii. 10, xviii. 1, xviiii. 6, 22, 23, 25, 26, xxv. 5, ex. 3. 6. Literature. — The list of Jewish commentators on the Psalter includes the names of Sandalian (Aramaic Church), Alcin, Ezra, and Kimichi. Among later performances that of Stiernh (1550) is highly spoken of (reprinted in a Firth Psalter of 1804); and special mention is also due to the modern German translation of Mendelssohn (1786), to which again is appended a comment by Joel Pflüger. In the Christian Church devotional familiarity with the Psalter has rendered the numbers of its readers considerable, and even in modern times even the number of private translations of it has been so large as to preclude enumeration here. Among the Greek Fathers, Theodoret is the best commentator, Chrysostom is the best homilist, on the Psalms: for the rest, a catena of the Greek comments was formed by the Jesuit Celerinus. In the West the pithy expositions of Hilary and the sermons of Augustine are the main patristic helps. A list of the chief medieval comments, which are of a devotional and mystical rather than of a critical character, will be found in Neale’s Commentary (vol. i. 1860), which is mainly derived from them, and favorably introduces them to modern English
PSALMS, BOOK OF

readers. Later Roman Catholic laborers on the Psalms are Genebrard (1587), Agellins (1606), Bellarmine (1617), Lorinius (1619), and De Muis (1850): the valuable critical commentary of the last named has been republished, accompanied by the able preface and terse annotations of Bousset. Among the Reformers, of whom Luther, Zwingle, Beza, and Calvin all applied themselves to the Psalms, Calvin naturally stands, as a commentator, preeminent. Of subsequent works those of Geier (1868) and Venema (1762, &c.) are still held in some repute; while Rosenmüller's Schriftg. is, of course, the substance of others. The modern German laborers on the Psalms, commencing with De Wette, are very numerous. Maurer shines as an elegant grammatical critic: Ewald (Bücher des A. T. i. ii. and ili.) as a translator. Hengstenberg's Commentary holds a high place. The two last Commentaries are that of Hummel (in progress), a work of high philological merit, but written in strong opposition to Hengstenberg, and from an unsatisfactory point of theological view; and that of Delitzsch (1853-90), the diligent work of a sober-minded theologian, whose previous Syntaxis ad Ps. illustr. (1838) has been a valuable contribution to the external criticism of the Psalms. Of English works we may mention the Paraphrase of Hammond; the devotional Commentary of Bishop Horne, and along with this the unpretending but useful Plain Commentary recently published; Merrick's Annotations; Bishop Horsley's Translation and Notes (1815, posthumous); Dr. Mason Good's Historical Outline, and also his Translation with Notes (both posthumous; distinguished by taste and originality rather than by sound judgment or accurate scholarship); Phillip's Text, with Commentary, for Hebrew students; J. Jebb's Literal Translation and Dissertations (1846); and lastly Thrupp's Introduction to the Psalms (1860), to which the reader is referred for a fuller discussion of the various matters treated of in this article. In the press, a new translation, etc., by Perowne, of which specimens have appeared. A catalogue of commentaries, treatises, and sermons on the Psalms is given in Darlington's Cyclop. Bibliographical (subjects), p. 374-514.

7. Psalter of Solomon. — Under this title is extant, in a Greek translation, a collection of eighteen hymns, evidently modeled on the canonical psalms, breathing Messianic hopes, and forming a favorable specimen of the later popular Jewish literature. They have been variously assigned by critics to the times of the persecution of Antiochus Epiphanes (Ewald, Lilliman), or to those of the rule of Herod (Movers, Delitzsch). They may be found in the Codex Pseudoepigraphus i. T. of Fabricius. J. F. T.

* Psalms, Imperative. The psalms designated under this title are those in which the author is supposed to invoke curses upon his enemies, and for the gratification of a vindictive spirit to delight in their sufferings. Entire psalms usually classed as imprecatory in this sense are xxxv., lixiv., lixx, and cix., all of which bear strong marks of the authorship of David. Parts of other psalms have also been classed as imprecatory: Ps. lii. 7, i. 2-4, xviii. 97-43, xvi. 7-11, xxxvii. 12-15, lii. 5-7, lv. 9, 15, and 23, liii. 9-11, liv. 7-9, xxxviii. 8-13, xxxviii. 7-9. Among the strongest passages in which this maledictory spirit is said to appear are the following:

"Set them a wicked man over him, And let Satan stand at his right hand. When he shall be judged, let him be condemned. And let his prayer become sin" (cix. 6, 7).

"Let his children be fatherless, and his wife a widow; Let his children be continually vagabonds and beg Let the extortioner catch all that he hath, And let strangers spoil his old age." (xxxvii. 8, 9, 10).

(OF a later date) —

"O daughter of Babylon, who art to be destroyed, Happy shall he be that rewardeth thee As thou hast served us. Happy shall he be that taketh And dasheth thy little ones against the stones." (xlvii. 8, 9, 10).
PSALMS, IMPRECATORY

It is undeniable that these and such expressions in the Psalms have been a source of grief and perplexity to the Christian, while they have furnished occasion for civil and scoffing to the skeptical. Various theories have been proposed for explaining the language so as to remove this anachronism, or to mitigate its severity. It has been suggested that the so-called imprecations are simply predictions of the evil which is likely to befall the wicked. But the study of the Hebrew original does not warrant such a view: the imprecation is expressed by the forms of the verb (imperative as well as future) employed in Hebrew for uttering a wish or prayer. This, moreover, is a timider way of approaching the difficulty. It is better not even to admit the apparent inconsistency between this spirit of the Psalms and that of the teachings and example of Christ, and then inquire what explanation can be given of it. Within the limits to which we are restricted, we can only glance at some of the leading considerations.

(i.) In the first place it has been said that the duty of forgiving and loving our enemies is not distinctly taught in the O. T., and that David therefore is not to be expected to rise above the standard of duty and character of the dispensation to which he belonged. But we must reply to this that David was not ignorant of this requirement for the Jewish Scriptures condemned a spirit of revenge, and enjoined the requiting of evil with good. In Ex. xxii. 45, we read (as correctly translated):

"If he hurt thee in his enmity, or his ass go astray, thou shalt surely bring it back to him:

When thou seest the ass of him that hateth thee lying under his burden, thou shalt forbear to leave him:

thou shalt surely help him load it." So in Lev. xix. 18: "Thou shalt not avenge nor bear any grudge against the children of thy people; but thou shalt love thy neighbor as thyself." Prov. xxiv. 17, 18: "Befrioe not when thine enemy falZeth; and let not thine heart be glad when he stumbleth:

lest the Lord see it, and it displease Him" (see also ver. 29; and xxv. 21, 22: "If thine enemy be hungry, give him bread to eat: and if he be thirsty, give him water to drink: for the善 shall heap coals of fire upon his head, and the Lord shall reward thee.") Not only so, but David himself recognized this obligation, and we are all about, was certainly in his general conduct a remarkable example of patience under multiplied wrongs and of meekness to his foes when he had them in his power (see infra.).

(ii.) Some would regard the psalms here under consideration as historical in their character, and not strictly preceptive or didactic. That is, they are the records of facts, and hence express the actual feelings of the writers, just as the biographies of good men in the Bible and elsewhere relates other acts of such men, of the character of which the reader is left to judge according to his own standard of piety and morality. If inspired men may do things which are wrong, they may utter words which are selfish, or passionate, or rancorous, and yet not forget their character for general uprightness or their claim in other respects as the biographers of religious heroes. It is partly this fidelity with which the Scriptures record the acts and feelings of men who usually were eminent servants of God, suppressing nothing, palliating nothing, that, more than any injurious defense of apologists, has given to the Bible its hold on the confidence of the world. This perfect truthfulness makes an irresistible appeal. With wonderful wisdom the Bible does not present to us for a model, the piety of the saint or angel, but piety in its human development struggling with sins, temptations, difficulties: not the highest form of religion, but the highest form which man can understand. The fulminations of David, John, or Paul, have their place in the Church, as well as the unblemished correctness of Joseph and Daniel. The experience of any one takes hold of us, when his real feelings, good and bad, are honestly told. They are so much like our own that we sympathize with him. They interest intensely each successive generation of mankind, for "one touch of nature makes us all kin." The wonder and beauty of their compositions is that they reach us through a glass through which we see nature exactly: they give a Shakespearian picture of all the moral workings of the heart. The Psalmist does not select his best feelings for exhibition and hold his bad ones in the shade, but all ideas and emotions are given just as they are. Rev. Albert Barnes admits an element of truth in this explanation, and Dr. Tholuck distinctly holds that a personal feeling has occasioned its expression itself with David's other imprecatory expressions of the wicked. Hengstenberg objects to such a view that it invalidates the character of the Psalms as a normal expression of only such acts and feelings as God must approve.

(iii.) In the third place, it is undeniable that some critics have greatly exaggerated this charge of vindictiveness on the part of David. In reality very few of the Psalms have with any appearance of truth incurred this censure. Of the one hundred and fifty psalms, Stanley (Lectures on the Jewish Church, ii. 170) singles out only four as marked illustrations of this spirit. With reference to these, or others which may be classed with these, we are to make due allowance for the relevance of oriental expression as compared with our own habits of thought and language. It is a maxim in literature that an author is to be judged by the standard of his own age and time, not by the standard of our own. This is a simple principle of justice readily granted to all authors, and due certainly to the Biblical authors as well as others. An honest effort to understand the imprecatory psalms requires that we study the genius of Hebrew poetry, the spirit of the age in which David lived, and the circumstances of David at the moment when he uttered the imprecations. To understand an author's phrase and study nearly to a thorn's exact point of view. We must distinguish between the real meaning of the man and the color given to that meaning by his education and habits of thought. A very little study shows us that Hebrew poetry partakes of the intenseness of oriental temperament. The Oriental expresses in the language of strong passion the same meaning which to us the European requires to be amplified by reason and common sense. If the European says that God loves men, the Asiatic prophet expresses the same idea by a phrase which is almost a tautology: "Thy Maker is thine husband." "As the bridegroom rejoices above the bride, so shall thy God rejoice over thee." Now the sentiments of indignation are expressed with the same hyperbole. If the European says that justice will be done to the wicked the Oriental means the same thing, but expresses it by saying: —

"The righteous shall rejoice when he seeth the vengeance.

He shall wash his feet in the blood of the wicked."
PSALMS, IMPRECATORY

When the Psalmist utters a denunciation which to us seems terrible, he may have intended only to express a plain thought with ordinary vigor. A generous and certainly a thorough examiner will take the genius of the age and of the man for the background of his criticism upon the man's production; he will criticise poetry as poetry, and Oriental Poetry as a department of the art, distinct and separate in itself; he will not complain because in the poetry of Isaiah there are found some expressions which would not be pertinent to a demonstration of Euclid, nor will he expect to find in Homer the same style of expression which he looks for in Sir William Hamilton.

(iv.) Another consideration which, if not rightly understood, will confuse the reader of these psalms, is that their author identifies the enemies of God with his own enemies. The spirit of David is well expressed in his own words: "Do I not hate them, O Lord, that hate thee? 1 hate them with perfect hatred; I count them mine enemies;" or, in the colder language of Solomon: "The fear of the Lord is to hate evil: pride, and arrogancy, and the evil way, and the froward mouth do I hate." Even Catiline had insight enough to say, "An identity of wishes and aversions, this alone is true friendship." Such was the friendship between David and Jehovah. So close was the union between David and his Master that intuitively David assailed the Lord's enemies as his own. The truth is that David's personal attitude towards his enemies was different from that of any other warrior in history. The cause of God was placed in his hands obviously and directly. He was called upon to uphold the cause of Jehovah against the heathen without and the house of Saul within the Jewish kingdom. He had the wrongs of Jehovah as well as his own to require, and in requiting the wrongs of Jehovah he probably lost sight of his own altogether. During his youth, spies in the employ of Saul were around him continually, and often was he pursued by a band of furious and blood-thirsty men, who, by exterminating him, hoped to extinguish the cause of God altogether. He was situated like the English statesman who in an attack upon himself sees the crown and government to be really aimed at. Hence the terrible strength of David's retort. He replied not for himself, but for those whom he represented. His zeal for God spent itself in a tempest of fury upon God's enemies. It was when he felt God's honor to be insulted that he rose to a loftiness of vengeance all his own, and prayed:—

"That thy foot may be dipped in the blood of thine enemies,
And the tongue of thy dogs in the same."

Unless we rise to this view, we are left to suppose that David left the vast responsibility of defending God's earthly honor, for the little work of redressing his personal wrongs. The elevation of his character above such a motive is evident from his sparing the chief of his enemies when he had him in his power, and from the generous eloquence of his lamentation when that enemy fell. David's real feeling towards his enemies he expresses thus (Ps. lxxv. 12, 13):—

"They rewarded me evil for good;
My soul is made desolate (orphanned);

"Nam 1 hem velae atque idem noile, ex denum irma voluit est" (Sallust, Catiline, 20, 4).
PSALMS, IMPRECATORY

case they show that a bad character is naturally connected with the loss of all resources, and, generally speaking, with a miserable end. In the case of a nation, they show that its guilt is closely connected with its enslavement; for after sin has mastered the national character, the government soon loses all vigor and cohesion, and the sword of the tyrant rapidly presses through the breach which sin has made in the rampart of public virtue. This part of the Bible pictures sin as it is seen from the historic standpoint. The prophets denounce sin in a manner more rhetorical and direct, and the imprecations of David are gentle, compared with the anathemas of Isaiah, Ezekiel, Amos, and Hosea. If our Saviour had uttered no imprecations, those of David could certainly be questioned; but He did utter them with a scope, duration, and intensity of meaning which David never knew, for the greater the being the greater is his power to destroy. The very gentleness of the Saviour’s character prevents any suspicion that He could have been influenced by private resentment, and gives an indescribable air of truth and justice to his threatenings. Now why is it that in a few songs of David the same spirit is so much condemned? We answer that, as far as we can judge, there is an ambiguity in the object of David’s imprecation. In his case, the enemies of God and his own enemies were the same persons, and the Psalmist is accused of attacking those as his own enemies, while there is an overwhelming reason to believe he attacked them only as the enemies of God. It is probably this circumstance alone which has confused the mind of the good, and exposed the Psalmist to the charge of vindictiveness.

(vii.) The revealed word is reflected in man’s experience, and we remark finally that the events of history continually give the Impreatory Psalms a new meaning. Experience is their best interpreter. When the cause of truth is borne down for the moment, when the wicked oppose, and the good man is anxious, and the time-server is silent and afraid, then the soul, heated by persecution, is prepared to grasp the spirit of the Impreatory Psalms. In the palace of God’s truth these psalms hang like a sword upon the wall: in times of peace we make idle criticisms upon its workmanship and idle theories as to its use; sound the trumpet of danger, and we instinctively grasp it—it is all that we have. In our time of need and death. In the day of prosperity these psalms seem useless, in the darkness of affliction they are luminous; as a piece of fireworks has no prominence in the day-time, but it is the splendor and illumination of the night. There are times when the Christian is not to blame for having the spirit of these psalms, but he would deserve the contempt of mankind if he failed to have the same. Repentance becomes the holiest of instincts when it presents the proper object. The spirit of the prophet is not dead, who was asked, “Doest thou well to be angry?” and he answered, “I do well.” With wonderful wisdom the Bible provides, not only for man’s present, but for his future emergencies, as the earth is stored with mine after mine which successive ages shall open. These psalms have an “apparent and permanent fulfilment,” every three and struggle of humanity comments upon them, and each generation of mankind penetrates further into their meaning. Think not that any truth is useless; the rolling wheel of time shall at length come upon it.

Such is a brief view of these celebrated compositions. Truthful in delineating the human nature, Asiatic in the existence of their diction, marking the unity of their author’s mind with God, they furnish an expression of that majestic spirit of resistance to evil, which, planted by God in the human bosom, is expressed with increasing clearness as God’s revolution is disclosed, and, deriving new power from every crisis of human experience, looks forward with augmented confidence to a day of the triumph of truth and justice over all enemies.

W. E. P.

PSALTERY. The psaltery was a strung instrument of music to accompany the voice. The Hebrew סהל, or צהל, is so rendered in the A. V. in all passages where it occurs, except in Is. v. 12, xiv. 11, xvi. 24 marg.: Am. v. 25, vi. 3, where it is translated ried, following the Geneva Version, which has צהל in all cases, except 2 Sam. vi. 5; 1 K. x. 12 (“psaltery”); 2 Esdr. x. 22; Ezech. xi. 21 (“pсалтерий’’); Is. xxi. 24 (“מְנַסֶּכֶה’’); and Wisd. xix. 18 (“instrument of music’’). The ancient violin was a six-stringed guitar. Viol had six strings, and the position of the fingers was marked on the fingerboard by frets, as in the guitars of the present day.” (Chappell, Pop. Mus. i. 216). In the Prayer Book version of the Psalms, the Hebrew word is rendered “lute.” This instrument resembled the guitar, but was superior in tone, “being larger, and having a convex back, somewhat like the vertical section of a goad, or more nearly resembling that of a pear. . . . It had virtually six strings, because, although the number was eleven or twelve, five, at least, were doubled: the first or treble, being sometimes a single string. The head in which the pegs to turn the strings were inserted, receded almost at a right angle” (Chappell, i. 102). These three instruments, the psaltery or sacnty, the viol, and the lute, are frequently associated in the old English poets, and were clearly instruments resembling each other, though still different. Thus in Chaucer’s Plowman and Leaf, 357,—

“And before hem went minstrelsy many one, / As harpes, pipes, lutes, and sacnty;”

and again in Drayton’s Polybollion, iv. 396:—

“The trembling lute with some touch, some strain the viol best.”

The word psaltery in its present form appears to have been introduced about the end of the 16th century, for it occurs in the unmodified form psal- / trov in two passages of the Gen. Version (1560). Again, in North’s Plutarch (Theo. p. 124, ed. 1595) we read that Themistocles, “being mocked
... by some that had studied humanitie, and other liberal sciences, he was driven for revenge and his own defence, to answer with great and stout words, saying, that in deed he could no skill to tune a harpe, nor a violl, nor to play of a psaltery: but if they did put a citie into his hand, that was of small height and little, he knew well enough how to make it noble, strong, and great. The Greek ψαλτήριον, from which our word is derived, denotes an instrument played with the fingers instead of a plectrum or quill, the verb ψαλλειν being used (Eur. Bacch. 781), of twanging the bowstring (comp. ψαλτόμαι τ'εξών, Eur. Ion. 173). But it only occurs in the LXX. as the rendering of the Heb. נבל or נבל in Neh. iii. 27, and Is. vi. 12, and in all the passages of the Psalms, except Ps. lxxi. (ψαλταίς), and Ps. lxxxi. 2 (καθ'αυτα), while in Am. v. 23, vi. 5, the general term δυργηρός is employed. In all other cases νδωλα represents נבל or נבל. These various renderings are sufficient to show that at the time the translation of the LXX. was made, there was no certain identification of the Hebrew instrument with the kind which had ten strings, and was of a triangular shape. The rendering νδωλα commends itself on account of the similarity of the Greek word with the Hebrew. Josephus appears to have regarded them as equivalent, and his is the only direct evidence upon the point. He tells us (Ant. vii. 12, § 3) that the difference between the κινπα (Heb. נבל, cimbró) and the νδωλα was, that the former had ten strings and was played with the plectrum, the latter had twelve notes and was played with the hand. Forty thousand of these instruments, he adds (Ant. viii. 3, § 8), were made by Solomon of electrum for the Temple choir. Rishe (on Is. v. 12) says that the נבל had more strings and pegs than the cimbró. That νδωλ was a foreign name is evident from Strabo (x. 471), and from Athenaeus (iv. 175), where its origin is said to be Sidonian. Beyond this, and that it was a stringed instrument (Asth. iv. 175), played by the hand (Ovid. Art. Am. iii. 327), we know nothing of it, but in these facts we have some presumptive evidence that νδωλ and נבל are the same; and that the νδωλ and psaltery are identical appears from the Glossary of Philostratus, where νδωλον = δυργηρόν, νδωλον = νδωλα, and νδωλον from Suidas, who makes psaltery and νδωλον, or νδωλ, synonymous. Of the psaltery among the Greeks there appear to have been two kinds. The πιγντις, which was of Persian (Athen. xiv. 636) or Lydian (ibid. 635) origin, and the νδωλον, The former had only two (Athen. iv. 183) or three (ibid.) strings; the latter as many as twenty (Athen. xiv. 634), though sometimes only five (ibid. 637). They are sometimes said to be the same, and were evidently of the same kind. Both Isidorus (de Origg. iii. 21) and Cassiodorus (Prof. in Pseu. c. iv.) describe the psaltery as triangular in shape, like the Greek Δ, with the sounding-board above the strings, which were struck downwards. The latter adds that it was played with a plectrum, so that he contradicts Josephus if the psaltery and נבל are really the same. In this case Josephus is the rather to be trusted. St. Augustine (on Ps. xxxii. 2xxiii.i) makes the position of the sounding board the point in which the cithara and psaltery differ, in the former it is below, in the latter above the strings. His language implies that both were played with the plectrum. The distinction between the cithara and psaltery is observed by Jerome (Prof. in Pseu.). From these conflicting accounts it is impossible to say positively with what instrument the nebel of the Hebrew exactly corresponded. It was probably of various kinds, as Kimchi says in his note on Is. xxii. 24, differing from each other both with regard to the position of the pegs and the number of the strings. In illustration of the descriptions of Isidorus and Cassiodorus reference may be made to the drawings from Egyptian musical instruments given by Sir Gard. Wilkinson (Anc. Eg. ii. 280, 287), some one of which may correspond to the Hebrew nebel. Munk (Palestine, plate 16, figs. 12, 13) gives an engraving of an instrument which Niebuhr saw. Its form is that of an inverted delta placed upon a round box of wood covered with skin.

The nebel 'abir (Ps. xxiii. 2, xcv. 5 [4, calv. 9]) appears to have been an instrument of the psaltery kind, with ten strings, and was of a triangular shape, according to some accounts (Forkel, Gesch. d. Mus. i. 133). Aben Ezra (on Ps. cl. 3) says the nebel had ten holes. So that he must have considered it to be a kind of pipe.

From the fact that nebel in Hebrew also signifies a wine-bottle or skin, it has been conjectured that the term, when applied to a musical instrument, denotes a kind of bagpipe, the old English cornamuse or crabbe, or cypress, and was of a trepanned shape.

In the Mishna (Cilin. xvi. 7) mention is made of a case (גננה =ḅayen) in which it was kept.

Its first appearance in the history of the O. T. is in connection with the "string" of prophets who met Saul as they came down from the high place (1 Sam. x. 5). Here it is clearly used in a religious service, as again (2 Sam. vi. 5; 1 Chr. xiii. 8), when David brought the ark from Kirjath-jearim. In the Temple band organized by David were the players on psalteries (1 Chr. xv. 16, 20), who accompanied the ark from the house of Obed-edom (1 Chr. xxv. 28). They played when the ark was brought into the Temple (2 Chr. v. 12); at the thanksgiving for Jehoshaphat's victory (2 Chr. xx. 28); at the elevation of the Ark under Hezekiah (2 Chr. xxiv. 25); and the dedication of the walls of Jerusalem after they were rebuilt by Nehemiah (Neh. xii. 27). In all these cases, and in the passages in the Psalms where allusion is made to it, the psaltery is associated with religious services (comp. Am. v. 23; 2 Esdr. x. 22). But it had its part also in private festivities, as is evident from Is. xii. 14, xiv. 11, xxii. 24; Am. vi. 5, where it is associated with banquets and luxurious indulgence. It appears (Is. xiv. 11) to have had a soft plaintive note.

The psalteries of David were made of cypress (2 Sam. vi. 5), those of Solomon of algum or alnus-trees (2 Chr. ix. 11). Among the instruments of the band which played before Nebuchadnezzar's golden image on the plains of Dura, we again meet with the psaltery (בשודק דרור, Dan. iii. 28).
PTOLEMAIUS

When conciliatory, Antiochus, wards with... of Phoenicia (1 Mac. iii. 38). He was empowered by a bribe to support the cause of Menelaus (2 Mac. iv. 45–50); and afterwards took an active part in helping the Jews to apostatize (2 Mac. vi. 8, according to the true reading).

When Judas had successfully resisted the first assaults of the Syrians, Ptolemy took part in the great expedition which Lyons organized against him, which ended in the defeat at Emmaus (c. v. 106, but nothing is said of his personal fortunes in the campaign (1 Mac. iii. 38).

The son of Agatharchus (A nth. vi. 246 C), a Megalopolitan, named Macron (2 Mac. x. 12), who was governor of Cyprus during the minority of Ptol. Philometer. This office he discharged with singular ability (Polyb. xxvii. 12); but afterwards he deserted the Egyptian service to join Antiochus Epiphanes. He stood high in the favor of Antiochus, and received from him the government of Phoenicia and Cœle-Syria (2 Mac. viii. 8, x. 11. 12). On the accession of Ant. Euergetes, his conciliatory policy toward the Jews brought him into suspicion at court. He was deprived of his government, and in consequence of his disgrace he poisoned himself c. n. c. 164 (2 Mac. x. 13).

Ptol. Macron is commonly identified with Ptol. the son of Dorymenes; and it seems likely from a comparison of 1 Mac. iii. 38 with 2 Mac. viii. 8, 9, that they were confused in the popular account of the war. But the testimony of Athenaeus distinctly separates the governor of Cyprus from the son of Dorymenes by his parentage. It is also doubtful whether Ptol. Macron had left Cyprus as early as n. c. 170, when the son of Dorymenes" was at Tyre (2 Mac. iv. 45), though there is no authority for the common statement that he gave up the island into the hands of Antiochus, who did not gain it till n. c. 168.

3. The son of Abubus, who married the daughter of Simon the Macabee. He was a man of great wealth, and, being invested with the government of the district of Jericho, formed the design of usurping the sovereignty of Judah. With this view he treacherously murdered Simon and two of his sons (1 Mac. xi. 11–16; Joseph. Ant. xii. 7, § 4; 8, § 1, with some variations); but Johannes Hyrcanus received timely intimation of his design, and escaped. Hyrcanus afterwards besieged him in his stronghold of Bik, but in consequence of the occurrence of the Sabbatical year, he was enabled to make his escape to Zeno Cotulas, prince of Philadelphias (Joseph. Ant. xii. 8, § 1).

4. A citizen of Jerusalem, father of Lysimachus, the Greek translator of Esther (Esth. xi.).

GENEALOGICAL TABLE OF THE PTOLEMEES.

1. PTOLEMEES I. SOTER (son of Lagus), c. B. C. 323–256.

5. Berenice = Antiochus II.

Cleopatra = Alex. Balas.

Demetrius II.

12 Cleopatra

15. Ptol. VIII. Soter II (b. c. 117–81).

PTOLEMAIUS
PTOLEMAIUS I.

PTOLEMAIUS I. SOTER, known as the son of Lagus, a Macedonian of low rank, was generally supposed to have been an illegitimate son of Philip. He distinguished himself greatly during the campaigns of Alexander: at whose death, foreseeing the necessary subdivision of the empire, he secured for himself the government of Egypt, where he proceeded at once to lay the foundations of a kingdom (B.C. 323). His policy during the wars of the succession was mainly directed towards the consolidation of his power, and not to wild conquests. He maintained himself against the attacks of Perdiccas (B.C. 321) and Demetrius (B.C. 312), and gained a precarious footing in Syria and Phœnicia. In B.C. 307 he suffered a very severe defeat at sea off Cyprus from Antigonus, but successfully defended Egypt against invasion. After the final defeat of Antigonus, B.C. 301, he was obliged to concede the delatable provinces of Phœnicia and Coele-Syria to Seleucus; and during the remainder of his reign his only important achievement almost was the recovery of Cyprus, which he permanently attached to the Egyptian monarchy (B.C. 295). He abdicated in favor of his youngest son Ptol. II. Philadelphus, two years before his death, which took place in B.C. 283.

Ptol. Soter is described very briefly in Daniel (xi. 5) as one of those who should receive part of the empire of Alexander when it was divided to ward the four winds of heaven. "The king of the south [Egypt in respect of Judæa] shall be strong; and one of his princes [Seleucus Nicator shall be strong]: and he [Seleucus] shall be strong above him [Ptolemy], and have dominion." Seleucus, who is here mentioned, fled from Babylon, where Antigonus sought his life, to Egypt in B.C. 316, and attached himself to Ptolemy. At Issus the decisive victory of Ipsus (B.C. 301), which war mainly gained by his services, gave him the command of an empire which was greater than any other held by Alexander's successors; and "his dominion was a great dominion" (Dan. i. 4).

PTOLEMAIUS II. PHILADELPHUS, the youngest son of Ptol. I., was made king two years before his death, to confirm the irregular succession. The conflict between Egypt and Syria was renewed during his reign in consequence of the intrigue of his half-brother Magas. "But in the end of years they [the kings of Syria and Egypt] joined themselves together [in friendship]. For the king's daughter of the south [Berenice, the daughter of Ptol. Philadelphus] came [as bride] to the king of the north [Antiochus II.], to take an agreement" (Dan. xi. 6). The unhappy issue of this marriage has been noticed already [Antiochus II., vol. i. p. 115]; and the political events of the reign of Ptolemy, who, however, retained possession of the disputed provinces of Phœnicia and Coele-Syria, offer no further points of interest in connection with Jewish history.

In other respects, however, this reign was a critical epoch for the development of Judaism, as it was for the intellectual history of the ancient world. The liberal encouragement which Ptolemy bestowed on literature and science (following out in this the designs of his father) gave birth to a new school of writers and thinkers. The critical faculty was called forth in place of the creative, and learning in some sense supplied the place of original speculation. Eclecticism was the necessary result of the concurrence and comparison of dogmas: and it was impossible that the Jew, who was now become as true a citizen of the world as the Greek, should remain passive in the conflict of opinions. The origin and influence of the translation of the LXX. will be considered in another place. [SEPTUAGINT.] It is enough now to observe the great part of the consequences involved in the union of Greek language with Jewish thought. From this time the Jew was familiarized with the great types of Western literature, and in some degree aimed at imitating them. Ezechiel (6 τῶν ἀρχιερατῶν ταυρωνίας τούτων, Clem. Alex. Str. i. 23, § 153) wrote a drama on the subject of the Exodus, of which considerable fragments, in fair hexameter verse, remain (Euseb. Prepar. Ev. ix. 28, 29; Clem. Alex. l.c.), though he does not appear as distinctly to have adhered strictly to the laws of classical composition. An elder Philo celebrated Jerusalem in a long hexameter poem — Enodiaus quotes the 14th book — of which the few corrupt lines still preserved (Euseb. Prepar. Ev. ix. 29, 24, 25) convey no satisfactory notion. Another epic poem, "on the Jews," was written by Theolus; and as the extant passages (Euseb. Prepar. Ev. ix. 22) treat of the history of Sichem, it has been conjectured that he was a Samaritan. The work of Aristobulus on the interpretation of the Law was a still more important result of the combination of the old faith with Greek culture, as forming the groundwork of later allegories. And while the Jews appropriated the fruits of Western science, the Greeks looked towards the whole tenor of the passage requires the contrast of the two kingdoms on which the fortunes of Judæa hung.

a Jerone (ad Don. l.c.) very strangely refers the utter clauses of the verse to Ptol. Philadelphus, whose empire surpassed that of his father."

PTOLEMAEUS II. PHILADELPHUS, the youngest son of Ptol. I., was made king two years before his death, to confirm the irregular succession. The conflict between Egypt and Syria was renewed during his reign in consequence of the intrigue of his half-brother Magas. "But in the end of years they [the kings of Syria and Egypt] joined themselves together [in friendship]. For the king's daughter of the south [Berenice, the daughter of Ptol. Philadelphus] came [as bride] to the king of the north [Antiochus II.], to make an agreement" (Dan. xi. 6). The unhappy issue of this marriage has been noticed already [Antiochus II., vol. i. p. 115]; and the political events of the reign of Ptolemy, who, however, retained possession of the disputed provinces of Phœnicia and Coele-Syria, offer no further points of interest in connection with Jewish history.

In other respects, however, this reign was a critical epoch for the development of Judaism, as it was for the intellectual history of the ancient world. PTOLEMEUS III.

the East with a new curiosity. The histories of Berossus and Manetho and Herodotos opened a world as wide and novel as the conquests of Alexander. The legendary sibyls were taught to speak in the language of the prophets. The name of Orphus, which was connected with the first rise of Greek polytheism, gave sanction to verses which set forth holder views of the triad (Enseh. Prop. Fr. xiii. 12, ec.). Even the most famous poets were not free from interpolation (Ewald, Gesch. iv. 297, noto). Everywhere the intellectual approximation of Jew and Gentile was growing closer, or at least more possible. The later specific forms of teaching to which this syncretism of East and West gave rise have been already noticed. [Alexandria, vol. i. pp. 64, 65.] A second time and in a new fashion Egypt disciplined a people of God. It first impressed upon a nation the firm unity of a family, and then in due time reconnected a matured people with the world from which it had been called out.

B. F. W.

PTOLEMEUS IV.

It was the eldest son of Philad. Philad. and of Berenice, the wife of Antiochus II. The reputation and murder of his sister furnished him with an occasion for invading Syria (c. n. c. 246). He stood up, a breach out of her stock [spring from the same parent] in his [father's] estate; and set himself at the head of his army, and came against the fortresses of the king of the north [Antiochus], and dealt against them and prevailed" (Dan. xi. 7). He extended his conquests as far as Antioc, and then eastwards to Babylon, but was recalled to Egypt by tidings of seditions which had broken out there. His success was brilliant and complete.

"He carried captive into Egypt the gods [of the conquered nations] with their written images, and with their precious reeds of silver and gold" (Dan. xi. 8). This capture of sacred trophies, which included the recovery of images taken from Egypt by Cambyses (Beroso, ad loc.); earned for the king the name Epresor -- Benefactor -- from the superstitious Egyptians, and was specially recorded in the inscriptions which he set up at Aulde in memory of his achievements (Cosmas Ind. op. Clinit. F. III. 382 not.1). After his return to Egypt (cir. n. c. 743) he suffered a great part of the conquered provinces to fall again under the power of Seleucus. But the attempts which Seleucus made to attack Egypt terminated disastrously to him. He first collected a fleet which was almost totally destroyed by a storm; and then, "as if by some undue infatuation," he came against the real of the king of the south [and being defeated] returned to his own land [to Antioc]" (Dan. xi. 4). Janua. xxvii. 3 After this Ptolemy "devoted some years from [attacking] "the king of the north" (Dan. xi. 5), since the civil war between Seleucus and Antiochus Hierax, which he fomented, secured him from any further Syrian invasion. The remainder of the reign of Ptolemy seems to have been spent chiefly in developing the resources of the empire, which he raised to the highest pitch of its prosperity. His policy towards the Jews was similar to that of his predecessors, and on his occupation of Syria he offered sacrifices, after the custom of the Law, in acknowledgment of his success, in the Temple at Jerusalem, and added gifts worthy of his victory" (Joseph. c. Ap. ii. 6). The famous story of the manner in which Joseph the son of Tobias obtained from him the lease of the revenues of Judaea is a striking illustration both of the condition of the country and of the influence of individual Jews (Joseph. Ant. xii. 4). [Onias.] B. F. W.

PTOLEMEUS IV. PHILOPATOR.

After the death of Ptol. Euergetes the line of the Ptolemies rapidly degenerated (Strabo, xvi. 12, 13, p. 798). Ptol. Philopator, his eldest son, who succeeded him, was to the last degree sensuous, epileptic, and diletante. But externally his kingdom retained its power and splendor; and when circumstances forced him to action, Ptolemy himself showed ability not unworthy of his race. The description of the campaign of Raphia (n. c. 217) in the Book of Daniel gives a vivid description of his character. "The sons of Seleucus [Seleucus Ceremon and Antiochus The Great] were stirred up and agreed to make a multitude of great forces; and one of them [Antiochus] came over and prevailed and passed through [even to Pelusium, Polib. vi. 62]; and he returned [from Seleucia, to which he had retired during a faithless truce, Polib. vi. 63]; and they [Antiochus and Ptolemy] were stirred up [in war] even to his [Antiochus'] fortress. And the king of the south [Ptol. Philopator] was moved with clother, and came forth and fought with him [at Raphia]; and he [Ptol. Philopator] was in a great multitude, and the multitude was cast into his hand [to lead to battle]. And the multitude raised itself [bravely for the conflict], and his heart was lifted up, and he cast down ten thousands (Polib. vi. 85); but he was not vigorous." [to reap the fruits of his victory] (Dan. xi. 12-13; et. 3 Med. i. 1-5). After this decisive success Ptol. Philopator visited the magnificent cities of Syria, and among others Jerusalem. After offering sacrifices of thanksgiving in the Temple he attempted to enter the sanctuary. A sudden paralyzis hindered his design; but when he returned to Alexandria, he determined to inflict on the Alexandrine Jews the vengeance for his disappointment. In this, however, he was again hu-
prove him [Ptolemy, his daughter Cleopatra] a young widow" [as his betrothed wife] (Dan. xi. 18). But in the end his policy only partially succeeded. After the marriage of Ptolemy and Cleopatra was consummated (n. c. 183), Cleopatra did "not stand on his side," but supported her husband in maintaining the alliance with Rome. The disputed provinces, however, remained in the possession of Antiochus; and Ptolemy was poisoned at the time when he was preparing an expedition to recover them from Seleucus, the unworthy successor of Antiochus, b. c. 181.

B. F. W.
shall forecast devices against him. Yes, they that have been ordered by the pasture of his must destroy him, and his army shall well away, and many shall fall down slain. And both these kings' hearts shall be to do mischief, and they shall speak lies at one table. [Antiochus shall profess falsely to maintain the cause of Philometor against his brother, and Philometor to trust in his good faith]; but it shall not prove [the resistance of Alexandria shall preserve the independence of Egypt]; for the end shall be at the time appointed. Then shall be [Antiochus] return into his land, and his heart shall be against the holy covenant; and he shall do exploits, and return to his own land. At the time appointed he shall return and come towards the south; but it shall not be as the former so also the latter time. [His career shall be checked at once] for the ships of Chilitio [comp. Num. xxi. 24: the Roman fleet] shall come against him; therefore he shall be dispelled and return and have indignation against the holy covenant."

After the discontinuance of Antiochus, Philometor was for some time occupied in resisting the ambitious designs of his brother, who made two attempts to add Cyprus to the kingdom of Tyre, which was allotted to him. Having effectually put down these attempts, he turned his attention again to Syria. During the brief reign of Antiochus Epiphan he seems to have supported Philip against the regent Lydus (comp. ii. Macc. ix. 29). After the murder of Epiphan by Demetrius I., Philometor espoused the cause of Alexander Balas, the rival claimant to the throne, because Demetrius had made an attempt on Cyprus; and when Alexander had defeated and slain his rival, he accepted the overtures which he made, and gave him his daughter Cleopatra in marriage (n. c. 150; 1 Macc. x. 10, &c.), the alliance was not made in good faith, but only as a means towards securing possession of Syria. According to others, Alexander himself made a treacherous attempt on the life of Philometor (comp. 1 Macc. xi. 10), which caused him to transfer his support to Demetrius II., to whom also he gave his daughter, whom he had taken from Alexander. The whole of Syria was quickly subdued, and he was crowned at Antioch king of Egypt and Asia (1 Macc. xii. 13). Alexander made an effort to recover his crown, but was defeated by the forces of Philometor and Demetrius, and shortly afterwards put to death in Arabia. But Philometor did not long enjoy his success. He fell from his horse in the battle, and died within a few days (1 Macc. xii. 18), n. c. 145.

PTOLEMAEUS VI. Philometor was the last king of Egypt who is noticed in sacred history, and his reign was marked also by the erection of the temple at Leontopolis. The coincidence is worthy of notice, for the consecration of a new centre of worship placed a religious as well as a political barrier between the Alexandrine and Palestinian Jews. Henceforth the nation was again divided. The history of the temple itself is extremely obscure, but even in its origin it was a monument of civil strife. Onias, the son of Onias III., who was murdered at Antioch, n. c. 171, when he saw that he was excluded from the succession to the high-priesthood by hereditary intrigues, fled to Egypt, either shortly after his father's death or upon the transference of the office to Alexander, n. c. 162 (Joseph. Ant. xiii. 9, § 7). It is probable that his retirement must be placed at the later date, for he was a child (παιδίος). Joseph. Ant. xiii. 5, § 1) at the time of his father's death, and he is elsewhere mentioned as one of those who actually oppressed the Syrian party in Jerusalem (Joseph. B. J. i. 1). In Egypt he entered the service of the king, and rose, with another Jew, Demetrius, to the supreme command. In this office he rendered important services during the war which Ptolem. Physcon waged against his brother; and he pleaded these to induce the king to grant him a ruined temple of Diana (τής ἐγκαταλείπθεν) at Leontopolis, as the site of a temple, which he proposed to build "after the pattern of that at Jerusalem, and of the same dimensions." His alleged object was to unite the Jews in one body, who were at the time "divided into hostile factions, even as the Egyptians were, from their differences in religious services" (Joseph. Ant. xiii. 3, § 1). In defense of the locality which he chose, he quoted the words of Isaiah (Is. xix. 18, 19), who spoke of "an altar to the Lord in the midst of the land of Egypt," and according to one interpretation mentioned "the city of the Sun" (Ἥλιος Νεφέων), by name. The site was granted and the temple built; but the original plan was not exactly carried out. The Nuns rose "like a tower to the height of sixty cubits" (Joseph. B. J. vii. 10, § 3, τίτλον παραπλάτων ... εἰς ἑξήνοτα πάγες ἀναστρέφοντο ... ἐν ἐἀργίτα πάγες ἡ ἀναστρέφουσα). The altar and the offerings were similar to those at Jerusalem: but in place of the seven-branched candlestick, was "a single lamp of gold suspended by a golden chain." The service was performed by priests and Levites of pure descent; and the temple possessed considerable revenues, which were devoted to their support and to the adequate celebration of the divine ritual (Joseph. B. J. vii. 10, § 3; Ant. xiii. 3, § 3). The object of Ptolem. Physcon in furthering the design of Onias, was doubtless the same as that which led to the erection of the "golden calves" in Israel. The Jewish residents in Egypt were numerous and powerful; and when Jerusalem was in the hands of the Syrians, it became of the utmost importance to weaken their connection with their mother city. In this respect the position of the temple on the eastern border of the kingdom was peculiarly important (Jos. Ant. vii. 117). On the other hand, it is probable that this was a mere error, occasioned by the patronymic of the most famous Onias (comp. Hengel, Gesch. Jud. i. 557).
that Onias saw no hope in the Hellenized Judaism of a Syrian province; and the triumph of the Macedonians was still unachieved when the temple at Leontopolis was founded. The date of this event cannot indeed be exactly determined. Josephus says (B. J. vii. 10, § 4) that the temple had existed in 134 B.C. as the time of 'all the Jews', cir. A. D. 71; but the text is manifestly corrupt. Eusebius (op. cit. viii. p. 507, ed. Migne) notices the flight of Onias and the building of the temple during the same year (A. D. 162), possibly from the natural connection of the events without regard to the exact date of the latter. Some time at least must have been allowed for the military service of Onias, and the building of the temple may perhaps be placed after the conclusion of the last war with Ptolemy Philopator (c. B. C. 154), when Jonathan began to judge the people at Machmas (1 Mac. x. 73.). In Palestine the erection of this second temple was not condemned so strongly as might have been expected. A question indeed was raised in later times whether the service was not idolatrous (Joseph. Ant. xvi. 44, § 4; Jost, Gesch. xlv. 119), but the Mishna, embodying without doubt the old decisions, determines the point more favorably. Priests who had served at Leontopolis were forbidden to serve at Jerusalem; but were not excluded from attending the public services. A vow might be discharged rightly at Leontopolis as well as at Jerusalem, but it was not enough to discharge it at the former place only (' Menach. 100, a. q. Jost, ad loc.'). The circumstances under which the new temple was erected were evidently accepted as in some degree an excuse for the irregular worship. The connection with Jerusalem, though weakened in popular estimation, was not broken; and the spiritual significance of the one Temple remained unchanged for the devout believer (Philo, de Monarch. ii. § 1, &c.). [ALEXANDRIA, vol. i. p. 65.]

