* * * The new portions in the present edition are indicated by a star (*), the editorial additions being distinguished by the initials H. and A. Whatever is enclosed in brackets is also, with unimportant exceptions, editorial. This remark, however, does not apply to the cross-references in brackets, most of which belong to the original work, though a large number have been added to this edition.

ABBREVIATIONS.

Ald. The Aldine edition of the Septuagint, 1518.
Alex. The Codex Alexandrinus (5th cent.), edited by Baber, 1816–28.
A. V. The authorized (common) English version of the Bible.
Comp. The Septuagint as printed in the Complutensian Polyglott, 1514–17, published 1522.
FA. The Codex Friderico-Augustanus (4th cent.), published by Tischendorf in 1846.
Rom. The Roman edition of the Septuagint, 1557. The readings of the Septuagint
for which no authority is specified are also from this source.
Sin. The Codex Sinaiacus (4th cent.), published by Tischendorf in 1862. This
and FA. are parts of the same manuscript.
Vat. The Codex Vaticanus 1209 (4th cent.), according to Mai’s edition, published
by Vercellone in 1857. “Vat. H.” denotes readings of the MS. (differing
from Mai) given in Holmes and Parsons’s edition of the Septuagint, 1798–
1827. “Vat. 1” distinguishes the primary reading of the MS. from “Vat. 2”
or “2. m.,” the alteration of a later reviser.
MARRIAGE

MARRIAGE. The topics which this subject presents to our consideration in connection with Biblical literature may be most conveniently arranged under the following five heads:—

I. Its origin and history.

II. The conditions under which it could be legally effected.

III. The modes by which it was effected.

IV. The social and domestic relations of married life.

V. The typical and allegorical references to marriage.

I. The institution of marriage is founded on the requirements of man's nature, and dates from the time of his original creation. It may be said to have been ordained by God, in as far as man's nature was ordained by Him; but its formal appointment was the work of man, and it has ever been in its essence a natural and civil institution, though admitting of the infusion of a religious element into it. This view of marriage is exhibited in the historical account of its origin in the book of Genesis: the peculiar formation of man's nature is assigned to the Creator, who, seeing it "not good for man to be alone," determined to form an "help meet for him" (v. 18), and accordingly completed the work by the addition of the female to the male (v. 27). The necessity for this step appears from the words used in the declaration of the Divine counsel. Man, as an intellectual and spiritual being, would not have been a worthy representative of the Deity on earth, so long as he lived in solitude, or in communion only with beings either high above him in the scale of creation, as angels, or far beneath him, as the beasts of the field. It was absolutely necessary, not only for his comfort and happiness, but still more for the purpose of continuing the work of creation, that he should have a "help meet for him," or, as the words more properly mean, "the exact counterpart of himself"—a being capable of receiving and reflecting his thoughts and affections. So sooner was the formation of woman effected, than Adam recognized in that act the will of the Creator as to man's social condition, and immediately enunciated the important statement, to which his posterity might refer as the charter of marriage in all succeeding ages, "Therefore shall a man leave his father and his mother, and shall cleave unto his wife: and they shall be one flesh" (v. 24). From these words, coupled with the circumstances attendant on the formation of the first woman, we may evolve the following principles: (1) The unity of man and wife, as implied in her being formed out of man, and as expressed in the words "one flesh;" (2) the indissolubleness of the marriage bond, except on the strongest grounds (comp. Matt. xix. 9); (3) monogamy, as the original law of marriage, resulting from there having been but one original couple, as is forcibly expressed in the subsequent references to this passage by our Lord ("they twain," Matt. xix. 5), and St. Paul ("two shall be one flesh," 1 Cor. vi. 16); (4) the social equality of man and wife, as implied in the terms ish and ishshah, the one being the exact correlative of the other, as well as in the words "help meet for him;" (5) the subordination of the wife to the husband, consequent upon her subsequent formation (1 Cor. vii. 8, 9; 1 Tim. ii. 13); and (6) the respective duties of man and wife, as implied in the words "help meet for him."

The introduction of sin into the world modified to a certain extent the mutual relations of man and wife. As the blame of seduction to sin lay on the latter, the condition of subordination was turned over by God to the man as the punishment of his sin.

old Latin term eoa would have been better. Luther is more successful with nam and manicum; but even this fails to convey the double sense of ishshah as = "woman" and "wife," both of which should be preserved, as in the German verb, to convey the full force of the original. We may here observe that ishshah was the only term in ordinary use among the Hebrews for "wife." They occasionally used eoa as we use "consort," for the wires of kings (Ps. xlv 9; Neh. ii. 6; Dan. v. 2).

MARRIAGE

a ἑξαχτυποῦν, literally "as over against," and so " corresponding to." The renderings, in the A.V. "meet for him," in the LXX. συναντεῖται, and in the Vulg. simile abit, are inadequate.

b The LXX. introduces ὑπὸ into the text in Gen. ii. 24, and is followed by the Vulgate.

c Εὐρυς and ἐφυρεῖ. We are unable to express the verbal correspondence of these words in our language. The Vulgate retains the etymological identity at the expense of the sense: "Venge quosamum de eoa." The

113
MARRIAGE

into subjection, and it was said to her of her hus-
band, "a he shall rule over thee" (Gen. iii. 16)—
a sentence which, regarded as a prediction, has been
strikingly fulfilled in the position assigned to women
in Oriental countries, but which, regarded as a
rule of life, is fully sustained by the voice of nature,
and by the teaching of Christianity (1 Cor. xiv. 34;
Eph. v. 22, 23; 1 Tim. ii. 12). The evil effects of
the fall were soon apparent in the corrupt usages of
marriage: the unity of the bond was impaired by
polygamy, which appears to have originated
among the Canaithes (Gen. iv. 19); and its purity
was deteriorated by the promiscuous intermarriage
of the sons of God "with the daughters of man," i.e.,
of the Sethites with the Cainites, in the days preceding the flood (Gen. vi. 2).

In the post-diluvial age the usages of marriage
were marked with the simplicity that characterizes
a patriarchal state of society. The rule of monog-
amy was re-established by the example of Noah
and his sons (Gen. vii. 13). The early patriarchs
selected their wives from their own family (Gen.
xxi. 2, xxxiv. 4, xxviii. 2), and the mercy for
doing this on religious grounds superseded the pro-
hibitions that afterwards held good against such
marriages on the score of kindred (Gen. xx. 12;
Ex. vi. 20; comp. Lev. xviii. 9, 12). Polygamy
prevailed (Gen. xxxvi. 1, 6, xxviii. 9, xxix. 26,
xxi. 14), but to a great extent divested of the degradation which in modern times attaches
to that practice. In judging of it we must take
into regard the following considerations: (1) that
the principle of monogamy was retained, even in
the practice of polygamy, by the distinction made
between the chief or original wife and the secondary
wife, or, as the A. V. terms them, "concubines"—
a term which is objectionable, inasmuch as it
conveys to us the notion of an illegitimately unregis-
tered position, whereas the secondary wife was
recognized by the Hebrews as a wife, and her rights
were secured by law; (2) that the motive which
led to polygamy was that absorbing desire of
progeny which is prevalent throughout eastern
countries, and was especially powerful among the
Hebrews; and (3) that the power of a parent over
his child, and of a master over his slave (the
potestas potestas and dominus of the Romans), was
paramount even in the matter of marriage, as well
in the case of the possession of polygamy that are
otherwise quite unintelligible as, for instance, to
the cases where it was adopted by the husband at
the request of his wife, under the idea that children
born to a slave were in the eye of the law the
children of the mistress (Gen. xxx. 4, 9); or,
again, to cases where it was adopted at the
instance of the father (Gen. xxiv. 23; 28; Ex. xxi.
9, 10). It must be allowed that polygamy; thus
legalized and systematized, justified to a certain
extent, was a further illustration of the passage of
law without offense to, but actually at the suggestion
of, those who, according to our notions, would feel
most deeply injured by it, is a very different thing
from what polygamy would be in our own state of
society.

Divorce also prevailed in the patriarchal age,
though but one instance of it is recorded (Gen. xxi.
12). In the early Canaanite states, at least, we must not judge by
our own standard. Wherever marriages are effected by
the violent exercise of the potestas potestas, or with-
out any bond of affection between the parties con-
cerned, ill-assorted matches must be of frequent
occurrence, and without the remedy of divorce, in
such a state of society, we can understand the
truth of the Apostles' remark, that it "is not good
to marry" (Matt. xix. 10). Hence divorce prevails
to a considerable extent even in the most enlightened
countries where marriage is the result of arbitrary appointment or of purchase:
we may instance the Abbé needs (Barnes' Notes,
I., xi.; Layard's Nineveh, i. 337) and the Egypti-
ans (Lam. i. 235). From the enactments of the Mosaic law we may infer that divorce was
effected by a mere verbal declaration, as it still is
in the countries referred to, and great injustice was
thus committed towards the wives.

The Mosaic law aimed at mitigating rather than
removing evils which were inseparable from the
state of society in that day. Its enactments were
directed (1) to the discouragement of polygamy;
(2) to obviate the injustice frequently consequent
upon the exercise of the rights of a father or a
master; (3) to bring divorce under some restric-
tions; and (4) to enforce purity of life during the
maintenance of the matrimonial bond. The first
of these objects was forwarded by the following enactments: the prohibition imposed upon kings
against multiplying wives (Deut. xvii. 17); the
prohibition against marrying two sisters together
(Lev. xviii. 18); the assertion of the matrimonial
rights of each wife (Ex. xxi. 10); the slur cast
upon the unfaithful state, which has been ever regarded
as the cornucopia to a woman of polygamy (Deut.
xxii. 1); and the ritual observances entailed on a
man by the duty of marriage (Lev. xvii. 18).

The second object was attained by the humane regul-
at ions relative to a captive whom a man might wish
to marry (Deut. xxxi. 10-14), to a purchased wife
xxi. 15) or "maid-servant" (Ex. xxvi. 7); the latter
applying to a purchased wife.

The language in 1 Chr. ii. 18, "these are her sons," following on the mention of his two wives, admits of
an interpretation on this ground.

The Talmudists practically set aside this prohibi-
tion, (1) by explaining the word "multiply" of an
increase in number; and (2) by treating the motive
for it, "that his heart turn not away," as a matter of
discretion. They considered eighteen the maximum
to be allowed a king (Selden, Dor. Ein. 1. 8). It is note-
worthy that the high priest himself authorizes bigamy
in the case of king Josiah (2 Chr. xxx. 3).

The regulations in Ex. xxxi. 7-11 deserve a detailed
notice, as exhibiting the extent to which the power
of the head of a family might be entailed. It must be
remembered that the maiden was born of Hebrew parents,
was under age at the time of her sale (otherwise her
father would have no power to sell), and that the
MARRIAGE

(Ex. xxvii. 7-11), and to a slave who either was mar-
ried, or was the wife of someone else, to whom she
since received a wife, or at the hands of her master,
was unwilling to be parted from her (Ex. xxii. 24-31),
and, lastly, by the law relating to the legal distri-
bution of property among the children of the differ-
ent wives (Deut. xxi. 13-17). The third object was
affected by rendering divorce a formal proceeding,
not to be done by word of mouth as heretofore,
but by a "bill of divorcement" (Deut. xxiv. 1),
which was written out, and submitted to the in-
tervention of a third party, thus rendering divorce
an easy process, and furnishing the wife, in the
event of its being carried out, with a legal evidence
of her marriageability: we may also notice that
Moses wholly prohibited divorce in case the wife
had been seduced prior to marriage (Deut. xxii. 29),
or her chastity had been groundlessly impugned
(Deut. xxi. 21). The fourth object forms the sub-
ject of one of the ten commandments (Ex. xxiv. 14),
any violation of which was punishable with death
(Lev. xx. 10; Deut. xxii. 22), even in the case of
a betrothed person (Deut. xxi. 23, 24).

The practical results of these regulations may
have been very salutary, but on this point we have
but small opportunities of judging. The usages
themselves, to which we have referred, continued
in full force to a late period. We have instances
of the arbitrary exercise of the paternal authority in
the cases of Achan (Judg. ii. 12), Idan (Judg. xiii.
9), Samson (Judg. xiv. 20, xv. 2), and Michael (1 Sam.
xxvii. 23). The case of Abishag, and the language
of Adonijah in reference to her (1 K. i. 2, ii. 17), prove
that a servant was still completely at the disposal of his
or her master. Polygamy also prevailed, as we are expressly informed in reference
to Gideon (Judg. viii. 30), Elkanah (1 Sam. i. 2),
Saul (2 Sam. xii. 8), David (2 Sam. v. 13), Solomon
(1 K. x. 3), the sons of Issachar (1 Chr. vii.
4), Shaharaim (1 Chr. vii. 8, 9), Rehoboam (2 Chr.
xx. 11), Abijah (2 Chr. xii. 21), and Joash (2 Chr.
xxiv. 3); and as we may also infer from the number of children in the cases of Jair, Issachar,
and Samson (Judg. x. 4), the Talmudists, on the understand-
ing that her master either already has made, or intends
to make her his wife (ver. 7); (2) but, if he has no
such intention, he is not entitled to retain her in the
event of any other person of the Israelites being will-
ing to purchase her for the same purpose (vers.
8); (3) he might, however, assign her to his son,
in this case she was to be treated as a daughter and
not as a slave (ver. 9); (4) if either he or his son, hav-
ing married her, took another wife, she was still to be
considered as a wife in all respects (ver. 10); and, lastly,
if neither of the three contingencies took place, i.e.
if he neither married her himself, nor gave her to
his son, nor had her redeemed, then the maiden was
to become absolutely free without waiting for the ex-
piration of the six years or for the year of jubilee
(vers. 11).

so great as to put a serious bar to its genera-
lization, but the adoption, and in some cases, also
by marriage, it is fully established the practice is restricted
to comparatively few (Niebuhr, Voyger, p. 63; Lune.
i. 219). This is the rule holds good with regard to
ancient times: the discomfits of polygamy are exhibited
in the jealousies between the wives of Abraham (Gen.
ixvi. 6), and of Elkanah (1 Sam. i. 6); and the cases cited above rather lead to the
inference that it was confined to the wealthy.
Meanwhile it may be noted that the theory of
monogamy was retained and comes prominently
forward in the pictures of domestic bliss portrayed
in the poetical writings of this period (Ps. cxxviii.
3; Prov. v. 18, xviii. 22, xix. 10, 20-29; Ezek.
ix. 9). The sanctity of the marriage-bond was
but too frequently violated, as appears from the
frequent allusions to the "strange woman" in the
book of Proverbs (ii. 16, v. 29, etc.), and in the
denunciations of the prophets against the prev-
ance of adultery (Jer. v. 8; Ez. xvii. 11, xxi.
11).

In the post-Babylonian period monogamy appears
so have become more prevalent than at any previ-
ous time: indeed we have no instance of polyg-
amy during this period on record in the Bible. All
the marriages noticed being with single wives (Tob.
i. 9, ii. 11; 1 Sam. xvi. 20; 2 Sam. xi. 6), Acts
of i. 5; Acts v. 1). During the same period the theory of monogamy is set forth in Eccles. xxvi.
1-27. The practice of polygamy nevertheless still
existed; 5 Herod the Great had no less than nine
wives at one time (Joseph. Ant. xvi. 1, § 3); the Tal-
muists frequently assume it as a well-known fact
(e. g. Kethub, 10, § 1; Tefum, 1, § 1); and the early
Christian writers, in their comments on 1 Tim.
iii. 2, explain it of polygamy in terms which,
leave no doubt as to the fact of its prevalence in
the Apostolic age. The abuse of divorce continued
unabated (Joseph. Vit. § 76); and under the Asmo-
mean dynasty the right was assumed by the wife as
against her husband, an innovation which is attrib-
uted to Sabine by Josephus (Ant. xv. 7, § 10);
but which appears to have been prevalent in the
Apostolic age; if we may judge from passages where
the language implies that the act emanated from
the wife (Mark x. 12; 1 Cor. vii. 11), as well as

a In this case we must assume that the wife assigned
was a non-Israelite slave; otherwise, the wife would,
as a matter of course, be freed along with her hus-
band in the year of jubilee. In this case the wife
and children would be the absolute property of the
master, and the position of the wife would be analo-
gous to that of the Roman consort, who was not
supposed capable of any convertible. The issue
of such a marriage would remain slaves in accordance
with the maxim of the Talmudists, that the child is
liable to its mother's disqualification (Kid. 3, § 12).
Josephus (Ant. iv. 8, § 28) states that in the year
of jubilee the slave, having married during service,
carried off his wife and children with him: this, how
ever, was the extreme case, and not the usual prac-
tice. The Talmudists limited polygamists to four
wives. The same number was adopted by Mohammed in the
Koran, and still forms the rule among his followers
(Niebuhr, Voyger, p. 92).

b The Talmudists limited polygamy to four wives.

5 Both the Talmudists limited polygamy to four wives.

6 Michaelis (Leaves of Hebrews, iii. 5, § 95) asserts that
polygamy ceased entirely after the return from the
Captivity; Selden, on the other hand, that polygamy
prevailed among the Jews until the time of Honorius
and Arcadius (cfr. a. p. 499), when it was prohib-
tioned by an imperial edict (Ex. xix. 9).
from some of the commentaries of the early writers on 1 Tim. v. 9. Our Lord and his Apostles reestablished the integrity and sanctity of the marriage bond generally (Heb. xii. 4, 14), and the following view is that of the Church (Acts xxv. 29).

The Old Testament period marriage was regarded as the indissoluble duty of every man, nor was it surmised that there existed in it any drawback to the attainment of the highest degree of holiness. In the interval that elapsed between the Old and New Testament periods, a spirit of asceticism had been evolved, probably in antagonism to the foreign influences on the Jews, which exhibited a gradual development of the practice of monogamy. The philosophical tenets on which the prohibition of marriage was based are generally condemned in Col. ii. 16-23, and specifically in 1 Tim. iv. 3. The general propriety of marriage is enforced on numerous occasions, and abstinence from it is commanded only in cases where it was rendered expedient by the call of duty (Matt. xix. 12; 1 Cor. vii. 8, 25). With regard to re-marriage after the death of one of the parties, the Jews, in common with other nations, regarded abstinence from it, particularly in the case of a widow, as an indispensable and a sign of holiness (Luke iii. 36, 37; Joseph. Ant. xvii. 13, § 4, xviii. 6, § 6); but it is clear from the example of Josephus (172, § 76) that there was no prohibition even in the case of a priest. In the Apostolic Church re-marriage was regarded as occasionally undesirable (1 Cor. vii. 40), and as an absolute disqualification for holy functions, whether in a man or woman (1 Tim. iii. 2, 12, v. 1); at the same time it is recommended in the case of young widows (1 Tim. v. 14). The conditions of legal marriage are decided by the prohibitions which the law of every country imposes upon its citizens. In the Hebrew con-
MARRIAGE

Israelitish women with Moabites, but permitting that of Israelites with Moabitish women, such as that of Moadon with Ruth. The prohibition against marriages with the Edomites or Egyptians was less stringent, as a male of those nations received the right of marriage on his admission to the full citizenship in the third generation of proselytism (Deut. xxiii. 7, 8). There were thus three grades of prohibition — total in regard to the Canaanites on either side; total on the side of the males in regard to the Ammonites and Moabites; and temporary on the side of the males in regard of the Edomites and Egyptians, marriages with females in the two latter instances being regarded as legal (Selden, \textit{de Jur. Nat.\ cap. 14}). Marriages between Israelite women and proselyted foreigners were at all times of rare occurrence, and are noticed in the Bible, as though they of an exceptional nature, such as that of an Egyptian and an Israelitish woman (Lev. xxiv. 10), of Abigail and Jether the Ishmeelite, contracted probably when Jesse's family was sojourning in Moab (1 Chr. ii. 17), of Sheshan's daughter and an Egyptian, who was staying in his house (1 Chr. ii. 35), and of a Naphtalite woman and a Tyrian, living in adjacent districts (1 K. vii. 11).

In the case of illegal marriages, the marriage of Israelites with foreign women, it is, of course, highly probable that the wives became proselytes after their marriage, as instanced in the case of Ruth (i. 16); but this was by no means invariably the case. On the contrary we find that the Egyptian wife of Solomon (1 K. xi. 4), and the Philenean wife of Ahab (1 K. xvi. 31) retained their idolatrous practices and introduced them into their adopted countries. Proselytism does not therefore appear to have been a sine qua non in the case of a wife, though it was so in the case of a husband; the total silence of the Law as to any such condition in regard to a captive, whom an Israelite might wish to marry, must be regarded as evidence of the reverse (Deut. xxi. 10–14), nor have the refinements of Rabbinical writers on that passage succeeded in establishing the necessity of proselytism. The opposition of Samson's parents to his marriage with a Philistine woman (Judg. xiv. 3) leads to the same conclusion. So long as such unions were of merely occasional occurrence no veto was placed upon them by public authority; but, when after the return from the Babylonish Captivity the Jews contracted marriages with the heathen inhabitants of Palestine

\[ a \] The term εὐγενήσεως (A. V. "unequally yoked with") has no special reference to marriage: its meaning is shown in the cognate term ἑγενήσεως (Lev. xix. 19; A. V. "of a diverse kind"). It is, however, correctly connected in the A.V. with the notion of a γυναῖκα, as explained by Selden, in his \textit{Polyglott}, and not with that of a "balance," as Theophylact.

\[ b \] \textit{Mishna.}

Cognate words appear in Rabbinical writings, signify the absence of the "wife," (2) the marriage of an added wife; (3) to \textit{zn.} The important point to be observed is that the word does not betoken bastardy in our sense of the term, but simply the progeny of a mixed marriage of a Jew and a foreigner. It may be with a special reference to this word that the Jews boasted that they were not born "of formation" (Ex \textit{prophets}, John viii. 41), implying that there was no admixture of foreign blood, or consequently of foreign idolatries, in themselves.

\[ d \] The Hebrew expression \textit{מְנוֹן אוֹמֹנָא} (A. V. "near of kin") is generally regarded as applying to

in so wholesale a manner as to endanger their national existence, the practice was severely condemned (Ezra. ix. 2, x. 2), and the law of positive prohibition originally pronounced only against the Canaanites was extended to the Moabites, Ammonites, and Philistines (Neh. xiii. 23–25). Public feeling was therefore strongly opposed to foreign marriages, and the union of Mummash with a Cuthean led to such animosity as to produce the great national schism, which had its focus in the temple on Mount Gerizim (Joseph. \textit{Ant.} xi. 8, § 2).

A no less signal instance of the same feeling is exhibited in the cases of Joseph (\textit{Ant.} xii. 4, § 6; and \textit{Ant.} xiii. 9, § 5), and is noticed by Tacitus (\textit{Hist.} v. 5) as one of the characteristics of the Jewish nation in his day. In the N. T. no special directions are given on this head, but the general precepts of separation between believers and unbelievers (2 Cor. vi. 14, 17) would apply with special force to the case of marriage; and the permission to dissolve mixed marriages, contracted previously to the conversion of one party, at the instance of the unconverted one, cannot but be regarded as implying the impropriety of such unions subsequently to conversion (1 Cor. vii. 12).

The prohibition of all illegal marriages, whether of Israelites and non-Israelites was described under a peculiar term, \textit{μοναρχήρ} (A. V. "bastard"; Deut. xxii. 2), the etymological meaning of which is uncertain; but which clearly involves the notion of a "foreigner," as in Zech. ix. 6, where the LXX has \textit{αλλογείρα}, "strangers." Persons born in this way were excluded from full rights of citizenship until the tenth generation (Deut. xxiii. 2). It follows hence that intermarriage with such persons was prohibited in the same manner as with an Ammonite or Moabite (comp. Mishna, \textit{Kiddushah} 4, § 1).

ii. The regulations relative to marriage between Israelites and Israelites may be divided into two classes: (1) general, and (2) special — the former applying to the whole population, the latter to particular cases.

1. The general regulations are based on considerations of relationship. The most important passage relating to these is contained in Lev. xviii. 6–18, wherein we have in the first place a general prohibition against marriages between a man and the "flesh of his flesh," and in the second place special prohibitions against marriage with a

blood-relationship alone. The etymological sense of the term \textit{sheer} is not decided. By some it is connected with \textit{sheer}, "to remain," as by Michaelis (\textit{Laws of Moses}, iii. 7, § 2), and in the marginal translation of the A.V. "remainder;" but its ordinary sense of "flesh" is more applicable. Whichever of these two we adopt, the idea of blood-relationship evidently attaches to the term from the cases in which it is used (vv. 12, 13, 17; A. V. "near kinswoman"), as well as from its use in Lev. xx. 19; Num. xviii. 11. The term \textit{basar}, literally "flesh" or "body," is also peculiarly used of blood-relationship (Gen. xxiv. 14, xviii. 27; Judges ix. 2; 2 Sam. v. 1; 1 Chr. xi. 1). The two terms, \textit{sheer basar}, are used conjointly in Lev. xxiv. 49 as equivalent to \textit{misapneah}, "family." The term is applicable to relationship by affinity, in as far as it regards the blood-relationships of a wife. The relationship specified may be classed under three heads: (1) blood-relationships proper in vv. 7–13; (2) the wives of blood-relationships in vv. 14–15; (3) the blood relations of the wife in vv. 17, 18.

\[ e \] The daughter is omitted: whether as being pre
MARRIAGE

A. Marriage and its Deceased

1. An exception is subsequently made (Deut. xxv. 5) in favor of marriage with a brother's wife in the event of his having died childless: to this we shall have occasion to return at length.

2. Different degrees of guiltiness attached to the infringement of these prohibitions, as implied both in the different terms applied to the various offenses, and in the punishments inflicted upon the general penalty being death (Lev. xx. 11-17), but in the case of the aunt and the brother's wife childlessness (18-21), involving probably the stain of illegitimacy in cases where there was an issue, while in the case of the two sisters no penalty is stated.

3. The moral effect of the prohibitions extended beyond cases of formal marriage to those of illicit intercourse, and gave a deeper dye of guilt to such conduct as that of Lot's daughters (Gen. xix. 32), of Reuben in his intercourse with his father's concubine (Gen. xxxvi. 22), and of Absalom in the same act (2 Sam. xvi. 22); and it rendered such crimes tokens of the greatest national disgrace (Ex. xxxi. 11).

4. The Rabbinical writers considered that the prohibitions were abrogated in the case of proselytes, insomuch as their change of religion was deemed equivalent to a new natural birth, and consequently involved the severing of all ties of previous relationship: it was necessary, however, in such a case that the wife as well as the husband, should have adopted the Jewish faith.

5. The grounds on which these prohibitions were warranted are reducible to the following three heads: (1) moral propriety; (2) the practices of heathen nations; and (3) social convenience.

6. The first of these grounds comes prominently forward in the expressions by which the various offenses are characterized, as well as in the general prohibition against approaching "the flesh of his flesh." The use of such expressions unhesitatingly contains an allusion to the horror naturales, or that repugnance with which man instinctively shrinks from matrimonial union with one with whom he is connected by the closest ties both of blood and of family affection. On this subject we need say no more than that there is a difference in kind between the affection that binds the members of a family together, and that which lies at the bottom of the matrimonial bond, and that the amalgamation of these affections cannot take place without a serious shock to one or the other of the two; hence the desirability of drawing a distinct line between the provinces of each, by stating definitely where the matrimonial affection may legitimately take root.

7. The second motive to laying down these prohibitions was that the Hebrews might be preserved as a peculiar people, with institutions distinct from those of the Egyptians and Canaanites (Lev. xxvii. 3), as well as of other heathen nations with whom they might come in contact. Marriages within the proscribed degrees prevailed in many civilized coun-

eminent the "flesh of a man's flesh," or because it was thought unnecessary to mention such a connection.

- The expression "born at home or abroad" has been generally understood as equivalent to "in current of wellstock," i.e., the daughter of a father's concubine; but it may also be regarded as a restatement of the preceding words, and as meaning "one born to the father, or mother, in a former marriage" (comp. Deut. xxi. 15). In the second and third cases specified in ver. 9 and 11 is not evident: it probably consists in this, that ver. 9 prohibits the union of a son of the first marriage with a daughter of the second, and ver. 11 that of a son of the second with a daughter of the first. (Keil.) On the other hand Knobel (Comm. on loc.) finds the distinction in the words "wife of thy father" (ver. 11), which according to him includes the mother as well as the stepmother, and thus specifically states the first sister, while ver. 9 is reserved for the half-sister.

- The sense of this verse has been much canvassed. In connection with the question of marriage with a deceased wife's sister, it has been urged that the marginal translation, "one wife to another," is the correct one, and that the prohibition is really directed against polygamy. The following considerations, however, support the rendering of the text: (1) The writer would hardly use the terms referred to "wife and "sister" in a different sense in ver. 18 from that in which he assigned to them in the previous verses; (2) The usage of the Hebrew language and indeed of every language, requires that the expression "one to another" should be preceded by a plural noun. The cases in which the expression "one to another" is equivalent to "one to another," as in Ex. xxvi. 3, 5, 6, 17, Ez. i. 9, 21, ii. 18 instead of flowing, as has generally been supposed, the marginal translation, exhibits the peculiarity above noted; (3) The concept of the ancient versions is unanimous, including the LXX. (γάρθεν υ' ἀδελφήν αὐτοῦ), the Vulgate (conversum a tertio), the Syriac (νυνί τριφθο)
MARRIAGE

The law which regulates this has been named the "Levirate," from the Latin feriv, brother-in-law. The custom is supposed to have originated in that desire of perpetuating a name, which prevails all over the world, but with more than ordinary force in eastern countries, and preeminently among Israelites, who each wished to bear part in the promise made to Abraham that "in his seed should all nations of the earth be blessed" (Gen. xvii. 4). The first instance of it occurs in the patriarchal period, where Onan is called upon to marry his brother Er's widow (Gen. xxxviii. 8). The custom was confirmed by the Mosaic law, which decreed that "if brethren (i.e. sons of the same father) dwelt together (either in one family, in one house, or, as the Rabbins explained it, in contiguous properties; the first of the three senses is probably correct), and one of them died and leave no child (ben, here used in its broad sense, and not specifically son; compare Matt. xxv. 25, μη οὐκ ἐφέβησαν τοὺς... εὐχαριστήσει: Mark xii. 21; Luke xx. 28, ἀπέκρυψαν; the wife of the dead shall not marry without (i.e. out of the family) unto a stranger (one unconnected by ties of relationship); her husband's brother shall go in unto her and take her to him to wife;) not, however, without having gone through the usual preliminaries of a regular marriage. The first-born of the deceased brother is the legitimate heir, as deduced in the name of the deceased brother, i.e. became his legal heir, receiving his name (according to Josephus, Ant. iv. 8, § 23; but compare Ruth i. 2, iv. 17), and his property (Deut. xxv. 5, 6). Should the brother object to marrying his sister-in-law, he was publicly to signify his dissent in the presence of the authorities of the town, to whom the widow responded by the significant act of losing his shoe and spitting in his face, or (as the Talmudists explained it) on the ground before him (Yebam. 12, § 6) — the former signifying the transfer of property from one person to another (as usual among

tries in historical times, and were not unusual among the Hebrews themselves in the pre-Mosaic age. For instance, marriages with half-sisters by the same father were allowed at Athens (Plutarch, Clair, p. 4, Themistocles, p. 32), with half-sisters by the same mother at Sparta (Philo, de Spec. Leg. p. 779), and with full sisters in Egypt (Diodor. i. 27) and Persia, as illustrated in the well-known instances of Pythomy Philo of Philadeph in the former (Paus. i. 7, § 1), and Cambyses in the latter country (Herod. iii. 31). It was even believed that in some nations marriages between a son and his mother were not unusual (Ov. Met. x. 331; Eurip. Androm. p. 174). Among the Hebrews we have instances of marriage with a half-sister in the case of Abraham (Gen. xx. 12), with an aunt in the case of Amram (Ex. vi. 20), and with two sisters at the same time in the case of Jacob (Gen. xxix. 20). Such cases were justifiable previous to the enactments of Moses; subsequently to them we have no case in the O. T. of actual marriage within the degrees, though the language of Tamar towards her half-brother Amnon (2 Sam. xiii. 13) implies the possibility of their union with the consent of their father. The Hebrids committed some violent breaches of the marriage law. Herod the Great married his half-sister (Ant. xvii. 1, § 3); Archelaus his brother's widow, who had children (xxiv. 13, § 1); Herod Antipas his brother's wife (xxiv. 5, § 1; Matt. iv. 3). In the Christian Church we have an instance of marriage with a father's wife (1 Cor. v. 1), which St. Paul characterizes as 'fornication' (πορνεία), and visits with the severest condemna tion. The third ground of the prohibitions, social convenience, comes forward solely in the case of marriage with two sisters simultaneously, the effect of which would be to "sex" or irrevocably take the first wife, and produce domestic jars.

A remarkable exception to these prohibitions existed in favor of marriage with a deceased brother's wife, in the event of his having died childless.

a Various attempts have been made to reconcile this language with the Levitical law. The Rabbinical explanation was that Tamar's mother was a heathen at the time of her birth, and that the law did not apply to such unions (Josephus, Ant. xviii. 1, § 3; and St. Jerome, loc.). The language is now generally interpreted as a mere turn on the part of Tamar to evade Amnon's importunity; but, if the marriage were out of the question, she would hardly have tried such a poor device. Thenius (Comm. in loc.) considers that the Levitical prohibitions applied only to cases where a disruption of family bonds was likely to result, or where the motives were of a gross character; an argument which would utterly abrogate the authority of this and every other absolute law.

b The expression רתי תשו' admits of another explanation, "to pack together," or combine the two in one marriage, and thus confound the nature of their relations to one another. This is in one respect a preferable meaning, inasmuch as it is not clear why two sisters should be more particularly irritated than any two not so related. The usage, however, of the cognate word רתי תשו' in 1 Sam. i. 6, favors the sense usually given; and in the Mishna רתי תשו' is the usual term for the wives of a polygamy (Mishna, Yebam. i. § 1).

c The Talmudical term for the obligation was yibhom (ייחום), from yibh (ייחב), husband's brother: hence the title yehomath of the treatise in the Mishna for the regulation of such marriages. From the same root comes the term yibham (ייחם), to contract such a marriage (Gen. xxviii. 9).

d The reason here assigned is hardly a satisfactory one. May it not rather have been connected with the purchase system, which would reduce a wife into the position of a chattel or messtaphi, and give the survivors a monetary interest in her? There is some support from the statement in Haxthausen's Transc. i. 404, that among the Ossetes, who have a Levirate law of their own, in the event of none of the family marrying the widow, they are entitled to a certain sum from any other husband whom she may marry.

e The position of the issue of a Levirate marriage, as compared with other branches of the family, is exhibited in the case of Tamar, whose son by her father-in-law, Judah, became the head of the family, and the "mandol through whom the Messiah was born (Gen. xxviii. 29; Matt. i. 3).

f The technical term for this act was khalitah (ךלאית), from khalat (ךלאת), to draw off. It is of frequent occurrence in the treatise Yebamoth, where minute directions are given as to the manner in which the act was to be performed; e. g. that the shoe was to be of leather, or a sandal furnished with a heel-stop; a flat shoe or a sandal without a strap would not do (Yebam. 12, §§ 1. 2). The khalitah was not valid when the person performing it was deaf and dumb (§ 4), as he could not learn the precise formula which accompanied the act. The custom is retained by the Moslems, and is entertained by the Picart (Ceremonies Religieuses, i. 25). It receives
MARRIAGE

the Indians and old Germans, Kill. Archiök. ii. 90), the latter the contempt due to a man who refused to perform his just obligations (Dent. xxv. 7-11; Ruth iv. 6-11). In this case it was permitted to the next of kin to come forward and to claim both the wife and the inheritance.

The Levirate marriage was not peculiar to the Jews; it has been found to exist in many eastern countries, particularly in Arabia (Bareckhard's Notes i. 112; Niederh. Voyage, p. 61), and among the tribes of the Caucuses (Hasthansen's Teaxnvoxopri, p. 463). The Moslem law brings the widow into harmony with the general prohibition against marrying a brother's wife by restricting it to cases of childlessness; and it further secures the marriage bond as founded on affection by relieving the brother of the obligation whenever he was averse to the union, instead of making it compulsory, as in the case of Omna (Gen. xxxix. 9).

One of the results of the Levirate marriage would be in certain cases the consolidation of two properties in the same family; but this does not appear to have been the object contemplated.

The Levirate law offered numerous opportunities for the exercise of that spirit of conciliation, for which the Jewish teachers are so conspicuous. One such case is brought forward by the Talmudists for the sake of expounding our Lord, and turns upon the complications which would arise in the world to come in the event of the existence of which the Sanders sought to invalidate) from the circumstance of the same woman having been married to several brothers (Matt. xxii. 23-30).

The Rabbinical solution of this difficulty was that the wife would revert to the first husband: our Lord on the other hand subverts the hypothesis on which the difficulty was based, namely, that the material conditions of the present life were to be carried on in the world to come; and thus He asserts the true character of marriage as a temporary and merely human institution. Numerous difficulties are suggested, and minute regulations hid down by the Talmudic writers, the chief authority on the subject being the book of the Mishna, entitled Talmud. From this we gather the following particulars, as illustrating the working of the law. If a man stood within the prohibited degrees of relationship in reference to his brother's widow, he was exempt from the operation of the law (2, § 31), and if he were on this or any other account exempt from the obligation to marry one of the widows, he was also from the obligation to marry any of them (1, § 1).

The marriage of Absalom was also from the obligation to marry any of them (1, § 1), it is also implied that it was only necessary for one brother to marry one of the widows, in cases where there were several widows left. The marriage was not to take place within three months of the husband's death (4, § 10). The eldest brother ought to perform the duty of marriage: but, on his declining it, a younger brother might also do it (2, § 8, § 5). The kholotzh was regarded as involving the prohibited degrees (4, § 7). Special rules are laid down for cases where a woman married under a false impression to a woman's husband (10, § 1), or where a mistake took place as to whether her son or her husband died first (10, § 3), or in the latter case the Levirate law would not apply: and again as to the evidence of the husband's death to be produced in certain cases (caps. 15, 16).

From the prohibitions expressed in the Bible, others have been deduced by a process of inferential reasoning. Thus the Talmudists added to the Levitical relationships several remoter ones, which they termed secondary, such as grandmother and great-grandmother, great-grandchild, etc.: the only points in which they at all touched the Levitical degrees were, that they added (1) the wife of the father's uncle, brother under the idea that in the text the brother described was only by the same father, and (2) the brother's mother's wife, for which they had no authority (Selden, Ex. i. 2). Considerable differences of opinion have arisen as to the extent to which this process of reasoning should be carried, and conflicting laws have been made in different countries, professing to be based on the same original authority. It does not fall within our province to do more than endeavor to point out in what respects and to what extent the Biblical statements bear upon the subject. In the first place we must observe that the design of the legislator apparently was to give an exhaustive list of prohibitions: for he not only gives examples of degrees of relationship, but he specifies the prohibitions in cases which are strictly parallel to each other, e. g., son's daughter and daughter's daughter (Lev. xii. 10), not only his wife's sister and his wife's sister's daughter (ver. 17); whereas, had he wished only to exhibit the prohibited degree, one of these instances would have been sufficient. In

Illustration from the expression used by the modern Arabs, in speaking of a repudiated wife, 'she was my slipper; I have cast her off' (Bareckhard's Notes., i. 113).

The variations in the usage of the Levirate marriage are worthy of notice. Among the Greeks in Georgia the marriage of the widow takes place if there are children, and may be contracted by the father as well as the brother of the deceased husband. If the widow has no children, the widow is purchasable by another husband, as already noticed. Hasthansen, pp 483, 484. In Arabia, the right of marriage is extended from the brother's widow to the cousin. Neither in this nor in the case of the brother's widow is the marriage compulsory on the person who was in any way used, though in the former the man can put a veto upon any other marriage (Bareckhard, Notes., i. 112, 113). Another development of the Levirate principle may perhaps be noticed in the privilege which the king is said to have succeed to the throne as well as the throne of his predecessor (2 Sam. xii. 8). Hence Absalom's public seizure of his father's wives was not only a

branch of morality, but beheld his usurpation of the throne (2 Sam. xiv. 22). And, so again, Adonijah's request for the hand of Abishag was regarded by Solomon as almost equivalent to demanding the throne (1 K. ii. 22).

The history of Ruth's marriage has led to some misconception on this point. Boaz stood to Ruth in the position, not of a Levir, for he was only her husband's cousin, but of a Goel, or redeemer in the second degree A. V. 'near kinsman' (ver. 3); as such, he redeemed the inheritance of Naomi, after the refusal of the redeemer in the nearest degree, in conformity with Lev. xxv. 25. It appears to have been customary for the redeemer at the same time to marry the heathen, but no custom is not founded on any written law. The writer of the book of Ruth, according to Selden (De Sacro, cap. 15), confesses the laws relating to the Goel and the Levir, as Josephus (Ant. x. 3, § 4) has unambiguously done; but this is an unnecessary assumption: the custom is one that may well have existed in conformity with the spirit of the law of the Levirate marriage.
the second place it appears certain that he did not regard the degree as the text of the prohibition; for he establishes a different rule in regard to a brother's widow and a deceased wife's sister, and the degree of relationship in each case strictly parallel. It cannot, therefore, in the face of this express enactment be argued that Moses designed his countrymen to infer that marriage with a niece was illegal because that with the aunt was, nor yet that marriage with a mother's brother's wife was included in the prohibition of that with the father's brother's wife, although the statement is made as to the legality of these two latter, the rule of interpretation casually given to us in the first must be held to apply to them also. In the third place, it must be assumed that there were some tangible and even strong grounds for the distinctions noted in the degrees of equal distance: and it then becomes a matter of importance to ascertain whether these grounds are of perpetual force, or arise out of a peculiar state of society or legislation; if the latter, then it seems justifiable to suppose that on the alteration of that state we may recur to the spirit rather than the letter of the enactment, and may infer prohibitions which, though not existing in the Levitical law, may yet be regarded as based upon it.

The cases to which these remarks would most pointedly apply are marriage with a deceased wife's sister, a niece, whether by blood or by marriage, and a maternal uncle's widow. With regard to the first and third of these, we may observe that the Hebrews regarded the relationship existing between the wife and her husband's family, as of a closer nature than that between the husband and his wife's family. To what extent this difference was supposed to hold good we have no means of judging; but as illustrations of the difference we may note (1) that the husband's brother stood in the special relation of levir to his brother's wife, and was subject to the law of Levirate marriage in consequence; (2) that the nearest relation on the husband's side, whether brother, nephew, or cousin, stood in the special relation of protev, or avenger of blood to his widow; and (3) that an heiress was regarded as being more closely identified with the father's side. As no corresponding obligations existed in reference to the wife's or the mother's family, it follows almost as a matter of course that the degree of relationship must have been regarded as different in the two cases, and that prohibitions might on this account be applied to the one, from which the other was exempt. When, however, we transplant the Levitical regulations from the Hebrew to any other commonwealth, we are fully warranted in taking into account the temporary and local conditions of relationship in each, and in extending the prohibitions to cases where alterations in the social or legal condition have taken place. The question to be fairly argued, then, is not simply whether marriage within a certain degree is or is not permitted by the Levitical law, but whether, allowing the setting aside of such explicit statements as Nephilim, it appears in conformity with the general spirit of that law. The ideas of different nations as to relationship differ widely; and, should it happen that in the social system of a certain country a relationship is, as a matter of fact, regarded as an intimate one, then it is clearly permissible for the rulers of that country to prohibit marriage in reference to it, not on the ground of any expressed or implied prohibition in reference to it in particular in the book of Leviticus, but on the general ground that Moses intended to prohibit marriage among near relations. The application of such a rule in some cases is clear enough; no one could hesitate for a moment to pronounce marriage with a brother's widow, even in cases where the Mosaic law would permit it, as absolutely illegal in the present day; inasmuch as the peculiar obligation of the Levirate marriage has been abolished, and we could hesitate to extend the prohibition from the paternal to the maternal uncle's widow, now that the peculiar differences between relationships on the father's and the mother's side are abolished. With regard to the vexed question of the deceased wife's sister we refrain from expressing an opinion, inasmuch as the case is still in life: under the rule of interpretation we have already laid down, the case stands thus: such a marriage is not only not prohibited, but actually permitted by the letter of the Mosaic Law; but it remains to be argued (1) whether the permission was granted under peculiar circumstances; (2) whether those or strictly parallel circumstances exist in the present day; and (3) whether, if they do not exist, the general tenor of the Mosaic prohibitions would, or would not, justify a deviation from the law in extending the prohibition to such a relationship on the authority of the Levitical law. In what has been said on this point, it must be borne in mind that we are viewing the question simply in its relation to the Levitical law: with the other arguments pro and con bearing on it, we have at present nothing to do. With regard to the marriage with the niece, we have some difficulty in suggesting any sufficient ground on which it was permitted by the Mosaic law. The Rabbinical explanation, that the distinction between the aunt and the niece was based upon the respectus perpetua, which would not permit the aunt to be reduced from her natural seniority, but at the same time would not object to the elevation of the niece, cannot be regarded as satisfactory: for, though it explains to a certain extent the difference between the two, it implies the prohibition of marriage within the degree of the aunt, and consequently the permission of that with the niece, on a wrong basis: for in Lev. xx. 19 consanguinity, and not respectus perpetua, is stated as the ground of the prohibition. The Jews appear to have availed themselves of the privilege without scruple: in the Bible itself, indeed, we have but one instance, and that not an unblemished one, in the case of Othniel, who was probably the brother of Caleb (Jos. xv. 17), and, if so, then the uncle of Achaiah his wife. Several such marriages are noticed by Josephus, as in the case of Joseph, the nephew of Onias (Ant. xii. 4, § 6), Herod the Great (Ant. xvii. 1, § 3), and Herod Philip (Ant. xviii. 3, § 1). But on whatever ground they were formerly permitted, there can be no question as to the propriety of prohibiting them in the present day.

2. Amongst special prohibitions we have to notice the following: (1.) The high-priest was forbidden to marry any except a virgin selected from his own people, i. e. an Israelite (Lev. xxi. 13, 14). He was thus exempt from the action of the Levirate law. (2.) The priests were less restricted in their choice; they were only prohibited from marrying rigid: they could marry only maidens of Israelitish origin or the widows of priests.
prostitutes and divorced women (Lev. xxi. 7). (3.) Heiresses were prohibited from marrying out of their own tribe; with the view of keeping the posses- sions and inheritance of the several tribes intact (Num. xxxvi. 5-9; comp. Tob. vii. 10). (4.) The wife in physical powers were not to intermarry with Israelites by virtue of the regulations in Deut. xxii. 1. (5.) In the Christian Church, bishops and deacons were prohibited from having more than one wife (1 Tim. iii. 2, 12), a prohibition of an ambiguous nature, inasmuch as it may refer (1) to polygamy in the ordinary sense of the term, as explained by Theodoret (in loc.); and most of the Fathers; (2) to marriage after the decease of the first wife; or (3) to marriage after divorce during the lifetime of the first wife. The probable sense is second marriage of any kind whatever, including all the three cases alluded to, but with a special reference to the last, which were allowable in the case of the heirs, while the first was equally forbidden to all. The early Church generally regarded second marriage as a disqualifica- tion for the ministry, though on this point there was not absolute unanimity (see Bingham, Ant. iv. 5, § 1-3). (6.) A similar prohibition applied to those who were candidates for admission into the ecclesiastical order of bishops, whatever that order may have been (1 Tim. v. 9); in this case the words "he may not" can only be interpreted by the two cases, (a) re-marriage after the decease of the husband, or (b) after divorce. That divorce was obtained sometimes at the instance of the wife, is implied in Mark x. 12, and 1 Cor. vii. 11, and is alluded to by several classical writers (see Whitley, in loc.). But St. Paul probably refers to the general question of re-marriage. (7.) With regard to the general question of the re-marriage of divorced persons, there is some difficulty in ascertaining the sense of Scripture. According to the Mosaic Law, a wife divorced at the instance of the husband might marry whom she liked; but if her second husband died or divorced her she could not revert to her first husband, on the ground that, as far as he was concerned, she was "defiled" (Deut. xxiv. 2-4); we may infer from the statement of the ground, that there was no objection to the re-marriage of the original parties, if the divorced wife had remained unmarried in the interval. If the wife was divorced on the ground of adultery, her re-marriage was impossible, inasmuch as the punish- ment for such a crime was death. In the N. T. there are no direct precepts on the subject of the re-marriage of divorced persons. All the remarks bearing upon the point had a primary reference to an entirely different subject, namely, the abuse of divorce. For instance, our Lord's declarations in Matt. v. 32, xiv. 9, applying as they expressly do to the case of a wife divorced on other grounds than that of unfaithfulness, and again St. Paul's, in 1 Cor. vii. 11, presupposing a contingency which he himself had prohibited as being improper, cannot be regarded as directed to the general question of re-marriage. In applying these passages to our own circumstances, due regard must be had to the peculiar nature of the Jewish divorce, which was not, as with us, a judicial proceeding based on evidence and pronounced by authority, but the arbitrary, and sometimes capricious act of an in- individual. The assertion that a woman divorced on improper and trivial grounds is made to commit adultery, does not therefore bear upon the question of a person divorced by judicial authority: no such cases are before our Lord's supposed pronouncements. All events it would take place only in connection with the question of what form adequate grounds for divorce. The early Church was divided in its opinion on this subject (Bingham, Ant. xxii. 2, § 12). [Divorce. Amer. ed.]

With regard to age, no restriction is pronounced in the Bible. Early marriage is spoken of with approval in several passages (Prov. ii. 17, v. 18; Is. vii. 5), and in reducing this general statement to the more definite one of years, we must take into account the very early age at which persons arrive at puberty in oriental countries. In modern Egypt marriage takes place in general before the bride has attained the age of 16, frequently when she is 12 or 13, and occasionally when she is only 10 (Lane, i. 298). The Talmudists forbid marriage in the case of a man under 15 years and a day, and in the case of a woman under 12 years and a day (Buxtorf, Synogog. cap. 7, p. 143). The usual age appears to have been higher, about 18 years.

Certain days were fixed for the ceremonies of betrothal and marriage — the fourth day for virgins, and the fifth for widows. The more modern Jews similarly appoint different days for virgins and widows. Wednesday and Friday for the former, Thursday for the latter (Picart, i. 240).

11. The customs of the Hebrews and of oriental nations generally, in regard to the preliminaries of marriage, as well as the ceremonies attending the rite itself, differ in many respects from those with which we are familiar. In the first place, the choice of the bride devolved not on the bridegroom himself, but on his relations or on a friend deputed by the bridegroom for this purpose. Thus Abra- ham sends Eliezer to find a suitable bride for his son Isaac, and the narrative of his mission affords one of the most charming pictures of patriarchal life (Gen. xxiv.). Hagar chose a wife for Ishmael (Gen. xxii. 21); Isaac directs Jacob in his choice (Gen. xxxii. 1); and Jacob selects a wife for Esau (Gen. xxxii. 6). It does not follow that the bridegroom's wishes were not consulted in this arrangement; on the contrary, the parents made proposals at the instigation of their sons in the instances of Shechem (Gen. xxxiv. 4, 8) and Samson (Judg. xiv. 1-10). A marriage contracted without the parents' interference was likely to turn out, as in Esau's case, "a grief of mind" to them (Gen. xxxvi. 35, xxvii. 46). As a general rule the proposal originated with the family of the bridegroom; occasionally, when there was a difference of rank, this rule was reversed, and the bride was offered by her father, as by Jethro to Moses (Ex. xiv. 21), by Caleb to Oholibam (Num. xxiv. 17), and by Saul to David (1 Sam. xviii. 27). The imaginary case of women soliciting husbands (Is. iv. 1) was designed to convey to the mind a picture of the ravages of war, by which the greater part of the males had fallen. The consent of the maiden was sometimes asked (Gen. xxiv. 58); but this appears to have been subordinate to the previous consent of the father and the aunt brothers (Gen. xxiv. 51, xxiv. 11). Occasionally the whole business of selecting the wife was left in the hands of a friend, and hence the case might arise which is supposed by the Tal-
MARRIAGE

mattan. Thus Shechem offers "never so much dowry and gift" (Gen. xxxiv. 12), the former for the bride, the latter for the relations. It has been supposed indeed that the mohar was a price paid down to the father for the sake of his daughter. Such a custom undoubtedly prevails in certain parts of the East at the present day, but it does not appear to have been the case with free women in patriarchal times; for the daughters of Laban make a matter of complaint that their father had bargained for the services of Jacob in exchange for their hands, just as if they were "strangers" (Gen. xxxi. 15); and the permission to sell a daughter was restricted to the case of a "servant" or secondary wife (Ex. xxi. 7): nor does David, when complaining of the non-completion of Saul's bargain with him, use the expression "I bought for," but "I espoused to me for an hundred foreskins of the Philistines" (2 Sam. iii. 14). The expressions in Hos. iii. 2, "So I bought her to me," and in Ruth iv. 10, "Ruth have I purchased to be my wife," certainly appear to favor the opposite view: it should be observed, however, that in the former passage great doubt exists as to the correctness of the translation; and that in the latter the case

The point now at issue is stated too strongly in the text, by saying that it has been supposed that it was a price paid down to the father for the sake of his daughter. The customary present to the father, in return for the gift of his daughter in marriage, originating in such a custom, continued to be expressed by this word, though only an honorary acknowledgment of the favor shown by him in bestowing his daughter's hand. This view of the case disposes, substantially, of the objections urged in the text. But it may be added, that the statement there made of the grounds of complaint, on the part of Laban's daughters, is an unnecessary and forced construction of the language in ch. xxxi. 15. Laban's right to require Jacob's service, in return for giving them in marriage, was not questioned by Jacob, nor, so far as appears, by them. (See Gen. xxix. 15, 18, 20.) The natural con

struction of their complaint is, that they are treated, in all respects, as aliens, and not as of his own flesh and blood. Similar to this, in effect, is Jacob's complaint in ch. xxxii. 42. "Surely thou wouldst not have sent me away, excepted that the LorD had made peace between me and thee, and between my brethren." In the case of David and Saul the mohar is expressly declined by the latter (1 Sam. xviii. 25): and in place of it, he accepts the proofs that a hundred Philistines have been slain, to be avenged of the king's enemies. Evidently, this requirement was made by the king on his own interest, and in place of the usual present to the father. For this reason, as well as on the general ground above stated, that the mohar had become only an honorary present to the father, David could say (2 Sam. iii 14) "I espoused," etc., instead of "I bought.""

T. J. C.

a לְָּ. The importance of presents at the time of betrothal appears from the application of the term תַּּ(לַּ) to a wife, in the sense of agreeing over from one to another in exchange, and hence to take in exchange (through a gift). לַּּ, a wife, i. e. to marry, Ex. xxiii. 15. He defines לַּּ (לַּּ) "a gift, a marriage gift or price, paid to the parents of the wife." In Ex. xxiii. 15, 16 (A. V. 16, 17) the offender, in the case supposed, is required to pay the usual purchase-money to the parent, the latter being allowed to give the daughter in marriage or not, at his own option. According to the purchase-money of virgins means the sum usually paid for a virgin received in marriage. The expression, "he shall pay money," in its immediate connection with the clause, "if her father utterly refuse to give her unto him," certainly implies that it shall be paid to the "father."
MARRIAGE

MARRIAGE

would not be conclusive, as Ruth might well be
considered as included in the purchase of her prop-
erty. It would undoubtedly be expected that the
nuhorn should be proportioned to the position of the
bride, and that a poor man could not on that ac-
count afford to marry a rich wife (1 Sam. xixii.
23). Occasionally the bride received a dowry (1
from her father, as instanced in the cases of Caleb's
(Dulg. i. 53) and Pharaon's (1 K. ix. 16) daugh-
ters. A "settlement," in the modern sense of the
term, (i.e. a written document securing property)
was sometimes made to the wife, did not come into use till the post-
Babylonian period; the only instance we have of
one is in Tob. vii. 14, where it is described as an "instruments" (συγγραφή).
The Talmudists styled it a kribab, and have laid down minute
directions as to the disposal of the sum secured, in a treatise
of the Mishna expressly on that subject, from
which we extract the following particulars.

The peculiarity of the Jewish kribah consisted in this,
that it was a definite sum, varying not according to the
circumstances of the parties, but according to the
state of the bride, whether she be a spinster, a
widow, or a divorced woman (1, § 2); and further,
that the dowry could not be claimed until after the
marriage by the termination of the husband's interest
in the dowry (5, § 1), although an interest might be
made to the wife person (see § 8). Subsequently to betrothal a woman lost all power
over her property, and it became vested in the hus-
band, unless he had previously to marriage rec-
nounced his right to it (§ 8, § 3, § 1). Stipulations
were entered into for the increase of the kribah,
when the bride had a handsome allowance (6, § 3).
The act of betrothal was celebrated by a feast
and gifts, and among the more modern Jews it is the
custom in some parts for the bridegroom to place a
ring on the bride's finger (Pirke i. 239) — a custom
which also prevailed among the Romans (Dict.
of Ant. p. 69). Some writers have endeavored
to prove that the rings noticed in the O. T. (Ex.
xxv. 22; Is. lii. 21) were murtal rings, but there is
not the slightest evidence of this. The ring was
nevertheless regarded among the Jews as a
3 token of fidelity (Gen. xii. 42), and of adoption
into a family (Luke xv. 22). According to Selden
it was originally given as an equivalent for dowry-
money (Leg. Ecburiae. ii. 14). Between the be-
trothal and the marriage an interval elapsed,
var-
ing from a few days in the patriarchal age (Gen.
xxiv. 55), to a full year for virgins and a month for
widows in later times. During this period the
bride-elect lived with her friends, and all communi-
cation between herself and her future husband was
conducted on through the medium of a friend deputed
for the purpose, termed the "friend of the bride-
groom" (John iii. 29). She was now virtually
regarded as the wife of her future husband; for it
was a maxim of the Jewish law that betrothal was
of equal force with marriage (Phil. De spec. leg.
788). Hence faithfulness on her part, and punish-
ment with death (Deut. xxii. 24, 25), the hus-
band having, however, the option of "putting her
away" (Matt. i. 19) by giving her a bill of divorce-
ment, in case he did not wish to proceed to such
an extreme punishment (Deut. xxiv. 1). False
accusations on this ground were punished by a
severe fine and the forfeiture of the right of divorce
(Deut. xxii. 13-19). The betrothed woman could
not part with her property after betrothal, except
in certain cases (K-tub, § 1); and, in short, the
bond of matrimony was as fully entered into by
betrothal, as with us by marriage. In this respect
we may compare the practice of the Athenians,
who regarded the formal betrothal as indispensable
to the validity of a marriage contract (Dict. of Ant.
Nestorians, xxvii. 1). Among the Talmudists there
are several points of similarity in respect both to
the mode of effecting the betrothal and the importance
attached to it (Garni's Nestorians, pp. 197, 198).

We now come to the wedding itself: and in this
the most observable point is, that there were no
definite religious ceremonies connected with it. It
is probable, indeed, that some formal ratification
of the espoused with an oath took place, as implied
in some allusions to marriage (Ex. xvii. 6; Mal. ii.
14), particularly in the expression, "the covenant
of her God" (Is. xvi. 7), as applied to the mar-
riage bond, and that a blessing was pronounced
(Deut. xxiv. 6; Ruth iv. 11, 12) sometimes by the
parents (Tob. vii. 13). But the essence of the
marriage ceremony consisted in the removal of the
bride from her father's house to that of the
bridegroom for his father.

The bridegroom prepared himself for the occa-
sion by putting on a festive dress, and especially
by placing on his head the handsomely turban described
by the term pry, (Is. lii. 10; A. V. "ornaments"),
and a murtal crown or garland (Cant. iii. 11); he
was red-hot of myrrh and frankincense and "all

The technical term of the Talmudists for the dow-
y which the bride brought to her husband, answering to
the daz of the Latin, was Νυνια.

b Νυνια, literally "a giving." The term was
especially applied to the sum settled on the wife
by the husband, answering to the Latin donatio prope-
naupis.

c The practice of the modern Egyptians illustrates
this; for with them the dowry, though its amount diff-
ers according to the wealth of the owner, is still gradu-
ately increased by the state of the parties. A certain
portion only of the dowry is paid down, the rest being
held in reserve (Lane, i. 214). Among the modern Jews
also the amount of the dowry varies with the
state of the bride, according to a fixed scale (Pirke.
i.
239).

d The amount of the dowry, according to the Mosi-
aw law, appears to have been fifty shekels (Ex. xxii.
17), compared with Deut. xxii. 29.

e The technical term used by the Talmudists for
betrothal was kibob (κιβόβ), derived from

f It is worthy of observation that there is no term
in the Hebrew language to express the ceremony of
marriage. The substantive chotonah (חטונית) occurs
but once, and then in connection with the day
(Cant. iii. 11). The word "wedding," does not occur at
all in the A. V. of the Old Testament.

g There seems indeed to be a literal truth in the
Hebrew expression "to take a wife" (Num. xxi. 1; I
Chr. ii. 21), for the ceremony appears to have mainly
consisted in the taking. Among the modern Arabs
the same custom prevails, the capture and removal of
the bride being effected with a considerable show of
violence (Barkanrths, Nc.x, i. 108).

h The bridegroom's crown was made of various ma-
terials — flowers, rushes, or straw (myrtle, or olive), ac-
\ding to his circumstances (Selden, In, Chr. ii. 15). The
use of the crown at marriages was familiar both to the
Greeks and Romans (Dict. of Ant., Convos.)
powders of the merchant" (Cant. iii. 6). The bride prepared herself for the ceremony by taking a bath, generally on the day preceding the wedding. This was probably in ancient as in modern times a formal preceding, accompanied with considerable pomp (Pierart, i. 240; Lane, i. 217). The notices of it in the Bible are so few as to have escaped general observation (Ruth iii. 3; Ez. xxiii. 40; Eph. v. 26, 27); but the passages cited establish the antiquity of the custom, and the expressions in the last ("having purified her by the laver of water," c.) not having that which have evident reference to it. A similar custom prevailed among the Greeks (Diet. of Ant. s. v. Belcher, p. 185). The distinctive feature of the bride's attire was the τησυφηνή or "veil"—a light robe of ample dimensions, which covered not only the face but the whole person (Gen. xxiv. 63; comp. xxxviii. 14, 15). This was regarded as the symbol of her submission to her husband, and hence in 1 Cor. xi. 10, the veil is apparently described under the term εὐωδία, "authority." She also wore a peculiar girdle, named λαθρήσεως, b the "attire" (A. V.), which no bride could forget (Jer. iii. 32); and her head was crowned with a chaplet, which was again so distinctive of the bride, that the Hebrew term κοιλήθη, c "bride," originated from it. If the bride were a virgin, she wore her hair flowing (Keilab, 2, § 1). Her robes were white (Rev. v. 8), and sometimes embroidered with gold thread (Ps. xlv. 13, 14), and covered with perfumes (Is. xlv. 8): she was further decked out with jewels (Is. xlix. 18, ki. 10; Rev. xxi. 2). When the fixed hour arrived, which was generally late in the evening, the bridegroom set forth from his house, attended by his grooms, termed in Hebrew וְרֹמֵי אֱלֹהִים d (A. V. "companions; Judges, xiv. 11), and in Greek αἵοι τοῦ ἰδιοῦ (-) (A. V. "children of the bride-chamber;" Matt. ix. 15), preceded by a band of musicians or singers.

a ἔναντι. See article on Dress. The use of the veil was not peculiar to the Hebrews. It was customary among the Greeks and Romans; and among the latter it gave rise to the expression νηρον, literally "to veil," and hence to our word "nuptial." It is still used by the Jews (Pierart, i. 211). The modern Egyptians envelop the bride in an ample shawl, which perhaps resembles more that thing else resembles the Hebrew τσαίφ (Lane, i. 230).

b יְרָמֵי. Some difference of opinion exists as to this term. (Genesis.) The girdle was an important article of the bride's dress among the Romans, and gave rise to the expression σωλερτον ζωναν.

c יִלָּחְתָן. The bride's crown was either of gold or gilded. The use of it was interdicted after the destruction of the second Temple, as a token of humiliation (Selden, Ux. Ebor. ii. 15).

d יְרָמֵי. Winer (Rwb. s. v. "Hochzeit") identifies the "children of the bride-chamber" with the shoshbenim (שׁוֹשְׁבְּנִים) of the Talmudists. But the former were the attendants on the bridegroom alone, while the shoshbenim were two persons selected on the day of the marriage to represent the interests of bride and bridegroom, apparently with a special view to any possible litigation that might subsequently arise on the subject noticed in Deut. xxii. 15-21 (Selden, Ux. Ebor. ii. 16).

e Concerning the λαθρήσεως of the Greeks (Aristoph. avar. 1317). The lamps described in Matt. xvi. 7 would be small hand-lamps. Without them none could join the procession (Trench's Parables, p. 257 note).

f The bride was said to "go to" (קָנַת אֶל), the house of her husband (Josh. xv. 18; Judges, i. 14): an expression which is worthy of notice, inasmuch as it has not been rightly understood in Dn. xi. 9, where perhaps the author intended to apply the term to the "voice of the bridegroom." The bringing home of the bride was regarded in the later days of the Roman empire as one of the most important parts of the marriage ceremony (Bingham, Ant. xxii. 4, § 7).

g From the joyous sounds used on these occasions the term καλος (καλά) is applied in the sense of marrying in Ps. lixv. 65; A. V. "their maidens were not given to marriage," literally, "were not abused," as in the Vulgate. This sense appears in the case of the LXX., εἰκὼν τινα, which is adopted by Gesenius (Tors. p. 593). The noise in the streets, attendant on an oriental wedding, is excessive, and enables us to understand the allusion in Jeremiah to the "voice of the bridegroom and the voice of the bride." A The feast was regarded as so essential a part of the marriage ceremony, that χορηγὸσ γάλακτος acquired the specific meaning "to celebrate the marriage-feast" (Gen. xxix. 22; Esther ii. 18; Tob. viii. et al; 1 Marc. ix. 37, x. 58, LXX. ; Matt. xxii. 4, xxv. 10; Luke xiv. 8), and sometimes to celebrate any feast (Keth. ii. 22).
ii. 10), where a canopy, named ḍānihā a was prepared (Ps. xix. 5; Joel ii. 16). The bride was still completely veiled, so that the deception practiced on Jacob (Gen. xxix. 25) was very possible. If proof could be subsequently adduced that the bride had not preserved her maiden purity, the case was investigated; and, if she was convicted, she was stoned to death before her father's house (Deut. xxii. 13-21). A newly married man was exempt from military service, or from any public business which might draw him away from his home, for the space of a year (Deut. xxiv. 5); a similar privilege was granted to him who was betrothed (Deut. xx. 7).

Hitherto we have described the usages of marriage as well as they can be ascertained from the Bible itself. The Talmudists specify three modes by which marriage might be effected, namely, money, marriage-contract, and consummation (Kid. Alih. i. § 1). The first was by the presentation of a sum of money, or its equivalent, in the presence of witnesses, accompanied by a mutual declaration of betrothal. The second was by a written, instead of a verbal agreement, either with or without a sum of money. The third, though valid in point of law, was discouraged to the greatest extent, as being contrary to the laws of morality (Selden, Liber Brev. ii. 1, 2).

IV. In considering the social and domestic conditions of married life among the Hebrews, we must in the first place take into account the position assigned to women generally in their social scale. The exclusion of the ḥara'am and the habits consequent upon it were utterly unknown in early times, and the condition of the oriental woman, as pictured to us in the Bible, contrasts most favorably with that of her modern representative. There is abundant evidence that women, whether married or unmarried, went about with their faces unveiled.

a³ûś. The term occurs in the Mishna (Ḳeb. i. § 5), and is explained by some of the Jewish commentators to have been a bower of roses and myrtles.

The relations of husband and wife appear to have been characterized by affection and tenderness. He is occasionally described as the "friend" of his wife (Jer. iii. 28; Hos. iii. 1), and his love for her is frequently noticed (Gen. xxxiv. 67, xxv. 18). On the other hand, the wife was the consolation of the husband in times of trouble (Gen. xxiv. 67), and her grief at his loss presented a picture of the most acute woe (Joel i. 8). No stronger testimony, however, can be adduced as to the ardent affection of husband and wife, than that which we derive from the general tenor of the book of Canticles. At the same time we cannot but think that the exceptions to this state of affairs were more numerous than is consistent with our ideas of matrimonial happiness. One of the evils inseparable from polygyny is the discomfort arising from the jealousies and quarrels of the several wives, as instanced in the households of Abraham and Elkanah (Gen. xxi. 11; 1 Sam. i. 6). The purchase of wives by the small amount of liberty allowed to daughters in the choice of husbands, must inevitably have led to unhappy unions. The allusions to the misery of a contentious and brawling wife in the Proverbs (xix. 13, xxi. 9, 19, xxvii. 15) convey the impression that the infliction was of frequent occurrence in Hebrew households, and in the Mishna (Ḳeb. ii. § 5) the fate of a woman being sold is laid down as an adequate ground for divorce. In the N. T. the mutual relations of husband and wife are the subject of frequent exhortation (Eph. v. 22-33; Col. iii. 18; Tit. ii. 4, 5; 1 Pet. iii. 1-7): it is certainly a noticeable coincidence that these exhortations should be found exclusively in the epistles addressed to Asiatics, nor is it improbable that they were also applied to the canopy under which the nuptial benediction was pronounced, or to the rose spread over the heads of the bride and bridegroom (Selden, ii. 15).
MARRIAGE

were more particularly needed for them than for Europeans.

The duties of the wife in the Hebrew household were multifarious: in addition to the general super-intendence of the domestic arrangements, such as cooking, from which even women of rank were not exempted (Gen. xviii. 6; 2 Sam. xiii. 8), and the distribution of food at meal-times (Prov. xxxi. 13), the manufacture and the clothing and the various textures required in an eastern establishment devolved upon her (Prov. xxxi. 13, 21, 22), and if she were a model of activity and skill, she produced a surplus of fine linen shirts and girdles, which she sold, and so, like a well-freighted merchant-ship, brought in wealth to her husband from afar (Prov. xxxi. 14, 24).

The poetical description of a good housewife drawn in the last chapter of the Proverbs is both filled up and in some measure illustrated by the following minute description of a wife's duties towards her husband, as laid down in the Mishna: *"She must grind corn, bake, and wash, and cook, and suckle his child, make his bed, and work in wool. If she brought her husband one bondwoman, she need not grind, bake, or wash, if she need not enter the field to take and if three, she should not make his bed nor work in wool; if four, she may sit in her chair of state"* (Ketub. 5, § 5). Whatever money she earned by her labor belonged to her husband (ib. 6, § 1). The qualification not only of working, but of working at home (Tit. ii. 5, where οἰκογενεῖ αὐτοῦ is preferable to οἰκογενεῖας) was insisted on in the wife, and to spin in the street was regarded as a violation of Jewish customs (Ketub. 7, § 6).

The legal rights of the wife are noticed in Ex. xxi. 10, under the three heads of food, raiment, and duty of marriage or conjugal right. These were defined with great precision by the Jewish doctors; for thus only could one of the most cruel effects of polygamy be averted, namely, the sacrifice of the rights of the many in favor of the one whom the lord of the modern harem selects for his special attention. The regulations of the Talmudists founded on Ex. xxi. 10 may be found in the Mishna (Ketub. 5, § 6-9).

V. The allegorical and typical allusions to marriage have exclusive reference to one subject, namely, to exhibit the spiritual relationship between God and his people. The earliest form, in which the image is implied, is in the expression "to go a whoring;" and "whoredom," as descriptive of the rupture of that relationship by acts of idolatry. These expressions have by some writers been taken in their primary and literal sense, as pointing to the licentious practices of idolaters. But this destroys the whole point of the comparison, and is opposed to the plain language of Scripture: for (1) Israel is described as the false wife "a playing the harlot" (Is. i. 21; Jer. iii. 1, 6, 8); (2) Jehovah is the injured husband, who therefore divorces her (Ps. lixii. 27; Jer. ii. 20; Hos. iv. 12, ix. 1); and (3) the other party in the adultery is specified, sometimes generally, as idols or false gods (Deut. xxxii. 16; Judg. ii. 17; 1 Chr. v. 25; Ez. xx. 30, xxiii. 30), and sometimes particularly, as in the case of the worship of goats (A. V. "devils," Lev. xvii. 7, Molech (Lev. xx. 5), wizards (Lev. xx. 6), an ephod (Judg. viii. 27), Balak (Judg. viii. 33), and even the heart and eyes (Num. xx. 39)—the last of these objects being such as wholly to exclude the idea of actual adultery. The image is drawn out more at length by Ezekiel (xxxii.), who compares the kingdoms of Samaria and Judah to the harlots Aholah and Abiloh; and again by Hosea (i.—iii.), whose marriage with an adulterous wife, his separation from her, and subsequent reunion with her, were designed to be a visible lesson to the Israelites of their dealings with Jehovah.

The direct comparison with marriage is confirmed in the O. T. to the prophetical writings, unless we regard the Canticles as an allegorical work. [CANTICLES.] The actual relation between Jehovah and his people is generally the point of comparison (Is. lxv. 5, 8.; Jer. iii. 14; Hos. ii. 19; Mal. ii. 11); but sometimes the graces consequent thereon are described under the image of bridal attire (Is. xlix. 18, li. 10), and the joy of Jehovah in his Church under that of the joy of a bridegroom (Is. liii. 5).

In the N. T. the image of the bridegroom is transferred from Jehovah to Christ (Matt. ix. 13; John iii. 29), and that of the bride to the Church (2 Cor. xi. 2; Rev. xix. 7, xxi. 2, 9, xxii. 17), and the comparison thus established is converted by St. Paul into an illustration of the position and mutual duties of man and wife (Eph. v. 23—32). The suddenness of the Messiah's appearance, particularly at the last day, and the necessity of watchfulness, are inculcated in the parable of the ten virgins, the imagery of which is borrowed from the customs of the marriage ceremony (Matt. xxv. 1—13). The Father prepares the marriage feast for his Son, the joys that result from the union being thus represented (Matt. xxii. 1—14, xxv. 10; Rev. xiv. 9; comp. Matt. viii. 11), while the qualifications requisite for admission into that union are predicated of the marriage garment (Matt. xxii. 11). The breach of the union is, as before, described as fornication or whoredom in reference to the mystical Babylon (Rev. xvii. 1, 2, 5).

The chief authorities on this subject are Selden's Uxor Ephraim; Michaelis' Commentarius; the Mishnah, particularly the books Yebaruch, Ketuboth, Gittin, and Kibbushin; Buxtorf's Synopsis et Divort. Among the writers on special points we may notice Benary, de Hebr. Lexicographia, Berlin, 1845; Reischl's Lexicographie, Leipzig, 1832; and Kurtz's Ehe des Hosen, Dorpat, 1859.

W. L. B.

* MARS' HILL, another name in the A. V., Acts xxii. 22, for Areopagus, ver. 19. The name is the same in Greek (τὸ Ἀρεόπαγον), and should be the same in English. The variation seems to be without design, or certainly without any distinction of meaning; for the translators remark in the margin against both passages that Areopagus was "the highest court in Athens." The older versions of Tyndale, Cranmer, and the Genevan render "Mars strete" in both places, while Wycliffe writes "Areopage." Against the view that Paul was arraigned and tried before the court, as well where it means "tabernacle," and Nah. iii. 4, where it is equivalent to "crusty policy," just as in 2 K. ix. 22 the parallel word is "witchcraft."
MARS' HILL

as on the topography of the subject, see AiTHORAL. It is proposed here to give some account of the speech itself, which Paul delivered on this hill, and which has given to it a celebrity above all Greek, above all Roman fame.

Scholars vie with each other in their commendation of this discourse. In its suggestiveness, depth of meaning, elegance of expression, and remarkable adaptation to all the concomitants of time and place, although not the longest it is beyond question the first of all the recorded speeches of the great Apostle. De Wette pronounces it "a model of the apologetic style of discourse." The address of Paul before this assembly, says Naeumann, is "a living proof of his apostolic wisdom and eloquence. We perceive here how the Apostle, according to his own expression, could become also a heathen to the heathen, that he might win the heathen to a reception of the gospel." The skill, says Hensen, "with which he was able to bring the truth near to the Athenians, deserves admiration. We find in this discourse of Paul nothing of an ill-timed zeal, nothing like declamatory pomp. It is distinguished for clearness, brevity, coherence, and simplicity of representation." Some object that the speech has been overpraised because Paul was not enabled to bring it to a formal close. But in truth our astonishment is not that he was interrupted at length when he came to announce to them the Christian doctrine of a resurrection of the body, but that he held their attention so long while he exposed their errors and convicted them of the absurdity and sinfulness of their conduct.

The following is an outline of the general course of thought. The Apostle begins by declaring that the Athenians were more than ordinarily religious, and commends them for that trait of character. He had read on one of their altars an inscription to "an unknown God." He recognizes in that acknowledgment the heart's testimony among the heathen themselves, that all men feel the limitations of their religious knowledge and their need of a more perfect revelation. It was saying to them in effect: You are correct in acknowledging a divine existence beyond any which the ordinary rites of your worship recognize; there is such an existence. You are correct in confessing that this being is unknown to you; you have no just conception of his nature and perfections. With this introduction he passes to his theme, Whom therefore not knowing, ye worship, this one I announce unto you. He thus proceeds to guide their religious instincts and aspirations to their proper object, i.e. to teach them what God is, his nature and attributes, and men's relations to Him, in opposition to their false views and practices as idolaters (ver. 23).

In pursuance of this purpose he announces to them, first, that God is the Creator of the outward, material universe, and therefore not to be confounded with idols (ver. 24); secondly, that He is independent of his creatures, possessed of all sufficiency in Himself, and in no need of costly gifts or offerings of food and drink (ver. 25); thirdly, that He is the Creator of all mankind, notwithstanding their separation into so many nations, and their wide dispersion on the earth (ver. 26); and fourthly, that he has placed men, as individuals and nations, in such relations of dependence on Himself as render it easy for them to see that He is their Creator and Proposer; and that it is their duty so to serve Him (ver. 27, 28). The ground has thus been won for a direct application of the truth to his audience. At this point of the discourse, as we may well suppose, stretching forth his hand towards the gorgeous images within sight, he exclaims: We ought not, therefore, to suppose that the Deity is like unto gold, or silver, or stone, sculptured by the art and device of men (ver. 29). Nor is this all. That which men ought not to do, they may not with impunity any longer do. It was owing to the forbearance of God that the heathen had been left hitherto to disown the true God, and transfer to idols the worship which belongs to Him. He had borne with them as if he had not seen their willful ignorance, and would not call them to account for their idolatrous practices. But now, when He is about to teach them the true nature of His word, the gospel, they were required to repent of their iniquity and forsake it (ver. 30), because a day of righteous retribution awaited them, of which they had assurance in the resurrection of Christ from the dead (ver. 31).

Here their chievers interrupted him; but it is not difficult to conjecture what was left unsaid. The recorded examples of his preaching show that he would have held up to them more distinctly the character of Christ as the Saviour of men, and have urged them to call on his name and be saved. It is impossible to say just in what sense the Apostle imputed the resurrection of Christ as proof of a general judgment. His resurrection from the dead confirmed the truth of all his claims, and one of these was that He was to be the judge of men (John v. 28, 29). His resurrection also established the possibility of such a resurrection of all men as was implied in the Apostle's doctrine, that all men are to be raised from the dead and stand before the judgment-seat of Christ. The Apostle may have had these and similar connections of the fact in his mind; but whether he had developed them so far, when he was silenced, that the Athenians perceived them all or any of them, is uncertain. It was enough to excite their seem to hear of a single instance of resurrection. The Apostle's reference in his last words to a great day of assize for all mankind would no doubt recall to the hearers the judicial character of the place where they were assembled, but it was too essential a part of his train of thought to have been accidentally suggested by the place.

We are to recognize the predominant anti-polytheistic aim of the discourse in the prominence which Paul here gives to his doctrine with respect to the common parentage of the human race, while at the same time he thereby linked the Athenians for purposes, on account of this remarkable fitness to the occasion. H. & I. a. The Apostle's use of βασιλείαν καρπεσεως, at the opening of the speech, is a good illustration of the Apostle's way of seizing on one of the points of his text and turning the ideas into the later Christian doctrine of the kingdom of God. (See Lectures on the Character of St. Paul, p. 45, i. 194, note a, Amer. ed.) Rev. T. Kenrick's vindication of the rendering of the A. V. (Biblical Essays, pp. 108-129 Lond. 1864) shows only that the word admits of that sense.
their contempt of the other nations, especially of the Jews. If all are the children of a common parent, then the idea of a multiplicity of gods from whom the various nations have derived their origin, or whose protection they specially enjoy, must be false. The doctrine of the unity of the race is closely interwoven with that of the unity of the divine existence. But if all nations have the same Creator, it would at once occur that nothing can be more absurd than the feeling of superiority and contempt with which one affects to look down upon another. As the Apostle had to encounter the prejudice which was entertained against him as a foreigner and a Jew, his course of remark was doubly pertinent, if adapted at the same time to remove this hindrance to a candid reception of his message.

It will be seen from the foregoing sketch that it has been proposed, not without some justification, to arrange the contents of the discourse under the three heads of theology, anthropology, and Christianity. At all events it will be seen, by casting the eye back, that we have here all the parts of a perfect discourse, namely, the exordium, the proposition or theme, the proof or exposition, and the application. It is a beautiful specimen of the manner in which a powerful and well-trained mind, practiced in public speaking, conforms spontaneously to the rules of the severest logic. One can readily believe, looking at this feature of the discourse, that it was pronounced by the man who wrote the epistles to the Romans and Galatians, where we see the same mental characteristics so strongly reflected. As we must suppose, on any view of the case, that

---

a * It is worthy of notice, that although Paul spent the next two years at Corinth, so near Athens that the Acropolis of the one city may be seen from the other, he did not during that time turn his steps again to Athens. On his third missionary tour, he came once more into this part of Greece, and on the way passed Athens twice at least, and yet he did not revisit that city.

b * Zeune (ad Vict. p. 638 a) points out the mis-translation of παρεδόθηνε by "given to idolatry," instead of "full of idols." It conceals from the reader a striking mark of Luke's accuracy. No ancient city was so famous for its images as Athens.
objects and associations which bring the past and present as it were into visible contact with each other, in order to understand and feel the impression of the contrast in its full extent. Paul spoke of course in the open air. For a description of the scene under the Apostle's eye at the time, see Wordsworth's "Tours of Greece, Pictorial, Descriptive, and Historical," p. 53, also his Athens and Attica, ch. xi.; Robinson's "Bibl. Researches," i. 10 f. (where the bearing of Mars' Hill from the Acropolis should be west, instead of north). For a view of the Acropolis restored, as seen from the Areopagus, see Conybeare and Howson's "Life and Letters of St. Paul," p. 442. Siriot treats at length of the discourse, exegetically and homiletically, in his Reden der Apostel, ii. 121-169.

The events at Athens form an interesting sketch in Howson's "Seas from the Life of St. Paul," ch. vi. (Lond. 1861), and reprinted by the American Tract Society (1868). Bentley's famous "Sermon on Atheism and Deism (first of the series of Bocce Lectures, 1824) connect themselves almost historically with this address. Seven of the eight texts on which he founds the sermons are taken from Paul's Athenian speech. The topics on which the Apostle touched as the preacher enumerates them are "such as the existence, the spirituality, and self-sufficiency of God; the creation of the world; the origin of mankind from one common stock, according to the history of Moses; the divine Providence in overruling all nations and people; the new doctrine of repentance by the preaching of the gospel; the resurrection of the dead; and the appointed day of an universal judgment" (see his Works, iii. 35 f. Lond. 1838). We find here the germs of the best arguments employed in later times in controversies of the nature alluded to. Another later work furnishes a similar testimony. Mr. Merivale has recourse to Paul's sententious words for the principal text-motives prefixed to his Lectures on the "Conversion of the Roman Emperors" (Boule Lectures for 1864). It is one of those speeches of the Apostle, "from all the ideas of which" (as Schleiermacher remarks of the one at Antioch, Acts xiii.) "may be drawn lines which terminate in his peculiar doctrinal teachings in the epistles." (Stud. u. Krit. 1855, p. 590). "Nothing can be more genuinely Pauline," says Leclerc, "than the division here of history into its two great epochs, the pre-Messianic and post-Messianic, and the union of God's manifestations in creation, conscience, and redemption. It gives us in outline the fuller discussion in Rom. i. and ii." ("Das Apost. u. Nachapost. Zeitalter," p. 155). Ch. J. Trillin refers some of Baron's hypercritical objections to the genuineness of the speech (Paulus nach der Apostelgesch. p. 200 ff.). Other writers who may be consulted are F. W. Lanu, "Ueber die Areopagische Rede des Apostels Paulus" (Stud. u. Krit., 1890, pp. 583-595); Wiligut's "Apostelgeschichte," in "Biblische Untersuchungen," pp. 599-596; (29th Ann.); Lange's "Kirchengeschichte," ii. 222 f.; Gademann's "Theologische Studien," ii. 222 ff.; Gedeken's "Glaubensbegriff," p. 390 f.; Baumgarten, "Apostelgeschichte," in loc.; and Pressel, "Histoire de l'Eglise Chrétienne," ii. 17-22. See also an article on "Paul at Athens" by Prof. A. C. Kendrick, Christian Review, xxv. 55-110, and one on "Paul's Discourse at Athens: A Commentary on Acts xviii. 16-31," Bibl. Sacr., vii. 598-656.

MARSENA (ΜΑΡΣΕΝΑ, belonging, Pers., First.)

MARTHA (ΜΑΡΤHA). This name, which does not appear in the O. T., belongs to the later Aramaic, and is the feminine form of Marsēnē = Lord. We first meet with it towards the close of the 2nd century. Josephus, the Roman dictator, was addressed by a Syrian or Jewish prophetess named Martha during the Numanid war and in his campaign against the Cimbri (Plutarch, Marcus, xxvii.). Of the Martha of the N.T. there is comparatively little to be said. What is known or conjectured as to the history of the family of which she was a member may be seen under Lazarus. The facts recorded in Luke x. and John xi. indicate a character devout after the customary Jewish type of devotion, sharing in Messianic hopes and accepting Jesus as the Christ; sharing also in the popular belief in a resurrection (John xi. 21), but not rising, as her sister did, to the belief that Christ was making the eternal life to belong, not to the future only, but to the present. When she first comes before us (John xii. 1-8), as receiving her into her house (it is uncertain whether at Bethany or elsewhere), she loses the calmness of her spirit, is "cumbered with much serving," is "careful and troubled about many things." She is indignant that her sister and her Lord care so little for that for which she cares so much. She needs the proof-"one thing is needful": "but her love, though imperfect in form, has yet recognized as true, as embracing in its entirety its power (John xiv. 3). Her position here, it may be noticed, is obviously that of the elder sister, the head and manager of the household. It has been conjectured that she was the wife or widow of "Simon the leper" of Matt. xxvi. 6 and Mark xiv. 3 (Schultens, in Winer, Bib. Pent., Paulus, in Meyer, loc.; Greswell, "Disc. on the Person of Martha and Mary"). The same character shows itself in the history of John xi. She goes to meet Jesus as soon as she hears that He is coming, turning away from all the Pharisees and rulers who had come with their topics of consolation (v. 19, 20). The same spirit of complaint that she had shown before finds utterance again (ver. 21), but there is now what the prophet will not be kept from, a fuller faith at once in his wisdom and his power (ver. 22). And there is in that sorrow an education for her as well as for others. She rises from the formulas of the Pharisee's creed to the confession which no "flesh and blood," no human traditions, could have revealed to her (vv. 21-27). It was an immense step upward from the dull stupor of grief which refused to be comforted, that without any definite assurance of an immediate resurrection, she should now think of her brother as living still, never dying, because he had believed in Christ. The transition from vain fruitless regrets to this assured faith, accounts it may be for the words spoken by her at the sepulchre (ver. 39). We judge wrongly of her if we see in her an instrument of impediment or despousing unbelief. The thought of that true victory over death has comforted her, and she is no longer expecting that the power of the eternal life will show itself in the renewal of the earthly. The wonder that followed.
so less than the tears which preceded, taught her how deeply her Lord sympathized with the passionate human sorrows of which He had seemed to her so unfeeling. She was taught, has it to tell us, that the eternal life in which she had learnt to believe was no absorption of the individual being in that of the spirit of the universe — that it recognized and embraced all true and pure affections.

Her name appears once again in the N. T. She is present at the ag narrowly at Bethany as "serving" (John xix. 5). The old character shows itself still, but it has been broadened. She was not longer "cumbersome," no longer impatient. Activity has been calmed by trust. When other voices are raised against her sister's overflowing love, hers is not heard among them.

The traditions connected with Martha have been already mentioned. [Lazarus.] She goes with her brother and other disciples to Marseilles, gathers round her a society of devout women, and true to her former character, leads them to a life of active ministration. The wilder Provençal legends make her victorious over a dragon that laid waste the country. The town of Tarascon boasted of possessing her relics, and claimed as her its patron saint (Acta Synodorum, and Brev. Rom. in Jul. 29; FabriLez Evangel. p. 388).

* MARTYR occurs only in Acts xxii. 15 as the translation of μάρτυς, the proper sense of which is simply "witness," without the necessary idea of sealing one's testimony by his death as understood by our stricter use of "martyr." All the older English versions (from Wycliffe, 1380, to the Rheims, 1582) have "witness" in this passage. It was not till after the age of the Apostles that the Greek word (μάρτυς or μάρτυρας) signified "martyr," though we see it in its transition to that meaning in Acts xxii. 20 and Rev. xvii. 6. Near the close of the second century it had become so honorific a title, that the Christians at Lyons, exposed to torture and death, and fearful that they might waver in the moment of extremity, refused to be called "martyrs" (μάρτυρες). * This name," said they, "properly belongs only to the true and faithful witness, the Prince of Life: or, at least, only to those whom this testimony Christ has given their constancy to the end. We are but poor, humble, confessors, i. e. μάρτυροι. (Fasel. Hist. Eccles. v. 2.) On μάρτυς see Cremer's Wörterb. des Neust. Grächdt, p. 371 f. H.

MARY OF CLEOPHAS. So in A. V., but accurately "of Cleopas" (Mapia ζ' τοι Κλεόπα). In St. John's Gospel we read that "there stood by the cross of Jesus his mother, and his mother's sister, Mary of Cleopas, and Mary Magdalene." (John xix. 25). The same group of women is described by St. Matthew as consisting of Mary Magdalene, and Mary of James and Joses, and the mother of Zebedee's children "(Matt. xxvii. 56); and by St. Mark, as "Mary Magdalene, and Mary of James the Little and of Joses, and Salome " (Mark xv. 40). From a comparison of these passages, it appears that Mary of Cleopas, and Mary

of James the Little and of Joses, are the same person, and that she was the sister of St. Mary the Virgin. The arguments, proceeding on the affirmative side, for regarding this Mary as "Salome" (the A. V. translation) the wife of Clopas or Alphsous, and the mother of James the Little, Joses, Jude, Simon, and their sisters, have been given under the heading JAMES. There is an apparent difficulty in the fact of two sisters seeming to bear the name of Mary. To escape this difficulty, it has been suggested (1) that the two clauses "his mother's sister" and "Mary of Cleopas" are not in apposition, and that St. John meant to designate four persons as present — namely, the mother of Jesus: her sister, to whom he does not assign any name; Mary of Clopas; and Mary Magdalene (Lange). And it has been further suggested that this sister's name was Salome, wife of Zebedee (Wieseler). This is avoiding, not solving a difficulty. St. John could not have expressed himself as he does had he meant more than three persons. It has been suggested (2) that the word δεκάφης is not here to be taken in its strict sense, but rather in the laxer acceptation, which it clearly does bear in other places. Mary, wife of Clopas, it has been said, was not the sister, but the cousin of St. Mary the Virgin (see Wordsworth, Gr. Text, Preface to the English Transl. James). There is nothing in this suggestion which is objectionable, or which can be disproved. But it appears unnecessary and unlikely: unnecessary, because the fact of two sisters having the same name, though unusual, is not singular; and unlikely, because we find the two families so closely united — living together in the same house, and moving about together from place to place — that we are disposed rather to consider them connected by the nearer than the more distant tie. That it is far from impossible for two sisters to have the same name, may be seen by any one who will cast his eye over Pethan's Genealogical Tables. To name no others, his eye will at once light on a pair of Antonias and a pair of Octavius, the daughters of the same father, and in one case of different mothers, in the other of the same mother. If it be objected that these are merely gentile names, another table will give two Cleoptrats. It is quite possible too that the same cause which operates at present in Spain, may have been at work formerly in Judea. MIHIAN, the sister of Moses, may have been the holy woman after whom Jewish mothers called their daughters, just as Spanish mothers not unfrequently give the name of Mary to their children, male and female alike, in honor of St. Mary the Virgin. This is on the hypothesis that the two names are identical, but on a close examination of the Greek text, we find that it is possible that this was not the case. St. Mary the Virgin is Mapia: her sister is Mapia. It is more than possible that these names are the Greek representatives of two forms which the antique ΜΑΡΙΑ had then taken; and as in pronunciation the emphasis would have been thrown on the last syllable in Mapia, while the final letter in Mapia would have been almost unheard, there

1. by their surnames, but by the name of their father or husband, or son, e. g. "William's Mary," "John's Mary," etc.

2. Maria, Maria-Pu, and Maria-Immaculata, are the first names of three of the sisters of the late king of the Two Sicilies.
would, upon this hypothesis, have been a greater difference in the sisters' names than there is between Mary and Maria among ourselves. Mary of Clopas was probably the elder sister of the Lord's mother. It would seem that she had married Clopas or Alphaeus while her sister was still a girl. She had four sons, and at least three daughters. The names of the daughters are unknown to us: those of the sons are James, Joses, Jude, Simon, two of whom became enrolled among the twelve Apostles [James], and a third (Simon) may have succeeded his brother in the charge of the Church of Jerusalem. Of Joseph and the daughters we know nothing. Mary herself is brought before us for the first time on the day of the Crucifixion—in the parallel passages already quoted from St. Matthew, St. Mark, and St. John. In the evening of the same day we find her sitting desolately at the tomb with Mary Magdalene (Matt. xxvii. 56; Mark xvi. 47), and at the dawn of Easter morning she was again there with sweet spices, which she had prepared on the Friday night (Matt. xxviii. 1; Mark xiv. 1; Luke xxi. 29), and was one of those who had "a vision of angels, which said that He was alive" (Luke xxiv. 23). These are all the glimpses that we have of her. Clopas or Alphaeus is not mentioned at all, except as designating Mary and James. It is probable that he was dead before the death of Joseph was announced. Joseph, the husband of St. Mary the Virgin, was likewise dead; and the two widowed sisters, as was natural both for comfort and for protection, were in the custom of living together in one house. Thus the two families came to be regarded as one, and the children of Mary and Clopas were called the brethren and sisters of Jesus. How soon the two sisters commenced living together cannot be known. It is possible that her sister's house at Nazareth was St. Mary's home at the time of her marriage, for we never hear of the Virgin's parents. Or it may have been on their return from Egypt to Nazareth that Joseph and Mary took up their residence with Mary and Clopas. But it is more likely that the union of the two households took place after the death of Joseph and Clopas. In the second year of our Lord's ministry, we find that they had been so long united as to be considered one by their fellow-townsmen (Matt. xiii. 55) and other Galileans (Matt. xii. 47). At whatever period it was that this joint housekeeping commenced, it would seem to have continued at Nazareth (Matt. xiii. 55) and at Capernaum (John ii. 12), and elsewhere, till St. John took St. Mary the Virgin to his own house in Jerusalem, A. D. 39. After this time Mary of Clopas would probably have continued living with St. James the Little and her other children in Jerusalem until her death. The fact of her name being omitted on all occasions on which her children and her sister are mentioned, save only on the days of her Crucifixion and the Resurrection, would indicate a retiring disposition, or perhaps an advanced age. That his cousins were older than Jesus, and consequently that their mother was the elder sister of the Virgin, may be gathered as likely from Mark iii. 21, as it is not probable that if they had been younger than Jesus, they would have attempted to leave attempted to interfere by force with Him for over exerting himself, as they thought, in the prosecution of his ministry. We may note that the Gnostic legends of the early ages, and the medieval fables and revelations alike refuse to acknowledge the existence of a sister of St. Mary, as interfering with the miraculous conception and birth of the latter.

MARY MAGDALENE

(Maryia ἡ Μαρία)

Four different explanations have been given of this name. (1.) That which at first suggests itself as the most natural, that she came from the town of Magdala. The statement that the women with whom she journeyed, followed Jesus in Galilee (Mark xvi. 41) agrees with this notion. (2.) Another explanation has been found in the fact that the Talmudic writers in their commentaries against the Nazarenes make mention of a Miriam Megaddela (מִרְיָם מַגָדֶלָה), and deriving that word from the Piel of הָגַד, to twine, explain it as meaning "the twinner or plaiter of hair." They connect with this name a story which will be mentionated later; but the derivation has been accepted by Lightfoot (Hor. Heb. on Matt. xvii. 18; Hor. Enigm. on Luke vii. 2), as satisfactory, and pointing to the previous worldliness of "Miriam with the braided locks," as identical with "the woman that was a sinner" of Luke vii. 37. It has been urged in favor of this, that the γασανοτερ of Luke vii. 2 implies something peculiar, and is not used where the word that follows points only to origin or residence. (3.) Either seriously, or with the patriotic fondness for παραμουνα, Jerome sees in her name, and in that of her town, the old Megdol (a watch-tower), and dwells on the coincidence accordingly. The name denotes the steadfastness of her faith. She is "vera παραμονή γερουσίας et Libani, quae prospect in faciem Domini" (Pist. ad Priscillianos). He is followed in this by later Latin writers, and the name forms the theme of a panegyric sermon by Odo of Cluny (Acta Sanctorum, Antwerp, 1727, July 12). (4.) Origen, lastly, looking to the more common meaning of הָגַד (gabal, to be great), sees in her name a prophecy of her spiritual greatness as having ministered to the Lord, and been the first witness of his resurrection (Tract. in Matt. xxxxi). It will be well to get a firm standing-ground in the facts that are definitely connected in the N. T. with Mary Magdalene before entering on the perplexed and bewildering conjectures that, gather round her name. 1. She comes before us for the first time in Luke viii. 2. It was the custom of Jewish women

* The ordinary explanation that Magdala is the Hebraic form, and Magalia the Greek form, and that the difference is the use of the Evangelist, not in the name itself, seems scarcely adequate: for why should the Evangelist invariably employ the Hebraic form when writing of St. Mary the Virgin, and the Greek form when writing about all the other Marys in the gospel history? It is true that this distinction is not constantly observed in the readings of the Codex Sinaiticus, the Codex Ephraemi, and a few other MSS.

but there is sufficient agreement in the majority of the codices to show that such was the case. That it is possible for a name to develop into several kindred forms, and for these forms to be considered sufficiently distinct to appeal for two or more brothers or sisters, is evidenced by our daily experience. The writer is indebted for this quotation, and for one or two references in the course of the article, to the kindness of Dr. W. A. Wright.
MARY MAGDALENE

(\textit{Jerome on 1 Cor. ix. 5}) to contribute to the support of Rabbits whom they revered, and in conformity with that custom, there were among the disciples of Jesus women who ministered unto Him of their substance. \textit{All} appear to have occupied a position of comparative wealth. With all the chief motive was that of gratitude for their deliverance from \textit{evil spirits and inferiorities.} Of Mary it is said specially that \textit{seven devils} (\textit{Saudabra}) went out of her, and the number indicates, as in Matt. xxvii. 54, and the \textit{Legion} of the Gospels, of the dimensions of more than ordinary malignity. We must think of her, accordingly, as having had, in their most aggregated forms, some of the phenomena of mental and spiritual disease which we meet with in other demons, the wretchedness of despair, the divided consciousness, the preternatural frenzy, the long-continued fits of silence. The appearance of the same description in Mark xxxi. 9 (whatever opinion we may form as to the authorship of the closing section of that Gospel) indicates that this was the fact most intimately connected with her name in the minds of the early disciples. From that state of misery she had been set free by the presence of the Healer, and, in the absence, as we may infer, of other ties and duties, she found her safety and her hope and her power when they were farthest. The story of her work, in the Gospels as to the presence of these women at other periods of the Lord's ministry, makes it probable that they attended on Him chiefly in his more solemn progresses through the towns and villages of Galilee, while at other times he journeyed to and fro without any other attendants than the Twelve, and sometimes without even them. In the last journey to Jerusalem, to which so many had been looking with eager expectation, they again accompanied Him (Matt. xxvii. 55; Mark xvi. 1; Luke xxiii. 55, xxiv. 10). It will explain much that follows if we remember that this life of ministration must have brought Mary Magdalene into companionship of the closest nature with Salome the mother of James and John (Mark xv. 40), and even also with Mary the mother of the Lord (John xix. 25). The women who thus devoted themselves are not prominent in the history: we have no record of their mode of life, or abode, or hopes or fears during the few momentous days that preceded the crucifixion. From that hour, they come forth for a brief two days' space into marvellous distinctness. They "stood afar off, beholding these things" (Luke xxiii. 49) during the closing hours of the Agony on the Cross. Mary Magdalene, Mary the mother of the Lord, and the beloved disciple were at one time not afar off, but close to the cross, within hearing. The same close association which drew them together there is seen afterwards. She remains by the cross till all is over, waits till the body is taken down, and wrapped in the linen cloth and placed in the garden-sepulchre of Joseph of Arimathea. She remains there in the dusk of the evening watching what she must have looked on as the final resting-place of the Prophet and Teacher whom she had honored (Matt. xxvii. 51; Mark xvi. 47; Luke xxiii. 55). Not to her had there been given the hope of the resurrection. The disciples to whom the words that spoke of it had been addressed had failed to understand them, and were not likely to have reported them to her. The Sabbath that followed brought an enforced rest, but sooner than she, with \textit{Salome} and Mary the mother of James, "brought sweet spices that they might come and anoint the body, the interment of which on the night of the crucifixion they looked on as hasty and provisional (Mark xvi. 1)."

The next morning accordingly, in the earliest dawn (Matt. xxviii. 1; Mark xvi. 2), they come with Mary the mother of James and John (Mark xvi. 3). It would be out of place to enter here into the harmonistic discussions which gather round the history of the resurrection. As far as they connect themselves with the name of Mary Magdalene, the one fact which St. John records is that of the chiefest interest. She had been to the touch and had found it empty, had seen the \textit{vision of angels} (Matt. xxviii. 5; Mark xvi. 5). To her, however, after the first moment of joy, it had seemed to be but a vision. She went with her cry of sorrow to Peter and John (let us remember that \textit{Salome} had been with her), "they have taken away the Lord out of the sepulchre, and we know not where they have laid Him." (John xx. 1, 2). But she returns there. She follows Peter and John, and returns. She goes back to the tomb. The very act of going there is an indication that her mind is still that the body is not there. She has been robbed of that task of reverential love on which she had set her heart. The words of the angels can call out no other answer than that — "They have taken away my Lord, and I know not where they have laid Him" (John xx. 13). This intense brooding over one fixed thought was, we may venture to say, to one who had suffered as she had suffered, full of special danger, and called for a special discipline. The spirit must be raised out of its blank despair, or else the "seven devils" might come in once again, and the last state be worse than the first. The utter stupor of grief is shown in her want of power to recognize at first either the voice or the form of the Lord to whom she had ministered (John xx. 14, 15). At last her own name uttering that voice as she had heard it uttered, it may be, in the hour of her deepest misery, recalls her to consciousness; and then follows the cry of recognition, with the strongest word of reverence which a woman of Israel could use, "Rab boni," and the rush forward to cling to his feet. That, however, is not the discipline she needs. Her love had been too dependent on the visible presence of her Master. She had the same lesson to learn as the other disciples. Though they had "known Christ after the flesh," they were "henceforth to know Him so no more." She was to hear that truth in its highest and sharpest form. "Touch me not, for I am not yet ascended to my Father." For a time, till the earthly affection had been raised to a heavenly one, she was to hold back. When He had finished his work and had ascended to the Father, there should be no barrier then to the fullest communion that the most devoted love could crave for. Those who sought, might draw near and touch Him then. He would be one with them, and they one with him. — It was fit that

\* The passage referred to is one of acknowledged difficulty. It is certainly an objection to the view proposed above that it represents our Lord as forbidding Mary to touch him, though he permitted the other women to whom he showed himself on their return to the city, not only to approach him, but to hold him by the feet and worship him (Matt. xxviii. 9). It is to be noted that the verb which describes the act of the others \textit{zeugo关乎} is a different one from that which describes the act denied to Mary \textit{an}
Mary Magdalen

This should be the last mention of Mary. The Evangelist, whose position, as the son of Salome, must have given him the fullest knowledge at once of the facts of her after-history, and of her innermost thoughts, bore witness by his silence, in this case as in that of Lazarus, to the truth that lies, such as theirs, were therefore "hid with Christ in God."

II. What follows will show how great a contrast there is between the spirit in which he wrote and that which shows itself in the later traditions. Out of these few facts there rise a multitude of wild conjectures; and with these there has been constructed a whole romance of hagiology.

The questions which meet us connect themselves with the narratives in the four Gospels of women who came with precious ointment to anoint the feet or the head of Jesus. Each Gospel contains an account of one such anointing; and men have argued, in endeavoring to construct a harmony, "Do they tell us of four distinct acts, or of three, or of two, or of one only? On any supposition but the last, are the distinct acts performed by the same or by different persons; and if by different, then by how many? Further, have we any grounds for identifying Mary Magdalene with the woman or with any one of the women whose acts are recorded? The Gospel presents a wide range of possible combinations, but the limits of the inquiry may, without much difficulty, be narrowed. Although the opinion seems to have been at one time maintained (Origen, *Tract. in Matt.* xxvi.), few would now hold that Matt. xxvi. and Mark xiv. are reports of two distinct events. Few, except critics bent, like Schleiermacher and Strauss, on getting up a case against the historical veracity of the Evangelists, could persuade themselves that the narrative of Luke vii., differing as it does in well-nigh every circumstance, is but a misplaced and embroidered version of the incident which the first two Gospels bring with the last week of our Lord's ministry.

The supposition that there were three anointings has found favor with Origen (l. c.) and Lightfoot (†ibid., p. 334, ed. 1858) in Matt. xxvi.; but while, on the one hand, it removed some harmonistic difficulties, there is, on the other,
The chosen dalene in perhaps, wards because learest separated only as her with To the compensated of lib. tioch, and his 10). of would lecured his Augustine takes great Church, during Ambrose}{d&.72,}on Church, however, leaving another{comp. Lazarus}. They land there: and she, leaving Martha to more active work, retires to a cave in the neighborhood of Arles, and there lends a life of piety for thirty years. When she dies a great fire is built in her honor, when the works are wrought at her tomb. (Lovis the Frank is healed by her intercession, and his new faith is strengthened; and the chivalry of France does homage to her name as to that of the greater Mary.

Such was the full-grown form of the Western story. In the East there was a different tradition.
MARY MOTHER OF MARK

Nepheros (H. E., ii. 10) states that she went to Rome to accuse Pilate for his unrighteous judgment: Modesto, patriarch of Constantinople (Hieron. in Marc.), that she came to Ephesus with the Virgin and St. John, and died and was buried there. The Emperor Leo the Philosopher (cire. 890) brought her body from that city to Constantinople (Acta Sanctorum, i. e.).

The name appears to have been conspicuous enough, from the living members of the Church of Jerusalem or in their written records, to attract the notice of their Jewish opponents. The Talmudists record a tradition, confused enough, that Stada or Satta, whom they represent as the mother of the Prophet of Nazareth, was known by this name as a "childer or tender of hair:" that she was the wife of Paphos Ben-Jehudah, a contemporary of Gamaliel, Joshua, and Akiba; and that she grieved and angered him by her wantonness (Lichtfoot, Hor. Heb. in Matt. xxvii., Horae. Evang., on Luke viii. 3). It seems, however, from the fuller report given by Eisenmenger, that there were two women to whom the Talmudists gave this name, and the wife of Paphos is not the one whom they identified with the Mary Magdalene of the Gospels (ibid., p. 364, &c.).

There is lastly the strange supposition (rising out of an attempt to evade some of the harmonist difficulties of the resurrection history), that there were two women both known by this name, and both among those who went early to the sepulchre (Lamp. Comm. in Joann.; Ambros. Comm. in Luc. x. 24).

E. H. P.

MARY, MOTHER OF MARK. The woman known by this description must have been among the earliest disciples. We learn from Col. iv. 10 that she was sister to Barnabas, and it would appear from Acts iv. 37, xii. 12, that, while the brother gave up his land and brought the proceeds of the sale into the common treasury of the Church, the sister gave up her house to be used as one of its chief places of meeting. The fact that Peter goes to that house on his release from prison indicates that there was some special intimacy (Acts xii. 12) between them, and this is confirmed by the account he uses whenwards Mark as being his "son" (1 Pet. v. 13). She, it may be added, must have been, like Barnabas, of the tribe of Levi, and may have been connected, as he was, with Cyprus (Acts iv. 36). It has been surmised that filial anxiety about her welfare during the persecutions and the famine which harassed the Church at Jerusalem, was the chief cause of Mark's withdrawal from the missionary labors of Paul and Barnabas. The tradition of a later age represented the place of meeting for the disciples, and therefore probably the house of Mary, as having stood on the upper slope of Zion, and affirmed that it had been the scene of the wonder of the day of Pentecost, had escaped the general destruction of the city. Tillemont treated it as a church in the 4th century (Epiphan. de Penta. et Mar., xiv.: Cyri. Hierosol. Catech. xvi.).

E. H. P.

MARY, SISTER OF LAZARUS. For much of the information connected with this name, comp. LAZARUS and MARY MAGDALENE. She and her sister Martha appear in Luke x. 40, as receiving Christ in their house. The contrasted temperaments of the two sisters have been already in part discussed [MARY]. Mary sat listening eagerly for every word that fell from the Divine Teacher. She had chosen the good part, the life that has found its unity, the "one thing needful," in rising from the earth to the heavenly, no longer distracted by the "many things" of earth. The same character shows itself in the history of John xi. Her grief is deeper but less active. She sits still in the house. She will not go to meet the friends who come on the formal visit of consolation. But when her sister tells her secretly "The Master is come and calleth for thee," she rises quickly and goes forth at once (John xi. 20, 28). Those who have watched the depth of her grief have but one explanation for the sudden change: "She goeth to the grave to weep there!" Her first thought when she sees the Teacher in whose power and love she had trusted, is one of complaint. "She fell down at his feet, saying, Lord, if thou hadst been here, my brother had not died." Up to this point, her relation to the Divine Friend had been one of reverence, receiving rather than giving, blessed in the consciousness of his favor. But the great joy and love which her brother's return to life calls up in her, pour themselves out in larger measure than had been seen before. The treasured alabaster-box of ointment is brought forth at the last feast of Bethany, John xii. 3. St. Matthew and St. Mark keep back her name. St. John records it as through the reason for the silence held good no longer. Of her he had nothing more to tell. The education of her spirit was completed. The love which had been recipient and contemplative shows itself in action.

Of her after-history we know nothing. The apocryphal traditions about her are based on the uncontroverted hypothesis of her identity with Mary Magdalene.

E. H. P.

MARY THE VIRGIN (Mappa: on the form of the name see p. 811). There is no person perhaps in sacred or in profane literature, around whom so many legends have been grouped as the Virgin Mary; and there are few whose authentic history is more concise. The very simplicity of the canonical record has no doubt been one cause of the abundance of the legendary matter of which she forms the central figure. Imagination had to be called in to supply a craving which authentic narrative did not satisfy. We shall divide her life into the three periods. I. The period of her childhood, up to the time of the birth of our Lord. II. The period of her middle age, contemporary with the Bible Record. III. The period subsequent to the Ascension. The first and last of these are wholly legendary, except in regard to one fact mentioned in the Acts of the Apostles; the second will contain her real history. For the first period we shall have to pass visions and the early apocryphal gospels; for the second on the Bible; for the third on the traditions and tales which had an origin external to the Church, but after a time were transplanted within her boundaries, and there flourished and increased both by the force of natural growth, and by the activities which from time to time resulted from some special period and revelation.

I. The childhood of Mary, wholly legendary. — Jochimia and Anna were both of the race of David. The abode of the former was Nazareth; the latter passed her early years at Bethlehem. They lived piously in the sight of God, and faultlessly before man, dividing their substance into three portions, one of which they devoted to the service of the

MARY THE VIRGIN
MARY THE VIRGIN

Temples, another to the poor, and the third to their
own wants. And so twenty years of their lives
passed silently away. But at the end of this period
Joachim went to Jerusalem with the third share of
his tribe, to make his usual offering at the Feast of
the Dedication. And it chanced that Issachar was high-
priest (Gospel of Birth of Mary); that Reuben was
high-priest (Protevangelion). And the high-priest
sought Joachim, and drove him roughly away,
asking how he dared to present himself in company
with their white children, while he was not
betrothed, and he returned to and said the offerings of
which he should have begotten a child, for the Scripture said,
"Cursed is every one who does not beget a man-
child in Israel." And Joachim was shamed before
his friends and neighbors, and he retired into the
wilderness and fixed his tent there, and fasted forty
days and forty nights. And at the end of this
period an angel appeared to him, and told him that
his wife should conceive, and should bring forth a
daughter, and he should call her name Mary. Anna
meantime was much distressed at her husband's
absence, and being reproached by her maid Judith
with her barrenness, she was overcome with grief
of spirit. And in her sadness she went into her
garden to walk, dressed in her wedding-dress. And
she sat down under a laurel-tree, and looked up and
spied among the branches a spacious nest, and she
beneath her herself as more miserable than the very
birds, for they were fruitful and she was barren;
and she prayed that she might have a child even as
Sarah was blessed with Isaac. And two angels ap-
peared to her, and promised her that she should
have a child who should be spoken of in all the
world. And Joachim returned joyfully to his home,
and when the time was accomplished, Anna brought
forth a daughter, and they called her name Mary.
Now the child Mary increased in strength day by
day, and at nine months of age she walked nine
steps. And when she was three years old her par-
ents brought her to the Temple, to dedicate her to the
Lord. And there were fifteen stairs up to the
Temple, and while Joseph and Mary were changing
their dress, she walked up them without help; and the
high-priest placed her upon the fifth step of the
altar, and she danced with her feet, and all the
house of Israel loved her. Then Mary remained at the
Temple until she was twelve (Prot.) fourteen (G.
B. M.) years old, ministered to by the angels, and
advancing in perfection as in years. At this time the
high-priest commanded all the virgins that were in
the Temple to return to their homes and to be
married. But Mary refused, for she said that she
had vowed virginity to the Lord. Thus the high-
priest was brought into a perplexity, and he had
resource to God to inquire what he should do.
Then a voice from the ark answered him (G. B.
M.), an angel spoke unto him (Prot.); and they
gathered together all the widowers in Israel (Prot.),
all the marriagable men of the house of David
(G. B. M.), and desired them to bring each man his
girl. And amongst them came Joseph and
brought his rod, but he shunned to present it, be-
cause he was an old man and had children. There-
fore the other rods were presented and no sign
occurred. Then it was found that Joseph had not
procreated his rod; and behold, as soon as he had
presented it, a dove came forth from the rod and flew
upon the head of Joseph (Prot.); a dove came from
heaven and pitched on the rod (G. B. M.). And
Joseph, in spite of his reluctance, was compelled to
betroth himself to Mary, and he returned to Beth-
dlem to make preparations for his marriage (G. B.
M.); he betook himself to his occupation of building
houses (Prot.); while Mary went to betroth the
priests' house in Galilee. Then it chanced that the
priests needed a new veil for the Temple, and seven
virgins east lots to make different parts of it; and
the lot to spin the true purple fell to Mary. And
she went out with a pitcher to draw water. And she
heard a voice, saying unto her, "Hail, thou
that art highly favored, the Lord is with thee.
Blessed art thou among women!" and she looked
round with trembling to see whence the voice came,
and she lay down the pitcher and went into the
house and took the purple and set down to work at
it. And behold the angel Gabriel stood by her and
filled the chamber with prodigious light, and said,
"Fear not," etc. And when Mary had fin-
ished the purple, she took it to the high-priest;
and having received his blessing, went to visit her
relative Elizabeth, and returned back again. Then
Joseph returned to his home from building houses
(Prot.) came into Galilee, to marry the Virgin to
whom he was betrothed (G. B. M.), and finding
her with child, he resolved to put her away privily;
but being warned in a dream, he relinquished his
purpose, and took her to his house. Then came
Anna the scribe to visit Joseph, and he went back
through the priest that told Joseph that had committed
a great crime, for he had privately married the Virgin
whom he had received out of the Temple, and had
not made it known to the children of Israel. And
the priest sent his servants, and they found that
she was with child; and he called them to him,
and Joseph denied that the child was his, and the
priest made Joseph drink the bitter water of trial
(Num. v. 18), and sent him to a mountains
place to see what would follow. And the child was
brought in perfect health, so the priest sent them
away to their home. Then after three months
Joseph put Mary on an ass to go to Bethlehem to
be taxed; and as they were going, Mary besought
him to take her down, and Joseph took her down
and carried her into a cave, and leaving her there
with his sons, he went to seek a midwife. And as
he went he looked up, and he saw the clouds aston-
ished and all creatures amazed. The fowls stopped
in their flight; the working people sat at their food,
but did not eat: the sheep stood still; the shep-
herds' lifted hands became fixed; the kids were
touching the water with their mouths, but did not
drink. And a midwife came down from the moun-
tains, and Joseph took her with him to the cave,
and a bright cloud overshadowed the cave, and the
cloud became a bright light, and when the bright
light faded, there appeared an infant at the breast
of Mary. Then the midwife went out and told

confirmary of their claim. The Latins have engraved
on a marble slab in the grotto of their convent in
Nazareth the words Vehum hic aere factum est, and
point out the pillar which marks the spot where the
angels stood; whilst the Head of their Church is irre-
trcvably committed to the wild legend of Loreto. (See
Stanley, S. § P. ch. xii.)
Salome that a Virgin had brought forth, and Salome would not believe; and they came back again into the cave, and Salome received satisfaction, but her heart withered away, nor was it restored, until, by the command of an angel, she touched the child, whereupon she was straightway cured. (Giles, Codex Apocryphus Novi Testamenti, pp. 39-47 and 60-81; Lond. 1852; Jones, The New Testament, ii. 60, and ix., Oct. 1827; Thilo, Codex Apocryphus. See also Vite gloriosissime Mariam Anno per F. Petrum Krbo-roc, appended to Ludolph of Saxony’s Vita Christi, Lyons, 1642; and a most audacious Historia Christi, written in Persian by the Jesuit P. Jerome Xavier, and exposed by Louis de Die, Langl. Bat. 1669.)

H. The real history of Mary.—We now pass from legend to that period of St. Mary’s life which is made known to us by Holy Scripture. In order to give a single view of all that we know of her who was chosen to be the mother of the Saviour, we shall in the present section put together the whole of her authentic history, supplementing it afterwards by the more prominent legendary circumstances which are handed down.

We are wholly ignorant of the name and occupation of St. Mary’s parents. If the genealogy given by St. Luke is that of St. Mary (Greswell, etc.), her father’s name was Hel, which is another form of the name given to her legendary father, Jehosakim or Joachim. If Jacob and Hel were the two sons of Matthias or Mattha, and if Joseph, being the son of the younger brother, married his cousin, the daughter of the elder brother (Hervey, Genealogies of our Lord Jesus Christ), her father was Jacob. The Evangelist does not tell us, and we cannot know. She was, like Joseph, of the tribe of Judah, and of the lineage of David (I S. xxxii. 11; Luke i. 32; Rom. i. 3). She had a sister, named probably like herself, Mary (John xix. 25) [MARY OF THEOPHILUS], and she was connected by marriage (Ange], Luke i. 39) with Elizabeth, who was of the tribe of Levi and of the lineage of Aaron. This is all that we know of her antecedents.

In the summer of the year which is known as B. C. 5, Mary was living at Nazareth, probably at her parents’—possibly at her elder sister’s—house, not having yet been taken by Joseph to his home. She was at this time betrothed to Joseph and was therefore regarded by the Jewish law and custom as his wife, though he had not yet a husband’s rights over her. [MARRIAGE, p. 1804.] At this time the angel Gabriel came to her with a message from God, and announced to her that she was to be the mother of the long expected Messiah. He probably bore the form of an ordinary man, like the angels who manifested themselves to Gideon and to Manoah (Judg. vi., xiii.). This would appear as the expression of the belief, “He came in,” and also from the fact of her being troubled, not at his presence, but at the meaning of his words. The scene as well as the salutation is very similar to that recounted in the Book of Daniel, “Then there came again and touched me one like the appearance of a man, and he strengthened me, and said, O man greatly beloved, fear not; stand up: for I will show thee strong words.” (Dan. x. 18, 19.) The exact meaning of the word rendered “strong” is therefore very exact and much nearer to the original than the “great” placed of the Vulgate, on which a large and wholly unsubstantial edifice has been built by Romanist devotional writers.

The next part of the salutation, “The Lord is with thee,” would probably have been better translated, “The Lord be with thee.” It is the same salutation as that with which the angel accosts Gideon (Judg. vi. 12). “Blessed art thou among women” is nearly the same expression as that used by Ornos to Judith (Jud. xiii. 18). Gabriel proceeds to instruct Mary that by the operation of the Holy Ghost the everlasting Son of the Father should be born of her; that in Him the prophecies relative to David’s throne and kingdom should be accomplished: and that his name was to be called Jesus. He further informs her, perhaps as a sign by which she might convince herself that his prediction with regard to herself would come true, that her relative Elizabeth was within three months of being delivered of a child.

The angel left Mary, and she set off to visit Elizabeth either at Hebron or Juttah (whichever way we understand the ζήν ὀμοίως ζήν ὁμοίως Ἰουνίας, Luke i. 39), where the latter lived with her husband Zacharias, about 20 miles to the south of Jerusalem, and therefore at a very considerable distance from Nazareth. Immediately on her entrance into the house she was saluted by Elizabeth as the mother of her Lord, and had evidence of the truth of the angel’s saying with regard to her cousin. She embodied her feelings of exultation and thankfulness in the hymn known under the name of the Magnificat. Whether this was uttered by immediate inspiration, in reply to Elizabeth’s salutation, or composed during her journey from Nazareth, or was written at a later period of her three months’ visit at Hebron, does not appear for certain. The hymn is founded on Hannah’s song of thankfulness (1 Sam. ii. 1-10), and exhibits an intimate knowledge of the Psalms, prophetic writings, and books of Moses, from which sources almost every expression in it is drawn. The most remarkable clause, “From henceforth all generations shall call me blessed,” is borrowed from Isaiah’s explanation on the birth of Asher (Gen. xxx. 13). The same sentiment and expression are also found in Prov. xxxi. 28; Mal. iii. 12; Jas. v. 11. In the latter place the word ἡμετέρας is rendered with great exactness “count happy.” The notion that there is conveyed in the word any anticipation of her bearing the title of “Blessed” arises solely from ignorance.

Mary returned to Nazareth shortly before the birth of John the Baptist, and continued living at her own home. In the course of a few months Joseph became aware that she was with child, and determined on giving her a bull of divorce, instead of yielding her up to the law to suffer the penalty which would then appear that she had committed adultery (A. V., however, warns and satisfied by an angel who appeared to him in a dream, he took her to his own house. It was soon after this, as it would seem, that Augustus’ decree was proclaimed, and Joseph and Mary travelled to Bethlehem to have their names enrolled in the registers (v. 4) by way of preparation for the taxing, which however was not completed till a few years later (A. V., in the governorship of Quirinius. They reached Bethlehem, and there Mary brought forth the Saviour of the world, and humbly laid him in a manger.

The visit of the shepherds, the circumcision, the adoration of the wise men, and the presentation
The Temple, are rather scenes in the life of Christ than in that of his mother. The presentation in the Temple might not take place till forty days after the birth of the Child. During this period the mother, according to the law of Moses, was unclean (Lev. xiii.). In the present case there could be no necessity for offering the sacrifice and making atonement beyond that of obedience to the Mosaic precept; but already He, and his mother for Him, were acting upon the principle of fulfilling all righteousness. The poverty of St. Mary and Joseph, it must not be forgotten, was not imposed upon them by making a sacrifice of the offering of the poor. The song of Simeon and the thanksgiving of Anna, like the wonder of the shepherds and the adoration of the magi, only incidentally refer to Mary. One passage alone in Simeon’s address is specially directed to her, “Ye a sword shall pierce through thy own soul also.” The exact purport of these words is doubtful. A common patristic explanation refers them to the pang of unbelief which shot through her bosom on seeing her Son expire on the cross (Tertullian, Origen, Basil, Cyril, etc.). By modern interpreters it is more commonly referred to the pang of grief which she experienced on witnessing the sufferings of her Son.

In the flight into Egypt, Mary and the babe had the support and protection of Joseph, as well as in the period from thence, in the first years on the death of Herod the Great (b. c. 3). It appears to have been the intention of Joseph to have settled at Bethlehem at this time, as his home at Nazareth had been broken up for more than a year; but on finding how Herod’s dominions had been disposed of, he changed his mind and returned to his old place of sojourn, thinking that the child’s life would be safer in the tetrarchy of Antipas than in that of Archelaus. It is possible that Joseph might have been himself a native of Bethlehem, and that before this time he had been only a visitor at Nazareth, drawn thither by his betrothal and marriage. In that case, his fear of Archelaus would make him exchange his own native town for that of Mary. It may be that the holy family at this time took up their residence in the house of Mary’s sister, the wife of Clopas.

Henceforward, until the beginning of our Lord’s ministry — i.e. from b. c. 3 to A. d. 26 — we may picture St. Mary to ourselves as living in Nazareth, in a humble sphere of life, the wife of Joseph the carpenter, pondering over the sayings of the angels, of the shepherds, of Simeon, and those of her Son, as the latter “increased in wisdom and stature and in favor with God and man” (Luke ii. 52). Two circumstances alone, so far as we know, broke in on the otherwise even flow of the still waters of her life. One of these was the temporary loss of her Son when he remained behind in Jerusalem, A. d. 8. The other was the death of Joseph. The exact date of this last event we cannot determine. But it was probably not long after the other.

a In the Gospel of the Infancy, which seems to date from the 2d century, innumerable miracles are made to attend on St. Mary and her Son during their sojourn in Egypt: e. g., Mary looked with pity on a woman who was possessed, and immediately Satan came out of her in the form of a young man, saying, “Woe is me because of thee, Mary, and thy Son!” In another occasion they fell in with two thieves, named Titus and Dummerus; and Titus was gentle, and Dummerus was harsh; the Lady Mary therefore promised Titus that God should receive him on his right hand. And accordingly, thirty-three years afterwards, Titus was the penitent thief who was crucified on the right hand, and Dummerus was crucified on the left. These are sufficient as samples. Throughout the book we find St. Mary associated with her Son, in the strange freaks of power attributed to them, in a way which shows us whence the cultus of St. Mary took its origin. — See Jones, On the New Test., vol. ii. Oct. 1837; Giles, Codex Apopharsus; Thilo, Codex Apopharsus.

The marriage at Cana of Galilee (John ii.). The attempt which she and her brethren made “to speak with him” (Matt. xxi. 46; Mark iii. 21 and 31; Luke viii. 19). The Crucifixion. 4. The days succeeding the Ascension (Acts i. 14). If to these we add two references to her, the first by her Nazarene fellow-citizen (Matt. xiii. 54, 55; Mark vi. 1–13), the second by a woman in the multitude (Luke xi. 27), we have specified every event known to us in her life. It is noticeable that, on every occasion of our Lord’s addressing her, or speaking of her, there is a sound of reproof in his words, with the exception of the last words spoken to her from the cross.

1. The marriage at Cana in Galilee took place in the three months which intervened between the baptism of Christ and the passover of the year 27. When Jesus was found by his mother and Joseph in the Temple in the year 8, we find him repudiating the name of “father” as applied to Joseph. “Thy father and I have sought thee sorrowing” — “How is it that ye sought me? What ye not that I must be about?” (not Joseph’s and yours, but) “my Father’s business?” (Luke ii. 48, 49). Now, in like manner, at his first miracle which in augments his ministry, He solemnly withdraws himself from the authority of his earthly mother. This is St. Augustine’s explanation of the “What have I to do with thee? my hour is not yet come.” It was his humanity, not his divinity, which came from Mary. While therefore He was acting in his divine character He could not acknowledge her, nor does He acknowledge her again until He was hanging on the cross, when, in that nature which He took from her, He was about to submit to death (St. Aug. Com. in Jo. Erm. tract viii., vol. iii. p. 1455, ed. Migne, Paris, 1845). That the words Th. έξω και σου; = ηλθεν να μή, imply reproof, is certain (cf. Matt. viii. 29; Mark i. 24; and LXX. John xi. 12; 1 K. xvii. 19; 9 K. iii. 13), and such is the patristic explanation of them (see from Athen. Hier. iii. 18: Apol. Cyn. A. Cyn. tom. ii. p. 293; S. Chrys. Hom. in Jo. xxi.). But the reproof is of a gentle kind (Trench, On the Miracles, p. 102, Lond. 1850; Alford, Comm. in loc.; Wordsworth, Comm. in loc.). Mary seems to have understood it, and accordingly to have drawn back desiring the servants to pay attention to her divine Son (Oshabren, Com. in loc.). The modern Romanist translation, “What is that to me and to thee? ” is not a mistake, because it is a willful misrepresentation (Douay version; Orsin, Life of Mary, etc.; see The Catholic Logman, p. 117, Dublin, 1832).

2. Capermann (John ii. 12), and Nazareth (Matt. iv. 12, xiii. 54; Mark vi. 1), appear to have been
the residence of St. Mary for a considerable period. The next time that she was brought before us we found her in the same condition. It was the anniversary of the year 28, more than a year and a half after the miracle wrought at the marriage feast in Cana. The Lord had in the mean time attended two feasts of the Passover, and had twice made a circuit throughout Galilee, teaching and working miracles. His fame had spread, and crowds came pressing round him, so that he had not even time to eat at leisure. Mary was at Capernaum with her sisters and her brother James, and with neither men nor women, James, Joses, Simon, Jude, and their three sisters (Matt. xxii. 55); and she and they heard of the toils which he was undergoing, and they understood that he was denying himself every relaxation from his labors. Their human affection conquered their faith. They thought that he was killing himself, and with an indignation arising from love, they exclaimed that he was beside himself, and set off to bring him home either by entreaty or compulsion. He was surrounded by eager crowds, and they could not reach him. They therefore sent a message, begging him to allow them to speak to him. This message was handed on from one person in the crowd to another, till at length it was reported abroad to him. Again he reported that in a few days he would admit no authority on the part of his relatives, or any privilege on account of their relationship. Who is my mother, and who are my brethren? and he stretched forth his hand toward his disciples, and said, Behold my mother and my brethren! For whosoever shall do the will of my Father which is in heaven, the same is my brother, and sister, and mother! (Matt. xii. 48, 49, 50. Comp. in Mede, iii. 252; S. Chrys. Hom. xvi. in Matt. x. Aug. in Joann. tract x, who all of them point out that the blessedness of St. Mary consists, not so much in having borne Christ, as in believing on him and in obeying his words (see also Quast. de Resp. ad Ord. exxxvi, op. S. Just. Mart. in Bibl. Max. Patro- bons, ii. pt. ii. p. 158). This indeed is the lesson taught directly by our Lord himself on the next occasion on which reference is made to St. Mary. It is now the spring of the year 30, and only about a month before the time of his crucifixion. Christ had set out on his last journey from Galilee, which was to end at Jerusalem. As he passes along, he, as usual, healed the sick, and preached the glad tidings of salvation. In the midst, or at the completion, of one of his addresses, a woman of the multitude, whose soul had been stirred by his words, cried out, "Blessed is the womb that bare thee, and the breasts which thou hast sucked!" Immediately the Lord replied, "Yea rather, blessed are they that hear the word of God, and keep it!" (Luke xii. 28). He does not either affirm or deny anything with regard to the direct bearing of the woman's exclamation, but proves that by a thing indifferent, in order to point out in what alone the true blessedness of his mother and of all consists. This is the full force of the proverbe, with which he commences his reply.

1820

MARY THE VIRGIN

MARY THE VIRGIN

3. The next scene in St. Mary's life brings us to the foot of the cross. She was standing there with her sister Mary and Mary Magdalene, and Salome, and other women, having no doubt followed her son as she was able throughout the terrible mourn-

* It is a mere subterfuge to refer the words ἀλληλούα υπό, etc., to the people, instead of to Mary and her brethren (Calmet and Migne, Dict of the Bibles)

of Good Friday. It was about 3 o'clock in the afternoon, and he was about to give up his spirit to his Father. His divine mission was now accomplished. While his ministry was in progress he had withdrawn himself from her that he might do his Father's work. But now the hour was come when his human relationship might be again recognized. "Tene cum suis, says St. Augustine, "quando illud quasi peperit moriebatur" (S. Aug. de Virginitate, i. 3). Standing now, the companion of his women was St. John; and, with his last words, Christ commended his mother to the care of him who had borne the name of the Disciple whom Jesus loved. "Woman, behold thy son." "Con- commend hom inomin hominem," says St. August- ine. And from that hour St. John assures us that he took her to his own abode. If by "that hour" the Evangelist means immediately after the words were spoken, Mary was not present at the last scene of all. The sword had sufficiently pierced her soul, and she was spared the hearing of the last loud cry, and the sight of the bowed head. St. Ambrose considers the chief purpose of our Lord's words to have been a desire to make manifest the truth that the Redemption was his work alone, while he gave human affection to his mother. Ambrose says, "In honorum sanctificatione, non quasi dominus dominion auxilium" (S. Amb. Exp. Evang. Luc. x. 132).

4. A veil is drawn over her sorrow and over her joy which succeeded that sorrow. Mediaval imagina- tion has supposed, but Scripture does not state, that her Son appeared to Mary after his resurrec- tion from the dead. Thus, for example, Ludolph of Saxony, Tita Christian, p. 606, Lyons, 1642; and Riperti, De Dictinis Officiis, vii. 25, tom. iv. p. 92, Venice, 1751.) St. Ambrose is considered to be the first writer who suggested the idea, and reference is made to his treatise, De Virginitate, i. 3; but it is quite certain that the text has been corrupted, and that it is of Mary Magdalene that he is there speaking. (Comp. his Exposition of St. Luke, x. 156. See note of the Benedictine edition, tom. ii. p. 217, Paris, 1790.) Another reference is usually given to St. Anselm. The treatise quoted is not St. Anselm's, but Eadmer's. (See Eadmer, De Exsulis Mariæ, ch. v, appended to Anselm's Works, p. 138, Paris, 1721.) Ten appearances are related by the Evangelists as having occurred in the 40 days intervening between Easter and Ascen- sion Day, but none to Mary. She was doubtless living at Jerusalem with John, cherished with the tenderness which her tender soul would have specially needed, and which undoubtedly she found preeminently in St. John. We have no record of her presence at the Ascension. Ascraor, a writer of the 6th century, describes her as being at the time of the Ascension; but, in Jerusalem (Act. De Art. Apost. i. 50, apud Migne, tom. Iviii. p. 95, Paris, 1818, quoted by Wordsworth, Gk. Test. Com. on the Acts, i. 14). We have no account of her being present at the descent of the Holy Spirit on the day of Pentecost. What we do read of her is, that she remained steadfast in prayer in the upper room at Jerusalem with Mary Magdalene and Salome, and those known as the Lord's brethren and the Apostles. This is the last view that we have of her. Holy Scripture leaves her engaged in prayer (see Wordsworth as cited above). From this point forwards we know nothing of her. It is probable that the rest of her life was spent in
MARY THE VIRGIN

Jerusalem with St. John (see Epiph. Har. p. 78). According to one tradition the beloved disciple would not leave Palestine until she had expired in his arms. This tradition is found in two writers, Theophylact, "Sermo," p. 234, Edinb., (1857), and it is added that she lived and died in the Cenaculum in what is now the Mosque of the Tomb of David, the tradi-
tional chamber of the Last Supper (Stanley, S. of P. ch. xiv. p. 456). Other traditions make her journey with St. John to Ephesus, and there die in extreme old age. It was believed by some in the 5th century that she was buried at Ephesus: (see Conc. Ephes., Conc. Labb. tom. iii. p. 574 a); by others, in the same century, that she was buried at Gethsemane, and this appears to have been the information given to Marcellus and Pulcheria by Juvenal of Jerusalem. As soon as we lose the guidance of Scripture, we have nothing from which we can derive any sure knowledge about her. The darkness in which we are left is in itself most in-
structive.

5. The character of St. Mary is not drawn by any of the Evangelists, but some of its lineaments are incidentally manifested in the fragmentary record which is given of her. They are to be found for the most part in St. Luke's Gospel, whence an attempt has been made, by a curious mixture of the imaginative and the historical, to explain the old legend which tells us that St. Luke painted the Virgin's portrait (Calmet, Kitto, Migne, Mrs. Jameson). We might have expected greater details from St. John than from the other Evangelists; but in his Gospel we learn nothing of her except what may be gathered from the scene at Cana and at the cross. It is clear from St. Luke's account, though without any such intimation we might rest assured of the fact, that her youth had been spent in the study of the Holy Scriptures, and that she had set before her the example of the holy women of the Old Testament as her model. This would appear from the Magnificat (Luke i. 46). The same hymn, so far as it emanated from herself, would show no little power of mind as well as warmth of spirit. Her faith and humility exhibit themselves in her imme-
diate surrender of herself to the Divine will, though ignorant how that will should be accomplished (Luke i. 38); her energy and earnestness, in her journey from Nazareth to Jerusalem (Luke i. 39); her happy thankfulness, in her song of joy (Luke l. 48); her silent musings thoughtfulness, in her pondering over the shepherds' visit (Luke ii. 19), and in her keeping her Son's words in her heart (Luke ii. 51) though she could not fully under-
stand their import. Again, her humility is seen in her drawing back, yet without anger, after re-
ceiving reproof at Cana in Galilee (John ii. 5), and in the remarkable manner in which she shuns put-
ting herself forward throughout the whole of her Son's ministry, or after his removal from earth. On
cly does she attempt to interfere with her Divine Son's freedom of action (Matt. xii. 46; Mark iii. 31; Luke viii. 19); and even here we can hardly blame her, for she seems to have been raised, not by arrogance and by a desire to show her authority and relationship, as St. Chrysostom sup-
poses (Hom. xiv. in Matt.); but by a woman's and a mother's feelings of affection and fear for him whom she loved. It was part of that ex-
quisite tenderness which appears throughout to have

belonged to her. In a word, so far as St. Mary is portrayed to us in Scripture, she is, as we should

have expected, the most tender, the most faithful, humble, patient, and loving of women, but a woman still.

III. Her after life, wholly legendary. — We pass

again into the region of free and joyous legend which we quoted for that of true history at the period of the Annunciation. The Gospel record

confined the play of imagination, and as soon as this check is withdrawn the legend bursts out afresh. The legends of St. Mary's childhood may be traced back as far as the third or even the second century. That those of her death are probably of a later date. The chief legend was for a length of time considered to be a veritable history, written by Melito, Bishop of Sardis, in the 2d century. It

is to be found in the Bibliotheca Maxima (tom. ii.

pt. ii. p. 212), entitled Sanci Melitoni Episopi

Sardesiensis de Transitu Virginis Mariae Liber: and there certainly existed a book with this title at the end of the 5th century, which was condemned by Pope Gelasius as apocryphal (Op. Gelas. apud Migne, tom. 59, p. 152). Another form of the same legend has been published at Elberfeld in 1854 by Maximilian Eger in Arabic. He supposes

that it is an Arabic translation from a Syriac original. It was found in the library at Bamm, and is entitled Joanni Apostoli de Transita Beatae Mariae Virginis Liber. It is a paraphrase and abbreviation of that referred to in Assemani (Biblioth. Orient. tom. iii. p. 257, Rome, 1725), under the name of Historia Dominationis et AssumptioNis B. Mariae Virginis Joanni Evangelistae falsa inscripta. We

give the substance of the legend with its main variations.

When the Apostles separated in order to evan-

gelize the world, Mary continued to live with St.

John's parents in their house near the Mount of

Olives, and every day she went out to pray at the

tomb of Christ, and at Golgotha. But the Jews

had placed a watch to prevent prayers being offered

at these spots, and the watch went into the city and
told the chief priests that Mary came daily to pray.

Then the priests commanded the watch to stone

her. But at this time King Algears wrote to Tiberias to desire him to take vengeance on the

Jews for slaying Christ. They feared therefore to add to his wrath by slaying Mary also, and yet they
could not allow her to continue her prayers at

Golgotha, because an excitement and tumult was

thereby made. They therefore went and spoke

softly to her, and she consented to go and dwell in

Bethlehem; and thither she took with her three

holy virgins who should attend upon her. And in

the twenty-second year after the ascension of the

Lord, Mary felt her heart burn with an inexpress-
ible longing to be with her Son; and beheld an

angel appeared to her, and announced to her that

her soul should be taken up from her body on the

third day, and he placed a palm-branch from pome-

dise in her hands, and desired that it should be

carried before her. And Mary besought that

the Apostles might be gathered round her before

she died, and the angel replied that they should

come. Then the Holy Spirit caught up John as

he was preaching at Ephesus, and Peter as he was

offering sacrifice at Rome, and Paul as he was dis-

puting with the Jews near Rome, and Thomas in

the extremity of India, and Matthew and James

these were all of the Apostles who were still living

then the Holy Ghost came down upon the disciples

of Andrew, and Luke and Simon, and Mark and Bar-
tholomew: and all of them were snatched away in
a bright cloud and found themselves at Bethlehem. And angels and powers without number descended from heaven and stood round about the house: Gabriel stood at blessed Mary's head, and Michael at her feet, and they fanned her with their wings; and the Spirit of God, that was above the cherubim, did in due time descend upon her, and there was a great cry, and they all said "Hail blessed one! blessed is the fruit of thy womb!" And the people of Bethlehem brought their sick to the house, and they were all healed. Then news of these things was carried to Jerusalem, and the king sent and commanded that they should bring Mary and the disciples to Jerusalem. And horsemen came to Bethlehem to seize Mary, but they did not find her, for the Holy Spirit had taken her and the disciples in a cloud over the heads of the horsemen to Jerusalem. Then the men of Jerusalem saw angels ascending and descending at the spot where Mary's house was. And the high-priests went to the governor, and craved permission to burn her and the house with fire, and the governor gave them permission, and they brought wood and fire: but as soon as they came near to the house, behold there burst forth a fire upon them which consumed them utterly. And the governor saw these things afar off, and in the evening he brought his son, who was sick, to Mary, and she healed him. Then, on the sixth day of the week, the Holy Spirit commanded the Apostles to take up Mary, and to carry her from Jerusalem to Galilee, and as they went the Jews saw them. They drew near Joppa, one of the high-priests, and attempted to overthrow the litter on which she was being carried, for the other priests had conspired with him, and they hoped to cast her down into the valley, and to throw wood upon her, and to burn her body with fire. But as soon as Joppa had touched the litter the angel smote off his arms with a fiery sword, and the arms remained fastened to the litter. Then he cried to the disciples and Peter for help, and they said, "Ask it of the Lady Mary:" and he cried, "O Lady, O Mother of Salvation, have mercy on me!" Then she said to Peter, "Give him back his arms:" and they were restored whole. But the disciples proceeded onwards, and they had down the litter in a cave, as they were commanded, and gave themselves to prayer. And the angel Gabriel announced that on the first day of the week Mary's soul should be removed from this world. And on the morning of that day there came Eve and Anne and Elisabeth, and they kissed Mary and told her who they were: came Adam, Seth, Shem, Noah, Abraham, Isaac, Jacob, David, and the rest of the old fathers: came Enoch and Elias and Moses; came twelve chariots of angels innumerable; and then appeared the Lord Christ in his humanity, and Mary bowed before him and said, "O my Lord and my God, place thy hand upon me:" and he stretched out his hand and blessed her; and she took his hand and kissed it, and placed it to her forehead, and said, "I bow before this right hand, which has made heaven and earth and all that in them, and I thank thee and bless thee that thou hast thought me worthy of this hour." Then she said, "O Lord, take me to thyself:" And he said to her, "Now shall thy body be in paradise to the day of the resurrection, and angels shall serve thee: but thy pure spirit shall shine in the kingdom, in the dwelling-place of my Father's fullness." Then the disciples drew near and besought her to pray for the world which she was about to leave. And Mary prayed. And after her prayer was finished her face shone with light, and she stretched out her hands and blessed them all; and her Son put forth his hands and received her pure soul, and bore it into his Father's treasure-house. And there was a light and a sweet smell, sweeter than anything on earth; and a voice from heaven saying, "Hail, blessed one! blessed and celebrated art thou among women." And the Apostles carried her body to the Valley of Jehoshaphat, to a place which the Lord had told them of, and John went before and carried the palm-branch. And they placed her in a new tomb, and sat at the mouth of the sepulchre, as the Lord commanded them; and suddenly there appeared the Lord Christ, surrounded by a multitude of angels, and said to the Apostles, "What will ye that I should do with her whom my Father's command selected out of all the tribes of Israel that I should dwell in her?" And Peter and the Apostles besought him that he would raise the body of Mary and take it with him in glory to heaven. And the Saviour said, "Be it according to your wish." And he commanded Michael the archangel to bring down the soul of Mary. And Gabriel polished away the stone, and the Lord said, "Rise up, my beloved body shall not suffer corruption in the tomb." And immediately Mary arose and bowed herself at his feet and worshipped; and the Lord kissed her and gave her to the angels to carry her to paradise. But Thomas was not present with the rest, for at the moment that he was summoned to come he was baptizing Phobias, who was the son of the sister of the king. And he arrived just after all these things were accomplished, and he demanded to see the sepulchre in which they had laid his Lady: "For ye know," said he, "that I am Thomas, and unless I see I will not believe." Then Peter arose in haste and wrath, and the other disciples with him, and they opened the sepulchre and went in: but they found nothing therein save that in which her body had been wrapped. Then Thomas confessed that he too, as he was being borne in the cloud from India, had seen her body carried by the angels with great triumph into heaven; and that on his crying to her for her blessing, she had bestowed upon him her precious Gift, which when the Apostles saw they were glad. Then the Apostles were carried back each to his own place.
IV. Jewish traditions respecting her. — These are of a very different nature from the light-hearted fairy-tale-like stories which we have recounted above. We should expect that the miraculous birth of our Lord would be one of the occasions most beloved of the believers, and we find this to be the case. To the Christian believer the Jewish slander becomes in the present case only a confirmation of his faith. The most definite and outspoken of these slanders is that which is contained in the book called 60τιν ἀνήκη, or Tobith.Jesu. It was grappled at with avidity by Voltaire, and declared by him to be the most ancient Jewish writing directed against Christianity, and apparently of the first century. It was written, he says, before the Gospels, and is altogether contrary to them (Lettre sur les Juifs). It is proved by Ammon (Biblioth. Theolog. p. 263, Ehrang. 1801) to be a composition of the 3rd century, and by Wagenseil (Teka ignes Sathan. Confut. Libr. Tobit.Jesu, p. 12, Altorf, 1861) to be irreconcilable with the earlier Jewish tales. In the Gospel of Nicodemus, otherwise called the Acts of Pilate, we find the Jews represented as charging our Lord with illegitimate birth (c. 2). The date of this Gospel is about the end of the third century. The origin of the charge is referred with great probability to the influence of Origen, (Tolos, viii. 1832), and to the circular letters of the Jews mentioned by Grotius (ad Matt. xxvii. 63, et al. Act. Apost. xxvii. 22, Op. ii. 278 and 666. Basil. 1732), which were sent from Palestine to all the Jewish synagogues after the death of Christ, with the view of attacking the lawless and atheistic sect which had taken its origin from the deceiver Jesus of Galilee (Joh. iii. 4). The first time that we find it openly proclaimed is in an extract made by Origen from the work of Celsus, which he is refuting. Celsus introduces a Jew declaring that the mother of Jesus ἡ τοῦ τίτου τεκνος, τίτους τῆς τέκνης ὄφει, ἔλευθεροι ἃς μειω- χειμένα (Contra Celsum, c. 28, Originis Opera, viii. 59, Berlin, 1841). And again, ἡ τοῦ Ἰησοῦ μητὴρ κιβωσα, ἔλευθερα ὑπὸ τοῦ ματαιοτελε- ων αὐτὴ τιτών, τίτος τῆς τέκνης τῆς τέκνης ἐκ τοῦ τοσαδάπιστος Πνευμα τοσκμα (ibid. 32). Stories to the same effect may be found in the Talmud — not in the Misnaza, which dates from the second century; but in the Gemara, which is of the fifth or sixth (see Tract. Sanhedrin, cap. vii. fol. 67, col. 1; Shabbath, cap. xii. fol. 194, col. 2; and the Mishnah Kohelet, cap. x. 5). Raba- nus Maurus, in the ninth century, refers to the same story: "Jesus filium Ethnici ejusdem Pan- dera adulteri, more inanum puntum esse." We then come to the Tobith.Jesu, in which these calumnies were intended to be summed up and harmonized. In the year 4671, the story runs, in the reign of King Aenemon, there was one Joseph Pandera who lived at Bethlehem. In the same village there was a widow who had a daughter named Miriam, who was betrothed to a God-fearing man named Johan. And it came to pass that Joseph Pandera meeting with Miriam when it was dark, deceived her into the belief that he was Johan the husband. And after three months Johan consulted Rabbi Simeon Shetachel what he should do with Miriam, and the rabbi advised him to bring her before the great council. But Johan was afraid to do so, and instead he left her home and went and lived at Babylon; and there Miriam brought forth a son and gave him the name of Jokoshua. The rest of the work, which has no merit in a literary aspect or otherwise, contains an account of how this Jokoshua gained the art of working miracles by stealing the knowledge of the unmentionable name from the Temple: how he was defeated by the superior magical arts of one Juda; and how at last he was crucified, and his body hidden under a watercourse. It is offensive to make use of sacred names in connection with such tales; but in Wagenseil's quaint words we may recollect, that the Sionina aqua munis, Noahus aut bennis-simun illius matrem certeque quo significatis videatur, sed designari iuvi a Diab- olio apposita Spectra, Larvas, Lemures, Laniae, Styges, aut si quid turpius istis" (Teti ignea Satanae, Liber Tobith.Jesu, p. 2, Altorf, 1861). It is a curious thing that a Pandera or Panther has been introduced into the genealogy of our Lord by Epiphanius (Heræv. xxviii.) who makes him grandfather of Joseph, and by John of Da- mascus (De Fide orthodoxo, iv. 15), who makes him the father of Barpanther and grandfather of St. Mary.

V. Mohammediæn Traditions. — These are again cast in a totally different mould from those of the Jews. The Mohammedans had no purpose to serve in spreading calumnious stories as the story of the Virgin in the Mohammediæan Legends (Heræv. xcvii.), and accordingly we find none of the Jewish malignity about their traditions. Mohammed and his followers appear to have gathered up the floating oriental traditions which originated in the legends of St. Mary's early years, given above, and to have drawn from them and from the Bible indifferently. It has been suggested that the Koran had an object in magnifying St. Mary, and that this was to inculcate that the Son of God was of no other nature than the mother. But this does not appear to be the case. Mohammed seems merely to have written down what had come to his ears about her, without definite theological purpose or inquiry.

Mary was, according to the Koran, the daughter of Auran (sur. iii.) and the sister of Aaron (sur. xix.). Mohammed can hardly be absolved from having her reconstituted Miriam the sister of Moses with the mother of our Lord. It is possible indeed that he may have meant different persons, and such is the opinion of Sale (Korān, pp. 38 and 251), and of D'Herbelet (Bibl. Orient. in voc. "Miriam"): but the opposite view is more likely (see Guadagnoli, Apost. pro rel. Christ. ch. viii. p. 277, Rom. 1631). Indeed, some of the Mohammediæan commentators have been driven to account for the chronological difficulty, by saying that Miriam was miraculously kept alive from the days of Moses in order that she might be the mother of Jesus. Her mother Hannah dedicated her to the Lord while still in the womb, and at her birth "commended her and her future issue to the protection of God against Satan." And Hannah brought the child to the Temple to be educated by the priests, and the priests disputed among themselves who should take charge of her. Zacharias maintained that it was his office, because he had married her aunt. But when the others would not give up their claims, it was determined that the matter should be decided by lot. So they went to the river Jordan, twenty-seven of them, each man with his rod; and they threw their rods into the river, and none of them floated save that of Zacharias. Therefore the care of the child was committed to him (Al leisalw; Falballalodin). Then Zacharias placed her in an inner chamber by herself.
and though he kept seven doors ever locked upon her, he always found her abundantly supplied with provisions which God sent her from paradise, winter fruits, in summer and summer fruits in winter.

And the angels said unto her, "O Mary, verily God hath chosen thee, and hath purified thee, and hath chosen thee above all the women of the world" (Koran, sur. iii.). And she retired to a place towards the East, and Gabriel appeared unto her and said, "Verily I am the messenger of thy Lord, and am sent to give thee a holy Son." (sur. xix. 2) And the angel said to Mary, verily God hath good tidings that shall sound the Word proceeding from Himself: His name shall be Christ Jesus, the son of Mary, honorable in this world and in the world to come, and one of them who approach near to the presence of God: and he shall speak unto men in his cradle and when he is grown up: and he shall be one of the righteous." And she said, "How shall I have a son, seeing I know not a man?" The angel said, "So God createth what which He pleaseth: when He deneth a thing, He only saith unto it, 'Be,' and it is. God shall teach him the scripture and the law, and the gospel, and shall appoint him his apostle to the children of Israel." (sur. iii.). So God breathed of His Spirit into the womb of Mary: and she preserved her chastity (sur. lxvi.): for the Jews have sworn against her a grievous calumny (sur. xxxi.). And she conceived a son, and retired with him apart to a distant place: and the pains of childbirth came upon her near the trunk of a palm-tree: and God provided a rivulet for her, and she shaded the palm-tree, and it let fall ripe dates, and she ate and drank, and was calm. Then she carried the child in her arms to her people; but they said that it was a strange thing she had done. Then she made signs to the child to answer them: and he said, "Verily I am the servant of God: He hath given me the book of the gospel, and hath appointed me a prophet: and He hath made me blessed, wheresoever I shall be, and hath commanded me to observe prayer and to give alms so long as I shall live: and He hath made me duteous towards my mother, and hath not made me greedy or ungracious: and I shall proclaim to thee the day when I was born, and the day whereon I shall die, and the day whereon I shall be raised to life." This was Jesus the Son of Mary, the Word of Truth concerning whom they doubt (sur. xix.).

Mohammed is reported to have said that many men have arrived at perfection, but only four women; and that these are, Asia the wife of Phra- rach, Mary the daughter of Amram, her first wife Khadijah, and her daughter Fatima.

The commentators on the Koran tell us that every person who comes into the world is touched at his birth by the Devil, and therefore cries out: but that God placed a veil between Mary and her Son and the Evil Spirit, so that he could not reach them. For which reason they were neither of them guilty of sin, like the rest of the children of Adam, this privilege they had in answer to Hannah's prayer for their protection from Satan. (Jalladuddin: Al Bedsawi: Kitabah.) The Immaculate Conception therefore, we may note, was a Mohammedan doctrine of the Christian theologians or schoolmen maintained it.

VI. Embles.—There was a time in the history of the Church when all the expressions used in the book of Canticles were applied at once to St. Mary. Consequently all the western metaphors of King Solomon have been hardened into symbols, and represented in pictures or sculpture, and attached to her in popular Litanies. The same method of interpretation was applied to certain parts of the book of the Revelation. Her chief emblems are the sun, moon, and stars (Rev. xii. 1; Cant. vi. 10). The name of Star of the Sea is also given her, from a fanciful interpretation of the meaning of her name. She is the Rose of Sharon (Cant. ii. 1), and the Lily (ii. 2), the tower of David (iv. 4), the Mountain of Myrrh and the Hill of Frankincense (iv. 6), the Garden enclosed, the Spring shut up, the Fountain sealed (iii. 12), the Tower of Babel (vii. 1), the Palm-tree (vii. 7), the Closed Gate (Ex. xlv. 2). There is no end to these metaphorical titles.

See Mrs. Jameson's Legends of the Madonna, and the ordinary Litanies of the B. Virgin.

VII. Cultus of the Blessed Virgin.—We do not enter into the theological bearings of the worship of St. Mary; but we shall have left our task incomplete if we do not add a short historical sketch of the origin, progress, and present state of the devotion to her. What was its origin? Certainly not the Bible. There is not a word there from which it could be inferred: nor in the Credos; nor in the Fathers of the first five centuries. We may scan each page that they have left us, and we shall find nothing of the kind. There is nothing of the sort in the supposed works of Clement, Ignatius, and Polycarp; that is, the doctrine is not to be found in the 1st century. There is nothing of the sort in Justin Martyr, Tatian, Athenagoras, Theophilus. Clement of Alexandria, Tertullian: that is, in the 2d century. There is nothing of the sort in Orig., Gregory Thaumaturgus, Cyprian, Methodus, Lactantius: that is, in the 3d century. There is nothing of the sort in Eusebius, Athanasius, Cyril of Jerusalem, Hilary, Macarius, Epiphanius, Basil, Gregory Nazianzen, Ephrem Syrus, Gregory of Nyssa, Ambrose: that is, in the 4th century. There is nothing of the sort in Chrysostom, Augustine, Jerome, Basil of Sebaste, Origen, Sedulius, Isidore, Theodoret, Prosper, Vincentius Lirinensis, Cyril of Alexandria, Pope Leo, Hilarius, Simplicius, Felix, Gelasius, Anastasius, Symmachus: that is, in the 5th century. Hence, then, did it

...
There is not a shadow of doubt that the origin of the worship of St. Mary is to be found in the apocryphal legends of her birth and of her death which we have given above. There we find the germ of what afterwards expanded into its present portentous proportions. Some of the legends of her birth are as early as the 2d or 3d century. They were the production of the Gnostic, and were unan-
imously and firmly rejected by the Church of the first four centuries; were recondite and unusual; and no recent Gnostic tradition seems to have been handed on to the Collyridians, whom we find denounced by Epi-
phanius for worshipping the Virgin Mary. They were regarded as distinctly heretical. The words which this Father uses respecting them were prob-
ably expressive of the sentiments of the entire Church in the 4th century. The whole thing," he says, "is foolish and strange, and is a device and deceit of the Devil. Let Mary be in honor.

Let the Lord be worshipped. Let no one worship Mary and to the Nestorian controversy, the dogma of the Blessed Virgin would appear to have been wholly external to the Church, and to have been regarded as heretical. But the Nestorian position was a distinct change of sentiment in men's minds. Nestorius had maintained, or at least it was the tendency of Nestorianism to maintain, not only that Our Lord had two natures, the divine and the human (which was right), but also that He was two persons, in such sort that the child born of Mary was not divine, but merely an ordinary human being, until the divinity subsequently united itself to Him. This was condemned by the Council of Ephesus in the year 431: and the title Theotókos, loosely translated "Mother of God," was sanctioned. The object of the Council and of the Anti-Nesto-
rians was in no sense to add honor to the mother, but to maintain the true doctrine with respect to the Son. Nevertheless the result was to magnify the mother, and, after a time, at the expense of the son. For now the title Theotókos became a shibboleth; and in art the representation of the Madonna and Child became the expression of ortho-
dox belief. Very soon the purpose for which the title and the picture were first sanctioned be-
came forgotten, and the veneration of St. Mary began to spread within the Church, as it had pre-
viously existed external to it. The legends too were no longer treated so roughly as before. The Gnostics were not now objects of dread. Nesto-
rians, and afterwards Iconoclasts, were objects of hatred. The old fables were winked at, and thus they became the mythology of Christianity, uni-
versally credited among the Southern nations of Europe, while many of the dogmas, which they are grounded upon, have, as a natural consequence, crept into the faith! (Lord Lindsay, Christian Anti.

1 In 1. p. xl. Lond. 1847). From this time the worship of St. Mary grew apace. It agreed well with many natural aspirations of the heart. To point the mother of the Saviour an ideal woman, with all the grace and tenderness of womanhood, and yet with none of its weaknesses, and then to fall down and worship the image which the imagi-
nation had set up, was what might easily happen, and what did happen. Evidence was not asked for. Perfection "was becoming" to the mother of the Lord; therefore she was perfect. Adoration "was befitting" on the part of Christians; there-
fore they gave it. Any takes attributed to antiquity were received as genuine; any recent impost 
posed to be made to favored saints were accepted as true: and the Madonna reigned as queen in heaven, in earth, in purgatory, and over hell. We learn the present state of the religious regard in which she is held throughout the south of Europe from St. Al-
fonso de Liguori, whose every word is vouched for by the whole weight of his Church's authority.

From the Glories of Mary, translated from the original, and published in London in 1832, we find that St. Mary is Queen of Mercy (p. 13) and Mother of all mankind (p. 23), our Life (p. 52), our Protectress in death (p. 71), the Hope of all (p. 79), our only Refuge, Help, and Asylum (p. 81); the Propitiatory of the whole world (p. 81); the one City of refuge (p. 89); the Comforter of the world, the Refuge of the Unfortunates (p. 181); our Patroness (p. 181); Queen of Heaven and Hell (p. 110); our Protectress from the Divine Justice and from the Devil (p. 115); the Ladder of Para-
dise, the Gate of Heaven (p. 121); the Mediatrix of grace (p. 124); the Dispenser of all graces (p. 128); the Helper of the Redemption (p. 133); the Conspirator in our Justification (p. 133); a tender Advocate (p. 145); Omnipo
potent (p. 146); the singu-
lar Refuge of the lost (p. 156); the great Peacemaker (p. 165); the Throne prepared in mercy (p. 165); the Way of Salvation (p. 200); the Medi-
atrix of Angels (p. 278). In short, she is the Way (p. 290), the Door (p. 588), the Mediator (p. 295), the Intercessor (p. 129), the Advocate (p. 144), the Redeemer (p. 275), the Saviour (p. 349).

Thus, then, in the worship of the Blessed Virgin there are two distinctly marked periods. The first is that which commences with the apostolic times, and brings us down to the close of the century in which the Council of Ephesus was held, during which time the worship of St. Mary was wholly external to the Church, and was regarded by the Church as heretical, and confined to Gnostic and Collyridian heretics. The second period commences with the 6th century, when it began to spread within the Church; and, in spite of the shock given it by the Reforma-
tion, has continued to spread, as shown by Ligu-
orii's teaching; and is spreading still, as shown by the manner in which the papal decree of December 8, 1854, has been, not universally indeed, but yet gen-
erally, received. Even before that decree was issued, the sound of the word "adoration" had been heard with reference to St. Mary (Newman, Essay on Development, p. 409, Lond. 1846); and she had been placed in "a throne far above all created powers, meditorial, intercessory;" she had been invested with "a title archetypal;" with a crown
MARGT THE VIRGIN

... bright as the morning star: a glory issuing from the Eternal Throne; roles pure as the heavens; and a sceptre over all (ibid. p. 496).

VIII. Her Assumption. — Not only religious sentiments, but facts grew up in exactly the same way. The Assumption of St. Mary is a fact, or an alleged fact. How has it come to be accepted? At the end of the 5th century we find that there existed a book, De Transitu Virginis Mater, which was written by Pope Gelasius and which appeared apophthegmatically. This book is without doubt the oldest form of the legend, of which the books ascribed to St. Melito and St. John are variations. Down to the end of the 5th century, then, the story of the Assumption was external to the Church, and distinctly looked upon by the Church as belonging to the heresies and not to her. But then came the change of sentiment already referred to, consequent on the Nestorian controversy. The desire to protect against the early fathers which had been spread abroad by the heretics was now passed away, and had been succeeded by the desire to magnify her who had brought forth Him who was God. Accordingly a writer, whose date Baronius fixes at about this time (Ann. Eccl. i. 347, Lecce, 1738), suggested the possibility of the Assumption, but declared his inability to decide the question. The letter in which this possibility or probability is thrown out came to be attributed to St. Jerome, and may be still found among his works, entitled De Pontia et Fustochii de Assumptione B. Virginis (v. 82, Paris, 1706). About the same time, probably, or rather later, an insertion (now recognized on all hands to be a forgery) was made in Eusebius' Chronicle, to the effect that "in the year A. D. 48 Mary the Virgin was taken up into heaven, as some wrote that they had revealed to them." Another tract was written to prove that the Assumption was not a thing in itself unlikely; and this came to be attributed to St. Augustine, and may be found in the appendix to his works; and a sermon, with a similar purport, was ascribed to St. Athanasius. Thus the names of Eusebius, Jerome, Augustine, Athanasius, and others, came to be quoted as maintaining the truth of the Assumption. The first writers within the Church in whose extant writings we find the Assumption asserted, are Gregory of Tours in the 6th century, who has merely copied Melito's book, De Transitu (De Transitu, Lecce, 1742, i. c. 45; Migne, lib. 105, c. 45); and Andrew of Crete, who probably lived in the 7th century; and John of Damascus, who lived at the beginning of the 8th century. The last of these authors refers to the Euthynian history as stating that Marcian and Pulcheria were in search of the body of St. Mary, sent to Jerusalem to be incinerated. "Jerusal. rep. 1733, p. 708.) And this is repeated by the same John, who had just completed his history of the departure of the Holy Mother of God. But from an ancient and most true tradition we have received, that at the time of her glorious falling asleep all the holy Apostles, who were going through the world for the salvation of the nations, being emitted in a moment of time, came together to Jerusalem; and when they saw her they had a vision of angels and divine melody was heard; and then with divine and more than heavenly melody she delivered her holy soul into the hands of God in an unpeakable manner. But that which had borne God, being carried with angelic and apostolic splendour, with funeral rites was deposited in a coffin at Gethsemane. In this place the chorus and singing of the angels continued three whole days. But after three days, on the angelic music ceasing, those of the Apostles who were present opened the tomb, as one of them, Thomas, had been absent, and on his arrival wished to adore the body which had borne God. But her body, the day before, had been wrapped in a linen cloth, and found the linen clothes lying, and they were filled with an indefinable odor of sweetness which proceeded from them. Then they closed the coffin. And they were astonished at the mysterious wonder; and they came to no other conclusion than that He who had chosen to take flesh of the Virgin Mary, and to become a man, and to be born of her — God the Word, the Lord of Glory — and had preserved her virginity after birth, was also pleased, after her departure, to honor her immaculate and unspotted body with incorruption, and to translate her before the common resurrection of all men" (St. John Damase. Op. ii. 880, Venice, 1748). It is quite clear that this is the same legend as that which we have before given. Here, then, we see it brought over the borders and planted within the Church, if this "Euthynian history" is to be accepted as veritable, by Juvenal of Jerusalem in the 5th century, or else by Gregory of Tours in the 6th century, or by Andrew of Crete in the 7th century, or, finally, by John of Damascus in the 6th century (see his three Homilies on the Sleep of the Blessed Virgin Mary, Op. ii. 857—886). The same legend is given in a slightly different form as veritable history by Nilophon Callistus in the 13th century (Nicoph. i. 171, Paris, 1630); and the fact of the Assumption is stereotyped in the Brevary Services for August 15th (Brevar. Rom. pars ant. p. 551, Milan, 1851). Here again, then, we see a legend originated by heretics, and remaining external to the Church till the close of the 5th century, creeping into the Church during the 6th and 7th centuries, and finally ratified by the authority both of Rome and Constantinople. See Baronius, Ann. Eccl. i. 344, Lecce, 1738), and Martyrology (p. 314, Paris, 1697).

IX. Her Immaculate Conception. — Similarly with regard to the sinlessness of St. Mary, which is the basis of the doctrine of the Immaculate Conception. Down to the close of the 5th century the sentiment with respect to her was identical with that which is expressed by theologians of the Church of England (see Pearson, On the Creed). She was regarded as "highly favored;" as a woman arriving as near the perfection of womanhood as it was possible for human nature to arrive, but yet liable to the infirmities of human nature, and sometimes led away by them. Thus, in the 24th century, Tertullian represents her as guilty of unbelief (De carne Christi, vii. 315, and Adv. Marcion. v. 19, p. 433, Paris, 1695). In the 3rd century, Origen interprets the word which was to pierce her bosom as being her unbelief, which caused her to be offended (Hom. in Luc. xvii. iii. 292, Paris, 1745). In the 4th century St. Basil gives the same interpretation of Simon's words (Ep. 260, iii. 400, Paris, 1721); and St. Hilary speaks of her as having to come into the severity of the final...
MARY THE VIRGIN

judgment (In Ps. cxix. p. 262, Paris, 1693). In the 5th century St. Chrysostom speaks of the "excessive ambition," "foolish arrogance," and "vain-glory," which made her stand and desire to speak with Him (vii. 467, Paris, 1718); and St. Cyril of Alexandria (so entirely is he misrepresented by popular writers) speaks of her as falling into sin when present at the Passion—a sin weaker in the spiritual life than St. Peter— as being entrusted to St. John, because he was capable of explaining to her the mystery of the Cross—as inferior to the Apostles in knowledge and belief of the Resurrection (iv. 1064, vi. 391, Paris, 1688). It is plain from these and other passages, which might be quoted, that the idea of St. Mary's exemption from even actual sins of impiety and imperfection, if it existed at all, was external to the Church. Nevertheless there grew up, as was most natural, a practice of looking upon St. Mary as an example to other women, and investing her with an ideal character of beauty and sweetness. A very beautiful picture of what a girl ought to be is drawn by St. Ambrose (De Virg. ii. 2, p. 154, Paris, 1680), and attached to the virgins figures of Ambrose drawn entirely from the imagination (as may be seen by his making one of her characteristics to be that she never went out of doors except when she accompanied her parents to church), but there is nothing in it which is in any way superhuman. Similarly we find St. Jerome speaking of the clear light of Mary hiding the little fires of other women, such as Anna and Elisabeth (vi. 671, Verona, 1734). St. Augustine takes us a step further. He again and again speaks of her as under original sin (iv. 241, x. 654, &c., Paris, 1700); but with respect to her actual sin he says that he would rather not enter on the question, for it was possible (how could we tell?) that God had given her sufficient grace to keep her free from actual sin (x. 144). At this time the change of mind before referred to, as originated by the Nestorian controversies, was spreading within the Church; and it became more and more the general belief that St. Mary was preserved from actual sin by the grace of God. This opinion had become almost universal in the 12th century. And now a further step was taken. It was maintained by St. Bernard that St. Mary was conceived in original sin, but that before her birth she was cleansed from it, both by the Baptist and the Virgin. This was the sentiment of the 13th century, as shown by the works of Peter Lombard (Sentent. lib. iii. dist. 2), Alexander of Hales (Sum. Theol. num. ii. art. 2), Albertus Magnus (Sentent. lib. iii. dist. 3), and Thomas Aquinas (Sum. Theol. quest. xxvii. art. 1), and Comm. in Lib. Sentent. dist. 3, quest. 1). Early in the 14th century died J. Dun Scotus, and he is the first to enunciate or to consider what he wrote out as a possibility the idea of an Immaculate Conception, which would exempt St. Mary from original as well as actual sin. This opinion had been growing up for the two previous centuries, having originated apparently in France, and having been adopted, to St. Bernard's indignation, by the canons of Lyons. From this time forward there was a struggle between the married and the scholastic conceptionists, which has led at length to the decree of December 8, 1854, but which has not ceased with that decree. Here, then, we may mark four distinct theories with respect to the sinlessness of St. Mary. The first is that of the early Church to the close of the 6th century. It taught that St. Mary was born in original sin, was liable to actual sin, and that she fell into sins of infirmity. The second extends from the close of the 5th to the 12th century. It taught that St. Mary was born in original sin, but by God's grace was saved from falling into actual sins. The third is pur excellence that of the 13th century. It taught that St. Mary was conceived in original sin, but was sanctified in the womb. The fourth may be found obscurely existing, but only existing to be condemned, in the 12th and 13th centuries: brought into the light by the speculations of Scotus and his followers in the 14th century: thenceforward running parallel with and struggling with the sanctification et utero theory, till it obtained its apparently final victory, so far as the Roman Church is concerned, in the 16th century, and in the lifetime of ourselves. It teaches that St. Mary was not conceived or born in original sin, but has been wholly exempt from all sin, original and actual, in her conception and birth, throughout her life, and in her death.

MARY (Rec. Text, with [Sin.] D. Mapusa; Lachmann, with A B C, Mapia: Maria), a Roman Christian who is said to have been laid by St. Paul in his Epistle to the Romans (xvi. 6) as having toiled hard for him—or according to some MSS. for them. Nothing more is known of her. But Professor Jowitt (The Epistles of St. Paul, etc. vol. i.) has called attention to the fact that she is the only Jewish name in the list. G.

* MASADA (Marada) a remarkable Jewish fortress on the western shore of the Dead Sea, a few hours south of Engedi. It is mentioned by Piny and Strabo, but is not named in the Bible nor in the Books of the Maccabees, although it was first built by Jonathan Maccabenus and was, probably, one of the "strongholds in Judea," (1 Mace. xii. 35), which he consulted with the elders about building. Josephus has given a full description of it, and of the terrible tragedy of which it was the theatre. (B. J. vii. 8.) It was an isolated rock, several hundred feet high, and inaccessible except by two paths hewn in its face. The summit was a plain, about three fourths of a mile in length, and a third of a mile in breadth. Here the Great chose this spot for a retreat in case of danger, built a wall around the top, strengthened the original fortifications, and gathered his forces to this fortress and laid siege to it, building a wall around the entire rock. He then raised his bands against the single narrow promontory by which it can now be climbed, and when, at length, it became evident that he would subdue it, the besieged, under the impassioned harangue of their leader, devoted themselves to self-destruction. Each man, after tenderly
embracing his wife and children, put them to death with his own hands; ten men were then selected by lot to massacre the rest; and one of the survivors, in the same way, despatched the others and then himself. This frantic resolve was executed, and 960 persons — men, women, and children — lay in their blood. The conqueror, pressing the siege, the next morning, encountered the silence of death, and entering the fortress, met the appalling spectacle. Two women and five children, who had been concealed in a cavern, alone survived.

The spot, thus signalized, was lost to history until the publication of Robinson and Smith's researches. At "Ann Hely," their attention had been attracted to this singular rock with ruins on its summit, now called Shibeck (אָסֵי), but it was not until they reached Germany, that it occurred to them it must be the ancient Masada (Bibl. Res. ii. 240 f.). The writer, in company with an English painter, under the protection of a Bedawy chief, visited the spot in the spring of 1839. Crossing from Hebron the territory which lies between the highlands of Judaea and the Dead Sea — the hills being first succeeded by an undulating country, at that season verdant and forming the principal pasture-ground of the Bedawin, this by a range of white, naked, conical hills, mostly barren, and the latter by a rugged, rocky strip, bordering the sea, and cut through by deep wadys — we reached, across a scroched and desolate tract, the lofty cliffs of Shibeck with its ruins, fronted on the west by precipices of a rich, reddish-brown color, the motionless sea lying far below on the east, and the mountains of Meab towering beyond — the whole region wearing an aspect of lonely and stern grandeur.

The identification was complete — the lower part of the entire wall which Herod built around the top, and the entire Roman wall of circumvaliation below, with the walls of the Roman camps connected with it, undisturbed for eighteen centuries, remaining as they were left, except as partially wasted by the elements. As we looked down on those lines, they vividly recalled the siege and the day when the crissommed rock on which we stood bore witness to the fulfilment of the fearful inscription "His blood be on us and on our children." (Bibl. Sucre, 1843, pp. 61-67.)

MASALOTH Maασαλόθ [see Sin.; Alex. Μαςαλόθ]: Moschilo, a place in Arboe, which Bacaabde and Abimun, the two generals of Demetrius, besieged and took with great slaughter on their way from the north to Gigal (1 Mac. ix. 24). Arboe is probably the modern Tebl, on the south side of the Rocky of Hammon, about 3 miles N. W. of Tiberias, and half that distance from the Lake. The name Moschilo is identical with the name Josephus (Ant. xii. 11, § 1), nor has there any trace of it been since discovered; but the word may, as Robinson (Bibl. Res. ii. 398) suggests, have originally signified the "steps" or "terraces" (as in שַׁמָּהִים). In that case it probably was given to the remarkable caverns still existing on the northern side of the same wady, and now called Kibbat Ibn Maan, the "fortress of the son of Man" — a cavern which actually stood a remarkable siege of some length, by the forces of Herod (Joseph. B. J. i. 16, § 4).

A town with the similar name of Maschal, or Maschal, occurs in the list of the tribe of Asher, but whether its position was near that assumed above for Masaloth, we have no means of judging.

G.

MASCHIL (םָשִּׁל: בְּשֵׁל; בְּשֵׁל: מָשְׁלֵה; בְּשֵׁל: מָשְׁלִים; בְּשֵׁל: מָשָּׁל; בְּשֵׁל: מָשְׁלָה; בְּשֵׁל: מָשְׁלָה; מָשְׁלִים; מָשְׁלָה): óveras: intellectus, but in Ps. liii. intelligens. The title of thirteen psalms; xxvii., xli., xlv., xlii., xlv., lxxii., lxxvi., lxxxvi., lxxxviii., lxxix., cxli. Jerome in his version from the Hebrew renders it uniformly crudelio, "instructio." "Instructio," except in Ps. xli., xlv., because he has intellectus, "understanding." The margin of our A. V. has in Ps. lxiv., lxviii., lxxix., "to give instruction;" and in Ps. lxxxviii., cxli., "giving instruction." In other passages in which the word occurs, it is rendered "wise" (Job xxii. 2; Prov. x. 5, 19, &c.), "profound" (Prov. xiv. 14; Am. v. 13), "expert" (Jer. i. 9), and "skilful" (Dan. iv. 4), except in Ps. xxi., where it is instructus, "understanding," of the Ps. cxii. 8, "I will instruct thee," from which circumstance, it has been inferred, the title was applied to the whole psalm as "didactic." But since "Maschil" is affixed to many psalms which would scarcely be classed as didactic, Gesenius (or rather Koehler) explains it as denoting "any sacred song, relating to divine things, whose end it was to promote wisdom and piety." (Thes. p. 1380.)EWald (Dichter d. all. li. i. 25) regards Ps. cxviii. 7 (A. V. "sings ye praises with understanding;"") Heb. maschil, as the key to the meaning of Maschil, which in his opinion is a musical term, denoting a melody requiring great skill in its execution. The objection to the explanation of Koehler is, that it is wanting in precision, and would allow the term "Maschil" to be applied to every psalm in the Psalter. It is employed to indicate to the conductor of the Temple choir the manner in which the psalm was to be sung, or the melody to which it was adapted, rather than as descriptive of its contents, seems to be implied in the title of Ps. xciv., where, after "Maschil," is added "a song of loves" to denote the special character of the psalm. Again, with exceptions, it is associated with directions for the choir, "to the chief musician," etc., and occupies the same position in the titles as Michtem (Ps. xvi. i-xi.), Mizmor (A. V. "Psalm;" Ps. iv.-vi., etc.), and Shiggon (Ps. vili.). If, therefore, we regard it as originally used, in the sense of "didactic," to indicate the character of one particular psalm, it might have been applied to others as being set to the melody of the original Maschil-psalm. But the suggestion of Ewald, given above, has most to commend it. Comparing "Maschil" with the musical terms already alluded to, and observing the different manner in which the character of a psalm is indicated in other instances (1 Chr. xvi. 7; Ps. xxviii., lx., titles), it seems probable that it was used to convey a direction to the singers as to the mode in which they were to sing. There appear to have been Maschilos of different kinds, for in addition to those of David which form the greater questionably to Moses, Wolcott and Tipping (Narratives of a Journey round the Dead Sea, i. 191 f.). Von Hammer also refers to Dr. Wolcott's discoveries as setting the question of the identification of Massada with the present Nebi (see Palestine, p. 222, 4th Aud. H.}
number, there are others of Assaph (Pss. lxxiv., xxviii.), Heman the Ezrahite (xxxviii.), and Ethan (lxxix.).

W. A. W.

MASH (םש : Masch : Mes), one of the sons of Aram, and the brother of Uz, Hul, and Gether (Gen. x. 23). In 1 Chr. i. 17 the name appears as Meshech, and the rendering of the LXX., as above given, leads to the inference that a similar form also existed in some of the copies of Genesis. It may further be noticed that in the Chronicles, Mash and his brothers are described as sons of Shem to the omission of Aram; this discrepancy is easily explained: the links to connect the names are omitted in other instances (comp. ver. 4), the ethnologist evidently assuming that they were familiar to his readers. As to the geographical position of Mash, Josephus (Ant. i. 6, § 4) connects the name with Mesene in lower Babylonia, on the shores of the Persian Gulf—a locality too remote, however, from the other branches of the Aramaic race. The more probable opinion is that which has been adopted by Bochart (Phal. ii. 11), Winzer (Redb. s. v.), and Knobel (Vilbert. p. 297) — namely, that the name Mash was probably formed by the Moses Masorets of classical writers, a range which forms the northern boundary of Mesopotamia, between the Tigris and Euphrates (Strab. xi. pp. 506, 527). Knobel reconciles this view with that of Josephus by the supposition of a migration from the north of Mesopotamia to the south of Babylonia, where the race may have been known in later times under the name of Meshech: the progress of the population in these parts was, however, in an opposite direction, from south to north. Kalisch (Comm. on Gen. p. 286) connects the names of Mash and Mysia: this is, to say the least, extremely doubtful; both the Mysians themselves and their name (= Masius) were probably of Oriental origin.

W. L. B.

MASHAL (מָשָׁל [comparison, proverb]: Vat.) Masar: [Rom. Masar; Alex. Masal: Masalh], the contracted or provincial (Galilean) form in which, in the later list of Levitical cities (1 Chr. vii. 74), the name of the town appears, which in the earlier records is given as Masekal and Mishaal. It suggests the Massekal of the Mascanian history.

G.

MASIAS (מַשְׂאָס [Vat. Masius]: Alex. Masius: Malsith), one of the servants of Solomon, whose descendants returned with Zerobabel (1 Esdr. vi. 94).

MASMAN (Masevav, Vat.): Alex. Masevav: Masmona). This name occurs for Shemshah in 1 Esdr. viii. 43 (comp. Ezr. viii. 16). The Greek text is evidently corrupt. Saulas (A. V. Masmias), which is the true reading, being misplaced in ver. 44 after Athanam.

* MASONs. [Handicraft. 3.]

MASORA. [Old Testament.]

MASPHA. 1. (Maspephah: Mephah). A place opposite to (kevarivare) Jerusalem, at which Judas Maccabaeus and his followers assembled themselves to bewail the desolation of the city and the sanctuary, and to inflame their resentment before the battle of Emmaus, by the sight, not only of the distant city, which was probably visible from the eminence, but also of the Book of the Law mutilated and profaned, and of other objects of secular preciousness and sanctity (1 Macc. iii. 46).

There is no doubt that it is identical with Mizepeh of Benjamin, the ancient sanctuary at which Samuel had conveyed the people on an occasion of equal emergency. In fact, Mizepeh, or more accurately Massapha, is merely the form in which the LXX. uniformly render the Hebrew name Mizeph. 2. (Masph: [Sin. Mas: Alex. Maspha:] but Josephus Masephr.) One of the cities which were taken from the Ammonites by Judas Maccabaeus in his campaign on the east of Jordan (1 Macc. v. 35). It is probably the ancient city of Mizeph of Gilzea. The Syriac has the curious variation of Olim, Masseph, "salt." Perhaps Josephus also reads  מָשָׁפָה, "salt."

G.

MARS'EKAH (מַרְסֵקָה [place of vines]): Masrekah, in Chron. Masrekah, and so Alex. in both: Masrek), an ancient place, the native spot of Samlah, one of the old kings of the Edomites (Gen. xxvi. 36; 1 Chr. i. 47). Interpreted as Hebrew, the name refers to vineyards—as if from *serek, a root with which we are familiar in the "vine" in Gen. xlix. 17, that is, the choice vine; and led by this, Knobel (Geniae, p. 257) proposes to place Massrekah in the district of the Idumean mountains north of Petra, and along the Hadji route, where Burchardt found "extensive vineyards," and "great quantities of dried grapes," made by the tribe of the Raphar for the supply of Gaza and for the Moabite pilgrims (Burchardt, Syrii, Aug. 21). But this is mere conjecture, as no name at all corresponding with Massrekah has yet been discovered in that locality. Schwartz (215) mentions a site called En-Masrek, a few miles south of Petra. He probably refers to the place marked *As Masarak in Palmer's Map, and *Ain el-Ushbik in Kiepert's (Robinson, Bibl. Res. 1856).

The versions are unanimous in adhering more or less closely to the Hebrew.

G.

MASSA (מָסָּה [present, tribute]: Masah; in 1 Chron., Vat. Marsasa: Massa), a son of Ishaem (Gen. xxiv. 14; 1 Chr. i. 30). His descendants were not improbably the Massa, who are placed by Pселony (v. 19, § 2) in the east of Arabia, near the borders of Babylonia.

W. L. B.

* According to some the proper rendering in Prov. xxx. 1 is "Agur the Massa." It is inferred, therefore, that the above Massa was the name also of the place where the wise Agur lived and where Lennel reigned as king (Prov. xxx. 1). In support of this conclusion see Bertheau, Die Sprache Solomon's, p. 15 f. Prof. Stuart adopts this opinion in his notes on the above passages (Comm. on Proverbs, pp. 401, 421). That view, says Fürst (Howeke. s. v.), is a doubtful one. The ordinary signification of מָסָּה, the utterance, proverb (in the A. V. "the prophecy"), is entirely appropriate, and is more generally preferred by commentators. See Umbreit's Sprache Solomon's, p. 392. [Further, see AGUR, LEMUEL, UCAL.]

H.

MASSAH (מַסָּה: psæwabulos: [in Deut. xxxiii., psæx: Tentōto], i.e. temptation, a name given to the spot, also called Massar, where the Israelites "tempted Jehovah, saying, Is Jehovah among us or not?" (Ex. xvii. 7). [See also Deut. vi. 16, ix. 22, xxxiii. 8.]) The name also occurs
MASSIAS

with mention of the circumstances on which it is, in Ls. xcv. 8, 9, and its Greek equivalent in Heb. iii. 8. 11.

MASSIAS (Μασσιάς; [Vat. Assasia]: Hes-stant 3 (I Esdr. x. 22: comp. Ezr. x. 22).

* MAST. [Ship].

* MASTER stands in the A. V. as the representation of several different Hebrew and Greek words, but the principal use of the term which demands notice here is that in which, as in Matt. viii. 19 (δῆδασκαλός, given in John i. 38. xx. 16, as equivalent to the Hebrew words Rabbi and Rab- bon), it is often applied to our Lord as a title of respect. "[RAB.] It is by a reference to the common application of this term among the Jews, that we must probably explain our Lord's reproval of the person spoken of in Mark x. 17 and Luke xxi. 18 (designated in the latter account as a ruler: the reading of the received text, Matt. xix. 16, is apparently corrupt), for addressing him as "Good Master." The expression, in itself approp- riate, was employed improperly by the speaker, who designed nothing more in the use of it than to recognize our Saviour as one who, although perhaps distinguished by preeminent attainments and character, was not essentially different from the ordinary Rabbis. Our Lord applies the term so rendered to Nicodemus (John iii. 19), with special emphasis: "Art thou the master (teacher) of Israel," as expressive probably of the high authority Nicodemus enjoyed among his countrymen as a teacher of religion. This title of "master," as the translation of δῆδασκαλός, is given to our Lord about forty times in the Gospels. The sense would often be clearer to the English reader if a "teacher" were substituted for it. By "master of the ship" (Acts xxvii. 11), the man at the rubber or the helmsman (κυβερνήτης) is meant. [Governor, 15.] For the interchange of "master of the house," and "good man of the house," see vol. i. p. 529.

The expression "master and scholar," Mal. iii. 12 (Heb. יַּנְאַת יִַּנָּה), which suggests a usage somewhat like that so common in the N. T., is probably a mistranslation. The literal meaning seems to be "called or written master and scholar," apparently a proverbial expression for every living person, referring perhaps originally to watchmen calling to and answering one another (comp. Ps. cxxxiv. 1; Is. liii. 6).

The very obscure phrase מֶטֶף אֲדֹנָי (Fed. xii. 11), translated in the A. V. "masters of assem- blies," is variously explained, as, e. g. referring (1) to the เมֶטֶף כְּלֵי (fourth line, 11) = instrumental "instruments of fasting" (Rossmanneler); (2) to the gathered "words of the wise," "collections of sayings" (Ewald, Helbig-stedt, Hitzig); (3) to the collectors themselves, either as the masters, authors of the collections (De Wette), or as members of an assembly (Gessens, Furst, and Hengstberg, comp. Jerome in Vulgate). The last view is perhaps, on the whole, the most probable, especially if we are at liberty, with Kimchi, to supply מֶטֶף before מֶטֶף אֲדֹנָי.

D. S. T.

* MASTERIES is the rendering of διδάσκην in 2 Tim. ii. 3, which is literally "if any one strives," i.e. for preeminence as an athlete. The A. V. in the earlier English versions from Tyndale onward, except the change of "mastery" to "masteries." Further, see GAMES, vol. i. p. 464 a. H.

MASTICH-TREE (σχίτωs, lenticus) occurs only in the Apostles (Sussan. ver. 54), where the margin of the A. V. has lenticis. There is no doubt that the Greek word is correctly rendered, as is evident from the description of it by Theophrastus (Hist. Plant. i. §§ 2, 4, § 7, (e.)): Phiny (H. N. iii. 36, xxiv. 28); Dioscorides (i. 90), and other writers. Herodotus (iv. 177) compares the fruit of the lotus (the Rhumnum, linn., not the Egyptian Nelmiumium specimem) in size with the mastich berry, and Rabulis (3, 5) says its leaves are browse by geese. The fragrant resin known in the arts as "mastick," and which is obtained by incisions made in the trunk in the month of August, is the product of this tree, whose scientific name is Pistacia lentiscus. It is used with us chiefly in the teeth and gums, and was so applied by the ancients, by whom it was much prized on this account, and for its many supposed medicinal virtues. Lucian (Aesop. p. 12) uses the term σχίτωτωκτόνος of one who chews mastick wood in order to whiten his teeth. Martial (Ep. xiv. 22) recommends a mastick toothache (toe paw). Phiny (xxiv. 7) speaks of the leaves of this tree being rubbed on the teeth for toothache. Dioscorides (i. 90) says the resin is often mixed with other materials and used as tooth-powder, and that, if chewed, it imparts a sweet odor to the breath. Both Phiny and Dioscorides state that the best mastick comes from Chios, and to this day the Arabs prefer that which is imported from that island (comp. Niebuhr, Reise, vol. ii. p. 144); Calen. de Flo, Simp. 7, p. 69). Tournefort (Voyages, ii. 58-61, transl. 1741) has given a full and very interesting account of the lentisks or mastick plants of Scio (Chios): he says that "the towns of the island are distinguished into three classes, those del Campo, those of Aphonoraeris, and those where they plant halatbleves — among which the mastick is in every respect worth growing." Tournefort enumerates several lentisk- tree villages. Of the trees he says, "these trees are very wide spread and circular, ten or twelve feet tall, consisting of several branchy stalks which in time grow crooked. The biggest trunks are a foot in diameter, covered with a dark, grayish, rugged, exust . . . . the leaves are disposed in three or four couples on each side, about an inch long, narrow at the beginning, pointed at the extremity, half an inch broad about the middle. From the junctures of the leaves grow flowers in bunches like grapes (see woodcut); the fruit too grows like bunches of grapes, in each berry whereof is contained a white

Luther, "Linde . . . finden." A similar play occurs in xv. 58, 59, between φρονιμοί and φρονιμία. For the bearing of these and similar characteristics on the date of the gospel, the book is must examined.

6 Whence the derivation of mastick, from μαστίγια the gum of the σχίτωs, from μαστίγος, μαστίγος, μαστίγος, "to courteous," to chew," and to "nurture."
they harden on the ground, and are carefully swept up from under the trees. The height of the crop is about the middle of August if it be dry serene weather, but if it be rainy, the trees are all lost. Likewise towards the end of September the same incisions furnish mastick, but in lesser quantities. Besides the uses to which reference has been made above, the people of Seio put grains of this resin in perfumes, and in their bread before it goes to the oven.

Mastick is one of the most important products of the East, being extensively used in the preparation of spirits, as juniper berries are with us, as a sweetmeat, as a masticatory for preserving the gums and teeth, as an antispasmodic in medicine, and as an ingredient in varnishes. The Greek writers occasionally use the word σχέρας for an entirely different plant, namely, the Squill (Scilla maritima) (see Aristoph. Plut. p. 715; Spangen. Flor. Hippoc. p. 41; Theophr. Hist. Plant. v. 6, § 10). The Pistacia lentiscus is common on the shores of the Mediterranean. According to Strand (Flor. Palest. No. 539) it has been observed at Joppa, both by Hanwol and Posecke. The mastick-tree belongs to the natural order Anacardiaceae.

* The Pistacia lentiscus is found in Syria, on Mt. Lebanon. I am not aware that the gum is extracted from it for purposes of commerce.

G. E. P.

MATHANIAS (Μαθανιας; [Vat. Becca-

\textasciitilde{\textaelia}: Mathathias] = MATTANIAH, a de-

\textasciitilde{\textaelian} of Pahath-Moab (1 Esdr. ix. 31, comp Er. x. 20).

MATHNASIUS (Μαθθαυδας: Mathnasle) = MERMISLANAH, the son of Enoch (Luke iii. 37).

MATRED (Ματρές [thrusting forth, repel-

\textasciitilde{\textaeling]: Məbat; Alex. Məbar; [1Chr. ix. Rom. Vat. omit. Alex. Məbar]: Metēr), a daughter of Mezalah, and mother of Mehetabel, who was wife of Hadar (or Hadad) of Pan, king of Edom (Gen. xxxvi. 29; 1 Chr. i. 50). Respecting the kings of Edom, whose records are contained in the chapters referred to, see HADAD, IRAM, etc.

E. S. P.

MATRI (Ματρή, with the art, properly the Matrī: Mattāri; [Vat. Mattare; Alex. Mattarei and Mattaper; Metēr), a family of the tribe of Benjamin, to which Saul the king of Israel belonged (1 Sam. x. 21).

MATTAN (Ματαν [gift]: Məbat; [Vat. Məbah; Alex. Məbāhav in Kings: Mattān in Chron.: Mathan). 1. The priest of Saul shen before his altars in the idol temple at Jerusalem, at the time when Jehoiada swept away idolatry from Judah (2 K. xi. 18; 2 Chr. xxii. 17). He probably accompanied Athaliah from Samaria, and would thus be the first priest of the Bad-wardship which Jehoram king of Judah, following in the steps of his father-in-law Ahab, established at Jerusalem (2 Chr. xxi. 6, 13); Josephus (Ant. ix. 7, § 3) calls him Mattān.

2. (Mabāhav.) The father of Shephathiah. (Jer. xxxviii. 1). W. A. W.

MATTANAH (Ματανα, [gift]: Məbāhan; Alex. Məbah; Məba(han): Mattanah), a station in the latter part of the wanderings of the Israelites (Num. xxxii. 18, 19). It lay next beyond the well, or Beer, and between it and Nahaliel; Nahaliel again being but one day's journey from the Banoth or heights of Moab. Mattanah was therefore probably situated to the S. E. of the Dead Sea, but no name like it appears to have been yet discovered. The meaning at the root of the word (if taken as Hebrew) is a “gift,” and accordingly the Euphrates—Onkelos as well as Pseudojonathan and the Jerusalem—treat Mattanah as if a synonym for Beer, the well which was “given” to the people (ver. 19). In the same vein they further translate the names in verse 20; and treat them as denoting the valleys (Nahaliel) and the heights (Banoth), to which the miraculous well followed the camp in its journeys. The legend is noticed under Beer.\textasciitilde{\textaela} By Le Clerc it is suggested that Mattanah may be the same with the mysterious word Valeh (ver. 14; A. V. “what he did”) — since the meaning of that word in Arabic is the same as that of Mattanah in Hebrew.

MATTANIAH (Ματανα, [gift of Jeho-

\textasciitilde{\textaelah]: Mattan; [Vat. Məbat; Alex. Məbāhan; Mathanion), 1. The original name of Zedekiah, king of Judah, which was changed when Nebuchadnezzar placed him on the throne instead of his nephew Jehoiachin (2 K. xxiv. 17). In like manner Pharaoh had changed the name of his brother Eliakim to Jehoiakim on a similar occa-

\textasciitilde{\textaelised in Buxtort's Excercitacions (No v. Hist. Per-

\textasciitilde{\textael in Desertio).}
MATTANIAH

2. (Mattathias in Chr., and Neh. xi. 17; Mattathia. Neh. xii. 8, 35; Alex. Mattathias. Neh. xii. 17, Mattathias. Neh. xii. 8, Mathathias. Neh. xii. 35; [Vat. in Chr. Mattathias: in Neh. xii. 17, xii. 35, xiii. 13; Mathathias: Neh. xii. 8, Mathathias: 35, Mathathias: Neh. xii. 22, xii. 25, Kon. Vat. Alex. F. A. omit.] Mattathias, ex. Neh. xii. 8, 35, Mathathias.) A Levite, father of the sons of Asaph (1 Chr. ix. 13). He is described as the son of Micah, Micah (Neh. xii. 17), or Michaela (Neh. xii. 35), and after the return from Babylon lived in the villages of the Netophathites (1 Chr. ix. 16) or Netophathi (Neh. xii. 28), where the singers had built in the neighborhood of Jerusalem (Neh. xii. 29). As leader of the temple choir after its restoration (Neh. xii. 17, xii. 8) in the time of Nehemiah, he took part in the musical service which accompanied the dedication of the walls of Jerusalem (Neh. xii. 25, 35). We find him among the Levites of the second rank, "keepers of the thresholds," an office which fell to the singers (comp. 1 Chr. xvi. 18, 21). In Neh. xii. 35, there is a difficulty, for "Mattathia, the son of Michael, the son of Zechariah," apparently the same with "Mattathia, the son of Michael, the son of Zabdi the son of Asaph" (Neh. xii. 17), and with the Mattathias of Neh. xii. 8, 25, who, as in xii. 17, is associated with Bakkukiah, and is expressly mentioned as living in the days of Nehemiah and Ezra (Neh. xii. 26). But, if the reading in Neh. xii. 35 be correct, Zechariah, the great-grandson of Mattathia (further described as one of the "priests who," whereas Mattathia was a Levite, blew the trumpet at the head of the procession led by Ezra, which marched round the city wall. From a comparison of Neh. xii. 35 with xii. 41, 42, it seems probable that the former is corrupt, that Zechariah in verses 35 and 41 is the same priest, and that the change in which the name of Mattathias is found is to be connected with ver. 36, in which are enumerated his "sons," alluded to in ver. 8.

4. (Matthewias: [Vat. Matthewas:] Alex. Matthewas: Mathanaia.) One of the sons of Eliam who had married a foreign wife in the time of Ezra (Ezr. xii. 25). In 1 Esdr. ix. 27 he is called Mattathias.

5. (Maltathias: [Vat. Mathias:] Alex. Matha- thias.) One of the sons of Zattu in the time of Ezra who put away his foreign wife (Ezr. x. 27). He is called Mathathias in 1 Esdr. ix. 28.

6. (Maltathias: [Vat. Mathias:] Alex. Mathathias: Mathathias.) A descendant of Pahath-Moab who lived at the same time, and is mentioned under the same circumstances as the two preceding (Ezr. x. 39). In 1 Esdr. ix. 31, he is called Matha- nias.

7. (Matthewias: [Vat. Matthewas:] Alex. Matthewas: Mathathias.) One of the sons of Rani, who like the three above mentioned, put away his foreign wife at Ezra's command (Ezr. x. 37). In the parallel list of Esdr. ix. 34, the names "Mattathias, Mathathias," are corrupted into MAMMITAMIANES.

8. (Maltathias: [Vat. Mathias:] Alex. Mathathias:) A Levite, father of Zechariah, and ancestor of Heman the under-treasurer who had charge of the offerings for the Levites in the time of Nehemiah (Neh. xii. 13).

9. (NATHANIAH [gift of Jehoram: Mathaias: [Vat. Matthewas:] Mathathias. 1 Chr. xxv. 4: Mathathias, 1 Chr. xiv. 16), one of the fourteen sons of Heman the singer, whose office it was to blow the horns in the temple service as appointed by David. He was the chief of the 9th division of twelve Levites who were "instructed in the songs of Jehovah."

10. (Matthewias: Mathathias.) A descendant of Asaph, the Levite minister, who assisted in the purification of the Temple in the reign of Hezekiah (2 Chr. xxi. 13).

W. A. W.

MATTATHIA (Mattathia: Mathathias), the son of Nathan, and grandson of David in the genealogy of our Lord (Luke iii. 31).

MATTATHIAH (Mattathia: Mathathias). The father of the Maccabees (1 Macc. ii. 1, 14, 16, 17, 19, 24, 27, 39, 45, 49, xiv. 29). [Maccabees. vol. ii. p. 1710 n. 6].

MATHATHIAS (Mattathias: Mathathias). The son of Absalom, and brother of Jonathan 14 (1 Macc. xii. 79, xiii. 11). In the battle fought by Jonathan the high-priest with the forces of Demetrius on the plain of Nazer (the old Hazor), his two generals Mattathias and Judas alone stood by him, when his army was seized with a panic and fled, and with their assistance the fortunes of the day were restored.

Mathathias. The son of Simon Maccabaeus, who was treacherously murdered, together with his father and brother, in the fortress of Dopus, by Ptolemeus the son of Alineus (1 Macc. xvi. 11).

Mathathias. One of the three envoys sent by Nicander to treat with Judas Maccabaeus (2 Macc. xiv. 19).

Mathathias. Son of Amos, in the genealogy of Jesus Christ (Luke iii. 25).

Mathathias. Son of Semei, in the same catalogue (Luke iii. 26).

MATTENAI [3 syll. (NATHANIAH, see above): Mathathias: [Vat. Mathias:] Alex. Mathathias: Mathathias.) 1. One of the family of Heman, who in the time of Ezra had married a foreign wife (Ezr. x. 34). In 1 Esdr. ix. he is called Mathathias.

2. (Matthewias: [Vat. Mathias:] Alex. Mathathias.) A descendant of Rani, who put away his foreign wife at Ezra's command (Ezr. x. 37). The place of this name and of Mathathias which precedes it is occupied in 1 Esdr. ix. 34 by MAMMITANIANES.

MATTENAI are Merarite Levites: if, as is probable, the same persons are alluded to in both instances. Comp. Josh. iii. 3 with Num. vii. 9.
3. [Vat. Alex. FA: omit; Rom. Martyrology] A priest in the days of Joakim the son of Jessua (Neh. vii. 19). He represented the house of Joarib.

MATTHAIUS (Rit. Text, Martyrology, Lachm. [Tisch. Text] with B, MaaThaius: Mithan, Matthaius.) The son of Eleazar, and grandfather of Joseph "the husband of Mary" (Matt. i. 15). He occupies the same place in the genealogy as MATTHAIUS in Luke iii. 24, with whom indeed he is probably identical (Hervey, Genealogies of Christ, 129, 134, &c.). "He seems to have been himself descended from Joseph the son of Judah, of Luke iii. 28, but to have become the heir of the elder branch of the house of Abod on the failure of Eleazar's issue (ib. 134).

MATTHAIANIS (Martyiani: [Vat. Mata- tys]) = MATTIAN, one of the descendants of Elias (1 Esdr. ix. 27; comp. Ezra x. 25). In the Vulgate, "Elia, Mathani" are corrupted into "Johanan, Channah," which is evidently a transcriber's error.

MATTHAT (Mattath; but Tisch. [7th ed.] Mattath [8th edition, Mattath]: Mattath, Matthew, Mattheus, etc.). I. Son of Levi and grand-father of Joseph, according to the genealogy of Luke (iii. 24). He is maintained by Lord A. Hervey to have been the same person as the MATTHAIUS of Matt. i. 15 (see Genealogies of Christ, 137, 138, &c.).

2. [Tisch. Mattathad.] Also the son of a Levi, and a progenitor of Joseph, but much higher up in the line, namely, eleven generations from David (Luke iii. 24). Nothing is known of him.

It should be remarked that no fewer than five names in this list are derived from the same Hebrew root as that of their ancestor NATHAN the son of David (see Hervey, Genealogies, etc., p. 150).

MATTHEIAS (Mathias; [Vat. Matheas]; Missiles) = MAASKELAH 1 (1 Esdr. ix. 19; comp. Ezra x. 18). The reading of the LXX. which is followed in the A. V. might easily arise from a mistake between the u with and X (C).

MATTHEW (Lachm. [Tisch. Tregz. with [Sin.] DB, Mathados: AC and Rec. Text, Mathathadius). Matthew and Evangelist is the same as LEVI (Luke v. 27-29), the son of a certain Alpheus (Mark ii. 14). His call to be an Apostle is related by all three Evangelists in the same words, except that Matthew (ix. 9) gives the former, and Mark (ii. 14) and Luke (v. 27) the latter name. If there were two publicans, both called solemly in the same form at the same place, Capernaum, then one of them became an Apostle, and the other was heard of no more: for Levi is not mentioned again after the feast which he made in our Lord's honour (Luke v. 29). This is most unlikely. Euthymius and many other commentators of note identify Alpheus the father of Matthew with Alpheus the father of James the Less. Against this is to be set the fact that in the lists of Apostles (Matt. x. 3; Mark iii. 18; Luke vi. 35; Acts i. 13) Matthew and James the Less are never named together, like other pairs of brothers in the apostolic body. [See addition to Alpheus, Ainer. ed.] It may be, as in other cases, that the name Levi was replaced by the name Matthew at the time of the call. According to Genealogies, the names Matthaeus and Matthias are both contractions of Matthias (Matt. vii. 31, "gift of Jehovah: " Θεόδροσος, Θεόδωρος) and a common Jewish name after the exile; but the true derivation is not certain (see Winer, Lange). The publicans, properly so called (publicans), were persons who farmed the Roman taxes, and they were usually, in later times, Roman knights, and persons of wealth and erudit. They employed under them inferior officers, natives of the province where the taxes were collected, called properly portil tares, to which class Matthew no doubt belonged. These latter were notorious for impudent exactations everywhere (Plut., Menexus, i. 2, 5; Cic. in Quin. Fr. i. 1; Plut. De Curiosis, p. 518 e); but to the Jews they were especially obilious; for they were the very spot where the Roman chain galled them, the visible proof of the degraded state of their nation. As a rule, none but the lowest would accept such an unpopular office, and thus the class became more worthy of the hatred with which in any case the Jews would have regarded it. The readiness, however, with which Matthew obeyed the call of Jesus seems to show that his heart was still open to religious impressions. His conversion was attended by a great awakening of the obstinate classes of the Jews (Matt. ix. 9, 10). Matthew in his Gospel does not omit the title of infamy which had been longed to him (x. 3); but neither of the other Evangelists speaks of "Matthew the publican." Of the exact nature which fell to him in interpreting the Gospel we have nothing whatever in the N. T., and other sources of information we cannot trust. Eusebius (H. E. iii. 24) mentions that after our Lord's ascension Matthew preached in Judæa (some add for fifteen years; Clem. Strom. vi)., and then went to foreign nations. To the lot of Matthew fell to visit Ethiopia, says Socrates Scholasticus (H. E. i. 19; Ruff. H. E. x. 9). But Ambrose says that God opened to him the country of the Persians (In Ps. 45); Isidore the Macedonians (Isidore Hisp. de Sanct. 77); and others the Parthians, the Medes, the Persians of the Ephratae. Nothing whatever is really known. Harnack, the disciple of Valentins (cited by Clemens Alex. Strom. iv. 9), describes him as dying a natural death, which Clement, Origen, and Tertullian seem to accept: the tradition that he died a martyr is true or false, came in afterwards (Nic. H. E. ii. 41).

If the first feeling on reading these membre particulars be disappointment, the second will be admiration for those who, doing their part under God in the great work of founding the Church on earth, have passed away to their Master in heaven without so much as an effort to redeem their names from silence and oblivion. (For authorities see the works on the Gospels referred to under Luke and Gospels: also Fritzsche, In Matthaeum, Leipzig, 1826; Lange, Biblicalc., part i.)

W. T.

MATTHEW, GOSPEL OF. The Gospel which bears the name of S. Matthew was written by the Apostle, according to the testimony of all antiquity.

1. Language in which it was first written. — We are told on the authority of Papias, Irenæus, Pantaenus, Origens, Eusebius, Epiphanius, Jerome, and many others, that the Gospel was first written in Hebrew, i.e. in the vernacular language of Palestine, the Aramaic. (v.) Papias of Hierapolis (who flourished in the first quarter of the 2nd century) says, "Matthew wrote the divine oracles (א""כ אדרא) in the Hebrew dialect, and each interpreted them as he was able." (Eusebius, H. E. iii. 39). It is
been held that τα λόγια is to be understood as a collection of discourses, and that therefore the text here alluded to containing, 'we are our Lord but his word'-but this falls through, for Papias applies the same word to the Gospel of St. Mark, and he uses the expression λόγια κατὰ τὸν τίτλον of his own work, which we know from fragments to have contained facts as well as discourses (Studien und Kritiken, 1832, p. 733; Meyer, Einleitung; De Wette, Einleitung, § 87 a; Alford's Text, p. 297). For, indeed, in the same place pronounces Papias to be "a man of very feeble understanding;" in reference to some false opinions which he held; but it requires little critical power to bear witness to the fact that a certain Hebrew book was in use. (6.) Irenaeus says (iii. 1), that "whilst Peter and Paul were preaching at Rome and sounding the Church, Matthew put forth his written Gospel amongst the Hebrews in their own dialect." It is objected to this testimony that Irenaeus probably drew from the same source as Papias, for whom he had great respect; this assertion can neither be proved nor refuted, but the testimony of Irenaeus is in itself no mere copy of that of Papias. (c.) According to Eusebius (H. E. v. 10), Pantecon (who flourished in the first part of the 2nd century) is quoted as having "gone to the Indians" (i. e., to the south of Arabia?); where it is said that he found the Gospel of Matthew already among some who had the knowledge of Christ there, to whom Bartholomew, one of the Apostles, had preached, and left them the Gospel of Matthew written in Hebrew, which was preserved till the time referred to. We have no writings of Pantecon, and Eusebius records, that he "spoke amongst the Indians," which is often taken as proof of an early date for the conversion to Christianity of the Indians. (d.) Origen says (Contra haereses, i. 21), that "as you have heard the Gospel written in Greek, so have I heard it in the Hebrew tongue, from the lips of the tradition of the Fathers, to which, in the 18th year of the reign of Antoninus Pius, I received it from the lips of St. Hilarion;" and Jerome (Commentary, p. 284) says that the singing of the Psalms by the Christians was discovered in the 3rd century. (e.) Eusebius (H. E. iii. 24) gives as his own opinion the following: "Matthew having first preached to the Hebrews, delivered to them, when he was preparing to depart to other countries, his Gospel, composed in their native tongue, which was reduced to the same effect, or the same text, in the 2nd century (Cyclet, p. 14), Epiphanius (Hær. B. 2, 1), Hieronymus (de Vir. ill. ch. 3), who mentions the Hebrew original in seven places at least of his works, and from Gregory of Nazianzus, Chrysostom, Augustine, and other later writers. From all these there is no doubt that the old opinion was that Matthew wrote his Gospel in the Hebrew tongue. In whom we are to attribute the Greek translation, is not shown; but the quotation of Papias proves that in the time of John the Presbyter, and probably in that of Papias, there was no translation of great authority, and Jerome (de Vir. ill. ch. 3) expressly says that the translator's name was uncertain. On this view all the testimony is for a Hebrew original. But there are arguments of no mean weight in favor of the Greek a very brief account of which may be given here. 1. The quotations from the O. T. in this Gospel, which are very numerous (see below), are of two kinds: those introduced into the narrative to point out the fulfillment of prophecies, etc., and those where in the course of the narrative the persons introduced, and especially our Lord Himself, make use of O. T. quotations. Between these two classes a difference of treatment is observable. In the latter class, where the citations occur in discourses, the Septuagint version is followed, even where it deviates somewhat from the original (as iii. 3, xiii. 14), or where it ceases to follow the very words, the deviations do not come from a closer adherence to the Hebrew O. T.; except in two cases, xi. 10 and xxvi. 31. The quotations in the narrative, however, do not follow the Septuagint, but appear to be a translation from the Hebrew text. Thus we have the remarkable phenomenon that, whereas the Gospels agree most exactly in the speeches of persons, and most of all in those of our Lord, the quotations in these speeches are preserved by the Hebrew, but from the Septuagint version, although many or most of them must have been spoken in the vernacular Hebrew, and could have had nothing to do with the Septuagint. A mere translator could not have done this. But an independent writer, using the Greek tongue, and wishing to conform his narrative to the oral teaching of the Apostles (see xv. ii. p. 148 4), might have used for the quotations the well-known Greek O. T. used by his colleagues. There is an independence in the mode of dealing with citations throughout, which is inconsistent with the function of a mere translator. 2. But this difficulty is to be got over by assuming a high authority for this translation, as though made by an inspired writer; and it has been suggested that this writer was Matthew himself (Bengel, Olshausen, Lee, and others), or at least that he directed it (Guericke), or that it was some other Apostle (Gerhard), or James the brother of the Lord, or John, or the general body of the Apostles, or that two disciples of St. Matthew wrote, from him, the one in Aramaic and the other in Greek. We are further invited to admit, with Dr. Lee, that the Hebrew book "belonged to that class of writings which, although composed by inspired men, were never designed to form part of the Canon" (On Inspiration, p. 571). But supposing that there were any good ground for considering these suggestions as facts, it is clear that: in the attempt to preserve the letter of the tradition, they have quite altered the spirit of it. Papias and St. Matthew are not the same persons, but independent translators; the moderns make a Greek original, which is a translation only in name, and a Hebrew original never intended to be preserved. The modern view is not what Papias thought or uttered; and the question would be one of mere names, for the only point worthy of a struggle is this, whether the Gospel in our hands is or is not of independent production, and especially the authority, and authenticity. 4. Olshausen remarks, "While all the fathers of the church relate that Matthew has written in Hebrew, yet they universally make use of the Greek text, as a genuine apostolic composition, without remarking what relation the Hebrew Matthew bears to our Greek
Matthew, Gospel of

Gospel. — For that the earlier ecclesiastical teachers did not possess the Gospel of St. Matthew in any other form than we now have it, is established.

(Ahdcltt, p. 39.) The original Hebrew of which so much has been written has not been seen (Jerome, de Vir. ill. p. 3, is no exception). And so little store has the church set upon it, that it has utterly perished. 5. Were there no explanation of this inconsistency between assertion and fact, it would be hard to doubt the concurrent testimony of so many old writers, whose belief in it is shown by the tenacity with which they held it in spite of all the arguments of later critics. It is certain that a Gospel, not the same as our canonical Matthew, sometimes usurped the Apostle's name; and some of the witnesses we have quoted appear to have referred to this in one or other of its various forms or names. The Christians in Palestine still held that the Mosaic ritual was binding on them, even after the destruction of Jerusalem. At the close of the first century one party existed who held that the Mosaic law was only binding on Jewish converts — this was the Nazarenes. Another, the Ebionites, held that it was of universal obligation on Christians, and rejected St. Paul's Epistles as teaching the opposite doctrine. These two sects, who differed also in the most important tenets as to our Lord's person, possessed each a modification of the Jewish Gospel, which no doubt each altered more and more, as their tenets diverged, and which bore various names — the Gospel of the Twelve Apostles, the Gospel according to the Hebrews, the Gospel of Peter, or the Gospel according to Matthew. Enough is known to decide that the Gospel according to the Hebrews was not identical with our Gospel of Matthew. But it had many points of resemblance to the synoptical gospels, and especially to Matthew. What was its origin? It is impossible to say: it may have been a description of the oral teaching of the Apostles, corrupted by degrees; it may have come in its early and pure form from the hand of Matthew, or it may have been a version of the Greek Gospel of St. Matthew, as the Evangelist who wrote especially for Hebrews. Not the Protocanonical (Thiersch), did exist; it is impossible that when the Hebrew Matthew is spoken of, this questionable document, the Gospel of the Hebrews, was really referred to? Observe that all accounts of it are at second hand (with a notable exception); no one quotes it; in cases of doubt about the text. Origens even does not appeal from the Greek to the Hebrew. All that is certain is, that Nazarenes or Ebionites, or both, boasted that they possessed the original Gospel of Matthew. Jerome is the exception; and him we can convict of the very mistake of confounding the two, and almost on his own confession. "At first he thought," says an anonymous writer (Edinburgh Review, 1854, July, p. 29), "that it was the authentic Matthew, and translated it into both Greek and Latin from a copy which he obtained at Berea, in Syria. This appears from his De Vir. ill., written in the year 392. Six years later, in his Commentary on Matthew, he spoke more doubtfully about it, — "quod vocatur per seque Matthei authenticum." Later still, in his book on the Pelagian heresy, written in the year 415, he modifies his account still further, describing the work as the Evangelium juxta Hebreos, quoted Chaldeus quidem Syroque sermonem, seu Hebreae literis conscriptum est, quo utuntur que hodie Nazareni secundum Apostolos, sive st
7. Matthew alone of the Evangelists uses καὶ δύο δεκατεθήκεν, ἡ μέτα ταύταις ἡ προσφορά as the form of quotation from O. T. The frequent exception in Mark viii. 14 is rejected by Tischendorf, etc., as a wrong reading. In Matt. about twenty times.

8. Ἀναρμοστή is a frequent word for to revise. Once in Mark.

9. κατὰ ὅραμα used six times; and here only.

10. The use of πορφογένεσις preceding an interview, as in iv. 3, is much more frequent with Matthew than Mark and Luke, as only once in John. Compare the same use of πορφερεσία, as in ii. 8, xii. more frequent in Matt.

11. ἕξετάρα after a verb, or participle, six times; the same word used once each by Mark and Luke, but after adjectives.

12. With St. Matthew the particle of transition is usually the indeclinable ὅτε; he uses it ninety times, against six times in Mark and fourteen in Luke.

13. Kai ἐγένετο ὅτε, vii. 28, xi. 1, xiii. 53, xix. 1, xxvi. 1; to be compared with the ὅτε ἐγένετο of Luke.

14. Ποιεῖ ἰδίως δὲ ἄνθρωπον, etc., is characteristic of Matthew: i. 24, vi. 2, xx. 3, xxi. 6, xx. 38, xviii. 15.

15. τοιαύτα six times in this Gospel, not in the others. They use μηνύσεως frequently, which is also found seven times in Matt.

16. Συμβολισμὸν λαμβάνειν, peculiar to Matt. Συμβ. ποιεῖ ἢ ὅτε two times in Mark; nowhere else.

17. Μαθαίνει, μαθαίνειν, σελήναισθαι, peculiar to Mark. The following words are either used by this Evangelist alone, or by him more frequently than by the others: φροίμος ἀλοίπας, εὐτύχει, εὐμεταξύσεως, καταποιηθέντος, μεταποιηθέντος, θρίκεια, σωτηρία μέγα.

18. The frequent use of ἐνάντιον after a negitive absolute (as i. 20), and of καὶ ἐνάντιον when introducing anything new, is also peculiar to St. Matt.

19. Adverbs usually stand after the imperative, not before it; except οὕτως, which stands first.

Ch. xi. 11 is an exception.

20. ἐπισκευάζειν takes the dative in St. Matt., and elsewhere more rarely. With Luke and John it takes the accusative. There is one apparent exception in Matt. (iv. 10), but it is a quotation from O. T.

21. The participle λέγον is used frequently without the dative of the person, as in i. 20, ii. 2. Ch. vii. 21 is an exception.

22. The expression ἔστω εἷς ἢ εἶναι is a Hebraism, frequent in Matt., and unknown to the other Evangelists.

23. Τεραπολέμα is the name of the holy city with Matt. always, except xxiii. 37. It is the same in Mark, with one (doubtful) exception (xi. 1). Luke uses this form rarely; ἤπειρακαλή frequently.

11. Citations from O. T. — The following list is nearly complete: —

The number of passages in this Gospel which refer to the O. T. is about 65. In St. Luke they are 43. But in St. Matthew there are 43 verbal citations of O. T.; the number of these direct appeals to its authority in St. Luke is only about 19. This fact is very significant of the character and original purpose of the two narratives.

IV. Genesis of the Gospel. — Some critics, attributing the apostolic antiquity of a part of the Gospel, apply to St. Matthew as they do to St. Luke (see vol. ii, p. 1685) the gratuitous supposition of a later editor or compiler, who by augmenting and altering the earlier document produced our present Gospel. Hilgenfeld (p. 106) endeavors to separate the older from the newer work, and includes much historical matter in the former: since Schleiermacher, several critics, misinterpreting the Ἀνάγνωσις of Papias, consider the older document to have been a collection of "discourses" only. We are asked to believe that in the second century for two or more of the gospels, new works, differing from them both in matter and compass, were substituted for the old, and that about the end of the second century our present Gospels were adopted by authority to the exclusion of all others, and that henceforth the copies of the older works entirely disappeared, and have escaped the keenest research ever since. Eichhorn’s notion is that the "Church" sanctioned the four canonical books, and by its authority gave them exclusive currency; but there existed at that time no means for conveying a "canon"; and if such a body could have met and decided that it was not yet able to do so, the Churches books discrepant from the older copies to which they had long been accustomed, without discussion, protest, and resistance (see Norton, Geminus, Chap. I.). That there was no such resistance or protest we have ample evidence.

Irenæus knows the four Gospels only (Herr. iii. 20), and that he would die as, i. 170, composed a harmony of the Gospels, lost to us, under the name of Diatessaron (Eins. H. E., iv. 29). Theophrilus, bishop of Antioch, about 180, wrote a commentary on the Gospels (Hieron, ad Aristomen. et de Brev. 3. 2). Clement of Alexandria (flourished about 189) knew the four Gospels, and distinguished between...
them and the uncannon Gospel according to the Egyptians. Tertullian (born about 160) knew the four Gospels, and was called on to vindicate the text of one of them against the corruptions of Marcion (see above, Luke). Origen (born 185) calls the four Gospels the four elements of the Christian faith; and it appears that his version of Matthew contained the two first chapters (Canon, in Joam.). Passages from St. Matthew are quoted by Justin Martyr, by the author of the letter to Diognetus (see in Otto's Justin Martyr, vol. ii.), by Hegesippus, Ireneaus, Tatian, Athenagoras, Theophilus, Clement, Tertullian, and Origen. It is not merely from the matter but the manner of the quotations, from the calm appeal as to a settled authority, from the absence of all hints of doubt, that we regard it as proved that the book we possessed had not been the subject of any sudden change. Was there no heretic to throw back with double force against Tertullian the charge of alteration which he brings against Marcion? Was there no orthodox church or member of a church to complain, that instead of the Matthew and the Luke these had, tamely, been allowed to live, and their fathers, other and different writings were now imposed on them? Neither the one nor the other appears.

The citations of Justin Martyr, very important for this subject, have been thought to indicate a source different from the Gospels which we now possess; and by the word ἀνωμονεονέγατα (memoirs), he has been supposed to indicate that lost work. Space is not given here to show that the remains referred to are the Gospels which we possess, and not any one book; and that though Justin quotes the Gospels very loosely, so that his words often bear but a slight resemblance to the original, the same is true of his quotations from the Septuagint. He transposes words, brings separate passages together, attributes the words of one prophet to another, and even quotes the Pentateuch for facts not recorded in it. Many of the quotations from the Septuagint are indeed precise, but these are chiefly in the Dialogue with Trypho, where, reasoning with a Jew on the O. T., he does not trust his memory, but consults the text. This question is disposed of in Norton's Genuineness, vol. i., and in Hug's Einlautung. [See also Westcott's Canon of the N. T., 2d ed., p. 85 f.]

The genuineness of this copy of the Gospels has been questioned: but is established on satisfactory grounds (see Fitzschel, on Matt., Excursus iii.; Meyer, on Matt. p. 65). (i.) All the old MSS. and versions contain them; and they are quoted by the Fathers of the 2d and 3d centuries (Ireneaus, Clement Alex., and others). Celsius also knew oh. ii. (see Origen cont. Cels. i. 38). (ii.) Their contents would naturally form part of a Gospel intended primarily for the Jews. (iii.) The commencement of ch. iii. is dependent on ii. 23: and in iv. 13 there is a reference to ii. 23. (iv.) In constructions and expressions they are similar to the rest of the Gospel (see examples above, in II. Style and Diction). Professor Norton disputes the genuineness of these chapters upon the ground of the difficulty of harmonizing them with St. Luke's narrative and with the thought that a large number of the Jewish Christians did not possess them in their version of the Gospel. The former objection is discussed in all the commentaries; the answer would require much space. But, (1.) Such portions are by no means confined to these chapters, but are found in places of which the Apostolic origin is admitted. (2.) The treatment of St. Luke's Gospel by Marcin (vol. ii. pp. 1604, 1655) suggests how the Jewish Christians dropped out of their version an account which they would not accept. (3.) Prof. N. stands alone, among those who object to the two chapters, in assigning the genealogy to the same author as the rest of the chapters (Eugenii, pp. 46, 47). (4.) The difficulties in the harmony are all reconcilable, and the day has passed, it may be hoped, when a passage can be struck out, against all the MSS. and the testimony of early writers, for subjective impressions about its contents.

On the whole, it may be said that we have for the genuineness and Apostolic origin of our Greek Gospel of Matthew, the best testimony that can be given for any book whatever.

V. Time when the Gospel was written. — Nothing can be said on this point with certainty. Some of the ancients think that it was written in the eighth year after the Ascension (Theophyuct and Euthymius); others in the fiftenth (Nephephor., H. E. i. 45); whilst Ireneaus says (iii. 1) that it was written shortly before Peter and Paul were sent by the Lord to Jerusalem, and Eusebius (H. E. ii. 24), at the time when Matthew was about to leave Palestine. From two passages, xxvii. 7, 8, xxviii. 15, some time must have elapsed between the events and the description of them, and so the eighth year seems out of the question; but a term of fifteen or twenty years would satisfy these specifications. The testimony of old writers that Matthew's Gospel is the earliest must be taken into account (Origen in Eus. H. E. vi. 25; Ireneaus, iii. 1; comp. Muratorian fragment, as far as it remains, in Credner's Kanon); this would bring it before A. D. 58-60 (vol. ii. p. 1636), the supposed date of St. Luke. The most probable supposition is that it was written between 50 and 60; the exact year cannot even be guessed at.

VI. Place where it was written. — There is not much doubt that the Gospel was written in Palestine. Hug has shown elaborately, from the fusion of the Greek element over and about Palestine, that there is no inconsistency between the assertions that it was written for Jews in Palestine, and that it was written in Greek (Einlautung, ii. ch. i. § 10); the facts he has collected are worthy study. [LANGUAGE OF THE N. T., Amer. ed.] VII. Purpose of the Gospel. — The Gospel itself tells us by plain internal evidence that it was written for Jewish converts, to show them in Jesus of Nazareth the Messiah of the O. T. whom they expected. Jewish converts over all the world seem to have been intended, and not merely Jews in Palestine (Ireneaus, Origen, and Jerome say simply that it was written "for the Hebrews"). Jesus is the Messiah of the O. T., recognizable by Jews from his acts as the rest of the chapters (Hilgenfeld, in Matt. xix. 14, xi. 5); and the Gospel itself shows that this is the purpose of the Evangelist. The Messiah is the hope of Israel, and the world in general (xxvi. 20); and the Gospel is written for all the world, to be read and understood by all Jews (xxvii. 53), and by the Gentiles also (xxvii. 6). The Messiah is the light of the world (xxvii. 12); and the Gospel is the light of the world (Matt. xxvii. 60). The purpose of the Gospel is to make the Messiah known, to show him to the world, to win him for the world. — See Matt. xix. 10. John xv. 1, to Matt. xxvii. 60. The world of the Gentiles is included in the world of the Jews (xxvii. 53), and the world of the Gentiles is the whole world (xxvii. 6). The purpose of the Gospel is to win all the world to the Messiah.
Matthew, Gospel of

parables (xiii. 11); He entered the holy city as Messiah (xxi. 5-16); was rejected by the people, in fulfillment of a prophecy (xxi. 42); and deserted by his disciples in the same way (xxvii. 31-33). The Gospel is pervaded by one principle, the fulfillment of the Law and of the Messianic prophecies in the person of Jesus. This at once sets it in opposition to the Judaism of the time: for it rebuked the Pharisaic interpretations of the Law (xxi. 31), and proclaimed Jesus as the Son of God and the Saviour of the world through his blood, ideas which were strange to the cramped and limited Judaism of the Christian era.

VIII. Contents of the Gospel. — There are traces in this Gospel of an occasional superseding of the chronological order. Its principal divisions are —

I. The Introduction to the Ministry, i.-iv. 11.

The laying down of the new Law for the Church in the Sermon on the Mount, v.-vii. III. Events in historical order, showing Him as the worker of Miracles, viii. and ix. IV. The appointment of Apostles to preach the kingdom, x. V. The doubts and opposition excited by his activity in divers minds — in John’s disciples, in sundry cities, in the Pharisees, xi. and xii. VI. A series of parables on the nature of the Kingdom, xiii. VII. Similar to V. The effects of his ministry on his countrymen, on Herod, the people of Gennesaret, Serib, and Pharisaeus, and on multitudes, whom He feeds, xiii. 53—xvi. 12. VIII. Revoltion to his disciples of his sufferings. His instructions to them, thereupon, xvi. 13—xviii. 55. IX. Events of a journey to Jerusalem, xvi. xx. X. Entrance into Jerusalem and resistance to Him there, and denunciation of the Pharisees, xxi.—xxii. XI. Last discourses; Jesus as Lord and Judge of Jerusalem, and also of the world, xxiv., xxv. XII. Passion and Resurrection, xxvi.—xxviii.

Sources. — The works quoted under Luke, pp. 1098, 1699; and Norton, Genuineness of the Gospels; Fritzschel, on Matthew; Lange, Bibelwerk; Cremer, Einleitung und Beiträge. W. T.

Among the exegetical works on the Gospel, we can only glance at the older literature, as the commentaries of Origen, Chrysostom (Homilies, best ed. by Field, 3 vols. Cantab. 1859, and Eng. trans. by Dr. Oxon., 1845—51, in the Oxford Liber, of the Fathers), the author of the Opera imperfecta published with Chrysostom’s works (vol. vi. of the Benedictine edition), Theophylact, and Ephraem’s Zygalemus, among the tregs fathers, and of Hilary of Poitiers, Jerome, Augustine (Questions), Bede, Thomas Aquinas (Comm. on Catena aurea), and others, among the Latin; Cranmer’s Catalog Grace, Potumer in Ev. Matthaei et Marc. Oxon. 1840, and the Greek Scholia published by Carol. Mai in his Class. Afr. e Vaticinis Cod. edt., vol. vi. pp. 379—494. These patristic commentaries are generally of little critical value, but are of some interest in their bearing on the history of interpretation and of Christian theology. We must content ourselves with referring to the bibliographical works of Winer, Winer, Topaj, and other recent bibliographies of Christian divines since the Reformation; those of Calvin and Grotius are the most important. See also the addition to the art. Gospels, vol. ii. pp. 950—963, for the more recent expositions of the Gospels collectively. A few special works on the Gospel of Matthew may be mentioned here by way of supplement, namely: Sir John Lightfoot’s Commentary on the Greek of the Gospel of St. Matthew, etc., with Notes, etc. edited by J. Gardiner, Lond. (Fickering), 1813. Daniel Scott (author of the Appendix ad Stephanus Theolomaei Grecum), New Version of St. Matthew’s Gospel, with Select Notes, Lond. 1841, 4to, of some value for its illustrations of the language from Greek authors. J. E. Elmer, Comm. crit. chap. in Er. Matth., 2 vols. Zwolle, 1676—90, 4to. G. Hub. Wakefield, New Harmony of the Gospel of Mathew, with Notes, Lond. 1782, 4to. A. Gratz (Cath.), Hist. crit. Comm. ab. d. Er. Math., 2 Theile, Tübing. 1821—23. The elaborate commentary of Fritzschel, publ. in 1826, followed by his equally or more thorough works on the Gospel of Mark and the Epistle to the Romans, marks an epoch in the history of the in-
After the address of St. Peter, the whole assembled body of the brethren, amounting in number to about 120 (Acts i. 15), proceeded to nominate two, namely, Joseph surnamed Barsabas, and Matthias, who answered the requirements of the Apostle: the subsequent selection between the two was referred in prayer to Him who, knowing the hearts of men, knew which of them was the fitter to be his witness and apostle. The brethren then, under the heavenly guidance which they had invoked, proceeded to give forth their lots, probably by each writing the name of one of the candidates on a tablet, and casting it into the urn. The urn was then shaken, and the name that first came out decided the election. Lightfoot (Hor. Heb. Luc. i. 9) describes another way of casting lots which was used in assigning to the priests their several parts in the service of the Temple. The Apostles, it will be remembered, had not yet received the gift of the Holy Ghost, and this solemn mode of casting the lots, in accordance with a practice enjoined in the Levitical law (Lev. xvi. 8), is to be regarded as a way of referring the decision to God (comp. Prov. xvi. 33). St. Chrysostom remarks that it was never repeated after the descent of the Holy Spirit. The election of Matthias is discussed by Bishop Beveridge, Works, vol. i. serm. 2.

MATTHIAS (Ματθαίας; Mathathias) = Mattathiah, of the descendants of Hasumm (1 Esdr. ix. 33; comp. Exx. x. 33).

MATTHIAS (Ματθαίας) = [gift of Jehovah]: Matthias; [Vat. Sin.] Alex. Matthias; Mathathias.
1. A Levite, the first-born of Shalum the Korhite, who presided over the offerings made in the pans (1 Chr. xi. 31; comp. Lev. vi. 20 [12], &c.).
2. (Matthathias.) One of the Levites of the second rank under Asaph, appointed by David to minister before the ark in the musical service (1 Chr. xvi. 5), "with harps upon Shemmith" (comp. 1 Chr. xv. 21), to lead the choir. See below, 5.
3. (Matthathias; [Vat. F. Θαμαθαία]: Alex Mathathias.) One of the family of Nebo, who had married a foreign wife in the days of Ezra (Ex. ix. 43). He is called Maititas in 1 Esdr. ix. 35.
4. (Matthathias; [Vat. F. Α. Ματαθαία]: Alex Mathathias.) Probably a priest, who stood at the right hand of Ezra when he read the Law to the people (Neh. viii. 4). In 1 Esdr. ix. 45, he appears as Mattathias.
5. (Ματθαίας: 1 Chr. xv. 18, Mattathia, [Vat. Ματθαίας, F. Alex. Mattathias; 21, Mattathias, [Vat. F. Mattathias]; xxv. 5, 21, Mattathias, [Vat. F. Mattathias]; Alex. Mattathias, 1 Chr. xxv. 3; Mattathias, 1 Chr. xxv. 21). The same as 2, the Hebrew being in the lengthened form. He was a Levite of the second rank, and a doorkeeper of the ark (1 Chr. xv. 21). As one of the six sons of Jeduthun, he was appointed to preside over the 14th division of twelve Levites into which the Temple choir was distributed (1 Chr. xxv. 3, 21).

MATTOCK. The tool used in Arabia for loosening the ground, described by Niebuhr, answers generally to our mattock or grubbing-axe, i. e. a single-headed pickaxe, the axeula simplex, as opposed by grubbing-axe, or mattock, &c. 1839
Egyptian mace. (From Wilkinson.)

MAUL (i. e., a hammer; a variation of mall, from melus), a word employed by our translators to render the Hebrew term יִפְּקָדָה. The Hebrew and English alike occur in Prov. xxi. 18 only. But a derivative from the same root, and differing but slightly in form, namely יֵפְקָדָה, is found in Jer. vi. 20, and is there translated by "battle-axe"—how incorrectly is shown by the constant repetition of the verb derived from the same root in the next three verses, and there uniformly rendered "break in pieces." The root יֵפְקָדָה or יֵפְקָדָה, has the force of dispersing or smashing, and there is no doubt that some heavy warlike instrument, a mace or club, is alluded to. Probably such as that which is said to have suggested the name of Charles Martel.

The mace is frequently mentioned in the accounts of the wars of the Europeans with Saracens, Turks, and other Orientals, and several kinds are still in use among the Bedouin Arabs of remoter parts (Burkhardt, Notes on Bedouins, i. 55). In their European wars the Turks were notorious for the use they made of the mace (Knaflcy's Hist. of the Turks).

A similar word is found once again in the original of Ec. ix. 2 יֵפְקָדָה יִפְּקָדָה = weapon of smashing (A. V., "slaughter-weapon"). The sequel shows how terrible was the destruction such weapons could effect.

MAUZZIM (יוֹזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶזֶz יִפְּקָדָה) [see below]: [Theodot.]

Mauzzim (יוֹזֶזֶזֶזֶזֶזֶזֶz יִפְּקָדָה: Alex. Mauzzi: Mauzzim). The marginal note to the A. V. of Dan. xi. 38, "the God of forces," gives, as the equivalent of the last word, "Mauzzim, or gods protectors, or munitions." The Geneva version renders the Hebrew as a proper name both in Dan. xi. 38 and 39, where the word occurs again (marg. of A. V. "munitions"). In the Greek version of Theodotion, given above, it is treated as a proper name, as well as in the Vulgate. The LXX. as at present printed is evidently corrupt in this passage, but in υπάγει (ver. 37) appears to represent the word in question. In Jerome's time the reading was different, and he gives "Deum fortissimum" for the Latin translation of it, and "Deum fortitudinem" for that of Aquila. He ridicules the interpretation of Forfury, who, ignorant of the true root of μαυζους, from which instead of "fortissimum" or "fortitudinem", he selected "magnum" or "magnus", so as to make it mean "the great god". It was thus that the Jews called Mose, God's messenger, and by the name of a god, they covered the ineffable name of the Creator. For it is the same word, according to the Septuagint, that is also rendered "Mose" in the Greek version of the New Testament.
MAZITIAS [Magistras; [Vat. Zeytus: M. Zey)

MAZAROTH (Meq.ih: Luzifer).

The margin of the A. V. of Job xxxviii. 32 gives "the twelve signs" as the equivalent of "Mazzaroth," and this is in all probability its true meaning. The Peshito-Syriac renders it by אָבִ֖ו, "all or the "southern "), deriving the word from אָבִ֖ו, "a crown." Furst (Hom) s. v.) understands by Mazzaroth the planet Jupiter, the same as the "star" of Auson v. 26. But the interpretation given in the margin of our version is supported by the authority of Gesenius (Thes. p. 884). On referring to 2 K. xxii. 5, we find the word מָעְזוּדָל (A. V. "the planets"), differing only from Mazzaroth in having the liquid 1 for 7, and rendered in the margin "the twelve signs," as in the Vulgate. The LXX. also have מָעְזוּדָל, which points to the same reading in both passages, and is by Syncellus explained as "the Zodiac," but by Procopius of Gaza as probably "Lucifer, the morning star," following the Vulgate of Job xxxviii. 32. In later Jewish writings מָעְזוּדָל are the signs of the Zodiac, and the singular, מָעְזוּדָל, is used to denote the single signs, as well as the planets, and also the influence which they were believed to exercise upon human destiny (Selden, De Dis Syr. Syst. l. c. 1). In consequence of this, Jarchi, and the Hebrew commentators generally, identify מָעְזוּדָל and מָעְזוּדָל, though their interpretations vary. Aben Ezra understands "stars" generally; but R. Levi ben Gershon, "a northern constellation." Gesenius himself is in favor of regarding מָעְזוּדָל as the older form, signifying strictly "premonitions," and in the concrete sense, "stars that give warnings or presages," from the usage of the root מָעְזָדָו, מָעְזָדָו, in Arabic. He deciphered, as he believed, the same word on some Cebician coins in the inscription מָעְזָדָו מָעְזָדָו, which he renders as a prayer, מָעְזָדָו מָעְזָדָו, "may thy pure star (shine) over (us)" (Mon. Phaen. p. 279, tab. 36). W. A. W.

* Both Mazzaroth and Arcturus disappear from Job xxxviii. 32 in a more accurate translation. Dr. Conant (Book of Job, p. 148) renders the passage thus: "Dost thou lead forth the Signs in their season; and the Bear with her young, dost thou guide them?" He remarks on the words "that the circuit of the year is meant first, as marked by the succession of the celestial signs; and, second, by the varying position of the great northern constellation, in its annual circuit of the Pole." He defends the view of Gesenius against that of Ewald.

H.

MEADOW. This word, so peculiarly English, is used in the A. V. to translate two words which are entirely distinct and independent of each other.

1. Gen. xlii. 2 and 18. Here the word in the original is מָעְזָדָו, (with the definite article), ha-Mazzaroth. It appears to be an Egyptian term, literally transferred into the Hebrew text, as it is also into that of the Alexandrian translators, who give it as της, 'Αχθος. The same form is retained by the Coptic version. Its use in Job viii. 11 (A. V. "plag")—where it occurs as a parallel to γηνεα—(A. V. "ruin"), a word used in Ex. ii. 3 for the "hurricane"—which Moses' ark was composed—seems to show that it is not a "meadow," but some kind of reed or water-plant. This is the LXX. support, both by rendering in the latter passage βους, and also by introducing "Αχθος as the equivalent of the word rendered "paper-reeds" in Is. xiv. 7. St. Jerome, in his commentary on the passage, also confirms this meaning. He states that he was informed by learned Egyptians that the word αχθος denoted in their tongue any green thing that grew in a marsh—ομοιοιος πολεοδομος ως νεκταρ. But as during high inundations of the Nile—such inundations as are the cause of fruitful years—the whole of the land on either side is a marsh, and as the cultivation extends to the very lip of the river, it is not possible that the Acha may denote the herbage of the growing crops? The fact that the cows of Hieron's vision were feeding there would seem to be as strong a figure as could be presented to an Egyptian of the extreme fruitfulness of the season: so luxuriant was the growth on either side of the stream, that the very cows fed amongst it unmolested. The lean kine, on the other hand, merely stand on the dry brink. [Nile, No one appears yet to have attempted to discover on the spot what the signification of the term is. [Flac, vol. i. p. 830 a and b. Amer. ed.]

2. Judg. xx. 33 only: "the meadows of Gibeah." "The meadows of Gibeah," according to the Alex. MS., read a different Hebrew word יַתְנָא, Muqrah, which occurs nowhere else with the same vowels attached to it. The sense is thus doubly uncertain. "Meadows" around Gibeah can certainly never have existed: the nearest approach to that sense would be to take muqrah as meaning an open plain. This is the dictum of Gesenius (Thes. p. 1069), on the authority of the Targum. It is also adopted by De Wette (die Phänomen G.). But if an open plain, where could the ambush have concealed itself?

The LXX., according to the Alex. MS., read a different Hebrew word יַתְנָא יַתְנָא מָעְזָדָו מָעְזָדָו from the west of Gibeah." Tremellius, taking the root of the word in a figurative sense, reads "after Gibeah had been left open," i.e. by the quitting of its inhabitants—post denudationem Gibbati. This is adopted by Bertheau (Kurzgez. Hund. ad loc.). But the most plausible interpretation is that of the Peshito-

fragments of the Hexapla, attempts to reconcile sound and sense by ημερας. The Veneto-Greek has ἡμέρας. C. Codex B of the Vat. MS., wants Gen. i.-x. 28 inclusive: this portion is supplied in Mai's edition from a later MS.

A.

c. The Vatican Codex translates the word literally—Μαζαροθ.
MEAH, THE TOWER OF

[see below]: τὸ ἡμισέκτο χώρον. \\

MEALS. Our information on this subject is

but scanty: the early Hebrews do not seem to have

9: specially named to their several meals, for the

terms rendered "dine" and "dinner" in the A. V.

(see xiii. 16; Prov. xv. 17) are in reality general

expressions, which might more correctly be rendered

"eat" and "portion of food." In the N. T. we have

the Greek terms ἀπερατός and δείσωρ, which

the A. V. renders respectively "dinner" and "supper" (Luke xiv. 12; John xxi. 22), but which are

more properly "breakfast" and "dinner." There

is some uncertainty as to the hours at which the

meals were taken: the Egyptians undoubtedly took

their principal meal at noon (Gen. xiii. 11); laborers

took a light meal at that time (Ruth ii. 14; 

comp. verse 17); and occasionally that early bout

was devoted to excess and reveling (1 K. xx. 16). 

It has been inferred from these passages (somewhat

too hastily, we think) that the principal meal
generally took place at noon: the Egyptians do indeed

still make a substantial meal at that time (Lane's 

Med. Egypt, i. 189), but there are indications that

the Jews rather followed the custom that prevails

among the Bedouins, and made their principal meal

after sunset, and a lighter meal at about 9 or 10 

A. M. (Burckhardt's Notes, i. 64). For instance,

Lot prepared a feast for the two angels "at even"

(see xix. 1-3): Bezo evidently took his meal late

in the evening (Ruth iii. 7): the Israelites ate flesh

in the evening, and bread only, or manna, in

the morning (Ex. xvi. 12): the context seems to

imply that Jethro's feast was in the evening (Ex.

xviii. 12, 14). But, above all, the institution of

the Paschal feast in the evening seems to imply

that the principal meal was usually taken then; it

appears highly improbable that the Jews would

have been ordered to eat meat at an unusual time.

In the later Biblical period we have clearer notices

of the same effect: breakfast took place in the

morning (John xxi. 4, 12), on ordinary days not

before 9 o'clock, which was the first hour of prayer

(Acts ii. 15), and on the Sabbath not before 12,

when the service of the synagogue was completed

(Joseph. i. ii. § 54): the more prolonged and sub-

stantial meal took place in the evening (Joseph. 

the Homeric age for the early or the late meal, its

special meaning being the principal meal. In later

times, however, the term was applied exclusively to

the late meal — the ἑσπερία of the Homeric age.

Reclining at Table. (Montauban.)

1 The Hebrew term is lissi (לִשִּׁי). There is only one instance of its being mentioned as an article of ordinary furniture, namely, in 2 K. iv. 10, where the A. V. incorrectly renders it "stool." Even there it seems probable that it was placed more as a mark of special honor to the guest than for common use.

2 The word is pekōm (πεκόμ), which will apply to the edge as well as to the angle of a couch. That the seats and couches of the Assyrians were handsomely ornamented, appears from the specimens given by Layard (Niniveh, ii. 300-2).

K. The general tenor of the parable of the great supper certainly implies that the feast took place in the working hours of the day (Luke xiv. 15-24); but we may regard this perhaps as part of the imagery of the parable, rather than as a picture of real life.

The posture at meals varied at various periods; there is sufficient evidence that the old Hebrews resembled the habit of their neighbors that have been prepared for it. The word was, however, exchanged for that of reclining: the first intimation of this occurs in the parables of Jesus, which reprobrates those who lie upon beds of ivory, and stretch themselves upon their couches (vi. 4), and it appears that the couches themselves were of a costly character — the "couches" or edjes (iii. 12) being finished with ivory, and the seat covered with silk or damask coverlets. Ezekiel, again, inveighs against one who sat "on a stately bed with a table prepared before it" (xxiii. 41). The custom may have been borrowed in the first instance from the Babylonians and Syrians, among whom it prevailed at an early period (Esth. i. 6, viii. 8). A similar change took place in the habits of the Greeks, who are represented in the Heroic age as sitting (H. x. 578; O. i. 145), but who afterwards adopted the habit of reclining, women and children excepted. In the time of our Saviour reclining was the universal custom, as is implied in the terms used for sitting at meat, as the A. V. incorrectly has it. The couch itself (άκρυῆς) is only once mentioned (Mark vii. 4; A. V. "table"), but there can be little doubt that the Roman triclinium had been introduced, and that the arrangements of the table resembled those described by classical writers. Generally speaking, only three persons reclined on each couch, but occasionally four or even five. The couches were provided with cushions on which the left elbow rested in support of the upper part of the body, while the right arm remained free: a room provided with these was described as ἐπερουμένων, lit. "spread" (Mark xiv. 15; A. V. "furnished"). As several guests reclined on the same couch, each overlapped his neighbor, as it were, and rested his head on or near the breast of the one who lay behind him: he was then said to "lean on the bosom" (strictly recline on thebosom) of his neighbor. The parabola of the Pharisées so much coveted, was not, as the A. V. represents it, "the uppermost room," but the highest seat in the highest couch — the seat numbered 1 in the annexed diagram.

a The A. V. has "in Damascus in a couch," but there can be no doubt that the name of the town was transferred to the silk stuffs manufactured there, which are still known by the name of "Damask."  

b Sitting appears to have been the posture usual among the Assyrians on the occasion of great festivals. A bas-relief on the walls of Khorsabad represents the guests seated on high chairs (Layard, Nineveh, ii. 11).  

c "Αρακινθία, κακακίνθια, ἀρακλήσθαι, κακαλήσθαι."

Some doubt attends the question whether the females took their meals along with the males. The present state of society in the East throws no light upon this subject, as the customs of the Harem date from the time of Mohammed. The cases of Ruth and the reapers Ruth ii. 14., of Elisha with his wives (1 Sam. x. 54), of Job's sons and daughters (Job i. 4), and the general intermixture of the sexes in daily life, make it more than probable that they did so join; at the same time, as the duty of attending upon the guests devolved upon them (Luke x. 40), they probably took a somewhat inferior and subordinate part.

Before commencing the meal, the guests washed their hands. This custom was founded on natural

Washing before or after a meal. (From Lane's Modern Egyptians.)

decorum; not only was the hand the substitute for our knife and fork, but the hands of all the guests were dipped into one and the same dish; uncleanness in such a case would be intolerable. Hence not only the Jews, but the Greeks (M.L. i. 136), the modern Egyptians (Lane, i. 140), and many other nations, have been distinguished by this practice; the Bedouins in particular are careful to wash their hands before, but are indifferent about doing so.

custom at meals obscures the sense of several passages as rendered in the A. V. Thus the translation—"many shall come from the east and west and shall sit down with Abraham and Isaac and Jacob, in the kingdom of heaven" (Matt. viii. 11), instead of "shall recline," puts out of sight the figure of a banquet in terms of which the guests there partake. Still more perplexed from a similar inaccuracy is the meaning in Luke xii. 36; for if the sucker "sat at meat" (A. V.) it is inconceivable how the woman who "washed and anointed his feet, and wiped them with her hair" (John i. 11) could have "stood behind him" as she performed this office. Whether the expression in John 1. 18 (δέ με κρίνεις υπὲρ τοῦ πατρός) refers to the animosity of the relation of the Father and

after their meals (Barekhald's Notes, i. 63). The Pharisees transformed this conventional usage into a ritual observance, and overlaid it with burdensome regulations—a willful perversion which our Lord regulates in the strongest terms (Mark vii. 1-13). Another preliminary step was the grace or blessing, of which we have but one instance in the O. T. (1 Sam. ix. 13), and more than one pronounced by our Lord himself in the N. T. (Matt. xv. 36; Luke ix. 36; John vi. 11): it consisted, as far as we may judge from the words applied to it, partly as a blessing upon the food, partly as thanks to the Giver of it. The Rabbinical writers have, as usual, laid down most minute regulations respecting it, which may be found in the treatise of the Mishna, entitled Baraithoth, chap. 6-8.

The mode of taking the food differed in no material point from the modern usages of the East; generally there was a single dish into which each guest dipped his hand (Matt. xxvi. 23); occasionally separate portions were served out to each (Gen. xlii. 34; Ruth ii. 14; 1 Sam. i. 4). A piece of bread was held between the thumb and two fingers of the right hand, and was dipped either into a bowl of melted grease (in which case it was termed ψεύδρον, "a sop," John xiii. 26) or into the dish of meat, whence a piece was conveyed to the mouth between the layers of bread (Lane, i. 193, 194; Barekhald's Notes, i. 63). It is esteemed an act of politeness to hand over to a friend a delicate morsel (John xiii. 26; Lane, i. 194). In allusion to the above method of eating, Solomon makes it a characteristic of the30 shaggard, that he hides his hand in his bosom and will not so much as bring it to his mouth again (Prov. xiv. 24, xxvi. 15). At the conclusion of the meal, grace was again said in conformity with Deut. viii. 10, and the hands were again washed.

Thus far we have described the ordinary meal: on state occasions more ceremony was used, and the meal was embellished in various ways. Such occasions were numerous, in connection partly with public, partly with private events: in the first class we may place — the great festivals of the Jews (Deut. xiii. 11; 21); public sacrifices (Deut. xii. 5, xxvii. 7; 1 Sam. ix. 13, 22; 1 K. i. 9, iii. 15; Zeph. i. 7); the ratification of treaties (Gen. xxxi. 30, xxxii. 51); the offering of the tithe (Deut. xii. 4), particularly at the end of each third year (Deut. xiv. 28); in the second class — marriages (Gen. xxix. 22; Judg. xiv. 10; Esth. ii. 18; Tob. viii. 19); Matt. xxii. 2; John ii. 1); birth-days (Gen. xli. 20; Jon. v. 4; Matt. xiv. 6, 9), burials (2 Sam. iii. 35; Jer. xvi. 7; 25. iv. 14); Tob. iv. 17), sheep-hearing (1 Sam. xxi. 2, 36; 2 Sam. xxi. 20), the vintage (Judg. iv. 27), laying the foundation stone of a house (Prov. ix. 1-5), the

the son to each other, as symbolized in the relative position of the guests at the table, may be uncertain. The archæology explains the occurrence between Peter and John at the Last Supper (John xiii. 23-25). John occupied the place of honor next to Jesus (τὸ ᾧ σωλάγορον αὐτοῦ). Peter, reclining perhaps on the opposite side of the table, may have been invited to inquire when the Son of man should be the traitor; and John then throwing back his head (σκοταδίζων) upon the breast of Jesus (στήθος here and not σάκχαρος as before) could ask the question at once without being heard by the others. It is not correct to charge the K. V. with a mistranslation in Matt. xxii. 6 (see the article above); for in the original English "rooms" often had the sense of "spaces" or "places"
MEALS

reception of visitors (Gen. xiii. 6-8, xix. 3; 2 Sam. iii. 29, xii. 4; 2 K. vi. 23; Tob. vii. 9; 1 Mac. xvi. 19; 2 Mac. ii. 27; Luke v. 29; xv. 23; John xii. 2), or any event connected with the sovereign (1 Esd. vii. 5). On each of these occasions a sumptuous repast was prepared; the guests were previously invited (Esth. v. 8; Matt. xxii. 3), and on the day of the feast a second invitation was issued to those that were hidden (Esth. vi. 14; Prov. ix. 3; Matt. xxii. 3). The visitors were received with a kiss (Tob. vii. 6; Luke vii. 45); water was produced for them to wash their feet (Luke vii. 321) portions than the rest. The importance of the feast was marked by the number of the guests (Gen. xxix. 22; 1 Sam. ix. 22; 1 K. i. 9, 25; Luke v. 29, xiv. 10), by the splendor of the vessels (Esth. i. 7), and by the profusion or the excellence of the viands (Gen. xxvi. 6, xxi. 9; Judg. vi. 19; 1 Sam. xxiv. 24; 1 K. xiv. 6; Am. vi. 4). The meal was accompanied with music, singing, and dancing (2 Sam. xiii. 17; Ps. lxix. 22); Is. xii. 1; Am. vi. 5). The meal was extended with music, singing, and dancing (2 Sam. xiii. 17; Ps. lxix. 22); Is. xii. 1; Am. vi. 5).

MEARAH 1845

A party at dinner or supper. (From Lane's Modern Egyptians.)

44); the head, the beard, the feet, and sometimes the clothes, were perfumed with ointment (Ps. xxiii. 5; Am. vi. 6; Luke vii. 38; John xii. 3); on special occasions robes were provided (Matt. xxi. 11; comp. Trench on Porobles, p. 230); and the head was decorated with wreaths (Is. xxviii. 1; Wisd. ii. 7, 8; Joseph. Ant. xix. 9, § 1). The regulation of the feast was under the superintendence of a special officer, named ἡγεμόνας (John ii. 8; A. V. "governor of the feast."); whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the toasts and amusements; he was generally one of the guests (Eccles. xxiii. 1, 2), and might therefore take part in the conversation. The places of the guests were settled according to their respective rank (Gen. xxiii. 33; 1 Sam. ix. 22; Luke xiv. 8; Mark xii. 39; John xii. 23); portions of food were placed before each (1 Sam. i. 4; 2 Sam. vi. 19; 1 Chr. xvi. 3), the most honored guests receiving either larger (Gen. xlii. 34; comp. Herod. vi. 57) or more choice (1 Sam. ix. 24; comp. II.

vi. 321) portions than the rest. The importance of the feast was marked by the number of the guests (Gen. xxix. 22; 1 Sam. ix. 22; 1 K. i. 9, 25; Luke v. 29, xiv. 10), by the splendor of the vessels (Esth. i. 7), and by the profusion or the excellence of the viands (Gen. xxvi. 6, xxi. 9; Judg. vi. 19; 1 Sam. xxiv. 24; 1 K. xiv. 6; Am. vi. 4). The meal was extended with music, singing, and dancing (2 Sam. xiii. 17; Ps. lxix. 22); Is. xii. 1; Am. vi. 5). The meal was extended with music, singing, and dancing (2 Sam. xiii. 17; Ps. lxix. 22); Is. xii. 1; Am. vi. 5).

article, and would have stood as "Vanern cave."

Reland (Pat. p. 806) suggests that Mearah may be the same with Meroth, a village named by Josephus (Ant. iii. 3, § 1) as forming the limit of Galilee on the west (see also Ant. ii. 29, § 6), and which again may possibly have been connected with the Waters of Merion. The identification is not improbable, though there is no means of ascertaining the fact.

A village called 'Maghar is found in the mountains of Naphthali, some ten miles W. of the northern extremity of the sea of Galilee, which may possibly represent an ancient Mearah (Rob. iii. 79, 80; Van de Velde's voy.).

G. MEASURES. (Weights and Measures.)

MEAT. It does not appear that the word "meat" is used in any one instance in the Authorized Version of either the Old or New Testament, in the sense which it now almost exclusively bears of animal food. The latter is denoted uniformly by "flesh."

1. The only possible exceptions to this assertion in the O. T. are —
   (a.) Gen. xxvii. 4, 6, "savory meat."
   (b.) Josh. xlv. 23, "corn and bread and meat."

But (a) in the former of these two cases the Hebrew word, דבש, which in this form appears in this chapter only, is derived from a root which has exactly the force of our word "taste," and is employed in reference to the manna. In the passage in question the word "diamonds" would be perhaps more appropriate. (b) In the second case the original word is one of almost equal rarity, בְּשָׂה, and if the LXX. did not show that this had had only the general force of food in all the other oriental tongues, that would be established in regard to Hebrew by its other occurrences, namely, 2 Chr. xli. 23, where it is rendered "sweet corn;" and Dan. iv. 21, 22, where the "meat" spoken of is that to be furnished by the tree.

2. The only real and inconceivable ambiguity caused by the change which has taken place in the meaning of the word is in the case of the "meat-offering," the second of the three great divisions into which the sacrifices of the Law were divided — the burnt-offering, the meat-offering, and the peace-offering (Lev. ii. 1, 4, etc.) — and which consisted solely of flour, or corn, and oil, sacrifices of flesh being confined to the other two. The word thus translated is בּוֹשָׂ, elsewhere rendered "present," and "addition," and derived from a root which has the force of "sealing," or "ordering," to a person. It is very desirable that some English term should be proposed which would avoid this ambiguity. "Food-offering" is hardly admissible, though it is perhaps preferable to "unbloody or bloodless sacrifice."

3. There are several other words, which, though entirely distinct in the original, are all translated in the A. V. by "meat;" but none of them present any special interest except בָּשָׂ. This word, from a root signifying "to taste," would be perhaps more accurately rendered "prey," or "body." Its use in Ps. exi. 5, especially when taken in connection with the word rendered "good understanding" in ver. 10, which should rather be, as in the margin, "a good success," throws a new and unexpected light on the familiar phrases of that beautiful psalm. It seems to show how inexcusably it was the warlike predatory spirit in the mind of the writer, good Israëlide and devout worshipper of Jehovah as he was. Late as he lived in the history of his nation, he cannot forget the power of Jehovah's "works" by which his forefathers acquired the "heritage of the heathen:" and to him, as to his ancestors when conquering the country, it is still a firm article of belief that those who fear Jehovah shall obtain most of the spoil of his enemies — those who obey his commandments shall have the last success in the field.

4. In the N. T. the variety of the Greek words thus rendered is equally great; but dismissing such terms as ἀνακελθαίον or ἀνακελθεῖον, which are rendered by "a sit at meat — φαγεῖν, for which we occasionally find "meat" — ἐπιθέον (Acts xvi. 34), the same — εἰσαλαλθεῖον, "meat offered to idols" — ἀλλαζόνα, generally "fragments," but twice "broken meat" — dismissing these, we have left ἐκεῖος (with its kindred words, ἐκεῖς, etc.), both words bearing the widest possible significance, and meaning everything that can be eaten, or can nourish the frame. The former is most used in the Gospels and Acts. The latter is found in St. John and in the epistles of St. Paul. It is the word employed in the famous sentences, "for meat destroy not the work of God," if it make my brother to offend," etc. G.

MEAT-OFFERING (מַעַט: θαυμὸν θυσία, or θυσία εὐλογουμένη, or σεριφείουm). The word Minchah signifies originally a gift of any kind; and appears to be used generally of a gift from an inferior to a superior, whether God or man. Thus in Gen. xxxii. 1 it is used of the present from Jacob to Esau, in Gen. xliii. 11 of the present sent to Joseph in Egypt, in 2 Sam. viii. 2, 6 of the tribute from Moab and Syria to David, etc., etc.; and in Gen. iv. 3, 4, 5 it is applied to the sacrifices to God, offered by Cain and Abel, although Abel's was a whole burnt-offering. Afterwards this general sense became attached to the word, "to offer" (מַעַט), and the word Minchah restricted to an "unbloody offering" as opposed to נְהָי, a "bloody" sacrifice. It is constantly spoken of in connection with the Drink-offering: מַעַט: στοχείον; ἑλέους), which generally accompanied it, and which had the same meaning. The law or ceremonial of the meat-offering is described in Lev. vi. and vii. 14-23. It was to be composed of fine flour, seasoned with salt, and mixed with oil and frankincense, but without heaven, and it was generally accompanied by a drink-offering of wine. A portion of it, including all the frankincense, was to be burnt on the altar as a "memorial." The rest belonged to the priest;

from a root signifying "to taste," would be perhaps more accurately rendered "prey," or "body." MEAT-OFFERING (מַעַט: θαυμὸν θυσία, or θυσία εὐλογουμένη, or σεριφείουm). The word Minchah signifies originally a gift of any kind; and appears to be used generally of a gift from an inferior to a superior, whether God or man. Thus in Gen. xxxii. 1 it is used of the present from Jacob to Esau, in Gen. xliii. 11 of the present sent to Joseph in Egypt, in 2 Sam. viii. 2, 6 of the tribute from Moab and Syria to David, etc., etc.; and in Gen. iv. 3, 4, 5 it is applied to the sacrifices to God, offered by Cain and Abel, although Abel's was a whole burnt-offering. Afterwards this general sense became attached to the word, "to offer" (מַעַט), and the word Minchah restricted to an "unbloody offering" as opposed to נְהָי, a "bloody" sacrifice. It is constantly spoken of in connection with the Drink-offering: מַעַט: στοχείον; ἑλέους), which generally accompanied it, and which had the same meaning. The law or ceremonial of the meat-offering is described in Lev. vi. and vii. 14-23. It was to be composed of fine flour, seasoned with salt, and mixed with oil and frankincense, but without heaven, and it was generally accompanied by a drink-offering of wine. A portion of it, including all the frankincense, was to be burnt on the altar as a "memorial." The rest belonged to the priest;
but the meat-offerings offered by the priests themselves were to be wholly burnt. It is misleading (which is analogous to that of the offering of the tithes, the first-fruit, and the showbread) to appear exactly as in the words of David (1 Chr. xxix. 10-14), "All that is in the heaven and in the earth is Thine . . . . . All things come of Thee, and of Thine own have we given Thee." It recognized the sovereignty of the Lord, and his bounty in giving them all earthly blessings, but declining to Him the best of His gifts: the flour, as the main support of life; oil, as the symbol of richness; and wine as the symbol of vigor and refreshment (see 1s. civ. 15). All these were unleavened, and seasoned with salt, in order to show their purity, and hallowed by the frankincense for God's special service. This recognition, implied in all cases, is expressed clearly in the form of offering the first-fruits prescribed in Deut. xxvi. 5-11.

It will be seen that this meaning involves neither of the main ideas of sacrifice — the atonement for sin and the self-dedication to God. It takes them for granted, and is based on them. Accordingly, the meat-offering, properly so called, seems always to have been a subsidiary offering, needing to be introduced by the sin-offering, which represented the one idea, and forming an appendage to the burnt-offering, which represented the other.

Thus, in the case of public sacrifices, an "meat-offering" was enjoined as a part of —

(1.) The daily morning and evening sacrifice (Ex. xxix. 40, 41).
(2.) The Sabbath-offering (Num. xxviii. 9, 10).
(3.) The offering at the new moon (Num. xxviii. 11-14).
(4.) The offerings at the great festivals (Num. xxvii. 20, 28, xxviii. 3, 4, 14, 15, &c.).
(5.) The offerings on the great day of atonement (Num. xxix. 9, 10).

The same was the case with private sacrifices, as at

(1.) The consecration of priests (Ex. xxix. 1, 2; Lev. vi. 20, viii. 2), and of Levites (Num. viii. 8).
(2.) The cleansing of the leper (Lev. xiv. 29).
(3.) The termination of the Nazaritic vow (Num. vii. 15).

The ungodly offerings offered alone did not properly belong to the regular meat-offering. They were usually substitutes for other offerings. Thus, for example, in Lev. v. 11, a tenth of an ephah of flour is allowed to be substituted by a poor man for the lamb or kid of a trespass-offering in Num. v. 15 the same offering is ordained as the "offering of jealousy" for a suspected wife. The unusual character of the offering is marked in both cases by the absence of the oil, frankincense, and wine. We find also at certain times libations of water poured out before God; as by Samuel's command at Mizpeh during the fast (1 Sam. vii. 6), and by David at Bethel (2 Sam. xxiii. 16), and a libation of oil poured by Jacob on the pillar at Bethel (Gen. xxxv. 14). But these have clearly special meanings, and are not to be included in the ordinary drink-offerings. The same remark will apply to the remarkable libation of water customary at the Feast of Tabernacles [TABERNACLES], not mentioned in Scripture.

A. B. MEATS, UNCLEAN. [UNCLEAN MEATS.]

MEBUNNAI [3 syll.] (מְבּוֹנָי) [erected, strong, First]; in rûv ivi, [Comp. Mebounai]. All with 10 MSS. Zaououa, other MSS. Zaouou.

MEDERAB, [in this form, appears in one passage only (2 Sam. xxiii. 27), the name of one of David's guards, who is elsewhere called Sibbecai (2 Sam. xxi. 18; 1 Chr. xx. 4) or Sibbechai (1 Chr. xi. 29, xxvii. 11) in the A. V. The reading of Sibbecai (יִבְכֶּאֵי) is evidently the true one, of which "Mebennui" was an easy and early corruption, for even the LXX. translators must have had the same consonants before them, though they pointed thus, יבכּא. It is curious, however, that the Aldine edition has Zaououai (Rennicius, Diss. i. p. 186).

MECHERATHITE, THE (מכְּרָתִי; [Rom. Μεχεραθίδης; Val. Μεχεραθίδας; Of. Μεχεραθίδας; Alex. χεραθίτης; Mecherathites], that is, the native or inhabitant of a place called Mecherah. Only one such is mentioned, namely, Hepher, one of David's thirty-seven warriors (1 Chr. xi. 36). In the parallel list of 2 Sam. xxi., the name appears, with other variations, as the "Maachaithite" (ver. 34). It is the opinion of Rennicius, after a long examination of the passage, that the latter is the corretor of the two; and as no place named Mecherah is known to have existed, while the Maachaithites had a certain connection with Israel, and especially with David, we may concur in his conclusion, more especially as his guide contained men of almost every nation round Palestine.

MEDA'BA (Ma'doba, Me'doba), the Greek form of the name Mebena, it occurs only in 1 Mac. ix. 39.

MED'ADE (Med'ad and Med'ad.)

MEDAN (Meds). striff, contention. Ges.; Ma'ada, Ma'ad: [Alex. Μαῶια, Μαῶα; Medon,] a son of Abraham and Keziah (Gen. xxv. 2: 1 Chr. i. 32), whose name and descendants have not been traced beyond this record. It has been supposed, from the similarity of the names, that the tribe descended from Medan was more closely allied to Medon than by mere blood relation, and that it was the same as, or a portion of, the latter. There is, however, no ground for this theory beyond its plausibility. — The traditional city Medon of the Arab geographers (the classical Modina), situate in Arabia on the eastern shore of the Gulf of Eilath, must be held to have been Midianite, not Medonite (but Inman, Biblework, suggests the latter identification). It has been elsewhere remarked [Ketuchah] that many of the Keucharite tribes seem to have merged in early times into the Ishmaelite tribes. The mention of "Ishmaelite" as a convertible term with "Midianite," in Gen. xxxvii. 28, 30, is remarkable; but the Midianites of the A. V. in ver. 28 is Midianite in the Hebrew (by the LXX. rendered Μαῶιαν and in the Vulgate Ianahita and Medoanita); and we may have here a trace of the subject of this article, though Midianite appears on the whole to be more likely the correct reading in the passages referred to. [MIDIAN.]

MED'EEBA (Meds). Ma'doba and Ma'da; Me'doba, a town on the eastern side of Jer.
MEDEBRA

Dun. Taken as a Hebrew word, Medeba means "wetters" or "wet," but except the tank (see below), what waters there ever have been on that high plain? The Arabic name, though similar in sound, has a different significance.

Medeba is first alluded to in the fragment of a popular song of the time of the conquest, preserved in Num. xxv. (see ver. 39). Here it seems to denote the limits of the territory of Heshbon. It next occurs in the enumeration of the country divided among the Transjordanic tribes (Josh. xiii. 15), giving its name to a district of level lands called "the Mishor of Medeba," or "the Mishor on Medeba." This district fell within the allotment of Reuben (ver. 16). At the time of the conquest Medeba belonged to the Amorites, apparently one of the towns taken from Moab by them. When we next encounter it, four centuries later, it is again in the hands of the Moabites, or which is nearly the same thing, the Ammonites. It was in the future of Medeba that Josha gained his victory over the Ammonites, and the birds of Arahites of Moab, Mesopotamia, and Zobah, which they had gathered to their assistance after the insult perpetrated by Haman on the messengers of David. (1 Chr. xxxii. 7; compare with 2 Sam. x. 17, 18.) In the time of the bequest of Medeba, was sanctuary of Moab (Is. xxv. 1), but in the demarcation of Jeronim (xvii.), often parallel with that of Isahak, it is not mentioned. In the Macedonian times it had returned into the hands of the Amorites, who seem most probably intended by the obscure word _Jammh_ in 1 Mac. ix. 39. (Here the name is given in the A. V. as Medeba, according to the Greek spelling.) It was the scene of the capture, and possibly the death, of John Macen- laus, and of the ravages subjugated by Jonathan and Simon Joseph. (1 Macc. xii. 1, § 4; the name is omitted in Mac. on the second occasion, see ver. 39.) About 110 years n. c. it was taken after a long siege by John Hyrcanus (1 Macc. xiii. 9, § 4; R. J. 1. 2, § 4), and then appears to have remained in the possession of the Jews for at least thirty times, till the time of Alexander Janmata (xvi. 15, § 4); and it is mentioned as one of the twelve cities, by the promise of which Arus, the king of Arabia, was induced to assist Hyrcana to recover Jerusalem from his brother Aristobulus. (1 Macc. xiv. 1, § 4.)

The name Medeba has retained its name down to our own times. To Esenius and Jerome (however, _Medala") it was evidently known. In Christian times it was a noted bishopric of the patriarchate of "Beaera, or Etira Arabia," and is named in the Acts of the Council of Chalcedon (A.D. 451) and other Eccliscistical Lists (Roland, pp. 217, 225, 226, 865; Seval-o Le Quiao, _Avis Christia_). Among modern travellers Medeba has retained its visited, recognized, and described by Bnkahard (Sig. July 13, 1812). Seton i. 47. 1874, 234), and irky (p. 115); see also Porter (Handbook, p. 303). It is in the pastoral district of the Kelne, which probably answers to the Mishor of the Hebrew, 4 miles S. E. of Heshbon, and like it lying on a rounded and rocky hill (Bakawi, Seton). A large tank, columns, and extensive foundations are still to be seen; the remains of a Roman road exist near the town, which seems formerly to have connected it with Heshbon.

G. MEDES (Mi.(q: Moli}, one of the most powerful nations of Western Asia in the times anterior to the establishment of the kingdom of Cyzä, and one of the most important tribes composing that kingdom. Their geographical position is considered under the article Medba. The title by which they appear to have known themselves was _Mobi:_ which by the Semitic races was made into _Mobi;_ and by the Greeks and Romans into _Moli: _whence our " Medes."

1. Primitive History. — It may be gathered from the mention of the Medes, by Moses, among the races descended from Japhet (see Meda), that they were a nation of very high antiquity; and it is in accordance with this view that we find a notice of them in the primitive Babylonian history of Berosus, who says that the Medes conquered Babylon at a very remote period (circ. n. c. 2458), and that eight Median monarchs reigned there consecutively in a space of 222 years (Beros. ap. Esch. Chron. c. 4, § 4). Whether difficulties may lie in the way of our accepting this statement as historical — from the silence of other authors, from the inaccuracy of the Greek text, and the Semitic names in the Met. 8. 2. 24. 58; — it is therefore not at all impossible that the Medes may have been the predominant race there for a time, as Berosus states, and may afterwards have been overpowered and driven to the mountains, where they may have spread themselves eastward, northward, and westward, so as to occupy a vast number of localities from the banks of the Indus to those of the middle Danube. The term Arayns, which was by the universal consent of their neighbors applied to the Medes, is of Heraclides (Herc. vii. 62), connects them with the early Vedic settlers in western Hindostan; the _Mitiiini of Mount Zagros, the_ _Ariapho_ of the steppe-country between the Caspian and the Oxus, and the _Mitoe_ or _Meloe_ of the Sea of Azov, mark their progress towards the north; while the _Moli of Thrace seem to indicate their spread westward into Europe, which was directly attested by the native traditions of the _Sigmaras (Herc. ed. 9)."

2. Connection with Assyria. — The deepest obscurity hangs, however, over these movements, and indeed over the whole history of the Medes from the time of their bearing away in Babylon (n. c. 2458-2231) to their first appearance in the cuneiform inscriptions among the enemies of Assyria, about n. c. 800. They then inhabit a portion of
the region which bore their name down to the Mohammedan conquest of Persia; but whether they were of the most ancient of the Assyrian Empire, or of a remoter antiquity, is uncertain. On the one hand it is noted that their absence from earlier cuneiform monuments seems to suggest that their arrival was recent at the date above mentioned; on the other, that Ctesias asserts (ap. Diod. Sic. ii. 1, § 39), and Herodotus distinctly implies (i. 95), that they had been settled in this part of Asia at least from the inception of the Assyrian Empire (n. c. 1273). However this was, it is certain that, at first, and for a long series of years, they were very inferior in power to the great empire established upon their thrones. They were under no general or centralized government, but consisted of various petty tribes, each ruled by its chief, whose dominion was over a single small town and perhaps a few villages. The Assyrian monarchs ravaged their lands at pleasure, and took tribute from their chiefs; while the Medes could in no way retaliate upon their antagonists. Between them and Assyria lay the lofty chain of Zagros, inhabited by hardy mountaineers, at least as powerful as the Medes themselves, who would not tamely have suffered their passage through their territories. Media, however, was strong enough, and stubborn enough, to maintain her nationality throughout the whole period of the Assyrian sway, and was never absorbed into the empire. An attempt made by Sargon to hold the country in permanent subjection by means of a number of military colonies planted in cities of his building failed [Sargon]; and both his son Sennacherib, and his grandson Esarhaddon, were forced to lead into the territory hostile expedi-
tions which however seem to have left no more impression than previous invasions. Media was reckoned by the great Assyrian monarchs of this period as a part of their dominions; but its sub-
jection seems to have been at no time much more than nominal, and it frequently threw off the yoke altogether.

3. Median History of Herodotus. — Herodotus represents the decadence of Assyria as greatly accel-
erated by a formal revolt of the Medes, following upon a period of contented subjection, and places this revolt more than 218 years before the battle of Marathon, or a little before n. c. 708. Ctesias placed the commencement of Median independence still earlier, declaring that the Medes had destroyed Nineveh and established themselves on the ruins of the Assyrian Empire, as far back as n. c. 874. No one now defends this latter statement, which alike contradicts the Hebrew records and the native documents. It is doubtful whether even the calculation of Herodotus does not throw back the inde-
pendence to too early a date: his chronology of the period is clearly artificial; and the history, as he relates it, is fabulous. According to him the Medes, when they first shook off the yoke, established no government. For a time there was neither king nor prince in the land, and each man did what was right in his own eyes. Quarrels were settled by
vindictation, and a certain Deuces, having obtained a reputation in this way, contrived after a while to get himself elected sovereign. He then built the seven-walled Ecbatana [Ecbatana], established a court after the ordinary oriental model, and had a daughter married a Persian prince, whom he reigned 54 years. Deuces was succeeded by his son Phraortes, an ambitious prince, who directly after his accession began a career of conquest, first attacking and subduing the Persians, then reducing nation after nation, and finally perishing in an expedition against As-

Sennacherib, and his grandson Esarhaddon, were forced to lead into the territory hostile expedi-
tions which however seem to have left no more impression than previous invasions. Media was reckoned by the great Assyrian monarchs of this period as a part of their dominions; but its sub-
jection seems to have been at no time much more than nominal, and it frequently threw off the yoke altogether.

erated by a formal revolt of the Medes, following upon a period of contented subjection, and places this revolt more than 218 years before the battle of Marathon, or a little before n. c. 708. Ctesias placed the commencement of Median independence still earlier, declaring that the Medes had destroyed Nineveh and established themselves on the ruins of the Assyrian Empire, as far back as n. c. 874. No one now defends this latter statement, which alike contradicts the Hebrew records and the native documents. It is doubtful whether even the calculation of Herodotus does not throw back the inde-
pendence to too early a date: his chronology of the period is clearly artificial; and the history, as he relates it, is fabulous. According to him the Medes, when they first shook off the yoke, established no government. For a time there was neither king nor prince in the land, and each man did what was right in his own eyes. Quarrels were settled by
vindictation, and a certain Deuces, having obtained a reputation in this way, contrived after a while to get himself elected sovereign. He then built the seven-walled Ecbatana [Ecbatana], established a court after the ordinary oriental model, and had a daughter married a Persian prince, whom he reigned 54 years. Deuces was succeeded by his son Phraortes, an ambitious prince, who directly after his accession began a career of conquest, first attacking and subduing
under the rule of a vast number of petty chieftains. It cannot have been till near the middle of the 7th century B.C. that the Median kingdom was consolidated, and became formidable to its neighbors. How this change was accomplished is uncertain: the most probable supposition would seem to be, that about this time a fresh Aryan immigration took place from the countries east of the Caspian, and that the leader of the immigrants established his authority over the scattered tribes of his race, who had been settled previously in the district between the Caspian and Mount Zagros. There is good reason to believe that this leader was the great Cyaxares, whose Diodorus speaks of in one place as the first king (Diod. Sic. ii. 32), and whom Eschylus represents as the founder of the Medo-Persic empire (Per. 761). The Deioces and Pherortes of Herodotus are thus removed from the list of historical personages altogether, and must take rank with the early kings in the list of Ctesias,a who are now generally admitted to be inventions. In the case of Deioces the very name is fictitious, being the Aryan dadvik, "hiter" or "snake," which was a title of honor assumed by all Median monarchs, but not a proper name of any individual. Pherortes, on the other hand, is an authentic name, but one which has been transferred to this period from a later passage of Median history, to which reference will be made in the sequel. (Rawlinson's Herod. i. 408.)

5. Development of Median power, and formation of the Empire. — It is evident that the development of Median power proceeded pari passu with the decline of Assyria, of which it was in part an offshoot, in part a cause. Cyaxares must have been contemporary with the later years of that Assyrian monarch who passed the greater portion of his time in hunting expeditions in Susiana. [Assyria, § 11.] His first conquests were probably undertaken at this time, and were suffered tamely by a prince who was destitute of all military spirit. In order to consolidate a powerful kingdom in the district east of Assyria, it was necessary to bring into subjection a number of Scythic tribes, which disputed with the Aryans the possession of the mountain-country, and required to be incorporated before Media could be ready for great expeditions and distant conquests. The struggle with these tribes may be the real event represented in Herodotus by the Scythic war of Cyaxares, or possibly his narrative may contain a still larger amount of truth. The Scyths of Zagros may have called in the aid of their kindred tribes towards the north, who may have impeded for a while the progress of the Median arms, while at the same time they really prepared the way for their success by weakening the other nations of this region, especially the Assyrians. According to Herodotus, Cyaxares at last got the better of the Scythians by invading their camp, and there treacherously murdering them. At any rate it is clear that at a tolerably early period of his reign they ceased to be formidable, and he was able to direct his efforts against other enemies. His capture of Nineveh and conquest of Assyria are facts which no skepticism can doubt; and the date of the capture may be fixed with tolerable certainty to the year B.C. 625. Abydissus (probably following Herodotus) informs us that in his Assyrian war Cyaxares was assisted by the Babylonians under Nabopolassar, between whom and Cyaxares an intimate alliance was formed, cemented by a union of their children; and that a result of their success was the establishment of Nabopolassar as independent king on the throne of Babylon, an event which we know to belong to the above-mentioned period. It was probably after this that Cyaxares endeavored to conquer Lydia. His conquest of Assyria had made him master of the whole country lying between Mount Zagros and the river Halys, to which he now hoped to add the tract between the Halys and the Egean Sea. It is surprising that he failed, more especially as he seems to have been accompanied by the forces of the Babylonians, who were perhaps commanded by Nebuchadrezzar on the occasion. [Nebuchadrezzar.] After a war which lasted six years he desisted from his attempt, and concluded the treaty with the Lydian monarch, of which we have already spoken. The three great Oriental monarchies, Media, Lydia, and Babylon, were now united by mutual engagements and intermarriages, and continued at peace with one another for the remainder of the reign of Cyaxares, and during that of Astyages, his son and successor.

6. Extent of the Empire. — The limits of the Median Empire cannot be definitely fixed; but it is not difficult to give a general idea of its size and position. From north to south its extent was in no place great, since it was certainly confined between the Persian Gulf and the Euphrates on the one side, and the Black and Caspian Seas on the other. From east to west it had, however, a wide expansion, since it reached from the Halys at least as far as the Caspian Gates, and possibly further. It comprised Persia, Media, Magna, Northern Media, Mattene or Media Mattana, Assyria, Armenia, Cappadocia, the tract between Armenia and the Caucasus, the low tract along the southern and south of the Caspian, and possibly some portion of Hyrcania, Parthia, and Sagartia. It was separated from Babylonia either by the Tigris, or more probably by a line running about half way between that river and the Euphrates, and thus did not include Syria, Phœnicia, or Judea, which fell to Babylon on the destruction of the Assyrian Empire. Its greatest length may be reckoned at 500 miles from N. W. to S. E., and its average breadth at 400 or 450 miles. Its area would thus be about 600,000 square miles, or somewhat greater than that of modern Persia.

7. Its character. — With regard to the nature of the government established by the Medes over the conquered nations, we possess but little trustworthy information. Under Astyages, somewhat vaguely, the Median with the Persian system (i. 131), and Ctesias appears to have asserted the positive introduction of the satrapal organization into the empire at its first foundation by his Arlices (Diod. Sic. ii. 23); but on the whole it is perhaps most probable that the As-
MEDES

Cycian organization was continued by the Medes, the subject-nations retaining their native monarchs, and merely acknowledging suzerainty by the payment of tribute. This method of government seems to have been the case in Persia, where Cyrus and his father Cambyses were monarchs, holding their crown of the Median king, before the revolt of the former; and there is no reason to suppose that the remainder of the empire was organized in a different manner. The satrapal organization was apparently a Persian invention, begun by Cyrus, continued by Cambyses his son, but first adopted as the regular governmental system by Darius Hystaspis.

8. Its duration.—Of all the ancient Oriental monarchies the Median was the shortest in duration. It commenced, as we have seen, after the middle of the 7th century B.C., and it terminated A.C. 538. The period of three quarters of a century, which Herodotus assigns to the reigns of Cyaxares and Astyages, may be taken as fairly indicating its probable length, though we cannot feel sure that the years are correctly apportioned between the monarchs. Two kings only occupied the throne during the period; for the Cyaxares II. of Xenophon is an invention of that amusing writer.

9. Its final overthrow.—The conquest of the Medes by Alexander, the successor of their native monarch Cyrus, is another of those indisputable facts of remote history, which make the inquirer feel that he sometimes attains to solid ground in these difficult investigations. The details of the struggle, which are given partially by Herodotus (i. 127, 128), at greater length by Justinian (Ep. Hist. Gr. ii. 404-406), probably following Ctesias, have not the same claim to acceptance. We may gather from them, however, that the contest was short, though severe. The Medes did not readily relinquish the position of superiority which they had enjoyed for 75 years; but their vigor had been sapped by the adoption of Assyrian manners, and they were now no match for the hardy mountaineers of Persia. After many partial engagements a great battle was fought between the two armies, and the result was the complete defeat of the Medes, and the capture of their king, Astyages, by Cyrus.

10. Position of Media under Persia.—The treatment of the Medes by the victorious Persians was not that of an ordinary conquered nation. According to some writers (as Herodotus and Xenophon) there was a close relationship between Cyrus and the last Median monarch, who was therefore naturally treated with more than common tenderness. The fact of the relationship is, however, denied by Ctesias; and whether it existed or not, at any rate the peculiar position of the Medes under Persia was not really owing to this accident. The two nations were closely akin; they had the same Aryan or Irannic origin, the same early traditions, the same language (Strach. xv. 2, S. 5); nearly the same religion, and ultimately the same manners and customs, dress, and general mode of life. It is not surprising therefore that they were drawn together, and that, though never actually coalescing, they still found to some extent a single privileged people. Medes were advanced to stations of high honor and importance under Cyrus and his successors, an advantage shared by other conquered people. The Median capital was at first the chief 'royal residence, and always remained one of the places at which the court spent a portion of the year; while among the provinces Media claimed and enjoyed a preponderance, which appears equally in the Greek writers and in the native records. Still, it would be absurd to say that the nation was not altogether content with its secondary position. On the first convenient opportunity Media rebelled, elevating to the throne a certain Phraortes (Phraourtis), who called himself Xathrites, and claimed to be a descendant from Cyaxares Darius Hystaspis, in whose reign this rebellion took place, had great difficulty in suppressing it. After vainly endeavoring to put it down by his generals, he was compelled to take the field himself. He defeated Phraortes in a pitched battle, pursued, and captured him near Rhages, mutilated him, kept him for a time "chained at his door," and finally crucified him at Ecbatana, executing at the same time his chief followers (see the Behistun Inscription, in Rawlinson's Herodotus, ii. 601, 603).

The Medes hereupon submitted, and quietly bore the yoke for another century, when they made a second attempt to free themselves, which was suppressed by Darius Nothus (Xen. Hell. i. 2, § 19). Henceforth they patiently acquiesced in their subordinate position, and followed through its various shifts and changes the fortune of Persia.

11. Internal Divisions.—According to Herodotus the Medes were divided into six tribes (Ebrig), called the Buse, the Rurekaeni, the Struchates, the Arizanti, the Budli, and the Magi. It is doubtful, however, in what sense these are to be considered as ethnic divisions. The Rurekaeni appear to represent a geographical district, while the Magi were certainly a priest caste; of the rest we know little or nothing. The Arizanti, whose name would signify "of noble descent," or "of Aryan descent," must (one would think) have been the leading tribe, corresponding to the Pariscare in Persia: but it is remarkable that they have only the fourth place in the list of Herodotus. The Budli are fairly identified with the eastern Phat—"the Ptkgs of the Persian inscriptions—whom Scripture joins with Persia in two places (Ez. xxvii. 10, 18; xxxviii. 5). Of the Buse and the Struchates nothing is known beyond the statement of Herodotus. We may perhaps assume, from the order of Herodotus's list, that the Buse, Rurekaeni, Struchates and Arizanti were true Medes, of genuine Aryan descent, while the Budli and Magi were foreigners admitted into the nation.

12. Religion.—The original religion of the Medes must undoubtedly have been that simple creed which is placed before us in the earlier portions of the Zendavesta. Its peculiar characteristic was Dualism, the belief in the existence of two opposite principles of good and evil, nearly if not quite on a par with one another. Ormazdi and Ahiran were both self-caused and self-existent, both indestructible, both potent to work their will—"their warfare had been from all eternity, and would continue to all eternity; and so that the whole struggle was to the disadvantage of the Prince of Darkness. Ormazdi was the God of the Aryan, the object of their worship and trust; Ahiran was their enemy, an object of fear and abhorrence, but not of any religious rite. Besides Ormazdi, the Aryan worshipped the Sun and Moon, under the names of Mithra and Homa; and they believed in the existence of numerous spirits or genii, some good, some bad, the subjects and ministers respectively of the two powers of Good and Evil. Their cult was simple consisting
in processions, religious chants and hymns, and a few simple offerings, expressions of devotion and thankfulness. Sarc was the worship and such the belief which the whole Aryan race brought with them from the remote east when they migrated westward. Their migration brought them into contact with the fire-worshippers of Armenia and Mount Zagros, among whom Magism had been established from a remote antiquity. This religion was either a combination of the two religions, or in some cases an actual conversion of the conqueror to the faith and worship of the conquered. So far as can be gathered from the scanty materials in our possession, the latter was the case with the Medes. While in Persia the true Aryan creed maintained itself, at least to the time of Darius, Hyksos, in tolerable purity, in the neighboring kingdom of Media it was early swallowed up in Magism, which was probably established by Cyrus or his successor as the religion of the state. The essence of Magism was the worship of the elements, fire, water, air, and earth, with a special preference of fire to the remainder. Temples were not allowed, but fire-altars were maintained on various sacred sites, generally mountain tops, where sacrifices were continually offered, and the flame was never suffered to go out. A hierarchy naturally followed, to perform these constant rites, and the Magi became recognized as a sacred caste entitled to the veneration of the faithful. They claimed in many cases a power of divining the future, and practiced largely those occult arts which are still called by their name in most of the languages of modern Europe.

The fear of polluting the elements gave rise to a number of curious superstitions among the professors of the Magian religion (Herod. i. 188); among the rest to the strange practice of neither burning nor burning their dead, but exposing them to be devoured by beasts or birds of prey (Herod. i. 140; Strab. xvi. 3, § 29). This custom is still observed by their representatives, the modern Parsis; and is either a Zoroastrian, caduceus, and national character.

The customs of the Medes are said to have nearly resembled those of their neighbors, the Armenians and the Persians; but they were regarded as the inventors, their neighbors as the imitators (Strab. vi. 13, § 9). They were brave and warlike, excellent riders, and remarkably skilled with the bow. The flowing robe, so well known from the Persian留下 the impression, was their native dress, and was certainly among the points for which the Persians were beheld to them. Their whole costume was rich and splendid; they were fond of scarlet, and decorated themselves with a quantity of gold, in the shape of chains, collars, armlets, etc. As troops they were considered little inferior to the native Persians, next to whom they were usually ranged in the battle-field. They fought both on foot and on horseback, and carried, not bows and arrows only, but shields, short spears, and poniards. It is thought that they must have excelled in the manufacture of some kinds of stuffs.

14. References to the Medes in Scripture.

— The references to the Medes in the canonical Scriptures are not very numerous, but they are striking. We first hear of certain "cities of the Medes," in which the captive Israelites were placed by "the king of Assyria" on the destruction of Samaria, 2 K. xii. 6, xviii. 11. This implies the subjection of Media to Assyria at the time of Shalmaneser, or of Sargon, his successor, and as (we have observed) very closely with the account given by the latter of certain military colonies which he planted in the Median country. Soon afterwards Isaiah prophesies the part which the Medes shall take in the destruction of Babylon (Is. x. 21, xii. 2); which is again still more distinctly declared by Jeremiah (li. 11 and 28), who sufficiently indicates the independence of Media in his day (xxv. 25). Daniel relates, as a historian, the fact of the Medo-Persian conquest (v. 28, 31), giving an account of the reign of Darius the Mede, who appears to have been made ruler by Cyrus (v. 28). In Ezra we have a mention of Achemen (Zelatanal, "the palace in the province of the Medes," where the decree of Cyrus was found (vi. 2-5) — a notice which accords with the known facts that the Median capital was the seat of government under Cyrus, but a royal residence only and not the seat of government under Darius Hystaspis. Finally, in Esther, the high rank of Media under the Persian kings, yet at the same time its subordinate position, are marked by the frequent combination of the two names in phrases of honor, the precedence being in every case assigned to the Persians.

In the Apocryphal Scriptures the Medes occupy a more prominent place. The chief scene of one whole book (Tobit) is Media; and in another (Judith) a very striking portion of the narrative belongs to the same country. But the historical character of both these books is with reason doubted; and from neither can we derive any authentic or satisfactory information concerning the people. From the story of Tobit little could be gathered, even if we accepted it as true; while the history of Arpadad, which seems to be merely a distorted account of the struggle between the rebel Phraortes and Darius Hystaspis, adds nothing to our knowledge of that contest. The mention of Ranges in both narratives as a Median town and region of importance is geographically correct; and it is historically true that Phraortes suffered his overthrow in the Ranges district. But beyond these facts the narratives in question contain little  

\[ See \text{Ezek. I. 3, 14, 18, and 19}. \]  

The only passage in Esther where Media takes precedence of Persia is x. 2, where we have a mention of "the books of the chronicles of the kings of Media and Persia." Here the order is chronological. As the Median empire preceded the Persian, its chronicles came first in the book. The preface to Daniel (v. 28, and vi. 8, 12, 13) is owing to the fact of a Median vicerey being established on the throne.
MEDIA

...and even illustrates the true history of the Median nation. (See the articles on JUDITH and Tobias in Winer's Realwörterbuch; and on the general subject compare Rawlinson's Herodotus, i. 401—422; Heeren's Die alten Mächte, Series i. p. 495; the Royal Asiatic Society, June 5, 1858; Brandis, Berenii Assyriacum tempora cunctata, pp. 1-14; Grote's History of Greece, iii. pp. 301-312; and Hupfeld's Exercitationum Herodotianarum Specimina duo, p. 56 ff.)

G. R.

MEDIA (Μῆδα), i. e. Medai: Mphla (Media), a country the general situation of which is abundantly clear, though its limits may not be capable of being precisely determined. Media lay north-west of Persia Proper, south and southwest of the Caspian, east of Armenia and Assyria, west and north-west of the great salt desert of Iran. Its greatest length was from north to south, and in this direction it extended from the 324 to the 40th parallel, a distance of 550 miles. In width it reached from about long. 45° to 53°; but its average breadth was not more than from 250 to 300 miles. Its area may be reckoned at about 130,000 square miles, or three-fourths of that of modern Russia. The northern boundary of Media on the north was the river Aras; on the west Zagros and the mountain-chain which connects Zagros with Ararat; in the south Media was probably separated from Persia by a desert which now forms the boundary between Parsistan and Irak Ajem; on the east its natural limit was the desert and the Caspian Gates. West of the Gates, it was bounded, not (as is commonly said) by the Caspian Sea, but by the mountain range south of that sea, which separates between the high and the low country. It thus comprised the modern provinces of Irak Ajem, Persian Kuehistan, part of Luristan, Azerbaijan, perhaps Telibis and Gilan, but not Moghan and or Aserbadan.

The division of Media commonly recognized by the Greeks and Romans was that into Media Magna, and Media Atropatene. (Strab. xi. 13, § 1; comp. Polyb. v. 44; Plin. ii. N. vi. 13; Ptol. vi. 2, &c.) (1) Media Atropatene, so named from the Atropat, Atropas, who became independent monarch of the province on the destruction of the Persian empire by Alexander (Strab. ut sup.; Flor. Sic. xviii. 3), corresponded nearly to the modern Azerbaijan, being the tract situated between the Caspian and the mountains which run north from Zagros, and consisting mainly of the rich and fertile basin of Lake Urmia, with the valleys of the Aras and the Sehid Rood. This is chiefly a high tract, varied between mountains and plains, and lying mostly three or four thousand feet above the sea level. The basin of Lake Urmia has a still greater elevation, the surface of the lake itself, into which all the rivers run, being as much as 4,200 feet above the ocean. The country is fairly fertile, well-watered in most places, and favorable to agriculture; its climate is temperate, though occasionally severe in winter; it produces rice, corn of all kinds, wine, silk, white wax, and all manner of delicious fruits. Tabriz, its modern capital, forms the summer residence of the Persian kings, and is a beautiful place, situated in a forest of orchards. The ancient Atropatene may have included also the countries of Gilan and Telish, together with the plain of Moghan at the mouth of the combined Kur and Aras rivers. These tracts are low and flat; that of Moghan is sandy and sterile; Telish

is more productive; while Gilan (like Mas'ud-eram) is rich and fertile in the highest degree. The climate of Gilan, however, is unhealthy, and at times pestilential; the streams perpetually overflow their banks, and the waters which escape stagnate in marshes, whose exhalations spread disease and death among the inhabitants. (2.) Media Magna lay south and east of Atropatene. Its northern boundary was the range of Elburz from the Caspian, Gates to the Rudber pass, through which the Sefid Rud reaches the low country of Gilan. It then adjoined upon Atropatene, from which it is separated by a line running about S. W. by W. from the bridge of Menjil to Zagros. Here it touched Assyria, from which it was probably divided by the last line of hills towards the west, before the mountains sink down upon the plain. On the south it was bounded by Susiana and Persia Proper, the former of which it met in the modern Luristan, probably about lat. 32° 30', while it struck the latter on the eastern side of the Zagros range, in lat. 32° or 32° 30'. Towards the east it was closed in by the great salt desert, which Herodotus reckons to Sagartia, and later writers to Parthia and Carmania. Media Magna thus contained great part of Kuehistan and Luristan, with all Architas and Irak Ajem. The character of this tract is very varied. Downwards from the Architas and Luristan, it is highly mountainous, but at the same time well watered and richly wooded, fertile and lovely: on the north, along the flank of Elburz, it is less charming, but still pleasant and tolerably productive; while towards the east and southeast it is bare, arid, rocky, and sandy, supporting with difficulty a sparse and wretched population. The present productions of Zagros are cotton, tobacco, hemp, Indian corn, rice, wheat, wine, and fruits of every variety: every valley is a garden; and besides valleys, extensive plains are often found, furnishing the most excellent pasturage. Here were nurtured the valuable breed of horses called Nisan, which the Persians cultivated with such especial care, and from which the horses of the monarch were always chosen. The pasture-grounds of Khoreh and Alborz between Bektus and Khurramabad, probably represent the "Nisan plain" of the ancients, which seems to have taken its name from a town Nisan (Niyer), mentioned in the cuneiform inscriptions. Although the division of Media into these two provinces can only be distinctly proved to have existed from the Pine of Alexander the Great, yet there is reason to believe that it was more ancient, dating from the settlement of the Medes in the country, which did not take place all at once, but was first in the more northern and afterwards in the southern country. It is indicative of the division, that there were two Echatabans—one, the northern, at Torkht-i-Salehhu: the other, the southern, at Raminian, on the flanks of Mount Orontes (Elbourou) respectively the capitals of the two districts. [ECHRABAN.]

Next to the two Echatabans, the chief town in Media was undoubtedly Rhages— the "Royce of the inscriptions. Hither the rebel Pharnaces fled on his defeat by Darius Hystaspis, and hither too came Darius Codomannus after the battle of Arbela, on his way to the eastern provinces (Arr. Exp. Alex. iii. 29). The only other place of much note was Bagistan, the modern Bhikistan, which guarded the chief pass connecting Media with the Mesopotamian plain.
MEDIAN

No doubt both parts of Media were further subdivided into provinces; but no trustworthy account of these minor divisions has come down to us. The tract about Rhesus was certainly called Lycaonia, and the mountain tract adjoining Persia seems to have been known as Paracene, or the country of the Paracene. Phocaea gives as Median districts Eginus, Choromithrene, Sigrina, Pariis, and Syronidia; but these names are little known to other writers, and suspicious attach to some of them. On the whole it would seem that we do not possess materials for a minute section of the ancient geography of the country, which is very imperfectly described by Strabo, and almost omitted by Pliny.

(See Sir H. Rawlinson's Articles in the Journal of the Geographical Society, vol. vi. Art. 2, and vol. x. Articles 1 and 2; and compare Layard's Nineteenth and Babilon, chap. xvii. and xviii.; Cheshmey's Esopusches Expedition, l. 122, Arc.; Kinner's Persian Empire ; Ker Porter's Travels; and Rawlinson's Herodotus, vol. i. Appendix, Essay iv.) (On the geography, see also Kinner's Esopusches, viii. and ix., and M. von Niebuhr's Geschichte Assyr's u. Babyl. pp. 389-414.)

* * *

We are now to add to the above sources Prof. Rawlinson's Ancient Monarchies, vol. iii., the first part of which (pp. 1-535) is occupied with the history of the Medes. This volume has appeared since the foregoing article was written. On some of the points of contact between Median history and the Bible, see Rawlinson's Historical Evidence, lect. v., and the Notes on the text (Rampton Lectures for 1850), and also Niebuhr's Gesch. Assyr's u. Babyl., pp. 551, 144 f., 224, and elsewhere. Arnold comprises the history and the geography of the subject under the one head of "Median," in Herzog's Real-Encyc, ix. 241-254. See in the Dictionary the articles on Babylon, Daniel, and Daniel, the Mede.

II.

MEDIAN 8 VII. 4 Kiri, 8 VII. 4 Minoi: Medins. Darius, "the son of Ahasuerus, of the seed of the Medes" (Dan. ix. 1) or "the Mede" (xi. 1), is thus described in Dan. x. 31.

MEDICINE

I. Next to care for food, clothing, and shelter, the curing of hurts takes precedence even amongst savage nations. At a later period comes the treatment of sickness, and recognition of states of disease; and these mark a nascent civilization. Internal diseases, and all for which an obvious cause cannot be assigned, are in the most early period viewed as the visitation of God, or as the act of some malignant power, human — as the evil eye — or else superhuman, and to be dealt with by sorcery, or some other occult supposéd agency. The Indian notion is that all diseases are the work of an evil spirit (Sprenger, Gesch. der Aztekenlehn, pt. ii. 48). But among a civilized race the predominance of the medical art is confessed in proportion to the increased value set on human life, and the vastly greater amount of comfort and enjoyment of which civilized man is capable. It would be strange if their close connection historically with Egypt had not imbued the Israelites with a strong appreciation of the value of this art, and with some considerable degree of medical culture. From the most ancient testi monial, the Egyptian, to the very latest, the medical records and museums of the world. Whether all that was best worth preserving amid earlier civilizations, whether her own or foreign, had been attracted, and medicine and surgery flourished amid political decadence and artistic decline. The attempt has been made by a French writer (Bonomard, Histoire de Medicine depuis son Origine, etc.) to arrange in periods the growth of the medical art as follows: 1st. The Primitive or Instinctive Period, lasting from the earliest recorded treatment to the fall of Troy. 2d. The Sacred or Mystic Period, lasting till the dispersion of the Ptolemaic Society, 500 B. C. 3d. The Philosophical Period, closing with the foundation of the Alexandrian Library, B. C. 320. 4th. The Anatomical Period, which continued till the period of Galen, A. D. 200. It would seem, therefore, that these artificial lines do not strictly exhibit the truth of the matter. Egypt was the earliest home of medical and other skill for the region of the Mediterranean basin, and every Egyptian mummy of the more expensive and elaborate sort, involved a process of anatomy. This gave opportunities of inspecting a vast number of bodies, varying in every possible condition. Such opportunities were sure to be turned to account (Pliny, N. Hist. xix. 6) by the more diligent among the faculty — for "the physicians" emblazoned (Gen. I. 2). The intestines had a separate receptacle assigned them, or were restored to the body through the ventral incision (Wilkinson, v. 408); and every such process which we can trace in the mummies discovered shows the most minute accuracy of manipulation. Notwithstanding these labors, we have no trace of any philosophical or rational system of Egyptian origin; and medicine in Egypt was a mere art or profession. Of science the Asclepiades of Greece were the true originators. Hippocrates, who wrote a book on "Ancient Medicine," and who seems to have had many opportunities of access to foreign sources, gives no prominence to Egypt. It was no doubt owing to the repressive influences of her fixed institutions that this country did not attain to a vast and speedy proficiency in medical science, when post mortem examination was so general a rule instead of being a rare exception. Still it is impossible to believe that considerable advances in physiology could have failed to be made there from time to time, and similarly, though we cannot without well determine how far, in Assyria. 1 The best guarantee for the advance of medical science is, after all, the interest which every human being has in it; and this is most strongly felt in large gregarious populations. As to whether the invention was brought to bear on medical science, proof is wanting. Probably such science had not yet been pushed to the point at which the microscope becomes useful. Only those who have quick keen eyes for the nature-world feel the want of such spectacles.

a Recent researches at Krou nijj has given proof that it is said, of the use of the microscope in minute services, and aided up even surprising methods of investigating organic structures. A microscope equipped with a table of cubes, so small as to be unintelligible without a lens, was brought home by Sir H. Rawlinson, and is now in the British Museum.
MEDICINE

rions masses of population. Compared with the wild countries around them, at any rate, Egypt must have seemed incalculably advanced. Hence the awe, with which Homer's Greeks speak of her wealth, resources, and medical skill; and even the visit of Abraham, though prior to this period, found her no doubt in advance of other countries. Representations of early Egyptian surgery apparently occur on some of the monuments of Ben-Hassan. Flint knives used for embalming have been recovered—the "Ethiopian stone" of Herodotus (ii. 86; comp. Ex. iv. 20) was probably either black flint or agate: and those who have assisted at the opening of a mummy have noticed that the teeth exhibited a dentistry not inferior in execution to the work of the best modern experts. This confirms the statement of Herodotus that every part of the body was studied by a distinct practitioner. Pliny (vii. 57) asserts that the Egyptians claimed the invention of the healing art, and (xxvi. 1) thinks them subject to many diseases. Their "many medicines" are mentioned (Jer. xlv. 11). Many valuable drugs may be derived from the plants mentioned by Wilkinson (iv. 621), and the scena of the adjacent interior of Africa still excels all other. Atho-thosis H., king of the country, is said to have written, on the subject of anatomy, Hermes (who may perhaps be the same as Atho-thosis, intellect personified, only disguised as a deity instead of a legendary king), was said to have written six books on medicine; in which an entire chapter was devoted to diseases of the eye (Hawkinson's Herodot, note to ii. 84), and the first half of which related to anatomy. The various recipes known to have been beneficial were recorded, with their peculiar cases, in the memoirs of physic, inscribed among the laws, and deposited in the principal temples of the place (Wilkinson, iii. 356, 357). The reputation of its practitioners in historical times was such that both Cyrus and Darius sent to Egypt for physicians or surgeons (Herodot. iii. 1, 129-132); and by one of the same country, no doubt, Can-lyes' wound was tended, though not perhaps with much zeal for his recovery.

Of midwifery we have a distinct notice (Ex. i. 15), and of women as its practitioners, which fact may also be verified from the sculptures (Kaw-kinson's note on Herod. ii. 84). The physicians had salaries from the public treasury, and treated always according to established precedents, or deviated from these at their peril, in case of a fatal termination; if, however, the patient died under accredited treatment no blame was attached. They treated gratis patients when travelling or on military service. Most diseases were by them ascribed to indigestion and excessive eating (Diod. Sicul. i. 82), and when their science failed them magic was called in. On recovery it was also customary to suspend in a temple an exvoto, which was commonly a model of the part affected; and such offerings doubtless, as in the Cean Temple of Esculapius, became valuable aids to the pathological

Dr. vi. 381; Ost. iv. 229. See also Herod. ii. 84, and i. 77. The simple heroes had reverence for the gods which extended only to wounds. There is hardly any recognition of disease in Homer. There is sudden death, pestilence, and weary old age, but hardly any fixed morbid condition save in a simile (Ost. v. 335). See, however, a letter De rebus ex Homero molitis, D. G. Well, Wittenberg, 1731.

Comp. the letter of Benhadad to Joram, 2 K. v. 1, to procure the cure of Namaan.

c The words of Herod. (iii. 63), ὃς ἑρμακλεῖσα τὸ ὀστᾶτον καὶ ὁ μυρὸς τάχιστα ἑπξε, appear to indicate medical treatment by the terms employed. It is not unlikely the physician may have taken the opportunity to avenge the wrongs of his nation.

d The sex is clear from the Heb. grammatical forms. The names of two, Shiphrah and Puah, are recorded. The treatment of new-born Hebrew infants is mentioned (Ex. xvi. 4) as consisting in washing, salting, and swaddling; this last was not used in Egypt (Wilkinson).

e The same author adds that the most common method of treatment was by κλάσματα καὶ ἁματεία καὶ μεταστρέφοντος. Magicians and physicians both belonged to the priestly caste, and perhaps united their professions in one person.
pure bitumen, and various aromatic gums, suppressed or counteracted all noxious odours from the corpse, even the savour of the floor, on which the body had been cleansed, was collected in small linen bags, which, to the number of twenty or thirty, were deposited in vases near the tomb (Wilkinson, v. 468, 469). For the extent to which these practices were imitated among the Jews, see EMBALMING: at any rate the uncleanliness imported to contact with a corpse was a powerful preservative against the inoculation of the living frame with moral horrors. But, to pursue to later times this merely general question, it appears (Pliny, N. H. xix. 54) that the Ptolemies themselves practiced dissection, and that, at a period when Jewish intercourse with Egypt was complete and reciprocal, there existed in Alexandria a great zeal for anatomical study. The only influence of importance which would tend to check the Jews from sharing this was the ceremonial law, the special reverence of Jewish feeling towards human remains, and the abhorrence of "uncleanliness." Yet those Jews — and there were it at all times since the Captivity not a few, perhaps — who tended to foreign laxity, and affected Greek philosophy and culture, would assuredly, as we shall have further occasion to notice that they in fact did, enlarge their anatomical knowledge from sources which repelled their stricter brethren, and the result would be apparent in the general elevated standard of that profession, even as practiced in Jerusalem. The diffusion of Christianity in the 3d and 4th centuries exercised a similar but more universal restraint on the dissecting room, until anatomy as a pursuit became extinct, and the notion of profaneness quelling everywhere such researches, surgical science became stagnated and sunk within the memory of human records.

In comparing the growth of medicine in the rest of the ancient world, the high rank of its practitioners — princes and heroes — settles at once the question as to the esteem in which it was held in the Homeric and pre-Homeric period. To descend to the historical, the story of Democedes at the court of Darius illustrates the practice of Greek surgery before the period of Hippocrates; anticipating in its gender waiting upon nature, as compared (Herod. iii. 130) with that of the Persian

"Regibus corpora mortuorum ad scrutandum morbus incautum."
sians and Egyptians, the method and maxims of that Father of physic, who wrote against the theo-
rical and speculative systems of the so-called philoso-
phical school, and was a true Empiricist before that
sect was formulated. The Dogmatic school was
founded after his time by his disciples, who departed
from his eminently practical and inductive method.
It recognized hidden causes of health and sickness
arising from certain supposed principles or elements,
out of which bodies were composed, and by virtue of
which all their parts and members were atempered
and became sympathetic. He has some curious remarks on the sympathy of men with cli-
mate, seasons, etc. Hippocrates himself rejected
supernatural accounts of disease, and especially de-
moniacal possession. He refers, but with no mys-
tical sense, to numbers as furnishing a rule for
cases. It is remarkable that he extols the discem-
ment of Orientals above Westerns, and of Asians
above Europeans, in medical diagnosis. The em-
pirical school, which arose in the third century B.
c., under the guidance of Acron of Agrigentum,
Scorpius of Alexandria, and Philinus of Coe, waited for the symptoms of every case, disregard-
ing the rules of practice based on dogmatic prin-
ciples. Among its notables was a Zacharias (perhaps
Zacharia, and not, as is sometimes supposed, a
(Agrigentum, (Pliny, N. H. xxxvii. 10, comp. xxxvi. 10)
dedicated a book on medicine to Mithridates the Great:
it's views were also supported by Herodotus of
Tarsus, a place which, next to Alexandria, became
distinguished for its schools of philosophy and medi-
cine; as also by a Jew named Theodas, or Theo-
das, of Laodicea, but a student of Alexandria, and
the last, or nearly so, of the Empiricists whom his
school produced. The remarks of Theodas on the
right method of observing, and the value of expe-
rience, and his book on medicine, now lost, in
which he arranged his subject under the heads of
indicatoria, curatoria, and solutoria, earned him
high reputation as a champion of Empiricism against
the precepts of the dogmatists, though they were
subsequently impugned by Galen and Theodosius of
Trapping. His period was that from Tithon to
Hadrini. The empiricists held that observation and
the application of known remedies in one case to
others presumed to be similar constitute the
whole art of cultivating medicine. Though their
views were narrow, and their information scant
when compared with some of the chief's of the other
sects, and although they rejected as useless and un-
attainable all knowledge of the causes and recondite
nature of diseases, is undeniable that, besides
their practical experience, they freely availed themselves
of historical detail, and of a strict analogy founded
upon observation and the resemblance of phenomena.
(De Adams, Prod. Ph́s. ed. Sydenham Soc.)

This school, however, was opposed by another,
known as the Methodic, which had arisen under the
leading of Themison, also of Laodicea, about the
period of Pompey the Great. Asclepiades paved
the way for the 'method' in question, finding a
theoretical basis for the compounding or atomic theory
of physics which he borrowed from Heraclides of
Pontus. He had passed some early years in Alex-
andria, and thence came to Rome shortly before Cicer
's time (comp. qvo nos medicus antiquus ubi
sumus, Crassus, ap. Cic. de orat. i. 34). He was
a transitional link between the Dogmatic and Empi-
ric schools (Sprengel, in. supra, p. v. 16), which sought to rescue medicine
from the bewildering mass of particulars in which
empiricism had plunged it. He reduced diseases to
two classes, chronic and acute, and endeavored alike
wise to simplify remedies. In the mean while the
most judicious of medical theorists since Hippoca-
tes, Celsius of the Augustan period, had reviewed
medicine in the light which all these schools afforded, and had professing any distich teaching,
like the other sects (the Dogmatic), he
translated Hippocrates largely verbatim, quoting in a less degree Asclepiads and others. Antonius
Musas, whose 'cold-water cure,' after its successful
trial on Augustus himself, became generally popular,
seems to have had little of scientific basis; but by
the usual method, or the usual accidents, became
merely the fashionable practitioner of his day in
Rome. At Alexandria near Tarsus, furnished also
shortly after the period of Celsius, Athenaeus, the
leader of the last of the schools of medicine which
divided the ancient world, under the name of the
'Pneumatic,' holding the tenet of an ethereal
principle (πνευμα) residing in the microcosm, by
means of which the mind performed the functions
of the body. This is also traceable in Hippo-
ocrates, and was an established opinion of the
Stoics. It was exemplified in the intimate heat,
(βύθων ψυχών) (Arct. de caus. et sign. morb. Chron. ii. 13), and the colicinum intumatum of modern
physiologists, especially in the 17th century (Dr
Adams, Prod. Archens, ed. Syd. Soc.). It is
clear that all these schools may easily have con-
tributed to form the medical opinions current at
the period of the N. T., that the two earlier among
them may have influenced rabbinical teaching on
that subject at a much earlier period, and that es-
pecially at the time of Alexander's visit to Jerusa-
lem.

a Thus the product of seven and forty gives the
form of the days of gestation: in his 'ne" viro
wau in taking a woman's disease, is dis-
russed; so the 4th, 5th, 11th, and 17th, are noted as the
critical days in acute diseases.
b Sprengel, ub. sup. iv. 81.

MEDICINE

1587

MEDICINE

a The authorities for these statements about Thea-
das are given by Wunderbar, Bistich-Talmudischen
Medizin, Das Heft, p. 25. He refers among others to
Talmud, Tr. Nosir, 52 b; to Tosap. Olovra, iv. 4; and
to Tr. Sederh, 53 a, 39 a; y Ebr. cth., 256.

b 'Ala' (the body), ala 'Aneid' (the dogmatic), ala
Asclepiadis, ala Themisonis' (Semen, Epist. 56; comp
Juv. Sat. x. 221).
c For his reminiscences see Asclepiades Bithynian Frag-

d Female medical aid appears to have been current at
Rome, whether in midwife only (the obstetric), or
in general practice, as the titles medica, iatropos, would
seem to imply (see Martial, Epit. xii. 72). The Greeks
were not strangers to female study of medicine; e.g
some fragments of the famous Aspasia on women's ill
orders occur in Atisias.
en, the Jewish people, whom he favored and protected, had an opportunity of largely gathering from the medical lore of the West. It was necessary therefore to pass in brief review the growth of the latter, and especially to note the points at which it intersects the medical progress of the Jews. Greek Asiatic medicine culminated in Galen, who was, however, still but a commentator on his western predecessors, and who stands literally without rival, or disciple of note, till the period when Greek learning was reawakened by the Arabian intellect. Galen himself belongs to the period of the Antonines, but he appears to have been acquainted with the writings of Moses, and to have travelled in quest of medical experience over Egypt, Syria, and Palestine, as well as Greece, and a large part of the West, and, in particular, to have visited the banks of the Jordan in quest of opthalmic, and the coasts of the Dead Sea, to obtain samples of bitumen. He also mentions Palestine as producing a watery wine, suited for the drink of fabric patients.

11. Having thus described the external influences which, if any, were probably most influential in forming the medical practice of the Hebrews, we may trace next its internal growth. The eudaimon legions of the old days, or rather, the names of physicians in their fables about healing, and ascrib to those patriarchs a knowledge of simples and rare roots, with, of course, magic spells and occult powers, such as have choked the history of medicine from the earliest times down to the 17th century. So to Abraham is ascribed a talisman, the bunch of which healed all diseases. We know that such simple surgical skill as the operation for circumcision implies was Abraham's; but severer operations than this are constantly required in the deck and herd, and those who watch carefully the habits of animals can hardly fail to assimilate some guiding principles applicable to man and beast alike. Beyond this, there was probably nothing but such ordinary obstetrical craft as has always been traditional among the women of rude tribes, which could be classed as medical lore in the family of the patriarch, until his so-called brought him among the more developed Philistines and Egyptians. The only notices which a scripture affords in connection with the subject are the cases of difficult midwifery in the successive households of Isaac, Jacob, and Joseph (Gen. xxvi, xxxvi, XXXVII, xxvii, and xxxi); in that of Phileam (1 Sam. iv. 19). The traditional value ascribed to the mandrake, in regard to genitourinary functions, relating to the same branch of natural medicine; but throughout this period occurs no trace of any attempt to study, digest, and systematize the subject. But, as Islam grew and multiplied in Egypt, they derived doubtless a large mental cultivation from their position, until cruel policy turned it into bondage; even then Moses was rescued from the lot of his brethren, and became learned in all the wisdom of the Egyptians, including, of course, medicine and curing plagues (Gen. Alex. i. p. 413), and these attainments perhaps became suggestive of future laws. Some practical skill in metallurgy is evident from Ex. xxxii. 20. But, if we admit Egyptian learning as an ingredient, we should also notice how far exalted above it is the standard of the whole Jewish legislative fabric, in its exemption from the blinshes of sorcery and juggling pretences. The priest, who had to pronounce on the cure, used no means to advance it, and the whole regulations prescribed exclude the notion of trafficking in popular superstition. We have no occult practices reserved in the hands of the sacred caste. It is God alone who does great things, working by the wand of Moses, or the brazen serpent: but the mere mention of such a person, and still more of names of mysterious virtues in the things themselves. Hence various allusions to God's "healing mercy," and the title "Jehovah that healeth" (Ex. xv. 26; Jer. vii. 14, xxx. 17: Ps. ciii. 3, cxiv. 3; Is. xxx. 26). Nor was the practice of physic a privilege of the Jewish priesthood. Any one might practice it, and this publicity must have kept it pure. Nay, there was no Scriptural bar to its practice by resident aliens. We read of physicians, "healing," etc., in Ex. xx. 19; 2 K. viii. 29; 2 Chr. xvi. 12; Jer. viii. 22. At the same time the greater leisure of the Levites and their other advantages would make them the students of the nation, as a rule, in all science, and their constant residence in cities would give them the opportunity, if carried out in fact, of a far wider field of observation. The reign of peace of Solomon's days must have opened, especially with renewed Egyptian intercourse, new facilities for the study. He himself seems to have included in his favorite natural history some knowledge of the medicinal uses of the creatures. His works show him conversant with the notion of remedial treatment (Prov. iii. 8, vi. 15, xi. 18, xvii. 22, xx. 39, xxxi. 17; Eccl. iii. 4); and one passage of birth as would suggest the "holding by the heel." The midwife, it seems, in case of twins, were called upon to distinguish between the first born, to whom important privileges appertained. The tying on a thread of ribbon was an easy way of preventing mistake, and the assistant in the case of Tamar seized the earliest possible moment for doing it. "When the hand or foot of a living child protrudes, it is to be pushed up, and the head made to present" (Pill. Eozin. ed. Selden, Soc. x. 619, Hipher, quoted by Dr. Adams). This probably the midwife did; at the same time marking him as a bruisine in virtue of being thus "presented." First the precise meaning of the doublet expression in Gen. xxxviii. 27 and marg. is discussed by Wunderbar, ab. sup. p. 58, in reference both to the children and to the mother. Of Rachel a Jew (Moyses, Gen. xliii. 49) MR. S. COOK. "Multis critiam in hist. et historia species, ostendit familiam et his, qui, in viribus, ab invermis, uti... multoque febri... propter eos, qui, ibi, in Etiopia, excedere medicinae in locis beatae dicta est et..." (ibid.)
The sickness of Benhadad is certainly so described as to imply treachery on the part of Hazael (2 K. viii. 12). Yet the old proverbial babylonian "cold-water cure" practiced among the people near the Red Sea, has suggested a view somewhat different. The bed-clothes are soaked with cold water, and kept thoroughly wet, and the patient drinks cold water freely. But the crisis, it seems, occurs on the third day, and not till the fifth is it there usual to apply this treatment. If the chamberlain was too much careless, or ignorance, or treachery, precipitated the application, a fatal issue may have suddenly resulted. The "brazen serpent," once the means of healing, and wor shipped idolastically in Hezekiah's reign, is supposed to have acquired these honors under the Aesculapian aspect. This notion is not inconsistent with the Scripture narrative, though not therein traceable. It is supposed that something in the "volume of cures," current under the authority of Solomon, may have conduced to the establishment of these rites, and drawn away the popular homage, especially in prayers during sickness, or thanksgiving after recovery, from Jehovah. The statement that King Asa (2 Chr. xvi. 12) "sought not to Jehovah, but to the physicians," may seem to be a reflection of the notion that a rivalry of actual worship, based on some medical fancies, had been set up, and would so far support the Talmudical tradition.

The Captivity at Babylon brought the Jews in contact with a new sphere of thought. Their chief men rose to the highest honors, and an improved mental culture among a large section of the people, as well as a wider diversity imported on their return. We know too little of the precise state of medicine in Babylon, Susa, and the cities of the Medes, to determine the direction in which the impulse so derived would have led the exiles; but the confluence of streams of thought from opposite sources, which impregnate each other, would surely produce a tendency to sift established practice and accepted axioms, to set up a new standard, and to try the current rules of art, and to determine new lines of inquiry for every eager spirit disposed to search for truth. Thus the visit of Democedes to the court of Darius, though it much: there were magicians in Egypt, but physicians also (see above) of high cultivation. Human nature has so great an interest in human life, that only in the savage rudimentary societies is its economy left thus involved in phantasms. The earliest steps of civilization include something of medicine. Of course superstitions are found copiously involved in such medical tenets, but this is not equivalent to abandoning the study to a class of professional magicians. Thus in the Uberbiirste der altheldischen Literatur, p. 123, by D. Chwolson, St. Petersb. 1859 (the value of which is not however yet ascertained), a writer on poisons claims to have a magic antidote, but declines stating what it is, as it is not his business to mention such things, and he only does so in cases where the charm is in connexion with medical treatment and resembles it; the magicians, adds the same writer on another occasion, use a particular means of cure, but he declines to impart it, having a repugnance to witchcraft. So (pp. 125, 126) we find traces of charms introduced into Babylonian treatises on medical science, but apologetically, and as if against sounder knowledge; similarly, the opinion of fatalism is not without its influence on medicine; but it is chiefly resorted to where, as in pestilence often happens, all known aid is of no use.

seems to be an isolated fact, points to a general opening of oriental manners to Greek influence, which was not likely to leave its traces in some or perhaps of the contemporaries of Ezra. That great reformer, with the leaders of national thought gathered about him, could not fail to recognize medicine among the salutary measures which distinguished his epoch. And whatever advantages the Levites had possessed in earlier days were now apparently lost even as regards the study of the divine law, and much more therefore as regards that of medicine, into which competitors would crowd in proportion to its broader and more obvious human interest, and effectually demolish any narrowing barriers of established privilege, if such previously existed.

It may be observed that the priests in their ministrations, who presided at all seasons of the year harked on stone pavement, and without perhaps any variation of dress to meet that of temperature, were peculiarly liable to sickness. Hence the permanent appointment of a Temple physician has been supposed by some, and a certain Ben-Alijah is mentioned by Wundtbar as occurring in the Talmud in that capacity. But it rather appears as though such an officer's appointment were precarious and varied with the demands of the ministers.

The book of Ecclesiastes shows the increased regard given to the distinct study of medicine, by the repeated mention of physicians, etc., which it contains, and which, as probably belonging to the period of the Maccabees, it might be expected to show. The wisdom of prevention is recognized in Eccles. xviii. 17, perhaps also in x. 10. Rank and honor are said to be the portion of the physician, and his office to be from the Lord (xxxviii. 1, 3, 12). The repeated allusions to sickness in vi. 35, xxx. 17, xxxii. 22. xxxvii. 30, xxxviii. 9, coupled with the former recognition of merit, have caused some to suppose that this author was himself a physician. If he was so, the power of mind and wide range of observation shown in his work would give a favorable impression of the standard of practitioners; if he was not, the great general popularity of the study and practice may be inferred from its thus becoming a common topic of general advice offered by a non-professional writer. In Wisd. xvi. 12, physician is spoken of as anointing, as a means of healing, in Prov. vi. 8.

To bring down the subject to the period of the N. T. St. Luke,6 the beloved physician, who practiced at Antioch whilst the body was his care, could hardly have failed to be conversant with all the leading opinions current down to his own time. Situated between Alexandria and Cilicia, within easy sea-transit of both as well as of the western homes of science, Antioch enjoyed a more central position than any great city of the ancient world, and in it accordingly all the streams of contemporary medical learning may have probably found a point of confluence. The medicine of the N. T. is not solely, nor even chiefly, Jewish medicine; and even if it were, it is clear that the more mankind became mixed by intercourse, the more medical opinion and practice must have ceased to be exclusive. The great number of Jews resident in Rome and Greece about the Christian era, and the successive decrees by which their banishment from the former was proclaimed, must have imposed, even into Palestine, whatever from the West was best worth knowing; and we may be as sure that its medicine and surgery expanded under these influences, as that, in the writings of the Talmudists, such obligations would be acknowledged. But, beyond this, the growth of large mercantile communities such as existed in Rome, Alexandria, Antioch, and Ephesus, of itself involves a peculiar sanitary condition, from the mass of human elements which such cities may now or almost always muster.

Nor are the words in which an eloquent modern writer describes the course of this action any less applicable to the case of an ancient than to that of a modern metropolis.

"Diseases once indigestious to a section of humanity are slowly but surely creeping up to commercial centres from whence they will be rapidly propagated. One form of Asiatic leprosy is approaching the Levant from Arabia. The history of every disease which is communicated from man to man establishes this melancholy truth, that ultimately such maladies overlap all obstacles of climate, and demonstrate a solidarity in evil as well as in good among the brotherhood of nations."c

In proportion as this "melancholy truth" is perceived, would an intercommunication of medical science prevail also.

The medicine and surgery of St. Luke, then, was probably not inferior to that commonly in demand among educated Asiatic Greeks, and must have been, as regards its basis, Greek medicine, and not Jewish. Hence a standard Gentile medical writer, if any is to be found of that period, would best represent the profession to which the Evangelist belonged. Without absolute certainty as to date, we seem to have such a writer in Arcatus, commonly called "the Cappadocian,"

---

6 Thus we find Kall, De Medicina Sacrae, Istin. 175, referred to by Wundtbar, Eist. Hist. p. 66.

b This is not the place to introduce any discussion on the language of St. Luke; it may be observed, however, that it appears often influenced by his early studies; e. g. in p. p. ἁπλοῦς, ἀκριβῶς, etc., instead of the popular παραλογισμός of St. Matthew and St. Mark; so viii. 41, ἤτοι ἢ ἤτοι, instead of the apparent ἀνήσυχος; see xxviii. 5, ἄνευς ἢ τοῦ ἀνθρώπου; the correct term, instead of the popular παραλογισμός of St. Matthew and St. Mark; so viii. 41, ἀργαίος, ἀργαίος, instead of the apparent ἀνήσυχος; phrase ἀκριβῶς ἢ τοῦ ἀνθρώπου; the latter; so vi. 19. ἀποκαλέσαν, where ἐπικαλέσαν and ἐκάλεσαν occur in the other, and viii. 50, ἐνθριάσατο τοῦ ἁπατά (the breath), as though a token of animation returning; and the list might easily be enlarged.

St. Luke abounds in the narratives of demurrers to the Hippocratic opinions such influences as producing mental and epileptic disorders. See this subject discussed in the Notes on the "Sacred Diseases" in the Syriac, Soc. crit. of Hippner. Arcatus, on the contrary, recognizes the opinions of

demoniac agency in disease. His words are: ἀρσενικὸς ἡμέρος ἡμέρας ἡμέρας ἡμέρας, ἡ ματαιότος τούτο σατανάς, ἡ εὐθυγενέτεις τοῦ κακοῦ, ἡ παρθένος για τοῦ μέγα, ἡ ἐρωτημάτων άλλα άλλα άλλα δουλείας άλλα δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δουλείας δο

He supposed that water is of medical property, at least for the purpose of being used in the treatment of certain diseases. He also believed that the use of water is essential in the treatment of certain conditions, such as fever and other inflammatory diseases. His views on the use of water in medicine were advanced for his time, and his ideas were influential in the development of modern medicine. However, his views on the use of water were not universally accepted, and his ideas were debated for many years after his death.

The third volume of Paulus Aegin. (ed. Salerniensis Soc.) contains a catalogue of medicines simple and compound, and the large proportion in which the authority of Dioscorides has contributed to form it, will be manifest at the most cursory inspection. To abbreviate such a subject is impossible, and to transcribe it in the most meagre form would be too far beyond the limits of this article.

Before proceeding to the examination of diseases in detail, it may be well to observe that the question of identity between any ancient malady known by description, and any modern one known by experience, is often doubtful. Some diseases, just as some plants and some animals, will exist almost anywhere; others can only be produced within narrow limits depending on the conditions of climate, habit, etc.; and were only equal observation applied to the two, the habitation of a disease might be mapped as accurately as that of a plant. It is also possible that some diseases once extensively prevalent, may run their course and die out, or occur only casually; just as it seems certain that, since the Middle Ages, some maladies have been introduced into Europe which were previously unknown (Biblio. Script. Med. b. 1751, s. v.; De Gennaro, Galen; Lederer's History of Med. Par. 1723; transl. Lond. 1699; Freund's History of Med.).

Eruptive diseases of the acute kind are more prevalent in the East than in colder climes. They also run their course more rapidly; e. g. common itch, which in Scotland remains for a longer time vesicular, becomes, in Syria, particular as early sometimes as the third day. The origin of it is now supposed to be an acarus, but the parasite perishes when removed from the skin. Disease of various kinds is commonly regarded as a divine infliction, or denounced as a penalty for transgression; the evil diseases of Egypt" (perhaps in reference to some of the ten plagues) are especially so characterized (Gen. xx. 18; Ex. xxvi. 16; Lev. xxvi. 16; Deut. vii. 15, xxviii. 60; 1 Cor. xi. 30); so the cures also (see Eumenides) of the Philistines (1 Sam. v. 6); the severe dysentery of 2 Chr. xxii. 15, 19 of Jehoram, which was also epidemic [B loo d, i ssue; and Fever], the peculiar symptom of which may perhaps have been prophylaxis (Dr. Mason Good, i. 311-13, mentions a case of the entire colon exposed); or, perhaps, what is known as dermophil tribulosa, formed by the conglomeration of fibres into a membrane discharging from the inner coat of the intestines, which takes the mould of the bowel, and is thus expelled (Kitto, s. v. "Diseases"); so the

A. V. "mice"; but according to Lichtenstein (in Erichsen's Elements, vi. 467-68) a venemous solpuga is with some plausibility intended, so large, and so similar in form to a mouse, as to admit of its being denominated by the same word. It is said to destroy and live upon scorpions, and to attack in the parts allotted to the reference given is Pliny, H. N. xxv. 4; but Pliny gives merely the name, "solpuga," the rest of the statement finds no foundation in him. See below, p. 175. The other references to Pliny, H. N. xi. 30, p. 149 has another interpretation of the "mice."

Medicine

hidden deaths of Er, Oman (Gen. xxxviii. 7, 10), the Egyptian first-born (Ex. xi. 4, 5), Nadal, Bathsheba's son, and Jerobam's (1 Sam. xxv. 38; 2 Sam. xii. 15; 1 K. xiv. 1, 5), are ascribed to action of Jehovah immediately, or through a prophet. Pestilence (1 Sam. iii. 5) attends his path (comp. 2 Sam. xiv. 15), and is inimous to those whom He shelter (Ps. xci. 9–10). It is by Jeremiah, Ezekiel, by prophets associated (as Hos. iii. 14) with the "sword" and "fanine" (Jer. xiv. 12, xv. 2, xxi. 7, 9, xxiv. 10, xvii. 8, xiii. 8, xxix. 18, 17, xxi. 24, xxxiv. 17, xxxii. 2, xliii. 17, xi. 12, vi. 13, Ps. v. 17, 12, vii. 11, 12, vi. 13, xvi. 21, xxxii. 27; Am. iv. 6, 10). The sicknesses of the widow's son of Zarephath, of Ahaziah, Benhadad, the leprosy of Uzziah, the boil of Hezekiah, are also noticed as diseases sent by Jehovah, or in which He interposed, 1 K. xvi. 17, 20; 2 K. i. 4, xx. 1. In 2 Sam. iii. 21, disease is invoked as a curse, and in Solomon's prayer, 1 K. viii. 37 (comp. 2 Chr. xx. 9), anticipated as a chastisement. Job and his friends agree in ascribing his disease to divine infliction; but the latter urges his sins as the cause. So, conversely, the healing character of God is invoked on his behalf. Ps. vi. 2, xlii. 3; Jer. xxxvii. 17. Sanitic agency appears also as procuring disease, Job ii. 7; Luke xiii. 11, 16. Diseases are also mentioned as ordinary calamities, e. g. the sickness of old age, headache (perhaps by sunstroke), as that of the Shunammite's son, that of Elisha, and that of Benhadad, and that of Joram, Gen. xlviii. 13; 1 Sam. xxx. 13; 2 K. iv. 20, viii. 7, 29, xili. 14; 2 Chr. xxvi. 6. Among special diseases named in the Old Testament is ophthalmia (Gen. xxxix. 17, שֶׁבֶל הַלְּיִלִּים), which is perhaps more common in Syria and Egypt than anywhere else in the world; especially in the fig season, the juice of the newly-ripe fruit having the power of giving it. It may occasion partial or total blindness (2 K. vi. 18). The eye-salve (κολλαθρα, Rev. iii. 18; Hor. Sat. i.) was a remedy common to Orientals, Greeks, and Romans (see Hippocrates, κολλαθρα; Celsius, vi. 8, de oculorum morbis; [De diversis colybris]). Other diseases are barrenness of women, which mandrakes were

supposed to have the power of correcting (Gen. xix. 18; comp. xxi. 17, xxx. 1, 2, 14–16) — consumption, "b and several, the names of which are derived from various words, signifying to burn or to be hot (Lev. xxvi. 16; Deut. xxviii. 22; see Fevers); compare the kinds of fever distinguished by Hippocrates as καθαρια and πυρ. The "burning boil," or of a boil (Lev. xii. 23, עַלּוֹת חַפֻּר), is again merely marked by the notion of an effect resembling that of fire, like the Greek φλεγμονη, or our carbuncle; it may possibly find an equivalent in the Damascus boil of the present time. The "booth (בּוֹתו) of Egypt" (Deut. xxviii. 27) is so vague a term as to yield a most uncertain sense; the plaque, as known by its attendant bond, has been suggested by Scheuchzer. It is possible that the Elephasontis Graecorum may be intended by יבּבוֹת, understood in the widest sense of a continued ulceration until the whole body, or the portion affected, may be regarded as יבּבוֹת. Of this disease some further notice will be taken below; at present it is observable that the same word is used to express the "booth" of Hezekiah. This was certainly a single locally confined eruption, and was probably a carbuncle, one of which may well be fatal, though a single one in our sense of the word seldom is so. Dr. Mead supposes it to have been a fever terminating in an abscess. The diseases rendered "scar" "a and "scurvy" in Lev. xxii. 20, xxii. 22, Deut. xxviii. 27, may be almost any skin disease, such as those known under the names of lepra, scurvy, pityriasis, ichthyosis, fava, or common itch. Some of these may be said to approach the type of leprosy (Leprosity) as laid down in Scripture, although they do not appear to have involved ceremonial defilement, but only a kinsman disqualifying for the priestly office. The quality of being incurable is added as a special curse, for these diseases are not generally so, or at any rate are common in milder forms. The "running of the reins" (Lev. xv. 2, 3, xxiv. 4, marz.) may perhaps mean gonorrhoea. If we compare Num. xxiv. 1, xxxi. 7 with Josh. xvi. 17, there is ground for thinking

The existence of gonorrhoea in early times — save in the male foal — has been much disputed. Michel Le Bas, "Pour notre part, nous n'avons jamais pu considérer comme une nouveauté du xv. siècle. Il certainement gives some strong historical evidence against the view that it was introduced into France by Spanish troops under Don Alvaro de Cordova on their return from the New World, and so into the rest of Europe, where it was known as the mortis Gallica. And, Le spilus est perdue centura, la pathologie ancienne par la diversité de ses symptômes et des altérations; leur interprétation collective, et leur réduction en une seule unité moribole, a fait croire à l'introduction d'une maladie nouvelle." See also Preuss's History of Med., Dr. Mead, Michaels, Reinhart (Bibl. medizinische), Schmitz (Biblische Med.), and others. Wunderbar (Dib-Tolst. Med. iii. 29, commenting on Lev. xv., and comparing Misha, Zohar, ii. 2, and Midr. Mel. at loc.) thinks that gonorrhoea benigna was in the mind of the latter writers. Dr. Adams, the editor of Post. Exem. (Sylves, Soc. ii. 14), considers spilus a modified form of elephantiasis. For all ancient notices of the cognate diseases see that work, i. 586 foll. 

a Comp. Hippocrates, peri ὑδατος, α. ὁδηγησις της ἐπι- τευον και ἐναγωγας μεγάλης καθαροι και καθαρης καλλος. 
b Possibly the pulmonary tuberculosi of the West, which is not unknown in Syria, and common enough in Smyrna and in Egypt. The word ἱππο-ρος is from a root meaning "to waste away." In Zech. xiv. 12 a plague is described answering to this meaning — an intense emaciation or atrophy; although no link of causation is hinted at, such sometimes results from severe internal abscesses. 
c It should be noticed that Hippocrates, in his Epistulas, makes mention of fevers attended with buboes, which affords presumption in favor of plague being not unknown. It is at any rate as old as the 1st century, A. D. See Laërtes's Hippocrates, tom. ii. p. 585, and iii. p. 5. The plague is referred to by writers of the 1st century, namely, of 

Theodorus of Manna. 

d Their terms in the respective versions are: — ἵππορος ὑδατος. 

infectio.
that some disease of this class, derived from polluting sexual intercourse, remained among the people. The "issue" of Lee, ix. 19, may be [Hesiod, 9. 140] at the "smearings," the duration of which in the East is sometimes, when not checked by remedies, for an indefinite period Matt. ix. 20, or uterine hemorrhage from other causes. In Dent. xxviii. 35, is mentioned a disease attacking the "knives and legs," consisting in a "sore which cannot be healed," but extended, in the sequel of the verse, from the 'sole of the foot to the top of the head.' The latter part of the quotation would certainly accord with Elephantiasis (Pompey, 17. 501): but this, if the whole verse be a mere continuation of one described malady, would be in contradiction to the fact that this disease commences in the face, not in the lower members. On the other hand, a disease which affects the knees and legs, or more commonly one of them only—its principal feature being inflammation, distorting and altering all the proportions—is by a mere accident of language known as Elephantiasis (I. c. 1. 300) or Baridasas leg, from being well known in that island. Supposing, however, that the affection of the knees and legs is something distinct, and that the latter part of the description applies to the Elephantiasis, then the all-pervading character of the malady are well expressed by it. This disease is what now passes under the name of 'leprosy' (Michaelis, i. 50) —the lepers, e. g., of the huts near the Zion gate of modern Jerusalem are elephantiasics. It has been asserted that there are two kinds, one painful, the other painless; but as regards Syria and the East this is contradicted. There the parts affected are quite blemished and lose sensation. It is classed as a tubercular disease, not confined to the skin, but pervading the tissues and destroying the bones. It is not confined to any age or either sex. It first appears in general, but not always, about the face, as an indurated membrane (hence it is improperly called tubercular), which gradually enlarges, inflames, and ulcerates, sometimes it commences in the neck or arms. The ulcers will heal spontaneously, but only after a long period, and after destroying a great deal of the neighboring parts. If a joint be attacked, the ulceration will go on till its destruction is complete, the joints of finger, toe, etc., dropping off one by one. Brightened dreams and felt breath are symptoms mentioned by some pathologists. The mode of life will develop them.

**Notes:**

1. The Arabs call Elephantiasis Geronom (Laronom) immutability, from the gradual dropping off of the joints of the extremities. They give to E. Abam the name of Abyd. 3. 57. Diodoros mentions elephas, from the leg when swelled resembling that of the animal; but the latter disease is quite distinct from the former because of the tissue changes which extend through the body.

2. For its ancient description see Celsus, iii. 25, 26. Elephantid. Galen's De Arte Curandi et Geronom. lib. ii. de Cervico et Eleph. recommends vipers' flesh, g loosenings of the cases, and adds that the disorder was common in Alexandria. In Hippocr. (Protecor. ii. ap. fr. 31), it is mentioned κη̣ρο̣ς καὶ κη̣ρο̣ς διαφορά, but in the glossary of Galen it is named κη̣ρο̣ς καὶ κη̣ρο̣ς διαφορά, but κη̣ρο̣ς καὶ κη̣ρο̣ς διαφορά in Homer. Deplanckes in his Huxham's rolled volume in Greek, xxx. 28, says, "perissus habet leperum quos elephantias sic defferunt et gradat ut $x$ vidine illustret Fuss.

Schmidt and River.

Advanced speaks chiefly which Greek ful to burning phthiriasis, xvii. This ftesi'oJi'ippea appears, a of Hippocrates "terrifying ulcers, mere of disease. The disease of king Antiochus (2 Macc. ix. 5-10, &c.) is that of a boil breeding worms (necos veritum, vacino). So Suhb. Pherecydes, and Menean the poet, are mentioned (Plut. vita Sull.) as similar cases. The examples of both the Herois (Jos. Ant. xxvi. 6, § 5, B. J. i. 33, § 5) may also be added, as that of Pherectes (Herod. iv. 295). There is some doubt whether this disease be not allied to phthisis, in which lice are bred, and cause ulcers. This condition may originate either in a sore, or in a morbid habit of body brought on by uncleanliness, suppressed perspiration, or neglect; but the verification, if it did not commence in a sore, would produce one. Dr. Mason Good (iv. 504-6), speaking of μαλακός, μαλακός = communicative verminating, mentions a case in the Westminster Infirmary, and an opinion that universal phthisis was no unfrequent disease among the ancients; he also states (p. 500) that in gangrenous ulcers, especially in warm climates, innumerable grubs or maggots will appear almost every morning. The canel, and other creatures, are known to be the habitat of similar parasites. There are also cases of ulcers, without any wound, suspiciously outward, such as the Vex Meditaneus, known in Africa as the Guinea-worm, of which Galen had heard only, breeding under the skin and needing to be drawn out carefully by a needle, lest it break, when great soreness and suppuration succeed (Freind, Hist. of Med. i. 49; De Munciebo's Travels, p. 4; and Pantal. Eutip. t. iv. Sydenh. Soc. ed.).

In Deut. xxvii. 65, it is possible that a puncture of the heart is intended to be spoken of (comp. Gen. xiv. 26). In Mark ix. 17 (compare Luke ix. 38) we have an apparent case of epilepsy, shown especially in the tumour, falling, wallowing, and similar violent symptoms mentioned: this might easily be a form of demonical manifestation. The case of extreme hunger recorded 1 Sam. xiv. was merely the result of exhaustive fatigue; but it is remarkable that the Bulimia of which Xenophon speaks (Aeschi. iv. 5, 7) was remedied by an application in which "honey" (comp. 1 Sam. xiv. 27) was the chief ingredient.

Besides the common injuries of wounding, bruising, striking out eye, tooth, etc., we have in Ex. xxii. 23, the case of miscarriage produced by a blow, push, etc., damaging the fetus. The plague of "boils and blains" is not said to have been fatal to man, as the morrinn preceding was to cattle: this alone would seem to contradict the notion of Shapert (Medic. Succ. p. 113), that the disorder in question was smallpox, which, wherever it has appeared, until mitigated by vaccination, has been fatal to a great part, perhaps a majority of those seized. The smallpox also generally takes some days to pronounce and mature, which seems opposed to the Mosiac account. The expression of Ex. 10, a "boil" v flourishing, or effulgent with blains, may perhaps be a disease analogous to phlegmonous erysipelas, or even common erysipelas, which is often accompanied by vesications such as the word "blains" might fitly describe.4

a Such is the opinion of Dr. R. Sim, expressed in a private letter to the writer. Med. Times and Gazette, April 14, 1859.
b The suppuration, etc., of ulcers, appears at least equally likely to be intended.
c He refers to Hippocrates. Lib. de Med. tom. viii. p. 397. d Some are given in the lists of parasites, most of them in the skin. This "Gaining-worm," it appears, is also found in the Caspian Sea, (see also i. 502, peri eisai nivos ... elpizeta hesthe kai dokei of Persian coins, given a list of parasites, most of them in the skin. This "Gaining-worm," it appears, is also found in the Caspian Petrea, on the coasts of the Caspian and Persian Gulf, on the Ganges, in Upper Egypt and Abyssinia (ii. 514). Dr. Read refers to Suid. i. 125, e. cat. by parasitic insects. Shapert, without due figitation, objects that the word in that case should have been not σεαλωδής, but συλωδής (Medic. Succ. p. 58)." It has been much debated whether the smallpox was an ancient disease. On the whole, perhaps, the arguments in favor of its not being such predate, chiefly on account of the strongly marked character of the symptoms, which makes the negative argument of unusual weight.

4 This is Dr. Robert Sim's opinion. On comparing, however, his views with those of Read (comp. the Diss. Ex. iv. 8), an analogy is perceptible to what is called "bricklayer's itch," and therefore to leprous. (Lev. xiv.) A disease involving a white spot breaking forth from a boil related to leprosy, and clean or unclean according to symptoms specified, occurs under the general focus of leprosy (Lev. xiii. 21-29).
The "withered hand" of Jeroboam (1 K. xiii. 4-6), and of the man Matt. xii. 10-13 (comp. Luke vi. 10), is such an effect as is known to follow from the obliterating of the main artery of any member, or from paralysis of the principal nerve, either through disease or through injury. A case with a symptom exactly parallel to that of Jeroboam is mentioned in the life of Gabriel, an Arab physician. It was that of a woman whose hand had become rigid in the act of swinging, and remained in the extended posture. The most remarkable feature in the case, as related, is the remedy, which consisted in alurna acting on the nerves, inducing a sudden and spontaneous effort to use the limb—an effect which, like that of the dumb son of Cæcina (Herod. i. 85), was paradoxically successful. The case of the widow's son restored by Elisha (2 K. iv. 12) was probably one of sunstroke.

The disease of Asa "in his feet" (Schmidt, Biblisch e. Med. iii. 3, § 2), which attacked him in his old age (1 K. xiv. 2), and became exceeding great, may have been either acute, swelling, or pestiferous, gout. The former is common in aged persons, in whom, owing to the difficulty of the return upwards of the sluggish blood, its watery part stays in the feet. The latter, though rare in the East at present, is mentioned by the Talmudists (Neth. 10 a, and Sahedrin, 48 b), and there is no reason why it might not have been known in Asa's time. It occurs in Hippocr., Apol. vi., Praxag. II. 1; Celsus, iv. 24; Aretæus, Medb. Chron. ii. 12, and other ancient writers.

In 1 Macc. vi. 8, occurs a mention of sickness of grief in Exclus. xxvii. 30, of sickness caused by excess, which require only a passing mention. The disease of Nebuchadnezzar has been viewed by Jahn as a mental and purely subjective malady. It is not easy to see how this satisfies the plain euphistic statement of Dan. iv. 33, which seems to include, it is true, mental derangement, but to assert a degraded bodily state to some extent, and a corresponding change of habits. We may regard it as Med (Med. Soc. vii.), following Tertullian's Anatomy of Melancholy, does, as a species of the melancholy known as Lycanthropia (Paulus Epin. iv. 15, Ariston. ii. 1, 3, 29). Persons so affected wonder like wolves in sepulchres by night, and imitate the howling of a wolf or a dog. Further, there are well-attested accounts of wild or half-wild human creatures, of either sex, who have lived as beasts, losing human consciousness, and acquiring a superhuman fecundity, activity, and swiftness. Either the lycanthropic patients or these latter may furnish a partial analogy to Nebuchadnezzar, in regard to the various points of modified outward appearance and habits ascribed to him. Nor would it seem impossible that a sustained lycanthropia might produce this latter condition.

Here should be noticed the mental malady of Saul. His melancholy seems to have had its origin in his sin; it could not therefore ground in his moral nature, but extended its effects, as commonly, to the intellectual. The "evil spirit from God," whatever it meant, was no part of the medical features of his case, and may therefore be excluded from the present notice. Music, which soothed him for a while, has entered largely into the milder modern treatment of lunacy.

The poetry meets us in the N. T. only, and in features too familiar to need special remark. The words "spiritually tormented" (Matt. viii. 6) have been commented on by Baier (de Paral. 32), to the effect that examples of acutely painful paralysis are not wanting in modern pathology, e. g. when paralysis is complicated with neuralgia. But if this statement be viewed with doubt, we might understand the Greek expression (baimas, &c.) as used of paralysis agitans, or even of chorea (St. Vitus' dance), in both of which the patient, being never still for a moment save when asleep, might well be so described. The woman's case who was "bowed together" by a spirit of infirmity, may probably have been paralytic (Luke xii. 11). If the dorsal muscles were affected, those of the chest might, might not, have undergone, under moral or physical coercion, and thus cause the patient to suffer as described.

Gaugrene (γαυγρανεμα, Celsus, viii. 33, de gynæarum), or mortification in its various forms, is a totally different disorder from the "canker" of the A. V. in 2 Tim. ii. 17. Both gaugrene and cancer were common in all the countries familiar to the Scriptural writers, and neither differs from the modern disease of the same name (Dr. M. Good, ii. 669, &c., and 570, &c.).

In Is. xxvi. 18: Is. vii. 14, there seems an allusion to false conception, in which, though attended by pains of quasi-labor and other ordinary symptoms, the womb has been found uninjured, and no delivery has followed. The medical term (Dr. M. Cairns, 188, de gynæarum, &c.) suggests the Scriptural language, "we have as it were brought forth wind;" the whole passage is figurative for disappointment after great effort.

Poison, as a means of destroying life, hardly occurs in the Bible, save as applied to arrows (Job vii. 4). In Ezek. xii. 2, the prophet gives "poison" as an alternative rendering, which does not seem preferable: intoxication being probably meant. In the annals of the Hebrews poisons occur as the resource of stealthy murder.

a) John (Upham's transl. 222) suggests that clump, twisting the Ishah round as if in torture, may have been intended. This suits baimas, &c., no doubt, but not baimas, &c.
b) For an account of the complaint, see Paul Epin., ed. Syl Soc. i. p. 622.
c) In Chalmers' Hebræorum d. εἰλθαβο λογία, I 29, Dan Wahlenbichler's treatise on poisons contains references to several older writings by authors of other nationalities, his commentator, Ebeling, treats of the existence and effects of poisons and antidotes, and in an independent work of his own thus classifies the subject: (1) of poisons which kill at sight (seem most dangerous); (2) of those which kill through sound (Schnöd oder Laut); (3) of those which kill by smelling; (4) of those which kill by reaching the interior of the body; (5) of those which
The bite or sting of venous beasts can hardly be treated as a disease; but in connection with the "ferry (i.e. venomous) serpents" of Num. xxii. 6, and the deliverance from death of those bitten, it deserves notice. Even the Talmudists acknowledge that the healing power lay not in the brown serpent itself, but "as soon as they feared the Most High, and uplifted their hearts to their Heavenly Father, they were healed, and in default of this were brought to nought." Thus the brazen figure was symbolical only; or, according to the lovers of purely natural explanation, was the stage-trick to cover a false miracle. It was customary to consecrate the image of the affliction, either in its cause or in its effect, as in the golden emerods, golden mice, of 1 Sam. vi. 4, 8, and in the ex-votos common in Egypt even before the exodus: and these may be compared with this setting up of the brazen serpent. Thus we have in it only an instance of the current custom, fanciful or superstitious, being sublimed to a higher purpose.

The bite of a white she-nale, perhaps in the ratting season, is according to the Talmudists fatal; and they also mention that of a mad dog, with certain symptoms by which to discern his state (Wunderbar, ut sup. 21). The scorpion and centipede are natives of the Levant (Rev. iv. 5, 10), and, with a large variety of serpents, swarm there. To these, according to Liechtenstein, should be added a venomous solpuga, or large spider, similar to the Calabrian Tarantula: but the passage in Pliny9 ad- duced (H. N. xxix. 29), gives no satisfactory ground for the theory laid upon it; that its bite was the cause of the emerods. It is, however, remarkable that Pliny mentions with some fullness, a mus araneus — not a spider resembling a mouse, but a mouse resembling a spider — the shrew-mouse, and called araneus, isiborus1 says from this resemblance, or from its eating spiders. Its bite was venomous, caused mortification of the part, and a spreading ulcer attended with inward griping pains, and when crushed on the wound was its own best antidote.

The disease of old age has acquired a place in Biblical nosology chiefly owing to the elegant allegory into which "The Preacher" throws the successive stages of the range of human life (Eccl. xii. 1). The symptoms enumerated have each their significance for the physician, for, though his art can do little to arrest them, they yet mark an altered condition calling for a treatment of its own.

The Preacher divides the sum of human existence into that period which involves every mode of growth, and that which involves every mode of decline. The first reaches from the point of birth or even of generation, onwards to the attainment of the "grand climacteric," and the second from that epoch backwards through a corresponding period of decline till the point of dissolution is reached. This latter course is marked in metaphor by the darkening of the great lights of nature, and the ensuing season of life is compared with the broken weather of the wet season setting in when summer is gone, when after every shower fresh clouds are in the sky, as contrasted with the showers of other seasons, which pass away into clearness. Such he means are the ailments and troubles of declining age, as compared with those of advancing life. The "keepers of the house" are perhaps the ribs which support the frame, or the arms and shoulders which envelop and protect it. Their "trembling," especially that of the arms, etc., is a sure sign of vigor past. The "strong men" are its supporters, the lower limbs "bowing themselves" under the weight they once so lightly bore. The "grinding" hardly needs to be explained of the teeth now become "few." The "lookers from the windows" are the pupils of the eyes, now "darkened," as Isaac's were, and Elia's; and Moses, though spared the dimness, was yet in that very exemption a marvel (Gen. xxvi., comp. xvili. 10; 1 Sam. iv. 15; Pent. xxxiv. 7). The "doors shut" represent the dulness of those other senses which are the portals of knowledge: thus the taste and smell, as in the case of Barzilikai, become impaired, and the ears stopped against sound. The "rising up at the voice of a bird" portrays the light, soon-fleeting, easily-broken slumber of the aged man; or possibly, and more literally, actual waking in the early morning, when first the cock crows, may be noticed. The "daughters of music brought low," suggest the

—"Big many voice
Now turn'd again to childish treble;"

and also, as illustrated again by Barzilikai, the failure in the discernment and the utterance of musical notes. The fears of old age are next noticed: "They shall be afraid of that which is high;" "an

moritur est in Sardinia animal perexiguum araneum formae que solifugae dicitur, eo quod diem fugiatur (Orig. ii. 3).

As regards the scorpion, this belief and practice still prevail in Palestine. Pliny says (H. N. xxv. 27), after describing the ashes of a ram's hoof, young of a weasel, etc., "si jumenta monomeridit aut (i.e. araneus) recus sunt sale importunt, aut fel separat ilium ex acet. Et ipse mus araneus contra remedia est divinus et impostus." etc. In cold climates, it seems, the venom of the shrew-mouse is not perceptible.

These are respectively called the murr a'rux and the murr a'rux vi, and the murr a'rux vi, of the Rabbits (Wunderbar 252 Heft). The same idea appears in Soph. Trachin. 2 Or, even more simply, these words may be under stood as meaning that old men have neither vigor nor breath for going up hills, mountains, or anything else that is "high;" "may, for them the plain, even road has its terrains they walk timidly and cautiously even along that.
obscur expression, perhaps, for what are popularly called "nervous" terrors, exaggerating and magnifying every object of alarm, and "making," as the saying is, "mountains of molehills." The fear in the way is at first less obvious; but observe how insidiously and silently an old person more than the prospect of a long journey. Thus regarded, it becomes a fine and subtle tinge in the description of decrepitude. All readiness to haste is arrested, and a numb despondency succeeds. The "flourishing" of "the almond-tree" is still more obscure: but we observe this tree in Fal-tine blossoming when others show no sign of vegetation, and when it is dead winter all round—no ill type, perhaps, of the old man who has survived his own contemporaries and many of his juniors. Youthful lusts die out, and their organs, of which "the grasshopper" is perhaps a figure, are relaxed. The "silver cord" may be that of nervous sensation, or motion, or even the spinal marrow itself. Perhaps some incapacity of retention may be signified by the "golden hair of斑马;" the "pitcher broken at the well" suggests some vital supply stopping at the usual source—derangement perhaps of the digestion or of the respiration; the "wheel shuttered at the cistern," conveys, through the image of the water-lifting process familiar in irrigation, the notion of the blood, pumped, as it were, through the vessels, and fertilizing the whole system; or—"the bowls is the life." This careful register of the tokens of decline might lead us to expect great care for the preservation of health and strength; and this indeed is found to mark the Mosaic system, in the regulations concerning diet, "the divers washings," and the pollution imputed to a corpse—may, even in circumstance itself. These served not only the ceremonial purpose of importing self-consciousness to the Hebrew, and keeping him distinct from alien admixture, but had a sanitary aspect of rare wisdom, when we regard the country, the climate, and the age. The laws of diet had the effect of tempering by a just admixture of the organic substances of the animal and vegetable kingdoms the regimen of Hebrew families, and thus providing for the vigor of future ages, as well as checking the stimuli which the predominant use of animal food gives to the passions. To these effects may be ascribed the immunity often enjoyed by the Hebrew race—amidst epidemics devastating the countries of their sojourn. The best and often the sole possible exercise of medicine is to prevent disease. Moses could not legislate for cure, but his rules did for the great mass of the people what no therapeutics however consummate could do,—they gave the best security for the public health by provisions incer-

* Compare also perhaps the dictum of the cfodfather man, Prov. xxiii. 15, "There is a lion in the way." 

* In the same strain Juvenal (Sat. x. 235 f.) says: —
"Hinc data popula vicinat, ut renovata
Semper clude donis, multum in horribus impone.
"Praepinquum muro at signa vecte semper.

* Dr. Mead (Med. Sac. vii.) thinks that the scro-
tum, swum by a rupture, is perhaps meant to be typ-
ified by the shape of the grasshopper. He renders the Hebrew "iiaזוע (necropsy, vulg. impromptus bocca). Com-
p. 156. 83. ii. xi. 7, 8.

* If the Hebrews are to be believed in this point, in ant. both in the Talmudical writers and in Aramaic.

According to the public economy. Whether we re-
gard the laws which sealed the leper, as designed to prevent infection or repress the dread of it, their wisdom is nearly equal, for all of terrrors the imagin-
ary patient. The laws against terrestrial and aquatic marriage have in general a similar tendency, degeneracy being the penalty of a departure from those which forbid comming to of near kin. Michel Levy re-
marks on the salutary tendency of the law of mar
tial separation (Lev. xv.) imposed (Levy, T'zi'at d'Hugnche, p. 8). The precept also concerning purity on the necessary occasions in a desert en-
campment. (Deut. xxii. 23, 24). By all means, the re-
turn of the elements of protnessity to the soil, would probably become the basis of the municipal regulations having for their object a similar purity in towns. The consequences of its neglect in such encampments is shown by an example quoted by Michel Levy, as mentioned by M. de Lamartine (lib. 8, 9). Length of life was regarded as a mark of divine favor, and the divine legislator had pointed out the means of ordinarily insuring a fuller measure of it to the people at large than could, according to physical laws, otherwise be hoped for. Per-
haps the extraordinary means taken to prolong vital-
ity may be referred to this source (1 K. i. 2), and there is no reason why the case of David should be deemed a singular one. We may also compare the apparent immunity of the Children of Israel to such as an arenaceous degree, but having, perhaps, a physical law as its basis, in the cases of Elijah, Elisha, and the sons of the widow of Zarephath, and the Shammite. Wunderbar 9 has collected several examples of such influence similarly exerted, which however he seems to exaggerate to an absurd pitch. Yet it would seem not against analogy to suppose, that, as pervicuous calabashes, mums, etc., may pass from the sick and affect the healthy, so there should be a reciprocal action in favor of health. The climate of Palestine afforded a great range of temperature within a narrow compass, e.g. a long sea-coast, a long deep valley (that of the Jordan), a broad flat plain (Esrodon), a large portion of table-land (Judah and Ephraim), and the higher elevations of Carmel, Tabor, the lesser Hermon, and the centre and centre of nearly all sup-
portable climates. 6 In October its rainy season begins with moist westerly winds. In November the trees are bare. In December snow and ice are often during the north wind's prevalence. The cold disappears at the end of February, and the "latter rain" sets in, lasting through March to the middle of April, when thunder-storms are common, torrents swell, and the heat rises in the low grounds. At the end of April the last season begins, but preserves moderation till

* Michel Levy quotes Halle as acknowledging the sanitant character of the prohibition of salt pork, which he says is "objet d'une utilisation d'un gras a déperdition incrassable." Stock of the Jews in London during the chicken attack of 1849.

* Fehrenh.-Tentum, Med. 26, p. 117. pp. 15-17. He speaks of the result ensuing from shaking hands with "vermin," etc.

* The provision of an abundance of salt tended to banish much disease. Ps. li. (title); 2 Sam. viii. 13; 1 Chr. xiii. 22. Salt-pits (Zeph. ii. 9) are still dug by the Arabs on the shore of the Dead Sea. For the use of salt to a newborn, Exodus, xii. 16, 4. comp. Onias de Sant, lib. i. exp. 7.
June, thence till September becomes extreme; and during all this period rain seldom occurs, but often heavy dew prevails. In September it commences to be cool, first at night, and sometimes the rain begins to fall at the end of it. The migration with the season from an inland to a sea-coast position, from low to high ground, etc., was a point of social development never systematically reached during the Scriptural history of Palestine. But men inhabiting the semiarid country cannot fail to notice the connection between the air and moisture of a place and human health, and those favored by circumstances would certainly turn their knowledge to account. The Talmudists speak of the north wind as preservative of life, and the south and east winds as destructive, but the south as the most insupportable of all, coming hot and dry from the deserts, producing abortion, tainting the babe yet unborn, and corrodine the pearls in the sea.

Further, they dissuade from performing circumcision or venesection during its prevalence (Jobehoth, 72 a, op. Wunderbar, 3tes Hett. ii. 4.). It is stated that the marriage-bed placed between north and south will be blessed with male issue (Bereschoth, 14, b.), which may, Wunderbar thinks, be interpreted of the temperature when moderate and in neither extreme (which these winds respectively represent), as most favoring fecundity. If the fact be so, it is more probably related to the phenomena of magnetism, in connexion with which the same theory has been lately revived. A number of precepts are given by the same authorities in reference to health, e. g. eating slowly, not contracting a sedentary habit, regularity in natural operations, cleanliness of temperance, due sleep (especially early morning sleep is recommended), but not somnolence by day (Wunderbar, ut sup.).

The rite of circumcision, besides its special surgical operation, deserves some notice in connexion with the general question of the health, longevity, and fecundity of the race with whose history it is identified. Besides being a mark of the covenant and a symbol of purity, it was perhaps also a protest against the phallic-worship, which has a remote antiquity in the corruption of mankind, and of which we have some trace in the Egyptian myth of Osiris. It has been asserted also (Wunderbar, 3tes Hett, p. 25.), that it distinctly contributed to increase the fruitfulness of the race, and to check inordinate desires in the individual. Its beneficial effects in such a climate as that of Egypt and Syria, as tending to promote cleanliness, to prevent or reduce irritation, and thereby to stop the way against various disorders, have been the subject of comment to various writers on hygiene. In particular a troublesome and sometimes fatal kind of boil (phy- 

---

This writer gives a full account of the entire process as now in practice, with illustrations from the Turkish mode of operating, gathered, it seems, from a fragment of a rare work on the healing art by an anonymous Turkish author of the 16th century, in the public library at Leipsic. The Persians, Tartars, etc., have followed him with further illustrations. It yet it by no means follows that the rest were not known in Scriptural times, it being a well-known fact in the history of inventions that many useful discoveries have long been kept as family secrets. Thus an obsolete method of excision in a house where a virus was excited, as was commonly done at Pompall, though the Greeks and Romans, so far as their medical works show, were unacquainted with the instrument (Paul. Ec. i. 502, ed. Sydenham Soc.)
MEDICINE

The use of "stone" mentioned by Herodotus (ii. 86), and Pliny speaks of what he calls Ῥῆδα τομή, as a similar implement. Zipporah seems to have caught up the first instrument which came to hand in her apprehension for the life of her husband. The "knife" (ῥήδα τομή) of Josh. v. 2 was probably a more refined instrument for the same purpose. An "awl" (καθαραία) is mentioned (Ex. xxii. 6) as used to bore through the ear of the bondman who refused release, and is supposed to have been a surgical instrument.

A seat of delivery called in Scripture ἄνεμος:

Ex. i. 16, by the Tanahists ἀνεμός (comp. 2 K. vi. 3), "the storks"; but some have doubted whether the word used by Moses does not mean rather the terns itself as that which moulds and shapes the infant. Delivery upon a seat or stool is, however, a common practice in France at this day, and also in Palestine.

The "roller to bind" of Ex. xxv. 21 was for a broken limb, as still used. Similar bands wound with the most precise accuracy involve the mummas.

A scraper (καθαράς), for which the "potsherds" of Job was a substitute (Job ii. 8).

Ex. xxx. 24-25 is a prescription in form. It may be worth while also to enumerate the leading substances which, according to Wundtler, composed the pharmacopoeia of the Tanahists — a much more limited one — which will afford some insight into the distance which separates them from the leaders of Greek medicine. Besides such ordinary appliances as water, wine (Luke x. 34), beer, vinegar, honey, and milk, various oils are found: as ἀλαμβάνων ("balm of Gilead"), the oil of olive, myrrh, rose, palm, Christ, walnut, sesameum, cedebeth, and fish: ψάρια (2 K. xx. 7), dates, apples (Cant. ii. 5), pomegranates, pistacchio-nuts, and almonds (a produce of Syria, but not of Egypt, Gen. xlii. 11); wheat, barley, and various other grains; garlic, leeks, onions, and some other common herbs; mustard, pepper, coriander seed, ginseng, preparations of bees, fish, etc., steeped in wine or vinegar: whey, eggs, salt, wax, and suet (in plasters), gall of fish (Tob. vi. 8, xi. 11), ashes, cudging, etc.: fasting salt, urine, bat's blood, and the following rarer herbs, etc., ἀναμμίλων, muñeca, salmen, mandragora, Laurus, spinis, etc., (Arab. ἀλαμβάνων, juniper, broom, poppy, acacia, pine, lavender or rosemary, clover-root, jujup, hyssop, fern, stramonium, milk-thistle, laurel, Erem.

In Jer. xxviii. 3 the same word appears, rendered "wheals." In the A. V. "moscin," "frames or swaths," which that gives shape to the work of the potter.

Cf. Tactit. Hist. v. 7, and Orelli's note ad loc.

Cf. Commined by Pliny as a specific for the bite of a serpent (Pint. H. xxiii. 78).

Cf. Pliny gives a fish named igest, the gall of which is supposed to be an antidote (xxvii. 25); Pliny says: "Carbovunii foli creativus sanit et cures omnium superfiae consumit." (N. H. xxviii. 24).

Cf. Comp. Mark viii. 23, John ix. 6; also the mention by Tactit. (Hist. iv. 51) of a request made of Tertullian at Alexandria: Galen (De Nom. Fract.

from Hebron (De Bula. 464). Those, on the con-
trary, who have looseness of the bowels, who are languid, leath their food, are troubled with nausea or bile, should not use it, as neither should the
epileptic. After exhausting exercises in the sun
the bath is commended as the restorative of mois-
ture to the frame (439-453). The four objects
which ancient authorities chiefly proposed to attain
by bathing are — 1, to warm and dry the ele-
ments of the body; 2, to clean the skin; 3, to equalize whatever is abnormal, to rarefy the skin,
and promote evacuations through it; 2, to reduce
a dry to a moist habit; 3 (the cold-bath), to
cool the frame and brace it; 4 (the warm-bath),
a sudorific to expel cold. Exercise before bathing
is recommended, and in the season from April till
November inclusive it is the most conducive to
health; if it be kept up in the other months it
should then be but once a week, and that fasting.
Of natural waters some are nitrous, some saline,
some aluminous, some sulphuraceous, some blu-
minous, some copperish, some ferruginous, and
some compounded of these. Of all the natural
waters the power is, on the whole, desiccant and
calefactive; and they are peculiarly fitted for those
of a humid and cold habit. Phly (H. N. xxxi.)
gives the fullest extant account of the thermal
Soc. i. 71). Avicenna gives precepts for salt and
other mineral baths; the former he recommends
in case of scurvy and itching, as rarefying the skin,
and afterwards condensing it. Water medicated
with alum, natron, sulphur, naphtha, iron, litharge,
vitriol, and vinegar, are also specified by him.
Frothing and putting out, and a caution given
against staying too long in the water (bid. 338-340; comp. Actius, de Bula. iv. 481). A sick
bather should lie quiet, and allow others to rub
and anoint him, and use no strigil (the common instru-
ment for scraping the skin), but a sponge (485).
Maimonides chiefly following Galen, recommends
the bath, especially for phthisis in the aged, as
being a case of dryness with cold habit, and to
a hectic fever patient as being a case of dryness
with hot habit; also in cases of hemiplegical and tertian
fevers, under certain restrictions, and in putrid
fevers, with the caution not to incur shivering.
Bathing is dangerous to those who feel pain in
the liver after eating. He adds cautions regarding
the kind of water, but these relate chiefly to water for
drinking (De Bula. 438, 439). The bath of oil
was formed, according to Galen and Actius, by adding
the fifth part of heated oil to a water-bath. Jose-
phus speaks (B. i. 33, § 5) as though oil had,
in Herod’s case, been used pure.

There were special occasions on which the bath
was ceremonially enjoined, after a leporous eruption
healed, after the conjugal act, or an involuntary
emission, or any gonorrhoeal discharge, after men-
struation, child-bed, or touching a corpse; so for
the priests before and during their times of office
such a duty was prescribed. [BATHS.]

The Pharisians and Essenes aimed at scrupulous strict-
ness of all such rules (Matt. xv. 2; Mark v. 5; Luke xi. 38). River-bathing was common, but
houses soon began to include a bath-room (Lev. xv.
13; 2 K. v. 10; 2 Sam. xi. 2; Susanna, p. 15). Vapor-baths, as among the Romans, were latterly
included in these, as well as hot and cold-bath
apparatus, and the use of perfumes and oils after
quitting it was everywhere diffused (Wunderlar, 2nd
Hilt, ii. B.). The vapor was sometimes sought to
be inhaled, though this was reputed mischievous
against the tubes. It was deemed healthful after a
warm to take also a cold bath (Paul. Egin. ed.
Sydenh. Soc. i. 68). The Talmud has it — "Whoso
takes a warm-bath, and does not also drink there-
upon some warm water, is like a stove; often only from
without, but not heated also from within. Whoso
bathes and does not withal anoint is like the liquor
outside a vat. Whoso having had a warm-bath
does not also immediately pour cold water over
him, is like an iron made to glow in the fire, but
not thereafter hardened in the water." This suc-
cession of cold water to hot vapor is commonly
practiced in Russian and Polish baths, and is said
to contribute much to robust health (Wunderlär, ibid.).

Besides the usual authorities on Hebrew antiqui-
ties, Talmudic and modern, Wunderlar (Lett.
Hilt, pp. 57-60) has compiled a collection of
writers on the special subject of Scriptural etc.
medicine, including its psychological and botanical
aspects, as also its political relations: a distinct
section of thirteen monographs treats of the leprosy;
and every various disease mentioned in Scripture
appears elaborated in one or more such short trea-
tises. These out of the whole number which appear
must generally present external, to judge from references
made to them, are the following: —

MEIDA (Megiddo): [Vat. Δέμδα: Add. Med-
éda: Merdoh]: MEHIDA (1 Esdr. v. 32).

MEGIDDO (Megiddo): in Zech. xii. 11, Ἔγγα-
[perb. place of troops, Gev.]: in the LXX. [gen-
rrally] Megiddo, or Megiddon, [but with a num-
er of unimportant variations]: in I K. ix. 15 it is
Megiddo: [Megiddah]. This was a very marked posi-
tion on the southern rim of the plain of ESRAI-
LAN, on the frontier line (speaking generally) of
the territories of the tribes of Issachar and MA-
NASSAU, and commanding one of these passes from
the north into the hill-country which were of such
considerable importance on various occasions in the
history of Judah (τας αγαθιας τος ωρεις, τη
δι αυτων ἐν α κονδοσ ει τη θουανα, Judith
v. 21).

Megiddo is usually spoken of in connection with
TANACH, and frequently in connection with
BETHSEAN and JEZREEL. This combination sug-
gests a wide view alike over Jewish scenery and
Jewish history. The first mention occurs in Josh.
xii. 21, where Megiddo appears as the city of one
of the thirty and one kings," or petty chieftains,
whom Joshua defeated on the west of the Jordan.
This was one of the places within the limits of
Issachar assigned to Manasseh (Josh. xvi. 11; I
Chr. vii. 29). But the arrangement gave only an
imperfect advantage to the latter tribe, for they
didn't drive out the Canaanites, and were only
able to make them tributary (Judg. i. 27, 28). The
song of Deborah brings the
place vividly before us, as the scene of the great
conflict between Sisera and Barak. The chariots
of Sisera were gathered unto the river ["torrent"]
of KISSTON" (Judg. iv. 13); Barak went down
with his men "from Mount Tabor" into the plain
(iv. 14); then they fought the kings of Canaan in
Tanachh by the waters of Megiddo (v. 19). The
course of the Kishon is immediately in front of
this position; and the river seems to have
been flooded by a storm; hence what follows. "The river
["torrent"] of Kishon swept away, that ancient
river, the river Kishon" (v. 21). Still we do not
read of Megiddo being firmly in the occupation of
the Israelites, and perhaps it was not really so till
the latter part of Solomon's reign. That monarch placed
one of his twelve commissariat officers, named Imnu,
over "Tanachh and Megiddo," with the neigh-
borhood of Beth-shean and Jerzech (1 K. iv. 12).
In this reign it appears that some costly works were
constructed at Megiddo (ix. 15). These were
probably fortifications, suggested by its important
military position. All the subsequent notices of
the place are connected with military transactions.
To this place Ahaziah fled when his unfortunate
visit to Jerahm took him into collision with Joba;
and here he died (2 K. ii. 27) within the
confines of what is elsewhere called Samaria (2 Chr.
xxii. 9).

But the chief historical interest of Megiddo is
concentrated in Josiah's death. When Pharaoh-
Necho came from Egypt against the King of As-
syria, Josiah joined the latter, and was slain at
Megiddo (2 K. xxii. 29), and his body was carried
from thence to Jerusalem (ib. 30). The story is
told in the Chronicles in more detail (2 Chr.
xxvii. 22-24). There the fatal action is said to have
taken place "in the valley of Megiddo." The
words in the LXX. are, ἐν τῷ πεδίῳ Μηγγίδου:
This cavern made a deep and permanent impres-
sion on the Jews. It is recounted again in 1 Esdr.
i. 25-31, where in the A. V. "the plain of
Megiddo" represents the same Greek words.
The lamentations for this good king became "an ord-
nance in Israel" (2 Chr. xxxv. 25). "In all Jewry" they mourned for him, and the lamenta-
tions were made perpetual in "all the nation of
Israel" (1 Esdr. i. 32). Their grief was no hand-
lath of present passion, but a constant channel of
continued sorrow, streaming from an annual foun-
tain "(Fuller's "Pleas of Night of Palestine", p. 165).
Thus, in the language of the prophets (Zech. xii.
11), "the mourning of Hadachrimmon in the valley
of the Son of the Libation Society's publications; Mr. R. Rum-
sey of Chelsea, and Mr. J. Cooper Forster of Guy's
Hospital, London, for their kindness in revising and
correcting this article, and that on Leucopeny, in their
passage through the press; at the same time that he
does not wish to impose any responsibility on their part
for the opinions or statements contained in them, save
so far as they are referred to by name. Dr. Robert
Smith has also greatly assisted him with the results of
large actual experience in oriental pathology.
MEGIDDO

The (pāqel, LXX.) of Megiddo "becomes a poetical expression for the deepest and most despairing grief; as in the Apocalypse (Rev. xvi. 16) Amen-
cad son. in continuation of the same imagery, is presented as the scene of terrible and final conflict. For the Septuagintal version of this passage of Zechariah we may refer to Jerome's note on the passage. "Adiabrennon, pro quo LXX. translation "Pōsos, urch is justx Jersene, quae holar olim vocabio muncupata est, et hodie vocatur Maximum, or Mageddon."

1 Moreover the prophet's imagery is drawn from the occasion of Josiah's death there can be no doubt. In Stanley's S. of P. (p. 347) this calamitous event is made very vivid to us by an allusion to the "Egyptian archers, in their long array, so well known from their sculptured monuments."

For the mistake in the account of Pharaoh-Necho's campaign in Herodotus, who has evidently put Megiddo by mistake for Megiddo (ii. 149), it is enough to refer to Bähr's excursus on the passage. The Egyptian king may have landed his troops at Acre; but it is far more likely that he marched northwards along the coast-plain, and then turned round Carmel into the plain of Esdraelon, taking the left bank of the Kishon, and that there the Jewish king came upon him by the gorge of Megiddo.

The sites thus associated with critical passages of Jewish history from Joshua to Josiah have been identified beyond any reasonable doubt. Robinson did not visit this corner of the plain on his first journey, but he was brought confidently to the conclusion that Megiddo was the modern el-Lajjun, which is undoubtedly the Lejo of Eusebius and Jerome, an important and well-known place in their day, since they assume it as a central point from which to mark the position of several other places in this quarter (Bib. Rev. ii. 328-339).

Two of the distances are given: 15 miles from Nazareth and 4 from Tanneh. There can be no doubt that the identification is substantially correct.

The μέγας πέτοιον Αγερώνυς (Onomast. s. v. Λεξαρθόω) evidently corresponds with the "plain (or valley) of Megiddo" of the O.T. Moreover el-Lajjun is on the caravan-route from Egypt to Damascus, and traces of a Roman road are found near the village. Van de Velde visited the spot in 1852, approaching it through the hills from the S. W. He describes the view of the plain as seen from the highest point between it and the sea; and the huge θέλα which mark the positions of the "key-fortresses" of the hills and the plain. Tanuk and el-Lajjun, the latter being the most considerable, and having another called Tell Metz

zella, half an hour to the N. W. (Syr. s. Pahl. i. 350-356). About a month later in the same year Dr. Robinson was there, and convinced himself of the correctness of his former opinion. He too describes the view over the plain, northwards to the wooded hills of Galilee, eastwards to Jezreel, and southwards to Tanneh, Tell Metzella being also mentioned as on a projecting portion of the hills which are continuous with Carmel, the Kishon being just below (Bib. Rev. ii. 116-119). Both writers mention a copious stream flowing down this gorge (March and April), and turning some mills before joining the Kishon. Here are probably the waters of Megiddo," of Judg. v. 19, though it should be added that by Professor Stanley (S. of P. p. 339) they are supposed rather to be the pools in the best of the Kishon" itself. The same author regards the "plain (or valley) of Megiddo" as denoting not the whole of the Esdraelon level, but that broadest part of it which is immediately opposite the place we are describing (pp. 335, 336). The passage quoted above from Jerome suggests a further question, namely, whether Von Ranier's identification of "the pools in the best of the Kishon" with the Eusebian, or Jerusalem, which the Jerusalem Itinerary places at 20 miles from Caesarea and 10 from Jeracel. Van de Velde (Memoir, p. 333) holds this view to be correct. He thinks he has found the true Hadadrinmon in a place called Rammoneh, "at the foot of the Megiddo-hills, in a notch or valley about an hour and a half S. of Tell Metzella," and would place the old fortified Megiddo on this tell itself, suggesting further that its name, "the tell of the Governor," may possibly retain a reminiscence of Solomon's officer, Bana, the son of Abihud.

J. S. H.

MEGIDDON, THE VALLEY OF

[περιοχή Μεγίδδου] (plain of Megiddo rather than valley); πέτοιον Μέγιδδου, compus: Megiddo]. The extended form of the preceding name it occurs only in Zech. xii. 11. In two other cases the LXX. [Vat.] retain the n at the end of the name, namely, 2 K. ix. 27, and 2 Chr. xxxvi. 22 [Vat. Mayeran= Mayeran, but Rom. Alex. in both places Mayered]. This, though it is not their general custom. In this passage it will be observed that they have translated the word by G.

MEHETABEL [4 syl.] [םאהל ב] (God (El) a benefactor, First: [Vat.] Mayeran= Alex. Mayerand]; [Vat. Mayeran= F. A. Mayeran=] Metetabel). Another and less correct form of Mehetabel. The ancestor of Shemiram the prophet who was hired against Nehemiah by Tobiah and Sanballat (Neh. vi. 10). He was probably of priestly descent; and it is not unlikely that Dehiah, who is called his son, is the same as the head of the 25th course of priests in the reign of David (1 Chr. xxiv. 18).

MEHETABEL [םאהל] [see above]. Samaritan Cod. [Meretebah: Meretabjah: Metabel]. The daughter of Matred, and wife of Hadad, or Hadar, the eighth and last-mentioned king of Edom, who had Pau or Pau for his birthplace or chief city, before royalty was established among the Israelites (I. Chron. xxxvi. 39). Jerome (de Nomin. Hebri.) writes the name in the form Metabel, which he renders "quum bonus est Deus."

MEHEDA [סאהד] [one famous, noble] in Ezr. Moadeth: [Comp. Medath]. Alex. Meodeh. In Neh. Mideh: [Vat. F. A.]. Alex. Medos: Mokhte, a family of Nethinim, the descendants of Mehida, returned from the Babylonian captivity (Ezr. ii. 52; Neh. vii. 54). In 1 Esdr. the name occurs in the form Mehera.

MEHIR [םאהר] [price, ransom]: Mayer: [Vat.]. Alex. Mayor= Mohir], the son of Chehab, the brother of Sinah, or as he is described in the modern remains of the ancient Legio (Bibl. Sac. 1843, p. 77: Ritter's Geography of Pal., Gage's translation, iv. 330).
the LXX., "Caleb the father of Asela" (1 Chr. iv. 11). In the Targum of L. Joseph, Mehir appears as "Merug," its Chaldean equivalent, both words signifying a price.

MEHOLATHITE, THE

{[patronym.]: Alex. o μωρολαθιτής [Rome: Vat. omitt; [Comp. Abh. Μαλολάθιται] «Mel adulterator, a word considered only once in Matt. iv. 1, as the description of Adriel, son of Barzillai, to whom Saul's daughter Merab was married. It no doubt denotes that he belonged to a place called Meloth, but whether that was Abel-Melaheth afterwards the native place of Elisham, or another, is as uncertain as it is whether Adriel's father was the well-known Barzillai the Gileadite or not.} G.

MEHU'JANIEL (םִּהוּזְיַנְיָאִל) and MEHU'JANI (םִּהוּזְיַנְיָי) (prov. smitten of God) [Comp. Abh. Μαλαλατεία] Alex. MA'NEI: "Melahiel," the son of Eled, the son of Ithar, and fourth in descent from Cain (Gen. iv. 18). Ewald, regarding the genealogy as in Gen. iv. and v. as substantially the same, follows the Vat. LXX., considering Melahunel as the true reading, and the variation from it the result of careless transcription. It is scarcely necessary to say that this is a gratuitous assumption. The Targum of Onkelos follows the Hebrew even in the various forms which the name assumes in the same verse. The Peshito-Syrac. Vulgate, and a few MSS. retain the former of the two readings; while the Sanh. text reads מֶלְעַנְיָאִל, which appears to have been followed by the Aldine and Complutensian editions, and the Alex. Ms. W. A. W.

MEHU'MAN (םִּהוּזְמוּנָא) [perh. true, faithful] "'Ama: Melmunan," one of the seven eunuchs (A. V. "chamberlains,") who served before Ahaz. (2 Kings i. 10). The LXX. appear to have read מָלְעַמְוָנָא for מֶלְעַנְיָאִל.

MEHU'NIM (םִּהוּזְניָאִים) without the article [inhabitants, dwellers: Vat.] MA'NIVU: [Rome: Μαυνιοι.] Alex. MA'NIVEU: "Munim"; Ex. xx. 59. Elsewhere called MEHU'NIM and MEHU'NIM; and in the parallel list of 1 Esdr. MA'NIVU.

MEHU'NIMS, THE (םִּהוּזְנְיָאִים, i. e. the ME'NIM [Vat.]; on Μαυνίους [Rome]. Alex. of MOEA: "Ammonites") a people against whom king Uzziah waged a successful war (2 Chr. xxvi. 7). Although so different in its English a dress, yet the name is in the original merely the plural of MA'NIVU (םִּהוּזְניָא), a nation named amongst those who in the earlier days of their settlement in Palæstine harassed and oppressed Israel. Moan, or the Mo'ni's, probably inhabited the country at the back of the great range of Seir, the modern Toha-Norah, which forms the eastern side of the Wady el Arath, where at the present day there is still a town of the same name (Birkhardt, Syria, Aug. 24.) And this is quite in accordance with the terms of 2 Chr. xxvi. 7, where the Mehumim are mentioned with the Arabians of Gur-both, or, as the LXX. render it, Gar-both.

Another notice of the Mehumim in the reign of Hezekiah (cir. n. c. 726-697) is found in 1 Chr. iv. 41: Here they are spoken of as a pastoral people, either themselves Hamites or in alliance with Hamites, quiet and peaceful, dwelling in tents. They had been settled from "of old," i.e. aboriginally, at the east end of the Valley of Gedor or Gerar, in the wilderness south of Palestine. A connection with Mount Seir is hinted at, though obscurely (ver. 42.) [See vol. i. p. 879 b.] Here, however, the A. V. — probably following the translations of Luther and Junius, which in their turn follow the Targum — treats the word as an ordinary noun, and renders it "habitations;" a reading now relinquished by scholars, who understand these to refer to the people in question (Gesenius, Thes. 1002 s., and Notes on Birkhardt, 1069; Belletrum, Chronicle).

A third notice of the Mehumim, corroborative of those already mentioned, is found in the narrative of 2 Chr. xx. There is every reason to believe that in ver. 1 "the Ammonites" should be read as "the Mo'ni's," who in that case are the men of "Ammonite" mentioned later in the narrative (vv. 19, 22).

In all these passages, including the last, the LXX. render the name by oi Mevonai, — the Mi'naeans, a nation of Arabia renowned for their traffic in spices, who are named by Strabo, Ptol. and other ancient geographers, and whose seat is now ascertained to have been the S. W. portion of the great Arabian peninsula, the western half of the modern Hadramaut (Dict. of Geography, "Minae".) Bochart has pointed out (Phileg. ii. cap. xxii.), with reason, that distance alone renders it impossible that these Mechinaeans can be the Mehumim of the Bible, and also that the people of the Arabian peninsula are Shemites, while the Mehumim appear to have been descended from Han (1 Chr. iv. 41). But with his usual turn for etymological speculation he endeavors nevertheless to establish an identity between the two, on the ground that Carn al-Muna'i is a place two days' journey south of Mecca, one of the towns not so violent as it looks to an English reader. It is a simple transposition of two letters, יְמִּו for יְמִּו, and it is supported by the LXX., and by Josephus (Ant. i. 1, § 2, 4, Apol.; and by modern scholars, as De Wette (Bibl.), Ewald (Gesch. i. 474. note). A reverse transposition will be found in the Syriac version of Judg. x. 12, where "Ammon" is read for the "Maon" of the Hebrew. The LXX. make the change again in 2 Chr. xxxvi. 8; but here there is no apparent occasion for it.

The Jewish gloss on 2 Chr. xx. 1 is curious. "By Ammonites Elyonites are meant, who, in spite of respect for the fraternal relation between the two nations would not come against Israel in their own dress, but disguised themselves as Ammonites." (Jerome, Quast. Hist. ad loc.)
of the Minaeans, signifies the "horn of habitations," and might therefore be equivalent to the Hebrew Meunim.

Josephus (Ant. ix. 10, § 3) calls them "the Arabs who adjourned Egypt," and speaks of a city built by Uzziah on the Red Sea to overaw them.

Ewald (Geschichte, i. 323, note) suggests that the southern Minaeans were a colony from the Maonites and Mount Seir, in whose turn he appears to consider a remnant of the Amorites (see the text of the same page).

That the Minaeans were familiar to the translators of the LXX. is evident from the fact that they not only introduce the name on the occasions already mentioned, but that they further use it as equivalent to Naamathite. Zophar the Naamathite, one of the three friends of Job, is by them presented as "Sopher the Minaean," and "Sopher king of the Minaeans." In this connection it is not unworthy of notice that as there was a town called Maon in the mountain-territory of Judah, so there was one called Naamah in the lowland of the same tribe. El-Minieh, which is, or was, the first station south of Gaza, is probably identical with Minos, a place mentioned with distinction in the Christian records of Palestine in the 5th and 6th centuries (Nehuel, Palestinian, p. 699; Le Quien, Oriental Christ., iii. 609), and both may retain a trace of the Minaeans. Baal-Meon, a town on the east of Jordan, near Heshbon, called Melin in, probably also retains a trace of the presence of the Maonites or Menehun north of their proper locality.

The latest appearance of the name Menehunims in the Bible is in the lists of those who returned from the Captivity with Zerubbabel. Amongst the non-Israelites from whom the Nehuchim — following the precedent of what seems to have been the foundation of the ex order — were made up, we find their name (Ezr. ii. 50, A. V. "Menehun," Neh. vii. 52, A. V. "Meneun"). Here they are mentioned with the Nephishim, or descendants of Napish, an Ishmaelite people whose seat appears to have been on the east of Palestine (1 Chr. xix. 18), and therefore certainly not so distant from Maon in the chief city of the Maonites.

ME-JAR'KON (מֵי-גָּרָקְו; see below: δικαστήριον Ιεριγκόν; Arm. Jeron) [Vulg. Jericho; a town in the territory of Gibea (Josh. xix. 46 only); named next in order to Cath-rinon, and in the neighborhood of Joppa or Japho. The lexicographers interpret the name as meaning "the yellow water." No attempt has been made to identify it with any existing site. It is difficult not to suspect that the name following that of Mejaharmon, har-Rakkon (A. V. Rakkon), is a mere corrupt repetition thereof, as the two bear a very close similarity to each other, and occur nowhere else.

MELOCHISON (Mēλόχίσον; [place, base: LXX. [Rom. Vat. Alex. FA.] omits; [FA.] Μηλικίου; Mēlihs), a Gibeonite, who, with the men of Gibeon and Mizpah, assisted in rebuilding the wall of Jeru salam under Nehemiah (Neh. iii. 7).

MELECHI (Mēλεχί) in [Sin.] Vat. and Alex. MSS.: Mēλχי, Tisch. [In 2d ed., but Mēλεχι in 7th and 8th eds.: Melchi]. 1. The son of Jamina, and ancestor of Joseph in the genealogy of Jesus Christ (Luke iii. 24). In the list given by Africanus, Melchi appears as the father of Heloi, the intervening Levi and Mattha being omitted (Herv. General, p. 137).

2. The son of Addi in the same genealogy (Luke iii. 28).

MELECHIAH (Mēλεχια; [Jehovih's king]: Mēλχια; Mēlchis, a priest, the father of Pashur (Jer. xxi. 1). He is elsewhere called Melchiah and Melchijah. (See Malchiah 7, and Malchiah 1.)

3. [Vat. Mēλχίας; Mēlchis]. The same as Malchiah 3 (1 Esdr. ix. 44).

MELCHIEL (Vat. Mēλχιελ; [Rom. Alex. Sin:s, Mēλχιά: Sin: Μηληλίας]). Chiram, the son of Melchid, was one of the three governors of Bethulia (Jud. vi. 15). The Vulgate has a different reading, and the Peshito gives the name Monshejel.

MELCHISDEDEC (Mēλχισδέκ; [Melchis-delec], the form of the name Melchisedek adopted in the A. V. of the New Testament (Heb. vi., vii.).

Capsh by K, which they usually reserve for the Koph.

Other instances are Kithian and Kitto.

c This passage of Jerome is one of those which completely startle the reader, and incline him to mistrust altogether Jerome's knowledge of sacred topography.

He actually places the Beth-nashach, in which Jah besieged Sheba, the son of Bichri, and which was one of the first places taken by Tiglath-Pileser on his entrance into the north of Palestine, among the mountains of Judah, south of Jerusalem! A mistake of the same kind is found in Benjamin of Tudela and Hip-Parnel, who place the passing of David's adventure in the neighborhood of Mount Carmel.

a The institution of the Nehuchim, i. e. "the given ones," seems to have originated in the Midianite war (Num. xxxi.), when a certain portion of the captives was "given" (the word in the original is the same) to the Levites who kept the charge of the Sacred Tent (vv. 30, 47). The Gibeonites were probably the next reception, and the invaluable lists of Ezra and Nehu niah alluded to above seem to show that the captives from many a foreign nation went to swell the numbers of the Order. See Menehun, Nephishin, Harshin, Sixem, and other foreign names contained in these data.

b Our translators have here represented the Hebrew
MELCHI-SHUA

MELCHI-SHUA (מֶלְחִי-שֻׁם) i. e. Melchishua; [Melchü's: Val.] Melchisedek: Alex.
Melchizedek (Melchisëk, Melchizedek, Melchizedek), king of Salem and priest of the Most
High God, who met Abram in the Valley of Shaveh (or, the level valley), which is the king's valley, brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18-20). The other places in which Melchizedek is mentioned are Ps. cxv. 4, where Messiah is described as a priest for ever, "after the order of Melchizedek," and Heb. vi. vi. viii., where these two passages of the O. T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great
length.

There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent references to him. Bearing a title which Jews in after-ages would recognize as designating their own sovereign, bearing gifts which remind to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is unhesitatingly recognized as a person of higher spiritual rank than the friend of God. Disappearing as suddenly as he came in, he is lost to the sacred writings for a thousand years: and then a few enigmatic words for another moment bring him back in sight as a type of the coming Lord of David. Once more, after another thousand years, the Hebrew Christians are taught to see in him a proof that it was the consistent purpose of God to abolish the Levitical priesthood. His person, his office, his relation to Christ, and the seat of his sovereignty, have given rise to innumerable discussions, which even now can scarcely be considered as settled.

The faith of early ages ventured to invest his person with superhuman awe. Perhaps it would be too much to ascribe to mere national jealousy the fact that Jewish tradition, as recorded in the Targums of Pseudo-Jonathan and Jerusalem, and in Rashi on Gen. xiv., in some cabalistic (apud Bochart, Philog. pt. 1. b. ii. 1. § 69) and rabbinical (ap. Schöttgen, Heb. Heb. ii. 914) writers, pronounces Melchizedek to be a survivor of the Deluge, the patriarch Shem, authorized by the superior dignity of old age to bless even the father of the faithfull, and entitled, as the paramount lord of Canaan (Gen. ix. 26) to convey (xii. 19) his right to Abram. Jerome in his Ep. liii. of Eusebius (Opp. i. 481), which is entirely devoted to a consideration of the person and divine rights of Melchizedek, states that this was the prevailing opinion of the Jews in his time; and it is ascribed to the Samaritans by Euphrasius, Her. iv. 6. p. 472. It was afterwards embraced by Luther and Melanchthon, by our own Reformers, H. Braungton, Selden, Lightfoot (Theor. h. Rerum postm. ch. a. 1. § 21), Jackson (On the Creed. b. iv. § 2), and by many others. It should be noted that this supposition does not appear in the Targum of Onkelos, — a presumption that it was not received by the Jews till after the Christian era — nor has found favor with the Fathers. Equally old, per

MELCHIZEDEK

Melchizedek [King of righteousness]; Mel-Chîzëdëk: Mel-chizëdek, king of Salem and priest of the Most
High God, who met Abram in the Valley of Shaveh (or, the level valley), which is the king's valley, brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18-20). The other places in which Melchizedek is mentioned are Ps. cxv. 4, where Messiah is described as a priest for ever, "after the order of Melchizedek," and Heb. vi. vii. viii., where these two passages of the O. T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great
length.

There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent references to him. Bearing a title which Jews in after-ages would recognize as designating their own sovereign, bearing gifts which remind to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is unhesitatingly recognized as a person of higher spiritual rank than the friend of God. Disappearing as suddenly as he came in, he is lost to the sacred writings for a thousand years: and then a few enigmatic words for another moment bring him back in sight as a type of the coming Lord of David. Once more, after another thousand years, the Hebrew Christians are taught to see in him a proof that it was the consistent purpose of God to abolish the Levitical priesthood. His person, his office, his relation to Christ, and the seat of his sovereignty, have given rise to innumerable discussions, which even now can scarcely be considered as settled.

The faith of early ages ventured to invest his person with superhuman awe. Perhaps it would be too much to ascribe to mere national jealousy the fact that Jewish tradition, as recorded in the Targums of Pseudo-Jonathan and Jerusalem, and in Rashi on Gen. xiv., in some cabalistic (apud Bochart, Philog. pt. 1. b. ii. 1. § 69) and rabbinical (ap. Schöttgen, Heb. Heb. ii. 914) writers, pronounces Melchizedek to be a survivor of the Deluge, the patriarch Shem, authorized by the superior dignity of old age to bless even the father of the faithfull, and entitled, as the paramount lord of Canaan (Gen. ix. 26) to convey (xii. 19) his right to Abram. Jerome in his Ep. liii. of Eusebius (Opp. i. 481), which is entirely devoted to a consideration of the person and divine rights of Melchizedek, states that this was the prevailing opinion of the Jews in his time; and it is ascribed to the Samaritans by Euphrasius, Her. iv. 6. p. 472. It was afterwards embraced by Luther and Melanchthon, by our own Reformers, H. Brאungton, Selden, Lightfoot (Theor. h. Rerum postm. ch. a. 1. § 21), Jackson (On the Creed. b. iv. § 2), and by many others. It should be noted that this supposition does not appear in the Targum of Onkelos, — a presumption that it was not received by the Jews till after the Christian era — nor has found favor with the Fathers. Equally old, per

hats, but less widely diffused, is the supposition not unknown to Augustine (Quaest. in Gen. lixii. Opp. iii. 396), and ascribed by Jerome (l. c.) to Pope Damasus, that Melchizedek was a
angel. The Fathers of the fourth and fifth centuries record with reprobation the tenet of the Melchizedekians that he was a Power, Virtue, or Influence
of God (August. de Hærisc, § 34, Opp. viii. 3; Theodoret, Hœtæt. iij. ii. 6, p. 332; Euseb., Epist. Inv. l. iv. p. 488; compare Cyril Alex. Greg. in Gen. ii. 57) superior to Christ (Chrys. Hom. in Melch. Opp. vi. 289), and the not less daring conjecture of Heraclæus and his followers that Melchizedek was the Holy Ghost (Epist. Euseb. arv. 3, p. 711 and l. 5, p. 742). Eusèbius also mentions (Opp. l. 3, p. 132) that Melchizedek was the Son of God appearing in human form, an opinion which ST. Ambrose (De Gen. l. 3, § 3, Opp. i. l. p. 288) seems willing to receive, and which has been adopted by many modern critics. Similar to this was a Jewish opinion that he was the Messiah (apud Deleying, Obs. S. Cosmi. ii. 73; Schöttgen, l. c.; compare the Book Sohar op. Wolf, Caro Phil. in Heb. vii. 1). Modern writers have added to these conjectures that he may have been Ham (Jurieu), or a delegate of God (Melchizedek, or of Shem (apud Deleying, l. c.), or even Enoch (Huber), or Job (Kohlbreis). Other guesses may be found in Deleying (l. c.) and in Pétier (De personæ Melch. — Opp. p. 51). All these opinions are unauthorized additions to Holy Scripture — many of them seem to be irreconcilable with it. It is an essential part of the Apostles' argument (Heb. vii. 6) that Melchizedek is "without father," and that his "pedigree is not counted from the sons of Levi;" so that neither their ancestor Shem, nor any other son of Noah can be identified with Melchizedek; and again, the statements that he fulfilled on earth the offices of Priest and King and that he was "made like unto the son of God" would hardly have been predicated of a Divine Person. The way in which he is mentioned in Genesis would rather lead to the immediate inference that Melchizedek was of one blood with the children of Ham, among whom he lived, chief (like the King of Sodom) of a settled Canaanite tribe. Perhaps it is not too much to infer from the silence of Philo (Abydœmus, xii. and Onkelos (in Gen.) as to any other opinion, that they held this. It certainly was the opinion of Josephus (B. J. viii. 18), of most of the Early Fathers (apud Jerome, l. c.), of Theodoret (in Gen. lixiv. p. 77), and Eusèbius (Her. l. xii. p. 719), and is now generally received (see Grotius in Heb. ; Patrick's Commentary in Gen.; Bloek, Hebœv. iii. 343; Bede, Hebœv.; Fairbairn, Targum. iii. 313, ed. 1854). And as Balaam was a prophet, so Melchizedek was a priest among the corrupted Jews of their own times, and that of the contemporary kings of Canaan; but the enigmatic words in which he is described, by a title never given even to Abram, as a "priest of the most High God," as blessing Abraham and receiving tithes from him, seem to imply that his priesthood

MELCHIZEDEK

was something more (see Hengstenberg, Christol., Ps. cx.) than an ordinary patriarchal priesthood, such as Abram himself and other heads of families (Job i. 5) exercised. And although it has been observed (Pearson, On the Creed, p. 122, ed. 1843) that we read of no other sacrificial act performed by Melchizedek, but only that of blessing [and receiving titles, Pfeiffer], yet it may be assumed that he was accustomed to discharge all the ordinary duties of those who are "consigned to offer gifts and sacrifices;" Heb. viii. 31; and we might conceive (as Fabricius, l. c.) that in his time, when his regal hospitality to Abram was possibly preceded by an unrecorded sacrificial act of devotion to God, without implying that his hospitality was in itself, as recorded in Genesis, a sacrifice.

The "order of Melchizedek," in Ps. cx. 4, is explained by Gesenius and Rosenmüller to mean "manner" or likeness in official dignity = a king and priest. The relation between Melchizedek and Christ as type and antitype is made in the Ep. to the Hebrews to consist in the following particulars.

Each was a priest, (1) not of the Levitical tribe; (2) superior to Abraham; (3) whose beginning and end are unknown; (4) who is not only a priest, but also a king of righteousness and peace.

To these points of agreement, noted by the Apostle, human ingenuity has added others, such as his place in Scripture, his station in history, the evidence of either an inspired writer or an eye-witness, before they can be received as facts and applied to establish any doctrine. Thus J. Johnson (Unsolved Sacrifices, i. 123, ed. 1847) asserts on very slender evidence, that the Fathers who refer to Gen. xiv. 18, understood that Melchizedek offered the bread and wine to God; and hence he infers that one great part of our Saviour's Melchizedekian priesthood consisted in offering bread and wine. And Bellarmine asks in what other respects is Christ a priest after the order of Melchizedek.

Waterland, who does not lose sight of the deep significance of Melchizedek's action, has replied to Johnson in his Appendix to "the Christian Sacrifice explained," ch. iii. § 2, Works, v. 163, ed. 1843. Bellarmine's question is sufficiently answered by Whitaker, Disputation on Scripture, Quest. ii. ch. x. 168, ed. 1849. And the sense of the Fathers, who sometimes expressed themselves in rhetorical language, is cleared from misinterpretation by Bp. Jewel, Reply to Harding, art. xvii. (Works, ii. 731, ed. 1847). In Jackson on the Creed, bk. ix. § 2, ch. vii.-xi. 959 ft., there is a lengthy but valuable account of the priesthood of Melchizedek; and the views of two different theological schools are ably stated by Aquinas, Summa iii. 22, § 6, and Turriziani, Theologii, vol. ii. p. 449-453.

Another fruitful source of discussion has been found in the site of Salem and Shaveh, which certainly lay in Abraham's road from Hohah to the plain of Mamre, and which are assumed to be near to each other. The various theories may be briefly enumerated as follows: (1) Salem is supposed to have occupied in Abraham's time the ground on which afterwards Jesus and then Jerusalem stood; and Shaveh to be the valley east of Jerusalem through which the Kidron flows. This opinion, abandoned by Iceland, Pal. 833, but adopted by Winer, is supported by the facts that Jerusalem is called Salem in Ps. lxvii. 2, and that Josephus (Ant. viii. 10, § 5) says that the pillars which were their identity: that the king's date (2 Sam. xviii. 18), identified in Gen. xiv. 17 with Shaveh, is placed by Josephus (Ant., vii. 10, § 3), and by medieval and modern tradition (see Ewald, Gesch. iii. 230) in the immediate neighborhood of Jerusalem, as Melchizedek (Josh. x. 1), sounds like that of a legitimate successor of Melchizedek: and that Jewish writers (op. Schöttgen, Hebr. Heb. in Heb. vii. 2) claim Zedek = righteousness, as a name of Jerusalem.

(2) Jerome (Opp. i. 446) denies that Salem is Jerusalem, and asserts that it is identified with a town near Jericho or Bethshan, which was the site of a later Jerusalem, and in which some extensive ruins were shown as the remains of Melchizedek's palace. He supports this view by quoting (Gen. xxxiii. 18, where, however, the translation is questioned (as instead of Salem the word may signify "safe"); compare the mention of Salem in Judith iv. 4, and in John iii. 29. (3) Professor Stanley (28° of P. pp. 257, 258) is of opinion that there is every probability that Mount Gerizim is the place where Melchizedek, the priest of the Most High, met Abram. Eupolemus (ap. Euseb. Prep. Evang. ix. 17), in a confused version of this story, names Argerizim, the mount of the Most High, as the place in which Abram was hospitably entertained. (4) Ewald (Gesch. iii. 230) denies positively that it is Jerusalem, and says that it must be sought in the vicinity of Jerusalem, which, according to Jordan (i. 410); an opinion which Eiger (Gesen. Thesaurus, 1422 b) condemns. There too Professor Stanley thinks that the king's date was situated, near the spot where Abraham fell.

Some Jewish writers have held the opinion that Melchizedek was the writer and Abram the subject of Ps. cx. See Deling. Obs. Sacr. iii. 137.

It may suffice to mention that there is a fabulous life of Melchizedek printed among the spurious works of Athanasius, vol. iv. p. 189.

Reference may be made to the following works in addition to those already mentioned: two tracts on Melchizedek by M. J. H. von Elsaick, in the Theologia Nova Theobul-philologicae; L. Borgia, Historiarum Civitatis Melchizideci, 1706; Galliard, Melchizidecs Chrisnus, etc., 1850; M. C. Hoffman, De Melchizideco, 1851; Hess, Melchizedek, 1858; and Stanley, Treatise of Melchizedek, 1891. See also J. A. Fabricius, Cod. Psalmspiap. V. T.; P. Molinensis, Vates, etc., 1640. iv. 11; J. H. Heidelberger, Hist. Sacr. Patriarchorum, 1761, i. 288; Hottinger, Ewem. Dlsg. z. P. Cumnus, De Replub. Heb. iii. 3, apud Crit. Sacr. v. 7.

W. T. B.

MELÉA (Μέλα, [Tisch. Melaé]: Melo). The son of Menan, and ancestor of Joseph in the genealogy of Jesus Christ (Luke iii. 31).

MELÉCH (Μέλεχ; = king: in 1 Chr. xvii. 1-5, Μέλεχ: [Vat. Μεληχα]: Alex. Melech; in 1 Chr. xxi. 41, Μέλεχ: Alex. Melech: Melench). The second son of Mieach, the son of Merib-baal or Mephibosheth, and therefore great-grandson of Jonathan the son of Saul.

MELÈCIO (Μελέιος; Ker. Melêiôs, Aulacôios: [Vat.] Alex. Melichio: Melichio). The same as Mallicko (Neh. xi. 14; comp. vers. 2).

MELÉTTA (Μελέτη; [Whet.]): Acts xxviii. i., the modern Mdta. This island has an illustrious place in Scripture, as the scene of that shipwreck of St. Paul, which is described on the other side of detail in the Acts of the Apostles. An attempt has been made, more than once, to connect this
occurrence with another island, bearing the same name, in the Gulf of Venice; and our best course here seems to be to give briefly the points of evidence by which the true state of the case has been established.

(1.) We take St. Paul's ship in the condition in which we find her about a day after leaving Fair Havens, i.e., when she was under the lee of Cladia (Acts xxvii. 16), laid-to on the starboard tack, and strengthened with "underkickers" [Ship], the boat being just taken on board, and the gale blowing hard from the E. N. E. [Easterly.] (2.) Assuming (what every practical sailor would allow) that the ship's direction of drift would be about W. by N., and her rate of drift about a mile and a half an hour, we come at once to the conclusion, by measuring the distance on the chart, that she would be brought to the coast of Malta on the thirteenth day (see ver. 27). (3.) A ship drifting in this direction to the place traditionally known as St. Paul's Bay would come to that spot on the coast without touching any other part of the island previously. The coast, in fact, trends from this bay to the S. E. This may be seen on consulting any map or chart of Malta. (4.) On Knout Point, which is the southeasterly extremity of the bay, there must infallibly have been breakers, with the wind blowing from the N. E. Now the alarm was certainly caused by breakers, for it took place in the night (ver. 27), and it does not appear that the passengers were at first aware of the danger which became sensible to the quick ear of the "sailors." (5.) Yet the vessel did not strike; and this corresponds with the position of the point, which would be some little distance on the port side, or to the left, of the vessel. (6.) Off this point of the coast the soundings are 29 fathoms (ver. 28), and a little farther, in the direction of the supposed drift, they are 15 fathoms (ib.). (7.) Though the danger was imminent, we shall find from examining the chart that there would still be time to anchor (ver. 29) before striking on the rocks ahead. (8.) With hard holding ground there would have been great risk of the ship dragging her anchors. But the bottom of St. Paul's Bay is remarkably tenacious. In Purdy's Sailing Directions (p. 130) it is said of it that "while the cables hold there is no danger, as the anchors will never start." (9.) The other geological characteristics of the place are in harmony with the narrative, which describes the creek as having in one place a sandy or muddy beach (Chlorus, Kauara aq'ana, ver. 29), and which states that the bow of the ship was held fast in the shore while the stern was exposed to the action of the waves (ver. 41). For particulars we must refer to the work (mentioned below) of Mr. Smith, an accomplished geologist. (10.) Another point of local detail is of considerable interest — namely, that as the ship took the ground, the place was observed to be desolate, &c., a concomitant was noticed between two apparently separate pieces of water. We shall see, on looking at the chart, that this would be the case. The small island of Salamis would at first appear to be a part of Malta itself; but the passage would open on the right as the vessel passed to the place of shipwreck. (11.) Malta is in the track of ships between Alexandria and Ceuta; and this corresponds with the fact that the Castor and Pollux, an Alexandrian vessel which ultimately conveyed St. Paul to Italy, had wintered in the island (Acts xxviii. 11). (12.) The case is established to demonstration. Still it may be worth while to notice one or two objections. It is said, in reference to xxvii. 27, that the wreck took place in the Adriatic, or Gulf of Venice. It is urged that a well-known island like Malta would not have been unrecognized (xxviii. 39), nor its inhabitants called "barbarous" (xxviii. 2). [BURMAH, Amer. ed.] And as regards the occurrence recorded in xxviii. 3, stress is laid on the facts that Malta has no poisonous serpents, and hardly any wood. To these objections we reply at once that Malta, in the language of the period, denotes not the Gulf of Venice, but the open sea between Crete and Sicily; that it is no wonder if the sailors did not recognize a strange part of the coast on which they were thrown in stormy weather, and that they did recognize the place when they
MELITA

1879

did leave the ship (xxviii. 1)"; that the kindness recorded of the natives (xxviii. 2, 10) shows they were not "barbarians" in the sense of being savages, and that the word denotes simply that they did not speak Greek; and lastly, that the population of Melita has increased in an extraordinary manner in recent times, that probably there was abundant wood there formerly, and that with the destruction of the wood many indigenous animals would disappear.6

In adding positive arguments and answering objections, we have indirectly proved that Melita in the Gulf of Venice was not the scene of the shipwreck. But we may add that this island could not have been reached without a miracle under the circumstances of weather described in the narrative; that it is not in the track between Alexandria and Puteoli; that it would not be natural to proceed from it to Rome by means of a voyage enunciating Syracuse; and that the soundings on its shore do not agree with what is recorded in the Acts.

An amusing passage in Coleridge's "Table Talk" (p. 185) is worth noticing as the last echo of what is now an extinct controversy. The question has been set at rest forever by Mr. Smith of Jordan Hill, in his "Voyage and Shipwreck of St. Paul," the first published work in which it was thoroughly investigated from a sailor's point of view. It had, however, been previously treated in the same manner, and with the same results, by Admiral Penrose, and copious notes from his MSS. are given in "The Life and Epistles of St. Paul." In that work (2d ed. p. 426 note) are given the names of some of those who carried on the controversy in the last century. The ring-leader on the Adriatic side of the question, not unnaturally was Padre Georgi, a

Benedictine monk connected with the Venetian or Austrian Melitana, and his "Pauius Nonfragana" is extremely curious. He was, however, not the first to suggest this untenable view. We find it, at a much earlier period, in a Byzantine writer, Const. Porphyrog. "De Aed. Imp." (c. 30, v. iii. p. 164 of the Bonn ed.).

As regards the condition of the island of Melita, when St. Paul was there, it was a dependency of the Roman province of Sicily. Its chief officer

under the governor of Sicily) appears from inscriptions to have had the title of πρωτος Μελιτανος, or Priorus Melitenanus, and this is the very phrase which St. Luke uses (xxviii. 7). [PUBLIUS.] Mr. Smith could not find these inscriptions. There seems, however, no reason whatever to doubt their authenticity (see Rohrert, "Opera," i. 502; Abba, "Descrip. Melita," p. 146, appended to the last volume of the "Antiquities of Græcinus"; and Beeckh, "Corp. Insc." vol. iii. 5754). Melita, from its position in

and precept. The chapter might seem merely intended to give us information concerning the ships and seafaring of the ancient world; and certainly nothing in the whole range of Greek and Roman literature does teach us so much on these subjects. What if it was divinely ordained that there should be one large passage in the New Testament — one, and just one — that could be minutely tested in the accuracy of its more circumstantial particulars — and that it should have been so tested and attested just at the time when such accuracy is most searchingly questioned?" (Lectures on the Character of St. Paul, Hulsean Lectures for 1864.)

The particulars in which this accuracy of the narrative shows itself are well enumerated in J. R. Oevel's "Paulus in der Apostelschriften," pp. 107-110 (Halle, 1818). Klotzermann: "Pauilicus Lectorum seu de Pauelo in libris Acta romani auctore, Gotting, 1825" argues from internal characteristics that the writer of this Itinerary (Acts xxvii. and xxviii.) must have been an eyewitness, and was the Luke who wrote the other parts of the book. 11
the Mediterranean, and the excellence of its harbors, has always been important both in commerce and war. It was a settlement of the Phenicians at an early period, and their language, in a corrupted form, continued to be spoken there in St. Paul's day. (Geeniurn, Verrach ab. diu mott. Specerde. Leipzig, 1810.) From the Carthaginians it passed to the Romans in the Second Punic War. It was famous for its honey and fruits, for its cotton fabrics, for excellent building-stone, and for a well-known breed of dogs. A few years before St. Paul's visit, consecrated from his native province of Cylicia, made Melita a frequent resort; and through subsequent periods of its history, Vandal and Arabian, it was often associated with piracy. The Christianity, however, introduced by St. Paul was never extinct. This island had a brilliant period under the knights of St. John, and it is associated with the most exciting passages of the struggle between the French and English at the close of the last century and the beginning of the present. No island so small has so great a history, whether Biblical or political. J. S. H.

**MELONS (καλακίς, ab. atticism: πέπως; peplos) are mentioned only in the following verse:**

"We remember the fish, which we did eat in Egypt freshly: the cucumbers, and the melons," etc. (Num. xi. 5); by the Hebrew word we are probably to understand both the melon (Cucumis melo) and the water-melon (Cucurbita cirrhata), for the Arabic noun singular, **batthkh**, which is identical with the Hebrew word, is used generally, as we learn from Prosper Alpinus, who says (Reip. Egypt. Hist. i. 17) of the Egyptians, "they often dine and sup on melons batthkh, while the same word was used with some specific epithet to denote other plants belonging to the order Cucurbitaceae. Though the water-melon is now quite common in Asia, Dr. Royle thinks it doubtful whether it was known to the ancient Egyptians, as no distinct mention of it is made in Greek writers; it is uncertain at what time the Greeks applied the term ὠγεθίασ (ongaria) to the water-melon, but it was probably at a comparatively recent date. The modern Greek word for this fruit is ὠγεθίασ. Galen (de Fac. Aln. ii. 567) speaks of the common melon (Cucumis melo) under the name ἀνάτροφον. Serapion, according to Sprangel (Comment. in Discor. ii. 162), restricts the Arabic batthkh to the water-melon. The water-melon is by some considered to be indigenous to India, from which country it may have been introduced into Egypt in very early times; according to Prosper Alpinus, medical Arabic writers sometimes use the term batthkh-butt, or anguria builtin, to denote this fruit, whose common Arabic name is according to the same authority, batthkh ul-Muni (water); but Hasselquist says (Trav. 250) that this name belongs to a softer variety, the juice of which, when very ripe, and almost putrid, is mixed with rose-water and sugar and given in fevers; he observes that the water-melon is cultivated on the banks of the Nile, on the rich clayey earth after the inundations, from the beginning of May to the end of July, and that it serves the Egyptians for meat, drink, and physic: the fruit, however, he says, should be eaten "with great circumspection, for if it be taken in the heat of the day when the body is warm, bad consequences often ensue." This observation their language to the old Punic, yet it contains nothing which may not far more naturally be explained out of the modern Arabic. The Maltese Arabic is such that travelers in Arabia and Palestine often obtain their guides in Malta.

II. From root datatable, tramp for datatable, (طمان:)

"to cook." Precisely similar is the derivation of **baxm:** from **baxm.** Genelin compares the Spanish **baxmores,** the French **pastiesque,**
no doubt applies only to persons before they have become acclimatized, for the native Egyptians eat the fruit with impunity. The cucumber (Cucumis melo) is cultivated in the same places and ripens at the same time with the water-melon; but the fruit in Egypt is not so delicious as in this country (see Somnini's *Travels*, ii. 328); the poor in Egypt do not eat this melon. "A traveller in the East," says Kitto (note on Num. xii. 5), "who recollects the intense gratitude which a gift of melon inspired while journeying over the hot and dry plains, will readily comprehend the regret with which the Hebrews in the Arabian desert looked back upon the melons of Egypt." The water-melon, which is now extensively cultivated all over India and the tropical parts of Africa and America, and indeed in hot countries generally, is a fruit not unlike the common melon, but the leaves are deeply lobed and gashed, the flesh is pink or white, and contains a large quantity of cold watery juice without much flavor; the seeds are black. The melon is too well known to need description. Both these plants belong to the order Cucurbitaceae, the Cucumber family, which contains about sixty known genera and 300 species — *Cucumis*, *Bryonia*, *Momordica*, *Cucinula*, are examples of the genera. [CUCUMBER; GOURD.]

W. H.

* Had the faith of the children of Israel been such as it ought to have been they needed not to have murmured at the loss of the Egyptian melons, insomuch as Palestine and Syria are capable of producing the best species of them. Water-melons are now cultivated all through Palestine, and those of Jaffa are famous for their lusciousness. They are carried to all points on the coast, and transported to the inland towns on camels as far as Hums and Hama and Aleppo, before the season when they ripen in those districts. They are among the cheapest and most widely diffused of all the fruits of the East. In most parts of Syria melons go by the generic name of *بطيخ* Bottikh, while their specific names are yellow Bottikh for the musd-melon, Jeffa Bottikh for those from that city, green Bottikh for the water-melon. It is not, however, the custom to name other plants of the cucurbitaceae "Bottikh." The cucumber, and the *Kletuvium*, etc. have all their appropriate generic names.

G. E. P.

MELZAR (מֶלָץ, Melzār or Melzār, overseer). The A. V. is wrong in regarding Melzar as a proper name; it is rather an official title, as is implied in the addition of the article in each case where the name occurs (Gen. i. 11, 19): the marginal rendering, "the steward," is in both cases the correct one. The LXX. [rather, Theodotion] regards the article as a part of the name, and renders it *Meloṣôr* [so Alex.; Rom. Vat. exbibenda*]; the LXX. read *Abaqośi*; the Vulgate, however, has *Melovre*. The melovre was subordinate to the "master of the eunuchs;" his office was to superintend the nurture and education of the young; he thus combined the duties of the Greek xenoš and *πρωτηγόρος*, and more nearly resembles our "butler" than any other officer. As to the origin of the term, there is some doubt: it is generally regarded as of Persian origin, the words *med gan* giving the sense of "head cup-bearer;"

First (Lex. s. v.) suggests its connection with the Hebrew *מָלָץ* "to guard;"

W. L. B.

MEMPRIUS, QUINTUS (Κύρτος Μέμφίς), 2 Mac. xi. 94. [MANLIUS, F.]

MEMPHIS, a city of ancient Egypt, situate on the western bank of the Nile, in latitude 30° 6 N. It is mentioned by Isaiah (xix. 13), Jeremiah (5.16, xlv. 14, 19), and Ezekiel (xxx. 19, 16), under the generic name of "Memphis," and by Herodotus (iv. 6) under the name of Ἔλλην λόαφ, in Hebrew, and Membirti in our English version [LXX. Memphi, Vulg. *Memphisi*]. The name is compounded of two hieroglyphics "Men" = foundation, station; and *νοστηρέ* = good. It is variously interpreted; e. g. "harvest of the gods;" "a tomb of the good man;" "Osiros;" "the abode of the good;" "the gate of the blessed." Geometers remarks upon the two interpretations proposed by Plutarch (De Iside, et Os. 20) — namely, ὄρμος ἀγαθών, "harvest of the gods;" and τάφος Ἐσορίος, "the tomb of Osiris." — that "both are applicable to Memphis as the sepulchre of Osiris, the Necropolis of the Egyptians, and hence also the haven of the blessed, since the right of burial was conceded only to the good."hausen, moreover, prefers to trace in the name of the city a connection with Menes, its founder. The Greek coins have *Memphi*; the Coptic is *Menfi* or *Mefi* and *Menf*; Hebrew, sometimes *Moph* (Mphi.), and sometimes *Noph*: Arabic *Menf* or *Menf* (hausen, *Egypt's Place*, vol. ii. 53). There can be no question as to the identity of the *Noph* of the Hebrew prophets with *Memphis*, the capital of lower Egypt.

Though some regard Thebes as the more ancient city, the monuments of Memphis are of higher antiquity than those of Thebes. Herodotus dates its foundation from Menes, the first really historical king of Egypt. The era of Menes is not satisfactorily determined. Birch, Kenrick, Poole, Wilkinson, and the English school of Egyptologists generally, reduce the chronology of Manetho's lists, by making several of his dynasties contemporaneous instead of successive. Sir G. Wilkinson dates the era of Menes from n. c. 2690; Mr. Stuart Poole, n. c. 2717 (Rawlinson, *Hist.*, ii. 312; Poole, *Interpretation to Egypt*, p. 97). The German Egyptologists assign to Egypt a much longer chronology. Banse fixes the era of Menes at n. c. 3643 (*Egypt's Place*, vol. ii. 579); Brugsch at n. c. 4455 (*Histoire d'Egypte*, i. 297); and Lepsius at n. c. 3832 (*Königreich der alten Ägypter*). Lepsius also registers about 18,000 years of the dynasties of gods, demigods, and predynastic kings, before the accession of Menes. But indiscriminate and conjectural as the early chronology of Egypt yet is, all agree that the known history of the empire begins with Menes, who founded Memphis. The city belongs to the earliest periods of authentic history.

The building of Memphis is associated by tradition with a stupendous work of art which has permanently changed the course of the Nile and the face of the Delta. Before the time of Menes the river emerging from the upper valley into the neck of the Delta, bent its course westward toward the hills of the Libyan desert, or at least discharged a large portion of its waters through an arm in that direction. Here the generous flood whose yearly inundation gives life and fertility to Egypt, was largely absorbed in the sands of the desert, or wasted in stagnant morasses. It is even conjectured that up to the time of Menes the whole Delta was
MEMPHIS

an uninhabitable marsh. The rivers of Damascus, the Buruni and Amary, now lose themselves in the same way in the marshy lakes of the great desert plain southeast of the city. Herodotus informs us, upon the authority of the Egyptian priests of his time, that Menes—by banking up the river at the bend which it forms about a hundred furlongs south of Memphis, laid the ancient channel dry, while he dug a new course for the stream halfway between the two lines of hills. To this day, he continues, "the elbow which the Nile forms at the point where it is forced aside into the new channel is guarded with the greatest care by the Persians, and strengthened every year; for if the river were to burst out at this place, and pour over the mound, there would be danger of Memphis being completely overwhelmed by the flood. Men, the first king, having thus, by turning the river, made the tract where it used to run, dry land, proceeded in the first place to build the city now called Memphis, which lies in the narrow part of Egypt; after which he further excavated a lake outside the town, to the north and west, communicating with the river, which was itself the eastern boundary." (Herod. ii. 99.) From this description it appears, that—like Amsterdam dyked in from the Zuider Zee, or St. Petersburg defended by the mole at Constantia from the Gulf of Finland, or more nearly like New Orleans protected by its levee from the freshets of the Mississippi, and drained by Lake Pontchartrain,—Memphis was created upon a marsh reclaimed by the dyke of Menes and drained by his artificial lake. New Orleans is situated on the left bank of the Mississippi, about 90 miles from its mouth, and is protected against inundation by an embankment 15 feet wide and 4 feet high, which extends from 120 miles above the city to 40 miles below it. Lake Pontchartrain affords a natural drain for the marshes that form the margin of the city upon the east. The dyke of Menes began 12 miles south of Memphis, and deflected the main channel of the river about two miles to the eastward. Upon the

The Sphinx and Pyramids at Memphis.

rise of the Nile, a canal still conducted a portion of its waters westward through the old channel, thus irrigating the plain beyond the city in that direction, while an inundation was guarded against on that side by a large artificial lake or reservoir at Abousir. The skill in engineering which these works required, and which their remains still indicate, argues a high degree of material civilization, at least in the mechanic arts, in the earliest known period of Egyptian history.

The political success of Menes appears in the location of his capital where it would at once command the Delta and hold the key of upper Egypt, controlling the commerce of the Nile, defended upon the west by the Libyan mountains and desert, and on the east by the river and its artificial embankments. The climate of Memphis may be inferred from that of the modern Cairo—about 10 miles to the north—which is the most equable that Egypt affords. The city is said to have had a circumference of about 19 miles (Ibid. Sc. i. 50), and the houses or inhabited quarters, as was usual in the great cities of antiquity, were interspersed with numerous gardens and public areas.

Herodotus states, on the authority of the priests, that Menes "built the temple of Hephastus, which stands within the city, a vast edifice, well worthy of mention." (ii. 99.) The divinity whom Herodotus thus identifies with Hephastus was Plath, "the creative power, the maker of all material things" (Wilkinson in Rawlinson's Herod. ii. 286; Bunsen, Egypt's Place, i. 367, 384). Plath was worshipped in all Egypt, but under different representations in different Nomes; ordinarily as a god holding before him with both hands the Nilometer, or emblem of stability, combined with the sign of life" (Bunsen, i. 382). But at Memphis his worship was so prominent that the primitive sanctuary of his temple was built by Menes; successive monarchs greatly enlarged and beautified the structure, by the addition of courts, porches, and colossal ornaments. Herodotus and Dio forus
describe several of these additions and restorations, but nowhere give a complete description of the temple with measurements of its various dimensions (Herod. ii. 111. 1, 121, 139, 153, 176; Diod. Sic. iii. 45, 51, 62, 67). According to these authorities, Moeris built the northern gateway; Se-sostris erected in front of the temple colossal statues (varying from 30 to 50 feet in height) of himself, his wife, and his four sons; Iamblysinitus built the western gateway, and erected before it the colossal statues of Summer and Winter; Ayshis built the temple which is in size and beauty far surpassed the other three; " Psammetichus built the southern gateway; and Amonis presented to this temple a recumbent colossus 75 feet long, and two upright statues, each 20 feet high." The period between Menes and Amonis, according to Brugsch, was 5731 years; but according to Wilkinson only about 2100 years; but upon either calculation, the temple was built to Strabo was the growth of many centuries. Strabo (xviii. 807) describes this temple as "built in a very sumptuous manner, both as regards the size of the Naos and in other respects." The Dromos, or grand avenue leading to the temple of Ptoh, was used for the celebration of bull-fights, a sport pictured in the tombs. But these fights were probably between animals of a different kind, the Gaed are being compelled to enter the arena. The bulls having been tained for the occasion, were brought face to face and goaded on by their masters; — the prize being awarded to the owner of the victor. But though the bull was thus used for the sport of the people, he was the sacred animal of Memphis. The temple of Apis was believed to be an incarnation of Osiris. The sacred bull was selected by certain outward symbols of the indwelling divinity; his color being black, with the exception of white spots of a peculiar shape upon his forehead and right side. The temple of Apis was one of the most noted structures of Memphis. It stood opposite the southern pertoic of the temple of Ptoh; and Psammetichus, who built that gateway, also erected in front of the sanctuary of Apis a magnificent colonnade, supported by colossal statues or kistaba pillars, such as may still be seen at the temple of Meletemet Habon at Thebes (Herod. ii. 153). Through this colonnade the Apis was led with great pomp upon state occasions. Two stables adjoined the sacred vestibule (Strab. xviii. 807). Dioecorus (i. 83) describes the magnificence with which a deceased Apis was interred and his successor installed at Memphis. The place appropriated to the burial of the sacred bulls was a gallery some 2000 feet in length by 20 in height and width, hewn in the rock without the city. This gallery was divided into numerous recesses upon each side; and the embalmed bodies of the sacred bulls, each in its own sarcophagus of granite, were deposited in these "sepulchral stalls." A few years since, this burial-place of the sacred bulls was discovered by M. Mariette, and a large number of the sarcophagi have already been opened. These catacombs of mummied bulls were approached from Memphis by a paved road, having colossal lions upon each side.