The Jewish colony in Egypt, of which Leontopolis was the immediate religious centre, was formed of various elements and at different times. The settlements which were made under the Greek sovereigns, though the most important, were by no means the first. In the later times of the kingdom of Judah many 'trusted in Egypt,' and took refuge there (Jer. xiii. 6, 7); and when Jeremiah was taken to Egypt, Jeremiah, his friends, and the people were encouraged to settle in Egypt, and live there as Jews, and to keep in check the native population. After the Return the spirit of commerce must have contributed to increase the number of emigrants: but the history of the Egyptian Jews is involved in the same deep obscurity as that of the Jews of Palestine till the annexation of Alexander. There cannot, however, be any reasonable doubt as to the power and influence of the colony; and the mere fact of its existence is an important consideration in estimating the possibility of Jewish ideas finding their way to the west. Judaism had secured in old times all the treasures of Egypt, and thus the first installment of the debt was repaid. A preparation was already made for a great work when the founding of Alexandria opened a new era in the history of the Jews. Alexander, according to the policy of all great conquerors, incorporated the conquered in his armies. Samariotes (Joseph. Ant. xi. 8, § 6) and Jews (Joseph. Ant. xi. 8, § 5; I. c. 22) are mentioned among his troops; and the tradition is probably true which reckons them among the first settlers at Alexandria (Joseph. B. J. iv. 18, § 7; c. Ap. ii. 4). Ptolemy Soter increased the colony of the Jews in Egypt both by force and by policy; and their numbers in the next reign may be estimated by the statement (Joseph. Ant. xii. 2, § 1) that Ptolemy Philadelphia gave freedom to 120,000. The position occupied by Joseph (Joseph. Ant. xii. 4) at the court of Ptolemy Euergetes I., implies that the Jews were not only numerous, but influential. As a colony on the coast it did not go on. It formed the legendary acquaintance of the first con- secution of Ptolemaic. Ptolemais bore witness at least to the great number of Jewish residents in Egypt (3 Mac. iv. 15, 17), and to their dispersion throughout the Delta. In the next reign many of the inhabitants of Palestine who remained faithful to the Egyptian alliance fled to Egypt to escape from the Syrian rule (comp. Jerome of Doxa, xi. 14, who, however, confined in his account). The consideration which their leaders must have thus gained, accounts for the rank which a Jew, Aristobulus, is said to have held under Ptolemy Philometer, as 'tutor of the king' (Alex. comp., 2 Mac. ii. 10). The later history of the Alexandrine Jews has been noticed before (vol. i. p. 63). They retained their privileges under the Romans, though they were exposed to the illegal oppression of individual governors, and quietly acquiesced in the foreign domination (Joseph. B. J. vii. 10, § 1). An attempt which was made by some of the fugitives from Palestine to create a rising in Alexandria after the destruction of Jerusalem, entirely failed; but the attempt gave the Romans an excuse for plundering, and afterwards (v. c. 71) for closing entirely the temple at Leontopolis (Joseph. B. J. vii. 10).

PTOLEMAIS (Πτολεμαί: Ptolemais). This article is merely supplementary to that on ACCO. The name is in fact an interpolation in the history of the place. The city which was called Acho in the earliest Jewish annals, and which is again the Akko or St. Jean d'Acre of crusading and modern times, was named Ptolemais in the Macedonian and Roman periods. In the form of these periods it was the most important town upon the coast, and it is prominently mentioned in the first book of Maccausas, v. 13, 55, x. 1, 58, 60, xii. 48. In the latter its eminence was far outdone by Herod's new city of CESCAREA. Still in the N. T. Ptolemais is a marked point in St. Paul's travels both by land and sea. He must have passed through it on all his journeys along the great coast-road which connected Cescarea and Antioch (Acts xi. 9; xii. 25, xv. 2, 30, xviii. 22); and through it, in company with Herod, after his return from Italy to Syria, landed at Ptolemais (Joseph. Ant. xiv. 15, § 1).

a It is worthy of notice that Herod, on his return from Italy to Syria, landed at Ptolemais (Joseph. Ant. xiv. 15, § 1).

b On the journey from Antioch to Jerusalem, Paul instead of following the coast-
**PTOLEMEE**

and the distances are given both in the Antonine and Jerusalem itineraries (Wesseling, *Röm. pp. 128, 584*). But it is specifically mentioned in Acts xxi. 7, as containing a Christian community, visited for one day by St. Paul. On this occasion he came to Ptolemais by sea. He was then on his return voyage from the third missionary journey. The last harbor at which he had reached was Tyre (ver. 3). From Ptolemais he proceeded, apparently by land, to Caesarea (ver. 8) and thence to Jeru-

* PTOLEMEE. *PTOLEMEEUS. *PTOLEMEEUS.* PTOLEMEEUS. A. V. in Esther (Apop.: and 1 and 2 Macabees. [PTOLEMEEUS.]

PCL (795) [787]: Φωάζ (Phoás), properly Puah. Φωάζ the son of Issachar (Num. xxvi. 21).

PCL (788) [altercana, Fürst; month, Ges.]: Φωάζ: Puah.

1. The father of Tola, a man of the tribe of Issachar, and judge of Israel after Abimelech (Judg. x. 1). In the LXX. Tola is said to be the son of Phuvah, the son (soon) of his father's brother; both versions endeavor to render “Φωάζ” as an epithet, while the latter introduces a remarkable genealogical difficulty.

2. [Vat. MSS.,] the son of Issachar (1 Chr. xi. 1), elsewhere called Phuvah and Pua.

3. (795) [praisefulness, beauty, Ges., Fürst]. One of the two midwives to whom Pharaoh gave instructions to kill the Hebrew male children at their birth (Ex. i. 15). In the A. V. they are called “Hebrew midwives;” a rendering which is not required by the original, and which is doubtful, both from the improbability that the king would have intrusted the execution of such a task to the women of the nation he was endeavoring to destroy, as well as from the answer of the women themselves in ver. 19, “for the Hebrew women are not like the Egyptian women;” from which we may infer that they were accustomed to attend upon the latter, and were themselves, in all probability, Egyptians. If we translate Ex. i. 18 in this way, “And the king of Egypt said to the women who acted as midwives to the Hebrew women,” this difficulty is removed. The two, Shiphrah and Puah, are supposed to have been the chief and representatives of their profession; as Aben Ezra says, “They were chiefs over all the midwives; for no doubt there were more than five hundred midwives, but these two were chiefs over them to give tribute to the king of the hire.” According to Jewish tradition, Shiphrah was Joche- deel, and Puah, Miriam; *because,* says Rashii, *they creased and talked and murmured to the child, after being for a time overweening in their protection of the infant.” The origin of all this is a play upon the name Phuvah, which is derived from a root signifying “to cry out,” as in Is. xii. 14 and used in Kabbalistic writings of the blighting of sleep.

W. A. W.

* There are some reasons for the other opinion with regard to Puah's nationality. It not being said that Pharaoh appointed the midwives, the more obvious supposition is that those who acted in this capacity among the Hebrews were women of their own race, and so much the more, as the Hebrews at this time lived apart from the Egyptians in their own separate province (see Ex. ix. 26). The fear of God ascribed to the midwives as the motive for their humanity (Ex. i. 19) leads us to think of them as Hebrews and not Egyptians; and, further, according to the best view, the names of the women (Puah, Shiphrah) are Semitic and not Egyptian. The rendering of the A. V. is the more obvious one (the construction like that in ver. 19), and is generally adopted.

**PUBLICAN** (τάλαγος; publicanus).

The word thus translated belongs only, in the N. T., to the three Synoptic Gospels. The class designated by the Greek word were employed as collectors of the Roman revenue. The Latin word from which the English of the A. V. has been taken was ap-

plied to a higher order of men. It will be necessary to glance at the financial administration of the Roman provinces in order to understand the relation of the two classes to each other, and the grounds of the hatred and scorn which appear in the N. T. to have fallen on the former.

The Roman senate had found it convenient, at a period as early as, if not earlier than, the second Punic war, to farm the *reipublica* (direct taxes) and the *portaria* (customs, including the *octoii on goods carried into or out of cities) to capitalists who were willing to pay a given sum in order to carry on the business (in *publicum*), and so received the name of *publiciui* (Livy. xxxii. 7). Contracts of this kind fell naturally into the hands of the *capitis, as the richest class of Romans. Not infrequently they went beyond the means of any individual capitalist, and a joint-stock company (*socitatis*) was formed, with one of the partners, or an agent appointed by them, acting as managing director (*magistratus; Com. of Brit. xxii. 9*). Under this officer, who resided commonly at Rome, transacting the business of the company, paying profits to the partners and the like, were the *sub-magistratis, living in the provinces. Under them, in like manner, were the *portiiores, the actual custom-house officers (commanders), who examined each hole of goods exported or imported, assessed its value more or less arbitrarily, wrote out the ticket, and enforced payment. The latter were commonly natives of the province in which they were stationed, as being brought daily into contact with all classes of the population. The word *talaius, which etymologically might have been used of the *publiciuii* properly so called (τάλαγος, δημοσιος), was used popularly, and in the N. T. exclusively, of the *portiiores. The publiciuii were thus an important section of the equestrian order. An orator wishing, for political purposes, to court that order, might describe them as *the equitum Romanorum, ornamen-
tum civilitatis, firmamentum Equitum* (Tac. *pro Planc. p. 9*). The system was, however, es-
sentially a vicious one, the most detestable, perhaps, of all forms of managing a revenue (comp. Adam Smith, *Wealth of Nations* v. 2); and it bore its natural fruits. The *publiciuii* were handed together to support each other's interest, and at once recoiled and defied all interference (Livy. xxv. 3). They demanded severe laws, and put every such law into execution. Their agents, the *portiiors, were encouraged in the most vexatious or fraudulent excursions, and a remedy was all but impossible. The popular feeling ran strong even against the equestrian capitalists. The Macedoni-

ans complained, as soon as they were brought under Roman government, that, *ubi publicanus est, ibi non publicanum, non libertas sociæ*
nulls" (Liv. xiv. 18). Cicero, in writing to his brother (ad Quint. i. 1, 11), speaks of the difficulty of keeping the publicani within bounds, and yet not offending them, as the hardest task of the govern- or of a province. Tacitus counted it as one bright feature of the ideal life of a people unlike his own, that there "nec publicani atterit" (Germ. p. 23). For a moment the capricious liberalism of Nero led him to entertain the thought of saving some of these hated system of publicani, but the conservation of the senate, servile as it was in all things else, rose in arms against it, and the scheme was dropped (Tac. Ann. xiii. 50); and the "inmodesta publicamorurum" (ibid.) remained unchecked.

If this was the case with the directors of the company, we may imagine how it stood with the underlings. They overcharged whenever they had an opportunity (Luke iii. 13). They brought false changes of smuggled in the hope of extorting hush-money (Luke xix. 8). They detained and opened letters on mere suspicion (Terent. Phorm. i. 2, 99; Plaut. Trinum. iii. 3, 64). The injure portumani, rather than the portuaria themselves, were in most cases the subjects of complaint (Cic. ad Pol. 10). Among the heathen there were the lowest classes of human society (Stoic., Serv. ii. 34). "Πάντες τελεφιά, πάντες ἀτάφεια" had become a proverb, even under an earlier régime, and it was truer than ever now (Xeno. Com. ap. Dacier. Meineke, Frag. Com. iv. 580).

All this was enough to bring the class into illfavor everywhere. In Judæa and Galilee there were special circumstances of aggravation. The employment brought out all the besetting vices of the Jewish character. The strong feeling of many Jews as to the absolute unlawfulness of paying tribute at all made matters worse. The Seribes who discussed the question (Matt. xxvii. 15) for the most part answered it in the negative. The followers of Judas of Galilee had made this the special grievance against which they rose. In addition to their other faults, accordingly, the Publicans of the N. T. were regarded as traitors and apostates, defiled by their frequent intercourse with the heathen, willing tools of the oppressor. They were classed with sinners (Matt. ix. 11, xii. 2), with harlots (Matt. xxvi. 31, 52), with the heathen (Matt. xvii. 17). In Galilee they consisted probably of the least reputable members of the fisherman and peasant class. Left to themselves, men of decent lives holding aloof from them, their only friends or companions were found among those who like themselves were outcasts from the world's law. Seribes and people alike hated them as priests and peasants in Ireland have hated a Roman Catholic who took service in collecting tithes or evicting tenants.

The Gospel present us with some instances of this feeling. To eat and drink "with publicans" seems to the Pharisaic mind incompatible with the character of a recognized Rabbi (Matt. ix. 11). They spoke in their scorn of our Lord as the friend of publicans (Matt. xi. 19). Italianic writings furnish some curious illustrations of the same feeling. The Chaldæe Targum and R. Solomon find in "the archers who sit by the waters" of Judg. vi. 11, a description of the τελεφιαι sitting on the banks of rivers or seas in ambush for the wayfarer. The consistancy of the Talmud enumerates three classes of men with whom promises need not be kept and the three upper orders, thieves, and publicans (Yebhr. iii. 4). No money known to come from them was received into the alms-box of the synagogue or the Corban of the Temple (B'thr. kome, x. 1). To write a publican's ticket, or even to carry the ink for it on the Sabbath-day was a distinct breach of the commandment (Shabb. viii. 3).

They were not fit to sit in judgment, or even to give testimony (Sukkah ii. 25, 2). Some times there is an exceptional notice in their favor. It was recorded as a special excellence in the father of a Rabbi that, having been a publican for thirteen years, he hadlessened instead of increasing the pressure of taxation (ibid.). (The references are taken, for the most part, from Lighto.) The class thus practically excommunicated furnished some of the earliest disciples of the Baptist and of our Lord. Like the outlying, so-called "dangerous classes" of other times, they were at least free from hypocrisy. Whatever morality they had, was real and not conventional. We may think of the Baptist's preaching as having been to them what Wesley's was to the colliers of Kingswood or the Cornish miners. The publican who cried in the bitterness of his spirit, "God be merciful to me a sinner" (Luke xviii. 13), may be taken as the representative of those who had come under this influence (Matt. xxi. 32). The Galilean fishermen had probably learnt, even before their Master taught them, to overcome their repugnance to the publicans with who them had been sharers in the same baptism. The publicans (Matthew perhaps among them) had probably gone back to their work learning to exact no more than what was appointed them (Luke iii. 13). However startling the choice of Matthew the publican to be of the number of the Twelve may have seemed to the Pharisees, we have no trace of any perplexity or offense on the part of the disciples.

The position of ZACEHAUS as an ἀποστελέωτης (Luke xix. 2) implies a gradation of some kind among the persons thus employed. Possibly the balsam trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the sub magistri in immediate communication with the Bureau at Rome. That it was possible for even a Jewish publican to attain considerale wealth, we find from the history of John the τελεφιάς (Joseph B. J. ii. 14, § 4), who acts with the leading Jews and offers a tribute of eight talents to the Procurator, Gessius Florus. The fact that Jericho was at this time a city of the priests—12,000 are said to have lived there—gives, it need hardly be said, a special signification to our Lord's preference of the house of Zacehaus.

E. H. P.
PUBLIUS

PUBLIUS (PUBLIUS: Publius). The chief man — probably the governor — of Melita, who received and lodged St. Paul and his companions on the occasion of their being shipwrecked off that island (Acts xxviii. 7). It soon appeared that he was entertaining an angel unawares, for St. Paul gave proof of his divine commission by miraculously healing the father of Publius from a fever, and afterwards working other cures on the sick who were brought unto him. Publius possessed property in Melita: the distinctive title given to him is "the first of the island;" and two inscriptions, one in Greek, the other in Latin, have been found at Citta Vecchia, in which that apparently official title occurs (Alford). Publius may perhaps have been the delegate of the Roman praetor of Sicily to whose jurisdiction Melita or Malta belonged. The Roman martyrology asserts that he was the first bishop of the island, and that he was afterwards appointed to succeed Dionysius as bishop of Athens. St. Jerome records a tradition that he was crowned with martyrdom (De Viris illust. xii.; Baron. i. 554). E. H. S.

* The best information which we can obtain respecting the situation of Malta at the time of Paul's visit, seems to be doubtful, to say the least, whether the interpreters are in the right as it regards the station of Publius. In a Greek inscription of an earlier date we find mention made of two persons holding the office of archon or magistrate in the island. A later inscription of the times of the Emperors may be translated as follows: "Lucius Publius, son of Claudia, of the tribe Quirinius, a Roman citizen, first [πατριάρχης] as in Acts and near to the Melitans, after being magistrate and having held the post of flamen to Augustus, erected this." Here it appears that the person named was still chief man of the island, although his magistracy had expired. From this inscription and others in Latin found at Gozzo, it is probable that the inhabitants of both islands had received the privilege of Roman citizenship, and were enrolled in the tribe Quirinius. "The magistracy was, no doubt, that of the Decuriones, the usual municipal chief officers. The other titles correspond with titles to be met with on marbles relating to towns in Italy. Thus the title of chief corresponds to that of praecon in the colony of Pisa, and is probably no more a name of office than the title of praetor. For no such officer is known to have existed in the colonies or in the municipia, and the praecon coloniae of Pisa is mentioned at a time when it is said that owing to a contention between candidates there were no magistrates. T. D. W.

PUDENS (PUDENS: Pudens), a Christian friend of Timothy at Rome. St. Paul, writing about A. D. 68, says, "Enthusiastic greetings, thee, and Pudens, and Linus, and Claudia" (2 Tim. iv. 21). He is commemorated in the Byzantine Church on April 14; in the Roman Church on May 19. Paul's letter to the Romans includes a list of the disciples given by Pseudo-Hippolytus. Pappelrod, the Hollandist editor (Acta Sanctorum, Maii, tom. iv. p. 296), while printing the legendary histories, distinguishes between two saints of this name, both Roman senators; one the host of St. Peter and friend of St. Paul, martyred under Nero; the other, the grandson of the former, living about A. D. 150, the father of Novatus, Timothy, a Praxeides, and Pudentiana, whose house, in the valley between the Viminal hill and the Esquiline, served in his lifetime for the assembly of Roman Christians, and afterwards gave place to a church, now the Church of St. Pudentiana, a short distance at the back of the Basilica of St. Maria Maggiore. Earlier writers (see Grotius, Ann. A. D. 54; Ann. 55; § 18; Ann. 162) are disposed to believe in the existence of one Pudens only.

About the end of the 16th century it was observed (F. de Moneuse, Eccl. Christiana veteris Britanniae inveniabilis, Tournoy, 1614; Estius, or his editor; Abp. Parker, De Antiquit. Britton., Eccl. 1605; M. Alford, Annales Brit. 1663; Camden, Britannia, 1586) that Martial, the Spanish poet, who went to Rome A. D. 66, or earlier, in his 23rd year, and dwelt there for nearly forty years, mentions two contemporaries, Pudens and Claudia, as husband and wife (Epigr. iv. 13): that he mentions Pudens or Albus Pudens in i. 32, iv. 29, v. 48, vi. 58, vii. 11, 57; Claudia or Claudia Rufina in viii. 59, ix. 53; and, it might be added, Linus, in i. 76, ii. 54, iv. 56, vi. 29, vii. 49. According to Martial he should have each three friends bearing the same names at the same time and place, is at least a very singular coincidence. The poet's Pudens was his intimate acquaintance, an adoring critic of his epigrams, an immoral man if judged by the Christian rule. He was an Umbrian and a soldier: first he appears as a centurion aspiring to become a principalis; afterwards he is on military duty in the remote north; and the poet hopes that on his return thence he may be raised to equestrian rank. His wife Claudia is described as of British birth, of remarkable beauty and wit, and the mother of a flourishing family.

A Latin inscription found in 1723 at Chichester connects a [Pudens] with Britain and with the Claudian name. It commemorates the erection of a temple by a guild of carpenters, with the sanction of King Tiberius Claudius Cogulalbus, the site being the gift of [Pudens] the son of Pudentius. Cogulalbus was a native king appointed and supported by Rome (Tac. Agr. 14). He reigned with delegated power probably from A. D. 52 to A. D. 76. If he had a daughter she would inherit the name Claudia and might, perhaps, as a hostage, be educated at Rome.

Another link seems to connect the Romanizing Britons of that time with Claudia Rufina and with Christianity (see Musgrave, quoted by Fabriicus, Lat Frangiculi, p. 702). The wife of Albus Pudens, who commanded in Britain from A. D. 43 to A. D. 52, was Pompachia Gracina, and the Rufi were a branch of her house. She was accused at Rome, A. D. 57, on a capital charge of "foreign superstition;" was acquitted, and lived for nearly forty years in a state of anstere and mysterious melancholy (Tac. Ann. xiii. 32). We know from the Epistle to the Romans (xiv. 13) that the Rufi were well represented among the Roman Christians in A. D. 58.

Modern researches among the Columbaria at

qui in or [a sacrar sint] de uno dedicarn, domum aemum [Pudens, Pudentini filius]. A corner of the stone was broken off, and the letters within brackets have been inserted on conjecture.
PULITES, THE

Rome appropriated to members of the Imperial household have brought to light an inscription in which the name of Puludes occurs as that of a servant of Titinius or Claudio (Journal of Classical and Sacred Philology, iv. 76).

On the whole, although the identity of St. Paul's Puludes with any legendary or heathen namesake is not absolutely proved, yet it is difficult to believe that these facts add nothing to our knowledge of the friend of Paul and Timothy. Future discoveries may go beyond them, and decide the question. They are treated at great length in a pamphlet entitled Claudii et Puludae, by Archdeacon Williams, Llandover, 1848, p. 58; and more briefly by Dean Alfred, Greek Testament, iii. 194, ed. 1856; and by Conybeare and Howson, Life of St. Paul, ii. 594, ed. 1838. They are ingeniously woven into a pleasing romance by a writer in the Quarterly Review, vol. xcvii. pp. 100-105. See also Ussher, Execl. Brit. Antiquities, § 3, and Stillhuding's Antiquities. [Claude, Amer. ed.]

PULITES, THE (プルタテ [patr]: מַרְדְּאָל [Yat. Mr'daleh]; Alex. "Puladai, Apalthais.") According to 1 Chr. v. 53, the "Pulites" or "Pultites" belonged to the families of Kirjath-jearim. There is a Jewish tradition, embodied in the Targum of R. Josepi, that these families of Kirjath-jearim were the sons of Moses whom Zipporah bore him, and that from them were descended the disciples of the prophets of Zorah and Esdrael.

PUL (プル [see below]: פול; some cold. פולא: Αφίνες), a country or nation once mentioned, if the Masoretic text be here correct, in the Bible (Is. livi. 19). The name is the same as that of Pul, king of Assyria. It is spoken of with distant nations: "the nations (בּוֹלְמָנָה [to] Tarashih, Pul, and Lud, that draw the bow: [to] Tubal, and Javan, [to] the isles afar off." If a Mizratic Lud be intended [Lud, Ludim], Pul may be African. It has accordingly been compared by Bochart (Phelet. iv. 26) and J. D. Michaelis (Spicileg., i. 256; ii. 114) with the island Phibis, called in Copitc ἥπεξκ, Ἰådek, Ἰάδακ-κ; the hieroglyphic name being Ἑἰλὲκ, Ἑ-էἰλὲκ, Ἑ-էἰλέκ-τ. If it be not African, the identity of the king's name is to be noted, as we find Shishak [シシャク] as the name of a king of Egypt of Babylonian or Assyrian race, and Sheshak [シシャク], which some rashly take to be artificially formed after the cabbalistic manner from Bab (בְּבֵל) for Babylon itself, the difference in the final letter probably arising from the former name being taken from the Egyptian SHESHEK. In the line of Shishak, the name TAKEFAT has been compared by Birk with forms of that of the Tigris تيزرا وفلسط، which Gesenius has thought to be identical with the first part of the name of Tighath-Pileser (Thes. n. v.).

The common LXX. reading suggests that the Heb. had originally Phut (Put) in this place, although we must remember, as Gesenius observes (Thes. s. v. פַּעַת), that פַּעַת could be easily changed to פַּעַד by the error of a copyist. Yet in three other places Put and Lud occur together (Jer. xiv. 9; Ez. xxviii. 10; xxx. 5). [Ludim.

The circumstance that this name is mentioned with names or designations of importance, makes it nearly certain that some great and well-known country or people is intended. The balance of evidence is therefore almost decisive in favor of the African Phut or Put. [Thur.]

R. S. P.

PUL (プル [see above]): פולא, פולאכ; "Alex. in Chr. פולאכ: Phul) was an Assyrian king, and in the first of those monarchs mentioned in Scripture. He made an expedition against Menahem, king of Israel, about b. c. 770. Menahem appears to have inherited a kingdom which was already included among the dependencies of Assyria; for as early as b. c. 849, Jehu gave tribute to Shalmanesar, the king of Assyria, who, as we see, compare p. 208 (6), and if Judah was, as she seems to have been, a regular tributary from the beginning of the reign of Amaziah (b. c. 838). Sennacherib, which lay between Judah and Assyria, can scarcely have been independent. Under the Assyrian system the monarchs of tributary kingdoms, on ascending the throne, applied for "confirmation in their kingdoms" to the Lord Paramount, and only became established on receiving it. We may gather from 2 K. xv. 19, 20, that Menahem neglected to make any such application to his liege lord, Pul—a neglect which would have been regarded as a plain act of rebellion. Possibly, he was guilty of more overt and flagrant hostility. "Menahem smote Tepishah" (2 K. xv. 16), we are told. Now if this Tepishah is the same with the Tiphath of 1 K. iv. 24, which is certainly Taphacaeus, — and it is quite a gratuitous supposition to hold that there were two Tepishals (Winer, Realarb. ii. 613), — we must regard Menahem as having attacked the Assyrians, and deprived them for a while of their dominion west of the Euphrates, recovering in this direction the boundary fixed for his kingdom by Solomon (1 K. iv. 24). However this may have been, it is evident that Pul looked upon Menahem as a rebel. He consequently marshalled an army into Palestine for the purpose of punishing his revolt, when Menahem hastened to make his submission, and having collected by means of a poll-tax, the large sum of a thousand talents of gold, he paid it over to the Assyrian monarch, who consented thereupon to "confirm" him as king. This is all that Scripture tells us of Puli. The Assyrian monuments have a king, whose name is read very doubtfully as Val-tish or Iv-tish, at about the period when Pul must have reigned. This monarch is the grandson of Shalmaneser (the Black-Ellobek king, who warred with Ben-hadad and Hazael, and took tribute from Jehu), while he is certainly anterior to the whole line of monarchs forming the lower dynasty—Tiglath-Pileser, Shalmaneser, Sargon, etc. His probidial name therefore is n. 890-750, while Pul, as we have seen, ruled over Assyria in b. c. 770. The Hebrew name Pul is undoubtedly curtailed; for no Assyrian name con-

don was confirmed in his band " (2 K. xiv. 5; comp xv. 19).
PULPIT

and stand; during after succeeded Pentateuch) less part usurjjer, eassert have ancestor, The monumental himself on Nabonassar was local cians, talilislied, with nearer for 2640 high * much Nabonassar was, his reduction to the position of tribute to Asshnr, his reputation of 750. It thus reduction of the Anu, which of Ctesias, as estalilised, the other "will jutice" executed even to the present day be so many of the civilized races of mankind. The prevalence of a feeling of retaliation due for bloodshed may be remarked as arising among the brethren of Joseph in reference to their virtual fratricide (Gen. xxii. 21).

PULPIT, only in Neh. viii. 4, the rendering of **(generally "tower" in the A. V.), a high stage or platform erected in the open space (less correctly "street," A. V.) before one of the gates at Jerusalem, from which Ezra and other Levites read and explained the Law of Moses (the Pentateuch) to the assembled people. This was after the return from the Babylonian captivity, during which the language of the Jews had changed so much that many words in the Hebrew Scriptures required interpretation and explanation. The Targums or Chalde transcriptions which formed so important a part of the later Jewish literature, grew out of this necessity. [VERSIONS, ANCIENT (TAJRUM).] Yet another object of Ezra's public recitals no doubt was to promote among the Jews who in the language of the Jews in which they had too much neglected in their exile, and to assert the authority of the Law. We may add that the word "pulpit" has come to us from the Latin pulpitum, which among the Romans was the part of the stage (as distinguished from the orchestra) on which the actors performed their parts. The word, as thus applied, forms an exception to the general rule, for most of our ecclesiastical terms are derived from the Greek.

PULSES (πρήγματα, σήριναι, and τερπινόν τέρπηνα, zìrìni: σήρεπα: Θεσον τα Aντίγουα της γενεας occurs only in the A. V. in Dan. iii. 12, 16, as the translation of the above plural nouns, the literal meaning of which is "seeds" of any kind. The zèrìnì on which the "four children" thrived for ten days is perhaps not to be restricted to what we now understand as "pulses," i.e. the grains of leguminous vegetables; the term probably includes edible seeds in general; thus translates the words "vegetables, herbs, such as are eaten in bolt-fast, as opposed to flesh and more delicate food." Probably the term denotes uncooked grains of any kind, whether barley, wheat, millet, vetches, etc.

PUNISHMENTS. The earliest theory of punishment current among mankind is doubtless the one of simple retaliation, "blood for blood" [BLOOD, REVENGE OF], a view which in a limited form appears even in the Mosaic law. Viewed historically, the first case of punishment for crime mentioned in Scripture, next to the Fall itself, is that of Cain the first murderer. His punishment, however, was a substitute for the retaliation which might have been looked for from the hard of man, and the mark set on him, whatever it was, served at once to designate, protect, and perhaps correct the criminal. That death was regarded as the fitting punishment for murder appears plain from the remark of Lamech (Gen. iv. 24). In the post-diluvian code, if we may so call it, retribution by the hand of man, even in the case of an offending animal, for blood shed, is clearly laid down (Gen. ix. 5, 6); but its terms give no sanction to that "will jutice" executed even to the present day by individuals and families on their own behalf so many of the civilized races of mankind. The prevalence of a feeling of retribution due for bloodshed may be remarked as arising among the brethren of Joseph in reference to their virtual fratricide (Gen. xxii. 21).

Passing on to Mosiac times, we find the sentence of capital punishment in the case of murder, plainly laid down in the law. The murderer was to be put to death, even if he should have taken refuge at God's altar or in his sanctuary city, and the same principle was to be carried out even in the case of an animal (Ex. xii. 14, 29, 36; Lev. xxiv. 17, 21; Num. xxxvi. 31; Deut. xix. 11, 12; and see 1 K. ii. 28, 34).

1. The following offenses also are mentioned in the Law as liable to the punishment of death:
   1. Striking, or even reviling, a parent (Ex. xix. 15, 17).
   2. Blasphemy (Lev. xvii. 14, 16, 22; see Philo, 1. M. iii. 25; 1 K. xii. 10; Matt. xxvi. 65, 66).
   3. Sabbath-breaking (Num. xvi. 32-36; Ex. xxxi. 14, xxv. 22).
   4. Witchcraft, and false pretension to prophecy (Ex. xxi. 18; Lev. xxv. 27; Deut. xiii. 5, xviii. 20; I Sam. xxvii. 5, 9).
   5. Adultery (Lev. xix. 10; Deut. xxii. 22; see John viii. 5, and Joseph. Ant. iii. 12, § 1).
   6. Unchastity, (c.) previous to marriage, but detected afterwards (Deut. xxi. 21). (b.) In a betrothed woman with some one not allied to her (ib. ver. 23). (c.) In a priest's daughter (Lev. xxi. 9).
   7. Rape (Deut. xxii. 25).
PUNISHMENTS

8. Incestuous and unnatural connections (Lev. xx. 11, 14, 15; Ex. xxii. 19).

9. Man-stealing (Ex. xxi. 16; Deut. xxiv. 7).

10. Idolatry, actual or virtual, in any shape (Lev. xx. 2; Deut. xii. 6, 10, 13, xviii. 2-7; see Josh. vii. and xii. 20, and Num. xx. 8).

11. False witness in certain cases (Deut. xix. 16, 19).

Some of the foregoing are mentioned as being in earlier times liable to capital or severe punishment by the hand either of God or of man, as (6.) Gen. xxviii. 21; (1.) Gen. ix. 29; (3.) Gen. xix. xvii. 10; (5.) Gen. xii. 17, xx. 7, xxix. 19.

11. But there is a large number of offenses, some of them included in this list, which are named in the Law as involving the penalty of "cutting off from the people." On the meaning of this expression some controversy has arisen. There are altogether thirty-six or thirty-seven cases in the Pentateuch in which this formula is used, which may be thus classified: (a) Breach of Moras. (b) Breach of Covenant. (c) Breach of Ritual.

1. Willful sin in general (Num. xv. 30, 31).

*15 cases of incestuous or unnatural connection (Lev. xvii. 24, and xx. 9-21).

1. *Unreconciliation (Gen. xvii. 14; Ex. iv. 24).

Neglect of Passover (Num. ix. 13).

*Saboth-breaking (Ex. xxxi. 14).

Neglect of Atone ment-day (Lev. xxiii. 29).

†Work done on that day (Lev. xxiii. 30).

*Children offered to Molech (Lev. xx. 3).

*Witchcraft (Lev. xx. 6).

Anointing a stranger with holy oil (Ex. xxx. 31).

3. Eating leavened bread during Passover (Ex. xii. 15, 19).

Eating fat of sacrifices (Lev. xvi. 27).

*Eating in an unclean condition (Lev. xii. 21, 20; Ex. xxx. 31).

Offering too late (Lev. xvi. 6).

Making holy ointment for private use (Ex. xxx. 31).

Making perfume for private use (Ex. xxx. 31).

Neglect of purification in general (Num. xiii. 20).

Not bringing offering after slaying a beast for food (Lev. xxvi. 9).

Not slaying the animal at the tabernacle-door (Lev. xvi. 4).

† Touching holy things illegally (Num. iv. 15, 18, 29; and see 2 Sam. vi. 7; 2 Chr. xxxvi. 21).

In the foregoing list, which, it will be seen, is classified according to the view supposed to be taken by the Law of the principle of condemnation, the cases marked with * are (a) those which are expressly threatened or actually visited with death, as well as with cutting off. In those (b) marked † the hand of God is expressly named as the instrument of execution. We thus find that of (a) there are in class 1, 7 cases, all named in Lev. xx. 3-16. class 2, 4 cases, class 3, 2 cases, while of (b) we find in class 2, 4 cases, of which 3 belong also to (a), and in class 3, 1 case. The question to be determined is, whether the phrase "cut off" be likely to mean death in all cases, and to avoid that conclusion Le Clerc, Michaelis, and others, have suggested that in some of them, the ceremonial one (2) it was intended to be commuted for banishment or privation of civil rights (Mich. Laws of Moses, p. 237, vol. iii. p. 496, trans.). Rabbinical writers explained "cutting off" to mean excommunication, and hint down three degrees of severity as belonging to it (Selden, de Syn. i. 6). [ANATHEMA.] But most commentators agree, that, in accordance with the premat. face meaning of Heb. "cutting off", the sentence of "cutting off" must be understood to be death-punishment of some sort. Salschutz explains it to be premature death by God's hand, as if God took into his own hand such cases of ceremonial defilement as would create difficulty for human judges to decide. Knobel thinks death-punishment absolutely is meant. So Corn. a Lapide and Ewald. Jahn explains, that when God is said to cut off, an act of divine Providence is meant, which in the end destroys the family, but that "cutting off" in general means stoning to death as the usual capital punishment of the Law. Calmet thinks it means privation of all rights belonging to the Covenant. It may be remarked (a), that two instances are recorded, in which violation of a ritual command took place without the actual infliction of a death-punishment: (1) that of the priest eating of the blood (Lev. xii. 32); (2) that of Uzziah (2 Chr. xxvi. 19, 21) — and that in the latter case the offender was in fact excommunicated for life; (b), that there are also instances of the directly contrary course, namely, in which the offenders were punished with death for similar offenses, — Nadab and Abihu (Lev. x. 1, 2), Korah and his company (Num. xvi. 10, 33), who were punished from the congregation. Uzziah (2 Sam. vi. 7). — and further, that the leprosy indicted on Uzziah might be regarded as a virtual death (Num. xiii. 12). To whichever side of the question this case may be thought to incline, we may perhaps conclude that the primary meaning of "cutting off" is a sentence of death to be executed in some cases without remission, but in others voidable: (1) by immediate atonement on the offender's side by direct intercession (2) by direct propitiation. Almighty, i. e. a sentence of death always "recorded," but not always executed. And it is also probable that the severity of the sentence produced in an immediate recourse to the prescribed means of propitiation in almost every actual case of ceremonial defilement (Num. xiv. 27, 28; Saulschutz, Arch. Hebr. x. 74, 75, vol. ii. 299; Knobel, Calmet, Corn. a Lapide on Gen. xvii. 13, 14; Keil, Bibl. Arch., vol. ii. 264, § 153; Ewald, Geschichte App. to vol. iii. p. 158; Jahn, Arch. Bibl. § 257).

III. Punishments in themselves are twofold, Capital and Secondary.

(a.) Of the former kind, the following only are prescribed by the Law. (1) Stoning, which was the ordinary mode of execution (Ex. xvi. 7; Luke xx. 6; John x. 31; Acts xiv. 5). We find it ordered in the cases which are marked in the list above as punishable with death: and we may remark further, that it is ordered also in the case of an offending animal (Ex. xii. 24, and xiii. 15). The false witness also, in a capital case, would by the law of retaliation become liable to death (Deut. xix. 19: Maccab. i. 6). In the case of idolatry, and it may be presumed in other cases also, the witnesses, of whom there were to be at least two, were required to cast the first stone (Deut.
Punishments

xiii. 9, xvii. 7; John viii. 7; Acts vii. 58). The Rabbinical writers add, that the first stone was cast by one of them on the chest of the convict, and if this failed to cause death, the bystanders proceeded to complete the sentence. (Sanhed. vi. 1, 3, 4; Godwyn, Moses and Aaron, p. 121.) The body was then to be suspended till sunset (cf. Deut. xxi. 24; Josh. x. 26; Joseph. Ant. iv. 8, § 24), and not buried in the family grave (Sanhed. vi. 5.)

(2.) Hanging is mentioned as a distinct punishment (Num. xxiv. 4; 2 Sam. xxi. 6, 9); but is generally, in the case of Jews, spoken of as following death by some other means.

(3.) Burning, in pre-Mosaic times, was the punishment for uncleanness (Gen. xxxviii. 24). Under the Law it is ordered in the case of a priest's daughter (Lev. xxi. 9), of which an instance is mentioned (Sanhed. vii. 2). Also in case of incest (Lev. xxi. 14); but it is also mentioned as following death by other means (Josh. vii. 25), and some have thought it was never used excepting after death. A tower of burning embers is mentioned in 2 Macc. xiii. 4–8. The Rabbinical account of burning for means of molestation poured down the throat has no authority in Scripture.

(4.) Death by the sword or spear is named in the Law (Ex. xiv. 13, xxxii. 27; Num. xxxv. 7); but two of the cases may be regarded as exceptional; but it occurs frequently in regal and post-Babylonian times (1 K. ii. 25, 34, xiv. 1; 2 Chr. xvi. 4; Jer. xxvi. 23; 2 Sam. i. 15, iv. 12, xx. 22; 1 Sam. xx. 34, xxxii. 18; Judg. ix. 5; 2 K. x. 7; Matt. xiv. 8, 10), a list in which more than one case of assassination, either with or without legal forms, is included.

(5.) Strangling is said by the Rabbis to have been regarded as the most common but least severe of the capital punishments, and to have been performed by immersing the convict in clay or mud, and then strangling him by a cloth twisted round the neck (Godwyn, Moses and Aaron, p. 122). Otho, Lec. Rob. s. v. Suppl. a: "Sanhed. vii. 2: Ker Porter, Trut. ii. 177; C. B. Michaelis, De Jud. dec., ap. Post. Syn. Comm. iv. §§ 10, 12.

This Rabbinical opinion, founded, it is said, on oral tradition from Moses, has no Scripture authority.

(b.) Besides these ordinary capital punishments, with which others, either of foreign introduction or of an irregular kind. Among the former (1.) Crucifixion is treated alone (vol. i. p. 513), to which article the following remark may be added, that the Jewish tradition of capital punishment, independent of the Roman governor, being interdicted for forty years previous to the Destruction, appears in fact, if not in time, to be justified (John xviii. 31, with De Witt's Comment.; Godwyn, p. 121; Kell, ii. 204: Joseph. Ant. xx. 9, § 1).

(2.) Decapitation, though not ordered under the Law, was practiced at Rome, and is said by St. Jerome to have been in use among the Jews (C. pro. Scit. Rew. Am. 25; Jerome, Com. on Matthew, lib. iii. p. 138; Matt. xviii. 6; Mark iv. 42). [Miller, Amer. ed.]

xvi. 31 with De Witt's Comment.; Godwyn, p. 121; Kell, ii. 204: Joseph. Ant. xx. 9, § 1).

(2.) Decapitation, though not ordered under the Law, was practiced at Rome, and is said by St. Jerome to have been in use among the Jews (C. pro. Scit. Rew. Am. 25; Jerome, Com. on Matthew, lib. iii. p. 138; Matt. xviii. 6; Mark iv. 42). [Miller, Amer. ed.]

xvi. 31 with De Witt's Comment.; Godwyn, p. 121; Kell, ii. 204: Joseph. Ant. xx. 9, § 1).

(2.) Decapitation, though not ordered under the Law, was practiced at Rome, and is said by St. Jerome to have been in use among the Jews (C. pro. Scit. Rew. Am. 25; Jerome, Com. on Matthew, lib. iii. p. 138; Matt. xviii. 6; Mark iv. 42). [Miller, Amer. ed.]

xvi. 31 with De Witt's Comment.; Godwyn, p. 121; Kell, ii. 204: Joseph. Ant. xx. 9, § 1).