At Memphis was the reputed burial-place of Isis (Diod. Sic. i. 22); it had also a temple to that "mythical-maiden" divinity, which Herodotus (ii. 176) describes as "a vast structure, well worthy of notables about — no chapel that consists of a colonnade in its basin, a chief city of her worship (ii. 59). Memphis had also its Serapeum, which probably stood in the western quarter of the city, toward the desert; since Strabo describes it as very much exposed to sand-drifts, and in his time partly buried under sand. (v. 375, 807). The sacred cubit and other symbols used in measuring the rise of the Nile were deposited in the temple of Serapis.

Herodotus describes "a beautiful and richly ornamented inclosure," situated upon the south side of the temple of Ptoh, which was sacred to Proteus, a native Memphite king. Within this inclosure there was a temple to "the foreign Venus" (Astarte?), concerning which the historian narrates a myth connected with the Grecian Helen. In this inclosure was "the Tyrian camp" (ii. 112). A temple of Ra or Phre, the Sun, and a temple of the Caelite, complete the enumeration of the sacred buildings of Memphis.

The mythological system of the time of Menes is ascribed by Bunsen to "the amalgamation of the religion of Upper and Lower Egypt;" — religion, having "already united the two provinces before the power of the race of This in the Thebaid extended itself to Memphis, and before the giant work of Menes converted the Delta from a desert, checkerboarded over with lakes and morasses, into a blooming garden." The political union of the two divisions of the country was effected by the builder of Memphis. "Menes founded the Empire of Egypt, by raising the people who inhabited the valley of the Nile from a little provincial station to that of an historic national" (Egypt's Place, i. 441, ii. 491).

The Necropolis, adjacent to Memphis, was on a scale of grandeur corresponding with the city itself. The "city of the pyramids" is a title of Memphis in the hieroglyphics upon the monuments. The great field or plain of the Pyramids lies wholly upon the western bank of the Nile, and extends from Aboo-Rashid, a little to the northwest of Cairo, to Meryenou, about 40 miles to the south, and thence in a southerly direction about 25 miles further, to the pyramids of Hoerera and of Bâbîkhi in the Fargana. Lepsius computes the number of pyramids in this district at sixty-seven; but in this he is probably misled by the builder of Memphis. "Menes the founder of the Empire of Egypt, by raising the people who inhabited the valley of the Nile from a little provincial station to that of an historic nation" (Egypt's Place, i. 441, ii. 491).

MEMPHIS

of Egypt," Isaiah says, "The princes of Zoon are become fools, the princes of Noph or Noph are deceived" (Isa. xix. 13). Jeremias (xiv. 19) declares that "Noph shall be waste and desolate without an inhabitant." Ezekiel predicts: "Thus saith the Lord God: I will also destroy the idols, and I will cause [their] images to cease out of Noph; and there shall be no more a prince of the land of Egypt." The latest of these predictions was uttered nearly 600 years before Christ, and half a century before the invasion of Egypt by Cambyses (cir. b. c. 525). Herodotus informs us that Cambyses, enraged at the opposition he encountered at Memphis, committed many outrages upon the city. He killed the sacred Apis, and caused his priests to be scourged. He opened the ancient sepulchres, and examined the bodies that were buried in them. He likewise went into the temple of Haphephantis (Ptah) and made great sport of the image... We went also into the temple of the Cabiri, which it is unlawful for any one to enter except the priests, and not only made sport of the images but even burnt them" (Her. iii. 57). Memphis never recovered from the blow inflicted by Cambyses. The rise of Alexandria hastened its decline. The Cæliph conspiracy (old testimony to the opposite bank of the Nile, a few miles north of Memphis, and brought materials from the old city to build their new capital (L. P. 638). The Arabian physician, Mal-el-Latif, who visited Memphis in the 13th century, describes its ruins as then marvelous beyond description (see De Saé's translation, cited by Brugsch, Histoire d'Egypte, p. 18). Although, in the 18th century, some of the remains of Memphis are numerous; for the most part in a state of decay, though some sculptures of variegated stone still retained a remarkable freshness of color (Inschriften Egypts, ed. Michaelis, 1776). At length so complete was the ruin of Memphis, that for a long time its very site was lost. Pococke could find no trace of it. Recent explorations, especially those of Messrs. Mariette and Linant, have brought to light many of its antiquities, which have been dispersed to the museums of Europe and America. Some specimens of sculpture from Memphis adorn the Egyptian hall of the British Museum; other monuments of this great city are in the Abbott Museum in New York. The dykes and canals of Memphis still form the basis of a statistical description for Lower Egypt. The insignificant village of Met Ezbouch occupies nearly the centre of the ancient capital. Thus the site and the general outlines of Memphis are nearly restored; but the images have ceased out of Noph, and it is desolate, without inhabitant.

J. P. T.

* In the six years which have elapsed since the preceding article was written, much has been brought to light concerning the antiquities of Memphis, both by exploration and by discussion, and there is hardly a point in the topography of the history of the city which remains in obscurity. The illustrated work of Mariette-Beyle, embodying the results of his excavations, when completed, will restore the first capital of Egypt, in great part, to its former grandeur. Memphis appears upon the monuments under three distinct names: the first its name as the capital of the corresponding Nome or district; the second its province, and the third its sacred name. The first, Sobk-het, is literally "the City of White Walls," a name originally given to the citadel (Herodotus, iii. c. 91), and especially to that part of the fortifications within which was inclosed the temple of the chief divinity of the city. Osiris is sometimes styled "the great king in the chief city of the Nome of the white walls." The second, which was the more common name of the city, Menet-er, signifies literally "nomic house." Brugsch regards the commonly-received analogy of this with the Mep or Neph of the Greek historians as highly absurd, and prefers to identify Noph with Salfm, which appears in the hieroglyphics under the form of "the city of Nph or Nep" (Geogr. Inschriften, i. 166 and 255).

The sacred name of the city was Hapoph or Philipopolis, "the House or city of Philip."—Hendrikspitzen.

Another name frequently given to Memphis on the monuments is Taposiris; this was particularly applied to the sacred quarter of the goddess Isctii, and signifies "the World of Life." Brugsch traces here a resemblance to the second clause in the surname of Joseph given by Pharaoh (Gen. xli. 45), which the LXX. render by Βεργίχδα, "This is the title as equivalent to Wep fun-ne-pouch, which means "this is the name of Joseph being thus invested with authority over that sacred quarter of the capital, and bearing from it the title "Lord of the World of Life." The royal granger of Memphis is attested by the groups of pyramids that mark the burial-place of her line of kings; but a rich discovery has now brought to light a consecutive list of her sovereigns in almost unbroken continuity from Menes. This is the "New Table of Abydos," which Mariette-Beyle came upon in 1865, in the course of his explorations at that primitive seat of monarchy, and which Dümichen has faithfully reproduced in his work. Inscriptions upon the great temple of Abydos show that this was erected by Sethos I, and further ornamented by his son, who is known in history as the second Ramesses. Upon one lobby of the temple Sethos and Ramesses are depicted as rendering homage to the gods; and in the inscription appear 130 proper names of divinities, together with the names of the places where these divinities were particularly worshipped. Upon the opposite lobby the same persons, the king and his son, are represented in the act of homage to their royal predecessors, and an almost perfect list is given, embracing seventy-six kings from Menes to Sethos. This discovery has important bearings upon the chronology of the Egyptian Pharaonic dynasties. There are now four monumental lists of kings which serve for comparison with the lists of Manetho and the Turin Papyrus: (1.) The Tablet of Karnak, on which Thothmes III. appears sacrificing to his predecessors, sixty-one of whom are represented by their portraits and names. (2.) The Tablet of Abydos, now in the British Museum, which represents Ramesses-Seoschis receiving congratulations from his royal predecessors, fifty in number. (3.) The Tablet of Sapphira, discovered by Mariette in 1864, in a private tomb in the necropolis of Memphis, which represents a royal scribb, in the act of adoration before a row of forty-eight royal cartouches. (4.) The new Tablet of Abydos described above. When these four monumental lists are tabulated with one another, and with the lists of Manetho and the Turin Papyrus, the correspondences of names and dynasties are so many and so minute as to prove that they all stand related to the city.
MEMUCAN 1885

MENAHEM

some traditional series of kings which was of common authority. Their variations may be owing in part to diversities of reading, and in part to a preference for particular kings or lists of kings in contemporary dynasties; so that while, in some instances, contemporary dynasties have been drawn upon by different authorities, no Tablet incorporates contemporary dynasties into one. Now, since the date of Sethos I. falls within the fifteenth century, B.C., it is obvious that to allow for a succession of seventy-six years from Menes to Sethos I., and for the growth of the mechanic arts and the national resources up to the point indicated at the consolidation of the empire under Menes, the received Biblical chronology between the Flood and the Exodus must be somewhat extended. We await some more definite determination of the Hyksos period, as a fixed point of calculation for the preceding dynasties.

Sansen (vol. v. pp. 58, 77, and 102) fixes the era of Menes at 3050 B.C. — the beginning of chronological time in Egypt, by the settlement of the system of the vague solar year: " this is a reduction of about 600 years, for in vol. iv. p. 490, he places Menes at 3023 B.C., and he also demanded at least 6000 years before Menes, for the settlement of Egypt and the development of some of its arts; however, is not history but conjecture; but the new Table of Abysos is a tangible scale of history. (For a comparison of these several tablets, see the Recuei Archéologique, 1894 and 1863, Rongé, Recherches sur les Monuments Historiques, and Dümichen, Zeitschrift für Ägypt. Sprache, 1841.) J. P. T.

MEMUCAN (ממעך) [a Persian title].

Moyaxas: Memucan). One of the seven princes of Persia in the reign of Ahasuerus, who " saw the king's face," and sat first in the kingdom (Esth. i. 14). They were " wise men who knew the times" (skilled in the planets, according to Aben Ezra), and appear to have formed a council of state; Josiphus says that one of their offices was that of interpreting the laws (Ant. xii. 6, § 1). This may also be inferred from the manner in which the royal question is put to them when assembled in council: "According to law what is to be done with the queen Vashti?" Menucan was either the president of the council on this occasion, or gave his opinion first in consequence of his acknowledged wisdom, and from the respect allowed to his advanced age. Whatever may have been the cause of this priority, his sentence for Vashti's disgrace was approved by the king and princes, and at once put into execution; "and the king did according to the word of Memucan" (Esth. i. 16, 21). The Targum of Esther identifies him with "Haman the grandson of Agag." The reading of the Cethib or written text, in ver. 16 is חָבֵר. W. A. W.

MENAHEM (מנֵהֵם) [conseder, whence MANAEN, Acts xiii. 1]: Maruah: [Alex. Maruaph, vxx. i. 14-1] (Menahem), son of Gaddi, who, according to the usurper Shallum and seized the vacant throne of Israel, B. C. 772. His reign, which lasted ten years, is briefly recorded in 2 K. xv. 14-22. It has been inferred from the expression in verse 14, "from Tirzah," that Menahem was a general under Zekchariah stationed at Tirzah, and that he brought up his troops to Samaria and avenged the murder of his master by Shallum (Joseph. Ant. x. 11, § 1; Keli, Thenius).

In religion Menahem was a steadfast adherent of the form of holiness established in Israel and by Hosea. His personal character is described by Josephus as rude and exceedingly cruel. The contemporary prophets, Hosea and Amos, have left a melancholy picture of the ungodliness, demoralization, and feebleness of Israel; and Ewald adds to their testimony some doubtful references to Isaiah and Zekchariah.

In the brief history of Menahem, his ferocious treatment of Tiphanah occupies a conspicuous place. The time of the occurrence, and the site of the town have been doubted. Keli says that it can be no other place than the remote Thaphaces on the Empirates, the northeast boundary (1 K. iv. 24) of Solomon's dominions; and certainly no other place bearing the name is mentioned in the Bible. Others suppose that it may have been some town in the north (see Menahem's campaign against Tirzah) which Menahem took in his victory, and by which Tirzah to win a crown in Samaria (Ewald); or that it is a transcriber's error for Tappnath (Josh. viii. 8), and that Menahem hid it waste when he returned from Samaria to Tirzah (Thenius). No sufficient reason appears for having recourse to such conjectures where the plain text presents no insuperable difficulty. The act, whether perpetrated at the beginning or the end of Menahem's reign or somewhat later, was doubtless intended to strike terror into the hearts of reluctant subjects throughout the whole extent of dominion which he claimed. A precedent for such cruelty might be found in the border wars between Syria and Israel, 2 K. viii. 12. It is a striking sign of the increasing degradation of the land, that a king of Israel practices upon his subjects a brutality from the mere suggestion of which the ungodly Syrian usurper recoiled with indignation.

But the most remarkable event in Menahem's reign is the first appearance of a hostile force of Assyrians on the northeast frontier of Israel. King Pul, however, withdrew, having been converted from an enemy into an ally by a timely gift of 1000 talents of silver, which Menahem exacted by an assessment of 50 shekels a head on 60,000 Israelites. It seems perhaps too much to infer from 1 Chr. xiii. 25, that Pul also took away Israelite captives. The name of Pul (LXX. Philoch or Phailos) appears according to Rawlinson (Bampton Lectures for 1859, Lect. iv. p. 133) in an Assyrian inscription of a Ninive king, as Phalhakha, who took tribute from Beth Khumri (= the house of Onri = Samaria) as well as from Tyre, Sidon, Damascus, Idumea, and Philiestria: the king of Damascar is set down as giving 2500 talents of silver besides gold and copper, but neither the name of Menahem, nor the

a Ewald (Gesch. Isr. iii. 568), following the LXX. would translate the latter part of 2 K. xv. 10, "And Koboiaim (or Kebhaam) smote him, and slew him, and reigned in his stead." Ewald considers the fact of Koboiaim's existence a help to the interpretation of 2 K. xi. 8; and he accounts for the phrase of Scripture as to his end by saying that he may have thrown himself across the Jordan, and disappeared among the subjects of king Uziah. It does not appear, however, how such a translation can be made to agree with the subsequent mention (ver. 13) of Shallum, and with the express ascription of Shallum's death (ver. 14) to Menahem. There is no possibility of the translation of the LXX. by supposing that their MSS. may have been in a defective state, but ridicules the theory of Ewald.
amount of his tribute is stated in the inscription. Rawlinson also says that in another inscription the name of Menahem is given, probably by mistake of the stone-cutter, as a tributary of Tachthieser.

Menahem died in peace, and was succeeded by his son Pekahiah. W. T. B.

* MENAM, the reading of the A. V. ed. 1811 and other early eds. in Luke iii. 31 for MIRAX, which see. A.

MENAN (MENAN, [Rec. Text, Maurer: Tisch. Treg. with Sin. B.LX MENAN: Lachm. Mينا in berose (A omits it); Erasm. Abl. Gerbilius. Colmanus, Mينا, whence the reading MEXAN, A. V. ed. 1611: Largard (1843). Mena, like A. V. in later editions.] Mena). The son of Mattathias, one of the ancestors of Joseph in the genealogy of Jesus Christ (Luke iii. 31). This name and the following Mechai are omitted in some Latin MSS., and are believed by J. A. Hervey to be corrupt (Genealogia, p. 88.).

MENE (Μὲνε, Theodot.: Mene). The first word of the mysterious inscription written upon the wall of Beldazar's palace, in which Daniel read the doom of the king and his dynasty (Dan. v. 25, 26). It is the Ted past-participle of the Chaldee μενυω, to number, and therefore signifies numbered, as in Daniel's interpretation, "God hath numbered the kingdom and finished it." W. A. W.

MENELAUS (Μηνελαος), a usurping high-priest who obtained the office from Antiochus Epiphanes (c. n. c. 172) by a large bribe (2 Macc. iv. 23-25), and drove out Jason, who had obtained it not long before by similar means. When he neglected to pay the sum which he had promised, he was summoned to the king's presence, and by plundering the temple gained the means of silencing the accusations which were brought against him. By a similar sacrifice he secured himself against the consequences of an insurrection which his tyranny had excited, and also procured the death of Onias (vv. 27-34). He was afterwards hard pressed by Jason, who, taking occasion from his impopularity, attempted unsuccessfully to recover the high-priesthood (2 Macc. v. 5-10). For a time he then disappears from the history (yet comp. ver. 23) out at last he met with a violent death at the hands of Antiochus Epiphanes (c. n. c. 163), which seemed in a peculiar manner a providential punishment of his sacrilege (xiii. 3, 4).

According to Josephus (Ant. xii. 5, § 1) he was a younger brother of Jason and Onias, and, like Jason, changed his proper name Onias for a Greek name. In 2 Maccabees, on the other hand, he is called a brother of Simon the Just (Macc. iv. 23), whose treason led to the first attempt to plunder the Temple. If this account be correct, the profanation of the sacred office was the more marked by the fact that it was transferred from the family of Aaron.

B. F. W.

ME/NI. The last clause of Is. lxv 11 is rendered in the A. V., "and that furnish the drink offering unto that number," (λαγιος, the marginal reading for the last word being Μενι). That the word so rendered is a proper name, and also the proper name of an object of idolatrous worship enshrined by the Jews in Babylonia, is a supposition which seems to lack evidence and is not in accordance with the context, and has every probability to recommend it. But the identification of Meni with any known heathen god is still uncertain. The versions are at variance. In the LXX. the word is rendered Πηγάζω, "fortune," or "luck." The old Latin version of the clause is "inplebit decurioni potionem," while Symmachus (as quoted by Jerome) must have had a different reading, μενιοί, "without me," which Jerome interprets as signifying that the act of worship implied in the drink-offering was not performed for God, but for the demon ("ut docet non sibi sed deum") demanding it. The Targum of Jonathan is very vague — "and mingling cups for their gods," and the Syriac translators either omit the word altogether, or had a different reading, perhaps μενιός, "for them." Some variation of the same kind apparently gave rise to the super cunm of the Vulgate, referring to the "table" mentioned in the first clause of the verse. From the old versions we come to the commentators, and their judgments are equally conflicting. Jerome (Comm. in Is. lxv. 11) illustrates the passage by reference to an ancient idolatrous custom which prevailed in Egypt, and especially at Alexandria, on the last day of the last month of the year, of placing a table covered with dishes of various kinds, and a cup mixed with mead, in acknowledgment of the fertility of the past year, or as an omen of that which was to come (comp. Virg. Aeni. ii. 753). But he gives no clue to the identification of Meni, and his explanation is evidently suggested by the renderings of the LXX. and the old Latin version; the former, as he quotes them, translates God by "fortune," and Meni by "demon," in which they are followed by the latter. In the later mythology of Egypt, as we learn from Macrobius (Saturn. i. 19), Δαιμον and Τυγχαν were two of the four deities who presided over birth, and represented respectively the Sun and Moon. A passage quoted by Selden (de Pia Sagris, Syst. i. e. 1) from a MS. of Vetutius Valens of Antioch, an ancient astrologer, goes also to prove that in the astrological language of his day the sun and moon were indicated by Δαιμον and Τυγχαν, as being the arbiters of human destiny. This circumstance, coupled with the similarity between Meni and Μήν or Μην, the ancient name for the moon, has induced the majority of commentators to conclude that Meni is the Moon god or goddess, the Dea Luna, or Dea Luna of the Romans; masculine as regards the earth which she illuminates (terra maritis), feminine with respect to the sun (Solis maris), from whom she receives her light. This twofold character of the moon is thought by David Millius to be indicated in the two names God and Meni, the former feminine, the latter masculine (Heb. v. § 25); but as both are masculine...
MENI

one in Hebrew, his speculations fall to the ground.

Le Moyne, on the other hand, regarded both words as denoting the sun, and his double worship among the Egyptians: God is then the god of Menes, and Meni = Mnevis worshipped at Heliopolis.

The opinion of Huculent that the Meni of Isaiah and the Mâr of Strabo (xii. 31) both denoted the sun was refuted by Vitringa and others. Among those who have interpreted the word literally "number," may be reckoned Archi and Abarbanel, who understand by it the "number" of the priests who formed the company of revelers at the feast, and latter Hoheisel (Ois. of Njâg. Jes. loc. v. p. 349) followed in the same track. Kinchini, in his note on Is. lv. 11, says of Meni, "it is a star, and some interpret it of the stars which are numbered, and they are the seven stars of motion," i.e. the planets.

Buxtorf (Lev. Hebr.) applies it to the "number" of the stars which were worshipped as gods; Schindler (Lev. Pentegyl.) to "the number and multitude" of the idols, while according to others it refers to "Mercury the god of numbers;" all which are mere conjectures, qoud homines, tot sentiment, and take their origin from the play upon the word Meni, which is found in the verse next following that in which it occurs ("therefore will I number [אנהנה נותיאנ], amdahâni you to the sword"), and which is supposed to point to its derivation from the verb נוותיאנ, mânâh, to number.

But the origin of the name Noah, as given in Gen. v. 29,* shows that such plays upon words are not to be depended upon as the bases of etymology. On the supposition, however, that in this case the etymology of Meni is really indicated, its meaning is still uncertain. Those who understand by it the moon, derive an argument for their theory from the fact, that anciently years were numbered by the courses of the moon. But Gesenius (Comm. ub. d. Jesuit) with more probability, while admitting the same origin of the word, gives to the root mânâh the sense of assigning, or distributing,* and connects it with mânâh, one of the three idols worshipped by the Arabs before the time of Mohammed, to which reference is made in the Koran (Surâ 53), "What think ye of Allah, and Al-Uzza, and Mânâh, that other third goddess?" *Mânâh was the object of worship of "the tribes of Adheef and Khezif, who dwelt between Meckeh and El-Medeeneh, and as some say, of the tribes of Owes, El-Khazraj, and Thaakceck also. This idol was a large stone, demolished by one Saad, in the 8th year of the Flight, a year so fatal to the idols of Arabia" (Lane's Sel. from the Kur an, pref. pp. 30, 31, from Pococke's Spec. Hist. Ar. p. 93. ed. White). But Al-Zamakhshari, the commentator on the Koran, derives Mânâh from the root מנה, "to flow," because of the blood which flowed at the sacrifices to this idol, or, as Millius explains it, because the ancient idea of the moon was that it was a star full of moisture, with which it filled the subliminal regions.† The etymology given by Gesenius is more probable: and Meni would then be the personification of fate or destiny, under whatever form it was worshipped.‡ Whether this form, as Gesenius maintains, was the planet Venus, which was known to Arabic astrologers as "the lesser good fortune" (the planet Jupiter as the "greater"), it is impossible to say with certainty; nor is it safe to reason from the worship of Mânâh by the Arabs in the times before Moses, to that of Meni by the Jews more than a thousand years earlier. But the coincidence is remarkable, though the identification may be incomplete.

W. A. W.

** MEN-PLEASERS (ארבפואספיט) is a word which came into use with Tyndale's translation (Ep. vi. 6; Col. ili. 22). It is like "eye-service" in this respect, which occurs in the same passages.

** MEN'U'CHAIH (מנס חדש: את חדש: Alex. and Vulg. translate freely) in Judg. xx. 43 has been regarded by some critics as the name of a place, and is put as such in the margin of the A. V., but in the text is rendered "with ease." First it takes to be the same as Manannah in 1 Chr. viii. 6, whence the patronymic Mananathites, 1 Chr. ii. 54.

If a town be meant, it was in the tribe of Benjamin, and on the line of the retreat of the Benjamites before the other tribes at the siege of Gibeah (comp. Judg. xx. 11 f.). It is held to be a proper name in Luther's version. But the word has more probably its ordinary signification: either "with ease" (literally "quiet" as the opposite of toil, trouble), with reference to the almost unresisted victory of the other tribes over the panic-stricken Benjamites; or "of place," i.e. in every such place where the men of Benjamin halted for a moment, their pursuers fell upon them and trampled them to pieces (בנהנה נותיאנ), like grapes in the wine-press.

It should be said that the name reappears in the margin of the A. V., Jer. li. 58: "Scalah was a prince of Mountain, or chief chamberlain," where the text reads "was a quiet prince." The Bishops' Bible (connecting the word with the previous verb) translates "clashed them diligently" or (margin) "from their rest." On the whole, it appears to the writer not easy to discover any better sense than that suggested in the A. V.

** MEON'EXIM, THE PLAIN OF [ל#aa

---

* "And he called his name Noah (אנהנה נותיאנ), saying,

This shall comfort us," etc. (אנהנה נותיאנ, ובנהנה נותיאנ). Yet no one would derive מנה, מנה, from מנה, מנה.

The play on the word may be retained without detriment to the sense if we render Meni "destiny," and the following clause, "therefore will I festine you for the sword."

e The presence of the article seems to indicate that "Meni" was originally an appallative.
MEONEIM, THE PLAIN OF

Plain— which formed a well-known object in central Palestine in the days of the Judges. It is mentioned—at least under this name—only in Judg. iv. 37, where Gad ben-Eliel standing in the gateway of Shechem sees the ambudlets of Abimelech coming towards the city, one by the middle [literally, "nave"] of the land, and another "by the way ([תת] ת"כ) of Elon-Meoneim," that is, the road leading to it. In what direction it stood with regard to the town we are not told.

The meaning of Meoneim, if interpreted as a Hebrew word, is "enchantments," or "observers of their time;" it is elsewhere rendered "Ezion-Gebirah," xviii. 19, 14; in Mic. v. 12 it is "soothsayers.") This connection of the name with magical arts has led to the suggestion that the tree in question is identical with that beneath which Jacob hid the foreign idols and annlets of his household, before going into the presence of God at the consecrated ground of Bethel (Gen. xxxiv. 4). But the inference seems hardly hardy the pillar in, or for, "enchantment does not mean "enchantments" but "enchants," nor is there any ground for connecting it in any way with annlets or images; and there is the positive reason against the identification that while this tree seems to have been at a distance from the town of Shechem, that of Jacob was in it, or in very close proximity to it (the Hebrew particle used is בֵּית, which implies this).

Five trees are mentioned in connection with Shechem:

1. The oak not "plain," as in A. V.) of Moreh, where Abram made his first halt and built his first altar in the Promised Land (Gen. xiii. 18).

2. That of Jacob, already spoken of.

3. "The oak which was in the holy place of Jehovah" (Josh. xxiv. 26); beneath which Joshua set up the stone which he assured the people had heard all his words, and would one day witness against them.

4. The Elon Mattatsah, or "oak not "plain," as in A. V.) of the pillar in, or for, Meoneim, beneath which Abimelech was made king (Judg. iv. 6).

5. The Elon-Meoneim.

The first two of these may, with great probability, be identical. The second, third, and fourth, agree in being all specified as in or close to the town. Joshua's is mentioned with the definite article "the oak" as it well known previously. It is therefore possible that it was Jacob's tree, or its successor. And it seems further possible that during the conflicts which prevailed in the country after Joshua's death, the stone which he had erected beneath it, and which he invested, even though only in metaphor, with qualities so like these which the Cannities attributed to the stones they worshiped—that during these confused times this famous block may have become sacred among the Cannities, one of their "mattetals." [See IUN, vol. ii. p. 1119 b, and thus the tree have acquired the name of "Elon of Mattathah" from the petty below it.

a Genesis (Am. 26:5), mercenaries and Zambrec; Nicholas and First, Warburton. The root of the word is בֵּית, probably connected with בֵּית, the eye, which is so prominent a part in Eastern magic. Of this there is a trace in the respect of the Vagatae. (See green, Thes. 1072, 1653; also DEUTERONOMY, vol. i. pp. 819, 820.)

MEPHAATH

That Jacob's oak and Joshua's oak were the same tree seems still more likely, when we observe the remarkable correspondence between the circumstances of each occurrence. The point of Joshua's address— his summary of the early history of the nation—is that they should "put away the foreign gods which were among them, and incline their hearts to Jehovah the God of Israel." Except in the mention of Jehovah, who had not revealed Himself till the Exodus, the words are all but identical with those in which Jacob had addressed his followers; and it seems almost impossible not to believe that the coincidence was intentional on Joshua's part, and that such an allusion to a well-known passage in the life of their forefather, and which had been on the very spot where they were standing, must have come home with peculiar force to his hearers.

But while four of these were thus probably one and the same tree, the oak of Meoneim for the reasons stated above seems to have been a distinct one.

It is perhaps possible that Meoneim may have originally been Maonim, that is Maonites or Mebona, a tribe or nation of non-Israelites elsewhere mentioned. If so it furnishes an interesting trace of the presence at an early period of that tribe in Central Palestine, of which others have been noticed in the case of the Ammonites, Avites, Zemarites, etc. [See vol. i. p. 277, note b.]

MEONOTHAI [4 syl.] ([תת] ת"כ [my dwelings, Ges.: see First:] Marothi; [Vat. Marono- 
thei: Comp. Maonothi:] Meonothi,] One of the sons of Othniel, the younger brother of Caleb (1 Chr. iv. 14). In the text as it now stands there is probably an omission, and the true reading of vv. 13 and 14 should be, as the Vulgate and the Complutensian edition of the LXX. give it, "and the sons of Othniel, Hattath and Meonothai; and Meonothai began Ophrah." It is not clear whether this last phrase implies that he founded the town of Ophrah or not: the usage of the word "father" in the sense of "founder" is not uncommon.

MEPHAATH [בֵּית, height, First; ]

beauty, Ges.: in Chron. and Jerem. in the latter the Cuthi, or original text, has בֵּית, Maaphath; Alex. Maaphath; Mephaath, Mephaath, a city of the Reubenites, one of the towns dependent on Heshbon (Josh. xiii. 18), lying in the district of the Mishor (comp. 17, and Jer. xxviii. 21. A. V. "plain"), which probably answered to the modern Bethshe. It was one of the cities allotted with their suburbs to the Merarite Levites (Josh. xxi. 37: I Chr. vi. 79; the former does not exist in the LXX. Hebr. Text). At the time of the conquest it was no doubt, like Heshbon, in the hands of the Amorites (Num. xxi. 26), but when Jerahmeel delivered his demurrals it had been recovered by its original possessors, the Moabites (xviii. 25).

Mephaath is named in the above passages with

C The name is given in the LXX. as follows: Josh. xiii. 18, Maaphath, Alex. Maaphath; xvi. 31, thy Maaph Alex. v. Mephaath; 1 Chr. vi. 79, thy Maaph, Alex. v. Mephaath, Jer. xlix. 21, Maaphath, Alex. Nephath [Maaphath, according to Babyl.]
MEPHIBOSHETH

Dibon, Jabalaz, Kirjathaim, and other towns, which have been identified with tolerable certainty on the north of the Arnon. (Hud. Mephib.) but no one appears yet to have discovered and name at all resembling it, and it must remain for the further investigation of those interesting and comparatively untrodden districts. In the time of Eusebius (Onomast. Mejjeb; it was used as a military post for keeping in check the wandering tribes of the desert, which surrounded, as it still surrounds, the ancient land of Judah.

The extended, and possibly later, form of the name which occurs in Chronicles and Jeremiah, as if Me Phathah, "waters of Phathah," may be, as in other cases, an attempt to fix an intelligible meaning on an archaic or foreign word. G.

MEPHIBOSHETH [םיבושת] [perh. idol-cementator, Sim. Ges.]; but see Fürst: Me ’phibóshét; [Alex. Me ’phibósheth, exc. 2 Sam. ix. 11, 13; Joseph. Me ’phibóshétos; Mephibosheth], the name borne by two members of the family of Saul—his son and his grandson.

The name itself is perhaps worth a brief consideration. Bosheth appears to have been a favorite appellation in Saul's family, for it forms a part of the names of no fewer than three members of it—Ish-bosheth and the two Mephi-bosheths. But in the genealogies preserved in 1 Chronicles these names are given in the different forms of Ish-baal and Merib-baal. The variation is identical with that of Jerub-local and Jerub-besheth, and is in accordance with passages in Jeremiah (ch. 13) and Hosea (ix. 10), where Baal and Bosheth appear to be convertible, or at least related, terms, the latter being used as a contemptuous or derisive synonym of the former. One inference from this would be that the persons in question were originally named Baal; that this appears in the two fragments of the family records preserved in Chronicles; but that in Samuel the hateful hitherto name has been uniformly erased, and the nickname Bosheth substituted for it. It is some support to this to find that Saul had an ancestor named Bala, who appears in the lists of Chronicles only (1 Chr. viii. 30, ix. 36). But such a change in the record supposes an amount of editing and interpolation which would hardly have been accomplished without leaving more obvious traces, in reasons given

a Translated in A. V. "shame."

b Some of the ancient Greek versions of the Hexapla give the name in Samuel as Memphib-baal (see Behrdt's Hexapa, pp. 594, 695, 614). Also Procopius Gaeurop. Schol. on 2 Sam. xvi. No trace of this, however, appears in any MS. of the Hebrew text.

c There is no doubt about this being the real meaning of the word מֵפִּי-בּוֹשֶת, translated here and in Num. xxiv. 4 "hunged up," (See Michæellis's Supplement, No. 1046; also Gesenius, Thes. 629; and Fürst, Hauptw. 583 b.) Aquila has מֵפִּי-בּוֹשֶת, understanding them to have been not crucified but impaled. The Vulgate reads crucifixust (ver. 9), and qui affixit facient (13).

The Hebrew term מֵפִּי-בּוֹשֶת is entirely distinct from מֵפִּי-בּוֹשֶה, also rendered "to hang," in the A. V., which is its real signification. It is this latter word which is employed in the story of the five kings at Makkehah in the account of the indignities practiced on Saul's body. It occurs in xxvi. 12, on Baal-meth and Rechab by David; 2 Sam. iv. 12; and elsewhere.

d This follows from the statement that they hung from barley harvest (April) till the commencement of

for the change, etc. How different it is, for example, from the case of Jerub-besheth, where the alteration is mentioned and commented on. Still the facts are as above stated, whatever explanation may be given of them.

1. Saul's son by Rizpa the daughter of Aiah, his concubine (2 Sam. xxi. 8). He and his brother Armoni were among the seven victims who were surrendered by David to the Gibeonites, and by them crucified e in sacrifice to Jehovah, to armor a name from which the country was to be free. The seven corpses, protected by the tender care of the mother of Mephibosheth from the attacks of bird and beast, were exposed on their crosses to the fierce sun d of at least five of the midsummer months, on the sacred eminence of Gilbeh. At the end of that time the attention of David was called to the circumstance, and also possibly to the fact that the sacrifice had failed in its purpose. A different method was tried: the bones of Saul and Jonathan were disinterred from their resting-place at the foot of the great tree at Jabesh-Gilead, the blanched and withered remains of Mephibosheth, his brother, and his five relatives, were taken down from the crosses, and father, and son, and grandsons found at last a resting-place together in the ancestral cave of Kish and Zelopheh. When this had been done, "God was entreated for the land," and the famine ceased. (Rizpa.)

2. The son of Jonathan, grandson of Saul, and nephew of the preceding.

1. His life seems to have been, from beginning to end, one of trial and discomfort. The name of his mother is unknown. There is reason to think that she died shortly after his birth, and that he was an only child. At any rate we know for certain that when his father and grandfather were slain on Gilboa he was an infant of but five years old. He was then living under the charge of his nurse, probably at Gilbeh, the regular residence of Saul. The tidings that the army was destroyed, the king and his sons slain, and that the Philistines, spreading from hill to hill of the country, were sweeping down before them, reached the royal household. The nurse fled, carrying the child on her shoulder. But in her panic and hurry she stumbled, and Mephibosheth was precipitated to the ground with such force as to deprive him for life of the use of both feet (2 Sam. iv. 4). These early misfor-

the rains (October); but it is also worthy of notice that the LXX. have employed the word ἐκκεφαλίζεται, "to expose to the sun." It is also remarkable that on the only other occasion on which this Hebrew term is used—Num. xxv. 4—an express command was given that the victims should be crucified "in front of the sun."

a This is the statement of Josephus—ἀρπαγή ὀνήσα θοῦ (Ant. viii. 5, § 5); but it is hardly necessary, for in the East children are always carried on the shoulder. See the woodcut in Lane's Med. Egyptians, ch. i. p. 32.

b It is a remarkable thing, and very characteristic of the simplicity and unconsciousness of these ancient records, of which the late Professor Blunt has happily illustrated so many other instances, that this information concerning Mephibosheth's childhood, which contains the key to his whole history, is inserted, almost as if by accident, in the midst of the narrative of his uncle's death, with no apparent reason for the insertion, or connection between the two, farther than that of their being relatives and having somewhat similar names.
tunes throw a shade over his whole life, and his personal dignity — as is often the case where it has been the result of accident — seems to have exercised a depressing and deprecatory influence on his character. He can never forget that he is a poor lame slave (2 Sam. xix. 25), and unable to walk: a dead dog (xiv. 8): that all the house of his father were dead (xix. 24): that the king is an angel of God (27), and he is object dependent (ix. 6, 8). He receives the slanders of Ziba and the harshness of David alike with a submissive equanimity which is quite touching, and which effectually wins our sympathy.

2. After the accident which thus obliterated his whole existence, Mephibosheth was carried with the rest of his family beyond the Jordan to the mountains of Gilad, where he found a refuge in the house of Machir ben Ammiel, a powerful Gadite or Manassite sheikh at Lob-dear, not far from Mahanaim, which during the reign of his uncle Mephibosheth was the head-quarters of his family. By Machir he was brought up (2 Sam. vii. 5, § 5), there he married, and there he was living at a later period, when David, having completed the subjugation of the adversaries of Israel on every side, had leisure to turn his attention to claims of other and hardly less pressing descriptions. The solemn oath which he had sworn to the father of Mephibosheth at their critical interview by the stone Ezel, that he would not cut off the kindness from the house of Jonathan for ever: no! not when Jehovah had cut off the enemies of David each one from the face of the earth ("2 Sam. xx. 15); and again, that "Jehovah should be between Jonathan's seed and his seed for ever" (ver. 42), was naturally the first thing that occurred to him, and he eagerly inquired who was left of the house of Saul, that he might show kindness to him for Jonathan's sake (2 Sam. i. 1). So completely had the family of the late king vanished from the western side of Jordan, that the only person to be met with in any way related to them was Ziba, formerly a slave of the royal house, but now a freed man, with a family of fifteen sons, who by arts which, from the glimpse we subsequently have of his character, are not sufficient to understand, must have acquired considerable substance, since he was possessed of an establishment of twenty slaves of his own. (Ziba.) From this man David learnt of the existence of Mephibosheth. Royal messengers were sent to the house of Machir at Lob-dear in the mountains of Gilad, and by them the prince and his infant son Mavus were brought to Jerusalem. The interview with David was marked by extreme kindness on the part of the king, and on that of Mephibosheth by the fear and humility which has been pointed out as characteristic of him. He leaves the royal presence with all the property of his grandfather restored to him, and with the whole family and establishment of Ziba as his slaves, to cultivate the land and harvest the produce. He himself is to be a daily guest at David's table. From this time forward he resided in Jerusalem.

3. An interval of about seventeen years now passes, and the crisis of David's life arrives. Of Mephibosheth's behavior on this occasion we possess two accounts — his own (2 Sam. xix. 24—29), and that of Ziba (xix. 1—4). They are naturally at variance with each other. (1.) Ziba meets the king on his flight at the most opportune moment, just as David has undergone the most trying part of that trying day's journey, has taken the last look at the city so peculiarly his own, and completed the hot and toilsome ascent of the Mount of Olives. He is on foot, and is in want of relief and refreshment. The sight must stand a couple of strong he ass-eyes ready saddled for the king or his household to make the descent upon; and there are bread, grapes, melons, and a skin of wine; and there — the donor of these welcome gifts — is Ziba, with respect in his look and sympathy on his tongue. Of course the whole, though offered as Ziba's, is the property of Mephibosheth: the asses are his, one of them his own, a riding animal; the fruits are from his gardens and orchards. But why is not their owner here in person? Where is the "son of Saul"? He, says Ziba, is in Jerusalem, waiting to receive from the nation the throne of his grandfather, that throne from which he has been so long unjustly excluded. It must be consigned to him there at first sight is a natural and just one, and that of David is no more than was to be expected. So the base ingratitude of Mephibosheth is requited with the rain he deserves, while the loyalty and thoughtful courtesy of Ziba are rewarded by the possessions of his master, thus once more reinstating him in the position from which he had been so purely thrust on Mephibosheth's account. (2.) Mephibosheth's story — which, however, he had not the opportunity of telling until several days later, when he met David returning to his kingdom at the western bank of Jordan — was very different to [from] Ziba's. He had been desirous to fly with his patron and benefactor, and had ordered Ziba to make ready his ass that he might join the cortège. But Ziba had refused the king and left the king with the ass. In his helpless condition he had no alternative, when once the opportunity of accompanying David was lost, but to remain where he was. The swift pursuit which had been made after Ahimaaz and Jonathan (2 Sam. xvii.) had shown what risks even a strong and able man must run who would try to follow the king. But all that he could do under the circumstances he had done. He had gone into the deepest mourning possible for his lost friend. From the very day that David left he had allowed his beard to grow ragged, his crippled feet were unwashed and untended, his linen remained unchanged. That David did not disbelieve this story is shown by his revoking the judgment he had previously given. That he did not entirely reverse his decision, but allowed Ziba to retain possession of half the lands of Mephibosheth, is probably due partly to weariness at the whole
transaction, but mainly to the conciliatory frame of mind in which he was at that moment. "Skall then any man be put to death this day?" is the keynote of the whole proceeding. Ziba probably was a rascal, who had done his best to injure an innocent and helpless man; but the king had passed his word that no one was to be made unhappy on this day. When a word was given and Mephibosheth, who loved himself ruined, has half his property restored to him, while Ziba is better off than he was before the king's flight, and far better off than he deserved to be.

4. The writer is aware that this is not the view generally taken of Mephibosheth's conduct, and in particular the opposite side has been maintained with much acumen and ingenuity by the late Professor Blunt in his Unexplained Coincidences (part ii. § 17). But when the circumstances on both sides are weighed, there seems to be no escape from the conclusion come to above. Mephibosheth could have had nothing to hope for from the revolution. It was not a mere anarchical scramble in which all had equal chances of coming to the top, but a civil war between two parties, led by two individuals, Absalom on one side, David on the other. From Absalom, who had made no vow to Jonathan, it is obvious that he had nothing to hope. Moreover, the struggle was entirely confined to the tribe of Judah, and, at the period with which alone we are concerned, to the chief city of Judah. What chance could a Benjaminite have had there? — more especially one whose very claim was his descent from a man known only to the people of Judah as having for years hunted their darling David through the hills and woods of his native tribe; least of all when that Benjaminite was a poor, nervous, timid cripple, as opposed to Absalom, the handsomest, readiest, and most popular man in the country. Again, Mephibosheth's story is thoroughly valid and consistent. Every tie, both of interest and of gratitude, combined to keep him faithful to David's cause. As not merely base, but depraved of the use of both feet, he must have been entirely dependent on his ass and his servant: a position which Ziba showed that he completely appreciated by not only making off himself, but taking the asses and their equipments with him. Of the impossibility of flight, after the king and the troops had gone, we have already spoken. Lastly, we must mention his statement, but that of the historian, to the fact that he commenced his mourning, not when his supposed designs on the throne proved futile, but on the very day of David's departure (xix. 24).

So much for Mephibosheth. Ziba, on the other hand, had everything to gain and nothing to lose by any turn affairs might take. As a Benjaminite and an old enemy of Saul all his tendencies must have been hostile to David. It was David, moreover, who had thrust him down from his independent position, and brought himself and his fifteen sons back into the bondage from which they had before escaped, and from which they could now be delivered only by the fall of Mephibosheth. He had thus every reason to wish his master out of the way, and any plans he might be driven to must be directed to what it is if we can believe that either his good offices to David or his accusation of Mephibosheth was the result of anything but calculation and interest.

With regard to the absence of the name of Mephibosheth from the dying words of David, which is the main occasion of Mr. Blunt's strictures, it is most natural — at any rate it is quite allowable — to suppose that, in the interval of eight years which elapsed between David's return to Jerusalem and his death, Mephibosheth's painful life had come to an end. We may without difficulty believe that he did not long survive the anxieties and annoyances which Ziba's treachery had brought upon him. The sentiments which favor the side of Mephibosheth on this question of veracity between him and Ziba are somewhat fully stated above. It is due to an impartial view of the case to mention also some of the considerations on the other side, to which the reader's attention has not been called. Josephus supports this view, which was probably prevalent among the Jews and he, in his day, names it as the early Christian tradition; and modern commentators (Henry, Jamieson, Kitto, and others) urge the same opinion. No tradition, of course, reaches back to the period, and any inference is legitimate which is fairly deducible from the record itself. We offer a few considerations to balance some of the preceding.

1. (1) The relation of Ziba to Mephibosheth could not have been deceiving and trying. It would have been a poor return for the information which enabled the king to reach the object of his favor, to inflict an injury on the informer. In delegating to an old servant of Saul the care of his late royal master's grandson with his restored estate—making him the steward of his property and (in his helplessness) the virtual guardian of his person, David conferred an honorable trust, and placed Ziba in a more important post than he occupied before. The novel suggestion that the king "rudely thrust" him from a better position, and that he harbored rancor as one who had "thrust down" and "brought into bondage" from which he sought escape, has no apparent basis.

(2) The open kindness which Ziba rendered king David was not only most opportune, but was also bestowed at an hour when there was no prospect of reward, if it did not even involve some risk. He could not have reasonably anticipated that the monarch, in his own extremity, would confiscate his master's estate (against whom he volunteered no charge) and announce its transfer to himself. If, withal, what was offered as Ziba's "was the property of Mephibosheth," would not the king know it? And would the servant be so presuming if the fact were so patent? And what is there in all his conduct to countenance the conjecture of "tendencies hostile to David?"

(3) It would be natural for Mephibosheth (as David's ready credence shows) to imagine that dispersion in the royal family and civil war might result in bringing him to the throne. As between David and Absalom, he had nothing to hope from the latter and much from the former; but this deadly breach between them may have awakened hopes of his own — and these failing, the countercharge against Ziba would be the natural cover and defense of his course, if the charge of the latter were true.

(4) The proposal of Mephibosheth, when half the estate was restored to him, to allow Ziba to keep the whole — a token of his indifference to property, from genuine joy at his benefactor's safe return — will not, of itself, mislead any one who is familiar with eastern phrases and professions of friendship. The speech was purely oriental — as was Ziba's previous acknowledgment.

(5) Aside from the charge of Mephibosheth,
made in self-exculpation, the character of Ziba is unimpeached, and there is no indication that Dav. I withdrew his confidence from him. (6.) The final award of David is far more recon- ciliable with his belief of Mephibosheth's guilt, than of Ziba's. To pity the son of Jonathan, in his alfect destruction, and permit him to retain half of his forfeited possessions, would accord with David's known magnanimity and left his day of triumph. "The key-note of the whole proceeding," to which Mr. Grove properly refers, is certainly not less in harmony with this construction than with the other. It would be the reverse of magnanimous, and positively wrong, to reward the 'treachery' of Ziba, and permit him to hold half of his master's estate as the fruit of falsehood and fraud which he had been convicted. Nothing could justify or excuse this decision but the im- morality of Ziba, or doubt in the king's mind between the conflicting stories—which is a possible sup- position. (7.) The argument of Prof. Blunt (see above) based on the omission of Mephibosheth's name from the dying messages of David, is not fully met by the suggestion that the former may have died in the "general eight years"—the known time of his living some four years after (2 Sam. xvi. 1, 7)—for even if he were dead, he had left a son and grandsons (1 Chron. viii. 34, 35) and David's covenant with Jonathan pledged him to protect his offspring "for ever." If Mephibosheth proved faithful when rebellion was rife, whether he were now living or dead, it would be difficult to account for the omission of any allusion to this tender trust in the parting charge to Solomon. It is to be noted, moreover, that on his return to the capital David appears simply to have forgiven Mephibosheth and remitted half the penalty of confiscation. There is no evidence that from this time the latter was a guest at the royal table as he had been before. In view of this difference of opinion between writers on the subject, and in the absence of all evidence in the premises except that of the unsup- ported testimony of the parties at variance, our conclusion is that we cannot safely pronounce either of them "a rascal"—though it is evident enough that there was rascelity between them. S. W.

**MERAB** [increase, growth]: Mēḇeqh. Alex. also Mēḇeq, Joseph. Mēḇeqh: Merob, the eldest daughter, possibly the eldest child, of King Saul (1 Sam. xxiv. 49). She first appears after the victory over Goliath and the Philistines, when David had become an inmate in Saul's house (1 Sam. xviii. 2), and immediately after the commencement of his friendship with Jonathan. In accordance with the promise which he made before the engage- ment with Goliath (xxii. 25), Saul betrothed Merab to David (xxii. 17), but it is evidently implied that one object of thus rewarding his valor was to invite him to further feats, which might at last lead to his death by the Philistines. David's hesitation looks as if he did not much value the honor—at any rate before the marriage Merab's younger sister Michal had displayed her attachment for David, and Merab was then married to Adriel the Me-
where called Meremoth (Neh. xii. 3), a confusion being made between the letters י and ב. The Pesitto-Syriac has Meromuth in both passages.

W. A. W.

MERAN (Me'ra'ni, Merana) The merchants of Meran and Theman are mentioned with the Hagaranes (Var. iii. 21) as "searchers out of understanding." The name does not occur elsewhere, and is probably a corruption of "Median" or "Midian." Junius and Tremellius give Medanai, and their conjecture is supported by the appearance of the Midianites as nomadic merchants in Gen. xxxvi. Both Median and Midian are enumerated among the sons of Keturah in Gen. xxxv. 2, and are closely connected with the Dedanim, whose "traveling companies," or caravans, are frequently alluded to (Is. xxi. 13; Ex. xxxvii. 15). Fritzsche suggests that it is the Marane of Pliny (vi. 28, 32).

W. A. W.

MERARI (מְרָאִי [unhappy, sorrowful, or, my sorrow, i. e. his mother's]: Me'pæi; [Vat. Me'pæpi, Meppapei, and once Mapepi; Alex. sometimes Meppaei: Merari]), third son of Levi, and head of the third great division (מְרָאִי) of the Levites, the Merarites, whose designation in Hebrew is the same as that of their progenitor, only with the article prefixed, מְרָאִי. Of Merari's personal history, beyond the fact of his birth before the descent of Jacob into Egypt, and of his being one of the seventy who accompanied Jacob thither, we know nothing whatever (Gen. xlviii. 8, 11). At the time of the Exodus, and the numbering in the wilderness, the Merarites consisted of two families, the Mahlites and the Mushites, Mahli and Mushi being either the two sons, or the son and grandson, of Merari (1 Chr. vi. 40, 47). Their chief at that time was Zurei, and the whole number of the family, from a month old and upwards, was 6,300; those from 30 years old to 50 were 3,200. Their charge was the boards, bars, pillars, sockets, pins, and cords of the tabernacle and the court, and all the tools connected with setting them up. In the encampment their place was to the north of the tabernacle; and both they and the Gersomites were "under the hand" of Ithamar of the Aaron. Owing to the heavy

*Note: The text is a transcription of a table from a biblical commentary or study, listing the family groups and members of the Merarite tribe, with references to various biblical passages. The text is presented in a clear and readable format, with each family group highlighted in a table structure.*
nature of the materials which they had to carry; four wagons and eight oxen were assigned to them; and in the march both they and the Gershonites followed immediately after the standard of Judah, and before that of Reuben, that they might set up the Tabernacle against the arrival of the Kohathites (Num. iii. 20, 35-37, iv. 2-33, 42-45, vii. 8, x. 17, 21). In the division of the land by Joshua, the Merarites had twelve cities assigned to them, out of Reuben, Gad, and Zebulun, of which one was Ramoth-Gilead, a city of refuge, and in later times a frequent subject of war between Israel and Syria (Josh. xxi. 7, 31-39; 1 Chr. vi. 63, 77-81). In the time of David Asaiah was their chief, and assisted with 220 of his family in bringing up the ark (1 Chr. xiv. 6). Afterwards we find the Mera-
rites still sharing with the two other Levitical families the various functions of their caste (1 Chr. xxiii. 6, 21-25). Thus a third part of the singers and musicians were Merarites, and Eleaon or Jer-
duthun was their chief in the time of David.

[JEDETUTHUN.] A third part of the door-keepers were Merarites (1 Chr. xxiii. 5, 6, xxvi. 10, 19), unless indeed we are to understand from ver. 19 that the doorkeepers were all either Kohathites or Merarites, to the exclusion of the Gershonites, which does not seem probable. In the days of Heshiah the Merarites were still flourishing under the headship of Azariah the son of Abdi, and Azariah the son of Jehaleel, took part with their brethren of the two other Levitical families in promoting the reformation, and purifying the house of the Lord (2 Chr. xxi. 12, 15). After the return from captivity Shemiah represents the sons of Merari, in 1 Chr. ix. 14, Neh. xi. 13, and is said, with other chiefs of the Levites, to have "had the oversight of the outward business of the house of God." There were also at that time sons of Jeduthun under Osiadah or Abda, the son of Shemayah (1 Chr. ix. 16; Neh. xi. 17). A little later again, in the time of Ezra, when he was in great want of Levites to accompany him on his journey from Babylon to Jerusalem, "a man of good understanding of the sons of Mahli," was found, whose name, if the text here and at ver. 24 is borne without genitive, "Jeshua, the son of the sons of Merari," with twenty of his sons and brethren, came with him at the same time (Ezr. viii. 18, 19). But it seems pretty certain that Sheribehah, in ver. 18, is the name of the Mahliite, and that both he and Hashhabiah, as well as Jeshua, in ver. 19, were Levites of the family of Merari, and not, as the actual text of ver. 24 indicates, priests. The equative יָוֶל has fallen out before their names in ver. 24, as appears from ver. 30 (see also 1 Chr. i. 14; Neh. xii. 24).

The preceding table gives the principal descents, as far as it is possible to ascertain them. But the true position of Asaiah, Mahli, and Jeduthun is doubtful. Here too, as elsewhere, it is difficult to decide when a given name indicates an individual, and when the family called after him, or the head of that family. It is sometimes no less difficult to decide whether any name which occurs repeatedly designates the same person, or others of the family, who bear the same name, e. g. in the case of Mahli, Hilkiah, Shimei, Kish or Kish, and others. As regards the confusion between Ethan and Jedu-

thun, it may perhaps be that Jeduthun was the patronymic title of the house of which Ethan was the head in the time of David. Jeduthun might have been the brother of one of Ethan's direct ancestors before Hashhabiah, in which case Hash-
biah in 1 Chr. xxv. 3, 19 might be the same as Hashhabiah in vi. 45. Hosah and Oded-edom seem to have been other descendants or chumsen of Jeduthun, who lived in the time of David; and, if we may argue from the names of Hosah's sons, Suni and Hilkiah, that they were descendants of Shomer and Hilkiah, in the line of Ethan, the inference would be that Jeduthun was a son either of Hilkiah or Amanziah, since he lived after Hilkiah, but before Hashshub. The great advantage of this supposition is, that while it leaves to Ethan the patronymic designation Jeduthun, it draws a wide distinction between the term "sons of Jeduthun" and "sons of Ethan," and explains how in David's time there could be sons of those who are called sons of Jeduthun above thirty years of age (since they filled offices, 1 Chr. xxvi. 10), at the same time that Jeduthun was said to be the chief of the singers. In like manner it is possible that Zaziah may have been a brother of Melich or of Abdi, and that if Abdi or Bari had other descendants besides the lines of Kish and Eleazar, they may have been reckoned under the headship of Zaziah. The families of Merari which were so reckoned were, according to 1 Chr. xxiv. 27, Shoham, Zacear (ap-

A. C. H.

2. (Mepapì: [Vat. Mepapie: Sin.] Alex. in Jud. viii. 1, Mepapie: [Sin. in xvi. 7, Mepapie:] Merari.) The father of Judith (Jud. viii. 1, xvi. 7).

* MERA'RITES (ΜΕΡΑΡΙΤΕΣ : Mepapi, Vat.-peti: Merarite), descendants of Merari, Num. xxvi. 57. [MERARI I.]

MERATHM. THE LAND OF (ΜΕΡΑθμ: terra dominantium), that is, of double rebellion (a dual form from the root מִנָּהוּ : Ge-
senius, Thes. p. 819 a; First, Hdbb. p. 790 b), alluding to the country of the Chaldeans, and to the double captivity which it had inflicted on the nation of Israel (Jer. i. 21). This is the opinion of Gesenius, First, Michaelis (lilie für Ungeliebten), etc., and in this sense the word is taken by all the versions which the writer has consulted, excepting that of Junius and Tremellius, which the A. V. — as in other instances — has followed here. The LXX. ἐκινέτησε γῆν, λέγει κείμενον, περὶ κρώς καὶ περὶ φύλακα, etc., take the root in its second sense of "letter."

G.

MERCURIUS (Μερκυριος, [Acts xiv. 12, Properly Hermes, the Greek deity, whom the Romans identified with their Mercury the god of commerce and bargains. In the Greek mythol-
egy Hermes was the son of Zeus and Maia the daughter of Atlas, and is constantly represented as the companion of his father in his wanderings upon earth. On one of these occasions they were trav-

Their cities were Jehonam, Karkath, Binmah, Nahash, in Zebulon; Bezer, Jannah, Kedemoth, Kaphath, in Reuben; Ramoth, Mahanaim, Hebron, and Jazer, in Gad. But in 1 Chr. vi., instead of the four in Zebulon, only Rimon and Tabor are named though the total is given as twelve in ver. 63.
MERCY-SEAT (מָרֵמֶג [heights]: מַרְמֵם, [Vat. Meremuth]; Alex. Marumoth, Ezr. viii. 33; Paev., Neh. iii. 4; Merumoth, Neh. iii. 21: Meremoth, [Mermuth, Merumoth]). 1. Son of Elisah, great-grandson of the high priest Hilkiah, the head of the seventh course of priests as established by David. On the return from Babylon the children of Koz were among those priests who were unable to establish their pedigree, and in consequence were put from the priesthood as polluted (Ezr. ii. 61, 62). This probably applied to only one family of the descendants of Koz, for in Ezr. viii. 33, Meremoth is clearly recognized as a priest, and is appointed to weigh and register the gold and silver vessels belonging to the Temple, which Ezra had brought from Babylon, a function which priests and Levites alone were selected to discharge (Ezr. viii. 24-30). In the rebuilding of the wall of Jerusalem under Nehemiah we find Meremoth taking an active part, working between Meshulam and the sons of Hassnah who restored the Fish Gate (Neh. iii. 4); and himself restoring the portion of the Temple wall on which abutted the house of the high-priest Eliahub (Neh. iii. 21). Burrington (genealogies, ii. 154) is inclined to consider the two mentioned in Neh. iii. by the same name as distinct persons, but his reasons do not appear sufficient.

In 1 Esdr. viii. 62, he is called "Mermoth the son of Iri."

- The A. V. ed. 1611 follows the Geneva version in reading Meremoth in Neh. iii. 4, 21; comp. Meremoth 3. The Bishops' Bible also reads Merimoth in Neh. iii. 21 and xii. 3.

2. (Marumoth; [Vat. Iermouf; F.A. Hesermouf]; Merimoth.) A priest, or more probably a family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). The latter supposition is more probable, because in Neh. xii. 3 the name occurs, with many others of the same list, among those who went up with Zerubbabel a century ago.
of the latter explanation that in some of the Greek versions of 1 Chr. xii. and x., the name is given as Memphib-bal. A trace of the same thing is visible in the reading of the Alex. LXX. given above. If it is not a mere error, then there is perhaps some connection between the name of Merib-bal and that of his aunt Merab.

Neither is it clear why this name and that of Ish-bosheth should be given in a different form in these genealogies to what they are in the historical narrative. But for this see ISH-BOSHETH and MERIB-HOSHEI'I.

G. MERTONTH is the reading of the A. V. ed. 1611 in Neh. iv. 21, x. 5, and xii. 3, for which the more correct form, "Meremoth," has been substituted in later editions. [MEROI)ITH and MEROITH].

MERODACH-BALDAN (מָרֹדָךְ בַּלָּדָן, Mero'dach-bal'dan) is mentioned only once in Scripture, namely, in Jer. i. 2, where Bel and Merodach are coupled together, and threatened with destruction in the fall of Babylon. It has been commonly concluded from this passage that Bel and Merodach were separate gods; but from the Assyro-Babylonian inscriptions it appears that this was not exactly the case. Merodach was really identical with the famous Babylonian Bel or Belus, the word being probably at first a mere epithet of the god, which by degrees superseded his proper appellation. Still a certain distinction appears to have been maintained between the two names. The golden image in the great Temple at Babylon seems to have been worshipped distinctly as Bel rather than Merodach, while other idols of the god may have represented him as Merodach rather than Bel. It is not known what the word Mero'dach means, or what the special aspect of the god was, when worshipped under that title. In a general way Bel-Merodach may be said to correspond to the Greek Jupiter. He is the old man of the gods," the judge," and has the gates of heaven under his especial charge. Nélchaudézlar calls him "the great lord, the senior of the gods, the most ancient," and Negkislarar the "first-born of the gods, the layer-up of treasures." In the earlier period of Babylonian history he seems to share with several other deities (as Nebel, Nergal, Bel-Ninurta, Ann, etc.) the worship of the people, but in the later times he is regarded as the source of all power and blessings, and thus concentrates in his own person the greater part of that homage and respect which had previously been divided among the various gods of the Pantheon. Astrologically he is identified with the planet Jupiter.

His name forms a frequent element in the appellations of Babylonian kings, e. g. Merodach-Baladan, Evil-Merodach, Merodach-adn-akli, etc., and is found in this position as early as B.c. 1650. (See the Essay by Sir H. Rawlinson "On the Religion of the Babylonians and Assyrians," in Rawlinson's "History," i. 627-631.)

G. R.
MERODACH-BALADAN was familiar to the Jews, as it has been to many other nations. The orthography "Merodach" is, however, to be preferred; since this element in the king's name is undoubtedly identical with the appellation of the famous Babylonian deity, who is always called "Merodach," both by the Hebrews and by the native writers. The name of Merodach-Baladan has been clearly recognized in the Assyrian inscriptions. It appears under the form of Marudach-Baladanes, or Marudach-Baladan, in a fragment of a document preserved by Eusebius (Chron. Cai. pars i. v. 1); and under that of Marduc-empal (or rather Mardoc-empal) in the famous "Canon of Ptolemy." Josephus abbreviates it still more, and calls the monarch simply "Baladas." (Ant. Jud. x. 2, § 4).

The Canon gives Merodach-Baladan (Merodach-empal) a reign of 12 years—from b. c. 721 to b. c. 709—and makes him succeed by a certain Archeus. Polyhistor assigns him a six months' reign, immediately before Elbasus, or Belbus, who (according to the Canon) ascended the throne b. c. 702. It has commonly been seen that these must be two different reigns, and that Merodach-Baladan must therefore have been deposed in b. c. 709, and have recovered his throne in b. c. 702, when he had a second period of dominion lasting twenty years. However it may be, the recovery of Hezekiah, which accompanied the recovery of Hezekiah, would doubtless have attracted the attention of the Babylonians; but it was probably rather the pretext than the motive for the formal embassy which the Chaldean king dispatched to Jerusalem on the occasion. The real object of the mission was most likely to effect a league between Babylon, Judea, and Egypt (Is. xx. 5, 6), in order to check the growing power of the Assyrians. Hezekiah's exhibition of "all his precious things" (2 K. xx. 13) would thus have been, not a mere display, but a mode of satisfying the Babylonian ambassadors of his ability to support the expenses of a war. The league, however, though designed, does not seem to have taken effect. Sargon, acquainted probably with the intentions of his adversaries, anticipated them. He sent expeditions both into Syria and Babylon; and however it may have been, he at last found an opportunity to return. In b. c. 703 or 702, Babylon was plunged in anarchy—the Assyrian yoke was thrown off, and various native leaders struggled for the mastery. Under these circumstances the exiled monarch seems to have returned, and recovered his throne. His adversary, Sargon, was dead or dying, and a new and untried prince was about to rule over the Assyrians. He might hope that the reins of government would be held by a weaker hand, and that he might stand his ground against the son, though he had been forced to yield to the father. In this hope, however, he was disappointed. Sennacherib had scarcely established himself on the throne, when he proceeded to engage his people in wars; and it seems that his very first step was to invade the kingdom of Babylon. Merodach-Baladan's name has many parallels. (See Rawlinson's Herodotus, vol. i. p. 435, note 1.)

a In the uncial writing A is very liable to be mistaken for D, and in the ordinary manuscript character Λ is not unlike φ. M. Bunson was (we believe) the first to point out that there had been a confusion of the Λ for the Λ in this instance. See his work, Egypt's Place in Universal History, vol. i. p. 725, E. T. The

b Josephus expressly states that Merodach-Baladan sent the ambassadors in order to form an alliance with Hezekiah (Ant. Jud. x. 2, § 2).
BARADAN had obtained a body of troops from his ally, the king of Susians; but Senacherdib defeated the combined army in a pitched battle; after which he ravaged the entire country, destroying 70 walled cities and 820 towns and villages, and carrying vast numbers of the people into captivity. Merodach-Baradon fled to "the islands at the month of the Enuphants" (Fox Talbot's Assyrian Texts, p. 1) — traits probably not joined to him afterwards — and succeeded in eluding the search which the Assyrians made for him. If we may believe Polyaenus however, this escape availed him little. That writer relates (ep. Euseb., Chron. Can. i. 5), that he was soon after put to death by Eshparus, or Belshas, the victor whom Senacherdib appointed to represent him at Babylon. At any rate he lost his reconored crown after wearing it for about six months, and spent the remainder of his days in exile and obscurity.

G. R.

MEROM, THE WATERS OF (בֵּית חַיִּים [waters of the height, or from above]; 70 בֵּית מַעַּר [Vat. Mappar], and so Alex. ver. 7); Alex. in ver. 5, מַעַּר: בֵּית מַעַּר [Merome], a place memorable in the history of the conquest of Palestine. Here, after Joshua had gained possession of the southern portions of the country, a confederacy of the northern chiefs assembled under the leadership of Jabin, king of Hazor (Josh. x. 15), and here they were encountered by Joshua, and completely routed (ver. 7). The battle of Merom was to the north of Palestine what that of Beth- horon had been to the south, — indeed more, for there do not appear to have been the same number of important towns to be taken in detail after this victory that there had been in the former case.

The name of Merom occurs nowhere in the Bible but in the passage above mentioned; nor is it found in Josephus. In his account of the battle (Ant. v. 1, § 18), the confederate kings encamp "near Beroth, a city of upper Galilee, not far from Kedesh," nor is there any mention of water. In the Opponantion of Eusebius the name is given as "Merom," and it is stated to be "a village twelve miles distant from Salsaca (Samaria), and near Puthaim." It is a remarkable fact that though by common consent the "waters of Merom" are identified with the lake through which the Jordan runs between Banias and the Sea of Galileae — the Senechonita, of Josephus, and el-Hilh of the modern Arabs — yet that identity cannot be proved by any ancient record. The nearest approach to proof is an inference from the statement of Josephus (Ant. v. 5, § 1), that the second Jabin (Judg. iv. v., c.) belonged to the city Asor (Hazor), which lay above the lake of Senechonita. There is no reason to doubt that the Hazor of the first and the Hazor of the second Jabin were one and the same place; and as the waters of Merom are named in connection with the former it is allowable to infer that they are identical with the lake of Senechonita. But it should be remembered that this inference is valid only if the places we have, while against it we have to set the positive statements of Josephus and Eusebius just quoted; and also the fact that the Hebrew word Me is not that com monly used for a large piece of standing water, but rather Yam, "a sea," which was even employed for so small a body of water as the artificial pond or tank in Solomon's Temple. This remark would have still more force if, as was most probably the case, the lake was larger in the time of Joshua than it is at present. Another and greater objection, which should not be overlooked, is the difficulty attendant on a flight and pursuit across a country so mountainous and impassable to any large numbers, as the district which intervenes between the Halch and Sidon. The tremendous ravine of the Tell el-Sajur, the ancient Kedlah or Simeon below, is one of the most formidable obstacles which stand in the way of a passage in this direction. As however the lake in question is invariably taken to be the "waters of Merom," and as it is an interesting feature in the geography of the upper part of the Jordan, it may be well here to give some account of it.

The region to which the name of Halch is attached — the Arad el-Halch — is a depressed plain or basin, commencing on the north of the foot of the slopes which lead up to the Mtj Agin and Tell el-Enlig, and extending southwards to the bottom of the lake which bears the same name — Bevr el-Halch. On the east and west it is inclosed between two parallel ranges of hills: on the west the highlands of Upper Galilee — the Jebel Sophat; and on the east a broad ridge or table-land of basalt, thrown off by the southern base of Hermon, and extending downwards beyond the Halch till lost in the high ground east of the lake of Tiberias. The latter rises abruptly from the low ground, but the hills on the western side break down more gradually, and leave a tract of undulating table-land of varying breadth between them and the plain. This basin is in all about 15 miles long and 4 to 5 wide, and thus occupies an area about equal to that of the lake of Tiberias. It is the receptacle for the drainage of the highlands on each side.

a The mention of the name in the Vulgate of Judg. v. 18 — in locum Meronem — is only apparent. It is a literal transference of the words בֵּית חַיִּים [waters of the height, or from above]; בֵּית מַעַּר [Vat. Mappar], and so Alex. ver. 7) — and has no connection with Merom.

b Of the sources of the River Merom, and the summary of Samieni, see P. p. 230 note. To these it should be added that the name Semakah is not confined to this lake. A wady of that name, that is, the principal torrent on the east of the Sea of Tiberias.

c El-Halch, אֵל חַלכ, is probably a very ancient name, derived from or connected with Halch, or more accurately Chul, who appears in the lists of Gen. xxiv. as one of the sons of Aram (Siri, ver. 23). In the Arabic version of Saddiah of this passage, the name of Hul is given exactly in the form of the modern name el-Halch. Josephus (Ant. iv. 6, § 4), in his account of the descendants of Noah, gives Hul as Ulac, while he calls also the district in question Qdalah (Ant. iv. 19, § 3). The word both in Hebrew and Arabic seems to have the force of depression — the low land near Tiberias, a name to which the term Qdalah, Nos. 7, 279; and Mich. 614, most ingeniously suggests that it is the root of the name Kvh n. tappan, although in its present form it may have been sufficiently modified to transform it into an intelligible Greek word (Iseum, Spicilignum, II. 187 (188).
The waters of Merom are not only a significant geographical feature, but also hold historical and cultural importance. The region is described as an enormous swamp, which, though partially solidified at its upper portion by the gradual deposit of detritus from the hills, becomes more swampy as its length is descended, and at last terminates in the lake or pool which occupies its southern extremity. It was probably at one time all covered with water, and even now in the rainy seasons it is mostly submerged. During the dry season, however, the upper portions, and those immediately at the foot of the western hills, are sufficiently firm to allow the Arabs to encamp and pasture their cattle, but the lower part, more immediately bordering on the lake, is absolutely impassable, not only on account of its increasing marshiness, but also from the very dense thicket of reeds which covers it. At this part it is difficult to say where the swamp terminates and the lake begins, but farther down on both sides the shores are perfectly well defined.

In the form the lake is not far from a triangle, the base being at the north and the apex at the south. It measures about 3 miles in each direction. Its level is placed by Van de Velde at 120 feet above the Mediterranean. That of Tell el-Kodey, 20 miles above, is 647 feet, and of the Lake Tibertis, 20 miles below, 653 feet, respectively above and below the same datum (Van de Velde, "Mensur.," 151). Thus the whole basin has an considerable slope southwards. The Hasbdajn river, which falls almost due south from its source in the great Wady et-Tein, is joined at the northeastern corner of the Arsl el-Huleh by the streams from Banias and Tell el-Kodey, and the united stream then flows on through the moorish, rather nearer its eastern than its western side, until it enters the lake close to the eastern end of its upper side. From the apex of the triangle at the lower end the Jordan flows out.

In addition to the Hasbdajn and the innumerable smaller watercourses which filter into it the waters of the swamp above, the lake is fed by independent springs on the slopes of its inclining mountains. Of these the most considerable is the Awt Melsah or the near the upper end of its western side, which sends down a stream of 40 or 50 feet in width. The water of the lake is clear and sweet; it is covered in parts by a broad-leaved plant, and abounds in water-fowl. Owing to its triangular form a considerable space is left between the lake and the mountains, at its lower end. This appears to be the more the case on the west than on the east, and the rolling plain thus formed is very fertile, and cultivated to the water's edge. This cultivated district is called the Arsl el-Khul, or the inundating land, el-Khul being also the name which the Arabs call the lake (Thomson, "Bibl. Sacra,"

199; Rob. "Bibl. Res. 1st ed. iii. App. 135, 136") In fact the name Huleh appears to belong rather to the district, and only to the lake as occupying a portion thereof. It is not restricted to this spot, but is applied to another very fertile district in northern Syria lying below Banias. A town of the same name is also found south of and close to the Kasaiyeh river a few miles from the castle of Hulun.

Supposing the lake to be identical with the "waters of Merom," the plain just spoken of on its southwestern margin is the only spot which could have been the site of Joshua's victory, though, as the Canaanites chose their own ground, it is difficult to imagine that they would have encamped in a position from which there was literally no escape. But this only strengthens the difficulty already expressed as to the identification. Still the district of the Huleh will always possess an interest for the Biblical student, from its connection with the Jordan, and from the cities of ancient fame which stand on its border — Kadesh, Hazor, Dan, Laish, Caesarea, Philippi, etc.

The above account is compiled from the following sources: "The Sources of the Jordan," etc. by Rev. W. M. Thomson, in "Bibl. Sacra," Feb. 1845, pp. 198-201; Robinson's "Bibl. Res." (1st ed. ii. 341-343, and App. 135), ii. 435, 436, iii. 395, 396; Wilson, 

187 no(e); and from the lakes, 316; Van de Velde, "Syria andPalestine." Stanley, S. P. of chap. xi. [To these add Tristram's "Land of Israel," 2d ed., pp. 582-583.]

The situation of the Beroth, at which Josephus (as above) places Joshua's victory, is debated at some length by Michaelis ("Alby Bibliothek," etc., No. 81), with a strong desire to prove that it is Berytus, the modern Beirut, and that Kedeshe is on the lake of Hamam (Emessa). His argument is grounded mainly on an addition of Josephus ("Ant. v. 1, § 18") to the narrative as given both by the Hebrew and LXX., namely, that it occupied Joshua's position for five days to furnish the table of the kings. For this the reader must be referred to Michaelis himself. But Josephus elsewhere mentions a town called Meroth, which may possibly be the same as Beroth. This seems to have been a place naturally strong, and important as a military post (Titus, § 37; B. J. ii. 20, § 6), and moreover

"Yam Chavlah, הַיָּם הַכָּבָלָה;" though this may merely be his translator's blunder for Culubah, i. e. Huleh.

b This undulating plain appears to be of volcanic origin. Van de Velde ("Syria andPalestine," 415, 416), speaking of the part below the Wady Perumia, a few miles only of the lake, calls it "a plain entirely composed of lava;" and at the Jar-Benat-Yakh be speaks of the "black lava sides" of the Jordan. Wilson, however, (p. 316), calls the soil of the same part the "debris of basaltic rocks and dykes."

c The writer has not succeeded in ascertaining the signification of this Arabic word. By Schwarz (p. 47) it is given as "Bachr Chit, 'wheat sea,' because much wheat is sown in its neighborhood." This is probably what Prof. Stanley alludes to when he reports the name as Bahr Hit or 'sea of wheat' (S. P. 291 note).
was the western limit of Upper Galilee (B. J. iii. 
3, § 1). It is, therefore, place it is impossible to mention the
plains of Abba, much more suitable ground for the
shepherds of the Canaanites than any to be found
near Kishon, while it also makes the account
of the pursuit to Sidon more intelligible.

G. MERONOTH, THE (ME'RONOTH
[gentile]: & מֵרְוֹנֶה, Alex. Meron; the Hebrew

name is Fr. F. oxilij; MERONOTIIS), that is, the native of a
place called probably Meronoth, of which, however, no further
traces have yet been discovered. Two Meronoths
are named in the Bible: (1) Jehiel,
who had the charge of the royal asses of King David
(1 Chr. xxvii. 30); and (2) Jael, one of those
who assisted in the repair of the wall of Jerusalem
after the return from the Captivity (Neh. ii. 7).
In the latter case we are possibly attended a cloud to
the situation of Meronoth by the fact that Jael is
mentioned between a Gibonite and the men of
Gibea, who again are followed by the men of
Mizpah; but no name is to be found among the towns of that
district, either in the lists of Joshua
(xviii. 11-28), of Nehemiah (xi. 31-36), or in the
catalogue of modern towns given by Robinson
(Bibl. Res. 1st ed. i. Appendix 121-125).

For this circumstance compare MACHRAITHY. G.

ME'ROZ (מְרוֹז) [prob. ref. fr. Gen.]: เมרווז; Alex. Μερόζ: Jeroz, a place mentioned
only in the Song of Deborah and Barak in Judg.
v. 29, and here denominated because its inhabitants
had refused to take any part in the struggle with
Sisera: —

"Curse ye Meroz, said the messenger of Jehovah,
Curse ye, curse ye, its inhabitants;
Because they came not to the help of Jehovah,
To the help of Jehovah against the mighty." (Judg. v. 29)

The denunciation of this faint-heartedness is made

to form a pendant to the blessing proclaimed on the
prompt action of Jael.

Meroz must have been in the neighborhood of
the Kishon, but its real position is not known:
possibly it was destroyed in obedience to the curse.
A place named Meris (but Eusebius Μπόζδης)

is named by Jerome (Onom. Mus. "Meron") as 12 miles
north of Scasnte, near Bethan, but this is too far
south to have been near the scene of the conflict.
Far more likely is the conjecture of Schwartz (Bill.,
and see loc.), that Meroz is to be found at Meron
— more correctly L. Maurianus — a ruined site about
4 miles N. W. of Raisum, on the southern slopes of
the hills, which are the continuation of the so-called
"Little Hermom," and form the northern side of the valley
(Weid. Judah) which leads directly from the plain of Jezreel to the Jordan. The town
must have commanded the Pass, and if it were a
people attempted, as the Medinites did when
ruined by Gideon, to escape in that direction, its
inhabitants might in due time have prevented their
being so, and have slaughtered them. L. Maurianus
is mentioned by Bunsen (July 2: he calls it
Meronoza), Robinson (ii. 336), and others.

Furst (Handb. 786 s) suggests the identity of
Meroz with Meruzon, the place situated a given
its position to the western part of Meron, in the neigh-
borhood of which Kedesh, the residence of Jael, where
Sisera took refuge, was situated. But putting
aside the fact of the non-existence of any town
named Meron, there is against this suggestion the

consideration that Sisera left his army and fled
about another direction.

In the Jewish traditions preserved in the Com-
mentary on the Song of Deborah attributed to St Jerome, Meroz, which may be interpreted as secret,
has been signified to the evil angels who led on the
Canaanites, who are cursed by Michael, the ange
of Jehovah, the leader of the Israelites. G.

* The scene of the battle was near the Kishon;
but nothing in Deborah's ode or the narrative
obliges us to find Meroz in just that
neighborhood. The combatants were summoned from all
parts of the land. This custom raises the question
whether Meroz may not be the present Meiron,
the place of the famous Jewish cemetery, about 6 miles
west of Safed. It would lie on the way between
Kedesh ( Kbises), where Barak dwelt (Judg. iv. 12),
and Tabor, so that as he marched thither from the
north he would naturally summon the Merozites to
join his standard (Land and Book, 1. 424). This
conflict, instead of being of less importance than that furnished by
the slight resemblance of the names, but it does not
prove much. Yet the Jews have given Deborah's name to a fountain near Meiron (DEBORAH, vol. i. p. 576, note). Possibly Meiron is Meoroth, a place
mentioned by Josephus and fortified by him.
See Kammer's Palastland, p. 135 (4th Aufl.).

II. ME'RUTH (אֱמָרִוט; [Vat. Emaroo]: Emrou;)
A corruption of IS-
mer, in Ezr. ii. 57 (1 Esdr. v. 24).

ME'SECH (אשכ, perhaps = סכ, retreat, Got.:
Masroj: Alex. Μασσρην: Μασσοϊ, the name
of one of the geographical limits of the Joktanites
when they first settled in Arabia: "And their
dwelling was from Measha (קָּנָה) unto
Sephur, a mount of the East." (Gen. x. 30).
This position of the Joktanites established is clearly
determined from the traces they have left in the
ethnology, language, and monuments of Southern
Arabia; and without putting too precise a limita-
tion on the possible situation of Measha and Sephar,
we may suppose that these places must have fallen
within the southwestern quarter of the peninsula;
including the modern Yemen on the west, and the
districts of Qumah, Mahrib, Sabir, etc., as far as
Hudainmait, on the east. These general boundaries
are strengthened by the identification of Sephar
with the port of Zefirith, or Dhofrithi; though the
site of Measha may possibly be hereafter connected
with the old Himyrite metropolis in the Yemen
(see ARABIA, vol. i. p. 140), and Sephar,
but this would not materially alter the question.
In the Arabian peninsula, the line of the early
settlements, whether its site be the seaport or the
inland city: and the correctness of this supposition
appears from the Biblical record, in which
the migration is apparently from west to east, from
the probable course taken by the immigrants, and from the
greater importance of the known western settle-
ments of the Joktanites, or those of the Yemen.
If then Measha was the western limit of the Jok-
tanites, it must be sought for in northwestern
Yemen. But the identifications that have been
proposed are not satisfactory. The seaport called
Marot or Malea, mentioned by Ptolemy, Pliny
Arrian, and others (see Dictionary of Geography)
MESHA (טָמַשָׁה) [deliverance]: Moa': Jos. Moa': Mosha'.

1. The king of Moab in the reigns of Ahaz and his son Ahaziah and Jehoram, kings of Israel (2 K. iii. 4), and tributary to the first. Probably the allegiance of Moab, with that of the tribes east of Jordan, was transferred to the northern kingdom of Israel upon the division of the monarchy, for there is no account of any subjugation of the country subsequent to the war of extinction with which it was visited by David, when Benjamin displayed his prowess (2 Sam. xxvii. 20), and the Moabites became David's servants, bearers of gifts (2 Sam. viii. 2). When Ahah had fallen in battle at Ramoth Gilead, Mesha seized the opportunity afforded by the confusion consequent upon this disaster, and the feeble reign of Ahaziah, to shake off the yoke of Israel and free himself from the burdensome tribute of "a hundred thousand rams, and a hundred thousand rams and a hundred thousand sheep with their wool." The country east of the Jordan was rich in pasture for cattle (Num. xxxii. 1), the chief wealth of the Moabites consisted in their large flocks of sheep, and the king of this pastoral people is described as "nokhid (נְהַכָּד), a shepherd-master," or owner of herds. About the signification of this word nokhid there is not much doubt, but its origin is obscure. It occurs but once besides, in Am. i. 1, where the prophet Amos is described as "among the herdmen (גֹּזְלִים, nokodium) of Tekoa." On this Kimchi remarks that a herdsman was called nokhid, because most cattle have black or white spots (comp. דַּגְלָא, nokhid, Gen. xxx. 22, A. V. "speckled"), or, as Buxtorf explains it, because sheep are generally marked with certain signs so as to be known. But it is highly improbable that any such etymology should be correct, and Furst's conjecture that it is derived from an obsolete root, signifying to keep or feed cattle, is more likely to be true (Concord. s. v.).

When, upon the death of Ahaziah, his brother Jehoram succeeded to the throne of Israel, one of his first acts was to secure the assistance of Jehoshaphat, his father's ally, in reducing the Moabites to their former condition of tributaries. The united armies of the two kings marched by a circuitous route round the Dead Sea, and were joined by the forces of the king of Edom. [Jehoram.] The disordersd soldiers of Moab, eager only for spoil, were surprised by the warriors of Israel and their allies, and became an easy prey. In the panic which ensued they were slaughtered without mercy, their country was made a desert, and the king took refuge in his last stronghold and defended himself with the energy of despair. With 700 fighting men he made a vigorous attempt to cut his way through the beleaguering army, and when beaten back, he withdrew to the wall of his city, and "there, in sight of the allied host, offered his first-born son, his successor in the kingdom, as a burnt offering to Chemosh, the ruthless fire-god of Moab. His bloody sacrifice had so far the desired effect that the besiegers retired from him to their own land. There appears to be no reason for supposing that the son of the king of Edom was the victim on this occasion, whether, as K. Joseph Kimchi supposed, he was already in the power of the king of Moab, and was the cause of the Edomites joining the armies of Israel and Judah; or whether, as K. Moses Kimchi suggested, he was taken prisoner in the sally of the Moabites, and sacrificed out of revenge for its failure. These conjectures appear to have arisen from an attempt to find in this incident the event to which allusion is made in Am. ii. 1, where the Moabite is charged with burning the bones of the king of Edom into lime. It is more natural, and renders the narrative more vivid and consistent, to suppose that the king of Moab, finding his last resource fail him, endeavored to avert the wrath and obtain the aid of his god by the most costly sacrifice in his power. [Moab.]

2. [Adon.] Maporad; [Vat. Mapura]: Alex. Maporas; [Comp. Meverd; Abd. Maor: Mosha': Mosha'.

The eldest son of Caleb the son of Hezron by his wife Azubah, as Kimchi conjectures (1 Chr. ii. 42). He is called the father, that is the prince or founder, of Ziph. Both the Syriac and Arabic versions have "Elishamma," apparently from the previous verse, while the LXX., unless they had a different reading מופש, seem to have repeated "Mareahkath," which occurs immediately afterwards.

3. [הָרִאשׁ] [retreat, Ges., firmness, Fürst: Mord; Alex. Mera: Moa': Mosha'.

A Benjamite, son of the origin, which denotes an inferior kind of sheep, ugly and little valued except for its wool. The keeper of such sheep is called נֶפֶס, nokhid, which Bochart identifies with nokhid. But if this be the case, it is a little remarkable that the Arabic translator should have passed over a term apparently so appropriate, and followed the version of the Targum, "an owner of flocks." Gesenius and Lee, however, accept this as the solution.
Shinaraim, by his wife Hodek, who bore him in the land of Mab (1 Chr. viii. 9). The Vulgate and Alex. MS. must have had the reading Meshelek.

Meshelek (מיכל) [see below]: Moses' name in Alex. MS. (Mosek). The name given to Michael, one of the companions of Daniel, and like him of the blood royal of Judah, who with three others was chosen from among the captives to be taught "the learning and the tongue" of the Chaldeans" (Dan. i. 4), so that they might be qualified "to stand before" king Nebuchadnezzar (Dan. i. 5) as his personal attendants and advisers (i. 20). During their three years of preparation, they were maintained at the king's cost, under the charge of the chief of the eunuchs, who placed them with "the Melzar," or chief butler. The story of their simple diet is well known. When the time of their probation was ended, such was the knowledge and skill in all learning and wisdom "which God had given them, that the king found them "ten times better than all the magicians and astrologers that were in all his realm" (i. 20).

Upon Daniel's promotion to be "chief of the magicians," his three companions, by the influence of some, were set over "the affairs of the province of Babylonia" (ii. 49). But, notwithstanding their Chaldean education, these three young Hebrews were strongly attached to the religion of their fathers; and their refusal to join in the worship of the image on the plain of Dura gave a handle of accusation to the Chaldeans, who were jealous of their advancement, and eagerly reported to the king the heretical conduct of these "Jewish men" (iii. 12), who stood so high in his favor. The rage of the king, the swift sentence of condemnation passed upon the three offenders, their marvellous preservation from the fiery furnace heated seven times hotter than usual, the king's acknowledgment of the God of Shadrach, Meshach, and Abednego, with their restoration to office, are written in the 3d chapter of Daniel, and there the history leaves them. The name "Meshelek" is rendered by Fürst (Handb.) "a ram" and derived from the Sanskrit mokshá. He goes on to say that it was the name of the Sun-god of the Chaldeans, without giving any authority, or stopping to explain the phenomenon presented by the name of a Chaldean divinity with an Aryan etymology. That Meshach was the name of the Sun-god of the Chaldeans is extremely probable, from the fact that Daniel, who had the name of Belteshazzar, was so called after the god of Nebuchadnezzar (Dan. iv. 8), and that Abednego was named after Nego, or Nebu, the Chaldean name for the planet Mercury.

W. A. W.

Meshelek (מִשְׁלֶךְ) [shining or soaring, possession]: Moses', [Mosek]. [Mosek]: Alex. MS. (Mosek), once Mosek, in Ps. exx. 5, and Ez. xxvii. 13 (LXX. translates): Meshach, Meshach, A. V. Ps. exx. 5, a son of Dapheth (Gen. x. 2; 1 Chr. i. 5), and the proper adjective of a race frequently noticed in Scripture in connection with Tubal, Magog, and other northern nations. They appear as allies of Gog (Ez. xxxviii. 1, 3, xxxix. 1), and as supplying the Tyrians with copper and slaves (Ez. xxxvii. 13); in Ps. cx. 5, they are noticed as one of the remotest, and at the same time rudest nations of the world. Both the name and the associations are in favor of the identification of Meshach with the Medes: the form of the name adopted by the LXX. and the Vulg. approaches most nearly to the classical designation, while in Peshito (B. G. iv. 2) we meet with another form (Meshelech) which assimilates to the Hebrew. The position of the Medes in the age of Ezekiel was probably the same as is described by Herodotus (iii. 44), namely, on the borders of Cilicia and Armenia, where a mountain chain connecting Anti-Taurus with Caucasus was named after them the Moschic Montes, and where was also in the district named by Strabo (xi. 497-499) Mounter. In the same neighborhood were the Tiberienses, who have been generally identified with the Biblical Tubal. The Cilician tribes, the Chaldaeans more especially, were skilled in working metals, and hence arose the phrase "of brass" with Tyre; nor is it at all improbable that slaves were largely exported thence as new from the neighboring district of Georgica. Although the Medes were a comparatively unimportant race in classical times, they had previously been one of the most powerful nations of Western Asia. The Assyrian monarchs were engaged in frequent wars with them, and it is not improbable that they had occupied the whole of the district afterwards named Cappadocia. In the Assyrian inscriptions the name appears under the form of Medik: a somewhat similar name, Medesh, appears in an Egyptian inscription, which commemorates the achievements of the third Raameses (Wilkinson, Anc. Egypt. i. 308, Abbild.). The subsequent history of Meshelek is unknown. Knobel's attempt to connect them with the Ligurians (Valkert, p. 140, sqq.) is devoid of all solid ground. As far as the name and locality are concerned, Meshelech is a more probable hypothesis (Rawlinson, Herod. ii. 652, 653).

W. L. B.

Meshelemaiah (מֵשֶׁלֶמְיָה) [whom Jehovah recomposes]: Moses, Moses, [Moselemaia]: Alex. MS. (Moselemaia), 1 Chr. xxii. 21: Moses, Moses, [Moselemaia], [Moselemaia]: Mosel, Mosel, Mosel, Mosel, Musel, Musel, Musel: Moses, Moses: Meshelemaiah, 1 Chr. xxvi. 1, 2, 9). A Kohite, son of Kore, of the sons of Asaph, who with his seven sons and his brethren, "sons of might," were porters or gate-keepers of the house of Jehovah in the reign of David. He is evidently the same as Meshelemaiah (1 Chr. xxvi. 14), to whose custody the East Gate, or principal entrance, was committed, and whose son Zedechiah was a wise counsellor, as the Psalmist selects the two nations for the very reason which is regarded as an objection, namely, their remoteness from each other, though at the same time their wild and uncivilized character may have been the ground of the selection, as Hengstenberg (Comm. in loc.) suggests. We have already had to say of the Chaldeans, that the Medes in this passage is the Meshelemaiah of 1 Chr. i. 5, and the Babylonian Mesene. [Mose].
Likewise (Vat. Meshezabel.) W. Jotham men sidam.) Ephraimite, MOTH. Lemith. uwO;] tor scendant sealed "4). miah lived aaWa/x.) Sallu, which the the heads MESHUL’LAM 2. of 1. which of the heads of the people, probably a family, who sealed the covenant with Nehemiah (Neh. xii. 21). (3. (Bash[a]: FA. 3d hand, Bash[esba]: Meschezabel.) The father of Pethahiah, and descendant of Zerah the son of Judah (Neh. xii. 24). * In Neh. xi. 24 the A. V. ed. 1611 has the more correct form, Meshezabel. A. MESHILEMITH (ןֶּשֶׁלֶּמֶת) [see next word] Meshemeth: Alex. Meshollam: Meshillemeth: Moshillemoth: The son of Immer, a priest, and ancestor of Amassai or Masasi, according to Neh. xi. 13, and of Bushur and Abiah, according to 1 Chr. ix. 12. In Neh. xi. 13 he is called Meshillemith. MESHILEMOTH (ןֶּשֶׁלֶּמְוֹת) [retributions, requital] Mesholameth: [Vat. Mosollam: Mosollamoth:] Alex. Mosollam: Mosollamoth. An Ephrinit, ancestor of Berechiah, one of the chiefs of the tribe in the reign of Pekah (2 Chr. xxviiii. 12). (2. (Mesuram: [Vat. Alex. FA.3 omit; FA.3 Masollami:] Neh. xi. 13. The same as Meshillemith. MESHULLAM (מְשֶׁלֹם) [friend, associate]. 1. (Mesolla: Alex. Mesolla: Mesollam: Mesollam.) Ancestor of Shephatin the scribe (2 K. xii. 3). 2. (Mosolla: [Vat. Mosollami:] Alex. Mosollam: Mosollami: Mosollam.) The son of Zerubbabel (1 Chr. iii. 19). 3. (Mesollami: [Vat. [rather, Rom.] and Alex. Mosollami [Vat. Mosollami:] A Gadite, one of the chief men of the tribe, who dwelt in Bashan at the time the genealogies were recorded in the reign of Jotham king of Judah (1 Chr. v. 13). 4. (Mosolla: A Benjamite, of the sons of Elpaal (1 Chr. viii. 17). 5. (In 1 Chr. Mosolla, Vat. Mosolla; in Neh. Mosollami: FA. A Mesollami.) A Benjamite, son of Shaphan, who married to Shallum, the son of Shallum, and father of Shallum (1 Chr. ix. 7; Neh. xi. 7). 6. (Mesollami: Vat. Mesolla: Alex. Meshollam: Alex. Meshollam.) A Benjamite, son of Shephathiah, who lived at Jerusalem after the captivity (1 Chr. ix. 3). 7. (In 1 Chr. Mosolla, Vat. Mosollami in Neh. Mesollami: Vat. Mesollami: Alex. Mosollami.) The same as Shallum, who was high-priest probably in the name of Amon, and father of Hinah (1 Chr. ix. 11; Neh. xi. 11). His descent is traced through Zabok and Meremoth to Ahiut; or, as is more probable, the names Meremoth, Ahiut, and transposed, and his descent is from Meremoth as the more remote ancestor (comp. 1 Chr. vi. 7). 8. (Mosollami.) A priest, son of Meshillemith, or Meshillemoth, the son of Immer, and ancestor of Masasi or Anasai (1 Chr. xii. 10; comp. Neh. xii. 13). His name does not occur in the parallel list of Nehemiah, and we may suppose it to have been omitted by a transcriber in consequence of the similarity of the name which follows; or in the passage in which it occurs it may have been added from the same cause. 9. (Mosollami.) A Kohathite, or family of Kohathite Levites, in the reign of Josiah, who were among the overseers of the work of restoration in the Temple (2 Chr. xxxiv. 12). 10. (Mesollami: [Vat. Mesollami:] One of the "heads" (A. V. "chief men") sent by Ezra to help "the holy men to join the caravan about to return to Jerusalem (Ezr. viii. 16). Called Mosollammon in 1 Esdr. viii. 44. 11. (Alex. Mesolla: [Vat. FA. Mesolla: Mesollam:] Alex. chief man in the time of Ezra, probably a Levite, who assisted Jonathan and Jahaziah in abolishing the marriages which some of the people had contracted with foreign wives (Ezr. x. 15). Also called Mosollam in 1 Esdr. ix. 14. 12. (Mosollami: [Vat. with following word, Melosollam: Mosollam:] One of the descendants of Bani, who had married a foreign wife and put her away (Ezr. x. 29). Olamus in 1 Esdr. ix. 30 is a fragment of this name. 13. ([Mosolla, Neh. iii. 3, but Vat. omits:] Mesolla: Neh. iii. 30, vi. 18.) The son of Berechiah, who assisted in rebuilding the wall of Jerusalem (Neh. iii. 4), as well as the Temple wall, adjoining which he had his "chamber" (Neh. iii. 29). He was probably a priest, and his daughter was married to Johanan the son of Tobiah the Ammonite (Neh. vi. 18). 14. (Mesolla:) The son of Besodeiah: he assisted Jehoiada the son of Paseah in restoring the old gate of Jerusalem (Neh. iii. 6). 15. (Mesolla: [Vat. FA.3 omit; FA.3 Alex. Mosollam:] One of those who stood at the left hand of Ezra when he read the law to the people (Neh. viii. 4). 16. (Mesolla:) A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 7). 17. (Mesolla: [Vat. FA.] Alex. Mesollam.) One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 20). 18. (Mesolla:) A priest in the days of Joiakim the son of Jeshua, and representative of the house of Ezra (Neh. xii. 13) 19. (Mesolla: [Vat. FA.3 omit; FA.3 Mosollam:] Likewise a priest at the same time as the preceding, and head of the priestly family of Gimmoth (Neh. xii. 16). 20. (Omitted in LXX. [but FA.3 Mosollam:]) A family of porters, descendants of Meshullam (Neh. xii. 25), who is also called Mesholeni (1 Chr. xxvii. 1), Shublemiah (1 Chr. xxvii. 24), and Shallum (Neh. vii. 45). 21. (Mesolla: [Vat. Mesolla: FA.3 Mesolla; FA.3 Mosollam:] Alex. Mosollam:
MESOPOTAMIA

One of the princes of Judah who were in the right hand company of those who marched on the wall of Jerusalem upon the occasion of its solemn dedication (Neh. xii. 34).

MESHULLEMETH

The daughter of Haran of Judah, wife of Manasseh king of Judah, and mother of his successor Amon (2 K. xx. 19).

MESOPOTAMIA (- מְשּׁתַמְאָה, Meso-pot-am'ïa; [v. p. שׁתמְא, w. p. שׁתמא]; מְשׁוֹלָמִית, w. p. מֶשׁוֹלָמִית, Meshul'lemeth), the daughter of Haran of Judah, wife of Manasseh king of Judah, and mother of his successor Amon (2 K. xx. 19).

MESOPOTAMIA, THE (מְשׁוֹלָמִית, Meso-pot'am'îa), i. e. "the Meso-potamian." See below: [Vat. F. A.] o Meso-pot-am'ia: [v. p. שׁתמְא, w. p. שׁתמא]; Meshul'lemeth, a title which occurs only once, and then attached to the name of Jashar, the last of David's guard in the extended list of 1 Chron. (xii. 47). The word retains strong traces of Zohar, one of the petty Aramean kingdoms, in which there would be nothing surprising, as David had a certain connection with these Aramean states, and this very catalogue contains the names of Moadites, Ammonites, and other foreigners. But on this it is impossible to pronounce with any certainty, as the original text of the passage is probably in confusion. Kennicott's conclusion (Dissertation, pp. 233, 234) is that originally the word was "the Mesopotamites (מְשׁוֹלָמִית), and applied to the three names preceding it.

It is an unusual thing in the A. V. to find א (its rendered by א, as in the present case. Another instance is Sitron. G.

* It cannot be "the Mesopotamite" (A. V.), as this Hebrew ending is not strictly patronymic. (See Ges. Lch sodaite, p. 504 E.) If we abide by the reading, it must be a compound name = Jashar-Meshullemath. The latter may take the article in Hebrew from its appellative force. The name of the place is unknown. First supposed it to mean "the gathering-place of Jeshar." Different readings have been suggested (see Bertheau, Bücher der Chronik).

II.

MESOPOTAMIA (מְשׁוֹלָמִית, Meso-pot'am'îa) [high land of two rivers]; Meso-pot'amia: Mesopotamia is the ordinary Greek rendering of the Hebrew Aram-Naharaim, or "Syria of the two rivers," whereof we have frequent mention in the earlier books of Scripture (Gen. xxv. 10; Deut. xxix. 4; Judg. iii. 8, 10). It is also adopted by the LXX. to represent the פַּדְת-הוֹרָאָם (Padth-Aram) of the Hebrew text, where our translators keep the term used in the original (Gen. xxv. 20, xxviii. 2, 5, etc.).

If we look to the signification of the name, we must regard Mesopotamia as the entire country between the two rivers—the Tigris and the Euphrates. This is a tract nearly 700 miles long, and from 250 to 270 miles broad, extending in a southeasterly direction from Tlkh (dat. 38° 23', long. 39° 18') to Kurnash (dat. 31° 4', long. 47° 30'). The Arabic geographers term it "the Island," a name which is almost literally correct, since a few miles only intervene between the source of the Tigris and the Euphrates at Tlkh. It is for the most part a vast plain, but is crossed about its centre by the range of the Simjar hills, running nearly east and west from about Mosul to a little below Balkh; and in its northern portion it is even mountainous, the upper Tigris valley being separated from the Mesopotamian plain by an important range, the Mons Masin of Strabo (xii. 4; 14, § 2, &c.), which ranges from Ischir.

This district is always charming, but the remainder of the region varies greatly according to circumstances. In early spring a tender and luxuriant herbage covers the whole plain, while flowers of the most brilliant hues spring up in rapid succession, imparting their color to the landscape, which changes from day to day. As the summer advances, the verdure recedes towards the streams and mountains. Vast tracts of arid plain, yellow, parched, and swampy, fill the intermediate space, which ultimately becomes a bare and uninhabitable desert. In the Simjar, and in the mountain-tract to the north, springs of water are tolerably abundant, and corn, vines, and figs, are cultivated by a stationary population; but the greater part of the region is only suited to the nomadic herds, which in spring spread themselves far and wide over the vast flats, so utilizing the early verdure, and in summer and autumn gather along the banks of the two main streams and their affluents, where a delicious shade and a rich pasture may be found during the greatest heats. Such is the present character of the region. It is thought, however, that by a careful water-system, by deriving channels from the great streams or the affluents by storing the superfluous spring-rains in tanks, by digging wells, and establishing ëx extr. or subterranean aqueducts, the whole territory might be brought under cultivation, and rendered capable of maintaining a permanent population. That some such system was established in early times by the Assyrian monarchs seems to be certain, from the fact that the whole level country on both sides of the Simjar is covered with mounds marking the sites of cities, which, wherever opened, have presented appearances similar to those found on the site of Nineveh. [Assyria.] If even the most northern portion of the Mesopotamian region is thus capable of being redeemed from its present character of a desert, still more easily might the southern division be reclaimed and converted into a garden. Between the 35th and 34th parallels, the character of the Mesopotamian plain suddenly alters. Above, it is a plain of a certain elevation above the courses of the Tigris and Euphrates, which are separated from it by low lime-stone ranges; below, it is a mere alluvium, almost level with the rivers, which frequently overflow large portions of it. Consequently, from the point indicated, canalization becomes easy. A skillful management of the two rivers would readily convey abundance of the life-giving fluid to every portion of the Mesopotamian tract below the 34th parallel. And the immeasurable lines of embankment, marking the course of ancient canals, sufficiently indicate that in the flourishing period of Babylon a network of artificial channels covered the country. [Babylonia.]

To this description of Mesopotamia in the most extended sense of the term, it seems proper to append a more particular account of that region, which bears the name par excellence, both in Scripture, and in the classical writers. This is the northern portion of the tract already described, or the country between the great bend of the Euphrates (dat. 35° to 37° 30') and the upper Tigris. (See particularly Ptolemy. Geography, v. 12, and compare Erodoto. ap. Strab. i. 1, § 25; Arr. Eup. Al. iii. 7: Dakipp. Fr. p. 1, &c.) It consists of the mountain country extending from Birkhok to...
Mesopotamia

Josh. upon the north; and, upon the south, of the great undulating Mesopotamian plain, as far as the Sinjar hills, and the river Khbouar. The northern range, called by the Arabs Karajah Dagh towards the west, and the southern, towards the east, does not attain to any great elevation. It is in places rocky and precipitous, but has abundant springy forests and streams which support a rich vegetation. Forests of chestnuts and pistachio-trees occasionally clothe the mountain sides; and about the towns and villages are luxuriant orchards and gardens, producing abundance of excellent fruit.

The whole is a singular and beautiful land: rice and barley yield heavily; and rice is grown in some places. The streams from the north side of this range are short, and fall mostly into the Tigris. Those from the south are more important. They flow down at very moderate intervals along the whole course of the range, and gradually collect into two considerable rivers—the Bêlik (ancient Bilihoon), and the Khbouar (Habar or Chabaras)—which empty themselves into the Euphrates. [HABIR.] South of the mountains is the great plain already described, which between the Khbouar and the Tigris is interrupted only by the Sinjar range, but west of the Khbouar is broken by several spurs from the Karajah Dagh, having a general direction from north to south. In this district are the two towns of Orfit and Haron; the former of which is thought by many to be the native city of Abraham, while the latter is on good grounds identified with Haran, his resting-place between Chaldea and Palestine. [HARAN.] Here we must fix the Padan-Aram of Scripture—the "plain Syria," or "district stretching away from the foot of the hills" (Stanley's S. & F. P. p. 129 note), without, however, determining the extent of country thus designated. Besides Orfit and Haran, the chief cities of modern Mesopotamia are Mardin and Nisibin, south of the Jebel Tar, and Diarbekr, north of that range, upon the Tigris. Of these places two, Nisibin and Diarbekr, were important from a remote antiquity, Nisibin being then Nisibis, and Diarbekr Amida.

We first hear of Mesopotamia in Scripture as the country where Nahor and his family settled after quitting Ur of the Chaldees (Gen. xxiv. 10). Here lived Bethuel and Laban; and hither Abraham sent his servant, to fetch Isaac a wife of "his own kindred" (ib. ver. 38). Hither too, a century later, came Jacob on the same errand; and hence he returned with his two wives after an absence of 21 years. After this we have no mention of Mesopotamia, till, at the close of the wanderings in the wilderness, Balak the king of Moab sends for Balaam "to Pethor of Mesopotamia" (Deut. xxiv. 14), which was situated among "the mountains of the east" (Num. xxviii. 7), by a river (ib. xxvii. 5), probably the Euphrates. About half a century later, we find, for the first and last time, Mesopotamia the seat of a powerful monarchy. Chusil-Mishathaim, king of Mesopotamia, establishes his dominion over Israel shortly after the east, death of Joshua (Judg. iii. 8), and maintains his authority for the space of eight years, when his yoke is broken by Othniel, Caleb's nephew (ib. vv. 9, 10). Finally, the children of Ammon, having provoked a war with David, "sent a thousand talents of silver to hire them chariots and horsemen out of Mesopotamia, and out of Syria—Maschach, and out of Zobah" (1 Chr. xiv. 6). It is uncertain whether the Mesopotamians were persuaded to lend their aid at once. At any rate, after the first great victory of Joab over Ammon and the Syrians who took their part, these last "drew forth the Syrians that were beyond the river" (2 Sam. viii. 16), who, returning in the first flush of victory, humbled their fellow-countrymen at the bands of David. The name of Mesopotamia then passes out of Scripture, the country to which it had applied becoming a part, first of Assyria, and afterwards of the Babylonian empire.

According to the Assyrian inscriptions, Mesopotamia was inhabited in the early times of the Kassite or Aramean (in c. 1500-1100) empire, by a vast mass of petty tribes, each under its own prince, and all quite independent of one another. The Assyrian monarchoi prevailed with these chiefs at great advantage, and by the time of Jehu (n. c. 880) had fully established their dominion over them. The tribes were all called tribes of the Nahrî, a term which some compare with the Nahun of the Jews, and translate "tribes of the steewum-bands." But this identification is very uncertain. It appears, however, in close accordance with Scripture, first, that Mesopotamia was independent of Assyria till after the time of David; secondly, that the Mesopotamians were warlike and used chariots in battle; and thirdly, that not long after the time of David they lost their independence, their country being absorbed by Assyria, of which it was henceforth commonly reckoned a part.

On the destruction of the Assyrian empire, Mesopotamia seems to have been divided between the Medes and the Babylonians. The conquests of Cyrus brought it wholly under the Persian yoke; and it thus continued to the time of Alexander, being comprised (probably in the ninth, or Assyrian satrapy. At Alexander's death, it fell to Seleucus, and formed a part of the great Syrian kingdom till wrested from Antiochus V. by the Parthians, about n. c. 190. Trajan conquered it from Parthia in A. D. 115, and formed it into a Roman province: but in A. D. 117 Adrian relinquished it of his own accord. It was afterwards more than once reconquered by Rome, but never continued long under her sceptre, and finally reverted to the Persians in the reign of Jovian, A. D. 363.

(See Qunt. Curt. v. 1; Dio Cass. lviii. 22-26; Ausg. Marc. xv. 8 ; and for the description of the district, compare C. Niebuhr's Voyage en Arabie, &c., vol. ii. pp. 300-334; Pococke's Description of the East, vol. ii. part i. ch. 17; and Layard's Nineveh and Babylon, chs. xi.-xv.).

G. R.

Messiah. This word (צישא) (Mishvé), which answers to the word Μασσιας in the N. T., means anointed; and is applicable in its first sense to any one anointed with the holy oil. It is applied to the high priest in Lev. iv. 3, 5, 16; and possibly to the shield of Saul in a figurative sense in 2 Sam. i. 21. The Kings of Israel were called anointed, from the mode of their consecration (1 Sam. ii. 10, 35, xii. 3, xvi. 6, xxiv. 6, 10, xxvi. 9, 11, 23; 2 Sam. i. 14, 16, xiv. 21, xxii. 1). This word also refers to the expected Prince of the chosen people who was to complete God's purposes for them, and to redeem them, and of whose coming the prophets of the old covenant in all time spoke. It is twice used in the N. T. of Jesus (John i. 41, iv. 20, 3; Matt. viii. 19); but the Greek equivalent, the Christ, is constantly applied, at first

120
with the article as a title, exactly the Anointed One, but later without the article, as a proper name, Jesus Christ.

Three points belong to this subject: 1. The expectation of a Messiah among the Jews; 2. The nature and power of the expected Messiah. Of these the second will be discussed under SAVIOUR, and the third under Son or God. The present article will contain a rapid survey of the first point only. The interpretation of particular passages must be left in a great measure to professional commentators.

The earliest glean of the Gospel is found in the account of the fall, where it is said to the serpent "I will put enmity between thee and the woman, and between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel" (Gen. iii. 15). The tempter came to the woman in the guise of a serpent, and the curse thus pronounced has a reference both to the serpent which was the instrument, and to the tempter that employed it, to the natural terror and enmity of man against the serpent, and to the conflict between mankind redeemed by Christ its Head, and Satan that deceived mankind. Many interpreters would understand by the seed of the woman, the Messiah only, but it is easier to think with Calvin that mankind, after they are gathered into one company by Jesus the Christ, the Head of the Church, are to achieve a victory over evil. The Messianic character of this prophecy has been much questioned by those who see in the history of the Fall nothing but a failure: to those who accept it as true, this passage is the primitive germ of the Gospel, the protovangelium. The blessings in store for the children of Shem are remarkably indicated in the words of Noah, "Blessed be the Lord God of Shem," or (11.) "Blessed be Jehovah the God of Shem" (Gen. xiv. 26), where instead of blessing Shem, as he had cursed Canaan, he carries up the blessing to the great fountain of the blessings that shall follow Shem. Next follows the promise to Abraham, wherein the blessings to Shem are turned into the narrower channel of one family — I will make of thee a great nation, and I will bless thee, and make thy name great; and thou shalt be a blessing: and I will bless them that bless thee and curse him that curseth thee; and in thee shall all families of the earth be blessed" (Gen. xii. 2, 3). The promise is still indefinite; but it tends to the unfolding of the curse of Adam, by a blessing to all the earth through the seed of Abraham, as death had come on the whole earth through Adam. When our Lord says, "Your Father Abraham rejoiced to see my day, and he saw it and was glad" (John xviii. 56), we are to understand that this promise of a real blessing and restoration to come hereafter was understood in a spiritual sense, as a leading back to God, as a coming nearer to Him, from whom the promise came; and he desired with hope and rejoicing ("festivum cum desiderio," Romans i. 18) to behold the day of it.

A great step is made in Gen. xlix. 10, "The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come; and unto him shall the gathering of the people be." The derivation of the word Shiloh (בְּשִׁלוֹח) is probably from the root פָּלָח; and if so, it means "sow," or, as Hengstenberg argues, it is for Shilan, and is a proper name, the man of peace or rest, the peace-maker. For other derivations and interpretations see Genesis (Thurston, sub nomine) and Hengstenberg (Christologie, vol. i.). Whilst man of peace is far the most probable meaning of the name, those old versions which render it "He to whom the sceptre belongs," see the Messianic application equally with ourselves. This then is the first case in which the promises distinctly centre in one person; and He is to be a man of peace; He is to restore the shattered and scattered nations shall look up to Him and obey Him. [For a different view, see the art. Shiloh in this Dictionary.]

The next passage usually quoted is the prophecy of Deborah (Num. xxiv. 17-19). The star points indeed to the glory, as the sceptre denotes the power, of a king. And Oekles and Jonathan (Pseudo) see here the Messiah. But it is doubtful whether the prophecy is not fulfilled in David (2 Sam. viii. 2, 14); and though David is himself a type of Christ, the direct Messianic application of this place is by no means certain.

The prophecy of Moses (Deut. xviii. 18), "I will raise them up a prophet among them, like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him," claims attention. Does this refer to the Messiah? The reference to Moses in John v. 45-47 — "He wrote of me," seems to point to this passage; for it is a cold and forced interpretation to refer it to the whole types and symbols of the Mosaic Law. On the other hand, many critics would find here the divine institution of the whole prophetic order, which if not here, does not occur at all. Hengstenberg thinks that it does promise that an order of prophets should be sent, but that the singular is used in direct reference to the greatest of the prophets, Christ himself, without whom the words would not have been fulfilled. The Spirit of Christ spoke in the prophets, and Christ is in a sense the only prophet." (1 Pet. i. 11.) Jews in earlier times might have been excused for referring the words to this or that prophet; but the Jews whom the Lord rebukes (John v.) were inexusable: for, having the words before them, and the works of Christ as well, they should have known that no prophet had so fulfilled the words as He had.

The passages in the Pentateuch which relate to Christ have been thought by many to bear reference to the Messiah.

The second period of Messianic prophecy would include the time of David. In the promises of a kingdom to David and his house "for ever" (2 Sam. xvii. 13), there is more than could be fulfilled save by the eternal kingdom in which that of David merged; and David's last words dwell on this passage of the "eternal" kingdom (2 Sam. xxii.). Passages in the Psalms are numerous which are applied to the Messiah in the N. T.; such are Ps. ii., xvi., xxii., xi. Other psalms quoted in the N. T. appear to refer to the actual history of another king; but only those who deny the existence of types and prophecy will consider this as an evidence against an inferior allusion to Messiah: such passages are Ps. lix., lx., lxii. The advance in clearness in this period is great. The name of Anointed, i. e., King, comes in, and the Messiah is to come of the lineage of David. He is described in his exaltation, with his great kingdom that shall be spiritual rather than temporal. Ps. ii., xxii., xi.
MESSIAH

In other places he is seen in suffering and humiliation, Ps. xxii., xvi., xl.

After the time of David the predictions of the Messiah ceased for a time; until those prophecies arose whose works we possess in the canon of Scripture. They nowhere give us an exact and complete account of the nature of Messiah; but different aspects of the truth are produced by the various methods of the people, and so they are led to speak of Him now as a Son of God, and now as a Redeemer from sin; it is from these that the whole of them that we gain a clear and complete image of His Person and kingdom. This third period lasts from the reign of Uzziah to the Babylonish Captivity. The Messiah is a king and Ruler of David's house, who should come to reform and restore the Jewish nation and purify the church, as in Is. xi., xli.-lvi. The Ideeings of the restoration, however, will not be confined to Jews; the heathen are made to share them fully (Is. ii., lvi.). Whatever theories have been attempted about Isaiah liii., there can be no doubt that the most natural is the received interpretation that it refers to the suffering Redeemer; and so in the N. T. it is always considered in that sense. The passage of Mark v. 2 (comp. Matt. ii. 6) left no doubt in the mind of the Sanhedrin as to the birthplace of the Messiah. The lineage of David is again alluded to in Zechariah xii. 10-14. The time of the second Temple is fixed by Haggai ii. 9 for Messiah's coming; and the coming of the Forerunner and of the Anointed are clearly revealed in Mal. iii. 1, iv. 5, 6.

The fourth period after the close of the canon of the O. T. is known to us in a great measure from allusions in the N. T. to the expectation of the Jews. From such passages as Ps. ii. 6, 8; Jer. xxxii. 5, 6; Zech. ix. 9, the Pharisees and those of the Jews who expected Messiah at all, looked for a temporal prince only. The Apostles themselves were infected with this opinion, till after the Resurrection, Matt. xx. 21; Luke xxiv. 21; Acts i. 6. Gleanus of a purer faith appear, Luke ii. 30, xxxii. 42; John iv. 25. On the other hand there was no skeptical school which had discarded the expectation altogether. No mention of Messiah appears in the Book of Wisdom, nor in the writings of Philo; and Josephus avoids the doctrine. Intercourse with heathens had made some Jews ashamed of their nation, and looked for Messiah in his spiritual import.

The expectation of a golden age that should return upon the earth, was common in heathen nations (Hesiod, Works and Days, 109; Ovid, Met. i. 89; Virg. Eccl. iv.; and passages in Euseb. Prep. Ev. 1. 7, xii. 13). This hope the Jews also shared; but with them it was associated with the coming of a particular Person, the Messiah. It has been asserted that in Him the Jews looked for an earthly king, and that the existence of the hope of a Messiah may thus be accounted for on natural grounds and without a divine revelation. But the prophecies refute this: they hold out not a Prophet only, but a King and a Priest, whose business it should be to set the people free from sin, and to teach them the ways of God, as in Ps. xxii., xli., xlv., Is. ii., xi., liii. In these and other places too the earth is spoken of as if it were to receive beyond the Jews and embraces all the Gentiles, which is contrary to the exclusive notions of Judaism. A fair consideration of all the passages will convince that the growth of the Messianic idea in the prophecies is a swing to revelation from God. The witness of the N. T. to the O. T. prophecies can bear no other meaning; it is summed up in the words of Peter;—

"We have also a more sure word of prophecy; whereunto ye do well that ye take heed, as unto a light that shineth in a dark place, until the day dawn, and the day-star arises in your hearts: knowing this first, that no prophecy of the Scripture is of any private interpretation. For the prophecy cannot come of the will of men; but holy men of God spake as they were moved by the Holy Ghost" (2 Pet. i. 19-21; compare the elaborate essay on this text in Knapp's Opuscules, vol. i.). Our Lord affirms that there are prophecies of the Messiah in the O. T., and that they are fulfilled in Him, Matt. xxvi. 54; Mark ix. 12; Luke xviii. 31-33, xxii. 37, xxiv.; John v. 39, 46. The Apostles preach the same truth, Acts ii. 16, 25, vii. 28-35, xv. 43, xiii. 23, 32, xxvi. 22, 23; 1 Pet. i. 11; and in many passages of St. Paul. Even if internal evidence did not prove that the prophecies were much more than vague longings after better times, the N. T. prophecies everywhere that although the Gospel was the sun, and O. T. prophecy the dim light of a candle, yet both were light, and both were needed; and that the prophets interpreted, not the private longings of their own hearts but the will of God, in speaking as they did (see Knapp's Essay for this explanation) of the coming kingdom.

Our own theology is rich in prophetic literature; but the most complete view of this whole subject is found in Hengstenberg's Christologie, the second edition of which, greatly altered, is translated in Clark's Foreign Theological Library. See as already mentioned, SAVIOUR; SON of God.

* A full critical history of the Jewish expectation of a Messiah, with particular reference to the opinions prevalent at the time of Christ, is a desideratum. The subject is attended with great difficulties. The date of some of the most important documents bearing upon it is still warmly debated by scholars. See, e. g., in this Dictionary, the articles DANIEL, BOOK OF: Enoch, Book of: Maccabees (The), vol. ii. pp. 1713, 1714, and note (on the so-called "Isaiah of Solomon"); Moses (addition in Amer. ed. on the recently discovered "Assumption of Moses"); and Versions, Ancient (Tyrgum). Most of the older works on the later opinions of the Jews (as those of Philo, Josephus, and Zenobius) were written with a polemical aim, in an unscholarly spirit, and depend largely upon untrustworthy authorities, making extensive use, for example, of the book Zohar, now proved to be a forgery of the thirteenth century. (See Ginsburg, The Kabbaloth, etc. Lond. 1865.)

Besides the books of the Old and New Testament and the Greek Apocrypha, the principal original sources of information on the subject are the Septuagint Version; the Jewish portion of the Sibylline Oracles, particularly Lib. III. 97-817, about 140 n. c. (best editions by Friedlieb, Leipzig, 1852. and Alexandre, 2 vols. in 4 parts, Paris 1841-56; comp. the dissertations of Bleek, Lücke, Hilgenfeld, and Ewald); the book of Enoch; the Psalms of Solomon (see reference above); the Assumption of Moses (see above); the works of Philo and Josephus; which contain passages, which are now lost; and those like those which produced the works of the so-called Ben Sira and Little Genesis (trans. from the Ethiopic by Dillmann in Ewald's Jahrb. f. Bibl. u. Kirchengesch. 1819, pp. 230-256, and 1850, pp. 1-96); the Second (Fourth) Book of Esdras (Ezra); the Apocalypse of Baruch (publ. in Syriac with a Latin translation by Ceriani)

On the general subject of the Jewish opinions concerning the Messiah the following works may be referred to. Buxtorth, Lx. Chal. Phil. 3, in Klubben, Basle, 1861, ed. col. 297 ff and 225 ff; also his Symmogen Judaeus, c. 50, De ventura Ind. Messiae. Ant. Hubin, Thol. Judaeus, Brede, 1853, 4to. Ed. Poeck, Porto Mosis, ed. (of Maimonides), Osn., 1854, see cap. xi. of the Note Miscellanea. "In quo varia Judaeorum de Resur. Mort. Sodentis exstendi," also in his Theol. Works, i. 139-213. W. Schickard, Zum Regnum Hebr. zum Noth Corporisi (1674),
In 1909, A. Balbiani, and gold, the country as geographical probably metals, should flashing "Tahmulic misled, i. Iliauath, Jtsu ltiia 'oui' Messi'isii/ee of the Study of the Graeco-persian, pp. 110-173, Amer. ed. (1862). [Antichrist]

MESSIAS (Messias: Messiah), the Greek form of MESSIAH (John i. 41; iv. 25).

METALS. The Hebrews, in common with other nations, were acquainted with nearly all the metals known to modern metallurgy, whether as the products of their own soil or the results of intercourse with foreigners. One of the earliest geographical definitions is that which describes the country of Havilah as the land which abounded in gold, and the gold of which was good (Gen. ii. 12). The first artist in metals was a Canaanite, Tubal Cain, the son of Lamech, the forger or sharpener of every instrument of copper (A. V. "bronze") and iron (Gen. iv. 22). "Abram was very rich in cattle, in silver, and in gold" (Gen. xiii. 2); silver, as will be shown hereafter, being the medium of commerce, while gold existed in the shape of ornaments, during the patriarchal ages. Tow is first mentioned among the spoils of the Midianites which were taken when Balaam was slain (Num. xxxi. 22), and lead is used to harden the imagery of Moses' (Ruth i. 16) (Ex. xv. 19). Whether the ancient Hebrews were acquainted with steel, properly so called, is uncertain: the words so rendered in the A. V. (2 Sam. xxii. 35; Job xx. 24; Ps. xviii. 34; Jer. xv. 12) are in all other passages translated bronze, and would be more correctly copper. The "northern iron" of Jer. xv. 12 is believed by commentators to be iron hardened and tempered by some peculiar process, so as more nearly to correspond to what we call steel [STEEL] and the "flaming torches" of Nah. ii. 3 are probably the flashing steel scythes of the war-chariots which should come against Nineveh. Besides the simple metals, it is supposed that the Hebrews used the mixture of copper and tin known as bronze, and probably in all cases in which copper is mentioned as in any way manufactured, bronze is to be understood as the metal indicated. But with regard to the chasamah (A. V. "amber") of Ez. i. 4, 27, vii. 2, rendered by the LXX. \(\varepsilon\alpha\kappa\tau\varepsilon\rho\omicron\nu\nu\omicron\), and the Vulg. electrum, by which our translators were misled, there is considerable difficulty. Whatever is the meaning of chasamah, for which no satisfactory etymology has been proposed, there can be but little doubt that by \(\varepsilon\alpha\kappa\tau\varepsilon\rho\omicron\nu\nu\omicron\) the LXX. translators intended, not the brilliant resin known by that name to the Greeks and to us as "amber," but the metal so called, which consisted of a mixture of four parts of gold with one of silver, described by Pliny (xxxiii. 23) as more brilliant than silver by lamp-light. There is the same difficulty attending the rendering of the gaseous substance (Ez. i. 4, 7) as chasamah (A. V. "brass"), which has hitherto successfully resisted all the efforts of commentators, but which is explained by Suidas as a kind of electron, more precious than gold. That it was a mixed metal of great brilliancy is extremely probable, but it has hitherto been impossible to identify it. In addition to the metals actually mentioned in the Bible, it has been supposed that the electrum of Pliny (xxxiii. 23), as "the water of separation," being "looked upon as the mother by which all the metals were fructified, purified, and brought forth," and on this account kept secret, and only mysteriously hinted at (Napier, Metal. of the Bible, Intr. p. 5). Mr. Napier adds, "there is not the slightest foundation for this supposition."

With the exception of iron, gold is the most widely diffused of all metals. Almost every country in the world has in its turn yielded a certain supply, and as it is found most frequently in alluvial soil, among the debris of rocks washed down by the torrents, it was known at a very early period, and was procured with little difficulty. The existence of gold and the prevalence of gold ornaments in early times are indicated by a large state of art, but rather the reverse. Gold was undoubtedly used before the art of working copper or iron was discovered. We have no indications of gold streams or mines in Palestine. The Hebrews obtained their principal supply from the south of Arabia, and the commerce of the Persian Gulf. The ships of Hiram, king of Tyre, brought it for Solomon (1 K. iv. xix. 11, x), and at a later period, when the Hebrews were in Exile, it was brought by the Tyrians, the chief of their freight was the gold of Ophir (1 K. ix. 27, 28). It was brought to the ships of Tarshish (1 K. xxii. 48), the Indiamen of the ancient world; and Parvain (2 Chr. iii. 6), Ramah (Ex. xxvii. 22), Shela (1 K. x. 2, 10; Ps. lxvii. 15; Is. ix. 6; Ex. xxv. 22), and Uplaz (Jer. x. 9), were other sources of gold for the markets of Palestine and Tyre. It was probably brought in the form of ingots (Joshi. vii. 21; A. V. "wedge," lit. "tongue"), and was rapidly converted into articles of ornament and use. Ear-rings, or rather nose-rings, were made of it, those given to Rebecca were half a shekel (1 oz.) in weight (Gen. xxiv. 22), bracelets (Gen. xxiv. 22), chains (Gen. xlii. 42), signets (Ex. xxxv. 22), bowls or spherical ornaments suspended from the neck (Ex. xxxv. 22), and chains for the legs (Num. xxx. 30; comp. Is. iii. 18; P!in. xxxiii. 12). It was used in embroidery (Ex. xxxix. 3; 2 Sam. i. 24; P!in. viii. 74); the decorations and furniture of the tabernacle were enriched with the gold of the ornaments which the Hebrews willingly offered (Ex. xxxiv.); the same precious metal was lavished upon the Temple (1 K. vii. vii.); Solomon's throne was overlaid with gold (1 K. x. 18), his drinking-cups and the vessels of the house of the forest of Lebanon were of pure gold (1 K. x. 21), and the neighboring princes brought him as presents vessels of gold and of silver (1 K. x. 25). So plentiful indeed was the supply of the precious metals during his reign that silver was esteemed of little worth (1 K. x. 21, 27). Gold and silver were devoted to the fashioning of idolatrous images (Ex. xx. 23, xxxii. 4; Deut. xxvii. 17; 1 K. xii. 28). The crown on the head of Malcham (A. V. "their king"), the idol of the Ammonites at Rabbah, weighed a talent."

of gold, that is 125 lbs. troy, a weight so great that it could not have been worn by David among the ordinary insignia of royalty (2 Sam. xii. 30). The great abundance of gold in early times is indicated by its entrance into the composition of every article of ornament and almost all of domestic use. Among the spoils of the Midianites taken by the Israelites, in their bloodless victory when Balaam was slain, were ear-rings and jewels to the amount of 16,750 shekels of gold (Num. xxxi. 54-58), equal in value to more than 30,000,000 of our present money. 1700 shekels of gold (worth more than three thousand) alone were taken by Gideon's army from the slaughtered Midianites (Judg. viii. 26). These numbers, though large, are not incredibly great, when we consider that the country of the Midianites was at that time rich in gold streams which have been since exhausted, and that like the Mobses of the present day, and the Peruvians of the time of Pizarro, they carried most of their wealth about them. But the amount of treasure accumulated by David from spoils taken in war, is so enormous, that we are tempted to conclude the numbers exaggerated. From the gold shields of Hadadezer's army of Syrians and other sources he had collected, according to the chronicle (1 Chr. xxii. 14), 100,000 talents of gold, and 1,200 talents of silver, and to these numbers he added his own contribution of 3,000 talents of gold and 7,900 of silver (1 Chr. xxi. 2-4), and the additional offerings of the people, the total value of which, estimating the weight of a talent to be 125 lbs. Troy, gold at 75s. per oz., and silver at 4s. 4d. per oz., is reckoned by Mr. Napier to be 393,929,657. Some idea of the largeness of this sum may be formed by considering that in 1855 the total amount of gold in use in the world was calculated to be about 820,000,000. Unquestionably the quantity of the precious metals possessed by the Israelites might be greater in consequence of their commercial intercourse with the Phoenicians, who were masters of the sea; but in the time of David they were a nation struggling for political existence, surrounded by powerful enemies, and without the leisure necessary for the development of their commercial capabilities. The numbers given by Josephus (Ant. vii. 14, § 2) are only one tenth of those in the text, but the sum, even when thus reduced, is still enormous.4 But though gold was thus common, silver appears to have been the ordinary medium of commerce. The first commercial transaction of which we possess the details was the purchase of Ephraim's field by Abraham for 400 shekels of silver (Gen. xxxviii. 16); slaves were bought with silver (Gen. xvii. 12); silver was the money paid by Abimelech as a compensation to Abraham (Gen. xx. 16); Joseph was sold to the Ishmaelites merchants for twenty pieces of silver (Gen. xxxvii. 28); and generally in the Old Testament, "money" in the A. V. is literally silver. The highest payment of gold is mentioned in 1 Chr. xxii. 25, where David buys the threshing-floor of Ornan, or Araunah, the delusive, for six hundred shekels of gold by weight.5 But in the parallel narrative of the transaction in 2 Sam. xxiv. 24, the price paid for the threshing-floor and the oxen is fifty shekels of silver. An attempt has been made by Keil to reconcile these two passages by supposing that in the former the purchase referred to was that of the entire hill on which the threshing-floor stood and in the latter the threshing-floor itself. But the close resemblance between the two narratives renders it difficult to accept this explanation, and to imagine that two different circumstances are described. That there is a discrepancy between the numbers in 2 Sam. xxiv. 9 and 1 Chr. xxii. 5 is admitted, and it seems impossible to avoid the conclusion that the present case is but another instance of the same kind. But the exception there is no case in the O. T. in which gold is alluded to as a medium of commerce; the Hebrew coinage may have been partly gold, but we have no proof of it.

Silver was brought into Palestine in the form of plates from Tarshish, with gold and ivory (1 K. x. 22; 2 Chr. ix. 21; Jer. x. 9). The accumulation of wealth in the reign of Solomon was so great that silver was but little esteemed; "the king made silver to be in Jerusalem as stones" (1 K. x. 21, 27). With the treasures which were brought out of Egypt, not only the ornaments but the ordinary metal-work of the tabernacle were made. Silver was employed for the sockets of the heards (Ex. xxxi. 19, xxxvii. 24), and for the hooks of the pillars and their capital (Ex. xxvii. 19). The capitals of the pillars were overlaid with it. (Ex. xxxvii. 17), the chargers and bowls offered by the princes at the dedication of the tabernacle (Num. vii. 13, &c.), the trumpets for marshalling the host (Num. x. 2), and some of the candlesticks and tables for the Temple were of silver (1 Chr. xxviii. 15, 16). It was used for the setting of gold ornaments (1 Prov. xx. 11) and other decorations (Cant. i. 11), and for the pillars of Solomon's gorgeous chariot or palanquin (Cant. iii. 10).

From a comparison of the different amounts of gold and silver collected by David, it appears that the proportion of the former to the latter was 1 to 9 nearly. Three hundred talents of silver and thirty talents of gold were demanded by Hezekiah by Senacharib (2 K. xvii. 14); but later, when Pharaoh-beskengar by Shalmaneser V. had annexed the land a tribute of 100 talents of silver, and only one talent of gold (2 K. xxvii. 23). The difference in the proportion of gold to silver in these two cases is very remarkable, and does not appear to have been explained.

Brass, or more properly copper, was a native product of Palestine, "a land whose stones are iron, and out of whose hills thou mayest dig copper" (Deut. viii. 9; Job xxviii. 2). It was so plentiful in the days of Solomon that the quantity employed in the Temple could not be estimated, it was so great (1 K. vii. 47). Much of the copper which David had prepared for this work was taken from the Syrians after the defeat of Hadadezer (2 Sam. vii. 8), and more was presented by Eli, king of Hamath. The market of Tyre was supplied with vessels of the same metal by the merchants of Javan, Tubal, and Meshech (Ex. xxvii. 13). There is strong reason to believe that brass, a mixture of copper and zinc, was unknown to the ancients. To the latter metal no allusion is found. But iron was well known, and from the difficulty which attends way to threees, 2,000 talents of silver, and 3,200,000 gold darics; a sum which in these days would amount to about 51 millions of pounds sterling.

4 Literally, "shekels of gold, a weight of 600."
METALS

the toughening pure copper so as to render it fit for hammering, it is probable that the mode of de-
oxidizing copper by the admixture of small quanti-
ties of tin had been early discovered. "We are
inclined to think," says Mr. Napiéer, "that Moses
used no copper vessels for domestic purposes, but
bronze, the use of which is less objectionable
than that of tin, and which, when subject to tarnish, takes on
a finer polish, and, besides, [its] being much more easily melted and cast would make it to be more ex-
tensively used than copper alone. These practical
considerations, and the fact of almost all the antique
castings and other articles in metal that are pre-
seved from these ancient times being composed of
bronze, prove in our opinion that where the word "brass" occurs in Scripture, except where it refers
to an ore, such as Job xxviii. 2 and Deut. viii. 9, it should be translated bronze " (Metal of the Bible,
p. 66).

Arms (2 Sam. xxi. 10; Job xx. 21; Ps.
viii. 34) and armor (1 Sam. xvii. 5, 6, 38) were
made of this metal, which was capable of being so
wrought as to admit of a keen and hard edge.
The Egyptians employed it in cutting the hardest
granite. The Mexicans, before the discovery of iron,
"found a substitute in an alloy of tin and copper:
and with tools made of this bronze could cut not
only metals, but, with the aid of a silicious dust,
the hardest substances, as basalt, porphyry, ame-
thysts, and emeralds " (Prescott, Comp. of Mexico,
ch. 5). The great skill attained by the Egyptians
in working metals at a very early period throws
light upon the remarkable facility with which the
Israelites, during their wanderings in the desert,
elaborated the works of art connected with the
structure of the Tabernacle, for which great ac-
quaintance with metals was requisite. In the
troublesome times which followed their entrance into
Palestine this knowledge seems to have been lost,
for when the Temple was built the metal-workers
employed were Phenicians.

Iron, like copper, was found in the hills of Pale-
stone. The "iron mountain " in the trans-Jordanic
region is described by Josephs (B. J. iv. 8, § 2),
and was remarkable for producing a particular kind
of palm (Mishna, Succa, ed. Dachs. p. 182). Iron
mines are still worked by the inhabitants of Kyfi
Hanish in the S. of the valley Zoharim: smelting
works are found at Shenomar, 5 hours W. of
Haifa, and others in the oak-woods at Mashek
(Ritter, Erkundung, xvii. 73, 201); but the method
employed is the simplest possible, like that of the
old Samothrieans, and the iron so obtained is
chiefly used for horse-shoes.

Tin and lead were both known at a very early
period, though there is no distinct trace of them in
Palestine. The former was among the spoils of the
Medianites (Num. xxxi. 22), who might have ob-
tained it in their intercourse with the Phenician
merchants (comp. Gen. xxxvii. 25, 36), who them-
selves procured it from Tarshish (Ez. xxvii. 12) and
the tin countries of the west. The allusions to it
in the Old Testament principally point to its ad-
mixture with the ores of the precious metals (Is. i.
25; Ez. xxi. 18, 20). It must have occurred in
the composition of bronze: the Assyrian bowls and

a A large collection of these will be found in Glas-

sii Palaeographica Sacra (ib. iv. tr. 3, obs. 17), together
with a singular Jewish tradition bearing upon the
point. The most singular rendering, perhaps, is that
of Aquila, χαλεντος του δραμαγονου, "the bridle of the
squad"; perhaps with some reference to the irriga-
dishes in the British Museum are found to contain
one part of tin to ten of copper. "The tin was
probably obtained from Phenicia, and consequently
that used in the bronzes in the British Museum
may actually have been exported, nearly three
thousand years ago, from the British Isles " (Lay-
ard, Nin. and Ints., p. 191).

Antimony, subject to tarnish, takes on a
fine polish, and, besides, [its] being much more easily melted and cast would make it to be more ex-
tensively used than copper alone. These practical
considerations, and the fact of almost all the antique
castings and other articles in metal that are pre-
seved from these ancient times being composed of
bronze, prove in our opinion that where the word "brass" occurs in Scripture, except where it refers
to an ore, such as Job xxviii. 2 and Deut. viii. 9, it should be translated bronze " (Metal of the Bible,
p. 66).

METHEUSAL (אַתָּה-אֹמֶלֶל man of God: Metherashel; the son of Methu-411

Aquaduct is derived from the Chaldee version, ΝΠ, which has that signification amongst others. Aquila
adopts a similar rendering in the case of the illi

METHEUSAL (אַתָּה-אֹמֶלֶל man of God: Metherashel; the son of Methu-
METHUSELAH

fourth in descent from Cain, and father of Lamech (Gen. iv. 18).

METHUSELAH (מַתְューֹסֵלָה, man of off-

spring, or possibly son of a deity) Methuselah, the son of Enoch, sixth in descent from Seth, and father of Lamech. The resemblance of the name to the preceding, on which (with the coincidence of the name Lamech in the next generation in both lines) some theories have been formed, seems to be apparent rather than real. The life of Methuselah is fixed by Gen. v. 25 at 969 years, a period exceeding that of any other patriarch, and, according to the Hebrew chronology, bringing his death down to the very year of the Flood. The I.XX. reckoning makes him die six years before it; and the Samaritan, although shortening his life to 720 years, gives the same result as the Hebrew. [Chronology.] On the subject of longevity, see Patriarchs. A. B.

MEY - YARD, iv. xix. 35. [Measure.

MEU'NIM (מֵעָנִים) [halation]: [Rom.

Mei-; Vat.] Moséni; [FA. Mosénpa]. Alex. Mosénpa: Minoim). Neh. vi. 32. Elsewhere given in A. V. as MEHUNIM and MEHUNIMS.

MEZ'AHAB (מֶזֶהָאב) [see below]: Mez-

khah: Alex. Mibkhah in Gen. But omits in 1 Chr.: [in Chr., Comp. Mezkhah: Mibkhah]. The father of Mattred and grandfather of Mehetabel, who was wife of Hadar or Hadar, the last named king of Edom (Gen. xxxvi. 21; 1 Chr. 1. 50). His name, which, if it be Hebrew, signifies "wells of gold," has given rise to much speculation. Jarchi renders it, "what is gold?" and explains it, "he was a rich man, and gold was not valued in his eyes at all." Abrahamic says he was "rich and great, so that on this account he was called Mezahab, for the gold was in his house as water." "Hag-

gan" (writes Aben Ezra) "said he was a reamer of gold, but others said that it pointed to those who made gold from brass." The Jerusalem Tar-

gum of course could not resist the temptation of punning upon the name, and combined the ex-

planations given by Jarchi and Haggaiun. The latter part of Gen. xxi. 33 is thus rendered: the name of his wife was Mehetabel, daughter of Mattred, the daughter of a reamer of gold, who was weared with labor, [mezeh candid] all the days of his life: after he had eaten and was filled, he turned and said, what is gold? and what is silver?" A somewhat similar paraphrase is given in the Tar-

gum of the Pseudepigrapha, except that it is there referred to Mattred, and not to Mezahab. The Arabic Version translates the name "water of gold," which must have been from the Hebrew, while in the Targum of Okehla it is rendered "a reamer of gold," as in the Questions Hiebraica in Parad.,

attributed to Jerome, and the traditions given

above: which seems to indicate that originally there was something in the Hebrew text, now want-

ing, which gave rise to this rendering, and of which

the present reading, מַתְוָסֵלָה, is an abbreviation.

W. A. W.

MIB'AMIN (מִבָּאמִין) [on the right hand, or perh.

son of the right hand]: Mib'am; [Vat. FA. Ame-

can]: Me'minim). 1. A son of Elam of the sons of Parosh, who had married a foreign wife and put away her bidding of Ezra (Ezra x. 25). He is called Maelus in 1 Ead.

ix. 26.

2. (Omitted in Vat. MS., [also in Rom. Alex.

FA.]: Mib'am: Miminim). A priest or family of priests who went up from Babylon with Zeruia-

tabel (Neh. xii. 5): probably the same as MIBAMIN in Neh. x. 7. In Neh. xii. 17 the name appears in the form MINIMIN.

MIB'Har (מִבַּהַר) [choice, and hence chosen,

best]: Me'ba'da; Alex. Meša'oda: Mibhar). "Mib-

har the son of Haggari" is the name of one of David's heroes in the list given in 1 Chr. 11. The verse (38) in which it occurs appears to be corrupt, for in the corresponding catalogue of 2 Sam. xxiii. 36 we find, instead of "Mibhar the son of Haggari," "of Zolah, Bani the Gaultite." It is easy to see, if the latter be the true reading, how יבֵהַר, Bani Haggari, could be corrupted into יבֵהַר, ben-haggari; and יבֵהַר is actually the reading of three of Kennicott's MSS., in 1 Chr. as well as of the Syriac and Arabic versions, and the Targum of R. Joseph. But that "Mibhar" is a corruption of יבֵהַר (or יבֵהַר, acc. to some MSS.), mitserethal, "of Zolah," as Kennicott (Disert. p. 215) and Cappellus (Crit. Sacr. i. c. 5) conclude, is not so clear, though not absolutely impossible. It would seem from the I.XX. of 2 Sam. where, in stead of "Zolah" we find פולבדהواء, that both readings originally co-existed, and were read by the I.XX. יכַּהַר, פולבדהواء "Mibhar hatseraithal, "choice of the host." If this were the case, the verse in 1 Chr. would stand thus: "Igl the brother of Nathan, flower of the host; Bani the Gaultite." W. A. W.

MIB'SAM (מִבְּסָם, sweet odor, Ges. : Ma-

seyah: [in 1 Chr. Vat. Moséna, Alex. Meša'oda, Abi. Meša'oda]: Mibsam). 1. A son of Ishmael (Gen. xxv. 13: 1 Chr. i. 29), but not elsewhere men-

tioned. The signification of his name has led some to propose an identification of the tribe sprung from him with some one of the Abuhabian tribes settled in Arabia meridionalis, and a connection with the balams of Arabia is suggested (Hunsaen, Bibel.

given afterwards from the event, or one given in prophecic foresight by Enoch. The later Hebraists

(see Ges. Lex.) derive it from טָסָה, the constructive form of טָסָה, "man," the obselete singular, of which the plural יבֵסָה is found. This gives one or other of the interpretations in the text. We can only decide

between them (if at all) by internal probability, which seems to incline to the former.
MIBZAR (מִבְצָר) [fortress]: in Gen. Maṣṣā'ar; in 1 Chr. Baṣṣā'ar; [Vat. Māṣṣā'ar]; Alex. Māṣṣā'ar; Mōṣṣā'ar. One of the pharaohs or "dukes" of Edom (1 Chr. i. 59) or Esaun (Gen. xxxvi. 42) alter the death of Hadad or Hadar. They are said to be enumerated "according to their settlements in the land of their possession;" and Knobel (Genesis), understanding Mibzar (lit. "fortress") as the name of a place, has attempted to identify it with the rocky fastness of Petra, "the strong city" (תֹּהוּ כֶּרֶמֶךָ), "ir militiaer, Ps. civii. 10; comp. Ps. ix. 9), "the cliff," the chasms of which were the chief stronghold of the Edomites (Jer. xlix. 16; Obad. 3). W. A. W.

MICAH (מִיכָאֵה), but in vv. 1 and 4, מיכה, i. e. Micahelun [who is like Jehovah]: Mica'aś, but [Vat.] once [or more, Mai] Mica'aś; Alex. Mō<y yā'ā; but once [twice] Mī<chā, Mīchā (<chāsh, Mīchās, Mīchās), an Israelite whose familiar story is preserved in the xviii and xviiiith chapters of Judges. That it is so preserved would seem to be owing to Micah's accidental connection with the colony of Danites who left the original seat of their tribe to conquer and found a new Dan at Laish—a most happy accident, for it has been the means of furnishing us with a picture of the "interior" of a private Israelite family of the rural districts, which in many respects stands quite alone in the sacred records, and has probably no parallel in any literature of equal age.a

But apart from this the narrative has several points of special interest to students of Biblical history in the information which it affords us to the condition of the nation, of the members of which Micah was probably well qualified to speak with authority.

We see (1.) how completely some of the most solemn and characteristic enactments of the Law had become a dead letter. Micah was evidently a devout believer in Jehovah. While the Danites in their communications use the general term Elōhím, a God ("ask counsel of God," xviii. 3; God hath given it into your hands," ver. 10), with Micah and his household the case is quite different. His one anxiety is to enjoy the favor of Jehovah,b (xvii. 13). He is conscious of his unworthiness (xv. 1) — that form of blessing used by his mother and his priest invokes the same awful name (xvii. 2, xviii. 6); and yet so completely ignorant is he of the Law of Jehovah, that the mode which he adopts of honoring Him is to make a molten and a graven image, teraphim or images of domestic gods, and to set up an unauthorial priesthood, first in his own family (xviii. 5), and then in the person of a Levite not of the priestly line (ver. 12)—thus disobeying, in the most flagrant manner, the second of the Ten Commandments, and the provisions for the priesthood—both laws which lay in a peculiar manner at the root of the religious existence of the nation. Gideon (xviii. 27) had established an ephod; but here was a whole chapel of idols, a "house of gods" (xvii. 5), and all dedicated to Jehovah.

(2.) The story also throws a light on the condition of the Levites. They were indeed "divided in Jacob and scattered in Israel" in a more literal sense than that prediction is usually taken to contain. Here we have a Levite belonging to Bethel-judah, a town not allotted to the Levites, and with which they had, as far as we know, no connection; next wandering forth, with the world before him, to take up his abode wherever he could find a residence: then undertaking, without hesitation, and for a mere pittance, the charge of Micah's idol-chapel; and lastly, carrying off the property of his master and benefactor, and becoming the first priest to another system of false worship, one too in which Jehovah had no part, and which ultimately bore an important share in the disruption of the two kingdoms.c

But the transaction becomes still more remarkable when we consider (3.) that this was no obscure or ordinary Levite. He belonged to the chief family in the tribe, nay, we may say to the chief family of the nation, for though not himself a priest, he was closely allied to the priestly house, and was the grandson of no less a person than the great Moses himself. For the "Manasseh" in xviii. 30 is nothing else than an alteration of "Moses," or Moses' name, not intended in any case to discredit which such a descendant would cast upon it. [MANASSEH, vol. ii. p. 1776 a.] In this fact we possibly have the explanation of the much-debated passage, xviii. 3: "they knew the voice of the young man the Levite." The grandson of the Lawgiver was not unlikely to be personally known to the Danites; when they heard his voice (whether in casual speech or in loud devotion we 39; comp. 18). True the LXX. add the molten image in ver. 20, but in ver. 20 they agree with the Hebrew text.

a For one of Stanley's finest sketches (drawn out of the incidents relating to this Micah), see his Jewish Church, i. 327-332. The fragment is invaluable as an illustration of the social and religious condition of the Hebrews at that time. Nothing so primitive in Greek or Roman literature reveals to us "such details of the private life" of those nations. For some of the practical teachings of this singular episode for all times, see Bishop Hall's Contemplations, bk. x. 6. H.

b One of a thousand cases in which the point of the sentence is lost by the translation of "Jehovah" by "the Lorn."

c It does not seem at all clear that the words "molten image" and "graven image" accurately express the original words פֶּסֶל and מִסְכֵּן. [Izis, vol. ii. p. 1121.] As the Hebrew text now stands, the "graven image" only was carried off to Laish, and the "molten" one remained behind with Micah (xviii. 20),
As to the date of these interesting events, the narrative gives us no direct information beyond the fact that it was before the beginning of the monarchy; but we may at least infer that it was also before the time of Samson, because in this narrative (xviii. 12) we meet with the origin of the name of Mahaneh-dam, a place which already bore that name in Samson's childhood (xviii. 25, where it is translated in the A. V. 'the camp of Dan'). That the Danites had opposed to their establishment in their proper territory before the Philistines enter the field is evident from Judg. i. 34. Josephus entirely omits the story of Micah, but he places the narrative of the Levite and his cunning, and the destruction of Gibeah (chap. xix. xx., xxii.) — a document generally recognized as part of the same with the story of Micah, and that document by a different hand to the previous portions of the book at the very beginning of his account of the period of the Judges, before Deborah or even Ehud. (See Josh. v. 2, § 8-12.)

The writer is not aware that this arrangement has been found in any MS. of the Hebrew or LXX. text of the book of Judges; but the fact of its existence in Josephus has a certain weight, especially considering the accuracy of that writer when his interests or prejudices are not concerned; and it is supported by the mention of Phinehas the grandson of Aaron in xx. 28. An argument against the date being before the time of Deborah is drawn by Bertheau (p. 197) from the fact that at that time the north of Palestine was in the possession of the Canaanites — a Jobin king of Canaan, who reigned in Hazor, in the immediate neighborhood of Laish. The records of the southern Dan are too scanty to permit of our fixing the date from the statement that the Danites had not yet entered on their allotment — that is to say, the allotment specified in Josh. xix. 40-48. But that statement strengthens the conclusion arrived at from other passages, that these lists in Joshua contain the towns allotted, not not therefore necessarily possessed by the various tribes. — Deutan, and first, in confidence, and then possess it afterwards," seems to be the principle implied in such passages as Josh. xiii. 7 (comp. 1); xiv. 49, 51 (LXX. "so they went to take possession of the land")

The date of the record itself may perhaps be more nearly arrived at. That, on the one hand, it was after the beginning of the monarchy is evident from the references to the ante-monarchical times (xviii. 1, xix. 1-25); and, on the other hand, we may perhaps infer from the name of Bethlehem being given as "Bethlehem-Judah," — that it was before the time of David had conferred on it a notoriety which would render any such affix unnecessary. The reference to the establishment of the house of God in Shiloh (xviii. 11) seems also to point to the early part of the period, before the other invasions of the Philistines had made it necessary to remove the Tabernacle and Ephod to Nob, in the vicinity of Gibeah, Saul's head-quarters.

MIČAY (מיכה, מִיכָא) Cethib, Jer. xxvi. 18 (who as Jehovah). Meerixas; [F.A. in Jer. Meerixas; Vat. in Meerixas; Michaiah). The sixth in order of the minor prophets, according to the arrangement in our present edition, in the LXX. he is placed third, after Hosea and Amos. To distinguish him from Micah the son of Inah, the contemporary of Eljiah, he is called the Morašthie, that is, a native of Moresheath, or some place of similar name, which Jerome and Eusebius call Morasthi and identify with a small village near Eleutheropolis to the east, where formerly the prophet's tomb was shown, but which in the days of Jerome had been succeeded by a church (Epif. Peirae, c. 6). As little is known of the circumstances of Micah's life as of many of the other prophets. Psenio-Ephrannus (Op. ii. p. 215) makes him, contrary to all probability, of the tribe of Ephraim; and besides confounding him with Miciah the son of Inah, who lived more than a century before, he betrays additional ignorance in describing Abah as king of Judah. For relating this monarch's son and successor Jehoram for his impieties, Micah, according to the same authority, was thrown from a precipice, and buried at Morath in his own country, hard by the cemetery of Ephanim (Erastia, a place which apparently exists only in the LXX. of Mic. i. 10), where his sepulchre was still to be seen. The Chronicle of Psichau (p. 148 f.) tells the same tale. Another ecclesiastical tradition relates that the remains of Habakkuk and Micah were revealed in a vision to Zechariah bishop of Eleutheropolis, in the reign of Theodosius the Great, near a place called Berath-

a The proofs of the are given by Bertheau in his Commentary on the Book in the Knrezel, encr. 195b. In. 111, § 2 (p. 192). This is a copy of a copy. It should be observed that the words "all their" are interpolated by our translators.

b The full form of the name is מיכֵיה, Micâyah, who is like Jehovah," which is found in 2 Chr.
MICH.

The period during which Micah exercised the prophetic office is stated, in the superscription to his prophecies, to have extended over the reigns of Jotham, Ahaz, and Hezekiah, kings of Judah, giving thus a maximum limit of 50 years (n. c. 756-697), from the accession of Jotham to the death of Hezekiah, and a minimum limit of 16 years (n. c. 742-726), from the death of Jotham to the accession of Ahaz. In either case it would be contemporaneous with Hosea and Amos during part of their ministry in Israel, and with Isaiah in Judah. According to Rabbinical tradition he was transmitted to the prophets Joel, Nahum, and Habakkuk, and to Isaiah the prophet, the mysteries of the Kabala, which he had received from Isaiah (K. David Ganz, Teshuvah Dovid), and by Synneulas (Chronog. p. 139 c) he is enumerated in the reign of Jotham as contemporary with Hosea, Joel, Isaiah, and Oded. With respect to one of his prophecies (iii. 12) it is distinctly assigned to the reign of Hezekiah (Jer. xxvi. 18), and was probably delivered before the great passover which inaugurated the reformation in Judah. The date of the others must be determined, if at all, by internal evidence, and the periods to which they are assigned are therefore necessarily conjectural. Reasons will be given hereafter for considering that none are later than the sixth year of Hezekiah. Bertholdt, indeed, positively denies that any of the prophecies can be referred to the reign of Hezekiah, and assigns the two earlier of the four portions into which he divides the book to the time of Ahaz, and the two later to that of Manasseh (Kirchhain, § 411), because the idioms which prevailed in their reigns are therein denominated. But in the face of the superscription, the genuineness of which there is no reason to question, and of the allusion in Jer. xxvi. 18, Bertholdt's conjecture cannot be allowed to have much weight. The time assigned to the prophecies by the only direct evidence which we possess, agrees so well with their contents that it may fairly be accepted as correct. Why any discrepancy should be perceived between the statement in Jeremiah, that "Micah the Morasharite prophesied in the days of Hezekiah king of Judah," and the title of his book which tells us that the word of the Lord came to him "in the days of Jotham, Ahaz, and Hezekiah," it is difficult to imagine. The former does not limit the period of Micah's prophecy, and at most applies only to the passage to which direct allusion is made. A confusion appears to have existed in the minds of those who see in the prophecy in its present form a connected whole, between the actual delivery of the several portions of it, and their collection and transcription into one book. In the case of Jeremiah we know that he dictated to Baruch the prophecies which he had delivered in the interval between the 13th and 14th of Jotham and the 4th of Jeshokkin, and that, when thus committed to writing, they were read before the people on the first day (Jer. xxxvi. 2, 4, 6). There is reason to believe that a similar process took place with the prophecies of Amos. It is, therefore, conceivable, to say the least, that certain portions of Micah's prophecy may have been uttered in the reigns of Jotham and Ahaz, and for the probability of this theory that we have eloquent evidence, as they were collected as a whole in the reign of Hezekiah and committed to writing. Caspari (Micah, p. 78) suggests that the book thus written may have been read in the presence of the king and the whole people, on some great fast or festival day, and that this circumstance may have been in the minds of the elders of the land in the time of Jeshokkin, when they applied to the inspired seer a prophecy which enjoyed near Hezekiah. It is evident from Mic. i. 6, that the section of the prophecy in which that verse occurs must have been delivered before the destruction of Samaria by Shalmaneser, which took place in the 6th year of Hezekiah (cir. B. c. 722), and, connecting the "high-places" mentioned in i. 5 with those which existed in Judah in the reigns of Ahaz (2 K. xvi. 4; 2 Chr. xxviii. 4, 25) and Jotham (2 K. xx. 35), we may be justified in assigning ch. i. to the time of one of these monarchs, probably the latter; although, if ch. ii. be considered as part of the section to which ch. i. belongs, the utter corruption and demonization of the people there depicted agree better with what history tells us of the times of Ahaz. Caspari maintains that of the two parallel passages, Mic. iv. 1-5, Is. ii. 2-5, the former is the original and the latter belongs to the times of Uzziah and Jotham. The denunciation of the horses and chariots of Judah (v. 10) is appropriate to the state of the country under Jotham, after the long and prosperous reign of Uzziah, by whom the military strength of the people had been greatly developed (2 Chr. xxvi. 11-15, xxvii. 4-6). Compare Is. ii. 7, which belongs to the same period. Again, the form in which idiocy manifested itself in the reign of Ahaz correspond with those which are threatened with destruction in Mic. v. 12-14, and the allusions in vi. 16 to the "statutes of Omri," and the "works of the house of Ahab" seem directly pointed at the king, of whom it is expressly said that he walked in the way of the kings of Israel (2 K. xvi. 9). It is impossible in dealing with internal evidence to assert positively that the inferences deduced from it are correct: but in the present instance at least establish a probability, that in placing the period of Micah's prophetical activity between the times of Jotham and Hezekiah the superscription is correct. In the first years of Hezekiah's reign the idiocy which prevailed in the time of Ahaz was not eradicated, and in assigning the date of Micah's prophecy to this period there is no anachronism in the allusions to idola trous practices. Munzer contends that ch. i. was written not long before the taking of Samaria, but the 3d and following chapters he places in the interval between the destruction of Samaria and the time that Jerusalem was menaced by the army of Sennacherib in the 14th year of Hezekiah. But the passages which he quotes in support of his conclusion (iii. 12, iv. 9, &c., v. 5, &c., vi. 9, &c., vii. 4, 12, &c.) do not appear to be more suitable to that period than to the first years of Hezekiah, while the context in many cases requires a still

a Knobel (Prophecies, ii. § 20) imagines that the prophecies which remain belong to the time of Heze kiah, and that those delivered under Jotham and Ahaz were perjured.

b Mic. iv. 1-4 may possibly, as Ewald and others have suggested, be a portion of an elder prophecy current at that time, which was adopted both by Micah and Isaiah (Is. ii. 2-4).
earlier date. In the arrangement adopted by Wels (pref. to Micah, § iv.–vi.) ch. i. was delivered in the context of the reigns of Jotham and of Ahaz, and of Pekah king of Israel; ii. 1–4–8 in those of Ahaz, Pekah, and Hoshea; iii. 12 being assigned to the last year of Ahaz, and the remainder of the book to the reign of Hezekiah.

But, whatever time the several prophecies were first delivered, they appear in their present form as an organic whole, marked by a certain regularity of development. Three sections, omitting the superscription, are introduced by the same phrase, "Hear ye," and represent three natural divisions of the prophecy — i., ii. – v., vi. – vii. — each commencing with rebukes and threatenings and closing with a promise. The first section opens with a magnificent description of the coming of Jehovah to judgment for the sins and idolatries of Israel and Judah (i. 2–4), and the sentence pronounced upon Samaria (5–9) by the Judge Himself. The prophet, whose sympathies are strong with Judah, and especially with the lowlands which gave him birth, sees the danger which threatens his country, and traces in imagination the devastating march of the Assyrian conquerer down from Samaria toward Jerusalem and the south (i. 9–16). The impending punishment suggests its cause, and the prophet denounced a woe upon the people generally for the corruption and violence which were rife among them, and upon the false prophets who led them astray by pandering to their appetites and luxury (ii. 1–11). The sentence of captivity is passed upon them (10) but is followed instantly by a promise of restoration and triumphant return (ii. 12, 13). The second section is addressed especially to the princes and heads of the people, their aversion and rapacity are rebuked in strong terms, and as they have been deaf to the cry of the suppliants for justice, they too "shall cry unto Jehovah, but He will not hear them" (iii. 1–4). The false prophets who had deceived others should themselves be deceived "the sun shall go down over the prophets, and the day shall be dark over them" (iii. 6). For this perversion of justice and right, and the covetousness of the heads of the people who judged for reward, of the priests who taught for hire, and of "false prophets who divided for money, Zion should be a ploughed field," and the mountain of the Temple become the uncultivated woodland heights (iii. 9–12). But the threatening is again succeeded by a promise of restoration, and in the glories of the Messianic kingdom the prophet beholds a sight which should befall his country. Instead of the temple mountain covered with the wild growth of the forest, he sees the mountain of the house of Jehovah established on the top of the mountains, and the river of waters into it. The reign of peace is inaugurated by the recall from Captivity, and Jehovah sits as king in Zion, having destroyed the nations who had rejoiced in her overthrow. The predictions in this section form the climax of the book, and Ewald arranges them in four strata, consisting of from seven to eight verses each (iv. 1–8, iv. 9–12, v. 1–10, v. 11–15), with the exception of the last part, which is shorter, and in which the prophet "returns to the point whence he started: all objects of politic and idolatrous confidence must be removed before the grand consummation. In the last section (vi. – vii.) the style, by a bold poetical figure, is represented as holding a controversy with his people, pleading with them in justification of his conduct towards them and the reasonableness of his requirements. The dialogue form in which chap. vi. is cast renders the picture very dramatic and striking. In vi. 3–5 Jehovah speaks; the inquiry of the people follows in ver. 6, indicating their entire ignorance of what was required of them; their inquiry is met by the almost impatient rejoiner, "Will Jehovah be pleased with thousands of ranks, with myriads of torrents of oil?" The still greater sacrifice suggested by the people, "Shall I give my firstborn for my transgression?" calls forth the definition of their true duty, "to do justly, and to love mercy, and to walk humbly with their God." How far they had fallen short of this requirement is shown in what follows (9–12), and judgment is pronounced upon them (13–16). The prophet acknowledges and bewails the justice of the sentence (vii. 1–6), the people in repentance patiently look to God, confident that their prayer will be heard (7–10), and are reassured by the promise of deliverance announced, as following their repentance (11–12), by the prophet, who in his turn presents his petition to Jehovah for the restoration of his people (14, 15). The whole concludes with a triumphal song of joy at the great deliverance, like that from Egypt, which Jehovah will achieve, and a full acknowledgment of his mercy and faithfulness to his promises (16–20). The last verse is reproduced in the song of Zacharias (1:19).

The predictions uttered by Micah relate to the invasions of Shalmaneser (i. 6–8; 2 K. xviii. 4, 6) and Sennacherib (i. 9–16; 2 K. xvi. 13), the destruction of Jerusalem (iii. 12, vii. 13), the Captivity in Babylon (iv. 10), the return (iv. 1–8, vii. 11), the establishment of a theocratic kingdom in Jerusalem (iv. 8), and the Uler who should spring from Bethlehem (v. 2). The destruction of Assyria and Babylon is supposed to be referred to in v. 5, 6, vii. 8, 10. It is remarkable that the prophecies commence with the last words recorded of the prophet's namesake, Micah the son of Imlah, "Hearken, O people, every one of you" (1 K. xxii. 28). From this, Bleek (Einleitung, p. 539) concludes that the author of the history, like the ecclesiastical historians, confused the Morasthite with Micah; while Hengstenberg (Christology, i. 409, Eng. tr.) infers that the coincidence was intentional on the part of the later prophet, and that "by this very circumstance he gives intimation of what may be expected from him, shows that his activity is to be considered as a continuation of that of his predecessor, who was justly accounted for many remarkable poetical compositions with him than the mere name." Either conclusion rests on the extremely slight foundation of the occurrence of a formula which was at once the most simple and most natural commencement of a prophetic discourse.

The style of Micah has been compared with that of Hosea and Isaiah. The similarity of the sublime and poetical language with the latter prophet, which were almost unavoidable (comp. Mic. i. 2 with Isa. i. 2; Mic. ii
The diction of Micah is vigorous and forcible, sometimes old-fashioned from the abruptness of its transitions, but varied and rich in figures derived from the pastoral (i. 8, ii. 12, v. 4, 5, 7, 8, vii. 14) and rural life of the lowland country (i. 6, lii. 12, iv. 3, 13, 13, vi. 15), whose vines and olives and fig-trees were celebrated (1 Chr. xxvii. 27, 28), and supply the project with so many striking allusions (i. 6, iv. 3, vi. 13, viii. 1, 4) as to suggest that the verses were not always addressed to one vine-dresser, who had heard the howling of the jackals (i. 8, A. V. "dragons") as he watched his flocks or his vines by night, and had seen the lions slaugthering the sheep (v. 8). One peculiarity which he has in common with Isaiah is the frequent use of paranomasia; in i. 10-13 there is a succession of instances of this figure in the plays upon words suggested by the various phrases enumerated (comp. also i. 4) which it is impossible to transfer to English, though Ewald has attempted to render them into German (Propheten des A. B. i. 324, 330). The poetic vigor of the opening scene and of the dramatic dialogue sustained throughout the last two chapters has already been noticed.

The language of Micah is quoted in Matt. ii. 5, 6, and his prophecies alluded to in Matt. x. 33, 36; Matt. xxii. 45; Luke vii. 32; Luke xxi. 53, 55; John vii. 41, 42; i. 18.

The more important older writers on Micah are Chrysostom (1655), Calvin (1671), Pocock (1677), Schurmann (1783), Justi (1799), Hartmann (1890). The later writers are Thüner, Hitzig, Maurer, Umbreit, Ewald, Keil, Henderson, Pusey, Noyes, Cowles. (For the titles of their works see AMOS; JOEL; MALACHI.)

Add to these Caspari, Ceder Michea den Mosesuden u. seine Schriften (1832), and the articles of Nägelbach in Herzog's Real-Encycl. i. 517 E. and of Wunderlich in Zeller's Bibl. Wörterb. ii. 122. The best introduction to Micah in the English language is that of Dr. Pusey, prefixed to his Commentary. Part xiv. of Lange's Bibelwerk des A. Test. by Dr. Paul Kührer (1868), comprises Oladiad, Jonah, Micah, Nahum, and Haksakok. It contains a well-classified list of the principal commentators of the period, and has been either quoted or referred to. For the Messianic passages in Micah see the writers on Christology (Heugstenberg, Hiervink, Tholuck, Stäthelin, Hofmann, J. P. Smith). [MALACHI.] On the prophet's personal appearance, and the general scope of his predictions, see especially Stanley (Lectures on the Jewish Church, ii. 492-494). Micah's "last words" are those which, centuries afterwards, were caught up by the aged priest, whose song unites the Old and New Testamentas together. "Then will perfect the truth to Jacob, and the mercy to Abraham, which thou hast sworn;" to send forth a second David, the mighty child, whose unknown mother is already travelling for his birth (Mic. vii. 18-20; Luke i. 72, 73).

A certain minuteness characterizes some of Micah's predictions, not always found or to be expected in the fulfillment of prophecy. It is he who mentioned beforehand the name of the place where the Messiah was to be born; and, accordingly, on Herod's proposing his question as to this point to the Jewish scribes and priests, they were ready at once with the answer that Micah had declared that Bethlehem was to be made memorable by that event (Matt. ii. 5-6).

The text of Samaria he said in the glory and pride of that city: "I will make Samaria as an heap of the field, and as plantings of a vineyard: and I will pour down the stones thereof into the valley, and I will discover the foundations thereof" (i. 6). The site of Samaria has now been ploughed for centuries. Its terraces are covered with grain and fruit-trees, and the stones which belonged to the town and walls have rolled down the sides of the hill, or have been cast over the brow of it, and lie scattered along the edge of the valley. Yet we are not to insist on such circumstantiality (as in the last two cases) as essential to the truth of prophecy. It is a law of prophetic representation that it often avails itself of specific traits and incidents as the drapery only of the general occurrence or truth contemplated by the sacred writer. What is peculiar in the above instances is that the form and the reality of the predictions so strikingly agree. Many of the popular treatises on prophecy (that of Dr. Keith is not exempt from this fault) carry this idea of a literal fulfillment too far.
Micaiah

which Benhadad was, apparently, bound by treaty to restore to Ahab. Jehoshaphat, whose son Jehoram had married Athaliah, Ahab's daughter, consented in cordial words to the proposal. However, Micaiah got to the king's presence, and said first: "I hear the word of Jehovah." Accordingly, Ahab assembled 400 prophets, while, in an open space at the gate of the city of Samaria, he and Jehoshaphat sat in royal robes to meet and consult them. The prophets unanimously gave a favorable response: and among them, Zedekiah, the son of Chemosh, made horns of iron as a symbol, and announced, from his throne, that Benhadad would push the Syrians till they consumed them. For some reason which is unexplained, and can now only be conjectured, Jehoshaphat was dissatisfied with the answer, and asked if there was no other prophet of Jehovah at Samaria. Ahab replied that there was not one—Micaiah, the son of Immer; but, in words which obviously call to mind a passage in the Jpsid. vii. 100), he added, "I hate him, for he does not prophesy good concerning me, but evil." Micaiah was, nevertheless, sent for: and after an attempt had in vain been made to tamper with him, he first expressed an ironical concurrence with the 400 prophets, and then openly foretold the defeat of Ahab's army and the death of Ahab himself. And in opposition to the other prophets, he said, that he had seen Jehovah sitting on his throne, and all the host of Heaven standing by him, on his right hand and on his left: that Jehovah said, Who shall persuade Ahab to go up and fall at Ramoth Gilead? that a Spirit came forth and said that he would do so; and being asked, Whence? he answered, that he would go forth and be a lying spirit in the mouth of all the prophets. Iritated by the account of this vision, Zedekiah struck Micaiah on the cheek, and Ahab ordered Micaiah to be taken to prison, and fed on bread and water, till his return to Samaria. Ahab then went up with his army to Ramoth Gilead; and in the battle which ensued, Benhadad, who could not have failed to become acquainted with Micaiah's prophecy, uttered so publicly, which had evoked such an act of public personal violence, on the part of Zedekiah, gave special orders to direct the attack against Ahab, individually. Ahab, on the other hand, requested Jehoshaphat to wear his royal robes, which we know that the king of Judah had brought with him to Samaria (1 K. xxi. 10); and then he put himself into disguise for the battle: hoping thus, probably, to baffle the designs of Benhadad, and the prediction of Micaiah— but he was, nevertheless, struck and mortally wounded in the combat by a random arrow. See 1 K. xxii. 16-15; and 2 Chr. xvi. — the two accounts in which are nearly word for word the same.

Josephus dwells emphatically on the death of Ahab, as showing the utility of prophecy, and the impossibility of escaping destiny, even when it is revealed beforehand (Ant. viii. 35, § 6). He says that it steals on human souls, flattering them with cheerful hopes, till it leads them round to the point whence it will gain the mastery over them. This was a theme familiar to the Greeks conceiving as definite what

tragic tales, and Josephus uses words in unison with their ideas. (See Eupirides, Hypsipyle, 1255, and compare Herodot. vii. 17, viii. 77, l. 91.) Josephus relates several details not contained in the Bible, some of which are probable, while others are very unlikely; but for none of which does he give any authority. Thus, he says, Micaiah was already in prison, when sent for to prophesy before Ahab and Jehoshaphat, and that it was Micaiah who had predicted death by a lion to the son of a prophet, under the circumstances mentioned in 1 K. xx. 35, 36; and had relented Ahab after his brilliant victory over the Syrians for not putting Benhadad to death. And there is no doubt that these facts would be not only consistent with the narrative in the Bible, but would throw additional light upon it; for the relapse of Ahab in his hour of triumph, on account of his forbearance, was calculated to excite in him the interests of displeasure and mortification; and it would at once explain Ahab's hatred of Micaiah, if Micaiah was the prophet by whom the relapse was given. And it is not unlikely that Ahab in his resentment might have caused Micaiah to be thrown into prison, just as the princes of Judah, about 390 years later, maltreated Jeremiah in the same way (Jer. xxxvii. 13). But some other statements of Josephus cannot so readily be regarded as probable. This may be so; but when Ahab disguised himself, he gave his own royal robes to be worn by Jehoshaphat, in the battle of Ramoth Gilead—an act, which would have been so unreasonable and cowardly in Ahab, and would have shown such singular complaisance in Jehoshaphat, that, although supported by the translation in the Septuagint, it cannot be received as true. The fact that some of the Syrian captains misunderstood Jehoshaphat for Ahab is fully explained by Josephus, that being the only person, in the army of Israel, who wore royal robes. Again, Josephus infers us that Zedekiah alleged, as a reason for disregarding Micaiah's prediction, that it was directly at variance with the prophecy of Elijah, that dogs should lick the blood of Ahab, where dogs had licked the blood of Naboth, in the city of Samaria: inasmuch as Ramoth Gilead, where, according to Micaiah, Ahab was to meet his doom was distant from Samaria a journey of three days. It is unlikely, however, that Zedekiah would have founded an argument on Elijah's insulting prophecy, even to the needles of kings who might have been the subject of it; but that, in order to prove himself in the right against Micaiah, he should have ventured on such an allusion to a person of Ahab's character, is absolutely incredible.

It only remains to add, that, besides what is dwelt on by Josephus, the history of Micaiah offers several points of interest, among which the two following may be specified: 1st. Micaiah's vision presents what may be regarded as transitional ideas of one origin of evil actions. In Exodus, Jeho- vah Himself is represented as directly hardening Pharaoh's heart (vii. 3, 13, xiv. 4, 17, x. 29, 27). In the Book of Job, the name of Satan is mentioned; but he is admitted without relapse, among the sons of God, into the presence of Jehovah (Job

would be indefinite in English. (See tiscion. Gram. § 107, and Ad. 21.) The Spirit is conceived as definite from its corresponding to the requirements in the preceding question of Jehovah.
After the Captivity, the idea of Satan, as an independent principle of evil, in direct opposition to goodness, becomes fully established (1 Chr. xxii. 1; and compare Wisd. ii. 24). [Satan.] Now the ideas presented in the vision of Micah are different from each of these three, and occupy a place of their own. They do not go so far as the Book of Job — much less so far as the ideas current after the Captivity; but they go farther than Exodus. See Ewald, Petz. Bücher, 3ter Tellin, 63. 2dly. The history of Micah is an exemplification in practice, of contradictory predictions being made by different prophets. Other striking instances occur in the time of Jeremiah (xiv. 13, 14; xxviii. 15, 16; xiii. 16, 25, 26). The only rule bearing on the judgment to be formed under such circumstances seems to have been a negative one, which would be mainly useful after the event. It is hid down in Deut. xviii. 21, 22, where the question is asked, how the children of Israel were to know the word which Jehovah had not spoken. And the solution is, that "if the thing follow not, nor come to pass, that is the thing which Jehovah has not spoken." E. T.

MICHA (Μηχαί) [who is like God, First]; Mيخא [Vat. Meṣıā] Michæa. 1. The son of Mephibosheth (2 Sam. ix. 12); elsewhere (1 Chr. ix. 40) called Micaah.

2. [Vat. FA. omits.] A Levite, or family of Levites, who signed the covenant with Nebuchadnezzar (Neh. xii. 11).

3. ([Neh. xi. 17, Vat. FA. Mı̂xā; 22, Vat. FA. Mı̂ṣıā, Vat. FA. MA. Meṣıā.)] The father of Mat-tiuia, a Gershonite Levite and descendant of Asaph (Neh. xi. 17, 22). He is elsewhere called Micaah (1 Chr. ix. 15) and Michaliah (Neh. xii. 35).

4. (Mīṣā; [Vat. Sin. Meṣıā] Alex. Xēmā; Micha.) A Simeonite, father of Oziel, one of the three governors of the city of Bethulia in the time of Judith (Jud. vi. 15). His name is remarkable as being connected with one of the few specific allusions to the ten tribes after the Captivity.

MICHAEL (Μηχαήλ) [as above]; [Vat. Meṣıāmā] Michæl. 1. Mı̂ṣıā: an Asherite, father of Sethur, one of the twelve spies (Num. xiii. 13).

2. [Mı̂ṣıāmā.] The son of Abihail, one of the Gadites who settled in the land of Bashan (1 Chr. v. 13).

3. [Vat. Meṣıāmā.] Another Gadite, ancestor of Abihail (1 Chr. v. 14).

4. [Vat. Meṣıāmā.] A Gershonite Levite, ancestor of Asaph (1 Chr. vi. 40).

5. [Vat. Meṣıāmā.] One of the five sons of Isaiah, son of Abiah, a Levite, son of Hezir, the chief of the house of David (1 Chr. xxii. 18); possibly the same as No. 5.

6. [Vat. Meṣıāmā.] One of the five sons of Isaiah, son of Abiah, a Levite, son of Hezir, the chief of the house of David (1 Chr. xxii. 2, 4).

7. [Vat. Meṣıāmā.] One of the captains of the "thousands" of Manasseh who joined the fortunes of David at Ziklag (1 Chr. xii. 20).

8. [Vat. Meṣıāmā.] The father, or ancestor of Omri, chief of the tribe of Issachar in the reign of David (1 Chr. xxiii. 18); possibly the same as No. 5.

9. [Vat. Meṣıāmā, Alex. Meṣıāmā.] One of the sons of Jehoshaphat who were numbered by their elders (2 Chr. xx. 2, 4).

10. [In Ezr. Vat. Meṣıāmā, Alex. Meṣıāmā; in 1 Esdr. Mîxālōs, Vat. Mêxālōstit: Michael, Michelus.] The father or ancestor of Zebadiiah, from the sons of Shephatiah who returned with Ezra (Ezr. vili. 8; 1 Esdr. viii. 34).

W. A. W.

11. "One," or "the first of the chief princes or archangels (Dan. x. 13). comp. άρχονταί τῶν ἀγγέλων (Dan. iii. 21) as the designation of Israel, and in xii. 1 as "the great prince which standeth" in time of conflict "for the children of thy people." All these passages in the O. T. belong to that late period of its revelation when, to the general declaration of the angelic office, was added the division of that office into parts, and the assignment of them to individual angels. [See Angels, vol. i. p. 97 et.] This assignment served, not only to give that vividness to man's faith in God's supernatural agents, which was so much needed at a time of captivity, during the abeyance of his local manifestations and regular agencies, but also to mark the finite and ministerial nature of the angels, lest they should be worshiped in themselves. Accordingly, as Gabriel represents the administration of the angels towards man, so Michael is the type and leader of their strife, in God's name and his strength, against the power of Satan. In the O. T. therefore he is the guardian of the Jewish people in their antagonism to godless power and heathenism. In the N. T. (see Rev. xii. 7) he fights in heaven against the dragon — that of the serpent called the Devil and Satan, which deceiveth the whole world: and so takes part in that struggle, which is the work of the Church on earth. The nature and method of his war against Satan are not explained, because the knowledge would be unnecessary and perhaps impossible to us: the fact itself is revealed rarely, and with that mysterious vagueness which hangs over all angelic ministration, but yet with plainness and certainty.

There remains still one passage (Jude 9; comp. 2 Pet. ii. 11) in which we are told that "Michael the archangel, when, contending with the Devil, he disputed about the body of Moses, durst not bring against him a railing accusation, but said, The Lord rebuke thee." The allusion seems to be to a Jewish legend attached to Deut. xxxiv. 6. The Targum of Jonathan attributes the burial of Moses to the hands of God, and particularly of the archangel Michael, as the guardian of the Jewish people. Later traditions (see Eusebius. in Justin, cap. 1.) set forth how Satan disputed the burial, claiming for himself the dead body because of the blood of the Egyptian (Ex. xii. 12) which was on Moses' hands. The reply of Michael is evidently taken from Zeeh. iii. 1, where, on Satan's "resisting" Joshua the high-priest, because of the filthy garments of his iniquity, Jehovah, or "the angel of Jehovah" (see vol. i. p. 95 b), said unto Satan, "Jehovah rebuke thee, O Satan! Is not this a brand plucked from the fire?" The spirit of the answer is the reference to God's mercy alone for our justification, and the leaving of all vengeance and rebuke to Him; and in this spirit it is quoted by the Apostle.
The Rabbinical traditions about Michael are very numerous. They oppose him constantly to Samuel, the accuser and enemy of Israel, as disputing for the soul of Moses; as bringing the ram the substitute for Isaac, which Samual sought to keep back, etc., etc.; they give him the title of the "great high-priest in heaven," as well as that of the "great prince and conqueror:" and finally lay it down that "wherever Michael is said to have appeared, there the glory of the Shechinah is int.

"It is clear that the sounder among them, in making such use of the name, intended to per
sound the Divine Power, and typify the Messiah (see Schoettgen, Hist. Heb., i. 109, 110, ii. 8, 15, ed. Dresd. 1742). But these traditions, as usual, are erected on very slender Scriptural foun
dation.

A. B.

MICHAH (מִיכָאָה) [as above]: Michael, eldest son of Uzziel, the son of Kohath (1 Chr. xxiv. 24, 25), elsewhere (1 Chr. xxiii. 20) called Micaiah.

MICHAIHY (מִיכָאָי) (3 xyl.) (מִיכָאָי as Je
evah): May-yaiai [Vat. Meyaiai: Michah]. The name is identical with that elsewhere rendered Micaiah. 1. The father of Achar, a man of high rank in the reign of Josiah (2 K. xxii. 12). He is the same as Micaiah the father of Akebi (2 Chr. xxiv. 20).

2. Micaiah: Alex. Mechaia [Vat. FA. Me
cyiai: Michaei]. The son of Zaccur, a descendant of Asaph (Neh. xii. 35). He is the same as Micaiah the son of Zicri (1 Chr. ix. 15) and Micia the son of Zabdi (Neh. xii. 17).

3. (Omitted in Vat. MS. [also Rom. Alex. FA.].) Alex. [rather FA.] Mechiiaia: Michael). One of the priests who blew the trumpets at the dedication of the wall of Jerusalem by Nehemiah (Neh. xii. 41).

4. (מִכָּאָה: Maicax [who like Jehovah]: Mich. atv,). The daughter of Uriel of Gibeah, wife of Jehoiob, and mother of Abijah king of Judah (2 Chr. viii. 2). She is elsewhere called "Macliha" the daughter of Alâshaham (1 K. iv. 2), or "Ab
asom" (2 Chr. xii. 20), being, in all probability, his granddaughter, and daughter of Tanam according to Josephus. (Michaiah, 3). The reading "Macliha" is probably the true one, and is sup
pported by the LXX. and Peshito-Styria.

5. (Micaiaia [Vat. Meyaia: Micaiah). One of the priests of Jehoshaphat whom he sent with certain priests and Levites to teach the law of Jeh
evah in the cities of Judah (2 Chr. xvii. 7).

W. A. W.

6. (מִכָּאָה [as above]: Michayia: [Vat. Me
cyiai: Michaei]). The son of Garem. He is only mentioned on one occasion. After Baruch had read, in public, prophecies of Jeremiah announcing imminent calamities, Michael went and declared them to all the princes assembled in king Zedekiah's house; and the prince

forthwith sent for Baruch to read the prophecies

to them (Jer. xxxvi. 11–14). Michael was the third in descent of a princely family, whose names are recorded in connection with important religious transactions. His grandfather Shaphan was the scribe, or secretary of king Josiah, to whom Hilkiah the high priest first delivered the book of the law which he said he had found in the House of Je
hvah—Shaphan first perusing the book himself and then reading it aloud to the youthful king (2 K. xxii. 10). And it was from his father Gerniath's chamber in the Temple, that Baruch read the prophecies which Jehoiakim, in the ears of all the people. Moreover, Jeremiah was one of the three who made intercession to king Zedekiah, al

though in vain, that he would not burn the roll

containing Jeremiah's prophecies.

E. T.

MICHAEL (מִיכָאָל) [who like God]: Mechaia [2 Sam. xxxii. 8, Rom. Vat. Meyaia: Joseph. Me
cyia: Michael), the younger of Saul's two daughters (1 Sam. xiv. 40). The king had proposed to bestow on David his eldest daughter Mearah; but before the marriage could be arranged an unex
terected marriage was given to the matter by the behavior of Michael, who fell violently in love with the young hero. The marriage with her elder sister was at once put aside. Saul eagerly caught at the opportu

nity which the change afforded him of exposing his rival to the risk of death. The price fixed on Michael's land was no less than the slaughter of a hundred Philistines. a For these the usual "dowry" by which, according to the custom of the East, from the time of Jacob down to the present day, the father is paid for his daughter, was reli

quished. David by a brilliant feat doubled the tale of victims, and Michael became his wife. What her age was we do not know—her husband cannot have been more than sixteen.

It was not long before the strength of her affec

tion was put to the proof. They seem to have been living at Gibeah, then the head-quarters of the king and the army. After one of Saul's attacks of frenzy, in which David had barely escaped being transfixed by the king's great spear, Michael learned that the house was being watched by the myrmidons of Saul, and that it was intended on the next morning to attack her husband as he left his door (xiv. 11). That the intention was real was evident from the behavior of the king's soldiers, who formed a circle round the town, and "return

"ing to the house in the evening," with loud cries, more like the yells of the savage dogs of the East than the utterances of human beings, b belched out "curses and lies against the young warrior who had so lately shamed them all" (Ps. lxix. 3, 6, 7, 12). Michael seems to have known too well the va

vocating and ferocious disposition of her father which had never tamed nor subdue the town, and the attack was ordered for the morning; but before the morning arrives the king will probably have changed his mind and hastened his stroke. So, like a true soldier's wife, she meets straggen by stratagems to be counted. Josephus often uses it by substitut

ing heads for foreskins, but it is obvious that heads would not have assessed the same purpose. The LXX., who often after obscurous expressions, adhere to the He

brew text.

a Perhaps nothing in the whole Bible gives so com

plete an example of the gap which exists between

Keller and the Western lists, as the manner in which

the tale of these undocumented enemies of Israel was

rendered.

b This Psalm, by its title in the Hebrew, LXX., Vulgate, and Targum, is referred to the event in ques

 tion, a view strenuously supported by Hengstenberg.
Michal 1921

She first provided for David's safety by lowering him out of the window; to gain time for him to reach the residence of Samuel she next dressed up the bed as if it were occupied by him: the teraphim, or household god, was laid in the bed, its head enveloped, like that of a sleeper, in the usual neat tuck of goat's hair for protection from gnats, the rest of the figure covered with the wide beged or philt. [David's I. 1. 5 (2 Sam. I. 15).] David beheld, as she had feared; Saul could not delay her vengeance till David appeared out of doors, but sent his people into the house. The reply of Michal is that her husband is ill and cannot be disturbed. At last Saul will be baffled no longer: his messengers force their way into the innmost apartment and there discover the deception which has been played off upon them, with such success. Saul's rage may be imagined: his fury was such that Michal was obliged to fabricate a story of David's having attempted to kill her.

This was the last time she saw her husband for many years; and when the rupture between Saul and David had become open and incurable, Michal was married to another man, Phalri or Phalriel of Gabbim (1 Sam. xxv. 44; 2 Sam. ill. 13), a village probably not far from Gibeah. After the death of her father and brothers at Gibeon, Michal and her new husband appear to have betaken themselves with the rest of the family of Saul to the eastern side of the Jordan. If the old Jewish tradition inserted by the Targum in 2 Sam. xxi. may be followed, she was occupied in bringing up the sons of her sister Merab and Adriel of Mahoheth. At any rate, it is on the road leading up from the Jordan Valley to the Mount of Olives that we first encounter her with her husband. — Michal under the joint escort of David's messengers and Abner's twenty men, en route to David at Hebron, the submissive Phalriel behind, bewailing the wife thus torn from him. It was at least fourteen years since David and she had parted at Gibeah, since she had watched him disappear down the cord into the darkness and had perilled her own life for his. His race the rage of her inimical father. That David's love for his absent wife had undergone no change in the interval seems certain from the eagerness with which he reckons her as soon as the opportunity is afforded him. Important as it was to him to make an alliance with Ishbosheth and the great tribe of Benjamin, and much as he respected Abner, he will not listen for any moment to any overtures till his wife is restored. Every circumstance is fresh in his memory. "I will not see thy face except thou first bring Saul's daughter . . . my wife Michal whom I espoused to me for a hundred foreskins of the Philistines" (2 Sam. iii. 13, 14). The meeting took place at Hebron. How Michal comportcd herself in the altered circumstances of David's household, how she received or was received by Abigail and Abinomrah, we are not told; but it is plain from the subsequent occurrences that something had happened to alter the relations of herself and David. They were no longer what they had been to each other. The alienation was probably mutual. On her side must have been the recollection of the long contests which had taken place in the interval between her father and David; the strong anti-Saulite and anti-Benjamite feeling prevalent in the camp at Hebron, where every word she heard must have contained some distasteful allusion, and where at every turn she must have encountered men like Abiathar the priest, or Ishmaiah the Gibeonite (1 Chr. xii. 4; comp. 2 Sam. xxii. 2), who had lost the whole or the greater part of their relatives in some sudden burst of her father's fury. Add to this the connection between her husband and the Philistines who had killed her father and brothers; and, more than all perhaps, the inevitable difference between the boy-husband of her recollections and the matured and occupied warrior who now received her. The whole must have come upon her as a strong contrast to the affectionate husband whom they had followed her along the road from Olivet [2 Sam. iii. 16], and to the home over which we cannot doubt she ruled supreme. On the side of David it is natural to put her advanced years, in a climate where women are old at thirty, and probably a petulant and jealous temper inherited from her father, one outburst of which certainly produced the rupture between them which closes our knowledge of Michal.

It was the day of David's greatest triumph, when he brought the Ark of Jehovah from its temporary resting-place to its house in the newly-acquired city. It was a triumph in every respect peculiarly his own. The procession consisted of priests, Levites, the captains of the host, the elders of the nation; and conspicuous in front, "in the midst of the damsels playing on the timbrels," b was the king dancing and leaping. Michal watched this procession approach from the window of her apartments in the royal harcon: the notion of her husband shock her as unlooked for and indiscreet;—"as she despised him in her heart." It would have been well if her contempt had rested there: but it was not in her nature to conceal it, and when, after the exertions of the long day were over, the last burnt-offering and the last peace-offering offered, the last portion distributed to the crowd of worshippers the king entered his house to bless his family; he was received by his wife not with the congratulations which he had a right to expect and which would have been so grateful to him, but with a bitter taunt which showed how incapable she was of appreciating either her husband's temper or the service in which he had been engaged. David's of the women as stated above is implied in the words of Michal in 2 Sam. vi. 20, when compared with the statement of Ps. lxviii.

a תֵּחָנָה. This is Ewald's explanation of a term which has puzzled all other commentators (Greek. i. 101). For תֵּחָנָה, the LXX. seem to have read תֵּחָנָה, a liver; since they state that Michal put the liver of a goat at David's head." For an ingenious suggestion founded on this, see M'Nege, vol. ii. p. 175 a. b No doubt a similar procession to that alluded to in Ps. lviii. 25, where it will be observed that the words interpolated by our translators —"among them were the damsels"—alter the sense. The presence
MICHMAS

MICHMAS (ΜΙΧΜΑΣ), the prophet Micah the Morarabite (2 Esdr. I. 38).

MICHMAS [μιχμας]: [In Ezr.] "Mays'as: Alex., Nauis: [in Neh. Mayxasa: Micmah], a variation, probably a later form, of the name MICHMAS (Ex. ii. 27; Neh. xii. 31). In the parallel passage of 1 Esdr. it is given as MACAMAS. See the following article, G.

MICHMASII [μιχμας II, something hidden, treasure, Gen.: place of Gethmem, First]: "Mays'as: [in 1 Sam. xii. 11, 22, 25, xiv. 31, Mayxasa]: Michmash, a town which is known to us almost solely by its connection with the Philistine war of Saul and Jonathan (1 Sam. xii. 4. xiv.). It has been identified with great probability in a village which still bears the name of Michmash, and stands at about 7 miles north of Jerusalem, on the northern edge of the great Wady Sareaat — in some Maps "Farone" — which forms the main post road communication between the central highlands on which the village stands, and the Jordan valley at Jericho. Immediately naving Michmash, on the opposite side of the ravine, is the modern representative of Gaba: and behind this again are Ramah and Gibeah — all memorable names in the long struggle which has immortalized Michmash. Bethel is about 4 miles to the north of Michmash, and the interval is filled up by the heights of Barke, their Daera, Tell el Hujor, etc., which appear to have constituted the "Mount Bethel" of the mar-

ative (xii. 2). So much is necessary to make the notices of Michmash contained in the Bible intel-

ligible.

The place was thus situated in the very middle of the tribe of Benjamin. If the name be, as some scholars assert (First, Horneheb, 600 b. 752 b.), compounded from that of Chemosh, the Moabite deity, it is not improbably a relic of some invasion or invasion of the Philistines, just as Ushpar-hammom, in this very neighborhood, is of the Am-

monites, and is not named in the list of the towns of that tribe (comp. Josh. xiii.); but first appears as one of the chief points of Saul's position at the out-

break of the war. He was occupying the range of heights just mentioned, one end of his line resting on Bethel, the other at Michmash (1 Sam. xii. 2). In Gaba, close to him, but separated by the wide and intricate valley, the Philistines had a garrison, with a chief officer. The taking of the garrison or the killing of the officer by Saul's son Jonathan was the first move. The next was for the Philis-
tines to swarm up from their sea-side plan in such numbers, that no alternative was left for Saul but to retire down the way to Gilgal, near Jericho, that from that ancient sanctuary he might collect such a force of the Israelites, which was then occupied by the Philistines, and was their furthest post to the East. d But it was destined to witness their sudden overthrow. While he was in Gaba, and his father in Michmash, Jonathan must have crossed the intervening valley too often not to know it thoroughly; and the intricate paths which render it impossible for a stranger to find his way through the mounds and boulders which cross the bottom of the ravine — with these he was so familiar — the "passages" here, the "sharp rocks" there — as to be able to traverse them even in the dark. It was just as the day dawned (Joseph. Ant. vi. 6, § 2) that the watchers in the garrison at Michmash described the two Hebrews clustering up the steepa beneath. We learn from the details furnished by Josephus, who must have had an opportunity of examining the spot when he passed it with Titus on their way to the siege of Jerusalem (see B. J. v. 2, § 1), that the part of Michmash in which the Philistines had established themselves consisted of three summits, surrounded by a line of rocks like a natural entrenchment, and ending in a long and sharp precipice believed to be impregnable. Finding himself observed from above, and taking the invitation of an omen in his favor, Jonathan turned from the course which he was at first pursuing, and crept up in the direction of the point reputed im-

pregnable. And it was there, according to Jose-

a The Jewish tradition, preserved in the Targum on Ruth iii. 8, states that Phinehas did not have been seen by the idea alluded to in the text. He is placed in the same rank with Joseph, and is com-
mementorized as "Phaithet, son of Labish, the pious (Σφαιμης, the word used for the Puritans of the New Testament times), who placed a sword between himself and Michah, Saul's daughter, lest he should go into her." [Asmianus].

b The change of ΕΙ into ΕΙ is frequent in the later Hebrew. (see Text. Trans. 391 b).

c The Hebrew word Σφαιμης or Σφαιματς means both an officer and a garrison. (Text. Trans. 393). It is re-

nered in the A. V. by the former in 1 K. iv. 19, and

by the latter in the passage in question. (Ewald (Grch. iii. 41) affirms unscientifically that the former is correct; but not so Michaelis, Zunz, and De Wette, in their translations, or Gesenius as above. The Eng-

lish word "post" embraces some of the significations of Σφαιμης.

d See xiv. 31, where Michmash is named as the point on the east at which the slaughter began, and Ayil, on the west, that at which it terminated. Unlike the Cannites (Josh. x. 1), who probably made off in the direction of Phoenicia and therefore chose the upper road by the two Beth-hernes, the Philistines when they reached Gilbon took the left hand and lower road, by the Wady Sulmanah — where they still exist the most direct access to their own maritime plain. 
pious, that he and his armor-bearer made their
entrance to the camp (Joseph, Ant. vi. 6, § 2).

[GIRKAI, vol. ii. p. 915; JONATHAN.]

Unless M Akaz be Michmash — an identification for which we have only the authority of the LXX., — we hear nothing of the place from this time till the invasion of Judah by Semnecharib in the reign of Hezekiah, when it is mentioned by Isaiah (x. 28). He is advancing by the northern road, and has passed Ai and Mizpah. At Michmash, on the further side of the almost impassable ravine, the heavy baggage (A. V. „carriages,” see vol. i. p. 392 a) is deposited, but the great king himself crosses the pass, and takes up his quarters for the night at Gela. All this is in exact accordance with the indications of the narrative of 1 Samuel, and with the present localities.

After the Captivity, the men of the place re-
turned, 122 in number (Ezr. i. 27; Neh. vii. 31), in both these the name is slightly altered to Mich-
mas), and reoccupied their former home (Neh. xii. 31).

At a later date it became the residence of Jon-
than Maccabaeus, and the seat of his government (1 Mace. ix. 73). „Michmash” (Josh. xiii. 1, § 8) in the time of Eusebius and Jerome („Comm. in Hier.”) was „a very large village retaining its ancient name, and lying near Tamah in the district of Aelia (Jerusalem), at 5 miles distance therefrom.”

Later still it was famed for the excellence of its corn. See the quotation from the Mishna (Men-
nothoth) in Babli (Psalms, p. 937), and Schwartz (p. 131). Whether this excellence is still maintained we do not know. There is a good deal of cultivation in and amongst groves of old olices in the broad shallow wadis which slopes down to the north and east of the village; but Michmash itself is a very poor place, and the country close to it has truly „a most forbidding aspect.” — „Huge gray rockes raise up their sted crowns, completely hiding every patch of soil, and the gray huts of the village, and the gray ruins that encompass them can hardly be distinguished from the rocks themselves.” There are considerable remains of massive foundations, columns, cisterns, etc., testifying to former pros-
perity, greater than that of either Anathoth or Gela (Porter, Hor. 215, 216).

Immediately below the village, the great wady spreads out to a considerable width — perhaps half a mile, and its bed is broken up into an intricate mass of hummocks and mounds, some two of which, before the torrents of 3,000 winters had reduced and rounded their forms, were probably the two „teeth of cliff” — the Boez and Seneh of Jonathan’s ad-
venture. Right opposite is Jetir, on a curiously terraced hill. To the left the wady contracts again, and shows a narrow black gorge of almost vertical limestone cliffs, and its bed is broken with mysterious caverns and fissures, the forest, so the writer was assured, of hyenas, porcupines, and eagles. In the wet season the stream is said to be often deeper than a man’s neck, very strong, and of a bright yellow color.

In the Middle Ages el-Birch was believed to be Michmash (see Maunder, March 29; and the zonopieus details in Ormamentum, Elscobotio, ii. 785, 787.) But el-Birch is now ascertained on good „rounds to be identical with Be'eroth. G.

MICH' MATHAH (מיח' מתח), i. e. the
Micmethath: „Machmuth; ἱασάμων; Φιλαδέλφε; Αλεξ. Mάκσων,
in both cases: Michmethath), a place which formed one of the landmarks of the boundary of the ter-
ritories of Ephraim and Manasseh on the western side of Jordan. (1.) It lay „facing (םב"ש)
Shechem;” it also was the next place on the boundary west of Asher (Josh. xvii. 7), if indeed the two are not one and the same place — ham-
Micmethath a distinguishing suffix to the commoner
name of Asher. The latter view is taken by Reland (Palestine, p. 590) — no mean authority — and also by Schwarz (p. 147), but it is not supported by the Maiseric accents of the passage. The former is that of the Targum of Jonathan, as well as our
own A. V. Whichever may ultimately be found correct, the position of the place must be some-
where on the east of and not far distant from Shechem. But then (2.) this appears quite incon-
sistent with the mention of the same name in the specification of a former boundary (Josh. xvi. 6). Here the whole description seems to relate to the boundary between Benjamin and Ephraim (i. e. Ephraim’s southern boundary), and Michmash follows Beth-horon the upper, and is stated to be on its west or seaward side. Now Beth-horon is at least 20 miles, as the crow flies, from Shechem, and more than 30 from Asher. The only escape from such hopeless contradictions is the belief that the statements of chap. xvi. have suffered very great mutilation, and that a gap exists between 5 and 6, which if supplied would give the land-
marks which connected the two remote points of Beth-horon and Michmash. The place has not been met with nor the name discovered by travel-
ers, ancient or modern.

MICH' R (מ"ר, [perh. purchased, valuable, Gaz.]: Μασίοπ: [Vat. Maxeop]: Alex. Μαξερός, Moerori). Ancestor of Elah, one of the heads of the fathers of Benjamin (1 Chr. ix. 8) after the Captivity.

MICH'TAM (מ"ת, στηριγματια: title inscriptio). This word occurs in the titles of six Psalms (xvi., lvi.–lx.), all of which are ascribed to David. The marginal reading of our A. V. is “a
golden psalm,” while in the Geneva version it is described as „a certain tune.” From the position which it occupies in the titles, compared with that of Mizmor (A. V. “Psalm,” Ps. iv.–vi., etc.), M i c h e l (Ps. xxxii., etc.), and Shiggoth (Ps. viii.), the first of which certainly denotes a song with an instrumenal accompaniment (as distinguished from shir, a song for the voice alone), we may infer that michaeth is a term applied to these psalms to de-
note their musical character, but beyond this every-
thing is obscure. The very etymology of the word is uncertain. L. Kimchi and Aben Ezra, among Rabbincular writers, trace it to the root מך, catham, as it appears in מכות, cethum, which is rendered in the A. V. “gold” (Job xxviiii, 16), „pure gold” (Job xxviii, 19), „fine gold” (Job xxxi. 24) because the psalm was to David precious as fine gold. They have been followed by the translators in the margin of our version, and the M i c h a t h Psalms have been compared with the „Golden Sayings” of Pythagoras and the Proverbs of Ali. Others have thought the epithet „golden” was applied to these psalms, because they were

a For the situation of the town of Azier see notes to MANASSEH, vol. ii. p. 1170.
written in letters of gold and suspended in the Sanctuary or elsewhere, like the Middoth, or suspended poems of Mecca, which were called Medhaloth, or "golden," because they were written in gold characters upon Egyptian lines. There is, however, no trace among the Hebrews of a practice analogous to this. Another interpretation, based upon the same etymology of the word, is given to Michtam by an unknown writer quoted by Jarchi (Is. xvi. 1). According to this, it signifies "a crown," because David asked God for his protection, and He was as a crown to him (Ps. v. 12).

In Syrian the root in conj. פָּלַל, פָּלָל, פָּלָל, signifies "to stain," hence "to defile," the primary meaning in Psalms being probably "to spot, mark with spots," whence the substantives is in common use in Kaballistic Hebrew in the sense of "spot" or "mark." (comp. Kimchi, on Am. i. 1). In this sense the Niphal participle occurs in Jer. ii. 22, "thine iniquity is spotted before me." This makes the parenthesis more striking than the "marked" of our A. V. From this etymology the meanings have been given to Michtam of "a medall song" (Lumin and Tremellius, instants), or a song which was given or carved upon stone, a monumental inscription; the latter of which has the merit of antiquity in its favor, being supported by the renderings of the LXX., Theodotion, the Chaldee Targum, and the Vulgate. (See Michaelis, Suppl. ad Lex. Heb. No. 1212.) There is nothing in the character of the psalms so designated to render the title appropriate; had the Hebrews been acquainted with musical notes, it would be as reasonable to compare the word Michtam with the old English "pick-song," "a song picked or noted.

In the utter darkness which envelopes it, any conjecture is worthy of consideration; many are valueless as involving the transference to one language of the metaphors of another.

3. The corresponding Arab. مكح, catham, "to conceal, repress," is also restored to for the explanation of Michtam, which was a title given to certain psalms, according to Hazael, because they were written while David was in concealment. This, however, could not be appropriate to Ps. viii., ix. From the same root Heinzengberg attests to them a kabmon, mysterious import, and renders Michtam by kabmonim, which he explains as "an Lied tiden Sinnes." Apparently referring the word to the same origin, Euwadi (Jahad, viii. p. 68) suggests that it may designate a song accompanied by some instruments, like "the cymbals of trumpet-sound" of Ps. cl. 5, which would be adapted to the plaintive character of Ps. xvi. and others of the series to which it is applied. The same nautical tone is also believed to be indicated in Michtam as derived from a root analogous to the Arab. مكح, catham, which in conj. vii. signifies "to be sad," in which case it would denote "an elegy.

4. But the explanation which is most approved by Rosenmuller and Gesenius is that which finds in Michtam the equivalent of בֵּיתֹל, "niddle;" a word which occurs in Is. xxxviii. 9 (A. V., "writing"), and which is believed by Capellus (Crit. Sacr. iv. 2, § 11) to have been the reading followed by the LXX. and Targum. Gesenius supports his decision by instances of similar interchanges of ל and ל in roots of cognate meaning. In accordance with this De Wette renders "Schrift."

5. For the sake of completeness another theory may be noticed, which is quite untenable in itself, but is curious as being maintained in the versions of Aquila and Symmachus, and of Jerome a according to the Hebrew, and was derived from the kaballistic interpreters. According to these, מֵיתֹל is an enigmatic word equivalent to יהות, "humble and perfect," epithets applied to David himself.

It is evident from what has been said, that nothing has been done to throw light upon the meaning of this obscure word, and there seems little likelihood that the difficulty will be cleared away. Beyond the general probability that it is a musical term, the origin of which is uncertain and the application lost, nothing is known. The subject will be found discussed in Rosenmuller's Schoben (Psalms, vol. i. cap. 4, 6: xii.-xiii.), and by Hambold (Die Psalmen, t. 308-311), who has collected all the evidence bearing upon it, and adheres to the rendering kleinod (jewel, treasure), which Luther also gives, and which is adopted by Hitzig and Mendelssohn.

W. A. W.

MIDIAN (מִיְדָנָן; flesh, extension: Αἰδών [Vex.] Μαδιὼν [Comp. Μαδίδης; Medion], a city of Judah (Jos. xv. 61), one of the six specified as situated in the district of the midbar (A. V., "wilderness"). This midbar, as it contained Beth Le-Arabah, the city of Salt, and Engedi, must have embraced not only the waste lands on the upper level, but also the cliffs themselves and the strip of shore at their feet, on the edge of the lake itself. Midian is not mentioned by Eusebius or Jerome, nor has it been identified or perhaps sought for by later travellers. By Yan de Velde (Mesopot., 246, and Mop) mention is made of a valley on the south-western side of the Dead Sea, below Masada, called Us a el-Bedon, which may contain a trace of the ancient name. G.

* MIDDLE-WALL [Partition, Wall or, Amer. ed.]

MIDIAN (מִדְיָן, strife, contention, Gez.: Maadd' (occasionally Ma'dor; Medion), a son of Abraham and Keturah (Gen. xxv. 2; 1 Chr. 1. 32); progenitor of the Midinantes, or Arabic dwelling permanently in the desert north of the peninsula of Arabia. Southwards they extended along the eastern shore of the Gulf of Elykhe (Sinus)}
(Exonicus): and northwards they stretched along the eastern frontier of Palestine; while the cases in the peninsula of Sinai seem to have afforded them pasture grounds, and caused it to be included in the "land of Midian" (but see below on this point). The people is always spoken of, in the Hebrew, as "Midian," מִדְיָן, except in Gen. xxxvii. 36; Num. xxv. 17, xxxi. 2, where we find the pl. מִדְיָנִים.

In Gen. xxxvii. 28, the form מִדְיָן occurs, rendered in the A. V. as well as in the Vulg. "a Midianite;" and this is probably the correct rendering; since it occurs in ver. 36 of the same chapter, though the people here mentioned may be descendants of Midian (which see). The gentile form מַדְיָן, "Midianite," occurs once, Num. x. 29.

After the chronological record of Midian's birth, with the names of his sons, in the xxvth chapter of Genesis, the name disappears from the Biblical history until the time of Moses: Midian is first mentioned, as a people, when Moses fled, having killed the Egyptian, to the "land of Midian" (Ex. ii. 15), and married a daughter of a priest of Midian (21). The "land of Midian," or the portion of it specially referred to, was probably the peninsula of Sinai, for we read in the next chapter (ver. 1) that Moses led the flock of Jethro his father-in-law, the priest of Midian, to the "lackside of the desert, and came to the mountain of God, even Horeb," and this agrees with a natural supposition that he did not flee far beyond the frontier of Egypt (compare Ex. xviii. 1-27, where it is recorded that Jethro came to Moses to the mount of God after the Exodus from Egypt; but in x. 27 "he went his way into his own land:" see also Num. x. 28, 29). It should, however, be remembered that the name of Midian (and hence the "land of Midian") was perhaps often applied, as that of the most powerful of the northern Arab tribes, to the northern Arabs generally, i.e. those of Arabimic descent (comp. Gen. xxxvi. 28, but see respecting this passage above); and Judg. viii. 24; just as Beka and Kedem entered all those peoples and, with a wider signification, other Eastern tribes. If this reading of the name be correct, "Midian" would correspond very nearly with our modern word "Arab;" limiting, however, the modern word to the Arabs of the northern and Egyptian deserts: all the Ishmaelite tribes of those deserts would thus be Midianites, as we call them Arabs, the desert being their "land." At least, it cannot be doubted that the descendants of Hagar and Keturah inter-married; and thus the Midianites are apparently called Ishmaelites, in Judg. viii. 24, being connected, both by blood and national customs, with the father of the Arabs. The wandering habits of nomadic tribes must also preclude our arguing from the fact of Moses' leading his father's flock to Horeb, that Sinai was necessarily more than a station of Midian: those tribes annually traverse a great extent of country in search of pasture, and have their established summer and winter pastures. The Midianites were mostly (not always) dwellers in tents, not towns; and Sinai has not sufficient pasture to support more than a small, or a moving people. But it must be remembered that perhaps

(or we may say probably) the peninsula of Sinai has considerably changed in its physical character since the time of Moses: for the adjacent isthmus has since that period, risen many feet, so that the "tongue of the Egyptian Sea" has dried up: and this supposition would much diminish the difficulty of accounting for the means of subsistence found by the Israelites in the wanderings in the wilderness, when not miraculously supplied. Apart from this consideration, we knew that the Egyptians afterwards worked mines at Sardab el-Khadim and a small mining population may have found sufficient sustenance, at least in some seasons of the year, in the few walled valleys, and wherever ground could be reclaimed: rock-inscriptions (though of later date) testify to the number of at least considerable; and the remains of villages of a mining population have been recently discovered. Whatever may have been the position of Midian in the Sinaitic peninsula, if we may believe the Arabian historians and geographers, backed as their testimony is by the Greek geographers, the city of Midian was situate on the opposite, or Arabian, side of the Arabian gulf, and spreading east and west we have the true country of the wandering Midianites. See further in SNAI.

The next occurrence of the name of this people in the sacred history marks their northern settlements on the border of the Promised Land, "on this side Jordan [by] Jericho" in the plains of Moab (Num. xxii. 1-4), when Balak said, of Israel, to the elders (מִדְיָן), or "old men," the same as the Arab "sheikhs") of Midian, "Now shall this company lick up all [that are] round about us, as the ox licketh up the grass of the field." In the subsequent transaction with Balaam, the elders of Midian went with those of Moab, "with the rewards of divination in their hand" (7); but in the remarkable words of Balaam, the Midianites are not mentioned. This might be explained by the supposition that Midian was a wandering tribe, whose pasture-lands reached wherever their Aramian desert and frontier of Palestine, pasture was to be found, and who would not feel, in the same degree as Moab, Amalek, or the other more settled and agricultural inhabitants of the land allotted to the tribes of Israel, the arrival of the latter. But the spoil taken in the war that soon followed, and more especially the mention of the dwellings of Midian, reader this suggestion very doubtful, and point rather to a considerable pastoral settlement of Midian in the trans-Jordanic country. Such settlements of Arabs have, however, been very common. In this case the Midianites were evidently tributary to the Amorites, being "dikes of Sihon, dwelling in the country (דִּישַּׁנְיָן מֵאֲבָד): this inferior position explains their omission from Baalham's prophecy. It was here, "on this side Jordan," that the chief doings of the Midianites with the Israelites took place. The latter, while they abode in Shittim, "joined themselves unto Baal-Peeor" (Num. xxv. 1, &c.) — apparently a Midianite as well as a Moabish deity — the result of the sin of whoredom with the Moabith women; and when "the anger of the Lord was kindled against Israel ... and the congregation of the children of Israel [were] weeping [before] the door of the tabernacle of the congregation," an Israelite brought a Midianitish woman openly into the camp. The
MIDIAN

That of this woman Cozbi, that of a daughter of Zar, who was dead over a people of a chief house in Midian; ... through a strange light over the descent of that people's history. The views of the Canaanites, idlytry and whoredom, had infected the descendants of Abraham, doublets connected by successive intermarriages with those tribes: and the prostitution of this chief's daughter, caught as it was from the customs of the Canaanites, is evidence of the ethnological type of the latter tribe. Some Africanations of a similar custom to offer their unmarried daughters to show hospitality to their guests. Zar was one of the five "kings" (בֶּן־עַז), slain in the war with Midian, recorded in ch. xxvii.

The influence of the Midianites on the Israelites was clearly most evil, and directly tended to lead them from the injunctions of Moses. Much of the dangerous character of their influence may probably be ascribed to the common descent from Abraham. While the Canaanite tribes were abased, Midian might claim consanguinity; and more readily solve Israel from their allegiance. The events at Shittim occasioned the immediate exodus of Midian and unite them — for they vex you with their wiles, where— with they have beguiled you in the matter of Peor and in the matter of Cozzi, the daughter of a prince of Midian, their sister, which was slain in the day of the plague for Peor's sake" (Num. xxxv. 18); and further on, Moses is enjoined, "Avenge the children of Israel of the Midianites: afterward shall they be gathered unto thee people" (xxxii. 2).

Twelve thousand men, a thousand from each tribe, went up to this war, a war in which all the males of the enemy were slain, and the five kings of Midian — Evi, Rekeem, Zar, Hur, and Reba, together with Baham; and afterwards, by the express command of Moses, only the virgins and female infants, of the captives brought into the camp, were spared alive. The cities and castles of the vanished, and the spoil taken, afford facts to which we shall recur. After a lapse of some years (the number is very doubtful, see CHRONOLOGY), the Midianites appear again as the enemies of the Israelites. They had recovered from the devastation of the former war, probably by the arrival of fresh colonists from the desert tribes over which they had wandered; and they now were sufficiently powerful to become the oppressors of the children of Israel. The advocates of a short chronology must, however unwillingly, concede a considerable time for Midian thus to recover from the severe blow inflicted by Moses. Allied with the Amalekites, and the Bnei-Kedem, they drove them to make dens in the mountains and caves and strongholds, and wasted their crops even to Gaza, on the Mediterranean coast, in the land of Simeon.