(2.) Decapitation, though not ordered under the Law, was practiced at Rome, and is said by St. Jerome to have been in use among the Jews (C. pro. Scit. Rew. Am. 25; Jerome, Com. on Matthew, lib. iii. p. 138; Matt. xviii. 6; Mark iv. 42). [Miller, Amer. ed.]

PUNISHMENTS

Syr. ii. c. 13, p. 888). Before death a graa. of frankincense in a cup of wine was given to the criminal to intoxicate him (ib. 889). The command for witnesses to cast the first stone shows that the duty of execution did not belong to any special officer (Deut. xxi. 7).

Of punishments inflicted by other nations we have the following notices: In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (Gen. xl. 3, 22, xlii. 20). Death might be commanded for slavery (xlii. 19, xliv. 9, 33). The law of retaliation was also in use in Egypt, and the punishment of the bastinado, as represented in the paintings, agrees better with the Mosaic directions than with the Rabbinitical (Wilkinson, A. E. ii. 214, 215, 217). In Egypt, and also in Babylon, the chief of the executioners, Rob-Tobachkim, was a great officer of state (Gen. xxxvii. 36, xxxix. 13; Dan. ii. 14; Jer. xxxix. 13, xlii. 10, xliii. 6, lii. 15, 16; Michaelis, iii. 412; Joseph. Ant. x. 8, § 5 [Cherethim]; Mark vi. 27). He was sometimes a eunuch (Joseph. Ant. vii. 5, § 4).

Putting out the eyes of captives, and other cruelties, as flaying alive, burning, tearing out the tongue, etc., were practiced by Assyrian and Babylonian conquerors; and parallel instances of despotic cruelty are found in abundance in both ancient and modern times in Persian and other history. The execution of Haman and the story of Daniel are pictures of summary Oriental procedure (2 K. xxv. 7; Esth. vii. 9, 10; Jer. xxix. 22; Dan. iii. 6, vi. 7, 24; Her. vii. 39, ix. 112, 113; Chardin, Voy. vi. 21, 118; Layard, Nineveh, ii. 369, 374, 377, Nin. & Bab, pp. 496, 497). And the duty of counting the numbers of the victims, which is there represented, agrees with the story of Jeth (2 K. x. 7) and with one recorded of Siah Abbas Mirza, by Ker Porter (Travels, i. 524, 525; see also Burchardt, Syria, p. 57; and Malcolm, Sketches of Persia, p. 47).

With the Romans, stripes and the stocks, ζυλος, נורוס and columbar, were in use, and imprisonment, with a chain attached to a sol-

dier. There were also the libera cust-die in private houses [Plutarch] (Acts xvi. 23, xxi. 24, xxviii. 16; Xen. Hellen. iii. 3, 11; Herod. ix. 37; Plutus, Rudd iii. 6, 30, 34, 38, 59; Arist. Eq. 1044 (ed. Bekker), Joseph. Ant. xviii. 6, § 7, xix. 6, § 1; Sall. Cat. 47; Dict. of Antiq. "Flagrum").

* Steaking on the mouth (as inflicted on Paul, Acts xxiii. 2), was a punishment for speaking with undue liberty or insolence. It signified that the mouth must be shut which uttered such speech. Travellers report instances of this practice still in the East. "As soon as the ambassador came," says Morier (Second Journey through Persia, p. 8), "he punished the principal officers by causing them to be beaten before him; and those who had spoken their minds too freely, he smote upon the mouth with a shoe." For another illustration see p. 94 of the same work. H. W. P.

PUNITIVES, THE (πανίτια; δ φυάδα: Plu-

aita). The descendants of Ptn, or Phurah, the son of Issachar (Num. xxvi. 23).

PUNON (που, i. e. Phunon [aree-phit, Fürst; darkness (?), Ge.s.] Samarit. που: [Var.] φωνέω; [Rom.] Alex. φωνάω; [Abl. φωνέω: Phunon]). One of the halting-places of the Israelite host during the last portion of the Wandering (Num. xxxiii. 42, 43). It lay beyond Zalmonah, between it and Oboth, and three days' journey from the mountains of Alarim, which formed the boundary of Moab. By Eusebius and Jerome (Onomasticon, φωνέω, "Fon") it is identified with Picon, the seat of the Edomite tribe of that name, and, further, with Pichno, which contained the copper-mines so notorious at that period, and was situated between Petra and Zoor. This identification is supported by the form of the name in the LXX. and Samaritan; and the situation falls in with the requirements of the Wandering. No trace of such a name appears to have been met with by modern explorers.

* Among the ruined places on the caravan road east of Mt. Seir, Sectzen's Arab guide mentioned to him a certain Koldat (i. e. Castle) Phenda (Zach's Monatl.corr. xxvii. 157). This is conjectured by L. Volter (Zeller's Bibl. Wörterb. ii. 257) and others to be the Punon or Phunon referred to in Numbers, as above. A.

PURIFICATION. The term "purification," in its legal and technical sense, is applied to the ritual observances whereby an Israelite was formally absolved from the guilt of uncleanness, whether evidenced by any overt act or state, or whether connected with man's natural depravity. The cases that demanded it in the former instance are defined in the Levitical law [Uncleanness]; with regard to the latter, it is only possible to lay down the general rule that it was a fitting prelude to any nearer approach to the Dolya: as, for instance, in the admission of a proselyte to the con greation [Proselyte], in the baptism [γινώσκω, John iii. 25] of the Jews as a sign of repentance [Baptism], in the consecration of priests and Levites [Priest; Levite], or in the performance of special religious acts (Lev. xvi. 4 2 Chr. xxx. 19). In the present article we are concerned solely with the former class, inasmuch as in this alone were the ritual observances of a special character
The essence of purification, indeed, in all cases, consisted in the use of water, whether by way of ablation or aspersions; but in the major delicts of legal uncleanliness, sacrifices of various kinds were added, and the ceremonies throughout bore an expiatory character. Simple ablation of the person was required after sexual intercourse (Lev. xvi. 18; 2 Sam. xvi. 14): ablation of the clothes, after touching the carcases of an unclean beast, or eating or carrying the carcases of a clean beast that had died a natural death (Lev. xx. 19, 20); ablation both of the person and of the defiled garments in cases of gowroncha dohramatium (Lev. xvi. 17)—the ceremony in each of the above instances to take place on the day on which the uncleanliness was contracted. A higher degree of uncleanness resulted from prolonged gowroncha in males, and menstruation in women; in these cases a probationary interval of seven days was to be allowed after the cessation of the symptoms; on the evening of the seventh day the candidate for purification performed an ablation both of the person and of the garments, and on the eighth offered two turtledoves or two young pigeons, one for a sin-offering, the other for a burnt-offering (Lev. x. 13-15, 19-20). Contact with persons in the above states, or even with clothing or furniture that had been used by them while in those states, involved uncleanness in a minor degree, to be absolved by ablation on the day of instruction generally (Lev. xiv. 3-11, 21-23), but in one particular case after an interval of seven days (Lev. xiv. 24). In cases of childbirth the sacrifice was increased to a lamb of the first year with a pigeon or turtledove (Lev. xii. 6), an exception being made in favor of the poor who might present the same offering as in the preceding case (Lev. xii. 8; Luke ii. 22-24). The purification took place forty days after the birth of a son, and eighty after that of a daughter, the difference in the interval being based on physical considerations. The uncleannesses already specified were comparatively of a mild character; the more severe were connected with death, which, viewed as the penalty of sin, was in the highest degree contaminating. To this head we refer the two cases of (1) touching a corpse, or a grave (Num. xvi. 16), or even killing a man in war (Num. xxxi. 19); and (2) leprosy, which was regarded by the Hebrews as nothing less than a living death. The ceremonies of purification in the first of these two cases are detailed in Num. xix. A purified kind of water, termed the water of separation (A. V. water of separation), was prepared in the following manner: An unblemished red heifer, on which the yoke had not passed, was slain by the eldest son of the high-priest outside the camp. A portion of its blood was sprinkled seven times towards the sanctuary; the rest of it, and the whole of the carcass, including even the hoofs, were then burnt in the sight of the officiating priest, together with cedar wood, hyssop, and scarlet. The ashes were collected by a clean man and deposited in a clean place outside the camp. Whenever occasion required, a portion of the ashes was mixed with spring water in a jar, and the unclean person was sprinkled with it on the third, and again on the seventh day after the contraction of the uncleanness. That the water had an expiatory efficacy, is implied in the term sin-offering (A. V. "purification for sin") applied to it (Num. xix. 9), and all the particulars connected with its preparation had a symbolical significance appropriate to the object sought. The sex of the victim (female, and hence life-giving), its red color (the color of blood, the seat of life), its unimpaired vigor (never having borne the yoke), its youth, and the absence in it of spot or blemish, the cedar and the hyssop (possessing the qualities, the former of incorruption, the latter of purity), and the scarlet (again the color of blood)—all these symbolized life in its fullness and freshness as the antidote of death. At the same time the extreme virulence of the uncleanness is taught by the regulations that the victim should be wholly consumed outside the camp, whereas generally certain parts were consumed on the altar, and the offal only outside the camp (comp. Lev. iv. 11, 12); that the blood was sprinkled towards, and not before the sanctuary; that the officiating minister should be neither the high-priest, nor the addition to a priest, but the priest-proctor, the officer being impure for the first, and too important for the second; that even the priest and the person that burnt the heifer were rendered unclean by reason of their contact with the victim; and, lastly, that the purification should be effected, not simply by the use of water, but of water mixed with ashes which served as a lye, and would therefore have peculiarly cleansing qualities. The purification of the leper was a yet more formal proceeding, and indicated the highest pitch of uncleanness. The rites are thus described in Lev. xiv. 4-32: The priest having examined the leper and pronounced him clear of his disease, took for him two birds alive and clean, with cedar, scarlet, and hyssop. One of the birds was killed under the priest's directions over a vessel filled with spring water, into which its blood fell; the other, with the adjutants, cedar, etc., was dipped by the priest into the mixed blood and water, and, after the unclean person had been seven times sprinkled with the same liquid, was permitted to fly away into the open field." The leper then washed himself and his clothes, and shaved his head. The above proceedings took place outside the camp, and formed the first part of the purification. A probationary interval of seven days was then allowed, which period the leper was to pass abroad out of his tent; "d on the last of these days the washing was repeated, and the shaving was more rigidly performed, even to the eyebrows and all his hair. The second stage of the purification took place on the eighth day, and was performed before the Lord at the door of the tabernacle of the congregation." The leper brought thither an offering consisting of two he-lambs, a waving ewe lamb, fine flour mingled with oil, and a log of oil: in cases of poverty the offering was reduced to one lamb, and two turtledoves, or two young pigeons, with a less quantity of fine flour, and a log of oil. The priest slew one of the he-lambs as a trespass-offering, and applied the bleeding portions of the other to the base of the altar, saying, "The blood of this he-lamb is for sin. The leader of the leper is hereby cleansed. It is the blood of the sacrifice for sin. The leader has sinned. The leader must now be cleansed. He shall now pass by the altar, and the priest shall put water on his head."

The Ritualical explanation of this was in conformity with the addition in the Chaldee version, "et non ascendit ab utroque sine miro." The words cannot, however, be thus restricted: they are designed to mark the partial restoration of the leper—into the camp but outside his tent.
a portion of its blood to the right ear, right thumb, and great toe of the right foot; he next sprinkled a portion of the oil seven times before the Lord, applied another portion of it to the parts of the body already specified, and poured the remainder over the leper's head. The other he-bear and the ewe-lamb, or the two birds, as the case might be, were then offered as a sin-offering, and a burnt-offering, together with the meat-offering. The significance of the cedar, the scarlet, and the hyssop used in drawing water, and of the "alive (full of life) and clean" condition of the birds, is the same as in the case previously described. The two stages of the proceedings indicated, the first, which took place outside the camp, the re-admission of the leper to the community of men; the second, before the sanctuary, his re-admission to communion with God. In the first stage, the slaughter of the one bird and the dismissal of the other, symbolized the punishment of death deserved and fully remitted. In the second, the use of oil and its application to the same parts of the body as in the consecration of priests (Lev. viii. 24, 25) symbolized the re-rededication of the leper to the service of Jehovah.

The ceremonies to be observed in the purification of a leper or a garment infected with leprosy, were identical with the first stage of the proceedings used for the leper (Lev. xiv. 33-53).

The necessity of purification was extended in the post-Babylonian period to a variety of unanthropized cases. Cups and pots, brazen vessels and couches, were washed as a matter of ritual observance (Mark vii. 4). The washing of the hands before meals was conducted in a formal manner (Mark vii. 3), and minute regulations are laid down on this subject in a treatise of the Mishna, entitled Šabbat. These ablutions required a large supply of water, and hence we find at a marriage feast no less than six jars containing two or three firkins apiece, prepared for the purpose (John ii. 6). We meet with references to purification after childbirth (Luke ii. 22), and after the cure of leprosy (Matt. vii. 4; Luke xvii. 14), the sprinkling of the water mixed with ashes being still retained in the latter case (Heb. ix. 13). What may have been the specific causes of uncleanness in those who came up to purify themselves before the Passover (John xii. 55), or in those who had taken upon themselves the Nazarite's vow (Acts xxxi. 24, 26), we are not informed; in either case it may have been contact with a corpse, though in the latter it would rather appear to have been a general purification preparatory to the accomplishment of the vow.

In conclusion it may be observed, that the distinctive feature in the Mosaic rites of purification is their expiatory character. The idea of uncleanness was not peculiar to the Jews; it was attached by the Greeks to the events of childbirth and death

**PURIM**

 PURIM (חג פורים) is a Hebrew term for a festival and a month of the Hebrew calendar, observed on the 13th and 14th days of the Hebrew month of Adar, and is a major celebration for the Jewish community. It commemorates the salvation of the Jews from the threat of extermination during the time of the Persian king Ahasuerus, as described in the Book of Esther. The holiday is also known as the Feast of Esther or the Festival of Lots.

In the Book of Esther, Queen Vashti is deposed by King Ahasuerus, who seeks a new queen. Esther, a Jewish woman, is brought to the palace and eventually appointed queen. The chief councillor Haman plots to exterminate the Jews, but Esther and Mordecai, her cousin, prevent the massacre.

The Purim festival includes a variety of customs such as the reading of the Megillah (the Book of Esther), lighting bonfires, and drinking wine. The holiday is celebrated with Morris dancing, parades, and feasting.

---

**PURIM in the Book of Esther**

The Book of Esther is the biblical account of the Purim story. It is one of the five Megillot (the Esther Scroll) that are read in Jewish synagogues on Purim.

The story begins with the reign of King Ahasuerus, who rules over a vast empire stretching from Ethiopia to India. Vashti, the queen of Persia, is deposed for refusing to appear at a banquet with the king. Esther, a Jewish woman, is summoned to take her place. She wins the king's favor and is eventually crowned queen.

Haman, the chief councillor, plots to exterminate all the Jews. Mordecai, Esther's cousin, discovers Haman's plot and warns Esther. She decides to reveal the conspiracy to the king, putting herself and her people in danger.

The story culminates in a victory for the Jews over their enemies. The king orders Haman's death, and a decree is issued to destroy the Jews, which is eventually revoked. The Jewish people are saved, and the holiday of Purim is established in commemoration of this event.

---

**The Purim Megillah**

The Purim Megillah, or Esther Scroll, is a book of the Bible that contains the story of Purim. It is read in synagogues on the 13th and 14th days of Adar (the Hebrew month of Purim). The text of the Megillah has been preserved in manuscripts and printed versions for centuries. The language is Hebrew, and the narrative is presented in a straightforward manner, with no significant variations in the text.

---

**Purim Celebrations**

Purim is celebrated with various customs and activities, including:

- Reading the Megillah in Hebrew synagogues on the 13th and 14th days of Adar.
- Morris dancing, a traditional English folk dance.
- Wearing costumes, often based on the clothing of the story, such as the costumes of King Ahasuerus and Queen Vashti.
- Eating hamantaschen, a traditional cookie with a prune or chocolate filling, which is said to represent Haman's face.
- Drinking wine, which is symbolic of the wine given to the Jews by Queen Vashti.
- Participating in parades and other communal celebrations.

**Conclusion**

Purim is a significant holiday in the Jewish calendar, celebrated with various customs and activities. The story of Purim is told in the Megillah, which is read in synagogues on the 13th and 14th days of Adar. The holiday is celebrated with Morris dancing, parades, and feasting, and is a time of joy and festivity for the Jewish community.
as he goes on, into the vernacular tongue of the place, and makes comments on particular passages. He reads in a histrionic manner, suitting his tones and manner to the changes in the subject matter. When he comes to the name of Haman the whole congregation cry out, "May his name be blotted out," or "Let the name of the ungodly perish." At the same time, in some places, the boys who are present make a great noise with their hands, with mallets, and with pieces of wood or stones on which they have written the name of Haman, and which they rub together so as to obliterate the writing. When the names of the sons of Haman are read (ix. 7, 8, 9) the reader utters them with a continuous exclamation, so as to make them into one word, to signify that they were hanged all at once. When the Megillah is read through, the whole congregation exclaim, "Cursed be Haman: blessed be Mordecai; cursed be Zeresh (the wife of Haman): blessed be Esther; cursed be all idolators; blessed be all Israelites, and blessed be Harsonah who hanged Haman." The volume is then solemnly rolled up. All go home and partake of a repast said to consist mainly of milk and eggs. In the morning service in the synagogue, on the 14th, after the prayers, the passage is read from the Law (Ex. xvii. 8-16) which relates the destruction of the Amalekites, the people of Agag (I Sam. xv. 8), so as to suggest another anniversary of Haman's death (Esth. iii. 1). The Megillah is then read again in the same manner, and with the same responses from the congregation, as on the preceding evening. All who possibly can are bound to hear the reading of the Megillah — men, women, children, cripples, invalids, and even idiots — though they may, if they please, listen to it outside the synagogue (Mishna, Rosh, Hosh. i. 7).

The 14th of Adar, as the very day of the deliverance of the Jews, is more solemnly kept than the 13th. But when the service in the synagogue is over, all give themselves up to merry-making. Games of all sorts, with dancing and music, commence. In the evening a quaint dramatic entertainment, the subject of which is connected with the occasion, sometimes takes place, and men frequently put on female attire, declaring that the festivities of Purim, according to Esth. x. 22, suspend the law of Dent. xxii. 5, which forbids one sex to wear the dress of the other. A dainty meal then follows, sometimes with a free indulgence of wine, both unmixed and mulled. According to the Gemara (Megillah, vii. 2), "jenetur homo in festo Purim suum inebriati, ut millium discerner morit, inter maloletionem Hamanis et conditionem Marcholeth."  

On the 15th the rejoicing is continued, and gifts consisting chiefly of sweetmeats and other eatables, are interchanged. Offers for the poor and charitable are also made, by all who can afford to do so, in proportion to their means (Esth. ix. 19, 22).

When the moon Adar used to be doubled, in the Jewish leap-year, the festival was repeated on the 14th and 15th of the second Adar.

It would seem that the Jews were tempted to associate the Christians with the Persians and Amalekites in the curses of the synagogue. Hence probably arose the popularity of the feast of Purim in those ages in which the feeling of enmity was so strongly manifested between Jews and Christians. Several Jewish proverbs are preserved which strikingly show the way in which Purim was regarded, such as, "The Temple may fall, but Purim never;" "The Prophets may fall, but not the Megillah." It was said that no books would survive in the Messiah's kingdom except the Law and the Megillah. This affection for the book and the festival connected with it is the more remarkable because the events on which they are founded belonged only an exiled portion of the Hebrew race, and because there was so much in them to shock the principles and prejudices of the Jewish mind.

Ewald, in support of his theory that there was in patriarchal times a religious festival at every new and full moon, considered that Purim was originally the full moon feast of Adar, as the Passover was that of Nisan, and Tabernacles that of Tisri.

It was suggested first by Kepler that the õpôlhy tòv 'Ioudaiav of John v. 1 was the feast of Purim. The notion has been confidently espoused by Petavius, Olshausen, Stier, Wiescher, Winer, and Anger (who, according to Winer, has proved the point beyond contradiction), and is favored by Alford and Elliott. The question is a difficult one. It seems to be generally allowed that the opinion of Chrysostom, Cyril, and most of the Fathers, which was taken up by Erasmus, Calvin, Bellarmine, and Bengel, that the festival was Pentecost, and that of Cocceius, that it was Tabernacles (which is countenanced by the reading of one inferior MS.), are precluded by the general course of the narrative, and especially by John iv. 35 (assuming that the words of our Lord which are there given were spoken in seed-time) of compared with v. 1. The interval indicated by a comparison of these texts could scarcely have extended beyond Nisan. The choice is thus left between Purim and the Passover.

The principal objections to Purim are, (a) that it was not necessary to go up to Jerusalem to keep the festival, (b) that the Amalekites, who were supposed to be cursed at the feast, were not murdered, (c) that the names of Haman's sons were blotted out. These objections were fully answered by Kepler. (d) This supposition does not appear to be materially weakened by the taking of a proper òpôlhy tòv 'Ioudaiav quodnamque in loco discerner molitarum et òpôlhy tòv 'Ioudaiav. Whether the expression was used at all, it surely can point to our Lord's words, if we suppose the figurative language to have been suggested by what was actually going on in the fields before the eyes of Himself and his hearers.
the festival; (b) that it is not very likely that our Lord would have made a point of paying especial honor to a festival which appears to have had but a very small religious element in it, and which seems rather to have been the means of keeping alive a feeling of national revenge and hatred. It is alleged on the other hand that our Lord's attending the feast was not an act in keeping with his deep sympathy with the feelings of the Jewish people, which went further than his merely "fulfilling all righteousness" in carrying out the precepts of the Mosaic law. It is further urged that the narrative of St. John is best made out by supposing that the incident at the pool of Bethesda occurred at the festival which was characterized by showing kindness to the poor, and that our Lord was induced, by the example of the Jews then evinced, not to remain at Jerusalem till the Passover, mentioned John vi. 4 (Stier).

The identity of the Passover with the feast in question has been maintained by Freres, Eusebius, and Theodoret, and, in modern times, by Lither, Scaliger, Grotsius, Hengstenberg, Greswell, Neander, Tholuck, Robinson, and the majority of commentators. The principal difficulties in the way are, (1) the omission of the article, involving the improbability that the great festival of the year should be spoken of as "a feast of the Jews;" (b) that as our Lord did not go up to the Passover mentioned John vi. 4, He must have abstained himself from Jerusalem for a year and a half, that is, till the feast of Tabernacles (John vii. 2).

Against these points it is contended, that the application of εἰσερχόμενος without the article to the Passover is countenanced by Matt. xxvii. 15; Luke xxiii. 17 (comp. John xviii. 39): that it is assigned as a reason for his staying away from Jerusalem for a longer period than usual, that "the Jews sought to kill him" (John vii. 1; cf. v. 18); that this long period satisfactorily accounts for the surprise expressed by his brethren (John vii. 5), and that, as it was evidently his custom to visit Jerusalem once a year, He went up to the feast of Tabernacles (vii. 2) instead of going to the Passover.

On the whole, the only real objection to the Passover seems to be the want of the article before εἰσερχόμενος. That the language of the New Testament will not justify our regarding the omission as expressing emphasis on any general ground of usage, is proved by Winer (Grammar of the N. T. 4th ed. 1918, § 101). It must be admitted on the other side, (i) that the difficulty is no small one, though it does not seem to be sufficient to outweigh the grave objections which lie against the feast of Purim.

The arguments on one side are best set forth by Stier and Olshausen on John v. 1, by Kepler (Éloge Chronique, Francfort, 1615), and by Anger (De temp. in Act. Apost. i. 24); those on the other side, by Schmoller (Homiliae ad Novum Testamentum), and Neander, Life of Christ, § 143. See also Lightfoot, Koine, and Tholuck, on John v. 1; and Greswell, Diss. viii. vol. ii.; Ellictott, Lect. p. 135.

See Carpzov, App. Crit. iii. 11; Relia. Ant. iv. 9; Schickart, Purim sive Bacchonomilia Judaorum (Crit. Sac. iii. col. 1184); Buxtorf, Syn. Jud. xxix. The Mishnaic treatise, Megilla, contains directions respecting the mode in which the scroll should be written out and in which it should be read, with other matters, not much to the point in hand, connected with the service of the synagogue. Stanford, Let the Juice be Absent; Mills, British Jews, p. 188.

* PURPLE. [COLORS, I.]

PURSE. The Hebrews, when on a journey, were provided with a bag (variously termed κριβωτέρα and χλάδρη), in which they carried their money (Gen. xlii. 35; Prov. i. 14, vii. 20; Is. xlvii. 6); and, if they were merchants, also their weights (Deut. xxv. 13; Mic. vi. 11). This bag is described in the N. T. by the terms βαλαντών [Tisch. Βαλ- λάντων] (peculiar to St. Luke, x. 4, xii. 35, and Acts 17. 2); and was hence adopted by St. John to describe the common purse carried by the disciples. The girdle also served as a purse, and hence the term γαμή occurs in Matt. x. 9; Mark vi. 8. [GIRDLE.] Ladies wore ornamental purses. (Is. lii. 23). The Rabbinites forbade any one passing through the Temple with stick, shoes, and purse, these three being the indications of traveling (Mish. Behuk. 9, § 5). [SCANTY.]

PUT, 1 Chr. i. 8; Nah. iii. 9. [PHUT.]

PUTEOLI (Ποτεύλη; [Puteoli]) appears alike in Josephus (Vit. c. 3; Ant. xvii. 12, § 1, 35, 39, and Ποτευλων; peculiar to St. John xviii. 13) in its characteristic position under the early Roman emperors, namely, as the great landing-place of travellers to Italy from the Levant, and as the harbor to which the Alexandrian corn-ships brought their cargoes. These two features of the place in fact coincided: for in that day the movements of travellers by sea depended on mercantile arrangements. Puteoli was at that period a place of very great importance. We cannot elucidate this better than by saying that the celebrated bay which is now "the bay of Naples," and in early times was "the bay of Cumae," was then called "Simus Puteolanus." The city was at the north-eastern angle of the bay. Close to it was Baiae, one of the most fashionable of the Roman watering-places. The Emperor Caligula once occupied a magnificent palace between the two towns; and the remains of it must have been conspicuous when St. Paul landed at Puteoli in the Alexandrian ship which brought him from Malta. (CASTOR AND... may be regarded as a fair object to the B.D. The usual MSS. are about equally divided both in respect to authority and number, there being 10 on each side. The article is also added in the Sahidic and Coptice (i.e. Thélaine and Masphtite) versions. A.

B. [See to, and to. The last occurs only in 2 K. iv. 23 32 bags; vs. Is. iii. 22, A. V. "fearfully- pens." The latter is supposed to refer to the bag round form of the purse.]}
PYRRHUS

POLLUX; MELITA; RHIGUS; SYRACUS. In illustration of the arrival here of the corn-ships we may refer to Strabo (Ep. 77) and Suetonius (Octav. 98).

The earlier name of Puteoli, when the later part of Italy was Greek, was Diaereza; and this name continued to be used to a late period. Josephus uses it in two of the passages above referred to: in the third (ibid. c. 3) he speaks of himself (after the shipwreck which, like St. Paul, he had recently gone through) as διαερεύοντα τὴν Διαερεζήν, ή τούτων Ἡρωδείαν καλοίσθων. So Philo, in describing the curious interview which he once had with Alexander Severus, says: καὶ μεθ᾿ Τίγδαλος, after which Caligula, used the old name (Legat, ad Colum., ii. 521). The word Puteoli was a true Roman name, and arose whether a puteus or a puteola from the strong mineral springs which are characteristic of the place. Its Roman history may be said to have begun with the Second Punic War. It rose continually into greater importance, from the causes above mentioned. No part of the Campanian shore was more frequented. The associations of Puteoli with historical personages are very numerous. Scipio sailed from hence to Spain. Cicero had a villa (his "Puteodunum") in the neighborhood. Here Nero planned the murder of his mother. Vespasian gave to this city peculiar privileges, and here Hadrian was buried. In the 5th century Puteoli was ravaged both by Alaric and Theodosius, and it never afterwards recovered its former eminence. It is now a fourth-rate Italian town, still retaining the name of Pozzuoli.

In connection with St. Paul's movements, we must notice its communications in Nero's reign along the mainlands with Rome. The cost-road leading northwards to Sinnecus was not made till the reign of Domitian; but there was a cross-road leading to Capua, and there joining the Appian Way. [APP. FOUR. THREE TAVERNS.] The remains of this road may be traced at intervals; and thus the Apostle's route can be followed almost step by step. We should also notice the fact that there were Jewish residents at Puteoli. We might be sure of this from its mercantile importance: but we are positively informed of it by Josephus (Ant. xvii. 12. § 1) in his account of the visit of the pretended Herod Alexander to Augustus: and the circumstance shows how natural it was that the Apostle should find Christian "brethren" there immediately on landing.

The remains of Puteoli are considerable. The aqueduct, the reservoirs, portions (probably) of baths, the great amphitheatre, the building called the Temple of Scapins, which affords very curious indications of changes of level in the soil, are all well worthy of notice. But our chief interest here is concentrated on the ruins of the ancient mole, which is formed of the concrete called Pecudomus, and sixteen of the piers of which still remain. No Roman harbor has left so solid a memorial of itself as this one at which St. Paul landed in Italy. J. S. H.

PUTIEL (πυτιέλ [reflected of God, Gies.]; Ποτιήλ: Plinius). One of the daughters of Putiel was wife of Eleazar the son of Aaron, and mother of Phinehas (Ex. vi. 25). Though he does not appear again in the Bible records, Putiel has some celebrities in more modern Jewish traditions. They identify him with Elihu the Midianite, "who felled the cedars for idolatrous worship." (Ezra

PYRRHUS (Πύρρος, red-haired; Πυρρος), father of Sopater, one of Paul's company on his journey from Greece to Asia (Acts xx. 4). The name in that passage is undoubtedly genuine, being found in the best copies of the text, though omitted in the textus receptus, and hence also in the A. V. The father was no doubt a Beraean as well as the son, but whether he was a Christian or not is uncertain, unless, as some suppose, Sopater and Soiaser (Rom. xvi. 21) were forms of the same name, and belonged in this history to the same person. In the latter case he was at Corinth when Paul wrote to the Church at Rome. The mention of the father serves to distinguish this Sopater from another of the same name. The same usage occurs in modern Greek. H.
QUAILS (חֲצִיִּים, shā'îr; but in Ko in, הַצִּיאֵים, shā'îm), φαραώτρια: coturnix). Various opinions have been held as to the nature of the bird denoted by the Heb. shā'îr, which on two distinct occasions was supplied to the Israelites in the wilderness: see Ex. xvi. 13, on which occasion the people were between Sin and Sinai; and Num. xi. 31, 32, when at the station named, in consequence of the judgment which befell them, Kibroth-hattaavah. That the Hebrew word is correctly rendered "quails," is beyond a shadow of doubt, notwithstanding the different interpretations which have been assigned to it by several writers of eminence. Ludolf, for instance, an author of high repute, has endeavored to show that the shā'îr were locusts; see his Dissertatio de Locustis, sua Distinctione, etc., Franc. ad Moen. 1614. His opinion has been fully advocated and adopted by Patrick (Comment. on Num. xi. 31, 32): the Jews in Arabia also, as we learn from Nielburg (Beschreib. von Arab. p. 172), were convinced that the birds which the Israelites ate in such numbers were only clouds of locusts, and they laugh at those translators who suppose that they found quails where quails were never seen. Rudbeck (Ichthyol. Böld. Spec. I.) has argued in favor of the shā'îr meaning "flying-fish," some species of the genus Exocetus; Michaelis at one time held the same opinion, but afterwards properly abandoned it (see Rosenmüller, Not. ad Bochart. Hieroz. ii. 549). A late writer, Ehrenberg (Geograph. Zeit. ix. 86), from having observed a number of "flying fish" (zurnards, of the genus Trigla of Oken, Dactylogyrus of modern ichthyologists) lying dead on the shore near Elina, believed that this was the food of the Israelites in the wilderness, and named the fish Thrigla Israelitana. Hermann von der Hardt supposed that the locust bird (Pastor Roven), was intended by shā'îr; and recently Mr. Forster (Voice of Israel, p. 98) has advanced an opinion that "red geese" of the genus Cassow are to be understood by the Hebrew term; a similar explanation has been suggested by Stanley (S. i. p. 82) and adopted by Tenenut (Geol. i. 487, note): this is apparently an old conceit, for Patrick (Yisab. xvi. 31) alludes to such an explanation, but we have been unable to trace it to its origin. Some writers, while they hold that the original word denotes "quails," are of opinion that a species of sand-grouse (Petrocelis alchata), frequent in the Eble-floods, is also included under the term; see Winer (Bibl. Realwörterb. ii. 772); Rosenmüller (Not. ad Hieroz. ii. 649); Faber (ad Hormer. ii. 442); Gesenius (The. s. v. צַיִּים). It is usual to refer to Hasselquist, as the authority for believing that the Keta (sand-grouse) is denoted: this traveller, however, was rather inclined to believe, with some of the writers named above, that "locusts," and not birds, are to be understood (p. 443); and it is difficult to make out what he means by Tetralo Israelitorum. Linnaeus supposed he intended by it the common quail: in one paragraph he states that the Arabian call a bird "of a grayish color and less than our partridge," by the name of Keta. He adds "An Sław?" This cannot be the Petrocelis alchata.

The view taken by Ludolf may be dismissed with a few words. The expression in Ps. lxviii. 27 of "feathered fowl" רְלָיָּה יֳנָשִּׁים, which is used in reference to the shā'îr, clearly denotes some bird, and Ludolf quite fails to prove that it may include winged insects: again there is not a shadow of evidence to support the opinion that shā'îr can signify any "locust," this term being used in the Arabic and the cognate languages to denote a "quail." As to any species of "flying-fish," whether belonging to the genus Dactylogyrus, or to that of Exocetus, being intended, it will be enough to state that "flying-fish" are quite unable to sustain their flight above a few hundred yards at the most, and never could have been taken in the Red Sea in numbers sufficient to supply the Israelitish host. The interpretation of shā'îr by "wild geese," or "wild cranes," or any "wild fowl," is a gratuitous assumption, without a particle of evidence in its favor. The Cassow, with which Mr. Forster identifies the shā'îr, is the C. rubida, a bird about the size of a mallard, which can by no means answer the supposed requisite of standing three feet high from the ground. "The large red-legged cranes," of which Professor Stanley speaks, are evidently white storks (Ciconia alba), and would fulfill the condition as to height; but the flesh is so nauseous that no Israelite could have done more than have tasted it. With respect to the Petrocelis alchata, neither it nor indeed any other species of the genus can square with the Scriptural account of the shā'îr: the sand-grouse are birds of strong wing and of unwearied flight, and never could have been captured in any numbers by the Israelite multitudes. We much question, moreover, whether the people would have eaten to excess—for so much the expression translated "fully satisfied" (Ps. lxviii. 21) implies—of the flesh of this bird, for according to the testimony of travelers, from Dr. Russell (Hist. of Aleppo, ii. 194, 2d ed.) down to observers of to-day, the flesh of sand-grouse is hard and tasteless. It seems, however, that the shā'îr of the Pentateuch and the 109th Psalm denotes the common "quail" (Coturnix quinquenemus) and no bird. In the first place, the Hebrew word צַיִּים is unquestionably identical with the Arabic صَلْدَة (ṣalādā), a "quail." According to Schultens (Orig. Heb. l. 231) the Heb. צַיִּים is derived from an Arabic root "to be fat;" the round, plump form of a quail is eminently suitable to this etymology; indeed, its fat-
ness is proverbial. The objections which have been urged by Patrick and others against "quails" being intended are very easily refuted. The expression, "as if it were two cabots (high) upon the face of the earth," (Num iii. 31) is explained by the LXX., by the Vulg., and by Josephus (Ant. ii. 1, § 5), to refer to the height at which quails flew above the ground, in their exhausted condition from their long flight. As to the enormous quantities which the least successful Israelite is said to have taken, namely, "ten homers," in the space of a night and two days, there is every reason for believing that the "homers" here spoken of do not denote strictly the measure of that name, but simply "a heap." This is the explanation given by Okeles and the Arabic versions of Saadia and Erpenius, in Num. xi. 31.

The quail migrates in immense numbers; see Pliny (H. N. i. 23), and Tonnardot (Figures, i. 329), who says that all the islands of the Archipelago at certain seasons of the year are covered with these birds. Col. Sykes states that such quantities were once caught in Capri, near Naples, as to have afforded the bishop no small share of his revenue, and that in consequence he has been called Bishop of Quails. The same writer mentions also (Trans. Zool. Soc. ii.) that 150,000 quails have been netted in one season on this little island; according to Temminck 100,000 have been taken near Nettuno, in one day. The Israelites would have had little difficulty in capturing large quantities of these birds, as they are known to arrive at places sometimes so completely exhausted by their flight as to be readily taken, not in nets only, but by the hand. See Ped. Soc. i. 82, ed. Dunford; Prosper Alpinus (Rerum It. L. iv. 1); Josephus (Ant. iii. 1, § 8). Sykes (ib. ii.) says: "They arrive in spring on the shores of Persia, so fatigued that for the first few days they allow themselves to be taken by the hand." The Israelites, "spread the quails round about the camp," this was for the purpose of drying them. The Egyptians similarly prepared these birds (Herod. ii. 77), and Maillet (Lettres sur l'Egypte, i. 21, iv. 130). The expression "quails from the sea," Num. xi. 31, must not be restricted to denote that the birds came from the sea as their starting-point, but it must be taken to show the direction from which they were coming; the quails were, at the time of the event narrated in the sacred writings, on their spring journey of migration northwards, an interesting proof, as Col. Sykes has remarked, of the perpetuation of an instinct through some 3300 years. The flight which fed the multitude at Kibroth-hattaavah might have started from Southern Egypt and crossed the Red Sea near Ras Mohammed, and so up the Gulf of Akaba into Arabia Petraea. It is interesting to note the time specified: "it was at even," that they began to arrive; and they did not continue to come all the night. Many observers have recorded that the quail migrates by night, though this is denied by Col. Montagn (Oriental Dict. art. "Quail"). The flesh of the quail, though of an agreeable quality, is said by some writers to be heating, and it is supposed by some that the death that occurred from eating the food in the wilderness occurred directly from these birds feeding on hellebore (Pliny, H. N. x. 23) and other poisonous plants; see Winer, Bib. Recl. ii. 773: but this is exceedingly improbable, although the immediate gratification of the appetite for the space of a whole month (Num. xi. 31) on such food, in a hot climate, and in the case of a people who at the time of the wanderings rarely tasted flesh, might have induced dangerous symptoms. The plague seems to have been directly sent upon the people by God as a punishment for their murmuring, and perhaps is not, even in a subordinate sense to be attributed to natural causes.

The quail (Coturnix coturnix), the only species of the genus known to migrate, has a very wide geographical range, being found in China, India, the Cape of Good Hope, and England, and according to Temminck, in Japan. See Col. Sykes's paper on "The Quails and Hemipholi of India" (Trans. Zool. Soc. ii.).

The φτερωτύπια of the LXX. should not be passed over without a brief notice. It is not easy to determine what bird is intended by this term as used by Aristotoe and Pliny (οιστυξαντας); according to the account given of this bird by the Greek and Latin writers of Natural History just mentioned, the oisistyanos precedes the quail in its migrations, and acts as a sort of leader to the flight. Some ornithologists, as Belon and Fleming (Birds, iv. i. 98) have assigned this term to the "Landrail" (Coturnix pratensis), the Rod des thus with astonishing rapidity (Second Journey, p. 585, as quoted by P. H. Gosse in Fairbairn's Imperial Bibb. Dict. ii. 741). For other modes of capturing these birds still practiced in the East, see Wood's Bibb. Annu. (Lond. 1692), pp. 455, 456, 457.

A. On two successive days I observed enormous flights of quails on the N. coast of Algeria, which arrived from the South in the night, and were at daybreak in such numbers through the plains, that scores of sportsmen had only to shoot as fast as they could reload it (H. B. Tristram).
QUARRIES, THE

Caillies of the French. Re di Quaglie of the Italians, and the Wachtel-König of the Germans, but with what reason we are unable to say; probably the LXX. use the term as a synonym of ὄρτος or to express the good condition in which the birds were, for Hesychius explains ὄρτογιόττα by ὄρτος ὑπερεμεθής, i.e. "a quail of large size."

Thus, in point of etymology, zoology, history, and the authority of almost all the important old versions, we have at complete a chain of evidence in proof of the quail being the true representative of the σίλετς as possibly be allowed. W. H.

* QUARRIES, THE (σίλητς ἄντο τῶν γαρνταίων; ubi erecto bibloi) are mentioned in Judg. iii. 19, 20 (A. V.), as a place well known near Gilgal. Ehud, after having brought his present to Eglon, king of Moab, went with his attendants on their return as far as these "quarries" (A. V.), and then "turned again from them," and went back to execute the meditated murder alone. Instead of "quarries," or "quarry," the A. V. renders pesilim or p nell elsewhere (31 times in the singular and 21 times in the plural, and also, Judg. iii. 19, in the marzin) by "graven" or "carved images." It is certainly unsafe, in view of such a usage, to admit an exceptional meaning in this place. See against that supposition especially Bachmann, Das Buch der Richter, p. 208 ff. (1882). A few make the word a proper name, Pesalom, with reference to some ancient idolatry there, though no longer practiced in Ehud's time.

Professor Cassel, Richter u. Rath, p. 37, in Lange's Biblical Lexicon (1855), suggests another explanation. He understands that the σίλητς were landmarks (consisting of pillars or heaps of stone, στήμαta) which marked the boundary between the territory of the Moabités on the west of the Jordan (below them by them conquerors at that time) and that of the Hebrews: and that it was from these stone heaps or pillars that Ehud turned back after parting with his servants. Pesilim, in this sense, would be nearly allied to that of "images," idol-gods (comp. Dent. vii. 25 and Isa. xili. 3); since boundaries (ὑπαρχεῖς, στεκόντα) were regarded as properly inviolate, consecrated. To the heathen they were hardly less than objects of religious veneration. The Hebrews would naturally speak of them with reference to the feelings of their foreign oppressors, though we need not altogether acquit the Hebrews of a similar superstition. First sanctifications "quarries," but as Targumic rather than Hebrew.

H.

QUARTUS (Κώσταρος [Lat. fourth]; Quauntus), a Christian of Corinth, whose salutations St. Paul sends to the brethren at Rome (Rom. xvi. 23). There is the usual tradition that he was one of the Seventy disciples; and it is also said that he ultimately became Bishop of Beryus (Tillemont, i. 334). E. H.-s.

QUATERNION (τετράδειαν; quaternio), a military term, signifying a guard of four soldiers, two of whom were attached to the person of a prisoner, while the other two kept watch outside the door of his cell (Vegetius, De Re mil. iii. 8; Polyb. vi. 33, § 7). Peter was delivered over to four such bodies of four (Acts xii. 4), each of which took charge of him for a single watch of the night.