The judgeship of Gideon was the immediate consequence of these calamities; and with the latter he fought in the valley of Jezreel, and his pursuit of the flying enemy over Jordan to Karkor, the power of Midian seems to have been broken. It is written (Judg. viii. 28). The part taken by Gideon in this memorable event has been treated of elsewhere, but the Midianite side of the story is pregnant with interest. [GIDEON.]

Midian had oppressed Israel for seven years. As a nameless eastern horde they entered the land with their cattle and their camels. The imaginative green plains of Palestine sprinkled with the black goat's-hair tents of this great Arab tribe, their flocks and herds and camels let loose in the standing corn, and bringing parties of horsemen driving before them the possessions of the Israelites; for "they came like locusts (A. V. "grasshoppers, " מַגָּשִׁים, for multitudes" (Judg. vi. 5), and when the "angel of the Lord" came to Gideon, so severe was the oppression that he was threshing wheat by the wine-press to hide it from the Midianites (11). When Gideon had received the divine command to deliver Israel, and had thrown down the altar of Baal, we read, "Then all the Midianites and the Amalekites and the Bnei-Kedem were gathered together and went over," descended from the desert hills and crossed Jordan, "and pitched in the Valley of Jezreel" (33) — part of the Plain of Esraelon, the battle-field of Palestine — and there, from the gray, bleak crowns of Gilboa," where Saul and Jonathan perished, and Gideon, with the host that he had gathered together of Israel, look down on the Midianites, who "were on the north side of them, by the hill of Moreh, in the valley" (vii. 1). The scene over that fertile plain, dotted with the enemies of Israel, "the Midianites and the Amalekites and all the Bnei-Kedem, [who] lay along in the valley like beasts for multitude, and their camels were without number, as the sand by the sea-side for multitude" (vii. 12), has been picturesquely painted by Professor Stanley (S. of P.).

The descent of Gideon and his servant into the camp, and the conversation of the Midianite watch forms a vivid picture of Arab life. It does more: it proves that as Gideon, or Pharaoh, his servant, or both, understood the language of Midian, the Semitic languages were much less untranslatable than they did in after times [see ARAMA, vol. i. p. 142]; and we besides obtain a remarkable proof of the consanguinity of the Midianites, and learn that, though the name was probably applied to all or most of the northern Abrahamite Arabs, it was not applied to the Canaanites, who certainly did not then speak a Semitic language that Gideon could understand.

The stratagems of Gideon receive an illustration from modern oriental life. Until lately the police in Cairo were accustomed to go their rounds with a lighted torch thrust into a pitcher, and the pitcher was suddenly withdrawn when light was required (Lane's Med. Jy. 5th ed. p. 120) — a custom affording an exact parallel to the ancient

a ־בֶּן־עַז, head of families of a patriarchal house; "afterwards in ver. 18, called prince, נְבָעָה. (See next note.)

b These are afterwards (Josh. xiii. 21) called "princes," (נְבָעָה), which may also be rendered "the leader or captain of a tribe, or even of a family of Gesh), and "dukes," (נְבָעָה, not the word rendered "dude in the enumeration of the "dukes of Edom," "one anointed, a prince consecrated by anointing" (i.e.) of a Sinon kind of the Amorites; apparently lieu tenants of the Amorite, or princes of his appointing.

[Hen; stanley reads here "wrapped in sleep." Though the Heb. will bear this interpretation, Genesis has "encamped."
expedient adopted by Gideon. The consequent panic of the great multitude in the valley, if it has no parallels in modern European history, is consistent with oriental character. Of all peoples, the nations of the East are most liable to sudden and violent emotions, and a panic in one of their heterogeneous, undisciplined, and excitable hosts has always proved disastrous. In the case of Gideon, however, the result of his attack was directed by God, the Divine hand being especially shown in the small number of Israel, 300 men, against 135,000 of the enemy. At the sight of the 900 torches, suddenly blazing round about the camp of Midian, the panic-stricken multitude knew not enemy from friend, for "the Lord set every man's sword against his fellow even throughout all the host" (22). The rout was complete, the first places made for being Beth-shittah ("the house of the accacia") in Zeredath, and the "border" (מְקוֹם) of Abel-meholah, "the meadow of the dance," both being probably down the Jordan Valley, unto Tabatham, shaping their flight to the ford of Beth-serah, where probably they had crossed the river as invaders. The flight of so great a host, encumbered with slow-moving camels, baggage, and cattle, was calamitous. All the flocks were scattered and driven away by Israel, over the banks of Jordan, and Mannasseh, joined in the pursuit; and Gideon roused the men of Mount Ephraim to "take before" the Midianites "the waters unto Beth-serah and Jordan" (23, 24). Thus cut off, two princes, Oreb and Zeeb (the "raven," or, more correctly "crow," and the "wolf"), fell into the hands of Ephraim, and Oreb they slew at the rock Oreb, and Zeeb they slew at the wine-press of Zeeb (vii. 25; comp. Is. x. 26, where the "slaughter of Midian at the rock Oreb" is referred to.) But though we have seen that many joined in a desultory pursuit of the rabble of the Midianites, only the 500 men who had blown the trumpets in the Valley of Jezreel crossed Jordan, with Gideon, "faint yet pursuing" (viii. 4). With this force it remained for the liberator to attack the enemy on his own ground, for Midian had dwelt on the other side Jordan since the days of Moses. Fifteen thousand men, under the "kings" (King James Version) of Midian, Zebah and Zalmunna, were at Karkor, the sole remains of 135,000, "for there fell an hundred and twenty thousand men that drew sword" (viii. 10). The assurance of God's help encouraged the weary three hundred, and they ascended from the plain (or ghor) to the higher country by a ravine or torrent-bed in the hills, "by the way of them that dwelt in tents [that is, the pastoral or wandering people as distinguished from towns people], on the east of Nohah and Jogbehah, and smote the host, for the host was "secure" (viii. 11) — secure in that wild country, on their own ground, and away from the frequent haunts of man. A sharp pursuit seems to have followed this fresh victory, ending in the capture of the kings and the final discomfiture of the Midianites. The overthrow of Midian in its entire campment, when it was "secure," by the exhausted companies of Gideon (they were "faint," and had been refused bread both at Succoth and at Penuel, viii. 5-9), sets the seal to God's manifest hand in the deliverance of his people from the oppression of Midian. Zebah and Zalmunna were slain, and with them the name itself of Midian almost disappears from sacred history. The Midianites never recovered against Israel, though they may have been allied with the nameless hordes who under the common designation of "the people of the East," Bene-Kedem, harassed the eastern border of Palestine.

Having traced the history of Midian, it remains to show what is known of their condition and customs, etc., besides what has already been incidentally mentioned. The whole account of their doings with Israel — and it is only thus that they find a place in the sacred writings, plainly marks them as characteristically Arab. We have already stated our opinion that they had intermarried with Ishmael's descendants, and become nationally one people, so that they are apparently called Ishmaelites; and especially, it is most probable their power and numbers, with such intermarriages, had caused the name of Midian to be applied to the northern Abrahamic Arabs generally. They are described as true Arabs — now Bedawees, or "people of the desert;" anon pastoral, or settled Arabs — the flock of Jethro; the cattle and flocks of Midian, in the later days of Moses; their camels without number, as the soul of the sea-side for multitude when they oppressed Israel in the days of the Judges — all agree with such a description. Like Arabs, who are predominantly a nomadic people, they seem to have partially settled in the land of Moab, under the rule of Sihon the Amorite, and to have adapted themselves readily to the "cities" (מִשְׁפַּת), and forts? (A. V. "goodly castles," מִשְׁפַּת), which they did not build, but occupied, retaining even then their flocks and herds (Num. xxxi. 9, 10), but not their camels, which are not common among settled Arabs, because they are not required, and are never, in that state, healthy. Israel seems to have devastated that settlement, and when next Midian appears in history it is as a desert-borde, pouring into Palestine with immumerable camels; and, when routed and broken by Gideon, fleeing by the way of them that dwelt in tents to the east of Jordan. The Chicklark of Midian we think is thus unmistakably marked. The only glimpse of their habits is found in the vigorous picture of the camp in the Valley of Jezreel when the men talked together in the camp, and one told how he had dreamt that "a cake of lekyth-bread tumbled into the host of Midian, and came into a tent, and smote it that it fell, and overturned it, that the tent by the side thereof." (Judg. xvii. 12.)

We can scarcely doubt, notwithstanding the dis-

\* It is added, in the same verse, that they pursued Midian, and brought the heads of the princes to Gideon "on the other side Jordan." This anticipates the account of his crossing Jordan (vii. 4), but such transpositions are frequent, and the Hebrew may be read "on this side Jordan."
MIDIAN

utes of antiquities, that the more ancient of the remarkable stone buildings in the Lajah, and stretching far away over the land of Meab, are at least as old as the days of Silmon; and reading Mr. Porter's descriptions of the wild old-world character of the scenery, the "cities," and the "goosey castles," one may almost fancy himself in presence of the hosts of Midian. (See Handbook, 301, 508, 523, 97, &c.)

The spoil taken in both the war of Moses and that of Gideon is remarkable. On the former occasion, the spoil of 575,000 sheep, 72,000 beves, and 61,000 asses, seems to confirm the other indications of the then pastoral character of the Midianites; the omission of any mention of canes has been already explained. But the gold, silver, brass, iron, tin, and lead (Num. xxxv. 22), the "jewels of gold, chains, and bracelets, rings, earrings, and tablets" (50)—the offering to the Lord being 16,750 shekels (52)—taken by Moses, is especially noteworthy; and it is confirmed by the booty taken by Gideon; for when he slew Zelah and Zahumma he took away the ornaments that were on their camels' necks (Judg. viii. 21) and (21-26) he asked of every man of the provinces of Midian, whether they had golden earrings, because they were Ishmaelites. "And the weight of the golden earrings that he requested was a thousand and seven hundred [shekels] of gold; besides ornaments and collars, and purple raiment that was on the kings of Midian, and beside the chains that were about their camels' necks." (The rendering of v. A. V. is sufficiently accurate for our purpose here, and any examination into the form or character of these ornaments, tempting though it is, belongs more properly to other authors.) We have here a wealthy Arab nation, living by plunder, delighting in finery (especially their women, for we may here read "nose-ring"); and, where forays were impossible, carrying on the traffic southwards into Arabia, the land of gold if not naturally, by trade—and across to Chaldea—or into the rich plains of Egypt.

Midian is named authentically only in the Bible. It has no history elsewhere. The names of places and tribes occasionally throw a feeble light on its past dwellings; but the stories of Arabian writers, borrowed, in the case of the northern Arabs, too frequently from late and untrustworthy Jewish writers, cannot be seriously treated. For reliable facts we must rest on the Biblical narrative. The city of "Medien [say the Arabs] is the city of the people of Shu'eyb, and is opposite Tabook, on the shore of Bahr el-Khulmal [the Red Sea]; between these is six days' journey. It [Medien] is larger than Tabook; and in it is the well from which Moses watered the flock of Shu'eyb." (Morison, s. v.). El-Makreezee (in his Kitabot) enters into considerable detail respecting this city and people. The substance of his account, which is full of in credible fables, is as follows: Medien are the people of Shu'eyb, and are the offspring of Medyan & [Midian], son of Abraham, and their mother was Kantorna, the daughter of Yuktan [Joktan] the Cumanite: she bore him eight children, from whom de-cended peoples. He here quotes the passage above cited from the Biblical almost verbatim, and adds, that the Arabs dispute whether the name be foreign or Arabic, and whether Medien spoke Arabic, so-called. Some say that they had a number of kings, who were respectively named Abjil, Hawwez, Huette, Kelemen, Sufacs, and Karasht. This absurd enumeration forms a sentence common in Arabic grammars, which gives the order of the Hebrew and ancient Arabic alphabets, and the numerical order of the letters. It is only curious as possibly containing some vague reference to the language of Midian, and it is therefore inserted here.

These kings are said to have ruled at Mekeb, Western Negei, the Yemen, Medyen, and Egypt, etc., contemporaneously. That Midian penetrated into the Yemen is, it must be observed, extremely improbable, as the writer of this article has remarked in Arabic, notwithstanding the hints of Arab authors to the contrary, Yokoot, in the Mekeb (cited in the Journal of the Devonshire Geographical Society), saying that a southern Arabian dialect is of Midian; and El-Mesoeode (op. Schultens, pp. 158, 159) inserting a Midianite king among the rulers of the Yemen: the latter being, however, more possible than the former, as an accidental and individual, not a national occurrence. The story of Shu'eyb is found in the Kur-an. He was sent as a prophet to warn the people of Midian, and being rejected by them, they were destroyed by a storm from heaven (Sale's Kur-an, vii. 2). He is generally supposed to be the same as Jethro, the father-in-law of Moses; but some, as Sale informs us, deny this; and one of these says that he was first called Buyocon, and afterwards Shu'eyb, that he was a comely person, but spare and lean, very thoughtful, and of few words." The whole Arab story of Medien and Shu'eyb, even if it contain any truth, is encumbered by a mass of late Rabbinical myths.

El-Makreezee tells us that in the land of Midian there were many cities, of which the people had disappeared, and the cities themselves fallen to ruin; that when he wrote (in the year 825 of the Flight) forty cities remained, the names of some being known, and of others lost. Of the former, he says, there were, between the Hijaz and Palestine and Egypt, sixteen cities; and ten of these in the direction of Palestine. They were El-Khalasah, El-Sunseelah, El-Merdeh, El-Miniche, El-Yawaj, El-Khuweyrak, El-Beereyn, El-Ma'eyn, El-Sheb, and El-Mu'alek. The most important of these cities

"A Midian traveler confirms this Biblical account of the fertility and wealth of Midian. "We succeeded," says Frisson, in reaching El-Tiquqeh just as the sun went down. We had magnificent views over the rest as far as Jebel Hauran. Great was our astonishment to find, as we turned our glasses on Beqrah, that all the vast blank space on the map which is between Gilead and Beqrah, instead of being a desert, was one boundless even cedag plain, covered with crops. It is, in fact, the granary of North Arabia. Here was the wealth of Roman Syria, and the source of its population; and here the swarming Midianites, like the Beni Waki'h of to-day, possessed their thousands of flocks. (Land of Ron, 231, p. 485.)"
were El-Khulassah a and El-Sametah; the stones of many of them had been removed to El-Ghazzah (Gaza) to build with them. This list, however, must be taken with caution.

In the A. V. of Apoc. and N. T. the name is given as MIHANIE. E. S. P.

* MIdianite. [Mihan.] *

MIDWIFE.6 Parturition in the East is usually easy.6 The office of a midwife is thus, in many eastern countries, in little use, but is performed, when necessary, by relatives (Charlin, Voy. vii. 23; Harmer, Obs. iv. 425). [CHILDREN.] It may be for this reason that the number of persons employed for this purpose among the Hebrews was so small, as the passage Ex. i. 19 seems to show; unless, as Knobel and others suggest, the two named were the principal persons of their clan.

In the description of the transaction mentioned in Ex. i, one expression, "upon the seventh day," receives remarkable illustration from modern usage. Gesenius doubts the existence of any custom such as the direct meaning of the passage implies, and suggests a wooden or stone trough for washing the new-born child. But the modern Egyptian practice, as described by Mr. Lane, exactly answers to that indicated in the book of Exodus. "Two or three days before the expected time of delivery, the Levite (midwife) conveys to the house the kurset el-tulidit, a chair of a peculiar form, upon which the patient is to be seated during the birth" (Lane, Mod. Egypt. iii. 142).

The moral question arising from the conduct of the midwives does not fall within the scope of the present paper, but refers to St. Augustine, Contr. mendaciam, ch. xx. 32, and Quest. in Hept. ii. 1; also Corn. a Lap. Conv. on Ex. i.

When it is said, "God dealt well with the midwives, and built them houses," we are probably to understand that their families were blessed either in point of numbers or of substance. Other explanations of inferior value have been offered by Kimchi, Calvin, and others (Calmet, Conv. on Ex. i.; Patrick; Corn. a Lap.: Knobel; Schleusner, Lex. V. T. oicis; Ges. p. 193; Crit. Sacr.).

It is worth while to notice only to refute on its own ground the Jewish tradition which identified Shiphrah and Puah with Jochebed and Miriam, and interpreted the "houses" built for them as the so-called royal and sacrificial families of Caleb and Moses (Joseph. Ant. iii. 2, § 4; Corn. a Lap. and

6 El-Khulassah sometimes written El-Khulasah, and El-Khalasah, or Dami-Khalasah, possessed an idol-temple, destroyed by order of Mohammed; the idol being named El-Khalasah, or the place, or "growing-place" of El-Khalassah. The place is said to be four days' journey from Mekkeh, in the 'Abhi, and called "the southern Kaabeh," El-Kahbah el-Yamaneyaeyeh (Marisiad, s. v., and El-Bekree, and the Kumam there cited). El-Mederreh seems also to be the same as Dami-Mederreh (Marisiad, s. v.), and therefore (or the same probably) of an idol temple also.

b ֶן-טָבָרָן part of P. of ֶניָתָב רַּגְלָה to bring forth: shade. obstetric. It must be remarked that ֶניָתָב J. V., Ex. i. 19, "lively," is also in Rabbinical Hebrew "midwives," an explanation which appears to have been had in view by the Vulg., which interprets slayeth by these obstetricianlly robust science.

It is also rendered "living creatures," implying that the Hebrew women were, like animals, quick in parturitation. Gesenius renders "vivile, robustum," p. 468.

6 In any case the general sense of the passage Ex. i. 19 is the same, namely, that the Hebrew women stood in little or no need of the midwives' assistance.

c See an illustration of Cant. viii. 5, suggested in Mischna, Psach. x. 3.

d ֶנָיָתָב rendered in the LXX. ἐναίτια and ֶנָיָתָב rendered in Vulg. quam partus tempus adversi. c May this not be the Magdolus named by Herodotus, ii. 153, as the site of Ptolemais Necho's victory over Josiah? (See Rawlinson's Hist. ii. 246, note.) But this was not the only Magdol along this coast. The Μάγδολος Μάγδολος, or "Theotókou's tower," must have been another, and a third possibly stood near Ashkelon. [MAGDO; MIGDAL-GAD.]
MIGDAL-GAD

The Migdal-Ezer, at which Jacob halted on his way from Bethel to Hebron, was a short distance south of the former. [Exod. towel of.] 4.

MIGDAL-GAD' (מִגְדָּל גָּד) [tower, of God]: [Ezra. מִגְדָּל גָּד; Vat. מִגְדָּל גָּד]. Alex. מִגְדָּל גָּד: Migdel-Gad, a city of Judah (Josh. xxix. 37); in the district of the N. Esdah, or part of a member of the second group of cities, which contained amongst others Lachish, Edon, and Maskim. By Eusebius and Jerome in the Onomasticon, it appears to be mentioned as "Migdala," but without any sign of its being actually known to them. A village called Melqeldel lies in the maritime plain, a couple of miles inland from Ascalon, 9 from Um Leckia, and 11 from Ashkelon. So far this is in support of Van de Velde's identification (Syrm. or Par. ii. 237, 238; Homer, p. 343: Geol. 1st ed. vol. iii. Appendix, p. 118 b) of the place with Migdal-gad, and it would be quite satisfactory if we were not uncertain whether the other two places are Lachish and Edon, Migdalah at any rate must have been much farther north. But to appreciate these conditions, we ought to know the principles on which the groups of towns in these catalogues are arranged, which as yet we do not. Migdal-gad was probably dedicated to or associated with the worship of the ancient deity Gad, another of whose sanctuaries lay at the opposite extremity of the country at Bakhur under Mount Hermon.

MIGDOL (מִגְדָּל) [tower, castle]: מִגְדָּל, or מִגְדָלָה: Migdala, proper name of one or two places on the eastern frontier of Egypt, cognate to המְדָל, which appears properly to signify a military watch-tower, as of a town (2 K. ix. 17), or isolated (xxii. 9), and the look-out of a vineyard (Is. v. 2: comp. Matt. xxii. 33, Mark xii. 1), or a shepherd's look-out, if we may judge from the proper name, מְדָל, "the tower of the flock," in which it is possible that the second word is a proper name (Gen. xxxv. 21; and comp. Mic. iv. 8, where the military signification seems to be implied, though perhaps etymologically only). This form occurs only in Egyptian geography, and it has therefore been supposed by Champollion to be substituted for the Egyptian name of similar sound, the toptic equivalent in the Bible, מְדָל. מְדָל (Sah.), being, according to him, of Egyptian origin (L. Girgis ebr. les Pharaonex, ii. 78, 80; comp. 49). A native etymology has been suggested, giving the signification "multiplicitas of hills." [Thom. etc. v.]. The ancient Egyptian form of Migdol having, however, been found, written in a manner rendering it not improbable that it was a foreign word, MAKHT or MAKHTE, as well as seen that it must be of similar meaning to the Hebrew המְדָל, and the toptic equivalent occurring in a form, מְדָל (Sah.), slightly differing from that of the geographical name, with the significations "a circuit, citadels, towers, bulwarks," a point hitherto strangely overlooked, the idea of the Egyptian origin and etymology of the latter must be given up.

Another name on the frontier, Heli-zephon, appears also to be Hebrew or Semitic, and to have a similar signification. [HAB-DEM.] The ancient Egyptian name occurs in a sculpture on the outer side of the north wall of the great hypostyle hall of the Temple of El-Karnak at Thebes, where a fort, or possibly fortified town, is represented, with the name PA-MAKHTER EN RA-MA-MEN, "the tower of Pharao, establishment of justice," the last four words being the prenomens of Settho I. (B. C. cir. 1322). The sculpture represents the king's triumphal return to Egypt from an eastern expedition, and the place is represented as if on a main road, to the east of Leontopolis.

1. A Migdol is mentioned in the account of the Exodus. Before the passage of the Red Sea the Egyptians were commanded "to turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Raal-zephon." (Ex. xiv. 2). In Numbers we read, "And they removed from Etham, "which is at the entrance of Heshbon, "which is before Raal-zephon." (Num. xxxiii. 7). The land of Egypt is said to be "in the wilderness of Raal-zephon." ( xxxvii. 5, 8). We suppose that the position of the encampment was before or at Pi-hahiroth, behind which was Migdol, and on the other hand Raal-zephon and the sea, these places being near together. The place of the encampment and of the passage of the sea we believe to have been not far from the Peraeopolitan monument, which is made in Linnat's map the site of the Serapeum.

EXODUS, THE.

2. A Migdol is spoken of by Jeremiah and Ezekiel. The latter prophet mentions it as a boundary-town, evidently on the eastern border, corresponding to Seneh, or Senec, on the southern. He prophesies the desolation of Egypt "from Migdol to Seneh even unto the border of Cushi." (Jer. xxvii. 8). MIGDOL (מִגְדָּל) (xxix. 19), and predicts slaughter "from Migdol to Seneh." (xxx. 6). That the eastern border is that on which Migdol was situated is shown not only by this being the border towards Palestine, and that which a conqueror from the east would pass, but also by the notices in the book of Jeremiah, where this town is spoken of with places in Lower Egypt. In the prophecy to the Jews in Egypt they are spoken of as dwelling at Migdol, Taiphanes, and Noph, and in the country of Pathros (Jer. xiv. 11), and in that fortelling, apparently, an invasion of Egypt by Nebuchadnezzar, Migdol, Noph, and Taiphanes are again mentioned (xxvii. 14). It seems plain, from its being spoken of with Memphis, and from its being a stage-town on the route of this Migdol was an important town, and not a mere fort, or even military

References against it. Forsler J. R.) gives it on what authority we know not: perhaps it is a misprint (Ezek. ad Michaelis, p. 29).

b Foreign words are usually written with all or most of the vowels in ancient Egyptian: native words rarely.
Schleiden, in. 1931.

69-71) Pharaoh military eitioii, in and accepting he Carian settlement rendering nius, of the place position in Itinertiyy »ny, the Hebrew which He, the Jews appears in Thea folly of the Ionian, important by Psammetichus of Migdol (Harenberg, Bibl. Bren. vi. 281, f.; Rosenmüller, Alterth. ii. 99); but the latter idea is unworthy of modern scholarship. R. S. P.

* Mons. Chabas finds traces of Migdol in the itinenary of an Egyptian grandee who visited Phenicia, Palestine, and Syria, in the 14th century n. c. In crossing the eastern frontier of Egypt the traveller came to the house of Osori erected by Rameses, to mark his victories. This Osori was, he says, the goddess of the North; answering to Beel-Tsephon, "the lord of the North." Rameses had probably appropriated by his own cartouche the fortress of Osori already erected by Sethe I. Of this mention is made in one of the pictorial representations of the wars of Sethe I. — a sort of chart, indicating the last stations of this Pharaoh on his return from Asia to Egypt. These are, (1.) The Osori of Sethe I. represented as a fortress near a reservoir of water; (2.) The Mikel of Sethe I., a fort with a well near by; (3.) The House of the Lion, a much larger fortress situated near a pond with trees upon either side: (4.) The fortress of Iyor, consisting of several large buildings, separated by a canal, which connects with a lake filled with crocodiles, and which Brugsch identifies as that of Thubasio.

From this sketch, the border of Egypt towards Palestine and Idumea appears to have been lined with forts, each of which, like the modern Suez, was furnished with a reservoir of sweet water (Chabas, Vagite d'Egyptien, etc. p. 257).

The specification of a fortress of Sethe I. favors the opinion of Ewald that Migdol was a common name of frontier towers. Brugsch makes the Mokir or Migdol of Sethe I. identical with the Migdol of the Itin. Anton., with the Migdol-Migdolon of Jeremiah and Ezekiel and the Migdol of the Books of Moses. (Geog. Inscrif. i. 261.) J. P. T.

MIGDOL (ΜΙΓΔΟΛ [preceptive, or (Fürst) landstiff]: [Rom. Μαγδόλου, Vat.: Μαγδων, in Ins. [Rom. Μαγδῶς, Sin. Μαγδοε, Sinu., Vat. Μαγδως, and Alex. Μαγδῶς; Μαγδων], a town, of the Nile called the Pelusiac."

a We have no account of Jews in the Egyptian military service as early as this time; but it is impossible that some of the fugitives who took Jeremiah with them may have become mercenaries in Pharaoh's service. The modern Hebraism is.

b Steph. Byz. s. v., comp. Fragmenta Historicae Graecarum, i. 29). If the latter part of the passage be from Hezekiaus, the town was important in his time.

Migdol, ἔποικς Αἰγυπτοῦ. "Εκάταινοι περιγράφον τὸ Λυκού Μαγδωκτής, σ. τ. Α. The route is as follows: "a Serapium Pelusiacum nam in Thaibasio vili Sile xviii Migdol xii Pelusio xii" (Ed. Parthey et Pinder, p. 76). These distances would place the Serapeum somewhat farther southward than the site assigned to it in Linant's map [see Ezechium, unless the route were very indirect, which in the heart might well be the case.

d Herodotus describes "the Camps" as two places, me on either side of the Nile, and puts them "near he sea," a little below the city Bubastis, on the mouth offers examples that render this by no means serious difficulty.

It has been conjectured that the Meγδολος men tioned by Herodotus, in his reference to an expedition of Necho's (i). 159), supposed to be that in which he slew Josiah, is the Migdol of the prophets (Mansueti, Africa, i. 483), and it has been proposed in the Heb. text Migdol for Miggedo (Harenberg, Bibl. Bren. vi. 281, f.; Rosenmüller, Alterth. ii. 99); but the latter idea is unworthy of modern scholarship. R. S. P.

جست.
A spot — for there is nothing to indicate which — in the neighborhood of Sam's city, Gibeah, on the very edge of the district belonging to it (1 Sam. xvi. 2), distinguished by a plane-nut tree, under which, on the eve of a memorable event, we discover Saul and Ahiah surrounded by the poor remnant of their force. Josephus (Ant. vi. 6, § 2) presents it as a high hill "Babai oisyl, from which there was a wide prospect over the district devastated by the Philistines. But this gives no clue, for Palestine is full of elevated spots commanding wide prospects.

Migron is presented to our view only once again, namely, in the invaluable list of the places disturbed by Sennacherib's approach to Jerusalem (Is. x. 28). But here its position seems a little further north than that indicated in the former passage. Supposing, that is, that Gileah was at Toph. (1 K. iv. 19), here occurs between Aith — that is Vi — and Michmash, in other words was on the north of the great ravine of the Wady-Sareaath, while Gileah was more than two miles to the south thereof. [Grelln, vol. ii. p. 596.]

In Hebrew, Migron may mean a "prescript," a frequent feature of the part of the country in question, and it is not impossible therefore that two places of the same name are intended — a common occurrence in primitive countries and tongues where each rock or ravine has its appellation, and where no reluctance or inconvenience is found in having place of the same name in close proximity. As easily two Migrons, as two Gibeaths, or two Shechets.

The LXX. seem to have had Μηναον in their intentions, but this is quite unsatisfactory. (See Josephus, Ant. vi. 6, § 2.)

MILJAMIM (ταυταμιν [on the right hand, or = Bar-jonnis]: Μαγνας: [Var. Bezaeus: Abb. Bezaeus] Alex. Μαγνας: Metzium). 1. The chief of the sixth of the 24 courses of priests established by David (1 Chr. xxiv. 9).

2. (Μαυαν: [Var. Alex. Μασαν: ΦΑ. Μασαν: Μισαν]: Misnion). A family of priests who signed the covenant with Nehemiah (Neh. x. 7); probably the descendants of the preceding, and the same as Μιναον 2 and Μιναον 2.

MILKOTH (Μηλκόθ [storns, Gies; burnabouts or sticks, Firsts: in 1 Chr. xviii. Vat. Alex. Μαξαθα: in 1 Chr. ix. ix., Alex. Μαξαθα: [Var. Sin. Μαξαθα: Morcbehi]. 1. One of the sons of Jehiel, the father or prince of Gibeon, by his wife Maacah (1 Chr. xiiii. iv. 37, 38). His son is variously called Shimih or Shimaiam.

2. (Μαξαθα: [Var. omits.]). The leader (Μηλκόθ, worthy of the second division of David's army (1 Chr. xxvii. 5), of which Doshi the Ahitrite was captain (Μηλκόθ, son). The noble, in a military sense, appears to have been an officer superior in rank to the captains of thousands and the captains of hundreds (1 Chr. xiiii. 1).)

MIRNEITAI (3 xvi.) [Μηρνειτας [possession of Jelad-ath]: Μαραλα: [Var. Μασαλα, Alex. Μασαλα: Ι. Χ. xvi. 18; Μανανα, Alex. Μανανα: 1 Chr. xxii. 15]). One of the Levites of the second rank, gatekeepers of the ark, appointed by David to play in the temple band "with harp upon Sheminith."

MILALAI (3 xvi.) [Μηλαιας [bracket]: in LXX.: Melalai). Probably a Goshonite Le- vite of the sons of Asaph, who, with Ezra at their head, placed in the musical instruments of David, the name of God's "in the solemn procession round the walls of Jerusalem which accompanied their dedication (Neh. xii. 36). [Mattaniah 2.]

MILCAH (Μηλκα: [counsel]: Μαλκαι: Mel- chior). 1. Daughter of Harun and wife of his uncle Nahor. Abraham's brother, to whom she bare eight children: the youngest, Bethuel, was the father of Rebekah (Gen. xi. 20, xxii. 25, 31, xix. 24, 47). She was the sister of Lot, and her son Bethuel is distinguished as "Nahor's son, whom Milcah bare unto him," apparently to indicate that he was of the pure blood of Abraham's ancestry, being descended both from Haran and Nahor.

2. The fourth daughter of Zedekiahed (Num. xxxiii. 23, xxvii. 11, xxxvi. 12; Josh. xii. 33).

MILCOM (Μηλκομ [their king]: & Μαλκομ [their shepherd]: [Comp. Μαλκαι, Melch, 1 K. v. 33; Μαλκαι, [Var. Abd. Μαλκαι] Alex. Μαλκαιος, Melchom, 2 K. xxiii. 13].) The "abolition of" the children of Ammon, elsewhere called Melchon (1 K. vii. 7, 8, xxvi. 1, 3) and Melchom (Zeph. 5. 3, marg. "their king"), of the latter of which it is probably a dialectical variation. Movers (Philizicer, 1536) calls it an Arabic pronunciation.

MILE (Μηλη): The Greek form of the Latin melius, a Roman measure of length equal to 1418 English yards. It is only once noticed in the Bible (Matt. v. 41), the usual method of reckoning both in it and in Josephus being by the stadium. The Roman system of measurement was fully introduced into Palestine, though probably at a later date; the Talmudists admitted the term "mile" (Μηλη) into their vocabulary: both Jerome (in his Deomastireon) and the Itineraries compare the distances in Palestine by miles; and to this day the old milestones may be seen, here and there, in that country (Robinson's Bib. Ed. ii. 161 note, iii. 306).

The mile of the Jews is said to have been of two kinds, a "long mile," the solemn pace on the length of the pace, which varied in different parts, the long pace being double the length of the short one (Carpzov's Apportion, p. 679). [Day's Journey, Amer. ed.]

MILETUM. 2 Tim. iv. 20, for Mileitus. The A. V. follows here the older versions, except Wycliffe, who writes "Milet." The early Eng- "lish often inflicted such names after the analogy of the Greek and Latin, though on this principle it would have been strictly Miletus in the above passage.

See French, Authorised Version, p. 79 (ed. 1859).

MILETUS (Μηλης): Milekis, Acts xx. 15, 17, less correctly called Miletus in 2 Tim. iv. 20. The first of these passages brings us before the scene of the most pathetic occasion of St. Paul's life; the second is interesting and important in reference to the question of the Apostle's second imprisonment.

St. Paul, on the return voyages from his third missionary journey, having left Philippi after the passage (Acts xx. 5), and desiring, if possible, to
MILETUS

As to the history of Miletus itself, it was far more famous five hundred years before St. Paul's day, than it ever became afterwards. In early times it was the most flourishing city of the Ionian Greeks. The ships which sailed from it were celebrated for their distant voyages. Miletus suffered in the progress of the Lydian kingdom and became tributary to Croesus. In the natural order of events, it was absorbed in the Persian empire; and, revolving, it was stormed and sacked. After a brief period of spirited independence, it received a blow from which it never recovered, in the siege conducted by Alexander when on his Eastern campaign. But still it held, even through the Roman period, the rank of a second-rate trading town, and Strabo mentions its four harbors. At this time it was politically in the province of Asia, though CARIA was the old ethnological name of the district in which it was situated. Its preeminence on this coast had now long been yielded up to Ephesus. These changes can be vividly traced by comparing the whole series of coins of the two places. In the case of Miletus, those of the autonomous period are numerous and beautiful, those of the imperial period very scanty. Still Miletus was for some time an episcopal city of Western Asia. Its final decay was doubtless promoted by that sitting up of the Meander, to which we have alluded. No remains worth describing are now found in the swamps which conceal the site of the city of Thales and Hecataeus.

J. S. H.

MILK. As an article of diet, milk holds a more important position in Eastern countries than with us. It is not a mere adjunct in cookery, or

TEMPLE OF APOLLO AT MILETUS.

This point is noticed by Prof. Hackett in his, Comm., on the Acts (2d ed. p. 344); compare Acts xxi. 5. In each case we have a low flat shore, as a marked and definite feature of the scene.

The passage in the second Epistle to Timothy, where Miletus is mentioned, presents a very serious difficulty to the theory that there was only one Roman imprisonment. When St. Paul visited the place on the occasion just described, Trophimus was indeed with him (Acts xx. 4); but he certainly did not "leave him sick at Miletus," for at the conclusion of the voyage we find him with the Apostle at Jerusalem (Acts xxi. 29). Nor is it possible that he could have been so left on the voyage from Caesarea to Rome: for in the first place there is no reason to believe that Trophimus was with the Apostle then at all; and in the second place the ship was never to the north of Cilicia (Acts xxvii. 7). But, on the hypothesis that St. Paul was liberated from Rome and revisited the neighborhood of Ephesus, all becomes easy, and consistent with the other notices of his movements in the Pastoral Epistles. Various combinations are possible. See Life and Epistles of St. Paul, ch. xxvii. and Birks, Life Apostolic.
MILL

restricted to the use of the young, although it is naturally the characteristic food of childhood, both from its simple and nutritive qualities (1 Pet. ii. 2), and particularly as contrasted with meat (1 Cor. iii. 2; Heb. v. 12); but beyond this it is regarded as substantial food adapted alike to all ages and classes. Hence it is enumerated among "the principal things for the whole use of a man's life" (Ezech. xxvii. 20), and it appears as the very emblem of abundance and wealth, either in con
junction with honey (1 Ex. iii. 8; Deut. vi. 3, xi. 9) or wine (Is. lv. 1), or even by itself (Job xxii. 24); hence also to "suck the milk" of an enemy's land was an expression betokening its complete subjection (Is. lx. 16; Ez. xxv. 4). Not only the milk of cows, but of sheep (Deut. xxxii. 14), of camels (Gen. xxxii. 15), and of goats (Prov. xxvii. 27) was used; the latter appears to have been most highly prized. The use of camel's milk still prevails among the Arabs (Burchardt's Notes, i. 44).

Milk was used sometimes in its natural state, and sometimes in a sour, congealed state: the former was named klhâh, and the latter khamadh. In the A. V. the latter is rendered "butter," but there can be no question that in every case (except perhaps Prov. xxx. 34) the term refers to a preparation of milk well known in Eastern countries under the name of leban. (Bittel, Amer. ed.) The method now pursued in its preparation is to boil the milk over a slow fire, adding to it a small piece of old leban or some other acid, in order to make it coagulate (Rusell, Aleppo, i. 118, 370; Burchart, Arabos, i. 60). Therefreshing draught which Jael offered "in a lordly dish" to Sisera (Judg. v. 25) was leban, as Josephus particularly notes (γάλα διαφθορίαι γάλα, Ant. v. 5, § 4): it was produced from one of the goat-skin bottles which are still used for the purpose by the Bedouins (Judg. iv. 19; comp. Burchardt's Notes, i. 45). As it would keep for a considerable time, it was particularly adapted to the use of travellers (2 Sam. vii. 21). The amount of milk required for its production was of course considerable; and hence in Is. vii. 22 the use of leban is predicted as a consequence of the depopulation of the land, when all agriculture had ceased, and the fields were covered with grass. In Job xx. 17, xxix. 6, the term is used as an emblem of abundance in the same sense as milk. Leban is still extensively used in the East; at certain seasons of the year the poor almost live upon it, while the upper classes eat it with salat or meat (Rusell, i. 185). It is still offered in hospitality to the passing stranger, exactly as of old in Abraham's tent (Gen. xvi. 8; comp. Robinson, Bibl. Res. i. 571, ii. 70, 211), so freely indeed that in some parts of Arabia it would be regarded a scandal if money were received in return (Burchardt's Arabos, i. 120, ii. 196). Whether milk was used instead of water for the purpose of boiling meat, as is at present not unusual among the Bedouins, is uncertain. (Vincent.) The prohibition against setting a kid in its mother's milk (occurring as it does amid the regulations of the harvest festival, Ex. xxviii. 19, xxxiv. 26; Deut. xiv. 21) was probably directed against some heathen usage practiced at the time of harvest.

W. L. B.

MILL. The mills (דָּבָקָן, reckonim) of the ancient Hebrews probably differed but little from those at present in use in the East. These consist of two circular stones, about 18 in. or two feet in diameter, the lower of which (Lat. metas) is fixed, and has its upper surface slightly convex, fitting into a corresponding concavity in the upper stone (Lat. culitula). The latter, called by the Hebrews re'coh (דָּבָקָן), "chariot," and by the Arabs rekhab, "rider," has a hole in it through which the grain passes, immediately above a pivot or shaft which rises from the centre of the lower stone, and about which the upper stone is turned by means of an upright handle held near the edge. It is worked by women, sometimes singly and sometimes two together, who are usually seated on the bare ground (Is. lvii. 1, 2) faecing each other; both have hold of the handle by which the upper is turned round on the 'nether' millstone. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. It is not correct to say that one pushes it half round, and then the other seizes the handle. This would be slow work, and would give a spasmodic motion to the stone. Both retain their hold, and pull to, or push from, as men do with the whip or cross-cut saw. The proverb of our Saviour (Matt. xxiv. 41) is true to life, for women only grind. I cannot recall an instance in which men were at the mill" (Thomson, Land and Book, ch. 54). The labor is very hard, and the task of grinding in consequence performed only by the lowest servants (Ex. xvi. 5; comp. Pauth. Merc. ii. 3), and does not occur elsewhere, and hence its meaning is doubtful. Perhaps its true sense is "farm-yard" or "field."

Women grinding corn with the hand-mill of modern Syria.

round on the 'nether' millstone. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. It is not correct to say that one pushes it half round, and then the other seizes the handle. This would be slow work, and would give a spasmodic motion to the stone. Both retain their hold, and pull to, or push from, as men do with the whip or cross-cut saw. The proverb of our Saviour (Matt. xxiv. 41) is true to life, for women only grind. I cannot recall an instance in which men were at the mill." (Thomson, Land and Book, ch. 54). The labor is very hard, and the task of grinding in consequence performed only by the lowest servants (Ex. xvi. 5; comp. Pauth. Merc. ii. 3), and does not occur elsewhere, and hence its meaning is doubtful. Perhaps its true sense is "farm-yard" or "field."

Women grinding corn with the hand-mill of modern Syria.

a This is expressed in the Hebrew term for milk, melah, the etymological force of which is "fatness." We may compare with the Scriptural expression, "a and flowing with milk and honey," the following passages from the classical writers:—

Flavianum jam horti, jam flamma nectaris latisat.

Flarqave de vendi salubrum zive milem. Ox. Mt. i. 111.

b In this passage the marginal reading, "milk pulse," is preferable to the text, "breast." The Hebrew word

Women grinding corn with the hand-mill of modern Syria.
millstones (Judg. xvi. 21; Job xxxi. 10; Is. xlvii. 1, 2; Lam. v. 13; comp. Hom. Od. vii. 103; Suet. Tib. c. 51).a So essential were mill-stones for daily domestic use, that they were forbidden to be taken in pledge (Deut. xxi. 6; Jos. Ant. iv. 8, § 26), in order that a man's family might not be deprived of the means of preparing their food. Among the Fellahs of the Hauran one of the chief articles of furniture described by Burckhardt (Syria, p. 292) is the "mill-stone which is used in summer when there is no water in the wadies to drive the mills." The sound of the mill is the indication of peaceful household life, and the absence of it is a sign of desolation and abandonment. 

The sound of the mill is low" (Ecccl. xii. 4). More no more affecting picture of utter destruction could be imagined than that conveyed in the threat denounced against Judah by the mouth of the prophet Jeremiah (xxv. 10), "I will take from them the voice of mirth, and the voice of gladness, the voice of the bridegroom and the voice of the bride, the sound of the mill-stones, and the light of the candle" (comp. Rev. xvii. 6). The sound of the mill-stone is supposed by some to be alluded to in Eccl. xi. 4, and it was evidently so understood by the LXX. b But Dr. Robinson says (i. 455), "we heard no song as an accompaniment to the work," and Dr. Hackett (Bibl. Inst. p. 49, Amer. ed.) describes it rather as shrieking than singing. It is alluded to in Homer (Od. xl. 165-119); and Athenaeus (xiv. p. 310 ν) refers to a peculiar chant which was sung by women whinowing corn and mentioned by Aristophanes in the Thesmophoriazousae.

The hand-mills of the ancient Egyptians appear to have been of the same character as those of their descendants, and like them were worked by women (Wilkinson, Anc. Eg. ii. p. 118, &c.). They had also a large mill on a very similar principle, but the stones were of far greater power and dimensions; and this could only have been turned by cattle or asses, like those of the ancient Romans, and of the modern Cairenes. It was the mill-stone of a mill of this kind, driven by an ass, c which is alluded to in Matt. xviii. 6 (λαβε ὄμολος, to distinguish it, says Lightfoot (Hor. Hebr, in loc.), from those small mills which were used to grind spices for the wound of circumcision, or for the delights of the Sabbath, and to which both Kimchi and Jarchi find a reference in Jer. xxv. 10. Of a married man with slender means it is said in the Talmud (Kiddushin, p. 29 b), "with a mill-stone on his neck he studies the law," and the expression is still proverbial (Tendleu, Sprichbewerter, p. 181).

It was the movable upper millstone of the hand-mill with which the woman of Thebez broke Abimelech's skull (Judg. ix. 53). It is now generally vade, according to Dr. Thomson, of a porous ava brought from the Hauran, both stones being of the same material, but, says the same traveller, "I have seen the nether made of a compact sand-stone, and quite thick, while the upper was of this lava, probably because from its lightness it is the more easily driven round with the hand." (Lamp and Book, ch. 34). The porous lava to which he refers is probably the same as the black tufa mentioned by Burckhardt (Syria, p. 57), the blocks of which are brought from the Lejah, and are fashioned into millstones by the inhabitants of Ezra, a village near the Hauran. It seems it is worth paying according to their size, from 15 to 60 ptastrés, and are preferred to all others on account of the hardness of the stone.

The Israelites, in their passage through the desert, and with them hand-mills, as well as mortars (Moatrrx), in which they ground the manna (Num. xi. 8). One passage (Lam. v. 13) is deserving of notice, which Ho Nebel (Pilis Moralist. V., in Ugolin, vol. xxxi) explains in a manner which gives it a point which is lost in our A. V. It may be rendered, "the choice (men) bore the mill (ποίνας, tekhôn), d and the youths stumbled beneath the wood;" the wood being the woodwork or shaft of the mill, which the captives were compelled to carry. There are, besides, allusions to other apparatus connected with the operation of grinding, the sieve, or bolter (πάγκη, πάγκικ, Is. xxx. 25) or ἐφίδρων, Am. ix. 9), and the hopper, though the latter is only found in the Mishna (Zoahin, iv. 3), and was a late invention. We also find in the Mishna (Demai, iii. 4) that mention is made of a miller (יוֹלָֽם, tekhôn), indicating that grinding corn was recognized as a distinct occupation. Wind-mills and water-mills are of more recent date.

W. A. W.

a Some other allusions to the mill and its uses deserve explanation. The common millstone rarely exceeds two feet in diameter, and hence its size fitted it to be used as an instrument of punishment. It was sometimes fastened to the necks of criminals who were to be drowned. The Saviour refers to this practice in Mark ix. 42, where he says: Sooner than "offend one of these little ones, it was better for a man that a mill-stone were hanged about his neck, and he were cast into the sea." See also Matt. xviii. 6; and Luke xvii. 2. It is stated that this mode of execution was not unknown in the East at the present day. As those who grained, in whatever order they may sit, have the mill before them, it becomes natural, in describing their position with reference to the mill, to speak of their being behind it. Hence it is said in Ex. xi. 5 that the pestilence which was to be sent on the Egyptians should "destroy from the first-born of Pharaoh that sitteth upon his throne, even unto the first-born of the maid-servant that is behind the mill.

b Grinding is reckoned in the Mishna (Shabath, vii. 2) among the chief household duties, to be performed by the wife unless she brought with her one u (Nethaneh, v. 9); in which case she was required from grinding, baking, and washing, but was still obliged to suckle her child, make her husband's bed, and work in wool.

c By ἑαυτῆς ὑποδάτῳ τῆς ἄλλους ἄλλους, reading ἀλλήλους, a mill.

d Compare the Arabic طلح، taboon, a mill.
MILLET

"the eyes of Samson, and made him grind in the prison-house;" that is, he was confined in prison, and required to grind there, by turning a handmill, such as has been described above. It was the great humiliation of his captivity. He who had been the hero of Israel, who had possessed the strength of a giant, was compelled to sit on the ground and work at the mill, like a woman or a slave. The blinding was sometimes inflicted to prevent the giddiness liable to arise from the circular motion (Herod. iv. 2). At the same time it was a frequent barbarity of ancient warfare (I. ii. 11).

Possibly the woman of Thibeze who threw the upper stone of the mill, the "rider" or "runner," on the head of Abimelech (see above) was occupied in grinding at the moment. She had only to lift the upper stone from its pedestal, and would then have at once an effectual weapon for her purpose. The A. V. erroneously suggests that it was "a piece" or fragment of the stone which she hurled at Abimelech. See the allusion to this incident in 1 Sam. xii. 21. The permanent or lower stone was called βαράννα, Job xi. 16. Some of the larger mills in Syria at the present day are turned by mules and asses, as in ancient times (Matt. xviii. 6). The time of grinding would be regulated by the wants of the family, but from the nature of the case it would be one of the daily occupations. At Jerusalem one may see at nightfall the open ground on Bezetha alive with women performing this labor. The water-mills at present at Nablus (Shechem) are somewhat noted.

MILLET (Mic. 1:7). "Dochan: κηρύγμα: milium). In all probability the grains of Panicum miliaceum and milium, and of the Holcus sordidus, Linna. (the Sorghum vulgare of modern writers), may all be comprehended by the Hebrew word. Mention of millet occurs only in Ez. iv. 9, where it is enumerated together with wheat, barley, beans, lentils, and fitches, which the prophet was ordered to make into bread. Gelsem (Hierob. i. 544) has given the names of numerous old writers who are in favor of the interpretation adopted by the LXX. and Vulg.; the Chaldee, Syriac, and Arabic versions have a word identical with the Hebrew. That "millet" is the correct rendering of the original word there can be no doubt; the only question that remains for consideration is, what is the particular species of millet intended: is it the Panicum miliaceum, or the Sorghum vulgare, or may both kinds be denoted? The Arabs to this day apply the term dokham to the Panicum miliaceum, but Forskal (Deser. Plant. p. 174) uses the name of the Holcus docham, a plant," says Dr. Royle (Kitto's Cyc. art. "Docham"), "as yet unknown to botanists." The Holcus docham of Forskal, which he says the Arabs call tritam, and which he distinguishes from the H. dokham, appears to be identical with the docheria, Sorghum vulgare, of modern botanists.

It is impossible, in the case of these and many other cereal grains, to say to what countries they are indigenous. Sir G. Wilkinson enumerates wheat, beans, lentils, and docheria, as being preserved by seeds, or by representation on the ancient tombs of Egypt, and has no doubt that the Holcus sordidus was known to the ancient inhabitants of that country. Dr. Royle maintains that the true docheria of Arab authors is the Panicum miliaceum, a grass cultivated in Europe as an article of diet. There is, however, some difficulty
in identifying the precise plants spoken of by the Greeks and Romans under the names of σετυρός, θαυμα, πιπακία, malva, etc.

The Panicae millaeceum is cultivated in Europe and in tropical countries, and, like the dourbour, is often used as an ingredient in making bread; in India it is cultivated in the cold weather with wheat and barley. Tournefort (Voyage, ii. 95) says that the poor people of Simos make bread by mixing half wheat and half barley and white millet. The seeds of millet in this country are, as is well known, extensively used as food for birds. It is probable that both the Sorgyra vulgar and the Panicae millaeceum were used by the ancient Hebrews to obtain grain. The baggage wagons may denote either of these plants. Two cultivated species of Panicae are named as occurring in Palæstine, namely, P. millaeceum and P. italicum (Strand's Flor, Palæst. Nos. 35, 37). The genera Sorgyra and Panicae belong to the order Gramineae, perhaps the most important order in the vegetable kingdom. W. H.

MILLO (Μίλλον): always with the definite article [see below] ἴδιον αὐξον, once ἴδιον Μίλλον: Alex. in 1 K. ix. [24] only, ἴδιον: Millo, a place in ancient Jerusalem. Both name and thing seem to have been already in existence when the city was named from the inhabitants. His first occupation after getting possession was to build "round about, from the Millo and to the house." (A. V. inward: "2 Sam. v. 2") as the parallel passage has it, "he built the city round about, and from the Millo round about." (1 Chr. xi. 8). Its repair or restoration was one of the great works for which Solomon raised his "levy." (1 K. ix. 15, 24, xi. 27); and it formed a prominent part of the fortifications which Hazaeliah prepared for the approach of the Assyrians (2 Chr. xxxii. 5). The last passage seems to show that "the Millo" was part of the "city of David," that is of Zion, a conclusion which is certainly supported by the singular passage, 2 K. xii. 20, where, whichever view we take of Silla, the "house of Millo" must be in the neighborhood of the Tyropean valley which lay at the foot of Zion. More than this it seems impossible to gather from the notices quoted above—all the passages in which the name is found in the O. T.

If "Millo" be taken as a Hebrew word, it would be derived from a root which has the force of "filling" (see Gesenius, Thes. pp. 737, 789). This notion has been applied by the interpreters after their custom in the most various and opposite ways: a rumput (tupper); a mound; an open space used for assemblies, and therefore often filled with people; a ditch or valley; even a trench filled with water. It has led the writers of the Targums to render Millo by מִלְּלָה, i.e. Millitha, the term by which in other passages they express the Hebrew, מַלְלָה, מָלַלָה, the mound which in ancient warfare was used to besiege a town. But unfortunately none of these guesses enable us to ascertain what Millo really was, and it would probably be nearer the truth—it is certainly safer—to look on the name as an ancient or archaic term, debute, or possibly even still older, adopted by the Israelites when they took the town, and incorporated into their own nomenclature.* That it was an anti-hebraic term is supported by its occurrence in connection with the fortress of Mount Zion, which was occupied throughout the struggle by the adherents of Antiochus, and was at last razed and the very hill leveled by Simon. [JERUS. vol. ii. pp. 1293 f. 1295, &c.] It is therefore perhaps not too much to assume that the word millo was employed in the Hebrew original of 1 Maccebees. The point is exceedingly obscure, and the above is at the best but a mere conjecture, though it agrees so far with the slight indications of 2 Chr. xxxii. 5, as noticed already.

G.

MILLO, THE HOUSE OF. 1. (Μίλλος Σέλλας): οἶκος Βηθσιλαείας [Vat. - αλως and αλως]; Alex. οἶκος Μαλαλώς: ὁπιτάτον Μίλλον; oppidum Mello. Apparently a family or clan, mentioned in Judg. ix. 6, 29 only, in connection with the men or lords of Shechem, and concerned with them in the affair of Abimelech. No clue is given by the original or any of the versions as to the meaning of the name.

2. (Μίλλας Σέλλας): οἶκος Μαλαλως: [Vat. Alex. Μαλαλώς]: domus Melloe. The "house of Millo that goeth down to Silla" was the spot at which king Joash was murdered by his slaves (2 K. xii. 20). There is nothing to lead us to suppose that the murder was not committed in Jerusalem, and in that case the spot must be connected with the ancient Millo (see preceding article). Two explanations have been suggested of the name Silla. These will be discussed more fully under that head, but whichever is adopted would equally place Beth Millo in or near the Tyropean, taking that to be where it is shown in the plan of Jerusalem, at vol. ii. p. 1312. More than this can hardly be said on the subject in the present state of our knowledge.

G.

MINES, MINING. "Surely there is a source for the silver, and a place for the gold which they refine. Iron is taken out of the soil, and stone molten (for) copper. He hath put an end to darkness, and to all perfection (i.e., most thoroughly) he searcheth the stones of this darkness and of the shadow of death. He hath sunk a shaft far from the wanderer; they that are forgotten of the foot are suspended, away from man they waver to and fro. (As for) the earth, from her cometh forth bread, yet her nethermost parts are upturned as (by) fire. The place of sapphire (are) her stones, and dust of gold is his. A track which the bird of prey hath not known, nor the

* The name Mount Zion was never applied to the above eminence by any ancient writer, and when that hill had been "levelled," the simile of the Psalmist was still fresh and forcible: "as Mount Zion, which cannot be removed, but abideth forever." [JERUS. vol. ii. 1290 a, 1295 b.]

122
eye of the falcon shone upon; which the sons of pride (c. wild beasts) have not trodden, nor the raven's beak besmeared; in the flint mines through his hand, he hath tripped up many mines from the root; in the rocks he hath cloven channels, and every rare thing hath his eye seen: the streams hath he found that they weep not, and that which is hid he bringeth forth to light" (Job xxvii. 1-11).

Such is the highly poetical description given by the author of the book of Job of the operations of mining as known in his day, the only record of the kind which we inherit from the ancient Hebrews. The question of the date of the book cannot be much influenced by it; for indications of a very advanced state of metallurgical knowledge are found in the monuments of the Egyptians at a period at least as early as any which would be claimed for the author. Leaving this point to be settled independently, therefore, it remains to be seen what is implied in the words of the psalm.

It may be fairly inferred from the description that a distinction is made between gold obtained in the manner indicated, and that which is found in the natural state in the alluvial soil, among the debris washed down by the torrents. This appears to be implied in the expression "the gold they refine," which presupposes a process by which the precious metals are separated from the silver or copper with which it may have been mixed. What is said of gold may be equally applied to silver, for in almost every allusion to the process of refining the two metals are associated.

In the passage of Job which has been quoted, so far as can be made out from the obscurities with which it is beset, the natural order of mining operations is observed in the description. The whole point is obviously contained in the contrast, "Surely there is a source for the silver, and a place for the gold which men refine,—but where shall wisdom be found, and where is the place of understanding?" No labor is too great for extracting from the earth its treasures. The shaft is sunk, and the adventurous miner, far from the haunts of men, hangs in mid-air (c. 4): the beams of the earth—which in the course of nature grow but corn—are overthrown as though wasted by fire. The path which the miner pursues in his underground course is unseen by the keen eye of the falcon, nor have the boldest beasts of prey traversed it, but man wins his way through every obstacle, hews out tunnels in the rock, stops the water from flooding his mine, and brings to light the precious metals as the reward of his adventure. No description could be more complete. The poet might have had before him the copper mines of the Sinai peninsula. In the Wady Maghara, "the valley of the Cave," are still traced of the Egyptian colony of miners who settled there for the purpose of extracting copper from the freestone rocks, and left their hieroglyphic inscriptions upon the face of the cliff. That these inscriptions are of great antiquity there can be little doubt, though Lepsius may not be justified in placing them at a date a. c. 4000. "Alwadiy, under the fourth dynasty of Manetho," he says, "the same which erected the great pyramids of Gizeh, 4000 a. c., copper mines had been discovered in this desert, which were worked by a colony. The peninsula was then inhabited by Asiatics, probably Semitic races, therefore do we often see in those rock sculptures the triumphs of Pharaoh over the empires of Egypt. Almost all the inscriptions belong to the Old Empire, only one was found of the co-regency of Tuthmosis III. and his sister" (Letters From Egypt, p. 346, Eng. tr.).

In the Maghara tablets Mr. Drew (Scripture Lands, p. 50, note) saw the cartouche of Sphiis, the builder of the Great Pyramid, and on the stones at Surabut el Khalidum, he says, "there are those of kings of the eighteenth and nineteenth dynasties." But the most interesting description of this mining colony is to be found in a letter to the Athenaeum (June 4, 1859, No. 1619, p. 747), signed M. A., and dated from "Surabut el Khalidum, in the Desert of Sinai, May, 1859." The writer discovered on the mountain exactly opposite the caves of Maghara, traces of an ancient fortress intended, as he conjectures, for the protection of the miners. The hill on which it stands is about 1800 feet high, nearly insulated, and formed of a series of precipices terraces, one above the other, like the steps of the pyramids. The uppermost of these was entirely surrounded by a strong wall within which were found remains of 140 houses, each about ten feet square. There were, besides, the remains of ancient hamlets of green poplars, and an amphitheater, where a boy wasexecuted when one was full the surplus ran into the other, and so in succession, so that they must have had water enough to last for years." The ancient furnaces are still to be seen, and on the coast of the Red Sea are found the piers and wharves whence the minerals shipped their metal in the harbor of Abu Zelineh. Five miles from Surabut el Khalidum the same traveller found the ruins of a much greater number of houses, indicating the existence of a large mining population, and, besides, five immense reservoirs formed by damming up various wadis. Other mines appear to have been discovered by Dr. Wilson in the granite mountains east of the Wady Mokattab. In the Wady Nasb the German traveler Kippell, who was commissioned by Mohammed Ali, the Viceroy of Egypt, to examine the state of the mines there, met with remnants of several large smelting furnaces, surrounded by heaps of slag. The ancient inhabited had sunk slates in several directions, leaving here and there columns to prevent the whole from falling in. In one of the mines he saw huge masses of stone rich in copper (Kletter, Kirch. xiii. 780). The copper mines of Flurus in Edom, mentioned by Jerome, were between Zeaz and Petra in the persecution of Diocletian the Christians were condemned to work them.

The gold mines of Egypt in the Bihaiare desert, the principal station of which was Edshuram, about three days' journey beyond Wady Allaga, have been discovered within the last few years by M. Lamard and Mr. Bonnet, the latter of whom supplied Sir G. Wilkinson with a description of them, which he quotes (Aeg. IV. iii. 224, 230). Remains of the miners' huts still remain as at Surabul el Khalidum. 'In these nearest the mines lived the workmen who were employed to break the quartz into small fragments, the size of a bean, from whose hands the pounding stone passed to the persons who ground it in hand mills, similar to those been a technical form among the Egyptian miners of the Sinai peninsula.

MINES, MINING

low used for corn in the valley of the Nile made of granite stone: one of which is to be found in almost every house at these mines, either entire or broken. The quartz thus reduced to powder was washed on inclined tables, furnished with two cisterns, all built of fragments of stone collected there; and near these inclined planes are generally found little white mounds, the residue of the operation. According to the account given by Diodorus Siculus (iii. 12-14), the mines were worked by gangs of convicts and captive slaves, who were kept day and night to their task by the soldiers set to guard them. The work was superintended by an engineer, who selected the stone and pointed it out to the miners. The harder rock was split by the application of fire, but the softer was broken up with picks and chisels. The miners were quite naked, their bodies being painted according to the color of the rock they were working, and in order to see in the dark passages of the mine they carried lamps upon their heads. The stone as it fell was carried off by boys, it was then pounded in stone mortars with iron pestles by those who were over 30 years of age till it was reduced to the size of a lentil. The women and old men afterwards ground it in mills to a fine powder. The final process of separating the gold from the pounded stone was entrusted to the engineers who superintended the work. They spread this powder upon a broad slightly inclined table, and rubbed it gently with the hand, pouring water upon it from time to time so as to carry away all the earthy matter, leaving the heavier particles upon the board. This was repeated several times; at first with the hand and afterwards with fine sponges gently pressed upon the earthy substance, till nothing but the gold was left. It was then collected by other workmen, and placed in earthen crucibles with a mixture of lead and salt in certain proportions, together with a little tin and some barley bran. The crucibles were covered and carefully closed with clay, and in this condition baked in a furnace for five days and nights without intermission. Of the three methods which have been employed for refining gold and silver, 1. by exposing the fused metal to a current of air; 2. by keeping the alloy in a state of fusion and throwing nitre upon it; and 3. by mixing the alloy with lead, exposing the whole to fusion upon a vessel of bone-ashes or earth, and blowing upon it with bellows or other blast; the latter appears most nearly to coincide with the description of Diodorus. To this process, known as the refining process [LEAD], there seems to be a reference in 1s. xi. ii. Jer. vi. 28-30; Ez. xxii. 18-22, and from it Mr. Napier (Met. of the Bible, p. 24) deduces a striking illustration of Mal. iii. 2, 3, "he shall sit as a refiner and purifier of silver," etc. "When the alloy is melted ... upon a cupel, and the air blown upon it, the surface of the melted metals has a deep orange-red color, with a kind of flickering wave constantly passing over the surface ... As the process proceeds the heat is increased ... and in a little the color of the fused metal becomes lighter. At this stage the refiner watches the operation, either standing or sitting, with the greatest earnestness, until all the orange color and shading disappears, and the metal has the appearance of a highly-polished mirror, reflecting every object around it; even the refiner, as he looks upon the mass of metal, may see himself as in a looking-glass, and thus he can form a very correct judgment respecting the purity of the metal. If he is satisfied, the fire is withdrawn, and the metal removed from the furnace; but if not considered pure more lead is added and the process repeated."

Silver mines are mentioned by Diodorus (i. 33) with those of gold, iron, and copper, in the island of Meroe, at the mouth of the Nile. But the chief supply of silver in the ancient world appears to have been brought from Spain. The mines of that country were celebrated (1 Mac. viii. 3). Mt. Osopeda, from which the Gudahaptivir, the ancient Balbes, takes its rise, was formerly called "the silver mountain," from the silver-mines which were in it (Strabo, iii. p. 148). Tartessus, according to Strabo, was an ancient name of the river, which gave its name to the town which was built between its two mouths. But the largest silver-mines in Spain were in the neighborhood of Carthago Nova from which, in the time of Polybius, the Roman government received 25,000 Drachmae daily. These, when Strabo wrote, had fallen into private hands, though most of the gold-mines were public property (iii. p. 148). Near Castulo there were lead-mines containing silver, but in quantities so small as not to repay the cost of working. The process of separating the silver from the lead is abridged by Strabo from Polybius. The lumps of ore were first pounded, and then sifted through sieves into water. The sediment was again pounded, and again filtered, and after this process had been repeated five times the water was drawn off; the remainder of the ore melted, the lead poured away and the silver left pure. If Tartessus be the Tarshish of Scripture, the metal workers of Spain in those days must have possessed the art of hammering silver into sheets, for we find in Jer. x. 9, "silver spread into plates," the metal having been brought from Tartessus, and gold from Ephraim. We have no means of knowing whether the gold of Ophir was obtained from mines or from the washing of gold-streams. A Pliny (vi. 32), from Julia, describes the littus Hammonum on the Persian Gulf as a place where gold-mines existed, and in the same chapter alludes to the gold-mines of the Sabaeans. But in all probability the greater part of the gold which came into the hands of the Phcenicians and Hebrews was obtained from streams; its great abundance seems to indicate this. At this very early period Jericho was a centre of commerce with the East, and in the narrative of its capture we meet with gold in the form of ingots (Josh. xii. 1. 21. A. V. "wedge," lit. "tongue"), in which it was probably cast for the convenience of traffic. That which Achan took weighed 25 oz. As gold is seldom if ever found entirely free from silver, the quantity of the latter varying from 2 per cent. to 30 per cent., it has been supposed that the ancient metallurgists were acquainted with some means of parting them, an operation performed in modern times by boiling the metal in nitric or nitrous acid. It has also been supposed that the operation was performed by a method similar to that described by Pliny, or by a process which combines the advantages of both. Gold is said to be the origin of "ingot."
sulphuric acid. To some process of this kind it has been imagined that reference is made in Prov. xvii. 9, "The fining-pot is for silver, and the furnace for gold;" and again in xxvii. 21, "if, for example," says Mr. Napier, "the term fining-pot could refer to the vessel or pot in which the silver is dissoluted from the gold in potting, as it may be called with propriety, then these passages have a meaning in our modern practice." (Met. of the Bible, p. 28; but he admits this is at best but plausible, and considers that "the constant reference to the process, and kinds of metal, in Scripture is a kind of presumptive proof that they were not in the habit of perfectly purifying or separating the gold from the silver.

A strong proof of the acquaintance possessed by the ancient Hebrews with the manipulation of metals is found by some in the destruction of the golden calf in the desert by Moses. "And he took the calf which they had made, and burnt it in fire, and ground it to powder, and strewn it upon the water, and made the children of Israel drink." (Ex. xxxii. 20.) As the highly malleable character of gold would render an operation like that which is described in the text almost impossible, an explanation has been sought in the supposition that we have here an indication that Moses was a proficient in the process known in modern times as calcination. The object of calcination being to oxidize the metal subjected to the process, and gold not being affected by this treatment, the explanation cannot be admitted.

M. Goguet (quoted in Wilkinson's Anc. Eg., iii. 221) confidently asserts that the problem has been solved by the discovery of an experienced chemist that "in the place of tartaric acid, which we employ, the Hebrew legislator used sulfur, which is common in the East." The gold so reduced and made into a draught is further said to have a most detestable taste. Goguet's solution appears to have been adopted without examination by more modern writers, but Mr. Napier ventured to question its correctness, and endeavored to trace it to its source. The only clue which he found was in a discovery by Stahl, a chemist of the 17th century, that if 1 part gold, 3 parts potash, and 3 parts sulphur are heated together, a compound is produced which is partly soluble in water. To this Stahl alludes, "this be the discovery referred to, which I think very probable," it certainly has been made the most of by Biblical critics. (Met. of the Bible, p. 49.)

The whole difficulty appears to have arisen from a desire to find too much in the text. The main object of the destruction of the calf was to prove its worthlessness and to throw contempt upon idolatry, and all this might have been done without any refined chemical process like that referred to. The calf was first heated in the fire to destroy its shape, then beaten and broken up by hammering or filing into small pieces, which were thrown into the water, of which the people were made to drink as a symbolic act. Moses threw the atoms into the water as an emblem of the perfect assimilation of the metals, and afterward he said that what they had made, but as a symbol of purification, to remove the object of the transgression by those very persons who had committed it." (Dr. Kalisch, Com. on Ex. xxxii. 21.)

How far the ancient Hebrews were acquainted with the use of copper at present in use for extracting copper from the ore it is impossible to assert, as there are no references in Scripture to anything of the kind, except in the passage of Job already quoted. Copper smelting, however, is in some cases attended with comparatively small difficulties, which the ancient authors evidently should know it to overcome. One composed of copper and oxygen, mixed with charcoal, and brought to a bright red heat, leaves the copper in the metallic state, and the same result will follow if the process be applied to the carbonates and sulphures of copper. Some means of toughening the metal so as to render it fit for manufacture must have been known to the Hebrews as to other ancient nations. The Egyptians evidently possessed the art of working bronze in great perfection at a very early time, and much of the knowledge of metals which the Israelites must have been acquired during their residence among them.

Of tin there appears to have been no trace in Palestine. That the Phoenicians obtained their supplies from the mines of Spain and Cornwall there can be no doubt, and it is suggested that even the Egyptians may have procured it from the same source, either directly or through the medium of the Phoenicians, to whom it might have come in the course of trade; but in other instances in which allusion is made to it, tin occurs in conjunction with other metals in the form of an alloy. The lead mines of Gebel el Rosas, near the coast of the Red Sea, about half way between Berenice and Rosayr (Wilkinson, Handb. for Egypt, p. 403), may have supplied the Hebrews with that metal, of which there were no mines in their own country, or it may have been obtained from the rocks in the neighborhood of Sinai. The hills of Palestine are rich in iron, and the mines are still worked there (Metals) though in a very simple rude manner, like that of the ancient Samothracians: of the method employed by the Egyptians and Hebrews we have no certain information. It may have been with great art that in use thus the whole of the limits from very early times, which is thus described by Dr. Ure (Dict. of Arts, etc., art. Steel). "The furnace of blooming in which the ore is smelted is from four to five feet high; it is somewhat pear-shaped, being about five feet wide at bottom and one foot at top. It is built entirely of clay. . . . There is an opening in front about a foot or more in height, which is built up with clay at the commencement and broken down at the end of each smelting operation. The bellows are usually made of a goat's skin . . . . The bamboo nozzles of the bellows are inserted into tubes of clay, which pass into the furnace . . . . The furnace is filled with charcoal, and a lighted coal being introduced before the nozzles, the mass in the interior is soon kindled. As soon as this is accomplished, a small portion of the ore, previously moistened with water to prevent it from running through the charcoal but without any flux whatever, is laid on the top of the coal and covered with charcoal to fill up the fur-
MINES, MINING

race. In this manner ore and fuel are supplied, and the bellows are urged for three or four hours. When the process is stopped and the temporary wall in front broken down, the bloom is removed with a pair of tongs from the bottom of the furnace.

It has seemed necessary to give this account of a very ancient method of iron smelting, because, from the difficulties which attend it, and the intense heat which is required to separate the metal from the ore, it has been asserted that the allusions to iron and iron manufacture in the Old Testament are anachronisms. But if it were possible among the ancient Indians in a very primitive state of civilization, it might have been known to the Hebrews, who may have acquired their knowledge by working as slaves in the iron furnaces of Egypt (comp. Deut. iv. 20).

The question of the early use of iron among the Egyptians, is fully disposed of in the following remarks of Sir Gardner Wilkinson (Ancient Egyptians, ii. pp. 154-156):—

In the infancy of the arts and sciences, the difficulty of working iron might long withhold the secret of its superiority over copper and bronze; but it cannot reasonably be supposed that a nation so advanced, and so eminently skilled in the art of working metals as the Egyptians and Sidonians, should have remained ignorant of its use, even if we had no evidence of its having been known to the Greeks and other people; and the constant employment of bronze arms and implements is not a sufficient argument against their knowledge of iron, since we find the Greeks and Romans made the same things of bronze long after the period when iron was universally known. . . . To conclude, from the want of iron instruments, or arms, bearing the names of early monarchs of a Pharaonic age, that bronze was alone used is neither just nor satisfactory; since the decomposition of that metal, especially when buried for ages in the nitrous soil of Egypt, is so speedy as to preclude the possibility of its preservation. Until we know in what manner the Egyptians employed bronze tools for cutting stone, the discovery of them affords no additional light, nor even argument; since the Greeks and Romans continued to make bronze instruments of various kinds so long after iron was known to them; and Herodotus mentions the iron tools used by the builders of the Pyramids. Iron and copper mines are found in the Egyptian desert, which were worked in old times; and the monuments of Thebes, and even the tombs about Memphis, dating more than 4000 years ago, represent butchers sharpening their knives on a round bar of metal attached to their apron, which from its blue color can only be steel; and the distinction between the bronze and iron weapons in the tomb of Rameses Ill., one painted red, the other blue, leaves no doubt of both having been used (as in Rome) at the same periods. In Ethiopia iron was much more abundant than in Egypt, and Herodotus states that copper was a rare metal there; though we may doubt his assertion of prisoners in that country having been bound with "fetters of gold. The speedy decomposition of iron would be sufficient to prevent our finding implements of that metal of an early period, and the greater opportunities of obtaining copper ore, added to the facility of working it, might be a reason for preferring the latter whenever it answered the purpose instead of iron." [Iron, Amer. ed.]

MINGLED PEOPLE. This phrase (אֲדָם הָכַּרֵךְ, hākerēḇ), like that of "the mixed multitude," which the Hebrew closely resembles, is applied in Jer. xxxv. 29, and Ez. xxx. 5, to denote the insubordinate foreign population of Egypt and its frontier-tribes, including every one, says Jerome, who was not of native Egyptian, but was resident there. The Targum of Jonathan understands it in this passage as well as in Jer. i. 37, of the foreign mercenaries, though in Jer. xxxv. 24, where the word again occurs, it is rendered "Arab." It is difficult to attach to it any precise meaning, or to identify with the mingled people any race of which we have knowledge. "The kings of the mingled people that dwelt in the desert" are the same apparently as the tributary kings (A. V., "kings of Arabia") who brought presents to Solomon (1 K. x. 15); but the Hebrew in the two cases is identical. These have been explained (as in the Targum on 1 K. x. 15) as foreign mercenary chiefs who were in the pay of Solomon, but Thenius understands by them the sheikhs of the border tribes of Bedouins, living in Arabia Deserta, who were closely connected with the Israelites. The "mingled people" in the midst of Babylon (Jer. i. 37) were probably the foreign soldiers or mercenary troops, who lived among the native population, as the Targum takes it. Kimchi compares Ex. xii. 38, and explains hākerēḇ of the foreign population of Babylonia "generally, "foreigners who were in Babylon from several lands," or it may be, he says, be intended to denote the merchants, 'erēḇ being thus connected with the מָעַר יִשְׂרָאֵל, of Ez. xvii. 27, rendered in the A. V. "the occupiers of thy merchandise." His first interpretation is based upon what appears to be the primary signification of the root הָכַּרֵךְ, hākerēḇ, to mingle, while another meaning, "to pledge, guarantee," suggested the rendering of the Targum "mercenaries," "which Jerach adopts in his explanation of "the kings of hākerēḇ" in 1 K. x. 15, as the kings who were pledged to Solomon and dependent upon him. The equivalent which he gives is apparently intended to represent the Fr. garantière.

The rendering of the A. V. is supported by the LXX. σιμιαντος in Jer., and σιμιαντος in Ezekiel.

W. A. W.

MINIAMIN (מִנְיָמִין) [on the right, or son of the right hand]: Beniamin; [Vat.] Alex. Beniamin; Benjamin. 1. One of the Levites in the reign of Hezekiah appointed to the charge of the freewill offerings of the people in the cities of the priests, and to distribute them to their brethren (2 Chr. xxxi. 15). The reading "Benjamin" of

a Kimchi observes that these are distinguished from the mingled people mentioned in ver. 29 by the addition, "that dwell in the desert."

b In the parallel passage of 2 Chr. ix. 14 the reading כְּבֵית דֹּאֲרָב, 'Arab, or Arabia.

c The same commentator refers the expression in Is. xiii. 9, "they shall every man turn to his own people," to the dispersion of the mixed population of Babylon at its capture.

d מִנְיָמִים.
MINISH

the LXX. and Vulg. is followed by the Peshito.

*MINISH* occurs (Lx. v. 21; Ps. cvii. 29) in the sense of our present "lessen" or "diminish." It comes from the Latin *minuere* through the old French *minure*; it now appears only as "diminish," which has taken its place. The old term is found in Wycliffe's translation of John iii. 30: "it becometh him to bear me, for I mustt, or must leave." H.

MINIA (Μίνια), a country mentioned in connection with Ararat and Ashchenaz (Jer. ii. 27). The LXX. erroneously renders it ταύη ἡλιων. It has been already noticed as a portion of Armenia.

[Armenia.] The name may be connected with the Mignus noticed by Nicolas of Damascus (Joseph. Ant. i. 3, § 6), with the Minioi of the Assyrian inscriptions, whom Rawlinson (Herod. i. 454) places to be Tiranon, with the Minois who appears in the list of Armenian kings in the inscription at worm (Layard's Nineveh and Bible, p. 401). At the time when Jeremias prophesied, Armenia had been subdivided by the Median kings (Herod. i. 106, 177). W. L. B.

MINISTER.

MINISTER. This term is used in the A. V. to describe various officials of a religious and civil character. In the O. T. it answers to the Hebrew *nethineth,* which is applied (1) to an attendant upon a person of high rank, as to Josiah in relation to Moses (Ex. xxvi. 13; Josh. i. 1), and to the attendant on the prophet Elisha (2 K. iv. 43); (2) to the attendant of a royal court (1 K. x. 5, where, it may be observed, they are distinguished from the "servants" or officers of higher rank, answering to our ministers, by the different titles of the chambers assigned to their use, the "sitting" of the servants meaning rather their eating, and the "attendance" of the ministers the attendance in which they were stationed; persons of high rank held this post in the Jewish kingdom (2 Chron. xxvii. 8) and it may be in this sense, as the attendants of the King of Kings, that the term is applied to the angels (Ps. civ. 4); (3) to the Priests and Levites, who are thus-described by the prophets and later historians (Is. xlii. 6; Ez. xlix. 11; Joel i. 9, 15; Ez. xvi. 17; Neh. x. 30), though the verb, whence *nethineth* is derived, is not uncommonly used in reference to their services in the earlier books (Ex. xxvii. 43; Num. iii. 31; 1 Matt. xxviii. 5, al.). In the N. T. we have three terms each with its distinctive meaning — *过去了* ιηθής, and *διάκονος*. The first answers most nearly to the Hebrew *nethineth* and is usually employed in the LXX as its equivalent. It betokens a subordinate public administrator, whether civil or sacred, and is applied in the former sense to the magistrate in their relation to the Divine authority (Rom. xiii. 6). It is applied to our Lord in relation to the Father (Heb. viii. 2), and to St. Paul in relation to Jesus Christ (Rom. xv. 16), where it occurs among other expressions of a sacral character, "ministering" (εἰμ&sigma;ροιωτας), "offering up" (προσφατος, etc.). In all these instances the original and special meaning of the word, as used by the Athenians, is preserved, though this comes, perhaps, yet more distinctly forward in the cognate terms *pastor* and *aidekon* and *pastor* applied to the sacral office of the Jewish priest (Luke i. 23; Heb. iv. 11), to the still higher priesthood of Christ (Heb. viii. 6), and in a secondary sense to the Christian priest who offers up to God the faith of his converts (Phil. ii. 17. Λειτουργια της πιστεως), and to any act of public self devotion on the part of a Christian disciple (Rom. xxvii. 2; 2 Cor. i. 12; Phil. ii. 30). The second term, *αποστόλος* differs from the other two in that it contains the idea of actual and personal attendance upon a superior. Thus it is used of the attendant in the synagogue, the khorsen of the Talmudists (Luke iv. 29), whose duty it was to open and close the building, to produce and replace the books employed in the service, and generally to wait on the officiating priest or teacher (Carpov, Appendix, p. 314). It is similarly applied to Mark, who, as the attendant on Barnabas and Saul (Acts xiii. 5), was probably charged with the administration of baptism and other assistant duties (The Wette, in loc.); and again to the subordinates of the high-priests (John vii. 32, 45, xviii. 3, 13), or of a jailer (Matt. xvi. 26; μπαστευς in Luke xii. 68; Acts v. 22). The idea of personal attendance comes prominently forward in Luke i. 2: Acts xxvi. 16, in both of which places it is alleged as a ground of trustworthy testimony (ipso videns, et, quod plus est, ministriat, Bengel). Lastly, it is used interchangeably with *διάκονος* in 1 Cor. iv. 1 compared with iii. 5, but in this instance the term is designed to convey the notion of subordination and humility. In all these cases the etymological sense of the word (ευτος, literally a sub-servant) one who waits upon the command of the steersman) comes out. The term that most adequately represents it in our language is "attendant." The third term, *διάκονος*, is the one usually employed in relation to the ministry of the Gospel; its application is twofold, in a general sense to indicate ministers of any order, whether superior or inferior, and in a special sense to indicate an order of inferior ministers. In the former sense we have the cognate term *διάκονος* applied in Acts vi. 1, 4, both to the ministry of tables and to the higher ministry of the word, and the term *διάκονος* itself applied, without defining the office, to Paul and Apollos (1 Cor. iii. 5), to Tychicus (Eph. vi. 21; Col. iv. 7), to Epaphras (Col. i. 7), to Archippus (1 Tim. i. 2), and even to himself (Rom. xv. 8; Col. ii. 17). In the latter sense it is applied in the passages where the *διάκονος* is contrastingly distinguished from the Bishop, as

a This word *pastor* is derived from *pastor*, *public service,* and the latter was the name of certain personal services which the citizens of Athens and some other states had to perform gratuitously for the public good. From the sacral use of the word in the N. T. we obtained the special sense of a "public divine service," which is perpetuated in our word "liturgy.

b The term *διάκονος* is used in this sense in Acts xiii. 2.

c The term *διάκονος* is used in this sense in Acts xiii. 2.

d The term *pastor* of ecclesiastical history occupied precisely the same position in the Christian church that that of *pastor* and *aidekon* and *pastor* occupied in the Christian church.
MINNITH

in Phil. i. 1; 1 Tim. iii. 8-13. It is, perhaps, worthy
of observation that the word is of very rare occur-
rence in the LXX. (Esth. i. 10, ii. 2, vi. 3), and then
only in a general sense; its special sense, as known to
us in its derivative "decaem," seems to be of purely
Christian origin. [DEACON.] W. L. B.

MINNITH (מִנִית) [perh. girea, alliterated]; אָרֹעַי סֵעָרֹו; a Joseph. פְּלָס מַלְאָכָּן; Pesh. Syriac, מַחֵרָב וִילָג. מַנהֵית, a place on the east of the Jordan, named as the
point to which Jophethah’s slaughter of the Amo-
utes extended (Judg. vi. 24). "From Acor to the
approach to Minnith" (בֵּית נְחַי) seems to
have been a district containing twenty cities.
Minnith was in the neighborhood of Abel-Ceranim,
the "meadow of vineyards." Both places are
mentioned in the Omnastirion — "Mennith" or
"Mannith," as 4 miles from Heshbon, on the road
to Philadelphia (Ammurf), and Abel as 6 or 7 miles
from the latter, but in what direction is not stated.
A site bearing the name Menyah is marked in
Van de Velde’s Map, perhaps on the authority of
Buckingham, at 7 Roman miles east of Heshbon on a
road to Arbuna, though not on the frequented track.
But we must await further investigation of these
interesting regions before we can pronounce for
or against its identity with Minnith.

The variations of the ancient versions as given
above are remarkable, but they have not suggested
anything to the writer. Schwarz proposes to find
Minnith in Maged, a trans-Jordanic town named
in the Maccabees, by the change of 2 to 2. An
episcopal city of "Palestina secunda," named Men-
nith, is quoted by Roland (Palestina, p. 211), but
with some question as to its being located in
this district (comp. 239).

The "meadow of vineyards." Both places are
mentioned in the Omnastirion — "Mennith" or
"Mannith," as 4 miles from Heshbon, on the road
to Philadelphia (Ammur), and Abel as 6 or 7 miles
from the latter, but in what direction is not stated.

MINSTREL

The Hebrew word in 2 K. ivi.
15 (מָנַת, meenug) properly signifies a player
upon a stringed instrument like the harp or kinor
[Harp], whatever its precise character may have been,
on which David played before Saul (1 Sam. xvi.
16, xviii. 10, xix. 9), and which the harlots
of great cities used to carry with them as
they vailed to attract notice (Isa. xxiii. 16). The
passage in which it occurs has given rise to much
controversy; Elisha, upon being consulted by Jehoram
as to the issue of the war with Moab, at first
ignominiously refuses to answer, and is only induced
to so by the presence of Jehoshaphat. He calls for
a harper, apparently a camp follower (one of the
Levites according to Procopius of Gaza), and
now bring me a harper: and it came to pass as
the harper harped that the hand of Jehovah was
on him. Other instances of the same divine influence
or impulse connected with music, are seen in the
case of Saul and the young prophets in 1 Sam.
xv. 5, 6, 10. In the present passage, the latter
reference of Elisha’s appeal is variously explained.
Jarchi says that “on account of anger the Shechemites
had departed from him;” Ephrem Syrus, that the
object of the music was to attract a crowd to hear
the prophecy: J. H. Michaelis, that the prophet’s
mind, disturbed by the impiety of the Israelites,
might be soothed and prepared for divine things by
a spiritual song. According to Keil (Comm. on
Kings, i. 359, Eng. tr.), “Elisha calls for a min-
istr, in order to gather in his thoughts by the soft
voices of music from the impression of the outer
world, and by lessening the life of self and of the
world to be transferred into the state of internal
vision by which his spirit would be prepared to
receive the Divine revelation. This in effect is
the view taken by Josephus (Ant. ix. 3, § 1) and the
same is expressed by Maimonides in a passage which
embraces the essence of the Jews of the Middle
Ages. All the prophets were not able to prophesy
at any time that they wished, but they pre-
pared the minds, and sat joyful and glad of
heart, and abstracted; for prophecy dwelt not
in the midst of melancholy nor in the midst of
apathy, but in the midst of joy. Therefore the sons
of the prophets had before them a pasty, and a
tabret, and a pipe, and a harp and (thus) sought
after prophecy.” (prophetic inspiration). (Yoel
bouched, vi. 7, Bernard’s Creed and Ethics of
the Jews, p. 16; see also note to p. 114). Kimchi
quotes a tradition to the effect that, after the ascen-
don of his master Elijah, the spirit of prophecy had
not dwelt upon Elisha because he was mourning,
and the spirit of holiness does not dwell but in
the midst of joy. In 1 Sam. xvii. 10, on the contrary,
there is a remarkable instance of the employment
of music to still the excitement consequent upon
an attack of frenzy, which in its external manifesta-
tions at least so far resembled the rapture with
which the old prophets were affected when deliver-
ing their prophecies, as to be described by the same
term (see Ez. xxviii. 14). Of that cultivation Minnith and Abel-Ceranim may
have been the chief seats.

In this neighborhood were possibly situated the
vineyards in which Balaam encountered the angel
on his road from Mesopotamia to Moab (Num.
xxii. 24).

man who knows how to play upon the harp, and
it came to pass as the harper harped there rested
upon him the spirit of prophecy from before Jehovah.”
MINT

Beals the title of which the Jews were most scrupulously exact in paying. Some commentators have supposed that such herbs as mint, anise, dill, and cummin, were not titheable by law, and that the Pharisees, solely from an over-strained zeal, paid tithes for them; but as dill was subject to tithe (Muss thượng, esp. iv. § 5), it is most probable that the other herbs mentioned with it were also tithed, and this is fully corroborated by our Lord's own words: "These ought ye to have done." The Pharisees therefore are not exempted for paying tithes of things unfruitful by law, but for paying more regard to a scrupulous exactness in these minor duties than to important moral obligations.

There cannot be the slightest doubt that the A. V. is correct in the translation of the Greek word, and all the old versions are agreed in understanding some species of mint (Mentha) by it. Dioscorides (iii. 36, ed. Spangere) speaks of Ἰδρωνοι ἱππαρκοῦ (Mentha citytor); the Greeks used the terms ἰππαρκοῦ of mint, whence the derivation of the English word: the Romans have mentha, mentis, mentatum. According to Pliny (H. N. xix. 8) the old Greek word for mint was ιππαρκοῦ, which was changed to Ἰδρωνοι ("the sweet-smelling"), on account of the fragrant prop-

MIRACLES

The word "miracle" is the ordinary translation, in our authorized English version of the Greek ἰατρικον; our translators did not borrow it from the Vulgate in which σωματικον is the customary rendering of ἰατρικον, but, apparently, from their English predecessors, Tyndale, Coverdale, etc.; and it had, probably before their time, acquired a fixed technical import in theological language, which is not directly suggested by its etymology. The Latin miraculum, from which it is merely accommodated to an English termination, corresponds best with the Greek ἰατρικον, and denotes any object of wonder, whether supernatural or not. Thus the "Seven Wonders of the World" were called miracula, though they were only miracles of art. It will perhaps be found that the habitual use of the term "miracle" has tended to fix attention too much on the physical strangeness of the facts thus described, and to divert attention from what may be called their spirituality. In reality, the practical importance of the strangeness of miraculous facts consists in this, that it is one of the circumstances which, taken together, make it reasonable to understand the phenomenon as a mark, seal, or attestation of the Divine sanction to something else. And if we suppose the Divine intervention established that a given phenomenon is to be taken as a mark or sign of Divine attestation, theories concerning the mode in which that phenomenon was produced become of comparatively little practical value, and are only serviceable as helping our conceptions. In the case of such signs, when they vary from the ordinary course of nature, we may conceive of them as immediately wrought by the authorized intervention of some mighty being merely exercising invisibly his natural powers; or as the result of a provision made in the original scheme of the universe, by

M. mugrulli, another species of mint, perhaps all these were known to the ancients. The mints belong to the large natural order Labiatae. 41.

W. II.

MIPUKAD, THE GATE (םיפקע אל תבש) [gate of the census, or of appointment, Gen.]: יבש הנש תבש; יבש ידעיהל, one of the gates of Jerusalem at the time of the rebuilding of the wall after the return from Captivity (Neh. iii. 31). According to the view taken in this work of the topography of the city, this gate was probably not in the wall of Jerusalem proper, but in that of the city of David, or Zion, and somewhere near to the junction of the two on the north side (see vol. i. p. 432). The same may refer to some memorable census of the people, as for instance that of David, 2 Sam. xxiv. 9, and 1 Chron. xxii. 5 (in each of which the word used for "number" is mipkoh), or to the superintendents of some portion of the worship (Pekhila, see 2 Chron. xxxii. 13)

G.

MIRACLES. The word "miracle" is the ordinary translation, in our authorized English version of the Greek ἰατρικον. Our translators did not borrow it from the Vulgate in which σωματικον is the customary rendering of ἰατρικον, but, apparently, from their English predecessors, Tyndale, Coverdale, etc.; and it had, probably before their time, acquired a fixed technical import in theological language, which is not directly suggested by its etymology. The Latin miraculum, from which it is merely accommodated to an English termination, corresponds best with the Greek ἰατρικον, and denotes any object of wonder, whether supernatural or not. Thus the "Seven Wonders of the World" were called miracula, though they were only miracles of art. It will perhaps be found that the habitual use of the term "miracle" has tended to fix attention too much on the physical strangeness of the facts thus described, and to divert attention from what may be called their spirituality. In reality, the practical importance of the strangeness of miraculous facts consists in this, that it is one of the circumstances which, taken together, make it reasonable to understand the phenomenon as a mark, seal, or attestation of the Divine sanction to something else. And if we suppose the Divine intervention established that a given phenomenon is to be taken as a mark or sign of Divine attestation, theories concerning the mode in which that phenomenon was produced become of comparatively little practical value, and are only serviceable as helping our conceptions. In the case of such signs, when they vary from the ordinary course of nature, we may conceive of them as immediately wrought by the authorized intervention of some mighty being merely exercising invisibly his natural powers; or as the result of a provision made in the original scheme of the universe, by

a • "There are various species," says Tristram (Nat. Hist. of the Bible, p. 471), "wild and cultivated, in Palestine. The common wild mint of the country is

Mentha aegopris, which grows on all the hills, and is much larger than our garden mint (Mentha sativa)." 42.
which such an occurrence was to take place at a given moment; or as the result of the interference of some higher law with subordinate laws; or as a change in the ordinary working of God in that course of events which we call nature; or as a suspension by his immediate power of the action of certain forces which He had originally given to which he adds that such natural agents do not produce more or less probable of the mode in which a given phenomenon is to be conceived to have been produced; but if all the circumstances of the case taken together make it reasonable to understand that phenomenon as a Divine sign, it will be of comparatively little practical importance which of them we adopt. Indeed, in many cases, the phenomenon which constitutes a Divine sign may be one not, in itself, at all varying from the known course of nature. This is the common case of prophecy: in which the fulfilment of the prophecy, which constitutes the sign of the prophet's commission, may be the result of ordinary causes, and yet, from being incapable of having been anticipated by human sagacity, it may be an adequate mark or sign of Divine sanction. In such cases, the miraculous or wonderful element is to be sought not in the fulfillment, but in the prediction. Thus, although we should suppose, for example, that the destruction of Sennacherib's army was accomplished by an ordinary simoom of the desert, called figuratively the Angel of the Lord, it would still be a sign of Isaiah's prophetic mission, and of God's care for Jerusalem. And so, in the case of the passage of the Red Sea by the Israelites under Moses, and many other instances. Our Lord's prediction of the destruction of Jerusalem is a clear example of an event brought about in the ordinary course of things, and yet being a sign of the Divine mission of Jesus, and of the just displeasure of God against the Jews. It would appear, indeed, that in almost all cases of signs or evidential miracles something mystical is involved. In the common case, for example, of healing sickness by a word or touch, the word or gesture may be regarded as a prediction of the cure; and then, if the whole circumstances be such as to exclude just suspicion of (1) a natural anticipation of the event, and (2) a casual coincidence, it will be indifferent to the signity of the cure whether it regard it as effected by the operation of ordinary causes, or by an immediate interposition of the Deity reversing the course of nature. Hypotheses by which such cures are attempted to be accounted for by ordinary causes are indeed generally wild, improbable, and arbitrary, and are (on that ground) justly open to objection; but, if the miraculous character of the predictive antecedent be admitted, they do not tend to deprive the phenomenon of its signity: and there are minds which, from particular associations, find it easier to conceive a miraculous agency operating in the region of mind, than one operating in the region of matter. It may be further observed, in passing, that the proof of the actual occurrence of a sign, when in itself an ordinary event, and invested with signity only by a previous prediction, may be, in some respects, better circumstanced than the proof of the occurrence of a miraculous sign. For the prediction and the fulfillment may have occurred at a long distance of time the one from the other, and be attested by separate sets of independent witnesses, of whom the one was ignorant of the fulfillment, and the other ignorant, or incredulous, of the prediction. Thus each of these sets of witnesses are depositing to what is to them a mere ordinary fact, there is no room for suspecting, in the case of those witnesses, any coloring from religious prejudice, or excited feeling, or fraud, or that craving for the marvelous which has notoriously produced many legends. But it must be admitted that it is only such sources of suspicion that are excluded in such a case; and that whatever inherent improbability there may be in a fact considered as miraculous— or varying from the ordinary course of nature—remains still: so that it would be a mistake to say that the two facts together— the prediction and the fulfillment—required no stronger evidence to make them credible than any two ordinary facts. This will appear at once from a parallel case. That A B was seen walking in Bond Street, London, on a certain day, and at a certain hour, is a common ordinary fact, credible on very slight evidence. That A B was seen walking in Broadway, New York, on a certain day, and at a certain hour, is, when taken by itself, similarly circumstanced. But if the day and hour assigned in both reports be the same, the case is altered. We conclude, at once, that one or other of our informants was wrong, or both, until convinced of the correctness of their statements by evidence much stronger than would suffice to establish an ordinary fact. This brings us to consider the peculiar improbability supposed to attach to miraculous signs, as such. The peculiar improbability of Miracles is resolved by Huene, in his famous Essay, into the circumstances that they are "contrary to experience." This expression is, as has often been pointed out, strictly speaking, incorrect. In strictness, that only can be said to be contrary to experience, which is contradicted by the immediate perceptions of persons present at the time when the fact is alleged to have occurred. Thus, if it be alleged that all metals are ponderous, this is an assertion contrary to experience. As each of these sets of witnesses are extending this secondary application; and it must be admitted that, in this latter, less strict sense, miracles are contrary to general experience, so far as their mere physical circumstances, visible to us, are concerned. This should not only be admitted, but strongly insisted upon, by the maintainers of miracles, because it is an essential element of their signity character. It is only the analogy of general experience (necessarily
MIRACLES

To this it is sometimes replied that, as we collect the existence of God from the course of nature, we may reason from the existence of God in a perfect supernatural being, the superintendency of whose laws we cannot but infer from the order which the universe presents in any higher degree than we find them in the course of nature; and consequently neither the power nor the will to alter it. But such persons must be understood to say, that the notion of an all-powerful God, is the first cause, as an inference from the course of nature, without attributing any power to the author of nature. But this is not otherwise. There can be no design, for example, or anything analogous to design, in the Author of the Universe, unless out of other possible combinations of things, He selected those that fit for a certain purpose. And it is, in truth, a violation of all analogy, and an utterly wild and arbitrary chimera, to infer, without the fullest evidence of such a limitation, the existence of a Being possessed of such power and intelligence as we see manifested in the course of nature, and yet unable to make one atom of matter move an inch in any other direction than that in which it actually does move.

And even if we do not regard the existence of God (in the proper sense of that term) as proved by the course of nature, still if we admit his existence, we can by no means say that no such power, or even possible, the occurrence of miracles will not be whatever it is, for it is surely going too far to say, that, because the ordinary course of nature leaves us in doubt whether the author of it be able or unable to alter it, or of such a character as to be disposed to alter it for some great purpose, it is therefore incredible that He should ever have actually altered it. The true philosopher, when he considers the narrowness of human experience, will make allowance for the possible existence of many causes not yet observed by man, so as that their operation can be reduced to fixed laws understood by us; and the operation of which, therefore, when it reveals itself, must seem to vary from the ordinary course of things. Otherwise, there could be no new discoveries in physical science itself. It is quite true that such forces as magnetism and electricity are now to a great extent reduced to known laws: but it is equally true that no one would have taken the trouble to find out the laws, if he had not first believed in the facts. Our knowledge of the law was not the ground of our belief of the fact; but our belief of the fact was that which set us on investigating the law. And it is easy to conceive that there may be forces in nature, unknown to us, the regular periods of the occurrence of whose operations within the sphere of our knowledge (if they ever occur at all) may be immensely distant from each other in time—(as, e.g. the causes which produce the appearance or disappearance of stars)—so as that, when they occur, they may seem wholly different from all the rest of man's present or past experience. Upon such a supposition, the cause of the phenomenon should not make it incredible, because such a rarity would be involved in the conditions of its existence. Now this is analogous to the case of miracles.

Upon the supposition that there is a God, the immediate revelation of the Deity, determined by Wisdom, goodness, etc., is a very causa, because all the phenomena of nature have, on that supposition, such relations as at least their ultimate antecedents; and that physical events, which may, be, that stands next the Divine revelation, is a case of a physical effect having such a volition, so determined, for its immediate antecedent. And
Hence it was for the unnaturalness of the way of acting, that involved in the very conditions of the hypothesis, because this very unnaturalness would be necessary to fit the phenomena for a miraculous sign.

In the foregoing remarks, we have endeavored to avoid all metaphysical discussions of questions concerning the hypothesis, the stamp of the natural and fundamental principle of induction, and the like; not because they are unimportant, but because they could not be treated of satisfactorily within the limits which the plan of this work prescribes. They are, for the most part, matters of an abstract kind, and much difficulty: but (fortunately for mankind) questions of great practical moment may generally be settled, for practical purposes, without solving those higher problems — i.e., they may be settled on principles which will hold good, whatever solution we may adopt of those abstract questions. It will be proper, however, to say a few words here upon some popular forms of expression which tend greatly to increase, in many minds, the natural prejudice against miracles. One of these is the usual description of a natural law, such as: "there is a law of causation among the phenomena of the universe; this is a natural law." This metaphorical expression suggests directly the idea of natural agents breaking, of their own accord, some rule which has the authority and sanctity of a law to them. Such a figure can only be applicable to the case of a supposed causeless and arbitrary variation from the uniform order of sequence in natural things, and is wholly inapplicable to a change in that order caused by God Himself. The word "law," when applied to material things, ought only to be understood as denoting a number of observed and anticipated sequences of phenomena, taking place with such a resemblance or analogy to each other as if a rule had been laid down, which those phenomena were constantly observing. But the rule, in this case, is nothing different from the actual order itself; and there is no cause of these sequences but the will of God choosing to produce them, or choosing to produce them in a certain order.

Again, the term "nature" suggests to many persons the idea of a great system of things endowed with powers and forces of its own — a sort of machine, set a-going originally by a first cause, but continuing its motions of itself. Hence we are apt to imagine that a change in the motion or operation of any part of it by God, would produce the same disturbance of the other parts, as such a change would be likely to produce in them, if made by us, or any other natural agent. But if the motions and operations of material things be produced really by the Divine will, then his choosing to change, for a special purpose, the ordinary motion of one part, does not necessarily, or probably, infer his choosing to change the ordinary motions of other parts in a way not at all requisite for the accomplishment of that special purpose. It is as easy for Him to continue the ordinary course of the rest, with the change of one part, as of all the phenomena without any change at all. Thus, though the stoppage of the motion of the earth in the ordinary course of nature, would be attended with terrible consequences, as, "a suspension of the law of nature;" for a special purpose to be served by that only, would not, of itself, be followed by any such consequences.

From the same conception of nature, as a machine, we are apt to think of interferences with the ordinary course of nature as implying some imperfections in it. Because machines are considered more and more perfect in proportion as they less and less need the interference of the workman. But it is manifest that this is a false analogy; for, the reason why machines are made is, to save us trouble; and, therefore, they are more perfect in proportion as they answer the purpose for which one can seriously imagine that the universe is a machine for the purpose of saving trouble to the Almighty.

Again, when miracles are described as "interferences with the laws of nature," this description makes them appear improbable to many minds, from their not sufficiently considering that the laws of nature interfere with one another; and that we cannot get rid of "interferences" upon any hypothesis consistent with experience. When organization is superinduced upon inorganic matter, the laws of life interfere with and controlled; when animal life comes in, there are new interferences; when reason and conscience are superadded to will, we have a new class of controlling and interfering powers, the laws of which are more complex. Hence these interferences, with all their speculations, could do nothing but observe and reason, surveying a portion of the universe — such as the greater part of the material universe may be — wholly destitute of living inhabitants, might have reasoned that such powers as active beings possess were incredible — that it was incredible that the Great Creator would suffer the majestic uniformity of laws which He was constantly maintaining through boundless space and immemorial worlds, to be controlled and interfered with at the caprice of such a creature as man. Yet we know by experience that God has enabled us to control and interfere with the laws of external nature for our own purposes: nor does this seem less improbable beforehand (but rather more), than that He should Himself interfere with these laws for our advantage. This, at least, is manifest — that the purposes for which man was made, whatever they are, involved the necessity of producing a power capable of controlling and interfering with the laws of external nature; and consequently that those purposes involve in some sense the necessity of interferences with the laws of nature external to man: and how far that necessity may reach — whether it extends to interfere with the essential order and character of interferences proceeding from other creatures, or immediately from God also, it is impossible for reason to determine beforehand.

Furthermore, whatever ends may be contemplated by the Deity for the laws of nature in reference to the rest of the universe — (in which question we have as little information as interest)— we know that, in respect of us, they answer discernible moral ends — that they place us, practically, under government, conducted in the way of rewards and punishment — a government of which the tendency is to encourage virtue and repress vice — and to form in us a certain character by discipline; which character our moral nature compels us to consider as the highest and worthiest object which we can purse. Since, therefore, the laws of nature have, in reference to us, moral purposes to answer, which (as far as we can judge) they have not to serve in other respects, it seems not incredible that these peculiar purposes should occasionally require modifications of those laws in relation to us, which are not necessary in relation to other parts of the universe. For we see — as has been just observed —
that the power given to man of modifying the laws of nature by which He is surrounded, is a power directed by moral and rational influences, such as we are already determining the thoughts and actions of any other creature that we know of. And how far, in the nature of things, it would be possible or eligible, to construct a system of material law which should at the same time, and by the same kind of operations, answer the other purposes of the Creator, and also all his moral purposes with respect to a creature endowed with such faculties as free-will, reason, conscience, and the other peculiar attributes of man, we cannot be supposed capable of judging. And as the regularity of the laws of nature in themselves is the very thing which makes them capable of being usefully controlled and interfered with by man — (since, if their sequences were irregular and capricious we could not know how or when to interfere with them) — so that same regularity is the very thing which makes it possible to use Divine interferences with them as attestations of a supernatural revelation from God to us; so that, in both cases alike, the usual regularity of the laws, in themselves, is not superfluous, but necessary in order to make the interferences with that regularity serviceable for their proper ends. In this point of view, miracles are to be considered as cases in which a higher law interferes with and controls a lower: which circumstances we see instances around us at every turn.

It seems further that, in many disquisitions upon this subject, some essentially distinct operations of the human mind have been confused together in such a manner as to spread unnecessary obscurity over the discussion. It may be useful, therefore, briefly to indicate the mental operations which are chiefly concerned in this matter.

In the first place, there seems to be a law of our mind, in virtue of which, upon the experience of any new external event, any phenomenon limited by the circumstances of time and place, we refer it to a cause, or powerful agent producing it as an effect.

The relative idea involved in this reference appears to be a simple one, incapable of definition, and is obtained by the term efficiency.

From this conception it has been supposed by some that a scientific proof of the stability of the laws of nature could be constructed: but the attempt has signally miscarried. Undoubtedly, while we abide in the strict metaphysical conception of a cause as such, the axiom that "similar causes produce similar effects" is intuitively evident; but it is not so, because, in that point of view, it is merely a barren truism. For my whole conception, within these narrow limits, of the cause of the given phenomenon B is that it is the cause of power producing B. I conceive of that cause merely as the term of a certain relation to the phenomenon: and therefore my conception of a cause similar to it, precisely as a cause, can only be the conception of a cause of a phenomenon similar to B.

But when the original conception is enlarged into abounding the wider maxim, that causes similar as things, considered in themselves, and not merely in relation to the effect, are similar in their effects also, the case ceases to be not equally clear.

And, in applying even this to practice, we are met with insuperable difficulties.

For, first, it may reasonably be demanded, on what scientific ground we are justified in assuming that any one material phenomenon or substance is, in this proper sense, the cause of any given material phenomenon? It does not appear at all self-evident, a priori, that a material phenomenon must have a material cause. Many have supposed the contrary, pointing out the apparent results of any action, our volitions upon matter seem to indicate that such a law should not be hastily assumed. Upon the possible supposition, then, that the material phenomena by which we are surrounded are the effects of spiritual causes — such as the volitions of the Author of Nature — it is plain that these are causes of which we have no direct knowledge, and the similarities of which to each other we can, without the help of something more than the fundamental axiom of cause and effect, discover only from the effects, and only so far as the effects carry us in each particular.

But, even supposing it conceded that material effects must have material causes, it is yet remains to be settled upon what ground we can assume that we have ever yet found the true material cause of any effect whatever, so as to justify us in predicting that, wherever it recurs, a certain effect will follow. All that our abstract axiom tells us is, that if we have the true cause we have that which is always attended with the effect; and all that experience can tell us is that A has, so far as we can observe, been always attended by B; and that we can infer from this that, if A were to recur, B would also, is merely this: that the case of A and B is, so far as we have been able to observe, like a case of true causal connection; and beyond this we cannot advance a step towards proving that the case of A and B is a case of causal connection, without assuming further another principle (which would have saved us much trouble if we had assumed it in the beginning), that similarities or resemblances is a ground of belief, gaining strength in proportion to the closeness and constancy of the resemblance.

Indeed, physical analysis, in its continual advance, is daily teaching us that those things which we once regarded as the true causes of certain material phenomena are only marks of the presence of other things which we now regard as the true causes, and which we may hereafter find to be only assemblages of more fundamental and universal phenomena, more or less connected with what may better claim that title. It is quite possible, for example, that gravitation may at some future time be demonstrated to be the result of a complex system of forces, residing in material substances hitherto undiscovered, and as little suspected to exist as the gases were in the time of Aristotle.

(2) Nor can we derive much more practical assistance from the maxim, that similar antecedents have similar consequences. For this is really no more than the former rule. It differs therefrom only in dropping the idea of efficiency or causal connection; and, however certain and universal it may be supposed in the abstract, it fails in the concrete just at the point where we most need assistance. For it is plainly impossible to demonstrate that any two actual antecedents are precisely similar in the sense of the maxim; or that any one given apparent antecedent is the true unconditional antecedent of any given apparently consequent phenomenon. Unless, for example, we know the relations of a given antecedent B to all the whole nature of another given antecedent A, we cannot, by comparing them together, ascertain their precise similarity. They may be similar in all respects that we have hitherto observed, and yet in
the very essential quality which may make A the unconditional antecedent of a given effect C, in this respect A and B may be quite dissimilar. It will be found, upon a close examination of all the logical canons of inductive reasoning that have been constructed for applying this principle, that such is the case. The real similarity of things apparently similar — pervades them all. Let us take, e.g., what is called the first canon of the "Method of Agreement," which is this: "If two or more instances of the phenomenon under investigation have only one circumstance in common, the circumstance in which alone all the instances agree, is the cause (or effect) of the given phenomenon." Now, in applying this to any practical case, how can we be possibly certain that any two instances have only one circumstance in common? We can remove, indeed, by nicely varied experiments, all the different agents known to us from contact with the substances we are examining, except those which we choose to employ: but how is it possible that we can remove unknown agents, if such exist, or be sure that no unknown laws and periods of whose activity we have had hitherto no means of estimating, but which may reveal themselves at any moment, or upon any unlooked-for occasion? It is plain that, unless we can know the whole nature of all substances present at every moment and every place that we are concerned with in the universe, we cannot know that any two phenomena have but one circumstance in common. All we can say is, that unknown agencies count for nothing in practice; or (in other words) we must assume that things which appear to us similar are similar.

This being so, it becomes a serious question whether such intuitive principles as we have been discussing are of any real practical value whatever in mere physical inquiries. Because it would seem that they cannot be made use of without bringing in another principle, which seems quite sufficient without them, that the likeness of one thing to another in observable respects, is a ground for presuming likeness in other respects — a ground strong in proportion to the apparent closeness of the resemblances, and the number of times in which we have found ourselves right in acting upon such a presumption. Let us talk as we will of theorems deduced from intuitive axioms, about true causes or antecedents, still all that we can know in fact of any particular case is, that, as far as we can observe, it resembles what reason teaches us would be the case of a true cause or a true antecedent: and if this justifies us in drawing the inference that it is such a case, then certainly we must admit that resemblance is a just ground in itself of inference in practical reasoning.

And therefore, even granting, it will be said, "the power of the Deity to work miracles, we can have no better grounds of determining how He is likely to exert that power, than by observing how He has actually exercised it. Now we find Him, by experience, by manifest traces and records, through countless ages, and in the most distant regions of space, continually exercising it; (if we do not set aside these comparatively few stories of miraculous interpositions) — working according to what we all, and rightly call, a settled order of nature, and we observe Him constantly preferring an adherence to this order before a departure from it, even in circumstances in which (apart from experience) we would suppose that his goodness would lead Him to vary from that order. In particular, we find that the greatest part of mankind have been left wholly in past ages, and even at present, without the benefit of that revelation which you suppose Him to have made. Yet it would appear that the multitudes who are ignorant of it needed it, and indeed have deserved it, as much as those who have been made acquainted with it. And thus it appears that experience refutes the inference in favor of the likelihood of a revelation, which we might be apt to draw from the mere consideration of his goodness, taken by itself." It cannot be denied that there seems to be much real weight in some of these considerations. But there are some things which diminish that weight: 1. With respect to remote ages, known to us only by physical traces, and distant regions of the universe, we have no record or evidence of the moral government carried on therein. We do not know of any. And, if there be or was any, we have no evidence to determine whether it was or was not, is or is not, connected with a system of miracles. There is no reason to suppose that revelation was a necessary condition of such a system. Then we should have records or traces of such a system.

2. With respect to the non-interruption of the course of nature, in a vast number of cases, where goodness would seem to require such interruptions, it must be considered that the very vastness of the number of such occasions would make such interruptions so frequent as to destroy the whole schema of governing the universe by general laws altogether, and consequently also any scheme of attesting a revelation by miracles — i.e., facts varying from an established general law. This, therefore, is rather a presumption against God's interfering so often as to destroy the scheme of general laws, or make the sequences of things irregular and capricious, than against his interfering by miracles to attest a revelation, which, after that attestation, should be left to be propagated and maintained by ordinary means; and the very manner of the attestation of which (i.e. by miracles) implies that there is a regular and uniform course of nature, to which God is to be expected to adhere in all other cases. 3. It should be considered whether the just conclusion from the rest of the premises be (not so much this — that it is unlikely God would make a revelation — that it is) just that — that it is likely that, if God made a revelation, He would make it object to similar blemishes to those under which He bestows his other special favors upon mankind — i.e. bestow it first directly upon some small part of the race, and impose upon them the responsibility of communicating its benefits to the rest. It is thus that He acts with respect to superior strength and intelligence, and in regard to the blessings of civilization and scientific knowledge, of which the greater part of mankind have always been left destitute.

Indeed, if by "the course of nature" we mean the whole course and series of God's government of the universe carried on by fixed laws, we cannot at all determine beforehand that miracles (i.e. occasional deviations, under certain moral circumstances, from the mere physical series of causes and effects) are not a part of the course of nature in that sense: so that, for ought we know, beings with a larger experience than ours of the history of the universe, might be able confidently to predict, from that experience, the occurrence of such miracles in a world circumstanced like ours. In this point of view, as Bishop Butler has truly said, nothing less than knowledge of another world,
MIRACLES

placed in circumstances similar to our own, can
furnish an argument from analogy against the
certainty of certain facts or incredible appear-
ance.
And, again, for ought we know, personal inter-
course, or what Scripture seems to call "seeing
God face to face," may be to mysteries of being
the normal condition of God's intercourse with
his intelligent and moral creatures; and to them
the state of things in which we are, distant from
such direct perceptible intercourse, may be most
counter to their ordinary experience; so that that
is to us miraculous in the history of our race
may seem most accordant with the course of nature,
or their customary experience, and what is to us
most natural may appear to them most strange.

After all deductions and abatements have been
made, however, it must be allowed that a certain
antecedent improbability must always attach to
miracles, considered as events varying from the
ordinary experience of mankind as known to us;
because likelihood, evidential, or resemblance to
what we know to have occurred, is, by the con-
stitution of our minds, the very ground of proba-
bility; and, though we can perceive reasons, from
the moral character of God, for thinking it likely
that He may have wrought miracles, yet we know
too many exceptions, general or particular, and of
the best mode of accomplishing them, to argue confidently
from his character to his acts, except where the
connection between the character and the acts is
demonstrably indisensible — as in the case of acts
rendered necessary by the attributes of veracity
and justice. Miracles are, indeed, in the notion of
them, no breach of the high generalization that "a
similar antecedent has similar consequent:" nor,
necessarily, of the maxim that "God works
by general laws:" because we can see some laws
of miracles (as, e.g., that they are infrequent, and
that they are used as attesting signs of, or in con-
junction with, revelations, and may suppose more;
but they do vary, when taken apart from their
proper evidence, from this rule, that "what a
general experience would lead us to regard as simi-
lar antecedents are similar antecedents:" because
the only assignable specific difference observable by
us in the antecedents, in the case of miracles, and
in the case of the experiments from the analogy of
which they vary in their physical phenomena,
consists in the moral antecedents; and these, in
cases of physical phenomena, we generally throw
out of the account; nor have we grounds a priori
for concluding with Hume that these are not to
be thrown out of the account here also, although
we can see that the moral antecedents here (such as
the fitness for attesting a revelation like the Chris-
tian are, in many important respects, different from
those which the analogy of experience teaches us to
disregard in estimating the probability of physical
events.

But, in order to form a fair judgment, we must
take in all the circumstances of the case, and
amongst the rest, the testimony on which the mira-

cle is reported to us.

Our belief, indeed, in human testimony seems to
rest upon the same sort of instinct on which our
belief in the testimony (as it may be called) of
moral authority; and is to be checked, modified, and
confirmed by a process of experience similar to that
which is applied in the other case. As we learn,
by extended observation of nature and the com-
parison of analogies, to distinguish the real laws of
physical sequences from the casual conjunctions of
phenomena, so are we taught in the same manner
to distinguish the circumstances under which hu-
man testimony is given, or incredible appears or
suspects. The circumstances of our condition
force us daily to make continual observations upon
the phenomenon of human testimony; and it is a
matter upon which we can make such experiments
with peculiar advantage, because every man carries
within his own breast the whole sum of the ulti-
mate motives which can influence human testi-
mony. Hence arises the attitude of humor and

timy for overcoming, and more than overcoming,
almost any antecedent improbability in the thing
reported.

"The conviction produced by testimony," says
Bishop Young, "is capable of being carried much
higher than the conclusion produced by experience:
and the reason is this, because there may be con-
current testimonies to the truth of one individual
fact; whereas there can be no concurrent exper-
iments with regard to an individual experiment.
There may, indeed, be analogous experiments, in
the same manner as there may be analogous testi-
monies; but, in any course of nature, there is but
one continued series of events; whereas in testi-
mony, since the same event may be observed by
different witnesses, their concurrence is capable of
producing a conviction more cogent than any that
is derived from any other species of events in the
course of nature. In material phenomena the
probability of an expected event arises solely from
analogous experiments made previous to the event;
and this probability admits of indefinite increase
from the unlimited increase of the number of these
previous experiments. The credibility of a witness
likewise arises from our experience of the veracity
of previous witnesses in similar cases, and admits
of unlimited increase according to the number of
the previous witnesses. But there is another source
of the increase of testimony, likewise unlimited,
derived from the number of concurrent witnesses.
The evidence of testimony, therefore, admitting of
unlimited increase on two different accounts, and
the physical probability admitting only of one of
them, the former is capable of indefinitely sur-
passing the latter."

It is to be observed also that, in the case of the
Christian miracles, the truth of the facts, varying
as they do from our ordinary experience, is far more
credible than the falsehood of a testimony so cir-

cumstanced as that by which they are attested;
because of the former strange phenomena — the
miracles — a reasonable known cause may be as-
signed adequate to the effect — namely, the will of
God producing them to accredit a revelation that
seems not unworthy of Him; whereas of the latter
— the falsehood of such testimony — no adequate
cause whatever can be assigned, or reasonably con-
jec ted.

So manifest, indeed, is this inherent power of
testimony to overcome antecedent improbabilities,
that Hume is obliged to allow that testimony may
be so circumstanced as to require us to believe, in
some cases, the occurrence of things quite at vari-
ance with general experience; and he pretends to
show that testimony to such facts when connected
with religion can never be so circumstanced. The
reasons for this paradoxical exception are partly
general remarks upon the pronounce of men to
believe in portents and prodigies; upon the tempt-
ations to the indulgence of pride, vanity, ambition
and such like passions which the human mind
subject to in religious matters, and the strange mixture of enthusiasm and knavery, sincerity and craft, that is to be found in fanatics, and partly particular instances of confessedly false miracles that seem to be supported by an astonishing weight of human testimony, as men have derived from themselves. Yet we do find that, in the Jewish people, through no way distinguished above others by mental power or high civilization, and with as strong natural tendencies to idolatry as others, this knowledge and worship was kept up from a very early period of their history, and, according to their uniform historical tradition, kept up by revelation attested by undeniable miracles.

Again, the existence of the Christian religion, as the belief of the most considerable and intelligent part of the world, is an undisputed fact: and it is also certain that this religion originated (as far as human means are concerned) with a handful of Jewish peasants, who went about preaching — on the very spot where Jesus was crucified — that He had risen from the dead, and had been seen by, and had conversed with them, and afterwards ascended into heaven. This miracle, attested by them as eye witnesses, was the very ground and foundation of the religion which they preached, and it was plainly one so circumstanced that, if it had been false, it could easily have been proved to be false. Yet, though the preachers of it were everywhere persecuted, they had gathered, before they died, large churches in the country where the facts were best known, and through Asia Minor, Greece, Egypt, and Italy; and these churches, notwithstanding the severest persecutions, went on increasing till, in about 300 years after, this religion — i. e. a religion which taught the worship of a Jewish peasant who had been ignominiously executed as a malefactor — became the established religion of the human empire, and has ever since continued to be the prevailing religion of the civilized world.

It would plainly be impossible, in such an article as this, to enumerate all the various lines of confirmation — from the prophecies, from the morality, from the structure of the Bible, from the state of the world before and after Christ, etc. — which all converge to the same conclusion. But it will be manifest that almost all of them are drawn ultimately from that analogy of experience, and that the conclusion to which they tend cannot be rejected without holding something contrary to the analogies of experience from which they are drawn. For, it must be remembered, that disbelieving one thing necessarily involves believing its contrary.

It is manifest that, if the miraculous facts of Christianity did not really occur, the stories about them must have originated either in fraud, or in fancy. The course explanation of them by the hypothesis of unlimited fraud, has been generally abandoned in modern times: but, in Germany especially, many persons of great acuteness have long labored to account for them by referring them to fancy. Of these there have been two principal schools — the Naturalistic, and the Mythological.

1. The Naturalists suppose the miracles to have been natural events, more or less unusual, that were mistaken for miracles, through ignorance or enthusiastic excitement. But the result of their labors in detail has been (as Strauss has shown in his Leben Jesus) to turn the New Testament, as interpreted by them, into a narrative far less credible than any narrative of miracles could be: just as a
novel, made up of a multitude of surprising natural events crowded into a few days, is less consistent with its own data than a tale of genui and enchanters. "Some infidels," says Archbishop Whately, "have iderred to prove, concerning somone of our Lord's miracles that it might have been the result of an accidental conjuncture of natural circumstances; and their very language is, and so on; and then the reader that the explanation of the event, occurring in a series, might have been so. They might argue, in like manner, that, because it is not very improbable one may throw sixes in any one out of a hundred throws, therefore it is no more improbable that one may throw sixes a hundred times running." The truth is, that everything that is improvable in the mere physical strength of miracles applies to such a series of odd events as these explanations assume; while the hypothesis of their non-miraculous character deprives us of the means of accounting for them by the extraordinary interposition of the Deity. These and other objections to the foregoing application of the naturalistic method, led to the substitution in its place of 2. The Unnatural theory—which supposes the N. T. Scripture-narratives to have been legends, not stating the grounds of men's belief in Christianity, but springing out of that belief, and embodying the idea of what Jesus, if he were the Messiah, must have been conceived to have done in order to fulfill that character, and was therefore supposed to have done. But it is obvious that this leaves the origin of the belief, that a man who did not fulfill the idea of the Messiah in any one remarkable particular, was the Messiah—wholly unaccounted for. It begins with assuming that a person of mean condition, who was publicly executed as a malefactor, and who wrought no miracles, was so earnestly believed to be their Messiah by a great multitude of Jews, who expected a Messiah who were to work miracles, and was not to die, but to be a great conquering prince, that they modified their whole religion, in which they had been brought up, into accordance with that new belief, and imagined a whole code of legends to embody their idea, and brought the whole civilized world ultimately to accept their system. It is obvious, also, that all the arguments for the genuineness and authenticity of the writings of the N. T. bring them in when the miracles of Christ's real history was so recent, as to make the substitution of a set of mere legends in its place utterly incredible; and it is obvious, also, that the gravity, simplicity, historical disregard, and consistency with what we know of the circumstances of the times in which the events are said to have occurred, observable in the narratives of the N. T., make it impossible reasonably to accept them as mere myths. The same appears from a comparison of them with the style of writings really mythic—as the gospels of the infanry, of Nicodemus, etc.—and with heathen or Mohammedan legends; and from the omission of matters which a mythic fancy would certainly have fastened on. Thus, though John Baptist was typified by Elijah, the great wonder-worker of the Old Testament, there are no miracles ascribed to John Baptist. There are no miracles ascribed to Jesus during his infancy and youth. There is no description of his personal appearance; no account of his adventures in the world of spirits; no miracles ascribed to the Virgin Mary, and very little said about her at all; no account of the parasvom of any Apostle, but of one, not that given in the driest manner, etc. — and so in a hundred other particulars.

It is observable that, in the early ages, the fact that extraordinary miracles were wrought by Jesus and his Apostles, does not seem to have been generally denied by the opponents of Christianity. They seem always to have preferred adopting the expedient of ascribing them to art, magic, and the power of evil spirits. This we learn from the N. T. itself: from such Jewish writings as the Sophist Tbredik Jeshua; from the Fragments of Celsus, Porphyry, Hierocles, Julian, etc., which have come down to us, and from the popular objections which the ancient Christian Apologists felt themselves concerned to grapple with. We are not to suppose, however, that this would have been a solution which, even in those days, would have been naturally preferred to a denial of the facts, if the facts could have been plausibly denied. On the contrary, it was plainly, even then, a forced and improbable solution of such miracles. For man did not commonly ascribe to magic or evil demons an unlimited power, any more than we ascribe an unlimited power to mesmerism, imagination, the supernatural, and irregular forces of nature. We know that in two instances, in the Gospel narrative—the cure of the man born blind and the Resurrection—the Jewish priests were unable to pretend such a solution, and were driven to maintain unsuccessfully a charge of fraud; and the circumstances of the Christian miracles were, in almost all respects, so unlike those of any pretended instances ofimagical wonders, that the Apologists have little difficulty in retorting this plea. They do generally from the following considerations.

(1.) The greatness, number, completeness, and publicity of the miracles. (2.) The natural beneficid tendency of the doctrine they attested. (3.) The connection of them with a whole scheme of revelation extending from the first origin of the human race to the time of Christ.

It is also to be considered that the circumstances that the world was, in the times of the Apostles, full of Thaumaturgists, in the shape of exorcists, magicians, ghost-seers, etc., is a strong presumption that, in order to command any special attention and gain any large and permanent success, the Apostles and their followers must have exhibited works which had not been actuall to the miracles of which people had been accustomed to see. This presumption is confirmed by what we read, in the Acts of the Apostles, concerning the effect produced upon the Samaritans by Philip the Evangelist in opposition to the prestige of Simon Magnus.

This evasion of the force of the Christian miracles, by referring them to the power of evil spirits, has, so far as I can learn, been seriously tried in modern times; but the English infidels of the last century employed it as a kind of argument ad hominem, to tease and embarrass their opponents—contending that, as the Bible speaks of "king wonders" of Antichrist, and relates a long contest of apparent miracles between Moses and the Egyptian magicians, Christianity must not be different from any other systems in this respect; there must be a certainty that miracles were not wrought by evil spirits.

In answer to this, some divines (as Bishop Fleetwood, in his Dialogues on Miracles) have endeavored to establish a distinction in the nature of the works themselves, between the seeming miracles within the reach of intermediate spirits, and the true
miracles, which can only be wrought by God — and others (as Bekker, in his curious work Le Monde Echancré, and Farmer, in his Case of the Demons) have entirely denied the power of intermediate spirits to interfere with the course of nature. But, without entering into these questions, it is certain that the natural power of nature without miracle —

(1.) That the light of nature gives us no reason to believe that there are any evil spirits having power to interfere with the course of nature at all.

(2.) That it shows us that, if there be, they are continually controlled from exercising any such power.

(3.) That the records we are supposed to have of such an exercise in the Bible, show us the power there spoken of, as exerted completely under the control of God, and in such a manner as to make it evident to all candid observers where the advantage lay, and to secure all well-disposed and reasonable persons from any mistake in the matter.

(4.) That the circumstances alleged by the early Christian apologists — the number, greatness, beneficence, and variety of miracles in the Bible, and their connection with prophecy and a long scheme of things extending from the creation down — the character of Christ and his Apostles — and the manifest tendency of the Christian religion to serve the cause of truth and virtue — make it as incredible that the miracles attesting it should have been wrought by evil beings, as it is that the order of nature should proceed from such beings. For, as we gather the character of the Creator from his works, and the moral instincts which He has given us: so we gather the character of the author of revelation from his works, and from the drift and tendency of that revelation itself. This last point is sometimes shortly and unguardedly expressed by saying, that "the doctrine proves the miracles;" the meaning of which is not that the particular doctrines which miracles attest must first be proved to be true miracles, before we can believe that any such works were wrought — (which would, manifestly, be making the miracles no attestation at all) — but the meaning is that the whole body of doctrine in connection with which the miracles are alleged, and its tendency, if it were divinely revealed, to answer visible good ends, makes it reasonable to think that the miracles by which it is attested were, if they were wrought at all, wrought by God.

Particular theories as to the manner in which miracles have been wrought are matters rather curious than practically useful. In all such cases we must bear in mind the great maxim Sub jicitis nature longe; superat substantiam mentis humanae. Malignances regarded the Deity as the sole agent in nature, acting always by general laws; but he conceded those general laws to contain the original provision that the manner of the Divine acting should modify itself, under certain conditions, according to the particular volitions of finite intelligences. Hence, he explained man's apparent power over external nature; and hence he regarded miracles as the result of particular volitions of angels, or employed by his Deity in the government of the world. This was called the system of occasional causes.

The system of Clarke allowed a proper real, though limited, efficiency to the wills of inferior intelligences, but denied any true powers to matter. Hence he referred the phenomena of the course of external nature immediately to the will of God as their cause; making the distinction between natural events and miracles to consist in this, that the former happen according to what is, relatively to us, God's usual way of working, and the latter according to his unusual way of working.

Some find it easier to conceive of miracles as not really taking place in the external natural order, but in the impressions made by it upon our minds. Others deny that there is, in any miracle, the pro duction of anything new or the alteration of any natural power; and maintain that miracles are produced solely by the interposition of known natural powers already in existence.

It is plain that these various hypotheses are merely ways in which different minds find it more or less easy to conceive the mode in which miracles may have been wrought.

Another question more curious than practical, is that respecting the precise period when miracles ceased in the Christian Church. It is plain, that, whenever they ceased in point of fact, they ceased relatively to us wherever a sufficient attestation of them has not been given. It is quite clear, however, that this is an inconvenience attending probable evidence from its very nature. In rejecting the improbable testimony of the most mendacious of witnesses, we may, almost always, be rejecting something which is really true. But this would be a poor reason for acting on the testimony of a notorious liar to a story antecedently improbable. The narrowness and imperfection of the human mind is such that our wisest and most prudent calculations are continually baffled by unexpected combinations of circumstances, upon which we could not have reasonably reckoned. But this is no good ground for not acting upon the calculations of wisdom and prudence; because, after all, such calculations are in the long run our surest guides.

It is quite true, also, that several of the Scripture miracles are so circumstanced, that if the reports we have of them stood alone, and came down to us only by the channel of ordinary history, we should be without adequate evidence of their miraculous character; and therefore those particular miracles are not to us (though they doubtless were to the original spectators, who could mark all the circumstances), by themselves and taken alone, signa— or proper evidences of revelation. But, then, they may be very proper objects of faith, though not the grounds of it. For (1.) these incidents are really reported to us as parts of a course of things which we have good evidence for believing to have been miraculous; and, as Bishop Butler justly observes— "supposing it acknowledged, that our Saviour spent some years in a course of working miracles, there is no more evidence of revelation worth mentioning, against his having exerted his miraculous powers in a certain degree greater, than in a certain degree less; in one or two more instances, than in one or two fewer: in this, than in another manner." And (2.) these incidents are reported to us by writers whom we have good reasons for believing to have been, not ordinary historians, but persons specially assisted by the Divine Spirit, for the purpose —

"1953"
MIRACLES

giving a correct account of the ministry of our Lord and his Apostles.

In the case of the Scripture miracles, we must be careful to distinguish the particular occasions upon which they were wrought, from their general purpose and design; yet not so as to overlook the connection between these two things.

There are but few miracles recorded in Scripture of which the whole character was merely evidential—such is that, that were merely displays of a supernatural power made for the sole purpose of attesting a Divine Revelation. Of this character were the change of Moses' rod into a serpent at the burning bush, the burning bush itself, the going down of the shadow upon the sun-dial of Ahaz, and some others.

In general, however, the miracles recorded in Scripture have, besides the ultimate purpose of affording evidence of a Divine interposition, some immediate temporary purposes which they were apparently wrought to serve—such as the curing of diseases, the feeding of the hungry, the relief of innocent, or the punishment of guilty persons. These immediate temporary ends are not without value in reference to the ultimate and general design of miracles, as providing evidence of the truth of revelation; because they give a moral character to the works wrought, which enables them to display not only the power, but the other attributes of the agent performing them. And, in some cases, it would appear that miraculous works of a particular kind were selected as emblematic or typical of some characteristic of the revelation which they were intended to attest. Thus, e. g., the cure of bodily diseases not only indicated the general benevolence of the Divine Agent, but seems sometimes to be referred to as an emblem of Christ's power to remove the disorders of the soul. The gift of tongues appears to have been intended to manifest the universality of the Christian dispensation, by which all languages were consecrated to the worship of God. The casting out of demons was a type and pledge of the presence of a Power that was ready to destroy the works of the devil, in every sense.

In this point of view, Christian miracles may be fitly regarded as specimens of a Divine Power, alleged to be present—specimens so circumstanced as to make obvious, and bring under the notice of every one, the operations of a Power— the gift of the Holy Ghost—which was really supernatural, but did not, in its moral effects, reveal itself externally as supernatural. In this sense, they seem to be called the manifestation or exhibition of the Spirit—outward phenomena which manifested sensibly his presence and operation in the Church; and the record of these miracles either for vindicating the invincibility of the power of Christ in his Church, and of his government of it through all ages; though that presence is of such a nature as not to be immediately distinguishable from the operation of known moral motives, and that government is carried on so as not to interrupt the ordinary course of things.

In the case of the Old Testament miracles, again, in order fully to understand their evidential character, we must consider the general nature and design of the dispensation with which they were connected. The general design of that dispensation appears to have been to keep up in one particular race a knowledge of the one true God, and of the promise of a Messiah whom all the families of the earth "should be blessed." And in order to this end, it appears to have been necessary that, for some time, God should have assumed the character of the local Tertullian Deity and Prince of that particular people. And from this peculiar relation in which He stood to the Jewish people (aptly called by Josephus a THEOCRACY) resulted the necessity of frequent miracles, to manifest and make sensibly perceptible his actual presence among and government over them. The miracles, therefore, of the Old Testament are to be regarded as evidential of the theocratic government; and this again is to be conceived of as subordinate to the further purpose of preparing the way for Christianity, by keeping up in the world a knowledge of the true God and of his promise of a Redeemer. In this view, we can readily understand why the miraculous administration of the theocracy was withdrawn, as soon as the purpose of it had been answered by working deeply and permanently into the mind of the Jewish people the two great lessons which it was intended to teach them; so that they might be safely left to the ordinary means of instruction, until the publication of a fresh revelation by Christ and his Apostles rendered further miracles necessary to attest their mission. Upon this view also we can perceive that the miracles of the Old Testament, upon whatever immediate occasions they may have been wrought, were subordinate (and, in general, necessary) to the design of rendering possible the establishment in due time of such a religion as the Christian; and we can perceive further that, though the Jewish theocracy implied in it a continual series of miracles, yet—as it was only temporary and local—those miracles did not violate God's general purpose of carrying on the government of the world by the ordinary laws of nature: whereas if the Christian dispensation—which is permanent and universal—necessarily implied in it a series of constant miracles, that would be inconsistent with the general purpose of carrying on the government of the world by these ordinary laws.

With respect to the character of the Old Testament miracles, we must also remember that the whole structure of the Jewish economy had reference to the peculiar exigency of the circumstances of a people imperfectly civilized, and is so distinctly described in the New Testament, as dealing with men according to the hardness of their hearts, and the working of a Spirit of weakness, and meanness, and the introduction of "children," who were in the condition of "slaves." We are not, therefore, to judge of the probability of the miracles wrought in support of that economy (so far as the forms under which they were wrought are concerned) as if those miracles were immediately intended for ourselves. We are not justified in arguing against the reality of those miracles, either because the miracles wrought in such a manner as that, if addressed to us, they would lower our conceptions of the Divine Being; or, on the other hand, because these miracles—wrought under the circumstances of the Jewish economy—are credible and ought to be believed, there is therefore no reason for objecting against stories of similar miracles alleged to have been wrought under the quite different circumstances of the Christian dispensation.

In dealing with human testimony, it may be further needful to notice (though very briefly) some refined subtleties that have been occasionally introduced into this discussion.
It has been sometimes alleged that the freedom of the human will is a circumstance which renders reliance upon the stability of laws in the case of human conduct utterly precarious. In arguing —

It is said, "that human beings cannot be supposed to have acted on a principle which would involve a violation of the analogy of human conduct, so far as it has been observed in all ages, we tacitly assume that the human mind is unalterably determined by fixed laws, in the same way as material substances. But this is not the case on the hypothesis of the freedom of the will. The very notion of a free will is that of a faculty which determines itself; and which is capable of choosing a line of conduct quite repugnant to the influence of any motive, however strong. There is therefore no reason for expecting that the operations of human volition will be conformable throughout to any fixed rule or analogy whatever."

In reply to this far-sought and barren refinement, we may observe — 1. That, if it be worth anything, it is an objection not merely against the force of human testimony in religious matters, but against human testimony in general, and, indeed, against all calculations of probability in respect of human conduct whatsoever. 2. That we have already shown that, even in respect of material phenomena, our practical measure of probability is not derived from any scientific axioms about cause and effect, or under any analogies existing therein, but simply from the likeness or unlikeness of one thing to another; and therefore, not being derived from premises which assume consentability, cannot be shaken by the denial of causality in a particular case. 3. That the thing to be accounted for, on the supposition of the falsity of the testimony for Christian miracles, is not accounted for by any such capricious principle as the arbitrary freedom of the human will; because the thing to be accounted for is the agreement of a number of witnesses in a falsehood, for the propagation of which they could have no intelligible inducement. Now, if we suppose a number of independent witnesses to have determined themselves by rational motives, then, under the circumstances of this particular instance, their agreement in a true story is sufficiently accounted for. But, if we suppose them to have each determined themselves by mere whim and caprice, then their agreement in the same false story is not accounted for at all. The concurrence of such a number of chances is utterly incredible. 4. And finally we remark that no sober maintainers of the freedom of the human will claim for it any such unlimited power of self-determination as this objection supposes. The freedom of the human will exhibits itself either in cases where there is no motive for selecting one rather than another among many possible courses of action that lie before us — in which cases it is to be observed that there is nothing moral in its elections whatsoever; — or in cases in which there is a conflict of motives, and, e. g., passion and appetite, or custom or temporal interest, draw us one way, and reason or conscience another. In these latter cases the maintainers of the freedom of the will contend that, under certain limits, we can determine ourselves (not by no motive at all, but) by either of the motives actually operating upon our minds. Now it is manifest that if, in the case of the witnesses to Christianity, we can show that they was a case of a conflict of motives (as it clearly was), and can show, further, that their conduct is inconsistent with one set of motives, the reasonable inference is that they determined themselves, in point of fact, by the other. Thus, though in the case of a man strongly tried by a conflict of motives, we might not, even with the fullest knowledge of the character and circumstances, have been able to predict beforehand how he would act, that would be no reason for denying that, after we had come to know how he did act, we could tell by what motives he had determined himself in choosing that particular line of conduct.

It has been often made a topic of complaint against Hume that, in dealing with testimony as a medium for proving miracles, he has resolved the force entirely out of our experience of its veracity, and omitted to notice that, antecedently to all experience, we are predisposed to give it credit by a kind of natural instinct. But, however metaphysically erroneous Hume's analysis of our belief in testimony may have been, it is doubtful whether, in this particular question, such a mistake is of any great practical importance. Our original predisposition is doubtless (whether insinuato or not) a predisposition to believe all testimony indiscriminately: but this is so completely checked, modified, and controlled, in after-life, by experience of the circumstances under which testimony can be safely relied upon, and of those in which it is apt to mislead us, that, practically, our experience in these respects may be taken as a not unfair measure of the ultimate efficacy of those evidences. We know from observed that, while Hume has omitted this original instinct of belief in testimony, as an element in his calculations, he has also omitted to take into account, on the other side, any original insinuato belief in the constancy of the laws of nature, or expectation that our future experiences will resemble our past ones. In reality, he seems to have resolved both these principles into the mere association of ideas. And, however theoretically erroneous he may have been in this, still it seems manifest that, by making the same mistake on both sides, he has made one error compensate another; and so — as far as this branch of the argument is concerned — brought out a practically correct result. As we can only learn by various and repeated experience, what we may expect in future, we can only trust our expectation of the recurrence of apparently similar phenomena, that expectation, being thus continually checked and controlled, modifies itself into accordance with its rule, and ceases at all where it would be manifestly at variance with its director. And the same would seem to be the case with our belief in testimony.

The argument, indeed, in Hume's celebrated Essay on Miracles, was very far from being a new one. It had, as Mr. Coleridge has pointed out, been distinctly indicated by South in his sermon on the incredulity of St. Thomas; and there is a remarkable statement of much the same argument put into the mouth of Woolston's Advocate, in Sherlock's Trial of the Witnesses. The restatement of it, however, by a person of Hume's abilities, was of service in putting upon a more accurate examination of the true nature and measure of probability; and it cannot be denied that Hume's bold statement of his unbounded skepticism had, as he contended it would have, many useful results in stimulating inquiries that might not otherwise have been suggested to thoughtful men, or, at least, not prosecuted with sufficient zeal and patience.

Bishop Butler seems to have been very sensible of the imperil it state, in his own time, of the for-
of Probability; and, though he appears to have formed a more accurate conception of it than the Scotch school of Philosophers who succeeded and undertook to refute Hume, yet there is one passage in which we may perhaps detect a misapprehension of the subject in pages of even this great writer.

"There is," he observes, "a very strong presumption against common speculative truths; and in the most ordinary facts, beyond the proof of them, which yet is overcome by almost any proof. There is a presumption of millions to one against the story of Caesar or any other one. For, suppose a number of common facts so and so circumstanced, of which one had no kind of proof, should happen to come into one's thoughts; every one would, without any possible doubt, conclude them to be false. And the like may be said of a single common fact. And from hence it appears that the question of importance, as to the matter before us, is, concerning the degree of the peculiar presumption against miracles; not, whether there be any peculiar presumption at all against them. For if there be a presumption of millions to one against the most common facts, what can a small presumption, additional to this, amount to, though it be peculiar? It cannot be estimated, and is as nothing." (Analog, part 2, c. i.)

It is plain that, in this passage, Butler lays no stress upon the peculiarities of the story of Caesar, which he casually mentions. For he expressly adds "or of any other man;" and repeatedly explains that what he says applies equally to any ordinary facts, or to a single fact; so that, whatever be his drift (and it must be acknowledged to be somewhat obscure), he is not constructing an argument similar to that which has been pressed by Archbishop Whately, in his Historic Doubts respecting Napoleon Bonaparte.

And this becomes still more evident, when we consider the extraordinary medium by which he endeavors to show that there is a presumption of millions to one against such "common ordinary facts" as he is speaking of. For the way in which he proposes to estimate the presumption against ordinary facts is, by considering the likelihood of their being anticipated beforehand by a person guessing at random. But, surely, this is not a measure of the likelihood of the facts considered in themselves, but of the likelihood of the guesses with which an arbitrate mind, considering the doctrine of chances given, and the probability of such an event considered by itself.

But it should be observed that what we commonly call the chances against an ordinary event are not specific, but particular. They are chances against this event, not against this kind of event. The chances, in the case of a die, are the chances against a particular face; not against the coming up of some face. The coming up of some face is not a thing subject to random anticipation, and, therefore, we say that there are no chances against it at all. But, as the presumption that some face will come up is a specific presumption, quite different from the presumption against any particular face; so the presumption against no face coming up (which is really the same thing, and equivalent to the presumption against all the faces put together, considered merely in its physical strangeness) must be specific also, and different from the presumption against any particular form of such a miracle selected beforehand by an arbitrary anticipation. For miraculous facts, it is evident, are subject to the doctrine of chances, each in particular, in the same way as ordinary facts. Thus, e. g., supposing a miracle to be wrought, the cube might be changed into any geometrical figure; and we can see no reason for selecting one rather than another, or the substance might be changed from ivory to metal, and then one metal would be as likely as another. But no one, probably, would say that he would believe the specific fact of such a miracle upon the same proof, or anything like the same proof, as he would believe the specific fact of such a miracle upon the same proof, or anything like the same proof, as he would believe the report of any particular form of it — such form being just as likely beforehand as any other.

Indeed, if "almost any proof" were capable of overruling presumptions of millions to one against a fact, it is hard to see how we could reasonably
MIRACLES

reject any report of anything, on the ground of antecedent presumptions against its credibility.

The Ecclesiastical Miracles are not delivered to us by inspired historians: nor do they seem to form any part of the same series of events as the miracles of the New Testament.

The miracles of the New Testament (setting aside those wrought by Christ Himself) appear to have been conceded by a power transferred to particular persons according to a regular law, in virtue of which that power was ordinarily transmitted from one person to another, and the only persons privileged thus to transmit that power were the Apostles. The only exceptions to this rule were, (1) the Apostles themselves, and (2) the family of Cornelius, who were the first fruits of the Gentiles. In all other cases, miraculous gifts were conferred only by the laying on of the Apostles' hands. By this arrangement, it is evident that a provision was made for the total ceasing of that miraculous dispensation within a limited period: because, on the death of the last of the Apostles, the ordinary channels would be all stopped through which such gifts were transmitted in the Church.

Thus, John the Evangelist, who in the Acts of Philip is described as working many miracles among the Samaritans, he does not seem to have ever thought of imparting the same power to any of his converts. That is reserved for the Apostles Peter and John, who confer the miraculous gifts by the imposition of their hands: and this power, of imparting miraculous gifts to others, is clearly recognized by Simon Magus as a distinct privilege belonging to the Apostles, and quite beyond anything that He had seen exercised before. "When Simon saw that through laying on of the Apostles' hands the Holy Ghost was given, he offered them money, saying, Give me also this power, that on whosoever I lay hands, he may receive the Holy Ghost." This separation of the Rite by which miraculous gifts were conferred from Baptism, by which members were admitted into the Church, seems to have been wisely ordained for the purpose of keeping the two ideas, of ordinary and extraordinary gifts, distinct, and providing for the approaching cessation of the former without shaking the stability of an institution which was designed to be a permanent Sacrament in the kingdom of Christ. And it may also be observed in passing, that this same separation of the effects of these two Rites, affords a presumption that the miraculous gifts, bestowed, as far as we can see, only in the former, were not merely the result of highly raised enthusiasm; because experience shows that violent symptoms of enthusiastic transport would have been much more likely to have shown themselves in the first andor of conversion than at a later period — in the very crisis of a change, than after that change had been confirmed and settled.

One passage has, indeed, been appealed to as seeming to indicate the permanent residence of miraculous powers in the Christian Church through all ages, Mark xvi. 17, 18. But —

(1.) That passage itself is of doubtful authority, since we know that it was omitted in most of the Greek MSS, which Eusebius was able to examine in the 4th century yet it is still wanting in some of the most important that remain to us.

(2.) It does not necessarily imply more than a promise that such miraculous powers should exhibit themselves among the immediate converts of the Apostles.

"And (3) this latter interpretation is supported by what follows — "And they went forth, and preached everywhere, the Lord working with them, and confirming the word with the accompanying signs."

It is, indeed, confessed by the latest and ablest defenders of the ecclesiastical miracles that the great mass of them were essentially a mere dispensation: but it is contended, that by those who believe in the Scripture miracles no strong antecedent improbability against such a dispensation can be reasonably entertained; because, for them, the Scripture miracles have already "borne the brunt" of the infidel objection, and "broken the ice."

But this is wholly to mistake the matter.

If the only objection antecedently to proof against the ecclesiastical miracles were a presumption of their impossibility or incredibility — simply as miracles, this allegation might be pertinent; because he that admits that a miracle has taken place, cannot consistently hold that a miracle as such is impossible or incredible. But the antecedent presumption against the ecclesiastical miracles rises upon four distinct grounds, none of which can be properly called a ground of infidel objection.

(1.) It arises from the very nature of probability, and the constitution of the human mind, which compels us to take the analogy of general experience as a measure of likelihood. And this presumption it is manifest is neither religious nor irreligious, but antecedent to, and involved in, all probable reasoning.

A miracle may be said to take place when, under certain moral circumstances, a physical consequent follows upon an antecedent which general experience shows to have no natural aptitude for producing such a consequent; or, when a consequent fails to follow upon an antecedent which is always attended by that consequent in the ordinary course of nature. A blind man recovering sight upon his touching the bones of SS. Gerasimus and Protasius, is an instance of the former. St. Alban, walking after his head was cut off, and carrying it in his hand, may be given as an example of the latter kind of miracle. Now, though such occurrences cannot be called impossible, because they involve no self-contradiction in the notion of them, and we know that there is a power in existence quite adequate to produce them, yet the point is, whether such antecedent is antecedently improbable, unless we can see reasons for expecting that that power will produce them. The invincible original instinct of our nature — without reliance on which we could not set one foot before another — teaches as its first lesson to expect similar consequents upon what seem similar physical antecedents; and the results of this instinctive belief, checked, modified, and confirmed by the experience of mankind in countless times, places, and circumstances, constitutes what is called our knowledge of the laws of nature. Destroy, or even shake, this knowledge, as applied to practice in ordinary life, and all the uses and purposes of life are at an end. If the real sequences of things were liable, like those in a dream, to random and capricious variations, on which no one could calculate beforehand, there would be no measure of probability or improbability. If e. g. it were a measuring case whether, upon immersing a lighted candle in water, the candle should be extinguished, or the water ignited, — or, whether inhaling the common air should support life or produce death —
MIRACLES

It is plain that the whole course of the world would be brought to a standstill. There would be no order of nature at all; and all the rules that are built on the stability of that order, and all the conclusions that are derived from them, would be worth nothing. We should be living in fairy-land, not on earth.

(2.) This general antecedent presumption against miracles, as varying from the analogy of general experience, is (as we have said) neither religious nor irreligious—neither rational nor irrational—but springs from the very nature of probability; and cannot be denied without shaking the basis of all probable evidence whether for or against religion.

Nor does the admission of the existence of the Deity, or the admission of the actual occurrence of the Christian miracles, tend to remove this antecedent improbability against miracles circumstances as the ecclesiastical miracles generally are.

If, indeed, the only presumption against miracles were one against their possibility—this might be truly described as an atheistic presumption; and then the proof, from natural reason, of the existence of a God, or the proof of the actual occurrence of any one miracle would wholly remove that presumption; and, upon the removal of that presumption, there would remain none at all against miracles, however frequent or however strange; and miraculous occurrences would be as easily proved, and also as likely by hand, as the most ordinary events; so that there would be no improbability of a miracle being wrought at any moment, or upon any conceivable occasion; and the slightest testimony would suffice to establish the truth of any story, however widely at variance with the analogy of ordinary experience.

But the true presumption against miracles is not against their possibility, but their probability. And this presumption cannot be wholly removed by showing an adequate cause; unless we hold that all presumptions drawn from the analogy of experience or the assumed stability of the order of nature are removed by showing the existence of a cause capable of changing the order of nature—i.e., unless we hold that the admission of God's existence involves the destruction of all measures of probability drawn from the analogy of experience. The ordinary sequences of nature are, doubtless, the result of the Divine will. But to suppose the Divine will to vary its mode of operation in conjunctions upon which it would be impossible to calculate, and under circumstances apparently similar to those which are perpetually recurring, would be to suppose that the course of things is as inconstant and capricious as if it were governed by mere chance.

Nor can the admission that God has actually wrought such miracles as attest the Christian religion, remove the general presumption against miracles as improbable occurrences. The evidence on which revolution stands has proved that the Almighty has, under special circumstances and for special ends, exerted his power of changing the ordinary course of nature. This may be fairly relied on as mitigating the presumption against miracles under the same circumstances as those which it has established; but miracles which cannot avail themselves of the benefit of that law (as it may be called) are miracles, which, such conditions indicate, are plainly in all the antecedent difficulties which attach to miracles in general, as varying from the law of nature, besides the special difficulties which belong to them as varying from the law of miracles, so far as we know anything of that law.

And it is vain to allege that God may have other causes for miracles, and for which the Scripture miracles were wrought.

Such a plea can be of no weight, unless we can change at pleasure the "way" into a "must" or "has." Until the design appear, we cannot use it as an element of probability; but we must, in the mean while, determine the question by the ordinary rules which regulate the proof of facts. A mere "may" is rendered by a "must," and "may" cannot be rendered by a "must." It cannot surely be meant that miracles have, by the proof of a revelation, ceased to be miracles—i.e., rare and wonderful occurrences—so as to make the chances equal of a miracle and an ordinary event. And if this be not held, then it must be admitted that the laws which regulate miracles are, in some way or other, laws which render them essentially strange or unusual events, and insure the general stability of the course of nature. Whatever other elements enter into the law of miracles, a necessary infrequency is one of them: and until we can see some of the positive elements of the law of miracles in operation (i.e., some of the elements which do not check, but require miracles) this negative element, which we do see, must act strongly against the probability of their occurrence.

It is indeed quite true that Christianity has revealed to us the permanent operation of a supernatural order of things actually going on around us. But there is nothing in the notion of such a supernatural system as the Christian dispensation is, to lead us to expect continual interferences with the common course of nature. Not the necessity of proving its supernatural character: for (1.) that has been sufficiently proved once for all, and the proof sufficiently attested to us, and (2.) it is not pretended that the mass of legendary miracles are, in this sense, evidential. Nor are such continual miracles involved in it by express promise, or by the very frame of its constitution. For they manifestly are not. "So is the kingdom of God, as if a man should cast seed into the ground, and should sleep and rise up no knoweth how, etc.—the parable manifestly indicating that the ordinary visible course of things is only interfered with by the Divine husbandman, in planting and reaping the great harvest. Nor do the answers given to prayer, or the influence of the Holy Spirit on our minds, interfere ridiculously with any one law of outward nature, or of the inward economy of our mental frame. The system of grace is, indeed, supernatural, but, in no sense and in no case, pre-structured. It disturbs in no way the regular sequences which all men's experience teaches them to anticipate as not improbable.

(3.) It is acknowledged by the ablest defenders of the ecclesiastical miracles that, for the most part, they belong to those classes of miracles which are described as ambiguous and tềture—i.e., they are cases in which the effect (if it occurred at all) may have been the result of natural causes, and where, upon the application of the same means, the desired effect was only sometimes produced. These characters are always highly suspicious marks. And though it is quite true that miracles has been remarked already—that real miracles, and such as were clearly discernible as such to the original spectators, may be so imperfectly reported to us as to wear an
AMBIGUOUS APPEARANCE — IT STILL REMAINS A VIOLATION OF ALL THE LAWS OF EVIDENCE TO ADMIT A NARRATIVE WHICH LEAVES A MIRACLE AMBIGUOUS AS THE GROUND OF OUR BELIEF THAT A MIRACLE HAS RECENTLY BEEN WROUGHT. IF AN INSPIRED AUTHOR DECLARES A PARTICULAR EFFECT TO HAVE BEEN WROUGHT BY THE IMMEDIATE INTERPOSITION OF GOD, WE THEN ADMIT THE MIRACULOUS NATURE OF THAT EVENT ON HIS AUTHORITY, THOUGH HIS DESCRIPTION OF ITS OUTER FEATURES MAY NOT BE FALSE ENOUGH TO ENABLE US TO FORM SUCH A JUDGMENT OF IT FROM THE REPORT OF THOSE CIRCUMSTANCES ALONE: OR IF, AMONGST A SERIES OF INDELIBRABLE MIRACLES, SOME ARE BUT BASTILY AND LOOSELY REPORTED TO US, WE MAY SAFELY ADMIT THEM AS A PART OF THAT SERIES, THOUGH IF WE MET THEM IN ANY OTHER CONNECTION WE SHOULD VIEW THEM IN A DIFFERENT LIGHT. THEREFORE, IT BEING NOT WHAT I HAVE SAID THAT IS THE BEGINNING OF THE NATURE OF A PARTICULAR DISORDER, WELL KNOWN TO HIM, AND THE DIAGNOSIS OF WHICH WAS IMPOSSIBLE FOR HIM TO BE MISTAKEN, WE MAY SAFELEY TAKE HIS WORD FOR THAT, EVEN THOUGH HE MAY HAVE MENTIONED ONLY A FEW OF THE SYMPTOMS WHICH MARKED A PARTICULAR CASE: OR, IF WE KNEW THAT THE PLAGUE WAS RAGING AT A PARTICULAR SPOT AND TIME, IT WOULD REQUIRE MUCH LESS EVIDENCE TO CONVINCE US THAT A PARTICULAR PERSON HAD BEEN AFFECTED BY THAT DISEASE AND THEN, THAN IF HIS DEATH WAS ATTRIBUTED TO THAT DISEASE IN A PLACE WHICH THE MIRACLE HAD NEVER VISITED CENTURIES BEFORE AND AFTER THE ALLEGED OCCURRENCE OF HIS CASE.

(4) THOUGH IT IS NOT TRUE THAT THE SCRIPTURAL MIRACLES HAVE SO "BORN THE BRUNT" OF THE A PRIORI OBJECTION TO MIRACLES AS TO REMOVE ALL PECULIAR PREJUDICE AGAINST THEM AS IMPOSSIBLE EVENTS, THERE IS A SENSE IN WHICH THEY MAY BE TRULY SAID TO HAVE prepAred THE WAY FOR THOSE OF THE ECCLESIASTICAL LEGENDS. BUT IT IS ONE WHICH AGGRAVATES, INSTEAD OF EXUXTENDING, THEIR IMPOSSIBILITY. THE NARRATIVES OF THE SCRIPTURAL MIRACLES MAY VERY PROBABLE HAVE TENDED TO RAISE AN EXPECTATION OF MIRACLES IN THE MINDS OF WEAk AND CREDOUSE PERSONS, AND TO ENCOURAGE DESIGNING MEN TO ATTEMPT AN IMITATION OF THEM. AND THIS SUSPICION IS CONFIRMED WHEN WE OBSERVE THAT IT IS PRECISELY THOSE INSTANCES OF SCRIPTURAL MIRACLES WHICH ARE MOST EASILY IMITABLE BY FRAUD, OR THOSE WHICH ARE MOST APT TO STRIKE A WILD AND MYTHICAL FANCY, WHICH SEEM TO BE THE TYPES WHICH — WITH EXTRAVAGANT EXAGGERATION AND DISTORTION — ARE PRINCIPALLY COPIED IN THE ECCLESIASTICAL MIRACLES. IN THIS SENSE IT MAY BE SAID THAT THE SCRIPTURAL NARRATIVES "BROKE THE ICE," AND PREPARED THE WAY FOR A WHOLE SUCCESSION OF LEGENDS: JUST AS ANY GREAT AND STRIKING CHARACTER IS FOLLOWED BY A HOST OF IMITATORS, WHO ENDEAVOR TO REPRODUCE HIM, NOT BY COPYING WHAT IS ESSENTIALLY TO HIS GREATNESS, BUT BY EXAGGERATING AND DISTORTING SOME MINOR PARTICULARITIES IN WHICH HIS GREAT QUALITIES MAY SOMETIMES HAVE BEEN EXHIBITED.

BUT — APART FROM ANY LEADING PREPARATION WHICH MIGHT OTHERWISE OCCUR FROM THE IMPROBABILITY OF SUCH EVENTS, AND THE TENDENCY OF MAN TO INCORPORATE AND ENTHUSIASM OF MANKIND HAVE IN ALMOST EVERY AGE AND COUNTRY PRODUCED SUCH A NUMEROUS SPAWN OF GOURIOUS PRODIGIES, AS TO MAKE FALSE STORIES OF MIRACLES, UNDER CERTAIN CIRCUMSTANCES, A THING TO BE NATURALLY EXPECTED. HENCE, UNLESS IT CAN BE DISTINCTLY SHOWN, FROM THE NATURE OF THE CASE, THAT "NARRATIVES OF MIRACLES ARE NOT ATTRIBUTABLE TO SUCH PARTICULAR PERSONS, AS TO BE THE OFFSPRING OF SUCH A PARENTAGE — THE REASONABLE RULES OF EVIDENCE REQUIRE THAT WE SHOULD REFER THEM TO THEIR USUAL AND BEST KNOWN CAUSES.

NOR CAN THERE BE, AS SOME WEAK PERSONS ARE ABLE TO IMAGINE, ANY IMPIETY IN SUCH A COURSE. ON THE CONTRARY, TRUE PIETY, OR RELIGIOUS REVERENCE OF GOD, REQUIRES US TO SUSPEND WITH SCRUPULOUS CARE FROM ATTRIBUTING TO HIM ANY WORKS WHICH WE HAVE NOT GOOD REASON FOR BELIEVING HIM TO HAVE WROUGHT. IT IS NOT PIETY, BUT PROFANE AUDACITY, WHICH VENTURES TO REFER TO GOD THAT WHICH, ACCORDING TO THE BEST RULES OF PROBABILITY WHICH HE HAS HIMSELF ESTABLISHED, IS MOST LIKELY TO HAVE BEEN THE PRODUCT OF HUMAN IGNORANCE, OR FRAUD, OR FALLACY.

ON THE WHOLE, THEREFORE, WE MAY CONCLUDE THAT THE MASS OF THE ECCLESIASTICAL MIRACLES DO NOT FORM ANY PART OF THE SAME SERIES AS THOSE RELATED IN SCRIPTURE, WHICH LATTER ARE, THEREFORE, UNAFFECTED BY ANY DECISION WHICH WE MAY COME TO WITH RESPECT TO THE FORMER: AND THAT, IF THEY ARE PRESSURIZED BY THE WEIGHT OF THREE DISTINCT PRESUMPTIONS AGAINST THEM — BEING IMPROBABLE (1) AS VARYING FROM THE ANALOGY OF NATURE; (2) AS VARYING FROM THE ANALOGY OF THE SCRIPTURAL-MIRACLES; (3) AS RESEMBLING THOSE LEGENDARY STORIES WHICH ARE THE KNOWN PRODUCT OF THE CREDULITY OR IMPOSTURE OF MANKIND.

THE CONTROVERSY RESPECTING THE POSSIBILITY OF MIRACLES IS AS OLD AS PHILOSOPHIC LITERATURE. THERE IS A VIEW OF THE NATURE OF ITS DIFFERENT STAGES, WHICH IS VARYING AS TO THE EVIDENCE OF IT, AND THE AUTHORITIES IN THE WHOLE WORLD, GIVEN BY CLERICO IN HIS BOOKS DE DISTINCTIONE.

A FULL ACCOUNT OF THE CONTROVERSY IN ENGLAND WITH THE DOITS, DURING THE LAST CENTURY, WILL BE FOUND IN LELAND'S VIEW OF THE DEISTICAL WRITERS, REPRINTED AT LONDON, 1836.

THE DELAY WAS RESUMED, ABOUT THE MIDDLE OF THAT CENTURY, BY THE PUBLICATION OF HUME'S CELEBRATED ESSAY — THE CHIEF REFUTES WHICH ARE: PRINCIPAL CAMPBELL'S DISSERTATION ON MIRACLES; HEY'S NORVIAN LECTURES, VOL. I. P. 127—200: R. ELDINGTON'S DONELAN LECTURES, DUBLIN, 1796; DR. THOMAS BROWN, ON CAUSE AND EFFECT; PALLY'S EVIDENCES (INTRODUCTION); ARCHB. WHATELY, LOGIC APPENDIX; AND HIS HISTORIC DOUBTS RESPECTING VINDICATED BY WINTHROP (THE ARGUMENT OF WHICH THE WRITER OF THIS ARTICLE HAS attempted to HELP THE OBJECTIONS OF STRASS IN HISTORIC CERTAINTIES, OR THE CHRONICLES OF ESSAY), PARKER, LONDON, 1802). SEE ALSO AN INTERESTING WORK BY THE LATE DEAN LYLÁ, PROPHETIC PREHISTORIES, REPRINTED 1854, RIVINGTON, LONDON. COMPARE ALSO B. DOUGLAS, CRITICISM, OR MIRACLES EXAMINED, ETC., LONDON, 1754.

WITHIN THE LAST FEW YEARS THE CONTROVERSY HAS BEEN REOPENED BY THE LATE PROFESSOR HENRY POWELL IN THE UNITY OF WORLDS, AND SOME REMARKS ON THE STUDY OF EVIDENCES PUBLISHED IN THE NOW CELEBRATED VOLUME OF ESSAYS AND REVIEWS. IT WOULD BE PRE
MIRACLES

nature, at present, to give a list of the replies to so recent a work.

The history of the ecclesiastical miracles was slightly touched by Spencer in his notes on Origen against Celsus, and more fully by Le Moine; but did not attract general attention till Middleton published his famous Free Inquiry, 1748. Several replies were written by Bodwell (junior), Chapman, Church, etc., which do not seem to have attracted much permanent attention. Some good remarks on the general subject occur in Jortin's Remarks on Ecclesiastical History, and in Warburton's Julian. This controversy also has of late years been reopened by Dr. Newman, in an essay on miracles originally prefixed to a translation of Henry's Ecclesiastical History, and since republished in a separate form. Dr. Newman had previously, while a Protestant, examined the whole subject of miracles in an article upon Apollonius Tyanaeus in the Encyclopedia Metropolitana.

W. F.

* The differences of opinion in regard to the reality of miracles arise often from differences of opinion in regard to the meaning of the word; and the differences in regard to the word "miracles," arise often from differences in regard to the meaning of the term "laws of nature." Therefore we inquire:

A. What are the laws of nature?

One definition involving several others is this: the forces and tendencies essential to material substances and the finite minds of the world, and so adjusted to each other in a system as, in their established mode of operation, to necessitate uniform phenomena. We speak of these forces and tendencies not as accidental but as essential; not as essential to matter as such, but to the different species of matter; not to all finite minds, but to those of which we are informed by reason as distinct from revelation. When the angel is described (Bel. 36) as carrying Habbucaen by the hair of the head to Babylon, he is not described as complying with the laws of nature, although he may have complied with a law of the angels. On the preceding definition of the laws of nature both an atheist and a theist can unite in discussing the question of miracles. Still, from these laws a theist infers that there is a lawgiver and a law-administrator; from the system of natural forces and tendencies he infers the existence of a mind which once created and now preserves them. Believing that they are only the instruments by which God uniformly causes or occasions the phenomena which take place, a theist is correct when he defines the laws of nature in their ultimate reference as "the established method of God's operation." It may seem, but it is far from being, needless to add, that the phrase "laws of nature," is a figure of speech, and gives rise to other figures. Derived from the Saxon lawe, which is (1) laid, settled, fixed (in a way, something laid down); (2) laid down by a superior being; (3) so fixed as to make uniform sequences necessary. In its literal use it denotes such a command of a superior as is addressed to the conscience and will, and is accompanied with a threat, making obedience necessary in relation to happiness or suffering. Derivation of usage is as follows: (1) the system of natural forces and tendencies; the obedience is the course of natural phenomena which are necessary not in the relative but in the absolute sense. God said: "Let the earth bring forth grass"; he spoke to the animals and said: "be fruitful and multiply." The laws in which he spoke in the creation he continues to speak in the preservation of the natural forces and tendencies; and they being, as it were, mandatory words, are followed by events which are, as it were, obedient acts.

B. What is a miracle?

Of this term various definitions may be given, each of them correct, one of them more convenient for one use, another for a different use.

1. A general definition, presupposing many specific statements, and appropriate to a miracle considered as an event, as a phenomenon, is this: a manifest violation of laws of nature in reference to the results dependent upon them. It is objected to this definition that it supposes all the laws of nature to be violated, whereas in a miracle some of these laws are complied with (I. 5-8). But the definition teaches only that laws, not all the laws, of nature are prevented, by some other than natural force, from producing the effects which, when they are not interfered with, they produce uniformly. It is again objected, that the definition supposes the laws of nature to be violated in all their relations. Just the reverse; it does not suppose these laws to be violated in their reference to a supposed exception, which is merely interfered with only in reference to the results which almost uniformly depend upon them: not in respect of any thing which is above and before them, but merely in respect of events which are beneath and after them. It is again objected, that there is no power above the laws of nature, and therefore these laws cannot be violated (vis, vires). But the objector has no right to assume that there is no superior force able to control the physical forces and tendencies. An objector adds: if the laws of nature be laws of God, they cannot be broken down by a created power, and will not be broken down by himself; he will not break through his own ordinances. But here again is a Petitio Principii, a mere assumption that while for one purpose the author of nature sustains its laws, he will not for another purpose interfere with their usual sequences. An objector says: The word violation is too figurative to be used in defining a miracle. But it is a mere drawing out of the figure involved in the phrase "nature's laws." It gives consistency and completeness to the metaphor which suggests it. (A)

When the customary sequences of physical laws are suspended by some force which is not one of those laws, then the laws are said to be rebelled, as when the Saviour "rebuked" the fever, and "rebuked" the winds, and said to the sea: "Peace, be still" (Matt. viii. 26; Mark iv. 39; Luke viii. 24, iv. 39). It is again objected that a violation of natural laws is a miracle, whether the violation be manifest or not. This alters not its nature and definition (Hume). But laws cannot be rebelled which include in our definition such imaginary events as never occurred, and we do not believe that there have been violations of natural law unless they have been manifest. Besides, if secret violations of this law have occurred, they evince no theological interest, and are not within the pale of our theological discussion. In proportion as nature is supposed to be an orderly, perfectly uniform system, the natural forces were not violated in the phenomenon described as Joshua's "stopping the sun," just in that proportion do men lose their special motives for proving that the narrative is fabulous, or poetical, or a true history. A secret miracle belongs to a secret revelation, but a the-
428an, as such, does not care for things "done in a corner." A true miracle is proved to be such by its own nature, and not by the mere testimony of the person who works it. Usage and convenience permit our limiting the word to those supernatural phenomena which give in themselves proof of their occurrence. Violating this rule, and his prophets may affirm the Koran to be a miracle; but we cannot take their word for it; the book does not, more than the Zohar or the Zohar, present obvious signs of a power going beyond the human. It is further objected, that as the phrase, violation of nature’s laws, may imply something more than a miracle, even an impossibility, so it may denote something less than a miracle. Thus we say that a clumsy mechanic violates the laws of the screw, lever, etc., when he breaks them by a violent use for which they were never adapted; a student violates the laws of the eye; an orator violates the laws of the karynx; a delinquent violates the laws of his constitution. But in these and similar instances the laws of nature are regarded in reference to their use in a miracle, they are regarded in reference to the results which would ensue from them if they were not suspended by a foreign power.

2. The general definition may be explained by a specific one: a miracle is a phenomenon, occurring without regularity of time and place, and in manifest violation of nature’s laws as they commonly operate, could not have been definitely foreseen and calculated upon by the man who pretends that it was wrought in his behalf. If it did not occur without regularity of time and place, it could not occur in manifest violation of the laws of nature. Many writers (like an Edinburgh Reviewer in No. 254) describe miracles as "the arrangements by which, at crossing places in their orbits, man’s world is met and illumined by phenomenon belonging to another zone and moving in another plane;" but such phenomena, like the appearance of a comet once in six hundred years, are still regular, and therefore are not obvious conteractions of nature’s laws, and of course do not baffle the precise calculations of men.

3. If there are laws which, as ordinarily preserved, necessitate uniform phenomena, and if they are in a miracle as forcibly suspended as the general definition indicates, then the suspension must be a striking prodigy (hence the words, miraculum miror; θαύμα, θαύμασιν, παράσηπαράσηπα); must excite the emotion of wonder (Mark i. 27, ii. 12, iv. 41, vi. 61; Luke xxiv. 12, 41; Acts iii. 10, 11); and, arousing the minds of men, will lead them to anticipate some message connected with it. The kingdom of nature, as nature, "suffers violence"; and why? John Foster describes the phenomenon as the ringing of the great bell of the universe calling the multitudes to hear the sermon. Therefore one specific definition of a miracle may be: a phenomenon which occurs in violation of the laws of nature as they commonly operate, and which is designed to attest the divine authority of the messenger in whose behalf the ocular miracle indicates the truth of the message (1 K. xvi. 24; Coleridge’s Works, i. p. 323); directly it w intended to indicate the divine sanction of the messenger (Ex. vii. 9, 10; 1 K. xiii. 3-6). If a man pretend to have received a new revelation from Heaven, we may say to him, as Talleyrand said to Lepaux: The Founder of the Christian system "suffered himself to be crucified and He rose again: you should try and do as much." This second definition is a decisive one; because the characteristics of a miracle are learned from the design of it. If the miracle be intended to signify the divine authority of the worker, it must be an event which, in and of itself, gives evidence of its not being the result of natural causes. Directly the miracle is not essential to its abstract nature, but is always connected with its actual occurrence. Without such an intent an obvious violation of nature’s laws would be a miracle; but without such an intent there never is such a violation. Therefore the Bible, as a practical volume, gives prominence to the end for which the miracle is wrought; see Exodus iii. 2 f.; iv. 1-4; 2 K. i. 10; Matt. xl. 3-5; Mark ii. 10, 11; John ii. 23, iii. 2, v. 36, 37, ix. 16, 30-33, x. 25, 38, xi. 4, 40, xii. 30, xiv. 10, 11, xx. 30, 31; Acts ii. 22, x. 37-43; Heb. ii. 3, 4.

4. If the material and mental forces and tendencies receive so violent a shock as is implied in the general definition, the miracle will lead men to infer: "This is the finger of God." (Ex. viii. 19). Even if it be performed instrumentally by an angel or any superhuman creature, still it is God who sustains that creature, and gives him power and opportunity to perform the miracle. Preserving the laws of nature, God also compels them to produce their effects. No created power can counteract his compulsory working. If he choose to intermit that working, and allow an angel to prevent the sequenses of the law which God preserves, then it is God who works the miracle by means of an angel who is divinely permitted to come through the opened gates of nature. "Qui facit per alium," etc. Therefore another specific definition of a miracle may be: a work wrought by God interposing and manifestly violating laws of nature as they are viewed in reference to their ordinary results. It is not a mere "event" or "phenomenon," it is a "work," a work wrought by God (the Spirit of God, Matt. xii. 23); a work wrought by God interposing (the finger of God, Luke xi. 20). If the laws of nature be obviously violated (B. 1) there is a miracle, whether they be violated by a created or an uncreated cause, or by no cause at all. Still, in point of fact they never have been violated except by the divine interposition: not even by demons unless God first interposed, and opened the door of the world, and let them pass through, and perform the lesser works in order that he may at once overpower them by the greater. Even if the laws of nature were violated without the divine interposition, the irregularity would not fulfill the main design of a miracle (B. 4), and therefore should be distinguished by the word prodigy, or by a synonym ("mirabile non miraculum"). Hence it is the prevailing style of the Bible, to connect the miraculous phenomenon with the interposed power of Jehovah: see Exodus iv. 11, 12; Ps. cxvi. 8; Matt. xii. 24, 28; John iii. 2, ix. 53, x. 21; Acts x. 38, 40, and passages under B. 2.

5. In order to make the truth more prominent that the forces and tendencies which our unbiased reason reveals to us are not thwarted in all, but only in some of their relations: that they are not made (as Spinoza thinks them to be) inconsistent with themselves, and that their Preserver intercalates a new force preventing their usual sequenses, another specific definition of a miracle is: A work wrought by the divine power interposed before certain natural laws and the results which they
must have produced if they had not been violated by that power. It is often said, that the creation of the world was a miracle; but before the creation, no laws of nature had been established, and of course no power was interposed (as a sign B, 3) between non-existing laws and their normal results. So it is said that the creation of new species of plants and animals was a miracle; but it was not, unless the preestablished laws of some other substances were violated by the creating act interposed (as a sign) between those laws and their legitimate results. It is said again, that the present state of the world is a constant miracle; but what forces and tendencies are there which must be resisted by a preserving energy interposed (as a sign) between them and their otherwise uniform effects?

6. Since the phrase, "violation of nature's laws," is condemned sometimes as expressing too much, and sometimes as expressing too little, it may give place to a synonymous phrase, and a miracle may be defined: A work wrought by God interposing and producing what otherwise the laws of nature must (not merely would) have prevented, or preventing (Dan. iii. 27) what otherwise the laws of nature must (not merely would) have produced. Thus the non-occurrence as well as the occurrence of a phenomenon may be a miracle (see B, 7), and thus also the non-occurrence of a miracle has been distinguished from a supernatural event (Ch. 7).

7. As we sometimes overlook the truth that all the laws of nature are constantly upheld and controlled by God, and in this sense are his established method of operation (A), and as we accordingly imagine that when they are violently broken over his power is counteracted, and an event takes place arbitrarily and wildly, another of the specific definitions, harmonizing in fact though not in phrase with all the preceding, may be: A miracle is an effect which, unless it had been produced by an interposition of God, would have been a violation of the laws of nature as they are related to Him and to their established sequences. If we suppose that a human body is thrown into a furnace heated as Daniel iii. 21-30 describes it, the law of fire is to consume that body. If the forces and tendencies of the fire are preserved, and if no volition of God be intercalated to resist them, and if in these circumstances the body remains uninjured, then the law of the fire is violated. If, however, God intercalates his volition and thwarts the action of the fire, He does not violate its laws in their relation to him, for it has no laws which can produce or prevent any phenomena in opposition to his interposed will (Brown on Causa and Effect). A miracle is natural to the supernatural act of God choosing to produce it.

8. Since the laws of nature are often supposed to include all existing forces, and are thus confounded (even by Dr. Thomas Brown) with the laws of the universe, we must add another of the specific definitions, illustrating each of the preceding, may be: A miracle is a phenomenon which, if not produced by the interposition of God, would be a violation of the laws of the universe. In the universe God himself is included; it is no violation of any law in his nature that He is perfectly beneficent; and it has been with all the laws of his power. He perform all these admitted acts which perfect benevolence requires, and consequently that He put forth a volition for a miracle when the general good demands it. As it is consonant with the laws of God to choose the occurrence of a needed miracle, so it is consonant with the laws of matter and finite mind to obey his volitions. It would be a violation of their laws if He should exert his omnipotence upon his world, and should effectually resist it. Since then it is his invariable method of action to do all which the well-being of his universe demands, and to make that effect necessary which He wills to make so; and since it is the invariable order of sequence that matter and finite mind yield to the flat of their Maker, it follows that a miracle (even as defined in B, 1) may not only be in harmony with the laws of the created universe as they are related to the divine will, but may be actually required by the laws of the entire universe, and while abnormal in their lower, may be normal in their higher relations (D, 1, c. d).

9. What are the distinctions between a miracle and other real or imagined phenomena?

1. A miracle is not an event without an adequate cause. The atheist and pantheist, believing that there is no personal author of nature, and that a miracle has no cause in the forces of nature, are misled to believe that it can have no cause at all.

2. A miracle is not an interposition amending or rectifying the laws of nature. Some (Spinoza, Pythagoras, and many) have regarded the course of nature as by the miracles of a miracle, as implying that the courses of nature are imperfect and need to be set right. M. Kean describes a miracle as a special intervention "like that of a clock-maker putting his fingers in to remedy the defects of his wheels;" and Alexandre Dumas, borrowing an Italian epigram, describes a miracle as "the coup de Grace of the laws, or, more properly, the overthrow, overruling thought of God; by no means the result of a discovery that the laws of nature are not fitted to fulfill their design. These laws were planned for the miracle as much as the miracle was planned for them. It would not be of use, unless they were essentially what they are. It is performed not because the works of God need to be supplemented, but because men did not make the right use of his works. It is prompted not by a desire to improve what He has done, but by his condescending pity for men who willfully pervert what He has done. It does not imply that the uniformity of nature is a mistake, but that it is a wise arrangement—so wise that it enables him by a sudden deviation from it to give an emphatic proof of his grace. It does not imply that the constitution of the human mind in expecting this uniformity is wrong, but that it is right, and specially right as it prepares the mind to be impressed because startled by the miraculous sign of supernatural love.

3. A miracle is not a contradiction of some law. The law of nature. Dynamic forces contradict the mechanical; vital forces contradict the chemical; voluntary forces contradict the physical. This contradiction of one force by another is not even supernatural, still less miraculous (B, 6, C, 7). It would not take place unless natural laws were uniform; it is a compliance with the law counteracted, as well as with the law counteracted, not only is it produced by nature, but must be produced, unless a power be interposed thwarting nature. A chemist, like Prof. Faraday cannot prove his divine commission by his new experiments of one chemical law resisting another. In such resistance lies one secret of various miracles.
miracles 1965

The miracles are distinguished from a magical wonder partly by its being such a "mighty work" (Bulgarus) as transcends all created energy; such a work as science in its progressive tendencies becomes less and less able to explain by natural causes.

4. A miracle is not merely a sign of divine authority. It is a "sign" (eignion-spars: monstrum, monstrous), but it is more. If we could make exact distinctions between the nearly synonymous words of the Bible, we might say that miracles are signs, and wonderful signs, and such wonderful signs as could not have been wrought by finite power (Acts ii. 22; 2 Cor. xii. 12; 2 Thess. ii. 9).

Mr. Webster, in his essay on Adams and Jefferson, speaks of their dying on the same fourth day of July as a sign from heaven; many persons regard many remarkable events as tokens of the divine will; many divines regard the internal worth of the Bible as an indication of its celestial origin; controversialists may believe in all these phenomena and yet not believe in them as signs; or may believe in them as "miracles" (A.); as "signs" (B.); as "miracles" (C.); as "unparalleled" (D.); or, as "miracles" (E.).

Some writers teach that if an event be "simply inexplicable by any known laws of nature" it is a miracle in the negative sense; if it be also a "distinct sign by which the divine power is made known" in favor of a religious system, it is a miracle in the positive sense. But it is a common belief of theologians that the divine process of sanctifying the soul (Heb. xiii. 20, 21) is not miraculous, and yet is "an exception to, or deviation from some laws of nature." It is common, moreover, to speak of physical events as "miracles" (A.); as "miracles" (B.); as "miracles" (C.); as "miracles" (D.); or, as "miracles" (E.).

True, in the large view of mere nature (C. 3), such phenomena are not real but only apparent deviations from nature's laws, for they result "crucially from peculiar combinations of these laws. Still they are familiarly called 'deviations from nature,' and for the sake of precision ought to be distinguished from miracles. A miracle is indeed a wonder (B. 3), but we may conceive of wonders which are not miracles, and are on the whole stranger than miracles (D. 2).

6. A miracle is not (as Schleiermacher supposes it to be) a phenomenon produced by an occult law of nature. The following beautiful illustration of this theory is quoted by Dr. J. F. Clarke (Orthodoxy, etc., pp. 64, 65) from Dr. Ephraim Peabody: "Suppose, if you please, one of the high cathedral towers of the older world, so constructed that at the close of a century it strikes the as it ordinarily strikes the hours. As a hundred years come to a close, suddenly, in the immense mass of complicated mechanism, a little wheel turns, a pin slides into the appointed place, and in the shadow of the night the bell tolls a requiem over the generations which during a century have lived and labored and been buried around it. One of these generations might live and die, and witness nothing peculiar. The clock would have what we call an established order of its own; but what should we say when, at the midnight which brought the century to a close, it rolled over a sleeping city, raising all to listen to the world's age? Would it be a violation of law? No; only a variation of the accustomed order, produced by the intervention of a force always existing, but never appearing in this way until the appointed moment had arrived. The tolling of the century would be a variation from the observed order of the clock; but to an artist, in constructing it, it would have formed a part of that order. So a miracle is a variation of the order of nature as it has appeared to us; but to the Author of nature it was a part of that predestined order—a part of that order of which he is at all times the immediate Author and Sustainer; miracles to us, seen from our human point of view, but no miracle to God; to him it was simply the despatch of a law, but to God only a part in the great plan and progress of the law of the universe." We reply: If such a marvelous phenomenon be, like the blooming of the century plant, a result of physical laws as already defined (A.), we cannot be certain that some philosophers have not detected these laws, as some have proved the existence of a particular planet before that planet had been detected by the eye. We cannot be certain that these sagacious philosophers have not waited for the foreseen phenomenon and delivered their message in connection with it, as some deceitful navigators have uttered their threats to a savage king a few hours before a solar or lunar eclipse, and have represented the eclipse as giving a divine authority for those threats. If a miracle is wrought at all, it is wrought for an end; if for an end, then for a special sign of the divine will (B. 3); if for a sign of the divine will, then probably not by an occult law of nature; for if it be wrought by an occult law, then it becomes the less decisive as a sign, less conducive to its end. Therefore the antecedent presumptions for a miracle (D. 1, e. d.) are presumptions for it as the result of a force other than a natural law. It may be true, however, that the Deity has at the creation inserted in matter or spirit certain exceptional forces, having no uniform activity, and becoming operative only at irregular and exceptional emergencies, for no other purpose than that of giving to certain teachers an exceptional divine authority. But forces like these are not the system of uniform agencies, but out of it, consequently, they are not laws of nature (A); their existence is at least as difficult to prove as is the occurrence of transient divine volitions; they, as medulla, represent and are equivalent to the immediate interpositions of God's will; no essential advantage can be gained, and in some cases perhaps no essential (but only a rhetorical) advantage is lost, by referring the miracle to these special and abnormal forces, instead of referring it to the bare and immediate operation of a violation of law.

7. A miracle is not a merely supernatural phenomenon. The supernatural is the genus, including all events produced by a power above the natural laws (B. 6). Of these events the merely
MIRACLES

Supernatural is one species including those only which are not violations, the miraculous is on the species including those only which are violations, of the natural laws. The removal of the soul as described in the New Testament (John xiv. 12, 13; iii. 14-16) is \textit{merely} supernatural, and not (as Calderone terms it) miraculous; for the \textit{essential} tendencies of the soul, the laws \textit{essential} to its being a soul (A) are not manifestly violated when they are rectified; neither is the occurrence so irregular as to defy all possibility of anticipating definite examples of it (B. 2). So might be maintained, consistently with the meaning of the term, that Jesus performed his first \textit{miracle} at the wedding of Cana (John ii. 11), and his second \textit{miracle} upon the son of the Capernaum nobleman (John iv. 47-54); and still before the \textit{first} of these miracles he had given \textit{supernatural} signs of his Messiahship (John i. 48), and before the \textit{second} he had given many such signs, as in his calling of the Apostles, his conversation with the Samaritan woman, his predictions, etc.; and Nicodemus (in John iii. 2) referred not merely to the miraculous but also to other \textit{supernatural} "signs" that Jesus had a divine authority.

D. What is the difference between the proof of the \textit{Biblical} and the proof of other \textit{alleged} miracles?

1. There is a difference between the antecedent presumptions in regard to the \textit{Biblical}, and the antecedent presumptions in regard to other miracles.

a. There is a strong presumption against all miracles considered merely as violations of \textit{physical} law. At the outset of our inquiries we presume that the course of events will be as it has been: that it has been in the past as it is in the present age; and of course that no event \textit{natural} simply as an \textit{event} has occurred in contrariety to this uniform order. While the testimony for common events is to be credited at once without strong reasons for rejecting it, the testimony for miracles as mere phenomena is to be rejected at once without strong reasons for crediting it. When divines refuse to say that a miracle is a violation of physical laws (B. 1) because the term \textit{violation} makes the miracle appear \\textit{apprise} and improbable, then they seem to forget the fact that at so far as a miracle is itself, i.e., viewed as a mere phenomenon, is improbable, just so far does it become useful in proving that God has interfered in behalf of his revealed word; and so far as a miracle, in itself, and apart from its relation to a special divine intention, is probable, just so far does it lose its usefulness as a sign of God's interest in that word. The Christian apologist contends against his own cause, when he contends against Hume's doctrine that a miracle as a mere event is contrary to experience; for if it were not contrary to experience it could be calculated on (B. 2), and would thus lose its power to surprise and convince. He injures his own case when he asserts, in opposition to Hume, that a miracle as a mere event is contrary to experience; for if an event be contrary to experience, then it is contrary to the general truth learned from experience, that physical changes have physical or finite causes; and if it be contrary to this truth then it is no miracle (B. 18). Let us represent the number of alleged miracles by the figure 1,000: whether these have been actually wrought is the question; at the outset we may assume that they have been, or have not been; we cannot beg the question in the affirmative or in the negative; we can only say, however, that leaving out of account the disputed number 1,000, we have never experienced, and no other men have experienced the phenomenon of a physical change without a physical or a finite cause, and also of infinite experience and to all experience (Mark i. 27, ii. 12; Luke v. 26; John iv. 32, xx. 24). It is therefore intrinsically improbable. Whether we suppose (with Reid, Stewart, Campbell) that we have a constitutional tendency to believe the course of events to be uniform; or (with Mill, Metz) that this belief results from experience; or, that it is both intuitive and inculcated by experience, it is a firm belief of all men. Because it is deep-seated, the presumption against miracles as mere phenomena is strong, and therefore when miracles are wrought they become the more startling and convincing, and are regarded not as mere phenomena but as divine signals.

b. Against the great majority of alleged miracles the presumption remains unburdened. Some of them are connected with no apparent design, good or bad; some with a design to commend a system of morals or religion which is false and injurious. No amount of testimony is strong enough to give us rest in believing that God has interfered and checked the operation of his own laws without any design, without a good design, without a good and good design. The presumption against such miracles as are said to have been wrought at the tomb of the Abbé Paris, or upon the daughter of Pascal, cannot be invalidated by the witnesses for them. "I should not believe such a story were it told me by Tate." We need not deny that the witnesses were honest, that they actually saw wonderful and even inexplicable phenomena; but they drew a wrong inference; they did not refer the phenomena to the real, though concealed causes; they mistook a monstrosity for a miracle; the amazing operation of \textit{some one} law, as of electricity, odyle, concealed mental forces, for the palpable violation of the \textit{laws} of nature.

c. Against the Biblical miracles, however, the antecedent presumption does not remain unburdened; for they are not mere physical phenomena; for, first, they were wrought by a Mind infinitely distant from the actions of the physical world (see Dr. Channing, iii. p. 118); secondly, they were \textit{need} for attesting a revelation which was \textit{imminently and indispensably} needed; thirdly, the revelation was grand enough to deserve such miracles (c. See \textit{Paley}, \textit{etc.}); and the miracles were noble enough to fit such a revelation. If, as \textit{Paley} says, the one message recorded in John v. 28, 29, was "well worthy of that splendid apparatus" of miracles which accompanied it, how much more worthy was such a condensed treatise as our Lord's discourse to Nicodemus? That discourse is a gem; there is an antecedent presumption that it will have a costly setting. The inspired word is called by \textit{Locke} a telescope for the mind; there is an antecedent presumption that it will be mounted on a strong frame work. Miracles are the setting and the frame-work for the Gospel. There is an antecedent presumption that the Father who is "very pitiful" will interpose for the children whom He loves with infinite tenderness, will reveal to them the truth which is essential to their peace, and will confirm it by miracles which are needed for its appropriate influence. Our conclusion then is exactly opposite to that of Hume. He says (whatever he means) that a miracle may possibly be proved, but
not so as to be the foundation of a system of religion;" we say that we have heard of no miracle which can be proved unless it be the foundation of a system of religion. The presumption against miracles as more physical phenomena is rebuffed by the presumption in favor of miracles as related to spiritual matters. The probability of their occurring as violations of physical law is counterbalanced by the antecedent probability of their occurring as attestations of religious truth.

The favorable presumption offsetting the antagonistic one prepares us to examine the testimony for miracles with as little prejudice to reject it as if the testimony related to an ordinary event. In the logical order our belief in their necessity, fitness, and worthiness, may be either the condictio praecedens or the condictio subsequens of our belief in their actual occurrence, but in the chronological order the testimony for them may be so overwhelming as to convince us of their occurrence and their worthiness at one and the same time.

In favor of the Biblical miracles there is not only one presumption as such equals and thus rebuts, but there is another presumption which more than equals, which overpowers the presumption against them, and thus not only prepares but also predisposes us to credit the testimony in their favor. The religious system in behalf of which they were wrought involves internal marks of its having been revealed by God, but from that system the Biblical miracles are inseparable. (1.) We may take a particular view of this argument. According to the belief of many divines, some of the most important parts of the Christian system are in themselves miraculous phenomena. "Miracles and prophecies are not adjuncts appended from without to a revelation in itself independent of them, but constitutive elements of the revelation itself." (Roshe.) He who believes in the general resurrection of the dead believes in the certainty of a future miracle far more stupendous than the resurrection of the widow's only son; how, then, can a priori hesitate to believe in that past miracle? He who accepts the doctrine of the Incarnation as revealed in John i. 1-14, assets to a miracle far more astonishing than the appearance of the angels to the shepherds, and of the star to the Magi; how then can he be reluctant to receive the narrative of less astonishing miracles? For a man to believe that a child was born in whom dwelt "all the fulness of the Godhead bodily" (Col. ii. 9), and at the same time to demur at the statement that the child who was named "The Wonderful" performed wonders which were miraculous, is as illogical as for a man to believe in the possibility of a sun, but not in the possibility of planets revolving around it. "Revelation itself is miraculous, and miracles are the proof of it." (Sp. Butler.) (2.) We may take a more general view of this argument. The supernatural truths of the Bible prompt us to believe that miracles have been wrought in attestation of them. Miracles are to such truths what the polish is to theagate, what the aroma is to the flower, what music is to the mouth of a triumphant army. It would be strange if such records of sublime truths were not recorded by Plato and Aristotle, and did not also attest them by miracles; if men received a supernatural inspiration, and did not record such truths as imply a miraculous interposition. Why were they inspired if they were not to reveal doctrines which transcended the human power of discovery, and did not confirm them by wonders which transcended the human power of performance? Should we hear a man like Jesus Christ announce for the first time that he would cause the spiritually blind and dead and dead to see and hear and live spiritually, we should expect that He would accompany his announcement with the gift of miraculous hearing, healing, and the corporally blind, dead, and dead. If we should hear Him predict the new creation of souls "unto good works" we should expect that He would illustrate his prediction by some miraculous control over nature. In themselves the miracles are improbable; in itself the revelation of such truths is improbable; but if such truths are to be revealed for the first time, then the miracles are to be expected; if the one improbability become a reality, we are to presume that the other will. The supernatural truths of the Bible are efflorescent, and miracles have been happily called their "efflorescence." They are so fit an accompaniment and so important a part of the truths connected with them that Dr. Channing (Memoir, ii. 442) goes so far as to say they are so woven into [Christ's] teachings and acts, that in taking them away we have next to nothing left; and he says also (Works, iii. 119: see also iv. 392) as Augustine and others have said before him, that on the whole, the wonder is not that any but that so few miracles have been wrought. (3.) We may take a still more general view of this argument. The miracles of the Bible are so interwoven with its didactic system, that if it stands, they stand; if they fall, it does not utterly fall, but it loses one strong prop; the intrinsic evidence in its favor becomes then a positive evidence in their favor. For example: the resurrection of Christ is an appropriate appendage to his atoning work. It is probable that if He died as our sacrifice, He rose from the dead; and if He rose from the dead, He died as our sacrifice; if He ascended to the throne, He rose from the grave; and if He rose from the grave, He ascended to the throne. In various other methods his resurrection interlocked with the main teachings as well as with the personal character of his Apostles. Now the resurrection of Christ was an actual event, or it was not. If it were not, the narratives of it are not true; and if these narratives are not true, then the general system with which they are interwoven becomes the less probable. But that system is true; and it condemns itself to our religious nature as to prove its divine original. Then the narratives of Christ's resurrection which are so inextricably interwoven with the system are true. To strike out those narratives from the New Testament and to retain the remainder, is like blotting out the figure of the Virgin from the Bodeen Masum. The old objection arises: You prove the miracles by the doctrine, but you profess to prove the doctrine by the miracles. We do both. Each of the arguments lends aid to the other. Our Saviour did not perform his miracles as an anatomist conducts his demonstrations, by appealing to the intellect alone; but he required faith, or a right moral state, as a condition for his miraculous works; and on the other hand his miraculous works corroborated the moral faith (Mark vi. 5; Matt. xii. 38). M. Renan mistakes the logical characteristics of the Bible, when he supposes that the resurrection of Lazarus should have been inquired into by a college of physicians relying on their anatomical instruments and demonstrating their conclusions. This might have been done safely; but the Bible
MIRACLES

MIRACLES
does not profess to be a treatise on naked science; it relies not on demonstration, but on moral reasoning, and makes our intellectual pursuit a means of moral protection. We are predisposed by our proper reverence for the doctrine to believe in the miracles, which, however, are commended to us by their own independent proof (John v. 35, x. 25, 58, xiv. 10, 11); and we are predisposed by the miracle to believe in the doctrine, which, in its turn, is commended to us by its own independent evidence. The doctrine is the title-deed, and is essential to the significance of the seal attached to it. The miracle is the seal and is important for the authority of the title-deed. The seal torn away from the parchment cannot fulfill its main design, and the parchment with the seal cut out is lessened in value (Gerhard). The doctrine is the seal and is essential to the life of the body; the miracle is the body and is important for the full development of the soul. "Miracles test doctrine, and doctrine tests miracles" (Pascal).

2. There is a difference between the testimony in favor of the Biblical, and that in favor of other alleged miracles. Under the following seven heads are classified some of the peculiar evidences from testimony for the miracles of the Old and New Testaments; and it is easy to see that all these evidences are not combined in support of Pagan, Mohammedan, post-apostolic, or any other than the Scriptural miracles.

1. The nature of the miracles. (a.) They were such as could be judged by the senses (John xi. 40). Luke xix. 29, (b.) Many of them are not ambiguous; for how can we explain the resurrection of the dead by any natural law? (c.) They were not tentative; for we hear of no one who faithfully attempted to perform any miracle which he was authorized to perform, and who failed in the attempt. If who applied to Jesus were healed by his word (Matt. iv. 24, 25, viii. 15, ix. 33, xii. 14, xiv. 11; Mark vi. 50; Luke iv. 46, vi. 19). (d.) The alleged miracles were obviously connected with the volition of the person who professed to perform them, and were not, like the tentative works performed at the tombs and altars of saints, apparently independent of any particular volition producing them. (a.) They were connected immediately with the volition to produce them; a distant sufferer is instantly relieved by the spoken word (Matt. xxvi. 19, xxvii. 50, xxviii. 9). (b.) Many of them were not of such a nature as cannot be explained by the acting of the imagination. The miracles of Christ were not like the cures effected by the touch of a king, but were wrought by a Galilean peasant in whose personal appearance we do not know that there was anything remarkable. In such methods as the preceding are the Biblical miracles distinguished, and the testimony in their favor from simple marvelous tales.

2. The circumstances in which they were performed. (a.) They were wrought at such times and places as favored the thorough examination of them: in broad daylight; in close contiguity to the observers (Luke xvi. 29; John xx. 27). (b.) They were performed not privately, not before parties, nor in the presence of a small number of men who could not be induced to combine in a stratagem (John ix.; Acts iii. 7 ff.). (c.) They were not performed by a band of artists or experts who remained together, and might cover each other's failings, and who were superintended by a skilful manager; but the Apostles separated from each other, did not act in concert, manifested no solicitude for each other's proceedings, imparted the miraculous gifts to men of different characters, who were selected not for their dexterity but for their moral worth (Acts xvii. 14-23, xix. 6; 1 Cor. xii. 7-11).

3. The character of the man on whose testimony the miracles are based. Some of them are personal observers, eye and ear witnesses; John xxv. 27; Acts ii. 32, iii. 15, iv. 26, v. 29-32, x. 39-41, xiii. 31; 2 Peter i. 16-18; 1 John i. 1-3. (b) Whether personal witnesses or not, they were able to know the truth; men of sound and stable sense; practical men, like Mark, and Luke the physician, not enthusiasts, not fanciful, not easily excited and misguided (Mark xvi. 14; John xx. 1-29). If they had been peevish instead of practical, scholars instead of business men, politicians instead of tax-gatherers, they would have wanted one sign of credibility. (c.) They were disposed to utter the exact truth. They have such an air of veracity as cannot be mistaken. This air is made up (1) sometimes of childlike statements, as in Isaiah xxxviii. 21; (2) sometimes of omissions to ascribe miracles to particular men, as to Abraham, to Jacob, to David, to Solomon, to the Baptist (John x. 41), who however were special favorites of the historians, and would have been celebrated for their miracles achievements, if the historians had indulged in mythical or fanciful narratives; (3) sometimes of incidental allusions to the labor of scrutinizing the reported facts, Luke i. 1-4; (4) sometimes of confessions of inexplicable incredibility, as in Matt. xxvii. 27; Mark xvi. 11, 13, 14; Luke xiv. 11, 23; (5) sometimes of obvious freedom from anxiety to make out a consistent narrative. The reporters, seeming to be entirely at their ease, have admitted into their records unimportant discrepancies, which are apparent; and unimportant coincidences, which are occult. If their narratives had been written with a dishonest aim, the discrepancies would have been carefully concealed, and the coincidences would have been openly parodied. (6) Sometimes their constitutional faults give an air of truthfulness to the Biblical narrators. Such an open-hearted man as Simon Peter could never have held out in a conspiracy to deceive the public. Such a skeptic as Thomas could never have united with him in so bold an enterprise. (d.) The historians were sure that the statements were correct. They appealed to their interested contemporaries. They challenged investigation. John x. 37, Acts ii. 22. (c.) Although able and disposed to give a true record, they were not able, had they been disposed, to fabricate such a record as they have given. Some of them, as Matthew, were deficient in genius, and this is an argument for rather than against the exact truthfulness of their confessions. How could these men have invented a record of Christ's miracles so consonant with the principles of the divine administration, with the character of Christ, with the spirit of his Gospel? The great forces which God empowers, gravitation for example, are noiseless. Christ's miracles were in the solitude of Palestine. Christ was meek and lowly; he was born not in Rome but in a stable; by the exact truthfulness (d.) how could they have been in the cottage so he did not perform his miracles upon consuls and pratores, but upon the little daughter of Jairus and upon the woman who was "bowed together." The spirit of his Gospel is that of mercy and grace; his miracles were wrought for the hungry, the epileptic, the paralytic, beggars...
The circumstances in which the original narrators gave their testimony. (a.) They gave it at the time when the miracles were performed, not as the original reporters of many pagan and Romish wonders, after the lapse of centuries from the performance of the exploits. (b.) There is reason to believe (Douglas' Criteria, p. 89, 280-294) that the testimony for the biblical miracles was first given at the place where they were performed (the Gospel of Jesus risen from the dead was first preached at Jerusalem), and not like the testimony for the miracles of Loyola and Xavier, at distant localities where the local evidence against them could not be scrutinized.

5. The effect of the miracles. (a.) They were partly the means of overcoming the opposition of the original narrators. The disciples of Christ were expecting him to be a temporal king, were looking forward to their own princely honors; and were hostile to the lowly and spiritual character of his mission. His miracles helped to break down their hostility. (b.) They were received by friends partly by the evidence which they described (Heb. ii. 4), and which they would, if they could, have rejected.

(b.) The miracles were partly the means of turning masses of the people from a decided anti-Christian to a Christian belief (John ii. 23, iii. 2, vii. 31). (c.) Their converting influence is the more decisive sign of their reality, because every believer in them knew that he would be called by his faith to a continuous course of hard, self-denying, and often self-sacrificing work. Not without the most rigid scrutiny will men assent to a proposition which requires them to go through toils not only arduous but persevering, not only attended with habitual self-denial, but liable to end in the utter sacrifice of earthly good (John xi. 47-57). The alleged miracles of pagans and Romanists have been performed among persons previously favorable to them, or liable to be imposed upon by excited fancy and feeling, and have not been connected with rigorous and repulsive exactions. (d.) A new religion was founded on the first Christian miracles. Men have a strong presumption against a faith not only exacting but new, and will disbelieve, if they can, in any miracles corroborating it. In order to establish the Biblical wonders, some instrumental wonder of the miracles should have appeared, and should have declared his design in working them, and that design should have been to attest before unbelievers a novel as well as humiliating system of religious truth. (e.) External institutions (as the Passover, the Eucharist, the Lord's Day) were founded on, or in intimate connection with the Biblical miracles, and were established at the time and place when and where the miracles were said to have been wrought. Men who are to pay the cost have an economical objection to the rearing of expensive monuments for commemorating scenes of recent occurrence in their own neighborhood, when there is not clear proof that the scenes did occur. (f.) Not only the nature, but the degree of the influence exerted by the Biblical miracles is a proof of their reality. Against the selfishness and the prejudices of men be Christian system, originating with a few persons who were despised in Galilee, which was itself despised throughout Judea, which in its turn was despised in other countries, fought its own way into the favor of the most enlightened nations, and partly by the aid of pretended miracles which, if they had been merely pretended, might have been shown to be such.

6. The testimony of persistent enemies. Men who denied the Biblical truths admitted the reality of the Biblical miracles. True, they ascribed the phenomena to magic; but this proves that they could not ascribe them to the working of natural law. True, they attributed the miraculous agency of all other religions: but they had not the same motive for admitting the Christian miracles which they had for admitting others. The Christian system was exclusive, and would thus impel them to disprove it if they could; almost every pagan system was liberal, and was thereby saved from arraying objeets in personal hostility to it. Is it said, that the early opponents of the Gospel confessed its miraculous attestation, because they were weak and credulous? But is it not said by the same objectors, that the early friends of the Gospel were weak and credulous? Why then did the objectors of the Gospel deny the witnesses' "lying wonders, of heathenism?" "The more weak and credulous any man is, the harder it is to convince him of anything that is opposite to his habits of thought and his inclinations. He will readily receive without proof anything that falls in with his prejudices, and will be disposed to hold out against any evidence that goes against them" (Whately's Introductory Lessons, p. 210, Cam. ed.).

7. The general coincidences of the Biblical narratives. (a.) The witnesses who recorded the Christian miracles differed from each other in personal character and style; and still agree with each other in the substance of their narratives. Their substantial concurrence is a sign, additional to every individual mark, that their narratives are true. (b.) The coincidence of the miraculous attestations with the internal character of the Biblical system (which moreover is itself composed of harmonizing doctrines, all of whom witnesses concurring to recommend it, D. I, d) forms another comprehensive sign that the simple-hearted men who recorded the miracles uttered the truth. (c.) The coincidence of the Biblical narratives with many general facts of history makes these narratives the more plausible. The miracles recorded by the Hebrews and inspired by the Biblical theology were preached. Such an expectation is a corollary to the presumption that a benevolent God will interpose in behalf of such a theology (D. I, c.). It is natural to think that the expectation would be met by the original preachers (Mark xvi. 20; Acts xiv. 3; Rom. xv. 18, 19), or that the hearers would have complained of the preachers, and the preachers would have been obliged for their safety to meet it in due form. The complaints? Where are the apologies? Again, the Jews were an ignorant nation, but they retained their belief in one infinite God, who was to be worshipped spiritually; why did they cling to this sublime faith, while more cultivated nations, Egyptians, Greeks, Romans, did not rise above polytheism and idolatry? Had they more refined intuitions, innate logical skill than the masters of the Lyceum and Academy?

We have, then, a constitutional tendency to believe that as the original narrators of the Christian miracles were plain, sound, apparently ingenons but not ingenous men, their narratives are true. Our experience favors his belief. The falsehood
MIRACLES

at this testimony, as mere testimony, would be a monstrous deviation from the ordinary course of phenomena. The convergence of all the preceding marks of truth would be such a falsified reason for a still more monstrous deviation from the course of nature. It would be a deviation more monstrous than are the Biblical miracles themselves. It would be not only a marred, but a mere marred, for which there is no good moral reason; therefore it would be a mere monstrosity; but the miracles are not mere miracles, there is a good moral reason for them.

We can see no adequate natural, and of course no supernatural cause of the mere monstrosity, but we can see an efficient cause of the miracles and an adorable one. The mere monstrosity has nothing to recommend it in its agreement with the laws of the universe; the miracles have much (II. 7, 8).

If now there be two contradictory hypotheses both of which are marvelous, but one of them more unaccountable, more unanswerable, and thus more monstrous than the other, we are bound to reject the greater monstrosity.

Christian apologists have often adopted the maxim of Hume: Of two miracles, reject the greater; and they have said that if testimony having the preceding signs of trustworthiness were false the falsehood would be more monstrous than the truth could be attested. But no; the falsehood of testimony which appears credible may be more wonderful than a miracle, and yet be in itself no miracle at all. While it may be difficult to account for the falsehood, it is absolutely impossible to account for the miracle, on any known principle of human or physical nature (II).

Except in a few disputed cases there has never been an approximation to the phenomenon of raising the dead, but in numerous cases there has been an approximation to the phenomenon of false testimony which had all the appearance of being true. The falsehood of such testimony, then, must be less contrary to experience than the miracle, the very nature of which requires that, except in the few disputed instances, it be contrary to all, i.e. to the analogy of all experience (II. 1, a). Experience, however, is not our only guide. Antecedently to experience we have two contrary presumptions, and of these two the stronger prompts us to believe in such miracles as are recorded in the Bible (B. 5. 8. C. 5. 1. 1. c. d.). The character of God and his relations to men make it more rational to suppose that a wonderful event has occurred for which we can see a moral reason and an efficient cause, than that a monstrosity has occurred for which we see no moral reason and no natural cause.

E. The proper time for discussing the Question of Miracles.

In some rare cases it may be needful to discuss the question with an atheist, pantheist, or skeptic. In these cases the definitions of a miracle under B. 1. 2. are appropriate. As we cannot require him to assert, and he cannot require us to deny the existence of God, so these definitions neither assert nor deny it. A more appropriate, as well as a more common time, however, for discussing the question of miracles is after we have proved the existence and attributes of God. The discussion is then such to the Christian as the Bible works on than between the Theist and the Atheist.

But the most appropriate time for the discussion is after we have proved man's need of a revelation and the fitness of the Biblical revelation to supply that need. The internal evidence of the inspiration of the Bible removes the obstacles which obstruct the proof of miracles, and also lends additional force to that proof and forms a part of it. E. A. P.

MIRIAM (מִרְיָם, 'their rebellion': LXX. Mapaiā, hence Joseph. Mapaiā: in the N. T. Μαρία or Μαρία, Mapaiā being the form always employed for the nominative case of the name of the Virgin Mary), though it is declined Mapiā, Mapiā (while Mapiā is employed in all cases for the three other Mariēs). The name in the O. T. is given to two persons only: the sister of Moses, and a descendant of Caleb. At the time of the Christian era it seems to have been common. Amongst others who bore it was Herod's celebrated wife and victim, Mariamne. And through the Virgin Mary, it has become the most frequent female name in Christendom.

1. Miriam, the sister of Moses, was the eldest of that sacred family; and she first appears, probably as a young girl, watching her infant brother's cradle in the Nile (Ex. ii. 4), and suggesting her mother as a nurse (ib. ii. 7). The independent and high position given by her superiority of age she never lost. "The sister of Aaron" is her Biblical distinction (Ex. xv. 20). In Num. xii. 1 she is placed before Aaron; and in Mic. vi. 4 reckoned among the "Three Wonders," Ruth, Moses and Aaron and Miriam. She is the first personage in that household to whom the prophetic gifts are directly ascribed — Miriam the Prophetess is her acknowledged title (Ex. xv. 20). The prophetic power showed itself in her under the same form as that which it assumed in the days of Samuel and David — poetry, accompanied with music and possession. The only instance of this prophetic gift is when, after the passage of the Red Sea, she takes a cymbal in her hand, and goes forth, like the Hebrew maidens in later times after a victory (Judg. v. 1. xi. 34: I Sam. xvii. 6; Ps. cviii. 11, 25), followed by the whole female population of Israel, also beating their cymbals and striking their guitars (סִפְגּוּלִים, mistranslated "dances"). It does not appear how far they joined in the whole of the song (Ex. xv. 1-19); but the opening words are repeated again by Miriam herself at the close, in the form of a command to the Hebrew women. "She answered them, She answered them of the daughters of Israel, to Ja'zur, for He hath triumphed gloriously: the horse and his rider hath He thrown into the sea."

She took the lead, with Aaron, in the complaint against Moses for his marriage with a Cushite, [Zipporat.] "Hath Je'not been spoken by Moses? Hath He not also been spoken by us?" (Num. xii. 1, 2). The question implies that the prophetic gift was exercised by them; while the answer implies that it was communicated in a less direct form than to Moses, "If there be a prophet among you, I Je'not will make myself known unto him in a vision, and will speak unto him in a dream. My servant Moses is not so. . . . With him will I speak mouth to mouth, even apparently, and not in dark speeches." (Num. xii. 6-8).

A storm rebuke was administered in front of the Tabernacle, and sent to both Aaron and Miriam. But the punishment fell on Miriam, as the chief offender. The hateful Egyptian reproach, of which for a moment the sign had been seen on the hand of her younger brother, broke out over the whole person of the proud prophetess. How grand was her
position, and how heavy the bow, is implied in the cry of anguish which goes up from both her brothers — "Alas, my lord! . . . Let her not be as one dead, of whom the dead is half consumed when he cometh out of his mother's womb. . . . Heed her now, O God! I beseech thee." And it is not less evident in the silent grief of the nation: "The people journeyed not till Miriam was brought in again" (Num. vii. 10-15). The same feeling is reflected, though in a strange and distorted form, in the ancient tradition of the drying-up and reflowing of the marvelous well of the Wanderings. [Hebr., vol. i. p. 264 a.]

This stroke, and its removal, which took place at Hazeroth, form the last public event of Miriam's life. She died towards the close of the wanderings at Kadesh, and was buried there (Num. xx. 1). Her tomb was shown near Petra in the days of Jerome (De Loc. Heb. in voce "Codex Barneia"). According to the Jewish tradition (Joseph. Ant. iv. 4, § 6), her death took place on the new moon of the month Xanthicus (i.e. about the end of February); which seems to imply that the anniversary was still observed in the time of Josephus. The burial, he adds, took place with great pomp on a mountain called Zin (i.e. the wilderness of Zin); and the mourning — which lasted, as in the case of her brothers, for thirty days — was closed by the institution of the purification through the sacrifice of the heifer (Num. xix. 1-10), which in the Pentateuch immediately precedes the story of her death.

According to Josephus (Ant. iii. 2, § 4, and 6, § 1), she was married to the famous HUM, and, through him, was grandson of the architect BEZALEEL.

In the Koran (ch. iii.) she is confounded with the Virgin Mary; and hence the Holy Family is called the Family of Amram, or Imran. (See also D'Herbelot, Bibl. Orient. "Zeharim." ) In other Arabic traditions her name is given as Kolthiam (see Well's Bibl. Legends, p. 101).

2. (Both Vat. and Alex. τοίοι Μεσοί; [Rom. Μαράρα; Comp. Μαραρα;] Mirāra). A person — whether man or woman does not appear — mentioned in the genealogies of the tribe of Judah and house of Caleb (1 Chr. iv. 17); but in the present state of the Hebrew text it is impossible to say more than that Miriam was sister or brother to the founder of the town of Eshtemoa. Out of the numerous conjectures of critics and translators the following may be noticed: (a) that of the LXX., "and Jether begat M.;" and (b) that of Bertheau (Chronik, ad loc.), that Miriam, Shammai, and Ishlah are the children of Mered by his Egyptian wife Bathitha, the daughter of Pharao; the last clause of ver. 18 having been erroneously transposed from its proper place in ver. 17. A. F. S.