W. L. B.

* Of the quaternion on guard at a given time, two may have watched at the door of the cell, and two at the gate which opened into the city. Peter, in making his escape, "passed through" (διελθών) first and a second watch (φωλάσατι), which suggests the idea of more than one sentinel at each post.

Walch thinks that the two soldiers to whom Peter was bound in the prison (ver. 6) did not belong to the quaternion, inasmuch as the security of Peter might not require them to be changed during the night like the others. On these details, and the archaism of the subject generally, see especially Walch, De vinculis Petri, in his Études de Acta Apost. pp. 147-190.

H.

QUEEN OF HEAVEN. Of the three Hebrew terms cited as the equivalents of "queen" in the A. V., the first alone is applied to a queen-regnant: the first and second equally to a queen-consort, without, however, implying the dignity which in European nations attaches to that position; and the third to the queen-mother, to whom dignity is transferred in oriental courts. The etymological force of the words accords with their application. Melqeth is the feminine of melech, "king;" it is applied in its first sense to the queen of Sheba (1 K. x. 1), and in its second to the wives of the first rank, as distinguished from the concubines, in a royal harem (Esth. i. 9 ff., vii. 1 ff.; Cant. vi. 8); the term "princess" is similarly used in 1 K. xi. 3. "Melqeth" simply means "wise;" it is applied to Solomon's bride (Ps. xlv. 9), and to the wives of the first rank in the harems of the Chaldean and Persian monarchs (Dan. v. 2, 3; Neh. ii. 6). Göthôrî, on the other hand, is expressive of authority; it means "powerful" or "mistress." It would therefore be applied to the female who exercised the highest authority, and this, in an oriental household, is not the wife but the mother of the master. Strange as such an arrangement at first sight appears, it is one of the inevitable results of polygamy: the number of the wives, their social position previous to marriage, and the precariousness of their hold on the affections of their lord, combine to annihilate their influence, which is transferred to the mother as the only female who occupies a fixed and dignified position. Hence the application of the term melqeth to the queen-mother, the extent of whose influence is well illustrated by the narrative of the interview of Solomon and Bathsheba, as given in 1 K. ii. 19 ff. The term is applied to Manahath, Asa's mother, who was deposed from her dignity in consequence of her idolatry (1 K. xv. 13; 2 Chr. xv. 16); to Zelebel as contrasted with Jeram (2 K. x. 3, "the children of the king," and the children of the queen"); and to the mother of Jehoshaphat or Jeconiah (Jer. xiii. 18; comp. 2 K. xxiv. 12; Jer. xxix. 2). In 1 K. xi. 10, the text probably requires emendation, the reading followed in the LXX., μηλοκεθης, "the elder," according better with the context.

W. L. B.
this is the translation and the same is the case in fourteen MSS. of Jer. xiv. 18, and in thirteen of Jer. xiv. 19. The latter reading is followed by the LXX. and Peshito Syriac in Jer. vii. 18, but in all the other passages the received text is adopted, as by the Vulgate in every instance. Kimchi says:

"is wanting, and it is as if נָוַתָּה, 'workmanship of heaven,' i.e. the stars: and some interpret 'the queen of heaven,' i.e. a great star which is in the heavens.'" Rashi says in favor of the latter:

and the Targum renders throughout 'the star of heaven.' If we add in favor of the latter, the Pleiades or Hyades. It is generally believed that the 'queen of heaven' is the moon (comp. 'siderum regina,' Hor. Carm. Sec. 35, and 'regina celi,' Apul. Met. i. 657), worshipped as Ashtart or Astarte, to whom the Hebrew women offered cakes in the streets of Jerusalem. Hitzig (Das Prophet. Areopag. p. 64) says the Hebrews gave this title to the Egyptian Neith, whose name in the form Ta-nith, with the Egyptian article, appears with that of Baal Hammanit, on four Carthaginian inscriptions. It is little to the purpose to inquire by what other names this goddess was known among the Phcenician colonists: the Hebrews, in the time of Jeremiah, appear not to have given her any special title. The Babylonian Venus, according to Harpocrates (quoted by Selden, de His Syr. synt. 2, cap. 6, p. 220, ed. 1617), was also styled 'the queen of heaven.' Mr. Layard identifies Hera, 'the second deity mentioned by Diodorus, with Ashtarte, Melitta, or Venus,' and with the 'queen of heaven,' frequently mentioned in the sacred volumes, . . . The planet which bore her name was sacred to her, and in the Assyrian sculptures a star is placed upon her head. She was called Delfis, because she was the female form of the great divinity, or Baal; the two, there is reason to conjecture, having been originally but one, and undivided. Her worship penetrated from Assyria into Asia Minor, where its Assyrian origin was recognized. In the neck tablets of Pterisma she is represented, as in those of Assyria, standing erect on a lion, and crowned with a tower of mural cornet; which, we learn from Lucian, was peculiar to the figure of the Assyrian goddess. This may have been a modification of the high cap of the Assyrian Isus-dectes. To the Semites she was known under the names of Asarte, Ashtart, Melitta, and Alitta, according to the various dialects of the nations amongst which her worship prevailed" (Varro, ii. 464, 466, 457). It is so difficult to separate the worship of the moon-goddess from that of the planet Venus in the Assyrian mythology when introduced among the western nations, that the two are frequently confused. Movers believes that Ashtart was originally the moon-goddess, while according to Rawlinson (Herv. i. 521) Ishtar is the Babylonian Venus, one of whose titles in the Sardanapalus inscriptions is 'the mistress of heaven and earth.'

With the cakes (נָוַתָּה, ceraeina: γαρνάων) which were offered in her honor, with incense and libations, Selden compares the πετραα (A. V. "bran") of Ep. of Jer. 43, which were burnt by the women who sat by the wayside near the idolatrous temples for the purposes of prostitution. These πετραα were offered in sacrifice to Hecate, while invoking her aid for success in love (Theeves, s. 33). The Targum gives יִנְיָנָה, ceraeina, which elsewhere appears to be the Greek γυνηδευτής, a sleeved tunic. Rashi says the cakes had the image of the god stamped upon them, and Theodoret that they contained pine-cones and raisins.

W. A. W.

* QUICK (from A.-S. ecwe or ecwe) is living alive, Lev. xvi. 10; Num. xxxi. 50; Ps. iv. 13, exxv. i. Acts x. 42; 2 Tim. iv. 1; Heb. iv. 12; 1 Pet. iv. 3.

* QUICKEN = to make alive (A.-S. ecwe), Ps. exxv. 50; 1 Cor. xv. 36; Eph. ii. 1, etc. [Quick.]

II.

QUICKSANDS, THE (ἡ Σαύρα: Syrtes), more properly the Syrtis (Acts xxvii. 17), the broad and deep lighthouse on the North African coast between Carthage and Cyrene. The name is derived from Ser, an Arabic word for a desert. For two reasons this region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat along the shore itself, but chiefly because of the shallows and the uncertain currents of water in the bay. Josephus, who was himself once wrecked in this part of the Mediterranean, makes Agrippa say (B. J. ii. 16, § 4), φοβοδεί καὶ τοῖς ἀκαίουσιν Σαύρασ. So notorious were these dangers, that they became a commonplace with the poets (see Hor. Od. i. 22. 5; Ov. Fast, iv. 429; Virgil, Æn. i. 111; Tibull. iii. 4, 91; Lucan, Phæbus, iv. 431). It is most to our purpose here, however, to refer to Apollonius Rhodius, who was familiar with all the notions of the Alexandrian sailors. In the 4th book of his Argonaut, 1292-1237, he supplies illustrations of the passage before us, in more respects than one—in the sudden violence (ἀφαράγγυρ), of the terrible north wind (ἄλοχος Βορρας θεόελα), in its long duration (ἐνήα πάσας Ναυτικας ἐλώας καὶ πάσας τὰς σταθμας), and in the terror which the sailors felt of being driven into the Syrtis (Παραγωνὰ ἐνδοθ Σαύρας, ὧν οὐκετί νόστος ὁποίῳ Ναυτική πέλαξ). [See CLAUDIA and E hiding.]

There were properly two Syrtis, the eastern or larger, now called the Gulf of Syrtis, and the western or smaller, now the Gulf of Cores. It is the former to which our attention is directed in this passage of the Acts. The ship was caught by a northeasterly gale on the south coast of Cerete, near Mount Isb, and was driven to the island of Clauda. This line of drift, continued, would strike the greater Syrtis: whence the natural apprehension of the sailors. [Ship.] The best modern account of this part of the African coast is that which is given (in his Mémorial on the Mediterraneen, pp. 87-91, 186-191) by Admiral Smyth, who was himself the first to survey this bay thoroughly, and to divest it of its terrors.

J. S. H.

QUINTUS MEMMIUS, 2 B.c. xi. 34. [See MANLIUS, T. vol. ii. p. 1779 b.]

* QUIRINUS. [Cyrnius.]

* QUIET, in the sense of acquies : "Quit your selves like men" (1 Sam. iv. 9); and, "Quit you like men" (1 Cor. xvii. 13).

II.

QUIVER. Two distinct Hebrew terms are represented by this word in the A.V.

(1) נָוַתָּה, them. This occurs only in Gen. xxvi. 3: "Take thy weapons (lit. 'thy things'), thy
**QUIVER**

It is derived (by Gesenius, *Thea. p. 1504, and Fürst, *Hebraeb. ii. 528*) from a root which has the force of hanging. The passage itself affords no clue to its meaning. It may therefore signify either a quiver, or a suspended weapon.

— for instance, such a sword as in our own language was formerly called a "banger." Between these two significations the interpreters are divided. The LXX., Vulgate, and Version Pseudogon. adhere to the former; Onkelos, the Peshito and Arabic Versions, to the latter.

(2.) **תְוִרָה**. The root of this word is uncertain (Gesenius, *Thea. p. 161*). From two of its occurrences its force would seem to be that of containing or concealing (Ps. cxxvii. 5; Is. xlix. 2). It is connected with arrows only in Lam. iii. 13. Its other occurrences are Job xxxix. 23, Is. xxii. 6, and Jer. v. 16. In each of these the LXX. transcribed it by "quiver" (φαρέρα), with two exceptions, Job xxxix. 23, and Ps. cxxvii. 5, in the former of which they render it by "bow," in the latter by *ἐμπυγία*.

As to the thing itself, there is nothing in the Bible to indicate either its form or material, or in what way it was carried. The quiver of the Assyrians is rarely shown in the sculptures. When they do appear they are worn at the back, with the top between the shoulders of the wearer, or hung at the side of the chariot.

The Egyptian warriors, on the other hand, wore them slung nearly horizontally, drawing out the arrows from beneath the arm (Wilkinson, *Popular Account*, i. 354). The quiver was about 4 inches in diameter, supported by a belt passing over the shoulder and across the breast to the opposite side. When not in actual use, it was shifted behind.

The English word "quiver" is a variation of "cover" — from the French couvrir: and therefore answers to the second of the two Hebrew words.

*QUOTATIONS FROM THE O.T. IN THE NEW. [OLD TESTAMENT, iii.]*

**RAAMAH**

'Pe'yeü̂. [Vat. *Pe'ya,] Alex. *Pe'ya,] Ez. xxvii. 22:

**[震摇，创本名马]**: *Pe'yeü̂, 1 Chr. i. 91: *Reym, *Reyvui.*

A son of Cush, and father of the Cushite Sheba and Dedan. The tribe of Raamah became afterwards renowned as traders; in Ezekiel’s lamentation for Tyre it is written, “The merchants of Sheba and Raamah, they [were] thy merchants; they occupied in thy fairs with chief of all the spices, and with all precious stones and gold.” (xxvii. 22). The general question of the identity, by intermarriage, etc., of the Cushite Sheba and Dedan with the Keturahites of the same names is discussed, and the 27th chapter of Ezekiel examined, in art. DEDAN. Of the settlement of Raamah on the shores of the Persian Gulf there are several indications. Traces of Dedan are very faint; but Raamah seems to be recovered, through the LXX. reading of Gen. x. 7, in the ‘*Pe'yeü̂* of Ptol. vi. 7, and ‘*Pe'ya, of Steph. Byzant. Of Sheba, the other son of Raamah, the writer has found a trace in a ruined city so named (*Sheba*) on the island of Aial (Maraisid, s. v.), belonging to the province of Arabia called El-Bahreyn on the shores of the gulf. [SHEBA.] This identification strengthens that of Raamah with ‘Pe'yeü̂, and the establishment of these Cushite settlements on the Persian Gulf is of course important to the theory of the identity of these Cushite and Keturahite tribes: but, besides etymological grounds there are the strong reasons stated in DEDAN for holding that the Cushites colonized that region, and for connecting them commercially with Palestine by the great desert route.

The town mentioned by Niebuhr called Reymeh ([Kbry] *Descr. d’Arabie*) cannot, on etymological grounds, be connected with Raamah, as it wants an equivalent for the *V*; nor can we suppose that it is.
to be probably traced three days' journey from Samâ' ["F'azâ'at"], the capital of the Yemens. E. S. P.

RAAMIAH (רָאָמִיָּה) = Pe'âmaî. [Vat. Naaona, 2. m. Naaone: F. A. Saua: "Ramasim". One of the chiefs who returned with Zerahibael (Neh. xi. 7). In Ezra ii. 2 he is called Rehâlaem, and the Greek equivalent of the name in the LXX. of Nehemiah appears to have arisen from a confusion of the two readings, unless, as Barrington (Gesen. ii. 68) suggests, Pe'âmaî is an error of the copist for Pe'sâmaî, the uncial letters at having been mis-taken for m. In 1 Esdr. v. 8 the name appears as Rehâlaes.

RAAMSES, Ex. i. 11. [Rameses.]

RAABBAH. The name of several ancient places, both east and west of the Jordan. The root is rab, meaning "multitude," and thence "greatness," of size or importance" (Gesenius, Thes. 1254; Fürst, Haneb. ii. 347). The word survives in Arabic as a common appellative, and is also in use as the name of places — e.g. gr. Rabba on the east of the Dead Sea; Rabba, a temple in the tribe of Moab (Freycyq, ii. 107 v.; and perhaps also Rabbot in Morocco.

1. (רַבַּעַה) = Pe'âbbaî, Pe'âbaî, Pe'âbaî. [Rom. Ἄρμα, Josh. xiii. 25 (so Vat.); Pe'âbbaî, 1 Chr. xx. 1; Ἀρμάνας, Ez. xxv. 5 (so Vat. Alex.); elsewhere Pe'âbbaî =: Pe'âbbaî, in Vat. in 1 Chr. xxv. 27, Pe'âbbaî; 1 Chr. xx. 1, Pe'âbaî, Pe'âbaî, Pe'âbaî; Amm. i. 14, Pe'âbaî (so Alex.); Josh. and Ez. as above; elsewhere Pe'âbaî: — Alex. in Josh. xiii. 25, Amm. i. 14, Pe'âbaî, Pe'âbaî; 2 Sam. xii. 26, Pe'âbaî; Ez. xxv. 5 (so Vat. Alex.); elsewhere Pe'âbaî: — F.A. Jer. xlix. 2, Pe'âbaî, ver. 3; F.A. Pe'âbaî (E. Rabbot, Rabbot). A very strong place on the east of Jordan, which, when its name was first introduced in the sacred records, was the chief city of the Ammonites. In five passages (Deut. iii. 11; 2 Sam. xii. 26, xvi. 27; Jer. xlix. 2; Ez. xxi. 20) it is styled at length Rabbath Ammon, A. V. [in Deut. iii. 11, Ez. xxi. 29] Rabbot [elsewhere Rabbat] of the Ammonites, or, children of Ammon; but elsewhere (Josh. xiii. 25; 2 Sam. xi. 1, xii. 27, 29; 1 Chr. xx. 1; Jer. xlix. 3; Ez. xxi. 5; Amos i. 14) simply Rabba. It appears in the sacred records as the single city of the Ammonites, at least no other bears any distinctive name, a fact which, as has already been remarked (vol. i. p. 84 b), contradicts strongly with the abundant details of the city life of the Moab-ites.

Whether it was originally, as some conjecture, the "capital of which the Zuzim were dispossessed by Thelorokinor (Gen. xiv. 5), will probably remain forever a conjecture." When first named, it is in the hands of the Ammonites, and is mentioned as containing all the flocks of the giant Og (Deut. iii. 11), possibly the trophy of some successful war of the younger nation of Lot, and more recent settler in the country, against the more ancient Replain. With the people of Lot, their

kinsmen the Israelites had no quarrel, and Rabbah-of-the-children-of-Ammon remained to all appearance unmolested during the first period of the Israelite occupation. It was not included in the territory of the tribes east of Jordan; the border of Gad stops at "Aner, which faces Rabbah" (Josh. xiii. 23). The attacks of the Bene-Ammon on Israel, however, brought these peaceful relations to an end, and it must have had occupation enough on the west of Jordan in attacking and repealing the attacks of the Philistines and in pursuing David through the woods and ravines of Judah to prevent his crossing the river, unless on such special occasions as the relief of Jabesh. At any rate we never hear of his having penetrated so far in that direction as Rabba. But David's armies were often engaged against both Moab and Ammon.

His first Ammonite campaign appears to have occurred early in his reign. A part of the army, under Absibah, was sent as far as Rabbah to keep the Ammonites in check (2 Sam. x. 10, 14), but the main force under Joab remained at Medeba (1 Chr. xix. 7). The following year was occupied in the great expedition by David in person against the Syrians at Helam, wherever that may have been (2 Sam. x. 15-19). After their defeat the Ammonites were reduced, and this time Rabba was made the main point of attack (xi. 1). Joab took the command, and was followed by the whole of the army. The expedition included Ephraim and Benjamin, as well as the king's own tribe (ver. 11); the "king's slaves" (vv. 1, 17, 24); probably David's immediate body-guard, and the thirty-seven chief captains. Uriah was certainly there, and, if a not improbable Jewish tradition may be admitted, Gittith the Gittite was there also. [TURAL.] The ark accompanied the camp (ver. 11), the only time (it we hear of its doing so, except that memorable battle with the Philistines, when its capture caused the death of the high-priest. David alone, to his cost, remained in Jerusalem. The country was wasted, and the roving Ammonites were driven with all their property (xii. 30) into their single stronghold, as the Redonim Kenesites were driven from their tents inside the walls of Jerusalem when Judah was overrun by the Chaldeans. [RECHABITES.] The siege must have lasted nearly, if not quite, two years; since during its progress David formed his connection with Ruthshela, and the two children, that which died and Shobnam, were successively born. The sallies of the Ammonites appear to have formed a main feature of the siege (2 Sam. xi. 17, 18). At the end of that time Joab succeeded in capturing a portion of the place — the "city of waters," that is, the lower town, so called from its containing the perennial stream which rises in and still flows through it. The fact (which seems undoubted) that the source of the stream was within the lower city, explains its having held out for so long. It was also called the "royal city" (רַבַּעַה), perhaps from its connection with Molcho or Milcom agreement with this is the fact that it was in later Jewish legend known as Astarke (Steph. Byz., quoted by Ritter, p. 1155). In this case the usual ending of Karnaim may point, as some have conjectured in Jerusalem, to the double nature of the city — a lower town and a citadel.

d. On a former occasion (Num. xxxi. 3) the "holy things" only are specified; an expression which hardly seems to include the ark.
— the "king" — more probably from its containing the palace of Hanan and Nahash. But the citadel, which rises abruptly on the north side of the lower town, a place of very great strength, still remained to be taken, and the honor of this capture, Joab (with that devotion to David which runs like a bright thread through the dark web of his character) insists on reserving for the king.

"I have fought," writes he to his uncle, then living at ease in the harem at Jerusalem, in all the satisfaction of the birth of Solomon — "I have fought against Rabbah, and have taken the city of waters: but the king slept still; now therefore gather the rest of the people together and come put yourself at the head of the whole army, renew the assault against the citadel, take it, and thus finish the siege which I have carried so far," and then he ends with a rough launter — half jest, half earnest — "lest I take the city and in future it go under my name."

The waters of the lower city once in the hands of the besiegers, the fate of the citadel was certain, and the fortress possessed in itself (as we learn from the invaluable notice of Josephus, _Ant._ vii. 5, § 5) but one well of limited supply, quite inadequate to the throng which crowded its walls. The provisions also were at last exhausted, and shortly after David's arrival the fortress was taken, and its inmates, with a very great booty, and the idol of Molech, with all its costly adornments, fell into the hands of David.

[ITAIA: MOLCHEH.] We are not told whether the city was demolished or whether David was satisfied with the slaughter of its inmates. In the time of Amos, two centuries and a half later, it had again a "wall" and "palaces," and was still the sanctuary of Molech — the king." (Am. i. 14). So it was also at the date of the invasion of Nechochnezzar (Jer. xlix. 2, 3), when its dependent towns ("daughters") are mentioned, and when it is named in such terms as imply that it was of equal importance with Jerusalem (Ez. xxi. 20). At Rabbah, no doubt, Baalis, king of the Bene-Ammon (Jer. xi. 14), held such court as he could muster, and within its walls was plotted the attack of Ishmael which cost Gebalath his life, and drove Jeremias into Egypt. [ISMAEL]. (Eusebius, _Onom._). The denunciations of the prophets just named may have been fulfilled, either at the time of the destruction of Jerusalem, or five years afterwards, when the Assyrian armies overran the country east of Jordan on their road to Egypt (Joseph. _Ant._ x. 9, § 7). See Jerome, on Amos i. 41.

In the period between the Old and New Testaments, Rabatha-Amnon appears to have been a place of much importance, and the scene of many contests. The natural advantages of position and water supply which had always distinguished it, still made it an important citadel by turns to each side, during the contentions which raged for so long over the whole of the district. It lay on the road between Heshbon and Bosra, and was the last place at which a stock of water could be obtained for the journey across the desert. Being in the confines of the richer and more civilized country, it formed an important garrison station, for repelling the incursions of the wild tribes of the desert.

From Ptolemy Philadelphus (n. c. 283-247) it received the name of Philadelphena (Jerome on Ex. xxv. 1), and the district either then or subsequently was called Philadelphea (Joseph. _B. J._ iii. 5, § 5), or Arakia Philadephensis (Eppiaenches, in Ritter, _Syria_, p. 1556). In n. c. 218 it was taken from the then Ptolemy (Pithopator) by Antiochus the Great, after a long and obstinate resistance from the besieged in the citadel. A communication with the spring in the lower town had been made since (possibly in consequence of) David's siege, by a long secret subterranean passage, and had not this been discovered by the Antiochus by a prisoner the citadel might have been enabled to hold out (Polybius, v. 17, in Ritter, _Syria_, p. 1555). During the struggle between Antiochus the Pious (Silectes), and Ptolemy the son-in-law of Simon Maccabees (cirt. n. c. 134), it is mentioned as being governed by a tyrant named Cotybas (Ant. xiii. 8, § 1). Its ancient name, though under a cloud, was still used; it is mentioned by Polybius (v. 71) under the hardly altered form of Rabatha ("Rabar"). About the year 65 we hear of it as in the hands of Aretas (one of the Arab chiefs of that name), who retired thither from Judaea when menaced by Scurrus, Pompey's general (Joseph. _B. J._ i. 5, § 3). The Arabs probably held it till the year n. c. 30, when they were attacked there by Herod the Great. But the account of Josephus (_B. J._ i. 18, §§ 5, 6) seems to imply that the city was not then inhabited, and that although the citadel formed the main point of the combat, yet that it was only occupied on the instant. The water communication above alluded to also appears not to have been then in existence, for the people who occupied the citadel quickly surrendered from thirst, and the whole affair was over in six days.

At the Christian period Philæphena formed the eastern limit of the region of Peræa ( _B. J._ iii. 3, § 3). It was one of the cities of the Decapolis, and as far down as the 4th century was esteemed one of the most remarkable and strongest cities of the whole of Cæle-Syria (Eusebius, _Onom._. "Amman;" Ammianus Marc. in Ritter, p. 1157). Its magnificent theatre (said to be the largest in Syria), temples, odeon, mausoleum, and other public buildings were probably erected during the 2d and 3d centuries, like those of Jerash, which they resemble in style, though their scale and design are grander (Lindsay). Amongst the ruins of an "immense temple" on the citadel hill, Mr. Tipping saw some prostrate columns 5 ft. diameter. Its coins are extant, some bearing the figure of Astarth, some the word Heraklelon, implying a worship of Hercules, probably the communication of that of Molech or Milcom. From Stephanus of Byzantium we learn that it was also called Astarthe, doubtless from its containing a temple of that goddess. Justin Martyr, a native of Shechem, writing about A. d. 140, speaks of the city as containing a multitude of Ammonites ( _Dial. with Trypho_ ), though it would probably not be safe to interpret this too strictly.

Philadelphia became the seat of a Christian bishop, and was one of the nineteen cities of " _Palestina tertia,_" which were subordinate to Bostra.

a The Vulgate alters the force of the whole passage by rendering this _et expedia est tres aqua_, " the art of waters is about to be taken." But neither Matthew nor LXX. will bear this interpretation.

b Very characteristic of Joab. See a similar strain, 2 Sam. xix. 6.

c Mr. Tipping gives the following dimensions in his journal. Brickdust 240 ft.; height 42 steps; name not first row 10, second 14, third 18.
RABBAH

(Re LAND, Pol. p. 228.) The church still remains "in excellent preservation" with its lofty steeple (Lord Lindsay). Some of the bishops appear to have signed under the title of Bakatha; which Bakatha is by Epiphanius (himself a native of Palestine) mentioned in such a manner as to imply that it was but another name for Philadelphia, derived from an Arab tribe in whose possession it was at that time (A. D. c. 400). But this is doubtful. (See Eland, Pol. p. 612; Ritter, p. 1157.)

Amman "lies about 22 miles from the Jordan at the eastern apex of a triangle, of which Hebron and Jaffa form respectively the southern and northern points. It is about 14 miles from the former, and 12 from the latter. Jerash is due north more than 20 miles distant in a straight line, and 25 by the usual road (Lindsay, p. 278). It lies in a valley which is a branch, or perhaps the main course, of the Wady Zarqa, usually identified with the Jabok. The Moaet-Ammán, or water of Amman, a mere streamlet, rises within the basin which contains the ruins of the town. The main valley is a mere winter torrent, but appears to be perennial, and contains a quantity of fish, by one observer said to be trout (see Burekhard, p. 358; G. Robinson ii. 174: "a perfect fishpond." Tipping). The stream runs from west to east, and north of it is the citadel on its isolated hill.

When the Moslems conquered Syria they found the city in ruins (Alufeda in Ritter, p. 1158; and in note to Lord Lindsay); and in ruins remarkable for their extent and desolation even for Syria, the "Land of ruins," it still remains. The public buildings are said to be Roman, in general character like those at Jerash, except the citadel, which is described as of large square stones put together without cement, and which is probably more ancient than the rest. The remains of private houses scattered on both sides of the stream are very extensive. They have been visited, and described in more or less detail, by Burekhardt (Syria, pp. 357-360), who gives a plan; Setzien (Reisen, i. 356, iv. 212-214); Iby (June 141); Backingham, E. Syria, pp. 68-82; Lord Lindsay (5th ed. pp. 278-281); G. Robinson (ii. 172-178); Lord Hamilton (in Keith, Free of Syria, ch. vi.). Burekhardt's plan gives a general view of the disposition of the place, but comparison with W. Tipping's sketch (on the accuracy of which every dependence may be placed) seems to show that it is not correct as to the proportions of the different parts. Two views are given by Laborde (Vues en Syrie), one of a tomb, the other of the theatre; but neither of these embraces the characteristic features of the place—the streamlet and the citadel. The accompanying view has been engraved (for the first time) from one of several careful sketches made in 1840 by William Tipping, Esq., and by him kindly placed, with some valuable information, at the disposal of the author. It is taken looking towards the east. On the right is the beginning of the citadel hill. In front is an arch (also mentioned by Burekhardt) which spans the stream. Below and in front of the arch is masonry, showing how the stream was formerly embanked or quayed in.

No inscriptions have been yet discovered. A lengthened and excellent summary of all the information respecting this city will be found in Ritter's Eroikaude, Syrie (pp. 1145-1150).

* These ruins, among the most impressive in Syria, are not, with the exception of the citadel, those of the Rabbath of the Ammonites. That has vanished with the iron beard of the last

Anman, from the East: showing the perennial stream and part of the citadel-hill. From a sketch by Wm. Tipping, Esq.
RABBATH

giant king of Bashan. The remains of the Roman Philadelphia appear in the elaborate but mutilated Greek sculpture with which the site is now strewed. (Tristram, Land of Israel, pp. 548-555, 2d ed.)

2. Although there is no trace of the fact in the Bible, there can be little doubt that the name of Rabbah was also attached in Biblical times to the chief city of Moab. Its Biblical name is An, but we have the testimony of Eusebius (Onomast. of 'Moab') that in the 4th century it possessed the special title of Rabbath Moab, or as it appears in the corrupted orthography of Stephanus of Byzantium, the coins, and the Ecclesiastical Lists, Rabbathmoloch, Rabbathmammeth, and Rabb or Rabbi Moabitis (Reland, pp. 397, 320; Seetzen, Reisen, iv. 227; Ritter, p. 1229). This name was for a time displaced by Areopolis, in the same manner that Rabbath-Ammon had been by Philadelphian: these, however, were but the names imposed by the temporary masters of the country, and employed by them in their official documents, and when they passed away, the original names, which had never lost their place in the mouths of the common people, reappeared, and Rabbath and Ammonia still remain to testify to the ancient appellations. Rabbah lies on the highlands at the S. E. quarter of the Dead Sea, between Kerak and Jizrel (Julian). Its ruins, which are unimportant, are described by Burekardt (July 15), Seetzen (Reisen, i. 411), and De Saulcy (Jan. 18).

3. (רבעא), with the definite article: ל רחבא: Alex. אָסֶבֶּדֶת; Arach. (A) A city of Judah, named with Kirjath-jearim, in Josh. xv. 60 only. No trace of its existence has yet been discovered.

Coin of Philadelphia, showing the Text or Shrine of Hercules; the Greek equivalent to Molech. Obv. ΑΥΤΟΚΙΜΑΥΠΑΝΤΟΝΙΝ, Bust of M. Aurelius, r. Rev. ΦΙΛΑΡΚΟΥΨΗΡΑΚΑΙΩΝ PMA [A. V. C. 620]. Shrine in quadrata, r. [ΦΙΑΛΑΕΡΕΩΝ ΚΟΛΗΟΥ ΨΥΧΗ ΗΡΑΚΛΕΩΝ].

4. In one passage (Josh. xi. 8) Zidon is mentioned with the affix Rabbah — Zidon-rabbah. This is preserved in the margin of the A. V., though in the text it is translated "great Zidon." G.

RABBATH OF THE CHILDREN OF AMMON, and R. OF THE AMMONITES. (The former is the more accurate, the Hebrew being in both cases רבעא רבעא: תּוֹפְוֹנָבָּא שׂאֶבֶּדֶת; "the strong one of the Ammonites," or "the strong one of Ammon.") This is the full appellation of the place commonly given as RABBATH. It occurs only in Deut. iii. 11 and Ez. xxii. 20. The th is merely the Hebrew mode of connecting a word ending in th with one following it. (Comp. KAMATH, GEPATH, KIJEATH, etc. G).

RABBI ('רבי': "'Rabbi"). A title of respect given by the Jews to their doctors and teachers, and often addressed to our Lord (Matt. xxiii. 7, 8, xxvi. 23, 49; Mark ix. 5, x. 21, xiv. 45; John i. 38, 49, iii. 2, 9, iv. 31, vi. 22, x. 2, xi. 8). The meaning of the title is interpreted in express words by St. John, and by implication in St. Matthew, to mean Master, Teacher: מְשָׂאָרַכְו; John i. 38 (compare xi. 23, xiii. 13), and Matt. xxiii. 8, where recent editors (Tischendorf, Wordsworth, Alford), on the authority of MSS., read מְשָׂאָרַכְו, instead of מְשְׂאָרַכְו, of the Textus Receptus. The same interpretation is given by St. John of the kindred title RABHONI, 'Rabbi (John xx. 18), which also occurs in Mark x. 35, where the Textus Receptus, with less authority, spells the word 'Rabhoni. The reading in John xx. 16, which has perhaps the greatest weight of authority, makes an addition to the common text: "She turned herself and said unto Hinn, in the Hebrew tongue (מְשָׂאָרַכְו), Rabbi; which is to say, Master." The n which is added to these titles, ה ר (rab) and ה רב (rabbâh) or ה רב (rabbâ), has been thought to be the pronominal affix "My;" but it is to be noted that St. John does not translate either of these by "My Master;" but simply "Master," so that the n would seem to have lost any special significance as a possessive pronoun intimating appropriation or endearment, and, like the "my" in titles of respect among ourselves, or in such terms as Monsieur, Monsieur, to be merely part of the formal address. Information on these titles may be found in Lightfoot, Harmony of the Four Evangelists, John i. 38; House Herrick and Talalouche, Matt. xxiii. 7.

The Latin translation, Magister (connected with magister, magister), is a title formed on the same principle as Rabbi, from rab, "great." Rab enters into the composition of many names of dignity and office. [RABBI, RABBIN; RAB-BIN; RAB-MAG.]

The title Rabbi is not known to have been used before the reign of Herod the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammai. Before that period the prophets and the men of the great synagogue were simply called by their proper names, and the first who had a title is said to have been Simeon the son of Hillel, who is supposed by some to be the Simeon who took our Saviour in his arms in the Temple; he was called Rabbi, and from his time such titles came to be in fashion. Rabbi was considered a higher title than Rab, and Rabban higher than Rabbi.
yet it was said in the Jewish books that greater was he who was called by his own name than even he who was called Rabban. Some account of the Rabban and the Mishnaic and Talmudic writings may be found in Frideaux, Connection. Part i. book 5, under the year u. c. 446; part ii. book 8, under the year u. c. 37; and a sketch of the history of the school of rabbinical learning at Tiberias, founded by Rabbi Judah Hakkoledesh, the compiler of the Mishnah, in the second century after Christ, is given in Robinson's Biblical Researches, ii. 281. See also note 11 to Barton's Replacement Lectures, and the authorities there quoted, for instance, Brucker, vol. ii. p. 280, and Rassauge, Hist. du Judaïsme, iii. 6, p. 138.

E. P. E.

RABBITTH [ου ἡ Μ'το] (the multitude), with the def. article. [Rom. Ἀδαμπερα; Vat.] Ἀδαμπερα: Alex. Paββδες: Rabba. A town in the territory, perhaps on the boundary, of Bescar (Josh. xix. 29 only). It is not again mentioned, nor is anything yet known of it, or of the places named in company with it.

G. RABBO'NI, John xx. 16. [RABBE.] RAB'MAG [αύτουος] [see below]: Paββαγ, Paββαγαν: Rab-Mag. A term used in the sense of the "princes" that accompanied Nebuchadnezzar to the last siege of Jerusalem. It has already been shown that Nergalsharezer is probably identical with the king, called by the Greeks Nergillus, who ascended the throne of Babylon two years after the death of Nebuchadnezzar. [Nergal-sharezer.] This king, as well as certain other important personages, is found to bear the title in the Babylonian inscriptions. It is written indeed with a somewhat different vocalization, being read as Rabsaris by Sir H. Rawlinson. The significance is somewhat doubtful. Rabsar is most certainly a "great," or "chief," an exact equivalent of the Hebrew נבחי, whence Rabbi, "a great one, a doctor:" but Mag, or Magne, is an obscure term. It has been commonly identified with the word "Magnus" (Gesenius, ed rev. 22; Caleet, Commentaire littéral, vi. 293, &c.); but this identification is very uncertain, since an entirely different word — one which is read as Marpes — is used in that sense throughout the Behistun inscription (Oppert, Expedition Scientifique en Mésopotamie, ii. 291). Sir H. Rawlinson inclines to translate ellen by "priest," but does not connect it with the Mag, who in the time of Nebuchadrezzar had no footing in Babylon. He regards this rendering, however, as purely conjectural, and thinks we can only say at present that the office was one of great power and dignity at the Babylonian court, and probably gave its possessor special facilities for obtaining the throne.

G. R.

RABSACES (Paββαγες: Rabbeans). RAB'SHAKH (Ecclus. xviii. 18).

RAB'SARIS [ου ἡ Μ'το] [see below]: Paββαγις: Vat. Paββαγος: Alex. Paββαγες: Rab-saris. 1. An officer of the king of Assyria sent up with Tartan and Rabshakeh against Jerusalem in the time of Hezekiah (2 K. xviii. 17).

2. (Naββωβαγες: Alex. Naββωβαγος: Rab-

* Rom. Vat. (as part of the preceding word) Alex. Paββος; Alex. (also united with preceding word)
RABSHAKEH

...mentioned first, and, according to Is. xx. 1, conducted the siege of Ashdod. In 2 Chr. xxxii., where, with the addition of some not unimportant circumstances, there is given an extract of these events, it is simply said that (ver. 9) "Sennacherib, king of Assyria, sent his servants to Jerusalem." Rabshakeh seems to have discharged his mission with much zeal, addressing himself not only to the officers of Hezekiah, but to the people on the wall of the city, setting forth the hopelessness of trusting to any power, human or divine, to deliver them out of the hand of "the great king, the king of Assyria," and dwelling on the many advantages to be gained by submission. Many have imagined, from the familiarity of Rabshakeh with Hebrew, that he either was a Jewish deserter or an apostate convert of Israel. Whether this be so or not, it is not impossible that the insertion which he makes on the part of his master, that Sennacherib had even the sanction and command of the Lord Jehovah for his expedition against Jerusalem ("Am I now come up without the Lord to destroy it? The Lord said to me, Go up against this land to destroy it") may have reference to the prophecies of Isaiah (vii. 7, 8, x. 5, 6) concerning the desolation of Judah and Israel by the Assyrians, of which, in some form more or less correct, he had received information. Being unable to obtain any promise of submission from Hezekiah, who, in the extremity of his peril returning to trust in the help of the Lord, is encouraged by the words and predictions of Isaiah, Rabshakeh goes back to the king of Assyria, who had now departed from Lachish.

The English version takes Rabshakeh as the name of a person; it may, however, be questioned whether it be not rather the name of the office which he held at the court, that of chief cup-bearer, in the same way as Rab-sades denotes the chief eunuch, and Rab-mag possibly the chief priest.

Luther in his version is not quite consistent, sometimes (2 K. xvi. 17; Is. xxxvi. 2) giving Rabshakeh as a proper name, but ordinarily translating it as a title of office, arch-cupbearer (der Erzschank). The term Rab al may be found translated in many places of the English version, for instance, 2 K. xxv. 8, 20; Jer. xxxix. 11; Dan. ii. 14 (םנה chiều), Rob-tobebkin, "captain of the guard," in the margin "chief marshal," and "chief of the executioners." Dan. i. 3, Rob-saraim, "master of the eunuchs;" ii. 43 (םנה-chief, "chief of the governors;" iv. 9, v. 11 (םנה-chief, "chief of the eunuchs;"

RACHAEL

..."Rob-saraim, "master of the eunuchs;" ii. 43 (םנה-chief, "chief of the governors;" iv. 9, v. 11 (םנה-chief, "chief of the eunuchs;"

With regard to the pronunciation, the Chaldee name רחל, רחל, "Rachael," is given in the earlier editions of the English Bible (e.g. 1540, 1561, 1599) as Rahael, throughout. It is difficult not to suspect that Rachel (however originating) was a favorite woman's name in the latter part of the 16th and beginning of the 17th centuries, and that it was substituted for the less familiar though more accurate Rahael in deference to that fact and in obedience to the rule laid down for the guidance of the translators, that in the names in the text are to be retained as near as may be, accordingly as they are vulgarly used.

Rachel (so common in the literature of a century ago) is a corruption as Rebecca of Rebekah.
RACHEL

The story of Rachel and Rachel has always had a peculiar interest; there is that in it which appeals to some of the deepest feelings of the human heart. The beauty of Rachel, the deep love with which she was loved by Jacob from their first meeting by the well of Harran, when he showed to her the simple courtesies of the desert life, and kissed her and told her he was Rebekah's son; the long servitude with which he patiently served for her, in which the seven years "seemed to him but a few days," for the love he had to her; "their marriage at last, after the cruel disappointment through the fraud which substituted the elder sister in the place of the younger; and the death of Rachel at the very time when in giving birth to another son her own long-delayed hopes were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (Gen. xiili. 7): these things make up a touching tale of personal and domestic history which has kept alive the memory of Rachel—the beautiful, the beloved, the timely taken away—and has preserved to this day a reverence for her tomb; the very infidel invaders of Cœ in Holy Land have respected the traditions of the site, and erected over it a small rude shrine, which conceals whatever remains may have once been found of the pillar first set up by her mourning husband over her grave.

Yet from what is related to us concerning Rachel's character there does not seem much to claim any high degree of admiration and esteem. The discontented and fretful impatience shown in her grief at being for a time childless, moved even her fond husband to anger (Gen. xxvi. 1, 2). She appears, moreover, to have shared all the duplicity and falsehood of her family, of which we have such painful instances in Rebekah, in Laban, and not least in her sister Leah, who consented to bear her part in the deception practiced upon Jacob. See, for instance, Rachel's stealing her father's images, and the ready dexterity and presence of mind with which she concealed her theft (Gen. xxxiv. 13); we seemed to recognize in Rachel the founder of that school of untruth. From this incident we may also infer (though this is rather the misfortune of her position and circumstances) that she was not altogether free from the superstitions and idolatry which prevailed in the land when Abraham had been called (Josh. xxiv. 2, 14); and which still to some degree infected even those families among whom the true God was known.

The events which preceded the death of Rachel are of much interest and worthy of a brief consideration. The presence in his household of these idolatrous images, which Rachel and probably others also had brought from the East, seems to have been either unknown to or connived at by Jacob for some years after his return from Harran, till, on being reminded by the Lord of the vow which he had made at Bethel when he fled from the face of Esau, and being hidden by Him to erect in an altar to the God who appeared to him there, Rachel felt the glaring impiety of this solemnly appearing before God with the taint of impurity cleaving to his household, and "said to his household and all that were with him, Put away the foreign gods from among you" (Gen. xxxiv. 2). After thus casting out the polluting thing from his house, Jacob journeyed to Bethel, where, amidst the associations of a spot consecrated by the memories of the past, he received from God an emphatic promise and blessing, and, of the name of the Supplanter bearing kid aside, he had given to him instead the holy name of Israel. Then it was, after his spirit had been there purified and strengthened by communion with God, by the assurance of the Divine love and favor, by the consciousness of evil put away and duties performed, then it was, as he journeyed away from Bethel, that the chastening blow fell and Rachel died. These circumstances are alluded to here not so much for their bearing upon the spiritual discipline of Jacob, but rather with reference to Rachel herself, as suggesting the hope that they may have had their effect in bringing her to a higher sense of her relations to that Great Jehovah in whom her husband, with all his faults of character, so firmly believed.

Rachel's Tomb. — "Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave; that is the Pillar of Rachel's grave unto this day." (Gen. xxxv. 19, 20). As Rachel is the first related instance of death in childbearing, so this pillar over her grave is the first recorded example of the setting up of a sepulchral monument; caves having been up to this time spoken of as the usual places of burial. The spot was well known in the time of Samuel and Saul (1 Sam. x. 2); and the prophet Jeremiah, by a poetic figure of great force and beauty, represents the buried Rachel weeping for the loss and captivity of her children, as the bands of the exiles, led away on their road to Babylon, passed near her tomb (Jer. xxxi. 15-17). St. Matthew (ii. 17, 18) applies this to the slaughter by Herod of the infants at Bethlehem.

The position of the Ramah here spoken of is one of the most interesting questions in the topography of Palestine; but the site of Rachel's tomb, "on the way to Bethlehem," a "little way a to come to Ephrath," "in the border of Benjamin," has never been questioned. It is about 2 miles S. of Jerusalem, and one mile N. of Bethlehem. "It is one of the shrines which Muslims, Jews, and Christians agree in honoring, and concerning which their traditions are identical." It was visited by Maundrell, 1667.

The description given by Dr. Robinson (i. 218) may serve as the representative of the many accounts, all agreeing with each other, which may be read in almost every book of eastern travel. It is "merely an ordinary Muslim Wely, or tomb of a holy person, a small square building of stone with a dome, and within it a tomb in the ordinary Moslemah form, the whole plastered over with mortar. Of course the building is not ancient; in the seventh century there was here only a pyramid of stones. It is now neglected and falling to decay,"

a Hebrew Chlokh; in the LXX. here, xiviii. 7, and 2 K, v. 19, Naphath. This seems to have been accepted as the name of the spot (Beneithis in Eus. Ps. Ep. 1x 21), and to have been actually encountered wherever a traveler in the 19th cent. (Dordrecht de Struensee, by Saint Genies, p. 36), who gives the Arabic name of Rachel's tomb as Celeba or Cebata.

b The distance of Rachel's tomb is at least 6 miles from Jerusalem, and not more than half a mile from Bethlem.

c Since Robinson's last visit, it has been enlarged by the addition of a square court on the south side with high walls and arches (Litur. Searchers, 273).
though pilgrimages are still made to it by the Jews. The naked walls are covered with names in several languages, many of them in Hebrew. The general correctness of the tradition which has fixed upon this spot for the tomb of Rachel cannot well be drawn in question, since it is fully supported by the circumstances of the Scriptural narrative. It is also mentioned by the *Itin. Hieros.,* A. D. 333,

and by Jerome (Ep. lxxvi. ad Eustoch., Epilaph. Paule) in the same century."

Those who take an interest in such interpretations may find the whole story of Rachel and Leah allegorized by St. Augustine (contra Faustinum Ma-
nichemus, xxii., ii.—viit. vol. viii. 442, etc., ed. Migne), and Justin Martyr (Dialogue with Trypho, c. 134, p. 390).

**RADDAI** (דַּדָּי) [treading down, Ges ]; [Vat.] Zaa'ai; [Rom.] Zaà'ai; [Alex. Pas5ai:] Joseph. Pdyo: *Rabb•i.* One of David's brothers, fifth son of Jesse (1 Chr. ii. 14). He does not appear in the Bible elsewhere than in this list, unless he be, as Ewald conjectures (*Geschichte, iii. 296 note*), identical with Reb. But this does not seem probable. Furst (*Handbuch* ii. 355 b) considers the final i of the name to be a remnant of Jah or Jehovah (= J. is freedom).

**RAGAI** (רָגָא, Ṭągái). 1. A place named only in Jud. i. 5, 15. In the latter passage the "mountains of Ragas" are mentioned. It is probably identical with Rages.

2. One of the ancestors of our Lord, the son of Philec (Luke iii. 35). He is the same person with Reb son of Peleg; and in the difference in the name arises from our translators having followed the Greek form, in which the Hebrew ﬠ is frequently expressed by γ., as is the case in Raguel (which once occurs for Remel), Gomorrah, Gomâ-lih (for Atholiah), Phogor (for Poor), etc. G.

**RAGES** (Ῥάγης, Ṭągái: Rages) was an important city in northeastern Media, where that country bordered upon Parthia. It is not mentioned in the Hebrew Scriptures, but occurs frequently in the Book of Tobit (i. 14, v. 5, vi. 9, 12, etc.), and twice in Judith [in the form of Ṭągái] (i. 5, 15).

According to Tobit, it was a place to which some of the Israelitish captives taken by Shalmaneser (Kameser) had been transported, and thither the angel Raphael conducted the young Tobit. In the Book of Judith it is made the scene of the great battle between Nabuchodonosor and Arpadhash, wherein the latter is said to have been defeated and taken prisoner. Neither of these accounts can be regarded as historic: but the latter may conceal a fact of some importance in the history of the city.

Rages is a place mentioned by a great number of profane writers. It appears as Ragha in the Zendavesta, in Isidore, and in Stephen; as Raga in the inscriptions of Parius; Rhage in Duris of Samos (Fr. 25), Strabo (xi. 9, § 1), and Arrian (Exp. Alex. iii. 20); and Rhaga in Pekony (vi. 5).

Properly speaking, Rages is a town, but the town gave name to a province, which is sometimes called Rages or Rhage, sometimes Rhagiana. It appears from the Zendavesta that here was one of the earliest settlements of the Aryans, who were mingled, in Rhagiana, with two other races, and were thus brought into contact with heretics (Ibnson, *Philosophy of Universal History,* iii. 485). Isidore calls Rages "the greatest city in Media" (p. 6), which

---

*Raches' Tomb.*
may have been true in his day; but other writers commonly regard it as much inferior to Ecbatana. It was the place to which *Fraternity* (Phracortes), the Median rebel, fled, when defeated by Darius Hystaspis, and at which he was made prisoner by one of Darius' generals (Eh. loc. cit. p. 13). [MN.

This is probably the fact which the apocryphal writer of Judith had in mind when he spoke of Apflax as a having been captured at Ragan. When Darius Codomannus fled from Alexander, intending to make a final stand in Bactria, he must have passed through Rages on his way to the Casian Gates; and so we find that Alexander arrived there in pursuit of his enemy, on the eleventh day after he had ejected Ecbatana (Arrian, *Apoc. Mar.* iii. 25). In the troubles which followed the death of Alexander, Rages appears to have gone to decay, but it was soon after rebuilt by Seleucus I. (Nicator), who gave it the name of Europas (Strab. xi. 3, § 61; Steph. Byz. s. v. *Rages*). When the Parthians took it, they called it Arsace, after the Araxes of the day; but it soon afterwards recovered its ancient appellation, as we see by Strabo and Isidore. That appellation it has ever since retained, with only a slight corruption, the ruins being still known by the name of *Rage*. These ruins lie about five miles southeast of Teheran, and cover a space 4,500 yards long by 3,500 yards broad. The walls are well marked, and are of prodigious thickness; they appear to have been flanked by strong towers, and are connected with a lofty citadel at their northeastern angle. The importance of the place consisted in its vicinity to the Casian Gates, which, in a certain sense, it guarded. Owing to the barren and desolate character of the great salt desert of Iran, every army that seeks to pass from Bactria, India, and Afghanistan to Media and Mesopotamia, or *vivere*, must skirt the range of mountains which runs along the southern shore of the Caspian. These mountains send out a rugged and precipitous spur in about long. 52° 20' E. from Greenwich, which runs far into the desert, and can only be reached with the extreme difficulty. Across this spur is a single pass; the *Pyle Caspe* of the ancients; and of this pass the possessors of Rages must have at all times held the keys. The modern Teheran, built out of its ruins, has now superseded *Rage*; and it is perhaps mainly from the importance of its position that it has become the Persian capital. (See an account of the ruins of *Rage*, see Ker Porter's *Travels*, i. 357- 364; and compare Frasers *Khorassan*, p. 286.)

G. R.

RAGUEL, or RAVUEL ( الصحيح [Friend of God]); *Pasyoda*; *Ruguel*. 1. A prince-priest at Midian, the father of Zipporah according to Ex. ii. 21, and of Hobab according to Num. x. 29. As the father-in-law of Moses is named Jethro in Ex. iii. 1, and Hobab in Judg. iv. 11, and perhaps in Num. x. 29 (though the latter passage admits of another sense), the *primrr fact* view would be that Raguel, Jethro, and Hobab were different names for the same individual. Such an arrangement was in his mind when he spoke with regard to the two first at all events, if not with the third. [HOM.

One of the names may represent an official title, but whether Jethro or Raguel, is uncertain, both being appropriately significant: a Josephus was in favor of the forma *Raguel*, i. c. *Iedaglaos, ἡν εἵπε αὐτὸν τῷ* βασιλεῖν. *Raguel*, Aut. ii. 12, § 1), and this is not unlikely, as the name Raguel was not an uncommon one. The identity of Jethro and Raguel is supported by the indiscriminate use of the names in the LXX. (Ex. ii. 16, 18); and the application of more than one name to one individual was a usage familiar to the Hebrews, as is shown in Jacob and Israel, Solomon and Jedidjah, and other similar cases. Another solution of the difficulty has been sought in the loose use of terms of relationship among the Hebrews; as that *cibita,b* in Ex. iii. 1, xviii. 1; Num. x. 29, may signify any relation by marriage, and consequently that Jethro and Hobab were brothers-in-law of Moses; or that the terms *mex* and *bath* in Ex. ii. 16, 21, mean grandfather and granddaughter. Neither of these assumptions is satisfactory, the former in the absence of any corroborative evidence, the latter because the omission of Jethro the father's name in so circumstantial a narrative as in Ex. ii. is inexplicable, nor can we conceive the indiscriminate use of the terms father and grandfather without good cause. Nevertheless this view has a strong weight of authority in its favor, being supported by the Targum Jonathan, Aben Ezra, Medahid, Winer, and others.

W. L. B.

2. Another transcription of the name *Raguel* occurring in Tobit, where Raguel, a pious Jew of "Ecbatana, a city of Media," is father of Sara the wife of Tobias (Tob. iii. 7, 17, &c.). The name was not uncommon, and in the book of Enoch it is applied to one of the great guardian angels of the universe, who was charged with the execution of the divine judgments on the (material) world and the stars (cc. xx. 4, xxiii. 4, ed. Puhlmann).

B. F. W.

RAHAB, or RACHAB (חָבָּא [broad head]; *Pasyâb*, and *Pâbâ*: Raba, and *Rimâ*:); a celebrated woman of Jericho, who received the spies sent by Joshua to spy out the land, hid them in her house from the pursuit of her countrymen, was saved with all her family when the Israelites sacked the city, and became the wife of Salmon, and the ancestress of the Messiah.

Her history may be told in a few words. At the time of the arrival of the Israelites in Canaan she was a young unmarried woman, dwelling in a house of her own alone, though she had a father and mother, and brothers and sisters, living in Jericho. She was a "harpist," and probably combined the trade of lodging-keeper for wayfarers. She seems also to have been engaged in the manufaeture of linen and the art of dyeing, for which the Phenicians were early famous; since we find the flat roof of her house covered with stalks of flax put there to dry, and a stock of scarlet or crimson (דֵּבָּא) fine in her house; a circumstance which, coupled with the mention of Phenician garments at Josh. vii. 21, as among the spoils of Jericho, indicates the existence of a trade in such articles between the Phenicians and Mesopotamia. Her house was situated on the wall, probably near the town gate, so as to be convenient for persons coming in and going out of the city. Traders coming from Mesopotamia or Egypt to Phenicia would frequently
pass through Jericho, situated as it was near the fords of the Jordan; and of those many would resort to the house of Rahab. Rahab therefore had been well informed with regard to the events of the Exod. She had heard of the passage through the Red Sea, of the utter destruction of Sihon and Og, and of the irresistible progress of the Israelite host. The effect upon her mind had been what one would not have expected in a person of her way of life. She went to a firm faith in Jehovah as the true God, and to the conviction that He purposed to give the land of Canaan to the Israelites. When therefore the two spies sent by Joshua came to her house, she found themselves under the roof of one who, alone probably of the whole population, was friendly to their nation. Their coming, however, was quickly known; and the king of Jericho, having received information of it while at supper, according to Josephus, sent that very evening to require her to deliver them up. It is very likely that, her house being a public one, some one who resorted there may have seen and recognized the spies, and gone off at once to report the matter to the authorities. But not without awakening Rahab's suspicions: for she immediately hid the men among the flax stalks which were piled on the flat roof of her house, and, on the arrival of the officers sent to search her house, was ready with the story that two men, of what country she knew not, had, it was true, been to her house, but had left it just before the gates were shut for the night. If they pursued them at once, she added, they would be sure to overtake them. Misdled by the false information, the men started in pursuit to the fords of the Jordan, the gates having been opened to let them out, and immediately closed again. When all was quiet, and the people were gone to bed, Rahab stole up to the house-top, told the spies what had happened, and assured them of her faith in the God of Israel, and her confident expectation of the capture of the whole land by them; an expectation, she added, which was shared by her countrymen, and had produced a great panic among them. She then told them her plan for their escape. It was to let them down by a cord from the window of her house which looked over the city wall, and that they should flee into the mountains which bounded the plains of Jericho, and lie hid there for three days, by which time the pursuers would have returned, and the fords of the Jordan be open to them again. She asked, in return for her kindness to them, that they should swear by Jehovah, that when their countrymen had taken the city they would spare her life, and the lives of her father and mother, brothers and sisters, and all that belonged to them. The men readily consented, and it was agreed between them that she should hang out her scarlet line at the window from which they and escaped, and bring all her family under her roof. If any of her kindred went out of doors in the street, his blood would be upon his own head, and the Israelites in that case would be guiltless. The event proved the wisdom of her precautions. The pursuers returned to Jericho after a fruitless search, and the spies got safe back to the Israelite camp. The news they brought of the terror of the Canaanites doubtless inspired Israel with fresh courage, and, within three days of their return, the passage of the Jordan was effected. In the utter destruction of Jericho which ensued, Joshua gave the strictest orders for the preservation of Rahab and her family; and accordingly, before the city was burnt, the two spies were sent to her house, and they brought out her, her father and mother, and brothers, and kindred, and all that she had, and placed them in safety in the Israelitish camp.

The narrator adds, "and they dwelt in Israel unto this day;" not necessarily implying that she was alive at the time he wrote, but that the family of strangers of which she was reckoned the head, continued to dwell among the children of Israel. May not the 415 "children of Jericho," mentioned in Ezr. iii. 36, and the men of Jericho who assisted Nehemiah in rebuilding the walls of Jerusalem (Neh. iii. 2), have been their posterity?

Their continued sojourn among the Israelites, as a distinct family, would be exactly analogous to the cases of the Kenites, the house of Rechab, the Gilbibonites, the house of Caleb, and perhaps others.

As regards Rahab herself, we learn from Matt. i. 5, that she became the wife of Salmon the son of Naasson, and the mother of Boaz, Jesse's grandmother. The suspicion naturally arises whether Rahab may have been one of the spies whose life she saved, and that gratitude for so great a benefit led in his case to a more tender passion, and obliterated the memory of any past disgrace attaching to her name. We are expressly told that the spies were "young men" (Josh. vi. 23), and that the example of the former spies who were sent from Kadesh-Haraaa, who were all "heads of Israel" (Num. xiii. 3), as well as the importance of the service to be performed, would lead one to expect that they would be persons of high station. But, however this may be, it is certain, on the authority of St. Matthew, that Rahab became the mother of the line from which sprung David, and eventually Christ; and there can be little doubt that it was so stated in the public archives from which the Evangelists extracted our Lord's genealogy, in which only four women are named, namely, Tamar, Rahab, Ruth, and Bathsheba, who were all apparently foreigners, and named for that reason. [BETH-SHE'AN.] For that the Rechab mentioned by St. Matthew is Rahab the harlot, is as certain as that David in the genealogy is the same person as David in the books of Samuel. The attempts that have been made to prove Rahab different from Rahab, in order to get out of the chronological difficulty, are singularly absurd, and all the more so, because, even if successful, they would not diminish the difficulty, as long as Salmon remains as the son of Naasson and the father of Boaz. However, as there are still found those who follow Othov in his opinion, or at least speak of Rahab as the harlot, it may be as well to call attention, with Dr. Mill (p. 131), to the exact coincidence in the age of Salmon, as the son of Naasson, who was prince of the children of Judah in the wilderness, and Rahab the harlot; and to observe that the only conceivable reason for the mention of Rahab in St. Matthew's genealogy, is that she was a remarkable and well-known person, as Tamar, Ruth, and Bathsheba were. [Valpy's Greek Test. with Eng. notes, on Matt. i. 5; Barrington, On the Genealogies, i. 162-4, &c; Kuinoel on Matt. i. 5; Olshausen, ib.] There does not seem to be any force in Bengal's...
known Rahab in the line would be absurd. The allusions to “Rahab the harlot” in Heb. xi. 31, Jam. ii. 25, by stressing her among those illustrious for their faith, make it still more impossible to suppose that St. Matthew was speaking of any one else. The four successive generations, Nahshon, Salmon, Boaz, Obed, are consequently as certain as words can make them.

The character of Rahab has much and deep interest. Dismissing as inconsistent with truth, and with the meaning of ἐκκόλοθος and παρόνευσις, the attempt to clear her character of stain by saying that she was only an innkeeper, and not a harlot (ἐκκόλοθος, Chrysostom and Chal. Vers.), we may yet notice that it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does with us (“vitæ genus viri magis quia maginus” Gratius), and, moreover, that with a purer faith she seems to have entered upon a pure life.

As a case of casuistry, her conduct in deceiving the king of Jericho’s messengers with a false tale, and, above all, in taking part against her own countrymen, has been much discussed. It is hard to think of a strict truth, either in Jew or heathen, was a virtue so utterly unknown before the promulgation of the Gospel, that, as far as Rahab is concerned, the discussion is quite superfluous. The question as regards ourselves, whether in any case a falsehood is allowable, say to save our own life or that of another, is different, but need not be argued here. With regard to her taking part against her own countrymen, it can only be justified, but is fully justified, by the circumstance that fidelity to her country would in her case have been infidelity to God, and that the higher duty to her Maker eclipsed the lower duty to her native land. Her anxious provision for the safety of her father’s house shows how alive she was to natural affections, and seems to prove that she was not influenced by a selfish insensibility, but by an enlightened preference for the service of the true God over the abominable pollutions of Canaanite idolatry. If her own life of shame was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establishment of that to which she wished to belong by a community of faith and hope. Anyhow, allowing for the difference of circumstances, her feelings and conduct were analogous to those of a Christian Jew in St. Paul’s time, who should have preferred the triumph of the Gospel to the triumph of the old Judaism; or to those of a converted Hittite in our own days, who should side with Christian Englishmen against the attacks of his own countrymen to establish the supremacy either of Abraham or Mohammed.

This view of Rahab’s conduct is fully borne out by the references to her in the N. T. The author of the Epistle to the Hebrews tells us that “by faith

remark adopted by Olshaven, that the article (καὶ τῷ Παλαιθή) proves that Rahab of Jericho is meant, seeing that all the proper names in the genealogy, which are in the unique case, have the article, though many of them recur nowhere else and that it is omitted before Messiah in ver. 18.

The question, in reference both to Rahab and to the harlot Rahab perished not with them that believed not, when she had received the spies with peace” (Heb. xi. 31); and St. James fortifies his doctrine of justification by works, by asking “Was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?” (Jam. ii. 25.) And in like manner Clement of Rome says, “Rahab the harlot was saved for her faith and hospitality” (ad Corinth, xii.).

The fathers generally (hieroconsensus, Jacobson) consider the deliverance of Rahab as typical of salvation, and the scarlet line hung out at her window as typical of the blood of Jesus, in the same way as the ark of Noah and the blood of the paschal lamb were; a view which is borne out by the analogy of the deliverances, and by the language of Heb. xi. 31 (ταῖς ἄνευδοις, “the disobedient”), compared with 1 Pet. iii. 20 (ἀνεῳδοχάντας, murderers). Clement (ad Corinth, xii.) is the first to do so. He says that by the symbol of the scarlet line it was “made manifest that there shall be redemption through the blood of the Lord to all who believe and trust in God;” and adds, that rahab in this was a prophetess as well as a believer, a sentiment in which he is followed by Origen (in lib. I. p. 27, Hom. iii.), Justin Martyr in like manner calls the scarlet line the “symbol of the blood of Christ, by which those of all nations, who once were harlots and unrighteous, are saved;” and in a like spirit Jerusalem draws from the story of Rahab the conversion of the Gentiles, and the admission of publicans and harlots into the kingdom of heaven through the symbol of the scarlet line, which he compares with the Passover and the Exodous. Ambrose, Jerome, Augustine (who, like Jerome and Cyril, takes Ps. xxvi. iv. to refer to Rahab the harlot, and Theodoret, all follow in the same track; but Origen, as usual, carries the allegory still further. Irenaeus makes the singular mistake of calling the spies three, and makes them symbolic of the Trinity! The comparison of the scarlet line with the scarlet thread which was bound round the hand of Zarah is a favorite one with them. The fathers might perhaps be excepted, are embarrassed as to what to say concerning Rahab. They praise her highly for her conduct; but some Rabins give out that she was not a Canaanite, but of some other Gentile race, and was only a sojourner in Jericho. The Gemara of Babylon mentions a tradition that she became the wife of Josua, a tradition unknown to Jerome (ad Jer. xix.), and eight persons who were both priests and prophets sprung from her, and also Rahulhah the prophetess, mentioned 2 K. xxii. 14 (see Patrick, and loc. cit.). Josephus describes her as an innkeeper, and her house as an inn (καταμοσίου), and never applies to her the epithet παρόνευσις, which is the term used by the LXX.

Rahab is one of the not very numerous cases of the calling of Gentiles before the coming of Christ; and her deliverance from the utter destruction which fell upon her countrymen is so beautifully illustrative of the salvation revealed in the Gospel.
that it is impossible not to believe that it was in the fullest sense a type of the redemption of the world by Jesus Christ.

A. C. H.

RAHAB (רָהַב) [in Ps. lxxxvii. 4] Parosh: Rahab [Job xxvi. 12; ro כָּרָשָׁו, Ps. lxxxix. 10, וֱַּרָּהָּב; Is. li. 9, LXX. omit: superbus], a poetical name of Egypt. The name signifies "fierceness, insolence, pride;" if Hebrew, when applied to Egypt, it would indicate the national character of the inhabitants. It was probably of Egyptian origin, but accommodated to Hebrew, although no etymologically equivalent has been found in Coptic, or, we may add, in ancient Egyptian (Thes. s. v.). That the Hebrew meaning is alluded to in connection with the proper name, does not seem to prove that the latter is Hebrew, but this is rendered very probable by its opposite character, and its sole use in poetical books.

This name occurs in a passage in Job, where it is usually translated, as in the A. V., instead of being treated as a proper name. Yet if the passage be compared with parallel ones, there can scarcely be a doubt that it refers to the Exodus. He divideth the sea with His power, and by His understanding He smitest through the proud [or "Rahab"] (xxvi. 13). The prophet Isaiah calls on the arm of the Lord [Art.] not thou that cuttest out Rahab [and] wounded the dragon? [Art.] not thou which hath dried the sea, the waters of the great deep; that hast made the depths of the sea a way for the ransomed to pass over? (Is. li. 9, 10; comp. 15). In Ps. lxxiv. the division of the sea is mentioned in connection with breaking the heads of the dragons and the heads of the leviathan (19, 14). So too in Ps. lxxxix. God's power to subdue the sea is spoken of immediately before a mention of his having a "broken Rahab in pieces" (9, 10). Rahab, as a name of Egypt, occurs once only without reference to the Exodus: this is in Psalms lxxxxvii., where Rahab, Babylonia, Phœnicia, Tyre, and Cush are compared with Zion (4, 5). In one other passage the name is alluded to, with reference to its Hebrew signification, where it is supposed that the aid of the Egyptians should not avail those who sought it, and this sentence follows: רַהֲבָה הָאָרֶץ, "Insolence [i. e. the insolent], they sit still." (Isa. xxx. 7), as Gesenius says, considering it to be un doubtably a proverbial expression.

R. S. P.

RAHAM (רָהָמָה) [raamah, raamah; Pârâh, 1 Chron. xiv. 17, 18] Raham, in the genealogy of the descendants of Caleb the son of Hezron (1 Chr. ii. 44), Raham is described as the son of Shema and father of Joroomah. Tashi and the author of the Quest. in Paral., attributed to Jerome, regard Joroomah as a place, of which Raham was founder and prince.

RAHEL (רֵאֵל) [reck, sheeph; Pâxâh, Rorchat] The more accurate form of the familiar name elsewhere rendered Rachel. In the older English versions it is employed throughout, but survives in the Authorized Version of 1611, and in our present Bibles, in Jer. xxxv. 15 only. G.

RAIN. רָעָם (maid'ah), and also רֱעָם (gehecat), which, when it differs from the common word רָאָם, signifies a more violent rain; it is also used as a generic term, including the early and latter rain (Jer. v. 24; Joel ii. 23).

EARLY RAIN, the rains of the autumn, רָעָם (gehecat), part. subst. from רָעָם, "he scattered." (Deut. xi. 14; Jer. v. 24); also the hiphil part.

LATTER RAIN, the rain of spring, רָעָם (rehabba), (Prov. vii. 15; Job xxii. 25; Jer. iii. 3; Hos. vi. 3; Joel ii. 23; Zech. x. 1); רָעָם (gehecat), The early and latter rains are mentioned together (Deut. xi. 14; Jer. v. 24; Joel ii. 23; Hos. vi. 3; James v. 7).

Another word, of a more poetical character, is רָעָם (rehabbi, a plural form, connected with reh, "many," from the multiplicity of the drops), translated in our version "showers" (Deut. xxiii. 2; Jer. iii. 3, xiv. 22; Mic. v. 7 (Heb. 6); Ps. lxx. 10 (Heb. 11), lxxii. 6). The Hebrews have also the word רָעָם (zawma), expressing violent rain, storm, tempest, accompanied with hail—in Job xxiv. 8, the heavy rain which comes down on mountains; and the word רָעָם (zaygir), which occurs only in Prov. xxvii. 15, continuous and heavy rain, יִנְּהַר אֱמוֹנָאּאֵשִׁי. In a country comprising so many various elevations as Palestine, there must of necessity occur corresponding varieties of climate; an account that might correctly describe the peculiarities of the district of Lebanon, would be in many respects inaccurate when applied to the deep depression and almost tropical climate of Jericho. In any general statement, therefore, allowance must be made for not inconsiderable local variations. Compared with England, Palestine would be a country in which rain would be much less frequent than with ourselves; contrasted with the districts most familiar to the children of Israel before their settlement in the land of promise, Egypt and the Desert, rain might be spoken of as one of its distinguishing characteristics (Deut. xi. 10, 11; Herodotus iii. 10). For six months in the year no rain falls, and the harvests are gathered in without any of the anxiety with which we are so familiar lest the work be interrupted by unsseasonable storms. In this respect at least the climate has remained unchanged since the time when Boaz slept by his heap of corn; and the scoriad thunder and rain in wheat harvest was a miracle which filled the people with fear and wonder (1 Sam. xii. 16-18); and Solomon could speak of "rain in harvest" as the most formidable expression for conveying the idea of something utterly out of place and unnatural (Prov. xxvi. 1). There are, however, very considerable, and perhaps more than compensating, disadvantages occasioned
by this long absence of rain: the whole land becomes dry, parched, and brown, the cisterns are empty, the springs and fountains fail, and the autumn rains are eagerly looked for to prepare the earth for the receipt of the seed. These, the early rains, commence about the latter end of October or beginning of November, in Lebanon a month earlier: not suddenly but by degrees; the husbandman has thus the opportunity of sowing his fields of wheat and barley. The rains come mostly from the west or southwest (Luke xii. 54), continuing for two or three days at a time, and falling chiefly during the night: the wind then shifts round to the north or east, and several days of fine weather succeed (Prov. xxv. 23). During the months of November and December the rains continue to fall heavily, but at intervals; afterwards they return, only at longer intervals, and are less heavy; but at no period during the winter do they entirely cease. January and February are the coldest months, and snow falls sometimes to the depth of a foot or more, at Jerusalem, but it does not lie long; it is very seldom seen along the coast and in the low plains. Thin ice occasionally covers the pools for a few days, and while Porter was writing his Handbook, the snow was eight inches deep at Damascus, and the ice a quarter of a mile thick. In March the rain continues to fall more or less during the month of March; it is very rare in April, and even in Lebanon the showers that occur are generally light. In the valley of the Jordan the barley harvest begins as early as the middle of April, and the wheat a fortnight later; in Lebanon the grain is seldom ripe before the middle of June. (See Robinson, Biblical Researches, i. 421; and Porter, Handbook, p. xxviii.)  

[Palestine, p. 2518.]

With respect to the distinction between the early and the latter rains, Robinson observes that there are not at the present day any particular periods of rain or succession of showers, which might be regarded as distinct rainy seasons. The whole period from October to March now constitutes only one continued season of rain without any regularly intervening term of prolonged fine weather. Unless, therefore, there has been some change in the climate, the early and the latter rains for which the husbandman waited with longing, seem rather to have implied the first showers of autumn which revived the parched and thirsty soil and prepared it for the seed; and the latter showers of spring which continued to refresh and forward both the ripening crops and the varied products of the fields. (James v. 7; Prov. xvi. 15.)

In April and May the sky is usually serene; showers occur occasionally, but they are mild and refreshing. On the 1st of May Robinson experienced showers at Jerusalem, and at evening there was thunder and lightning (which are frequent in winter), with pleasant and reviving rain. The 6th of May was also remarkable for thunder and for several showers, some of which were quite heavy. The rains of both these days extended far to the north, . . . but the occurrence of rain so late in the season was regarded as a very unusual circum-

---

During Dr. Robinson's stay at Beirut on his second visit to Palestine, in 1852, there were heavy rains in March, once for five days continuously, and the weather continued variable, with occasional heavy rain, till the close of the first week in April. The latter rains thus continued this season for nearly a month later than usual, and the result was afterwards seen in the very abundant crops of winter grain (Robinson, Biblical Res., iii. 9).  

These details will, it is thought, better than any generalized statement, enable the reader to form his judgment on the former and latter rains of Scripture, and may serve to introduce a remark or two on the question, about which some interest has been felt, whether there has been any change of the climate and of the abundance of rain in Palestine, or in the periods of its supply. It is asked whether these stony hills, these deserted valleys, can be the land flowing with milk and honey; the land which God cared for; the land upon which were always the eyes of the Lord, from the beginning of the year to the end of the year (Deut. xi. 12). As far as relates to the other considerations which may account for diminished fertility, such as the decrease of population and industry, the neglect of terrace-culture and irrigation, and the abundance of water, it may suffice to refer to the article on Agriculture, and to Stanley (Sinai and Palestine, pp. 120-121). With respect to our more immediate subject, it is urged that the very expression flowing with milk and honey implies abundant rains. Keep alive the grass for the pasture of the numerous herds supplying the milk, and to nourish the flowers clothing the now bare hill-sides, from whence the bees might gather their stores of honey. It is urged that the supply of rain in its due season seems to be promised as contingent upon the fidelity of the people (Deut. xi. 13-15; Lev. xxvi. 3-5) and that as from time to time, to punish the people for their transgressions, "the showers have been withholden, and there hath been no latter rain" (Deut. iii. 20). So now, in the great and long-continued apostasy of the children of Israel, there has come upon even the land of their forfeited inheritance a like long-continued withdrawal of the favor of God, who claims the sending of rain as one of His special prerogatives (Jer. xxi. 12). The early rains, it is urged, are by comparison scanty and interrupted, the latter rains have altogether ceased, and hence, it is maintained, the curse has been fulfilled. Thy heaven that is over thy head shall be brass, and the earth that is under its respects, Tobler gives full information in his Nazareth in Palestine, pp. 6-11. Thomson mentions (Land and Book, ii. 65) that in Palestine the rains are frequently very unequal, so that no watering city can be built, and pass over the next (comp. Amos iv. 7, 8).
RAIN

RAINBOW

RAIN (qal Wilkinson's Dictionary) is a symbol of the covenant of mercy, and is a type of the revealing of God's glory. The rainbow is an arch formed by raindrops around the sun or moon. It is a reminder of God's promise to Noah never to destroy the earth by flood again. The word "rainbow" is derived from the Latin word "arco," meaning "arch." The rainbow is depicted in various cultures around the world, often associated with the beauty of nature and the wonder of the world. In Christian symbolism, the rainbow represents the promise of salvation and the presence of God in the world. It is a symbol of hope and a reminder of God's covenant with humanity. The rainbow is also a representation of the beauty of God's creation and the wonder of the universe. It is a symbol of the unity of the earth and the sky, and the connection of the Creator and the created. The rainbow is a reminder of the importance of caring for the world and the environment, and the need to protect it for future generations.

RAINBOW (נהר mound with which to shoot arrows), Gen. ix. 13-16; Ez. i. 28: 76; 50, so Ezek. xiii. 11: arcos. In N. T., Rev. iv. 3, x. 1, ἀρχή. The token of the covenant which God made with Noah when he came forth from the ark, that the waters should no more become a flood to destroy all flesh. With respect to the covenant itself, as a charter of natural blessings and mercies ("the World's covenant, not the Church's") re-establishing the peace and order of Physical Nature, which in the flood had undergone so great a convulsion, see DIVISION ON Prophecy, lect. iii. pp. 76-80. With respect to the token of the covenant, the right interpretation of Gen. ix. 13 seems to be that God took the rainbow, which had litherto been but a beautiful object shining in the heavens when the sun's rays fell on falling rain, and consecrated it as the sign of His love and the witness of His promise.

The following passages, Num. xiv. 4; 1 Sam. xii. 13; 1 K. ii. 35, are instances in which old (parallelism, lit. "give"), the word used in Gen. ix. 13, "I do set my bow in the cloud," is employed in the sense of "constitute," "appoint." Accordingly there is no reason for concluding that ignorance of the natural cause of the rainbow occasioned the account given of its institution in the book of Genesis. [SWAIN, Amer. ed.]

The figurative and symbolic use of the rainbow as an emblem of God's mercy and faithfulness must not be passed over. In the wondrous vision shown to St. John in the Apocalypse (Rev. iv. 3), it is said that "there was a rainbow round about the throne, in sight like unto an emerald: amidst the awful vision of surpassing glory is seen the symbol of Hope, the bright emblem of Mercy and of Love. "Look upon the rainbow," said the son of Sirech (Ezek. xiii. 11, 12), "and praise Him that made it: very beautiful it is in the brightness thereof; it compasseth the heaven about with a glorious circle, and the hands of the Most High have bended it." E. P. E.

a The word "mouth" is supplied by our translators, and their rendering is not supported by either the ancient versions, Galilae, and the Vulgate. Another interpretation is indeed essentially probable; but the following passages, Gen. viii. 13, Num. ix. 5, Ez. xxiv. 17, xlv. 21, justify the rendering ה(Print)

b The discovery of a single fountain, and the removal of rubbish which had choked up the soil, effected the transformation. The writer was told on the ground, that five different crops of vegetables may be raised there one after another in a single season (see Al- inus of Scripture, p. 155).

RAISINS. [VINE.]

RA'KEM (רַקֶּם), in pause רַקֶּנֶּם, [flower garshon]; 'Póčka'ni ob. in [Vat.] and Alex.; [Comp. Abd. Pacák; Röver]. Among the descendants of Machir the son of Manasseh, by his wife Manahah, are mentioned Umän and Rákem, who are apparently the sons of Shersh (1 Chr. vii. 16). Nothing is known of them. [In Hebrew this name and Rákem (which see) are the same, out of pause. — H.]

RAK'ATH (רַקַת) [short]; 'Tóra/PóKcoi/ Röverh.; One of the fortified towns of Naphtali, named between HAMMATH and CHANAERATH (Josh. xix. 35). Hannamath was probably at the hot springs of Tiberias; but no trace of the name of Rakkath has been found in that or any other neighborhood. [See Rob. Bibl., Res iii. 266.] The nearest approach is Kerok, formerly Tarichea, three miles further down the shore of the lake, close to the embouchure of the Jordan.

RAK'KON (רַקַקון), with the def. article [the temple (of the head), Ges.; a well watered place, First]; 'Tópa/ók: [Comp. (ıpóakavo kal) Hópaókavo: Areov]. One of the towns in the inheritance of Dan (Josh. xix. 46), apparently not far distant from Joppa. The LXX. (both MSS.) give only one name (that quoted above) for this and Mejarkon, which in the Hebrew text precedes it. This fact, when coupled with the similarity of the two names in Hebrew, suggests that the one may be merely a repetition of the other. Neither has been yet discovered.

RAK'KON (רַקַקון), with the def. article [the temple (of the head), Ges.; a well watered place, First]; 'Tópa/ók: [Comp. (ıpóakavo kal) Hópaókavo: Areov]. One of the towns in the inheritance of Dan (Josh. xix. 46), apparently not far distant from Joppa. The LXX. (both MSS.) give only one name (that quoted above) for this and Mejarkon, which in the Hebrew text precedes it. This fact, when coupled with the similarity of the two names in Hebrew, suggests that the one may be merely a repetition of the other. Neither has been yet discovered.

RAM (רָם) [high, exalted]; 'Apa/á: [Vat.] Alex. Appav in Ruth; [Vat. Opa/á and Appav, Alex.] Opa/á and Appav in 1 Chr.: Aram). 1. Son of Hezron and father of Amminadab. He was born in Egypt after Jacob's migration there. As[Abraham."

Battering Ram.

his name is not mentioned in Gen. xvi. 4. He first appears in Ruth iv. 19. The genealogy in 1 Chr. ii. 9, 10, 25, adds no further information concerning him, except that he was the second son of Hezron, Jerameel being the first-born. He appears in the N. T. only in the two lists of the ancestry of Christ (Matt. i. 3, 4; Luke iii. 33), where he is called Aram, after the LXX. and Vulgate. [See Matt. and Luke, A. C. H. 2. (Pá/á: [Vat. Par. Appav; Alex. in ver. 25, Appav] Róms.) The first-born of Jerameel, and therefore nephew of the preceding (1 Chr. ii. 25, 27). He had three sons, Mazz, Janim, and Eker. 3. [Rom. Vat. Sin. Pá/á: Alex. Pá/á: Róms.] Eliun, the son of Burechel the Buzite, is described as "of the kindred of Ram" (Job xxvii. 2). Rash's note on the passage is curious: "of the family of Ram: Abraham, for it is said, the greatest man among the Anakim" (Josh. xiv.): this

RAM, BATTERING. [צָכַר נֵבֶר, יֵדִית: ari.]. This instrument of ancient siege operations is twice mentioned in the O. T. (Ez iv 2, xxi. 22 [27]; and as both references are to the battering-rams in use among the Assyrians and Babylonians, it will only be necessary to describe those which are known from the monuments to have been employed in their sieges. With regard to the meaning of the Hebrew word there is but little doubt. It denotes an engine of war which was called a ram, either because it had an iron head
shaped like that of a ram, or because, when used for battering down a wall, the movement was like the butting action of a ram. In attacking the walls of a fort or city, the first step appears to have been to form an inclined plane or bowk of earth (comp. Ez. iv. 2, "cast a mount against it"), by which the besiegers could bring their battering-rams and other engines to the foot of the walls. "The battering-rams," says Mr. Layard, "were of several kinds. Some were joined to movable towers which held warriors and armed men. The whole then formed one great temporary building, the top of which is represented as a level on with the walls, and even turrets, of the besieged city. In some bas-reliefs the battering-ram is without wheels; it was then perhaps constructed upon the spot, and was not intended to be moved. The movable tower was probably sometimes improvised with the ram, but I have not met with it so represented in the sculptures. When the machine containing the battering-ram was a simple framework, and did not form an artificial tower, a cloth or some kind of drapery, edged with fringes and otherwise ornamented, appears to have been occasionally thrown over it. Sometimes it may have been covered with hides. It moved either on four or on six wheels, and was provided with one ram or with two. The mode of working the rams cannot be determined from the Assyrian sculptures. It may be presumed from the representations in the bas-reliefs that they were partly suspended by a rope fastened to the outside of the machine, and that men directed and impelled them from within. Such was the plan adopted by the Egyptians, in whose paintings the warriors working the ram may be seen through the frame. Sometimes this engine was ornamented by a carved or painted figure of the presiding divinity, kneeling on one knee and drawing a bow. The artificial tower was usually occupied by two warriors; one discharged his arrows against the besieged, whom he was able, from his lofty position, to harass more effectually than if he had been below; the other held up a shield for his companion's defense. Warriors are not uniformly represented as stepping from the machine to the battlements. The batters on the walls hurled stones from sling, and discharged their arrows against the warriors in the artificial towers; whilst the rest of the besieged were no less active in endeavoring to frustrate the attempts of the assailants to make breaches in their walls. By dropping a doubled chain or rope from the battlements, they caught the ram, and could either destroy its efficacy altogether, or break the force of its blows. Those below, however, by placing hooks over the engine, and throwing their whole weight upon them, struggled to retain it in its place. The besieged, if unable to disable the battering-ram, sought to destroy it by fire, and threw lighted torches or fire-brands upon it; but water was poured upon the flames through pipes attached to the artificial tower " (Nineveh and its Remains, ii. 597-570). W. A. W.

RA'AMA (פַּאָמָא; Ramma), Matt. ii. 18, referring to Jer. xxxi. 13. The original passage alludes to a massacre of Benjamites or Ephraimites (comp. ver. 18), at the Ramah of Benjamin or in Mount Ephraim. This is seized by the Evangelist and turned into a touching reference to the slaughter of the innocents at Bethlehem, near to which was (and is) the sepulchre of Rachel. The name of Ramah is alleged to have been lately discovered attached to a spot close to the sepulchre. If it existed there in St. Matthew's day, it may have prompted his allusion, though it is not necessary to suppose this, since the name of Ramah does not lie in the name Ramah, but in the lamentation of Rachel for the children, as is shown by the change of the vow of the original to rēcwa. G.

RA'MAH (רָמָה, with the definite article [the height], excepting a few cases named below). A word which in its simple or compound shape forms the name of several places in the Holy Land; one of those which, like Gibeah, Geba, Gibeon, or Mizpeh, betrays the aspect of the country. The lexicographers with unanimous consent derive it from a root which has the general sense of elevation — a root which produces the name of Ararat "the high lands," and the various modifications of Ram, Ramsh, Ramath, Ramoth, Remeth, Ramathaim, Arimathea, in the Biblical records. As an appellative it is found only in one passage (Ex. xvi. 24-31), in which it occurs four times, each time rendered in the A. V. "high place." But in later Hebrew ramatha is a recognized word for a hill, and as such is employed in the Jewish versions of the Pentateuch for the rendering of Psigah.