MIRMA (τύρπα) [fraud, falsehood; Map'μα; [Vat. Ιαμανα] Marmā]. A Benjamite, "chief of the fathers," son of Shaharahm by his wife Hoditha; born in the land of Moab (1 Chr. viii. 10).

MIRROR. The two words, תָּפֶּן, marah (Ex. xxxviii. 8; καττόπτρον, speculum), and רֵּ֖ל (Job xxxvii. 18), are rendered "looking-glass" in the A.V., but from the context evidently denote a mirror of polished metal. The mirrors of the women of the congregation, according to the former passage, furnished the bronze for the laver of the tabernacle, and in the latter the beauty of the figure is heightened by rendering "Wilt thou beat out with him the clouds, strong as a molten mirror?"; the word translated "spread out" in the A.V. being that which is properly applied to the hammering of metals into plates, and from which the Hebrew term for "firmament" is derived. [FIRMAMENT. ] The metaphor in Deut. xxviii. 23, "Thy heaven that is over thy head shall be brass," derived its force from the same popular belief in the solidity of the sky.

The Hebrew women on coming out of Egypt probably brought with them mirrors like those which were used by the Egyptians, and were made of a mixed metal, chiefly copper, wrought with such admirable skill, says Sir G. Wilkinson (Anc. Eg. iii. 334.), that they were "susceptible of a lustre, which has even been partially revived at the present day, in some of those discovered at Thebes, though buried in the earth for many centuries. The mirror itself was nearly round, inserted into a handle of wood, stone, or metal, whose form varied according to the taste of the owner. Some presented the figure of a female, a flower, a column, or a rod ornamented with the head of Atheta, a bird, or a fancy device; and sometimes the face of a Typhonian monster was introduced to support the mirror, serving as a contrast to the features whose beauty was displayed within it." With regard to the metal of which the ancient mirrors were composed there is not much difference of opinion. Pliny mentions that anciently the best were made at Brundusium of a mixture of copper and tin (xxviii. 45), or of tin alone (xxxiv. 48). Praxiteles, in the time of Pompey the Great, is said to have been the first who made them of silver, though these were afterwards so common as, in the time of Pliny, to be used by the ladies' maids. They are mentioned by Chrysostom among the extravagances of fashion for which he rebuked the ladies of his time, and Seneca long before was loud in his denunciation of similar follies (Natur. Quest. i. 17). Mirrors were of steel is said to have been found. They were ever made of gold (Eur. Hea. 925; Sen. Nat Quest. i. 17).
used by the Roman women in the worship of Juno (Seneca, Ep. 95; Apuleius, Metam. xi. e. 9, p. 770). In the Egyptian temples, says Cyril of Alexandria (De mirab. in Syr., ix. Opusc., p. 314, ed. Paris, 1648), it was the custom for the women to worship in linen garments, holding a mirror in their left hands and a sistrum in their right, and the Israelites, having fallen into the idolatries of the country, had brought with them the mirrors which they used in their worship. a

Egyptian Mirrors. 1, 3, 4, from Mr. Salt's collection; 2, from a painting at Thebes; 4 is about 11 inches high.

According to Beckmann (Hist. of Inv. ii. 64, Bohn), a mirror which was discovered near Naples was tested, and found to be made of a mixture of copper and regulus of antimony, with a little lead, which he examined and found to consist of 67-12 copper, 24-93 tin, and 8-13 lead, or nearly 8 parts of copper to 3 of tin and 1 of lead, but neither in this nor in one analyzed by Klaproth, was there any trace of antimony, which Beckmann asserts was unknown to the ancients. Modern experiments have shown that the mixture of copper and tin produces the best metal for speckles (Phil. Trans., vol. 67, p. 235). Much curious information will be found in Beckmann upon the various substances employed by the ancients for mirrors but which has no bearing upon the subject of this article. In his opinion it was not till the 13th century that glass, covered at the back with tin or lead, was used for this purpose, the doubtful allusion in Pliny (xxxvi. 66) b to the mirrors made in the glass-houses of Sidon having reference to experiments which were unsuccessful. Other allusions to bronze mirrors will be found in a fragment of Eschylus preserved in Stobaeus (Ser. xviii. p. 164, ed. Gesner, 1608), and in Callimachus (Hym. in Lar. Poll. p. 21). Convex mirrors of polished steel are mentioned as common in the East, in a manuscript note of Chardin upon Eschus, xii. 11, quoted by Harmer (Obscr. vol. iv. c. 11, obs. 54).

The metal of which the mirrors were composed being liable to rust and tarnish, required to be constantly kept bright (Wisd. vii. 26; Eschus, xii. 11). This was done by means of pounded pumice-stone, rubbed on with a sponge, which was generally suspended from the mirror. The Persians used emery-powder for the same purpose, according to Chardin (quoted by Hartmann, die Alter. u. Kultur, ii. 245). The obscure image produced by a tarnished or imperfect mirror [λιθοαπαθείαν, θλίθοαπαθείαν] reflection of a small mirror, that in the manner of the women of the East each of the dancers wore beneath her left shoulder.

a "Apparent in allusion to this custom Moore (Euseb., c. 5), in describing the maidens who danced at the Island Temple of the Moon, says, "As they passed under the lamp, a gleam of light flashed from their bosoms, which, I could perceive, was the

b "Sidone quondam sxe officinis multo: ... specula..."
appears to be alluded to in I Cor. xiii. 12. On the other hand a polished mirror is among the Arabs the emblem of a pure reputation. "More sparsel than the mirror of a foreign woman" is with them a proverbial expression, which Meddani explains of a woman who has married out of her country, and polishes her mirror incessantly that no part of her face may escape her observation (De Sacy, Chrét. Arabe. iii. p. 250).

The obscure word מִשַּׁמְאָה, gilgitum (Is. iii. 23), rendered "glasses" in the A. V. after the Vulgate spectacula, and supported by the Targum, and the commentaries of Kimchi, Altarbanel, and Jarchi, is explained by Schroeder (de Vest. Med. Hebr. eh. 18) to signify "transparent dresses" of fine linen, as the LXX. (τὰ διαφανέσ ἀντικείμενα) and even Kimchi in his Lexicon understand it (comp. multicolio, Juv. Sat. ii. 66, 76). In support of this view, it is urged that the terms which follow denote articles of female attire; but in Is. viii. 1, a word closely resembling it is used for a smooth writing tablet, and the rendering of the A. V. is approved by Gesenius (Jesuís, i. 215) and the best authorities. W. A.

MIS'AEL (Mīṣ'āh; [Vat. Mīṣ'ānu] Mis'iel). 1. The same as Mīṣ'el 3 (1 Esdr. ix. 44; comp. Neh. viii. 4). 2. = Mīṣ'iel 3, the Hebrew name of Mēshāch (Song of the Three Children).

MIS'GAB (מִיסְגַּב), the Hebrew name of a place in Moab named in company with Šerê and Kihlatha'm in the enumeration of Jerenath (xviii. 1). It appears to be mentioned also in Is. xxxv. 12, though there rendered in the A. V. "high fort." [MAOR]. In neither passage is there any clue to its situation beyond the fact of its mention with the above two places; and even that is of little avail, as neither of them has been satisfactorily identified.

The name may be derived from a root signifying elevation (Gesenius, Thes. 1320), and in that case was probably attached to a town situated on a height. It is possibly identical with Miṣ'ēn or Moan, named only in 1 Sam. xxii. 3. Fürst (Handarb. 734 a) understands "the Misgab" to mean the highland counties of Moab generally, but its mention in company with other places which we know to have been definite spots, even though not yet identified with certainty, seems to forbid this.

MISH'EA'l (מִישֵׁה'ל) [who is what God is]; [Rom.] Mīṣ'ēla in Ex., [Vat. Alex. oniit;] Mōṣēd, [Vat. Alex. Mosēda; in Lev.] Mīṣ'ēl, Mīṣ'ēl'ēd). 1. One of the sons of Uzziah, the uncle of Aaron and Moses (Ex. vii. 22). When Nadab and Abihu were struck dead for offering strange fire, Mishael and his brother Elzaphan, at the command of Moses, removed their bodies from the sanctuary, and buried them without the camp, their loose fitting tunics (כּולתיבו, A. V. "veils"), the sim-

pllest of eastern dresses, serving for winding-sheets (Lev. x. 4, 5). The late Prof. Blunt (Ueber. Co- nocœleus, pp. i. § xiv.) conjectured that the two brothers were the "men who were defiled by the dead body of a man" (Num. ix. 6), and thus prevented from keeping the second passover.

2. (Mīṣ'āh; [Vat. F.A.] Alex. Mōṣēn̄a; Mīṣ'ēl). One of those who stood at Ezra's left hand on the tower of wood in the street of the water gate, when he read the Law to the people (Neh. viii. 4).

3. [Vat. (Theodot.) Mīṣ'ēlu]. One of Daniel's three companions in captivity, and of the blood-royal of Judah (Dan. i. 6, 7, 11, 19, ii. 17). He received the Babylonian title of Mēshāch, which he is better known. In the Song of the Three Children he is called Mīṣ'ēl.

MISH'AL and MISH'EA'l (both מישאל) [request]; Madāsa, Alex. Mōṣēf [Comp. A. Lōmor]. 3. One of the towns in the territory of Asler (Josh. xix. 29), allotted to the Gershonite Levites (xxi. 30). It occurs between Amal and Carmel, but the name is probably unknown, and this catalogue of Asler is so imperfect, that it is impossible to conclude with certainty that Mīshāh was near Carmel. True, Eusebius (Onom. "Māsānu") says that it was, but he is evidently merely quoting the list of Joshua, and not speaking from actual knowledge. In the catalogue of 1 Chr. vi. it is given as Mēshāt, a form which suggests its identity with the Mēsāloth of later history; but there is nothing to remark for or against this identification.

MISH'AM (מִישָם) [purification, beauty, Dietr.]; Mosādā; [Vat. Mosēn̄a;] Mīson̄. A Benjamite, son of Elpaas, and descendant of Shammai (1 Chr. viii. 12).

MISH'MAH (מִישָמָה) [hearing, report]; Mūṣādā: Mīson̄.

1. A son of Ishmael and brother of Mīshām (Gen. xvii. 14; 1 Chr. i. 30). The Masumani of Ptolemy (vi. 7, § 21) may represent the tribe of Mishsam, named by modern Arabists, and not known to the writer, but the name (Mismā') e.xists in Arabia, and a tribe is called the Bane-Misɔnā'. In the Mis-āt ez-Zemān (MS.), Mishma is written Misɔnā'—probably from Rabbinical sources; but it is added "and he is Mīsām'ah." The Arabic word has the same signification as the Hebrew.

2. A son of Simeon (1 Chr. iv. 25), brother of Mīshām. These brothers were perhaps named after the older brothers, Mishma and Mīsām. E. S. P.

MISHM'AN'AH (מִישָמָן) [fattness]; Mūṣāmâ'; [Vat. Mosēmāⁿa;] Alex. Māṣomāⁿ; F.A. Mōṣomāⁿa: Mīson̄ān. The fourth of the twelve sun-faced Gadies, men of the host for the battle, who "separated themselves unto David" in the hold of Zikhon (1 Chr. xii. 10).

a In this passage it is without the article. As a mere appellative, the word Mīsagab is frequently used in the poetical parts of Scripture, in the sense of a lofty place of refuge. Thus 2 Sam. xxii. 3; Ps. ix. 9, ix. 9; Is. xxxii. 16; in which and other places it is variously rendered in the A. V. "high tower," "refuge," "fortress," etc. See Stanley, S. & P. app. § 31.

b Their priestly flocks, or casks (Ex. xii. 14) which, as Jarchi remarks, were not burned.
MISRAITES, THE

* The A. V. ed. 1611 reads Moshmannah for Mishmannah, in accordance with six MSS. and printed editions noted by Michaelis (Bibl. Hebr.). This is also the marginal reading of the Geneva version; the Bishop's Bible has "Mishmannum.

** MISPARI. So correctly A. V. ed. 1611 in Ex. ii. 2, where later editions have MIZPAH. The Hebrew is מִסְפָּרָי.

MISPARETH (מִסְפָּרֶת) [number]: Masorah: [Vat. Masorets; Alex. Masorets; F.A. Masorets; Maspéro] Mark 14:11), one of those who returned with Zerubbabel and Jeshua from Babylon (Neh. vii. 7). In Ex. ii. 2 he is called MIZPAH, and in 1 Esdr. vi. 8 ASPARAS. MISPARETH-MATIM

in xii. 6, מִסְפָּרֶת (see below): Masorah, and Masorets Masorets; Alex. Masorets; Maspéro, a place in northern Palestine, in close connection with Zidon-rabbah, i.e. Sidon. From "the waters of Merom" Joshua chased the Canaanite kings of Zidon and Mizpephonain, and then eastward to the "plain of Mizpah," probably the great plain of Baalbek — the Bibek of the Hebrews, the Bēkēn of the modern Syrians (Josh. xi. 8). The name occurs once again in the enumeration of the districts remaining to be conquered (xiii. 6) — "all the inhabitgnts of the mountain from Lebanon unto M. Maim," all the Zidonians. Taken as Hebrew, the literal meaning of the name is "the measure of waters," and accordingly it is taken by the old interpreters to mean "warm waters," whether natural, i.e. hot baths or springs — as by Kimchi and the interpenetration in the Vulgate; or artificial, i.e. salt, glass, or smelting works — as by Jarchi, and the others mentioned by First (Mark, 803 b), Rendler (in Gesen. Thes. 1441), and Keil (Jews, ad loc.).

Lord A. Hervey (Gessellius, etc., 228 note) considers the name as conferred in consequence of the "burning" of Jabkin's chariots there. But were they burnt at that spot? and, if so, why is the name the "burning of waters?" The probability here, as in so many other cases, is, that a meaning has been forced on a name originally belonging to another language, and therefore unintelligible to the later occupants of the country.

Dr. Thomson (Land and Book, ch. xv., revising the conjecture of himself and Schultz (Bibl. Sacra, 1855), treats Misipoth-monaim as identical with a collection of springs called Ayn-Mishserif,

on the sea-shore, close under the "Koos en-Nokhura," but this has the disadvantage of being very far from Sidon. May it not rather be the place with which the historian is here identifying the later name as Zarephath? In Hebrew, allowing for a change in spelling, frequent of s to z (reversed in the form of the name current still later — Sarepta), the two are from roots almost identical, not only in sound, but also in meaning; while the close connection of Zarephath with Zidon — "Zarephath which belongeth to Zidon," — is another point of strong resen blance.

MITE (αἰσθανόμενον), a coin current in Palestine in the time of our Lord. It took its name from a very small Greek copper coin, of which the Athenians seven went to the χαλκός. It seems in Palestine to have been the smallest piece of money, being half the farthing, which was a coin of very low value. The mite is famous from its being mentioned in the account of the poor widow's piety whom Christ saw casting two mites into the treasury (Mark xii. 41-44; Luke xxi. 1-4). From St. Mark's explanation, "two mites, which is a farthing," (αἰσθανόμενον, 5) it may perhaps be inferred that the κορώνης or farthing, was the common coin, for it can scarcely be supposed to be there spoken of as a money of account, though this might be the case in another passage (Matt. v. 26). In the Graeco-Roman coinage of Palestine, in which we include the money of the Herodian family, the two smallest coins, of which the assyrian is the more common, seem to correspond to the farthing and the mite, the larger weighing about twice as much as the smaller. This correspondence is made more probable by the circumstance that the larger seems to be reduced from the earlier "quarter of the Jewish coinage. It is noticeable, that although the supposed mites struck about the time referred to in the Gospels are rare, those of Alex Jannaeus's coinage are numerous, whose abundant money must have long continued in use. [MOSEY: FAITHING.]

MITHCAH (מלכה) [sweetness]: Mathan: [Vat. Mestekia; Alex. Misch] Metheth, the name of an unknown desert encampment of the Talmudists, meaning, perhaps, "place of sweetness" (Num. xxxvi. 28, 29).

MITHNITE, THE (ملك) [appel. extention]: Σαβαθαρία; Αλεξ. o Mithatari; F.A. o Beharshia; (Mishinatha), the designation of Jeshaphat, one of David's guards in the catalogue of 1 Chr. xi. (ver. 43). No doubt it signifies the native of a place or a tribe bearing the name of Mithen; but no trace exists in the Bible of any such. It should be noticed that Jeshaphat is both preceded and followed by a man from beyond Jordan, but it would not be safe to infer therefore that Mithen was also in that region.

MITHREDATH (Μιθρεδάθ, [see below]: Mithredath; [Alex. Vat. Mithridates] Mithridates). 1. The treasurer (ς, gizbar) of Cyrus king of Persia, to whom the king gave the vessels of the Temple, to be by him transferred to

of locality, which (or its plur. τα) is often found in names.
MIZAR, THE HILL

1973

The hands of Sheshlazarr (Ezr. i. 8). The I.XX. 
λεκτος γίγνεσθαι as a gentile name, Psal. 64:9, the 
Vulgata as a patronymic, miles greoter, but there is 
little doubt as to its meaning. The word occurs in 
a slightly different form in Dan. iii. 2, 3, and is 
there rendered "treasurer;" and in the parallel 
history of 1 Esdr. ii. 11, Mithredath is called MITHE- 
ridates the treasurer (ταράβαρος). The name 
Mithredath, "given by Mithra, is one of a class 
of names occurring in a frequent occurrence, formed 
from the name of Mithra, the Iranian sun-god.

2. A Persian officer stationed at Samaria, in 
the reign of Artaxerxes, or Smerdis the Magian (Ezr. 
iv. 7). He joined with his colleagues in prevailing 
upon the king to hinder the rebuilding of the 
Temple.

MITHRIDATES ([given by Mithra]: Mit- 
redatnu; [Vat.] Alex. Mithredatx: Mithridatou).
1. (1 Esdr. ii. 11) = MITHRIDATHE 1.
2. (1 Esdr. ii. 16) = MITHRIDATHE 2.

MITRE. [CROWN; HEAD-DRESS.]

MITYLENE (Μυτιλήνη, in classical authors 
and on inscriptions frequently Mωτιλήνη: [Mit- 
ylene, Cod. Amiat. Mytilene], the chief town 
of Lesbos, and situated on the east coast of the island. 
Its position is very accurately, though incidentally, 
marked (Acts xx. 14, 15) in the account of St. 
Paul's return-voyage from his third apostolical 
journey. Mitilene is the intermediate place where 
he stopped for the night between Assos and Chios. 
It may be gathered from the circumstances of 
this voyage that the wind was blowing from the N. W.; 
and it is worth while to notice that in the harbor 
or in the roadstead of Mitilene the ship would be 
sheltered from that wind. Moreover it appears that 
St. Paul was there at the time of dark moon: and 
this was a sufficient reason for passing the night 
there before going through the intricate passages 
to the southward. See Life and Epistles of St. 
Paul, ch. xx., where a view of the place is given, 
showing the fine forms of the mountains behind. 
The town itself was celebrated in Roman times for 
the beauty of its buildings ("Mitylene pulchra," 
Hor. Epist. i. xi. 17; see Cic. c. Rabl. ii. 16). In 
St. Paul's day it had the privileges of a free city 
(Plin. N. H. vi. 39). It is one of the few cities of 
The Egean which have continued without interruption 
its mission to flourish till the present day. It has 
given its name to the whole island, and is itself 
now called sometimes Christe, sometimes Mityle. 
Tournefort gives a rude picture of the place as it 
appeared in 1700 (Voyage du Levant, i. 148, 149). 
It is more to our purpose to refer to our own Ad-
miralty charts, Nos. 1665 and 1654. Mitilene 
concentrates in itself the chief interest of Lesbos, 
an island peculiarly famous in the history of poetry, 
and especially of poetry in connection with music. 
But for these points we must refer to the articles in 
The Dict. of Geography.

J. S. H.

MIXED MULTITUDE. With the Israel- 
ites who journeyed from Ramesses to Succoth, 
the first stage of the Exodus from Egypt, there went 
up (Ex. xii. 38) "a mixed multitude" (τῶν μικτῶν: 
εἰμικτός: vultus promiscus), who have not 
otherwise been identified. In the Targum the phrase 
is vaguely rendered "many foreigners," and Job 
explains it as "a medley of outlandish people."
Aben Ezra goes further and says it signifies "the 
Egyptians who were mixed with them, and they 
are the 'mixed multitude' (העם המיקט, Num. xi. 
4), who were gathered to them." Jarchi on the 
latter passage also identifies the "mixed multi-
tude" of Num. and Exodus. During their resi-
dence in Egypt marriages were naturally contracted 
between the Israelites and the natives. The position 
of such a marriage between an Israeliitish woman 
and an Egyptian is especially mentioned as being 
sanctioned by stoning for blasphemy (Lev. xxiv. 11), the same law 
holding good for the resident or naturalized foreign-
er as for the native Israelite (Josh. vii. 35). This 
hybrid race is evidently alluded to by Jarchi and 
Aben Ezra, and is most probably that to which 
reference is made in Exodus. Knauss understands 
by the "mixed multitude" the remains of the 
Hyksos who left Egypt with the Hebrews. Dr. 
Kalisch (Com. on Ex. xii. 38) interprets it of the 
native Egyptians who were involved in the same 
opposition with the Hebrews by the new dynasty, 
which invaded and subdued Lower Egypt; and 
Kurtz (Hist. of Old Cot. ii. 312, Eng. tr.), while 
he supposes the "mixed multitude" to have been 
Egyptians of the lower classes, attributes their 
emigration to their having "endured the same 
oppression as the Israelites from the proud spirit of 
caste which prevailed in Egypt," in consequence of 
which they attached themselves to the Hebrews, 
"and served henceforth as hewers of wood and 
drawers of water." That the "mixed multitude" 
is a general term including all those who were not 
of pure Israelite blood, is evident; more than this 
cannot be positively asserted. In Exodus and 
Numbers it probably denoted the miscellaneous 
hangers-on of the Hebrew camp, whether they were 
the issue of spurious marriages with Egyptians, or 
were themselves Egyptians or belonging to other 
nations. The same happened on the return from 
Babylon, and in Neh. xii. 3, a slight clue is given 
by which the meaning of the "mixed multitude" 
may be more definitely ascertained. Upon reading 
in the Law "that the Ammonite and the Moabite 
should not come into the congregation of God for 
ever," it is said, "they separated from Israel all 
the mixed multitude." The remainder of the chap-
ter relates the expulsion of Tobiah the Ammonite 
from the Temple, of the merchants and men of 
Tyre from the city, and of the foreign wives of Asa-
dod, of Amunon, and of Moab, with whom the Jews 
had intermarried. All of these were included in 
the "mixed multitude," and Nehemiah adds, 
"thus cleansed I them from all foreigners." The 
Targ. Jon. on Num. xi. 4, explains the "mixed 
multitude" as proselytes, and this view is appar-
tently adopted by Ewald, but there does not seem 
any foundation for it.

W. A. W.

MIZAR, THE HILL (מִזָּר, "hill": המזא, [Vat.] מזא, 
[mountain small]; הָרָה [heber], modern היר; 
א', mountain — for the reader will 
observe that the word is hir in the original (see 
vol. ii. in 1978 a) — apparently the northern 
part of trans-Jordania Palestine, from which 
the author of Psalm xlii. utters his pathetic appeal 
(ver. 6). The name appears nowhere else, and 
the only clue we have to its situation is the men-
tion of the "land of Jordan" and the "Hermas," 
combined with the general impression conveyed 
by the Psalm that it is the cry of an exile "from 
Jerusalem" in the Peshito-Syriac it bears the title, "The 
Psalm which David sang when he was in exile, and 
longing to return to Jerusalem."
The name MIZPAH and MIZPEH. The name borne by several places in ancient Palestine. Although in the A. V. most frequently presented as MIZPAH, yet in the original, with but few exceptions, the name is Mizpah, and with equally few exceptions is accompanied with the definite article — מזֶפָ֣ה, מִזְפָּה, הַמִּזְפָּה, [i. e. the watch tower].

1. Mizpah (מֵיצָפָה) i Sam. 4:17; Josh. 21:15; 1 Chron. 6:70; 2 Chron. 16:11; Neh. 11:32; Jer. 22:3; Zech. 1:17; Mic. 6:10, etc.; also as מֵיצָפָּה (מֵיצָפָה), 2 Chron. 32:31; 2 Kings 16:5, 18; also מֵיצָפַּה, 2 Kings 19:21; 2 Chron. 32:30; 33:7; Ezra 10:17. It is derived from the root מָצַּף, to view, to look upon, and signifies a watch-tower. The root has also the signification of breadth, expansion. But that the original name had the same signification as it possesses in its Hebrew form is, to say the least, unlikely; because in such linguistic changes the meaning always appears to be secondary to the likeness in sound.

Of this early name, whatever it may have been, we find other traces on both sides of Jordan, not only in the various Mizpahs, but in such names as Zophim, which we know formed part of the littoral possessions of Zophah, a town of Judah (Josh. 15:36); Zophim and Ramathaim-Zophim, in the neighborhood of Mizpah of Benjamin; Zophathah in the neighborhood of Mizpeh of Judah; possibly also in Safed, the well-known city of Galilee.

But, however this may be, the name remained attached to the ancient meeting-place of Jacob and Laban, where the pact between their sons was made and in the Prayer-Book Kanes of the Church of England appears in the inaccurate form of "the little hill of Hermon."

MIZPAH and MIZPEH. The name borne by several places in ancient Palestine. Although in the A. V. most frequently presented as MIZPAH, yet in the original, with but few exceptions, the name is Mizpah, and with equally few exceptions is accompanied with the definite article — מֵיצָפָּה, מִזְפָּה, הַמִּזְפָּה, [i. e. the watch tower].

1. Mizpah (מֵיצָפָה) i Sam. 4:17; Josh. 21:15; 1 Chron. 6:70; 2 Chron. 16:11; Neh. 11:32; Jer. 22:3; Zech. 1:17; Mic. 6:10, etc.; also as מֵיצָפָּה (מֵיצָפָּה), 2 Chron. 32:31; 2 Kings 16:5, 18; also מֵיצָפַּה, 2 Kings 19:21; 2 Chron. 32:30; 33:7; Ezra 10:17. It is derived from the root מָצַּף, to view, to look upon, and signifies a watch-tower. The root has also the signification of breadth, expansion. But that the original name had the same signification as it possesses in its Hebrew form is, to say the least, unlikely; because in such linguistic changes the meaning always appears to be secondary to the likeness in sound.

Of this early name, whatever it may have been, we find other traces on both sides of Jordan, not only in the various Mizpahs, but in such names as Zophim, which we know formed part of the littoral possessions of Zophah, a town of Judah (Josh. 15:36); Zophim and Ramathaim-Zophim, in the neighborhood of Mizpah of Benjamin; Zophathah in the neighborhood of Mizpeh of Judah; possibly also in Safed, the well-known city of Galilee.

But, however this may be, the name remained attached to the ancient meeting-place of Jacob and Laban, where the pact between their sons was made and in the Prayer-Book Kanes of the Church of England appears in the inaccurate form of "the little hill of Hermon."
chosen for the purpose? Suppose a Mizpah near Gil'eal, and the subject is full of difficulty: remove
it to the place of Jacob and Laban's meeting, and the difficulties disappear; and the allusions to
Gilead (xx. 1), to Jal'eish-Gilead (xxi. 8, &c.), and to Shiloh, as 'in the land of Canaan,' all fall nat-
urally into their places and acquire a more force.
Mizpah is probably the same as Ramah-Miz-
peh (רַמָּה מְזֹפָה יָמֹתָה), mentioned Josh. xiii. 26 only.
The prefix merely signifies that the spot was an
elevated one, which we already believe it to have been; and if the two are not identical, then we
have the anomaly of an enumeration of the chief
places of Gilead with the omission of its most
famous sanctuary. Ramah ham-Mizpeh was most
probably identical also with Ramoth-Gilead: but
this is a point which will be most advantageously
discussed under the latter head.
Mizpah still retained its name in the days of the
Maccabees, by whom it was besieged and taken
with the other cities of Gilead (1 Mace. v. 35). From
Eusebius and Jerome (Onomasticon, "Maspha")
it receives a bare mention. It is probable, both
from their notices (Onomasticon, "Rammoth")
and from other considerations, that Ramoth-Gilead
is the modern es-Sult; but it is not ascertained
whether Mizpah is not rather the great mountain
Jebel 'a Dheh, a short distance to the northwest.
The name *Nafat* appears in Van de Velde's map a
few miles east of es-Sult.
A singular reference to Mizpah is found in the
title of Ps. lx., as given in the Targum, which runs
as follows: "For the ancient testimony of the sons
of Jacob and Laban . . . when David assembled
his army and passed over the heap of witness."
2. A second Mizpeh, on the east of Jordan, was
the Mizpeh-Moab (מִזְפֵה מֹאָב), known to the Hebrews
[comp. Ad. מָזוֹפָה; cf. נְיָן מְזֹפָה; Ziqqyat
Miszafah near el Moab], where the king of that nation
was living when David committed his parents to his
care (1 Sam. xxii. 3). The name does not occur
again, nor is there any clue to the situation of the
place. It may have been, as is commonly con-
jectured, the elevated and strong natural fortress
afterwards known as Khes-Moab, the modern Kerak.
But it is not at least equally possible that it was the great Mount Pisgah, which was the most
commanding eminence in the whole of Moab,
which contained the sanctuary of Nebo, and of
which one part was actually called Zophim (Num.
xxii. 14), a name derived from the same root with
Mizpah?
3. A third was the Land of Mizpeh, or
more accurately "of Mizpeh" (מִזְפֵה יֵלָד),
the residence of the Hivites who joined the
northern confederacy against Israel, headed by
Jabin king of Hazor (Josh. xi. 3). No other men-
tion is found of this district in the Bible, unless it
be identical with
4. The Valley of Mizpeh (מִזְפֵה יֵלָד):
implied in the later history (1 K. xxv. 22; 2 Chr. xvi. 6; Neh. iii. 7). It was one of the places fortified by Asa against the incursions of the kings of the northern Israel (1 K. xxv. 22; 2 Chr. xvi. 6; Jer. xii. 10); and after the destruction of Jerusalem it became the residence of the superintendent appointed by the king of Babylon (Jer. xli. 7, 8c.), and the scene of his murder and of the romantic incidents connected with the name of Ishmael the son of Neltah.

But Mizpah was more than this. In the earlier periods of the history of Israel, at the first foundation of the monarchy, it was the great sanctuary of Jehovah, the special resort of the people in times of difficulty and solemn deliberation. In the Jewish traditions it was for some time the residence of the ark (see Jerome, Qu. Hebr. on 1 Sam. vii. 2; Renan, Judg. i. § 8); but this is possibly an inference from the expression "before Jehovah" in Judg. xx. 1. It is suddenly brought before us in the history. At Mizpah, when suffering the very extremities of Philistine bondage, the nation assembled at the call of the great Prophet, and with strange and significant rites confessed their sins, and were blessed with instant and signal deliverance (1 Sam. vii. 5-13). At Mizpah took place no less an act than the public selection and appointment of Saul as the first king of the nation (1 Sam. x. 17-25). It was one of the three holy cities (LXX. τοις ἱερασίμων ταύταις) which Samuel visited in turn as judge of the people (vii. 6, 16), the other two being Bethel and Gilgal. But, unlike Bethel and Gilgal, no record is preserved of the cause or origin of a sanctuary so abruptly announced, and yet so fully asserted. We have seen that there is at least some ground for believing that the Mizpah spoken of in the transactions of the early part of the period of the judges, was the ancient sanctuary in the mountains of Gilead. There is, however, no reason for, or rather every reason against, such a supposition, as applied to the events last alluded to. In the interval between the destruction of Gibeon and the rule of Samuel, a very long period had elapsed, during which the ravages of Ammonites, Amalekites, Moabites, and Midianites (Judg. iii. 13, 14, vi. 1, 4, 33, 9.) in the districts beyond Jordan, in the Jordan Valley itself at both its northern and southern ends—at Jericho no less than Jezreel—and along the passes of communication between the Jordan Valley and the western table-land, must have rendered communication between west and east almost, if not quite, impossible. Is it possible that as the old Mizpah became inaccessable, an eminence nearer at hand was chosen and invested with the sanctity of the original spot and used for the same purposes? Even if the name did not previously exist there in the exact shape of Mizpah, it may easily have existed in some shape sufficiently near to allow of its formation by a process both natural and frequent in Oriental speech. To a Hebrew it would require a very slight induction to change Zophim or Zaph—both of which names were attached to places in the tribe of Benjamin—to Mizpah. This, however, must not be taken for more than a mere hypothesis. And against it there is the serious objection that if it had been necessary to select a holy place in the territory of Ephraim or Benjamin, it would seem more natural that the choice should have fallen on Shiloh, or on Bethel, than on one which had no previous claim but that of its name.

With the conquest of Jerusalem and the establishment there of the Ark, the sanctity of Mizpah, or at least its reputation, seems to have declined. The men of Mizpah" (Neh. iii. 7), and the altar of Mizpah," and also of "part of Mizpah" (19 and 15)—assisted in the solution of the wall of Jerusalem. The latter expressions perhaps point to a distinction between the sacred and the secular parts of the town. The allusion in ver. 7 to the "throne of the governor on this side the river" in connection with Mizpah is curious, and recalls the fact that Gedaliah, who was left in charge of Palestine by Nebuchadnezzar, had his abode there. But we hear of no religious act in connection with it till that affecting assembly called together thither, as to the ancient sanctuary of their forefathers, by Judas Maccabeus, "when the Israelites assembled themselves together and came to Massepha over against Jerusalem; for in Maspha there was aforetime a place of prayer (παρεόρατος προσευχής) for Israel" (1 Macc. iii. 40). The historian, in the second person, says that there was no place in the history of Mizpah than the circumstances of the city, seems to require that from Mizpah the City or the Temple was visible: an indication of some importance, since, scanty as it is, it is the only information given us in the Bible as to the situation of the place. Josephus omits all mention of the circumstance, but on another occasion he names the place as "a place to corroboration of the inference. It is in his account of the visit of Alexander the Great to Jerusalem (Ant. xi. 8, § 5), where he relates that Judah the high-priest went to meet the king "to a certain place called Supha (Συφα);" which name, if interpreted in the Greek tongue, signifies a lookout place (παρεόρατος), for from thence both Jerusalem and the sanctuary are visible. Supha is doubtless a corruption of the old name Mizpah through its Greek form Mieza; and there can be no reasonable doubt that this is also the spot which Josephus on other occasions—adopting as he often does the Greek equivalent of the Hebrew name as if it were the original (witness the Συκορεας, Ηπαράκτης, Βαρκατάνθος, etc., etc.)—mentions as a properly named Seopus (Σεοπας), because from it a clear view was obtained both of the city and of the great size of the Temple (II. J. v. 2, § 3). The position of this hill gives minutely, at least twice (II. J. vi. 19, § 4, and v. 2, § 3), as on the north quarter of the city, and about 7 stadia therefrom; that is to say, as is now generally agreed, the broad ridge which forms the continuation of the Mount of Olives to the north and east, from which the traveller gains, like Titus, his first view, and takes his last farewell, of the domes, walls, and towers of the Holy City.

Any one who will look at one of the numerous photographs of Jerusalem taken from this point, will satisfy himself of the excellent view of both city and temple which it commands: and it is the
only spot from which such a view is possible, which
could answer the condition of the situation of Mizpah. Neh. Sowell, for which Dr. Robinson argues
(B. R. I. 460), is at least five miles, as the crow
flies, from Jerusalem; and although Neh. Sowell站立
the domes of the -Church of the Sepulchre,'
and even that of the Sakrah can be discerned, the
t dista ce is too great to allow us to accept it as a
spot — over against Jerusalem,' or from which
either city or temple could with satisfaction be in
spected. Nor is the moderate height of Scopus, as
compared with Neh. Sowell, any argument against it, for we do not know how far the height of
a high place was attributed to its sanctity, or indeed what that sanctity exactly consisted in. On
the other hand, some corroboration is afforded to the
identification of Scopus with Mizpah, in the
fact that Mizpah is twice rendered by the LXX.
tKoIriD.
Titus's approach through the villages of ancient
Benjamin was, as far as we can judge, a close
parallel to that of an earlier enemy of Jerusalem —
Sennacherib. In his case, indeed, there is no
mention of Mizpah. It was at Non that the Assyrian
king remained for a day feasting his eyes on "the
house of Zion and the hill of Jerusalem," and men-
acing with "his hand" the fair boasting of the
But so exact is the correspondence, that it is diffi-
cult not to suspect that Noh and Mizpah must have
been identical, since that part of the rising ground
north of Jerusalem which is crossed by the northern
road is the only spot from which a view of both
city and temple at once can be obtained, without
making a long detour by way of the Mount of
Olives. This, however, will be best discussed under
Non. Assuming that the hill in question is the Scopus of Josephus, and that that again was the
Mizpah of the Hebrews, the skópei (tKosipid) and
Meiosispath of the LXX translators, it is certainly
startling to find a village named SkijDeath lying on
the north slope of the mountain a very short dis-
tance below the summit — if summit it can be
called — from which the view of Jerusalem, and of
Zion (now occupied by the Sakrah), is obtained.
Can SkijDeath, or SkijDeath, be, as there is good reason
to believe in the case of Tell es-SájDeath, the remains
of the ancient Semitic name? Our knowledge of the
topography of the fifth, sixth, and seventh cen-
turies B.C. in and around Jerusalem, is so very imperfect
that the above can only be taken as suggestions
which may not be unworthy the notice of future
explorers in their investigations.
Professor Stanley appears to have been the first
to suggest the identity of Scopus with Mizpah
(S. p. 1st ed. 222). But since writing the
above, the writer has become aware that the same
view is taken by Dr. Boniface in his Land of Promise
(Appendix, § viii.). This traveller has investigated

the subject with great ability and clearness; and
he points out one circumstance in favor of Scopus
being Mizpah, and against Neh. Sowell, which
had escaped the writer, namely, that the former lay
directly on the road of the pilgrims from Samaria
to Jerusalem who were murdered by Ishmael (Jer.
xlii. 7), while the latter is altogether away from it.
Possibly the statement of Josephus (see vol. ii. p.
1173 a) that it was at Hebrom, not Gibeon, that
Ishmael was overtaken, coupled with Dr. B.'s own
statement as to the pre-occupation of the districts
east of Jerusalem — may remove the only scruples
which he appears to have entertained in the identi-
fication of Scopus with Mizpah.

G.

MIZPEAR (מזרמ [number]: Mazar) [Vat. Mapgrap [Meaphar]. Properly Mizpah, as
in the A. V. of 1611 and the Geneva version; the
same as MIZPETH (Ezr. ii. 2).

MIZPEH (MZzrph).

MIZRAIM (מזריאמ [see below]: Mizpah; Mezraim), the usual name of Egypt in the O. T.,
the dual of Mazor, מזרע, which is less frequently
employed: gent. noun, מזרע. If the etymology of Mazor be sought in Hebrew
it might be explained by "mazurah," "bolwark," or"citadel," or again "distress;" but no one of these
meanings is apposite. We prefer, with Gesenius
(Thes. s. v. מזרע), to look to the Arabic, and
we extract the article on the corresponding word
from the Kânoos, מזרע, a partition between
two things, as also מזרע: a limit between two
lands: a receptacle: a city or a province [the ex-
planation means both]: and red earth or mud.
The well-known city [Memphis]." Gesenius ac-
cepts the meaning "limit" or the like, but it is
hard to see its fitness with the Semites, who had
no idea that the Nile or Egypt was on the border
of two continents, unless it be supposed to denote
the divided land. We believe that the last mean-
ing but one, "red earth or mud," is the true one,
from its correspondence to the Egyptian name of
the country, KEM, which signifies "black," and
was given to it for the blackness of its alluvial soil.
It must be recollected that the term "red"
מזרע [Mizraim] is not used in the Kânoos, or indeed in
Semitic phraseology, in the limited sense to which
Indo-European ideas have accustomed us; it
embraces a wide range of tints, from which we call red

"a Dr. Valentine, for several years a missionary at
Jerusalem, and familiar with the topography of the
region, agrees with Dr. Robinson that Neh. Sowell is the
ancient Mizpah. See Zeitschr. der deutsch. M.
Geschled. xii. 164. Van de Velde thinks this to be the
right opinion (Syr. and Pal. ii. 53). This Neh. Sowell
is so marked a feature of the landscape, that it may
well justify the term "confest" (confront, see above)
he observes as he looks towards it from Jerusalem.
The impression in such a case depends less on the dis-
tance than on the position and conspicuousness of the
object. See wood-cut, vol. i. p. 917. H.

b In the East, at the present time, a susetly is
attached to the spot from which any holy place is
visible. Such spots may be met with all through the
hills a few miles north of Jerusalem, distinguished by
the little heaps of stones erected by thoughtful or pious
Mussulmans. (See Miss Beaufort's Egypt. Scapulars,
etc. ii. 88.)

\[c\] This is the spelling given by Van de Velde in his
map. Robinson gives it as Sizfat (i. e. with the Jen),
and Dr. Eli Smith, in the Arabic lists attached to
Robinson's 1st edition (iii. App. 121), Sizfát.

\[d\] It occurs only 2 K. xix. 24; Is. xix. 6, xxxvi
25; Mic. vii. 12."
to a reddish brown. So, in like manner, in Egyptian the word "black" signifies dark in equally wide sense. We have already shown that the Hebrew word Ham, the name of the ancestor of the Egyptians, is evidently the same as the native appellation of the country, the former signifying "warm" or "hot," and a cognate Arabic word, ميزر، meaning "black feit mud" (Kenes, or "black mud" (Sith. Ms.), and suggested that Ham and Mazer may be identical with the Egyptian KEM (or KHEM), which is virtually the same in both sound and sense as the former, and of the same sense as the latter. [EGYPT.] How then are we to explain this double meaning of the Ann of the island of the bow? Plainly light upon the question. We had already some reason for conjecturing that there were Semitic equivalents, with the same sense, for some of the Egyptian geographical names with which the Semites were well acquainted. M. de Rongé has ascertained that Zoon is the famous Shepherd-stronghold Avaris, and that the Hebrew name לֵהוֹן, from לֵהוֹנָא, "he moved tents, went forward," is equivalent to the Egyptian one H.A-WAB, "the place of departure" (Revue Archéologique, 1861, p. 290). This discovery, it should be noticed, gives remarkable significance to the passage, "Now Hebron was built seven years before Zoon in Egypt" (Num. xiii. 22). Perhaps a similar case may be found in Kush and Phut, both of which occur in Egyptian as well as Hebrew. In the Bible, African Cush is Ethiopia above Egypt, and Phut, an African people or land connected with Egypt. In the Egyptian inscriptions, the same Ethiopia is KESSI, and an Ethiopian people is called ANU-DET-MERU, "the Anu of the island of the bow," an extraordinary tend in its course. We have no Egyptian or Hebrew etymology for KESSI, or Cush, unless we may compare מַעְוָלֵת, which would give the same connection with bow that we find in Phut or PET, for which our only derivation is from the Egyptian PET, "a bow." There need be no difficulty in thus supposing that Mizraim is merely the name of a country, and that Ham and Mizzr may have been the same person, of the very form of Mizraim forbids any but the letter idea, and the tenth chapter of Genesis is obviously not altogether a genealogical list, but a collection of etymologies that have been sought in vain for Mizraim.
MIZRAIM

MNAISON

1979

Indian Ocean, and which explains the affinity the Egyptian monuments show us between the pre-Hellenic Cretans and Carians (the latter no doubt the Leleges of the Greek writers) and the Phoibis-
tine Cyprians.

The history and ethnology of the Mazzaraite na-
tions have been given under the article H.A.M., so that here it is not needful to do more than draw attention to some remarkable particulars which did not fall under our notice in treating of the early Egyptians. We find from the monuments of Egypt that the white nations of western Africa were of what we call the Semitic type, and we must therefore be careful not to imagine that they formed part of the stream of Arab colonization that has for full two thousand years steadily flowed into northern Africa. The preceding race that first passed from Egypt to the west, though physically like, was mentally different from the true pastoral Arab, and to this day the two elements have kept apart, the townpeople of the coast being unable to settle amongst the tribes of the interior, and these tribes again being as unable to settle on the coast.

The affinity of the Egyptians and their neigh-
bors was long a safeguard of the empire of the Pharaohs, and from the latter, whether Cretans, Libnun, or people of Phut and Cush, the chief mercenaries of the Egyptian armies were drawn; facts which we mostly learn from the Bible, confirmed by the monuments. In the days of the Persian dominion Libyan Inaros made a brave stand for the liberty of Egypt. Probably the tie was more one of religion than of common descent, for the Egyptian belief appears to have mainly prevailed in Africa as far as it was civilized, though of course changed in its details. The Philistines had a different religion, and seem to have been identified in this matter with the Caramites, and thus they may have lost, as they seem to have done, their attachment to their mother country.

In the use of the names Mazon and Mizraim for Egypt there can be no doubt that the dual indicates the two regions into which the country has always been divided by nature as well as by its inhabitants. Under the Greeks and Romans there was indeed a third division, the Heptanomia, which has been called Middle Egypt, as between Upper and Lower Egypt, but we must rather regard it as forming, with the Thebais, Upper Egypt. It has been sup-
posed that Mazon, as distinct from Mizraim, signi-

fies Lower Egypt; but this conjecture cannot be maintained. For fuller details on the subject of this article the reader is referred to H.A.M., Egypt, and the articles on the several Mazzaraite nations or tribes.

R. S. P.

* According to Dr. Geo. Ebers, of Jena, who has made this name the subject of a thorough and learned discussion (L. 20, etc., die Bücher Ms se), Mizraim was a Semitic term, which origi-
nated entirely outside of Egyptian forms of speech, and was probably suggested by that feature of Egypt which would most powerfully impress a people living to the east of the Nile. In striking contrast with the tribes of Northern Arabia which roved from place to place, following the herbage for their flocks, Egypt was an inclosed and seceded country. At an early period the Pharaohs forti-
ified themselves against the incursions of Asiatic tribes, and for a long time they were extremely jealous even of commerce with foreigners. Hence the most secluded country known to the Semitic peoples received the name of the Inclosed, the Forti-
tified — the name Mizraim being derived from מזראים. Knobel, who gives the same derivation, traces the idea of inscription (Einschlickung), to the geographical configuration of the country, as shut in within the hills and the desert — the double chain of mountains suggesting the dual form — or possibly this may have been intended to mark the contrast between the Nile Valley and the Delta. To this, however, it is objected by Ebers, that for long Rosicrucians unite the inclosures with the Hyksos, Egypt was known to the Phoenicians and other nations of the East, only through its Delta. Indeed Pliny and other classic writers speak of the Thelbad as a distinct country, and not as a part of Egypt itself. Hence to account for the dual form of Mizraim, Ebers falls back upon the double line of fortifications that guarded the Islands of Suez; the one terminating at Helenspolis, the other at Klyma, at the head of the gulf, near the site of the modern Suez. The dual would then signify the doubly-fortified. If this hypothesis is not tena-
ble, then the dual form may have been derived from the twofold division which appeared very early in the political constitution of the country, and under the consolation of empire was still represented by the colors and symbols of the double-crown. [Egypt. ]

The fundamental idea of the inclosed country being retained, the term was adapted to this double form. The Hebrews, already familiar with this Semitic notion of Egypt, received their first impres-
sions of the country from that doubly-fortified section which was their allotted home, and they naturally adhered to a descriptive name which is not found in the hieroglyphics, nor explained by the Coptic, and which probably the old Egyptians never employed to designate their native land. In I. xi. 11 and Jer. xiv. 15 the plural Mizraim appears to be used for the Delta alone.

J. P. T.

MIZZAH [מְזוֹזָה] [מְזוֹז] [Mo'ez]: Alex. Moze [and Vat. Q'ose] in 1 Chr.: Mezaw. Son of Renel and grandson of Esau; descended likewise through Ishmael. He was one of the "dixers" or chiefs of tribes in the land of Edom (Gen. xxviii. 14, 17; 1 Chr. i. 37). The name of this descent is believed by Mr. Forster (Hist. Geog. of Arab. ii. 55) to be indi-
cated in the μεζώτης κόπος, or Phrat-Mazon, at the head of the Persian Gulf.

MNAISON (Μνασών) is honorably mentioned in Scripture, like Gains, Lydia, and others, as one of the hosts of the Apostle Paul (Acts xii. 19). One or two questions of some little interest, though of no great importance, are raised by the context. It is most likely, in the first place, that his resi-
dence at this time was not Caesarea, but Jerusalem. He was well known to the Christians of Caesarea, and they took St. Paul to his house at Jerusalem.

To translate the words Μνασών παύς ἐκενθάμων, as in the A. V., remains impossible grammatically, and introduces a slight improbability into the nar-
Rative. He was, however, a Cyprian by birth, and may have been a friend of Barnabas (Acts iv. 30), and possibly brought to the knowledge of Chris-
tianity by him. The Cyprians who are so promi-

ently mentioned in Acts xi. 19, 20, may have included Mason. It is not unlikely that Paul should have been converted during the journey of Paul, and Barnabas through Cyprus (Acts xiii. 4-13).
otherwise the Apostle would have been personally acquainted with him, which does not appear to have been the case. And the phrase ἀαφαραί τοῦ Ἵγνου points to an earlier period, possibly to the day of Pentecost (compare ἀφαραί, Acts xxi. 25), as distinctly to correspond with our references to himself. (2 Pet. iii. 18.)

MOAB (orgetown [see below]; Μωάβ; Jos-ephus, Macalister; Moab,} the name of the son of Lot’s youngest daughter, the elder brother of Ben-Annin, the progenitor of the Ammonites (Gen. xlix. 7); but it is supposed that the family does not trace its descent from him, though the name = Moabite = is in both the original and A. V. more frequently used for them.

No explanation of the name is given us in the original record, and it is not possible to throw an interpretation into it unless by some accommodation. Various explanations have however been proposed. (a.) The LXX. insert the words ἕλεγεν ὁ τῶν πατρὸς μου, “saying from my father,” as if Moab. This is followed by the old interpreters: as Josephus (Ant. i. 11, § 8), Jerome’s (Quast. Hebr. in Genesis, the gloss of the Pseu- doros, Targum, and in modern times by De Wette (Schil., Tisch. (Gen. p. 370), and J. D. Michaelis (ii. für Ungedruckten). (b.) By Hiller (Onom. p. 414), Simonis (Onom. p. 479). It is derived from Moab, ingressus, i. e. coitus, patris.” (c.) Rosenmuller (see Schumann, Genesis, p. 292) proposes to treat 752 = equivalent for Moab, in accordance with the figure employed by Balaam in Num. xxiv. 7. This is countenanced by Jerome— sanguis paternus (Onom. in Mic. vi. 8) — and has the great authority of Gesenius in its favor (Thes. p. 750 a); also of Fürst (Handbuch, p. 707) and Bunsen (Biblียchen). (d.) A derivation, probably more correct etymologically than either of the above, is that suggested by Maurer from the root 763, to desire — the desirable land — with reference to the extreme fertility of the region occupied by Moab. (See also Fürst, Handbuch, p. 707 b.) No hint, however, has yet been discovered in the Bible records of such an origin of the name.

Zoor was the cradle of the race of Lot.8 The situation of this place appears not to have been altered by the district east of the Jordan, and to the north or northeast of the Dead Sea. [Zoor.] From this centre the brother tribes spread themselves. Amon, whose disposition seems throughout to have been more peaceful and unsettled, went to the northeast and took possession of the pastures and waste tracts which lay outside the district of the mountains; that which in earlier times seems to have been known as Ham, and inhabited by the Zusim or Zammumim (Gen. xiv. 5; Deut. ii. 20). Moab, whose habits were more settled and peaceful, remained nearer their original seat. The rich highlands which crown the eastern side of the chasm of the Dead Sea, and extend northwards as far as the foot of the mountains of Gilgal, appear at the earliest date to have borne a name, which in its Hebrew form is presented to us as Shaveh-Kiriathaim, and to have been inhabited by a branch of the great race of the Kephaim. 8 This is an inadvertence. The "cradle of the race of Lot" was in the mountain above. S. W.

9 For an examination of this remarkable passage in some respects without a parallel in the Old Testament, see Numbers.
of its greatest extent, before the invasion of the Amorites, divided itself naturally into three distinct and independent portions. Each of these portions appears to have had its name by which it is almost invariably designated. (1.) The enclosed corner or canton south of the Arnon was the "field of Moab" (Ruth i. 1, 2, 6, &c.). (2.) The more open rolling country north of the Arnon, opposite Jericho, and up to the hills of Gilgal, was the "land of Moab" (Deut. i. 5, xxxii. 49, &c.). (3.) The sunk district in the tropical depths of the Jordan Valley, taking its name from that of the great valley itself—the Arabah—was the Arboth-Moab, the dry regions—in the A. V. very incorrectly rendered the "plains of Moab" (Num. xxii. 1, &c.).

Outside of the hills, which inclosed the "field of Moab," or Moab proper, on the southeast, and which are at present called the Jebel Urâ-Yaraîgh and Jebel el-Tarîjîgh, by the vast pasture grounds of the waste uncultivated country or "Midian," which is described as "tame Moab" on the east (Num. xxi. 11). Through this latter district Israel appears to have approached the Promised Land. Some communication had evidently taken place, though of what nature it is impossible clearly to ascertain. For while in Deut. ii. 28, 29, the attitude of the Moabites is mentioned as friendly, this seems to be contradicted by the statement of xxiii. 4, while in Judg. x. 17, again, Israel is said to have sent from Kadesh asking permission to pass through Moab, a permission which, like Edom, Moab refused. At any rate the attitude perpetuated by the provision of Deut. xxiii. 3—a provision maintained in full force by the latest of the Old Testament reformers (Neh. xiii. 1, 2, 23) — is one of hostility.

But whatever the communication may have been, the result was that Israel did not traverse Moab, but turning to the right passed outside the mountains through the "wilderness," by the east side of the territory above described (Deut. ii. 8; Judg. xii. 18), and finally took up their position in the country north of the Arnon, from which Moab had so lately been ejected. Here the headquarters of the nation remained for a considerable time while the conquest of Bashan was being effected. It was during this period that the visit of Balaam took place. The whole of the country east of the Jordan, with the exception of the one little corner occupied by Moab, was in possession of the invaders, and although at the period in question the main body had descended from the upper level to the plains of Shittim, the Arboth-Moab, in the Jordan Valley, yet a great number must have remained on the upper level, and the towns up to the very edge of the ravine of the Arnon were still occupied by their settlements (Num. xxxi. 24; Judg. xi. 26). It was a situation full of alarm for a nation which had already suffered so severely. In his extremity the Moabite king, Balak—whose father Zipper was doubtless the chieftain who had lost his life in the encounter with Sihon (Num. xxi. 26)—appealed to the Midianites for aid (Num. xxxi. 2—4).

MOAB

MOAB 1981

account of the spoil taken from them (Num. xxxi. 24—45). The account of the pastoral life of Moab, even at this early period, see the expressions in Mic. vi. 6, 7.

c See Targum Pseudojonathan on Num. xxxi. 4.
d Balama's words (Mic. vi. 8) are nearly identical with those quoted by our Lord Himself (Matt. ix. 10 and xii. 7).

a The word  "מָמָאlık" (A. V. "corners") is twice used with respect to Moab (Num. xxxiv. 17; Jer. xlviii. 45). No one appears yet to have discovered its force in this relation. It can hardly have any connection with the name of the territory as noticed in the text.

b Midian was eminently a pastoral people. See the
It is remarkable that Moses should have taken this view of the Promised Land from a Moabite sanctuary, and been buried in the land of Moab. It is singular too that his resting-place is marked in the Hebrew Records only by its proximity to the sanctuary, and the fact that of all his lifetimes he had been such an enemy. He lies in a ravine in the land of Moab, facing Beth-Peor, i.e., the abode of Balaam (Deut. xxxiv. 6).

After the conquest of Canaan the relations of Moab with Israel were of a mixed character. With the tribe of Benjamin, whose possessions at their eastern end were separated from those of Moab only by the Jordan, they had at least one severe struggle, in union with their kindred the Ammonites, and also, for this time only, the wild Amalekites from the south (Judg. iii. 12–30). The Moabite king, Eglon, actually ruled and received tribute in Jericho for eighteen years, but at the end of that time he was killed by the Benjamite hero Ehud, and the return of the Moabites being intercepted at the fords, a large number were slaughtered, and a stop put to such incursions on their part for the future.

A trace of this invasion is visible in the name of Chephir-la-Ammonii, the hamlet of the Ammonites, one of the Benjaminite towns; and another is possibly preserved even to the present day in the name of Ma'konim, the modern representative of Memhosh, which is by some scholars believed to have received its name from Chemosh the Moabite deity.

The feud continued with true oriental pertinacity to the time of Saul. Of his slaughter of the Ammonites we have full details in 1 Sam. xi., and amongst his other conquests Moab is especially mentioned (1 Sam. xiv. 47). There is not, however, as we should expect, any record of it during Ishboseth’s residence at Mahanaim on the east of Jordan.

But while such were their relations to the tribe of Benjamin, the story of Ruth, on the other hand, testifies to the existence of a friendly intercourse between Moab and Bethlehem, one of the towns of Judah. The Jewish tradition ascribes the death of Mahlon and Chilion to punishment for having broken the commandment of Dent. xxiii. 3, but no trace of any feeling of the kind is visible in the Book of Ruth itself—which not only seems to imply a considerable intercourse between the two nations, but also a complete ignorance or disregard of the precept in question, which was broken in the most flagrant manner when Ruth became the wife of Boaz. By his descent from Ruth, David may be said to have had Moabite blood in his veins. The relationship was sufficiently strong when combined with the blood feud between Moab and Benjamin, already alluded to, to warrant his visiting the land of his ancestress, and committing his parents to the protection of the king of Moab, when hard pressed by Saul (1 Sam. xxi. 4). But here all friendly relations stop for ever. The next time the name is mentioned is in the account of David’s war at least twenty years after the last-mentioned event (2 Sam. viii. 2; 1 Chr. xviii. 2).

The abrupt manner in which this war is introduced into the history is no less remarkable than the brief and passing terms in which its horrors are recorded. The account occupies but a few words in either Samuel or Chronicles, and yet it must have been for the time little short of a virtual war, and the death of at least one third of the people were put to death, and the remainder became bondmen, and were subjected to a regular tribute.

An incident of this war is probably recorded in 2 Sam. xxiii. 20, and 1 Chr. xi. 22. The spoils taken from the Moabite cities and sanctuaries went to swell the treasures acquired from the enemies of Jehovah, which David was amassing for the future Temple (2 Sam. xi. 3, 4; 1 Chr. xiii. 11). It was the first time that the prophecy of Balaam had been fulfilled, — "Out of Jacob shall come he that shall have dominion, and shall destroy him that remaineth of Ar," that is of Moab.

So signal a vengeance can only have been occasioned by some act of perfidy or insult, like that which brought down a similar treatment on the Ammonites (2 Sam. xiii.,) but as to any such act the narrative is absolutely silent. It has been conjectured that the king of Moab betrayed the trust which David reposed in him, and either himself killed Jesse and his wife, or surrendered them to Saul. But this, though not improbable, is nothing more than conjecture.

It must have been a considerable time before Moab recovered from so severe a blow. Of this we have evidence in the fact of their long being mentioned in the account of the campaign in which the Ammonites were subdued, when it is not probable they would have revived from assisting their relatives had they been in a condition to do so.

Throughout the reign of Solomon, they no doubt shared in the universal peace which surrounded Israel; and the only mention of the name occurs in the statement that there were Moabites amongst the foreign women in the royal harem, and, as a natural consequence, that the Moabitish worship was tolerated, or perhaps encouraged (1 K. x. 1, 7, 33). The high place for Chemosh, "the abomination of Moab," was consecrated "on the mount facing Jerusalem," where it remained till its "delegation," by Josiah (2 K. xxiii. 13), nearly four centuries after.

At the disruption of the kingdom, Moab seems to have fallen to the northern realm, probably for the same reason that has been already remarked in the case of Eglon and Ehud—that the fords of Jordan lay within the territory of Benjamin, who for some time after the separation clung to its ancient ally the house of Ephraim. But be this as it may, at the death of Ahaz, eighty years later, we find Moab paying him the enormous tribute, apparently annual, of 100,000 rams, and the same number of wethers with their flocks; an annuity which testifies at once to the severity of the terms imposed by Israel, and to the remarkable vigor of character, and wealth of natural resources, which could enable a little country, not so large as the county of Huntingdon, to raise year by year this enormous impost, and at the same time support its own people in prosperity and affluence.

a The account of Shubraim, a man of Benjamin, who "brought children in the field of Moab," in 1 Chr. viii. 8, seems, from the mention of Ehud (ver. 6), to belong to this time, but the whole passage is very obscure.

b See Targum Jonathan on Ruth 1.1. The marriage of Boaz with the stranger is vindicated by making Ruth a proselyte in desire, if not by actual initiation.

c This affluence is shown by the treasures which they left on the field of Benaiah (2 Chr. xx. 25), to keep alive the memory of the general condition of the country, indicated in the narrative of Jehoshaphat's invasion, and in
surprising that the Moabites should have seized the moment of Ahah's death to throw off so hard- come a yoke; but it is surprising, that, notwithstanding such a drain on their resources, they were ready to incur the risk and expense of a war with a state lower in respect for their superior. Their first step, after asserting their independence, was to attack the kingdom of Judah in company with their kindred the Ammonites, and, as seems probable, the Medimnus, a roving semi-Edomite people from the mountains in the southeast of Palestine (2 Chr. xx.). The army was a huge heterogeneous horde of ill-assorted elements. The route chosen for this movement was the southern end of the Dead Sea, thence along the beach, and by the pass of Engedi to the level of the upper country. But the expedition contained within itself the elements of its own destruction. Before they reached the enemy dissections arose between the heathen strangers and the children of Lot; distrust followed, and finally panic; and when the army of Jeoshaphat came in sight of them they found that they had nothing to do but to watch the destruction of one half the huge host by the other half, and to seize the prodigious booty which was left on the field.

Dracontious as was this proceeding, that which followed it was even still more so. As a natural consequence of the late events, Israel, Judah, and Edom united in an attack on Moab. For reasons which are not stated, but one of which we may reasonably conjecture was to avoid the passage of the savage Edomites through Judah, the three confederate armies approached not as usual by the north, but round the southern end of the Dead Sea, through the parched valleys of upper Edom. As the host came near, the king of Moab, doubtless the same Mesha who threw off the yoke of Ahah, assembled the whole of his people, from the youngest who were of age to bear the sword-girtle, on the boundary of his territory, probably on the outer slopes of the line of hills which encircles the lower portion of Moab, overlooking the waste which extended below them towards the east. Here they remained all night on the watch. With the approach of morning the sun rose suddenly above the horizon of the rolling plain, and as his level beams burst through the night-mists they revealed no traces of the enemy, but shone with a blood-red glare on a multitude of pools in the bed of the wady at their feet. They did not know that these pools had been sunk during the night by the order of a mighty Prophet who was with the host of Israel, and that they had been filled by the sudden flow of water rushing from the distant highlands of Edom. To them the conclusion was inevitable. The army had, like their own on the late occasion, been fallen out in the night; these red pools were the blood of the slain; those who were not killed had fled, and nothing stood between them and the pillage of the camp.

The cry "Moab to the spoil!" was raised. Down the slopes they rushed in headlong disorder, but not, as they expected, to empty tents; they found an enemy ready prepared to reap the result of his ingenious stratagem. Then occurred one of those scenes of carnage which can happen but once or twice in the existence of a nation. The Moabites fled back in confusion, followed and cut down at every step by their enemies. Far inwards did the pursuit reach, among the cities and farm and orchards of that rich district; nor when the slaughter was over was the horrid work of destruction done. The towns both fortified and unfortified were demolished, and the stones strewn over the carefully tilled fields. The fountains of water, the life of an eastern land, were choked, and all timber of any size or goodness felled. Nowhere else do we hear of such sweeping desolation; the very besom of destruction passed over the land. At last the struggle collected itself at Kir-haraseeth, apparently a newly constructed fortress, which, if the modern Kerak—and there is every probability that they are identical—may well have resisted all the efforts of the allied kings in its native impregnable. Here Mesha took refuge with his family and with the remnant of his army. The heights around, by which the town is entirely commanded, were covered with sliengers, who, armed partly with the ancient weapon of David and of the Benjamites, partly perhaps with the newly-invented machines shortly to be famous in Jerusalem (2 Chr. xxvi. 5), discharged their volleys of stones on the town. At length the annoyance could be borne no longer. Then Mesha, collecting round him a forlorn hope of 700 of his best warriors, made a desperate sally, with the intention of cutting his way through to his special foe the king of Edom. But the enemy were too strong for him, and he was driven back. And then came a fitting crown to a tragedy already so terrible. An awful spectacle amazed and horrified the besiegers. The king and his eldest son, the heir to the throne, mounted the wall, and, in the sight of the thousands who covered the sides of that vast amphitheatre, the father killed and burnt his child as a propitiatory sacrifice to the cruel gods of his country. It was the same dreadful act to which, as we have seen, Balak had been so nearly tempted in his extremity. But the danger, though perhaps not really greater than his, was more imminent; and Mesha had not the Balaam at hand, to counsel patience and submission to a mightier Power than Chehoesh or Baal-Peor.

Hitherto, though able and ready to fight when necessary, the Moabites do not appear to have been a fighting people; perhaps, as suggested elsewhere, the Ammonites were the warriors of the nation of Lot. So seen to have altered their disposition, at any rate for a time. Shortly after these events we hear of "bands"—that is pillaging marauding parties—of the Moabites making

6 Compare Num. xxi. 11 —"towards the sun rising."
5 The lesson was not lost on king Joram, who proved himself more cautious on a similar occasion (2 K. vii. 12, 13).
4 Prins erst luxuria proper irrigus agris (Jerome, on Is. xv. 9).
3 Jerome alone of all the commentators seems to have noticed this. See his Comm. in Mich. vi.
2 The word "bands," by which this is
their incursions into Israel in the spring, as to spoil the early corn before it was fit to cut (2 K. xviii. 20). With Edom there must have been many a contest, too, of those, marked by savage wantonness and wantonness, resounding in some degree the tragedy of Kir-hareseth — is alluded to by Amos (ii. 1), where a king of Edom seems to have been killed and burnt by Moab. This may have been one of the incidents of the battle of Kir-hareseth itself, occurring perhaps after the Edomites had parted from Israel, and were overtaken on their road home by the furious king of Moab (deut. xvi. 29; 1 Sam. 31:4); or according to the Jewish tradition (Jerome, on Amos ii. 1), it was a vengeance still more savage because more protracted, and lasting even beyond the death of the king, whose remains were torn from his tomb and thus consumed: Non dice crudelissimae sed rabies; ut incertior obedient regis Judaeæo, et non patenter mortem esse annam extremum maborn (76, ver. 4).

In the "Bardens of Moab" pronounced by Isaiah (chap. xv., xvi.), we possess a document full of interesting details as to the condition of the nation, at the time of the death of Ahaz king of Judah, c. 726. More than a century and a half had elapsed since the great calamity to which we have just referred. In that interval, Moab has regained all, and more than all of his former prosperity, and has been extended over the district which he originally occupied in the south of the nation, and which was left vacant when the removal of Reuben to Assyria, which had been begun by Pult in 740, was completed by Tidgath-pileser about the year 719. (1 Chr. v. 25, 26).

This passage of Isaiah cannot be considered apart from that of Jeremiah, ch. xlviii. The latter was pronounced more than a century later than the invasion of Nebuchadnezzar, by which Jerusalem was destroyed. In many respects it is identical with that of Isaiah, and both are believed by the best modern scholars, on account of the archaism and other peculiarities of language which they contain, commonly rendered with A. V. has not now the force of the original term. מָיָה (712) is derived from מָיָה (712) to rush together and fiercely, and signifies a troop of irregular marauders, as opposed to the regular soldiers of a nation. It is employed to denote the bands of the Amalekites and other Babylon tribes round Palæstine: 1 Sa. xx. 8, 15, 21 (A. V. "troop" and "company"); 2 K. v. 23, xiv. 20, 21, xxiv. 2; 1 Chr. xii. 21, 24; 2 Chr. xiii. 1 (A. V. "band"). It is in this connection that it occurs in the elaborate play, on the name of God, contained in Gen. xlix. 19 (see vol. i. p. 818 b), a passage strikingly corroborated by 1 Chr. xii. 18, where the Gadites who resorted to David in his difficulties, — swift as men on the mountains, with faces like the stars of the morning — were formed to him into a band. In 1 K. vii. 21 it denotes the roaring troop collected by Rezin from the remnant of the army of Zobah, who took the city of Damascus by surprise, and by their forces multiplied — literally "played the Scæn to" — Solomon (ver. 25). How formidable these bands were, may be gathered from 2 Sam. xx. 29, where in a moment of most solemn emulation David speaks of breaking through one of them as among the most memorable exploits of his life.

"22. The word is used in the general sense of hired soldiers — mercenaries: as of the host of 600,000 Ephraimites hired by Amaziah in 2 Chr. xxv. 9, 10, 13; where the point is missed in the A. V. by the use of the word "army." No Ben-amites could have shown a greater appetite for plunder than did these Israelites (ver. 13). In this sense it is probably used in 2 Chr. xxxviii. 4. Israel, the irregular troops kept by Uziah for purposes of plunder, and who are distinguished from his "company" (ver. 13) maintained for regular engagements."

"23. In 2 Sam. iii. 22 ("troop") and 2 K. v. 2 ("bands") it refers to marauding raids for the purpose of plunder."

"a. See Ewald (Propheten, 229-231). He seems to believe that Jeremiah has preserved the old prophecy more nearly in its original condition than Isaiah."

"b. Amos, n. c. c. 780, prophesied that a nation should afflict Israel from the entering in of Hamath unto the "torture of the desert" (probably one of the wadies on the S. E. extremity of the Dead Sea); that is, the whole of the country east of Jordan."

"c. Knobel refers the original of Is. xvi., xvi. to the time of Joash, the great conqueror of Tamar and Jor- dan."

"d. He died 758, i. e. 12 years after the invasion of Pul."

"e. The word used in this passage for the palace of David in Zion, namely "fort" (A. V. "tabernacle"), is remarkable in the context, which is the preserving of the memory of the original military foundation of Jerusalem by the warrior-king was preserved by the Prophets. Thus, in Ps. lxvii. 2 and lam. ii. 6 it is in the "behold of building-hut of Jehovah," and in Is. xxv. 1, 2, in the language where David "pitched," or "an camped" (not "dwelt," as in A. V.)."
contain to the condition of Moab. They bear the evident stamp of portraiture by artists who knew their subject thoroughly. The nation appears in them as high-spirited, wealthy, populous, and even to a certain extent civilized, enjoying a wide reputation and popularity. With a metaphor which well expresses at once the pastoral wealth of the country and its commanding, almost regal, position, but which cannot be conveyed in a translation, Moab is depicted as the strong sceptre, the beautiful staff, whose fracture will be bewailed by all about him, and by all who know him. In his cities we discern a "great multitude" of people living in "a glory," and in the enjoyment of great "treasure," crowding over the public streets, the bazaars, and the ascents and descents of the numerous high places and sanctuaries where the "priests and princes" of Chemoeh or Baal-Peor minister to the anxious devotees. Outside the towns lie the "plentiful fields," luxuriant as the renowned Carmel—"the vineyards, and gardens of "summer fruits"": —"the harvest is being reaped, and the day stored in its abundance," the vineyards and the presses are crowded with peaseants, gathering and treading the grapes, the land resounds with the clamor of the vintage. These characteristics contrast very favorably with any traits recorded of Ammon, Edom, Midian, Amedok, the Philistines, or the Canaanites. And since the descriptions we are considering are adopted by certainly two, and probably three prophets—Jeremiah, Isaiah, and the elder seer—extending over a period of nearly 200 years, we may safely conclude that they are not merely temporary circumstances, but were the enduring characteristics of the people. In this case there can be no doubt that amongst the pastoral people of Syria, Moab stood next to Israel in all matters of material wealth and civilization.

It is very interesting to remark the feeling which actuates the prophets in these denunciations of a people who, though the enemies of Jehovah, were the blood-relations of Israel. Half the allusions of Isaiah and Jeremiah in the passages referred to, must forever remain obscure. We shall never know who the "lords of the heathen" were who, in that terrible night, laid waste and brought to silence the prosperous Ar-moab and Kir-moab. On the occasion of that flight over the Arnon, when the Moabitic lords were huddled together at the ford, like a flock of young birds, pressing to cross to the safe side of the stream,—when the dwellers in Aror stood by the side of the high road which passed their town, and eagerly questioning the fugitives as they hurried up,—"What is done?" — received but one answer from all alike — "All is lost! Moab is confounded and broken down!" Many expressions, also, such as the "weeping of Jazer," the "heller of three years old," the "shadow of Heshbon," and "the lions," must remain obscure. But nothing can obscure the very obvious war crisis which actuates the tone of tenderness and affection which makes itself felt in a hundred expressions throughout these precise documents. Aridently as the Prophet longs for the destruction of the enemy of his country and of Jehovah, and earnestly as he curses the man "that doth the work of Jehovah deceitfully, that keepeth back his sword from blood," yet he is constrained to bewail and lament such dreadful calamities to a people so near him both in blood and locality. His heart mourns—it sounds like pipes—for the men of Kir-heres; his heart cries out, it sounds like a harp for Moab.

Isaiah recurs to the subject in another passage of extraordinary force, and of fiercer character than before, namely, xxv. 10-12. Here the extermination, the utter annihilation, of Moab, is contemplated by the Prophet with triumph, as one of the first results of the reestablishment of Jehovah on Mount Zion: "In this mountain shall the hand of Jehovah rest, and Moab shall be trodden down under Him, even as straw — the straw of his own threshing-floors at Madmenah — is trodden down for the dunghill. And He shall spread forth his hands in the midst of them—the Moabites—as one that swimmeth spreadeth forth his hands to swim, buffeting following buffet, right and left, with terrible rapidity, as the strong swimmer urges his way forward: and He shall bring down their pride together with the spoils of their hands. And the fortress of Misgab—thty walls shall He bring down, by low, and bring to the ground, to the dust."

If, according to the custom of interpreters, this and the preceding chapter (xxiv.) are understood as referring to the destruction of Babylon, then this sudden burst of indignation towards Moab is extremely puzzling. But, if the passage is examined with that view, it will perhaps be found to contain some expressions which suggest the possibility of Moab having been at least within the ken of the Prophet, even though not in the foreground of his vision, during a great part of the period of the two chief Moabite strongholds, the same which are mentioned in xv. 1, and one of which is in the Pentateuch a synonym for the entire nation of

--

a Is. xvi. 6; Jer. xviii. 29. The word Gâva (גָּזָה), like our own word "pride," is susceptible of a good as well as a bad sense. It is the term used for the "majesty" and "excellency" of Jehovah (Is. ii. 10, &c., Ex. xx. 7), and is frequently in the A. V. rendered by "pomp." b מָצָה, the "rod" of Moses, and of Aaron, and of the hand of the tribes. (Num. xviii. 2, &c.). The term also means a "tribe." No English word expresses all these meanings. c מָצָה; the word used for the "rods" of Jacob's stragglers; also for the "staves" in the pastoral parasites of Zechariah (ch. 7-14). d Carmel is the word rendered "plentiful field" in Is. xvi. 10 and Jer. xlvii. 33.

What the din of a vintage in Palestine was may be inferred from Jer. xxv. 20: "Jehovah shall roar from on high. . . . He shall mightily roar. . . . He shall give a shout as those that tread the grapes." e La noche triste. a It is thus characterized by Ewald (Propheten, 239). b Eine so ganz von Trauer und Mitleid hingerissene, welche mehr gleich als prophetisch gestimmte Empfindung steht unter den altern Propheten einzig da; sogar bei Hosea ist nichts ganz aehnliches. c In the A. V. rendered "the high fort." But there is good reason to take it as the name of a place (Jer. xlvii. 1). (Misgab.) d Gesenius believes Ar, נִזָּה, to be a Moabite form of Ir, כִּזָּה, one of the two words spoken of above. Num. xxiv. 12 acquires a new force, if the word rendered "city" is interpreted as Ar, that is Moab. --

125
Moab. In this light, verse 2 may be read as follows: "For thou hast made of Ar a heap of Kir the defenced a ruin: a palace of strangers no longer is Ar; it shall never be rebuilt." The same word are found in verses 10 and 12 of the preceding chapter, in company with hithath (A.V., "streets") which we know from Num. xxii. 30 to have been the name of a Moabite town. [Kite.

JATH-HEZOR.] A distinct echo of them is again heard in xxv. 3, 4; and finally in xxvi. 1, 5, there seems to be yet another reference to the same two towns, acquiring new force from the denunciation which follows the preceding chapter: "Moab shall be brought down, the fortress and the walls of Miscab shall be laid low; but in the land of Judah this song shall be sung: 'Our Ar, our city, is strong . . . . Trust in the Lord Jehovah who bringeth down these that dwell on high: the loftiest Kir He hyeth it low,'" etc.

It is perhaps an additional corroboration to this view to notice that the remarkable expressions in xxv. 17, "Fear, and the pit, and the snare," etc., actually occur in Jeremiah (xlviii. 43), in his denunciation of Moab, embedded in the old prophecies out of which, like Is. xxv., this passage is compiled, and the rest of which had certainly, as originally uttered, a direct and even exclusive reference to Moab.

Between the time of Isaiah's denunciation and the destruction of Jerusalem we have hardly a reference to Moab. Zephaniah, writing in the reign of Josiah, reproaches them (ii. 8-10) for their transits against the people of Jehovah, but no acts of hostility are recorded either on the one side or the other. From one passage in Jeremiah (xxv. 9-21) delivered in the fourth year of Jehozakim, just before the first appearance of Nebuchadnezzar, it is apparent that it was the belief of the Prophet that the nations surrounding Israel—and Moab among the rest—were on the eve of devastation by the Chaldeans and of a captivity for seventy years (see ver. 11), from which, however, they should eventually be restored to their own country (ver. 12, and xlviii. 47). From another record of the events of the same period or of one only just subsequent (2 K. xxiv. 2), it would appear, however, that the relations between the Chaldeans, and for the time acted in concert with them in harassing and plundering the kingdom of Jehoikim.

Four or five years later, in the first year of Zedekiah (Jer. xxvii. 1), these hostilities must have ceased, for there was then a regular intercourse between Moab and the court at Jerusalem (ver. 3), possibly, as Hensen suggests, "hitas bevet, Prophetah, p. 535), negotiating a combined resistance to the common enemy. The brunt of the storm must have fallen on Judah and Jerusalem. The neighboring nations, including Moab, when the danger actually arrived probably adopted the advice of Jeremiah (xxvi. 11) and thus escaped, though not without much damage, yet without being carried away as the Jews were. That these nations did not suffer to the same extent as Judaea is evident from the fact that many of the Jews took refuge there when their own land was laid waste (Jer. xl. 11). Jeremiah expressly testifies that those who submitted themselves to the King of Babylon, though they would have to bear a severe yoke,—so severe that their very wild animals "would be enslaved,—yet by such submission should purchase the privilege of remaining in their own country. The removal from home, so dreadful to the Semitic mind, was to be the fate only of those who resisted (Jer. xxvii. 10, 11, xxviii. 14). This is also supported by the allusion of Ezekiel, a few years later, to the cities of Moab, cities formerly belonging to the Israelites, which, at the time when the Prophet is speaking, were still flourishing, "the glory of the country," destined to become at a future day "a prey to the Nedim-Kedem, the "men of the East."—the Bedouins of the great desert of the Egyptians (Ez. xxv. 8-11).

After the return from the Captivity it was a Moabite, Samballat of Horonaim, who took the chief part in annoying and endeavoring to hinder the operations of the reforms of the Jews at Jerusalem (Neh. ii. 19, iv. i, i, etc.). He confines himself, however, to the same weapons of ridicule and scurility which we have already noticed Zephaniah representing. From Samballat's words (Neh. ii. 19) we should infer that he and his country were subject to "the king," that is, the King of Babylon. During the interval since the return of the first caravan from Babylon the illegal practice of marriages between the Jews and the other people around, Moab amongst the rest, had become frequent. So far had this gone, that the son of the high-priest was married to an Ammonite woman. Even among the families of Israel who returned from the Captivity was one bearing the name of Par-sath-Moab (Ezr. ii. 6, vii. 4; Neh. iii. 11, 14), the latter must denote a Moabite connection, though to the nature of the connection no clue seems to have been yet discovered. By Ezra and Nehemiah the practice of foreign marriages was strongly repressed, and we never hear of it again becoming prevalent.

In the book of Judith, the date of which is laid shortly after the return from Captivity (iv. 3), Moabites and Ammonites are represented as dwelling in their ancient seats and as obeying the call which Moab had suffered were counted as nothing—as absolute immunity—since captivity had been escaped. To the incursions of these people, true Arabs, it is possible due that the LXX. in Is. xv. 9 introduce "'Apastas'—"I will bring Arabs upon Damor." A The word Tn pr., rendered "reprage" in Zeph. ii. 8, occurs several times in Nehemiah in reference to the temples of Samballat and his companions. [Ezr. vii. 2, xvi. 13; etc.]

9 It will be observed that this name occurs in conjunction with Jeho, who, if the well-known son of Zerubbabel, would be a descendant of Ruth the Moabitess. But this is uncertain. [Vol. ii. p. 1931 a.]
MOAB 1987

of the Assyrian general. Their "princes" (アジアşτας) and "governors" (γεωμεροι) are mentioned (2, viii. 8). The Moscabeans, much as they ravaged the country of the Ammonites, do not appear to have molested Moab Proper, nor is the name either of Moab or of any of the towns south of the Arnon mentioned throughout those books. Josephus not only speaks of the district in which Heshbon was situated as "Moabitis" (Ant. xiii. 15, § 4; also B. J. iv. 8, § 2), but expressly says that even at the time he wrote they were a "very great nation" (Ant. i. 11, § 5). (See 5 Macc. xix. 19.)

In the time of Eusebius (Onomast. Moab), i.e. cir. A. D. 320, the name appears to have been attached to the district, as well as to the town of Rablath—both of which were called Moab. It also lingered for some time in the name of the ancient Kir-Moab, which, as Charakmoa, is mentioned by Pompey (Reland, Palaestin. p. 463), and as late as the Council of Jerusalem, A. D. 553, formed the see of a bishop under the same title (De Haer. ii. 73). Since that time the modern name Kerak has superseded the older one, and no trace of Moab has been found either in records or in the country itself.

Like the other countries east of Jordan Moab has been very little visited by Europeans, and beyond its general characteristics hardly anything is known of it. The following travellers have passed through the district of Moab Proper, from Wady Meiyeh on the N. to Kerak on the S.:

* * *

Sueton, March, 1985, and January, 1887. (U. l. Sueton's Reisen, etc., von Prof. Krause, etc., vol. i. p. 406-426; ii. 329-357. Also the editor's notes thereon, in vol. iv.)

Burekhardt, 1812, July 13, to Aug. 4. (Travels in Syria, etc., 1822, 2vo; 1847, 12mo. Chap. viii.)

De Saulcy, 1851, January. (Voyage autour de la Mer Morte, Paris, 1853. Also translated into English.)

Of the character of the face of the country these travellers only give slight reports, and among these there is considerable variation even when the same district is referred to. Thus between Kerak and Wady Meiyeh, the town, 141 m. south, is "a fine country," of great natural fertility, with "reapers at work and the corn luxuriant in all directions," and the same district is described by Burekhardt as "very fertile, and large tracts cultivated" (Syr. July 15); while De Saulcy, on the other hand, pronounces that "from Shilhan (6 miles N. of Kerak) to the Wady Kerak the country is perfectly bare, not a tree or a bush to be seen"—"Toujours aussi nu... pas un arbre, pas un arbrisseau" (Voyage, i. 354); while the latter is contradicted by Sueton, who not only found the soil very good, but encumbered with wormwood and other shrubs (Sueton, i. 410). These discrepancies are no doubt partly due to

difference in the time of year, and other temporary causes; but they also probably proceed from the disagreement which seems to be inherent in all descriptions of the same scene or spot by various describers, and which is enough to drive to despair those whose task it is to endeavor to combine them into a single account.

In one thing all agree, the extraordinary number of ruins which are scattered over the country, and which, whatever the present condition of the soil, are a sure token of its wealth in former ages. "Wie schrecklich," says Seetzen, "ist diese Residenz alter Könige und ihr Land verwüstet!" (i. 412.)

The whole country is undulating, and, after the general level of the plateau is reached, without any serious inequalities; and in this and the absence of conspicuous vegetation has a certain resemblance to the downland of our own southern counties.

Of the language of the Moabites we know nothing or next to nothing. In the few communications recorded as taking place between them and Israelites no interpreter is mentioned (see Ruth; 1 Sam. xiii. 3, 4, etc.). And from the origin of the nation and other considerations we may perhaps conjecture that their language was more a dialect of Hebrew than a different tongue. This indeed would follow from the connection of Lot, their founder, with Abraham. [Weitling, Amer. ed.]

The narrative of Num. xxii.-xxiv. must be founded on a Moabite chronicle, though in its present condition doubtless much altered from what it originally was before it came into the hands of the author of the Book of Numbers. No attempt seems yet to have been made to execute the difficult but interesting task of examining the record, with the view of restoring it to its pristine form.

The following are the names of Moabite persons preserved in the Bible—probably Hebrewized in their adoption into the Bible records. Of such a transition we seem to have a trace in Shomer and Shimrit (see below).

Zipper
Bulak.
Egion
Ruth
Orpah (רפת)
Mebo (מְבֹה)
Ithmaul (1 Chr. xi. 46).
Shomer (2 K. xii. 21), or Shimrit (2 Chr. xxiv. 26).
Sanballat.

Add to these—
Ezaim. the name by which they called the Rephaim who originally inhabited their country and whom the Ammonites called Zamzummim or Moabites.
Cemosh, or Cemash (Jer. xlivii. 7), the deity of the nation.

Of names of places the following may be mentioned—
Moab, with its compounds, Sed-Moab, the fields of Moab— the names of the Ammonite god, Molech, Milcom, Malcam.

If this suggestion is correct—and there must be some truth in it—then this passage of Numbers becomes no less historically important than Gen. xiv., which Kradl (Geographie, i. 73, 131, &c.) with great reason maintains to be the work of a Canaanite chronicler.

a From the order of the lists as they now stand, and the latitude affixed to Charakmoa, Ptolemy appears to refer to a place south of Petra.

b Some materials for an investigation of this subject may be found in the curious variations of some of the Moabite names—Chemosh, Chemish; Kir; Kirraheit, Kir-heres, etc.; Shomer, Shimrit; and—remembering the close connection of Ammon with
of M. (A. V. "the country of M."); Arboth-
Moab, the desert (A. V. the "plains") of M.,
that is, the part of the Arabah occupied by the
Moabites. Ham-Milbon, the high undulating country
of Moab Proper (A. V. "the plain").
Ar, or Ar-Moab (יו). This Genesis conjecture-
tively to be a Moabite form of the word which
in Hebrew appears as Ar (אר), a city.
Arnon, the river (יו),
Banah Bath, Beor Elim,
Beth-Hilhalmim, Binbon, or Dibon,
Ezchim, or perhaps Egath-Sheshiyah (Is. xv. 8),
Horonaim,
Kirjathaim,
Kirjath-luzoth (Num. xxi, 39; comp. Is. xxiv. 11),
Kirjath-sepher, heres,
Kir-Moab,
Lathith,
Medeba,
Nimrah, or Nimruth,
Nophah or Nobah (Num. xxi. 30)
Iaspis-Pisgah.
Iap-Peor,
Shaveh-Kariathaim (?)
Zophim.
Zoar.
It should be noticed how large a proportion of
these names end in "or.
For the religion of the Moabites see Chemosh,
Moab, Peor. [See especially Baal-Peor.]
Of their habits and customs we have hardly a
trace. The gesture employed by Balak when he
found that Balaam's interference was fruitless—
"he smote his hands together"—is not mentioned
again in the Bible, but it may not on that account
have been peculiar to the Moabites. Their mode
of mourning, namely, cutting off the hair at the
back of the head and cropping the beard (Jer.
xviii. 37), is one which they followed in common
with the other non-Israelite nations, and which was
forbidden to the Israelites (Lev. xxi. 5), who in-
dered seem to have been accustomed rather to leave
their hair and beard disorderly and untrimmed
when in grief; see 2 Num. xix. 24; xiv. 2.
For a singular endeavor to identify the Moabites
with the Præses, see Sir G. H. Rose's pamphlet,
The Moabites the Ten Tribes, etc. (London, 1852),
especially the statement therein of Mr. Wood, late
British consul at Damascus (p. 154-157).
M. *MOAB, COUNTRY OR FIELD OF
(יילל ילח) denotes the cultivated ground in
the upland (Gen. xxxvi. 35; Num. xxx. 29; Ruth.
i. 1, 2, 6, 22, ii. 6, iv. 3; 1 Chr. i. 46, viii. 8). [MOAB.]
H. *MOAB, COUNTRY OR FIELD OF
(יילל ילח) denotes the cultivated ground in
the upland (Gen. xxxvi. 35; Num. xxx. 29; Ruth.
i. 1, 2, 6, 22, ii. 6, iv. 3; 1 Chr. i. 46, viii. 8). [MOAB.]
H.
*MOSABITE (יילל ילח), Medeba, Num. xxxii.
4; Judg. iii. 28; 2 Num. viii. 2; 1 K. xi. 32; 2 K.
d. i. 18, 21, 22, 21, xii. 20, xxii. 13, xiv. 2;
עִיּיֵל ילח, Vat. Medeb, Ezr. iv. 1; מַעְבִּית
Maccab. Gen. xix. 57; ditto, Vat. -bey, Dent.
ii. 9, 11, 23, xxxii. 3; 1 Chr. xi. 46; Neh. xiii. 11;
1 Esdr. viii. 62; vio1 Medeb, Jud. vi. 1 (Vat. and
Vulg. omit); fem. מַעְבִּית, Vat.
-bey, 1 K. xi. 1; Medeb, Mibbens, Mibbles), a
descendant of Moab, or an inhabitant of the coun-
try so called. [MOAB.]
A. *MOSABITE (יילל ילח): Medeb, Vat.
-bey: Mibbens), a Moabite woman, Ruth i.
ii. 22, ii. 2, 21, iv. 5, 10; 2 Chr. xxiv. 26.
A. *MOSABITE (יילל ילח): Medeb, Mibbens),
belonging to Moab (Ruth ii. 6).
A.
MOABIAH (יילל ילח) [festival of Jeho-
roth]; Medeb; [Vat. Alex. FA.3 omit; FA.3
ב נבביס: Mibbens), a priest, or family of priests,
who returned with Zerubbabel. The chief of the
house in the time of Joakim the son of Josha
was Pittai (Neh. xii. 17). Elsewhere (Neh. v. 5) called
MOABIAH.
MOCHMUR, THE BROOK (יילל ילח)
ב נבביס: Moabite), a torrent, i. e. a
small wady—a word "brook" conveys an entirely
false impression—mentioned only in Jud. vii. 18;
and there as specifying the position of Ekronel
near unto that, and upon the brook Mochmor.
Ekronel has been identified, with great proba-
bility, by Mr. Van de Velde in Akroydis, a ruined
site in the mountains of Central Palestine, equi-
distant from Nebaluss and Seitham, S. E. of the
former and N. E. of the latter; and the torrent Mochmor
may be either the Wady Mahfurej, on the
northern slopes of which Akroydis stands, or the
Wady Akbar, which is the continuation of the
former eastwards.
The reading of the Syrian possibly points to the
existence of a sanctuary of Baal-Peor in this neigh-
borhood, but is more probably a corruption of the
original name, which was apparently מְעַבִּית
(Simönis, Omoonition, N. T. etc. p. 111.). G.
M. *MOAB (ג), Alex. Mabch, Macedon, Mabch,
and in chap. ii. Mabcheth; Joseph, Mabch,
and once Mabcheth; Moab; the Jewish form
is, in the Mishna, מְעַבִּית; in Joseph ben-
Gorion, ch. xx., מְעַבְּית; the Syrian version
of Maccabees agrees with the Mishna, except in
the absence of the article, and in the usual substitu-
tion of מ for מ, Mabh, a place not mentioned in either
Old or New Testament, though rendered immortal
by its connection with the story of the Jews in the
interval between the two. It was the native city of
the Maccabean family (1 Macc. xiii. 25), and as
a necessary consequence contained their ancestral
sepulchre (raṣas) (ii. 70, iv. 19). Neither Mat-
thathias removed from Jerusalem, where up to that
time he seems to have been residing, at the com-
 mencement of the Antiochus persecution (ii. 1). It
was here that the true history of the Jews, the first blow of resis-
tance, by slaying on the heathen altar which had
been erected in the place, both the commissioner
of Antiochus and a recreant Jew whom he had in-
dered to sacrifice, and then demolishing the altar.
Matthathias himself, and subsequently his sons
Judah and Jonathan, were buried in the family
tombs, and over them Simon erected a structure
which is minutely described in the book of Maccab
been (xiii. 25-30), and, with less detail, by Josephus (Ant. xiii. 6, § 6), but the restoration of which has nothing proved as difficult a puzzle as that of the mausoleum of Artemis.

At Modin the Maccebean armies encamped on the evening of two of their most memorable victories—that of Judas over Antiochus Enobarbus (2 Macc. xiii. 14), and that of Simon over Cebonibus (1 Macc. xvi. 4)—the last battle of the veteran chief before his assassination. The only indication of the position of the place to be gathered from the above notices is contained in the last, from which we may infer that it was near the plain of Pedrolos; i.e., the great maritime lowland of Ptolemais (see below). By Eusebius and Jerome (Onom. & Modin) it is specified as near Diospolis, i.e., Lydda; while the notice in the Mishna (Ps. ch. ix. 2), and the comments of Bartonora and Ma'maronides, state that it was 15 Roman miles from Jerusalem. At the same time the description of the monument seems to imply (though for this see below) that the spot was so lofty as to be visible from the sea, and so near that even the details of the sculpture were discernible therefrom. All these conditions, excepting the last, are tolerably fulfilled in either of the two cities called Lutruin and Kubab. The former of these is, by the shortest road—that through Wady Ali—exactly 15 Roman miles from Jerusalem; it is about 8 English miles from Lydd, 15 from the Mediterranean, and 9 or 10 from the river Rubia, on which it is probable that Cedron—the position of Cebonibus in Simon's battle stood. Kubab is a couple of miles further from Jerusalem, and therefore nearer to Lyddf and to the sea, on the west and spur of the hills of Benjamin. Both are lofty, and both apparently—Lutruin certainly—command a view of the Mediterranean. In favor of Lutruin are the extensive ancient remains with which the top of the hill is said to be covered (Rob. Bibl. & Ex. iii. 15; Toled., Dritte Wand. 151), though of their age and particulars we have not precise information. Kubab appears to possess no ruins, but on the other hand its name may retain a trace of the monument.

The medieval and modern tradition places Modin at Sabata, an eminence south of Kirkut el-Esba; but this being not more than 7 miles from Jerusalem while it is as far as 20-30 miles from the sea, and also far removed from the plain of Philitus, is at variance with every one of the conditions implied in the records. It has found advocates in our own day in M. de Sauley (L'Art Jud., etc., 377, 378) and M. Salzmann; of the latter of whom the explorer declares there which may have been tombs, though he admits that there was nothing to prove it. A suggestive fact, which Dr. Robinson first pointed out, is the want of

\[ \text{ninny in the accounts of the medieval travellers, some of whom, as William of Tyre (viii. 1), place Modin in a position near Emmaus-Nicopolis, Nol (Amoubech), and Lydda. M. Modin also—usually so vehement in favor of the traditional sites—has recommended further investigation. If it should turn out that the expression of the book of Maccabees as to the monument being visible from the sea has been misinterpreted, then one impendiment to the reception of Soba will be removed; but it is difficult to account for the origin of the tradition in the teeth of those which remain.}

The descriptions of the tombs by the author of the book of Maccabees and Josephus, who had both apparently seen it, will be most conveniently compared by being printed together.

And Simon made a "And Simon built a very building over the equal large monument to his of his father and his father and his brethren, and raised it of white and polished stone. And he raised it stone by stone, and before, up to a great and complex. And he set upon it mount height, and threw seven pyramids, one against another, and set another, for his father and up pillars of a single stone, his mother and his brother. And he set upon one, for each, to make suits of armour for a beheld both for and perpetual memory and beauty. The suits of armour ships carved, so that they might be seen by all that sail on the sea. This sepulchre he made at Modin, and it. And these things are pre-served even to this day."

The monuments are said by Eusebius (Onom.) to have been still shown when he wrote—a.D. circa 320.

Any restoration of the structure from so imperfect an account as the above can never be anything more than conjecture. Something has been already attempted under Maccebeans (vol. ii. p. 1715). But in its absence one or two questions present themselves. [Tomh. Amer. ed.]

(1.) The "\( \text{πάνοικος} \)" (\( \text{πάνοικος} \), "resident"). The sea and its pursuits were so alien to ancient Jews, and the life of the Maccebean heroes who preceded Simon was—if we except their casual relations with Joppa and Gamala and the battle field of the maritime plain—so unconnected therewith, that it is difficult not to suppose that the word is corrupted from what it originally was. This was the view of J. D. Michaelis, but he does not propose any satisfactory word in substitution for \( \text{πάνοικος} \) (see his suggestion in Grimm, ad loc.). True, Simon

of Judah."

This difficulty—which however is entirely imaginary, for they do not mention the name of Judah in connection with Modin—would have been "enough to deter him entirely from the task," if he had not "found in the book of Joshua that Modin (from which Maccabees is derived) was a part of the territory allotted to the tribe of Judah." Now Modin (not M'dim) was certainly in the tribe of Judah, but not within many miles of the spot in question, since it was on the banks which lay in the district immediately bordering on the Dead Sea, probably in the depths of the Ghor itself (Josh, xv. 61).

And (εἰρήνη). This Ewald (iv. 385) renders "inscribed," or "given"—beneficiens Seren. tribe of Judah."
appears to have been to a certain extent alive to the importance of commerce to his country, and he is especially commemorated for having acquired the harbor of Joppa, and thus opened an inlet for the isles of the sea (1 Macc. xiv. 3). But it is difficult to see the connection between this and the phenomenon of ships on a monument to his father and brothers, whose memorable deeds had been of a different description. It is perhaps more feasible to suppose that the sculptures were intended to be symbolical of the departed heroes. In this case it seems not improbable that during Simon's intercourse with the Romans he had seen and been struck with their war-chariots, in imitate symbols of the fierce and rapid career of Judas. How far such symbolical representation was likely to occur to a Jew of that period is another question.

(2.) The distance at which the "ships" were to be seen. Here again, when the necessary distance of Modin from the sea—Lothina 15 miles, Koph 13, Lykkep itself 10—and the limited size of the sculptures are considered, the doubt inevitably arises whether he looked to the west or to the north; the latter, however, more probably represents the original. De Sauley (L'Art judaïque, p. 377) ingeniously suggests that the true meaning is, not that the sculptures could be discerned from the vessels in the Mediterranean, but that they were worthy to be inspected by those who were sailors by profession. The consideration of this is recommended to scholars.

G. MOETH (Mœth: Modins). In 1 Esdr. viii. 63, "Nephth the son of Banni" (Exz. viii. 33), a Levite, is called "Moeth the son of Subban."

MOLADAH (몰다하). 1 Nat in Neh. 7:42 [birth, lineage]: Mala'da, Alex. Mala'da; Mala'da, Vat. 1 Kala'da, Alex. Mala'da; Vat. 2 Mala'da, Rom. Alex. Mala'da: Mala'da, a city of Judah, one of those which, under the allotment of Judah, were given to Simeon (xix. 2). In the latter tribe it remained at any rate till the reign of David (1 Chr. iv. 28), but by the time of the Captivity it seems to have come back into the hands of Judah, by whom it was re-inhabitated after the Captivity (Neh. xi. 26). It is, however, omitted from the catalogue of the places frequented by David during his wandering life (1 Sam. xxx. 27-31).

In the Osmantincm it receives a bare mention under the head of "Malada," but under "Ether" and "Lether," a place named Malatha is spoken of as in the interior of Panoma (a district which answered to the Nysy or "South" of the Hebrews); and further, under *Erath" or *Arath (i. e. Arad) it is mentioned as 4 miles from the latter place and 20 from Hebron. Ptolomy also speaks of a Malisth as near Elusa. And lastly, Josephus states that Herod Agrippa retired to a certain tower in Malatha of Ismauna." (Her Malatha 759 15.). The requirements of these notices are all very fairly answered by the position of the modern e. Milb, a site of mines of some extent, and

MOLE

two large wells, one of the regular stations on the road from Petra and Ain el-Welbeh to Hebron. El-Milb is about 4 English miles from Tell Arad, 17 or 18 from Hebron, and 9 or 10 due east of Heersheba. Five miles to the south is Aravoth, the Aravoth of 1 Sam. xxx. 28. It is between 20 and 30 from Elusa, assuming el-Khubishe to be that place; and although Dr. Robinson is probably correct in saying that there is no verbal affinity, or only a slight one, between Molaha or Malatha and el-Milb, yet, taking that slight resemblance into account with the other considerations above named, it is very probable that this identification is not correet (see Field, Res. ii. 291). It is accepted by Wilson (Lands, i. 347), Van de Velde (Monar., p. 355), Bonar, and others.

G. MOLE, the representative in the A. V. of the Hebrew words Timnaheth and Chelpher pârâveth.

1. Timnaheth (תֵּיתנָה: בסלָּדָא, Abh. סֶבָּלָד, in Lev. xi. 30; Aoroth, Abh. Aperus, télbs, ibis). This word occurs in the list of mount birds in Lev. xi. 18; Deut. xiv. 16, where it is translated "swan" by the A. V.; in Lev. xi. 30, where the same word is found amongst the unclean "creeping things that creep upon the earth," it evidently no longer stands for the name of a bird, and is rendered "mole" by the A. V., adopting the interpretation of the LXX., Vulg., Onkelos, and some of the Jewish doctors. Bechert has, however, shown that the Hebrew Chalde, the Arabic Khabi or Khbii, denotes the "mole," and has argued with much force in behalf of the "chameleon" being the timnaheth. The Syriac version and some Arabic MSS. understand a "centipede" by the original word, the Targum of Jonathan a "salamander," some Arabic versions read someplace, which Gellius renders "a kind of lizard." In Lev. xi. 30, the "chameleon" is given by the

The Chameleon. (Chameleol vulgaris.)

A. V. as the translation of the Hebrew תֵּיתנָה, châl-lech, which in all probability denotes some larger kind of lizard. [CHAMELEON.] The only clue to an identification of timnaheth is to be found in its etymology, and in the context in which the word occurs. Bechert conjectures that the root from which the Hebrew name of this creature is derived, bare reference to a vulgar opinion amongst the ancients that the chameleon lived on air (comp. Or. Mrt. xv. 411, "Ild quoque ventus animal nutritur et aura,"); and see numerous quotations from classical authors cited by Bechert (Hieroc. ii. 505). The lung of the chameleon is very large, and when filled with air it renders the body semi-transparent, from the creature's power of abstraction, no doubt arose the fable that it lived on air.

MOLEHOTH; by Stewart (Test. and Khan, p. 217) as el-Melch.}

c סֶבָּלָד. "to breathe," whence סֶבָּלָדָא הַיָּהָב. "breath,"

d For the notice of this fact 1 am indebted to the Rev. B. F. Westcott.

6 By Scherzer (100) the Arabic name is quoted asSa
It is probable that the animals mentioned with the tìnòth (Lev. xi. 30) denote different kinds of lizards; perhaps therefore, since the etymology of the word is favorable to that view, the chameleon may be the animal intended by tìnòth in Lev. xi. 30. As to the change of color in the skin of the chameleon, numerous chameleons have been described, but as this subject has no Scriptural bearing, it will be enough to refer to the explanation given by Milne-Edwards, whose paper is translated in vol. xvii. of the Edinburgh New Philosophical Journal. The chameleon belongs to the tribe Dauderstari, order Scara; the family inhabits Asia and Africa, and the south of Europe; the C. vulgaris is the species mentioned in the Bible. As to the bird tìnòth, the MSS. vary.

2. Chérpòrò péíòth (תנָחָ תֶּ֫נּ) is rendered "moles" by the A. V. in Is. ii. 20; three MSS. read these two Hebrew words as one, and so the LXX., Vulg., Aquila, Symmachus, and Theodotion, with the Syriac and Arabic versions, though they adopt different interpretations of the word (Bochart, Hieroz. ii. 449). It is difficult to see what Hebrew word the LXX. could have read; but compare Schleusner, Loc. Theis. in LXX. s. v. pharao. Gesenius follows Bochart in considering the Hebrew words to be the plural form of the noun chamaeleopón, but does not limit the meaning of the word to "moles." Michaelis also (Suppl. ad Lex. Hebr. p. 876 and 2092) believes the words should be read as one, but that "sepulchers," or "vaults" dug in the rocks are intended. The explanation of Oedermann (Versch. Serm. iii. 82, 83), that the Hebrew words signify "(a bird) that follows cows for the sake of their milk," and that the goat-sucker (Caprinnelas Europea) is intended, is improbable. Perhaps no reference is made by the Hebrew words (which, as so few MSS. join them, it is better to consider distinct) to any particular animal, but to the holes and burrows of rats, mice, etc., which we know frequent ruins and deserted places. (Harmer's Observ. ii. 456.) Remembering the extent to which we have seen," says Kitto (Pict. Bib. on Is. xx.), "the foreign sites of the East perforated with the holes of various cave digging animals, we are inclined to suppose that the words might generally denote any animals of this description." Rosenmüller's explanation, "in effusioneum, i.e. foramen Murisum," appears to be decidedly the best proposed; for not only is it the literal translation of the Hebrew, but it is more in accordance with the natural habits of rats and mice to occupy with huts deserted places than it is with the habits of moles, which for the most part certainly frequent cultivated lands, and this no doubt is true of the particular species, Spalax typhlus, the mole-rat of Syria and Mesopotamia, which by some has been supposed to represent the mole of the Scriptures; if, moreover, the prophet intended to speak exclusively of "moles," is it not probable that he would have used the term Choleth (see above)?

Molech (מַלְכָּ, Molech) is mentioned in Lev. xx. 2 through 31, with the article, except in 1 K. x. 7 [the king]: ëx òx, in Lev.: ò Bær-

a "Holes of rats." b ṭt w, as if the Hebrew word was from *ם* "a cow."
deity. In support of this he quotes the myth of
Balis or Isis, whom Molech, king of Byblos,
employed as nurse for his child. Isis sucked the
infant with her finger, and each night burnt what-
ever was mortal in its body. When Astarte the
Great Star, (whom she was known by), in her rage
and anger, stretched forth her hand to the child,
whom, under pretext of offering a sacrifice to the
Deity, she burnt the child alive, as is recorded in
the Apology of the goddess [see Plut. Sol. 18: 12].

The worship of Molech, as described by
Josephus, seems to have been in some respects
very similar to that of the Egyptian god Osiris
and Isis, and is founded on the same principles.

The maxim of the worship of Molech, as
given by Josephus, as far as it differs from that of
the Egyptians, is the following: "Molech was
worshipped as a god of the sun, with whom the
children of Canaan sacrificed to him in the city
of Jerusalem. Their number was very great, and
they were worshipped in such a manner that the
children were burnt alive. This custom was
repulsive to the Israelites, who, as Josephus
states, never practised it, but burnt their children
as a sacrifice to Moloch in the city of Jerusalem.

The worship of Molech was a form of child-sacrifice, and was
considered as a necessary atonement for the sins of the nation.

MONE¥.

There remains to be noticed one passage (2 Sam. xxi. 31) in which the Hebrew written text has מָלְכָה, while the marginal reading is מָלְכֶן, which is adopted by our translators in their rendering "brick-kiln." Kimchi explains מָלְכָה as "the place of Molech," where sacrifices were offered to him, and the children of Amnon made their sons to pass through the fire. And Mileson and Malkeus, he says, are one. On the other hand Movers, rejecting the points, reads מָלְכֶן, "our king," which he explains as the title by which he was known to the Ammonites. "Such a thing may be of great utility in the interpretation, the reading followed by the A. V. is scarcely intelligible."

W. A. W.

MOLI (Molex; Vat. Moleh). MALI, the son of Merari (1 Esdr. viii. 47; comp. Esr. viii. 18).

MOLD (Molech; begetter). MOLDES: Alex. Molex. The son of Abishur by his wife Abihail, and descendant of Jerahmeel (1 Chr. ii. 29).

MOLSOCH. The Hebrew corresponding to "your Molech" in the A. V. of Amos v. 26 is מּלָכָה, מָלְכֶן, "our king," as in the margin. In accordance with the Greek of Acts vii. 45 (6 Malx: Molech), which followed the LXX. of Amos, our translators have adopted a form of the name Molech which does not exist in Hebrew. Kimchi, following the Targum, takes the word as an appellative, and not as a proper name, while with regard to siccuth (מִלכָּה, A. V. "tabernacle") he holds the opposite opinion. His note is as follows: "Siccuth is the name of an idol; and (as for) molleschen, he spake of a star which was made an idol by its name, and he calls it 'king,' because they thought it a king over them, or because it was a great star in the host of heaven, which was as a king over his host; and so to burn incense to the queen of heaven, as I have explained in the book of Jeremiah." Gesenius compares with the "tabernacle" of Molech the sacred tent of the Carthaginians mentioned by Diodorus (xx. 63). Rosenmüller, and after him Ewald, understood by siccuth a pole or stake on which the figure of the idol was placed. It was more probably a kind of idolpilgrim in which the image was carried in processions, a custom which is alluded to in Is. lxi. 1; Epist. of Jer. 4; Selden, De Dea Syr. Synt. i. c. 6). W. A. W.

* MOLTEN IMAGE. [IDOL, 21.]

* MOLTEN SEA. [SEA, MOLTEN.]

MOMDES (Molchos; Vat. Molechos). MALADES: Molech. The same as MOLI or MALI, the sons of Rami (1 Esdr. ix. 34; comp. Esr. x. 34).

MONE¥. This article treats of two principal matters, the uncoined money and the coined money mentioned in the Bible. Before entering upon the first subject of inquiry, it will be necessary to speak of uncoined money in general, and of the antiquity of coined money. An account of the principal monetary systems of ancient times is an equally need-
MONEY

When purely money, known as coined money, was introduced in the different countries of the ancient world, the coinage was of great importance. The use of money was not limited to the exchanges of goods and services, but also had a significant impact on society and culture. The introduction of money, especially in the form of coined money, was a significant development in the history of commerce and economy.

1. UNCOIN HoLY MONEY. 1. Uncoined Money in General. — It has been denved by some that there has been any money not coined, but this is merely a question of terminology. It is well known that ancient nations that were without a coinage weighed the precious metals, a practice represented on the Egyptian monuments, on which gold, silver, and bronze are shown to have been kept in the form of rings (see text, p. 1895). The gold rings found in the Celtic countries have been held to have had the same use. It has indeed been argued that this could not have been the case with the former, since they show no monetary system; yet it is evident from their weights that they all contain complete multiples or parts of a single piece. In other words, we may fairly suppose that the Celts, before they used coins, had, like the ancient Egyptians, the practice of keeping money in rings, which they weighed when it was necessary to pay a fixed amount. We have no certain record of the use of ring-money or other uncoined money in antiquity excepting among the Egyptians.

With them the practice mounts up to a remote age, and was probably as constant, and perhaps as regulated with respect to the weight of the rings, as a coinage. It can scarcely be doubted that the highly civilized rivals of the Egyptians, the Assyrians and Babylonians, adopted if they did not originate this custom, clay tablets having been found specifying grants of money by weight (Rawlinson, H.e. vol. i. p. 681); and there is therefore every probability that it obtained also in Palestine, although seemingly unknown in Greece in the time before coinage was there introduced. There is no trace in Egypt, however, of any different size in the rings represented, so that there is no reason for supposing that this further step was taken towards the invention of coinage.

2. The Antiquity of Coined Money. - Respectig the origin of coinage, there are two accounts seemingly at variance; some saying that Phidias king of Athens struck money, and according to Ephorus, in Egypt; but Herodotus ascribing its invention to the Lydians. The former statement probably refers to the origin of the coinage of European Greece, the latter to that of Asiatic Greece; for it seems, judging from the coins themselves, that the Phidian money bears more than a remote resemblance to some of the coins of that period, while the latter, according to the coinage of Lydian money is not coiled. We may fairly assume that the coinage was introduced.

3. Notice of Uncoined Money in the O.T. — There is no distinct mention of coined money in the books of the O.T. written before the return from Babylon. The contrary was formerly supposed to be the case, partly because the word shekel has a vague sense in later times, being used for a coin as well as a weight. Since however there is some seeming ground for the other opinion, we may here examine the principal passages relating to money, and the principal terms employed, in the books of the Bible written before the date above mentioned.

In the history of Abraham we read that Abimelech gave the patriarch "a thousand [pieces] of silver," apparently to purchase fields for Sarah and her attendants; but the passage is extremely difficult (Gen. xx. 16). The LXX. understood shekels to be intended (ὑπερ ἑκατόν σηκελῶν), and there can be no doubt that they were right, though the rendering is accidentally an unfortunate one, their equivalent being the name of a coin. The narrative of the purchase of the burial place from Ephron gives us further insight into the use of money at that time. It is related that Abraham offered "full silver," and that Ephron valued it at "four hundred shekels of silver," which accordingly the patriarch paid. We read, "And Abraham hearkened unto Ephron; and Abraham weighed ((balance) of silver) to Ephron the silver, which he had named in the audience of the sons of Heth, four hundred shekels of silver, current with the merchant" (Genesis xxv. 16). Here a currency is clearly indicated like that which the monuments of Egypt show to have been there used in a very remote age; for the weighing proves that this currency, like the Egyptian, did not bear the stamp of authority, and was therefore weighed when employed in commerce. A similar purchase is recorded of Jacob, who bought a parcel of a field at Shalem for a hundred kentals (xxviii. 12).
18, 19). The occurrence of a name different from shekel, and, unlike it, not distinctly applied in any other passage to a weight, favors the idea of coined money. But what is the kasaltah (קַסַלְתָּה)? The old interpreters supposed it to mean a lamb, and it has been imagined to have been a coin bearing the figure of a lamb. There is no known etymological ground for this meaning, the lost root, if we compare the Arabic ٣٢٠٥, "he or it divided equally," being perhaps connected with the idea of division. Yet the sanction of the LXX., and the use of weights having the forms of lions, bulls, and geese, by the Egyptians, Assyrians, and probably Persians, must make us hesitate before we abandon a rendering so singularly confirmed by the relation of the Latin pecunia and pecus. Throughout the history of Joseph we find evidence of the constant use of money in preference to barter. This is clearly shown in the case of the famine, when it is related that all the money of Egypt and Canaan was paid for corn, and that then the Egyptians had recourse to barter (xlvii. 13–26). It would thence appear that money was not very plentiful. In the narrative of the visits of Joseph's brethren to Egypt, we find that they purchased corn with money, which was, as in Abraham's time, weighed silver. For it is spoken of by them as having been restored to their sacks in "its [full] weight" (xliii. 21). At the time of the exodus, money seems to have been still weighed, for the ransom ordered in the Law is stated to be half a shekel for each man—"half a shekel after the shekel of the sanctuary [of] twenty gerahs the shekel" (Ex. xxx. 13). Here the shekel is evidently a weight, and of a special system of which the standard examples were probably kept by the priests. Throughout the Law, money is spoken of as in ordinary use: but only silver money, gold being mentioned as valuable, but not clearly as used in the same manner. This distinction appears at the time of the conquest of Canaan, when covetous Achan found in Jericho "a goodly Babylonish garment, and two hundred shekels of silver, and a length of gold of fifty shekels weight" (Josh. vii. 21). Throughout the period before the return from Babylon this distinction seems to obtain: whenever anything of the character of money is mentioned the usual metal is silver, and gold generally occurs as the material of ornaments and costly works. A passage in Isaiah has indeed been supposed to show the use of gold coins in that prophet's time: speaking of the makers of idols, he says, "They lavish gold out of the bag, and weigh silver in the balance" (xliii. 6). The mention of a bag is, however, a very insignificant reason for the supposition that the gold was coined money. Rings of gold may have been used for money in Palestine as early as this time, since they had been long previously so used in Egypt; but the passage probably refers to the people of Babylon, who may have had uncoined money in both metals like the Egyptians. A still more remarkable passage would be that in Ezekiel, which Gesenius supposes (Lec. s. v. קַסַלְתָּה) to mention brass as money, were there any sound reason for following the Vulg. in the literal rendering of קְסַלְתָּה קְסַלְתָּה קַסַל־תָּה קָזָל תָּה, quia effusum est ars tauum, instead of reading "because thy filthiness was poured out" with the A. V. (xvi. 36). The context does indeed admit the idea of money, but the sense of the passage does not seem to do so, whereas the other translation is quite in accordance with it, as well as philologically admissible (see Gesen. Lex. i. c.). The use of brass money at this period seems unlikely, as it was of later introduction in Greece than money of other metals, at least silver and electrum: it has, however, been supposed that there was an independent copper coinage in further Asia before the introduction of silver money by the Seleucidae and the Greek kings of Bactriana. We may thus sum up our results respecting the money mentioned in the books of Scripture written before the return from Babylon. From the time of Abraham silver money appears to have been in general use in Egypt and Canaan. This money was weighed when its value had to be determined, and we may therefore conclude that it was not of a settled system of weights. Since the money of Egypt and that of Canaan are spoken of together in the account of Joseph's administration during the famine, we may reasonably suppose they were of the same kind: a supposition which is confirmed by our finding, from the monuments, that the Egyptians used uncoined money of gold and of silver. It is even probable that the form in both cases was similar or the same, since the ring-money of Egypt resembles the ordinary rings of the money of those nations, among whom it was probably first introduced by the Phoenician traders, so that it is likely that this form generally prevailed before the introduction of coinage. We find no evidence in the Bible of the use of coined money by the Jews before the time of Ezra, when other evidence equally shows that it was current in Palestine, its general use being probably a very recent change. This first notice of coinage, exactly when we should expect it, is not to be overlooked as a confirmation of the usual opinion as to the dates of the several books of Scripture founded on their internal evidence and the testimony of ancient writers; and it lends no support to those theorists who attempt to show that there have been great changes in the text. Minor confirmations of this nature will be found in the later part of this article.

II. COIN ED MONEY. 1. The Principal Monetary Systems of Antiquity. — Some notice of the principal monetary systems of antiquity, as determined by the joint evidence of the coins and of ancient writers, is necessary to render the next
section comprehensible. We must here distinctly lay down what we mean by the different systems with which we shall compare the Hebrew coinage, as current works are generally very vague and discordant on this subject. The common opinions respecting criteria of authority have been formed from a study of the statements of writers of different age and authority, and without a due discrimination between weights and coins. The coins, instead of being taken as the basis of all hypotheses, have been cited to confirm or refute previous theories, and thus no legitimate induction has been formed from their study. If the contrary method be adopted, it has first the advantage of resting upon the indisputable authority of monuments which have not been tampered with; and, in the second place, it is of an essentially inductive character.

The result simplifies the examination of the statements of ancient writers, by showing that they speak of the same thing by different names on account of a change which the coins at once explain, and by indicating that probably at least one talent was only a weight, not used for coined money unless weighed in a mass.

The earliest Greek coins, by which we here intend those struck in the age before the Persian War, are of three talents or standards: the Attic, the Eginetan, and the Macedonian or earlier Phœnecian. The oldest coins of Athens, of Eginis, and of Macedon and Thrace, we should select as typical respectively of these standards; obtaining as the weight of the Attic drachm about 67-5 grains; of the Eginetan, about 96; and of the Macedonian, about 58— or 116, if its drachm be what is now generally held to be the didrachm. The electron coinage of Asia Minor probably affords examples of the use by the Greeks of a fourth talent, which may be called the later Phœnecian, if we hold the states to have been tetradrachm, for their full weight is about 248 grs.; but it is possible that the pure gold which they contain, about 186 grs., should alone be taken into account, in which case they would be didrachms on the Eginetan standard. Their division into sixths (hectas) may be urged on either side. It may be supposed that the division into obols was retained; but then the half hecta has its proper name, and is not an abbreviation. However this may be, the gold and silver coins found at Sardis, which we may reasonably assign to Creons, are of this weight, and may be taken as its earliest examples, without of course proving it was a Greek system. They give a tetradrachm, or equivalent, of about 246 grains, and a drachm of 63-57 but neither of these coins is found of this early period. Among those systems the Attic and the Eginetan are easily recognized in the classical writers; and the Macedonian is probably their Alexandrian talent of gold and silver, to be distinguished from the Alexandrian talent of copper. Respecting the two Phœnecian talents there is some difficulty. The Ebinic talent of the writers we recognize nowhere in the coinage. It is useless to search for isolated instances of Ebinic money in Phœnician cities, and elsewhere, when the coinage of the island and ancient coins generally afforded no class on the stated Ebinic weight. It is still more unsound to force an agreement between the Macedonian talent of the coins and the Ebinic of the writers. It may be supposed that the Ebinic talent was never used for money: and the statement of Herodotus, that the king of Persia received his gold tribute by this weight, may refer to its use in the East, not weighed in Ebinic talents. Or perhaps the nearness of the Ebinic talent to the Attic caused the coins struck on the two standards to approximate in their weights; as the Cretan coins on the Eginetan standard were evidently lowered in weight by the influence of the Asiatic ones on the later Phœnician standard.

We must now briefly trace the history of these talents.

(a.) The Attic talent was from a very early period the standard of Athens. If Soleon really reduced the weight, we have no money of the city of the older currency. Corinth followed the same system; and its use was diffused by the great influence of these two leading cities. In Sicily and Italy, after, in the case of the former, a limited use of the Eginetan talent, the Attic weight became universal. In Greece Proper the Eginetan talent, to the north the Macedonian, and in Asia Minor and Africa the later Phœnician, were long its rivals, until Alexander made the Attic standard universal throughout his empire, and Carthage alone maintained an independent system. After Alexander's time the other talents were partly restored, but the Attic always remained the chief. From the earliest period of which we have specimens of money on this standard to the time of the Roman dominion it suffered a great depreciation, the drachm falling from 67-5 grains to about 65-5 under Alexander, and about 55 under the early Caesars. Its later depreciation was rather by adulteration than by lessening of weight.

(b.) The Eginetan talent was mainly used in Greece Proper and the islands, and seems to have been annihilated by Alexander, unless indeed afterwards restored in one or two remote towns, as Lefkas in Aegamnion, or by the general issue of a coin equally assignable to it or the Attic standard as a hemidrachm or a tetradrachm.

(c.) The Macedonian talent, besides being used in Macedon and in some Phœnician cities before Alexander, was the standard of the great Phœnecian cities under Persian rule, and was afterwards restored in most of them. It was adopted in Egypt by the first Ptolemies, and also mainly used by the later Sicilian tyrants, whose money we believe imitates that of the Egyptian sovereigns. It might have been imagined that Ptolemies did not borrow the talent of Macedon, but struck money on the standard of Egypt, which the commerce of that country might have spread in the Mediterranean in a remote age, had not a recent discovery shown that the Egyptian standard of weight was much heavier, and even in excess of the Eginetan drachm, the unit being about 140 grs., the half of which, again, is greater than any of the drachms of the other three standards. It cannot therefore be compared with any of them.

(d.) The later Phœnician talent was always used for the official coinage of the Persian kings and commanders, and after the earliest period was very

Mr. Waddington has shown [Melanges de Numismatique] that the so-called coins of the satraps were never issued excepting when these governors were in command of expeditions, and were therefore invested with special powers. This discovery explains the putting to death of Aryanides, satrap of Egypt, for striking a coinage of his own.
general in the Persian empire. After Alexander, it
was scarcely used excepting in coast-towns of Asia
Minor, at Carthage, and in the Phoenician town of
Aradus.

Respecting the Roman coinage it is only neces-
sary here to state that the origin of the weights
of its gold and silver money is undoubtedly Greek,
and that the denarius, the chief coin of the latter
metal, was under the early emperors equivalent to
the Attic drachm, then greatly depreciated.

2. Coined Money mentioned in the Bible. — The
earliest distinct mention of coins in the Bible is
held to refer to the Persian money. In Ezra (ii.
03, viii. 27) and Nehemiah (xii. 70, 71, 72) current
gold coins are spoken of under the name

The Apocrypha contains the earliest distinct
allusion to the coining of Jewish money, where it
is narrated, in the First Book of Maccabees, that
Antiochus VII. granted to Simon the Maccabean
permission to coin money with his own stamp, as
well as other privileges (Kal. εἴσπερα σοι ποιώνα
κόμμα θύιον νόμισμα πέρι χάριν σου, xvi, 6). This
was in the fourth year of Simon’s pontificate. B. C.
140. It must be noted that Demetrius II. had in
the first year of Simon, B. C. 143, made a most
important decree granting freedom to the Jewish
people, which gave occasion to the dating of their
contracts and covenants,— “In the first year of
Simon the great high-priest, the leader, and chief
of the Jews” (xii. 34-42), a form which Josephus
gives differently, “In the first year of Simon, benefactor of the Jews, and ethnarch” (Ant. xiii.
6).

The earliest Jewish coins were until lately con-
sidered to have been struck by Simon on receiving
as permission of Antiochus VII. They may be
thus described, following M. de Sauley’s arrange-
ment:

SILVER.
3. קרו ינש, “Shekel of Israel.” Same type and date.
4. קרו ינש, “Half-shekel.” Same type and date.

8. קרו ינש, “Shekel of Israel.” Same type.
10. קרו ינש, “Shekel of Israel.” Same type.

MONEY
The average weight of the silver coins is about 220 grains troy for the shekel, and 110 for the half-shekel. The name, from בכסף, shows that the shekel was the Jewish stater. The determination of the standard weight of the shekel, which, be it remembered, was a weight as well as a coin, and of its relation to the other weights used by the Hebrews, belongs to another article [WEIGHTS AND MEASURES]: here we have only to consider its relation to the different talents of antiquity. The shekel corresponds almost exactly to the tetradrachm or didrachm of the earlier Phoenician talent in use in the cities of Phoenicia under Persian rule, and after Alexander's time at Tyre, Sidon, and Byblos, as well as in Egypt. It is repre

sented in the LXX. by didrachm, a rendering which has occasioned great difficulty to commen

tators. Col. Littau suggested, but did not adopt, what we have no doubt is the true explanation. After speaking of the shekel as probably the Phoenician and Hebrew unit of weight, he adds: "This weight appears to have been the same as the Egyptian unit of weight, for we learn from Horapello that the מרדת or unit, which they held to be the basis of all denomination, was equal to two didrachm; and διδραχμος is employed synonymously with δίδακτος for the Hebrew word shekel by the Greek Septuagint; consequently, the shekel and the didrachm were of the same weight. I am aware that some learned commentators are of opinion that the translators here meant a didrachm of the Greco-Egyptian scale, which weighed about 110 grains; but it is hardly credible that διδραχμος should have been thus employed without any distinguishing epithet, at a time when the Ptolemaic scale was yet of recent origin [in Egypt], the word didrachm on the other hand, having for ages been applied to a silver money, of about 130 grains, in the currency of all cities which follow the Attic or Corinthian standard, as well as in the silver money of Alexander the Great and [most of] his successors. In all these currencies, as well as in those of Lydia and Persia, the stater was an Attic didrachm, or, at least, with no greater difference of standard than occurs among modern nations using a denomination of weight or measure common to all; and hence the word διδαχμος was at length employed as a measure of weight, without any reference to its origin in the Attic drachm. Thus we find the drachma of gold described as equivalent to ten didrachm, and the half-shekel of the Pentateuch, translated by the Septuagint τι χρυσον τω διδραχμον. There can be no doubt, therefore, that the Attic, and not the Grec-Egyptian didrachm, was intended by them." He goes on to conjecture that Moses adopted the Egyptian unit, and to state the importance of distinguishing between the Mosaic shekel and the extraneous Jewish shekel. "It appears," he continues, "that the half-shekel of ron had, in the time of our Saviour, been converted into the payment of a didrachm to the Temple; and two of these didrachms formed a stater of the Jewish currency. This stater was evidently the ancient 'shekel Israel,' which was a tetradrachm of the Ptolemaic scale, though generally below the standard weight, like most of the extant specimens of the Ptolemies; the didrachm paid to the Temple was, therefore, of the same monetary scale. Thus the duty to the Temple was converted from the half of an Attic to the whole of a Ptolemaic didrachm, and the tax was nominally raised in the proportion of about 160 to 63; but probably the value of silver had fallen as much in the two preceding centuries. It was natural that the Jews, when they began to strike money, should have revived the old name shekel, and applied it to their stater, or principal coin; and equally so, that they should have adopted the scale of the neighboring obdant and powerful kingdom, the money of which they must have long been in the habit of employing. The inscription on the coin appears to have been expressly intended to distinguish the mone
ty shekel or stater from the Shekel ha-Kohesion, or Shekel of the Saviour." Appendix to Xa

misuda Helcneisoi, pp. 2, 3.

The great point here gained is that the Egyptian unit was a didrachm, a conclusion confirmed by the discovery of an Egyptian weight not greatly exceeding the Attic didrachm. The conjecture, however, that the LXX. intend the Attic weight is forced, and leads to this double dilemma, the supposi

position that the didrachm of the LXX. is a shekel and that of the N. T. half a stater, which is the same as half a shekel, and that the tribute was greatly raised, whereas there is no evidence that in the N. T. the term didrachm is not used in exactly the same sense as in the LXX. The natural ex

planation seems to us to be that the Alexandrian Jews adopted for the shekel the Attic didrachm as the common name of the coin corresponding in weight to it, and that it thus became in Hebra

istic Greek the equivalent of shekel. There is no ground for supposing a difference in use in the LXX. and N. T., more especially as there happen to have been few, if any, didrachms current in Pal

estine in the time of our Lord, a fact which gives great significance to the finding of the shekel in the fish by St. Peter, showing the minute accuracy of the Evangelist. The Ptolemaic weight, not being Egyptian but Phoenician, chanced to agree with the Hebrew, which was probably derived from the same source, the primitive system of Palestine, and perhaps of Babylon also. — Respecting the weights of the copper coins we cannot as yet speak with so much confidence.

The fabric of the silver coins above described is so different from that of any other ancient money, that it is extremely hard to base any argument on it alone, and the cases of other special classes, as the ancient money of Cyprus, show the danger of such reasoning. Some have been disposed to con

sider that it proves that these coins cannot be later than the time of Alexander, others will not admit sally heavier than they would be if exact divisions of the larger.
Respecting the exact meaning of the types of the copper, save the vase, it is difficult to form a probable conjecture. They may reasonably be supposed to have reference to the great festivals of the Jewish year, which were connected with thanksgiving for the fruits of the earth. But it may, on the other hand, be suggested that they merely indicate the products of the Holy Land, the fertility of which is so prominently brought forward in the Scriptures. With this idea the representation of the vine-leaf and bunch of grapes upon the later coins would seem to tally; but it must be recollected that the lower portion of a series generally shows a departure or divergence from the higher in the intention of its types, so as to be an unsafe guide in interpretation.

The inscription on the copper coins we have especially to observe, as already hinted, that they form an important guide in judging of the age of the silver. That they really belong to the same time is not to be doubted. Everything but the style proves this. Their issue in the 4th year, after the silver cease in the 3d year, their types and inscriptions, leave no room for doubt. The style is remarkably different, and we have selected two specimens for engraving, which afford examples of their diversity.

We venture to think that the difference between the silver coins engraved, and the small copper coin, which must nearly in the form of the letters, is almost as great as that between the large copper one and the copper pieces of John Hyrcanus. The small copper coin, be it remembered, more nearly resembles the silver money than does the large one.

From this inquiry we may lay down the following particulars as a basis for the attribution of this class. 1. The shekels, half-shekels, and corresponding copper coins, may be on the evidence of fabric and inscriptions of any age from Alexander's time until the earlier period of the Maccabees. 2. They must belong to a time of independence, and one at which Greek influence was excluded. 3. They date from an era of Jewish independence.

M. de Saunier, struck by the ancient appearance of the silver coins, and disregarding the difference in style of the copper, has conjectured that the whole class was struck at some early period of prosperity. He fixes upon the pontificate of Judah, and supposes them to have been first issued when Alexander granted great privileges to the Jews. If it be admitted that this was an occasion from which an era might be reckoned, there is a serious difficulty in the style of the copper coins, and those who have practically studied the subject of the fabric of coins will admit that, though archaic style may be long preserved, there can be no mistaking as to late style, the earlier limits of which are far more rigorously fixed than the later limits of archaic style. But there is another difficulty of even a greater nature. Alexander, who was essentially a practical genius, suppressed all the varying weights of money in his empire excepting the Attic, which he made the lawful standard. Philip had struck his gold on the Attic weight, his silver on the Macedonian. Alexander even changed his native currency in carrying out this great commercial reform, of which the importance has never been recognized. Is it likely that he would have allowed a new currency to have been issued by Judah on a system different from the Macedonian? If he had wished that this was a sacred coinage for the tribute, and that therefore an exception may have been made,
it must be recollected that an excess of weight would not have been so serious a matter as a deficiency, and besides that it is by no means clear that the shekels follow a Jewish weight. On these grounds, therefore, we feel bound to reject M. de Saulcy's theory.

The basis we have laid down is in entire accordance with the old theory, that this class of coins was issued by Simon the Maccabees. M. de Saulcy would, however, urge against our conclusion the circumstance that he has attributed small copper coins, all of one and the same class, to Judas the Maccabee, Jonathan, and John Hyrcanus, and that the very dissimilar coins hitherto attributed to Simon must therefore be of another period. If these attributions be correct, his deduction is perfectly sound, but the circumstance that Simon alone is unrepresented in the series, whereas we have most reason to look for coins of him, is extremely suspicious. We shall, however, show in discussing this class, that we have discovered evidence which seems to us sufficient to induce us to abandon M. de Saulcy's classification of copper coins to Judas and Jonathan, and to commence the series with those of John Hyrcanus. For the present therefore we adhere to the old attribution of the shekels, half-shekels, and similar copper coins, to Simon the Maccabee.

We now give a list of all the principal copper coins of a later date than those of the class described above and anterior to Herod, according to M. de Saulcy's arrangement.

**Copper Coins.**

This arrangement is certainly the most satisfactory that has been yet proposed, but it presents serious difficulties. The most obvious of these is the absence of coins of Simon, for whose money we have more reason to look than for that of any other Jewish ruler. M. de Sauley's suggestion that we may some day find his coins is a scarcely satisfactory answer, for this would imply that he struck very few coins, whereas all the other princes in the list, Judas only excepted, struck many, judging from those found. That Judas should have struck but few coins is extremely probable from the unsettled state of the country during his rule; but the prosperous government of Simon seems to require a large issue of money. A second difficulty is that the series of small copper coins, having the same, or essentially the same, reverse-type, commence with Judas, and should rather commence with Simon. A third difficulty is that Judas bears the title of priest, and probably of high-priest, for the word λειψος is extremely doubtful, and the extraordinary variations and blunders in the inscriptions of these copper coins make it more probable that λειψος is the term, whereas it is extremely doubtful that he took the office of high-priest. It is, however, just possible that he may have taken an inferior title, while acting as high-priest during the lifetime of Alexander. These objections are, however, all trifling in comparison with one that seems never to have struck any inquirer. These small copper coins have for the main part of their reverse-type a tetradrachm, the usual corona copiae, and they therefore distinctly belong to a period of Greek influence. Is it possible that Judas the Maccabee, the restorer of the Jewish worship, and the sworn enemy of all heathen customs, could have struck money with a type derived from the heathen, and used by at least one of the hated family that then oppressed Israel, a type connected with idolatry, and to a Jew as forbidden as any other of the representations on the coins of the Gentiles? It seems to us that this is an impossibility, and that the use of such a type points to the time when prosperity had corrupted the ruling family and Greek usages once more were powerful in their influence. This period may be considered to commence in the rule of John Hyrcanus, whose adoption of foreign customs is evident in the naming of his sons far more than in the policy he followed. If we now examine the whole series, the coins bearing the name of "John the high-priest" are the best in execution, and therefore have some claim to be considered the earliest.

It is important to endeavor to trace the origin of the type which we are discussing. The two corona copiae first occur on the Egyptian coins, and indicate two sovereigns. In the money of the Seleucidae the type probably originated at a marriage with an Egyptian princess. The corona copiae, as represented on the Jewish coins, are first found, as far as we are aware, on a coin of Alexander II. Zebina (n. c. 128-122), who, be it recollected, was set up by Ptolemy Phuson. The type occurs, however, in a different form on the unique tetradrachm of Cleopatra, ruling alone, in the British Museum, but it may have been adopted on her marriage with Alexander I. Balas (n. c. 150). Yet even this earlier date is after the rule of Judas (n. c. 167-161), and in the midst of that of Jonathan; and Alexander Zebina was contemporary with John Hyrcanus. We have seen that Alexander Janneus (n. c. 105-78) seems to have followed a type of Antiochus VII. Sidetes, of which there are coins dated n. c. 132-151.

Thus far there is high probability that M. de Sauley's attributions before John Hyrcanus are extremely doubtful. This probability has been almost changed to certainty by a discovery the writer has recently had the good fortune to make. The acute Barthélemy mentions a coin of "Jonathan the high-priest," on which he perceived traces of the words ΒΑΣΙΛΕΩΣ ΑΕΞΑΝΔΡΟΥ, and he accordingly conjectures that these coins are of the same class as the bilingual ones of Alexander Janneus, holding them both to be of Jonathan, and the latter to mark the close alliance between that ruler and Alexander I. Balas. An examination of the money of Jonathan the high-priest has led us to the discovery that many of his coins are restruck, that some of these restruck coins exhibit traces of Greek inscriptions, showing the original pieces to be probably of the class attributed to Alexander.
Jannaeus by M. de Sanluy, and that one of the latter distinctly bears the letters ANAE-IANAPOT. The two impressions of restruck coins are in general of closely consecutive dates, the object of restricting having usually been to destroy an obnoxious coinage. That this was the motive in the present instance appears from the large number of restruck coins among those with the name of Jonathan the high-priest, whereas we know of no other restruck Jewish coins, and from the change in the style from Jonathan the king to Jonathan the high-priest.

Under these circumstances, two attributions of the bilingual coins, upon which everything depends, can be entertained, either that they are of Jonathan the Maccabee in alliance with Alexander I.Balas, or that they are of Alexander Jannaeus; the Jewish prince having, in either case, changed his coinage. We learn from the case of Antigonus that double names were not unknown in the family of the Maccabees. To the former attribution there are the following objections. 1. On the bilingual coins the title Jonathan the king corresponds to Alexander the king, implying that the same prince is intended, or two princes of equal rank. 2. Although Alexander I. Balas sent presents of a royal character to Jonathan, it is extremely unlikely that the Jewish prince would have taken the regal title, or that the king of Syria would have actually granted it. 3. The Greek coins of Jewish fabric with the inscription Alexander the king, would have to be assigned to the Syrian Alexander I., instead of the Jewish king of the same name. 4. It would be most strange if Jonathan should have first struck coins with Alexander I., and then cancelled that coinage and issued a fresh Hebrew coinage of his own and Greek of the Syrian king, the whole series moreover, excepting those with only the Hebrew inscription, having been issued within the years c. 153-146, eight out of the nineteen of Jonathan's rule. 5. The reign of Alexander Jannaeus would be represented in the coinage. To the second attribution there is this objection, that it is unlikely that Alexander Jannaeus would have changed the title of king for that of high-priest; but to this it may be replied, that his quarrel with the Pharisees with reference to his performing the duties of the latter office, the turning-point of his reign, might have made him abandon the recently acquired title and recur to the sacred title, already used on his father's coins, for the Hebrew currency, while probably still issuing a Greek coinage with the regal title. On these grounds, therefore, we maintain Raver's opinion that the Jewish coinage begins with Simon, we transfer the coins of Jonathan the high-priest to Alexander Jannaeus, and propose the following arrangement of the known money of the princes of the period we have been just considering.

John Hyrcanus, c. 133-106.

Copier coins, with Hebrew inscription, "John the high-priest," on some A, marking alliance with Antiochus VII. Sidetes.

Aristobulus and Antigonus, c. 106-105.

(Probable Attribution)

Copier coins, with Hebrew inscription, "Judah the high-priest," copper coins with Greek inscription, "Judah, the king," and A. for Antigonus. M. de Sanluy supposes that Aristobulus bore the Hebrew name Judah, and there is certainly some probability in the conjecture, though the classification of these coins cannot be regarded as more than tentative.

Alexander Jannaeus, b. c. 105-78.

First coinage: copier coins with bilingual inscriptions — Greek, "Alexander the king!" Hebrew, "Jonathan the king!"

Second coinage: copier coins with Hebrew inscription, "Jonathan the high-priest!" and copper coins with Greek inscription, "Alexander the king!"

(The assigning of these latter two to the same ruler is confirmed by the occurrence of Hebrew coins of "Judah the high-priest," and Greek coins of "Judas the king," which there is good reason to attribute to one and the same person.)

Alexander, b. c. 78-63.

The coins assigned to Alexander by M. de Sanluy may be of this sovereign, but those of Alexander are so frequently blundered that we are not certain that it was not struck by him.

Hyrcanus, b. c. 69-66 (no coins).

Aristobulus, b. c. 66-63 (no coins).

Hyrcanus restored, b. c. 63-57 (no coins).

Obelotzias, b. c. 57-47 (no coins).

Aristobulus and Alexander, b. c. 49 (no coins).

Hyrcanus again, b. c. 47-40 (no coins).

Antigonus, b. c. 40-37. Copper coins, with bilingual inscriptions.

It must be observed that the whole period unrepresented in our classification is no more than twenty-nine years, only two years in excess of the length of the reign of Alexander Jannaeus, that it was a very troublous time, and that Hyrcanus, whose rule occupied more than half the period, was so weak a monarch that he would have neglected to issue a coinage. It is possible that some of the doubtful small pieces are of this unrepresented time, but at present we cannot even conjecturally attribute any.

It is not necessary to describe in detail the money of the time commencing with the reign of Herod and closing under Hadrian. We must, however, speak of the coinage generally, of the references to it in the N. T., and of two important classes — the money attributed to the revolt preceding the fall of Jerusalem, and that of the famous Bar Kokhba.

The money of Herod is abundant, but of inferior interest to the earlier coinage, from its generally having a thoroughly Greek character. It is of copper only, and seems to be of three denominations, the smallest being apparently a piece of brass (χάλκος), the next larger its double (διαιχάλκος), and the largest its triple (τριαίχαλκος), as M. de Sanluy has ingeniously suggested. The smallest is the commonest, and appears to be the farthing of the N. T. The coin engraved below is of the smallest denomination of these: it may be thus described —

H ΟΔΑ ΒΑΤ. Anchor.

R/ Two cornucopia, within which a pomegranate (degraded from pomegranate). E. W.
We have chosen this specimen from its remarkable relation to the coinage of Alexander Jannaeus, which makes it probable that the latter was still current money in Herod's time, having been abundantly issued, and so tends to explain the seeming neglect to coin in the period from Alexander or Alexander to Antigonus. The money of Herod Archelaus, and the similar coinage of the Greek Imperial class, of Roman rulers with Greek inscriptions, issued by the procurators of Judaea under the emperors from Augustus to Nero, present no remarkable peculiarities, nor do the coins attributed by M. de Sauley to Agrippa I., but possibly of Agrippa II. We engrave a specimen of the money last mentioned to illustrate this class.

The coins mentioned by the Evangelists, and first those of silver, are the following: the tetradrachm is spoken of in the account of the miracle of the tribute money. The receivers of didrachms demanded the tribute, but St. Peter found in the fish a sesterce, which he paid for our Lord and himself (Matt. xvii. 24-27). This sesterce was therefore a tetradrachm, and it is very noteworthy that at this period almost the only Greek Imperial silver coin in the East was a tetradrachm, the didrachm being probably unknown, or very little coined.

The didrachm is mentioned as a money of account in the passage above cited, as the equivalent of the Hebrew shekel. [Shekel]

The drachm or Roman sesterce, as well as the Greek drachma, then of about the same weight, are spoken of as current coins. There can be little doubt that the latter is merely employed as another name for the former. In the famous passages respecting the tribute to Caesar, the Roman denarius of the time is correctly described (Matt. xxii. 19-21; Luke xx. 19-25). It bears the head of Tiberius, who has the title Caesar in the accompanying inscription, most later emperors having, after their accession, the title Augustus: here again therefore we have an evidence of the date of the Gospels. [Dinarius; Drachm.]

Of copper coins the farthing and its half, the mite, are spoken of, and these probably formed the chief native currency. [Farthing; Mite.]

To the revolt of the Jews, which ended in the capture and destruction of Jerusalem, M. de Sauley assigns some remarkable coins, one of which is represented in the cut beneath.

—- "The liberty of Zion." Vine-stalk, with leaf and tendril.

—- "Year two." Vase, A.E. There are other pieces of the year following, which slightly vary in their reverse-type, if indeed we be right in considering the side with the date to be the reverse.

—- "Year three." Vase with cover.

M. de Sauley remarks on these pieces: "De ces deux monnaies, celle de l'an III. est incomparablément plus rare que celle de l'an II. Cela tient probablement à ce que la liberté des Juifs était à son apogée dans la deuxième année de la guerre judaïque, et déjà à son déclin dans l'année troisième. Les pièces analogues des années I. et IV. manquent, et cela doit être. Dans la première année de la guerre judaïque, l'autonomie ne put pas être rétablie à Jérusalem; et dans la quatrième année l'Amphithéâtre et les divisions intestines avaient déjà préparé et facilité à Titus la conquête qu'il avait entreprise" (p. 194).

The subjugation of Judaea was not alone signalized by the issue of the famous Roman coins with the inscription IVDAEA CAPTA, but by that of similar Greek Imperial coins in Judaea of Titus, one of which may be thus described:—

ΑΥΤΟΚΡΑΤΩΡ ΚΑΙΣΑΡ. Head of Titus, laureate, to the right.

ΙΟΥΔΑΙΩΝ ΕΛΛΗΝΙΚΩΝ. Victory, to the right, writing upon a shield: before her a palm-tree. A.E.

The proper Jewish series closes with the money of the famous Bar Kokhba, who headed the revolt in the time of Hadrian. His most important coins are shekels, of which we here engrave one.
The specimen represented below shows traces of the old types of a denarius of Trajan on both sides.

"Simeon." Bunch of grapes.

"Of the deliverance of Jerusalem." Two trumpets. R. R. M.

The denarius of this time was so nearly a quarter of a shekel, that it could be used for it without encountering any difficulty in the coinage. The copper coins of Barcaskab are numerous, and like his silver pieces, have a close reference to the money of Simon the Stacceale. It is indeed possible that the name Simon is not that of Barcaskab, whom we know only by his surnames, but that of the earlier ruler, employed here to recall the foundation of Jewish autonomy. What high importance was attached to the issue of money by the Jews, is evident from the whole history of their coinage.

The money of Jerusalem, as the Roman colonia, Eia Capitolina, has no interest here, and we conclude this article with the last coinage of an independent Jewish chief.

The chief works on Jewish coins are Bayer's treatise De Nomini Hebraeorum-Samaritana; De Saltus's Numismaticae Judaicæ; Avedson's Numismatae Hebraicae, of which there is a translation under the title : Bölische Numismologie, by A. von Weilchof, with large additions. Since writing this article we find that the translator had previously come to the conclusion that the coins attributed by M. de Saulcy to Judas Maccabeus are of Aristobulus, and that Jonathan the high-priest is Alexander Janmæus. We have to express our sincere obligations to Mr. Wigen for permission to examine his valuable collection, and have specimens drawn for this article.

R. N. P.

MONTH

MONEY-CHANGERS (κολασοβιβαστεῖς, Matt. xi. 12; Mark xi. 15; John ii. 15). According to Ex. xxx. 13-15, every Israelite, whether rich or poor, who had reached or passed the age of twenty, must pay into the sacred treasury, whenever the nation was numbered, a half-shekel as an offering to Jehovah. Maimonides (Shukal, cap. 1) says that this was to be paid annually, and that even paupers were not exempt. The Talmud exempted priests and women. The tributes in the case of half-shekel paid in coin of the exact Hebrew half-shekel about 1 lib. sterling of English money. The premium for obtaining by exchange of other money the half-shekel of Hebrew coin, according to the Talmud, was a καλαβιβαστεῖς (colabions), and hence the money broker who made the exchange was called καλαβιβαστεῖς. The colabions, according to the same authority, was equal in value to a silver obolus, which has a weight of 12 grains, and its money value is about 13d. sterling. The money-changers (κολασοβιβαστεῖς) whom Christ, for their iniquity, scrawled, and fraudulent dealing, expelled from the temple, were the dealers who supplied half-shekels, for such a premium as they might be able to exact, to the Jews from all parts of the world, who as
selves knew nothing of a solar month, that they
must have derived their knowledge of it from more
eraly nations (Ewald, Jüdisches. 1854, p. 8), and
sequently that the materials for the narrative,
and the date of its composition, must be referred to
the period when close intercourse existed between
the Hebrews and the Babylonians (Von Bohlen’s
Introdc. to Gen. ii. 155 ff.). It is unnecessary for
us to discuss in detail the arguments on which
these conclusions are founded: we submit in answer
to them that the dates are insufficient to form any
decided opinion at all on the matter, and that a
more obvious explanation of the matter is to be
found in the Egyptian system of months. To prove
the first of these points, it will be only necessary
to state the various calculations founded on this
passage: it has been deduced from it (1) that there
were 12 months of 30 days each (Chronology);
(2) that there were 12 months of 30 days with 5
intercalated days at the end to make up the solar
year (Ewald, l. c.: (3) that there were 7 months
of 30 days, and 5 of 31 days (Von Bohlen); (4) that
there were 5 months of 30 days, and 7 of 29 days
(Knobel, in Gen. vii. 1-3): or, lastly, it is possible
to cut away the foundation of any calculation what-
ever by assuming that a period might have elapsed
between the termination of the 150 days and the
17th day of the 7th month (Alder, Chronol. i. 70).
But, assuming that the narrative implies equal
months of 30 days, and that the date given in vii.
11, does involve the fact of a double calculation
by a solar and a lunar year, it is unnecessary to refer
to the Babylonians for a solution of the difficulty.
The month of 30 days was in use among the Egyp-
tians at a period long anterior to the period of the
exodus, and formed the basis of their computation
either by an unintercalated year of 360 days or an
intercalated one of 365 (Rawlinson’s Herodsotus, ii.
280-290). Indeed, the Bible itself furnishes us with
an indication of a double year, solar and lunar, in
that it assigns the regulation of its length indifferent-
to both sun and moon (Gen. i. 14). [Yeh.] From
the time of the institution of the Mosaic Law downwards the month appears to have been
a lunar one. The cycle of religious feasts, com-
ming with the Passover, depended not simply on
the month, but on the moon (Joseph. Ant. iii.
10, § 5); the 14th of Abib coincided with the
full moon (Vitilo, i2, Mos. iii. p. 886); and the
new moon was observed even on the occasions of regular
feastivals (Num. x. 10, xxviii. 11-14). The state-
ments of the Talmudists (Mishna, Rosh hash. 1-3)
are decisive as to the practice in their time, and
the lunar month is observed by the modern Jews.
The commencement of the month was generally
decided by observation of the new moon, which may
be detected about forty hours after the period of its
conjunction with the sun: in the later times of
Hebrew history this was effected according to strict
rule, the appearance of the new moon being re-
ported by competent witnesses to the local author-
ties, who then officially announced the commence-
ment of the new month by the twice repeated word,
“Mokudah,” i.e. consecrated.

According to the Rabbinical rule, however, there
must at all times have been a little uncertainty
beforehand as to the exact day on which the month
would begin: for it depended not only on the ap-
pearance, but on the announcement: if the im-
portant word Mokudah were not pronounced until
after dark, the following day was the first of the
month; if before dark, then that day (Rosh hash.
3, § 1). But we can hardly suppose that such a
strict rule of observation prevailed in early times,
nor was it in any way necessary; the recurrence
of the new moon can be predicted with considerable
accuracy by a calculation of the interval that would
elapse either from the last new moon, from the full
moon (which can be detected by a practiced eye),
or from the disappearance of the waning moon.
Hence, David announces definitely “To-morrow is
the new moon,” that being the first of the month
(1 Sam. xx. 5, 24, 27) though the new moon could
not have been as yet observed, and still less an-
nounced. The length of the month by observation
would be alternately 29 and 30 days, nor was it
allowed by the Talmudists that a month should
fall short of the former or exceed the latter number,
whatever might be the state of the weather.
The months containing only 29 days were termed in
Talmudical language cheswar or “deficient,” and
those with 30 midh, or “full.”

The usual number of months in a year was
twelve, as implied in 1 K. iv. 7; 1 Chr. xxvii. 1-15;
but as such is the Hebrew months coincided, as
we shall presently show, with the seasons, it follows
as a matter of course that an additional month
must have been inserted about every third year,
which would bring the number up to thirteen. No
notice, however, is taken of this month in the Bible.
We have no reason to think that the intercalary
month was inserted according to any exact rule: it
was sufficient for practical purposes to add it when-
ever it was discovered that the barley harvest did
not coincide with the ordinary return of the month
of Abib. In the modern Jewish calendar the in-
tercalary month is introduced seven times in every
19 years, according to the Metonic cycle, which was
adopted by the Jews about a. d. 360 (Prideaux’s
Connection, p. 560 note). But the same times the
length of the synodical month was fixed by R. Hillet
at 29 days, 12 hours, 44 min., 31 sec., which ac-
cords very nearly with the truth.

The usual method of designating the months
was by their numerical order, e. g. “the second
month” (Gen. vii. 11), “the fourth month” (2 K.
xv. 3); and this was generally retained even when
the names were given, e. g. “in the month Zif,
which is the second month” (K. vi. 1), “in the
third month, that is, the month Sivan” (Esth.
viii. 9). An exception occurs, however, in regard
to Abib in the early portion of the Bible (Ex. xiii.
4, xxiii. 15: Deut. xvi. 1), which is always men-
tioned by name alone, inasmuch as it was neces-

---

a Jahn (Ant. iii. 3, § 352) regards the discrepancy of the dates in 2 K. xxv 27, and Jer. iii. 31, as origi-
nating in the different modes of computing, by astro-
nomical calculation and by observation. It is more
probable that it arises from a mistake of a copyist,
substituting 1 for 17, as a similar discrepancy exists
in 2 K. xxv. 19 and Jer. iii. 25, without admitting of
similar explanation.

b We doubt indeed whether Abib was really a proper
name. In the first place it is always accompanied by the
article, " the Abib; " in the second place, it appears
almost impossible that it could have been superseded
by Nisan, if it had been regarded as a proper name,
considering the important associations connected with
it.
MONTH

2006

MONTH

urily coincident with a certain season, while the
numerical order might have changed from year to
year. The practice of the writers of the post-
Babylonian period in this respect varied: Ezra, Esther, and Zachariah specify both the names and
the numerical order; Nehemiah only the former:
Daniel and Haggai only the latter. The names of the
months belong to two distinct periods; in the
first place we have those peculiar to the period of
Jewish independence, of which four only, even in-
cluding Abib, which we hardly regard as a proper
name, are mentioned, namely, Abib, in which the
Passover fell (Ez. vii. 1, xvi. 4, xviii. 15, xxiv. 18; Deut. 
xvi. 1), and which was established as the first
month in commemoration of the exodus (Ex. xii. 2);
Zif, the second month (1 K. vi. 1, 37); Bal, the
eighth (1 K. vi. 38); and Ethanim, the seventh
(1 K. viii. 2) — the three latter being noticed only
in connection with the building and dedication of
the Temple, so that we might almost infer that
their use was restricted to the official documents
of the day, and that they never attained the popular
use which the later names had. Hence it is not
difficult to account for their having been super-
seded. In the second place we have the names
which prevailed subsequently to the Babylonian
Captivity; of these the following seven appear in
the Bible: Nisan, the first, in which the Pass-
over was held (Neh. ii. 2; Esth. iii. 7); Tishri,
the third (1 Esd. viii. 9; Bar. i. 8); Adar, the sixth
(Neh. vi. 15; 1 Macc. xiv. 27); Chislev, the ninth
(Neh. i. 1; Zech. vii. 1; 1 Macc. i. 54); Teledeth,
the tenth (Esth. ii. 16); Selat, the eleventh (Zech.
i. 7; 1 Macc. xvi. 11); and Avar, the twelfth
(Esth. iii. 7, viii. 12; 2 Macc. xv. 36). The names of
the remaining five occur in the Talmud and other
works; they were: Hul, the second (Targum,
2 Chr. xxx. 2); Tamuz, the fourth (Midr. Tanh.
xiv. 4, § 5); Ab, the fifth; and Yisreel, the seventh
(Rosh Hashanah, 1, § 3); and Marcheswan, the eighth
(Tanm. i. § 3; Joseph. Ant. i. 3, § 3). The name of the inter-
calary month was Vedar, a. i.e. the additional Adar.

The first of these names is Adar.

a The name of the intercalary month originated in
its position in the calendar after Adar and before Nisan.
The opinion of Ideler (Comm., 3, 522), that the first
Adar was regarded as the intercalary month, because
the name of the last month of Persia is held in Vedar in the
intercalary year, has little foundation.

b יבש [See Chronology.]
c י or י', or more fully, as in the Targum, י.

Nukkan, "the blossom of flowers." Another ex-
planation is given in Rawlinson's Herodias, i. 522: namely,
that Ziv is the same as the Assyrian Ger, "bull," and
answers to the zodiacal sign of Taurus.

d תכ"א. The name occurs in a recently discovered
Punician inscription (Ewalt, Jb. 1856, p. 135). A
sages, תכ"א, is used for the "cabbage" (Gen.
vii. 17, &c); but there is no ground for the inference
drawn by Von Bohlen, Interd., to Gen. ii. 55), that
the name of the month is the same as the name of the
month תכ"א. Thurnian on E.K. viii. 2, suggests that the true
name was תכ"א, as in the LXX. "Aharim, and that its
meaning was the "month of site," i.e., of fruit, from
יתק, "to give." There is the same peculiarity in the
name of Adar, namely, the addition of the definite article
The name of the months, as read on the Babylonian
inscriptions, vase, kasandur, Barains, etc., bear no resemblance to the Hebrew names (Rawlinson's
Herodias, ii. 593). 3.

4 The name of the months appears to have been in
use in Israel at least from the Maccabean period: for instance, the calendar of Hellenistic contains the names of Ag and Tcession (Euler, i. 149), which do not appear in the regular
Syrian calendar, while that of Tammuz, again, con-
tains names unknown to either.

b The resemblance in sound between Teledeth and
the Egyptian Tod, as well as its correspondence in the
order of the months, was noticed by Jerome, ad Ez.
xxxiv. 1.

c Von Bohlen connects it with the root vbh, "to bell over" (Interd. to Gen. ii. 55). The modern Jewish uses it a compound word, mor, "sheep," and Drach, "to observe," the former betokening that it
was set, and the latter being the proper name of the
month (Thurua's Mosis, p. 165 note).

d We draw notice to the similarity between Elul and
the Arabic name of Venus Prom. Jer, (Herod. iii.
10; Thurnian, Adar, the Egyptian Ather, and the
Syrian Atarzatis.

The Hebrew forms of the names are:} . א"תא, ו, , א"תא, י, א"תא, and

Ez., Adar, "belly over."
the first instance in which the Macedonian names appear in the Bible is in 2 Macc. xi. 30, 33, 38, where we have notice of Nican in combination with another name Dioscurus (ver. 21), which does not appear in the Macedonian calendar. Various explanations have been offered in respect to the latter. Any attempt to connect it with the Macedonian Dios fails on account of the interval being too long to suit the narrative, Dios being the first and Xanthicus the sixth month. The opinion of Schmidt (Erml. Temp. ii. 91), that it was the Macedonian intercalary month, rests on no foundation whatever, and Ideler’s assumption that the intercalary month preceded Xanthicus must be rejected along with it (Chevall. i. 289). It is most probable that the author of 2 Macc. or a copyist was familiar with the Cretan calendar, which contained a month named Dioscurus, holding the same place in the calendar as the Macedonian Dystros (Ideler, i. 429), i.e. immediately after Xanthicus, and that he substituted one for the other. This view derives some confirmation from the Vulgate rendering, Dioscurus. We have further to notice the reference to the Egyptian calendar in 3 Macc. vi. 38, Pachon and Epiphit in that passage answering to Pachons and Epeph, the ninth and eleventh months (Wilkinson, Anc. Egypt. i. 14, 31 sect.).

The identification of the Jewish months with our own cannot be effected with precision on account of the variations that must inevitably exist between the lunar and the solar month, each of the former ranging over portions of two of the latter. It must, therefore, be understood that the following remarks apply to the general identity on an average of years. As the Jews still retain the names Nisan, etc., it may appear at first sight needless to do more than refer the reader to a modern authority, and this would have been the case if it were not evident that the modern Nisan does not correspond to the ancient one. At present Nisan answers to March, but in early times it coincided with April; for the barley harvest—the first fruits of which were to be presented on the 15th of that month (Lev. xxiii. 10)—did not take place even in the warm district about Jericho until the middle of April, and in the upland districts not before the end of that month (Robinson’s Researches, i. 551, iii. 102, 145). To the same effect Josephus (Ant. ii. 14, § 6) synchronizes Nisan with the Egyptian Pharamuch, which commenced on the 27th of March (Wilkinson, i. c.), and with the Macedonian Xanthicus, which answers generally to the early part of April, though considerable variation occurs in the local calendars as to its place (comp. Ideler, i. 435, 442). He further informs us (iii. 10, § 5) that the Passover took place when the sun was in Aries, which it does not enter until near the end of March. Assuming from these data that Abib or Nisan answers to April, then Zil or Iyar would correspond with May, Sivan with June, Tamuz with July, Ab with August, Shevat with February, and Tishri or Tisri with October, but Marcheshvan with November, Chisde with December, Tebeth with January, Shebat with February, and Adar with March.

W. L. B.

*MONUMENTS (ΔΙΟΣΚΟΡΟΣ, σφήκας, Is. lv. 4). The precise meaning of the Heb. word, as employed here (elsewhere rendered preserved, Is. xii. 6, ἱδίκεια, xlviii. 6, ἱδιογένες, i. 8; Ezek. vi. 12, sobbîl, Prov. vii. 10) is somewhat obscure. It refers apparently to certain revered places, such as the νόστος of heathen temples (Vulg. dedicābant libidores) or (observe the parallelism) sculptural cemeteries (less probably, λυκεία) to be regarded as sacred places, or, if the latter. The Indo-European languages recognized the moon as the measurer of time, and have expressed its office in this respect, all the terms applied to it, μωσ, moon, etc., finding a common element with μετρέω, to measure, in the Sanscrit root man, (Pott’s Eṣṭūn, Fraction. i. 194). The nations with whom the Hebrews were brought into immediate contact worshipped the moon under various designations expressive of its influence in the kingdom of nature. The exception which the Hebrew language thus presents would appear to be based on the repugnance to nature-worship, which runs through their whole system, and which induced the precautionary measure of giving it in reality no name at all, substituting the circumlocutions ‘lesser light’ (Gen. i. 16), the ‘pale,’ or the ‘white’ for the ‘moon.’ The same tendency to avoid the notion of sensuality may perhaps be observed in the indifference to gender, γυναικα being masculine, and lebānith feminine.

The moon held an important place in the kingdom of nature, as known to the Hebrews. In the history of the creation (Gen. i. 14–16), it appears simultaneously with the sun, and is described in terms which imply its independence of that body as far as its light is concerned. Conjointly with the sun, it was ‘appointed’ for ‘sight and seasons, and for days and years’; though in this respect it exercised a more important influence, if by the ‘seasons’ we understand the great religious festivals of the Jews, as is particularly stated in Ps. civ. 19 (‘He appointed the moon for seasons’), and more at length in Ezech. xlviii. 6, 7 (Besides this, it had its special office in the distribution of light: it was appointed ‘to rule over the day,’ as the sun over the day, and thus the appearance of the two founts of light served ‘to a The term lebānith occurs only three times in the Bible (Cant. vi. 19; Is. xxiv. 23, xxx. 25). Another explanation of the term is proposed in Wilkinson’s Hierosolita, i. 65, to the effect that it has reference to lebānith, ‘a brick,’ and embodies the Babylonian
divide between the day and between the night." In order to enter fully into this idea, we must remember both the greater brilliancy of the moonlight in certain countries, and the larger amount of moisture particularly travelling that is carried on by its aid. The appeals to sun and moon conjointly are hence more frequent in the literature of the Hebrews than they might otherwise have been (Josh. x. 12; Ps. lxxvi. 5, 7; Eccl. xii. 2; Is. xxiv. 23, &c.); in some instances, indeed, the moon receives a larger amount of attention than the sun (Is. vii. 4, lxvi. 5). The influence of its light is occasionally alluded to, as in Gen. i. 16; in Cant. vi. 10, where the epithets "fair," and "clear" (or rather apelles, and hence extremely brilliant) are applied respectively to moon and sun; and in Is. xxx. 26, where the equalizing of its light to that of the sun conveys an image of the highest glory. Its influence on vegetable or animal life receives but little notice; the expression in Deut. xxxii. 14, which the A. V. refers to the moon, signifies rather months as the period of ripening fruits. The coldness of the night-dews is prejudicial to the health, and particularly to the eyes of those who are exposed to it, and the idea expressed in Ps. xxxi. 6 (The moon shall not shine thee by night?) may have reference to the general or the particular evil effect: blindness is still attributed to the influence of the moon’s rays on those who sleep under the open heaven, both by the Arabs (Carne’s Letters, i. 88), and by Europeans. The connection between the moon’s phases and certain forms of disease, whether madness or epilepsy, is expressed in the Greek αελαργεία (Matt. iv. 24, xvii. 15), in the Latin derivative "lunatic," and in our "moonstruck.

The worship of the moon was extensively practised by the nations of the East, and variety of aspects. In Egypt it was honored under the form of Isis, and was one of the only two deities which commanded the reverence of all the Egyptians (Herod. ii. 42, 47). In Syriá it was represented by that one of the Ashurth (μ. c. of the varieties which the goddess Astarte, or Ash- teth, underworthe) assumed "Karman," from the horns of the crescent moon by which she was distinguished. [Asturath, in Cunain, it formed one of a triad in conjunction with, Ezher, and the sun, and, under the name of Sin, received the honored titles of "Lord of the month," "King of the Gods," &c. (Ravindson’s Herodotus, i. 614.) There are indications of a very early introduction into the countries adjacent to Palestine of a species of worship distinct from any that we have hitherto noticed, namely, of the direct homage of the heavenly bodies, sun, moon, and stars, which is the characteristic of Sabianism. The first notice we have of this is in Job (xxxi. 26, 27), and it is observable that the warning of Moses (Deut. iv. 19) is directed against this nature worship, rather than against the form of moon-worship, which the Israelites must have witnessed in Egypt. At a later period, however, the worship of the moon in its greater form of idol-worship was introduced from Syria: we have no evidence indeed that the Ashurth of the Zidonians, whom Solomon introduced (1 K. xi. 5), was identified in the minds of the Jews with the moon, but there can be no doubt that the moon was worshipped under the form of an image in Manasseh’s reign, although Movers (Phoin. i. 66, 161) has taken up the opposite view: for we are distinctly told that the king made for himself an image of Ashurth, and worshipped all the host of heaven (2 K. xxv. 3), which ashereth was destroyed by Josiah, and the priests that burned incense to the moon were put down (xxiii. 4, 5).

At a somewhat later period the worship of the queen of heaven was practised in Palestine (Jer. vii. 18, xlv. 17); the title has been generally supposed to belong to the moon, but we think it more probable that the Oriental Venus is intended, for the following reasons: (1) the title of Urania of heaven was peculiarly appropriated to Venus, whose worship was borrowed by the Persians from the Syrians and Assyrians (Herod. i. 131, 199); (2) the votaries of this goddess, whose chief function it was to preside over births, were women, and we find that in Palestine the married women are specially noticed as taking a prominent part: (3) the peculiarity of the title, which occurs only in the passages quoted, looks as if the worship was a novel one; and this is corroborated by the term carna, applied to the "cakes," which is again so peculiar that the LXX. has retained it (χωνευτος), decreeing it to be, as it not improbably was, a foreign word. Whether the Jews derived their knowledge of the "queen of heaven" from the Philis- tines, who possessed a very ancient temple of Venus Urania at Ascalon (Herod. i. 105), or from the Egyptians, whose god Athor was of the same char- acter, is uncertain.

In the figurative language of Scripture the moon is frequently noticed as presaging events of the greatest importance through the temporary or permanent withdrawal of its light (Ez. xiii. 10; Joel iii. 11, Matt. xxiv. 29; Mark xi. 23); in these and similar passages we have an evident allusion to the mysteries away with which eclipses were viewed by the Hebrews in common with other nations of antiquity. With regard to the symbolic meaning of the moon in Rev, xii. 1, we have only to observe that the ordinary explanations, namely, the subli- man, world, or the changefulness of its affairs, seem to derive no authority from the language of the O. T., or from the ideas of the Hebrews.

W. L. B.

MOON, NEW. [New Moons.]

* MOONS or LUNETTES as ornaments. [BELLS, CAMBLES, THUS.]

"Now shall a month devour them with their portions," is understood by Bunnius (Tischner) in loc. as referring to an idolatrous worship of the new moon. It is more generally understood of a "month" as a short space of time. Hitzig (“Comment. in loc.,”) explains it in a novel manner of the crescent moon, as a symbol of destruction, from its resemblance to a sickle.

4 112.
Al-
The iidds, Hamau's behalf. Whether, this; M^ah, ex.
The conspiracy scholars one evenjauiite, minister the averting to the authorship of the book, as described in the prophet Micah.

The Targum, on each occasion, renders the word "of Mareshah": "but the derivation from Mareshah would be Marreshith, and not Morsesht, or more accurately Morsitshite. G.

MORDECAI [3 syl.] (ןַרְדֵּא) [see below]: מַדְרָכָי, the deliverer, under Divine Providence, of the Jews from the destruction plotted against them by Haman [ESTHER], the chief minister of Xerxes: the instigator of the feast of Purim [PURIM], and probably the author as well as the hero of the Book of Esther, which is sometimes called the book of Mordecai.4 The Scripture narrative tells us concerning the person that he was aBenjamite, and one of the Captivity, residing in Shushan, whether or not in the king's service before Esther was queen, does not appear certainly. From the time, however, of Esther being queen he was one of those "who sat in the king's gate." In this situation he saved the king's life by discovering the conspiracy of two of the enmies to kill him. When the decree for the massacre of all the Jews in the empire was known, it was at his earnest advice and exhortation that Esther undertook the perilous task of interceding with the king on their behalf. He might feel the more impelled to exert himself to save them, as he was himself the cause of the meditated destruction of his countrymen. Whether, as some think, his refusal to bow before Haman arose from religious scruples, as if such salvation as was practiced in Persia (מַדְרָכָי) were akin to idolatry, or whether, a lesser far more probable, he refused from a stern unwillingness as a Jew to bow before an Amalekite, in either case the affront put by him upon Haman was the immediate cause of the fatal decree. Anyhow, he and Esther were the instruments in the hand of God of averting the threatened ruin. The concurrence of Esther's favorable reception by the king with the Providential circumstance of the passage in the Medo-Persian Chronicles, which detailed Mordecai's fidelity in disclosing the conspiracy, being read to the king that very night, before Haman came to ask leave to hang him: the striking incident of Haman being made the instrument of the exaltation and honor of his most hated adversary, which he rightly interpreted as the preage of his own downfall, and finally the hanging of Haman and his sons upon the very gallows which he had reared for Mordecai, while Mordecai occupied Haman's post as vizier of the Persian monarchy; are incidents too well known to need to be further dwelt upon. It will be more useful, probably, to add such remarks as may tend to point out Mordecai's place in sacred, profane, and rabbinical history respectively. The first thing is to fix his date. This is pointed out with great particularity by the writer himself, not only by the years of the king's reign, but by his own genealogy in ch. ii. 5, 6. Some, however, have understood this passage as stating that Mordecai himself was taken captive with Jecoi- niah. But that any one who had been taken captive by Nebuchadnezzar in the 8th year of his reign should be vizier after the 12th year of a Persian king among the successors of Cyrus, is obviously impossible. Besides, too, the absurdity of supposing the ordinary laws of human life to be suspended in the case of any person mentioned in Scripture, when the sacred history gives no such intimation, there is a peculiar defiance of probability in the supposition that the cousin german of the youthful Esther, her father's brother's son should be of an age ranging from 90 to 170 years, at the time that she was chosen to be queen on account of her youth and beauty. But not only is this interpretation of Esth. ii. 5, 6, excluded by chronology, but the rules of grammatical propriety equally point out, not Mordecai, but Kish, as being the person who was taken captive by Nebuchadnezzar at the time when Jeconiah was carried away. Because, if it had been intended to speak of Mordecai as led captive, the ambiguity would easily have been avoided by either placing the chass s הָאֱלֹהִים, etc., immediately after הָאֱלֹהִים, and then adding his name and genealogy, מַדְרָכָי, or else by writing הָאֱלֹהִים instead of הָאֱלֹהִים, at the beginning of verse 6. Again, as the sentence stands, the distribution of the copulative קָעַה distinctly connects the sentence הָאֱלֹהִים in ver. 7, with הָאֱלֹהִים in ver. 5, showing that three things are predicated of M. (1) that he lived in Shushan; (2) that his name was Mordecai, son of Jair, son of Shimei, son of Kish the Benjamite who was taken captive with Jehoachin; (3) that he brought up Esther. This genealogy does then fix with great certainty the age of Mordecai. He was great grandson of a contemporary of Jehoachin. Now four generations cover 120 years—and 120 years from b. c. 599 brings us to c. 479, i. e. to the 6th year of the reign of Xerxes: thus confirming with singular force the arguments which led to the conclusion that Ahasuerus is Xerxes. [AHASUERUS.] 8 The carrying back the genealogy of a captive to the time of the Captivity has an obvious propriety, as connecting the captives with the family record preserved in the public genealogies, before the Captivity, just as in Amos he would be likely to carry up his pedigree to the ancestor who emigrated from England. And now it would seem both possible and probable (though it cannot be certainly

4 De Wette thinks that "the opinion that Mordecai wrote the book does not deserve to be confuted," although the author "designates that the book should be considered as written by Mordecai." His translator adds, that "the greatest part of the Jewish and Christian scholars refer it to him. But he adds, "more modern writers, with better judgment, affirm only their ignorance of the authorship." (Introd. H. 345-347.)

8 Justin has the singular statement, "Primum Xerxes, rex Persiarum, Judeos dominuit" (ib. xxxvi. cap. iii.). May not this arise from a confused knowledge of the events recorded in Esther?
proved) that the Mordecai mentioned in the duplicate passage, Esther ii. 2; Neh. vii. 7, as one of the leaders of the captives who returned from time to time to rebuild the temple, was the same as Mordecai of the book of Esther. It is very probable that on the death of Xerxes, or possibly during his lifetime, he may have obtained leave to lead back such Jews as were willing to accompany him, and that he did so. His age need not have exceeded 30 or 40 years, and his character points him out as likely to lead his countrymen back from Babylon, and to hold the sceptre. The name Mordecai not occurring elsewhere, makes this supposition the more probable.

As regards his place in Persian history, the domestic annals of the reign of Xerxes are so scanty, that it would not surprise us to find no mention of Mordecai. But there is a person named by Ctesias, who probably saw the very chronicles of the kings of Media and Persia referred to in Esther, x. 2, whose name and character present some points of resemblance with Mordecai, namely, Mataacas, or Matacas (as the name is variously written), whom he describes as Xerxes' chief favorite, and the most potent of them all. His brief notice of him in these words, "Matacax es mi multov Xerxao, in exact agreement with the description of Mordecai, Esther iv. 4, x. 2, 3. He further relates of him, that when Xerxes after his return from Greece had commissioned Megalazus to go and plunder the temple of Apollo at Delphi, upon his refusal, he sent Matacas the eunuch, to insult the god, and to plunder his property, which Matacas did, and returned to Xerxes. It is obvious how grateful to the feelings of a Jew, such a Mordecai was, would be a commission to degrade and spoil a heathen temple. There is also much probability in the selection of a Jew to be his prime minister by a monarch of such decided iconoclastic propensities as Xerxes is known to have had (Prideaux, Connect, i. 231-233). Xerxes would doubtless see much analogy between the Magian tenets of which he was such a zealous patron, and those of the Jews' religion; just as Ptolemy actually reckoned Moses (whom he couples with Jannes and Jannes) among the leaders of the Magian sect, in the very same passage in which he relates that Ostanes, the Magian author and herearche accompanied Xerxes in his Greek expedition, and widely diffused the Magian doctrines (ib. xxxv. ch. 1, § 2); and in § 4 seems to identify Christianity also with Magic. From the context it seems highly probable that this notice of Moses and of Jannes may be derived from the work of Ostanes, and if so, the probable intercourse of Ostanes with Mordecai would readily account for his mention of them. The point, however, here insisted upon is, that the known hatred of Xerxes to idol worship makes his selection of a Jew for his prime minister very probable, and that there are strong points of resemblance in what is thus related of Matacas, and what we know from Scripture of Mordecai. Again, that Mordecai was, what Matacas is related to have been, a eunuch, seems not improbable from his having neither wife nor child, from his bringing up his cousin Esther in his own house, from his situation in the king's gate, from his access to the court of the women, and from his being raised to the highest post of power by the king, which we know from Persian history was so often the case with the eunuchs. With these points of agreement between them, there is sufficient resemblance in their names to add additional probability to the supposition of their identity. The most plausible etymology usually given for the name Mordecai is that favored by Gesenius, who connects it with Mordech, the Babylonian name (read in the cuneiform inscriptions), and which appears in the names Mordecai Mordehas, Sis-Mordechus, in nearly the same form as in the Greek, Μορδεχας. But it is highly improbable that the name of a Babylonian idol should have been given to him under the Persian dynasty, and it is equally improbable that Mordecai should have been taken into the king's service before the commencement of the Persian dynasty. If then we suppose the original form of the name to have been Matasa, it would easily in the Chaldean orthography become Mordecai, just as she to παραμεθούσα is for παραμεθέω for παραμεθ'εω for παραμεθέω, etc. In the Targum of Esther he is said to be called Mordecai, because he was like Σμή, Σμή, to pure mirth."

As regards his place in Rabbinical estimation, Mordecai, as is natural, stands very high. The interpolations in the Greek book of Esther are one indication of his popularity with his countrymen. The Targum (of late date) shows that this increased rather than diminished with the lapse of centuries. There, Shimei in Mordecai's genealogy is identified with Shimei the son of Gera who cursed David, and it is said that the reason why David would not permit him to be put to death then was, that it was revealed to him that Mordecai and Esther should descend from him: but that in his old age, when this reason no longer applied, he was slain. It is also said of Mordecai that he knew the seventy languages, i. e. the languages of all the nations mentioned in Gen. x. which the Jews count as scripture and named after his age exceeding 120 years (Josephin ap. Wolf, and Stethelin, Robb. Liter. i. 179). He is continually designated by the appellation Σμή, Σμή, "the Just," and the amplifications of Esther, vi. 15 abound in the most glowing descriptions of the splendid role of Persian lusts, and Median seizers, and golden crowns, and the prodigality of precious stones and Macedonian gold, on which was engraved a view of Jerusalem, and of the palace over the crown, and the streets strewed with myrtle, and the attendance, and the heralds with trumpets, all proclaiming the glory of Mordecai and the exaltation of the Jewish people. Benjamin of Tudela mentions the ruins of Shushan and the remains of the palace of Ahaseurus as still existing in his day, but places the tomb of Mordecai and Esther at Hamadan, or Ecbatana (p. 128). Others, however, place the tomb

---

a It seems probable that some other temple, not that of Delphi, was at this time ordered by Xerxes to be spoiled, as no other writer mentions it. It might be that of Apollo Delphi, near Miletus, which was destroyed by Xerxes after his return (Strab. xiv. cap. i. § 55).

b To account for this, the Targum adds that he was 70 years old.

c Mr. Rawlinson (Hebrol. 125) points out Mr. Layard's conclusion (On. xiii. 441), that the Persians adopted generally the Assyrian religion, as "quite a mistake."
of Mordecai in Susa, and that of Esther in or near Baran in Galilee (note to Asher's Benj. of Teld. p. 166). With reference to the above-named palace of Ahasuerus at Susiana, it may be added that considerable remains of it were discovered by Mr. Loftus's excavations in 1852, and that he thinks the plan of the great colonnade, of which he found the bases remaining, corresponds remarkably to the description of the palace of Ahasuerus in Esth. i. (Loftus, Chabber, ch. xxviii.). It was built or begun by Darius Hystaspis. A. C. 11.

MOREH [מֹרֵה, archer or teacher; perf. fruitful]. A local name of central Palestine, one of the very oldest that has come down to us. It occurs in two connections.

1. THE PLAIN, or PLAINS (or, as it should rather be rendered, the OAK or OAKS) of Moreh (מֹרֵה) and בּוּרֵה: Samar. in both cases, מֹרֵה הָרְכָּס. וּבּוּרֵה הָרְכָּס: Samar. in

The Oak of Moreh was the first recorded halting-place of Abram after his entrance into the land of Canaan (Gen. xii. 6). Here Jehovah "appeared" to him, and here he built the first of the series of altars which marked the various spots of his residence in the Promised Land, and dedicated it to Jehovah, who appeared unto him (ver. 7). It was at the "place of Shechem" (xii. 6), close to קָרָת הַמַּגָּר the mountains of Elad and Gerizim (Deut. xii. 30), where the Samar. Cod. adds "over against Shechem." There is reason for believing that this place, the scene of so important an occurrence in Abram's early residence in Canaan, may have been also that of one even more important, the crisis of his later life, the offering of Isaac, on a mountain in "the land of Moriah." (Moriah.)

A trace of this more ancient name, curiously reappearing after many centuries, is probably to be found in Moreh, which is given on some ancient coins as one of the titles of Neopolis, i.e. Shechem, and by Phiny and Josephus as Mamortha or Moloboth (Reland, Diss. iii. § 8). The latter states (B. J. iv. 8, § 1), that "it was the name by which the place was called by the country-people (יִרְעָם), who thus kept alive the ancient appellation, just as the peasants of Hebron did that of Kirjath-arba, stown to the date of sacred and holy Manndeisher's visit. [See vol. ii. p. 1505 a, and note.]

Whether the oaks of Moreh had any connection with

2. THE HILL OF MOREH (מורֵה גָּת [Mur. Moreh. Gath] [Moresheth-Gath]) [תֶּבַע מֹרֵה]: מַרְטְשֶׁה-גָּת [Moresthes Gath] [Moresheth-Gath], a place named by the prophet Micah only (Mic. i. 14), in company with Lachish, Azekah, Mamreah, and other towns of the lowland district of Judah. His words, "therefore shalt thou give presents to Moresheth-gath," are explained by Ewald (Propheten, 330, 331) as referring to Jerusalem, and as containing an allusion above to Stanley) is suggested also in Bertheau's Röch te n. Israe, p. 119, and Bunsen: Die Berichter des Jud. vii. 11. The reasons for this view are less obvious in the A. V., owing to the mistranslation of מֹרֵה by "well" (which would be strictly מַרְטֵשֶׁה), instead of "fountain," and of מַרְטֶשֶׁה by כֶּסֶף, instead of כֶּסֶף [Mashhur]: The identification of the places in question depends on these interdictions. The position of Gideon "above the fountain of Harod" is evident from vii. 8, where it is said that the host of Midian were below him in the valley.
to the signification of the name Mordecai, which, though not so literal as the play on those of Abijah and Maresah, is yet tolerably obvious: "Therefore shall thou, O Jerusalem, give compensation to Morde- 

sheth-gath, itself only the possession of another city."

Micaiah was himself the native of a place called Mordecest, since he is designated, in the only two cases in which his name is mentioned, "Micaiah the Mora shite,"

which latter word is a regular derivation from Mordecest; but whether Mordecest-gath was that place cannot be ascertained from any information given us in the Bible.

Ezechias and Jerome, in the Onomasticon, and Jerome in his Commentary on Micaiah (Prorogus), give Morashti as the name, not of the person, but of the place; and describe it as a "moderate-sized village (band armaus ruinae) near Eleutheropolis, the city of Philistia (Palestine), and to the east thereof."

Supposing Rechabite to be Eleutheropolis, no traces of the name of Mordecest-gath have been yet discovered in this direction. The ruins of Mareshe

lie a mile or two due south of Rechab; but it is evident from Mic. i. 14, 15, that the two were distinct.

The affix "-gath" may denote a conection with the famous Philistine city of that name — the site of which, however, he is too late to ascertain

- or it may point to the existence of vineyards and wine-presses, "gath" in Hebrew signifying a wine-press or vat.

MORIAH. A name which occurs twice in the Bible (Gen. xxii. 2; 2 Chr. iii. 1).

1. THE LAND OF A Moriah (גֵּהֶר יִשְׂרָאֵל) [see below]; Samar. גֵּהֶר יִשְׂרָאֵל: סֵרָאֵל גֵּהֶר: גֵּהֶר יִשְׂרָאֵל. On "one of the mountains" in this district took place the sacrifice of Isaac (Gen. xxii. 2). What the name of the mountain was we are not told; but it was a conspicuous one, visible from "far off" (ver. 4). Nor does the narrative afford any data for ascertaining its position; for it was more than two days' journey from the "land of the Philistines" — namely the district of Gedor where Beer-sheba lay, the last place mentioned before and the first after the occurrence in question — yet it is not said how much more than two days it was. The mention of Gedor under the "-gath" recalls the "-gezer", in the course of the third day; but the time occupied in performing the remainder of the distance is not stated.

After the deliverance of Isaac, Abraham, with a play on the name of Moriah impossible to convey in English, called the spot Jehovah-jireh, "Jehovah sees" (i.e. provides), and thus originated a proverb referring to the providential and opprovial intervention of God. "In the mount of Jehovah he will be seen."

It is most natural to take the "land of Moriah" as the same district with that in which the "Oak (A. V. 'plain' of Moriah" was situated, and not as that which contains Jerusalem, as the modern tradition, which would identify the Moriah of Gen. xxii. and that of 2 Chr. iii. 1, affirms. The former was well known to Abraham. It was the first spot on which he had pitched his tent in the Promised Land, and it was hallowed and endeared to him by the first manifestation of Jehovah with which he had been favored, and by the erection of his first altar. With Jerusalem on the other hand, except to possess the residence of Melchizedek, he had not any connection whatever; it lay as entirely out of his path as it did out of that of Isaac and Jacob.

The LX. appear to have thus read or interpreted the original, since they render both Morch and Moriah in Gen. by מְרֹאֶה, while in 2 Chr. iii. they have "Agueria."

The one name is but the feminine of the other (Simonis, Onom. 414), and there is hardly more difference between them than between Mareshe and Maresah, and not so much as between Jerusalem and Jerusalem. The Jewish tradition, which first appears in Josephus — unless 2 Chr. iii. 1 be a still earlier hint of its existence — is fairly balanced by the rival tradition of the Samaritans, which affirms that Mount Gerizim was the scene of the sacrifice of Isaac, and which is at least as old as the 3d century after Christ.

[Gerizim-] 2. Mount Moriah (גֵּהֶר יִשְׂרָאֵל) [opher to: Aegoria [Vat. - pesa]; Alex. Aegoria: Mona Moria]. The name ascribed, in 2 Chr. iii. 1 only, to the Mount on which Solomon built the Temple. "And Solomon began to build the house of Jehovah in Jerusalem on the Mount Moriah, where

He appeared to David his father, in a place which David prepared in the threshing-floor of Araunah the Jerebath."

From the mention of Araunah, the inference is natural that the "appearance" alluded to occurred at the time of the purchase of the threshing-floor by David, and his erection thereon of the altar (2 Sam. xxiv. 1; 1 Chr. xxii. 3). But it will be observed that nothing is said in the narratives of that event of any "appearance" of Jehovah. The earlier and simpler record of Samuel is absolutely silent on the point. And in the later and more elaborate account of 1 Chr. xxi. the only occurrence which can be construed into such a meaning is that "Jehovah answered David by fire on the altar of the mount-offering."

A tradition which first appears in a definite shape in Josephus (Ant. i. 13, §§ i, 2, vii. 13, § 4), and is now almost universally accepted, asserts that the "Mount Moriah" of the Chronicles is identical with the "mountain" in "the land of Moriah" of Genesis, and that the spot on which Jehovah appeared to David, and on which the Temple was built, was the very spot of the sacrifice of Isaac. In the early Tanakh of Ostraca on Gen. xxii., this belief is exhibited in a very mild form. The land of Moriah is called the "land of worship," and but this would be to anticipate the existence of the name of Jehovah, and, as Micheaich has pointed out (Sadd. No. 1158), the name would more probably be Moriel, El being the name by which God was known to Abraham. [But see Jehovah, Amer. ed.]

b For topographical notice of Mount Moriah see the articles on Jerusalem; Kidron; Temple; Tyrol (Amer. ed.).

MORIAH

2013

The modern form of the belief is well expressed by the latest Jewish commentator (Kalisch, Genesis, 441, 440): "The place of the future temple, where it was promised the glory of God should dwell, and when stonework and peace were to bless the hearts of the Hebrews, was hallowed by the most brilliant act of piety, and the deed of their ancestor was thus more prominently presented to the imitation of his descendants." The seat of the sacrifice is in the sacred place where Abel offered his sacrifice to Jehovah, as actually shown in Jerusalem (Barclay, City, 109). "Furst likewise regards the mount of Abraham's sacrifice and that of Solomon's temple as the same (Handw. 788.—H.) There is in the East a natural tendency when a place is established as a sanctuary to make it the scene of all the notable events, possible or impossible, which can by any play of words or other pretext be connected with it. Of this kind were the early Christian legends that Golgotha was the place of the burial of the first Adam as well as of the death of the Second (see Mstlin, Saints Lives, ii. 304, 305). Of this kind also are the Mohammedan legends which cluster round all the shrines and holy places, both of Palestine and Arabia. In the Targum of Chronicles (2 Chr. iii. 1) alluded to above, the Temple mount is made to be also the scene of the vision of Jacob.

See JERUSALEM, vol. ii. p. 1277; and the plate in Barlett's Walks there referred to.

a The place of the future temple, where it was promised the glory of God should dwell, and when stonework and peace were to bless the hearts of the Hebrews, was hallowed by the most brilliant act of piety, and the deed of their ancestor was thus more prominently presented to the imitation of his descendants. The seat of the sacrifice is in the sacred place where Abel offered his sacrifice to Jehovah, as actually shown in Jerusalem (Barclay, City, 109). "Furst likewise regards the mount of Abraham's sacrifice and that of Solomon's temple as the same (Handw. 788.—H.) There is in the East a natural tendency when a place is established as a sanctuary to make it the scene of all the notable events, possible or impossible, which can by any play of words or other pretext be connected with it. Of this kind were the early Christian legends that Golgotha was the place of the burial of the first Adam as well as of the death of the Second (see Mstlin, Saints Lives, ii. 304, 305). Of this kind also are the Mohammedan legends which cluster round all the shrines and holy places, both of Palestine and Arabia. In the Targum of Chronicles (2 Chr. iii. 1) alluded to above, the Temple mount is made to be also the scene of the vision of Jacob.

Moriah

... of its name; the distance from Beer-bela, which suits exactly the requirements of the narrative; and the tradition of the Jews, twice recorded by Josephus: "It was that mountain upon which King David afterwards built [prepared to build] the Temple" (Ant. ii. 13, § 2). Yet it happened that Abraham came and offered his son Isaac for a burnt-offering at that very place, as we have before related. When King David saw that God had heard his prayer and graciously accepted his sacrifice, he resolved to call that entire place the altar of all the people, and to build a temple to God there" (Ant. vii. 13, § 4).

Without countervailing evidence these grounds would be accepted as sufficient. We will now examine the objections to this view which are brought forward in the present article.

(1.) "Although it was more than two days' journey from the 'land of the Philistines,' yet it is not said how much more than two days it was. This does not weigh against Jerusalem. It is merely a negative argument in behalf of the more distant locality, Gerizim, and has been answered under that head.

(2.) The Septuagint makes "Morch and Moriah" etymologically the same; the one name is but the feminine of the other." This argument, which belongs properly to the former article, we have already answered, and are sustained by a recent able author: "Morch is strictly a proper name, and as such both in Gen. xii. 6 and Deut. xxix. 30, though in the genitive after a definite noun, rejects the article; the 'hill of Morch,' mentioned in Judg. vii. 1, where the name has the article, being a totally different place. On the other hand, the name Moriah, in the two places of its occurrence, namely, Gen. xxix. and 2 Chr. iii. 1, bears the article as an appositive, whether it denotes the same situation in both places or not. It is true the LXX. render the Morch of Gen. xii., and the Moriah of Gen. xxix., alike by the adjective ἀνδριάς, in one case translating by the words 'the holy oak,' in the other, 'by the high land.' It is plain that, on whatever grounds they proceeded in thus translating, this gives no support to the supposition that the names, as names of places, are synonymous, insomuch as they did not take the words for names of places at all, but as descriptive adjectives. Mr. Grove tells us that ἀνδριάς is only the feminine form of ἀνδριάς. According to no analogy of the construction of feminine forms can this be said; the masculine form should in his case have been ἀνδριάς. (Quarry, Genesis and its Authorship, pp. 219, 211.)

(3.) Abraham had little or no 'connection' with Jerusalem. "It lay out of his path," while Gerizim was "well-known" to him, and was "fallowed and endeared to him." The obvious answer to this is, that the patriarch did not choose the spot; he went to the place which the Lord selected for him, and started apparently ignorant of his precise destination. This argument further assumes that he not only went to a place of his own selection, but also that he started on an approved excursion, which he would naturally wish to associate with the pleasant memories of his pilgrimage; the reverse of which we know to have not been the fact. (Quarry, Genesis and its Authorship, pp. 219, 211.)

(4.) "Had the fact been as the modern belief asserts, there could not fail to be frequent reference to it, by the writers both of the Old and New Testaments." The reply to this is strongly put by a learned writer whom we have already quoted: 'This argumentum ab silentio is notoriously not to be relied on; the instances of unaccountable silence respecting unbounded facts, where we might have expected them to be mentioned, are too numerous among ancient writers to allow it any weight, except as tending to corroborate arguments that may have considerable weight in themselves. In the present case, the clause in 2 Chr. iii. 1, 'which was seen ('טירש') or provided by David,' may fairly be taken as containing an obscure reference to the Jehovah-hill, and the saying, 'In the mount of the Lord it shall be seen,' of Gen. xxii. 14, so that the absence of all such reference is not so complete as is alleged' (Quarry, pp. 219, 214).

Still, if this site had been selected for the Temple by King David because it was the scene of the offering of Isaac (and another reason is assigned by the sacred writer, 1 Chr. xxii., without any intimation of this), the absence of some more distinct allusion to the fact, though not more unaccountable than other omissions in the Scriptures, must be accounted for unaccountable.

(5.) "The Jewish tradition is fairly balanced by the rival tradition of the Samaritans." Surely not, they went from Jerusalem to the place mentioned. (Quarry, Genesis and its Authorship, pp. 219, 211.) The Samaritans are not mentioned. (Ant. xxv. 18.) (Quarry, Genesis and its Authorship, p. 219.)

(6.) "The temple-mount is not a conspicuous eminence, like the one to which Abraham 'lifted up his eyes.'" This objection we have already answered. The phrase simply indicates the direction of the eyes whether up or down, and a further illustration is furnished in ver. 13 of this chapter.

(7.) The eminence was seen "afar off," and "the hill of the Temple is not visible till the traveller is close upon it." The phrase, "afar off," is relative. It is modified by circumstances, as in Gen. xxxiv. 18, where it is limited to the distance at which a person would be seen and recognized on a plain. In most connections it would indicate a greater distance than is admissible here; but there is a circumstance which qualifies it in this passage. From the spot where the place became visible (as is conceded by Mr. Franklin) Abraham and Isaac proceeded above to the appointed spot, the latter bearing the wood. The distance to be traversed with this load from the point at which Moriah becomes visible to a traveller from the south to its summit is fully as great as any reader would naturally associate with this fact in the narrative.

(8.) "If Salem was Jerusalem, instead of the lonely and desolate spot implied by the narrative, it took place under the very walls of the city of Meholahdezor." Mr. Grove, who suggests this, not being convinced of their identity — that the arguments are not equally balanced," (Quarry, pp. 219, 211.) — while Dean Stanley is fully convinced that they are not identical, this argument is for other minds, for
those who hold other and positive views on this point. We accept the identity, and we feel the force of the objection. Our only reply to it is, that the environs of an eastern walled town are often as free from observation, as secluded and still, as a solitude. The writer of this has passed hours together within a stone's throw of the walls of the modern Jerusalem at various points undis turbed by any sound, and as unobserved as though the city had been tenanted. This view is sup ported by a writer already quoted: — "Even under the circumstances of Mechemtheek the whole may have taken place without attracting the notice of the inhabitants, and the desolate loneliness of the spot, supposed to be implied in the narrative, has no place in it whatever. It is not implied that Abraham could not obtain fire, but going to an unknown place, he took with him, by way of precaution, what would be needful for the intended sacrifice." (Quarry, p. 213.)

This partially relieves the difficulty which Mr. Grove has raised for those of his readers who identify Salem and Jerusalem; but only in part, we think. It must be acknowledged that close proximity to a city is not a natural locality for such a scene. We should suppose that the patriarch would have been directed — we should naturally infer from the narrative itself that he was directed — to some spot remote from the dwellings of men, where, in the performance of this remarkable rite, which even his servants were not to witness, he would not be liable to interruption or intrusive observation.

It must also be admitted that the selection of this spot, with or without a design, for the two events associated with it, is a most unlikely occurrence. It would take a vast amount of contrary evidence to force me to abandon this idea," says Dr. Thomson. It would require very little to lead us to relinquish it; for in itself it seems to us the height of improbability. That the altar of burnt-offering for the Hebrew worship should have been erected on the identical spot where centuries before the great progenitor of the nation had erected the altar for the sacrifice of his son, led thither for the journey; they from the same spot where this should have occurred without design, have been a mere coincidence," — we must concur with Mr. Grove in pronouncing a "little short of miraculous." Yet if it did occur, this is a somewhat less incredible supposition than that it was by design. That the locality became invested with any sanctity in the Divine mind — was divinely selected as the site of the Temple, the scene of the second manifestation, because it had been the scene of the first — is an assumption wholly uncountenanced by any fact or analogy within our knowledge.

The "natural tendency" of the eastern mind, moreover, to cluster supernatural or sacred events around the supposed scene of a known miracle, is correctly stated by Mr. Grove. Nothing could be more natural than for the Jews, without any clear warrant to connect if possible the scene of their sacrifices with the offering of Isaac, and associate the altars of their typical worship with the altar on which the son of promise was laid. This correspondence is thought by some to favor the identity; we cannot but regard a double claim, so peculiar, as in itself a suspicious circumstance.

We would say in conclusion that in favor of the duality of the two sites may be urged the identity of the name, used without explanation in these two passages of Scripture alone, and "in both places alike as an appellative bearing the article":" the possible allusion in a clause of the latter to a clause in the former: the correspondence of the distance with the specifications of the journey; the ancient and consistent Hebrew tradition, universally received in Christendom; the failure to establish a single presumption in favor of any other locality: and the absence of any fatal or decisive objection to this identification. On these grounds the traditional belief will probably abide. Nevertheless, for reasons above intimated we cannot feel the absolute confidence in it which some express. And the most which we think can be safely affirmed is, that Mount Moriah in Jerusalem, on which the Temple of Solomon was built, was probably, also, the spot where Abraham offered up Isaac.

S. W.

* MORNING, SON OF THE. [LECT. FER.*

MORTAR. The simplest and probably most ancient method of preparing corn for food was by pounding it between two stones (Virg. Aen. i. 179). Convenience suggested that the lower of the two stones should be hollowed, that the corn might not escape, and that the upper should be shaped so as to be comfortable for holding. The pestle and mortar must have existed from a very early period. The Israelites in the desert appear to have possessed mortars and handmills among their necessary domestic utensils. When the manna fell they gathered it, and either ground it in the mill or pounded it in the mortar (רַבַּד, נְדָבָה) till it was fit for use (Num. xx. 8). So in the present day stone mortars are used by the Arabs to pound wheat for their national dish kibbi (Thomson, The Land and the Book, ch. viii. p. 94). Niebuhr describes one of a very simple kind which was used on board the vessel in which he went from Jaffa to Lophia. Every afternoon one of the sailors had to take the darvi, or naillet, necessary for the day's consumption and pound it "upon a stone, of which the surface was a little curved, with another stone which was long and rounded" (Descr. d'Arab. p. 45). Among the inhabitants of Ezzehoune, a Druse village, Burckhardt saw coffee-mortars made out of the trunks of oak-trees (Syrus, pp. 87, 88). The species of stone said to have been prepared by the house of Abitine, family the part for the purpose, and the mortar which they used was, with other spoils of the Temple, after the destruction of Jerusalem by Titus, carried to Rome, where it remained till the time of Hadrian (Reggio in Martinet's Hebr. Chrest. p. 35). Buxtorf mentions a kind of mortar (םַעַד, כַּדָכָה) in which olives were slightly bruised before they were taken to the olive-presses (Loc. Talm. s. v. נַדָב). From the same root as this last is derived mortash (םַעַד), Prov. xxviii. 22), which probably denotes a mortar of a larger kind in which corn was pounded. "Though thou bray the foal in the mortar among the bruised corn with the pestle, yet will not his folly depart from him." Corn may be separated from its husk and all its good properties preserved by such an operation, but the foal's folly is so essential a part of himself that no analogous process can remove it from him. Such seems the natural interpretation of this remarkable proverb. The language is intentionally exaggerated, and there is no necessity for supposing
Moses

An allusion to a mode of punishment by which criminals were put to death, by being pounded in a mortar. A custom of this kind existed among the Turks, but there is no distinct trace of it among the Semites. In the course of a journey in Turkey, the author had the opportunity of witnessing the punishment of a criminal by being pounded in a mortar.

Such, however, is supposed to be the reference in the proverb of Mr. Roberts, who illustrates it from his Indian experience.

Large mortars are used in the East for the purpose of separating the rice from the husk. Witness the following:

"In the course of a journey in Turkey, the author had the opportunity of witnessing the punishment of a criminal by being pounded in a mortar."

The incident is recorded in the Bible, in the Book of Numbers, Chapter 20, verse 15:

"And the children of Israel journeyed, and came to the Sea of Reeds; and they removed their camp from Rameses, to come to the Sea of Reeds. And they removed their camp from Rameses, and pitched their tents by the Sea of Reeds. And the children of Israel journeyed, and came to the Sea of Reeds, and they removed their camp from Rameses, to come to the Sea of Reeds."

This incident is also recorded in the Talmud, the Babylonian Talmud, Tractate Baba Bathra, page 10a:

"And the children of Israel journeyed, and came to the Sea of Reeds, and they removed their camp from Rameses, to come to the Sea of Reeds."

The Talmud further states that this punishment was used in ancient times, and that it was considered a severe form of punishment.

The incident is also recorded in the Mishna, Tractate Bava Metzia, page 55a:

"And the children of Israel journeyed, and came to the Sea of Reeds, and they removed their camp from Rameses, to come to the Sea of Reeds."

This punishment was considered a severe form of punishment, and it was used as a warning to other criminals.

The incident is also recorded in the Babylonian Talmud, Tractate Baba Bathra, page 10a:

"And the children of Israel journeyed, and came to the Sea of Reeds, and they removed their camp from Rameses, to come to the Sea of Reeds."
Moses, who must have been considerably older than himself, and Aaron, who was three years older (Ex. vii. 7), afterwards occupy that independence of position which their superior age would naturally give them.

Moses was born, according to Manetho (Jos. c. Ap. i. 26, ii. 2), at Heliopolis, at the time of the deepest depression of his nation in the Egyptian servitude. Hence the Jewish proverb, "When the tale of bricks is doubled then comes Moses." His birth (according to Josephus, Ant. ii. 9, § 3, 4) had been foretold to Pharaoh by the Egyptian magicians, and to his father Amram by a dream—as a sign of the future destruction and deliverance of the house of his mother's elder were alleviated so as to enable her to evade the Egyptian midwives. The story of his birth is thoroughly Egyptian in its scene. The beauty of the new-born babe—in the later versions of the story amplified into a beauty and size (Jos. 2, § 5) almost divine (ἀποτελεῖ το νεοτέρον). Acts vii. 20; the word ἀποτελεῖ is taken from the LXX. version of Ex. ii. 2, and is used again in Heb. xii. 23, and is applied to none but Moses in the N. T. — induced the mother to make extraordinary efforts for its preservation from the general destruction of the male children of Israel. For three months the child was concealed in the house. Then his mother placed him in a small boat or basket of papyrus—perhaps from a current Egyptian belief that the plant is a protection from crocodiles (Phut. ις. ος. 358)—closed against the water by brammen. This was placed among the aquatic vegetation by the side of one of the canals of the Nile. [NILE.] The mother departed as if unable to bear the sight. The sister lingered to watch her brother's fate. The basket (Jos. 3, § 4) floated down the stream.

The Egyptian princess (to whom the Jewish traditions gave the name of Therauthis, Jos. Ant. ii. 9, § 5; Artapanus, Prop. Ev. ix. 27, the name of Mercheb, and the Arabic traditions that of Ashut, Jakabdlin, 387) came down, after the Homeric simplicity of the age, to bathe in the sacred river, or (Jos. Ant. ii. 9, § 5) to play by its side. Her attendant slaves followed her. She saw the basket in the flags, or (Jos. ib.) borne down the stream, and dispatched divers after it. The divers, or one of the female slaves, brought it. It was opened, and the cry of the child moved the princess to compassion. She determined to rear it as her own. The child (Jos. ib.) refused the milk of Egyptian nurses. The sister was then at hand to recommend a Hebrew nurse. The child was brought up as the princess's son, and the memory of the incident was long cherished in the name given to the foundling of the water's side—whether according to its Hebrew or Egyptian form. Its Hebrew form is מַשָּׁשְׁלָה, Moscheb, from מָשָׁלָה, Mashalah, "to draw out."—"because I have drawn him out of the water." But this (as in many other instances, Babel, etc.) is probably the Hebrew form given to a foreign word in Capht, mo = water, and ushe = saved. This is the explanation given by Jo-
MOSES

Josephus (Ant. ii. 9, § 6; c. Apion. i. 341), and confirmed by the Greek form of the word adopted in the LXX., and thence in the Vulgate, Marcion, Magic, and by Artapanus Maecenas (Pliny, E. Hist. x. 27). His former Hebrew name is said to have been Joashin (2 Chron. iii. 10; 1 Macc. vi. 27). His child was adopted by the princess. Tradition describes its beauty as so great that passers-by stood fixed to look at it, and habemus lett their work to steal a glance (Jos. Ant. ii. 9, § 6).

From this time for many years Moses must be considered as an Egyptian. In the Pentateuch this period is a blank, but in the N. T. he is represented as "educated (παις ἐκ τοῦ τάγματος) in all the wisdom of the Egyptians," and as "mighty in words and deeds" (Acts vii. 22). The following is a brief summary of the Jewish and Egyptian traditions which fill up the silence of the sacred writer. He was educated at Heliopolis (comp. Strabo, xviii. 1), and grew up there as a priest, under his Egyptian name of Osiris-apo (Manetho, apud Jos. c. i. ap. i. 26, 28, 31; or Tholos (Cheremon, apud ibi. 32). "Osiris- apo" is derived from Manetho from Osiris, i. c. (Osiris-tesi) "saved by Osiris" (Oudin, Monumental Egypt). He was taught the whole range of Greek, Chaldean, and Assyro-Babylonian literature. From the Egyptians, especially, he learned mathematics, to train his mind for the unprophesied reception of truth (Phil. ii. 1. M. i. 3). "He invented boats and engines for building — instruments of war and of hydraulics — hieroglyphics — division of lands" (Artapanus, ap. En. Prop. E. ix. 27). He taught Orpheus, and was hence called by the Greeks Musaeus (ib.), and by the Egyptians Hermes (ib.). He taught grammar to the Jews, whence it spread to Phoenicia and Greece (Euphemus, ap. Clem. Alex. Strom. i. p. 343). He was sent on an embassy against the Ethiopians. He got rid of the serpents of the country to be traversed by turning baskets full of lilies upon them (Jos. Ant. ii. 10, § 2), and founded the city of Hermopolis to commemorate his victory (Artapanus, ap. En. ix. 27). He advanced to Saba, the capital of Ethiopia, and gave it the name of Meore, from his adopted mother Merhmis, whom he buried there (ib.). Tharbis, the daughter of the king of Ethiopia, fell in love with him, and he returned from triumph to Egypt with her as his wife (Jos. ibid.).

II. The nurture of his mother is probably spoken of as the link which bound him to his own people, and the time had at last arrived when he was resolved to reclaim his nationality. Here again the N. T. preserves the tradition in a distinctive form than the account in the Pentateuch. "Moses, when he was come to years, refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season;estraining the approach of Christ greater riches than the treasures — the ancient accumulated treasure of Rhamspititus and the old kings — of Egypt" (Heb. xi. 24-25). In his earliest infancy he was reported to have refused the milk of Egyptian nurses (Jos. Ant. ii. 9, § 5), and when three years old to have triumphed under his feet the crown which Pharaoh had consecrated, placed on his head. According to the Alexandrian representation of Philo (1. M., 6), he led an ascetic life, in order to pursue his high philosophic speculations. According to the Egyptian tradition, although a priest of Heliopolis, he always performed his prayers, according to the custom of his fathers, outside the walls of the city, in the open air, turning towards the rising sun (Jos. c. Apion. ii. 2). The king was excited to hatred by the priests of Egypt, who foresaw their destroyer (ib.), or by his own envy (Artapanus, ap. En. Prop. E. ix. 27). Various plots of assassination were contrived against him, which failed. The last was after he had already escaped across the Nile from Memphis, warned by his brother Aaron, and when a new plot of assassination was being contrived against him, the same general account of conspiracies against his life appears in Josephus (Ant. ii. 10). All that remains of these traditions in the sacred narrative is the simple and natural incident, that seeing an Egyptian suffering the bastinado from an Egyptian, and thinking that they were alone, he slew the Egyptian (the later tradition, preserved by Clement of Alexandria, said, "with a word of his mouth"), and buried the corpse in the sand (the sand of the desert then, as now, running close up to the cultivated tract). The fire of patriotism which thus turned him into a deliverer of the oppressors, turns him in the same story into the peacemaker of the oppressed. It is characteristic of the faithfulness of the Jewish records that his flight is there occasioned rather by the malignity of his countrymen than by the cruelty of the Egyptians. And in St. Stephen's speech it is this part of the story which is drawn out at greater length than in the original, evidently with the view of showing the identity of the narrow spirit which had thus displayed itself equally against their first and their last Deliverer (Acts vii. 25-30).

He fled into Midian. Beyond the fact that it was in or near the Peninsula of Sinai, its precise situation is unknown. Arabian tradition points to the country east of the Gulf of Akaba (see Lakes). Josephus (Ant. ii. 11, § 1) makes it "by the Red Sea." There was a famous well ("the well," Ex. ii. 15) surrounded by tanks for the watering of the flocks of the Bedouin herdsmen. By this well the fugitive seated himself "at noon" (Jos. ibid.), and watched the gathering of the sheep. There were the Arabian shepherds, and there were also seven midwives, whose shepherds rudely drove away from the water. The ebullient spirit (if we may so apply a modern phrase) which had already broken forth in behalf of his oppressed countrymen, broke forth again in behalf of the distressed midwives. They returned unusually soon to their father, and told him of their adventure. Their father was a person of whom we know little, but of whom that little shows how great an influence he exercised over the future career of Moses. It was Jethro, or Reuel or Hur von, chief or priest ("Shekoh" exactly expresses the union of the religious and political influence) of the Midianite tribes.

"Moses, who up to this time had been an Egyptian" (Ex. ii. 19), now became for an unknown period, extended by the later tradition over forty years (ib. ii. 20), an Aramaian. He married Zipporah, daughter of his host, to whom he also became the slave and shepherd (Ex. ii. 21, iii. 1). The blank which during the stay in Egypt is filled up by Egyptian traditions, can here only be

a Philo (V. M. i. 4), μάτη κατα λήμνον; Clem. Alex. (Strom. i. p. 335), ματη κατὰ λήμνον. Clement (ib.) derives Moses from "drawing breath." In an ancient Egy-
supplied from indirect allusions in other parts of the O. T. The alliance between Israel and the Kenite branch of the Midianites, now first formed, was never broken. [KINITTES.] Jethro became their guide through the desert. If from Egypt, as we have seen, was derived the secular and religious learning of Moses, and with this much of their outward ceremonial, so from Jethro was derived the organization of their judicial and social arrangements during their nomadic state (Ex. viii. 21-23). Nor is the conjecture of Ewald (Gesch. ii. 59, 60) improvable, that in this pastoral and simple relation there is an indication of a wider concert than is directly stated between the rising of the Israelites in Egypt and the Arabian tribes, who, under the name of "the Shepherds," had been recently expelled. According to Artaquamus (Eus. Prep. Ev. ix. 27) Reuel actually urged Moses to make war upon Egypt. Something of a joint action is implied in the visit of Aaron to the desert (Ex. iv. 27; comp. Artaquamus, at super); something also in the sacredness of Sinai, already recognized both by Israel and by the Arabs (Ex. viii. 27; Jos. Ant. ii. 12, § 1).

The chief effect of this stay in Arabia is on Moses himself. It was in the seclusion and simplicity of his shepherd-life that he received his call as a prophet. The traditional scene of this great event is the valley of Shooab, or Hobab, on the N. side of Jbel Mysin. Its exact spot is marked by the convent of St. Catherine, of which the altar is said to stand on the site of the Burning Bush. The original indications are too slight to enable us to fix the spot with any certainty. It was at "the back" of "the wilderness" at Horeb (Ex. iii. 1): to which the Hebrew adds, whilst the LXX. omits, "the mountain of God." Josephus further particularizes that it was the loftiest of all the mountains in that region, and best for pasturage, from its good grass; and that, owing to a belief that it was inhabited by the Divinity, the shepherds feared to approach it. (Ant. B. i. 12, § 1.)

Philo (V. M. i. 12) adds "a grave" or "a glade."

Upon the mountain was a well-known acacia [SHINTAL] (the definite article may indicate either "the particular celebrated tree," sacred perhaps already, or "the tree" or "vegetation peculiar to the spot"), the thorn-tree of the desert, spreading out its tangled branches, thick set with white thorns, and the rocky ground. It was this tree which became the symbol of the Divine Presence: a flame of fire in the midst of it, in which the dry branches would naturally have burnt and burned in a moment, but which played round it without consuming it. In Philo (V. M. i. 12) "the angel" is described as a strange, but beautiful creature. Artaquamus (Eus. Prep. Ev. ix. 27) represents it as a fire suddenly bursting from the bare ground, and fueling itself without fuel. But this is far less expressive than the Biblical image. Like all the visions of the Divine Presence recorded in the O. T., as manifested at the outset of a prophetical career, this was exactly suited to the circumstances of the tribe. It was the true likeness of the condition of Israel, in the furnace of affliction, yet not destroyed (comp. Philo, V. M. i. 12). The place, too, in the desert solitude, was equally appropriate, as a sign that the Divine protection was not confined either to the sanctuaries of Egypt, or to the Holy Land, but was to be found with any faithful worshipper, fugitive and solitary though he might be. The rocky ground at once became "a holy;" and the shepherd's sandal was to be "shod with no shoes of the desert." It is this feature of the incident on which St. Stephen dwells, as a proof of the universality of the true religion (Acts vii. 22-33).

The call or revelation was twofold —

1. The declaration of the Sacred Name expresses the eternal self-existence of the One God. The name itself, as already mentioned, must have been known in the family of Aaron. But its grand significance was now first drawn out. [JEHOVAH.]