1. (Psigah; [Heb. vii. 39]. 'Apadh; Vat. also Apaad,) Pea/aa, Baza, etc.; [Jer. xi. 1, Vat. F.A., Δααάα]. Alex. Isqa, Peaqaa, [Pea/aa; Pea/aa; Ramot.] One of the cities of the allotment of Benjamin (Josh. xviii. 25), a member of the group which contained Gibeon and Jerusalem. Its place in the list is between Gibeon and Beeroth. There is a more precise specification of its position in the invaluable catalogue of the places north of Jerusalem which are enumerated by Isaiah as disturbed by the gradual approach of the king of Assyria (Is. x. 28-32). At Michmash he crosses the ravine; and then successively divides or alarums Geba, Ramah, and Gibeah of Saul. Each of these may be recognized with almost absolute certainty at the present day. Geba is Jebo, on the south brink of the great valley; and a mile and a half beyond it, directly between it and the main road to the city, is 'er-Rinam (its name the exact equivalent of ha-Ramah) on the elevation which its ancient name implies. Its distance from the city is two hours, i.e. five English or six Roman miles, in perfect accordance with the notice of Eusebius and Jerome in the Onomasticon ("Ramma"), and nearly agreeing with that of Josephus (Jut. viii. 12, § 4), who places it 40 stadia north of Jerusalem.

Its position is also in close agreement with the notices of the Bible. The palm-tree of Deborah (Judg. iv. 5) was "between Ramah and Bethel," c in his commentary on Hos. v. 8, Jerome mentions Ramah as "Juxta Gabas in septimo lapide a Jerosolymitis sita." d The Targum on this passage substitutes for the Palm of Deborah, Ataroth-Deborah, no doubt referring to the town of Ataroth. This has everything in its favor, since 'Ataroth is still found on the left hand of
in one of the sufiy valleys inclosed in the lime stone hills which compose this district. The Levite and his concubine in their journey from Bethlehem to Ephraim passed Jerusalem, and pressed on to Gilbaeth, or even if possible beyond it to Ramah (Judg. xix. 13). In the struggles between north and south, which followed the disruption of the kingdom, Ramah, as a frontier town, the possession of which gave absolute command of the north road from Jerusalem (1 K. xv. 17), was taken, fortified, and retaken (21, 22, 2 Chr. xvi. 1, 5, 6). After the destruction of Jerusalem it appears to have been used as the depot for the prisoners (Jer. xli. 1); and, if the well-known passage of Jeremiah (xxxi. 15), in which he introduces the mother of the tribe of Benjamin weeping over the loss of her children, alludes to this Ramah, and not to one nearer to her sepulture at Bethlehem, it was probably also the scene of the slaughter of such of the captives as from age, weakness, or poverty, were not worth the long transport across the desert to Babylou [RAMA]. Its proximity to Gilbeath is implied in 1 Sam. xxvii. 6; Hos. v. 8; Ezr. ii. 26; Neh. vii. 30; the last two of which passages also show that its people returned after the Captivity. The Ramah in Neh. xi. 33 occupies a different position in the list, and may be a distinct place situated further west, nearer the plain. (This and Jer. xxxv. 15 are the only passages in which the name appears without the article.) The LXX. find an allusion to Ramah in Zech. xiv. 10, where they render the words which are translated in the A.V., "and shall be lifted up (775, 775), and inhabited in her place," by "Ramah shall remain upon her place.

Er-Rom was not unknown to the medieval travellers, by some of whom (e.g. Brocardus, Desez, ch. vii.) it is recognized as Ramah, but it was reserved for Dr. Robinson to make the identification certain and complete (Bibl. Res. i. 576). He describes it as lying on a high hill, commanding a wide prospect across a valley of a few half-deserted houses, but with remains of columns, squared stones, and perhaps a church, all indicating former importance. In the catalogue of 1 Esdr. v. (20) the name appears as CHAMA.

2 (Arabatia in both MSS., except only 1 Sam. xxxvi. 1, xxvii. 8, where the Alex. has Pasa [and 1 Sam. xiv. 19, 22, xx. 1]), or Ram. (for Alex. have the same: Remathoth). The home of Ekanma, Samuel's father (1 Sam. i. 19, ii. 11), the birth-place of Samuel himself, his home and official residence, the site of his altar (vii. 17, viii. 4, 14, xx. 13, xix. 20, and finally his burial-place (xx. 1, xxvii. 5). In the present instance it is a contracted form of RAMAH-zAMUTH, which in the existing Hebrew text is given at length but once, although the LXX. exhibit Ramathaim in every occasion. All that is directly said as to its situation is that it was in Mount Ephraim (1 Sam. i. 1), and this would naturally lead us to seek it in the neighborhood of Shechem. But the whole tenor of the narrative of the public life of Samuel (in connection with which alone this Ramah is mentioned) is so restricted to the region of the tribe of Benjamin, and to the neighborhood of Gilbeath the residence of Saul, that it seems impossible not to look for Samuel's city in the same locality. It appears from 1 Sam. v. 17 that his annual festivals as prophet and judge were confined to the narrow round of Bethel, Gilbeath, and Mizpeh — the first the north boundary of Benjamin, the second near Jericho at its eastern end, and the third on the ridge in more modern times known as Scopus, overlooking Jerusalem, and therefore near the southern confines of Benjamin. In the centre of these was Gilbeath of Saul, the royal residence during the reign of the first king, and the centre of his operations. It would be doing a violence to the whole of this part of the history to look for Samuel's residence outside these narrow limits.

On the other hand, the boundaries of Mount Ephraim are nowhere distinctly set forth. In the month of an ancient Hebrew the expression would mean that portion of the mountainous district which was at the time of speaking in the possession of the tribe of Ephraim. "Little Benjamin" was for so long in close alliance with and dependent on its more powerful kinsman, that nothing is more probable than that the name of Ephraim may have been extended over the mountainous region which was allotted to the younger son of Rachel. Of this there are not wanting indications. The palm-tree of Deborah was "in Mount Ephraim," between Bethel and Ramah, and is identified with great plausibility by the author of the Targum on Judg. iv. 5 with Ararat, one of the landmarks on the south boundary of Ephraim, which still survives in Mt. Araïn, 2 miles north of Ramah of Benjamin (er-Ram). Bethel itself, though in the catalogue of the cities of Benjamin (Josh. xviii. 22), was appropriated by Jerusalem as one of its idol sanctuaries, and is one of the cities of Mount Ephraim, which were taken" which were taken from him by Baasha and restored by Asa (2 Chr. iii. 19, xvi. 7). Jerusa- lem (ch. xxxii.) connects Ramah of Benjamin with Mount Ephraim (xxv. 6, 9, 15, 18).

In this district, tradition, with a truer instinct than it sometimes displays, has placed the residence of Samuel. The earliest attempt to identify it is in the Omahatares of Eusebius, and was not so happy. His words are, "Arathaim or Alphata: the city of Helcan and Samuel; it lies near (w) Antipater. Hosios: thence came Joseph, in the Gospel said to be from Arimathaea." Hosios is Lydda, the modern Lado, and the reference of Eusebius is no doubt to Ramah, the well-known modern town two miles from Lado. But there is a fatal obstacle to this identification, in the fact that Ramah (=the sandy) lies on the open face of the mountain plain, and cannot in any sense be said to be in Mount

the north road, very nearly midway between er-Ram and Beth. (Jerome agrees with Eusebius in his translation of this passage; but in the Epiphanius Pulcer [Epip. viii.], he connects Ramath with Arimathaea only, and places it about four miles from Lydda.)
Ephraim, or any other mountain district. Eusebios possibly refers to another Ramah named in Neh. vi. 93 (see below, No. 6).

But there is another tradition, that just alluded to, common to Moslems, Jews, and Christians, up to the present day, which places the residence of Samuel on the lofty and remarkable eminence of Nebi Samwil, which rises four miles to the N.W. of Jerusalem, and which its height (greater than that of Jerusalem its 41), its commanding position, and its peculiar shape, render it an object of veneration in the landscape of that district, and make the names of Laannah and Zophinna exceedingly appropriate to it. The name first appears in the travels of Arculf (A. D. circa 700), who calls it Saint Samuel. Before that date the relics of the Prophet had been transported from the Holy Land to Thrace by the emperor Arcadius (see Jerome contra. Vig. Nazian. § 5), and Justian had enlarged or completed "a well and a wall," for the sanctuary (Procop. de Aedif. v. cap. 9).

True, neither of these notices names the spot, but they imply that it was well known, and so far support the placing it at Nebi Samwil. Since the days of Arculf the tradition appears to have been continuous (see the quotations in Robinson, Bibl. Res. i. 439; Tohler, p. 881, &c.). The modern village, though miserable even among the wretched collections of hovels which crown the hills in this neighborhood, bears marks of antiquity in cisterns and other traces of former habitation. The mosque is said to stand on the foundations of a Christian church, probably that which Justian built or added to. The ostensible tomb is a mere wooden box; but below it is a cave or chamber, apparently excavated, like that of the patriarchs at Hebron, from the solid rock of the hill, and, like that, closed against all access except by a narrow aperture in the top, through which devotees are occasionally allowed to transmit their lamps and petitions to the sacred vault below.

Here, then, we are inclined, in the present state of the evidence, to place the Laannah of Samuel. And there probably would never have been any resistance to the tradition, if it had not been thought necessary to make the position of Ramah square with a passage with which it does not seem to the writer to have necessarily any connection. It is usually assumed that the city in which Saul was anointed by Samuel (1 Sam. i. 4, x.) was Samuel's own city Ramah. Josephus certainly (Ant. vi. 4, § 1) does give the name of the city as Armatham, and in his version of the occurrence implies that the Prophet was at the time in his own house; but neither the Hebrew nor the LXX. contains any statement which confirms this, if we except the slender fact that the "land of Zupli" (ix. 5) may be connected with the Zophin of Ramathain-zophim. The words of the maidens (ver. 12) may equally imply either that Samuel had just entered one of his cities of circuit, or that he had just returned to his own house. But, however this may be, it follows from the minute specification of Saul's route in 1 Sam. x. 2, that the city in which the interview took place was near the sepulchre or tomb, which, by Gen. xxxiv. 18, 19, and other reasons, appears to be fixed with certainty as close to Bethlehem. And this supplies a strong argument against its being Ramathaim-zophim, since, while Mount Ephraim, as we have endeavored already to show, extended to within a few miles north of Jerusalem, there is nothing to warrant the supposition that it ever reached so far south as the neighborhood of Bethlehem. Saul's route will be most conveniently discussed under the head of Saul; but the question of both his outwards and his homeward journey, minutely as they are detailed, is best with difficulties, which have been increased by the assumptions of the commentators. For instance, it is usually taken for granted that his father's house, and therefore the starting-point of his wanderings, was Gibeah. True, Saul himself, after he was king, lived at Gibeah; but the residence of Kish would appear to have been at Zela b where his family sepulchre was (2 Sam. xxii. 14), and of Zela no trace has yet been found. The Authorized Version has added to the difficulty by introducing the word "meet" in x. 3 as the translation of the term which they have more accurately rendered "find" in the preceding verse. Again, where was the "hill of God," the gathatha-Chohim, with the nasib c of the Philistines? A nasib of the Philistines is mentioned later in Saul's history (1 Sam. xiii. 3) as at Gebah opposite Michmash. But this is three miles north of Gibeah of Saul, and does not at all agree with a situation near Bethlehem for the anointing of Saul. The Tarqum interprets the "hill of God" as "the place where the ark of God was," meaning Kirjath-jearim.

On the assumption that Ramathaim-zophim was the city of Saul's anointing, various attempts have been made to find a site for it in the neighborhood of Bethlehem. (a) Gesenius (Thes. p. 1276 a) suggests the Jebel Fureidis, four miles southeast of Bethlehem, the ancient Herodium, the "Franz mountain" of more modern times. The drawback is that there is no hint of any large building or any hint of inference either in the Bible, Josephus (who was well acquainted with the Herodium), or more recent authority. (b) Dr. Robinson (Bibl. Res. ii. 8) proposes Sabor, in the mountains six miles west of Jerusalem, as the possible representative of Zophim: but the hypothesis has little beside its ingenuity to recommend it, and is virtually given up by its own author in a foot-note to the passage. (c) Van de Velde (Syr. de Plac. ii. 50), following the lead of Wockeit, argues for Ramch (or Romch el-Khalid, Kob. i. 216), a well-known site of ruins about two and a half miles north of Hebron. His main argument is that a castle of S. Samuel is mentioned by F. Fabri in 1483 d (apparently) as north of Hebron; that the name Ramch is identical with Ramah, and that its position suits the requirements of 1 Sam. x. 2-5. This is also supported by Stewart (Ten and Khan, p. 247). (d)

a A Beth-horon and his suburbs were allotted to the Kohathite Levites, of whom Samuel was one by descent. Perhaps the village on the top of Nebi Samuel may have been dependent on the more regularly fortified Beth-horon (1 K. ix. 17).

b Zela (צלא) is quite a distinct name from Zechariah ( giúc̄a), with which some would identify it (c. g. Stewart, Ten and Khan, p. 247; Van de Velde, Mr- nieur, ete., ete.).

c The meaning of this word is uncertain. It may signify a garrison, an officer, or the commemoration column—a trophy.

d In the time of Benjamin of Tudela it was known as the "house of Abraham" (5 of T., ed. Asher, I 98).
RAMAH

Dr. Bonar (Land of Promise, pp. 178, 554) adopts Er-Ram, which he places a short distance north of Bethelham, east of Rachel's sepulchre. Eusebius (Onom. Padarœ) says that "Rama of Benjamin" is near (near) Bethelham, where the "voice in Rama was heard," and in our times the name is mentioned, besides Dr. Bonar, by Proskes and Salzbacher (cited in Rob. Bibl. Res. ii. 8 note), but this cannot be regarded as certain, and Dr. Stewart has pointed out that it is too close to Rachel's monument to suit the case.

Two suggestions in an opposite direction must be noticed:

(a) That of Ewald (Geschichte, ii. 550), who places Ramathaim-zophim at Ram-Alubah, a mile west of el-Birch, and nearly five north of Nabi Samwil. The chief ground for the suggestion appears to be the allusion Alubah, as denoting that a certain sanctity attaches to the place. This would be more certainly within the limits of Mount Ephraim, and merit investigation. It is mentioned by Mr. Williams (Dict. of Geog. "Ramathah") who, however, gives his decision in favor of Nabi Samwil.

(b) That of Schwarz (pp. 152-158), who, starting from foliah of Saul as the home of Kish, fixes upon Rama'h, north of Samaria and west of Saul, which he supposes also to be Ramoth or Jarmuth, the Levitical city of Issachar. Schwarz's arguments must be read to be appreciated.

The site of this Ramah, Dean Stanley pronounces "without exception the most complicated and disputed problem of sacred topography." The writer, with others, has devoted many fruitless hours to its solution, and the difficulties of the case, inherent and apparently ineradicable, may be briefly stated. (1) The Ramah of Samuel's birth was in Mount Ephraim (see above). (2) The Ramah of his residence and burial was the Ramah of his birth (see above). "The inference is direct and stringent, that the two were identical." Robinson's Bibl. Sacra, p. 506 (1843). (3) The Ramah of his interview with Saul was the Ramah of his residence (see above). "It is hardly possible to avoid identifying them. This, which is not stated expressly in the Old Testament [though fairly implied], is taken for granted by Josephus" (Dr. Stanley, S. of P. p. 220). Josephus, without doubt, was familiar with all the localities, and would know whether his statement was compatible with the sacred narrative. (4) The Ramah in which Saul was anointed by Samuel was so situated that, in passing from it to his home in Benjamin, he would pass by the tomb of Rachel (see above). Neither of these four points can yet be disproved, and on every proposed site of the Ramah of the prophet, one of them directly implicates; and the prospect now is, that the question will remain inexplicable.

3. (Apaia; - Alex. Paua: Arumah.) One of the monotonous, fortified places of Naphtali (Josh. xix. 36) named between Abannah and Hazor. It would appear, if the order of the list may be accepted, to have been in the mountainous country N. W. of the lake of Gennesaret. In this district a place bearing the name of Ramah has been discovered by Dr. Robinson (Bibl. Res. iii. 78), which is not improbably the modern representative of the Ramah in question. It lies on the main track between Ajnakin and the north end of the Sea of Galilee, and about eight miles E. S. E. of Safed. It is, perhaps, worth notice that, though the spot is distinguished by a very lofty brow, commanding one of the most extensive views in all Palestine (Rob. Bibl. Res. iii. 78), and answering perfectly to the name of Ramah, yet that the village of Ramah itself is on the lower slope of the hill.

4. ('Paua: Howrah.) One of the landmarks on the boundary (A. V. "coast") of Asher (Josh. xix. 21), apparently between Tyre and Zidon. It does not appear to be mentioned by the ancient geographers or travellers, but two places of the same name have been discovered in the district allotted to Asher: the one east of Tyre, and within about three miles of it (Van de Velde, Map, Memoir) the other more than thirty miles off, and southeast of the same city (Van de Velde, Map; Robinson, Bibl. Res. iii. 64). The specification of the boundary of Asher is very obscure, and nothing can yet be gathered from it; but, if either of these places represent the Ramah in question, it certainly seems safer to identify it with that nearest to Tyre and the sea-coast.

5. ('Paua: Alex. 8a†a; Ale. Paua: Avena; Ramoth.) By this name in 2 K. viii. 21 and 2 Chr. xxii. 6, only, is designated RAMOTH-GILGAL. The abbreviation is singular, since, in both cases, the full name occurs in the preceding verse.

6. (Rom. Ale. Alex. F.A. omit; FA. Comp. Paua: Rana.) A place mentioned in the catalogue of those inhabited by the Benjamites after their return from the Captivity ( Neh. xix. 33). It may be the Ramah of Benjamin (above, No. 1) or the circuit (Gilgal on the east, Bethel on the north, and Mapor on the west), or Nabi Samwil on the west, 1 Sam. vii. 10).

RAMAH

a But Ramoth was allotted to the Gershonites, while Samuel was a Kohathite.

b The German missionary, Pastor Valentine, regards the Ramath in Isaiah's vision (No. 1 above) and the Ramah of Samuel (No. 2) as the same, wondrously, the present Er-Ram, about 6 miles north of Jerusalem, or the traveller's right in going to Bethel and from Samuel's sacrifice, Edom (as he maintains, is said to be a "man of Ramathaim-zophim, of Mount Ephraim" (1 Sam. i. 1, Ke.), not because he lived there at the time of Samuel's birth, but because he dwelt there originally, and afterwards migrated to Ramath in Benjamin. Further, he argues that it is unnecessary to identify Samuel, Jared. How. i. 451. Keil on 1 Sam. ix. 6 and others) to identify the Rammah of Samuel with the nameless city of Saul's interview with Samuel as related 1 Sam. ix. 11. Among his positive reasons for this identification of Ramah and Er-Ram are that it lies fairly within the territory of Benjamin; that it forms the central point of Samuel's judicial circuit (Gilgal on the east, Bethel on the north, and Mapor on the west), or Nabi Samwil on the west, 1 Sam. vii. 10).

c For the preceding name — Abannah — they give 'Apadda.
RAMATH-LEHI

Ramah of Samuel, but its position in the list (remote from Geba, Michmas, Bethel, vers. 31, comp. Ezr. ii. 29, 38) seems to remove it further west, to the neighborhood of Lod, Hadid, and One. There is no further notice in the Bible of a Ramah in this direction, but Eusebius and Jerome allude to one, though they may be at fault in identifying it with Ramathaim and Araimathaia (Onom. "Ramathai So- phim;" and the remarks of Robinson, Bibl. Res. ii. 293). The situation of the modern 'Ram'ch agrees very well with this, a town too important and too well placed not to have existed in the ancient times. a The consideration that Ramah signifies "sand," and Ramah a "height," is not a valid argument against the one being the legitimate successor of the other. If, so half the identifications of modern travellers must be reversed. Beit-aruzan no longer be the representative of Beth-horon, because for means "eye," while boron means "caves." b Beit-lehaim, of Bethlehem, because lehim is "flesh," and lehem "bread;" c nor et-Aul, of Eleach, because eul is in Arabic the article, and in Hebrew the name of God. In these cases the tendency of language is to retain the sound at the expense of the meaning.

G.

RAMATH-LEHI (רמאת Lebanon) [see below]: 'Aramathai mesopotamia: Ramathlhi, quod interpretatur electio macteiae). The name which purports to have been bestowed by Samson on the scene of his slaughter of the thousand Philistines with the jaw-bone (Judg. xv. 17). "He cast away the jaw-bone out of his hand, and called that place Ramah-lehi;" d as if "heaving of the jaw-bone." In this sense the name (wisely left untranslated in the L. V.) is rendered by the LXX. and Vulgate (as before). But Gesenius has pointed out (Thes. p. 752 a) that to be consistent with this the vowel points should be altered, and the words become רמאת לבנה; and that as they at present stand they are exactly parallel to Ramath-mizpeh and Ramath-negev, and mean the "height of Lechi." If we meet with a similar account in ordinary history we should say that the name had already been Ramah-lehi, and that the writer of the narrative, with that fondness for paranomasia which distinguishes these ancient records, had indulged in that affection for the iden- tical expression of his hero. But the fact of the positive statement in this case may make us hesitate in coming to such a conclusion in less authoritative records. [See Lehi, note e, vol. ii. p. 1027.]

G.

RAMATH-MIZPEH (רמאת משכן) with def. article [height of the watch-tower]; 'Arabah keta' ha-Maspea: Alex. "Pezh, k. t. Maspea: Ramath, Mizpeh). A place mentioned, in Josh. xiii. 26 only, in the specification of the territory of Gad, apparently as one of its northern landmarks, Heshbon being the limit on the south. But of this our ignorance of the topog- raphy east of the Jordan forbids us to speak at present with any certainty.

There is no reason to doubt that it is the same.

a This is evidenced by the attempts of Benjamin of Tudela and others to make out Ramieh to be Gath, Gezer, etc.

b This reading of Ramoth for Ramah is counte- nanced by one Hebrew MS. collated by Kennicott. It is also followed by the Vulgate, which gives Ramoth.
RAMATHAIM-ZOPHIM

Of the force of "Zophim" no feasible explanation has been given. It was an ancient name on the east of Jordan (Num. xxviii. 14), and there, as has been observed, one of the ancestors of Jonathan, Ramathaim zophim is rendered "Ramatha of the scholars of the prophets." Omit this is evidently a late interpretation, arrived at by regarding the prophets as watchmen (the root of zophim, also that of mirph, having the force of looking out afar), coupled with the fact that at Naioth in Ramah there was a school of prophets. It will not escape observation that one of the ancestors of Elkanah was named Zophi or Zuph (1 Chr. vi. 26, 33), and that when Saul approached the city in which he encountered Samuel he entered the land of Zuph; but no connection between these names and that of Ramathaim-zophim has yet been established.

Even without the testimony of the LXX. there is no doubt, from the narrative itself, that the Ramah of Samuel — where he lived, built an altar, died, and was buried — was the same place as the Ramath or Ramathaim-Zophim in which he was born. It is implied by Josephus, and affirmed by Eusebius and Jerome in the Onomasticon ("Arma-thaim Sephha"), nor would it ever have been questioned had not there been other Ramahs mentioned in the sacred history.

Of its position nothing, or next to nothing, can be gathered from the narrative. It was in Mount Ephraim (1 Sam. i. 1). It had apparently attached to it a place called Naioth, at which the "company" (or "school," as it is called in modern times) of the sons of the prophets was maintained (xx. 18, Test. xx. 11); and it had also in its neighborhood (probably between it and Gibeah-of-Saul) a great well known as the well of Has-Sechna (xx. 22). [SICHEH.] But unfortunately these scanty particulars throw no light on its situation. Naioth and Sechna have disappeared, and the limits of Mount Ephraim are uncertain. In the 4th century Ramathaim-Zophim (Onomasticon, "Arma-tha-zophim") was located near Diospolis (Lydda), probably at Ramah; but that is quite untenable, and quickly disappeared in favor of another, probably older, certainly more feasible tradition, which placed it on the lofty and remarkable hill four miles N.W. of Jerusalem, known to the early pilgrims and Crusaders as Saint Samuel and Mount Jove. It is now universally designated Nîb Samwil — the "Prophet Samuel;" and in the mosque which crowns its long ridge (itself the successor of a Christian church), his sepulcher is still revered alike by Jews, Moslems, and Christians.

There is no trace of the name of Ramah or Zophim having ever been attached to this hill since the Christian era, but it has borne the name of the great prophet certainly since the 7th century, and not improbably from a still earlier date. It is not too far south to have been within the limits of Mount Ephraim. It is in the heart of the district where Saul resided, and where the events in which Samuel took so large a share occurred. It completes the circle of the sacred cities to which the prophet was in the habit of making his annual circuit, and which lay — Bethel on the north, Mizpah on the south, Gilgal on the east, and (if we accept this identification) Ramathaim-zophim on the west — round the royal city of Gibeah, in which the king resided who had been appointed to his office by the prophet amid such universal expectation and rejoicing. Lastly, as already remarked, it has a tradition in its favor of early date and of great persistency. It is true that even these grounds are but slight and shifting, but they are more than can be brought in support of any other site; and the task of proving them fallacious must be undertaken by those who would disturb a tradition so old, and which has the whole of the evidence, slight as that is, in its favor.

This subject is examined in greater detail, and in connection with the reasons commonly alleged against the identification, under Ramah, No. 2.

RAMATHEM (Ῥαμάθημ) [Mai. [Sin.] and Alex.; [Rom. "Ραμαίθημα:" Joseph. "Ραμαθίμ:" Rom.-It.] One of the three "governments" (Ῥωμαναὶ καὶ τωραῖαι) which were added to Judaea by king Demetrius Nicator, out of the country of Samaria (1 Macc. xi. 34); the others were Apherena and Lydda. It no doubt derived its name from a town of the name of Ramathaim, probably that renowned as the birthplace of Samuel the Prophet, though this cannot be stated with certainty.

RAMATHITE, THE (Ῥαμαθίτης [pair.] a in Ἠρα;
Alex. o Ραμαθίος; Rom.-It.) A town on the north coast of Palestine, and charged of the royal vineyards of king David (1 Chr. xxviii. 27). The name implies that he was native of a place called Ramah, but of the various Ramahas mentioned none is said to have been remarkable for vines, nor is there a tradition or other clew by which the particular Ramah to which this worthy belonged can be identified.

RA.MESSES (Ῥαμεσσῆς [see below]: Ραμεσσής; [Vat. in Num., Ραμεσσήως, Ραμεσσάς] Rameses), or RAAMSES (Ῥαμάσσῆς; Ραμάσσης; Ramasses), a city and district of Lower Egypt. There can be no reasonable doubt that the great city is designated by the Rameses and Ramasses of the Hebrew text, and that this was the chief place of the land of Ramesses, all the passages referring to the same region. The name is Egyptian, the same as that of several kings of the empires, of the XVIIIth, XIXth, and XXth dynasties. In Egyptian it is written RA-MESES or RA-MSEs; it being doubtful whether the first vowel understood once twice or once: the first vowel is represented by a sign which usually corresponds to the Heb. ט, in Egyptian transcriptions of Hebrew names, and Hebrew of Egypt.

The first mention of Ramesses is in the narrative of the settling by Joseph of his father and brethren in Egypt, where it is related that a possession was given them "in the land of Ramesses" (Gen. xli. 11). This land of Ramesses, τὸ Ραμασσάς, either corresponds to the land of Goshen, or was a district of it, more probably the former, as appears from a comparison with a parallel passage (6). The name next occurs as that of one of the two cities built for the Pharaoh who first oppressed the children of Israel. "And they built for Pharaoh treasure cities (Ἰππομαὶ Ῥαμασσαί)" (Ex. i. 11). So in the A. V. The LXX.
however, reads 'אֲבֹּל-אֶלֹהִים, and the Vulg. utique tobernunculum, as if the root had been לֵבָנָה.

The signification of the word לֵבָנָה is decided by its use for store-houses of corn, wine, and oil, which Hezekiah had (2 Ch. xxxii. 28). We should therefore here read store-cities, which may have been the meaning of our translators. The name of ΠΤΗΜΟ健康发展 indicates the region near Heliopolis, and therefore the neighborhood of Goshen or that tract itself, and there can therefore be no doubt that Rameses is the name of the land of Goshen. In the narrative of the Exodus we read of Rameses as the starting point of the journey (Ex. xii. 37; see also Num. xxxii. 3, 5).

If then we suppose Rameses or Raamases to have been the chief town of the land of Rameses, either Goshen itself or a district of it, we have to endeavor to determine its situation. Lepsius supposes that Aboo-Keshe'd is on the site of Rameses (see Map, vol. i. p. 794). His reasons are, that in the LXX. Ἱεροῦπολις is placed in the land of Rameses (καθ' Ἱοτενων τοις, εν γη Ψαμεστον' or εις γην Ψα- 

noژεροντος), in a passage where the Hebrew only mentions "the land of Goshen" (Gen. xvi. 28), and that Genesis is a monolithic group at Aboo-Keshed, representing Tum, and Ra, and, between them, Ra-

meses II., who was probably there worshipped. There would seem therefore to be an indication of the situation of the district and city from this mention of ΠΤΗΜΟ健康发展, and the status of Rameses might mark a place named after that king. It must, how-

ever, be remembered (a) that the situation of ΠΤΗΜΟ健康发展 is a matter in great doubt, and that therefore we can scarcely take any proposed situation as an indication of that of Rameses; (b) that the land of Rameses may be that of Goshen, as already remarked, in which case the passage would not afford any more precise indication of the position of the city Rameses than that it was in Goshen, as is evident from the account of the Exodus; and (c) that the mention of ΠΤΗΜΟ健康发展 in the LXX. would seem to be a gloss. It is also necessary to consider the evidence in the Biblical narrative of the position of Rameses, which seems to point to the west-term part of the land of Goshen, since two full marches, and part at least of a third, brought the Israelites from this town to the Red Sea; and the narrative appears to indicate a route for the chief part directly towards the sea. After the second day's journey they "encamped in Etham, in the edge of the wilderness" (Ex. xii. 29), and on the third day they appear to have turned. If, however, Rameses was where Lepsius places it, the route would have been almost wholly through the wilderness, and mainly along the tract bordering the Red Sea in a southerly direction, so that they would have turned almost at once. If these difficulties are not thought insuperable, it must be allowed that they render Lepsius's theory extremely doubtful, and the one fact that Aboo-Keshed is within about eight miles of the ancient head of the gulf, seems to us fatal to his identification. Even could it be proved that it was anciently called Rameses, the case would not be made out, for there is good reason to sup-

pose that many cities in Egypt bore this name. Apart from the ancient evidence, we may mention that there is now a network of roads in the land of "Rameses." in the Behreh (the great province on the west of the Rosetta branch of the Nile), men-

tioned in the list of towns and villages of Egypt in De Sacli's "Abel-alhif," p. 604. It gave to it the district the name of "Hof-Rameses" or "Rameses." This "Hof" must not be confounded with the "Hof" commonly known, which was in the district of Bilbeys.

An argument for determining under what dy-

nasty the Exodus happened has been founded on the name Rameses, which has been supposed to

dicate a royal builder. This argument has been stated elsewhere: here we need only repeat that the highest date to which Rameses I. can be rea-

sonably assigned is consistent alone with the Rab-

binical date of the Exodus, and that we find a

prince of the same name two centuries earlier, and therefore at a time perhaps consistent with Ussher's date, so that the place might have taken its name either from this prince, or a yet earlier king or prince Rameses. (CHRONOLOGY: EGYPT: PHA-

RAM.)

G. S. P.

RAMESSES (Ψαμεστός: om. in Vulg.) = RA-

MESSES (Jud. i. 9).

RAMP'AH (רמעס) [Jewovah exalted]: "Ψαμεστός: Remeth." A layman of Israel, one of the sons of Parosh, who put away his foreign wife at Ezra's command (Ezr. x. 25). He is called HIEREMIAS in 1 Esdr. ix. 25.

RA'MOTH (רָָוֹמָה [heights]): "Ψαμεστός: Ramaoth." One of the four Levitical cities of Issachar according to the catalogue in 1 Ch. (vi. 73). In the parallel list in Joshua (xxi. 28, 29), amongst other variations, Jarmuth appears in place of Ramoth. It appears impossible to decide which is the correct reading; or whether again a REMETH, a town of Issachar, is distinct from them, or one and the same. No place has yet been discovered which can be plausibly identified with either.

RA'MOTH (רָָוֹמָה [heights]): [Vat.] Mu-

rov: [F. M. Myrvon: Rm. Alex. Ραμοθ: R-

moth]. An Issite layman, the son of Bani, who had taken a strange wife, and at Ezra's instiga-

tion agreed to separate from her (Ezr. x. 21). In the parallel passage of 1 Esdras (ix. 30) the name is given as Hieremoth.

G.

RA'MOTH GILEAD (רָָוֹמָה גְּלֵּיָּד [heights]): [see below]: Ραμωθα, Ραμωθα, and Ραμωθα, [also 1 Ch. vi. 80. Ραμωθα (Vat. Ramowos), 1 K. iv. 13. Ραμωθα (Vat. Ramowos)] 1 K. iv. 13. Ταμωθα: [2 Chr. xvii. 2, 3, Ραμωθα της Ταμωθάτου (Vat. Ταμωθα); Ραμωθα (Vat. Ταμωθα); Ραμωθα (Vat. Ταμωθα); Ραμωθα (Vat. Ταμωθα); [in 2 Chr. xxii. 5, Ψαμαθαλαάαααα] Alexander. Ραμωθα, [and several other forms]; Joseph. "Ραμωθα: Ramaoth Gilead", the "heights of Gilead." One of the great fastnesses on the east of Jordan, and the key to an important district, as is evident not only from the direct statement of 1 K. iv. 13, that it commanded the regions of Argob and of the town of Iaer, but also from the ob-

scurity with which it was attacked and defended by the Syrians and Jews in the reigns of Ahab Ahabjah, and Jerom.

It seems probable that it was identical with Ramath-Mizpeh, a name which occurs but once (Josh. xiii. 26), and which again there is every reason to believe occupied the spot on which Jacob had made his covenant with Laban by the simple rite of piling up a heap of stones, which heap is expressly stated to have borne the names of both Gilead and Mizpeh, and became the great san-

tuary of the regions east of Jordan. The variation
of Ramoth and Ramath is quite feasible. Indeed, it occurs in the case of a town of Judah. Probably from its commanding position in the territory of Gad, as well as its sanctity and strength, it was chosen by Moses as the City of Refuge for that tribe. It is in this capacity that its name is first introduced (Deut. iv. 43; Josh. xx. 8, xxi. 38).

We next encounter it as the residence of one of Solomon's commissioner officers, Ben-gibelet, whose authority extended over the important region of Argob, and the no less important district occupied by the towns of Jair (1 K. iv. 13).

In the second Syrian war Ramoth-Gilead played a conspicuous part. During the invasion related in 1 K. xx. 29, or some subsequent memoir, this important place had been seized by Benhadad I. from Omri-Joseph, Ant. viii. 15, § 3. Abah had been too much occupied in repelling the attacks of Syria on his interior to attempt the recovery of a place so distant, but as soon as these were at an end and he could secure the assistance of Jehoshaphat, the great and prosperous king of Judah, he planned an attack (1 K. xxii. 2; 2 Chr. xix.). The incidents of the expedition are well known: the attempt failed, and Abah lost his life. (Josel. Micaél. v. 14; Naaman: Zedekiah.)

During Ahab's short reign we hear nothing of Ramoth, and it probably remained in possession of the Syrians till the suppression of the Moabite rebellion gave Jerom time to renew the siege. He allied himself for the purpose as his father had done, and as himself had done on his late campaign, with his relative the king of Judah. He was more fortunate than Ahab. The town was taken by Israel (Joseph. Ant. ix. 6, § 1), and held in spite of all the efforts of Hazael (who was now on the throne of Damascus) to regain it (2 K. xiv. 11).

During the encounter Jerom himself narrowly escaped the fate of his father, being (as we learn from the LXX. version of 2 Chr. xxii. 6, and from Josephus) wounded by one of the Syrian arrows, and that so severely as to necessitate his leaving the army and retiring to his palace at Jerced (2 K. viii. 28, ix. 15; 2 Chr. xxii. 6). The fortress was left in charge of John. But he was quickly called away to the more important and congenial task of rebelling against his master. He drove off from Ramoth-Gilead as if on some errand of daily occurrence, but he did not return, and does not appear to have revisited the place to which he most surely had owes his reputation and his advancement.

Henceforward Ramoth-Gilead disappears from our view. In the account of the Gileadite campaign of the Maccabees it is not recognizable, unless it be under the name of Maspa (Mizpeh). Carmeil appears to have been the great sanctuary of the district at that time, and contained the sanctuary (παρυμνήσιον) of Ashdod, in which fugitives took refuge (1 Macc. v. 43). Eulasius and Jerome specify the position of Ramoth as 15 miles from Philadelphia (Ammian.).

Their knowledge of the country on that side of the Jordan was, however, very imperfect, and in this case they are at variance with each other. Eusebius placing it west, and Jerome east of Philadelphia. The latter position is obviously untenable. The former is nearly that of the modern town of es-Salt, which Gesenius (notes to Bärcklhardt, p. 1061) proposes to identify with Ramoth-Gilead. Ewald (Gesch. iii. 596, note) indeed, proposes a site further north as more probable. He suggests Es-Salt, on the northern slopes of the Jebel At-Bah, a few miles west of Jerusalem, and between it and the well-known fortress of Khulat er-Rubad. The position assigned to it by Eusebius answers tolerably well for a site bearing the name of Jerah (קדשא), exactly identical with the ancient Hebrew Gilgal, which is mentioned by Seetzen (Reisen, March 11, 1806), and marked on his map (ibid., iv.) and that of Van de Velde (1858) as four or five miles north of es-Salt. And probably this situation is not very far from the truth. If Ramoth-Gilead and Ramoth-Mizpeh are identical, a more northern position than es-Salt would seem inevitable, since Ramoth-Mizpeh was in the northern portion of the tribe of Judah (Josh. xiii. 26).

This view is supported also by the Arabic version of the Book of Joshua, which gives Ramoth el-Jerez, i.e. the Geraza of the classical geographers, the modern Jerash; with which the statement of the careful Jewish traveller Parchi agrees, who says that "Gilgal is at present Jerez." (Zinz in Asher's Benjamin, p. 40a.) Still the fact remains that the name of Jerahol, or Mount Gilgal, is attached to the mass of mountain between the Wady Sha'b on the south, and Wady Ze'eka on the north, the highest part, the Ramoth, of which, is the Jebel Ostar. G. Tri-tarn assumes the identity of the site of Ramoth-Gilead with es-Salt, about six hours N. E. of Amman. He found there a flourishing modern town with few traces of antiquity (Land of Israel, pp. 552-555, 2d ed.).

RAMOTH IN GILEAD (רַםְתָּה יִנְּבָד הַגְּילָדָּה) [heights in Gilead]; η' Ραμάθ τον Γαλάαζ, Αρρήστω τον Γέραζα (ντέρτα τον Γέραζα). Παραμάθ; Ραμάθ; Ramath in Gilead). Deut. iv. 43; Josh. xx. 8, xxi. 38; 1 K. xxii. 3. Elsewhere the shorter form, Ramoth Gilead, is used.

RAMS’ HORNS. [Corner; Jubilee.]

RAMS’ SKINS DYED RED (דר memorandum of the materials that the Israelites were ordered to present as offerings for the making of the Tabernacle (Ex. xxv. 5); of which they served as one of the inner coverings, there being above the rams’ skins an outer covering of badgers’ skins. [See BADGER.]

There is no doubt that the A. V., following the
A city of Gilgal, under the walls of which Judas Maccabaeus defeated Timotheus (1 Macc. v. 37 only). It appears to have stood on the eastern side of an important wady, and at no great distance from Carnaim—probably Ashteroth-Karnaim. It may have been identical with Raphana, which is mentioned by Pliny (H. N. v. 16) as one of the cities of the Decapolis, but with no specification of its position. Nor is there anything in the narrative of 1 Macc., of 2 Macc. (xii.), or of Josephus (Ant. xii. 8, § 2), to enable us to decide whether the current question is the Hieromon the Zakros, or any other.

In Kiepert's map accompanying Wetzstein's Himmeln, etc. (1860), a place named Er-Râfîrî is marked, on the east of Wady Heir, one of the branches of the Wady Mumlikh, and close to the great road leading to Samacain, which has some claims to be identified with Ashteroth Carnaim. But in our present ignorance of the district this can only be taken as mere conjecture. If Er-Râfîrî be Raphana we should expect to find large ruins.

2677 RA'PHON [l4] [Maîl] [Paras.]: [Rom. Sin.]: [Pesh.]: [Raphon].

They are enumerated with the owl, the bittern, etc.
RAZIS

as marking the desolation of Edom (Is. xxxiv. 11).

"The locks of the beloved are compared to the glory and brightness of the raven's plumage (Cant. x. 11). The raven's carnious habit and especially his readiness to attack the eye, are alluded to inProv. xxi. 17.

The LXX. and Vulg. differ materially from the Hebrew and our Authorized Version in Gen. viii. 7, for whereas in the Hebrew we read "that the raven went forth to and fro [from the ark] until the waters were dried up," in the two old versions named above, together with the Syriac, the raven is represented as "not returning until the water was dried from off the earth." On this subject the reader may refer to Horbigan (Not. Crit. ii. 12). Kochart (Herod. ii. 891), Rosenmüller (Schoel. in T. 5.), Kaisch (Genecis), and Patriek (Commentary) who shows the manifest incorrectness of the LXX. in representing the raven as keeping away from the ark while the waters lasted, but as returning to it when they were dried up. The expression "to and fro" clearly proves that the raven must have returned to the ark at intervals. The bird would doubtless have found food in the floating carcasses of the deluge, but would require a more solid resting-ground than they could afford.

The subject of Elijah's sustenance at Cherith by means of ravens has given occasion to much fanciful speculation. It has been attempted to show that the "corvinae (ravens)"] were the people of Orba, a small town near Cherith; this theory has been well answered by Reland (Palaest. ii. 913). Others have found in the ravens merely merchants; while Michaelis has attempted to show that Elijah merely plundered the ravens' nests of hares and other game! Kell (Comment in K. xvii.) makes the following just observation: "The text knows nothing of bird-catching and nest-robbing, but acknowledges the Lord and Creator of the creatures who commanded the ravens to provide his servant with bread and flesh." [Cherith. Amer. ed.]

Jewish and Arabian writers tell strange stories of this bird and its cruelty to its young; hence, say some, the Lord's express care for the young ravens, after they had been driven out of the nests by the parent birds; but this belief in the raven's want of affection to its young is entirely without foundation. To the fact of the raven being a common bird in Palestine, and to its habit of flying restlessly about in constant search for food to satisfy its voracious appetite, may perhaps be traced the reason for its being selected by our Lord and the inspired writers as the especial object of God's providing care. The raven belongs to the order Inscamer, family Corvida.

W. H.

RAZIS [Rom. PaCis: Alex. PaCis: R. C.]. "One of the elders of Jerusalem," who killed himself under peculiarly terrible circumstances, that he might not fall "into the hands of the wicked" (2 Mac. xiv. 37-46). In dying he is repeatedly to have expressed his faith in his resurrection (ver. 46) — a belief elsewhere characteristic of the Maccabean conflict. This act of suicide, which was wholly alien to the spirit of the Jewish law and people (Euseb.,Hist. 118; John viii. 22; comp. Grot. De Jure Hebii. ii. xix. 5), has been the subject of considerable discussion. It was quoted by the Donatists as the single fact in Scripture which supported their fanatical contempt of death (Aug. Ep. 104, 6). Augustine denies the fitness of the model, and condemns the deed as that of a man "non eligendae mortis sapiens, sed ferendae immutabilitis impatienvis" (Aug. L. c. comp. c. Gaul. ii. 36-39). At a later time the favor with which the writer of the Minor views the conduct of Raza — a fact which Augustine vainly denies — was urged rightly by Protestant writers as an argument against the inspiration of the book. Indeed, the whole narrative breathes the spirit of pagan heroism, or of the later zelotei (comp. Jos. B. J. iii. 7, iv. 1, § 10), and the deaths of Samuel and Saul offer no satisfactory parallel (comp. Grimm, ad loc.).

RAZOR. Besides other usage, the practice of shaving the head after the completion of a vow has created among the Jews a necessity for the special trade of a barber (Num. vi. 9, 18, viii. 7; Lev. xiv. 8; Judg. xiii. 5; Is. vii. 20; Ez. v. 1; Acts xviii. 18). The instruments of his work were probably, as in modern times, the razor, the basin, the mirror, and perhaps also the scissors, such as are described by Lucan (Alex. I. 269, vol. ii. ad Anist.; see 2 Sam. xiv. 26). The process of oriental shaving, and especially of the head, is minutely described by Chardin (Voy. iv. 144). It may be remarked that, like the Levites, the Egyptian priests were accustomed to shave their whole bodies (Her. ii. 36, 37).

H. W. P.

RAEFA (1777) [from Jewish seer: ] Peda: Riva. A Renenbite, son of Micah, and apparently prince of his tribe (1 Chr. v. 5). The name is identical with

RAEFAH (1777) [as above: ] Pada: Alex. Paiza: Riva. 1. A descendant of Shubal, the son of Judah (1 Chr. iv. 2).

2. (Paizo, [Vat. Paza], Ezr. Pazi, [Vat. Fa. Paza], Neh. Paza). The children of Rezaiah were a family of Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 47; Neh. vii. 38). The name appears as Azzus in 1 Esdr. v. 31.

* REAPING. [Agriculture; Ruth, Book of.]

REBS (2222) [four: ] Pabluco in Num.; Pobico in Josh.: Rube). One of the five kings of the Midianites slain by the children of Israel in their avenging expedition, when Balak fell (Num. xxxii. 8; Josh. xiii. 21). The different equivalents for the name in the LXX. of Numbers and Joshua seem to indicate that these books were not translated by the same hand.

REBECKA (Rebecca). The Greek form of the name REBEKAH (Rom. ix. 10 only).

REBEKAH (1777) [i.e. Ribkah: card with a nape, then answers: ] Rebekeka: Rebecca); daughter of Bethuel (Gen. xxii. 24) and sister of Laban, married to Isaac, who stood in the relation
of a first cousin to her father and to Lot. She is first presented to us in the account of the mission of Eleazar to Padan-aram (Gen. xxiv.), in which his interview with Rebekah, her consent and marriage, are related. The whole chapter has been pointed out as uniting most of the circumstances of a pattern-marriage. The sanction of parents, the guidance of God, the domestic occupation of Rebekah, her beauty, courteous kindness, willing consent and modesty, and success in retaining her husband's love. For nineteen years she was childless; then, after the prayers of Isaac and his journey to inquire of the Lord, Esau and Jacob were born, and while the younger was more particularly the companion and favorite of his mother (xxv. 19-28) the elder became a grief of mind to her (xxvi. 35). When Isaac was driven by a famine into the lawless country of the Philistines, Rebekah's beauty became, as was apprehended, a source of danger to her husband. But Abraham was restrained by a sense of justice such as the conduct of his predecessor (xx) in the case of Sarah would not lead Isaac to expect. It was probably a considerable time afterwards when Rebekah suggested the idea that was proposed by Isaac to his blind and father. She directed and aided him in carrying it out, foresaw the probable consequence of Esau's anger, and prevented it by moving Isaac to send Jacob away to Padan-aram (xxvii.) to her own kindred (xxix. 12). The Targum Pseudo-Jonathan states (Gen. xxv. 8) that the news of her death was brought to Jacob at Allan-bachuth. It has been conjectured that she died during his sojourn in Padan-aram; for her nurse appears to have left Isaac's dwelling and gone back to Padan-aram before that period (compare xxiv. 59 and xxv. 8), and Rebekah is not mentioned when Jacob returns to his father, nor do we hear of her burial till it is incidentally mentioned by Jacob on his deathbed (xix. 31).

St. Paul (Rom. ix. 10) refers to her as being made acquainted with the purpose of God regarding her children before they were born.

For comments on the whole history of Rebekah, see Origens, Hom. in Gen. x. and xii.; Chrysostom, Hom. in Genes. pp. 48-54. Rebekah's inquiry of God, and the answer given to her, are discussed by Dayling, Observ. Sac. i. 12, p. 53 seq., and in an essay by J. A. Schmid in Nov. Theol. Theol. Philol. i. 188. W. T. B.

* RECEIPT OF CUSTOM (τελεωτατον) denotes not so directly the act as the place of collecting customs. It is mentioned in the accounts of Matthew's call (Matt. ix. 9, Mark ii. 14, and Luke v. 27). Matthew was a tax-collector on the shore of the lake of Galilee, probably near Capernaum. The toll house may have been a building or a booth merely with a seat and table. [PUBLICAN; TAXES.]

RECHAB (רֶכֶחַ) = horseman, from רֶכֶחַ, "to ride." [Pron. Rechab]. Three persons bearing this name are mentioned in the D. T. L. [Vat. in 1 Chr. 5. PUXDA.] The father or ancestor of Jehonadab (2 K. x. 15, 23; 1 Chr. ii. 55; Jer. xxxv. 6-11), identified by some writers, not conjointly with Hadah (Arias Monta-

a In confirmation of this view, it may be noticed that the "shearing-house" of 2 K. x. 14 was probably the known rendezvous of the nomad tribe of the Kenites, with their flocks of sheep. [SHARAN-ROUSE.]
The Rechabites

II. The personal history of Jehonathan has been dealt with elsewhere. Here we have to notice the new character which he impressed on the tribe, of which he was the head. As his name, his descent, and the part which he played indicate, he and his people had all along been worshippers of Jehovah, circumcised, and so within the covenant of Abraham, though not reckoned as belonging to Israel, and probably therefore not considering themselves bound by the Mosaic law and ritual. The worship of Baal introduced by Jezebel and Ahab was accordingly not less offensive to them than to the Israelites. The luxury and licentiousness of Phoenician cities threatened the destruction of the simplicity of their nomadic life (Amos ii. 7, 8, vi. 3-6). A protest was voiced against both evils, and as in the case of Elijah, and of the Nazarites of Amos ii. 11, it took the form of asceticism. There was to be a more rigid adherence than ever to the old Arab life. What had been a traditional habit, was enforced by a solemn command from the sheikh and prophet of the tribe, the destroyer of idolatry, who no one dared to transgress. They were to drink no wine, nor build house, nor sow seed, nor plant vineyard, nor have any. All their days they were to dwell in tents, as remembering that they were strangers in the land (Jer. xxxv. 6, 7). This was to be the condition of their retaining a distinct tribal existence. For two centuries and a half they adhered faithfully to this rule; but we have no record of any part taken by them in the history of the period. We may think of them as presenting the same picture which other tribes, uniting the nomad life with religious austerity, have presented in later periods.

The Nabataeans, of whom Diodorus Siculus speaks (xix. 94) as neither sowing seed, nor planting fruit tree, nor using nor building house, and enforcing these transmitted customs under pain of death, give us one striking instance. Another is found in the prohibition of wine by Mohammed (Sale's Koran, Pref. Diss. § 5). A yet more interesting example is found in the narratives of the sect of the Wahabah during the last and present centuries. Abul-ul-Wahab, from whom the sect takes its name, reproduces the old type of character in all its completeness. Anxious to protect his countrymen from the revolting views of the Turks, as Jehonathan had been to protect the Reubenites from the like vices of the Philistines, the Palestinian reformer felt the necessity of returning to the old austerity of Arab life. What wine had been to the earlier preacher of righteousness, the outward sign and incentive of a fatal corruption, hard wine and tobacco were to the later prophet, and, as such, were rigidly proscribed. The rapidity with which the Wahabah became a formidable party, the Puritans of Islam, presents a striking analogy to the strong political influence of Jehonathan in K. v. 92 (con. Baruch 1, Bedouin and Wahabah, p. 283, &c.).

The invasion of Judah by Nebuchadnezzar in B.c. 607, drove the Rechabites from their tents. Possibly some of the previous periods of danger may have led to their settling within the limits of the territory of Judah. Some inferences may be safely drawn from the facts of Jer. xxv. The names of the Rechabites show that they continued to be worshippers of Jehovah. They are already known to the prophet. One of them (ver. 3) bears the same name. Their rigid Nazarite life gained for them admission into the house of the Lord, into one of the chambers assigned to priests and Levites, within its precincts. They were received by the sons or followers of a "man of God," a prophet or devotee of special sanctity (ver. 4). Here they are tempted and are proof against the temptation, and their steadfastness is turned into a reproof for the unsufficiency of Judah and Jerusalem. [JEREMIAH.] The history of this trial ends with a special blessing, the full import of which has, for the most part, not been adequately apprehended: "Jonadab, the son of Rechab, shall not want a man to stand before me for ever" (ver. 19). Whether we look on this as the utterance of a true prophet, or as a reticulium ex evente, we should hardly expect at this precise point to lose sight altogether of those of whom they were spoken, even if the words pointed only to the perpetuation of the name and tribe. They have however, a higher meaning. The words "to stand before me" (םלועקמ ותלעה) are essentially liturgical. The tribe of Levi is chosen to "stand before" the Lord (Deut. x. 8, xvii. 5, 7). In Gen. xviii. 22; Judg. xx. 28: Psa. xxxiv. 1; Jer. xv. 19, the liturgical meaning is equally prominent and unmistakable (comp. Gesen. Thes. s.v.; Grotius in loc.). The fact that this meaning is given ("ministering before me") in the Targum of Jonathan, is evidence (1) as to the received meaning of the phrase: (2) that this rendering did not shock the feelings of Jews and devout Rabbinists in our Lord's time; (3) that it was at least probable that there existed representatives of the Rechabites connected with the Temple services in the time of Jonathan. This then, was the extent of the new blessing. The Rechabites were solemnly adopted into the families of Israel, and were recognized as incorporated into the tribe of Levi. Their purity, their faithfulness, their com-

* The fact that the Nabataeans habitually drank "wild wine" (אָמָּ֣ר בֵּ֣ית יִשְׂרָאֵ֑ל מָרַ֣פֶּה) mixed with water (Dio, lib. xix. 179), and in the Bedouin also, still make hosts an article of food. Burckhardt, Reisen, p. 270, shows very strongly that the Baptist's life was fashioned after the Rechabite as well as the Nazarite type.

* It may be worth while to refer to a few authorities agreeing in the general interpretation here given, though differing as to details. Vatablus (Con. Sac. in loc.) mentions a Jewish tradition: "The Rechabites, as cited by Kimchi, comp Scaliger, Ezech. Thesaur. Senar. 285, that the daughters of the Rechabites married Levites, and that thus their children came to minister in the Temple. (For the conjectures that the Rechabites themselves were chosen to sit in the great Council. Sanftius and Calmet suppose them to have ministered in the same way as the Nehinaim (Calmet Diss. sur les Rechab., in Ps. v. xiv. 1726). Ser- rarius (Thesaur. Hebrews with the Rosenm. Scaliger (l. c.) identifies them with the Rosenn.)
sorated nbe gained for them, as it gained for other Nazarites, that honor (comp. Pistoectes). In Lam. iv. 7, we may perhaps trace a reference to the Rechabites, who had been the most conspicuous examples of the Nazarite life in the prophet's time, and most the object of his admiration.

(IV.) It remains for us to see whether there are any traces of their after-history in the Biblical or later writers. It is generally believed that there are such traces, and that they confirm the statements made in the previous paragraph.

(1.) We have the singular heading of the Ps. lixi. in the LXX. version (τος Δαυδ, μην 'Ιερου-δαββ, και των πρωτων αυτουλσαθετων), evidence, of course, of a corresponding Hebrew title in the 3d century B.C., and indicating that the "sons of Jonadab" shared the captivity of Israel, and took their place among the Levite priests who gave expression to the sorrows of the people.

(2.) There is the significant mention of a son of Rechab in Neh. iii. 14, as cooperating with the priests, Levites and princes in the restoration of the wall of Jerusalem.

(3.) The mention of the house of Rechab in 1 Chr. ii. 55, though not without difficulty, points, there can be little doubt, to the same cummanon. The Rechabites have become scribes (Σχιστητας). Sopherim). They give themselves to a calling which, at the time of the return from Babylon, was chiefly if not exclusively in the hands of Levites. The other names (THATITHITES, SHEKHATHITES, and SUCHATITHITES in A. V.) seem to add nothing to our knowledge. The Vulgar rendering, however (evidence of a traditional Jewish interpretation in the time of Jerome) gives a translation based on etymologies, more or less accurate, of the proper names, which strikingly confirms the view now taken. "Cognates quoque Schecarum habitantiam in Jables, canantes atque resonantes, et in tabernaculis commorantes." 6 Thus interpreted, the passage points to a resumption of the outward form of their old life and its union with their new functions. It deserves notice also that while in 1 Chr. ii. 54, 55, the Rechabites and Netophathites are mentioned in close connection, the "sons of the singers" in Neh. xii. 28 appear as coming in large numbers from the villages of the same Netophathites. The close juxtaposition of the Rechabites with the descendants of David in 1 Chr. iii. 1 shows also in how honorable an esteem they were held at the time when that book was compiled.

(4.) The account of the martyrdom of James the Just, given by Hegesippus (Eus. H. E. i. 23), brings the name of the Rechabites once more before us, and in a very strange connection. While the Scribes and Pharisees were stoning him, "one of the priests of the sons of Rechab, the son of Rechabim, who are mentioned by Jeremiah the prophet," cried out, protesting against the crime. Dr. Stanley (Sermo& nymphs on the Apostolic Age, p. 335), struck with the seeming anomaly of a priest, "not only not of Levitical, but not even of Jewish descent," supposes the name to have been used loosely as indicating the abstentious life of James and other Nazarites, and points to the fact that Epiphanis (Harr. ixxviii. 14) ascribes to Symeon the brother of James the words which Hegesippus puts into the mouth of the Rechabite, as a proof that it denoted merely the Nazarite form of life. Calmet (Diction. des Rechab. i. c.) supposes the man to have been one of the Rechabite Nethinim, whom the informant of Hegesippus took, in his ignorance, for a priest. The view which has been here taken presents, it is believed, a more satisfactory solution. It was hardly possible that a writer like Hegesippus, living at a time when the details of the Temple-services were fresh in the memories of men, should have thus spoken of the Rechabites unless there had been a body of men to whom the name was commonly applied. He uses it as a man would do to whom it was familiar, without being struck by any apparent or real anomaly. The Targum of Jonathan on Jer. xxxv. 19 indicates, as has been noticed, the same fact. We may accept Hegesippus therefore as an additional witness to the existence of the Rechabites as a recognized body up to the destruction of Jerusalem, whatever they may have been in the ritual of the Temple, partly descended from the old "sons of Jonadab," partly recruited by the incorporation into their ranks of men devoting themselves, as did James and Symeon, to the same consecrated life. The form of austere holiness presented in the life of Jonadab, and the blessing pronounced on his descendants, found their highest representatives in the two Brothers of The Lord. (5.) Some later notices are not without interest. Benjamin of Tudela, in the 12th century (Edit. Asher, 1840, i. 112-114), mentions that near El- Jubal (= H'mbeinita) he found Jews who were named Rechabites. They tilled the ground, kept flocks and herds, abstained from wine and flesh, and gave titles to teachers who devoted themselves to studying the Law, and weeping for Jerusalem. They were 100,000 in number, and were governed by a prince, Solomon han-Nasi, who traced his genealogy up to the house of David, and ruled over the city of Thena and Telmas. A later traveller, Dr. Wolff, gives a yet stranger and more detailed report. The Jews of Jerusalem and Yemen told him that he would find the Rechabites of Jer. xxxv. 19, living near Mecca (Journal, 1829, ii. 334). When he came near Senna he came into contact with a tribe, the Beni-Khabir, who identified themselves with the sons of Jonadab. With one of them, Mousa, Wolff conversed, and reports the dialogue as follows: "I asked him, 'Whose descendants are you?' Mousa answered, 'Come, and I will show you,' and read from an Arabic Bible the words of Jer. xxxv. 5-11. He then went on: 'Come, and you will find us 60,000 in number. You see the words of the Prophet have been fulfilled, Jonadab the son of Rechab shall not want a man to stand before me forever'" (ibid. p. 335). In a later

---

a Neither Ewald nor Hengstenberg nor De Wette notices this inscription. Ewald, however, refers the Psalm to the time of the Captivity. Hengstenberg, who asserts its Davidic authorship, indicates an alphabetical relation between it and Ps. lxx., which is at most presumptive evidence of a later origin and use of the points, with some fair probability, to Jeremiah as the writer. (Comp. Lamentations.) It is noticed, however, by Augustine (Enarr. in Ps. lxx. § 2), and is referred by him to the Rechabites of Jer. xxxv.

b The etymologies on which this version rests are, it must be confessed, somewhat doubtful. Scaliger (Bibl. Hier. Str. c. 22) rejects them with scorn. Pellican and Calmet, on the other hand, defend the Vulgar rendering, and Gill (in loc.) does not dispute it. Most modern interpreters follow the A. V. in taking the words as proper names.
RECHAIH (רְכֶחַי) [hinder part, recess; רְכֶחַי ב': K.] 

In 1 Chr. iv. 12, Beth-Kedah, Paseah, and Tehinnah the father, or founder, of Jerahmeel, are said to have been the "men of Rechah." In the Tartum of R. Joseph they are called "the men of the great Synedrin," the Targumist apparently reading רכחי.

RECORRED (רְכֶרֶד), an officer of high rank in the Jewish state, exercising the functions, not simply of an annalist, but of chancellor or president of the privy council. The title itself may perhaps have reference to his office as adviser of the king: at all events the notices prove that he was more than an annalist, though the superintendence of the records was without doubt entrusted to him. In David's court the recorder appears among the high officers of his household (2 Sam. viii. 16, xx. 24; 1 Chr. xvii. 15). In Solomon's, he is coupled with the three secretaries, and is mentioned last, probably as being their president (1 K. iv. 3).

Under Hezekiah, the recorder, in conjunction with the prefect of the palace and the secretary, represented the king (2 K. xvii. 18, 57); the patronymic of the recorder at this time, Josh the son of Asaph, makes it probable that he was a Levite. Under Josiah, the recorder, the secretary, and the governor of the city were entrusted with the superintendence of the repairs of the Temple (2 Chr. xxxiv. 8). These notices are sufficient to prove the high position held by him. [TOWN CLERK]

*RED. [Colors, 3.]

RED-HEIFER. [Sin-offering.]

RED SEA. The sea known to us as the Red Sea was by the Israelites called the sea "תַּהַע" (Ex. xiv. 2, 9, 16, 21, 25; xv. 1, 4, 8, 10, 19; Josh. xxxiv. 6, 7; and many other passages); and specially "the sea of Siphi" (תַּהַע) (Ex. x. 19, xiii. 18, xv. 4, 22, xxii. 31; Num. xiv. 24, xxvi. 9, xxxii. 10, 11; Deut. i. 40, xi. 4; Josh. ii. 10, iv. 25, xxvi. 6; Judg. xi. 10; 1 K. iv. 21; Neh. iv. 9; Pss. cxvii. 9, 22, cxvii. 13, 15; Jer. xlix. 21). It is also perhaps written יִרְדָּן (זָוִיד) (LXX.) in Num. xxxi. 14, rendered "Red Sea" in A.V.; and in like manner, in Deut. i. 1, וָדָי, without יִרְדָּן. The LXX. always renders it ἤς ῥυθμ θέλασα

a A paper "On Recent Notices of the Red-heifers," by Signor Pierotti, has been read, since the above was in type, at the Cambridge Meeting of the British Association (October, 1852). He met with a tribe calling themselves by that name near the Dead Sea, about two miles S. E. from it. They had a Hebrew Bible, and said their prayers at the tomb of a Jewish Rabbi. They told him precisely the same stories as had been told to Woll thirty years before.

b In some Arab authors, the sea is named from the drowning of Pharaoh's host; Kulzum being a derivative of כָּלַע, with this signification: or, according to others, from its being hemmed in by mount-

(except in Judges xi. 16, where יַדֶּל, וָדָי, is pre-

served). So too in N. T. (Acts vii. 36; Heb. xi. 29); and this name is found in I Macc. iv. 9. By the classical geographers this application, like its Latin equivalent Mare Rubrum or M. Erigynum, was extended to all the waters washing the shores of the Arabian peninsula, and even the Indian Ocean; the Red Sea itself, or Arabian Gulf, was φράγματος κόσμου, or Αραβαδικός κ., or Sinus Arabicus, and its eastern branch, or the gulf of the "Akabah, Αλλακείας, Εκλακείας, Εκλακτικος κόσμος, Sinus Arabiæ, or S. Araborum. The Gulf of Suez was specially the Πρόπετρινα Ποταμία, Ηimeteroπολιτής κόσμος, Sinus Heropotentis, or S. Heropotentis. Among the peoples of the East, the Red Sea has for many centuries lost its old names: it is now called generally by the Arabs, as it was in mediæval times, Bahr El-Kulzum, "the sea of El-Kul-

czum," after the ancient Clysma, "the sea beach," the site of which is near, or at, the modern Suez.

In the Kur-an, part of its old name is preserved, the rare Arabic word "gīm" being used in the account of the passage of the Red Sea (see also foot-note to p. 1012, infr.), and El-Behdawee's Comment on the Kur-an, viii. 341; and xx. 81, p. 602; of the name of this sea (1) [ם"ג] (Syri. מ"ג

d and [ם"ג]) — the latter generally "a lake;"

Hierog. YUMA; Opt. JOMM; Arabic, מ"ג signifies "the sea," or any sea. It is also applied to the Nile (exactly as the Arabic būkār is so applied) in iii. 8, "Art thou better than populous No, that was situated among the rivers (yāmūn), [that had] the waters round about it, whose rampart [was] the sea (gīm), and her wall was from the sea (gīm)?"

(2) יִרְדָּן (W, Ṭ, Y, L, N, B) in the Copitic version, גוומ רדאן.

The meaning of יִרְדָּן, and the reason of its being applied to the sea, have given rise to much learned controversy. Gesenius renders it יִרְדָּן, read, reversed. It is mentioned in the O.T. almost always in connection with the sea of the Exodus. It also occurs in the narrative of the exposure of Moses in the יִרְדָּן (yebr): for he was laid in ירדָן, on the brink of the yebr (Ex. ii. 3), where (in the yebr) he was found by Pharaoh's daughter (5); and in the "borders of Egypt" (Is. xix.), with the drying up of the waters of Egypt: "And the waters shall fail from the sea (gīm), and the river (mīhār) shall be wasted and dried up. And they shall turn the rivers (mīhār, constr. plk) far away; and the brooks (yebr) of defense (or tains, from the same root; El-Makremee's Kūlût, descr. of the sea of El-Kulzum). Its general name is "the sea of El-Kulzum," but in different parts it is also called after the nearest coast, as "the sea of the Hymen," etc. (Yahoot, in the Mosaics).

d Of Yamm signifies a brook of which the bottom is not reached. Yebr applies to a "sea" or a "great river;" d Gesenius adds Is. xix. 5, quoted below; but it is not easy to see why this should be the Nile except from preconceived notions, instead of the ancient ex-

tension of the Red Sea. He allows the "tongue of the Egyptian sea (gīm)" in Is. xi. 16, where the river (Nile) is nakar.
of Egypt? shall be emptied and dried up: the reeds and flags (siph) shall wither. The paper reed (sibum) by the brooks (yed), the mouth of the brooks (yed), and everything sown by the brooks (yed), shall wither, be driven away, and be no more. The fishes also shall mourn, and all they that cast angle into the brooks (yed) shall lament, and they that spread nets upon the waters shall languish. Moreover they that work in fine flax, and they that weave net works (white linen?) shall be destroyed. And thus the shall be broken the purposes thereof, all that makes sluices [and] ponds for fish (xix. 5-10). Siph only occurs in one place besides those already referred to: in Jon. ii. 5, it is written, 'The waters compassed me about, [even] to the soul: the depth closed me round about, the weeds (siph) were wrapped about my head.' With this single exception, which shows that this product was also found in the Mediterranean, siph is Egyptian, either in the Red Sea, or in the yed, and this yed in Ex. ii. was in the land of Goshen. What yed signifies here, in Is. xix., and generally, we shall examine presently. But first of siph.

The signification of חלך, siph, must be gathered from the foregoing passages. In Arabic, the word, with this signification (which commonly is "wool"), is found only in one passage in a rare lexicon (the Mehdam MS.). The author says, "Sofa is le-sahr (the soof of the sea) is like the wool of sheep. And the Arabs have a proverb: 'I will come to thee when the sea ceases to wet the soof,'" i.e. never. The חלך of the סן, it seems quite certain, is a sea-weed resembling wool. Such weed is thrown up abundantly on the shores of the Red Sea. Fürst says, s. v. חלך, "Ab Ethiopia- bus herba quaedam sapho appellatur, qua in pro- fundo mari rubro crecit, qua rura est, rubrum- que colore constant, pennis tingendi inservientem, teste Hieronymo de qualitate mari rubri" (p. 47, &c.). Diadornus (ii. ch. 19), Aramaeornus (ap. Strabo, p. 770), and Agatharchides (ed. Müller, p. 139-140) speak of the weed of the Arabian Gulf. Ehrenberg (in Wiener) enumerates Fucus inflatei on the shores of this sea, and at Suez Fucus criquis, F. trinotis, F. turbinatus, F. pyrolodi, F. diaphanis, etc., and the specially red weed Tricholeiun crithyrum. The Coptic version renders siph by שחי (see above), supposed to be the hieroglyphic "SHER" (see?). If this be the same as the שרי of Pliny (see next paragraph), we must conclude that שחי, like saph, was both marine and florescent. The passage in Jonathon proves it to be a marine prod- uct; and that it was found in the Red Sea, the numerous passages in which that sea is called the sea of siph have no doubt. But חלך may have been also applied to any substance resembling wool, produced by a flaccid rush, such as the papyrus, and hence by a synec- doche to such rush itself. Golius says, s. v. חלך, "a naked or bare place, i.e. destitute of trees. the banks of the Nile." But this is a very satisfactory Bookrood says, "Our translators, after careful sup- posed this word to signify the papyrus; but without any just authority. Kimchi explains, 'Arath est nomem appellativum euloderum et herbarum viventium.' Hence we may reader, 'The marshy {sic} sweldas {sic} at the mouth of the river;" etc.
RED SEA

1. (p. 382) Memphis dialect, "PAPO.

Shockel signifies a "river." It seems to apply to a "great river," or the like, and also to an arm of the sea; and perhaps to a "sea" absolutely, like the Arabic behar. Genesis says it is almost exclusively used of the Nile: but the passages in which it occurs do not necessarily bear out this conclusion.

For the greater number refer to the story in Egypt: these are: Gen. xii. 1, 2, 3, 17, 18, Pharaoh's dream; Ex. i. 22, the exposure of the male children; Ex. ii. 3, 5, the exposure of Moses; Ex. vii. 13 ff., and xvii. 5, Moses before Pharaoh and the plague of blood; and Ex. xviii. 5, 7, the plague of frogs.

The next most important instance is the prophecy of Isaiah, already quoted in full.

Then, that of Amos (xii. 9, comp. ix. 5), where the land shall rise up wholly as a flood (ge'or); and shall be cast out and drowned as [by] the flood (ge'or) of Egypt. The great prophecy of Ezekiel against Pharaoh and against all Egypt, where Pharaoh is "the great dragon that lieth in the midst of his rivers (YN N)" which hath said, My river (USS) is mine own, and I have made it [for myself] (xxix. 3), uses the pl. throughout, with the above exception and verse 9, "because he hath said, The river (USS) is mine own, and I have made it." It cannot be supposed that Pharaoh would have said of the Nile that he had made it, and the passage seems to refer to a great canal. As Ezekiel was contemporary with Pharaoh Necho, he may not have here referred to the reoccupation of the canal of the Red Sea by that Pharaoh? That canal may have at least received the name of the canal of Pharaoh, just as the same canal when reoccupied for the last time was the "canal of the Prince of the Faithful," and continued to be so called. Yeor occurs elsewhere only in Jer. xvi. 7, 8, in the prophecy against Necho; in Isa. xxix. 10, where its application is doubtful; and in Dan. xi. 3, 5, where it is held to be the Euphrates, but may be the great canal of Babylonia. The pl. ge'orim, seems to be often used interchangedly with ge'or (as in Ex. xxix., and Nah. iii. 8); it is used for "rivers," or "channels of water;" and, while it is not restricted to Egypt, especially of those of the Nile.

From a comparison of all the passages in which it occurs there appears to be no conclusive reason for supposing that ge'or applies generally, if ever, to the Nile. In the passages relating to the exposure of Moses it appears to apply to the ancient extension of the Red Sea towards Tanis (Zeux, Avaris), or to the ancient canal (see below) through which the water of the Nile passed to the "tongue of the Egyptian Sea." The water was potable (Ex. vii. 18), but so is that of the Lake of the Feiyoum to its own fishermen, though generally very brackish; and the canal must have received water from the Nile during every inundation, and then must have been sweet. During the height of the inundation, the sweet water would flow into the Red Sea. The passage of the canal was regulated by sluices, which excluded the waters of the Red Sea and sweetened by the water of the canal the salt lakes. Strabo (xvii. 2) says that they were thus rendered sweet, and in his time contained good fish and abounded with water fowl; the position of these lakes is more conveniently discussed in another part of this article, on the ancient geography of the head of the gulf. It must not be forgotten that the Pharaoh of Moses was of a dynasty residing at Tanis, and that the extended of the Red Sea, the tongue of the Egyptian Sea," stretched in ancient times into the borders of the land of Goshen, about 50 miles north of its present head, and half-way towards Tanis. There is abundant proof of the former cultivation of this country, which must have been effected by the canal from the Nile just mentioned, and by numerous canals and channels for irrigation, the ge'orim, so often mentioned with the ge'or.

There appears to be no difficulty in Isa. xix. 6 (comp. xi. 15), for if the Red Sea became closed at Suez or therewith, the siphon left on the beaches of the ge'or must have dried up and rotted. The ancient beaches in the tract here spoken of, which demonstrate successive elevations, are well known.a

4. (p. 383) Η πέλαγος θάλασσας. The origin of this appellation has been the subject of more speculation than even the obscure siphon; for it lies within the range of general scholarship. The theories advanced to account for it have been often puerile, and generally unworthy of acceptance. Their authors may be divided into two schools. The first have ascribed it to some natural phenomenon; such as the singularly red appearance of the mountains of the western coast, looking as if they were sprinkled with a chemically brown or brick dust (Brucé), or of which the redness was reflected in the waters of the sea (Tisselin, ii. 78-84); the red color of the water sometimes caused by the presence of zoophytes (Salt; Ehrenberg); the red canal of the sea; the red sea-weed; and the red storks that have been seen in great numbers, etc. Rend. (De Marr Rodol. Diss. Miscell. i. 59-117) argues that the epithet red was applied to this and the neighboring seas on account of their tropical heat; as indeed was said by Artemidorus (ap. Strabo, xvi. 4, 20), that the sea was called red because of the reflection of the sun. The second have endeavored to find an etymological derivation. Of these the earliest (European) writers proposed a derivation from Eluui, "red," by the Greeks translated literally. Among them were N. Fuller (Joum. cell. Soc. xiv. c. 201); before him, Seiliger, in his notes to Palaeis; voice Egyptian, ed. 1574; and still earlier General Rh. Comment, ad loc. 106; Bochart (Phaleg, i. 34) adopted this theory (see Rend. Diss. Miscell. i. 86, ed. 1706). The Greeks and Romans tell us that the sea received its name from a great king, Erythras, who reigned in the adjacent country, according to Strabo, xvi. 4, 4; Fuller (Journ. cell. Soc. xiv. c. 201); Pliny, H. N. vi. cap. 23, § 28; Agatharch., i. § 5; Philostor. iii. 15, and others; the stories that have come down to us appear to be distortions of the tran-

a The Mohammedan account of the exposure of Moses is curious. Moses, we read, was laid in the water (which is explained to be the Nile, though that river is not elsewhere so called), and the ark was carried by the current along a canal or small river (water) to a lake, at the further end of which was Pharaoh's pavilion (El Bellaw's Comment, on the Koran, xx. 30, p. 550, and Elzanzeh's-there's Comment, entitled the Koran.) While we place no dependence on Mo-

b Rend. (Diss. Miscell. i. 87, &c.) is pleasantly se-

vere on the story of king Erythras; but, with all his rare learning, he was ignorant of Arab history, which is here of the utmost value, and of the various proofs of a connection between the Egyptians, Romans, Greeks, 50 and the Phoenicians in language, race, and religion. Besides, Rend. had a theory of his own to support.
Pliny, Diod. 2685 101.) Plin. though the peninsula called "Ahmar," strengthened. It is the name of several places in the Red Sea. But when the ethnological side of the question is considered, the evidence is much strengthened. The South-Arabian kingdom was a Joharite (or Semeite) nation mixed with a Cushite. This admixture of races produced two results (as in the somewhat similar cases of Egypt, Assyria, etc.): a genius for massive architecture, and rare seafaring ability. The Southern-Arabians carried on all the commerce of Egypt, Palestine, and Arabia, with India, until shortly before our own era. It is unnecessary to insist on this Phoenician character, nor need we state the Salomonic call for the assistance of Himyar to build the Temple of Jerusalem. The Philistine, and early Cretan and Carian, colonists may have been connected with the South-Arabian race. If the Assyrian school would trace the Phoenicians to a Chaldaean or an Assyrian origin, it might be replied that the Cushites, whence came Nimrod, passed along the south coast of Arabia, and that Berosus (in Cory, 24 ed. p. 89) tells of an early Arab domination of Chaldea before the Assyrian dynasty, a story also preserved by the Arabian historians (El-Mes'oolee, Golden Meadows, MS.). The Red Sea, therefore, was probably the Sea of the Red Men. It adds a link to the curious chain of emigration of the Phoenicians from the Yemen to Syria, Tyre, and Sidon, the shores and islands of the Mediterranean, especially the African coasts of that sea, and to Syriam, the far-distant northerly ports of their commerce; as distant, and across oceans as terrible, as those reached by their Himyarite brethren in the Indian and Chinese Seas.

Ancient Limits — The most important change in the Red Sea has been the drying up of its northern extremity, the tongue of the Egyptian Sea. The land about the head of the gulf has risen, and that near the Mediterranean became depressed. The head of the gulf has consequently retired gradually since the Christian era. Thus the prophecy of Isaiah has been fulfilled: "And the Lord shall utterly destroy the tongue of the Egyptian Sea" (xi. 15): "the waters shall fall from the sea" (xix. 5): the tongue of the Red Sea has dried up for a distance of at least 50 miles from its ancient head, and a cultivated and well-peopled province has been changed into a desolate wilderness. An ancient canal conveyed the waters of the Nile to the Red Sea, flowing through the Wadi-Tumaydayl and irrigating with its system of water-channels a large extent of country; it also provided a means for conveying all the commerce of the Red Sea, once so important, by water to the Nile, avoiding the risks of the desert journey, and securing water-carryage from the Red Sea to the Mediterranean. The drying up of the head of the gulf appears to have been one of the chief causes of the neglect and ruin of this canal.

The country, for the distance above indicated, is now a desert of gravelly sand, with wide patches about the old sea-bottom, of rank marsh land, now called the "Bitter Lakes" (not those of Strabo). At the northern extremity of this salt waste is a small lake sometimes called the Lake of Heroopolis (the city after which the Gulf of Suez was called the Heroopolite Gulf): the lake is now Birket el-Tumayl, "the lake of the Crocodile," and is supposed to mark the ancient head of the gulf. The canal that connected this with the Nile was of Pharaonic origin. It was anciently known as the "Fossa Regum," and the "canal of Hero" Pliny, Dioscorides, and Strabo, state that (up to their time) it reached only to the bitter springs (which appear to be not the present bitter lakes, but lakes west of Hero polis), the extension being abandoned on account of the supposed greater height of the waters of the Red Sea. According to Herod, (ii. cap. 158) it left the Nile (the Tanitie branch, now the canal of El-Mo'ez) at Babastis (Pi-beseth), and a canal exists at this day in this neighborhood, which appears to be the ancient channel. The canal was four days' voyage in length, and sufficiently broad for two triremes to sail abreast (Herod. ii. 135) or 100 cubits, Strab. xvi. 1, § 26; and 100 feet, Pliny, vi. cap. 29, § 33). The time at which the canal was extended, after the drying up of the head of the gulf, to the present head is uncertain, but it must have been late, and probably since the Mohammedan conquest. Traces of the ancient channel throughout its entire length to the vicinity of Babastis, exist at intervals in the present day (Deser. de l'Egypte, E. M. xi. 32, 33, and v. 135-158, 8vo ed.). The Amnis Trojanus (Tharaoby 1981, 8vo ed. iv. 5, § 54), now the canal of Cairo, was probably of Pharaonic origin; it was at any rate repaired by the emperor Adrian; and it joined the ancient canal of the Red Sea between Babastis and Heroopolis. At the Arab conquest of Egypt, this was found to be closed, and was reopened by 'Anr by command of 'Omar, after whom it was called the "canal of the Prince of the Faithful." Country-boats sailed down it (and passed into the Red Sea to 'Yembo' — see "Shems ed-Din" in Deser. de l'Egypte, 8vo ed. xi. 359), and the water of the Nile ran into the sea at El-Kulun; but the former commerce of Egypt was not in any degree restored; the canal was opened with the intention of securing supplies of grain from Egypt in case of famine in Arabia; for Arabia continued to be in close intercourse with the newly-important holy cities of Arabia, to provide for the wants of the pilgrims, was its principal use.

a If we concede the derivation, it cannot be held that the Greeks mistranslated the name of Himyar. (See Reland, Diss. Miscell. i. 10.) It is worthy of mention that the Arabs often call themselves "the red men," as distinguished from the black, from the yellow or Turanian races; though they call themselves "the black," as distinguished from the more northern races, whom they term "the red;" as this epitaph is used by them, when thus applied, as meaning both "the red" and "the white."

b Commenced by Sessastris (Aristot. Meteor. i. 14; Strab. i. xviii.; Plin. Hist. Nat. vi. 29; Herod. ii. 125; Dion. i. 33) or by Necho II.; most probably the former; continued by Darius Hyrtanias, and Ptol. Philadelphus. See Encyc. Brit. art "Egypt."
In a. n. 105, El-Mansur ordered it to be filled up (the Khefter, Deyr of the Canal), in order to cut off supplies to the Shiyaa'ee heretics in El-Med-ine-veh. Now it does not flow many miles beyond Cairo, but its channel is easily traceable.

The land north of the ancient head of the gulf is a plain of heavy sand, merging into marsh-land near the Mediterranean coast, and extending to 'Sulaym. We learn from El-Makremee that a track once led across this plain but is now (formerly well cultivated with saffron, safflower, and sugar-cane, and peopled throughout, from the frontier-town of El-'Aresh to El-Ahbil in Wadi-Tab; see Exodus, the, Map; The Khefter, s. v. Jiftir; comp. Maraisel, loc.) Doubtless the drying up of the gulf with its canal in the south, and the depression of the land in the north, have converted this once (if we may believe the tradition, though we cannot extend this fertility as far as El-'Aresh) notoriously fertile tract into a proceedly sandy and parched desert. This region, including Wadi-Tab, was probably the frontier land occupied in part by the Israeites, and open to the incursions of the wild tribes of the Arabian desert; and the geographer, as we have given good reason for believing in this connection, was apparently the ancient head of the gulf or the canal of the Red Sea, with its gourier water-channels, on which Goshen and much of the plain north of it depended for their fertility.

Physical Description. — In extreme length, the Red Sea stretches from the Straits of Babi el-Mouneh (or rather Babi el-Mendeh) in lat. 120 40'S, to the modern head of the Gulf of Suez, lat. 290 N. Its greatest width may be stated roughly at about 200 geographical miles; this is about lat. 160 50'S, but the navigable channel is here really narrower than in some other portions, groups of islands and rocks stretching out into the sea, between 30 and 40 miles from the Arabian coast, and 50 miles from the African coast. From shore to shore, its narrowest part is at Risa Bkus, lat. 18; on the African coast, at Risa Berenice, opposite, a little north of Yemen, the port of El-Medineh and thence northwards to Risa Mousamaal, i.e. exclusive of the Gulf of Suez and the 'Akabeh, the sea maintains about the same average width of 100 geographical miles. Southwards from Risa Bkus, it opens out in a broad reach; contracts again to nearly the above narrowness at El-Makremeen (incorrectly Jeddah), lat. 21° 30', the port of Ad-Dib; and opens to its extreme width south of the last-named port.

At Risa Mohammed, the Red Sea is split by the gigantic peninsula of Sinai into two gulfs: the westernmost, or Gulf of Suez, is now about 130 geographical miles in length, with an average width of about 18, though it contracts to less than 10 miles on the undermost, or Gulf of El-Ahbil, is only about 90 miles long, from the Straits of Tiran, to the 'Ahab (El-Atheh), and of proportionate narrowness. The navigation of the Red Sea and Gulf of Suez, near the shores, is very difficult from the abundance of shoals, coral reefs, rocks, and small islands which render the channel intricate, and cause strong currents, often of unknown force and direction; but in mid-channel, exclusive of the Gulf of Suez, there is generally a width of 100 miles clear, except the Deadlah reef (Wad-el-Dahab, ii. 300), i.e. the bottom in deep soundings is in most places sand and stones, from Suez as far as Jeddah and thence to the Straits it is commonly mud. The deepest sounding in the excellent Admiralty chart is 1654 fathoms, in lat. 220 30'.