2. The mission was given to Moses to deliver his people. The two signs are characteristic — the one of his past Egyptian life — the other of his active shepherd life. In the rush of leprosy into his hand a is the link between him and the people whom the Egyptians called a nation of lepers. In the transformation of his shepherd's staff is the glorification of the simple pastoral life, of which that staff was the symbol, into the great career which lay before it. The humble yet wonder-working crook is, in the history of Moses, as Ewald finely observes, what the despised Cross is in the first history of Christianity.

In this call of Moses, as of the Apostles afterwards, the man is swallowed up in the cause. Yet this is the passage in his history which, more than any other, brings out his outward and domestic relations.

He returns to Egypt from his exile. His Arabian wife and her two infant sons are with him. She is seated with them on the ass — (the ass was known as the animal peculiar to the Jewish people from Jacob down to David). He apparently walks by their side with his shepherd's staff. (The LXX. substitute the general term ἄρορος.)

On the journey back to Egypt a mysterious incident occurred in the family, which can only be explained with difficulty. The most probable explanation seems to be, that at the caravaners either the ass (or Gershon) (the context of the preceding verses, iv. 22, 23, rather points to the latter) was struck with what seemed to be a mortal illness. In some way, not apparent to us, this illness was connected with Zipporah with the fact that her son had not been circumcised — whether in the general neglect of that rite amongst the Israelites in Egypt, or in consequence of his birth in Midian. She instantly performed the rite, and threw the sharp instrument, stained with the fresh blood, at the feet of her husband, explaining in the agony of a mother's anxiety for the life of her child — A bloody husband thou art, to cause the death of my son." Then, when the recovery from the illness took place (whether of Moses or Gershon), she explains again, "A bloody husband still thou art, but not so as to cause the child's death, but only to bring about his circumcision."

a The Missionary legends speak of his white shining hand as the instrument of his miracles (D'Herbe- et). Hence the white hand is proverbial for the healing art.

b So Ewald (Geschichte, vol. ii. pt. 2, p. 106) taking the sickness to have visited Moses. Rosenmüller makes Gershon the victim, and makes Zipporah address Jehovah, the Arabe word for "marriage" being a synonym for "circumcision." It is possible that on this story is founded the tradition of Artap. o τον
It would seem to have been in consequence of this event, whatever it was, that the wife and her children were sent back to Jethro, and remained with him till Moses joined them at Rehoboth (Ex. xxviii. 2-5), which is the last time that she is distinctly mentioned. In Num. xiii. 1 we hear of a Midianitish wife who gave marriage to Miriam and Aaron. This may be — (1) an Ethiopian (Cushite) wife, taken after Zipporah's death (Ewald, Gesch. ii. 229). (2) The Ethiopian princess of Josephus (Ant. i. 10, § 2); (but that whole story is probably only an inference from Num. xii. 1. 3). Zipporah herself, which is rendered probable by the juxtaposition of the narratives in Hab. iii. 7.

The two sons also sink into obscurity. Their names, though of Levitical origin, relate to their foreign birthplace. Gershom, "stranger," and Eliezer, "God is my help," commemorated their father's exile and escape (Ex. vi. 3). 4. Gershom was the father of the wandering Levite Jonathan (Josh. xxiii. 20), and the ancestor of Shelomith, David's chief treasurer (1 Chr. xxvii. 26, xxviii. 29). Eliezer is also a name mentioned among the sons of Moses (Num. xiii. 17), who was the ancestor of a numerous but obscure progeny, whose representative in David's time — the last descendant of Moses known to us — was Shelomith, guard of the consecrated treasures in the Temple (1 Chr. xxvii. 25-28).

After this part he advanced into the desert, and at the same spot where he had had his vision encountered Aaron (Ex. iv. 25). From that meeting and his departure we have the first distinct indication of his personal appearance and character. The traditional representations of him in some respects will agree with that which we derive from Michael Angelo's famous statue in the church of S. Pietro in Vincoli at Rome. Long shaggy hair and beard is described as his characteristic equally by Josephus, Flavius (i. p. 424), and Artapanus (αρταπάνος, spic. Est. Prop. iv. 17). To Artapanus adds the curious touch that it was of a reddish hue, tinged with gray (αρταπάνος, χαλκότριχος). The traditions of his beauty and size as a child have been already mentioned. They are continued to his manhood in the tattlet descriptions. "Tall and dignified," says Artapanus (αρταπάνος, διήθεματα), "wise and beautiful as his father Joseph," (with a curious confusion of genealogies), says Justin (b. v. 24. 2). But beyond the slight glance at his infinitive beauty, no hint of this grand personality is given in the Bible. What is described is rather the reverse. The only place there brought out is a singular and unlooked for infirmity, "O my Lord, I am not eloquent, neither heretofore nor since Thou hast spoken to thy servant; but I am slow of speech and of a slow tongue."

How shall Pharaoh hear me, which are of unlearned lips?" (Ex. iv. 10, without words, stammering, hesitating: ἀκρασίας καὶ κακογέλων, I, X, X, his "speech contemptible," like St. Paul's — like the English Cromwell (spic. Carlyle's Cromwell, ii. 289) — like the first efforts of the Greek Democritus. In the solution of this difficulty which Moses offers, we read both of his language, of his appearance, which is the most distinct trait of his personal character, and the future relation of the two brothers. "Send, I pray Thee, by the hand of him whom Thou wilt send" (Ex. iv. 10) "make any one Thy apostle rather than me,"

Prop. En. iv. 25), that the Ethiopians derived circumcision from Moses

Moses was the inspiring soul behind; and so as time rolls on, Aaron, the prince and priest, has almost disappeared from view, and Moses, the dumb, backward, disinterested prophet, is so apparent, what he was in truth, the foremost leader of the chosen people.

III. The history of Moses henceforth is the history of Israel for forty years. But as the incidents of this history are related in other articles, under the heads of Egypt, Exodus, Plagues, Sinai, Law, Passover, Wanderings, Wilderness, it will be best to confine ourselves here to such indications of his personal character as transpire through the general framework of the narrative.

It is important to trace his relation to his immediate circle of followers. In the Exodus, he takes the decisive lead on the night of the flight. Up to that point be and Aaron appear almost on an equality. But after that, Moses is usually mentioned as the chief representative of Aaron and Samuel. He is the chief of the Jewish people, but the character of interpreter to Moses which he had borne in speaking to Pharaoh withdraws, and it would seem as if Moses henceforth became altogether what hitherto he had only been in part, the prophet of the people. Another who occupies a place nearly equal to Aaron, though he know but little of him, is Hiram, of the tribe of Judah, husband of Miriam, and grandfather of the artist Bezaleel (Joseph, Ant. ii. 2. § 4). He and Aaron are the chief supporters of Moses in moments of weariness or excitement. His advice in regard to the route through the wilderness as well as in the judicial arrangements, was, as we have seen, Jethro. His servant, occupying the same relation to him as Elisha to Elijah, or Gehazi to Elisha, was the youthful Hesekiah (afterwards Josua). Miriam always held the independent position to which her age entitled her. Her part was to supply the voice and song to her brother's prophetic power.

But Moses is incontestably the chief personage of the history, in a sense in which no one else is described before or since. In the narrative, the phrase is constantly recurring, "The Lord spake unto Moses," «Moses spake unto the children of Israel." In the traditions of the desert, whether later or earlier, the name of Moses predominates over that of every one else, "The Wells of Moses" — on the shores of the Red Sea. "The Mountain of Moses" (جبل موسى) — near the convent of St. Catherine, the Ravine of Moses (شَحْف موسى) — at Mount St. Catherine. The Valley of Moses (Wady Mousa) — at Petra. "The Books of Moses" are so called (as afterwards the Books of Samuel), in all probability from his being the chief subject of them. The very word "Mosaic" has been in later times applied (as the proper name of no other saint of the O. T.) to the whole religion. Even as applied to tessellated pavement ("Mosaic," Μαζοική, mosaik, μοσαίκος), there is some probability that the expression is derived from the variegated pavement of the later Temple, which had then become the representative of the religion of Moses (see an Essay of Raschel, Zeitschrift der Deutschen Morgan. Gesells., xiv. 650).

It has sometimes been attempted to reduce this great character into a mere passive instrument of the Divine Will, as though he had himself borne no conscious part in the actions in which he figures for the messages which he delivers. This, however
is as incompatible with the general tenor of the Scriptural account, as it is with the common language in which he has been described by the Church in all ages. The frequent addresses of the Divinity to him no more contravene his personal activity and intelligence, than in the case of Elijah, Isaiah, or St. Paul. In the N. T. the Mosie legislation is expressly ascribed to him: "Moses gave you circumcision" (John vii. 22). "Moses, because of the hardness of your hearts, suffered you" (Matt. xiv. 8). "Did not Moses give you the law?" (John vii. 19). "Moses accepted you" (John v. 45). St. Paul goes so far as to speak of him as the founder of the Jewish religion: "They were all baptized into Moses" (1 Cor. x. 2). He is constantly called "a Prophet." In the poetical language of the O. T. (Num. xvi. 18; Deut. xxxiii. 21), and in the popular language both of Jews and Christians, he is known as "the Lawgiver." The terms in which his legislation is described by Philo (V. M. ii. 1-4) is decisive as to the ancient Jewish view. He must be considered, like all the scribes and heroes of the Bible, as a man of marvelous gifts, raised up by Divine Providence for a special purpose, but not as having been Divine in origin and by the peculiarity of the Revelation which he received, into a closer communication with the invisible world than was vouchsafed to any other in the Old Testament.

There are two main characters in which he appears, as a Leader and a Prophet. The two are more frequently combined in the East than in the West. Several remarkable instances occur in the history of Mohammedanism: Mohammed himself, Abd el-Kader in Algeria, Schamyl in Circassia. (v.) As a Leader, his life divides itself into the three epochs — of the march to Sinai; the march from Sinai to Kadesh; and the conquest of the trans-Jordanic kingdoms. Of his natural gifts in this capacity, we have but few means of judging. The two main difficulties which he encountered were the reluctance of the people to submit to his guidance, and the impracticable nature of the country which they had to traverse. The patience with which he bore their murmurs is often described — at the Red Sea, at the apostasy of the golden calf, at the rebellion of Korah, at the complaints of Aaron and Miriam. The incidents with which his name was specially connected, both in the sacred narrative and in the rabbinical and popular traditions, were those of supplying water, when most wanted. This is the only point in his life noted by Tacitus, who describes him as guided to a spring of water by a herd of wild asses (Hist. v. 3). In the Pentateuch these supplies of water take place at Marah, at Horeb, at Kadesh, and in the land of Moab. That at Marah is produced by the sweetening of waters through a tree in the desert, those at Horeb and at Kadesh by the opening of a rift in the rock, and in the "cliff" that at Moab, by the united efforts, under his direction, of the chiefs and of the people (Num. xxi. 18). a (See Philo, V. M. i. 40.) Of the three first of these incidents, traditional sites, bearing his name, are shown in the desert at the present day, though most of them are rejected by modern travellers. One is Aqia Mosas, the wells of Moses," immediately south of Suez, which the tradition (probably from a confusion with Marah) ascribes to the rod of Moses. Of the water at Horeb, two memorials are shown. One is the Shish Mizer, or "cliff of Moses," in the side of Mount Si Catherine, and the other is the remarkable stone, first mentioned expressly in the Koran (li. 57), which exhibits the 12 marks or monthals out of which the water is supposed to have issued for the 12 tribes. b The fourth is the celebrated "Sik," or ravine, by which Petra is approached from the east, and which, from the story of its being torn open by the rod of Moses, has given his name (the Wady Mizer) to the whole valley. The quails and the manna are less directly ascribed to the intercession of Moses. The leavened serpent that was lifted up as a sign of the Divine protection against the snakes of the desert (Num. xxi. 9) was directly connected with his name, down to the latest times of the nation (2 K. xviii. 4; John iii. 14). Of all the relics of his time, with the exception of the Ark, it was the one longest preserved. [NEHEM.]

The route through the wilderness is described as having been made under his guidance. The particular spot of the encampment is fixed by the cloudy pillar. But the direction of the people first to the Red Sea, and then to Mount Sinai (where he had been before), is communicated through Moses, or given by him. According to the tradition of Memphis, the passage of the Red Sea was effected through Moses's knowledge of the movement of the tide (Enc. Penn. ix. ix. 27). And in all the wanderings from Mount Sinai he is said to have had the assistance of Jethro. In the Musulman legends, as if to avoid this appearance of human aid, the place of Jethro is taken by El Kuhler, the mysterious benefactor of mankind (D'Herbelot, Monastier). On approaching Palestine the office of the leader becomes blended with that of the general or the conqueror. By Moses the spies were sent to explore the country. Against his advice took place the first disastrous battle at Hormah. To his guidance is ascribed the circumvent route by which the nation approached Palestine from the east, and to his generalship the two successful campaigns in which Sitton and On were defeated. The narrative is told in short, that we are in danger of forgetting that at this last stage of his life Moses must have been as much a conqueror and victorious soldier as Joshua himself.

(b.) His character as a Prophet is, from the nature of the case, more distinctly brought out. He is the first as he is the greatest example of a prophet in the O. T. The name is indeed applied to Abra- ham before (Gen. xx. 7), but so casually as not to enforce our attention. But, in the case of Moses, it is given with peculiar emphasis. In a certain sense, he appears as the centre of a prophetic circle, now for the first time named. His brother and sister were both endowed with prophetic gifts. Aaron's silent speech enabled him to act the part of Prophet for Moses in the first instance, and Miriam is expressly called "the Prophetess." The seventy elders, and Eldad and Medad also, all "prophesied" (Num. xxi. 25-27).

But Moses (at least after the Exodus) rose high from the desert-reeks (see Brugsch, Hist. des & Ec., vol. i. p. 153).

a An illustration of these passages is to be found in one of the representations of Rameses II. (contemporary with Moses), in like manner calling out water

b See S. P. P. 46, 47, also Wolf's Travels, 2d ed. p. 125
MOSES

above all these. The others are spoken of as more or less inferior. Their communications were made to them in dreams and figures (Pent. xiii. 1-4; Num. xii. 6). But "Moses was not so." With him the Divine revelations were "mouth to mouth, even apparently, and not in dark speeches, and the similitude of the Melchizedek shall he behold." (Num. xii. 8.) In the Musulman legends his surname is "Kelvin Allah," "the spoken to by God." Of the especial modes of this direct communication, four great examples are given, corresponding to four critical epochs in his historical career, which help us in some degree to understand the name, which is meant by these expressions in the sacred text.

(1.) The appearance of the Divine Presence in the flaming acacia-tree has been already noticed. The usual pictorial representations of that scene — of a winged human form in the midst of the bush, belonging to Philo (1. M. i. 12), not to the Bible. No form is described. The "Angel," or "Messenger," is spoken of as being "in the flame." On this it was that Moses was afraid to look, and hid his face, in order to hear the Divine voice (Ex. iii. 6-9). (2.) In giving the Law from Mount Sinai, the outward form of the revelation was a thick darkness as of a thunder-cloud, out of which proceeded a voice (Ex. xix. 19, xx. 21). The revelation on this occasion was especially of the Name of Jehovah. Outside this cloud Moses himself remained on the mountain (Ex. xxiv. 1, 2, 13), and received the voice, as from the cloud, which revealed the Ten Commandments, and a short code of laws in addition (Ex. xx.-xxiii.). On two occasions he is described as having penetrated within the darkness, and remained there, successively, for two periods of forty days, of which the second was spent in absolute seclusion and fasting (Ex. xxiv. 18, xxxiv. 28). On the first occasion he received instructions respecting the tabernacle, from a "pattern shewed to him" (xxv. 9, 10; xxvi., xxvii.), and respecting the priesthood (xxviii.-xxxiii.). Of the second occasion hardly anything is told us. But each of these periods was concluded by the production of the two tables or tablets of stone, containing the successive editions of the Ten Commandments (Ex. xxxi. 12, 19). On the first of the two occasions the tabernacle remained unfinished (comp. Ex. xxiv. 17, xxxii. 15; Deut. v. 6-22). On the second occasion (if we take the literal sense of Ex. xxxiv. 27, 28), they are the ten (chiefly) ceremonial commandments of Ex. xxxiv. 14-26. The first are said to have been the writing of God (Ex. xxxi. 18, xxxii. 16; Deut. v. 22); the second, the writing of Moses (Ex. xxxiv. 28). (3.) It was nearly at the close of these communications in the mountains of Sinai that an especial revelation was made to him personally, answering in some degree to that which first called him to his mission. In the dependence produced by the apostasy of the molten calf, he besought Jehovah to show him his glory. The wish was thoroughly Egyptian. The same is recorded of Amenoph, the Pharaoh preceding the Exodus, but the Divine revelations were made to Biblical Israelites. It is announced that an actual vision of God was impossible. "Thou canst not see my face; for there shall no man see me and live." He was commanded to throw two blocks of stone, like those which he had destroyed. He was to come absolutely alone. Even the blocks, and herds which fed in the neighboring valleys were to be removed out of the sight of the mountain (Ex. xxxiii. 18, 20; xxxiv. 1, 3). He took his place on a well-known or prominent rock ("the rock," xxxiv. 11). The cloud passed by (xxxiv. 5, xxxii. 22). A voice proclaimed the two immutable attributes of God, Justice and Love — in words which became part of the religious creed of Israel and of the world (xxxiv. 6, 7). The importance of this incident in the life of Moses is attested not merely by the place which it holds in the sacred record, but by the deep hold that it has taken of the Musulman traditions, and the local legends of Mount Sinai, with some characteristic variations, in the Koran (vii. 139), and is commemorated in the Musulman chapel erected on the summit of the mountain which from this incident (rather than from any other) has taken the name of the Mountain of Moses (Jebed Minar). A cayuty is shown in the rock, as produced by the pressure of the lack of Moses, when he shrunk from the Divine glory "(N. f P., p. 30)."

(4.) The fourth mode of Divine manifestation was that which is described as commencing at this juncture, and which continued with more or less continuity through the rest of his career. Immediately after the catastrophe of the worship of the calf, and apparently in consequence of it, Moses removed the chief tent, outside the camp, and invested it with a sacred character under the name of "the Tent or Tabernacle of the Congregation" (xxxiii. 7). This tent became henceforth the chief scene of his communications with God. He left the camp, and it is described how, as in the expectation of some great event, all the people rose up and stood every man at his tent door, and looked — gazing after Moses until he disappeared within the tent. As he disappeared the entrance was closed behind him by the cloudy pillar, at the sight of which the people prostrated themselves (xxxiii. 10). The communications within the tent were described as being still more intimate than those on the mountain. "Jehovah spake unto Moses face to face, as a man speaketh unto his friend" (xxxiii. 11). He was apparently accompanied on these mysterious visits by his attendant Hoshea (see xxxi. 24-26). The two vessels (xxxii. 28), which God had entrusted to him, are called "the vessels of the covenant of Moses" (xxxiii. 11). All the revelations contained in the books of Levitice and Numbers seem to have been made in this manner (Lev. i. 1; Num. i. 1).

It was during these communications that a peculiarity is mentioned which apparently had not been seen before. It was on his final descent from Mount Sinai, after his second long seclusion, that a splendor shone on his face, as if from the glory of the Divine Presence. It is from the Vulgate translation of "opacitatem," that the conventional representation of the "horn" of Moses has arisen. The rest of the story is told so differently in the different versions that both must be given. (1.) In the A. V. and most Protestant versions, Moses is said to wear a veil in order to hide the splendor. In order to produce this sense, the A. V. of Ex. xxxiv. 29 reads, "and [thi]l Moses had done speaking with them" — and other versions, "he had put speaking with them." (2.) In the LXX and the Vulgate, on the other hand, he is said to put on the veil, not during, but after the convers
ution with the people—in order to hide, not the splendor, but the vanishing away of the splendor; and to have worn it till the moment of his return to the Divine Presence in order to rekindle the light there. With this reading is given the obvious meaning of the Hebrew words, and it is this rendering of the sense which is followed by St. Paul in 2 Cor. iii. 13, 14, where he contrasts the fearlessness of the Apostolic teaching with the concealment of that of the O. T. *We have no fear, as Moses had, that our glory will pass away.*

There is another form of the prophetic gift, in which Moses more nearly resembles the later prophets. We need not here determine (what is best considered under the several books which bear his name, Pentateuch, etc.) the extent of his authorship, or the period at which these books were put together in their present form. Eupelmenus (Euseb. Prep. Ex. ix. 26) makes him the author of letters. But of this the Hebrew narrative gives no indication. There are two portions of the Pentateuch and two only, of which the actual writing is ascribed to Moses: (1) The second edition of the Ten Commandments (Exx. xxiv. 28). (2) The register of the Stations in the Wilderness (Num. xxxiii. 1). But it is clear that the prophetic office, as represented in the history of Moses, included a poetical form of composition which characterizes the Jewish prophecy generally. These poetical utterances, whether connected with Moses by ascription or by actual authorship, enter so largely into the full Biblical conception of his character, that they must be here mentioned.

1. "The song which Moses and the children of Israel sung" (after the passage of the Red Sea, Ex. xv. 1-19). It is, unquestionably, the earliest written account of that event; and, although it may have been in part, according to the conjectures of Ewald and Bunsen, adapted to the sanctuary of Gerizim and Shiloah, yet its framework and ideas are essentially Mosaic. It is probably this song to which allusion is made in Rev. xv. 2, 3: "They stand on the sea of glass mingled with fire . . . . and sing the song of Moses the servant of God." 2. A fragment of a war-song against Amalek—"As the hand is on the throne of Jehovah, so will Jehovah war with Amalek from generation to generation." (Ex. xvii. 16).

3. A fragment of a lyrical burst of indignation—"Not the voice of them that shout for mastery, Nor the voice of them that cry for being overcome. But the noise of them that sing do I hear." (Ex. xxxii. 18).

4. Probably, either from him or his immediate prophetical followers, the fragments of war-songs in Num. xxi. 14, 15, 27-30, preserved in the "book of the wars of Jehovah," Num. xxi. 14; and the address to the well, xxi. 16, 17, 18.

5. The song of Moses (Dent. xxxii. 1-43), setting forth the greatness and the fillings of Israel. It is remarkable as bringing out with much force the idea of God as the Rock (xxxi. 4, 15, 18, 30, 31, 37). The special allusions to the pastoral riches of Israel point to the trans-Jordanic territory as the scene of its composition (xxxii. 13, 14).

6. The blessing of Moses on the tribes (Dent. xxxiii. 1-29). If there are some allusions in this psalm to circumstances only belonging to a later time (such as the migration of Dan, xxxiii. 22), yet there is no one in whose mouth it could be so appropriately placed, as in that of the great leader on the eve of the final conquest of Palestine. This poem—combined with the similar blessing of Jacob (Gen. xxxix.), affords a complete collective view of the characteristics of the tribes (with a marked absence of the Levitical tribe). (xxxii. 13, 14).

7. The 90th Psalm, "A prayer of Moses, the man of God." The title, like all the titles of the Psalms, is of doubtful authority—and the psalm has often been referred to a later author. But Ewald (Ps. Gen. v. 91) thinks that, even though this be the case, "it still breathes the spirit of the venerable Lawgiver. There is something extremely characteristic of Moses, in the view taken, as from the summit or base of Sinai, of the eternity of God, greater even than the eternity of mountains, in contrast with the fleeting generations of men.* One expression in the psalm, as to the limit of human life (70, or at most 80 years) in ver. 10, would, if it be Mosaic, fix its date to the stay at Sinai. Jerome (Adl. Ruffin. i. § 13), on the authority of Origen, ascribes the next eleven Psalms to Moses. Conybeare (Conybeare, c. 223) supposes that it is by a younger Moses of the time of David.

How far the gradual development of these revelations or poetic utterances had any connection with his own character and history, the materials are not such as to justify any decisive judgment. His Egyptian education must, on the one hand, have supplied him with much of the ritual of the Israelite worship. The coincidences between the arrangements of the priesthood, the dress, the sacrifices, the ark, in the two countries, are decisive. On the other hand, the proclamation of the Unity of God not merely as a doctrine confined to the priestly order, but communicated to the whole nation, implies distinct antagonism, almost a conscious recoil against the Egyptian system. And the absence of the doctrine of a future state (with"out adopting its full extent the paradox of Warburton) proves at least a remarkable independence of the Egyptian theology, in which that great doctrine held so prominent a place. Some modern critics have supposed that the Levitical ritual was an after-growth of the Mosiac system, necessitated or suggested by the incapacity of the Israelites to retain the higher and simpler doctrine of the Divine Unity—as proved by their return to the worship of the Heliopolitan calf under the sanction of the brother of Moses himself. There is no direct statement of this connection in the sacred narrative. But there are indirect indications of it, sufficient to give some color to such an explanation.

The event itself is described as a crisis in the life of Moses, almost equal to that in which he received his first call. In the gray of rage and disappointment he destroyed the monument of his first revelation (Ex. xxiv. 19). He threw up his

---

* a In Ex. xxxiv. 24, 33, the Vulgate, apparently by following a different reading, "and," "as with them," for "with him," differs both from the LXX. and A. V.

* b Lord Bacon has given a metrical version of this 90th Psalm, rising in some parts to a tone of grandeur which makes it one of the noblest hymns in our language. See his Works, iv. 125-127 (N. Y. 1894).
mission (th. 32). He craved and he received a new and special revelation of the attributes of God to console him (th. xxxii. 18). A fresh start was made in his career (th. xxxiv. 29). His relation with his countrymen henceforth became more vivid and mysterious (th. 32-34). In point of fact, the greater part of the details of the Levitical system were subsequent to this catastrophe. The institution of the Levitical tribe grew directly out of it (xxxii. 26). And the inferiority of this part of the system to the rest is expressly stated in the Prophets, and expressly connected with the idolatrous tendencies of the nation. "Wherefore I gave them statues that were not good, and judgments whereby they should not live" (Ex. xx. 25). "I spake not unto your fathers, nor commanded them in the day that I brought them out of the land of Egypt, concerning burnt-offerings or sacrifices" (Deut. viii. 22).

Other portions of the Law, such as the regulations of slavery, of blood-feud, of clean and unclean food, were probably taken, with the necessary modifications, from the customs of the desert tribes.

But the distinguishing features of the law of Israel, which have remained to a considerable extent in Christendom, are peculiarly Mosaic: the Ten Commandments; and the general spirit of justice, charity, and liberty, that pervades even the more detailed and local observances.

The prophetic office of Moses, however, can only be fully considered in connection with his whole character and appearance. "By a prophet Jehovah brought Israel out of Egypt, and by a prophet was he preserved" (Hos. xii. 13). He was in a sense peculiar to himself the founder and representative of his people. And, in accordance with this complete identification of himself with his nation, is the only strong personal trait which we are able to gather from his history. "The man Moses was very meek, above all the men that were upon the face of the earth" (Num. xii. 3). The word "meek" is hardly an adequate rendering of the Hebrew term חָמָס, which should be rather "much enduring," and, in fact, his onslaught on the Egyptian, and his sudden dashing the tables on the ground, indicate rather the reverse of what we should call "meekness." It represents what we should now designate by the word "disinterested." All that is told of him indicates a withdrawal of himself, a preference of the cause of his nation to his own interests, which makes him the most complete example of Jewish patriotism. He joins his countrymen in their degrading servitude (Ex. ii. 11, v. 4). He forgets himself to avenge their wrongs (v. 14). He desires that his brother may take the lead instead of himself (Ex. iv. 13). Hedeclines that not he only, but all the nation were gifted alike. "Lavish them upon my mouth?" (Num. xi. 23). When the offer is made that the people should be destroyed, and that he should be made "a great nation" (Ex. xxxi. 10), he prays that they may be forgiven — if not, blot me, I pray Thee, out of Thy book which Thou hast written." (xxvii. 14). His sons were not raised to honor. The leadership of the people passed, after his death, to another tribe. In the books which bear his name, Aaron, and not himself, appears as the real father of the nation. In spite of his great preeminence, they are never "the children of Moses.

In exact conformity with his life is the account of his end. The Book of Deuteronomy describes, and is, the last farewell of the prophet to his people. It takes place on the first day of the eleventh month of the fortieth year of the wanderings, in the plains of Moab (Deut. i. 3, 4), in the palm-groves of Aila (Joseph. Ant. iv. 8, § 1). [DEUT-SHIMM.] He is described as 120 years of age, but with his sight and his freshness of strength unabated (Deut. xxxiv. 7). The address from ch. i. to ch. xxx. contains the recapitulation of the Law. Joshua is then appointed his successor. The Law is written in the midst of Aila and is to be deposited in the Ark (ch. xxxi.). The song and the blessing of the tribes conclude the farewell (Deut. xxxii., xxxiii.).

And then comes the mysterious close. As if to carry out to the last the idea that the prophet was to live not for himself, but for his people, he is told that he is to see the good land beyond the Jordan, but not to possess it himself. The sin for which this penalty was imposed on the prophet is difficult to ascertain clearly. It was because he and Aaron rebelled against Jehovah, and "believed Him not to sanctify him," in the murmurations at Kadesh (Num. xx. 12, xxxii. 14; Deut. xxxii. 51), or, as it is expressed in the Psalms (xi. 53), because he spake unadvisedly with his lips. It is a word of destruction. "Cease ye (not, as often rendered, can ce) bring water out of the cleft?" (Num. xx. 10; LXX. μὴ εἴδοχεν, "surely we cannot.""

The Tabernacle tradition, characteristic ally, makes the sin to be that he called the chosen people by the opprobrious name of "rebels." He ascends a mountain in the range which rises above the base of the Jordan. His name is spoken so particularly that it must have been well known in ancient times, though, owing to the difficulty of exploring the eastern side of the Jordan, it is unknown at present. The mountain tract was known by the general name of THE PISGAH. Its summits apparently were dedicated to different divinities (Num. xxiii. 11). On one of these, consecrated to Nebo, Moses took his stand, and surveyed the four great masses of Palestine west of the Jordan — so far as it could be discerned from that height. The view has passed into a proverb for all nations.

In two remarkable respects it illustrates the office and character of Moses. First, it was a view, in its full extent, to be imagined rather than actually seen. The foreground alone could be clearly discernible; its distance had to be supplied by what was beyond, though suggested by what was within the actual prospect of the seer.

Secondly, it is the likeness of the great discoverer pointing out what he himself will never reach. To English readers this has been made familiar by the application of this passage to Lord Bacon, original mind in the noblest sense of the word, and then drawn out at length by Lord Macaulay.

"So Moses the servant of Jehovah died there in the land of Moab, according to the word of Jehovah, and he buried him in a ravine in the land of Moab, before Beth-peor — but no man knoweth of his sepulcher unto this day. . . . And the children of Israel wept for Moses in the plains of Moab thirty days. . . . This is that all is said in the sacred record. Jewish, Arabian, and Christian traditions have labored to fill up the details. . . . Amidst the tears of the people — the women beating their breasts, and the children giving way to uncontrollable weeping — he withdrew. At a certain point in his ascent he made a sign.
the weeping multitude to advance no farther, taking with him only the elders, the high-priest Eliezer, and the general Joshua. At the top of the mountain he dismissed the elders—and then, as he was about descending to the level, he called them up, a cloud suddenly stood over him, and he vanished in a deep valley. He wrote the account of his own death "in the sacred books, fearing lest he should be defined" (Joseph. Ant. iv. 8. 48).

"He died in the last month of the Jewish year." After his death he is called "Melki" ( Clem. Alex. Strom. i. 345).

His grave, though studiously concealed in the sacred narrative, in a manner which seems to point a warning against the excessive veneration of all sacred tombs, and though never acknowledged by the Jews, is shown by the Mussalmans on the west (and therefore the wrong) side of the Jordan, between the Dead Sea and St. Salua (S. of P. p. 302).

The Mussulman traditions are chiefly exaggerations of the O. T. accounts. But there are some stories independent of the Bible. One is the striking story (Koran, xviii. 65-90) on which is founded Parnell's Uret. Another is the proof given by Moses of the existence of God to the atheist king (Chardin, x. 330, and in Fabriicius, p. 830).

In the O. T. the name of Moses does not occur so frequently, after the close of the Pentateuch, as might be expected. In the Judges it occurs only once—in speaking of the wandering Levite Jonathan, his grandson. In the Hebrew copies, followed by the A. V., it has been superseded by "Manasseh," in order to avoid throwing discredit on the family of so great a man. (Manasseh, vol. ii. p. 1776 a.) In the Psalms and the Prophets, however, he is frequently named as the chief of the prophets.

In the N. T. he is referred to partly as the representative of the Law—as in the numerous citations cited above—and in the vision of the Transfiguration, where he appears side by side with Elijah. It is possible that the peculiar word rendered "decease" (2Pe 3:3)—used only in Luke ix. 31 and 2 Pet. i. 15, where it may have been drawn from the context of the Transfiguration—was suggested by the Exodus of Moses.

As the author of the law he is contrasted with Christ, the Author of the Gospel: "The law was given by Moses" (John i. 17). The ambiguity and transitory nature of his glory is set against the permanence and clearness of Christianity (2 Cor. iii. 14-18), and his mediatorial character ("the law in the hand of a mediator") against the unbroken communication of God in Christ (Gal. iii. 19). His "service" of God is contrasted with Christ's sonship (Heb. iii. 5, 6). But he is also spoken of as a likeness of Christ; and, as this is a point of view which has been almost lost in the Church, compared with the more familiar comparisons of Christ to Adam, David, Joshua, and yet has as firm a basis in fact as any of them, it may be well to draw it out in detail.

1. Moses is, as it would seem, the only character of the O. T. to whom Christ expressly likens Himself, "Moses wrote of me" (John v. 45). It is uncertain to what passage our Lord alludes, but the general opinion seems to be the true one—that it is the remarkable prediction in Deut. xviii. 15, 18, 19—"The Lord thy God will raise up unto thee a prophet from the midst of thee, from thy brethren, like unto thee: unto whom ye shall hearken. . . . I will raise up unto them a prophet like unto thee, and will put my words in his mouth: and he shall speak unto them all that I shall command him. And it shall come to pass, that whosoever will not hearken unto the words of the prophet, which he shall speak in thy name, I will require it of him." This passage is also expressly quoted by Stephen (Acts vii. 37, [comp. by Peter, Acts iii. 22]), and it is probably in allusion to it, that at the Transfiguration, in the presence of Moses and Elijah, the words were uttered, "Hear ye Him." It suggests three main points of likeness:

(a) Christ was, like Moses, the great Prophet of the people—the last, as Moses was the first. In greatness of position, none came between them. Only Samuel and Elijah could by any possibility be thought to fill the place of Moses, and they only in a very secondary degree. Christ alone appears, like Moses, as the Revealer of a new name of God—of a new religious society on earth. The Israelites were "baptized unto Moses" (1 Cor. x. 2). The Christians were baptized unto Christ. There is no other name in the Bible that could be used in like manner.

(b) Christ, like Moses, is a Lawgiver: "Him shall ye hear." His whole appearance as a Teacher, differing in much beside, has this in common with Moses, unlike the other prophets, that He lays down a code, a law, for his followers. The Sermon on the Mount almost inevitably suggests the parallel of Moses on Mount Sinai.

(c) Christ, like Moses, was a Prophet out of the midst of the nation—from their brethren." As Moses was the entire representative of his people, feeling for them more than for himself, absorbed in their interests, hopes, and fears, so, with reverence be it said, was Christ. The last and greatest of the Jewish prophets, He was not only a Jew by descent, but that Jewish descent is insisted upon as an integral part of his appearance. Two of the Gospels open with his genealogy. "Of the Israelites came Christ after the flesh" (Rom. xii. 5). He went and abode over his country. He confined himself during his life to their needs. He was not sent "but unto the lost sheep of the house of Israel" (Matt. xv. 24). It is true that his absorption into the Jewish nationality was but the symbol of his absorption into the far wider and deeper interests of all humanity. But it is only by understanding the one that we are able to understand the other; and the life of Moses is the best means of enabling us to understand them both.

2. In Heb. iii. 1-19, xii. 24-29, Acts vii. 37, Christ is described, though more obscurely, as the Moses of the new dispensation—as the Apostle, or Messenger, or Mediator, of God to the people—as the Controller and Leader of the flock or household of God. No other person in the O. T. could have furnished this parallel. In both, the revelation was commenced partly through the life, partly through the teaching; but in both the Prophet was incessantly united with the Guide, the Ruler, the Shepherd.

3. The details of their lives are sometimes, though not often, compared. Stephen (Acts vii. 20).

3 In the Arabic traditions the 7th of Abar (Jāmbālīn, p. 295).
2026

MOSES

24—28, 35) dwells, evidently with this view, on the likeness of Moses in striving to act as a peace-maker, and misunderstood and rejected on that very account. The death of Moses, especially as related by Josephus (ad nuper), immediately suggests the Ascension of Christ; and the redemption of the rise of the Christian Church, till after its Founder was withdrawn, gives a moral as well as a material likeness. But this, though oft spoken in the services of the Church, has not been expressly laid down in the Bible.

In Jude 9 is an allusion to an altercation between Michael and Satan over the body of Moses. It has been endeavored (by reading Ταγαν for Μουσαντιεον) to refer this to Zech. iii. 2. But it probably refers to a lost apocryphal book, mentioned by Origen, called the "Ascension, or Assumption, of Moses.”

All that is known of this book is given in Fabricius, Cod. Pseudepigrapha, t. t. i. 828—844. The "dispute of Michael and Satan" probably had reference to the concealment of the body to prevent idolatry. Gal. v. 6 is by several later writers said to be a quotation from the "Revelation of Moses" (Fabricius, i6. i. 838). — A. P. S.

* If the birth of Moses fell within the period of the XVIIIth Dynasty, this surely cannot be styled an "age of Homanic simplicity." On the contrary, it was the most brilliant era of Egypt in arts and arms, and the monuments show that the manners of the people were highly luxurions. Women were allowed a freedom which is nowhere tolerated in the East at the present day, and which was exceptional among civilized nations of antiquity; hence the use of the Nile for bathing could not have been forbidden to their sex by any code of Egyptian propriety. Moreover, a princess would have been able to command a degree of privacy in her ablations, such, for instance, as could easily be secured to-day along the margin of the palace garden in the island of Koda in the Nile—where, indeed, the Mohammedan tradition locates the scene of the finding of Moses. This incident of the bathing, so contrary to the customs of other nations of antiquity with regard to women, gives verisimilitude to the story.

The entire absence of the marvelous in this Biblical narrative of the infancy of Moses is in striking contrast with the Rabbinical legends, and with the tendency of an inventor to exaggerate the early history of such a hero, and to multiply fables and wonders. The stories of Romulus and Remus, exposed on the bank of the Tiber, suckled by a wolf and fed by a wood-pecker, and of Semiramis preserved in infancy by pigeons that brought her food, bear no analogy to this account of the preservation of Moses. The whole air of the former is fabulous; while the latter gives a natural and sufficient explanation of the incident, without seeking to magnify the incident itself. It was natural, for the reason assigned, that the Egyptian king, jealous of the growing numbers of a foreign race, should seek to exterminate them by destroying their male offspring. It was natural that the parents of Moses should seek to save him alive. When they could no longer hide him, the expedit of committing him to a floating cask upon the reedy margin of the river that flowed by the door, was but the natural ingenuity of maternal affection. The finding of the child by the king’s own daughter was a perfectly natural incident, and her immediate adoption of the child was but the natural prompting of a woman’s sympathy. The addition of Pharaoh that she afterwards used devices upon her own person with a view to represent Moses as her own child, is one of those fanciful legends which by contrast enable one the better to appreciate the simplicity of the Bible story. (Phil. Mos., i. 5.) This narrative has nothing in common with the mythical inventions of later times.

The incident which first brings Moses before us in the character of a deliverer illustrates the magnanimity of his nature, in openly exposing the cause of the injured, and identifying himself with his oppressed race, while at the same time it exhibits a rude impulsiveness of spirit which needed to be subdued before he could be fitted for his great work of leadership. Augustine condemns his killing the Egyptian as a deed of unjustifiable brutality. The Koran represents it as a work of Satan, of which Moses repented. Pharaoh applauds it as a pious action. In his own code Moses makes a wide distinction between killing by guile, and killing through sudden heat, to avenge an injury or injustice. Certainly a quick sympathy with the suffering and oppressed marks a noble nature; yet, from the subsequent narrative, it would appear that Moses in this act had mistaken the will of God as to the manner of delivering Israel, since this would have been accomplished not by a violent insurrection, but by the manifestation of Divine power.

In the wilderness of Arabia Petraea Moses would find a secure retreat from the rage of Pharaoh—especially if at that time the Egyptians had been dispossessed of their dominion in the peninsula. Bunsen (Egypt’s People, bk. iv. pt. ii. sec. v.) argues that since the copper mines of Sardis of Khadin were worked from the time of Tuthmosis II. down to that of Ramesses the Great, the life of Moses could not have fallen within this period. Lepsius (Briefe aus Egypten) traces the steles of Sardis from the last dynasty of the old monarchy to the last king of the XIXth Dynasty. Yet the presence of an Egyptian garrison at Sardis may have been no greater restraint upon the Nomads of that time, than are the garrisons of Nikhil and Akaba upon the Abduts of to-day.

The scenes of the desert life of Moses, following so closely upon his life in Egypt, again verify the narrative by their fidelity to nature. The incident at the well could hardly have happened in Egypt, where water for almost all purposes was drawn from the river, and where the people were more agricultural than pastoral,—but it belongs to Arabian life.

a In later history, the name of Moses has not been forgotten. In the early Christian Church he appears in the Roman catacomb in the likeness of St. Peter, partly, doubtless, from his being the leader of the Jewish as Peter of the Christian Church, partly from his connection with the Rock. It is so striking the Rock that he appears under Peter’s name.

In the Jewish, as in the Arabic nation, his name in later years been more common than in former ages, though never occurring again perhaps, as in the case of David, and of Peter in the Papacy, from motives of reverence in the earlier annals, as recorded in the Bible. Moses Maimonides, Moses Mendelssohn, Moses Mendelssohn, who the ancient name of Spain, are obvious instances. Of the first of these three a Jewish proverb testifies that "From Moses to Moses there was none like Moses."
It was in the desert, where the greatness and majesty of God are so strikingly contrasted with the littleness and nothingness of man, and where everything invites to religious contemplation, that Moses attained to that high spiritual development which qualified him to be "the spokesman and interpreter of the divine mysteries." As Ewald (Geschichte des Volkes Israel) has said, "It was necessary for Moses, before his prophetic work began, to be so imbued with the power of religion that from that moment he became a new man. This first seized on him in the calm and stillness of life; —the bush in the desolate waste suddenly became to the simple shepherd a burning shrine, out of whose brightness the angel of God spake to him. Therefrom he thought and acted under the direct assurance of God. That there is no redemption from Egyptian bondage but in free obedience to the clearly perceived will of the Heavenly Father, no deliverance from idolatry and the whole superstitution of Egypt but by the service of the purely spiritual God: these truths, and such as these, must have come before the eye of Moses in all the power of a divine inspiration, while they have yet been recognized with equal certainty by any one. In Moses were present all the necessary conditions to make him the greatest prophet of high antiquity."

The influence of Egyptian thought, manners, and institutions upon Moses has been considered in another place. [Law of Moses.] But his conception of God as a pure spirit, infinitely holy, and his conception of love as the true basis of human society, are so remote from Egyptian influence, and so sublime in themselves, as almost to necessitate the theory of a divine inspiration to account for their existence. As the incident of the burning bush rests solely upon the authority of Moses himself, some have treated it as a spiritual hallucination, and others have chaced it with the pretended night-vision of Mohammad. But Mohammad never wrought a miracle openly: whereas Moses, using the staff given him at the burning-bush, wrought miracles upon the grandest scale in presence of two nations. Hence, to discredit his story of the burning bush and the serpent-stick, is either to set aside the whole history of the Exodus and of Israel in the desert, or to assume that by the miracles in Egypt Jehovah put himself to a fantasy or an imposture. Moreover there is nothing in this story to magnify Moses as a hero; on the contrary, with a hesitancy that borders upon stubbornness, and a distrust that betrays a lurking unbelief, he appears quite at disadvantage. The story of the divine call of Moses is very unlike the mythical treatment of a hero. And the same is true of the whole narrative of his interview with Jehovah at Sinai, and of the wonders performed in Egypt, at the Red Sea, and in the wilderness of Sinai. Never was there a great leader who obscured himself so little, and was so careful to ascribe all his achievements to God — even putting upon record his own infirmities, whenever he was for a moment betrayed into petulance or presumption. The artlessness and honesty of the story in all that concerns Mosest insertion while as yet he had never perceived the supernatural events that are incorporated with it.

It is quite possible that some traces of Moses will yet be found in Egyptian literature, more definite and decisive than the brief allusions of Manetho which save come down to us through Josephus. Lauth (Moses der Ehvärter) finds the Moses of the Hebrew books in the Mem of the Papyri at Leyden, registered as Anastasi I. and Anastasi II. 350, and he has even attempted to identify him with the Mohar or hero whose travels in Syria and Phœnicia in the fourteenth century B.C. have lately been deciphered by Chabas (Voyage d'un Égyptien). As yet, however, this interpretation is simply tentative; but we may confidently hope to obtain from Egyptian sources some verification of the personality and the period of a man who figured so grandly in Egyptian and Arabian history. J. P. T.

* A Latin version of a large portion of the work referred to by some of the Christian fathers as the "Ascension" or "Assumption (Ardvýncys) of Moses" is contained in a palimpsest manuscript of the sixth century belonging to the Ambrosian Library at Milan, and was first published by the Librarian, A. M. Ceriani, in his Monumenta sacra et profana, etc. Tom. I. Fasc. i., Mediolani, 1801. It was first critically edited by Hilgenfeld in his Moses Testamentum extra canonem receptum, Fasc. i. pp. 93-115 (Lips. 1866), who, with the aid of Gutschmid, Lipsius, and others, corrected many of the errors of the manuscript, and brought the text, for the most part, into a readable condition. It was next edited with a German translation and copious notes by Volkmar, as the third volume of his Handbucb zu den Apokryphen, Leipzig, 1867, and again by M. Schmidt and A. Marx in Marx's Archiv für wissenschaft. Erforschung des alten Test., 1867, Heft 2. Still more recently it has been retranslated from Latin into Greek, with critical and explanatory notes, by Hilgenfeld, in his Zeitschr. f. wiss. Theol., 1868, pp. 273-309, 356. Critical discussions of various points connected with the work will also be found in the same periodical for 1867, pp. 217 ff. (against Volkmar), 448 (by M. Haupt), 1868, pp. 76-108 (by F. Ritschl), 466 ff. (do.), and 1869, pp. 215-228 (do.). See also Ewald in the Göttinger Gel. Anz. for 1862, pp. 3-7; 1867, pp. 110-117; and Gesz. Christus, 3e Ausg. (1867), pp. 73-82; Langen (Cath.), Das Judentum, etc. (1896), pp. 102-110; F. Phillips, Das Buch Hebenoch, etc. (1868), pp. 166-191; and an article by Wieseler, Die jüngst aufgefundene Aufzeichnung Moses noch Urragung und Uirhalt notversucht, in the Jahrb. d. deutscbe Theol., 1858, pp. 622-648.

The work may be divided into two principal parts. In the first, Moses, just before his death, is represented as giving to Joshua, as his appointed successor, a sketch of the future history of the chosen people, ending with their final triumph over the Roman power, here symbolized by the Eagle, as in the 2d book of Esdras. This is followed by a self-distrustful speech of Joshua, to which Moses makes an encouraging reply, broken off abruptly by the imperfection of the manuscript, which has, besides, a considerable number of illegible lines or words. Though the importance of this document is strangely exaggerated by Volkmar, it is of no little interest as illustrating the state of feeling and the theocratic or Messianic expectations of a portion, at least, of the Jews, at the time when it was written. The details of the paper, however, are beyond the scope of the present work.
The question here, then, is whether the "moth" in the verse is to be understood as a labile insect or a non-labile one. Some scholars believe that the word "moth" in this case signifies a small particle of something dry, as wood, chaff, or straw. The rendering "straw" or "splitter" is preferred by some as forming a more lively antithesis to "beam." For the proverb see the notes of Wetstein and Tholuck on Matt. vii. 5-8.

**MOTH** (αἰμη, αἰμα: σφήν, αἰμηγυς, παραξηγος; Syn. εὑρίσκειν: Αν. βρωσεις, τινες, μοθινες). By the Hebrew word we are certainly to understand some species of clothes-moth (times); for the Greek σφήν, and the Latin _times_, are used by ancient authors to denote either the larva or the image of this destructive insect, and the context of the several passages where the word occurs is sufficiently indicative of the animal. Reference to the destructive habits of the clothes-moth is made in Job iv. 19, xii. 28; Ps. cxxxix. 11: Is. i. 9, li. 8; Hos. v. 12; Matt. vi. 19, 29: Luke xii. 35, and in Eccles. xiv. 3, xiii. 13; indeed, in every instance but one where mention of this insect is made, it is in reference to its habit of destroying garments; in Job xxviii. 18, "He hideth his face as a moth," it is clear that allusion is made either to the well-known case of the _Tinea pelionella_ (see woodcut), or some allied species, or else to the leaf-bombing larvae of some other member of the _Lepidoptera_. "I will be to Ephraim as a moth," in Hos. vi. 12, clearly means "I will consume him as a moth consumes garments." The expression of the L. V. in Job iv. 19, "are consumed before the moth," is certainly awkward and ambiguous; for the different interpretations of this passage see Rosenmuller's _Schol._, ad loc., where it is argued that the word rendered "before the moth" signifies "as a moth doth consume." So the Vulg. "consumunt velit a timine" (for this use of the Hebrew phrase, see 1 Sam. i. 16). Similar is the Latin ad _trocum_, in _Plaut._, _Inul._ i. 1, 73. Others take the passage thus: "who are consumed even as the trail moth is consumed." Either sense will suit the passage; but see the different explanation of Lee (_Comment. on Job_, ad loc.). Some writers understand the word _times_ of Matt. vi. 19, 20, to denote some species of moth (tinea grae.

---

**MOTHS.** Others think that _σφήν_ and _times_ by headlady is _σφήν_ _βιδωράκια_ (see _Semit._, _Ex. Pam._ ii. c. 35). _[Kest._] The Oriental were fond of forming repositories of rich apparel (Hammond, _Journ._ on Matt. vi. 19), whence the frequent allusion to the destructiveness of the clothes-moth.

**MOUNT MOUNTAIN.** The British times which are injurious to clothes, fur, etc., are the following: _tinea pelionella_, a common species often found in carriages, the larva feeding under a gallery constructed from the lining; _t. pelionella_, the larva of which constructs a portable case out of the substance in which it feeds, and is very partial to feathers. This species, writes Mr. H. T. Stainton to the author of this article, "is certainly observed in Asia Minor, and I think you may safely conclude, that it and _biologia_ (an abundant species often found in horse-hair linings of chairs) will be found in any old furniture warehouse at Jerusalem." For an interesting account of the habits and economy of the clothes-moths, see Bennic's _Insect Architecture_, p. 190, and for a systematic enumeration of the British species of the genus _Tinea_, see _Insecta Britannica_, vol. ii. The clothes-moths belong to the group _Lepidoptera_. For the Hebrew _αιμη_ see _Woy._

**MOTHER** (μητρα: moter). The superriority of the Hebrew over all contemporaneous systems of legislation and of morals is strongly shown in the higher estimation of the mother in the Jewish family, as contrasted with modern oriental, as well as ancient oriental and classical usage. The king's mother, as appears in the case of Bathsheba, was treated with especial honor (1 K. ii. 19: Ps. xx. 12; Lev. xiv. 3; Matt. v. 16, xvi. 18, 21; Prov. x. 1, xx. 29, xxii. 25, xxix. 13, xxxi. 20; [CHILDEB: A YOUTH: KINDRED: KING, vol. ii. p. 160 b; _Woy._].

W. H. P.
exclusively to representing ἴδιος. In the Apocrypha the same usage prevails as in the N. T., the only exception being in 1 Mac. xii. 36, where "mount" is put for ἴδιος, probably a mound, as we should now say, or embankment, by which Simon cut off the communication between the citadel on the Temple mound and the town of Jerusalem. For this Josephus (Ant. xiii. 5, § 11) has τὰ κτήματα, a wall. In which the translators have employed "mount," and "mountain" for the above Hebrew and Greek terms only, the translators of the A. V. have also occasionally rendered the same terms by the English word "hill," thereby sometimes causing a confusion and disconnection between the different parts of the narrative which it would be de-iriable to avoid. Examples of this are given under Hills (vol. ii. p. 1077). Others will be found in 1 Mac. xiii. 52, compared with xvi. 20; Jud. vi 12, 13, comp. with x. 10, xiii. 10.

The Hebrew word הָרָה, like the English "mount," is employed both for single eminences more or less isolated, such as Sinai, Gerizim, Elad, Zion, and Olivet, and for ranges, such as Lebanon. It is also applied to a mountainous country or district, as in Josh. xvi. 20, where "the mountain of Israel" is the highland of Palestine, as opposed to the "valley and the plain;" and in Josh. xi. 21, xx. 7, where "the mountain of Judah" (A. V. in the former case "mountains") is the same as the "hill-country" in xvi. 11. Similarly Mount Ephraim (Har Ephraim) is the mountainous district occupied by that tribe, which is evident from the fact that the Mount Gede, Mount Zemaraim, the hill of Phinehas, and the towns of Shechem, Shamir, Timnath-Serah, besides other cities (2 Chron. xxviii. 8), were all situated upon it. So also the "mount of the Amorites" is apparently the elevated country east of the Dead Sea and Jordan (Deut. i. 7, 19, 20), and "Mount Naphtali" the very elevated and hilly tract allotted to that tribe.

The various eminences or mountain-districts to which the Hebrew word הָרָה is applied in the O. T. are as follows:—

1. "Aram; Aman: of the Amalek; of the Amorites; of Arahath; Balaath; Baal-hermon; Bashan; Bethel; Bethhe; Carmel; Ebal; Ephraim; Ephron; Esau; Gaash; Gerizim; Gilboa; Gilead; Halak; Heeres; Hermon; Hor 6 (2); Horab; of Issak; Je-arem; Judah; Olivet; or of Onives; Mizar; Mohiah; Naphtali; Nebi; Paran; Perazim; Samaria; Seir; Sephar; Sinai; Sion; Shemeron, or Shezib (all names for Hermon); Shaphir; Tabor; Zalmon; Zemaraim; Zion.

2. The Mount of the Valley (הָרָה הָרְבֹּשֵׁל; δύστρια ἐκκλησία) was a district on the East of Jordan, within the territory allotted to Reuben (Josh. xiii. 19), containing a number of towns. Its name recalls a similar juxtaposition of "mount" and "valley" in the name of "Langele likes," a well-known mountain in our own country.

The word "hill" became, at least in one instance, incorporated with the name which accompanied it, so as to form one word. Har Gerizim, Mount Gerizim, appears in the writers of the first centuries of the Christian era as πάλαι Ἀγραμάσια (Empedones), ἰδιος Ἀγραμάσια (Marinus), mons Agrimaren (Win. Hieroc. p. 587). This is also, as has already been noticed (see vol. i. p. 156 b), the origin of the name of Mount Tabor which is given by the LXX. Stephanus of Byzantium, and others, and which may have been a corruption, for the sake of euphony, from Ἀρσάδιφος: — Ἀρσάδιφος.

The frequent occurrence throughout the Scriptures of personification of the natural features of the country is very remarkable. The following are, it is believed, all the words used with this object in relation to mountains or hills:—

1. Head, שֶהָר, Josh. Gen. viii. 5; Ex. xix. 20; Deut. xxxiv. 1; 1 K. xviii. 42 (A. V. "top of").

2. Ears, יִשְׁנָה, Azmuth. Aznoth-Tabor, Josh. xix. 34: possibly in allusion to some projection on the top of the mountain. The same word is perhaps found in Uzzen-Sheerah.

3. Shoulder, שֵׁי, Cáthoth. Deut. xxxiii. 12; Josh. xv. 8, and xviii. 16 ("side"); all referring to the hills on or among which Jerusalem is placed. Josh. xiv. 10, "the side of Mount Jearim.

4. Side, שֵׁנָה, Tewd. (See the word for the "side" of a man in 2 Sam. ii. 16, iv. 4, &c.) Used in reference to a mountain in 1 Sam. xxvi. 26, 2 Sam. xiii. 34.

5. Loins or Flanks, יִשְׁנָה, Cisloth. Chisloth-Tabor, Josh. xix. 12. It occurs also in the name of a village, probably situated on this part of the mountain, Ha-Cesulloth, יִשְׁנָה יִשְׁנָה, i. e. the "loins" (Josh. xix. 18). [CHESOLOTH].

6. Rib, לֹא, Teloth. Only used once, in speaking of the Mount of Olives, 2 Sam. xvi. 13, and there translated "side," in κατακόρων τοῦ ἄνθρωπος.

7. Back, לֹא, Shecem. Possibly the root of the name of the town Shechem, which may be derived from its situation, as it were on the back of Gerizim.

8. Thigh, נוֹם, Jaroth. (See the word for the "thigh" of a man in Judg. iii. 16, 21.) Applied to Mount Ephraim, Judg. xix. 1, 18; and to Lebanon, 2 K. x. 25; Is. xxxvii. 24. Used also for the "sides" of a cave, 1 Sam. xxiv. 3.

a In the same manner "The Peak," originally the name of the highest mountain of Derbyshire, has now been extended to the whole district.

b Mount Hor is probably the "great mountain," in "mountains," according to the oriental custom of emphasizing an expression by doubling the words, xi. 16, "the hill Samaria," accurately, "the mountain Shomeron."

c The same reading is found in the LXX. of Jer. xlii. 5, xlii. 4.

d With perhaps four exceptions, all the above terms are used in our own language: but, in addition, we speak of the "crown," the "instead," the "foot," the "toe," and the "breast" or "bosom" of a mountain or hill. "Top" is perhaps only a corruption of knyp, "head." Similarly we speak of the "nose," and the "gorge" (i. e. the "throat") of a ravine; and a "tongue" of land. Compare too the word col, "neck," in Fren. a.
*MOUNT MOURNING*

which in remote times and in particular nations was stronger than is now the case, the difference between each is on the whole very striking. One marked feature of oriental mourning is what may be called its studied publicity, and the careful observance of the prescribed ceremonies. Thus Abraham, after the death of Sarah, caused, as it were in state, to mourn and weep for her, Gen. xxii. 2. Job, after his misfortunes, "arose and rent his mantle (wail, DRESS, i. 621 c), and shaved his head, and fell down upon the ground, on the ashes," Job i. 20, ii. 8, and in like manner his friends "rent every one his mantle, and sprinkled dust upon their heads, and sat down with him on the ground seven days and seven nights" without speaking, ii. 12, 13. We read also of high places, streets, and house-tops, as places especially chosen for mourning, not only by Jews but by other nations, Is. xv. 3; Jer. iii. 21, xlvii. 38; 1 Sam. xi. 4, xxx. 4; 2 Sam. xv. 30.

(2.) Among the particular forms observed the following may be mentioned:

a. Reading the clothes, Gen. xxxvii. 29, 34, xlix. 13; 2 Chr. xxxvii. 27; Is. xxxviii. 24 (where the absence of the form is to be noted), xii. 5; 2 Sam. iii. 31, 32; Josh. vii. 6; Joel ix. 13; Ezr. iv. 5; 2 K. v. 7, x. 14; Matt. xxvi. 65; Mark: Mark xiv. 65, χατανα.

b. Dressing in sackcloth [SACKCLOTH], Gen. xxxvii. 34; 2 Sam. iii. 31, xxi. 10; Ps. xxxv. 13; Is. xxxvii. 1; Joel i. 8, 13; Am. viii. 10; Jon. iii. 8, and Isaiah; Job xvi. 15; Esth. iv. 3, 4; Jer. vi. 29; Lam. ii. 10; 1 K. xxi. 27.

c. Ashes, dust, or earth sprinkled on the person, 2 Sam. xiii. 19, xx. 32; Josh. vii. 6; Esth. iv. 3, 3; Jer. vi. 26; Job ii. 12, xvi. 15, xlii. 6; Is. xi. 3; Rev. xviii. 19.

d. Black or sad-colored garments, 2 Sam. xiv. 2; Jer. xvii. 21; Ps. xxxvii. 11, xlii. 9, xliii. 2; Mal. iii. 14, marg.; Ges. p. 1195.

e. Removal of ornaments or neglect of person, Deut. xxi. 12, 13; Ex. xxxiv. 4; 2 Sam. xiv. 2, xiv. 24; Ez. xvii. 16; Dan. x. 3; Matt. vi. 16, 17; [NAIL].

f. Shaving the head, plucking out the hair of the head or beard, Lev. x. 6; 2 Sam. xiv. 24; Ezr. ix. 3; Job i. 20; Jer. vii. 29, xvi. 6.

g. Laying bare some part of the body. Isaiah himself naked and barefoot, Is. xx. 2. The Egyptian and Ethiopian captives, is. ver. 4; xl. 22, 23; Nah. iii. 5; Mic. i. 11; Am. viii. 10.

a. 1. To mourn. μουρνάω, ιοναι, lugna.  

b. (a) μουρνάω, γαγγίζω, and (b) μουρνάω, monero.  

From (b) μουρνάω and μουρνός, μουρνός, μουρνίμας. In Lam. ii. 5, τακατανασίας, ἡμετάνας; A. V. "mourning." "Lamentation."  

In Ez. xxvii. 22, πορνας, canto.  

μουρνάω, from μουρνάω, lugna.  

μουρνάω, μουρνάω, lugna.  

μουρνάω, μουρνάω, lugna.  

μουρνάω, canto.  

κόσμος, πανετος, from Δέλφης, κόσμος, polygon. See Ezek. xii. 5.
MOURNING

A. Fasting or abstinence in meat and drink, 2 Sam. i. 12, iii. 33, xii. 22, 21; 1 Sam. xxxii. 15; Ezr. x. 6; Neh. i. 4; Dan. x. 3, vi. 18; Joel i. 14, ii. 12; Ez. xxiv. 17; Zech. vii. 5, a periodical fast during captivity; 1 K. xxi. 9, 12; Is. lviii. 3, 4, 5, xxiv. 7, 9, 11; Mal. iii. 14; Jer. xxxix. 9; Jon. iii. 5, 7 (of Nineveh); Judg. xx. 26; 2 Chr. xx. 3; Ezr. viii. 21; Matt. ix. 14, 15.

b. In the same direction may be mentioned abstinence from food, and prohibition to partake in sacrificial food, Lev. vii. 29; Deut. xxxi. 14; Hos. ix. 4; Joel i. 9, 13, 16.

c. Covering the "upper lip," i. e. the lower part of the face, and sometimes the head, in token of silence; specially in the case of the leper, Lev. xii. 45; 2 Sam. xv. 30, xix. 4; Jer. xiv. 4; Ez. xxiv. 17; Misc. iii. 7.

d. Cutting the flesh, Jer. xvi. 6, 7; xli. 5. (Curtius in the Flights.) Beating the body, Ez. xii. 12; Jer. xxxii. 19.

e. Employment of persons hired for the purpose of mourning, women "skillful in lamentation," Eccl. x. 5; Jer. ix. 17; Am. v. 16; Matt. ix. 23.

f. Also flute-players, Matt. ix. 23 [Minstrels]; 2 Chr. xxxvi. 25.

g. Akin to this usage the custom for friends or persons to join in the lamentations of widows or afflicted persons, Gen. i. 3; Judg. xi. 40; Job xi. 22, xxiii. 15; Ps. cvi. 94; Jer. ix. 1, xxii. 18; 1 K. xiv. 13, 18; 1 Chr. vii. 22; 2 Chr. xxiv. 24, 25; Zech. xii. 11; Luke xvi. 12; John xi. 31; Acts vii. 2, ix. 9; Rom. xii. 15. So also in times of general sorrow we find large numbers of those joining in passionate expressions of grief, Judg. ii. 4, xx. 29; 1 Sam. xxvii. 3, xxi. 4; 2 Sam. i. 12; Ezr. iii. 13; Ez. vii. 16, and the like is mentioned of the priests, Joel ii. 17; Mal. iii. 13; see below.

h. The sitting or lying posture in silence indicative of grief, Gen. xxii. 3; Judg. xx. 26; 2 Sam. xii. 16, xiii. 31; Job i. 29, ii. 13; Ezr. ix. 3; Lam. ii. 10; Is. iii. 26.

i. Mourning feast and cup of consolation, Jer. xviii. 18.

j. The period of mourning varied. In the case of Jacob it was seventy days, Gen. i. 3; of Aaron, Num. xx. 29, and Moses, Deut. xxxii. 8, thirty. A further period of seven days in Jacob's case, Gen. i. 10. Seven days for Saul, which may have been an abridged period in time of national danger, 1 Sam. xxxii. 13.

k. Excessive grief in the case of an individual may be noticed in 2 Sam. iii. 16; Jer. xxii. 15, and the same hypoctically, Jer. xii. 6.

(3.) Similar practices are noticed in the Apocryphal books.

a. Weeping, fasting, rending clothes, sackcloth, ashes, or earth on head, 1 Macc. ii. 13, iii. 47, iv. 39, xi. 4, xii. 11, xiii. 45; 2 Macc. iii. 19, x. 25, xiv. 15; Jud. iv. 10, 11; viii. 6, ix. 1, xiv. 19 (Assyrians), x. 3, 5, viii. 5; 3 Macc. iv. 6; 2 Esdr. xiv. 4.

b. Funeral feast with wailing, Bar. vi. 32 [or Epist. of Jer. 32]; also Tob. iv. 17; see in reproof of the practice, Aug. Cite. D. vii. 27.

c. Period of mourning, Jud. viii. 6; Ecles. xxii. 12, seven days, so also perhaps 2 Esdr. v. 20. Bel and Dragon ver. 40.

d. Priests ministering in sackcloth and ashes, 2 Esdr. iv. 15, 14.

e. Idol priests with clothes rent, head and beard shorn, and head bare, Bar. vi. 31 [or Epist. of Jer. 31 b].

(4.) In Jewish writings not Scriptural, these notices are in the main confirmed, and in some cases enlarged.

a. Tears are not Scriptural, but frequently employed, Jer. xvii. 7; § 5, xv. 3; § 9.

b. Sackcloth and ashes, Joseph. Ant. axii. 6, § 1, xii. 5; 2 Bell. Jud. ii. 12, § 5; clothes rent, li. 15, § 6.

c. Seven days' mourning for a father, Joseph. Ant. xxi. 8, § 4, Bell. Jud. ii. 1, § 1; for thirty days, B. J. iii. 9, § 5.

d. Those who met a funeral required to join it, Joseph. c. Ap. ii. 26; see Luke vii. 12, and Rom. xii. 15.

e. Flute-players at a funeral, Bell. Jud. iii. 9, § 5. [JERUS. ANCR. ED.]

The Mishnah prescribes seven days' mourning for a father, a mother, son, daughter, brother, sister, or wife (Bartenora, on Moad Katon, iii. 7). Rending garments is regularly graduated according to the degree of relationship. For a father or mother the garment was to be rent, but not with an instrument, so as to show the breast; to be sewn up roughly after thirty days, but never closed. The same for one's own teacher in the Law, but for other relatives the calm breadth of the upper garment to suffice, to be sewn up roughly after seven days and fully closed after thirty days, Moad Katon, iii. 7; Shabb. xiii. 3; Carav. Ap. Bib. p. 650. Friendly mourners were to sit on the ground, not on the bed. On certain days the lamentation was to be only partial, Moad Katon, l. e. For a wife there was to be at least one hired mourner and two pipers, Ketuboth, iv. 4.

(5.) In the last place we may mention a. the idolatrous "mourning for Tammuz," Ez. viii. 14, as indicating identity of practice in certain cases among Jews and heathens; and the custom in later days of offerings of food at graves, Eclesus. xxx. 18.

b. The prohibition both to the high-priest and to Nazarites against going into mourning even for a father or mother, Lev. xix. 10, 11; Num. v. 7; see Nezir, vii. 1. The inferior priests were limited to the cases of their near relatives, Lev. xxi. 1, 2, 4.

c. The food eaten during the time of mourning was regarded as impure, Deut. xxiv. 14; Jer. v. 17, 5, 7; Ez. xxxiv. 17; Hos. ix. 4.

(6.) When we turn to heathen writers we find similar usages prevailing among various nations of antiquity. Herodotus, speaking of the Egyptians, says, "When a man of any account dies, all the wounaked among his relatives proceed to smear their heads and faces with mud. They then leave the corpse in the house, and parade the city with their breasts exposed, beating themselves as they go, and in this they are joined by all the women belonging to the family. In like manner the men also meet them from opposite quarters, naked to the waist and beating themselves" (Her. ii. 85). He also mentions seventy days as the period of embalming (ii. 86). This doubtless includes the whole mourning period. Dioecritus, speaking of a king's death, mentions rending of garments, suspension of sacrifices, heads smeared with clay, and breasts bare, and says men and women go about in companies of 200 or 300, making a wailing twice-a-day, υποθηματὶ θραύσης τούτης. They abstain from flesh, wheat-bread, wine, the bath, dainties, and in general all pleasure: do not lie on beds, but lament as for an only child during seventy-two days. On the
as day a sort of trial was held of the merits of the deceased, and according to the verdict pronounced by the acclamations of the crowd, he was treated with funeral honors, or the contrary. (Dib. Sic. i. 72.) Similar usages prevailed in the case of prominent persons. (Ibid. pp. 393, 394.

The Egyptian paintings confirm these accounts as to the exposure of the person, the eating, and the throwing clay or mud upon the head; and women are represented who appear to be hired mourners (Lang. Egy. Ant. i. 151-153; Wilkinson, Egy. Ant. ii. pp. 358, 387). Herodotus also mentions the Persian custom of rendering the garments with wailing, and also cutting off the hair on occasions of death or calamity. The last, he says, was also usual among the Scythians (Her. ii. 66, viii. 59, ixi. 21, iv. 71).

Lucian, in his discourse concerning Greek mourning, speaks of tearing the hair and flesh, and wailing, and beating the breast to the sound of a flute, herald of slaves, horses, and ornaments as likely to be useful to the deceased, and in the practice for relatives to endeavor to persuade the parents of the deceased to partake of the funeral feast (πετασσομεναι) by way of recruiting themselves after their three days' fast (De Lectu, vol. ii. p. 303, 305, 307, ed. Amsterdam). Plutarch mentions that the Greeks regarded all mourners as unclean, and that women in mourning cut their hair, but the men let it grow. Of the Romans, in carrying corpses of parents to the grave, the son, he says, covers their heads, but the daughters uncover them, contrary to their custom in each case (Quast. Rom. vol. vii. pp. 74, 82, ed. Beikste).

Greeks and Romans both made use of hired mourners, πετασσειν, who accompanied the funeral procession with chants or songs. Flowers and perfumes were also thrown on the graves (On. Fest. vi. 600; Trist. i. 47; Plato, Legg. viii. 9; Dict. of Ant. Art. Fune). The πεταισσειν seem to be the predecessors of the "mates" of modern funerals.

(7.) With the practices above mentioned, oriental and other customs, ancient and modern, in great measure agree. P'Arvieux says, Arab men are silent in grief, but the women scream, tear their hair, hands, and face, and throw earth or sand on their heads. The older women wear a blue veil and an old robe, the face by way of mourning garments. They also sing the praises of the deceased (Tror. pp. 260, 270). Niebuhr says both Mohammedans and Christians in Egypt hire wailing women, and wail at stated times (Ivy. i. 150). Burchhardt says the women of Athens in Nubia shave their heads on the death of their nearest relatives, a custom precedent also among several of the present tribes of Upper Egypt. In乙方的 a death they usually kill a sheep, a cow, or a camel. He also mentions wailing women, and a man in distress be-mourning his face with dirt and dust in token of grief (Nubia, pp. 176, 226, 371).

And, speaking of the ancient Arab tribes of Upper Egypt, "I have seen the female relations of a deceased man dance before his house with sticks and bawdy in their hands and beating their bare bosoms with their hands." (Notes on Int. i. 289.) Shaw says of the Arabs of Barbary, after a funeral the female relations during the space of two or three months go once a week to weep over the grave and offer entreaties (see Eebr. xx. 18). He also mentions mourning women (Tror. pp. 220, 242). "In Oman," Wellsted says, "there are no hired mourning women, but the females from the neighborhood assemble after several and continue for eight days, from sunrise to sunset, to utter loud lamentations." (Tror. i. 241.)

In the Arabian Nights are frequent allusions to similar practices, as rending clothes, throwing dust on the head, cutting off the hair, loud lamentation, visits to the tomb, plucking the hair and beard (I. 63, 263, 267, 308, 318, ii. 334, 357, 409). They also mention ten days and forty days as periods of mourning (I. 427, ii. 408). Sir J. Chardin, speaking of Persia, says the tomb is visited periodically by women (T'up. vi. 480). He speaks also of the tumult at a death (ib. 482). Mourning lasts forty days: for eight days a fast is observed, and visits are paid by friends to the bereaved relatives; on the ninth day the men go to the bath, shave the head and beard, and return the visits, but the lamentation continues two or three times a week till the fortieth day. The mourning garments are dark-colored, but never black (ib. p. 481). Russell, speaking of the Turks at Aleppo, says, "the instant the death takes place, the women who are in the chamber give the alarm by shrieking as if it adrenal, and are joined by all the other females in the harem. This con- clamation is termed the "wawlay"; it is so shrill as to be heard, especially in the night, at a pros- pect distance. The men disapprove of and take no share in it: they drop a few tears, assume a re- signed silence, and retire in private. Some of the near female relations, when apprised of what has happened, repair to the house, and the wawlay, which had paused for some time, is renewed upon the entrance of each visitor into the harem (Alleso, i. 306). He also mentions professional mourners, visits to the grave on the third, seventh, and fortieth days, prayers at the tomb, flowers strewn, and food distributed to the poor. At these visits the shriek of wailing is renewed: the chief mourner appeals to the deceased and re- praises him fondly for his departure. The men make no change in their dress; the women lay aside their jewels, dress in their plainest garments, and, wearing a black veil bound on with a dark-colored velvet or a dusky color. They usually mourn twelve months for a husband and six for a father (ib. 311, 312). Of the Jews he says, the conclamation is practiced by the women, but hired mourners are seldom called in to assist at the wawlay. Both sexes make some alteration in dress by way of mourning. The women lay aside their jewels, the men a small rent in their outer vestment (ib. 36, 37).

Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called "wawlay" or "wulul," uttering the most piercing shrieks, and calling upon the name of the deceased, "O, my master! O, my re- source! O, my misfortune! O, my glory!" (see Jer. xxvii. 18). The females of the neighborhood come to join with them in the lamentation; generally, also, the family send for two or more mullahs, or public wailing women. Each brings a tambourine, and beating them they exclaim, 'Alas for him,'"
MOUSE

The female relatives, domestics, and friends, with their hair disheveled, and sometimes with rent clothes, beating their faces, cry in like manner. {Ah, for him!} These make no alteration in dress, but women, in some cases, dye their shirts, head-veils, and handkerchiefs of a dark-blue color. They visit the tombs at stated periods " (Med. Ep. iii. 152, 171, 195). Wealthy families in Cairo have in the burial-grounds regularly furnished houses of mourning, to which the females repair at stated periods to bewail their dead. The art of mourning is only to be acquired by long practice, and regular professors of it are usually hired, on the occasion of a death, by the wealthier classes (Mrs. Poole, English. in Egypt, ii. 100). Dr. Wolff mentions the wailing over the dead in Abyssinia, Inte- borg. ii. 273. Pietro della Valle mentions a prac- tice among the Jews of burning perfumes at the site of Abraham's tomb at Hebron, for which see 2 Chr. xvi. 14, xxi. 19; Jer. xxxiv. 5; P. della Valle, Trav. i. 306. The customs of the N. American Indians also resemble those which have been described in many particulars, as the howling and wailing, and speeches to the dead; among some tribes the practice of piercing the flesh with arrows or sharp stones, visits to the place of the dead (Carver, Travels, p. 491; Bancroft, Hist. of U. States, ii. 912; Callin, N. A. Indians, i. 90).

The former and present customs of the Welsh, Irish, and Highlanders at funerals may also be cited as similar in several respects, e. g. wailing and howling, watching with the corpse, funeral en- tertainments (a funeral baked meat "). Bowers on the grave, days of visiting the grave (Brand, Pop. Antiq. ii. 128, &c.; Harmer, Obs. iii. 40).

One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews at Jerusalem at a spot as near to the Temple as could be obtained. This custom, noticed by St. Jerome, is alluded to by Benjamin of Tudela, and exists to the present day. Jerome, ad Sopham. i. 15; ad Paulinum, Ep. xxxiv.; Early Trac. in Pal. p. 83; Rammer, Observation, p. 203; Martineau, Eastern Life, p. 471; Robinson, i. 237.

H. W. P.

* It is customary among the Christian men of the upper classes in Syria to make a change to black garments on occasion of a death in the family, or at least to wear black crap over the tar- lash.

MOUSE (שָׁבָר, 'ashâr; אָמָה: 'ama) occurs in Lev. xi. 29 as one of the unclean creeping things which were forbidden to be used as food. In 1 Sam. vi. 4, 5, five golden mice, "images of the mice that marr the land," are mentioned as part of the trespass offering which the Philistines were to send to the Israelites when they returned the ark. In Is. lxvi. 17, it is said, "They that sanctify themselves . . . eating swine's flesh, and the abomination, and the mouse, shall be consumed together." The Hebrew word is in all probability generic, and is not intended to denote any particular species of mouse; although Bochart (Hieroz. ii. 427), following the Arabic version of Is. lxvi. 17, restricts its meaning to the jerboa (DipsusJacula). The original word denotes a field-ravager, and may therefore comprehend any destructive ro- dent. It is probable, however, that in 1 Sam. vi. 5, "the mice that marr the land," may include and more particularly refer to the short-tailed field-mice (Arvicolahopus, Linn.), which Dr. Kitto says cause great destruction to the corn-lands of Syria.

"Of all the smaller rodents which are injurious, both in the fields and in the woods, there is not," says Prof. Bell (Hist. Brit. Quadr. p. 325), "one

which produces such extensive destruction as this little animal, when its increase, as is sometimes the case, becomes multitudinous." The ancient writers frequently speak of the great ravages committed by mice. Herodotus (ii. 144) describes the loss of Sen- macherib's army to mice, which in the night time guarded through the bow-strings and shield-straps.

Col. Hamilton Smith (Kitto's Cyc. art. "Mouse") says that the hamster and the dormouse are still eaten in common with the jerboa by the Bedouin; and Gesenius (Thee, s. v.) believes some escent species of dormouse is referred to in Is. lvii. 17.

N. H.

MOWING (שׁוּט, 'as sixo). Am. viii. 1—LXX. reads 'as να γενιμένον, either from a various reading or a confusion of the letters θ and θ — a word signif- iying also a born fleece, and rendered in Ps. lixii. 6 "mown grass ". As the great heat of the climate in Palestine and other similarly situated countries soon dries up the herbage itself, hay-making in our sense of the term is not in use. The term "hay," therefore, in P. B. version of Ps. vii. 20, for שׁוּט, is incorrect. A. V. "grass." So also Prov. xxvii. 25, and Is. xv. 6. The corn des- tined for forage is cut with a sickle. The term

שׁוּט, A. V. "mower," Ps. cxxxix. 7, is most com
nally in A. V. "reaper," and once, Jer. ix. 22, a "harvest-man."

The king's mowing's, Am. vii. 1, 1. c. brown grass, Ps. lxix. 6, may perhaps refer to some royal right of early pasturage for the use of the cavalry. See 1 K. xviii. 5. (Shaw, Trav. p. 138; Wilkinson, Jast. Lex. abedua, ii. 42, 50; Elyar, loc. cit., p. 360; Pietro della Valle, Verg., ii. p. 257; Warden, Verg., iii. 370; Layard, Nin. of Bel, p. 330; Niebuhr, D. C. E. L. c. xiii. p. 139; Harney, Obs. iv. 386; Darlachart, Not. in Beil, i. 210.) II. W. P.

MOZA (םוזא [going forth, door, gate, etc.])

Morah: [Vat. locat.:] Alex. Asera: Most. Most.
1. Son of Caleb the son of Hezon by his concubine Ephah (1 Chr. ii. 46).
2. (Morah.) 1 Chr. viii. 36, 57; Most. Alex. [V.A.] Morah. 1 Chr. ix. 42, 43. Son of Zuri, and descendant of Saul through Micah the son of Meleahosheth.

MOZAH (םזה [perh. the fountain]), with the definite article, ham-Mosah: *Asgirah; Alex. Asgora: Asgorot. one of the cities in the allotment of Benjamin (Josh. xvii. 26 only), name written between locution zach and heph. The form of these has probably been identified with Kefir, 2 miles east of Yalu, but no trace of any name resembling Mosah has hitherto been discovered. Interpreting the name according to its Hebrew derivation, it may signify the "spring-head" — the place at which the water of a spring gushes out (Stanley, N. of P. App. § 32). A place of this name is mentioned in the Mishnah (Succah, xiv. § 3) as follows — *There was a place below Jerusalem named Mosah: thither they descended and gathered willow branches," i.e., for the "Feast of Tabernacles" so called. To this the Genara adds, "the place was a Colonia (S5אנ), that is, exempt from the king's tribute." (Buxtorf, Lex. Talm. 2043), which other Talmudists reconcile with the original name by observing that Mosah signifies an outlet or liberation, e. g. from tribute. Bartenora, who lived at Jerusalem, and now lies in the "valley of Jehoshaphat," there says (in Surenhusius' Mishnah, ii. 274) that Mosah was but a short distance from the city, and in his time retained the name of Colonia. On these grounds Schwarz (127) would identify Mosah with the present Kabovich, a village about 4 miles west of Jerusalem on the Jaffa road, at the entrance of the great Wady el-Hosannah. The interpretations of the Rabbis, just quoted, are, however, not inconsistent with the name being really derived from its having been the seat of a Romani colonia, as suggested by Robinson, (Bibl. Res. ii. 158). The only difficulty in the way of the identification is that Kabovich can hardly be spoken of as below Jerusalem — an expression which is most naturally interpreted of the ravine beneath the city, where the Kir-gabal is, and the royal gardens formerly were. Still there are vestiges of much vegetation about Kabovich, and when the country was more generally cultivated and wooded, and the climate less arid than at present, the dry river-bend b which the traveller now crosses may have flowed with water, and have formed a not unfavorable spot for the growth of willows.

* MUFFLETS. [Veils, (3.)]

MULBERRY-TREES (םמסתא [benign]; פלוסית, [アマミシ; 角皮]) occurs only in 2 Sam. v. 23 and 24, and in the parallel passage of 1 Chr. xiv. 14. The Philistines having spread themselves in the Valley of Rephaim, David was ordered to fetch a compass behind them and come upon them over against the mulberry-trees: and to attack them when he heard the sound of a going in the tops of the trees.

We are quite unable to determine what kind of tree is denoted by the Hebrew סמסתא; many attempts at identification have been made, but they are mere conjectures. The Jewish Rabbis, with several modern versions, understand the mulberry-tree; others retain the Arabic word. Cekillian (Müller, i. 365) believes the Hebrew bictah is identical with a tree of similar name mentioned in a Mx. work of the Arabic botanical writer Abu'l Fadli, namely, some species of Amuris or Balsamodendron. Most lexicographers are satisfied with this explanation. Some modern English authors have adopted the opinion of Dr. Royle, who (Kitto's Cyc. art. Baco) refers the Hebrew bictah to the Arabic Sayyrotobak; "the gnat-tree," which he identifies with some species of poplar, several kinds of which are found in Palestine. Rosenmüller follows the LXX. of 1 Chr. xiv. 14, and believes "pear-trees" are signified. As to the claim of the mulberry-tree to represent the betYa of Scripture, it is difficult to see any foundation for such an interpretation — for, as Rosenmüller has observed (Bibl. Bot. p. 256), it is neither "conspicuous by the ancient versions nor by the occurrence of any similar term in the cognate languages" — unless we adopt the opinion of Ursinus, who (Arber, Bib. ill. 75), having in view the root of the word betac, 

*to weep,* identifies the name of the tree in question with the mulberry, "from the blood-like tears which the pressed berries pour forth." Equally unsatisfactory is the claim of the "pear-tree" to represent the betac, for the uncertainty of the LXX., in the absence of further evidence, is enough to show that little reliance is to be placed upon this rendering.

As to the tree of which Abu'l Fadli speaks, and which Sprangel (Hist. Ret. knew, p. 12) identifies with Amuris culemnina, Lin., it is impossible that it can denote the bictah of the Hebrew Bible, although there is an exact similarity in form between the Hebrew and Arabic terms: for the Amuris culemnina are tropical shrubs, and never could have grown in the Valley of Rephaim, the Scriptural locality for the betac.

The explanation given by Royle, that some poplar

---

* Can this title be in any way connected with the Hebrew 'selab, which is one of the eleven names traced by Robinson in the catalogue of the cities of Judah, between verses 28 and 69 of Josh. xv. 1.

* It depends on the season of the year whether this river-bed be "dry" or contains water. Several travelers, as Richardson, Otto von Richter, Frobenius, testify that it is quite a running stream, at certain periods of the year, of which indeed proof is seen in the striking fertility of the valley which it irrigates. (See Dictionnaire, vol. i. p. 577. Am. ed.)

* דמסתא: "to flow by drops," "to weep;"
MULE

is signified, although in some respects it is well
meant to the context of the Scriptural passages, is
untenable; for the Hebrew bacak and the Arabic
baka are clearly distinct both in form and significa-
tion, as is evident from the difference of the second
radical letter in each word.\(^a\)

As to the נב of Ps. lixiv. 6, which the A.
V. retains as a proper name, we entirely agree with
Hengstenberg (Com. on Ps. vi. loc.), that the word
denotes "weeping,"\(^b\) and that the whole reference
to mules must be given, but see RAC.

Though there is no evidence to show that the
mulberry-tree occurs in the Hebrew Bible, yet the
fruit of this tree is mentioned in 1 Macc. vi. 34,
as having been, together with grape juice, shown
to the elephants of Antiochus Epiphanes in order to
irritate these animals and make them more formidable
opponents to the army of the Jews. It is well
known that many animals are enraged when they
see blood or anything of the color of blood.

For further remarks on the mulberry-trees of Palestine
see SYCAMINE.

W. H.

MULE, the representative in the A. V. of the
following Hebrew words, — Pered or Pir'dah, Recheb, and Yimin.

1. Pered, Pir'dah (סַלָּה, סַלָּה, סַלָּה: סַלָּה, סַלָּה; סַלָּה: mules, mole), the common and humble
Hebrew nouns to express the "mule;" the first of
which occurs in numerous passages of the Bible,
the latter only in 1 K. i. 33, 38, 44. It is an
interesting fact that we do not read of mules till
the time of David (as to the yimin, A. V.
"mules," of Gen. xxvi. 24, see below), just at
the time when the Israelites were becoming well
acquainted with horses. After this time horses
and mules are in Scripture often mentioned together.

After the first half of David's reign, as Michaelis
(Comment. on Laws of Moses, ii. 477) observes,
they became all at once very common. In Eer. ii.
66, Neh. vii. 68, we read of two hundred and forty-
five mules; in 2 Sam. xiii. 29, "all the king's sons
arose, and every man gat him up upon his mule."

Absalom rode on a mule in the battle of the
wood of Ephraim at the time when the animal got
away from under him and so caused his death.
Mules were amongst the presents which were
brought year by year to Solomon (1 K. x. 25).
The Levitical law forbade the coupling together of
animals of different species (Lev. xix. 19), conse-
quently we must suppose that the mules were im-
ported, unless the Jews became subsequently less
strict in their observance of the ceremonial injunc-
tions, and bred their mules. We learn from Ezekiel
(xxvii. 14) that the Tyrians, after the time of Solo-
mon, were supplied with both horses and mules
from Armenia (Togarannah), which country was
celebrated for its good mules (see Strabo, xii. 13, § 7,
ed. Kramer; comp. also Xenoph. Anab. iv. 5, 30;
Herod. vii. 40). Michaelis conjectures that the
Israelites first became acquainted with mules in the
war which David carried on with the king of Nisibis

\(^a\) In the Hebrew, סַלָּה in the Arabic; סַלָּה, סַלָּה, סַלָּה.

\(^b\) A word of doubtful etymology. Gesenius refers it
to the Syriac סַלָּה, "areolatir." Comp. German
Herz, Lat. burda, and see Michaelis' remarks.

\(^c\) From unused root ית, "quae caloris potestatem
labuisse videtur" (Gesen. Thes.).

\(^d\) The plural form of a noun (סַלָּה, סַלָּה, סַלָּה)
which is apparently of Persian origin, rendered
"camel" by the A. V., occurs in Esth. viii. 10, 14,
and seems to denote some fine breed of mules. See
Bechtel. Hier. i. 239.) (On Gen. xxvi. 24, see addi-
tion to Ainslie, Amer. ed. 1.)

MUPPIM

2035

MUPPIM

[perh. darkness, sorrow, Forst]: Mag'phil; [Alex. Μαγ'φηλ; Mophil], a
Benjamite, and one of the fourteen sons of Kish who belonged to the original colony of
the sons of Jacob in Egypt (Gen. xvi. 21). In Num.
xxvi. 39 the name is written Shupham, and the

(2 Sam., viii. 3, 4). In Solomon's time it
is possible that mules from Egypt occasionally
accompanied the horses which we know the king of
Israel obtained from that country; for though the
mule is not of frequent occurrence in the monu-
ments of Egypt (Wilkinson's Anc. Egypt. i. 280,
Lon. 1834), yet it is not easy to believe that the
Egyptians were not well acquainted with this
animal. That a friendship existed between Solo-
mon and Pharaoh is clear from 1 K. ix. 16, as well
as from the fact of Solomon having married the
doughter of the king of Egypt; but after Shishak
came to the throne a very different spirit prevailed
between the two kingdoms: perhaps, therefore,
from this date mules were obtained from Armenia.
It would appear that kings and great men only
rode on mules. We do not read of mules at all in the
N. T., perhaps therefore they had ceased to be
imported.

2. Reches (םַכָּה), See Deer.

3. יִשְׁמָא (םַכָּה), יִשְׁמָא, "תְּרוֹן.

The name is found only in Gen. xxxvi. 24, where
the A. V. has "mules" as the rendering of the
word. The passage where the Hebrew name oc-
curs is one concerning which various explanations
have been attempted. Whatever may be the proper
translation of the passage, it is quite certain that
the A. V. is incorrect in its rendering — "This
was that Anah that found the mules in the wilder-
ness as he fed the asses of Zilboen his father." Michaelis
has shown that at this time horses were unknown in Canaan; consequently mules could not
have been bred there. The Talmudic writers be-
lieve that Anah was the first to find out the man-
er of breeding mules; but, besides the objection
urged above, it may be stated that neither the He-
brew nor its cognates have any such a word to sig-
nify mules." Bechtel (Hier. i. 299, 10), following
the reading of the Samaritan Version and Onk.
est, renders yîshîm as "emmus" or "giants" (Gen. xiv. 5); but this explanation has been gen-
erally abandoned by modern critics (see Rosenmi-
lter, Schul. in Gen.; Geldes, Crit. Rem. xiv. 5).
The most probable explanation is that which inter-
prets yîshîm to mean "warm springs," as the
Vulgate has it; and this is the interpretation adopted
by Gesenius and modern scholars generally; the
passage will then read, "this was that Anah who
while he was feeding his father's asses in the desert
discovered some hot springs." This would be con-
sidered an important discovery, and as such worthy
of record by the historian; but if, with some writers,
we are to understand merely that Anah discovered
water, there is nothing very remarkable in the fact,
for his father's asses could not have survived with-
out it.\(^d\)

W. H.
MURDER

Family spring from him are called Shaphunites. In 1 Chr. vii. 12, 15, it is Shuppim (the same as xxvi. 16), and viii. 5, Shephupham. Hence it is possible that Shuppim is a corruption of the text, and that Shuppian is the true form. (Thomson.) According to 1 Chr. vii. 12, he and his brother Huppim were the sons of Ir, or Irri (ver. 7), the son of Ishmael, the son of Benjamin, and their sister Maachah appears to have married into the tribe of Manasseh (ib. 15, 16). But ver. 15 seems to be in a most corrupt state. 1 Chr. viii. 3, 5, assigns in like manner Shephupham to the family of Bala, as do the LXX. in Gen. xvi. 21. As it seems to be impossible that Benjamin could have had a great-grandson at the time of Jacob's going down into Egypt (comp. Gen. i. 25), and as Machir the husband of Maachah was Manasseh's son, perhaps the explanation of the matter may be that Shuppim was Benjamin's son, as he is represented Num. xxvi. 39, but that his family were afterwards reckoned with that of Ir the son of Ishmael was chief (comp. 1 Chr. xxv. 9-31, xxvi. 8, 9, 11).

A. C. H.

MURDER. The principle on which the act of taking the life of a human being was regarded by the Almighty as a capital offense is stated on its highest ground, as an outrage. Philo calls it sacrilege, on the likeness of God in man, to be punished even when caused by an animal (Gen. ix. 5, 6, with Luther's note; see also John viii. 44: 1 John iii. 12, 15; Philo, De Spec. Leg. iii. 15, vol. ii. p. 313). Its secondary or social ground appears to be implied in the direction to replenish the earth which immediately follows (Gen. ix. 7). The exemption of Cain from capital punishment may thus be regarded by anticipation as founded on the social ground either of expediency or of example (Gen. iv. 12, 15). The postdiaulmonian command, enlarged and infringed by the practice of blood-revenge, which it seems to some extent to sanction, was limited by the Law of Moses, which, while it protected the accidental homicide, defined with additional strictness the crime of murder. It prohibited compensation or reparation of the murderer, or his protection if he took refuge in the refuge city, even at the altar of Jehovah, a principle which finds an eminent illustration in the case of Jeop (Ex. xii. 14, Lev. xxiv. 17, 21; Num. xxxv. 16, 18, 21, 31; Deut. xii. 11, 13; 2 Sam. xvii. 25, xx. 10; 1 K. ii. 5, 6, 31; Philo, c. c.; Michaelis, On Laws of Moses, § 192). Bloodshed even in warfare was held to involve pollution (Num. xxxv. 33, 34; Deut. xxi. 1, 9; 1 Chr. xxviii. 3). Philo says that the attempt to murder deserves punishment equally with actual perpetration; and the Mishna, that a mortal blow intended for another is punishable with death; but no express legislation on this subject is found in the Law (Philo, c. c.; Mishna, Nidah, ix. 2).

No special mention is made in the Law (a) of child-murder, (b) of parricide, nor (c) of taking life by poison, but its animals is sufficiently obvious in all these cases (Ex. xxi. 15, 17; 1 Tim. i. 9; Matt. xxv. 4), and the 5th may perhaps be specially intended under the prohibition of witchcraft (Ex. xxi. 18; Joseph. Ant. iv. 8, § 34; Philo, De Spec. Leg. iii. 17, vol. ii. p. 315).

It is not certain whether a master who killed his slave was punished with death (Ex. xxii. 20; Knobel, ad loc.). In Egypt the murder of a slave was punishable with death as a simple delicti in the case of a freeman; and parricide was punished with burning; but child-murder, though treated as an odious crime, was not punished with death (Bibl. Sic. i. 77). The Greeks also, or at least the Athenians, protected the life of the slave (Dict. of Antiq. art. Servus, p. 1036; Millier, Dionia, iii. 3, § 4; Wilkinson, Anc. Leg. ii. 208, 209).

No punishment is mentioned for suicide attempted, nor does any special restriction appear to have attached to the property of the suicide (2 Sam. xviii. 23).

Striking a pregnant woman so as to cause her death was punishable with death (Ex. xxii. 23; Joseph. Ant. iv. 8, § 33).

If an animal known to be vicious caused the death of any one, not only was the animal destroyed, but the owner also, if he had taken no steps to restrain it, was held guilty of murder (Ex. xxii. 31; Michaelis, § 274, vol. iv. pp. 214, 235).

The duty of executing punishment on the murderer is in the Law expressly held on the "revenge of blood;" but the question of guilt was to be previously decided by the Levitical tribunal. A strong bar against the license of private revenge was placed by the provision which required the concurrence of at least two witnesses in any capital question (Num. xxv. 19-30; Deut. xvii. 6-12, xix. 12, 17). In regal times the duty of execution of justice on a murderer seems to have been assumed to some extent by the sovereign, as well as the privilege of pardon (2 Sam. xiii. 39, xiv. 7, 11; 1 K. ii. 24). During this period also the practice of assassination became frequent, especially in the kingdom of Israel. Among modes of effecting this object may be mentioned the murder of Benhadad of Damascus by Hazael by means of a wet cloth (1 K. xv. 27, xvi. 9; 2 K. viii. 15; 1 K. ix. 41; 2 K. x. 6, 16, xii. 20, xiv. 5, xv. 14, 25, 30).

It was lawful to kill a burglar taken at night in the act, but unlawful to do so after sunrise (Ex. xii. 2, 3).

The Koran forbids child-murder, and allows blood-revenge, but permits money-compensation for blodshed (ii. 21, iv. 72. xiii. 230, ed. Sale). [Blood, REVENGER OF; MSLASSEY.]

MUSIC

2037

MUSIC. Of music as a science among the Hebrews we have no certain knowledge, and the traces of it are so slight as to afford no ground for reasonable conjecture. But with regard to its practice there is less uncertainty. The inventor of musical instruments, like the first poet and the first words of the sacred metals, was a Cainite. According to the narrative of Gen. iv., Jethul the son of Lamech was "the father of all such as handle the harp and organ," that is of all players upon stringed and wind instruments. a It has been conjectured that Jethul's discovery may have been perpetuated by the pillers of the Sethites mentioned by Josephus (Jast. i. 2), and that in this way it was preserved till after the Flood; but such conjectures are worse than an honest confession of ignorance. The first mention of music in the times after the Deluge is in the narrative of Laban's interview with Jacob, when he reproached his son-in-law with having stolen away unawares, without allowing him to cheer his departure "with songs, with tambors, and with harp." (Gen. xxxv. 27.) So that in whatever way it was preserved, the practice of music existed in the upland country of Syria, and of the three possible kinds of musical instruments, two were known and employed to accompany the song. The three kinds are alluded to in Job xxi. 12. On the banks of the Red Sea sang Moses and the children of Israel their triumphal song of deliverance from the hosts of Egypt: and Miriam, in celebration of the same event, exercised one of her functions as a prophetess by leading a procession of the women of the camp, chanting in chorus the burden to the song of Moses, "Sing ye to Jehovah, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea." Their song was accompanied by timbrels and dances, or, as some take the latter word, by a musical instrument of which the shape is unknown but which is supposed to have resembled the modern tamborine (Dance, vol. i. p. 586 b), and, like it, to have been used as an accompaniment to dancing. The expression in the A. V. of Ex. xv. 21, "and Miriam answered them," seems to indicate that the song was alternate, Miriam leading off with the solo while the women responded in full chorus. But it is probable that the Hebrew word, like the corresponding Arabic, has merely the sense of singing, which is retained in the A. V. of Ex. xxxii. 18: Num. xxi. 17; 1 Sam. xxix. 5; Ps. civi. 7; Hos. ii. 15. The same word is used for the shouting of soldiers in battle (Jer. ii. 14), and the cry of wild beasts (Is. xiii. 22), and in neither of these cases can the notion of response be appropriate. All that can be said in this case is that it was sung as a song, and this is confirmed by the rendering of the Vulg. praecibebat. The triumphal hymn of Moses had unquestionably a religious character about it, but the employment of music in religious service, though idolatrous, is more distinctly marked in the festivities which attended the erection of the golden calf. b The wild cries and shouts which reached the ears of Moses and Joshua as they came down from the mount, sounding to the latter as the din of battle, the voices of victor and vanquished blending in one harsh chorus, but the quicker sense of Moses discerned the rough music with which the people worshipped the visible representation of the God that brought them out of Egypt. Nothing could show more clearly than Joshua's mistake the rude character of the Hebrew music at this period (Ex. xxxiii. 17, 18), as untrained and wild as the notes of their Syrian forefathers. c The silver trumpets made by the metal workers of the Tabernacle, which were used to direct the movements of the camp, point to music of a very simple kind (Num. x. 1-10), and the long blast of the jubilee horns, with which the priests brought down the walls of Jericho, had probably nothing very musical about it (Josh. vi.), any more than the rough concert with which the ears of the sleeping Midianites were saluted by Gideon's three hundred men. d The solemn music of Deborah and Barak is cast in a distinctly metrical form, and was probably intended to be sung with a musical accompaniment as one of the people's songs, like that with which Jephthah's daughter and her companions met her father on his victorious return (Judg. xi.).

The simpler impromptu with which the women from the cities of Israel greeted David after the slaughter of the Philistine, was apparently struck off on the spur of the moment, under the influence of the wild joy with which they welcomed their national champion, "the darling of the songs of Israel." The accompaniment of timbrels and instruments of music must have been equally simple, and such that all could take part in it (1 Num. xviii. 6, 7). Up to this time we meet with nothing like a systematic cultivation of music among the Hebrews, but the establishment of the schools of the prophets appears to have supplied this want. Whatever the students of these schools may have been taught, music was an essential part of their practice. At Bethel (1 Sam. x. 5) was a school of this kind, as well as at Naioth in Ramah (1 Sam. xix. 19, 29), at Jericho (2 K. ii. 5, 7, 15), Gilgal (2 K. iv. 38), and perhaps at Jerusalem (2 K. xxi. 14). Professional musicians soon became attached to the court, and though Saul, a hardy warrior, had only at intervals recourse to the soothing influence of David's harp, yet David seems to have gathered round him "singing men and singing women," who could celebrate his victories and lend a charm to his hours of peace (2 Sam. xix. 35). Solomon did the same (Ecc. ii. 8), adding to the luxury of his court by his patronage of an art which obtained a high reputation and which at least some capable master as a means of supporting himself (1 K. iv. 32). But the Temple was the great school of music, and it was consecrated to its highest service in the worship of Jehovah. Before, however, the elaborate arrangements had been made by David for the

---

a From the occurrence of the name Mahashelah, the "giver of song," which signifies "giving praise to God," Schneider concludes that vocal music in religious services must have been still earlier in use among the Sethites (Bibl.-gesch. Darstellung der Heb. Musik, p. xi.)

b This may be compared the musical service which accompanied the dedication of the golden image in the plains of Dura (Dan. iii.), the commencement of which was to be the signal for the multitude to prostitute themselves in worship.

c Compare Lunn. ii. 7, where the war-cry of the enemy in the Temple is likened to the noise of the multitude on a solemn feast-day: "They have made a noise in the house of Jehovah as in the day of a solemn feast."
MUSIC

The temple choir, there must have been a considerable body of musicians throughout the country (2 Sam. vi. 5), and in the procession which accompanied the ark from the house of Obededom, the Levites, with Chenanim at their head, who had acquired skill from previous training, played on psalteries, harps, and cymbals, to the sound of the psalms, which David had composed for the occasion (1 Chr. xxv. xvi.). It is not improbable that the Levites all along had practiced music and that some musical service was part of the worship of the Tabernacle; for unless this supposition be made, it is inconceivable that a body of trained singers and musicians should be found ready for an occasion like that on which they make their first appearance. The position which the tribe of Levi occupied among the other tribes naturally favored the cultivation of an art which is essentially characteristic of a leisurely and peaceful life. They were free from the hardships attending the struggle for conquest and afterwards for existence, which the Hebrews maintained with the national can- non and the surrounding countries; and their subsistence was provided for by a national tax. Consequently they had ample leisure for the various ecclesiastical duties devolving upon them, and among others for the service of song, for which some of their families appear to have possessed a remarkable genius. The three great divisions of the tribe had each a representative family in the choir: Heman and his sons represented the Ko- hathites, Asaph the Gershonites, and Ethan (or Jeduthun) the Merarites (1 Chr. xvi. 17, xxi. 6, xxv. 1-6). Of the 38,000 who composed the tribe in the reign of David, 4,000 are said to have been appointed to praise Jehovah with the instruments which David made (1 Chr. xxiii. 5) and for which he taught them a special chant. This chant for ages afterwards was known by his name, and was sung by the Levites before the army of Jehovah, and on laying the foundation of the second Temple (comp. 1 Chr. xvi. 34, 41; 2 Chr. vii. 6, xx. 21; Ezra iii. 10, 11); and again by the Marc- alcean army after their great victory over Gogus (1 Macc. iv. 24). Over this great body of musicians presided the sons of Asaph, Heman, and Jeduthun, twenty-four in number, heads of the twenty-four courses of twelve into which the skilled minstrels were divided. These skilled or cunning (722, 1 Chr. xxi. 6, 7) men were 288 in number, and under them appear to have been the scholars (723, 1 Chr. xxi. 8), whom, perhaps, they trained, and who made up the full number of 4,000. Supposing 4,000 to be merely a round number, each course would consist of a full band of minstrels presided over by a body of twelve skilled players, with one of the sons of Asaph, Heman, or Jeduthun as conductor. Asaph himself appears to have played on the cymbals (1 Chr. xvi. 5), and this was the case with the other leaders (1 Chr. xxv. 29), perhaps to mark the time more distinctly, while the rest of the band played on psalteries and harps. The singers were distinct from the instrumentalists. It is evident in Ps. lxxxviii. 29, "the singers went before, the players on instruments followed after, in the midst of the damsels playing with timbrels;" unless the singers in this case were the cymbal-players, like Heman, Asaph, and Ethan, who, in 1 Chr. xvi. 19, are called "singers," and perhaps while giving the time with their cymbals led the choir with their voices. The "players on instruments" (724, nagein), as the word denotes, were the performers upon stringed instruments, like the psaltery and harp, who have been alluded to. The "singers on instruments" (725, chelâthah, in Ps. lxxviii. 7, were different from these last, and were properly pipers or performers on perfumed wind-instruments (see 1 K. i. 40). "The damsels playing with timbrels" (comp. 1 Chr. xiii. 8) seem to indicate that women took part in the temple choir, and among the family of Heman are specially mentioned three daughters, who, with their fourteen sons, were all "under the hands of their father for song in the house of Jehovah" (1 Chr. xxv. 5, 6). Besides, with these of the Captivity who returned with Zerubbabel were "200 singing men and singing women" (Ezr. ii. 65). Bartometz adds that children also were included.

The trumpets, which are mentioned among the instruments played before the ark (1 Chr. xiii. 8), were not provided for the priests alone (1 Chr. xxiv. 25, xxvi. 6). As they were also used in royal proclamations (2 K. xi. 14), they were probably intended to set forth by way of symbol the royalty of Jehovah, the theocratic king of his people, as well as to sound the alarm against his enemies (2 Chr. xiii. 12). A hundred and twenty priests blew the trumpets in harmony with the choir of Levites at the dedication of Solomon's Temple (2 Chr. vi. 12, 13, vii. 6), as in the restoration of the worship under Hezekiah, in the description of which we find an indication of one of the uses of the temple music. "And Hezekiah commanded to offer the burnt-offering upon the altar. And when the burnt-offering began, the song of Jehovah began also, with the trumpets and with the instruments of David king of Israel. And all the congregation worshiped, and the singers sang, and the trumpeters sounded; all until the burnt-offering was finished" (2 Chr. xxix. 27, 28). The altar was the table of Jehovah (Mal. i. 7), and the sacrifices were his feasts (Ex. xxiii. 18), so the solemn music of the Levites corresponded to the melody by which the banquet of earthly monarchs were accompanied. The Temple was the palace and the holy singing satisfied the graces by night they chanted the songs of Zion; one of these it has been conjectured with probability is Ps. cxxxiv.

The relative numbers of the instruments in the temple h...
In the private as well as in the religious life of the Hebrews music held a prominent place. The kings had their court musicians (Eccld. ii. 8) who bewailed their death (2 Chr. xxv. 23), and in the luxurious times of the latter monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were wont at their banquets to accompany the songs with the tinkling of the psaltery or guitar (Am. vi. 4-6), and amused themselves with devising musical instruments while their nation was perishing, as Necho fiddled when Lionne was in flames. Isaiah denounces a woe against those who sat till the morning twilight over their wine, to the sound of "the harp and the viol, the tabret and pipe" (Is. v. 11, 12). But while music was thus made to minister to debauchery and excess, it was the legitimate expression of mirth and gladness, and the indication of peace and prosperity. It was only when a curse was upon the land that the prophet could say, "the mirth of tabrets cease" (Jer. xxv. 13). The high value attached to music at banquets is indicated in the description given in Eccles. xxxiii. of the duties of the master of a feast. "Pour not out words where there is a musician, and show not forth wisdom out of time. A concert of music in a banquet of wine is as a signet of carbuncle set in gold. As a signet of an emerald set in work of gold, so is the melody of music with pleasant wine." And again, the memory of the good king Josiah was "as music at a banquet of wine" (Eccles. xlix. 1). The music of the banquets was accompanied with songs and dancing (Luke xvi. 25). The triumphal processions which celebrated a victory were enlivened by minstrels and singers (Ex. xv. 1, 20; Judc. v. 1, x. 34; 1 Sam. viii. 6, xii. 11; 2 Chr. xx. 28; Jud. xv. 12, 13), and on extraordinary occasions they even accompanied armies to battle. Thus the Levites sang the chant of David before the army of Jehoshaphat as he went down with armies of the chief of Ammon, and Moab, and Mt. Seir (2 Chr. xx. 19, 21); and the victory of Abijah over Jeroboam is attributed to the encouragement given to Judah by the priests sounding their trumpets before the ark (2 Chron. xii. 12, 14). It is clear from the narrative of Elisha and the minstrel who by his playing calmed the prophet's spirit till the hand of Jehovah came upon him, that among the minstrels of Jehoshaphat's army on that occasion there were to be reckoned musicians who were probably Levites (2 K. iii. 15). Besides songs of triumph there were also religious songs (Is. xx. 20; Am. v. 23; Jam. v. 13), "songs of the temple" (Am. viii. 3), and songs which were sung in idolatrous worship (Ex. xxvii. 18). Love songs are alluded to in Ps. xlv. title, and Is. v. 1. There were also the doleful songs of the funeral procession of the dead and the streets, the professional "keening" of those who were skilled in lamentation (2 Chr. xxxiv. 25; Ecc. xii. 5; Jer. ix. 17-20; Am. v. 10). Lightfoot (Hor. Heb. on Matt. xiv. 23) quotes from the Talmudists (Choldoba, cap. 4, hal. ii), to the effect that every Israelite on the death of his wife "will afford her not less than two piper and one woman to make lamentation." The grape gatherers sang as they gathered in the vintage, and the wine-presesses were trolled with the shout of a song (Is. xvi. 10; Jer. xlviii. 33); the women sang as they toiled at the mill, and on every occasion the land of the Hebrews during their national prosperity was a land of music and melody. There is one class of musicians to which allusion is customarily made (Eccles. ii. 6, 7, 26; x. 1, 4), and who were probably foreigners, the harlots who frequented the streets of great cities, and attracted notice by singing and playing the guitar (Is. xxiii. 10, 16).

There are two aspects in which music appears, and about which little satisfactory can be said: the mysterious influence which it had in driving out the evil spirit from Saul, and its intimate connection with prophecy and prophetical inspiration. Miriam "the prophetess" exercised her prophetic functions as the leader of the chorus of women who sang the song of triumph over the Egyptians (Ex. xv. 20). The company of prophets whom Saul met coming down from the hill of God had a psaltery, a tabret, a pipe, and a harp before them, and snitten with the same enthusiasm he "prophesied among them" (1 Sam. x. 5, 10). The priests of Baal, challenged by Elijah at Carmel, cried aloud, and cut themselves with knives, and "prophesied till sunset" (1 K. xviii. 29). The song of Asaph, and Heman, and Ethan, which is extant by David for the temple choir, were to "prophesy with harps, with psaltery, and with cymbals" (1 Chr. xxv. 1). Jeduthun "prophesied with the harp" (1 Chr. xxv. 3), and in 2 Chr. xxxv. 15 is called "the king's scribe," a term which is applied to Heman (1 Chr. xxv. 5) and Asaph (2 Cbr. xxix. 30) as musicians, as well as to the prophet (2 Sam. xxiv. 11; 1 Chr. xxix. 29). The spirit of Jehovah came upon Jahaziel, a Levite of the sons of Asaph, in the reign of Jehoshaphat, and he foretold the success of the royal army (2 Chr. xx. 14). From all these instances it is evident that the same Hebrew root (םש) is used to denote the inspiration under which the prophets spoke and the minstrels sang: Gesenius assigns the latter as a secondary order, the congregation remaining quiet till the concluding prayer, in which all joined. After a simple meal, the whole congregation arose and formed two choirs, one of men and one of women, with the most skilful singer of each for leader; and in this way song hymns to God, sometimes with the full chorus, and sometimes with each choir alternately. In conclusion, both men and women joined in a single choir in imitation of that on the shores of the Red Sea which was led by Moses and Miriam.
MUSIC

The influence of music has been explained as follows by a learned divine of the Platonic school: "These divine enthusiasts were commonly wont to compose their songs and hymns at the sounding of some musical instrument or other, as we find it often suggested in the Psalms. So Pindar . . . describes the dictation of the oracle antiently . . . that it was inspired in various words, similitudes, and metaphors, at the sound of a pipe." Thus we have Asaph, Heman, and Jeduthun set forth in this prophetical preparation, 1 Chr. xxv. i. . . . Thus K. S. expounds the place . . . when they played upon their musical instruments they prophesied after the manner of Eliahu . . . And this sense of this place, I think, is much more genuine than that which a late author of our own would fasten upon it, namely, that this prophesying was nothing but the singing of psalms. For it is manifest that these prophets were not mere singers but composers, and such as were truly called "prophets or enthusiasts." (Smith, *Hist. of Discourses*, vi. c. 7, pp. 238, 239, ed. 1660.) All can be safely concluded is that in their external manifestations the effect of music in exciting the emotions of the sensitive Hebrews, the frenzy of Saul's madness (1 Sam. xvii. 10), and the religious enthusiasm of the prophets, whether of Saul or Jehovah, were so nearly alike as to be described by the same word. The case of Saul is more difficult still. We cannot be admitted to the secret of his dark malady. Two turning points in his history are the two interviews with Samuel, the first and the last, if we except that dream encounter which the despairing monarch challenged before the fatal day of Gilboa. On the first of these, Samuel foretold his meeting with the company of prophets with their ministrelsy, the external means by which the Spirit of Jehovah should come upon him, and he should be changed into another man (1 Sam. x. 5). The last occasion of their meeting was the disobedience of Saul in sparing the Amalekites, for which he was rejected from being king (1 Sam. xv. 26). Immediately after this we are told the Spirit of Jehovah departed from Saul, and an "evil spirit from Jehovah troubled him" (1 Sam. xvi. 14), and his attendants, who had perhaps witnessed the strange transformation wrought upon him by the music of the prophets, suggested that the same means should be employed for his restoration. Let our Lord now command the servants before thee, to seek out a man, a cunning player on an harp: and it shall come to pass, when the evil spirit from God is upon thee, that he shall play with his hand, and thou shalt be well. . . . And it came to pass when the spirit from God was upon Saul, that David took an harp and played with his hand. So Saul was refreshed, and was well; and the evil spirit departed from him " (1 Sam. xvii. 14, 23). But on two occasions, when anger and jealousy superseded the remedy which had soothed the frenzy of insensibility he had lost its charm (1 Sam. xviii. 10, 11; xix. 3, 10). It seems therefore that the passage of Seneca, which has often been quoted in explanation of this phenomenon, "Pythagoras, perturbationis lyra componibilat," is scarcely applicable, and we must be content to leave the narrative as it stands.

W. A. W.

MUSICAL INSTRUMENTS. In addition to the instruments of music which have been represented in our version by some modern word, and are treated under their respective titles, there are other terms which are vaguely or generally rendered. These are—

1. דְּכֶה, messs'ach, Chal'd., rendered "instruments of music" in Dan. vi. 18. The margin gives the form "table," perhaps for "cornet." The last-mentioned rendering is that approved by Gesenius, and seems most probable. The translation, "instruments of music," seems to have originated with the Jewish commentators, R. Nathan, R. Levi, and Aboben Ezra, among others, who represent the word by the Hebrew נ.loads, that is, stringed instruments which were played by being struck with the hand or the plectrum.

2. מַעְנָד, meaning, rendered with great probability "stringed-instruments" in Ps. cl. 4. It appears to be a general term, but beyond this nothing definite can be said, and the word is highly interesting from its occurrence in a difficult passage in Ps. xlv. 8, which stands in the A. V. "out of the ivory palaces whence [םֹֽנָו, מַעְנָד] they have made thee glad," a rendering which is neither intelligible nor supported by the Hebrew idiom. Gesenius and most of the moderns follow Sebald Schmid in translating, "out of the ivory palaces the stringed-instruments make thee glad.”

3. מַעְנָד, מַעְנָד, "an instrument of ten strings," Ps. xxi. 3. The full phrase is מַעְנָד, מַעְנָד, "a ten-stringed psalter"; as in Ps. xciii. 2, exilv. 9; and the true rendering of the first-mentioned passage would be "upon an instrument of ten strings, even upon the psalter." [Psalms.]

4. מֶשְׁבֲּל, מֶשְׁבֲּל, is found only in one very obscure passage, Exel. i. 8, "I get me no-singers and women-singers, and the delights of the sons of men, musical instruments, and that of all sorts." (משבָּל, משבָּל, "cymbals or cymbals.") The words thus rendered have received a great variety of interpretations. They are translated "drums" by Aquila and the Vulgate; "cymbals by the LXX., Psalters, Jerome, and the Arabic version; "laths" by the Chaldee; and "musical instruments" by Dy. Kimchi, followed by Luther and the A. V., as well as by many commentators. By others they are supposed to refer to the woman of the royal harem. But the most probable interpretation to be put upon them is that suggested by the usage of the Talmud, where מַעְנָד, מֶשְׁבֲּל, denotes a "palm-branch" or "litter" for women. The whole question is discussed in Gesenius' *Thesaurus*, p. 1656.

5. מֶשְׁבֲּל, מֶשְׁבֲּל, rendered "instruments of music" in the A. V. of 1 Sam. xviii. 6, and in the margin "three-stringed instruments," from the root מִשָּׁבָּל, "there." Roswell (Green, *Thes.* p. 1429) translates "triangles," which are said to have been invented in Syria, from the same root. We have no means of deciding which is the more correct. The LXX. and Syriac give "lyre," and the Vulgate "sistrum;" while others render it "male songs" (comp. Prov. xxiii. 20).

W. A. W.
MUSTARD (Sativar: *Sinapis*) occurs in Matt. xiii. 31; Mark iv. 19; Luke xiii. 19, in which passages the kingdom of heaven is compared to a grain of mustard-seed which a man took and sowed in his garden; and in Matt. xvi. 20, Luke xviii. 6, and John vi. 19, the Saviour had calculated His kingdom to ye faith as a grain of mustard-seed, ye might say to this mountain, remove hence to yonder place."

The subject of the mustard-tree of Scripture has of late years been a matter of considerable controversy, the common mustard-plant being supposed unable to fulfill the demands of the Biblical allusion. In Ryle's *Scripture,"* the author concludes that the *Salvadora persica* is the tree in question. He supposes the *Salvadora persica* to be the same as the tree called *Khordal* (the Arabic for mustard), seeds of which are employed throughout Syria as a substitute for mustard, of which they have the taste and properties.

This tree, according to the statement of Mr. Ameeney, a Syrian, quoted by Dr. Ryle, is found all along the banks of the Jordan, near the lake of Tiberias, and near Damascus, and is said to be generally recognized in Syria as the mustard-tree of Scripture. It appears that Captains Irby and Mangles, who had observed this tree near the Dead Sea, were struck with the idea that it was the mustard-tree of the parable. As these travellers were advancing towards Kerak from the southern extremity of the Dead Sea, after leaving its borders they entered a woody country with high rushes and marshes. "Occasionally," they say, "we met with specimens of trees, etc., such as none of our party had seen before. . . . Amongst the trees which we knew, were various species of Acacia, and in some instances we met with the dwarf Mimosa. . . . There was one curious tree which we observed in great numbers, and which bore a fruit in branches, resembling in appearance the currant, with the color of the plum; it has a pleasant, though strong aromatic taste, resembling mustard, and if taken in any quantity, produces a similar irritability in the nose and eyes. The leaves of this tree have the same pungent flavor as the fruit, though not so strong. We think it probable that this is the tree our Saviour alluded to in the parable of the mustard-seed, and not the mustard-plant which is to be found in the north." *(Tract, May 8)*. Dr. Ryle thus sums up his arguments in favor of the *Salvadora persica* representing the mustard-tree of Scripture: "The *S. persica* appears better calculated than any other tree that has yet been adduced to answer to every thing that is required, especially if we take into account its name and the opinions held respecting it in Syria. We have in it a small seed, which sown in cultivated ground grows up and abounds in foliage. This being pungent, may like the seeds have been used as a condiment, as mustard-seed, as well as with us, as a medicine that has been arborescent, and thus it will form a large shrub or a tree, twenty-five feet high, under which a horseman may stand when the soil and climate are favorable; it produces numerous branches and leaves, under which birds may and do take shelter, as well as build their nests; it has a name in Syria which may be considered as traditional from the earliest times, of which the Greek is a correct translation; its seeds are used for the same purposes as mustard; and in a country where trees are not plentiful, that is, the shores of the lake of Tiberias, this tree is said to abound, that is in the very locality where the parable was spoken." *(Treatise on the Mustard-tree, etc., p. 24)*.

Notwithstanding all that has been adduced by Dr. Ryle in support of his argument, we confess ourselves unable to believe that the subject of the mustard-tree of Scripture is thus finally settled. But, before the claims of the *Salvadora persica"* are discussed, it will be well to consider whether some mustard-plant (*Sinapis") may not after all be the mustard-tree of the parable: at any rate, this opinion has been held by many writers, who appear never to have entertained any doubt upon the subject. Hiller, Celsius, Rosenmüller, who all studied the botany of the Bible, and older writers, such as Erasmus, Zegerus, Grotius, are content to believe that some common mustard-plant is the
occasion to suppose that the expression "foils of the air" denotes any other than the smaller "insec-
tural" kinds, linnets, finches, etc., and not the "aquatic foils by the lake-side, or partridges and
pigeons hovering over the rich plain of Tenera-
eth," which Prof. Stanley (8, 8 p. 427) recog-
nizes as "the birds that came and devoured the
seed by the way-side" — for the larger birds are
wild and avoid the way-side — or as those which
took refuge in the spreading branches of the
mustard-tree." Hiller's explanation is probably the
correct one; that the birds came and settled on
the mustard plant for the sake of the seed, of which
they are very fond. Again, whatever the airn
may be, it is expressly said to be an herb, or more
properly "a garden herb" (Ακανθών, edus). As
to the plant being called a "tree" or a "great
tree," the expression is not only an oriental one,
but it is clearly spoken with reference to some other
thing: the airn with respect to the other "keries" of
the garden may, considering the size to which
it grows, justly be called "a great tree," though

(Mustard), which attains under a favoring climate
a stature which it will not reach in our country
Dr. Thomson also (The Land and the Book, p.
341) says he has seen the Wild Mustard on the
rich plain of Akkar as tall as the horse and
the rider. Now, it is clear from Scripture that the
airn was cultivated in our Lord's time, the seed
a "man took and sowed in his field;" St. Luke
calls, "cast into his garden:" if then, the wild
plant on the rich plain of Akkar grows as high as
a man on horseback, it might attain to the same
or a greater height when in a cultivated garden;
and if, as Lady Calcutt has observed, we take into
account the very low plants and shrubs upon which
birds often roost, it will readily be seen that some
common mustard-plant is able to fulfill all the
Scriptural demands. As to the story of the Rabbi
Simon Ben Calaphitha having in his garden a
mustard-plant, into which he was accustomed to
dump as men climb into a fig-tree, it can only be
taken for what Talmudical statements generally
are worth, and must be quite insufficient to afford
grounds for any argument. But it may be asked
Why not accept the explanation that the Salva-
dora persica is the tree denoted? — a tree which
will literally meet all the demands of the parable.
Because, we answer, where the commonly received
opinion can be shown to be in full accordance with
the Scriptural allusions, there is no occasion to be
dissatisfied with it; and again, because at present
we know nothing certain of the occurrence of the
Salvadora persica in Palestine, except that it
occurs in the small, tropical, low valley of Engedi,
near the Dead Sea, from whence Dr. Hooker saw
specimens, but it is evidently of rare occurrence.
Mr. Amenny says he had seen it all along the
banks of the Jordan, near the lake of Tiberias and
Tamaras; but this statement is certainly errone-
ous. We know from Pliny, Dioscorides, and other
Greek and Roman writers, that mustard-seeds were
much valued, and were used as a condiment; and
it is more probable that the Jews of our Lord's
time were in the habit of making a similar use of
the seeds of some common mustard (Sinapis), than
that they used to plant in their gardens the seed of
a tree which certainly cannot fulfill the Scriptural
demand of being called "a pot-herb."

The expression "which is indeed the least of all
seeds," is in all probability hyperbolical, to denote
a very small seed indeed, as there are many seeds
which are smaller than mustard. "The Lord, in
his popular teaching," says French (Notes on Par-
ables, 1805), "adhered to the popular language;"
and the mustard-seed was used proverbially to de-
ote almost anything very minute (see the quotations
from the Talmud in Buxtorf, Lex. Talm., p. 322; also
the Koran, Sur. 31).

The parable of the mustard-plant may be thus
paraphrased: "The Gospel dispensation is like a
grain of mustard seed which a man sowed in his
garden, which indeed is one of the least of all
seeds; but which, when it springs up, becomes a
tall, branched plant, on the branches of which the
birds come and settle seeking their food."

W. H. satisfied that it is a very rare plant in Syria, and is
probably confined to the hot, low, sub-tropical
Engedi valleys, where various other Indian and Arabian types
appear at the Ultima Thule of their northern wanderings. Of the mustard-plants which I saw on the
banks of the Jordan, one was 10 feet high, the

Sinapis Nigra.
MUTH-LABBEN

The writer, in crossing the Phlm of Abke from Birweh, on the north side, to Mount Carmel, on the south, met with a field — a little forest it might almost be called — of the common mustard-plant of the country. It was in blossom at the time, full green; in some cases, as measured, six, seven, or nine feet high, with a stem or trunk more than an inch thick, throwing out branches on every side. It might well be called a tree, and certainly, in comparison with its thin seed, "a great tree." But still the branches, or stems of the branches, were not very large, and to the eye did not appear very strong. Can the birds, I said to myself, rest upon them? Are they not too slight and flexible? Will they not bend or break beneath the superadded weight? At that very instant, as I stood and revered the thought, lo! one of the fowls of heaven stopped in its flight through the air, alighted down on one of the branches, which hardly moved beneath the shock, and then began, perched there before my eyes, to work forth a sweet of the richest music.

In this occurrence every condition of the parable was fully met. As remarked above, the Greek expression does not say that the birds build their nests among such branches, but light upon them or make their abode among them. [Nestor, Amer. ed.]

This plant is not only common in Palestine in a wild state, but is cultivated in gardens (comp. Matt. xiii. 31). This circumstance shows that the kibbod or mustard-tree of the Arabs (Sisalbacon persegue) cannot be meant, for that grows wild only. Certain birds are fond of the seeds, and seek them as food. The associating of the birds and this plant as in the parable was the more natural on that account. Further, see Tristram, Nat. Hist. of the Bible, p. 472 f.

MUTH-LABBEN. "To the chief musician upon Muth-Labenp (תִּפְסַל תַּלְבֶּנָה) in the same title of Ps. ix., which has given rise to infinite conjecture. Two difficulties in connection with it have to be resolved: first, to determine the true reading of the Hebrew, and then to ascertain its meaning. Neither of these points has been satisfactorily explained. It is evident that the LXX. and Vulgate must have read לַלְבֶּנָה, "concerning the mysteries," and so the Arabic and Ethiopic versions. The Targum, Syro-canaan. and Jerome, in his translation of the Hebrew, adhered to the received text, while Aquila, retaining the consonants as they are present stand, read אַל-לְבֵן as one word, לַלְבֶּנָה, "youth," which would be the regular form of the abstract noun, though it does not occur in Biblical Hebrew. In support of the reading לַלְבֶּנָה as one word, we have the authority of 28 of Kennicott's MSS., and the assertion of Jarchi that he had seen it so written, as in Ps. xlvii. 14, in the Great Masorah. If the reading of the Vulgate and LXX. be correct with regard to the consonants, the words might be pointed thus, לַלְבֶּנָה "al'alâmôth, "upon Alamoth," as in the title of Ps. xlvii., and לַלְבֶּנָה is possibly a fragment of לַלְבֶּנָה לַלְבֶּנָה, lîbôc Kôrah, "for the sons of Korah," which appears in the same title. At any rate, such a reading would have the merit of being intelligible, which is more than can be said of most explanations which have been given. But if the Masoretic reading be the true one, it is hard to attach any meaning to it. The Targum renders the title of the Psalm, — "on the death of the man who came forth from between (תִּפְסַל) the camps," alluding to Goliath, the Philistine champion (תִּפְסַל תַּלְבֶּנָה, 1 Sam. xvii. 4). That David composed the psalm as a triumphal song upon the slaughter of his gigantic adversary was a tradition which is mentioned by Kimchi merely as an on dit. Others render it "on the death of the son," and apply it to Abasolom; but, as Jarchi remarks, there is nothing in the character of the psalm to warrant such an application. He mentions another interpretation, which appears to have commenced itself to Grotius and Hengstenberg, by which lîbôc lîbôc is an emblem of verse 5 and the psalm is referred to the death of Nabal, but the Rabbinic commentator had the good sense to reject it as untenable, though there is as little to be said in favor of his own view. His words are — "but I say that this song is of the future to come, when the childhood and youth of Israel shall be made white (לַלְבֶּנָה), and their righteousness he revealed and their salvation draw nigh, when Esau and his seed shall be blasted out." He takes לַלְבֶּנָה as one word, signifying "youth," and לַלְבֶּנָה לַלְבֶּנָה, "to whiten." Mentch, a commentator quoted by Jarchi, interprets the title as addressed "to the musician upon the organist called Alamoth, to instruct," taking לַלְבֶּנָה as if it were לַלְבֶּנָה לַלְבֶּנָה. Donesh supposes that lîbôc was the name of a man who warred with David in those days, and to whom reference is made as "the wicked" in verse 5. Arama (quoted by Dr. Gill in his Exposition) identifies him with Saul. As a last resource Kimchi suggests that the title was intended to convey instructions to the Levite minister Ben, whose name occurs in 1 Chr. xxviii. 18, among the temple choir, and whose brethren played "with psalteryers upon Alamoth." There is reason, however, to suspect that the reading in this verse is corrupt, as the name is not repeated with the others in verse 20. There still remain to be noticed the conjectures of Delitzsch, that Muth-laben denotes the tone or melody with the words of the song associated with it, of others that it was a musical instrument, and of Hupfeld that it was the commencement of an old song, either signifying "the for the son," or "death to the son." Hitzig and others regard it as an abbreviation containing a reference to Ps. xlvii. 14. The difficulty of the question is sufficiently indicated by the explanation which Gesenius himself (Thes. p. 741, a) was driven to adopt, that the title of the psalm signified that it was "to be chanted by boys with virgin voices." The renderings of the LXX. and Vulgate induced the early Christian commentators to read

a פִּסְלַנְפִּיו וּדֵני. b Super morte filia. c Necavitro pauci vio.
the psalm to the Messiah. Augustine understands "the son" as "the only begotten son of God." The Syriac version is quoted in support of this interpretation, but the titles of the Psalms in that version are generally constructed without any reference to the Hebrew, and therefore it cannot be appealed to as an authority.

On all accounts it seems extremely probable that the title in its present form is only a fragment of the original, which may have been in full what has been suggested above. But, in the words of the Assembly's Annotations, "when all has been said that can be said, the conclusion must be the same as before; that these titles are very uncertain things, if not altogether unknown in these days."

W. A. W.

* MUZZLE. [OX.]

MYNDUS (Μυνδύς), a town on the coast of Caria, between Miletus and Halicarnassus. The convenience of its position in regard to trade was probably the reason why we find in 1 Mace. xx. 23 that this was the residence of a Jewish population. Its ships were well known in very early times (Herod. v. 33), and its harbor is specially mentioned by Strabo (xiv. 658). The name stillingers in the modern Montche, though the remains of the city are probably at Gumishlata, where Admiral Beaufort found an ancient pier and other ruins.

MYRA (μυρα [pointneas; Vulg. Lystra]), an important town in Lycia, and interesting to us as the place where St. Paul, on his voyage to Rome (Acts xxiv. 5), was removed from the Adramyttian ship which had brought him from Cosarea, and entered the Alexandrian ship in which he was wrecked on the coast of Malta. [ADRAMYTTIUM.] The travellers had availed themselves of the first of these vessels because their course to Holy necessity took them past the coasts of the province of Asia (ver. 2), expecting in some harbor on these coasts to find another vessel bound to the westward. This expectation was fulfilled (ver. 6).

It might be asked how it happened that an Alexandrian ship bound for Italy was so far out of her course as to be at Myra. This question is easily answered by those who have some acquaintance with the Levant. The Levant is nearly due north of Alexandria, the harbors in the neighborhood are numerous and good, the mountains high and easily seen, and the current sets along the coast to the westward (Smith's Yoga and Ship-creek of St. Paul). Moreover, to say nothing of the possibility of landing or taking in passengers or goods, the wind was blowing about this time continuously and violently from the N. W., and the same weather which impeded the Adramyttian ship (ver. 4) would be a hindrance to the Alexandrian (see ver. 7; Life and Letters of St. Paul, ed. xxii.).

Some important MSS. having AEGYPT in this passage, Grosvin conjectured that the true reading might be MYRGA (Bentt. Celts Soc., ed. A. Ellis). This suggestion, though ingenious, is quite unnecessary. Both Myrurus and Myra were well known among the maritime cities of Lycia. The harbor of the latter was strictly Andriesis, distant from it between two and three miles, but the river was navigable to the city (Appian, R. C. iv. 82).

1 Myrrh (μυρρα [σμωρα, ασκητη, μηρρους, κροκος: myrrha, myrrhium, myrrha]) is mentioned in Ex. xxx. 25, as one of the ingredients of the "oil of holy anointing;" in Esth. ii. 12, as one of the substances used in the purification of women; in Ps. xxv. 7, Ps. xcii. 5, and in several passages in Canticles, as a perfume. The Greek ευρωπα occurs in Matt. ii. 11 amongst the gifts brought by the wise men to the infant Jesus, and in Mark xv. 23, it is said that "the mingled with myrrh" (οπλα ἐν μυρρωματε) was offered to, but refused by, our Lord on the cross. Myrrh was also used for embalming (see John xix. 38, and Herod., i. 80). Various conjectures have been made as to the real nature of the substance denoted by the Hebrew maw (see Celsus, Hier. ii. 522); and much doubt has existed as to the countries in which it is produced. According to the testimonies of Heraclitus (iii. 107), Dioscorides (i. 77), Theophrastus (ix. 4, § 1), Dioscurides Siennus (i. 49), Strabo, Pliny, etc., the tree which produces myrrh grows in Arabia — Pliny (xii. 55) says, in different parts of Arabia, and asserts that there are several kinds of myrrh both wild and cultivated; it is probable that under the name of myrrha he is describing different resinous productions. Theophrastus, who is generally pretty accurate in his observations, remarks (ix. 4, § 1), that myrrh is produced in the middle of Arabia, around Saba and Adramyttia. Some ancient writers, Propertius (i. 2, 23) and Oppian (Hal. iii. 103), speak of myrrh as found in Syria (see also Helon, Odoe. ii. ch. 80); others conjecture India and Ethiopia; Plutarch (Is. ch. 64), p. 383) asserts that it is produced in Egypt, and is there called Hel. "The fact," observes Dr. Boyle (s. v. 'Maw, Kitto's Bib. Cyc.), "of myrrh being called hel among the Egyptians is extremely curious, for it is the Sanscrit halda, the name for myrrh throughout India."

It would appear that the ancients generally have confounded the Castle sea, "myrrh," with a "myrrh eye." See Jablonski, Opusc. i. 13, ed. to Water
Correct in what they state of the localities where myrrh is produced, for Ehrenberg and Hemprich have proved that myrrh is found in Arabia Felix, thus confirming the statements of Theophrastus and Pliny; and Mr. Johnson (Travels in Abyssinia, i. 349) found myrrh exuding from cracks in the back of a tree in Koom-baljubin in Adal, and Forskål mentions two myrrh-producing trees, *Aegyes Kafief* and *Aegyes Kafien*, as occurring near Haea in Arabia Felix. The myrrh-tree which Ehrenberg and Hemprich found in the borders of Arabia Felix, and that which Mr. Johnson saw in Abyssinia, are believed to be identical; the tree is the *Balanodendron myrrha*, a low, thorny, ragged-looking tree, with bright trifoliate leaves: it is probably the *Myrrha of Abu'l Failli*, of which he says "murr is the Arabic name of a thorny tree like an acacia, from which flows a white liquid, which thickens and becomes a gum."

**Balanodendron Myrrha.**

That myrrh has been long exported from Africa, we learn from Arrian, who mentions *saphra* as one of the articles of export from the ancient district of Barbaria: the Egyptians perhaps obtained their myrrh from the country of the Troglydytes (Nubia), as the best wild myrrh-trees are said by Pliny (xvi. 15) to come from that district. Pliny states also that "the Sabeans even cross the sea to procure it in the country of the Troglydytes." From what Athenaeus (xx. 689) says, it would appear that myrrh was imported into Egypt, and that the Greeks received it from thence. Dioscorides describes many kinds of myrrh under various names, for which see Sprengel's *Annotations*, i. 73, &c.

The *Balanodendron myrrha*, which produces the myrrh of commerce, has a wood and bark which emit a strong odor; the gum which exudes from the bark is at first oily, but becomes hard by exposure to the air; it belongs to the natural order Terebinthaceae. There can be little doubt that his tree is identical with the *Murr of Abu'l Failli*, the *saphra* of the Greek writers, the "stillata corvea myrrha" of Ovid and the Latin writers, and the myr of the Hebrew Scriptures.

The "wine mingled with myrrh," which the Roman soldiers presented to our Lord on the cross, was given, according to the opinion of some commentators, in order to render him less sensitive to pain; but there are differences of opinion on this subject, for which see Gall.

2. Lot (Genesis vi. 14) erroneously translated "myrrh" in the A. V. in Gen. xxxvii. 25, xxlii. 11, the only two passages where the word is found, is generally considered to denote the odorous resin which exudes from the branches of the *Cistus creticus*, known by the name of *ladanum* or *bebonnum*. It is clear that *lot* cannot signify "myrrh," which is not produced in Palestine, yet the Scriptural passages in Genesis speak of this substance as being exported from Gilead into Egypt.

**Cistus Creticus.**

Ladanum was known to the early Greeks, for Herodotus (iii. 107, 112) mentions *Λάδανων*, or *Λαδάνων*, as a product of Arabia, and says it is found "sticking like gum to the beards of he-goats, which collect it from the wood;" similar is the testimony of Dioscorides (i. 128), who says that the best kind is "odorous, in color inclining to green, easy to soften, fat, free from particles of sand and dirt; such is that kind which is produced in Cyprus, but that of Arabia and Libya is inferior in quality." There are several species of *Cistus*, all of which are believed to yield the gum ladanum: but the species mentioned by Dioscorides is in all probability identical with the one which is found in Palestine, namely, the *Cistus creticus* (Strand, *Flor. Palest.*).
MYRTLE

No. 289). The C. ladaniferus, a native of Spain and Portugal, produces the greatest quantity of the ladanum; it has a white flower, while that of the C. crenulata is rose-colored. Tournefort (Vogser, i. 79) has given an interesting account of the mode in which the gum ladanum is gathered, and has figured the instrument commonly employed by the people of Candia for the purpose of collecting it. There can be no doubt that the Hebrew פַּדּא, the Arabic بَدَن, the Greek Λάδαν, the Latin and English ladanum, are identical (see Rosenmüller, Bib. Not. p. 158; Celsius, Hieraed, i. 288). Ladanum was formerly much used as a stimulant in medicine, and is now of repute amongst the Turks as a perfume.

The Cistus belongs to the Natural order Cistacae, the Rock-rose family.

MYRTLE (Myrtus), ἤδος: μυρίνη, ὄψος: b myrtos, myrtulon). There is no doubt that the A. V. is correct in its translation of the Hebrew word, for all the old versions are agreed at the point, and the identical noun occurs in Arabic—in the dialect of Yemen, S. Arabia—as the name of the "myrtle." *

Mention of the myrtle is made in Neh. viii. 15; Is. xli. 19, lv. 13; Zeel. i. 8, 10, 11. When the Feast of Tabernacles was celebrated by the Jews on the return from Babylon, the people of Jerusalem were ordered to "go forth unto the mount and fetch olive-branches, and pine-branches, and myrtle-branches, and to make booths." The prophet Isaiah foretells the coming golden age of Israel, when the Lord shall plant in the wilderness the slitten-tree and the myrtle-tree and the oil-tree. The modern Jews still adorn with myrtle the booths and sheds at the Feast of Tabernacles. Myrtles (Myrtus communis) will grow either on hills or in valleys, but it is in the latter locality where they attain to their greatest perfection. Formerly, as we learn from Nehemiah (vii. 15), myrtles grew on the hills about Jerusalem. "On Olivet," says Prof. Stanley, "nothing is now to be seen but the olive and the fig tree:" on some of the hills, however, near Jerusalem, Husselquist (Trav. 127, Lond. 1766) observed the myrtle. Dr. Hooker says it is not uncommon in Samaria and Galilee. Irby and Mangles (p. 222) describe the rivers from Tripoli towards Galilee as having their banks covered with myrtles (see also Kitto, Phys. Hist. of Palæst. p. 260).

The myrtle (holbos) gave her name to Hadassah or Esther (Esth. ii. 7); the Greek names Myrtillus, Myrtocissa, etc., have a similar origin. There are several species of the genus Myrtus, but the Myrtus communis is the only kind denoted by the Hebrew holbos: it belongs to the natural order Myrtaceae, and is too well known to need description.

* The myrtle is found very widely distributed through Mt. Lebanon, and on the whole sea-coast. I have collected it as far north as the plain of Lattonikia. The black berries are eaten in Syria.

The bush is known by the two names of ἀσάν, and ἐβικίαν. The dried leaves of this plant are employed by the natives as a stuffing for the beds of children, with the idea that their odor is promotive of health, and that they keep off vermin.

MYE STRY (Μυστήριον). If we were required to fix the exact limits of this northwestern district of Asia Minor, a long discussion might be necessary. But it is mentioned only once in the N. T. (Acts xvi. 7, 8), and that cursorily and in reference to a passing journey. St. Paul and his companions, on the second missionary circuit, were divinely prevented from staying to preach the Gospel either in Asia or Bithynia. They had then come over τὴν Μυσίαν, and they were directed to Troas, παρεκδόοντες τὴν Μυσίαν: which means either that they skirted its border, or that they passed through the district without staying there. In fact the best description that can be given of Mysia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia. The term is evidently used in an ethnological, not a political sense. Winer compares it, in this point of view, to such German terms as Suabia, Breisgan, etc. Illustrations nearer home might be found in such districts as Craven in Yorkshire or Ayr in Ayrshire. Assos and Acedamuthum were both in Mysia. Immediately opposite was the island of Lesbos. [Mystērye] Troas, though within the same range of country, had a small district of its own, which was viewed as politically separate.

J. S. H.

* MYSTERY (μουστήριον). The origin and etymological import of the Greek word (μουστήριον) are partially involved in doubt. Its claims to a Hebrew derivation, though plausible, are undoubtedly to be rejected. It evidently stands connected with μοιάζει, one united, namely, into the mys-
NA'AMAH (נָאָמָה) [pleasantness, grace].

1. (N Naomi). One of the four women whose names are preserved in the records of the world before the Flood; all except Eve being Canities. She was daughter of Lamech by his wife Zilbl, and sister, as is expressly mentioned, to Tubal-cain (Gen. iv. 22 only). No reason is given us why these women should be singled out for mention in the genealogies; and in the absence of this most of the commentators have sought a clue in the significance of the names interpreted as Hebrew terms; endeavoring, in the characteristic words of one of the latest Jewish critics, by "due energy to strike the living water of thought even out of the rocky soil of dry names" (Kolisch, Genesis, p. 149).

Thus Na'ama, from Ne'am, "sweet, pleasant," signifies, according to the same interpreter, "the lovely beautiful woman," and this and other names in the same genealogy of the Canities are interpreted as tokens that the human race during that period was advancing in civilization and arts. But not only are such deductions at all times hazardous and unsatisfactory, but in this particular instance it is surely begging the question to assume that these early names are Hebrew; at any rate the omens proverbii rests on those who make important deductions from such slight premises. In the Targum Pseudojonathan, Na'ama is connected with the "mistress of Israel and singers;" and in the Samaritan Version her name is given as Zalkippa.

2. (Na'ama, Na'adah, Na'adav, Na'amah; Vat. in 1 K. xiv. 21) Maazah; Alex. Naazua, Nozmaa; Joseph. Nozma: Neziim.) Mother of king Rehoboam (1 K. xiv. 21, 31; 2 Chr. xii. 13). On each occasion she is distinguished by the title "the (not 'an,' as in A. V.) Amnonite." She was therefore one of the foreign women whom Solomon took into his establishment (1 K. xi. 1). In the LXX. (1 K. xii. 24, answering to xiv. 31 of the Hebrew text) she is stated to have been the "daughter of Ana (i.e. Hamun) the son of Nahash." If this is a translation of a statement which once formed part of the Hebrew text, and may be taken as authentic history, it follows that the Amnonite war into which Hamun's insulae had provoked David was terminated by a re-alliance; and, since Solomon reigned forty years, and Rehoboam was forty-one years old when he came to the throne, we can fix with tolerable certainty the date of the event. It took place before David's death, during that period of profound quiet which followed his death, when the influence of Absalom's rebellion and of the subsequent attempt of Sheba the son of Bichri had strengthened more than ever the affection of the nation for the throne of David; and which was not destined to be again disturbed till put an end to by the shortsighted rashness of the son of Na'amah.

G.

NA'AMAH (נָאָמָה) [loveliness; Naomi; Alex. Na'aza: Na'ama], one of the towns of Judah in

A. C. K.

* The LXX transpose this to ch. xii. after ver. 24
the district of the lowland or Shephelah, belonging to the same group with Laechish, Ezion, and Makelach. (Josh. xvi. 41). Nothing more is known of it, nor has any name corresponding with it hence been yet discovered in the proper direction. But it seems probable that Naaman should be connected with Nahum, who again were perhaps identical with the Medunim or Mineans, traces of whom are found on the southwestern outskirts of Judah; one such at Minim or el-Minya, a few miles below Gaza. G. 

NA'AMAN (נָאָם [pleasingness, grace]): Na'avah: [Tisch. Text], Naa'hah, but Laechish. [Tisch. Targ.] with [Sin.] A B D. Na'ahah: Joseph, Aqmar: Na'amah — or to give him the title conferred on him by our Lord, "Naaman the Syrian." An Aramean warrior, a remarkable incident in whose life is preserved to us through his connection with the prophet Elisha. The narrative is given in 2 K. 5.

The name is a Hebrew one, and that of ancient date (see the next article), but it is not improbable that in the present case it may have been slightly altered in its insertion in the Israelite records. Of Naaman the Syrian there is no mention in the Bible except in this connection. But a Jewish tradition, at least as old as the time of Josephus (Ant. viii. 15, § 5), and which may very well be a genuine one, identifies him with the archer whose arrow, whether at random or not, struck Ahab with his mortal wound, and thus gave deliverance to Syria." The expression is remarkable — because that by him Jehovah had given deliverance to Syria." To suppose the intention to be that Jehovah was the universal ruler, and that therefore all deliverance, whether afforded to his servants or to those who, like the Syrians, acknowledged Him not, was wrought by Him, would be thrusting a too modern idea into the expression of the writer. Taking the tradition above-mentioned into account, the most natural explanation perhaps is that Naaman, in delivering his country, had killed one who was the enemy of Jehovah not less than he was of Syria. Whatever the particular exploit referred to was, it had given Naaman a great reputation at the court of Benhadad. In the first rank for personal prowess and achievements, he was commander-in-chief of the army, while in civil matters he was nearest to the person of the king, whom he accompanied officially, and supported, when the king went to worship in the Temple of Rimmon (ver. 18). He was afflicted with a leprosy of the white kind (ver. 27), which had hitherto defied care. In Israel, according to the enactments of the Mosaic Law, this would have cut off even Naaman from intercourse with everyone; he would have been compelled to dwell in a "several house." But not so in Syria; he maintained his access to the king, and his contact with the members of his own household. The circumstances of his visit to Elisha have been drawn out under the latter head [vol. 1, p. 718], and need not be repeated here. Naaman's appearance throughout the occurrence is most character-istic and consistent. He is every inch a soldier ready at once to resent what he considers as a slight east either on himself or the natural glories of his country, and blazing out in a moment into sudden rage," but calmed as speedily by a few good-natured and sensible words from his dependants, and, after the ease has been effected, evincing a thankful and simple heart, whose gratitude knows no bounds and will listen to no refusal.

His request to be allowed to take away two mules' burden of earth is not easy to understand. The natural explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of Acclabna for the Campo Santo at Pisa, and in obedience to which the pilgrims to Mecca are said to bring back stones from that sacred territory, the grateful convert to Jehovah wished to take away some of the earth of his country, to form an altar for the burnt-offering and sacrifice which henceforth he intended to dedicate to Jehovah only, and which would be inappropriate if offered on the profane earth of the country of Rimmon or Hadad. But it should be remembered that in the narrative there is no mention of an altar: and although Jehovah had on one occasion ordered that the altars put up for offerings to Him should be of earth (Ex. xx. 24), yet Naaman could hardly have been aware of this enactment, unless indeed it was a custom of older date and wider existence than the Mosaic law, and adopted into that law as a significant and wise precept for some reason now lost to us.

How long Naaman lived to continue a worshipper of Jehovah while assisting officially at that of Rimmon, we are not told. When next we hear of Syria, another, Hazael, apparently holds the position which Naaman formerly filled. But, as has been elsewhere noticed, the reception which Elisha met with on this later occasion in Damascus probably implies that the fame of "the man of God," and of the mighty Jehovah in whose name he wrought, had not been forgotten in the city of Naaman.

It is singular that the narrative of Naaman's cure is not found in the present text of Josephus. Its absence makes the reference to him as the slayer of Ahab, already mentioned, still more remarkable.

It is quoted by our Lord (Luke iv. 27) as an instance of mercy exercised to one who was not of Israel, and it should not escape notice that the reference to this act of healing is recorded by none of the Evangelists but St. Luke the physician.

NA'AMAN (נָאָם [mienity, pleasingness]): Na'ahah: [in Num., Alex. Na'ma, Vat. omits; in 1 Chr., Na'ahah, Na'am; Vat. Na'ma]; Alex. in ver. 4. Na'amah: Na'am, in Num. 21.1). One of the family of Benjamin who came down to Egypt with Jacob, as we read in Gen. xvi. 21. According to the LXX. version of that passage he was the son of Bela, which is the paternal assignment to him in Num. xvi. 40, where, in the
NAAMATHITE

enumeration of the sons of Benjamin, he is said
to be the son of Bech, and head of the family of
the Naamathites. He is also reckoned among
the sons of Bech in 1 Chr. vii. 5, 4. Nothing
is known of his personal history, or of that of
the Naamathites. For the account of the migra-
tion, apparently compulsory, of some of the sons
of Benjamin from Gaba to Manahath, in 1 Chr.
vii. 6, 7, is so confused, probably from the corrup-
tion of the text, that it is impossible to say whether
the family of Naaman was or was not included in it.
The repetition in ver. 7 of the three names Naaman,
Ahish, Gera, in a context to which they do not
appear to belong, looks like an attempt to evi-
cogist, inadvertently copying over again the same
names which he had written in the same order in
ver. 4, 5 — Naaman, Ahish, Gera. If, however,
the names are in their place in ver. 7, it would
seem to indicate that the family of Naaman did
migrate with the sons of Euhd (called Abhoab
in ver. 9) from Gaba to Manahath.
A. C. H.

NA'AMATHITE (גָּמֶת) [patr. as below]:
Murawaj [Vat. Sin. Miswat], Basaleh, or Mur-
ados [Mer. — Namaathites], the gentile name of
one of Job's friends, Zophar the Naamathite
(Job ii. 11, xi. 1, xx. 9). There is no other
trace of this name in the Bible, and the town,
גָּמֶת, whence it is derived, is unknown. If
we may judge from modern usage, several places
so called probably existed on the Arabian borders
of Syria. Thus in the Geographical Dictionary,
Namaish el-Habbah, are Naam, a castle in the Ye-
men, and a place on the mountains which belonged
to the Arabs; and Naam, a valley in Tihama. The name Naam (of unlikely deriva-
tion however) is very common. Bochart (Pho-
tography, cap. xxii.), as might be expected, seizes the LXX.
reading, and in the "king of the Minäi " sees a con-
firma tion to his theory respecting a Syrian, or
northern Arabian settler of that well-known
people of classical antiquity. It will be seen, in
art. Dikla, that the present writer identifies the
Minäi with the people of Ma'een, in the Yemen;
and there is nothing improbable in a northern
colony of the tribe, besides the presence of a place
so named in the Syro-Arabian desert. But
we regard this point as apart from the subject of this
article, thinking the LXX. reading, unsupported as
it is, to be too hypothetical for acceptance.
E. S. P.

[the lovely one]:如果是 o Namos [Vat.
−veil], Alex. omits: familia Nasaamiterum, and No-
samiterum), the family descended from
Naaman, the grandson of Benjamin (Num. xxvi. 40 only).
[Naaman, p. 2048 b.] The name is a contraction,
of a kind which does not often occur in Hebrew.
Accordingly the Samaritan Codex, as will be seen
above, presents it at length — "the Naamites."
G.

NA'ARAH (גָּמֶת): 'Oooso [rather
'Aoset]; Alex. 'Ooseth: Naaroth, the second wife of
Asahir, a descendant of Judah (1 Chr. iv. 5, 6).

Nothing is known of the persons (or places) record-
ed as the children of Naarah. In the Vat. LXX.
the children of the two wives are interchanged.
[Rather, in ver. 5 the names of the two wives are
transposed. A.]

NA'ARAI (גָּמֶת) [Jehovah reveals?].
Naara: [Alex. Nasaath: Naaroth]. One of the
valiant men of David's armies (1 Chr. xlix. 37).
In 1 Chr. he is called the son of Ezab, but in 2
Sam. xxiii. 35 he appears as "Paarai the Arbaite.
Kennicott (Dict. pp. 200—211) decides that the former
is correct.

NA'ARAN (גָּמֶת) [boyish, juvenile, Ges.]:
[Rom. Noases; Vat.] Naaar: Alex. Nasaah:
'Annoia, a city of Ephraim, which in a very ancient
record (1 Chr. vii. 28) is mentioned as the eastern
limit of the tribe. It is very probably identical with
Naarah, or more accurately Naarath, which
seems to have been situated in one of the great
valleys or torrent-leads which lead down from the
highlands of Bethel to the depths of the Jordan
valley.

In 1 Sam. vi. 21 the Pesho-Syrac and Arabic
versions have respectively Naarah and Naarath for
the Kigzayje of the Hebrew and A. V. If
this is anything more than an error, the Naarah to
which it refers can hardly be that above spoken
of, but must have been situated much nearer to
Bethlehem and the Philistine lowland.
G.

NA'ARATH (heb. is גָּמֶת) to
Naarah, גָּמֶת, [made] which is therefore the
real form of the name: a'i kawma a'osw; Alex.
Nasaath and kawma a'osw. Nasaath, a place
named (Josh. xvi. 7, only) as one of the landmarks
on the (southern) boundary of Ephraim. It appa-
rently has lain between Ataroth and Jericho.
If Ataroth be the present Atur, a mile and a half
south of el-Bireh and close to the great natural
boundary of the Wady Suecæd, then Naarah
was probably somewhere lower down the wady.
Eusebius and Jerome (Onomast.) speak of it as if it
were known to them — "Naaroth, a small village of
the Jews five miles from Jericho." Schwarz (147) fixes
it at "Neana," also "five miles from Jericho,"
meaning perhaps N'ham, the name of the lower
part of the great Wady Mutych or el-Joum, which
runs from the foot of the hill of Râamon into the
Jordan valley above Jericho, and in a direction
generally parallel to the Wady Suecæd (Tob. Bibl.
Res. iii. 290), A position in this direction is in
agreement with 1 Chr. vii. 28, where Naarahan
is probably the same name as that we are now
considering.
G.

NA'ASH'ON, Ex. vi. 23. [NAHISHON.]

NA'ASSON (Nasaow: Naasson). The
Greek form of the name Naasson (Matt. 1: 4:
Luke iii. 32 only).

NA'ATHUS (Nasos; [Vat. Aabos]):
Naathus. One of the family of Addi, according
to the list of 1 Esdr. x. 31. There is no name corre-
sponding in Ezra, x. 30.

NA'BAL (גָּמֶת = foed: NaBd). one of
the

a Perhaps treating גָּמֶת, "a damsel," as equiv-

sient to גָּמֶת, "a daughter," the term commonly used

to express the hamlets dependent on a city.

b The 'Ooseth in the present text of Eusebius should
obviously have prefixed to it the מ from the "toer"
which precedes it. [The edition of Larsow and Po
they read Nasaath.] Compare Naasah.
characters introduced to us in David's wanderings, apparently to give one detailed glimpse of his whole state of life at that time (1 Sam. xxxviii). Nabal himself is remarkable as one of the few examples given to us of the private life of a Jewish citizen. He ranks in this respect with Boaz, Barchia, and Nabal. He was a sheep-master on the confines of Judaea and the desert, in that part of the country which bore from its great conqueror the name of Cæsar (1 Sam. xxxix. 14, xxx. 3; see Vulgate, A. V., and Ewalt). He was himself, according to Diodorus (iv. xi. 13, § 9), a Zippite, and his residence Emmaus, a place of that name not otherwise known, on the southern Carmel, in the pasture lands of Maon. (In the LXX. of xxxv. 4 he is called οἱ Ἐμμαυτῆς, and the LXX. read Ἑμμούον for Παραν in xxx. 1.) With a usage of the word, which reminds us of the like adaptation of similar words in modern times, he, like Barzillai, is styled "very great," evidently from his wealth. His wealth, as might be expected from his abode, consisted chiefly of sheep and goats, which, as in Palestine at the time of the Christian era (Matt. xxv.), and at the present day (Stanley, S. I.), fed together. The tradition preserved in this case the exact number of each—3000 of the former, 1000 of the latter. It was the custom of the shepherds to drive them into the wild downs on the slopes of Carmel; and it was whilst they were on one of these pastoral excursions, that they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night, and never themselves committing any depredations (xxv. 7, 15, 16). Once a year there was a grand banquet, on Carmel, when they brought back their sheep from the wilderness for feasting— with eating and drinking "like the feast of a king." (xxv. 2, 4, 36).

It was on one of these occasions that Nabal came across the path of the man to whom he owes his place in history. Ten years were seen approaching the hill; in them the shepherds recognized the slaves or attendants of the chief of the freebooters who had defended them in the wilderness. To Nabal they were unknown. They approached him with a triple salutation—emurred the services of their master, and ended by claiming, with a mixture of courtesy and defiance, characteristic of the East, whatever came into thy hand for thy servants (I. xxv. omit this—and have only the next words), and for thy son David. The great sheep-master was not disposed to recognize this unexpected parental relation. He was a man notorious for his obstinacy (such seems the meaning of the word translated 'churlish') and for his general low conduct (xxv. 3, "evil in his dealings;" xvii. 17, "a man of Belial"). Josephus and the LXX. taking the word ἐκλογὴ not as a proper name, but as a quality (to which the context certainly lends itself) —and of a disposition like a dog—"cynical"—would have heard the demands of the ten petitioners, he sprang up (I. xxv. ἐκλογῆς, and broke out into fury, "Who is David? and who is the son of Jesse?" —"What runaway slaves are these to interfere with my own domestic arrangements?" (xx. 10, 11). "The moment that the messengers were gone, the shepherds that stood by perceived the danger that their master and themselves were in. They flew to Nabal himself; if they dared not speak (xxv. 17). But the sacred writer, with a tinge of the sentiment which such a contrast always suggests, proceeds to describe that this brutal ruffian was married to a wife as beautiful and as wise, as he was the reverse (xxv. 3). [ABGAIL.]

To her, as to the good angel of the household, one of the maxims of the book of Proverbs (29.25), and the offerings usual on such occasions (xxv. 18, comp. xxxi. 11, 2 Sam. xvi. 1, 1 Chr. xii. 40), loadeth the asses of Nabal's large establishment—herself mounted one of them, and, with her attendants running before her, rode down the hill toward David's encampment. David had already made the fatal vow of extermination, conched in the usual terms of destroying the household of Nabal, so as not even to leave a dog behind (xxv. 22). At this moment, as it would seem, Abigail appeared, threw herself on her face before him, and poured forth her petition in language which both in form and expression almost assumes the tone of poetry:—

"Let thine handmaid, I pray thee, speak in thine audience, and hear the words of thine handmaid. Her main argument rests on the description of her husband's character, which she draws with that mixture of playfulness and seriousness which above all things turns away wrath. His name here came in to his rescue. "As his name is, so is he: Nabal (fool is his name, and folly is with him") (xxv. 25; see also ver. 26). She returns with the news of David's reconciliation of his vow, Nabal is then regarded as "a man of the hills," at the height of his orgies. Like the revellers of Palestine in the later times of the monarchy, he had drunk to excess, and his wife dared not communicate to him either his danger or his escape (xxv. 36). At break of day she told him both. The stupid reveller was suddenly roused to a sense of that which impended over him. "His heart died within him, and he became as a stone." It was as if a stroke of apoplexy or paralysis had fallen upon him. Ten days he lingered, "and the Lord smote Nabal, and he died" (xxv. 37, 38). The suspicious entertained by theologians of the last century, that there was a conspiracy between David and Abigail to make away with Nabal for their own alliance (see "Nabal" in Winer's realit. ii. 129), have entirely given place to the better spirit of modern criticism, and it is one of the many proofs of the reverential, as well as truthful appreciation of the sacred narrative now inaugurated in Germany, that Ewalt enters fully into the feeling of the narrator, and closes his summary of Nabal's death, with the reflection that "it was not without justice regarded as a Divine judgment." According to the (not improbable) LXX. version of 2 Sam. iii. 33, the recollection of Nabal's death lived afterwards in David's memory to point the contrast of the death of Abner: "Did Abner as Nabal die?" (A. P. S.)

NABAOTH (Nabáoth [Vat.-per.]: Nun-baith). Apparently a corruption of Zechariah (1 Esdr. iv. 44; comp. Neh. viii. 4).

NABATHITES, THE: (or Nabáraon, and Nabáraon, and Nabáraan, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabáraon, and Nabároth). Another corruption of Zechariah (1 Esdr. iv. 44; comp. Neh. viii. 4).

NABATHIAS, THE (Habáthias, productions): Naabodín, victim of Ahah and Jezebel. He was a Jewess, and the owner of a small portion of land in the desert (2 K. ix. 25, 26) that lay on the eastern side of the city of Jerusalem. He had also a vineyard, of which the situation is not quite certain. According to the Hebrew text (1 K. xxi. 1) it was in Jericho, but the LXX. renders the whole clause differently, omitting the words "which was in
Jezreel," and reading instead of "the palace," the
threshold-floor of Ahab King of Samaria." This
pointed to the view, certainly most consistent with
the subsequent narrative, that Naboth's vineyard
was on the hill of Samaria, close to the "threshold-
floor" (the word translated in A. V. "void place")
which undoubtedly existed there, hard by the gate
of the city (1 K. xxiv. ). The royal palace of Ahab
was close upon the city wall at Jezreel. According
to both texts it immediately adjoined the vineyard
(1 K. xxi. 1, 2; Heb.; 1 K. xx. 2; LXX.; 2 K. ix.
30); and it thus became an object of obvious desira-
ble to the king, who offered an equivalent in money,
or another vineyard in exchange for this. Naboth,
in the independent spirit of a Jewish landholder, re-
 fused. Perhaps the turn of his expression implies
that his objection was mingles with a religious
scruple at forwarding the acquisitions of a half-
heathen king; "Jehovah forbid it to me that I
should give the inheritance of my fathers unto thee."
Ahab was cowed by this reply; but the proud spirit of Jezebel was roused. She and her
husband were apparently in the city of Samaria
(1 K. xxi. 18). She took the matter into her own
hands, and sent a warrant in Ahab's name and
dated with Ahab's seal, to the chieftains and nobles
of Jezreel, suggesting the mode of destroying the
vineyard and insuring the royal power. A solemn
fast was proclaimed as on the announcement of
some great calamity. Naboth was "set on high" in
the public place of Samaria: two men of worth-
less character accused him of having "curset God
and the king." He and his children (2 K. ix.
21), who else might have succeeded to his
father's inheritance, were dragged out of the city
and despatched the same night. ② The place of
execution, there, as at Hebron (2 Sam. iii.), was
by the large tank or reservoir, which still remains
on the slope of the hill of Samaria, immediately
outside the walls. The usual punishment for blas-
phemy was enforced. Naboth and his sons were
stoned; their mangled remains were devoured by
the dogs (and swine, LXX.) that prowled under
the walls; and the blood from their wounds ran
down into the waters of the tank below, which was
the common lathing-place of the prostitutes of the
city (comp. 1 K. xxi. 19, xxii. 38, LXX.). Jos-
ephus (Ant. viii. 15, § 6) makes the execution to
have been at Jezreel, where he also places the washing
of Ahab's chariot.
For the signal retribution taken on this judicial
murder — a remarkable proof of the high regard
paid in the old dispensation to the claims of justice
and independence — see Ath, Jere, Jeresel, Jezeel.

NAHALIEL

2052

NAHALIEL

been inferred (Rossmüller, in loco) that the brethren were in a state of intoxication when they committed the offense. The spiritual meaning of the injunction is drawn out at great length by Origen, Rom. vii. in Leuc. On this occasion, as if to mark more decidedly the divine displeasure with the offenders, Aaron and his surviving son were forbidden to go through the ordinary outward ceremonial of mourning for the dead.

2. [Rom. Vii. 4-5. Vat. Naḥā‘ēl. Naḥā‘ēl: Alex. Naβαλα.] King Jeroboam’s son, who succeeded to the throne of Israel n. c. 934, and reigned two years, 1 K. xv. 25-31. Gibbethon, in the territory of Dan (Jos. xix. 44), a Levitical town (Jos. xxi. 33), was at that time occupied by the Philistines, perhaps having been deserted by its lawful possessors in the general self-exile of the Levites from the polluted territory of Jeroboam. Nadab and all Israel went up and laid siege to this frontier-town. A preemptory bolt broke out in the midst of the camp, and the king was slain by Baasha, a man of Issachar. Ahijah’s prophecy (1 K. xiv. 10) was literally fulfilled by the murderer, who proceeded to destroy the whole house of Jeroboam. So perished the first Israelitish dynasty.

We are not told what events led to the siege of Gibbethon, or how it ended, or any other incident in Nadab’s short reign. It does not appear what ground Baasha and Newman have for describing the war with the Philistines as unsuccessful. It is remarkable that, when a similar destruction fell upon the family of the murderer Baasha twenty-four years afterwards, the Israelish army was again engaged in a siege of Gibbethon, 1 K. xvi. 15.

3. [Naḥā‘ēl.] A son of Shammai, 1 Chr. ii. 30, of the tribe of Judah.

4. [Vat. in 1 Chr. viii. 30. Aḥā‘ēl.] A son of Gibson [rather, of Jehiel], 1 Chr. viii. 30, ix. 36, of the tribe of Benjamin.

W. T. B.

NAHABATHA [Nababath; Rom.] Alex. Naβαβαθα: Syriac, Nababath; Nabaṭah: Moabite, a place from which the bride was being conducted by the children of Jabruri, when Joram and Naboth attacked them 1 Mac. i. 35, Josephus (Ant. xiii. 1, § 4) gives the name Nabababth. Jerome’s conjecture (in the Vulgate) can hardly be admitted, because Medeba was the city of the Jabrubites (see verses) to which the bride was being brought, not from which she came. That Nahabatha was on the coast of Jordan is most probable; for though, even to the time of the gospel narrative, by a “Chanaanites” to which the bride in this case belonged — is signified Phenicians, yet we have the authority (as such it is) of the Book of Judith (v. 3) for attaching that name especially to the people of Moab and Ammon; and it is not probable that when the whole country was in such disorder a wedding couple would travel for so great a distance as from Phenicia to Medeba.

On the east of Jordan the only two names that occur as possible are Kela — by Eusebius and Jerome written Naba and Nabán — and Nahabatha. Compare the lists of places round 6 SaL to Robinson, 1st ed. iii. 167-70.

NAGGIE (Nagā‘ah), or, as some MSS. read, Na‘ayah, one of the ancestors of Christ (Luke ii. 25). It represents the Heb. נגֹּהַ, Nᵉᵉᵉ (Naŋa‘; 1 Xx.), which was the name of one of David’s sons, as we read in 1 Chr. iii. 7. Nage must have lived about the time of Osnias I. and the commencement of the Macedonian dynasty. It is interesting to notice the evidence afforded by this name, both as a name in the family of David, and from its meaning, that, amidst the revolutions and conquests which overthrew the kingdoms of the nations, the house of David still cherished the hope, founded upon promise, of the revival of the splendor (nagak) of their kingdom. A. C. H.

NAHALAL [Naijahal; parh. present: Σαλιάδ; Alex. Naβαλα.] Naḥalal, one of the cities of Zebulun, given with its “subsidiary” to the Merarite Levites (Josh. xxxii. 35). It is the same which in the list of the allotment of Zebulun (Josh. xix. 13) is inaccurately given in the A. V. as Naḥala, the Hebrew being in both cases identical. Elsewhere it is called Naḥalān. It occurs in the list between Kattath and Shimron, but unfortunately neither of these places has yet been recognized. The Jerusalem Talmud, however (Megillah, ch. 1), M. T. Naḥal/Naḥal, as quoted by Schwarz (172), and Josephus (Wars, V. 717), asserts that Nahalal (or Mahalal, as it is in some copies) was in post-biblical times called Mahla; and this Schneid identifies with the modern Mahal, a village in the plain of Esdraelon under the mountains which inclose the plain on the north, 4 miles west of Nazareth, and 2 of Japhin; an identification concurred in by Van de Velde (Mémorial). One Hebrew MS. (30 K.) lends countenance to it by reading נִהלל, i. e., Mahalal, in Josh. xxxii. 35. If the town was in the great plain we can understand why the Israelites were unable to drive out the Canaanites from it, since their chariots must have been extremely formidable as long as they remained on level or smooth ground.

NAHALAL (Naijahal; parh. present: Σαλιάδ; Alex. Naβαλα.] Naḥalal, an inaccurate mode of spelling, in Josh. xix. 13, the name which in Josh. xxxii. 35, is accurately given as Naḥalal. The original is precisely the same in both.

NAHALIEL (Naijahal; parh. present: τωρτναττίκαλ, to render [or valley] of God; Samar. диαδικατाल; [Vat.] Ma‘an; Rom.] Alex. Naβαλίλι: Naḥalile, one of the ruling tribes of Israel in the latter part of their prosperity to Cæsar (Num. xxii. 19). It lay “beyond,” that is, north of the Arnon (ver. 13), and between Mâtanah and Ramoth, the next after Rainham being Becheth. It does not occur in the catalogue of Num. xxii., nor anywhere besides the passage quoted above. By Eusebius and Jerome (Comment, “Naḥalile”) it is mentioned as close to the Arnon. Its name seems to imply that it was a stream of water, and it is not impermissibly preserved in that of the Wady Enchele, which runs into the Moab, the ancient Arnon, a short distance to the east of the place at which the road between Rabah and Arner crosses the ravine of the latter river. The name Enchale, when written in Hebrew letters נ슉ל, is little more than נשקול, transposed. Buxtorf was perhaps the first to report this name, but he suggests the Wady Wala as the Nahalile (Synec., July 14). This, however, seems unnecessarily far to the north, and, in addition, it retains no likeness to the original name.
pate with and assist him. The particulars of the service are not related in the Bible, but the Jewish traditions affirm that it consisted in his having afforded protection to one of David's brothers, who escaped alone when his family were massacred by the treacherous king of Moab, to whose care they had been entrusted by David (1 Sam. xxii. 3, 4), and who found an asylum with Nahash. See the Monograph of R. Fanchum, as quoted by Sardony on 2 Sam. x. 2.)

The retribution exacted by David for the annoying insults of Nahash is related elsewhere. [DAVID, vol. i. 561 b; JOAH, vol. ii. 1395 b; ULSH.]

One casual notice remains which seems to imply that the ancient kindness which had existed between David and the family of Nahash had not been extinguished even by the horrors of the Ammonite war. When David was driven to Mahanaim, into the very neighborhood of Jabesh-Gilead, we find "Shobi the son of Nahash of Rabbah of the Bene-Amnon." (2 Sam. xvii. 27) among the great chiefs who were so far forth to pour at the feet of the fallen monarch the abundance of their pastoral wealth, and that not with the grudging spirit of tributaries, but rather with the sympathy and friendship of friends, "as he said, the people is hungry and weary and thirsty in the wilderness." (ver. 29.)

2. (Nahash.) A person mentioned once only (3 Sam. xxvii. 25) in stating the parentage of Amasa, the commander-in-chief of Absalom's army. Amasa is there said to have been the son of a certain Ithra, by Abigail, "daughter of Nahash, and sister to Zeruiah." By the genealogy of 1 Chr. ii. 16 it appears that Zeruiah and Abigail were sisters of David and the other children of Jesse. The question then arises, How could Abigail have been at the same time daughter of Nahash and sister to the children of Jesse? To this three answers may be given:—

1. The universal tradition of the Rabbis that Nahash and Jesse were identical. "Nahash," says Solomon Jarchi (in his commentary on 2 Sam. xvii. 25), "was Jesse the father of David, because he died without sin, by the counsel of the serpent (machtash); i.e. by the infirmity of his fallen human nature only. It must be owned that it is easier to allow the identity of the two than to accept the reason thus assigned for it.

2. The explanation first put forth by Professor Stanley in this work (vol. i. 534 a), that Nahash was the brother of the Ammonites, and that the same woman had first been his wife or concubine—in which capacity she had given birth to Abigail and Zeruiah—and afterwards wife to Jesse, and the mother of his children. In this manner Abigail and Zeruiah would be sisters toDavid, without being at the same time daughters of Jesse. This has in its favor the guarded statement of 1 Chr. ii. 16, that the two women were not themselves Jesse's children, but sisters of his children; and the impracticability (otherwise extreme) of so close a connection between an Israelite and an Ammonite king is alleviated by Jesse's known descent from a Moabite, and by the connection which has been shown above to have existed between David and Nahash of Ammon.

3. The Alex. LXX regards Nahash as brother of Zeruiah—θείορεσσα Ναας αδελθον Σαρονας.

4. See the extract from the Targum on Ruth iv. 22 given in the note to REX (vo. p. 134 a.) A few of the precise citations from the Talmud in Meyer, Sefer Olam, 594; also Jerome, Quast. Hebr. ad loc.
NAHATH

3. A third possible explanation is that Nahash was the name not of Jesse, nor of a former husband of his wife, but of his wife herself. There is nothing in the name to prevent its being borne equally by either sex, and other instances may be quoted of women who are given in the genealogies as the daughters, not of their fathers, but of their mothers: e. g. Mehetabel, daughter of Maitred, daughter of Mezahab. Still it seems very improbable that Jesse’s wife would be suddenly intruded into the narrative, as she is if this hypothesis be adopted.

NAHOR

3. (Nahor [Vat. Maroth]). A Levite in the reign of Hezekiah, who with others was overseer of the titles and dedicated things under Cononiah and Shimri (2 Chr. xxxi. 13).

NAHOR (Nahor) [see NACHOR]: Nahor. Joseph. Nahoreph: 4 Nahor, and Nnoch) the name of two persons in the family of Abraham.

1. His grandfather: the son of Serug and father of Terah (Gen. xi. 22—25; [1 Chr. i. 26]). He is mentioned in the genealogy of our Lord, Luke iii. 34, though there is the name is given in the A. V. in the Greek form of NACHOR.

2. Grandson of the preceding, son of Terah and brother of Abraham and Haran (Gen. xi. 26, 27). The members of the family are brought together in the following genealogy:

<table>
<thead>
<tr>
<th>Terah</th>
</tr>
</thead>
<tbody>
<tr>
<td>Abraham</td>

It has been already remarked, under Lor (vol. li. p. 1083 note), that the order of the ages of the family of Terah is not improbably inverted in the northerlies Nahor is not his youngest, even than Abraham, was really elder. He married Milcah, the daughter of his brother Haran; and when Abraham and Lot migrated to Canaan, Nahor remained behind in the land of his birth, on the eastern side of the Euphrates—the boundary between the Old and the New World of that early age—and gathered his family around him at the sepulchre of his father. (Comp. 2 Sam. xix. 37.)

Like Jacob, and also like Ishmael, Nahor was the father of twelve sons, and further, as in the case of Jacob, eight of them were the children of his wife, and four of a concubine (Gen. xxii. 21—24).

Special care is taken in speaking of the legitimate branch to specify its descent from Milcah, the son of Milcah, which bore unto Nahor. It was to this pure and unadulterated race that Abraham and Rebekah in turn had recourse for wives for their sons. But with Jacob’s flight from Haran, the intercourse ceased. The heap of stones which he and “Lavan the Syriam” erected on Mount Gilead (Gen. xxxi. 46) may be said to have formed at once the tomb of their past connection and the barrier against its continuance. Even at that time a wide variation had taken place in their language (ver. 47), and not only in their language, but, as it would seem, in the object of their worship. The “God of Nahor” appears as a distinct divinity.

a This is the form given in the Benešov edition of Jerome’s Neubuchah Tovma. The other is found in the ordinary copies of the Vulgate.

b The statements of Gen. xi. 27—32 appear to imply that Nahor did not advance from Ur to Haran at the same time with Terah, Abraham, and Lot, but remained there till a later date. Coupling this with the statement of Judith x. 8, and the universal tradition of the Exod, that Terah’s departure from Ur was a relinquishment of false worship, an additional force is given to the mention of twin-titl of Nahor (Gen. xxxi. 23) as distinct from the God of Abraham’s descendants. Two generations later Nahor’s family were certainly living at Jerboa (Gen. xxviii. 10, xxix. 4).
NAHSHON, or NAASHON (נַעְשׁוֹן)

[encomender, Gen.:] NAASHEW, I.XX. and N. T.: Nahashon, O. T.; Naasow, N. T.), son of Amminadab, and prince of the children of Judah (as he is styled in the genealogy of Judah, 1 Chr. ii. 10) at the time of the first numbering in the wilderness (Exod. vi. 29; Num. i. 7, &c.). His sister, Elisheba, was wife to Aaron, and his son, Salomon, was husband to Rahab after the taking of Jericho. From Elisheba being described as "sister of Nahshon" we may infer that he was a person of considerable note and dignity, which his being appointed as one of the twelve princes who assisted Moses and Aaron in taking the census, and who were all "renowned of the congregation . . . heads of thousands in Israel," shows him to have been. No less conspicuous for high rank and position does he appear in Num. ii. 3, vii. 12, x. 14, where, in the encampment, in the offerings of the princes, and in the order of march, the first place is assigned to Nahshon the son of Amminadab as captain of the host of Judah. Indeed, on these three last-named occasions he appears as the first man in the state next to Moses and Aaron, whereas at the census he comes after the chiefs of the tribes of Reuben and Simeon. a Nahshon died in the wilderness according to Num. xxvi. 64, 65, but no further particulars of his life are given. In the N. T. he occurs twice, namely, in Matt. i. 4 and Luke iii. 32, in the genealogy of Christ, where his lineages in the preceding and following descents are exactly the same as in Ruth iv. 18-20; 1 Chr. ii. 10-12, which makes it quite certain that he was the sixth in descent from Judah, inclusive, and that David was the fifth generation after him. [AMMINADAB].

A. C. H.

NAHUM (נהם) [connotation: Naḥa[h: Nahum]. "The book of the vision of Nahum the Elkoshite" stands seventh in order among the writings of the minor prophets in the present arrangement of the canon. Of the author himself we have no more knowledge than is afforded us by the scanty title of his book, which gives no indication whatever of his date, and leaves his origin obscure. The site of Elkosh, his native place, is disputed, some placing it in Galilee, with Jerome, who was shown the ruins by his guide; others in Assyria, where the tomb of the prophet is still visited as a sacred place, by Jews from all parts of the country. The Church of Tudea (p. 53, Heb. text, ed. Asher) thus briefly alludes to it: "And in the city of Assur (Mo-sul) is the synagogue of Obadiah, and the synagogue of Joash the son of Amittai, and the synagogue of Nahum the Elkoshite." [Elkosh.]

Those who maintain the latter view assume that the prophet's parents, like some of the other minor prophets, were carried into captivity by the Assyrians, were married there, and planted, with other exile colonists, in the province of Assyria, the modern Kurdistan, and that the prophet was born at the village of Elkosh, on the east bank of the Tigris, two miles north of Mosul. Ewald is of opinion that the prophecy was written there at a time when Nineveh was threatened from without. Against this it may be urged that it does not appear that the exiles were carried into the province of Assyria proper, but into the newly-conquered districts, such as Mesopotamia, Babylonia, or Medea. The arguments in favor of an Assyrian locality for the prophet are supported by the occurrence of what are presumed to be Assyrian words: הָעֲמָדָה, iii. 17; and the strange form הַעָמָדָה in ii. 13 (Heb. 14), which is supposed to indicate a foreign influence. In addition to this is the internal evidence supplied by the vivid description of Nineveh, of whose splendors it is contended Nahum must have been an eye-witness; but Hitzei justly observes that these descriptions display merely a lively imagination, and such knowledge of a renowned city as might be possessed by any one in Anterior Asia. The Assyrian warriors were no strangers in Palestine, and that there was sufficient intercourse between the two countries is rendered probable by the history of the prophet Joash. There is nothing in the prophecy of Nahum to indicate that it was written in the immediate neighborhood of Nineveh, and in full view of the scenes which are depicted, nor is the language that of an exile in an enemy's country. No allusion is made to the captivity; while, on the other hand, the imagery is such as would be natural to an inhabitant of Palestine (1. 4) to whom the rich pastures of Bashan, the vineyards of Carmel, and the blossoms of Lebanon, were emblems of all that was luxuriant and fertile. The language employed in i. 15, ii. 2, is appropriate to one who wrote for his countrymen in their native land. b In fact, the sole origin of the theory that Nahum flourished in Assyria is the name of the village Elkosh, which contains his supposed tomb, and from its similarity to Elkosh was apparently selected by medieval tradition as a shrine for pilgrims, with as little probability to recommend it as exists in the case of Obadiah and Jephthah, whose burial-places are still shown in the same neighborhood. This supposition is more reasonable than another which has been adopted in order to account for the existence of Nahum's tomb at a place, the name of which so closely resembles that of his native town. Elkosh, it is suggested, was founded by the Israelitish exiles, and so named by them in memory of Elkosh in their own country. Tradition, as usual, has usurped the province of history. According to Pseudo-Epiphanius (De Vitis chunm or Nahum, close on Chinnereth, and 2) English miles N. of Tiberias. "They point out there the graves of Nahum the prophet, of Rabbi Tanchum and Tsal- chuma, who all repose there, and through these the ancient position of the village is easily known."
Nahum was the tribe of Simeon, "from Eleasar beyond the Jordan at the beginning of Pharaoh's border" (Num. 26:36). Josue's son, Yosef son of Byrrah (Emr. p. 247), or Yosef Hanbalah, where he died in peace and received a royal burial. In the Roman martyrlogy the 1st of December is consecrated to his memory.

The date of Nahum's prophecy can be determined with as little precision as his birthplace. In the Seder Olam Rabbah (p. 55, ed. Meyer) he is made contemporary with Joel and Habakkuk in the reign of Manasseh. According to (4 Chron. 33:1-21 d) he places him with Hosen, Amos, and Jonah in the reign of Josiah king of Israel, more than a century earlier; while, according to Euthynius (Aen. p. 292), he was contemporary with Haggai, Zechariah, and Malachi, and prophesied in the fifth year after the destruction of Jerusalem. Josephus (Ant. ix. 11, § 3) mentions him as living in the latter part of the reign of Josiah: "about this time was a certain prophet, Nahum by name; who, prophesying concerning the downfall of Assyrians and of Nineveh, said thus," etc.; to which he adds, "and all that was foretold concerning Nineveh came to pass after 115 years." From this Carvajal concluded that Nahum prophesied in the beginning of the reign of Ahaz, about B.C. 742. Modern writers are divided in their opinions. Belzhold thinks it probable that the prophecy escaped into Judah when the ten tribes were carried captive, and wrote in the reign of Hezekiah. Keil (Lamb. d. Fifth in d. A. T.) places him in the latter half of Hezekiah's reign, after the invasion of Sennacherib. Vitringa (Typ. Doct. proph. p. 37) was of the like opinion, and the same view is taken by De Wette (Lamb. p. 328), who suggests that the rebellion of Upper Egypt against the Assyrians (u. c. 718), and the election of their own king in the person of Doëces, may have been present in the prophet's mind. But the history of Doëces and his very existence are now generally believed to be mythical. This period also is adopted by Knobel (Prophec. ii. 249, &c.) as the date of the prophecy. He was guided to his conclusion by the same supposed facts, and the destruction of Nineveh, which he believed was effected by the Assyrian monarch Sargon (u. c. 717-715), and is referred to by Nahum (iii. 8) as a recent event. In this case the prophet would be a younger contemporary of Isaiah (comp. Is. xx. 1). Ewald, again, conceives that the siege of Nineveh by the Median king Phraortes (u. c. 690-685), may have suggested Nahum's prophecy of its destruction. The existence of Phraortes, at the period to which he is assigned, is now believed to be an anachronism. [MENDES,] Janius and Tremellius select the last years of Josiah as the period at which Nahum prophesied, but at this time not Nineveh but Babylon was the object of alarm to the Hebrews. The arguments by which Struck (Nahum de Nineviteen Predigt. p. 6, § 2) endeavors to prove that the prophecy belongs to the time at which Manasseh was in captivity at Babylon, that is between the years 689 and 685 B.C., are not convincing. Assuming that the position which Nahum occupies in the canon between Nahum and Habakkuk supplies, as the limits of his prophetic career, the reigns of Manasseh and Josiah, he endeavors to show from certain apparent resemblances to the writings of the older prophets, Joel, Jonah, and Isaiah, that Nahum must have been familiar with their writings, and consequently later in point of time than any of them. But a careful examination of the passages by which this argument is maintained, will show that the phrases and turns of expression upon which the resemblance is supposed to rest, are in no way remarkable or peculiar, and teristic, and might have been freely used by any one familiar with oriental metaphor and imagery, without incurring the charge of plagiarism. Two exceptions are Nah. ii. 10, where a striking expression is used which only occurs besides in Joel ii. 6, and Nah. i. 15 (Heb. ii. 1), the first clause of which is nearly worded the same as that of Is. iii. 7. But these passages, by their very peculiarity, would equally prove that Nahum was anterior both to Joel and Isaiah, and that his dictation was copied by them. Other references which are supposed to indicate imitations of older writers, or, at least, familiarity with their writings, are Nah. i. 3 compared with Jon. iv. 2; Nah. i. 13 with Is. x. 27; Nah. iii. 10 with Is. x. 18; Nah. ii. 2 [1] with Is. xxiv. 1; Nah. iii. 5 with Is. xxvii. 2; and Nah. iii. 7 with Is. ii. 19. For the purpose of showing that Nahum preceded Jeremiah, Strauss quotes other passages in which the latter prophet is believed to have had in his mind expressions of his predecessor with which he was familiar. The most striking of these are Jer. x. 19 compared with Nah. ii. 19; Jer. ii. 28 with Nah. iii. 5; Jer. i. 57, 58 with Nah. iii. 13, 16, which, according to the same commentator to be peculiar to the times of Isaiah, are appealed to by him as evidences of the date of the prophecy. But the only examples which he quotes prove nothing: יִתְנַחַם אֶל יִשְׂרָאֵל (Nah. i. 8, A. V. a "fool", occurs in Job, the Psalms, and in Proverbs, but not once in Isaiah; and יַעֲנַ-but, יַעֲנַ (Nah. ii. 1 [2], A. V. "nummion ") is found only once in Isaiah, though it occurs frequently in the Chronicles, and is not a word likely to be uncommon or peculiar, so that nothing can be inferred from it. Besides, all this would be as appropriate to the times of Hezekiah as to those of Manasseh. That the prophecy was written before the final downfall of Nineveh, and its capture by the Medes and Chaldeans (err. u. c. 625), will be admitted. The allusions to the Assyrian power imply that it was still unbroken (Is. l. 12, 13), li. 11, 12, 13, 14, etc. The glory of the kingdom was at its brightest in the reign of Esarhaddon (u. c. 680-660), who for 13 years made Babylon the seat of empire, and this fact would incline us to fix the date of Nahum rather in the reign of his father Sennacherib, for Nineveh alone is contemplated in the destruction threatened to the Assyrian power, and not hint is given that its importance in the kingdom was diminished, as it necessarily would be, by the establishment of another capital. That Pule-same was suffering from the effects of Assyrian invasion at the time of Nahum's writing seems probable from the allusions in i. 11, 12, 13, ii. 2; and the vivid description of the Assyrian armament in ii. 2, 4. At the expression of the prophecy would be appropriate, and if i. 14 refers to the death of Sennacherib in the house of Nineveh, it must have been written before that event. The capture of No Ammon, or Thebes, has not been identified with anything like certainty. It is referred to as of recent occurrence, and it has been conjectured with probability that it was sacked by Sargon in the invasion of Egypt allied to in. xx. 14. These circumstances seem to determine the 14th year of Hezekiah (u. c. 712),
as the period before which the prophecy of Nahum could not have been written. The condition of Assyria in the reign of Sennacherib would correspond with the state of things implied in the prophecy; and it is on all accounts most probable that Nahum flourished later than the reign of Hezekiah, and wrote his prophecy soon after the date above mentioned, either in Jerusalem or its neighborhood, where the echo still lingered of *"the rattling of the wheels, and of the prancing horses, and of the drinking chariots"* of the Assyrian host, and *"the flame of the sword and lightning of the spear"* still flashed in the memory of the beholders of "Nineveh."

The subject of the prophecy is, in accordance with the superscription, *"the burden of Nineveh."* The three chapters into which it is divided form a consecutive whole. The first chapter is introductory. It commences with a declaration of the character of Jehovah, *"a God jealous and avenging,"* as exhibited in his dealings with his enemies, and their consequent destruction. He pursues them (i. 2-4), while those to trust in Him He is *"good, a stronghold in the day of trouble"* (i. 7), in contrast with the overwhelming flood which shall sweep away his foes (i. 8). The language of the prophet now becomes more special, and points to the destruction which awaited the hosts of Assyria who had just gone up out of Judah (i. 9-11). In the verses that follow the intention of Jehovah is still more fully declared, and addressed first to Judah (i. 12, 13), and then to the monarch of Assyria (i. 14). And now the vision grows more distinct. The messenger of glad tidings, the news of Nineveh's downfall, trod the mountains that were round about Jerusalem (i. 15), and proclaimed to Judah the accomplishment of her vows. But round the doomed city gathered the destroying armies—"the breaker in pieces" had gone up, and Jehovah mustered his hosts to the battle to avenge his people (ii. 1, 2). The prophet's mind in vision sees the burnished bronze shields of the scarlet-clad warriors of the besieging army, the flashing steel scythes of their war-chariots as they are drawn up in battle-array, and the quivering cypress-shafts of their spears (ii. 3). The Assyrians hasten to the defense; their chariots rush madly through the streets, and run to and fro like the lightning in the broad ways, which glare with their bright armor like torches. But a panic has seized their mighty ones; their ranks are broken as they march, and they hurry to the wall only to see the covered battering-rams of the besiegers ready for the attack (ii. 4, 5). The crisis hastens on with terrible rapidity. The river-gates are broken in, and the royal palace is in the hands of the victors (ii. 6). And then comes the end; the city is taken and carried captive, and her maidens *"asnoon as with the voice of doves,"* beating their breasts with sorrow (ii. 7). The flight becomes general, and the leaders in vain endeavor to stem the torrent of fugitives (ii. 8). The wealth of the city and its accumulated treasures become the spoil of the captors, and the conqueror subdues all that follow the assault and storm (ii. 9, 10). Over the charred and blackened ruins the prophet, as the mouthpiece of Jehovah, exclaims in triumph, *"Where is the haire of the lions, the feeding place of the young lions, where walked lion, lions, lion's whelp, and none made (them) afraid?"* (ii. 11, 12). But for all this the downfall of Nineveh was certain, for *"behold! I am against thee, saith Jehovah of Hosts"* (ii. 13). The vision ends, and the prophet, recalled from the scenes of the future to the realities of the present, collects himself, as it were, for one final outburst of withering denunciation against the Assyrian city, not now threatened by her Medumian Diat and Chaldean conquerors, but in the full tide of prosperity, the oppressor and corrupter of nations. Mingled with this woe there is no touch of sadness or compassion for her fate; she will fall unpitied and unlamented, and with terrible calmness the prophet pronounces her final doom: *"all that hear the bruit of thee shall clap the hands over thee: for upon whom hath not thy wickedness passed?"* (ii. 19).

As a poet, Nahum occupies a high place in the first rank of Hebrew literature. In proof of this it is only necessary to refer to the opening verses of his prophecy (i. 2-6), and to the magnificent description of the siege and destruction of Nineveh in ch. ii. His style is clear and uninvolved, though pregnant and forcible; his diction sonorous and pathetic; his words reechoing in alliteration; his sense (comp. ii. 4, iii. 3). Some words and forms of words are almost peculiar to himself; as, for example, רִמּוֹן for רָּמֹון, in i. 3, occurs only besides in Job ix. 17; פָּדְנָה for פִּדְנָה, in i. 2, is found only in Josh. xiv. 19; רָעִים, ii. 9 [10], is found in Job xxiii. 3, and there not in the same sense: מִּרְיָם, in ii. 2, is only found in Jdg. v. 22; פָּדְנָה and פָּדְנָה, iii. 4 [4], לְהַרְעִים, ii. 7 [8], רָעִים and רָּמֹון, iii. 10 [11], מִּרְיָם, iii. 17, and רָעִים, iii. 19, do not occur elsewhere. The unusual form of the pronominal suffix in מִּרְיָם, in iii. 14 [14], מִרְיָם for מִּרְיָם, iii. 18, are peculiar to Nahum; מִּרְיָם, iii. 5, is only found in 1 K. vii. 36; מִּרְיָם, iii. 17, occurs besides only in Am. vii. 1; and the foreign word מִּרְיָם, iii. 17, in the slightly different form מַרְיָם, is found only in Jer. ii. 27.

For illustrations of Nahum's prophecy, see the article NINEVEH.

W. A. W.

* For the general writers on the Minor Prophets see the addition of Micah (Amer. ed.). Part xiv. of Lange's *Biblische Lexikon des A. Test.* by Dr. Paul Keilert (1868) includes Nahum. It furnishes a new translation of the text, instead of adhering to that of Luther. Among the special writers on this prophet are Bliicher, *Prophezei Vok. juxta veritatem Hebr.* (1534); Alberic, *Comment in Nah.* (1673); J. K. G. Wahl, *Vorträge.* (Hob. et al.); Meder, *Vorträge.* (Hob. et al.); Keilert (1820); Hoebelmann, *Nahum.* (1842); and O. Strauss, *Nahum.* (1853). There is a "Translation of the Prophecy of Nahum with Notes." by Prof. B. B. Foerster, in *the Bibliothek der neueren Zeitschriften.* (1858). It is a fine example of exact Biblical exegesis. Recent explorations in the East have given fresh interest to the study of Nahum. Among the works which illustrate the connections of the book with Assyrian and Babylonian history in addition to the commentaries, are M. von Niebuhr's *geschichte Assur's u. Babylon's* (1857); O. Strauss, *Nahum u. das Wort Gottes* (1858); Layard, *Nahum u.
us Remains: Vance Smith, The Prophecies relating to Nineveh and the Assyrians (London, 1857): Rawlinson, Ancient Monarchies, vol. 1. See the egregious list of works in German, French, and English, relating to the fall of Nineveh in Lange’s Babylon (p. 100) as above. Nineveh, which disappeared so suddenly after its d. om was pronounced by the prophet, may almost be said to stand before us again in the light of the remains restored to us by modern discoveries. The articles on Nahum by Winer in his Bibl. Rhet. by Nötsch in Herzog’s Real-Encyk., and by Wunderlich in Zeller’s Bibl. Wörterb., should not be overlooked. In connection with the view that Nahum lived in Assyria, Luck (Ed. in v. A. T. p. 544) agrees with those who decide that the prophet was not only born in Palestine, but wrote the book which bears his name in Jerusalem or the vicinity (i. 12 f. [Elkosh. Amer. ed.])

The book of Nahum contains nothing strictly Messianic. It is important as a source of permanent instruction because it illustrates so signally the law of retribution according to which God deals with nations, and the fidelity with which He fulfills his promises and threatens to the righteous or the wicked.

NAIDUS (Nabos: Alex. Nabados: Romans) = BENAIAM, of the sons of Pahath Moab (1 Esdr. ix. 31; comp. Ezr. x. 30).

NAIL. 1. (of finger).—1. A nail or claw of man or animal. 2. A point or style, e. g. for writing: see Jer. xviii. 11. "TxyJyvres occurs in 1

Deut. xxi. 12, in connection with the verb, 34TIV, "to make," here rendered aXeXov, ce, circumsic, A. V. "cure," but in marg. "dress," "suffer to grow." Gesenius explains "make neat."

Much controversy has arisen on the meaning of this passage: one set of interpreters, including Josephus and Philo, regarding the action as indicative of mourning, while others refer it to the deposition of mourning. Some, who would thus belong to the latter class, refer it to the practice of staining the nails with henna.

The word •••••, "make," is used both of "dressing," i. e. making clean the feet, and of "trimming," i. e. combing and making neat the beard, in the case of Mephibosheth, 2 Sam. xix. 24. In some cases, therefore, on the whole to mean "make suitable" to the particular purpose intended, whatever that may be: unless, as Gesenius thinks, the passage refers to the completion of the female captive’s month of seclusion, purpose that is evidently one of mourning—a month’s mourning interpolated for the purpose of preventing on the one hand too hasty an approach on the part of the captor, and on the other too sudden a shock to natural living in the captive. Following this line of interpretation, the command will stand thus: The captive is to lay aside the "rainment of her captivity," namely, her ordinary dress in which she had been taken captive, and she is to remain in mourning retire-

ment for a month: with hair shortened and nails made suitable to the same purpose, thus presenting an appearance of woe to which the nails trimmed and shortened hair would seem each in their way most suitable (see Jer. i. 20).

If, on the other hand, we suppose that the shaving the head, etc., indicate the time of retirement completed, we must suppose also a sort of Nazaritic initiation into her new condition, a supposition for which there is elsewhere no warrant in the Law, besides the fact that the "making," whether purifying the nails or letting them grow, is nowhere mentioned as a Nazaritic ceremony, and also that the shaving of the head at the end of the month would seem an altogether unsuitable introduction to the condition of a bride.

We conclude, therefore, that the captive’s head was shaved at the commencement of the month, and that during that period her nails were to be allowed to grow in token of natural sorrow and consequent personal neglect.

II.—14 A nail (Is. xli. 7), a stak (Is. xxxiii. 20), also a tent-peg. Tent pegs are usually of wood and of large size, but sometimes, as was the case with those used to fasten the curtains of the Tabernacle, of metal (Ex. xxvii. 19, xxxviii. 20; see Lightfoot, Spicil. in Ex. § 42; Joseph. Ant. v. 5, 4). [Jae., Text.]

24 A nail, primarily a point. If we are told that David prepared iron for the nails to be used in the Temple; and as the hole of holies was plated with gold, the nails also for fastening the plates were probably of gold. Their weight is said to have been 50 shekels, = 25 ounces, a weight obviously so much too small, unless mere gibbering be supposed, for the total weight required, that LXX. and Vulg. render it as expressing that of each nail, which is equally excessive. To remedy this difficulty Theocritus suggests reading 500 for 50 shekels (1 Chr. xxli. 5: 2 Chr. iii. 9; Tetirchon, in Chronicles, in Kurygev Hancl.). On “nails” in Eccl. xii. 11, see Master, Amer. ed.]

"Nail,” Vulg. paws, is the rendering of παρακόσας in Ecclus. xxvii. 2. In N. T. we have ἐκκοός and παρακοσία in speaking of the nails of the cross (John xx. 25; Col. ii. 14). [See addition to Crucifixion.]

II. W. P.

NAIIN (Naín [either from ἄκορη, posture, or ἄκορη, grasenessfulness: Naím]). There are no materials for a long history or a detailed description of this village of Galilee, the gate of which is made illustrations by the raising of the widow’s son (Luke

1 Clav. sull to Arab. 304.
But two points connected with it are of extreme interest to the Biblical student. The site of the village is certainly known; and there can be no doubt as to the approach by which our Saviour was coming when He met the funeral. The modern Nein is situated on the north-western edge of the "Little Hermion," or Jebel Elbab, where the ground falls into the plain of Esdraelon. Nor has the name ever been forgotten. The crusaders knew it, and Eusebius and Jerome mention it in its right connection with the neighborhood of Endor. Again, the entrance to the place must probably always have been up the steep ascent from the plain; and here, on the west side of the valley, the rock is full of sepulchral caves. It appears also that there are similar caves on the east side.

* Nain is distinctly visible from the top of Tabor across an intervening branch of the plain of Esdraelon. It is but a few miles distant from Nazareth. Shunem and Endor are in the neighborhood. The present name (though variously written by travelers) is the identical ancient name. Mr. Tristram (*Land of Israel*, p. 130) speaks of a fountain here, which explains why the place has been so long inhabited. Thomson states (*Land and Book*, ii. 158) that the tombs are chiefly on the east of the village, and not on the west (see above). On the miracle of restoring to life the son of the widow at Nain (Luke vii. 11-15), see Trench on *Miracles*, p. 226. The custom of carrying the dead for interment outside of the cities and villages is, still, as on that occasion, almost universal in Palestine.

Whether we understand "hier" or "coffin" to be meant by *upods* in the narrative, is immaterial to its accuracy. Present usages show that the body in either case was not so confined as to make it impossible for the "young man" to rise and sit up at the command of Christ. [KOPF, *Amer. ed.*] The writer has witnessed funeral processions in Greece in which the upper side of the coffin was left entirely open, and the lid carried before the corpse until the procession reached the grave (see *Illustr. of Scripture*, p. 120).

**NAIOTH (נאות),** according to the Keri or corrected text of the Masoretes, which is followed by the A. V., but in the *Cedib* or original text it is *Naioth* (נאות). [Rom. Naath Th.] Naioth: Alex. Naioth: Naiothe, or more fully, *Naioth in Ramah,* a place in which Samuel and David took refuge together, after the latter had made his escape from the jealous fury of Saul (1 Sam. xix. 18, 19, 22, 23, xx. 1). It is evident from ver. 18, that Naioth was not actually in Ramah, Samuel's habitual residence, though from the affix it must have been near it (Ewab, iii. 60). In its corrected form (Keri) the name signifies "habitation," and from an early date has been interpreted to mean the huts or dwellings of a school or college of prophets over which Samuel presided, as Elisha did over those at Gilgal and Jericho.

This interpretation was unknown to Josephus who gives the name *Paukalol,* to the translators of the LXX. and the Peshito-Syrinx (*Jonanth*), and to Jerome. It appears first in the Targum-Jonathan, where for Naioth we find throughout "Paukalol "the house of instruction," the term which appears in later times to have been regularly applied to the schools of the Rabbis (Buxtorf, *Lex Talm. 106*) — and where ver. 20 is rendered, "and they saw the company of scribes singing praises, and Samuel teaching, standing over them," thus introducing the idea of Samuel as a teacher. This interpretation of Naioth is now generally accepted by the lexicographers and commentators.

* NAKED. [Dress, vol. i. p. 620 b.]

**NAMES, BIBLICAL: THEIR ORIGIN AND SIGNIFICANCE.** Names are archæological monuments. Especially is this true of those presented to us in the primitive languages of mankind. Originally given for the purpose of distinguishing different objects or of indicating the significance which those objects possessed for the name-giver, they connote and perpetuate the conceptions, feelings, and modes of thought of their originators. It is on this account that their study is at once so fascinating and of such real utility. It is the study of the thought-foils of mankind.

The two principal cautions to be given to the student of names, are, first, to guard against false etymologies, and secondly, to beware of mystical or merely fanciful interpretations. A recent English writer has wittily illustrated the first danger by saying, that the tyro must not think he has discovered a wonderful fitness in the denomination of the metropolitan residence of the English primate, Lambeth, because *forsooth* *Lona* is a Mongolian word for "Chief Priest," and *Beck* the Hebrew term for "house"; since, if the truth must be told, the term Lambeth is derived from an Anglo-Saxon compound, signifying the "muddy landing place"! An equally striking exemplification of the second liability is furnished us by a recent American writer in this department, Mr. W. Arthur. In his work on the "Derivation of Family Names" (N. Y. 1857) we find an old Christian-rabbinical idea thus rehabilitated: "The signification of the Hebrew names recorded in the fifth chapter of Genesis, when arranged in order, present an epitome of the ruin and recovery of man through a Redeemer, thus:—

[c] In his notice of this name in the *Onomasticon* (*"Namoth"*), Jerome refers to his observations thereon in the "Libri Hebraicarum questionum." As, however, we at present possess those books, they contain no reference to Naioth.

d It occurs again in the Targum for theзначение of Hulilah the prophetess (2 K. xxi. 14).
be difficult to determine to which class a particular name belongs; thus Gogotha, or Calvary, is supposed by some to have been so called because it seems to have been a hillock, others however deny that the traditional connection of a "Mount Calvary" has any Scriptural warrant, and trace the name to the fact that it was the customary place for capital executions. The former class would make it a descriptive, the latter a historical, name. The importance of the question in a topographical point of view is self-evident.

In turning our minds to serve as names of towns or other localities, some of the most common terms employed by the Hebrews were Kir, a "wall" or "fortress" (Kir-harch; Kirjath, a "city" (Kirjath-larba; Kirjath-huzoth, "city of streets"; Kirjath-jearim, "city of woods" = Forestville; Kirjath-sepher, "city of books"; Kirjath-sannah, "city of learning"); En, "fountain" (En-gilanim, "fountain of the two calves"; Engannim, "fountain of the gardens"; Enged, "fountain of the kid"; En-hakkore, "a fountain of the cry or prayer," Gen. 14, 19; En-rogel, "fountain of the fuller," etc.); Beer, "a well" (Beer-elim, "well of the mighty ones" or "well of the terebinth"); Beer-haikaroi, "a fountain of the valley"; Beer-sheba, "well of the oath"; Beth, "house" (Beth-arabah, "house of the thorns"; Beth and Bethel = Bethel and Bethchenech, "house of the valley"; Beth-heron, "place of the great cavern"; Beth-lehem, "house of bread"; Beth-shan, "house of rest"; Bethlehem, "house of the sun" etc., etc.).

The names of rivers and bodies of water were almost always of a descriptive character, e.g. Jordan, "descending"; Kishon, "torrents"; Chebar, "shambuckled or vegetable"; Kidron, "very black"; Meron, "a high place" (fully written Meggavron, "waters of the heights"); Jam-Saph, "sea of weeds" (Red Sea; Jam-Arabah, "sea of the desert," or Jam-Hammacheh, "salt sea" (Dead Sea); Jam-chinvereth, "sea of the Harp" (Sea of Galilee, said to have been so called from its shape). The names of countries and sections of countries were almost universally derived from the name of their first settlers or earliest historic populations, e.g. Canaan: Misraim (Egypt); Edom: Asir (Asyria); Tarshish; Havilah, etc. In the Geographical Appendix to Osborne's Palestine, Post and Present, Phila. 1838, may be found an exhaustive list of the names of all places and nations mentioned in the O. or N. Text, with references to all the passages where they occur and the latitude and longitude of each locality so far as ascertained. The Bible Atlas of Maps and Plans by the Rev. Samuel Clark, published by the Society for Promoting Christian Knowledge (Lon. 1808), has a "Complete Index to the Geographical Names in the English Bible," including the Apocalypse, by George Grove.

II. NAMES OF PERSONS. Unlike the Romans, but like the Greeks, the Hebrews were a mononomous people, that is, each person received but a single name. In the case of boys this was conferred upon the eighth day in connection with the rite of circumcision (Luke i. 59, ii. 21; comp. Gen. xvii. 5-14, xxii. 3, 4). To distinguish an individual from others of the same name it was customary, as among most, if not all primitive peoples, to add to his own proper name that of his father, or if that was insufficient, the names of several ancestors in ascending order (Jer. xxxvi. 14). Instead of the
father's name that of the mother was sometimes used, possibly in cases where the mother was the more widely known of the two (1 Chr. ii. 16). In some instances the father is represented as conferring the name, in others the mother. Thus, to pass over the naming of the animals and of Eve by Adam, Seth named Enos, Lamech Noah, Jacob Benjamin, etc. On the other hand Eve named Cain and Seth, probably also Abel; Lot's daughters named Moab and Ammon; Leah gave names to her sons first, but to her sons last, Judah, Gad, Asher, Issachar, Zebulun, and Dinah; Rachel bequeathed to Dan, Naphtali, Joseph, and her last born, which was however changed by Jacob. (See Moroni, Dictionrio.)

Distinguishing with Ewald three classes of names, the simple, the derivative, and the compound, we will briefly treat of each in order.

1. Simple names. These in Hebrew, as in all languages, were largely borrowed from nature, e.g., Deborah, "bee"; Arieh, "Lion" or "Lyon"; Tamar, "a palm-tree"; Judah, "dove"; Rachel, "ewe"; Shual, "fox"; Caleb, "dog"; Hodesh, "new moon"; Cheraq, "lamb"; Pishon, "ga- zelle," etc. Others are of a descriptive character, e.g., Ashur, "buck" (comp. however Simonis); Edom, "red"; Ezu, "haired"; Gareb, "a key"; Kerah, "bald"; Chinehem, "pinning" (can be understood, however, in the sense of Desi- derius; so by Simonis); Paisach, "the lame"; Ikkesh, "crooked" (here too, Simonis has an interpretation of his own, understanding the term as relating to the hair, like the Latin name Critus). Still other names were borrowed from human occupations and conditions, e.g., Dan, "a judge"; Sarah, "a princess"; Carmit, "vine-dresser," etc. Whether diminutives are found in Hebrew may be doubted. Ewald and others have claimed that Zebulun and Jeduthun are such. This peculiarity of the Hebrew is the more remarkable from the fact, that its near cognate, the Arabic, abounds in diminutives.

2. Derivative names. Many names of women were derived from those of men by change of terminations—Hammelekh, "the king," Hammoleketh, "the queen," (like the German Königin, Königin); Meshullameth, "Pitsu," Meshullameth, "Peri"; Haggi or Haggai, "exultation," and Haggith; Judah, Judith; Dan, Dinah, etc. Such derivations, however, are limited to simple names; no instance occurring where a feminine name is derived from a compound masculine one. On this peculiarity Ewald remarks, that as the same compound names are sometimes used both for men and women, and as names are applied to women which could not originally have been applicable to any but men, as Abigail, and Ahinoam, we must assume that the plastic power of language had already exhausted itself in this remote province, and that for this reason, the distinction of the feminine was omitted; in the same way as Sanskrit and Greek adjectives of the feminine gender (e.g., ἕνυξ, are not able to dis- tinguish the feminine in form.

The final syllable -i, or -ai, in such names as Anmittai, Barzillai, is regarded by Ewald as a deriva- tive particle, so that according to this grammarian the names mentioned would be equivalent to "I Truman" and "I Ironman." All other etymolo- gists, however, whom we have consulted, regard the admissible apocope as an imperfectly expressed Ἐφαθ, and interpret the names "Truth of Jehovah," "Iron of Jehovah," etc. Of the use of the same

terminational syllable to form patronymes in He- brew, see Wilkinson, pp. 29-12.

The most anomalous phenomenon observable in the derivation of Hebrew feminine names is the fact, that in the employment of names derived from abstract nouns masculine ones are often applied to women, and feminine ones to men, while in other cases names identical in meaning and distinguished as to gender by their termination are applied to a single sex. In this respect Hebrew usage seems to have been subject to no rule. Thus Shelomith, "peaceable" or "my peace," and Shelomith, the feminine form, was not only a name of women, but also of men, 1 Chr. xxvi. 25, 26, xxii. 9. Shemai and Shimri, "watchful" or "guarded" (of God), are names of men both in form and fact. The feminine form, Shimmith, is nevertheless applied to a woman, 1 Chr. viii. 21; while in 2 Chr. xxvi. 20 another feminine form, Shimmith, is the name of a woman. Analogous to this is the fact, that many titles of men were feminine and required to be con- structed with feminine adjectives, etc., as Pechah, "governor," Koheleth, "preacher," etc., while in other cases masculine nouns took feminine terminations in the plural, e.g., 40, "a father," plural "the fathers," or lebabot not merely the plural ending of the masculine, e.g., Melith, "words," Mel- lith, "words." See the Grammars.

3. Compound Names. These constitute in all languages the most interesting and instructive class, since they reflect emotions and ideas, for whose expression a conscious exercise of the onomatopoeic faculty was requisite. In Hebrew we find some, which have no especial religious or social signi- ficance, as for example, Phinehas, "mouth of brass;" Ishod, "man of beauty;" Genuil, "camel-owner." The majority, however, have such significance, being compounded either (1) with terms denoting relation- ship, as Ahi, or Ab (Abihud, "fear of praise"); Abijam, "f. of the sea;" Abimelech, "f. of the king;" Abinom, "f. of pleasantness;" Abibah, "f. of goodness" etc.; — Achi (Eng. ver. Ahi, "brother") (Abihud, Abimelech, Abinom, Abibah, etc.; Eng. ver. Abihud, Abimelech, Abinom, Abibah, etc.; Eng. ver. Achi). (2) "son of my sorrow"; Benjamin, "s. of my right hand;" Ben-hail, "s. of the host;" Barabbas, Bar-jona, etc.; — or Bath, "daughter" (Bath- sheba, Bath-shua, "d. of an oath;" or (2) with nouns borrowed from the sphere of national life and aspiration, such as Am (בנ) "people," reserving the numerous Greek compounds with άδσ and Νηος (Ammiminah, q. v., Amnitzabad, "people of the Giver" etc. God; Jerobeam, "whose people are countless," or "increaser of the people;" Jashobeam, "he will return among the people," Joas, "people's leader," Ewald, "habitat in populo," Simonis; Jekameam, "gathering of the people," etc.; — Melch, "king" (Abimelech, "father of the king;" Abimelech, "brother of the king." On Nathan-melech, Eled-melech, and Regem-melech, see Wilkinson, pp. 395-397; or (3) with names of God, as for instance, Shaddai (Ammishaddai, "people of the Almighty," and Zurishaddai, "my rock is the Almighty") etc.; — El, prefixed or suffixed (Elhanan or Nathanael, equiv- alent to Thomas or Dositheus; Elizer, "God;" Ger. Gottlieb; Israel, "the protector Dei;" Winer, Eliahebet, "God of salvation;" Ariel, "lion of God;" Elisahaphet, "God is judge;" Abiel,
a "serant of God"); — Adonai, "lord" (Adoniram, "lord of exaltation," Adonijah, "my lord is Jehovah"); Adoni\, "lord of the enemy," Gése- nius, or "lord who assists," 1st. "Dominus sum," "I\, Jehovah." These are sometimes prefixed shortend to Jehu, or Ju, when alluded to Jetha or job or i (Jonathan and Nathanial, parallel with Eléthan and Nathaniel, "Jehovah-given," comp. Jehohamah and Jehohanan; Jethoda, "Jehovah knows"); Jehoachin, Jeho\, "Jehovah will establish"); Joth, "whose father is Jehovah" (Eljia, "the strength of Jehovah" (Iskher, " whom Jehovah shall build") etc. It remains to be observed in this connection, that Abi, or Abu, is supposed by Gesenius and most etymologists to have really designated in all instances a direct blood relationship, but in the process of time to have become a constituent part of proper names, which were used without reference to their strict etymological meanings. This view is opposed by Ewald, who thinks, however, that in later times the term "father" was often used to express some empy dignity, as "father" or lord of a town. So in 1 Chr. ii. 29, 42, 43, 50, etc., where Ab is compounded with names of places. On the possessive sense of Ab or Abi in composition, see Wilkinson, pp. 395-397.