Journeying southwards from Suez, on our left is the peninsula of Sinai (Sinai): on the right, is the desert coast of Egypt, of limestone formation like the greater part of the Nile valley in Egypt, the cliffs on the sea-margin stretching landwards in a great rocky plateau, while more inland a chain of volcanic mountains (the Tih, 28; and running south) rear their lofty peaks at intervals above the limestone, generally about 15 miles distant. Of the most important is Gebel Ghard, 6000 feet high; and as the Straits of Judah are passed, the peaks of the primitive range attain a height of about 4,500 to 6,200 ft. until the "Elba" group rises in a huge mass about lat. 220. Further inland is the Gebel el-Dubbak, the "porphyry mountain" of Ptolemy (iv. 5, § 27; M. Claudianus, see Müller, Geogr. Min. Atlas viii.), 6000 ft. high, about 27 miles from the coast, where the porphyry quarries formerly supplied Rome, and where there are some remains of the time of Trajan (Wilkinson's Modern Egypt and Thebes, ii. 583) and besides these, along this desert southwards are "quarries of christian granite," opera- times, Brecia Verde, slates, and marbleous, etc., and other schists (ib. 382). Gebel-Selt-zeit, the "mountain of oil," close to the sea, abounds in petroleum (ib. 385). This coast is especially interesting in a Biblical point of view, for here were some of the earliest monasteries of the Eastern Church, and in those secluded and barren mountains lived very early Christian hermits. The convent of St. Anthony of the "Thebais," "Deir Mir Antoonccoos," and that of St. Paul, "Deir Mir Belims," are of great renown, and were once important. They are now, like all Eastern monasteries, decayed; but that of St. Anthony gives, from its monks, the Patriarch of the Coptic church, formerly chosen from the Nitrian monasteries (ib. 382); south of the "Elba" chain, the country gradually sinks to a plain, until it rises to the highland of Gebel, lat. 15°, and thence to the Straits a chain of low mountains. The greater part of the African coast of the Red Sea is sterile, sandy, and thinly peopled; first beyond Suez by Bedawee chiefly of the Maizee tribe. South of the Kussev road, are the "Abbech;" and beyond, the Biksaree, the southern branch of which are called by Arab writers "Beja," whose customs, language, and ethnology, demand a careful investigation, which would undoubtedly be repaid by curious results (see El-Makremee's Khaliq, Deyser, of the Beja, and Deyser, of the Desert of Elgheah; Quatrehomme's lettres on these subjects, in his Memoires Hist. et G. sur l'Egypte, pp. 134, 162; and The Géog. of the Earth and of M. de. m. ed. p. 109); and then, coast-tribes of Alyssiaia.

The Gulf of El-'Ahib (i.e. "of the Mountain-road") is the termination of the long valley of the Gulf or 'Ahabh that runs northwards to the Dead Sea. It is itself a narrow valley; the sides are lofty and precipitous mountains, of entire barrenness; the bottom is a river-like sea, running nearly straight for its whole length of about 90 miles. The northern winds rush down this gorge with uncommon fury, and render its navigation extremely perilous, causing at the same time strong counter-currents; while most of the few anchorages are open to the southerly
oars. It "has the appearance of a narrow, deep ravine, extending nearly a hundred miles, a straight, undeflected, and the circumjacent hills rise in some places two thousand feet perpendicularly from the shore" (Wellsted, ii. 108). The western shore is the peninsula of Sinai. The Arabian chain of mountains, the continuation of the southern spurs of the Lebanon, skirt the eastern coast, and rise to about 3,500 ft., while Gebel Teyb-it-Aleq near the Straits is 6,000 ft. There is no point along the coast of Akeb which bears the name of its fertile valleys and on their sides. - The coast-line itself, or Tihameh, "north of Yemen", is of moderate elevation, varying from 50 to 100 feet, with no beach. To the southward [to Judibba] it is more sandy and less elevated; the inlets and barrows of the former tract may be styled coves; in the latter they are lagoons" (Wellsted, ii. 244). The coral of the Red Sea is remarkably abundant, and beautifully colored and variegated. It is often red, but the more common kind is white; and of hewn blocks of this many of the Arabian towns are built.

The earliest navigation of the Red Sea (passing by the pre-historical Phoenicians) is mentioned by Herodotus. "Somestris (Kameses II.) was the first who, passing the Arabian Gulf in his vessels, fleet of two hundred and fifty ships, entered the Red Sea by the straits of Akeb, and landed in the region inhabited by the coast bordering the Erythraean Sea: proceeding still further, he came to a sea which, from the great number of its shoals, was not navigable;" and after another war against Ethiopia he set up a stela on the promontory of Dira, near the straits of the Arabian Gulf. Three centuries later Solomon's navy was built "in Ezion-geber which is beside the sea, an hundred fathoms in breadth, and two hundred by a hundred fathom" (2 Chron. i. 7). [See Eazon-geber: Elath.] Solomon's navy was evidently constructed by Phoenician workmen of Hiram, for he "sent in the navy his servants, shipmen that had knowledge of the sea, with the servants of Solo mon." This was the navy that sailed to Ophir. We may conclude that it was necessary to transport wood as well as men to build and man these ships on the shores of the Gulf of the Akeb, which from their natural formation cannot be supposed to have much altered, and which were besides part of the wilderness of the wandering; and the Edomites were pastoral Arabs, unlike the seafaring Himyarites. Jehoshaphat also "made ships of Tarshish to go to Ophir for gold; but they went not, for the ships were broken at Ezion-geber" (1 K. xxii. 41). The scene of this wreck has been supposed to be Edela-Dhahok, where is a reef of rocks, often called a "giant's backbone" (= Ezion-geber) (Wellsted, ii. 153), and this may strengthen an identification with that place. These ships of Jehoshaphat were manned by "his servants," who from their ignorance of the sea may have caused the wreck. Pharaoh-Necho constructed a number of ships in the Arabian gulf, and the remains of his works existed in the time of Herodotus (ii. 150), which also tells us that these ships were manned by Phoenician sailors.

The fashion of the ancient ships of the Red Sea,
or of the Phoenician ships of Solomon, is unknown. From Pliny we learn that the ships were of papyrus and like the boats of the Nile; and this statement was no doubt in some measure correct. But the poating craft must have been very different from those employed in the Indian trade. More precise and curious is El-Makrizee's description, written in the first half of the 13th century, of the ships that sailed from Eythibah on the Egyptian coast to Juddah. "Their jellebs" (F. Lols, op. Quatre- mors, ii. 164, calls them s-gelves"), which carry the pilgrims on the coast, have not a mail used in them, but their planks are sewed together with fibre, which is taken from the cocoon-tree, and they caulk them with the fibres of the wood of the date-palm; then they 'pay' them with butter, or the oil of the palm Christi, or with the fat of the kirsh (souls carcharies; Forskii, Descri. Animalium, p. viii. No. 19). . . .

The sails of these jellebs are of mats made of the djan-palm (the Khetet, "Desert of Eythibah"). One of the sea-going ships of the Arabs is shown in the view of El-Basrah, from a sketch by Colonel Chesney. (From Lane's '1001 Nights'.) The crews of the latter, when not exceptionally Phoenicians, as were Solomon’s and Pharaoh Necho’s, were without doubt generally Arabs, rather than Egyptians—those Himyarite Arabs whose ships carried all the wealth of the East either to the Red Sea or the Persian Gulf. The people of ‘Omam, the southeast province of Arabia, were among the foremost of these navigators (El-Mesudee’s Golden Monarchs, MS., and The Accounts of Two Mohammedan Travellers of the Ninth Century). It was customary, to avoid probably the dangers and delays of the narrow seas, for the ships engaged in the Indian tran. to transship their cargoes at the straits of Buh el-Mandeb to Egyptian and other vessels of the Red Sea (Agath. § 163, p. 191; anun. Periplus. § 26, p. 277, ed. Muiller). The fleets appear to have sailed about the antumnal equinox, and returned in December or the middle of January (Pliny, ii. N. vii. cap. xiii. § 26; comp. Periplus, passim).

Jerome says that the navigation was extremely tedious. At the present day the voyages are periodical, and guided by the seasons; but the old skill of the seamen has nearly departed, and they are extremely timid, and rarely venture far from the coast.

The Red Sea, as it possessed for many centuries the most important sea trade of the East, contained ports of celebrity. Of these, Ethlath and Izion-geler alone appear to have been mentioned in the Bible. The Hero-polite Gulf is of the chief interest; it was near to Godien; it was the scene of the passage of the Red Sea; and it was the "tongue of the Egyptian Sea." It was also the sea of the Egyptian trade in this sea and to the Indian Ocean. Hero-polite is doubtless the same as Hero, and its site has been probably identified with the modern Abu-Keshaph, at the head of the old gulf. By the consent of the classics, it stood on or near the head of the gulf, and was 68 miles (according to the itinerary of Antoninus) from Clyma, by the Arabs called El-Kulan, near the modern Suez, which is close to the present head. Suez is a poor town, and has only an unsafe anchorage, with very shoal water. On the shore of the Hero-polite gulf was also Arsinop, founded by Ptolemy Philadelphia; its site has not been settled. Berosin, founded by the same, on the southern frontier of Egypt, rose to importance under the Ptolemies and the Romans; it is now of no note. On the western coast was also the anchorage of Mus Horons, a little north of the modern town El-Kium, which now forms the point of communication with the old route to Cape. On the Arabian coast the principal ports are Mu‘ayyeb, Yemboi (the port of El-Mehrech), Juddah (the port of Mikheib), and Mukhia, by us commonly written Meba. The Red Sea in most parts affords anchorage for country-vessels well acquainted with its intricacies, and able to creep along the coast among the reefs and islands that girt the shore. Numerous creeks on the Arabian shore (called "shuroom," sing. "sharm") indent the land. Of these the anchorage called El-Kharm, at the southern extremity of the peninsula of Sinai, is much frequented.

The commerce of the Red Sea was, in very an-
cient times, unquestionably great. The earliest records tell of the ships of the Egyptians, the Phænicians, and the Arabs. Although the ports of the Persian gulf received a part of the Indian traffic, and the Himyarite maritime cities in the south of Arabia supplied the kingdom of Saba, the trade with Egypt was, we must believe, the most important. At the beginning of the Christian era, traffic found its way to the head of the Heroëpolitic gulf seems proved by the absence of any important Phœnecian remains further south on the Egyptian coast. But the shedding of the head of the gulf rendered the navigation, always dangerous, more difficult; it destroyed the former anchorages, and made it necessary to carry merchandise across the desert to the Nile. This change appears to have been one of the main causes of the decay of the commerce of Egypt. We have seen that the long-voyaging ships shifted their cargoes to Red Sea craft at the Straits; and Posey Philadelphus, after founding Arsinoë and endeavoring to re-open the old canal of the Red Sea, abandoned the upper route and established the southern road from his new city Berenice, on the south coast of Arabia, to Coptos on the Nile. Strabo tells us that this was done to avoid the dangers encountered in navigating the sea (xvii. 1, § 45). Though the stream of commerce was diverted, sufficient seems to have remained to keep in existence the former ports, though they have long since utterly disappeared. Under the Ptolemies and the Romans the commerce of the Red Sea varied greatly, influenced by the decaying state of Egypt and the route to Palmyra (until the fall of the latter). But even its best state at this time cannot have been such as to make us believe that the 120 ships sailing from Myos Hormos, mentioned by Strabo (ii. 5, § 12), was other than an annual convoy, The wars of Herodotus and Khosroes affected the trade of Egypt as they influenced that of the Persian gulf. Egypt had fallen low at the time of the Arab occupation, and yet it is curious to note that Alexandria even then retained the shadow of its former glory. Since the time of Mohammed the Red Sea trade has been insignificant.

* Recent explorations. In 1857 Th. v. Heuglin made a scientific exploration of the Red Sea, the results of which were published in Petermann's Mitttheilungen for 1856. In this work Heuglin's travels along the western coast of the Sea, from Cairo to Quseir, from Quseir to Sūakin, from Sūakin to Massaua, thence along the Sūmer coast and in the adjacent Archipelago of Dhibbî, and thence down the Dhibbî coast to Bahâl-Mandeb. This journal is accompanied with an excellent map, the most minute and accurate yet published, of the Red Sea and the principal harbors on its western side. The first Quseir in lat. 26° 7' N. 19° 8', and Massaua, lat. 15° 32'. Quseir was much used by the ancient Egyptians in their commerce with Arabia, serving as a port to the Thelen capital, as Suez now answers to Cairo. Mention is made of this route of traffic in ancient monuments and papyri. (See in Chabas, Voyage d'un Egyptien, p. 62.) Quseir is to-day a city of 3,000 inhabitants, cleanly and well built, with a good mole and harbor. It is a port of entry, and sometimes maintains a lively traffic with pilgrims on their way to and from Mecca. Fishing and handcrafts is its principal support. The pearl fisheries of the Red Sea are less profitable than in former times. Quseir, the capital of a province of the same name, is a city of 8,000 inhabitants, with a small but well-sheltered harbor. Musawat, situated on an island in the Gulf of Hurûkú, is an important avenue of trade for Abyssinia. Its climate is hot, and the inhabitants sometimes suffer for want of water—their supply being collected in cisterns, in the rainy season. The highest mountains along the western coast range from 4,000 to 7,000 feet English, and the coast line is generally abrupt, though indented with numerous little bays. The opening of the Suez canal will more than restore the Red Sea to its ancient importance in the commerce of the world.

J. P. T.

RED SEA, PASSAGE OF. The passage of the Red Sea was the crisis of the Exodus. It was the miracle by which the Israelites left Egypt and were delivered from the oppressor. Probably on this account St. Paul takes it as a type of Christian baptism. All the particulars relating to this event, and especially those which show its miraculous character, require careful examination. The points that arise are the place of the passage, the narrative, and the importance of the event in Biblical history.

1. It is usual to suppose that the most northern place at which the Red Sea could have been crossed is the present head of the Gulf of Suez. This supposition depends upon the erroneous idea that in the time of Moses the gulf did not extend further to the northward than at present. An examination of the country north of Suez has shown, however, that the sea has receded many miles, and there can be no doubt that this change has taken place within the historical period, doubtless in fulfillment of the prophecy of Isaiah (xi. 15, xix. 5; comp. Zech. x. 11). The old bed is indicated by the Birzeit-Tinsisir, or Lake of the Crocodile, and the more southern Bitter Lakes, the northernmost part of the former probably corresponding to the head of the Gulf at the time of the Exodus. In recent centuries, it is probable that the gulf did not extend further north, but that it was deeper in its northernmost part.

It is necessary to endeavor to ascertain the route of the Israelites before we can attempt to discover where they crossed the sea. The point from which they started was Rameses, a place certainly in the Land of Goshen, which we identify with the Wady-t-Tumait. (RAMESSES: GOSHEN.) After the mention that the people journeyed from Rameses to Succoth, and before that of their departure from Succoth, a passage occurs which appears to show the first direction of the journey, and not a change in the route. This we may reason only infer from its tenor, and from its being followed by the statement that Joseph and his sons were taken by Moses with him, which must refer to the commencement of the journey. "And it came to pass, when Pharaoh had let the people go, that God led them not by [by] the way of the land of the Philistines, although that [was] near: for God said, Let periladventure the people repent when they see war, and they return to Egypt: but God caused the people to turn
[by] the way of the wilderness of the Red Sea," (Ex. xiii. 17, 18). It will be seen by reference to the map already given [vol. i. p. 794] that, from the **Wadi-t-Telekah**, whether from its eastern end or from any other part, the route to Palestine by way of Gaza through the Philistine territory is near at hand. In the Roman time the route to Gaza from Memphis and Helipolis passed the western end of the **Wadi-t-Telekah**, as may be seen by the itinera of Antoninus (Parzex, Zac. Lec. Auct., **Egyptiaca**, map vi.), and the chief modern route from Cairo to Syria passes along the **Wadi-t-Telekah** and leads to Gaza (Wilkinson, Handbook, new ed. p. 290).

At the end of the second day's journey the camping-place was at Etham "in the edge of the wilderness." (Ex. xiii. 29, Num. xxxiii. 6.) Here the **Wadi-t-Telekah** was probably left, as it is cultivable and terminates in the desert. After leaving this place the direction seems to have changed. The first passage relating to the journey, after the mention of the encamping at Etham, is this, stating a command given to Moses: "Speak unto the children of Israel, that they turn [or "return"] and encamp [or "that they encamp again," Heb. הָעֵקִבָּה] before Pi-hahiroth, between Migdol and the sea, over against Railephamon." (Ex. xiv. 2.) This explanation is added: "And Pharaoh will say of the children of Israel, They are [or "are about"] entangled in the land, the wilderness hath shut them in." (3.) The rendering of the A. V., "that they turn and encamp," seems to be the most probable of those we have given: "return" is the closer translation, but appears to be difficult to reconcile with the narrative of the route; for the more likely inference is that the direction was changed, not that the people returned: the third rendering does not appear probable, as it does not explain the entanglement. The geography of the country does not assist us in conjecturing the direction of the last part of the journey. If we knew that the highest part of the gulf at the time of the Exodus extended to the west, it would be probable that, if the Israelites turned, they took a northerly direction, as then the sea would oppose an obstacle to their further progress. If, however, they left the **Wadi-t-Telekah** at Etham "in the edge of the wilderness," they could not have turned far to the northward, unless they had previously turned somewhat to the south. It must be borne in mind that Pharaoh's object was to cut off the retreat of the Israelites; he therefore probably encamped between them and the head of the sea.

At the end of the third day's march, for each encamping-place seems to mark the close of a day's journey, the Israelites encamped by the sea. The place of this last encampment, and that of the passage, on the supposition that our views as to the most probable route are correct, would not be very far from the Persepolitan monument. [See map, vol. i. p. 794.] The monument is about thirty miles to the northward of the present head of the Gulf of Suez, and not far south of the position of Memphis supposed; the head of the sea would not have been at the time of the Exodus. It is here neces-

To mention the arguments for and against the common opinion that the Israelites passed near the present head of the gulf. Local tradition is in its favor, but it must be remembered that local tradition in Egypt and the neighboring countries, judging from the evidence of history, is of very little value. The Muslims suppose Memphis to have been the place to which the Pharaoh of the Exodus retired before the event occurred. From opposite the Memphis a broad valley leads to the Red Sea. It is in part called the **Wadi-t-Telekah,** or "Valley of the Wanderings." From it the traveller reaches the sea beneath the lofty Gebel-t-Telekah, a ridge which rises on the north and shuts off all escape in that direction, excepting by a narrow way along the seashore, which Pharaoh might have occupied. The sea here is broad and deep, as the narrative is generally held to imply. All the local features seem suited for a great event; but it may well be asked whether there is any reason to expect that suitable-ness that human nature seeks for and modern imagination takes for granted, since it would have been useless for the objects for which the miracle appears to have been intended. The desert-way to Memphis is equally poetic, but how is it possible to recognize in it a route which seems to have had two days' journey of cultivation, the wilderness being reached only at the end of the second day's march? The supposition that the Israelites took an upper route, now that of the Mekek caravan, along the desert to the north of the elevated tract between Cairo and Suez, must be considered, although it is less probable than that just noticed, and offers the same difficulties. It is, however, possible to suppose that the Israelites crossed the sea near Suez without holding to the traditional idea that they attained it by the **Wadi-t-Telekah.** If they went through the **Wadi-t-Telekah** they might have turned southward from its eastern end, and so reached the neighborhood of Suez; but this would make the third day's journey more than thirty miles at the least, which, if we bear in mind the composition of the Israelite caravan, seems quite incredible. We therefore think that the only opinion warranted by the narrative is that already stated, which supposes the passage of the sea to have taken place near the northermost part of its ancient extension. The conjecture that the Israelites advanced to the north, they crossed a shallow part of the Mediterranean, where Pharaoh and his army were lost in the quicksands, and afterwards turned southwards towards Sinai, is so repugnant to the Scripture narrative as to amount to a denial of the occurrence of the event, and indeed is scarcely worth mentioning.

The last camping-place was before Pi-hahiroth. It appears that Migdol was before Pi-hahiroth, and, on the other hand, Railephamon and the sea. These neighboring places have not been identified, and the name of Pi-hahiroth itself, as we believe, rightly supposed to designate a red rock, and to be still preserved in the Arabic name **Glauyngeteb61** (the bed of reds), is now found in the neighborhood of the two supposed sites of the passage, and therefore cannot be said to be identified, besides that we must not expect a natural locality still to have this significance. It should rather be **Gebel-t-Atbakah,** the other form deriving from general usage **Et-Talkah** and **Atbakah** in the mouth of an Arab are widely different.
RED SEA. PASSAGE OF

Even the name Pi-hahiroth, since it describes a natural locality, probably does not indicate a town or other inhabited place name of the kind, and this seems almost certain from the circumstance that it is unlikely that there would have been more than two inhabited places, even if they were only forts, in this region. The other names do not describe natural localities. The nearness of Pi-hahiroth to the sea is therefore the only sure indication of its position, and, if we are right in our supposition as to the place of the passage, our uncertainty as to the exact extent of the sea at the time is an additional difficulty. \[EXODUS, THE; PI-HAHIROTH\]

From Pi-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are that the sea was divided by an east wind, whence we may reasonably infer that it was crossed from west to east, and that the whole Egyptian army perished, which shows that it must have been some miles broad. Pharaoh took at least six hundred chariots, which, three abreast, would have occupied about half a mile, and the rest of the army cannot be supposed to have taken up less than several times that space. Even if in a broad formation, some miles would have been required. It is more difficult to calculate the space taken up by the Israelite multitude, but probably it was even greater. On the whole we may reasonably suppose about twelve miles as the smallest breadth of the sea.

2. A careful examination of the narrative of the passage of the Red Sea is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. It might be conjectured, from one part of the narrative (Ex. xiv. 1-4), that he determined to pursue them when he knew that they had encamped before Pi-hahiroth, did not what follows this imply that he set out soon after they had gone, and also indicate that the place in question refers to the pursuit through the sea, not to that from the city whence he started (5-10). This city was most probably Zoon, and could scarcely have been much nearer to Pi-hahiroth and the distance is therefore too great to have been twice traversed, first by those who told Pharaoh, then by Pharaoh's army, within a few hours. The strength of Pharaoh's army is not further specified than by the statement that "he took six hundred chosen chariots, and [or even] all the chariots of Egypt, and captains over every one of them" (7). The war-chariots of the Egyptians held each but two men, an archer and a charioteer.

The events may be remembered by the word לָלַי (lāliy), rendered in the A. V. "captains." Throughout the narrative the chariots and horsemen of Pharaoh are mentioned, and "the horse and his rider," xv. 21, are spoken of in Miriam's song, but we can scarcely be sure that there was in Pharaoh's army a body of horsemen as well as of men in chariots, as in ancient Egyptian the chariot-force is always called HP'é or HÉRTA, "the horse," and these expressions may therefore be respectively ple-

* The LXX. has "south," instead of "east." The Heb. נֵפָא (nēpa‘), lit. "in front," may, however, indicate the whole distance between the two extreme points of sunrise, those of the two solutions, and hence it is not limited to absolute east, agreeably with the use of the

Arabs in every case like the narrative under consideration.

b It has been calculated, that if Napoleon I. had advanced by one road into Belgium, in the Waterloo campaign, his column would have been sixty miles in length.
The narrative distinctly states that a path was made through the sea, and that the waters were a wall on either hand. The term "wall" does not appear to oblige us to suppose, as many have done, that the sea stood up like a cliff on either side, but should rather be considered to mean a barrier, as the former idea implies a seemingly needless addition to the miracle, while the latter seems to be not discordant with the language of the narrative. It was during the night that the Israelites crossed, and the Egyptians followed. In the morning watch, the last third or fourth of the night, or the period before sunrise, Pharaoh's army was in full pursuit in the divided sea, and was there miraculously troubled, so that the Egyptians sought to flee (25-25). Then was Moses commanded again to stretch out his hand, and the sea returned to its strength, and overwhelmed the Egyptians, of whom not one remained alive (25-28). The statement is so explicit that there could be no reasonable doubt that Pharaoh himself, the great offender, was at last made an example, and perished with his army, did it not seem to be distinctly stated in Psalm xxxviii. that he was included in the destruction (15). The sea cast up the dead Egyptians, whose bodies the Israelites saw upon the shore.

In a later passage some particulars are mentioned which are not distinctly stated in the narrative of Exodus. The place is indeed a poetical one, but its meaning is clear, and we learn from it that at the time of the passage of the sea there was a storm of rain with thunder and lightning, perhaps accompanied by an earthquake (Ps. lxxiii. 13-20). To this St. Paul may allude where he says that the fathers "were all baptized unto Moses in the cloud and in the sea" (1 Cor. x. 2); for the idea of baptism seems to involve either immersion or sprinkling, and the latter could have here occurred: the reference is evidently to the pillar of the cloud; it would, however, be impious to attempt an explanation of what is manifestly miraculous. These additional particulars may illustrate the troubling of the Egyptians, for their chariots may have been thus overthrown.

Here, at the end of their long oppression, delivered finally from the Egyptians, the Israelites glorified God. In what words they sang his praise we learn from the Song of Moses, which, in its vigorous brevity, represents the events of that memorable night, scarcely of less moment than the night of the Passover (Ex. xv. 1-18: ver. 19 is probably a kind of comment, not part of the song). Moses seems to have sung this song with the men, Miriam with the women also singing and dancing, or perhaps there were two choirs (20, 21).

Such a picture does not occur in the history of the nation. Neither the triumphal Song of Deborah, nor the rejoicing when the Temple was recovered from the Syrians, celebrated so great a deliverance, or was joined in by the whole people. In leaving Goshen, Israel became a nation; after crossing the sea, it was free. There is evidently great significance, as we have suggested, in St. Paul's use of this miracle as a type of baptism; for, to make the analogy complete, it must have been the beginning of a new period of the life of the Israelites.

3. The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O. T. written in later times. In them it is the chief fact of Jewish history. Not only the event itself, but the observation of the sea, the call of Moses, the feud of Joseph, the rule of Joseph, not the first Passover, not the conquest of Canaan, are referred to in such a manner as this great deliverance. In the Book of Job it is mentioned with the acts of creation (xxvi. 10-13). In the Psalms it is related as foremost among the deeds that God had wrought for his people. The prophet Isaiah recalls it as the great manifestation of God's interference for Israel, and an encouragement for the descendants of those who witnessed that great sight. There are events so striking that they are remembered in the life of a nation, and that, like great heights, increasing distance only gives them more majesty. So no doubt was this remembered long after those were dead who saw the sea return to its strength and the warriors of Pharaoh dead upon the shore.

It may be inquired how it is that there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should be assigned. The date of the Exodus according to different chroniclers varies more than three hundred years: the dates of the Egyptian dynasties ruling during this period of three hundred years vary full one hundred. The period to which the Exodus may be assigned therefore virtually corresponds to four hundred years of Egyptian history. If the lowest date of the beginning of the XVIIIth dynasty be taken and the highest date of the Exodus, both which we consider the most probable of those which have been conjectured in the two cases, the Israelites must have left Egypt in a period of which monuments or other records are almost wanting. Of the XVIIIth and subsequent dynasties we have as yet no continuous history, and rarely records of events which occurred in a succession of years. We know much of many reigns, and of some we can be almost sure that they could not correspond to that of Pharaoh of the Exodus. We can in no case expect a distinct Egyptian monumental record of so great a calamity, known from the Song of Moses, which, in its vigorous brevity, represents the events of that memorable night, scarcely of less moment than the night of the Passover (Ex. xv. 1-18: ver. 19 is probably a kind of comment, not part of the song). Moses seems to have sung this song with the men, Miriam with the women also singing and dancing, or perhaps there were two choirs (20, 21).

Such a picture does not occur in the history of the nation. Neither the triumphal Song of Deborah, nor the rejoicing when the Temple was recovered from the Syrians, celebrated so great a deliverance, or was joined in by the whole people. In leaving Goshen, Israel became a nation; after crossing the sea, it was free. There is evidently great significance, as we have suggested, in St. Paul's use of this miracle as a type of baptism; for, to make the analogy complete, it must have been the beginning of a new period of the life of the Israelites.

4 While this article is going through the press, M. Chabot has published a curious paper, in which he conjectures that certain laborers employed by the Pharaohs of the XIXth and XXth dynasties in the quarries and elsewhere were the Hebrews. Their names reads APRAH or APRAH, which might correspond to "Hebrews" ; but his finding them still in Egypt under Amenmes IV., about B.C. 1200, certainly after the latest date of the Exodus, is a fatal objection to an identification with the Israelites.
the right time, and deep at the right time? This attempted explanation would never have been put forward were it not that the passage is so well attested that it would be uncriticled to doubt it was recorded on mere human authority. Since the fact is undeniable, an attempt is made to explain it away. Thus the school that pretends to the severest criticism is compelled to deviate from its usual course; and when we see that in this case it must do so, we may well doubt its abilities in other cases, which, being differently stated, are more easily attacked.

R. S. P.

The opening of the Suez Canal may contribute to the solution of the problem of the route of the Israelites from Rameses to the Red Sea. The sweet-water canal, which flows from the Nile eastward through the Suez-Timahet, has already restored to a region of the ancient Cossen, a degree of fertility which suggests that this may truly have been "the best of the land" in the time of the Israelites, when, under the ancient system of irrigation, it was watered with "streams, rivers, ponds, and pools," Ex. vii. 19. This canal runs from the Nile to Ismaïla, a new town on Lake Timnah, and thence southwest to Suez. It is twenty-six feet wide with an average depth of four feet, and by means of lateral sluices is made to irrigate a large area. So valuable is it for this purpose, that the Egyptian government purchased it of the Canal Company at a cost of four hundred thousand pounds, expecting to reimburse it by the enhanced value of lands.

Unruh (Der Zug der Israeliten aus Agypten nach Canaan) places the Land of Goshen in the northeastern portion of the Delta, with a sea-coast on the Mediterranean from Tanis to Avaris, and Rameses in the vicinity of the latter city. He first carries the Israelites around the head of the gulf, which then extended as a reedy marsh far above the modern Suez; then leads them down upon the east side of the gulf to a point opposite Suez, where he finds a small bay or arm of the gulf projecting into the Arabian peninsula,—a little above Agmon Maoz,—and thus he makes the scene of the crossing narrated in Exodus. At the opposite extreme, Schleiden (Die Landung von Suez) places Rameses in the line of the ancient canal, and near the Bitter Lakes, but first turns the course of the Israelites northward toward the Mediterranean, as the direct route to Palestine. They are overtaken on the coast of the Mediterranean, in a marshy region, lying east of Avaris upon the borders of the wilderness: having here escaped from Pharaoh, they turn southward and enter the desert of Sinai, keeping always to the east of the Gulf of Suez. But these theories equally violate the requirements of the narrative of the Exodus in respect of the successive days' marches of the Israelites. The distance from Rameses to the head of the gulf was about thirty miles, and so great a caravans as the Israelites with their cattle and attendants must have required three days for such a march. The second day would bring them to about the line between the head of the gulf and the Bitter Lakes on the edge of the great eastern desert. From this "Etham" they turned backward, and went down the western side of the gulf to the vicinity of Suez,—and at this point, probably, the crossing took place. "The miracle was wrought by natural means supernaturally applied. A strong N. E. wind acting here upon the ebb tide, would necessarily have the effect to drive out the waters from the small arm of the sea which runs up by Suez, and also from the end of the gulf itself, leaving the shallower portions dry; while the more northern part of the arm, which was anciently broader and deeper than at present, would still remain covered with water. Thus the waters would be divided, and be a wall to the Israelites on the right hand and on the left." No better theory of the place of the crossing and the manner of the miracle has been presented than this of Dr. E. Robinson (Recherches, i. 54-50). It harmonizes well with all the details of the narrative. The arm of the gulf stretching north of Suez thus becomes a condition of the fulfillment of the miracle.

J. P. T.

REED. Under this name we propose noticing the following Hebrew words: agmon, gōmē, 'arāḏ, and kānēk.

1. Agmon (אָגוֹמֶן, οἶκος, οὕτως, μείρα; circulā, fīstērē, ἐσχήσαμαι) occurs Job xi. 26 (A. V. xlii. 2), "Canst thou put agmon (A. V. "hook") into the nose of the crocodile? Again, in xii. 12 (A. V. xlii. 29), "out of his nostrils goeth smoke, as out of a seething-pot or agmon (A. V. "caldron"). In Is. ix. 14, it is said Jehovah "will cut off from Israel head and tail, branch and agmon (A. V. "rush")." The agmon is mentioned also in an Egyptian plant, in a sentence similar to the last. Is. xiii. 12. From iv. 5 we learn that the agmon had a pungent panicle. There can be no doubt that the agmon denotes some aquatic reed-like plant, whether of the Nat. order Cyperaceae or that of Gramineae. The term is allied closely to the Hebrew agām (אָגוֹם), which, like the corresponding Arabic ajum (אָגֵם), denotes a marshy pool or reed-bed. (See Jer. ii. 32, for this latter signification.) There is some doubt as to the specific identity of the agmon, some believing that the word denotes a "rush" as well as a "reed." See Rosenmüller (Bib. Erst., p. 184) and Winer (Renthüber, ii. 184). Celsius has argued in favor of the Arundo phragmitis (Hierob. i. 465): we are inclined to adopt his opinion. That the agmon denotes some specific plant is probable both from the passages where it occurs as well as from the fact that kānēk (קַנֶּק) is the generic term for reeds in general. The Arundo phragmitis (now the Phragmites communis), if it does not occur in Palestine and Egypt, is represented by a very closely allied species, namely, the A. tunica of Pallas. The drooping panicle of this plant will answer well to the "bowing down the head" of which Isaiah speaks; but, as there are other kinds of reed-like plants to which this character also belongs, it is impossible to do more than give a probable conjecture. The expression "Canst thou put an agmon" into the crocodile's nose has been variously explained. The most probable interpretation is that which supposes allusion is made to the mode of passing a reed or a rush through the gills of fish in order to carry them home; but see the Commentaries and Notes of
The name of Job xii. 20 seems to be derived from an Arabic root signifying to "be burning;" hence the "fierces" of the Vulg. The Phoenicians, an oriental branch of the Hebrews, used the Tyrioth to make lamps.

2. *Gome, * (Greek: πάπιος, βιβλίας, Ύας; see *pyrus, *scirpus, *pyrum, *juncus), translated " rush" and " bulrush" by the A.V., without doubt denotes the celebrated paper-reed of the ancients (*Pyppus antiquorum*), a plant of the Sedge family, *Cyperus*, which formerly was common in some parts of Egypt. The Hebrew word is found four times in the Bible. Moses was hid in a vessel made of the papyrus (Ex. ii. 3). Transit boats were made out of the same material by the Ethiopians (Is. xliii. 2); the paper-reed is mentioned together with *Kineh*, the usual generic term for a "reed," in Ex. xxxv. 7, and in Joh. viii. 11, where it is asked, "Can the papyrus plant grow without mire?" The modern Arabic name of this plant is *Beredo*. According to Bruce the modern Assyrians use boats made of the papyrus reed; Ludolf (Hist. Etiop. i. 8) speaks of the Tramie lake being navigated "monovisius luctibus et typha praevariss confertis," a kind of sailing, be

"The papyrus is very abundant in a swamp at the north end of the Plain of Bene-seret, and also occurs many miles on the marshy shores of Hule", the ancient Merom. These two places and Jaffa (see above) are said to be the only places in Asia where this plant is known to exist at the present day (Tristram, Nat. Hist. of the Nile, p. 433)."

Reed. Wilkinson (Anc. Egypt. ii. 96, ed. 1854) says that the right of growing, etc., is it improbable that the papyrus alone should have been used for such a purpose: but that the true papyrus was used for boats there can be no doubt, if the testimony of Theophrastus (Hist. Pl. iv. 8, § 4) Pliny (H. N. xiii. 11), Plutarch, and other ancient writers, is to be believed.

From the soft cellular portion of the stem the ancient material called *papyrus* was made. "Papyrus," says Sir G. Wilkinson, "are of the most remote Pharaonic periods. The mode of making them was as follows: the interior of the stalks of the plant, after the root had been removed, was cut into thin slices in the direction of their length, and these being laid on a flat board in succession, similar slices were placed over them at right angles, and their surfaces being cemented together by a sort of glue, and subjected to a proper degree of pressure and well dried, the papyrus was completed; the length of the slices depend, of course on the breadth of the intended sheet, as that of the sheet on the number of slices placed in succession beside each other, so that though the breadth was limited the papyrus might be extended to an indefinite length." [Warrane.] The papyrus reed is not now found in Egypt; it grows, however, in Syria. Dr. Hooker saw it on the banks of Lake Tiberias, a few miles north of the town; it appears to have existed there since the days of Theophrastus and Pliny, who give a very accurate description of this interesting plant. Theophrastus (Hist. Plant. iv. 8, § 4) says, "The papyrus grows also in Syria around the lake in which the sweet-scented reed is found, from which Antigonus used to make canoes used to make canoes for his ships." (See also Pliny, H. N. xiii. 11.) This plant has been found also in a small stream two miles N. of Jaffa. Dr. Hooker believes it is common in some parts of Syria: it does not occur anywhere else in Asia; it was seen by Lady Calcutt on the banks of the Amwas, near Syracus, and Sir Joseph Banks possessed paper made of papyrus from the Lake of Trajanus [Scrips. Pl. iv. p. 329]. The Hebrew name of this plant is derived from a root which means "to absorb," compare Luke (Phars. iv. 150). The lower part of the papyrus reed was used as food by the ancient Egyptians; those who wish to eat the bulbs dressed in the most delicate way, strew it in a hot pan and then eat it." (Horrid. ii. 92; see also Theophr. Hist. Plant. iv. 9.) The growing of Theophrastus with regard to the sweetness and flavor of the sap has been confirmed by some writers; the Chevalier Landolina made papyrus from the pith of the plant, which, says Hecrun (Hist. Res. Afric. Nat., ii. 350, note), "is rather clearer than the Egyptian." But other writers say the
3. "Arund (Ἀρόν): τὸ ἄχλον τὸ χληροφυτόν πᾶν" is translated "paper-reed" in Is. xix. 7, the only passage where the pl. noun occurs; there is not the slightest authority for this rendering of the A. V., nor is it at all probable, as Celsius (Hierob. ii. 230) has remarked, that the prophet who speaks of the paper-reed under the name giōnė in the preceding chapter (xviii. 2), should in this one mention the same plant under a totally different name. "Arūth," says Kimchi, "is the name to designate pot-herbs and green plants." The LXX. translate it by "all the green herbage" (comp. τάλακας, Gen. xii. 2, and see FLAG). The word is derived from ἄρτος, "to be bare," or "distract of trees;" it probably denotes the open grassy land on the banks of the Nile; and seems to be allied to the Arabic ārūf.

4. Kānēch (קָנֵךְ): קָלָם, קָלָםִיָּשׁ, קָלָםִיּוֹ, πύκχος, ἀγουγή, ἡγός, πυκχῆρα, πυκχῆρα: calamus, calamus, arundo, flatus, flustra), the generic name of a reed of any kind; it occurs in numerous passages of the O. T., and sometimes denotes the "stalk" of wheat (Gen. xii. 5, 22), or the "branches" of the candlestick (Ex. xxv. and xxviii.;) in Job xxxi. 22, kānēch denotes the bone of the arm between the elbow and the shoulder (οὐροτρίτον); it was also the name of a measure of length equal to six cubits (Ex. xiii. 8, xl. 5). The word is variously rendered in the A. V. by "stalk," "branch," "bone," "calamus," "reed." In the N. T. kālāmos may signify the "stalk" of plants (Mark xv. 36; Matt. xxii. 48, that of the hyssop, but this is doubtful), or a "reed" (Matt. xii. 7, xii. 20; Luke vii. 24; Mark xv. 19); or a "measuring rod" (Rev. xi. 1, xxi. 15, 16); or a "pen" (John 13, 15). Strand (Flor. Palest. pp. 28-30) gives the following names of the reed plants of Palestine: Sacccharum officinarum, Cyperus papyrus (Papyrus antiquorum), C. rotundus, and C. escalentus, and Arundo scortoria; but no doubt the species are numerous. See Bove (Voyage en Palest., Annal. des Scienc. Nat. 1834, p. 165), "Dans les déserts, où environnement ces montagnes j'ai trouvé plusieurs

they refer the καλάμως αρωματικός of Dioscorides (i. 17), the καλάμως εὐδόκης of Theophrastus (Hist. Plant. iv. 8 § 4), which, according to this last-named writer and Pliny (H. N. xii. 22), formerly grew about a lake "between Libanus and another mountain of no note;" Strabo identifies this with the Lake of Gemmaren (Geogr. xvi. p. 755, ed. Kramer). Burchhardt was unable to discover any sweet-scented reed or rush near the lake, though he saw many tall reeds there. "High reeds grow along the shore, but I found none of the aromatic reeds and rushes mentioned by Strabo;" (Sprir. p. 319); but whatever may be the "fragrant reed" intended, it is certain that it did not grow in Syria, otherwise we cannot suppose it should be spoken of as a valuable product from a far country. Dr. Royse refers the καλάμως αρωματικός of Dioscorides to a
species of *Amblygonium*, which he calls *A. calamus* aromatius, a plant of remarkable fragrance, and a native of Central India, where it is used to mix with ointments on account of the delicacy of its odor (see Kitto's Cyc. Art. "Kemch besom;" and a fig. of this plant in Royce's Illustrations of Himalayan Botany, p. 425, I. 97). It is possible this may be the "reed of fragrance;" but it is hardly likely that Dioscorides, who, under the term *cyprio* gives a description of the *Amblygonium Schenautchus*, should speak of a closely allied species under a totally different name. Still there is no necessity to refer the *Kemch besom or bathb* to the *calamus aromatius* of Dioscorides; it may be

represented by Dr. Royce's plant or by the *Amblygonium Schenautchus*, the lemon grass of India and Arabia.

W. H.

REELAIAH [4 syl.] (Ῥέλαιας [ῥακτρεμλας before Jeborah, Ges.]: Peræias: [Vat. Peræias:] Ῥελαιας). One of the children of the province who went up with Zerubbabel (Ezr. ii. 2). In Neh. vii. 7 he is called Ῥαμαιας, and in 1 Esdr. v. 8 Ῥελαιας.

REELIUS (Peræas: [Vat. Peræas]).

"καλαμός: A. V. "purely," but more properly "as with alkali."

"καλείας."

The term *καλαμός* occurs twice only (Prov xxi. 3, xxvii. 21; A. V. "fining-pot"). The expression in Ps. xii. 6, rendered in the A. V. "furnace of earth," is of doubtful signification, but certainly cannot signify that. The passage may be rendered, "as silver, melted in a workshop, flowing down to the earth."

W. L. B.

REFRAIN formerly signified to bridge, or hold in check (as in Latin refringere). So in Prov. x. 19: "He that restrained his lips is wise." II.

REFUGE, CITIES OF. [CITIES OF REFUGE]

REJEM (Ῥεγμ, i. e. of God, Ges.). Pavyis. Alex. Pavyis: Resum). A son of Jahdai, whose name unaccountably appears in a list of the descendants of Caleb by his concubine Ephah (1 Chr. ii. 47). Kishi considers Jahdai as the son of Ephah, but there appear no grounds for this assumption.