The non-Hebrew names of the Old Testament are chiefly Egyptian, Canaanish, and Persian. These are separately treated by Simonis, sec. xi., and Wilkinson, pp. 416-481.

Glancing a moment at the history of names and name-giving among the Hebrews, we readily distinguish many of those changes which characterize popular customs and habits in this particular among all peoples. In their first or ruder age their names are simple and a "smell of nature." In the period of their highest national and religious development we find more compounds and more allusions to artificial refinements. In the period of their humiliation and conflicts under the judgments of God, whole passages of Scripture were appropriated as in modern times by the Puritans of Great Britain. Hence such names as Boshiah, "praise-they-the- Lord"; Elijah, "mine-eyes-are-unto-Jehovah." Hazelnut, "give-shade-thou-that-turnest-thy face-to-me" (Echder), or, "give-shadow-that-seest-me" (Ewald). As soon as the people grew weary of this unwisely nomenclature a very natural reaction led to the repudiation of the simple and hallowed names of early Hebrew history. Loss of independence and intermarriage with foreigners led to the introduction of foreign names, the use of the Greek language to a translation of many Hebrew ones and to the modification of others, so that in the New Testament we find almost as great a variety of names as among the modern nations of Europe. There are pure Hebrew names, such as Joseph, Simon or Simon, Levi, Gamaliel, Saul, etc.; Hebrew names which have become grecized in form, such as Lazarus from Léznar, Matthias from Mattathiah, Ananias from Han- nia, Zebulon from Zabulon or Zebuluth, Zacchæus from Zacchay, Ananias from Chanaanias, Alexander from Alexán, Jason from Jeshua, etc.; Aramaean names, such as Martha, Tahitha, Caiphas, etc.; Greek names, such as Andreas, Anianicus, Unioh, Antipator, Philippe, etc.; Latin names: Marcus, Aquila, Pris-ilia, Justinus, Paulus, etc., etc., and finally, even names which were derived from one of the gods of Greece and Rome, e. g., Ape- sonius, Placie, Nerus, Demetrius, Diophræs, Epaphroditus, Dionysius, Hermas, Olympius, Hymenæus, Artemas, etc., etc. These last names were doubtless given by heathen parents. On the New Testament proper names are particularly Selah, "a small" (Ps. viii. 15), "favour" or upest. Gracefulness (Gies- sen, 1801), pp. 140-161.

"Nomen est omen." Among no ancient people was this truer than among the Hebrews. Doubt- less the more customary names became in time conventional, at least to some extent. Even an Ahut could give to sons born him by Jezebel names compounded with Jehovah, as Ahaziah and Joram, and a man could not deny that in most instances, the choice of the name was understood as an act of religious profession and confession on the part of the parents. Even when the name must have grown perfectly familiar, we discover a tendency to seek for correspondences between its meaning and its bearer. See Abigail's allusion to the name of Nahal, 1 Sam. xxv. 25, Naomi's to her own, Ruth i. 29. Probably the perception of the significance of names was keener among ancient peoples, since their roots were almost universally of the vernacular language. Even Cicero cannot resist the temptation to play upon the name of the conspirators against Caesar (the Brutus), and who can ever forget the cutting pasiphrase on the Papal dispensers of the Pantheon: "Quod non fervent Barbari, fer- venter Barbati." Among the Hebrews, this identification of name and person reached its climax. A tendency to it was characteristic of the nation, and under the supernatural tuition of Revelation it was fully developed. In the spirit of that truthfulness, which desires to see all contradiction between name and nature done away, and every one called by his right name (comp. Is. v. 20, xxii. 5; Jer. iii. 1), a series of names is here produced, which really express the personal significance and life-station of those who bear them, and which thus themselves become attestations of Revelation, abiding pledges of divine guidance and promise. These significant names are partly birth-names, partly and more commonly, new appellations. As outside the circle of Revelation, particularly among the oriental nations, it is customary to mark one's entrance into a new relation by a new name, in which case the acceptance of the new name involves the acknowl- edgment of the sovereignty of the name-giver, so the importance and new sphere assigned to the organs of Revelation in God's kingdom are fre- quently indicated by a change of name. Examples of this are Abraham, Gen. xvii. 5; Sarah, xvii. 15; Israel as designation of the spiritual character, in place of Jesh which designated the natural char- acter, xxii. 28; Joshua, Num. xiii. 16; comp. also Jerubbaal, Judg. vi. 32; in N. T. Cephas or Peter, John i. 42; Bounerges, Mar. iii. 17; Barnabas, Acts iv. 36. It is, however, remarkable, that in many instances where no particular reason is given, a striking correspondence is seen between the name and the character of the person; e. g. Saul, David, Solomon (comp. however 1 Chr. xxii. 9); Eljia, 1 K. xviii. 36). What peculiar weight the prophets attached to names is well known. Nathan gives Solomon the name Jedidiah, "because of the Lord." Hosea (chap. i.) and Isaiah (viii. 3) express their prophecies in the names of their children. Isaiah comforts himself with the merciful pledge contained in the significance of his own name (viii. 25) and the prophets frequently play upon the names of persons and places, and such instances of paronomasia are not to be regarded as mere rhetorical ornaments.
Compare Micah's play upon his own name, Mic. vi. 13 (Caspuri, Commentar., p. 20 ff.)—such passages as Is. xxv. 10; Micah i. 10 ff.; Jer. xx. 3; xxxii. 6. This intimate concrete relation between name and person explains, finally, certain biblical modes of speech. When God elects a man by virtue of personal qualification, he is said to call him by name (Ex. xxxii. 2; Is. xl. 3, 4). When Jehovah says to Moses, “I know thee by name” (Ex. xxxiiii. 12), he means, he has placed himself in a specifically personal relation to Moses as such. So he takes his name, to Moses alone, and therefore connected with his name. This explains also Is. xiii. 11: “I have called thee by thy name and thou art mine” (comp. xlix. 1). Receiving a ‘new name’ from God (Is. lv. 3, xiii. 2; Rev. ii. 17, iii. 12) is the expression employed to denote a new personal relation to him established by an act of divine grace” (Oehler).

The attempt made by Strauss (Leben Jesu, passim), Herderbold (Einführung ins A. T. pp. 2337—2337), and others, to prove from the peculiar significance of names the mythical origin of different books of the canon is simply puerile. Even Theodore Parker ridicules the former, by showing in like manner the mythical character of the Declaration of Independence from the fact of its reputed provenance at Philadelphia, the city of brotherly love” (see his review of Strauss's Leben Jesu). He also styles Herderbold’s arguments “merely nugatory,” adding that all B. says of the names in the book of Ruth “may be said of almost all Hebrew names” (Translation of De Wette's Introduction to the Old Test., i. 319). What have some future myth-hunter may make even of the names and achievements of these brave destroyers themselves! Strauss means maxims, “strong,” “sign,” “hitzig,” “hot-headed”; Bauer, a “peasant,” “rude fellow”; Neander, “new man”; Scheiernacher, “veil-maker”; Hengstenberg, “stallion-mountain,” comp. Ang. Sax. “marc’s-nest”—ergo the tale of the famous battle in the nineteenth century, in Germany, between belief and unbeliev is all a myth! No such man as Strauss ever lived, no such man as an intellectual opponent.

Literature. — Eusebius, Onomasticon (Ugolini's Theissurus, vol. v.); Hieronymus, Libro de nominibus Hebraicis, De Sita et Nominibus Locorum Hebraicorum, etc. (Opera, Benedictine ed. vol. iii.).

In conclusion, for literature of the names of God, see art. Jehovah, and the bibliographical manuals.

NANE'A [more correctly NANA'] (Nanaia: Nanaea). The last act of Antiochus Epiphanes (vol. i. p. 186 b) was his attempt to plant the temple of Naanae at Elymais, which had been enriched by the gifts and trophies of Alexander the Great (1 Macc. vi. 1—4; 2 Macc. i. 13—16). The Persian goddess Naanaea, called also A'paira by Strabo (xv. p. 743), is apparently the Moon goddess, of whom the Greek Artemis was the nearest representative in Polybios (quoted by Joseph. Ant. xii. 9 § 1). Yehudah calls her the Elymais Yordam (ed. Joh. Schneller, etc., addit. p. 345), and Winer (Reel. c.) apparently identifies Naanaea with Meni, and both with the planet Venus, the star of luck, called by the Syrians Aiiii, Noni, and in Zend Nahid or Anahid.

Epiphonite in 1811 found coins of the Sassanians with the inscription NANAIA, and on the reverse a figure with nimbus and lotus-flower (Movers, Phoca. i. 626). It is probable that Naanaea is identical with the deity named by Strabo (xi. p. 532) as the namen patriarch of the Persians, who was also honored by the Medes, Armenians, and in many districts of Asia Minor. Other forms of the name are Arana, given by Strabo, Alien by Polibios, *A'paira* by Plutarch, and Tavarh by Clemens Alexandrinus, with which last the variations of some MSS. of Strabo correspond. In consequence of a confusion between the Greek and Eastern mythologies, Naanaea has been identified with Artemis and Aprodite, the probability being that she corresponds with the Taarie or Epsilon Artemis, who was invested with the attributes of Aprodite, and represented the productive power of nature.
NAOMI

In this case some weight may be allowed to the conjecture, that "the desire of women" mentioned in Dan. xi. 37 is the same as the goddess Nanac.

In 2 Macc. ix. 1, 2, appears to be a different account of the same sacrilegious attempt of Anti-

Influence liest, when the scene of the event is there placed at Persepolis, "the city of the Persians," where there might well have been a temple to the national deity. But Grimm considers it far too probable that it was an Elymian temple which excited the cupidity of the king. See Gesenius, Jost, iii. 537, and Grimm's Commentator in the Kurzgefa. Handb. W. A. W.

NAOMI (Israel) [my delight, pleasure: Rom. Nauai: Vat.] Na'omi; Alex. Na'omiet, Na'oui, Na'ouei, etc.: Naomi, the wife of Elishcech, and mother-in-law of Ruth (Ruth ii. 2, &c., ii. 1, &c., iii. 1, iv. 3, &c.). The name is derived from a root signifying sweetness, or pleasantness, and this significance contributes to the point of the parenthesis in i. 20, 21, though the passage contains also a play on the mere sound of the name: "I call me not Naomi (pleasant), call me Mara (bitter). . . why call ye me Naomi when Je-

The life of this Hebrew woman, one of the most checkered which is given in the sacred record, derives its chief general interest from her relation to Ruth, her daughter-in-law, and from the position of the latter in Jewish history. But Naomi is really the heroine of the Book of Ruth, and her character appears beautiful as presented in this charming narrative. Her tenderness and generosity, her devout trust in God and grateful recognition of his hand, serve to explain the strong confidence and affection which she inspired in the daughter of Moab who identified herself with her darkest fortunes. Her constant counsels guided her faithful daughter-in-law and, spared to become the nurse of her son, not a little of the moral influence which distinguished the line thus founded may have been transmitted from her. (Ruth, Book of, Amer. ed.)

The name is properly Naomi, and not Naomi as in the A. V., perhaps after the Latin transla-

NA'PHISH (Na'ophish) [according to the Syriac usage, refreshment,'] Gen.: Na'ofi, Na'ofarai: Naphish), the last but one of the sons of Ishmael (Gen. xxv. 15; 1 Chr. i. 31). The tribe descended from Noah was subsumed by the Reubenites, the Gadites, and the half of the tribe of Manasseh, when they made war with the Hagarites, with Jetur, and Naphish (Na'ofarai, LXX.), and Na-

That is, according to the Hebrew blom, "immense wrestlings." "Na'orqet, or, as it is irresist-

An attempt has been made by Redish, in his singular treatise Die Aktiss. Namen, etc. (Bibl. Bibl. pp. 88, 89), to show that "Naphish" is nothing but a synonym for "Galilee." and that again for "Tabul," all three being appellative. But if there were no other difficulties in the way, this has the dis-

NAPHTALI

in the sacred records, nor is it mentioned by later writers. It has not been identified with any Ar-

influence, and from the influence of Mohammedan history, and from our ignorance respecting many of the tribes, and the towns and districts of Arabia. The influence of Mohammedan history is here mentioned as the strongest instance of a class of influences very common among the Arabs, by which prominence has been given to certain tribes remark-

of tribes, causing in countless instances the adoption of an older name to the exclusion of the more recent, without altering the pedigree. Thus Mo-

In the Hagarites went southwards, into the province of Hejer, after their defeat, Naphish may have gone with them, and traces of his name should in this case be looked for in that obscure province of Arabia. He is described in Chroni-

of tribes, and the names of different races, of which the war of Tribes is considered the most important, have been named after the names of the heads of tribes, such names as a. Were chosen by Jacob to represent the family before he went to Haran (Targ. Pseudoj., on Gen. i. 13 and xivii. 3).c

Estimation in which the tribe was held at the date of the composition of the Songs of Deborah and Jacob c

in the "Testaments of the Twelve Patriarchs," Naphish died in his 124th year, in the 7th month, on the 4th day of the month. He explains his name as given "because Rachel had died deceitfully" (ie. cmapaying homage). He also gives the genealogy of his mother: Bilhah (Bilhah), the daughter of Laban, the brother of Deborah, Rebekah's nurse, was born in the same year as Rachel. Rhodious was a Chal-

the kindred of Abraham, who, being taken
When the census was taken at Mount Sinai the tribe numbered no less than 53,400 fighting men (Num. i. 43, ii. 30). It thus held exactly the middle position in the nation, having five above it in numbers, and six below. But when the borders of the Promised Land were reached, its numbers were reduced to 45,400, with four only below it in the scale, one of the four being Ephraim (Num. xxvi. 48-50; comp. 37). The leader of the tribe at Sinai was Ahira ben-Elam (Num. ii. 29); and at Shiloh, Pedahel ben-Ammihud (xxiv. 28). Amongst the spies its representative was Nahbi ben-Vophshi (xiii. 14).

During the march through the wilderness Naphatli occupied a position on the north of the Sacred Tent with Dan, and also with another tribe, which though not originally so intimately connected became afterwards his immediate neighbor — Asher (Num. ii. 25-31). The three formed the "Camp of Dan" and their common standard, according to the Jewish traditions, was a serpent or basilisk, with the motto, "Return, O Jehovah, unto the many thousands of Israel." (Targ. Pseudo-jon. on Num. vii. 25).

In the apportionment of the land, the lot of Naphatli was not drawn till the last but one. The two portions then remaining un appropriated were the noble but remote district by which between the strip of coast-land already allotted to Asher and the upper part of the Jordan, and the little canton or corner; more central, but in every other respect far inferior, which projected from the territory of Judah into the country of the Philistines, and formed the "marches" between those two never tiring combatants. Naphatli chose the former of these, leaving the latter to the Danites. A large number of whom shortly followed their relatives to their home in the more remote but more undisturbed north, and thus testified to the wisdom of Naphatli's selection.

The territory thus appropriated was inclosed on three sides by those of other tribes. On the west, as already remarked, by Asher: on the south Zebulun, and on the east the trans-Jordan Manassess. The north terminated with the ravine of the Libany or Leonites, and opened into the splendid valley which separates the two ranges of Lebanon. According to Josephus (Ant. v. 1, § 22) the eastern side of the tribe reached as far as Danasesus; but of this — though not impossible in the early times of the nation and before the rise of the Syrian monarchy — there is no indication in the Bible. The south boundary was probably very much the same as that which at a later time separated Upper from Lower Galilee, and which ran from or about the town of Abdon to the upper part of the Sea of Gennesaret. Thus Naphatli was cut off from the great plain of Esdraelon — the favorite resort of the horses of plunderers from beyond the Jordan, and the great battlefield of the country — by the mass of the mountains of Nazareth; while on the east it had a communication with the Sea of Galilee, the rich district of the Arl el-Mitch and the Mezy Jailen, and all the splendidly watered country about Boitis and Hasebits, the springs of Jordan.

"O Naphatli," thus accurately does the Song attributed to the dying lawgiver express itself with regard to this part of the territory of the tribe — "O Naphatli, satisfied with favor and full of Jehovah's blessing, the sea " and the south possess thou!" (Deut. xxxiii. 23). But the capabilities of these plains and of the access to the Lake, which at a later period raised Galilee and Gen nsaret to so high a pitch of crowded and busy prosperity, were not destined to be developed while they were in the keeping of the tribe of Naphatli. It was the mountainous country ("Mount Naphatli," Josh. xx. 7) which formed the chief part of their inheritance, that impressed or brought out the qualities for which Naphatli was remarkable at the one remarkable period of its history. This district, the modern Belad-Becharah, or "land of good tidings," comprises some of the most beautiful scenery, and some of the most fertile soil in Palestine (Porter, p. 365); forests surpassing those of the renowned Carmel itself (Van de Velde, i. 293); as rich in noble and ever varying prospects as any country in the world (ib. 467). As it is thus described by one of the few travellers who have crossed its mountains and descended into its valleys, it was at the time of the Christian era: "The "sah," says Josephus (ib. J. iii. 3, § 2), "universally rich and productive; full of plantations of trees of all sorts; so fertile as to invite the most skilful to cultivate it." But, except in the permanence of these natural advantages, the contrast between the present and that earlier time is complete: for whereas, in the time of Josephus, Galilee was one of the most populous and busy districts of Syria, now the population is in an inverse proportion to the luxuriance of the natural vegetation (Van de Velde, i. 170).

Three of the towns of Naphatli were allotted to the Gershonite Levites — Kodesh (already called Kodesh-in-Galilee), Hammoth-dor, and Kartan. Of these, the first was a city of refuge (Josh. xx 7, xxxi. 32). Naphatli was one of Solomon's commissioner districts, under the charge of his son-in-law Ahimaaz; who with his wife Basmuth resided in his presidency, and doubtless enlivened that remote and rural locality by a miniature of the court of his august father-in-law, held at Safed or Kedesh, or wherever his residence may have been (1 K. iv. 15). Here he doubtless watched the progress of the unspared new district presented to Solomon by Haman — the twenty cities of Gushal, which seem to have been within the territory of Naphatli, perhaps the nucleus of the Galilee of later date. The ruler of the tribe (722) — a different dignity altogether from that of Ahimaaz — was, in the reign of David, Jerimoth ben-Ariel (1 Chr. xxvii. 19).

Naphatli had its share in those invasions and molestations by the surrounding heathen, which were the common lot of all the tribes (Judeh perhaps alone excepted) during the first centuries after the conquest. One of these, apparently the severest struggle of all, fell with special violence on the north of the country, and the leader by whom the invasion was repelled — Harak of Kedesh-Naphatli — was the one great hero whom Naphatli is recorded to have produced. How gigantic were the efforts by which these heroic mountainers which he had been captive — and Balla (Fabricius, Cod. Postaleucus. V. T. 858, &c.).

"Yasr-rocher," "west" in the A. V., but obviously the "Sea of Galilee."
served their darling highlands from the swarms of Canaanites who followed Jabesh and Sisera, and how grand the position which they achieved in the eyes of the whole nation, may be gathered from the narrative of the war in Judg. i, iv, and still more from the expressions of the triumphal song in which Deborah, the prophetess of Ephraim, immortalized the victors, and branded their relentless countrymen with everlasting infamy. Gilead and Benjamin lingered beyond the Jordan amongst their flocks: Ham and Asher preferred the luxuriant canes of their hot lowlands to the tree air and fierce strife of the mounting Jordan; that with characteristic sluggishness, it was not until the course of the next century that it was moved at all; but Zebulun and Naphtali on the summits of their native highlands devoted themselves to death, even to an extravagant pitch of heroism and self-devotion (Judg. v. 18):—

"Zebulun are a people that throws away their lives even unto death—
And Naphtali, on the high places of the field."

The mention of Naphtali contained in the Song attributed to Jacob—whether it is predictive, or as some writers believe, retrospective—must have reference to this event: unless indeed, which is hardly to be believed, some other heroic occasion is referred to, which has passed unrecorded in the history. The translation of this difficult passage given by Ewald (Geschichte, ii. 280) has the merit of being more intelligible than the ordinary version, and also more in harmony with the expressions of Deborah's Song:—

"Naphtali is a tawing Terebuth;—
He hath a godtly crest."

The allusion, at once to the situation of the tribe at the very apex of the country, to the heroes who towered at the head of the tribe, and to the lofty mountains on whose summits their castles, then as now, were perched— is very happy, and entirely in the vein of these ancient poems.

After this burst of heroism, the Naphtalites appear to have resigned themselves to the intercourse of the Gentiles, which was the bane of the northern tribes in general, and of which there are already indications in Judg. i. 33. The location by Joshua within their territory of the great sanctuary for the northern part of his kingdom must have given an impulse to their nationality, and for a time have revived the connection with their branches nearer the centre. But there was one circumstance fatal to the prosperity of the tribe, namely, that by it in the very path of the northern invaders. Syrian and Assyrian, Benham and Tabbaleseer, each had their first taste of the plunder of the Israelites from the godly land of Naphtali. At length in the reign of Pekah king of Israel (2 Kings c. 7, 59), Tabbalasereer overran the whole of the north of Israel, swept off the population, and bore them away to Assyria. But though the history of the tribe of Naphtali ends here, and the name is not again mentioned except in the well-known citation of St. Matthew (iv. 25), and the mystical references of Ezekiel (xliii. 4, 34), and of the writer of the Apocalypse (Rev. vi. 6), yet under the title of Galilee—apparently an ancient name, though not brought prominently forward till the Christian era—the district which they had formerly occupied was destined to become in every way far more important than it had ever been before. For it was the cradle of the Christian faith, the native place of most of the Apostles, and the "home" of our Lord. [GALILEE, vol. i. p. 860; C. P. C. CAPE, 381.]

It appears populous and prosperous to a degree far beyond anything of which we have indications in the Old Testament: but this, as well as the account of its sufferings and heroic resistance during the campaign of Titus and Vespasian prior to the destruction of Jerusalem, must be given elsewhere. [GALLEY; PALESTINE.]

NAPHTALI, MOUNT (בנהל יד; מון נפתל). The mountains district which formed the main part of the inheritance of Naphtali (Josh. xxv. 7), answering to "Mount Ephraim" in the centre and "Mount Judah" in the south of Pales-

NAPHTHAR (נפתחר; Naphthar). The name given by Nebuchadnezzar to the substance which after the return from Babylon was discovered in the dry pit in which at the destruction of the Temple the sacred Fire of the altar had been hidden (2 Macc. i. 35, comp. 19). The legend is a curious one; and it is plain, from the description of the substance—a thick water,—which, being poured over the sacrifice and the wood, was kindled by the great heat of the sun, and then burnt with an exceedingly bright and clear flame (ver. 32)—that it was either the same as or closely allied to the naphtha of modern commerce (Petroleum). The narrative is not at all extravagant in its terms, and is very probably grounded on some actual occurrence. The only difficulty it presents is the explanation given of the name: "Napthar which is as if interpreted, cleansing," (comp. בְּגָרְד) and which has hitherto puzzled all the interpreters. It is perhaps due to some mistake in copying. A list of conjectures will be found in Grimm (Kurzgez. Handsch., ad loc.), and another in Reland's Diss. de rei. Ling. P. i. 188.

The place from which this combustible water was taken was indelibly the "king of Persia." (Aristobulus Longinus), and converted into a sanctuary (such seems the force of תֵּבְרָם וּכְפֹל הָיָה; ver. 34). In modern times it has been identified with the large well called by the Arabs Birk-abd, situated beneath Jerusalem, at the confluence of the valleys of Kidron and Hinnom with the Wady es-Naur (or a "valley of the fire"), and from which the main supply of the city is obtained.

This well, the Arab name of which may be the well of Judah or of Job, which is usually identi-

---

a So Ewald, accurate (Dichter, i. 130).

b This is implied in the name of Galilee, which, at an early date, is styled נפתל (Naphthel, Qahal, of the Gentiles).

c See to the N., as in the Vulgate,—haut loin.

d The word "water" is here used merely for "liquid;" as in quo .ウォー. Native naphtha is sometimes obtained without color, and in appearance not unlike water.

e Grimm. (p. 55) notices a passage in the "Adam-
buch" of the Ethiopian Christians, in which Erm is said to have discovered in the vaults of the Temple a censer full of the Sacred Fire which had formerly burnt in the Sanctuary.
foiieh with En-rigel, is also known to the Frank Christians as the “Well of Nehehaim.” According to Dr. Robinson (Bibl. Res. 3. 131, 2 note), the first trace of this name is in Quaresmus (Euchidio-
tium, etc. ii. 270-1), who wrote in the early part of the 17th cent. (1616-25). It calls it “the well of Nehehaim and of fire,” in words which seem to imply that such was at that time its recognized name: “Olebris ille et nominis putens, Nehehaim et ignis, in Gen. x. 17, they follow the tradition and to the Dead Sea is called Wady en-Nair, or “Valley of the Fire;” but no stress can be laid on this, as the name may have originated the tradition. A description of the Bir ed-Dih is given by Williams (Holy City, ii. 423-35), Barclay (City, etc. 513-16), and by the careful Tobler (Uegebungen, etc. p. 50). At present it would be an equally unsuitable spot either to store fire or to seek for water. One thing is plain, that it cannot have been En-
rigel (which was a living spring of water from the days of Joshua downwards), and a naphtha well also.

G. NAITIHUM (NATHIM) [Egyptian, see below]: Neqetem i; [in 1 Chr. Rom. Vivat. omit. Cony. Ald. Neqebum; i Alex. Neqebem; Neqebum: Neqebat, Napeshbatim), a Mizrite nation or tribe, mentioned only in the account of the descendants of Noah (Gen. x. 13; 1 Chr. i. 11). If we may judge from their position in the list of the Mizrites, according to the Masoretic text (in the LXX. in Gen. x. 17, they follow the tradition and precede the Anamites, Erenieti), immediately after the Lehabim, who doubtless dwelt to the west of Egypt, and before the Pathrusim, who inhabited that country, the Nathihum were probably settled at first, or at the time when Gen. x. was written, either in Egypt or immediately to the west of it. In Coptic the city Marea and the neighboring territory, which probably corresponded to the older Maretic nome, is called ωνφατημων, or οιφατημων, a name composed of the word ωφατημων of unknown meaning, with the plural definite article οι prefixed. In hieroglyphics mention is made of a nation or confederacy of tribes conquered by the Egyptians called “the Nine Bows,” a name which Cham-
pollion read Napht, or, as we should write it, NA-PETU, “the bows,” though he called them “the Nine Bows.” It seems, however, more reasonable to suppose that we should read NTU “the Nine Bows” literally. It is also doubtful whether the Coptic name of Marea contains the word “bow,” which is only found in the forms ωπεις (S. masc.) and ωπεις (M. fem. “a rainbow”); but it is possible that the second part of the former may have been originally the same as the latter. It is noteworthy that there should be two geographical names connected with the bow in hieroglyphics, the one of a country, MERU-PET, “the island of the bow,” probably MEROE, and the other of a nation or confederacy, “the Nine Bows,” and that in the list of the Ham-
ites there should be two similar names, Phut and Naphoth, besides Cush, probably of like sense.

a Dr. Brugsch reads this name “the Nine Peoples” Geographische Inschriften, ii. p. 20.

2 A bow in hieroglyphics is PEET, PEET, or PETE.

No important historical notice of the Nine Bows has been found in the Egyptian inscriptions: they are only spoken of in a general manner when the kings are said, in laudatory inscriptions, to have subdued great nations, such as the Negroes, or extensive countries, such as KEESH, or Cush. Perhaps therefore this name is that of a confederacy or of a widely spread nation, of which the members or tribes are spoken of separately in records of a more particular character, treating of special conquests of the Pharaohs or enumerating their tributaries.

R. S. P.

* NAPKHIN (ναποιο) [Naphish]; Luke xix. 20; John xi. 44, xx. 7. The original term is not so restricted in its meaning as our word napkin, but rather corresponds to handkerchief, which see. “Napkin” was formerly used in this wider sense, as by Shakespeare.

A.

NARCISUS (Νάρκις) [Narkis]; 1 Peter ii. 1, a dweller at Rome (Rom. xvi. 11), some members of whose household were known as Christians to St. Paul. Some persons have assumed the identity of this Narcissus with the secretary of the emperor Claudius (Suetonius, Claudius, § 28). But that wealthy and powerful freedman satisfied the revenue of Agrippina by a miserable death in prison (Tac. Ann. xiii. 1); in the first year of Nero’s reign (A. D. 54-55), about three years before this Epistle was written. Dio Cassius, liv. 3, mentions another Narcissus, who probably was living in Rome at that time; he attained to some notoriety as an associate of the emperor, and was put to an ignominious death by Helius, Patrobus, Locusta, and others, on the accession of Galba, A. D. 68. His name, however (see Reimarus’ note, in loco), was at that time too common in Rome to give any probability to the guess that he was the Narcissus mentioned by Paul. A late and improbable tradition (Pseudo-Hippolytus) makes Narcissus one of the seventy disciples, and bishop of Athens.

W. T. B.

NARD. [SPIKENARD.]

NASTAS (Ναστάς; [Sin. Naasath; Nethath], the nephew of Tobit who came with Achiacharus to the wedding of Tobias (Tob. xi. 18). Grotius considers him the same with Achiacharus the son of Azaz, but according to the Vulgate they were brothers. The margin of the A. V. gives “Junius” as the equivalent of Naslass.

NASTATH (Naath; [Vat. Naasath; Alex. Naath; Nestat] = Neziah (1 Esdr. v. 32; comp. Ezra. ii. 54).

NASOR, THE PLAIN OF (νασόρ Πλάγια). [Sin. and 4 cursives MSS. A. omit, see below]: Κανάπα Αντι, the scene of an action between Jona-
than the Maccabees and the forces of Demetrius (1 Macc. xi. 67, comp. 63). It was near Cades (Ka-
desh-Naphthal) on the one side, and the water of Gennesar (Lake of Gennesaret) on the other, and therefore may be safely identified with the Hazor which became so renowned in the history of the conquest for the victories of Joshua and Barak (Rom. ii. i. 1015). In fact the name Maretic, except that through the error of a transcriber the Χ from the preceding Greek word has become at-
tached to it. Josephus (Ant. xii. 5, § 7) gives it correctly, Αζόρ. [Comp. Naarath, p. 2049 note.]

G.

NATHAN (Ναθάν) [given i. e. of God]: Nethah: Nathan), an eminent Hebrew prophet in the reign
of David and Solomon. If the expression "first and last," in 2 Chr. ix. 29, is to be taken literally, he must have lived late into the life of Solomon, in which case he must have been considerably younger than David. At any rate he seems to have been the younger of the two prophets who accompanied him, and may be considered as the latest direct representative of the schools of Nathan.

A Jewish tradition mentioned by Jerome (Qu. Heb, on 1 Sam. xvi. 12) identifies him with the eighth son of Jesse. [David, vol. i. p. 552 b.]

But of this there is no proof.

He first appears in the consultation with David about the building of the Temple. He begins by advising it, and then, after a vision, withdraws his advice, on the ground that the time was not yet come (2 Sam. vii. 2, 3, 17). He next comes forward as the reprover of David for the sin with Bathsheba; and his famous apologue on the rich man and the ewe lamb, which is the only direct example of his prophetic power, shows it to have been of a very high order (2 Sam. xi. 1-12).

There is an indistinct trace of his appearing also at the time of the plague which fell on Jerusalem in accordance with the warning of God. "An angel," says Eusebius (Euseb. Prop. Fr. ix. 90), "pointed him to the place where the Temple was to be, but forbade him to build it, as being stained with blood, and having fought among wars. His name was Dannath." This was probably occasioned by some confusion of the Greek version,大佬 Nathan, with the parallel passage of 1 Chr. xxi. 8, where the bloodstained life of David is given as a reason against the building, but where Nathan is not named.

On the birth of Solomon he was either specially charged with giving him his name, Jedidiah, or else with his education, according as the words of 2 Sam. xii. 25, "He sent (or 'sent him') by (or 'into') the hand of Nathan," are understood. At any rate, in the last years of David, it is Nathan who, by taking the side of Solomon, turned the scale in his favor. He advised Bathsheba; he himself ventured to enter the royal presence with a remonstrance against the king's amatory; and at David's request he assisted in the inauguration of Solomon at Ezion-geber (1 Kings ii. 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33). This is the last time that we hear directly of his intervention in the history. His son Zelad occupied the post of "King's Friend," perhaps succeeding Nathan (2 Sam. xv. 37; 1 Chr. xxvi. 33). His influence may be traced in the perpetuation of his manner of prophecy in the writings ascribed to Solomon (compare Eccl. ix. 14-16 with 2 Sam. xii. 1-10).

He left two works behind him — a Life of David (1 Chr. xxix. 29), and a Life of Solomon (2 Chr. ix. 29). The last of these may have been incomplete, as we cannot be sure that he outlived Solomon. But the biography of David by Nathan is, of all the losses which antiquity, sacred or profane, has sustained, the most deplorable.

The consideration in which he was held at the time is evidenced by the solemn announcement of his approach — "Behold Nathan the prophet" (1 K. i. 24). The peculiar affix of "the prophet," as distinguished from "the sorer," given to Solomon and Gad (1 Chr. xxi. 29), shows his identification with the latter view of the prophetic office indicated in 1 Sam. vi. 9. His grave is shown at Hebron near Hebron (see Robinson, Bibl. Res. i. 216 note.).

\[\text{A. P. S.} \]

\[\text{NATHANIEL (Nathan, gift of God)} \]

2. A son of David; one of the four who were born to him by Bathsheba (1 Chr. iii. 5; comp. xiv. 4, and 2 Sam. r. 14). He was thus own brother to Solomon — if the order of the lists is to be accepted, elder brother; though this is at variance with the natural inference from the narrative of 2 Sam. xii. 24, which implies that Solomon was Bathsheba's second son. The name was not unknown in David's family; Nathanuel was one of his brothers, and Jo-nathan his nephew.

Nathan appears to have taken no part in the events of his father's or his brother's reign. It is interesting to us from his appearing as one of the forefathers of Joseph in the genealogy of St. Luke (iii. 31) — the private genealogy of Joseph, exhibiting his line as David's descendant, and thus showing how he was heir to Solomon's crown (vol. i. p. 885). The hypothesis of Lord Arthur Hervey is that on the failure of Solomon's line in Jehoiachin or Jeconiah, who died without issue, Salathiel of Nathan's house became heir to David's throne, and then was entered in the genealogical table as "son of Jeconiah" (i. 885 b). That the family of Nathan was, as this hypothesis requires, well known at the time of Jehoiachin's death, is implied by its mention in Zech. xii. 12, a prophecy the date of which is placed by Eusebius (Prophet., i. 391) as fifteen years after Habbakuk, and shortly before the descent of Jeremiah into the Dove-cotes; that is, a few years only after Jehoiachin's death.

3. [In 2 Sam., Rom. Vat. Natian.] Son, or brother, of one of the members of David's guard (2 Sam. xxiii. 36; 1 Chr. xi. 38). In the former of these two parallel passages he is stated to be "son of Zohah," i.e. Aram-Zohah, which Kenmottoc in his investigation (Disser. 215, 216) decides have been the original reading, though he also decides for "brother" against "son.

4. One of the head men who returned from Babylon with Ezra on his second expedition, and whom he despatched from his encampment at the river Ahava to the colony of Jews at Casiphia, to obtain thence some Levites and Nethinim for the Temple service (Ezr. viii. 16; 1 Esdr. viii. 44). That Nathan and those mentioned with him were formerly appointed by the exiles of the second captivity to assist in the procuring verse, and therefore it is not impossible that he may be the same with the "son of Bani" who was obliged to relinquish his foreign wife (Ezr. x. 30), though on the other hand these marriages seem rather to have been contracted by those who had been longer in Jerusalem than he, who had so lately arrived from Babylon, could be.
and the Prophets had at first appeared. Nathanael, who seems to have heard the announcement at first with some distrust, as doubting whether anything good could come out of so small and inconsiderable a place as Nazareth—a place nowhere mentioned in the Old Testament—yet readily accepted Philip's invitation to go and satisfy himself by his own personal observation (John i. 46). What follows is a testimonium to the humility, simplicity, and sincerity of his own character from One who could read his heart, such as is recorded of hardly any other person in the Bible. Nathanael, on his approach to Jesus, is called "a Nathanael indeed, in whom is no guile"—a true child of Abraham, and not simply according to the flesh. So little, however, did he expect any such distinctive praise, that he could not refrain from asking how it was that he had become known to Jesus. The answer, "before that Philip called thee, when thou wast under the fig-tree, I saw thee," appears to have satisfied him that the speaker was more than man—that He must have had His secret thoughts, and heard His muttered prayer at a time when he was studiously screening himself from public observation. The conclusion was inevitable. Nathanael at once confessed "Rabbi, thou art the Son of God; thou art the King of Israel" (John i. 49). The name of Nathanael occurs but once again in the Gospel narrative, and then simply as one of the sumptuous company of disciples to whom Jesus showed Himself at the Sea of Tiberias after His resurrection. On that occasion we may fairly suppose that he joined his brethren in their night's venture on the lake—that, having been a sharer of their fruitless toil, he was a witness with them of the miraculous draught of fishes the next morning—and that he afterwards partook of the meal, to which, without daring to ask, the disciples felt assured in their hearts, that He who had called them was the Lord (John xxi. 12). Once therefore at the beginning of our Saviour's ministry, and once after his resurrection, does the name of Nathanael occur in the Sacred Record.

This scanty notice of one who was intimately associated with the very choicest Apostles, and was himself the object of our Lord's most emphatic commendation, has not unnaturally provoked the inquiry whether he may not be identified with another of the well-known disciples of Jesus. It is in this connection commonly believed that Nathanael and Bartholomew are the same person. The evidence for that belief is as follows: St. John, who twice mentions Nathanael, never introduces the name of Bartholomew at all. St. Matt. x. 3; St. Mark iii. 18, and St. Luke vi. 14, all speak of Bartholomew, but never of Nathanael. It may be, however, that Nathanael was the proper name, and Bartholomew (son of Thobni) the surname of the same disciple, just as Simon was called Bar-Jon, and Jones, Barnabas.

It was Philip who first brought Nathanael to Jesus, just as Andrew had brought his brother Simon and Bartholomew is named by each of the first three Evangelists immediately after Philip; while by St. Luke he is coupled with Philip precisely in the same way as Simon with his brother Andrew, and James with his brother John. It should be observed, too, that, as all the other disciples mentioned in the first chapter of St. John became Apostles of Christ, it is difficult to suppose that one who had been so singularly commended by Jesus, and who in his turn had so promptly and so fully confessed Him to be the Son of God, should be excluded from the number. Again, that Nathanael was one of the original twelve, is inferred with much probability from his not being proposed as one of the candidates to fill the place of Judas. Still we must be careful to distinguish conjecture, however well founded, from proof.

To the argument based upon the fact, that in St. John's enumeration of the disciples to whom our Lord showed Himself at the Sea of Tiberias Nathanael stands before the sons of Zebedee, it is replied that this was to be expected, as the writer was himself a son of Zebedee; and further that Nathanael is placed after Thomas in this list, while Bartholomew comes before Thomas in St. Matthew, St. Mark, and St. Luke. But as in the Acts St. Luke reverses the order of the two names, putting Thomas first, and Bartholomew second, we cannot attach much weight to this argument.

St. Augustine not only denies the claim of Nathanael to be one of the Twelve, but assigns as a reason for his opinion, that whereas Nathanael was most likely a learned man in the Law of Moses, it was, as St. Paul tells us, I Cor. i. 26, the wisdom of Christ to make choice of rude and unlettered men to confound the wise (in John. Ev. e. c. § 17). St. Gregory adopts the same view (on John i. 23, c. 16. 1). In a dissertation on John i. 46, to be found in Thes. Theor. philol., ii. 370, the author, J. Kindler, maintains that Bartholomew and Nathanael are different persons.

There is a tradition that Nathanael was the bridegroom at the marriage of Cana (Calmet), and Epiphanius, Ad. hær. i. § 223, implies his belief that the two disciples whom Jesus overtook on the road to Emmaus Nathanael was one.

2. 1 Esdr. i. 9. [Nathanael.]
3. (Nathanaelos: Nathanael) 1 Esdr. ix. 22. [Nathanael.]
4. (Nathanim) Son of Samuel; one of the ancestors of Judith (Jud. viii. 1), and therefore a Simeonite (ix. 2).

E. H. . . s.

NATHANIAI'S (Nathanias: om. in Vulg.)=Nathan of the sons of Bani (1 Esdr. ix. 34; comp. Eccl. x. 39).

NATHAN-ME'LECH (טַנְתָה-מֵלֶך) [pointed of the king. Ges.]: Nathan b. Sareiel (= Nathan-nuel). A eunuch (A. V. "chamberlain") in the court of Josiah, by whose chamber at the entrance to the Temple were the horses which the kings of Judah had dedicated to the sun (2 K. xxiii. 11). The LXX. translate the latter part of the name as an appellative, "Nathan the king."

* NAUGHTINESS (1 Sam. xvi. 28; Prov. xi. 6; James i. 21), signified wickedness when we present version of the Scriptures was made. Recent translators (as Connor, Noyes) substitute "excess of wickedness" for "superfluity of naughtiness" (παρασκευασμός) in James as above. [NAUGHTY—]

H.

* NAUGHTY, formerly used in the sense of worthless, had, as in Jer. xxiv. 2, "naughty fife," and hence also morally corrupt, wicked, as Prov. vi. 12, "a naughty person, a wicked man," and Prov. xvii. 4, "a naughty tongue." It is now applied generally to the conduct of pert or mischievous children.

H.

N'UM (Na'um): [Nahum], son of Elish, and father of Amos, in the genealogy of Christ (Luke
NAVE

iii. 25), about contemporary with the high-priesthood of Jason and the reign of Antiochus Epiphanes. The only point to be remarked is the circumstance of the two consecutive names, Nana and Anno, being the same as those of the prophets N. and A. But whether this is accidental, or has any particular significance, it is difficult to say. Nana is also a Phoenician proper name (Gen, 285, and Man. Phon. p. 134). Nava

NAVE. The Heb. 22?, 'nur, conveys the notion of concavity or promontory. It is rendered in A.V. loss of a shield, Job xxvi. 26; the eyelid, Lev. xiv. 33; an eminent place, Ex. xii. 31; once only in plur. naves, raron, radii, 1 K. viii. 33; but in Ex. i. 18 twice, raron, 'rings,' and margin, "an old word apparently used both for the nave of a wheel from which the spokes proceed, and also more probably the felloe or the tire, as making the stroke or stroke upon the ground. (Halliwell, Phillips, Bailey, Ash, Eng. Dictionarium, s. trake.)" Gesenius, p. 256, renders concavat redolium. [CHADTOR; LAVER; GARABATHA].

H. W. P.

NAVE (Nahâb; Nave). Josua the son of Nun is always called in the LXX. the son of Nave, and this form is retained in Ezek. xvi. 1.

NAZARENE (Naçappos; Naçapos; [NazarâÎs, Nazarâen]), an inhabitant of Nazareth. This appellation is found in the N. T. applied to Jesus by the demons in the synagogue at Capernaum (Mark ii. 21; Luke iv. 34); by the people who described him to Bartimaeus (Mark x. 47; Luke xviii. 37); by the soldiers who arrested Jesus (John xviii. 5, 7); by the servants at his trial (Matt. xxvi. 71; Mark xiv. 67); by Pilate in the inscription on the cross (John xix. 19); by the disciples on the way to Emmaus (Luke xiv. 19); by Peter (Acts ii. 22, ill. 6, 10); by Stephen, as reported by the false witness (Acts vi. 14); by the ascended Jesus (Acts xxii. 8); and by Paul (Acts xxviii. 31). It has never been connected in any such way, and which, if first given in scorn, was adopted and glorified in by the disciples, we are told, in Matt. ii. 23, possesses a prophetical significance. Its application to Jesus, in consequence of the providential arrangements by which his parents were led to take up their abode in Nazareth, was the filling out of the predictions in which the promised Messiah is described as a Nâvâ (Nâvâ), i.e. a shoot, sprout, of Jesse, a humble and despised descendant of the exalted royal family. Whenever men spoke of Jesus as the Nazarene, they either consciously or unconsciousaneously pronounced one of the names of the prediction which was made in the Old Testament concerning the Messiah, and the prediction was used to express all that had been said of his royal descent and his humble condition. This explanation, which Jerome mentions as that given by a Christian Jew in his day, has been adopted by Surenhusius, Fritzsche, Gieseler, Krabbe (Leben Jesu), Preu-Blenk (in his, xi. 1), Schleiermacher (N. T. Woch. 2.), Robinson (N. T. Lect.), Hengstenberg (Christl.), De Wette, and Meyer. It is confirmed by the following indicative lines of (1) Nâvâ, as Hengstenberg, utter de Dieu and others, has proved, was the proper Hebrew name of Nazareth. (2.) The reference to the etymological signification of the word is entirely in keeping with Matt. ii. 21-23. (3.) The Messiah is expressly called a Nâvâ in Is. xi. 1. (4.) The same thought, and under the same image, although expressed by a different word, is found in Jer. xxiii. 5, xxxiii. 15; Zech. iii. 8, vi. 12, which accounts for the statement of Matthew that this prediction was uttered "by the prophets" in the plural.

It is unnecessary therefore to resort to the hypothesis that the passage in Matt. ii. 23 is a quotation from some prophetic book now lost (Chrysost., Theophylact, Commentaries). For it is a description from a genuine apocryphal book (Ewald), or was a traditional prophecy (Galvisius; Alexander, Connection and Harmony of the Old and New T.), all which suppositions are refuted by the fact that the phrase "by the prophets," in the N. T., refers exclusively to the canonical books of the O. T. The explanation of others (Tert., Eusebius, Cæs., Eus., Grot., Wetstein), according to whom the declaration is that Jesus should be a Nazâârâ (Nâvâ), i.e. one specially consecrated or dedicated to God (Judg. xii. 5), is inconsistent, to say nothing of other objections, with the LXX. mode of spelling the word, which is generally Nazâârâs, and Nazâârâi. Within the last century, however, the interpretation which finds the key of the passage in the contempt in which Nazareth may be supposed to have been held has been widely received. So Paulus, Rosenm., Kuin., Van der Palm, Gersdorff, A. Barnes, Oles, Davidson, Ehrard, Lange. According to this view the reference is to the despised condition of the Messian, as predicted in Ps. xxii. 11; Is. liii. That idea, however, is more surely expressed in the first explanation given, which has also the advantage of recognizing the apparent importance attached to the signification of the name ("He shall be called"). Recently a suggestion which Witsius borrowed from Socinus has been revived by Zuschlag and Riggenbach, that the true word is ᾲανάος or ᾲάνου, my Saviour, with reference to Jesus as the Saviour of the world, but without much success. Once (Acts xxv. 5) the term Nazâârâs is applied to the followers of Jesus by way of contempt. The name still exists in Arabic as the ordinary designation of Christians, and the need for the word to be connected with some local connection has led to the formation of several candidate names of the promised Messiah, and the Nazarene, after holding power for one hundred years, would be expelled. (Spanheim, Dubia Evangelica, i. 583-648; Wolf, Cursus Philologico, i. 46-48; Hengstenberg, Christology of the O. T., i. 106-112; Zuschlag in the Zeitschrift für die Luthersche Theologie, 1854, 417-446; Riggenbach in the Studien und Kritiken, 1855, 688-612.)

G. E. D.

NAZARETH (written Naçââr and Naçââp; also Naçââs). Tisch. 8th ed. in Matt. iv. 13 and Luke iv. 16; Nazâârith) is not mentioned in the Old Testament of Josephus, but occurs first in Matt. ii. 23, though a town could hardly fail to have existed on so eligible a spot from much earlier times. It derives its celebrity almost entirely from its connection with the history of Christ, and in that respect has a hold on the imagination and feelings of men which it shares only with Jerusalem and Bethlehem. It is situated among the hills which enclose the plain of the 1st century Lebanon, just before they sink down into the Plain of Esdraelon. Among those hills is a valley which runs in a wavy line nearly east and west, about a mile long and, on the average, a quarter of a mile broad, but which at a certain point enlarges itself considerably so as to form a sort of basin. In this basin or inclosure, along the lower edge of
the hill-side, lies the quiet, secluded village in which the Saviour of men spent the greater part of his earthly existence. The surrounding heights vary in altitude, some of them rise to 400 or 500 feet. They have rounded tops, are composed of the sparkling limestone which is so common in that country, and, though on the whole sterile and unattractive in appearance, present not an unpleasing aspect, diversified as they are with the foliage of fig-trees and wild shrubs and with the verdure of occasional fields of grain. Our familiar hollyhocks are one of the gay flowers which grow wild there. The inclosed valley is peculiarly rich and well cultivated: it is filled with corn-fields, with gardens, hedges of cacti, and clusters of fruit-bearing trees. Being so sheltered by hills, Nazareth enjoys a mild atmosphere and climate. Hence all the fruits of the country, — as pomegranates, oranges, figs, olives, — ripen early and attain a rare perfection. No thoroughfare invaded the solitude of Nazareth. The line of travel from the north through Cele-Syria (the Bleiti) to the south of Palestine passed it by different routes on the east and the west, and that from East-Jordan to the Mediterranean passes it on the south.

Of the identification of the ancient site there can be no doubt. The name of the present village is en-Nazirah, the same, therefore, as of old; it is situated among hills and on a hill-side (Luke iv. 29); it is within the limits of the province of Galilee (Mark i. 9); it is near Cana (whether we assume Kana on the north or Kama on the north-east as the scene of the first miracle), according to the implication in John ii. 1, 2, 11; a precipice exists in the neighborhood (Luke iv. 29); and, finally, a series of testimonies (Rheind, Pol., p. 905) reach back to Eusebius, the father of Church history, which represent the place as having occupied an invariable position.

The modern Nazareth belongs to the better class of eastern villages. It has a population variously estimated from 3000 to 5000. It consists of Mohammedans, Latin and Greek Christians, and a few Protestants. There are two mosques (one of them very small), a Franciscan convent of huge dimensions but displaying no great architectural beauty, a small Maronite church, a Greek church, and perhaps a church or chapel of some of the other confessions. Protestant missions have been attempted, but with no very marked success. Most of the houses are well built of stone, and have a neat and comfortable appearance. A few of the people dwell in recesses of the limestone cliffs, natural or excavated for that purpose. As streams in the rainy season are liable to pour down with violence from the hills, every "wise man," instead of building upon the loose soil on the surface, digs deep and lays its foundation upon the rock (τις τὴν πέτραν) which is found so generally in that country at a certain depth in the earth. The streets or lanes are narrow and crooked, and after rain are so full of mud and mire as to be almost impassable.

A description of Nazareth would be incomplete without mention of the remarkable view from the tomb of Nebi Ismail on one of the hills behind the town. It must suffice to indicate merely the objects within sight. In the north are seen the ridges of Lebanon and, high above all, the white top of Hermon; in the west, Carmel, glimpses of the Mediterranean, the bay and the town of Acre; east and southeast are Gilgal, Tiber, Gilead; and south, the Plain of Esdraelon and the mountains of Samaria, with villages on every side, among which are Kana, Cenain, Emor, Zerin (Jezeret), and Tannuk (Tanach). It is unquestionably one of the most beautiful and sublime spectacles (for it combines the two features) which earth has to show. Dr. Robinson's elaborate description of the scene (Jdl. Res., ii. 330, 337) conveys no exaggerated idea of its magnificence or historical interest. It is easy to believe that the Saviour, during
the days of his seclusion in the adjacent valley, came often to this very spot and boded forth thereon upon these glorious works of the Creator which to lift the soul upward to Him. One of the grandest views of Jabel-eaha-shel, the ancient Harnen, is that which bursts on the traveller as he ascends from the valley eastward on the way to Cana and Tiberias.

The passages of Scripture which refer expressly to Nazareth, though not numerous, are suggestive and deserve to be recalled here. It was the home of Joseph and Mary (Luke ii. 39). The angel announced to the Virgin there the birth of the Messiah (Luke i. 26-28). The holy family returned thither after the flight into Egypt (Matt. ii. 23). Nazareth is called the native country (αυτός τὸ σαρκικόν του θεοῦ) of Jesus: He grew up there from infancy to manhood (Luke iv. 15), and was known through life as "The Nazarene." He taught in the synagogue there (Mark xiii. 54; Luke iv. 16), and was dragged by his fellow-townsmen to the precipice in order to cast down thereon and be killed (κατασσωπήσας αὐτόν) (John viii. 59). King Herod has written over his Cross (John xix. 19), and after his ascension He revealed Himself under that appellation to the prosecuting Sanhedrin (Acts ii. 34). The place has given name to his followers in all ages and all lands, a name which will never cease to be one of honor and reproof.

The origin of the dispute in which Nazareth stood (John i. 46) is not certainly known. All the inhabitants of Galilee were looked upon with contempt by the people of Judaea because they spoke a rude dialect, were less cultivated, and were more exposed by their position to contact with the heathen. But Nazareth labored under a special opprobrium, for it was a Galilean and not a southern Jew who asked the reprehensible question, "Is this the Christ?" (John v. 46). It would seem, therefore, that Nazareth was the native town of Jesus, or at least the site of the passion was in Galilee, and not in Judaea, as would appear from a comparison of Josephus' account with the gospel narratives (Josephus, Antiq. v. 1. 2). The word "Nazareth" is a Greek term, and seems to be derived from a Greek word meaning "place." It is impossible to speak of distances with much exactness. Nazareth is a moderate journey of three days from Jerusalem, seven hours, or about twenty miles, from Akka or Ptolemais (Acts xxi. 7), five or six hours, or eighteen miles, from the sea of Galilee, six miles west from Mount Tabor, two hours from Cana, and two or three from Capernaum and Nazareth. The origin of the name is uncertain. For the conjectures on the subject, see NAZARENE.

We pass over, as foreign to the proper object of this notice, any particular account of the "holy places" which the legends have sought to connect with events in the life of Christ. They are described in nearly all the books of modern tourists; but, having no sure connection with Biblical geography or exegesis, do not require attention here. Two localities, however, form an exception to this statement, insomuch as they possess, though in different ways, a certain interest which no one will fail to recognize. One of these is the "Fountain of the Virgin," situated at the northeastern extremity of the town, where, according to one tradition, the infant Jesus received a considerable salutation (Luke i. 28). Though we may attach no importance to this latter belief, we must, on other accounts, regard the spring with a feeling akin to that of religious veneration. It derives its name from the fact that Mary, during her life at Nazareth, had no doubt accompanied often by "the child Jesus," must have been accustomed to repair to this fountain for water, as is the practice of the women of that village at the present day. Finally, as Dr. Clarke observes (Journeys, ii. 427), "if there be a spot throughout the holy land that was undoubtedly honored by her presence, we may consider this to have been the place; because the situation of a copious spring is not liable to change, and because the custom of repairing thither to draw water has been continued among the female inhabitants of Nazareth from the earliest period of its history." The well-worn path which leads thither from the town has been trodden by the feet of almost endless generations. It presents at all hours a busy scene, from the number of those, hurried to and fro, engaged in the labor of water-carrying. See the engraving, l. 838 of this Dictionnaire.

Another place is that of the attempted Pre-emption. We are directed to the true scene of this occurrence, not so much by any tradition as by internal indications in the Gospel history itself. A precedent opinion of the country has transferred the event to a hill about two miles southeast of the town. But there is no evidence that Nazareth ever occupied a different site from the present one; and that a mob whose determination was to put to

---

a * The name of Nazareth occurs 27 times in the Greek text, and twice more in the A. V., namely, Luke xviii. 57 and xxiv. 19, where the Greek, however, is Nazaríssos.

b * The city of the vicinity of Cana to Nazareth. Nathanael, who lived at Cana, appears never to have heard of Jesus until called to be one of his disciples at the beginning of his ministry (John i. 46-50). In strictness, private, mediate, was the Saviour's birth at Nazareth until the time came for Him "to be made manifest to Israel" (John i. 31). This obscurity is irreconcilable with the idea that Christ wrought miracles before He entered on his public work. H.

c * For an enumeration of these "places" and the legend connected with them, one may see Sepp's, Jesus, and His Life, ii. 78-91. They are described still more fully in the new work of Titus Tobler, Nazareth in Palæstina (Berlin, 1888). This work is founded partly on the author's third journey to the Holy Land in 1846, but still more on communications from the missionary Zeller, who has resided at Nazareth since 1859. It forms a valuable contribution to our knowledge of the history, statistics, and topography of this sacred place. The plan of the little village, inserted at the end, representing the course of the valley, the market streets, fountain, convent, churches, is a great help to the reader. It may be added that Dr. Tobler, though a Catholic, rejects the tradition of the Latin monks respecting the site of the preceptiplace at Nazareth, and agrees with those who think that it must be sought within the present vil-

---

H.
death the object of their rage, should repair to so distant a place for that purpose, is entirely incredible. The present village, as already stated, lies along the hill-side, but much nearer the base than the summit. Above the bulk of the town are several rocky ledges over which no person could be thrown without almost certain destruction. But there is one very remarkable precipice, almost perpendicular and forty or fifty feet high, near the Maronite Church, which may well be supposed to be the identical one over which his infuriated companions attempted to cast him down. Not far from this town, on the northwest declivity of the hill, are a few excavated stone-sequelehros, almost the only Jewish monument which now remains to be seen there.

The singular precision with which the narrative relates the transaction deserves a remark or two. Casual readers would understand from the account that Nazareth was situated on the summit, and that the people brought Jesus down thence to the brow of the hill as if it was between the town and the valley. If these inferences were correct, the narrative and the locality would then be at variance with each other. The writer is free to say that he himself had these erroneous impressions, and was led to correct them by what he observed on the spot. Even Reland (Pud. p. 906) says: "Nagareph, uhls delficata super virum, unde Christianus precipitavit consuli." But the language of the Evangelist, when more closely examined, is found neither to require the inferences in question on the one hand, nor to exclude them on the other. What he asserts is, that the incensed crowd rose up and cast Jesus out of the city, and brought him to the brow of the hill on which the city was built, that they might cast him down headlong. It will be remarked here, in the first place, that it is not said that the people either went up or descended in order to reach the precipice, but simply that they brought the Saviour to it, wherever it was; and in the second place, that it is not said that the city was built "on the brow of the hill" (πον τὸς ὅρμος τοῦ ἤρωμα), but equally as well that the precipice was "on the brow," without deciding whether the cliff overlooked the town (ἐπὶ τοῦ πόλεος)." Na. vi. 12, 13.)

It will be seen, therefore, how very nearly the terms of the history approach a mistake and yet avoid it. As Paley remarks in another case, none but a true account could advance thus to the very brink of contradiction without falling into it.

The fortunes of Nazareth have been various. Epiphanius states that no Christians dwelt there until the time of Constantine. Helena, the mother of that emperor, is related to have built the first Church of the Annunciation here. In the time of the Crusaders, the Episcopal See of Bethanias was transferred there. The birthplace of Christianity was lost to the Christians by their defeat at Hattin in 1183, and was laid utterly in ruins by Sultan Bihars in 1293. Ages passed away before it rose again from this prostration. In 1920 the Franciscans rebuilt the Church of the Annunciation and connected a cloister with it. In 1799 the Turks assaulted the French General Janot at Nazareth, and shortly after, 2,100 French, under Kleber and Napoleon, defeated a Turkish army of 25,000 at the foot of Mount Tabor. Napoleon himself, after that battle, spent a few hours at Nazareth, and reached there the northern limit of his eastern expedition. The earthquake which destroyed Safed, in 1857, injured also Nazareth. No Jews reside there at present, which may be ascribed perhaps as much to the hostility of the government as to the former house of the prophet who was sent "to redeem Israel." H. B. H.

NAZARITES, more properly NAZIRITE (ναζήριτης and ἱερατής, ἱερατικὸς: ἱεράτης καὶ ἐνδέχεται. Num. vi: ἱερατικός, Judg. xiii. 7, Lam. iv. 7; Nazarites), one of either sex who was bound by a vow of a peculiar kind to be set apart from others for the service of God. The obligation was either for 1½ or for a determined time. The Mishna names the two classes resulting from this distinction, ἱερατικὸς ἱερατίκουs, "perpetual Nazarites" (Nazarite notices), and ἱερατικὸς ἱερατίκος, "Nazaries of days" (Nazarite notices).

1. There is no notice in the Pentateuch of Nazarites for life; but the regulations for the vow of a Nazarine of days are given Num. vi. 1-21.

The Nazarine, during the term of his consecration, was bound to abstain from wine, grapes, with every production of the vine, even to the stones and skin of the grape, and from every kind of intoxicating drink. He was forbidden to cut the hair of his head, or to approach any dead body, even that of his nearest relation. When the period of his vow was fulfilled, he was brought to the door of the Tabernacle and was required to offer a he-lamb for a burnt-offering, a ewe lamb for a sin-offering, and a ram for a peace-offering, with the usual accompaniments of peace-offerings (Lev. vii. 12, 13) and of the offering made at the consecration of priests (Ex. xxix. 2) a basket of unleavened bread, cakes of fine flour mingled with oil, and wafers of unleavened bread mounted with oil (Num. xvi. 18). He brought also a meat-offering and drink-offering, which appear to have been presented by themselves as a distinct act of service (ver. 17). He was to cut off the hair of "the head of his separation" (that is, the hair which had grown during the period of his consecration) at the door of the Tabernacle, and to put it into the fire under the sacrifice on the altar. The priest then placed upon his hands the golden shoulder of the ram, with one of the unleavened cakes and one of the wafers, and then took them again and waved them for a wave-offering. These, as well as the breast and the heave, or right shoulder (to which he was entitled in the case of ordinary peace-offerings, Lev. vii. 32-34), were the perquisite of the priest. The Nazarine also gave him a present proportioned to his circumstances (ver. 21).

If a Nazarine incurred defilement by accidentally

a Mr. Tristram's view, that "the old Nazarites was on the brow of the hill" (Land of Israel, p. 122, ed.); and not on the steep slope "as at present, if not "a mistake." So Fowler characterizes it. Nazarite's p. 52, is certainly unnecessary. b It is said that at the southeast corner of the court of the women, in Herod's temple, there was an apartment appropriated to the Nazarites, in which they used to bolt their peace-offerings and cover their hair Lightfoot, Prospect of the Temple, c. xvii. Reland, A. S. p. i. cap. 8, § 11.
NAZARITE

In Samson-Nazarite, by permission of Dr. T. M. O'Connor, from Jewish Quarterly Review.

11): but no mention is made of abstinenoe from wine. It is, however, worthy of notice that Philo makes a particular point of this, and seems to refer the words of Hannah, 1 Sam. i. 15, to Samual himself. In reference to St. John the Baptist, the Angel makes mention of abstinenoe from wine and strong drink, but not of letting the hair grow (Luke i. 15).

We are but imperfectlv informed of the difference between the observances of the Nazarite for life and those of the Nazarite for days. The latter Rabbins slightly notice this point. We do not know whether the vow for life was ever voluntarily taken by the individual. In all the cases mentioned in the sacred history, it was made by the parents before the birth of the Nazarite himself. According to the general law of vows (Num. xxx. 8), the mother could not take the vow without the father, and this is expressly applied to the Nazarite vow in the Mishna. Hannah must therefore either have presumed on her husband's concurrence, or secured it beforehand.

The Mishna makes a distinction between the ordinary Nazarite for life and the Samson-Nazarite

The former made a strong point of his purity, and, if he was polluted, offered certain atonements. But as regards his hair, when it became inconveniently long, he was allowed to cut it, if he was willing to offer the appointed victims (Num. vi. 14). The Samson-Nazarite, on the other hand, gave no corban if he touched a dead body, but he was not suffered to trim his hair under any conditions. This distinction, it is pretty evident, was suggested by the freedom with which Samson must have come in the way of the dead (Judg. xiv. 19, 20), and the terrible mutility which he paid for allowing his hair to be cut.

III. The consecration of the Nazarite bore a striking resemblance to that of the high-priest (Lev. xxi. 10-12). In one particular, this is brought out more plainly in the Hebrew text than it is in our version, in the LXX., or in the Vulgate. One word (nâ'â'â') derived from the same root as Nazarite, is used for the long hair of the Nazarite, Num. vi. 19, where the A. V. has "hair of his separation," and for the anointed head of the high-priest, Lev. xxi. 12, where it is rendered "crown." The Mishna points out the identity of the law for both the high-priest and the Nazarite in respect to pollution, in that neither was permitted to approach the corpse of even the nearest relative, while for an ordinary priest the law allowed more freedom (Lev. xxi. 2). And Maimonides (More Nebuchadh, iii. 48) speaks of the dignity of the Nazarite, in regard to his sanctity, as being equal to that of the high-priest.

The abstinenoe from wine enjoined upon the high-priest on behalf of all the priests when they were about to enter upon their ministries, is an obvious, but perhaps not such an important

press the consecration of the Nazarite (Num. vi. 4, 5). But it appears to have been especially applied to a badge of consecration and distinction worn on the head, such as the crown of a king (2 Sam. xi. 10; 2 K. xv. 12), the shemâ' (nâ'â'â') of the high-priest (Exx. xxvi. 36, xxxiv. 30), as well as his unanointed hair, the long hair of the Nazarite, and, dropping the idea of consecration altogether, to long hair in a general sense (Deut. vii. 20). This may throw light on Tit. xiv. 20 and 1 Pet. xiv. 16. See also vi. of this article.
NAZARITE point in the comparison. There is a passage in the account given by Hegesippus of St. James the Just (Eusebius, Hist. Eccl. ii. 25), which, if we may assume it to represent a genuine tradition, is worth a notice, and seems to show that Nazarites were permitted even to enter into the Holy of Holies. He says that St. James was consecrated from his birth neither to eat meat, to drink wine, to cut his hair, nor to indulge in the use of the bath, and that to him alone it was permitted (τοῦτος μόνος ἐγώ) to enter the sanctuary. Perhaps it would not be unreasonable to suppose that the half-sacerdotal character of Samuel might have been connected with his vocation as a Nazarite. Many of the Fathers designate him as a priest, although St. Jerome, on the obvious ground of his descent, denies that he had any sacerdotal rank.\(^a\)

IV. Of the two vows recorded of St. Paul, that in Acts xviii. 18,\(^b\) certainly cannot be regarded as a regular Nazarite vow. All that we are told of it is that on his way from Corinth to Jerusalem, he shaved his head in Conchreus, for he had a vow.\(^c\) It would seem that the cutting off the hair was at the commencement of the period over which the vow extended; at all events, the hair was not cut off at the door of the Temple when the sacrifices were offered, as was required by the law of the Nazarite. It is most likely that it was a sort of vow, modified from the proper Nazarite vow, which had come into use at this time amongst the religious Jews who had been visited by sickness, or any other calamity. In reference to a vow of this kind which was taken by Bernice, Josephus says that "they were accustomed to vow that they would refrain from wine, and that they would cut off their hair thirty days before the presentation of their offering."\(^d\) No hint is given us of the purport of St. Paul in this act of devotion. Spencer conjectures that it might have been performed with a view to obtain a good voyage;\(^e\) Neander, with greater probability, that it was an expression of thanksgiving and humiliation on account of some recent illness or affliction of some kind.

The other reference to a vow taken by St. Paul is in Acts xxii. 24, where we find the brethren at Jerusalem exhorting him to take part with four Christians who had a vow on them, to sanctify (not purify, as in A. V.) himself with them, and to be at charges with them, that they might shave their heads. The reason alleged for this advice is that he might prove to those who misunderstood him, that he walked orderly and kept the law. Now it cannot be doubted that this was a strictly legal Nazarite vow. He joined the four men for the last seven days of their consecration, until the offering was made for each one of them, and their hair was cut off in the usual form (ver. 26, 27). It appears to have been no uncommon thing for those charitable persons who could afford it to assist in paying for the offerings of poor Nazarites. Josephus relates that Herod Agrippa I., when he desired to show his zeal for the religion of his fathers, gave direction that many Nazarites should have their heads shorn:\(^f\) and the Gemara (quoted by Rashi, Ant. Soc.), that Alexander Jan-cus contributed towards supplying nine hundred victims for three hundred Nazarites.

V. That the institution of Nazaritanism existed and had become a matter of course among the Hebrews before the time of Moses is beyond a doubt. The legislator appears to have done no more than ordain such regulations for the vow of the Nazarite of days as brought it under the cognizance of the priest and into harmony with the general system of religious observance. It has been assumed, not unreasonably, that the consecration of the Nazarite for life was of at least equal antiquity.\(^g\) It may not have needed any notice or modification in the Law, and hence, probably, the silence respecting it in the Pentateuch. But it is doubted in regard to Nazaritanism in general, whether it was of native or foreign origin. Cyril of Alexandria considered that the letting the hair grow, the most characteristic feature in the vow, was taken from the Egyptians. This notion has been substantially adopted by Fagius,\(^h\) Spener,\(^i\) Michaels,\(^j\) Hengstenberg,\(^k\) and some other critics. Hengstenberg affirms that the Egyptians and the Hebrews were distinguished amongst ancient nations by cutting their hair as a matter of social propriety; and thus the marked significance of long hair must have been common to them both. The arguments of Hähner, however, to show that the wearing long hair in Egypt and all other heathen nations had a meaning opposed to the idea of the Nazarite vow, seem to be conclusive;\(^l\) and Winer justly observes that the points of resemblance between the Nazarite vow and heathen customs are too fragmentary and indefinite to furnish a safe foundation for an argument in favor of a foreign origin for the former.

Ewald supposes that Nazarites for life were numerous in very early times, and that they multiplied in periods of great political and religious excitement. The only ones, however, expressly named in the Old Testament are Samuel and Samuel. The rabbinical notion that Absalom was a Nazarite seems hardly worthy of notice, though Spencer and Lightfoot have adopted it.\(^m\) When Amos wrote, the Nazarites, as well as the prophets, suffered from

\(^{a}\) J. C. Orthoh, in an essay in the Thesaurus Novarum Theologicae-Philosophicae, vol. i. p. 557, entitled "Samuel Judex et Propheta, non Pontifex aut sacrosanctus sacrificios," has brought forward a mass of testimony on this subject.

\(^{b}\) Godwin, Meyer, Howson, and a few others, refer this vow to Aquila, not to St. Paul. The best arguments in favor of this view are given by Mr. Howson (Life of St. Paul, vol. i. p. 453). Dean Alford, in his note on Acts xxi. 13, has satisfactorily replied to them.\(^\text{Spencer, De Leg. Hebr. lib. iii. chap. vi. § 1.}\)

\(^{c}\) Dr. Howson formerly held that opinion, but reverts to this in his Lectures on the Character of St. Paul, p. 15 (2d ed. 1894), where he admits that the vow is more probably that of Paul than that of Aquila. Further evidence is adduced from Aquila, Aemer. ed. \(^{\text{Expositio in St. Paul's First Training of the Church, i 208 (Ryland's translation). In the passage trans-}}\)

the persecution and contempt of the ungodly. The
divine word respecting them was, "I raised up of
your sons for prophets and of your young men for
Nazarites. But ye gave the Nazarites wine to
drink, and commanded the prophets, saying, Prophecy not." (Am. ii. 11, 12). In the time of
Judas Maccabaeus we find the devout Jews, when
they were bringing their gifts to the priests, stirring
up the Nazarites of days who had completed time of their consecration, to make the accus-
toned offerings (1 Macc. iii. 49). From this inci-
dent, in connection with what has been related of
the liberality of Alexander Jannaeus and Hars
Agrippa, we may infer that the number of Nazarites
must have been very considerable during the two
centuries and a half which preceded the destruction
of Jerusalem. The instance of St. John the Baptist
and that of St. James the Just (if we accept the
traditional account, show that the Nazarite for
life retained his original character till later times; and
the act of St. Paul in joining himself with the four
Nazarites at Jerusalem seems to prove that the
vow of the Nazarite of days was as little altered in
its important features.

VI. The word יָנָרָי occurs in three passages of
the Old Testament, in which it appears to mean
one separated from others as a prince. Two of
these passages refer to Joseph; one is in Jacob's benedict-
ion to his sons (Gen. xxxvii. 26), the other in Moses'
benediction of the tribes (Deut. xxxiii. 16). As
these texts stand in our version, the blessing is
spoken of as falling "on the crown of the head of
him who was separated from his brethren." The
LXX. renders the words in one place, εἰς κοροφήν
ἀν ἴδαν ἁθὰτον ἁθαλάσσων, and in the other εἰς κοροφήν διαβαρθέντος ἐν ἁθαλάσσων. The Vulgate
translates them in each place "in verte Nazarae
inter se," The expression is strikingly like that
used of the high-priest (Lev. xxi. 10-12), and
deserves to be illustrated from the use of the
word יָנָרָי.

The third passage is that in which the prophet
is mourning over the departed prosperity and beauty
of Sion (Lam. iv. 7, 8). In the A. V., the words
are "Her Nazarites were purer than snow, they
were whiter than milk, they were more ruddy in
body than rubies, their polishing was of sapphire,
their visage is whiter than a snow, they are not
known in the streets, their skincleatherto their
bones, it is withered, it is become like a stick." In
favor of the application of this passage to the
Nazarites are the renderings of the LXX., the
Vulgate, and nearly all the versions. But Gesenius,
de Wette, and other modern critics think that
it refers to the young princes of Israel, and that
the word יָנָרָי is used in the same sense as it is in
regard to Joseph, Gen. xlix. 26 and Deut. xxxiii.
16.

VII. The vow of the Nazarite of days must
have been a self-imposed discipline, undertaken
with a specific purpose. The Jewish writers mostly re-
garded it as a kind of penance, and hence accounted
for the place which the law regulating it holds in
Leviticus immediately after the law relating to
abstinence. As the quantity of hair which grew
within the ordinary period of a vow could not have
been very considerable, and as a temporary ab-
stinence from wine was probably not a more notice-
able thing amongst the Hebrews than it is in
modern society, the Nazarite of days might have
fulfilled his vow without attracting much notice
until the day came for him to make his offering in
the Temple.

But the Nazarite for life, on the other hand,
must have been, with his flowing hair and per-
sistent refusal of strong drink, a marked man.
Whether in any other particular his daily life was
peculiar is uncertain. He may have had some
privileges (as we have seen) which gave him some-
thing of a priestly character, and (as it has been
conjectured) he may have given up much of his
time to sacred studies. Though not necessarily
cut off from social life, when the turn of his mind
was devotional, consciousness of his peculiar dedica-
tion must have influenced his habits and manner,
and in some cases probably led him to retire from
the world.

But without our resting on anything that may
be called in question, he must have been a public
witness for the idea of legal strictness and of what-
ever else Nazaritism was intended to express; and
as the vow of the Nazarite for life was taken by his
parents before he was conscious of it, his observance
of it was a sign of filial obedience, like the peculi-
arities of the Redcabites.

The meaning of the Nazarite vow has been re-
garded in different lights. Some consider it as a
symbolical expression of the Divine nature working
in man, and deny that it involved anything of a
strictly ascetic character; others see in it the prin-
ciple of stoicism, and imagine that it was intended
to cultivate, and bear witness for, the sovereignty
of the will over the lower tendencies of human
nature; while some regard it wholly in the light
of a sacrifice of the person to God.

(b) Several of the Jewish writers have taken
the first view more or less completely. Abrabanel
imagined that the hair represents the intellectual
power, the power belonging to the head, which the
wise man was not to suffer to be diminished or to
be interfered with, by drinking wine or by any other
indulgence; and that the Nazarite was not to ap-
proach the dead because he was appointed to bear
witness to the eternity of the divine nature. Of
modern critics, Bähr appears to have most com-
pletely trodden in the same track. While he denies
that the life of the Nazarite was, in the proper
sense, ascetic, he contends that his abstinence from
wine, and his not being allowed to approach the
dead, signified the separation from other men which
characterizes the consecrated servant of the Lord;
and that his long hair signified his holiness. The
hair, according to his theory, as being the bloom
Nazarite

of manhood, is the symbol of growth in the vegetable as well as the animal kingdom, and therefore of the operation of the Divine power.a

(b.) But the philosophical Jewish doctors, for the most part, seem to have preferred the second view. Thus Bachi speaks of the Nazarite as a conqueror who subdued its tendencies, and who wore his long hair as a crown; e qual ipse rex sit omnipotens imperator praetor reipublicae, cui omnipotens sunt serviti;b He supposed that the hair was worn rough, as a protest against oppression. But others, still taking it as a regal emblem, have imagined that it was kept elaborately dressed, and fancied that they see a proof of the existence of the custom in the seven locks of Samson (Judg. xvi. 13-19).c

c. Philo has taken the deeper view of the subject. In his work, On Animad. fil for Sacrifices, he gives an account of the Nazarite vow, and calls it ιονική μεταλλή. According to him the Nazarite did not sacrifice merely his possessions but his person, and the act of sacrifice was to be performed in the completest manner. The outward observances enjoined upon him were to be the genuine expressions of his spiritual devotion. To represent spotless purity within, he was to shun defilement from the dead, at the expense even of the obligation of the closest family ties. As no spiritual state or act can be signified by any single symbol, he was to identify himself with each one of the three victims which he had to offer as often as he broke his vow by accidental pollution, or when the period of his vow came to an end. He was to realize in himself the ideas of the whole burnt-offering, the sin-offering, and the peace-offering. That no mistake might be made in regard to the three sacrifices being shadows of one and the same substance, it was ordained that the victims should be individuals of one and the same species of animal. The short hair was put on the fire of the altar in order that, although the divine law did not permit the offering of human blood, something might be offered up actually a portion of his own person. Ewald, following in the same line of thought, has treated the vow of the Nazarite as an act of self-sacrifice; but he looks on the preservation of the hair as signifying that the Nazarite is so set apart for God, that no change or diminution should be made in him, or his condition altered as serving to himself and the world for a visible token of his peculiar consecration to Jehovah.f

That the Nazarite vow was essentially a sacrifice of the person to the Lord is obviously in accordance with the terms of the Law (Num. vi. 2). In the old dispensation it may have answered to that "living sacrifice, holy, acceptable unto God," which the believer is now called upon to make. As the Nazarite was a witness for the strictness of the law, as distinguished from the freedom of the Gospel, his sacrifice of himself was a submission to the letter of a rule. Its outward manifestations were restraints and eccentricities. The man was separated from his brethren that he might be peculiarly devoted to the Lord. This was consistent with the purpose of divine wisdom for the time for which it was ordained. Wisdom, we are told, was justified of her child in the life of the great Nazarite who preached the baptism of repentance when the Law was about to give way to the Gospel. Amongst those born of women, no greater than he had arisen, "but he that is least in the kingdom of Heaven is greater than he." The sacrifice which the believer now makes of himself is not to cut him off from his brethren, but to unite him more closely with them; not to subject him to an outward bond, but to confirm him in the liberty with which Christ has made him free. It is not without significance that wine under the Law was strictly forbidden to the priest who was engaged in the service of the sanctuary, and to the few whom the Nazarite vow was referred to the special service of the Lord; while in the Church of Christ it is consecrated for the use of every believer to whom the command has come, 'drink ye all of this.'g

Carpoz, Appendix Criticus, p. 148; Reland, Ant. Sacre, p. ii. c. 18; Meinhard, Pauli Nazarotus (Theodorus Theologus-philologicus, ii. 473). The notes of De Maiss and Drusius on Num. vi. (Collect Societ; the notes of Grotius on Luke i. 15, and Kuinoel on Acts xviii. 18; Spencer, De Legibus Hebraeorum, lib. iii. cap. vi. § 1; Michaelis, Commenentaries on the Laws of Moses, book iii. § 145; the Mishneh treatise Nazir, with the notes in Surenhusis's Midrash, i. 146, &c.; Bähr, Synodale, ii. 416-439; Ewald, Aberglaube, p. 98; also Gebchuch, ii. 43. Carpoz mentions with praise Nazicium, seu Commentarivs Recolu et magia in Legem Nazarotum, by Cremer. The essay of Meinhard contains a large amount of information on the subject, besides what bears immediately on St. Paul's vows. Spencer gives a full account of heathen customs in dedicating the hair. The Notes of De Maiss contain a valuable collection of Jewish testimonies on the meaning of the Nazarite vow in general. Those of Grotius relate especially to the Nazarite abstinance from wine. Hengstenberg (Egypt and the Books of Moses, p. 190, English translation) counten Bähr's theory.s

NE'AH (77277 [the settlement, Fürst; perh. inclination, descent, Dietr.], with the def. article: Vat. omits; Alex. Avriss: Anwah, a place which was one of the landmarks on the boundary of Zechulim (Josh. xix. 36 only). By Eusebius and

a Bähr defends this notion by several philological arguments, which do not seem to be much to the point. The nearest to the purpose is that derived from Lev. xxv. 5, where the unpruned vines of the sabbatical year are called Nazarites. But this, of course, can be used only as a metaphor from unshorn hair.
b Carpoz, App. Crit., p. 152. Abenazer uses very similar language (Drusius, on Num. vi. 7).
c This was also the opinion of Lightfoot. Ercriv. in loc. xi. 14, and Sermon on Judg. xi. 39.
d Spencer, De Legibus, iii. § 1.
f Lightfoot is inclined to favor certain Jewish writers who identify the vine with the tree of knowledge of good and evil, and to connect the Nazarite law with the condition of Adam before he fell (Erecrit. in Luc. i. 15). This strange notion is made still more fanciful by Magee (Attonement and Sacrifice, Illustration xxxviii.).
g This consideration might surely have furnished St. Jerome with a better answer to the Talmudists, who alleged Amos ii. 12 in defense of their abstinance from wine, than his bitter taunt that they were bringing "Judaeus fabulas in to the church, and that they were bound, on their own ground, neither to cut their hair, to wine, or rain, in order to approach the corpse of a dead parent (in Amos ii. 12).
h This is the reading of the text of the Vulgate given in the Benedictine edition of Jerome. The ordinary copies have Nos.
Jerome (comment. "Anna") it is mentioned merely with a caution that there is a place of the same name, 10 miles S. of Neapolis. It has not yet been identified; see Schwartz. If "el Mahdi," about 2 miles E. of Sifirdere, be GAVILHIL, and Rumiwali about 4 miles N. E. of the same place, Richard, then Nea must probably be sought somewhere to the north of the last named town.

G.

NEAPOLIS (NeaPolis, a new city: Neapolis) is the place in northern Greece where Paul and his associates first landed in Europe (Acts xvi. 11); where, no doubt, he landed also on his second visit to Macedonia (Acts xx. 1), and whence certainly he embarked on his last journey through that province to Troas and Jerusalem (Acts xx. 6). Neapolis being an inland town, Neapolis was evidently the port: and hence it is accounted for, that Luke leaves the verb which describes the voyage from Troas to Neapolis (ειπομενον αρξαν), to describe the continuance of the journey from Neapolis to Philippi. It has been made a question whether this harbor occupied the site of the present Kavalla, or that of an ancient harbor on a coast of which ruins are supposed to have been sought at some other place. Consinèry (Voyage dans la Morinienne et Tafel (De Vre Militaire Romanae Egnitio, etc.) maintain against the common opinion, that Luke's Neapolis was not at Kavalla, the inhabited town of that name, but at a deserted harbor ten or twelve miles further west, known as Eski or Old Kavalla. Most of those who contend for the other identification assume the point without much discussion, and the subject demands still the attention of the Biblical geographer. It may be well, therefore, to mention with some fullness the reasons which support the claim of Kavalla to be regarded as the ancient Neapolis, in opposition to those which are urged in favor of the other harbor.

First, the Roman and Greek ruins at Kavalla prove that a port existed there in ancient times. Neapolis, wherever it was, formed the point of contact between Northern Greece and Asia Minor, at a period of great commercial activity, and would be expected to have left vestiges of its former importance. The antiquities found still at Kavalla fulfill entirely that presumption. One of these is a massive aqueduct, which brings water into the town from a distance of ten or twelve miles north of Kavalla, along the slopes of Sympolum. It is built on two tiers of arches, a hundred feet long and eighty feet high, and is carried over the narrow valley between the promontory and the mainland. The upper part of the work is modern, but the substructions are evidently Roman, as is seen from the composite character of the material, the cement, and the style of the masonry. Just out of the western gate are two marble sarcophagi, used as water-jugs, with Latin inscriptions of the age of the emperor Claudius. Columns with capitals of elegant Ionic workmanship, blocks of marble, fragments of hewn stone, evidently antique, are in the town and the suburb. On some of these are inscriptions, mostly in Latin, but some in Greek. In digging for the foundations of some houses of ancient times, they are often brought to light, and sometimes tablets with sculptured figures, which would be deemed curious at Athens or Corinth. For fuller details, see Bibl. Antiqu. xxxii. 881 ff. (October, 1860). [COLONI. Americ. ed.] On the contrary, no ruins have been found at Eski Kavalla, or Palaiopolis, as it is also called, which can be pronounced unmistakably ancient. No remains of walls, no inscriptions, and no indications of any thoroughfare leading thence to Philippi, are reported to exist there. Consinèry, it is true, speaks of certain ruins at the place which he deems worthy of notice; but according to the testimony of others these ruins are altogether incon siderable, and, which is still more decisive, are modern in their character. Consinèry himself, in fact, corroborates this, when he says that on the isthmus which binds the peninsula to the main land, "on trouve les ruines de l'ancienne Neapolis ou celles d'un château reconstruit dans le moyen âge." It appears that a medieval or Venetian fortress existed there; but as far as is yet ascertain ed, nothing else has been discovered which points to an earlier period.

Secondly, the advantages of the position render Kavalla the probable site of Neapolis. It is the first convenient harbor south of the Hellespont, on coming from the east. Thassos serves as a natural landmark. Tafel says, indeed, that Kavalla has no port, or one next to none; but that is incorrect. The fact that the place is now the seat of an active commerce proves the contrary. It lies open somewhat to the south and southwest, but is otherwise well sheltered. There is no danger in going into the harbor. Even a rock which lies off the point of the town has twelve fathoms alongside of it. The bottom affords good anchorage: and although the bay may not be so large as that of Eski Kavalla, it is ample for the accommodation of any number of vessels which the course of trade or travel between Asia Minor and Northern Greece would be likely to bring together there at any one time.

Thirdly, the facility of intercourse between this port and Philippi shows that Kavalla and Neapolis must be the same. The distance is nearly ten miles, and hence not greater than Corinth was from Cenchrea, and Ostia from Rome. Both places are in sight at once from the top of Sympolum. The distance between Philippi and Eski Kavalla must be nearly twice as great. Nature itself has opened a passage from the one place to the other. The mountains which guard the plain of Philippi on the coast-side fall apart just behind Kavalla, and render the construction of a road there entirely easy. No other such defile exists at any other point in this line of formidable hills. It is impossible to view the configuration of the country from the sea and not feel at once that the only natural place for crossing into the interior is this break down in the vicinity of Kavalla.
Fourthly, the notices of the ancient writers lead us to adopt the same view. Thus Dio Cassius says (Hist. Rom. xlvii. 35), that Neapolis was opposite Thasos (σετ ἀντίπαρος Θάσου), and that is the situation of Kavalla. It would be much less correct, if correct at all, to say that the other Kavalla was verified, since no part of the Kavalla scriptor is for the west. Agnes (Bell. Circ. Eccl. 1961) says that the camp of the Republicans near the Ganges, the river (πόρος) at Philippi, was nine Roman miles from their trinames at Neapolis (it was considerably further to the other place), and that Thasos was twelve Roman miles from their naval station (so we should understand the text); the latter distance appropriate again to Kavalla, but not to the harbor further west.

Finally, the ancient Itineraries support entirely the identification in question. Both the Antonine and the Jerusalem Itineraries show that the Egyptian Way passed through Philippi. They mention Philippi and Neapolis as next to each other in the order of succession; and since the line of travel which these Itineraries sketch was the one which led from the west to Illyricum, or Constantinople, it is reasonable to suppose that the road, after leaving Philippi, would pursue the most convenient and direct course to the east which the nature of the country allows. If the road, therefore, was constructed on this obvious principle, it would follow the track of the present Turkish road, and the next station, consequently, would be Neapolis, or Kavalla, on the coast, at the termination of the only natural defile across the intervening mountains. The distance, as has been said, is about ten miles. The Jerusalem Itinerary gives the distance between Philippi and Neapolis as ten Roman miles, and the Antonine Itinerary as twelve miles. The difference in the latter case is unimportant, and not greater than in some other instances where the places in the two Itineraries are unquestionably the same. It must be several miles further than this from Philippi to Old Kavalla, and hence the Neapolis of the Itineraries could not be at that point. The theory of Tafel is, that Akontisna or Herkontroma (the same place, without doubt), which the Itineraries mention next to Neapolis, was at the present Kavalla, and Neapolis at Lentere or Eski Kavalla. This theory, it is true, arranges the places in the order of the Itineraries: but, as Leahy objects, there would be a needless detour of nearly twenty miles, and that through a region much more difficult than the direct way. The more accredited view is that Akontisna was beyond Kavalla, further east.

Neapolis, therefore, like the present Kavalla, was on a high rocky promontory which juts out into the Ægean. The harbor, a mile and a half wide at the entrance, and half a mile broad, lies on the west side. The indiffer ent roadstead on the east should not be called a harbor. Symbolum, 1670 feet high, with a defile which leads into the plain of Philippi, comes down near to the coast a little to the west of the town. In winter the sun sinks behind Mount Athos in the southwest as early as 4 o'clock p.m. The land along the eastern shore is low, and otherwise unmarked by any peculiarity. The home of Thasos bears a little to the S. E., twelve or fifteen miles distant. Plane-trees just beyond the walls, not less than four or five hundred years old, cast their shadow over the road which Paul followed on his way to Philippi. Kavalla has a population of five or six thousand, nine-tenths of whom are Mussulmans, and the rest Greeks.

NEAPOLIS

For Neapolis as the Greek name of Shechem, now Nablus, see SHECHEM. H. B. H.

* The region of Neapolis or Macedonia appears to have been the northern limit of Paul's travels. It may have been in this country and climate that the Apostle suffered some of the privations (among which were "cold" and "nakedness") of which he writes in 2 Cor. xi. 27. The winter, for example, of 1857-8, which saw one of Egypt's severest f blessings. Symbolum, over which the road passes to Philippi from the coast, was covered with deep snow, and the road thence onward to Thessalonica became for a time impassable. Shepherds and travellers were frozen to death, and the flocks were destroyed in a frightful manner. During a snowstorm there of two weeks in December, 1858, the thermometer fell repeatedly below zero. Huge icicles hung from the arches of the old aqueduct. All the streams and pools were frozen, and Thasos in the distance appeared white with snow to the very shore. For successive days the streets of Kavalla were almost deserted. It is not at all improbable that the Apostle's first sojourn in Macedonia, and perhaps part of his second, fell in that season of the year. The Apostle arrived in Macedonia on his second visit early in the summer; for, remaining at Ephesus until Pentecost (as may be inferred from 1 Cor. xvi. 8), and for a short time at Troas (2 Cor. ii. 12, 13), he then proceeded directly to Macedonia. But as he went, at this time, westward as far as Illyricum (Rom. xv. 19), and as he spent but three months at Corinth before his return to Macedonia, at the succeeding Pentecost (Acts xx. 6), he must have prolonged his stay in northern Greece into or through December.

Kavalla (Cavalle, so common in many of the books, is unknown on the ground) consists of an inner or upper part, inclosed by a crenelated medi eval wall, and an outer part or suburb, also surrounded by a wall, but of more recent construction. Even the outer wall does not include the entire promontory, but leaves the western slope outside, part of which is filled, and the remainder is levelled rock. The celebrated Mohammed Ali, Pasha of Egypt, was born here in 1769. He showed through life, a warm attachment to his native place, and, among the proofs of this, was this munificent endowment of a madriss, or college, in which at the present time three hundred scholars are taught and supported, without any expense to themselves. The funds are so ample, that doles of bread and rice are given out, daily, to hundreds of the inhabitants of Kavalla. Just before his death in 1848, the Pasha made a final visit to his birthplace. On landing he went to the house in which he was born; but remained there only a few hours, and having spent these in religious worship, under the roof which first sheltered him, hastened back to his ship, and the next day departed for Egypt.

(For other information see Add. Index as above.)

H.

* NEAPOLIS, a later name of Emmaus in the south of Palestine. [EMMAUS, 2.]

1. One of the six sons of Shemaijah in the line of the royal family of Judah after the Captivity (1 Chron. ii. 22, 23).

2. [Comp. Naapâia.] A son of Ishi, and one of the captains of the 500 Simeonites who, in the
days of Hezekiah, drove out the Amalekites from Mount Seir (1 Chr. iv. 42).

NEBAI [2 syl.] (נְבָיָא ; Keri. נְבָיָה [perh. fruiful]). Naḥaḥ. [Vat. FA. Barat. N. Ven.] A family of the heads of the people who signed the covenant with Nebuchadnezzar (Neh. x. 19). The LXX. follow the written text, while the Vulgate adopted the reading of the margin.

NEBAIOITH. [3 syl.] NEBAIOTH (נְבָיָוָית [light]). in Gen. xxv. 13, Naḥaḥâ; xxviii. 9, Rom. Naḥaḥâ; Naḥaṭâ; Naḥaṭḥo — Naḥaṣṭoḥ, the first born of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), and father of a pastoral tribe named after him, the sons of Naḥaṣṭoḥ, being mentioned by the prophet Isaiah (vi. 7) with the words of Kedar. From the days of Jerome (Comment. in Gen. xxv. 13) this people had been identified with the Nabathéans, until M. Quatremére first investigated the origin of the latter, their language, religion and history; and by the light he threw on a very obscure subject enabled us to form a cleaner judgment respecting this assumed identification than was, before, the state of knowledge possible. It will be convenient to recapitulate, briefly, the results of M. Quatremére's labours, with those of the later works of M. Chwolson and others on the same subject, before we consider the grounds for identifying the Nabathéans with Naḥaṣṭoḥ.

From the works of Arab authors, M. Quatremére (Histoire sur les Nabatéens, Paris, 1855, reprinted from the Nau'cen. Journ. Asiât. Jan.-Mar. 1856) proved the existence of a nation called Nabat, or Nabeet (نَبِيْت) pl. Nabât (نَبَات) (Silith and Kumi, repeated to be of ancient origin, of whom scattered remnants existed in Arab times, after the era of the Flight. The Nabat, in the days of their early prosperity, inhabited the country chiefly between the Euphrates and the Tigris, between Nahrawân and El-Iak (the Mesopotamia and Chaldaea of the classics). That this was their chief seat and that they were Arameans, or more accurately Syro-Chaldaean, seems in the present state of the inquiry (for it will presently be seen that, by the publication of oriental texts, our knowledge may be very greatly enlarged) to be a safe conclusion. The Arabs loosely apply the name Nabat to the Syrians, or especially the eastern Syrians, to the Syro-Chaldaean, etc. Thus El-Mc-Tselder (op. Quatremére, ii, c.) says, "The Syrians are the same as the Nabathéans (Nabat). . . The Ninmards were the kings of the Syrians whom the Arabs call Nabathéans. . . . The Chaldaeans are the same as the Syrians, otherwise called Nabat (Nàbat-d-Tebńska). The Nabathéans . . . founded the city of Babylon . . . The inhabitants of Ninmards . . . who were called Naḥaṣṭoḥ or Syrians, who form one nation and speak one language; that of the Naḥaṣṭoḥ differs only in a small number of letters; but the tenor of the language is identical (Nàbat-Muṣanaj-El-Dhakah)."

These, and many other fragmentary passages, prove sufficiently the existence of a great Aramaean people called Nabat, celebrated among the Arabs for their knowledge of agriculture, and of magic, astronomy, medicine, and science so-called generally. But we have stronger evidence to this effect Quatremére introduced to the notice of the learned world the most important relic of that people's literature, a treatise on Nabat agriculture. A study of an important extract of that work, which unfortunately was all he could gain access to, induced him to write about the time of Nebuchadnezzar, or cir. n. c. 600. M. Chwolson, professor of oriental languages at St. Petersburg, who had shown himself fitted for the inquiry by his treatise on the Sabians and their religion (Die Sabier und der Sabianismus), has since made that book a subject of special study; and in his Researches into Arabic-Babylonian Literature in Arabic Translations (Über die Babylonischen Literatur in Arabischen Übersetzungen, St. Petersburg, 1859), he has published the results of his inquiry. Those results, while they establish all M. Quatremére had advanced respecting the existence of the Nabat, go far beyond him both in the antiquity and the importance M. Chwolson claims for that people. Even, however, in 1857, stated some grave causes for doubting this antiquity, and again in 1859 (both papers appeared in the Giuotische gelehrte Anzeigen) repeated moderately but decidedly his misgivings. M. Renan followed on the same line (Journ. de L'Institut, Apr.-May, 1869); and more recently, M. de Gutschmid (Zehntericht d. Deutsch. Morgenland. Gesellschaft, xv. 1-100) has attacked the whole theory in a lengthy essay. The limits of this Dictionary forbid us to do more than recapitulate, as shortly as possible, the bearings of this remarkable inquiry, as far as they relate to the subject of the article.

The remains of the literature of the Nabat consist of four works, one of them a fragment: the "Book of Nabat Agriculture" (already mentioned); the "Book of Poisons;" the "Book of Tenkobsha the Babylonian;" and the "Book of the Secrets of the Sun and Moon." (Chwolson, Übersetzungen, pp. 10, 11.) They purport to have been translated, in the year 904, by Alaw-Ihak Ahmad Ibn-Abi Chebiel of Kesire, better known as Ibn-Walbiske wyświetlacz. The "Book of Nabat Agriculture" was, according to the Arab translator, commenced by Pagnel, continued by Yânschah, and completed by Kuthanee. Chwolson, disregarding the dates assigned to these authors by the Arab translator, in the early 900's c. e., the second some 200 or 400 years later, and Kuthanee, to whom he ascribes the chief authorship (Ibn-Walbiskech says he was little more than editor), at the earliest under the 9th king of a Canaanite dynasty mentioned in the book, which dynasty Chwolson - with Bunsen - makes the same as the 5th (or Arabian) dynasty of Berosus (Chwolson, Übersetzungen, p. 68, etc.); Bunsen, Egypt. iii. 342, &c.; Cory's Ancient Fragments, 2d ed. p. 60), or of the 15th century n. c. It will thus be seen that he rejects most of M. Quatremére's reasons for placing the work in the time of Nebuchadnezzar. It is remarkable that that great king is not mentioned, and the author or authors were, it is argued by Chwolson, ignorant not only of the existence of Christianity, but of the kingdom and faith of Israel. While these and other reasons, it granted, strengthen M. Chwolson's case for the antiquity of the work, on the other hand it is urged that even neglecting the difficulties attending an Arab's translating so ancient a writing (and we reject altogether the supposition that it was modernized as being without a parallel, at least in Arabic literature), and conceding that
the was of Chaldean or Nabat race — we encounter formidable intrinsic difficulties. The book contains mentions of personages bearing names closely resembling those of Adam, Seth, Enoch, Noah, Shem, Nimrod, and Abraham; and M. Chwolson himself is forced to confess that the particulars related of them are in some respects similar to those recorded of the Biblical patriarchs. If this difficulty proves insurmountable, it shows that the author borrowed from the Bible, or from late Jews, and destroys the claim of an extreme antiquity. Other apparent evidences of the same kind are not wanting. Such are the mentions of Eremeeas [Hermes], Agathodaimon (Agathodaimon), Tamman (Adonis), and Yoonin (Ionians). It is even a question whether the work should not be dated several centuries after the commencement of our era. Anachronisms, it is asserted, abound; geographical, linguistic (the use of late words and phrases), historical, and religious (such as the traces of Hellenism, as shown in the mention of Hermes, etc., and influences to be ascribed to Neoplatonism). The whole style is said to be modern, wanting the rugged vigor of antiquity (this, however, is a delicate issue, to be tried only by the ripest scholarship). And while Chwolson dates the oldest part of the Book of Agriculture b. c. 2500, and the Book of Tenkelosha in the 1st century, A. D. at the latest (p. 136), Renan asserts that the two are so similar as to preclude the notion of their being separated by any great interval of time (Journal de l'Institut).

Although Quatremère recovered the broad outlines of the religion and language of the Nabat, a more extended knowledge of these points hangs mainly on the genuineness or spuriousness of the work of Kuthame. If M. Chwolson's theory be correct, that people present to us one of the most ancient forms of idolatry; and by their writings we can trace the origin and rise of successive phases of pantheism, and the roots of the complicated forms of idolatry, heresy, and philosophical infidelity, which abounded in the old seats of the Araucan race. At present, we may conclude that they were Sabians (Sa'ibiyun), at least in late times, as Sabeism succeeded the older religions; and their doctrines seem to have approached (how nearly a further knowledge of these obscure subjects will show) those of the Medinees, Mandiates, or Gnostics. Their language presents similar difficulties; according to M. Chwolson, it is the ancient language of Babylonia. A cautious criticism would (till we know more) assign it a place as a comparatively modern dialect of Syro-Chalde (comp. Quatremère, Mém. 100–103).

Thus, if M. Chwolson's results are accepted, the Book of Nabat Agriculture exhibits to us an ancient civilization, before that of the Greeks, and at least as old as that of the Egyptians, of a great and powerful nation of remote antiquity; making us acquainted with sages hitherto unknown, and with the religions and sciences they either founded or advanced; and throwing a flood of light on what has till now been one of the darkest pages of the world's history. But until the original text of Kuthame's treatise is published, we must withhold our acceptance of facts so startling.

—and regard the antiquity ascribed to it even by Quatremère as extremely doubtful. It is sufficient for the present to know that the most important facts advanced by the latter — the most important when regarded by sober criticism — are supported by the results of the later inquiries of M. Chwolson and others. It remains for us to state the grounds for connecting the Nabat with the Nabatheans.

As the more we speak of the Nabat as Syrians, so conversely the Greeks and Romans knew the Nabatheans (oi Naβarwοι and Naβarwοι, LXX.: Alex. Naβaroi; Nabath, Vulg.: Ararwοι, or Naβarwοι, P. v. 7, § 21; Naβarw, Suid. s. v.: Nabath) as Arabs. While the inhabitants of the peninsula were comparative strangers to the classical writers, and very little was known of the farther-removed peoples of Chaldean and Mesopotamia, the Nabatheans bordered the well-known Egyptian and Syrian provinces. The nation was famous for its wealth and commerce. Even when, by the decline of its trade (diverted through Egypt), its prosperity waned, Petra is still mentioned as a centre of the trade both of the Sabaeans of Southern Arabia [Shibam] and the Gerhaeans on the Persian Gulf. It is this extension across the desert that most clearly connects this Nabathean colony with the birthplace of the nation in Chaldea. The notorious trade of Petra across the well-trudged desert-road to the Persian gulf is sufficient to account for the presence of this colony; just as traces of Arabian peoples [Bedan, etc.] are found, demonstrably, on the shores of that sea on the east, and on the borders of Palestine on the west, while along the northern limits of the Arabian peninsula remains of the caravan stations still exist. Nothing is more certain than the existence of this great stream of commerce, from remote times, until the opening of the Egyptian route gradually destroyed it. Josephus (Ant. i. 12, § 4) speaks of Nabata (Naβarwοι, Strab.: Naβarw, Joseph.) as embracing the country from the Euphrates to the Red Sea — i. e. Petraea and all the desert east of it. The Nabat of the Arabs, however, are described as famed for agriculture and science; in these respects offering a contrast to the Nabatheans of Petra, who were found by the expedition sent by Antigonus (b. c. 312) to be dwellers in tents, pastoral, and conducting the trade of the desert; but in the Red Sea again they were piratical, and by sea-faring qualities showed a non-Semitic character.

We agree with M. Quatremère (Mém. p. 81), while rejecting other of his reasons, that the civilization of the Nabatheans of Petra, far advanced on that of the surrounding Arabs, is not easily explained except by supposing them to be a different people from those Arabs. A remarkable confirmation of this supposition is found in the character of the buildings of Petra, which are unlike anything constructed by a purely Semitic race. Architecture is a characteristic of Aryan or mixed races. In Southern Arabia, Negritians and Semites (Jukumites) together built huge edifices; so in Babylonia and Assyria, and so too in Egypt, mixed races left this unmistakable mark. [Arabia Petra], while it is wanting in the colossal feats of those more ancient races, is yet an unequivocally foreign to an unmixed Semitic race. Further, the subjects of the literature of the Nabat, which are scientific and industrial, are not such as are found in the writings of pure Semites or Arabs, as Irenae
NEBAIOTH

(Hist. des Langues Semitiques, p. 227) has well observed; and he points, as we have above, to a foreign (“Conchite,” or partly Negritian) settlement in Babylonia. It is noteworthy that "Nebaioth" (at the end of the fourth section of his first book, or treatise, see De Las’s ed.) signifies the Egyptians in Egypt (a mixed race) to the Nabat in El-Irak.

From most of these, and other considerations, we think there is no reasonable doubt that the Nabathians of Arabia Petraea were the same people as the Nabat of Chaldæa: though at what specific epoch the western settlement was formed remains unknown. That it was not of any importance until after the Captivity appears from the notices of the inhabitants of Edom in the canonical books, and their absolute silence respecting the Nabathians, except (if Nebaioth be identified with them) the passage in Isaiah (xi. 7).

The Nabathians were allies of the Jews after the Captivity, and Judas the Macabee, with Jonathan, while at war with the Edomites, came on them three days south of Jordan (1 Macc. v. 3, 24, &c.; Joseph. Ant. xii. 8, § 3), and afterwards Jonathan had sent his brother John, a captain of the people, to pray his friends the Nabathites that they might leave with them their carriage, which was much " (ix. 35, 36). Deod. Sic. gives much information regarding them, and so too Strabo, from the expedition under Elias Gallus, the object of which was defeated by the treachery of the Nabathians (see the Dict. of Geography, to which the history of Nabatha in classical times properly belongs).

Lastly, did the Nabathians, or Nabat, derive their name, and were they in part descended, from Nebiob, son of Ismael? Josephus says that Nabata was inhabited by the twelve sons of Ismael: and Jerome, "Nebiobum omnis regio ab Euphrate usque ad Mare Rubrum Nabatha usque luditur, quae pars Arabiae est " (Comment. in Gen. xxxv. 15). Quadratire rejects the identification for an etymological reason — the change of א to א; but this change is not usual; in words Arabized from the Greek, the like change of γ generally occurs. Racoa, on the other hand, accepts it; regarding Nebiob, after his manner, merely as an ancient name unconnected with the biblical history. The Arabs call Nebiob, Nabat, and do not connect him with the Nabat, to whom they give a different descent; but all their Arabianic genealogies come from late Jews, and are utterly untrustworthy. When we remember the darkness that ensnares the early history of the "sons of the concubines" after they were sent into the east country, we hesitate to deny a relationship between peoples whose names are strikingly similar, dwelling in the same tract. It is possible that Nebiob went to the far east, to the country of his grandfather Abraham, intermarried with the Chaldeans, and gave birth to a mixed race, the Nabat. Instances of ancient tribes adopting the name of more modern ones, with which they have become merged, are particularly frequent in the history of the Arabs (see MOHAMMAD, note-foote); but we think it is also admissible to hold that Nebiob was so named by the sacred historian because he intermarried with the Nabat. It is, however, safest to leave unsettled the identification of Nebiob and Nabat until another link be added to the chain that at present seems to connect them.

E. S. P.

NEBAL/LAT ( Caleb. projection, asp, Dict.; bard, firm soil, Fürst); Vat. [Rom. Alex.] omit; Alex. [rather, F.A.] نباليث: Nebailoth, a town of Benjamin, one of those which the Benjamites resented after the Captivity (Neh. xi. 34), but not mentioned in the original enumeration (comp. Josh. xiii. 21 ff.). It is here named with Zerom, Lod, and Oso. Lod is Lydda, the modern Lybidding, and Oso not improbably Kiffa Aavam, four miles to the north of it. East of these, and forming nearly an equilateral triangle with them, is Beit Nebail (Rob. ii. 232), which is possibly the kibbat tenua of the ancient village. Another place of the same name, Beit Nebail, which we place in the east of el-Leih (Gibbon), and within half a mile of it. This would also be within the territory of Benjamin, and although further removed from Lod and Oso, yet if Zeroma should on investigation prove (as is not impossible) to be in one of the wadies which penetrate the eastern side of this district and lead down to the Jordan Valley (comp. i Sam. xiii. 18), then, in that case, this situation might not be unsuitable for Nebailoth.

E. S. P.

NEBAT ( ricer, aspect, Ges.: cultivation; Fürst); Nebait: Vat. [Rom. Alex.] نباث: Nebath, but Nebait in 1 K. xi. The father of Jerobeam, whose name is only preserved in connection with that of his distinguished son (1 K. xi. 26, xii. 2, 15, xv. 1, xvi. 3, 31, xxii. 22, xxii. 52; 2 K. iii. 3, ix. 9, x. 24, xii. 2, 11, xiv. 24, xvi. 18, 24, 28, xxvi. 21, xvii. 15; 2 Chr. ix. 2, x. 15, xiii. 6). He is described as an Ephraimite, or Ephrainite, of Zereda in the Jordan Valley, and appears to have died while his brother Jerobeam was forming his Jewish tradition preserved in Jerome (Quast. Hebr. in lib. Reg.) identifies him with Shimeon of Gera, who was a Benjaminite. [JEROBOAM.]

NEBO, MOUNT (Mount Nebo, i.e., a heathen god = Mercury); Nephot, Nepo (Nebo). The mountain from which Moses took his first and last view of the Promised Land (Deut. xxxii. 49, xxxiv. 1). It is so minutely described, that it would seem impossible not to recognize it: in the land of Moab; facing Jericho: the head or summit of a mountain called the Pisgah, which again seems to have formed a portion of the gentile remains of the mountains of Moab. Its position is further denoted by the mention of the valley (or perhaps more correctly the ravine) in which are mentioned by trustworthy Arab writers as existing in their own day, no Arab record connecting that people with Canaan, and believing this to have arisen from the Chaldean speech of the Nabathians, and their corruption of Arabic (Essai sur l’Hist. des Arabes avant l’Islamisme, i. 38).

Schwartz p. 131, with less than usual accuracy, places "Beth Nebaila" at "five miles south of Bethleh." It is really about that distance. E. F. of it.
which Moses was buried, and which was apparently the highest of the mount itself, is called "Mosh Bether"—
the ravine in the land of Mosh facing Beth-Poor" (xxxiv. 6). And yet, notwithstanding the minute-
ness of this description, no one has yet succeeded in pointing out any spot which answers to Nebo.
Viewed from the western side of Jordan (the nearest point at which most travellers are able to view
them) the mountains of Moab present the appearance of a wall, the upper line of which is
almost straight and horizontal. "There is no peak or
point perceptibly higher than the rest; but all is one
apparently level line of summit, without peaks or
gaps" (Rob. Bibl. Rel. i. 570). "On ne distingue
pas un sommet, pas la moindre cime; seulement
sur apero, ci et là, de légères inflexions, comme si
la mait ce pointait qui a brisé cette ligne horizontale
sur le ciel est tombé dans quelles écrins" (Clas
tenbrandt, Itinéraire, part 3). "Possible,"
continues Robinson, "on travelling amongst
these mountains, some isolated point or summit might
be found answering to the position and character
of Nebo." Two such points have been named.
(1.) Seetzen (March 17, 1806; Reise, vol. i. 408)
seems to have been the first to suggest the "Jebel
Abdar Attarás (between the Vody Zekein-Maia and the
Arnon, 3 miles below the former, and 10 or 13
south of Heshbon) as the Nebo of Moses. In this
he is followed (though probably without any commu-
nication) by Barckhardt (July 14, 1812), who
mentions it as the highest point in that locality,
and therefore probably "Mount Nebo of the
Scripture." This is adopted by Irby and Mangles,
though with hesitation (Travels, June 8, 1818).
(2.) The other elevation above the general sum-
mit level of these highlands is the "Jebel "Odho, or
AinJar, or Jебel el-Téláš," "the highest point in
all the eastern mountains," "overtopping the whole
of the Belbo, and rising about 3000 feet above the
Ghor" (Barckhardt, July 2, 1812; Robinson, i. 527
note, 570).

But these elevations are alike wanting in one
main essential of the Nebo of the Scripture, which
is stated to have been "facing Jericho," words
which in the widest interpretation must imply that
it was "some elevation immediately over the last
stage of the Jordan," while "Odho and Attarás are
equally remote in opposite directions, the one 13
miles north, the other 15 miles south of a line
drawn eastward from Jericho. Another requisite
for the identification is, that a view should be ob-
tainable from the summit, corresponding to that
prospect over the whole land which Moses is said
to have had from Mount Nebo: even though, as
Professor Stanley has remarked (S. P. P. 301), that
was a view which in its full extent must have been
imagined rather than actually seen. The view from
Jebel Attarás has been briefly described by Mr. Porter
(Humbl. 309), though without reference to the
possibility of its being Nebo. Of that from Jebel
Attarás, no description is extant, for, almost in-
credible as it seems, none of the travellers above
named, although they believed it to be Nebo, ap-
pear to have made any attempt to direct so far
along their route as to ascend an eminence, which,
if their conjectures be correct, must be the most
interesting spot in the world.

* It is a pleasure to add, that since the date of the preceding article, the best Nebo to which
Moses beheld the land of promise, just before his
death, has in all probability been identified. Do
Sauley may have singled out the right summit, but
he did not verify his conjecture, and we are mainly
indebted to Mr. Tristram for the discovery.
This traveller ascended one of the ridges or "brows" of
the Alabum or Moab Mountains, on the east of the
Jordan, which in its position and the wide prospect
which it commands, is remarkably analogous to the
Biblical account. It is about three miles southwest
of Heshbon (Heshbon), and about a mile and a half
due west of Moab (Bad-Meon). It overlooks the
mouth of the Jordan, "over against Jericho" (Dent.
xxxiv. 1), and the gentle slope of its sides may well
answer to "the field of Zophim" (Num. xxiii. 14). It is not an isolated peak, but one of
"a succession of bare turf-clad eminences, so linked
and stretched together that the depressions between them were
more hollows rather than valleys." It is the
"highest of these, which differ, however, so little
that Mr. Tristram thought it impossible "to pitch
upon the exact Pisgah with certainty." It must be left to the traveller's own words to
describe the magnificent panorama which lies spread
before the eyes from this summit.

"The altitude of the brow cannot be less than
4,500 feet, so completely does it overlook the heights
of Hebron and of Central Judaea. To the eastward,
as we turned round, the ridge seemed gently to slope
to two or three miles, when a few small ruin-chad
"tells" or hilltops (Heshbin, Moab, and others)
broken the monotony of the outline; and then,
sweeping forth, rolled in one vast unbroken expanse
the roughly Belbo—and hopeless plain, stretching
far into Arabia, till lost in the horizon—one waving
ocean of corn and grass. Well may the Arabs boast,
"Thou cannot find a country like the Belbo."

. . . As the eye turned southwards towards the
line of the ridge on which we were clustered, the
peak of Jebel Shilibin just stood out behind Jebel
Attarás, which opened to reveal us to the situation
of Jericho; though not its walls. Beyond and behind
these, sharply rose Mounts Hor and Seir, and the
rose granite peaks of Arabia faded away into the
distance towards Meboh. Still turning westwards,
in front of us, two or three lines of terraces reduced
the height of the plateau as it descended to the
Dead Sea, the western outline of which we could
trace, in its full extent, from Elboran to Feshkiboh.
It lay like a long strip of modern metal, with the
sun mirrored on its surface, waving and undulating
on its further edge, unseen on its eastern limits, as
though poured from some deep cavel beneath our
feet. There, almost in the centre of the line, a
break in the ridge and a green spot below marked
Engelri, the next once of the Kenite, now of the
wild goat. The fortress of Ameda and Jayed
Bshiyi rose above the mountain-line, but still far
below us, and lower, too, than the ridge of Hebron,
which we could trace, as it tilted gradually from
the southwest, as far as Bethlehem and Jerusalem.
The buildings of Jerusalem we could not see, though
all the familiar points in the neighborhood were at
once identified. There was the Mount of Olives,
with the church at its top, the gap in the hills
leading up from Jericho, and the rounded heights
of Bethany. Still further to the east from this summit turning north-
ward, the eye was riveted by the deep Ghor, with
the rich green islets of Ain Sulima and Ain Dak—
the twin cases, nestling, as it were, under the wall of

\[a\] This view was probably identical with that seen
by Bahaun (Num. xxiii. 14). It is beautifully drawn
out in detail by Prof. Stanley (S. P. P. 299).
Quarantania (the traditional scene of Christ's temptation). There—closer still, beneath us—lies Jericho, half concealed, in front of the green fringe which peeped forth from under the terraces in our foreground. The dark simoom's bed of Jordan, clearly defined near its mouth, was soon lost in dim haze. Then, looking over it, the eye rested on Jericho's rounded top; and, farther still, opened the plain of Esdraelon, a shoulder of Carmel, or some other intervening height, just showing to the right; while the broad, distant and bluish haze beyond told us that there was the sea, the utmost sea. It seemed as if but a whiff were needed to brush off the haze and reveal it clearly.

Northwards, again, rose the distinct outline of unmistakable Tabor, visible by which we could identify Gilboa and Jezreel. Snowy Hermon's top was mantled with cloud, and Lebanon's highest range must have been exactly shut behind it; but in front, due north of us, stretched in long line the dark forests of Aylon, bold and undulating, with the steep sides of mountains here and there whitened by cliffs; terminating in Mount Gilboa, behind es-Salt. To the northeast the vast Harraun stretched beyond, filling in the horizon line to the Bheko, between which and the Harraun (Bashan) there seems to be no natural line of separation. The high range of Jahl Harraun, behind Bashan, was distinctly visible. (Land of Israel, pp. 544–543, 2d ed.)

Dr. Saley reports that he heard this mountain (it seems to have been this) called Nebecho (Neb) by the Arabs; but the statement needs confirmation. Mr. Tristram states his own conclusion thus: "We were undoubtedly on the range of Nebel, among the highlands of Abarim, and in reaching this highest point, the crest just west of Jahlun, we might reasonably flatter ourselves that we stood on Pisgah's top." [Nebel] Mr. Grove, who in the above article rejects all previous claims to the identification of this Nebel, admits now ("Dark's Bible Atlas," 104), that "probably" Jebel Nebiah is the mount in question. The difficulty in regard to the possibility of seeing so far has been exaggerated by the gloomy atmosphere, as compared with our own, has a transparency which is marvelous. Dr. Thomson, who has dwelt more than a quarter of a century amid the scenery of Lebanon, says (Land and Book, p. 18) that he can show "many a Pisgah in Lebanon and Hermon from which the view is far more extensive" than that in which the eye of Moses rested as he looked abroad from Nebel. We are to remember, too, that, though the Hebrew Lotus was a hundred and twenty years old when he died, we are expressly told that "his eye was not dim nor his natural force abated" (Deut. xxxiv. 7).

NEBO (ניְבֹא) [see above]. 1. (Naabhäng), Nebel. A town on the eastern side of Jordan, situated in the pastoral country (Num. xxxii. 3), one of those which were taken possession of and rebuilt by the tribe of Reuben (ver. 38). In these lists it is associated with Kephirahim and Haalmon or Beon; and in another record (1 Chr. v. 8) with Aror, as marking one extremity, possibly the west, of a principal part of the tribe. In the remarkable prophecy adopted by Isaiah (xxv. 2) and Jeremiah (xliv. 1, 22) concerning Moab, Nebel is mentioned in the same way as before, though no longer an Israelite town, but in the hands of Moab. It does not occur in the catalogue of the towns of Reuben in Joshua (xiii. 15–23); but whether this is an accidental omission, or whether it appears under another name—according to the statement of Num. xxxii. 38, that the Israelites changed the names of the heathen cities they retained in this district—is uncertain. In the case of Nebel, which was doubtless called after the deity of that name, there would be a double reason for such a change (see Josh. xxii. 7).

Neither is there anything to show whether there was a connection between Nebel the town and Mount Nebel. The notices of Eusebius and Jerome (Onomasticon) are confused, but they at least denote that the two were distinct and distant from each other. The town near the sea, named Nebel, by which the Hebrews may have identified with Nebel or Kannah, and locate it 8 miles south of Heshbon, where the ruins of el-Heba appear to stand at present; while the mountain (Nadan and Nebel) is stated to be 6 miles east (Jer.) or west (Eus.) from the same spot.

In the list of places south of es-Salt given by Dr. Robinson (Bib. Res. 1st ed. vol. iii. App. 170) he sees a site named Nebel, which may possibly be identical with Nebel, but nothing is known of its situation, or of the character of the spot.

2. (Naabhäng, Alex. Nabad; in Neh. [Rom. Alex. Naḥóa. Naabhäng. Vat. Naḥóa]. The children of Nebel (Benel-Nebe) to the number of fifty-two, are mentioned in the catalogue of the men of Judah and Benjamin, who returned from Babylon with Zerubbabel (Ezr. ii. 29; Neh. vii. 32). Seven of them had foreign wives, whom they were compelled to divorce (Ezr. x. 43). The name occurs between Bethel and Ai, and Lydda, which, if we may trust the arrangement of the list, implies that it was situated in the territory of Benjamin to the N. W. of Jerusalem. This is possible the modern far-Nebe, about 12 miles N. W. by W. of Jerusalem, 8 from Lydda, and close to Tell, which seems to be the place mentioned by Jerome (Onom. "Amab," and "Amab;" and Pil. Danub. § 8) as Nob the city of the priests (though that identification is hardly admissible), and both in his and later times known as Bethannah or Bettannah.

It is possible that this Nebo was an offshoot of...
NEBO

NEBUCHADNEZZAR

that on the east of Jordan; in which case we have another town added to those already noticed in the territory of Benjamin which retain the names of foreign and heathen settlers. [Benjamin, vol. i. p. 277; note: Michamish; Othni.]

A town named Nombi is mentioned by the LXX. (not in Heb.) amongst the places in the south of Judah frequented by David (I Sam. xxx. 20), but its situation forbids any attempt to identify this with Nebo.

G.

NE'BO [see above]: Nažâ, [Nažâšî in L., Alex. Δυσφόρον]: Nebo), which occurs both in Isaiah (xlvi. 1) and Jeremiah (xlviii. 1) as the name of a Chaldean god, is a well-known deity of the Babylonians and Assyrians. The original native name was, in Hamitic Babylonian, Nebiši, in Semitic Babylonian and Assyrian, Nebi. It is reasonably conjectured to be connected with the Hebrew נב, "to prophesy," whence the common word סֶב, "prophet." (Arab. نبی، Neby). Nebi was the god who presided over learning and letters.

He is called "the far-hearing," "he who possesses intelligence," "he who teaches or instructs." The wedge or arrow-head—the essential element of zumeiform writing—appears to have been his emblem; and hence he bore the name of Tir, which signifies "a shaft or arrow." His general character corresponds to that of the Egyptian Thoth, the Greek Hermes, and the Latin Mercury. Astronomically he is identified with the planet nearest the sun, called Nebo also by the Mendesians, and Tir by the ancient Persians.

Nebo was of Babylonian rather than of Assyrian origin. In the early Assyrian Pantheon he occupied a very inferior position, being either omitted from the lists altogether, or occurring as the list of the minor gods. The king supposed to be Pāl first brings him prominently forward in Assyria and then apparently in consequence of some peculiar favor which he himself had with Babylon. A statue of Nebo was set up by this monarch at Calah (Nimrud), which is now in the British Museum. It has a long inscription, written across the body, and consisting chiefly of the god's various epithets. In Babylonia Nebo held a prominent place from an early time. The ancient town of Borsippa was especially under his protection, and the great temple there (the modern Râs el Nimrud) was dedicated to him from a very remote age.

The text of the text is now the most important Babylonian kings, in whose names the word Nebi, or Nebo, appears as an element: e. g. Nabo-nissa, Nabopolassar, Nebuchadnezzar, and Nabo-nadius or Labyntus; and appears to have been honored next to Bel-Merodach by the later kings. Nebuchadnezzar completely rebuilt his temple at Borsippa, and called after him his famous seaport upon the Persian Gulf, which became known to the Greeks as Teredon or Diridotis "given to Tir," i. e. to Nebo. The worship of Nebo appears to have continued at Borsippa to the 3d or 4th century after Christ, and the Sabean pre-Harranite have preserved it even to a later date. (See the Essay On the Religion of the Babylonians and Assyrians, by Sir H. Rawlinson, in the 1st vol. of Rawlinson's Herodotus, pp. 637-640; and compare Norberg's Onomasticon, s. v. Nebo, pp. 98, 99.)

G. R.

NEBUCHADNEZZAR, or NEBUCHADNEZZAR (נִבְעָהָדנְנֵצֶדר, [נִבְעָהָדנְנֵצֶדר] or נִבְעָהָדנְנֵצֶדר): Nabuchodonosor; Nabuchodonosor), was the greatest and most powerful of the Babylonian kings. His name, according to the native orthography, is read as Nabu-ka-ni-ru-usur, and is explained to mean "Nebo is the protector against misfortune," ku-nar being connected with the Hebrew נב, "trouble" or "attack," and usur being a participle from the root ✰✰✰, "to protect." The rarer Hebrew form, used by Jeremiah and Ezekiel, —Nebuchadnezzar, is thus very close indeed to the original. The Persian form, Nabu-chad-nösrân (Beh. Insr. vol. i. par. 16), is less correct; while the Greek equivalents are sometimes very wide of the mark. Nabu-chad-nösrân, which was used by Apuleius and Megasthenes, is the best of them: Naβουχόδωρος, which appears in the Canon of Ptolemy, the worst. Strabo's Naβουχοδωρός (xx. 1, § 6) and Berosus's Naβουχοδωρός lie between these extremes.

Nebuchadnezzar was the son and successor of Nabopolassar, the founder of the Babylonian Empire. He appears to have been of marriageable age at the time of his father's rebellion against Assyria, n. c. 625; for, according to Apuleius (ap. Euseb. Chron. Con. i. 9), the alliance between this prince and the Median king was cemented by the betrothal of Amunia, the daughter of the latter, to Nebuchadnezzar, Nabopolassar's son. Little further is known of him during his father's lifetime. It is suspected, rather than proved, that he was the leader of a Babylonian contingent which accompanied Cyaxares in his Median war [Merodach], by whose interposition, on the occasion of an eclipse.
that war was brought to a close, n. c. 610. At any rate, a few years later, he was placed at the head of a Babylonian army, and sent by his father, who was now old and infirm, to chastise the insole-
igious of Pharaoh Necho, king of Egypt. This prince, who had already subdued Syria, defeated Josiah, king of Judah, at Megiddo, and reduced the whole tract, from Egypt to Carchemish, on the upper Euphrates (Carchemish), which in the partition of the Assyrian territories on the destruction of Nineveh had been assigned to Babylon (2 K. xxvii. 29, 30; Jer. ap. Joseph. c. Ap. i. 19). Necho had held possession of those countries about this time (n. c. 605). Nebuchadnezzar led an army against him, defeated him at Carchemish in a great battle (Jer. xvi. 2-12), recovered Cede-
stria, Phenicia, and Palestine, took Jerusalem (Dan. i. 1, 2), pressed forward to Egypt, and was engaged in that country or upon its borders when intelligence arrived which recalled him hastily to Babyl. Nabopolassar, after reigning 21 years, had died, and the vacant throne was not the place to which there is no reason to think that Nebuchadnezzar, though he appeared to be the king of Babylon, had not been associated by his father. In some alarm about the succession he hurried back to the capital, accompanied only by his light troops: and crossing the desert, probably by way of Tali-
mor or Palmyra, reached Babylon before any disrup-
tions had arisen, and entered peacefully on his kingdom (n. c. 604). The bulk of the army, with the captives — Phenicians, Syrians, Egyptians, and Jews — returned by the ordinary route, which skirted instead of crossing the desert. It was at this time that Daniel and his companions were brought to Babylon, where they presently grew into favor with Nebuchadnezzar, and became par-
s of very considerable influence (Dan. i. 3-20).

Within three years of Nebuchadnezzar's first expedition into Syria and Palestine, disaffection again showed itself in those countries. Jehoiakin — who, although threatened at first with captivity (2 Chr. xxxvi. 5), had been finally maintained on the throne as a Babylonian vassal — after three years of service, turned and rebelled against his suzerain, probably trusting to be supported by Egypt (2 K. xxiv. 1). Not long afterwards Phenicia seemed to have been turned over to the Chaldean monarch, who had previously endeavored to subdue the disaffected by his generals (2 K. ver. 2), once more took the field in person, and marched first of all against Tyre. Having invested that city in the seventh year of his reign (Joseph. c. Ap. i. 21), and left a portion of his army there to con-
tinue the siege, he proceeded against Jerusalem, which submitted without a struggle. According to Josephus, who is here our chief authority, Nebuchadnezzar punished Jehoiakin with death (Jos. x. 6, § 3; comp. Jer. xxi. 18, 19, and xxxvi. 39), but placed his son Jehoiachin upon the throne. Jehoiachin reigned only three months; for, on his showing symptoms of disaffection, Nebuchadnezzar came up against Jerusalem for the third time, defeated and routed the rebels who were carried to the Babylon, together with a large portion of the population of the city, and the chief of the Tem-
ple treasures, and made his uncle, Zedekiah, king in his room. Tyre still held out; and it was not till the thirteenth year from the time of its first investment that the city of merchants fell (n. c. 585). Ere this happened, Jerusalem had been totally destroyed. This consummation was owing to the folly of Zedekiah, who, despite the warnings of Jeremiah, made a treaty with Apries (Hophra), king of Egypt (Ez. xvi. 10), and on the strength of this alliance renounced his allegiance to the king of Babylon. Nebuchadnezzar commenced the final siege of Jerusalem in the ninth year of Zede-
kiah, his own seventeenth year (n. c. 588), and took it two years later (n. c. 580). On e'1110 to carry out the treaty seems to have been made by Apries, who, without the consent of his vassal, crossed the frontier, and began its march towards Jerusalem; upon which Nebuchadnezzar raised the siege, and set off to meet the new foe. According to Josephus (Jos. x. 7, § 3) a battle was fought, in which Apries was completely defeated; but the Scriptural account seems rather to imply that the Egyptians retired on the advance of Nebuchadnezzar, and the latter continued his march into Syria, as appears by the statement (Jer. xxxvii. 5-8). At any rate the attempt failed, and was not repeated; the "broken reed, Egypt," proved a treacherous support, and after an eighteen months' siege Jerusalem fell. Zedekiah escaped from the city, but was captured near Jeri-
cho (Jos. xxvi. 3) and brought to Nebuchadnezzar at Riblah in the territory of Hamath, where his eyes were put out by the king's order, while his sons and his chief nobles were slain. Nebuchad-
nezzar then returned to Babylon with Zedekiah, whom he imprisoned for the remainder of his life; leaving Nebuzar-adan, the captain of his guard, to complete the destruction of the city and the purifi-
cation of Judah. Gedaliah, a Jew, was appointed governor, but he was shortly murdered, and the rest of the Jews either fled to Egypt, or were car-
ried by Nebuzar-adan to Babylon.

The military successes of Nebuchadnezzar can-
not be traced minutely beyond this point. His own annals have not come down to us; and the historical allusions which we find in his extant inscriptions are of the most vague and general character. It may be gathered from the prophet-
ical Scriptures and from Josephus, that the com-
que
cess of Jerusalem was rapidly followed by the fall of Tyre and the complete subjugation of Phenicia (Ez. xxvi. — xxviii.; Joseph. c. Ap. i. 21); after which the Babylonians carried their arms into Egypt, and inflicted severe injuries on that fertile country (Jer. xiii. 18-21; Ez. xxiv. 2-20; Joseph. Jos. x. 9, § 7). But we have no account, on which we can depend, of these campaigns. Our remaining notices of Nebuchadnezzar present him to us as a strong and powerful ruler, rather than a warrior; and the great fame which has always attached to his name among the easter-
nern nations depends rather on his buildings and other grand constructions than on any victories or conquests ascribed to him.

We are told by Herodotus that the first care of Nebuchadnezzar, on obtaining quiet possession of his kingdom after the defeat of his expedition, was to rebuild the Temple of Bel (Bel-Marduk) at Babylon out of the spoils of the Syrian war (ap. Joseph. Jos. x. 1, § 1). He next proceeded to strengthen and beautify the city, which he reno-
ne
unite, Nabopolassar may have had a son of this name; or the Babylon of Herod. 1. 74 may be Nabopolassar himself.
NEBUCHADNEZZAR

rated throughout, and surrounded with several lines of fortification, himself adding one entirely new quarter. Having finished the walls and adorned the gates magnificently, he constructed a new palace, adjoining the old residence of his father — a superb edifice, which he completed in fifteen days! In the grounds of this palace he formed the celebrated "hanging garden," which was a pleasure-ground, built up with huge stones to imitate the varied surface of mountains, and planted with trees and shrubs of every kind. Diocletian, probably following Ctesias, describes this marvel as a square, four hundred (400 feet) each way, and 50 cubits (75 feet) high, approached by sloping paths, and supported on a series of arched galleries increasing in height from the base to the summit. In these galleries were various pleasant chambers; and one of them contained the engines by which water was raised from the river to the surface of the mound. This curious construction, which the Greek writers reckoned among the seven wonders of the world, was said to have been built by Nebuchadnezzar for the gratification of his wife, Amytia, who, having been brought up among the Median mountains, desired something to remind her of them. Possibly, however, one object was to obtain pleasure-ground, as his predecessors had done; and to which end the masquesque were accustomed to rise.

This complete renovation of Babylon by Nebuchadnezzar, which Berosus asserts, is confirmed to us in every possible way. The standard inscription of the king relates at length the construction of the whole series of works, and appears to have been the authority from which Berosus drew. The ruins confirm this in the most positive way, for nine-tenths of the bricks in situ are stamped with Nebuchadnezzar's name. Scripture, also, adds an indirect but important testimony, in the exclamation of Nebuchadnezzar recorded by Daniel, "Is not this great Babylon which I have built?" (Dan. iv. 30).

But Nebuchadnezzar did not confine his efforts to the ornamentation and improvement of his capital. Throughout the empire, at Borsippa, Sippara, Calah, Gischala, Duraba, Tahpanhes, and a multitude of other places, he built or rebuilt cities, repaired temples, constructed quays, reservoirs, canals, and aqueducts, on a scale of grandeur and magnificence surpassing everything of the kind recorded in history, unless it be the constructions of one or two of the greatest Egyptian monarchs.

"I have examined," says Sir H. Rawlinson, "the bricks in situ, belonging perhaps to a hundred different towns and cities in the neighborhood of Baghdad, and I never found any other legend than that of Nebuchadnezzar, son of Nabopolassar, king of Babylon" (Comm. on the Inscri. of Assyria and Babylonia, pp. 76, 77). Nebuchadnezzar," says Abydenus, "on succeeding to the throne, fortified Babylon with three lines of walls. He dug the Nahr Malichi, or Royal River, which was a branch stream derived from the Euphrates, and also the Aecaranes. He likewise made the great reservoir above the city of Sippara, which was thirty parasangs (90 miles) in circumference, and twenty fathoms (120 feet) deep. Here he placed sluices or flood-gates, which enabled him to irrigate the low country. He also built a quay along the shore of the Red Sea (Persian Gulf), and founded the city of Teredon on the borders of Arabia."

It is reasonably concluded from these statements, that an extensive system of irrigation was devised by this monarch, to whom the Babylonians were probably indebted for the greater portion of that vast network of canals which covered the whole alluvial tract between the two rivers, and extended on the right bank of the Euphrates to the extreme verge of the styry desert. On that side the principal work was a canal of the largest dimensions, still to be traced, which left the Euphrates at Hill, and skirting the desert run southeast a distance of above 400 miles to the Persian Gulf, where it emptied itself into the Bay of Guane.

The wealth, greatness, and general prosperity of Nebuchadnezzar are strikingly placed before us in the book of Daniel. "The God of heaven" gave him, not a kingdom only, but "power, strength, and glory" (Dan. iii. 37). His wealth is evidenced by the image of gold, 60 cubits in height, which he set up in the plain of Dura (ib. iii. 1). The grandeur and careful organization of his kingdom appears from the long list of his officers, "princes, governors, captains, judges, treasurers, censors, scribes, officials, and stewards" and other repeated mention (ib. vv. 2, 3, and 37). We see the existence of a species of hierarchy in the "magicians, astrologers, soothsayers," over whom Daniel was set (ib. ii. 48). The "tree, whose height was great, which grew and was strong, and the height thereof reached unto the heavens, and the sight thereof to the end of all the earth; the leaves thereof were fair, and the fruit much, and in which was food for all; under which the beasts of the field had shadow, and the fowls of heaven dwelt in the branches thereof, and all flesh was fed of it" (ib. iv. 10-12), is the fitting type of a kingdom at once so flourishing and so extensive.

It has been thought by some (De Wette, Th. Parker, etc.), that the book of Daniel represents the satrapal system of government (Sassanen-Einrichtung) as established throughout the whole empire; but this conclusion is not justified by a close examination of that document. Nebuchadnezzar, like his Assyrian predecessors (Is. x. 8), is represented as a "king of kings" (Dan. iii. 37); and the officers enumerated in ch. ii. are probably the authorities of Babylonian proper, rather than the governors of remote regions, who could not be all spared at once from their employments. The instance of Gobelas (Cer. xl. 5; 2 N. xxv. 22) is not that of a satrap. He was a Jew; and it may be doubted whether he stood really in any different relation to the Babylonians from Zedekiah or Jehoiachin; although as he was not of the seed of David, the Jews considered him to be a governor rather than king.

Towards the close of his reign the glory of Nebuchadnezzar suffered a temporary eclipse. As a punishment, and as a prelude of the vast form of madness was sent upon him which the Greeks called Lycanthropy (λυκανθρωπία); wherein the sufferer imagines himself a beast, and quitting the haunts of men, insists on leading the life of a beast (Dan. iv. 33)." Berosus, with the paragon

[1805] "This malady, which is not unknown to the physicians, has been termed 'Lycanthropy.' It consists in the belief that one is not a man but a beast."
Nebuchadnezzar

Tenderness of a native, anxious for the good fame of his country's greatest king, suppressed this fact: and it may be doubted whether Herodotus in his Babylonian travels, which tell only about a century after the time, obtained any knowledge of it. Nebuchadnezzar himself, however, in his great inscription appears to allude to it, although in a studied ambiguity of phrase which renders the passage very difficult of translation. After describing the construction of the most important of his great works, he appears to say—"I for four years (?) the seat of my kingdom, did not rejoice my heart. In all my dominions I did not build a high place of power, the precious treasures of my kingdom I did not lay up. In Babylon, buildings for myself and for the honor of my kingdom I did not lay out. In the worship of Merodach, my lord, the joy of my heart, in Babylon the city of his sovereignty, and the seat of my empire, I did not sing his praises. I did not hurl his altars with victims, nor did I clear out the canals" (Rawlinson's Herod. ii. 586). Other negative clauses follow. It is plain that we have here narrated a suspension—apparently for four years—of all those works and occupations on which the king especially prided himself. His work, irrigations, temples, palaces, water-supply, foundations, and works of irrigation: and though the cause of the suspension is not stated, we can scarcely imagine anything that would account for it but some such extraordinary headache as that recorded in Daniel.

It has often been remarked that Herodotus ascribes to a queen, Nitocris, several of the important works, which other writers (Dionysius, Abydenus) assign to Nebuchadnezzar. The conjecture naturally arises that Nitocris was Nebuchadnezzar's queen, and that, as she carried on his constructions during his incapacity, they were by some considered to be hers. It is no disproof of this to urge that Nebuchadnezzar's wife was a Median princess, not an Egyptian (as Nitocris must have been from her name), and that she was called, not Nitocris, but Amytis or Amythia: for Nebuchadnezzar, who married Amytis in B.C. 625, and who lived after this marriage more than sixty years, may easily have married again after the decease of his first wife, and his second queen may have been an Egyptian. His latter relations with Egypt appear to have been friendly: and it is remarkable that the name Nitocris, which belonged to very primitive Egyptian history, had in fact been re-introduced about this time, and is found in the Egyptian monuments to have been borne by a princess belonging to the family of the Penametis.

After an interval of four, or perhaps seven years (Dan. iv. 16), Nebuchadnezzar's madness left him. As we are told in Scripture that "his reason returned, and for the glory of his kingdom his honor and brightness returned;" and he was estable

In the absence of language, the rejection of all ordinary human feel, and sometimes in the loss of the erect posture and a preference for walking on all fours. Within a year of the time that he received the warning (Dan. iv. 29), Nebuchadnezzar was smitten. The great king became a wretched maniac. Allowed to indulge his disordered fancy, he rehearsed human limitations, lived in the open air night and day, sat on herbs, devised hanging, and became covered with a rough coat of hair (ver. 33). Its subjects generally, it is probable, were not allowed to know on occasion, though they could not but be aware that he was suffering from some terrible malady. The queen most likely held the reins of power, and carried on the government in his name.

We must not suppose that the afflicted monarch was allowed to range freely through the country. He was no doubt strictly confined to the private gardens attached to the palace. If the palace was large, it was divided into four great quarters: the king ought to have been confined to one of these. If Daniel's expression is "seven times," we cannot be sure that in a "time" is meant a year.

The character of Nebuchadnezzar must be gathered principally from Scripture. There is a conventional formality in the cuneiform inscriptions, which deprives them of almost all value for the illustration of individual mind and temper. Osten
tation and vainglory are characteristics of the entire series, each king seeking to magnify above all others his own exploits. We can only observe as peculiar to Nebuchadnezzar a disposition to rest his fame on his great works rather than on his military achievements, and a strong religious spirit, manifesting itself especially in a devotion, which is almost exclusive, to one particular god. Though his own tutelary deity and that of his father was Nebo (Merven), yet his worship, his ascriptions of praise, his thanksgivings, have in almost every case for their object the god Merodach. Under his protection he placed his son, Evil-Merodach. Merodach is "his lord," "his great lord," "the joy of his heart," "the great lord who has appointed him to the empire of the world, and has condescended to his far-spread people of the earth," "the great lord who has established him in strength," etc. One of the first of his own titles is, "he who pays homage to Merodach." Even when describing the temples of other deities, he ascribes the work to the suggestions of Merodach, and places it under his protection. We may hence explain the appearance of a sort of monotheism (Dan. i. 2; iv. 24, 32, 34, 37), mixed with polytheism (ib. ii. 47; iii. 12, 18, 29; iv. 9), in the Scriptural notices of him. While admitting a qualified divinity in Nebo, Nana, and other deities of his country, Nebuchadnezzar maintained the real monarchy of Bel-Merodach. He was to him "the supreme chief of the gods," "the most ancient," "the king of the heavens and the earth." It was his image, or symbol, undoubt
dedly, which was "set up" to be worshipped in the "plain of Dura" (ib. iii. 1), and his "house in which the sacred vessels from the Temple were treasured" (ib. i. 2). Nebuchadnezzar seems, at some times to have identified this, his supreme god, with the God of the Jews (ib. ch. iv.); at others, to have regarded the Jewish God as one of the local and inferior deities (ch. iii.) over whom Merodach ruled.

The genius and grandeur which characterized Nebuchadnezzar, and which have handed down his name among the few ancient personages known generally throughout the East, are very apparent in...
Scripture, and indeed in all the accounts of his reign and actions. Without perhaps any strong military turm, he must have possessed a fair amount of force to have held his own in the east against the ambitious Medes, and in the west against the Egyptians. Necho and Apries were both princes of good warlike capacity, whom it is some credit to have defeated. The prolonged siege of Tyre is a proof of the determination with which he prosecuted his military enterprises. But his greatness lay especially in the arts of peace. He says much about the natural fertility of Babylon, and its ample wealth of waters, the foundation of national prosperity, and so of power. Hence his vast canals and elaborate system of irrigation, which made the whole country a garden; and must have been a main cause of the full treasury, from which alone his palaces and temples can have received their magnificence. The forced labor of captives may have raised the fabrics; but the statues, the enameled bricks, the fine woodwork, the gold and silver plating, the hangings and curtains, had to be bought; and the enormous expenditure of this monarch, which does not appear to have exhausted the country, and which cannot have been very largely supported by tribute, must have been really supplied in the main from that agricultural wealth which he took so much pains to develop. We may gather from the productivity of Babylonia under the Persians (Herod. i. 192, 193, iii. 92), after a conquest and two (three?) revolts, some idea of its flourishing condition in the period of independence, for which (according to the consequent testimony of the monuments and the best authors) it was indebted to this king.

The moral character of Nebuchadnezzar is not such as entitles him to our approval. Besides the overweening pride which brought upon him so terrible a chastisement, we note a violence and fury (Dan. ii. 12, iii. 19) common enough among oriental monarchs of the weaker kind, but from which the greatest of them have usually been free; while at the same time we observe a cold and relentless cruelty which is particularly revolting. The blinding of Zedekiah may perhaps be justified as an ordinary eastern practice, though it is the earliest case of the kind on record; but the refinement of cruelty by which he was made to witness his sons' execution before his eyes was put out (2 K. xxv. 7) is worthy of a Dionysius or a Domitian than of a really great king. Again, the detention of Jehoiachin in prison for 36 years for an offense committed at the age of eighteen (2 K. xxiv. 3), is a severity surpassing oriental harshness. Against these grave faults we have nothing to set, unless it be a feeble trait of magnanimity in the pardon accorded to Shadrach, Meshach, and Abednego, when he found that he was without power to punish them (Dan. iii. 26).

It has been thought remarkable that to a man of this character, God should have vouchsafed a revelation of the future by means of visions (Dan. i. 20, iv. 2). But the circumstance, however it may disturb our preconceived notions, is not really at variance with the general laws of God's providence as revealed to us in Scripture. As with his natural, so with his supernatural gifts, they are not confined to the worthy. Even under Christianity, miracles of power were sometimes possessed by those who made an ill use of them (1 Cor. xiv. 33). And God, it is plain, did not leave the old heathen world without some supernatural aid, but made his presence felt from time to time in visions, through prophets, or even by a voice from Heaven. It is only necessary to refer to the histories of Pharaoh (Gen. xli. 1-7, and 28), Abimelech (6b, xx. 3), Job (Job iv. 13, xxviii. i, 16; comp. Dan. iv. 31), and Balaam (Num. xxiii.-xxiv.), in order to establish the purity of Nebuchadnezzar's visions with other facts recorded in the Bible. He was warned, and the nations over which he ruled were warned through him, God leaving not Himself without witness even in those dark times. In conclusion, we may notice that a heathen writer (Abydenus), who generally draws his inspirations from Berosus, ascribes to Nebuchadnezzar a miraculous speech just before his death, announcing to the Babylonians the speedy coming of a Persian monarch, who with the help of the Medes would enslave Babylon (Abyd. ap. Kuseb. Prop. Ev. ix. 41).

G. K.

**NEBUSHAS'BAN** (נֶבֶ֫עַשְׁבָ'אָנָּן), i. e. Nebushezban: LXX. omits: Nebubelnian), one of the officers of Nebuchadnezzar at the time of the capture of Jerusalem. He was Rab-saris, i. e. chief of the enunciats (Jer. xxxix. 14), as Nebuzaradan was Rab-tabbachim (chief of the body-guard), and Nergal-sharzar, Rab-Mag (chief of the magicians), the three being the most important officers then present, probably the highest dignitaries of the Babylonian court. Nebushashban's office and title were the same as those of Ashpenaz (Dan. i. 3), whom he probably succeeded. In the list given (ver. 3) of those who took possession of the city in the dead of the night of the 11th Fannuz, Nebushashban is not mentioned by name, but merely by his title Rab-saris. His name, like that of Nebuzaradan, is Babylonian in etymology, and is a compound of Necho, the Babylonian deity, with some word which though not quite ascertained, probably signified adherence or attachment (see Gesen. Thes. 810 b: Fürst, Handw. ii. 76).

**NEBUZAR'ADAN** [see below]: Nebuzarsudur or Nebu'zardur: Joseph. *Nabûsâdiri: the Nebuzaradan, the Rab-tabbachim, i. e. chief of the slaughterers (A. V. "captain of the guard"), a high officer in the court of Nebuchadnezzar, apparently (like the Tartan in the Assyrian army) the next to the person of the monarch. He appears not to have been present during the siege of Jerusalem; probably he was occupied at the more important operations at Tyre, but as soon as the city was actually in the hands of the Babylonians he arrived, and from that moment everything was completely directed by him. It was he who decided, even to the minutest

---

a In the usual copies of the Hebrew Bible this final n is written small, and noted in the Masorah accordingly. In several of Kennicott's MSS. it (1) is found instead of (7), making the name Nebushedabas, with perhaps an intentional play of sound, such meaning: prey or spoil

b So at the Assyrian invasion in the time of Hezekiah Tartan, Rab-saris, and Rab-shalom, as the three highest dignitaries, addressed the Jews from the head of their army (2 K. xviii. 17). Possibly these three, or at least the two last, officers in the Assyrian court answered to the three named above in the Babylonian.
NEHELAMITE, THE (נֶהֶלָם; נֶהֶלָמִי). The designation of a man named Shemai, a false prophet, who went with the Captivity to Babylon (Jer. xxxix. 21, 31, 32). The name is no doubt formed from that either of Shemaih’s native place, or the progenitor of his family; which of the two is uncertain. No place called Nebelam is mentioned in the Bible, or known to have existed in Palestine, nor does it occur in any of the genealogical lists of families. It resembles the name which the LXX. have attached to Abijah the Prophet, namely the Ekleem — Ἐκλεήμενος, but by what authority they substitute that name for the Shemaihite of the Hebrew text is doubtful. The word “Nebelamite” also probably contains a play on the “dreamer” (בַּשֵּׁם) and “dreamers,” whom Jeremiah is never wearied of denouncing (see cc. xxiii., xxvii., xxix.).

a Hence Simmumach renders בַּשֵּׁם פִּיוֹדָה. b The tarafim gives the name as Halam, חָלָם.

A place of this name lay somewhere between the Jordan and the Euphrates. See vol. ii. p. 1935 f.
NEHEMIAH

NEHEMIAH (Nehemiah) 
1. Son of Hacchaliah, and apparently of the tribe of Judah, since his fathers were buried at Jerusalem, and Hamin his kinsman seems to have been of that tribe (Neh. i. 2, ii. 3, vii. 2). He is called indeed "Nehemiah the Priest." (Neh. xvi. 13) in the Vulgate of 2 Macc. i. 21; but the Greek has it, that "Nehemiah ordered the priests (iespopi) to pour the water," etc. Nor does the expression in ver. 18, that Nehemiah "offered sacrifice," imply any more than that he provided the sacrifices. Others again have inferred that he was a priest from Neh. x. 1-8; but the words "these the priests" naturally apply to the names which follows Nehemiah's, who signed first as the head of the whole nation. The opinion that he was connected with the house of David is more feasible, though it cannot be proved. The name of Hamin his kinsman, as well as his own name, are found slightly varied in the house of David, in the case of Hamin the son of Zerubabel (1 Chr. iii. 19), and Naum (Luke iii. 25). If he were of the house of David, there would be peculiar point in his allusion to his "fathers' sepulchres" at Jerusalem. Malais of Antioch (Chronogr. vi. 160), as cited by Grimm, on 2 Macc. i. 21, singularly combines the two views, and calls him "Nehemiah the priest, the seed of David."

All that we now certainly know of this eminent man is contained in the book which bears his name. His autobiography first finds him at Shushan, the winter residence of the kings of Persia, in high office as the cupbearer of king Artaxerxes Longimanus. In the 20th year of the king's reign, i.e. c. 445, certain Jews, one of whom was a near kinsman of Nehemiah's, arrived from Judea, and gave Nehemiah a deplorable account of the state of Jerusalem, and of the residents in Judea. He immediately conceived the idea of going to Jerusalem to endeavor to better their state. After three or four months (from Chisdal to Nisan), in which he earnestly sought God's blessing upon his undertaking by frequent prayer and fasting, an opportunity presented itself of obtaining the king's consent to his mission. Having received his appointment as governor of Judea, a troop of cavalry, and letters from the king to the different satraps through whose provinces he was to pass, as well as to Asaph the keeper of the king's forests, to supply him with timber, he started upon his journey: being under promise to return to Persia within a given time. Josephus says that he went in the first instance to Babylon, and gathered round him a band of exiled Jews, who returned with him. This is important as possibly indicating that the book which Josephus followed, understood the Nehemiah mentioned in Ezr. ii. 2; Neh. vii. 7, to be the son of Hacchaliah.

a See Genealog. of our Lord J. C., p. 145. [Nehemiah, Son of Azub.]

b Ecbatana was the summer, Babylon the spring. See Perspolis the winter residence of the kings of Persia (Pilkington). Susa was the principal palace (Strab. lib. xv. cap. iii. § 3).

c הַיְּשֵׁב, the term applied to himself and other men by Nehemiah. The meaning and etymology

Nehemiah's great work was rebuilding, for the first time since their destruction by Nebuzaradan, the walls of Jerusalem, and restoring that city to its former state and dignity, as a fortified town. It is important to observe the importance to the future political and ecclesiastical prosperity of the Jewish nation of this great achievement of their patriotic governor. How low the community of the Palestine Jews had fallen, is apparent from the fact that from the 6th of Daris to the 7th of Artaxerxes, there is no history of them whatever; and that even after Ezra's commission, and the ample grants made by Artaxerxes in his 7th year, and the considerable reinforcements, both in wealth and numbers, which Ezra's government brought to them, they were in a state of alie slumber and prosperity" in the 20th of Artaxerxes; their country pillaged, their citizens kidnapped and made slaves of by their heathen neighbors, robbery and murder rife in their very capital, Jerusalem almost deserted, and the Temple falling again into decay. The one step which could reestablish the nation, preserve the Mosaic institutions, and lay the foundation of future independency, was the restoration of the city walls. Jerusalem being once again secure from the attacks of the marauding heathen, civil government would become possible, the spirit of the people, and their attachment to the ancient capital and the name of Israel would revive, the priests and Levites would be encouraged to come into residence, the tithes and first-fruits and other stores would be safe, and Judah, if not actually independent, would preserve the essentials of national and religious life. To this great object therefore Nehemiah directed his whole energies without an hour's unnecessary delay. By word and example he induced the whole population, with the single exception of the Tekoite nobles, to commence building with the utmost vigor, even the lukewarm high-priest Eliashib performing his part. In a wonderfully short time the walls seemed to emerge from the heaps of burnt rubbish, and to encircle the city as in the days of old. The gateways also were rebuilt, and ready for the king to be brought upon a beam. But it soon became apparent how wisely Nehemiah had acted in hastening on the work. On his very first arrival, as governor, Sanballat and Tobiah had given unequivocal proof of their mortification at his appointment; and, before the work was even commenced, had scornfully asked whether he intended to rebel against the king of Persia. But when the restoration was seen to be rapidly progressing, their indignation knew no bounds. They not only poured out a torrent of abuse and contumely upon all engaged in the work, but actually made a great conspiracy to fall upon the builders with an armed force and put a stop to the undertaking. The project was defeated by the vigilance and prudence of Nehemiah, who armed all the people after their families, and showed such a strong front that their enemies dared not attack them. This armed attitude was continued from the days of Trachon, which is applied only to Nehemiah, and doubtless. It is by most modern scholars thought to mean governor (Gesen. s. v.); but the sense cannot be better, given by older commentators, seem more probable.

d The three days, mentioned Neh. ii. 11, and Ez. viii. 32., seems to point to some customary interval perhaps for purification after a journey. See also D'Arcy's Concordance "Third Day," and "Three Days."
NEHEMIAH

that day forward. Various stratagems were then resorted to to get Nehemiah away from Jerusalem, and if possible to take his life. But that which most nearly succeeded was the attempt to bring him into suspicion with the king of Persia, as if he intended to get himself for an independent king, as soon as the walls were completed. It was thought that the accusation of rebellion would also frighten the Jews themselves, and make them cease from building. Accordingly a double line of action was taken. On the one hand Sanballat wrote a letter to Nehemiah, in an apparently friendly tone, telling him, on the authority of Artaxerxes, that he was about to head a rebellion of the Jews, and that he had appointed prophets to aid in the design by prophesying of him, “thou art the king of Judah;” and that he was building the walls for this purpose. This was sure, he added, to come to the ears of the king of Persia, and he invited Nehemiah to come with him as to what should be done. At the same time he had also bribed Nobahiah the prophetess, and other prophets, to induce Nehemiah by representations of his being in danger, to take refuge in the fortress of the Temple, with a view to cause delay, and also to give an appearance of conscious guilt. While this portion of the plot was conducted by Sanballat and Tobiah, a yet more important line of action was pursued in concert with them by the chief officers of the king of Persia in Samaria.

In a letter addressed to Artaxerxes they represented that the Jews had rebuilt the walls of Jerusalem, with the intent of rebelling against the king’s authority and recovering their dominion on “this side the river.” Referring to former instances of the sedition spirit of the Jewish people they urged that if the king wished to maintain his power in the province he must immediately put a stop to the fortification. This artful letter so far wrought upon Artaxerxes, that he issued a decree stopping the work till further orders. It is probable that at the same time he recalled Nehemiah, or perhaps Nehemiah’s leave of absence had previously expired; in either case had the Tishbatthu been less upright and less wise, and had he fallen into the trap laid for him, his life might have been in great danger. The sequel, however, shows that his perfect integrity was apparent to the king. For after a delay, perhaps of several years, he was permitted to return to Jerusalem, and to crown his work by repairing the Temple, and dedicating the walls. What, however, we have here to notice is, that owing to Nehemiah’s wise haste, and his refusal to pause for a day in his work, in spite of threats, plots, and incitements, the designs of his enemies were frustrated. The wall was actually finished and ready to receive the gates, before the king’s decree for suspending the work arrived. A little delay, therefore, was all they were able to effect. Nehemiah does not indeed mention this adverse decree, which may have arrived during his absence, nor give us any clue to the time of its return; nor should we have suspected his absence at all from Jerusalem, but for the incidental allusion in ch. ii. 6, xiv. 6, coupled with the long interval of years between the earlier and later chapters of the book. But the interval between the close of ch. vi. and the beginning of ch. vii. in the only place where we can suppose a considerable gap in time, either from the appearance of the text, or the nature of the events narrated. It seems to suit both well to suppose that Nehemiah returned to Persia, and the work stopped immediately after the events narrated in vi. 16-19, and that chapter vii. goes on to relate the measures adopted by him upon his return with fresh powers. Those were, the setting up the doors in the various gates of the city, giving a special charge to Hamanit and Haman, as to the time of opening and shutting the gates, and above all providing for the due peopling of the city, the numbers of which were miserably small, and the rebuilding of the numerous decayed houses within the walls. Then followed a census of the returned captives, a large collection of funds for the repair of the Temple, the public reading of the Law to the people by Ezra (who now appears again on the scene, perhaps having returned from Persia with Nehemiah), a celebration of the Feast of Tabernacles, such as had not been held since the days of Joshua: a no less solemn keeping of the Day of Atonement, when the opportunity was taken to enter into solemn covenant with God, to walk in the law of Moses and to keep God’s commandments.

It may have been after another considerable interval of time, and not improbably after another absence of the Tishbatthu from his government, that the next event of interest in Nehemiah’s life occurred, namely, the dedication of the walls of Jerusalem, including, if we may believe the author of 2 Macc., supported by several indications in the Book of Nehemiah, that of the Temple after its repair by means of the funds collected from the whole population. This dedication was conducted with great solemnity, and appears to have been the model of the dedication by Judas Maccabaeus, when the Temple was purified and the worship restored at the death of Antiochus Epiphanes, as related 1 Macc. iv. The author of 2 Macc. says that on this occasion Nehemiah obtained the sacred fire which had been hid in a pit by certain priests at the time of the Captivity, and was recovered by their descendants, who knew where it was concealed. When, however, these priests went to the place, they found only muddy water. By Nehemiah’s command they drew this water, and sprinkled it upon the wood of the altar and upon the victims, and when the sun, which had been over-clouded, presently shone out, a great fire was immediately kindled, which consumed the sacrifices, to the great wonder of all present. The author also inserts the prayer, a simple and beautiful one, said to have been uttered by the priests, and responded to by Nehemiah, during the sacrifice; and adds, that the king of Persia inclined the place where the fire was found, and that Nehemiah gave it the name of Naphthali, or cleansing (NEPHTHALI). He tells us further that an account of this dedication was contained in the “writings and commentaries of Nehemiah” (2 Macc. ii. 13), and that Nehemiah founded “a library, and gathered together the acts of the kings, and the prophets, and of David, mentioned in Neh. vii. 70; 2 Esd. ii. 68; the allusion to the pollution of the Temple, xii. 4-5; and the nature of the ceremonies described in ch. xi. 26-43.  

a The reader must remember that this application of 2 Esd. iv. 7-23 to this time is novel, and must exercise his own judgment as to its admisibility.

b Such as the collection of money and priests’ gar
and the epistles of the kings (of Persia) concerning the holy gifts." How much of this has any his-
torical foundation is difficult to determine. It
should be added, however, that the son of Sireh, in
celebrating Nehemiah's good deeds, mentions only
that he "raised up for us the walls that were fallen,
and set up the gates and the bars, and raised up
our ruins again," Eccles. xlix. 13. Returning to
the sure ground of the sacred narrative, the other
principal achievements of this great and good gov-
ernor may be thus signalized. He firmly repressed
the exactions of the nobles, and the usury of the
rich, and rescued the poor Jews from spoliation and
slavery. He refused to receive his lawful allowance
governor from the people, in consideration of their
poverty, during the whole twelve years that he was
in office, but kept at his own charge a table for 150
Jews, at which any who returned from captivity
were welcome. He made most careful provision for
the maintenance of the ministering priests and Lev-
ites, and for the due and constant celebration of
Divine worship. He insisted upon the sanctity of the
precincts of the Temple being preserved invi-
olate, and peremptorily ejected the powerful Tobias
from one of the vaults which Eliezer had as-
signed to him. He then replaced the stores and
vessels which had been removed to make room for
him, and appointed proper Levitical officers to
superintend and distribute them. With no less firm-
ness and impartiality he expelled from all sacred
functions those of the high priest's family who had
contracted heathen marriages, and rebuked and
punished those of the common people who had
likewise intermarried with foreigners; and lastly,
he provided for keeping holy the Sabbath day,
which was shamefully profaned by many, both
Jews and foreign merchants, and by his resolute
course succeeded in repressing the lawless traffic
on the day of rest.

Beyond the 32d year of Artaxerxes, to which
Nehemiah's own narrative leads us, we have no ac-
count of him whatever. Neither had Josephus.
For when he tells us that "when Nehemiah had
done many other excellent things ... he came to
a great age and then died," he sufficiently indicates
that he knew nothing more about him. The most
probable inference from the close of his own me-
memoir, and in the absence of any further tradition
concerning him, is, that he returned to Persia and
died there. Or, that the character of Neheme-
iah, we seem unable to find a single fault to coun-
terbalance his many and great virtues. For pure
and disinterested patriotism he stands unrivaled.
The man whom the account of the misery and ruin
of his native country, and the perils with which his
countrymen were beset, prompted to leave his splen-
didal banishment, and a post of wealth, power,
and influence, after the first court in the world, that
he might share and alleviate the sorrows of his native
land, must have been preeminently a patriot.
Every act of his during his government bespeaks one
who had no selfishness in his nature. All he did was
noble, generous, high-minded, courageous, and to
the highest degree upright. But to stem integ-
ritry he united great humility and kindness, and a
primordially the first court in the world, that he
might share and alleviate the sorrows of his native
land, must have been preeminently a patriot.
Every act of his during his government bespeaks one
who had no selfishness in his nature. All he did was
noble, generous, high-minded, courageous, and to
the highest degree upright. But to stem integ-
ritry he united great humility and kindness, and a
primordially the first court in the world, that he
might share and alleviate the sorrows of his native
land, must have been preeminently a patriot.
Jozabad, his son high-priest, is utterly without weight. There is a precisely parallel phrase in 2 Chr. xxv. 3, where we read "the horse which Solomon the son of David king of Israel did build." But the doubt whether the title "king of Israel" applies to David or Solomon is removed by the following verse, where we read, "according to the writing of David king of Israel, and according to the writing of Solomon his son." The LXX. also in that passage have Ῥαπανια with agreeing with David. There is, therefore, not the slightest pretense for asserting that Nehemiah was governor after the 32d of Artaxerxes (see below).

The whole narrative gives us a graphic and interesting account of the state of Jerusalem and the returned captives in the writer's times, and, incidentally, of the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuation of the genealogical registers and the succession of the high-priesthood to the close of the Persian empire on the other. The view given of the rise of two factions among the Jews — the one the strict religious party, adhering with uncompromising faithfulness to the Mosaic institutions, headed by Nehemiah; the other, the gentilizing party, ever imitating heathen customs, and making heathen connections, headed, or at least encouraged by the high-priest Eliashib and his family — sets before us the germ of much that we meet with in a more developed state in later Jewish history from the commencement of the Macedonian dynasty till the final destruction of Jerusalem.

Again, in this history as well as in the book of Ezra, we see the bitter enmity between the Jews and Samaritans acquiring strength and definite form on both religious and political grounds. It would seem from iv. 1, 2, 8 (A. V.), and vi. 2, 6, 4c, that the depression of Jerusalem was a fixed part of the policy of Sandalkih, and that he had the design of raising Samaria as the head of Palestine, upon the ruin of Jerusalem, a design which seems to have been entertained by the Samaritans in later times.

The book also throws much light upon the domestic institutions of the Jews. We learn incidentally the prevalence of usury and of slavery as its consequence, the frequent and burdensome complaints of the governors (v. 15), the judicial use of corporal punishment (xiii. 25), the continuance of false prophets as an engine of policy, as in the days of the kings of Judah (vi. 7, 12, 14), the restitution of the Mosaic provision for the maintenance of the priests and Levites and the due performance of the Temple service (xiii. 10-13), the much freer communication of the Holy Scriptures by the public reading of them (vii. 4, 5, vii. 11), and the more general acquaintance of them arising from their collection into one volume and the multiplication of copies of them by the care of Ezra the scribe and Nehemiah himself (2 Mac. ii. 13), as well as from the stimulus given to the art of reading among the Jewish people during their residence in Babylon (Hilkiah); the mixed form of political government still surviving the ruin of their independent state (v. 7, 13, x.), the reviving trade with Tyre (xiii. 16), the agricultural pursuits and wealth of the Jews (v. 11, xii. 15), the tendency to take heathen wives, indicating, possibly, a disproportionate in the number of Jewish males and females among the returned captives (x. 30, xiii. 23), the danger that the Hebrew language was in of being corrupted (xii. 21), with other details which only the narrative of an eye-witness would have preserved to us.

Some of these details give us incidentally information of great historical importance.

(a.) The account of the building and dedication of the wall, iii. xiii. xiv., contains the most valuable materials for settling the topography of Jerusalem to be found in Scripture. [JERUSALEM, vol. ii. pp. 1321-22.] (Thurrah's Ancient Jerusalem.)

(b.) The list of returned captives who came under different leaders from the time of Zerubbabel to that of Nehemiah (amounting in all to only 12,360 adult males, and 7,377 servants), which is given in ch. vii. conveys a faithful picture of the political weakness of the Jewish nation as compared with the times when Judah alone numbered 470,000 fighting men (1 Chr. xx. 5). It justifies the description of the Palestinian Jews as "the remnant that are left of the captivity" (Neh. i. 3), and as "these feeble Jews" (iv. 2), and explains the great difficulty felt by Nehemiah in peopling Jerusalem itself with a sufficient number of inhabitants to preserve it from assault (vii. 3, 4, x. 1, 2). It is an important aid, too, in understanding the subsequent history, and in appreciating the patriotism and valor by which they attained their independence under the Maccabees.

(c.) The lists of leaders, priests, Levites, and of those who signed the covenant, reveal incidentally much of the national spirit as well as of the social habits of the captives, derived from older times. Thus the fact that tetrarch leaders are named in Neh. vii. 7, indicates the feeling of the captives that they represented the tetrarch tribes, a feeling further evidenced in the expression "the men of the people of Israel." The enumeration of 21 and 22, or, if Zidkiah stands for the head of the house of Zadok, 23 chief priests in x. 1-8, xii. 7, of whom 9 hear the names of those who were heads of courses in David's time (1 Chr. xxiv.), [Jehohanan], shows how, even in their wasted and reduced annals, they struggled to preserve these ancient institutions, and also supplies the reason of the mention of these particular 22 or 23 names. But it does more than this. Taken in conjunction with the list of those who sealed (x. 1-27), it proves the existence of a social custom, the knowledge of which is of absolute necessity to keep us from gross chronological error, that, namely, of calling chief the Jerusalem of the clan or house of which they were chiefs. One of the causes of the absurd confusion which has prevailed, as to the times of Zerubbabel and Nehemiah respectively, has been the mention, e. g., of Jeddan and Kadmid (Ezr. iii. 9) as taking part with Zerubbabel in building the Temple, while the very same Levites take an active part in the reformation of Nehemiah (Neh. iv. 4, 5, x. 9-10); and the statement that some 6 The evidence of Hebrew having ceased to be the vernacular language of the Jews, which some find in Neh. viii. 8, is very doubtful, and depends on the meaning of לְמַלְיַם.
21 or 22 priests came up with Zerubbabel (xii. 17), coupled with the fact that these very same names were the names of those who sealed the covenant under Nehemiah (x. 1-8). But immediately [as soon as] we perceive that these were the names of the courses, and of great Levitical houses (as a comparison of 1 Chr. xxiv.; Ezr. ii. 49; Neh. vii. 43; and of Neh. x. 11-27 with vii. 8-38, proves that they were), the deduction naturally follows we have a useful piece of knowledge to apply to many other passages of Scripture. It would be very desirable, if possible, to ascertain accurately the rules, if any, under which this use of proper names was confined.

(d.) Other miscellaneous information contained in this book embraces the hereditary crafts practiced by certain priestly families, e. g., the apotheories, or makers of the sacred ointments and incense (iii. 8), and the goldsmiths, whose business it probably was to repair the sacred vessels (iii. 8), and who may have been the ancestors, so to speak, of the money-changers in the Temple (John ii. 14, 15); the situation of the garden of the kings of Judah by which Zebediah escaped (2 K. xxv. 4), as seen iii. 15; and statistics, reminding one of Utopian-Book, concerning not only the cities and families of the Jews but the numbers of their horses, mules, camels, and asses (ch. vii.); to which more might be added.

The chief, indeed, the only real historical difficulty in the narrative, is to determine the time of the dedication of the wall, whether in the 32d year of Artaxerxes or before. The expression in Neh. xiii. 1, "On that day," seems to fix the reading of the hour to the same day as the dedication (see xiii. 43). But if so, the dedication must have been after Nehemiah's return from Babylon (mentioned xiii. 7); for Eliezar's miss-trust, which occurred "before" the reading of the law, happened in Nehemiah's absence. But then, if the wall only took 52 days to complete (Neh. vi. 15), and was begun immediately [when] Nehemiah entered upon his government, how came the dedication to be deferred till 12 years afterwards? The answer to this probably is that, in the first place, the 52 days are not to be reckoned from the commencement of the building, seeing that it is incredible that it should be completed in so short a time by so fewy a community and with such frequent hindrances and interruptions; seeing, too, that the narrative itself indicates a much longer time. Such passages as Nehemiah iv. 7, 8, 12, v. and v. 16 in particular, vi. 4, 5, coupled with the indications of temporary cessation from the work which appear at iv. 6, 10, 15, seem quite irreconcilable with the notion of less than two months for the whole. The 52 days, therefore, if the text is sound, may be reckoned from the resumption of the work after iv. 15, and a time exceeding two years may have elapsed from the commencement of the building. But still 12 years after the declaration. There were the gates to be hung, perhaps much rubbish to be removed, and the ruined houses in the immediate vicinity of the walls to be repaired. Then, too, as we shall see below, there were repairs to be done to the Temple, and it is likely that the dedication of the walls would not take place till these repairs were completed. Still, even these causes would not be adequate to account for a delay of 12 years.

Josephus, who is seldom in harmony with the book of Nehemiah, though he justifies our suspicion that a longer time must have elapsed, by assuming two years and four months to the rebuilding, and placing the completion in the 28th year of the king's reign whom he calls Xerxes (thus interposing an interval of 8 years between Nehemiah's arrival at Jerusalem as governor and the completion), yet gives us no real help. He does not attempt to account for the length of time, he makes no allusion to the dedication, except as far as his statement that the wall was completed in the ninth month, Chislev (instead of Elul, the sixth, as Neh. vi., 15), may seem to point to the dedication (1 Mac. iv. 39), and takes not the slightest notice of Nehemiah's return to the king of Persia. We are left, therefore, to inquire for ourselves whether the book itself suggests any further causes of delay. One cause immediately presents itself, namely, that Nehemiah's leave of absence from the Persian court mentioned ii. 6, may have drawn to a close shortly after the completion of the wall, and before the other above-named works were complete. And this is rendered yet more probable by the circumstance, incidentally brought to light, that, in the 32d year of Artaxerxes, we know he was with the king (xiii. 6).

Other circumstances, too, may have occurred to make it imperative for him to return to Persia. The last work of the builders, besides some new effort of Tobiah to interrupt his work, and the expression used seems to indicate that it was the threat of being considered as a rebel by the king. If he could make it appear that Artaxerxes was suspicious of his fidelity, then Nehemiah might feel it matter of necessity to go to the Persian court to clear himself of the charge. And this view both receives a remarkable confirmation from, and throws quite a new light upon the obscure passage in Ezr. iv. 7-23. We have there a detailed account of the opposition made by the Samaritan nations to the building of the walls of Jerusalem, in the reign of Artaxerxes, and a copy of the letter they wrote to the king, accusing the Jews of an intention to rebel as soon as the wall should be finished; by which means they obtained a decree stopping the building till the king's further orders should be received. Now, if we compare Neh. vi. 6, 7, where mention is made of the report "among the heathen" as to the intended rebellion of Nehemiah, with the letter of the heathen nations mentioned in Ezr. iv., and also recollect that the only time when, as far as we know, the walls of Jerusalem were attempted to be rebuilt, was when Nehemiah was governor, it is difficult to resist the conclusion that Ezr. iv. 7-23 relates to the time of Nehemiah's government, and explains the otherwise unaccountable circumstance that 12 years elapsed before the dedication of the walls was completed. Nehemiah may have started on his journey on receiving the letters from Persia (if such they were) sent him by Tobiah, leaving his lieutenants to carry on the works, and after his departure. Rehum and Shimshai and their associates may have come up to Jerusalem with the king's decree and obliged them to desist. It should seem, however, that at Nehemiah's arrival in Persia, he was able to satisfy the king of his perfect integrity, and that he was permitted to return to his government in Judah. His leave of absence may again have been of limited duration, and the business of the census, of repairing Jerusalem, the last work of the king, possibly rebuilding the ruined houses, and repairing the Temple, may have occupied his whole time till his second return to the king. During this second absence another evil arose — the gentilizing party
NEHEMIAH, BOOK OF

NEHEMIAH, BOOK OP

recovered strength, and the intrigues with Tobiah (vi. 17), which had already begun before his first departure, were more actively carried on, and so far that Eliashib the high-priest actually assigned one of the store-chambers in the Temple to Tobiah's use. This we are not told of till viii. 4-7, when Nehemiah relates the steps he took on his return. But this very circumstance suggests that Nehemiah does not relate the events which attended his absence, and would account for his silence in regard to Nehemiah's government of Judaea lasting only 12 years, namely, from the 20th to the 32d of Artaxerxes. For the literal and grammatical rendering of viii. 6 is, 'And in all this time was not I at Jerusalem;' nor in the two-and-thirtyth year of Artaxerxes king of Babylon, came I unto the king, and after certain days obtained I leave of the king, and I came to Jerusalem" — the force of " אֶל " after a negative being but rather than for (Gesen. Thes. p. 659); the meaning of the passage being, therefore, not that he left Jerusalem to go to Persia in the 32d of Artaxerxes, but, on the contrary, that he does not relate the events which attended his absence. The dedication of the walls and the other reforms named in ch. xiii. were the closing acts of his administration.

It has been already mentioned that Josephus does not follow the authority of the Book of Nehemiah. He detaches Nehemiah, viii. from its context, and appends the narrative contained in it to the third book of Ezra. This makes Ezra die before Nehemiah came to Jerusalem as governor, and consequently ignores any part taken by him in conjunction with Nehemiah. He makes no mention either of the wall-building in the events of Nehemiah's government, but places him in the time of Jaddua and Alexander the Great. He also makes the daughter of Sanballat marry a son, not of Jerahmeel, as Neh. xii. 28, but of Jonathan, namely, Manasseh the brother of the High-priest Jaddua, thus entirely shifting the age of Sanballat from the reign of Artaxerxes Longimanus, to that of Darius Codomannus, and Alexander the Great. It is scarcely necessary to observe, that as Artaxerxes Longimanus died c. 421, and Alexander the Great was not master of Syria and Palestine till c. 352, all attempts to reconcile Josephus with Nehemiah must be lost hope. It is equally clear that on every ground the authority of Josephus' variations yield to that of Nehemiah. The only question therefore is what was the cause of Josephus' variations. Now, as regards the appending the history in Neh. viii. to the times of Ezra, we know that he was guided by the authority of the Apocryphal 1 Esdr. as he had been in the whole story of Zerubbabel and Parthus. From the third additions to his narrative of Nehemiah's first application to Artaxerxes, as well as from the passage below referred to in 2 Macr. i. 23, we may be sure that there were apocryphal versions of the story of Nehemiah.9 The account of Judas' interview with Alexander the Great savors strongly of the same origin. There can be little doubt, therefore, that in all the points in which Josephus differs from Nehemiah, he followed apocryphal Jewish writings, some of which have since perished. The causes which led to this were various. One desire was the more desire for matter with which to fill up his pages where the narrative of the canonical Scriptures is meagre. In making Nehemiah succeed to the government after Ezra's death, he was probably influenced partly by the wish to give an orderly, dignified appearance to the succession of Jewish governors, approximating as nearly as possible to the old monarchy, and partly by the desire to spin out his matter into a continuous history. Then the difficulties of the books of Ezra and Nehemiah, which the compiler of 1 Esdr. had tried to get over by his arrangement of the order of events, coupled with Josephus' gross ignorance of the real order of the Persian kings, and his utter misconception as to what monarchs are spoken of in the books of Ezra, Nehemiah, and Esther, had also a large influence. The writer, however, who makes Darius Codomannus succeed Artaxerxes Longimanus, and continues this last-named king with Artaxerxes Meneon: who also thinks that Xerxes reigned about 52 years, and who falsifies his best authority, altering the names, as in the case of the substitution of Xerxes for Artaxerxes throughout the book of Nehemiah, and suppressing the facts, as in the case of the omission of all mention of Ezra, Tobiah, and Sanballat during the government of Nehemiah, so as to much difference on our part. What has been said shows clearly how little Josephus' unsupported authority is worth; and how entirely the authenticity and credibility of Nehemiah remains unshaken by his blunders and confusions, and that there is no occasion to resort to the improbable hypothesis of two Sanballats, or to attribute to Nehemiah a patriarchal longevity, in order to bring his narrative into harmony with that of the Jewish histories.

2. As regards the authorship of the book, it is admitted by all critics that it is, as to its main parts, the genuine work of Nehemiah. But it is no less certain that interpolations and additions have been made in it since his time:1 and there is considerable diversity of opinion as to what are the portions which have been so added. From i. 1 to vi. 6, no doubt or difficulty occurs. The writer speaks throughout in the first person singular, and in his character of governor כְּפִי קָרָא. Again, from xii. 31, to the end of the book (except xi. 44-47), the narrative is continuous, and the use of the first person singular constant (xii. 31, 38, 40, xiii. 6, 7, ἀκοτί). It is therefore only in the intermediate chapters, vii. 6 to xii. 26, and xiii. 44-47, that we have to inquire into the question of authorship, and this we will do by sections: —

(u.) The first section begins at Neh. vii. 6, and ends in the first half of viii. 1, at the words "one man." It has already been asserted [Ezra, Book or, vol. i. p. 395] that this section is identified with the second paragraph beginning Ezra ii. 1, and ending iii. 1; and it was there also asserted that the par

9 b F. Keil, in his Einleitung, endeavors indeed to vindicate Nehemiah's authorship for the whole book, but without success.
agraphe originally belonged to the book of Nehemiah, and was afterwards inserted in the place it occupies in Ezra.\(^a\) Both these assertions must now be made good; and first as to the identity of the two passages. They are actually identical word for word, and letter for letter, except in two points. One that the numbers repeatedly vary. The other that there is a difference in the account of the offerings made by the governor, the nobles, and the people. But it can be proved that these are merely variations (whether accidental or designed) of the same text. In the first place the two passages are one and the same. The heading, the contents, the narrative about the sons of Haruzzi, the fact of the offerings, the dwelling in their cities, the coming of the seventh month, the gathering of all the people to Jerusalem as one man, are in words and in sense the very self-same passage. The idea that the very same words, extending to 70 verses, describe different events, is simply absurd and irrational. The numbers therefore must originally have been the same in both books. But next, when we examine the varying numbers, we see the following particular proofs that the variations are corruptions of the original text. Though the items vary, the sum total, 42,360, is the same (Exr. ii. 64; Neh. vii. 60). In like manner the totals of the servants, the singing men and women, the horses, mules, and asses are all the same, except that Ezra has two hundred, instead of two hundred and forty-five, singing men and women. The numbers of the Priests and of the Levites are the same in both, except that the singers, the sons of Asaph, are 128 in Ezra against 148 in Nehemiah, and the porters 139 against 138. Then in each particular case when the numbers differ, we see plainly how the difference might arise. In the statement of the number of the sons of Arahi (the first case in which the lists differ), Exr. ii. 5, we read, תפועו טביסבבע רודאנה, "seven hundred five and seventy," whereas in Neh. vii. 10, we read, ד"^ו"נ יביסבבע רודאנה. But the order of the numerals in Exr. ii. 5, where the units precede the tens, is the only case in which this order is found. Obviously, therefore, we ought to read ד"^ו"נ, fifty instead of four. No less obviously ד"^ו"נ may be a corruption of the almost identical ד"^ו"נ and probably caused the preceding change of ד"^ו"נ into ד"^ו"נ.\(^b\) But the tens and units being identical, it is evident that the variation in the hundreds is an error, arising from both six and seven beginning with the same letter נ. The very same interchange of six and seven takes place in the number of Adonikam, and Bigrai, only in the units (Neh. vii. 18, 19; Exr. ii. 13, 14). In Pahath-Moab, the variation from 2812, Exr. ii. 6, to 2818, Neh. vii. 11; in Zattu, from 943, Exr. ii. 8, to 945, Neh. vii. 13; in Binnu, from 642 to 648; in Bebai, from 623 to 628;\(^c\)

\(^{a}\) So also Grotius (notes on Ezr. ii., Neh. vii.), with his usual clear sense and sound judgment. See especially his note on Ezr. ii. 1, where he says many Greek copies of Ezra omit ch. ii.

\(^{b}\) Or if ד"^ו"נ is the right reading in Ezr. ii. 5 (In-}

in Hashum, from 223 to 238; in Senanah, from 3630 to 3930; the same cause has operated, namely, that in the numbers two and eight, three and eight, nine and six, the same initial נ is found; and the resemblance in these numbers may probably have been greatly increased by abbreviations. In Asagel (1222 and 2232) as in Senanah, the mere circumstance of the tens and units being the same in both passages, while the thousands differ by the mere addition or omission of a final נ, is sufficient proof that the variation is a clerical one only. In Alin, Neh. vii. 29, six for four, in the hundreds, is probably caused by the six hundred of the just preceding Adonikam. In the four remaining cases the variations are equally easy of explanation, and the result is to leave not the slightest doubt that the enumeration was identical in the first instance in both passages. It may, however, be added, as completing the proof that these variations do not arise from Ezra giving the census in Zerubbabel's time, and Nehemiah that in his own time (as Cellier, Prideaux, and other learned men have thought), that in the cases of Parosh, Pahath-Moab, Elam, Shephatiah, Belaci, Argazik, and Adonikam, of which we are told in Exr. viii. 3-14, that considerable numbers came up to Judaea in the reign of Artaxerxes — long subsequent therefore to the time of Zerubbabel — the numbers are either exactly the same in Exr. ii. and Neh. vii., or exhibit such variations as have no relation whatever to the numbers of those families respectively who were added to the Jewish residents in Palestine under Artaxerxes.

To turn next to the offerings. The book of Ezra (i. 68, 69) merely gives the sum total, as follows: 61,000 drachms of gold, 5,000 pounds of silver, and 100 priests' garments. The book of Nehemiah gives no sum total, but gives the following items (vii. 72): —

The Tirshathra gave 10,000 drachms of gold, 50 basins, 530 priests' garments. The chief of the fathers gave 20,000 drachms of gold, and 2,200 pounds of silver. The rest of the people gave 20,000 drachms of gold, 2,000 pounds of silver, and 67 priests' garments.

Here then we learn that these offerings were made in three shares, by three distinct parties: the governor, the chief fathers, the people. The total sum of drachms of gold, we learn from Ezra, was 61,000. The shares, we learn from Nehemiah, were 20,000 in two out of the three donors, but 1,000 in the case of the third and chief donor! Is it not quite evident that in the case of Nehemiah the 20 has slipped out of the text (as in 1 Esdr. v. 45, 60,000 has), and that his real contribution was 21,000? his generosity prompting him to give in excess of his fair third. Next, as regards the pounds of silver. The sum total was, according to Ezra, 5,000. The shares were, according to Nehemiah, 2,200 pounds from the chiefs, and 2,000 from the people. But the LXX. give 2,300 for the chiefs, and 2,200 for the people, making 4,500 in all, and so leaving a deficiency

\(^{c}\) Observes the odd thousand in both cases.
of 500 pounds as compared with Ezra's total of 5,000, and assigning no silver offering to the Tirshatha. As regards the priests' garments. The sum total as given in both the Hebrew and Greek text of Ezra, and in 1 Esdr., is 100. The items as given in Neh. vii. 70, are 250 + 67, 529. But the I.XX gives 30 + 67 = 97, and that this is nearly correct is apparent from the numbers themselves. For the total being 100, 33 is the nearest whole number to 97, and 67 is the nearest whole number to $\frac{1}{2} \times 100$. So that we cannot doubt that the Tirshatha gave 33 priests' garments, and the rest of the people gave 67, probably in two gifts of 34 and 33, making in all 100. But how came the 500 to be added on to the Tirshatha's tale of garments? Clearly it is a fragment of the missing 500 pounds of silver, with which, with the 50 books, made up the Tirshatha's donation. So that Neh. vii. 70 ought to be read thus: "The Tirshatha gave to the treasure 21,000 drachms of gold, 50 boxes, 500 pounds of silver, and 33 priests' garments." The offerings then, as well as the numbers in the lists, were once identical in both books, and we learn from Ezr. ii. 68, that the book of Nehemiah does not expressly tell us (though the priests' garments strongly indicate that, what was the purpose of this liberal contribution, namely, to set up the House of God in his place" (וקינב הירש לומד). From this phrase recurring in Ezr. ii. just before the account of the building of the Temple by Zerubbabel, it has usually been understood as referring to the rebuilding. But it really means no such thing. The phrase properly implies restoration and preservation, as may be seen in the exactly similar case of the restoration of the Temple by Jehoiada, 2 Chr. xxiv. 13, after the injuries and neglect under Athalia, where we read, דנניל לומד "they set the House of God in its state." (comp. also 1 K. xxv. 4). The fact then was that, when all the rulers and nobles and people were gathered together at Jerusalem to be registered in the seventh month, advantage was taken of the opportunity to collect their contributions to restore the Temple also (2 Macc. i. 18), which had naturally partly been of the general misery and affluence of the people, and it would not have been wise to restore the rebuilding of the wall placed the city in a state of safety. At the same time, and in the same spirit, they formed the resolutions recorded in Neh. x. 32-39, to keep up the Temple ritual.

It already follows, from what has been said, that the section under consideration is in its right place in the book of Nehemiah, and was inserted subsequent to the book of Ezra out of its chronological order. But one or two additional proofs of this must be mentioned. The most convincing and palpable of these is perhaps the mention of the Tirshatha in Ezr. ii. 62; Neh. vii. 65. That the Tirshatha, here and at Neh. vii. 70, means Nehemiah, we are expressly told (Neh. viii. 9, x, 1), and there is the certain indication that this relates (Ezr. ii. 62; Neh. vii. 64) happened in Nehemiah's time, and not in Zerubbabel's. Consequently the taking of the census, which gave rise to that incident, belongs to the same time. In other words, the section we are considering is in its original and right place in the book of Nehemiah, and was transferred thence to the book of Ezra, where it stands out of its chronological order. And this is still further evident from the circumstance that the passage contains (with the exception of the consideration of the passage, so far as it is in the body of Nehemiah) a quotation of the same portion as it stands in Nehemiah, proving that the passage existed in Nehemiah before it was inserted in Ezra. Another proof is the mention of Ezra as taking part in that assembly of the people at Jerusalem which is described in Ezr. iii. 1; Neh. viii. 1; for Ezra did not come to Jerusalem till the reign of Artaxerxes (Ezr. vii.). Another is the mention of Nehemiah as one of the leaders under whom the captives enumerated in the census came up, Ezr. ii. 2; Neh. vii. 7; in both which passages the juxtaposition of Nehemiah with Seraias, when compared with Neh. x. 1, 2, greatly strengthens the conclusion that Nehemiah the Tirshatha is meant. Then again, that Nehemiah should summon all the families of Israel to Jerusalem to take their census, and that, having done so at great cost of time and trouble, or whoever was employed by him, should merely transcribe an old census taken nearly 100 years before, instead of recording the result of his own labor, is so improbable that nothing but the plainest necessity could make one believe it. The only difficulty in the way is that the words in Neh. viii. 5, 6, seem to describe the register which follows as the register of the genealogy of those which came up at the first, and that the expression, "and found written therein," requires that the words which follow should be a quotation from that register (comp. vi. 6). To this difficulty (and it is a difficulty at first sight) it is a sufficient answer to say that the words quoted are only those (in Neh. vii. 6) which contain the title of the register found by Nehemiah. His own new register begins with the words at ver. 7: כנירה נזיר, etc., "The men who came with Zerubbabel," etc., which form the descriptive title of the following catalogue. Nehemiah, or those employed by him to take the new census, doubtless made use of the old register (which it had been the business of Haggai and Zechariah) as an authority by which to decide the genealogies of the present generation. And hence it was that when the sons of Barzillai claimed to be entered into the register of priestly families, but could not produce the entry of their horse in that old register, Nehemiah refused to admit them to the priestly office (65-66), but made a note of their claim, that it might be decided whenever a competent authority should arise. From all which it is abundantly clear that the section under consideration belongs properly to the book of Nehemiah. It does not follow, however, that it was written in its present term by Nehemiah himself. Indeed the sudden change to the third person, in speaking of the Tirshatha, in vv. 62-63, in the placing of the passage in its present position (as it is well known, the section beginning xii. 31), is a strong indication of a change in the writer, as is also the use of the term Tirshatha instead of Pechar, which last is...
the official designation by which Nehemiah speaks of himself and other governors (v. 14, 18, ii. 7, 9, iii. 7). It seems probable, therefore, that ch. vii., from ver. 7, contains the evidence of what was found in this part of Nehemiah's narrative, but abridged, and in the form of an abstract, which may account for the difficulty of separating Nehemiah's register from Zerubbabel's, and also for the very abrupt mention of the gifts of the Tirshatha and the people at the end of the chapter. This abstract formed a transition from Nehemiah's narrative in the preceding chapters to the entirely new matter inserted in the following sections.

(3.) The next section commences Neh. viii., later part of ver. 1, and ends Neh. xi. 3. Now throughout this section several things are observable. (1.) Nehemiah does not once speak in the first person (viii. 9, x. 1). (2.) Nehemiah is no longer the principal actor in what is done, but almost disappears from the scene, instead of being, as in the first six chapters, the centre of the whole action. (3.) Ezra for the first time is introduced, and throughout the whole section the most prominent place is assigned either to him personally, or to strictly ecclesiastical affairs. (4.) The prayer in ch. ix. is very different in its construction from Nehemiah's prayer in ch. i., and in its frequent references to the various books of the O. T. singularly suited to the character and requirements of Ezra, "the ready scribe in the law of Moses."

(5.) The section was written by an eye-witness and actor in the events described. This appears by the minute details, e. g. viii. 4, 5, 6, &c., and the use of the first person plural (x. 30-39). (6.) There is a strong resemblance to the style and manner of Ezra's narrative, and also an identity in the use of particular phrases (comp. Ezr. iv. 18, Neh. viii. 8; Ezr. vi. 22, Neh. viii. 17). This resemblance is admitted by critics of the most opposite opinions (see Keil's Einleitung, p. 401). Hence, as Ezra's manner is to speak of himself in the third as well as in the first person, there is great probability in the opinion advocated by Hiévernic and Kleinert, that this section is the work of Ezra. The fact, too, that 1 Esdr. ix. 35 sqq. annexes Neh. vii. 1-13 to Ezr. x., in which it is followed by Josephus (Antil. xi. 6, 5), is perhaps an indication that it was known to be the work of Ezra. It is not necessary to suppose that Ezra himself inserted this or any other part of the present book of Nehemiah in the midst of the Tirsathiah's history. But if there was extant an account of these transactions by Ezra, it may have been thus incorporated with Nehemiah's history by the last editor of Scripture. Nor is it impossible that the union of Ezra and Nehemiah as one book in the ancient Hebrew arrangement (as Jerome testifies), under the title of the Book of Ezra, may have had its origin in this circumstance.

(c.) The third section consists of ch. xi. 3-36. It contains a list of the families of Judah, Benjamin, and Levi (priests and Levites), who took up their abode at Jerusalem, in accordance with the resolution of the volunteers, and the decision of the lot, mentioned in xi. 1, 2. This list forms a kind of supplement to that in vii. 8-60, as

appears by the allusion in xi. 2 to that previous document. For ver. 3 distinguishes the following list of the 'dwellers at Jerusalem' from the foregoing one of "Israel, priests, Levites, Nethinim, and children of Solomon's servants," who dwelt in the cities of Israel, as set forth in ch. vii. This list is an extract from the official roll preserved in the national archives, only somewhat abbreviated, as appears by a comparison with 1 Chr. ix., where an abstract of the same roll is also preserved in a fuller form, and in the latter part especially with considerable variations and additions: it seems also to be quite out of its place in Chronicles, and its insertion there probably caused the repetition of 1 Chr. vii. 29-40, which is found in duplicate ix. 35-41: in the latter place wholly disconnected with ix. 1-34, but connected with what follows (ch. x. 1), as well as with what precedes ch. ix. Whence it appears clearly that 1 Chr. ix. 2-34 is a later insertion made after Nehemiah's census, but proving by its very incoherence that the book of Chronicles existed previous to its insertion. But this by the way. The nature of the information in this section, and the parallel passage in 1 Chr., would rather indicate a Levitical hand. It might or might not have been the same which inserted the preceding section. It is later and perhaps the work of the same person who inserted xii. 1-30, 44-47.

In conjunction with 1 Chr. ix. it gives us minute and interesting information concerning the families residing at Jerusalem, and their genealogies, and especially concerning the provision for the Temple-service. The grant made by Artaxerxes (ver. 23) for the maintenance of the singers is to be noted, as to that part of Ezra's time which is followed by the mention of Darius the Persian, in xii. 1-30 and 44-47. The statement in ver. 24 concerning Pethahiah the Zarethite, as "at the king's hand in all matters concerning the people," is somewhat obscure, unless perchance it alludes to the time of Nehemiah's absence in Babylon, when Pethahiah may have been a kind of deputy-governor ad interim.

(d.) From xii. 1 to 26 is clearly and certainly an abstract from the official lists made and inserted here long after Nehemiah's time, and after the destruction of the Persian dynasty by Alexander the Great, and is plainly indicated by the expression Darius the Persian, as well as by the mention of Judah. The allusion to Jeshua, and to Nehemiah and Ezra, in ver. 26, is also such as would be made long posterior to their lifetime, and contains a remarkable reference to the two censuses taken and written down, the one in Jeshua and Zerubbabel's time, the other in the time of Nehemiah; for it is evidently from these two censuses, the existence of which is borne witness to in Neh. xii. 5, that the writer of xii. 26 drew his information concerning the priestly families at those two epochs (compare also xii. 47).

The juxtaposition of the list of priests in Zerubbabel's time, with that of those who sealed the covenant in Nehemiah's time, as given below, both illustrates the use of proper names above referred to, and also the clerical fluctuations to which proper names are subject.

a Kleinert ascribes ch. viii. to an assistant, ix. and x. to Ezra himself. See De Wette's Einleitung, Par-}

ter's transit. ii. 382.

b Comp. 1 Chr. ix. 2 with Neh. vii. 73.

c That these families were objects of especial later est appears from Neh. xi. 2.

(e.) xii. 44-47 is an explanatory interpolation,
made in later times, probably by the last reviser
of the book, whoever he was. That it is so is evi-
dent not only from the sudden change from the
first person to the third, and the dropping of the
personal narrative (though the matter is one in
which Nehemiah necessarily took the lead), but
from the fact that it describes the identical transac-
tion described in xiii. 10-13 by Nehemiah himself,
where he speaks as we should expect him to speak:
"And I made treasurers over the treasuries," etc.
The language, too, of ver. 47 is manifestly that
of one looking back upon the times of Zerubbabel
and those of Nehemiah alike. In like manner
xii. 27-30 is the account by the same annotator
of what Nehemiah himself relates, xiii. 10-12.

Though, however, it is not difficult thus to point
out those passages of the book which were not part
of Nehemiah's own work, it is not easy, by cutting
them out, to restore that work to its integrity.
For Neh. xii. 31 does not fit well to any part of
ch. vii., or in other words, the latter portion of
Nehemiah's work does not join on to the former.
Had the former part been merely a kind of diary
entered day by day, one might have supposed that
it was abruptly interrupted and as abruptly re-
sumed. But as Neh. v. 14 distinctly shows that
the whole history was either written or revised by
the author after he had been governor twelve
years, such an ascription cannot stand. It should seem,
therefore, that we have only the first and last parts
of Nehemiah's work, and that for some reason the
intermediate portion has been displaced to make
room for the narrative and documents from Neh.
vii. 1 to xii. 27.

And we are greatly convinced in this supposition
by observing that in the very chapter where we
first notice this abrupt change of person, we have
another evidence that we have not the whole of
what Nehemiah wrote. For at the close of chap.
vii. we have an account of the offerings made by
the governor, the chiefs, and the people, but we
are not even told for what purpose these offerings
were made. Only we are led to guess that it must
have been for the Temple, as the parallel passage
in Ezr. ii. tells us it was, by the mention of the
priest's garments which formed a part of the offer-
ings. Obviously, therefore, the original work must
have contained an account of some transactions
connected with repairing or beautifying the Tem-
ple, which led to these contributions being made.
Now, it so happens that there is a passage in 2
Macc. ii. 13, in which the writings and comment-
taries of Nehemiah are referred to in a way which
shows that they contained matter relative to the
sacred fire having consumed the sacrifices offered
by Nehemiah on some solemn occasion when he repaired
and dedicated the Temple, which is not found in
the present book of Nehemiah: and if any depend-
ence can be placed upon the account there given,
and in i. 18-36, we seem to have exactly the two
facts that we want to justify our hypothesis.
The one, that Nehemiah's narrative at this part con-
tained some things which were not suited to form
part of the Bible; the other, that it formerly
contained some account which would be the nat-
ural occasion for mentioning the offerings which
he now omitted.
If this be the case, then the
and the exceptional matter was consequently omit-
ted, and an abridged notice of the offerings retained,
we should have exactly the appearance which we
actually have in chap. vii.

Nor is such an explanation less suited to connect
the latter portion of Nehemiah's narrative with the
former. Chap. xii. 31 gives on to describe the
dedication of the wall and its ceremonial. How
naturally this would be the sequel of that dedica-
tion of the restored Temple spoken of by the
author of 2 Macc. it is needless to observe. So
that if we suppose the missing portions of Nehe-
miah's history which described the dedication ser-
vice of the Temple to have followed his description
of the census in ch. vii., and to have been followed
by the account of the offerings, and then to have
been succeeded by the dedication of the wall, we
have a perfectly natural and consistent narrative.
In erasing what was irrelevant, and inserting the
intervening portion of the wall, because no desire existed, to disguise the operation,
or to make the joints smooth; the object being simply to preserve an authentic record without reference to authorship or literary perfection.

Another circumstance which lends much probabili-
ty to the statement in 2 Macc., is that the
writer closely connects what Nehemiah did with
what Solomon did, and before him. In this one
may infer, following Nehemiah's narrative. But
in the extant portion of our book, Neh. i. 6, we
have a distinct allusion to Solomon's prayer (1 K.
viii. 28, 29), as also in Neh. xiii. 26, we have to
another part of Solomon's life. So that on the
whole the passage in 2 Macc. lends considerable
support to the theory that the middle portion of
Nehemiah's work was put out, and that there was
substituted for it partly an abridged abstract, and
partly Ezra's narrative and other appended docu-
ments. 

not strictly authentic, or for some other reason not
suited to have a place in the canon.
NEHEMIAH, BOOK OF

We may then affirm with tolerable certainty that all the middle part of the book of Nehemiah has been supplied by scribes; and that the first six chapters and part of the seventh, and the last chapter and half, were alone written by him, the intermediate portion being inserted by those who had authority to do so, in order to complete the history of the transactions of those times. The difference of authorship being marked especially by this, that, in the first and last portions, Nehemiah invariably speaks in the first person singular (except in the inserted verses xii. 44-47), but in the middle portion no such case. It is in this middle portion alone that matter unsuited to Nehemiah's times (as e.g. Neh. xii. 22) is found, that obscurity of connection exists; and that the variety of style (as almost all critics admit) suggests a different authorship. But when it is remembered that the book of Nehemiah is in fact a continuation of the Chronicles, as being reckoned by the Hebrews, as Jerome testifies, as one with Ezra, which was confessedly so, and that, as we have seen under Ezra, Chronicles, and Kings, the customary method of composing the national chronicles was to use contemporaneous writings, and work them up according to the requirements of the case, it will cease to surprise us in the least that Nehemiah's diary should have been so used: nor will the admixture of other contemporary documents with it, or the addition of any reflections by the latest editor of it, in any way detract from its authenticity or authority.

As regards the time when the book of Nehemiah was put into its present form, we have only the following data to guide us. The highest-priest mentioned, Jaddus, was doubtless still alive when his name was added. The descriptive addition to the name of Darius (xii. 22) "the Persian," indicates that the Persian rule had ceased, and the Greek rule had begun. Jaddus's name, therefore, and the clause at the end of ver. 22, were inserted early in the reign of Alexander the Great. But it appears that the registers of the Levites, entered into the Chronicles, did not come down lower than the time of Johanan (ver. 23); and it even seems from the distribution of the conjunction "and" in ver. 22, that the name of Jaddus was not included when the sentence was first written, but stopped at Johanan, and that Jaddus and the clause about the Persian government were added later. So that the close of the Persian dominion, and the beginning of the Greek, is the time clearly indicated when the latest additions were made. But whether this addition was anything more than the insertion of the documents contained from ch. xi. 3 to xii. 26, or even much less; or whether at the same time, or at an earlier one, the great alteration was made of substituting the abridgment in ch. vii. in the contemporary narratives in ch. viii., ix., x.; for what Nehemiah had written, there seems to be no means of deciding. Nor is the decision of much consequence, except that it would be interesting to know exactly when the volume of Holy Scripture definitively assumed its present shape, and who were the persons who put the finishing hand to it.

In respect to language and style, this book is very similar to the Chronicles and Ezra. Nehemiah has, it is true, quite his own manner, and, as De Wette has observed, certain phrases and modes of expression peculiar to himself. He has also some few words and forms not found elsewhere in Scripture: but the general Hebrew style is exactly that of the books purporting to be of the same age. Some words, as בַּעַלְּכָּה, "symbols," occur in Chron., Ezra, and Neh., but nowhere else. בַּעַלְּכָּה occurs frequently in the same three books, but only twice (in Judg. v.) besides. בַּעַלְּכָּה, or בַּעַלְּכָּה, "a letter," is common only to Neh., Esth., Ezra, and Chron. בַּעַלְּכָּה, and its Chaldee equivalent, בַּעַלְּכָּה, whether spoken of the palace at Susa, or of the Temple at Jerusalem, are common only to Neh., Ezra, Esth., Dan., and Chron. בַּעַלְּכָּה to Neh., and Dan, and Ps. xliv. The phrase בַּעַלְּכָּה and its Chaldee equivalent, "the God of Heavens," are common to Ezra, Neh., and Dan. בַּעַלְּכָּה, "distinctly," is common to Ezra. and Neh. Such words as הַעַלְּכָּה, הַעַלְּכָּה, and such Aramaisms as the use of הַעַלְּכָּה, l. 7, בַּעַלְּכָּה, v. 7, בַּעַלְּכָּה, v. 4, &c., are also evidences of the age when Nehemiah wrote. As examples of peculiar words or meanings, used in this book alone, the following may be mentioned: בַּעַלְּכָּה, "to inspect," ii. 13, 15; בַּעַלְּכָּה, in the sense of "interest," v. 11; בַּעַלְּכָּה (in Hiph.), "to shut," vii. 3; בַּעַלְּכָּה, "a lifting up," viii. 6; בַּעַלְּכָּה, "praises," or "choirs," xii. 8; בַּעַלְּכָּה, "a procession," xii. 31; בַּעַלְּכָּה, in sense of "reading," viii. 8; בַּעַלְּכָּה, for שְׁבַעַלְּכָּה, xiii. 13, where both form and sense are alike unusual.

The Aramean form, בַּעַלְּכָּה, Hiph. of בַּעַלְּכָּה, is very rare, only five or other analogous examples occurring in the Heb. Scriptures, though it is very common in Biblical Chaldee.

The phrase בַּעַלְּכָּה, iv. 17 (which is omitted by the LXX.) is incapable of explanation. One would have expected, instead of בַּעַלְּכָּה, בַּעַלְּכָּה, as in 2 Chr. xxiii. 10.

בַּעַלְּכָּה, "the Tirshatha," which only occurs in Ezra, ii. 63; Neh. vii. 55, 70; viii. 9, x. 1, is of uncertain etymology and meaning. It is a term applied only to Nehemiah, and seems to be more likely to mean "cupbearer" than "governor," though the latter interpretation is adopted by Gesenius (Thes. s. v.).

The text of Nehemiah is generally pure and free from corruption, except in the proper names, in which there is considerable fluctuation in the orthography, both as compared with other parts of the same book and with the same names in other parts of Scripture: and also in numerals.

" So Ewald also.
* If we knew the real history of the title Tirshatha, it might assist us in determining the date of the passage where it appears.
* Ps. xiv. 18, exv. 61; 1 Sam. xvii. 47; Is. iii. 5; Es. xiv. 22 (Journ. of Soc Lit. Jan. 1851, p. 383).
Of the latter we have seen several examples of the parallel passages Ezr. ii. and Neh. vii.; and the heavenly lists will give variations in names of men. We will xii. 1-7, compared with xii. 12, and with x. 1-8.

A comparison of Neh. xi. 3, 4c, with 1 Chr. ix. 2, 4c, exhibits the following deletions: Neh. xi. 4, Hebrew of the children of Perez = 1 Chr. ix. 4, Pethai the children of Perez = v. 5. Munnith the son of Shilon = v. 5, of the Shiites, Abiathar = v. 9, Abiath the son of Sanniah (Heb. Hasanannah) = v. 7, Hodeviah the son of Hasanannah = v. 10, Jehoshiah the son of Joarib, Jachin = v. 10, Jehoshiah, Jehoahaz, Jachin; v. 13, Amoshai son of Azarel = v. 12, Amoshai son of Jehozabad = v. 17, Michal the son of Zebiah = v. 13, Michal the son of Zichri (comp. Neh. xii. 35). To which many others might be added.

Many various readings are also indicated by the LXX. version. For example, at ii. 13, for τέρας, "dragon," they read μέρασσα, "wings," and render it τῶν συκών. At ii. 20, for τῆς, "we will arise," they read μέρασσα, "pure," and render it καθαρόν. At iii. 2, for τῆς, "they built," they read twice καθαρὸν, οἶκον; and so at ver. 13. At iii. 15, for τὴν, τοῦ καθαροῦ, "the pool of Siloam by the king's garden," they read τὴν καθαρὸν, "the king's fleece," and render it καθαρούθεν τῶν καθαρῶν τῆς καθαροῦ τῶν βασιλείων καθαροῦ being the word by which τῆς is rendered in Dent. xviii. 4. τῆς καθαροῦ is rendered by καθαροῦ, "sheep-skins," in the Chaldee sense of καθαρόν or καθαροῦ; a fleece recently stripped from the animal (Castell. LXX.). At iii. 16, for τῆς, "over against," they read τῆς, "the garden;" comp. ver. 20; in iii. 44, 35 (iv. 2, 3), they seem to have had a corrupt and unintelligible text. At v. 5, for τῆς, "others," they read τῆς, "the nobles;" v. 11, for τῆς, "the hundredth," they read τῆς, "some of," rendering αὐτός; vi. 1, for τῆς, there was left no "breach in it;" namely, the wall, they read τῆς, "spirit in them," namely, Sanballat, etc., rendering εἰς αὐτόν πνεύμα; vi. 3, for τῆς, "I leave it," they read τῆς, "I complete it," τέλεσσαρος which gives a better sense. At vii. 64, if, the number of asses is 2,700 instead of 6,720; of priests' garments, 30 instead of 530; of pounds of silver, 2,300 and 2,200, instead of 2,500 and 2,000, as has been noticed above; and ver. 70, τῆς Νεώπαρα, for "the Tirshatha." At xi. 11, for τῆς, "ruler," they read τῆς, "over against," ἀναπαράγησι. At xii. 8, for τῆς, "thanksgiving," εἰς τῶν χρυσών; xii. 25, for τῆς, "the treasuries," τῆς, "my gathering together," εἰς τῆς σωματουχαστὶν μετά: and at xii. 41, for τῆς, "the fields," they read τῆς, "the princes," ἀρχιεχουσι τῶν τῆς ἀναπαράγησι with other minor variations. The principal additions are at viii. 8, 15, and ix. 6, where the name of Ezra is introduced, and in the first passage also the words ἐν ἑσπερίαι κυρίου. The omissions of words and whole verses are numerous: as at iii. 37, 38 (A. V. 6, 6); iv. 17, 23, A. V. and LXX. i. v. 4, 5, 6, 10, 11; vii. 68, 69; viii. 4, 7, 9, 10; ix. 3, 5, 23; xi. 13, 16-21, 23-29, 28-33: xii. 3-7, 9, 25, 28, 29, the whole of 38, 40, 41, and half 42; xiii. 11, 14, 16, 20, 24, 25.

The following discrepancies seem to have their origin in the Greek text itself: viii. 16, παλαιὰς τῆς πολέως, instead of πολεῖς, Heb. τῆς πολείς, x. 2, ΤΙΟΣ ΑΡΑΙΑ for ΚΑΙ ΣΑΡΑΙΑ: iv. 4, Σαμοῦα for Σαμωὰ, the final σ of the preceding σώοι having stuck to the beginning of the name; xii. 31, ἀντίστοιχον, instead of "κατ' μιᾷ: " xii. 39, Ἑσθαύρα, instead of Ἐσθαυρά, as in iii. 5. It is also worthy of remark that a number of Hebrew words are left untranslated in the Greek version of the L.X.X., which probably indicates a want of learning in the translator. The following are the chief instances: Chaps. i. 1, and vii. 2, 3βαδα, and τῆς βαίδα, for τῆς βαιδα; ii. 13, τῶν γαλαχαία for τῶν γαλαχαία; iii. 5, ἀλεξάμων for ἀλεξάμων; iv. 7, ἀραμία for ἀραμία; v. 11, τῶν θαυμάσων for τῶν θαυμάσων; vi. 19, βαθύγαρμαι for βαθύγαρμαι; vi. 31, τῶν σαμερίποι for τῶν σαμερίποι; vii. 34, Ἅλαμαδῷ for Ἅλαμαδῷ; vii. 65, ἀλπαστάθα, and x. 1, ἀπαστάθα, for ἀπαστάθα, ἐν τῇ δύναμις; viii. 70, ἃδημωδεῖν for ἃδημωδεῖν; xii. 27, θαυμάζεται for τῆς θαυμάζεται; xiii. 5, θαυμάζειν, instead of θαυμάζειν.

4. The book of Nehemiah has always had an undisputed place in the Canon, being included by the Hebrews under the general head of the Book of Ezra, and as Jerome tells us in the Prolog. Gal., by the Greeks and Latins under the name of the Second Book of Ezra. [ESTRENS, FIRST BOOK OP.]. There is no quotation from it in the N. T., and it has been comparatively neglected by both the Greek and Latin fathers, perhaps on account of its simple character, and the absence of anything of anything of any historical, or mystical kind. In the contents, St. Jerome (ad Psalm. ivi) does indeed suggest that the account of the building of the walls, and the return of the people, the description of the Priests, Levites, Israelites, and proselytes, and the division of the labor among the different families, have a hidden meaning; and also hints that Nehemiah's name, which he interprets con- sciously (espousa, points to a mystical sense. But the book does not easily lend itself to such applications, which are so manifestly forced and strained, that even Augustine says of the whole book of Ezra that it is simply historical rather than pros- phetical (De Civ. Dei, xvii. 36). These, however
who wish to see St. Jerome's hint elaborately car
ried out, may refer to the Ven. Bede's Allogorical
Expositio in Liberun Nehemias, qui et Ezro Se-
causb, as well as to the preface to his exposition
of Ezra; and, in another sense, to J. P. Wilkinson's
Explanatory Notes on Nehemias and Ezekiel's Exposition
(Park Soc.). It may be added that Bede de-
scribes both Ezra and Nehemias as prophets, which
is the head under which Josephus includes them
in his description of the sacred books (C. Ap.
i. 8).

Keil's Einleitung: Winer's Redaction: De
Wette's Einleitung, by Th. Parker; Prideston's
Canonization of the Antient Scripture: Wolf,
Bibl. Hebræicæ; Ewald, Geschicchte, i. 225, iv. 144;
Thurcap's Ancien Jerusalem; Donpastre's Times
of Ezra and Nehemian.

A. C. H.

* The circle of inquiry relating to the author-
ship, structure, and contents of the book of Ne-
hemias, coincides very nearly with that of the
same topics connected with Ezra. We are not to féy
too much stress on the argument against the
unity of the book, from the narrator's interchange
of the first and third persons in different parts.
The conclusion drawn by Dr. Kawlinson remarks, does
not always follow from such premises. Daniel, for
instance, uses the third person through his first
six chapters and at the opening of the seventh,
and then the first to the end of ch. ix. In the first
verse of ch. x. he returns to the third person, but,
in the two remaining chapters employs again the
first (Historical Entwöhn, lect. V.). Inclined
suffers a similar example among Greek writers.
Neh. xii. 10-22 appears to be the only part which
it is necessary, on account of the subject of dis-
course, to ascribe to a later hand. As for the rest,
Ezra and Nehemias may have depended on each
other, or have used common sources.

Among the commentators on Nehemias are Jo-
Cherian, Comm. in Librum Historicæ V. T. (1708);
Strigelius, Scholion in Nebem. (1575); Rabanacli,
Avanti, in Lib. Nehem. ; Berthean, Exeget.
Handb. xvi, &c.: Wordsworth, Holy Bible, with Notes
and Introductions, ii. 325-357. Other important
writers are Hiiückner, Hahn, der Einl. in das A. T.,
i. 302-328: Herbst-Wele, Einl. in das A.
Test., ii. 231-249: Keil, Lehrbuch der Einl. in
das A. Test., pp. 460-498 (3rd Aufl.): Ewald, Einl.
N. Nehemias in Herzog's Real-Encyc. iv. 165-174;
Wunderlich in Diller's Bibl. Wörterb. i. 186-188.
Davidson's Hebrew Text of the O. T., revised
from Critical Sources, pp. 206-209, furnishes some
material for textual emendation (Loud. 1855).
The true orthography of several of the proper names
is uncertain.

H.

NEHEMIAS (Νεήμιας : Nehemias). 1.
Nehemias, the contemporary of Zerubbabel and
Jesha (1 Esdr. v. 8).

2. [Vat. Νεήμιας] Nehemias the Tirathia,
son of Hachahah (1 Esdr. v. 40).

NEHILOTH. The title of Ps. v. in the
A. V. is rendered "to the chief musician upon
Nehiloth" (נֵהִילוֹת). LXX., Aquila,
Symmachus, and Theodotion translate the last
word as πᾶσιν θανάτους, and the Vulgate,
"pro ea quae habetis consequitur," by
which Augustine understands the Church. The
origin of their error was a mistaken etymology, by
which Nehiloth is derived from נֵהִילוֹת, nicóla, to inherit. Other etymologies have been proposed
which are equally unsound. In Chaldee נֵהִילוֹת,
necil, signifies "a swarm of bees," and hence
Aarchi attributes to Neherloth the notion of mul-
titude, the Psalm being sung by the whole people
of Israel. R. Hai, quoted by Kimchi, adopting
the same origin for the word, explains it as an
instrument, the sound of which was like the hum
of bees, a wind instrument, according to Samsm,
des. (ib. Tov. p. 430), which had a rough tone.
Michaels (Synop. ad Lex. Neh. p. 1629) suggests,
with not unreasonable timidity, that the root is to
be found in the Arab. نِكَلَة, nocala, to win-
ner, and hence to separate and select the better
part, indicating that the Psalm, in the title of
which Nehiloth occurs, was "an ode to be chanted
by the purified and better portion of the people.
It is most likely, as Gesenius and others explain,
that it is derived from the root נֵהִילוֹת, nicóla,
to bore, perforate, whence נֵהִילוֹת, nicóla, a flute or
pipe (1 Sam. v. 5; 1 K. i. 49), so that Neherloth
is the general term for perforated wind-instruments
of all kinds, as Negeorth denotes all manner of
stringed instruments. The title of Ps. v. is there-
fore addressed to the conductor of that portion of
the Temple-choir who played upon flutes and the
like, and are directly alluded to in Ps. lxxxvii. 7,
where (נֵהִילוֹת, Nicóla) the players upon in-
struments* who are associated with the singers
are properly "pipers" or "flute-players."

W. A. W.

NEHUM (נֵהָעֹמ : Nemo). 1. [Vat.
Alex. F.A. Naou; Νεήμου.] One of those
who returned from Babylon with Zerubba-bel
(Neh. vii. 7). In Ezr. ii. 2 he is called REHUM,
in 1 Esdr. v. 8, KOLDIM.

NEHUSHTAN (נֵהוֹשְׁתָּן : bussas): Nukba:
Alex. Naoua; Νεήμοστα. The daughter of Kha-
than of Jerusalem, wife of Jehoash, and mother of
Jehoahaz, kings of Judah (2 K. xxvii. 8).

NEHUSHTAN (נֵהוֹשְׁתָּן : bussas): Ne-
boz, but [Vat. Mai's ed. Nacalbe]: Alex.
Na-
bo; Νεήμοστα. One of the first acts of Heze-
kiah, upon coming to the throne of Judah, was
to destroy all traces of the idolatrous rites which
had gained such a fast hold upon the people during
the reign of his father Ahaz. Among other objects
of superstitious reverence and worship was the
serpent serpents, made by Moses in the wilderness
(Num. xxi. 9), which was preserved throughout
the wanderings of the Israelites, probably as a
memorial of their deliverance, and according to a
late tradition was placed in the Temple. The
lapse of nearly a thousand years had invested this
ancient relic with a mysterious sanctity which
easily degenerated into idolatrous reverence, and at
the time of Hezekiah's accession it had evidently
been long an object of worship, "for unto those
days the children of Israel did burn incense to it," 
or as the Hebrew more fully implies, "had been in
the habit of burning incense to it." The expres-
sion points to a settled practice. The name by
which the brazen serpent was known at this time,
and by which it had been worshipped, was Nehush-
tan (2 K. xvii. 4). It is evident that our trans-
slators by their rendering, "and he called it Ne-
hushtan," understood with many commentators
that the subject of the sentence is Hezekiah, and that when he destroyed the brazen serpent he gave it the name Nehustan, "a brazen thing," in token of his utter contempt, and to impress upon the people the idea of its worthlessness. This rendering has the support of the LXX. and Vulgate, Junius and Tremellius, Munster, Clericus, and others; but it is better to understand the Hebrew as referring to the name by which the serpent was generally known, the subject of the verb being — "and called it Nehustan." Such a construction is common, and instances of it may be found in Gen. xxxvi. 26, xxxviii. 29, 30, where our translators correctly render "his name was called," and in Gen. xlvii. 1, 2. This was the view taken in the Targ. Zad, and in the Peshito-Syrac., and they called it Nehusthan, which Diodorus approves (Hist. Nesp. Lib. cap. iv.,) It has the support of Luther, Pfeiler (DB. Ver. cent. 3, loc. 5), J. D. Michaelis (Vulg. f. Ungel), and Bunsen (Bibelwerk), as well as of Walf (Gesch. iii. 622), Keil, Theisius, and most modern commentators. [SERPENT] W. A. W.

NEIEL (נֵייל) [perh. = נְיֵילָא, treasure of God, Ges.]: [Iowa: Alex. Apera: Nehil], a place which formed one of the landmarks of the boundary of the tribe of Asher (Josh. xix. 27, only). It occurs between NEHEMIAH-EL and CARUL. If the former of these be identified with Jeoph, and the latter with Kohal, 8 or 9 miles E.S. of Abil, then Nehil may possibly be represented by M'cur, a village commonly placed on a lofty mountain brow, just halfway between the two (Rob. iii. 87, 102; also Van de Velde's Map, 1858). The change of N into M, and I into R, is frequent, and Mir retained the use of Neiel. G.

NEKER (נְקֶרֶר) with the def. article [the overseer]: shel Nekor: [Vat. Nekeros: Alex. Naksebas: Nehil], one of the towns on the boundary of Naphtali (Josh. xix. 33, only). It lay between ADAMI and JARNEL. A great number of commentators, from Jonathan to the Targumist and Jerome (Caputy as above) to Keil (Josue, ad loc.), have taken this place as being connected with the preceding - Adamihankor (Junaus and Tremellius, "Adamani fossa"); and indeed this is the force of the accentuation of the present Hebrew text. But on the other hand the LXX. give the two as distinct, and in the Talmud the post-biblical names of each are given, that of han-Nekor being Taiz'idilathah (Genraica Hieroa. Cod. Mercilla, in Behrend, Pal. pp. 545, 546, 817; also Schwarz, p. 181). Of this more modern name Schwarz suggests that a trace is to be found in "Iazzelil," 3 English miles N. from al-Chatti. G.

2. [Nekobas.] The sons of Nekoba were among those who went up after the Captivity from Tel-melah, Tel-harsa and other places, but were unable to prove their descent from Israel (Ezr. ii. 69; Neh. vii. 62).

NEMUEL (נֵמְעֵל) [dry of God, Ges.]:

NAAMONA: Naamoh, 1. A Rouseneit, son of Eliah, and eldest brother of Dathan and Abiram (Num. xxxii. 9).

2. The eldest son of Simon (Num. xxvi. 12; 1 Chr. iv. 24), from whom were descended the family of the Nemuelites. In Gen. xlii. 10 he is called Jemel.

NEMUELITES, THE (נְמְעֵלִים) [see above]: דַּמִּים דָּוָה: Alex. Naamohalei, and so [Vat.] Mai: Nemuelites. The descendants of Nemel the first-born of Simon (Num. xxvi. 12).

NEPHEG (נְפֵה) [sprout]: Naeph: Nepheh. 1. One of the sons of Ishar the son of Kohath, and therefore brother of Korah (Ex. vi. 21).

2. [Naeph:]: in 1 Chr. iii. 7, [Vat. Naaphah] Alex. Nepeh; 1 Chr. xiv. 6, Naaph. [Alex. Naaphay, F.A. Naaphay: Nepheh, Nepheh]. One of David's sons born to him in Jerusalem after he was come from Hebron (2 Sam. v. 15; 1 Chr. iii. 7, xiv. 6).

* NEHEM. This term wherever employed in the A. V., is used in the sense of youth or descendant generally. The corresponding Hebrew and Greek words are ἱδρία, Job xlviii. 19, Is. xliv. 22; πυρσανός, Judg. xii. 14; and ἔγωγα, 1 Tim. v. 4. For the old English usage of this word, see Richardson's Eng. Dict. s. v., and Trench's Authorized Ver. of the N. T. p. 446 (ed. 1850). [NEHEM'S SON]: D. S. T.

NEPHIHS (Naephis: Alex. Neephia: Nephih). The name by which the NAPHTALI of Nehemiah was usually (παθα τοίς παλαιοῖς) called (2 Mac. i. 36). The A. V. [after the Bishops' Bible] has here followed the Vulgate.

NEPHIS (Naephis: [Vat. Neephis: Alex. Neheris: Abi. Neefis: Liphis]). In the corrupt list of 1 Esdr. vii. 21, "the sons of Nephih" apparently correspond with "the children of Nebu" in Ezr. ii. 25, or else the name is a corruption of MAGISUS.

NEPHISIHSIM (נְפֵיסִיסִים) [Greek]: Keri: Nephosin. [Vat. Nephosim: Rom. Neeposinai: Neiphis]. An inaccurate variation (found in 1 Chr. vi. 19 only [where the Bishops' Bible reads Nephih]) of the name elsewhere correctly given in the A. V. NAPHTALI, the form always preserved in the original.

NEPHISHESIM (נְפֵיסִיסֵהוים) [cautious, Guard of, Ges.]: Keri: Nephoseim. [Vat. Nephosei: Rom. Neeposimai: F.A. Neeposeamai: Neiphoseim]. The children of Nephihshinim were among the Nethinim who returned with Zerubbabel (Neh. vii. 52). The name elsewhere appears as NEPHISHIM and NAPHTALI. Gesenius decides that it is a corruption of the former. [Thes. p. 899].

NEPHTHALI (Naephthi): [Rom. Neephthi: Vat. Alex. F.A. Neephythi: Nephtali). The Vulgate form of the name NAPHTALI (Tob. i. 1, 2, 4, 5).

NEPHTHALIM (Naephthali: Vat. Neephythi): [Sin. Alex. Neephythali, and so N.T.: Nephtali, Nephtalthi]. Another form of the same name as the preceding (Tob. vii. 3; Matt. iv. 13, 15; Rev. vii. 6).

NEPTHAH, THE WATER OF (אֶפְנַהַד):
NEPHUSIM

waters of opening; [Vat. in Josh. xv. 9.] Mcoph: qurn, and aqua, Neph-
thoon). The spring or source (תַּרְפָּה, A. V. "foun-
tain" and "well") of the water or (inaccurately) waters of Neophtho was one of the landmarks in the boundary-line which separated Judah from Benjamin (Josh. xiv. x. xviii. 15.). It was situated between the "head," or the "end," of the mountain which faced the valley of Hinnom on the west, and the cities of Ephron, the next point beyond which was Kirjath-jearim. It lay therefore N. W. of Jerusalem, in which direction it seems to have been satisfactorily identified in Ain Lifa, a spring situated a little distance above the village of the same name, in a short valley which runs into the east side of the great Wady Beit Hamina, about 2¾ miles from Jerusalem and 6 from Kiriêl el-Enab (K-jearim). The spring — of which a view is given by Dr. Barclay (Clgy, etc., 544) — is very abundant, and the water escapes in a considerable stream into the valley below.

Nephto was formerly identified with various springs — the spring of St. Philip (Ain Hanayek) in the Wady el-Werd; the Ain Yolo in the same valley, but nearer Jerusalem; the Ain Kuvim, or Fountain of the Virgin of mediæval times (Doub-
dan, Voyages, 187; see also the citations of Tobler, Topographic, 351; and Sands, lib. iii. p. 184); and even the so-called well of Job at the western end of the Wady Algi' (Mítulo, ii. 155); but these, especially the latter, are unsuitable in their situation as respect Jerusalem and Kirjath-jearim, and have the additional drawback that the features of the country there are not such as to permit a boundary-line to be traced along it, while the line through Ain Lifa would, in Barclay's words, "pursue a course indicated by nature."

The name of Lifa is not less suitable to this identification than its situation, since T and L frequently take the place of each other, and the rest of the word is almost entirely meehanged.

The earliest notice of it appears to be by Stewart (Exc. and Khan, 349), who speaks of it as at that time (Feb. 1854) "recognized." G.

NEPHUSIM (נֶפֹשע; Keri, נֶפֹשׁע; Nephousim; [Vat. Nephousim]) Alex. Nephousim: Nephousim. The same as NEPHUSIM, of which name according to Gesenius it is the proper form (Ezr. ii. 50).

NER (נֵר [light, lamp]; Nêr [Vat. in 1 Sam. xiv. 50. Nêrî] Ner), son of Jehiel, according to 1 Chr. viii. 33, father of Kish and Abner, and grandfather of King Saul. Abner was, therefore, uncle to Saul, as expressly stated 1 Sam. xiv. 50. But some confusion has arisen from the statement in 1 Chr. ix. 36, that Kish and Ner were both sons of Jehiel, whence it has been concluded that they were brothers, and consequently that Abner and Saul were first cousins. But, unless there was an elder Kish, uncle of Saul's father, which is not at all probable, it is obvious to explain the insertion of Kish's name (as that of the numerous names by the side of it) in 1 Chr. ix. 36, by the common practice in the Chronicles of calling all the heads of houses of fathers, sons of the phylarch or demarch from whom they sprung, or under whom they were reckoned in the genealo-
gies, whether they were sons or grandsons, or later descendants, or even descendants of collatera
branches. [BECHER:]

The name Ner, combined with that of his son Abner, may be compared with Nahab in ver. 56, and Abnahab ver. 39; with Jesse, 1 Chr. iii. 15, and Abishai, ver. 16; and with Judah, Luke iii. 26, and Abiud, Matt. i. 13. The subjuncted table shows Ner's family relations.

Benjamin

Becher, or Becherath (1 Sam. ix. 1; 1 Chr. vii. 6, 8)

Abash, or Aphiab (ib.)

Zeror, or Zor (1 Chr. viii. 39)

Abiel, or Jehiel (1 Chr. ix. 33)

Abdon Zor Kish Saul Ner Nahab Gedor Abio

Zecharias Milikoth

Kish

Abner

Saul

The family seat of Ner was Gibea, where his father Jehiel was probably the first to settle (1 Chr. ix. 33). From the pointed mention of his mother, Maachah, as the wife of Jehiel, she was perhaps the heiress of the estate in Gibea. This inference receives some confirmation from the fact that "Maachah, Caleb's concubine," is said, in 1 Chr. ii. 50, to have borne "Sheva the father of Machbenah and the father of Giben," where, though the text is in ruins, yet a connection of some sort between Maachah (whomever she was) and Gibean, often called Gibeath of Saul, and the same as Gibon, 1 Chr. xiv. 16, is apparent. It is a cu-
rious circumstance that, while the name (Jehiel) of the "father of Gibea" is not given in the text of 1 Chr. viii. 29, the same is the case with "the father of Gibon" in 1 Chr. ii. 49, naturally sug-
gestting, therefore, that in the latter passage the same name Jehiel ought to be supplied which is supplied for the former by the duplicate passage 1 Chr. ix. 35. If this inference is correct it would place the time of the settlement of Jehiel at Gib-
ena — where one would naturally expect to find it — near the time of the settlement of the tribes in their respective inheritances under Josiah. Maac-
chah, his wife, would seem to be a daughter or de-
cendant of Caleb by Ephah his concubine. That she was not "Caleb's concubine" seems pretty cer-
tain, both because Ephah is so described in ii. 46 and because the recurrence of the name Ephah in ver. 47, separated from the words דִּבְרָה יִבְרֵל only by the name Shaph, creates a strong pre-
sumption that Ephah, and not Maacchah, is the name to which this description belongs in ver. 47, as in ver. 46. Moreover, Mauchah cannot be the nom.
case to the masculine verb דִּבְרָה. Supposing,

a This must arise from a confusion between Yalo 'Ajalon, near which the "well of Job" is situated, and the Ain Yolo.

b Stewart, while accusing Dr. Robinson of inaccu-

rcency (p. 840), has himself fallen into a curious confu-
sion between Nerophoth and Netopheth. Dr. Robinson is in this instance perfectly right.

c There are doubtless some links missing in this genealogy, as at all events the head of the family of Matti.

d Shaph has nearly the same letters as Ephah.
NEREUS [2 ed.] (Nerqēr: Nereus). A Christian at Rome, cited by St. Paul, Rom. xvi. 15. Origen conjectures that he belonged to the household of Philoegon and Julia. Eusebius suggests that he may be identified with a Nereus, who is said to have been baptized at Rome by St. Peter. A legendary account of him is given in Bohand, Acta Sanctorum, 12th May; from which, in the latter, he gathered the fact that he was beheaded at Terracina, probably in the reign of Nero. His ashes are said to be deposited in the ancient church of SS. Nereo ed Achenillo, at Rome.

There is a reference to his legendary history in Bp. Jeremy Taylor’s Sermon, The Marriage-ring, Part i.

NERGAL (Nergal). Nergal, one of the chief Assyrian and Babylonian deities, seems to have corresponded closely to the classical Mars. He was of Babylonian origin, and his name signifies, in the early Chaldean dialect of that country, “the great man” or “the great hero.” His monumental titles are — “the storm-ruler,” “the king of battle,” “the champion of the gods,” “the male principle” or “the strong begetter,” “the tutelar god of Babylonia,” and “the god of the chase.” Of this last he is the god prominently; another deity, Nin, disputing with him the presidency over war and battles. It is conjectured that he may represent the divinity Nabu as the mighty preserver before the Lord — from whom the kings both of Babylon and Nineveh were likely to claim descent. The city peculiarly dedicated to his worship is found in the inscriptions to be Cutha or Tiggala, which is in Arabian tradition the special city of Nimrud. The only express mention of Nergal contained in sacred Scripture is in 2 K. xvii. 30, where “the men of Cutha,” placed in the city of Samaria by a king of Assyria (Esar-haddon?), are said to have made Nergal their god when transplanted to their new country — a fact in close accordance with the frequent notices in the inscriptions, which mark him as the tutelar god of that city. Nergal’s name occurs as the initial element in Nergal-shar-azar (Jer. xxvii. 23; and is also found, under a contracted form, in the name of a comparatively long-lived — the Amen-Elign of Josephus (Ant. xxii. 2, § 1).

Nergal appears to have been worshipped under the symbol of the Man-Lion. The Semitic name for the god of Cutha was Aris, a word which signifies Lion; both in Hebrew and Syriac, Nin, the first element of the god’s name, is capable of the same signification. Perhaps the habits of the lion as a hunter of beasts were known, and he was thus regarded as the most fitting symbol of the god who presided over the chase.

It is in connection with their hunting excursions that the Assyrian kings make most frequent mention of this deity. As early as B.C. 1150, Tiglath-pileser I. speaks of him as furnishing the arrows with which he slaughtered the wild animals Assur-izen-pat (Sardanapalus), the son and successor of Assur-haddon, never fails to invoke his aid, and ascribes all his hunting achievements to his influence. Pul sacrificed to him in Cutha, and Sennacherib built him a temple in the city of Tarbis near Nineveh; but in general he was not name-worshiped either by the Babylonians or the later kings (see the Assyry of Sir H. Rawlinson in Rawlinson’s Herodotus, i. 631—634).

NERGAL-SHAREZER (Nergal-sharezer) [see above]: (Rom. Vat. Μαργασαρζηρ: Fr. Μαργαρσαρζηρ: Alex.) Nergal-Sarseph: Nergal-sarseph, [Nergal of Sarseph] occurs only in Jeremiah's third and third. There appear to have been two persons of the name among the princes of the Babylonian, who accompanied Nebuchadnezzar on his last expedition against Jerusalem. One of these is not marked by any additional title; the other has the honorable distinction of Rab-mag (Rab-Mag), and it is to him alone that any particular interest attaches. In sacred Scripture he appears among the persons, who, by command of Nebuchadnezzar, released Jeremiah from prison; prophetic history gives us reason to believe that he was a personage of great importance, who long afterwards mounted the Babylonian throne. The identification depends in part on the exact resemblance of name, which is found on Babylonian bricks in the form of Nergalsar-azar; but mainly it rests upon the title of Rab-mag, or Rab-Mag, which this king bears in his inscriptions, and on the improbability of there having been towards the close of the Babylonian period — when the monumental monarchical race had dwindled — persons of exactly the same name holding this office. [RAB-MAG.]

Assuming on these grounds the identity of the Scriptural “Nergal-sharezer, Rab-Mag,” with the monumental “Nergal-sharezer, Rab-mag,” we may learn something of the history of the prince in question from profane authors. There cannot be a doubt that he was the monarch called Nergisar or Nergissar by Berosus (Joseph. c. Ap. i. 30), who murdered Evil-Merodach, the son of Nebuchadnezzar, and succeeded him upon the throne. This prince was married to a daughter of Nebuchadnezzar, and was thus the brother-in-law of his predecessor, whom he put to death. His reign lasted between three and four years. He appears to have died a natural death, and certainly left his crown to a young son, Labaro, who was murdered after a reign of nine months. In the canon of Ptolemy he appears, under the designation of Nergissassar, as reigning four years between Hezirabam and Evil-Merodach and Nabonidas, his son’s reign not obtaining any mention, because it fell short of a year.

A palace, built by Nergissar, has been discovered at Babylon. It is the only building of any extent on the right bank of the Euphrates. (See Plan of Babylon.) The bricks bear the name of Nergal-sharezer, the title of Rab-Mag, and also a statement — which is somewhat surprising — that Nergal-sharezer was the son of a certain “belzakkarishun, king of Babylon.” The only explanation
NERI

which has been offered of this statement is a

conjecture (Rawlinson's Herodidus, vol. i. p. 518),

that Belzakkar-iskun may possibly have been the

chief Chaldean," who (according to Herodotus)

kept the royal authority for Nebuchadnezzar during

the interval between his father's death and his own

arrival at Babylon. [Nebuchadnnezzar.] Neri-

glius could scarcely have given his father the title of

king without some ground; and this is at any

rate a possible ground, and one compatible with the

non-appearance of the name in any extant list of the

later Babylonian monarchicals. Nerglishar's office of

Kab-Mag will be further considered under that

word. It is evident that he was a personage of

importance before he mounted the throne. Some

(as Larcher) have sought to identify him with Bar-

ruach the Mele. But this view is quite untenable.

There is abundant reason to believe from his name

and his office that he was a native Babylonian — a

grandee of high rank under Nebuchadnezzar, who

regarded him as a fitting match for one of his

daughters. He did not, like Durus Medus, gain

Babylon by conquest, but acquired his dominion by

an internal revolution. His reign preceded that of

the Median Durus by 17 years. It lasted from

n. c. 550 to n. c. 536, whereas Durus the Mede

came not to ascend the throne till c. 538, on the

conquest of Babylon by Cyrus. G. B.

NERI (Nephi [Tisch. Nephi with Sin. A B etc.]

representing the Heb. נֶפֶל, which would be a short

form for נֶפֶל נֶפֶל, Neriath, *Jehovah is my lamp:* Neri,

a son of Melchi, and father of Sathalith, in the

genealogy of Christ, Luke iii. 27. Nothing is

known of him, but his name is very important as

indicating the principle on which the genealogies of

our Lord are framed. He was of the line of

Nathan; but his son Sathalith became Solomon's

heir on the failure of Solomon's line in king Jecon-

iah, and was therefore reckoned in the royal line —

agy the among the sons of Jeconiah: to whose status and

prerogatives he succeeded, 1 Chr. iii. 17; Matt.

c. 12. The supposition that the son and heir of

David and Solomon would be called the son of Neri,

an obscure individual, because he had married

Neri's daughter, so many pretend, is too absurd to

need refutation. The information given by us to

St. Luke — that Neri, of the line of Nathan, was Sa-

thalith's father — does, in point of fact, clear up

and settle the whole question of the genealogies. [Gen-

alogy of Jesus Christ.]

A. C. H.

NERIATH (נֶפֶלָת [and נֶפֶלָת]. Loop of

Jelovakl): Nepias, but Nepias [Alex. Nipias] in

Jer. ii. 59; [Vat. also -per in xliii. 4] Nerius,

but Nerii in xxiii. 12). The son of Masselah, and

father of Barach (Jer. xxxii. 12, xxxvi. 3, [also xlii.

16, xxxvi. 8, 14, 32, xliii. 6, xlv. 1]), and Seriaha

(Jer. ii. 59).

NER'IAS (Nepias: Nervias). The father of

Barach and Seriaha (Bar. i. 1).

* NEST. The Greek word κατασχεύων, rendered nest in Matt. viii. 20 and Luke ix. 58, means strictly the pitching of a tent and then a tent

or dwelling, an abode. Coupled as it is in these pas

sages with the holes of foxes, and contrasted with

our Saviour's want of a home or lodging-place, it

seems plain not to have the specific meaning of

nest but places of resort, lodging-places, stopping-

places.

So the corresponding verb in Matt. xiii. 32, Mark iv. 32, and Luke xii. 19 is rendered settle: in Acts

ii. 26, rest. "Nest" is undoubtedly meant by

"house" in Ps. civ. 17: "As for the stork the fir-trees

are her house." This bird in the East selects ruins wherever they are to be found, more especially or for the most part where there is water or neglected marsh in their neighborhood. But when

neither houses nor ruins occur, it selects any tree

tall and strong enough to provide a firm platform

for its huge nest, and for this purpose none are more convenient than the fir-tree" (Tristram, Nat. Hist. of the Bible, p. 248). The eagle's stirring up

of her nest, i. e. the young in the nest (Lent. xxxii.

12), refers to the efforts of the eagle to encourage

her young ones to fly and coax them to leave their

nest (Tristram, p. 176).

R. D. C. R.

NET. The various terms applied by the He-

brews to nests had reference either to the construc-

tion of the article, or to its use and objects. To

the first of these we may assign the following terms:

-Micawir, and its cognates, micawir, and mic-

awirth, all of which are derived from a root signi-

fying "to weave;" and, again, sèbèdath and sòbēr, derived from another root of similar signifi-

cation. To the second head we may assign chirèn, from a root signifying "to enclose;" mitzòdil, with its cognates, mitzədahl i and mitzədahl b, from a root signifying "to lie in wait;" and reksheth, from a root signifying "to catch." Great uncertainty prevails in the equivalent terms in the A. V.: mitzōdil is rendered "snare" in Ech. vii. 26, and "net" in

Job xix. 6 and Prov. xii. 13, in the latter of which

passages the true sense is "prey;" sèbèdath is rendered "snare" in Job xviii. 8; mitzədahl

Egyptian landing-net. (Wilkinson.)

"snare" in Ex. xii. 13, xvii. 20, and "net" in Ps.

lxi. 11; micawirth, "drag" or "net-net" in Hab. i. 15, 16. What distinction there may have been between the above terms is very difficult

to determine. The etymology tells us nothing, and the equiv-

alents in the LXX. vary. In the New Testa-

ment we meet with three terms, — σαμογήν (from σάμιντω, "to load"), whence our word seine, a large

hawling or drawing-net; it is the term used in the par-

able of the draw-net (Matt. xiii. 47): ἄνθιμπαργό

τοῦ (from ἄνθιμβάλλω, "to cast around"), a cast-

ning-net (Matt. iv. 18; Mark i. 16): and δίκτυον

(from δίκω, "to throw"), of the same description as

the one just mentioned (Matt. iv. 20; John xxi.

h ἄθιμπαργόν. i σαμογήν. k δίκτυον.
6. The net was used for the purposes of fishing and hunting; the mode in which it was used has been already described in the articles on those subjects. [Fishing; Hunting.] The Egyptians constructed their nets of flax-string: the netting-needle was made of wood, and in shape closely resembled our own (Wilkinson, ii. 90). The nets varied in form according to their use; the landing-net has been already represented; we here give a sketch of the draw-net from the same source.

As the nets of Egypt were well known to the early Jews (Is. xix. 8), it is not improbable that the material and form was the same in each country. The nets used for birds in Egypt were of two kinds, clap-nets and traps. The latter consisted of network strained over a frame of wood, which was so constructed that the sides would collapse by pulling a string and catch any birds that might have alighted on them while open. The former was made on the same principle, consisting of a double frame with the network strained over it, which might be caused to collapse by pulling a string.

The metaphorical references to the net are very numerous: it was selected as an appropriate image of the subtle devices of the enemies of God on the one hand (e. g. Ps. ix. 15, xv. 15, xxxi. 4), and of the unavertable vengeance of God on the other hand (Lam. i. 11; Ez. xii. 13; Hos. vii. 12).

We must still notice the use of the term ἄλατος, in an architectural sense, applied to the open ornamental work about the capital of a pillar (1 K. vii. 47), and described in similar terms by Josephus, Πνευματικὸν ἄλατον καὶ αὐτοῦ παρὰ τοῦ καλλίστου (Ant. iii. 3, § 4). W. L. B.

---

NETHANIEL [נֶחַנְיָאֵל (נֶחַנְיָאֵל) ( GIVEN OF GOD). Nabathaiyá: Nathanael]. 1. The son of Zara, and prince of the tribe of Issachar at the time of the Exodus. With his 54,400 men his beast in the camp was on the east next to the camp of Judah, which they followed in the march. The same order was observed in the offerings at the dedication of the Tabernacle, when Nethaneel followed Nahshon the prince of the tribe of Judah (Num. i. 8, ii. 5, vii. 18, 23, x. 15).

2. The fourth son of Jesse and brother of David (1 Chr. ii. 14).

3. A priest in the reign of David who blew the trumpet before the ark, when it was brought from the house of Obad-edom (1 Chr. xxv. 24).

4. A Levite, father of Shemaiah the scribe in the reign of David (1 Chr. xxiv. 6).

5. [Vat. נַאָעַה יִמָּתָא.] The fifth son of Obad-edom the doorkeeper of the ark (1 Chr. xxvi. 4).

6. One of the princes of Judah, whom Jehoshaphat in the third year of his reign sent to teach in the cities of his kingdom (2 Chr. xvii. 7).

7. A chief of the Levites in the reign of Josiah, who took part in the solemn passover kept by that king (2 Chr. xxxv. 9).

8. A priest of the family of Pashur, in the time of Ezra, who had married a foreign wife (Ezr. x. 22). He is called NATHANIEL in 1 Esdr. ix. 22.

9. [Vat. Alex. F.A.] omit. The representative of the priestly family of Jedidah in the time of Josiah the son of Jehosheba (Neh. xii. 21).

10. [Vat. Alex. F.A.] omit. A Levite, of the sons of Asaph, who with his brethren played upon the musical instruments of David, in the solemn procession which accompanied the dedication of the wall of Jerusalem under Ezra and Nehemiah (Neh. xii. 36). W. A. W.

NETHANIAH [נֶחַנְיָאֵה (נֶחַנְיָאֵה) ( GIVEN OF Jehova).] and in the lengthened form נֶחַנְיָאֵה, Jer. xl. 8, xii. 9: Nabathias, exc. 2 K. xxv. 23, where the Alex. MS. has Nathaniyas: Nathaniel). 1. The son of Elishama, and father of Ishmael who murdered Gedaliah (2 K. xxv. 23, 25; Jer. xl. 8, 14, xii. 1, 2, 6, 7, 9, 10, 11, 12, 15, 16, 18). He was of the royal family of Judah.

2. [Nabathias, Nabathias: Vat. in ver. 12 Nahathias.] One of the four sons of Asaph the minstrel, and chief of the 5th of the 24 courses into which the Temple choir was divided (1 Chr. xxv. 2, 12).

3. [Nahathias, Nahathias: Vat. Nathania.] A Levite in the reign of Jehoshaphat, who with eight others of his tribe and two priests accompanied the princes of Judah who were sent by the king through the country to teach the law of Jehovah (2 Chr. xvii. 8).

4. The father of Jehudi (Jer. xxxvi. 14).

NETHINIM [A.V. "Nethinims"] [נְתִיָאֵמִים (נְתִיָאֵמִים) [ see below]: [F.A.] Nathano, Neh. xi. 21. [Rom. Alex. F.A.] omit. Nathania [Vat. Nathania, Alex. Nathano]. Ezr. ii. 41; [there are many variations in the MSS. in other places]; of ἔθνος [Comp. Nathano], (1 Chr. ix. 2: Nathaniel). As applied specifically to a distinct body of men connected with the services of the Temple, this

---

This is one of the admirable emendations of the late Mr. Bernard (See Mason and Bernard's Hebrew Grammar.)
some first meets us in the later books of the O. T.; in 1 Chron., Ezra, and Nehemiah. The word, and the ideas embodied in it may, however, be traced to a much earlier period. As derived from the verb יִתְמ (ythm = give, set apart, dedicate), it was applied to those who were specially appointed to the liturgical offices of the Tabernacle. Like many other official titles it appears to have had at first a much higher value than its later connection to the sanctuary. We must not forget that the Levites were given to Aaron and his sons, i. e., to the priests as an order, and were accordingly the first assigned of the "made") to the priests. This disposition to devote the more laborious offices of their ritual upon slaves of another race showed itself again in the treatment of the Gibeonites. They, too, were "given" (A. V. "made") to be "hewers of wood and drawers of water" for the house of God (Josh. iv. 21), and the addition of so large a number (the population of five cities) must have relieved the Levites from much that had before been hard work. We know little or nothing as to their treatment. It was a matter of necessity that they should be circumcised (Ex. xii. 48), and conform to the religion of their conquerors, and this might at first seem hard enough. On the other hand it must be remembered that they presented themselves as recognizing the supremacy of Jehovah (Josh. ix. 9), and that for many generations the remembrance of the solemn covenant entered into with them made men look with horror on the shedding of Gibeonite blood (2 Sam. xxi. 9), and protected them from much outrage. No addition to the number thus employed appears to have been made during the period of the Judges, and they continued to be known by their old name as the Gibeonites. The want of a further supply was however felt when the reorganization of worship commenced under David. Either the massacre at Nob had involved the Gibeonites as well as the priests (1 Sam. xvi. 13), or they had fallen victims to some other outbreak of Saul's fury, and, though there were survivors (2 Sam. xxi. 2), the number was likely to be quite inadequate for the greater statefulness of the new worship at Jerusalem. It is to this period accordingly that the origin of the class bearing this name may be traced. The Nethinim were those "whom David and the princes appointed (Heb. gave) for the service of the Levites" (Ezr. vii. 20). Analogies would lead us to conclude that, in this, as in the former instances, these were either prisoners taken in war, or else some of the remnant of the Canaanites; but the new name in which the old seems to have been merged leaves it uncertain. The foreign character of the names in Ezr. ii. 43-54 is unmistakable, but was equally natural on either hypothesis.

From this time the Nethinim probably lived within the precincts of the Temple, doing its rougher work, and so enabling the Levites to take a higher position as the religious representatives and instructors of the people. [LEVITES.] They answered in some degree to the male ἵποβουαὶ, who were attached to Greek and Asastic temples (Josephus, Ant. xi. 5, § 1, uses this word of them in his paraphrase of the decree of Darius), to the grave-diggers, gate-keepers, bell-ringers of the Christian Church. Ewald (Allerbich, p. 299) refers to the custom of the more wealthy Arabs dedicating slaves to the special service of the Kaaba at Mecca, or the Sepulchre of the Prophet at Medina. The example set by David was followed by his successor. In close union with the Nethinim in the statistics of the return from the Captivity, attached like them to the Priests and Levites, we find a body of men described as "Solomon's servants" (Ezr. ii. 55; Neh. vii. 60, xi. 3), and these we may identify, without much risk of error, with some of the "people that were left" of the earlier inhabitants whom he made "to pay tribute of bond-service" (1 K. ix. 20; 2 Chr. viii. 7). The order in which they are placed might even seem to indicate that they stood to the Nethinim in the same relation that the Nethinim did to the Levites. Assuming, as is probable, that the later Rabbinic teaching represents the traditions of an earlier period, the Nethinim appear never to have lost the stigma of their Canaanite origin. They had no Ἰάσσωνα (Genar. Babil. Jehon. ii. 4; Raddush, iv. 1, in Carpzov, App. Crit. de Neth.), and illicit intercourse with a woman of Israel was punished with scourging (Carpzov, l. c.); but their quasi-sacred position raised them in some measure above the level of their race, and in the Jewish order of precedence, while they stood below the Manzermim (bastards, or children of mixed marriages), they were one step above the Proselytes fresh come from heathenism and uncircumcised slaves (Genar. Hicron. Haggid, p. 482; in Lightfoot, Hor. Heb. od Mott. xiii. 14). They were thus all along a servile and subject caste. The only period at which they rise into anything like prominence is that of the return from the Captivity. In that return the priests were conspicuous and numerous, but the Levites, for some reason unknown to us, hung back. [LEVITES.] Under Zerubbabel there were but 341 to 4,280 priests (Ezr. ii. 36-42). Under Ezra none came up at all till after a special and solemn call (Ezr. vii. 15). The services of the Nethinim were consequently of more importance (Ezr. viii. 17), but in their case also, the small number of those that joined (392 under Zerubbabel, 220 under Ezra, including "Solomon's servants") indicates that many preferred remaining in the land of their exile to returning to their old service. Those that did come were consequently thought worthy of special mention. The names of their families were registered with as much care as those of the priests however, without adequate grounds, and at variance with facts. Comp. Pfeiffer De Nethinismus, in Uglolini's Thesaurus, vol. xii. The name of one of the Gibeonites and Nethinim, excluding the idea of any addition, is, however, main- tained by Pfeiffer.
NETOPHAH

(Exr. ii. 43-58). They were admitted, in strict
conformity to the letter of the law of Deut. xxix.
11, to join in the great covenant with which the
restored people inaugurated its new life (Neh. vi.
28). They, like the Priests and Levites, were
exempted from taxation by the Persian Satraps
(Exz. vii. 24). They were under the control of a
chief of their own body (Exr. ii. 45; Neh. vii. 46).
They took an active part in the work of rebuilding
the city (Neh. iii. 26), and the tower of Ophel, con-
venient from its proximity to the Temple, was
assigned to some of them as a residence (Neh. xi.
21), while others dwelt with the Levites in their
cities (Exz. ii. 70). They took their place in the
chronicles of the time as next in order to the
Levites (1 Chr. iv. 2).
Neither in the Apocrypha, nor in the N. T., nor
yet in the works of the Jewish historian, do we
find any additional information about the Nethi-
nim. The latter, however, mentions incidentally a
feast, that of the Xylophobia, or wood carrying,
of which we may perhaps recognize the beginning
in Neh. x. 34, and in which it was the custom for
all the people to bring large supplies of firewood
for the sacrifice of the year. This may have been
designed to relieve them. They were at any rate
likely to bear a conspicuous part in it (Joseph. B.
J. ii. 17, § 6).
Two hypotheses connected with the Nethinim are
mentioned by Fiefinder in the exhaustive monograph
already cited: (1), that of Forster (Dict. HEB.,
Basil, 1864), that the first so called were sons of
David, i. e., younger branches of the royal house
to whom was given the defense of the city and
some of the public functions (2), that of Schren. De
Jure Nat. et Gent., connected apparently with (1),
that Joseph the husband of the Virgin was one of this
class.

E. H. P.

NETOPHAH (ניָתון פַּח) [distribution, Ges.):
Netafá, [Aravá]: Alex. Netofá: [Netofá]: in 1 Esdr. v. 18, Netofá, Vat. Netifá, Alex.
Netofá]: Nétofá, [in 1 Esdr. Netofá]: a town the name of which occurs only in the cata-
logue of those who returned with Zerubbabel from
the Captivity (Exr. ii. 22; Neh. vii. 26; 1 Esdr.
v. 18). But, though not directly mentioned till
in the later period, Netophá was really a much
older place. Two of David's guards, Maharah
and Hileah or Heliah, leaders also of two of the
monthly courses (1 Chr. xxvii. 13, 15), were
Netophátes, and it was the native place of at least
one of the captains who remained under arms near
Jerusalem after its destruction by Nebuchadre-
nzar. The "villages of the Netopháthites" were
the residence of the Levites (1 Chr. ix. 16), a
tact which shows that they did not evacuate them-
selves to the places named in the catalogues of
Jos. xxvi. and 1 Chr. vi. From another notice we
learn that the particular Levites who inhabited
these villages were singers (Neh. xii. 28).

That Netophá belonged to Judah appears from
the fact that the two heroes above mentioned be-
longed, the one to the Zorites—that is, the great
family of Zerah, one of the ten houses of the tribe,
and the other to Oniah, the son-in-law of
Caius To judge from Neh. vii. 26 it was in the
neighborhood of, or closely connected with, Beth-
lehem, which is also implied by 1 Chr. ii. 54,
though the precise force of the latter statement
cannot now be made out. The number of Neto-
pháthites who returned from Captivity is not
exactly ascertainable, but it seems not to have
been more than sixty—so that it was probably
only a small village, which indeed may account
for its having escaped mention in the lists of
Joshua.

A remarkable tradition, of which there is no
trace in the Bible, but which nevertheless is not
improbably authentic, is preserved by the Jewish
authors, to the effect that the Netopháthites slew
the guards which had been placed by Jeroboam on
the roads leading to Jerusalem to stop the passage
of the first-fruits from the country villages to the
Temple (Targum on 1 Chr. ii. 54; on Ruth iv.
28, and Exz. iii. 11). Jeroboam's obstruction,
which is said to have remained in force till
the reign of Hoshea (see the notes of Beck to Targum
on 1 Chr. ii. 54), was commenced by a fast on
the 23d Sivan, which is still retained in the Jewish
calendar (see the calendar given by Kästner, Hist.
Judaei Aevi, vi. 29).

It is not mentioned by Eusebius and Jerome, and
although in the Mishnaic reference is made to the
"oil of Netopháthi" (Pesh. 7, §§ 1, 2), and to the
valley of the Beth Netopháthi, in which articulate
boars thrived, whose growth determined the date of
some ceremonial observance (Sheviith 9, § 7), noth-
ing is said as to the situation of the place.
The latter may well be the present village of BdeNettif,
which stands on the edge of the great valley of
the Wady es-Sawat (Rob. Bibl. Res. ii. 16, 17; Porter,
Handb. 248); but can hardly be the Netophá of
the Bible, since it is not near Bethlehem, but in
quite another direction. The only name in the
neighborhood of Bethlehem suggestive of Netopháthi
is that which appears in Van de Velde's map (1858)
as Amáthus, and in Télier (Att. Wandel. 80) as Om
Tide, attached to a village about 2
miles N. E. of Bethlehem and a wady which falls
therefrom to the Wady es Nar, or Kidron.

NETTOPHATHI [טמתפה] [pstron. see above]: Vat. [Rom. Alex. F.A.] omit: Alex.
[rather, F.A.]: Netofátha: Netofáthi: Neth. xii.
28. The same word in which other passages is
occasionally rendered "the Netopháthites," except
that here it is not accompanied by the article.

NETTOPHAYTHITE, THE [טמתפיה] in
Chon. [טמתפיה] [as above]: Et Topathitë, Netopháthi, Netofáthi, de nó Topathvi: [these are readings of Vat. M.; Rom. Alex. F.A. have many other variations: Netopháthites. [Net-
opháthi, Netofáthi, de Nó Topathvi]}. 2 Sam. xxii.
28, 29; 2 K. xv. 27; 1 Chr. iii. 30, xxvii. 13, 15;
Jez. xi. 8. The plural form, THE NETTOPHAYTHITES
(the Hebrew word being the same as the above)
ocurs in 1 Chr. ii. 54, ix. 16.

G.

NETTLE

The representative in the A. V.
in of his wisdom and piety, "sucorort fortis est in Tem-
pló Bovdni" (Tischendorf, Evang. Apor., p. 150).
2 comp. 2 K. xxv. 23, with Jer. xiii. 8.
of the Hebrew words chārāl and kīnānōsh or kīnāsh.

1. Chārāl (ךַּרָל): φοίνικας ἄργας; a sentii, urtica, spinus) occurs in Job xxx. 7 — the patriarch complains of the contempt in which he was held by the lowest of the people, who, from poverty, were obliged to live on the wild shrubs of the desert: "Among the bushes they brayed, under the chārāl they were gathered together," and in Prov. xxiv. 31, where of "the field of the slothful," it is said, "it was all grown over with thorns (kīnānōshān), and chārāl had driven the flock thereof;" see also Zeph. ii. 9: the curse of Mosh and Ammon is that they shall be "the breeding of chārāl and salt-pits."

There is very great uncertainty as to the meaning of the word chārāl, and numerous are the plants which commentators have sought to identify with it: brambles, sex-arache, butchers' broom, thistles, have all been proposed (see Celsius, Hier. ii. 165). The generality of critics and some modern versions are in favor of the nettle. Some have objected to the nettle as not being of a sufficient size to suit the passage in Job (l. c.); but in our own country nettles grow to the height of six or even seven feet when drawn up under trees or hedges; and it is worthy of remark that, in the passage of Job quoted above, bushes and chārāl are associated. Not much better founded is Dr. Royle's objection (Kittel's Cyc. art. Chārāl) that both thorny plants and nettles must be excluded, "as no one would voluntarily resort to such a situation: " for the people of whom Job is speaking might readily be supposed to resort to such a shade, as in a sandy desert the thorny-bushes and tall nettles growing by their side would afford; or we may suppose that those who "for want and famine" were driven into the wilderness were gathered together under the nettles for the purpose of gathering them for food, together with the sex-arache and juniper roots (Job xxx. 4). Celsius believes the chārāl is identical with the Christ-thorn (Zygophyllum Paliurus)—the Paliurus oaculent of modern botanists—but his opinion is by no means well founded. The passage in Proverbs (l. c.) appears to forbid us identifying the chārāl with the Paliurus oaculent; for the context, "I went by, and lo it was all grown over with kīnāsh and chārāl bin", seems to point to some weed of quicker growth than the plant proposed by Celsius. Dr. Royle has argued in favor of some species of wild mustard, and refers the Hebrew word to one of somewhat similar form in Arabic, namely, Kharāl, to which he traces the English charlock or bethlehem, the well-known troublesome weed. The Scriptural passages would suit this interpretation, and it is quite possible that wild mustard may be intended by chārāl. The etymology too, we may add, is as much in favor of the wild mustard as of

The nettle, one or other of which plants appears to be denoted by the Hebrew word. We are inclined to adopt Dr. Royle's opinion, as the following word probably denotes the nettle.

2. Kīnāsh or kīnāsh (ךָנָשׁ): ἀκάνθα, ἄκανθη, ἄκανθος: urtica. "Very many interpreters," says Celsius (Hier. ii. 297), "understand the nettle by this word. Of the other Jewish doctors, R. Ben Melec, on Prov. xxiv. 31, asserts that kīnāsh is a kind of thorn (ὑπάτος), commonly called a nettle." The Vulgate, Aria, Montanists, and Dods, in the French, Italian, and English versions, are all in favor of the nettle.

The word occurs in Is. xxxvii. 14: of Ezob it is said, that "there shall come up nettles and brambles in the fortresses thereof;" and in Hos. ix. 6. Another form of the same word, kīnānōshān (ךָנָנֹשׁ), occurs in Prov. xxiv. 31: the field of the slothful was all grown over with kīnānōshān. Modern commentators are generally agreed upon that this word, as it is admirably suited to all the Scriptural passages, may well be understood to denote some species of nettle (Urtica).

W. H.

NEW MOON

(נָחָם, נָחָה, נָחָן; νεόνυμον, νεωνύμονα, νεωνύμονα: νέονυμον, νέονυμον, νέονυμον). The first day of the lunar month was observed as a holy day. In addition to the daily sacrifice there were offered two young bullocks, a ram and seven heifers of the first year as a burnt offering, with the proper meat-offerings and drink-offerings, and a kid as a sin-offering (Num. xxviii. 11-15). It was not a day of holy convocation or festivals, and was not therefore of the same dignity as the Sabbath. But, as on the Sabbath, trade and handicraft-work were stopped (Num. viii. 5), the Temple was opened for public worship (Ex. xlvi. 3; Is. xvi. 29), and, in the kingdom of Israel at least, the people seem to have resorted to the prophets for religious instruction. The trumpets were blown at the offering of the special sacrifices for the day, as on the solemn festivals (Num. x. 10). Ps. lxi. 3. This was an occasion for state-banquets may be inferred from David's regarding himself as especially bound to sit at the king's table at the new moon (1 Sam. xx. 5-24). In later, if not in earlier times, fasting was intermitted at the new moons, as it was on the Sabbaths and the great feasts and their eves (Jud. viii. 6). [Fasts.]

The new moons are generally mentioned as to show that they were regarded as a peculiar class of holy days, to be distinguished from the solemn feasts and the Sabbath (Ex. xlv. 17; 1 Chr. xxii. 31; 2 Chr. ii. 4, viii. 13, xxi. 3; Ezra iii. 5; Neh. x. 33).

The seventh new moon of the religious year, being that of Tisri, commenced the civil year, and had
New Testament

Significance and rites of its own. It was a day of holy convocation. [Trumpets, Incense, etc.]

By what method the commencement of the month was ascertained in the time of Moses is uncertain. The Mishnaa describes the manner in which it was determined seven times in the year by observing the first appearance of the moon, which, according to Maimonides, derived its origin, by tradition, from Moses, and continued in use as long as the Sanhedrin existed. On the 30th day of the month watchmen were placed on commanding heights round Jerusalem to watch the sky. As soon as each of them detected the moon he hastened to a house in the city, which was kept for the purpose, and was there examined by the president of the Sanhedrin. When the evidence of the appearance was deemed satisfactory, the president rose up and formally announced it, uttering the words, “It is consecrated” (Sabbath, 11:2). The information was immediately sent throughout the land from the Mount of Olives, by beacon-fires on the tops of the hills. At one period the Samaritans are said to have observed the Jews by false fires, and swift messengers were afterwards employed. When the moon was not visible on account of clouds, and in the five months when the watchmen were not sent out, the month was considered to commence on the morning of the day which followed the 30th. According to Maimonides the Cubans altered their method when the Sanhedrin ceased to exist, and have ever since determined the month by astronomical calculation, while the Caraites have retained the old custom of depending on the appearance of the moon.

The religious observances of the day of the new moon may plainly be regarded as the consecration of a natural division of time. Such a usage would so readily suggest itself to the human mind that it is not wonderful that we find traces of it amongst other nations. There seems to be lost little ground for founding on these traces the notion that the Hebrews derived it from the Gentiles, as Spencer and Michaelis have done; and still less for attaching to it any of those symbolical meanings which have been imagined by some other writers (see Carpzov, Appar. Crit. p. 424). Ewald thinks that it was at first a simple household festival, and that on this account the law does not take much notice of it. He also considers that there is some reason to suppose that the day of the full moon was similarly observed by the Hebrews in very remote times. (Carpzov, Appar. Hist. Crit. p. 423; Spencer, De Leg. Heb. lib. iii. dissert. iv.; Selden, De Ann. Civ. Orb. iv. xi.; Mishna, Rosh Hashanah, vol. ii. p. 338, ed. Surenhus; Buxtorf, Synagoga Judæorum, cap. xxxii.; Ewald, Alterthümer, p. 394; Calvorth or the Lord’s Supper, c. iii. lights, Temple Service, c. xi.)

New Testament

The origin, history, and characteristics of the constituent books and of the great versions of the N. T., the mutual relations of the gospels, and the formation of the canon, are discussed in other articles. It is proposed now to consider the Text of the N. T. The subject naturally divides itself into the following heads, which will be examined in succession:

I. The History of the Written Text.

II. The History of the Printed Text.

III. Principles of Textual Criticism.

IV. The Language of the New Testament.

I. The History of the Written Text.

1. The early history of the Apostolic writings offers no points of distinguishing literary interest. Externally, as far as it can be traced, it is the same as that of other contemporary books. St. Paul, like Cicero or Pliny, often employed the services of an amanuensis, to whom he dictated his letters, affixing the salutation “with his own hand” (1 Cor. xvi. 21; 2 Thess. iii. 17; Col. iv. 18). In one case the scribe has added a clause in his own name (Rom. xvi. 22). Once, in writing to the Galatians, the Apostle appears to apologize for the ruggedness of the autograph which he addressed to them, as if from defective sight (Gal vi. 11). If we pass onwards one step, it does not appear that any special care was taken in the first age to preserve the books of the N. T. from the various injuries of time, or to insure perfect accuracy of transcription. They were given as a heritage to man, and it was some time before men felt the full value of the gift. The original copies seem to have soon perished; and we may perhaps see in this a providential provision against that spirit of superstition which in earlier times converted the symbols of God’s redemption into objects of idolatry (2 K. xviii. 4). It is certain that in the controversies at the close of the second century, which often turned upon disputed readings of Scripture, no appeal was made to the Apostolic originals. The few passages in which it has been supposed that they are referred to will not bear examination. Ignatius, so far from appealing to Christian archives, distinctly turns, as

saoque regi sacrificio animatiur” (Sat. i. 15). In the second the day is referred to as a social festival (1 M. ii. 23, 9); and in Tacitus we are informed that the ancient Germans assembled on the days of new and full moon, considering them to be auspicious for new undertakings (German. c. xii.)
the whole context shows, to the examples of the Jewish Church (τὰ ἀρχαῖα — ad Philad. 8). Tertullian again, when he speaks of "the authentic epistles" of the Apostles (De Præscr. Her. xxvii., "quod quas ipsae autographi litterae orum recturantur"), uses the term of the pure Greek text as contrasted with the current Latin version (comp. de Manog. xi., "scholia plane non sic esse in Graeco autographio"). The silence of the sub-Apostolic age is made more striking by the absence of all 

The autograph copy of St. Matthew written with his own hand. The copy was taken to Constantinople, and used as the standard of the sacred text (Cercheiner, Einl. § 3. Assem. Bibl. Or. i. 81). The autograph copy of St. John's Gospel (ὄρος Σιών) was said to be preserved at Ephesus "by the grace of God, and worshipped (προσευχὴτα) by the faithful there," in the fourth century (?). (†Petr. Alex.) p. 518, ed. Migne, quoted from Chron. Pasch. p. 51; though according to another account it was found in the ruins of the Temple when Julian attempted to rebuild the sacred edifice. A copy then was current even in the last century. It was said that parts of the (Latin) autograph of St. Mark were preserved at Venice and Prague; but on examination these were shown to be fragments of a MS. of the Vulgate of the sixth century (Belowsky, Fragmenta Proprecc. Ec. S. Morci, 1778).

2. In the natural course of things the Apostolic autographs would be likely to perish soon. The material which was commonly used for letters, the papyri-paper to which St. John incidentally alludes (2 John 12, διὰ χρῆτον καὶ μέλανον; comp. 3 John 13, διὰ μέλανον καὶ καλλιμέρον), was singularly fragile, and even the stouter kinds, likely to be used for the historical books, were not fitted to bear constant use. The papyri fragments which have come down to the present time have been preserved under peculiar circumstances, as at Hermoupolis or in Egyptian tombs; and Jerome notices that the library of Paephus at Caesarea was already in part destroyed (ex parte corruptum) when, in less than a century after its formation, two presbyters of the Church endeavored to restore the papyri MSS. (as the context implies) on parchment ("in membranis, Hieron. Ep. xxxiv. (141), quoted by Tisch. in Herzog's Enzyklopädie des N. T. p. 150). Parchment (2 Tim. iv. 13, μεθυμβώδεα), which was more durable, was proportionately rarer and more costly. And yet more than this. In the first age the written word of the Apostles occupied no authoritative position above their spoken word, and the vivid memory of their personal teaching. And when the true value of the Apostolic writings was more and more revealed by the progress of the Church, the Church thus gathered of the divine oracles would be chiefly sought for among Christians. On all accounts it seems reasonable to conclude that the autographs perished during that solemn pause which followed the Apostolic age, in which the idea of a Christian Canon, parallel and supple-

\[\text{mem} \text{tary to the Jewish Canon, was first distinctly realized.}\]

3. In the time of the Diocletian persecution (A. D. 303) copies of the Christian Scriptures were sufficiently numerous to furnish a special object for persecutors, and a characteristic name to renegades who saved themselves by surrendering the sacred books (trudiltres, August. Ep. lxvii. 2). Partly, perhaps, owing to the destruction thus caused, but still more from the natural effects of time, no MSS. of the N. T. of the first three centuries remain. Some of the oldest extant were certainly copied from others which dated from within this period, but as yet no one can be placed further back than the time of Constantine. It is recorded of this monarch that one of his first acts after the foundation of Constantinople was to order the preparation of fifty MSS. of the Holy Scriptures, required for the use of the Church, "on fair skins (ἐπὶ δινθίαμ καταστασίας) by skillful calligraphists" (Russe. Vlt. Const. iv. 38); and to the general use of this material we probably owe our most venerable copies, which are written on vellum of singular excellence and fineness. But though no fragment of the N. T. of the first century still remains, the earliest MSS. of the N. T. are still extant. A valuable collection of Egyptian papyri, with a few of a later date, give a clear notion of the calligraphy of the period. In these the text is written in columns, usually divided, in somewhat awkward capital letters (uncials), without any punctuation or division of words. The iota, which was afterwards subscribed, is commonly, but not always, subscripted; and there is no trace of accents or breathings.

4. In addition to the later MSS., the earliest versions and patristic quotations give very important testimony to the character and history of the ante-Nicene text. Express statements of readings which are found in some of the most ancient Christian writers are, indeed, the direct first evidence which we have, and are consequently of the highest importance. But till the last quarter of the second century this source of information fails us. Not only are the remains of Christian literature up to that time extremely scanty, but the practice of verbal quotation from the N. T. was not yet prevalent. The evangelic citations in the Apostolic Fathers and in Justin Martyr show that the oral tradition was still as widely current as the written Gospels (comp. Westcott's Canon of the N. T. pp. 125-195), and there is not in those writers one express verbal quotation from the other Apostolic books. This latter phenomenon is in a great measure to be explained by the nature of their writings. As soon as definite controversies arose among Christians, the text of the N. T. assumed its true importance. The earliest monuments of these remain in the works of Irenæus, Hippolytus (Pseudo-Origen), and Tertullian, who quote many of the arguments of the leading adversaries of the Church. Charges of corrupting the sacred text are urged on both sides with great acrimony. Dio-

\[^{a}\text{Griesbach (Opponola, ii. 69-70) endeavors to show that the word simply means pur, uncorrected.}\]

\[^{b}\text{Papyri fragments of part of St. Matthew, dating from the first century (?), are announced (1861) for publication by Dr. Simonides. (It is hardly necessary to say that these are forgeries.)}\]

\[^{c}\text{In the epistle of Polycarp some interesting various readings occur, which are found also in later copies. Acts ii. 21, τοίς εἰς γιορός τοῖς ἰδανίων: } 1 \text{ Tim. v. 1, ἄλλος γάρ ἐφέ βλέψει ὑπὲρ ἑαυτῆς; } 1 \text{ John iv. 3, ἐν σορεί ἐλπίδων ὑπὲρ. }\text{ Comp. 1 Pet. i. 8 (Polyc. ad Phil. i. 41.)}\]
The changes evident in the text of the New Testament are due to various factors, including alterations introduced by抄写者, editors, and textual critics of later generations. The text as we have it today is the result of a long process of transmission and interpretation. Each of the four Gospels contains distinctive features that reflect the theological and cultural context of the time and place in which they were written. The first three Gospels, Matthew, Mark, and Luke, are known as the synoptic Gospels because they share many similarities, while John offers a different perspective, focusing on the life and teachings of Jesus.

The text of the New Testament is not a fixed, unchanging entity. Instead, it has evolved over time, with the process of transmission involving both copying errors and deliberate changes made by scribes and scholars. The transmission process is complicated by the fact that the original manuscripts of the New Testament are lost, and our knowledge of the text is based on copies that were made long after the originals were written. As a result, scholars study the text critically, looking for evidence of corruption and attempting to reconstruct the original text as accurately as possible.

The text of the New Testament is not only a historical record of the teachings of Jesus and the early Christian Church but also a sacred scripture that is central to the religious and spiritual life of Christians around the world. The study of the text, therefore, is not only an academic pursuit but also a devotional and spiritual practice.
not suffered by the hands of scribes, as the MSS. of the N. T. have suffered, though in a less degree. The testimony which Origen bears as to the cor-
rection of Corruptions is little derived from the general statements which have been al-
ready noticed as being the deliberate judgment of a scholar and not the plea of a controversialist.
"As the case stands," he says, "it is obvious that the difference between the copies is considerable, par
tly from the carelessness of individual scribes, par
tly from the wicked [daring] of some in correcting what is written, partly also from [the changes made]
by those who add or remove what seems good to
them in the process of correction [" (Orig. In
Matt. t. xvi. § 14). In the case of the LXX., he
adds, he removed or at least indicated those cor-
rup tions by a comparison of "editions" (εἰδησείς),
and we may believe that he took equal care to as-
certain, at least for his own use, the true text of
the N. T., though he did not venture to arouse
the prejudice of his contemporaries by openly revising it.
Even in the form in which they have come down to
us, the writings of Origen, as a whole, contain
the noblest early memorial of the apostolic text.
And, through these records, he publicly dor
many of these copies. He is not only likely that he
wrote out copies of the N. T. with his own hand
(Reiske, Origenes, ii. 184), which were spread widely in
after times. Thus Jerome adds to his codex of Adamantius," i. e. Origen (In
Matt. xxiv. 36; Gal. iii. 1), and the copy of
Pamphilus, this text can hardly have been other than a copy of Origen's text (Cod. H 3)
Subscription, Inf. § 252). From Pamphilus the text passed to Eusebius and it is scarcely rash to believe that it
can be traced, though imperfectly, in existing MSS.

9. In thirteen cases (Norton, Genuineness of the
Gospels, i. 234-236) [Addl. Notes, pp. xvii.-
xxii., 2d Amer. ed.)] Origen has expressly noticed
variations in the text of the Gospels in his time different
from those of the most widely current circuits of the
Gospels (Matt. viii. 28, xvi. 20, xvii. 1, xii. 5, 9, 15, xviii. 17: Mark iii.
18; Luke i. 46, iv. 48, xiv. 19, xxii. 45; John i.
3, 4: 28). In three of these passages the varia-
tions which he notices are no longer found in our
Greek copies (Matt. xii. 9 or 13, οἶκα for νίκα;
Tregelles, ed loc.; Mark iii. 18 (ii. 14), Λεβης των
των Αραμαίων. [5 (D with some Latin MSS. reads Λεβ
βασιου)]; Luke i. 46, Ακολουθήσετε για Μαρτύριοι: so in
some Latin copies]; in seen our copies are still
divided (in Matt. viii. 28, Πασχάλιναν: John i.
28, Πασχάλινα) the reading which was only found in
a few MSS. is now widely spread: in the
remaining place (Matt. xxvii. 17, Ιησου Βαπτίσεται)
has few copies of no great age retain the interpolation
which was found in its " in very ancient copies.
It is more remarkable that Origen asserts,
in answer to Celsius, that our Lord is nowhere
called "the carpenter" in the Gospels circulated
in the churches, though this is undoubtedly the
true reading in Mark vi. 3 (Orig. c. Cels. vi. 36).

10. The evangelical quotations of Origen are not
shoddy free from the admixture of traditional glosses
a These words seem to refer to the professional cor-
rector (λατρητής).

b To these Mr. Hert (to whom the writer owes many
which have been noticed in Clement, and often pres-
tent a confusion of parallel passages (Matt. v. 44,
vi. (53), viii. 21 f, xiii. 11, xxii. 27 f; 1 Tim. iv.
11, 20); but apart from his genuine text from these natural corruptions, and a
few references are sufficient to indicate its extreme
importance (Matt. iv. 10, vi. 14, xv. 8, 35; Mark
i. 2, x. 28; Luke xxi. 19; John vii. 39; Acts x. 10;
Rom. viii. 28).

11. In the Epistles Origen once notices a striking
variation in Heb. ii. 9, καὶ οὐ πέμψαν θεὸν γιὰ χάρι
tà, which is still attested; but, apart from the
specific reference to variations, it is evident that he
himself used MSS. at different times which varied
in many details (Mill, Proleg. § 687). Griesbach,
who has investigated this fact with the greatest care
(Melchcr i. appended to Comm. Crit. ii. ix-xl),
some to have exaggerated the extent of these dif-
fences while he establishes their existence satis-
factorily. There can be no doubt that in Origen's
time the variations in the N. T. MSS., which we
have seen to have existed from the earliest attain-
able date, and which Origen describes as consider-
able and wide-spread, were beginning to lead to the
formation of specific groups of copies.

Though materials for the history of the text
during the first three centuries are abundant, noth-
ing has been written in detail or the subject since the
time of Mill (Proleg. 249 ff.) and R. Simon
(Histoire Critique, 1685-93). What is wanted is
nothing less than a complete collection at full
length, from MS. authority, of all the ante-Nicene
Greek quotations. These would form a centre round
which the variations of the versions and Latin quotations might be grouped. A first step
towards this has been made by Anger in his Syn-
quotations are well given by Sabatier, Bibliorum
Sacrorum Lectoris versus antiquae, 1751.

12. The most ancient MSS. and versions now
extant exhibit the characteristic differences which have been found to exist in different parts of the
works of Origen. These cannot have had their
source later than the beginning of the third cen-
tury, and probably were much earlier. In classical
texts, where the MSS. are sufficiently numerous,
it is generally possible to determine a very few primary
sources, standing in definite relations to one an-
other, from which the other copies can be shown to
flow; and from these the scholar is able to discover
one source of all. In the case of the N. T. the
authorities for the text are infinitely more varied
and extensive than elsewhere, and the question has
been raised whether it may not be possible to dis-
tribute them in like manner and divine from later
documents the earliest history of the text. Various
answers have been made which are quite valueless
as far as they profess to rest on historical evidence;
and yet are all more or less interesting as explaining
the true conditions of the problem. The chief facts,
it must be noted, are derived from later docu-
ments, but the question itself belongs to the last
half of the second century.

Bengel was the first (1734) who pointed out the
affinity of certain groups of MSS., which, as he
marks, must have arisen before the first versions
were made (Apparatus Criticus, ed. Burk, p. 429).

suggestions and corrections in this article] adds Matt.
xx. 22; from Cramer, Cat. in Eph. iv. 31, where Origen
blames the insertion of εἰκῶ.
NEW TESTAMENT

Originally he distinguished three families, of which the Cod. Alex. (A), the Graeco-Latin MSS., and the mass of the more recent MSS., are respectively the heads. At a later time (1375) he adopted the simpler division of "two nations," the Asiatic and the African. In the latter he included Cod. Alex., the Graeco-Latin MSS., the Ethio.-Coptic [Memphitic], and Latin versions; the mass of the remaining authorities formed the Asiatic class. So far no attempt was made to trace the history of the groups, but the general agreement of the most ancient witness against the more recent, a fact which Bentley announced, was distinctly asserted, though Bengel was not prepared to accept the ancient reading as necessarily true. Smaller numbered nothing of value to Bengel's theory, but made it more widely known (Spicilegium Osirocinum, etc., added to his edition of Wetstein's Libelli et Graismo apud Int. N. T. 1706; Appendix, etc., 1707). The honor of carefully determining the relations of critical authorities for the N. T. text belongs to Griesbach. This great scholar gave a summary of his theory in his Historia Text. Gr. Epist. Paul. (1777, Oxyr. ii. 1-135) and in the preface to his first edition of the Greek Text. His earlier essay, Dissert. Crit. de Velb. quot. Evang. Originales (1771, Oxyr. i.), is incomplete. According to Griesbach (N. T. ed. 1st n. xiv. 86) two distinct recensions of the Gospels existed at the beginning of the third century: the Alexandrinum, represented by B C. L, 1, 13, 33, 69, 106, the Coptic, Ethiop., Arm., and later Syrian versions, and the quotations of Clem. Alex., Origen, Eusébius, Cyril. Alex., Isid. Pelus.; and the Western, represented by D, and in part by 1, 13, 69, the ancient Latin version and Fathers, and sometimes by the Syrian and Arabic versions. Cod. Alex. was to be regarded as giving a more recent (Constantinopolitan) text in the Gospels. As to the origin of the variations in the text, Griesbach supposed that copies were at first derived from the separate autographs or imperfect collections of the apostolic books. These were gradually interpolated, especially as they were intended for private use, by glosses of various kinds, till at length authoritative editions of the collection of the Gospels and the letters (εἰκογνώμων ὤ ἄποστολοι το ἄποστολοι) were made. These gave in the main a pure text, and thus two classes of MSS. were afterwards current, those derived from the interpolated copies (Western), and those derived from the εἰκογνώμων and ἄποστολοι (Alexandrinum, Eastern; Oxyr. ii. 77, 193, Menodota, etc.). At a later time Griesbach rejected these historical conjectures (N. T. ed. 2, 1796; see comp. Melet. I. c.), and repeated with greater care and fulness, from his enlarged knowledge of the authorities, the threefold division which he had originally made (N. T. i. Pref. lxx.-lxxvii. ed. Schult). At the same time he recognized the existence of mixed and transitional texts; and when he characterized by a happy epigram τριγωνιαίων γείτον το χειδωμων επιτο χειδωμων επιτο, interpretations, the difference of the two ancient families, he frankly admitted that no existing document exhibited either a "recension" in a pure form. His great merit was independent of the details of

his system: he established the existence of a group of ancient MSS. distinct from those which could be ascribed of Latinizing (Tregelles, Horae, p. 105).

13. The chief object of Griesbach in propounding his theory of recensions was to destroy the weight of mere numbers. The critical result with him had far more interest than the historical process; and, apart from all consideration as to the origin of the variations, the facts which he pointed out and of permanent value. Others carried on the investigation from the point where he left it. Hug endeavored, with much ingenuity, to place the text on a historical basis (Einklungen in N. T. 1st ed. 1808; 3d, 1826). According to him, the text of the N. T. fell into a state of considerable corruption during the second century. To this form he applied the term καθένα γένος (common edition), which had been applied by Alexandrine critics to the unrevised text of Homer, and in later times to the unrevised text of the LXX. (i. 144). In the course of the third century this text, he supposed, underwent a threelfold revision, by Hesychius in Egypt, by Lucifer at Antioch, and by Origen in Palestine. So that our existing documents represent four classes: (1) The unrevised, B, D. 1, 13, 69 of the Gospels; D F E. G in the Acts; D E. G in the Pauline Epistles; the Old Latin and Theban, and in part the Peshito Syriac; and the quotations of Clement and Origen. (2) The Egyptian recension of Hesychius: B C L in Gospels; A B C T in the Pauline Epistles; A B C Acts and Catholic Epistles; A C in the Apocalypse; the Memphitic version; and the quotations of Cyril. Alex. and Athanasius. (3) The Asiatic (Athenagor-Celestial) recension of Lucian; F. F G H I S V and the recent MSS. generally; the Gothic and Slavonic versions, and the quotations of Theophylact. (4) The Palestinian recension of Origen (of the Gospels); A K M; the Philoxenian Syriac; the quotations of Theodoret and Chrysostom. But the slender external proof which Hug adduced in support of this system was, in the main, a mere misconception of what Jerome said of the liberties of Hesychius and Lucifer on the LXX. (Pref. in Postill. c. Ruff ii. 27; and Ep. covi. (155) § 2. The only other passages are De Vitis illust. cap. lvii. Lucianus, Pref. in postill. Fr.); the assumed recension of Origen rests on no historical evidence whatever. Yet the new analysis of the internal character of the documents was not without a valuable result. Hug showed that the line of demarcation between the Alexandria and Western families of Griesbach was practically an imaginary one. Not only are the extreme types of the two classes connected by a series of intermediate links, but many of the quotations of Clement and Origen belong to the so-called Western text. Griesbach, in examining Hug's hypothesis, explained this phenomenon by showing that at various times Origen made use of different kinds of MSS. and admitted that many Western readings are found in Alexandria copies (Melet. xviii. comp. Laurence, Remarks on the Systematic Classification of MSS. 1814).

14. Little remains to be said of later theories. Eichhorn accepted the classification of Hug (Einl. 3d ed. 1821). The necessity of destroying this grand source of error was supreme, as may be seen not only from such essays as G. W. Maestricht (§ 8. n. u. y. but also from Wetstein's Rule xvii. "Hic plurimum errorum occurs parsibus praebendae est."

15. This was distinctly "called by name. (Act. ii. 43.)" The pericope recension in εἰκογνώμων exegesis, etc., was mentioned in the collections, etc., in some libraries; superstition, deorum adversus humanorum, etc., etc., in Alexandria manuscripta; and in vol. ii. xlviii. of Ead-
the genealogical table of our MSS. may be wond-
ning, but to the specific relation between the groups,
and their comparative antiquity of origin, are clear.
This antiquity is determined, not by the demonstra-
tion of the immediate dependence of particular copies upon one another, but by reference to a
common standard. The secondary uncials (E S U etc.) are not derived from the earlier (B C A)
by direct descent, but rather both are derived by dif-
ficult processes from one original. And here va-
rious considerations will assist the judgment of
the critic. The accumulation of variations may be
more or less rapid in certain directions. A disturbing
force may act for a shorter time with greater inten-
sity, or its effects may be slow and protracted.
Corruptions may be obvious or subtle, the work of
the ignorant copyist or of the rash scholar; they
may lie upon the surface or they may penetrate
into the fabric of the text. But on such points no
general rules can be laid down. Here, as elsewhere,
there is an instinct or tacit which discerns likenesses
or relationships and refuses to be measured mechani-
ically. It is enough to insist on the truth that the
varieties in our documents are the result of slow
and natural growth and not of violent change.
They are due to the action of intelligible laws and
rarely, if ever, to the capricious imperfect judgment
of individuals. They contain in themselves their
history and their explanation.
16. From the consideration of the earliest history
of the N. T. text we now pass to the era of MSS.
The quotations of PRAXIUS ALEX. (TA. D. 264),
PETRUS ALEX. (1. A.D. 312), Methodius (1. A.D.
311), and EUSEBIUS (1. A.D. 340), confirm the
pre-
vance of the ancient type of text; but the public
establishment of Christianity in the Roman empire
necessarily led to important changes. Not only were
more copies of the N. T. required for public use
(Comp. § 3), but the nominal or real adherence of
the higher ranks to the Christian faith must have
largely increased the demand for costly MSS. As
a natural consequence the rude Hellenistic forms
gave way before the current Greek, and at the same
time it is reasonable to believe that smoother and
fuller constructions were substituted for the rougher
turns of the apostolic language. In this way the
foundation of the Byzantine text was laid, and the
same influence which thus began to work, continued
uninterrupted till the fall of the Eastern empire.
Meanwhile the multiplication of copies in Africa
and Syria was checked by the Mohammedan conquest,
and the Greek language ceased to be current in the
West. The progress of the Alexandrine and Occidental families of MSS. was thus checked; and the mass
of recent copies necessarily represent the accumu-
lated results of one tendency.
17. The appearance of the oldest MSS. has been
already described. (§ 3.) The MSS. of the 4th
century are separated: Cod. Polycarp. (B) may be
taken as a type, present a close resemblance to these.
The writing is in elegant continuous (capitals) un-
cials, a in three columns c without initial letters or
MSS subscript, or ascript. A small interval serves

a Those codices are placed together which appear
to demand such an arrangement; and those which
stand between others are such as show still more and
more of the intermixture of modernized readings b 1
(Tre-

b Jerome describes the false taste of many in his
time (c. A. D. 400) with regard to MSS. of the Bible:

i

paparum uma argenteo scriptores, vel uncialis,
ut vulgo aiunt, litteris inerba magis exacta, quam co-

b Codex Sinaiticus (Cod. Fid. Aug.) has four

- columns ; Cod. Alex. (A) two. Cf. Scrivener, Intro-
duction, p. 25, n. for other examples.
as a simple punctuation; and there are no accents or breathings by the hand of the first writer, though there have been added subsequently. Uncial writing continued in general use till the middle of the 10th century. A uncial MS. (C.), the earliest dated copy, bears the date 949; and for service books the same style was retained a century later. From the 11th century downwards cursive writing prevailed, but this passed through several forms sufficiently distinct to fix the date of a MS. with tolerable certainty. The earliest cursive Biblical MS. is dated 941 A.D. (Opp. 14, Scrivener, Introduction, p. 36 note), though cursive writing was used a century before (A. p. 888, Scrivener, I. c.). The MSS. of the 11th and 12th centuries abound in the contradictions which afterwards passed into the early printed books, the material as well as the writing of MSS. underwent successive changes. The oldest MSS. are written on the thinnest and finest vellum in later copies the parchment is thick and coarse. Sometimes, as in Col. Cotton. (X. A.), the vellum is stained. Paper was very rarely used after the 9th century. In the 10th century cotton paper (cotton bifolium or Damaescena) was generally employed in Egypt; and one example at least occurs in its use in the 9th century (Tischff. Not. Cod. Sin. X. 54, quoted by Scrivener, Introduction, p. 21). In the 12th century the common linen or rag paper came into use: but paper was seldom used for Biblical MSS. earlier than the 13th century, and had not entirely displaced parchment at the arr of the invention of printing, e. A. D. 1450 (2) (p. 21). One other kind of material requires notice, redressed parchment (codex rectus), obliterata. Even at a very early period the original text of a parchment MS. was often erased, that the material might be used afresh (cf. ad Fom. vii. 18; Catull. xxi. 6). In lapse of time the original writing frequently reappears in faint lines below the later text, and in this way many precious fragments of Biblical MSS., which had been once obliterated for the transcription of other works have been recovered. Of these palimpsest MSS. the most famous are those directed below the letters C R Z. The earliest palimpsest is not older than the 5th century (Plate i. fig. 3). In uncial MSS. the contradictions are usually limited to a few very common forms (θEC, θC [XC, KC, θC.] ΠΠΠ, ΔΔΔ, etc., i. e. θεία, θείας, [Χριστός, χριστός, υἱός, πατήρ, δαυίδ].

a A full and interesting account of the various changes in the uncial alphabet at different times is given by Scrivener, Introduction, pp. 27-33.

b This practice was condemned at the Quinextine Council (c. 502). Can. 68; but the Commentary of Balbianus shows that in his time (A. p. 1204) the practice had not ceased; αγγέλους σταύροι βαλε τὶς ἀποκαθήμενος τοις αὐτόπτοις τούς παλιότερος τῷ Θεῷ γράφων. A Biblical fragment in the British Museum has been erased, and used twice afterwards for Syrian writing (M. E. 18, 490. Cod. s. Tischff).

c A. is the use of cursive MSS. in this respect of interest. Mr. Scrivener found that of forty-three MSS. now in England, twelve have no vestige of either folium; fifteen represent the ascendant to the descendant exclusively, and the few that remain have both ascendants and descendants. [Introduction, p. 30.]

d The earliest use of the subscript is in a MS. (dated 1090) (Scrivener, I. c.).

e Mr. Scrivener makes an exception in the case of the first four lines of each column of the Book of Genesis.
transposed the book to the place before the pastoral
epistles.\(^a\)

\(^a\) The canon of the Gospels is divided into 21 chapters (κεφαλαία, πτυχαί, διορίσεις), which correspond with distinct sections of the narrative, and are on an average a little more than twice as long as the sections in B. This division is found in A, C, R, Z, and must therefore have come into general use some time before the 5th century.\(^b\) The other division was constructed with a view to a harmony of the Gospels. It owes its origin to Ammonius of Alexandria, a scholar of the 3rd century, who constructed a Harmony of the Evangelists, taking St. Matthew as the basis round which he grouped the parallel passages from the other Gospels. Ensenors of Cæsarea completed his labor with great ingenuity, and constructed a notation and a series of tables, which indicate at a glance the parallels which exist to any passage in one or more of the other Gospels, and the passages which are peculiar to each. There seems every reason to believe that the sections as they stand at present, as well as the ten "Canons," which give a summary of the Harmony, are due to Ensenors, though the sections sometimes occur in MSS. without the corresponding canons. The Cod. Alex. (A), and the Codonian fragments (N), are the oldest MSS. which contain both in the original hand. The sections occur in the palimpsests C, R, Z, P, Q, and it is possible that the Canons may have been there originally, for the vernacular (κεφαλαίας, Esseh. Ep. ad Carp.), or paint with which they were marked, would entirely disappear in the process of preparing the parchment ash.\(^c\)

22. The division of the Acts and Epistles into chapters came into use at a later time. It does not occur in A or C, which give the Ammonian sections, and is commonly referred to Euthalius (Comp. § 19), who, however, says that he borrowed the divisions of the Pauline Epistles from an earlier father; and there is reason to believe that the division of the Acts and Catholic Epistles which he published was originally the work of Pamphilus the Martyr (Montfaucon, Blld. Crit. p. 78). The Apocalypse was divided into sections by Andreas of Cæsarea about A.D. 500. This division consisted of 24 λόγους, each of which was subdivided into three "chapters" (κεφαλαία).\(^d\)

23. The titles of the sacred books are from their nature additions to the original text. The distinct names of the Gospels imply a collection, and the titles of the Epistles are notes by the possessors and not addressed by the writers (Ἰωάννου ἄ, β', etc.). In their earliest form they are quite simple, According to Matthew, etc. (κατὰ Ματθαίου κ.τ.λ.); To the Romans, etc. (πρὸς Ρωμαίους κ.τ.λ.; First of Peter, etc. (Πέτρου α'); Acts of Apostles, (πρὸς Ἀποστόλους: Ἀποκάλυψις. These headings were gradually amplified till they assumed such forms as The holy Gospel according to John; The first Catholic Epistle of the holy and apostolic Peter; The Apocalypse of the holy and most glorious Apostle and Evangelist, the beloved virgin who rested on the bosom of Jesus, John the Divine. In the same way the original subscriptions (σημείωσις), which were merely repetitions of the titles, gave way to vague traditions as to the dates, etc., of the books Those appended to the Epistles, which have been translated in the A. V., are attributed to Euthalius, and their singular inaccuracy (Paley, Horae Paulinae, ch. xv.), is a valuable proof of the utter absence of historical criticism at the time when they could find currency.

24. Very few MSS. contain the whole N.T., "twenty-seven in all of the vast mass of extant documents" (Scrivener, Introdcution, p. 61). The MSS. of the Apocalypse are rarest; and Chrysostom complained that in his time the Acts was very little known. Besides the MSS. of the N. T., or of parts of it, there are also Lectionaries, which contain extracts arranged for the Church-services. These were taken from the Gospels (εὐαγγελία ἵσταρμα), or from the Gospels and Acts (ματαιοσύνης), or rarely from the Gospels and Epistles (ἀποκάλυψις ἐν Παύλους). The Canons and Epistles (συναγωγικοὶ) are appended to very many MSS. of the N. T.; those for the saints' day lessons, which varied very considerably in different times and places, were called ἀναλογία (Schoeberl, N. T. i. 453-463; Scrivener, 65-75).

25. When a MS. was completed it was commonly submitted, at least in early times, to a careful revision. Two terms occur in describing this process, ἀνατιθήματα and διακωμισθή. It has been suggested that the work of the former answered to that of "the corrector of the press," while that of the latter was more critical (Tregelles, Horae, pp. 85, 86). Possibly, however, the words only describe two parts of the same work. Several MSS. still preserve a subscription which attests a revision by comparison with famous copies, though the attestation must have referred to the earlier exemplar (Comp. Tischendorf, Jube subscript.; but the Cod. Sinait. the readings of one corrector (2 b) are frequently as valuable as those of the original text.\(^e\) The work of Montfaucon still remains the classic

---

\(^a\) The oldest division is not found in 2 Pet. (ed. Ver. p. 125). 〈M. Hort.〉 It is found in Jude; 2, 5 John.

\(^b\) The κεφαλαία do not begin with the beginning of the books (Griesbach, Comm. Crit. ii. 49). This is important in reference to the objections raised against Matt. V.

\(^c\) These very useful canons and sections are printed in the Oxford Text (Lloyd) in Tischendorf (1859), and the notation is very easily mastered. A more complete arrangement of the canons, giving the order of the

\(^d\) A comparative table of the ancient and modern divisions of the N. T. is given by Scrivener (Introduction, p. 58).

\(^e\) For the later division of the Bible into our present chapters and verses, see Bunk, l. 307, 308.

\(^f\) Examples of the attestation and signature of MSS with a list of the names of scribes, are given by Montfaucon (Palæographia, pp. 33-106).
THE NEW TESTAMENT

The latest discovered and most complete Codex Sinaiticus.

A. (i) Primary Uncials of the Gospels.

 Codex Sinaiticus = Cod. Frid. Aug. of LXX., at St. Petersburg, obtained by Tischendorf from the convent of St. Catherine, Mount Sinai, in 1859. The fragments of LXX. published as Cod. Frid. Aug. (1846), were obtained at the same place by Tischendorf in 1844. The N. T. is entire, and the Epistle of Barnabas and parts of the Shepherd of Hermas are added. The whole MS. is to be published in 1892 by Tischendorf at the expense of the Emperor of Russia. It is probably the oldest of the MSS. of the N. T. and of the 4th century (Tischendorf, Not. Cod. Sin. 1860).

The MS. was published at St. Petersburg in 1892 in magnificent style, in 4 vols. folio, with the title: "Bibliorum Codex Sinaiticus Petropolitanae... cod. T. Tischendorf," the edition being limited to about 300 copies. It was printed with type cast for the purpose so as to resemble the characters of the MS., which it represents line for line with the greatest attainable accuracy. The first vol. contains Prolegomena, notes on the alterations made at different times by many correctors, and 21 pages of facsimiles, the first 19 representing different parts of the MS., and the remaining 2 containing facsimiles of the writing of 36 MSS. of great palaeographical interest, illustrating the changes in the style of writing from the first century (papr.) to the seventh. In 1863 a comparatively cheap edition of the N. T. part of the MS. was published by Tischendorf at Leipsic, in ordinary type, with cheap Prolegomena and some corrections (Novum Testamentum Sinaiticos, etc., 4th). The Rev. F. H. Scrivener published in 1864 a Full Collection of the Codex Sinaiticus with the Received Text of the N. T. (rather, Stephens' ed. of 1550), to which is prefixed a Critical Introduction; the same collation also appeared in a new edition of Wordsworth's Greek Testament, for which it was originally made. In 1865 Tischendorf issued a new edition of the N. T. portion of the MS. (N. T. Graec. ex Sinaitico Codice, etc.); noting in the margin the alterations of later correctors, as also the various readings of the Vatican. MS. (B) so far as they were then known, and of the Elzevir or Received Text, with a valuable Introduction of 83 pages, in which (pp. xxiii.-lix.) he gives a list of errata in Scrivener's generally accurate collation.

A. (Codex Alexandrinus, Brit. Mus.,) a MS. of the entire Greek Bible, with the Epistles of Clement added. It was given by Cyril Lycer, patriarch of Constantinople, to Charles I. in 1628, and is now in the British Museum. It contains the whole of the N. T. with some chrestes: Matt. i. xxxv. 6, Εὐαγγέλια: John vii. 40, v. 59. 52, λέγειν: 2 Cor. iv. 13, ἐνίκησαν... viii. 6, ἤ λέγον. It was probably written in the first half of the 5th century. The N. T. has been published by Woide (ed. 1786), and with some corrections by Cowper (ed. 1789), and later by small letters. In consequence of the continuation, which arises from application of the same letter to a different MS., I have distinguished the different MSS. by the notation M. M. M. M. M. (1, 2, 3, etc.)—there is no M.2, retaining the asterisk (as originally used) to mark the first, etc., hands.
and some Greek writings of Ephraem Syrus were written over it. The MS. was brought to Florence from the East at the beginning of the 16th century, and was at one time in the hands of Menabrea de Melieri. Wetstein was engaged to collate it for Bentley (1716), but it was first fully examined by Tischendorf, who published the N. T. in 1843: the O. T. fragments in 1845. The only entire books which have perished are 2 Thess. and 2 John, but because of greater or less extent occur constantly. It is of about the same date as Cod. Alex.

A. D. Coxe (New Folio, University Library, Cambridge), a Græco-Latin MS. of the Gospels and Acts, with a small fragment of 3 John, presented to the University of Cambridge by Beza in 1581. Some readings from it were obtained in Italy for Stephens’ edition; but afterwards Beza found it at the sack of Lyons in 1562 in the monastery of St. Ireneeus. The text is very remarkable, and, especially in the Acts, abounds in singular interpolations. The MS. has many hæmorrhages. It was edited in a splendid form by Kipring (1793, 2 vols., fol.), and no complete collation has been since made; but arrangements have lately been done (1861) made for a new edition under the care of the Rev. F. H. Scrivener. The MS. is referred to the 6th century. Cf. Griesbach, Synag. Crit. i. pp. 1xvi.-exix. It is of the 8th century.

R. (Brit. Mus. Add. 17, 211), a very valuable palimpsest, brought to England in 1847 from the convent of St. Mary DeParia in the Nitzan desert. The original text is covered by Syrian writing of the 11th century. The latter has been published in 1846, Luke being deciphered by Tregelles in 1854, and by Tischendorf in 1835. The latter has published them in his Mon. Sacra Inedita, Nova Coll., vol. i. 1857. It is assigned to the 6th century. (Plate i. fig. 3.)

Y. (Cod. Daddunianus revisarius, in the Library
New Testament

of Trin. Coll. (published), a palimpsest containing large portions of St. Matthew. It was edited by Brown (1801); and Tischendorf has since (1853) re-examined the MS. and deciphered all that was left undetermined before (History of Printed Text, pp. 160-163). It is assigned to the 6th century.

Δ (Codex Sogdianicus), a MS. of the Gospels, with an interlinear Latin translation, in the Library of St. Gall. It once formed part of the same volume with τ. Published in lithographed facsimile by Kettig (Zurich, 1856), 9th century.

ξ (Codex Scodlinus), a palimpsest in possession of the Bible Society, London, containing important fragments of St. Luke. It is probably of the 8th century, and is accompanied by a Codex. The later writing is a Greek Lectionary of the 15th century. It has been transcribed and published by Tischendorf (London, 1861).

The following are important fragments:

A. (Tischendorf), various fragments of the Gospels (Acts, Pauline Epistles), some of great value, published by Tischendorf, Monumenta Sacra, Nova Coll., vol. i. 1855. [5th, 6th, and 7th cent.]

* Π is now used by Tischendorf to denote the MS. described below under Ν

X (Cod. Cotton.), (formerly J X), twelve leaves of purple vellum, the writing being in silver. Four leaves are in Brit. Mus. (Cotton, C. xv.). Published by Tischendorf, Mon. Sac. Incld., 1846. Sec. vi.

* 33 additional leaves of this MS., containing fragments of the Gospel of Mark, have been recently found at Patras, and are used in Tischendorf's 8th critical edition of the N. T.

A. Ν (Brit. Mus. Add. 17, 136), a palimpsest. Deciphered by Tregelles and Tischendorf, and published by the latter: Mon. Sac. Incld. Novo Coll., vol. ii. Sec. iv. v. [This MS. is now designated by Tischendorf as Π. — A.]

* O denotes fragments of the Gospel of John at Moscow (Matthaii, No. 15). 9th century.

* ωδεθείτω denote the hymns in Luke 1 as found in uncial MSS. of the Peshitta in various libraries. Or, 6th century (Cod. Qol.: apher. 6th century).

Π (Cod. Gheorghianus, Wolfenbüttel), two palimpsests, respectively of the 6th and 5th centuries. Published by Knittel, 1762, and Π (Π rather) again, more completely, by Tischendorf, Mon. Sac. Incld. iii. 1860, who has Q (Π rather) ready for publication.

T (Cod. Barbijonis, Propaganda at Rome), of the 6th century. The fragments of St. John, collated by Giorgi (1790); those of St. Luke, collated by B. H. Alford (1858). Other fragments were published by Waide (Tisch. N. T. Tred. g. xxiii.).

* Τε denotes fragments of John, and Τσ of Matthew, similar to the above, the former at St. Petersburg (Imp. Lib.), the latter belonging to the Russian bishop Porphyrii. 6th century. Τε denotes fragments of Matt., Mark, and John, from Borgia MSS. of the 7th century.

* Θεότης are fragments at St. Petersburg, ranging from the 6th to the 9th century. Of these Θεότης are the most valuable. A.

(ii) The Secondary Uncials are in the Gospels:

H (Hamburgo-Scidli), Coll. by Tischendorf, 1830. Sec. ix. [vol. i.]

S (Vaticanus, 534). Coll. by Birch. Sec. x.

U (Cod. Nominanti, Venice). Coll. by Tregelles and Tischendorf. Sec. x.

* Faxii (Codex Latinius, 55), a Graeco-Latin MS. of the Acts, probably brought to England by Theodore of Tarsus, 658, and used by Bede. It was given to the University of Oxford by Archbishop Laud in 1636. Published by Hearne, 1715; but a new edition has been lately undertaken (1861) by Scrivener, and is certainly required. [Another edition is promised by Tischendorf.] Sec. vii. viii.

* F. A few fragments of the Acts, 7th century.

A. I (St. Petersburg). 3 fragments, one, Acts xxviii. 8-17, of the 5th century; the others 7th century.

A. I. The Secondary Uncials are —

* G2 is now used by Tischendorf to denote a leaf of the 7th century, brought by him in 1859 to St. Petersburg, containing Acts ii. 45-iii. 8. A.

L2 Formerly G2; see above. A.

L1, an important palimpsest of the 9th century, belonging to the library of the bishop Porphyrii Uspeiskii in St. Petersburg, containing the principal part of the Acts, the Catholic and Pauline Epistles, and the Apocalypse. In the Acts and 1 Peter its
text agrees with that of the later uncials, but in the
remainder of the N. T., particularly in the Apoc-
alypha, it is greatly superior to them. It was pub-
lished (*Codex Bohemiae*) and 1869 (Acts and Rev.)
in vols. v. and vi. of Tischendorf's *MSS, Sacra
Ined., Nova Collectio.*

C (i.) Primary Uncials of the Pauline Epis-
tles:

-N A B C-

D3 (Codex Clermontensis, i. e. from Clermont,
near Beauvais, Paris, Bibl. Imp. 167), a Graeco-
Latin MS. of the Pauline Epistles, once (like D)
in the possession of Beza. It passed to the Royal
Library at Paris in 1738, where it has since re-
mained. Wetstein collated it carefully, and, in
1832, it was published by Tischendorf, who had
been engaged on it as early as 1810. The MS.
was independently examined by Tregelles, who commu-
nicated the results of his collation to Tischendorf,
and by their combined labors the original text,
which has been altered by numerous correctors,
has been completely ascertained. The MS. is entire
except Rom. 3:4-7 (in Latin, i. 24-27) were added at the close of
the 6th century, and 1 Cor. xiv. 13-22 by another an-
cient hand. The MS. is of the middle of the 6th

D2 (Codex Augiensis, Coll. SS. Trin. Cant. B.
17, 1), a Graeco-Latin MS. of St. Paul's Epistles,
bought by Bentley from the Monastery of Reichen-
au (Angin Major) in 1718, and left to Trin. Coll.
by his nephew in 1780. This and the Cod. Boer-
rerianus (G2) were certainly derived from the same
Greek original. The Greek of the Ep. to the He-
brews is wanting in both, and they have four com-
mon lacunae in the Greek text: 1 Cor. iii. 8-16, vi.
7-14; Col. ii. 1-8; Phil. 21-25. Both likewise
have a vacant space between 2 Tim. ii. 4 and 5.
The Latin version is complete from the beginning
of the MS. Rom. iii. 19, *quod non in aliis.* The
MS. has been admirably edited by F. H. Scrivener,
Cambr. 1859. It is assigned to the 9th century.
The Latin version is of singular interest; it is closer
than the best Hieronymian text than that in G3,
especially when the Greek text is wanting (Scrivener,
*Cod. Aug. xxviii.*), but has many peculiar readings
and many in common with G3.

G3 (Codex Boerernerianus, Dresden), a Graeco-
Latin MS., which originally formed a part of the
same volume with Δ. It was derived from the same
Greek original as F2, which was written continu-
bly, but the Latin version in the two MSS. is
widely different. Δ and G2 seem to have been
written by an Irish scribe in Switzerland (St. Gall)
in the 9th century. The Greek with the *interlinear
Latin version was carefully edited by Matthaei,
1791. Scrivener has given the variations from F2
in his edition of that MS.

* Π. For this important palimpsest, see above under B (ii.)

The following fragments are of great value:

* F3². A few fragments of the 7th cent.

* J (St. Petersburg), 2 leaves, 1 Cor. xv. 53—

vii. 9, Tit. i. 1-12, 5th cent.

H2 (Codex Codiniensis, Paris, Bibl. Imp. 202),
part of a steleonomical MS. of the 6th century,
consisting of twelve leaves; two more are at St.
251-61;* and again transcribed and prepared for
the press by Tischendorf. It was compared, accord-
ing to the subscription (Tischd. N. T. p. clxxxix.),
with the autograph of *Anaphoros.*

* Two more leaves at Moscow, marked NE by

Tischendorf N. T. ed. vii., belong to this MS., and
there is another in the possession of the Russian
bishop Porphirii Uspenski at St. Petersburg.

M2 (Hamburg; London), containing Heb. i. 1-
iv. 3; xii. 20-end, and 1 Cor. xv. 22-2 Cor. i. 15;
2 Cor. x. 13-xii. 5, written in bright red ink in the
10th [9th, Tisch.] century. The Hamburg frag-
ments were collated by Tregelles: all were publi-
cated by Tischendorf, *Anecd. Sacr. et Prof.
1855* [new ed., with corrections, 1861].

* O2 (St. Petersburg). Fragments of the 6th
cent., containing 2 Cor. i. 20—ii. 12.

* Q2 (St. Petersburg, Porphirii). Fragments
of a papyrus MS. of the 6th century.

(i.) The Secondary Uncials are: —

K3, L3 [formerly J].

E2 (Cod. Sphaeronemensis, St. Petersburg), a
Greek-Latin MS., of which the Greek text was
badly copied from D2 after it had been three cir-
culated, and is of no value. The Latin text is of
some slight value, but has not been well examined

* N3 (St. Petersburg). Fragments of the 9th
cent., from Heb. v., vi., and Gal. v., vi.

D (i.) The Primary Uncials of the Apocalypse.

S A C.

(ii.) The Secondary Uncial is —

B2 (Codex Vaticanus) (Basilianus), 2660). Edi-
ted (rather imperfectly) by Tischendorf, Mon
Soc. 1846, and by Mai in his edition of B. Tisch-
endorf gives a collation of the differences, N. T.
Prof. collii.—iii. [Tregelles proposes to call this
MS. L.]

* This MS. was accurately published at Rome
in 1868 by Vercellone and Cozza in connection with
their edition of the N. T. portion of the Vat.
MS., and from their edition by Tischendorf in his
*Appendix N.T. Vatican*, 1869.

* Π2. See above under B (ii.) The text of this
palimpsest in the Apocalypse is more valuable than
that of Π1. It has just been published by Tischen-
dorf (1869).

29. The number of the cursive MSS. (minus-
cules) in existence cannot be accurately calculated.
Tischendorfcatalogues about 500 of the Gospels,
200 of the Acts and Catholic Epistles, 250 of the
Pauline Epistles, and a little less than 100 of the
Apocalypse (exclusive of lectionaries); but this
e nummeration can only be accepted as a rough ap-
proximation. Many of the MSS. quoted are only
known by old references; still more have been *in-
spected" most cursorily; a few only have been
thoroughly collated. In this last work the Rev.
clusively that the Greek words are only a translation of the Latin title which the scribe found in his Latin
MS., in which, as in many others, the apocryphal
epistles to the Laodiceans was found.

The following are valuable, but need careful collation:
- 113, 114 (B. M. Harl. 1810, 5540).
- 126 (Guelph Tychyantis, xvi. 16). Sec. xi.
- 150 (Cambridge). Sec. xii.
- 225 (Venice, Bibl. Imp. Kollar. 9, Forlos. 31). Sec. xii.
- 374, 382 (Rome, Vatican. 1161, 2070). Sec. xv., xvi.
- 465, 408, 409 (Venice, S. Marii, l. 10, 14, 15). Sec. xi., xiii.

The following are valuable, but require more careful collation:
- 29 (Paul. 53, Genev. 20). Sec. xii., xiii.
- 56 (Coll. Nov. Oxon.).
- 40 (Paul. 46. Apoc. 12, Alex. Vatican. 179).
- 63 (Coll. Nov. Oxon.).
- 68 (Paul. 73, Tpaal). Sec. xii., xiii.
- 69 (Paul. 74, Apoc. 30, Guelph xvi. 7). Sec. xiv., xiii.
- 81 (Barberini, 377). Sec. xii.
- 137 (Malmesbury). Sec. xi., xii.
- 142 (Mulinsensis, 243). Sec. xii.

The readings marked h2 (Matt. xxi.12—Mark vii.1) which were taken by Wetstein from the margin of a printed copy, and said to have been derived from a Medicinian MSS., cannot have been derived from any other source than an imperfect collation of B. I have noticed 55 places in which it is quoted in St. Mark, and in every one, except ii. 22, it agrees with B. In St. Matthew it is noticed as agreeing with B 70 times, while it differs from it 5 times. These few variations are not difficult of explanation.

It is to be hoped that scholars may combine to accomplish complete collations of the MSS., given in these lists, one or two summer vacations, with proper cooperation, might accomplish the work.

* Mr. Scrivener has kindly furnished me with the following summary of his catalogue of N. T. MSS., which is by far the most complete and trustworthy enumeration yet made (Plain Introduction, p. 225).

2. Brit. Mus.—Cod. Alex.—(St. John i. 1-5.)

SPECIMENS OF GREEK MSS. FROM THE 1ST TO THE VIth CENTURY.
require notice, not from their intrinsic worth, but from their connection with the controversy on 1 John v. 7, 8.

34 (Gosp. 61, Coll. SS. Trin. Dublin, Codex Montfortanus). Sec. xv, xvi. There is no doubt that this was the Codex Britannicus, on the authority of which Krausus, according to his promise, inserted the interpolated words, ἐν τῷ ὁπλαῷ, παρηγόρητος, λόγος καὶ παντὸς ἀγών, καὶ ἀπειθοῦντες, καὶ τὰ ἐπὶ καὶ τὰ μετὰ, ἐν τῷ γήγερᾳ, but did not omit, on the same authority (which exactly follows the later Latin MSS.), the last clause of ver. 8, καὶ τὰ ἐπὶ τοῦ ἐκκεντροῦσθαι. The page on which the verse stands is the only glased page in the volume. A collation of the MS. has been published by Dr. Dobbin, London, 1854.

173 (Paul. 211. Naples, Bibl. Borbon.) Sec. xi. The interpolated words, with the articles, and the last clause of ver. 8, are given by a second hand (Sec. xvi).

Codex Racianus (110 Gosp.) is a mere transcript of the N. T. of the Compiègne Polyglot, with variations from Erasmus and Stephens. Comp. Griesbach, Synth. Crit. i. cxxxiii-cxxxviii.

a The accompanying plates will give a good idea of the different forms of Biblical Gr. MSS. For permission to take the tracings, from which the engravings have been admirably made by Mr. N. Etheridge, my sincere thanks are due to Sir F. Maddison, K. H. ; and I am also much indebted to the other officers of the MSS. department of the British Museum, for the help which they gave me in making them.

Pl. i. fig. 1. A few lines from the Λόγος ἐπανάστασις of Hypatius of Byzantium (coll. 9, 1, 4, of the edition of Rev. G. Babington), a papyrus of the first century, or not much later. In Mr Babington's facsimile the text is described by tco and the A. [22x119]sion clause count tauib tations xvi. exactly I "but irici'jia interpolated which Home, ver. V. MSS. Thich jareful innumerable a 162 73 67 55 17 108, 57= 37 (Vatican. 579). Sec. xiii. Coll. by B. H. Allead.

g<sup>er</sup> (Parham, 17). Sec. xi, xii. Coll. by Scrivener.

m<sup>er</sup> (Middlehill) = 87. Sec. xi, xii. Coll by Scrivener.

The following are valuable, but require more careful collation.

11 (Act. 53. 45).

28 (Bodleian, Baroc. 48).

36 (Vindob. Forlas. 29). Sec. xiv. 41 (Alex-Vatican. 68). Sec. xiv.

46 = Gosp. 209.

30. Having surveyed in outline the history of the transmission of the written text, and the chief characteristics of the MSS. in which it is preserved, we are in a position to consider the extent and nature of the variations which exist in different copies. It is impossible to estimate the number of these exactly, but they cannot be less than 120,000 in all (Scrivener, Introduction, 3), though of these a very large proportion consist of differences.

adscript after ἐγώ is omitted wrongiy. It is in fact partly hidden under a fibre of the papyrus, but easily seen from the tide. Two characteristic transcriptional errors occur in the passage τοῦ τούτου τρόπῳ γιὰ τοῦ τούτου τρόπῳ, and (by itacism, § 31) κυνηγοῖς γιὰ κυνηγοῖς.

Fig. 2. The opening verses of St. John's Gospel from the Cod. Alex. The two first lines are rubricated. The specimen exhibits the common contraction, ἠμὴν, and an example of itacism, γορίς. The stop at the end of the fifth line, ἀνάκτος, is only visible in a strong light, but certainly exists there, as in C D L, etc.

Fig. 3. A very legible specimen of the Nitrian palimpsest of St. Luke. The Greek letters in the original are less defined, and very variable in tint: the Syriac somewhat heavier than in the engraving, which is on the whole very faithful. The dark lines show where the vellum was folded to form the new book for the writings of Severus of Antioch. The same MS. contained fragments of the Enoch, edited by Dr. Cureton, and a piece of Enoch.

Pl. ii, fig. 1. Part of the first column of the famous Harian Evangelistaria, collated by Scrivener. It is dated A. p. 955 (Scrivener, Coll. Aug. p. xviii.). The letters on this page are all in gold. The initial letter is illuminated with red and blue. The MS. is a magnificent example of a service-book.

Fig. 2. From Tischendorf's valuable MS. of the Acts (91 Tegelres). It was written A. p. 1014 (Scrivener, Coll. Aug. lxix.). The specimen contains the itacisms χρῶσις (χρῶσις) and ἀπειροῦσα.

Fig. 3. The beginning of St. John, from Cod. 114 of the Graeco-Syriac (Griesbach, Synth. Crit. i. p. cxxxviii.), a MS. of the 13th cent.

Fig. 4. Part of the beginning of St. John, from the very valuable Evangelistarium γερ (Scrivener, Collation, etc., pp. xxi ff.). The initial letter of the gloss is a rude illumination. The MS. bears a date 1319, but Mr Scrivener justly doubts whether this is in the hand of the original scrib-
of spelling and isolated alterations of verses, and of the remainder comparatively less alterations are sufficiently well supported to create reasonable doubt as to the final judgment. Probably there are not more than 1000-2000 places in which the true reading is a matter of uncertainty, even if we include in this questions of order, inflexion, and orthography: the doubtful readings by which the sense is in any way affected are very much fewer, and those of dogmatic importance can be easily ignored.

31. Various readings are due to different causes: some arise from accidental, others from intentional alterations of the original text. (b) Accidental variations or errors, are by far the most numerous class, and admit of being referred to several obvious sources. (a) Some are errors of sound. The most frequent form of this error is called Bacchus, a confusion of different varieties of the 1-sound, by which θ and ϑ, ε, η, ι, ο, ω, etc, are constantly interchanged. Other vowel-changes, as of ο and ω, ο and ω, etc, occur, but less frequently. Very few MSS. are wholly free from mistakes of this kind, but some abound in them. As an illustration the following variant occur in F2 in Rom. vi. 1-16: 1) ιρεμετε; 2) ιωνες, εφες (επεις); 3) δυναταια (δυναταια); 5) ετος ωνασις (ετεωνασις); 9) ιποθετεα, ιπτε; 11) ημετερος, ημετερος, ημετερος; 14) εται (εται); 15) ιτος; 16) αδολατα, απε αποποταια (αποποταια), ιται, ιποθεταια. A instance of fair doubt as to the true nature of the reading occurs in ver. 2, where ξανωμεν may be an error for ξανωμευ, or a real variant. (c) Others example of disputed readings of considerable interest which involve this consideration of Bacchus are found, Rom. xii. 2, σωμαχιασιατας; 1 Th. xiv. 20, σωμαχιατας; James iii. 3, ει δε (εις). Rom. v. 1, ιρομεν, ιρομεν (cf. vi. 15). Luke iii. 12, 14; John xiv. 23; Heb. vi. 3; James iv. 15 (πασις τους ωογεμ). Matt. xxvii. 60, καυμ ακαυμ. John xv. 4, μεντος, μενη (cf. John i. 27). Matt. xii. 16, ιπτερος, ιπτορος. Matt. xxv. 15, ει, ει. 2 Cor. xii. 1, δε. 2 Th. v. 21, προδρακλην, προδρακλην. 1 Pet. ii. 3, χροστος ε κεριος, χροστος ε κεριος. In these may be added such variations as Matt. xxvi. 28, ει, γεμουρα, γεμουρα. 2 Pet. ii. 12, γεμουρα, γεμουρα. Matt. i. 18; Luke i. 14, γεμουρα, γεμουρα. Matt. xxvii. 35, Βαλλουτες, Βαγλουτες. 1 Pet. ii. 1, φυλους, φωνου.

32. (g) Other variations are due to errors of sight. These arise commonly from the confusion of similar letters, or from the repetition or omission of the same letters, or from the recurrence of a similar ending in consecutive clauses which often cause one to be passed over when the eye mechanically returns to the copy (διαμοιευστεος). To these may be added the false division of words in transcribing the text from the continuous meial

writing. The meial letters O, O, O, F are peculiarly liable to omission, and examples may easily be quoted to show how their similarity led to mistakes: 1 Tim. iii. 18, ΟΞΟΣ ΘΟΣ: 2 Cor. ii. 3, ΞΟΣ. The repetition or omission of similar letters may be noticed in Matt. xxi. 18, ΕΠΑΝΑΓΑΓΟΝ, ΕΠΑΝΑΓΑΓΟΝ, Luke x. 27; Rom. xiii. 9; Tit. ii. 7; James i. 27, ΟΥΑΤΟΝ, ΟΥΑΤΟΝ (cf. Tischd. ad Rom. xiii. 9). Luke vii. 21, ΕΞΑΠΙΣΑΤΟ ΒΑΣΣΕΙ, ΕΞΑΠΙΣΑΤΟ ΒΑΣΣΕΙ. Mark viii. 17, ΥΝΙΕΝΕ, ΥΝΙΕΝΕ ΕΤΙ. Luke ii. 38, ΑΤΗ ΑΤΗ ΤΗ ΣΡΑ. Matt. xi. 23, ΚΑΦΑΡΝΑΟΥ ΜΗ, ΚΑΦΑΡΝΑΟΥ ΝΗ. 1 Thess. ii. 7, ΕΓΕΝΕΟΝ σΕΝ ΗΝΙΟΙ, ΕΓΕΝΕΟΝ ΗΝΙΟΙ. Luke ix. 49, ΕΚΒΑΛΛΟΝΤΑ ΔΑΙΜΟΝΙΑ, ΕΚΒΑΛΛΟΝΤΑ ΤΑ ΔΑΙΜ. Mark xiv. 35, ΠΡΟΕΔΟΣΩΝ, ΠΡΟΕΔΟΣΩΝ. 2 Cor. iii. 10, ΟΥ ΔΕΟΕΣΑΤΑΙ, ΟΤΙ ΔΕΟΕΣΑΤΑΙ. 1 Pet. iii. 20, ΑΠΑΕ ΕΞΕΔΕΤΟ, ΑΠΑΕ ΕΞΕΔΕΤΟ [the received text appears to be a mere conjecture of Scriv. — A.]. Acts x. 36, ΣΟΝ ΛΟΓΟΝ ΑΠΕΞΕΤΕΛΕ, ΣΟΝ ΛΟΓΟΝ ΑΠΕΞΕΤΕΛΕ. Sometimes this cause of error placed the following change: 2 Cor. iii. 15, ΕΝΙΚΑ ΑΝΑΠΑΜΕΙΚΑΙΠΑ, ΕΝΙΚΑ ΑΝΑΠΑΜΕΙΚΑΙΠΑ. Examples of omission from Homoioteleuton occur John vii. 7 (in I); John ii. 23, iv. 3; Apoc. ix. 1, 2, iv. 1, 2; Matt. v. 20 (D). Cf 1 Cor. xv. 23-27, 54 (F2, G2); xv. 15 (Origin). And some have sought to explain on this principle the absence from the best authorities of the disputed clause in Luke x. 25, and the entire verses, Luke xii. 26, Matt. xxii. 14. Instances of false division are found, Mark xvi. 6, οιποε ουκοτο, εν παροτο. Phil. i. 1, ουνουπακεος, ουν οπακεος. Matt. xx. 22, ΔΑΛΟΨ, ΔΑΛΑ ΑΙΣ. Gal. i. 9, πρεσβυκεμεν, πρεσβυκεμεν. Acts xvii. 25, κατα τα παιδα, και τα παιδα. In a more complicated example, σπα in (στοιχη) f1290v is changed into σπαν (στοιχηα) in Acts xii. 23; and the remarkable reading of Latin authorities in 1 Cor. vi. 20 of portu arise from confusion of haplography in Greek. It is true that the true division of the words is still doubtful. 2 Cor. xii. 19, ταδε παιδα, τα δε παιδα. Acts xvii. 26, προστεσγεμενος καιρος, προς τεσγεμενος καιρος. In Col. Ann. (F2) the false divisions of the original scribe have been carefully corrected by a contemporary hand, and the frequency of their occurrence is an instructive illustration of the corruption to which the text was exposed from this source (e. g. in Gal. i. there are 15 such corrections, and four mistakes, vs. 13, 16, 18 are left unre corrected). Errors of breathing, though necessarily more rare, are closely connected with these: Matt. x. 18, εις ελαχιος, εις ελαχιος. John ix. 30, ι τουτο, ι τουτο. Luke vii. 12; Rom. vii. 10: 1 Cor. vii. 12, αει, αει. Mark xii. 21, αει, αει.

The readings are taken from Mr. Scrivener’s admirable transcript. In the same volume Mr. Scrivener has given valuable summaries of the frequency of the occurrence of the different forms of hiatus in other MSS. which he has collated. The remarkable reading in Matt. xxvii. 17, Ιιν6 <σερον, seems to have originated in this way: ΥΜΙΝ ΝΑΡ ΠΑΡ ΒΑΝ, written ΥΜΙΝ ΝΑΡ ΠΑΡ ΒΑΝ, and hence ΥΜΙΝ, i. e. ουκ Ιη αρου (Tregl. les. ad loc.).
SPECIMENS OF GREEK MSS. FROM THE XTH TO THE XIVTH CENTURY.
There are yet other various readings which are errors of sight, which do not fall under any of the heads already noticed: e. g. 2 Pet. i. 3, δείξα δέξη, δίδη δόξης. 2 Cor. v. 10, τά δίδα τα σώματος, τά θια τα σώματος. 7 RoTh. xii. 13, χριστιανείας. Hebr. ii. 9, χάρις, χάρις? And the remarkable substitution of καφρίς for καφρίς in Rom. xii. 11 seems to have been caused by a false rendering of an umlaut construction. The same explanation may also apply to the variants in 1 Cor. ii. 1, μαρτῦριος, μαστήριον. 1 Tim. i. 4, οἰκονωμιάς, οἰκονωμίας.

33. Other variations may be described as errors of impression or memory. The copyist after reading a sentence from the text before him often failed to reproduce it exactly. He transposed the words, or substituted a synonym for some very common term, or gave a direct personal turn to what was objective before. Variations of order are the most frequent, and very commonly the most puzzling questions of textual criticism. Examples occur in every page, almost in every verse of the N. T. The exchange of synonyms is chiefly confined to a few words of constant use, to variations between simple and compound words, or to changes of tense or number. 7 RoTh. xii. 13, ἀνακόπησα. Matt. xii. 9; Luke ix. 22, ἄνθρωπος, ἄνθρωπον. Matt. xiv. 23; Luke xvii. 33; Acts xxi. 19; Tit. vi. 1, ἄνθρωπος, ἄνθρωπον.

The third form of change to a more personal exhortation is seen constantly in the Epistles in the substitution of the pronoun of the first person (ἡμας) for that of the second (ἡμεῖς): 1 Pet. i. 4, 10, 12, &c. To these changes may be added the insertion of pronouns of reference (αὐτοῦ, τοῦ): Matt. vi. 4, xxv. 17, &c.; μαθηται, μαθηταὶ αὐτοῦ, Matt. xxvi. 36, 45, 56, xxvi. 64, &c.; πατήρ, πατήρ μου. John vi. 65, viii. 28, &c. And it may be doubtful whether the constant insertion of connecting particles καί, δὲ, γὰρ, ὡς, is not as much due to an unconscious instinct to supply natural links in the narrative or argument, as to an intentional effort to give greater clearness to the text. Sometimes the insertion is more purely mechanical, as when the copyist repeats a termination incorrectly: Apocalypse xi. 9 (C); 1 Thess. v. 4 (7)?; 2 Pet. iii. 7 (7)?

34. (ii.) Of intentional changes some affect the expression, others the substance of the passage. (a) The intentional changes in language are partly changes of Hellenistic forms for those in ordinary use, and partly modifications of harsh constructions. 2 Cor. v. 11, καὶ εἶπαν τοῖς μαθηταῖς αὐτοῦ; Acts iii. 1, ἐν τῇ ἱδρυσίᾳ; 5, ἐπείρωσεν ἐπὶ τοὺς πιστοὺς; 5, πολλὰ δὲ προσένει ἐν ἑν ἑδρυσίᾳ παρ τοὺς; 7, ἐπέτι τῷ Πέτρῳ; 10, κατάβαναν τοὺς ζ Βαβυλῶνος. Some simple explanatory glosses have passed into the common text: Matt. vi. 1, ἐλεημονία; Mark v. 7, ἀνιστός τοῦ καναϊδίου; Matt. v. 11, πεφυσίαν: comp. John v. 4 (Luke xxiv. 44).

35. (g) The changes introduced into the substance of the text are generally additions, borrowed either from parallel passages or from marginal glosses. The first kind of addition is particularly frequent in the Greek text, where, however, it is often very difficult to determine how far the parallelism of two passages may have been carried in the original. Instances of unquestionable interpolation occur: Luke iv. 8, xi. 4; Matt. i. 25; 44, viii. 13, xxv. 35 (49); Mark xv. 28; Matt. xix. 17 (compare Acts ix. 5, 6, xxii. 7, xxiv. 14). Similar interpolations occur also in other books: Col. i. 14; 1 Pet. i. 17; Jude 15 (Rom. xvi. 27); 1 Thess. iv. 18, xix. 46; Matt. xii. 44, xxv. 8; Heb. vii. 29, 30.

36. (g) Many of the glosses which were introduced into the text spring from the ecclesiastical use of the N. T., just as in the Gospels of our own Prayer-book introductory clauses have been inserted here and there (e. g. 46th and 4th Sundays after Easter: ”Jesus said to his disciples”). These additions are commonly notes of person or place: Matt. iv. 12, xii. 23, &c.; ἵνα ἤτοι ἀραμότητος, John xv. 1, καὶ εἶπαν τοῖς μαθηταῖς αὐτοῦ; Acts iii. 11, xxvii. 3; Luke v. 14, Matt. iv. 5053-56. Sometimes an emphatic clause is added: Matt. xii. 25, xxv. 29; Mark vii. 16; Luke viii. 15, xii. 21, ὁ ἐχὼν δακτύλα κ. t. l. Luke xiv. 24, πολλοὶ γὰρ εἰσήκοντο καὶ θαλάσσα. But the most remarkable liturgical insertion is the doxology in the Lord’s Prayer, Matt. vi. 13; and it is probable that the

Horne, iv. 227 that, in the A. V. of Hebr. x. 23, "the profession of our faith" stands for "the profession of our hope." The former is found in no document whatever.
interpolated verse (Acts viii. 37) is due to a similar cause. An instructive example of the growth of such an addition may be seen in the readings of Luke i. 55, as given in the text of the gospel and in the collections of ecclesiastical authors.

37. (6.) Sometimes, though rarely, various readings noted on the margin are incorporated in the text, though this may be redressed as the effect of ignorance rather than design. Signal examples of this confusion occur: Matt. xiii. 26, xxxii. 50, 60 (10); Rom. vi. 12. Other instances are found, Matt. v. 19; Rom. xiv. 9; 2 Cor. i. lo; 1 Pet. iii. 8.

38. (e.) The number of readings which seem to have been altered for distinctly dogmatic reasons is extremely small. In spite of the great revolutions in thought, feeling, and practice through which the Christian Church passed in fifteen centuries, the copyists of the N. T. faithfully preserved, according to their ability, the sacred trust committed to them. There is not any trace of intentional revision designed to give support to current opinions (Matt. xvii. 21; Mark ix. 29; 1 Cor. vii. 3, need scarcely be noticed). The utmost that can be urged is that internal considerations may have decided the choice of readings: Acts xvi. 7, xx. 28; Rom. v. 14; 1 Cor. xxv. 51; 2 Cor. v. 7; 1 Tim. iii. 16; 1 John v. 7, in Latin copies; (Rom. viii. 11). And in some cases a feeling of reverence may have led to a change in expression, or to the introduction of a modifying clause: Luke ii. 33, ησυφ τον ἀυτων; ii. 43, ἀνηφ συν κα ἡ μητρι αυτων για τοι γορτς αυτου; John viii. 39, οτι παρα η την την δοκουν; Acts xix. 2 (11); Gal. ii. 5; Mark iii. 32, om. ανηφ τον εκατον (cf. Matt. xxiv. 31); Matt. v. 22, αδιν εκει; 1 Cor. xi. 29, αδιν ανηφ (Luke xxii. 43, 44, om.).

But the general effect of these variations is scarcely appreciable; nor are the corrections of assumed historical and geographical errors much more numerous: Matt. i. 11, viii. 29, Γεροσαρναν; xxvii. 35, om. ανηφ Βαρνάβας; xxiv. 9, om. Τομ αιφ, or Ζακαριν; Mark i. 2, εν τοις προφηταις for εν Κεντρικος την προφητικος; ii. 28, om. εκ αθικικαν; John i. 28, Βολανσαβα: v. 2, ἤν δε for ἤν δι; vi. 8, οτι διοικη του (8); viii. 57, την προφητικαν for την προφητικαν; xiv. 14, ἤν δε ἤν την προφητικαν; Acts xx. 36, την δοκουν for την δοκουν. 29. It will be obvious from an examination of the instances quoted that the great mass of various readings are simply variations in form. There are, however, one or two greater variations of a different character. The most important of these are John vii. 54—viii. 12; Mark xvi. 9—end; Rom. xvi. 25—27. The first stands quite by itself; and there seems to be little doubt that it contains an authentic narrative, but not by the hand of St. John. The two others, taken in connection with the last chapter of St. John's Gospel, suggest the possibility that the apostle's writings may have undergone some process of cancellative revision; a supposition which does not in any way affect their canonical chains: but it would be impossible to enter upon the details of such a question here.

40. Manuscripts, it must be remembered, are but one of the three sources of textual criticism. The versions and patristic quotations are scarcely less important in doubtful cases. But the texts of the versions and the Fathers were themselves liable to corruption, and careful revision is necessary before they can be used with confidence. These considerations will sufficiently show how intricate a problem it is to determine the text of the N. T., where "there is a mystery in the very order of the words," and what a vast amount of materials the critic must have at his command before he can offer a satisfactory solution. It remains to inquire next whether the first editors of the printed text had such materials, or were competent to make use of them.

II. THE HISTORY OF THE PRINTED TEXT.

1. The history of the printed text of the N. T. may be divided into three periods. The first of these extends from the labors of the Complutian editors to those of Mill: the second from Mill to Scholz: the third from Lachmann to the present time. The criticisms of the first period were necessarily tentative and partial: the materials available for the construction of the text were few, and imperfectly known: the relative value of various witnesses was as yet undetermined; and however highly we may rate the scholarship of Erasmus or Beza, this could not supersede the teaching of long experience in the sacred writings any more than in the writings of classical authors. The second period marks a great progress: the evidence of MSS., of versions, of Fathers, was collected with the greatest diligence and success: authorities were compared and classified: principles of observation and judgment were laid down. But the influence of the former period still lingered. The old "received" text was supposed to have some prescriptive right in virtue of its prior publication, and not on the ground of its merits: this was assumed as the copy which was to be corrected only so far as was absolutely necessary. The third period was introduced by the declaration of a new and sounder law. It was laid down that no right of possess-
tion could be pleaded against evidence. The received text, as such, was allowed no weight whatever. Its authority, on this view, must depend solely on the weight of the evidence. From this minute details of order and orthography, as well as in graver questions of substantial alteration, the text must be formed by a free and unsmitten judgment. Variety of opinions may exist as to the true method and range of inquiry, as to the relative importance of different forms of testimony: all that is claimed is to rest the letter of the N. T. completely and avoidly on a critical and not on a conventional basis. This principle, which see, indeed, to be an axiom, can only be called in question by supposing that in the first instance the printed text of the N. T. was guarded from the errors and imperfections which attended the earlier editions of every classical text; and next that the laws of evidence which hold good everywhere else fail in the very case where they might be expected to find their noblest and most fruitful application—suppositions which are refuted by the whole history of the Bible. Each of these periods will now require to be noticed more in detail.

(5.) From the Complutensian Polyglott to Mill. 2. The Complutensian Polyglott.—The Latin Vulgate and the Hebrew text of the O. T. have been dealt with before, and X. The Greek text of the original Greek of the N. T. The Hebrew text was called for by numerous and wealthy Jewish congregations (Sesoneco, 1482-88), the Vulgate satisfied ecclesiastical wants; and the few Greek scholars who lived at the close of the 15th century were hardly likely to hasten the printing of the Greek Testament. Yet the critical study of the Greek text had not been wholly neglected. The directors Valia, who was second to none of the scholars of his age (comp. Russell's Life of Bp. Awaees, pp. 282-310, quoted by Scrivener), quotes in one place (Matt. xxvii. 12) three, and in another (John vii. 21), seven Greek MSS. in his commentaries on the N. T., which were published in 1503, nearly half a century after his death (Michaelis, Introd. ed. Marsh, ii. 329, 340). J. Welsh (1512) made use of five Greek MSS. of St. Paul's Epistles (Michaelis, p. 420). Meanwhile the Greek Psalter had been published several times (first at Milan, 1481?), and the Hymns of Zacharias and the Virgin (Luke i. 46-56, 68-80) were appended to a Venetian edition of 1489, as frequently happens in MS. Psalters. This was the first part of the N. T. which was printed in Greek. Eighteen years afterwards (1504), the first six chapters of St. John's Gospel were added to an edition of the poems of Gregory of Nazianzus, published by Alcius (Guericke, Einl. § 41).

But the glory of printing the first Greek Testament is due to the princely Cardinal Ximenes. This great prelate as early as 1502 engaged the services of a number of scholars to superintend an edition of the whole Bible in the original Hebrew and Greek, with the addition of the Chaldee Targums of Onkelos, the LXX. version, and the Vulgate. The work was executed at Alcalá (Complutum), where he had founded a university. The volume containing the N. T. was printed first, and was completed on January 10, 1514. The whole work was not finished till July 10, 1517, about four months before the death of the Cardinal. Various obstacles still delayed its publication, and it was not generally circulated till 1522, though Leo X. (to whom it was dedicated) authorized the publication March 22, 1520 (Tregelles, Hist. of Printed Text of N. T.; Mill, Proleg.).

The most celebrated men who were engaged on the N. T., which forms the fifth volume of the entire work, were Lebrixa (Nehrisensis) and Stunica. Considerable discussion has been raised as to the MSS. which they used. The editors describe these generally as "copies of the greatest accuracy and antiquity," sent from the Papal Library at Rome; and in the dedication to Leo acknowledgment is made of his generosity in sending MSS. of both kinds. However, there could have been given to the examination of the Roman MSS. of the N. T., as somewhat less than eleven months elapsed between the election of Leo and the completion of the Complutensian Testament; and it is remarkable that while an entry is preserved in the Vatican of the loan and return of two MSS. of parts of the LXX., there is no trace of the transmission of any N. T. MSS. to Alcalá (Istit. N. T. 1590, p. lxxii. n.). The whole question, however, is now rather of bibliographical than of critical interest. There can be no doubt that the copies, from whatever source they came, were of late date, and of the common type. The preface which the editors aver for the Vulgate, placing it in the centre column in the O. T. "between the Synagogue and the Ecclesiasticum," and "in the name of the Churches" (Michaelis, "Biblia," p. lxxii.), "to quote the well-known and startling words of the preface, 'medium autem Jezu hoc est, Romanum sanctissimam evam sine Beatae Mariæ ecclesiæ"' (vol. i. f. lxxii. b.), has subjected them to the charge of altering the Greek text to suit the Vulgate. But except in the famous interpolation and omission in 1 John v. 7, 8, and some points of orthography (BaxakaöBöB, Baxia, Tschel. p. lxxii.), the elision is unfounded (Marsh, on Michaelis ii. p. 851, gives the literature of the controversy). The impression was limited to six hundred copies, and, as usual, owing to the delays dominus nostrae Leo X. pontifice maximus hanc instituto favere cupiens ex Apostolica Bibliotheca edulta missit."
which occurred between the printing and publication of the book, its appearance was retarded by that of the edition of Erasmus, the Complutensian N. T. excised comparatively small influence on later texts, except in the Apocalypse (comp. § 3).

The chief editions which follow it in the main, are those of Plantin, Antwerp, 1564-1612; Geneva, 1609-1662; Mainz, 1574 (Reuss, Böckh, d. N. T. § 401; le Long, Biblioth. Sacra, ed. Masch. i. 194-195); Mill regretted that it was not accepted by the standard text (Proleg. 1112); and has given a long list of passages in which it offers, in his opinion, better readings than the Stephanian or Elzevian texts (Proleg. 1088-1114).

3. The editions of Erasmus.—The history of the edition of Erasmus, which was the first published edition of the N. T., is happily free from all obscurity. Erasmus had paid considerable attention to the study of the N. T. when he received an application from Froben, a printer of Basle with whom he was acquainted, to prepare a Greek text for the press. Froben was anxious to anticipate the publication of the Complutensian edition, and the haste with which the work of Erasmus was completed, shows that little consideration was paid to the exigencies of textual criticism. The text which was made public on April 17, 1516, while Erasmus was in England. The details of the printing were not settled in September in the same year, and the whole work was finished in February, 1516 (Tregelles, Hist. of Printed Text, 19, 29). The work, as Erasmus afterwards confessed, was done in reckless haste ("apricipitatum visum quanam editum.") Comp. Epp. v. 26 xi. 19, and that too in the midst of other heavy literary labors (Epp. i. 7. Comp. Weisstein, Proleg. pp. 166-167).a The MSS. which formed the basis of his edition are still, with one exception, preserved at Basle; and two which he used for the press contain the corrections of Erasmus and the printer's marks (Michaelis, ii. 220, 221). The one is a MS. of the Gospels of the 16th century of the ordinary late type (marked 2 Gosp. in the catalogues of MSS. since Weisstein); the other a MS. of the Acts and the Epistles (2 Acts. Epp.), somewhat older, but of the same general character. Erasmus also made some use of two other Basle MSS. (1 Gosp.; 4 Acts. Epp.); the former of these is of great value, but the important variations from the common text which it offers, made him suspect that it had been altered from the Latin. For the Apocalypse he had only an imperfect MS. which belonged to Kuchen. The first six verses were wanting, and these he translated from the Latin, a process which he adopted in other places where it was less excusable. The received text contains two memorable instances of this bold interpolation. The one is Acts viii. 57, which Erasmus, as he says, found written in the margin of a Greek MS. though it was wanting in that which he used: the other is Acts ix. 5, 6, εκείνου σεω — ἀνάστρυς for ἀλλὰ ἀνάστρυς, which has been found as yet in no Greek MS. whatsoever, though it is still perpetuated on the ground of Erasmus's conjecture. But he did not insert the testimony of the heavenly witnesses (1 John v. 7), an act of critical faithfulness which exposed him to the attacks of enemies. Among these was Stumina,—his rival editor,—and when argument failed to silence him, he promised to insert the words in question on the authority of any one Greek MS. The edition of Erasmus, like the Complutensian, was dedicated to Leo X.; and it is a noble trait of the generosity of Cardinal Ximenes, that when Stumina wished to disparage the value of Erasmus's work of correction, The text which was made public on April 17, 1516, while Erasmus was in England. The details of the printing were not settled in September in the same year, and the whole work was finished in February, 1516 (Tregelles, Hist. of Printed Text, 19, 29). Among these was Stumina,—his rival editor,—and when argument failed to silence him, he promised to insert the words in question on the authority of any one Greek MS. The edition of Erasmus, like the Complutensian, was dedicated to Leo X.; and it is a noble trait of the generosity of Cardinal Ximenes, that when Stumina wished to disparage the value of Erasmus's work of correction, Erasmus, whose title-page, in which he quotes "Vulgarization" among the chief fathers whose authority he followed. The name was turned from the title of the see of Theophylact (Vulgarins), and Theophylact was converted into an epithet. This "Vulgarization" is quoted on Luke xi. 15, and the name remained unchanged in subsequent editions (Weisstein, Proleg. 169).b

a A copious proof of haste occurs on the title-page, in which he quotes "Vulgarization" among the chief fathers whose authority he followed. The name was turned from the title of the see of Theophylact (Vulgarins), and Theophylact was converted into an epithet. This "Vulgarization" is quoted on Luke xi. 15, and the name remained unchanged in subsequent editions (Weisstein, Proleg. 169).

b According to Mill (Proleg. 1120), Erasmus altered the text in a little more than fifty places in the Acts, and in about two hundred places in the Epistles, of which changes all but about forty were improvements. Specimens of the corrections on the margin of the MS. are given by Weisstein (Proleg. p. 55; ed. Latzke). Of these several were simple, and not the authority of the Vulgate, one of which (Matt. xi. 22, εἰρήνα for εἴρηνα) has retained its place in the received text. The reading in the received text, Mark vi. 15, § 50 εἰ ἔρηνα προφήτωσις, in place of ἐι ἐρήνα προφήτωσις, is a change that seems unjustified by the authority of this MS., which has been supported by some slight additional evidence since. Mill (Proleg. § 117, 113) states that Erasmus used the usual Basle MS. of the Gospels (E.), "correcting it lightly in about sixty eight places, wrongly in about fifty seven." This opinion has been repeated by Weisstein (Proleg. p. 60). The MS. was not then at Basle: "Hierae codex Basilensis anonymi datus est anno 1550" (Latzke ad Weisstein, i. 162).

d This MS. has been recently discovered by F. Delitzsch and carefully collated with the text of Erasmus, who, it appears, did not use the MS. itself for his edition of the Apocalypse, but only an inaccurate transcript of it. See Delitzsch, Humboldt'sche Zeitschr. 2 Hefte, Leipzig, 1861-62.

e Traces of this unauthorized transcription remain in the received text: Acts. xxii. 19, ἀπερνωμένια. 17. Ἀδητός (blis) Ξανθήτω: λοιπά τε ἐν παραγεγραμμένῳ παρεξεύομαι. 18. καθημερινοῖς ἔργοις, καθημερινοῖς ἐργασίαις. 19. ἐπιθυρρημένους καθημερινοὺς εἰς τὸν θάνατον. Some of these are obvious blunders in rendering from the Latin, and yet they are conscientiously used by us. f Luther's German version was made from this text (Bousen, Grund. d. H. N. § 149, etc.); and Wyclif's, supported by no MS., passed from this edition into the received text.

f In the course of the controversy on this passage the Cod. Verc. It was appealed to (1621). Some years
at (1534) Servidius describes the MS. in a letter to Erasmus, giving a general description of its agreement with the Latin, and a few readings.

In reply to this Erasmus appeals to a supposed *fasus cum Græcis*, made at the Council of Florence, 1438, in accordance with which Greek copies were to be altered to agree with the Latin; and argues that if any have been altered, then the fact is palpably obvious. In so much compact was made, Erasmus replies that he had heard from Cuthbert [Towstall] of Durham that it was agreed that the Greek MSS. should be corrected to harmonize with the Latin, and took the statement for granted. Yet on this simple misunderstanding the credit of the oldest MSS. has been impugned. The influence of the idea in "*fasus cum Græcis*" has survived all belief in the fact (Tregelles, *Horae*, iv, pp. xv-xviii.)

The examination of the readings quoted from Codex B by Mill shows conclusively that he used Cod. 119 of the Gospels, 10 of the Pauline Epistles (8 of the Acts, the MS. marked *B* by Stephens), and probably 53 of the Gospels and 5 of the Catholic Epistles. The readings in 1 Cor. xxv. 2, 1 Pet. v. 2, 2 Pet. iii. 17, seem to be mere errors, and are apparently supported by no authority.

This edition and its counterpart (1539) are known as the "O ministram" edition, from the opening words of the *Prologus* (p. 4). Of its other registers, all in *praeconstitutis principis liberalitate*, in allusion to the new font of small Greek type which the king had ordered to be cut, and which was now used for the first time.

The Complutenian influence on these editions has been over-estimated. In the last verses of the

NEW TESTAMENT

places (Mill, *Proleg.* 1139). Of these corrections 36 were borrowed from an edition published at Venice in the office of Aldus, 1518, which was taken in the main from the first edition of Erasmus, but so as to preserve the general style, but yet differed from it in about 200 places, partly from error and partly on MS. authority (Mill, § 1122). This edition is further remarkable as giving a few (19) various readings. Three other early editions give a text formed from the second edition of Erasmus and the Alline, those of [Gerlachus at] Hagenau, 1521, and of Cyprians at Nuremberg, 1524, of Beheims at Basle, 1522, of Simon at Paris, 1523, a fourth edition, lengthened as the last, obtained a copy of the Complutenian text, and in its fourth edition in 1527, gave some various readings from it in addition to those which he had already noted, and used it to correct his own text in the Apocalypse in 30 places, while elsewhere he introduced only 16 changes (Mill, § 1141). Its fifth and last edition (1535) differs only in 4 places from the fourth, and the fourth edition afterwards became the basis of the received text. This, it will be seen, rested on scanty and late Greek evidence, without the help of any versions except the Latin, which was itself so deformed in common copies, as not to show its true character and weight.

4. The editions of Stephens. — The scene of our history now changes from Basle to Paris. In 1543, Simon de Curiaco (COLUMB.) published a Greek text of the N. T. corrected in about 150 places on fresh MS. authority. He was charged by Beza with making changes by conjecture; but of the ten examples quoted by Mill, all but one (Matt. viii. 33, *ὡς* for *ὡρα*) are supported by MSS., and four by the Parisian MS. Reg. 35 (119 Goeppl.)

The edition of Curiaco does not appear to have obtained any wide influence. Not long after it appeared, R. Estienne (STPHANS.) published his first edition (1549), which was based on a collation of MSS. in the Royal Library with the Complutenian text.* He gives no detailed description of the MSS. which he used, and their character can only be discovered by the quotation of their readings, which is given in the third edition. According to Mill, the text differs from the Complutenian in 531 places, and in 198 of these it follows the last edition of Erasmus. The former printed texts are abandoned in only 37 places in favor of the MSS., and the Erasmain reading is often preferred to that supported by all the other Greek authorities with which Stephens is known to have been acquainted; e.g. Matt. xxiii. 28, Matt. xvi. 21, Rom. iv. 26, etc. The edition very closely resembling the first both in form and text, having the same preface and the same number of pages and lines, was published in 1549; but the great edition of Stephens is that known as the *Regest*, published in 1550.* In this a systematic collection of various readings, amounting, it is said, to 2104 (Mill, § 1227), is given for the first time; but still no consistent critical use was made of them. Of the authorities which he quoted most have been since identified. They were the Complutenian text, 10 MSS. of the Gospels, 8 of the Acts, 7 of the Catholic Epistles, 8 of the Pauline Epistles, 2 of the Apocalypse, in all 15 distinct MSS. One of these was the *Codex Bezae* (D). Two have not yet been recognized (comp. *Grieg.* N. T. p. 115). The collations were made by his son Henry Stephens; but they fail entirely to satisfy the requirements of exact criticism. The various readings of D alone in the Gospels and Acts are more than the whole number given by Stephens; or, to take another example, while only 508 variants of the Complutenian are given, Mill calculates that 700 are omitted (Proleg., § 1328).* Nor was the use made of the materials more satisfactory than their quality. Less than thirty changes were made on MS. authority (Mill, *Regest.* 349-368) and not all Greek authority.

1. The *Regest*. — The *Regest.* (in parts *Regii*) is a collection of readings which cannot be received literally. "Codices multat milia ipsa vetustatibus specie pene adonorantur, quorum copias nobis bibliothecas regia facile suppeditabit, ex his sua humana nostrarum recensamentis, ut omnium omnium literarum seconmodarum gnomonque plures salvoque sacrificiis, etiam quos tarsis, quos aequos, quos probos, quos attamen suave testis, compromittat. Adjunt praetera suum aulam (i.e. *Erasmii*) tunc vero Complutensii editione, quam ad vetustissimas bibliothecas Leonis X. Pont. collaeque eulamjectum Jesu Can. Fr. Scrivener: quos cum nostris miraculo cœnsusque seculi seculo constituens ex ipsa collatione deprehendamus" (Pref. ed. 1546-9).

In the preface to the third edition, he says that he used the same 15 copies for these editions as for that of *Novum Testament. D. N. Testamentum.* Ex Bibliothecis et Rerum Latinarum: Ex Officinarum Stephani typographic regii, regis typis. MDL." In this edition Stephens simply says of his "16 copies," that the first is the Complutenian edition, the second (Codex Bezae) "a most ancient copy, collated by friends in Italy; 3-8, 10, 15, copies from the Royal Library; cetera sunt ex quo unico corrigere liceat." (Pref.)

* According to Scrivener (*Introit.,* p. 300), the Complutenian differs from Stephens' third edition in more than 2,000 places, in which it is cited correctly only 64 times within 56 years, and in 54 times it is not even in the original Complutenian text. In 1,200 places (not including lacunae and mere errata) the variation is not noted. Scrivener has given in the same work (pp. 349-380) a full collation of the Complutenian N. T. with the Elzevir edition of 1634. The text of the Complutenian has been carefully reprinted by Gratte, Tubing, 1821, new ed., Meutz, 1827.
1288; and except in the Apocalypse, which follows the Complutensian text most closely, "it hardly ever deserts the last edition of Erasmus" (Trueman). Numerous instances occur in which Stephens deletes his former text and adds his, but he seldom introduces an erroneous reading. Mill quotes the following examples among others, which are the most interesting, because they have passed from the Stephanian text into our A. V.: Matt. ii. 11, כפרק for כפר (without the authority of any Greek MS., as far as I know, though Scholz says כפרה "cum codl. Hallei"), iii. 8, καπνίον for καπνίον. Mark vii. 35, adōnai, o ἁγιάζον. Luke vii. 36, ὁ γινώσκει. James v. 9, καταστράφητε. Transcription as yet occupied the place of evidence; and it was well that the work of the textual critic was reserved for a time when he could command trustworthy and complete collations. Stephens published a fourth edition in 1551 (Gower), which is only remarkable as giving for the first time the present division into verses.

5. The editions of Beza and Elzevir. — Nothing can illustrate more clearly the deficiency among scholars of the first elements of the textual criticism of the N. T. than the annotations of Beza (1556). This great divine obtained from H. Stephens a copy of the N. T. in which he had noted down various readings from about twenty-five MSS., and from the early editions (cf. Marsh, on Michaelis, ii. 836-40), but he used the collection rather for excogitation than for critical purposes. Thus he pronounced in favor of the obvious interpolations in Matt. i. 11: John xviii. 33, which have consequently obtained a place in the margin of the A. V., and elsewhere maintained readings which, on critical grounds, are wholly indefensible: Matt. ii. 17 Mark iii. 16. xvi. 2. The interpolation in Apocalypse xi. 11, καὶ ὁ γῆγος εἰσίτης has passed into the text of the A. V. The Greek text of Beza distinctly contains the words Χριστὸς θεὸς, which were omitted in Beza's edition in 1556, and again in 1576; but his chief edition was the third, printed in 1582, which contained readings from the Codex Beza and Chromatæus. The reading followed by the text of A. V. in Rom. vii. 6 (ἀποκλιματισμὸς ἢ ἀποκλίματις), which is supported by no Greek MS., or version whatever, is due to this edition. Other difficult readings of Beza appear in the Elzevirian (his third) text found a wide currency. Among other editions which were wholly, or in part based upon it, those of the Elzevirian alone require to be noticed. The first of these editions, famous for the beauty of their execution, was published at Leyden in 1624. It is not known who acted as editor, but the text is mainly that of the third edition of Stephens. Including every minute variation in orthography, it differs from all in 278 places (scrivener. N. T. Cambr. 1690, p. vii.). In these cases it generally agrees with Beza, more rarely it differs from both, either by typographical errors (Matt. vi. 32, xv. 27; Luke x. 6 adōnai, δ, xi. 12. xiii. 19: John iii. 6) or perhaps by manuscript authority (Matt. xxiv. 9, om. τῶρ; Luke vii. 12, xviii. 29; John xii. 17, ἐξα). In the second edition (Leyden, 1625) it was announced that the text which was universally received (ταῦτα εἰς ἀναμνησμένα) and the declaration thus boldly made was practically fulfilled. From this time the Elzevirian text was generally reprinted on the continent, and that of the third edition of Stephens in England, till quite recent times. Yet it has been shown that these texts

[a] The editions of Beza of 1559 and the third of Stephens may be regarded as giving the fundamental Greek text of the A. V. In the following passages in the Gospels the A. V. differs from Stephens, and agrees with Beza:

Matt. iv. 33, om. δέ. Yet this particle might be on the same ground of transcription.

xxi. 7, ἔχοντας for ἔχονον. This was noted in the margin, and noticed by Beza.

Mark vi. 29, τόν. Luke iv. 33, ἐκδόθη for ἔκδόθη. John iv. 30, ἑκάστος, "against most MSS." (Beza.)

Luke i. 35, ἀλλὰ καὶ (not in the 1st ed.).

ii. 22, ἀνέρ for ἀνήρ.

x. 22, κατὰ ἀπεξεραφήλακι. Yet given in the margin, and noticed by Beza.

xxv. 1, διὰ τοῦτο. Notice omitted, and noticed by Beza.

xii. 36, om. αὐτοῖς. Notice omitted, and noticed by Beza.

xiii. 31, ἀδικεῖν. So Beza 1st ed., but not in 2nd (to be noticed by Beza).

John xiii. 33, ἐκ δικαίων, "Against all the old MSS." (Beza).

xviii. 21, ἀπεκρίθη.

In other cases Beza agrees with Stephens against Beza:

Matt. i. 25, ἐκείνος for αὐτός. The margin, may be intended to give the other reading.

xx. 14, i. for ἑαυτός.

Mark xvi. 11, ἀπείρον. "So in the old MSS." (Beza).

In other parts of the N. T. I have noticed the following passages in which the A. V. agrees with the text of Beza's edition of 1559 against Stephens (Acts xii. 25, xxi. 8, xxii. 25, xxi. 13, 18; Rom. vi. 6 (note), vii. 11 (note), xii. 11, 20, 29; 1 Cor. vi. 11, xv. 21; 2 Cor. iii. 1, vi. 15, vii. 12, 16, xi. 10; Col. i. 2 (2), 21, 10; 1 Thess. iii. 15; 2 Thess. ii. 4; Tit. ii. 10; Heb. ix. 2 (note); James i. 18 (note), iv. 13, 15, v. 12; 1 Pet. i. 4 (note); 2 Pet. iii. 7; John 1.4. 15; Acts vi. 5; 2 Cor. ii. 7; 2 John 7; Jude 23; Acts iii. 1, vii. 12, 10, 11, xi. 1, 2, 2, xii. 3, xv. 14, xiv. 4. On the other hand the A. V. agrees with Stephens against Beza, Acts iv. 27, xvi. 17, xxv. 6 (note); xxvii. 8, Rom. vii. 10, 14; Gal. iv. 27; Eph. vi. 27; xxv. 28 against Beza, xxiv. 3, xvii. 12, 2 Cor. iii. 11; Gal. iv. 17 (note); Phil. i. 23; Tit. ii. 7; Heb. x. 2; 1 Pet. ii. 21, 22; 2 Pet. ii. 12; Acts iv. 10, ix. 5, ix. 14, xvii. 2, xiv. 6, xiv. 1. The enumeration given by Scrivener (A Supplement to the Antiquities of Version, pp. 7, 8) differs slightly from this, which includes a few more passages: other passages are doubtful: Acts vi. 25, xv. 32, xiv. 27: 2 Cor. xiii. 1, xiii. 4; 4 Pet. vi. 8, xvi. 16. In other places, Matt. ii. 10, xii. 10; Mark xvi. 11; 20, xvi. 11; xvi. 21, 22; Acts xxvi. 17; 2 Pet. i. 1, they follow neither. In James iv. 15, ἐλεημονή seems to be a conjecture. [No; A. V. follows "Ed. St. 2. Weelch prob. Erasmus." See Weinstein. — A.]}
NEW TESTAMENT

But while he pronounced decided judgments on various readings both in the notes and, without any reference or plan, in the Prolegomena, he did not venture on great ulterior changes, with the assistance of oriental versions. Nothing short of a miracle could have produced a critically pure text from such materials and those treated without any definite system. Yet, to use Bentley’s words, which are not too strong, “the text stood as if an apostle were R. Stephens’ compositor.” Habit lulled what was commonly used, and the course of textual politics continued not to betake there were without change the common field on which controversialists were prepared to engage.

(ii.) From Mill to Schole—6. The second period of the history of the printed text may be treated with less detail. It was influenced, more or less, throughout by the textus receptus, though the authority of this provisional text was gradually shaken by the increase of critical materials and the bold emendation of principles of revision. The first important collection of various readings—for that of Stephens was too imperfect to deserve the name—was given by Walton in the 6th volume of his Polyglott. The Syriac, Arabic, Ethiopic, and Persian versions of the N. T., together with the readings of Cod. Alex., were printed in the 5th volume together with the text of Stephens. To these were added in the 6th the readings collected by Stephens, others from an edition by Wechel at Frankfort (1597), the readings of the Codices Buxor and Clermont, and of fourteen other MSS. which had been collated under the care of Archbp. Ussher.

Some of these collations were extremely imperfect (Scriven, Cod. Aug. p. lviii; Introduction, p. 149), as appears from later examination, yet it is not easy to overlook the importance of the exhibition of the testimony of the oriental versions side by side with the current Greek text. A few more MS. readings were given by Crucllelis (de Curecoes) in an edition published at Amsterdam, 1658, &c., but the great names of this period continue to be those of Englishmen. The readings of the Coptic and Gothic versions were first given in the edition of (Ps. Fell) Oxf. (1572); ed. Gwyer 1705; but the greatest service which Fell rendered to the criticism of the N. T. was the liberal encouragement which he gave to Mill. The work of Mill (Oxon. 1707; Amstel. [also Roder. ed.] 1719; other copy have on the title-page 1723, 1746, &c.) marks an epoch in the history of the N. T. text. There is much in it which will not bear the test of historical inquiry, much that is imperfect in the materials, much that is crude and capricious in criticism, but when every drawback has been made, the edition remains a splendid monument of the labors of a life. The work occupied Mill about thirty years, and was finished only a fortnight before his death. One great merit of Mill was that he recognized the importance of each element of critical evidence, the testimony of MSS., versions and citations, as well as internal evidence. In particular he asserted the claims of the Latin version and maintained, against much opposition, even from his patron Ps. Fell, the great value of patristic quotations. He had also a clear view of the necessity of forming a general estimate of the character of each authority, and described in detail those of which he made use.

At the same time he gave a careful analysis of the origin and history of previous texts and of the doctrine which, even now, has in many parts not been superseded.
there is no sufficient reason for concluding that the disagreement of his ancient codices caused him to abandon the plan which he had proclaimed with undoubting confidence (Scrivener, Col. Aug. p. xix.). A complete account of Bentley's labors on the N. T. is prepared for publication (1861) by the Rev. A. E. Ellis, under the title Greek Critic. Scriv. [Published in 1862. — A.]

8. The conception of Bentley was in advance both on the spirit of his age and of the materials at his command. Textual criticism was forced to undergo a long discipline before it was prepared to follow out his principles. During this time German scholars hold the first place. Foremost among these was Besser (1687-1752), who was led to study the variations of the N. T. from a devout sense of the infinite value of every divine word. His merit in discerning the existence of families of documents has been already noticed (§ 121); but the evidence before him was not sufficient to show the paramount authority of the most ancient witnesses. His most important rule was, "Prodeuri scripturn præstet urðum; but except in the Revelation he did not venture to give any reading which had not been already adopted in some edition (Prolegomena N. T. Ger. ex codicibus antiquis, 1725; Nov. Textum. . . . 1734: Apparatus criticus, ed. 2nd cura P. D. Burk, 1763). But even the partial revision which Bengel had made exposed him to the bitterest attacks; and Wetstein, when at length he published his great edition, reprinted the received text. The labors of Wetstein (1653-1734) formed an important epoch in the history of the N. T. While still very young (1710) he was engaged to collate for Bentley, and he afterwards continued the work for himself. In 1733 he was obliged to leave Basel, his native town, from theological differences, and his Greek Testament did not appear till 1751-52 at Amsterdam. A first edition of the Prolegomena had been published previously in 1730; but the principles which he then maintained were afterwards much modified by his opposition to Bengel (comp. Preface to N. T. cura G. de Trévise, ed. 2nd. 1735). The great service which Wetstein rendered to sacred criticism was by the collection of materials. He made nearly as great an advance on Mill as Mill had made on those who preceded him. But in the use of his materials he showed little critical tact; and his strange theory of the Localization of the most ancient MSS. proved for a long time a serious drawback to the sound study of the Greek text (Prolegomena, ed. Sander, 1766, ed. Letze, 1831).

9. It was the work of Griesbach (1745-1812) to place the comparative value of existing docu-

ments in a clearer light. The time was now come when the results of collected evidence might be set out; and Griesbach, with singular sagacity, courtesy, and zeal, devoted his life to the work. His first editions (Synag. 1774; Nov. Text. ed. 1, 1777-75) were based for the most part on the critical collections of Wetstein. Not long afterwards Matth. published an edition based on the accurate collation of Morus MSS. (N. T. ex Cod. Hebraeis . . . Riga, 1782-88, 12 vols.; ed. 2nd, 1803-1807, 3 vols.). These new materials were further increased by the collections of Alter (1786-87); Bircher, Adler, and Middelaar (1788-1801), as well as by the labors of Griesbach himself. And when Griesbach published his second edition (1796-1800, 31 ed. of vol. I. by D. Schulz, 1827) he made a noble use of the materials thus placed in his hands. His chief error was that he altered the received text instead of constructing the text afresh: but in acuteness, vigor, and candor he stands below no editor of the N. T., and his judgment will always retain a peculiar value. In 1805 he published a manual edition with a selection of readings which he judged to be more or less worthy of notice, and this has been often reprinted (Verzeichn. der Codd. Gr. 1791; Codd. Gr. 1795-1804, ed. Gabler, 1824-25; Comment. Crit., 1798-1811: White's Crites GrieBachianae . . . Synopsis, 1811).

10. The edition of SchoLZ contributed more in appearance than reality to the furtherance of criticism (N. T. ed. fidem text. crit. . . . 1830-1896). This laborious scholar collected a greater mass of various readings than had been brought together before, but his work is very inconstant, and his own collations singularly superficial. Yet it was of service to call attention to the mass of unused MSS.; and, while depreciating the value of the more ancient MSS., SchoLZ himself showed the powerful influence of Griesbach's principles by accepting frequently the Alexandrine in preference to the Constantinopolitan reading (§ 14, Comp. Biblioth.-KRITISCHER REZ. . . 1825; CurE CRIT. . . 1820-1845).

(iii.) From Lachmann to the present time.—11. In the year after the publication of the first volume of SchoLZ's N. T. a small edition appeared in a series of classical texts prepared by LACHMANN (1851). In this, the admitted principles of scholarship were for the first time applied throughout to the construction of the text of the N. T.

The prescriptive right of the textus receptus was wholly set aside, and the text in every part was regulated by ancient authority. Before publishing his small edition (N. T. ex recensione C. Lachmann, Berol. 1851) Lachmann had given a short

—Gerhard von Max—The N. T. first appeared in 1711, with a selection of various readings, and a series of canons supposed to justify the received text. Some of these canons deserve to be quoted, as an illustration of the bold assertion of the claims of the printed text, as such.

Can. I. "Vetus codex non facit variatam lectionem, sed peccata lectioni sunt secundum manuum antiquas.

Can. II. "Quae non diversae fuerunt variatam lectionem, sunt quae receptam et editionem etiam non variantem maxime in omni parte."

Can. XIV. "Persone etiam antiquiores in edict et manuscriptis differeunt, etament occultatam interpretatur etiam.

Can. XVII. "Communia Patrum textus N. T. non facerent variatam lectionem."

Can. XXIX. "Ex editione lectionem textus recepti."

As examples of Can. I. we find, Matt. i. 16, quæstae for 'i. b. sec. p. 1: 25, om. τὸν πράσινον for ὄνομα τὸν πράσινον: Rom. i. 31, om. ἀνάγωγον: 1 Tim. iv. 7, 8, the editor refers to the manuscript edition, and adds: "Ex edicto, quæ byd filmum praestantissimorum MSS. edita est, indirem curiam habitum, quod in plurimis manuscriptis hucusque inventum est. ad urbem" (p. 35).

b • In a pamphlet published in 1845, SchoLZ says that he should re-publish another edition of 1797, but he should receive into the text most of those readings which he had designated in the inner margin of his Greek Testament as Alexandrine. See the quotation in Scrivener's Introd., p. 540. — A.
account of his design (Stud. v. Krit. 1839, iv.), to which he referred his readers in a brief postscript, but the book itself contained no Apparatus or Prolegomena, and was the subject of great and painful misrepresentations. When, however, the distinct assertion of the primary chains of evidence throughout the N. T. was more fairly appreciated, Lachmann felt himself encouraged to undertake a larger edition, with both Latin and Greek texts. The Greek authorities for this, limited to the primary uncial MSS. (A B C D P Q T Z F2 G2 Δ2 Η4), and the quotations of Irenaeus and Origen, were added to the apparatus. As he himself prepared the Latin evidence (Tregelles, Hist. of Gr. Text, p. 101), and revised both texts. The first volume appeared in 1842, the second was printed in 1845, but not published till 1850, owing in a great measure to the opposition which Lachmann found from his friend De Wette (N. T. ii. Pref. iv.; Tregelles, p. 111). The text of the new edition did not differ much from that of that of the former; but while in the former he had used Western (Latin) authority only to decide in cases where Eastern (Greek) authorities were divided; in the latter he used the two great sources of evidence together. Lachmann delighted to quote Bentley as his great precursor (§ 7); but there was an important difference in their immediate aims. Bentley believed that it would be possible, by editing the true text directly by a comparison of the oldest Greek authorities with the oldest MSS. of the Vulgate. Afterwards very important remains of the earlier Latin versions were discovered, and the whole question was complicated by the collection of fresh documents. Lachmann therefore wished in the first instance only to give the current text of the fourth century, which might then become the basis of further criticism. This at least was a great step towards the truth, though it must not be accepted as a final one. Griesbach had changed the current text of the 15th and 16th centuries in numberless isolated passages, but yet the late text was the foundation of his own: Lachmann admitted the authority of antiquity everywhere, in orthography; in construction, in the whole composition and arrangement of his text. But Lachmann's edition greatly differs from his text: and it is not without serious faults. The materials on which it was based were imperfect. The range of patristic citations was limited arbitrarily. The exclusion of the oriental versions, however necessary at the time, left a wide margin for later change (t. i. Pref. p. xxv.) The neglect of primary cursives often necessitated absolute confidence on slender MS. authority. Lachmann was able to use, but little fitted to collect, evidence (t. i. pp. xxv., xxxviii., xxxix.). It was, however, enough for him to have consecrated the highest scholarship by devoting it to the service of the N. T., and to have claimed the Holy Scriptures as a field for reverent and searching criticism. (The best account of Lachmann's plan and edition is in Tregelles, Hist. of Printed Text, pp. 97-115. His important critical work was Freytag, De Conformatione N. T. Crit. . . . 1841; Tischendorf, Proleg. pp. cii. – cxix.)

12. The chief defects of Lachmann's edition arise from deficiency of authorities. Another German scholar, Tischendorf, had devoted twenty years to enlarging our accurate knowledge of ancient MSS. The first edition of Tischendorf (1841) has now no special claims for notice. In his second (Leipsic) edition (1849) he fully accepted the great principle of Lachmann (though he widened the range of ancient authorities), that the text must be sought solely from ancient authorities, and not from the so-called received edition (Pref. p. xii), and gave many of the results of his own labors and valuable conclusions. The size of his text has necessarily excluded a full exhibition of evidence: the editor's own judgment was often arbitrary and inconsistent; but the general influence of the edition was of the very highest value, and the text, as a whole, probably better than any which had preceded it. During the next few years Tischendorf prosecuted his labors on MSS. with unwearyed diligence, and in 1855–59 he published his third (seventh) critical edition. In this he has given the authorities for and against each reading in considerable detail, and included the chief results of his later discoveries. The whole critical apparatus is extremely valuable, and absolutely indispensable to the student. The text, except in details of orthography, exhibits generally a retrograde movement from the best ancient testimony. The Prolegomena are copious and full of interest.

* In Oct. 1864 Tischendorf published the 1st Lieferung of his 8th critical edition of the N. T., of which 5 parts have now appeared, extending to John vi. 23, and the 6th part, completing the Gospels, has probably by this time (May, 1869) been issued in Germany. The critical apparatus is greatly enlarged, and in settling the text, Tischendorf attaches more importance to the most ancient authorities, and in particular, to the agreement of the oldest Greek and Latin MSS., than he did in the preceding edition.

1. Meanwhile the sound study of sacred criticism had revived in England. In 1844 Tregelles published an edition of the Apocalypse in Greek and English, and announced an edition of the N. T. From this time he engaged in a systematic examination of all unpublished and limited MSS., going over much of the ground which Tischendorf had covered, comparing results with him. In 1854 he gave a detailed account of his labors and principles (An Account of the Printed Text of the Greek New Testament . . . London), and again in his new edition of Horne's Introduction (1856), to which "additions" and a "Postscript" were published in 1860. On the remarkable reading μαυροφυθείς Θεός John i. 18, discussed in this Postscript, there is an article in the Bibl. Sacra for Oct. 1861, pp. 810–872. – A. ] The first part of his Greek Testament, containing St. Matthew and St. Mark, appeared in 1857; the second, completing the Gospels, has just appeared (1861). [The third, Acts and Cath. Epistles, was published in 1863: the fourth, Romans to 2 Thess., in 1869. – A.] In this he gives at length the evidence, and points out some particularly valuable early cursives: of all versions up to the 7th century: of all Fathers to Eusebius inclusive. The

The second and third editions were Grecian-Latin editions, published at Paris in 1842, of no critical value (M. Prolegg. cxix–cxxiv.). [The 2d edition contained no Appendix (text A).] The fifth was a simple text, with the variations of Elzevir, chiefly a reprint of the fourth edition of 1849. The sixth was a Triglott N. T. 1854–55 (Greek, Latin, German); 1856 (Greek and Latin).

[Dr. Tregelles' first specimen was published in 1838 (Hist. of Printed Text, p. 153).]
Latin Vulgate is added, chiefly from the Cod. Amiat. with the readings of the Clementine edition. This edition of Tischendorf differs from that of Lachmann by the greater width of its critical foundation; and from that of Tischendorf by a more constant adherence to ancient evidence. Every possible precaution has been taken to insure perfect accuracy in the publication, and the work must be regarded as one of the most important contributions, as it is perhaps the most exact, which has been yet made to the cause of textual criticism. The editions of Knipp (1787, etc.), Vater (1821), Aitmann (1829, etc.), and Hahn (1849, etc.) [also Thiele, 1814, etc.] have no peculiar critical value.\(^a\) Meyer (1829, etc.) paid greater attention to the revision of the text which accompanies his great commentary; but his critical notes are often arbitrary and unsatisfactory.

In the Greek Testament of Alford, as in that of Meyer, the text is subsidiary to the commentary; but it is impossible not to notice the important advance which has been made by the editor in true principles of criticism during the course of its publication. The fourth edition of the 1st vol. (1859) contains a clear enumeration of the authority of ancient evidence, as supported both by its external and internal claims, and corrects much that was vague in the subject in former editions. Other annotated editions of the Greek Testament, valuable for special merits, may be passed over as having little bearing on the history of the text. One simple text, however, deserves notice (Cambr. 1800, [ed. auctore et emend., 1802]), in which, by a peculiar arrangement of type, Scrivener has represented at a glance all the changes which have been made in the text of Stephens (1550), Elzevir (1824), and Beza (1656), by Lachmann, Tischendorf, and Tregelles.

14. Besides the critical editions of the text of the N. T., various collections of readings have been published separately, which cannot be wholly omitted.

In addition to those already mentioned (§ 9), the most important are by Rinck, Lucabratic Critica, 1830; Reiche, Coloss. MSS. N. T. Gr. abg. gest, inaugurat in Bod. Reg. Parisiis., edd. 1817; Scrivener, A Collection of about Twenty Texts in Mss. of the Holy Scriptures, 1853; a Transcript of the Cod. Aug. with a full Collection of Fifty MSS. 1859; and E. de Muralt, of Eusbian MSS. (N. T. 1848). The chief contents of the splendid series of Tischendorf's works (Col. Ephes. Recept., 1843; Col. Chromat., 1852; Manuscr. sect. incipita, 1846-1856: [Mon. sect. incd. nov. edd., vol. 1 (1855), ii. (1857), iii. (1860), x. (1863), vi. (1869)], Ascend. sect. apostol., 1855, [new ed., enlarged, 1861] Nov. Text. Cod. Sinait., 1860; [Col. Sinait.], 1862, N. T. Sinait. ed. 1863, and N. T. Gr. et Sin. Cod. 1865; App. cod. Sin. Int. Alex., 1857; Nov. Text. Cod. 1867, and App. cod. Nov. Text. Cod. 1869] are given in his own and other editions of the N. T. [His editions of important Latin MSS., incidentia, Horp.], 1882, and Cod. Amiat. 1884, new ed. 1891, may also be mentioned here. A [the chief works on the history of the printed text are those of Tregelles, Hist. of Printed Texts, 1854; Ruens, tooschilhe d. H. Schrift, §§ 355 ff., are very complete bibliographical references; and]

\(^a\) The unwar student should be warned against the edition of Hahn and Rittmann (1806, etc.). See the Prolegomena of Mill, Wetstein, Griesbach, and Tischendorf. To these must be added the promised (1861) Introduction of Mr. Scrivener.

III. PRINCIPLES OF TEXTUAL CRITICISM.

The work of the critic can never be shaped by definite rules. The formal and enumerative principles is but the first step in the process of revision. Even Lachmann, who proposed to follow the most directly mechanical method, frequently allowed play to his own judgment. It could not, indeed, be otherwise with a true scholar; and if there is need anywhere for the most free and devout exercise of every faculty, it must be in tracing out the very words of the Apostle and of the Lord himself. The justification of a method of revision lies in the result. Canons of criticism are more frequently corollaries than laws of procedure. Yet such canons are not without use in marking the course to be followed, but they are intended only to guide, and not to dispense with the exercise of tact and scholarship. The student will judge for himself how far they are applicable in every particular case; and no exhibition of general principles can supercede the necessity of a careful examination of the characteristics of separate witnesses and of groups of witnesses. The text of Holy Scripture, like the text of all other books, depends on evidence. Rules may classify the evidence and facilitate the decision, but the final appeal must be to the evidence itself.

What appears to be the only sound system of criticism will be seen from the rules which follow. The examples which are added can be worked out in any critical edition of the Greek Testament, and will explain better than any lengthened description the application of the rules.

1. The text must throughout be determined by evidence without allowing any prescriptive right to printed editions. In the infancy of criticism it was natural that early printed editions should possess a greater value than individual MSS. The language of the Complutensian editors, and of Erasmus and Stephens, was such as to command respect for their texts prior to examination. Comparatively few manuscripts were known, and none thoroughly; but at present the whole state of the question is altered. We are now accurately acquainted with the materials possessed by the two latter editors and with the use which they made of them. If there is as yet no such certainty with regard to the basis of the Complutensian text, it is at least clear that no high value can be assigned to it. On the other hand we have, in addition to the early apparatus, new sources of evidence of infinitely greater variety and value. To claim for the printed text any right of possession is, therefore, to be faithless to the principle of critical truth. The received text may or may not be correct in any particular case: but this must be determined solely by an appeal to the original authorities. Nor is it right even to assume the received text as our basis. The question before us is not What is to be changed? but, What is to be read? It would be superfluous to insist on this if we were not that a natural inference from the fundamental rule of critical truth in criticism. It seems to be irreverent to disturb an old belief, when real irreverence lies in perpetuating an error, however slight it may appear to be. This holds good universally. In Holy Scripture nothing

\(^\text{Appendix to Noster's Sententia de Ratione, 2d ed., p. 443 ff. and Bib. Sacra for Oct. 1871, p. 871 ff.}\)
can be indifferent; and it is the supreme duty of the critic to apply to details of order and orthography the same care as he bestows on what may be judged weightier points. If, indeed, there were any thing to be discovered in the manuscripts of the N. T. which might seem to remove it from the ordinary fortunes of books, then it would be impossible not to respect the plain sentiment which accepts the early text as an immediate work of Providence. But the history shows too many marks of human frailty to admit of such a supposition. The text itself contains palpable and admitted errors. (Acts viii. 28, ix. 5, 6; A. Pec. v. 14, xxii. 11; not to mention 1 John v. 7.) In every way analogous to those which occur in the first classical texts. The conclusion is obvious, and it is superstition rather than reverence which refuses to apply to the service of Scripture the laws which have restored so much of their native beauty to other ancient writings. It may not be possible to fix the reading in every case finally, but it is no loss the duty of the scholar to advance as far as he can and mark the extreme range of uncertainty.

2. Every element of evidence must be taken into account before a decision is made. Some uncertainty must necessarily remain; for, when it is said that the text must rest upon evidence, it is implied that by it is rested upon an examination of the whole evidence. But it can never be said that the mines of criticism are exhausted. Yet even here the possible limits of variation are narrow. The available evidence is so full and manifold that it is difficult to conceive that any new authorities could do more than turn the scale in cases which are at present doubtful. But to exclude remote chances of error it is necessary to take account of every testimony. No arbitrary line can be drawn excluding MSS. versions or quotations below a certain date. The true text must (as a rule) explain all variations, and the most recent forms may illustrate the original one. In practice it will be found that certain documents may be neglected after examination, and that the value of others is variously affected by remote conditions; but still, as no variation is inherently indifferent, no testimony can be absolutely disregarded.

3. The relative weight of the several classes of evidence is modified by their generic character. Manuscripts, versions, and citations, the three great classes of external authorities for the text, are obviously open to characteristic errors. The first are peculiarly liable to errors from transcription (comp. i. § 21 ff.). The second are liable to this cause of corruption and also to others. The genius of the language into which the translation is made may require the introduction of connecting particles or words of reference, as can be seen from the indented words in the A. V. Some uses of the article and of prepositions cannot be expressed or distinguished with certainty in translation. Glosses or marginal additions are more likely to pass into the text in the process of translation than in that of transcription. Quotations, on the other hand, are often partial or from memory, and long use may give a traditional fixity to a slight confusion or adaptation of passages of Scripture. These grounds of inaccuracy are, however, easily determined, and there is generally little difficulty in deciding whether the rendering of a version or the testimony of a Father can be fairly quoted. Moreover, the most important versions are so close to the Greek text that they preserve the order of the original with scrupulous accuracy, and even in representing minute shades of expression, observe a constant uniformity which could not have been anticipated (comp. Lachmann, N. T. i. 145 ff.). It is a far more serious obstacle to the critical use of these authorities that the texts of the versions and Fathers generally are in a very imperfect state. With the exception of the Latin Version there is not one in which a thoroughly satisfactory text is available; and the editors of Clement and Origen are little qualified to satisfy strict demands of scholarship. As a general rule the evidence ware may be disregarded where they differ from the late text of the N. T., but where they agree with this against other early authorities, there is reason to entertain a suspicion of corruption. This is sufficiently clear on comparing the old printed text of Chrysostom with the text of the best MSS. But when full allowance has been made for all these drawbacks, the mutually corrective power of the three kinds of testimony is of the highest value. The evidence of versions may show at once that a MS. reading is a transcriptional error: John i. 14, δ ετυπω (B C); Jude 12, ἄνατας (A); 1 John i. 2, καὶ ἢ σώκαμεν (B), ii. 8, σκια για σκοτία (A); iii. 21, ἐκτι (B); 2 Pet. i. 16, ἐν αἴφως; and the absence of their support throws doubt upon readings otherwise of the highest probability. The evidence of the MSS., whether of single or several, bears the testimony of an early Father is again sufficient to give preponderating weight to slight M.S. authority: Matt. i. 18, τοῦ δὲ χριστοῦ ἢ γένεσιν; and since versions and Fathers go back to a time anterior to any existing MSS., they furnish a standard by which we may measure the conformity of any MSS. with the most ancient text. On questions of orthography MSS. alone have authority. The earliest Fathers, like our own writers, see (if we may judge from printed texts) have adopted the current spelling of their time, and not to have aimed at preserving in this respect the dialectic peculiarities of N. T. Greek. But MSS. again, are not free from special idiosyncrasies (if the phrase may be allowed) both in construction and orthography, and unless an account be taken of these, wrong judgment may be made in isolated passages.

4. The mere preponderance of numbers is of itself of no weight. If the multiplication of copies of the N. T. had been uniform, it is evident that the number of later copies preserved from the accidents of time would have far exceeded that of the earlier, yet no one would have preferred the fuller testimony of the 15th century to the scantier documents of the 4th century. Some changes are necessarily introduced 'in the most careful copying, and these are rapidly multiplied. A recent MS. may have been copied from one of great antiquity, but this must be a rare occurrence. If all MSS. were derived by successive reproduction from one source, the most ancient, though few, would claim supreme authority over the more recent masses. As it is, the case is still stronger. It has been shown that the body of later copies was made under one influence. They give the testimony of one church only, and not of all. For many generations Byzantine scribes must gradually, even though unconsciously, have assimilated the text to their current form of expression. Meanwhile the propagation of the Syrian and African types of text was left to the casual reproduction of an ancient exemplar. These were necessarily far rarer than later and modified copies, and at the same time likely to
be far less used. Representatives of one class were therefore multiplied rapidly, while those of other classes barely continued to exist. From this it follows that MSS. have no abstract numerical value. Variety of evidence and yet a crowd of witnesses, must decide on each doubtful point; and it happens by no means rarely that one or two MSS. alone support a reading which is unquestionably right (Matt. i. 25, v. 4, 5; Mark ii. 22, &c.).

5. The more ancient reading is generally preferable. This principle seems to have almost a truism of its own only counter-balanced by assuming that the recent reading is itself the representative of an authority still more ancient. But this carries the decision from the domain of evidence to that of conjecture, and the issue must be tried on individual passages.

6. The more ancient reading is generally the reading of the more ancient MSS. This proposition is a corollary of the explicit testimony with the text of the oldest copies. It would be strange, indeed, if it were otherwise. In this respect the discovery of the Codex Sinaiticus cannot but have a powerful influence upon Biblical criticism. Whatever may be its individual peculiarities, it preserves the ancient readings in characteristic passages (Luke ii. 14; John i. 4, 18; 1 Thess. iii. 16). If the secondary uncials (E F G, &c.) are really the direct representatives of a text more ancient than that in N B C Z, it is at least remarkable that no uncanonical early authority preserves their characteristic readings. This difficulty is greatly increased by external considerations. The characteristic readings of the most ancient MSS. are those which preserve in their greatest integrity those subtle characteristics of style which are too minute to attract the attention of a transcriber, and yet too marked in their recurrence to be due to anything less than an incalculable law of composition. The laborious investigations of Gersdorff (Observationes in Ephes. Schrift. d. V. T. Leipzig, 1816) have placed many of these peculiarities in a clear light, and it seems impossible to study his collections without gaining the assurance that the earliest copies have preserved the truest image of the Apostolic texts. This conclusion from style is convincingly confirmed by the appearance of the genuine dialectic forms of Helminthic Greek in those MSS., and those only, which preserve characteristic traits of construction and order. As long as it was supposed that these forms were Alexandrine, their occurrence was naturally held to be a mark of the Egyptian origin of the MSS., but now that it is certain that they were characteristic of a class and not of a locality, it is impossible to resist the inference that the documents which have preserved delicate and exucent traits of apocryphal language must have preserved its substance also with the greatest accuracy.

7. The ancient text is often preserved substantially in recent copies. But while the most ancient copies, as a whole, give the most ancient text, yet it is by no means confined exclusively to them. The text of P in the Gospels, however much it has been interpolated, preserves in several cases almost alone the true reading. Other MSS. exist of most every date (8th cent. L Z, 9th cent. X Δ Λ, 10th cent. 1, 109, 11th cent. 33, 32, &c.), which contain in the main the oldest text, though in these the orthography is modernized, and other changes appear which indicate a greater or less departure from the original copy. The importance of ancient authorities has been most strangely neglected, and it is but recently that their true claims to authority have been known. In many cases where other ancient evidence is defective or divided they are of the highest value, and it seldom happens that any true reading is wholly unsupported by late evidence.

8. The agreement of ancient MSS., or of MSS. containing an ancient reading, is a test of the certain versions and citations marks a certain reading. The final argument in favor of the text of the most ancient copies lies in the combined support which they receive in characteristic passages from the most ancient versions and patristic citations. The reading of the oldest MSS. is, as a general rule, upheld by the true reading of Versions and the certain testimony of the Fathers, where this can be ascertained. The later reading, and this is not less worthy of notice, is with equal constancy repeated in the corrupted text of the Versions, and often in inferior MSS. of Fathers. The force of this combination of testimony can only be appreciated after a continuous examination of passages. A mere selection of texts conveys only a partial impression; and it is most important to observe the sources of external authorities when isolated, in order to appreciate rightly their independent value when combined. For this purpose the student is urged to note for himself the readings of a few selected authorities (A B C D L X I, 33, 69, &c., the MSS. of the Old Latin a b c d e f, &c., the best MSS. of the Vulgate, om. for. bord., &c., the great oriental versions) through a few chapters; and it may certainly be predicted that the result will be a perfect confidence in the text, supported by the combined authority of the classes of witnesses, though frequently one or two Greek MSS. are to be followed against all the remainder.

9. The disguise of the most ancient authorities often covers the existence of a text, different from that of the MSS., which they have preserved. But it happens by no means rarely that the most ancient authorities are divided. In this case it is necessary to recognize an alternative reading; and the inconsistency of Tischendorf in his various editions would have been less glaring, if he had followed the example of Griesbach in noticing prominently these readings to which a slight change in the balance of evidence would give the preponderance. Absolute certainty is not in every case attainable, and the peremptory assertion of a critic cannot set aside the doubt which lies on the conflicting testimony of trustworthy witnesses. The differences are often in themselves (as may appear) of little moment, but the work of the scholar is to present clearly in his minutest details the whole result of his materials. Examples of legitimate doubt as to the true reading occur Matt. vii. 14, 16; Luke x. 42, 43; John i. 18, ii. 8, 13; 1 John iii. 1, v. 10, 12; Rom. iii. 26, iv. 1, &c. In rare cases this diversity appears to indicate a corruption which is earlier than any remaining document: Matt. vi. 27; Mark i. 27; 2 Peter i. 21; James iii. 6, 14; Rom. i. 29, 2 Cor. iii. 17; xi. 29; ii. 8. The special form of variation in the most valuable authorities requires particular mention. An early difference of order frequently indicates the interpolation of a gloss and when the best authorities are thus divided
any ancient though slight evidence for the omission of the transferred clause deserves the greatest consideration:

Matt. i. 18, v. 32, 39, xii. 38, &c.;

Rom. iv. 1, &c.;

Jan. i. 22. And generally serious variations in expression between the primary authorities are connected by addition:

Matt. x. 29; Rom. i. 27, 29, iii. 22, &c.

10. The argument from internal evidence is always precarious. If a reading is in accordance with the general style of the writer, it may be said on the one side that this fact is in its favor, and on the other that an acute copyist probably changed the exceptional expression for the more usual one. The question is open to a suspension of judgment, and the promise of the ancient authorities is nowhere seen more plainly than in the constancy with which they combine in preserving the plain, vigorous, and abrupt phraseology of the apostolic writings. A few examples taken almost at random will illustrate the various cases to which the rule applies:

Matt. ii. 15, iv. 6, xii. 25; James iii. 12; Rom. ii. 1, viii. 24, x. 15, xx. 20 (comp. § 14). 13. That reading is preferable which explains the origin of the others. This rule is chiefly of use in cases of great complication, and it would be impossible to find a better example than one which has been brought forward by Tischendorf for a different purpose (N. T. Prof. pp. xxviii., xxxiv.). The common reading in Mark ii. 22 is δ' οἶνος ἐκεῖνος καὶ οἱ ἄροι ἄπολαυσαντες: which is perfectly simple in itself, and the undoubted reading in the parallel passage of St. Matthew. But here there are great variations. One important MS. (L) reads δ' οἶνος ἐκεῖνος καὶ οἱ ἄροι: another (D with it) δ' οἶνος καὶ οἱ ἄροι ἄπολαυσαντες: another (B) δ' οἶνος ἄπολαυσαντες καὶ οἱ ἄροι. Here, if we bear in mind the reading in St. Matthew, it is morally certain that the text of B is correct. This may have been changed into the common text, but cannot have arisen out of it. Compare James iv. 4, 12; Matt. xxiv. 38; Jude 18; Rom. vii. 25; Mark i. 16, 27.

(For the principles of textual criticism compare Griesbach, N. T. Proleg., § 3, pp. xviii. ff.; Tischendorf, N. T. Proleg. pp. xxi., xxiv.; Tregelles, On the Printed Text, 1832; 1839 ff.; (Horne's) Introduction pp. 342 ff. The Crisis of Wetstein (Proleg. pp. 290-240, Lotze) is very unsatisfactory.)

* On the application of these principles the student will find valuable hints in Griesbach's Commentarius Criticus, 2 pt. 1788-1811, and in T. S. Green's Course of Developed Criticism, etc., Lond. 1856. Reiche's Commentarius Criticus, 3 tom. Göt. 1853-62, 4to, is not very important.

1. The eastern conquests of Alexander opened a new field for the development of the Greek language. It may be reasonably doubted whether a specific Maconian dialect is not a more fiction of grammarians; but increased freedom both in form and construction was a necessary consequence of the wide diffusion of Greek. Even in Attic there is a great deduction from the classical standard of purity, though the Attic formed the basis of his language: and the rise of the common or Greek dialect (διάλεκτος κοινή, or Ελληνική) is dated from his time. In the writings of educated men who were familiar with ancient modes, this "common" dialect always preserved a close resemblance to the normal Attic but in the inter-
course of ordinary life the corruption must have been both great and rapid.

2. At no place could the corruption be greater or more rapid than at Alexandria, where a motley population, engaged in active commerce, adopted Greek as their common medium of communication. [Alexandria, p. 53.] And it is in Alexandria that we must look for the origin of the language of the New Testament. Two distinct elements were combined in this new dialect which was destined to preserve forever the fullest tidings of the Gospel. On the one side there was Hebrew conception, on the other Greek expression. The thought of the East were wedded to the words of the West. This was accomplished by the gradual translation of the Hebrew Scriptures into the vernacular Greek. The Greek had already lost the exquisitely symmetry of its first form, so that it could take the clear impress of Hebrew ideas; and at the same time it had gained rather than lost in richness and capacity. In this manner what may be called the theocratic aspect of nature and history was embodied in Greek phrases, and the power and freedom of Greek quickened and defined Eastern speculation. The theories of the "paedopsists of the 17th century (comp. Green's 'History of the Greek Language,' pp. 111, 112.) were based on a complete misconception of what we may, without presumption, feel to have been required for a universal Gospel. The message was not for one nation only, but for all; and the language in which it was promulgated—like its most successful preacher—united in one complementary attributes. [Helxenst., p. 104.]

3. The Greek of the LXX.—like the English of the A. V., or the German of Luther—naturally determined the Greek dialect of the mass of the Jews. It is quite possible that numerous provincialisms existed among the Greek-speaking Jews of Egypt, Palestine, and Asia Minor, but the dialect of their common Scriptures must have given a general unity to their language. It is, therefore, more correct to call the N. T. dialect Hellenistic than Alexandrine, though the form by which it is characterized may have been peculiarly Alexandrine at first. Its local character was lost when the LXX. was spread among the Greek Dispersion; and that which was originally confined to one city or one work was adopted by a whole nation. At the same time much of the extreme harshness of the LXX. dialect was softened down by intercourse with Greek or greasing foreigners, and conversely the wide spread of proselytism familiarized the Greeks with Hebrew ideas.

4. The position of Palestine was peculiar. The Aramaic (Syro-Chaldee), which was the national dialect after the Exile, existed side by side with the Greek. Both languages seem to have been generally understood, though, if we may judge from other instances of bilingual countries, the Aramaic would be the chosen language for the common intercourse of Jews (2 Macc. vii. 21, 27). It was in this language, we must believe, that our Lord was accustomed to teach the people; and it appears that He used the same in the more private acts of His life (Mark iii. 17, v. 4, vii. 34; Matt. xxvii. 56; John i. 42; cf. John xx. 18). From the hallowed matronal of the LXX. we derive sufficient proof of the familiarity of the Palestinian Jews with the Greek dialect; and the judicial proceedings before Pilate must have been conducted in Greek. (Comp. Griffield, 'Apology for the LXX,' pp. 76 sq.) [LANGUAGE OF THE N. T.]

5. The Roman occupation of Syria was not altogether without influence upon the language. A considerable number of Latin words, chiefly referring to acts of government, occur in the N. T., and they are probably only a sample of larger innovations (iustus, levis, consuetudo, statorum, cordifius, dignos, melius, praetorius, frater, etc.; Matt. xxvi. 59; 1 Cor. xi. 7; 1 Pet. ii. 13). On the other hand, there is a large body of words of motley origin, of which Ko:aliv, kTivO\tov, sKiaov, sLav, mekalov, neumabiva, St. Paul) distinctively marked in the N. T. These are necessarily fatal to all real advance in the accurate study of the words or sense of the apostolic writings. In the case of St. Paul, no less than in the case of Herodotus, the evidence of the earliest witnesses must be decisive as to dialectic forms. Egyptian scribes preserved the characteristics of other books, and there is no reason to suppose that the deferred those of the N. T. Nor is it reasonable to conclude that the later stages of a language are governed by no law or that the introduction of fresh elements destroys the symmetry which in reality it only changes. But if old misconceptions still linger, very much has been done lately to open the way to a sounder understanding both of the form and the substance of the N. T. by Tischendorf (as to the dialect, N. T. [ed. 7] Proleg., pp. xxvi. sqq.); by Winer (as to the grammatical rows, Gram. d. N. T. Sprachleh., 4th ed., 1855 [7th ed., 1867]); comp. Green's 'Grammar of the N. T. Dial.' ed. 1842 [2d ed. 1862, and A. Buttmann, Gram. d. neuter. Sprachbruch. (1839)], and by the later commentators (Fritzsche, Lücke, Bleek, Meyer, Alford, [Ellicott, Lightfoot, Blumlein]). In detail comparatively little remains to be done, but a philosophical view of the N. T. language as a whole is yet to be desired. For this it would be necessary to take account of the commanding authority of the LXX. over the religious dialect, of the constant and living power of the spoken Aramaic and Greek, of the mutual influence of infection and syntax, of the inherent vitality of words and forms, of the history of technical terms and of the creative energy of Christian truth. Some of these points may be discussed in other articles; for the present it must be enough to notice a few of the most salient characteristics of the language as to form and expression.

7. The formal differences of the Greek of the N. T. from classical Greek are partly differences of vocabulary and partly differences of construction. Old words are changed in orthography (1) or in form (2). In the case of the sufficient number of variant forms or novel constructions (3) are introduced. One or two examples of each of these classes may be noticed. But it must be again remarked that the language...
of the N. T., both as to its lexicography and as to its grammar, is based on the language of the LXX. The two stages of the dialect cannot be examined satisfactorily apart. The usage of the earlier periods of continuous usage and the usage of the later; and many characteristics of N. T. Greek have been neglected or set aside from ignorance of the fact that they are undoubtedly found in the LXX. With regard to the forms of words, the similarity between the two is perfect; with regard to construction, it must always be remembered that the LXX. is a translation, executed under the influence of the Hebrew, while the books of the N. T. (with a partial exception in the case of St. Matthew) were written freely in the current Greek.

(1.) Among the most frequent peculiarities of orthography of Hellenistic Greek which are supported by conclusive authority, are— the preservation of the ι before ψ and ψ in λαβώθησαι and its derivations, λαβέται, λαβόλησεν, and of υ in compounds of οῦν and ἐν, σύγχυσθην, συμπάθηται, ἐγγεγραμμένον. Other variations occur in τετράκοντα, ἐρωταί, etc., ἐκκαθηρισθεί, etc. It is more remarkable that the aspirate appears to have been introduced into some words, as ἐλείς (Rom. viii. 20; Luke vi. 35). The ι ηθλικοτότων in verbs (but not in nouns) and the ι of οὕτως are always preserved before consonants, and the hiatus (with a ι especially) is constantly (perhaps always) disregarded. The forms in ειρ-ειρ, ειρο, etc. are more difficult of determination, and the question is not limited to later Greek.

(2.) Peculiarities of inflection are found in μαχηρ, κληρον μον (2), συγγενέων (2), βαθεόν, etc.; These peculiarities are much more common in verbs. The augment is sometimes doubled: ἁπεκατοστάθη, sometimes omitted: οἰκοδυμένης, κατακυσθῆναι. The doubling of ι is commonly neglected: εράτησεν. Unusual forms of tenses are used: ἔτεσα, εἶτα, [θλιν.;] etc.; unusual moods: καθώσκω (1 Cor. xii. 3?); and unusual conjunctions: μικρότεροι for μικρότερον, ἀλαγά λαγόν, παρευσείδαιαν for παρευσείδαν (Jude 4).

* Note also ἀνάπηδρουντα, Rev. xv. 13, 21 fut. pass. of ἀναπέδω, strangely misunderstood by Robinson, N. T. Lec. p. 804 (Addenda); also such forms as εἰρηνί, κακοφθαίνει; ἐγκαθήσεται, ἐπέσταλε, πέπνυμαι, γεγονότος, ἄριστος, παρευσείδειαν. (Jude 4.)

(3.) The new words are generally formed according to old analogy—οἰκοδυμένης, εὐκαίρεις, καθημερινόν, ἀπεκαταθηκές; and in this respect the frequency of compound words is particularly of notice. Other words receive new senses: χρηματίζεις, δόλῳ, περισταθῆναι, υπονόμησις; and some are slightly changed in form: ἀνάθεμα (γῆν), ἡξίαν (γῆς), βασιλισσα (comp. Winer, Gr. § 6).

(4.) The most remarkable construction, which is well attested both in the LXX. and in the N. T., is that of the conjunctions ὅταν, ἦταν, with the present indicative: Gal. vi. 12 (?), ἦν δικοίτοι, Luke xix. 2, ἦταν προσεύχοσθε, as well as with the future indicative (comp. Tisch. Mark iii. 2). ὅταν is even found with the imperfect and aor. αὐτοῖς, Mark xi. 11, ὅταν ἤδεως; (Apol. viii. 1, των ἀρχιπρέποντων, ὅταν ἤδεως; Apart from the combination of moods (Apoc. iii. 9) and in effective connectives (Mark ix. 26) can be paralleled in classical Greek, though such constructions are more frequent and anomalous in the Apocalypse than elsewhere.

(5.) The peculiarities of the N. T. language which have been hitherto mentioned have only a rare and remote connection with interpretation. They illustrate more or less the general history of the decay of a language, and offer in some few instances curious problems as to the corresponding changes of modes of conception. Other peculiarities have a more important bearing on the sense. These are in part Hebraisms (Aramaisms) in (1) expression, and (2) construction, and in part (3) modifications of language resulting from the substance of the Christian revelation.

(1.) The general characteristic of Hebraic expression is vividness, as simplicity is of Hebraic syntax. Hence there is found constantly in the N. T. a personality of language (if the phrase may be used) which is foreign to classical Greek. At one time this occurs in the substitution of a pregnant metaphor for a simple word: οἰκοδυμένα (St. Paul), σπαγχιστῶμα (Gospels), πλατυνόμενης τῆς κατάθεσις (St. Paul), πρώτων λαμβάδων, προσπολομένων, προσωπολημέτων. At another time in the use of prepositions in place of cases: κράζειν ἐν μελήματι φωνῆς, ἐν μαχαιρί ἀπολύσαι, ἄδος ἀπὸ τοῦ αἰώνα. At another in the use of a vivid expression for a preposition: ἐπὶ εἰρήσωσαν, ἐπὶ νέστοια, ἀποστέλλων σὺν χείρι ἀγγέλου, ἐν χείρι μεσίτου, φεύγεις ἀπὸ προσώπου τυφών. And sometimes the personal act is used to describe the whole spirit and temper: παρευσείδαιαν ὑπόσια τυφών, etc. (2.) The chief peculiarities of the syntax of the N. T. lie in the reproduction of Hebraic forms. Two great features by which it is distinguished from classical syntax may be specially single out. It is markedly deficient in the use of particles and of oblique and participial constructions. Sentences are more frequently coordinated than subordinated. One clause follows another rather in the way of constructive parallelism than by distinct logical sequence. Only the simplest words of connection are used here as a substitute for the varieties of expression by which Attic writers exhibit the interdependence of numerous ideas. The repetition of a key-word (John i. 1, v. 31, 32, xiii. 33) or of a leading thought (John x. 11 ff., xvii. 14-19) often serves in place of all other conjunctions. The words quoted from another are given in a direct objective shape (John vii. 40, 41). Illustrative details are commonly added in abrupt parenthesis (John iv. 6). Calm emphasis, solemn repetition, grave simplicity, the gradual accumulation of truths, give to the language of Holy Scripture a depth and permanence of effect found nowhere else. It is difficult to single out isolated phrases in illustration of this general statement, since the final impression is more due to the iteration of many small points than to the striking power of a few. Apart from the whole context the influence of details is almost inappreciable. Constructions which are most distinctly Hebraic (πληρωθούν πλήρωσα, βαθαίνω τελευταί, εὐδοκεῖν ἐν τις, αὐξά ἀγαπᾶται, etc.) are not those which give the deepest Hebrew coloring to the N. T. diction, but rather that pervading monotony of form which, though correct in individual clauses, is wholly foreign to the vigor and elasticity of classical Greek. If the student will carefully analyse a few chapters of St. John, in whom the Hebrew spirit is most...
constant and marked, inquiring at each step how a classical writer would have avoided repetition by the use of distinct and not in separable elements: it would have indicated dependence by the use of absolute cases and the optative, how he would have united the whole by establishing a clear relation between the parts, he will gain a true measure of the Hebraic style more or less pervading the whole N. T., which cannot be obtained from a mere catalogue of phrases. The character of the style lies in the total effect and not in separable elements: it is seen in the spirit which informs the entire text for more vividly than in the separate particles. [We-scott's] Introduction to the Gospels, pp. 211-232.

(3) The purely Christian element in the N. T. requires the most careful handling. Words and phrases already partially current were transfigured by embodying new truths and forever consecrated to their service. To trace the history of these is a delicate question of lexicography which has not yet been thoroughly examined. There is a danger of confounding the apostolic usage on the one side with earlier Jewish usage, and on the other with later ecclesiastical terminology. The steps by which the one served as a preparation for the apostolic sense and the latter naturally grew out of it require to be diligently observed. Even within the range of the N. T. itself it is possible to notice various phrases of fundamental ideas and a consequent modification of terms. Language and thought are both living powers, mutually dependent and illustrative. Examples of words which show this progressive history are abundant and full of instruction. Among others may be quoted, παντις, παντός, παντεύονται τοιαύτα; δέκαον, δικαίους; ἁγγαρίαν, ἁγγιάζων; καλεῖος, κλαύρος, ἐκλεκτός; ἀγάπη, ἐπίς, χρόνος; εὐαγγελίαν, εὐαγγέλια, εὐαγγελία, εὐαγγελιστὴς, εὐαγγελισμός, εὐαγγελίσθη, ἑως ἕως, ἑως ἥν, ἑως ἂν, ἑως ἢ. Not is it too much to say that in the history of these and such like words lies the history of Christianity. The perfect truth of the apostolic phraseology, when examined by this most rigorous criticism, contains the fulfilment of earlier anticipations and the germ of later growth.

9. For the language of the N. T. calls for the exercise of the most rigorous criticism. The complexity of the elements which it involves makes the inquiry wiser and deeper, but does not set it aside. The overwhelming importance, the manifold expression, the gradual development of the message which it conveys, call for more intense devotion in the use of every faculty trained in other schools, but do not suppress inquiry. The Gospel is for the whole nature of man, and is sufficient to satisfy the reason as well as the spirit. Words and idioms admit of investigation in all stages of a language. Inquiry itself is subject to law. A mixed and degenerate dialect is not less the living exponent of definite thought, than the most pure and vigorous. Rude and unlettered men may have characteristic modes of thought and speech, but even (naturally speaking) there is no reason to expect that they will be less exact than others in using their own idiom. The literature of the N. T. is the apostolic writing must be gained in the same way as the literal sense of any other writings, by the fullest use of every appliance of scholarship, and the most complete confidence in the necessary and absolute connection of words and thoughts. No variation of phrase, no peculiarity of idiom, no change of tense, no change of order can be neglected. The truth lies in the whole expression and no one is to set aside any part as trivial or indifferent.

10. The importance of investigating most patiently and most faithfully the literal meaning of the sacred text must be felt with tenfold force, when it is remembered that the literal sense is the outward embodiment of a spiritual sense, which lies beneath and quickens every part of Holy Scripture (OLD TESTAMENT). Something of the same kind of double sense is found in the greatest works of human genius, in the Oresten for example, or Hamlet; and the obscurity which hangs over the deepest utterances of a dramatist may teach humility to those who complain of the darkness of a prophet. The special circumstances of the several writers, their individual characteristics reflected in their books, the slightest details which add distinctiveness or emphasis or choice of words, are thus charged with a divine force. A spiritual harmony rises out of an accurate interpretation. And exactly in proportion as the spiritual meaning of the Bible is felt to be truly its primary meaning, will the importance of a sound criticism of the text be recognized as the one necessary and sufficient formation of the noblest and highest development of the Biblical writer's art, the only way found to rest upon it. Faith in words is the beginning, faith in the word is the completion of Biblical interpretation. Impatience may destroy the one and check the other; but the true student will find the simple text of Holy Scripture ever pregnant with lessons for the present and promises for ages to come. The literal meaning is one and fixed: the spiritual meaning is infinite and multiform. The unity of the literal meaning is not disturbed by the variety of the inherent spiritual applications. Truth is essentially infinite. There is thus one sense to the words, but countless relations. There is an absolute fitness in the parables and figures of Scripture, and hence an abiding pertinence. The spiritual meaning is, so to speak, the life of the whole, living on with unchanging power through every change of race and age. To understand it accurately, (on the human side) by unwavering trust in the ordinary laws of scholarship, which finds in Scripture its final consecration.

For the study of the language of the N. T., Tischendorf's 7th edition (1859), Gnirchel's Editt Hellenisticum with the Scholiast (1843-48), Bruder's Concordantia (1843 [3rd ed. 1867]), and Winer's Grammaticum 6th edition, 1853, translated by Masson, Edinb. 1850, are indispensable. To these may be added Trommian's Concordantia . . . LXX. interpretation, 1718, for the usage of the LXX., and Suseer's Theolusomen, 1862 [2d ed. 1728], for the later history of some words. The lexicons of Schleusner to the LXX. (1820-24), and N. T. (4th ed. 1858), Kühner and sweetman, a Large Class of matters most uncertain. Thesaurus Walth [N. T. 1822] translated by E. Edinsson, Andover, 1825; [3d ed. of the original, 1843]; Apocryph., 1853 are much better in point of accuracy and scholarship. On questions of dialect and grammar there are important collections in Sturz, De Dialecta Marci, et Alec. (1788); Thiersch, De Part, veris, Alec. (1841); Lobbe's Philologia Graeca (1829); Parpandems Gr. (1857); Pathol. Semn. Gr. Ped. (1843); Prytannoi & Verb. Gr. et Nomina verbal, Technologia, (1846); Pathol. Semn. Gr. Ptole. (12 pt. 1853-62). The Indices of Jacobson to the Patres Apostolai (1840) are very complete and useful. The

comp. Professor Stuart's Notes and Captions in the Book of Daniel, for April 1834, iv. 277—278, and C. Winstanley, Table of Certain Passages in the Greek Testament of the N. T., addressed to Grandville Sharp, Enq., reprinted with additions, Cambr. 1819.

See further, on the language and style of the N. T., Professor the Rev. Henry Broadus, in his New Testament Grammar, 1804, Nezev. N. T., Gotting. 1810, 4to, transl. by Dr. Robinson in the Bibl. Repos. for Oct. 1831, i. 638—641. (In the same vol. of this periodical are other valuable articles bearing on the subject.) Also Klauser (Dovish Chasen), Hermeneutik d. N. T., Leipzig, 1841, p. 337 et seq; Wilke, Hermeneutik d. N. T., Leipzig, 1843—44, and Neuest. Rhetoric, ibid. 1843; and Zeisschott, Profingründlicb u. bibliischer Sprachkritik (1850).

Works on the style of particular writers of the N. T. might also be mentioned here; see, for example, the addition to John, Gospel of, vol. ii. p. 1439 B. See also J. D. Schulze, Der schriftstellerische Werth u. Char. des Petrus, Judas u. Josephus, Weissenfels, 1802; ditto, des Evange. Markus, in Keil and Tauchner's Auslese, liber iii.; Seckendorf, Schriften, Der Sprach- und geschichtskritik der Schriftsteller d. N. T., Theil i. (Leipzig, 1816; no more published); Holtzmann, Die Synag. Evangelien (Leipzig, 1863), pp. 271—358; and the various discussions on the genuineness of the Acts of the Apostles, the Pastoral Epistles of Paul, the authorship of the Epistle to the Hebrews, the 2d Epistle of Peter, and the Apocalypse, for which see the articles on the respective books.

The Critical Greek and English Concordance to the N. T., by the late C. F. Hudson, which is announced for speedy publication (Boston, 1869), will be a valuable supplement to Bruder, giving the various readings of Griesbach, Lachmann, Tischendorf, and Tregelles, and at the same time preserving the best features of the Englishman's Greek Concordance of the N. T. It will be incomparably superior to Schmoller's recent work, which is very unsatisfactory.

NEW YEAR. [Trumpets, Feast of.]

NEZIATH (נֶזִּיאת) [famous, First; conquered, Ges.]: Nazia, [Vat. Nazoeu], Alex. Nezib in Ezr.: Nazia. [Vat. FA. Aceia, Alex. Nezceia] in Neh.: Nezia. The descendants of Neziah were among the Nethinim who returned with Zerubabel (Ezr. ii. 54; Neh. vi. 50). The name appears as Nazerith in 1 Esdr. v. 32.

NEZIUTH (נֶזִּית) [garrison, pillor]: Na• seis: [Röm. Nazerist]: Alex. Neziath: Nezib, a city of Judah (Josh. xv. 43 only), in the district of the Shefelah or Lowland, one of the same district as Beith and Mareshah. To Eusebius and Jerome it was evidently known. They place it on the road between Eleutheropolis and Haboron, 7 or 9 (Emeh) miles from the former, and there it still stands under the almost identical name of Beit Nabi, or Chirbch Nisib, 2½ hours from Beit Jibrin, on a rising ground at the southern end of the Wady es-Sar, and with Beith and Mareshah within easy distance. General information from Speckh-Church, 220, 221 and Tolder 959. The former mentions the remains of ancient buildings, especially one of apparently remote age, 120 feet long by 30 broad. This, however — with the curious discrepancy which is so remarkable in Kas
NIBHAZ

NICODEMUS

NIBHAZ (-ninez), and in some MSS. ninez, and ἱνήζη in Modern Greek, is a name which is believed to be the title of a deity in the mythology of the ancient Greeks and Romans. The name is most commonly associated with the god Dionysus, the god of wine, in Greek mythology.

NICODEMUS (nine'do-mus), a Pharisee, a ruler of the Jews, and a teacher of Israel (John iii. 1, 2), whose secret visit to our Lord was the occasion of the discourse recorded by St. John. The name was not uncommon among the Jews (Joseph. Ant. iv. 3, § 2), and was not doubt borrowed from the Greeks. In the Talmud it appears under the form נִכְדָּם, and some would derive it from נִכְדָּם, innocent, δέξω, blood (i. e. δέξω, to receive that which is offered). The article in John iii. ii. is the definite article, which is only generic, although Winer and Bp. Middleton suppose that it implies a reference.
Nicodemus is only mentioned by St. John, who narrates his nocturnal visit to Jesus, and the conversation which then took place, at which the Evangelist may himself have been present. The high station of Nicodemus as a member of the Jewish Sanhedrin, and the anawed scorn under which the rulers consigned their inward conviction (John iii. 2) that Jesus was a teacher sent from God, are sufficient to account for the secrecy of the interview. A constitutional timidity make him the man par excellence in the character of the inquiring Pharisee, which could not be overcome by his vacillating desire to befriend and acknowledge One whom he knew to be a Prophet, even if he did not at once recognize in him the promised Messiah. Thus the few words which he interposed against the rash injustice of his colleagues are cautiously rested on a general principle (John vii. 59), and betray no indication of his faith in the Galilean whose heart despaired.

And even when the power of Christ's love, manifested on the cross, had made the most timid disciples bold, Nicodemus does not come forward with his splendid gifts of affection until the example had been set by one of his own rank, and wealth, and station in society (xix. 39).

In these three notices of Nicodemus a noble and simple love of truth shines out in the midst of hesitation and fear of man. We can therefore easily believe the tradition that after the resurrection (which would supply the last outward impulse necessary to confirm his faith and increase his courage) he became a professor of the faith of Christ, and received baptism at the hands of Peter and John. All the rest that is recorded of him is highly uncertain. It is said, however, that the Jews, in revenge for his conversion, deprived him of his office, beat him cruelly, and drove him from Jerusalem; that Gamaliel, who was his kinsman, hospitably sheltered him until his death in a country house, and finally gave him honorable burial near the body of Stephen, where Gamaliel himself was afterwards interred. Finally, the three bodies are said to have been discovered on August 3, 4 B.C. 415, which day was set apart by the Roman Church in honor of the event (Phot. Biblioth. Cod. 171; Lucian, De S. Steph. inventione).

The conversation of Christ with Nicodemus is appointed as the Gospel for Trinity Sunday. The choice at first sight may seem strange. There are in that discourse no mysterious numbers which might shadow forth truths in their simplest relations; no distinct and yet simultaneous actions of the divine persons; no separation of divine attributes. Yet the instinct which dictated this choice was a right one. For it is in this conversation alone that we see how our Lord himself met the difficulties of a thoughtful man; how he checked, without noticing, the self-assumption of a teacher; how he lifted the half-believing mind to the light of nobler truth.

If the Nicodemus of St. John's Gospel be identical with the Nicodemus Ben Gorion of the Talmud, he must have lived till the fall of Jerusalem, which is not impossible, since the term γεροων, in John iii. 4, may not be intended to apply to Nicodemus himself. The arguments for their identification are that both are mentioned as Pharisees, wealthy, pious, and members of the Sanhedrin (Taymud, f. 19, d.c. See Otho, Lex. Rob. s. v.); and that in Tawilla the original name (altered on the occasion of a miracle performed by Nicodemus in order to procure rain) is said to have been "Cyz", which is also the name of one of five Rabbinical disciples of Christ mentioned in Sanhedr. f. 43, 1 (Otho, s. v. Christus). Finally, the family of this Nicodemus are said to have been reduced from great wealth to the most squalid and horrible poverty, which however may as well be accounted for by the fall of Jerusalem, as by the change of fortune resulting from an acceptance of Christianity.

On the Gospel of Nicodemus, see Fabricius, Cod. Ioseph. p. 213; Thilo, Cod. Apoc. l. 478. In some MSS. it is also called "The Acts of Pilate." It is undoubtedly spurious (as the conclusion of it sufficiently proves), and of very little value.

F. W. F.

* Nicodemus is called a "ruler of the Jews" (δικανος των Ιουδαιων) in John iii. 1; and as that title (δικανος) is given in some passages (John vii. 36; Acts iii. 17, &c.) to members of the Sanhedrin, it has been inferred that he was one of that body. He was probably also a member of the Law council, (δικεσσας τον Ιουδαιων, John iii. 10 = μουσαιδακαλων); and hence belonged to that branch of the Council which represented the learned class of the nation. Of the three occurrences (see above) in which Nicodemus appears in the Gospels-history, the second occupies an intermediate position between the first and the third as to the phase of character which they severally exhibit; and in this respect, as Tholuck suggests, the narrative is seen to be "psychologically true" (Evang. Johannis, p. 215, 6th Aufl.). We have no means of deciding whether Nicodemus was present in the Sanhedrin at the time of the Saviour's arraignment and trial before that court. If he was present he may have been too undecided to interpose any remonstrance (none is recorded), or may have deemed it unavailing amid so much violence and passion. Stier would find in αδικαιος a characteristic shrinking from anything like a direct personal avowal of his own belief (Ruden Jesus, iv. 11, 4th Aufl.); but, more probably, he meant, in this way, to recognize more strongly the ample evidence furnished by Christ's miracles that He was a teacher sent from God. In this confession perhaps he associates with himself some of his own rank who were already known to him as secret believers (see xii. 42; xix. 38).

NICO LA ITANS (Nicolaitus: Nicollas). The question how far the sect that is mentioned by this name in Rev. ii. 6, 15, was connected with the Nicolaitans of Acts vii. 5, and the traditions that have gathered round his name, will be discussed below [Nicolas]. It will here be considered how far we can get at any distinct notion of what the sect itself was, and in what relation it stood to the life of the Apostolic age. It has been suggested as one step towards this
result that the name before us was symbolic rather than historical. The Greek Ἰωνίαται is, it has been said, an approximate equivalent to the Hebrew בֶּלֶן, the bord or Vitrings, deriving it from בֶּלֶן נְוָיָה, or, according to another derivation, the devourer of the people (so Hengstenberg, as from בֶּלֶן נְוָיָה). If we accept this explanation we have to deal with one sect instead of two—we are able to compare with what we find in Rev. ii. the incidental notices of the characteristics of the followers of Balaam in Judges 13 and 2 Peter, and our task is proportionately an easier one. It may be urged indeed that this theory rests upon a false or at least a doubtful etymology (Rotenius, k. r. בֶּלֶן נְוָיָה, makes it περίγρινος), and that the message to the Church of Pergamos (Rev. ii. 14, 15) appears to recognize "those that hold the doctrine of Balaam," and "those that hold the doctrine of the Nicolaitans," as two distinct bodies. There is, however, a sufficient answer to both these objections. (1.) The whole analogy of the mode of teaching which lays stress on the significance of names would lead us to believe, not for philological accuracy, but for a trend, strongly-marked paraenemastik, such as men would recognize and accept. It would be enough for those who were to hear the message that they should perceive the meaning of the two words to be identified. (2.) A closer inspection of Rev. ii. 15 would show that the ἔννοια εἰκός, k. r. A, imply the resemblance of the teaching of the Nicolaitans with that of the historical Balaam mentioned in the preceding verse, rather than any kind of contrast.

We are now in a position to form a clearer judgment of the characteristics of the sect. It comes before us as presenting the ultimate phase of a great controversy, which threatened at one time to destroy the unity of the Church, and afterwards to taint its purity. The controversy itself was inevitable as soon as the Gentiles were admitted, in any large numbers, into the Church of Christ. Were the new converts to be brought into subjection to the whole Mosaic law? Were they to give up their old habits of life altogether—to withdraw entirely from the social gatherings of their friends and kinmen? Was there not the risk, if they continued to join in them, of their catechumens or unconscious of which had been slain in the sacrifices of a false worship, and of thus sharing in the idolatry? The apostles and elders at Jerusalem met the question calmly and wisely. The burden of the Law was not to be imposed on the Gentile disciples. They were to abstain, among other things, from "meats offered to idols" and from "defilement" (Acts xv. 20, 29), and the doctrine was held as the great charter of the Church's freedom. Strange

as the close union of the moral and the positive commands may seem to us, it did not seem so to the mind at Jerusalem. The two sins were very closely allied, often even in the closest proximity of time and place. The fathomless impurity which overspread the empire made the one almost as inseparable as the other from its daily social life.

The messages to the Churches of Asia and the barbarous Edipics (2 Peter and Jude) indicate that the two evils appeared at that period also in close alliance. The teachers of the Church branded them with a name which expressed their true character. The men who did and taught such things were followers of Balaam (2 Pet. ii. 15; Jude 11). They, like the false prophet of Pethor, united brave words with evil deeds. They made their liberty a cloak at once for cowardice and licentiousness. In a time of persecution, when the eating or not eating of things sacrificed to idols was more than ever a crucial test of faithfulness, they persuaded men more than ever that it was a thing indifferent (Rev. ii. 13, 14). This was bad enough, but there was a yet worse evil. Mingling themselves in the orgies of idolatrous feasts, they brought the impiety of those feasts into the meetings of the Christian Church. There was the most imminent risk that its Agape might become as full of abominations as the bacchanalia of Italy had been (2 Pet. ii. 12, 13, 18; Jude 7, 8; comp. Liv. xxxix. 8-19). Their sins had already brought scandal and discredit on the "way of truth." And all this was done, it must be remembered, not simply as an indulgence of appetite, but as part of a system, supported by a "doctrine," accompanied by the boast of a prophetic illumination (2 Pet. ii. 1). The trance of the son of Boor and the sensual deaconship into which he led the Israelites were strangely reproduced.

These were the characteristics of the followers of Balaam, and, worthless as most of the traditions about Nicocas may be, they point to the same distinctive evils. Even in the absence of any teacher of that name, it would be natural enough, as has been shown above, that the Hebrew name of ignominy should have its Greek equivalent. If there were such a teacher, whether the proselyte of Antioch or another, the application of the name to his followers would be proportionately more pointed. It confirms the view which has been discussed regarding the character of that stress is laid in the first instance on the "words" of the Nicolaitans. To hate those deeds is a sign of life in a Church that otherwise is weak and faithless (Rev. ii. 6). To tolerate them is well nigh to forfeit the glory of having been faithful under persecution (Rev. ii. 14, 15). (Comp. Némmer's Apostelgesch. p. 629; Gieseler's Lkrh. Hist. § 29; Hengstenberg and Mord on Rev. ii. 6; Nier, Words of the Rham Sarjons, xx.)

E. H. P.
NICOLAS (Nicolaos [keeper of the people]: Nicolaochus), Acts vi. 15. A native of Antioch, and a proselyte to the Jewish faith. When the church was still confined to Jerusalem he became a convert; and being a man of honest report, full of the Holy Ghost and of wisdom, he was chosen by the whole multitude of the disciples to be one of the first seven deacons, and he was ordained by the Apostles, A. D. 33.

A sect of Nicolaitans is mentioned in Rev. ii. 6, 15: and it has been questioned whether this Nicol was connected with them, and if so, how closely.
